Letter from Mr. T.B. Gubhaju of Nepal Tofu Factory, Kathmandu. 1991. Oct. 6. "A company named 'Nepal Soya Industries' was run by Mr. Achutananda Vaidya before 1983. The name of the product was Vita Tofu. This company was closed long ago, perhaps between 1983 and 1985. So far as I know, this company had only a grinding machine and a press. The owner, Mr. Achutananda Vidya, who was born in Nepal, got training in brewing from Japan. The company was located at 9/374 Bhedashing, Jamguthi, Kathmandu. I met Mr. Vaidya in the Government Food Research Lab in 1983 when we discussed the tofu business in Nepal. So far as I know, Mr. Vaidya had to close his tofu production company for the following reasons: 1. He was in Government services so he could not pay more attention to his private business. 2. He did not have the requisite equipment for tofu production."

Letter from Mr. T.B. Gubhaju of Nepal Tofu Factory, Kathmandu, followed by phone call. 1992. Aug. 19 and Sept. 7. He believes that members of the family of Mr. Achutananda Vaidya had started selling tofu in Nepal long before 1983. He is still trying to collect specific information and he has Mr. Vaidya's phone number. Mr. Vaidya, who speaks good English, told him that members of his family began making tofu in Nepal in about 1974-1977–but Mr. Vaidya did not know the exact dates.

Letter from Mr. T.B. Gubhaju of Nepal Tofu Factory. 1992. Sept. 22. Mr. Achutananda Vaidya resides at 9/374 Bhedashing, Jamguthi, Kathmandu. Phone: 229130. His uncle, Mr. Raghubir Baidya, started making tofu in 1970, but had to stop after a few months. For further details, please contact Mr. Vaidya.

Letter from Mr. Achutananda Vaidya of Nepal Soya

© Copyright Soyinfo Center 2013

Industries. 1992. Dec. 26. "I started making tofu in 1974. I did not have any connection with my uncle in starting my tofu company, however I did have a chance to see him make tofu at his residence in Kathmandu, and from that time I got the idea in my mind to make tofu myself. I learned the details of the process in Nepal from Mr. Akifumi Nakamura of Kobe, Japan, a member of the Japan Overseas Cooperation Volunteers (JOCV), who worked at the Central Food Research Laboratory in Kathmandu, which was also my office in 1974. I worked together with him as a counterpart for two years learning how to make tofu."

His business card notes: "Food Technology in Brewing from Japan. Products & Suppliers: Tofu (Vita), Soyamilk (Vitabean milk), Soya Curd, Soya Sauce, & Miso."

His Curriculum Vitae notes that he was born on 28 Dec. 1947, resides at 9/374 Bhedasingh, Kathmandu, and is married. See also his letter of 19 Jan. 1993.

Letter from Mr. Achutananda Vaidya of Nepal Soya Industries. 2002. April 12. He started to make and sell this tofu in Dec. 1974.

3116. Fu, P'ei-mei. 1974-1976. Peimei shi pu [Pei Mei's Chinese cook book. 2 vols.]. Taipei, Taiwan. Illust. (color). No index. 22 cm. [Chi; Eng]*
• ***Summary:*** Volume 1 published April 1976, copyright 1969; vol. 2 published July 1974, copyright 1974. Chinese title also written *P'ei-mei shih p'u.* Address: Cooking teacher, Taipei, Taiwan.

3117. **Product Name:** Tow Fu (Bean Curd).
Manufacturer's Name: Amoy Canning Corp. (Hong Kong) Ltd.
Manufacturer's Address: Hong Kong.
Date of Introduction: 1974.
Wt/Vol., Packaging, Price: Can.
New Product–Documentation: Listing in The Vegetarian Health Food Handbook (UK). 1974. p. 175. Amoy imported this canned product to the UK from Hong Kong.

3118. Central Bureau of Statistics (CBS), Indonesia. 1974. [Industrial census]. Indonesia. [Ind]*
• ***Summary:*** Contains early statistics on commercial production of tempeh, tofu, Indonesian soy sauce (*kecap*), and Indonesian miso (*tauco*) in Indonesia. Producers are divided into 2 groups by size: Home industry (1-4 workers) and small scale industry (5 or more workers). The amount of soybeans processed in tonnes/year is as follows for home industry/small-scale industry: tempeh (1.8/12.3), tofu (3.8/15.2), soy sauce (0.8/3.7), and miso (4.7/6.3).

Note: This is the 2nd earliest document seen (Sept. 2011) that gives industry or market statistics for tempeh, or for tempeh in Indonesia.

3119. Echigo, Takashi; Takenaka, Tetuo. 1974. Mitsubachi ni yoru hachimitsu-chû yûki-san no seisei [Production of organic acids in honey by honeybees]. *Noka* (*Agricultural Chemistry*) 48(4):225-30. [16 ref. Jap; eng]
• ***Summary:*** Glucono lactone is a natural constituent of honey. Address: Dep. of Agricultural Chemistry, Tamagawa Univ., Machida, Japan.

3120. **Product Name:** [Smoked Tofu (Mushroom, Chestnut, or Walnut)].
Manufacturer's Name: Komatsugawa Tofu Co. and Meiji Foods Co.
Manufacturer's Address: Japan.
Date of Introduction: 1974.
Ingredients: Incl. deep-fried tofu pouches, firm tofu, seasonings.
Wt/Vol., Packaging, Price: One 100 gm piece packed in oil in a sardine can. Retails for $0.65.
How Stored: Shelf stable.
New Product–Documentation: Shurtleff & Aoyagi. 1979. Tofu & Soymilk Production. p. 159. "Made from deep-fried tofu pouches stuffed with mashed firm tofu and seasonings." Note: This is the earliest commercial smoked tofu made or sold in Japan.

3121. Korea. 1974. Seoul, Korea: International Publicity Corp. 68 p. Illust. (color). 24 cm. [Eng]*
• ***Summary:*** Soybeans can be used to make six different foods: Soy sauce, soybean mash, roasted soy flour, soy sprouts, tofu, and soybean oil. Many Koreans still make their own soy sauce at home, starting in the fall. A detailed description of the process is given.

3122. **Product Name:** Tofu [Regular, Soft, or Firm], Fried Tofu Pouches, and Spiced Tofu.
Manufacturer's Name: Mandalay Food Products Inc.
Manufacturer's Address: 135 Mott St., Manhattan, New York City, NY 10002.
Date of Introduction: 1974.
How Stored: Refrigerated.
New Product–Documentation: Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 397. Mandalay Food Products, 135 Mott St., New York, NY 10002. Office phone: 212-874-6600. Owner: Mr. U Han Kyu or Lisa. Factory at 450 Broome St., New York, NY 10013. Phone: 212-966-0338.

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Mr. U. Han Kyu. New office phone: 212-431-9190. Soya Bluebook. 1983. p. 77.

Talk with Thein Win. 1987. Dec. 29. This company is Burmese. Mr. Maung Myint of Mighty Soy, Win's cousin, was one of the original founders. They now make 8-10 sizes and shapes of tofu, 2 sizes of soymilk. For all products, they

© Copyright Soyinfo Center 2013

use 100 x 60 lb sacks of soybeans a week. Address is now 640 Dean St., Brooklyn, NY 11238.

Talk with Roland Myint. 1994. Feb. 15. He was born in Burma, but he fled the country through Thailand in the 1960s when it went Communist. After living in Japan, he arrived in the USA in 1965 as a refugee and settled in New York City. He bought tofu-making equipment from Yokohama, Japan, then in about 1973 or 1974 he started making tofu at Mandalay Foods Products at 135 Mott St. in New York City. He invested $300,000 to $400,000 in the business but it was not very successful, probably because it was ahead of its time. Ballet dancers were among his main customers in New York. In 1976 he sold his shares in the company, which is still in business and growing nicely. It is now owned by two men and a woman. Then he did 3 years of research on deodorizing soymilk in California, including research at the food lab. at Cal Davis; he has a brother with a PhD from Cornell University. He taught Maung Myint, his nephew who now runs Mighty Soy Inc. in Los Angeles, how to make tofu. Roland is now age 65; he runs a gas station in Pacifica, California.

3123. Abe, Koryû; Tsuji, Shigemitsu. 1974. Tôfu no hon [The book of tofu]. Tokyo: Shibata Shoten. 328 p. Illust. Index. 19 cm. [1 ref. Jap; eng+]

• ***Summary:*** This book contains one of the best histories of tofu published to date, including a good summary of Shinoda's research on tofu history.

Contents: Part I: Preface. 1. Various documents on tofu. 2. The origin of tofu. 3. Tofu as a food and soybeans. 4. Production methods of tofu and second generation products. 5. Chinese tofu seen from documents. 6. The legend of Liu An, king of Huai-nan of (*Wainan ô Ryûan*), and tofu. 7. The legend of Toroshijû and tofu. 8. Japanese tofu seen from documents.

Part II: The *Tofu Hyakuchin.* Part III: A selection of 100 modern tofu recipes.

On page 4 is an interesting quote by the Chinese Buddhist master/priest Yinyuan Longqi (Ingen), who lived 1591-1673. He introduced the Obaku sect of Zen Buddhism to Japan and erected the famous Manpuku-ji temple at Obaku, Uji, Japan (south of Kyoto) in 1661. It was named after the Wanfu / Manpuku-ji Temple at Obakusan, Fukien [Fujian] province, China, which was the leading Zen temple in China at the time (Joya 1960, p. 745, 326). In Japan, he was surprised to find tofu unlike any he had known in China. In praise of this new softer type of tofu, he composed an intricate yet simple proverb which is known to this day. It described both the character of Japanese tofu and that of a man who wishes to pass freely and peacefully through this fleeting, illusory world. The proverb reads: *"Yo no naka wa, mame de shikaku de yawaraka de, mata rôjaku ni nikumare mo sezu..."* Each of the three middle lines has a double meaning, allowing the poem to be read either: (1) "In this world, made of soybeans, square / clean(ly) cut, soft, and not disliked by old and weak people"; or (2) "In this world, practicing diligence (or healthy/hard working), being proper and honest, having a kind heart, and not disliked by old and weak people."

Page 66: The earliest known reference to tofu was in the *Qing Yilu* (Jap: *Seiiroku*), written during the Northern Song dynasty [960-1127] by Tao Ku (Jap: *Tôkoku*). In this work it explains why the early name for tofu (Jap: *Shôsaiyô* = vice governor's mutton) appeared. This is the story about a poor vice-governor named *Jishû* (in Japanese). He was very poor and couldn't afford to buy mutton, so he bought a few pieces of tofu every day and ate it as a side dish with rice. Seeing this, people in that area began to call tofu the "vice-governor's mutton." This story tells us that tofu was widely consumed by the people, and was less expensive than mutton. After the appearance of the *Quing Yilu* tofu began to be mentioned much more often in the literature. But during the Northern Song dynasty, since tofu was regarded as a poor-man's food, people didn't write about it so much.

Page 74-84: 6. Life of Lord Liu An, of Huai-nan. I have already mentioned that the theory that tofu was discovered or first made by Lord Liu An some 2,000 years ago depended largely on the *Bencao Gangmu* (Jap: *Honsô Komoku*) by Li Shizen, which appeared in 1596 during the Ming dynasty. And in the poems by *Shuki* (?). Although we are not sure whether or not this was an historical fact, I think there was a reason for it. Therefore, in this chapter, I would like to go into the relationship between Liu An's colorful life and tofu a little more deeply. The best early source about the life of Lord Liu An is the *Shiji* (Jap: *Shiki*), "Records of the historian," by Sima Qian which appeared in about 90 BCE.

Page 329 tells about the authors (autobiographical): Koryû Abe was born in 1922 (Taisho 11) in Tokyo. He graduated from *Nippon Daigaku, Geijutsu-gakubu, Bungaku-ka* (literature). In 1968 he went to work for K.K. Japan Art-sha. In Dec. 1971 he self-published a facsimile edition of the ancient classic *Tofu Hyakuchin.* He is presently editor of Japan Art-sha's *Hôchô-Geijutsu* (The art of the knife) and a consultant to Daitô Chôrishi-kai (Big East Cooking Society).

Shigemitsu Tsuji was born in 1920 in Kyoto. He graduated from Kyoto Nishô, then apprenticed as a cook in the restaurant Sagano in Tokyo. He later joined the army and served as a special cook to the head officer. After World War II he became the 11th owner of Nakamura-ro, a famous Kyoto restaurant. He is presently a cooking instructor for NHK, ABC, and MBS television stations, and special instructor at the following cooking schools: Osaka Abenotsuji Chôrigakkô, Kyôto Ryôri Gakkô, and Tôkyû Cooking School. Address: Tokyo, Japan.

3124. Ali-Bab. 1974. The encyclopedia of practical gastronomy. Translated by Elizabeth Benson. New York, NY: McGraw-Hill. vii + 471 p. Illust. 24 cm.

© Copyright Soyinfo Center 2013

• ***Summary:*** This is a translation of *Gastronomie pratique*. In the first section, titled "Gastronomy through the ages," the subsection on "Great Britain" (p. 20) states: "The inferiority of English cooking manifests in its sauces and ragoûts. The English use too many aromatic herbs, condiments, and pickles. Under the pretext of cooking simply they often use, instead of our sauce bases made from broths or our simmered sauces, very strong industrially prepared sauces such as ketchup, soy sauce, Worcestershire sauce, and Harvey sauce. Englishmen use them in such quantities that they end up by completely smothering the taste of the original preparation."

Page 44: "83. The *catjang* is a fermented bean curd." See p. 31.

Soy related recipes: Potage crème veloutée de soja aux perles (Cream of soya bean soup velouté with tapioca, with "2 lbs. soya bean sprouts," p. 103.

A note just below this recipe reads: *"Soja* or *Soya hispida*, which originates in the warm regions of Asia, is still known under the name of *Glycine hispida*, colloquially called Chinese peas. This is a legume of the Phaseolae family. In China and Japan it is used a great deal, especially among the poorer classes. These vegetables are mainly used in the preparation of pasta, sauces, and a type of cheese [tofu]. Only recently introduced into Europe, only the sprouts are in general use").

Soja au jus (Soy bean sprouts with meat broth, with "2 lbs. soya bean sprouts," p. 341).

Inside front dust jacket: The author, whose real name was Henri Babinsky, was of Polish ancestry, born in 1855 in Paris and died in 1931.

Note: The 1st edition was published in 1907 in Paris. The 2nd edition was published in 1912.

3125. Altschul, Aaron M. ed. 1974. New protein foods. Vol. 1A. Technology. New York, NY: Academic Press. xiv + 511 p. [1750* ref]
• ***Summary:*** Contains 10 chapters by various authors. Five of these are cited separately. Address: Dep. of Community Medicine & International Health, Georgetown Univ. School of Medicine, Washington, DC.

3126. Brackman, Agnes de Keijzer. 1974. Art of Indonesian cooking: The ABC's. Singapore: Asia Pacific Press. 127 p. 23 cm. First published in 1970.
• ***Summary:*** This recipe book, with a long introduction to each chapter, contains numerous soy-related recipes: Soya fish (Ikan ketjap, p. 24; Ketjap is "sweet soya sauce" [probably ketjap manis]). Soya fish, large (Ikan ketjap besar, p. 25). Soya chicken (Ajam ketjap, p. 38). Braised soya duck (Bebek smor ketjap, p. 48). Spicy soya sauce (Sambal ketjap, p. 74). Fermented soya beans (Sambal goreng tempe, p. 77; a must for the rijsttafel [rice table]). Peppered bean cakes [with tofu] (Sambal goreng tahoe, p. 82). Indonesian salad [with tofu] (Gado-gado, p. 85). Spiced soya (Sambal ketjap, p. 106).

The back matter notes that the best source of Indonesian ingredients is the Dutch company Conimex, in Baarn, Netherlands. There is a page of ideas for ingredient substitutes in the West (for sweet soya sauce substitute "equal amounts of Chinese or Japanese soya sauce and molasses"), and a 3-page Indonesian-English kitchen glossary. Address: Brookfield Center, Connecticut.

3130. Cottrell, Edyth Young. 1974. The oats, peas, beans & barley cookbook. Santa Barbara, California: Woodbridge Press. 271 p. Illust. Index. 24 cm.
• ***Summary:*** This very creative Seventh-day Adventist vegetarian cookbook, featuring nature's most economical foods, contains 450 recipes including many using soybeans and gluten (see p. 59-68), and many color photos. One acre of soybeans will supply 34 times as many calories, 49 times as much protein, and 33 times as many vitamins as beef produced on one acre. Soy-related recipes include: Garbanzo-soy-oat patties with Brazil nuts (p. 39). Soybeans–Prairie gold (Boiled soybeans, p. 51. Freezing soaked soybeans helps to shorten the cooking time. The use of soft or spring water in soaking and cooking also helps to reduce the cooking time. The author adds salt to soybeans after they have been boiled for at least 1 hour. Baked soybeans (p. 52). Soy-oat patties with tomato sauce (with whole soybeans,

© Copyright Soyinfo Center 2013

p. 53). Tofu (p. 54, curded with calcium lactate or calcium carbonate, then seasoned with Vegex or Savorex). Creamed curd cheese: May be used as cottage cheese (p. 55; made with tofu curds and soy sour cream). Scrambled tofu (p. 56). Rice with tofu–Chicken style (p. 56-57). Home-baked bread (with soy flour, p. 70-76). Modified pioneer bread (with soy flour, p. 81). Pioneer soy bread (p. 82). Soy-oat waffles (p. 109). Barley-soy waffles. Cornmeal-soy waffles. Millet-soy waffles (p. 111). Rice-soy waffles (p. 112). Soya French toast (p. 116). Cornmeal with soy grits (p. 117). Corn granola (with soy flour, p. 118). Good earth granola (with soy flour, p. 119).

One chapter, titled "Soybean Magic" (p. 121-26) contains the following soy-related recipes: Soybean concentrate: Replaces milk and eggs in many recipes (Note: This is fresh soybean puree, or gô, made with the hot water grind method). Soy milk and concentrated soy milk. Cream sauces. Soy whipped topping. Soy cream. Soy sour cream. Sweet cream custard sauce.

Whipped soy topping (with fortified soy milk powder, p. 141). Cabbage baked in 'soy sour cream' (p. 165). Cauliflower baked in soy cream (p. 167). Soy mayonnaise (with concentrated soy milk, p. 195). Savory yeast spread with soy milk, p. 196).

Pages 255-67 give a nutritional analysis of each of the recipes in this book. A photo on the rear cover shows Cottrell. A second edition was published in 1980 by Woodbridge. As of early 1993 some 157,000 copies of this book are in print. Address: Research Nutritionist, Loma Linda Univ. School of Health, Loma Linda, California.

3131. Gaskin, Stephen; Farm, The. 1974. Hey beatnik! This is The Farm book. Summertown, Tennessee: The Book Publishing Co. 100 p. Illust. No index. 28 cm. Pages are unnumbered.

• ***Summary:*** The Farm is a community of 600 people living on a 1,700 acre farm in Summertown, Tennessee. They have about 300 acres under cultivation, and during the summer about 200 of this is in soybeans. They practice a complete and total vegetarian diet; no one eats flesh foods or dairy products, drinks alcohol, or smokes tobacco. They do this for religious reasons, to be compassionate to animals and to leave enough food for everyone. "It is so grossly uneconomical and energy expensive to run soybeans through a cow and then eat the cow instead of just eating the soybeans that its virtually criminal."

One two-page spread titled "Yay Soybeans!" begins: "Here's a spiritual reason for being a vegetarian. You can get ten times as much protein growing soybeans than eating beef cattle. If everyone was vegetarian, there would already be enough to go around, and no one would be hungry." It contains recipes for: Soy milk. Soy cheese (let soy milk stand in a warm place until the curd has separated from the whey, then boil the curds with salt, drain and press). Soy yogurt (cultured). Soy butter (made with 3/4 cups each soy flour and water, 1 teaspoon salt, and 1 cup oil). Soy mayonnaise. Granola (with soy flour). Raw gluten. Gluten roast. Fried gluten. Gluten burritos. Soybean stroganoff.

Another two-page spread is titled "The Soy Dairy: Soy Milk," by Alexander and the Soy Dairy. It begins: "Soy milk is an easily digestible form of soybean protein. It can be made into whipped cream, sour cream, ice cream, cheese and yogurt. It contains the same amount of protein as cow's milk, but less calcium and no cholesterol. We made 60 gallons a day for total cost of 30 cents a gallon." There follows a description of exactly how The Farm's soy dairy makes soymilk, what equipment is used, and where it was obtained. The text ends: "Please write to the soy dairy if you have any questions about soy milk, or stop by for a visit and tour, and we'll be happy to give you a glass of milk to taste. Love, Alexander and the Soy Dairy."

This book is loaded with wonderful photos, including: (1) Shunryu Suzuki, roshi. (2) A large field of soybeans. (3) Three long-haired members of The Farm eating (L-R): David Chalmers, Charles Hunnicutt, and Wilbur Jordan. (4) A little girl, Susannah Frohman, sitting on a stool drinking a cup of soymilk, with her other hand on a gallon jar of soymilk. (5) The inside of the soy dairy. (6) Leslie Jordan happily drinking soymilk from a gallon jar in front of a truck that is delivering soymilk in milk cans. Standing by the truck is Roger Kanies. Mitchell and Nancy Shapiro are sitting on the ground nearby. (7) Many views of Stephen Gaskin. (8) Growing, harvesting, crushing, and cooking sweet sorghum for use as a sweetener (a light, sweet syrup). Address: Summertown, Tennessee.

3132. Hanson, L.P. 1974. Vegetable protein processing. Park Ridge, New Jersey: Noyes Data Corporation. xii + 308 p. See p. 264-77. Illust. 25 cm. Company index. Inventor index. U.S. patent number index. Series: Food Technology Review, no. 16.

• ***Summary:*** The Foreword begins: "The detailed, descriptive information in this book is based on U.S. patents relating to the processing of proteins of vegetable origin.

"The book has a double purpose in that it supplies detailed technical information and can be used as a single guide to the U.S. patent literature in the field."

Contents: Introduction. General process for vegetable proteins: Removal of lipids, protein isolation processes, protein treatment processes, protein hydrolysates. Processing whole soybeans. Processing full fat soy products. Defatted soy products. Soy protein concentrates. Soy protein isolates. Soy hydrolysates: Enzymatic hydrolysis, hydrolysis under acid conditions nutrient amino acid compositions.

Cottonseed protein. Grain proteins (incl. wheat gluten and zein). Processing other vegetable proteins (sunflower meal, safflower seeds, sesame seeds, castor beans, peanuts, rapeseed, alfalfa, coconut, mistletoe).

Extruded fiber processing (incl. Boyer process). Other protein fiber production methods. Textured protein gels and expanded products. Consumer products (simulated milk products {high yield process from soybeans, soy milk from sprouted beans, deodorizing soybean and peanut milks, wet milling of vegetable protein, dispersible soy protein for milks, dual inoculation for flavor improvement of soy milk, lipoxygenase inactivated full fat soy flour for milk}, other dairy type products {soy yogurt, heat stable cheese from soy milk, blue cheese from soy milk}, paste spread, tofu, miso and tempa [tempeh] products, flavoring materials, miscellaneous products {whipping agents from soy protein, malt treatment of soy for use in cereals, soy protein–soy lecithin mixture}). Address: USA.

3133. Himalayan International Institute. 1974. The Yoga way cookbook. 1st ed. Honesdale, Pennsylvania: Himalayan International Institute. 203 p. *
• ***Summary:*** This is a natural foods, vegetarian cookbook. Page 7 contains basic information about various soyfoods. Soy-related recipes include: Soybean rice (p. 37). Soy burgers (p. 38). Soy tacos (p. 39). Miso soup (p. 99). Tofu-avocado sandwich (p. 193). Tofu salad dressing (p. 194).

3134. Hunter, Beatrice Trum. 1974. Favorite natural foods: Adapted from a series of programs on WGBH, Boston. New York, NY: Simon and Schuster. 219 p. Index. 21 cm. [154 ref]
• ***Summary:*** Contents: Foreword. 1. Vegetables, vegetables. 2. Perking up the salad bowl. 3. Sprouts (incl. legume seeds {alfalfa, chick pea, lentil, mung bean, peanut, pinto bean, soybean}, grain seeds, vegetable seeds, herb seeds, weed seeds, oil seeds {flax, safflower, sesame, sunflower}). 4. Whole grains. 5. The Cornell mix [for bread; Dr. Clive McCay]. 6. Sourdough. 7. Sauerkraut. 8. Yogurt. 9. Soybeans. 10. Satisfying that sweet tooth: Dried fruit desserts, confections, snacks. 11. Of special concern: Baby foods, brown-bagging, party fare, making good foods even better. Appendix.

Contents of chapter 9, Soybeans: Introduction. Soybean sprouts. Fresh green soybeans as a vegetable: Freezing, canning, drying. Recipes for whole dry soybeans (2). Making soybean pulp (put cooked, drained soybeans through a meat grinder; recipe for green peppers stuffed with soybean pulp). Roasting dry soybeans (soak, drain, and dry roast). Making soybean milk (recipes for spiced soybean milk, brown rice pudding with soybean milk). Making soybean curd (also called "soybean cheese" or "tofu." From soybean milk, from fermented soybean milk, from soybean flour, from soybeans). Using soybean flours (three types: high-fat or full-fat, low-fat or medium-fat, minimum-fat or fat-free). 100% soybean flour cookies (grain-free). Other soybean products you can buy: Soybean grits and soybean flakes (with 1 recipe). Soybean lecithin (with 2 recipes). Tamari, miso. The soybean and you: Meat alternatives, tempeh, textured vegetable protein products (inferior), fabricated soy foods in school lunch programs ("a nutritional crime"). Avoid mock foods.

About the author: She is the author of numerous books and winner of the French Company's Tastemakers Award. She and her husband, John, live in New Hampshire. Nationally known for her lectures and demonstrations on natural foods, she is a member of the Price-Pottenger Nutrition Foundation and twice a speaker for the Martha Jones Lectures in Nutrition at the Ashbury Theological Seminary in Kentucky. She holds a B.A. from Brooklyn College and a Master's degree from Columbia University. She has done graduate work at State Teachers College in Buffalo, New York, and at Harvard University. A small photo of Beatrice Trum Hunter appears on the front dust jacket of the hardcover edition. Address: New Hampshire.

• ***Summary:*** Contents: 43 easy-to-make egg and tofu recipes, each accompanied by color photos. Useful ideas for daily life. Address: Tokyo, Japan.

3136. Kikuchi, Grace F. 1974. Tofu recipes. Ann Arbor, Michigan: Published by the author. 47 p. Illust. by Lou Bohr. No index. 22 cm. Spiral bound.
• ***Summary:*** Contents: 1. To begin with: Homemade tofu, okara. 2. Soups and sauces: Clear and miso soups, mushroom tofu soup, tofu sauce for vegetables. 3. Poached, steamed, fried: Hiyadofu–chilled, yudofu–hot, stewed tofu, fried tofu, steamed tofu, ganmodoki. 4. Pots–one dish meals: Hamanabe, fresh pork and vegetables, chicken mizutaki, sukiyaki, shabu shabu, sin sul lo. 5. With fish: Seafood mizutaki, tofu steamed with fish, tofu with flounder, sakamushi, tofu and tuna fish. 6. With this and that: Stir-fried tofu, soboro domburi, mandoo, meatballs made with tofu, tofu with scrambled eggs, tofu with pork and miso, beef with tofu and chili peppers. Glossary.

There is a full-page illustration at the beginning of each section. On the book's cover, occupying the top 80% of the page, above the English title, are the two large Chinese characters for "tofu."

Note 1. This is the earliest known book on tofu ever published in the Western world or in a European language. It is spiral bound, sells for $1.25, has white covers front and back, and was printed by Braun-Brumfield, Inc. in Ann Arbor, Michigan. All but 12 of the recipes contain meat, fish, or poultry. A small sheet, stapled to the title page, is titled: "Meatless recipes in this book."

Note 2. The author's formal married name is Mrs. Chihiro Kikuchi. Address: 260 Sumac Lane, Ann Arbor, Michigan 48105.

• ***Summary:*** About natural food and vegetarianism. Pages 185-91 discuss soya, which is called "vegetable meat" and from which one can obtain lecithin, soymilk, whole soy flour, miso, tofu, shoyu, etc. The nutritional composition of soybeans is given.

3141. Kramer, Rose; Zuckert, Mimi. 1974. The very last cookbook: Or how to save money, stay healthy, and impress your friends. Millbrae, California: Celestial Arts. 79 p. Illust. Index. 22 cm.
• ***Summary:*** A vegetarian cookbook. Page 19 contains a recipe for Tofu Cake or Pie. Address: (Millbrae, California).

3142. Larson, Jeanne R.; McLin, Ruth. 1974. The vegetable protein and vegetarian cookbook. New York, NY: Arco Publishing Co. 216 p. Illust. Index. 24 cm. Reprinted in 1980.
• ***Summary:*** The authors may be Seventh-day Adventists since they make widespread use of "meatless meats" made by Loma Linda Food Co. and Worthington Foods, both Adventist-run companies. Pages 11-14 list these meatlike products in the following categories: 7 dry vegetable proteins to which liquid must be added, or which are used for seasonings: Granburger. Vitaburger. Meat loaf mix. Burger aid. Stripple zips. Baco-Bits. Gravy quik.

35 canned foods: Rediburger. Vegeburger. Chopletburger. Vegetarian burger. Madison burger. Non-meat balls. Prime burger. Vitaburger. Chili. Choplets. Cutlets. Skallops. "209." Vegesteaks. Dinner bits. Tender bits. Dinner cuts. Tastee cuts. Dinner rounds. Salisbury steak. Frysticks. Numete. Protose. Proteena. Nuteena. Vegechee. Vegelona. Wham. Beef slices. Chicken slices. Linketts. Little links. Big franks. Saucettes. Veja-links.

30 frozen foods (said to be by far the tastiest of the vegetarian meats): Beef slices, loaf, and cubes. Corned beef slices, loaf, and cubes. Smoked beef slices, loaf, and cubes. Beef pie. Chicken slices, roll, cubes. Chicken pie. Chickettes. Wham slices, roll, cubes. Prosage. Vegetarian fillets [fish alternatives]. Holiday roast. Salisbury steak. Stripples. Smoked turkey slices or loaf. Fri-pats. Soy-chee. Vegechee. Soycheeze. Lentils. Garbanzos. Boston style soybeans. Green soybeans [probably harvested dry rather than fresh]. Savorex. Tastex. Savita. Vegex. Chicken seasoning. Beef seasoning. Smokene. Baco-bits.

Soy-related recipes include: Soybean loaf (with cooked mashed soybeans, p. 39). Tofu loaf (p. 149; "Tofu can be obtained at Chinese food stores. If not, use canned soy cheese found in most health food stores"). Tender crisp vegetables (soybean sprouts, p. 197).

3143. Li Shizeng xian sheng ji nan ji [Zhi sang wei yuan hui bian] [Essays in memory of Mr. Li Shizeng]. 1974. Taipei, Taiwan: s.n. 258 p. Illust. facsim. Portrait. 21 cm. [Cht]*
• ***Summary:*** Note: Li Yu-ying, a soyfoods pioneer in Paris, France, lived 29 May 1881 to 3 Sept. 1973. Contents: Photos of Li Shizeng = Li Yu-ying while he was alive. Li's own brush calligraphy. Color funeral photos. Elegaic couplets. Contents of telegrams received at funeral. On pages 189-90 are descriptions of Li's tofu company in France and the book that he published; these descriptions are similar to those found in books about him published previously.

Captions of sepia photos at front of book:

3144. Lo, Kenneth H.C. 1974. Chinese vegetable and vegetarian cooking. London: Faber & Faber, Ltd. 172 p. Index. 21 cm.
• ***Summary:*** This original edition, published in London, is smaller in height, has no illustrations, and 13 fewer pages than the American edition published the same year. The recipes are the same, but on slightly different pages; For details, see the American edition (1974).

3145. Lo, Kenneth H.C. 1974. Chinese vegetarian cooking. New York, NY: Pantheon Books (Div. of Random House). 185 p. Illust. by Tom Funk. Index. 22 cm.
• ***Summary:*** Originally published in 1974 in London, England, as "Chinese Vegetable and Vegetarian Cooking" by Faber & Faber, Ltd. However that book is smaller in height, has no illustrations, and 13 fewer pages than this American edition. The entire text has been lightly edited and re-set for American cooks and readers. The recipes are basically the same, but on slightly different pages, and with some titles slightly changed (e.g., from "sesame jam" to "sesame paste," p. 133).

In the Introduction, under "Flavoring," the following soybean products are listed: Soy sauce, black beans (salted), soybean paste (yellow and black), bean-curd cheese (red and yellow). Soy-related recipes include: Steamed bean curd with peanut butter sauce (p. 50). Hot-marinated bean-curd sticks [dried twisted yuba sticks] with quick-fried [mung] bean sprouts (with "yellow bean-curd cheese" [fermented tofu], p. 60-61). The Lo Han dish of the monks' mixed vegetables (with tofu, and "red bean-curd cheese" [fermented tofu], p. 72-73). Hot assembly of shredded bamboo shoots and bean curd... (with tofu and "bean-curd cheese [fermented tofu], p. 74). Hot assembly of chestnuts, sliced lotus root, gingko nuts, peanuts, Chinese mushrooms, and bean curd (with tofu and "white bean-curd cheese" [fermented tofu], p. 75). Hot black bean and tomato sauce (Ratatouille Chinoise; with salted black beans and soybean paste, p. 82-83). Basic bean-curd soup (p. 105). Enriched bean-curd soup (p. 105). Soy eggs (with soy sauce, p. 125).

Note 1. This is the earliest English-language document seen (Oct. 2011) that uses the terms "yellow bean-curd cheese" or "red bean-curd cheese" or "white bean-curd cheese" to refer to fermented tofu.

There is an entire chapter titled "Bean Curd" (p. 135-48), with an introduction and the following recipes: Cold bean curd (with soy sauce and peanut oil). Cold bean curd with sesame paste or peanut butter ("Use 1½ tablespoons sesame paste," p. 136). Hot-and-savory bean-curd pudding (with salted black beans). Hot-and-pungent bean-curd pudding. Red-cooked bean curd with bean-curd sticks [yuba] (with soybean paste and soy sauce; the sticks are about 20 inches long). Stir-fried bean curds. Bean curd stir fried with [mung] bean sprouts or spinach. Bean curd stir fried with green beans. Deep-fried bean curd stir fried with duck eggs and cucumber skins. Deep-fried bean curd stir fried with eggs, mushrooms, and wood ears. Stir-fried shredded bean curd with dried bamboo shoots, dried mushrooms, lily-bud stems, and seaweed. Clear-simmered bean curds. Clear-simmered bean curd with lettuce and cellophane noodles. Clear-simmered bean curd with [mung] bean sprouts, water chestnuts, and sliced cucumbers.

Note 2. This is the earliest English-language document seen (June 2003) that uses the term "sesame paste."

3146. Masuda, Koh. editor in chief 1974. Kenkyusha's new Japanese-English dictionary. 4th edition. Tokyo: Kenkyusha. xiii + 2111 p. 27 cm. [Eng; jap]
• ***Summary:*** The first edition of this superb dictionary was published in 1918, the second in 1931, and the third in 1954. The words are listed in alphabetical order. Some of the definitions of soy-related terms are quite poor. Examples:

Daitokuji natto: not listed.

edamame: "green soybeans." [Better: Green vegetable soybeans, or Edamamé].

Hamananatto: not listed.

Hamanatto: not listed.

hiryôzu: not listed.

kinugoshi [tofu]: fine-grained *tofu*.

kogori-dôfu = kôya-dôfu.

Note. This is the earliest English-language document seen (April 2013) that uses the the term *kogori-dôfu* or the term *kôya-dôfu* to refer to dried-frozen tofu.

koikuchi shoyu: not listed.

kôji: *"koji."* Good.

miso: *"miso."* Good. Also defines: [ama-miso]: slightly-salted miso.

[miso-koshi]: a miso strainer.

[miso mame]: a soybean; a soya (bean).

[miso-shiru]: miso soup. And many more.

nattô: "fermented soybeans." [Better: Whole soybeans fermented with *Bacillus subtilis*]. Nattô-jiru: "Miso soup with minced fermented soybeans." Good.

nomame: not listed.

okara: bean-curd (*tofu*) refuse; lees of bean curd.

omiotsuke [Jap: Misoshiru] See miso [Miso soup; word used by women only].

otsuke [Jap: Misoshiru] Miso potage (soup).

saishikomi shoyu: not listed.

shitaji: soy. See shôyu.

© Copyright Soyinfo Center 2013

shôyu: "soy (sauce)." Better: Soy sauce.

tamari: "(a kind of) soy; soy sauce; sauce from refined soy."

tôfu: "bean curd [cheese]; *tofu.*

[yaki-dofu]: "roasted bean curd."

[tofu itcho]: a piece (cake) of bean curd.

[tofu-ya]: "a tofu dealer (seller, maker)."

tônyû: "soybean (soya) milk." [Better: Soymilk, soya milk, or soybean milk].

tsurumame: not listed.

usukuchi shoyu: not listed.

yuba: "dried bean curds" [sic. Better: The protein-lipid film formed atop soymilk when it is heated].

3147. Newman, Marcea. 1974. The sweet life: Marcea Newman's natural-food dessert book. Boston, Massachusetts: Houghton Mifflin Co. 161 p. Illust. by Linda Stine. Index. 29 cm. A 1981 revised edition contained 176 p. [63* ref]

• ***Summary:*** This early and beautifully presented natural foods cookbook contains very innovative and tasty tofu dessert recipes made with limited natural sweeteners and no dairy products. It discusses the harmful effects of refined and denatured foods, with details on white flour, sugar, oil, salt, eggs, milk, and baking powder [which contains alum, a product of aluminum; "it may even be harmful"].

Chapter 1, titled "Natural necessities: Equipment, techniques, and ingredients," gives good definitions of and introductions to amasake (p. 6), miso (p. 10), tamari (p. 12), and tofu (soybean cheese, p. 13). Soy-related recipes include: Basic cake II with tofu sour creame (p. 25). Cheesecake tofu pie (p. 37). Cantaloupe cheesecake (p. 37, with tofu). Upside-down tofu cake (p. 38). Mincemeat filling with miso (p. 50-51). Tofu poppy seed filling (for pastries or phylo, p. 53). Instant tofu creame (p. 59). Tofu creame (p. 59). Tofu creame whip (p. 60). Tofu sour creame I and II (p. 60). Tofu custard (p. 62). Apple tofu delight (p. 82). Creame puffs with amasake filling (p. 82). Cherry tofu strudel (p. 88). Tofu sour creame cherry tart (p. 92). Thanksgiving squash-mincemeat pie (with miso in the filling, p. 98-99).

The inside dust jacket gives a brief biography of the author, who was born and raised in New York. In Berkeley, California, she studied Japanese and natural-food cooking, and helped to start a "noodle bar" where she baked her first dessert. Now she lives in Boston and caters weddings, parties and school fairs with natural and organic foods and desserts.

An Appendix (p. 151-52) lists the name and address of 39 suppliers of natural foods in the USA (divided into five regions) 2 in Canada. This list includes the following companies. Northeast: Erewhon Trading Co. (33 Farnsworth St., Boston, Massachusetts 02210), Good Nature Distributing Co. (Box 447, Export, Pennsylvania 15632), Infinity Co. (173 Duane Ave., New York, NY 10005), Shadowfax (25 N. Depot St., Binghamton, NY 13901), Sundance Organic Food (R.D. #1, Box 146A, Coventry, Connecticut 06238), Walnut Acres (Penns Creek, Pennsylvania 17862; founded by Paul Keene).

Southeast: Collegedale Distributors (Box 492, Collegedale, Tennessee 37315), Laurelbrook Foods (Box 47, Bel Air, Maryland 21014), Tree of Life (Box 1391, St. Augustine, Florida 32084).

Midwest and Mountain States: Ceres, Inc. (2582 Durango Dr., Colorado Springs. Colorado 80910), Cliffrose (129 Coffman St., Longmont, Colorado 80501), Eden Foods (Box 100, Ann Arbor, Michigan 48107), Food for Life (420 Wrightwood St., Elmhurst, Illinois 60126).

Southwest: Akin Distributors (Box 2747, Tulsa, Oklahoma 74101), Arrowhead Mills (Box 866, Hereford, Texas 79045), Shiloh Farms (Box 97, Sulphur Springs, Arizona 72768), Sunrise Distributors (Box 5216, Phoenix, Arizona 83010).

West Coast: Erewhon Trading Co. (8454 Steller Dr., Culver City, California 90230), Janus Natural Foods (1523 Airport Way, South, Seattle, Washington 98134), New Day Distributors (1242 S. Berendo St., Los Angeles, CA 90006), The Well / Pure & Simple (795 West Hedding St., San Jose, CA 95126).

Canada: Lifestream Natural Foods, Ltd. (724-26 W. 6th Ave., Vancouver 9, BC), and Natural Foodstuffs (1 Main St., Box 27, Sutton, Quebec).

Note: This book contains the earliest recipe seen (Dec. 2005) for a tofu cheesecake. It is also the earliest English-language document seen (Dec. 2005) that uses the term "cheesecake tofu pie" to refer to a tofu cheesecake. For the story of how Marcea got interested in tofu and wrote this book see the interview: Marcea Newman. 1994. Oct. Re: Early work with tofu and tofu cheesecakes in America. Address: Boston, Massachusetts.

3148. Null, Gary; Null, Steve. 1974. Protein for vegetarians. New York, NY: Pyramid Communications, Inc. 174 p. No index. 18 cm. [21 ref]

• ***Summary:*** Contents: 1. Vegetarianism. 2. Understanding proteins. 3. Understanding food values. 4. Understanding food combining. 5. Rational fasting. 6. Food value tables.

Soy related information: Soybean flour contains over 40% protein (p. 28). Table titled "Legumes" (p. 51) showing the average serving size, total protein, and usable protein, incl. soybeans or soy grits, and tofu. Table titled "Flour" (p. 56) including soybean flour, both defatted and full fat. Table titled "Vegetables" (p. 57) including soybean sprouts. Soybeans and products are also included in the long USDA food composition tables that fill pages 108-72. See p. 158 for dry soybeans, soy flour, flakes and grits, soybean curd, and soybean milk. See p. 171 for the minerals and excess of acidity (HCl) or alkalinity (NaOH) in mature soybeans. On the rear cover of the book: "Public enemy #1: The American diet."

Despite the title of this book, it has a color photo of a

© Copyright Soyinfo Center 2013

fish (and dry soybeans) on the cover. In chapter 3, the first two pages are about fish and seafood, starting with this puzzling statement: "Many people on a vegetarian diet will include seafood in their diets." Address: Nutrition Inst. of America, Inc., 200 West 86th St. #17A, New York, NY 10024.

3149. Ochomogo, M.G. 1974. An unfermented cheese from soy-cow's milk mixture. Thesis, Louisiana State University. *
Address: Louisiana State Univ.

3150. Ohsawa, Lima. 1974. The art of just cooking. With Nahum Stiskin. Hayama, Japan and Brookline, Massachusetts: Autumn Press. 216 p. Illust. by Maurice Owen. Index. 19 x 23 cm. Reissued in 1984 as Macrobiotic Cuisine by Japan Publications, NY. 175 p. [26 ref]
• ***Summary:*** This work is based on Lima's Japanese-language book titled *Macrobiotic Cookery* (1971). In 1953, at age 54, Lima Ohsawa first ventured beyond the shores of her native Japan. She and her husband, Georges Ohsawa, left on their first world tour. In 1955-56 they spent time with Dr. Albert Schweitzer in Lambarene, Gabon. "Being vegetarian Dr. Schweitzer was always very interested in the nutritional assets of the soybean and asked me to show him different ways to prepare it" (p. 10). During this and many subsequent travels, Lima learned many traditional, natural recipes from around the world.

Contains numerous Japanese macrobiotic style recipes. Page 32 gives good definitions of miso and shoyu. Soy-related recipes include: Brown rice with soybeans (p. 53). Inarizushi (p. 55). Brown rice porridge with vegetables and miso (p. 58). Soya omochi (mochi with soya flour). Burdock with miso and lemon peel (p. 90). Broccoli and radish with miso dip (p. 92). Carrot with green beans and tofu (p. 95). Ninjin shiro-ae (with "½ cake of *tofu*, drained and mashed (p. 173)," p. 95). Cucumber with wakame and walnut miso (p. 96). Cucumbers with miso and sesame (p. 97). Onion nitsuke with miso (p. 100). Onion goma-miso-ae (onion with sesame miso, p. 100). Eggplant nabeshigi-yaki (with miso, p. 101). Scallion and aburage nitsuke (p. 101). Scallion dengaku (with miso, p. 102). Renkon ikada age with kuzu-lemon sauce (p. 103). Kabocha miso ni (p. 106). Kabu miso-ae (turnips with sesame miso, p. 109). Daikon age rolls (with aburage, p. 114). Vegetable skewers with koya-dofu (dried-frozen tofu, p. 114). Kombu with shoyu (p. 117). Renkon miso inro (lotus root tempura with miso, p. 123). Coltsfoot buds with miso (p. 126). Wakame miso soup (p. 137). Mugi-miso soup (p. 137). Sake-no-kasu jiru (miso soup with sake lees, p. 137). Go jiru (soybean potage with aburage, p. 141). Oden with ninjin and gobo kombu maki (with aburage, p. 146).

Condiments and pickles (p. 154-57): Gomashio (sesame-salt). Tekka miso (sauteed vegetables with miso). Shigure miso (moist tekka). Miso sauté. Soybeans with miso and burdock. Soybeans with miso. Miso pickles (fall and winter). Sauces, spreads and salad dressings (p. 161-63): Lemon shoyu. Ginger shoyu. Orange shoyu. Tsuje-jiru dipping sauce (with shoyu). Goma joyu sauce (with shoyu). Scallion miso. Walnut miso. Citron miso. Goma miso (sesame).

Beans (p. 165-78). Black bean ni (the black beans are actually black soybeans. "In Japan this exquisitely sweet dish is a must on New Year's Day. It gets even sweeter after standing for a day or two"). Gomoku-mame (soybean nitsuke).

Tofu ryori (p. 173-78; "Tofu or bean curd is rich in vegetable protein. Although it is rather *yin* in our classification of foods, the recipes I have included here balance its *yin* characteristics with *yang* so don't hesitate to use it occasionally. It's delicious in miso soup, stews and *nabe*, and as a dish by itself. It is available at Oriental food shops and can also be made at home."). Homemade tofu (p. 174; 3 cups soybeans plus nigari make 1 lb. tofu; also describes how to make nigari {sea brine} by dampening 5 lb. sea salt). Variation: Homemade grilled tofu. Unohana pouches (with okara and aburage). Gammodoki. Tofu with kuzu sauce. Tofu roll. Koya-dofu sandwich. Tofu nitsuke. Chinese dow-foo oroshi-ae. Tofu mold (with kuzu). Tofu tempura. Goma dofu (sesame tofu).

Note 1. This is the earliest English-language document seen (April 2013) that contains the term "grilled tofu."

Squid and scallion miso-ae (p. 183). Salmon head soup (with soybeans, p. 183). Surimi shinoda (with aburage, p. 184). Red snapper in miso. Koi koku (with miso, p. 184). Egg tofu (p. 185). Amazake manju (sweet sake dumplings, p. 198). Amazake (homemade, using glutinous "sweet" brown rice, p. 207).

The section titled "*Kofu:* Wheat Gluten" (p. 85-86) includes recipes for Homemade kofu (wheat gluten, including Kofu loaf and Seitan), and Kofu cutlet. "First introduced to Japan from China by Buddhist monks, *kofu* became a very popular food in Zen temples. It is delicious in soups and stews and mixed with sautéed vegetables. *Kofu* cutlet looks, feels, and tastes like meat." Seitan is made by simmering 5 cups cold wheat gluten, separated into small pieces, for 3 hours in shoyu, sesame oil, and minced gingerroot.

Dandelion coffee (made from minced and dry roasted, ground dandelion root) and Yannoh (prepackaged grain coffee, made from 5 different grains) are described on p. 206-07.

The book, which contains many fish recipes, begins with a nice photo of Lima at age 75–she looks 20 years younger– and ends with a good glossary. Lovely illustrations, a wealth of original information on Japanese foods.

Note 2. This is the earliest document seen (July 2000) that mentions "Tekka miso" (spelled that way).

Note 3. This is the earliest English-language document

© Copyright Soyinfo Center 2013

seen (Feb. 2005) that used the word "kofu" to refer to wheat gluten. Address: Tokyo, Japan.

3151. Sandler, Sandra Takako. 1974. The American book of Japanese cooking. Harrisburg, Pennsylvania: Stackpole Books. 192 p. Illust. Index. 24 cm.
• ***Summary:*** The author, a third generation Japanese-American, reveals the secrets of successful Japanese-style cooking–specifically for the American cook. The three introductory chapters discuss tofu (p. 16, 23, 29, 36), shoyu (p. 20), and miso (p. 27, 35). Soy-related recipes include: Seafood in miso sauce (p. 54). Shellfish in soy-mirin sauce (p. 55). Miso soups (p. 57-59). Tofu & scallions soup (p. 60-61). Instructions for sprouting beans (incl. mung- and soybeans, p. 72-74). Vegetables with tofu & sesame dressing (with white miso, and "white sesame seeds, toasted and ground," p. 77-78). Eggplant and green peppers with miso dressing (p. 78-79). Fried okara (p. 79-80). Sweet cooked soybeans (p. 82). Inari-zushi (p. 89-90). Fish misoyaki (p. 111). Miso abalone (p. 112-13). Beef misoyaki (119-20). Sukiyaki (with tofu and soy sauce, p. 121-22). Pork and tofu (p. 135-36). Stuffed tofu (p. 138-39). Chicken teriyaki (with soy sauce, p. 145). Fresh tofu (p. 154-55). Homemade tofu (p. 155-57). Deep-fried tofu (p. 157). Batter-fried tofu (p. 158). Yakidofu (p. 158-59). Aburage (p. 23, 159). Fox noodles (p. 167-68). Udon in miso shiru (p. 168). Tempura and udon (p. 168-69). San bai zuke (p. 175).

Also discusses azuki beans (p. 23, 178), sweet azuki bean paste (*koshi-an*), sesame seeds, sesame oil (p. 28), sea vegetables, and mochi.

3152. Shinoda, Osamu. 1974. Chûgoku shokumotsu-shi [History of foods and diet in China]. Tokyo: Shibata Shoten. 389 p. Illust. Index. 21 cm. [Jap]

3153. Wakisaka, Toshio. 1974. Oya Hakata to koyadofu: Yachiyo-chô sangyô hattatsu shi [Oya hakata and dried-frozen tofu. History of industrial development in Yachiyo-cho]. Japan: Hyogo prefecture. 171 p. For tofu, see p. 82 to end. [5 ref. Jap]
• ***Summary:*** Hakata-ori is a type of weaving, originally from Kyushu (S.E. Japan). Oya is a small place in Yachio-cho, in Hyogo prefecture. This book is about two of Yachio-cho's famous products, Hakata woven silk and dried-frozen tofu (Koya-dofu). Koya-dofu was introduced to Yachiyo-cho, Kadota-Mura in 1852, when Teijiro Moriwaki (according to his diary) brought it back from Mt. Koya.

3154. Watanabe, Tokuji; Ebine, H.; Okada, M. 1974. New protein food technologies in Japan. In: A.M. Altschul, ed. 1974. New Protein Foods. Vol. 1A. Technology. New York: Academic Press. 511 p. See p. 414-53. Chap. 9. [80 ref]
• ***Summary:*** Contents: Introduction: Soy products, fish products, enzyme applications. Tofu: General description, new materials, new type products, large-scale production, trends in cost, kori-tofu and aburaage. Miso: General description, new technologies, new type products, problems of mycotoxin, packaging and preservation, trends in cost and consumption. Kamaboko and fish sausage–fish jelly: General description, new technologies, new materials–frozen surimi, packaging and preservation, trends in consumption. Textured vegetable protein: Soybean protein curd, wheat gluten, soybean protein sponge. Hydrolyzed vegetable protein (HVP). New enzyme applications: Liquefied fish protein concentrate (LFP), collagenase for poultry processing, removal of beany flavor from soybean by enzyme treatment, microbial rennet. The protein food structure of Japan.

Fig. 13 (p. 47) shows 3 pie charts, each giving the percentage of protein intake per capita from various sources at three different time periods. In 1921-25 only 9% of the total protein came from animal sources (6% from fish and 3% from other animal sources); 42% came from rice, 21% from soybeans, and 14% from cereal grains other than rice. In 1951-55, shortly after World War II, some 23% of the total protein came from animal sources (17% from fish and 6% from other animal sources–such as milk, eggs, chicken, pork, and beef); 32% came from rice, 15% from soybeans, and 20% from cereal grains other than rice. In 1969, some 30% of Japan's total protein intake came from animal sources (21% from fish and 19% from other animal sources); 22% came from rice, 12% from soybeans, and 13% from cereal grains other than rice. Thus the main trend seen during this period is the steady increase in the percentage of protein from animal sources and the corresponding decrease from plant sources. Source: Food Balance Sheet. 1970. Ministry of Agriculture and Forestry. Fig. 14 shows that these trends are apparently related to increasing per capita income and GNP. Address: 1-2. National Food Research Inst., Ministry of Agriculture and Forestry, Tokyo, Japan; 3. Tokai Regional Fisheries Research Lab., Fishery Agency, Ministry of Agriculture and Forestry, Tokyo, Japan.

3155. **Product Name:** Tofu.
Manufacturer's Name: Fong On (T.H. Lung Co.).
Manufacturer's Address: 9 Hudson St., Boston, MA 02111. Phone: 617-426-4827.
Date of Introduction: 1974?
How Stored: Refrigerated.
New Product–Documentation: Shurtleff & Aoyagi. 1975. *The Book of Tofu.* p. 313.

Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 395. Owner: Unknown.

address and phone.

Talk with Betty Wong, daughter-in-law of Way Ping Wong, co-founder of Yah Kee. 1997. Feb. 13. She remembers that when Yah Kee was founded in 1973, there was already one company making tofu on in Boston's Chinatown. She does not remember the name of this company but she is quite sure of six things: (1) The company made a variety of other Chinese foods as well as tofu, such as simple baked goods, and perhaps noodles. (2) The company was quite small, supplying only a few restaurants. The few supermarkets in the area bought their tofu from New York. (3) The company was located on Hudson Street. (4) They also operated a grocery store [which could explain why the company had two names]. (5) The people who ran the store spoke only Cantonese; Betty speaks Mandarin. (6) The company had been there making tofu for quite a long before 1973, but they stopped making tofu several years after Yah Kee started. Betty was going to school at that time so she did not pay much attention to businesses in Chinatown.

3156. *Christian Science Monitor.* 1975. Low-cost soybeans: 'meat that grows on vines.' Jan. 16. p. 11.
• ***Summary:*** Soybeans come in many forms. There "are fresh soybeans in their fuzzy pods, dried soybeans, soy and wheat noodles, spaghetti and macaroni, soy grits, soy flour, soy milk, soy cheese [tofu], nutlike roasted soybeans, sprouted soybeans, textured soy, soy oil, and soy butter." When these are combined with other foods, the possibilities are almost without limit.

Soybeans are high in protein and low in cost–about 35 cents a pound.

Recipes: How to cook basic whole dried soybeans. Soyburgers (with 2 cups cooked soybeans and 1 cup cooked brown rice). Four ideas are given for adding cooked soybeans to other recipes. Finally, soy flour and its uses are discussed in detail. Now is a "perfect time to get acquainted with the versatile soybean." Address: Special to the Monitor.

3157. deMan, J.M.; Tanaka, M.; Stanley, D.W. 1975. Coagulation properties of soybean milk. *Canadian Institute of Food Science and Technology Journal* 8(1):9-11. Jan. [4 ref. Eng; fre]
• ***Summary:*** The coagulation properties of 55 samples of soybean milk coagulated with calcium sulfate were investigated. Clotting time was generally in the range of 10-50 seconds. "Clotting time decreased with the age of the soymilk. Addition of phosphates and citrate prolonged the clotting times. All samples produced a firm gel, even when the soymilk was three days old." Address: Dep. of Food Science, Univ. of Guelph, Guelph, ONT, Canada N1G 2W1.

3159. Pearce, Jean. 1975. Jean Pearce's How to get things done in Japan. Vol. 1. Tokyo: Japan Times Ltd. [iv] + 245 p. Jan. Index. 19 cm. [Eng]
• ***Summary:*** This book is composed of reprints of the popular and informative articles, answering questions from readers on a wide variety of subjects, that Jean Pearce wrote in her column in *The Japan Times* from 1 Jan. 1972 to 27 July 1974; they appear in this book in chronological order.

From 16 Oct. 1973 (p. 76): "Health foods" are now widely available in Japan, but familiar products are not always to be found. You can, however, find many soybean products, including natural soy sauce, and natural miso. "Try Nihon Kenko Shizenshoku in Shinbashi [Tokyo], phone 573-4181, or Shizenshoku Center in Shibuya, 461-7988. Both have restaurants that serve natural foods only."

Note: On pages 77-78 is a good history of Calpis.

From 8 Jan. 1974 (p. 118-19): "Health food remains a subject of interest... The basic Japanese diet, with a little discretion in the use of salt, is a health faddist's delight. Also on natural foods, a shop (Ishii Shoten, 1-2-7 Nishikata, Bunkyo-ku [Tokyo], phone 811-2457 in Japanese), that still makes by traditional methods roasted soybeans from mid-December through June, far superior, I'm told, to any of the imported varieties... 'A nice low-cal snack, and a good hors d'oeuvre...' They come with or without salt."

From 5 Feb. 1974 (p. 134): "A woman wants to learn how to make tofu. I have a recipe but I don't think I'll give it again. It is very difficult to do and the end result is more often failure than success. However, anyone can buy instant tofu at most Japanese food stores. It's easy to make, will be better than trying to do it yourself, and is inexpensive, ¥80 the last time I bought it but it has no doubt gone up. It makes two squares. The nigari she asks about is bittern, necessary for thickening [curding, coagulating]. Tofu is now available in many foreign countries. If you don't know where to look, call anyplace listed under Buddhist in the classified directory. Ask where they buy theirs."

From 12 March 1974 (p. 154-55): "Tofu lovers, united! There are lots of them and their sympathy was with the woman who was denied a do-it-yourself recipe in this very column. So kinder hearts provide the following.

"Two collectors [Shurtleff and Aoyagi] are compiling a book of tofu recipes, which includes a number for making tofu, using various solidifiers and soybean products. I'll let you know when it's published.

"A book, *Tofu Recipes*, was published by a tofu

© Copyright Soyinfo Center 2013

enthusiast after a year's visit to Japan. It is her first literary endeavor, a labor of love which will be understood by anyone who is a tofu devotee. Grace Kikuchi tells you how to make it and how to use it, relying on childhood memories and modern innovations. I'll be in the kitchen when I finish this column. You can be equally inspired if you send your order to Grace Kikuchi, 260 Sumac Lane, Ann Arbor, Michigan, U.S.A. Enclose $2.00. Somehow."

From 7 May 1974 (p. 184-85): "There is a new health food [natural food] restaurant in Tokyo, Hakumon ("White Gate"), just across from the Chuo University exit to the Shin Ochanomizu Station on the Chiyoda subway line, phone 291-9762. French owner Jimmy Dejeammes... I'd like to go back daily for the tofu that they make. Try the mochi made of brown rice and prepared in a variety of ways... All bread is baked there; high nutritional value... Among the beverages is Soyalac, made of soybean milk." It is made and distributed here by Saniku Shokuhin, the Seventh Day Adventist health food company. Neuroca, a Swiss coffee substitute, is also available at Hakumon. Phone before you go. Hakumon may be moving soon. Address: The Japan Times, Tokyo, Japan.

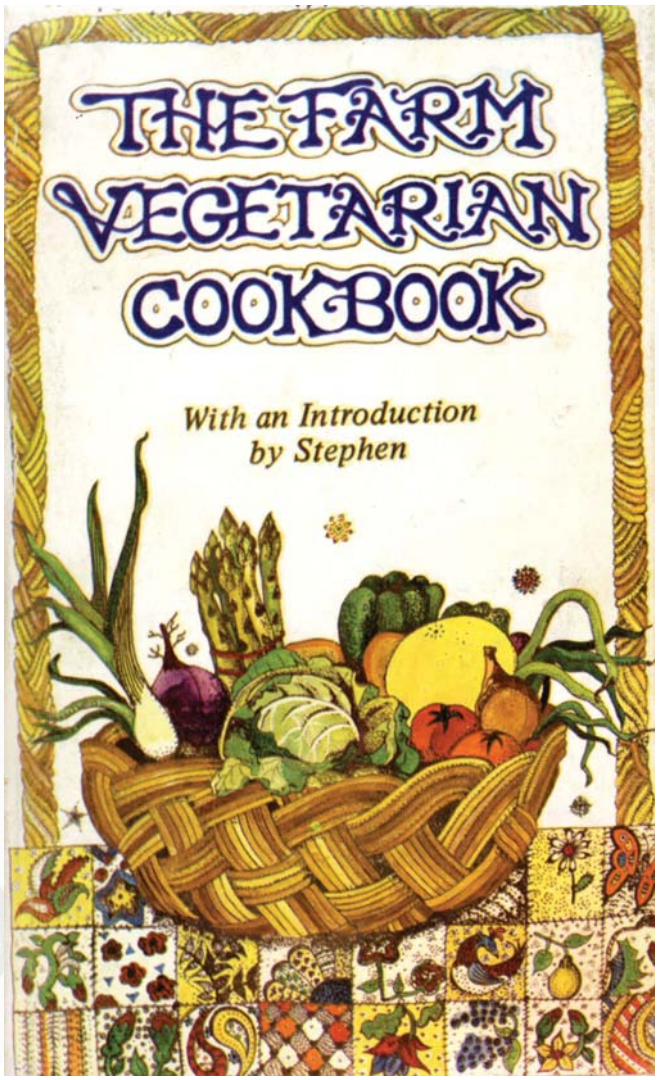
3160. Rhodes, Richard. 1975. A bean to feed the world? *Atlantic* (*The*) 235(1):38-43. Jan.

• ***Summary:*** "The soybean could–if we were a world of vegetarians. It is rich enough in protein to replace meat, but now it is fed mostly to animals... Soybeans, not wheat or corn, are the United States' number one cash crop, and by 1985 they are expected to occupy more acres than any other crop we grow... The annual world crop could satisfy the protein requirements of 800 million people."

"Soybeans are... too new a crop to evince much nostalgia in farmers. No one loves a soybean except the Chinese and the Japanese who learned to convert it to delectable sauces and palatable curds eons ago"

3161. Farm, The. 1975. The Farm vegetarian cookbook. Summertown, Tennessee: The Book Publishing Co. 128 p. Illust. Index. 18 cm. Revised edition by L. Hagler. 1978. 223 p.

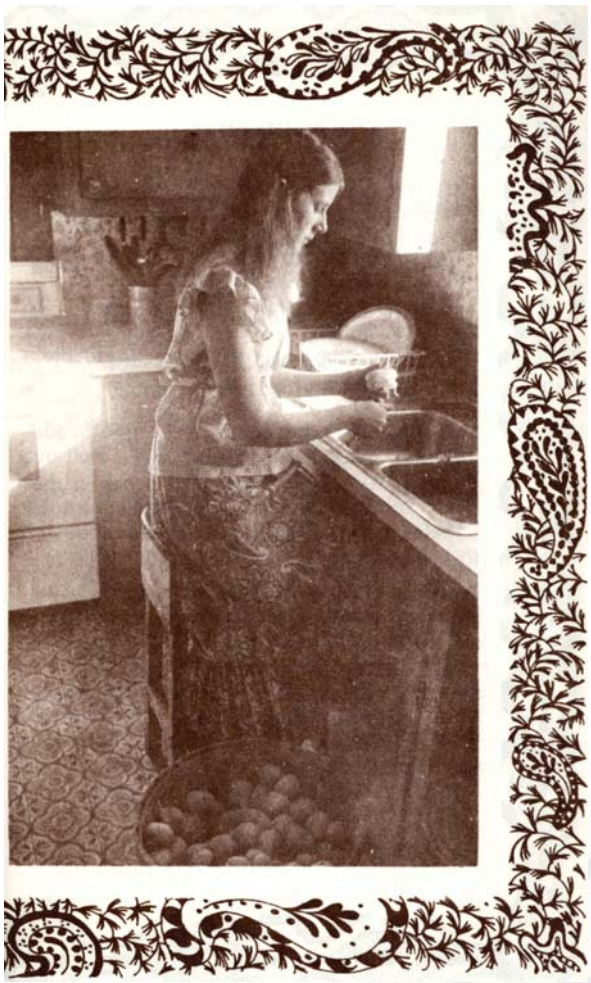
• ***Summary:*** Expanding on the pioneering "Yay Soybeans!" (1974), this creative and creatively illustrated vegan cookbook contains many extremely innovative and original recipes including: Soybean Stroganoff. Soyburgers. Spaghetti Sauce with TVP. Soysage. Soy fritters. Indonesian fried tempeh. Soymilk. Tofu. Tofu spreads. Soy "yogurt." Soy "cheese." Soy "butter" (made with soy flour). "Cream cheese" (made with soymilk). Soy "mayonnaise." Soy "whipped cream." Soy "coffee." "Soy 'nuts.'" Soy pulp granola. Ice Bean [soy ice cream] (Recipes include: Pineapple "sherbet" and "Vanilla ice bean," each made with soy milk instead of dairy milk). Mellowmeal (breakfast cereal containing soy flour). Soy "yogurt" Danish pastry. Soy bread. Soy pulp cookies. Soy "cheese cake." Blintzes (filled with tofu).



Gluten recipes (p. 54-59) include: Basic gluten (feeds 8 generously). Gluten roast. Gluten burritos. Chili gluten. Oven-fried gluten. Janice's barbeque [barbecue] gluten ribs.

The rear cover states: "We are a large, long-haired spiritual community in Tennessee. We came together through open meetings in San Francisco with Stephen. We have 750 people, including 250 kids, living on 1,750 acres. This cookbook is to help as many people be vegetarians as possible without turning any of them off and making them think its strange or weird and to let people know that it tastes good, is nice, graceful, and it can be a turn-on, that it'd be really neat to eat, and make you look forward to meal-times and make you really happy to eat such good food." The Introduction, by Stephen, begins: "The thing about our cookbook is we don't want to be faddish or cultish or scare people off. We just honestly want them to know how to make it on vegies, even somebody who doesn't particularly have a moral reason for being a vegetarian, but just wants to eat a little cheaper, or somebody who learns to be a vegetarian

© Copyright Soyinfo Center 2013



to lose weight, 'cause you maintain a really healthy natural weight on vegetables... The main thing is that we're absolute vegetarians. We don't do meat or milk or eggs or cheese or fish or fowl."

"You can increase the world's food supply by being a vegetarian. So its good for everybody else, its good for the individual for health, and its good for the soul and the spirit not to be involved in killing. And I understand that vegetables are alive, but like I've said before, I've been to pig stickings, and I've been to rice boilings, and rice boilings have better vibrations than pig stickings."

Photos show: Facing title page: People planting white potatoes at the edge of a large field in front of the woods. The lady in front is Sylvia Tepper, Robert Tepper's wife. Pages: (1) Little Susannah Frohman eating a rolled up soybean tortilla. (3) Stephen Gaskin. (18) Ruth Thomas, making lunch in the kitchen of the only house on the property when Farm folks first came here. It housed The Farm's clinic, school, bank offices, and receptionist for a number of years until other facilities were built for these purposes. Ruth could make a mean soybean burger (which is pictured). (23) Laurie Sythe making potato soup on the other side of the same kitchen Ruth was pictured in. (35) Poblano chili plants. (60-61) Tempeh sliced to be round to fit on buns, resting on a plate (L) and a tray (R). (64). Uncle Bill (age 82, center, surrounded, from left by: Marilyn Keating, Jeffrey Keating, Ruth Thomas, Patrick Thomas, Uncle Bill, Joel Kachinsky, Roberta Kachinsky, Bruce Moore, Roslyn Moore {holding baby Sam}. All at their home on Schoolhouse Ridge. The house, named "Kissingtree," was originally built for Stephen and family, but he declared it "too fancy" for him, and he passed it on to this group {women were mostly schoolteachers in our school}). (67) Janice Hunter making stir fry at the Tower Road House kitchen. (68) John Hurgeton drinking a glass of soymilk on a construction site somewhere. (71) Sue Ellen, who worked in The Farm's soy dairy, holding a glass of soymilk and relaxing. (89) Sour soymilk Danish pastry. (106) Jars of canned goods stored at the Farm's canning facility. Thanks to Cynthia Holzapfel for providing photo captions.

Illustrations appear on almost every page: On the front cover is a color illustration of a basket full of vegetables on a quilt. Many of the pages have illustrated borders or unique illustrations (line drawings) (flowers, plants, leaves, a pot of steaming food, psychedelic designs, native American motifs, etc.) where there would otherwise be empty space. Pages: (10) A Farm member eating, with one hand, a tortilla wrap filled with cooked whole soybeans. (20) A young woman in a kitchen facing the stove. (28-29) Illustrations of two Farm members making pizza. (65) Uncle Bill in a kitchen stirring a pot. (81) A pitcher labeled "Soy Milk." (83) An old-fashion, hand-turned ice cream machine for making Ice Bean. (88) Sour soymilk Danish pastry. (95) A happy man and a woman eating bagels. The man's finger, pointing up, serves as a bagel holder. Yum! (100) Overhead view of a round table with ten people eating. (105) A vase full of kitchen utensils. (113) A lady holding a cake–a very favorite recipe on The Farm. (120) A lady rolling out dough on a table.

Note 1. This book played an important role in introducing soyfoods (especially tempeh and soy ice cream), as well as a vegan diet, to America.

Note 2. This is earliest publication seen by The Farm that contains a tempeh recipe.

Note 3. This is the earliest document seen (Oct. 2008) that contains the word "vegies" (one of two documents).

Note 4. This is also the earliest document seen (Oct. 2008) that uses the word "barbeque" or "barbequed" rather than the standard "barbecue."

Note 5. Some sources (OCLC/WorldCat) cite Stephen Gaskin as the author of this book. Others cite Louise Dotzler; her maiden name was Louise Hagler, but she was married to Thomas Dotzler in 1975. Later that decade they separated and Louise reverted to using her maiden name As "Louise Hagler," she was the editor / author of several later revised and expanded editions of *The Farm Vegetarian Cookbook* (1978, 1988) plus several outstanding books about soyfoods published at The Farm. Address: Summertown, Tennessee.

3162. Kay, Theodore; Ifeacho, C.L.; Onowu, G.; Udenze, V.; Nnamani, G.; Anazonwu-Bello, J.N.; Ifenu, F.; Modebe, V.; Emembolu, M. 1975. Use of soya bean to improve the protein content of the diet in West Africa and thus prevent kwashiorkor. *J. of Tropical Pediatrics and Environmental Child Health* 21(1B):45-48. Feb. Special issue. [Eng]
• ***Summary:*** Contents: Introduction. Nutritional value of soya bean Nigerian foods prepared with soya bean paste: Soya bean paste (soaked, ground soybeans without the "husk" removed), kosei (akara ball), panke (puff-puff). Nigerian foods prepared with soya bean milk: how to make the basic milk, wara (milk curd), and alele (moin-moin, made with soya milk residue [okara]). Note: "The above five recipes have been fully accepted in many parts of Nigeria. The taste and the preparation procedure of these traditional Nigerian foods made from soya beans worked out to be almost the same or very similar to the foods traditionally made from cow peas (white beans) for kosei and alele, wheat flour only for panke, and cow milk for wara."

Nigerian foods made with soya bean flour (pre-cooked): How to make the basic flour, protein enriched pap (with akamu), and protein-enriched fu-fu (with gari or cassava flour). Discussion.

"Soya bean is being successfully established in Nigeria, but it has been very difficult to cook in a traditional West African way so it has never become popular in this country. Most soya bean produced in Nigeria has been exported as cash crop except a little for animal consumption."

Kosai, alele, panke, and awara are traditional foods in Northern Nigeria, while akara ball, moin-moin and puff-puff are traditional foods in Southern Nigeria. Discussion: "Why do we need soya bean in Nigeria?" Five reasons are given. The first two are: "(1) It has higher protein content and net protein utilisation (NPU) than cowpeas, groundnut and other legumes. Moreover, soya bean is much cheaper than other legumes in Nigeria. (2) Soya bean flour and soya bean milk have little taste and can therefore be incorporated into traditional foods such as pap and fu-fu without changing the appearance, taste and texture." Address: 1. Dep. of Chemical Pathology, Faculty of Medicine, Ahmadu Bello Univ., Zaria, Nigeria; 2-5. East Central State Ministry of Health and Social Welfare, Enugu, Nigeria; 6. East Central State Ministry of Education, Enugu, Nigeria; 7-9. Univ. of Nigeria Teaching Hospital, Enugu, Nigeria.

3163. McCormick, Sally. 1975. Azuma Sukiyaki House: Authentic Japanese cuisine and atmosphere!–5120 N. Broadway, Chicago (Advertorial). *Chicago Tribune*. March 15. p. G10.
• ***Summary:*** Azuma is Chicago's oldest and finest Japanese restaurant. "The Azuma dinner includes Sukiyaki, a generous portion of prime rib slices with fresh mushrooms, bamboo shoots, Tofu (soy bean cakes), Shiratake [Shirataki] (yam noodles) [thin konnyaku noodles] and assorted fresh vegetables." Azuma also serves Cold tofu [Hiya-yakko], Miso shiru [Miso soup], Beef Teriyaki, Chicken Teriyaki and Salmon Teriyaki. Four photos show Azuma Sukiyaki House.

Note: A similar ad appeared in the 9 Oct. 1975 (p. N17) issue of this newspaper.

3164. Camerman, A. 1975. Soybeans in Rwanda. *INTSOY Series* No. 6. p. 233. D.K. Whigham, ed. Soybean Production, Protection, and Utilization: Proceedings of a Conference for Scientists of Africa, the Middle East, and South Asia (College of Agric., Univ. of Illinois at Urbana-Champaign).
• ***Summary:*** "Soybeans were introduced into Rwanda by INEAC [Institut National pour l'Étude Agronomique du Congo Belge] in the 1920s. Farmers started showing interest in soybeans in 1960. In 1969 production amounted to 550 ha and in 1973 there were 1,640 ha. The main reasons for such interest are: 1. Intensive extension work by the nutrition centers scattered around the country. These centers have demonstrated how to cultivate and how to prepare soybeans in the form of milk, cheese, flour. 2. Soybeans are more resistant to diseases than beans (*Phaseolus vulgaris*), which are a basic staple of Rwandans. 3. Soybeans are ecologically plastic (flexible).

"The most widespread variety is Palmetto from Colombia."

Inoculated soybeans at the Rubana station give yields of 1,800–2,000 kg/ha, and on peasant farms 1,400 kg/ha. ISAR has shown that inoculation is very important, being the equivalent to the application of fertilizer containing 50–100 kg of nitrogen per hectare.

"The government of Rwanda envisages building, by 1976, a polyvalent oil mill based mainly on peanuts and soybeans. As soon as the mill is completed, 5,000 ha could be put under soybeans.

"Starting in 1975, ISAR hopes to cooperate with the International Soybean Program (INTSOY) in order to introduce new high-yielding varieties as soon as possible." Address: Head, Botany Section, Inst. des Sciences Agronomiques du Rwanda (ISAR), Rubana, BP 167, Butare, Rwanda.

Soybean Production, Protection, and Utilization: Proceedings of a Conference for Scientists of Africa, the Middle East, and South Asia (College of Agric., Univ. of Illinois at Urbana-Champaign). [11 ref]
• ***Summary:*** An excellent history of soybean research and production in Mauritius, drawing on many original sources, from the pioneer P. Boname who grew the country's first soybeans several years prior to 1909.

"In Mauritius soybean meal was never popular as a constituent of animal feed, mainly because of its price and the distance from important centers of production. In the human diet, however, it never fell out of favor with the Mauritians of Chinese origin. In some places in Port Louis, soymilk and soybean curd are prepared in the home, and the curd is sold in the market and is available in meals in Chinese restaurants." Address: Ministry of Agriculture, Reduit, Mauritius.

3167. **Product Name:** Tofu.
Manufacturer's Name: Welcome Home Bakery and Tofu Shop.
Manufacturer's Address: 231 S.W. 2nd St., Corvallis, OR 97330.
Date of Introduction: 1975. March.
New Product–Documentation: Letter / Order from Alec Evans of Welcome Home Bakery & Tofu Shop. 1976. Oct. and Nov. 6. He orders a copy of *The Book of Tofu, Vol. II.* Shurtleff & Aoyagi. 1977. Jan. 28. Commercial Tofu Shops and Soy Dairies. Alec Evans.

Letter from Alec Evans. 1981. Feb. He started producing tofu in March 1975 at the Welcome Home Bakery and Tofu Shop, 231 S.W. 2nd St., Corvallis, Oregon 97330. Alec decided to start a tofu shop because of a "desire for a relatively pure source of protein." Products he made included organic grain breads and baked goods, tofu, soymilk, okara products, and sprouted wheat bread. The business closed on 31 Dec. 1977; they were evicted because an entrepreneur wanted to do his kind of bakery. Alec knows of no non-Oriental tofu shop that started before he did. This was the first of the new wave of commercial Caucasian-American run tofu shops. Tofu shops that Alec knew of which started shortly after he did were Surata Soyfoods (Eugene, Oregon), Island Spring (Vashon, Washington), Sunbow Farm (Corvallis, Oregon), Mount Angel Tofu (Mt. Angel, Oregon). Alec has been working as a handyman since 31 Dec. 1977, hoping to create another tofu shop.

Letter from Alec Evans. 1982. April 15. "My desire to make tofu came from desire for a pure source of protein. George Ohsawa's Macrobiotic Guide No. 12 and the Hurd's *Ten Talents* cookbook both contain simple tofu recipes. I started with four 2-gallon pots on top of a stove and homemade setting boxes."

3168. Miller, Harry W. 1975. Re: On soymilk, tofu, and their production. Letter to William Shurtleff, c/o Aoyagi, 278-28 Higashi Oizumi, Nerima-ku, Tokyo 177, Japan, April 30. 2 p. Typed, with signature on aerogram.
• ***Summary:*** "Yesterday Apr. 28 your letter arrived and it was so helpful and interesting. I am answering your enquiries as best I can. The first is the hot and the cold grind. Soybeans are finding their way in so many types of foods these days and I think you will find depending on their place in the foods we will find varying procedures. On account of costs economy must be considered. Our research tells us that grinding with Stone Buhrs and disintegration with blenders equal same water soluble amount of solids. On a large scale Grinders are cheaper than disintegrators but [for] small production blenders are better.

"Also our findings keeping the temperature under 150 degrees Fahr. of the slurry before filtering gives us approximately the same yield as [if] brought to 212 degrees [boiling]. So when we make soy milk the higher temperature to filtering brings out of the fiber more of the bean taste. This is a question debatable, I know.

"When making ToFu we bring the slurry just up to boiling and our directions is wrong on saying the water extract is treated same for tofu as for soy milk. We know that long boiling or high pressure for at least 7 to 8 minutes at 100 Centigrade is needed to rid the bean of trypsin inhibiter or perhaps gas former. But not for the tofu. The figure of adding 556 grams cerelose or corn syrup to 16 lbs or 7½ kilos soy extract for milk is rather high, more than 7%. Though 7% is about the standard for carbohydrate in Mother's Milk. And we are inclined to follow the formula of human milk rather than Cows Milk for mankind. In our regular milk formula we aim to add 6% carbohydrate, as carbohydrates of soybeans are questionable.

"Providing you get the soy flavor out in processing. I agree that soymilk is good with less corn syrup. The sheet I sent you is the first run off and it needs some corrections and the sugar content should be lowered 1¼%. I have tried to calculate what the total solids are in your finished soy milk. Your water dilution may be less than ours. Out of 5 pounds of soybeans we make 50 pounds of soy milk, slightly over 6 gallons. To this has been added 3 pounds cerelose, 3O grams salt, 1 pound of corn oil. The resulting milk tests 13% solids.

"You make reference to our cutting the curd in 2 inch squares. It is general practise in cheese makers in this country to cut the curd by that, as the curd begins to form you run a sharp-edged stick, or in cheese plants a stainless steel long knife passing three the slit area is curd, so that the

© Copyright Soyinfo Center 2013

curd gathers together between the cuttings, and they know when best to separate and place in cheese pressing boxes. This may not be necessary in soy curd but it seems to be a guide to us when to place and or transfer to the cheese pressing box.

"We surely have something to learn [about] how to make so much Tofu out of a pound of soy beans. Your beans may be a little heavier in protein as we find the large beans we get yield more protein, but not that difference. We have reached 3 pounds but that depends on when we stop dewatering the curd, but any curd more than 3 pounds out of 1 pound of soy beans is hard to handle. But on Tofu we have much to learn, however on Soymilk and building up of maximum yield of total water soluble solids as also taste wise, that is getting rid of the beany flavor, we have definitely made progress and I think moved ahead of any that we have heard of. As for mouth feel, possibly more concentrated formula may be acceptable. The ratio of ingredients we take to the human milk formula and not cows milk made to rear a calf, a hairy animal and rapid grower. I did not have time this evening to review you chapter 10 on soy milk, as I am writing this at home and it is filed at my office with Loma Linda Foods. We have had experience in the above named coagulants, tried them all except sea water and sea salt. We mostly prefer Calcium sulphate and Glucono delta Lactone for convenience.

"I know that the Japanese are very meticulous in making the soy curd, and the people of using same. To translate their methods in writing, you have done very well, but still I can assure you that experience is needed in this field. Soy milk and Tofu the world as for western nations has yet to learn to use. Thanks for your letter and your points well taken and I remain, very sincerely yours, Harry Miller.

"Bill, I have written this letter at the end of a very busy day with many interruptions, so it is so poorly typed I almost decline to mail it but it does explain to you what we are doing. I assure you that soy foods are very hard to put over in U.S.A. but people are learning, they are very sensitive to soy flour and Tofu also soy Milk well made has a field for the future. HWM."

Note: Dr. Miller was age 95 years, 9 months and 28 days when he wrote this letter by himself, using a manual typewriter. He was born on 2 July 1879 in Ohio. Address: M.D., 11384 Norwood Ave., Riverside, California 92505.

3169. Lappé, Frances Moore. 1975. Diet for a small planet. Revised ed. New York, NY: Ballantine Books. xix + 412 p. Illust. by Kathleen Zimmerman and Ralph Iwamoto. Index. April. 18 cm. Series: Ballantine/cookbook. [90 ref]
• ***Summary:*** This is the second edition of the 1971 classic, one of the most important and influential books written about food during the 1970s. It introduced the concepts of "protein complementarity" and "eating low on the food chain" to millions of Americans. By Jan. 1975 the book had been reprinted 14 times and had sold 1 million copies.

This new 1975 2nd edition contains 187 pages of vegetarian recipes, which are quite similar to those in the 1971 edition. However this new edition is 116 pages longer than the 1971 edition, and contains more information on soy. Address: Inst. for Food & Development Policy, San Francisco.

3170. Kojima, Yoshiko. 1975. Visit by ASA Japanese Young Executive Soy Protein Study Team (Interview). Conducted by Dr. Walter Wolf of NRRL, Peoria, Illinois 61604, May 5. 1 p. transcript.
• ***Summary:*** Miss Kojima is the ASA interpreter. U.S. soybeans give better yields of tofu than domestic (Japanese) or Chinese soybean. Consequently about 80% of the tofu in Japan is made from U.S. soybeans.

3171. Sprague, G.F. 1975. Agriculture in China. *Science* 188(4188):549-55. May 9.
• ***Summary:*** Contents: Introduction. Agricultural research in China. Map of eastern and central China showing all provinces and major cities. Organization of communes. Fertilization. Cropping systems. Plant protection. Rice. Wheat. Corn. Sorghum and millets. Soybeans. Vegetables and fruits. Animal production. Outlook for expanding crop production during the next decade.

This article is based on observations made by the U.S. Plant Studies Delegation on their recent visit to China (26 Aug. to 23 Sept. 1974), and on conversations with the many scientists contacted. A more detailed report will be published by the National Academy of Sciences. Among the delegation members was Richard Bernard, U.S. Regional Soybean Laboratory, Urbana, Illinois.

Concerning soybeans: "In the central and southern areas, soybean culture is largely limited to small fields, gardens, ditch banks, and other waste lands. Only in the northeastern provinces does it become an important field crop. Here it is grown in pure stands or interplanted with other crops, primarily corn or sorghum.

"Soybeans are used for food in the green stage, but the more common use is in the manufacture of soy sauce and the various bean curd products. The vines, pods, and waste grain are also used as livestock feeds.

"Some soybean breeding work is done at the Genetics Institute in Peking, but the major breeding effort is concentrated in the northeastern provinces of Kirin, Heilungkiang, Liaoning, and at the Northwest College of Agriculture in Shensi province." Address: Dep. of Agronomy, College of Agriculture, Univ. of Illinois, Urbana.

3172. Miller, Harry W. 1975. Re: On soymilk, tofu, and their production. Letter to William Shurtleff, c/o Aoyagi, 278-28 Higashi Oizumi, Nerima-ku, Tokyo 177, Japan, June 4. 2 p. Typed, with signature on aerogram.

© Copyright Soyinfo Center 2013

• ***Summary:*** "Your much appreciated letter has been neglected along with considerable other correspondence. Two reasons we have been on a very crowded program of Research and that I have been away for a time. I do thank you for your notes on some of the items that we have written you.

"First point about the Cooking of soy milk. We are agreed on use of blender for home minimizing of soy bean particle size, though we do have a small Mexican mill use to grind soaked corn and works well but is hand driven and time consuming, can use for making peanut butter as well costs around US $15.00, hard to buy in U.S.A. The double boiler works quite well with brine in outer chamber and commercial salt is cheap here, but I also agree that by constant stirring, boiling can be carried on safely. The Chinese have an ideal system of steam jet cooking in which the lower chamber of a welded together double boiler in which steam is generated in the bottom pan and led by a pipe to the bottom of the cooking chamber so that you get no scorching and active boiling by the release of live steam into the milk of the upper pan. Its simple and takes the place of the steam boiler, except its adapted for milk and To fu making.

"Regards the richness of soymilk, we find the Americans like that thin soymilk best. Possibly its because the soy flavor is more diluted. The rule here in formulation is to make a gallon of Soy Milk out of one pound soybeans.

"As Soy milk keeps well for a week under refrigeration (40 degrees Fahr.) so the house wife likes to grind cook and prepare a weeks supply of soymilk for the family. But as yet the home method of making soymilk is just in the beginning and not many do it.

"You refer to the high percentage of cerelose used here in soymilk as compared with acceptance in Japan. Let me explain our position about the formulation of Soy Milk. The ratio of fat, protein and carbohydrate differs greatly as between cows, mare milk, pigs milk, water buffalo milk human Milk and other animals. These proportions are reflected in the rate of growth, the question of a large hair coating as in the cow and sheep, the energy requirement as for energy nature does not choose to use Protein for combustion to work, its function is to repair muscles or care for protein loss in secretions and body regulators such as the ductless glands, Thyroid, adrenals etc., etc. for wach [?] animals growth an analysis should be the guide, for the first year of growth supplied by milk is a good guide. Human milk formula is fat 3.5%, protein 1.7 percent, Carbohydrate 6 to 7%. For an adult after growth 35 to 50 grams seems adequate Protein. Therefore we lean strongly to a standard formula for Soy Milk should be fat 3 to 3.5%, Protein 2 to 2.4%, Carbohydrate 6%. In a one to seven or eight dilution the soybean will yield almost 3% protein, a half the needed fat and so we add 2% fat in the form of liquid vegetable oil and as for carbohydrate edible carbohydrate is rated very low possibly not more than 1% so we add 5% sugar and prefer the cereal sugars with low sweetening effect such as corn syrup.

"Such a milk as I have just described and what we are making and aiming at can be used in cooking, baking as also for general beverage purposes.

"Now just a final word on Tofu, and we have much to learn to get 8 [?] pounds of marketable Tofu out of one pound of soybeans. Since To fu is exposed to heat after its made as milk is not, thus we pressure cook milk 10 minutes and Tofu just brought to boiling point and then curdled. In Tofu Making here when the curd jells, by raking a paddle a few times thru same seems to hasten the curd preparation to be transferred to the pressing box. It need not be two inches 3 or 4 inches divisions. What you have written on soymilk and Tofu is most interesting. Regret delays. with best wishes, very sincerely, Harry W. Miller.

"We have much to learn and am now working on making a loaf Cheese. We have made some progress and believe that we shall solve the problem in time." Address: M.D., 11384 Norwood Ave., Riverside, California 92505.

3173. Shurtleff, William. 1975. Letters: Tofu and miso. *East West Journal.* June 15. p. 3.
• ***Summary:*** "For the past four years, I have been living in Japan, studying and writing books about tofu and miso. This summer, the Japanese cook and artist with whom I have been working, Akiko Aoyagi, and I will be visiting communities and natural food centers around the United States teaching about these fine, traditional soybean foods so high in protein and low in cost. Anyone interested in learning to cook with or prepare tofu or miso on a family, community, or commercial scale, please write..." • ***Summary:*** In this paper, qualitative changes in proteins of heat-induced gels solubilized with various solvents, are reported. Address: 1&3. National Food Research Inst., Tokyo; 2. Fuji Oil Co. Ltd., Osaka, Japan.

3179. Saio, Kyoko; Terashima, Masahiko; Watanabe, Tokuji. 1975. Food use of soybean 7S and 11S proteins: Changes in basic groups of soybean proteins by high temperature heating. *J. of Food Science* 40(3):541-44. May/June. [10 ref]
• ***Summary:*** This paper seeks to clarify the change/s in basic groups of 7S and 11S proteins during heating at 100ºC to 170ºC.

Table 2 shows that the gross structure of the subunits remains intact during heating to about 125ºC, and is little degraded as the temperature rises to 150ºC. However above 150ºC the structure is degraded.

The solubility shows a rapid decrease during heating to 105ºC, then a slow increase during heating from 105ºC to 150ºC, followed by a rapid increase as the temperature rises above 150ºC.

The binding force shows a rapid increase during heating to 105ºC, then a slow decrease during heating from 105ºC to 150ºC, followed by a rapid decrease as the temperature rises above 150ºC. Address: National Food Research Inst., Tokyo.

3180. Heaton, James. 1975. Pearl of the Ryukyus: Okinawans salute the sea around them in Expo ‘75. *Los Angeles Times.* July 20. p. F1.
• ***Summary:*** Naha, Okinawa–The first American of distinction to visit Okinawa was Commodore Matthew Calbraith Perry. He didn’t stay long, for he was on his way by ship to Japan, “where he succeeded in persuading the Japanese to open their doors to the outside world after a self-imposed 250-year isolation.” Most Americans who have since visited wore a military uniform.

Ocean Expo ‘75 opens today and will be a major attraction until Jan. 18, 1976. Several large photos show the multi-billion dollar expo.

The writer dined in a ryotei, a typical Okinawan restaurant in Naha, where the dishes he enjoyed included “jimani-tofu [sic, jimami-tofu] (bean curd made from peanuts).”

Daizu tanpakushitsu no [Enrichment of trace amounts of gold in water utilizing the coagulation of soybean protein and its determination by atomic absorption spectrometry and emission spectrography. Enrichment of trace metals utilizing the coagulation of soybean protein. II.]. *Bunseki Kagaku* (*Analytical Chemistry*) 24(7):395-99. July. [22 ref. Jap]
• ***Summary:*** By adding fixed amounts of soybean milk (the collector), and delta-gluconic lactone (GDL; the coagulant), to a sample solution containing trace amounts of gold, then heating the mixture to boiling in order to coagulate the protein, 99% of the remaining gold could be recovered. The coagulum (tofu) was separated from the suspension by a centrifuge and burned to ashes using a low-temperature plasma asher. Details for the optimum conditions are given.

“The proposed method was applied to the determination of gold at the order of (0.01–1) parts per billion in the sample solutions such as water, 3% NaCL water and artificial sea water. This method was also applied to the determination of gold in common salts.” Address: 1. • ***Summary:*** First describes, in prose format, how Korean soy sauce is made at home. Then describes, in recipe format, how to make it at home today. Finally describes, in prose format, how to make Korean tubu (“Japanese tofu, or bean curd”) at home.

A very similar version of this article, with two small illustrations of Korean meju (soybean koji, in the shape of a truncated cone) appeared in the *Chicago Tribune* on Sept. 28 (p. N_A11).

Note. This is the earliest English-language document seen (April 2013) that uses the term “tubu” to refer to Korean-style tofu.

3184. **Product Name:** Hand-Crafted Wooden Tofu Box.
Manufacturer’s Name: Ganesha.
Manufacturer’s Address: c/o Westbrae Natural Foods,

© Copyright Soyinfo Center 2013

1336 Gilman St., Berkeley, CA 94706. Phone: 415-524-1083 or 524-8841.
Date of Introduction: 1975. August.
New Product–Documentation: This is America's first commercial tofu box, developed by a woodworker named Ganesha in Berkeley, California. He sold the perforated pine boxes at local natural food stores and by mail order.

Shurtleff and Aoyagi. 1975. Dec. *The Book of Tofu* (Autumn Press). p. 100, 316. Ganesha makes hand-crafted wooden tofu boxes for family or community use. Contact him at Westbrae Natural Foods, 1336 Gilman St., Berkeley, California 94706.

Letter from Ganesha. 1976. Aug. "I have around 15 names of people interested in tofu boxes now. I will save them and all the new ones that come my way. A week or so before you make up the mailing list for your pamphlet, let me know and I will Xerox my ledger pages of addresses and send them to you. Also, lots of people who want boxes also want utensils. Do you know of any sources? Many thanks from Heather, who does most of the repetitive operations on the boxes."

3185. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Tofu shop.
Manufacturer's Address: Colonia San Juan de Yapacaní, lowlands of Bolivia. Phone: 2-5194.
Date of Introduction: 1975. August.
New Product–Documentation: Tsuguyoshi Suzuki, et al. 1981. *Ecology of Food and Nutrition* 11(2):107. Nov. "Changing food consumption of Japanese immigrants in the lowland of Bolivia." In July and August 1975 members of this community could buy tofu at a tofu shop in their community. The community was organized in 1955, and could have started as early as that date. Note: This is the earliest known commercial soy product made in Bolivia.

• ***Summary:*** Describes Shurtleff's work with tofu. Three photos show him (in an upstairs room at the Aoyagi home in Nerima-ku, Tokyo), talking, practicing sitting meditation in full lotus, and sitting beside a meal featuring tofu dishes served on the floor. A sidebar contains photos of 4 Western-style tofu dishes with a brief description of how each is prepared.

3195. Shurtleff, William. 1975. Chronology of early tofu and miso classes in California and Hawaii: 25 Oct. 1975 to 14 Feb. 1976. Lafayette, California. 1 p. Unpublished manuscript.

• ***Summary:*** Each class started with a talk about soybeans, soyfoods protein, world hunger, and meatless/vegetarian diets. Then a series of about 25 color slides demonstrated how to make tofu at home. Other slides showed favorite tofu recipes and how tofu was made in a traditional Japanese shop.

1975 Oct. 25–We do our first real "Tofu Class" at Westbrae Natural Foods in Berkeley, California, arranged by Bob Gerner and Liz Horowitz. Thrilling to have an audience of about 14 interested people. On Oct. 30 at Westbrae 16 people attend, and on Nov. 8, 18 people.

November tofu classes: Nov. 14th–Rainbow Grocery (arranged by Bill Crolius), 23rd–Esalen Institute in Big Sur (John Russel).

December tofu classes. 2nd–We do a big tofu class in living room of 790 Los Palos Dr. with lots of publicity from a big newspaper article on our work; 47 attend. 4th–Acalanes (Sandy Hills, 89 attend), 6th Westbrae (Bob Gerner), 7th–San Francisco Vegetarian Society (Dixie Mahy, 67 attend), 8th–Seventh-day Adventist Pacific Union College (Mary Eighme, 48 attend), 11th–Dawn Horse Bookstore in S.F. (Moe).

1975 Dec. 12–*Book of Tofu* in hand. Since we started it on 22 Oct. 1972, it had taken just about three years to write.

Dec. 13–Sept. 1976–I hand deliver *The Book of Tofu* to many bookstores and food shops that wish to sell it, typically selling 4–50 per stop at 40% discount: Communion Vegetarian Restaurant #2, Nutrition in a Nutshell, Open Sesame, Lafayette Natural Foods, San Francisco Vegetarian Society, Kinokuniya Bookstore, Rising Sun (440 Judah St. in San Francisco), Diablo Oriental Foods, San Jose Tofu Co., Soko Hardware, Effie Chow & East West Academy, Ted Nordquist (1536 Versailles Ave., Alameda, CA 94501), The Wok Shop (804 Grant Ave., SF), Westbrae Natural Foods, etc. By 24 July 1976, I had distributed 266 copies.

December tofu classes after we have our book: 13th & 14th–Jacques Delangre (Paradise, CA), 16th–East West Academy (Effie Chow), 17th–Westbrae, 18th–San Francisco Zen Center (Ed Brown), 19th–Fairfax (M. Squire).

Tofu classes/lectures in January 1976 in Northern California: 5th–Westbrae, 7th–St. Andrew's Church in Walnut Creek (Dorothy Headley), 8th–Kepler's Bookstore (Jeffrey Shurtleff & Hank Maiden) 12th–Odiyan, where I see David Mastrandrea after many years, 14th–Berkeley Co-op Natural Food Center at 1414 University Ave. (Susan Kishi, with Ted Nordquist and Janet Fehring [Ahava] helping to make tofu dip; 105 attended), 15th–San Francisco Medical School and East West Academy of Healing Arts (Effie Chow), 17th–Persimmon (Peter Godfrey), 20th–United Energy Co-op (Sri Ramon).

Jan. 16-18–Visit Bubba Free John at his community. Do and film a program on tofu.

Jan. 20-30?–Tofu trip to Los Angeles with mom and Akiko. Many tofu and miso classes. 22nd–East West Academy of Healing Arts (Effie Chow in a church), 24th–weird Los Angeles Vegetarian Society (Blanche Leonard, 150 people attend), 25th–East West Center (P. Retzsky), 27th–Dr. Harry Miller and Loma Linda Foods (70 attend), 29th–Ojai (Luke Gatto). We visit Frazier Farms, a huge natural foods supermarket in Escondido, then go to San Diego for an interview with *Well Being* magazine (David & Barbara Salat).

Feb. Tofu classes: 4th–Walnut Creek Co-op, 6th–Albany church (Nancy Dohur).

Feb. 10 to Oahu, Hawaii. Feb. 12th–tofu class for Seventh-day Adventist group (Naomi Yamashiro, 80 attend), 13th–Honolulu, Hawaii, Kyukendall Hall at at Univ. of Hawaii at Manoa (David Lee "Kalm" Sukowske, 140 attend). Then Feb. 14 arrive in Japan. 30-minute KQED TV

© Copyright Soyinfo Center 2013

special on tofu we made shown in California after we left. Expected viewership is estimated at 45,000.

In summary, from October 1975 until February 1976 we did 35 tofu and miso programs in California and Hawaii plus numerous media appearances and interviews. 1,300 people attended these classes. We requested that an admission of no more than $1 per person be charged. Our honoraria, shared with the sponsors, totalled $600. We also sold 366 copies of our books.

Note 1. This is the earliest document seen (Dec. 2001) concerning a natural foods retail chain–Frazier Farms natural foods supermarket.

Note 2. This is the earliest document seen (June 2002) concerning the work of Ted Nordquist with soyfoods. Address: 790 Los Palos Dr., Lafayette, CA 94549.

3196. Singer, Peter. 1975. Animal liberation: A new ethics for our treatment of animals. New York, NY: New York Review. Distributed by Random House. xix + 301 p. Oct. Illust. Index. 18 cm. Paperback edition published Sept. 1977 by Avon Discus. [200* ref]

• ***Summary:*** This book, a milestone in and "bible" of the animal rights movement worldwide, first popularized the concepts of animal rights and speciesism (pronounced SPEE-shees-iz-um, a term first used in 1973) as logical extensions of human rights and racism. It helped to make 1975 a year that saw explosive growth in the animal rights and vegetarian movements. Singer is an Australian academic.

The author, an Australian philosopher, argues for an end to oppression and exploitation of non-human animals, discusses animal experimentation and factory farming, and presents vegetarianism as an opportunity to take a political, economic, and moral stance in our daily lives.

Contents: Preface (It begins: "This book is about the tyranny of human over nonhuman animals. This tyranny has caused and today is still causing an amount of pain and suffering that can only be compared with that which resulted from the centuries of tyranny by white humans over black humans. The struggle against this tyranny is a struggle as important as any of the moral and social issues that have been fought over in recent years"). Acknowledgments. 1. All animals are equal... or why supporters of liberation for blacks and women should support animal liberation too. 2. Tools for research... or what the public doesn't know it is paying for. 3. Down on the factory farm... or what happened to your dinner when it was still an animal. 4. Becoming a vegetarian... or how to reduce animal suffering and human starvation at the same time. 5. Man's dominion... a short history of speciesism. 6. Speciesism today... defenses, rationalizations, and objections to animal liberation. Appendices: Cooking for liberated people (incl. Seventh-day Adventists, bread, peanut butter, tahini, miso, hummus, and Tartex, Chinese recipes, mung bean sprouts and tofu, Indian recipes, Middle Eastern recipes, flat Arabian bread, chickpeas and felafel, Italian recipes, macrobiotic recipes {incl. soy sauce, soybeans}, meat substitutes {incl. TVP, Granburger, Protoveg, Itona, Vitpro, Loma Linda meatless frankfurters, imitation bacon bits}, and milk substitutes–often made from soybeans), further reading, organizations.

Singer's book was not just a philosophical treatise. It was a call to action. Invoking the concept of speciesism, Singer deplored the historic attitude of humans toward non-humans as a "form of prejudice no less objectionable than racism or sexism," and urged that the liberation of animals become the next great cause after civil rights and the women's movement. Singer's popular book produced two important effects. First, it reintroduced to the anti-vivisectionist cause an intellectual basis, a philosophical orientation, and a moral focus. Second, it attracted to the animal rights cause a host of new activists who started many new organizations. The most active and visible of these has been PETA (People for the Ethical Treatment of Animals, in Washington, DC), which by 1988 was thought to have 200,000 dues paying members in the USA.

Singer maintains that: "to treat animals as resources and argue about when use is sustainable, is a classic example of economic rationalism running heedlessly over non-economic values. We should no more hand our wild animals over to the tender mercies of the market than we should hand our children over to the same market forces. Neither children nor wild animals are a 'product' or a 'resource' at all."

Note: This is the earliest document seen (Oct. 2009) that mentions Itona, a British maker of soymilk and meat alternatives. Address: Australia.

3197. Burros, Marian. 1975. Serving up a buffet for hunger. *Washington Post.* Nov. 16. p. 73.

• ***Summary:*** The two groups sponsoring the event are ECHO (Earth Campaign Against Hunger), a Boston-based ecology group, and WHY (World Hunger Year), a New York hunger action coalition. The buffet, which will take place on Monday, Nov. 17, in the Rayburn Cafeteria, in Washington, DC, will be a vegetarian, natural foods dinner, prepared by a Boston restaurant. It "will include dumplings made from wheat protein [gluten];... sea vegetable salad made with seaweed and dressed with fermented plums [umeboshi] or tofu, the soybean curd." Congressional sponsors include Senator Edward Kennedy.

"ECHOE believes that 'the major responsibility for solving the world food crisis rests with the U.S. because she is the most inefficient user of food resources in the world today.'"

3198. Jameson, Sam. 1975. Japan's small business flexes muscles and giants back away. *Los Angeles Times.* Nov. 23. p. F1.

• ***Summary:*** Until May 1973, the Japanese government had an elaborate set of restrictions that prevented foreign

© Copyright Soyinfo Center 2013

investors from entering specific fields. Now a new type of Japanese business protectionism is beginning to rear its head. Fields traditionally dominated by small or household businesses are trying to prevent large firms from entering these fields. Keidanren, the main Japanese trade group representing large enterprises, took note of this concern by issuing a set of "guidelines" designed to avoid friction between big and small businesses.

In July, Yakult, a large yogurt manufacturing firm, officially notified the Ministry of Agriculture, that it was abandoning a "plan to begin manufacturing tofu (bean curd), a staple made in traditional family-run shops in neighborhoods throughout the country."

"All four opposition political parties have jumped on the issue, promising protection for 'the little guy' against 'the power of massive capital'–the same argument that was used for years against foreign investment." Address: Times staff writer.

3199. Mayer, Jean. 1975. A vegetarian view. *Washington Post.* Nov. 23. p. 103.
• ***Summary:*** A question and answer format. "Q. I decided to become a vegetarian and bought a couple of vegetarian cookbooks. But many of the recipes call for foods I'm unfamiliar with and can't find in my supermarket. Is it necessary to shop at a natural-foods store to be a vegetarian?

"A. Absolutely not. Vegetarians often enjoy bean sprouts, making tofu (or soybean curd) and using a variety of ingredients that are generally found in supermarkets." Address: Prof. of Nutrition, Harvard Univ. [Massachusetts].

3200. Lambert, Pat. 1975. Classes to demonstrate cooking with tofu. *Contra Costa Times* (*Walnut Creek, California*). Nov. 28. p. 13.
• ***Summary:*** "William Shurtleff and Akiko Aoyagi, co-authors of 'The Book of Tofu,' will present two demonstrations next week on creative ways to serve tofu (soybean curd) and miso (fermented soybean paste).

"The first will be Dec. 2 from 7:30 to 9:30 p.m. at 790 Los Palos Manor, Lafayette [the Shurtleff's home], and the second, held under the auspices of the American Nutrition Society is dated for Dec. 4. Registration for the Dec. 2 presentation is $1. For reservations call 283-2991.

"The Dec. 4. presentation will be at 8 p.m. in the multi-purpose room of Acalanes High School, Lafayette. There is a $1.50 fee for adults and 50 cents for students...

"'Tofu contains no cholesterol and little saturated fats,' says Sandy Hills, president of the society's Northern California chapter... Tofu can be purchased at most health food stores for approximately 39 cents per pound but, according to Shurtleff, tofu has a more delightful flavor when prepared at home." Three black-and-white photos (by Eric Rahkonen of the Times) show Shurtleff and Aoyagi making tofu in the Shurtleff family kitchen at 790 Los Palos Dr., Lafayette, California: (1) Pressing the curds in a cloth-lined forming box. (2) Pureeing soaked soybeans with water in a blender. (3) Holding a large cake of tofu on a plate.

3201. Adams, Catherine F. 1975. Nutritive value of American foods, in common units. *USDA Agriculture Handbook* No. 456. 291 p. Nov. See p. 155-56. Index. 30 cm.
• ***Summary:*** This book is comprised mostly of table 1, titled "Nutritive values for household measures and market units of foods." Under "Soybeans" (p. 155-56) values are given for each of the following (usually per cup and per pound, unless otherwise stated):

Mature seeds, dry: Raw or cooked.

Sprouted seeds: Raw or cooked.

Soybean curd (tofu): Piece (2½ x 2.75 x 1 inch) or pound.

Soybean flours: Full fat or low fat or defatted.

Soybean oil and soybean-cottonseed oil blend (see also oils).

Soy sauce. Address: Washington, DC.

3202. Bates, Cynthia; Bates, Albert. 1975. Re: Making tempeh spores commercially. How to make okara tempe. Design of a community-scale tempe incubator. Letter to William Shurtleff at New-Age Foods Study Center, undated. 2 p. Handwritten.
• ***Summary:*** "Dear Bill, You must not have received our last letter. I wrote that I felt that we didn't have it together yet to offer tempe spores for sale in Japan right now. We will eventually though, I hope, but we have bitten off a big chunk already. Thank you for your generous offer though. Dr. Hesseltine's recipe is ½ teaspoon per pound (2½ cups) of semi-cooked beans. He sent me a packet of spores once with the directions. He also sent us our original culture and several reprints on tempeh.

"Your recipe for Homemade Tempeh looks fine. Am I correct that the '1 cup dry soybeans, washed and soaked' is 1 cup of dry beans? On second look, I'm sure that's what you meant, seems obvious. I've never cooked tempeh beans in a cooker before–always soaked them overnight. I find using freshly split beans makes it easier to get the hulls off. That's hard to do using whole beans. One way is to get them split by a miller for large quantity. Or do it yourself in a Corona mill. Another way is to soak the beans overnight then run them through a Corona mill on coarse setting so the beans are halved. The hulls come right off and can be poured off. It's important to get the hulls off because the mold can't penetrate the hull so there's a chance that an un-dehulled bean could spoil inside.

"To make okara tempe the okara must be somewhat cooked or the mold won't grow. For example, okara from the milk method on pg. 68 in the *Farm Vegetarian Cookbook* doesn't tempe because it's not cooked enough. Must be cooked in excess water (which it would be in [soy] milk

© Copyright Soyinfo Center 2013

making) about 15-20 minutes at above 195 [ºF]. This is a guess because I'm not experienced with more than 3 kinds of okara, but I feel it's pretty close. The okara must be coarse enough to allow free passage of air into the mass."

Note 1. A small illustration shows this with grits and rice. Note 2. The creative use of the word "tempe" as a verb.

"The recipe goes: 2½ cups well pressed okara. 2/3 tablespoon vinegar. 1 tablespoon dried spores (or ½ teaspoon Dr. Hesseltine's spores. His are more concentrated).

"The okara should be so dry you can squeeze a handful hard and not have any milk appear between your fingers except for a drop down between your fingers where they hook onto your hand. Squeezing a handful should leave your hand dry, not moist. Spread in a layer ½-inch deep in aluminum (not rust) window screen and cover with wax paper, plastic with holes punched in every ¼ to ½ inch.

"We have two incubators, one working and one being set up. The one [working] now is a plywood box with screen trays. Its heated by a turned down dryer heater, and also has a blower for air circulation. Trays are put in so that they are alternately in front or rear of the box so air circulation will be even. [A small illustration shows a side view of the box / incubator, with blower and stagger-stacked trays]. This box works well, but its not a sealed environment, so other microorganisms can get in. Plywood isn't very groovy for a large incubator–too wet and hard to clean. Our new box is a 3 door refrigerator. Shelves are food grade plastic PVC pipe and trays are food grade plastic sheets with 1/8 inch holes drilled every ½ inch.

Three small illustrations show: (1) Incubator tray. (2) Side view of shelves, showing where trays slide in. (3) Top view of inside of incubator showing trays, dehumidifier, furnace pipe, and fan inside.

"Its still in the experimental stages–dehumidifier is being put on. When the mold grows it gives of water–if it gets too wet in the incubator box, the mold won't grow.

"We like tempi a lot in sandwiches with just about anything–fried eggplant, onions, sauerkraut, tartar sauce.

"I talked with Stephen's wife Margaret, the Farm nutritionist, and she doesn't want you to put in the method of making [soy] milk from dry beans as the Farm's method because we don't like it and are changing our process. She would dig it if you would put in the one in the *Farm Vegetarian Cookbook,* page 68. I hope this doesn't inconvenience you too much. I'm really sorry. I should have figured that out in the first place.

"Oh, also we've made tempi on the farm by hanging a plastic 'sausage' in the rafters of our tent above the pipe on the woodstove. Works good, but may take 3 or 4 days depending on how often your stove is run.

Two small illustrations show: (1) Plastic bag made into a tube like a sausage, holes pinched in every 1 to 1½ inches. (2) Tempeh hanging from ridge pole above wood stove in tent.

"We are going to do a tempeh brochure soon. Spores are being tested in a lab for contaminants–will send them as soon as possible.

Wow, all those tofu recipes you sent are really gonna help us out, especially like the tofu mayonnaise. We don't use much oil because the price has gone high, but we really dig sandwich spreads and sauces. We really dig the reverence you feel for your work. We feel feeding folks is a holy duty. As Stephen says, 'The purpose of eating is to maintain that psychedelic experience we call life.'

"Love you, Albert & Cynthia."

Note. The Farm made the first okara tempeh in the Western world. Address: 156 Drakes Lane, Summertown, Tennessee 38483.

3203. Midwest Natural Foods Distributors, Inc. 1975. Catalog #7. Nov. '75. Ann Arbor, Michigan. [vii] + 93 + 8 p. Index. Illust. 28 cm.

• ***Summary:*** This catalog, largely printed by a computer, contains many ads on unnumbered pages. Contents: Hi! Ordering and service information. Bulk: Whole grains, beans, seeds and nuts, dried fruit, nut butters, etc. Refrigerated and frozen ("Frozen meats {beef}–No DES, steroids, female hormones, antibiotics, or stimulants used in feeding; Chickens–No hormones & antibiotics. Ask for turkeys and hens during Thanksgiving." "Frozen soy products: soy milk and tofu soybean curd"). Books. Packaged (by company and product category). Index by product. Index by manufacturer.

"We are happy to announce that Midwest and Mountain High are now one entity... We go into the fall and winter seasons with a fall and winter catalog, delivery schedule, and computer system." For new developments, watch the monthly newsletter and sale sheets. "Your Friends at Midwest."

Includes the following ads (the number is that of the facing page). Wheat Stalk Soya Burger (Cotati, California, p. 17). Arrowhead Mills (p. 27). Dr. Bronner's Magic Soap (p. 32). Chico-San (p. 35). Erewhon (p. 41, incl. "Trail Mix, Niks"). Fearn Soya Foods (p. 42; shows a package of Fearn Soy/o Buckwheat Pancake Mix). Flavor Tree–Pernut soy beans (p. 42). Hain (p. 49, "Cold pressed safflower oil," mayonnaise, and margarine). Health Main (p. 54; soy is not mentioned–only natural potato chips and yogurt dressing & dip). Infinity Herbal Products Ltd. (p. 56). Malt-O-Meal–Soy Town (dry roasted soy beans, p. 60). NF Factors (Lafayette, Calif., p. 67. A photo shows a can of Protesoy). Pure & Simple (p. 72, 795 West Hedding St., San Jose, California 95126; mainly fruits, fruit juices, fruit butters, vinegars). Sovex (p. 83-84. "The fastest selling natural cereal line on the market... Here's the one that started it all, the original Crunchy Granola"). Viobin (wheat germ oil, p. 85F, 89). Tiger's Milk Products (p. 86).

Companies whose products are listed with ads include:

© Copyright Soyinfo Center 2013

Back to Nature (granola, p. 28). Country Natural (granola, p. 36). El Molino (p. 38-39; incl. Cara Coa Crunch Bar, Carob Fruit & Nut Bar, Carob Mint Candy, Chia Seeds, Flaxseed–Whole, Pumpkin seeds, Soybeans–whole, Soya flour, Soya grits, Carob Coated Soybeans). Ener-G-Foods–Jolly Joan (incl. Instant Soy Milk Powder, Wheat & Soy P&W [Pancake & Waffle] Mix {regular and low salt}, p. 39). Flavor Tree (Pernola cereal, Pernut soy beans–salted, cinnamon, salt free, garlic, Pernut toasted soybeans–salted, salt free, garlic, onion). Wok sets in gift box, Quaker City grain grinder, Corona hand mill (p. 58). Lassen Foods (granola, p. 60, 60F). Mac Knives (p. 60). Orjene (p. 70-71). Parkelp–Ocean Labs (p. 71, incl. Sea Zun).

The Chico-San Inc. ½-page ad (facing p. 35) features four products; a photo of each is given and each is K-Parve: Rice Cake San-Wich (filled with sesame seeds and Yinnies Rice Syrup). Yinnies Rice Syrup (natural sweetener, made from rice and barley). Yinnies (traditional oriental confection, wrapped like individual candies). Rice Cakes in 4 varieties: Salted or Unsalted, Rice Cakes with Millet–Salted. Rice Cakes with Buckwheat–Salted. "Other Chico-San Products: Organically grown brown rice. Lima soy sauce, miso (soybean puree), rice malt vinegar, sesame butter, sesame oil, nigari, barley koji, tekka, sesame salt, sea salt, salt plums, kuzu, organic rice cream, organic rice flour, black soybeans, azuki beans, sea vegetables, mu tea, lotus root tea, twig tea, toothpowder, seaweed shampoo." Address: Ann Arbor, Michigan 48107. Phone: 313-769-8444 or in Area 313 1-800-552-6297.

3204. **Product Name:** Soy Milk [Plain, Carob], Tofu Soybean Curd.
Manufacturer's Name: Midwest Natural Foods Distributors, Inc.
Manufacturer's Address: Ann Arbor, Michigan. Phone: 313-769-8444 or in Area 313 1-800-552-6297.
Date of Introduction: 1975. November.
Wt/Vol., Packaging, Price: Soymilk: 16 or 32 oz. Tofu: 10 oz.
How Stored: Shelf stable.
New Product–Documentation: Midwest Natural Foods Distributors, Inc. 1975. Catalog #7. Nov. Ann Arbor, Michigan. 108 p. See p. 15. Frozen. "Soy products–soy milk has all amino acids, contains no animal fat, no lactose."

Note: There are several reasons for thinking that these two products were probably made or purchased from Health Valley or Health Maid in California: (1) In the first index, under "Soy Products," those from Health Maid are shown as appearing on pages 14-15. Although the name "Health Maid" does not appear on p. 15, there is good reason to believe that Health Maid was selling tofu by Nov. 1975; Shurtleff and Aoyagi visited their warehouse in Los Angeles in Jan. 1976 and saw their tofu. (2) The main entry for "Health Maid Natural Foods" states: "See also Refrigerated-Frozen." (3) Although located in Ann Arbor, Michigan, the same city as Midwest Natural Foods, The Soy Plant did not start making tofu until Jan. 1977, or soymilk until July 1977. (4) It would only make sense to freeze tofu and soymilk if they had to be shipped from a distant location, such as California. Freezing totally transforms the texture of tofu, and degrades the quality of soymilk. (5) In Midwest's Catalog 13, spring 1979, the same soymilk (frozen) and tofu (now refrigerated) products are shown as coming from "Hvly" (Health Valley).

3205. Shurtleff, William; Aoyagi, Akiko. 1975. Tofu as a food. *Macrobiotic* (*The*) (*Chico, California*) No. 110. p. 14-24. Nov. [2 ref]
• ***Summary:*** Excerpted from the forthcoming Book of Tofu.

The magazine's editor notes: Tofu is also good for external plasters, especially on a head injury or concussion, etc. However it is not advisable to use it on heart area injuries, as tofu is very yin, and could weaken the heart.

Tofu as food should be balanced with Tamari or Miso, or eaten with fish, burdock or any other yang food. This will balance its yin quality. Address: Lafayette, California.

3206. Tovar Galvez, Luis Raul. 1975. Productos derivados del frijol soya tecnologias tradicionales en el Lejano Oriente [Traditional technology soy products in the Far East]. In: American Soybean Assoc., ed. 1975. Memorias: Primera Conferencia Latinoamericana Sobre la Proteina de Soya. Mexico City. 232 p. See p. 185-93. [14 ref. Spa]
• ***Summary:*** Descriptions of and flow sheets for the production of the following basic soyfoods are given: Miso, shoyu (*salsa de soya*), natto, tempeh, sufu (fermented tofu), and soy yogurt. A table shows the nutritional composition of each of these foods as well as yuba and kori-tôfu (dried-frozen tofu).

Note 1. This is the earliest Spanish-language document seen (Sept. 2011) that mentions tempeh, which it calls "tempeh."

Note 2. This is the earliest Spanish-language document seen (April 2013) that uses the term "kori-tôfu" to refer to dried-frozen tofu. Address: Faculdad de Quimica, UNAM, Mexico.

3207. Canaday, John. 1975. A neotraditional Japanese 'farmhouse' that delights in good food and service: Restaurant reviews. *New York Times.* Dec. 5. p. 55.
• ***Summary:*** Includes a review of the Japanese two-star restaurant Robata (30 East 61st Street, New York City). The word "robata" means "by the fireside," referring to the sunken open-hearth fireplace (*irori*) in a traditional Japanese farmhouse.

"A very good surprise was grilled bean curd, and we recommend it heartily. Charred on the grill, it comes in a vinegary sauce that goes beautifully with the curd's bland innards beneath the smoky taste of the crust."

© Copyright Soyinfo Center 2013

Note: This is the earliest English-language document seen (April 2013) that contains the term "grilled bean curd;" it refers to grilled tofu.

3208. Hughes Markets. 1975. Happy New Year '76 (Ad). *Los Angeles Times.* Dec. 26. p. I13A.
• ***Summary:*** The section titled "Foods of the Orient" includes: "JFC Kinako 7 oz. Soy bean powder–39¢. Misuzu Koya Dofu 3.5 oz. Dried Soy Bean Cake [Dried frozen tofu]–65¢... Age [Deep fried tofu pouches] 59¢ package."

Also includes Top Ramen (4 for $1), tempura batter mix, Cal-Rose botan rice, frozen mochi, nori seaweed, dried shiitake mushrooms, pickled ginger (*shoga*), and Hamanako Unagi eels.

3209. *SoyaScan Notes.* 1975. Chronology of soybeans, soyfoods and natural foods in the United States 1975 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** Feb. Gale Randall starts America's first commercial Caucasian-run tempeh company in Unadilla, Nebraska.

March. Alec Evans starts the first of the new breed of Caucasian-run tofu shops in Corvallis, Oregon, named Welcome Home Bakery and Tofu Shop.

March. "Safe protein-calorie ratios in diets. The relative importance of protein and energy intake as causal factors in malnutrition" by P.R. Payne of the Department of Human Nutrition, London School of Hygiene and Tropical Medicine, published in the *American Journal of Clinical Nutrition.* Payne argues convincingly that food energy (calories) is more of a problem than protein.

April 29. Saigon falls, ending the Vietnam war.

July. Freezing weather in Parana, Brazil, kills many coffee trees, leading to a big expansion of soybean acreage.

Aug. 3-8. The first World Soybean Research Conference held in Champaign, Illinois, with 600 participants from nearly 50 countries. The 1073-page proceedings, edited by L.D. Hill, are published in 1976.

Aug. Japan Vegetable Protein Food Association founded to promote modern soy protein products, primarily soy protein isolates.

Oct. 25. William Shurtleff and Akiko Aoyagi conduct their first Tofu Class at Westbrae Natural Foods, Berkeley, Calif. Eight people attend. Also in 1975 Gordon Bennett becomes president of Westbrae.

Oct. "The Traditional Tofu Craftsman and His Shop," the first of the new wave of soyfoods articles, published in East West Journal. Contains excerpts from the forthcoming *Book of Tofu* by Shurtleff & Aoyagi.

Nov. 9-12. First Latin American Conference on Soy Protein, organized by the American Soybean Assoc., held in Mexico City.

Dec. 12. *The Book of Tofu* by Shurtleff and Aoyagi published by Autumn Press. This book launches the tofu boom and soyfoods movement in America.

Dec. Ganesha, a craftsman in Berkeley, makes America's first tofu boxes, handcrafted of wood.

Dec. 1975 to Jan. 1976 Shurtleff and Aoyagi do a Tofu and Miso California Tour, with 40 public programs in the Los Angeles Area and northern California.

* *The Farm Vegetarian Cookbook* published by The Farm's Book Publishing Co. in Summertown, Tennessee. Expanding on the ideas in *Yay Soybeans!* (1974), it contains many soyfoods recipes, plus the first popular information on tempeh and the first tempeh recipes to be published in any European language.

* Textured soy protein concentrates developed and introduced by three companies, incl. Griffith Laboratories and Central Soya (Response).

* Vitasoy soymilk in Hong Kong is first sold in Tetra Pak cartons.

* Latin American soybean production tops 10 million metric tons, up 10-fold since 1967.

* National Soybean Research Center (CNP-Soja) established at Londrina, Parana, Brazil, within EMBRAPA (The Brazilian Research Organization for Agriculture), to stimulate research and coordinate the efforts of the state programs.

3210. Autumn Press, Inc. 1975. Imagine... (Ad for The Book of Tofu by Shurtleff and Aoyagi). *Macrobiotic* (*The*) (*Chico, California*) No. 111. p. 61. Dec. [1 ref]
• ***Summary:*** "Imagine... How strange it would seem if in the world's greatest wheat-producing country most of the people had never tasted bread. Yet no less unusual is the present situation in America, the world's greatest producer of soybeans, where the majority of people have not yet tasted, seen or even heard of tofu."

The Book of Tofu is 8½ x 11. 336 pages and has over 300 illustrations, $6.95.

"A family of foods developed over thousands of years in China and Japan, tofu is East Asia's way of using soy protein to complement a diet low on the food chain. Now available commercially across America in over 10 different forms, tofu can also be made at home–for pennies! Quick-and-easy to use in almost every conceivable type of Western-style preparation ranging from dips to desserts, these time-tested natural foods open new vistas of creative, healthful menu-planning–while offering a revolutionary approach to meeting the world's critical food requirements.

"*The Book of Tofu* contains: Over 500 recipes culled from East and West. Easy-to-follow instructions for making 7 varieties of tofu (plus soymilk, yuba and tempeh) at home and on a community scale. An illustrated description of the art of making tofu in a traditional Japanese shop. The most detailed glossary of Japanese foods ever compiled in English. And much, much more."

© Copyright Soyinfo Center 2013

Note: This is the earliest advertisement seen that mentions tofu. Address: P.O. Box 469, Soquel, California 95073.

3211. Duling, Amy. 1975. Tofu–high in protein, low in cost. *Diablo Star* (*Contra Costa County, California*). Dec. p. 4. [1 ref]
• ***Summary:*** Describes the life and work of William Shurtleff and Akiko Aoyagi with tofu. A photo (by Eric Rahkonen of *Contra Costa Times*) shows the two holding a plate on which is a cake of fresh homemade tofu. At Safeway supermarkets, tofu now costs $0.43/lb. Address: Lafayette, California.

3212. **Product Name:** [Tofu].
Manufacturer's Name: Le Bol en Bois.
Manufacturer's Address: 35, rue Pascal, 75013 Paris, France. Phone: 707-272-4.
Date of Introduction: 1975. December.
New Product–Documentation: Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 401. Owner: Mr. Noboru Sakaguchi: a combination natural foods restaurant and tofu shop.

Richard Leviton. 1983. Oct. 16. Trip to Europe with American Soybean Assoc. According to Bernard Storup of Societe Soy, in 1982 Le Bol en Bois in Paris was making about 2,500 lb/week of tofu, but now they are probably down to 1,200 lb/week with competition from Societe Soy.

Toyo Shinpo. 1984. March 21. Mr. Sakaguchi runs a tofu shop and natural food store. He makes 250-300 cakes/day of tofu. Half is sold in the shop and restaurant, the rest is distributed to Japanese restaurants in Paris. Le Compas. 1986. March-April. p. 32.

Form filled out by Anthony Marrese based on an interview with Mr. Hirayama. 1989. Nov. Mr. Sakaguchi is the owner of Daizou and Mr. Takatoshi Hirayama is the tofu production manager. Le Bol en Bois started in the 1970s as probably the first macrobiotic restaurant in Paris. They made tofu for their own use and their outside business grew slowly. In 1985 Tama (an importer and distributor of Japanese natural foods) and Daizou (a food manufacturing company) were made separate business divisions of Le Bol en Bois restaurant and health food store. The three companies employ about 50 people, 6-7 in food production.

Business card from "Bol en Bois." 1989 "Store, macrobiotic restaurant, natural products, new specialized library. 35-40, rue Pascal 75013 Paris."

Interview with Mr. Noboru Sakaguchi, founder of Le Bol en Bois, by David de Korsak. 1990. June 14. An invoice plus personal recollections prove that Mr. Sakaguchi opened Le Bol en Bois on 2 Sept. 1974 and began commercial tofu production in Nov. or Dec. 1975. For details, see interview.

3213. Shurtleff, William; Aoyagi, Akiko. 1975. The book of tofu: Food for mankind. Hayama-shi, Kanagawa-ken, Japan: Autumn Press. 336 p. Illust. by Akiko Aoyagi. Index. Dec. 28 cm. Rev. ed. 1977 Autumn Press, Brookline, MA. [53 ref]
• ***Summary:*** This pioneering work started the "tofu revolution" in America. Contents: Preface. Acknowledgements. Part I. Tofu: Food for mankind. 1. Protein East and West. 2. Tofu as a food: Introduction, rich in high quality protein (NPU, biological value, protein score, amino acid content), high protein complementarity (tofu contains an abundance of lysine, an essential amino acid that is deficient in many cereal grains; increase usable protein by combining tofu with wheat, rice, corn, etc.), easy to digest, an ideal diet food, low in saturated fats and free of cholesterol, rich in vitamins and minerals, a health-giving natural food, backbone of the meatless / vegetarian diet, free of chemical toxins, low in cost, easily made at home, quick & easy to use, versatile.

3. Getting started: Introduction, buying and storing tofu, basic ingredients (whole-wheat flour, miso {rice-, barley-, and soybean miso, special Japanese miso, Chinese chiang}, oil, brown rice, salt, shoyu {natural shoyu, shoyu, Chinese soy sauce, synthetic or chemical soy sauce}, sugar, vinegar, monosodium glutamate {MSG}), Japanese kitchen tools (each illustrated), preparatory techniques (salt rubbing, rinsing and pressing leeks and onions, soaking burdock root, reconstituting dried sea vegetables {dried hijiki, wakame, agar}, wheat gluten and kampyo [kanpyo], parboiling, cutting tofu and vegetables, using sesame seeds, toasting nori, preparing a steamer), basic recipes (soup stocks and broths {dashi}, basic shoyu dipping sauces {*tsuke-jiru*}, miso toppings {sweet simmered miso / *nerimiso*, miso sauté / *abura miso*, special miso toppings and dipping sauces, finger lickin' miso, and regular miso}, miso salad dressings, nut and seed butter toppings, spreads and dressings, basic sauces, rice, noodles and other basic preparations).

Our favorite tofu recipes (lists about 80 recipe names for each of the different types of tofu, plus soymilk, yuba, whole soybeans, gô, okara, and curds; very favorites that are also quick and easy to prepare are preceded by an asterisk).

Part II. Cooking with tofu: Recipes from East and West (500 recipes). 4. Soybeans: History of soybeans and "soybean foods," cooking with whole dry soybeans, roasted soybeans (*iri-mame*), fresh green soybeans (*edamame*, incl. a recipe for "Sweet emerald bean paste {*Jinda*}),*"* kinako (roasted full-fat soy flour, incl. Japanese health food treats such as *kinako amé, gokabo, kokusen, kankanbo,* and *abekawa mochi*), soybean sprouts (*daizu no moyashi*), natto ("sticky fermented whole soybeans," with "gossamer threads"), tempeh (fermented soybean cakes), Hamanatto and Daitokuji natto (raisin-like natto), modern western soybean foods (natural soy flour [full-fat], soy granules, defatted soy flour and grits, soy protein concentrates, soy protein isolates, spun protein fibers, textured vegetable protein {TVP}, soy oil products). 5. Gô (a thick white puree

of well-soaked uncooked soybeans). 6. Okara or Unohana. 7. Curds and whey. 8. Tofu (includes history, and preparatory techniques: Parboiling, draining, pressing {towel and fridge method, slanting press method, sliced tofu method}, squeezing, scrambling, reshaping, crumbling, grinding, homemade tofu (basic, from powdered soymilk, fermentation method related to soymilk yogurt), tofu quick and easy {incl. Chilled tofu–Hiya-yakko}, tofu dressings, spreads, dips and hors d'oeuvre {incl. Creamy tofu dressings and dips, Tofu mayonnaise dressing, Tofu tartare sauce, Tofu cream cheese, Tofu sour cream, Tofu cottage cheese, Tofu guacamole}, tofu in salads {Western style and Japanese style salads incl. Shira-ae}, tofu with sandwiches and toast, tofu in soups {Western style and Japanese style soups, incl. miso soup}, tofu in sauces, tofu in breakfast egg dishes, tofu baked, tofu sautéed, stir-fried or topped with sauces {incl. Mabo-dofu [Ma Po doufu]}, deep-fried tofu, tofu with grains, tofu broiled {incl. Tofu dengaku}, tofu simmered in one-pot cookery and seasoned broths, tofu steamed, tofu desserts {incl. Tofu whipped cream or yogurt, Banana tofu milkshake, Tofu icing, Tofu ice cream, Tofu cheesecake, Tofu-peanut butter cookies}).

9. Deep-fried tofu: Thick agé or nama-agé (incl. *atsu-agé* meaning "thick deep-fried tofu," "three-cornered agé" {*sankaku-agé*} in Kyoto, agé cubes {*kaku-agé*}, "five-color agé" {*gomoku-agé*}), ganmo or ganmodoki (incl. *hiryozu / hirosu*, "Flying Dragon's Heads," "treasure balls," "Ganmo treasure balls"), agé or aburagé (incl. *kiji*, "agé pouches," "crisp agé", *kanso aburagé*, "agé puffs," "fried soybean cakes," "hollow agé cubes," "Smoked tofu," p. 189-91, 197).

Note 1. This is the earliest English-language document seen (April 2013) that contains the following terms related to deep-fried tofu (p. 180-90): "Thick agé," *nama-agé, atsu-agé, Hiryozu*, "Dragon," "Flying Dragon's Heads," "treasure balls," "five-color agé," *gomoku-agé*, "Ganmo treasure balls." "fresh or raw deep-fried tofu," "three-cornered agé," *sankaku-agé*, "agé cubes," *kaku-agé, kiji.* "agé pouches," "crisp agé," *kanso aburagé*, "agé puffs," "fried soybean cakes," or "hollow agé cubes."

10. Soymilk. 11. Kinugoshi ("*Kinu* means 'silk'; *kosu* means 'to strain'; well named, kinugoshi tofu has a texture so smooth that it seems to have been strained through silk." It is made from concentrated soymilk). 12. Grilled tofu (incl. sukiyaki). 13. Frozen and dried-frozen tofu. 14. Yuba (incl. many meat alternatives such as Yuba mock broiled eels, Buddha's chicken, Buddha's ham, sausage). 15. Tofu and yuba in China, Taiwan, and Korea (incl. Savory tofu {*wu-hsiang kan*}; see p. 258 for illustrations of many meat alternatives, incl. Buddha's fish, chicken, drumsticks, and duck, plus vegetarian liver and tripe, molded pig's head, and molded ham). One type of Korean soybean miso is called *kotsu jang* [sic, *kochu jang*]. When tofu is served with miso [Korean-style, *Tenjang*] as the dominant seasoning, and with

© Copyright Soyinfo Center 2013

rice, "it becomes the popular *Tenjang Chige Pekpem"* (p. 262). 16. Special tofu.

Note 2. This is the earliest (and only) English-language document seen (March 2009) that uses the word "Tenjang" to refer to Korean-style soybean jang (miso).

Part III–Japanese farmhouse tofu: Making tofu for more and more people. 17. The quest. 18. Making community tofu. 19. The traditional craftsman. 20. Making tofu in the traditional way.

Appendices: A. Tofu restaurants in Japan; many are vegetarian: In Tokyo: Sasa-no-yuki / Sasanoyuki, Goemon, Hisago, Sanko-in, Shinoda-zushi, Dengaku (south of Tokyo in Kamakura). In Kyoto: Nakamura-ro, Okutan, Takocho, Izusen, Junsei, Nishiki, Hakuun-an, Rengetsu, Sagano, Sorin-an. Tea ceremony cuisine (*Kaiseki ryori*), Zen temple cookery or Buddhist vegetarian cookery (*Shojin ryori*), Tea ceremony cookery from China (*Fucha ryori*), Wild gathered cookery (*Sansai ryori*). A directory of these and others, with addresses and phone numbers, is given (p. 312).

B. Tofu shops in the West (Directory of 43 shops in the USA, 3 in Europe, and 3-7 in Latin America {Mexico City, Rio de Janeiro and Sao Paolo, Brazil}). C. People and institutions connected with tofu. D. Table of equivalents. Bibliography. Glossary. Index. About the authors (autobiographical sketches; a photo shows Shurtleff and Aoyagi, and gives their address as New-Age Foods Study Center, 278-28 Higashi Oizumi, Nerima-ku, Tokyo, Japan 177). Sending tofu in the four directions.

Pudding recipes include: Rice pudding with gô and apple (p. 76, incl. 2 cups soymilk). Tofu chawan-mushi (p. 147; Steamed egg-vegetable custard with tofu). Tofu fruit whips (p. 148). Tofu rice pudding (p. 150, incl. 1 cup soymilk). Tofu custard pudding (p. 152). Soymilk custard pudding (p. 208). Brown rice pudding (p. 208, with 2 cups soymilk). Soymilk chawan-mushi (p. 209). Chawan-mushi with yuba (p. 249).

Dessert recipes include: Tofu whipped cream or yogurt (p. 148; resembles a pudding or parfait). Tofu ice cream (p. 149, with chilled tofu, honey, vanilla extract and salt). Banana-tofu milkshake (p. 149). Tofu cream cheese dessert balls (p. 149). Tofu icing (for cake, p. 149). Tofu cheesecake (p. 150). Tofu-pineapple sherbet (p. 151). Also: Soymilk yogurt (cultured, p. 205). Healthy banana milkshake (p. 206). On p. 160 is a recipe for "Mock tuna salad with deep fried tofu."

Note 3. This is the earliest English-language document seen (March 2007) that uses the term "Tofu ice cream" to refer to soy ice cream or that contains a recipe for "Tofu ice cream."

Note 4. This is the earliest English-language document seen (April 2013) that uses the term "Tofu Cheesecake" and the first to give a recipe for a tofu cheesecake.

Note 5. This is the earliest English-language document seen (April 2013) that uses the term "Tofu Sour Cream" (p. 109) or that contains a recipe for "Tofu Sour Cream."

Note 6. This is the earliest English-language document seen (April 2013) that uses the term "tofu milkshake" or that gives a recipe for a shake made with tofu.

Note 7. This is the earliest English-language document seen (Jan. 2012) that uses the term "sticky fermented" to refer to natto.

Note 8. This is the 2nd earliest English-language document seen (April 2013) that uses the term "dried-frozen tofu."

Note 9. This is the earliest English-language document seen (April 2013) that describes preparatory techniques for tofu (p. 96-98).

Note 10. This is the earliest English-language document seen (April 2013) that contains the term "smoked tofu."

Note 11. This is also the earliest English-language document seen (April 2013) that uses the term "kinugoshi tofu" to refer to silken tofu.

Note 12. As of March 2007, the various English-language editions of this book have sold more than 616,000 copies.

Note 13. This is the earliest English-language document seen (April 2013) that uses the term "tofu lees" to refer to okara (see p. 22, 77).

Note 14. This is the earliest English-language document seen (Aug. 2011) that contains the term "Modern Western soybean foods" (see p. 69), a term that Shurtleff would soon (by 1983) replace by the more accurate "Modern soy protein products."

Note 15. This is the earliest published English-language document seen (Jan. 2012) that contains the term "creamy tofu dressings" (or "dressing").

Note 16. This is the earliest English-language document seen (Sept. 2012) that contains the term "Soymilk yogurt."

Note 17. This is the earliest document seen (Oct. 2012) that contains an adequate or detailed description of how to make yuba at home. Address: c/o Aoyagi, 278-28 Higashi Oizumi, Nerima-ku, Tokyo 177, Japan. Phone: (03) 925-4974.

3214. Shurtleff, William; Aoyagi, Akiko. 1975. Tofu and yuba in China, Taiwan, and Korea (Document part). In: W. Shurtleff and A. Aoyagi. 1975. The Book of Tofu. Hayama-shi, Kanagawa-ken, Japan: Autumn Press. 336 p. See p. 250-64.

• ***Summary:*** Contents: Introduction. Three varieties of tofu. Doufu: Known as *tojo* or *tokua* in the Philippines, or as *tahu* in Indonesia. Pressed tofu (*doufu-kan*)*:* Savory tofu (*wu-hsiang kan*), soy-sauce pressed tofu (*chiang-yu doufu-kan*), pressed tofu sheets (*pai-yeh*, incl. pressed tofu noodles or "beancurd shreds" {*doufu-ssu, kan-ssu*}, pressed tofu loops {*pai-yeh chieh*}, Buddha's Chicken {*su-chi*} or Buddha's Ham {*suhuo-t'ui*}, salted dry tofu {*doufu-kan*}). Chinese soft kinugoshi (*shui-doufu, sui-doufu, nen-doufu, nan-doufu,*

© Copyright Soyinfo Center 2013

shin-kao doufu). Warm soymilk curds: Chinese smooth curds (*doufu-nao, dou-nao;* often served for breakfast by street vendors), curds-in-whey (*doufu-hua*). Deep-fried tofu (*yu-doufu, cha-doufu, doufu-kuo, kuo-lao doufu*). Frozen tofu (*tung-doufu, ping-doufu*).

Note 1. This is the earliest English-language document seen (April 2013) that uses the term *tung-doufu* or the term *ping-doufu* to refer to frozen tofu.

Doufu-ru [fermented tofu]: white fermented tofu (*pai doufuru,* incl. 5 different types such as red pepper, sesame oil and red pepper, five-spice, etc.), red fermented tofu (*hung doufuru, nanru, nanyu,* made by adding Chinese red fermented rice [red rice koji] {*ang-tsao*} to the brining liquor to give it a deep red color, thick consistency, and distinctive flavor and aroma; soy sauce is generally used in place of rice wine; another variety is rose essence fermented tofu), stinky fermented tofu (*tsao-doufu, ch'ou doufu,* incl. green stinky fermented tofu), chiang-doufu (prepared by pickling firm cubes of tofu for several days in either Chinese-style miso {*chiang*} or soy sauce).

Soymilk (*doufu chiang, dou-chiang, dou-nai, dou-ru*)*:* Widely enjoyed as a spicy hot breakfast soup (p. 204) or a warm, sweetened beverage (p. 207). Sometimes sold bottled by street vendors.

Yuba: Yuba is much more popular and much less expensive in China and Taiwan than it is in Japan. There are hundreds of yuba shops throughout Taiwan and probably thousands in China, and yuba plays an important role in the nutritional life of the people in home and restaurant cookery. Called bean curd "skin" or "sheets" in most Chinese cookbooks, yuba is known in Mandarin as *doufu-p'i* ("tofu skin") or *doufu-i* ("tofu robes"). Remarkable Chinese ingenuity and creativity in giving the semblance of meat. In the display case of attractive restaurants or marketplace yuba shops are perfect replicas of plucked hens, roosters, and ducks, light-brown fish (complete with fins, gills, eyes, and mouth), juicy hams, tripe, liver, rolled meats, red sausage links, deep-fried drumsticks, and a life-sized pig's head–all made from yuba. Most of these imitation meat dishes are prepared by pressing fresh yuba into a hinged (wooden or aluminum) mold, clamping the mold closed, then steaming it until the yuba's shape is fixed. *Su-tsai* restaurants specialize in Buddhist vegetarian cookery. Names of prepared dishes: Buddha's Chicken (*suchi*), Buddha's Fish (*suyu, sushi*), Buddha's Duck (*suya*), Vegetarian Tripe (*taoto*) or Liver (*sukan*)*;* Molded Pig's Head (*tutao*), Molded Ham (*suhuo*), Sausage Links (*enchan*), Buddha's Drumsticks (*sutsai tsui*), Deep-fried Duck (*suya*). A full-page illustration (p. 258) shows these products. Fresh yuba. Dried yuba (*kan doufu-p'i,* incl. sweet yuba and Bamboo yuba {*fuchu* [*dried yuba sticks*]}). Tofu and yuba in Chinese cookery: Mandarin cookery, congee (rice porridge), "red broiled" sauces (*hong-sao*), meatless days, vegetarian restaurants.

The Chinese tofu shop: Description of the process for making tofu. Tofu in Korea. Recipes: Fermented tofu dressings, spreads, dips, and hors d'oeuvre. Fermented tofu in sauces, egg dishes, and with grains.

Illustrations show: (102) A woman cutting doufu at the marketplace. (103) Making pressed tofu using a hand-turned screw press. (104) Pressed tofu noodles. Buddha's chicken. (105) Street vendor selling soymilk curds. (106) Pressing tofu in forming boxes using stone weights. (107) Deep-frying agé triangles in a wok. (108) Threaded thick-agé cubes. (109) Net-like thick agé. (110) A soymilk vendor carrying bottled soymilk using a shoulder pole. (111) Yuba mock meats. (112) Yuba steaming pots. (113) Steam-heated drum can cooker in Chinese tofu shop. Doufu-ru [fermented tofu] cubes on plate, in bottle, in can. Woman selling tofu, seated by the street side.

Note 2. This is the earliest English-language document seen (April 2013) that uses the word "doufu" to refer to Chinese-style tofu.

Note 3. This is the earliest English-language document seen (Oct. 2012) that uses the word *fuchu* or the word *suohuo* or the term *suohuo-t'ui* or the term "tofu robes" or the term "tofu skin" to refer to yuba. Address: Lafayette, California.

3215. Shurtleff, William; Aoyagi, Akiko. 1975. The book of tofu: Food for mankind (Illustrations–line drawings). Hayama-shi, Kanagawa-ken, Japan: Autumn Press. 336 p. Illust. by Akiko Aoyagi. Index. Dec. 28 cm. Rev. ed. 1977 Autumn Press, Brookline, MA. [53 ref]

• ***Summary:*** Continued: Illustrations (line drawings, both numbered and unnumbered) show: A hearth in a traditional Japanese farmhouse with tofu dengaku roasting around a bed of coals in a sunken open-hearth fireplace. An old Japanese plum tree blossoming in winter. Three pieces of skewered tofu dengaku with a sansho leaf atop each in a special serving box. A sprig of sansho with berries. Stylized top of a soybean plant in a circle. Fig. (4) Tofu products available in the West (tofu, dofu, kinugoshi, thick agé triangles, cubes, and cake, agé and agé puffs, hollow agé cubes, soymilk, tofu pudding, doufu-ru {white and red}, ganmo {patties, small balls, and treasure balls}, grilled tofu, dried-frozen tofu, instant powdered tofu, okara, dried yuba, soymilk curds, pressed tofu, savory tofu). A wooden cutting board and Japanese broad-bladed vegetable knife (nagiri-bôcho) with vegetables and tofu on a woven bamboo tray.

Note 1. This is the earliest English-language document seen (April 2013) that uses the term "treasure balls" to refer to Chinese-style tofu mixed with various finely-chopped vegetables, rolled into balls, and deep-fried tofu. (8) A wooden keg of red miso and a plastic bag of barley miso. (9) Shoyu in a metal can, wooden keg, glass bottle, and table-top dispenser. Traditional Japanese kitchen tools: *Miso-koshi* (woven bamboo strainer used in making miso soup). cutting board, Japanese vegetable knife, wooden spatula, bamboo rice paddle (*shamoji*) and spoon, woven bamboo colander or

tray (*zaru*), suribachi, Japanese grater (*oroshi-gané*), sudaré (bamboo mat), pressing sack for tofu or soymilk, serrated tofu-slicing knife, tawashi scrub-brush (made of natural palm fiber), wok with draining rack and wooden lid, stir-frying ladle and spatula, long cooking-chopsticks, mesh skimmer, deep-frying thermometer, Chinese bamboo steamer (*seiro*), charcoal brazier (*konro, shichirin*), broiling screen. Covered pot steamer. Small lidded pottery pot. More kitchen tools (p. 50-51). (10) A soybean measuring box (*isshô-bako*). (11) The soybean plant. Two views of a soybean seed with seed coat, hilum, and hypocotyl labeled. A bag full of soybeans. Roasted soybeans in a woven bamboo tray (*zaru*). Edamamé in the pods. Three shapes of kinako treats. Soybean sprouts. Natto on a bamboo mat (*sudare*). Natto wrapped in rice straw as it ferments. A hand holding chopsticks that lift natto up from a bowl of natto–connected by gossamer threads. Tempeh (round and square pieces). Wrapping a small packet of inoculated soybeans to make tempeh. (15) Two Japanese women in traditional clothing using hand-turned grinding stones (quern) to grind soaked soybeans when making tofu. (16) Push-pull grinding stones. (17) Motor-driven grinding stones. (18) Water-powered millstones. (19) Wind-powered millstones. (20) Unohana. (21) A tofu maker sitting on a traditional lever press that presses soymilk from the okara in a pressing sack on a rack. A heavy iron skillet. (22) Folding okara omelet pouches. Okara doughnuts. (23) A bamboo colander. (24) A tofu maker weighting a colander with a brick so that whey will collect in it. (25) Ladling whey from curds; it foams! (27) A horse drinking whey from a wooden vat. Soymilk curds in a bamboo mat. (28) Ladling curds for Awayuki. (29) Fresh tofu in a plastic tub. (30) A tofu maker placing a weight on pressing lids as tofu is pressed in settling boxes (forming boxes). Transferring tofu-filled settling box to sink. Cutting a block of tofu into cakes under water. Eggplant halves in a yin-yang dance. Preparatory techniques used with tofu (slanting press, sliced tofu, squeezing, scrambling, reshaping, crumbling). (32) Utensils for making tofu at home. (33) Three designs for a homemade settling container. (34) Preparing homemade tofu (a-l). (35) Removing tofu from a farmhouse-style settling container (forming box). (36) Chilled tofu. Iceberg chilled tofu. A hot, moist, white towelette (*o-shibori*) is used to wipe the face and hands before (or occasionally after) a meal. Tofu salads in three Japanese pottery dishes. Japanese soups in three types of containers. (37) Chrysanthemum tofu. (38) Tofu poached egg. Tofu-stuffed green peppers. A wok. (39) Filling a wok with oil. (40) testing oil temperature in a wok. (41) Deep-frying tofu tempura–and (42) Serving it in a shallow bamboo basket. (43) Making *Kaki-agé.* (44) Dengaku Hoshi (from *Tofu Hyaku Chin*). (45) Skewered Tofu dengaku. Preparing Tofu dengaku in old Japan (from Hokusai's sketchbooks). (46) A variety of skewers. (47) Chinese firepots. (48) A Simmering Tofu wooden serving container heated by coals from within. (49) Miso oden. (50) Tofu wrapped in rice straw. (51) Nanzenji wrapped tofu. (52) Gisei-dofu. (53) Serving freshly deep-fried agé. (54) The deep-frying area of a traditional tofu shop. (55) Deep-frying tools. (56) Wooden bamboo tray with raised sides. Chinese cleaver. (57) Nori-wrapped sushi with agé (making and serving; six drawings). Eating noodles from old Japan (from Hokusai's sketchbook). (58) Preparing homemade noodles. (59) The Oden man on a winter's eve. A pottery bowl of Oden. Kombu rolls. (60) Making konnyaku twists. (61) Nishime in a multi-layered lacquerware box. (61) Pressing tofu for thick agé in a tofu shop. (62) Deep-frying tofu for thick agé. (63) A tofu maker with deep-fried thick agé triangles on screen trays.

Note 2. This is the earliest English-language document seen (May 2012) that contains the terms "deep-fried thick agé triangles" (p. 181) or "hollow agé cubes" (p. 23).

(64) Stuffing thick agé. (65) Thick agé stuffed with onions. (66) Pressing tofu for ganmo. (67) Adding seeds and vegetables. (68) Deep-frying ganmo. (69) A farmhouse open-hearth fireplace with nabe kettle. (70) Preparing homemade ganmo. Ganmo balls in a draining tray. Ganmo cheeseburger. (71) Cutting tofu to make agé slices (*kiji*). (72) Deep frying agé. (73) Opening agé into pouches. Agé treasure pouches.

Note 3. This is the earliest English-language document seen (April 2013) that contains the term "treasure pouches" or the term "Agé treasure pouches" They refer to a Kyoto-style delicacy made with deep-fried tofu pouches.

(74) Agé pouches sealed with foodpicks. Inari shrine with Shinto torii. (75) Kampyo-tied pouches [kanpyo]. (76) Making rolled agé hors d'oeuvre. (77) Tofu maker ladling gô (fresh soy puree) into a cauldron. (78) Stirring down the gô. Pressing soymilk from okara with a hand-turned screw press. (79) Serving fresh soymilk in a tofu shop. Six Japanese commercial soymilk products. Little girl at The Farm (Summertown, Tennessee) seated on a small chair drinking a cup of soymilk. Chinese breakfast soymilk soup with deep-fried crullers (*Siento-chiang with yu-chiao tsao pi*). (80) Takigawa-dofu. (81) Tofu maker pouring the soymilk for kinugoshi tofu. (82) Adding solidifier. (83) Trimming kinugoshi from sides of box. (84) Modern lactone kinugoshi (with GDL). (85) Modern kinugoshi factory. (86) Sasa-no-Yuki's Gisei-dofu container. (87) Kinugoshi with ankake sauce. The entrance way to a traditional Japanese restaurant featuring tofu. Traditional metal skewer for making grilled tofu. (88) Traditional tofu maker grilling tofu over a charcoal brazier (*hibachi*). Grilling tofu in a traditional open hearth. (89) An early method of elaborate grilling. Pieces of tofu on different types of skewers. Farmhouse sukiyaki with grilled tofu. (90) Tying frozen tofu with rice straw. (91) Drying farmhouse frozen tofu. (92) Pressing frozen tofu at home. (93) Deep-fried frozen tofu with cheese. (94) Making deep-fried frozen tofu sandwiches (*Hakata-agé*). (95) Frozen tofu wrapped in kombu. (96) Steaming table in a yuba shop. Ten different types / shapes of yuba. (97)

Lifting yuba away from soymilk. (98) Yuba sashimi. (99) Yuba envelopes. (100) Deep-fried yuba dengaku. (101) Folding yuba into bundles. Trimming half-dried yuba from a skewer. (102-113) Tofu and yuba in Taiwan, China, and Korea (see separate record). Sesame tofu in pottery bowl. (114) Traditional farmhouse tofu, tied into a package with rice straw rope. (115) Shirakawa-go farmhouses with water-powered rice-dehusker in foreground. (116) Making seawater tofu at Suwanose. Mortar and pestle for pounding mochi. Making community tofu: Western metal hand mill, hand-turned stone mill apparatus, faces of upper and lower stones, colander and cloth, two shapes of cooking pots, Japanese farmhouse earthen cooking stove, cooking pot set on cut-off oil drum, ladle, two wooden paddles, pressing rack, pressing okara, lever press, pressing sack, wooden settling [forming] container with cloths. (117) Making nigari with salt in bamboo colander, a traditional "salt boat" for refining salt of nigari. (119) Country farmhouse tofu (5 illust.). (121) Morning shopping at a tofu shop. (122) Diagram of a tofu-shop floor plan. (123) Modern pressure with hydraulic press. (124) Modern centrifuge with 3 soymilk barrels. Thirty-one unnumbered illustrations showing every step in making and selling tofu in a traditional Japanese shop (p. 299-306). (125) Cutting tofu for Dengaku (from *Tofu Hyaku Chin*). (126) Ladies busy making dengaku (from *Tofu Hyaku Chin*). (127) Hearth at Nakamura-ro. (128) The garden at Okutan. Six types of Japanese sea vegetables: Hijiki, aonori, wakame, agar, nori, kombu. (129) Japanese vegetables (27 illustrations). Address: c/o Aoyagi, 278-28 Higashi Oizumi, Nerima-ku, Tokyo 177, Japan. Phone: (03) 925-4974.

3216. Shurtleff, William; Aoyagi, Akiko. 1975. The book of tofu: Food for mankind (Tables, graphs, and diagrams). Hayama-shi, Kanagawa-ken, Japan: Autumn Press. 336 p. Illust. by Akiko Aoyagi. Index. Dec. 28 cm. Rev. ed. 1977 Autumn Press, Brookline, MA. [53 ref]

• ***Summary:*** Tables, graphs, diagrams (etc.) show: (1) Bar chart of per-acre yields of usable protein from different food sources: Soybeans 356, rice 265, corn 211... milk 82, eggs 78, meat (all types) 45, beef 20. (2) Graph of world meat consumption versus income: People in rich countries (those with high per capita income) tend to eat a lot of meat, while those in poor countries tend to eat little. Table showing percentage of protein by weight in 20 basic Western foods and foodstuffs. (3) Table of 18 tofu products available in the West: For each is given–Name used in this book, other names, description, where sold, how sold. (5) Table showing composition of nutrients in 100 gm of tofu and related products (16 products in all). (6) Graph of protein vs. moisture content in various types of tofu. Table of NPU (net protein utilization) ratings of 13 basic foods. (7) Table of amounts of essential amino acids and their percentages with minimum daily requirements in 100 gm portion of tofu. Table of amount of various foods combinations that provide exactly 50% of the daily adult male requirement of usable protein. Table showing the cost of one day's supply of usable protein from various foods.

(14) Diagram showing Gô as the source of all tofu products. (26) Percentage of original soybean protein contained in by-products of the tofu-making process: 73.5% ends up in the final tofu. (31) Effects of preparatory techniques on 1 cake of tofu: Final weight, percentage protein in final tofu, percent reduction in weight from water loss. Table of nutritional composition of soymilk, dairy milk, and mother's milk (compared on an equal water basis, p. 200). Table showing composition by weight of seawater (p. 282). Table of the composition of the solids in clean seawater: Sodium chloride 77.8%, magnesium chloride 9.5%, magnesium sulfate 6.6%, calcium sulfate 3.4%, potassium chloride 2.1%, magnesium bromide 0.2% (p. 283). Table of the composition of the liquid that drips out of natural / unrefined sea salt when making nigari (p. 284). Table of the composition of the solids in natural nigari (mostly magnesium chloride, p. 284). (120) Graph of soaking time vs. temperature for soybeans. • ***Summary:*** "A Japanese cookbook written over 350 years ago contains the following recipe for Sukiyaki: 'Obtain either wild goose, wild duck, or antelope, and soak the meat in *tamari* shoyu. Heat a well-used Chinese plow (*kara-suki*) over an open fire. Place the meat on the plow, garnish with thin rounds of *yuzu*, and broil on both sides until the color changes. Serve and be happy.'

"The word sukiyaki–pronounced skee-ya-kee–means 'broiled on the blade of a plow.' Although the modern preparation generally features beef as the basic ingredient, sukiyaki was traditionally prepared with wild game, fowl, fish, or shellfish. Wild boar was also a favored ingredient, and seafoods such as tuna, yellowtail, whale, wreath shells, and scallops were and, in areas such as Kyoto, still are widely used in the dish.

"Before reaching its present form, sukiyaki passed through a number of unusual historical transformations. The earliest preparation was undoubtedly developed by farmers, hunters, and fishermen who broiled their catch over an open fire using a plow or whatever other utensil was available. Since the earliest plow, the predecessor of the present *nabe*, was nothing but a flat iron plate, it was unable to hold cooking liquids. It was probably for this reason that the meat came to be marinated or basted with tamari shoyu, a technique that is still practiced in some Japanese restaurants. Gradually, sake or *mirin* came to be used in

© Copyright Soyinfo Center 2013

the marinade, various vegetables and grilled tofu were broiled with the meat, and the traditional flat plow or griddle became inadequate to hold the juices of this cornucopia of new ingredients. A new container was needed, and at this point, the ancient tradition of broiling wild meat on a plow merged with the newly-imported tradition of *shippoku*, a type of beef-*nabe* cookery which originated about 300 years ago, just after the first contact with Western traders and missionaries.

"Developed in the international port town of Nagasaki, *shippoku* was said to have its historical culinary roots in Holland, Portugal, China, and Korea. As a result of the merger, the original sukiyaki ingredients eventually came to be cooked in heavy iron or Korean-style stone pots, and the dish was served as a one-pot meal prepared at the table. Consequently 'sukiyaki' became a misnomer, for the new dish was neither broiled nor prepared on a griddle-like plow. But neither was the new sukiyaki a true *nabe* dish, since its ingredients were not simmered in a seasoned broth. Rather, this unique Japanese creation straddled three categories: it was a broiled dish insofar as the meat was first cooked in a sizzling-hot pan; it was a *nabe* dish since it was a one-pot prepared at the dining table; and it was a *nimono*, or simmered dish, insofar as the meat and vegetables were simmered together in a rich mixture of shoyu, sake, and dashi.

"Up until this time, the Japanese had never apparently considered using beef or other livestock in sukiyaki. According to a popular legend, *kamado-gami*, the god of the kitchen hearth, is said to have instructed the Japanese people in ancient times to refrain eating the meat of all four-legged animals, especially of livestock. This admonition was reinforced by the nation's emperors and the vegetarian teachings of Buddhism, so that for about 1200 years–from the 8th century until the 19th century–most Japanese did not eat meat. However with the arrival of Christianity in the 16th century, the eating of beef was also forbidden, and sukiyaki was once again prepared exclusively with seafood, wild game, or poultry. Those who developed a longing for broiled meat, but who were not allowed to prepare it in the family's common pot or in the presence of those who kept the faith, were compelled as a last resort to prepare their sukiyaki the traditional way, substitution using a plow or mattock for the kettle and enjoying the forbidden delicacy alone and in secret in the barn, field, or forest. This tradition of 'underground sukiyaki' is said to have continued until about 1900.

"With the opening of Japan to the West in the mid 19th century and the relaxation of traditional prohibitions, meat eating gradually became fashionable in the cities. Yet most Japanese tasted their first beef with considerable trepidation, having been warned by priests and traditionalists that their action was an affront to their ancestors and that dire consequences would befall them. Little by little, however, beef sukiyaki came to be accepted.

"The first Japanese who worked up the courage to actually eat beef did not prepare it Western-style as steak or roast beef. Rather, they cut the meat into paper-thin slices, employing the same method they had used for centuries to prepare *sashimi*, or raw fish. And they seasoned this meat with shoyu in much the same way they would season simmered vegetable or tofu dishes. Many Japanese probably ate their first beef in the form of sukiyaki, and different parts of the country soon developed unique styles of serving it. To this day in the Kyoto area, restaurants place dispensers of shoyu, *mirin*, and sugar on the table and allow each guest to season his food to taste, whereas restaurants in Tokyo have developed their own unique mixtures of these ingredients to form standard cooking liquids.

"Throughout the world people now associate sukiyaki with fine Japanese cookery. In a sense, this is ironic because Japanese cuisine makes relatively little use of meat, and much of sukiyaki's historical influence came from abroad. The ancient delicacy of Japanese hunters and the imported *nabe* preparation have now been totally transformed to become Japan's most famous international dish. And although tofu plays a relatively inconspicuous role in creating the flavor of this dish, sukiyaki has nevertheless been the vehicle whereby thousands of Westerners have had their first taste of 'soybean curd.'

"Although most present-day sukiyaki uses beef as the featured ingredient, our recipe uses ganmodoki–mock goose–in deference to the earliest traditions of using wild fowl. Homemade frozen tofu and frozen thick-agé, the textures of which resemble that of tender beef, make excellent substitutes. Although regular tofu is occasionally used in sukiyaki, grilled tofu is generally preferred for its ability to absorb the flavors in the rich broth; its substantial, almost meaty texture; its ability to keep its form during the frequent stirring; and its barbeque flavor. In Japan, more grilled tofu is used in sukiyaki than in any other type of cuisine." A recipe follows. Address: Lafayette, California.

3219. Shurtleff, William; Aoyagi, Akiko. 1975. Tofu and yuba in China, Taiwan, and Korea: Doufu-ru (Document part). In: W. Shurtleff and A. Aoyagi. 1975. The Book of Tofu. Hayama-shi, Kanagawa-ken, Japan: Autumn Press. 336 p. See p. 255-56, 262-64.

• ***Summary:*** "Surely the most distinctive genre of tofu prepared in China is doufu-ru, or fermented tofu. Doufu-ru, in its many forms, is completely unlike anything prepared in Japan or, for that matter, any food familiar to most Westerners. Known in English as Chinese cheese, tofu-, bean curd-, or soybean cheese, or preserved- or pickled bean curd, it is called doufu-ru, furu, rufu, or dou-ru in Mandarin, fuyu or funan in Cantonese (and in most Western tofu shops run by Cantonese masters), and sufu or dousufu in Shanghai and in most scientific literature. The latter terms, which mean 'molded milk,' are not at all familiar to most Chinese."

Note: This is the earliest English-language document seen (Oct. 2011) that uses the term "doufu-ru to refer to fermented tofu.

"Doufu-ru has a soft–almost creamy–consistency and strong flavor and aroma reminiscent of Camembert cheese. Most varieties, seasoned with minced red peppers, are quite sharp and hot on the tongue, so that a little bit goes a long way. Widely enjoyed as a relish and seasoning, doufu-ru is prepared and sold in special Chinese pickle-and-miso shops rather than in neighborhood tofu shops. Traditionally, it was also prepared in many homes and farmhouses. The process of fermentation and preservation in a brining liquor enables this variety of tofu to last for as long as one to two years, even in semitropical climates, and its low cost makes doufu-ru especially popular among the poorer classes. Like cheese, wines, miso, shoyu, and many other fermented foods, doufu-ru gradually improves in flavor, aroma, and texture as it ages. As mold enzymes break down and digest the protein in the tofu, the latter's sharp flavors mellow and its consistency softens: well-aged doufu-ru virtually melts on the tongue. After the tofu has ripened for 6 to 8 months, its color turns from yellowish white to a soft light-brown, and the wine-and-salt brining liquor, too, grows richer and mellower.

"Fermented tofu is the only traditional soybean product made in the manner of Western cheeses, that is, by ripening tofu with a mold. Although one would think that soymilk could easily be made into cheeses similar to those prepared from dairy milk, repeated attempts to produce such cheeses–even in modern Western laboratories–have until very recently met with failure. But unlike Western cheeses, doufu-ru is immersed in an alcoholic brine during ripening and is generally sold still immersed in the brining liquor in pint bottles or small cans. To prepare doufu-ru, 3/4- to l¼-inch cubes of doufu or firm tofu are inoculated with spores of a mucor-type mold, then incubated in a warm place for about 3 to 7 days until each cube is covered with a dense mat of fragrant white mycelium. The molded cubes are immersed in the brine, which generally contains Chinese rice wine and red peppers (or other spices and seasonings). After ripening for one to two months in the brining liquor, the bottled tofu is shipped to Chinese markets where it is often allowed to age for another two to four months before being placed on sale. It is said that if the doufu-ru remains motionless when the jar is spun quickly on its axis, it has been properly aged and is ready to use.

"In China, the most popular ways of serving doufu-ru are as a seasoning for *congee* (hot breakfast rice porridge) or rice, as an appetizer or hors d'oeuvre with drinks, or as an ingredient in stir-fried dishes or simmered sauces, used to add zest and flavor. The brining liquor is also used in many of these preparations. In Western cookery, doufu-ru is delicious used like Camembert or Roquefort cheese in dips, spreads, dressings, and casseroles. Recipes for each of these preparations are given at the end of this chapter.

"The ideographic character for *fu* in doufu-ru (also used in the word doufu) means 'spoiled.' The character for *ru* means 'milk.' These characters have an unusual and very ancient etymology. Although the Chinese had a highly developed civilization long before the beginning of the Christian era, they never developed the art of dairy farming or, consequently, of making cheese. But their northerly neighbors, the Mongols, whom the Chinese regarded as uncivilized barbarians, were quite skilled in the preparation of fine goat's cheese. The Chinese called this cheese *furu*, or 'spoiled milk.' Centuries later, the Chinese learned how to prepare their own variety of fermented cheese, but from soy rather than dairy milk, probably with some help (or at least inspiration) from the Mongols. And the name which they had used derogatorily for the Mongolian cheese gradually came to be used for their own tofu cheese: their insult boomeranged and remains with them to this day. Consequently some modern Chinese and Japanese–especially those operating expensive restaurants–write the character *fu* in the words tofu, doufu, and doufu-ru with a different character which, although pronounced 'fu,' means 'affluent, ample, or abundant.'

"Records show that doufu-ru was being produced in China by the fifteenth century and that it may have originated much earlier. The technique for making fermented tofu spread from China to Vietnam (where similar a food called *chao* is now prepared) and to the East Indies (where *tao tuan* is made.) A type of fermented tofu called *tahuri* is also produced in the Philippines by packing large (4- by 4- by 2½-inch) cakes of firm molded tofu into cans with a large quantity of salt. Neither sake nor brine is used in the process. After ripening for several months, the tofu is yellowish brown and has a distinctive salty flavor.

"The four basic types of Chinese fermented tofu are white doufu-ru, red doufu-ru, *tsao*-doufu ("tofu fermented in sake lees"), and *chiang*-doufu ("tofu fermented in miso or soy sauce"). The brining liquor used for each is also a popular ingredient in many Chinese recipes, especially

© Copyright Soyinfo Center 2013

in dipping sauces. Called doufu-ru *chih,* it often contains various spices or minced red peppers which make it a zesty seasoning.

"White Doufu-ru (*Pai doufu-ru*)*:* In most of China and in the West, this is the most popular type of fermented tofu. Unless it is specifically being contrasted with the red variety, it is generally called simply doufu-ru. The tofu's flavor, color, and aroma can be modified either by changing the salt or alcohol composition of the brining liquor or by adding different combinations of spices and seasonings. The most common brine contains about 10 percent alcohol and 12 percent salt; some contain little or no alcohol, while others may contain more than twice as much alcohol as salt. One brine of the latter type yields "drunken cheese" (*tsui-fang*) and another yields "small cheese cubes" (*chih-fang*).

"At least five different varieties of white doufu-ru are sold in markets and marketplaces throughout Taiwan and China. The most popular is red pepper doufu-ru (*la doufu-ru, la-chiao furu, or la furu*). Available in the West as Fermented Bean Curd, it contains a hearty portion of minced red peppers which make the flavor hot and spicy while also serving as a natural preservative. When sesame oil is added to this type of fermented tofu it is known as sesame-red pepper doufu-ru (*mayu-la doufu-ru*). Some milder and particularly delicious types of doufu-ru are made in liquors containing only rice wine, salt, and water plus an occasional small amount of sesame oil" Continued. Address: Lafayette, California.

3220. Shurtleff, William; Aoyagi, Akiko. 1975. Tofu and yuba in China, Taiwan, and Korea: Doufu-ru (Continued–Document part II). In: W. Shurtleff and A. Aoyagi. 1975. The Book of Tofu. Hayama-shi, Kanagawa-ken, Japan: Autumn Press. 336 p. See p. 255-56, 262-64.

• ***Summary:*** Continued: "Other seasonings include anise, cinnamon, lemon juice, slivered lemon peel, tiny dried shrimp, and diced ham. Spiced, fermented tofu with five seasonings is called *wu-hsiang furu,* and a variety of fermented tofu called *hsia-tsu* doufu-ru is dried after brining, then sold in paper cartons.

"Red Doufu-ru (*Hung doufu-ru, Nanru,* or *Nanyu*)*:* This product is prepared in basically the same way as its white counterpart except that Chinese red fermented rice (*ang-tsao*) is added to the brining liquor (to give it a deep-red color, thick consistency, and distinctive flavor and aroma) and soy sauce is generally used in place of rice wine. The liquor may or may not contain minced peppers. Red doufu-ru is now available in the West packed in a hot red sauce in small (4- to 6-ounce) cans labeled Red Bean Curd. One popular variety is 'rose-essence doufu-ru' (*mei-kui doufu-ru, mei-kui hung nanru,* or *nanyu*), made in a brining liquor similar in appearance to ketchup and seasoned with small amounts of rose essence, caramel, and natural sugar. The seasonings lend a distinctive fragrance to any dish in which it is served. Red doufu-ru is especially popular in spicy hot sauces served with *nabe* dishes, meats, and fresh or even live 'dancing' shrimp.

"Tsao-doufu: Prepared by aging either fresh or molded tofu in rice wine and its lees (*chu-tsao*), this product has a heady alcoholic flavor and aroma. Green tsao-doufu (*ch 'ou doufu*), a popular Taiwanese food, is prepared in homes and marketplace stalls by placing pressed tofu squares into a crock containing sake less, crushed leaves, and a green mucor mold. After the tofu has fermented for 12 hours or more, venders peddle it in the streets. *Ch'ou doufu* means 'foul-smelling tofu.' While many Chinese themselves dislike its strong aroma and flavor, slippery texture, unusual color, and aftermath of bad breath, its devotees claim that once a taste is acquired for this unique food, it is for evermore regarded as a great delicacy.

"Chiang-doufu: Prepared by pickling firm cubes of tofu for several days in either Chinese-style miso (*chiang*) or soy sauce (*chiang-yu*), this product has a reddish-brown color and a salty flavor. In some cases it is dried briefly or fermented with mold before being pickled; sake lees are occasionally mixed with the *chiang.* This tofu often has much the same rich sweetness as Japanese Finger Lickin' Miso (p. 31). Chiang-doufu sauce (*chiang-doufu chih*) is prepared by mixing the pickled tofu with its pickling brine, then grinding the mixture until it is smooth; it is used as a condiment for Chinese lamb or beef dishes."

On page 262 are three illustrations of Doufu-ru, followed by 15 recipes for using doufu-ru and its brining liquor in the following recipe types: (1) Dressings, spreads, dips and hors d'oeuvre (8 recipes). Sauces, egg dishes and with grains (7 recipes).

The last recipe, Doufu-ru with hot rice (serves 2) states: This is the most popular way of serving doufu-ru in China. The dish is generally served for breakfast. Some people prefer to use the tips of their chopsticks to take a tiny piece of doufu-ru with each bite, whereas others like to mix the doufu-ru with the hot rice or rice porridge (*congee*) before starting the meal.

2½ cups freshly cooked Brown Rice or Rice Porridge (p. 50)

2 to 4 cubes of doufu-ru (white or red)

2 tablespoons thinly sliced scallions or leeks (optional)

"Place the hot rice in large individual serving bowls and top with doufu-ru cubes and, if used, sliced scallions.

Note: This book contains the largest number of recipes for using fermented tofu, seen (Oct. 2011) in any Western-language cookbook to date. Address: Lafayette, California.

3221. Shurtleff, William; Aoyagi, Akiko. 1975. Kinako (Roasted full-fat soy flour) (Document part). In: W. Shurtleff and A. Aoyagi. 1975. The Book of Tofu. Hayama-shi, Kanagawa-ken, Japan: Autumn Press. 336 p. See p. 64-66.

• ***Summary:*** This section begins: *"Kinako* is a tan or beige

© Copyright Soyinfo Center 2013

flour made by grinding whole roasted soybeans. It has a nutty flavor and fragrance and contains over 38 percent protein. Many of Japan's most popular confections are dusted with a light coating of sweetened kinako. These confections usually consist of a grain such as mochi (pounded glutinous rice), or steamed, pounded millet filled with an (sweetened adzuki bean paste). In the Kyoto area alone more than twelve popular confections are prepared with a covering of sweetened kinako. In a number of Japanese health-food treats (such as *kinako amé, gokabo, kokusen,* and *kankanbo*) kinako serves at the main ingredient; it is mixed with mizuame to give a chewy taffy-like texture and rich sweetness. We feel that kinako itself and a number of the following preparations–especially Kinako Butter, Kinako Candy, and Kinako Coffee–could be produced in cottage industries and sold commercially with excellent results. A delicious and inexpensive source of high-quality protein, kinako is generally sold in ¼-pound bags and used in small quantities."

Recipes include: Homemade kinako. Kinako butter [homemade soynut butter]. Creamy kinako butter. Kinako-peanut-sesame spread (with peanut butter and sesame butter). Kinako in brown sauces and roux. Kinako in breads and muffins. Sweetened kinako. Abekawa mochi (This is the most popular way of using kinako in Japan). Chinese-style kinako & peanut butter balls ("These sweet, almost crumbly delicacies are a favorite in China where they are sold commercially). Kinako candy (*Kinako amé* or *Genkotsu amé;* variations: *Kokusen* or *Kankanbo, Gokabo*). Kinako high-protein bars. Kinako coffee.

Kinako is also called for in a recipe for Abekawa-dofu (Frozen tofu rolled in sweetened kinako) (p. 237). Address: Lafayette, California.

• ***Summary:*** Contents: Introduction. Dried-frozen tofu: Origin of tofu at Mount Koya some 750 years ago by a Shingon priest, how Koya-dofu is made Mt. Koya, dissemination to farms and villages, by the Edo Period (1600-1868) Koya-dofu was known throughout Japan, Takeda Shingen experiments with dried-frozen tofu in Nagano (no drying shed), history of tofu made in automated factories, discovery of ammonia, the largest factory today, how dried-frozen tofu is sold in Japan today.

Reconstituting frozen and dried-frozen tofu: Frozen tofu, dried-frozen tofu. Storing and cooking dried-frozen tofu. Homemade frozen tofu. Homemade dried- frozen tofu.

Recipes for dried-frozen tofu (25 recipes). Address: Lafayette, California.

3223. **Product Name:** Tofu.
Manufacturer's Name: Spartan Soy Products.
Manufacturer's Address: 1307 Cedar Hill Dr., East Lansing, MI 48823.
Date of Introduction: 1975. December.
New Product–Documentation: Shurtleff & Aoyagi. 1975. *The Book of Tofu.* p. 313.

3224. Li, Shih-chen. comp. 1975-1977. Shinchû kôtei kokuyaku honsô kômoku [Collected essentials of herbs and trees. Illustrated compendium of pharmacopoeia. Translation of the *Pen-ts'ao kang-mu* from the Chinese into Japanese by SUZUKI Shinkai under the direction of KIMURA Koichi]. Tokyo: Yoshundo Shoten. For tofu and fermented tofu see vol. 7, p. 224, 256, and Vol. 12, p. 177. [Jap]*
• ***Summary:*** The culmination of the materia medica tradition in Japan. Contains a very early reference to fermented tofu. Address: China.

3225. **Product Name:** Soft Tofu, Firm Tofu, Baked Tofu, Tofu Pudding, Soymilk.
Manufacturer's Name: American Food Co.
Manufacturer's Address: 800 S. Palm Ave. #5, Alhambra, CA 91803. Phone: 213-570-1620. Later 818-570-1620.
Date of Introduction: 1975.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address (800 S. Palm St.), and phone number. ("A Chinese-American shop").

Talk with a company representative. 1988. Aug. 24. Jackson Wu, the president, will be back in 2 weeks. The company started making tofu in about 1974 or 1975. They launched all their products from day 1.

Product with Label purchased in Chinatown, Oakland, California. 1992. Oct. 28. 5 by 4.5 inches. Transparent film on water pack tub. Red, orange, black, and white. "AFC finest quality foods. 100% natural. High in protein. High in calcium. No cholesterol. Keep fresh. Change water. Keep refrigerated." Ingredients: Soybean, water, calcium sulfate. 4 pieces (of tofu). 19 oz. UPC indicia.

Talk with Raymond Lee. 1993. Oct. 13. Wy Ky's foreman for many years was Yep Wing. One day the owner of Wy Ky had a conflict with Mr. Wing, so Mr. Wing left and helped to start American Food Co., taking many company secrets with him.

I.K.; Chu, S.H.; Wang, C.Y. 1975. Po mo chuang tan pai shih p'in, tou fu p'i, chih tsao fang fa chih yen chiu [A study on the process of protein-lipid film food manufacturing]. *Shih P'in Chia Kung* (*Food Processing*) No. 45. 16 p. [10 ref. Chi; eng]

• ***Summary:*** "An automatic continuous method for producing soybean protein-lipid film was developed successfully in a pilot plant scale experiment. Sodium alginate at the level of 0.6% by weight was added into soybean milk. After mixing thoroughly and deaeration, the mixture was extruded through a narrow slit into a flow channel of calcium chloride solution (5%), and coagulated to form a thin film immediately. This film was different in physical properties from the traditional product. Using this film some kinds of delicious Chinese foods, such as pan-fried protein-lipid film, egg rolls and vegetarian chicken meat could be prepared." Address: China.

3229. **Product Name:** [Sasa-no-Yuki brand Buro-Dofu (Sealed Lactone Silken Tofu)].
Manufacturer's Name: Morinaga Milk Industry Co., Ltd.
Manufacturer's Address: Shiba 5-33-1, Minato-ku, Tokyo 108 Japan.
Date of Introduction: 1975.
Wt/Vol., Packaging, Price: 10.5 oz Tetra Brik Aseptic carton.
How Stored: Shelf stable; refrigerate after opening.
Nutrition: Per 5.25 oz: Calories 80, protein 7 gm, carbohydrate 4 gm, fat (45% of calories) 4 gm, sodium 40 mg.
New Product–Documentation: Talk with S. Ikegami. 1981. Jan. 14. This product was introduced before the law protecting small tofu makers in Japan was passed in 1976.

Note: This is the earliest commercial tofu product seen made by Morinaga.

3230. **Product Name:** Nomura Tofu.
Manufacturer's Name: Nomura Tofu Co.
Manufacturer's Address: 2219 N. Clark St., Chicago, IL 60614. Phone: 312-935-9766.
Date of Introduction: 1975.
How Stored: Refrigerated.
New Product–Documentation: Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 395. Nomura Tofu Co., 3255 N. Holstead, Chicago, Illinois 60614. Phone: 312-525-3823. Owner: Mr. Nomura.

3232. **Product Name:** Tofu: (Soybean Cake) [Hard, or Japanese Style].
Manufacturer's Name: Quong Hop & Co.
Manufacturer's Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.
Date of Introduction: 1975.
Ingredients: Soybeans, water, calcium sulphate.
Wt/Vol., Packaging, Price: 16 oz packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.
How Stored: Refrigerated.
Nutrition: Per 4 oz. Japanese Style/Hard: Calories 70/100, protein 8/9.7 gm, carbohydrate 9/11.5 gm, fat 0.18/1.5 gm. Percentages of U.S. RDA: protein 11.5/16, calcium 10/15, iron 9/12.
New Product–Documentation: Labels. 1975, dated. 5.25 by 4.25 inches. Clear plastic. Hard is red on yellow. Japanese style is green on yellow. Both on clear film. "Since 1906. Use with: Eggs, Hamburger, Soups, Casseroles, Vegetable Dishes, Plain.

Note: This is the earliest commercial tofu product seen whose texture is described by the word "Hard." The "Hard" refers to Chinese-style tofu.

FIND/SVP. 1981, May. "The tofu market: Overview of a high-potential industry," p. 69. The company now makes about 30,000 lb/week of tofu. They make plain tofu in the firm and soft forms, tofu burgers, dressings, cutlets, and baked tofu.

restaurants in Japan. Higashi-Oizumi, Nerima-ku, Tokyo, Japan. Unpublished manuscript.
• ***Summary:*** Contains detailed descriptions (with address and recipe names based on visits) of Sasa-no-Yuki (Tokyo), Goemon (Tokyo), Hisago (Tokyo and Kamakura), Sanko-In (Tokyo), Shinoda-Zushi (Tokyo, Inari-Zushi), Tofuya (Tokyo), Otako (Tokyo, Oden), The Natural Food Center (Tokyo, Macrobiotic restaurant), Dengaku (Kamakura Dengaku Cuisine), Okutan and Junsei (Nanzenji, Kyoto, Simmering Tofu), Nakamura-Ro (Niken-jaya, Yasaka-Jinja, Kyoto, Kaiseki, chef Shigemitsu Tsuji), Rengetsu (Kyoto, Tofu cuisine), Izusen (Kyoto), Takacho (Kyoto, Oden), Sorin-An (Kyoto, Yuba cuisine), Seizan Sodo (Arashiyama near Kyoto), Sagano (Arashiyama), Nishiki (Arashiyama), Ohara (Arashiyama, Simmering tofu and Kaiseki), Takemura (Arashiyama, simmering tofu and kaiseki), Haku-Un-An (Manpuku near Uji, Fucha-Ryori).

A condensed version of this was published in The Book of Tofu. Address: Tokyo, Japan.

3235. **Product Name:** Aburage (Deep-Fried Tofu Pouches).
Manufacturer's Name: Teruya Tofu Factory.
Manufacturer's Address: 1830 Mill St., Wailuku, Maui 96793. Phone: 808-244-5313.
Date of Introduction: 1975.
How Stored: Refrigerated.
New Product–Documentation: Hawaii Directory of Manufacturers. 1975. p. 11.

3236. **Product Name:** Tofu.
Manufacturer's Name: Tofu Shop (perhaps Chinese Run).
Manufacturer's Address: Avenue Road, Toronto, ONT, Canada.
Date of Introduction: 1975.
New Product–Documentation: Talk with Martha Gifford Thompson of Rochester Zen Center. 1989. April 11. Once or twice she visited a small tofu shop on Avenue Rd. in Toronto. It was not Japanese and probably not Korean. It may well have been Chinese run. This company had a name. They sold other products besides soy. Zensen, her former husband, might know more, about this shop.

Address: Japan.

3238. Bragg, Paul; Bragg, Patricia. 1975. Hi-protein meatless health recipes: With history and reasons. Desert Hot Springs, California: Health Science. 184 p. Illust. No index. 21 cm.
• ***Summary:*** A vegetarian cookbook. Whereas Paul Bragg used to advocate moderate amounts of meat and fish in the diet, he now advocates a meatless / vegetarian diet. These recipes are free of salt and sugar. On the cover the word "Meatless" appears in large bold letters.

Contents: Total health for the total person. Food for thought (sayings). Introduction, by Patricia Bragg (p. 1-9. Strongly advocates a vegetarian diet. Your health food store can substitute for your meat market. Cured meats may cause cancer. Animal fats can be harmful. Vegetarian gourmet cookery). Abundant protein without meat: An arduous journey without meat (Guatemala), health and vitality in Africa's Atlas Mountains [Berbers in Morocco, Algeria, and Tunisia], Arab vegetarians in the Sahara desert, India produces many strong people on a vegetarian diet (incl. Gandhi, yogis. Paul was Gandhi's friend, and they hiked together over miles of hot, dusty roads in India), 175 years of vegetarianism in England (George Bernard Shaw, Bragg's personal friend, lived into his 90s), great vegetarians of the past, fruitarians–a type of vegetarianism, vegans–another type of vegetarian, lacto-vegetarians–the most popular type, vegetarians excel as athletes, degenerative diseases in an affluent society, animal proteins and fats connected with cancer, our malnourished youth, young people are awakening to the importance of good nutrition, a meatless diet must avoid protein deficiency, human individuality, 300,000 retardants born each year in the U.S., how to solve your nutritional problems, how much protein does the body need, protein-hungry hair, sprouts a tremendous source of vegetable protein (incl. soybean sprouts), you must have all the amino acids, vegetarian foods that are rich in amino acids (incl. peanuts, soy beans), B-12 supplement essential in vegetarian diet (soy beans have traces), raw fresh wheat germ also essential in a vegetarian diet, how I discovered the nutritional value of raw wheat germ, combine good nutrition with exercise, brewer's yeast as a vegetable protein–plus, buckwheat leads all grains in protein, buckwheat also rich in minerals and vitamins, here's how to serve buckwheat, use no salt!–its harmful, herbs and garlic add nutrition plus beautiful flavors, the Chinese Restaurant Syndrome, no nutritional value in MSG, Bragg Liquid Aminos (ad, p. 44; many of the recipes in this book call for Bragg Aminos).

Mushrooms an ancient nutritional delicacy. Mushrooms and mushroom recipes. Sesame seeds and recipes. Tahini and recipes. Hulled millet and recipes. Barley and recipe. Chinese yogurt or tofu (and 4 recipes). Suggestions for using Bragg Liquid Aminos (ad, p. 66).

Note: This is the earliest document seen (Aug. 2011) that contains the term "Bragg Liquid Aminos." Mexico gives us delicious meatless protein dishes. History of corn. Soybeans. Appetizers. Salads and dressings. Soups important in vegetarian diet. Vegetables. Casseroles. Entrees (incl. Soybean loaf). Egg and cheese dishes. Health beverages. Pineapple holds the secret of protein-digesting enzymes (smoothie recipes). Breads and grains. Sandwiches and fillings. Spreads. Health desserts (incl. Zesty protein confection {with 2/3 cup soy powder [protein isolate]}). Hi-protein carob brownies (with ½ cup soybean powder).

© Copyright Soyinfo Center 2013

The Bragg travel diet (he takes along his own meatless food). Sickness is expensive (between 1950 and 1979, medical costs in the USA increased 1,568%). Very little money spent on preventive medicine. "Getting old"–True or false? (False, no part of the human body is more than 7 years old, and our blood is replaced every 90 days). When you are healthy–you are happy! Individuals can extend their lives by natural living (examples of Vilcabamba in Ecuador, the Hunza in West Pakistan, and people in the highlands of the Soviet Caucasus; all eat very little meat). Natural diet ad exercise the secret of agelessness. Exercise improves circulation to all parts of the body. Why should man die? Man is not originally carnivorous (physiology and anatomy of the human body). The meatless way of eating is simple. What is a balanced diet? Easy method to balance your nutrition. Modern nutrition confuses even so-called experts (but is basically simple. Paul was "born and reared on a large farm in Virginia." They grew practically all their own foods and had their own gristmill). Health is easiest and safest way. Your body is your closest companion (Be careful about what you eat. The greatest thing in life is energy). Our personal message to you. Protein research data. Protein and calorie counter (a table showing calories, protein, and usable protein for many basic foods). Life's greatest treasure is radiant health. Your health food store: The specialist that is different (list incl. 3 Bragg products). Let your health food store be your meatless butcher shop. Food for thought (p. 182-84; quotations, most have the author given). From the authors ("This book was written for You... We Professional Nutritionists join hands in one common objective... Scientific Nutrition points the way–Nature's Way–the only lasting way to build a body free of degenerative diseases and premature aging..."). My favorite recipes (mostly blank page).

Advertisements: (1) Send for important free health bulletins. (2) Bragg live longer, live stronger self-improvement library (list of 25 books by Bragg, with prices).

From the authors. Brief biography of Patricia Bragg (on unnumbered page at end of book), Ph.D., Nutritionist, beauty and health consultant. Advisor to world leaders, glamorous Hollywood stars, singers, dancers, athletes. Lecturer and author (She says she is the daughter of Paul C. Bragg. An accomplished musician, dancer, tennis player, swimmer, and mountain climber. The youngest woman to ever have been granted a U.S. patent. Graduate of the University of California. Lists her famous clients).

The section on "Chinese yogurt or tofu" (p. 61-65) notes that many years ago, while Bragg was an associate editor of Bernarr MacFadden's famous *Physical Culture* Magazine, he "made one of the greatest nutritional discoveries" of his life. Macfadden asked Bragg to travel to Manchuria, a long and arduous trip, to study these people well known for their tremendous vitality, energy and health. He was well rewarded, for there he "discovered the magic of the soybean, the most potent of vegetable high-protein foods." He found that Manchurians eat low on the food chain, make soy milk and tofu. Tofu is sold in food stores throughout Hawaii, where he lives. Tofu is related to spun soy protein. He gives recipes for: Chop suey with tofu. Vegetable casseroles using tofu. Tofu casserole supreme. Tofu & scrambled eggs.

The section titled "Soybeans" (p. 73-81) has the following contents: Herbs to savor soybeans (21 herbs). Soybeans (introduction). How to make soybean sprouts. Soybean recipes. Green soybeans. How to cook dried soybeans. Method for cooking beans. Soy milk. Soybean cheese (made by allowing soy milk to curdle in a warm place, without using a coagulant). Soybean casserole. Soybean and vegetable stew. Sauteed soybean sprouts and onions. Boston baked soybeans. Stuffed peppers with soybeans. Soybean sprouts en casserole. Soybean-rice loaf. Baked soybean croquettes. Soybean patties with tomato sauce. Soybean loaf (with soybean pulp [cooked, ground soybeans]). Stuffed soybean peppers.

The dietetic and therapeutic value of soya: Soya–the vegetable meat, soy proteins, soy oil, soy carbohydrates, digestibility, therapeutic uses, summary of properties and indications, soya in the macrobiotic diet. Appendix: A revolutionary food: The bread of Soyuva (3,600 calories, in existence by June 1974).

"In 1917 soybeans started to be cultivated in Spain thanks to the efforts of an architect from Tortosa, don Juan Abril Guanyabens, who was sick with diabetes. His physician, Dr. Maneget, director of the resort Caldes de Malavella (Gerona) had recommended this new food to counteract his diabetes. The magazine *Consejos para Vivir* (Advice for Living) stated in its issue no. 106 of March 1971 that the above-mentioned doctor, in 1918, published an article on the spectacular results of this plant and its healthy nutritional effects in the Barcelona periodical *La Veu de Catalunya."*

"In about the 1930s a Spanish farmer grew soybeans and found himself with big difficulties in selling the harvest, even though in other countries it was produced and consumed in huge quantities, due to its high nutritional value, its richness of protein, and its ability to enrich the soil with nitrogen. Nonetheless, there is no doubt that the cultivation of this plant can also provide Spain with substantial economic benefits.

"For this reason in 1934 the Ministry of Agriculture, as indicated by the engineer from Montes, don Juaquín Martín Laplaza, in an interesting work, gave 4 kg of seeds to the Division of Hydrology and Forests (*División Hidrológica Forestal*) to that the latter would conduct the appropriate tests concerning the cultivation of this plant. This was done, and care was taken to vary the locality, type of soil and terrain, climate, and irrigation.

"The locations chosen were: (1) a nursery in the mountains of Prades, between the city of Montblanch and the town of Rojals (province of Tarragona); (2) the city of Seo de Urgell, and (3) in la sierra del Cadí. These test plots were set on the outermost edges of the agricultural pastures and near the forest areas of high altitude, the very areas most likely to be unfavorable for growing soybeans." But despite this, the soybean plants gave good yields of both seeds and forage (p. 6-8). Address: Spain.

• ***Summary:*** Contents: Introduction. Agronomy: Varieties, cultivation, yields. Soybean composition. Protein nutritional value. Traditional processing into nonfermented foods: Soybeans as a table vegetable ("cooked green soybeans. "Certain large-seeded varieties are often referred to as 'garden' or 'vegetable' type soybeans in contrast the better known {smaller seeded} 'field' type"), soy milk, tofu (soybean curd), yuba, kinako, salted soybeans, soybean sprouts. Traditional processing into fermented foods: Miso and shoyu, tempeh. Others (p. 55) include: natto, hamanatto, sufu (soy cheese), tao-tjo, kochu chang, ketjap, ontjom, and yogurt-like products.

Contemporary processing without defatting: 'Debittering' by aqueous treatment, whole bean processing, full-fat flour ("Extrusion cooking to produce full-fat soybean flour has received considerable attention"), soy milk and curd. Contemporary defatting processes: Defatting by aqueous processing, defatting with organic solvents, composite flour ("Substitutes or extenders for wheat flour in baked goods and pasta products are termed 'composite flours,' whether or not they contain some wheat." Many of these include soy protein products), soy flours, protein concentrates, protein isolates and textured soy products (Based on "protein fractionation after hexane defatting of soy meal." Recipes for using soy protein products in foods are available from several publications–which are listed). Address: Anderson Clayton Foods, W.L. Clayton Research Center, 3333 Central Expressway, Richardson, Texas 75080.

its population, mostly squeezed into the eastern third of the country, is four times that of the United States. The best soy sauce in China comes from Fukien [Fujian] and Amoy. The Classic of Mandarin cuisine reached its zenith around 1800, when Yuan Mei wrote volumes about food; these are still considered to be definitive studies of Chinese gourmet cooking in the Mandarin style. There is one entire chapter titled "Bean curd" (p. 57-63).

The book also contains recipes for: Fuzzy melon soup with bean curd (p. 37). Seaweed soup with bean curd (p. 41). Bean curd soup (p. 42). Ma Po bean curd (Szechwan, p. 59). Stir-fried vegetables with black bean sauce (with "2 tablespoons fermented black beans, rinsed and mashed, 1 slice ginger root, minced, 1 garlic clove, minced,..." p. 90). Stir-fried vegetables with fermented bean cake (fermented tofu, p. 91). Braised soybean sprouts (Shanghai, p. 96). Clams with black bean sauce (with fermented black beans, rinsed and mashed, and slices of ginger root, minced, p. 109). Braised fish with fried bean curd (p. 115).

The glossary (p. 178-84) defines: Bean cake, fermented, and fresh (2-inch squares, 1 inch thick). Bean curd cheese, red (nam gooey). Bean-curd cake, deep fried. Bean-curd sheets or sticks, dried [yuba] ("Creamy beige-colored thin sheets. Used for vegetarian (Buddhist) dishes congee or as substitute for egg roll skins. Stick form is used mainly for soup... Always soak in warm water to make pliable before proceeding with recipe"). Bean curd, sweet ("Comes in dried, flat sheets, about 6 inches by 1½ inches. Mocha in color; no sweet taste"). Bean paste, hot. Black beans, fermented (= Fermented black beans. "Small black beans preserved in salt. Very pungent and moist. Almost always used with garlic and ginger in sauces. Rinse with warm water and mash before using. Purchased in plastic bags by weight in Oriental markets"). Brown bean sauce ("Also known as yellow bean sauce and ground bean sauce"). Fish soy. Hoisin sauce ("Thick, smooth, dark reddish brown sauce made from soybeans, spices, sugar, chili and garlic. Mildly sweet in flavor"). Soy sauce (light vs. dark with caramel added). Address: San Francisco, California.

3243. Goulart, Frances Sheridan. 1975. Bum steers: How and why to make your own delicious high protein mock meats, fake fish & dairyless desserts, and avoid useless calories, cholesterol, sodium nitrate, salmonella, trichinosis & high prices. Old Greenwich, Connecticut: Chatham Press. 205 p. Illust. Recipe index. 21 x 19 cm.

• ***Summary:*** This vegetarian cookbook, interspersed with many well-selected anti-meat quotations, describes how to make meatless meats and milk-free dairylike products at home. Contents: Introduction. On the block: Major mock-meat-making supplies. Vegebutchering: Master mock-meat recipe file. Bogus beef. Pseudo pork. Unreal veal. Sham lamb. Con game. Phony poultry. Fake fish. Un-innards. The vege-deli. Mocking up: General dishes. The mock crock. On the side. Dairyless desserts. Steerage (sources of unfamiliar ingredients).

Chapter 1 begins with an introduction to and nutritional composition of tofu, followed by the soybeans, gluten flour, other legumes, etc. Under "Flavors enhancers" are listed soy lecithin granules or flakes, miso, yeast extract (marmite), soy sauce and tamari, and Worcestershire sauce. Chapter 2 contains recipes for making gluten, tofu, grainola (with soy grits), a stock with miso for non-meat dishes (p. 32), mock milk I (made with soy flour), mock milk II (made with raw cashews or almonds), mock (soy) butter (made with soy flour), and mock cream (with soy flour and soy cream), and mock yogurt (with cashew nuts and soy yogurt culture).

Note: This is the earliest document seen (Sept. 2012) that mentions a non-soy, non-dairy yogurt–in this case one made with cashew nuts. A sampling of the many other soy-related recipes include: Moo-less ragout (with tofu, soy sauce, and soy butter, p. 43). Vegetarian rolladen (with cooked ground soybeans, p. 52). Good red meat (with gluten or tofu, p. 53). Greenbutcher's meatballs (with tofu, p. 57). Mock Mac I (burger with soybeans, p. 64-65). Pineapple pig (with tofu, p. 72). Half-calf (with tofu, p. 79). Surrogate salami (with "bean pulp (residue from making Tofu)" [okara], p. 125). Bumsteads: Two burgers for meat-totalers (with tofu, p. 131). Meatless mincemeat (p. 142). Soybean mustard (with soy sprouts, p. 165). Cow tow: Cowless milk candy (with soy milk powder). Jersey bounce: A moo-juice-less junket (with soy milk, p. 184). Bum bombe: Egg-less, cream free (with soy cream, p. 184). Two 100% vegetarian ice creams: Eggless, milkless (with soy powder, p. 186).

Many recipes also contain wheat gluten: Charisma: Char-broiled bum steers (p. 48). Pig-less pork sausage (p. 70-71). Roast loin of veal (p. 80). Fake steaks: Two sham schnitzels (p. 80-81). Vegetarian cutlets (p. 82). Mocking birds I (p. 83). Fruit stew (p. 86). Sham lamb (p. 89). Sham lamb curry (p. 91). Bum bunny (p. 97). Sweet breads (p. 121).

Aduki beans are used in Moo-less rice pudding (p. 183). Sources of ingredients include: Walnut Acres, Penns Creek, Pennsylvania 17862 (herbs, spices, oils, whole grains, flours, seaweeds, etc.). Erewhon Trading Co., 342 Newbury St., Boston, Massachusetts 02115 (seaweeds and general goods, grains, beans, vegetables, seeds, etc.). Shiloh Farms, Route 59, Box 97, Sulphur Springs, Arkansas 72768. Arrowhead Mills, Box 866, Hereford, Texas 79045. Dynamic Nutritional Products, P.O. Box 528, North Hollywood, California 91603 (Milk-free yogurt culture. Trade names: Soyadophilus and Theradophilus).

Sample quotation: "... traditional American reliance on meat, particularly beef, is perhaps the single largest inefficiency in world dietary patterns..."–*New York Times* Oct. 25, 1974. Address: Wilton, Connecticut.

3244. Kloss, Jethro. 1975. Back to Eden. Santa Barbara,

© Copyright Soyinfo Center 2013

California: Woodbridge Press. xx + 684 p. Illust. Index. 18 cm.
• ***Summary:*** After the copyright for the original 1939 edition of *Back to Eden* expired in 1967, the Kloss family, because of a complex set of circumstances, neglected to renew it. The book then went into the public domain. Woodbridge Press decided to publish it as a facsimile edition, but with pages xiii–xx of the front matter containing a new chapter titled "Jethro Kloss–the man and the legend" by Promise Kloss Moffett." It was billed on page 1 of that chapter as "An exclusive feature only in this Kloss family edition. An intimate, personal account by his daughter." This chapter contains four photos: (1) "Jethro Kloss in his early years of teaching and healing." (2) "Jethro Kloss with Amy, his second wife, in Minnesota with his daughter, Promise; her daughter, Mabel; and their first child, Lucille." (3) "Jethro Kloss operating men's hydrotherapy treatment room at Home Sanitarium." He is dressed in a sort of white togo; a patient is inside a large cylindrical chamber (resembling but larger than a 55-gallon drum with a horizontal axis) apparently filled with steam. (4) Labeling and packing cereal foods in Kloss' Tennessee manufacturing operation. On the cover of the paperback edition they put the famous Michelangelo scene from the Sistine chapel of God reaching out to touch Adam's extended finger, thus transmitting the gift of life. New text was added to the cover: "The complete text. A public domain edition. Not authorized by the Kloss family. The classic Back to Eden belongs to the public. There is 'provision in Nature for all the ills of man... and a remedy for every disease.' The secrets of Natural Healing made plain by the preeminent leader of the natural health movement. Herbs, foods, treatments. World's best-known health book!"

On the cover of the hardcover edition was written "The Kloss family heirloom edition. The classic guide to herbal medicine, natural foods, and home remedies. The copyright page stated: "Copyright 1972, 1973, 1974, 1975 by Promise Kloss Moffett, Eden Kloss, and Doris Gardiner.

On the title page was written: "With exclusive features only in this Kloss family edition. American herbs for pleasure and health: natural nutrition with recipes and instructions for living the Edenic life."

For the bitter-sweet story of how this book came to be published, see interview with Doris Kloss Gardiner (Nov. 1990).

• ***Summary:*** The soybean (Soya) was introduced to Cuba in 1904 by the EEA (*Estación Experimental Agronómica de Santiago de Las Vegas*, currently INIFAT, the Experimental Agronomical Station) from the USA, but it was possibly already found in the Isla de la Juventud, used by the Japanese to prepare a kind of cheese called 'tofu.' (*dau phu* in Vietnamese).

Note 1. This document contains the earliest date seen for soybeans in Cuba (1904), or the cultivation of soybeans in Cuba (1904 or 1904; one of three documents). The source of these soybeans was the USA.

Note 2. Although these soybeans were introduced in 1904, they may not have been cultivated until 1905 (see Cruz 1906).

Note 3. The author was born in 1877. The 1st edition was published in 1928 (3 vols, 48 plates).

3252. Rombauer, Irma S.; Becker, Marion Rombauer. 1975.

© Copyright Soyinfo Center 2013

Joy of cooking. Indianapolis/New York: Bobbs-Merrill Co. 915 p. Illust. by Ginnie Hofmann and Ikki Matsumoto. Index. 25 cm.

• ***Summary:*** One of the great American cookbooks. A classic and an all-purpose cookbook, this is the last edition revised by Marion Rombauer Becker. Soy-related recipes and descriptions include: Soy or lima bean casserole (p. 255-56). Soy cakes ("patties" of mashed cooked soybeans, rice, vegetables and eggs, rolled in sesame seeds and sauteed, p. 256). About fresh beans–edible soy beans (p. 284-85, with illustration {line drawing}). Green soybeans (cooked, p. 286; "Use the edible vegetable type, not field varieties of beans"). Low-fat tofu dressing (p. 369). About vegetable and nut milks: These are all nutritionally inferior to animal milks, "as their protein is of lower biologic value and their vitamin content is different." Almond and walnut milks have long been known in Europe. Native Americans used hickory and pecan milk. These milks, and coconut milk, with their delicate, fragile flavors "are a great delicacy in sauces and puddings." Gives recipes for almond milk, soybean milk (p. 534-35). Soybean curd or tofu (homemade, p. 535; "For other suggestions, see *The Book of Tofu*, by William Shurtleff and Akiko Aoyagi). Soybean paste or extender (cooked soybeans pressed through a colander, p. 535). Alternate or engineered foods (p. 535-36; textured vegetable proteins, "TVPs," CSM, WSB). Soy flour (p. 549). Soy meal (p. 549-50; coarser than flour). About seeds, grains, beans and peas–Roasted soybeans (p. 564). About commercial sauces–Soy sauce and shoyu (p. 574). Soy whole wheat bread (with soy flour, p. 608).

In the long, excellent section titled "Know your ingredients" (p. 519+), under "The capers and caperlike buds and seeds" (p. 580) we read: "Similar in Use are Chinese fermented black beans, or *toushi*, which are available in cans;..."

Note: This is the earliest English-language document seen (Nov. 2011) that uses the term "Chinese fermented black beans" or the word "toushi" to refer to fermented black soybeans.

As of April 1996 the book has not been revised since 1975. It is now a Scribner book published by Simon & Schuster. Hardcover price: $24.00. Address: Jennifer Becker, 38537 S.E. Hudson Rd., Sandy, Oregon 97055.

3253. Silverstein, Alvin; Silverstein, Virginia B. 1975. Beans: All about them. Englewood Cliffs, New Jersey: Prentice-Hall, Inc. 86 p. Illust. by Shirley Chan. Index. 22 cm. Summarized in Soybean Digest, Sept. 1975, p. 43. [7 ref]

• ***Summary:*** This excellent book for children discusses beans in legend and history, how to grow them, and their future as a low-cost protein supplement. Includes experiments, bean recipes, and games.

Contents: Beans. The story of beans. The history of beans. Beans in legend and lore. The life story of the bean. Kinds of beans. Beans in the garden and the marketplace. Beans for the future. Fun with beans. Beans for good eating.

Page 2: "Kuan Yu, a great war god in Chinese folktales, was a bean curd [tofu] seller in his youth."

Pages 12-13, a brief (and partially accurate) history of the soybean, begin: "Soybeans are native to eastern Asia. The oldest written records of them date back to 2838 B.C. [sic], when Emperor Shen Nung of China wrote a description of the plant." Also mentions: The five sacred grains, soybean "milk," tofu, yuba, [soy] sauces, soybean paste, soybean sprouts, soybean oil, Engelbert Kaempfer, first introduced "to the United States around 1800 when a ship brought some to Philadelphia [Pennsylvania], Commodore Perry (1854), USDA tested about 10,000 different kinds. Now soybeans are the number one U.S. cash crop, accounting for more then 75% of the world's soybean supply. Soybeans are used as foods for humans (in the form of oil, flour, soy sauce, "milk substitutes, and meat substitutes and 'extenders'") and feeds for animals. They are also used in the manufacture of more than 250 industrial products, including paints, soaps, lubricants, adhesives, and fertilizer.

Page 16: "In China, beans were a good luck symbol. A person who wore a string of soybeans hidden around his neck was believed to possess magic powers to do amazing feats. Three dark soybeans soaked in sesame oil for three days were used to foretell the future."

The chapter "The life story of the bean" (p. 18-29) gives (with illustrations) a simple and accurate description of the bean seed and how it grows, discussing the hilum or seed scar, the micropyle or tiny hole at one end of the hilum, the seed coat, the two cotyledons in which food for the young growing plant are stored, the embryo nestled (a plant in miniature) between the cotyledons, with its two tiny leaves (the plumule), a little root (the radicle), and a stemlike part connecting them (the hypocotyl). When the seed is planted, and it germinates or sprouts, the "embryo root pokes its tip out through the micropyle and grows out into the soil. Tiny root hairs form along the growing root. They take in moisture and dissolved minerals from the soil." The hypocotyl grows until it "suddenly pushes up out of the soil–the first part of the seedling to emerge. It is bent over, for the cotyledons are still buried in the soil." The hypocotyl continues to grow. In a day or so the seed coat splits, then the top of the plant pops up out of the soil. "The empty seed coat is left behind, buried beneath the surface." Now the young bean seedling is growing straight up. The two seed leaves at the top unfold and grow quickly. Below them on the stem are the two cotyledons. As sun shines on the growing plant, its leaves, cotyledons, and stem begin to turn green–a turning point in the life of the plant.

For a while, the growing plant takes the food it needs from the reserves stored in the two cotyledons. But as these reserves are used up, they shrivel and finally fall off. Now

© Copyright Soyinfo Center 2013

the young plant must create its own food using chlorophyll and photosynthesis.

Chlorophyll traps energy from the sun. When examined under a magnifying glass, one can see that the surface of a plant leaf contains many tiny openings called stomates, which are usually open during the day and closed at night. "When the stomates are open, gases from the air pass freely in and out." Air is about 80% nitrogen, 20% oxygen, plus smaller amounts of carbon dioxide, water vapors, and others gases. In the leaves, "carbon dioxide and water are combined, using the sunlight energy trapped by chlorophyll, into sugar, starches, and other complicated chemicals. Scientists call this process photosynthesis (photo means light, and synthesis means a putting together)." The by-product, oxygen, passes out into the air through the stomates; it is the gas that humans and other mammals need to breathe.

Describes the underground activities related to plant growth, nodules, bacteria that live symbiotically in the roots and fix ammonia and nitrogen. Also describes the bean flower, its parts, self-pollination, the key role of bees, and how the seeds are formed from the flower.

The chapter "The soybean–Number one" (p. 36-39) describes the current status of the soybean in the USA. The chapter "Beans for the future" discusses modern developments such as CSM, soyfoods such as sufu, tempeh, miso, spun soy protein fibers, soybean meat analogs, textured vegetable protein (TVP).

When a bean seed sprouts, how does it know which way is "up"? "Could you ever get a seedling with its roots pointing up in the air and its shoot poking down into the soil?" Supposing you cut off all sunlight? No, plants have a built-in gravity sense which scientists call "geotropism." A plant hormone called an auxin causes the plant to bend upward–and toward the light (heliotropism). In 1888, the symbiotic partnership between legumes and nitrogen fixing bacteria was first discovered by Hellriegel and Wilfarth. There are short-day plants, long-day plants, and day-neutral plants; flowering will not begin until the length of days and nights is just right (p. 54-59). Bean recipes (p. 70-75). Address: 1. Prof. of Biology, Staten Island Community College, New York City; 2. Translator of Russian scientific materials.

• ***Summary:*** Contents: 1. Introduction: History, botany, cultivation, pests and diseases, harvesting, yield and storage. 2. Chemical composition. 3. Nutritive value: Supplementation, trypsin inhibitor, hemagglutinins. 4. Small-scale and home processing methods: Soya milk, yogurt of soya milk, toufu (Soya bean curd), soya-bean sprouts, soya steak (Tempeh). 5. Applications of soya beans and soya-bean products [recipes]: Fried soya beans, cooked, young whole soy beans [green vegetable soybeans], flavoured soya milk, fried toufu, fried soya steak, dried sliced toufu (toufu crisp/crisps), soya flour (including soya-milk-residue flour [ground okara]). 6. Recipes based on soya bean products: soups with soya bean products, flavoured soya milk, soya yogurt with fruits, toufu bread/cake, toufu dishes, modified Zambian recipes, recipes with soya flour, soya shashlick (tofu kebab), and soya [tofu] spring roll. 7. Discussion. References. Note: Toufu = Tofu.

Note 1. This is the earliest English-language document seen (Jan. 2013) that uses the term "soya-bean sprouts" to refer to soy sprouts.

Note 2. This is the earliest document seen (Sept. 2012) that uses the term "soya yogurt" to refer to soy yogurt. Address: Dep. of Agricultural Research, Royal Tropical Inst., Amsterdam.

3255. Wolf, W.J.; Cowan, J.C. 1975. Soybeans as a food source. Revised ed. Cleveland, Ohio: CRC Press. 101 p. Illust. Index. 26 cm. CRC Monotopic Series. [416 ref]

• ***Summary:*** Contents: Introduction. Seed structure and composition. Soybean production: Early history, areas of production, production, importance of varieties. Disposal of the crop: Grading standards, disposition. Processing soybeans into oil and meal: Storage, preparation of beans, extraction, desolventizing, degummed oil and lecithin separation. Conversion to edible oil products: Alkali refining, bleaching, hydrogenation, deodorization. Soybean oil products: Salad and cooking oils, shortening and margarine oils, flavor stability of soybean oil, soybean lecithin–products and use. Food uses of soybean proteins: Physical and chemical properties (solubility as function of pH, molecular size, reactions of the 7S and 11S globulins, solubility of isolates, denaturation, amino acid composition), forms of soy proteins (whole soybeans, processed soybean protein products), selling prices and production estimates, functional properties (emulsification, fat absorption, water absorption, texture, dough formation, adhesion, cohesion, and elasticity, film formation, color control, aeration), nutritional properties (antinutritional properties, protein quality of soybean products), foods containing soy proteins (Oriental foods [tofu, dried {kori} tofu, kinako, miso, natto, shoyu, tempeh], domestic foods [baked goods, meat products, simulated meats, breakfast cereals, infant foods, beverages, dietary foods, snack foods, miscellaneous uses]), problem areas. Conclusions.

Addendum. Introduction: Origin of soybeans, soybean situation–future, recent sources of information, soybean organizations. Production: Short-term situation, storage and exports, soybean varieties, yield barrier, varieties and antinutritional factors, aflatoxin in soybeans. Edible oil

© Copyright Soyinfo Center 2013

products: Deodorization, an antioxidant for soybean oil, flavor stability of soybean oil, oil from field-damaged beans, flavor components in soybean oil. Conversion to edible protein products: Production and producers, new processes (full-fat products, defatted flakes and related products, concentrates, isolates, textured protein products). Properties of soy proteins: Functional properties (solubility, water absorption and swelling, viscosity, emulsification, film formation, texture), nutritional and physiological properties (trypsin inhibitors, soybean proteins in blended foods, nutritional value of textured soybean proteins, soybean proteins in infant formulas, effect of alkali treatment on soy protein), flavor studies on soy proteins (organoleptic evaluation of commercial protein products, origin of flavor compounds). Food uses of soybean proteins: Baked goods, meat products and analogs, instant breakfast items, snack foods, legal and regulatory aspects. References.

An excellent source of information on soy flour and modern soy protein products, this book contains a surprisingly small amount of information (about 1 page total) about traditional soyfoods such as tofu, miso, natto, shoyu, tempeh, etc. even though a number of the latter foods are much more widely used worldwide. Soy beverage (soymilk) is not even mentioned. The extensive bibliography would be greatly improved by the inclusion of the titles of the articles.

Table 26, titled "Selling prices and production estimates (in 1970) for soybean proteins" (p. 42) states: Defatted flour and grits sell for 7-8 cents/lb ex factory and estimated annual production in 1970 was 232-237 million lb. Soy concentrates (18-26 cents/pound, 20-35 million lb). Soy isolates (35-45 cents/pound, 25-50 million lb). Address: 1. Research Leader, Meal Products, Oilseed Crops Lab., USDA NRRL, Peoria, Illinois; 2. Adjunct Prof. of Chemistry, Bradley Univ., Peoria, Illinois 61606 (Formerly Chief, Oilseed Crops Lab., NRRl, Peoria).

3256. Yuchi Pines Institute. 1975. "Blessed art thou, o land, when... thy princes eat... for strength, and not for drunkenness." Ecclesiastes 10:17. Seale, Alabama: Yuchi Pines Institute. 222 p. Undated. Illust. Index. 26 cm.
• ***Summary:*** A natural foods and vegetarian cookbook, with considerable nutritional information. On spine: "Eat for strength." Chapter III, titled "Dairy product substitutes" (p. 43-59) contains numerous recipes that use soy as an ingredient. Soy-related recipes include: Soy bread (p. 15, with soy flour). Soy-bran crackers (p. 25, with soy flour, lecithin, whole wheat flour, and bran). Soy crackers (p. 27, with whole soaked soybeans and lecithin). Soy noodles (p. 28, with Soy Base–see p. 46). Soy waffles (p. 41, with whole soaked soybeans). Double strength soy milk for cream (p. 45–Save pulp [okara] to use in Soy Crackers. Use rich soy milk as a base for Mayonnaise or Sour Cream, as Soy milk, or as Soy yogurt). Sour cream (p. 45, made with soy milk). Madison milk (p. 46, with whole dry soybeans). Banana soy milk (p. 46). Soy base and milk with various flavors (p. 46). Soy sour cream (p. 47). Vegetarian cream (p. 47, with double strength soy milk). Sesame spread (p. 48, with soy base). Soy cottage cheese (p. 52, with soy grits). Scrambled tofu–Soy cheese (p. 53). Tofu (homemade, 3 methods, from soy flour or whole soybeans). Soy yogurt (p. 54, from soy milk). Simple soy butter (p. 55, with soy flour or dry soybeans). Food yeast butter (p. 55, with Soyannaise). Soy butter (p. 57, with soy flour, lightly browned). Margarine [non-hydrogenated] (p. 58, with coconut oil, oil, hot water, lecithin, lemon juice, and onion salt). Carrot pie (p. 69, with soy milk and soy flour). Banana cream toast (p. 72, with soy or nut milk). Carob drink (p. 74, with soy or nut milk). Bread pudding (p. 75, with Soy base). Soaked soybeans (p. 85, 210). Soynuts I and II (p. 85-86). Soy patties I and II (p. 86, with mashed soybeans and peanut butter). Soy loaf (p. 87, with soaked soybeans). Soy cheese balls (p. 88, with Soy cottage cheese or chopped Tofu). Soy soufflé (p. 88, with soaked soybeans). "Salmon loaf" (p. 90, with soy flour). Soy corn chowder (p. 105, with Soy milk or Basic Cream Sauce). Cucumber soup (p. 106, with Soy milk or Basic Cream Sauce). Fresh cream of corn soup (p. 107, with Soy or nut milk). Vichyssoise (p. 109, with Soy or nut milk). Corn chowder (p. 110, with Soy or nut milk). Rice and soybean loaf (p. 119, with cooked soybeans). Basic cream sauce (p. 127, with Soy base). Soyonnaise I-IV (p. 133-34, incl. with Soyagen or canned Soyalac).

Recipes containing peanuts or wheat gluten: Nut cheese (p. 54). Emulsified peanut butter (p. 55). Peanut butter balls (p. 65). Peanut butter loaf (p. 86). Peanut butter Creole (p. 89). Chinese pepper steak (p. 93, with gluten). Nuttose (p. 95, with nut butter). Gluten (p. 96). Peanut butter gravy (p. 126). Grandmother's gravy (p. 126, with peanut butter).

A table titled "Irritating substances" (p. 123) lists the name of the substance, the chemical, and the effect. The substances are: Black pepper, chili peppers, cayenne, horseradish, cloves, cinnamon, mustard seed, ginger, nutmeg, vinegar, baking soda, baking powder, salt (sodium chloride). On the facing page is a list of 25 "Safe herbs."

Note: A later edition of the book was copyrighted in 1979, then revised in 1983. The title was changed to "East for Strength" and the author was listed as Dr. Agatha Thrash. Yuchi Pines Institute (renamed Uchee Pines Inst. in the late 1980s or early 1990s) was founded in 1970 by Drs. Agatha and Calvin Thrash, who are both physicians and Seventh-day Adventists. As of April 1992 both are still living at Uchee Pines.

Talk with Dr. Agatha Thrash. 1999. June 4. This book was first published (with the above title) in 1975. They copyrighted it in 1979. Address: Route 1, Box 273, Seale, Alabama.

New Product–Documentation: Shurtleff & Aoyagi. 1975. *The Book of Tofu.* p. 314.

3268. Claiborne, Craig. 1976. De gustibus: Fresh bean curd. *New York Times.* Jan. 5. p. 39.
• ***Summary:*** Contains a recipe from Susan Asanovic for making "Fresh bean curd (Tofu)" at home. The curding agent is "1 teaspoon magnesium sulfate (Epsom salts)."

3269. *Hokubei Mainichi.* 1976. Tofu demonstration in Berkeley today. Jan. 14.
• ***Summary:*** "As a community service, the Co-op Natural Foods Center council is inviting the public to meet Bill Shurtleff and Akiko Aoyagi, co-authors of 'The Book of Tofu,' during a lecture-demonstration on Wednesday, Jan. 14, 7:30 p.m., in the University Avenue Co-op meeting room, at 1414 University Ave., Berkeley. The speakers will prepare and serve a number of their favorite Tofu and Miso recipes, teach how to make Tofu at home (for less than $0.13 a lb), discuss Tofu and Miso as excellent sources of high-quality, low-cost protein, and explain why these traditional soybean foods offer a realistic hope for solving the world food crises... A $1 contribution is requested to help defray the cost of supplies and samples." Address: San Francisco, California.

3270. *Daily Review* (*Hayward, California*). 1976. Cooking demonstration scheduled. Jan. 31. p. 7. [1 ref]
• ***Summary:*** "Hayward–A special lecture-demonstration by the author and illustrator of *The Book of Tofu* will be hosted by Messiah Lutheran Church, 25400 Hesperian Blvd., at 7:30 p.m. Thursday.

"The Castro Valley Co-op is sponsoring the event, which will feature tofu and miso cookery. These soybean products are gaining popularity because of their high protein content and low caloric content.

"Bill Shurtleff, who wrote the book, and Akiko Aoyagi, who illustrated it, will tell how the world food crisis can be eased with tofu cookery. Anyone interested is welcome."

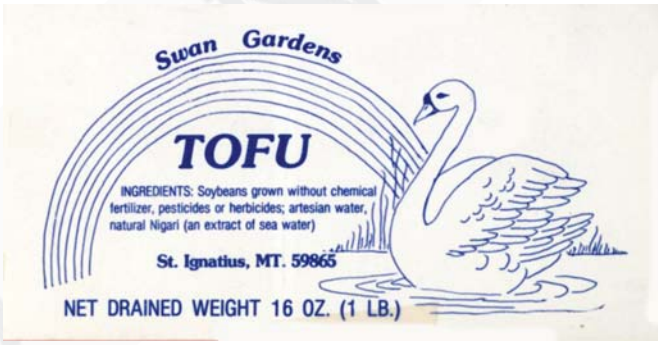
(4) Scanning electron microscopy of kori-tofu. (3) Scanning electron microscopy of structured soy protein concentrate. Address: Dep. of Food Science, Univ. of Guelph, Guelph, ONT, Canada.

3273. **Product Name:** Tofu.
Manufacturer's Name: Swan Gardens.
Manufacturer's Address: Route 1, Box 216, St. Ignatius, MT 59865. Phone: 406-745-4538.
Date of Introduction: 1976. January.
Ingredients: Soybeans grown without chemical fertilizer, pesticides or herbicides; artesian water, natural nigari (an extract of sea water).
Wt/Vol., Packaging, Price: 16 oz packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.
How Stored: Refrigerated.



New Product–Documentation: Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 396. Swan Gardens, Rt. 1, Box 216, St. Ignatius, MT 59865. Phone: 406-745-4538. Owner: Dick McIntyre.

Letter from Brenda Wood. 1978-79? Undated. "We have a tofu shop producing between 260 lb and 390 lb a week."
Label. 1979, undated. 2.5 by 5 inches. Blue on white. Picture of a swan and a rainbow.

Needleman. 1981. *Soyfoods.* Summer. p. 26-27. "Tofu plant profiles: Swan Gardens, Miami." "The company began in St. Ignatius, Montana, in 1978 where they produced 500 pounds of tofu weekly from a small shop situated on an organic vegetable farm. Jocelyn McIntyre had been making tofu at home for 8 years previously and finally yielded to her friends' encouragement to produce tofu commercially. In August 1979, they sold their company and farm and used the proceeds to launch Swan Gardens in Miami, which they opened in January 1980."

Note 1. This is the earliest known commercial soy product made in Montana.

Note 2. This is the earliest record seen (April 2013) concerning Swan Gardens of Montana.

Talk with Dick McIntyre. 1988. Nov. Swan Gardens

started making tofu in January 1976. Note 3. Others later confirm this date. It was first made on a wood stove and sold to local people. The tofu was almost certainly made from organic soybeans.

3274. Buchholz, Paula. 1976. Tofu will amaze you. *San Francisco Examiner.* Feb. 11. p. 31.
• ***Summary:*** About the work of Bill Shurtleff and Akiko Aoyagi. Describes how to make tofu at home. Gives recipes for: Butter-fried tofu with eggs. Tofu mayonnaise dressing. Tofu cheesecake. Photos show: (1) Shurtleff and Aoyagi cooking (preparing butter-fried tofu and eggs) in the kitchen of the Shurtleff home at 790 Los Palos Dr., Lafayette, California. (2) Sixteen varieties of tofu, each labeled. (3) Butter-fried tofu and eggs (finished dish). Note: This is the earliest article on soy seen (Aug. 2002) in the *San Francisco Examiner* newspaper. Address: California.

3275. Yim, Susan. 1976. One man's bread, another man's tofu. *Star-Bulletin* (*Honolulu, Hawaii*). Feb. 12. p. D-1, D-2. [1 ref]
• ***Summary:*** About the work of William Shurtleff and Akiko Aoyagi. A photo shows the two holding their *Book of Tofu.* "Five thousand copies of the book came out in December [1975], and all were sold in a week. There will be a second printing soon." During Shurtleff's first year in Japan, in 1971, he lived in Kyoto on 30 cents a day. His key source of protein was tofu.

"They will present a lecture tonight at 7:00 at the Kailua Seventh-Day Adventist Church. They will speak again tomorrow night at 7 at the University of Hawaii's Kuykendall Hall." Address: Star-Bulletin writer.

3276. Kennedy, Shawn G. 1976. The Korean greengrocer: Produce is more varied. *New York Times.* Feb. 18. p. 36.
• ***Summary:*** During the last year or so, many new Korean-run fruit and vegetable shops, selling fresh produce, have opened throughout New York City. "The real bonus for the shopper is the Oriental vegetables, spices and specialty items they offer as well. It is not unusual, for example, to find Chinese cabbage, bean sprouts [Koreans prefer soybean sprouts], tofu (bean curd) and hunks of fresh ginger..."

3277. Blinkhorn, Lois. 1976. The Orient in your kitchen. *Milwaukee Journal* (*Wisconsin*). Feb. 25. Food section. p. 4.
• ***Summary:*** This is a review of many Asian cookbooks. In the center is a photo of the illustration on the cover of *The Book of Tofu.* The review states that this book (Autumn Press, $6.95) "is no run of the mill cookbook. It is no exaggeration to call the 334 page paperback a treatise on the philosophic, economic and nutritional aspects of tofu, a food made of soybean curd.

"As a cookbook, it includes a recipe for homemade tofu and many suggestions and recipes for using it in a variety of ways.

"If tofu is an unknown quantity to you, you'll be astonished at some of the information provided by the authors William Shurtleff and Akiko Aoyagi."

"Drawing from Frances Moore Lappe's 'Diet for a Small Planet,' the authors argue the necessity for shifting the emphasis of the American diet from meat, which they call an inefficient use of protein, to soybeans and grains. Tofu, of course, is seen as a perfect alternative.

"Spiritual note: Both authors are disciples of Zen and practice meditation. The philosophic bent is obvious when they discuss the work of the tofu master as a spiritual path to self-realization. For a Westerner, it's an interesting insight into another way of life." Address: Staff writer.

3278. KQED–Channel 9. 1976. Open Studio Television presents–Tofu: Food for mankind (Leaflet). With William Shurtleff & Akiko Aoyagi, authors of "The Book of Tofu." San Francisco, California. 1 p. Single sided. 36 cm.
• ***Summary:*** This half-hour television program on tofu, aired on Tuesday, Feb. 17, at 6:30 P.M. was produced by Shurtleff and Aoyagi with the crew at KQED's Open Studio. They will tell you "all you ever wanted to know about tofu; about the ten different varieties now available in the U.S. and about tofu's remarkable nutritional value–rich in high-quality protein, free of cholesterol, low in saturated fats and calories. They demonstrate step by step how to prepare your own tofu at home (for 8½ cents per pound) and show you how to prepare several of their favorite Western-style tofu recipes." A photo shows the cover of *The Book of Tofu.* Estimated viewership in California was 45,000. Address: San Francisco, California.

3279. *Open Education Exchange* (*Berkeley, California*). 1976. Tofu & Miso Cookery [Class by Liz Horowitz and Bob Gerner]. Feb. p. 2.
• ***Summary:*** Liz has 2 years experience cooking at Tassajara and Westbrae Natural Foods. Bob is a founder of Westbrae and an expert on tofu and miso. Four meetings, Mondays 6-8 p.m. Class size: 5-15. Preprinted recipes. A $6-$10 food fee is payable to instructors. Classes held in north Berkeley.

3280. Shurtleff, Barbara. 1976. Names and addresses of people who purchased *The Book of Tofu* in early 1976 (Feb. 10 to July 13). Lafayette, California. 14 p. Unpublished manuscript. Written on lined paper.
• ***Summary:*** This list of 138 people and organizations on 8½ by 11 inch lined paper includes: This list is quite similar to that found in a black and red "S.E. Ledger" but it is less detailed and shorter in duration. Address: New-Age Foods Study Center, 790 Los Palos Dr., Lafayette, California 94549. Phone: (415) 283-3161.

3281. Shurtleff, Barbara R.; Hills, Sandy. 1976. Ledger of

© Copyright Soyinfo Center 2013

book sales and expenses, related to *The Book of Tofu.* 790 Los Palos Manor, Lafayette, CA 94549. 31 p. No index. 20 cm.

• ***Summary:*** Barbara ("Bobbie") Shurtleff started this ledger on 2 Feb. 1976 to keep track of the name, address, date of order, and amount received from sales of the newly published *Book of Tofu* by William ("Bill") Shurtleff (her eldest son) and Akiko Aoyagi. Pages 1-21 are in her very clear handwriting and cover sales through 20 July 1976. Some sales are to friends of the Shurtleff family, but most are to people interested in tofu, and many of these live in Hawaii where Bill and Akiko did two public programs about tofu in mid-February (Feb. 12th–tofu class for Seventh-day Adventist group hosted by Naomi Yamashiro, 80 attend; Feb. 13th–University of Hawaii's Kuykendall Hall, hosted by David Lee "Kalm" Sukowske, 140 attend).

Among the book buyers are: Feb. 12–Harry W. Miller [Loma Linda Foods], 11384 Norwood Ave., Riverside, California. Feb. 18–Nancy Arakaki, Kaneohe, Hawaii. Feb. 18–Naomi Yamashiro, Kailua, Hawaii. Feb. 26–Quong Hop & Co. March 3–San Francisco Vegetarian Society (Dixy Mahy, 10 books wholesale, $4.17 each = 40% discount). March 3–Lafayette Natural Foods (10 books wholesale). March 4–The Wok Shop, San Francisco (Albert Chan, 25 books wholesale). March 4–Rising Sun Natural Foods, 440 Judah St., San Francisco (6 books). March 8–East-West Academy, Effie Chow, 33 Ora Way, San Francisco (100 books wholesale). March 8–Dharma Publishing Bookstore, Nyingma Meditation Center, 5856 Doyle St., Emeryville (10 books wholesale). March 10–David Lee Sukowske, 1923 Keeaumoku St., Honolulu. March 30–Carmelite monastery, Kaneohe, Hawaii. April 23–Wo Chong Co., 101 16th Street, San Francisco. May 10–Kinokuniya Japan Center, 1581 Webster St., San Francisco. June 7–Ted Nordquist, 1536 Versailles Ave., Alameda (20 books, wholesale). June 11–Dr. Harry W. Miller (send 1 book to India). June 17–Winston Lo, Hong Kong Soya Bean Products Co. Ltd., 52-54 Hoi Yuen Rd., Kwun Tong, Kowloon, Hong Kong.

Pages 22 and 23 list itemized expenses from 28 Sept. 1976 to 21 Dec. 1976. Entries from Sept. 28 to Oct. 8 are in Bobbie's handwriting, whereas those from Oct. 9 to Dec. 21 were written by Sandy Hills. Bobbie died on 15 Oct. 1976 of cancer of the colon.

Pages 25-31 continue listing sales of *The Book of Tofu* from 29 Sept. 1976 to 19 Oct. 1976; they are similar in format to pages 1-21, with entries from Sept. 29 to Oct. 8 in Bobbie's handwriting. Subsequent entries were written by Noralee and Sandy Hills. The last 1½ pages of entries are undated.

The following is a brief chronology of events related to Bobbie, Bill, and Akiko during late 1975 and 1976.

1975 Sept. 15–Bill and Akiko return to California from Japan; they stay with Bobbie at 790 Los Palos Dr.

Oct. 25–They do their first real "Tofu Class" at Westbrae Natural Foods in Berkeley. About 14 people attend.

October 2-6–The three visit Ananda community then Lake Tahoe together. Nov. 23+ The three put on a tofu class at the Esalen Institute in Big Sur, spend the night at Esalen as guests of Michael Murphy, visit Emile Norman at his home in Big Sur, then drive to Los Angles and back.

Dec. 2–Bill and Akiko put on a big tofu class in Bobbie's home, followed by 6 other tofu classes in central California.

Dec. 10–They hold a family party and reunion at the family home to announce the publication of their *Book of Tofu*–which arrived two days later. Soon orders for books began to arrive.

1976 Feb. 10–Bill and Akiko return to Japan, via Hawaii, leaving Bobbie alone at 790 Los Palos. In Hawaii they did several tofu programs and asked Bobbie to take orders for books.

March 19-April 10–Bobbie takes a group trip to the Galapagos Islands (Ecuador), Bogota and Cali (Colombia), and the Andes.

May–Bobby has a large malignant tumor removed from her colon at Peralta Hospital in Oakland.

July–Bobbie and her friend Niki spend 10 days together at the Shurtleff honeymoon cabin at Lake Tahoe.

Sept. 29–Bill and Akiko leave on their Tofu & Miso America Tour. Bobbie attended their first class in San Rafael. As they said good-bye (for the last time) Bobbie said, "Have fun on the way." Address: Lafayette, California. Phone: 283-3161.

3282. Shurtleff, William; Aoyagi, Akiko. 1976. Soybean foods from Japan (Letter to the editor). *Organic Gardening and Farming.* Feb. p. 15-16.

• ***Summary:*** "For the past 4½ years, I have been living in Japan doing research and writing a book about two of East Asia's most important soybean foods: tofu and miso, both of which seem to hold real promise of becoming basic sources of high-quality, low-cost protein throughout the world.

"This spring, Ms. Akiko Aoyagi, the Japanese cook and artist with whom I have been working, and I plan to travel throughout the United States visiting natural food centers, communities, and other interested groups. We will be conducting cooking classes, giving talks, and showing slides about these remarkable foods. We will also give demonstrations on the preparation of tofu and miso on a family, community or commercial scale. If anyone is interested in having us visit your area, please contact us at 790 Los Palos Drive, Lafayette, Cal. 94549." Note: At this time Shurtleff & Aoyagi were still living in Tokyo. They returned to Lafayette, California on 23 July 1976, and left from there on their Tofu & Miso America Tour on 29 Sept. 1976. Address: Lafayette, California.

3283. **Product Name:** Tofu Kit.

© Copyright Soyinfo Center 2013

Manufacturer's Name: Ted Nordquist Co.
Manufacturer's Address: 1536 Versailles Ave., Alameda, CA 94501.
Date of Introduction: 1976. February.
New Product–Documentation: Leaflet. 1976, hand dated. Black on yellow. "Soaked in pure olive oil, hand crafted from the finest available verticle [sic, vertical] grain white Douglas fir. $6.50."

Photo of Ted (wearing a blue shirt) with his Tofu Kit in Sweden (1981 or 1982). He used this tofu pressing box to make tofu at home in Sweden. The photo was taken in the flat above the tofu factory in Orsundsbro, Sweden.

Interview with Ted Nordquist. 1988. Nov. 22-24. Conducted by William Shurtleff. In Oct. 1975 Ted and Janet Fehring met Bill Shurtleff, Akiko, and Bobbie Shurtleff (Bill's mother) at Ananda Cooperative Village, where Bill and Akiko had been invited to do a program on tofu. Afterwards the five went hiking at Echo Lake, Desolation Valley, and Lake Tahoe. Then Ted started making and selling a tofu kit in Alameda. On 14 Jan. 1976 Ted and Janet attended a lecture on tofu that Bill and Akiko presented at the Berkeley Co-op, and helped prepare a tofu dip. Ted's father, Leo, had become very ill with cancer and Ted was making him fresh tofu, one of the few foods he could digest, every morning. In Jan. 1976 Ted's father died in Alameda. In June 1978 Ted got his PhD degree at the Univ. of Uppsala with his thesis on the history of Ananda Cooperative Village.

Letter (e-mail) from Ted Nordquist to Shurtleff in reply to questions about details of this tofu kit. 2010. Jan. 6. Q1. When, in relation to other events, did you make your first kit? "In December, 1975 my Dad became very ill and Anne-Marie went back to Sweden with Andreas for Christmas. By then, not sure exactly when, perhaps late February [1976] or [as early as] early December 1975 I was making the Tofu kits in my Dad's garage. I continued off and on after his death in late January and into March when I returned to Sweden."

Q2. Where did you get the idea and design? "I must assume from you. Probably pictures or sketches in your *Book of Tofu."*

Q3. What did it consist of? "Printed instructions for home made tofu, cheese cloth for a colander, cheese cloth sewn to fit the pressing box, and a package of nigari."

Q4. Did you ever sell it commercially? If so, where was it made? By whom? "Sort of, but it was a labor of love during my father's illness and later helping my Mother adjust to life without him."

Q5. Roughly how many kits were sold? "Maybe 30 or as many as 50. I made them in series and as I remember I would produce by the dozen, i.e. 12 bottoms, 24 sides, 24 ends, and 12 tops. I think you recommended my tofu pressing boxes and I received orders by mail. I would mail the tofu boxes and then ask for payment plus postage. I actually got paid for all the boxes I sent out! I never registered the business or took this seriously. A lot was happening in my head at the time and the details of this 'business' are very vague to me. I believe I brought the remaining sets with me to Sweden."

Q6. Did you call it a "Tofu Kit" or "Tofu Box" or "Tofu Pressing Box"? "I called it a 'Tofu Kit.' It had everything except soybeans to make tofu. My first try at home after Akiko showed me how to make tofu took about six hours. Mostly clean up. After some practice every morning for my Dad I got it down to 56 minutes including a sparkling kitchen, pans clean and drying, and the tofu pressing out in the sink around 7 AM in the morning. The secret was adding water to the bottom of the pan to cook the *go* [freshly ground, soaked soybeans and water; fresh soy purée]. Let the water come to a boil and very slowly add the *go* so it will not stick to the bottom of the pan. It is an art."

3284. Halik, Joseph John; Pitchon, E.; Schulman, M.; Schwarz, M.H.; Yezek, M. Assignors to General Foods Corp. (White Plains, New York). 1976. Dried tofu powder. *U.S. Patent* 3,943,266. March 9. 4 p. Application filed 10 April 1974. [4 ref]
• ***Summary:*** "A soy milk is precipitated and the resulting whey is centrifugally separated from the curd and washed, whereupon the curd is colloidally dispersed and spray dried." Address: 1. Ossining, New York; 2. Flushing, NY; 3. Monroe, NY; 4. Westport, Connecticut; 5. Stanford, CT.

3285. *Marin Independent Journal* (*Novato, California*). 1976. Street choir appearance. March 12.
• ***Summary:*** "The Sleeping Lady Cafe, a tiny Fairfax restaurant with organic food, fresh flowers on the tables, rainbows on the walls and a good karma ambience, is as well known for its music as its artichokes and Sunday morning breakfasts.

"It is the birthplace of the Fairfax Street Choir, a populous aggregation with 20 voices and a six-piece instrumental section.

"The popular Street Choir will appear at 8 p.m. today at California Hall in San Francisco..."

"The choir revolves around the gospel voice of Bill Bramblett, owner of the Sleeping Lady, and the mercurial singer-songwriter Marla Hunt."

"Miss Hunt began the band three years ago to attract people off the street to the Sleeping Lady's famed Sunday breakfasts."

"The band is the best around at what might be described as organic-white-gospel-rock, a blend of Eastern philosophy and black rhythm and blues."

3286. Jerram, Elsie. 1976. Tofu adapts to American menus: Authors introduce an ancient food. *Monterey Peninsula Herald* (*California*). March 17. p. 30. [1 ref]
• ***Summary:*** Based on a lecture by Shurtleff and Aoyagi, who "visited the Peninsula recently" (probably shortly before Feb. 10). Contains 5 black-and-white photos by Bob Fish.

© Copyright Soyinfo Center 2013

One shows Brian George of Pacific Grove making tofu in his apartment kitchen. Another shows Shurtleff and Aoyagi serving miso-topped apple slices and creamy tofu dip during a lecture.

3287. McCormick, Sally. 1976. Azuma Sukiyaki House: Gracious dining in an Oriental setting–5120 N. Broadway, Chicago (Advertorial). *Chicago Tribune.* March 20. p. A19.
• ***Summary:*** "The Azuma dinner includes Sukiyaki, a generous portion of prime rib slices with fresh mushrooms, bamboo shoots, Tofu (soy bean cakes), Shiratake [Shirataki] (yam noodles) [thin konnyaku noodles] and assorted fresh vegetables." Azuma also serves Beef Teriyaki, Chicken Teriyaki, Salmon Teriyaki, and "Bata-Yaki (prime beef slices cooked with vegetables and served with lemon-soy sauce),..." Two photos show Azuma Sukiyaki House.

• ***Summary:*** "Two Far Eastern soybean favorites–tofu and tempeh–turn up exciting new menu and nutrition ideas in the OGF Research and Development Group's latest tests...

"At this time, Dr. Schwartz is inviting a limited number of adventurous OGF readers to help him evaluate the ease and dependability of his method and tempeh's potential as a new food for Americans. Readers who would like to join R & D's modest 'Soybean Task Force' should write to Nancy Bailey, R & D Readers' Service, Rodale Press Inc., Emmaus, Pennsylvania, 18049. Those selected will receive soybeans, culture, and complete instructions for making the simple incubator and tempeh itself."

Contains a recipe for Tofu Loaf with Onion and Cheese from *The Book of Tofu* by Shurtleff and Aoyagi.

Note: This is the earliest document seen (March 2003) that mentions tempeh, published by or in connection with Rodale Press.

3289. Hashizume, Kazumoto; Shiratori, Makoto; Nakamura, Noriko; Watanabe, Tokuji. 1976. [Studies on the preparation conditions of soybean milk for tofu making: I. Effects of the ratio of water to soybean and ionic strength in the preparation of soybean milk on the properties of tofu]. *Shokuhin Sogo Kenkyujo Kenkyu Hokoku* (*Report of the National Food Research Institute*) No. 31. p. 192-96. March. [8 ref. Jap; eng]
• ***Summary:*** Reprinted from *Nihon Shokuhin Kogyo Gakkai Shi* (*J. of Food Science and Technology*) 22:38 (1975). Address: 1,3-4. National Food Research Inst., MAFF, Koto-ku, Tokyo, Japan; 2. Tokiwareitou Co., Ltd., Ina-shi, Nagano-ken.

• ***Summary:*** Reprinted from *Nippon Nogeikagaku Kaishi* (*J. of the Agricultural Chemical Society of Japan*) 49(6):331-33 (1975). Address: National Food Research Inst., MAFF, Shiohama-cho, Koto-ku, Tokyo, Japan.

3291. Ito, Hiroshi. 1976. Hamanattô [Hamanatto (Continued–Document Part III. Continued)]. *Nippon Jozo Kyokai Zasshi* (*J. of the Society of Brewing, Japan*) 71(3):173-76. March. [Jap; eng+]
• ***Summary:*** Continued. Serving Hamanatto: Hamanatto is used both as a seasoning and as a protein source. Like Daitokuji-natto it is sprinkled as a seasoning over hot rice in a small bowl, then doused with hot green tea to make the popular Ochazuke. It may also be served as an hors d'oeuvre with sake, used in place of tea cakes with whisked green tea as Chauke, or served as a rice seasoning in box lunches like shoyu-simmered kombu. Since ancient times it has been used in Zen Temple Cookery as a source of subtle flavor, diced and mixed with grated daikon, sprinkled with vinegar, or used in the Chinese tofu dish Mabo-dofu. Its abundance of glutamic acid and nucleic acids enrich the flavor of any food with which it is served.

Conclusion: Hamanatto, a progenitor of today's miso and shoyu, has been made by traditional methods since ancient times. Long lasting, it embodies the fermentation and nutritional wisdom of our forebears. Thus its scientific study reveals new and valuable information. In its traditional processing methods there are points that should be improved, yet today it is a long lasting food with its own distinctive characteristics.

Acknowledgements: I would like to thank the Yamaya and Hamana companies for supplying documents and samples, and allowing me to quote selected portions; Professor Kayo Kon of Shizuoka Women's University; and my colleagues at the National Food Research Institute, Kan Kikuchi, Teruo Ota, and Shinkuni Sasachi.

Figures show: (1) Hamanatto production methods: Flow charts of the Yamaya-Horinji method (Horinji is in parentheses), and of the Daifukuji method.

Tables show: (1) Distribution of microorganisms in Hamanatto made by Yamaya, Horinji, and Daifukuji. For each maker, there is one column for surface and another for interior. The types of microorganisms are: General bacteria, micrococcus, streptococcus, pediococcus, halophilic lactic acid bacteria, firm-forming yeasts, and molds (Mostly *Aspergillus oryzae* and *Rhizopus* species).

(2) Nutritional composition of three varieties of Hamanatto (Yamaya, Horinji, Hamana), Daitokuji natto, and regular "stringy" (*itohiki*) natto.

(3) Composition of free amino acids in various fermented foods: (A) Yamaya Hamanatto, Daitokuji Natto

© Copyright Soyinfo Center 2013

(both in mg per 100 gm defatted); (B) Yamaya Hamanatto, Daitokuji Natto, Soybean miso (made at controlled temperature), Soybean miso fermented at natural ambient temperature (all four in gm per 100 gm of protein); (C) Hatcho miso (in mg per gm). In the far left column 18 amino acids are listed.

(4) Composition of Hamanatto lipids. The four vertical columns are: TG = Triglycerides. DG = Diglycerides. ST = Cholesterol. FFA = Free fatty acids, MG = Monoglycerides. The four horizontal rows are: Soybeans, dry. Soybeans, steamed. Natto. Hamanatto.

(5) Hamanatto volatile acids. (6) Hamanatto aromatic compounds.

3292. **Product Name:** Tofu.
Manufacturer's Name: Metta Tofu Products.
Manufacturer's Address: Wren Rd., Denman Island, BC, V0R 1T0, Canada. Phone: 604-335-0108.
Date of Introduction: 1976. March.
New Product–Documentation: Shurtleff & Aoyagi. 1977. Jan. 28. Commercial Tofu Shops and Soy Dairies.

Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 399. Owner: Ray Lipovsky; sea water tofu.

Richard Leviton. 1982, Sept. "In a small bright building: Cottage soy industries on Vancouver Island." Ray Lipovsky "has been churning out tofu since 1975 and can lay claim to being one of North America's earliest commercial and Caucasian tofu craftsmen." He makes tofu curded with sea water.

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name and address. Owners: Ray Lipovsky & Robbie Newton.

Letter from Ray Lipovsky in reply to questions from William Shurtleff. 1982. Aug. 8. Q1: When did you make your first batch of tofu on any scale, such as one cake in the kitchen? Ans: Sept. or Oct. 1975. Q2: When did you first start to sell this tofu, even if only a few cakes to friends? Ans: Dec. 1975 or Jan. 1976. Q3: When did you first start "commercial production" in the sense that you were selling the majority of what you made? Ans: May 1976. Q4: When did you set up your present shop? Ans: July 1980. Q5. When did you start making Frozen Buddha [soy ice cream]? Ans: Jan. 1981.

• ***Summary:*** The first edition of this book was published on 15 Jan. 1964. The first revised edition (130th printing) was published on 25 Jan. 1969. This is the second revised edition (265th printing), published on 25 March 1976. Also published by Joshi Eiyo Daigaku Shuppan-bu.

For soybeans and soyfoods, see pages 33-35, 69, and 74 (basic nutritional composition), and 111-12 (amino acid composition).

Page 88, No. 812: Amazake. Per 100 gm. Calories 101, moisture 74.0 gm, protein 2.4 gm, fat 0.1 gm, carbohydrates (sugars 22.7 gm, fiber 0.6 gm), ash 0.2 gm, calcium 74 mg, phosphorus 25 mg, iron 0.4 mg, vitamin A 0 mg, vitamin B-1 0.08 mg, vitamin B-2 0.06 mg, nicotinic acid 0.06 mg, vitamin C 0 mg.

A later edition (after 1976), containing at least 298 pages, gives details on the following soy-related foods (p. 76-80): Japanese-grown whole soybeans (dry, or boiled). Whole dry USA-grown soybeans. Whole dry Chinese-grown soybeans. Green immature soybeans (edamame; raw, or boiled). Soybean sprouts (raw, or boiled). Defatted soybeans (whole, or dehulled). Kinako (soybeans roasted and ground). Budô-mame (soybeans boiled with shoyu). Momen tofu (regular). Kinugoshi tofu (silken). Soft tofu. Packed tofu. Okinawa tofu. Yaki-tofu (grilled). Nama-age. Abura-age. Ganmodoki. Kôri-dofu. Tofu-chikuwa (steamed type, or roasted type). Natto (fermented soybeans): Itohiki-natto, Goto natto, or tera-natto.

Miso: Rice-koji miso (sweet type, light yellow type, dark yellow type). Barley-koji miso. Soybean-koji miso. Dried miso. Kinzanji miso. Hishio-miso.

Other: Okara. Soymilk (regular, reconstituted, or soft drinks). Yuba (wet, or dried).

Page 254 gives the amino acid composition of soybeans and various soyfoods. Page 298 gives the protein scores, amino acid values, and chemical scores of selected foods. Page 8 gives the energy conversion factor for tofu, agé, and yuba.

3294. Photographs of Ted Nordquist and Tim Ohlund of Aros Sojaprodukter in Sweden. 1976.
• ***Summary:*** Color photos (taken in about 1976-77; see next page) show:

(1) Ted Nordquist in late 1976 with a Tofu Kit he made and a cake of tofu he has made using the kit–taken at his student apartment at Uppsala. Ted recalls (Jan. 2011): "The pressing box is from one of the kits I made in the garage of my parents home during the time my Dad was sick with cancer. As you remember, I sold these kits for a time in late 1975 and early 1976. He died in late January of 1976."

(2) Ted Nordquist on the phone in the office of Aros Sojaprodukter in Sweden.

(3) Tim Ohlund curding soymilk to make tofu in a vat at Aros.

this interesting and highly informative book, write to Autumn Press Inc., P.O. Box 469, Soquel, California 95073. The cost of this 334 page [8½ x 11-inch] book is $6.95. We at *Well-Being* highly recommend it." Note: This is the earliest article on soy seen (Aug. 2002) in *Well Being* magazine. Address: c/o Aoyagi, 278-28 Higashi Oizumi, Nerima-ku, Tokyo 177, Japan. Phone: (03) 925-4974.

3296. *Oakland Tribune.* 1976. Tofu: No end to its uses. April 7. p. 61. [1 ref]
• ***Summary:*** A book review of *The Book of Tofu*, by William Shurtleff and Akiko Aoyagi. Autumn Press, Inc. (Soquel, California). 334 pages. paperback. $6.95.

The review begins: "This is a book which may well become a classic on the subject of tofu, the basic soy bean food that has become increasingly popular in recent years. Tofu is also known as soybean curd and is regularly sold in 12- to 20-ounce cakes packed in plastic tubs or cartons.

"How the volume came into being is almost a story in itself."

3297. Earl, Johnrae. 1976. Writ of approval: Dining out. *Chicago Tribune*. April 18. p. E8.
• ***Summary:*** This includes a review of the Chinese restaurant The Abacus, 2619 N. Clark St., Chicago, Illinois. They serve a vegetarian tofu soup with chopped spinach. "The monk's delight consists of fried tofu (bean cake), bamboo shoots, straw mushrooms, quail eggs, and Chinese greens." Another dish, named Eight treasures, also contains tofu. Also served: "Steamed whole fish with black bean sauce." Address: Restaurant critic.

3298. Morgans, Jim. 1976. Re: *The Mother Earth News* plans publish excerpts from *The Book of Tofu.* Letter to William Shurtleff at New-Age Foods Study Center (278-28 Higashi Oizumi, Nerima-ku, Tokyo 177, Japan), April 26. 1 p. Typed.
• ***Summary:*** "Thanks for your letter of March 27 and February 9 (to John Shuttleworth). And, by the way, its our pleasure to run excerpts from your fantastic book. I hope that you will try to stop in and see us here in the fall. (We're anxious to try out some of those tofu dishes you kindly offered to prepare!)." Discusses the excerpting schedule.

Note: This is the second earliest dated document seen in which "New-Age Foods Study Center" (the predecessor of Soyfoods Center) is mentioned. Address: Associate editor, The Mother Earth News, P.O. Box 70, Hendersonville, North Carolina 28739.

• ***Summary:*** A brief introduction to soy flour, sprouts, whole dry soybeans, roasted soybeans, bean curd cakes [tofu], fermented curd, bean curd skin [yuba], dried bean curd sticks, bean paste, miso, black beans [fermented black soybeans]. With illustrations from *The Book of Tofu* by Shurtleff & Aoyagi.

3300. Kinsella, John E. 1976. Functional properties of proteins in foods: A survey. *CRC Critical Reviews in Food Science and Nutrition* 7(3):219-80. April. [495 ref]
• ***Summary:*** Contents: Introduction. Protein needs. Functional properties of proteins. Organoleptic properties. Binding. Fat absorption. Solubility. Water sorption. Viscosity. Gelation. Dough formation. "Texturizability": Fiber spinning, extruded products. Surfactant properties: Emulsifying properties, foaming properties. Protein structure and functional properties. Denaturation and functionality. Processing factors and functional properties. Functional properties by modification: Hydrolysis, derivatization. Conclusion. Acknowledgment. References. Address: Dep. of Food Science, Cornell Univ., Ithaca, New York.

3301. Kudo, Shiro. 1976. Kôri-dôfu [Dried-frozen tofu]. *Shoku no Kagaku* (*Food Science Journal*) No. 29. p. 122-27. April. [Jap]
• ***Summary:*** It is said that the commercial production of frozen tofu started during the Momoyama period (1568-1600). It was made using the traditional, natural method of freezing the tofu outdoors in the snow, then allowing it to dry naturally. Centers of production included Mt. Kôya (Kôya-san), the Osaka-Kyoto area (Kinki Chihô), the Shinshu area (Shinshu Saku), the northeastern provinces (Tôhoku Chihô), Hokkaido, and the Matsuzen Chihô.

The earliest written description seen of the method for making frozen tofu appeared in the *Honcho Shokkan* (1690-1695, by Hitsudai HITOMI). That method was very similar to the method used today. Later, two basic methods evolved: The Koya method and the Shimi-dofu method. They differed only in the steps after the tofu was frozen outdoors in the snow. In the Koya method, the tofu underwent 5 days of standing at freezing temperatures (*moya*) to develop a fine-grained texture, was thawed in hot water, drained, and dried in a heated shed (*hoiro*). In the Shimi-dofu method, the tofu underwent 1 day of moya, was allowed to thaw and drain naturally, was tied with rice straw, hung outdoors in the air under the eaves, and subjected to repeated drying in the daytime sun and freezing again at night, until it was dry.

Starting in about 1700, Buddhist Vegetarian Cookery (*shôjin ryôri*) became very popular in the Kyoto-Osaka area. Frozen tofu was introduced and spread among the people of southwestern Japan and the island of Shikoku. Because of its growing popularity, a new and improved method for making the tofu (the Koya method) was developed that was better than the Shimi-dofu method. Shimi-dofu was made mostly in farmhouses and not much attention was paid to marketing the product. The process has not changed much up to the present time.

© Copyright Soyinfo Center 2013

A flow chart (p. 122) compares the processes for making dried frozen tofu using the new method vs. the traditional method.

1900 (Meiji 34)–An artificial freezing method was invented and used commercially. That made the unstable quality for frozen tofu more stable and enabled it to be made at any season of the year (not just during the winter) and in any part of Japan (not just in very cold regions).

1913 (Taisho 2)–The Koya method (frozen tofu method) was imported to Nagano prefecture, where Shimi-dôfu had been produced traditionally. In Nagano there was quite a different attitude from that found in Kansai (the Osaka / Kyoto area). The owners of factories studied the techniques, and with great effort, expanded their market in the Kansai area. At that time in Kansai, consumers wanted their dried frozen tofu to be soft when they eat it. As a result the expanding and softening process (bônan kakôho) was invented.

1925 (Taisho 14)–They added starch into the stage of making fresh tofu to get the soft tofu.

1928 (Showa 3)–They invented the method for adding sodium bicarbonate (baking soda; *jû-tansan soda*) to frozen tofu during the drying stage.

The next invention was the use of ammonia gas. They found that technique accidentally when they tried to remove the sour flavor of mold that grew of tofu, using ammonia. When they used ammonia gas, the tofu expanded and grew soft. This was the most dramatic event for the history of frozen tofu. After this invention of Shinshu Frozen Tofu, this tofu became accepted among consumers in the Osaka / Kyoto (Kansai) area and developed a good reputation.

During that time the manufacturers switched to artificial freezing from natural freezing and frozen tofu entered the age of mass production.

But only manufacturers in Nagano prefecture could make tofu all year round. They won the market from makers of traditional shimi-dofu and ended up with 90% of table production of frozen tofu in Japan.

Page 124: 2-3 years ago they invented a new method of not using ammonia, because frozen tofu processed with ammonia had a bad smell and only 3 months shelf life, and got rancidified very quickly–so that consumers had to store the product in a refrigerator.

Note: In 1974 (Showa 49) frozen tofu production in Japan was 13,000 tonnes, worth 8,300 million yen. A typical package of 100 gm sold for 47-85 yen. There were 21 manufacturer in Japan; each used from 1 to 30 tonnes of soybeans per day. Four large manufacturers controlled 80% of the market. By contrast, the retail value of fresh tofu was about 10 times as much as that of frozen tofu. Address: Vice President, Asahimatsu Kori-dofu K.K., Japan.

3302. Longacre, Doris Janzen. 1976. More-with-less cookbook. Scottsdale, Pennsylvania: Herald Press. 328 p. April. Illust. Index. 22 cm. Introduction by Mary Emma Showalter Eby. Spiral bound. [30* footnotes]

• ***Summary:*** Commissioned by the Mennonite Central Committee. On the cover: “Suggestions by Mennonites on how to eat better and consume less of the world’s limited resources.” However, this is not a vegetarian cookbook. Contents: Introduction. Part I: More with less. 1. Less with more: World shortages, North America: Five times as much, overspending money, overeating calories, overeating protein, overeating sugar, overcomplicating our lives. 2. Change–An act of faith: Does it really help anyone if I cut back?, it seemed inadequate, we liked it better the second time. 3. Building a simpler diet: The protein question, what is complete protein?, amino acid teamwork, no-meat, low-meat, and which meat, increasing protein content in foods.

II. Sharing the recipes. Soy-related recipes (all use whole soybeans unless otherwise stated): Nameless soybeans (p. 47). Soybean granola (with roasted soybeans, p. 91). Section of soybean recipes (p. 96-98, 109-15): Savory baked soybeans. Soybean loaf. Soybean hamburger casserole (with ground beef). Soybean casserole. Fresh soybean-cheese casserole (with “fresh green soybeans”). Soybean pie. Refried soybeans. Soybean soufflé. Sweet and sour soybeans. Marinated soybeans. Soybean sandwich spread. Basic soybean spread or dip. Soybean curd sauté (with bean curd [tofu]). Gather up the fragments. Soy, cheese and meat loaf (with “vegetable-protein meat extender, p. 166). Basic burger mix (p. 166). Quick soybean soup (p. 211). Soybean salad (p. 259). Roasted soybeans (3 recipes, p. 305).

Soy is also mentioned elsewhere: Soybeans contain complete protein (p. 28). Protein complementarity: In Indonesia fermented soybean cakes go with a rice meal. Chinese and Japanese use bean curd [tofu] and bean sprouts with rice (p. 29) Use soybeans or soy flour to increase protein content of foods (p. 31). Table showing protein and calorie content of some common foods (low fat soy flour, dry soybeans, immature cooked soybeans, mature cooked soybeans, p. 34). Table showing comparative costs of protein sources (dry soybeans {the least expensive of all!}, textured vegetable protein meat extender, soybean breakfast sausage, soy flour, p. 37). Soybeans and soy flour (p. 45). Cook large amounts of soybeans and freeze them to save time (p. 48). Soybeans contain fewer calories per gram of protein than common white beans (p. 49). When making granola, add soy flour, soy grits, roasted soybeans, or soaked soybeans (p. 88). Address: Akron, Pennsylvania.

3303. **Product Name:** Tofu.
Manufacturer’s Name: No-Moo Dairy.
Manufacturer’s Address: 90 Sawyer St., South Portland, ME 04106.
Date of Introduction: 1976. April.
Ingredients: 1982: Organic soybeans, solidified with nigari–spring water.

© Copyright Soyinfo Center 2013

Wt/Vol., Packaging, Price: 8 oz.
How Stored: Refrigerated.
New Product–Documentation: Letter/Order from Peter G. Beane, Star Route, North Anson, Maine 04598. 1976. Aug. 28. He orders a copy of *The Book of Tofu, Vol. II* (later re-titled *Tofu & Soymilk Production*).

Judy & Peter Beane. 1977. "No Moo Dairy. The No Moo Dairy, started in the spring of 1976 as an experiment, is the only operating tofu shop in Maine. From May to December, the 'shop' was the kitchen, and the average batch of tofu gave 5-6 lb." Shurtleff & Aoyagi. 1977. Jan. 28. Commercial Tofu Shops and Soy Dairies. Peter & Judy Beane.

Letter from Peter Beane. 1981. April. "I started the No Moo Dairy [i.e. started production] with my wife Judy in April 1976. It lasted for about two years, folding because of lack of capital. Our marriage also folded." Label. 1982, undated. 3.25 by 2 inches. Self adhesive. Black on green. Country/farm scene illustration. Address now: Peter and Judy Beane, North Anson, Maine 04958. 8 oz.

3306. **Product Name:** Tofu.
Manufacturer's Name: Thom Leonard Tofu Co.
Manufacturer's Address: Fayetteville, Arkansas.
Date of Introduction: 1976. April.
New Product–Documentation: Talk with Thom Leonard, owner of Wheatfields bakery in Kansas. 1998. June 9.
In about the early spring (or late winter) of 1976, Thom started making tofu out of his home kitchen in Fayetteville, Arkansas, and sold it at the Ozark Food Co-op in Fayetteville. Later he passed this company on to his good friend, Jim Hemminger, who named it Gregg St. Tofu.

• ***Summary:*** A large black-and-white photo shows a package of House (*Hausu*) Hon Tofu, for making [silken] tofu at home. In the box is a packet of powdered soybean milk and a packet of glucono delta lactone coagulant mixed with a little lactose. To prepare, mix the powdered soymilk with hot water in a pot to make soymilk. Then stir in the coagulant and allow to firm. Cool in cold water.

3313. Huang, Su-hei (Miss). ed. 1976. Chinese cuisine: Wei-Chuan cooking book. Taipei, Taiwan: Wei-Chuan Publishing

© Copyright Soyinfo Center 2013

Co. 221 p. May. Illust. Index (at front). 27 cm. [Chi; Eng] • ***Summary:*** This attractive book of Chinese cooking from the Wei-Chuan Cooking School is a bilingual Chinese / English edition. On each page is one recipe and a 1/3-page color photo of the prepared dish. The title of the recipe is written in Chinese in large bold characters and is also given (to the right) in smaller bold letters in English. Above the number of servings is the province or region of China from which the recipe comes (e.g., Szechuan, Cantonese, Peking, Hunan, etc.) Most of the recipes call for ¼ to ½ teaspoon of MSG; many call for soy sauce.

The introduction (p. 2-17) contains: (1) Seasonings for Chinese cooking, incl. soy sauce. (2) Instruments [utensils] for Chinese cooking. (3) Culinary idioms (basic techniques, such as cleaning, cutting, heating the pan, stir frying, etc.). (4) Arrangement of seating order at feast. (5) Arrangement of the dinner sets at a feast. (6) Arrangement of food and menu. (7) Basic principles of arranging the menu. (8) Sample menus for banquets or ordinary meals. (9) Commonly used vegetables (2-page color photo, incl. "9. yellow soybean sprouts").

(10) Commonly used dry materials and canned foods (2-page color photo, incl. "6. fried gluten balls {*'mien jin pau'*}." 13. pickled plums (*'umeboshi'*). 18. agar-agar. 33. nori (purple laver sheet). 35. bean curd skin [yuba, toufu p'i]. 36. bean curd roll. 37. Pressed bean curd cake [*doufugan*]. 39. kau fu. 40. bean curd wrapper (bai yeh; pressed tofu sheets). 41. vegetarian gluten roll (*mien jin*). 42. dried bean curd noodles [*kan-ssu*]. 43. Fermented black beans [fermented black soybeans]. 44. bean curd stick [dried yuba stick] (*'fu dzu'*). 47. Soy sauce. These two pages also show Wei-Chuan Foods Corp. is a manufacturer of many Chinese-style foods.

(11) Description of some other special ingredients. "1. Hot bean paste (pronounced *'la jiao jiang'*). A thick spicy paste made from ground hot red peppers and soy beans." "2. Sweet bean paste (*'t'ien mien jiang'*). Made 'from ground, fermented steamed bread and spices'" [soy is not mentioned]. "3. Soy bean paste (*'do ban jiang'*). A thick black paste similar in taste to sweet bean paste, but made from fermented soybeans." "8. Fermented black beans: Small black [soy] beans which have been marinated in soy sauce and salt and are used to flavor steamed fish and meat or in stir-fried dishes." "10. Pickled bean curd or Chinese cheese [fermented tofu] (*'do fu ru'*). Bean curd cubes which are first dried and then mixed with wine, spices and salt and allowed to ferment. It is used to season braised pork and duckling." "21. You tiau. A deep-fried crispy Chinese cruller..." * "Kau fu: A spongy type of vegetarian ingredient made from wheat gluten" (see p. 151). "Fried gluten ball ('mien jin pau'): A type of light, round, deep-fried ball made from wheat gluten and water." "Su tsang: A type of long thin roll made of wheat gluten and water."

Interesting soy related recipes: Bean curd noodle and celery salad (with "4 oz. bean curd noodles," Szechuan, p. 23). Steamed spareribs with fermented black beans (with "3 T. [tablespoons] fermented black beans," garlic, ginger root, rice wine, and soy sauce, Cantonese, p. 60). Steamed pork in preserved bean sauce (with "2 squares fermented bean curd" ('do fu ru'), Cantonese, p. 74). Steamed carp with fermented black beans, Hunan, p. 88. Braised carp with hot bean paste (with "1½ T. [tablespoons] hot bean paste" ('la do ban jiang'), Szechuan, p. 100). Stir-fried oysters with fermented black beans (Taiwanese, p. 132).

One section of the book titled "Bean curd & eggs" (p. 140-49) contains various tofu and yuba recipes, including: Ma-Po's bean curd (Szechuan, p. 140). Vegetarian chicken loaves (with "16 sheets bean curd skin" [yuba], Shanghai, p. 147). Eggplant rolls with chopped pork (with "1 sheet bean curd skin, Taiwanese, p. 148). Stuffed bean curd rolls (with "8 bean curd sheets (*bai ye*), Shanghai, p. 149). Bean curd is counted in squares. Address: Taiwan.

3314. Rodale, Robert. 1976. Looking for Chinese health secrets. *Prevention* (*Emmaus, Pennsylvania*). May. p. 23-30. • ***Summary:*** Three years ago Mr. Rodale had the good fortune to be able to travel throughout China for 27 days, "As I sat on the Northwest Orient plane, eating an airline meal of chicken, potatoes, bread and a salad, I thought how I would rather be eating some rice, bean sprouts and perhaps some tofu, or bean curd... Recently we learned the Chinese lesson that sprouted seeds are much more nutritious than dry, dormant seeds. Protein and vitamin values are improved dramatically by sprouting, and minerals in the seeds are absorbed much more easily. I think there is tremendous potential in the U.S. for wide use of sprouts as food...

"Bean curd is another great Oriental food that is making friends here rapidly. It is a creamy, mild-tasting kind of 'cheese' made from soybeans–inexpensive and rich in protein. Most people here call it tofu, which is the Japanese name for bean curd. The Chinese call it dofu. No matter what you call it, bean curd is a much better soybean food than the fake meats and meat fillers made from spun soybean fibers that are being sold to American consumers now. They are hoked up with additives to give the resulting food color and flavor, and are far more expensive per ounce of protein than bean curd. The white color and mild flavor of tofu are part of its appeal, so why load yourself up with harmful additives just to make believe that soybeans are really bacon?"

A photo (p. 29) shows six large, square flats of pressed tofu stacked atop one another, separated by boards. The caption reads: "Bean curd, Taiwan style, is not sold in fancy packages. But it's clean, fresh, low in cost, and full of excellent protein."

In Taiwan, Dr. Doris C.N. Chang (photo, p. 27) is an American-trained scientist looking for better ways to sprouts soybeans and mung beans. Ton Yen Street in Taipei, known as "the street of sprouts," is where soybeans and mung beans

© Copyright Soyinfo Center 2013

are grown in large crockery sprouting urns and watered every 5 hours. A secret "hormone accelerator" may be added to the water bath to make the sprouts grow faster, and have them end up fatter with shorter roots. Doris Chang thinks it's an auxin-like material, probably a common weed killer like 2,4-D or 2,4,5-T; those herbicides kill plants by making them grow too fast in a short time. In Taiwan Mr. Rodale also visited AVRDC in Tainan; they were growing amaranth and sweet potatoes.

Note: This is the earliest English-language document seen (Nov. 2003) that contains the term "fake meats" (or "fake meat"). Address: Emmaus, Pennsylvania.

3315. Knoblauch, Mary; Leroux, Charles. 1976. Eats–Mandarin restaurants: Rating the Far East feasts in Chicago and suburbs. *Chicago Tribune.* June 4. p. B1.
• ***Summary:*** An excellent restaurant review with a summary of the history of Chinese restaurants in Chicago and the different Chinese regional cuisines. In 1965, there was only in Mandarin restaurant in the Chicago area–the Dragon Inn in Glenwood, about 20 miles south of Chicago; today there are about 40. For decades, Cantonese restaurants were synonymous with Chinese restaurants. Fukien, on the coast of China between Canton and Shanghai is famed for its soy sauces.

While it takes a chef only a few minutes to cook a Chinese dish, someone has usually spent hours beforehand chopping and shredding the ingredients.

The Northern China (5001 N. Clark St.) offers "whole braised fish with garlic, onion, and black bean sauce..."

The Cathay Mandarin Restaurant (3014 N. Lincoln Ave., Skokie) offers a delicious hot and sour soup laced with "generous shreds of chicken, pork, bean curd [tofu], green onion, and dried mushrooms." "Its Ma poo shrimp are redolent with hot bean sauce, fermented black beans, and garlic."

The Mandarin serves a "fried bean curd and pork in chili sauce."

• ***Summary:*** Malnutrition is a big problem in Tanzania, especially among infants, children, and pregnant and lactating women. Tanzania's official policy of food self-sufficiency requires that domestically grown foods must be used in the country's developing weaning food program. In 1972 Tanzania's leading food crops were bananas (1,205,743 tons), maize (880,886), cassava (792,850), sweet potatoes (234,151), sorghum (190,882), and rice (paddy, 170,903). Only 776 tons of soybeans were produced.

In the early 1960s, the enrichment of sembe (60% locally extracted maize flour) as well as the fortification of other local staple foods with high protein sources (such as soy flour and groundnut flour) were advocated and limited attempts were made. "Preliminary trials to feed maize-soy flour mixtures to adults and children in educational institutions showed that 5% soy could be added undetected to uji and ugali (local thin maize gruel, and thick maize flour paste, respectively). Systematic high-protein product

© Copyright Soyinfo Center 2013

development was undertaken by the Ministry of Agriculture" (including soy beans) in the late 1960s. Mixtures of maize and sorghum flour containing up to 25% soy flour were acceptable in child-feeding trials. "A village-level soy processing project (in which the villagers used hand-operated equipment for processing soybeans into full-fat flour, soy milk and curd) was started. The products were incorporated into local cereal staples, which were very well accepted. The project is still in progress, but it has been hampered by difficulties arising from the large labor input required by the hand-operated equipment. The use of power mills for decorticating and grinding the soybeans has been recommended." Address: Tanzania Food and Nutrition Center, Dar es Salaam, Tanzania.

3322. Scheer, James F. 1976. New superstar food–Ancient tofu. *Let's Live.* June. p. 91-93.
• ***Summary:*** Based on an interview with William Shurtleff and Akiko Aoyagi, who visited the offices of *Let's Live* in Los Angeles, California, while on a tour, and on a review of their *Book of Tofu.*

3323. *Vegetarian World* (*Los Angeles*). 1976. Tofu: Prime hope for a starving world. No. 6. p. 7. June.
• ***Summary:*** Discusses the work of Bill Shurtleff and Akiko Aoyagi with tofu. Photos show: (1) The two holding a block of homemade tofu on a plate. (2) A hungry child. Gives four "quick and easy recipes for delicious tofu dishes:" Crumbly scrambled tofu, Tofu mayonnaise dressing, Grilled tofu steak, and Tofu ice cream. "In *The Book of Tofu* by Bill Shurtleff and Akiko Aoyagi, the authors assert that the exotic cakes of soybean curd, found primarily in health food stores in the U.S., are about to revolutionize world-wide eating habits." Address: Lafayette, California.

3324. *Berkshire Eagle* (*Pittsfield, Massachusetts*). 1976. Second natural food store opens in city. July 3. p. 8.
• ***Summary:*** Cornucopia Natural Foods, a retail store, was opened this week at 424 North St., in Berkshire, Massachusetts, by Richard Buck, "a dedicated member of the natural food cult" and a former Prudential Insurance Company employee. He plans to sell the foods and preach their benefits to all who will listen. He has "converted to the Vegan faith. That is a national organization whose members abstain from all animal products including dairy products as well as meats." Buck is planning to start a chapter of the North American Vegan Society in Pittsfield, in order to help spread the word locally.

All of the counters and display cabinets in the store are made by hand of unfinished wood, except for the bread counter and the refrigerator section.

"Tofu is a big item in the store. This is bean curd made from soybean and eaten in many ways." The store also has "a cookbook for sale devoted exclusively to recipes involving tofu [probably *The Book of Tofu*, by Shurtleff & Aoyagi].

The store stocks one of the most extensive collections of herbs and spices outside of New York City.

The story carries fresh garden produce, has a juice bar and "a bakery featuring bread made by the neighboring Sufis."

Buck is planning to add more new products as business increases. One of the first will be dairyless ice cream.

The store will be open Mondays through Saturdays from 9 a.m. to 9 p.m.

A large photo shows the inside of the store.

3325. *New York Times.* 1976. From column A to column Z (Advertorial). July 4. p. ADS12.
• ***Summary:*** This is a full page advertorial describing and promoting China's different regional cuisines, including Taiwanese cuisine. We are not told which organization is paying for the ad. Could it be the government of Taiwan?

"For Chinese cuisine–which is unmatched by any other–is a brilliant blend of contrasting tastes and textures. But then, it's the product of several thousand years of genius." "As all aficionados of Chinese food know, Taipei [capital of Taiwan] is a gourmet's paradise." The island republic of Taiwan is a "vital center of vegetarian cuisine." Most customers at these meatless restaurants are Buddhists, who are vegetarians for religious reasons. Over the past 2,000 years, Buddhists have developed a host of totally vegetarian [vegan] dishes that simulate their Chinese counterparts based on meat, fowl, or fish. For example, monks long ago developed a snack that "tastes surprisingly like ham by blending dry-roasted peanuts with tofu, or bean curds, that had been sauteed in soy sauce."

"In vegetarian restaurants, the menu features such dishes as 'roast duck' or 'pork balls' or 'fried fish.' But in fact the ingredients are such non-meat products as soy bean curds, mushrooms, seaweed, water chestnuts, and wheat gluten. Yet so artfully are they prepared and sauced that most non-vegetarians, unless they are forewarned, believe they are savoring meat dishes." Address: Food editor.

3326. Itoh, Joan. 1976. Everything there is to know about tofu. Review of *The Book of Tofu* by Shurtleff and Aoyagi. *Japan Times.* July 10. p. 7.
• ***Summary:*** "'The Book of Tofu' by William Shurtleff and Akiko Aoyagi is just about the most complete book one can imagine on the subject. It is written much like a textbook, educating the reader in a delightful way with large easy-to-read print, charts, statistics and scores of drawings that makes everything they are talking about absolutely clear. The enthusiasm that the authors feel about this food comes through and they make a very good case of why all of us should become tofu fans."

"Besides all this, it has the most detailed glossary of Japanese foods ever compiled in English and that alone is

© Copyright Soyinfo Center 2013

almost worth the price of the book for the foreigner living in Japan.

"Needless to say, the authors have put a fantastic amount of research and work into their project. There just isn't anything left out, even lists of tofu shops now operating in America and western Europe. It is a work that they can well be proud of because it is going to be a tremendous help to a great many people.

"One gets the feeling that this is a book that could not have been written any other time but now. Maybe the fact that the authors are into Zen meditation has something to do with the whole simple, honest feeling about the book. It reflects a blend of cultures. hard work, liberation, idealism and, most of a1l, a kind of awareness and concern for mankind. The book of tofu is a cookbook with a message and buying it might be one of the best ways you could spend ¥2,500."

Note: Immediately below this review is another titled "Key Elements of Soto Zen Expounded." It reviews a new book, *Zen Master Dogen: An Introduction with Selected Writings*, by Yuho Yokoi with Daizen Victoria. Shurtleff originally went to Japan to study Soto Zen meditation and translate Dogen's writings into English, then switched to writing about tofu. How perfect!

3327. Shurtleff, William; Aoyagi, Akiko. 1976. What is tofu? (Leaflet). Berkeley, California: Westbrae Natural Foods Inc. 5 panels each side. Each panel: 24 x 12.5 cm. Illust. by Akiko Aoyagi. July 20. 24 x 13 cm.
• ***Summary:*** Contents: Introduction (see next page). A family of distinctively varied foods. A storehouse of high-quality protein. Low in saturated fats: free of cholesterol; an ideal diet food. • ***Summary:*** About American Zen trainee William Shurtleff, age 35, of California. With Akiko Aoyagi he has written a book on tofu. He is now visiting Japan again. "In 1971 he first came to Japan with the aim of undergoing training in Zen... While he was doing Zen in Kyoto, Shurtleff was captivated by the taste of tofu and also by its cheapness."

3330. Boyer, Robert A. 1976. Early history of the plant protein industry. *Cereal Foods World* 21(7):297-98. July.
• ***Summary:*** "Shortly after the turn of this century, there appeared on the American scene one of the first examples of a food product based on a processed plant protein. Dr. John Harvey Kellogg, in an effort to add more vegetable protein foods to the menu of his famed Battle Creek Sanitarium [in Michigan], developed a method for producing wheat gluten from ground wheat and converting it into an attractive entree resembling a cut of meat."

Yet long before, people of the Orient have obtained a major portion of their protein from bean curd or tofu. There follows a good history of modern soy protein development from 1930 to the present. In the "late 1950s, the first edible soy protein plant went on stream in Chicago [Illinois, where Central Soya made Promine]. This was followed a few years later at another edible plant in Louisville, Kentucky [owned by Ralston Purina Co.]. Soon products began appearing on the marketplace listing 'soy protein' or 'vegetable protein' in their ingredient lists... This triggered a rapid growth in the plant protein industry starting in the mid-1960s... To summarize, it can be said that the first 65 years were the hardest for this new industry, but after that the progress was irresistible. Nothing is as powerful as an idea whose time has come."

A portrait photo shows Boyer, who "attended the Edison Institute of Technology before serving as Manager of the Soybean and Chemurgic Laboratory, Ford Motor Co. from 1931 to 1943. He spent the next six years as Director of Research for Drackett Co. Boyer worked as a Protein Consultant for the next 13 years with such companies as Swift and Co., Unilever Ltd., Worthington Foods Inc., Nabisco, General Mills and Ralston Purina. In 1962 he joined Ralston Purina as Protein Scientist. He served in this capacity until his retirement in 1971, at which time he assumed his present position." Address: Protein Consultant, Miles Laboratories, Inc., Elkhart, Indiana, 46514.

3331. **Product Name:** Tofu [Soft, or Firm].
Manufacturer's Name: Vegetarian, Inc. Renamed Corn Country Whole Foods, Inc.

13 Recipes WESTBROS 15 cents

WHAT IS TOFU?

Tofu—also known in the West as bean curd or soybean cake—has been the low-cost protein backbone of the East Asian diet for more than 2,000 years. Discovered by a Chinese prince in 164 B.C., tofu is presently the single most important soybean food for more than one billion people and is prepared fresh each morning at 38,000 shops in Japan alone. Now widely available across America, tofu is the answer that millions of nutrition- and cost-conscious people have been searching for. Natural and inexpensive, it makes fullest use of the earth's nutritional resources—and offers a revolutionary yet simple approach to meeting the world's critical food requirements.

A FAMILY OF DISTINCTIVELY VARIED FOODS

For many of us in the West, the word "tofu" refers to the most popular variety, known for its firm custard-like texture, delicate flavor, and cream-white color. However, in its broader sense, "tofu" refers to a family of more than fourteen different high-protein soybean foods, each with its own unique flavor, texture, and appearance; each suited to distinctively different types of cookery. The various forms include deep-fried, grilled, wine-fermented, and silken-smooth tofu, plus a host of others as shown in figure 1. Each is available in the West at natural food stores, co-ops, supermarkets, Japanese and Chinese food markets, or, at reduced rates, directly from the more than 55 tofu shops now in operation throughout America.

These tasty and highly nutritious tofu products are versatile enough to become indispensable ingredients in many of your favorite Western-style dishes, including dressings, spreads, dips and hors d'oeuvres; salads, sandwiches, soups, and sauces; egg, vegetable, and grain preparations; barbecued and deep-fried specialties, casseroles, and even desserts. A traditional favorite in vegetarian cuisine, tofu can serve as the key to planning delicious meatless meals.

A STOREHOUSE OF HIGH-QUALITY PROTEIN

Nutritionally, tofu is perhaps the finest known source of low cost, high-quality protein, free of cholesterol and low in saturated fats and calories. The protein value of any food depends on two basic factors: the *quantity* of protein in the food and the *quality* of that protein. Quantity is usually expressed as a simple percentage of weight. By comparing the following figures, it can be seen that tofu and other soybean products rank at the top of the list—ahead of meats and dairy products.

FOOD	% PROTEIN BY WEIGHT	FOOD	% PROTEIN BY WEIGHT
Dried-frozen tofu	53	Tofu burger (ganmo)	15
Soy flour (defatted)	51	Hamburger	13
Dry soybeans	35	Eggs	13
Cheeses	30	Chinese-style tofu(doufu)	11
Fish	22	Tofu cutlets (thick agé)	10
Chicken	21	Tofu	8
Beef (steak)	20	Brown rice (uncooked)	6
Tofu pouches (agé)	19	Milk (whole)	3

On the other hand, protein quality refers to the percentage of protein in a food that can be utilized by the body. It is usually expressed in terms of NPU (Net Protein Utilization), a figure that depends largely on the food's digestibility and the degree to which the configuration of the

Manufacturer's Address: 1310 W. Main, Urbana, IL 61801; then 132 South Market St., Champaign, IL 61820. Phone: 217-328-1656 (VI). 217-359-3443 (CC).
Date of Introduction: 1976. July.
Ingredients: Water, soybeans, nigari.
Wt/Vol., Packaging, Price: Bulk in 5 gallon plastic pails.
How Stored: Refrigerated.
New Product–Documentation: Visit with Les and Debby Karplus of Vegetarian Incorporated/Strawberry Fields in Urbana by Shurtleff & Aoyagi. 1976. Oct. 23-24. Study tofu making process.

Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 395. Corn Country Whole Foods, 132 Market St., Champaign Urbana, Illinois 61820. Phone: 217-359-8843. Owner: Lester Karplus.

Talk with Les Karplus. 1989. March 16. This was his first soyfood product. Made it in a Groen 60 gallon kettle, 4 by 4 inch lever press with homemade cedar pressing boxes. Produced 2-3 batches a day. It was sold in his store and distributed over a 5 state region. Discontinued in about 1980 because it wasn't cost effective. Sold the equipment to Frederick Schaefer of American Pride in Fairfield, Iowa. Related products made in the same plant but sold only at Strawberry Fields Whole Foods (Lester's store), were soymilk (carob, vanilla, or plain), and soymilk smoothies (orange, banana, carob).

3332. Anderson, Sylvia. 1976. Re: Tofu made from soy flour on The Farm in Summertown, Tennessee. Letter to William Shurtleff at New-Age Foods Study Center, Aug. 12. 2 p. Typed.
• ***Summary:*** Before Sylvia went to live on The Farm in Summertown, Tennessee, in June 1971, she had never heard of tofu. She first saw firm, pressed tofu in cakes about a year ago. The tofu they made on The Farm was a staple of her diet and one of her favorite foods. This was made from soy flour, and all the pulp [okara] was left in; it was squeezed to a roundish in cloth as the last step rather than being pressed into cakes. She suggests it be called "Tennessee Farm Tofu" or "Squeezed Tofu." It may be a new invention.

"Here's how it came to be: Stephen and his students gave up dairy (cow) products before or during the Caravan, and in the early days of The Farm folks were into commercial soy products like Soyagen and Soyamel (powdered soymilk, made by Worthington Foods) and Fearn's Soya Powders. The Farm store bought and distributed soy powder (Fearn's, I guess), from which we made cardboard tasting soymilk and chalky squeezed tofu from directions in *Ten Talents* (by Frank and Rosalie Hurd, 1968), which was The Farm's cooking scripture of that era.

"As priorities began to get shuffled around and we started growing our own soybeans, soy flour ground in The Farm mill replaced the old soya powder, and as the soy dairy got together, folks stopped making [soy] milk at home, but they kept on making tofu at home, converting the old soy powder recipe to soy flour. At first we strained the pulp out of the milk before we solidified it, but that meant double straining, and you never could get all the very fine flour-pulp out anyhow, so somewhere along the way we tried it without straining out the flour and found that it made fine 'tofu'–by our standards, which were certainly far from those of a tofu master. But this kind of tofu has become a staple in the diet of several thousand people in America by now... And I'm teaching folks her in New Jersey how to make it as fast as I can... I've tried your homemade tofu method and its fun but a whole lot more energy-expensive than the method I'm used to, so I feel inclined to use it only for special occasions, and use the Tennessee Farm method for my every-day tofu cooking.

"So what I'm pushing here in New Jersey is this new American folk food... People here are digging it and wanting to know how to make it. I've been giving small demonstrations in people's homes quite a bit lately, and have at least three more scheduled this month. Two of these will be at Mormon church ladies' meetings. I didn't realize until recently, but the Mormons have a dietary teaching that goes: 'Yea, flesh also of beasts and of the fowls of the air, I, the Lord, have ordained for the use of man with thanksgiving; nevertheless they are to be used sparingly; And it is pleasing to me that they should not be used, only in times of winter, or of cold, or famine' (*Doctrine and Covenants*, SEct. 89:12-13). So the Mormon ladies in the area want to know how to feed their families soybeans!

"Here's a recent quote from Stephen: 'We *are* our brother's keeper. And our brother is the population of the planet.'" Address: 109 West Park Ave., Pleasantville, New Jersey 08232.

3336. Farm Food Company. 1976. August. New soyfoods restaurant or deli. 820 B. St., San Rafael, CA 94901.
• ***Summary:*** Shurtleff & Aoyagi. 1976. Sept. Tofu & Miso America Tour Itinerary. Contact: Kathleen Sandler.

Questionnaire filled out by Robert & Constance Dolgin. 1980. Jan. The Farm Food Co. in San Rafael opened its deli in about Aug. 1976, and the same month started making tempeh, tofu and soymilk. Shurtleff & Aoyagi visited in Sept. 1976. A list is given of dishes containing soyfoods served at the deli during its first year in business: Fried tofu sandwiches, tofu salads [like eggless egg salads], tofu salad dressings, and tofu cheesecake; tempeh burger, deep-fried tempeh cutlet, tempeh with creamy tofu topping, and Indonesian delight (tempeh strips with peanut butter and miso sauce over rice); soymilk ice cream, soymilk shakes, soy yogurt, soymilk mayonnaise, and soy whipped creme; soybean stroganoff and burritos; TVP chili; and Vege-Links (canned Loma Linda meatless hot dogs). Also for sale at the food store were packaged tofu, soymilk, tempeh, soy mayo, and Ice Bean [soy ice cream], all made in the same building.

Shurtleff & Aoyagi. 1982. Report on Soyfoods Delis, Cafes & Restaurants. p. 3.

Laurie Sythe Praskin. 1985. "The Farm soy history: An overview." States (p. 3) that it was named "Farm Foods Cafe."

Note 1. This is America's first "soy deli," offering a host of highly creative and delicious recipes, served at a counter or tables.

Note 2. At this deli was developed and made the world's first "Tofu Salad," which would soon (made by various companies, including Farm Foods in San Francisco) become one of America's first popular tofu products, widely called "Eggless Egg Salad" (1977), "Tofu No-Egg Salad" (1978), and "Missing Egg Salad" (1978). Address: San Rafael, California. Phone: 415-454-3797.

3337. **Product Name:** The Learning Tree Tofu Kit.
Manufacturer's Name: Learning Tree (The).
Manufacturer's Address: Box 76E, Bodega, CA 94922.
Date of Introduction: 1976. August.
New Product–Documentation: This is America's first important tofu kit, introduced in August 1976. It was developed by Larry Needleman of The Learning Tree in Bodega, California, based on designs from *The Book of Tofu.*

Shurtleff wrote in his journal in Aug. 1976: "This month I meet Larry Needleman, who has developed a nice Tofu Kit, based on designs from our *Book of Tofu.* He visits our home and Center at 790 Los Palos Dr. [Lafayette, California]; we sit in the den and talk."

"1976 Sept. 29–Akiko and I leave on Tofu & Miso America Tour, in our white Dodge van packed full of books and tofu kits (from Larry Needleman). As we stop for our first gas on the San Pablo Dam Road, I wonder if the tires will explode or the springs break under all the weight." "Trip expenses included $1,200 or more to Larry Needleman for tofu kits at the wholesale price."

The initial retail price of the kit was $11.95 and the wholesale price was $7.77. It soon became the world's most popular tofu kit. Larry continually improved on the design, until it was a joy to use or behold.

Invoice No. 4992. 1977. Jan. 17. To New Age Foods Study Center (790 Los Palos Manor, Lafayette, CA 94549) from The Learning Tree (P.O. Box 829, Corte Madera, CA 94925). 12 boxed tofu kits, $7.17 each, total $86.04. Picked up by Sandy Hill.

TOFU KIT

INFORMATION SHEET

DIMENSIONS:
I.D. — 7⅝" x 4⅛" x 4"
O.D. — 8⅝" x 5⅛" x 4"
APPROXIMATE NET WEIGHT/KIT* — 2.85 pounds
MANUFACTURER'S SUGGESTED RETAIL PRICE: $12.95

KITS/CASE	APPROXIMATE WEIGHT/CASE*	DIMENSIONS OF CASE
6	15 pounds	14" x 12" x 9"
12	30 pounds	18" x 18" x 10"
24	57 pounds	18" x 18" x 18"

*The weight of each TOFU KIT varies slightly with the weight of the wood. Each board is different.

MANUFACTURING & PRODUCTION

The TOFU KITS are manufactured for us by Westcom Industries, a factory and work training center for the handicapped in Richmond, California. Production capacity: 200–400 units/day.

INGREDIENTS

THE LEARNING TREE TOFU KIT contains a sixteen page booklet with recipes for making and using TOFU, a Philippine Mahogany settling box, joined by silicon-bronze, ring-shafted, boat building nails, a muslin pressing sack, an eighteen inch square of 44/36 unbleached cheesecloth, and a three ounce packet of Natural Nigari solidier (enough for about ten batches).

PACKAGING

The TOFU KITS are shrink wrapped in 100 gauge, Reynolon 4155, a crystal clear, polyethelene film, allowing complete visibility of the attractive wood and bronze settling box and label. The other ingredients of the TOFU KIT are inside the settling box.

CURRENT DISTRIBUTION

First released in September 1976. To-date we have distributors and retail accounts in twenty-two states in the United States and one in British Columbia. They are almost exclusively Natural Food Stores and Health Food Stores, with a sprinkling of cookware shops and book stores.

ADVERTISING

The TOFU KIT has been nationally advertised as a mail-order item in *East West Journal, Well-Being Magazine* and *Mother Earth News.* It is being reviewed by *Mother Earth News, New Age Journal, Co-Evolution Quarterly* and *Organic Gardening and Farming.*

TERMS & PRICES

TO RETAILERS:
Price — $8.00/KIT Minimum order — 6 KITS Prepaid or C.O.D. Freight Collect

TO DISTRIBUTORS:
Price — $6.50/KIT Minimum order — 24 KITS C.O.D. or Net 7 Days Freight Collect
(Most distributors will charge their retail accounts $8.50/Kit, delivered. When Freight charges are added to THE LEARNING TREE *price to retailers the price/Kit ends up at least $8.50).*

We are a small, new company and have been expanding production rapidly. The terms we require are necessary to continue expanding production to meet the demands for TOFU KITS and still stay in business.

SHIPPING

All orders are shipped U.P.S., unless over 100 pounds, then they may be shipped U.P.S., split shipment (over several days) or by common carrier. Air freight service is available through U.P.S. or Federal Express. You may also save the freight by picking up orders with your own truck at our Richmond, California factory. Trucking Classification: 100 C, Woodenware, NOI

The TOFU KIT is the first product and a labor of love and service from THE LEARNING TREE. *It was entirely inspired by* The Book of Tofu, *as a convenient tool to help people make their own TOFU at home and as a means of shifting eating habits away from meat, freeing much needed vegetable protein to feed starving people.*

2.85 lb. Suggested retail price: $12.95. “Ingredients: The Learning Tree Tofu Kit contains a 16 page booklet with recipes for making and using tofu, a Philippine mahogany [red lauan; not real mahogany] settling box, joined by silicon-bronze, ring-shafted, boat building nails, a muslin pressing sack, an 18-inch square of 44/36 unbleached cheesecloth, and a 3 ounce packet of natural nigari solidifier (enough for about ten batches). Packaging: The Tofu Kits are shrink wrapped in 100 gauge Reynolon 4155, a crystal clear, polyethylene film... Current Distribution: First released in September 1986, the kit now has distributors and retail accounts in 22 states in the United States and one in British Columbia. They are almost exclusively Natural Food Stores and Health Food Stores, with a sprinkling of cookware shops and book stores. Advertising: The Tofu Kit has been nationally advertised as a mail-order item in *East West Journal, Well-Being Magazine, and Mother Earth News*... Terms and Prices: To retailers: $8/kit. Minimum order–6 kits. To distributors. $6.50/kit. Minimum order–24 kits. The Tofu Kit is the first product and labor of love and service from The Learning Tree. It was entirely inspired by *The Book of Tofu,* as a convenient tool to help people make their own tofu at home and as a means of shifting eating habits away from meat, freeing much needed vegetable protein to feed starving people.” P.O. Box 829, Corte Madera, CA 94925. 2/1/77.

Ad in Mother Earth News. 1977. No. 43. p. 37. Jan/Feb. (4.5 by 2.5 inches) “Tofu–Easier to make than bread! Tofu kit from the Learning Tree.” The kit costs $11.95 from Westbrae Natural Foods in Berkeley, California.

Leaflet #1. 1977? “Tofu Kit information sheet.” Double sided with recipes. Black ink on tan paper. The kit retails for $12.95. Leaflet #2. “Tofu Kit: Make your own tofu at home... quicker and easier than baking bread.” Black ink on burnt sienna paper. Single sided. The kit retails for $12.95.

Note: “The Learning Tree” is the title of the first film made by the well-known black photographer and film-maker Gordon Parks.

Ad in *East West Journal.* 1978. April. p. 11. “Make your own tofu at home–quicker and easier than baking bread.” Send a check or money order for $12.95 ($13.95 in Canada) to The Learning Tree, Box 76, Bodega, CA 94922. Ad in East West Journal. 1978. Oct. p. 62.

In June 1981 it was selling at the rate of 350 kits/month in the USA, decreasing to 150/month in June 1982. At this time it was made for the Learning Tree by physically handicapped people at the Marin Community Workshop in Mill Valley, California. Suggested retail price was $18.95.

3338. New-age Foods Study Center. 1976. Publications & materials, 1976 [mail order catalog]. 790 Los Palos Manor, Lafayette, CA 94549. 1 p. Single sided. 36 x 22 cm. Aug.
• ***Summary:*** This 1-page leaflet, 8½ by 14 inches, printed on one side with black ink on white paper, is the Center’s first catalog. In the upper right corner is the Japanese-style logo of waves and a moon in a circle.

Publications: The center sells four books written or published by William Shurtleff and Akiko Aoyagi (the softcover edition of *The Book of Tofu*, published by Autumn Press {336 pages} retails for $6.95), pamphlets, a tempeh brochure, *Diet for a Small Planet* by Lappe.

Materials: (10) A tofu box (made of ponderosa pine) for the preparation of homemade tofu. (11) A tofu-making kit: “Contains a hardwood box, pressing sack, settling cloths, packet of natural nigari, and illustrated instructions.” (12) Write for a catalog of “Commercial tofu-making equipment: Grinders, cauldrons or pressure cookers, presses, etc.” (13) “Koji starter for miso or shoyu: Write for a catalog and price list showing 20 available varieties.”

Coming soon are *The Book of Kudzu* and *The Book of Sea Vegetables.* Address: Lafayette, California. Phone: 415-283-3161.

3339. Ohlund, Tim. 1976. Re: Work with miso and koji in Sweden. Letter to William Shurtleff at New-Age Foods Study Center, Aug. 2 p. Handwritten.
• ***Summary:*** “Dear friend. I have been very impressed with your articles on tofu and tempeh in such magazines as *East West Journal* and *Mother Earth News.* I have been working in this area on a very small scale since about 5 years ago, when I got into macrobiotics in Japan under Nahum Stiskin. Since then I have been living in Sweden studying Japanese and Chinese at Uppsala University as well as managing a truck garden (biodynamic) during the summers.”

He has been growing Japanese vegetables in Sweden–with good results. “I’ve also been working with a new variety of soybean suited for this northern climate. This year I have a very good crop of them. The last two winters I’ve been making up batches of miso just to see how it would go and gain some experience at it. It is not yet as I would like it, but that will take some time. What I really need at this time is some good literature on the subject. My friend and I have combed the library at the university here and found much important information on tofu, tempeh, and lactic acid fermentation in *Applied Microbiology* and *Journal of Food Science*, etc.” He requests more information and contact people. He may make another trip to Japan in the next year or shortly thereafter to do research. Address: Box 559A, 19063 Örsundsbro, Sweden.

3341. Shurtleff, William; Aoyagi, Akiko. 1976. Tofu country style cooks better than it looks. *Mother Jones*. Aug. p. 54-55. [1 ref]
• ***Summary:*** An introduction to tofu with four recipes. Address: 790 Los Palos Dr., Lafayette, California 94549.

3342. **Product Name:** Tofu.
Manufacturer's Name: Soy Good Tofu Shop. Renamed Soygood Tofu Shop by Dec. 1978.
Manufacturer's Address: 347 N. West Ave., Fayetteville, AR 72701. Phone: 501-442-2910.
Date of Introduction: 1976. August.
New Product–Documentation: Letter/Order from James Hemminger, 216 E. Ella, Fayetteville, Arkansas 72701. 1976. Aug. 29. He orders a catalog of commercial tofu making equipment.

Shurtleff & Aoyagi. 1977. Jan. 9. Visited on Tofu & Miso America Tour. Shurtleff & Aoyagi. 1977. Jan. 28. Commercial Tofu Shops and Soy Dairies. Jim Hemminger. Letter from Thom Leonard in Toppenish, Washington. 1977, Sept. 20. "Jim Hemminger sold his house and tofu shop and moved to his father's farm in Ohio. So that's over."

Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 392. The company is now Soygood Tofu Shop, 216 Ella, Fayetteville 72701. Phone: 501-442-2910. Owner: Jim Hemminger.

3343. **Product Name:** Tofu.
Manufacturer's Name: Tollhouse Tofu.
Manufacturer's Address: Francestown Rd., Mount Vernon, NH 03057.
Date of Introduction: 1976. August.
How Stored: Refrigerated.
New Product–Documentation: Shurtleff & Aoyagi. 1976. Nov. 13. Visited on Tofu & Miso America Tour. Martha Trundy, an old friend of Bill's, has been making and selling tofu for the last four months at the local natural foods store in Milford, New Hampshire. She makes it at home, cooking the ground soybeans on a wood stove. It is sold in small plastic bags, packed in water. On the label is written "Tollhouse Tofu." We spend the night at her home, a cozy "Cape-Cod" style house that is over 200 years old. She continued to make and sell tofu for about 2 more months.

Note: This is the earliest known commercial soy product made in New Hampshire.

3344. *Chicago Tribune*. 1976. Stocking your Mandarin pantry: A grocery list for Mandarin cooks. Sept. 16. p. D1.
• ***Summary:*** There are four basic categories of supplies: Dried, canned, condiments, and produce. Under "Dried" we find: "Fermented black beans–Also called salted black beans. Sold in plastic bags, slightly moist; store in covered container in refrigerator."

Under "Canned" are Hoisin sauce, and Hot bean paste. The latter is "Essential to Szechwan dishes... (Don't buy sweet bean paste, yellow bean paste, or soy bean paste by mistake).

Under "Condiments"–"Light soy sauce–The kind you are used to. Buy the ubiquitous brand all Chinese stores and restaurants use, Kikkoman; buy at least a pint." "Dark or black soy sauce–Used as flavoring. Thicker than regular soy, it has a molasses-like quality and is a necessity in many dishes. Measure carefully, though, because it can be overpowering." Also rice vinegar, and sesame oil made in Taiwan or Hong Kong, rather than Japan.

Produce: "Fresh bean curd [tofu]–Sold as produce in plastic containers in a chunk covered with water. Keeps a week in the refrigerator with two or three water changes. (Don't buy dried bean curd, unless your recipe specifies it)."

A photo shows a man walking down South Wentworth Avenue with many Chinese signs and shops in the background.

3345. Knoblauch, Mary. 1976. Shopper in a strange land. *Chicago Tribune*. Sept. 16. p. D1.
• ***Summary:*** The biggest culinary rage in Chicago, next to eating Mandarin food out, is cooking it in. To start, you need a good cookbook, such as *The Chinese Cookbook*, by Craig Claiborne and Virginia Lee (1975, Lippincott). "You choose a recipe (or several) and make a shopping list–fresh ginger root, hot bean paste,... Szechwan pepper, fresh bean curd [tofu], fermented black beans, scallions..."

A large photo shows the inside of a Chinese grocery store and its grocer, Man Sun Wing Co., 2229 S. Wentworth Ave., Chicago.

3346. Greer, Gery. 1976. A look at traditional Japan. *Chicago Tribune*. Sept. 19. p. C13.
• ***Summary:*** The writer has traveled to Shirakawa-go, a picturesque and traditional village in the Sho River Valley,

© Copyright Soyinfo Center 2013

high in the Japanese "Alps." The huge thatched-roof houses, built 100 to 250 years ago, with their steeply sloping roofs, are built in the style called *Gassho-zukuri* ("fingertips held together as if in prayer"). Traditionally, the smoke and soot from each home's central sunken, open-pit fireplace coated and preserved the straw and wood, so that the thick roofs lasted 70 years. The houses were built without nails or hinges; the wood was fastened together firmly with wooden pegs and handmade ropes.

Each October the quiet village is transformed as throngs arrive for the annual *Doburoku Matsuri* ("moonshine festival"). "Doburoku is unrefined sake (rice wine) and it is thick, milky, and potent."

A visitor can stay at a *minshuku* (a private home turned into a sort of hostel) which is usually less expensive that a *ryokan* (traditional Japanese inn). The *minshuku* typically serves two meals. "Usually dinner will consist of one whole small fish cooked in soy sauce, various mountain vegetables and weeds, *miso* soup... with *tofu* (bean curd), *tsukemono* (Japanese 'pickles,' usually pickled cabbage, cucumber, and ginger), and rice.

Breakfast, which is almost identical, "includes a raw egg in place of the vegetables. Break the egg into the bowl provided, add soy sauce, beat slightly with your chopsticks and pour over the [steaming hot] rice"–which partially cooks the egg.

Note: The historic village of Shirakawa-gô, in Gifu prefecture of central Japan (northwest of Tokyo), is one of Japan's UNESCO World Heritage Sites.

3347. Erewhon, Inc. 1976. Erewhon. Autumn 1976. Boston, Massachusetts. 17 p. Catalog and price list.

• ***Summary:*** On the front cover is a photo of six adults and three children standing atop the Erewhon warehouse building at 33 Farnsworth Street in Boston. In the background are skyscrapers and the Boston skyline. The people are: Front row (left to right): Maureen Trail Young (sister of Rosemary Trail), Richard Young, Holly Young (youngest child), Tansy Young, Lori Young. Back row (left to right): David Simon, Jeanne Bleiweiss, Tom Herzig.

On the first page, Tyler Smith, writes about this catalog and upcoming events. "To help stimulate our customers, in the late Fall, Erewhon will present a lecture and demonstration day in both the New York and Boston areas which will feature as the main teacher, Mr. Bill Shurtleff, author of *The Book of Tofu* and *The Book of Miso.* He will be coming to this area on a lecture tour from Japan."

Contents: Grains. Cereals. Flour. Pasta. Juices. Beverages. Spring water. Natural sodas. Nik's snaks. Barbara's bakery. Bliss pastries (whole-grain, sweetened with unfiltered honey, made at Cable Springs Bakery). Donna's butter cookies, Butterchews, Lind's candy bars. Chico-San candies (Yinnies, Yinnies San-Wich). Crackers & Chips (incl. tamari corn chips or corn tortilla chips). Rice cakes & bread. Cheese. Butter. Yogurt. Kefir. Produce. Dried fruit. Seeds & nuts (incl. alfalfa seeds unsprayed, almonds, Brazils, cashews, peanuts, pecan halves, pistachios, pumpkin seeds, sesame–brown, sunflower seeds, walnuts). Granola. Beans (incl. aduki [azuki], organic black soybeans or yellow soybeans from New York, and black soybeans from Japan). Seed & nut butter (almond butter, cashew butter, peanut butter {Erewhon or Deaf Smith–crunchy, or unsalted}, sesame butter, sesame-peanut butter, sesame tahini, sunflower butter). Fruit butters. Oils: Erewhon oils, Arrowhead oils (incl. Soy oil). Condiments-sauces: Erewhon sauces (incl. 4 sizes of tamari soy sauce), Erewhon miso (kome {rice & soy}, Hacho {soy only}, or mugi {barley & soy}–each in 3 sizes), Erewhon Japanese imports (incl. shiitake mushrooms, barley kogi [sic, koji] to make mugi [miso], kuzu arrowroot powder, tekka seasoning, nigari (to make tofu), umeboshi), salt (incl. Herbamare salt, unrefined sea salt from France), olives, pickles, sauerkraut, brown rice vinegar (from Japan), Pure and Simple vinegar (Honey, red wine, apple cider natural), mulled cider spices. Baking (incl. barley malt syrup). Niblack's. Fearns [sic, Fearn's] (incl. Rich Earth wholewheat & soy pancake mix, Soya powder natural). Honey-syrup. Erewhon packages: Beans, grains & seeds (incl. soybeans yellow organic), hot cereals, flours (incl. soybean full-fat organic), baking. Arrowhead packages. Sea vegetables (agar-agar, hiziki [hijiki], kombu, nori, flavored nori with tamari, wakame, dulse). Fmali ginseng. Teas: Erewhon, Celestial Seasonings. Body care: Cattier clay, Dr. Bronner's, Natural Living, Nature's Gate, Orjene, Tom's, luffas. Cookware (incl. soy dispenser glass). Readables: Magazines, books, posters, flyers-recipes. Apparel. Discontinued–sale. New products (Bob Swanson was the former owner and creator of Llama, Toucan and Crow, a New England distributor; Chico-San's organic rice cakes).

Erewhon's New York / New Jersey office is located at 303 Howe Ave., Passaic, NJ 07055. Address: 33 Farnsworth Street, Boston, Massachusetts 02210. Phone: 617-542-1358.

3348. **Product Name:** Tofu.
Manufacturer's Name: Farm Food Company.
Manufacturer's Address: 820 B. St., San Rafael, CA 94901.
Date of Introduction: 1976. September.
New Product–Documentation: Shurtleff & Aoyagi. 1976. Sept. 29. Visited plant on Tofu & Miso America Tour. Shurtleff & Aoyagi. 1977. Jan. 28. Commercial Tofu Shops and Soy Dairies. David Sandler.

Update: 1997 Oct. 16. This company is now named FarmSoy Company, 96C The Farm, Summertown, Tennessee 38483. Phone: 615-964-7411. Contact: Barbara Elliott, vice president. They still make tofu and tofu products. This is the oldest existing Caucasian tofu manufacturer in the United States.

3349. Fearn Soya Foods. 1976. Soya is our middle name (Ad). *Mother Earth News* No. 41. Sept. p. 141. Also in No. 42. Nov. p. 119. In 1977, No. 43. Jan/Feb. p. 131, and No. 44. March/April. p. 151. No. 45. May/June. p. 121.
• ***Summary:*** The September ad contains a recipe for making tofu (soya bean curd) from Fearn Soya Powder. The November issue has a recipe for meatless granule loaf, using Fearn Soya Granules. "We have been in the business of making good foods with the good protein of soya for over 50 years. We have an extensive variety of soya products, and we're continually developing new recipes...

"Your natural food store has these Fearn Soya Foods products: Soya powder. Liquid lecithin. Soya granules. Soya protein isolate 96%. Soy/O wholewheat pancake mix. Soy/O buckwheat pancake mix. Soy/O triticale pancake mix. Soy/O unbleached pancake mix. Soy/O cornbread mix. Soy/O bran muffin mix. Soy/O rice baking mix. Soy/O wheat cereal & soya. QualiPRO 65% protein. QualiPRO natural flavor shake mixes." Address: Melrose Park, Illinois 60160.

3350. *Mother Earth News.* 1976. News from bill shurtleff and akiko aoyagi. No. 41. Sept. p. 44. Letter. [1 ref]
• ***Summary:*** "Bill Shurtleff and Akiko Aoyagi–talented authors of *The Book of Tofu* recently wrote to MOTHER and asked us if we'd pass along the following two announcements. First: In response to a gratifyingly large number of invitations, Mr. Shurtleff and Ms. Aoyagi will tour the U.S. this fall, giving special lecture presentations to natural food centers, student body organizations, clubs, etc .... and they'd like to hear from any such groups that would be interested in having them come and talk. According to Bill Shurtleff, 'At a typical two-hour program, we prepare a number of our favorite tofu and miso recipes for people to sample, teach others how to make tofu at home for 13¢ per pound, talk about the high-protein nutritional value of these fine foods, and discuss the important role they can play in helping to solve the world food crisis.' All Bill and Akiko ask of sponsoring organizations is a donation of one dollar per person-in-attendance, to cover expenses. Interested parties are encouraged to write to the address below."

"Second: Authors Shurtleff and Aoyagi are putting together a new volume–*The Book of Sea Vegetables...*" Address: New Age Foods Study Center, 790 Los Palos Manor, Lafayette, California 94549.

in dips & hors d'oeuvres, miso in spreads & sandwiches, miso dressings with salads, miso in soups & stews, miso in sauces, miso with grains, beans & tofu, miso in baked dishes, miso sautéed & simmered with vegetables, miso in grilled dishes, miso in deep-fried dishes, miso & eggs, miso in desserts, miso pickles, koji cookery.

Part III. The Preparation of Miso. 7. Making miso at home and in communities. 8. Japanese farmhouse miso (incl. miso-dama). 9. The traditional miso shop. 10. The modern miso factory.

Appendixes: A. A brief history of chiang, miso, and shoyu: Introduction, Chinese chiang, early Japan, the Nara Period (710 A.D. to 784 A.D.), the Heian Period (794 A.D. to 1160 A.D.), the Kamakura Period (1185 A.D. to 1333 A.D.), the Muromachi Period (1336 A.D. to 1568 A.D.), tamari–the forerunner of shoyu (Priest Kakushin returns to Japan from China, where he learned how to make Kinzanji miso, settles at Kokoku-ji temple near town of Yuasa, discovers tamari), miso during the Edo Period (1603 A.D. to 1867 A.D.), the development of shoyu the Meiji and Pre-war Periods (1867 A.D. to 1941 A.D.), modern times, transmission to the West.

B. The varieties of Chinese chiang, Korean jang and Indonesian Tao-tjo. C. The chemistry and microbiology of miso fermentation: Introduction, koji starter molds, making koji starter, making koji–the first fermentation, cooking the soybeans, preparing the miso–the second fermentation, the finished miso. D. People and institutions connected with miso: In Japan–Miso research scholars and institutes, exporters of natural miso and koji to the West, traditional or semi-traditional shops making natural miso, Japan's ten largest miso factories (gives the production in tons/year for several companies), other well-known miso makers. Makers of koji starter and koji, Japanese restaurants specializing in miso cuisine. North America–Miso research scholars and institutes, commercial miso makers, companies importing Japanese miso, koji, or koji starter, individuals interested in miso. Europe (Belgium, England, France, Germany, Holland, Italy, Portugal) and Latin America (Brazil, Costa Rica, Mexico, Venezuela). E. Miso additives. F. Miso with seafoods, chicken, and meat. G. Table of equivalents. H. So you want to study miso in Japan? Bibliography. Glossary. About the authors (autobiographical).

Note 1. This is the earliest English-language book seen (July 2000) that has the word "miso" in the title. It is also the first book in the Western world written entirely on the subject of miso.

Note 2. This is the earliest document seen (July 2000) that mentions "Hatcho miso" (spelled that way–which is now the correct romanization). Hatcho is a Japanese place name meaning (approximately) "Eighth Street."

Note 3. This is the earliest document seen (Sept. 2002) that contains industry and market statistics on individual miso companies.

Note 4. This is the earliest document seen (March 2009) that gives illustrated details about commercial miso production.

Note 5. An advertisement on the inside rear cover of the paperback edition of this book announced that the authors were preparing *The Book of Sea Vegetables.* That book was half researched and written but never published because of concern with pollutants in sea vegetables, and increased interest in soyfoods. Address: 790 Los Palos Dr., Lafayette, California 94549.

3353. Shurtleff, William; Aoyagi, Akiko. 1976. Tofu & Miso America Tour: 29 Sept. 1976 to 3 Feb. 1977 [Itinerary with two maps]. Lafayette, California: New-Age Foods Study Center. Unpublished manuscript.

• ***Summary:*** On 13 Sept. 1976 the authors bought a large, white 1975 Dodge Tradesman 300 van (used, with 40,000 miles on it). On one side Akiko painted in large, bold letters "Tofu and Miso America Tour 1976-77." Their *Book of Tofu* had been published in December 1975 and *Book of Miso* on 23 Sept. 1976. On Sept. 29 they packed the van full to the ceiling with their books on tofu and miso, plus Larry Needleman's tofu kits–and departed. In the van was an itinerary of hosts and places to which they had been invited and the route drawn on a large map of the USA.

This trip had four main purposes: (1) To introduce tofu and miso to America; (2) To introduce people to the many benefits of a meatless / vegetarian diet; (3) To encourage people to start soyfoods companies, especially tofu shops; and (4) To promote the authors' newly-published *Book of Tofu* and *Book of Miso.*

This itinerary includes the name and address of 64 people and organizations visited. Many of these were pioneers in the soyfoods and natural foods movements: Sept. 29–David and Kathleen Sandler, Robert Dolgin, Don Wilson, Farm Food Co. (San Rafael, California; we observed and recorded in detail how Don Wilson made tempeh and tempeh starter / inoculum at Farm Food Co.). Oct. 1–Petaluma, California. Oct. 2–Josephine County Food Center, Grants Pass, Oregon. Oct. 3. Heliotrope Natural Foods (Salem, OR). Oct. 4–West Bank Cafe (Corvallis, OR). Oct. 5. Visit Linda Shurtleff (McMinville, OR). Visit *Rain Magazine* (Portland, Oregon). They do an interview which is published in their Nov. 1976 issue. Oct. 6. Blake Rankin and Janus Natural Foods (Seattle, Washington). Oct. 7. Janus. Oct. 8–Luke Lukoskie and Sylvia Nogaki of Island Spring (Vashon, Washington). Oct. 10–Jack Grady, a macrobiotic (Spokane, WA). Oct. 13–Univ. of Minnesota. Oct. 14–Georgie Yiannias of Wedge Food Co-op and Ananda Marga (Minneapolis, Minnesota). Our largest class with 300 people. Oct. 15–Barbara ("Bobbie") Reinhardt Shurtleff dies of colon cancer at Alta Bates Hospital, Berkeley, CA. Oct. 15. Famine Food Co-op (Winona, Minnesota). Oct. 16–Bonnie Maroney of The Wisconsin Farm (Ettrick, WI). Oct. 19–Visit George Strayer and Larry Krueger of the American Soybean

© Copyright Soyinfo Center 2013

Assoc. (Hudson, Iowa). Visit David and Ann Tucker (Iowa City, Iowa). Oct. 20. Outpost Natural Foods (Milwaukee, WI). Visit Bountiful Bean Co-op. Oct. 21. Visit Dr. Danji Fukushima and Kikkoman Foods (Walworth, Wisconsin). Oct. 22–Visit Drs. Hesseltine, Wang, Wolf, Mustakas, Cowan at Northern Regional Research Center (Peoria, Illinois). Oct. 23–Morning class on commercial production for Les Karplus and 5 people at Vegetarian Incorporated (Urbana, Illinois). Oct. 23-24. Side trip to visit ADM and Staley (Decatur, IL). Oct. 24–Les and Debbie Karplus of Vegetarian Inc. (Urbana, IL). Oct. 25–Visit Dr. L.S. Wei of the Univ. of Illinois Dept. of Food Science (Urbana, Illinois). Evening program for Karplus in Urbana. Oct. 26. Purdue University (Indiana). Oct. 27–Chris Steele (Lansing, Michigan). Oct. 28–Mike Potter and Louis Howie of Eden Foods (4601 Platt Rd., Ann Arbor, Michigan). Oct. 29–Calico Market (Erie, Pennsylvania). Oct. 30–Visit Greg Weaver and Jay Thompson of Rochester Zen Center (Rochester, New York; Later Northern Soy). Visit Genesee Co-op. Oct. 31–Alternative Health Education Center (Rochester).

Nov. 1–Visit Arnold Karmody at Empty Cloud (Canandaigua, New York). Meet Dr. Keith Steinkraus (Geneva, New York). Nov. 2–Visit with Dr. Steinkraus at New York Agric. Exp. Station (Geneva, NY). Lunch together with his wife, Maxine. Nov. 3–Tom MacDonald at Hannibal, New York. Nov. 4–Ira and Kathy Leviton of Corncreek Bakery (South Deerfield, Massachusetts). Visit Laughing Grasshopper tofu shop just before it begins operation. Nov. 5–Fritz Hewitt of Common Ground Restaurant (Brattleboro, Vermont). Visit Tom Timmins of Llama, Toucan & Crow (Brattleboro). Nov. 6. Shep Erhard (Franklin, Maine). Nov. 7–Ann S. Johnson, assistant manager of dining halls, Univ. of Maine (Orono, ME). Nov. 8–Visit Marine Colloids (Rockland, Maine). Nov. 10–Drive to Boston, stay with Nahum & Beverly Stiskin (Brookline). Nov. 13–Tofu & Miso program in Boston. Visit Erewhon Natural Foods (33 Farnsworth St., Boston, Massachusetts), Martha Trundy, Jeffrey & Gretchen Broadbent. Nov. 14–Visit to shops in Boston's Chinatown. Michio and Aveline Kushi give a big party in our honor at their home at 62 Buckminster Rd., Brookline, then take us out to dinner at the Seventh Inn. Nov. 15–Tofu-making class at a home in Boston. Nov. 17–Visit offices of *East West Journal.* Sherman Goldman conducts long interview, later published in Jan. 1977 issue. Misomaking class at home of Ken Burns. Nov. 18–Visit Joel Wollner in Cape Cod. Nov. 19–Radio show then program for Joel. Nov. 20–Peter Smith at Quaker group in Pennsylvania. Nov. 22–Visit Woods Hole, Massachusetts to study sea vegetables. Evening program at New Bedford, MA. Nov. 23–Stay with Seung Sahn, Sa Nim at Providence, Rhode Island Zen Center. Meditate and show students how to make tofu. Evening at Insight Meditation Center, Barre, MA, a Vipassana center in a former Catholic seminary, co-founded in 1976 by Jack Kornfield, Joseph Goldstein and 3 others. We have dinner, meditate with the sangha, and hear Jack talk about Vipassana. Nov. 24 Sit morning zazen with master and students at Providence zendo. Nov. 25–Thanksgiving. Akiko and I stay alone in a house near Hartford, Connecticut and taste a good tofu pumpkin pie. I read about seaweeds. We take a long walk in the countryside. Nov. 26–Program for Erewhon Natural Foods in Hartford (stay with Maria Orefice, owner of Garden of Eating restaurant in Hartford). Article in *The Hartford Courant* (Dec. 1). Nov. 27–Long River Food Coop in Connecticut. Nov. 28–Stay with Susan and Kirk Gershuny of Snowflower (Tivoli, New York). They plan to make soy ice cream soon. Nov. 29–Drive in Deep snow to the New York Farm in Franklin, New York. Stay in a big house they built. Nov. 30–Carl Bethage of the East West Center in Gardiner, New York. Also did a radio program.

1976 Dec. 1–Visit Frances Moore Lappé at her upstairs office in Hudson-on-Hastings, New York. Then visit her large home on the hillside. Dec. 1-5–We missed a program for Annemarie Colbin in New York City (partly because we feared our van would be burglarized on the street) so we stayed Dec. 1-5 at the luxurious home of Leo S. Nikora (Niki; Bobbie's friend). I work on writing *The Book of Kudzu.* Dec. 6-7. Program for 40 people (Hosts: Nancy N. Bailey and Robert Rodale) at Rodale Press (Emmaus, Pennsylvania); I am surprised they serve white sugar on their dining tables. Dec. 8–Tim Snyder of Ecology Co-op in Philadelphia. Dec. 9–Stay at home of Sylvia Anderson in Pleasantville, New Jersey and do a program upstairs in a modern university. Study magnificent photos of Native Americans by Edward S. Curtis. Dec. 10–Visit Jay and Freya Dinshah of the North American Vegetarian Society (Malaga, New Jersey); their poor vegan child has bowed legs. Dec. 12–Cindy Blouse in Dallastown, Pennsylvania. Dec. 13–Visit Laurelbrook Foods, a natural foods distributor in Forest Hill, Maryland. We meet Rod and Margie Coates. Dec. 14–Big program hosted by Ella May Stoneburner and Seventh-day Adventists near Washington, DC. Dec. 15–Michael Rosoff (who ran the East West Center in Washington, DC) planned to host a class in a DC church. After we witness a robbery, we are afraid to leave our van on the street. So we do a scaled-down program in the home of Murray and Pam Snyder, which was the East West Center in Baltimore, Maryland. Visit Laurelbrook Foods Warehouse #2 in Durham / Chapel Hill. Dec. 16–Roanoke Food Co-op in Copper Hill, Virginia. Dec. 17-18–John Shuttleworth and Jim Morgans of *Mother Earth News* (Hendersonville, North Carolina). They do a long interview and take photos. Program at night. Note: An audio tape of Bill's talk at this program is filed with Soyfoods Center documents for 1976. Dec. 19–Chandler Barrett in Atlanta, Georgia.

Dec. 28 & 29–Workshop on tofu and miso at East West Foundation, Coconut Grove, Florida. Not on written schedule, but shown in two published articles. Handwritten trip notes show: "Dec. 27-29. Heartsong, Miami. Bob &

© Copyright Soyinfo Center 2013

Toni Heartsong, 6051 S.W. 46th Terrace, Miami, FL 33155. Was this also related to Mary Pung, who flew from Florida to attend one of the programs on our tour? At the time, she invited us to come to Florida–which was not on our planned route.

Note 1. This is the earliest document seen (April 2013) concerning the work of Ira Leviton or Tom Timmins with soy. One evening, before Shurtleff was scheduled to speak at Leviton's Corncreek Bakery, Leviton drove Shurtleff to see the Laughing Grasshopper Tofu Shop which was under construction on the second story of an old wooden building in the nearby town of Millers Falls, Massachusetts. Much of the equipment was made out of wood–including wooden curding vats and a wooden cider press. The company opened in Jan. 1977.

Note 2. This is the earliest document seen (April 2006) concerning Llama, Toucan & Crow in Brattleboro, Vermont.

Note 3. This is the earliest document seen (May 2006) concerning the forerunners of United Natural Foods, Inc. (INFI)–in the form of Llama, Toucan & Crow. Address: 790 Los Palos Manor, Lafayette, California 94549. Phone: 283-3161.

3354. Shurtleff, William; Aoyagi, Akiko. 1976. Excerpts from *The Book of Tofu:* Making tofu at home. *Mother Earth News* No. 41. Sept. p. 40-44. [1 ref]
• ***Summary:*** The third in a series of excerpts from this book. Gives a detailed description, with 14 illustrations, of how to make tofu at home. 1 cup of soybeans makes 22-26 ounces of tofu. One sidebar gives a brief history of tofu, and another notes that Shurtleff and Aoyagi are planning a USA tour this fall to speak about tofu and miso. Address: 790 Los Palos Dr., Lafayette, California 94549.

3355. Shurtleff, William. 1976. New-Age Foods Study Center: Basic purposes and activities (Leaflet). Lafayette, California. 1 p. Single sided. Sept. 28 cm.
• ***Summary:*** "1. To work toward creative, low-cost solutions to the present world food/protein crisis by doing basic research and writing books... Our special interests include soybean products (tofu, miso, tempeh, shoyu, etc.), sea vegetables, whole-grain bread, and kuzu.

"2. To aid in the spread of the ideas found in our writings by regularly responding to invitations from any part of the world to do lecture/demonstrations and cooking classes."

3. To encourage the adoption of meatless and vegetarian diets which help make the best use of the planet's precious food resources, are low in cost, conducive to the development of a healthy body and clear mind, kind to animals, and ecologically sound.

"4. To encourage people in the West to begin commercial or community production of tofu, miso, and tempeh...

"5. To provide centers where people can come to learn more about our work and to begin their own study of basic important foods. In Japan, we assist people in studying with tofu- and miso masters..."

"6. To work actively to promote the key concept of food self-sufficiency and simpler, low-cost lifestyles that are harmonious with the needs of the planetary ecosystem. Likewise to encourage deeper understanding of selfless service, and of daily life and work as a spiritual practice.

"7. To provide a catalog of publications and materials related to our work. We invite you to contact us and we hope we may be of service to you." Address: New-Age Foods Study Center, 790 Los Palos Dr., Lafayette, California 94549. Phone: (415) 283-3161.

3356. Shurtleff, William; Aoyagi, Akiko. 1976. Tofu & Miso America Tour: 29 Sept. 1976 to 3 Feb. 1977. Continued from Jan. 1977. [Itinerary with two maps]. Lafayette, California: New-Age Foods Study Center. Unpublished manuscript.
• ***Summary:*** Continued: 1976 Dec. 21. Arrive at The Farm in Summertown, Tennessee. Meet Margaret Nofziger and Stephen Gaskin. Stay until 2 Jan. 1977. We stayed most of the time at "Hoot Owl Hollow," a large community owner-built home with many families; our host was Edward Sierra. During the next few weeks we stayed in a parked mobile home (owned by the Sandlers) in a lovely valley about 1 hour drive away. I worked on *The Book of Kudzu* final draft. Heavy confrontation with Farm folks–as I am about to start a program–about how they didn't like my way. Write a 4-page pamphlet titled "What is Tempeh?" jointly with Cynthia Bates. 1976 Dec. 31–This is our first year with significant income ($27,390, mostly from Autumn Press royalties) but no profit. During 1976 thirty articles and book reviews about our work with tofu and miso were published in magazines and newspapers in the USA and Japan.

1977 Jan. 2–Our Tofu & Miso America Tour continues. Jan. 3–Stay in a suburban home with Lynn Delacruz in Meridan, Mississippi. Jan. 4–Program for Atlantis Distributors in New Orleans. That night we stay in a trailer home with John and Katherine Gabriel in Houma, Louisiana. They are from The Farm and make commercial tempeh in their trailer. Jan. 6–Jim Baker (Dallas, Texas). After the program I meet Dr. Ralph Sand who is studying tofu and soy cheeses at Anderson Clayton. We also visit with my cousin, Bob Shurtleff, near Dallas. Jan. 7–Jane Binante in Denton, Texas. Jan. 9–Jim Hemminger of Gregg St. Tofu Co. (started by Thom Leonard) in Fayetteville, Arkansas. His partner is Mary Weingartner. We sleep on the floor of a small house in Fayetteville and the next morning see Jim make tofu in a bathtub. Jan. 10–East Wind in Tecumseh, Missouri. Jan. 12–Stay with Robert Nissenbaum (a fine, humble fellow) in St. Louis, Missouri. I finish typewritten manuscript of "What is Tempeh?" Jan. 13–Program at a restaurant, The Sunshine Inn (St. Louis). Sponsored by The Ethical Society. Stephen

© Copyright Soyinfo Center 2013

Uprichard, Dale Deraps, and Robert Nissenbaum are there.

Jan. 15–Meet David and Danette Briscoe (Kansas City, Missouri; they soon start publishing *Soycraft*, a small periodical on soyfoods), dinner with Thom Leonard at his home in Lawrence, Kansas (we have miso soup with miso that Thom made, then do a big program sponsored by the Mercantile Community Co-op in downtown Lawrence at either the Lawrence Library or Community Center–in a big downstairs room. I tape the lecture. Unbeknownst to me, Ken Bader, CEO-to-be of the American Soybean Assoc., is in attendance). Jan. 16–Visit Bob Amelay of the Omaha Food Co-ops in Omaha, Nebraska. Jan. 17–Drive across Nebraska to Denver. Jan. 18-19–Dave Bolduc and Christie Shurtleff in Boulder, Colorado. The first night we do a big tofu program in the historic Boulder Theater. That afternoon we have an audience with the Karmapa–a high Tibetan spiritual leader, who has diabetes; we give him an inscribed hardcover copy of *The Book of Tofu.* Akiko recalls cooking tofu burgers for him. That evening in a large, packed hall, we witness his Holiness conduct the Black Crown Ceremony. Jan. 20. Jimmy Carter is inaugurated as president. Jan. 24–Program for The Colorado Farm in Hotchkiss, Colorado–way out in the boondocks. Jan. 25–Stay with Andrea Chin in Taos, New Mexico. Visit Lama Foundation high above Taos in the snow (Steve Durkee, teacher). They have many small meditation cubicles around the hillside and have just finished a nice adobe meditation hall. Near Durango, Colorado, we visit Ed Tripp, who looks lonely, sad and desolate, farming a little patch of organically grown wheat and living alone in a bare shack on coffee and cigarettes. Jan. 26. We stay somewhere in New Mexico. Jan. 27–Program at the First Unitarian Church in Albuquerque (79 p.m.) hosted by Michele E. Martin of Jemez Bodhi Mandala Zen Center, Jemez Springs, New Mexico. Sit meditation in their cold Rinzai zendo then soak in the hot springs outside in the snow. Their teacher, Sasaki roshi, is not there. Jan. 28–Susan Berry in Silver City is supposed to host a program. We cannot find her house. At one point along in here we do a program in or near Utah in a remote church up on a little bluff. Dinner before at Frosty Hot Dog place. Jan. 29–Long drive across Arizona to San Diego. Jan. 30–Big program in San Diego for 350 people at the Ocean Beach Community School hosted by David and Barbara Salat, publishers of *Well Being* magazine. Afterwards we stayed overnight on their houseboat in San Diego Bay. Magical. Akiko had a bad cough and was very tired.

In Los Angeles we spend a day (in late January or early February 1977) with Lewis Headrick and Jimmy Silver visiting three small tempeh shops: Bali Foods (in Baldwin Park, run by Mr. Henoch Khoe), Country Store Health Foods (in Sun Valley; Joan Harriman), and Toko Baru (in West Covina; Randy Kohler). One evening we had dinner with Mr. Yamauchi and perhaps Al Jacobson. I gave a presentation on tofu. Afterwards, in the parking lot, Mr. Yamauchi gave me an envelope containing several hundred dollars in bills–his way of saying thank you for the work we were doing on behalf of tofu. Feb. 1. Drive to northern California, then have dinner at the home of Herman and Cornellia Aihara (Oroville, CA). Feb. 2. Last program of the tour for Harold Lockhard of the Sacramento Natural Foods Co-op (Sacramento, California; Program is in a modern college building).

On 3 Feb. 1977 arrive home in Lafayette, California.

On this 4-month tour the Shurtleffs, trying to do for soyfoods what Johnny Appleseed did for apples, presented 70 public programs attended by about 3,646 people, did many media interviews and appearances, and travelled 15,000 miles. They had a gross income of $18,020 from honoraria and sales of their books (Book of Tofu, Book of Miso), tofu kits, pamphlets, and nigari. Total trip expenses were about $5,361 plus about $7,200 for books from the publisher, leaving a net income of about $5,459. It was a huge, challenging, and exhausting Odyssey that bore abundant fruit in the founding of a new tofu shop almost everywhere they spoke.

1977 Feb. 9–Meeting in Lafayette (790 Los Palos Dr.) with Robert Dolgin and David Sandler (from the Farm and Farm Foods in San Rafael) and Larry Needleman leads to the establishment of Bean Machines, Inc. (BMI). The Farm places a firm order for a Japan tofu system.

1977 Feb. 12–Bill and Akiko leave America and fly to Japan. Air fare paid by Hydrometals. Address: 790 Los Palos Manor, Lafayette, California 94549. Phone: 283-3161.

3357. Shurtleff, William; Aoyagi, Akiko. 1976. Tamari (Document part). In: William Shurtleff and Akiko Aoyagi. 1976. The Book of Miso. Hayama-shi, Kanagawa-ken, Japan, Soquel, California, and Brookline, Massachusetts: Autumn Press. 256 p. See p. 50, 219-21. Sept. Illust. by Akiko Aoyagi. Revised ed. 1981. New York, NY: Ballantine Books, 620 p. [60 ref]

• ***Summary:*** In Chapter 5, "Getting started," in the section on "Basic ingredients," is a subsection titled "Tamari" which states (p. 50): "A close relative of shoyu, tamari is prepared from a koji which contains only soybeans and no wheat; it has a distinctive, slightly strong flavor and aroma, a dark brown color, and a fairly thick consistency. Produced either as a byproduct of tamari miso (p. 44) or as a food in its own right, it is now rarely used in its natural form, being generally made into *sashimi-damari* by mixing it with miso-damari (see below), *mizuamé*, cane sugar, caramel, and often preservatives. Although not widely used in Japan, it remains fairly popular in Kyoto and central Japan, where it is used as a seasoning for *sashimi* (raw fish). In ancient times tamari was widely used in its natural form and highly prized as a fine seasoning, having much the same flavor as a best-grade Chinese soy sauce. Today, an increasing amount is made synthetically.

© Copyright Soyinfo Center 2013

"*Miso-damari*–also called *uwahiki*–is the tamari-like liquid that accumulates in *any* variety of miso during fermentation. Thicker and richer than tamari, it is gathered only in very small quantities and is not sold commercially. A delicious by-product of most homemade miso (it rises to the surface in summer and settles in winter), it may be used like shoyu and is especially delicious with hors d'oeuvres.

In "Appendix A: A brief history of chiang, miso and shoyu," is a section (p. 219-21) titled "Tamari: The forerunner of shoyu." Address: 790 Los Palos Dr., Lafayette, California 94549.

3358. Shurtleff, William; Aoyagi, Akiko. 1976. The book of miso (Illustrations–line drawings) (Document part). Hayama-shi, Kanagawa-ken, Japan, Soquel, California, and Brookline, Massachusetts: Autumn Press. 256 p. Sept. Illust. by Akiko Aoyagi. [60 ref]

• ***Summary:*** Continued: Illustrations (line drawings, both numbered and unnumbered) show: The two Japanese characters for miso. Three men "Putting Hatcho miso to bed" by piling nearly round river stones on top of a huge vat; the pyramid shape makes the pile earthquake proof. A child holding a sheaf of grain. A round *zaru* (woven split bamboo tray) with a circle of salt in the middle. A square wooden measure (*isshô-baku*) filled with soybeans. The top of rice and barley plants showing grains and leaves. A wooden vat of red miso tied with rice-straw ropes. A miso maker standing by large wooden vats of two different sizes, with braided bamboo hoops. A well stocked miso shop in Japan (at Kichijoji train station, Tokyo). A woman standing behind two deep earthenware crocks filled with miso; balls of miso are in a basket. A sunken open-hearth fireplace (*irori*) in a traditional Japanese farmhouse with a pot hanging over the coals on a hook (*jizai kagi*) and tofu dengaku being grilled around the coals, their skewers stuck into the ash.

Nine wooden kegs of different kinds of miso piled up on 3 levels. A field of soybeans planted in rows. A hand holding soybeans pods still attached to the stem. A soybean pod split open to show the beans. (1) Bar chart of protein from different sources vs. protein returned. (2) Diagram of energy flow through two different food chains, one with a steer in the middle, the other with direct consumption of soy and grains. (3) Development aid from affluent nations as a percentage of GNP (1960-1971). Stylized soybean plant growing out of a stylized Planet Earth. Miso gift pack, with poly bags of rice, barley, and Hatcho miso. A Japanese pipe *kiseru.* (6) Graph of intestinal cancer vs. meat consumption among females in selected countries; the more meat consumed, the more cancer. Miso aging (from *Miso Daigaku*). (7) The varieties of miso and their characteristics (full-page table). (8) The percentage of salt in different miso varieties.

(9a) Map of Japan showing where the different types of miso originate. (9b) Map of Japan showing geographical miso preferences. A head of rice. (10) Famous sub-varieties of salty rice miso. Two heads of barley. Table about two types of barley miso. Two sets of soybean leaves with pods. Table about three types of soybean miso. The Japanese characters for Hatcho Miso. (11) A wooden sign in a Hatcho miso office: "Supplier to the Imperial Household." (12) Two cross-section views of a tamari miso vat. A small pottery crock of sweet simmered miso (*Nerimiso*). Packages of different types of modern miso: Peanut miso, akadashi miso, low-salt, high protein miso, Instant miso soup with dried frozen tofu, leeks, wakame. (14) Different types of miso packaging, both traditional and modern. A sample miso label. (13) Varieties of miso available in the West, plus characteristics of each. Squeezing a bean of miso out of the cut corner of a plastic bag. Three different shoyu containers. Six different types of tofu on a cutting board. (15) Oriental kitchen tools (utensils; full page). A small crock of salt with a wooden spoon in it.

Suribachi and modern sesame seed grinder. Tofu preparatory techniques. Broiling tofu with chopsticks on a broiling screen. Four forms of kombu. Two stylized crossed sheaves of rice. A traditional farmhouse kamado (raised earthenware cooking area). Pottery crock. Black and white sesame seeds and plant. Yuzu. Sprig of kinome. Head of garlic. Two burdock roots. Two leeks (*negi*). Making broiled miso. Hoba miso. Kaiyaki miso. Yubeshi miso. Wakame plant. A bowl of miso soup. A woman drinking hot miso soup next to a vending machine. Vegetables cut for miso soup (*mi* or *gu*). Table of the most popular ingredients in miso soup. How to make miso soup at home (4 views). Miso-koshi (woven bamboo strainer). Mad monks grinding miso. (19) Full-page table of miso soup throughout the four seasons. Shiso / beefsteak leaves. Kabocha. Daikon. Irori and jizai kagi (sunken farmhouse fireplace and overhead hanging hook). Woman serving miso by a sunken / open hearth fireplace. Woman kneeling, grinding miso with a pestle (*suri kogi*) in a *suribachi* (serrated earthenware mortar / mixing bowl).

(20) Rice patties with nori (*o-musubi, o-nigiri*). Bamboo noodle tongs. Homemade noodles in a pot. (21) Broiled mochi wrapped with nori. (22) Steamed tofu. A Chinese cleaver, with its tip stuck into a chopping block. Cultivated shiitake mushrooms growing on a log. Kabocha. Daikon. (23) Miso oden. Doténabé [Dotenabe]. Konnyaku twists. Dengaku Hoshi. Tofu dengaku (2 pieces, skewered; 3 pieces skewered in a box). Japanese eggplant (*nasu*) scored and Shigiyaki. Deep-frying with a wok. Lotus root stuffed with miso. (24) Deep-fried sandwiches. (25) Gashouse eggs. (26) Layered omelets. Japanese bamboo steamer. Kashiwa mochi. Selling miso pickles. Two pickling containers. (27) Salt-pressing. Air-drying daikon and turnips (*kabu*). Miso pickles with tea and chopsticks. Amazaké at the Nakamura-ro restaurant.

Note: This is the earliest English-language document

© Copyright Soyinfo Center 2013

seen (July 2012) that uses the term "Amazaké" to refer to amazake.

How to make miso at home: Utensils, ingredients, and process (7 figures). (29) Miso fermentation crocks. Corona hand-mill. Soft mat koji.

(30) Proportions by weight of basic ingredients for various homemade misos; full-page table. (32) Utensils for homemade koji and koji starter. (33) Miso flow chart. (34) Composition of nutrients in 100 gm of basic miso ingredients. (35) Process for homemade rice koji (9 figures). (36) Graph of changes in koji temperatures. Woman leaning over miso vat.

Japanese farmhouse miso: Traditional country farmhouses (2 views). Raised farmhouse kitchen hearth, caldrons and earthenware dais (*kamado*). (38) Farmhouse floor plan. A kura (family treasury and storehouse). Two bamboo colanders. Pounding miso at Suwanose. Making miso in a traditional farmhouse (9 figures). Farmhouse soybean miso made with *miso-dama* (miso balls) (5 figures).

3359. **Product Name:** Contract for services as a manufacturers representative (independent contractor). **Manufacturer's Address:** Box 76, Bodega, CA 94922. **Date of Introduction:** 1976. October.
New Product–Documentation: "The agreement, made this ___ day of October, 1976 by and between The Learning Tree, a single proprietorship, hereinafter referred to as Manufacturer, and William Shurtleff, hereinafter referred to as Representative."

"2. Representative is and shall be an independent contractor, and not an employee or Manufacturer.

"3. Manufacturer shall not be liable to Representative for any expenses incurred by him or for any of his acts except as specifically required by law, nor shall Representative be liable to Manufacturer for the costs of its independent operation.

"4. This contract, and the association created thereby, may be terminated by either party at any time upon fifteen (15) days written notice sent to the last known address of the other party.

"5. Initial retail orders–Representative shall sell one (1) sample Tofu Kit to each retailer at $7.77 per kit. Manufacturer shall pay, on demand, $4.18 per retail sample sold to cover Representatives loss of profit on each retail sample. Representative shall take initial retail orders and collect $7.77 per kit sold. Representative shall forward retail order plus $6.31 per kit sold to Manufacturer in self addressed, stamped enveloped supplied by Manufacturer. Minimum retail order per store shall be six Tofu Kits.

"6. Distributor Accounts–Representative shall present two (2) of the Manufacturers business cards to each prospective distributor. Representative shall also sell each prospective distributor two (2) sample Tofu Kits at $6.00 each. Representative will inform distributors that they may place minimum orders for twenty four (24) Tofu Kits at six dollars ($6.00) per kit plus freight from the Manufacturer.

"Except for large, well-known distributors doing over two million dollars in gross sales per year, all orders are to be prepaid, freight collect. In the case of large, well-known distributors, terms are: net seven (7) days, freight collect. Representative shall receive a twenty (20) dollar finders fee, payable on demand, for each distribution account set up as described above; plus twelve (12) dollars per account as compensation for profit loss on samples.

"7. If Representative purchases merchandise from the Manufacturer he shall keep all monies accrued from wholesale or retail sale of said merchandise.

"8. In the event of any dispute regarding this contract or the performance thereof, it is agreed that the law of the State of California shall control the dispute and that the proper forum for the dispute is and shall be the Courts of the State of California

"Agreed to and Accepted:" Signed: Larry Needleman, The Learning Tree, 10/5/76.

3360. Liener, Irvin E. 1976. Nutritional aspects of soy protein products. In: Archer Daniels Midland Co., comp.

© Copyright Soyinfo Center 2013

1976. Edible Soy Protein Seminar. Decatur, Illinois. 220 p. See p. 13-85. Held in 1976 at Moscow, USSR and Warsaw, Poland. [265 ref]
• ***Summary:*** Contents: Nutritional value of the protein of individual soy products: General considerations, soybeans as a vegetable, soyflour, soybean milk, soybean curd, protein concentrates, protein isolates, fermented products. Blended soy products: Blend with wheat protein, blend with corn protein, blend with rice, vegetable-protein formulations, soy protein as meat extender. Textured meat analogs. Nutritional value of non-protein constituents: Available energy, crude fiber, vitamins (fat-soluble vitamins, water-soluble vitamins), minerals (calcium, phosphorus, zinc, other metals). Antinutritional factors: Heat-labile factors (trypsin inhibitor, hemagglutinins, other heat-labile factors), heat-stable factors (saponins, estrogens, flatulence factors, lysinoalanine). References. Tables.

Concerning lysinoalanine (p. 58-59): "Sternberg et al. (1975) have recently shown lysinoalanine to be widely distributed in cooked foods, commercial food preparations, and food ingredients, many of which had never been subjected to alkaline treatment. Many of these foods had levels of lysinoalanine which were considerably higher than those found in commercial samples of soy protein isolate. The wide distribution of lysinoalanine among commonly cooked foods would tend to indicate that" this is neither a novel protein nor a serious problem, as some humans have long been exposed to proteins containing lysinoalanine with apparent impunity. "Its presence in soy protein can hardly be considered a serious problem for man." Address: Dep. of Biochemistry, Univ. of Minnesota, St. Paul, MN 55108.

3362. Robertson, Laurel; Flinders, Carol; Godfrey, Bronwen. 1976. Laurel's kitchen: A handbook for vegetarian cookery and nutrition. Nilgiri Press, Box 477, Petaluma, CA 94952. 508 p. Oct. Foreword by George M. Briggs, Prof. of Nutrition, Univ. of California, Berkeley. Illust. Index. 24 x 20 cm. Bantam Books pocketbook ed. Dec. 1978. 641 pages. [45 ref]
• ***Summary:*** One of the best, most original, and most influential books of lacto-ovo vegetarian recipes and nutritional information published during the 1970s. Handsomely illustrated with woodcuts by Laurel, this classic is divided into three parts: Part I, "Giving the Gift of Life (p. 10-62), is by Carol Flinders, a superb writer who majored in creative writing at Stanford University. It begins with her preface and a dedication that reads: "This book is dedicated

© Copyright Soyinfo Center 2013

to the glossy black calf on his way to the slaughterhouse many years ago, whose eyes met those of someone who could understand their appeal and inspire us, and thousands of others like us, to give the gift of life." The first section describes how one woman, Laurel, made the transition from Sloppy Joes to vegetarian culinary and nutritional mastery. The second section, "The Keeper of the Keys, talks about alternate and traditional roles for women in the home and society.

Part II is recipes and menus (p. 65-297). Pages 66-69 introduce "The Four Food Groups": 1. Grains, legumes, nuts, & seeds. 2. Vegetables. 3. Fruit. 4. Milk & eggs. The "Four Food Groups for the Vegan" (p. 320-24) are grains-nuts-seeds, legumes, vegetables, and fruit.

Part III, "Nutrition for a Meatless Diet" (p. 298-486) is one of the best sources available on vegetarian nutrition. Of special value are the extensive tables on nutrient composition of foods, which include vitamins and minerals; they are up to date and well documented. A 22-page index adds to the books usefulness.

Soybeans and soy products are praised as an excellent source of low-cost high quality protein (p. 69). Pages 82-83 give details on soy flour (full-fat) and soy powder.

Soy-related recipes include: High protein bread (with soy flour, p. 91). Pumpernickel (with soy meal, p. 92). Soy bread (with cooked whole soybeans or soy grits, p. 92-93). Pine nut pinwheels (with Soy Spread, p. 97). Breakfast beans (p. 122). Better-Butter (p. 123, a blend of 1 cup each vegetable oil and butter plus 2 tablespoons each water and dried skim milk, ¼ teaspoon lecithin, and ½ teaspoon salt). Soy milk (basic information and how to make at home using the Cornell method, p. 134-36). Sandwich ideas (incl. Soy burgers, Tofu patty, Soy Pâté, p. 138). Soy spread (p. 140). Tofu-peanut butter spread (p. 141). Minestrone (p. 166). Creamy green soup (p. 170). Stuffed peppers (with soy grits, p. 202). Chinese vegetables & tofu (p. 217). Soybean stock (p. 224). Soy stock gravy (p. 229). Zucchini oat-flake loaf (with soy meal, p. 243). Vegetable bean noodle bake (with soybeans, p. 245). Beans (p. 257-60). Savory dinner loaf (with soy grits, p. 265). Soy burgers (p. 266). Neat balls (with Soy spread, p. 266). Tofu patties (p. 267).

Pages 299-486 are about nutrition for a meatless diet. Information on soy is given on pages 307, 322-24, 381 ("Soybean protein is a complete protein; its amino acid pattern conforms closely to that of milk."), 460 and 463-64 (tables of nutritional composition). Address: California.

3363. *Soybean Digest.* 1976. Book review: *The Book of Tofu* by Shurtleff and Aoyagi. Oct. p. 29. [1 ref]
• ***Summary:*** The distinctive qualities that make tofu "the single most important soy food for more than 1,000 million people" are discussed by authors William Shurtleff and Akiko Aoyagi in *The Book of Tofu.*

"*The Book of Tofu* shows tofu to be the answer that millions of nutrition and cost-conscious people have been searching for. Natural and inexpensive, it makes fullest use of the earth's nutritional resources–and offers a revolutionary, yet simple, approach to meeting the world's critical food requirements.

"Included in the book are 500 recipes that demonstrate tofu products to be versatile enough to become indispensable ingredients in many Western-style dishes including dressings, spreads, dips, salads, casseroles and desserts." The book can be ordered from *Soybean Digest.*

3364. McCormick, Sally. 1976. Kowloon Restaurant: Fine Cantonese food in an Oriental setting, 2223 S. Wentworth Avenue, Chicago (Ad). *Chicago Tribune.* Nov. 6. p. S15.
• ***Summary:*** This apparent restaurant review is actually an advertisement–or what would later be called an advertorial. This restaurant serves many authentic Cantonese dishes including "Fresh shrimp in garlic sauce with black beans," a wide choice of chop suey and chow mein, "Seaweed soup for two,... Dow Foo (Beancake) Soup and many more." Four photos show different views of the restaurant. Note: The black beans are probably black soy beans, and most likely fermented back soybeans.

3365. United Press International (UPI). 1976. Tofuburgers in dining halls (News release). Washington, DC. 1 p. Syndicated in newspapers nationwide, Nov. and Dec. 1976.
• ***Summary:*** Orono, Maine (UPI)–At the University of Maine at Orono, in the dining hall, students "will soon be able to munch on tofuburgers."

A tofuburger is made of soybean curd (low in cost and a good source of protein) fried with onions, carrots and sunflower seeds.

Ann S. Johnson, assistant manager of dining halls at the university, thinks their great as part of an attempt "to wean students at the university away from junk foods and empty calories."

Note 2. This is the English-language document seen (April 2013) that contains the term "tofuburgers" (or "tofuburger").

Note 2. This news release was occasioned by a lecture and cooking demonstration given on Nov. 7 by William Shurtleff and Akiko Aoyagi at the University of Maine, Orono–as part of their Tofu and Miso America Tour.

3366. Becker, Jay. 1976. Tofu makers spring up on Island. *Vashon-Maury Island Beachcomber.* Nov. 18.
• ***Summary:*** Partners Sylvia Nogaki and Luke Lukoskie began production of Japanese tofu this week. A former Pan Am stewardess, she is age 28 and he 29. Their tofu retails for $0.69 a pound on the Island. A nice large photo shows Nogaki and Lukoskie, both smiling.

Note: This is the earliest document seen (March 2013) concerning Island Spring. Address: Washington.

3367. United Press International (UPI). 1976. Tofu-burger no junk food. *Bangor Daily News* (*Maine*). Nov. 18. p. 1-2.
• ***Summary:*** Students will soon be able to munch on tofu-burgers in the University of Maine at Orono school dining hall. Anne S. Johnson, assistant manager of dining halls, said the new tofu-burger is part of an attempt "to wean students at the university away from junk foods and empty calories."

"Mrs. Johnson was introduced to the new vegetarian fare through a food book written by Bill Shurtleff and Akiko Aoyagi. She hopes to have the item on the dinner menu by early next month." "About 150 of the university's dormitory students line up nightly to consume vegetarian fare at the Wells Common Dining Hall... The cost of preparing the vegetarian meal is no greater than for the regular one."

A photo shows Barbara Hill, a student at the University of Maine, as she is about to take her first bite of a Tofu-Burger, a Japanese inspiration that contains no meat.

Note: This is Maine's largest daily newspaper. Many other newspaper articles were generated by this UPI story. Three (from unknown newspapers) are titled: "Tofuburgers in dining hall." "Shamburger deluxe." "Maine tofuburgers."

3368. *Hartford Courant* (*Connecticut*). 1976. Food authors to discuss protein bases. Nov. 23. p. 16.
• ***Summary:*** "Directors of the New-age Foods Study Center, Lafayette, California, will present a lecture-demonstration Friday from 7 to 9 p.m. at The Arts Cafe, 72 Union Place [Hartford, Connecticut].

"The directors, Bill Shurtleff and Akiko Aoyagi, are also authors of 'Book of Tofu' and 'Book of Miso.' / They will prepare and serve several of their tofu (bean curd) and miso (fermented soybean paste) recipes and discuss the value of these foods as protein sources."

• ***Summary:*** Contents: Introduction. Current status. Domestic markets and utilization. Prospects for production. Conclusion.

"Because little information on soybeans is available from East Malaysia, this report is confined to West Malaysia. Soybeans appear to have been introduced into peninsular or West Malaysia about 50 years ago [1926]. The crop, which has been grown among young rubber plants or as a sole crop in rotation with other annual crops, is planted primarily on small farms. Last year, however, there was a move by a few enterprising organizations to try large-scale, commercial plantings.

"Soybean products are consumed in various forms by both humans and livestock. The domestic demand greatly exceeds the local supply, which is therefore dependent upon importation...

"Although soybeans can be grown throughout the country, a large percentage of the crop is raised in the east coast states of Kelantan, Pahang, and Trengganu of peninsular Malaysia... Peninsular Malaysia imports whole soybeans, as well as the flour, oil, and cake of the soybean. Until 1973 about 200,000 gallons of soy sauce were also imported, but in 1974 about 15,000 gallons were exported... Soybeans are used mainly to make beanmilk, curd, sprouts, and other food products for human consumption... It has been estimated that the local consumption of soybeans per capita per year averaged 5.3 kg for the years 1971 to 1973." Address: Field Crops Branch, MARDI (Malaysian Agricultural R&D Inst.), Serdang, Selangor, Malaysia.

• ***Summary:*** Contents: Introduction. Fermented soybeans. Soymilk. Yuba. Yoghert [Soy yogurt, inoculated with *Lactobacillus bulgaricus* and *L. acidophilus* and incubated at 37ºC for 16-20 hours]. Chinese soya bean dessert (Taow Huey). Tofu (white or yellow). Sufu. Soybean snack (protein crisp; deep-fried sufu). Tempeh. Thai dessert. Kanom ping kaset. Baby food. Kaset noodle. Kaset protein. Note: There is

© Copyright Soyinfo Center 2013

a flowchart and photo of each product.

"The Institute of Food Research and Product Development, Kasetsart University, initiated several soybean utilization pilot projects five or six years ago. Using soybeans alone or combined with other ingredients, we have developed a range of products, such as baby foods, kaset protein, and snacks. Tests indicate that these foods are highly acceptable, being both palatable and nutritious. Some of these products are soon to be manufactured commercially by small-scale industries. This paper is a description of the soy food processing methods developed by the Institute." Address: Inst. of Food Research and Product Development, Kasetsart Univ., Bangkok, Thailand.

3373. **Product Name:** Island Spring Tofu.
Manufacturer's Name: Island Spring, Inc.
Manufacturer's Address: P.O. Box 747, Vashon, WA 98070. Phone: 206-622-6448.
Date of Introduction: 1976. November.
How Stored: Refrigerated.
New Product–Documentation: Letter / Order from Sylvia Nogaki, Island Spring, Route 1, Box 624, Vashon, Washington 98070. 1976. Sept. 9. She orders two copies of *The Book of Tofu, Vol. II* (later re-titled *Tofu & Soymilk Production*).

Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 399. Phone: 206-567-4205. Owner: Luke Lukoskie.

Label sent by Luke Lukoskie. 1978. 16 ounces. Ingredients: "Organically grown soybeans, spring water, bittern (nigari)." "Keep refrigerated. No preservatives." This second run of labels was printed on 22 Jan. 1978.

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Luke Lukoskie.

FIND/SVP. 1981, May. "The tofu market: Overview of a high-potential industry." p. 71. The company now makes about 10,000 lb/week of tofu, five flavors of soyfreeze (soymilk ice cream), soyloaf, tempeh, soymilk, and spicy Korean tofu.

Form filled out by Luke Lukoskie for William Shurtleff. 1981. Jan. Island Spring, founded by Luke Lukoskie and Sylvia Nogaki, began making tofu in Nov. 1976. The first shop was approximately 225 square feet in size. The company spent $10,000 to get into business. Products made during the first year in business: Tofu, Delicious Steamed Tofu. Production increased as follows: 3,000 lb/month after one year. 5,000 lb/month after two years. 10,000 lb/month after three years. Luke believes that Island Spring was the first company in the USA to make "Korean style prepared Delicious Steamed Tofu."

Update: 1997 Oct. 16. Island Spring, Inc. is now located at 18846 103rd St., S.W., P.O. Box 747, Vashon, Washington 98070. Phone: 206-463-9848. Contact: W.M. Luke Lukoskie, CEO. They still make tofu and tofu products. This is the second oldest existing Caucasian tofu manufacturer in the United States.

3374. **Product Name:** Island Spring Firm Tofu. Renamed Traditional Firm Tofu (Oct. 1987).
Manufacturer's Name: Island Spring, Inc.
Manufacturer's Address: P.O. Box 747, Vashon, WA 98070.
Date of Introduction: 1976. November.
Ingredients: Soybeans grown without chemical pesticides or fertilizers; water; bittern or nigari, an extract of seawater.
Wt/Vol., Packaging, Price: 16 oz packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.
How Stored: Refrigerated.
Nutrition: Per 4 oz.: Calories 100, protein 10.3 gm, carbohydrates less than 1 gm, fat 7 gm.

New Product–Documentation: Labels. 1980. 5 by 4.5 inches. Brown and dark green or chartreuse on clear film. Talk with Like Lukoskie. 1988 June 7. He keeps archives of past product labels (but without the launch dates) and articles about his company but his files are not organized. This product is a Korean-style firm tofu. The levels of firmness, in ascending order of firmness, are Japanese kinugoshi (silken), Japanese Juten (packaged GDL silken), Japanese momen tofu, Korean, and Chinese. His firm is like Korean and his extra firm is like Chinese.

Label. 1986. 5 by 4 inches. Pink, green, blue, and black. Shows moon rising over mountains and water with sprig of plum blossoms in left foreground. "A fitness food from the Pacific Northwest, USA."

INTSOY Series No. 10. p. 148-153. R.M. Goodman, ed. Expanding the Use of Soybeans (College of Agric., Univ. of Illinois at Urbana-Champaign). [9 ref]
• ***Summary:*** Contents: Introduction. Viable alternatives for processing soybeans: Home and village processing alternatives (incl. small-scale extrusion cookers that cost $45,000), larger scale processing alternatives. Economic efficiency and choice of technique. Conclusion. Discussion. Address: 1. Multiple Cropping Project, Faculty of Agriculture, Chiang Mai Univ., Chiang Mai, Thailand; 2. Dep. of Agricultural Economics, Univ. of Illinois, Urbana, IL.

3376. Lee, Hong Suk; Park, K.Y.; Chung, B.J.; Park, J.S.; Yohe, J.M. 1976. The status of soybean production and research in Korea. *INTSOY Series* No. 10. p. 239-42. R.M. Goodman, ed. Expanding the Use of Soybeans (College of Agric., Univ. of Illinois at Urbana-Champaign).
• ***Summary:*** Contents: Introduction. Major problems related to increased soybean production: Weather, varietal improvement, planting time, soil fertility and pH, cultural practices (cropping systems, planting patterns, seed treatment and inoculation), soybean pathology and entomology. Present and future research problems.

"Good quality soybeans with large grain size have been cultivated for thousands of years in the middle and northern part of the east coast of Korea. Because soybeans have been grown primarily for subsistence, they have not been regarded as a cash crop by Korean farmers... Soybean cultivation in 1974 and 286,188.4 hectares, thus making soybeans the third major crop of Korea in hectarage...

"Soybean production has gradually increased from 231,994 metric tons in 1970 up to 318,576 metric tons in 1974. Although total soybean production has increased, it has not kept up with demand as indicated by the fact that imports have increased from 36,291 metric tons in 1970 up to 66,370 metric tons in 1974...

"Home consumption is the major area for soybean use, about 122,000 metric tons being consumed in 1974. Soybeans are prepared by mix-boiling with rice or vegetables, or are eaten in the form of curd, sprouts, sauce, paste, milk, and flour. The government uses soybeans primarily for military needs. Soybean oil is used for industrial purposes." Address: 1. College of Agriculture, Seoul National Univ.; 2. Corps Exp. Station, Office of Rural Development; 3-4. Inst. of Agricultural Science, Office of Rural Development; 5. Crop Improvement Research Center, Office of Rural Development. All: Suweon, Korea.

3378. **Product Name:** Tofu.
Manufacturer's Name: Peter Blair Tofu Co.
Manufacturer's Address: c/o Reilly, Somerset, Ohio.
Date of Introduction: 1976. November.
New Product–Documentation: Letter from Peter Blair. 1976. Nov. 26 and Dec. 19. "Grateful thanks to co-directors William Shurtleff and Akiko Aoyagi for the positive energy flow initiated by *The Book of Tofu.* My small business supplies a local co-op, a vegetarian restaurant, and a natural food store–all in the Columbus area." He orders nigari and *The Book of Miso, Vol. II,* a catalog of commercial tofu making equipment, and a catalog of koji starter. Note:

© Copyright Soyinfo Center 2013

Somerset is 35 miles southeast of Columbus.

3379. *Rain magazine* (*Oregon*). 1976. Tofu and miso: Eating high and lightly. Nov. p. 4-7. [6 ref]
• ***Summary:*** An interview with William Shurtleff and Akiko Aoyagi at Rain House in Oregon, plus excerpts and illustrations from their writings. The two are now on a nationwide tour.

3380. Sanbuichi, Takashi; Watanabe, Iwao. 1976. Soybean production in Japan. *INTSOY Series* No. 10. p. 237-38. R.M. Goodman, ed. Expanding the Use of Soybeans (College of Agric., Univ. of Illinois at Urbana-Champaign).
• ***Summary:*** "Each year Japan produces approximately 120,000 metric tons of soybeans on 90,000 hectares. About 30 percent of this yield is raised on the northern island of Hokkaido, where large-scale farming is practiced. Especially in the northeastern part of Hokkaido, soybeans are a very important crop... Throughout the country the average soybean yield is about 1.4 metric tons per hectare, but during the past four years production in the Tokachi District of Hokkaido has risen to between 1.8 and 2.0 metric tons per hectare...

"In Japan soybeans are used principally as a source of edible oil and protein foods, such as miso (bean paste), shoyu (soy sauce), tofu (soybean curd), and natto (fermented soybeans). The soybeans produced in Japan usually have large seeds, a high protein content, and are of a quality suitable for producing high quality soy products...

"In general, early varieties are cultivated in the high latitudes and late varieties in the low latitudes, but on the southern island of Kyushu early varieties are occasionally used. Known as summer soybeans, they are sown in the spring and harvested in the summer. Late varieties, which are called autumn soybeans, are sown in summer and harvested in the autumn...

"Results show that large-seeded varieties produce high yields. Soybeans grown in the northern parts of Japan usually have larger seeds than those raised in southern areas. It is believed that the marked difference between day and night temperatures and the favorable soil moisture content during the early stages of plant growth account for the large size of soybean seeds grown in the north. The author observed a serious decrease in seed size when Japanese varieties were introduced into Thailand...

"Soybeans are raised in several types of areas in Japan. Traditionally they have been planted beside the footpaths in paddy rice fields. Intercropping with wheat is another old cultural practice, although both practices are seldom used today. Because of the over-production of rice in Japan, the government has recently recommended that soybeans be cultivated in rice fields." Address: 1. Tokachi Agric. Exp. Station, Memuro, Kasai-gun, Hokkaido; 2. National Inst. of Agricultural Science, Nishigahara, Kita-Ku, Tokyo. Both: Japan.

3381. Shurtleff, William; Aoyagi, Akiko. 1976. Excerpts from *The Book of Tofu:* Tofu recipes and preparatory techniques. *Mother Earth News* No. 42. Nov. p. 52-56. [1 ref]
• ***Summary:*** The fourth in a series of excerpts from this book. Gives 21 tofu recipes and 8 preparatory techniques. Address: 790 Los Palos Dr., Lafayette, California 94549.

3382. Somaatmadja, Sadikin; Guhardja, Edi. 1976. Current status of soybean research and utilization in Indonesia. *INTSOY Series* No. 10. p. 232-35. R.M. Goodman, ed. Expanding the Use of Soybeans (College of Agric., Univ. of Illinois at Urbana-Champaign). [1 ref]
• ***Summary:*** Contents: Introduction. Production: Hectarage and yield. Production techniques: Systems of cultivation, inoculation, harvesting and processing for storage, storage. Factors affecting soybean production in Indonesia: Seed viability and seed supply, pests, diseases, cultural practices, varieties. Consumption and utilization. Marketing. Extension: Training, method used to increase soybean production (expansion of hectarage, intensification, varieties).

"At present soybeans occupy fifth place among the other food crops, after rice, cassava, maize, and sweet potatoes. Research on soybeans is conducted at the Central Research Institute for Agriculture (CRIA) at Bogor and its substations, including Sukamandi and Ujung Padang; at several universities, such as the Institut Pertanian Bogor, Universitas Gadjah Mada, Jogyakarta, and Brawijaya Malang; and at other research institutes, including Badan Tenaga Atom Nasional, Jakarta, and Lembaga Biologi Nasional, Bogor.

"From 1970 to 1973 the annual harvested hectarage of soybeans averaged 703,878 hectares with a production of 517,199 metric tons and an average yield of 7.34 quintals [1 quintal = 100 kg] per hectare. Approximately 80 to 85 percent of the total soybean hectarage in Indonesia is in Java-Madura...

"Per capita consumption of soybeans in Indonesia reflects the distribution of the crop. In Java the per capita consumption each year is about 5.04 kg; in Sumatra, Kalimantan, Sulawesi, and Maluku/Irian Jaya between 0.10 and 1.04 kg; and in Bali about 3.43 kg.

"Soybeans are not consumed directly, but are processed into a large number of products. Tempeh (fermented soybeans), tahu (soybean curd), tauge (soybean sprouts), kecap (soy sauce), tauco (fermented mixture [Indonesian miso]), and oncom (made from residues of soymilk and tahu) are consumed as side dishes with rice. Roasted beans, tahu chips, and boiled seeds are eaten as snacks, and boiled young pods are prepared as a green vegetable. Soymilk is consumed as a beverage." Address: 1. Sukamandi Research Station, Central Research Inst. for Agriculture, Sukamandi; 2. Bogor

Agricultural Univ., Bogor. Both: Indonesia.

3383. Tongdee, Amnuay. 1976. Soybean production in Thailand. *INTSOY Series* No. 10. p. 253-54. R.M. Goodman, ed. Expanding the Use of Soybeans (College of Agric., Univ. of Illinois at Urbana-Champaign).
• ***Summary:*** Contents: Introduction. Production and production areas. Cultivation. Varieties, fertilizers, and inoculation. Disease and insect pests. Utilization.

"Soybeans, one of Thailand's most important crops, have been grown here traditionally, although there is no evidence of when they were first introduced. After having been brought to this country, probably by migrating Chinese, soybeans became part of the Thai diet. They are processed into a variety of foods, including tou-hu tou-cheaw, and soy sauce. Freshly cooked pods [green vegetable soybeans], called tou-rae, are prepared for immediate consumption." Address: Mae-Jo Agric. Exp. Station, Chiang Mai, Thailand.

3384. *Hartford Courant* (*Connecticut*). 1976. Population, affluence cited as world hunger causes. Dec. 1. p. 21.
• ***Summary:*** Summary of a lecture by William Shurtleff in Hartford recently at the start of his tofu and miso cooking presentation. "He predicted that soybeans will be the major source of protein of the future."

3385. Maglaty, Jeanne. 1976. Use as answer to nutritional needs. Couple praises soybean uses. *Hartford Courant* (*Connecticut*). Dec. 1. [2 ref]
• ***Summary:*** William Shurtleff and Akiko Aoyagi, authors of *The Book of Tofu* and *The Book of Miso*, on a national speaking tour, visited Hartford. "'We're trying to do for soybeans what Johnny Appleseed did for apples,' said William Shurtleff of Lafayette, California." A photo by Michael McAndrews shows the two; Shurtleff is speaking into a microphone and holding a copy of *The Book of Tofu*. Aoyagi is holding a wooden tofu kit.

Recipes: Creamy tofu dressing with curry. Tofu, peanut butter and banana spread. Tofu burgers (deep-fried). Floating cloud miso dressing ("Tomatoes and (deep-fried) tofu make excellent accompaniments"). Peanut miso.

3386. United Press International (UPI). 1976. Vegetarian burgers (Photo caption). *Cleveland Press* (*Ohio*). Dec. 3. p. A11.
• ***Summary:*** A large photo shows a male chef cooking about 7 burgers on a grill; a woman is standing next to him. The caption reads: "Vegetarian burgers–Ron Goslin, chef at Wells Dining Hall on the University of Maine campus at Orono, prepares tofu-burgers, a soybean curd fried in onions, carrots and sunflower seeds, while student Paula Fallon of Westfield, Massachusetts, looks on. About 150 students line up each night for the vegetarian fare. Dietitians are hoping more students will be weaned away from junk foods with their empty calories by the low-cost Japanese protein food."

Note 1. This is the English-language document seen (Jan. 2007) that contains the term "tofu-burgers" (or "tofu-burger").

Note 2. This news release was occasioned by a lecture and cooking demonstration given on Nov. 7 by William Shurtleff and Akiko Aoyagi at the University of Maine, Orono–as part of their Tofu and Miso America Tour.

3387. Earl, Johnrae. 1976. Queen: In full sail on a sea of satisfaction. *Chicago Tribune.* Dec. 5. p. C13.
• ***Summary:*** Tokyo Tea Garden, a true diamond in the rough, is a tiny restaurant at 5 W. Superior St. that serves authentic Japanese cuisine. "For those who want to go the whole way, there's dried sea seed, salted fish eggs, cold soy bean cake [Hiya-yakko], and fried soft won ton. The house soup was made with soy bean paste [miso]." It was unusual but tasty.

3388. Maxwell, Jessica. 1976. Our native cuisine: Health food restaurants serve what California grows in abundance. *Los Angeles Times.* Dec. 7. p. I10-11, I18.
• ***Summary:*** It was because of the year-round growing season that the health food movement began in Los Angeles 50 years ago, in 1926, when Hain Pure Foods and El Molino Mills opened for business. They were soon followed by Jack LaLanne. "And quicker than you can say granola, alfalfa sprouts started creeping into our sandwiches and the bread they came on started looking like an ad for Coppertone."

Then came the big food-consciousness boom of 1971, and a new generation of health food restaurants started popping up in the L.A. Basin. Now, with carrot juice uprooting the evening martini, "we think its time someone made it official that from date shakes to artichokes, health food is Southern California's native cuisine–and always has been."

3389. Miller, Harry W. 1976. Re: Your good work in introducing foods from the soya bean. Letter with Christmas card to William Shurtleff at New-Age Foods Study Center, Dec. 21. 1 p. Typed with signature.
• ***Summary:*** "My Dear Mr. Shurtleff–Your name comes to mind very often on account of our close association in the interest of nutrition to the people in America, and I feel you have done a wonderful job in educating the people regarding the value of using foods from Soya Beans. I think now that I have secured three of your Tofu books, but they are all gone, loaned and not returned, so I am ordering another to have sent to my home address on this envelope. I would be glad to mail a check for the exact amount including Postage so if you will send me that by return postage I will send a check for the same at once as I need some data you have given in same.

"Dr. Tojima Yamagata, Minister of Forestry and Agriculture for Japan, paid me a visit about a month ago and

© Copyright Soyinfo Center 2013

has supplied me with some recent pamphlets from his Dept. on Soy Milk. I have wondered if at anytime you are planning a trip to the Los Angeles or Riverside area. The book store here at La Sierra usually handles your book but they are all sold out. Therefore I am hastening to order from you direct, and always glad to hear from you, Yours very sincerely, Harry W. Miller, M.D."

This is a poignant letter and card. On 26 July 1977 Dr. Miller's wife, Mary E. Miller, (now a widow) sends the money Dr. Miller owed for *The Book of Tofu* he ordered and adds: "Please forgive my husband for this long delay, he died on Jan. 1 of this year. He went into the hospital on Nov. 19 of last year and never recovered from a severe heart attack at the age of 97." Address: M.D., 11384 Norwood Ave., Riverside, California 92505.

3390. Collingwood, Linda. 1976. High-protein soybeans. *Sunday News* (*near Dallastown, Pennsylvania*). Dec. 26. p. A-19. [1 ref]
• ***Summary:*** This article describes a program on tofu and miso presented at Dallastown, Pennsylvania, by William Shurtleff and Akiko Aoyagi on Dec. 12. It was hosted by Cindy Blouse. Explains how Shurtleff got interested in tofu, gives a history of tofu and discusses its many benefits. Shurtleff says: "I'd like to do for the soybean what Johnny Appleseed did for the apple." Photos by Glenn Dietz show: (1) William Shurtleff talking. (2) Akiko Aoyagi holding up a copy of *The Book of Tofu.* (3) A wooden tofu forming box next to a cup of creamy tofu dressing surrounded by vegetable sticks.

3391. Hughes Markets. 1976. Happy New Year '77 (Ad). *Los Angeles Times.* Dec. 27. p. H16.
• ***Summary:*** The section titled "Foods of the Orient" includes: "Misuzu Koya Dofu 3.5 oz. Dried Soy Bean Cake [Dried frozen tofu]–85¢... Age [Deep fried tofu pouches] 6 piece pkg. 59¢."

Also includes Hime Mix tempura batter, Cal-Rose botan rice, mochi, Hime Honpara Maki seasoned rolled kelp (kombu), Wel Pac Yude Azuki 7 oz. can Red beans 49¢, Wel Pac panko bread meal 35¢, Nihonbashi Asakusa Nori 10 sheets Dried seaweed, Oban Makizushi dried seaweed.

3392. *Miami News* (*Florida*). 1976. Join in Orange Bowl celebration with lunch & fashion show: The onlooker. Dec. 28. p. 2B.
• ***Summary:*** "Tonight from 7 to 9:30, there's a 'tofu and miso workshop, taught by Bill Shurtleff, author, appropriately enough, of the 'Book of Tofu' and the 'Book of Miso.' The workshop's a production of the East-West Foundation, and its to be held at St. Stephens Church. 2950 MacFarland Rd., Coconut Grove. The cost to get in is $1.50.

"Then, tomorrow from 3 to 6 p.m. Mr. Shurtleff holds a tofu-miso cooking class that costs $3 per chef, and its to be held at 6051 W 46th Terrace. For more information call 661-4495."

The East-West Foundation, founded by Michio Kushi, promotes macrobiotics.

3393. Okada, Katsuto; Ogasa, Katsuhiro; Kuwahara, Kunisuke. Assignors to Morinaga Milk Industry Company, Ltd. (Tokyo, Japan). 1976. Method of manufacturing an aseptic soya bean curd. *U.S. Patent* 4,000,326. Dec. 28. 12 p. Application filed 31 July 1975. [2 ref]
• ***Summary:*** Soybean juice is continuously sterilized at 135ºC for 2 seconds after which it is flowed to an aseptic brick filling machine, where it is mixed with glucono delta-lactone and a divalent metal salt. The resulting liquid mixture is continuously filled into containers in an aseptic atmosphere, after which the containers are immersed in hot water to coagulate the mixture.

Note: This patent described a major innovation in tofu packaging. Address: 1&3. Tokyo, Japan; 2. Yokohama, Japan.

3394. *SoyaScan Notes.* 1976. Chronology of soybeans, soyfoods and natural foods in the United States 1976 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** Feb. KQED-TV in San Francisco airs a 30-minute special titled "Tofu." It is an interview with William Shurtleff and recipe preparation by Akiko Aoyagi.

March. "The Joys of Soy" by Brenda Bortz, published in *Organic Gardening and Farming* magazine is the first major popular article on tempeh in America. In June, *Prevention* magazine runs a cover story on tempeh.

April. Soybeans: Brazil as a Competitive Force by J.M. Schultz and W.P. Mason submitted as a Harvard Business School MBA thesis. One of the best early in-depth analyses.

April. The second of the new wave of commercial Caucasian-run tofu shops is started by Peter and Judy Beane in Portland, Maine. There were at least 7 small commercial Caucasian-run tofu shops in America by the end of 1976.

May-June. *Mother Earth News* publishes the first of five long articles on soyfoods, each excerpted from *The Book of Tofu.*

June 2-5. First International Workshop on Low-Cost Extrusion Cookers held at Colorado State University, with 51 participants. Organized by Judson Harper and Richard Jansen, with funding from USAID through USDA. The 173-page proceedings, edited by Wilson and Stumpf, are published shortly thereafter. Cereal-soy blends are seen as having great promise for production in developing countries.

This year cereal-soy blends are first produced in Third World countries using low-cost extrusion cookers: Thriposha in Sri Lanka and Maisoy in Bolivia.

July 20. What is Tofu? pamphlet by Shurtleff and Aoyagi published by Westbrae Natural Foods in Berkeley.

© Copyright Soyinfo Center 2013

Aug. 6. New-Age Foods Study Center established by Shurtleff and Aoyagi in Lafayette, California. The name was changed to The Soyfoods Center in Sept. 1980.

Aug. Larry Needleman of The Learning Tree in California introduces America's second tofu kit, which soon becomes the best-seller nationwide.

Aug. Farm Food Company, a branch of The Farm in Tennessee, opens America's first soy deli, in San Rafael, California. They served tofu sandwiches, salads, salad dressings, and cheesecakes; tempeh burgers, deep-fried tempeh cutlets, tempeh with creamy tofu topping, and Indonesian delight (tempeh strips); soymilk ice cream, shakes, yogurt, mayonnaise, and whipped creme; soybean stroganoff and burritos; and TVP chili. They essentially launched the concept of second-generation soyfood products.

Sept. 23. *The Book of Miso,* by Shurtleff and Aoyagi published by Autumn Press.

Sept. 29. Shurtleff and Aoyagi begin "Tofu and Miso America Tour." They do 70 public programs nationwide and travel 15,000 miles in their white Dodge van, continuing until 3 Feb. 1977. In the van they carry hundreds of copies of *The Book of Tofu* and *The Book of Miso* and many of Larry Needleman's tofu kits, plus little bags of natural nigari, all of which they sell at their programs. They usually have meals and spend the night with the people who have sponsored and organized their program. They also visit numerous soyfoods producers and researchers, including The Farm in Tennessee from Dec. 21 to Jan. 2. After the tour, tofu shops started in most of the areas where they spoke.

Sept. Dr. Kenneth Bader becomes executive director of the American Soybean Association. With the help of increasing funding from checkoff programs, he ushers in an era of growth, and increased activity and strength for ASA.

Oct. 13-15. Seminars on the use of soy protein for foods and meal for feeds are held in Moscow, sponsored jointly by the U.S. Foreign Agricultural Service, the American Soybean Assoc., and the Food Protein Council. More than 200 Soviet officials attended.

Oct. *The Joy of Soy,* by Sylvia E. Anderson self-published in New Jersey.

Nov. Island Spring starts making tofu in Vashon, Washington. Founded by Luke Lukoskie and Sylvia Nogaki.

Dec. The term "soyfoods" (spelled as one word) is coined by Benjamin Hills of Surata Soyfoods in Eugene, Oregon, for use in their company name. It is first used in a book (*Tofu & Soymilk Production*) by Shurtleff and Aoyagi in July 1979, and as a magazine title in July 1980.

Dec. Morinaga Milk Industry Co. in Japan is granted the world's first patent on a method for manufacturing aseptically packaged tofu (in Tetra Brik cartons), U.S. Patent 4,000,326.

* Kibun, in Japan, introduces East Asia's first commercial fermented soymilk products, a line of acidophilus soymilk drinks brand-named Soena.

* Beginning of the rise of the modern soymilk industry in Japan. This is the first year that a significant amount of soymilk was sold.

* Kikkoman soy sauce passes La Choy to become America's best selling brand of soy sauce. The three major soy sauce markets are consumer retail, restaurants and other institutions, and industrial (for food processors). La Choy may still be the leader in consumer retail; Kikkoman leads in restaurants.

* Beef consumption in America peaks at 95.4 pounds per capita. It had risen rapidly from 38.6 lb/person in 1930. After 1976 it falls steadily, hitting 75 lb/person in 1985.

* National Soybean Research Program established in Brazil, building upon the National Soybean Project (1972) and the National Soybean Research Center (1975).

3395. Anderson, Sylvia E. 1976. The joy of soy. Pleasantville, New Jersey: New Life Press. 48 p. Dec. Illust. Index. 23 cm. Spiral bound. Rev. ed. 1977. Spiral bound.
• ***Summary:*** Contents: What is the joy of soy. Whole, dry soybeans ("My favorite way to cook whole, dry soybeans is to pressure cook them"). Soymilk. Tofu. Sweet tofu. TVP. Okara. This vegan cookbook was inspired by The Farm, a large spiritual community in Tennessee, where the author and her children lived for several years. "When I arrived on The Farm, I thought I didn't like soybeans... Now I love soybeans and soymilk–not because my tastebuds have changed and I've acquired a new taste for them, but because I've learned new ways to cook soybeans so that they taste good to those same old tastebuds.

"The recipes in 'The Joy of Soy' have been developed through feedback from members of The New Life Co-op (326 S. Main St., Pleasantville, New Jersey), where products made from them have been selling rapidly for the past nine months."

Note: The author's favorite recipes are: (1) Grandma's chickenless soup with Kreplach (and tofu, p. 19). (2) "Cheezy" soybean d'lishes (p. 6). (4) Garden salad d'lishes (with tofu, p. 21). (5) Pizza d'lishes (with tofu, p. 23). (6) Tofu cookie bars (sweet, p. 26). (7) Tofu cinnamon rolls (sweet, p. 27). (8) Tofu-filled carob cupcakes (sweet, p. 28). (9) Okara soysage (p. 40). (10) Soysage d'lishes (with TVP, p. 37). (11) Okara spice cake (sweet, p. 45). (12) Dairyless macaroni and cheese (with tofu, p. 15). Address: Pleasantville, New Jersey.

3396. Kawashima, Masao. 1976. Shiramine chihô no shoku seikatsu to ken-dôfu [Hard tofu in the food-life dietary pattern in the region of Shiramine, Japan]. *Chori Kagaku* (*Science of Cookery*) 9(4):205-09. Dec. Illust. [Jap]
• ***Summary:*** Note: Shiramine is a small town in Ishikawa prefecture, in the Hokuriku region of north-central Japan. Address: Habutae Tofu K.K.

3399. Pearce, Jean. 1976. Jean Pearce's How to get things done in Japan. Vol. 2. Tokyo: Japan Times. [v] + 295 p. Dec. Company and organization index. General index. 19 cm. [Eng]
• ***Summary:*** The preface begins: "Dear friends, Over the past twelve years, I have been answering letters from both Japanese and foreign readers about this always interesting, often baffling, country." This book is a compilation of those answers / columns, with two helpful indexes. Under each title will be found at least one (but sometimes more) of Jean's responses–but no date and no initial writer's name.

"Sing a song of soybeans" (p. 35-37, two answers). "An American here is dependent upon a Japanese tofu maker for his supply of soybeans. He would like to find a commercial source. Somehow it doesn't seem right to buy soybeans from a tofu maker to make one's own tofu. By the time he reads this he may have found a 15-kilo bag of soybeans at his door. Yoshida Bungo Shoten, one of the largest wholesale dealers in soybeans, is the most cooperative company I've contacted."

"Another man who appreciates soybeans is Rinshiro Kato. He is marketing a soybean derivative called Togen, a powder made from the most nutritious parts of the soybean mixed with wheat flour with similar food values. A 500-gram can costs ¥3,000 and provides a month's supply" at the rate of 3 spoonfuls a day. "The company also makes a Togen cookie with sesame seeds, konbu and honey."

"Learn a little" (p. 170-71): "Tofu. I've been using it for years in all kinds of ways. Yet I never knew about pressing it. This removes the water. Japanese would have you wrap a square of regular (*momengoshi*) tofu (it won't work with the finer textured kinugoshi) in a *tenugui* [thin towel] and gently squeeze out the water. I wrap mine in a towel and put a breadboard on top with a filled teakettle to weight it down. An hour or so later the tofu has an entirely different texture."

Note: This is the earliest document seen (April 2013) that contains the word *momengoshi* (regardless of hyphenation); it refers to regular or "cotton" tofu.

There are three basic types of soy sauce: *Koikuchi* is by far the most widely used. *Usukuchi* is light tan–the choice for lighter color foods like tofu and white fish. The taste is about the same as *koikuchi. Tamari* is slightly thicker, slightly stronger, and frequently used for *sashimi.* "It is made without wheat and is the favorite in the Nagoya area."

"Tofu" (p. 228-29): "A man asks for an unusual recipe that may appeal to those who don't like tofu." If all the traditional and Western ways leave you cold, try this: "Cut tofu in one-inch cubes. Put in a jar and cover with gin. Let it age for two weeks or so, and then you have tofu cheese."

The residue [okara] left after grinding and straining tofu is high in food value. You can buy a plastic bag full for ¥20 of so early in the morning from your favorite tofuya-san. Use it as a food or "put it in a cloth bag and polish your floors. In the old days that was how the Japanese achieved that lovely soft finish we all admired."

Good tofu restaurants in Tokyo are Sasa-no-Yuki not far from Uguisudani station and Goemon, in Bunkyo-ku, up the hill from the Hakusan subway station.

Good books about tofu are *The Art of Just Cooking,* by Lima Ohsawa. *Tofu Recipes,* by Grace Kikuchi. *The Book of Tofu,* by Shurtleff & Aoyagi. Address: [Tokyo, Japan].

3400. **Product Name:** Chinese-Style Tofu [Doufu (Firm Tofu), Hsiao Dou-gan (Tofu Cubes Fried in Spices), Ch'ou-

doufu (Redolent Fermented Tofu), Yu-doufu (Deep-fried Tofu), Pai-yeh (Pressed Tofu Sheets), Kan-ssu (Pressed Tofu Noodles), Doufu-hwa (Curds in Whey)].
Manufacturer's Name: American Food & Candy Co.
Manufacturer's Address: 166 San Lazaro St., Sunnyvale, CA 94086. Phone: 408-773-0612.
Date of Introduction: 1976.
How Stored: Refrigerated.
New Product–Documentation: Talk with Peggy Boyd (415-948-9191), then with English-speaking representative of the company. 1988. March 11. The company is run by Chinese Americans. Most do not speak English. They started about 10 years ago, and make many kinds of tofu plus soymilk.

Talk with Jim Pong of Pure Land Co. in Hayward. 1998. Oct. 21. American Food & Candy was started and owned by Old Mr. Wu in about 1976 in Sunnyvale; his given name was Mei. He worked closely with his daughter, Cynthia, and her husband, Richard Liu. Jim also used to work there.

3401. **Product Name:** Extra Hard Tofu.
Manufacturer's Name: Denver Tofu Co.
Manufacturer's Address: 6150 N. Federal Blvd., Westminster (N. Denver), CO 80221. Phone: 808-538-1305.
Date of Introduction: 1976.
New Product–Documentation: Talk with Haru Yamamoto. 1988. Aug. 25. The product was launched in about 1975-76.

Note: This is the earliest commercial tofu product seen whose texture is described by the word "Extra Hard." The "Extra Hard" refers to Chinese-style pressed tofu.

3402. **Product Name:** Tofu.
Manufacturer's Name: East-West Soy Products Co.
Manufacturer's Address: 2780 E. Grand River Ave. #223, East Lansing, MI 48823.
Date of Introduction: 1976.

3407. **Product Name:** Food for Thought Tofu: (Soy Bean Curd).
Manufacturer's Name: Inter-Natural Trading (Distributor).
Manufacturer's Address: 12302 Exposition Blvd., Los Angeles, CA 90064.
Date of Introduction: 1976.
Ingredients: Selected quality soy beans, water, soy bean oil, food grade lime.
Wt/Vol., Packaging, Price: 12.5 oz. Retails for $0.65.
How Stored: Refrigerated.
New Product–Documentation: Label. 1976, undated. 4 by 2.5 inches. Self adhesive. Black on orange. Gives 4 serving suggestions. "Send for free recipes with stamped, self-addressed envelope."

3408. Jones, Antoinette M. 1976. Aspects of economic, social and administrative conditions in Central and East Java in the first quarter of the tenth century A.D. PhD thesis, University of London. See p. 41, 90-91.
• ***Summary:*** Page 41 gives a list of inscriptions from the period 901-929 A.D. from Central and East Java. The Watukura A (Watu Kura) inscription is dated A.D. 902. The place it was found is unknown. It is a copperplate, now in a private collection in Copenhagen, Denmark. A transcription with translation can be found in Van Naerssen (1941 [reprint]) *Oud Javaansche Oorkonden in Deensche en Duitsche verzamelingen* [*Ancient Javanese Documents in Danish and German Collections*] (p. 82-105).

In the section on foods, page 90 states: "There is no mention of the soya bean (Glycine max. Merr.) or of *tempe* but the bean must have been known and cultivated as we find mention of *tahu* [tofu] eaten at a feast in the Watukura A inscription. This name certainly points to Chinese influence* and the process of making *tahu*, beancurd cakes shaped into squares and made from soya beans and still widely eaten in Java today, may have been learned from the Chinese, either resident or visiting. In any case the *tahu* itself must have been made in Java; it could hardly have been imported as it does not carry" [i.e., is perishable].

Footnote: *"In Chinese this word is made up of two characters, Mandarin *tou*–peas, beans, pulse, and Mandarin *fu*–rotten, corrupt, putrid. For the two characters together the Chinese dictionaries give 'bean curd' (Carstairs Douglas, p. 156). The Hokkien (Amoy tâu hû) is the nearest to the Indonesian tahu and it is likely that the O.J. [Old Javanese] from the Hokkien or a similar southern dialect (possibly Hainanese, cf. Wilkinson). The Indonesian word for soya bean is *kedelai* (from Tamil, Wilkinson), but I have not found any mention of this word in O.J. inscriptions from this period." Address: England.

3409. **Product Name:** Tofu.
Manufacturer's Name: Jung's Oriental Foods.
Manufacturer's Address: 2519 N. Fitzhugh, Dallas, TX 75204. Phone: 214-827-7653.
Date of Introduction: 1976.
How Stored: Refrigerated.

3410. **Product Name:** Tofu.
Manufacturer's Name: Lotus Moon / Sevananda Co-op.
Manufacturer's Address: 431 Moreland Ave., Atlanta, GA 30307.
Date of Introduction: 1976.
Ingredients: 1979: Organically grown soybeans, water, curdled with pure calcium chloride, an extract from natural salt brine.
Wt/Vol., Packaging, Price: 8 oz packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.
How Stored: Refrigerated.
Nutrition: Per 8 oz.: usable protein 11.5 gm, calcium 326 mg, calories 147.
New Product–Documentation: Shurtleff & Aoyagi. 1977. Jan. 28. Commercial Tofu Shops and Soy Dairies. Note that on 19 Dec. 1976 a man named Chandler Barrett, who was somehow connected with this tofu shop, and who resided at 920 St. Charles Ave., N.E. in Atlanta, hosted a tofu class at the Sevananda Co-op given by Shurtleff and Aoyagi.

Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 394. Phone: 404-681-2831. Owner: Unknown.

Label. 1979, undated. Self adhesive. 3 inch diameter. Blue on white, hand lettered. "Keep refrigerated." Address is now 455 Moreland Ave., N.E.

Talk with Steve Yurman. 1989. Nov. 8. In 1979 he and his wife, Sarah, were in North Carolina when they heard that Lotus Moon (a tofu shop in Atlanta, Georgia) had gone out of business. They went to Atlanta and met with Charles Unger, the owner, who had purchased the company from someone named Mike. Lotus Moon only made tofu and soymilk. Steve never heard of Chandler Barrett. Lotus Moon at that time was not connected with Sevananda Co-op; Charles had moved it out. The Yurmans did not buy Lotus Moon, but rather in July 1979 went into a joint venture with

© Copyright Soyinfo Center 2013

Unger for about a month, but it did not work out, so they separated. Then in Aug. 1979 Steve and Sarah founded The Soy Shop and set up operations making tofu in the kitchen of the St. Peter and Paul Church in Atlanta.

Talk with Charles Unger in Atlanta (Phone: 404-373-0118). 1989. Nov. 8. He thinks that Chandler Barrett (who he met once or twice) started the company, then sold it to Mike Bouknight (Pronounced BAWK-nait, whose spiritual name was Vishvakenah), who was associated with Sevananda and the Ananda Marga spiritual group. Charles bought this very small tofu shop from him in about 1977, then apprenticed from him. The shop was at the Morningstar Cafe, next door to Sevananda Co-Op on Moreland Ave. Most of the tofu was sold to Sevananda. They ground the soybeans by hand in a handmill, and never made more than 90-100 lb/month of tofu. In about 1975 Charles organized Rainbow Grocery, which was connected with Guru Maraji's Divine Light Mission, then he left and went into the tofu business. Charles sold a lot of his tofu through Rainbow Grocery and through DeKalb Farmers' Market and Sevananda. Charles greatly enjoyed his work with tofu. Eventually he taught Steve Yurman how to make tofu. Yurman took the equipment (Charles is not sure if any money changed hands) then changed the name to The Soy Shop.

Talk with David Jockusch of Sevananda (Phone: 404-584-7875). 1989. Nov. 8. He is an old timer. Gave correct spellings of names. Mike is now living in Columbia, South Carolina.

Talk with Mike Bouknight (Phone: 803-796-9784). 1989. Nov. 9. He bought Lotus Moon in the spring of 1977 from Chandler Barrett, who started the company in 1976. Chandler learned to make tofu both from *The Book of Tofu* and probably also from The Farm in Tennessee. Mike learned from Chandler. At the time, Chandler was making the tofu in his home (probably on Virginia Ave.), so Mike moved the operation to the Morningstar Cafe at 427 Moreland Ave. (the business address was 431 Moreland, at Sevananda Natural Foods). Tofu production averaged about 200 lb/week. Shurtleff and Aoyagi stayed at the Bouknight's home during their visit to Atlanta in Dec. 1976.

3411. **Product Name:** Vitasoy Tofu [Regular, or Pressed].
Manufacturer's Name: Mandarin Enterprises Ltd.
Manufacturer's Address: No. 13-12200 Vulcan Way, Richmond, BC, V6V 1S8, Canada. Phone: 604-270-1815.
Date of Introduction: 1976.
Ingredients: Feves de soya de provenance organique, l'eau coagulees dans du nigari (chloride de magnesium).
Wt/Vol., Packaging, Price: 425 gm.
How Stored: Refrigerated.
New Product–Documentation: Shurtleff & Aoyagi. 1979. July. New Tofu Shops & Soy Dairies in the West.

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Mr. Eng-Choo Lim.

Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: Mr. Eng-Choo Lim. Address listed as 11031 Bridgeport Rd., #1107, Richmond BC, Canada V6X 1T3.

Labels. 1983, dated. In French and English. "A good source of protein." Leaflet. 1989. April. "Mandarin Enterprises has been making quality soyfoods in Canada since 1976."

3412. **Product Name:** Ganmotoki (Fried Soybean Cake).
Manufacturer's Name: Matsuda & Hinode Tofu Mfg. Company.
Manufacturer's Address: 526 Stanford Ave., Los Angeles, CA 90013.
Date of Introduction: 1976.
Ingredients: Soy bean, soy bean oil, water, carrots, seaweed, yam flour.
Wt/Vol., Packaging, Price: 1 7/8 oz plastic pouch.
How Stored: Refrigerated.

© Copyright Soyinfo Center 2013

New Product–Documentation: Label. 1979. 4.5 by 7 inches. Plastic film. Red yellow and blue on clear plastic. On 1982 letterhead for Matsuda-Hinode Tofu Mfg. Co. "Ganmotoki." Product with Label purchased. 1988. Hinoichi Tofu Fritter (Ganmodoki). 3.5 by 5 inches. Red, white, and black on clear film. This label was printed after the merger of Hinode Tofu Co. and House Foods in 1983. Ingredients: Soybeans, water, soybean oil, carrots, seaweed, fish powder (tuna, seaweed, mushrooms), salt. Weight: 1 7/8 oz (70.8 gm) in a plastic pouch. Retails for $0.93 (10/88, Los Angeles).

3413. **Product Name:** Tofu.
Manufacturer's Name: New China Rice Company.
Manufacturer's Address: 709 H St., N.W., Washington, DC. Phone: 202-737-4139.
Date of Introduction: 1976.
New Product–Documentation: Shurtleff & Aoyagi. 1977. Jan. 28. Commercial Tofu Shops and Soy Dairies.

Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 399. Phone: 202-737-4139. Owner: Unknown.

3414. **Product Name:** Tofu.
Manufacturer's Name: New Moon Tofu Shop.
Manufacturer's Address: 2405 W. Main St., Meza AZ 85201.
Date of Introduction: 1976.
New Product–Documentation: Shurtleff & Aoyagi. 1977. Jan. 28. Commercial Tofu Shops and Soy Dairies. Nancy & Kathy Riveras.

3415. **Product Name:** Tofu.
Manufacturer's Name: Pour Tous Auroville Tofu Shop.
Manufacturer's Address: Food Processing Unit, Aspiration 605104 Kottakupam, India.
Date of Introduction: 1976.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Jan. 22. Listed as Auroville Tofu Shop, Tamil Nadu, India 60510. Letter from Alain Bernard. 1982. Jan. 20. "A visitor who knew how to make tofu got us started in around 1976. We now make 432 pieces of tofu a week, working three days." The shop is formally connected with Auroville, 500 people who are followers of The Mother of Sri Aurobindu. The tofu is made by 4 westerners (2 French, 1 American, 1 Canadian).

Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: Alain Bernard. Pour Tous Food Process. Aspiration Auroville, Kottakuppam, India 605104.

Interview conducted by Anthony Marrese. 1990. Aug. The company is now named Pour Tous (Tofu), c/o Aspiration, Auroville, Pondy, Tamil Nadu, India. Phone: 605104. The people now in charge are Jenti and Claudine (no last names). They make tofu, which is sold through a few on-site Auroville food shops. It is packed in plain plastic bags with no label or other information. It retails for 12 rupees/kg. The plant is open and clean by Indian standards. It is similar to a small community tofu shop in the West. The soymilk is cooked outdoors, over an open wood fire, in a courtyard-type patio. The soymilk has a distinctly burnt taste. Two large pots are used, each to produce about kg of tofu. So 20 kg of tofu are made 3-4 times a week for a total of approximately 70 kg/week. Three or four local people help the two people in charge to produce the tofu. For soybeans, the company imports about 2,000 kg/year once a year, normally around November. The grinding is done using open stone grinders–the type used to make many of the Indian wet batters for idli, dosa, etc.–also peanut butter. The wooden tofu boxes hold 5 kg/box.

3416. **Product Name:** Tofu.
Manufacturer's Name: Shinbo Tofu Co.
Manufacturer's Address: 450 Alexander St., Vancouver, BC, V6A 1C5, Canada. Phone: 604-255-8141.
Date of Introduction: 1976.
New Product–Documentation: Shurtleff & Aoyagi. 1977. Jan. 28. Commercial Tofu Shops and Soy Dairies. Philip Saburo.

Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 399. Owner: Philip Saburo.

3418. **Product Name:** Tofu Creme Pie [With Blueberry, or Strawberry Topping].
Manufacturer's Name: Sprucetree Baking Company.
Manufacturer's Address: 6657 Belair Road, Overlea (suburb in northeast Baltimore), Maryland.
Date of Introduction: 1976.
New Product–Documentation: Shurtleff and Aoyagi. 1979, Jan. *The Book of Tofu* (Ballantine Books edition). p. 209-10. The introduction to "Tofu Cheesecake with Fruit Topping" notes that "A close relative of this delectable recipe was developed by the Spruce Tree Baking Co, in Belair [sic, Bel Air], Maryland, and is now a favorite throughout New England." The recipe features sesame tahini, maple syrup, and lemon juice together with the tofu.

Marc Medoff. 1986. *Whole Life*. April. p. 56-57, 60. "A guide to the best tofu 'cheesecakes' in New York. Cheesecakes–Gone but not forgotten." "The first commercially available (on a large scale) tofu cheesecake sold in the United States was put out by the *Sprucetree Baking Company* of Baltimore, Maryland. Sprucetree began marketing their two varieties of non-dairy tofu cheesecakes (strawberry and blueberry) way back in 1976. The product was sold in stores along the east coast and as far west as West Virginia, and enjoyed a good deal of popularity. Sprucetree founder and current President Howard Grundland recalled that his product was a first, and attracted a faithful following. But in 1983 a number of technical problems arose (including the fact that Sprucetree could not get a dependable supply of kosher tofu) and the company had to suspend its cheesecake production." Grundland says he would like to re-introduce his tofu cheesecake. "Anyone interested in buying into *Sprucetree* or just buying one of their original recipe tofu cheesecakes, can contact: Sprucetree Baking Company, 4200 Mortimer Avenue, Baltimore, Maryland 21215. Phone: (301) 358-8040."

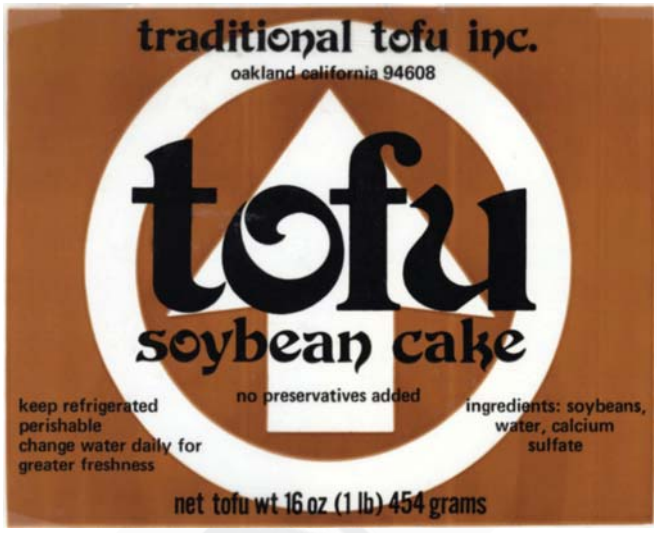
3420. **Product Name:** Tofu: Soybean Cake.
Manufacturer's Name: Traditional Tofu Inc.
Manufacturer's Address: 6510 San Pablo Ave., Oakland, CA 94608. Phone: 415-653-0990.
Date of Introduction: 1976.
Ingredients: Soybeans, water, calcium sulfate.
Wt/Vol., Packaging, Price: 16 oz or 22 oz packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.
How Stored: Refrigerated.



New Product–Documentation: Interview with Ray Nagai. 1978. Sept. He and his business partner Gary Sato bought $67,000 of Takai equipment. Work starts at 1:00 A.M. They make 16 oz. and 22 oz. cakes. The entire process is fully automated. They learned to make tofu from a long-established tofu maker in Oakland.

Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 392. Owner: Ray Nagai.

Label. 1979, undated. 4.5 by 5.5 inches. Black and white (later black and brown) on clear film. "No preservatives added. Keep refrigerated. Perishable. Change water daily for greater freshness." Leviton. 1981. Soyfoods. Winter. p. 45. "Ray Nagai and Gary Sato both left jobs in the medical field to open their own 'crazy' handmade, garage-style tofu shop in 1976. Their top production was 420 pounds in 16 hours." They organized their present semi-automatic shop in 1977. Owners: Ray Nagai & Gary Sato.

FIND/SVP. 1981, May. "The tofu market: Overview of a high-potential industry." p. 64. The company now makes about 1,800 lb/day of tofu. It is sold in small tubs and in 25 lb bulk containers.

3424. **Product Name:** Tofu.
Manufacturer's Name: Yet Chong Co.
Manufacturer's Address: 348 Powell St., Vancouver, BC, V6A 1G4, Canada. Phone: 604-681-2712.
Date of Introduction: 1976.
New Product–Documentation: Shurtleff & Aoyagi. 1977. Jan. 28. Commercial Tofu Shops and Soy Dairies.

Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 399. Owner: Mr. Chong Kok.

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Mr. Chong Kok.

3425. Ballentine, Martha. comp. 1976. Himalayan mountain cookery: A vegetarian cookbook. Honesdale, Pennsylvania: Himalayan International Institute of Yoga Science and Philosophy. 203 p. Introduction and comments by Rudolph Ballentine. Illust. Index. 22 cm.
• ***Summary:*** The author is the mother of Dr. Rudolph Ballentine; she was born in America [in South Carolina] and is grounded in the cooking tradition of rural South Carolina. "Working directly with Swami Rama and various Indian chefs at the Himalayan Institute, she has engaged in an extensive study of nutrition and food preparation. Soy-related recipes include: Soy/Mustard (cooked soybean and mustard greens, p. 60-61). Vegetables with soy powder sauce (with dry soymilk, p. 62-63). Nine jewels (Nauratni or Sarso aloo pullao, with cooked soybeans, p. 84-85). Soybean dahl (p. 109). Sweet and soy mung with soy [powder] (p. 116-17). Wheat-soy bread (p. 133). Hindu loaf (with soy flour, p. 140-41). Loaf (with soy flour, p. 142). Tofu (soy cheese, homemade with nigari, p. 157). Tofu cheese cake (p. 158-59). Scrambled tofu (p. 160). Soy milk kheer (a sweet dish, p. 184-85).

In the chapter on "Dairy" products, the author states (p. 147): "While soybeans are mentioned in the ancient writings, their use has been rather limited until recent years, except in the mountains. However, the making of soy milk is not uncommon now even in the plains of India. Its cheese, *tofu*, can be used in much the same way as *paneer*... In the Himalayas, tofu was made by curdling the milk with sour yogurt or very tart fruit juices... Bean "dairy" products, like tofu, have many of the advantages of milk, plus many that milk does not possess. They are lighter and less likely to create mucus in the body. Moreover, they are cheaper and practical, since a container of soy beans can provide milk for weeks without requiring room for a cow, pasture, and all of the other difficulties that make it so problematic to supply people with enough dairy milk." Pages 150-51 give recipes for paneer and paneer cheese cake.

Talk with Martha Ballentine in South Carolina. 1993. May 3. She says that her son, Dr. Rudolph Ballentine, wrote the section stating that "soybeans are mentioned in the ancient writings" of India. Address: South Carolina.

3426. Boulding, Elise. 1976. From a monastery kitchen. New York, San Francisco, Hagerstown, London: Harper & Row. 127 p. With the assistance of Victor Antonio Avila and Jean-Marie Pearse. Illust. by Daniel Marshall. Index. 23 x 26 cm.
• ***Summary:*** A cookbook; not vegetarian. The monastery (in a farmhouse) is Our Lady of the Resurrection Priory in Cold Spring, on the Hudson River, north of New York City. There the author found a place of quiet retreat and prayer with Brother Victor, and a novice, Brother Patrick.

The recipes are arranged by the four seasons. There are four columns on each page. All or part of the central two columns on each page are occupied by one recipe. To its left and right are many contemplative quotations (with their authors) and old photos or illustrations.

The only recipe that mentions soy is Poor person's sukiyaki (p. 97) which calls for ½ cup soy sauce and "if desired soy bean curd (tofu) cut into squares (if available)." On the same page we read: "Loving-kindness is the better part of goodness"–*W. Somerset Maugham.*

Page 124, "Useful culinary instruction," states: "Soy bean–Use in many forms for high protein: soy sauce, soy beans, soy paste (called miso, obtainable in Oriental and health food stores, used in place of bouillon cubes, supplies proteins, vitamins, and minerals). Also fresh soy bean cakes (*tofu:* Oriental or health food stores) and sprouted soy beans.

"Miso soup (soy) (per serving)–1 tablespoon miso, 1 cup boiling water, 2 chopped scallions (or 1 small onion), pinch of sugar, 1 or 2 tablespoons wheat germ. Drop 1 beaten egg if desired. Cooks in 5 minutes." Address: New York.

3427. Bumgarner, Marlene Anne. 1976. The book of whole grains: The grain-by-grain guide to cooking, growing, and

© Copyright Soyinfo Center 2013

grinding whole cereals, nuts, peas, and beans. New York, NY: St. Martin's Press. xiv + 334 p. See p. 261, 281-89. Illust. by Maryanna Kingman. Index. 24 cm. [20 ref]
• ***Summary:*** Gives recipes for: Homemade tofu (p. 281-82). Brown rice porridge with tofu and vegetables. Okara and barley flour muffins.–all reprinted with permission from *The Book of Tofu* by Shurtleff and Aoyagi. Plus original recipes for: Miso soup. Soybean festival (using cooked whole dry soybeans).

3428. Chiang, Jung-feng; Schrecker, Ellen. 1976. Mrs. Chiang's Szechwan cookbook. New York, Hagerstown, San Francisco, London: Harper & Row, Publishers. xxi + 359 p. Illust. Index. 24 cm.
• ***Summary:*** The Preface begins: "I met Chiang Jung-feng in 1969 in Taipei, Taiwan, where my husband, John, and I had gone to pursue John's Chinese language studies and our love of Chinese food. She began as our cook and housekeeper; she soon became a friend and teacher and eventually co-author of this cookbook. Jung-feng was born and raised on a farm on the outskirts of Chengtu, the culinary heart of the province of Szechwan."

The romanization is in pinyin. Chapter 12, titled "Bean curd" (p. 218-32) is exceptional; the introduction is one of the best seen to date. The chapter contains four tofu recipes, including Pock-marked ma's bean curd (*mapo doufu*). The chapter begins: "Every culture has its children's food–things that everybody eats but children dote on. In this country [USA] it might be hot dogs or pizza; in Szechwan it was bean curd. Older people loved rich meat dishes, but children had less developed palates and adored the clear, fresh taste and soft texture of bean curd. Mrs. Chiang's own favorite food when she was a child, the bean curd she ate was particularly delicious because it was homemade..."

"'My mother would grind fresh soybeans very fine, then combine them with water to make a kind of soybean 'milk,' When she added a certain chemical (probably gypsum) to this, it coagulated instantly. Then she hung the mixture to drain in a cloth bag for several days; at the end there was a mild, creamy bean curd with a texture as smooth as silk. We ate it several times a week..."

"There are many types of bean curd. Fresh bean curd is the commonest. It comes in soft, white cakes about 1 inch thick and 3 to 4 inches square. It has the consistency of hard custard, and, though fragile and perishable, it can be kept for a week in the refrigerator if you store it in an uncovered bowl of water and change the water every other day."

"Bean curd comes in many other, less common forms. Dry bean curd, or *doufugan,* isn't dry at all. It is just regular bean curd that has been aged [sic] and pressed until it becomes brown on the outside. It is especially delicious boiled with soy sauce and spices and then sliced and served cold."

Note 1. This is the earliest English-language document seen (April 2013) that uses the word "doufugan" to refer to Chinese-style pressed tofu.

"Fried bean curd balls, or *youdoufu* are really dry–light, porous balls that, when soaked, become spongy. Their strange texture and mild taste make them greatly prized in vegetarian *haute cuisine.*

"Bean curd skin [yuba], another form, comes in thin, shiny brittle sheets."

"There is also [in Taiwan] 'stinking bean curd' [stinky tofu], which the process of fermentation has transformed into a substance strikingly similar to some of the stronger cheeses.

"Finally, there is pickled bean curd [fermented tofu], or *doufu lu.* It was popular in Szechwan and was what Mrs. Chiang's family often ate with rice for breakfast. Chinese groceries occasionally carry jars of the highly spiced Szechwanese version of the stuff. Eaten on top of some plain white rice, it is an amazing gastronomic experience, though not one recommended for the weak in palate. Mrs. Chiang claims that the pickled bean curd her mother made was both hotter and more fragrant." One other bean curd recipe is given on pages 98-103.

One yuba recipe is: Bean curd skin soup (*fuzhu tang*, with "4 sheets dried bean curd skin," p. 267-68).

Note 2. This is the earliest English-language document seen (June 2012) that uses the word *fuzhu* to refer to dried yuba sticks.

One recipe using fermented black soybeans is: Black beans, green peppers, and pork shreds (*heidouchi qingjiao chao rousi,* with "3/4 cup dried salted black beans," p. 108-10. "Dried, salted black beans entered Szechwan from the outside, probably either from Canton or Hunan. Because they were not indigenous, Mrs. Chiang's mother rarely cooked with them, though when she did the results were always delicious. She used them mainly in simple stir-fried dishes, for the black beans have such a strong and complicated flavor that they [can] dominate any dish to which they are added").

Chapter 16, "Pickles, appetizers, and garnishes" contains a recipe titled simply "Soybeans" (*tangcu douz,* with "1½ cups dried soybeans," p. 338-40. "Whenever Mr. Chiang's father invited a group of cronies or relatives over, her mother would make up a large batch of soybeans to serve with the wine. These crunchy, spicy beans are the traditional accompaniment of a Szechwanese drinking session, just as salted peanuts are in America." After being rinsed, the soybeans are dry roasted in a wok for about 10 minutes, or until slightly brown).

Note 3. The author is given as Chiang Jung-feng, with Ellen Schrecker and John Schrecker. The section on "Ingredients" includes: Bean curd (*doufu*). Chinese red beans (*dousha*).

"Dried, salted black beans (*douchi*)*:* These dried, salted black beans impart such a delightfully pungent, sour,

© Copyright Soyinfo Center 2013

and salty taste to dishes that, even though they are not Szechwanese in origin, Mrs. Chiang likes to cook with them. They are small, about the size of a pea, black, and partially dried. They come in plastic bags or tins and are available at Chinese markets."

Dried seaweed (*zicai*). Hoisin sauce (*haixian jiang*)*:* Very similar to *tianmian jiang.* Monosodium glutamate (*and why we don't use it*). Soy sauce (*jiangyou*). "Soy sauce was such an important condiment in the large and busy peasant household where Mrs. Chiang grew up that the family made it own." It "was aged in huge earthenware vats." "Both light and dark soy sauces were produced, as well as a rather unusual sweet variety." Mrs. Chiang "finds Kikkoman soy sauce particularly good." The difference between light and dark soy sauces is "a question of color," not of taste or texture. "Mrs. Chiang, then, uses Kikkoman soy sauce in all her cooking."

Page 203: John "found that the word 'ketchup' originally came into English from a Chinese word in the Fukienese dialect, *ke-tsiap,* which could well mean 'tomato paste.'"

3429. Clamp, Betty Ann. 1976. Cooking with low-cost proteins: Nutritious, economical, and easy recipes using less familiar protein sources. New York, NY: Arco Publishing Co. 176 p. Index. [27 ref]

• ***Summary:*** Contents: Introduction. What protein is. Foods which supply protein. Why we need protein. Protein's relationship to a total menu plan. Recipes: Soybeans, tofu, textured vegetable protein (TVP), legumes, grains, nuts, and seeds, breads, eggs and cheese, meat stretchers, fish. References.

Given the relatively early date of this book, there is a fairly large amount of information about tofu, including nutritive value, cooking tips and 22 recipes. Some of this was supplied by The Quong Hop Company of South San Francisco. The are also 15 recipes using TVP [textured soy flour].

The author graduated Phi Beta Kappa and With Honors from the University of California at Berkeley, with a major in Home Economics. After earning a Masters Degree from Cal in Nutrition, she taught home economics in high school for 5 years and is presently assistant prof. at Ohlone College in Fremont, California. Address: USA.

3430. Cunard, A.C. 1976. Grain legumes in Malaysia. In: M.A. Rifai, ed. 1976. ASEAN Grain Legumes. Bogor, Indonesia: Central Research Institute of Agriculture. v + 225 p. See p. 9-15. [6 ref]

• ***Summary:*** Soybeans are used for the preparation of soy products such as bean curd, sprouts and sauces. In 1971 Malaysia imported 20,699 tons of soybeans, 3,155 tons of soybean flour, 673 tons of soybean oil, and 21,744 tons of oil cake of soybeans [soybean meal]. The peanut is much more widely grown in Malaysia than the soybean; 83% of the soybeans grown in Malaysia are grown in the state of Pahang. Address: MARDI, Kuala Lumpur, Malaysia.

3431. Dinaburg, Kathy; Akel, D'Ann Ausherman. 1976. Nutrition survival kit: A natural foods recipe and reference guide. San Francisco, California: Panjandrum Press and MidPress Productions. viii + 248 p. Illust. Index. 23 cm. [152 endnotes]

• ***Summary:*** This book advocates a natural-food lacto-ovo vegetarian diet in place of a junk-food meat-centered diet.

Chapter 6, which emphasizes the importance of dietary fiber–found in whole grains and many other natural foods–advises (p. 110) that cooks use 2 tablespoons of soy granules for every cup (dry measure) of grain or grain product cooked. This will not affect the texture or taste, but it will usually raise the NPU to a level comparable to or greater than that of meat. On page 119 in this chapter is a recipe for Grainburgers (with soy grits or granules and "tamari sauce).

The section on "Sprouts" (p. 164-66) includes soy sprouts (good stir fried) and sprouting instructions.

Chapter 8, titled "Meat is Bean Replaced" (p. 168-88) discusses: vegetarianism, federal meat inspection, DES (hormones in animal feeds), antibiotics in animal feeds, beef and cancer, world famine, meat and ecology, lost protein, protein, essential amino acids and Net Protein Utilization, cost of 100 gm of usable protein, nutritional value and cost comparison of meat and non-meat foods, mutual supplementation, the "cost" of meat protein, lingering meat myths, soybeans. Soy recipes: Soybeans (pressure cooked). Soybeans (not pressure cooked). Baked beans. Soy cheese (homemade tofu). Soybean curry. Mexican beans (soybean frijoles refritos). Soybean chili (incl. "vege burger"). Bean and/or grain patties.

Note 1. This is the English-language document seen (Jan. 2007) that contains the term "Grainburgers" (or "Grainburger") or the term "vege burger" (or "vege burgers").

Note 2. A paperback edition was published in May 1978 by Jove/HBJ.

3432. Duquette, Susan. 1976. Sunburst Farm family cookbook. Santa Barbara, California: Woodbridge Press Publishing Co. 303 p. Illust. by Donna Wright. Photographs by Mehosh Dziadzio. From the Brotherhood of the Sun. Recipe index. 23 cm.

• ***Summary:*** "The Brotherhood of the Sun is a family of more than 300 people, who have dedicated themselves to living in harmony with all people and all things. Our desire is to follow the simple laws of God and nature. In order to create an environment in which this is possible, we have established four communities upon thousands of acres of farm and ranch land in the coastal mountains around Santa Barbara, California... In order to help support ourselves and to share with other people our way of life, we have

© Copyright Soyinfo Center 2013

established a large organic foods complex in Santa Barbara called Sunburst Organic Foods.

"This organization includes a large wholesale warehouse that ships food to stores across the country, six large retail markets (with future markets projected along the coast), a community store, a restaurant called 'The Farmer and the Fisherman,' a whole-grain bakery and a fresh juice-bottling plant that distributes along the west coast."

Although this natural foods cookbook is not entirely vegetarian (it includes a chapter titled "Fish," p. 100-123, and many fish and shellfish recipes), the rest of the book is vegetarian and one long chapter (p. 64-99) is titled "Vegetarian Main Dishes." The illustrations are beautiful.

Soy-related recipes include: Tofu-vegie soup (p. 17). Miso-onion soup (p. 17). Many recipes topped with "Baco-bits." Bean salad (with soy beans, p. 35). Sprouts (incl. soy sprouts, p. 38-39). Tamari-onion gravy (p. 63). Enchiladas (filled with tofu or soy beans, p. 85). Corn pudding with Baco-Bits (p. 168). Soy flour cakes (pancakes, p. 268).

The chapter titled "Beans and pasta" (p. 124-39) has a section on Soybeans subtitled "Or: How to get protein without really trying." Recipes and descriptions include: How to cook whole soybeans (with or without pressure). Soybean loaf. Soyburgers. Soy milk. Tofu (curded with lemon juice or vinegar). Tamari and miso. Cheese-soybean soup. Soy nuts. Soy grits. Soy flakes. Soybean cheese spread.

The Glossary (p. 295-97) contains descriptions of gluten, lecithin (from the soybean), miso, protein powder, tamari, seaweeds, tofu. Address: Santa Barbara, California.

3433. Essen, Berty van. 1976. Vegetarisch kookboek [Vegetarian cookbook]. Bussum, Netherlands: C.A.J. van Dishoeck. 126 p. Illust. 22 cm. Recipe index. [Dut]
• ***Summary:*** Soy-related recipes include: Fried tofu (Gebakken tahoe, p. 38). Soybean dish with vegetables (Sojabonenschotel met groenten, p. 104-05). Fried tempeh (Gebakken tempé, p. 106). Address: Hilversum, Netherlands.

3434. Farr, Barbara. 1976. Super soy!: Delicious protein without meat. New Canaan, Connecticut: Keats Publishing Co. 151 p. Index of recipes. 21 cm. [9 ref]
• ***Summary:*** Contents: 1. Magic bean. 2. Soybeans and nutrition. 3. A glossary of soy (and other things)–With a table giving nutritional information for each; bran, dried soybeans, green soybeans, lecithin, miso, nutritional yeast, sesame tahini, soy granules or grits (toasted), soybean oil, soybean powder (also called soybean flour; full-fat soy powder, low-fat soy powder, defatted-fat soy powder), soy protein isolate, soy sauce, soybean sprouts, tofu, yogurt (soy or dairy).

4. Basic techniques with soybeans. 5. Appetizers and snacks. 6. Soups and breakfast dishes. 7. Main dishes. 8. Breads, etc. 9. Sweet things. Bibliography. Note: Contains many recipes.

Dedication: "This book is dedicated to the most inspiring health-seeker: Gayelord Hauser."

3435. Friedlander, Barbara. 1976. The Findhorn cookbook: An approach to cooking with consciousness. New York, NY: Grosset & Dunlap. xv + 264 p. Introduction by David Spangler. Index. 23 cm. [20+ ref]
• ***Summary:*** A vegetarian cookbook created by this famous spiritual community at Findhorn, in northeastern Scotland, on a sandy, barren piece of land on a peninsula between the Firth of Moray (part of the North Sea) and Findhorn Bay. In 1962 Peter and Eileen Caddy, their three young sons, and a friend, Dorothy Maclean, came to live there (see photo, p. 76)–following spiritual guidance. Peter and Eileen are British.

Barbara first arrived at the Findhorn Caravan Park in Feb. 1974; she stayed for only 4 days. She returned later that year to live for 6 months, working primarily in the kitchen, to write this book. The first part of the book (to p. 21) is about the spirit and inspiring basic principles of the Findhorn community.

Soyfoods are mentioned occasionally throughout the book. Tamari may be used as a seasoning during sauté-steaming (p. 66). Tofu (bean curd) can be added to a variety of dishes (p. 72). Soy-related recipes: "Soy bread" (made with soy flour plus wheat flour, and miso, p. 151). Baked soybeans (p. 164. "There are never enough recipes for this valuable bean"). Baked soyburgers (with cooked, mashed whole soybeans and miso, p. 164-65). Fried soyburgers (with cooked, mashed whole soybeans, soy oil, tamari, and miso, p. 165). Tamari ginger sauce (p. 220-21). Homemade tofu (makes 10 pints, p. 224-25. Curded with vinegar or lemon juice. Tofu can be added, cubed, to miso soup, used in tofu and scrambled eggs, or made into salad dressing).

Note: This is the earliest document seen (Jan. 2013) that contains the term "Baked soyburgers" (or "Baked soyburger," regardless of capitalization), or the term "Fried soyburgers."

3436. Hakim, Rusli. 1976. Grain legumes in Indonesia. In: M.A. Rifai, ed. 1976. ASEAN Grain Legumes. Bogor, Indonesia: Central Research Institute of Agriculture. 225 p. See p. 1-7. [3 ref]
• ***Summary:*** Grain legumes have long been grown in Indonesia; traditional uses include bean curd [tofu], tempe [tempeh], oncom [onchom], soysauce, soypaste, and roasted nuts.

Tables show: (1) A ten year average of production, acreage, and yield of soybeans in Indonesia, 1961-1971–by province. The provinces with the highest average production are: East Java (Jawa Timur) 249,651. Central Java (Jawa Tengah) 75,775. West Nusa Tenggara (Nusa Tenggara Barat) 26,659. West Java (Jawa Barat) 18,319. Yogyakarta 11,952.

• ***Summary:*** The new product, named FibraTofu, containing fiber in the form of pulverized soybean hulls, was developed for the elderly. It has a very bland flavor and is an excellent source of protein, calcium, and dietary fiber, but with very low levels of sodium and saturated fat, and no cholesterol. Address: Illinois.

3438. Hermana, -. 1976. Saving the protein waste from processing of legumes in Indonesia. In: M.A. Rifai, ed. 1976. ASEAN Grain Legumes. Bogor, Indonesia: Central Research Institute of Agriculture. 225 p. See p. 195-200. [11 ref]
• ***Summary:*** Contents: Introduction. The protein waste: Peanut soybean, mungbean. Utilization of the waste.

Tables show: (1) Food legumes available in Indonesia. The three columns are: Latin name, English name, and Indonesian name. Shows 22 food legumes available in Indonesia, from Ochse (1931) and Aykroyd (1969).

(2) Food legumes usually processed. Discusses hunkwe, made by extracting the starch from the mung bean or kacang ijo (*Vigna radiata*, now *Phaseolus aureus*) with water.

(3) Indonesian fermented foods made from waste products. Include dage (made from oncom), oncom (made from peanut presscake or okara), tempe bongkrek (made from coconut presscake), tempe gembus (okara tempeh), tempe mata kedele (made from the hypocotyl of the soybean).

(4) Nutritive composition of kecap (per cent): Both peanut kecap and soybean kecap. Address: Nutrition Research Inst., Bogor, Indonesia.

3439. Hitomi, Hitsudai; Shimada, Isao. 1976. Honchô shokkan [A mirror of food in this dynasty. 5 vols.]. Tokyo: Heibonsha. 18 cm. Translation from the 1697 Chinese-language edition by Isao Shimada of the *Pen chao shih chien.* [Jap]*
• ***Summary:*** See Hitomi 1695. He died in 1701.

3440. Iwadare, Shoji. 1976. Miso, nattô, tôfu kenkô-hô [Miso, natto, tofu: The way to health]. Tokyo: Yomiuri Shinbun-sha. 238 p. Illust. 18 cm. [Jap]
• ***Summary:*** Soyfoods Center has done a 10-page typed translation of the natto section of this book. Contents: Legends of natto's origin: Pinch hitter in times of food shortage, natto's stringiness surprised people of the Yayoi period (200 B.C.–A.D. 250), Hachimantaro Yoshiie–Natto's first public relations agent (1051-1085), calling out "natto, natto" starting in the Edo period (1603), areas where natto is popular today.

The technical revolution in natto production: Pioneers of commercial natto production (Drs. Yabe, Sawamura, Hanzawa), University Natto sold by Hokkaido University, what kind of natto is most delicious?

The effectiveness of natto: The procreative power of natto bacteria promotes long life in people who eat natto, natto can cure diarrhea, natto suppresses typhus and cholera bacteria (in 1936 Dr. Matsumura, a Kyoto University bacteriologist, found with rabbits that natto bacteria actually killed typhus bacteria), natto does the following–helps people with weak stomach and intestines, prevents intestinal gas, fights cancer (Kameda 1967), prevents radiation harm (via dipicolinic acid, which was first discovered in natto and later found in all bacterial cells; it binds heavy metals like radioactive strontium and expels them from the body), prevents infant milk allergy, contains vitamin B-2 which increases stamina, rejuvenates the cells.

Natto throughout the provinces: Hikiwari natto from Tsugaru, Hikiwari natto from Akita (the birthplace of natto is said to be Oyashin-machi in Yokote city, Akita prefecture; charred soybeans mixed with Yayoi period earthenware pottery from 2,000 years ago have been excavated from ruins at nearby Mt. Komori), Hettsui natto from Saitama prefecture, Naisho mame from Gunma prefecture, small-bean natto from Mito, Tataki natto from Kyoto, Koru mame from Higo.

Seasonal natto recipes: Spring, summer, fall, winter, all four seasons.

Natto's springiness surprised people of the Yayoi period (200 BC–250 AD): There are various legends regarding the origin of natto but all begin with the meeting of cooked soybeans and rice straw. No documents record this origin. Yet soybeans and rice straw are known to have existed in Japan since the Yayoi period. Perhaps a piece of rice straw fell into a portion of leftover soybeans. In pit dwellings with rice straw roofs, rice straw littered the floor and the rooms were warm. At the proper temperature (how?) the beans would develop stickiness/strings and a good flavor result. The subtle sweetness of rice straw added to the unique aroma. Some may have eaten the natto sprinkled with salt. Once you've tasted natto you can never forget the flavor. Some women may then have incubated natto next to their bodies overnight in bed. The Yayoi era is concealed in the transmission of Hikiwari natto since ancient times in the northeast prefectures.

There is also the legend that cooked soybeans were offered at household Shinto shrines on which there was often a rope of braided rice straw (*shimenawa*). (The first character of the word natto means "to offer.") The bacteria from the straw may have inoculated the beans; it is generally thought that they were developed in Japan.

Hachimantaro Yoshiie was a general of the Genji clan

© Copyright Soyinfo Center 2013

during the wars of 1051 and 1085. One night during the war the soldiers were cooking soybeans for horse fodder when they were suddenly attacked. They quickly packed the beans into a rice-straw sack (*tawara*), tied the bag to a horse's back and battled for several days. Finally, the battle over, they took the bundle off the warm horse's back and opened it to find that the cooked soybeans had fermented to become natto. In the second war, Yoshiie had captured a fortress in Sankanbu Akita in northern Japan. He wanted to give cooked soybeans to the local farmers as a gift but since he was in a hurry and had no other container, he put them in a rice-straw sack and gave it to them. All were surprised when, after several days, the beans gave off a unique odor and were stringy. The farmers liked the flavor and soon adopted natto as a food. Yoshiie, having enjoyed natto, recommended it to his fellow men. The farmers soon learned of this and began producing natto. The tradition has been passed down from generation to generation.

After his conquests in Northern Japan, Yoshiie's army returned to Kyoto and he taught people along the way how to make natto. The people of Sankanbu in Akita, far from the sea, had little fish or other animal protein in their diet and must have delighted in natto. The route taken by Yoshiie back to Kyoto has been called the 'natto road.'

Page 141: The word "natto" first appeared in 1286 in the *Shinsaru Gakki*, by Fujiwara Myoe,... Address: Tokyo, Japan. President of Manyu Eiyo KK. Teaching at Nihon Daigaku Daigaku-in and Meiji Daigaku Nôgaku-bu. Prof. at Shobirin Joshi Tanki Daigaku.

3441. Jordan, Julie. 1976. Wings of life: Vegetarian cookery. Trumansburg, New York: The Crossing Press. 255 p. Illust. by Joanne Leary. Index. 23 cm. A Crossing Cookbook. Excerpted in Mother Earth News, March 1978.
• ***Summary:*** This is the favorite vegetarian cookbook of the Bloodroot Collective. Page 16 recommends soy flour as a fortifier for bread. Pages 83-84 describe whole soybeans. The section titled "Additions to stir-fried vegetables" includes tamari and soy sauce, soybean skins [yuba], and tofu. Soy-related recipes include: Charlotte's master sauce (featuring tamari, p. 216). Homemade tofu (p. 241, curded with Epsom salts). Address: New York.

3442. Lee, Calvin B.T.; Lee, Audrey Evans. 1976. The gourmet Chinese regional cookbook. Secaucus, New Jersey: Castle Books, a division of Book Sales Inc. 322 p. Illust. Map. General index. Recipe index. 24 cm.
• ***Summary:*** This book divides China into four regions (East, north, west and south). A detailed description of the food of each region is given. The recipes are placed in the appropriate region. Thereafter, there are chapters on: Chinese cooking at home. Ingredients for Chinese cooking. Chinese groceries that accept mail orders.

East China (characterized by Shanghai): Soy sauces are widely used (p. 33). "The Hakkas, or 'guest people,' who migrated to Fukien centuries ago from Honan in the north... Not surprisingly more than one hundred languages and dialects may be found in Fukien alone." "Although Fukien is known for its fine soy sauces, very little is used in any one dish.

Soy-related dishes: Red-cooked chicken (with 1¼ cups light soy sauce" and "1 cup dark soy sauce," p. 35). Braised pork and bean curd (with "3 bean curds," p. 51). Ningpo fried fish roll with bean curd sheets (the sheets "are dried, thin, and fragile. When deep-fried, as in this recipe, they become very flaky and crisp." With 2 sheets dried bean curd [yuba], p. 59). Crab meat, watercress, and bean curd soup (with "2 bean curds," p. 77). Shanghai spring rolls (with "2 pressed bean curds," p. 81). Red wine sediment paste (with 1½ tablespoons red bean paste," p. 83).

North China (Kansu, Shensi, Shansi, Honan, Hopeh, Shantung; this is China's ancient heartland). Recipes: Peking fried bean curd (with "2 bean curds," p. 115). Lamb soup with dried bean curd (with "2 ounces dried bean curd {sliced type}," p. 118).

West China (Szechwan, Yunnan, Kweichow, Hunan, Hupeh; this is a world unto itself), Recipes: Spicy ground pork and bean curd (p. 147). Chunking beef with black bean sauce ("Like the Cantonese, the western Chinese appreciate the salty pungency of fermented black beans" With "2 tablespoons black [soy] beans," p. 153). Yunnan lamb with curry and black beans [fermented black soybeans], p. 156. Yunnan steamed fish, with curry and black bean sauce (with "2 tablespoons [fermented] black beans," p. 162). Scallops with black bean sauce, p. 166. Ma Po bean curd (also called "Grandmother Pockmark's bean curd," with "4 bean curds," p. 170).

South China (Kwangtung and Kwangsi; Canton has long been a city of trade, starting in about AD 300 when the first Arab merchants arrived). Recipes: Pork with black beans and broccoli (with "2 tablespoons black beans," p. 199). Steamed spareribs with black beans sauce, p. 206. Beef with asparagus and black beans (with "2 tablespoons black beans," p. 209). Beef with bean curd and oyster sauce, p. 214. Fried fish with bean curd, p. 223. Steamed stuffed bean curd (with "6 bean curds," p. 235). Bean curd soup, p. 240.

The section titled "Ingredients for Chinese cooking" (p. 281-305) includes: Bean curd (dow foo). Black beans (dow see, they have a strong affinity for garlic. Sometimes called "fermented black beans). Dried bean curd (tiem jook [sweet dried yuba sticks]. "This dried soy milk sediment comes in thick, shiny sheets"). Dried bean curd sheets (these fragile semicircles come packaged in a large envelope). Hoisin sauce (Hoi sin jeung). Ketchup ("Curiously enough, the word 'ketchup' is derived from the Chinese words meaning 'brine of pickled fish'). Monosodium glutamate (Mee jing). Peanut butter: See sesame paste. Peanut oil (Far sung yow. Lard is the principal cooking fat or oil in China. "It has

© Copyright Soyinfo Center 2013

the advantage of giving a clear color and a rich flavor to whatever is cooked in it. It unfortunately has disadvantages as well... Peanut oil, on the other hand, tastes very much the same as the best Chinese lards and has none of lard's disadvantages). Pressed bean curd (dow foo gon [doufu-gan]). Red bean curd (nom yu [fermented tofu]). Roasted peanuts. Sesame oil (Ma you; add small quantities just after the dish is removed from the heat). Sesame paste (Jee ma jeung): "Substitute creamy peanut butter thinned slightly with sesame oil." Sesame seeds (Jee ma; white or black). Soy sauces ("Soy sauce is certainly the most frequently used ingredient in Chinese cooking It is also one of the most variable, ranging from light to dark, from thin to rich, from salty to almost sweet." Light soy sauce is Sang chau, and dark soy sauce is See au, sometimes called black soy sauce).

Calvin Lee was born and raised in New York City. His entry into the world of gastronomy occurred at age 17, as a result of his father's death, leaving him as the general manager of Lee's Restaurant, at that time New York's oldest Chinese restaurant. Address: 1. Chancellor, Univ. of Maryland, Baltimore.

3443. Leung, Mai. 1976. The classic Chinese cook book. New York, NY: Harper's Magazine Press. xv + 363 p. Illust. (line drawings by Claude Martinot). Map. Index. 24 cm.
• ***Summary:*** A remarkable book by a excellent cook and writer with much experience in China (where she was born and raised), Hong Kong (with outstanding chefs), and New York (with more fine chefs). An interesting map of China shows the major culinary regions. The illustrations contribute greatly to the book.

Each recipe is accompanied by its Chinese characters but with no romanization / transliteration. MSG is an optional ingredient in many recipes. Soy related recipes: Chicken with walnuts in hot bean sauce (the sauce mixture includes "6 teaspoons ground bean sauce, 4 teaspoons hoisin sauce, 4 teaspoons black soy sauce," p. 56-57). Soy sauce chicken (with "½ cup black soy sauce," p. 66). Chicken in hoisin sauce (the sauce mixture includes "6 tablespoons hoisin sauce, 2 tablespoons black soy sauce," p. 67). Egg yolk fish cakes with soy vinegar dip (p. 87-88).

The chapter titled "Duck" (p. 91-93) describes how Peking ducks are a different breed from other ducks, how they are raised and force-fed in Hong Kong before being killed. The recipe for Peking duck (p. 109-11) describes the origin of Peking duck in about 1855 in Peking. "Pen Yee Inn, a restaurant specializing in chicken and duck dishes, created the method that made Peking duck a star. The dish was purely for the very rich, and the primary interest was the crisp skin." Traditionally it required "three months of training just to learn to kill and dress the duck correctly." This recipe calls for either Hoisin sauce dip or Bean sauce dip. The next recipe is Red-cooked duckling with lettuce in soy sauce (p. 111-12).

The recipe titled "Childbirth ginger" explains: "In Kwantung Province, after a woman gave birth to a child, it was the duty of the mother-in-law to prepare a big pot of this ginger for her daughter-in-law to regain her strength." Rich in calcium, the supply had to last for a month.

More soy related recipes: Beef with baby corn and Chinese mushrooms in black bean sauce (with "2 tablespoons salted black beans: rinse in hot water, drain, and mash into paste," p. 158-59). Fish slices in garlic and black bean sauce (p. 183-84). Fried mock plums ("For this dish, shrimp paste is rolled up in bean curd skin to form a long cylinder." With "2 pieces dried bean curd skin, each 5 by 10 inches," p. 184-85). Soft shell crabs in black bean and chili sauce (p. 202-03).

The chapter titled "Vegetables and bean curd (p. 205-31) begins: "I do not understand why so many Westerners cook their vegetables as if they were cooking potatoes." They are "cooked so much that they all taste the same, like cooked potatoes–dull, mushy, and lifeless." "Fresh bean curd is made of soybeans... [sold in] cakes 1 inch thick and 2 to 4 inches square. Smooth, fragile, custardlike, and ivory colored, bean curd itself is bland in taste, but it quickly absorbs flavor from other ingredients with which it is cooked. As it is inexpensive and high in protein, bean curd serves the purpose of meat and milk for many Chinese in addition to being used as a vegetable. Bean curd is a nutritious and well-loved food. My grandmother used to say, 'Eat bean curd every day and your eyes will shine like the autumn moon, your skin will be smooth, and your hair soft and black.' Generally available in Oriental grocery stores, bean curd is carried in relatively few supermarkets. The canned variety is not acceptable as a substitute for fresh bean curd. Store in a jar, cover with water, and change water daily. It will keep for a week or more." In recipes that call for bean sprouts, Chinese prefer mung bean sprouts that are fresh, white, firm, and dry–not brownish, limp and watery. Never, never used canned bean sprouts.

Buddhist delight (vegetarian, with "4 fried bean curd puffs: cut each into 4 pieces," p. 225-26).

Note: This is the earliest English-language document seen (April 2013) that contains the term "fried bean curd puffs." Pockmarked woman's spiced bean curd [Mapo doufu] ("It is said that the wife of a cook named Chan, who lived in Szechwan [Sichuan] more than a century ago, created this bean curd recipe. Mrs. Chan's face was pockmarked." With "1 pound fresh bean curd: rinse in cold water, cut into ½-inch cubes," p. 228-29). Hakka stuffed bean curd ("Hakka cooking is well known for its bean curd dishes. This stuffed bean curd is one of the most popular and well-loved among Chinese." With "3 pieces fresh bean curd, each about 3 inches square: pat dry with paper towels, cut each square into 4 triangles, slice some bean curd out of the middle of one side of triangle to make pocket for stuffing," p. 229-30). Stir-fried bean curd with pork shreds (p. 231).

© Copyright Soyinfo Center 2013

The chapter titled "Sauces and dips" includes: Bean sauce dip (with "4 tablespoons Szechwan sweet bean sauce or ground bean sauce," p. 305). Fresh chili-soy dip (with "6 tablespoons black soy sauce," p. 308). Hoisin sauce dip (p. 309). Soy-chili dip. Soy-sesame dip. Oil-oyster sauce dip (with "6 tablespoons oyster-flavored sauce," p. 310). Soy-vinegar dip (with "4 tablespoons thin soy sauce," p. 311).

The chapter titled "Chinese cooking ingredients with information on storing" is an expanded glossary. Each entry is accompanied by its Chinese characters but no romanization. It includes: Bean curd (fresh). Bean curd cheese (red) ("Labeled as red bean cheese, 2 inches square and about 1 inch thick"). Bean curd puffs (fried) ("Golden color, fluffy and spongy, cushionlike square cakes"). Bean curd skins [yuba] (plain, dried) ("Shiny, light yellow, approximately 6 by 10 inch paper-thin skin, dried and brittle. It is the rich cream that floats atop the" soybean milk made from yellow soybeans). Bean paste (sweet red) [azuki *an*] ("Made from puréeing Chinese red beans, sugar and shortening").

Bean sauces: (1) Ground bean sauce "Also known as brown bean sauce or brown bean paste. Brown, thick, puréed sauce made from yellow soybeans, flour, salt, and water; salty and pungent. Sold in cans." (2) Szechwan chili bean sauce. (3) Szechwan sweet bean sauce. "Labeled as sweet bean paste sometimes. Not sweet, but salty and pungent."

Black beans (salted) ("Black [soy] beans preserved in ginger, garlic, salt, and spices; used as seasoning"). Hoisin sauce ("Means 'seafood sauce' in Chinese. Made from soybeans, water, garlic, chili, flour, and spices"). MSG ("Monosodium glutamate, which the Chinese call 'taste powder.' The Chinese extracted it from soybean protein and have been using it for at least a century... It should be used sparingly. Sold under the brand name Accent"). Oil (Chinese prefer to use peanut oil. "But I find corn oil equally good in the United States"). Oyster-flavored sauce (No mention of soy as an ingredient). Sesame seed oil ("Savory, aromatic, topaz-colored [brown] oil made from roasted white sesame seeds"). Sesame seed paste (Since most imported products have lost their taste, "it is much better to use peanut butter. In China, peanut butter and sesame seed paste are used interchangeably in cooking"). Soy sauces ("The most important seasoning in Chinese cooking. Varieties and grades are many... Knowing their differences and using the right kind is the key to good-tasting dishes." The following two types are most frequently used): (1) Black soy sauce ("Also known as dark soy sauce; extract from fermented soybeans, caramel, flour, salt and water; darker and heavier than thin soy sauce, salty but with a slightly sweet taste. Do not buy one labeled 'double dark soy sauce.' It is to salty"). Thin soy sauce ("Also known as light soy sauce; liquid extract from soybeans, flour, salt, and water after slow fermentation under the sun. The first extraction, which is commonly sold in the States, is the best").

The "Shopping list" chapter (p. 343-48) contains an expanded alphabetical list of the English names of Chinese ingredients followed by the name in Chinese characters. Address: Madison, New Jersey.

• ***Summary:*** This general overview discusses soybeans (*Kacang kedelai*), tempeh, soy milk, "tahu or soycurd" [tofu], kecap, taoco [Indonesian-style miso], soy milk, residue of soy milk or tahu [okara] which may be fermented and sold as oncom. The average nutritional composition of the first 6 products is given. Address: Nutrition Research Inst., Jakarta, Indonesia.

3445. Lin, Florence. 1976. Florence Lin's Chinese vegetarian cookbook. New York, NY: Hawthorn Books. xix + 236 p. Illust. by Nai Gi. 24 cm.

• ***Summary:*** Contains a great deal of information on and recipes using soyfoods. Chinese food expert Barbara Tropp says this book has the best glossary available, and has very creative and interesting but drab recipes.

Hoisin sauce is a ground bean sauce to which sugar, garlic, and other flavorings have been added. It is the most popular commercially prepared flavored bean sauce.

Civilized Chinese patterns of eating were established by Confucius. The second great influence was Taoism, which advocated a simple diet, natural foods, and the basic belief that proper eating leads to good health. The third great influence was Buddhism, which was opposed to killing, so advocated a vegetarian diet. The art of vegetarian cookery was initially developed mainly in Buddhist monasteries; later it spread to private homes and restaurants.

To make good meatless broths use soybeans, soy sprouts, tough or wilted vegetables, mushrooms, and / or bamboo shoots. To make soy sprouts, it is best to use new-crop soybeans, which have the highest germination rate. This book contains many recipes that call for sea vegetables. Soy sauce is widely used in Chinese vegetarian recipes.

Chapter 3, titled "Soybeans, soybean products, and other legumes" contains much useful information and recipes. A diagram titled "Chart of soybean products" (p. 53) shows the complex relationships, includes Chinese characters for each product, and shows a few soy products that are not in the Glossary: Fermented soybean curd (*Fu ju*), comes in white (*pai*), red (*hung*) and spiced (*la*). The many interesting recipes, each with a Chinese name (with Chinese characters) and an English name include: *Su huo t'ui and su chi* (Mock ham), *Su ya* (mock pressed duck), and *Wu hsiang tou fu kan* (Seasoned pressed bean curd).

© Copyright Soyinfo Center 2013

Glossary (soybeans, soybean products, and legumes, p. 208-13; Chinese characters are given): "Fresh young soybeans–*Mao tou:"* Delicious. They are in season in the early fall. "They come in dark fuzzy pods and are sold by weight. Young soybeans are like corn and should be eaten as soon as they are picked from the plant. They may be cooked with or without the pods."

"Dried soybeans–*Huang tou:"* Yellow soybeans.

"Soybean sprouts–*Huang tou ya:"* Sold by weight. Best when made in cooler weather. "When bought fresh, they will keep in the refrigerator for 2-3 days, or longer if kept in a brown paper bag inside a plastic bag."

"Soybean milk–*Tou chiang:*... usually served hot as a beverage with breakfast."

"Soybean milk skin–Called by many names [*Fu yi, fu p'i;* see p. 53]. Each region has a different name for it, as does each food processor, and the thickness shape and wrapping may be different." Four kinds are readily available in Chinese food stores" (1) *Erh chu* is "cut into rectangles 1½ x 4 inches and 1/8 inch thick. The pieces some stacked and wrapped in paper, in half- or one-pound packages." (2) *Yüan chu* comes in sticks [dried yuba sticks]. When reconstituted, its thickness is about the same as *erh chu.* (3) *San pien fu chu* is half-moon shaped. When still soft, it is folded into 6 x 10-inch rectangles then dried. It is thinner than *erh chu.* (4) *Fu yi* "is the thinnest of the bean milk skins. It is paper thin and almost transparent. When dried it is very brittle, and must be handled very gently. It is used mainly to wrap fillings. It comes in stacks of 8-10 sheets..."

"Soybean milk residue–*Tou fu cha;"* [okara]. Can be a delicious ingredient in cooking. "What is not used for food is made into a feed for animals or put into the ground as fertilizer."

"Curdled soybean milk–*Tou fu hua:" Hua* means "flowers." These very tender curds are "eaten hot with soy sauce or cold with syrup as a snack." It is "sold only in bean curd factories by the pint."

"Bean curd coagulant–*Shou shih kao"* [calcium sulfate]: A "white substance which comes in powdered form. It is use to coagulate soybean milk to make *tou fu* (bean curd)."

"Tender soybean curd–*Nen tou fu:* When some water is removed from the curdled bean milk, it is known as fresh tender bean curd. It is cut into squares 4 x 4 by 1½ inches.

"Firm soybean curd–*Lao tou fu:* When a coagulant is added to the boiled bean milk of a different concentration and some of the water is removed, the milk becomes firm bean curd. It is firmer than the tender bean curd and is cut into 3 x 3 x 3/4-inch squares.

"Pressed bean curd sheet–*Pai yeh:* Fresh bean curd sheet looks almost like a sheet of unbleached muslin. When it is frozen, the color turns darker, to a light brown. It is made into square sheets of various sizes. It is used to wrap fillings and it is also sometimes cut into short strips and cooked in dishes along with seasoning vegetables. Pressed bean curd sheet is best eaten fresh..."

"Pressed soybean curd–*Tou fu kan*–plain: When even more water is pressed out of firm bean curd, it becomes pressed bean curd... it is almost like a firm cheese." It may be bought either plain (*Pai tou fu kan*) or seasoned (*Wu hsiang tou fu kan*). "The seasoned curd is cooked in soy sauce and star anise [*pa chiao*], giving it a brown color." "The white pressed bean curd should be soaked in salt water (made of 1 tablespoon salt to 4 cups water) in a covered container. The seasoned pressed bean curd should be soaked in salt water and soy sauce. If stored in the coldest part of the refrigerator, they will keep for several weeks."

"Fried soybean curd–*Yu tou fu:*... The bean curd is cut into 1½ inch cubes and deep fried in oil until a golden crust forms outside, which the inside... remains soft." It "is sold by weight, usually in half- or one-pound bags."

"Wheat gluten–*Mien ching:"* (p. 217). "Deep-fried gluten–*Yu mien ching:"* "Fresh or dried wheat gluten–*K'ao fu:"*

Glossary (condiments and seasonings, p. 219-23): "Soy sauce–*Chiang yu:"* The "most important seasoning liquid in Chinese cooking. Comes in light or dark, thick or thin. Dark or thick is *Lao ch'ou.* Light or thin is *Sheng ch'ou.* Soy sauce also comes in different "flavors, such as mushroom soy sauce and, for nonvegetarians, shrimp roe soy sauce. Flavored soy sauces are used mainly for dips and for special flavors in salads, noodles, and as a final touch to a dish."

Note: This is the earliest document seen (April 2012) that uses the term "mushroom soy" or the term "mushroom soy sauce" to refer to a type of dark soy sauce flavored with mushrooms, or that uses the term "Lao ch'ou" to refer to dark or thick Chinese soy sauce.

"Salted black beans–*Tou shih:"* These beans [fermented black soybeans] are "used to flavor bland foods, such as eggplant or bean curd." They are never eaten alone.

"Brown bean sauce–*Yüan shai shih:"* Made from "fermented soybeans and wheat flour mixed with salt and water. The beans in the sauce may be either ground (to make ground brown bean sauce–*Mo yüen shih*), or left whole. To this basic beans sauce, spice and other seasonings are added [in different proportions], creating many varieties" in "different regions of China. In Szechuan, large amounts of hot peppers and crush Szechuan peppercorns are added; in the northern provinces, garlic and scallions are used;..."

"Hoisin sauce–*Hai hsien chiang:"* A "ground bean sauce to which sugar, garlic, and other flavorings have been added. It is the most popular commercially prepared flavored bean sauce. It is used for cooking, or very often as a dip for deep-fried batter-dipped vegetables."

"Sesame paste–*Chih ma chiang:"* "Sesame oil–*Ma yu:"*

9. Chinese ingredients and seasonings. 10. Tables and charts: Measurements and abbreviations. sources of important nutrients, desirable weight for selected heights (for men and women, small, medium or large frame. Source: Metropolitan Life Insurance Co.), minimum daily requirement of calories, certain vitamins and minerals, calories, protein, fat and carbohydrate value of foods used.

11. Recipe index. 12. References. General index. Order forms.

The chapter on "Bean curd "(to fu)" (p. 191-217) contains 22 recipes, each with the English name in bold characters, and the Chinese name both romanized in pinyin and written in Chinese characters. The first of these is a recipe for homemade tofu made from 1 cup soy beans and a choice of five different coagulants. The 2nd recipe in this chapter is "Fried bean curd (to fu), plain fried (*You dou fu*).

Note: This is the earliest English-language document seen (April 2013) that contains the term *You dou fu* (regardless of hyphenation).

For each recipe, the calories, protein, carbohydrates, and fat are calculated. Most recipes call for either "fresh bean curd" or "dry bean curd" (*dou fu gan*). A typical ingredient listing would be "1 lb bean curd, diced."

Other recipes include: Those calling for soy bean sprouts (p. 40, 73, 185 {home grown}). Steamed fish with black beans (*Dou chi zheng yu*, with "3 T black beans {about one ounce}, p. 141). Lobster Cantonese style (with "1½ T black beans, minced," p. 154). Wheat gluten (vegetable steaks) (*mian jing*, p. 186). Vegetarian's delight (*Su shi jin*, with "2 oz. dried bean curd sticks [dried yuba sticks], soaked and cooked." "Soak the dried bean curd sticks with 1 t [teaspoon] soda in hot water for 1 hour; drain. Add fresh cold water and bring to a boil. Drain and cut into 1 inch long pieces") (p. 189-90). Red bean paste (*dou sha*) (p. 269). Many recipes are seasoned with soy sauce.

The section on "Chinese ingredients and seasonings" [glossary] includes: Bean curd or to fu, bean sprouts (the sprouts of mung beans or soy beans), black beans ("Fermented and highly seasoned black soy beans"), calcium sulfate, ginger root, hoisin sauce, monosodium glutamate, mushroom soy sauce ("A newly imported soy sauce from the People's Republic of China... The flavor is excellent..."), oyster sauce (can be used like soy sauce but oyster sauce is saltier), sea weeds, sesame oil, soy sauce.

"About the author: Born and raised in Shanghai, Mainland China, Mrs. Liu completed her education at the National Taiwan University. It was there she met and married her husband, Stephen Liu, presently professor of Microbiology at Eastern Michigan University.

"After the birth of their eldest son, the Lius lived awhile in the United States, then moved to San Paulo, Brazil, where they remained for some years. The Chinese community in Sao Paulo was sizeable and affluent and their cuisine was quite popular. It was during this time that Mrs. Liu kindled her latent interest in cooking which ultimately led to the writing of this book.

"In 1965 the Lius returned to the United States and settled in the Ypsilanti-Ann Arbor area. Mrs. Liu further developed an interest in and took up the study of nutrition at the University of Michigan. She received her Masters degree of Nutrition in the School of Public Health in 1971.

"For some eight years Christine Liu has contributed her cooking and teaching talent to the Ann Arbor community by teaching Creative Chinese Cooking and Nutrition & Diet at the Continuing Education Department of Ann Arbor Public Schools..." The Lius have four children: Ted, Paul, Becky, and Peter. A photo shows Christine Liu. Address: M.P.H., P.O. Box 1332, Ann Arbor, Michigan 48104.

3447. Mallard, Gwen. 1976. Soy bean magic: Delicious recipes with soy beans, flour & grits. Saanichton, British Columbia, and Seattle, Washington: Hancock House Publishers. 80 p. Index. 18 cm.

• ***Summary:*** Contents: 1. Commercially bought soy products: Soy flour, soy grits, soybean milk, soy flakes (fine, or coarse), soybean oil, soybean lecithin, soy lecithin spread (butter substitute), soy noodles, macaroni and spaghetti, soy sauce, soy coffee, roasted soy nuts, baked and green soybeans (canned). 2. Homemade soy products: Soy milk from dry beans, quick soy milk (from soy flour), soy cream (from soy flour), "soy base" (from soy flour), soy cheese from soy flour [tofu] (curded with lemon juice), oven-roasted soybeans, toasted soy flakes (coarse), toasted soy flour, sprouted soybeans. 3. Soybean recipes: Breads 'n breakfasts, soups 'n salads 'n salad dressings, soy suppers, desserts and delights.

To make soy base (p. 14): Slowly add 2 cups cold water to sifted soy flour to make a smooth paste. Stir in 1 teaspoon salt. Place in a double boiler and "cook for 30 minutes over rapidly boiling water. This mixture will be thick when it is cooked. Soy base is ideal for enriching gravies, stews, puddings, and soups. It will also make an excellent sandwich spread." Note: This is the earliest English-language document seen (April 2006) that uses the term "soy base" as a noun in this way; within 10 years the term had acquired a different meaning.

On the rear cover is a biography of Gwen Mallard by Derrick Mallard, her husband. She was born in 1917 in Fernie, British Columbia; she lived with her parents and

© Copyright Soyinfo Center 2013

three brothers in a log cabin in the beautiful Elk Valley among Canada's majestic Rocky Mountains. In 1971 she helped launch a campaign against plans for shipping oil in Alaskan tankers along the coast of British Columbia with the inherent dangers of disastrous oil spills (Note: On 24 March 1989 the tanker Exxon Valdez ran aground and spilled 11 million gallons of heavy crude oil in Alaska's pristine Prince William Sound–the world's worst oil spill in history). Gwen runs a small health food store and restaurant 14 miles north of Victoria, British Columbia. Address: British Columbia, Canada.

Seijinbyô no yobô to biyô [A healthy body and food: Reevaluation of the true value of dried-frozen tofu. Prevention of geriatric diseases and beauty care]. Nagano-ken. 20 p. 21 cm. [Jap]

• ***Summary:*** This research shows that consumption of dried-frozen tofu lowers blood cholesterol in human beings. The experiment used a crossover design. This report was presented by Dr. T. Miyoshi (of Tokushima Univ. Medical Dept.) at the International Nutrition Conference held 3-9 Aug. 1975 in Kyoto, Japan. It is based on research conducted by Dr. T. Fukui (presently director of the National Nutrition Research Center) and his group of 6. The 3-month study was conducted in the fall of 1974, when Dr. Fukui was a professor at Tokushima Univ. Medical Dept. There were 6 human subject, 4 men and 2 women, ages 27-62. In the experiment, each person consumed his or her regular diet for 4 days, then meat-centered meals for 10 days, then meals based on dried-frozen tofu for 39 days, then regular meals for 18 days, then meat centered meals for 9 days. Recipes are given. Cholesterol levels for each person were monitored and graphed. They rose during the meat-eating period, dropped during the tofu-eating, and rose again during the meat-eating period. Address: Nagano, Japan.

3449. Nippon Torui Kikin Kyokai. 1976. Daizu ni kansuru bunken mokuroku [List of documents on soybeans and soyfoods]. Tokyo: NTKK. Vol. 2, post 1961. 93 p. [Jap] Address: Tokyo, Japan.

3450. Nix, Janeth Johnson. 1976. Adventures in oriental cooking. San Francisco, California: Ortho Book Division, Chevron Chemical Company. 96 p. Illust. (color). 28 cm. Ortho book series.

• ***Summary:*** By "Oriental" this book means mostly China and Japan. Soy related: Crisp chicken teriyaki (with soy sauce made into teriyaki sauce, p. 14). Tofu salad (with 1 pound soybean cake, p. 15). Fu yu spareribs (with ¼ cup *fu yu*, fermented bean cake, p. 19).

The section on "Ingredients and equipment" (p. 22-31) begins with a full-page color photo in which we can clearly see: Azumaya tofu in a white plastic film-sealed tub, a plastic bag of "salted black bean" [fermented black soybeans] (ingredients: Black beans, ginger and salt), small pieces of deep-fried tofu, miso in plastic tubs, Kikkoman soy sauce in a large rectangular can, Aji-no-Moto in a red can, etc. The text discusses: Soy sauce ("The one essential ingredient in Chinese and Japanese cooking"). Japanese sauces, seasonings, and pickles ("For example, besides soy sauce, you can find low-sodium soy sauce {for specialized diets}, sukiyaki sauce, teriyaki sauce, and soup base for noodles," p. 24).

Note: This is the earliest English-language document seen (May 2011) that mentions "low-sodium soy sauce."

Chinese sauces, seasonings, and pickles, incl. the following which contain soy sauce: oyster sauce, brown bean sauce, Szechwan bean sauce, sweet bean sauce, hot bean sauce. Fermented black beans.

Bean cake–fresh and fried ("Soybean cake is almost as much a staple in Oriental cooking as rice." The regular type is called tofu in Japan and dow-foo in Chinese. But there are other varieties: softer, firmer, dried, fried {comes in cubes, squares, and oblongs...} Fermented bean cake, also called red bean curd, white bean curd, or *fu yu,"* is often sold in jars. Miso, used mainly in Japanese cooking, comes in many colors).

Bean sprouts mean mung bean sprouts. Foods from the sea include Japanese kombu and nori.

In this same section is a sub-section (p. 30-31) titled "The language of Oriental cooking," a glossary that includes: Aburage. Age-zushi. Aka-miso. Buta-dofu ("Pork with soybean cake"). Dow foo pok ("Fried soybean cake"). Fu yu ("Fermented soybean cake, used as a seasoning"). Hoisin ("Thick, slightly sweet Chinese sauce made from a soybean base"). Kitsune-zushi: See Age-zushi. Miso ("Red or white soybean paste"). Miso shiru (Japanese miso soup). Miso-yaki (Broiled food that has been marinated in miso). Monosodium glutamate (A white, crystalline flavor-enhancing agent). Nori. Norimaki. Shiro miso ("White soybean paste"). Shoyu ("Japanese soy sauce"). Sukiyaki. Sumiso. Suribachi. Surikogi. Tempura. Teriyaki. Tofu. Umeboshi. Wakame. Wok. Yin and Yang.

Soy related: Miso soup recipes (3, p. 34). Age-zushi (p. 52). Melting spareribs with black bean sauce (with 2 tablespoons fermented black beans, p. 63). Pork roast with miso (p. 64). Stuffed bean cake (with fried bean cake, p. 64). Sukiyaki (with 1 pound square tofu {soybean cake} cut into 1-inch squares, p. 66-67).

In the section on Oriental vegetables is a long sub-section titled "Soybeans" (with a color photo of green soybeans growing on a plant, p. 94-95) which includes how to grow them in a home garden. The soybean plant has its own time clock, which gets its signal for flowering from the sky. "Short nights (long days) delay flowering; long nights (short days) speed up flowering." Soybeans need a special

inoculant of nitrogen-fixing bacteria. Describes how to cook and shell the beans in the pods, and to serve them cool, while still in the pod, as is commonly done in Japan.

3451. Oiso, Toshio. 1976. History of food and diet in Japan. *Progress in Food and Nutrition Science* 2(1):35-48.
• ***Summary:*** Contents: 1. Fundamental conditions in the history of the food habits of the Japanese. 2. Age of primitive food (Origin of Japanese culture–2nd century B.C.). 3. Age of stabilized rice-eating habits (2nd century B.C. to first half of 3rd century). 4. Ancient tomb age (Latter half of third century to 6th century). 5. First age of tabooing of meat eating (6th century to 8th century). 6. Age of formalization of food habits.

7. Age of warriors' [samurai] diet (13th century to first half of 15th century). 8. Age of Zen-styled food in vogue (Latter half of 15th century to first half of 16th century. 9. Age of imported food culture (Latter half of 16th century to first half of 17th century). 10. Age of completion of Japanese feod (Latter half of 17th century to first half of 19th century). 11. Age of Japanese-Western mixed diet (Latter half of 19th century to the present). 12. Acknowledgements.

Japan has relatively little arable land. Many ancient Japanese rice grains have been found in remains from the Yayoi Era, both round-grain rice (*Oryza sativa*) and elongated rice (*Oryza sativa indica*). Buddhism (and its precept against killing or eating meat) was introduced to Japan in the middle of the 6th century; production of dairy foods gradually faded out. In China the Han culture was flourishing. A centralized nation with an emperor was established at this time.

In the warrior's diet we find unpolished / brown rice, rice cake (mochi), fermented bean past (miso), salted plum (umeboshi), and soy sauce. "Salt was regarded as the most indispensable item" (p. 41). Temples made and sold foods.

In the age of Zen-styled foods the tea ceremony *Chanoyu*) was in vogue, brought to completion by Sen no Roikyu (1521-1591); it was accompanied by the development of the "Kaiseki-style dinner" (*Kaiseki ryôri*). A labeled diagram of this dinner is given–shown from two angles.

After the Tokugawa regime was founded, the shogunate closed Japan to foreigners and most foreign influence; this continued for 219 years, as Japanese food and menus became standardized.

In 1867, the last Shogun abandoned the rule of the Tokugawa clan, which had lasted for 263 years. Emperor Meiji became Japan's ruler and national isolation was ended. Address: National Inst. of Nutrition, 1-Toyamacho, Shinjuku, Tokyo, Japan.

3452. Ortiz, Elisabeth Lambert; Endo, Mitsuko. 1976. The complete book of Japanese cooking. Philadelphia, Pennsylvania: M. Evans and Co., Inc.; Dist. by Lippincott. viii + 250 p. Illust. by Marion Krupp. Index. 24 cm.
• ***Summary:*** A very interesting, well researched, and accurate Japanese cookbook. The illustrations are excellent. Each recipe has its Japanese name in large bold letters and a translation directly below in smaller letters. A hallmark of her writing is that she prefers to use the native language words and terms (e.g., shôyu) rather before giving her translation of them (e.g., soy sauce). This is helpful, since many of her translations have not withstood the test of time. In some cases, however, she fails to catch nuances or chooses to ignore them; e.g., *momen tôfu* should actually be *momen-dôfu*, and *kinugoshi tôfu* should actually be *kinugoshi-dôfu.* Unfortunately, she uses the term "bean paste" to refer to two very different foods: miso and *azuki-an* (see p. 214, 242). A large number of recipes call for various types of *tôfu* ("bean curd") or *miso* ("bean paste)."

Seaweeds (p. 4): "The one single thing that distinguishes Japanese cooking is the use of seaweeds." Kombu is used to make dashi. Nori and wakame are use in many ways.

"The soy bean plays a dominant role in the Japanese kitchen. It comes in the form of *shôyu* (soy sauce), *usukuchi shôyu* (light soy sauce), *momen tôfu* (bean curd), *kinugoshi tôfu* (silky bean curd), *yakidôfu* (broiled bean curd), *koyadôfu* (freeze-dried bean curd), red and white *miso* (bean paste), and so on. Despite their common origin, the products of this versatile bean manage to be very different.

Note 1. This is the earliest document seen (April 2013) that uses the word "silky" or the term "silky bean curd" to refer to *kinugoshi tôfu.*

Note 2. This is the earliest English-language document seen (April 2013) that uses the term *koyadôfu* or the term "freeze-dried bean curd" to refer to dried-frozen tofu.

Soy-related recipes include: Asparagus with malted bean paste (with "moromi miso" and "usukuchi shoyu," p. 27). Dengaku (Bean curd with bean paste, p. 28). Stuffed lotus root (with white miso and mustard, p. 30). Noppei-jiru (vegetable and fried bean curd soup, with "1 *namaage* {type of fried bean curd}" or "2 pieces *aburaage* {fried bean curd}, p. 35). Kenchin-jiru (vegetable soup, with "1 *momen tôfu* {bean curd} weighing about 8 ounces," and "4 tablespoons *miso* {bean paste}, p. 36). Clear soup (suimono) with okra and bean curd (p. 38). Clear soup with bean curd and wakame (p. 38). Satsuma-jiru (Miso soup with mixed vegetables, incl. red and white miso, p. 45). Miso soup with tofu and shungiku (p. 46). Miso soup with wakame (incl. red and white miso, p. 46). Miso soup with oysters and bean curd (p. 47). Sekihan (pink rice with azuki beans, p. 57). Miso udon (p. 63). Kitsune udon (noodles with aburaage, p. 67). Inari-zushi (fried bean curd stuffed with vinegared rice, p. 79). Sole with bean curd and mushrooms (p. 88). Salmon steamed with bean curd (p. 90-91). Mackerel with red miso (p. 95). Fish marinated in miso (p. 102). Clams in miso, mustard, and vinegar sauce (p. 105). Oysters in vinegared miso sauce (p. 106). Satsuma-agé (with mackerel

© Copyright Soyinfo Center 2013

and bean curd cakes, p. 116-17). Oden (with "4 *ganmodoki* {fried bean curd balls}" and "1 *yakidôfu* {broiled bean curd}, about 7 ounces drained weight," p. 120-21). Kaki no dotenabe (oysters with bean paste, p. 124-25). Yudofu (simmered bean curd, p. 130). Sukiyaki (Sautéed beef and vegetables, with "2 *yakidôfu* {broiled bean curd}, 134-35). Grilled beef with bean paste (p. 146). Nikumiso (chicken and vegetables pickled in bean paste, p. 159). Eggplant with bean paste (p. 163). Green beans with bean paste (p. 168). Daikon with fried tofu (p. 171). Turnips with bean paste (p. 173). Cucumber and soy bean sprouts with sesame seeds (p. 183). Spinach salad with tofu (p. 186).

A short section titled "Bean curd dishes" (p. 187) notes that "the soy bean is the youngest of the bean family, going back only to about 3500 B.C." Beans in the Middle East go back to 7000 B.C. and in Mexico they go back to 5000 B.C. But the soy bean "makes up in versatility what it lacks in age."

Recipes Fried bean curd with hijiki (with "2 pieces *aburaage* {fried bean curd}," p. 187). Sole with bean curd (188-89). Deep-fried bean curd with bonito flakes (p. 190). Dried bean curd with vegetables (with "4 *kôyadôfu* {dried bean curd}" and "2 teaspoons *usukuchi shôyu* {light soy sauce}, p. 191). Kûya-mushi (bean curd, chicken, and vegetable custard, p. 192-93). Simmered bean curd and chicken (p. 193). Takara bukuro (treasure bags with aburaage, p. 194). Tofu no shirô-ae (p. 195). Hiya-yakko (garnished cold bean curd, p. 196; *Kinugoshi tôfu* {silky bean curd} may be used). Chrysanthemum flower bean curd (p. 197). Nabeyaki Denraku [Dengaku?] (bean curd with white and red bean paste, p. 198). Pork with bean curd (p. 198-99). Ni-yakko (bean curd with dried bonito flakes, p. 199). Sokuseki misozuke (instant pickled vegetables with bean paste, p. 210). Koshi-an (red bean paste, with "1½ red *azuki* {adzuki} beans," p. 213-15). New year dishes: Kuromame (black soy beans simmered in soy sauce and sugar, p. 220).

Glossary (excellent, p. 228-36)–Soy-related terms: Aburaage, azuki bean, fu (wheat gluten cake), ganmodoki, kinako, kinugoshi tôfu, kôji, koshi-an (powdered azuki paste), kôyadôfu, kôridôfu, kuzuko, mirin, miso, misozuke, mochi, momen tôfu, moromi miso, namaage, nattô, shôyu, teriyaki ("a technique of glazing foods in a soy sauce and mirin mixture either in a skillet or on a grill"), tôfu ("soy bean curd, usually refers to *momen tôfu*"), umeboshi, usukuchi shôyu, yakidôfu, yuba. Address: Both: New York.

3453. Owen, Sri. 1976. Indonesian food and cookery. London: Prospect Books, and Jakarta: Indira Reprints. 255 p. Rev. ed. 1980. [20 ref]

3454. Ranill, June. 1976. The El Molino cookbook: Natural wholegrain foods from El Molino & CaraCoa. El Molino Mills, A division of ACG Co., Box 2250, City of Industry, CA 91476. 144 p. Illust. Index. 22 cm. Spiral bound.

• ***Summary:*** Contents: Part I: Description of grains, seeds, legumes & carob (1-2 pages about each with an illustration; barley, buckwheat, corn, millet, oats, brown rice, rye, triticale, wheat, alfalfa seed, chia seed, flaxseed, pumpkin seed, sesame seed, sunflower seed, lentils, mung beans, split peas, soybeans {p. 22-23}, carob, El Molino and CaraCoa products).

Part II: How to use and enjoy whole grains, seeds, legumes. Part III: Recipes (by Alice Walter).

This year El Molino Mills celebrates its 50th anniversary; thus it was founded in 1926. Soya powder is like soya flour, but it is more finely ground for use in beverages. "Soy flour is made from the raw bean, while soya flour is made from soybeans that have been lightly toasted. This 'toasting,' actually a moist heat treatment, enhances the flavor." El Molino soya flour is full-fat flour.

El Molino products (p. 26) include Soybeans (whole cooks best), and Carob coated soynuts. No soy flour or powder is mentioned.

Soybeans, soya flour, grits, and powder are used extensively throughout his book. White bread (with soy flour, p. 46). Honey oatmeal bread (p. 48). Cornell bread (p. 50). Soya bread (p. 51; 4.5 cups wheat flour and 1.5 cups soya flour, so 25% soya flour). Improved quickbreads (p. 68). Crunchy muffins (with soya grits, p. 70). Homemade muffin mix. Soya muffins (p. 72). Gluten sesame thins (p. 74). Homemade Granola (with 1 cup El Molino soya flour, p. 75). Soy nuts. Garlic soy nuts. Roasted soybeans (p. 85). Carob breakfast drink (with 1 tablespoon El Molino soya powder, p. 88). Bean salad (featuring soybeans, p. 92). Meatloaf (with soya grits, p. 97). Soybean loaf. Baked soybeans. Soybean chili (p. 101).

The section titled "Meatless dishes" (p. 102-112) features many soy and many gluten recipes: Soybean medley. Cooked soybeans (Basic). Soy cakes. Soybean paste (ground cooked soybeans). Stuffed peppers. Stuffed tomatoes (both with soybean paste). Baked soybean croquettes. Softened soya grits. Stuffed zucchini (with softened soya grits). Tofu (from soybeans curded with lemon juice). Soy cheese (made from soya powder). Cooked gluten (homemade, p. 110). Gluten cutlets. Gluten patties. Gluten roast. Eggs and soya grits.

Soya milk (from soya powder, p. 115). Pineapple soya cocktail (with soya powder, p. 116). Soya applesauce cake (with soya flour or powder, p. 119). Improved cakes (p. 122). Peanut butter cookies (with soya flour, p. 125). Improved cookies (p. 128). Cookies for your puppy dog (p. 130). Sesame carob balls. Carob nut log (p. 137).

Sesame seed: On page 17 is a full page about sesame seeds and their uses, with an illustration of the sesame plant and its seeds. The Index contains more than 45 entries for "Sesame" including: Sesame butter (p. 17, 87). Sesame granola bars (p. 84). Sesame halvah (p. 17). Sesame milk (p. 17, 115). Sesame in muesli (p. 76). Sesame tahini dressing

• ***Summary:*** This is a natural foods cookbook (not vegetarian), with strong influence from East Asia. The author's great aunt was a missionary in China. Pages 5-7 describe how to make a "bean curd box" for making tofu, and then how to make tofu at home. Among the many soy-related recipes are about 55 for tofu, 7 for miso, 2 for whole soybeans, and many for soy sauce. Pages 431-34 contain a directory of natural foods provisioners and Oriental foods provisioners.

3457. Shinoda, Osamu; Akiyama, Tomiko. 1976. Tôfu no hanashi [Tales about tofu]. Kyoto: Shinshin-do Shuppan. 143 p. Illust. Includes many color photos. No index. 18 cm. [Jap]
• ***Summary:*** Contents: Cultural history of tofu. To tofumakers. Tofu recipes. Writings about koyadofu. About tofu. The Japanese and tofu. The author lived 1899-.

3458. Siegel, Alvin; Fawcett, Brian. 1976. Food legume processing and utilization (with special emphasis on application in developing countries). Ottawa, Canada: International Development Research Center. 88 p. No index. 25 cm. [110 ref]
• ***Summary:*** Contents: Introduction. Traditional processing and utilization: Legume processing terminology, home-scale processing, commercial-scale processing. Processed legumes by new and improved technologies: Milled pulses, decorticated legumes, quick-cooking legumes, legume powders, legume protein concentrates. By-product utilization of legume processing. Summary and conclusion. Tables. References. Address: Agriculture, Food and Nutrition Sciences Div., International Development Research Centre, Ottawa, Canada.

3459. Smartt, J. 1976. Tropical pulses. London: Longman. 348 p. Index. [275* ref]
• ***Summary:*** In the chapter on "Pulses in human nutrition," soya beans are mentioned (p. 92-95) under: Germinated seed. Fermented products: Soy sauce, soya bean paste, tempé, natto and Hamanatto. Extracted pulse proteins: Soya bean curd ('tofu'), soya bean 'milk.' Address: PhD, Senior lecturer in Biology, Univ. of Southampton.

3460. Solomon, Charmaine. 1976. The complete Asian cookbook. New York, NY: Summit Books. 511 p. Illust. Color plates. Index. 29 cm.
• ***Summary:*** This artistic cookbook is loaded with full-page color plates plus a good glossary. Soy-related recipes include: Bean curd omelettes (Tahu telur, from Indonesia, p. 188). Fried bean curd with peanuts (Tahu goreng kacang, from Indonesia, p. 204). Fried bean curd with soy sauce (Tahu goreng kecap, from Indonesia, p. 204). Fried fish with salted soya beans [miso] (Ikan goreng tauceo, from Malaysia, p. 224). Bean curd in salted soya bean paste [tofu in miso] (Taukwa tauceo, from Malaysia, p. 233). Bean curd

© Copyright Soyinfo Center 2013

and bean sprouts [probably mung bean sprouts] (Taukwa dan taugeh, from Malaysia, p. 233). Stuffed soy bean cake [with fried tofu] (Tauhu sod sai, from Thailand, p. 316). Glutinous rice and soybean sauce (Nuoc leo, from Vietnam, p. 341). Soup with bean curd (Canh dau hu, from Vietnam, p. 342). Misu tomato sauce (with red misu = red miso, from the Philippines, p. 351). Bean curd in barbecue sauce (Chu hau jeung mun dau fu, from China, p. 414). Bean curd with crab sauce (Hai yook par dau fu, from China, p. 414). Ginger soy sauce (See yau ghung jeung), Chilli soy sauce (See yau laht jiu jeung), Black bean sherry sauce (Dau see sheung jing jeung, with canned salted black beans = fermented black soybeans), Black bean garlic sauce (Suen tau dau see, with fermented black soybeans) (from China, p. 431). Sesame seed sauce (Cho kanjang, from Korea, p. 451, with "4 tablespoons light soy sauce"). Dumpling soup (Mandoo, from Korea, p. 453, with "1 square fresh bean curd" and "2 tablespoons light soy sauce"). Soup of soybean sprouts (Kong namul kuk, from Korea, p. 453, with 500 gm soy bean sprouts and 1 tablespoon soy sauce). Rice with fried bean curd (Kitsune domburi, from Japan, p. 460). Steamed egg custard with tofu (Kuya mushi, from Japan, p. 471). Bean paste soup (Miso shiru, from Japan, p. 477). Sushi in fried bean curd (Inari-Zushi, from Japan, p. 480).

Soy-related glossary entries (p. 485-502) include: Aburage. Akamiso. Black beans, salted (Chinese: dow see = salted black beans). Bean curd (Chinese: dow foo; incl. yellow bean curd, dried bean curd, red bean curd). Chinese bean sauce (ground = *mor sze jeung* or chunky = *min sze jeung* similar to Malaysian *taucheo* or *tauceo*). Dow foo pok (Chinese-style fried bean curd). Miso. Mushroom soy (Soy sauce flavored with mushrooms during the last stage of processing). Soy sauce (light or dark, shoyu, kecap manis). Yellow beans, salted (=salted yellow beans). Yellow bean paste.

Note 1. It is also the earliest document seen (April 2012) that uses the term *kecap manis* to refer to sweet Indonesian soy sauce.

Interesting glossary entries (p. 485-502): Aburage, bean curd (fresh, yellow, dried, red), black beans, salted (Chinese: *dow see;* made from soy beans, heavily salted and sold in cans and jars), Chinese bean sauce (ground or chunky, like Malaysian taucheo or tauceo), fish sauce (Vietnamese: *nuoc mam.* Burmese: *ngan-pya-ye.* Thai: *nam pla.* Tagalog: *patis*). Miso. Mushroom soy (Soy sauce flavored with mushrooms during the last stage of processing). Red misu (See miso). sesame seed (Hindi: *till.* Sinhalese: *thala.* Malay: *bijan.* Chinese: *chih mah.* Japanese: *goma.* Indonesian: *wijen*). Sesame oil ("The sesame oil used in Chinese cooking is extracted from toasted sesame seeds..."). Sesame paste ("Sesame seeds, when ground, yield a thick paste similar to peanut butter. Stores specialising in Middle Eastern foods sell a sesame paste known as *tahini*, but this is made from raw sesame seeds, is white and slightly bitter, and cannot be substituted for the Chinese version–which is made from toasted sesame seeds, and is brown and nutty"). Wakame. Wasabi or wasabe. Yellow beans, salted (Very similar to canned salted black beans, but lighter in color). Yellow bean paste (It is not really yellow, but brown. Sold in cans).

Note 2. This is the earliest English-language document seen (March 2009) that uses the word "tauceo" to refer to Indonesian-style miso.

An inventory of information on the utilization of unprocessed and simply processed soybeans as human food. Peoria, Illinois: USDA Northern Regional Research Center, Interdepartmental Report. AID AG/TAB-225-12-76. 197 p. AID contract report. Undated. No index. 27 cm. Spiral bound. [65 ref]

• ***Summary:*** Contents: Introduction. Home and village traditional soybean foods by country. 1. Soybean food uses and production in Asia. Soaking dry soybeans. In China: Tou chiang (soybean milk; preparation, ways of serving), tou fu (soybean curd; yen-lu is the Chinese name for nigari), tou fu nao (soft curd), tou fu kan (dry / firm bean curd), chien chang (pressed tofu sheets), yu tou fu (fried tou fu), tung tou fu (frozen tou fu), tou fu pi (protein-lipid film; yuba), huang tou ya (yellow bean sprout or soybean sprout), mao tou (hairy bean, green soybean, or immature soybean), dry soybeans (roasting and frying, stewing and boiling), roasted soybean flour. Fermented soybean foods. Production and consumption of soybeans (China and Taiwan).

Japan: Tofu (soybean curd), kinugoshi tofu, processed tofu products (aburage or age, nama-age and ganmo), kori tofu (dried-frozen tofu), yaki tofu (grill tofu), yuba (protein-lipid film), soybean milk, gô (ground soybean mash), daizu no moyashi (soybean sprouts), edamame (green vegetable soybeans), whole soybeans, kinako. Fermented soybean

© Copyright Soyinfo Center 2013

foods: Production and consumption.

Korea: Tubu (soybean curd), soybean sprouts, whole soybeans (green soybeans, parched or roasted soybeans, boiled soybeans), soybean flour ("Soybeans are first roasted and then ground to a flour. The flour is extensively used as an ingredient in various food preparations." Note: This is the earliest document seen (Nov. 2012) that mentions roasted whole soy flour in Korea–however no Korean name of this roasted soybean flour is given), soysauce, bean paste [Korean soybean miso], natto (no Korean name is given), production and consumption of soybeans.

Indonesia: Tahu or tahoo (soybean curd), bubuk kedele (soybean powder), tempe kedele, tempe gembus [the name in Central and East Java for okara tempeh], oncom tahu [the name in West Java for okara onchom], other soybean products (soybean sprouts, green soybeans, roasted and boiled soybeans, kecap or soysauce, tauco or bean paste [miso]), food mixtures (Saridele, Tempe-fish-rice or TFR, Soy-rice baby food, soybean residue [okara]-fish-rice), production and consumption of soybeans.

To make bubuk kedele (p. 58): "Soybeans of the white variety are roasted until no beany flavor can be detected. They are ground into a powder and mixed with such spices as garlic and chili. Bubuk kedele is kept in a jar and served on special occasions with a rice product, longtong (rice wrapped in banana leaves and boiled for 3 to 4 hours). Bubuk kedele is always homemade and is eaten by everyone" (Source: I. Gandjar 1976, personal communication).

Note 1. This is the earliest English-language document seen (Nov. 2012) that uses the word *bubuk* or the term *bubuk kedele* to refer to Indonesian roasted soy flour.

Thailand. Philippines: Soybean sprouts, soybean coffee, soybean cake (made from equal amounts of soybean flour and wheat flour), soybean milk, tou fu and processed tou fu products, production and consumption. Burma. India. Malaysia. Nepal. Singapore. Sri Lanka (Ceylon). Vietnam. West Asia [Middle East; Iran and Turkey]. References–Soybean food uses in Asia.

2. Soybean food uses and production in Africa. Ethiopia: Injera, wots and allichas, kitta, dabbo, dabokolo, porridge. Kenya. Morocco. Nigeria: Whole soybeans, soybean paste, corn-soy mixtures (soy-ogi). Tanzania. Uganda. Production. References–Soybean food uses in Africa.

3. Soybean food uses and production in Europe [both Eastern and Western]. 4. Soybean food uses and production in Latin America. Argentina. Bolivia. Brazil. Chile. Colombia. Ecuador. Guyana. Paraguay. Peru. Uruguay. Venezuela (fried arepas with textured soy). Mexico: New village process, commercial developments of soy-based food products, Gilford Harrison, Ruth Orellana, Seguras Social. Honduras. 5. Soybean food uses and production in North America. United States: Oriental populations, vegetarian communes, The Farm in Tennessee. Canada. References–Soybean food uses in North America. 6. Soybean food uses in Oceania. Australia. New Zealand. 7. Summary of soybean food uses. Traditional soybean foods: Soybean milk, soybean curd and processed soybean curd products, protein-lipid film, soybean sprouts, tempe (tempeh), green soybeans, boiled soybeans, roasted soybeans, soybean flour, soysauce, fermented soybean paste, fermented whole soybeans [Toushih, hamanatto], natto, fermented soybean curd. Experimental soybean foods: Whole soybean foods, soybean paste, soy flour, soy beverage. Production and consumption.

8. Recent simple soybean processes, other than traditional. Simple village process for processing whole soybeans: Equipment, process, sanitation requirements, quality of product, evaluation of product in formulas and procedures for family and institutional use in developing countries. NRRC village process. Foods from whole soybeans developed at the University of Illinois (drum dried flakes, canned and homecooked soybeans, soy beverages and beverage products, spreads, snacks).

Ways of cooking and serving soybeans in the American diet. 9. Industrial processes. Industrial production and selling prices of edible soybean protein products. 10. Barriers to acceptability and utilization of soybeans in food and research recommendations: Availability. Cultural and social factors. Texture. Flavor. Nutrition and food safety. Technology development. Technology transfer. Research recommendations [concerning each of the above barriers].

Concerning Morocco: Cereal-soy blends have been used extensively in Morocco; in fiscal year 1974 some 14.7 million lb were shipped to Morocco. Mmbaga (1975) reported that soy flour is being used in making porridge, with 1 part soy flour to 3 parts maize / corn flour.

Tables show: (1) Soybean production and imports in Taiwan, 1962-1975 (tonnes = metric tons, p. 33). Production rose from a 53,000 tonnes in 1962 to a peak of 75,200 tonnes in 1967, then fell to 61,900 tonnes in 1975. Imports skyrocketed from 62,400 tonnes in 1962 to a record 827,300 tonnes in 1975. (2) Consumption of soybean foods in Taiwan, 1964-1974 (kg/capita/year, p. 34). Total soybean foods not including tofu rose from 1.08 kg in 1964 to a peak of 2.61 kg in 1972 then fell to 1.99 kg in 1974. Consumption of tofu (80% water) rose from 18.75 kg in 1964 to a peak of 33.89 kg in 1972, then fell to 32.04 kg in 1974. (3) Supply and disposition of soybeans in Japan, 1971-1974 (p. 49). Total supply is beginning stocks, plus domestic production, and imports. Total disposition is crushing, plus traditional foods and feed. In 1974 imports accounted for 87.5% of the supply, and crushing accounted for 71.0% of the disposition. (4) Whole soybeans used in the production of traditional foods in Japan, 1970-74 (tonnes / metric tons, p. 50). Tofu and others rose from 508,000 in 1970 to 539,000 in 1974. Miso rose from 177,000 in 1970 to 192,000 in 1974. Shoyu

© Copyright Soyinfo Center 2013

rose from 13,000 in 1970 to 14,000 in 1974. (5) Defatted soybean meal used in the production of traditional foods in Japan, 1970-74 (tonnes / metric tons, p. 51). Shoyu rose from 163,000 in 1970 to 176,000 in 1974. Tofu and others was constant at 130,000 from 1971 to 1973. Miso decreased from 4,000 in 1970 to 2,000 in 1974. (6) Production of traditional soybean foods in Japan, 1970-74 (tonnes / metric tons, p. 52). Tofu and others rose from 1,867,800 in 1970 to 2,264,900 in 1973. Shoyu rose from 1,334,1000 in 1970 to 1,455,800 in 1974. Miso rose from 552,200 in 1970 to 587,200 in 1974. (7) Production and food use of beans [various types] and consumption of some soybean products in Korea, 1964-1967 (p. 56-57). In 1967 consumption (in tonnes / metric tons) was: Bean curd 290,000. Bean sprouts 270,000. Bean sauce 69,700. Bean paste 27,700. Total: 11.6 kg per capita per year. (8) Soybean production in Indonesia, 1960-1974 (p. 65). It rose from 442,862 tons in 1960 to 550,000 tons in 1974. (9) Consumption of soybeans in various parts of Indonesia in 1970 (p. 66). (10) Production of soybean foods in the province of Central Java, 1968-1972 (tons, p. 67). Kecap rose from 914,695 in 1968 to 1,524,000 in 1972. Tahu decreased from 18,570 in 1978 to 17,000 in 1972. Tempe rose from 506 in 1968 to 39,000 in 1972. (11) Area planted to soybeans and total soybean production in Thailand, 1964-1974 (p. 70). Area rose from 213,000 rais (6.25 rais = 1 ha) in 1964 to 1,016,000 rais in 1974. Production (in metric tons) rose from 31,300 in 1964 to 252,400 in 1974. (12) Utilization of soybeans by soybean-consuming countries, 1964-66 (based on FAO 1971 Food Balance Sheets, 1964-66 average, p. 150). The countries leading in per capita consumption (kg/person/year) are: China (PRC) 6.7. Japan 5.1. Korea(s) 5.0. Singapore 4.3. Indonesia 2.8. Malaysia 2.6. Taiwan (ROC) 1.1. (13) Amounts of cereal-soy blends distributed under Title II, Public Law 480 in fiscal year 1974 (p. 152-155). (14) U.S. exports of full-fat soy flour, 1974-75 (p. 156). Address: Northern Regional Research Center, Agricultural Research Service, Department of Agriculture, Peoria, Illinois 61604.

3463. White, Lynn, Jr. 1976. Food and history. In: Dwain N. Walcher, N. Kretchmer, and H.L. Barnett, eds. 1976. Food, Man, and Society. New York and London: Plenum Press. xv + 288 p. See p. 12-30. [24 ref]

• ***Summary:*** A brilliant overview. Compared with other crops, the soybean was slow to diffuse out of East Asia, perhaps because in its home territory it was consumed largely as tofu and soy sauce; other cultures had no precedents for such processing (p. 28, footnote). Address: Prof. of History Emeritus, Univ. of California, 405 Hilgar Ave., Los Angeles, California 90024.

3464. Winarno, F.G.; Hardjo, S.; Rumawas, F. 1976. The present status of soybean in Indonesia. Bogor, Indonesia: FATEMETA, Bogor Agriculture University. xxiii + 128 p. 29 cm. [7 ref]

• ***Summary:*** The best and most comprehensive survey up to this time on the subject, it was done as part of the 1974 Industrial Census of the Central Bureau of Statistics. Full of valuable statistics and tables. Contents. Preface. Summary. List of tables. List of figures. I. Introduction. II. Objectives and survey methods: A. Objectives. B. Survey methods. III. Cultivation, product handling and protection: A. Botany of the soybean. B. Varieties. C. Growth requirements. D. Agronomy of soybean. E. Crop Management. F. Harvesting and product handling.

IV. Production: A. Harvested acreage, production and average soybean yield in Indonesia. B. Center production areas. C. Harvested acreage of soybean versus other food crops. D. Factors affecting soybean production. V. Farm management and soybean marketing in Indonesia: A. Farm management. B. Marketing of soybean.

VI. Soybean utilization (p. 52): A. Soybean products: Introduction, yuba, sere (from Bali: cooked whole soybeans, mixed with onions, hot pepper, turmeric, salt, and coconut presscake; molded into patties, sun dried, then deep fried), soybean milk, tofu (coagulated with *biang* or *sioko* {calcium sulphate}), soybean sprouts (*tauge*), soybean powder (soybeans that have been cooked, dried, dehulled, and pounded), soybean mixtures, kecap (Indonesian soy sauce), oncom (fermented soybean product, red or black), tauco (Indonesian-style miso), tempe. B. Soybean utilization: Utilization by farmer (in each of 6 provinces and total), utilization by processor (tempe, tofu, kecap, miscellaneous), census conducted by Central Bureau of Statistics, conversion factor for soybean products. C. Consumption of soybean and its processed products (by province). D. Other components. Appendixes.

Tables in body of text: (1) Brief description of recommended soybean varieties. (2-3). Insecticides used against Agromyza and *Phaedonia inclusa.* (4) Soybean harvest seasons in Indonesia (major harvest months, by province). (5-8) Harvested acreage, production, and average soybean yield during 1950-73, 1960-74, and in Java-Madura (1967-71, 1972, 1973, and 1974). (9) Soybean acreage in Java-Madura. (10) Major production areas in Java-Madura, and average 5-year yield, 1965-69. (11) Harvested acreage of soybeans vs. other crops in Java-Madura, 1971-72. (12) Production cost and value per hectare of soybeans. (13) Major trading and harvest months. (14-15) Percentage of farmer's share and marketing cost of the trade price in various provinces. (16) Percentage of farmer's share of the trade price. (17) Soybean utilization by farmers, 1975-76. (18-21) Production/consumption of tempeh, tofu, kecap, tauco, tauge, yuba, and sere.

(22-29) Raw material utilized by small-scale processors and by soybean home industries in Java and Jakarta. (30-31) Value of raw material and end products of small-scale industries over 3- and 12-month periods. (32) Conversion factor of soybean products to raw material. (33-36) Average

© Copyright Soyinfo Center 2013

daily consumption per capita of soybean and its processed products at villages in Lampung, Yogyakarta, East and West Java, and in 4 other provinces.

Concerning sprouts (*tauge*) in Indonesia (p. 67, 69): Tauge can be prepared from either soybean or mungbean. The average amount of soybean processed into tauge is about 8 qt [=quintal; 1 quintal = 100 kg = 220.46 lb] per year per processor. The average number of employees is 1 per processor with 30 workdays per month. The entire product is for sale.

Table 33 (p. 84), "Average daily consumption per capita of soybean and its processed products at several villages in Lampung (a province of Indonesia located on the southern tip of the island of Sumatra) is: Tempe 18.33 gm. Soy sprouts 6.51 gm. Tofu 3.36 gm. Oncom 2.34 gm. Soybean 0.29 gm. Okara tempeh 0.25 gm. Okara 0.03 gm.

Table 34 (p. 85), "Average daily consumption per capita of soybean and its processed products at several villages in Yogyakarta and East Java is: Tempe 20.08 / 4.63 gm. Soy sprouts 1.57 / 3.05 gm. Tofu 1.83 / 4.24 gm. Okara tempe 0.53 / NL gm. Soybean 0.35 / 1.07 gm. Okara tempeh 0.25 gm. Okara 0.03 gm.

Table 36 (p. 87), "Average daily consumption per capita of soybean and its processed products of sample family farmers in 4 provinces.

Tempe consumption is highest in Yogyakarta (20.08 gm) followed by Lampung (18.33), Tulungagung (4.63) and West Java (4.42).

Tofu consumption is highest in Tulungagung (4.42 gm) followed by Lampung (3.36), Yogyakarta (1.83) and West Java (0.78).

Soybean sprout consumption is highest in Lampung (6.51 gm) followed by Tulungagung (3.05) and Yogyakarta (1.57); no value is given for West Java.

Oncom [ontjom] consumption is highest in Lampung (2.34 gm) followed by West Java (0.69). Address: FATEMETA, Bogor Agricultural Univ., Indonesia.

3465. Winarno, F.G.; Hardjo, S.; Rumawas, F. 1976. Kecap (Indonesian-style soy sauce) (Document part). Bogor, Indonesia: In: Winarno, F.G.; et al. 1976. The present status of soybean in Indonesia. FATEMETA, Bogor Agriculture University. xxiii + 128 p. 29 cm. [7 ref]

• ***Summary:*** The description of kecap (p. 58-59) states: Boil soybeans until tender. Drain and spread over round, shallow woven bamboo trays. Place these in a kecap fermentation room. Leave for 5-7 days until the soybeans are well covered with and bound together by a mycelium of *Aspergillus* and/or *Rhizopus* molds. Then dry the trays and soybean koji in the sun. Break up the soybean koji, place it is salt brine in deep earthenware jars, and place the jars in the sun to ferment for one week or up to one year.

When the mash is ready, boil it, adding clean water if necessary. Remove the liquid using a sieve; this is the first extraction, which is the best quality. Repeat this process 3 to 5 times, adding a brine solution the same salt concentration as the original mash. Each extraction, which will be lower in quality that the one before it, is kept separate to provide different qualities of end product.

As the final step for each different extraction, bring it to a boil and add some ingredients such as palm sugar [jaggery], caramel, or coconut sugar. Other ingredients such as fish extract or bouillon are also occasionally added. Filter the liquid through a piece of cheese cloth, bottle and store.

Note: This is the earliest English-language document seen (April 2012) that uses the term "first extraction" in connection with soy sauce quality,

Page 67: Most kecap is made in small scale enterprises, employing on average 10-11 laborers and working 23.7 days/month. The average kecap maker uses 13,390 kg of soybeans annually to produce kecap with a value of 6.3 million rupiahs. A table (p. 68) gives details by province.

Page 80: Kecap is a very minor soy product in Indonesia. Only 0.2% of all soybeans used to make foods in Indonesia are used to make kecap. The largest percentage of soybeans are used to make tempeh (66%), tofu (33%), and tauco (0.3%).

Pages 93-94: Ingredients required to make kecap include palm sugar, cane sugar, molasses, salt, wheat flour, cassava flour and spices. Palm sugar is the most important sweetener. "Depending on the concentrations of sugar and salt, there are two types of kecap available in the market, sweet and salty kecap." Wheat flour and cassava flour serve as thickening agents, but they are not used by all kecap makers. No information is given on the types or amounts or of spices and herbs used in making kecap. Address: FATEMETA, Bogor Agricultural Univ., Indonesia.

3466. Yee, Vivien Chee-Nan Yeo. 1976. New products from soybeans. Meat extender, alcoholic beverage and protein rich flour. PhD thesis, Cornell University, Ithaca, New York. 92 p. Page 5596 in volume 37/11-B of Dissertation Abstracts International. [50+ ref]*

• ***Summary:*** The new products include two types of soy wines; one was made from soymilk and one from the whey left over after making tofu. Some 25% (w/v, weight-to-volume) of sucrose was added to the soymilk or tofu whey and the liquid was fermented anaerobically with a wine yeast, until the alcohol concentration reached 12% v/v or higher. With soymilk, the proteins precipitated out and had to be removed. Otherwise clarification and aging were the same as for any wine; the finished products were similar to sake. Address: Cornell Univ., Ithaca, New York.

• ***Summary:*** "Date of establishment: July, 1917.

© Copyright Soyinfo Center 2013

"Capital: 31 million yen.

Major executives:

"The President: Motoo Takai.

"Vice-president: Akio Takai.

"Executive director: Akira Takai

Size of this factory:

The head office: Site 8,156 sq. meters. Building: 4,808 sq meters.

"Matsuto factory: Site 1,875 sq. meters. Building: 1,047 sq meters.

History of our company:

1917 July–Takai brotherly company was established, and production of bean curd machine and its selling were begin.

1931 April–The old name was replaced by Takai Co., Ltd.

1946 Jan.–The name was replaced by Takai Mfg. Co., Ltd.

1957 Jan.–A bean curd automatic manufacturing machine was developed

1958 Aug.–This company was commended as a superior enterprise by the Smaller Enterprises Agency.

1958 Dec.–The ex-president Kamejiro Takai was conferred *Shiju-hosho* (Violet Ribbon Medal)

1959 Nov.–Our company was given a governor's special prize at the ceremony of awarding an honor of a corporation of a society of invention.

1960 April–The 7th anniversary of the operation of the patent system, our company was given a prize of invention at the nationwide ceremony of a corporation of invention.

1960 Sept.–Our company received a subsidy for the experiment of invention from the Scientific Technique Agency.

1960 Oct.–The ex-president was decorated with the Fifth Order of Merit with the *Zuihosho.*

1961 April–An organization of agency "A nation wide Takai society" was formed.

1962 July–A new factory was built at Inari, Nonoichi-machi Ishikawa-gun, Ishikawa-prefecture.

1962 July–Our company was given a governor's special prize at the local ceremony of a corporation of a society of invention.

1963 April–Our company was given a prize of invention at the nationwide ceremony of a corporation of a society of invention.

1965 Nov.–Our company was commended officially as a superior factory in labor management by a Labor Standard Office in Ishikawa-prefecture.

1966 Jan. Our company was named "a model factory of rationalization of the smaller enterprises" by the Smaller Enterprises Agency.

1966 Aug.–Our company was telecasted nation wide by NHK educational television titled "Industrial operation–establishment of a long-range plan".

1969 Jan.–Our company was given a citation as a superior corporation by a Taxation Office in Natsuto-city.

1969 April–A large-sized bean curd plant was built at Nada-Kobe co-operative association.

1969 Nov.–Our company was telecasted nationwidely by NHK educational television titled "A new age of operation–A plan of mechanization for making 10 million cakes of bean curd".

1970 July–Our company was commended officially as a superior factory in safe management of factories by a Labor Standard Office in Ishikawa-prefecture.

1971 Oct.–A large bean curd plant was built in the Republic of Korea.

1972 May–A smaller bean curd plant was developed.

1974 Feb.–Matsuto branch factory was built at Miyamaru-machi Matsuto-city.

1974 March–Our company was commended as a superior factory in rationalization of the use of electricity by Hokuriku Electric Society.

1974 June–IBM computers introduced.

1974 Oct.–Our company was commended on account of co-operation of traffic transportation.

• ***Summary:*** Describes "a method for producing fibrous protein materials useful for meat analogs. According to this method, an aqueous mixture of a heat coagulable protein is frozen by cooling the mixture in a manner and at a rate effective to produce elongated ice crystals generally aligned perpendicular to the surface of cooling, freeze drying the frozen mass, and heat setting the dried protein materials. The properties of a wide variety of meat products can be simulated." Soybeans are the main protein source used. Address: 1. Tarrytown, New York; 2. Thornwood, New York.

3469. Ethical Society. 1977. Soybeans and the world food crisis: A lecture demonstration by Bill Shurtleff and Akiko Aoyagi (possibly the foremost authorities on the use of soybeans for food in the West) (Poster). 9001 Clayton Road, St. Louis, Missouri. 1 p. Jan. 13. 30 x 26 cm. Black on brown.

• ***Summary:*** The lecture will be held at 7:00 p.m. at the Sunshine Inn Restaurant, 8½ Euclid. Tickets are $1.00 in advance, $1.50 at the door. Learn about tofu, miso, and "why tofu is a viable alternative to help solve the world food crisis." Address: St. Louis, Missouri.

3470. *Albuquerque Tribune* (*New Mexico*). 1977. Program set on preparing soybean foods. Jan. 18. p. B-2.

Jan. 27 at First Unitarian Church, 3701 Carlisle NE," Albuquerque, [New Mexico] by Bill Shurtleff and Akiko Aoyagi. The lecture is sponsored by Jemez Bodhi Mandala Zen Center at Jemez Springs. A photo, which was sent out with a news release, shows Shurtleff and Aoyagi.

3471. DeMasters, Carol. 1977. Research to feed the world. *Milwaukee Sentinel* (*Wisconsin*). Jan. 20. p. 1, 7.
• ***Summary:*** About the work of William Shurtleff and Akiko Aoyagi, directors of the New-Age Foods Study Center, with tofu and miso. "The world food crisis is their raison d'etre." They are "ardently devoted to finding alternative protein sources to those commonly used in the world–chiefly meat, poultry, and fish." Contains 4 recipes plus a photo of the two with their Book of Tofu.

Note: This is the earliest English-language document seen (Nov. 2003) that contains the term "alternative protein" or "alternative protein sources." Address: Sentinel Food Editor.

3472. **Product Name:** Frieda's Finest Tofu.
Manufacturer's Name: Frieda's Finest. Made in Los Angeles by House Foods & Yamauchi, Inc.
Manufacturer's Address: P.O. Box 58488, Los Angeles, CA 90058. Phone: 213-627-2981.
Date of Introduction: 1977. January.
Ingredients: Water, soybeans, calcium sulfate.
Wt/Vol., Packaging, Price: 19 oz (539 gm) packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.
How Stored: Refrigerated.
New Product–Documentation: Talk with Art Mio of Morinaga. 1990. April 17. On every case of tofu that Frieda's sends out is written (very conscientiously) something like "Store at 40ºF or below."

Label. 1983, dated. Sent by Frieda's Finest in April 1990. 5 by 4.25 inches. Purple on clear film. The brand is now "Frieda of California." Beneath the word "Tofu" in large letters is "Frommage de Soya" in small letters. "Tofu (soybean curd) is a delicate, custard-like product. This 'cheese' of the Asians is a super source of low-cost protein... low in fat cholesterol free... and a versatile cooking ingredient. Substitute it for part of the eggs and meat in your diet. Tofu has less than 20 calories per ounce. See reverse side of this label for delicious recipes and storage instructions! Change water daily! Keep refrigerated. Dear customer: For other specialty recipes, send me a self-addressed, stamped envelope naming the store where you purchased the tofu. Frieda Caplan, President." UPC indicia. On reverse side, the recipe is for a Tofu open-faced sandwich. "To store tofu, change water daily. Store in refrigerator up to 2 weeks. Freeze tofu too–thaw completely before using. Tofu takes on a meatier texture when frozen. Quick and easy ideas: * Add cubed tofu to salads, steamed vegetable entrees, soups (at end of cooking), and in stir-frys (cook just 1 minute). * Stretch meat loaf: add 8 ounces crumbled tofu. * Add 2 ounces crumbled tofu for each 2 eggs you scramble. * Top bite-sized cubes of tofu with sliced green onion, tiny shrimp, radish slices, even caviar for quick appetizers! Pass soy sauce for dipping." On each case carton is written "Tofu. Pasteurized–Perishable. 12/19 oz. tubs. This side up. Keep at 32º-35ºF. Do not freeze. Keep refrigerated."

Talk with Frieda Caplan. 1990. April 17. She founded her company in 1962. She started selling tofu under the manufacturer's label in Jan. 1977 for Chinese New Year to see if the product would sell (she does not recall who the manufacturer was). On 26 June 1977 she began to sell tofu under the Frieda's finest label. It was made by Hinoichi in Los Angeles. In 1983 the brand was changed from Frieda's Finest to Frieda of California. Since 1979 tofu has been one of Frieda's best-selling products out of more than 300 products they carry. It has been in the top 6 since 1982.

3473. Goldman, Sherman. 1977. Charles Atlas versus the Bodhisattva: An interview with Bill Shurtleff and Akiko Aoyagi. *East West Journal*. Jan. p. 32-35.
• ***Summary:*** An in-depth discussion of the work of Shurtleff and Aoyagi with tofu, miso, and tempeh in the USA, Japan, and Indonesia. Photos show: Shurtleff speaking into a microphone. Akiko Aoyagi smiling. Shurtleff and Aoyagi standing next to their white 1975 Dodge Van on the side of which is written: "New-Age Foods Study Center–Tofu & Miso America Tour, 1976-77."

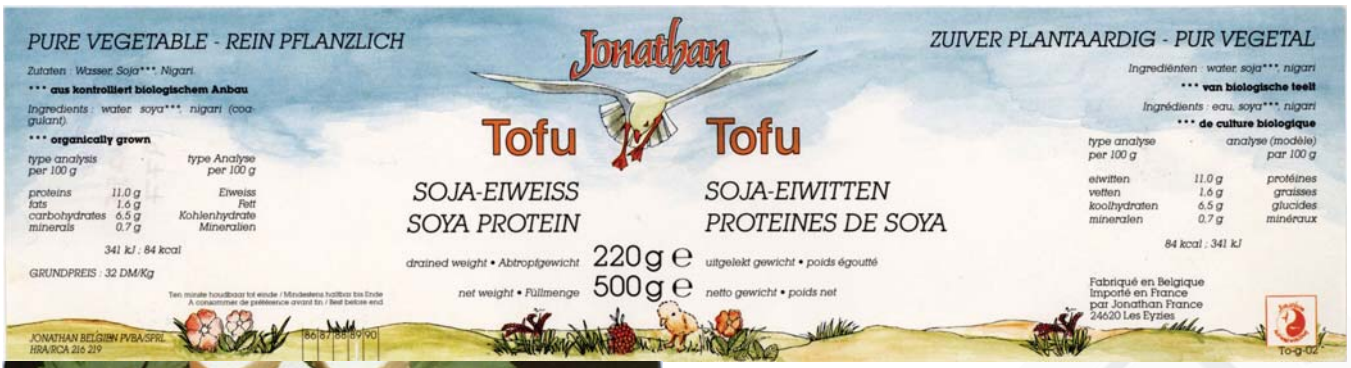
3474. **Product Name:** [Natural Tofu].
Foreign Name: Tofu Naturell.
Manufacturer's Name: Jonathan.
Manufacturer's Address: Holleweg 89, 2070 Ekeren (near Antwerp), Belgium. Phone: 031-64.41.73.
Date of Introduction: 1977. January.
Ingredients: Water, soya*, nigari. * = biological crop.
Wt/Vol., Packaging, Price: 200 gm.
Nutrition: Minerals 0.7%, vegetable proteins 11%, vegetable fats 1.6%, carbohydrates 6.5%, 84 calories (Kcal) per 100 g.
New Product–Documentation: Typed letter written in Oct. 1977 on Jonathan letterhead (Jonathan was at Holleweg 89; at the top of the letterhead was an illustration of two seagulls and a round yin-yang (*t'ai chi*) symbol) showing that that company was selling Tofu (*Sojakaas*).

Shurtleff & Aoyagi. 1979. July. New Tofu Shops & Soy Dairies in the West. Address is Holleweg 89, Ekeren (near Antwerp), 2070, Belgium.

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Jonathan PVBA, Kapelsesteenweg 693, B-2070, Ekeren, Belgium. Phone: 031-64-4173. Owner: Jos van de Ponseele; near Antwerp.

Letter from Sjon Welters. 1982. April 16. "Jonathan is a

© Copyright Soyinfo Center 2013



macrobiotic food company. They produce a wide assortment of macrobiotic products, such as tofu (3,000 lb/week), ganmo, seitan, paté, mochi, soups and other canned foods. They make the tofu and soymilk for Lima Foods in Belgium which is sold all over Europe. It is sterilized, so it keeps a long time. The address is: Jonathan, Kapelsesteenweg 693, 2070 Ekeren, Belgium. Attn: Jos van de Ponseele. They are the biggest macrobiotic food producer with quality standards in Europe, as far as I know."

Soya Bluebook. 1986. p. 107. Address: Antwerpsesteenweg 336, Kapellen, 2080 Antwerp, Belgium. Phone: 32/03/664-5848. Contact: J. van de Ponseele, Mgr.

Label. Received 1988. 6.25 by 5.25 inches. Card stock. Color photo of tofu cubes in a salad with item name in white on orange. "Vegetable product." Label. Received 1988. 10.5 by 2.75 inches. Glossy paper. Orange and black on a pastoral background with sea gull and duckling. "Pure vegetable. Ingredients are the same as before. Nutritional composition: Proteins 11.0 gm, fats 1.6 gm, carbohydrates 6.5 gm, minerals 0.7 gm, 84 calories (Kcal) per 100 gm. Net weight 500 gm glass jar. Drained weight 220 gm."

Form filled out by Jos van de Ponseele. 1989. Jan. 11. This product was introduced in Jan. 1977. P.V.B.A. refers to a partnership with limited liability [like an Ltd. company]. It is the most common form of small company in Belgium. The address is now Antwerpesteenweg 336, B-2080 Kapellen, Belgium. Phone: 03-664-5848.

Note: This is the earliest record seen (Feb. 2003) concerning Jonathan of Belgium.

3475. Kagawa, Ryo. 1977. Shokuhin seibunhyô [Food composition tables for Japan]. Tokyo: Joshi Eiyo Daigaku Shuppan-bu. 145 p. Jan. 15 x 22 cm. [Jap]
• ***Summary:*** For tables of information on soybeans and soyfoods, see p. 21-22. Includes Kinako, soymilk, regular tofu, kinugoshi tofu, fukuro-iri tofu, yaki-dofu, abura-age, namaage, ganmodoki, kori-dofu, yuba, okara, natto, hamanatto, miso, red miso, light yellow salty miso, red salty miso, soybean miso, powdered miso. Address: Japan.

3476. **Product Name:** Laughing Grasshopper Tofu, and Soymilk.
Manufacturer's Name: Laughing Grasshopper Tofu Shop.
Manufacturer's Address: 3 Main St., Millers Falls, MA 01349.
Date of Introduction: 1977. January.
New Product–Documentation: Shurtleff & Aoyagi. 1976. Nov. 4. Visited on Tofu & Miso America Tour. Just prior to opening. Leviton, Leviton, and Timmins. 1977. Laughing Grasshopper Tofu Shop. Describes production of the tofu and soymilk. Shurtleff & Aoyagi. 1977. Jan. 28. Commercial Tofu Shops and Soy Dairies. The first batch of tofu was produced on 12 Jan. 1977. The company was founded by Richard and Kathy Leviton. Tom Timmins joined the partnership in Feb. 1977, and Michael Cohen joined as the fourth partner later that year. But Michael soon left to start his own tempeh manufacturing company, The Tempeh Works.

Poster. 14 by 18 inches. Reprinted in Soyfoods Marketing: Lafayette, CA: Soyfoods Center. "Laughing Grasshopper Tofu. Hand Made–in the Traditional manner from Organically Grown Soybeans and Nigari."

3477. Organically-grown soybeans start to be used by many companies in the United States and Europe to make commercial soyfoods (Important event). 1977. Jan.
• ***Summary:*** Here is a list of the pioneers, their companies

and their products–all introduced during 1977.

Jan. Southwest Tofu Co., Santa Fe, New Mexico (Tofu, Kathryn O. Bennett).

Jan. Jonathan, Ekren (near Antwerp) Belgium (Soymilk, Jos van de Ponseele).

Jan. The Soy Plant, Ann Arbor, Michigan (Tofu, Steve Fiering; July, Soymilk).

March. Surata Soyfoods, Eugene, Oregon (Nigari Tofu, Benjamin Hills).

June. Bhaga Tofu (renamed Lecanto Tofu Shop), Lecanto, Florida (Tofu, Marvel Huffman).

Sept. Quong Hop & Co., South San Francisco, California. (Tofu Dressing, Jim Miller & Stanley Lee).

Sept. White Wave, Boulder, Colorado. (Tofu, Steve Demos).

Nov. Redwood Natural Foods, Santa Rosa, California (Organic Tofu, Greg Hartman).

Sometime in 1977. Swan Foods, Miami, Florida. (Tofu Chip Dip, Tofu Baked with Tamari, Tofu (Marinated), Mary's Roasted Cashew Tofu Cheesecake, Mary's Tofu Rice Salad, Soy Melk, Tofu: Organic (Soybean Curd), Mary's Rice Pudding, Robert Pung & Mary Brooks).

3478. Shurtleff, William. 1977. Soy foods: Protein source of the future–now. Paper presented on 1976-77 Tofu & Miso America Tour. 16 p. transcript. Unpublished manuscript. [5 ref]

• ***Summary:*** This is the transcript of a speech given on 15 Jan. 1977 in Kansas, but a similar speech was given by Shurtleff at 70 public programs throughout the USA. Contents: World hunger and its causes: Population growth, affluence and the feedlot system, land misuses and international food exploitation. Vegetarian diets as a solution to degenerative diseases and food problems. Soybeans in America. Soybeans and soyfoods in East Asia: Tofu, miso, tempeh, shoyu. The future of soybeans on the planet. Address: New-age Foods Study Center, 790 Los Palos Dr., Lafayette, California 94549. Phone: 415-283-3161.

3479. **Product Name:** Tofu.
Manufacturer's Name: Southwest Tofu Co. Renamed Southwest Soyfoods by Sept. 1980.
Manufacturer's Address: 121 E. Santa Fe Ave., Santa Fe, NM 87501. Phone: 505-988-1889.
Date of Introduction: 1977. January.
Ingredients: Water, organically grown soybeans, nigari.
Wt/Vol., Packaging, Price: 16 oz packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.
How Stored: Refrigerated.
New Product–Documentation: Attendance roster for founding members of Soycrafters Association of North America. 1978. July 28. Kathryn O. Bennett, owner.

Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 397. Southwest Tofu Co., Route 2, Box 234, Santa Fe, NM 87501. Phone: 505-988-2443. Owner: Stephen and Kathryn Clarke.

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's new name and address: Southwest Soyfoods, 121 E. Santa Fe Ave., Santa Fe, NM 97501. Phone: 505-988-1889. Owner: Kathryn Bennett.

Soyfoods Center Computerized Mailing List. 1981. Jan. 22. Owner: Kathryn Bennett. Richard Jennings bought the company in the summer of 1982 for $20,000 and began production on July 15. Soyfoods Center Computerized Mailing List. 1982 Sept. 17. Owner: Richard Jennings. Address listed as 2889 Trades West, Santa Fe, NM 87501. Telephone, 505-471-8979. Talk with Richard Jennings. 1989. Aug. 17. He has changed his company name to The Food Plant. His main work now is contract manufacturing of salsa, jams, and sauces. He also makes tofu, tofu tamales, and tofu burrito filling.

Talk with Kathryn Bennett. 1989. Aug. 28. She started Southwest Soy Foods and began making tofu in about Jan. 1977 at the address shown above. She produced a regular nigari tofu made with organic soybeans and sold it in 1 pound water pack cartons. Her maiden name was O'Connor not Peterson. She spent a lot of time in the early days working with the New Mexico Dept. of Health to set standards and good manufacturing practices for tofu. The department was very nice and grateful.

Talk with Richard Jennings. 1990. Sept. 20. Soybeans are now grown in eastern New Mexico. For information, contact the New Mexico Dept. of Agriculture at New Mexico State University in Las Cruces. His basic tofu is by far his best-selling product, followed by Tofu Tamales, then Tofu Burrito Filling.

Note 1. This is the earliest known commercial soy product made in New Mexico.

Note 2. This is the earliest soy-related document seen (Jan. 2013) that contains organically-grown soybeans or any organically-grown ingredients. Yet in 1977, several other companies first started using organically grown soybeans.

3480. **Product Name:** Tofu.
Manufacturer's Name: Soy Plant (The).
Manufacturer's Address: c/o Wildflour Community Bakery (a co-op), 4th Ave., Ann Arbor, MI 48104. In Jan. 1978 moved to 211 East Ann St. Phone: 313-663-8638.
Date of Introduction: 1977. January.
Ingredients: Water, organic soybeans, nigari.
Wt/Vol., Packaging, Price: 1 lb.
How Stored: Refrigerated.
New Product–Documentation: Label in The Soy Plant scrapbook on p. 4. 2 by 4 inches. Black on white. Pressure sensitive. "Ingredients: Water, organic soybeans, nigari. Net weight: 16 oz (1 lb) drained. Address: Ann Arbor, Michigan,

© Copyright Soyinfo Center 2013

48108."

Ellin Stein. 1978. Whole Foods. Jan. p. 36. "When The Soy Plant started serving the Ann Arbor, Michigan area in January 1977, they were producing 50 pounds of tofu per week. They now manufacture 1,000 pounds per week.

Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 396. The Soy Plant, 211 E. Ann St., Ann Arbor, MI 48104. Phone: 313-663-0500. Owner: Steve Fiering.

Letter from Steve Fiering. 1979. Oct. 22. He is about to spend a month on the East Coast studying tofu making with companies there. He is thinking about starting a SANA soycrafting school.

Midwest Natural Foods Distributors, Inc. 1979. Catalog 13. Spring, 1979. Ann Arbor, Michigan. iv + 290 p. See p. 259. Soy Plant Tofu. Refrigerated. "Soy Plant Fresh Organic Tofu / Nigari" (1 lb). On p. 260 is a half-page ad: "Tofu– 'Meat without a bone'–Made with organic soybeans and nigari. Soysage: Bean sausage."

Interview with Steve Fiering. 1980. "The Soy Plant was incorporated in August 1977 and started production in September 1977. This was America's second tofu co-op (cooperative), worker owned and operated, started after Surata Soyfoods and followed by The Bountiful Bean Plant in Madison and The Magic Bean in Milwaukee. The deli opened on 1 May 1978.

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). New address: 771 Airport Blvd., Suite 1, Ann Arbor 48104. Phone: 313-663-8638 (A collective).

FIND/SVP. 1981, May. "The tofu market: Overview of a high-potential industry. p. 82. The company makes plain, nigari firm tofu, tofu spreads, spiced tofu and tofu pies, as well as other soyfood products such as soymilk, tempeh, okara peanut butter balls, soy sausage, and ice bean. Soy sausage is said to be one of their most promising products. The firm makes about 6,500 to 7,000 lb/week of tofu. If their other products were included, the production capacity would increase considerably.

Talk with Steve Fiering. 1988. June 10. This was the company's first commercial product. He recalls it being introduced in the spring of 1977, but it could have been as early as January.

Talk with Bruce Rose, president of Rosewood Products Inc. 1989. Dec. 13. In Oct. 1989 the brand on their nigari tofu was changed to China Rose and that on their calcium sulfate tofu was Rosewood.

Note: This is the earliest record seen (April 2013) concerning The Soy Plant (Ann Arbor, Michigan).

3481. **Product Name:** Tofu.
Manufacturer's Name: Spinning Kitchen.
Manufacturer's Address: 2517 Broadway, Boulder, CO 80302.
Date of Introduction: 1977. January.
New Product–Documentation: Shurtleff & Aoyagi. 1977. Jan. 28. Commercial Tofu Shops and Soy Dairies. Gene Casternovia, owner. Actually the business name was given as Corn Mother Restaurant at this time.

Shurtleff. 1987. History of White Wave. Steve Demos reported that when he started White Wave, "Our direct competitor was the Spinning Kitchen, which had started 9 months earlier, in about Jan. 1977. They had the Boulder market locked up when White Wave started."

Talk with Steve Demos. 1989. Nov. 1. Spinning Kitchen was in the same building as Corn Mother Restaurant in Boulder at the same address. They made tofu on the upper floor; Corn Mother did not make tofu.

Talk with Matthew Schmit of The Tofu Shop, Arcata. 2009. March 6. He has been in touch with Roger Andrews and Beverly Migliori, who started the Spinning Kitchen in Boulder. They now live in Ft. Collins, Colorado.

See History of Spinning Kitchen by Roger Andrews (9 May 2009).

3482. *Well Being* (*San Diego, California*). 1977. Don't miss it! Tofu & Miso Tour comes to San Diego Jan. 30. No. 16. Local Pages, p. 1. Jan.
• ***Summary:*** William Shurtleff and Akiko Aoyagi will present a program on tofu and miso on Sunday, January 30, at 7 p.m. at the Ocean Beach Community School, 4741 Santa Monica, San Diego. Admission will be $1.00. A list shows the places where tickets may be purchased in advance. For further details, call *Well Being Magazine* at 234-2211.

3483. *SoyaScan Notes.* 1977. The origin and early history of Bean Machines (California) and Takai Tofu & Soymilk Equipment Co. (Japan) (Overview). Feb. 9. Compiled by William Shurtleff of Soyinfo Center.
• ***Summary:*** 1977 Feb. 3–William Shurtleff and Akiko Aoyagi return home to 790 Los Palos Dr., Lafayette, California. Their four-month, 15,000-mile Tofu & Miso America USA tour ends. This was a huge, exciting, exhausting odyssey, that bore abundant fruit in the founding of new tofu shops almost everywhere they spoke.

Feb. 9–Meeting at 790 Los Palos Dr. in Lafayette with The Farm folks and Larry Needleman leads to establishment of Bean Machines Inc. (BMI), with Larry Needleman as owner and president. The Farm (Robert Dolgin and David Sandler, Farm Foods, 820 "B" St., San Rafael, California 94901) place a firm order for a Japanese (Takai) tofu system.

Feb. 12–Shurtleff and Aoyagi leave the USA and fly to Japan, arriving at Haneda Airport on Feb. 13. Shurtleff's main focus is to find a Japanese manufacturer of tofu and soymilk equipment that would like to develop an English-language illustrated catalog and establish a program for selling its equipment (plus other traditional small-scale

© Copyright Soyinfo Center 2013

equipment, made by other companies, that new American tofu makers may wish to order). From the American Soybean Association in Tokyo, Shurtleff learns about Takai Seisakusho, a tofu equipment manufacturer with long history (founded in 1917) and good reputation, located in Kanazawa, Japan.

March 28–Using a plain, typed form, Farm Foods (Dolgin and Sandler) order 16 pieces of tofu and soymilk equipment at a cost of $4,168. On the form is typed: "Please mail all orders prepaid to: Bean Machines, Inc., P.O. Box 829, Corte Madera, CA 94925."

March 30–Mary Pung, co-owner of Swan Foods, 8850 S.W. 116th St., Miami, Florida 33176 orders 8 pieces of tofu equipment for $4,973. Needleman forwards these two orders to Shurtleff in Japan.

1977 March 31. Larry Needleman applies for a Fictitious Name Statement for Bean Machines Inc. with the County of Marin. Larry and Bill Shurtleff are given as the owners

April 5–During two days of discussions and negotiations with Wataru Takai, son of the owner and young Director of the Overseas Department, who speaks good English, Shurtleff and Mr. Takai establish Takai Tofu & Soymilk Equipment Company and draft a long-term contract. Shurtleff stays two nights at the home of Wataru Takai and his wife.

June 5–The contract drafted on April 5 is finally signed by both Shurtleff and Takai. At the top of the document is Takai's new logo, designed by Akiko. It shows a lever, with a soybean as the fulcrum, moving the world.

June–Akiko soon gets more involved in designing Takai's first English-language catalog and letterhead, and Shurtleff works with Takai in giving accurate descriptions of each piece of equipment and each whole system.

July 19–Shurtleff and Aoyagi leave Japan (from Haneda) and fly to America (California).

1977 Aug. 16–The first English-language Takai Catalog arrives at our Center. This catalog was printed with green and black ink on glossy white paper.

1977 Oct. 14–Shurtleff signs Bean Machines, Inc. (BMI) contract with Larry Needleman. He comes for dinner with a friend.

Oct. 19–Mr. Takai writes William Shurtleff a typewritten letter on the new Takai letterhead about 5-6 issues that he would like to see resolved as soon as possible. He wants to learn more about Underwriters Laboratories and their safety standards in the USA.

Oct. 30–Larry Needleman sends out the first BMI packets to existing tofu makers and potential customers.

Dec. 21–Mr. Takai writes Larry Needleman (at Bean Machines Inc., P.O. Box 881, San Rafael, CA 94901) a typewritten letter on the new Takai letterhead about equipment prices landed in San Francisco or Boston without BMI commissions.

1978 March 31–Mr. Takai sends Larry Needleman a 4-page typed letter which includes a new price list including 3% insurance.

April 4–Mr. Takai writes Larry Needleman (P.O. Box 76, Bodega, CA 94922): "Thank you for your orders. We shall send you Pro-Forma Invoice. Please open your L/C [Letter of Credit]. Shipment within one month after receipt of L/C."

1978 May 1–Bean Machines issues its typewritten (on yellow letterhead) Price List #2 covering 44 different pieces of equipment. "Whole system prices are not yet complete." The rear is devoted to "Ordering information and terms of sale." At about the same time, BMI sends out its first "Order form"–on white letterhead.

1978 May–Shurtleff and Aoyagi visit Wataru Takai's home in Kanazawa, Japan, to work on his tofu & soymilk equipment catalog.

1978 July 16–Wataru Takai arrives in the USA in preparation for the 1st Soycrafter's Conference in Ann Arbor, Michigan and to supervise the installation of a Takai system at Tokyo Food Co. in San Mateo.

July 26–The first Takai catalog of small and medium scale tofu equipment (printed with dark brown ink on glossy white paper) arrives in the USA.

At the historic Soycrafter's Conference. Larry Needleman is elected executive director. After the conference, Mr. Takai, with Needleman and Shurtleff, travel (July 30-Aug. 9), around the eastern United States visiting tofu companies.

1978 Nov. 7–Larry Needleman sends Wataru Takai a 4-page "Takai / BMI Contract" for his consideration and eventual signature.

1979 Feb. 14. Takai catalog of large scale tofu and soymilk equipment arrives. Printed with dark green ink on glossy white paper.

1979 May–BMI issues its Price List #5 for Takai Catalog of Small and Medium-sized Equipment.

1979 Sept. 16–Larry Needleman sends Wataru Takai a 2-page, typed, single spaced "Chronological list of Takai problems." The first of the 14 problems was "Nov. 1978–L/C expired because Takai didn't ship quickly enough. BMI extended the L/C but it expired again because of delay in Takai shipping."

1980 Jan. 19–New Takai small scale equipment catalog; 1,500 to USA, 500 to Japan.

1980 Feb. 27–Larry Needleman writes Shurtleff that he owes Shurtleff a total of $496.98 in 1979 commissions. "As far as payment of these commissions and repayment of the principal of your $3,500 loan to BMI, it is our intention to pay NAFSC both of these as quickly as possible."

1980 July 23–Larry Needleman says BMI will stop being Takai's agent.

1980 Aug. 22–Shurtleff writes Takai and encloses a letter from Bean Machines Inc. in which Larry Needleman

© Copyright Soyinfo Center 2013

explains that he is no longer an agent for Takai. "He has found it almost impossible to communicate with you and has finally decided to give up trying."

1980 Sept 18–Takai sells a tofu production plant to Heilongjiang Province Foreign Trade Import Company, Harbin, China. Takai will send 2-3 engineers for installation.

1981 May 17–Mr. Takai writes Richard Leviton that he would definitely like to display his Sub-System S30C at the Soyfoods Conference at Fort Collins, Colorado. He encloses $100 for the balance of the payment.

1981 June–Larry Needleman announces that he has developed and is now selling the Bean Machines BMI Model 100 Disintegrator–The "Mini Mite," a stainless steel soybean grinder which can grind 100 pounds of dry soybeans per hour and sells for $1,485.00. Detailed specifications are given along with 3 photos (one full page).

1981 Dec. 19–Mr. Takai writes Shurtleff a handwritten letter from Jakarta, Indonesia on Sari Pacific Jakarta Hotel. He is now getting orders for equipment from KOPTI Indonesia; he has met with Mr. A.R. Noor of Kopti, who plans to travel to the USA in Jan. 1982 and would like to visit and talk with Shurtleff. Takai plans to go to Bangkok and Hong Kong after Jakarta. "We will do good business in South East Asia."

1986 April 27–Larry Needleman sells Bean Machines Inc. (BMI) to Wally Rogers, plus Steve Fiering and Larry Needleman. As part of the deal, Shurtleff sells his interest in the company for about $4,900, plus $1,340 of overdue back commissions.

3484. Rice, William. 1977. Building a philosophy around the whole grain. *Washington Post.* Feb. 10. p. E1, E6.
• ***Summary:*** Jeane Rosoff, who doesn't eat meat, teaches macrobiotic cooking at St. John's Church in Lafayette Square on Saturdays for the East-West Foundation.

"Macrobiotics is a word that brings looks of horror to the faces of nutritionists. Fathered by a Japanese, George Ohsawa, it is based on the Asian principle of yin-ying, which are opposite but complementary forces.

In "A Diet for the Living," Dr. Jean Mayer, wrote that "Ohsawa's call, if followed faithfully, is that of a Pied Piper who can lead young people to a totally inappropriate and miserable death." Four recipes are given: Miso soup. Pressure cooked brown rice. Tofu mayonnaise. Broccoli with tofu mayonnaise.

3485. Oblinger, Jan. 1977. Tofu, nutty burgers served on 'veggie line' at UMO. *Bangor Daily News* (*Maine*). Feb. 16. p. 6.
• ***Summary:*** "Students at the University of Maine at Orono are eating strange things these days. And they've never been healthier. The Office of Dining Services is making available to students a vegetarian menu in addition to the regular meat and potatoes fare served in the campus' dining halls." Included on the unique menu are tofu burgers–"a small part of the college's campaign to get more vegetables and less meat to those students who want it." Many students who eat at the veggie line do not consider themselves vegetarians; they just like the food. The Bear's Den, a student restaurant at the Memorial Union, now offers a tofu salad sandwich, as well as a meatless "nutty burger" based on cottage cheese.

"According to UMO's assistant manager of dining services, Anne Johnson, tofu is purchased from Peter and Judy Beane of the No-moo Dairy in South Portland [Maine], the only source north of Boston [Massachusetts]... Some of the other hard-to-find items are bought through a Boston company named Erewhon."

"The university learned about tofu in a book by Bill Shurtleff and Akiko Aoyagi, who demonstrated cooking with tofu and miso at the college in November. They showed how to prepare tofu or miso for less than eight-and-a-half cents a pound."

Contains "veggie" recipes for Nuttyburger, and Maveric Chili (with 1 cup whole soybeans). Five photos show students "dining on the tofuburger," which contains soybean curd, carrots, onions, and sunflowers. Most said the flavor "was hard to describe. Several said it tasted a lot like a fish sandwich." Address: Daily News Staff.

3486. Dotson, C. Ray; Frank, H.A.; Cavaletto, C.G. 1977. Indirect methods as criteria of spoilage in tofu (soybean curd): A research note. *J. of Food Science* 42(1):273-74. Jan/Feb. [4 ref]
• ***Summary:*** "Changes in the liquid surrounding packaged tofu (viz., increases in acidity, optical density and viable count) indicated that spoilage of tofu cakes was associated with bacterial growth. These indirect criteria had a high correlation with flavor deterioration detected by sensory evaluation of the tofu cakes."

For example, tofu stored for 0, 1, 2, and 3 days at 15ºC (59ºF) had a total flavor score (where 7 is highest and 1 is lowest) of 5.85, 5.43, 3.70 and 2.08 respectively. In the liquid surrounding the tofu cake, the pH was 5.64, 5.29, 4.60, and 4.49 respectively (i.e. the water became more acidic), the optical density (600 nm) 0.016, 0.061, 0.136, and 0.161 (the water became cloudy), and the viable counts per ml of water were 3.5 million, 99 million, 680 million, and 760 million (i.e. unwanted microorganisms proliferated very rapidly).

Note: This is the earliest publication seen in the U.S. or the Western world on the microbiological quality and safety of tofu. Address: Dep. of Food Science and Technol, Univ. of Hawaii at Manoa, Honolulu, HI 96822.

3487. **Product Name:** Health Valley Tofu.
Manufacturer's Name: Health Valley Natural Foods.
Manufacturer's Address: 670 Mesquit St., Los Angeles, CA 90021.
Date of Introduction: 1977. February.

composition of soy beverage after filtration. (3) Initial investment in equipment used in making soymilk at the factory of Dr. Stephen Youngberg, in Peña Blanca, Honduras. (4) Cost estimates for the production of soymilk as made at the factory of Dr. Stephen Youngberg, in Peña Blanca, Honduras (in Lps. = lempiras). (5) Equipment and costs of the proposed Maisoy project in Honduras.

Page 20: Work with soy in Africa is relatively recent if compared with early recorded work with soy in Asia. Many of the developing African nations recognize the nutritional needs of their population and have started to experiment with the soybean and soy products. Soybean variety trials have been conducted in the Ivory Coast, Rhodesia, Sierra Leone, and Mauritania. Ethiopia has incorporated soy flour and soybeans into traditional dishes. Ruanda and Nigeria have introduced soybean cultivation technology and local consumption, on account of the severe malnutrition that exists in those countries. Nigeria is producing soybeans for export."

Note: Looking at endnote 5 in this bibliography, which cites the source of this information about soy in Africa, it seems quite clear that the word "Mauritania" was accidentally and incorrectly substituted for the word "Mauritius" in the "Country Reports" (see p. 218 of these Reports).

Page 20: In Honduras. The Ministry of Natural Resources, in cooperation with other organizations, has conducted soybean cultivation / production trials in selected areas in Honduras. In Comayagua, the company named Compañía Mejores Alimentos [Best Foods Company] initiated commercial soybean production within the last few years. Small projects of soybean production and consumption are prospering in communities in the following areas: Sonaguera, Colón; Tela, Atlántida; Buena Fé, Santa Bárbara; Las Animas, El Paraíso; Olanchito, Yoro y Barrancho, Choluteca.

The goal of these projects is to introduce soya as a nutritional supplement in the local diet. These projects are carried out within homemaker's clubs, schools, child dining halls, and various communities, with the support of CARE, CARITAS, The National Board of Social Comfort, like our communities and local agronomics. The largest area for cultivating soybeans is five blocks and the smallest is a quarter block. The majority of these projects can be found in the first stages of experimentation but the participants foresee good results. These small-scale projects are important to note because they consist of cooperative efforts and are self-sufficient. On the other hand, the participants will manage their time and labor, and will be twice as motivated to incorporate soy into their daily menus. Address: Honduras.

1976. They coined the term "soyfoods" at that time and first used it in the company name. The term "soyfoods," written as one word, had never been used by anyone before that time. They started making tofu in March 1977.

Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 398. Owner: Benjamin Hills.

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Owners: Ed Miller & Lisa Rein.

Note of 1987. Sept. 7. This was America's first tofu co-op, worker owned and run, followed by The Soy Plant. Label. 1982. 4 by 3 inches. Self adhesive. Nigari Tofu [Firm or Regular]. Red and blue on white. The address is now 302 Blair, Eugene, Oregon 97402. Recipe leaflet. 1982. "Tofu & Tempeh." Four recipes.

Form filled out by Shevah Lambert. 1990. July 2. Surata now makes 30,000 lb/month of this product called Firm Tofu.

Spot in *Health Foods Business.* 1993. Sept. p. 80. Surata Soyfoods Cooperative, worker owned and operated, makes and distributes handcrafted tofu and tempeh with organic soybeans. Announces a move to new quarters in the Eugene Planning Mill, 325 West 3rd Ave., Bldg. A (corner of 3rd and Lincoln), Eugene, Oregon 97401-2524.

Talk with Benjamin Hills, who calls from Hawaii. 1994. May 31. He and Susan Wallace started Surata. Lisa Rein and Martha (last name forgotten; she became the bookkeeper) came in later. Susan is now working with Benjamin making tempeh in Hawaii.

Update: 1997 Oct. 16. This company is now named Surata Soyfoods Co-op, 325 West 3rd Ave., Bldg. A, Eugene, Oregon 97401-2524. Phone: 541-485-6990. Contact: Laura Nolan, sales & marketing coordinator. They still make tofu and tofu products. This is the third oldest existing Caucasian tofu manufacturer in the United States.

3497. Iso, James. 1977. Southeast Asia–emerging growth market for soybeans. *Foreign Agriculture.* April 11. p. 2-4.
• ***Summary:*** With rising incomes and changing eating habits whetting their appetite for meat and quality protein foods, four nations of Southeast Asia–the Philippines, Thailand, Malaysia, and Singapore–are turning to the world market for more livestock feed ingredients. Brazil–by gearing up its export program–has recently gained a substantial foothold in these markets. And soybeans and soybean products also have come from Asian suppliers like the People's Republic of China (PRC), Indonesia, and even Japan, the latter exporting soybean meal crushed from U.S. soybeans. Philippine imports of soybean meal in recent years have varied between 50,000 and 70,000 tons a year. The Philippines also is a viable market for soy proteins for food, thanks to the presence there of three major U.S. meatpackers. Some 50% of the processed meat produced by these firms has contained soy protein since the product's introduction into the Philippines in 1969. Ground red meat containing 20% soy protein enjoys good consumer acceptance. Owing to the large Chinese population in the Philippines, food soybean consumption already is significant. Although domestic soybeans make up the major supply for traditional foods, such as bean curds [tofu] and soy sauce, some 500-600 tons of these beans must be imported each month.

Thai soybean production has yet to make much headway. Thailand's climatic and soil conditions apparently have not been conducive to expansion, despite attempts by local growers and some Japanese interests to establish a large-scale industry in the highlands. In 1976, the country produced about 155,000 tons of soybeans, of which 20,000 tons were exported and the rest either used domestically for food or crushed. This year, if the Government approves, a multimillion-dollar soy protein plant will be constructed with the possibility of producing 10,000 tons of a soy infant food annually and 2,000 tons of meat analogue. The Institute of Feed Research and Product Development–a private Government-backed research organization affiliated with Kasetsart University–has spearheaded textured soy protein (TSP) and soy flour research. Malaysia is mainly noted for its huge and rapidly growing production of palm oil.

Although its population of 2.25 million is dwarfed by that of the rest of Southeast Asia, Singapore plays a disproportionately large role in the region's trade. This is because it is a major transshipment port for the region–and for Malaysia in particular. Most of the imported soybeans are crushed, although significant volumes of beans also are used in producing traditional soy foods for the large Chinese population. The only major soybean crusher outside of the Philippines is located in Singapore, an operation which the management anticipates will crush 100,000 tons of soybeans in calendar 1977. One firm is using soy proteins in canned foods, soy sauce, soft drinks, combined milk, and other products. Address: Foreign Market Development, Oilseeds and Products, Foreign Agricultural Service.

3498. Loetterle, Fred. 1977. Ton yu to tofu [Soymilk and tofu]. *California Living.* April 17. p. 40, 42, 44.
• ***Summary:*** About making tofu and soymilk at Azumaya. "With the precision of a great orchestra, 35 tofu makers dance through six dawns a week to coax the pre-soaked golden soybean into that meal of magic, that all-in-one soup-to-nuts food–tofu the humble, tofu the magnificent, tofu the quintessential actor/actress among all cuisine. Tofu! Tofu? Doufu? Dowfu? What is it, anyway? Is it some bloodless meat fashioned from the cooled and crushed essence of the soybean? Is it a cheese, formed as it is from the soymilk squeezed from the steamed beans and solidified by seawater or a related refinement such as calcium chloride? Is it a chewy bean cake, a jelly-like steak, ambrosia? Is it the world's longest running recipe...?

© Copyright Soyinfo Center 2013

There are three tofu makers in San Francisco: "Azumaya Inc. of 95 Boutwell Street, the Wo Chong Co. of 1001 16th Street, and the Wo Hop Co. of 759 Clay Street. Also, there is one in South San Francisco (Quong Hop's, at 161 Beacon Street, a tradition in or near San Francisco since 1906), another one in Oakland and two in San Jose." Azumaya, at 95 Boutwell St., is run by four brothers (George, Jack, John, and Bill). It was founded on 17 January 1937 in a basement at 1636 Post Street, between Bush and Laguna streets. The Mizono's parents were Saichi and Matsuyo Mizono. "Their father was strengthened by a daily dish of the tofu he loved so well, usually enjoyed as boiled yudofu..." Tofu was made in old copper kettles using a stone grinder. "'We used to hand-crank everything,' recalls Bill. Brother John adds: 'Tofu has really snowballed in the last few years. Everybody here is getting into it as a new food. I think there is no limit to its popularity, because it's so good for your diet.'" The company also produces kinugoshi tofu, and (in a converted doughnut machine) agé. The regular tofu now sells locally for $0.50/lb. Today they use 1,600 to 2,400 lb of Arkansas soybeans a day. Annual gross sales are now $1 million compared to $600,000 in 1969, when they moved into their fourth and present headquarters.

Includes a detailed description of the tofu-making process, and several semi-recipes. Tofu is referred to twice in the article as "soybean cake." Photos show: (1) "Pulling cheesecloth in preparation of removal of tofu from tray." Two men are working by hydraulic presses that press the cloth-wrapped curds into tofu in shallow, perforated stainless-steel forming boxes. (2) "Compressing the coagulated tofu." One man is pulling down on a metal, ratcheting lever press. (3) "Packaging tofu." Three men are placing the curds in shallow plastic tubs. The author closes with a strong recommendation for *The Book of Tofu* by Shurtleff and Aoyagi.

Note 1. This is the earliest English-language document seen (Oct. 2003) that uses the term "ton yu" (only in the title) to refer to soymilk.

Note 2. This is the earliest English-language document seen (April 2013) that uses the word "dowfu" to refer to Chinese-style tofu.

3499. Dolgin, Robert. 1977. Re: Information on a heat sealing machine for tofu, Varipack trays, and polyethylene film. Letter to William Shurtleff in Japan, April 19. 1 p. Typed, with signature on letterhead.
• ***Summary:*** Contains detailed descriptions of the machine, trays, and film. The Varipak trays are available from Sealright Corp. in Los Angeles. Rolls of polyethylene film can be purchased from the Richmond Corp. in Redlands, California. Eddie Okita [in Los Angeles] also has film and packaging machines, but his cheapest models [automatic] run up from $2,000 and package 1,200 pieces per hour.

"We are definitely interested in the small sealers you have, so send brochure and info on them ASAP. Also send the 6 stainless steel settling boxes you ordered.

"We would like to have definite confirmation on the insurance, the agent, and the shipping route, because Westbrae has told us that they will not cover insurance, and that they are not particularly interested in bringing equipment over in their container.

"Payment via a letter of credit would be preferable for us, if possible for you. If not, let us know how payment should be made."

Farm Foods has placed an order for tofu equipment, which Shurtleff is working to expedite in Japan and to answer Dolgin's questions.

The letterhead contains the words "The Farm Food Co." written in large arch. Below the company name is a circular logo, which shows rows of crops (soybeans) in a field converging in the distance at the foot of three mountains. Below that in much smaller letters: "Specializing in Vegetarian Foods." Below that and to the left is the address; to the right is the phone number. Address: The Farm Food Co., 820 B St., San Rafael, California 94901. Phone: 415-454-3797.

3500. Wang, Li Chuan. 1977. Extraction of proteins from vegetable seed compositions. *U.S. Patent* 4,018,755. April 19. 4 p. Application filed 12 May 1975. [7 ref]
• ***Summary:*** "Vegetable seed flakes, meal and the like prepared for extraction in the usual manner were treated with ultrasonic waves solubilizing the protein which was then recovered from solution. This sonifier gives effective sonic extraction."

3501. Timmins, Tom. 1977. Re: Laughing Grasshopper Tofu Shop. Letter to William Shurtleff at New-Age Foods Study Center, April 25. 2 p. Typed, with signaure on letterhead.
• ***Summary:*** "I'm not sure if I'm writing to Bill and Akiko at this address, or if NAFSC is a group of people in residence at 790 Los Palos Manor, or some other thing entirely. No matter. As a representative of Laughing Grasshopper Tofu Shop, I'd like to meet with you when I come to California during the month of May.

"We started making tofu commercially a little over 3 months ago in a semi-traditional fashion... We learned quickly that most of the wooden pieces of equipment had to go. Wooden soaking and curding barrels, tho oak, warped, absorbed curds, began to rot, and generally were unsanitary and too heavy to handle. Our beautiful settling boxes warped also and pulled apart at the seams. The pressing bags we used sprang leaks, tore open at the seams, often spraying okara all over us.

"Every possible problem that could have come up, did. Of course the fact that we were complete novices gave us that special gift of making every mistake that we could. And the boon was that we have been able to resolve most of the

© Copyright Soyinfo Center 2013

errors. While learning to make passable tofu.

"There has been such a demand for nigari tofu that we are now making 500-600 lbs. per day, delivering it in our own van to Boston and to the Pioneer Valley in western Massachusetts. In order for us to make a living, we'll have to produce 1½ to twice as much tofu and soymilk and ice cream. Or raise our prices which we are reluctant to do. Right now 7 adults and 4 children are receiving all or most of their financial support from the tofu shop."

Tom would like to visit Shurtleff and Aoyagi, Bean Machines, San Jose Tofu Co., Quong Hop & Co., and the soy dairy run by The Farm in San Rafael–all in California.

Note: He also visited Azumaya, where he was helped a great deal. Address: LGTS, 3 Main St., Millers Falls, Massachusetts 01349. Phone: 413-659-3883.

3502. Bernardino, Minnie. 1977. Tofu: Oriental food whose American time has come. Puddinglike soy curd adds taste, nutrition. *Los Angeles Times.* April 28. Part VI. p. 1, 10, 11.
• ***Summary:*** Better known by its Japanese name (the Chinese call it dow foo), tofu is fresh bean curd made from soybeans. The curds are formed when a coagulant is added to set the milky liquid [soymilk]. "The subsequent processing methods result in a variety of tofu products that differ only in firmness and texture."

"In Los Angeles the majority of tofu products are locally manufactured by the Matsuda-Hinode Tofu Co. which was started by the Yamauchi family in Hawaii about 30 years ago." The company makes a variety of tofu products "including soft to very soft tofu, medium-firm or Japanese-style tofu, and the hard or Chinese-style tofu that is popular for stir-fry dishes. They also make partially cooked styles such as the broiled block of tofu [grilled tofu], deep-fried tofu puffs (age or aburage in Japanese) and the raw-fried tofu (nama-age)."

Gives recipes (some from *The Book of Tofu*, by Shurtleff & Aoyagi) for: Yosenabe. Stuffed fried tofu. Tuna tofu patties. Tofu-orange almond dessert. Mushroom and onion casserole with tofu. Tofu tartare sauce. Pressed bean curd fry. Four photos show tofu being made at Matsuda-Hinode (overhead view of cutting large sheets into blocks in cooling tank) and in dishes. Address: Staff writer.

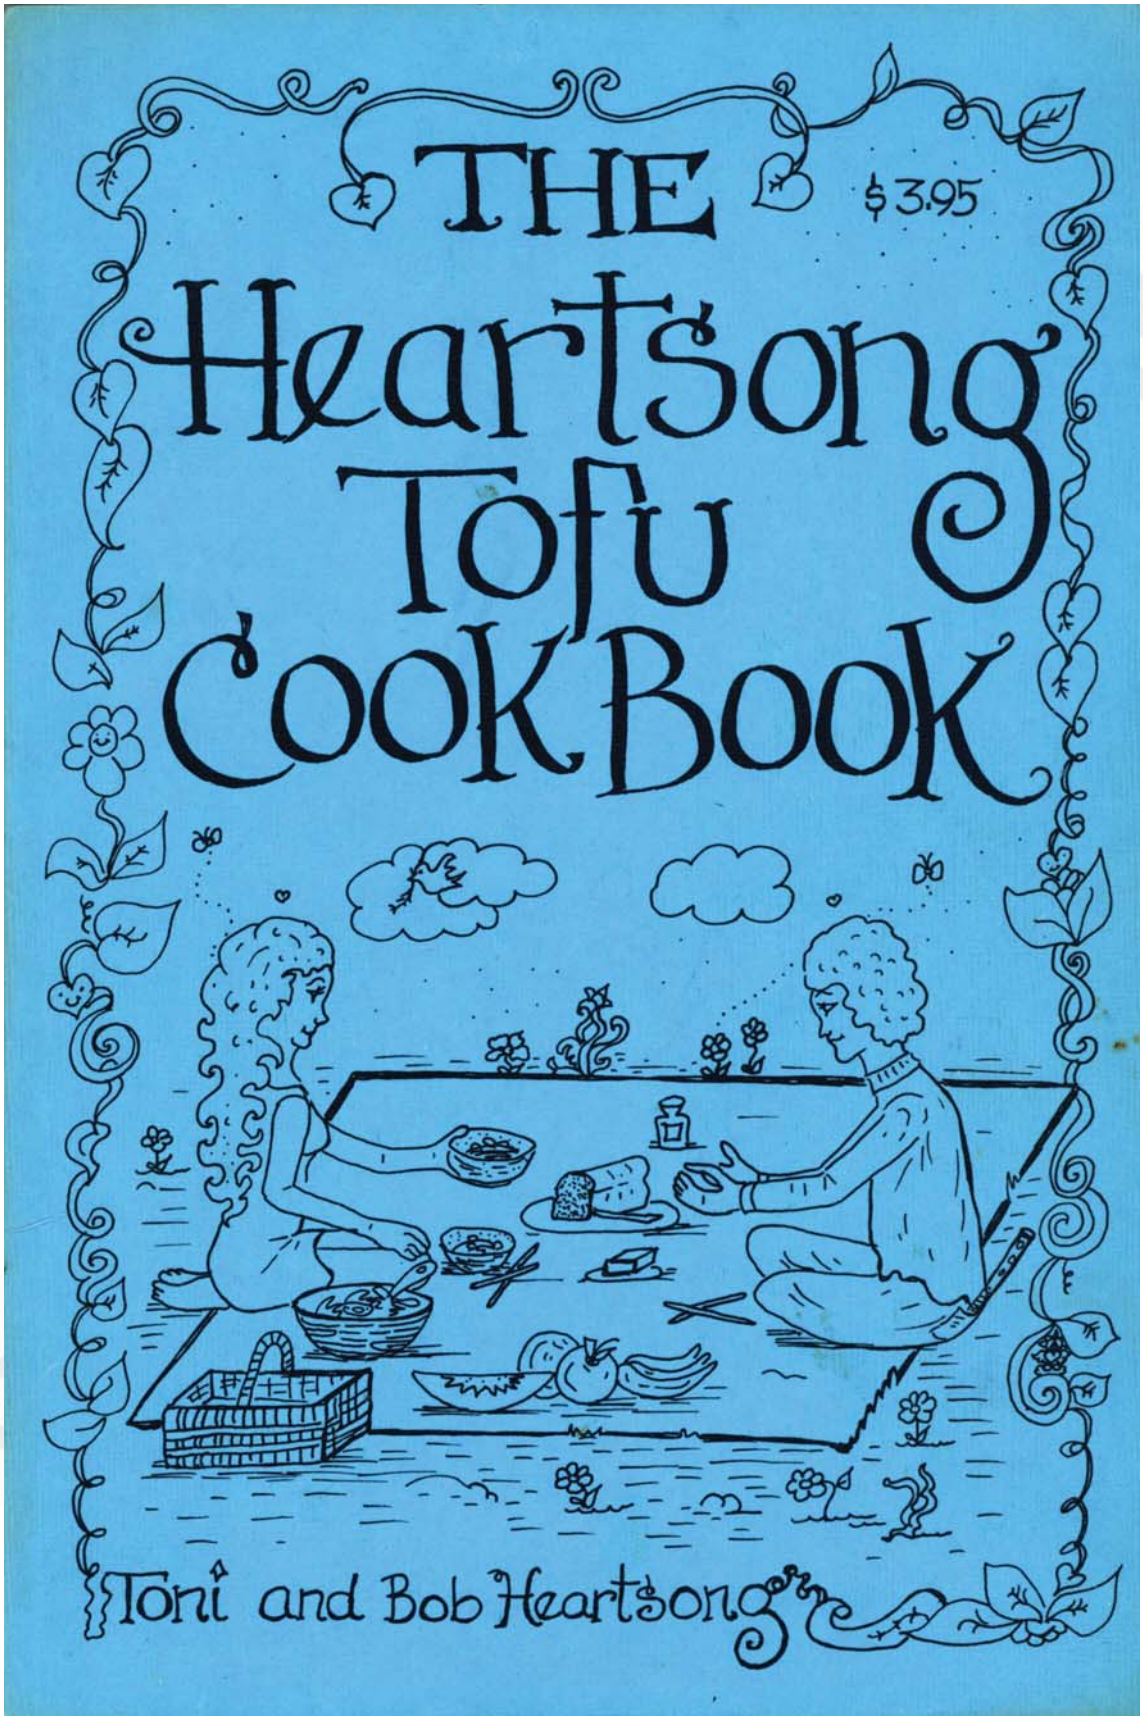
• ***Summary:*** When the People's Republic of China (PRC)

© Copyright Soyinfo Center 2013



© Copyright Soyinfo Center 2013

cut back on its soybean exports last year because of a poor domestic harvest and disruption of marketing channels by the devastating earthquake, Japanese manufacturers of miso, tofu, and other native soy foods were among the first to feel the pinch, having traditionally bought large quantities of PRC soybeans. Their shift could lead to perhaps a 100,000-ton gain in U.S. exports of food-quality soybeans to Japan.

"In 1976, the U.S. shipped about 520,000 tons of these food-use soybeans to Japan out of total U.S. soybean sales there of 3.2 million tons and Japan's total soybean imports of 3.5 million. Japan received another 132,000 tons of food beans from the PRC and a few thousand tons from other supplying countries.

"Adding to this a domestic production of 60,000 tons puts Japan's total soybean use in traditional foods last year at about 750,000 tons.

"Each year, Japan uses about 720,000 tons of soybeans in traditional foods, including roughly 350,000 tons of tofu (bean curd), 180,000 of miso (bean paste), and 70,000 of natto (fermented beans). The remaining tonnage goes into other native products, such as kinako (processed [dry roasted] beans) and frozen tofu, and into fresh soybean consumption.

"Manchurian beans, produced in the colder regions of North China (usually north of 43º latitude), have long been considered the best tasting for fermented foods like miso and natto."

"Outside of the PRC, the varieties of beans preferred by the food manufacturers are found in colder climates, such as Canada and the northern regions of the United States." Several "Japanese trading firms involved in importing food-type beans have come to prefer soybeans produced in Indiana, Illinois, Ohio, and Michigan. These beans, known among the trade as IOM (Indiana, Ohio, Michigan) beans, made up close to 500,000 tons of the food beans imported by Japan last year and go largely into tofu and related foods." Note: This is the earliest English-language document seen (Jan. 2008) that uses the abbreviation "IOM" in connection with soybeans.

"Around 55,000 tons of 'identity-preserved' varieties also were imported last year." Producers are looking for a large bean with a white hilum and high protein and carbohydrate content. All food beans must be #1 grade quality. Talks with miso/natto manufacturers have revealed that U.S. varieties Amsoy, Corsoy, Kanrich, and Beeson meet this general description. However, a bean with all the desired features comparable to the PRC's, particularly as related to taste, is not as yet commercially available in the U.S. Address: Foreign Market Development, Oilseeds and Products, Foreign Agricultural Service.

3512. Dart, Susan, 1977. Tofu, mainstay of the Orient, excellent for health, good looks and hearty flavor. *Post Register* (*Idaho Falls, Idaho*). May 23. p. 15. Living Today section.

• ***Summary:*** The article begins: "You may never have tasted or ever heard of tofu before, but my prediction is that before long you'll know it well.

"There are a lot of noble reasons why you should start eating tofu."

"Part of the tofu boom is due to two people, Bill Shurtleff, an American, and Akiko Aoyagi, a Japanese woman educated in a Quaker school in Tokyo." Together they have written *The Book of Tofu.* "It costs about $7.00 and is an encyclopedia on the subject–500 recipes including how to make your own tofu from dried soybeans."

3513. Bernardino, Minnie. 1977. What is this thing called tofu? *Washington Post.* May 26. p. F25.

• ***Summary:*** This article is very similar to her article titled "Tofu: Oriental food whose American time has come. Puddinglike soy curd adds taste, nutrition" in the *Los Angeles Times* on April 28 (p. I1). A description of tofu plus 7 recipes. Address: Los Angeles Times.

3514. Dart, Susan. 1977. Cook with tofu: Its packed with good taste. Natural foods. *Hartford Courant* (*Connecticut*). May 26. p. E19.

• ***Summary:*** A good introduction to tofu, which "is bean curd or soybean cake, a plain white substance that looks like cream cheese and has almost no taste."

"Part of the tofu boom is due to two people, Bill Shurtleff, an American, and Akiko Aoyagi, a Japanese woman educated in a Quaker school in Tokyo." Together they have written "The Book of Tofu" (Autumn Press, $6.95) which "is an encyclopedia on the subject, with 500 recipes, including how to make your own tofu at home from dried soybeans.

Contains a recipe for Tofu loaf with onion and cheese. A small portrait photo shows Susan Dart. Note: This article was published on the same day in the *Chicago Tribune* (also p. E19).

3515. Gullion, Laurie. 1977. Tofu: High protein food. *Recorder* (*Greenfield, Massachusetts*). May 28. p. 13.

• ***Summary:*** The Laughing Grasshopper Tofu Shop in Millers Falls, Massachusetts, is tucked away beside the Millers Falls Library. "The four-month-old shop in Millers Falls was created by four persons who strongly believe in self-employment and are committed to healthful foods.

"Richard Ira Levitan [sic, Leviton] and Kathy Whelan began the Corncreek Bakery in South Deerfield in 1974, a thriving business which abstains from using any dairy or animal products in its baked goods. Tom Timmons [sic, Timmins] is a past manager of the Yellow Sun Natural Foods Cooperative in Amherst, and Michael Cohen was instrumental in beginning the Equinox Restaurant in Amherst.

© Copyright Soyinfo Center 2013

"'We want to put cows out of business,' said Leviton. Tofu can be used like dairy products in preparing meals at a much cheaper price, and Leviton said the food staple differs from dairy and beef products in that it is low in calories, free of cholesterol and, thus, helps avoid arteriosclerosis and obesity. Cohen, a vegetarian, believes tofu is an excellent meat substitute...

"The Laughing Grasshopper Tofu Shop produces 600 pounds of tofu in a nine-hour day... They distribute their product to Boston, New York City, Baltimore (Maryland), Vermont and New Hampshire. The tofu is sold locally at Foster's Supermarket."

A photo shows Michael Cohen and Jon Lee flipping a tofu settling box. Leviton's name is misspelled as Levitan throughout the article.

Note 1. This is the earliest article seen (Sept. 2011) about the Laughing Grasshopper Tofu Shop.

Note 2. This is the earliest document seen (April 2013) that mentions Michael Cohen in connection with soyfoods; he was an early partner in Laughing Grasshopper (later New England Soy Dairy) and founder of The Tempeh Works.

3516. **Product Name:** Tofu.
Manufacturer's Name: Flying Cloud Tofu. Later renamed The Tofu Shop, then Northern Soy.
Manufacturer's Address: 277 N. Goodman St., Rochester, NY 14607. Phone: 716-442-1213.
Date of Introduction: 1977. May.
How Stored: Refrigerated.
New Product–Documentation: Shurtleff & Aoyagi. 1976. Oct. 30. Visited on Tofu & Miso America Tour. The small shop, located downstairs on Zen Center property, makes tofu occasionally for the Zen Center. Letter/Order from Greg Mello. 1976. Oct. 25. He orders a copy of the unedited edition of *The Book of Tofu, Vol. II.* and 100 "What is Tofu?" pamphlets. "Please send this along as soon as you can; Mr. Greg Weaver and myself hope to have a tofu shop in production, commercially, by early December." His address is c/o The Zen Center, 7 Arnold Park, Rochester, New York 14607.

Shurtleff & Aoyagi. 1977. Commercial Tofu Shops and Soy Dairies. Greg Weaver & Greg Mello at 21 Girton Place, Rochester, NY 14607.

Letter from Earl Lepper. 1978. Jan. 21. "Because the tofu shop is now just coming out from under its debt and the media is helping to educate the public to alternative here and now food, a careful approach has been maintained. So as to keep the Sangha more cohesive and avoid competitive whims, the tofu shop and I are working on a cookbook."

Letter from Andy Schecter to Larry Needleman. 1978. July 12. Concerning La Milpa Power Mill. Stein. 1978. Whole Foods. Jan. p. 34. "In May 1977, the Rochester Tofu shop started making 150 pounds of tofu per week. Now they are producing 1,000 pounds a week."

Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 397. Owner: Greg Weaver and Andrew Schecter.

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Owner: Address is now 30 Somerton St., Rochester, NY 14607. Phone: 716-442-1213. Owner: Andy Schecter. Retail Outlet is The Tofu Shop, 686 Monroe St. Phone: 716-244-4270.

FIND/SVP. 1981, May. "The tofu market: Overview of a high-potential industry." p. 64. The company now makes about 4,500 to 5,000 lb/week of tofu. They make plain tofu (sold in 25-lb bulk containers) and tofu dips (packed in 8-oz. containers). 1984. Jan. 16. Keys to good tofu quality: Good plant sanitation; Immerse tofu immediately in ice water; Vacuum pack. Using a new coagulant, natural calcium chloride, planning to move into a 10,000 square foot building in Rochester. Talk with Andy Schecter. 1988. Oct. 10.

3517. Jacobson, Margie. 1977. Foods: Natural & unnatural. The versatile sprout. *Alternatives* (*Miami, Florida*) 1(5):28. May.
• ***Summary:*** "Alfalfa and soybean sprouts can be added to soups as a vegetable or instead of noodles." A recipe for "Sprout roast" calls for "1½ cups ground almond, soy, or wheat sprouts." Another recipe, titled "Tofu-sprout stir fry" calls for "½ pound mung sprouts,... ¼ cup tamari, 2 tofu (soy bean cheese) cubes, diced." Address: Staff member, Country Health Store, North Miami Beach, Florida.

3518. **Product Name:** Tofu Pops.
Manufacturer's Name: Vegetable Protein Co.
Manufacturer's Address: 140 River St., Cambridge, Massachusetts.
Date of Introduction: 1977. May.
How Stored: Refrigerated.
New Product–Documentation: Talk with John Weissman. 1992. March 31. In addition to the Wheatmeat Tan Pop, John developed and made a Tofu Pop, introducing it in the spring of 1977. He bought squares of plain pressed tofu (3 inches on a side and 3/4 inch thick) from a Chinese retail food store in Boston's Chinatown–he does not recall the company's name and he is not sure if they made the tofu or bought it from elsewhere. Later he bought tofu from Yah Kee, a Chinese tofu maker. He skewered the pressed tofu squares, coated them with his dry flour mix and corn batter, and deep-fried them. He first sold these at the very first Bread & Circus natural food store purchased by Anthony Harnett in Brookline. The product was introduced just after Anthony bought the store–but it was discontinued after a month or so,

© Copyright Soyinfo Center 2013

because it sold slowly; the unflavored tofu was too bland.

3519. Whelan, Kathy; Leviton, Richard; Timmins, Tom. 1977. Laughing Grasshopper Tofu Shop. LGTS, 3 Main St., Millers Falls, Massachusetts 01349. 6 p. Unpublished typescript. Undated.

• ***Summary:*** Starts with a brief biography of the three authors / partners.

"Richard and Kathy, natives of Massachusetts and wanting local but meaningful employment, founded Corncreek Whole Grain Bakery in the spring of 1974. Since then, while other bakeries have come and gone, Corncreek has thrived and continues to grow, The bakery was established on a strong advocacy of using pure, organically grown ingredients, a reliance on hand-craftsmanship and minimal use of machines, and an abstention from any dairy or animal products in the baked goods. They have successfully restored bread-baking to the domain of handcraft in a smell commercial shop.

"Tom, a native of Iowa, now living in Brattleboro, Vermont, with his wife, Judy, and their three children, worked as manager of the Yellow Sun Natural Foods Coop in Amherst, Massachusetts, for 2½ years. His residiency there came during a formative period of struggle and growth in the now prosperous store. Following this, he spent over a year on the sales staff of Llama Trading Company, a natural foods wholesaler in Brattleboro. From his experiences both on the retail and wholesale level, he has catalyzed the distribution and use of wholesome foods all over New England.

"Together, we bring a strong commitment to health-giving foods, an ability to work hard to achieve a goal, and a practical background in transmuting ideals to reality in the business world."

Explains what tofu is and why they started a tofu shop (Right livelihood, world food crisis, educating the public), describes each ingredient used, and how tofu is made in the shop. The soybeans are ground in a Hobart VCM blender, then the puree is cooked in two 15-gallon stainless steel cooking pots, and the soymilk is curded with nigari in a 20-gallon oak barrel and the tofu is pressed in two hardwood settling boxes.

Attached to this document is a leaflet (single sided, 28 cm, brown on beige) titled "Laughing Grasshopper Tofu Shop" (see next page). Address: Millers Falls, Massachusetts.

3520. Birnbaum, Alfred. 1977. Re: Homemade natto and natto recipes. Letter to William Shurtleff at New-Age Foods Study Center, June 11. 5 p. Handwritten (in pencil) and signed.

• ***Summary:*** "Dear Bill–I enclose more in the way of nattô recipes, which I hope will prove of interest to you. I also wish to clarify some things in my description of the natto-making process: namely that the bacteria are aerobic and so the fermenting beans should not be placed in air-tight containers (I place my bean-cultures in plastic tofu tubs and cover–but I do not seal–with foil or plastic bags before putting in any insulated environment e.g., wrapping with towels and placing in unheated oven); secondly, more cooking than the cited 3-4 hours may be necessary to achieve the desired degree of softness in the soybeans depending on the pre-soaking time and cooking flame (an all-day 'slow-cooker' crock-pot might prove the ideal in cooking the beans, although extremely energy consuming).

"I hope that your research in Indonesia went well and that the upcoming conference on seaweeds will prove equally successful.

"Please let me know if there is anything I might be able to do for you, I hope I will be able to meet you sometime. Gasshô, Alfred.

"P.S. I made my first tofu with the Learning Tree kit from the New-age Center. I know of few investments better than those of acquiring self-sufficiency skills–your teaching has let me know the rewards of making tofu. Thank you."

"Further suggestions for natto: Use in Okonomiyaki [savory Japanese-style pancakes]. Roll in hakusai [cabbage] leaves in a sudare and top with goma-ae [ground sesame-seed] dressing."

On pages 2-5 are some of Alfred's favorite natto recipes: (1) Nattô "cutlets" á la Pokarski–Adapted from a traditional Russian dish. With Paprika sauce. It calls for "1½ c. nattô, ground or blended in a blender or suribachi to a paste ('nattô butter')."

"Yaki nattô or Nattô agé-yaki: Perhaps my favorite nattô dish, enjoyed even by persons who normally dislike the taste of nattô. Spoon natto by the tablespoonful into agé [deep-fried tofu] pouches (4 tablespoons each on the average) and pan-fry in oil or butter over medium heat approximately 3-5 minutes on each side. Drain on drip-screen or paper towels. Serve while still steaming hot with a dip of shoyu, karashi [Japanese-style mustard] and chopped green onions, or grated daikon and ginger."

Chilaquiles con nattô: An adaptation of a Mexican "platillo pobre" (poor-person's dish). Sauces for Chilaquiles: Salsa verde (green enchilada sauce), salsa roja (red enchilada sauce), molé poblano (a dark rich chile sauce...).

"I assume that you already have or can easily obtain recipes for the following standard nattô dishes: Nattô shiru [soup]. Iwate nattô mochi (mochi-wrapped nattô). Nattô maki-zushi [natto in sushi]. Nattô-kake soba" [Natto over buckwheat noodles].

Nattô oroshi agé. Nattô aé [six different combinations]. Address: 1048 West 39th Place, Los Angeles, California 90037.

3521. Will, Joanne. 1977. Too few knew tofu could do so much for so little. *Chicago Tribune.* June 11. p. N_A19-20, or W_11-12.

Laughing Grasshopper

Tofu Shop

Hand Made - in the traditional manner from organically grown soybeans and nigari.

NO PRESERVATIVES

3 Main Street Millers Falls, Massachusetts 01349

© Copyright Soyinfo Center 2013

• ***Summary:*** "Western cooks are just beginning to discover the wonders of soybeans–the golden beans that have been the mainstay of Oriental diets for years." Now "soybean curd, or tofu (toe-foo)" (also known as 'meat without bone' or 'meat from the fields'), an important source of protein in the Japanese diet, is attracting interest among American cooks.

There is a small tofu factory in Chicago, named Chicago Tofu, run by Mr. and Mrs. Minoru Kanki, located at 3255 N. Halsted St. About two years ago, the Kankis took over the company and began modernizing it. They now make about 1,000 blocks of tofu a day, five days a week.

Describes how tofu is made at this company, and how it can be used. "Westerners, especially vegetarians, are fond of broiling, frying, or baking tofu and topping it off with a warm tomato or mushroom sauce." A photo shows Mr. and Mrs. Kanki with fresh tofu in their tofu factory. Address: Food editor.

3522. **Product Name:** Tofu.
Manufacturer's Name: Bhaga Tofu. Renamed Lecanto Tofu Shop by July 1977.
Manufacturer's Address: P.O. Box 444, Lecanto, FL 32661. Phone: 904-746-5374.
Date of Introduction: 1977. June.
Ingredients: Organic soy beans, water, nigari.
Wt/Vol., Packaging, Price: 14 oz plastic tub.
How Stored: Refrigerated.

New Product–Documentation: Letter from Marvel Huffman (P.O. Box 444, Lecanto, Florida 32661) to Akiko Aoyagi. 1976. April 12. "I have become very interested in making tofu so after reading your letters I sent for your book and would like to start a cottage business in this area. W (my daughter and my self) now make it for our own use and really like it. Are you planning to be any where in Florida for cooking classes or talks?"

Florida Dept. of Agric. Food Inspection Report and Annual Food Permit. 27 Aug. 1976. Bhaga Tofu, S-491 South, Lecanto, FL. Shurtleff & Aoyagi. 1977. Jan. 28. Commercial Tofu Shops and Soy Dairies. Marvel Huffman. Letter to William Shurtleff. 1977. Aug. 4. Label. 1977, undated. 4.75 inch diameter plastic lid. Green on white. Illustration of bamboo stalk and leaves. Lecanto Tofu Shop. Box 444, Lecanto, FL 32661.

Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 394. Owner: Jean Huffman.

FIND/SVP. 1981, May. "The tofu market: Overview of a high-potential industry. p. 89. The company now makes about 2,000 lb/week of plain tofu. The product is packed in 25 lb bulk containers and small 14 oz plastic containers. Retail price ranges from $0.99 to $1.49.

Talk with followed by letter from Marvel Huffman. 1988. May 17. P.O. Box 344, Lecanto, FL 32661. Phone: 904-746-6123. The company, originally called Bhaga Tofu, was making tofu by August 1976 in Lecanto, which is a rural area about 75 miles from Gainesville. Her daughter, Jean, who was a vegetarian and who had just graduated from high school, was the real impetus behind the company's founding. Her son, Don, also worked for 6 years. The next year she would be entering the University of Florida at Gainesville as a freshman. Marvel was a widow at the time and needed a source of income. They built a special building near their home. They learned to make tofu from The Book of Tofu and also when they flew to Atlanta in December 1976 to hear Shurtleff and Aoyagi on a lecture tour. Together they would make the tofu on weekends when Jean went home to Lecanto, then she would deliver it on Monday in and around Gainesville. The company's name was originally Lecanto Tofu Shop but in about 1978 it evolved to the shorter form, Lecanto Tofu. In 1981 they moved the business north to Rte. 3, Box 150, Lake City, Florida to get better access to Jacksonville and Tallahassee. "If I were the kind of person who could designate work better, I would have a million dollar business by now. I tried to do it all myself. So we sold the business at the very end of 1983 when it was making a profit. Now it is doing just great." Letter from Marvel. 1988. July 6. "The word Bhaga was never used as a commercial part of the business. Nothing was ever printed etc. with its use."

Talk with Rod Prins. 1992. May 19. Two years ago he sold the business to Don Young, who let it go down hill.

3523. Heartsong, Bob; Heartsong, Toni. 1977. Foods: Natural & unnatural. Tofu. *Alternatives* (*Miami, Florida*) 1(6):28-29, 38. June.
• ***Summary:*** Contains an introduction to tofu plus recipes by

© Copyright Soyinfo Center 2013

the authors of *The Heartsong Tofu Cookbook*. There is also a full-page description (p. 29) of how to make tofu at home, with numerous illustrations.

"Toni and Bob Heartsong are virtually devoting their lives to preparing tofu, teaching others how to make it, and instructing people in tofu cookery." Address: Staff member, Country Health Store, North Miami Beach, Florida.

3524. Kushi, Michio. 1977. The book of macrobiotics: The universal way of health and happiness. San Francisco, California: Japan Publications, Inc. x + 182 p. June. Illust. Index. 26 cm.

• ***Summary:*** Many followers of macrobiotics consider this to be the author's classic work on the subject. The preface tells briefly how Mr. Kushi got involved with macrobiotics and came to America. He began to lecture in New York in 1955. His teachings began to spread, especially after 1963. By Feb. 1977 he has conducted 5,000 lectures and seminars in America and Europe. One Appendix is titled "A Historical Review of the Macrobiotic Movement in North America" (p. 168-71).

Concerning foods made from soybeans, the book discusses miso (p. 51-52), protein (p. 69), tamari (p. 51-52, 131-33), tekka (52, 133), and tofu plaster (130; "more effective than an ice pack to draw out fever"). Concerning smoking, the author believes that it "does not contribute to produce lung cancer" if the smoker eats a proper traditional (macrobiotic) diet (p. 115).

"In 1949, Michio Kushi, during his postgraduate studies at Tokyo University, was inspired by the teaching of George Ohsawa. He came to the United States in connection with the World Federalist movement. Besides him, Aveline Tomoko Yokoyama in 1951, Herman Aihara in 1953, Cornellia Chiko Yokota, Romain Noboru Sato and his brothers Junsei Yamazaki, Shizuko Yamamoto, Noboru Muramoto and others came to the United States during the following years. After experience with various enterprises they respectively began to teach macrobiotics, mainly in New York. George and Lima Ohsawa also visited America from Europe to conduct seminars. Macrobiotic summer camps, restaurants, and food stores began to operate on a small scale with many American people. Educational activity was organized as the Ohsawa Foundation at that time. However, on the occasion of the Berlin Crisis in 1961, the major active people related to the macrobiotic movement made an 'exodus' to Chico, California. Robert Kennedy, Lou Oles, Herman Aihara and others began Chico San, Inc., as a food manufacturing and distributing company, and established the Ohsawa Foundation in California. Later, the Foundation moved to Los Angeles, its main activity being publishing George Ohsawa's works. The San Francisco center was established. At a later date, Jacques and Yvette de Langre [DeLangre], Joe and Mimi Arseguel and many others shared educational activities in California and other areas of the West Coast.

"In the meantime, after educational activity in New York, besides several seminars on Martha's Vineyard and various local colleges, Michio and Aveline Kushi moved to Boston in order to concentrate on education for the younger generations. They organized the East West Institute in Cambridge which later moved to Wellesley and then transferred to Boston. To meet the increasing demand for good food, a small basement food store, Erewhon, was opened. Erewhon was managed and developed over the years by the Kushis, Evan Root, William Tara, Roger Hillyard and Paul Hawken. Erewhon was followed by a small restaurant, Sanae, managed at different times by Evan Root, Tyler Smith, and Richard Sandler. Lectures by Michio Kushi continued for five years in Arlington Street Church, Boston, with repeated visits to many major U.S. cities. Erewhon developed into a larger store, on Newbury Street in Boston, and added its wholesale operation from a warehouse on the South Shore, Boston Wharf, distributing constantly to an increasing number of natural food stores. The warehouse facility has been managed by Paul Hawken, William Garrison, Tyler Smith, and currently Jeff Flasher and other associates as well as the Kushis. Erewhon further established a Los Angeles store which also developed into a wholesale operation–managed over the years by the Kushis, William Tara, Bruce Macdonald, and currently by John Fountain and Thomas DeSilva...

"The *East West Journal*, a monthly newspaper, established in 1970–managed over the years by Ronald Dobrin, Jack Garvey, Robert Hargrove, and currently Sherman Goldman, Lenny Jacobs and other associates–is continuing to introduce to the wider society, the new vision for the present and future world. Educational activities directly concerned with teaching and other educational projects have been administered since 1973 by the East West Foundation, a nonprofit educational organization managed by the Kushis, Edward Esko, Stephen Uprichard, and other associates." Address: Boston, Massachusetts.

3525. Moledina, K.H.; Regenstein, J.M.; Baker, R.C.; Steinkraus, K.H. 1977. A process for the preparation of dehydrated salted fish-soy cakes. *J. of Food Science* 42(3):765-67. May/June. [8 ref]

• ***Summary:*** For best results, mix mechanically deboned flounder meat with salt (30% of meat weight) and soybean curd (20% of the meat weight). Subject the mixture to 75 pounds per square inch to remove juices and form cohesive cakes. Dry the cakes at 50ºC for 8 hours to give a final product containing 49.8% crude protein, 14.4% moisture, 21.1% salt, and 5.3% crude fat. Remove the salt by bringing the cakes to a boil in three changes of water. Can be made economically with the use of simple equipment, making it suitable for developing countries. Address: Dep. of Food Science, Cornell Univ., Ithaca, New York 14853.

3526. Shurtleff, William; Aoyagi, Akiko. 1977. Excerpts from *The Book of Tofu:* Deep-fried tofu. *Mother Earth News* No. 45. May/June. 62-64. [1 ref]
• ***Summary:*** Describes how to make at home and serve thick agé, ganmo, and agé. Address: c/o Aoyagi, 278-28 Higashi Oizumi, Nerima-ku, Tokyo 177, Japan. Phone: (03) 925-4974.

3527. Shurtleff, William; Takai, Wataru. 1977. Contract between Takai Seisaku-sho and New-age Foods Study Center. Ishikawa-ken, Japan. 1 p. 36 cm.
• ***Summary:*** Shurtleff contacted Takai, as the largest and oldest manufacturer of tofu equipment in Japan, and asked if he had a catalog of his equipment. Wataru Takai said the company had only leaflets in Japanese. Thus, they agreed that Takai needed an English-language catalog of tofu equipment, the first such catalog ever to be created–worldwide. Shurtleff agreed to create such a catalog on two terms: (1) First that he and Akiko would do the work as a consultant for Takai and charge for their time. (2) That they would agree upon a long-term contract that would be mutually beneficial to both organizations. This is that contract, which deals with the following issues: (1) Flow chart (ordering procedure from NAFSC getting an enquiry or order to Takai shipping the equipment). 2. Commissions–based on the yen sale value of individual pieces of equipment. 3. Catalog will contain tofu equipment made by other manufacturers–so it would contain all equipment needed by Western tofu makers and they would have a choice of products. 4. Reduction of commission when orders placed are solicited by Takai or Jetro. 5. Ongoing consulting by Shurtleff. 6. Contract validity–18 months. The contract was signed on 5 June 1977. It is written on Takai's new English-language letterhead, designed by William Shurtleff and Akiko Aoyagi. The logo shows a lever on top of a soybean moving the world. The first order went to Robert Dolgin at Farm Foods in San Rafael, California. Address: 1. Founder, New-age Foods Study Center, Tokyo, Japan; 2. Overseas manager, Takai Seisakusho, 307 Inari, Nonoichi-machi, Ishikawa-ken 921, Japan. Phone: (0762) 48-1355.

3528. Magida, Phylis. 1977. Make your picnic cuisine 'to go' with ethnic flair: Eats. *Chicago Tribune.* July 8. p. A1.
• ***Summary:*** Describes how people picnic in many different countries, and where to buy these ethnic supplies in the Chicago area. In Japan, when people picnic, they take several lacquered boxes filled with movable trays, each filled with a variety of foods designed to keep well without refrigeration. At Tenkatsu's Restaurant (3365 N. Clark St.) buy an order of beef teriyaki, accompanied by at least one of the following: "... *hiya dofu* [chilled tofu] (a rectangle of protein-rich soybean curd that looks like a white molded custard, 85 cents)."

Then walk three doors to Star Market (3349 N. Clark St.) "and buy an eight-piece combination box of *futomaki* (four small seaweed rolls stuffed with rice), and *inari* (four small ovals of deep-fried bean curd)." Eat these at room temperature. Total price at Star: $3.75.

• ***Summary:*** Discusses a possible merger between Llama Trading Co., Corncreek Whole Grain Bakery, and Laughing Grasshopper tofu shop.

Note: Also in Sept. 1977 Channel 57 TV in Springfield, Massachusetts, ran a program on Laughing Grasshopper Tofu Shop. Address: Massachusetts.

3533. Rodale, Robert. 1977. Tempeh, a new health food opportunity. *Prevention* (*Emmaus, Pennsylvania*). July. p. 25-32.
• ***Summary:*** This outstanding article begins: "Gale Randall of Unadilla, Nebraska, is the first commercial tempeh-maker in the United States... Tempeh is on its way up, Before long, it will be eaten widely and lovingly across this land of ours. Someday there could even be a sign along Highway No. 2 in Southeastern Nebraska pointing to the gravel road that leads to where Gale Randall lives. It might say something like this:

© Copyright Soyinfo Center 2013

'Here, in 1975, the tempeh revolution got its start.'"

Soybean sprouts and bean curd (tofu) are great foods, but they are side dishes that never occupy center stage. "Tempeh, in contrast, has the potential to be a real main course dish that could lead soybeans to the forefront of the health food advance. It has a firmness, body and flavor that could eventually lead to its acceptance as 'another thing to eat when the family's tired of chicken, beef and fish.'

The section titled "The Nebraska Tempeh Pioneer, notes that Gale Randall works in the Lincoln, Nebraska, post office at night and operates his tempeh-making operation during the day. He discovered tempeh 3 years ago while searching for an inexpensive protein product he could make at home. Randall recalls that Dr. H.L. Wang, of the NRRL in Peoria, Illinois, "did everything possible to help me get started. She was wonderful. I've never had anyone help me like that." She provided Randall with tempeh starter culture and lots of free advice. Photos show Randall with his tempeh incubator and slicing finished tempeh.

The last section, titled "The Coming Soy Boom," talks about that work of C.R. Sirtori and co-workers in Milan, Italy, whose research has showed that soybeans have a powerful ability to reduce cholesterol levels in human beings. Rodale then adds: "The next phase in tempeh development, I feel, will be for more people like Gale Randall to set up small tempeh shops, from which they can supply health food and natural food stores." A sidebar at the end states that the USDA Northern Regional Research Center has provided Rodale Press "with large amounts of free [tempeh] starter, which we are making available in individual packets to save the scientists a lot of clerical work. In addition, we also have illustrated plans for building an incubator as well as additional printed material on tempeh, including recipes. To receive this material, send your request, along with 50 cents to cover handling, to Prevention Tempeh Starter, 33 E. Minor St., Emmaus, Pennsylvania 18049.

A photo-like illustration (line drawing) shows Robert Rodale.

3534. **Product Name:** Soymilk [Honey & Vanilla, or Plain].
Manufacturer's Name: Soy Plant (The).
Manufacturer's Address: c/o Wildflour Community Bakery (a co-op), 4th Ave., Ann Arbor, MI 48104. In Jan. 1978 moved to 211 East Ann St. Phone: 313-663-0500.
Date of Introduction: 1977. July.
Ingredients: Water, organic soybeans.
Wt/Vol., Packaging, Price: ½ gallon plastic jug, or from a cooler.
How Stored: Refrigerated.
New Product–Documentation: Label in The Soy Plant scrapbook on p. 4. 3 by 4 inches. Black on white. Pressure sensitive. "Keep refrigerated. Made from water and organic soybeans by The Soy Plant, a people's business, Ann Arbor, Michigan, 48104. (313) 663-0500. Flavored. Just add a little honey and vanilla." An illustration shows soybean vines growing to left and right out of a rayed planet.

Steve Fiering. 1979. Whole Foods. Jan. p. 38, 40. "A Midwestern Interest in Tofu." This is included in a list of products presently produced by the company. Talk with Steve Fiering. 1988. June 10. This was the company's second commercial product. Production probably started when they were still at Wildflour, before they went to Eden's. No new products were introduced while at Edens. At Ann St. it was also sold in a plastic cooler (a Norris Milk Machine), stirred by a motorized paddle.

Talk with Steve Fiering, a founder of The Soy Plant in Ann Arbor. 2000. Dec. 3. The Soy Plant probably used organic soybeans from day one. They probably got them directly from the The People's Food Co-op, a retail store located next door. The plain soymilk was purchased mostly by Asian-Americans; they sweetened it with sugar–which they preferred to honey.

3535. **Product Name:** Tofu [Packaged, or Bulk].
Manufacturer's Name: Tofu Shop (The).
Manufacturer's Address: 116 N. Oak St., Telluride, CO 81435. Phone: 707-822-7409.
Date of Introduction: 1977. July.
How Stored: Refrigerated.
New Product–Documentation: Shurtleff & Aoyagi. 1979. July. New Tofu Shops & Soy Dairies in the West. Matthew Schmit. The tofu is made at his soy deli. Note: This tofu shop moved to Arcata, California, in 1980.

Letter from Matthew Schmit. 1988. July. His company started making tofu in July 1977.

Talk with Matthew Schmit. 2002. Sept. 23. From day one, this tofu was made using natural nigari (purchased from Westbrae Natural Foods in California) and organically grown soybeans (from the Tucson Cooperative Warehouse in Arizona). However the word "organic" did not appear on the label.

Note: This is the earliest known commercial soy product made by The Tofu Shop in Telluride, Colorado.

3536. **Product Name:** Fresh Joy o' Soy Soymilk (Natural Unflavored).
Manufacturer's Name: Tofu Shop (The).
Manufacturer's Address: 116 N. Oak St., Telluride, CO 81435.
Date of Introduction: 1977. July.
How Stored: Refrigerated.
New Product–Documentation: Letter from Matthew Schmit. 1988. July. This product was launched in July 1977 in Colorado. Talk with Matthew Schmit, founder and owner of Tofu Shop Specialty Foods, Inc. 2002. Sept. 19. They sold this soymilk in Telluride at the local Co-op–outside of their deli. It was probably sold in glass Mason jars with taped on labels.

3538. **Product Name:** Thaufu [Tofu].
Manufacturer's Name: Kumaraswamy Tofu Shop.
Manufacturer's Address: Jaffna, Sri Lanka.
Date of Introduction: 1977. August.
New Product–Documentation: Soyanews (Sri Lanka). 1982. Oct. "Jaffna's first tofu shop." "The credit for opening Sri Lanka's first tofu shop should perhaps go to Mr. K.S. Kumaraswamy of 235, Navalar Road, Jaffna. Sixty-three year old Mr. Kumaraswamy opened his tofu ship in 1977... but within two months the venture folded up. A vegetarian, he was born in Singapore but raised in Sri Lanka.

After "the ceremonial opening on August 20, 1977," he began making and selling his first tofu. But he soon faced the harsh realities of trying to market an unfamiliar food.

3539. Takai, Wataru. 1977. Re: Larry Needleman. Letter to William Shurtleff at New-Age Foods Study Center, Aug. 20. 1 p. Typed, with signature on letterhead. [Jap]
• ***Summary:*** This letter is written on Takai's new English-language letterhead, designed by William Shurtleff and Akiko Aoyagi. The logo shows a lever on top of a bean moving the world. Takai says: "I think it is very nice that Larry Needleman has the plan to do advertising for our equipment in America." He has made the first Takai price list and will mail some to Shurtleff. Address: No. 307, Inari, Nonoichi-machi, Ishikawa-gun, Ishikawa-ken 921, Japan. Phone: 0762-48-1355.

3540. Leviton, Richard. 1977. Re: History of and current developments at Laughing Grasshopper Tofu Shop. Letter to William Shurtleff at New-Age Foods Study Center, Aug. 23– in reply to inquiry. 7 p. Typed, with signature.
• ***Summary:*** An excellent letter, full of useful details! "Laughing Grasshopper has grown rapidly and predictably since its inception last January." The company now produces 700 to 800 lb/day of tofu, 6 days a week, with 3 men working 8-10 hours each and a janitor working 6 hours. Altogether seven people are employed: four partners, two full-time employees, and one part timer. They earn $2.75 an hour and have an insurance program paid for by the business Summer sales have averaged $8,000/month. They are moving their shop of some 1,000 square feet to a new location of 7,000 square feet for only double the rent. They are looking for $30,000 in investments to finance their new venture. They are importing equipment from Japan. "This winter we intend to commence soymilk production; next spring: tempeh, soy mayonnaise, soy ice cream, and agé. We have potentially a very exciting and massive business on our hands."

"That's the bright side of the picture. While the sales have been soaring and visions of financial glory mounting, certain hard facts have made themselves known. Running a business is difficult. Last winter I came down with mononucleosis and was out for seven weeks. We have had very bad relations with our landlord who has burned us on an illegal plumbing job he did for us, shut our water off twice, in the middle of production, and has threatened to take us to court suing us $12,000 for damages done to his personal property. We have thrown out hundreds of pounds to terrible tofu, due to bad beans or bad nigari technique. We have run out of soybeans and been closed for days while we drove around finding some. We have been shut down by the town health department and given a month's time to move by the state hoard. We have experienced much indecision and emotional turmoil and the new corporate structure will probably have Tom Timmins and me as the two principal owners with the stockholders. We have been on educational television; a five minute spot featuring our shop and some dialogue and shown in Springfield, Massachusetts. A lot of equipment has broken down, or become unfit to use and we are ruining the floor (made of oak beams) even though we have 3 large floor drains.

"Most people only see the good tofu coming out of our shop; the vicissitudes of business are mercifully spared their consideration. But it's all a matter of attitude. We feel confident now about our prospects and feel we will somehow muddle through the mess and confusion we have created for ourselves."

Leviton then answers in detail the following questions asked by Shurtleff: How did you obtain equipment and ingredients? How did you learn to set up a shop? What type of equipment did you buy and how much did it cost? What about health inspectors and codes? How did you determine your prices and what are they? How did you choose the best variety of soybean to use? How and from whom do you buy your soybeans? Your nigari?

"Here are some replies to questions in your letter of May 5. We sell 8-ounce pieces of tofu for 21 cents each, 50 to a pail for $10.50 delivered, with a $2.10 deposit on the 5 gallon pail which we ask to get back. Retail sales (which are insignificant) are 25 cents a piece."

"We have tried 20 different soybean varieties and only a few make good, reliable tofu, i.e., firm, holds together, tastes good. In particular Wells, Rampage, and Prize have given excellent tofu... The oil content of the bean is important... You want as much protein and as little oil in the bean. If there is much oil, then the bags are clogged, the tofu is slimy, the yields drop by 25%. We have found many brokers don't even know what kind of bean they are wholesaling. A good bean is a joy to work with, a bad bean is a nightmare. We are

• ***Summary:*** "Food processing seminar: Miso, tamari, tekka, pickles, tofu.

"We are moving to larger quarters; call for new locations and schedule."

Note: This seminar was probably taught by Bill Tims of Boston (see Sept. issue).

3542. Lane, Joshua. 1977. Vegetable soybeans (Letter to the editor). *Alternatives* (*Miami, Florida*) 1(8):5. Aug.
• ***Summary:*** "Just a quick comment on your well-done sprouting article. There are different types of soybeans; a vegetable type of soybean differs from a standard soybean by being higher in protein and having a lower oil content. It also does not [sic] contain the trypsin inhibitor that is found in the standard soybean. It has been developed as a vegetable rather than as a oil type soybean.

"The Chinese and Japanese have been using vegetable soybeans for centuries. It makes much better tofu and produces a higher yield than regular soybeans. Vegetable soybeans are higher priced than the standard soybean; the reason is that the vegetable soybean has a yield per acre which is considerably lower than the standard soybean." Address: Hollandale, Florida.

3543. Shurtleff, William; Aoyagi, Akiko. 1977. Tofu & soymilk production: The Book of Tofu, volume II. Lafayette, California: New-Age Foods Study Center. 128 p. Aug. 1. Illust. by Akiko Aoyagi Shurtleff. No index. 28 cm.
• ***Summary:*** A rough photocopied manuscript with a yellow cover, created in response to a letters from many people requesting information on how to start a tofu shop. This book was published in finished form in 1979 under the same title, Tofu and Soymilk Production (336 p.).

Contents: 1. So you want to start a tofu shop or soy dairy? 2. Setting up shop; The community shop, the traditional shop, the steam-cooker shop, the pressure cooker shop, the soy dairy, the modern factory. 3. Ingredients. 4. Scientific data concerning the tofu-making process. 5. Tofu. 6. Firm tofu. 7. Using okara and whey. 8. Deep-fried tofu: Cutlets, burgers, and pouches. 9. Soymilk. 10. Soymilk ice cream, yogurt, kefir, mayonnaise, and cheese. 11. Silken tofu & soft tofu (Silken tofu is made from concentrated soymilk). 12. Lactone silken tofu. 13. Grilled tofu. 14. Wine-fermented tofu. 15. Dried-frozen tofu. 16. Yuba.

Appendix A: People and institutions connected with tofu & soymilk production. B: Sketches of tofu and yuba shops in Japan. C: So you want to study tofu in Japan? D: Table of equivalents.

Note 1. This is the earliest English-language document seen (April 2013) that uses the term "silken tofu" to refer to Japanese *kinugoshi* tofu.

Note 2. This is the earliest English-language document seen (Oct. 2011) that uses the term "wine-fermented tofu." Address: New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549; 278-28 Higashi Oizumi, Nerima-ku, Tokyo 177, Japan.

3544. Takai Tofu & Soymilk Equipment Company. 1977. Takai catalog of small and medium-sized equipment. 307 Inari, Nonoichi-machi, Ishikawa-ken 921, Japan. 3 panels each side. Each panel: 28 x 21.5 cm.
• ***Summary:*** This is Takai's first English-language catalog, conceived of and developed for Takai by William Shurtleff. Many early tofu makers in the USA and Europe ordered their equipment via this catalog.

The banner heading across the top of the first page is white letters on a green background. The body of the catalog is black letters on white glossy paper. Photos (printed in black on a light green screen) show the company's many pieces of equipment and systems for manufacturing tofu and soymilk. The logo, in the upper right corner, shows a lever on top of a bean moving the world. The catalog is divided into 2 sections: Basic Equipment and Whole Systems.

The text on page 1 reads: "Takai, Japan's largest and best known manufacturer of equipment for making tofu (bean curd) and soymilk, was founded in 1917 and now has about 60 percent of the total Japanese market production. Unlike other companies, we produce a full line of equipment ranging from inexpensive tools suited for traditional small-scale production to Japan's largest and most modern machinery capable of producing over 200,000 cakes of tofu daily. In this latter area, we have about 90% of the total Japanese market. Our equipment is designed for the preparation of all the seven basic types of Japanese tofu as well as soymilk on the scale of your choice to meet your budget.

"Over the past several decades we have had a great deal of experience exporting our equipment to Japanese and Chinese run shops and factories in America, Europe, and Southeast Asia. Now with the growing interest in soy products in the West, we have worked closely together with William Shurtleff, author of *The Book of Tofu*, to develop our first English-language catalog. Export routes are well established that make it possible for you to order directly from us, the manufacturer, to get your equipment at the lowest possible prices and with minimum delay. To give you the widest possible choice of Japan's best equipment, we are also including in our catalog a number of items widely used in Japan, produced by other well-known makers."

Letter (fax) from Wataru Takai. 1996. Aug. 2. Takai's records show that their first catalog, which is green, was

TAKAI

Tofu & Soymilk Equipment Co.
Catalog of Small and Medium-sized Equipment

Takai, Japan's largest and best known manufacturer of equipment for making tofu (bean curd) and soymilk, was founded in 1917 and now has about 60 percent of the total Japanese market production. Unlike other companies, we produce a full line of equipment ranging from inexpensive tools suited for traditional small-scale production to Japan's largest and most modern machinery capable of producing over 200,000 cakes of tofu daily. In this latter area, we have about 90 percent of the total Japanese market. Our equipment is designed for the preparation of all the seven basic types of Japanese tofu as well as soymilk on the scale of your choice to meet your budget.

Over the past several decades we have had a great deal of experience exporting our equipment to Japanese and Chinese run shops and factories in America, Europe, and Southeast Asia. Now with the growing interest in soy products in the West, we have worked closely together with William Shurtleff, author of **The Book of Tofu**, to develop our first English-language catalog. Export routes are well established that make it possible for you to order directly from us, the manufacturer, to get your equipment at the lowest possible prices and with minimum delay. To give you the widest possible choice of Japan's best equipment, we are also including in our catalog a number of items widely used in Japan, produced by other well-known makers.

Ordering: In order to be able to ship large orders in containers (which greatly reduces ocean freight charges) we will dispatch orders only once every two months, on the first day of February, April, June, August, October, and December. Please try to have your order in at least two weeks before the deadline. After carefully studying this catalog together with **The Book of Tofu** (Volumes I and II), decide exactly what equipment you will need. If after careful study, you still have important questions and feel you must write us, please use a typewriter to facilitate clear communication. Use the enclosed order form to submit your order, then go to your local bank and open a letter of credit to cover the payment (see attached sheet). All prices are the landed price in Oakland, California. They will be sent to you from there by truck freight collect (i.e. you pay the trucking cost when your order arrives). Prices in other countries may be slightly different from those in America; please write for information.

Delivery: Delivery will ordinarily take 6 to 8 weeks from the time the order is placed until it arrives in Oakland, and another 1 to 3 weeks for cross-country shipping. Special air freight rates are also available.

Voltage and Current: Please pay careful attention to the place on the order form where we ask for the shop's voltage and current. In America, these vary widely from city to city. Most Japanese motors are designed to operate in the range of 220 volts and either 50 to 60 cycles per second. If your voltage is above or below this range, you will probably have to purchase a step-up or step-down transformer and run your current through it into the Japanese motor.

Spare Parts and Warranty: Machines that have parts requiring periodic replacement or which are fragile come with spare parts included in the purchase price. Takai guarantees that your equipment is in operating order on arrival at your location. Spare or broken parts may be ordered from us at standard prices. Each customer is responsible for ordinary maintenance and repair, just as for an automobile.

All equipment is distributed without the use of an exclusive agent.

We look foreward to serving you in the future.

Whole Systems

SUB-SYSTEM A1: Makes about 230 pounds of tofu or 335 to 460 pounds of soymilk per hour.

S1 SS-TAK-A1: Includes (from right to left); 1 grinder TAK-20L; 1 puree transfer barrel TAK-TP; 1 pressure cooker TAK-X; 1 hand-turned screw press TAK-A4HD; 3 curding barrels and support platforms with casters TAK-O and TAK-OD; 2 pressing sacks ADA-#5; 2 simple lever presses TAK-2B; 1 dipper RAP-5A; 1 straining bag ADA-CHU; 1 mixing plate TAK-ONE.

SUB-SYSTEM X

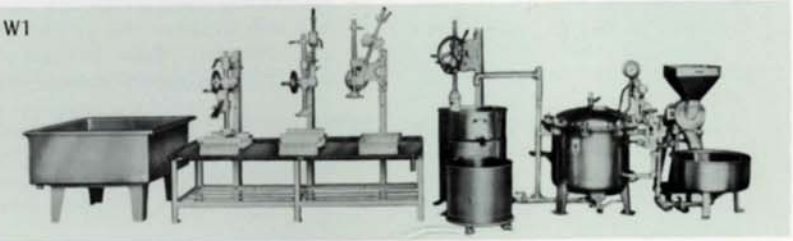
SS-TAK-X: Includes (from right to left); 3 jack presses TAK-S180; 1 settling box table TAK-KD; 7 settling boxes TAK-KS; 10 settling box cloths (designed to fit boxes); 2 sinks TAK-SC; 1 heat sealer KYO-K300.

SYSTEM A1: Makes about 230 pounds of tofu or 335 to 460 pounds of soymilk per hour.

W1 WS-TAK-A1: Includes all items in SUB-SYSTEM A1 and SUB-SYSTEM X.

S1

W1



SUB-SYSTEM A2: Makes about 230 pounds of tofu or 335 to 460 pounds of soymilk per hour.

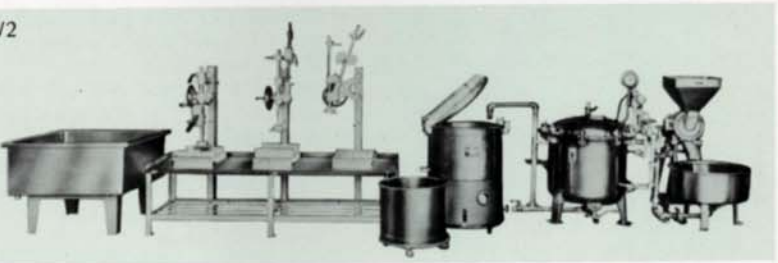
S2 SS-TAK-A2: Includes (from right to left); 1 grinder TAK-20L; 1 puree transfer barrel TAK-TP; 1 pressure cooker TAK-X; 1 hydraulic press TAK-AY; 2 pressing sacks ADA-#5; 2 simple lever presses TAK-2B; 3 curding barrels and support platforms with casters TAK-O and TAK-OD; 1 dipper RAP-5A; 2 straining bags ADA-CHU; 1 mixing plate TAK-ONE.

SYSTEM A2: Makes about 230 pounds of tofu or 335 to 460 pounds of soymilk per hour.

W2 WS-TAK-A2: Includes all items in SUB-SYSTEM A2 plus all items in SUB-SYSTEM X.

S2

W2



SUB-SYSTEM A3: Makes about 230 pounds of tofu or 335 to 460 pounds of soymilk per hour.

S3 SS-TAK-A3: Includes (from right to left); 1 grinder TAK-20L; 1 puree transfer barrel TAK-TP; 1 pressure cooker TAK-X; 1 continuous roller extractor TAK-FME; 3 curding barrels and support platforms with casters TAK-O and TAK-OD; 1 dipper RAP-5A; 2 straining bags ADA-CHU; 1 mixing plate TAK-ONE.

SYSTEM A3: Makes about 230 pounds of tofu or 335 to 460 pounds of soymilk per hour.

W3 WS-TAK-A3: Includes all items in SUB-SYSTEM A3 plus all items in SUB-SYSTEM X.

3546. Rasmussen, Carol. 1977. Vegetarians straight off the farm: Soy is source of successful diet. *Chicago Tribune.* Sept. 8. p. E3, or p. W_A3, or p. N_83.
• ***Summary:*** This article is about The Farm, from Summertown, Tennessee, and their creative but strict vegetarian diet–that uses no meat, eggs, or dairy products." Margaret Nofziger explains that Farm members are not food faddists; they eat cocoa, sugar, and white flour.

Most of their nutrients comes from soybeans. They grow 250 acres of soybeans a year and turn a significant portion of these into an incredible array of foods such as soy flour and soy milk. The soy milk is made into soy yogurt, mayonnaise, a cheese, tofu, soy ice cream, and tempeh (which is a fermented soy product from Indonesia). The pulp that remains after making soy milk is used to make a meatless sausage; it also add to cakes, cookies, and other baked goods. Also on The Farm, soybeans are roasted to make nuts, and ground to make coffee. They have published recipe booklet titled "Yay soybeans."

The Farm has a great deal of experience in cooking whole soybeans. The best way is to use a pressure cooker for 1 hour at 15 pounds pressure. Or you can cook them for at least 10 hours at atmospheric pressure.

A typical breakfast at The Farm might consist of toast, fried tofu, tea and sugar. Or perhaps fried potatoes and cheese [made from nutritional yeast] and hot soy milk and tea.

A cartoon has this caption: "Soybeans are the base for cheese, ice cream, sausage, and burgers." Address: Food Guide editor.

3547. Timmins, Tom. 1977. Re: Proposal to move Laughing Grasshopper Tofu Shop into the Bridge Street Garage in Millers Falls, Massachusetts. Letter to residents in the area of the Garage, Sept. 8. 3 p. Typed, with signature on letterhead.
• ***Summary:*** This letter begins: "Dear Neighbors: We of Laughing Grasshopper Tofu Shop would like to move our business into your neighborhood. We process soybeans to make a high-protein cheese-like food which we deliver to about 100 stores, restaurants, colleges, and co-ops throughout New England. We want to lease the Bridge St. Garage for our production site, and we hope to be a beneficial addition to the neighborhood.

"All of us who work at the tofu shop do so because we feel that soy protein is one of the main answers to the growing world food problem. We are not associated with any religious group...

"Our names and situations are: Michael Cohen, married, with one child, of Montague. Jon Lee, single, of Belchertown. David Kilroy, married, of Shelbourne. Kathleen Whelan, single, of Colrain. Ira Leviton, single, of Colrain. Elyse Moore, single, of Gill. Tom Timmins, married, 3 children, of Millers Falls. Arthur Braverman, married, of South Deerfield.

"We hope to get to know you and become good neighbors to you."

The letter then describes the benefits of tofu, explains why the company wants to move from its present location at 3 Main St. in Millers Falls (it has proven inadequate because of its size, its wooden floors, and its lack of sufficient floor drains leading to odors in the basement caused by the fermented whey), describes the tofu process, and explains why neighbors at the new location will not experience unpleasant problems from odors, noise, delivery trucks, rodents, or employee parking. The company plans to invest $30,000 to $50,000 in the Bridge St. Business and to buy all stainless steel equipment. Address: LGTS, 3 Main St., Millers Falls, Massachusetts 01349. Phone: 413-659-3883.

3548. Davis, Susan. 1977. Tofu, a Far East staple from Vashon Island. *Seattle Times.* Sept. 11. p. 26-30. Sunday. Nine photos.
• ***Summary:*** Photos show: (1) Peggy and Nancy Lukoskie, sisters of Island Spring's owner, Luke Lukoskie, preparing dishes with tofu at a recent natural-food fair on Capitol Hill. (2) Nine steps in the tofu-making process: (a) Ben O'Loughlin washes the soybeans in water and readies them for soaking in water. (b) Soybeans are ground to a pulp called "go" which a man ladles into a huge caldron of boiling water. (c) The soybean pulp is brought to a boil three times to break down the enzyme trypsin [sic, trypsin inhibitors]. Then O'Loughlin uses a coarse cloth sack to press out the soymilk. (d) Nigari is stirred into a batch of soymilk. (e) Susan Jaffe stirs the nigari as the curds begin to form. (f) Crystal Collins ladles the whey out of the caldron into a white plastic bucket. (g) She then ladles the fresh curds into cloth-lined settling boxes, where they are pressed and formed. (h) She slices a large block of tofu under water. It will then be packaged in sealed and dated containers, which are shipped throughout the Puget Sound area. Address: Washington.

3549. *New York Times.* 1977. Jewish vegetarian restaurants. Sept. 14. Part 3. p. 4, col. 2.
• ***Summary:*** Article on two New York City Jewish vegetarian restaurants, The Caldron and Jerusalem Gardens (at 244 West 79th Street, between Broadway and Amsterdam Avenues). Both operate under rabbinical supervision and observe the Sabbath.

© Copyright Soyinfo Center 2013

The Caldron is a Jewish macrobiotic restaurant and store at 306 East Sixth Street (between First and Second Avenues), run by Martin and Gloria Schloss. Telephone: 473-9543. The Caldron "looks like a typical Soho health food place, except that on its rough wood-paneled walls there are portraits of rabbis and alongside the expected blue-jeaned clientele, seated on the rustic wooden benches at the low wooden tables, eating wholewheat noodles, seaweed, and beancurd pie [tofu cheesecake], while sipping their herbal teas, are Hasidic men, replete with their long curled ear locks, the traditional black hats and long black coats."

"Caldron's Well, the restaurant's store, is next door at 308 East Sixth Street. It sells whole grains and flours, nut butters and other health foods as well as the desserts and breads served at the restaurant." Telephone: 533-2070.

3550. Needleman, Larry. 1977. Re: Questions and new developments concerning Bean Machines Inc. Letter to Wataru Takai, Takai Tofu & Soymilk Equipment Co., 307 Inari, Nonoichi-machi, Ishikawa-ken 921, Japan, Sept. 20. 4 p. Typed, with signature.

• ***Summary:*** The letter begins: "Thank you for the handsome catalogues. I hope that this is the beginning of a long and prosperous relationship. This is a long letter with many questions to make the transition from Bill Shurtleff to Bean Machines Inc. I hope our future correspondence will be less complicated.

"Like Bill, I would like to earn a modest income while providing equipment to my customers at the lowest possible price. I am therefore concerned with keeping my costs as low as possible. From a commercial standpoint this policy will make Takai and BMI the leaders in the field. Some of the CIF prices that Mitoku quoted Bill and which appeared in his catalogue were substantially lower than the CIF prices you have just sent." Address: Bean Machines Inc., California.

3553. **Product Name:** New Leaf Tofu Dressing [Creamy Garlic, or Thousand Island].
Manufacturer's Name: Quong Hop & Co.
Manufacturer's Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.
Date of Introduction: 1977. September.
Ingredients: Organic tofu (water, organic soybeans, nigari-magnesium chloride), unrefined safflower oil, apple cider vinegar, fresh garlic, sea salt, and natural spices.
Wt/Vol., Packaging, Price: 16 fluid oz (1 pint) jar.
How Stored: Refrigerated.
Nutrition: Per 34 gm.: Calories 30, protein 2.4 gm, carbohydrate 2.3 gm, fat 1.1 gm.
New Product–Documentation: Label. 1977. 4 by 2.25 inches. Green on white. "New Leaf All Vegetable Tofu Dressing. No preservatives. A delicious spread for sandwiches, as a dip with raw vegetables, or as a dressing on your favorite salad. Our tofu dressing is made with the finest natural ingredients." Leaflet. 8½ by 11 inches, color. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. From New Leaf: Creamy Tofu Dressings. Low calorie, non dairy, egg free. Thousand Island, or Creamy Garlic.

Label. 1979? New Leaf Tofu Salad Dressing With Garlic. 9 by 3 inches. Self adhesive. Light green, black, and white. 12 oz. "All natural. No eggs." No eggs symbol, circle with line drawn through cracked egg. Ingredients: Organic tofu (water, organic soybeans, nigari-magnesium chloride), unrefined safflower oil, apple cider vinegar, fresh garlic, sea salt, and natural spices. "Creamy Tofu Dressing is an ideal diet production–less than 1/5 the calories of oil based dressings and 50% more protein. It is egg free and cholesterol free. The creamy flavor makes it ideal for dips, on sandwiches in place of mayonnaise, or on your favorite

salad. Nor preservatives or additives."

Talk with Ben Lee. 1988. Sept. 30. Introduced in Aug. or Sept. 1977. It was on the market when he returned.

3554. Sakakibara, Masaki; Noguchi, Hajime. 1977. Interaction of 11S fraction of soybean protein with calcium ion. *Agricultural and Biological Chemistry* 41(9):1575-80. Sept. [29 ref]

• ***Summary:*** Calcium salts have long "been used to precipitate soybean proteins in order to make a soybean cake ('Tofu' in Japanese)."

When calcium chloride was added to an 11S protein solution, the volume increased to a constant saturated value with increasing calcium chloride concentration. Then the volume decreased with concentrations above 0.04 M calcium chloride. "By CD measurements it was shown that the addition of 0.05 M calcium chloride did not cause any change in the secondary structure of the protein molecules." Address: Dep. of Food Science and Technol., Faculty of Agriculture, Nagoya Univ., Nagoya, Japan.

3555. **Product Name:** [Manna Tofu (Organic, Nigari, Packaged in Bulk)].
Foreign Name: Manna Tofu.
Manufacturer's Name: Stichting Natuurvoeding Amsterdam. Renamed Manna Natuurvoeding B.V. in 1982.
Manufacturer's Address: Meeuwenlaan 70, 1021JK, Amsterdam, The Netherlands. Phone: 020-323-977.
Date of Introduction: 1977. September.
Wt/Vol., Packaging, Price: Packaged in bulk.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). "Manna, Meeuwenlaan 70, Amsterdam Noord. Phone: 020-323977. Owner: Robert Hendriks.

Shurtleff & Aoyagi. 1981. Soyfoods Industry: Directory & Databook. Address is now at Meeuwenlaan 70, 1021 JK, Amsterdam. Phone: 020-323-9777. Contact Robert Hendriks. 1982. Contact either Hendriks or Sjon Welters.

Richard Leviton. 1983. Trip to Europe with American Soybean Assoc. Oct/Nov. Unpublished manuscript. p. 24-25. Manna started to make tofu in 1978 in a small village north of Amsterdam behind the Manna store. Label. 1983. Manna Tofu. 3 by 4.5 inches. White and dark blue on light blue.

Sjon Welters. 1989. Soya Newsletter. May/June. p. 14. "Soyfoods in Europe." The first tofu shop in Europe owned and operated by non-Orientals was Manna Natuurvoeding. Opened in Amsterdam in 1977, Manna was a macrobiotic manufacturer, distributor, and retailer run by a non-profit foundation. Talk with Sjon Welters. 1989. July 15. This company was founded in about 1973 by Adelbert Nelissen and his wife Wieke Nelissen. In 1987 it was purchased by Akwarius. Adelbert remained active and involved in Manna until its sale to Akwarius. Letter from Sjon Welters. 1989.

Aug. 10. Manna Tofu (organic, nigari) was introduced in Sept. 1977. The source of his information is a long interview with Bernard Faber, who was Manna's first tofu maker. Bernard was sure it was 1977, at the end of August or early September. He has been in the business ever since. This date also fits with Sjon's memory. He started his own natural foods store in September 1977 and he sold tofu made by Manna.

3556. **Product Name:** Tofu [Black Walnut Mushroom, or Lemon Herb].
Manufacturer's Name: White Wave.
Manufacturer's Address: 1738 Pearl St., Boulder, CO 80302.
Date of Introduction: 1977. September.
New Product–Documentation: Product Price List. 1979, winter. Bulk or packaged. 14 oz. Interview with Steve Demos. 1987. Kreck. 1979. Denver Post. Oct. 17. "Tofu is remarkable." Interview with Steve Demos. 1979. Sept. Note: This is the world's earliest known tofu product that contains herbs. By the mid-1980s many tofu products began to use herbs in both the product and the product name.

3557. **Product Name:** Tofu–Organic [Bulk, or Packaged].
Manufacturer's Name: White Wave.
Manufacturer's Address: 1738 Pearl St., Boulder, CO 80302. Phone: 303-443-3470.
Date of Introduction: 1977. September.

Ingredients: "Organic soybeans, filtered water, nigari, no more, no less! please refrigerate" (Sept. 1977).
Wt/Vol., Packaging, Price: 14 oz packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.
How Stored: Refrigerated.

New Product–Documentation: On 10-11 August 1978, William Shurtleff visited Steve Demos at White Wave, 1738 Pearl St. in Boulder, Colorado. The company, which started making tofu in Sept. 1977, was very small and compact, with a deli in front of the tofu manufacturing space. The tofu is made from organic soybeans, filtered water, and nigari. It is sold in 14-oz blocks in Chinese folded-paper food take-out cartons, each with a wire handle. The oval blue and white label, with a wave breaking from left to right, is pasted on each carton. To the right of the wave is written in bold hand lettering: "White Wave tofu." Across the top of the oval: "Boulder–Net wt. 14 oz.–Colorado." Across the bottom: "Organic soybeans, filtered water, nigari, no more, no less! Please refrigerate." As of Feb. 1999, White Wave still has originals of the three earliest versions of this horizontally oval label; Soyfoods Center has color photocopies. Steve Demos wrote to Shurtleff in Feb. 1999 that the first label was used in "late 1977 and into 1978 to sell tofu to the retail healthfood market. The second label came in early 1978 and this time we had it gummed instead of glueing each one on." This time the ingredients were listed across the top: "soybean cake contains: Organically raised soybeans, filtered water, and nigari (salt bitterns)." Steve thinks the third label [which contains traces of green for added color] was first used in 1980 [sic, probably late 1978]. The ingredients, still listed across the top, now read: "soybean cake contains: certified organically raised soybeans, filtered water, and nigari (salt bitterns). no more, no less! please refrigerate. The "no more, no less!" was White Wave's signature at the time. The the size and shape of the three labels is identical. It is clear from the earliest label that White Wave was using organic soybeans from day one: Sept. 27, 1977. Demos was buying these soybeans from Green Mountain Grainery, a small distributor of organic and natural foods, which also had a retail outlet in Boulder. But within a very short time, White Wave started buying soybeans directly from the farmer (see 1998 Aug. 10 interview with Demos).

Form filled out by Steve Demos in Ann Arbor, Michigan, at national soycrafters conference. 1978. July 29. White Wave makes medium-firm tofu in bulk and packaged. The wholesale prices are $0.65/lb and $0.75/lb respectively.

Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 393. White Wave Soyfoods, 3869 Walnut, Boulder, Colorado 80302. Phone: 303-443-2370. Owner: Steve Demos.

Label. 1979, undated. 3 x 4 inch oval. Self adhesive. Color illustration of a breaking wave. Black, blue, and green on white. Product Price List. 1979, winter. Bulk or packaged. 14 oz. Kreck. 1979. Denver Post. Oct. 17. "Tofu is remarkable." Interview with Steve Demos. 1979. Sept. Address is now (1981): 1990 N 57th Ct., Boulder, CO 80301.

FIND/SVP. 1981, May. "The tofu market: Overview of a high-potential industry." p. 78. "White Wave makes plain tofu in the soft, firm, and extra firm styles. They also make tofu mayonnaise, tofu miso salad dressing, and other soy products such as soysage (soy sausage), tempeh, and a frozen

© Copyright Soyinfo Center 2013

soymilk product, Polar Bean, which comes in five flavors (similar to ice cream). The company makes approximately 7,500 lb/week of tofu. However if one includes all their tofu products, the weekly production capacity increases to between 10,000 and 11,000 pounds."

Shurtleff. 1987. History of White Wave. Steve Demos reported that when he started White Wave, "Our direct competitor was the Spinning Kitchen, which had started 9 months earlier, in about Jan. 1977. They had the Boulder market locked up when White Wave started."

Talk with Steve Demos. 1989. Nov. 1. Spinning Kitchen was in the same building as Corn Mother Restaurant in Boulder at the same address. They made tofu on the upper floor; Corn Mother did not make tofu.

Update: 1997 Oct. 16. This company is now named White Wave, Inc., 6123 East Arapahoe, Boulder, Colorado 80303. Phone: 303-443-3470. Contact: Steve Demos, president. They still make tofu and tofu products. This is the fourth oldest existing Caucasian tofu manufacturer in the United States; it is also the largest of these four.

Talk with Steve Demos. 1998. Aug. 10. The oval label owned by Soyfoods Center is the second label for this product. It is identical to the first label except that it contains more colors (black, blue, and green or white). It was printed shortly after White Wave moved into Walnut Street.

Note: This is the earliest record seen (Feb. 2013) concerning White Wave (Boulder, Colorado).

3558. Vogt, Pat. 1977. Cook with soybeans? Why not? *Michigan Farmer* (*Duluth, Minnesota*). Oct. 1. p. 32.
• ***Summary:*** Len and Irene Stuttman of Lansing, Michigan, run a company named INARI, Ltd., which offers two products: roasted soy nuts and raw edible soybeans for home cooking. Soy nuts are available plain, salted, or flavored (jalapeno). The Stuttmans feel that "soybeans are a healthy food, not a health food." Len Stuttman, a native of Chicago (Illinois), is a former lecturer, film maker, film producer, and agricultural advisor. He says that after testing 77 soybean varieties, he has found only a few that really tastes good.

The Stuttmans' interest in soybeans extends back to their college days at Michigan State University. After their marriage, Len became an agricultural information advisor to the Indian Council of Agricultural Research. They also traveled to other countries, studying nutritional feeding programs. While living in India and traveling abroad, they discovered that relief foods sent by the USA and United Nations were often incompatible with the local culture and eating habits. Since nuts are prized by most cultures, the Stuttmans decided to try using soy nuts, which are very nutritious and rather inexpensive.

Len Stuttman, who has been involved in several businesses, including a TV show in Chicago, has kept his interest in community development and nutrition. In 1975 he accepted a job at American Soybean Association headquarters in Hudson, Iowa, but resigned in early 1976 and returned to Lansing where he began work on starting INARI Ltd., a family operation to make soy nuts. That company is now in business.

"Tofu, a bean curd, and Miso, a bean paste, are available in some Lansing area stores." Recipes are given for: Soybean meatloaf (with a lb lean beef + 1.3 cups cooked soybeans). New fashioned soybean pie. Soybean sandwiches.

3559. Chen, Steve. 1977. Re: Tofu and fermented tofu in Taiwan. Letter to William Shurtleff at New-Age Foods Study Center, Oct. 14. 1 p. Typed, with signature on letterhead.
• ***Summary:*** The following are personal estimates, with guarantee of their accuracy. The Taipei and Taiwan Tofu Associations have about 1,300 members but there are about 2,500 tofu shops in Taiwan.

About 100,000 tonnes (metric tons) of soybeans are used each year to make tofu and its related products. Roughly 1,000 tons of this amount are use to make fermented tofu (*doufu-ru*).

The population of Taiwan is about 14.8 million. Daily per capita consumption of fermented tofu is very small, about 0.5 gm. One kg of soybeans will yield about 2.5 kg of fermented tofu. About 200 to 300 shops in Taiwan make fermented tofu. They are essentially small, family-type operations with 2-3 workers per shop. Address: Country Director, American Soybean Assoc., P.O. Box 3512, Taipei, Taiwan. Phone: 7815880.

3560. Raborg, Frederick A., Jr. 1977. These cookbooks suited to taste. *Bakersfield Californian.* Oct. 14. p. 33. [1 ref]
• ***Summary:*** "If your tastebuds run to the exotic and unusual, check out two book by William Shurtleff and Akiko, published by Autumn Press: *The Book of Tofu: Food of Mankind* (336 pages, $7.95, drawings) and *The Book of Miso* (258 pages, $6.95, drawings).

Shurtleff, a disciple of Shunryu Suzuki Roshi, backpacked into the remotest parts of Japan to learn the arts of tofu- and miso-making from grandmothers in the back country.

"Tofu is soybean curd; miso is fermented soybean paste. Both are available in those supermarkets catering to Orientals..."

3561. *Los Angeles Times.* 1977. Japan: Top market for U.S. soybeans. Oct. 27. p. H25.
• ***Summary:*** Japan now imports 55,000 tons of soybeans a year from the United States, which makes Japan the leading customer for U.S. soybeans in the world, according to USDA figures.

The Japanese use soybeans in a variety of traditional foods including "tofu (soybean curd of which 10 million bricks are sold daily in Japan), miso (fermented soybean paste, the basis for the soup served in most Japanese

© Copyright Soyinfo Center 2013

restaurants [and homes]), aburage (deep-fried tofu) or natto (fermented cooked soybeans), kinako (roasted soybean powder) and shoyu (soy sauce). The use of soy in bread, biscuits and noodles consumes 15,220 tons of soybeans each year."

Exports of soybeans and soy products (such as soybean oil and meal) have played an important positive role in the U.S. balance of trade and the U.S. farm economy.

3562. Fabricant, Florence. 1977. Dining out: On the spice trail. *New York Times.* Oct. 30. p. 375.
• ***Summary:*** This is a review of the mostly Cantonese Chinese restaurant China on the Bay (118 Maple Ave., Bay Shore). "The pork dish, with cabbage, sliced pork, sliced bean curd [tofu], red peppers, bamboo shoots, and some black beans in a potent, oily sauce, was truly inspired."

The excellent fong fong lobster was well garnished, and "sauced with richly flavored black beans" [fermented black soybeans].

3563. Curtis & Tompkins, Ltd. 1977. Analysis of nigari. San Francisco, California. 1 p.
• ***Summary:*** This is a report of an analysis of the lead content of nigari submitted by Westbrae Natural Foods. The sample was received on 28 Sept. 1977 and the analysis was reported on 21 Oct. 1977. Laboratory No. 77k306. Preliminary No. 0138.

Lead: 1.75 parts per million.

Note: See also the analysis of natural nigari conducted in May 1978 by Japan Food Research Laboratories in Tokyo. They found a lead content of 1.50 ppm. Address: 290 Division St., San Francisco, California 94103. Phone: (415) 861-1863.

3565. Jonathan. 1977. Re: Products now being sold by Jonathan. Letter to distributors. 1 p. Typed, without signature on letterhead. [Dut]
• ***Summary:*** At the top of this company's letterhead is written "Jonathan." Below that is an illustration (line drawing) of two seagulls flying, and to the right is a large round yin-yang (*t'ai chi*) symbol. Below that, as part of the letterhead is written: Produktie van macrobiotische natuur en vegetarische specialiteten [Macrobiotic products and vegetarian specialties]. Jos–Filoe Van de Ponseele–Holleweg 89–2070 Ekeren–Tel. 031.64.41.73–BTW 631.150.888.

The typed, unsigned letter reads: "Dear gentlemen and ladies: Perhaps you have an interest in natural foods. On 28/29/30 October 1977 there will be an international natural food show (*Natuurbeurs*) in Ghent. Jonathan will be presenting the following natural foods: Seitan (a vegetarian steak), Goulash (made with seitan), Tofu (*Sojakaas*), Mochi (made of sweet rice), sea vegetables, vegetable pickles, and peanut butter."

Note: This is the earliest Dutch-language document seen (April 2013) that uses the term *Sojakaas* to refer to soymilk. Address: Holleweg 89, 2070 Ekeren (near Antwerp), Belgium. Phone: 031-64.41.73.

3566. Katzen, Mollie. 1977. The Moosewood cookbook: Recipes from Moosewood Restaurant, Ithaca, New York. Berkeley, California: Ten Speed Press. 222 p. Illust. Index. 28 cm.
• ***Summary:*** One of the best and most popular American vegetarian cookbooks of the 1970s and 1980s, this hand-lettered work contains 7 tofu recipes, and 1 each using miso and whole dry soybeans, as follows: Shopping list (p. xiii) describes tamari and tofu ("Tofu is soybean curd. It resembles very soft cheese and has a mild flavor. It is an excellent protein food and very charming. Buy it by the pound or individual cake at oriental food shops. Also, some supermarkets are beginning to carry tofu now. It's usually in pound packages in the produce department."). Miso soup (p. 9; with chunks of tofu). Perfect protein salad (p. 49; uses whole dry soybeans and wheat). Tofu salad (p. 52). Gado-gado (p. 104; an Indonesian dish with a spicy peanut sauce and tofu chunks, either raw or sauteed in oil with sesame seeds). Ode to Chang Kung (p. 126; with tofu). Szechwan eggplant & tofu (p. 135; an entree). Sauté, Chinese style (p. 149; with tamari-ginger sauce and tofu [though tofu was accidentally omitted from the list of ingredients]).

Note: Molly writes in 1990: "I first learned about tofu in 1970 from a Chinese restaurant in San Francisco. They called it 'bean cake' soup. I was intrigued–and not disappointed. The current edition of this book has a revised index, correcting the error relating to page 221." Address: Moosewood Restaurant, Dewitt Building, Ithaca, New York.

3567. Machida, Yoshiro. 1977. Tôfu, aburage no kagaku [The science of tofu and deep-fried tofu pouches]. Tokyo: Shokuhin Gijutsu Kenkyusho. Oct. 14. 6 p. [Jap]
Address: Fuchu-shi, Tokyo.

3568. Shurtleff, William; Aoyagi, Akiko. 1977. The book of kudzu. Brookline, Massachusetts: Autumn Press, and Lafayette, California: Soyfoods Center. 102 p. Illust. by Akiko Aoyagi Shurtleff. Index. 28 cm. Reprinted in 1985 by Avery Publishing Group, Inc. (Wayne, New Jersey). [79 ref]
• ***Summary:*** Contents: Acknowledgments. Kudzu (poem) by James Dickey. 1. The ancient genie. 2. Cooking with kudzu (70 recipes): Basic recipes, sauces, soups, jelled salads, deep-fried preparations, grains with kudzu powder, primary food made from kudzu powder, special tofu with kudzu, jelled desserts, Japanese-style jelled confections, thickened beverages, kudzu noodles, kudzu leaves, shoots, flowers, and roots. 3. Healing with kudzu. 4. Making kudzu powder.

© Copyright Soyinfo Center 2013

5. Weaving with kudzu. 6. Kudzu and the ecosystem. Appendices: A. Real kudzu powder and its imitations. B. Institutions and people connected with kudzu. Bibliography. Glossary.

Kinako (roasted soy flour) is mentioned several times in this book: "Kudzu Mochi... is a bite-sized mound of jelled kudzu sprinkled with a layer of *kinako* (roasted soy flour) and a little natural sweetening" (p. 11).

A recipe for Kinako tofu calls for "10½ tablespoons kinako" (p. 38).

A recipe for Kudzu mochi states: "This is probably the most popular way of using kudzu powder in Japanese confectionery." The recipe calls for "6 tablespoons kinako (roasted soy flour)" (p. 43).

Three recipes on p. 45 call for the use of kinako: Lima Ohsawa's kudzu mochi. Milk kudzu mochi, and Ouda no goko. Address: New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549.

3569. Tofu Shop (The). (Renamed Far Pavilions in late 1979). 1977. October. New soyfoods restaurant or deli. 116 N. Oak Street (Box 69), Telluride, CO 81435.
• ***Summary:*** Menu and promotional brochure for The Tofu Shop. 1978, Sept. 6 panels. On the front panel is a stunning circular photo of Rocky Mountains rising out of a misty valley. Around it is written: "The Tofu Shop" (above). "Juice bar–Dining–Catering–Wholesale kitchens" (below). Below that on the front panel: "116 North Oak Street. Next to the opera house. Telluride, Colorado. Call ahead for take-out: 728-9940."

Entrees (Served with soup or salad–$0.65 extra): Stir-fried tofu, rice & vegetables. Burgers: Soy burger, Tofu burger, Okara burger. Stuffed pitas: Grilled tofu & vegetables, Guacamole and tofu. Burritos: Spicy tofu and rice filling with guacamole. Smoothies: Carob, honey, soymilk with banana. Carrot sunny shake. Other refreshments: Miso broth, soymilk, whey from making tofu. Salads: Full plate tofu & guacamole salad, Tofu and vegetable salad, Okara salad. Fresh tofu. Grilled tofu. On the back panel is a lively, writhing dragon plus: "Uncompahgre Natural Foods. Producers and suppliers of specialty foods for Colorado's western slope." Talk with Matthew Schmit, founder and owner of The Tofu Shop. 2002. Sept. 19. Matthew estimates that this undated menu was first printed in about Sept. 1978.

Menu for Far Pavilions. 1979, undated. 8 panels. Green on tan paper. "International vegetarian cuisine. Welcome hospitality. Located below the opera house. For details, see separate Menu entry for Far Pavilions.

Shurtleff & Aoyagi. 1982. Report on Soyfoods Delis, Cafes & Restaurants. p. 3. Started in Oct. 1977 by Matthew Schmit. Later run by Catherine Peterson.

Note: This is America's second "soy deli," offering a host of highly creative and delicious recipes. Address: Telluride, Colorado. Phone: 728-4441.

3570. Warren, George; Warren, Jackie. 1977. Terrific tofu. *Quest.* Sept/Oct. p. 96-98.
• ***Summary:*** An article in praise of tofu. "We're watching for the poet who will surely rise, one of these days, to celebrate tofu, the cheapest, healthiest, and unfortunately the least-known protein source in America." Includes a condensed description, from *The Book of Tofu*, of how to make tofu at home.

3571. Herb, C.; Williams, Bev. 1977. Tsumago a step back in time. *Los Angeles Times.* Nov. 13. p. M20.
• ***Summary:*** Tsumago is a historic town, a living museum, relatively untouched by time, in the Japan Alps, southwest of Tokyo. Few Americans visit, or even know it exists–although many Japanese visit. The food is authentic, and is not adjusted for tourists. "Breakfast can include a raw egg mixed with soy sauce at the table and then poured over steaming hot rice. Another breakfast treat is steaming hot soup with various vegetables, seaweed and soy bean curd." A photo shows one of the town's narrow lanes.

3572. DeVries, Hilary. 1977. Golden temple: serene shrine to good eating. *Christian Science Monitor.* Nov. 16. p. 29.
• ***Summary:*** The 50 young Americans who work here in Boston, Massachusetts, have adopted the religion of the Khlasa, the fierce soldier-saints of the Sikh religion. The ancient Khalsa tradition was brought to the United States in 1969 by the group's spiritual leader, Siri Singh Sahib Harbahajan Singh Khalsa Yogi. This restaurant, which opened in 1974, serves international vegetarian cuisine, in a beautiful environment. The workers, many of whom own shares in the company, live in three large communal houses in Dorchester, Massachusetts, south of Boston. Both the waiters and waitresses wear white turbans, close-fitting leggings called pa'ijmah, and long white coats called choghah.

Three recipes are given. Photos show: (1) "Sardini stirs Chinese tofu–zesty soy bean curd." (2) "Simran salad: tofu, red onion, mushroom, olives, alfalfa sprouts." (3) Qurban slicing cake.

3573. Betbeze, Merrie. 1977. Pesky kudzu has culinary merits. *Tuscaloosa News* (*Alabama*). Nov. 20. p. 2C, 14C.
• ***Summary:*** This is a review of *The Book of Kudzu*, by Shurtleff and Aoyagi. Most people in the Deep South see kudzu as "a green menace that strangles and destroys the crops and gardens they have worked so hard on.

"But surprisingly to some (maybe most) Americans, kudzu is a useful product that has been an important part of the Chinese culture for over two thousand years, accordingly to a recently published book on kudzu.

"Kudzu has been used for weaving, cooking, and healing

© Copyright Soyinfo Center 2013

in the Chinese and Japanese cultures, according to a book by William Shurtleff and Akiko Aoyagi.

"Today the kudzu root is being made into a powder and used by some Americans mainly for cooking, the author said." It is now being sold in natural food stores throughout the United States–although there is not much demand for it in Tuscaloosa.

Recipes are given for: Kudzu, shoyu and vegetable sauce. Fried eggplants with kudzu and sesame sauce. Mock cheesecake. Egg and onion miso soup. Corn soup with kudzu. Fragrant kudzu-thickened clear soup (with tofu). Fresh fruit jelled salad. Guacamole jelled salad. Deep-fried rice balls. And more.

A large photo shows kudzu vines that cover poles, trees, and shacks. Address: Staff writer.

3574. *Toyo Shinpo* (*Soyfoods News*). 1977. Shurutorefu-shi to tezukuri tôfu [Mr. Shurtleff and homemade tofu]. Nov. 21. [1 ref. Jap]
• ***Summary:*** Describes the work of Shurtleff, author of *The Book of Tofu*. Address: Tokyo, Japan.

3575. Brooks, Charles D. 1977. Tips for stocking a Chinese kitchen. *Christian Science Monitor.* Nov. 23. p. 32.
• ***Summary:*** This is a list of important ingredients with a description of each and recommendations: Soy sauce: Chinese soy works best for Chinese cooking. Avoid most brands made in the USA and Hong Kong. "Some of the best soy I've ever tasted comes from mainland China." He especially favors a brand that is flavored with either shrimp or mushroom essence."

Sesame oil: This nutty-tasting oriental oil, pressed from toasted sesame seeds, is used sparingly as a condiment. Do not confuse it with the relatively light-colored oil [pressed from untoasted sesame seeds] sold mainly in health food stores. Beware that Japanese sesame oil is often flavored with red pepper. Keep all sesame oil refrigerated.

Ginger: Always use fresh ginger root, never the dry powder. Keep uncovered in a cool place. Freeze surplus ginger.

"Hoisin sauce: This sweet and pungent sauce gives Chinese roast pork its color and flavor." Chee hou and chap kam are simply hoisin sauce with slight variations.

"Oyster sauce: is the Cantonese. It is made by cooking down oysters in soy sauce. Common tofu is made noble when accompanied by this savory sauce."

"Salted and fermented black beans: These zesty little beans are called dow see by the Cantonese who invented them." Black beans used sparingly with steamed fish make an excellent dish. Keep refrigerated in a covered jar.

Note: This is the earliest English-language document seen (Nov. 2011) that uses the term "Salted and fermented black beans" to refer to fermented black soybeans.

A recipe for "Fragrant soy sauce chicken" has ingredients that include: "1/3 cup soy sauce."

Note: This is the earliest English-language document seen (April 2012) that contains the term "fragrant soy sauce." It appears to be a kitchen preparation rather than a commercial product. Address: San Francisco.

3576. Needleman, Larry. 1977. Re: New developments with Bean Machines Inc. and tofu kits. Letter to William Shurtleff at New-Age Foods Study Center (c/o Aoyagi, 278-28 Higashi Oizumi, Nerima-ku, Tokyo 177, Japan), Nov. 29. 4 p. Typed, with signature on letterhead.
• ***Summary:*** This letter is written on printed Bean Machines stationery. "The last couple of weeks before you left brought us closer together. Debbie and I miss you both. I hope your flight was enjoyable and by now you are reunited with your [Aoyagi] family." Larry and Debbie are planning to move to Bodega on Dec. 17, into a 100-year-old house on December 17th. Their new address will be: Box 76, Bodega, CA 94922. They are anxious to get back to the country. Debbie's child, Brian Joseph, "is fine, laughing a lot, and each day brings a new unfolding with him."

Larry authorizes Bill Shurtleff to open an account with Mr. Hibaya and place an order for 40 pressing sacks and 30 straining bags–plus other items. Details are included on equipment instruction manuals, installation, operating, cleaning and maintenance instructions.

Larry expects his first order of tofu equipment from Takai to be worth about $10,000. He hopes that Takai will be able to ship the order by 1 Jan. 1978.

An invoice dated 14 Oct. 1977 is enclosed from The Learning Tree for 12 tofu kits (boxed), $7.17 each, total $86.04.

Also enclosed is a Fictitious Business Name Statement for Bean Machines, Inc. (206 Baltimore, Corte Madera, California 94925), filed with the County of Marin. The application date and filing date is 31 March 1977. Needleman and Shurtleff are listed as the two owners. Address: Bean Machines Inc., P.O. Box 881, San Rafael, California 94901. Phone: (415) 456-7034.

3577. **Product Name:** Eden Nigari (Solidifier for Making Tofu).
Manufacturer's Name: Eden Foods, Inc. (Importer). Made in China.
Manufacturer's Address: 4601 Platt Rd., Ann Arbor, MI 48104. Phone: (313) 973-9400.
Date of Introduction: 1977. November.
Wt/Vol., Packaging, Price: 6 oz, 5 lb, and 44 lb sizes.
How Stored: Shelf stable.
New Product–Documentation: Eden Foods Fall and Winter Catalog, 1977-78. Page 23. "Nigari (Eden) solidifier for making tofu. Concentrated–use about 1/3 the amount recommended in *The Book of Tofu."* Ad in Soycraft. 1979. Summer. p. 38. "Traditional Soy Products from Eden

© Copyright Soyinfo Center 2013

Foods." "Eden nigari is a natural flake nigari, obtained by the evaporation of sea water from environmentally clean areas of China."

Talk with Ron Roller of American Soy Products (formerly of Eden Foods) in Saline, Michigan. 1991. Nov. 27. Eden dealt directly with the Chinese government. But the major product they imported from China was ginseng. In addition, they imported other medicinal herbs, some bamboo cooking wares (tea strainers), some tea, arrowroot flour. After the fire destroyed Eden's warehouse, imports from China were discontinued.

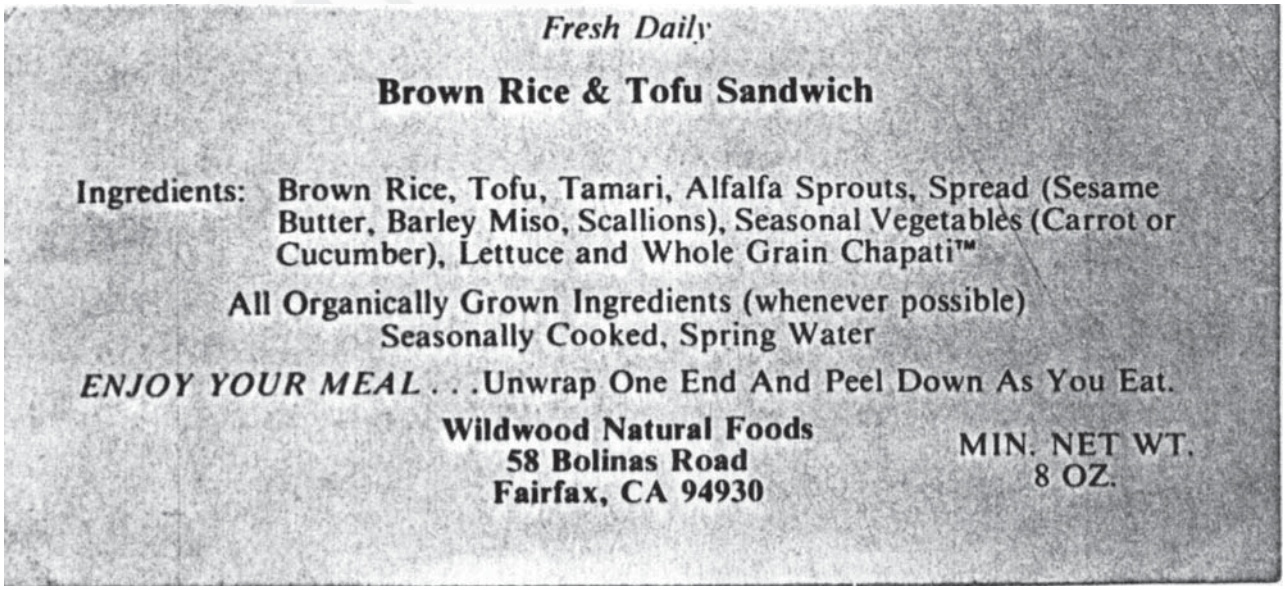
3578. Eden Foods. 1977. Fall and winter catalog 1977–1978. 4601 Platt Rd., Ann Arbor, MI 48104. 81 p.
• ***Summary:*** On the cover are bags, trays, and scoops filled with natural foods. Page 23 shows that Eden now sells nigari, a solidifier for making tofu, in 6 oz or 5 lb sizes. Hacho, Mugi, and Kome miso are now sold under the Eden brand. Address: Ann Arbor, Michigan. Phone: (313) 973-9400.

3579. **Product Name:** Fried Rice & Tofu Sandwich (In a Chapati). Renamed Brown Rice & Tofu Sandwich in late 1978 by Chris Smith.
Manufacturer's Address: Sleeping Lady Cafe, 58 Bolinas Rd., Fairfax, CA 94030.
Date of Introduction: 1977. November.
Ingredients: Brown rice, tofu, tamari, alfalfa sprouts, spread (sesame butter, barley miso, scallions), seasonal vegetables (carrot or cucumber), lettuce, whole grain chapati.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Unrefrigerated and perishable.
New Product–Documentation: Talks with Paul Duchesne between 8 Oct. 1988 and 18 Aug. 1989. His Brown Rice & Tofu Sandwich (BRTS) was developed in Fairfax in late October or early November 1977. He made 200 of them at home and sold them to participants at a macrobiotic seminar led by Michio Kushi in Marin County. Donna Gayle helped him make them.

In Jan. 1978 he started making these sandwiches at the Sleeping Lady Cafe in Fairfax (Marin County) and selling them at the Good Earth Natural Food Store in Fairfax. He bought his tofu (made by Quong Hop & Co. in South San Francisco) at Good Earth. In Feb. 1978 he began to distribute them to many natural food stores throughout Marin County. One of America's early second generation tofu products, the sandwich was made as follows: Saute brown rice with onions, sesame oil, and tamari. Boil a cake of tofu in water with a little salt, then slice it into 4 pieces each about 3 inches square and 1/8 inch thick. Onto a whole wheat chapati (not bread) spread a mixture of sesame butter, barley miso, and scallions. Over that spoon on the fried rice, then place on top one slice of tofu, a long strip of parboiled carrot, some alfalfa sprouts, and romaine lettuce leaf. Fold over two edges of the chapati, wrap it in shrink wrap, and sell it fresh (unrefrigerated) in a wicker box with a calligraphy sign (that showed how to eat it like a banana) on the front counter of natural- and health food stores. One key to the flavor was sesame-miso spread, learned from George Ohsawa's 1966 book *Zen Cookery* #203 "Miso Spread."

While in California in 1978 Duchesne and Chris Smith gave their recipe and production techniques to Joe Nixdorff, who made the Samurai Hero in Berkeley, to Roy Steevensz, who made the BRTS in Los Angeles.

In September 1978 Paul went to Boston to study macrobiotics, so he gave his Fairfax sandwich business (which still had no name) to Chris Smith, a local friend interested in macrobiotics. Paul had first offered his business to Ron Harris, but Ron declined since he was getting involved in seitan. The California Department of Health came in helped Smith's unlicensed food operation to get



© Copyright Soyinfo Center 2013

licensed. A month later, in October 1978, Chris stopped frying the brown rice and renamed the product, coining the now-famous name "Brown Rice & Tofu Sandwich." At the same time he named his business Wildwood Natural Foods.

The product's original Label (sent by Paul Duchesne. 1989. Aug. 11 and printed before Wildwood was incorporated) is 4.5 by 2 inches. The maker is Wildwood Natural Foods at 58 Bolinas Rd. The ingredients, listed above, are the same as those in the original 1977 edition, but cucumber was never used. The color is black on goldenrod yellow (THE counter-culture color of the late 1970s). Paper. The text reads: "Fresh daily. All organically grown ingredients (whenever possible). Seasonally cooked, spring water. Enjoy your meal... Unwrap one end and peel down as you eat." In Boston, Duchesne started Rice House, where he continued to make the sandwich.

In May 1979 Duchesne and Chris Smith traded places and companies. Paul took over the company he had started originally (now named Wildwood) in Fairfax. For more details see Development of the Brown Rice and Tofu Sandwich, and early history of Wildwood Natural Foods (Duchesne 1988).

Leviton. 1981. Soyfoods. Winter. p. 61. "Putting tofu in the lunch boxes of America." "Wildwood produces a line of eight packaged vegetarian sandwiches including *Brown Rice and Tofu Sandwich* (with vegetables in a whole wheat bun)..."

Note 1. This is the earliest record seen (April 2013) concerning Wildwood Natural Foods.

Note 2. This is the earliest commercial soy product seen (April 2013) with the word "Sandwich" in the product name. by Wildwood Natural Foods.

3580. Gandjar, I. 1977. Tempe gembus [okara tempeh]. Paper presented at Symposium on Indigenous Fermented Foods, Bangkok, Thailand. Summarized in K.H. Steinkraus, ed. 1983. Handbook of Indigenous Fermented Foods. New York: Marcel Dekker, Inc. ix + 671 p. See p. 48-50.
• ***Summary:*** During World War II, when food was scarce, the people of Java used okara, the refuse of tahoo / tahu [tofu] factories, to make an acceptable, low-cost tempe. Today this kind of tempeh can be found in every market in Central and East Java, sold at a price that low-income people can afford. It is consumed (like most regular tempe) as a side dish for rice. The traditional fermentation, which is described, takes 2 days. The laboratory process is described in more detail. Address: Dep. of Biology, Faculty of Mathematics and Natural Sciences, Univ. of Indonesia, Jakarta.

[Jap]*

3582. **Product Name:** Organic Tofu (Vacuum Packed).
Manufacturer's Name: Redwood Natural Foods Inc. (Packer & Distributor). Made in S. San Francisco by Quong Hop & Co.
Manufacturer's Address: 3230 Sebastopol Rd., Santa Rosa, CA 95401. Phone: 415-873-4444.
Date of Introduction: 1977. November.
Ingredients: Water, organically grown soybeans, coagulated with natural nigari.
Wt/Vol., Packaging, Price: 10 oz vacuum packed.
How Stored: Refrigerated.
New Product–Documentation: This product, introduced by Greg Hartman in late 1977, was the world's first vacuum-packed tofu, a major American packaging innovation. Spot with photo in Whole Foods. 1978. March. "More Time for Tofu. Using an innovative packaging process, Redwood Natural Foods has increased the shelf life of its organic tofu from 10 days to about 4 weeks. The process also reduces package size, weight, and shipping costs, making tofu more economical for distributors and retailers.

"The new method is to vacuum pack the tofu without the usual tub of water, in packages like plastic-wrapped bulk cheese. The absence of water and oxygen in the pack prolongs the fresh taste and clean smell of the product."

Label. 1978, undated. 5 by 2 inches. Red and green on silver foil. Self adhesive.

3583. Su, Yuan-Chi. 1977. Sufu (tao-hu-yi) production in Taiwan. Paper presented at Symposium on Indigenous Fermented Foods, Bangkok, Thailand. Summarized in K.H. Steinkraus, ed. 1983. Handbook of Indigenous Fermented Foods. New York: Marcel Dekker, Inc. ix + 671 p. See p. 553-61.
• ***Summary:*** Contents: Description and synonyms. Patterns of production and consumption. Preparation of tofu (starting with 1 kg of whole dry soybeans). Preparation of pehtze. Salting. Processing and packaging. Inoculation. Incubation. Microorganisms. Biochemical changes. Stability of sufu. Nyufu.

Chinese *sufu* (*tau-hu-yi*) is a highly flavored, creamy fermented tofu made in a two-step fermentation process: (1) Overgrow cubes of firmly pressed tofu with a mold belonging to the genus *Actinomucor, Rhizopus,* or *Mucor;* (2) Immerse these cubes, each covered with a fragrant white mycelium, in a salt brine / rice wine mixture and allow to stand for several months.

The salty flavor of sufu is suggestive of anchovies; most types are soft and pale yellow. Typical "cubes" are 2 to 4 cm square and 1 to 2 cm thick. Red sufu is colored with *hung chu* or red fermented rice, which is derived from the culture of another mold, *Monascus purpureus.*

Because of the numerous dialects used in China and the

© Copyright Soyinfo Center 2013

difficulties of phonetic rendering from Chinese to English, the following synonyms for sufu have been found: *tosufu, fu-su, fu-ru, tou-fu-ru, teou-fu-ru, fu-ju, fu-yu,* and *foo-yue*. "Other names by which the product is known are *to-fu-zu* in Mandarin, and *tau-zu* (*tao-hu-yi*) in Taiwanese. Sufu is the name that first appeared in the literature. Literally, sufu means "molded milk," and tosufu means "molded bean milk."

It is not known when production of sufu began, however according to Nganshou Wai (1964): "The *Food Encyclopedia*, written by Wang Su-Hsiung (1861) of the Ch'ing Dynasty [Qing / Manchu dynasty, 1644-1912] describes the food as follows: 'Hardened tofu is [difficult to digest] and it is not healthful for children, elderly persons or ill persons. Sufu, which is prepared from tofu, is better because it is aged; it is very good for patients.'

In 1977 in Taiwan, annual production of sufu was about 10,000 tons and consumption was about 12 gm per person per week.

A figure (p. 555) shows a flow sheet for the production of sufu from 1 kg of soybeans (Source: L-P. Lin 1977).

Traditionally sufu was made in the spring or fall. After the tofu is made and pressed, it is cut into pieces about 8 x 8 x 2 cm., each weighing about 70 gm. Traditionally tofu was exposed to bright sunlight for several hours to both sterilize and dry the surface. Traditionally the tofu was inoculated by placing it on rice straw, but this leads to quality that is not uniform because of contamination. Twenty or more trays are piled up and placed in a room at 10-20ºC. After 3-7 days, when a white mycelium can be seen growing on the surface of each piece of tofu, they (the pehtze) are removed from the trays and salted.

In the modern method, the tofu is cut into cubes, placed in an oven at 100ºC for 10 min, then inoculated on the surface with *Actinomucor elegans* NRRL 3104.

The traditional pehtze are transferred to large earthenware jars, each having a capacity of 700 liters. Each layer of pehtze is sprinkled with a layer of salt. After 3-4 days, when much of the salt is absorbed, the pehtze are removed, washed with water, and put into a smaller jar for (about 80 liters, typically earthenware) processing. First a dressing mixture, which is different for each type of sufu, is placed in the jar. (1) To make red sufu, for example, red rice koji (angkak) and soy sauce mash are added. (2) To make tsao sufu, rice wine mash, cloves and orange peels are added. (3) To make Kwantung sufu, red chili pepper, anise, salt, and red rice koji (angkak) are added. (4) To make rose sufu, some essence of roses is mixed into the dressing. Alternate layers of dressing and pehtze are packed into the jar until it is about 80% full. Then brine with a concentration of about 20% NaCl (table salt) is gently poured in. For some types of sufu, Shaoshing (pinyin: Shaoxing) wine can comprise part of the brine. Finally the mouth of the jar is covered with the sheath leaves of bamboo shoots and sealed with clay. After 3-6 months of fermenting and aging, the sufu is ready to eat.

A description of nyufu is given, based on Okada et al. 1974.

Note: This is the earliest English-language document seen (Oct. 2011) that uses the word "nyufu" to refer to fermented tofu. Address: Dep. of Agricultural Chemistry, National Taiwan Univ., Taipei, Taiwan.

3584. **Product Name:** Tempeh.
Manufacturer's Name: Tempeh.
Manufacturer's Address: 310 Oxford St., Rochester, NY 14607.
Date of Introduction: 1977. November.
New Product–Documentation: Letter from Earl Lepper to William Shurtleff at New-Age Foods Study Center. 1977. Nov. 21. "Our shop simply called Tempeh is now located in our apartment. We have considered a cooperative shop with The Tofu Shop but overhead expenses prohibit. We are supplying regularly 2 co-ops, 1 health food store, and one branch of a health food chain."

Letter from Earl Lepper. 1978. Jan. 21. "Tempeh is growing slowly but surely. The incubator has a capacity for more than 80 lb of tempeh daily. As of this past week full production is now under way. The hold up has been to make ends meet while supporting a family of five. Now limiting carpentry and painting to tempeh seems more of a possibility. The market seems best for fresh daily at large co-ops and frozen at smaller health food stores and restaurants."

Shurtleff & Aoyagi. The Book of Tempeh. 1979 (July). p. 149. Contact Earl Lepper.

Note: This is the earliest document seen (Sept. 2011) that gives tempeh production statistics for a particular manufacturing company in the United States.

3585. *Telluride Times* (*Colorado*). 1977. Tofu prepared daily in Telluride shop. Dec. 8. p. 11.
• ***Summary:*** "The Tofu Shop–a tofu factory and take-out health food store located in the Spectrum Shops–has been doing health since mid-September."

Business partners Matthew Schmit and Timothy Mecke started the Tofu Shop, which makes fresh tofu each morning in Telluride. Schmit was involved in setting up the Winterstash Food Co-op, and Mecke brought the art of making tofu to the enterprise. Both men are vegetarians.

Schmit, who starts making tofu at 6 a.m. each morning says anyone "is welcome to come down to observe and learn. 'It's a beautiful process, somewhat like meditation,' he says."

"The Tofu Shop distributes their products through Winterstash Food Co-op and Rose's market in Telluride, and through natural Food Stores in Durango... The Tofu Shop also offers a variety of take-out foods including salads, soups, soyburgers, sandwiches, sprouts, and soymilk." A photo shows Matthew Schmit, Susie Imbarrato, and Tim Mecke, all holding a tray of sprouts. Susie "runs the fresh

© Copyright Soyinfo Center 2013

juice bar and prepares the baked goods."

Note: This is the earliest article or published document seen (April 2013) concerning The Tofu Shop in Telluride, Colorado.

3586. Soy Plant (The). 1977. Re: Introducing The Soy Plant and the Grain Burger Collective. Letter to members of the Michigan Federation of Food Co-ops, Dec. 12. 1 p. Typed, without signature.

• ***Summary:*** "As the co-op movement continues to grow, a new branch of the cooperative tree has begun to develop; that is collectively organized production groups. Two such collectives have recently been started in Ann Arbor, and this letter is intended to strengthen ties between the food co-ops of Michigan and these production groups."

"Soy Plant which, produces tofu, and the Grain Burger Collective, which produces Grain Burger [Mix], are organized alike. Started by experienced co-opers, these are worker controlled collectives; this means that each has equal decision making responsibility within the business, (i.e. there are no bosses). We are legally non-profit and are striving to build a system in which businesses view themselves as an integral part of the community. Right now, we feel that the welfare of the community demands sources of non-animal protein that are unadulterated, enjoyable to eat, and inexpensive.

"We hope that our collectives thrive and can expand, but rather than expand in the traditional centralized manner, we would like to expand by assisting other autonomous collectives to start up and serve their own localities with our products and products of their own.

"Our products are available from the Peoples Wherehouse [sic, Warehouse]. Tofu comes in one lb. containers and is packed twelve in a case."

This unsigned letter ends with the typed word "PEACE." Along the bottom are stylized illustrations of a mother swan looking to her right at three baby swans swimming toward her. The body of each is a spiral. There are little waves to the left of the mother swan and below the baby swans.

Note 1. This is the earliest document seen (Dec. 2000) concerning The Soy Plant, a pioneering tofu shop in Ann Arbor, Michigan.

Note 2. The address at 330 Maynard was in the basement of Eden's, a restaurant belonging to Eden Foods.

Note 3. Talk with Steve Fiering, a founder of The Soy Plant in Ann Arbor. 2000. Dec. 3. Steve wrote this letter, though his name is not on it. The purpose of the letter was to introduce The Soy Plant to the Michigan Federation of Food Co-ops to encourage them to distribute Soy Plant products. Eden's was a combination natural food store and sit-down deli. A guy named James developed a Grain Burger Mix and he was using the same downstairs kitchen that The Soy Plant rented from Eden to mix his burger mix. Steve drew the illustration of the swans–to express his artistic creativity. Address: 330 Maynard, Ann Arbor, Michigan 48104. Phone: 313-663-0500.

3587. *Time.* 1977. Those movers who shake Seattle. Dec. 12.

• ***Summary:*** "The people of Seattle, like every place else, are into punk rock, tofu, lifespring, frozen yogurt, est and diet beer."

3588. Hansen, Barbara. 1977. Cooking class proves its prowess: Indonesian style. *Los Angeles Times.* Dec. 29. p. H1, H14.

• ***Summary:*** A special class and rijsttafel buffet ended the series of Indonesian cooking classes taught by Danny Unger (with help from his wife, Gerdy) in Pasadena. more than 200 guests sampled the dishes, which were of excellent quality, prepared mostly by the students in the class.

The many dishes included "sayur lodeh, a vegetable and bean curd stew;..."

Three recipes are given including: Babi kecap (Soy sauce pork, with 2 tablespoons kecap [Indonesian soy sauce]). Dendeng lambok (Simmered beef, with "3 tablespoons kecap (Indonesian soy sauce")). Elsewhere in the article, kecap is twice described as "sweet soy sauce" [probably kecap manis].

A photo shows Daniel Ungerer, wearing a batik scarf, as he presides over the buffet.

3589. *SoyaScan Notes.* 1977. Chronology of soybeans, soyfoods and natural foods in the United States 1977 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• ***Summary:*** Jan. 12. Laughing Grasshopper tofu shop starts making tofu in Millers Falls, Massachusetts. Founded by Richard and Kathy Leviton, Tom Timmins, and Michael Cohen in April 1976, it soon becomes the largest of the new breed of Caucasian-run U.S. tofu manufacturers. It was renamed The New England Soy Dairy in Nov. 1977, Tomsun Foods, Inc. in 1984, and Tomsun Foods International in 1986.

Jan. The Soy Plant starts making tofu inside Wildflower Community Bakery at Ann Arbor, Michigan. Steve Fiering is one of the organizers of America's first soyfoods co-op.

Jan. 20. Jimmy Carter inaugurated as president of the United States. Bob Bergland is Secretary of Agriculture.

March. Surata Soyfoods starts making tofu in Eugene, Oregon. America's second worker-owned soyfoods cooperative, organized by Benjamin Hills.

April 5. Takai Tofu & Soymilk Equipment Co. in Japan works with consultant William Shurtleff to acquire an English name, develop a unified equipment catalog, and establish international operations.

May. Flying Cloud Tofu (soon renamed The Tofu Shop, then Northern Soy) starts tofu production in Rochester, New York. Founders are Greg Weaver, Greg Mello, and Andy

Schecter.

May 10-June 7. Shurtleff and Aoyagi travel to Indonesia to do field research on tempeh in preparation for a book on the subject.

Aug. 16. *Miso Production* by Shurtleff and Aoyagi published by New-Age Foods Study Center, the Center's first publication.

Sept. Article in *Mother Earth News* announces that tempeh starter and split whole soybeans are available from newly founded Farm Foods at The Farm in Tennessee. Orders start to pour in. Farm Foods continues The Farm's tradition, with a great deal of creative and influential work with soyfoods.

Sept. Swan Foods starts operation in Miami Florida, run by Robert Brooks and Mary Pung. They produce America's first commercial soymilk yogurt. After doing extremely innovative pioneering work with second generation tofu products and advertising them nationwide, they go out of business in Dec. 1978 from trying to grow too fast.

Sept. White Wave starts making tofu in a bathtub in Boulder, Colorado. Founded by Steve Demos.

Oct. The Tofu Shop, America's second soy deli, opens in Telluride, Colorado. Founded by Matthew Schmit, it was later renamed Far Pavilions.

Oct. 14. Bean Machines Inc., America's first supplier of tofu and soymilk equipment, begins operations in California under the direction of Larry Needleman. Most of their equipment is imported from Takai in Japan.

Oct. *Soycraft,* a newsletter and America's first periodical focusing on soyfoods, begins publication. Initiated by David and Danette Briscoe of Lawrence, Kansas.

Nov. Redwood Natural Foods, Inc. in Santa Rosa, California, launches the world's first vacuum packed tofu. Redwood developed the packing process using tofu made by Quong Hop & Co.

Nov. Paul Duchesne starts selling Fried Rice & Tofu Sandwiches in Fairfax, California. His operation later becomes Wildwood Natural Foods.

* *The Heartsong Tofu Cookbook,* by Bob and Toni Heartsong self-published in Florida.

* Passage of the 200 mile offshore fishing limit law has a major impact on Japan's protein supplies, increasing interest in and use of soy protein products.

* By the end of 1977 there are at least 13 commercial Caucasian-run tofu shops in America.

* The Food and Agriculture Organization of the United Nations (FAO) establishes a European Cooperative Network on Soybean in which 14 countries participate, exchanging information on soybean production.

* Genentech becomes the first company founded specifically to apply recombinant DNA techniques for commercial purposes.

* In China, under new post-Maoist economic policies, soybean acreage starts to increase after almost 20 years of decline based on grain-first policies. Soybean production began a slow increase in the mid-1960s, despite declining acreage.

3590. Goulart, Frances Sheridan. 1977. Soybeans. *Vegetarian Times* No. 22. Nov/Dec. p. 50-51.
• ***Summary:*** A superficial overview. Discusses "boiled whole beans, toasted whole beans, soybean butter, soymilk, notes on soyflour, soysauce, soy oil, tofu, soy yogurt, mock mocha java (soy coffee)."

3591. Tseng, Rose Y.L.; Smith-Nury, E.; Chang, Young Sook. 1977. Calcium and phosphorus contents and ratios in tofu as affected by the coagulants used. *Home Economics Research Journal* 6(2):171-75. Dec. [12 ref]
• ***Summary:*** Three commercial brands of tofu (all made by Azumaya in San Francisco) were analyzed. The firm tofu, coagulated with calcium sulfate, contained over 4 times as much calcium and over twice as much phosphorus as the softer silken tofu coagulated with glucono delta lactone. The calcium / phosphorus ratios of the firm and soft tofu samples were 2.0-2.5/1 and 1/1, respectively.

The amount of calcium in the tofu depended on the method used to measure it: (1) a titration method modified from the Association of Official Agricultural Chemists (1970) and (2) a method using the atomic absorption spectrophotometer. For tofu coagulated with calcium sulfate, by the first method it contained 208-209 mg of calcium per 100 gm, whereas by a second method it contained 166-170 mg/100 gm. "Tofu, a high protein food, is a good source of dietary calcium. Since the average American diet has a high phosphorus content and a low calcium/phosphorus ratio, tofu, particularly the firmer kind [made with a calcium coagulant], also would result in a better calcium/phosphorus ratio." The recommend ratio of calcium to phosphorus in the human diet is 1 to 1, however the average American diet has a ratio of 1 to 2.8. Address: Dep. of Home Economics, San Jose State Univ., San Jose, California 95192.

3592. **Product Name:** Tofu Box Kit.
Manufacturer's Name: Wood Mountain Makings.
Manufacturer's Address: 77 East Main St., Dallastown, PA 17313. Phone: 717-244-0742.
Date of Introduction: 1977. December.
New Product–Documentation: Ad in Vegetarian Times. 1977. Nov/Dec. p. 55.

"Make your own High-Quality Protein!! Tofu–(soybean curd)–One of the finest nutritional foods available for vegetarians of all ages. Complete Tofu Kit contains: Wooden Tofu box, pressing sack, settling cloth, nigari (curdling agent), instruction sheet and a 10 page recipe and information booklet. Price $9.75 includes shipping. Dealer inquiries welcome."

3593. Wu, M.T.; Salunkhe, D.K. 1977. Extending shelf-life of fresh soybean curds by in-package microwave treatments. *J. of Food Science* 42(6):1448-50. Nov/Dec. [10 ref]
• ***Summary:*** Fresh soybean curds have a very short shelf life, although it varies with storage temperature. In-package microwave heat treatment of fresh soybean curds was effective in extending their shelf life. When stored at 4.5ºC, soybean curds preheated in a microwave oven at 65º, 80º and 95ºC have a shelf life of 16, 21, and 27 days respectively, compared with 7 days when not microwaved. Address: Dep. of Nutrition & Food Science, Utah State Univ., Logan, UT 84322.

3594. Swan Food Corp. 1977-1978. Introducing the Soybeanery–Natural food deli & bakery: Now open. Miami, Florida. 3 p. Undated. 28 cm. Catalog and price list.
• ***Summary:*** This retail catalog lists the company's soy products, iced herbal beverages, and baked goods & pastries–with prices. Serving take out orders–Soy products include: Sandwiches (made with wholewheat pita–pocket bread; all sandwiches served with fresh organic salad vegetables): Tofu–baked, regular, marinated, or caraway: $1.40. Eggless egg salad: $1.40. Tofu cream cheese: $1.05. Salads: House salad with sprouts plus tofu–baked, regular, marinated, or caraway: $1.35. Eggless egg salad: $1.35. Hot food: Soyburger sandwich: $1.30. Desserts (per slice): Mary's tofu cheese cake: $0.75. Mary's marble swirl cake: $0.75. Mary's devil's food cream cake: $0.75. Mary's carob cream cake: $0.75. Rice pudding [made with organic brown rice, soy melk, raisins, maple syrup, sea salt]: $1.10. Carob pudding: $1.10. Vanilla pudding: $1.10. Soyogurt: Strawberry, peach, plain (more flavours to come): $0.45. Granola: With soyogurt: $0.45. With soymelk & banana: $0.75. Drinks: Soy shake (carob, vanilla, strawberry). Soymelk. Non-soy: Herb teas. Coconut juice. Pinacolada. Smoothie (apple-banana). Sweet rice cookie. Oatmeal cookie. Hummus sandwich.

A page titled "Retail price list" lists many of the products shown above but at slightly higher prices. In addition: Tofu–regular: $1.00. Tofu–baked: $1.95. Tofu–marinated: $1.60. Tofu–caraway: $1.60. Soymilk [plain]: Quart: $1.00. Pint: $0.45. Soymilk (sweetened): Quart: $1.25. Pint: $0.45. Tofu cakes and pies (all 7-inch rounds): Tofu pie–cashew: $4.50 Mary's devil food cream cake: $4.50. Tofu chip dip: $1.25. Whole grain soyburgers: $1.15. Tofu vegetable stew: $1.15. Soyogurt–plain or with fruit: $0.45. Soy shakes–Carob: $0.85. Vanilla: $0.95. Strawberry: $1.05. Mary's eggless egg salad: $1.40. Also–Nori roll. Nectarel ginseng.

Note 1. This is the earliest English-language document seen (Dec. 2003) that contains the term "soy shake."

Note 2. This is the earliest English-language document seen (May 2003) that uses the word "Hummus" (or "Hummous"), which is a paste of pureed chickpeas usually mixed with sesame tahini and/or sesame oil (plus seasonings or spices) and eaten as a dip or sandwich spread.

Note 3. This is the earliest English-language document seen (Sept. 2012) that uses the word "Soyogurt" to refer to soy yogurt.

Note 4. This is the earliest English-language document seen (Feb. 2013) that contains the term "Eggless egg salad" or the term "Mary's eggless egg salad."

Talk with Danny Paolucci. 1997. Dec. 1. Danny worked for Swan Foods from 1977 to 1978. He knew Robert Brooks and Mary Pung very well. He last saw Mary about 8 years ago. The foods described above were sold in a little (10 by 12 foot) storefront retail store and deli that was located in the same building as the tofu factory but faced the sidewalk on Bird Road. A young lady named Penny, from England, ran the store. It was take-out only–no tables, chairs, or sit-down space. There was one large glass deli case, from which they sold a great many of Mary's delicious tofu pies. Danny used to have all the recipes for those pies, but he loaned them to his yoga teacher. They also sold lots of herb teas in Pure-Pak quarts, plus many Wah Guru Chew bars–made by another company that was probably also run by disciples of Guru Maraji. Address: The Soybeanery, 5758½ Bird Rd., Miami, Florida, 33155. Phone: 305-667-7141.

3595. Soy Plant (The). 1977-1987. Scrapbook. Ann Arbor, Michigan. 54 p. 45 x 40 cm (18 x 16 inches). [49 ref]

with acetate sheet protectors. On each sheet are taped, in approximately chronological order, articles, photographs (both black-and-white and color), labels, menus, letterheads, etc. documenting the story of this company. An excellent scrapbook! Many of the documents will be cited separately. Some of the highlights (the numbers of the unnumbered pages appear in parentheses): (1) A letter of 12 Dec. 1977 to "Members of the Michigan Federation of Food Co-ops" announcing that The Soy Plant which produces tofu (at 330 Maynard), and The Grain Burger Collective which produces Grain Burger Mix (at 335 Catherine), both in Ann Arbor, Michigan, are organized as collectives. Both their products are available from the People's Warehouse. Two large black-and-white photos (each 5 by 7 inches) show: Jerry MacKinnon, with long hair and mustache, cutting a large block of tofu into cakes, and Steve Fiering pouring soaked soybeans into the hopper of a grinder. (4) Black-and-white labels for tofu and for soymilk. A one-page leaflet titled "Getting to know your tofu" from "The Soyplant." (7) Long article titled "One of the few U.S. tofu manufacturers right here in Ann Arbor."

On the last two pages of the scrapbook are two undated and unsigned, handwritten pages torn from a spiral-bound, lined notebook, that begin: "Important! We are under attack! A vicious beast unknown to us has snatched from life many a new Soy worker. This pernicious creature... has brutishly eaten, devoured and consumed no less than three new workers without the decency to let them call us before being eaten... This vile unknown entity must be stopped." "This vile beast... bears a striking resemblance to our much loved packing machine. Have we given birth to a monster?" "As Ché Guevara said North Americans live in the belly of a monster, although resembling a machine the monster is none other than the capitalist system... Rx: Revolution and Revolutionaries."

Location: As of Dec. 2000 this binder is owned by Bruce Rose, president of Rosewood Products, Inc., Ann Arbor, Michigan. Soyfoods Center has a photocopy of the contents of this entire scrapbook. Address: 330 Maynard, Ann Arbor, Michigan 48104. Phone: 313-663-0500.

U.S. import company, located in San Jose, California, with Beechnut.

3603. Ogawa, Hideko; Sato, H.; Murayama, N. 1977. [Content of erucic acid in Japanese food aburaage (fried soybean curd or tofu pouches)]. *Sagami Joshi Daigaku Kiyo* (*Bulletin of the Sagami Women's College*) No. 41. p. 25-28. (Chem. Abst. 89:195703). [Jap]*
• ***Summary:*** Rapeseed oil produced from Asian strains contained more erucic and linolenic acids than that produced from European strains. This was reflected in the content of the 2 fatty acids in aburage. All panelists in organoleptic tests preferred aburage fried in rapeseed oil over that fried in either soybean oil or peanut oil. Address: Sagami Women's Univ., Sagamihara, Japan.

3604. Soybeanery (The). 1977. New soyfoods restaurant or deli. The Soybeanery, 5758½ Bird Rd., Miami, FL 33155.
• ***Summary:*** Full-page in a New-Age type periodical. About 1977. "Swan Foods: Remember the name!" The company's many soy products are listed. At the bottom of the ad is written: "In Miami enjoy all Swan Products at Swan's Retail Deli & Bakery, The Soybeanery, 5758½ Bird Rd."

Catalog and price list. About 1977 (undated). "Introducing the Soybeanery–Natural food deli & bakery: Now open." 3 p. This retail catalog lists the company's soy products, iced herbal beverages, and baked goods & pastries–with prices. Serving take out orders. Many soy products included. Address: Miami, Florida.

3605. **Product Name:** Mary's Roasted Cashew Tofu Cheese Cake (Also called Tofu Pie–Cashew).
Manufacturer's Name: Swan Food Corp.
Manufacturer's Address: 5758½ Bird Rd., Miami, FL 33155.
Date of Introduction: 1977.
Ingredients: Filling: Tofu (Organic soy beans, pure water, nigari, a natural solidifier), organic soy melk, pure maple syrup, roasted cashews, unrefined corn oil, arrowroot flour, pure vanilla extract, sea salt. Crust: Organic whole wheat pastry flour, unrefined corn oil, organic soymelk, sea salt. arrowroot powder, roasted cashews.
Wt/Vol., Packaging, Price: 26 oz. 7 inch diameter (round). Wholesales for $2.80 (April 1978).
How Stored: Refrigerated.
New Product–Documentation: Label. 1977. 3 by 2 inches. Light blue on white. "Swan Food Corp." order form and price list for distributors. 1978. April.

Ad (full page, black-and-white) in *Alternatives* magazine (Miami, Florida). 1978. July/Aug. p. 49. "Remember the name!" "Tofu Cheesecakes." Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Recipe in Shurtleff & Aoyagi's Tofu & Soymilk Production. p. 164-65. Nigari tofu, maple syrup, barley malt syrup, vanilla extract, salt, soymilk, corn oil, arrowroot powder, roasted cashews.

Note: This was the world's earliest known commercial tofu cheesecake (or soy-based cheesecake).

3606. **Product Name:** Mary's Tofu Rice Salad.
Manufacturer's Name: Swan Food Corp.
Manufacturer's Address: 5758½ Bird Rd., Miami, FL 33155.
Date of Introduction: 1977.
Ingredients: Tofu, organic brown rice, carrots, onions, tamari, natural spices, umeboshi salt plum.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Refrigerated.
New Product–Documentation: Label. 1977. 2 by 1¼ inches. Self adhesive. Black on yellow. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.

3607. **Product Name:** Tofu Chip Dip.
Manufacturer's Name: Swan Foods Corporation.
Manufacturer's Address: 5758½ Bird Rd., Miami, FL 33155.
Date of Introduction: 1977.
Ingredients: Tofu (organic soybeans, pure water and nigari, a natural solidifier), umeboshi plum, safflower oil, onion, garlic, dill, shiso leaves, pure water, tamari, parsley, salt, cayenne.
Wt/Vol., Packaging, Price: 8 oz plastic cup. Wholesales for $0.72 (April 1978).
How Stored: Refrigerated.
New Product–Documentation: Label. 1977. 3 by 3.5 inches. Self adhesive. Yellow, blue, and red on white. "Keep refrigerated. No additives. No preservatives." Illustration of a swan. "Swan Food Corp." order form and price list for distributors. 1978. April.

Ad (full page, black-and-white) in *Alternatives* magazine (Miami, Florida). 1978. July/Aug. p. 49. "Remember the name!" "Tofu Chip Dip." Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.

3608. **Product Name:** Tofu Baked with Tamari (Organic Soybean Curd; Baked Tofu).
Manufacturer's Name: Swan Foods Corporation.
Manufacturer's Address: 5758½ Bird Rd., Miami, FL 33155.
Date of Introduction: 1977.
Ingredients: Organic soybeans, pure water, nigari (a natural solidifier), and tamari.
Wt/Vol., Packaging, Price: 8 oz. wholesales for $1.10 (April 1978). Also 14 oz.
How Stored: Refrigerated.
New Product–Documentation: Label. 1977. 3 by 3.5 inches. Self adhesive. Yellow, blue, and red on white. "No additives. No preservatives." Illustration of a swan. "Swan Food Corp." order form and price list for distributors. 1978.

Note: This is the earliest document seen (Feb. 2002) concerning a seasoned or flavored baked tofu.

3609. **Product Name:** Tofu (Marinated). Organic Soybean Curd.
Manufacturer's Name: Swan Foods Corporation.
Manufacturer's Address: 5758½ Bird Rd., Miami, FL 33155.
Date of Introduction: 1977.
Ingredients: Organic soybeans, pure water, nigari (a natural solidifier), tamari, garlic, onion powder.
Wt/Vol., Packaging, Price: 14 oz. wholesales for $0.85 (April 1978).
How Stored: Refrigerated.

New Product–Documentation: Label. 1977. 3 by 3.5 inches. Self adhesive. Yellow, blue, and red on white. "No additives. No preservatives." Illustration of a swan. "Swan Food Corp." order form and price list for distributors. 1978. April.

Ad (full page, black-and-white) in *Alternatives* magazine (Miami, Florida). 1978. July/Aug. p. 49. "Remember the name!" "Marinated Tofu." Recipe given by Shurtleff & Aoyagi. 1979. Tofu & Soymilk Production. p. 166. Firm tofu. Marinade: Shoyu, water, honey, powdered ginger, garlic powder, dark (toasted) sesame oil, prepared (wet) mustard, cayenne.

3610. **Product Name:** Mary's Eggless Egg Salad.
Manufacturer's Name: Swan Foods Corporation.
Manufacturer's Address: 5758½ Bird Rd., Miami, FL 33155.
Date of Introduction: 1977.
Ingredients: Tofu, celery, onions, garlic, dill, paprika, onion powder, shoyu, salt, turmeric.
Wt/Vol., Packaging, Price: 8 oz deli container. Wholesales for $0.73 (April 1978).
How Stored: Refrigerated.
New Product–Documentation: "Swan Food Corp." order form and price list for distributors. 1978. April; Shurtleff & Aoyagi. 1979. Tofu & Soymilk Production. p. 160, 163. Note: This is the world's earliest known product (and the earliest document seen, April 2013) that bears the name "Eggless Egg Salad," a name that was later widely used by other companies and cookbooks.

3611. **Product Name:** Tofu: Organic (Soybean Curd).
Manufacturer's Name: Swan Foods Corporation.
Manufacturer's Address: 5758½ Bird Rd., Miami, FL 33155.
Date of Introduction: 1977.
Ingredients: Organic soybeans, pure water, nigari (a natural solidifier).
Wt/Vol., Packaging, Price: 14 oz packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid. Wholesales for $0.66 (April 1978).
How Stored: Refrigerated.

New Product–Documentation: Visit by William Shurtleff to Swan Foods production plant and to the home of Robert and Mary Pung. 1978. Aug. In late 1976 or early 1977 Mary had flown a long distance to attend one of the lectures by Shurtleff and Aoyagi on their "Tofu & Miso America Tour." She spoke with them personally at length, expressed her intention to open a tofu plant in Miami, and invited them to visit. Swan Foods, founded in 1977 by Robert Brooks and Mary Pung, has risen to nationwide fame in less than two years because of its innovative tofu and soymilk products and full-page ads titled "Swan Foods. Remember the Name!" Then suddenly and unexpectedly the company became the U.S. tofu industry's first major casualty. It fell, with a burst of light, into bankruptcy and oblivion in December 1978. During the last intense year of business, the company is said to have lost $140,000. After that, Robert went into hiding.

Label. 1978, undated. 3 by 3.5 inches. Self adhesive. Blue, yellow, and red on white. Illustration of a swan. "Keep refrigerated. Change water daily. No additives. No preservatives."

"Swan Food Corp." order form and price list for distributors. 1978. April.

Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 394. Owner: Robert Brooks and Mary Pung.

Soyfoods. 1983. Summer. p. 38-39. "The Miami soyfoods scene." Swan Foods opened in 1977. Danny Paolucci was their production manager. The company closed in December 1978, following uncontrolled growth and mismanagement.

Talk with Fred Sobel of Ojai, California. 1992. Oct. 24. Fred was a close friend of Robert Brooks who, with his lovely friend Mary, started Swan Foods and were disciples of Guru Maraji. About 3-4 years ago, Robert committed suicide ("blew his brains out") in Coconut Grove, where he ran an art gallery and was involved with drugs. He was very depressed that his second wife was in the process of divorcing him; she was making many financial demands and he was having lots of legal problems. The suicide had nothing to do with Swan Foods. Fred has no idea where Mary is now. Fred says that Robert was becoming quite successful in the drug trade before Swan Foods failed. He thinks Robert closed Swan Foods not so much because the company was under financial pressure (it was actually doing fairly well) but rather because he felt he could make much more money dealing drugs than selling soyfoods. Fred thinks Robert "got bitten by the greed bug." This "outside drug money" theory, if true, would also explain how Swan Foods, a relatively small company, was able to afford full-page ads in national magazines to advertise its products.

Note: This is the earliest record seen (Feb. 2003; one of many initial products) concerning Swan Foods Corporation (Miami, Florida; founded by Robert Brooks and Mary Pung).

3612. **Product Name:** Tofu Pops (Skewered Deep-Fried Tofu in a Batter).
Manufacturer's Name: Vegetable Protein Co. (The).
Manufacturer's Address: 140 River St., Cambridge, Massachusetts.
Date of Introduction: 1977.
Ingredients: Tofu, corn meal.
How Stored: Unrefrigerated and perishable.
New Product–Documentation: Talk with Johnny Weissman, inventor of Tofu Pops. 1992. March 31. This product was based on Tan Pops made of seitan. In addition to the Wheatmeat Tan Pop, John developed and made a Tofu Pop. He bought squares of plain pressed tofu (3 inches on a side and 3/4 inch thick) from a Chinese retail food store in Boston's Chinatown–he does not recall the company's name and he is not sure if they made the tofu or bought it from elsewhere. Later he bought tofu from Yah Ki, a Chinese tofu maker. He skewered the pressed tofu squares, coated them with his dry flour mix and corn batter, and deep fried them. He first sold these at the very first Bread and Circus natural food store opened by Anthony Harnett in Brookline. The product was introduced just after Anthony bought the store–but it was not on the market for long.

3613. Acciardo, Marcia Madhuri. 1977. Light eating for survival. Fairfield, Iowa: 21st Century Publications. 103 p. No index. 28 cm. *
• ***Summary:*** This is a raw food cookbook after the tradition of Viktoras Kulvinskas, the Hippocrates Inst. etc. Page 16 contains a recipe titled "Sun Cheese" which is a sort of raw soy tofu made by soaking and rinsing soybeans several times (but not sprouting them), then allowing the raw soymilk to ferment until it curds.

Note: We would suggest that people do not use this recipe, since the tofu contains inactivated trypsin inhibitors and also has an unpleasant raw, beany, and grassy flavor.

3614. Albright, Nancy. 1977. Rodale's naturally great foods cookbook: the best foods to use and how to use them in over 400 original recipes. Emmaus, Pennsylvania: Rodale Press. [vi] + 408 p. Illust. 24 cm. Reprinted in 1983 as
• ***Summary:*** This book is based on natural foods but makes widespread use of meat, poultry, fish, and dairy products. Raw, unstrained clover honey is used as a sweetener instead of white sugar which "is dangerous to health..."

"Natural foods restaurants are 'in'" (p. 2). "... the joys of natural foods" (p. 3). "... consumers are making a firm commitment to natural food cooking."

Soy related recipes: Rice and soy crepes (with ½ cup soy flour, p. 53). Whole soybean casserole (p. 74). Bulgur soybean loaf (with 3/4 cup soybeans, p. 81).

The section titled "The soybean" (p. 275-85) begins: "The queen of the legumes is the soybean. And its status

© Copyright Soyinfo Center 2013

is growing. From a relatively unknown commodity... it has finally come into its own in this country as an important food. The soybean is the vegetable that most nearly provides the complete protein necessary for good health." Discusses varieties suited to the family garden. Recipes: Green soybean and corn succotash (with green vegetable soybeans). Soy flour for added values: Soy pancakes. Soy cheeseburgers (with soy grits). Tofu (soybean curd): Mentions the Learning Tree tofu kit and The Book of Tofu, by Shurtleff and Aoyagi (1975, Autumn Press; no tofu recipes are given). Soy sauce (shoyu): Herbed soybean salad (with 1 cup soybeans). Fresh vegetable and fruit stew with soybeans. Soybean-cabbage casserole. Soybean coffee. Soybean custard pie. Soy milk (homemade). Carrot soy loaf. Liver pate (with 1 cup soy pulp remaining from making soy milk). Mock pumpkin pie (with soy pulp). Scroggin (backpacker's food, with 3 cups soybeans, boiled). Soy potato dumplings (with ½ cup soy flour). Soy salad dressing (with 3/4 cup soy flour or powder).

A photo (facing copyright page) shows Nancy Albright cutting vegetables in Rodale's Fitness House kitchen. Address: Author of *The Rodale Cookbook*.

3615. Anderson, Eugene N., Jr.; Anderson, Marja L. 1977. [Food in] Modern China: South. In: K.C. Chang, ed. 1977. Food in Chinese Culture. New Haven, CT, and London: Yale Univ. Press. 429 p. See p. 317-382.

• ***Summary:*** Page 326 states: Soybeans–the fifth of the classic Five Staples (or Five Grains)–are usually the most important, although other legumes make a surprisingly good showing in south China, no doubt because soybeans grow better in the north. The soybean "produces more protein per acre and per pound than any other common humanly edible crop, plant, or animal. This has caused them to become more important than any animal food as a protein provider in China. The Chinese have long recognized their similarity to animal products and, indeed, have built up a huge cluster of imitation-meat foods (probably developed originally by, and certainly now associated with, vegetarian Buddhists). The Chinese lack of interest in dairy products is almost certainly, in part, a result of the fact that the soybean provides the same sorts of nutrition more economically–though a desire to differentiate themselves from the border nomads and to be independent of them in food economy must also be taken seriously as an explanation. (It is the classic Chinese explanation of the phenomenon but has been dismissed by those moderns who believe that all traditional explanations must necessarily be wrong.)

"Further discourse on the soybean belongs properly in the following section on food processing, for the soybean is used neither in its raw state nor, usually, in a simple boiled or roasted form. There are good reasons for this. The soybean, being so nutritious and succulent, has been faced with intense natural selection pressure by seed-eating insects and other animals; surviving soybean strains contain whole galleries of poisons and other unfortunate chemicals, which protect the seeds against destruction but make them dangerous food in the uncooked and unprotected state (Committee on Food Protection 1973). Simply prepared soybeans are not very digestible, since heat bonds some of the nutrients into hard-to-digest form in the intact bean. Thus almost all soybeans consumed in China are fermented, ground into flour, and then processed, sprouted, or otherwise milled."

"The soybean is so famous that one is surprised to discover from Buck that the broad bean outranks it in some parts of south China." However in genetically susceptible individuals, *Vicia faba* produces favism, a condition characterized by acute anemia and other unpleasant symptoms. Other important sources of protein are black soybeans (a variety of soybean mentioned by Buck) and sprouts from mung beans and soybeans (*tou ya*). Bean sprouts bridge the gap between grains and vegetables (*ts'ai*) (p. 326-27).

"A huge bowl of rice, a good mass of bean curd, and a dish of cabbages–fresh in season, otherwise pickled–is the classic fare of the everyday south Chinese world."

"The New World vegetables stand out as a special class because of their common and recent origin in China and their extreme importance. The white and sweet potatoes have become staples, as has corn. In addition to these, the peanut (*Arachis hypogaea*) has become the most important oilseed through much of south China, as well as a much used food" (p. 328). The peanut came from South America. Today, peanuts have become more important in areas where they are grown than rapeseed. Peanut and rapeseed oils are polyunsaturated and contain plenty of linoleic acid, a dietary requirement (p. 333, 343, 348). Mushrooms and their relatives are widely used in vegetarian dishes (p. 332).

The section on food processing (p. 337-41) notes that tragic practice of polishing rice, which removes most of the nutrients including fiber. There are many questions about the origins of pasta. Egg noodles probably originated in China. Italian spaghetti is similar to Chinese *mien* and ravioli to *chiao-tzu*, but they may have existed elsewhere before Marco Polo brought them to Italy from China. The technology of soybean process is too complex to discuss except briefly in this chapter. Most important is the production of bean curd or *tou-fu* (Cantonese *tau-fu*, Hokkien *tau-hu*). Hokkien cooks prefer a drier, firmer bean curd. Bean curd is often sold fried. The skin resulting from boiling soymilk [yuba] is skimmed off, dried, and widely used. "Other closely related processes produce the range of imitation meats developed by vegetarians, specifically Mahayana Buddhists. Credible imitations... are made for chicken, abalone, and other white meats, and even beef and pork. The West has picked up the idea and developed it much further, climaxing in the production of textured vegetable protein (TVP), but has–characteristically!–ignored the problem of making the result

© Copyright Soyinfo Center 2013

taste good. The ideal in the West seems to be to make it tasteless" (p. 339).

Concerning fish farming (p. 334-35): "Some fish, however, a pond-reared. Those that have been effectively domesticated are carps. These have several advantages: they produce vast amounts of protein per acre; they do not have to be specially fed since they eat algae and weedy grass and small animals of the ponds and pond fringes; they can live in foul water, and thus in stagnant ponds and market fish barrels; they are efficient converters, putting a large percentage of their feed into growth; and relative to other fish, they are easy to breed in captivity. The first fish farmed in the world were probably the Chinese carps." However, no mention is made of soybeans being fed to the fish. Address: 1. Assoc. Prof. of Anthropology, Univ. of California at Riverside; 2. Riverside, California.

3616. Beane, Judy; Beane, Peter. 1977. No Moo Dairy. Maine. 2 p. Undated. Unpublished manuscript.
• ***Summary:*** "In the spring of 1976, the No Moo Dairy started out as an experiment spring of 1976 as an experiment in subsistence-level business management. It is the only operating tofu shop in Maine. From May to December, the 'shop' was the kitchen, and the average batch of tofu gave 5-6 lb. The tofu was made with nigari and organically-grown soybeans. Now we have one room of our home in South Portland set up exclusively as a shop so that we can produce tofu to keep up with growing demands." Contains 6 tofu recipes, plus a handwritten note to New England Soy Dairy. Address: Maine.

3617. Chang, K.C. ed. 1977. Food in Chinese culture: Anthropological and historical perspectives. New Haven, Connecticut, and London: Yale University Press. 429 p. Illust. Index. 24 cm. [200+ ref]
• ***Summary:*** One of the finest scholarly overviews of food in Chinese culture ever written, with each chapter, arranged chronologically by dynasty, written by an expert in the field. Contents: Introduction, by K.C. Chang. 1. Ancient China, by K.C. Chang. 2. Han, by Ying-shih Yü. 3. T'ang, by Edward H. Schafer. 4. Sung, by Michael Friedman. 5. Yüan and Ming, by Frederick W. Mote. 6. Ch'ing, by Jonathan Spence. 7. Modern China: North, by Vera Y.N. Hsu and Francis L.K. Hsu. 8. Modern China: South, by E.N. Anderson, Jr. and Marja L. Anderson. Glossary of Chinese characters. Bibliography. Address: Prof. of Anthropology, Harvard Univ., Cambridge, Massachusetts.

3618. Chang, Kwang-chih. 1977. Introduction. In: K.C. Chang, ed. 1977. Food in Chinese Culture. New Haven, CT, and London: Yale Univ. Press. 429 p. See p. 1-21.
• ***Summary:*** This book looks at food through a cultural framework, rather than a chemical or anthropological one. One of "the best ways of getting to a culture's heart is through its stomach." The Japanese scholar "Shinoda Osamu has almost singlehandedly carved out the field of Chinese food studies..." "Paleolithic hunters the world over relied heavily on animal flesh, which was cooked by a very small number of techniques." China's major legumes are the soybean, broad bean, peanut, and mung bean. Peanuts and sweet potatoes were brought to China by coastal traders during the Ming period.

Despite the "continuous introduction of dairy products and processes throughout the early historical periods, and despite the adoption of some dairy delicacies by the upper strata of society during the T'ang period, milk and dairy products, to this date, have not taken a prominent place in Chinese cuisine."

In China, the key distinction is between *fan*, grains and other starch foods, and *ts'ai*, vegetable and meat dishes. Fan is considered the main or primary food, and ts'ai the supplementary or secondary food. Grains have almost a sacred nature in Chinese food thought. Moreover, one should eat frugally and never overindulge in food.

"The overriding about food in China–in all likelihood an idea with solid, but as yet unrevealed, scientific backing–is that the kind and the amount of food one takes is intimately relevant to one's health. Food not only affects health as a matter of general principle, the selection of the right food at any particular time must also be dependant upon one's health condition at that time. Food, therefore, is also medicine." There are underlying principles governing the choice of food. "The bodily functions, in the Chinese view, follow the basic *yin-yang* principles. Many foods are also classifiable into those that possess the *yin* quality and those of the *yang* quality. When yin and yang forces in the body are not properly balanced, problems result. Proper amounts of food of one kind or the other may then be administered (i.e. eaten) to counterbalance the yin and yang disequilibrium... This belief is documented for the Chou period, several centuries before Christ, and it is still a dominant concept in Chinese culture." Many Chinese also distinguish between hot and cold foods.

Pages 17-18 note that one of the foods presented at graves is "dried bean curd." Address: Prof. of Anthropology, Harvard Univ., Massachusetts.

3619. Chen, Philip S. 1977. The joy of being a vegetarian. Mountain View, California, Omaha, Nebraska, and Oshawa, Ontario: Pacific Press Publishing Association. 127 p. 22 cm. [81 ref]
• ***Summary:*** Contents: About the author (a 1-page autobiographical sketch). Preface. 1. Vegetarianism, form fad to favor. 2. Food for philosophers. 3. Is man carnivorous. 4. Food for champions. 5. Mineral content of animal and vegetable foods. 6. Roughage and health. 7. The number one killer. 8. How wholesome is our meat? 9. What else is wrong with meat eating? 10. Animal protein versus

© Copyright Soyinfo Center 2013

vegetable protein. 11. The wise abstainers. 12. The joys of being a vegetarian. 13. The problem of animal waste. 14. The coming food crisis. 15. The soybean–A vegetarian's best friend. 16. Selected vegetarian recipes (using commercial meat substitutes or analogs). 17. Selected recipes (using homemade gluten and tofu). 18. Selected recipes (using natural, readily available ingredients).

Chapter 1 begins: "Vegetarianism in America used to be the butt of ridicule. But now the situation has changed. The laughter that once greeted mention of a vegetarian diet has died, thanks to discoveries made in biochemistry and nutrition during the last fifty years." It concludes: "Dr. Jean Mayer, professor of nutrition at Harvard University School of Public Health [in Boston, Massachusetts] and chairman of the 1969 White House Conference on Food, Nutrition, and Health, says that vegetarianism has three things going for it all at once–economics, health, and compassion."

Chapter 15, titled "The soybean–A vegetarian's best friend," begins by stating: "The soybean is a food without peer..." It discusses: Efficiency of soy protein (and supplementary value), soybean oil, minerals, vitamins, and simulated meats. Address: Camarillo, California.

3620. Farm, The. 1977. Vegetarian prenatal nutrition and high protein recipes. Summertown, Tennessee: The Book Publishing Co. 14 p. 22 cm.
• ***Summary:*** Printed with green ink on white paper. On the cover is a photo showing a field of soybeans, in neat rows free of weeds.

Contents: Introduction ("The Farm is a large longhair spiritual community of 1100 people in Tennessee... We are all complete vegetarians [vegans]. Ours is a soy-based vegetarian diet). Taking care of your self while you're pregnant (by Margaret, Nutritionist for the Farm, incl. iron, calcium, table of nutritional value of soybeans). Recipes: Basic cooked soybeans. Soybeans and tortillas. Soyburgers. Soybean stroganoff. Soy mayonnaise. Soy fritters. Soy yogurt. Soy milk (homemade using soybeans or soy flour) Tofu (Bean curd, homemade using whole soybeans and nigari or epsom salts). Soy cheese. Soy flour basic salad and sandwich spread. Seasoned sandwich spread. Hi-protein soy bread (incl. soy milk and soy flour). Soy souffle (incl. soy flour and nutritional yeast). Soy "nuts" (dry roasted or deep fried). T.V.P. Textured vegetable protein. T.V.P. tortilla filling. Spaghetti sauce with T.V.P. Sloppy joes. Good tasting nutritional yeast (A good source of B vitamins. Distributed by The Good Tasting Yeast Company, c/o The Farm). Melty nutritional yeast "cheese." A word about B12 [vitamin B-12] ("If you are a complete vegetarian, eating only plant foods, you will need to supplement vitamin B12").

People at The Farm eat "soy ice cream" which is mentioned in the introduction, but no recipe is given. Address: The Farm, Summertown, Tennessee.

3621. Farm, The. 1977. Volume one: Sunday morning services on The Farm. Summertown, Tennessee: The Book Publishing Co. 159 p. Illust. No index. 21 cm.
• ***Summary:*** The Farm is a spiritual community in Tennessee. Stephen is the teacher. This book is excerpts of talks given by Stephen from Aug. 1975 to March 1977. Soyfoods and vegetarianism are mentioned occasionally. A few teachings: "Do not be distracted by any doctrines or dogmas... We are the energy amphibians; we live in the physical world and we live in the energy world... No Bodhisattva who is a real Bodhisattva cherishes any idea of a separated individuality whatsoever... Every time you have a glass of soy milk, or a piece of soy cheese or tofu, it is a loving gift from someone who was not paid, and did it out of their heart... Adversity is not to be avoided... The sober consciousness of waking bliss."

Photos show: Stephen Gaskin speaking (cover, facing table of contents, p. 18). Farm members meditating (many pages). Aerial views of The Farm (p. 94, 99). Young soybean plants about 3 inches high, probably growing on The Farm (p. 109). "Basically it comes down to really knowing that we are all One and knowing that God is real." Address: Summertown, Tennessee.

3622. Farthing, Bill. 1977. Odiyan country cookbook. Emeryville, California: Dharma. xii + 211 p. Illust. by Denise Anderson. Photos by Peter Ogilvie. Index. 20 cm.
• ***Summary:*** This lacto-ovo vegetarian cookbook is dedicated to Tarthang Tulku, Rimpoche, a Tibetan Buddhist teacher who is head of the Nyingma Institute, founded in 1969 in Berkeley, California, and of Odiyan, the Institute's country retreat center being built on a redwood forested mountain above the Pacific Ocean in northwestern Sonoma County, California. Odiyan is a transliteration of the Sanskrit name for the birthplace of Padmasambhava the great teacher who brought Buddhism to Tibet.

The Foreword notes: "Although our chickens produce many eggs, we are essentially on a correct balance of grains and beans or soy-dairy products to provide protein." A chapter titled "Home-Made Proteins" (p. 112-19) includes various soy-related recipes: Homemade soymilk. Homemade tofu. Kinugoshi. Tofu-nut butter (with ground walnuts, peanuts, almonds, or sesame seeds). Tofu and stir-fried vegetables. Sprouted soybean puree. A large photo shows community scale tofu-making equipment plus the observation: "If you enjoyed making your own bread, then you may find the soy-dairy a very rewarding aspect of cooking to explore."

Other soy-related recipes include: Soy-bean patties (p. 95). Miso and tahini spread (p. 130). Soymilk dressing (p. 131). Soy carob milk (p. 196). Soymilk lassi (p. 197). Nutmilk (made with 2 cups soymilk plus ½ cup almonds, walnuts, or cashews). Address: California.

3623. Fuji Seiyu K.K. (Fuji Oil Co.). 1977. Daizu tanpaku kogyo-ka e no michi [Road to industrialization of soy protein. Part I (Document part)]. In: Fuji Seiyu K.K. 1977. Fuji Seiyu 25 Nen-shi: Showa 21 nen 11-gatsu–Showa 51 nen 3-gatsu [Fuji Oil Company Ltd.: 25-year history, Nov. 1946 to March 1976]. Tokyo: Fuji Oil Co. 622 p. See p. 417-30. [Jap]

• ***Summary:*** Outline: As a major Japanese soybean crusher, processing whole soybeans into soybean oil and defatted soybean meal, Fuji Seiyu produced large amounts defatted soybean meal. In 1962-62 Fuji Seiyu began to make *Fuji Takaramame* (a by-product of tofu powder) and *Proplus* using soy protein from defatted soybean meal, even though these were not considered to be good soy protein products.

In 1967 Fuji developed isolated soy protein (containing more than 92% protein) from defatted soybean meal, and started to sell this FujiPro isolated soy protein. Since it was a completely new product and little was known about it, sales were slow in the beginning. But later it started to be sold to makers of second generation meat products (such as sausages or ham).

In 1969 Fuji started to sell Fuji Nikku ("Fuji Meat"), which is a textured protein product (*soshiki tanpaku seihin*) and this expanded their market among hamburger and hamburger ball (meatball) makers. Based on the above experience, Ralston Purina (America's leading soy protein manufacturer) got to know Fuji and invited the company to do a joint venture. Three years later, in Dec. 1973, the two companies contributed 200 million yen and founded a joint company named Fuji Purina Protein K.K. In 1974 they started to make and sell *FujiPur / FujiPua* (for "Fuji Purina"), a spun soy protein fiber. Presently, Fuji Seiyu is trying to expand into new, undeveloped markets for soy protein foods (p. 418).

For 1964 the Food Bureau (*Shokuryo-chô*) of Japan's Ministry of Agriculture, planned the following usage of soybean meal: Food 347,000 metric tons (tonnes). Feed 691,000 tonnes. All but 69,000 tonnes of the food use went for miso, shoyu, and tofu. Of this 69,000 tonnes, 40,000 tonnes went for soy protein foods (such as breads, biscuits, doughnuts, shortcake, ice cream, fish paste products, cheese, soup, etc.) and 30,000 tonnes for glutamic acid / MSG (p. 419).

Fuji decided to industrialize soy protein very early and also to make isolated soy protein their main soy protein product. Other Japanese companies that tried to enter the soy protein market failed because they produced only soy protein concentrate (p. 420).

Fuji Seiyu finished their research on isolated soy protein at the end of 1966, then started test production in their 1-tonne pilot plant. In June 1967, they started to build their full-scale plant, and finished by the end of the year; it had a capacity of 100 tonnes/month. The company named its first product Fuji Pro; this isolated soy protein contained more than 90% protein and about 6% moisture (p. 421).

Then the company found that they could use Fuji Pro in fish paste products, so they tried to sell it to companies making such products. But these manufacturers were very conservative, so after 6 months Fuji gave up and began selling it to secondary meat producers (p. 423).

The meat industry was also very conservative, but after many visits to these companies, Fuji got to understand them better. Some of these companies were already importing soy protein from the USA and using it in their meat products. Fuji's research & development department developed a sausage containing Fuji Pro and presented samples to the meat processors; they made many repeat visits. In 1968 Fuji received an order from a large meat processor; after that they received orders from medium and small processors one after another. In Nov. 1968 Fuji's sales finally reached 100 tonnes/month. Later, after many careful investigations, the Japan Agricultural Standards (JAS) decided to make isolated soy protein a JAS product with a standard of identity for use in ham, sausages, etc. In this way, sales of Fuji Pro expanded. But there was also another reason for expansion: Exports! Actually exports started earlier and were easier than sales to the domestic Japanese market. And it was because of the demand from abroad that Fuji decided to build their first full-scale plant in 1967, even though they didn't have any clear idea about their domestic sales. Fuji's exports went Shoemaker, a Dutch food company; this relationship started in about 1964 (p. 424).

At that time the Dutch company was selling soy protein made by Central Soya in the USA. Being dissatisfied with the product's quality and prices, they looked to Japanese oil makers to produce these products. They contacted several companies, including Fuji Seiyu, which answered their inquiry and told them: "We are still study isolates, but we have a product that contains 50% protein." They sent Shoemaker a sample of Fuji Takaramame. However Shoemaker wanted a soy protein isolate, so no business was transacted. But from that time on, the two companies stayed in close communication and began to exchange information. Shoemaker asked Fuji to develop a soy protein isolate, provided important suggestions concerning the research, and sent Fuji a report of the European market for such a product. Shoemaker's cooperation played an important role in the development of Fuji's isolated soy protein.

Initially, Fuji had placed heavy emphasis on developing soy protein products for second generation fish paste products, but after considering the potential demand in Europe, Fuji started to research soy proteins for meat products such as ham and sausage. Fuji Pro was developed to be highly elastic, emulsifiable, and water soluble–characteristics desired by the European market. Fuji sent some samples. Before they started commercial production, they signed a contract with Shoemaker as a sales agent; it named Fuji as a IPSO (International Protein Sales

© Copyright Soyinfo Center 2013

Organization) and exporter. Thus, it was because of the European market that Fuji could start commercial production without a domestic market, and it was this European market that enabled Fuji to sell isolates in Japan. Everything seemed backwards. For example, some Japanese from the meat industry went to Europe to study that industry. There they learned that soy protein (named IPSO) was being used in ham and sausages. Returning to Japan, they discovered to their surprise that the soy protein was made in Japan by Fuji. In 1969 Fuji's contribution to Japanese exports (oil and protein) was honored with an award (p. 425-26).

A knowledge of the overseas market for soy protein was a great help to Fuji as its soy protein products began to serve an international market. This also gave ideas for development of new products–starting with meatlike soy protein products. They received news from Bernard Hawley in England that textured soy protein products had been developed in the USA. Hawley was a nutritionist and a consultant (Hawley & Associates) and Fuji began to use his consulting services in April 1966 (p. 428). Hawley made many trips to Japan and he and Mr. Nishimura (the president of Fuji Seiyu) became great friends. In 1967 Fuji sent Hawley to the USA and asked him to study the market for textured soy proteins and the send Fuji a market report (p. 429). Meanwhile, the company president and a man from the planning department also went to the USA to study the market; they soon decided to start making textured soy protein immediately. They visited Wenger Manufacturing Co. in the USA, signed a contract in April 1968, and received a machine [extrusion cooker] that year. Actually they bought only the main body of the machine from Wenger; the other parts (including the power mill) were invented and designed by Fuji technicians (p. 430). Continued. Address: Tokyo, Japan.

3624. Hawaii Dept. of Health. 1977. Keiki talk. Honolulu, Hawaii: Nutrition Branch, WIC Program, Maternal Child Health Branch, Hawaii State Dept. of Health. 14 leaves. Illust. *

• ***Summary:*** In this brief guide to breastfeeding, infant foods, and infant feeding, tofu is mentioned. Address: Honolulu, Hawaii.

• ***Summary:*** "Soybean grows easily as a companion crop with kaoliang or corn. It is consumed all over China" in various forms; as bean curd [toufu], soybean milk, *tou fu nao* ("bean brain"–slightly coagulated soymilk, softer than tofu), *tou cha* [okara] ("the finer remains of the soybean from which the bean milk has been extracted is usually fed to pigs, but can be the poor mans ta'si [side] dish").

Young soybeans in pods, freshly picked from the field, are boiled in water or baked on the fire and consumed as snacks. They are served with soy sauce and sesame oil and eaten by using the teeth to scrape the beans into one's mouth.

Other soybean products consumed in north China include: soybean sprouts (eaten after submersion in boiling water for 1-2 minutes), "fermented bean curd (*fu ju*), molded bean curd (*ch'ou tou fu*), dried bean curd [pressed bean curd] (*tou fu kan*) (p. 301).

Note: This is the earliest English-language document seen (Oct. 2011) that uses the term *ch'ou tou fu* or the term "molded bean curd." Address: 1. Evanston, Illinois; 2. Prof. of Anthropology, Northwestern Univ.

3627. Johns, Yohanni. 1977. Dishes from Indonesia. New metricated edition. Melbourne, Australia: Thomas Nelson (Australia) Ltd. xiv + 151 p. Illust. Index. 26 cm. 1st ed. 1971.

• ***Summary:*** The author comes from a town in Indonesia named Padang Pajang, located in the mountains of West Sumatra in an area known as Minangkabu. The society is matrilineal, so ancestral property is passed down the female line and a new husband comes to live in his wife's family's home. She married an Englishman in about 1955 and they lived in Jogjakarta (in Central Java) from 1956-1958, then in Australia since 1958.

This handsome book, packed with color photos, gives a good introduction to Indonesian cookery–though it contains a disproportionate number of recipes using meat. The excellent glossary of ingredients (p. 10-16) includes: Bean curd (incl. fried bean curd), black bean sauce or salted black beans (*tauco*, sic. Note 1. *tauco* is Indonesian-style miso, whereas *taosi* is salted black beans; which does she mean?), and soya sauce. Note that tempeh is not mentioned. Soy-related recipes include: Eggs in soya sauce (p. 53-54). Fried fish in black bean sauce (Tauco ikan, p. 60). Stir-fried prawns with long beans and black bean sauce (p. 71). Bean curd balls with prawns (p. 72). Braised liver in soya sauce (p. 86). Braised ox tongue in soya sauce (p. 87). Braised chicken in soya sauce (p. 90). Sambal of brown bean sauce (p. 101). Soya sauce sambal (Sambal kecap, p. 102). Fried soya bean curd with sauce (p. 125).

© Copyright Soyinfo Center 2013

Note 2. This is the earliest English-language document seen (April 2013) that contains the term "fried soya bean curd." Address: Australia.

3628. Kosikowski, Frank V. 1977. Cheese and fermented milk foods. Ann Arbor, Michigan: Edwards Bros., Inc. ix + 711 p. Illust. Index. 28 cm. 2nd ed., third printing, with revisions, 1982. Publ. by F.V. Kosikowski and Assocs., P.O. Box 139, Brooktondale, NY 14817.
• ***Summary:*** Contents: 1. Origins, movement and potentials. 2. The fermentation of milk. 3. Cultures and starters. 4. Fermented milks: Acid and alcoholic fermented milks (kefir, and koumiss [the latter is made from mare's milk]), acid fermented milks (acidophilus milk, bulgarian buttermilk, long milk and skyr). 5. Buttermilk, sour cream and ripened butter. 6. Yogurt. 7. Fundamentals of cheesemaking and curing. 8. Cottage cheese. 9. Bakers, Neufchatel and cream cheese. 10. Latin American white cheese. 11. Soft Italian cheese–mozzarella and ricotta. 12. Hard Italian cheese. 13. Cheddar cheese and related types. 14. Cheese with eyes–Swiss and Edam. 15. Control of spoilage bacteria in cheese milk. 16. Bacterial surface ripened cheese. 17. Mold ripened cheese–blue and Roquefort–Camembert. 18. Sheep, goat, and buffalo milk cheese. 19. Whey cheese. 20. The drying and freezing of cheese. 21. Process cheese and related types. 22. Nomads and nomadic cheesemaking. 23. The whitening of cheese. 24. The biology of a ripening cheese. 25. Whey and whey foods. 26. Imitation, substitute and alternate cheese foods. 27. Mechanized and continuous cheesemaking. 28. Cheesemaking by ultrafiltration. 29. Farm and home-making of cheese and yogurt. 30. Rodent, pest and mold control. 31. Analysis. 32. Standards. 33. Nutrition. 34. Public health and safety. 35. Packaging. 36. The yield of cheese. 37. Economics. Appendix. Conversion data. Composition of cheese and fermented milks. Book list. Sources of materials. Acknowledgements. Sketches and photographs.

Although soy is not mentioned in this book, it is an excellent source of basic information on the origins, principles, and procedures for producing important fermented milk products. Address: Prof. of Food Science, Cornell Univ., Ithaca, New York.

3629. Krich, Ken. 1977. Re: New pamphlets on tofu and miso available from Westbrae Natural Foods. Letter to food distributors and manufacturers. 1 p. Undated. Typed, with signature on letterhead. [2 ref]
• ***Summary:*** "For several years Westbrae has felt a major commitment to popularizing Japanese foods in this country. During a time when shortages of protein have become such a problem, the knowledge of soy-based foods is greatly needed by more people. Both miso and tofu are extremely healthy and inexpensive sources of protein and other nutritional benefits... yet many consumers are still not familiar with these products.

"To fill this information gap we asked Bill Shurtleff and Akiko Aoyagi, authors of *The Book of Tofu* and *The Book of Miso,* to write readable pamphlets on these topics. The authors have lived in Japan for the past five years studying and writing about traditional Japanese foods. You are probably familiar with their book(s)... I have taken the liberty of enclosing two copies of each pamphlet..."

"You may order either or both of these pamphlets with either the Westbrae logo, your logo, or no logo." This letter is printed on recycled paper. Address: Distributor Sales, Westbrae Natural Foods, Inc., 1224 10th St., Berkeley, California 94710. Phone: 415-524-0506.

3630. Laughing Grasshopper Tofu Shop. 1977. Laughing Grasshopper tofu recipes (Leaflet). 3 Main St., Millers Falls, Massachusetts 01349. 2 panels each side. Each panel: 25.2 x 19 cm. Undated. [1 ref]
• ***Summary:*** Though no author is listed, this leaflet (25 by 19 cm, dark-green ink on beige paper) was probably written by Richard Leviton. A later edition had New England Soy Dairy as the publisher, indicating that the latter was selling this brand of tofu for a while. Discusses soybeans, protein, and world hunger, gives a nutritional analysis of Laughing Grasshopper Tofu, then gives 20 tofu recipes: Basic pan-fried tofu. Basic pan-fried tofu with sauce. Raw vegetable dip. Creamy scallion salad dressing. Creamy dill dressing. Bean curd soup. Tofu guacamole. Tofu 'egg' salad. Scrambled tofu sandwich. Tofu kebab. Tofu barbecue. Tofu baked in tomato sauce. Ravioli or manicotti. Sweet & sour tofu. Strawberry-tofu ice (popsicles or ice cream). Raspberry pudding. Creamy carob pie. Creamy carob pudding. Tofu 'cheesecake' deluxe. Peach kuchen.

At the bottom right of the rear panel we read: "We're planning to put together a more complete vegetarian cookbook containing recipes using many varieties of soy products. If you would like to contribute any recipes or suggestions, please send them to: Laughing Grasshopper Tofu Shop, 3 Main Street,..."

Note: This is the earliest document seen (Feb. 2013) that contains the term "Tofu 'egg' salad" or a recipe for what would soon become one of the first popular tofu products, widely called "Eggless Egg Salad" (1977), "Tofu No-Egg Salad" (1978), and "Missing Egg Salad" (1978). This recipe, which contains no eggs, calls for tofu, celery, carrots, onions, mushrooms, green peppers, scallions, mayonnaise, prepared mustard, tamari soy sauce, turmeric, paprika, celery seeds, etc. Address: Millers Falls, Massachusetts. Phone: 413-659-3883.

Laughing Grasshopper

TOFU RECIPES

Tofu, the delicious, versatile, high protein soybean food, is eaten by more than a billion people every day. Tofu was discovered in China over 2,000 years ago and evolved into the primary source of protein in the East Asian diet. It is a food of countless attributes — nutritional, culinary, healthful, economical — but, its most important use could be as a major solution to the world food crisis.

One acre of soybeans yields more protein than any other crop. America, the leading soybean grower in the world, grows enough soybeans each year to satisfy the protein needs of one-fourth of the earth's human population, if people ate them directly rather than feeding them to animals. Fifteen pounds of plant protein produce one pound of beef protein, an immensely wasteful ration. Experts on world food problems agree that Americans and all affluent nations must reduce meat consumption to provide enough protein for all people.

Many Americans, upon learning these facts, have lessened their reliance on animal protein. They have replaced their meat-centered diet with grains and vegetables and tofu as the protein focus. During the last year dozens of new tofu shops, like Laughing Grasshopper, have opened throughout the country to expound the message of soy, and to meet the new demand for tofu.

We also feel the world food shortage at home. In New England, we have seen the decline of the small farm. Massachusetts imports 85% of its food. Laughing Grasshopper is attempting to stimulate the New England agricultural economy in localizing food production and growing. We plan to grow our own soybeans in the near future.

Tofu making is a simple, yet delicate, process. We soak a choice variety of organic soybeans overnight, then grind them into a fine puree. After we cook the puree in boiling water, we squeeze the soymilk from the pulp. The milk, now at an ideal 185 degrees, stands steaming and ready for the careful stirring and adding of the solidifier. We introduce **nigari,** a seawater extract, into the soymilk, then let the barrel stand until curds and whey form. Next, we ladle off the whey, scoop the curds into stainless steel trays lined with cheesecloth, and place weights on the lids of the trays. When the curds have pressed into one large cake of tofu, we remove the weights, flip the tray over, and cut the cake into fifty pieces. The soybean curd, now recognizable as the tofu you buy in the store, soaks for an hour in cold flowing water before packing and delivery.

Nigari, the traditional Japanese tofu solidifier, imparts a subtle sweetness to the tofu, as well as yielding a higher protein value than Calcium Sulfate, the traditional Chinese solidifier.

Tofu contains not only a large **quantity** of protein (more than cow's milk), but its **quality** is identical to chicken, and nearly equal to beef. The Net Protein Utilization of tofu is 65% of it. Laughing Grasshopper tofu contains 14.5 grams of useable protein per 8 ounce cake. The same amount of protein would come from 7 ounces of hamburger, or 2 & 1/6 cups of cow's milk. If you combine tofu with grains, the large amount of lysine in tofu complements the grain and you achieve an even higher NPU.

more more more.....

Proximate Analysis of Laughing Grasshopper Tofu

	by weight
Protein	9.79%
Fat	6.01%
Ash	.29%
Crude Fiber	.10%
Calories . . 212 per 8 oz. cake	

As you see, Laughing Grasshopper tofu contains no carbohydrates. Unless you are on a weight reducing diet, it's a good idea to eat tofu with a carbohydrate. The traditional Asian companion to tofu is rice. If you are on a diet, or being careful of your blood cholesterol levels, tofu is a perfect protein. Extremely low in saturated fats (15%), and high in polyunsaturated fats (80%), tofu contains a great deal of lecithin and linoleic acid. Both of these nutrients emulsify fatty acid deposits that clog the bloodstream and body organs.

Tofu is an incredibly versatile food; with a little creativity and imagination, tofu can easily be substituted in or added to almost any recipe. It is quick and simple to prepare and it can be eaten in its "raw" form. Try using tofu in any of the many traditional Chinese and Japanese recipes; Chinese cookbooks generally refer to tofu as "bean curd".

When you buy tofu, make sure that you refrigerate it as soon as possible, and store it in water. If you save it for a few days, change the water daily to prevent spoiling. If the tofu does begin to sour, boil it for ten minutes, or deep fry it. You can also successfully freeze tofu and thaw it whenever you want.

TOFU "EGG" SALAD

4 8 oz. cakes tofu (pat dry with towel)
⅓ c. mayonnaise
2 Tbsp. prepared mustard
1 tsp. tamari soy sauce
½ tsp. salt
1/8-¼ tsp. garlic powder
¼ tsp. cumin
¼ tsp. turmeric
¼ tsp. paprika
½ tsp. celery seeds
pinch of pepper
Mince:
Celery
Carrots
Onions
Mushrooms
Green Peppers
Scallions

Mix tofu and spices with a wooden spoon until the tofu is crumbled and well blended. Add minced vegetables. It's great on bread with a slice of avocado and lettuce or sprouts.

SCRAMBLED TOFU SANDWICH

2 8 oz. cakes tofu
(pat dry with towel & crumble)
2 Tbsp. margarine or oil
1 small onion, diced
6 mushrooms, sliced (opt.)
½ tsp. salt
1/8 tsp. garlic powder
¼ tsp. turmeric
dash pepper
dash tamari soy sauce

Fryonion in 1 Tbsp. of the oil or margarine till clear; add mushrooms. In the center of the same pan, melt the other Tbsp. of margarine or oil and add all the spices except the soy sauce. Quickly toss the crumbled tofu into the seasonings, coating all the tofu. Cook and stir 5-10 minutes longer; then add a dash of soy sauce. Serve on buttered toast with ketchup, mustard, or relish.

TOFU KEBAB

Marinade:
2 Tbsp. lemon juice
¼ c. oil
1 tsp. salt
1/8 tsp. pepper
2 cloves garlic, pressed
2½ Tbsp. tamari soy sauce
2 8 oz. cakes firm tofu
2 firm tomatoes
1 onion
8 lg. mushrooms
3 green peppers
1 eggplant, cubed & steamed

Serves 4

Five to eight hours before serving, cut tofu into 1½" squares. Mix marinade in a deep dish (pie plate) and allow the tofu to sit in the marinade, turning or basting a few times.

Fifteen minutes before serving, cut the vegetables into large chunks to fit on skewers. Alternate vegetables and tofu on skewers.

Turn oven on to broil; place oven rack 4 inches below broiler. Grease a cookie sheet well. Sprinkle full skewers with soy sauce and baste with extra marinade. Broil for approximately 10 minutes; turn skewers once gently.

You can also deep-dry the marinated cubes of tofu till golden brown before putting them on the skewers.

TOFU BARBECUE

Cut 4 8 oz. cakes of tofu into 1" cubes and press, (see above). Place the cubes on a cookie sheet coated with margarine or oil. Bake or broil the cubes until they're a deep golden brown.

Sauce:
⅓ c. molasses
3 c. tomato sauce
1 Tsp. prepared mustard
½ tsp. salt
2 Tbsp. vinegar
4 Tbsp. white or brown sugar
1 Tbsp. tamari soy sauce
dash liquid smoke (opt.)

Mix everything together over heat and stir the pressed tofu into the hot sauce. Serve on pita bread, on sandwich bread, or plain.

TOFU BAKED IN TOMATO SAUCE

4 8 oz. cakes tofu
1½-2 qts. tomato sauce
2 green peppers
oil

Slice each cake of tofu into 3 large slabs or "steaks." Press (see above). Preheat oven to 400. Place pressed slabs on a well-oiled cookie sheet in hot oven. Bake for 20 minutes, turning once. Layer the tofu in a casserole dish and cover with the sauce. Arrange green pepper rings on top. Cover and bake 35 minutes at 350°. Serve with spaghetti, rice, or garlic bread.

Do not overbake tofu as it will become hard & rubbery.

RAVIOLI OR MANICOTTI

(Tofu can be used in place of ricotta cheese in any Italian dish. Delicious in lasagna or spinach pie.)

Filling:
4 8 oz. cakes tofu, crumbled
¼ tsp. garlic powder or 2 cloves garlic, pressed
1 onion, diced and sauteed
1 tsp. parsley
salt and pepper to taste
Mix all ingredients well.

Pasta:
1 c. whole wheat flour
1 c. unbleached white flour
1 c. warm water

Mix together above ingredients. Gather into ball with fingers kneading lightly.

Ravioli :

Flour board & roll out dough 1/8" thick with rolling pin, using more four if necessary so it will not stick. Cut into 3" squares or circles (using doughnut cutter). On each square put spoonful of seasoned tofu. Cover with another square & seal all around edges with a wet fork, sealing well to keep filling inside. Drop in salted, boiling water & cook till tender, 8-10 minutes. Remove & serve with an Italian tomato sauce.

Manicotti:

Make a ball of dough the size of a walnut. On a floured board, roll paper-thin into a square. Fill & roll up. Pinch sides to hold together. Pour about 1 qt. of tomato sauce, spiced Italian style in the bottom of a baking dish, place the manicotti in and cover with another qt. of the tomato sauce. Cover the pan with tin foil & bake 40 minutes at 350°.

Suggestion: Omit the boiling step in the Ravioli directions and proceed as for baked Manicotti.

From **A Good Cook . . . Ten Talents,** College Press, Collegedale, Tenn.: 1968.

I: History of the Japanese plums (*Ume*)–born in China and raised in Japan. Japanese plums introduced as medicine. The use of Japanese plums as a protection against various diseases. Salted plums (Umeboshi) during the Samurai period. Plantings and location of the valuable plum trees. Plum extract, 160 years old. Plum extract's efficacy was accepted by both the Japanese army and navy. Relationship of Japanese plums for restoring acid-alkaline balance. Japanese plums are known as king of alkaline foods. The value of citric acid of Japanese plums. Chemical composition of Japanese plums. Why is citric acid good for your health Citric acid also metabolizes sugar. What is the citric acid cycle. Umeboshi conquers the Himalayas. Japanese plums have powerful antibacterial properties. Even radioactivity can be combatted by Japanese plums. Ume can balance your spirit (like a good tranquilizer). The unique properties of the Japanese plums. Ume has immediate effect on hangovers. Pregnant women need Japanese plums. The secret of beautiful skin. Ume as a source of stamina. A Japanese plum a day slows the aging process. The effective prevention of anemia. How to treat food poisoning with Ume. The best way to prevent a cold. Ume goes to work instantly on stomach pains. Ume has a remarkable effect on liver troubles. Good news for people who are suffering from stomach ulcers. The problem of high blood pressure. Plums for Athlete's foot, snake bites, and as a unique contraceptive. Japanese plums as seen through the eyes of oriental medicine... The best is yet to come. How to properly select Japanese salted plums. Japanese traditional health foods using plums.

Part II: Reishi–The shelf mushroom or monkey seat mushroom (*Polyporaceae*) of Japan.

The recipe section, titled "Japanese traditional health foods using plums" includes some that call for soy: Soy sauce with plum extract (p. 74; a good dressing for wakame seaweed salad). Crushed bean curd [tofu] with plum sauce (p. 80). Tasty dressings using salted plums (with soy sauce, p. 81). Plum dip (with soy sauce, p. 84).

A section titled "Soy beans" (p. 125) states: "The high level of vegetable fat and protein make soy beans the ideal food for daily health."

A map of Japan inside the front cover and facing page shows the nine major plum growing areas: From north to south they are: Mito Kairakuen Garden (Ibaragi [Ibaraki]). Yoshino plum district (Tokyo). Hyakusoen park (Tokyo). Soga plum district (Kanagawa). Atami plum gardens (Shizuoka). Mizunoo plum forest (Osaka). Kitano shrine (Kyoto). Tsukigase (Nara). Minabe plum forest (Wakayama). The spectacular flowers bloom in Feb. and March, moving from south to north.

A note/ad on page 146 states: "For your information. This book along with the following products are available from Soken Trading, Inc., P.O. Box 1705, Sausalito, California: Meitan Granules, Plum (Ume) Extract, Handpicked Umeboshi (Salted Plums), Plum Candy, and Kobai Reishi." A color photo on the rear cover shows Mr. Kosai Matsumoto II. He has three written other books about umeboshi and reishi. Address: 4-14-1 Shojaku, Settsu City, Osaka, Japan. Phone: 06-383-0911.

3632. Mote, Frederick W. 1977. Yüan and Ming. In: K.C. Chang, ed. 1977. Food in Chinese Culture. New Haven, CT, and London: Yale Univ. Press. 429 p. See p. 193-257. [38 ref]

• ***Summary:*** The Yuan (Mongol) dynasty (when China was under alien Mongol rule) lasted from +1271 to 1368. The Ming dynasty (when China was again ruled by Chinese) lasted from +1368 to 1644. In 1644 the Ming fell to the bandit Li Tzu-ch'eng, and Manchu invaders from the north [Manchuria] captured Peking, then soon conquered the rest of China–ushering in the Ch'ing dynasty (1644-1912). Note: The Ming period is one of the great eras of orderly government and social stability in human history. A population averaging around 100 million people lived during 276 years in comparative peace.

Page 212 notes that the growth of the palace eunuch staff is an important feature of early Ming government. The *Huang Ming tsu-hsün-lu* (Ancestral Admonitions), issued first in 1381 during the reign of the Ming founder, stipulated that separate bureaus within the palace eunuch staff be designated. The imperial wine bureau oversaw the production of wines, soybean meal, tofu, etc.

Page 200 notes that during this period "consumption of meat was very low and seems to have remained stable at low levels for many centuries... Because China also used virtually no dairy products, to maintain nutrition they had to supply protein, calcium, fats, and vitamins in many ways quite different from those our society employs. Vegetables, in one way or another, supplied all of those things. The soybean undoubtedly was the most important diet adjunct, being richer in protein than equivalent weights of red meat, richer in digestible calcium than equivalent amounts of milk, and also being an important source of oil and certain vitamins. Excellent cooking oils also were made from sesame seed, rape seed, and other plant materials (*T'ien-kung k'ai wu*, trans. by Sun and Sun, 1966, p. 215-21)."

Pages 240-41 note, under "Special ingredients: The Japanese specialist in the history of Chinese food and eating, Shinoda Osamu," has remarked that "Traditional China's diet was strikingly different from the Japanese in two respects: the consumption of oils and fats was four or five times higher in China, and everyday cooking demanded more basic materials. The things required to keep an ordinary kitchen going day by day in Yüan and Ming times are sometimes enumerated in the entertainment literature, encapsulated in the formula of 'the seven things.' Shinoda refers to 'Yüan drama' for one enumeration of those, probably having in mind the line spoken by a busy housewife: 'From the

© Copyright Soyinfo Center 2013

moment I get up in the morning, I'm busy with the seven things–fuel, rice, oil, salt, soy sauce, vinegar, and tea' (*San-shih chung*, p. 261)."

Also discusses: Peanuts (p. 198). Notes that during the last century and a half of the Ming period, from roughly 1500 to 1650 a number of important new crops entered China: Maize, sweet potatoes, peanuts, and tobacco. Vegetarianism (p. 221-25, 242). At private ceremonial banquets, vegetarian foods resembling forbidden meat dishes were served.

Pages 201 states: "Fish were commonly farmed in the ponds, regularly harvested, and sold live in the markets." However no mention is made of soybeans being fed to the fish. Address: Prof. of East Asian Studies, Princeton Univ., Princeton, New Jersey 08540. Phone: 609-452-4284.

• ***Summary:*** Page 4 shows 2 pie charts with statistics from the year 1974. The 3,500,000 tonnes of whole soybeans consumed in Japan are used as follows: Soy oil 78% of the total, tofu and products 10.5% (except frozen tofu), miso 5.5%, natto 1.5%, frozen tofu 1.3%, kinako (roasted soy flour) 0.4%, shoyu 0.2%, and other 2.6%. The 2,20,000 tonnes of defatted soybean meal are used as follows: Livestock feed 84.6%, shoyu 7.5%, tofu 4.1%, miso 0.3%, other food uses 2.0%, other nonfood uses 1.5%.

A graph on page 7 shows soybean production in Japan and soybean imports. Imports were static from about 1895 to 1918 at about 100,000 tonnes, then they rose rapidly to about 1,000,000 in 1944. They dropped to almost zero following Japan's defeat in World War II, then starting in about 1954, skyrocketed, reaching 1 million tonnes in about 1960, 2 million tonnes in about 1968, and 3 million tonnes in about 1970. After about 1954, soybean production in Japan dropped steadily. Address: Japan.

3634. Phillips, Ann Vroom; Phillips, David A. 1977. From the new world of Australia... the soil to psyche recipe book: Delightful new recipes for new age living... plus a total plan for zestful vegetarian nutrition from the bright new world down under! Santa Barbara, California: Woodbridge Press Publishing Co. 143 p. Recipe index. 16 x 23 cm.
• ***Summary:*** Cover title: "The soil to psyche recipe book." Soy-related recipes include: Darling Downs soya loaf (p. 48-49; "The Darling Downs produce some of the most beautiful organically grown soya beans in the world, on the softly rolling fertile hills. The extremely high fertility is due to the great depth of rich topsoil–five feet or more in many places. The location in subtropical southern Queensland provides the ideal climate for Australia's soya bean crops").

Chulora soya cheese (p. 49-50; Australian aborigines used 2 flat stones to grind seeds and beans into flour that they called "chulora." The authors grind soybeans into superfine soya flour, which they use to make tofu [though the word "tofu" is not used], curded with lemon juice. Into the well-drained curds they mix and mash finely chopped bell pepper and celery tops or parsley, press into a chosen mold, then refrigerate before serving).

3637. *SoyaScan Notes.* 1977. Chronology of the early years of Legume, run by Gary Barat and Dyanne Chandri Speer Barat, through Dec. 1983. 27 Oct. 1988. Compiled by William Shurtleff of Soyfoods Center.

• ***Summary:*** Gary Barat is born on 28 Nov. 1942 in Manhattan, New York.

1967-72. Gary is one of the founders of an early hippie commune named Huggs, located on 2,000 acres outside Burlington, Vermont. They rented it for $1 a year. He lives there (in an Indian tepee for a year) and works on their co-operative organic farm. He also learned carpentry and cabinet making. They sold their crops at a fruit and vegetable stand. In 1968 he becomes a vegetarian for moral reasons.

1972-77. The farmer who owned the Vermont land died and his heirs wanted the community off the land. Gary returned to New York. There he worked on and off as a carpenter. In 1971 he founded a company named "Longest Pillow in the World" which markets pillow furniture at outlets like Bloomingdale's and Macys. He may have invented the term "pillow furniture." He creates and registers the trademark "X-Rated" and a logo. He eventually licenses the rights to Sony.

1977. Gary has open-heart surgery necessitated by an unusual blood infection. While recuperating at his sister's home in Umatilla, Florida, he visits Lecanto Tofu Shop (90 minutes drive away) and first sees tofu being made. Decides he wants to do something with tofu as a right livelihood.

1978-79. Gary recuperates.

1979 June. Gary establishes Nature's Inn Corporation as a research company. He has no money–it was all gone from the operation and not being able to work for almost 2 years. But now he has a chance to start over with a Right Livelihood occupation. It was a spiritual quest. He uses this company to raise money to study the soyfoods market and create a business plan. Some money came from an investment banker, some from a man who owned an advertising agency. They were not relatives and they didn't stay with the company in the long term.

1979 July. Gary attends the Second Soycrafters Conference in Amherst, Massachusetts. First real involvement with soyfoods. Meets Steve Demos of White Wave, Tom Timmins of New England Soy Dairy, and others. After the conference he starts to compile a business plan for his new company.

1979 August. Gary meets Chandri Dyanne Speer at the Muktananda ashram in South Fallsburg, New York. Born on 3 March 1950, she graduated from Syracuse Univ., worked on a PhD at Boston College, studied in Paris at the Political Science Institute for a year, and then spent a year studying Eastern philosophy and meditation in India. Gary hires her to help him do research on the tofu market. On 23 Aug. 1979 Oak Barat of McNaturals orders books on tofu, miso, and tempeh from New-Age Foods Study Center. Gary and Chandri travel together around the USA researching tofu. After visiting Steve Demos at White Wave in Boulder (who personally prepared them a delicious dinner, featuring 15 tofu dishes, at his home) they decide at the Boulderado Hotel that they will make finished tofu products–not plain tofu. In California, they also visit Larry Needleman (their guide in California), Ray Nagai (who convinces them not to make tofu and not to own a factory), Bob Gerner of Gilman Street Gourmet in Berkeley (they loved and were inspired by the tofu burgers he sold at his Deli), and William Shurtleff (Dec. 18-21). At this point, their basic concept is to create a fast-food restaurant serving a variety of tofu dishes, with a traditional tofu shop in the restaurant, clearly visible behind a large glass window. Then on to Japan to study tofu there–with most of the expenses paid by Sony. They eventually collect 500 pages of research on the industry.

1980 May. Return to New York City and start baking Whipped Tofu Mousse Pie (their very first product), Tofu Muffins, and Tofu Spinach Quiche in their apartment. They sell them throughout the summer from a booth at street fairs in New York City both as a source of income and for market research to see which products were well accepted. Lasagna in large trays (unpackaged) was also sold at this time.

1980 June. Dissolve Natures Inn Corp. and start doing business as Legume. A Tempeh Chili product is being planned. Tempeh Cutlets soon follow, but neither of these are ever packaged or labeled. The muffins, quiches, and no-creme pies were the first products to be packaged and labeled; each is kosher. They made the first two products, mostly by hand themselves, in a large bakery they rented for the summer in the Crown Heights section of Brooklyn. The baker, impressed by their business plan, invested $19,500 in the company and let them use his bakery after his daily baking was done. Limited freezer space in this bakery was a major problem.

1981 Jan. 23. Incorporate Legume in New York, then that month move to Bloomfield Bakery, a larger facility in Verona, New Jersey (which has freezer space), ending up right next to Celentano. Meet Ira Shapiro, a food broker who represents major low-calorie frozen food lines. His son, Robert Shapiro, invests $10,000 in the company and becomes sales manager. At about this time, when they were trying to raise money, their basic concept changed from

© Copyright Soyinfo Center 2013

being a restaurant to being a nationwide marketer of prepared tofu dishes. The restaurant business was seen as too risky and neither Gary nor Chandri had any experience in it. Investors were scared of putting money into a restaurant.

1981 March. Legume publishes a leaflet with the slogan "Who says rich, creamy foods have to be high in cholesterol & calories." Their Tofu Country Pies, Tofu-Bran Muffins, Tofu No-Cream Pies, and Cakes now start to be shipped nationwide, frozen, through a network of health food distributors.

1981 May. Celentano starts co-packing Legume's Italian-style entrees, beginning with Tofu Lasagna, followed by Tofu Ravioli. The Tofu Lasagna, a frozen entree, has a crack-and-peel label on an all-white box. It bears the new Legume logo on the front but no food illustration yet. It debuted at a food show in Soho. Gary and Chandri are still making their baked goods by hand in the bakery. Since May 1980 Gary and Chandri have realized that they prefer to let another company make their products, so that they can focus on marketing. They are one of the first soyfoods companies to come to this key realization.

1981 June. Gary and Chandri are married in New Jersey.

1981 Sept. Legume runs its first magazine ad (in Whole Foods, p. 56), stating that Legume now markets 3 Legume-brand snacks (Tofu muffins, "No-creme" pies, and tofu cakes), and 3 entrees (Tofu lasagna, Tofu ravioli, and Tofu country pies). The company's slogan is "Delicious protein meals and snacks."

1982 Feb. (winter). The earliest document seen on Legume appears in *Soyfoods* magazine (p. 56). Their products: Tofu Bran Muffins (Raisin or Blueberry), Tofu No-Creme Pie (Strawberry, Coconut, Banana), Tofu Cake (Carrot or Banana), Tofu Country Pie (Spinach or Broccoli), Tofu Ravioli, Tofu Lasagna.

1982 July. Richard Leviton visits Legume and publishes article in Soyfoods magazine ("Touring for Soyfoods," p. 32, 41). Products now include tofu pizza, lasagna, ravioli, vegetable pies, muffins, cakes, and cheesecakes. Company is now starting to phase out its line of baked products.

1982 Oct. Legume raises $200,000, half through a public sale of 1,000,000 shares of common stock at a price of $0.10 per share, and half a loan, to promote its tofu frozen entrees. This is the first of the new wave of tofu companies to become publicly owned. Now, with the help of food broker and board member Ira Shapiro, they take aim at supermarkets.

1983 Jan. 24. Article on Legume in the *Wall Street Journal* titled "Company finds a niche selling frozen foods made with tofu." Includes a good history of the company, whose sales now "are only $40,000 a month, $20,000 less than the break-even point."

1983 July. Gary Barat takes the lead in forming the Soyfoods Association of America, a new organization to represent larger companies and to break away from SANA.

1983 Aug. Legumes raises $600,000 more, 2/3 through sale of common stock to 34 people in a private transaction, and 1/3 from a loan.

1983 Dec. Six new Italian-style tofu entrees, sold frozen, introduced in stylish boxes. Line of "Legume Light & Natural Tofu Entrees" includes Stuffed Shells Provencale, Tofu Tetrazzini, Sesame-Ginger Stir-Fry, Tofu Bourguignon, and Cannelloni Florentine. Each contains less than 300 calories.

1984 Feb. The company borrowed $200,000 from two parties, one of whom, Vincent Galano, is a principal stockholder of the company.

3638. Spence, Jonathan D. 1977. Ch'ing. In: K.C. Chang, ed. 1977. Food in Chinese Culture. New Haven, CT, and London: Yale Univ. Press. 429 p. See p. 259-94. [38 ref]
• ***Summary:*** The Ch'ing dynasty (China's last dynasty) lasted from 1644 to 1911.

Concerning peanuts: Ho Ping-ti (1959, p. 183-95) has shown how maize, sweet potatoes, Irish potatoes, and peanuts all became basic crops in China during the Ch'ing, and how their story is enmeshed with the drama of China's internal colonization (p. 263). During the 1750s, Magistrate Li Hua-nan in Checkiang reported the popularity of peanuts. Table 4 (p. 269) shows the relative prices of sweet oil, peanut oil, salt, and salt turnip from 1902 to 1912. In 1928 L.K. Tao reported that peanuts were bought by 89.6% of the families in Peking (p. 270). Note: Reischauer and Fairbank in *East Asia: The Great Tradition* (1960, p. 393) agree. There was considerable growth in China's population during the 18th century, before the impact of industrialization. The leading explanation for such growth lies in the increase of the food supply made possible by (1) the opening up of new land to cultivation, often under imperial encouragement, and (2) the consumption of new food crops. Maize (corn), sweet potatoes, peanuts, and tobacco were all introduced into China from the Americas in the 16th or 17th centuries. The sweet potato became the poor-man's food of south China.

Also discusses: Vegetarianism (p. 290). Address: Prof. of History, Yale Univ., New Haven, Connecticut. Phone: 609-452-4284.

3639. Takai Seisakusho. 1977. Takai Seisasakusho no kikai [Takai tofu production equipment leaflets (Portfolio)]. Takai Manufacturing Co., 1-1 Inari, Nonoichi-machi, Ishikawa-ken 921, Japan: Takai Seisakusho. 25 inserts. [Jap]
• ***Summary:*** William Shurtleff contacted Takai Seisakusho, the largest and oldest manufacturer of tofu equipment in Japan, and asked if he could place an order for Farm Foods in San Rafael. Wataru Takai said that all the information about his equipment was on single-sheet color leaflets printed on both sides in Japanese. They agreed that Takai needed an English-language catalog of tofu equipment, the first such catalog ever to be created. The following glossy

© Copyright Soyinfo Center 2013

color leaflets (most numbered, all undated; each 25.5 x 18 cm, and printed with black and one color of ink on glossy white paper) were given to Shurtleff to use as the basis for his work: 1. Grinders. 2. To-100 system. 3. TM-100 system. 4. Boilers. 5. Mini-Star and other complete systems. 9. Hydraulic press. 10. Jack press, forming box table, and modern forming box. 11. Pressure cookers. 12. Tandem pressure cookers, and whole modern system. 13. Automated yaki-dofu broiler. 15. Three metal sinks, metal curding vat, tofu cutter, tofu forming box, silken tofu box and cutter. 16. Deep mixing plate, simple lever press. 17. Ganmodoki mixing machine. Draining racks. 18. Mechanized deep fryers. 20. Two-chamber manual deep-fryer. 24. Rotary feeder–to move soybeans. 28. Pump. 30. Mechanized tofu press. 32. Case washer. 33. Continuous roller extractors (4 models). 35. Mechanized soymilk maker. 36. Mechanized soybean soaker and washer. 37. Mechanized tofu cooling tank. 38. Automated TGS-2 whole system. 39. Automated whole system. 40. Automated TGS whole systems (Nos. 1-4 and 10). 134. Automated tofu factory TGS 7-9.

Unnumbered leaflets: TM-100 whole system and other equipment (blue). Micro mini-plant TGS-4 (green). Order form. Address: Ishikawa-ken, Japan.

3640. Takai Seisakusho. 1977. Takai no tôfu kikai [Takai tofu production equipment (Brochure)]. Takai Manufacturing Co., 1-1 Inari, Nonoichi-machi, Ishikawa-ken 921, Japan: Takai Seisakusho. 6 p. [Jap]

• ***Summary:*** On the cover are two square arrays of dots, one green and one blue, offset slightly to give the impression of three dimensionality. In the lower right is the address and phone number of Takai headquarters and five branches.

When the brochure is opened, the two left panels contain six large black-and-white photos: (1) Outside of factory No. 2. (2) Inside factory No. 2 with finished equipment standing on the floor. (3) An aerial view of the long bay of factory No. 1 showing many machines under construction. (4) Eight draftsmen at work in the design room. (5) Three women office workers in a modern office. (6) The exterior of factory No. 1. In the upper left of the far left panel is basic information about the company, which was founded in 1917. The inner right panel shows photos of five Takai tofu and soymilk systems, with a description of each. On one back panel are photos of four more larger systems. On the other back panel is a chronology of the company. Address: Ishikawa-ken, Japan.

3641. White, Beverly. 1977. Bean cuisine. A culinary guide for the ecogourmet. Boston, Massachusetts: Beacon Press. xv + 142 p. Illust. by Julie Maas. Index. 21 cm.

• ***Summary:*** Contents: Introduction. 1. Becoming a bean cook. 2. Bean soups. 3. Bean salads. 4. Bean sandwiches, spreads, and such. 5. Stovetop beanpots. 6. Oven beanpots. 7. Feasts for special occasions. Dried legume glossary.

Contains good information about pressure cookers and pressure cooking beans (p. 6-10, including soybeans). Soy-related recipes include: Soy sprouts (p. 13). Basic tofu (p. 14). Bean on bean soup (p. 18). Tofu mayonnaise (p. 27). Apple bean sprout salad (with tofu dressing, p. 39). Carrot salad with tofu (p. 40). Soy joy salad (p. 48). Amarillo taco (with cooked soybeans, p. 50). Soy sandwiches (p. 57-58). Soyburgers supreme (p. 58-59). USA paté (p. 60). Soybeans creole (p. 85). Hearthside baked soybeans (p. 99). Vegetable medley (with soybeans, p. 110). Miso shiru soup (p. 126). Soy cucumber salad–sunomono (with soy sauce, p. 126). Vegetable sukiyaki (with tofu and soy sauce, p. 127). Basics (p. 136).

Soybean sprouts should be ½ to 1 inch long; they need to be parboiled for 10 minutes before use in salads. Freshen old tofu by parboiling for 2-3 minutes in a pot of boiling water.

3642. Wong, Irene. 1977. Great Asia steambook. Brisbane, California: Taylor & Ng; New York: Distributed by Random House. [viii] + 97 p. Illust. (photos). Index of recipes. 22 x 22 cm.

• ***Summary:*** Includes recipes (all steamed) and ingredients from throughout Asia, but with emphasis on China.

The "Glossary of ingredients" (p. 80-95, with a large photo of each) includes:

"Bean curd, fresh." Bean curd, red (Nam yue).

Bean sauce: "Sold as 'Yellow bean sauce' and 'Ground bean sauce'; also known as brown bean sauce or *mien see* (Cantonese Chinese).

"Black beans, fermented and salted (*Dow See*)*:* A Chinese spice. Small raisin-size black beans sold in plastic or cellophane packages. May be rinsed and mashed with minced garlic and ginger for steaming, stir-frying, and braising..."

Fu: pressed, dry wheat gluten cakes. Hoisin sauce. Miso. Nam yue. Nori. Oyster sauce: Made from oysters and soy sauce. Red bean curd. Red bean paste [azuki an] (Dow sah). Sweetened to make a filling for steamed bread (bao). Soy sauce. Sweet rice (see glutinous rice). Teriyaki sauce. Tofu: See bean curd, fresh.

About the author: She was born in Fresno, California and grew up in a spacious Victorian frame house in the thriving Chinatown section. Her father and uncle had immigrated from Sun Doh, a village in Kwantung province of mainland China, when the Japanese army invaded the region in 1938. She graduated from the University of California, Berkeley, then taught English as a second language in the Chinatown of nearby Oakland. In 1974 she married Alan Gribben, now an assistant professor at the University of Texas in Austin. Currently Irene is an instructor of Chinese cooking at Taylor & Ng, San Francisco importers and designers. Address: San Francisco Bay Area, California.

3643. Yü, Ying-shih. 1977. Han China. In: K.C. Chang, ed. 1977. Food in Chinese Culture. New Haven, CT, and London: Yale Univ. Press. 429 p. See p. 53-83.
• ***Summary:*** The Han dynasty lasted from 206 B.C. to A.D. 220. In 1972 China made a spectacular archaeological discovery on the eastern outskirts of Ch'ang-sha, Hunan, uncovering what is known as "Han Tomb No. 1 at Ma-wang-tui." The discovery achieved worldwide renown since the body of its owner was so remarkably preserved that her skin, muscles, and internal organs still had a certain elasticity when the coffin was opened after some 21 centuries. She was most likely the wife of Li-tsang, the first Marquis of Tai (reigned 193-186 B.C.) and died a few years after 168 B.C. at about the age of 50 (Hunan Sheng 1974, p. 46-48) (p. 55).

Her husband was buried nearby in Tomb No. 2. Among the rich burial remains unearthed from Tomb No. 1 are 48 bamboo cases and 51 pottery vessels of various types. Most of them contained foodstuffs (figs. 17-18, p. 183). All of these food remains have been identified (Hunan Sheng 1973, 1:35-36). Grains and beans found in the tomb included soybeans, rice, wheat, barley, two kinds of millet (Panicum = glutinous millet, and Setaria), and red lentil (*Phaseolus angularis* Wight [azuki]). Apart from food remains, there were also 312 inscribed bamboo slips which gave additional information on both food and cooking. They tell us a lot about seasonings and methods used in Han-period cooking. "The seasonings included salt, sugar, honey, soy sauce (*chiang*), *shih* ("salted darkened beans"), and leaven (*ch'ü*) [*qu, koji*]."

"What makes the Ma-wang-tui discovery doubly interesting is the amazing degree to which the food list from Tomb No. 1 agrees with the list given in the 'Nei tse ('Internal [Family] Regulations') chapter of *Li chi.* Virtually all the foodstuffs and prepared dishes listed above can be found in that chapter (*Li chi,* 8:19a-21b; Legge 1967, 1:493-63)."

Ying Shao of the 2nd century A.D. reported that *shih* ("salted darkened beans") [fermented black soybeans] were used to season dried meat and fish served after the main meal.

At Shao-ku (northwestern outskirts of Lo-yang), a total of 983 earthenware grain containers were unearthed in 1953 from 145 tombs datable from middle Earlier Han to late Later Han [about 100 B.C. to 200 A.D.]. Found in many of the containers are grain remains of the following: millets of various kinds, hemp, soybean, rice, and Job's tears (*Coix lacryma-jobi*). Moreover, most of the containers bear inscribed labels indicating the food content of each. "Based on these archaeological finds, we can now say with confidence that the major categories of grains accessible to the Chinese in Han times included millets of various kinds, rice, wheat, barley, soybeans, lesser beans, and hemp. It is particularly noteworthy that this archaeological list matches very closely the "nine grains" recorded in the agriculturist book by Fan Sheng-chih of the first century B.C... Fan was a professional agriculturist and had actually taught people in the vicinity of Ch'ang-an the art of farming (S.H. Shih 1959, p. 8-11, 42-44)."

Millet was generally more common than rice as the main food in Han China, then came wheat, barley, soybeans, and hemp. Hemp fiber provided the basic material for manufacturing cloth in traditional China. The seed also proved edible and was classified by the ancients as a "grain."

"To the existence of the very poor, soybeans and wheat could be even more vital than millet... There was always a pressing demand for soybeans and wheat as substitutes. As Pan Ku points out, the poor had only soybeans to chew and water to drink (Swann 1950, p. 419)."

The section titled "Toward a culinary revolution" states (p. 80-81): "Earlier as we have seen both soybeans and wheat were primarily foods for the common people. But it was due to soybeans and wheat that a quiet culinary revolution began in Han China. By this I refer to the manufacturing of shih (salted, darkened beans) and the making of wheat flour.

"Shih is very popular in a vast area of China; especially among the rustic population leading a very simple life. It was almost the only relish they could afford to enjoy." Ssu-Ma Ch'ien mentioned shih as one of the products in the cities, so it must have been made in large quantities in his time. The *Ch'i Min Yao Shu* [pinyin: *Qimin Yaoshu*] gives the earliest known instructions for its preparation [S.H. Shih 1962, p. 861].

"In the learned opinions of K'ung Ying-ta of the T'ang and Chou Mi of the Sung, however, shih was invented sometime around 200 B.C. (*Tso chuan,* 49:542; Chou 1959 ed., 2:215). It had already become a basic condiment in the early Han, and it was on a very short list of food supplies that Prince Liu Ch'ang received from the government after his plot of revolution had been discovered (*Shih chi* 1, 2:364). The name *shih* even found its way into an elementary Han textbook, the *Chi-chiu p'ien*–an indication of its great popularity (K.W. Wang 1929 ed., 10 b; Y. Shen 1962, p. 66). Now with the excavation of the Ma-wang-tui Tomb No. 1, shih remains become a concrete archaeological fact for the first time (Hunan Sheng 1973, pp. 127, 138).

"The earliest bean curd is reported to have been made in the Han, but the textual evidence is too weak to support such a claim (C.P. Li 1955, p. 200)." Address: Prof. of History, Yale Univ., New Haven, Connecticut.

3644. **Product Name:** Tofu.
Manufacturer's Name: Boo Han Oriental Food Manufacturing.
Manufacturer's Address: South Tacoma Way, Lakewood, Washington.
Date of Introduction: 1977?
New Product–Documentation: Talk with Ed Elkin. 1991. Feb. 8. About 12-15 months ago Boo Han changed hands;

© Copyright Soyinfo Center 2013

it is now named Hang Yang, owned by Mr. Choy, a Korean-American, who does not speak English–although his brother does. Hang Yang is very aggressive and doing well; he just upgraded to a new tofu system. The company is at the same location it was when he purchased it from Boo Han.

Talk with Peter Lesser, founder of Pacific Soyfoods. 1991. Feb. 8. Starting in Feb. 1982 he began to buy okara from Mr. Boo Han, a Korean-American tofu maker located at something like 100 South Tacoma Way, Lakewood, Washington. Originally Mr. Han's shop was located in the back of his retail Asian food store. Then he moved it around the corner. He used a big old boiler. Peter has no idea when Mr. Boo Han started his tofu company. He still owns his retail store; he sold his tofu company. He speaks pretty good English.

In Feb. 1991, the phone directory has a listing for Boo Han Oriental Food Manufacturing, 9122 S. Tacoma Way, Tacoma, Washington. Phone: 206-588-7300. The owner's name is Mr. Boo-Nam Han.

3645. **Product Name:** Tofu.
Manufacturer's Name: Wo Hop Co.
Manufacturer's Address: 759 Clay St., San Francisco, CA 94108. Phone: 415-982-7176.
Date of Introduction: 1977?
How Stored: Refrigerated.
New Product–Documentation: Loetterle. 1977. California Living. April 17. p. 40.

Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 393. Owner: Unknown.

3646. *Los Angeles Times.* 1978. Energy, environment: The sale of Tofu soybean cake... Jan. 9. p. OC2.
• ***Summary:*** Made by Surata Soy Foods, a firm in Eugene, Oregon, where two employees have hepatitis, has led Oregon epidemiologists to warn consumers of the product to get gamma globulin shots to ward off the liver disease.

Officials contacted 47 young Quakers who ate the cake at a dinner on Dec. 30, while attending the Young Friends Gathering in Eugene. They also suggested protective shots for customers of the 28 grocery and health food stores, as well as restaurants, where the product was distributed. "Officials urged the stores to destroy inventories of the cake."

3647. Haddix, Carol. 1978. You'll feel a bit smarter at the Co-op. *Chicago Tribune.* Jan. 12. p. F3.
• ***Summary:*** The Hyde Park Co-op Super Market looks like any other supermarket, but you'll soon discover the many rows of "strange Oriental vegetables." The Japanese produce man will help you decipher the "strange names like bok toi [bok choy, bok choi], hakusai, cilantro, tofu, and wonton wrappers."

Two recipes are given. The one for Japanese beef sukiyaki calls for "½ cup soy sauce" and "½ soy bean cake [tofu], diced."

3648. Sheraton, Mimi. 1978. Restaurants: Up from Chinatown and hard by Regine's. *New York Times.* Jan. 13. p. C12.
• ***Summary:*** This includes a review of the Chinese restaurant Hee Seung Fung (H.S.F.) at 578 Second Ave. (between 31st and 32nd streets in New York's Chinatown). One of the recommended dishes is Clams or crabs with black bean sauce. The "braised bean curd in a dark sweet and pungent sauce was decent although its coating toughened in the braising."

3649. Haider, Vicky Chen. 1978. Openers: People, places, things we thought you'd like to know about. *Chicago Tribune.* Jan. 15. p. H4.
• ***Summary:*** "Kosher Chinese cooking classes." Kurt Youngmann, a Caucasian caterer of Chinese food, teaches this class, where "you can learn to concoct such appetizers as... deep-fried bean curd,..."

3650. Clark, Sandra. 1978. Higher education of a decadent cook. *New York Times.* Jan. 25. p. C3.
• ***Summary:*** A "Recent College Graduate" (RCG) arrives home for the holidays. It's 1978. She's hip, interested in new foodways, makes delicious stir fries, and eats with chopsticks. She takes the author (her mother) to Chinatown and introduces her to "the mysteries of sesame oil, bok choy (chinese cabbage) and tofu (soy bean curd). 'You change the tofu water every day, it'll keep.'"

Back in the home kitchen cooking, her mother offers her some "soy." "'Not that watery supermarket brine!' she scolds. She reaches into her backpack, produces a jar of something black, with a lotus blossom and haiku label. 'Tamari,' she informs me.

She teaches her mom how to grow sprouts in a Mason jar using alfalfa seeds and mung bean sprouts, how to rinse them twice a week, to re-oil the wok, and to change the tofu water.

3651. Wells, Patricia. 1978. How to increase nonanimal protein in the daily diet. *New York Times.* Jan. 25. p. C6.
• ***Summary:*** It is no accident that Mexicans eat corn with their beans, that Italians combine pasta with their beans, or that Japanese sprinkle soy sauce on their rice. These are all simple ways of "combining incomplete vegetable proteins to create a balanced protein." The idea of "complimentary protein" is not new, but it has been popularized by the book Diet for a Small Planet, by Frances Moore Lappe.

When baking, experiment with soy products. In recipes calling for 2 cups wheat flour, for example, use ¼ cup soy flour and 1 3/4 cups wheat flour.

© Copyright Soyinfo Center 2013

Gives 4 recipes, including: Leafy Chinese tofu (with sesame seeds, soy sauce, and brown rice). Vegetable rice curry (with soy grits and peanuts). Garbanzo spread.

3652. Ang, H.G.; Kwik, W.L.; Tan, S.F.; Theng, C.Y. 1978. Development of traditional and new soy products using defatted meal. In: American Soybean Assoc., ed. 1978. International Soya Protein Food Conference, Proceedings. Hudson, Iowa: ASA. 136 p. See p. 53-58.
• ***Summary:*** Contents: Abstracts. Introduction: Non-fermented products (soymilk, soybean curd, yuba), fermented products (soy sauce, soy cheese, tempeh), others (soybean sprouts, whole bean), soymilk and soymilk powder from defatted soymeal. Results and discussions: Preparation of soymilk powder. Conclusion. Address: Dep. of Scientific Services, Singapore.

3653. Aoki, Hiroshi. 1978. New soy protein food market and products in Japan. In: American Soybean Assoc., ed. 1978. International Soya Protein Food Conference, Proceedings. Hudson, Iowa: ASA. 136 p. See p. 66-69.
• ***Summary:*** Contents: Introduction. General survey of the new soy protein food products in Japan. Influence of the establishment of 200-mile economic zones. Utilization of new soy protein products for traditional soybean foods. Concluding remarks.

Chronology of new soy protein food development:

1955–Undenatured, solvent-extracted, defatted soybean flakes start to be produced for use in tofu production. These flakes became the bases if the new soy protein products in Japan.

1960–Defatted soy flour for bread and confections.

1961–Soy protein concentrates for fish products.

1962–Soy protein extracts for dairy and meat products.

1965–Soy protein isolates.

1970–Spun soy protein fiber, and textured and structured protein.

Soymilk, which has not been a real traditional food in Japan (unlike China) can be viewed as a new protein product. Though no commercial trials have yet succeeded, very recent test market trials made by several manufacturers of soymilk made from whole soybeans and also from soy protein isolates, seem to suggest some possibilities of success. Address: Otsuma Women's Univ., Tokyo, Japan.

3654. Asunaro Eastern Studies Institute. 1978. Now offering fall classes in traditional fermented foods: Miso, tamari, tofu, nato [sic, natto], sake, tekka, etc. (Ad). *East West Journal.* Jan. p. 82.
• ***Summary:*** Classes "taught by Naboru [sic, Noboru] Muramoto, author of *Healing Ourselves.* Also daily cooking classes. Located on 134 acres in Sonoma, California." For further information, send for brochure. An illustration shows the Asunaro logo. Address: 4600 Cavedale Rd., Glen Ellen, California 95442. Phone: (707) 996-9659 or 938-9846.

3655. **Product Name:** Tofu.
Manufacturer's Name: Bodhi Mandala Tofu Shop.
Manufacturer's Address: Box 8, Jemez Springs, NM 87025. Phone: 505-829-3854.
Date of Introduction: 1978. January.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owners: Bob Mammoser & Michael Arnold.

Talk with Martin Roth. 1989. Aug. 17. Martin went directly to the Bodhi Mandala Zen Center after he left Boston. He learned to make tofu at this shop in about January through March of 1979, and he ran the shop for a while. When he arrived, Sandy (the American abbot) and Suzanna were running the Center and also made tofu sometimes; they now live in North Carolina. He thinks the shop had been running for a year or two when he arrived. Barbara Svenning joined him at the Zen Center and they went on to Santa Fe.

3656. *Daizu Tanpaku Shinbun* (*Soy Protein Newspaper*). 1978. Sekai no tôfu ni. Amerika demo yasuuri ga [Tofu becomes internationalized. Even in America, bargain prices]. Jan. p. 5. [Jap]
• ***Summary:*** Sato Shoji's criticism of Soyfoods Center & Shurtleff.

3657. Fukushima, Danji. 1978. Fermented soybean protein foods in Japan. In: American Soybean Assoc., ed. 1978. International Soya Protein Food Conference, Proceedings. Hudson, Iowa: ASA. 136 p. See p. 39-42.
• ***Summary:*** There are three major kinds of fermented soybean foods in Japan: Shoyu, miso, and natto. "In Japan, about 439,500 tons of soybeans and defatted soybeans are used as the materials of these fermented soybean foods. Among these, 175,000 tons are used for shoyu, 195,000 tons are used for miso, and 69,000 tons are used for natto."

Table 1 shows the consumption of soybeans and defatted soybeans in Japan in 1976 for foods (1,026,000 tonnes) and feeds (1,980,000), for a total of 3,006,000 tonnes. Foods are divided into fermented (shoyu, miso, natto; 439,500 tonnes) and non-fermented (tofu and aburage, kori-tofu, and others; 586,500 tonnes). For non-fermented soyfoods 466,500 tonnes of soybean are used for tofu and aburage, 29,000 tonnes for kori-tofu, and 91,000 tonnes for other products.

"Recently, a new fermented drink using soybeans appeared on the market. This product is a drink which is made by the fermentation of soy milk by lactic acid bacteria. There are many patents related to these kinds of products, including a yogurt type, in Japan. Therefore many new fermented soybean foods may appear on the market in the

© Copyright Soyinfo Center 2013

future."

Other tables show: (2) Typical composition of different kinds of shoyu. (3) Annual production of purely fermented, semi-fermented, and chemical shoyu in 1976. (4) Annual production of Japanese Agricultural Standard mark shoyu in 1976. (5) Chemical composition of major types of miso.

Figures (flow sheets) show: (1) Shoyu manufacturing process. (2) Rice miso manufacturing process. (3) Natto manufacturing process. (4) Shoyu manufacturing process. Address: Noda Inst. for Scientific Research, Kikkoman Shoyu Co., Tokyo, Japan.

3658. Learning Tree (The). 1978. Make your own tofu at home–quicker and easier than baking bread! (Ad). *East West Journal*. Jan. p. 3.

• ***Summary:*** "The Learning Tree Tofu Kit contains: a 16-page booklet with recipes & instructions, a Philippine mahogany settling box, a pressing sack, cheesecloth, & enough natural Nigari solidifier for 10 batches of this practical gourmet food. An ideal gift for all your Natural Food friends. If you've never tasted homemade tofu, you've never tasted tofu! Available at your local natural food store, bookstore, or cookware shop, or send check or money order for $12.95 ($13.95 in Canada) to: The Learning Tree. The words "Tofu Kit" and those in the title of the ad are written in Cooper Black typeface, the same used for title of *The Book of Tofu*, by Shurtleff and Aoyagi. A photo shows three views of the kit (which was developed by Larry Needleman).

This ad also appeared in the following issues of this magazine: For 1978–Feb. (p. 21), April (p. 11), May (p. 41), June (p. 57), July (p. 76), Aug. (p. 14). Starting in Sept. 1978 (p. 18) the title was shortened to "Make your own tofu at home!!," with the word "HOME" written in large, bold caps. The prices were unchanged. This new ad also appeared in Oct. (p. 62), Nov. (p. 10), and Dec. (p. 69). For 1979–Feb. (p. 75), June (p. 14), Aug. (p. 66), Nov. (p. 68), Dec. (p. 4). For 1980: Jan. (p. 19) of this magazine. The kit now sold for $14.95.

Note: This is the earliest ad seen with the word "tofu" in the title. Address: Box 76, Bodega, California 94922.

3659. Shurtleff, William. 1978. Household preparation of winged bean tempeh, tofu, milk, and sprouts. In: 1978. The Winged Bean. Los Banos, Laguna, Philippines: Philippine Council for Agriculture and Resources Research (PCARR). xvii + 448 p. See p. 335-39. Jan.

• ***Summary:*** This book consists of papers presented at the 1st International Symposium on Developing the Potentials of the Winged Bean. Held Jan. 1978, at Manila, Philippines. Contents: Introduction. Homemade winged bean tempeh: Recipe, directions, polyethylene (plastic) bags, baking pans or pie tins, good tempeh, immature tempeh, inedible tempeh, troubleshooting (tempeh is too wet, mold is sparse and does not bind beans tightly, tempeh contains black spots or patches, tempeh smells strongly of ammonia, mold grew abundantly in some places but sparsely in others). Homemade winged bean tofu: Recipe, directions, troubleshooting (low yield, small curds or crumbly tofu texture, coagulant was insufficient). Homemade winged bean milk: Recipe, directions, honey-vanilla, rich and creamy, carob-honey, malt, mocha, or coffee. Homemade red winged bean miso. Homemade winged bean sprouts.

Note: This is the earliest document seen (Jan. 2011) that describes how to make tofu from winged beans (Kantha 1983). Address: New-Age Foods Study Center, 278-28 Higashi Oizumi, Nerima-ku, Tokyo 177, Japan. Phone: (03) 925-4974.

3660. Stein, Ellin. 1978. Making money making tofu. *Whole Foods* (*Berkeley, California*). Jan. p. 32-38.

• ***Summary:*** This multi-part article describes commercial operations at Farm Foods (San Rafael, California–"Down on the Farm"), Redwood Natural Foods (Santa Rosa, California), The Tofu Shop (Rochester, New York–"Hope in Rochester"), Surata Soyfoods (Eugene, Oregon–"Tofu Recipe Doubles in Oregon"), and The Soy Plant (Ann Arbor, Michigan–"Midwest Soy Plant Expects to Grow").

Note: This is the earliest document seen (Sept. 2011) that mentions "Surata Soyfoods," the first company with the word "Soyfoods" in the company name.

Part of the main article ("A Busy Grasshopper Waits for Profits") and a full-page sidebar titled "Making Tofu on Main Street" tells the story of Laughing Grasshopper Tofu Shop in Millers Falls, Massachusetts. "With *The Book of Tofu* as their guide, Ira and Kathleen Leviton founded the first occidental tofu shop in the northeastern USA in this sleepy papermill town in Aug. 1976. At the time the Levitons owned and operated Corn Creek Bakery in Greenfield, eight miles away, and they ran the two businesses until August 1977, when they closed Corn Creek due to a continuing labor dispute. Having formed a partnership with two men, Tom Timmins in August 1976 and Michael Cohen in February 1977, the Levitons found their 100 bread accounts quite eager to stock tofu. They are now producing over 800 pounds of tofu per day to service their 100 accounts... Grasshopper makes tofu with Prize variety soybean shipped from Iowa in trailer loads and stored in the plant...

"Fully believing that the tofu market can be doubled within the first quarter of 1978, Grasshopper is moving this month to a 3200-sq.-ft. plant in Greenfield that already offers a well-drained concrete floor... Tofu production will be upgraded with the installation of $5,000 worth of Japanese tofu machinery... Cohen estimates daily tofu capacity will increase to 1,600 pounds. 'As soon as we can,' says Cohen, 'we'll have not only tofu, but deep-fried age, soymilk–flavored and unflavored, tempeh, and soy "ice cream." We feel the market is at our fingertips. We've never taken the step into a serious sales campaign, but I think we will. So far,

© Copyright Soyinfo Center 2013

we make the soft tofu, we give the soft sell.'"

Note 1. This is the first issue of *Whole Foods* magazine. This is also the earliest article on soy seen (Aug. 2002) in *Whole Foods* magazine.

3661. Swan Food Corp. 1978. Swan Foods: Remember the name! (Ad). *Alternatives* (*Miami, Florida*). 2(1):1. Jan.
• ***Summary:*** This full-page black-and-white ad (see next page) lists the company's soy products, iced herbal beverages, and baked goods & pastries. Soy products include: Baked tofu, Marinated tofu, Caraway tofu, Tofu chip dip, Soy melk (sweetened & carob), Soy shakes (carob, vanilla & strawberry), Soyogurt (a cultured soy product), Wholegrain soy burgers. Baked goods include: Tofu cheesecakes, Carob maple swirl, Mary's cream cake, Mary's devil's food cream cake–"and more to come."

On the top half of the ad is a large circular logo featuring a stylized swan, with two large wings symmetrical about a vertical axis and an arched neck on the left side. The other half of the arch is drawn in to form a heart, inside of which is written "Because we love you." Across the inside top are the large words "Swan Foods." A full-color rainbow arches below them and over the swan. At the top center, between the words "Swan Foods," are the smaller words "Nature's Finest" written one below the other; between them is an infinity sign.

Across the bottom of the ad is written: "Every Swan Soybean Product contains all 8 essential amino acids (which are necessary for a balanced diet) and have no cholesterol. Available in health and natural food stores. Retailers: Swan Quality Products are distributed by your local Natural Foods Distributor, or contact Swan Food Corp., 5758½ Bird Rd., Miami, FL 33155. In Miami enjoy all Swan Products at Swan's Retail Deli & Bakery, The Soybeanery, 5758½ Bird Rd."

Note 1. This is the earliest ad seen for soyfoods in a U.S. magazine or periodical by one of the new generation of soyfoods manufacturers.

Note 2. In 1978 Alternatives (a small-circulation counter-culture magazine) was located at P.O. Box 330139, Miami, Florida 33133. Phone: 305-856-6975. Ad inquiries: 305-856-2473. Editor & publisher: Chik Shank. West coast contact: Steven M. Haines: 415-841-9217.

Note 3. This is the earliest known Swan Foods' ad published in *Alternatives* magazine–which began publication in August 1976. In May 1998 Jeanne Janson of Coral Gables (near Miami) checked every issue!

This full-page ad also appeared in the July/Aug. 1978 issue (p. 49) of this magazine. A half-page version of this ad appeared in the March, April (p. 45), May (p. 45, 49), June, September (p. 51), October (p. 51), November (p. 53), and December (p. 53) 1978 issues of this magazine. Thus Swan Foods has an ad (at least half-page in size) in every issue of *Alternatives* during 1978; then the ads disappear. Address: The Soybeanery, 5758½ Bird Rd., Miami, Florida, 33155.

3662. Wang, Jun Ryun; Lee, Yang Hee. 1978. Traditional soybean foods in Korea. In: American Soybean Assoc., ed. 1978. International Soya Protein Food Conference, Proceedings. Hudson, Iowa: ASA. 136 p. See p. 43-47. [13 ref]
• ***Summary:*** "The origin of soy sauce and paste in Korean literature dates back to 683 A.D. (Shinmu King 3rd year of the United Silla period). Since an old Japanese literature [document], *Hwameyruitsuroku* [*Wamyô Ruijusho;* Collections of Japanese Names, by Subject], of Heyan [Heian] records that 'Maljang (Meju) is a Korean soy sauce and paste' and a record on Maljang was also observed in the ruins of Nara, it is evident that soy sauce and paste were introduced from Korea to Japan during the Nara period (645-793 A.D.). Therefore, it is believed that the beginning of their consumption in Korea should be in the third century of Kokuryo period."

"Soybean has been a major protein source in the Korean diet." In 1976 some 442,803 tonnes (metric tons) of soybeans were used in Korea as follows: oil and defatted meal 28.5%, curd (*tubu,* or tofu) 24.5%, paste (*doenjang*) 18.3%, soy sauce (*kanjang*) 10.6%, soy sprouts (*kongnamul*) 9.0%, hot soy paste (*kochujang,* made from meju, hot pepper flour, and cooked glutinous rice) 6.6%, soymilk (*kongkuk*) 0.14%, and other 2.4%. Other includes roasted soy flour (*konggomul,* used for coating rice cakes [mochi]), fried tofu (*yubu*), salted natto paste (*jeonkukjang / cheonkukjang*). *Doebiji* is fresh soybean puree, made by grinding soaked soybeans. When used as a food, it is usually cooked with vegetables, kimchi, and meat. Meju is balls of soybean koji like Japan's miso-dama. All fermented Korean soybean foods except Joenkukjang are prepared from meju. Its characteristic flavor results from *Aspergillus, Penicillium,* and *Mucor* species of molds on the surface of the balls and *Bacillus subtilis* on the inside. Damsuejang is a quick fermented soy paste made by crushing meju to a powder, adding a warm brine solution, then allowing it to ferment and ripen.

Note: This is the earliest English-language document seen (March 2009) that uses the word "Damsuejang" to refer to Korean-style soybean paste (miso).

The above usage is the equivalent of 12 kg per capita per year. The daily per capita consumption of soy sauce (kanjang) is 20 ml, of soybean paste (doenjang) is 15 gm, and of hot soybean paste is 10 gm. Most of the soy sauce (64%), doenjang (82%), and kochujang (76%) and all of the salted natto paste (joenkukjang) and quick fermented soy paste (damsuejang) are produced at a household level and consumed directly.

Both soybean production and imports have grown in recent years. In 1970 production was 231,994 tonnes, and imports were 36,291 tonnes for a total of 268,285 tonnes. In 1976 production was 294,949 tonnes (up 27% over 1970),

© Copyright Soyinfo Center 2013

© Copyright Soyinfo Center 2013

and imports were 147,854 tonnes (4 times as much as in 1970) for a total of 442,803 tonnes (up 65% over 1970). Address: Korea Food Development Centre, Seoul, South Korea.

3663. Watanabe, Tokuji. 1978. Traditional non-fermented soybean foods in Japan. In: American Soybean Assoc., ed. 1978. International Soya Protein Food Conference, Proceedings. Hudson, Iowa: ASA. 136 p. See p. 35-38. [7 ref]
• ***Summary:*** Contents: Introduction. Tofu and deep fried tofu. Kori-tofu. Miscellaneous. Conclusion.

In 1960 soyfoods supplied 15.6% of the daily per capita protein supply of 69.4 gm. In 1975 they supplied 12.7% of the 78.8 gm. The leading sources in 1975 were (1) fish and seaweed, (2) rice, (3) soyfoods, (4) wheat. Address: Kyoritsu Woman's Univ., Hitotsubashi 2-2-1, Chiyoda-ku, Tokyo, Japan.

3664. Yu, Swee Yean; Ch'ng, Guan Choo. 1978. Soy bean foods in Malaysia. In: American Soybean Assoc., ed. 1978. International Soya Protein Food Conference, Proceedings. Hudson, Iowa: ASA. 136 p. See p. 48-52. [16 ref]
• ***Summary:*** Contents: Introduction. Fermented soya bean products: Soya sauce (manufacture of 'thin' (dilute) soya sauce, manufacture of 'thick' (viscous) soya sauce, microbiology of Malaysian soya sauce, stability of the product), tempeh, tau cheo (thick paste-like sauce), tao si (fermented black soybeans). Non-fermented soya bean products: Soya bean sprouts, tofu (semi-firm curd), tofu fah (soft curd), tow kwa (firm curd), tin chok (dried, flat sheets [yuba]), fu chok (dried, rope-like [dried yuba sticks]), tofu pok (deep-fried curd [tofu cubes]), chak tie (vegetarian [yuba] sausage), soya bean milk (tau cheong), meat analogues (soya flour is shaped into desired forms by hand). Nutritional data. Conclusion. Address: Universiti Pertanian Malaysia, Serdang.

3665. Ferretti, Fred. 1978. Scrutinizing Chinese food. *New York Times.* Feb. 1. p. C6.
• ***Summary:*** This is a review of the book *The Scrutable Feast*, by Dorothy Farris Lapidus, who speaks Chinese, and who has created this book "out of her determination not to be dominated by Chinese restaurant menus."

The book discusses "Ma Po style bean curd, a dish of ground pork and bean curd, so called because Ma Po literally means pockmarked old woman."

To illustrate: "chicken, page 38, no. 27, is stir fried with bitter melon and a touch of black bean paste;..."

3666. Hansen, Barbara. 1978. A Chinese New Year menu for the Year of the Horse. *Los Angeles Times.* Feb. 2. p. 11.
• ***Summary:*** "Most of the dishes are symbolic, signifying prosperity, health, good business and smooth sailing, all worthy goals for the year 4676" [so the Chinese calendar apparently started in 2698 BCE].

"Eight Treasures Vegetables," seems to guarantee both wealth and health. The "treasures" include bean sprouts and "shredded pressed bean curd cake" [shredded pressed tofu]. "Soybean sprouts are used rather than the usual mung bean sprouts, as the Chinese consider them to be especially rich in vitamins."

Hunan-style steamed fish was seasoned with "fermented black beans, chopped chile, ginger, and garlic..."

3667. Hughes Markets. 1978. Brand names you know and trust (Ad). *Los Angeles Times.* Feb. 2. p. OC_D23.
• ***Summary:*** The section titled "Foods of the Orient" includes: "JFC Kinako 7 oz. pkg. Soy bean flour–39¢." "In our fresh produce dept. Age [Deep fried tofu pouches] pkg. 69¢."

Also includes: Minoya ajitsuke nori 0.3 oz. Seasoned seaweed–79¢. JFC mung beans. Han Sing ginseng tea. N.S.S. 3 oz. pkg. Demae ramen–6 for $1.00.

3668. Clough, Jean. 1978. Kitchens that dish up naturally good food. *Chicago Tribune.* Feb. 3. p. A1.
• ***Summary:*** The Plowshare Cafe (6155 N. Broadway) serves macrobiotic food and is also a health foods store. They use foods grown locally, in season. In addition, all meat, dairy products, tropical fruits, most sweeteners, and many spices are not served. The Macro-plate ($2.50) includes brown rice, miso soup and sea vegetables. Miso "is a black creamy paste made of fermented soy beans." The sea vegetables included hiziki seaweed in tamari sauce. Also offered was a sandwich with seitan (made of gluten), "tofu, soy mayonnaise, sesame seeds, carrots, and natto miso, a less-aged miso that includes barley and ginger. Its a granular to be sprinkled on rice or sandwiches."

New Earth Cafe and Mama Peaches are also vegetarian restaurants. Address: Dr.

3669. *Chicago Tribune.* 1978. Topping the most-wanted ethnic list. Feb. 9. p. N_A8 or W_A8.
• ***Summary:*** Kurt Youngmann, who runs The Meanderin' Mandarin catering service plus innovative cooking classes (in his kitchen or in theirs), emphasizes that "No Chop Suey type dishes are taught here." Among the dishes you can learn how to make are "deep-fried bean curd."

3670. New England Soy Dairy Inc. 1978. Re: Announcing opening of New England Soy Dairy, Inc. Letter to customers and friends of the business, Feb. 17. 2 p. Typed, with signature on orange letterhead. [1 ref]
• ***Summary:*** "Dear friends. We are pleased to announce the opening of the New England Soy Dairy, Inc... As soon as we can hook up our deep fryer and practice making agé and agé pouches, we'll add them to our list of products... We have

© Copyright Soyinfo Center 2013

ordered a packaging machine that is scheduled to arrive in a few weeks." The company will then start making packaged tofu (now it is all sold in bulk), and may begin producing hard tofu (doufu), tofu pudding, and bottled soymilk. "The possibilities for freshly made soybean products seem almost endless. We are experimenting with a soy ice creme, and with miso. We'd really like to start producing tempeh this autumn... Our tofu price will remain at $0.44/lb to retailers." The company plans to pick up its first two distributors: Homestead Trading Co. and nearby Llama.

Shurtleff and Aoyagi, and their *Book of Tofu* and *Book of Tempeh* are mentioned in the letter. At the end: "Soy to the world, (Thanks to Akiko Aoyagi for the drawings)." A handwritten note at the end reads: "Bill & Akiko, We sent this around to our customers. We're still reading the B.ofT. [Book of Tofu]. Tom Timmins. P.S. Come visit us next time you're East."

Note: This is the earliest English-language document seen (March 2013) that contains the phrase "Soy to the world." Inspired by the new phrase, Akiko Aoyagi designed a wreath to send out with Bill and Akiko's Christmas cards later that year. Address: 305 Wells St., Greenfield, Massachusetts 01301. Phone: (413) 772-0746.

3671. Oberg, Elmer B. Assignor to Paul Taylor Company (Pasadena, California). 1978. Process for preparing stable full fat oilseed extract. *U.S. Patent* 4,075,361. Feb. 21. 8 p. Application filed 26 Nov. 1976. [6 ref]
• ***Summary:*** A full fat, stable food material derived from oilseeds is prepared by comminuting oilseeds in the presence of a hot (at least 180ºF, ideally near boiling) alkaline extract solution (preferably sodium hydroxide, with pH about 8), and then allowing the comminuted seeds to soak in the solution for about 3-7 minutes. After neutralizing the solution with preferably hydrochloric acid, the extract is clarified (centrifuged; the fiber is discarded) and heated to destroy anti-nutritional factors, concentrated, and spray dried. An illustration shows the required equipment. Address: Camarillo, California.

3672. *Toyo Shinpo* (*Soyfoods News*). 1978. Aamondo iri tôfu seeru de honkaku hatsubai: Kakihara Jôzô. Aitsugu shinshutsu, ninki yobu aamondo seihin [A start of full-blown sale of tofu with almonds: Kakihara Jôzô. One after another coming out with popular almond products]. Feb. 21. p. 3. [Jap]
• ***Summary:*** Kakihara Jozo is one of Japan's oldest natto makers. In the spring of 1977 they started making natto with almonds mixed in. The almonds improve the flavor of natto by reducing the strong smell. The company adds 10-15% almonds by weight in small chunks. 100 gm (regular size) retails for 85 yen, whereas 50 gm (mini size) retails for 40 yen.

The consumption of natto in the Kansai region (Kyoto–Osaka–Kobe) is only about 10% as much as in the Kanto region (Tokyo–Yokohama).

This company used to make shoyu, but they quit making shoyu and started to make miso and natto. Photos show: (1) A man. (2) Various natto products.

3673. Hansen, Barbara. 1978. The lure of fish undiminished despite the cost: Higher prices for high protein. *Los Angeles Times.* Feb. 23. p. G1.
• ***Summary:*** "In China, the cheeks of the fish are considered a delicacy. And a fish head is the main ingredient in dishes such as steamed fish head with salted black beans and a fish and bean curd [tofu] casserole."

Address: Dep. of Nutrition and Food Science, MIT, Cambridge, Massachusetts 02139.

3677. **Product Name:** Tofu.
Manufacturer's Name: Madison Tofu Co-op. Renamed Bountiful Bean Plant Soyfood Cooperative in 1979.
Manufacturer's Address: 903 Williamson St., Madison, WI 53703. Phone: 608-251-0595.
Date of Introduction: 1978. February.
Ingredients: Water, organic soybeans, calcium sulfate, nigari (magnesium chloride) (1987).
Wt/Vol., Packaging, Price: 16 oz.
How Stored: Refrigerated.
Nutrition: Per 4 oz: Calories 96, protein 11 gm, carbohydrates 1 gm, unsaturated 6 gm, sodium 17 mg, calcium 229 mg, iron 2 mg.
New Product–Documentation: List of tofu makers that attended the First Soycrafters Conference in Ann Arbor, Michigan. 1978. July 28-30.

Ann Rundell. 1978. *Wisconsin State Journal.* Sept. 10. "Cheese-like tofu is high in protein." Lora Mermin was introduced to tofu in Japan in 1968. Then Madison got its own tofu shop [in Feb. 1978] at 903 Williamson St. When the little co-op started to falter in June, Mermin contributed financial support. Now she works there daily with Debra Bachmann, Chris Burant... The name of the shop was recently changed to The Bountiful Bean Plant.

Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 399. Owner: Lora Mermin. "Madison Tofu Co-op, 903 Williamson St."

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). "Bountiful Bean Plant, 903 Williamson St." Contact: Chris Burant.

Ellen Porath. 1980. The Register (Madison, WI). Oct. 19. "Tofu makers predict boom for lowly soybean curd." The company was started in a cramped East Side building in 1978. Debra [Deborah] Bachmann and Chris Burant took it over 2 years ago. At that time they made 200 lb/week of tofu. Now they make 1,200.

Talk with Deborah Bachmann. 1987. Dec. 29. The company started in Feb. 1978. She and Chris Burant came during that year. She is leaving now. They presently make 2,000 lb/week of tofu. Their historical peak was about 2,500 lb/week after the summer of 1985 when they briefly took over markets vacated right after Magic Bean went out of business. The company is strong and growing slowly. The new contact is James Lubbe, 2049½ Atwood Ave., Madison, WI 53704. Phone: 608-241-8700.

Letter/Order for the book pamphlets on tofu, tempeh, and miso from "Bountiful Bean Plant." 1979. Sept. 20. The company is located at the address shown above.

James Lubbe. 1988. March. Abbreviated History of the Bountiful Bean. In 1978 the tofu was sold only in bulk, for $64/lb. It was made in a 4-burner cooker, with body weight for the okara press. In 1979 they opened a small deli in the from of the plant; it expanded greatly during the next few years until it was closed in October 1983. At that time they started to sell packaged tofu at $0.85/package. On 16 July 1984 the company moved to 2049½ Atwood Ave. in Madison. Phone 608-241-8700. The letterhead reads: Fresh tofu and soyfoods. Worker owned and managed. All labels were re-designed and reprinted in 1985 to reach wider markets, including supermarkets. Label. 1985. Tofu. 4 by 4.5 inches. Light blue, dark blue, and green. Printed on clear film.

Talk with Deborah Bachmann. 1990. Nov. 27. In March 1990 the company moved from Madison to Ridgeway, Wisconsin, but they have had trouble finding people to make tofu at minimum wage. So two weeks ago the owners of the cooperative decided to sell it.

Talk with R. Jay Gruenwald of Simple Soyman. 1991. Jan. 24. The Bountiful Bean is now for sale.

Label sent by Elizabeth Hanson of Bountiful Bean. 1991. Nov. 12. Same label as above, but company is now located in Ridgeway, Wisconsin 53582.

Letter from Deborah Bachmann. 1991. Dec. 17. In 1979 the company's name was changed from Madison Tofu Co-op to Bountiful Bean Plant Soyfood Cooperative. Since then, there have been no official name changes. In 1987 the designed the "BB" logo and shortened the name to Bountiful Bean on stationery and labels only.

3679. Photograph of four members of The Soy Plant collective, with company sign and logo, as they moved into a new location at 211 East Ann St., Ann Arbor, Michigan. 1978. Ann Arbor, Michigan.
• ***Summary:*** This black-and-white photo (5 by 7 inches; see next page) shows four people (left to right): Jerry MacKinnon, Sue Kalen, Steve Fiering, and Larry (surname unknown). They are standing on both sides of a large round sign that reads: "The Soy Plant–Soy Dairy." They are standing outside, by a brick-walled building, near the door at 211 East Ann St. At the center of the sign is an illustration of two soybean plants growing out of Planet Earth. Steve Fiering conceived of and designed the logo of "soybeans supporting the world." The artwork was done by Marge Bruchac, with Sue Kalen.

3680. Shumway, Bill. 1978. A chunk of the Orient. Promoting the lowly bean. *Recorder* (*Greenfield,*

© Copyright Soyinfo Center 2013

Massachusetts). Feb.
• ***Summary:*** Discusses the New England Soy Dairy, which moved to Greenfield on 1 Feb. 1978. The company incorporated, and invested $40,000 to $50,000 in new Japanese equipment and remodeling, according to sales manager Steven Hassell. There are now 8 stockholders in the corporation.

"The dairy distributes much of its product in Massachusetts, with Boston buyers accounting for one-third of the firm's business. Llama Trading Co., of Greenfield, distributes to northern New England, and two other distributors cover New York state, Maryland and Pennsylvania. Most of the tofu is sold in health food stores, primarily because it is sold in bulk...

"Foster's is the only traditional area food store that sells the product. A new individualized packing machine will help the dairy penetrate the chain-store market, Hassell said." A photo shows Shohaku Okumura cutting tofu.

3681. *Sunset* (*Menlo Park, California*). 1978. This delicious fruit cheesecake isn't cheesecake... it's *tofu* cake. 160:134. Feb.
• ***Summary:*** "Make your friends guess why this banana-pineapple cheesecake is so smooth and creamy. Instead of cream cheese, it's made with tofu, or soybean curd: high in protein, low in cholesterol, and only about 200 calories a serving. It's actually good for you, and the subtle flavor blends well with the sweet bananas and pineapple." Gives a recipe for Tofu banana-pineapple cheesecake. It has a graham cracker crust and contains 2 eggs and ½ cup packed brown sugar. The ingredients are pureed in a blender, and the cake is baked.

3682. **Product Name:** [To Fu: Fresh Soya Bean Curd].
Foreign Name: To Fu: Caillé Frais aux Fèves de Soya.
Manufacturer's Name: Victor Food Products, Ltd.
Manufacturer's Address: 102 Hymus Rd., Scarborough, ONT, M1L 2C9, Canada. Phone: 416-752-0161.
Date of Introduction: 1978. February.
Ingredients: Soya bean, water, calcium sulphate: Feves de soya, eau, sulfate de calcium.
Wt/Vol., Packaging, Price: 500 gm packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.
How Stored: Refrigerated.
New Product–Documentation: Richard Leviton. 1980. Soyfoods. Summer. p. 17-18. "Soyfoods in Toronto." Stephen Yu "opened his factory in 1978, with an initial daily production of 900 pounds of tofu."

Leviton. 1981. Soyfoods. Winter. p. 55. A black-and-white photo shows "VFP Tofu" on sale in Canada.

Joanne Kates. 1985. Globe & Mail (Toronto, ONT, Canada). 1985. Oct. 4. "Tofu for a Small Planet."

Label. 1983-84. 5 by 4.25 inches. Green and orange. Printed on clear plastic film. Written in both English and French The product name is spelled "To Fu." "Keep refrigerated."

New label. undated. 5 by 4.25 inches. Green, orange, yellow, and white. Printed on clear plastic film. Written in both English and French. The product name is now written "VFP Tofu." With the product comes a recipe sheet (5.5 by 8.5 inches; date coded 81-1), folded into eighths, and packed inside a sealed plastic envelope. It contains recipes for Tofu Eggless Salad, Tofu Mayo, and Cauliflower with Tofu Lemon Cream. Kathleen O'Bannon is listed as the company's nutrition consultant. The company also has a sheet of tear-off recipes. On one side are serving suggestions for tofu and recipes for Tofu meat loaf, scrambled tofu & eggs, and Sweet tofu topping. The other offers a 30% discount on Christina Clarke's book "Cook with Tofu."

Talk with Stephen Yu. 1990. March 5. He started making soyfoods in Feb. 1978. His first three products were tofu, tofu pudding (daufu-fa), and soymilk.

Note: This is the earliest record seen (Feb. 2010) concerning Victor Food Products Ltd. (Scarborough, Ontario, Canada).

3683. **Product Name:** Tofu Pudding (daufu-fa), and Soymilk.
Manufacturer's Name: Victor Food Products, Ltd.
Manufacturer's Address: 102 Hymus Rd., Scarborough, ONT, M1L 2C9, Canada. Phone: 416-752-0161.
Date of Introduction: 1978. February.
New Product–Documentation: Talk with Stephen Yu. 1990. March 5. He started making soyfoods in Feb. 1978. His first three products were tofu, tofu pudding (daufu-fa), and soymilk.

3684. Westbrae Natural Foods. 1978. Price list [Catalog]: February 1978. Emeryville, California: Westbrae. 20 p. 26 cm.
• ***Summary:*** On the cover are a black plum blossom logo and a large, bold double "W" in calligraphy near the bottom against a gray background.

Interesting products: Natural fruit butters and unsweetened fruit spreads. Four types of granola and two trail mixes. Panda snacks: Tamari almonds, Tamari cashews, Tamari nut roaster's mix, Tamari sunflower seeds, White water trail mix (tamari roasted). Westbrae roasted nuts (25 lb boxes): Tamari almond, Tamari cashew pieces, Tamari valencia peanuts, Tamari nut roaster's mix, Tamari sunflower seeds, Tamari pepitas (pumpkin seeds), Tamari filberts. Tamari nut butters (12, incl. almond, 6 peanut, and sesame tahini). Whole wheat soy pasta.

Asian foods & sea vegetables: Miso (red miso, brown rice miso, barley miso, Hatcho miso, soybean miso, light yellow miso, natto miso). Miso made in the United States: Light yellow, mellow white, red, mixed case. Sea vegetables: Agar, dulse (whole or flakes / powder), sea palm, nori, arame, hijiki, kombu, wakame. Shoyu and shoyu products: Josen shoyu, Sendai shoyu, White Tiger Tofu Sauce. Nigari. Kudzu. Umeboshi. Toasted sesame oil. Helpful tools: Wok (11 inch), vegetable brush, glass shoyu dispenser, Tofu kit, Tempeh kit, rice koji (Cold Mountain brand made by Miyako Oriental Foods). Beans: Azuki (10 lb or 25 lb bag), soybeans (60 lb or 25 lb), soy grits raw. Publications: Includes four books and 3 pamphlets by Shurtleff and Aoyagi.

Note: The products in this catalog do not require refrigeration; they contain no refined sugar / white sugar, no meat, and no dairy products–just like the catalogs of almost all other natural food distributors during the 1970s and 1980s. Address: 4240 Hollis St., Emeryville, California 94608. Phone: (415) 658-7518 (order) or 7521 (office).

3685. *Toyo Shinpo* (*Soyfoods News*). 1978. Nattô seizô sôchi no gôrika (Jô). I. Nattô to sono seizô setsubi. Nattô Sanbyakuchin [Making nattô making equipment to be more rational and streamlined. I. Nattô and its production equipment. 300 Unique Natto Recipes]. March 11. [Jap]
• ***Summary:*** *300 Unique Natto Recipes* is a new cookbook, which includes some natto history. A restaurant specializing in natto, having a repertoire of over 300 dishes, is Hotel Sun Route in Awamori. They serve only natto dishes. The owner, Mr. Isamu Naraoka, loves natto and has been developing these recipes for the past 10 years. Examples include: Yamakake ryori, makimono ryori, nimono ryori, mushimono, mizumono, Pikata-fu, agemono, and nabemono ryori.

3686. Salao, Andy. 1978. Meet the tofu master [William Shurtleff]. *Expressweek* (*Manila, Philippines*). March 16. p. 31.
• ***Summary:*** Tofu master William Shurtleff, a 37-year-old American, is recognized in the US and Japan as one of the leading authorities on natural foods. He visited the Philippines at the International Conference on the Winged Bean held in January, 1978, and "went all the way to Quezon City to see the factory, which is operated by Cherry Food Industry. Its manager, Aida Yu, was thrilled to meet the tofu master." The company manufactures Nippon Tofu, which is made from thick soymilk and packed in a thick-walled polyethylene container, which is thermally sealed and will keep for 2-3 months. Contains a brief biography of Shurtleff and numerous extracts from *The Book of Tofu.* A photo shows Shurtleff looking at the company's tofu equipment.

3687. *Town Crier* (*Greenfield, Massachusetts*). 1978. Tofu manufacturing plant opens. 12(3):1-2. March 22.
• ***Summary:*** "The New England Soy Dairy, 305 Wells Street, in Greenfield, has opened the doors on its new manufacturing plant... The firm has recently completed a long-projected expansion into more spacious and efficient facilities where it utilizes special tofu-making equipment imported from Japan enabling the company to produce nearly 10,000 pounds of tofu every week. The Soy Dairy ships this out all across New England, New York City, and Pennsylvania." The tofu, which retails for about $0.75/lb is "made from organically grown soybeans, water, and nigari, a coagulant extracted from seawater...

"The company uses the term 'dairy' to indicate its intention to provide a full range of alternative dairy-like products all derived from soybeans, including ice cream, yogurt, cream cheese, mayonnaise, whipped cream, tartar sauce, plain and flavored soymilk. In addition, other less familiar items will be introduced, such as miso soy bean paste, deep-fried tofu, and a fermented product, called tempeh. The Dairy operates at a medium level of technology, fusing traditional hand craftsmanship with modern labor saving equipment."

"The company is open Monday through Saturday, 8 a.m. to 6 p.m. and visitors are welcome." A photo shows Kathy Whelan Leviton cutting a large sheet of tofu into cakes.

3688. Asunaro Eastern Studies Institute. 1978. School of Oriental medicine and traditional fermented foods (Leaflet). Glen Ellen, California. 2 panels each side. Each panel: 22 x 14 cm. Undated.
• ***Summary:*** Printed with dark brown ink on tan paper. Classes "taught by Naboru [sic, Noboru] Muramoto." Schedule: (1) Oriental medicine classes. April through September. Monday, Wednesday, Thursday, Friday. 7:30 to 9:30 p.m. (2) Daily cooking classes. (3) Traditional Fermented Food Preparation. Monday, Wednesday, Thursday, Friday, beginning at 9:00 a.m.

"Asunaro Eastern Studies Institute is a newly-established non-profit educational organization..." Located at Top of the World Ranch, it "is 140 acres of forest and open fields with two ponds and four springs and a large 3-level building. The Ranch is located in the Sonoma Mountains (elev. 2,200 feet) overlooking San Pablo Bay."

"Classes in natural food making (miso, tamari, shoyu, sake, natto, tofu & bran pickles) are conducted from 9 a.m. until completed during the cooler months of the year (October through March). This time is ideal for fermentation processes..." Address: 4600 Cavedale Rd., Glen Ellen, California 95442. Phone: (707) 996-9846.

3689. Leviton, Richard. 1978. How to start a small scale tofu shop. Purchased for $1,000 by Mother Earth News but never published. 20 p. Unpublished manuscript. [1 ref]*
Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

3690. **Product Name:** Tempeh.
Manufacturer's Name: Soy Plant (The).
Manufacturer's Address: 211 East Ann St., Ann Arbor, MI 48104. Phone: 313-663-8638.
Date of Introduction: 1978. March.
Ingredients: Organic soybeans, vinegar, Rhizopus oligosporus culture.
Wt/Vol., Packaging, Price: 8 oz.
Nutrition: Per 100 gm: Calories 157, protein 19.5 gm, fat 7.5 gm, carbohydrates 9.9 gm, calcium 142 mg, iron 5 mg.
New Product–Documentation: Letter from Steve Fiering. 1978. Oct. 2. A 5-page detailed description, including equipment and process, of how The Soy Plant makes tempeh.

Letter from Steve Fiering. 1979. Undated. A 3-page handwritten description of photos showing how The Soy Plant makes tempeh. Letter from Steve Fiering. 1979. Oct. 22. A 2-page typewritten description of how The Soy Plant makes tempeh.

Shurtleff & Aoyagi. 1979. The Book of Tempeh. p. 148. Made by Steve Fiering. Steve Fiering. 1979. Whole Foods. Jan. p. 38, 40. "A Midwestern Interest in Tofu." This is included in a list of products presently produced by the company.

Letter/Order for *The Book of Tempeh* from Kurt Getman of Frog Farm Tempeh (Soy Plant). 1979. Aug. His address is 5177 Grand River, Fowlerville, Michigan 48836. Two rectangular Labels in Soy Plant scrapbook. 1980. 6 by 4½ inches. Purple on white. Square Labels in Soy Plant scrapbook. About mid-1980. 4½ inches square. Black on white. The soy plant logo is near the bottom of a rayed V inside a circle. Written across the top of the circle: "Keep frozen. Thaw only portion used." No address is given.

Soyfoods Center Computerized Mailing List. 1981. Jan.

22. Owner: Kurt Getman. Listed at 771 Airport Blvd. #1. Label. 1981, undated. Yellow, purple and green on white. The company name is given as "The Soyplant Co-op Inc.–A people's business."

Talk with Steve Fiering. 1988. June 10. This was the company's fourth commercial product. In January 1978 we moved into the shop at 211 E. Ann St. and within a couple of months we built a small incubator and started making tempeh.

3691. **Product Name:** Dofu-Gan (Firm Tofu Simmered in a Marinade). By 1980 subtitled Savory Baked Tofu.
Manufacturer's Name: Soy Plant (The).
Manufacturer's Address: 211 East Ann St., Ann Arbor, MI 48104. Phone: 313-663-0500.
Date of Introduction: 1978. March.
Ingredients: Water, organic soybeans, nigari, soy sauce, honey, garlic, spices.
How Stored: Refrigerated.
New Product–Documentation: Label. 1980. for Dofu Gan. Savory Baked Tofu. 2 by 3 inches. Black on white. "Slice and serve with crackers, sandwiches, or salads." Company name is given as Soyplant Co-op Inc. at 211 East Ann St.

Talk with Steve Fiering. 1988. June 10. This was the company's third commercial product. "There was a Chinese guy who worked with us, whose first name was Lee and who had a recipe for this product. He cooked very firmly pressed tofu in a marinade. It was sold in the deli, which was our company's Ann Street location. The first location was a room in the basement of a restaurant called Eden's." Soyplant. 1984. Produce co-op price list–Delivered. Effective April 30, 1984 and subject to change. Lists Dofu Gan savory baked ($1.92/lb).

3692. Timmins, Tom. 1978. New England's Laughing Grasshopper tofu shop. *Soycraft* (*Lawrence, Kansas*) 1(2):1-3. Winter (March).
• ***Summary:*** An excellent description, with many technical details of the process and equipment, of how tofu is made and marketed at Laughing Grasshopper. The company is now producing 5,000 to 5,500 lb/week of nigari tofu. They buy nigari from both Erewhon Inc. (a direct importer) and Westbrae. Address: Laughing Grasshopper, 3 Main St., Millers Falls, Massachusetts 01349.

3693. Snedaker, Kit. 1978. Tofu, the once and future, universal Oriental protein. *Los Angeles Herald Examiner.* April 5. Food section. p. C-1, C-4. Wednesday.
• ***Summary:*** A good introduction to tofu. Includes a brief description of making tofu at home, which she notes is explained in detail in *The Book of Tofu,* by Shurtleff & Aoyagi. Address: Food editor.

3694. Kim, Myung Ki; Lugay, Joaquin Castro. Assignors to General Foods Corp. (White Plains, New York). 1978. Fibrous protein materials. *U.S. Patent* 4,084,017. April 11. 8 p. Application filed 16 June 1976. [6 ref]
• ***Summary:*** Describes "a method for producing fibrous protein materials useful for fish analogs. According to this method, an aqueous mixture of a heat coagulable protein is frozen by cooling the mixture in a manner and at a rate effective to produce elongated ice crystals generally aligned perpendicular to the surface of cooling, then subjected to a temperature substantially different from that of the frozen mass, and the protein in the frozen mass is then stabilized effectively to preserve its structural integrity during subsequent heating to set the protein." Soybeans are the main protein source used. Address: 1. Congers, New York; 2. Thornwood, New York.

3695. *Los Angeles Times.* 1978. Mock eggs: One dish on a menu for health. April 20. p. G25.
• ***Summary:*** Jacqueline Kazarian, a homemaker who promotes a "total way of life" that includes good health, "demonstrates a low-cholesterol, low-fat, and low-salt dish that looks and tastes somewhat like scrambled eggs, but actually is made with nutritious tofu (soy bean curd)." A large photo shows her scrambling the tofu.

3696. Hundley, Kris. 1978. Tofu: Cheap high-protein wonder. *Daily Hampshire Life, Northampton Gazette* (*Massachusetts*). April 22. p. 21.
• ***Summary:*** About Laughing Grasshopper Tofu Shop and the New England Soy Dairy. Photos show Tom Timmins, David Kilroy, Jon Lee, and Ira Leviton each involved in some part of the tofu-making process. Last February the company's owners "opened New England Soy Dairy at 305 Wells Street in Greenfield. Now, special equipment imported from Japan enables the company to produce nearly five tons of tofu each week." The company now employs 16 people.

3697. Shurtleff, William. 1978. Re: Interest in the history of the soybean. The new term "soyfoods." Letter to Ted Hymowitz at the University of Illinois, April 25. 1 p. Typed, with signature on letterhead.
• ***Summary:*** "Immediately after receiving you request, we wrote a letter (in Japanese) to Dr. Norihiko Kaizuma asking for copies of the reprints you had mentioned. After one month had passed and he had not replied, I telephoned him. He apologized profusely, said he was extremely busy (and for that reason had not written you either), but would send us the publications immediately. They arrived yesterday and I read them with great interest...

"We have just received word from our publisher that Ballantine Books has contracted to do a mass-market edition of our *Book of Tofu* with a first printing of 175,000. Fortunately I am permitted to make extensive changes and I plan to completely rewrite the section on the history of

© Copyright Soyinfo Center 2013

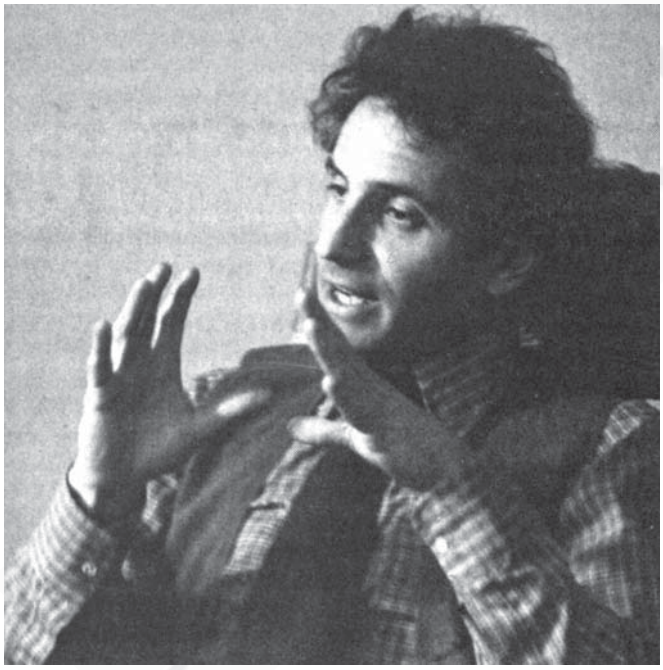
the soybean using your and Dr. Kaizuma's excellent new material to supplement our former account based almost entirely on legend and hearsay...

"Like you, I am fascinated with the history of the soybean and with its uses as food, both in the past and as a major potential source of low-cost high-quality protein for people around the world. My wife, Akiko, and I have a great love for traditional soyfoods (please note this interesting word) and make them a key part of our daily meals; our guests here are regularly amazed at how delicious such preparations can be..."

Note 1. This is the earliest document seen (Sept. 2011) that contains the word "soyfoods."

Note 2. With a previous letter, probably written in late 1977, Dr. Hymowitz had sent, at Shurtleff's request, a list of the scientific names and common English names of 28 edible grain legumes and 4 non-grain legumes. Shurtleff used this list in his forthcoming *The Book of Tempeh* (published July 1979). Address: New-Age Foods Study Center, 278-28 Higashi Oizumi, Nerima-ku, Tokyo 177, Japan. Phone: (03) 925-4974.

3698. Goldman, Sherman; Smith, Tyler. 1978. The two worlds of a small publisher: An interview with Nahum and Beverly Stiskin. *East West Journal.* April. p. 67-69.



• ***Summary:*** Nahum and Beverly Stiskin traveled to Japan and founded *Autumn Press.* "Over the last two years, EWJ has excerpted several of their remarkable books, including *The Book of Tofu, The Book of Miso,* and *The Book of Kudzu* [by Shurtleff & Aoyagi] which bring the world of the Orient to a new generation of modern Western readers, cooks, and healers."

The Stiskins established Autumn Press by publishing *Looking Glass God* which Nahum wrote after arriving in Japan in 1969. They borrowed money from their family and had the first edition printed by a local Japanese printer. Then they worked with Lima Ohsawa on her *Art of Just Cooking.*

For the first four years the company grew slowly, blunder by blunder. They both had to take other jobs in order to support themselves. Both their families felt they were making a great mistake by publishing books on subjects of little interest. But they were trying to contribute to a renaissance they saw happening. Their books deal with both theory and practice, from a wholistic perspective, and they try to address major issues confronting humans and society. They published feminist poetry by Ellen Bass and poems by the Korean dissident Kim Chi Ha.

The Book of Tofu has been Autumn Press' biggest success, with 90,000 copies in print after two years. Nahum believes that introducing tofu to the United States "is going to prove truly revolutionary. I think we see that revolution going on around us." Both are working to change the world. Four photos show Nahum Stiskin; one shows Beverly. Address: 1. Editor; 2. Contributing editor.

3699. **Product Name:** Nasoya Organic Tofu (Water Pack).
Manufacturer's Name: Nasoya Foods.
Manufacturer's Address: Mechanic St. Ext. (P.O. Box 841), Leominster, MA 01453. Phone: 617-537-0713.
Date of Introduction: 1978. April.
Wt/Vol., Packaging, Price: First bulk packed in water, then water packed in molded plastic trays, then vacuum packed, finally water packed in trays again.
How Stored: Refrigerated.
New Product–Documentation: Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 396. Owner: John Paino and Bob Bergwall.

Ad in Order of the Universe. 1979. No. 52. Autumn/winter. p. 21. "Tofu. Get the pick of the crop. Nasoya–Traditional firm tofu. Made with untreated, deep well water and using organically grown soy beans, stone ground just prior to cooking in large open cauldrons–a traditional firm tofu. Great for: Miso soups, salad dressings, stir-fried vegetables, baked dishes & vegetable stews."

Letter from John Paino. 1981. Jan. Gives starting date as April 1978. The company's main founders were John Paino and Robert Bergwall. It cost them about $40,000 to get into business. The first tofu plant was about 1,500 square feet in size. During the first year, they made tofu and soymilk. After 1 year, they were making 18,000 lb/month of tofu, after 2 years 33,000 lb/month, and now they are making 50,000 lb/month.

Poster. 1982, undated. 9 by 12 inches. Color. Reprinted in Soyfoods. Soyfoods Center Computerized Mailing List. 1981. Jan. 22. Owner: John Paino & Bob Bergwall. 1983.

© Copyright Soyinfo Center 2013

Winter. p. 64. "Experience the variety of tofu tastes: Rich in protein, cholesterol free, low in calories." As of Oct. 1988 Nasoya no longer vacuum packs tofu. They private label water packed tofu for Cornucopia and Stow Mills.

Talk with John Paino. 1989. Sept. 26. For the first month after Nasoya started making tofu, they packaged it in pails in bulk. Then they switched to water packing in tubs, starting with a small Monkey Packer with a foot pedal that packed once cake at a time. Under ideal conditions, this tofu had a 2-week shelf life. For the next 4 years they sold only water packed tofu. Then Tomsun, their main competitor, started pasteurizing their water packed tofu, which gave it a longer shelf life, and gave them a competitive advantage in supermarkets. Nasoya did not have enough space in their plant to install a pasteurization unit (the plant's maximum output was 5,000 to 6,000 lb/day of tofu), nor the inclination to pasteurize. So they made a bold move, and in 1981 started vacuum packaging, using a $55,000 Tiromat film machine. Their first tofu was vacuum packed in a clear film package, but within a month everyone told them to either change the film or take the product out of the produce case, because it looked terrible; it got beat up very badly. So they changed to a bottom film.

Nasoya Newsletter. 1990. Jan. p. 2. "Nasoya introduces new tofu labels." In January, Nasoya will introduce a colorful new tofu label to all supermarkets and natural food accounts. The new label, which matches the company's Nayonaise, Vegi-Dressing, and Vegi-Dip labels, will contain a brief description of the style of tofu, along with an easy recipe on the back. A large circle in the center of colorful vegetable drawings says "Organic. Made with well water."

Note: This is the earliest record seen (March 2013) concerning Nasoya Foods.

3700. **Product Name:** Vidasoy (Maple-Vanilla Soymilk).
Manufacturer's Name: Nasoya Foods.
Manufacturer's Address: Mechanic St. Ext. (P.O. Box 841), Leominster, MA 01453.
Date of Introduction: 1978. April.
Ingredients: Organically grown soybeans, untreated deep well water, pure maple syrup, pure vanilla extract.
Wt/Vol., Packaging, Price: 16 oz plastic jug.
How Stored: Refrigerated.
New Product–Documentation: Letter from John Paino of Nasoya. 1979. Jan. 16. Nasoya discontinued its sweetened soymilk in Aug. 1978. There were spoilage problems after 3-5 days with the screw-cap plastic bottle and distribution system they used, although it would last 2-3 weeks in the walk-in at 34-38ºF. They could get 3-5 weeks if they bottled the soymilk at 180ºF or hotter, but this put quite a strain on their refrigeration system and the polyethylene bottles were very easily crushed due to softening while hot. Tetra Pak was considered ideal but too expensive. The best solution in retrospect was thought to be hot packing in Pure Pak cartons. "We feel that there is an excellent market potential for soymilk, but we were glad to be able to gracefully get out of making it. The most popular types of soymilk were the sweetened kinds, and we feel strongly that sweetened soymilk is not a good quality food for most people to take on a regular food basis. We arrived at this conviction after producing a maple-vanilla soymilk for over 2 months, while watching the effects it produced on ourselves, friends and co-workers. It made us scattered, confused, and accident prone, and also created chronic intestinal problems, although it was cooked for over 30 minutes. Thus we did not wish to take responsibility for making sweetened soymilk available commercially."

Leviton. 1979. Soyfoods. Summer (July). p. 29. John Paino notes: "'We stopped making sweetened soymilk because we felt it made everyone too yin, it spaced people out. If you drink sweetened soymilk every day, you will loose touch with reality.' Bob Bergwall says that when Nasoya first introduced their soymilk last year, the market was wide open and they could have sold enormous quantities. 'But we didn't want to put out a product we couldn't believe in. We might produce a plain soymilk sometime.'"

Letter from John Paino. 1981. Jan. "We were the first to manufacture fresh soymilk for non-frozen distribution on the East Coast." Label. 1981. 3 inches square. Self adhesive. Red brown and tan on white. "Nasoya Vidasoy is the wholesome milk of the soybean, high in easily digested protein and cholesterol free." Reprinted in Tofu & Soymilk Production. 1979. p. 234, and Soyfoods Marketing. Lafayette, CA: Soyfoods Center.

Letter from John Paino of Nasoya. 1982. April. Vidasoy soymilk was introduced in April 1978 and discontinued in Aug. 1978.

Letter from John Paino of Nasoya. 1990. Sept. 25. Vidasoy was introduced in April 1978, the same month Nasoya introduced its first tofu product. It was packaged in 16 oz plastic jugs from Bercon Plastics, Gardner, Massachusetts. "It was discontinued because of: 1. Coagulation into curds and whey, or 'yogurt' in the container; 2. Insufficient funds to expand walk-in and repair ice water tank. I should have stuck with it! But alas, we were too inexperienced to realize that selling soymilk was a lot more profitable than selling tofu, which was made very slowly and with much labor. Live an learn!"

and a recipe for the package, plus a new recipe booklet. It was suggested that the product be named "Ever-Fresh Silken Tofu." The recipe was for "Creamy Tofu Dressing." The package colors were blue, yellow, and brown on white. Address: Tokyo, Japan. Phone: 03-925-4974.

3702. Shurtleff, William. 1978. Re: Proposal for establishing a Soycrafters Union or Cooperative in North America. Letter to all "Soycrafters in North America," April. 2 p. Typed, with signature on letterhead.
• ***Summary:*** This open letter, written on NAFSC letterhead and dated April 1978, was submitted to *Soycraft* newsletter, where it was published in June 1978 (which see). It led to the first national meeting of soycrafters in Ann Arbor, Michigan, on 28-30 July 1978 and the founding of the Soycrafters Association of North America at that meeting.

The letter begins: "Dear Soycrafters of North America: There has recently been growing interest in North America in starting a Soycrafters Union or Cooperative, perhaps along the lines of Japanese National Tofu, Miso, Shoyu, Natto, etc. Unions [Associations]. Such a development would seem to represent a great leap forward, of benefit to many in the expansion of consciousness and production of quality soyfoods in the Western world."

Note 1. This is the earliest document seen (Jan. 2003) in connection with the Soycrafters Association of North America (SANA).

Note 2. This is the 2nd earliest document seen (Sept. 2011) that contains the word "soyfoods." Address: Director, New-Age Foods Study Center, 278-28 Higashi Oizumi, Nerima-ku, Tokyo 177, Japan. Phone: (03) 925-4974.

3703. Swan Food Corp. 1978. Order form and price list for distributors. April, 1978. Miami, Florida. 1 p. 36 cm.
• ***Summary:*** This wholesale catalog lists the company's soy bean products and natural foods. For each is given: Product description, case weights, wholesale unit prices (sizes A and B), units per case, total. Minimum order: $300.00. Prices–F.O.B. Soy products include: Regular tofu. Baked tofu. Marinated tofu. Caraway tofu. Soymelk (pints or quarts, unsweetened). Soymelk (pints or quarts, sweetened). Soymelk (pints or quarts, carob). Carob swirl cake (all cakes and pies are 7-inch rounds [= 7 inches in diameter]). Tofu pie–cashew. Mary's carob cream cake. Mary's devil's food cream cake. Tofu chip dip. Whole grain soy burgers. Tofu vegetable stew. Soyogurt (plain, strawberry, or peach; 8 oz.). Soy shakes (carob, vanilla, or strawberry; pint). Organic yellow certified soybeans (50 lb or 1 lb bags). Mary's eggless egg salad.

Non-soy products: Iced herb tea (sweetened, unsweetened Bancha, unsweetened Mu). Barley malt syrup. Fresh frozen organic orange juice (two sizes). Organic oranges. Address: 5758½ Bird Rd., Miami, Florida, 33155. Phone: 305-667-7141.

3704. Swan Food Corp. 1978. Order form and price list for retail stores. April, 1978. Miami, Florida. 1 p. 36 cm.
• ***Summary:*** This retail catalog lists the company's soy bean products and natural foods. The products are identical to those on the wholesale price list for distributors, but the prices are about 21% higher, the column showing "Units/case" does not appear on this retail form. Address: 5758½ Bird Rd., Miami, Florida, 33155. Phone: 305-667-7141.

3705. **Product Name:** Caraway Tofu.
Manufacturer's Name: Swan Foods Corporation.
Manufacturer's Address: 5758½ Bird Rd., Miami, FL 33155.
Date of Introduction: 1978. April.
Wt/Vol., Packaging, Price: 14 oz. Wholesales for $0.85 (April 1978).
New Product–Documentation: Price list. 1986. April.

Ad (full page, black-and-white) in *Alternatives* magazine (Miami, Florida). 1978. July/Aug. p. 49. "Remember the name!" "Caraway Tofu."

3706. **Product Name:** Carob Swirl Cake (Or Carob Marble Swirl).
Manufacturer's Name: Swan Foods Corporation.
Manufacturer's Address: 5758½ Bird Rd., Miami, FL 33155. Phone: (305) 667-7141.
Date of Introduction: 1978. April.
Wt/Vol., Packaging, Price: 26 oz. 7 inch diameter (round).
How Stored: Refrigerated.
New Product–Documentation: "Swan Food Corp." order form and price list for distributors. 1978. April. Case weight: 11 lb, 10 oz. 6 units per case. Wholesale prices–Per unit: $2.80. Per case: $16.80.

Ad (full page, black-and-white) in *Alternatives* magazine (Miami, Florida). 1978. July/Aug. p. 49. "Remember the name!" "Carob Marble Swirl."

• ***Summary:*** They plan to sell soymilk in plain, honey, and carob flavors. Projected income for each flavor in dollars/week is $1,500, $850, and $550 respectively. The equipment is expected to cost $13,000. Address: Greenfield, Massachusetts.

3710. Kim, Myung Ki; Lugay, Joaquin Castro. Assignors to General Foods Corp. (White Plains, New York). 1978. Fibrous protein materials. *U.S. Patent* 4,087,566. May 2. 7 p. Application filed 6 April 1976. [6 ref]
• ***Summary:*** Describes "a method for producing fibrous protein materials useful for meat analogs. According to this method, an aqueous mixture of a heat coagulable protein is frozen by cooling the mixture in a manner and at a rate effective to produce elongated ice crystals generally aligned perpendicular to the surface of cooling, and immersing the resulting frozen mass in an aqueous solution, comprising an edible, water-soluble material capable of lowering the freezing point of water and stabilizing the protein, for a time effective to stabilize the protein in the frozen mass. Aqueous ethanol is a preferred solution. The properties of a wide variety of meat products can be simulated." Soybeans are the main protein source used. Address: 1. Congers, New York; 2. Thornwood, New York.

3712. Wells, Patricia. 1978. What is this thing called tofu? *New York Times.* May 3. p. 19-20. Reprinted in the Boston Herald-American. June 15.
• ***Summary:*** "In the early 1970s the Hashizume Bean Cake Corporation came to life as a minor cottage industry tucked away in the basement of a giant red brick factory in Long Island City. Each day it churned out a few hundred pressed soybean cakes, or tofu, and supplied the handful of Japanese restaurants and Oriental specialty stores in business at the time in the New York area.

"Today, thanks to what one company representative called 'the American-natural-organic-people'... seven trucks loaded with tofu leave the steamy Hashizume factory each day."

"A combination of events awakened the West to the wonders of tofu. One was the 1975 publication of *The Book of Tofu*, an Autumn Press cookbook and resource manual that caught on quickly with natural food followers. The other is tofu's nutritional attributes.

"While traditionally Oriental tofu companies as Hashizume and Tanaka & Company, which is on Manhattan's West Side (326 Amsterdam Ave. at 75th St.), have profited from the Westernization of tofu, young, counterculture entrepreneurs throughout the country have taken advantage of the growing demand." These include the "Laughing Grasshopper New England Soy Dairy" (which now makes 5 tons of tofu a week, that's 20,000 cakes). "Other successful American-run tofu factories have mushroomed in Bethlehem, Massachusetts [actually New Hampshire; Crystal Springs], Summertown, Tennessee, and Island Springs, Washington" [sic, Island Spring, Inc., Vashon, Washington]. A description of the process for making tofu at Hashizume is given.

Page 20 is titled "The West wakes up to the wonders of tofu." "Following are recipes using tofu in both Oriental and Westernized versions. The Oriental recipes are included in *The Book of Tofu*. The others were developed by the people at Laughing Grasshopper and the Crystal Hills Tofu Shop in Bethlehem, N.H.: Tofu clam dip, Maple walnut bars, Tofu manicotti, Chilled tofu, Shoyu dipping sauce, Raspberry pudding, and Miso soup with tofu and onions."

3713. Bennett, Jean. 1978. Soybean curd: Ancient staple of the Oriental diet. *Los Angeles Times.* May 4. p. J25.
• ***Summary:*** An introduction to tofu, based on a talk with Dr. Genevieve Ho, home adviser, UC Extension Service; she was born in China and educated in the USA.

The use of bean curd in China was recorded in about 160 BC during the Han dynasty. With this long history of development and refinement, and with continuous regional and local innovation, it is easy to understand why bean curd has become so tremendously popular in China and in nearby countries, and why so many varieties exist today.

Ho adds that "fermented bean curd has sufficient vitamin B-12 to prevent pernicious anemia."

In East Asia, "Buddhists do not eat anything that contains blood. Nor do they eat milk, eggs, or shellfish." In this vegan diet, tofu is a very valuable food. "Strict vegetarian restaurants serve dinners and banquets made of food from only plant sources." Main dishes include mock chicken, mock fish, and mock sausage.

© Copyright Soyinfo Center 2013

In our world, with increasing population and decreasing food supply, the soybean is "invaluable in helping us to return to original foods as opposed to converted foods." When a food is converted from a plant to an animal food, it requires 7-11 units of plant protein to obtain 1 unit of animal protein. "'No wonder I am always trying so hard to get people to eat more bean curd.' See also The Book of Tofu by Shurtleff and Aoyagi (Autumn Press, Box 469, Soquel, California 95073; $6.95). Includes 4 recipes for bean curd supplied by Dr. Ho. One of these, Hot spicy bean curd, includes "1½ teaspoons hot fermented bean paste" and "1 pound fresh bean curd, cut into ½-inch cubes" as ingredients.

A photo shows Dr. Ho at a market in Chinatown.

A comparative nutritional evaluation chart gives the nutritional composition of soybean curd, pressed soybean curd, milk (cow's, whole fluid), and soybean milk. Address: Times staff writer.

3714. Freiman, Jane Salzfass. 1978. Sushi: A 'fast-food' fish dish from Japan. *Chicago Tribune.* May 12. p. B1.
• ***Summary:*** Begins with a description of sushi and the different types (such as nigiri sushi and maki sushi), then continues with a review of six sushi restaurants in or near Chicago. "Like other arts practiced in Japan, the preparation of sushi is an effortless performance requiring great skill." Sushi has been prepared in Japan since the mid-1700s. Each bite of sushi (a finger food) is dipped in a tiny sauce of shoyu or soy sauce just before it is eaten.

At Hamehachi the writer enjoyed "two delicious, sweet, stuffed deep-fried bean cakes called *inari sushi*. A complete order of six *inari sushi* is $3." Two photos show a *sushi-ya* (sushi chef, sushi-master) at work in his sushi bar or restaurant.

3715. Guhardja, Edi. 1978. Re: Names and descriptions of lesser-known Indonesian soyfoods. Letter to William Shurtleff at New-Age Foods Study Center, May 16–in reply to inquiry. 1 p. Typed, with signature.
• ***Summary:*** Dry roasted soybeans (Javanese: *Dele Sangan;* Sundanese: *Kedele Sangrai*). Raw soybeans, with or without their seed coats, are soaked in cold water for ½-1 day. Sometimes salt is added. The swollen beans are dried, roasted, then eaten with yellow rice (rice cooked in coconut milk with turmeric), or as a snack.

Tofu chips (Indonesian: *Krupuk Tahu*). Salted tofu is sliced into long, this pieces, which are dried in the sun, then broiled until crisp. They are eaten with Gado-Gado (cooked vegetables with peanut sauce) or as a snack.

"Fresh green soybeans in the pods" or "fresh vegetable (green) soybeans (Indonesian: *Kedelai Rebus*). Soybeans at the mature green stage are harvested by cutting the stems with the pods attached. The leaves are picked off the stems and the pods, still attached to the stems, are boiled until the seeds are soft. They are sold in bunches, with the stems tied together, and eaten as a snack.

Roasted soybean grits (Indonesian: *Bubuk Kedelai*). Roasted soybeans are pounded into grits, usually with a wooden mortar and pestle. The grits are spread over glutinous rice and grated coconut meat, then coconut sugar syrup is poured over the top. They are eaten as a snack. Address: Dr., Dep. of Botany, Bogor Agricultural Univ. (IPB) Bogor, West Java.

3717. Shurtleff, William. 1978. Re: Ideas and a proposed schedule for the first American Soycrafters Convention. Letter to Jerry MacKinnon and Steve Fiering of The Soy Plant, Ann Arbor, Michigan, May 29. 2 p. Typed, with signature.
• ***Summary:*** "I am extremely pleased to see the concrete developments leading up to the first American Soycrafters Convention. I admire you very much for taking the initiative and responsibility for this event. If planned and executed well, it can be a source of great energy for all concerned. And, of course, if poorly done, it will leave all regretting that they took the time and money to attend."

On page 1, Shurtleff describes four of the basic concepts used to organize three international conferences has attended in Asia during the past six months, and suggests that these same ideas be used in organizing the Soycrafters Convention. On page 2, he proposes a schedule for a 3-day (Friday to Sunday) meeting, with breakfast starting at 8:00 a.m. and the last session ending at 9:00 p.m. A footnote states that he expects to be in Lafayette, California, from June 13.

Note: This letter was apparently written in response to a letter from Jerry MacKinnon and Steve Fiering (in Michigan) to Shurtleff (in Tokyo); that letter can no longer be found. This letter was written on NAFSC letterhead and copies were sent to Larry Needleman (California), The Farm, *Soycraft* magazine, Tom Timmins (New England Soy Dairy, Massachusetts), Mary Pung (Swan Foods, Florida), and Wataru Takai (Japan). 3720. Japan Food Research Laboratories. 1978. Analysis of natural nigari. Tokyo, Japan. 1 p. [Eng]
• ***Summary:*** This is a report (analysis certificate no. 11040896) of natural nigari submitted by the Natural Salt Spread Association of Japan. The sample was received on 26 April 1978 and the assay conducted on 15 May 1978 at Laboratory No. 1.

Arsenic: not detected (below 0.1 ppm [parts per million]). Lead: 1.50 ppm. Zinc: 0.10 ppm. Total mercury: not detected (below 0.1 ppm). Iron: 11.3 mg%. Signed: H. Suda, inspector.

Note: See also the analysis of nigari conducted in Oct. 1977 by Curtis & Tompkins in San Francisco, California, for Westbrae Natural Foods. They analyzed only the lead content and found 1.75 ppm–16% more than was found by this Japanese laboratory. Address: Tokyo Head Office: 52-1 Motoyoyogi-cho, Shibuya-ku, Tokyo.

3721. **Product Name:** Redbud Creek Tofu, and Tofu Spread.
Manufacturer's Name: Redbud Creek Tofu Co. Renamed Virginia Soyworks in 1981.
Manufacturer's Address: Innisfree Village, Route 7, Box 208, Charlottesville, VA 22901. Phone: 804-973-8866.
Date of Introduction: 1978. May.
Ingredients: Spread: Incl. tofu, onions.
Wt/Vol., Packaging, Price: Plastic Dixie-like cup.
How Stored: Refrigerated.
New Product–Documentation: Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 398. Redbud Creek Tofu, Rt. 7, Box 208, Charlottesville, VA 22901. Phone: 804-973-8866. Owner: Paul Shannon.

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Redbud Creek Tofu Co., Route 2, Box 505, Crozet (pronounced kro-ZAY), Virginia 22932. No phone. Owner: Shag Kiefer. Note: This is the earliest known tofu manufacturer in Virginia.

Soyfoods Center Computerized Mailing List. 1982. Sept. 17. The company is now named Virginia Soyworks at the address shown above. Owner: Shag Kiefer. Phone: 804-823-2364. Later phone: 804-977-4529.

Label. 1983, undated. 3 by 2 inches. Self adhesive. Blue on white. "Organic Nigari Style. No preservatives."

Talk with Paul Shannon, founder of this company (Phone: 804-296-4777). 1990. Sept. 3. He and his friend Katie founded this company in the spring of 1978, probably in May, in his farmhouse home, at Route 7, Box 28, Charlottesville, Virginia–5 miles northeast of the city. He had been working as a carpenter for 4-5 years building very expensive homes, but he got tired of working for the rich. He earned his living mainly teaching carpentry to unemployed black youths. They bought a tofu grinder from a Madison County woman who had imported it from Japan with the idea of starting her own tofu shop–which she never did. They moved the business to the bakery at Innisfree village in the summer of 1978 because they needed more space. The village generally donated the space, which had health inspectors approval, for use on off days because they wanted to get more involved with the outside community and they hoped some jobs would eventually open up in the business. The tofu was sold in bulk in water and then in plastic Dixie-type cups with clear lids. The spread was developed at the village later in 1978 at the suggestion of a Japanese man at the village. It tasted a little like a mild egg salad. Originally they thought of naming the company "Snafu Tofu" because things constantly went wrong. He was not aware of any other tofu companies in Virginia that started before or after he did.

Talk with Shag Kiefer. 1990. Sept. 2. Shag now lives in Charlottesville, Virginia. Phone: 804-293-9244. This company was started by Paul Shannon and his girlfriend at his home kitchen, located near Redbud Creek, in a rural area near Charlottesville, Virginia. Paul later moved his little tofu shop into a bakery at Innisfree Village (on Route 2 in Crozet, VA) that took care of handicapped adults. Paul and Shag were friends, and Paul asked Shag if he would help design some equipment for the shop that was then making about 60 lb/week of tofu. Shag came into the company in about Feb. 1979, about a year after it had started, and basically took over its operation. At that time the company had two products: Tofu and Tofu Spread. He got a mailbox (505), began to expand the business, and reformulated the

© Copyright Soyinfo Center 2013

Tofu Spread. In about 1981 he changed the business name to Virginia Soyworks and basically started over for some legal reasons. By early 1982 Shag, running the company as a single man shop, was making 2,500 lb/week of tofu. But at that point Shag realized that he was working too hard, 3-4 days/week, 13 hours per shift. He was making good money but he wanted to automate the company more and make less tofu. His real love was tinkering with machines. Moreover, a lot of competition (American Soyfoods, Bud Inc., etc.) had opened up in the Maryland/Washington, DC, area, where more than half of Shag's sales were. So his sales in that area decreased, but he increased sales in Virginia. After that the amount dropped until it stabilized at about 1800 lb/week. Finally, on 2 April 1987, tired of making tofu, Shag sold the company to Robert Graham. In the spring of 1988, with Shag's help, Graham moved the company to its present location, Route 1, Faber, Virginia. Shag stayed on to help Graham for about 9 months until the company ran into a money crunch. It never really recovered.

Talk with Ken Scotton, owner of Virginia Soyworks. 1990. Sept. 2. He bought this tofu company in March 1989 from Robert Graham.

3722. Soy Deli (The). 1978. May. New soyfoods restaurant or deli. 211 East Ann St., Ann Arbor, MI 48104.
• ***Summary:*** D.B. 1979. *Whole Foods* (Berkeley, California). Oct. p. 44. "Soy deli's to go!" "Other soy delis currently known to be in operation are the Soy Plant in Ann Arbor, Michigan, and Yellow Bean in Detroit, Michigan."

Shurtleff & Aoyagi. 1982. Report on Soyfoods Delis, Cafes & Restaurants. p. 3. Started in May 1978. Talk with Steve Fiering. 1988. June 10. Although I was the leader of the group, the deli was not my primary responsibility. Sue Kalen was probably the person who was most responsible for getting the deli going. We all knew that when we moved into Ann Street we wanted to have a deli. We knew we could sell ready-made soyfoods, which didn't have any shelf life. The basic idea was that if we had a retail outlet we could experiment on new products, find the ones that succeeded, then develop them into wholesale products. This would also allow us to communicate with the community. I think this was our original idea. I don't recall getting the idea from anyone else. [Note: This was America's fourth soy deli, after Farm Food Company in San Rafael, California (Aug. 1976); The Cow of China in Boulder, Colorado (Sept. 1977); and The Tofu Shop/Far Pavilions in Telluride, Colorado (Oct. 1977)]. Address: Ann Arbor, Michigan. Phone: 313-663-0500.

3723. *Sunset* (*Menlo Park, California*). 1978. Fish-stuffed tofu... You make pockets, stuff, then fry. 160:218-19. May.
• ***Summary:*** "One popular Chinese way to prepare tofu (soybean curd) is to stuff it with a savory mixture and fry it." Gives a recipe for fish-stuffed tofu. Cut cake of tofu diagonally into halves, forming two triangles. Slit the long side of each and stuff with a savory fish mixture into the pocket that is formed. Deep-fry the pockets until golden and puffy. Simmer in a lightly seasoned sauce, and serve. Recipe submitted by R.L. of San Francisco.

3724. **Product Name:** Tofu Pies (Cheesecakes) [Carob, Lemon, or Banana].
Manufacturer's Name: Swan Gardens.
Manufacturer's Address: Route 1, Box 216, St. Ignatius, MT 59865.
Date of Introduction: 1978. May.
New Product–Documentation: Letter from Brenda Wood of Swan Gardens. 1978-79? Undated. "Probably our biggest seller is a variety of tofu pies, very popular dessert item (carob, lemon, banana)." Note: Swan Gardens moved to Miami, Florida in Aug. 1979, so the product was introduced before that time. One employee guesses May 1978.

3725. *Daizu Nippo.* 1978. Beikoku de tôfu e no kanshin. NY Times mo kiji [Increased interest in tofu in the U.S. Even an article in The New York Times]. June 8. p. 4. [Jap]

3726. MacKinnon, Jerry; Fiering, Steve. 1978. Re: Update on plans for Soycrafters Convention at The Soy Plant in Ann Arbor, Michigan. Letter to William Shurtleff at New-Age Foods Study Center, Lafayette, California, June 9. 3 p. Typed, with signature.
• ***Summary:*** Includes a copy of Shurtleff's proposed schedule for the program. "Just a word about our shop here in Ann Arbor. We began over a year ago in the local bakery trying to eke out a hundred pounds of tofu a week. Today, we've opened a store front with our shop in back. By the time we see you in July we'll be well over the 2,000 lb. weekly mark with full scale Tempeh production." Address: The Soy Plant, 211 East Ann St., Ann Arbor, Michigan 48104. Phone: (313) 663-0500.

3727. Cardozo, Yvette. 1978. Tofu: Just add taste. *Miami Herald.* June 22. p. 4-E.
• ***Summary:*** About Robert Brooks and Mary Pung, and their company Swan Foods that makes tofu and tofu products.

"When Robert Brooke [sic, Brooks] called one day to extoll the virtues of his dozen and one soybean products, I figured it was time to take a second look at what some have labeled the miracle food.

"Most people by now are at least vaguely familiar with roasted soy nuts. They're sort of a dieter's peanut and can be dumped into a variety of dishes. But unless you caught the wave of vegetarian conversion a decade back or spent time in the Orient, odds are you don't know much about soybean cheese, also known as tofu.

"Basically, it's the food world's chameleon. It's white with a consistency that's a cross between Jello and farmer

© Copyright Soyinfo Center 2013

cheese... sort of rubbery but fragile. It has a faintly grassy taste but you've got to be really on your toes (or well-practiced) to catch it. Mostly, it's tasteless. Which, of course, means you can do just about anything with the stuff.

"But what I found equally fascinating was its preparation. Brooke, his wife, Mary, and two workers work out of what once was a meat locker for a long-gone A&P at Bird and Red Roads. Brooke christened his company Swan Foods and because there apparently aren't too many tofu makers this side of the Mississippi, found he had to invent half his gear as he went along."

The author then describes how Swan Foods makes tofu. A confirmed meat eater, she samples and rates the company's egg salad, soy shake, chip dip, cashew cheesecake, and nori rolls. She disliked the first two of these products, but liked the last 3, the nori rolls being her favorite. Contains a recipe for Tofu chip dip. Note: This is the earliest article on soy seen (Aug. 2002) in the *Miami Herald* newspaper. Address: Herald columnist, Florida.

3728. Fabricant, Florence. 1978. A Cantonese alternative. *New York Times.* June 25. p. LI23.
• ***Summary:*** Irene's (which the author rates with one star = good) is a new Cantonese restaurant in the Southampton (part of the Hamptons, on Long Island); it opened about 2 months ago. Recommended dishes include "Dow foo soup," which features "velvet slices of bean curd in a rich broth."

"One of the highlights of our dinners at Irene's has been the roast pork with bean cake, a superb combination of tender slices of scarlet-tinged roast pork and snowy bean curd [tofu], with crisp Chinese vegetables in a mellow oyster sauce."

3729. **Product Name:** Brightsong Tofu.
Manufacturer's Name: Brightsong Tofu.
Manufacturer's Address: P.O. Box 371, Redwood Valley, CA 94570. Phone: 707-485-7050.
Date of Introduction: 1978. June.
Ingredients: Water, organically-grown soybeans and nigari (sea bitterns) and calcium sulfate (a 99.2% pure and natural earth mineral) as coagulants.
Wt/Vol., Packaging, Price: 10 oz.
How Stored: Refrigerated.
Nutrition: Per 5 oz.: Calories 170, protein 17 gm, carbohydrate less than 1 gm, fat 11 gm.
New Product–Documentation: Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 393. Brightsong Tofu, Box 154, Redwood Valley, CA 95470. Phone: 707-485-7498. Owner: Not given.

Letter/Order for the book *Tofu & Soymilk Production* from Brightsong Tofu. 1979. Sept. 27. The company is located at Box 371, Redwood Valley, California 95470.

concerning Brightsong Tofu–a company that changed names many times and was owned and run by Richard Rose for most of its history.

3730. Dominguez de Diez Gutiérrez, Blanca. 1978. Los mil y un usos de la soya [The 1001 uses of soya]. Mexico City: Editorial Posada. 15 p. [2 ref. Spa]
• ***Summary:*** This booklet was reprinted from the May 1978 issue of *Quadernos de Natura* magazine, p. 51-66. Blanca was born on 8 Nov. 1919. Address: Circulo Yoga de Tapasthana, A.C. Tepoztlan, Morelos, Mexico.

3731. **Product Name:** Island Spring Soy Freeze (Soy Ice Cream) [Carob Mint, Carob, Banana, Vanilla Mint, or Vanilla].
Manufacturer's Name: Island Spring, Inc.
Manufacturer's Address: P.O. Box 747, Vashon, WA 98070.
Date of Introduction: 1978. June.
Ingredients: Water, soybean extract [thick soymilk], honey, soy oil, lecithin, agar, salt.
Wt/Vol., Packaging, Price: Quart.
How Stored: Frozen.
New Product–Documentation: Labels. 1981, undated. 3.5 inch diameter. Blue on white. Leviton. 1981. Soyfoods. Winter. p. 43, 63. "210 quarts are made weekly... Carob mint is the most popular flavor." Shurtleff & Aoyagi. 1985. Tofutti & Other Soy Ice Creams. p. 42. "Island Spring was the first of many commercial tofu companies in the U.S. to make a soymilk ice cream."

3732. MacKinnon, Jerry; Fiering, Steve. 1978. An invitation. *Soycraft* (*Lawrence, Kansas*) 1(3):1. June.
• ***Summary:*** "The workers of the Soy Plant Soy Dairy would like to invite you to a national conference which is to be held in Ann Arbor, Michigan" on July 28-30, 1978. "We expect to have technical workshops on tofu, tempeh, soymilk and miso production as a base to begin from."

Note: The Soycrafters Association of North America (SANA) was founded at this meeting. Address: The Soy Plant, 211 East Ann St., Ann Arbor, Michigan 48104. Phone: (313) 663-0500.

3733. Olszewski, Nancy. comp. and ed. 1978. Tofu madness: 50 wild and crazy ways to use tofu and tempeh. Vashon, Washington: Island Spring. 64 p. June. Illust. by Kathy Provazek. No index. 21 cm.
• ***Summary:*** Contents (see next page): Introduction. Preface. Beverages. Quick snacks and sandwiches. Soups. Breakfasts. Dips, spreads, and salad dressings. Main dishes. Fancy international meals for special occasions. Desserts. Special tempeh recipes. Explanation of terms. Afterword. Contains 52 recipes. Address: Vashon, Washington.

3734. Pontecorvo, A.J.; Bourne, M.C. 1978. Simple methods for extending the shelf life of soy curd (tofu) in tropical areas. *J. of Food Science* 43(3):969-72. May/June. [16 ref]
• ***Summary:*** Soymilk was coagulated using lemon juice to make tofu. Methods studied for extending the storage stability included immersion in aqueous solutions (with salt or a low pH from addition of lemon juice), smoking, and combinations of the above. Tofu that had been smoked for 48 hours was liked the best and had the best resistance to spoilage. It kept for 10 days at ambient temperature on a wire mesh. The very firm texture resembled that of cheddar cheese. Address: 1. Horacio No. 1805-402, Mexico 10., D.F. Mexico City, Mexico; 2. Cornell Univ., Geneva, New York.

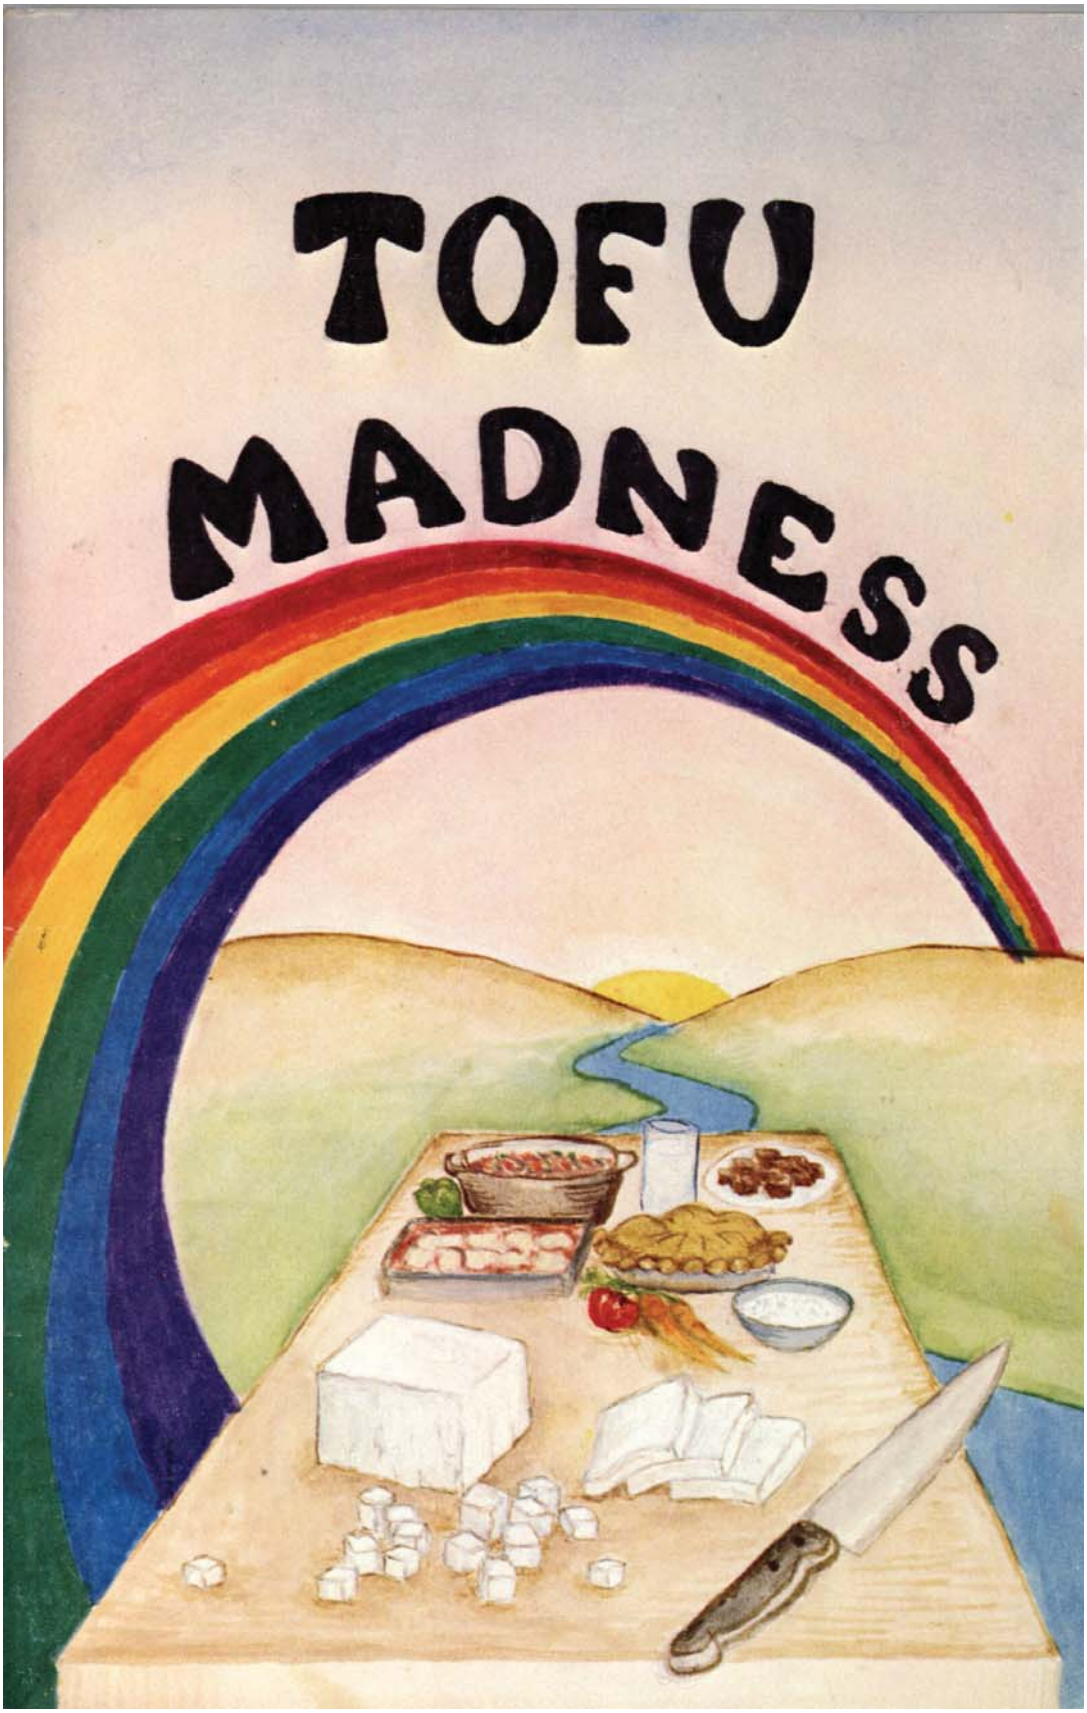
3735. Saio, Kyoko; Watanabe, Tokuji. 1978. Differences in functional properties of 7S and 11S soybean proteins. *J. of Texture Studies* 9(1/2):135-57. June. [21 ref]
• ***Summary:*** 11S protein differs from 7S protein in that it makes much harder tofu gels which are more sensitive to the effect of phytic acid, and in which the S-S bonds appear to predominate. "The 11S protein precipitates faster and forms larger aggregates" [curds]. 11S gels have a higher water holding capacity and higher tensile values, and they expand more when heated.

Traditional soy protein foods in Japan include: Tofu: a protein gel coagulated from soybean milk. Kori-tofu: freeze-denatured, dried and porous tofu gel. Aburage: Tofu-gel expanded by deep-frying. Yuba: thin film formed on the surface of soybean milk. Kinako: flour of roasted soybeans. Miso: fermented salty paste of cooked soybean and rice mixtures. Soysauce: fermented salty liquid of cooked soybean and wheat. Address: 1. National Food Research Inst., Ministry of Agriculture & Forestry, Shiohama 1, Koto-ku, Tokyo, Japan; 2. Kyoritsu Women Univ., 2-2, Hitotsubashi Kanda Chiyoda-ku, Tokyo, Japan. Watanabe's present address: Kyoritsu Woman University, 2-2, Hitotsubashi Kanda, Chiyoda-ku, Tokyo.

3736. Shurtleff, Bill. 1978. News from New-Age Foods Study Center. *Soycraft* (*Lawrence, Kansas*) 1(3):3-5. June.
• ***Summary:*** This open letter begins: "Dear Soycrafters of North America: There has recently been growing interest in North America in starting a Soycrafters Union or Cooperative, perhaps along the lines of Japanese National Tofu, Miso, Shoyu, Natto, etc. Unions [Associations]. Such a development would seem to represent a great leap forward, of benefit to many in the expansion of consciousness and production of quality soyfoods in the Western world."

The author then summarizes five major functions of Japanese national trade associations related to soy products, and suggests how each of these be adapted to present American conditions and consciousness which are very different from those in Japan: Purchasing soybeans, maintaining a list of member shops, doing "soyfood

© Copyright Soyinfo Center 2013



© Copyright Soyinfo Center 2013

publicity," publishing a newsletter, and establishing and running a nationwide center, information clearing house, and school for teaching production of low-technology "soyfoods" to people from both developed and developing countries.

"How might this basic model be adapted to the United States? First, since soyfoods are still quite new in the USA, we might want to form one united front cooperative or union for all soycrafters or producers of soyfoods, rather than trying to form individual unions for tofu & soymilk, miso, tempeh, shoyu, etc. Given such a joint union, it would seem that all of the functions performed by the Japanese unions would be of great potential value to producers in North America. The key point, however, is that for the Union to work it must be financially viable and sound. Thus it must be created and supported by individual members who understand clearly that its functions are in their best interest, both in the short and long run."

"Second, we must remember that the number of shops presently producing soyfoods here is still very small. We have the names of 95 tofu shops and/or soy dairies in the United States plus 6 more in Canada, 9 tempeh shops, 8 miso shops, and one shoyu factory (Kikkoman). Of these, about 41 of the tofu shops and soy dairies, 5 of the tempeh shops, and 2 of the miso shops are 'new-age' types, newly started by Caucasian Americans. This latter group would probably form the initial nucleus of the Soycrafters Union, however after the benefits of membership could be clearly demonstrated, the more conservative Japanese producers might be eventually interested in joining."

"At the proposed First North American Soycrafters Convention to be held in Ann Arbor [Michigan] July 28-30 the above suggestions might be discussed one by one..."

At the end of the article is a form which new or existing tofu or soymilk manufacturers in the U.S. are invited to fill out and return to Shurtleff so that he can list them in the next edition of *The Book of Tofu.* Its asks for the name, address, and phone number of the company, the person(s) in charge, the date tofu or soymilk production started, the approximate cost of getting started, the average quantity of soybeans used per week, the soyfoods produced (in order of importance), the main pieces of equipment purchased, and equipment the company plans to purchase in the near future.

Note the early use of the terms "soyfoods" and "soyfood" in this article. The term "soyfoods" was coined by Surata Soyfoods of Eugene, Oregon, in Dec. 1976.

Note 2. This is the earliest document seen (Feb. 2013) that contains the term "low technology" (or "low tech"). Shurtleff coined this term to refer to soyfoods that could be made, and had long been made, using simple, traditional technologies, appropriate to Third World countries or relatively poor areas. Address: Director, New-Age Foods Study Center, 278-28 Higashi Oizumi, Nerima-ku, Tokyo 177, Japan. Phone: (03) 925-4974.

3737. **Product Name:** Miso.
Manufacturer's Name: Soy Plant (The).
Manufacturer's Address: 211 East Ann St., Ann Arbor, MI 48104. Phone: 313-663-0500.
Date of Introduction: 1978. June.
New Product–Documentation: Talk with Steve Fiering. 1988. June 10. This was the company's fifth commercial product. "We did sell the batches that were good but we didn't have any consistency. Some batches came out very good but some were sour. It never became much of a product, so we dropped it. We probably sold some short-term miso before the 1978 summer conference, out of the deli. We could sell anything we put out there if it was good. I think the changing temperature in the building, and particularly the heat in the summer was the problem."

3738. **Product Name:** Missing Egg Salad.
Manufacturer's Name: Soy Plant (The).
Manufacturer's Address: 211 East Ann St., Ann Arbor, MI 48104. Phone: 313-663-0500.
Date of Introduction: 1978. June.
Ingredients: Tofu, tahini, soyamaze [soy mayonnaise] (soymilk, safflower oil, cider vinegar, honey, salt), tamari, celery, onion, nutritional yeast, spices.
Wt/Vol., Packaging, Price: 12 oz. plastic tub.
How Stored: Refrigerated.

New Product–Documentation: Steve Fiering. 1979. Whole Foods. Jan. p. 38, 40. "A Midwestern Interest in Tofu." This is included in a list of products presently produced by the company. It contains eggless soy mayo and turmeric. Talk with Steve Fiering. 1988. June 10. The word "tofu" was not in the title. It was introduced before the Conference, and one of their first two deli items. It was later sold occasionally wholesale outside the deli. The eggless soy mayo was first introduced as a separate product in the deli about a year later.

Rectangular Label in Soy Plant scrapbook from 1979. 3 by 2 inches. Green on orange. 12 oz.

Square Label in Soy Plant scrapbook from about 1980. 3 by 3 inches. Black on white. 12 oz. Ingredients: Tofu, soynaise (soymilk, oil, vinegar, salt, honey), celery, parsley,

© Copyright Soyinfo Center 2013

onion, spices. 12 oz. Zip: 48104.

3739. **Product Name:** Ann Arbor Steamed Brown Bread.
Manufacturer's Name: Soy Plant (The).
Manufacturer's Address: 211 East Ann St., Ann Arbor, MI 48104. Phone: 313-663-0500.
Date of Introduction: 1978. June.
Ingredients: Okara (high fiber soy product), rye flour, soy milk, molasses, whole wheat flour, corn meal, safflower oil, raisins, walnuts, orange oil, vanilla.
How Stored: Shelf stable.
New Product–Documentation: Label in Soy Plant Scrapbook, next to article dated 4 Oct. 1978. 3 inches square. Black on white. An illustration shows a flower growing on a vine.

Talk with Steve Fiering, a founder of The Soy Plant in Ann Arbor. 2000. Dec. 3. This may have been the first way The Soy Plant discovered to use its okara as a food. Ann Elder developed the recipe. It was steamed in the Soy Plant kettle or commercial steamer (which they got for free from a salvage operation) because they didn't have an oven. Steve welded the 4-inch-diameter cylindrical stainless steel forms in which the bread was steamed. When done, they pushed the bread out one end. Steve thinks they started making this before the SANA conference in Ann Arbor in July 1978.

3740. Soy Plant [The]. 1978. Re: Questionnaire about soycrafting in preparation for meeting in Ann Arbor, Michigan. Letter to soycrafters who might attend the meeting in Ann Arbor, undated. 2 p.
• ***Summary:*** This undated letter, which is signed "Peacefully, Workers of the Soy Plant," was probably written by Jerry MacKinnon and/or Steve Fiering of the Soy Plant in Ann Arbor. It was probably sent in May or June 1978.

"We thought that in order to make a large body of North American Soycrafting experience more accessible to all, we would ask soycrafters, whether they are attending the conference or not, to fill out a questionnaire on what they are doing. We will print these questionnaires after the conference and distribute them to use as reference material throughout the year. Try to include any information that you think would aid other soycrafters.

"Name of business or group. Address. Phone No.

"What soycrafting do you do now? How long have you been at it?

"Give a brief description of each process and the supplies used.

"What is your distribution?

"Please describe your packaging techniques.

"Describe the number of workers and responsibilities.

"How are decisions made?

"What are the wholesale prices for your products?

"What wages are your workers paid?

"How are you capitalized?" Address: The Soy Plant, 211 East Ann St., Ann Arbor, Michigan 48104. Phone: (313) 663-0500.

3741. Tofu Shop (The). 1978. Pricelist. Telluride, Colorado. 1 p. Undated.
• ***Summary:*** The Tofu Shop now sells 12 products: Tofu, 14 oz. Tofu, bulk (10 lb. minimum). Sprouts, alfalfa (8 oz or 1 lb). Sprouts, mixed (radish, lentil, alfalfa; 8 oz or 1 lb). Soymilk, quart, unflavored. Soymilk, quart, carob-honey. Soyburgers, frozen 5-pac. Fudge (super carob, cashew coconut, or date coconut). Address: 116 N. Oak St., P.O. Box 69, Telluride, Colorado 81435.

3742. **Product Name:** Teya's Sprout & Tofu Pie.
Manufacturer's Name: Tumaro's Inc.
Manufacturer's Address: 5300 Santa Monica Blvd., Los Angeles, CA 90029.
Date of Introduction: 1978. June.
Ingredients: Crust: Organically grown whole wheat flour, corn oil, water, sea salt. Filling: Tofu (soy beans, water, nigari), mung bean sprouts, celery, green peppers, onions, tamari (soy beans, water, sea salt), arrowroot starch, ginger, garlic, pepper.
Wt/Vol., Packaging, Price: 9 oz.
How Stored: Frozen.
New Product–Documentation: Label. 1981. 4 by 2.5 inches. Self adhesive. Brown on tan. "No meat or meat derivatives." Letter from Kaye Dunham. 1981. March 30. This was his company's first soy product. He bought the tofu from Hinode. Poster. Back to back, color. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.

Note: This appears to be America's first frozen tofu entree.

3743. Fiering, Steve. 1978. Re: Update #2 on plans for Soycrafters Convention at The Soy Plant in Ann Arbor, Michigan. Letter to William Shurtleff and Larry Needleman in California, July 8. 5 p. Handwritten, with signature.
• ***Summary:*** "Bill and Larry–I thought it's time to fill you both in on the latest conference details. Things are looking very good. Forty people have said they are planning to attend representing 23 different shops or shops to be. This does not include Michigan folks. I expect about 20 Michigan people. The Media, *New Age Journal*, *East-West*, etc. have not responded... "The basic layout will revolve between The Soy Plant and the dorm where about 2/3 of the people will stay." The latest proposed schedule is enclosed; comments are invited. The schedule begins: [Friday] "4-6 p.m.–Check in at Soy Plant. Take people to the dorm or the houses they will be staying in. 6-7–Dinner. 7:30-9–Opening session. Soy Plant introductions and short rap from each delegate. Discussion of the proposed schedule and any special points people want to work on. We have a retail shop at the front of our building which will hold 60 people comfortably, so a lot

© Copyright Soyinfo Center 2013

of conferring can be done easily right here. 9:30-11:00–We feel that specific slide shows would be done best after dark. So we would walk up to the dorm, about 6 blocks, and see Bill's [Shurtleff] miso slides up there (we have access to conference rooms and lounges up there). We felt that miso would be of least interest to most of the delegates so we put it on Friday night so latecomers will miss less.

"Sat. One of the frequent comments on your schedule, Bill, was that it is too academic, especially for the folks who are just starting so... We plan on having two activities at once to try and allow people to get what they need."

The Saturday and Sunday schedules are both given. Each day begins with breakfast at 8:00–9:00 a.m., followed by non-stop workshops and discussions. On Saturday evening slide shows will be from 8-11:00 p.m. On Sunday morning: "9:30-12:00–Starting a North American Soycrafters Union or Co-op."

The letter ends: "I feel that the most important ingredient is the spirit of the participants, and if correspondence is a true indication, the spirit will indeed get us all high!

"Hope to hear from you soon. Steve." Address: The Soy Plant, 211 East Ann St., Ann Arbor, Michigan 48104. Phone: (313) 663-0500.

3744. Fabricant, Florence. 1978. Food: How the Chinese cook at home. *New York Times.* July 9. p. LI6.
• ***Summary:*** Chinese home cooking is, of course, much simpler, quicker, and less expensive than restaurant cooking. Bick Lee, in order to expand her knowledge of "Chinese vegetable cooking" spent several days in the kitchen of the Ching Kok Lin Buddhist nunnery in Kowloon, Hong Kong. The nuns lead very frugal, spartan lives. Bick Lee's mother is a Buddhist, but the Lees are not vegetarians–although their meals do tend to emphasize vegetables.

A meatless recipe for "Mock duck" is given. The ingredients include: "1 tablespoon light soy sauce (or Kikkoman brand soy sauce), 1/8 teaspoon monosodium glutamate (optional), 1 teaspoon sesame oil, 1 round sheet pressed bean curd (see note)." Then: "Cut sheet of bean curd in half and trim the thick edge with scissors. Lay one of the pieces of bean curd on a cookie sheet. Moisten it with half the sauce, brushing it over the surface or folding the bean curd over itself to pick up the sauce... 4. Lay the second piece of bean curd over the first and repeat the process with the sauce and mushrooms." Steam then pan fry.

"Note: Dried straw mushrooms and bean curd sheets may be obtained only in Chinese groceries in Chinatown."

Note: These "bean curd sheets" are clearly what we call "pressed tofu sheets" (*pai-yeh* or *chien-chang*).

3745. Schecter, Andy. 1978. Re: La Milpa mill. Letter to Larry Needleman, Bean Machines Inc., P.O. Box 76, Bodega, California 94922, July 12. 3 p. Typed, without signature on letterhead. [1 ref]
• ***Summary:*** "The mill grinds the equivalent of 1 lb/minute of dry soybeans. Our yield is 2.6 to 2.9 lb of tofu per pound of dry soybeans using a lever press and traditional 2 pressings. The mill is not ideal but a good value for the money." Address: The Tofu Shop, 277 N. Goodman St., Rochester, New York 14607. Phone: 716-442-1213.

3746. *Minneapolis Tribune.* 1978. Tofu is staple Oriental food that is packed with protein. July 20. *

3747. The foundation meeting of the Soycrafters Association of North America in Ann Arbor, Michigan. Photographs taken at that meeting. 1978. Ann Arbor, Michigan.
• ***Summary:*** This first meeting took place on 28-30 at the University of Michigan–Ann Arbor. Approximately 70 people attended. The goals of the meeting are outlined in the correspondence leading up to the meeting.

The soyfoods movement in America was interested in low-tech, traditional soyfoods, especially tofu, miso, tempeh, and soymilk, gradually expanding into soynuts, edamame, and dairy alternatives. However it also had numerous other objectives which many or most of the members advocated. A vegetarian diet / meatless diet, an end to the feedlot system and slaughterhouse system, working to address the root causes of world hunger, right livelihood, starting small businesses, etc.

The movement had only lukewarm interest in modern high-tech soyfoods such as soy protein isolates, concentrates, and textured soy flour–because: (1) These products were highly refined. (2) Many were a by-product of the feedlot system, which raised animals for slaughter. (3) None of the early members produced (or ate) these products.

At this meeting, a new organization was created on July 30, the Soycrafters Association of North America. Larry Needleman (Bean Machines, California) was elected director. Six people were elected to the steering committee: 1. Tom Timmins, New England Soy Dairy, Greenfield, Massachusetts. 2. Lester Karplus, Vegetarian, Inc., Champaign, Illinois. 3. Steve Fiering, The Soy Plant, Ann Arbor, Michigan. 4. Steve Demos, White Wave Tofu, Boulder, Colorado. 5. Kathryn Bennett-Clarke, Southwest Tofu, Santa Fe, New Mexico. 6. Bill Shurtleff, New-age Foods Study Center, Lafayette, California.

Twelve black-and-white photographs (each 3½ by 5 inches) were taken on 28-30 July 1978 at this meeting by William Shurtleff; they and their negatives are now located in the Soyfoods Center archives. Those identified in the photos include Tom Timmins (New England Soy Dairy), Steve Demos (White Wave), Larry Needleman (The Learning Tree), Greg Weaver (The Tofu Shop), Benjamin Hills (Surata Soyfoods), and Kathryn O. Bennett (Southwest Tofu Co., Santa Fe, New Mexico).

The first four photos were taken on the evening of Friday, July 28 at the opening meeting which was held

© Copyright Soyinfo Center 2013

upstairs in a large room at the University of Michigan (Ann Arbor) student union. Most attendees are dressed informally and seated in folding chairs, but some are sitting cross-legged on the floor. In two photos, Larry Needleman is standing and speaking to the group; Tom Timmins is seated to the right of center on the floor. The remaining eight photos were taken on July 29 in a room next door to The Soy Plant (Ann Arbor, Michigan) where the Association was established. The walls are covered with labeled gallon jars of herbs and foods. The attendees are seated in folding chairs. In the two photos shown here, Steve Demos is in the center, speaking.

Note: The last five frames on this reel of film are photos of people making tofu at the New England Soy Dairy in Greenfield, Massachusetts.

3748. Bean supplies. 1978. Ann Arbor, Michigan. 1 p. Unpublished manuscript.
• ***Summary:*** This handwritten, one-page list of soybean suppliers was compiled by various tofu makers during the foundation meeting of the Soycrafters Association of North America, July 28-30, 1978, Ann Arbor, Michigan. Each entry has three parts: Shop [buying the soybeans], supplier [of the soybeans] and address, and price (in cents/pound). In some cases the organic status and/or variety name is given.

(1) White Wave: Living Farms, Tracy, Minnesota. 17.5 cents/lb. [organic]. (2) Swan Food: Golden Acres, Illinois (certified organic). 20 cents/lb. (3) Nupro Foods / Soywaze Tofu: Arrowhead Mills, Denver wholesale. 21 cents/lb. (4) Magic Bean Co-op: Inter-Community Co-op, 1335 Gilson, Madison, Wisconsin 53715. From Columbus, Wisconsin. 21 cents/lb. (5) Happy Dragon Tofu, Laurelbrook Natural Foods. 18-20 cents/lb.

(6) Rebecca Miller [Rebecca Uchida, MU Tofu], GIP-C Warehouse, St. Charles, Minnesota (organic). 19 cents/lb. (7) Joy of Soy: Ed & Helen Kranz, Diamond K Enterprises, St. Charles, Minnesota. Corsoy: 14 cents/lb, Veg: 16 cents/lb. (8) The Tofu Shop–Rochester, New York: Logan Bros. Farms, Fort Plain, New York. 13.5 cents/lb. (9) Southwest Tofu, Rt. 2, Box 234, Santa Fe, New Mexico 87501: New Life Food Co-op, Santa Fe, New Mexico. 21 cents. (10) The Soy Plant, 211 E. Ann, Ann Arbor, Michigan 48104. Phone: 663-0500: Tom Vreeland, 5861 Geddes Rd., Ypsilanti, Michigan. 13.34 cents/lb. Cleaned. 14 years–no herbicides or pesticides. Beeson variety.

(11) Lecanto Tofu: Ken McCaleb, Clarence, Louisiana. 24 cents/lb. Organic. (12) New England Soy Dairy: New Life, Tracy, Minnesota. Prize: 19.25 cents/lb. Organic. (13) Crystal Hills: Logan Bros., Fort Plain, New York. 17.25 cents/lb. Organic.

Note: Of the 13 soyfoods manufacturers listed, 6 (almost 50%) are buying organic soybeans.

3749. Bellicchi, Kathy. 1978. New England Soy Dairy. *East West Journal*. July. p. 42-44.
• ***Summary:*** A good history of and introduction to the company. "New England Soy Dairy began a year and a half ago with four partners, Tom Timmins, Kathy and Ira Leviton, and Michael Cohen. Before they got together, Tom was working for a natural foods distributor [Llama, Toucan & Crow], Kathy and Ira were running a natural foods bakery, and Michael was living in Virginia in a satellite community of The Farm (an experience which provided him with a sound working knowledge of soybeans)... They went into business as the Laughing Grasshopper Tofu Shop..." Later the company moved to a much larger facility on the outskirts of Greenfield, Massachusetts. Today they make 1,600 lb of tofu per 8 hour day.

The company presently produces only tofu. However they are in the "process of perfecting a variety of other soy products, including soy milk, soy mayonnaise, dips for crackers and spreads for sandwiches, tempeh (split, hulled soybeans that are fermented), age (deep-fried tofu), and, eventually, ice cream."

Photos show: A barrel of soy milk being curded with nigari. Arthur Braverman standing by the tofu-making equipment at the center of the plant. Tofu being pressed in forming boxes. Ira Leviton carrying a tray of tofu ready for packaging.

3750. **Product Name:** Tofu.
Manufacturer's Name: Bellingham Tofu Works.
Manufacturer's Address: 2112 "J" Street, Bellingham, WA 98225. Phone: 206-676-1989.
Date of Introduction: 1978. July.
How Stored: Refrigerated.

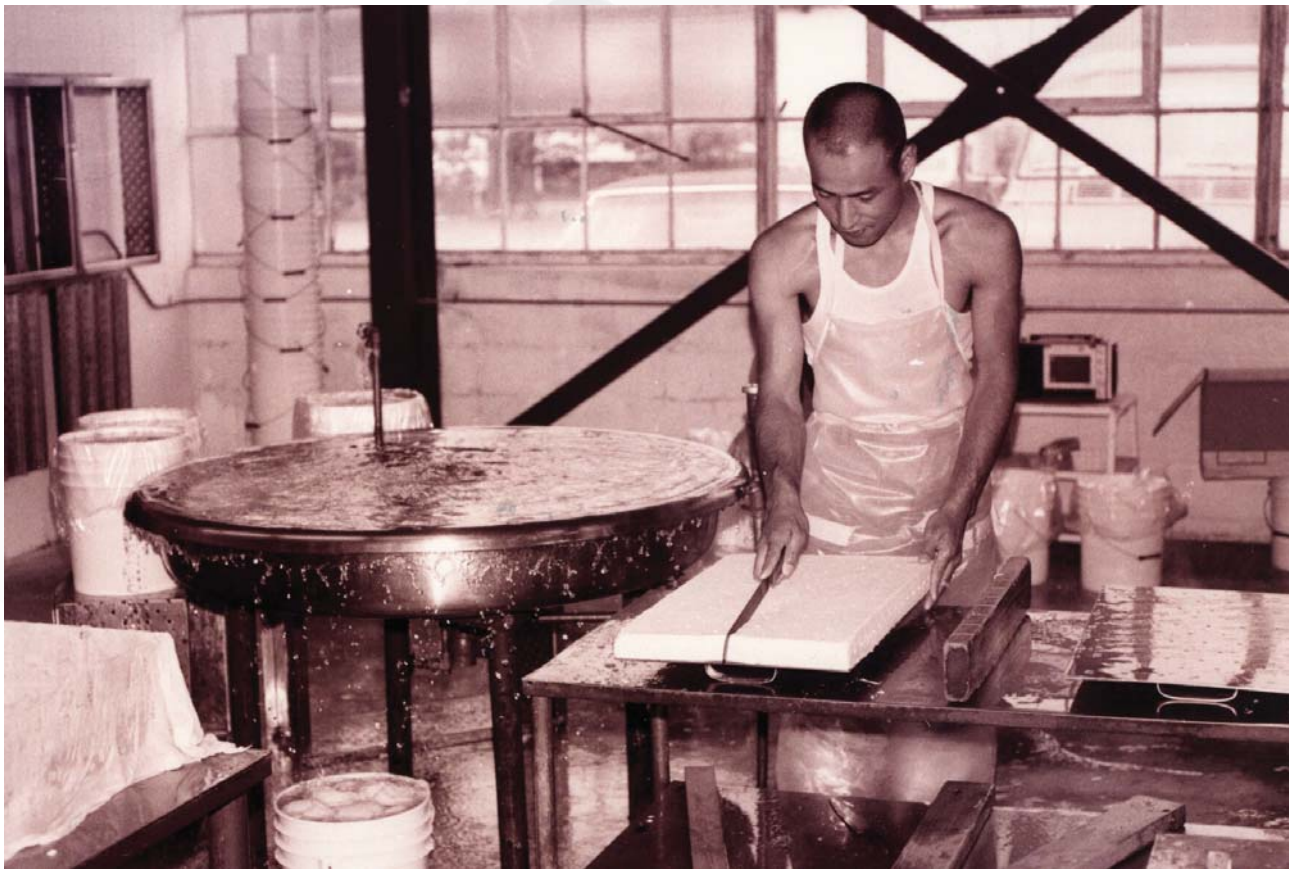
3758. Photographs of people making tofu at New England Soy Dairy in Greenfield, Massachusetts, 31 July 1978. 1978. Greenfield, Massachusetts.

• ***Summary:*** These five black-and-white photographs (each 3½ by 5 inches; see next page) were taken on 31 July 1978 by William Shurtleff, when he and Wataru Takai visited the Soy Dairy shortly after the Soycrafters conference in Ann Arbor, Michigan. The photos and their negatives are now located in the Soyfoods Center archives. They show: (1) Grinder, pressure cooker and hydraulic press in operation. (2) Richard Leviton stirring nigari into hot soymilk in a curding barrel. (3) Richard Leviton ladling curds into a forming tray on a pressing table. (4) Shohaku Okumura, a Japanese Buddhist monk, cutting the finished tofu with a special stainless steel knife; a circular cooling tank, filled with water, is in the background. (5) Ditto, with Wataru Takai in the background.

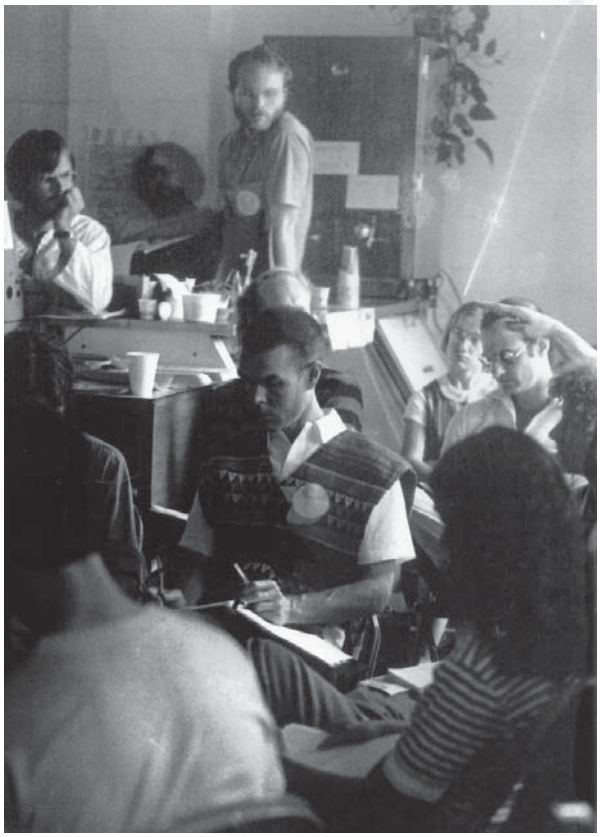
3759. Photographs taken at the foundation meeting of the Soycrafters Association of North America in Ann Arbor, Michigan. 1978. Ann Arbor, Michigan.

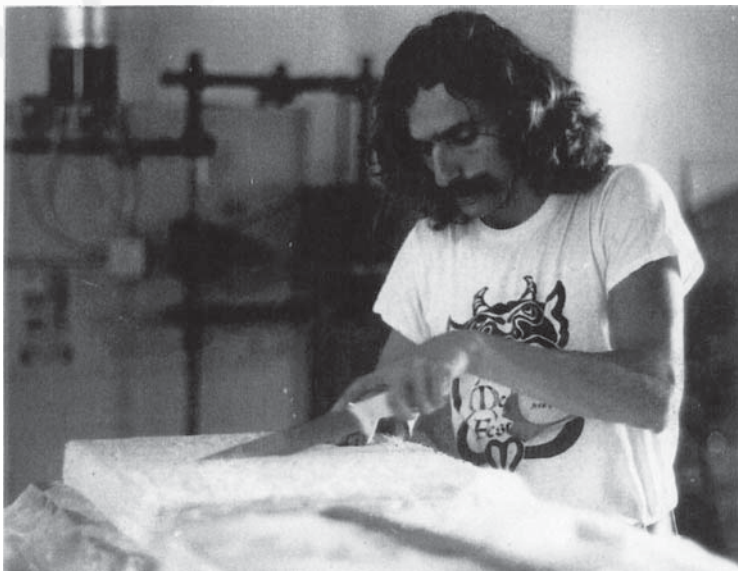
• ***Summary:*** These photos were taken (by an unknown

© Copyright Soyinfo Center 2013



© Copyright Soyinfo Center 2013





© Copyright Soyinfo Center 2013

photographer from The Soy Plant) during the First Annual Soycrafters Conference (July 1978), hosted by The Soy Plant in Ann Arbor. Six of the photos are black-and-white, 5 by 7 inches, two each taken during an afternoon meeting in an herb shop, during lunch, and during a demonstration of making tofu by members of The Soy Plant. People clearly visible include Les Karplus, Kathryn Bennett-Clarke, Ken Lee, Andy Schecter, Pat Aylward, William Shurtleff, Larry Needleman, Jean Huffman (Lecanto, Florida), Jerry MacKinnon (cutting a large block of tofu into cakes), and Steve Fiering (pouring soaked soybeans into the hopper of a grinder).

Seven of the photos are color, 3½ by 5 inches, one each taken during the first evening meeting and during an afternoon meeting, and five taken during a demonstration of making tofu and other soyfoods by members of The Soy Plant. Clearly visible are Steve Fiering, Jerry MacKinnon, William Shurtleff, Andy Schecter, Dan Ecclestone, and Yasuo ("Yoshi") Yoshihara.

Two large (8½ by 11 inches) photos show Mike Kelly, dressed in a white T-shirt and apron: (1) Holding a ladle as soymilk runs into the filter cloth over a curding vat; (2) Ladling curds into a cloth-lined forming box.

There are also thirty tiny (1 by 1½ inches) black-and-white photos in the form of proof sheets. Clearly visible are Steve Fiering and Jerry MacKinnon (The Soy Plant), Jack Mizono (Azumaya), Steve Demos (White Wave), Christopher Hills (Surata Soyfoods), Jamie Stunkard and Pat Aylward (Joy of Soy), and Brian Schaefer (Evanston, Illinois).

Talk with Steve Fiering, a founder of The Soy Plant in Ann Arbor. 2000. Dec. 3. Chris Coon of The Soy Plant might have taken the above photos. The Fourth Avenue Food Co-op was around the corner from The Soy Plant's location at 211 East Ann St. They had a small herb section in their building. When The Soy Plant took over 211 East Ann St. they had one room of extra space facing the street. The food co-op moved their herb section into that room and expanded it to fill the room. They shared a portion of the rent on the space with The Soy Plant. The herbs were sold in gallon glass jars displayed on floor-to-ceiling wooden shelves.

3760. Shurtleff, William. 1978. Report on trip to first meeting of Soycrafters Association of North America (Ann Arbor, Michigan, July 28-30), and subsequent trip around USA with Mr. Wataru Takai visiting tofu companies (July 30 to Aug. 9). P.O. Box 234, Lafayette, CA 94549. 2 p. Aug. Unpublished manuscript.

• ***Summary:*** July 16-23–Mr. Takai (Director of the Overseas Department for Takai Tofu & Soymilk Equipment Co. in Ishikawa-ken, Japan) flies into San Francisco, California, from Japan. He stays in San Francisco, and is present at the installation of a Takai tofu system at Tokyo Foods (Tokyo Food Co.; Mr. Horinouchi) in San Mateo, south of San Francisco. Shurtleff drives Mr. Takai to visit various tofu makers in the San Francisco Bay Area: Traditional Tofu in Oakland (meet with Ray Nagai and Gary Sato, who are having lots of problems), Azumaya in San Francisco (Bill Mizono), Quong Hop in South San Francisco (Stanley Lee), and Wo Chong in South San Francisco (Walter Louie).

July 24–Shurtleff and Aoyagi drive Mr. Takai to Lake Tahoe, where they all stay for two days and one night at the Shurtleff family cabin near Meeks Bay. July 26–The first Takai catalog of small and medium scale tofu equipment (printed with dark brown ink on glossy white paper) arrives in the USA.

July 27–Takai and Shurtleff fly together from San Francisco to Ann Arbor, Michigan, on an afternoon flight.

July 28-30–Meeting in Ann Arbor of about 70 soycrafters (mostly tofu makers) from around the United States. The conference opens on the evening of Friday, July 28. The first meeting is held upstairs in a large room at the University of Michigan student union–slide shows and discussions. Attendees stay in the university dormitory–which is largely empty since it was summer. On Saturday there are meetings and practical workshops throughout the day at The Soy Plant, 211 E. Ann St., several blocks from the university. Mr. Takai notes: "New tofu makers are young vegetarian. Almost all Caucasian with long hair and beards. They eat tofu instead of meat." On Sunday, July 30, the Soycrafters Association of North America is founded. Steve Fiering, Jerry MacKinnon, Sue Kalen, and co-workers at The Soy Plant (211 East Ann St.), in Ann Arbor, Michigan, organized and hosted the meeting–which was a great success. We elected an executive director (Larry Needleman of Bean Machines, California) and a Steering Committee [board of directors] of six: Tom Timmins, New England Soy Dairy, Massachusetts. Lester Karplus, Vegetarian, Inc., Illinois. Steve Fiering, The Soy Plant, Michigan. Steve Demos, White Wave Tofu, Colorado. Kathryn Bennett-Clarke, Southwest Tofu, New Mexico. Bill Shurtleff, New-age Foods Study Center, California.

After the meeting, Shurtleff and Takai travel around the United States, by airplane and rented cars, visiting existing tofu companies.

July 31, Monday–Fly from Ann Arbor to Boston, Massachusetts. From Boston we drive (using a rented car) to the New England Soy Dairy (Tom Timmins and Richard Leviton) and Nasoya (John Paino and Bob Bergwall); both are quite new companies. Mr. Takai notes: "New England was very woody and beautiful. First saw soy mayonnaise at the New England Soy Dairy; it was served in a dip at dinner. Nasoya extracted soymilk with a big hydraulic press." Mr. Takai noted that Japanese eat tofu itself, whereas Americans generally use it as an ingredient in recipes.

Aug. 1–Spend the afternoon in Boston's Chinatown visiting two or three old and well-established tofu makers. While walking through a fancy building in the area, Shurtleff

© Copyright Soyinfo Center 2013

first sees someone (a secretary) using a word processor.

Aug. 2, Wed.–Fly from Boston to New York City. Visit Hashizume (Mr. Yokoyama) and Tanaka-ya (Mr. Murakami), both well established tofu makers run by Japanese Americans. We then take the run-down, graffiti-scrawled subway to visit Tokyo Food Processing Corp. (c/o Japan Food Corp.) at 40 Varick Ave., Brooklyn (Terry Terahira and Mr. Shimazaki); this is also an established Japanese-American company that makes tofu and other Asian foods in a bombed out-looking, scary part of the city. Mr. Shimazaki notes that tofu is starting to become popular in America, and their tofu is selling well. One afternoon Shurtleff is invited to be on the Gary Null Show (radio) to talk about tofu. While in New York City, Shurtleff stays with Larry Needleman at the home of his parents (Hy & Sylvia, in New Hyde Park, just outside New York City), while Mr. Takai stays at a hotel in the city. One night Needleman and Shurtleff have dinner with Mr. Takai, as his guest, at the Rainbow Restaurant in Manhattan, near the top of some skyscraper. Mr. Takai had a black-and-white photo taken of the three seated at a dinner table; it appeared in the Japanese newspaper *Hokuriku Chunichi Shinbun* on 14 Sept. 1978, and Mr. Takai kept the original. Soyfoods Center also has a copy (8 by 10 inches, filed at Soyfoods Center). Our last morning in New York City (Saturday, Aug. 5), we three travel by subway to the southern tip of Manhattan and take a ride on the Staten Island Ferry.

Aug. 6, Sunday–Shurtleff and Takai fly to Miami, Florida, to visit Swan Foods, founded by Robert Brooks and Mary Pung; a new and extremely innovative company making tofu and soymilk (with organic soybeans), plus a line of soy yogurt, tofu cheesecakes, etc. and full-page nationwide ads. Mr. Takai recalls that Mr. Brooks wanted to start a chain of tofu businesses across the United States. Shurtleff conducts (and tapes) a long interview with Robert Brooks and Pung, and visits their home and tofu plant.

Aug. 8–Fly from Miami to Summertown, Tennessee, to visit The Farm Tofu Shop (Alan Praskin). Mr. Takai recalls visiting Light Foods in St. Louis, Missouri, to deal with problems in their FM50 roller extractor.

Aug. 10–Fly from Tennessee to Denver, Colorado, to visit Denver Tofu (Mr. & Mrs. Haruhisa Yamamoto; an old, well-established Japanese-American company, which now filters all water used to make tofu). Shurtleff travels to nearby Boulder, Colorado, to visit White Wave on Pearl Street (Steve Demos, very new and small tofu maker).

Aug. 11–Fly from Denver to Los Angeles. Visit Hinode-ya (Mr. Yamauchi; an old, well-established Japanese-American company, perhaps the largest in America).

Aug. 12–Fly from Los Angeles to San Francisco.

Note: Mr. Takai's notes of his itinerary, which he wrote for himself in Japanese before and after the trip, indicate that he arrived in San Francisco on Aug. 12. But Shurtleff's notes indicate that he arrived in San Francisco and Lafayette on Aug. 9 (Wednesday). Shurtleff has clear memories of visiting Denver Tofu and White Wave, but no memories of visiting Tennessee or Los Angeles on this trip. Mr. Takai does not recall visiting Lake Tahoe. Address: New-age Foods Study Center, Lafayette, California.

3761. Takai Tofu & Soymilk Equipment Company. 1978. Takai catalog of small and medium-sized equipment. 307 Inari, Nonoichi-machi, Ishikawa-ken 921, Japan. 6 p. 30 cm. • ***Summary:*** This catalog, printed with dark brown ink on glossy white paper, was conceived of and developed for Takai by William Shurtleff. 42 photos in small, vertical rectangular frames show many individual pieces of equipment, and 5 photos show Takai's five systems for manufacturing tofu and soymilk. The catalog is divided into five sections: (1) Front page and introduction; (2) Basic equipment; (3) Whole systems; (4) Publications and information; (5) Ingredients. For more information, contact Wataru Takai.

Letter (fax) from Wataru Takai. 1996. Aug. 2. Takai's records show that their brown catalog of small-scale equipment was printed in July 1978. Address: Ishikawa-ken, Japan. Phone: (0762) 48-1355-59.

3762. Tofu sales–By companies attending the foundation meeting of the Soycrafters Association of North America. 1978. Ann Arbor, Michigan. 2 p. Unpublished manuscript. • ***Summary:*** This meeting, which took place on 28-30 July 1978 in Ann Arbor, Michigan, was hosted by The Soy Plant. At this meeting, owners or representatives of the various companies that made tofu were asked to fill out a form (handwritten on yellow lined paper; now located in the Soyfoods Center archives) that was circulated, titled "Tofu Sales." Each company was asked to indicate the company name, type of tofu (firm, soft, nigari, etc.), packaged or bulk, size of package, minimum order (if any), and price per pound. Tofu companies that filled out the form are: Magic Bean [Milwaukee, Wisconsin], Bellingham Tofu Works [Bellingham, Washington], The Soy Plant [Ann Arbor, Michigan], Surata Soyfoods [Eugene, Oregon], The Tofu Shop [Rochester, New York], White Wave [Boulder, Colorado], Joy of Soy [Minneapolis, Minnesota], Crystal Hills [Bethlehem, New Hampshire], Yellow Bean Trading Co. [Detroit, Michigan], Lecanto Tofu [Lecanto, Florida], Nupro Foods/Soywaze Tofu [Fort Collins, Colorado], Tucson Tofu [Tucson, Arizona], Hashizume [New York, New York], Southwest Tofu [Santa Fe, New Mexico], Happy Dragon Tofu [Charleston, West Virginia], Madison Tofu Co-op [Madison, Wisconsin], New England Soy Dairy [Greenfield, Massachusetts].

Much of the tofu was sold in bulk. The wholesale price (f.o.b. the plant) was typically $0.55 to $0.85 per pound.

1978 Oct. 2. Fourteen large black-and-white portrait photos Akiko and William Shurtleff in Lafayette, California, taken by Dan Rosenstrauch, a professional photographer.

1979 July. Portrait photo of Aoyagi and Shurtleff at Amherst College in Amherst, Massachusetts, during the second annual Conference of Soycrafters Association of North America (SANA). Photo by Lionel Delevingne. Published in *New Age* magazine (Nov. 1979, p. 53).

1980 Aug. 14. Photo of Bill and Akiko by Janet Fries taken at their cottage home at 951½ Mountain View Dr., Lafayette, California: (1) Seated in front of a table of prepared tofu recipes on the living room floor. (2) Standing by the stove in their kitchen; Bill holds a metal baking tin of uncooked tofu patties while Akiko fries a batch. Published in *People* magazine (13 Oct. 1980, p. 57-58; 3.4 million circulation).

1980 Sept. 24. Photos of Bill (seated) and Akiko (standing, cooking using a wok) taken by Dan Rosenstrauch in Oct. 1978 published in large article in *The New York Times* ("A couple on a tofu mission in the West," by Lorna J. Sass, p. C3).

1983 July. Akiko in Japan with her mother and niece, Izumi Tanaka.

1983 Aug. 15. Terence Foley, director of ASA China, with 5 members of China soyfoods delegation and Bill Shurtleff standing in front of Soyfoods Center, Lafayette, California.

1983 Sept. Two color photos taken in front of newly constructed- and partly filled bookshelves in upstairs Office #1 at Soyfoods Center, 1021 Dolores Dr., Lafayette, California: (1) Bill and Akiko. (2) Bill and Steve Chen, director of American Soybean Assoc. Taiwan.

1990 March. View of front of Soyfoods Center, showing pine trees on back hillside, front lawn, white van parked in driveway, and little Joey Shurtleff playing by lawn.

1990 July 4. Four views showing inside of Office #2, with desk, window, file cabinets, and map of USA on wall.

6. 1990 Nov. William Shurtleff seated at U-shaped main desk in Office #1, working on computer, turning to face the camera.

3768. **Product Name:** Tempeh.
Manufacturer's Name: Swan Gardens.
Manufacturer's Address: Route 1, Box 216, St. Ignatius, MT 59865.
Date of Introduction: 1978. August.
New Product–Documentation: Letter from Brenda Wood. 1978-79? Undated. "We have a tofu shop producing 260-390 lb a week and we also make and sell between 40 and 50 lb of tempeh weekly, made out of the okara (160-200 lb monthly)." Shurtleff & Aoyagi. The Book of Tempeh. 1979 (July). p. 148. Soyfoods Center Computerized Mailing List. 1981. Jan. 22. Contact: Brenda Wood.

Talk with former Swan Gardens employee. 2001. Dec. 31. This tempeh was incubated in an old chicken egg incubator; it looked like a big upright wooden cabinet, about 5 feet tall, 3 feet wide, and 18 inches deep. It was probably introduced in about May 1978. Most of the tempeh was made with okara, but there was at least experimentation with whole soybean tempeh.

3769. White Wave. 1978. White Wave through The Cow of China, offers food from the kingdom of plants. We make it all here in Boulder! 100% dairyless! (Poster). 1738 Pearl St., Boulder, CO 80302. 1 p. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.
• ***Summary:*** See next page. "Organic nigari tofu, Soymilk, Soysage, Missing egg salad, Tofu mayo, Baked savory tofu cutlets, Sweet bean tofu pie, Tofu cinnamon rolls, soy-sesame bars, Energy chews, Almond butter, Cashew butter, Peanut butter, Tahini, Figgies, Date coconut bars, Tofu 'meatball' sandwiches, 'Macro' pizza, Tofu turnovers, 'Sloppy joe' sandwiches, Tempeh." Address: Boulder, Colorado.

3770. Digilio, Alice. 1978. Family out: A weekly guide to family dining. *Washington Post.* Sept. 7. p. A1.
• ***Summary:*** A restaurant review of Apricot Flower Village Restaurant, 2816 Graham Road, Lee Graham Shopping Center, Falls Church, Virginia. The 60 dishes on the menu include *Mom Pul Dow Foo* [a tofu dish].

3771. Strayer, George M. 1978. Re: Vegetable-type and field-type soybeans suited for making tofu and soymilk. Letter to William Shurtleff at New-Age Foods Study Center, Sept. 8. 1 p. Typed, with signature on letterhead.
• ***Summary:*** Mr. Strayer's company sells 3 varieties of vegetable-type soybeans. Prize (FOB price $9.00 per 60 lb sack) is the best suited for making tofu and has the highest protein content. Kanrich ($9.00) is the next best suited and has the second highest protein content, but is gradually going out of production. Kim ($9.50) has a green seed coat and is

© Copyright Soyinfo Center 2013

the lowest of the three in protein content.

Of the 7 field-type soybean varieties sold by the company (all for $8.00 per 60 lb FOB), Corsoy is the best suited for tofu production, followed by Amsoy and Hawkeye. Chief is no longer in commercial production. Address: President, Agricultural Exports, Inc., P.O. Box 266, Hudson, Iowa 50643.

3772. Rundell, Ann. 1978. Cheese-like tofu is high in protein [Lora Mermin and The Bountiful Bean Plant in Madison]. *Wisconsin State Journal.* Sept. 10.

• ***Summary:*** Lora Mermin was introduced to tofu in Japan in 1968. Then Madison got its own tofu shop [in about 1968] at 903 Williamson St. When the little co-op started to falter in June, Mermin contributed financial support. Now she works there daily with Debra Bachmann, Chris Burant... The name of the shop was recently changed to The Bountiful Bean Plant.

A large photo shows Debra Bachmann and Lora Mermin selling tofu in round plastic tubs to Mamiko Takashima, who is holding her daughter.

3773. *Hokuriku Chunichi Shinbun.* 1978. Amerika no tôfu sangyô. Wakai hakujin no gyôsha fueru. Takai-shi ni genjô kiku [The tofu industry in America. The number of young Caucasian tofu makers has increased. We talk with Mr. Takai about the current situation]. Sept. 14. [Jap]

3774. Rubenstein, Judith. 1978. Tofu: New Age hotcakes. *Fresh Ink* (*Northampton, Massachusetts*) 1(18):1, 7. Sept. 21. [1 ref]

• ***Summary:*** About the New England Soy Dairy, which now employs 20 people (14 production workers) and produces, on average, 2,400 lb/day of tofu containing 8.6 to 10% protein. The company has five owners, who constitute its board of directors. "Three of their employees are Japanese monks who live in nearby Charlemont. Their presence adds to the already spiritual atmosphere of the plant." Bud Foster's Supermarket in Greenfield was the first regular grocery to carry the New England Soy Dairy's tofu, and now Food Mart carries tofu as a regular item in 23 stores and Stop and Shop is starting to sell it as a specialty item.

Photos by Lionel Delevingne show: The inside of the plant with Ira Leviton (age 31 and a vegetarian) cutting tofu. Leviton pouring curds into cloth-lined forming box. Ira and Kathy Leviton, and Tom Timmins, standing behind a round soaking tank filled with cakes of fresh tofu.

1978. Food for the family: Soybean source of cheap protein. Sept. 27. *

3776. Lachman, Gaella; Elwell, Christian. 1978. Making miso in America. *East West Journal*. Sept. p. 54-59.
• ***Summary:*** A colorful account of making 1,000 lb of miso in the spring of 1978 with Noboru Muramoto at Asunaro, on Mt. Veeder, at 4600 Cavedale Road, Glen Ellen, California 95442. Phone: (707) 996-5365. Christian writes in the introduction that several years ago, upon returning from India and recovering with a serious bout with jaundice, he came across Naboru [sic] Muramoto's book, *Healing Ourselves* (Avon Books, 1973), "one of the few reliable guides to preventive medicine now available." After this he began to use food as medicine for the first time. Within a year he was attending seminars by Michio in Boston, Massachusetts, and learning about macrobiotics. He later learned that Mr. Kushi and Mr. Muramoto had both been students of George Ohsawa. While in Boston, Christian met Gaella, his wife to be. They left Boston to visit California, and from January to April 1978 they studied at Asunaro Eastern Studies Institute (established in the fall of 1976) in Glen Ellen, California, with Mr. Muramoto. By mid-April, in addition to miso, they had also learned to make soy sauce, saké, tofu, seitan, mochi, bran pickles, sauerkraut, tekka [miso], and bread. Natto making is also taught. A large photo shows the two of them cooking soybeans for making miso.

Note: Talk with Christian Elwell. 1996. Sept. 7. While Christian and Gaella were at Asunaro, Thom Leonard visited for a few days. Thom and Christian met and talked, recognized that they had a lot in common, and stayed in touch afterward. Christian eventually purchased Thom's Ohio Miso Co. He was already making miso experimentally, and he had plans to go back to Ohio to make commercial miso.

3777. Leviton, Richard. 1978. New developments at New England Soy Dairy (Interview). Conducted by William Shurtleff of New-Age Foods Study Center, Sept. 1 p. transcript.
• ***Summary:*** New England Soy Dairy presently makes 2,400 lb/day of tofu. The soymilk is coagulated at 85ºC. They also make soy mayo in 1 pint jars and the directors have planned to purchase a sophisticated mayonnaise production system. New products being developed are deep-fried spicy tofu, creamy tofu puddings made with fruits and carob powder, soymilk ice cream, yogurt, cream cheese, and salad dressings. "We are quietly evangelical about tofu. The company directors have long desired to make a significant impact on American food consumption patterns, and to help reduce consumption of meat eating using soyfoods instead, as a superior protein source." Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

3778. **Product Name:** Tofu Tahini Spread.
Manufacturer's Name: Michele's Beautiful Spreads and Dressings.
Manufacturer's Address: 1214 Manor Rd., Havertown, PA 19083. Later Philadelphia, PA. Phone: 215-474-8638 (9/92).
Date of Introduction: 1978. September.
Ingredients: Incl. soft tofu, sweet carrots, sesame tahini, fresh herbs (10/87).
How Stored: Frozen.
New Product–Documentation: Spot in Natural Foods Merchandiser. 1987. Oct. p. 23. "Tofu Dressing." The product seems to be named "Michele's Original Tofu Tahini Spread." The company is now named Michele's Original Gourmet Tofu Products, located at 6441 Haverford Rd., Philadelphia, Pennsylvania 19151. 9 oz. Retails for $2.55.

Manufacturer's catalog. 1987. Richard Rose review. 1987. Oct. 28. "Bland, uninspiring."

Talk with Robert Ashton of Natural Alternatives in Washington, DC. 1992. Sept. 14. Michele's Tofu Spread (which is still on the market) is very similar to the one he has long made. Note: This product is not made by Michele's Bakery in Philadelphia. Talk with John Liss of Michael's Bakery. This product is still on the market. Talk with Howard Waxman of Essene in Philadelphia (Phone: 215-922-1146). 1992. Sept. 21. He carries Michele's tofu spreads and dressings. The small business, which operates out of a store front (but does not sell retail), is run by a woman named Michele. Gives phone number of Michele's.

Talk with Michele D'Ambrosio, founder and owner of Michele's Original. 1992. Sept. 21. She became a vegetarian in 1974 in college and started making this product that year for herself and for one restaurant (named The Sunflower; she worked there while she went to St. Joseph's University in Pennsylvania. "We used to make it for a Pita Pocket, a Yogi Hoagie"). After the restaurant closed, she started in Nov. 1978 to sell it to a few health food stores (since that's all there were) in Havertown. She now made this, her first tofu product, out of the pantry of her home in Haverford. It was her original idea and it is still her best-seller. Other people have copied the idea since. Her company made only this one product for a number of years. In 1980 she changed the company name to Michele's Original and moved to her present address, a commercial deli kitchen at 6441-43 Haverford Ave., Philadelphia PA 19151. Phone: 215-474-8638. But she still lives in Havertown.

Talk with Michele D'Ambrosio. 1998. June 29. Her company produces vegetarian sandwiches made with soy meats (such as tofu and baked tofu), plus tofu spreads, tofu dressings, tofu salads, and tofu in the pasta. It's a whole vegetarian menu. She is age 48. The Tofu Tahini, a spread, is still her best-seller. It is prepared with carrots and other vegetables, which are pureed, then tahini is added; its like an orange whipped cream. She buys her tofu from a Korean company located in Chinatown in Philadelphia, Tung Yu

© Copyright Soyinfo Center 2013

[which is actually a wholesale distributor for tofu made by Sun Yee]. Her distributors are Cornucopia, Stow Mills, and Neshaminy Valley. In 1979 her community published a little cookbook titled *The what to do with tofu cookbooklet: Recipes for soybean curd.* It contained cute illustrations. It used to be distributed by her co-op, the Grow-cery, later renamed the Philadelphia Co-op. Her community practiced meditation from Guru Maraji; she is still his disciple.

3779. Needleman, Larry. 1978. Soycrafters Association of North America (News release). Bodega, California. 1 p. Sept.
• ***Summary:*** "From July 29 to 31 over seventy people from throughout the United States, involved in the production of soyfoods (foods prepared from soybeans) met in Ann Arbor, Michigan and established the Soycrafters Association of North America (SANA).

"A nonprofit organization, SANA is dedicated to informing people all over our continent about the variety of soyfoods available to them and the advantages and ways to include them in their diet."

"Wherever these foods have been introduced in the United States, they have been enthusiastically received. Seventy new tofu shops and soydairies, run by soycrafters in 31 states have begun producing these new soyfoods in the last two years, bringing the total to 140 such businesses in the United States, with new shops starting and new products coming on to the market almost daily. Many shops find their business doubling every six months!" Address: Director, SANA, P.O. Box 76, Bodega, California 94922. Phone: 707-876-3352.

3780. Needleman, Larry. 1978. Soycrafters Association of North America (Leaflet). Bodega, California. 1 p. Front and back. Sept.
• ***Summary:*** Contents: Goals & activities: Communication among soycrafters, information center, publicity, health & quality standards, soybean access and quality. Publications ("The Association will publish *Soycraft* four times a year"). Membership: Active producer membership ($15/year dues), Contributing membership ($10/year). Officers: Director–Larry Needleman, Bean Machines, California. Steering Committee: Tom Timmins, New England Soy Dairy, Massachusetts. Lester Karplus, Vegetarian, Inc., Illinois. Steve Fiering, The Soy Plant, Michigan. Steve Demos, White Wave Tofu, Colorado. Kathryn Bennett-Clarke, Southwest Tofu, New Mexico. Bill Shurtleff, New-age Foods Study Center, California. Address: Director, SANA, P.O. Box 76, Bodega, California 94922. Phone: 707-876-3352.

3781. **Product Name:** Soymayo. Eggless Imitation Mayonnaise (Soymilk Based).
Manufacturer's Name: New England Soy Dairy Inc.
Manufacturer's Address: 305 Wells St., Greenfield, MA 01301. Phone: 413-772-0746.
Date of Introduction: 1978. September.
Ingredients: Vegetable oil, water, organic soybeans, apple cider vinegar, sea salt, spices, guar gum.
Wt/Vol., Packaging, Price: 15 oz, 32 oz, or 1 gallon jars.
How Stored: Refrigerated.

New Product–Documentation: Interview with Richard Leviton. 1978. Sept. Label. 1978, undated. 4 by 3 inches. Paper. Blue on white. "Eggless. Imitation. No preservatives." Reprinted in Tofu & Soymilk Production. 1979. p. 254, and in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. New England Soy Dairy Product and Price List. 1978. Oct. 12. Ad in Soyfoods. 1980. Summer. p. 11.

3782. **Product Name:** Fried Rice & Tofu Sandwich (In a Chapati). Renamed Brown Rice & Tofu Sandwich in late 1978 by Chris Smith.
Manufacturer's Name: Rice House.
Manufacturer's Address: 440 Boylston St., Brookline, Massachusetts.
Date of Introduction: 1978. September.
New Product–Documentation: Talk with Paul Duchesne. 1989. July 31. Paul started the company making this sandwich out of The Garvey House, a macrobiotic study house in Brookline near Boston, in Sept. 1978. He had developed the product in California in Nov. 1977. When the business expanded, he moved it into his own house at 333 Brookline Ave., in Brookline. He gave the company to Chris Smith, who renamed the product to Brown Rice and Tofu Sandwich and later sold it for several thousand dollars to some people who owned a health food store in the city. They moved the business to Jamaica Plain. The company still exists and is named Rice House, but Paul has been unable to get in touch with the owner. Can't get a street address. People have seen their Brown Rice & Tofu sandwich in stores. Paul thinks they are located in Jamaica Plain. They deliver to Erewhon stores.

Talk with Marty Roth. 1989. Aug. 17. When Jack Garvey left Boston in the fall of 1978, Marty took over the Garvey study house at 440 Boylston St. in Brookline.

© Copyright Soyinfo Center 2013

Paul Duchesne moved in and asked Marty if he could do a business in the house. Paul had a plywood board the size of a Ping-Pong table. He and his family would get up at 4:00 in the morning, cook brown rice, make those sandwiches, and deliver them. The study house offered an early morning meditation session and the sandwiches had to be done by the time it started. The Duchesne family would rush in from the kitchen and get on their zafus and meditate. Marty learned how to make the sandwich from Paul.

Talk with two Natures Food Centers in Boston. The one in Cambridge carries Rice House sandwiches but says the woman owner does not give out her address or phone number, not even to stores that sell her products. But she is located somewhere in Somerville, Massachusetts. She is also not listed in the phone directory.

3783. Shurtleff, William. 1978. New food from old ways. *Agenda* (*US-AID, Washington, DC*) 1(8):18-20. Sept.
• ***Summary:*** This periodical is published by the U.S. Agency for International Development. Discusses: Soybeans and world hunger, the inefficient ways that soybeans are used in industrialized countries by feeding them to animals, and alternative ways of using them in foods such as tofu, soymilk, tempeh, and miso. Address: New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549.

3784. **Product Name:** Miso Cheese (Tofu Fermented in White Miso).
Manufacturer's Name: Soy Plant (The).
Manufacturer's Address: 211 East Ann St., Ann Arbor, MI 48104. Phone: 313-663-0500.
Date of Introduction: 1978. September.
Ingredients: Firm tofu, miso.
Wt/Vol., Packaging, Price: Sold fresh in slices in a deli.
How Stored: Refrigerated.
New Product–Documentation: Interview with Steve Fiering. 1988. June 10. He is at 30 Newell Rd., Palo Alto, California 94303. Phone 415-326-7123. "This product was developed in the fall of 1978 by a person name Jura (pronounced Ju-RAH) McDowell, who was a black American Rastafarian and a vegan from Alabama. He made very firm tofu, sliced it into ½-inch-thick slices, and embedded it in young, usually sweet white miso in a crock. Some of the miso they made in house, and some they bought from Westbrae, who bought it from Miyako/Cold Mountain in Los Angeles. The tofu was not wrapped in cheesecloth. After about 4-6 weeks they would remove the tofu, scrape off the miso for use later in cooking, then sell the tofu slices in the deli. The tofu was never pureed (like Simply Natural did) to give a cream-cheese consistency. By the time it had been through the fermentation it has lost the rubbery aspect of its texture. It was pretty soft, but we never processed it any further. It was sort of like the cream cheese you buy in a slab, wrapped in a piece of Saran. It was always quite tasty when we would make it. I always thought it was great, and a great original idea. It was very rich, kind of like Brie. We used to love it when we could get it. We just never sold it outside our Soy Deli and even in the Deli we usually had a very limited amount of it. People would use it as a spread. It was quite expensive for us to make, probably over $6 a pound, mainly because of the cost of the miso. That was prohibitive, so it never really became anything. We could never make any money on it. Jura also made delicious stuffed Agé [deep-fried tofu pouches] and yuba rolls that were sold in the Deli. He did a lot of experimenting."

3785. **Product Name:** Tofu Tahini Spread.
Manufacturer's Name: Soy Plant (The).
Manufacturer's Address: 211 East Ann St., Ann Arbor, MI 48104. Phone: 313-663-0500.
Date of Introduction: 1978. September.
Ingredients: 1980: Tofu, tahini, sunflower seeds, miso [sweet], shoyu, corn oil, vinegar & spices.
Wt/Vol., Packaging, Price: 12 oz plastic tub.
How Stored: Refrigerated.
New Product–Documentation: Steve Fiering. 1979. Whole Foods. Jan. p. 38, 40. "A Midwestern Interest in Tofu." This is included in a list of products presently produced by the company. Talk with Steve Fiering. 1988. June 10.

Square Label for "Tofu tahini sandwich spread" in Soy Plant scrapbook from about 1980. 3 by 3 inches. Black on white. 12 oz. Zip: 48104.

3786. *Soyanews* (*Sri Lanka*). 1978. The seed that meets a million needs. 1(1):3. Sept.
• ***Summary:*** Gives a brief history of the soyabean worldwide (except in Sri Lanka) and its many uses are described briefly in the following categories: Mature beans: Whole, sprouts, flour, curds, roasted, milk, feeds. Oil. Lecithin: Food and non-food. Meal: Food products, feeds, industrial protein. Plants (incl. forage as silage, hay, and soilage). Immature beans (canned, dehydrated, fresh, quick-frozen, pickled, succotash).

Above each of the following words or terms is a photo: Infant foods. Cereal foods. Pharmaceuticals. Building materials. Adhesive. Feed (shows cows).

3787. Swan Food Corp. 1978. Swan Foods: Remember the name! (Ad). *Whole Foods or East West Journal* Inside rear cover.
• ***Summary:*** This full-page ad is almost identical to one which appeared in Alternatives magazine (Miami, Florida) in July/Aug. 1978 (p. 49) but with the following three small differences: (1) This full-page ad was published in a more expensive and prominent location–on the inside rear cover. (2) There is additional information about Soyogurt (A cultured soy product available in a variety of fruit flavors). (3) Of the iced herbal beverages, Sassafras has been added

© Copyright Soyinfo Center 2013

and Red Quencher removed. At the end of the beverage column is now written: "and a variety of blends."

Note: This ad was published in about August or September 1978 in an unknown counter-culture magazine in America. It was published on the inside rear cover. On the rear cover is an ad for Natural Nectar ice cream. Because of the latter ice cream ad, it seems most likely that this ad appeared in *Whole Foods*, which began publication in Jan. 1978. Alan Richman of Whole Foods (Jan. 1998) says the current publisher is now missing half of the 1978 issues and is missing 2 issues from 1979. While looking at a copy of this ad, he looked through all issues for these two years and could not find the ad. Address: The Soybeanery, 5758½ Bird Rd., Miami, Florida, 33155.

3788. Pollack, Susan R. 1978. Food for thought: Activist turns to the lowly soybean as tool to promote global change. *Detroit News.* Oct. 4. p. A-1, col. 5.
• ***Summary:*** The activist is Jerry MacKinnon, age 29. Five years ago he was shivering on the streets of Washington, DC, with thousands of angry anti-war activists protesting President Nixon's second inauguration. He's still struggling for social change, but now he's making tofu with six other vegetarians at The Soy Plant in Ann Arbor, Michigan. He has focused his political energy on two less dramatic movements: (1) Promoting the inexpensive, protein-rich soybean as an answer to world hunger; (2) Expanding America's network of "new wave" cooperatives. Still part of the Revolution, now he talks less and works more.

Tim Huang, is an emergency medical instructor who owns Yellow Bean Trucking Company, which distributes The Soy Plant's products. He also believes that soybeans are a revolutionary food–"right off the top of the food chain." China's 800 million people use them to survive in place of meat. America, the world's leading producer of soybeans, feeds them to cows instead of to people.

The Soy Plant, at 211 East Ann St. in Ann Arbor, makes tofu, and soymilk (plain and flavored with honey-vanilla). The products are distributed to co-ops and natural food restaurants throughout Michigan and neighboring states by the Michigan Federation of Co-ops, Midwest Natural Foods of Ann Arbor, and Huang's trucking company.

The nonprofit Soy Plant has become a thriving wholesale-retail operation in less than a year. The work is shared and decisions are made jointly. The investment of almost $7,000 for equipment and supplies has come mostly from community residents, who receive as interest for each $100 loan a pound of tofu a week for the rest of their lives.

The plant is operating at near capacity, making 2,000 lb/week of tofu. But it's hard work and members have to be self-motivated.

Recently [in July] The Soy Plant hosted, in Arbor, the first national convention of tofu makers.

Sue Kalen, age 22, likes to experiment with tofu. She has made such delicacies as tofu pies, filled with raisins, banana, coconut, and carob; tofu tahini spread, and spiced tofu with poppy seeds, mustard, cayenne, garlic, and sunflower seeds.

According to Dr. Zane Helsel, an agronomist at Michigan State University, the soybean has become Michigan's fastest growing crop in recent years. Among grains, it is second only to corn as a cash producer. About 720,000 acres/year are grown in the state's southern five tiers of counties.

A photo shows Jerry MacKinnon pouring soaked soybeans into the hopper of a grinder and Steve Fiering pouring soybeans into a soaking tank. Address: News staff writer.

3789. Ramirez, Linda O. 1978. 2 sansei tofu makers in Oakland determined to be "successful." *Hokubei Mainichi.* Oct. 5. p. 1.
• ***Summary:*** Traditional Tofu, Inc., on San Pablo Ave. in Oakland, has $67,000 of Takai tofu making equipment. Owners Ray Nagai and Gary Sato have been making tofu here since Feb. 1978. They learned the business from a long-established tofu maker in Oakland. They are upset with the way Takai has treated them and with the many equipment problems they have had. A photo shows Nagai and Sato standing next to their automated tofu plant. Address: Staff, 1746 Post St., San Francisco.

3790. Tofu Shop (The). 1978. Greetings from the Tofu Shop, Telluride, Colorado (Leaflet). Telluride, Colorado. 1 p. Oct. 14.
• ***Summary:*** "We're writing you to determine if you are interested in stocking our locally-made tofu in your place of business.

"At the present time, there is a possibility that Arrowhead Distributors will be delivering Tofu Shop tofu to businesses on the Western slope.

At the bottom of the questionnaire are five questions: (1) "Do you presently carry tofu? Yes / No___". (2) What are your present weekly tofu sales, approximately? Please specify pounds or packages. (3) Are you interested in carrying Tofu Shop tofu? Yes / No __? (4) What is your present Arrowhead delivery schedule? Day ___ Weekly ___ Bi-weekly ___ Doesn't deliver ____. (5) What will your projected average order be? ____ Pre-packaged, 12-16 oz. blocks. ____ Bulk, 10 or 20 lb. Address: 116 N. Oak St., P.O. Box 69, Telluride, Colorado 81435.

(using the Learning Tree tofu kit, $12.95), and gives a recipe for a Mushroom-tofu dish.

3792. Smith, Allan K. 1978. Re: Work with soy foods. Letter to William Shurtleff at New-Age Foods Study Center, Oct. 22. 1 p. Typed, with signature. [1 ref]
• ***Summary:*** "I was very please to receive your letter of September 30 and your very generous supply of literature on tofu, miso and other soybean foods. Your research, publication and extension of the consumption of soy foods is far beyond any previous work in this area and should be a great contribution in solving world food problems. You mentioned your forthcoming book on tempeh; I will be very glad to se a copy when it is available.

"About two years ago I started collecting data on nutritional problems in the U.S. It was reported at that time that the life expectancy of our people was about 75-77 years which rated us at about 25th among nations in longevity. It was apparent that this rating was caused by our poor diet, which consisted, among other things, of too much hard fats and sugars. At that time it was my intention to write a pamphlet on nutrition directed towards the housewife, with the home that such data would encourage her to modify the diet for her family and improve their health and longevity.

"Unfortunately my health failed at that time and I lost interest in the project. However, after an operation to remove an aneurysm [an excessive localized enlargement of an artery caused by a weakening of the artery wall], which caused the problem, I have made a slow but good recovery.

"I have mentioned this episode to point out that your progress in increasing the use of soy protein in our diet can be a substantial factor in reducing the use of hard fats in our diet and thus improve the health and longevity of our people.

"Your success in marketing soy foods in the U.S. suggests that our people will accept soybeans in their diet and replace much of the fatty meats which are detrimental to our health. It will be a valuable contribution to our health if this modification in our eating habits can be developed. However we need a nutritionist to do some additional research which will call attention to the present diet of our people and show the advantage of soy protein in our diet.

"I shall look forward to hearing from you when convenient.

"With best personal regards, I am sincerely..." Address: 4 Nacozari Lane, Hot Springs Village, Arkansas 71901.

3793. Schwinn, Richard. 1978. Tofu shop equipment and distribution study report. Telluride, Colorado. 2 p. Oct. 24.
• ***Summary:*** This report will address two key questions: (1) Whether or not to buy approximately $1,000 in new equipment to reduce labor costs. (2) Whether or not to use Arrowhead Distributors to distribute tofu around the South Colorado area.

Analysis: (1) The shop will recover this investment in about 13 months. "We consider this an attractive investment." (2) Suggests a complex solution. Address: 116 N. Oak St., P.O. Box 69, Telluride, Colorado 81435.

3794. Shurtleff, William. 1978. Re: The Farm Vegetarian Cookbook. Letter to Margaret Gaskin, Laurie Praskin, Cynthia Bates, and Louise Hagler, The Farm, Summertown, Tennessee, Oct. 25. 1 p. Typed, with signature on letterhead (photocopy).
• ***Summary:*** "This morning I bought a copy of your new edition of *The Farm Vegetarian Cookbook* at Shambala in Berkeley and spent all day reading it. Akiko too. We both think it is a really outstanding job, one that will benefit people around the country and the world, and one that we look forward to learning a lot of new things from. The book has all the touches, so artistically and sensitively presented. We laughed over the illustration on page 95 of milking the cow-sized soybean or soybean sized cow, at the parfait on p. 102-03 that expands the more you open the book, etc. We look forward to trying out many of your soy recipes. With a book like that out, we feel we can retire from our work of trying to turn the world on to soy. You've done it, or at least provided a good start.

"We have a number of new books on soyfoods coming out soon, and you can be sure that we will make very favorable mention of your book in all of them. We will even try to get it into the Ballantine Books edition of the pocketbook mass-market *Book of Tofu* (175,000 copies first printing, out this January) but it may be too late. There will be numerous references in our *Book of Tempeh, Tempeh Production,* and *Tofu & Soymilk Production.* In the latter would you mind if we used a few of your recipes (e.g., Ice Bean) with credits, of course?" Address: New-Age Foods Study Center: U.S.A.–P.O. Box 234, Lafayette, CA 94549. Phone: 415-283-2991.

3795. Hevrdejs, Judy. 1978. Tangy Thai fare blasts the bland: Cheap eats. *Chicago Tribune.* Oct. 27. p. C5.
• ***Summary:*** One of the best Thai restaurants in the Chicago area is Thai Cousin, 5019 N, Western Ave., The menu is large and offers a broad assortment of inexpensive dishes–not all fiery hot. An "interesting appetizer is *tau hutod* ($1.75), which is delicately flavored, fried tofu (bean curd)."

3796. Daniels, Stevie. 1978. I was a sucker for protein. *East West Journal.* Oct. p. 60-62.
• ***Summary:*** Her introduction to soyfoods came the hard way–by trying a "can of textured soy protein"–the food that could end world hunger. She tried preparing it in many different ways. "Nothing worked. It was terrible. I threw it on the compost pile and watched squirrels, rats, and chipmunks detour around it for weeks... It was easy to see why even starving people gave thumbs down to this orangish, gloppy, spoiled-tasting canned concoction." She

© Copyright Soyinfo Center 2013

learned that the oil companies extract the oil from soybeans with hexane solvent then use the defatted leftovers to feed livestock and make textured soy protein.

Later she became a vegetarian, tried cooking whole soybeans, and then "fresh soybeans" in the pods–which a local organic farmer brought to her co-op. Finally one day she found a brochure stating: "The four main foods made from soybeans are tofu (soybean curd), tempeh (fermented soyburger), shoyu (soy sauce), and miso (fermented bean paste).

"I was amazed. The Eastern people, one-fourth of the world's population, had known how to use soybeans for centuries. I learned they also sprouted the beans..." She tried these foods and liked them. Bill Shurtleff stopped by the EWJ's office after attending the first national soyfood conference in Ann Arbor, Michigan. She describes their discussion, including the founding of the Soycrafters Association of North America. At the end is a list of resources and a bibliography of EWJ articles on soyfoods: Larry Needleman (Soycrafters Assoc. of North America, P.O. Box 76, Bodega, CA 94922. Phone: (707) 876-3341). Bill Shurtleff, The Farm (Summertown, Tennessee), Asunaro Eastern Studies Institute (Attn: Dina Drago, 4600 Cavedale Rd., Glen Ellen, California 95442. Phone: (707) 996-5365. Miso and shoyu production taught by Naboru [sic, Noboru] Muramoto).

3797. *East West Journal.* 1978. East West mail order (Ad). Oct. p. 68-69.
• ***Summary:*** "Sea vegetables: Arame, Agar-agar, Dulse, Hiziki [sic], Kombu, Nori, Wakame.

"Soy products: Mugi (barley) miso. 1 lb / $1.70.

"Genmai (brown rice) miso. 1 lb / $1.63.

"Kome (rice) miso. 1 lb / $1.35.

"Hacho miso (Soy only). 1 lb / $1.95.

"Tamari soy sauce. 1 pt (16 oz) / $1.49.

Condiments: Kuzu (arrowrootlike powder). Nigari (to make tofu). Erewhon Corn Chips (Tamari seasoned). Tekka (salty condiment).

Books:

"The Book of Miso, $7.95 postpaid."

3798. Jacobs, Leonard. 1978. Menage: My family has been making soymilk and tofu practically every day, but we cannot figure out what to do with the leftover soybean pulp (okara). M. Weintraub, Gabriola, California. *East West Journal.* Oct. p. 12.
• ***Summary:*** Answer: One of the best uses for okara is in making tempeh. You can also steam okara with vegetables and compost the rest. Address: Publisher, East West Journal.

3799. Jagannath Rao, K.V. 1978. Studies on the effect of replacement of cow's milk by soymilk in the preparation of dairy product. MSc thesis, Dairy Technology, University of Agricultural Sciences, Hebbal, Bangalore. 90 p. Oct. [126 ref. Eng]
• ***Summary:*** The production of milk in India is estimated to be 23.5 million metric tons per annum. The per capita availability of milk in India is about 113 gm/day as against the recommended level of 280 gm/day. Milk contributes only about 10% of the protein to the average Indian diet. A recent Economic survey showed that 20 to 40% of the people in India were below the "poverty line." "Attempts have been made in using soy milk in milk extender at Jawaharlal Nehru Krishi Vishva Vidyalaya, Jabbalpur. G.B. Pant University of Agriculture and Technology, Pantnagar have developed equipment and facilities for manufacturing soymilk on a large scale. Soymilk is also commercially manufactured at Nagpur and Poona under different trade names. Dairy Project of the University of Agricultural Sciences, Hebbal, Bangalore is regularly manufacturing the flavoured soymilk which is being marketed to the staff and students of the University."

The author prepared soymilk using a modified version of the Illinois Method. Some was used as is and some was mixed in varying proportions with cow's milk to make "modified milk." Some combinations were flavored. Using modified milk, the author also prepared paneer (coagulated with citric acid), Kalakand, ice cream. Pasteurized flavored modified milk containing 40% soymilk was well accepted. Raspberry-flavored modified milk was liked best, followed by rose, cardamom, vanilla, and pineapple. Pasteurized flavored modified milk containing 50-70% soymilk was also well accepted. Paneer, kalkand, or ice cream containing 20-40% soymilk were well accepted. Address: Bangalore, India.

3800. **Product Name:** Tofu, and Soysage.
Manufacturer's Name: Macon Tofu.
Manufacturer's Address: Macon, Georgia.
Date of Introduction: 1978. October.
New Product–Documentation: Talk with Michael Pierce. 1989. Oct. 30. He got involved with tofu while he was in Georgia. He learned to make tofu from a guy in Macon named Pat Powell, who had just gone up to The Farm in Tennessee and learned to make tofu (and Soysage) from Lewis Headrick, who now lives in Northern California. In 1978 Pierce went to California and worked with Paul Duchesne as Wildwood Natural Foods' first tofu maker.

Letter from Michael Pierce. 1989. Oct. 31. "I learned to make tofu in Macon, Georgia, in 1978-79 from Pat Powell, who learned from Lewis [Headrick] at The Farm in Tennessee. We made it farmhouse style using a 60 quart stainless pot and a four burger stove. We used some used curtain material for pressing the okara and 4 wooden dowels as the press. It was very crude but it worked. We could get two cakes averaging 12 pounds a cake."

Talk with Michael Pierce. 1989. Nov. 6. Pat Powell's

© Copyright Soyinfo Center 2013

daughter was born at The Farm in April 1978. Powell returned to Macon shortly thereafter and he and his wife, Mary, started making tofu in Macon in the fall of 1978, for 9 months a year. They sold the tofu at four places in Georgia: Annapurna Health Foods (Macon), Sevananda Co-op, Rainbow Grocery, and Rainbow Cafe (Atlanta). They also made Soysage, which they sold only in Macon. Their company either had no name, or was named Macon Tofu, a pun on Makin' Tofu. Pierce was living in California at that time. He returned to Macon, learned how to make tofu from Powell, then worked as a tofu maker with him for about a year. Then Pierce returned to California and met Duchesne.

There was an earlier tofu company in Georgia. A guy made tofu in his home and had it distributed by a health foods distributor. He was moved out of there so he set up a shop at the distribution company. Then the health department shut him down. Powell thinks he then started the Soy Shop in Atlanta.

3801. New England Soy Dairy, Inc. 1978. Product and price list. October 12, 1978. 305 Wells St., Greenfield, MA 01301. 2 p.
• ***Summary:*** Includes tofu (bulk and packaged), Soymayo Eggless Imitation Mayonnaise, tofu recipes and posters. Coming soon: soymilk. On the mailing panel in bold blue caps: "Soy to the World." Address: Greenfield, Massachusetts.

3802. **Product Name:** Soy Dairy Tofu [Tofu, or Firm Tofu; Bulk, or Packaged].
Manufacturer's Name: New England Soy Dairy Inc.
Manufacturer's Address: 305 Wells St., Greenfield, MA 01301. Phone: 413-772-0746.
Date of Introduction: 1978. October.
How Stored: Refrigerated.
New Product–Documentation: Labels. 1978-80. 5.5 by 4.5 inches. Plastic film. Blue, yellow, and green on clear film. "A significant source of protein. No cholesterol. No preservatives. Keep refrigerated. To maintain freshness, rinse after opening. Change water frequently." The firm style has recipes on the front panel for Tofu Egg Salad and Pan-Fried Tofu. New England Soy Dairy Product and Price List. 1978. Oct. 12. For bulk. 50 x 8 oz pieces sell for $12.00 a pail; 60 x 6 oz. pieces of firm tofu sell for $13.80 a pail. For packaged. 12 x 1 lb pieces of tofu sell for $6.84 a case; 12 x 1 lb pieces of firm tofu sell for $7.32 a case. Soya Bluebook. 1980. p. 55. Soyfoods Center Computerized Mailing List. 1981. Jan. 22. Owner: Tom Timmins. Largest New-Age tofu shop & soy dairy.

3803. Shurtleff, William. 1978. Protein source for the future. *PHP* (*Japan*). Oct. p. 8-18, 79-82. Illust. 18 cm.
• ***Summary:*** Contents: Introduction. Ten reasons why soybeans will be the protein source of the future: 1. Optimum land utilization. 2. Lowest cost source of protein in almost every country of the world. 3. High nutritional value. 4. Time tested for over 2,000 years. 5. Remarkably versatile. 6. Appropriate technology ("Traditional soyfoods can be produced in cottage industries"). 7. New dairylike products. 8. Soybeans are hardy and adaptive. 9. Free nitrogen fertilizer from nodules on soybean plants. 10. Great productivity potential.

Discusses new patterns of soy protein utilization, with specific reference and descriptions of tofu, soymilk, tempeh ("Indonesia's most popular soyfood"), miso, shoyu, whole dry soybeans, roasted soybeans, fresh green soybeans, soy flour, kinako, soy sprouts, and textured soy protein (TVP), yuba, and natto. Concludes with a discussion of new developments in the Western world. Address: New-Age Foods Study Center, P.O. Box 234 (951½ Mountain View Dr.), Lafayette, California 94549. Phone: 415-283-2991.

3804. Shurtleff, William. 1978. Tofu shops and soy dairies in the West. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549. 2 p. Undated. Unpublished typescript.
• ***Summary:*** Lists the name, address, phone number and owner of all known tofu shops and soy dairies in the USA (alphabetically by state, and within each state alphabetically by city), Canada, Latin America, Europe, and Australia. There are 122 tofu shops and soy dairies in the USA and Canada, and 138 on the entire list.

This list appeared in the first Ballantine Books edition of *The Book of Tofu*, which was available on 22 Dec. 1978, although the date on the copyright page is Jan. 1979. We checked the last dummies on 23 Oct. 1978–which is the latest date we could have submitted this list. Address: Lafayette, California. Phone: 415-283-2991.

3805. **Product Name:** Kernel Sanchez Tamales [Red Chile with Tofu and Sunflower Seeds].
Manufacturer's Name: Southwest Soy Foods.
Manufacturer's Address: 121 E. Santa Fe Ave., Santa Fe, NM 87501. Phone: 505-988-1889.
Date of Introduction: 1978. October.
Ingredients: Incl. Tamale wrapping, red chili, tofu, and sunflower seeds.
How Stored: Frozen in vacuum pouches.
New Product–Documentation: Visit by Shurtleff & Aoyagi to Santa Fe. 1980. June. Tasted the product.

Talk with Kathryn Bennett. 1989. Aug. 28. She began making this product in about the fall of 1978, after the first Soyfoods Conference. She later used this brand, in modified form, as the name of her second company. Several months later she introduced a green cheese and chili tamale with no tofu.

3806. **Product Name:** Soysage (Meatless Okara-based Sausage).

© Copyright Soyinfo Center 2013

Manufacturer's Name: Soy Plant (The).
Manufacturer's Address: 211 East Ann St., Ann Arbor, MI 48104. Phone: 313-663-0500.
Date of Introduction: 1978. October.
Ingredients: Okara (soybean fiber), wheat germ, nutritional yeast, whole wheat flour, bulgar [bulgur] and spices.

New Product–Documentation: Midwest Natural Foods Distributors, Inc. 1979. Catalog 13. Spring, 1979. Ann Arbor, Michigan. iv + 290 p. See p. 259. Soy Plant Tofu. Refrigerated. "Soy Plant Tofu Soysage" (1 lb). On p. 260 is a half-page ad: "Soysage–Bean 'sausage,' a spicy experience. Made from okara (soybean fiber), wheat germ, nutritional yeast, whole wheat flour, bulgar and spices, Soysage is a natural source of vitamin B-12 and is high in protein and fiber."

Leaflet. 1979. "Soysage." 2 panels each side. Each panel 13 x 18 cm.

Talk with Steve Fiering. 1988. June 10. This was introduced within a few months after the Soycrafters Conference in the summer of 1978. "We definitely got soysage recipes at the conference."

3807. **Product Name:** Tofu Cheesecake (Non-Dairy).
Manufacturer's Name: Soy Plant (The).
Manufacturer's Address: 211 East Ann St., Ann Arbor, MI 48104. Phone: 313-663-0500.
Date of Introduction: 1978. October.
New Product–Documentation: Talk with Steve Fiering. 1988. June 10. This probably started in the fall of 1978, maybe some inspiration from the conference but mostly because we now had enough financial energy to have somebody who was beginning to work on the deli regularly as a main job. By the fall we had a variety of deli products sold every day. But I was a tofu maker, not a deli cook.

3808. **Product Name:** Soy Scream (Non-Dairy Soy Ice Cream; Soft Serve) [Carob, or Maple-Vanilla].
Manufacturer's Name: Soy Plant (The).
Manufacturer's Address: 211 East Ann St., Ann Arbor, MI 48104. Phone: 313-663-0500.
Date of Introduction: 1978. October.
How Stored: Frozen.
New Product–Documentation: Steve Fiering. 1979. Whole Foods. Jan. p. 38, 40. "A Midwestern Interest in Tofu." This is included in a list of products presently produced by the company. Talk with Steve Fiering. 1988. June 10. It was a lousy product with a great name. Not much was sold except over the counter soft serve in the deli. It became too crystalline when we tried to make a hard-pack version. Steve is not sure, but he thinks it was made with soymilk rather than tofu.

3809. **Product Name:** Tofu Pie [Carob Creme, Maple-Vanilla, or Peanut Butter].
Manufacturer's Name: Soy Plant (The).
Manufacturer's Address: 211 East Ann St., Ann Arbor, MI 48104. Phone: 313-663-0500.
Date of Introduction: 1978. October.
Ingredients: Filling: Tofu (organic soybeans, water, nigari), honey, safflower oil, carob powder, vanilla, sea salt. Crust: Wholewheat flour, corn oil, sea salt.
Wt/Vol., Packaging, Price: 5 oz.
How Stored: Refrigerated.
New Product–Documentation: Steve Fiering. 1979. Whole Foods. Jan. p. 38, 40. "A Midwestern Interest in Tofu." This is included in a list of products presently produced by the company. Talk with Steve Fiering. 1988. June 10. "Carol Ann and Tim Huang eventually got very involved with tofu pies. We stopped making them and bought from them. Carob was the popular flavor. These were different from the cheesecake."

Oval Label in Soy Plant scrapbook from 1979 or 1980. 2½ by 1½ inches. Green on goldenrod yellow. 5 oz. Address is now 771 Airport Blvd.

Talk with Steve Fiering, a founder of The Soy Plant in Ann Arbor. 2000. Dec. 3. The peanut butter pie was definitely made at East Ann St. and probably created by Ann Elder, a cook, who created many delicious deli items. She enjoyed trying out new recipe ideas almost daily. "We were blessed with creative cooks, who had no commercial sense at all. We would eat up most of our profits. During the first year at East Ann St. we must have experimented with 25 different products. The main cooks were Ann Elder, Jura McDowell, and (to a lesser extent) Sue Kalen. She didn't make them for distribution as commercial products. She usually had a beatific, or at least happy smile on her face."

Letter from Carol Ann Krueger of Tucson, Arizona. 2002. April 4. "I believe Tim and I developed the cream pies. I remember we struggled with developing a crust that did not use margarine or butter, and came up with the unrefined corn

© Copyright Soyinfo Center 2013

oil. We started out using a blender and eventually bought a huge bowl blender (Hobart) that sounded like an airplane taking off when turned on. We also located a pie crust press to stamp out the crust. We sold this equipment to The Soy Plant eventually."

3810. **Product Name:** Okara Peanut Butter Balls.
Manufacturer's Name: Soy Plant (The).
Manufacturer's Address: 211 East Ann St., Ann Arbor, MI 48104. Phone: 313-663-0500.
Date of Introduction: 1978. October.
How Stored: Refrigerated.
New Product–Documentation: Steve Fiering. 1979. Whole Foods. Jan. p. 38, 40. "A Midwestern Interest in Tofu." This is included in a list of products presently produced by the company. Talk with Steve Fiering. 1988. June 10. "We started the okara balls pretty early to make use of all our okara."

3811. **Product Name:** Seitan Roast.
Manufacturer's Name: Soy Plant (The).
Manufacturer's Address: 211 East Ann St., Ann Arbor, MI 48104. Phone: 313-663-0500.
Date of Introduction: 1978. October.
Ingredients: Organic whole wheat flour, tamari soy sauce (aged 3 years), mild spices.
New Product–Documentation: Leaflet / Label in Soy Plant Scrapbook, next to article dated 4 Oct. 1978. 5½ by 4¼ inches. Black on light blue, front and back. Logo on front in upper right corners shows a hand holding a flower with the words "Traditional Foods" around the bottom. "We at The Soy Plant pride ourselves on providing tasty as well as nutritious products and our Seitan reflects this tradition. New to us, Seitan was being enjoyed by Tibetan Monks more than 3000 years ago." Gives ingredients, nutritional value, and 13 serving suggestions. "For more information about Seitan and Class on making your own Seitan at home, visit The Soy Plant, 211 E. Ann St., Ann Arbor, Michigan, 48104. [Phone] 663-0500.

Talk with Steve Fiering, a founder of The Soy Plant in Ann Arbor. 2000. Dec. 3. Sue Kalen, who was into macrobiotics, probably had the idea for this product and wrote the text. It was packaged with a liquid in a round plastic tub–like tofu. It never sold very well–maybe 5 lb/week. It was made sporadically, when someone who knew how to make it felt like making it.

3812. Starenkyj, Danièle. 1978. Le bonheur du végétarisme: Principes de vie & recettes. 2ième éd. [The happiness of vegetarianism: Principles of life and recipes. 2nd. ed.]. Armagh, Quebec, Canada: Orion. 351 p. Oct. Illust. by Stefan Starenkyj. Index. 23 cm. First ed. 1977. [26 ref. Fre]
• ***Summary:*** Soy-related recipes include: Soy coffee (p. 101). Soya souffle (with whole soybeans, p. 204). Chapter 14, titled "A cow in your kitchen" (p. 207-27), contains extensive information on soymilk, soymilk products, and problems with cow's milk. It's contents: Introduction. What is soya? The proteins of the soybean (*la fève soja*). The carbohydrates of the soybean. The vitamins and minerals of the soybean. The oils of the soybean. Soymilk: The cow of China. Reasons for replacing animal milk in your diet with soymilk: Many people are allergic to animal milk. Animal milk is a cause of anemia. Animal milk can be a cause of infection of the urinary tract, particularly in infants. Animal milk is polluted. Comparison of the composition of soymilk and cow's milk (100 gm each). How to make soymilk at home. Soymilk whipped cream. Soy mayonnaise without eggs. Soy yogurt (fermented). Tofu: The meat without bones. Nutritive value of tofu. How to make tofu at home. Tofu filets. Tofu steaks. Breaded tofu slices. Tofu pâté à tartiner. Grilled tofu. Okara (*La pulpe de soja*). Okara pâté (*Pâté à la pulpede soja*). Soya butter (*Buerre de soja;* made from 1 cup lightly grilled soy flour, 2 cups water, a little salt, and about ½ cup oil). Address: Ottawa, Canada.

3813. *Whole Foods* (*Berkeley, California*). 1978. Soycrafters open to all. Oct. p. 14.
• ***Summary:*** "The new Soycrafters Association of North America (SANA) has announced two categories of membership. Contributing Membership is open to all individuals and organizations interested in soyfoods. The annual dues of $10 entitles the contributor to a year subscription to *Soycraft* and to reduce rates for national and regional conferences and workshops.

"Active Producer Membership is open to all persons or organizations engaged in the production of traditional natural foods from soybeans. Annual dues for producers are $15, in addition to a sliding-scale fee based on soybean utilization. The producer member will have full voting rights in SANA, and will receive a one year subscription to *Soycraft*, and other material developed by the association."

"The SANA steering committee included Tom Timmins, *New England Soy Dairy;* Lester Karplus, *Vegetarian, Inc.;* Steve Fiering, The Soy Plant; Steve Demos, *White Wave Tofu;* Kathryn Bennett-Clarke, *Southwest Tofu;* and Bill Shurtleff, *New-Age Foods Study Center.* Larry Needleman of *Bean Machines* is the Director."

Note 1. This is the earliest published document seen which contains the term "Soycrafters Association of North America."

Note 2. On the back of this page is a full-page ad for New Life Foods (Tracy, Minnesota).

Note 3. This is the earliest published document seen (Sept. 2011) that mentions White Wave.

3815. Harwood, Skippy. 1978. Fads aren't the fashion for Sarah: Palm Beach gourmet. *Palm Beach Daily News* (*Florida*). Nov. 5. p. 6.
• ***Summary:*** Sarah "Mimi" Welfeld and John Shaffer own Sunrise Natural Foods store on Sunrise Avenue in Palm Beach. They are not interested in the newest diet or the newest fad. Sarah was a high fashion model for 20 years for world-famous designers such as Christian Dior, Yves St. Laurent, Givenchy, Normal Norell, Valentino and Pauline Trigre. In these high fashion days, she "was a coffee and cigarette fiend; a bundle of nerves who liked a dry martini before dinner. Now she is a vegetarian and eats natural foods.

"Another valuable food which could help the starving is tofu, a soy bean curd cheese which is solid protein. Its bland flavor is somewhat like unaged cheese and as one gradually acquires a taste, it becomes delicious, Ms. Welfeld explained. Many people inquire about tofu and she recommends reading 'The Book of Tofu,' by William Shurtleff and Akiko Aoyagi.

"Tofu spread is a recipe often used at the store lunch counter, and because it is so quickly made, one can prepare it fresh whenever needed." A recipe for Tofu spread (with Vegit seasoning) is given. A photo shows Sarah "Mimi" Welfeld. Address: Staff writer.

3816. Lindsay, Anne. 1978. Try Oriental options: Easy-to-prepare Japanese recipes. *Toronto Star* (*Ontario, Canada*). Nov. 15. p. C1-C2.
• ***Summary:*** Japanese recipes include: Gomoku gohan (Rice with vegetables; with "2 cakes aburaage {fried bean curd}, cut into matchstick size, julienne strips," and "¼ cup soy sauce"). Sukiyaki (with "2 pieces tofu {fresh bean curd} cut into one-inch pieces"). Sukiyaki sauce (with "½ cup soy sauce").

Note: A very good description of authentic sukiyaki and how to make it.

3818. Paino, John. 1978. Re: Current developments at Nasoya. Letter to William Shurtleff at New-Age Foods Study Center, Nov. 20. 3 p. Typed, on letterhead.
• ***Summary:*** Written after Shurtleff and Wataru Takai paid a surprise visit to Nasoya in the summer of 1978: "I'm sure you felt my surprise when in the middle of our daily tofu making routine, I turned around and spotted the man whose *Book of Tofu* became the impetus for our shop. We were all so pleased by your visit.

"Sarah, my wife, was making a delicious tofu cream cheese, and cottage cheese for sale in and around Boston. She is a wonderful cook and with the aid of her friend, Winnie Bourgeois, developed some recipes which are on the following page. We are happy to pass these on to you. We also hope to be marketing these products again in 1979.

"I would like to wish you great success with your new Book of Tofu. It is also our dream at Nasoya, to help improve the health and happiness of all people by making available a more natural and healthful diet. We are grateful to you for your contribution in the preparation and use of Tofu, Miso, and other foods. These are already becoming important staple foods for many people throughout America, enabling them to choose and eat in a pure and balanced way."

Note: The bottom one-third of this letter has been cut off and is missing. Address: President, Nasoya Foods, P.O. Box 841, Leominster, Massachusetts 01453. Phone: 617-537-0713.

• ***Summary:*** An article in praise of tofu and New England interspersed with recipes: Stewed tofu. Tofu cheesecake deluxe. Sweet & sour tofu. Onion garlic dip. Christmas cranberry creamy. Tofu egg salad. Creamy carob pie. Note: Several recipes are omitted from the Springfield edition. Address: Founding partner, New England Soy Dairy, Greenfield, Massachusetts.

3820. Bianchini, Gilberto. 1978. Re: Pioneering tofu in Italy. Letter to William Shurtleff at New-Age Foods Study Center, Nov. 26. 1 p. Handwritten, with signature on letterhead. [Eng]
• ***Summary:*** "My idea is to start producing good quality tofu, supplying the northern part of Italy. I am making at the present some small quantity of it, just for our natural food store... After talks with other centers, I heard that other people would like to receive some of it, regularly. I had some experience on large scale production in the macrobiotic centers in France and Belgium, and good ideas from the producer "Jonathan," in Antwerp. I am going to diffuse soy products in all Italian centers, possibly, and my idea is at the moment to set up a 6-8 pages long translation of your introductory pages of *The Book of Tofu* (exactly from p. 15 to p. 29), quoting the source." Address: Centro Macrobiotico ed Alimentazione Organica (Community Food), Via Cuoco 9, 47037 Rimini, Italy. Phone: 0541-33670.

3821. Burda, Terrie. 1978. "Every berg needs a tofu shop." *Benton Bulletin* (*Corvallis, Oregon*). Nov. 29. p. 5.
• ***Summary:*** This article is about Mia Posner and her partner Harry MacCormack of Sunbow Farm Products, a small tofu maker, on Plymouth Rd. in Philomath, Oregon (Route 2, Box

© Copyright Soyinfo Center 2013

46, Corvallis, OR 97330). It is one of three tofu shops in all of Oregon. Their tofu, which retails for $0.79 a pound, is "selling like crazy." Sunbow Tofu is made from organically grown soybeans (which are grown on their property), pure well water and a bittern (nigari). The tofu at Sunbow is made in an immaculately clean room which was built as an addition to the house in January, 1978.

Describes how tofu is made in this home-based tofu shop. Describes various ways that tofu can be used (but contains no recipes). A favorite, "T-n-T" stands for Tofu & Tamari. Sunbow Farm has printed a soy cookbooklet ($0.25) that contains more than 23 tofu recipes.

Presently Posner and MacCormack are supplying tofu, soyburgers, and soy sausage to more than a dozen stores and restaurants in the area.

Large photos show Miso Posner: (1) Stirring "milky soybean mash" which will be pressed to make soymilk. (2) Slicing tofu into 1-pound cakes.

Note: Benton County is located in the Willamette Valley of Oregon. Address: Staff writer.

3822. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Centro Macrobiotico ed Alimentazione Organica (Community Food). Renamed Centro Macrobiotico Tofu by Dec. 1981.
Manufacturer's Address: Via Cuoco 9, 47037 Rimini, Italy.
Date of Introduction: 1978. November.
New Product–Documentation: Letter from Paolo Gioni? (Centro Macrobiotico ed Alimentazione Organica, Via Liguria 3, 47037 Rimini, Italy. Phone: 83433). 1976. May 4. This macrobiotic center opened just 4 months ago. They would like to prepare their own miso, tofu, tamari, and umeboshi, and they request information on how to do this.

Letter from Gilberto Bianchini (pronounced bee-an-KEE-nee) to William Shurtleff. 1978. Nov. 26. His address is: Centro Macrobiotico ed Alimentazione Organica (Community Food), Via Cuoco 9, 47037 Rimini, Italy. Phone: 0541-33670. "My idea is to start producing good quality tofu, supplying the northern part of Italy. I am making at the present some small quantity of it, just for our natural food store... I am going to diffuse soy products in all Italian centers, possibly, and my idea is at the moment to set up a 6-8 pages long translation of your introductory pages of *The Book of Tofu* (exactly from p. 15 to p. 29), quoting the source."

On 9 Feb. 1979 Gilberto Bianchini visited William Shurtleff and Akiko Aoyagi at New-Age Foods Study Center in Lafayette, California, to talk about making tofu in Italy.

Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Owner: Gilberto Bianchini. Shurtleff & Aoyagi. 1982. Soyfoods Industry: Directory & Databook. p. 3.

Letter from Gilberto Bianchini in response to inquiry from William Shurtleff of Soyfoods Center. 1994. July 16. "I started to make tofu and sell it officially in October 1979 in Rimini, Italy, at Via Cuoco 9 (Community Food). I first learned how to make tofu in 1976 or 1977 at the Community Health Foundation, Old Street 98, in London."

3823. Chen, Philip S.; Chung, Helen D. 1978. Soybeans for health and longer life. New Canaan, Connecticut: Keats Publishing, Inc. xii + 178 p. Index. 18 cm. (A Pivot Health Book).
• ***Summary:*** A revised and condensed pocketbook version of Chen and Chen 1956. Contents: Preface. Foreword. Introduction. Part I: Nutritive value of the soybean. 1. Protein. 2. Fat. 3. Carbohydrates and caloric value. 4. Minerals. 5. Vitamins. 6. Soybeans and world population. 7. Soybeans and disease.

Part II: Soy products. 8. Soybean oil: Phosphatides, margarine. 9. Soybean oil meal: Gelsoy, Multi-Purpose Food. 10. Soy flour. 11. Concentrated soy protein products: Soy protein concentrates (Griffith Laboratories makes Isopro and GL-301), soy protein isolates, and textured or spun soy proteins. 12. Soy milk. 13. 3824. **Product Name:** Samurai Hero (Brown Rice & Tofu Sandwich in a Chapati).
Manufacturer's Name: City Samurai.
Manufacturer's Address: San Francisco (actually Berkeley), California.
Date of Introduction: 1978. November.
Ingredients: Brown rice, tofu, carrot or seasonal vegetable, sea salt, lettuce, sprouts, green onion, safflower oil, whole grain chapati, barley miso, sesame butter, spring water, tamari.
Wt/Vol., Packaging, Price: 9 oz (at least).
How Stored: Unrefrigerated and perishable.
New Product–Documentation: Talk with Paul Duchesne. 1989. July 31. Chris Smith, after discussing the matter with Duchesne (who was in Boston), showed Joe Nixdorff (who had been coming to macrobiotic potluck dinners) how to make the BRTS in about Nov. 1978. He made it every other day and sold it at multiple outlets until about March 1982, when competition from Wildwood Natural Foods put him out of business. Though the label shows San Francisco as the business location, this was not true; the business was actually

© Copyright Soyinfo Center 2013

in Berkeley. At one time he was making the sandwiches at Pacific Tempeh run by Travis Burgeson.

Talk with Travis Burgeson. 1989. Aug. 7. Joe Nixdorff introduced this sandwich before 1980. He started making it at Tony Plotkin's mochi plant [Grainaissance], then expanded into Travis' tempeh plant. Travis estimates that Joe made about 750 sandwiches/week. He delivered them himself in a car to natural foods stores, mostly in Berkeley and the San Francisco Bay Area. Joe was squeezed out of business by Wildwood before Travis sold his business in 1983. This sandwich was in no way related to the Samurai cart that sells sandwiches in Berkeley. Label sent by Paul Duchesne. 1989. Aug. 11. Black on gold. "A complete meal for today's warrior. Organically grown ingredients used when available."

3825. Fortner, Heather J. 1978. The limu eater: A cookbook of Hawaiian seaweed. University of Hawaii Sea Grant Program, 2540 Maile Way, Spalding Hall 253, Honolulu, HI 96822. ix + 107 p. Illust. Index. Nov. 23 cm. Sea Grant Miscellaneous Report UNIHI-SEAGRANT-MR-79-01. [39 ref]

• ***Summary:*** Contents: Preface. Recipe acknowledgments. Introduction. Ocean flora: When an alga becomes a seaweed. Edible Hawaiian seaweeds: When a seaweed becomes a limu. Limu ethnobotany: When a limu becomes a legend. Ocean harvest: When a seaweed becomes a sea vegetable–weed vs. vegetable, collection, cleaning, and conservation, storing the sea vegetables, wilting the sea vegetables, commercial sources of limu. Recipes: Appetizers, pickles, relishes and kim chee, salads and salad dressings, soups, main dishes, miscellaneous. Appendices: A. Nomenclature. B. Limu and nutrition. C. Collecting sites. Glossary.

Soy related recipes: Many recipes call for shoyu / soy sauce. Teriyaki-style limu wawae'iole (p. 58). Miso limu salad (p. 61). Limu maneoneo salad (with miso) (p. 61). Limu-tofu dressing (p. 65). Miso soup with limu (p. 67). Tuna-tofu-lima patties (p. 70). Limu tofu tempura (p. 75).

The Glossary includes definitions of miso, shoyu, teriyaki, tofu and tsukudani.

Contains many excellent illustrations and photos of limu. Address: Honolulu, Hawaii.

3826. Kan, Lilah. 1978. Introducing Chinese casserole cookery. New York, NY: Workman Publishing. 288 p. Index. 24 cm. Edited by Helen Witty.

• ***Summary:*** An engaging writer with outstanding descriptions of ingredients. The section titled "Ingredients" (p. 41-61) includes: Bean curd ("this means fresh bean curd (or bean cake),... Chinese call it *do fu;* Japanese say *tofu."* Bean curd cheese, red [red fermented tofu] ("In Cantonese it is called nom yee"). Bean curd cheese, white [fermented tofu] ("In Cantonese it is called foo yee"). Bean curd, fried ("Called *doe gawk* in Cantonese," it is made of fresh bean curd that has been cubed and deep fried. It "resembles tiny brown wrinkled pillows that seem almost hollow").

Bean curd skin, dried [yuba] (This is made by heating soybean milk and "is usually sold in ½-pound packages. The skins measure about 1½ by 4 inches and are less than 1/8 inch thick." "They look like thin pieces of light beige lacquered wood" and should be soaked in warm water until pliable (about ½ hour). Called *teem jok* in Cantonese).

Bean curd sticks [dried yuba sticks]. ("These sticks are made from soybean milk film that has been dried, rolled to ½-inch thickness, and bent into long pieces with a hairpin turn." Called *foo jook* in Cantonese. They "are light beige in color and have a wrinkled, lacquered look. They come in ½-pound and 1-pound packages").

"Black beans, salted or fermented [fermented black soybeans]: These beans serve as a condiment. They have a very pungent odor that could scare away the timid, but do not be timid. They are almost always used in combination with garlic–a marriage made in heaven–and are delicious. The beans are interchangeably called 'fermented black beans' and 'salted black beans'").

Brown bean sauce, ground (meen see).

Vegetarian steak (usually made from soybeans or gluten. It is sold in cans. She likes to use this meat substitute with other ingredients in Buddha's Delight Vegetarian Casserole, a dish often served on Chinese New Year's Eve. "I use the kind that is labeled *Chai Pow Yu* which translates as 'mock abalone' or 'vegetarian abalone'").

Soy related recipes include: Beef chunks in black bean, garlic, and egg sauce (with "3 tablespoons salted black beans, rinsed in water, drained, and mashed," p. 68-69).

Chicken and peppers with black bean, garlic, and egg sauce (with "2 tablespoons salted black beans, rinsed in water, drained, and mashed," p. 118-19).

Minced pork and vegetables with black bean and garlic sauce (with "4 teaspoons salted black beans, rinsed in water, drained, and mashed," p. 146-47).

Spare ribs in black bean, garlic, and egg sauce (with "3 tablespoons salted black beans, rinsed in water, drained, and mashed," p. 158-59).

Spare ribs in red bean curd cheese (with "½ square (about 2 tablespoons) red bean curd cheese," p. 162-63).

Lamb and bean curd sticks with black bean and garlic sauce (with "4 bean curd sticks (8 lengths), drained" and "3 tablespoons salted black beans, rinsed in water, drained, and mashed," p. 182-83).

Clams with black bean and garlic sauce (with "1½ tablespoons salted black beans, rinsed in water, drained, and mashed," p. 192-93).

3827. **Product Name:** Nasoya Tofu Eggless Egg Salad Spread.
Manufacturer's Name: Nasoya Foods.
Manufacturer's Address: Mechanic St. Ext. (P.O. Box

© Copyright Soyinfo Center 2013

841), Leominster, MA 01453.
Date of Introduction: 1978. November.
Ingredients: Nasoya tofu, unrefined safflower oil, wood-aged organic apple cider vinegar, onion, celery, sweet peppers, parsley, garlic, mustard seed, honey, sea salt and turmeric.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Refrigerated.
New Product–Documentation: Letter from John Paino. 1982. April 17. Gives starting date. Label. 1981, undated. 3.75 inches diameter. Hard plastic. Brown, blue, maroon and black on white. Distraught chicken illustration. "No cholesterol." Leviton. 1980. Soyfoods. Summer. p. 49. Soyfoods. 1983. Summer. p. 52.

3828. **Product Name:** Nasoya Tofu Spread [Zesty Italian, Creamy Dill, or Onion].
Manufacturer's Name: Nasoya Foods.
Manufacturer's Address: Mechanic St. Ext. (P.O. Box 841), Leominster, MA 01453.
Date of Introduction: 1978. November.
Ingredients: Italian-Garlic: Tofu, unrefined safflower oil, apple cider vinegar, honey, sea salt, vegetable gum, citric acid, natural spices, herbs, flavorings.
Wt/Vol., Packaging, Price: 8 oz plastic tubs.
How Stored: Refrigerated, 30 day shelf life.
New Product–Documentation: Letter from John Paino. 1981. Jan. "We were the first to manufacture a variety of spreads/dressings (incl. Eggless Egg Salad and Soyannaise) for interstate distribution." Letter from John Paino. 1982. April 17. Gives starting date. Labels. 1981, undated. Spot in Soyfoods. 1983. Summer. p. 52. "Nasoya Restyles Tofu Dips. The line of 5 spreads and salads, introduced in December 1979, was restyled and repackaged in December 1982." 1984. Summer. p. 43. "Nasoya's Vegi Dips."

3829. Nomura, Abraham; Henderson, B.E.; Lee, J. 1978. Breast cancer and diet among the Japanese in Hawaii. *American J. of Clinical Nutrition* 31(11):2020-25. Nov. [16 ref]
• ***Summary:*** The authors studied the diets of 6,860 men to examine the relationship between soy consumption and breast cancer risk. Soy intake was measured twice: Once during the period 1965-1968 and again during 1971-1975. During the first period, no association was observed between soy intake and breast cancer. However for the second period an inverse association was found between intake of miso soup and risk of breast cancer; the more miso soup consumed, the lower the rate of breast cancer. And a trend was found toward an inverse association between intake of tofu and subsequent risk of breast cancer; the more tofu consumed, the lower the rate of breast cancer.

Note: This is the earliest document seen (May 2000) indicating that soy may prevent breast cancer in humans.

Address: 1. Director, Japan-Hawaii Cancer Study; 2. Advisor, Japan-Hawaii Cancer Study; 3. Biostatistics consultant, Japan-Hawaii Cancer Study. All: Kuakini Medical Center, Honolulu, Hawaii 96817.

3830. **Product Name:** Spiced Tofu [Basic with Veggies, Herb, Caraway, or Curry].
Manufacturer's Name: Soy Plant (The).
Manufacturer's Address: 211 East Ann St., Ann Arbor, MI 48104. Phone: 313-663-0500.
Date of Introduction: 1978. November.
New Product–Documentation: Steve Fiering. 1979. Whole Foods. Jan. p. 38, 40. "A Midwestern Interest in Tofu." This is included in a list of products presently produced by the company. Shurtleff. 1980. Interview with Steve Fiering. "I think The Soy Plant produced the first flavored or seasoned tofu, of which we had 4-5 types. [Note: Actually, Swan Foods in Miami had introduced a Caraway Tofu in April 1978]. The spices were added to the soymilk. Talk with Steve Fiering. 1988. June 10. "We made various types of spiced tofu. We had a vegetable tofu and an herb tofu. Dried vegetables were diced and put into the soymilk, not to the curds. We may have been making it by the time of the conference or maybe a few months later. It never became a significant product. But by 1981-82 we dropped most of them and settled on one that we called Spiced Tofu that we did sell wholesale. It had a fair amount of dried vegetables and spices.

3831. *Soyanews* (*Sri Lanka*). 1978. Boneless meat [tofu]. 1(3):1, 8. Nov.
• ***Summary:*** About tofu. "A curd formed from soya milk that's as delicious as meat is dietary staple in a great part of Asia, said Mrs. Gai Kim, President of the United Nations Women's Guild, at the Hotel School in Colombo on October 17th. Over 50 representatives from the leading women's associations in Sri Lanka were present to hear Mrs. Kim explain why soya curd [tofu] is receiving such praises from both gourmets and nutritionists.

"The curd making demonstration was organized by the Sri Lanka Women's Conference..." Two photos show Mrs. Kim demonstrating how to make "soya curd," and how it can be cubed or "sliced for currying, frying, grilling and salads."

She said it is available at the "Modern Chinese Cafe on Havelock Road [in Colombo] where it is available at Rs. 4/- a pound. If it made at home, the cost is less than Rs. 1.50, she said, and will provide a little more than half the daily protein needs of an adult."

"Unlike high protein foods like meat, bean curd is not acidic but has an alkaline composition."

Mrs. Kim said that she would like to see curd called "'Boncheese' because it sounded like 'bonchi' the word for bean in Sinhala. 'Bon' means 'good' in French which would give the name 'boncheese,' derived from 'this god-sent

© Copyright Soyinfo Center 2013

grain,' a truly international character."

3832. *Soyanews* (*Sri Lanka*). 1978. Recipes: The rolling stones. 1(3):3. Nov.
• ***Summary:*** "The familiar *kurakkan gala* (hand grinding mill) is being used in two different ways as the illustrations on this page show. In one [by Akiko Aoyagi, from *The Book of Tofu*], two women are wet-grinding soaked soyabeans and collecting the slurry from right under the stone. In the other, heated beans are being dry-ground" in the traditional way of transforming grains and beans into flour [or dhal] or kinako (roasted soy flour). A recipe for Vegetable curry calls for ½ cup dry clean soyabeans, which are heated then cracked into dhal.

3833. Swan Food Corp. 1978. Swan Foods: Remember the name! (Ad). *Alternatives* (*Miami, Florida*). 2(11):53. Nov.
• ***Summary:*** This half-page ad lists the company's soy products, iced herbal beverages, and baked goods & pastries. Soy products include: Baked tofu, Marinated tofu, Caraway tofu, Tofu chip dip, Tofu salad dressing, Soy melk (sweetened, or carob soy milk), Soyogurt (a cultured soy product), Wholegrain soy burgers. Baked goods include: Tofu cheesecakes, Carob maple swirl, "and more to come."

On the top half of the ad is a large circular logo featuring a stylized swan, with two large wings symmetrical about a vertical axis and an arched neck on the left side. The other half of the arch is drawn in to form a heart, inside of which is written "Because we love you." Across the inside top are the large words "Swan Foods." A rainbow arches below them and over the swan. At the top center, between the words "Swan Foods," are the smaller words "Nature's Finest" written one below the other; between them is an infinity sign.

Across the bottom of the ad is written: "Every Swan Soybean Product contains all 8 essential amino acids (which are necessary for a balanced diet) and have no cholesterol. Available in health & natural food stores. Retailers: Swan Quality Products are distributed by Tree of Life, Inc., or contact Swan Food Corp., 5758½ Bird Rd., Miami, Florida 33155. In Miami enjoy all Swan Products at Swan's Retail Deli & Bakery, The Soybeanery, 5758½ Bird Rd."

Note: A full-page Swan Foods ad that is very similar to his half-page ad was published in the July/August issue of this magazine. There are four differences between the two ads: (1) This November ad is smaller; Swan Foods went out of business one month later, in December 1978; (2) A Tofu Salad Dressing and Red Zinger tea appear in this ad but not in the earlier ad; (3) This ad states that Swan Foods' products are distributed by Tree of Life, Inc., a major distributor, whereas in July/August they had been "distributed by your local Natural Foods Distributor"–less impressive. (4) The following products appear in the earlier (July/August) ad but do not appear in this one: Soy Shakes (Carob, Vanilla & Strawberry), three iced herbal beverages (Lemon Mist, Miami Cooler, Red Quencher), and two baked goods & pastries (Mary's Cream Cake, and Mary's Devil's Food Cream Cake). Address: The Soybeanery, 5758½ Bird Rd., Miami, Florida, 33155.

3834. Tofu Shop (The). (Later renamed The Tofu Gardens, The Lotos Cafe, then The Regular Restaurant [by April 1981]). 1978. November. New soyfoods restaurant or deli. 686 Monroe Ave., Rochester, NY 14607.
• ***Summary:*** Leviton, R. 1979. "The soy delicatessen." *Soycraft* magazine. Summer (Vol. 1, No. 1). p. 12-18. Contains four excellent photos of the deli (incl. one of the large menu board on the wall), a history of how the deli opened, the costs to get started, a list of menu items, and an interview with the founders–Andy Schecter, Greg Weaver, and Norman Holland. Opened on Saturday, 18 Nov. 1978.

Menu from The Tofu Shop. 1980? Located at 686 Monroe Ave. in Rochester. Opened on 18 Nov. 1978.

Menu for The Regular Restaurant. 1981. April. 4 panels. Dark blue ink on ivory paper. Located at 715 Monroe Ave., Rochester, New York 14607. Phone: 271-1380. Run by Janet Cashin and Phyllis Bickart.

Questionnaire filled out by owner of restaurant or deli. 1982. Lists the company's most popular soy-based menu items in descending order of popularity. The highest weekly total sales over the past 6-2 months, the month that this occurred, and why. The average weekly sales during this period. Average hourly wages paid to workers. The business startup cost (amount of money it cost to get the business started). Current profitability status. Plans for the future. Advice the owner would give to someone starting a similar business.

Shurtleff & Aoyagi. 1982. Report on Soyfoods Delis, Cafes & Restaurants. p. 3. Started in Nov. 1978 by Greg Weaver. Startup cost: $20,000. Avg. weekly sales in 1982: $4,800. Address: Rochester, New York. Phone: (716) 271-1380.

Andrew Schecter. The three began a wholesale tofu business 2 years ago. “Last month, they opened the Tofu Shop, which they describe as a delicatessen, to encourage people to try their product, an oriental staple for over 2,000 years.” Since opening on 18 November 1978, business has been booming. A photo shows the staff: Nina Roman, Sally Woodmansee, Greg Weaver, Cathy Iselin, and Betsy Lewis. Address: Rochester, New York.

3838. *SoyaScan Notes.* 1978. Chronology of soybeans, soyfoods and natural foods in the United States 1978 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• ***Summary:*** Jan. 25-27. International Soya Protein Food Conference held in Singapore, sponsored by the American Soybean Association. 400 people from 24 countries participated.

Jan. *Whole Foods* magazine starts publication in Berkeley, California, founded by Steven & Henrietta Haines, and Jim Schreiber. The first issue features an article titled “Making Money Making Tofu,” about five tofu companies. Westbrae has a full-page color ad titled “Someday all of this will be as familiar as apple pie,” showing five types of miso plus sea vegetables.

Feb. 17. Laughing Grasshopper tofu shop changes its name to New England Soy Dairy, Inc., the first company to use the term “soy dairy” in its name. Also in 1978 White Wave in Boulder, Colorado, publishes a charming poster announcing, “We’ve got an alternative. White Wave Soy Dairy.” An illustration shows a man leading his cow, standing under a beanstalk, looking in wonder at the seeds, soybeans.

March. The Cow of China, America’s third soy deli, run by White Wave, opens in Boulder, Colorado. It is later renamed Good Belly Deli.

April. Nasoya Foods Inc. starts making tofu and soymilk in Leominster, Massachusetts, inside a former dairy. Founded by John Paino and Robert Bergwall. May. 3. “What is this Thing Called Tofu” by Patricia Wells published in *The New York Times.*

May 22-25. Keystone Conference on Soy Protein and Human Nutrition held in Keystone, Colorado, organized by Ralston Purina. 105 registrants. The world’s top researchers on the subject present 34 papers demonstrating a new scientific understanding of the quality of soy proteins for human nutrition. The influential 406-page proceedings, titled *Soy Protein & Human Nutrition,* are published in 1979, edited by Wilcke, Hopkins, and Waggle.

May. The Soy Deli opens at The Soy Plant in Ann Arbor, Michigan. America’s fourth soy deli.

June. Brightsong Tofu, founded by Joel Brightbill and Bob Heartsong, starts making tofu in Redwood Valley, California. Sharon and Richard Rose bought the company in June, 1980 and in Nov. 1980 started The Real Food Tofu Cafe, a soy deli, adjacent to it.

June 26. First Takai catalog of tofu and soymilk equipment published, written by William Shurtleff. The first publication of its type in English, it helps start many new soyfoods companies.

July 28-31. First Soycrafters Conference held at The Soy Plant in Ann Arbor, Michigan. Conceived and organized by Steve Fiering. 75 people attend. The Soycrafters Association of North America (SANA) is founded, with Larry Needleman as the first president and a board of directors.

Sept. First issue of *Soyanews* published in Sri Lanka.

Oct. *The Farm Vegetarian Cookbook* (revised ed.) by Louise Hagler published by The Farm’s Book Publishing Co. in Tennessee.

Oct. Morinaga Milk Co. in Japan starts to export their tofu in aseptic Tetra Brik cartons worldwide. They issue a color recipe booklet to accompany their tofu.

Oct. Kendall Food Co. starts to make America’s earliest known commercial amazake in Brookline Village, Massachusetts. Amazake is made from koji, as are miso and shoyu. Not even in Hawaii was commercial amazake made before this.

Oct. 29-Nov. 3. World Conference on Vegetable Food Proteins held in Amsterdam, The Netherlands. More than 1,000 participants. Sponsored by the American Soybean Assoc. and others.

Nov. The Tofu Shop, America’s fifth soy deli-restaurant, opened in Rochester, New York, by Greg Weaver. Large and very creative menu. Later called The Tofu Gardens, and The Lotus Cafe.

Dec. American Soybean Association moves its headquarters from rural Hudson, Iowa, to St. Louis, Missouri, into greatly enlarged, modern offices.

Dec. *The Book of Tofu* (extensively revised, Americanized edition), by Shurtleff and Aoyagi published by Ballantine Books in a mass-market paperback edition. By 1987 the two editions have sold over 450,000 copies.

Dec. *Tofu Goes West,* by Gary Landgrebe published by Fresh Press.

Dec. *How to Cook with Miso,* by Aveline Kushi published by Japan Publications.

Dec. *Tofu Madness,* by Olszewski published by Island Spring tofu company in Washington.

Dec. Growing use of the term “shoyu” and less misuse of the term “tamari” in publications, indicating awareness of the difference between these two types of soy sauce.

* *Peaking Out on Tofu,* by Matthew Schmit self-published in Colorado.

* Soymilk Piima, resembling the traditional Finnish cultured dairy product, first made (on a home scale) by Pat Connolly in southern California.

* Soy oil: The King with no crown. A series of studies initiated by the American Soybean Assoc. in 1978 showed, surprisingly, that although soy oil is by far America’s

© Copyright Soyinfo Center 2013

widely used oil (accounting for 84% of all vegetable oils and 58.3% of all edible oils and fats), most consumers are simply not aware that they are using soy oil. When 1,200 female heads of households were asked "What oils can you think of?" only 17% mentioned soy oil (52% mentioned corn oil, 36% peanut oil, and 23% safflower oil), and only 7% reported having purchased soy oil in the past 6 months. The ASA Market Development Foundation promptly began a campaign to increase product recognition and loyalty, improve product image, and to encourage manufacturers worldwide to identify soy oil on product labels. The slogan used is shown at the start of this paragraph.

3843. **Product Name:** Tofu.
Manufacturer's Name: Central Soy Products.
Manufacturer's Address: 7 W. 14th St., Lawrence, KS 66044. Phone: 913-843-0653.
Date of Introduction: 1978. December.
Wt/Vol., Packaging, Price: Bulk 5-gallon plastic pails.
How Stored: Refrigerated.

New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Jim Cooley.

Soyfoods Center Computerized Mailing List. 1983. June 20. Central Soyfoods is now at 832 Louisiana, Lawrence, Kansas 66044. Phone: 913-843-0653.

Nancy Stoetzer-Taylor. 1988. Capital-Journal (Topeka, KS). Aug. 11. p. 1C-2C. Jim Cooley has been making tofu for 10 years.

Talk with Jim Cooley of Central Soyfoods. 1989. Feb. 16. The company started making tofu on 5 Dec. 1978. The original name was Central Soy Products; it was changed to Central Soyfoods some 12-18 months after opening. The address then was 7 West 14th St., but the postal service changed the number from 7 to 11. The company has not moved from its original location. The medium firm tofu was originally sold in bulk 5-gallon plastic pails. In about May 1985 they switched to water-packed individual tubs, then to vacuum pack in Dec. 1986. The company now makes about 1,200 lb/week of tofu. Note: In March 1990 the company was making about 1,700 lb/month of regular vacuum packed tofu ($1.59/lb. retail) and 800 lb/month of smoked tofu.

Form filled out by Jim Cooley, owner. 1998. July 7. Central Soyfoods is located at 11 W. 14th St., Lawrence, KS 66044. Phone: (785) 843-0653. Includes a Label for "Traditional Nigari Tofu."

3859. Hittle, Carl N. 1978. Soybean potential in Nepal: A report. Mimeographed, spiral-bound manuscript. 30 p. 28 cm. [26 ref]
• ***Summary:*** Dr. Hittle served as a soybean consultant in Nepal from Sept. 23 to Oct. 11, 1978. Contents: 1. Introduction. 2. Terms of reference for soybean consultant. 3. Background information: Soybean production, production research, evaluation of germplasm, local varieties and selections, preservation of soybean germplasm, rhizobial microbiology, economics of soybeans, soybean statistics, present uses of soybeans in Nepal, Food Research Services of the Ministry of Food, the dairy industry in Nepal, solvent extraction, CARE, UNICEF. 4. Observations at the research stations: Kakani Hill Station, Pakhribas Agricultural Centre, Lumle Agricultural Centre, Central Research Station–Khumaltar, Bhairawa Agricultural Farm, Rampur Agricultural Experiment Station, National Rice Station–Parwanipur.

Note 1. The first 3 stations are located in the hills,

© Copyright Soyinfo Center 2013

Khumaltar is in the Kathmandu Valley, and the last 3 are located in the plains (Tarai [Terai]).

5. Comments and suggestions: Priority of soybeans, operational work plan, assignment of national staff, assignment of international staff, training, linkages, a national soybean research center. Appendixes. I. Itinerary of C. N. Hittle. II. Persons met by soybean consultant. III. List of background information. IV. Sarbottam Pitho (Super Flour made from 50% soybeans). Uses of soybeans.

The soybean is an ancient crop in Nepal. Generally its culture has been restricted to terraces and valleys ranging from 500 to 1,500 meters (1,642 to 4,925 feet) in altitude. Soybeans are usually grown at lower altitudes in single rows on the bunds of rice paddy fields, or at higher altitudes as an intercrop with maize or millet. Hectarage is difficult to estimate; estimates made from 1976 to 1978 range from 10,000 to 70,000 hectares. Yields are low, ranging from 300 to 500 kg/ha. This is because of the two ways soybeans are traditionally grown, because they rarely have been grown in the Tarai [Terai] (Plains area) where higher yields can be expected, and because little emphasis has been given to developing superior varieties and cultural practices.

Soybeans are used mainly for human food in Nepal by "roasting the dried seeds (parching) or as green vegetables (boiling or frying the green pods followed by shelling of the seeds and eating the green soybeans). Parched soybeans are frequently mixed with popped maize (corn) and eaten daily as tiffin. Green soybeans are frequently mixed with other vegetables to make curry. A snack food is prepared by removing the seed coat of parched soybeans, splitting the cotyledons and mixing with garlic, salt, and chilli powder. Sprouted soybeans are mixed with other sprouted pulses and used as vegetable soup. Fermented soya products include soya sauce and kirima [kinema]."

Soybeans are one of the main sources of protein for the majority of the people in the Hill regions. Only small quantities of soybeans reach the market.

Note 2. This is the earliest document seen (Jan. 2012) that uses the alternative spelling "kirima" to refer to kinema, a fermented soyfood from Nepal and a close relative of Nepalese kinema and Japanese natto. Address: Soybean consultant in Nepal.

How Stored: Refrigerated.
New Product–Documentation: Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 395. Street mistakenly written as 3456 N. Cloud. Owner: Unknown.

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name as Korea Farm at 3456 (or 3707) N. Clark. Owner: Mr. Young Sun Yo.

3869. Kushi, Aveline Tomoko. 1978. How to cook with miso. New York, NY: Japan Publications Trading Co. 127 p. Dec. Illust. Index. 26 cm.
• ***Summary:*** Contents: Foreword. Preface. Introduction. 1. How to use miso for soup. 2. Miso soup recipes. 3. Miso condiments and relishes. 4. Miso sauces and spreads. 5. Side dishes with miso. 6. Miso pickles. 7. Miso for fun. 8. Make your own miso. Glossary. Standard tables of food composition.

"Happiness is the realization of one's eternal dream." Michio Kushi says that "The cooking of food is the highest of all human arts." Page 25, under "Special suggestions for miso," notes that miso soup with mochi stops bed-wetting, and gives a mother who has just had a baby strength to recover more quickly and also help in producing milk for breastfeeding. "Miso soup is good for relieving the effects of tobacco toxication, or too much smoking. In the old days in Japan, the long tobacco pipes were often washed in miso soup. It was said that this made them very clean. The morning after drinking too much alcohol, miso soup is very effective for restoring energy and clear thinking. When you burn your skin, if at that time you don't have any tofu or green vegetables available to apply to the burn, you can use miso as a healing paste."

The section titled "What is miso? (Comment from Michio Kushi)" (p. 27) states: "According to Japanese mythology, miso was a gift to mankind from the Gods, to assure man's health, longevity, and happiness. Miso has been an important food in the Orient since the beginning of its civilization, and now is becoming a popular food in the West." Note: The source of this mythological idea is not given.

Pages 55-57 contain a "Basic Recipe for Homemade Seitan," but it is not used with miso.

3870. Landgrebe, Gary. 1978. Tofu goes west. Palo Alto, California: Fresh Press. 114 p. Dec. Illust. Index. 21 cm. Japanese translation published in 1986.

Date of Introduction: 1978. December.
How Stored: Refrigerated.
New Product–Documentation: Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 397. Owner: Brandy Brawner.

3879. *New Roots* (*Amherst, Massachusetts*). 1978. Grow soybeans for a strong Northeast. 1(4):61. Nov/Dec.
• ***Summary:*** The New England Soy Dairy urges local farmers to grow soybeans for making tofu. "If all this talk about revitalizing New England's agriculture is getting you kind of excited, here's a positive suggestion. New England imports nearly 100% of its grain beans from the mid-west. We can change this.

"The New England Soy Dairy in Greenfield, Massachusetts, makes thousands of pounds of tofu each week, the basic ingredient for which is organic soybeans, presently imported from the mid-west. But soybeans can be grown here without much difficulty. The Soy Dairy uses about 6000 bushels of soybeans each year. That's something in the neighborhood of 200 acres worth. Interested? Why not add soybeans into the old crop rotation? Save yourself a little cash for nitrogen fertilizer.

"The Soy Dairy is interested in talking to anyone seriously interested in growing soybeans for them in the future. They have to be organically grown (three years away from chemicals) and you have to clean the beans extremely well before delivery. The Soy Dairy can supply seed. Help

in the West (2 pages, typeset). Address: 901 S. Rogers St., Bloomington 47401. Phone: 812-334-0695. Owner: Jay McKinney.

Label. 1983, undated. 4 by 3 inches. Self adhesive. Red, blue, yellow, green, and black on white. Heart within rainbow heart illustration. "Lovingly alive food, naturally, from Bloomington. The Pearl of Southern Indiana. No preservatives or additives–keep refrigerated. Changing water maintains freshness!"

Talk with Bob Davis, founder of Light Foods in St. Louis, Missouri. 1994. May 7. This company was owned by Jay McKinney and Rob Davis (Bob's cousin). Rob planned to work with Bob (who had a pressure cooker system) in S. Louis, so he sold his interest in Simply Soyfoods to someone else. Jay also got out, and they both come to work with Bob in St. Louis. Then Rob dropped out because he wanted to do other things; Jay stayed on as Bob Davis' production manager.

3888. **Product Name:** Tofu.
Manufacturer's Name: Soy Shop (The).

How Stored: Refrigerated.
New Product–Documentation: Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 397. Owner: Unknown.

Soyfoods Center Computerized Mailing List. 1981. Jan. 22. Talk with Wun-hong Eng, formerly of Fong-On. 1992. Feb. 23. This company was originally named Hop Hing, located on Doyer St. Sun Hop Hing means "New Hop Hing" or "New United Success." Hop Hing was one of the earliest tofu companies in New York City. The company is now owned by Raymond Tse, who is famous for killing a man who tried to extort money from him. A jury acquitted him, finding him innocent. The company is now in Queens. Phone: 718-458-8000.

3894. Swan Food Corp. 1978. Collected papers (Archival collection). Miami, Florida. 5 file folders, 1½ linear inches.
• ***Summary:*** Swan Foods was the first soyfoods company in the United States to make a wide variety of innovative soyfoods products–and to make them from organically grown soybeans. The company's papers are located at Soyfoods Center in Lafayette, California. In December 1978, when the company declared bankruptcy after about two intense years in business, Danny Paolucci cleaned out the office, keeping all documents that he believed might be of future importance. He kept them for 19 years, then sent them

© Copyright Soyinfo Center 2013

to Bill Shurtleff at Soyfoods Center at Shurtleff's request. Most of the papers relate to recipes. There are no commercial papers (invoices, ledgers, etc.).

Folder 1: Bulk soyfoods recipes, typed. Each recipe is typed on a sheet of 8½ by 11 inch lined paper. Recipes made in a Hobart mixer are marked with an asterisk (*) after the recipe name. The recipes (listed alphabetically) are: Baked tofu (with tamari sauce for marinade, bake at 350ºF for 30-35 minutes). Caraway tofu (add 5 ingredients to curding tofu; stir and let curds form). Carob cream cake* with topping (incl. 2 gallons soymelk). Cashew carob swirl cake* (incl. 3 gallons soymelk). Devils food cream cake* (incl. 2 gallons soymelk and tofu topping). Eggless egg salad* (incl. 10 lb boiled and cooled Swan Tofu). Marinade for tofu (incl. 1 gallon tamari; mix all ingredients in a 5 gallon bucket, add sliced tofu, and seal). Soy burgers* (incl. 2 gallons each cooked rice and fresh okara, and 2½ cups tamari). Tofu chip dip* (large and small; the small incl. 6 lb tofu boiled and cooled, ¼ cup tamari, and ¼ cup umeboshi plum paste; the large incl. 42 lb tofu).

Folder 2: Lists of ingredients for various soyfoods products typed on Swan Foods' blue-on-white letterhead: The products (listed alphabetically) are: Carob swirl marble cake (non-dairy) (incl. soy milk). Okara granola. Roasted cashew tofu pie (incl. tofu and organic soy milk). Soyogurt (non-dairy): Note: These ingredients are handwritten below a sample label design on the back of the bottom half of a Swan Foods order form.

Folder 3: Legal-sized yellow lined note pad with 17 pages of notes written in blue ink–probably by Mary Pung. Subjects: *Nutrition Almanac* (soybeans and soy milk, p. 71; malt, p. 76). One page of 6 bibliographic references for publications related to soy, with a large note: "Sell *Book of Tofu*, etc. in shop." *The Health Food Dictionary* & recipes (mu tea, p. 102; soybean, p. 159; tofu, p. 174). *Diet for a Small Planet* (Lappé, 1975 ed.) (protein table III–Legumes; notes on tofu, p. 102, soy yogurt vs. milk yogurt, p. 128-29; tofu, p. 132). *Recipes for a Small Planet* (Ewald, 1973) (table showing no. of calories you have to consume in order to get one gram of usable protein, p. 16; notes on Net Protein Utilization). *Soybean Diet* (Herman Aihara, 1974) (table of nutrients in various foods; cow's milk, p. 44; soybeans can help with environmental problems, p. 4; soybeans vs. meat, p. 6, 8-9; tofu preparation, p. 115; nigari, p. 116; nutrient value of tofu, p. 125). *The Book of Tofu* (Shurtleff & Aoyagi, 1975) (moral and emotional appeal, health, religion, ecology, economic, p. 19; complementary proteins, p. 24, 26; easy to digest and diet food, p. 26; low in saturated fats and cholesterol, linoleic acid, rich in minerals and vitamins, p. 27; nigari, free of chemical toxins, p. 28; quick and easy to use, p. 29; ecological, nitrogen from the air, p. 55; okara, p. 77-78; uses of agé, deep-fried tofu, p. 154-55; soymilk, p. 200). Six interesting teas.

Folder 4: Handwritten recipes (some very rough) and notes, in pen and pencil, mostly on individual sheets of paper. Soy-related recipe names (listed alphabetically): Basic tofu cheesecake. Basic tofu pie. Carob marble cake. Carob on blonde with tofu topping (also called Blonde on carob; baked, with soy milk). Carob tofu pie. Dips in tofu containers: Chive tofu dip, pimento tofu dip, sea tofu dip, Italian herb tofu dip, pimento olive dip (ideas only). Dressings: Miso, avocado, green goddess, creamy garlic, red Russian, spinach Russian (ideas only). Eggless egg salad. Eggless tofu salad. Frozen tofu cutlets. Mary's deluxe pizza (with tofu, from "Swan Food Corp."). Milk shake. Nori rolls. Okara products: burgers, burritos, felafels (ideas only). Pumpkin pie. Quiche with tofu. Sweetened carob shake. Tofu lemon pie. Tofu mayonnaise. Tofu pie filling. Tofu pudding, vanilla. Tofu quiche lorraine [Note: According to the *Joy of Cooking* (1975, p. 254-55), early recipes for quiche called for bacon and cream, but later cheese was added. When sautéed onions were included, the dish was called Quiche Alsacienne. Quiche Lorraine now typically contains egg white, bacon, milk or cream, and Swiss cheese]. Tofu rice salad. Tofu tarts. Tofu turkey (Barbara's, with stuffing). Yogurt dressing. The names of some people are included: Diane Kellar. Sherry (nori rolls).

Folder 5: Other. Tear-off recipes published by Natural Recipes, 94 Bourne St., Boston, Massachusetts 02130. Carob brownies (copyright 1974). Carob cake (copyright 1975). Note: Neither of these recipes contains any soy. Address: 5758½ Bird Road, Miami, Florida 33155. Phone: (305) 667-7141.

New Product–Documentation: Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 396. Owner: Unknown.

Letter/Order for the book *The Book of Tempeh* (profession edition) from Sonja Rank of Tofu, Inc. 1979. Nov. 16. The company is located at 1900 Oakcrest, Roseville, Minnesota 55108.

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Tofu, Inc., 1900 Oak Crest, Roseville, MN 55113. Owners: Mr. Dam Choi and Mr. Lee R. Lee, Korean.

FIND/SVP. 1981, May. "The tofu market: Overview of a high-potential industry." p. 80. The company now makes about 12,000 to 13,000 lb/week of tofu in the soft and firm styles. Address is 1900 Oak Crest, Roseville, MN 55113. Phone: 612-633-1098.

Note: This is the earliest record seen (March 2013) concerning Tofu, Inc., which was later renamed Eastern Foods Corp., then Mainland Express.

3898. Tofu Shop (The). 1978. Quarterly tofu sales and sprout sales. Telluride, Colorado. 2 p.
• ***Summary:*** Page 1: The first graph shows that quarterly tofu sales increased from zero starting in Oct. 1977, to 536 lb during the first quarter (ending Dec. 1977), rising to 1,568 lb during the 4th quarter, then falling to 1,224 lb during the 5th quarter.

The second graph shows that quarterly sprout sales increased steadily from zero starting in Oct. 1977, to 536 lb during the first quarter, rising to 914 lb during the 4th quarter, then falling to 812 lb during the 5th quarter. They grew alfalfa, clover, radish and mung bean sprouts; no soy sprouts.

"* Approximately 75% of our total wholesale market is local (in Telluride), the remaining 25% being shipped to surrounding communities.

** The above charts do not include tofu and sprouts used directly by our own restaurant, which averages 10 lbs/day for tofu and 5 lbs/day for sprouts, 6 days/week, 50 weeks/yr. This total out to 3,000 lbs of tofu and 1,500 lbs of sprouts.

1978 financial recap. Receipts: Restaurant sales $22,800. Wholesale $7,300. Total: $30,100. Expenses: Food supplies $10,100. Wages and draws $8,750. Fixtures and equipment $3,300. Other supplies $2,000. Rent $2,000 Other $4,500. Total: $30,200. Outstanding notes owed by the Tofu Shop $2,000.

Page 2: Accounts (average order per week). Local: Tofu Shop 75 lbs. Winterstash 60 pacs. Rose Market 24 pacs. Red Hot Produce 50 pacs. Note: 1 pac = about 13.6 oz. Total local orders: 192 lb.

We deliver: Durango Natural Foods 25 pacs. Durango Bible & Health 9 pacs. Nathy's Naturals 9 pacs. Delores Mercantile 9 pacs. Montrose Health 6 pacs. Meredith (Montrose) 6 pacs. Country Store (Norwood) 5 pacs. Bread Basket (Gunnison) 10 pacs. Total we deliver: 69 lb. Grand total: 261 lb/week.

Letter (e-mail) from Matthew Schmit. 2009. March 30. "We serviced every customer we could find. If that account was in Telluride, we would have just walked the order over to them. If it was in a nearby community, chances are they came to pick it up, or else it might have been delivered via our produce supplier. At any rate, we were trying to build our customer base and educate the community about tofu, so we took care of every order, no matter how small.

"The fact that we were delivering directly to all those accounts is now somewhat amazing, considering that some must be a hundred miles or more from Telluride. We must have been sending coolers with Telluride residents on their supply trips to those communities, although I have some clear memories of delivering myself in Durango, Montrose and Gunnison." Address: 116 N. Oak St., P.O. Box 69, Telluride, Colorado 81435.

Manufacturer's Name: Aqua Agra.
Manufacturer's Address: 100 Highline Dr., Longwood, FL 32750. Phone: 305-339-8157.
Date of Introduction: 1978.
How Stored: Refrigerated.
New Product–Documentation: Shurtleff & Aoyagi. 1979. July. New Tofu Shops & Soy Dairies in the West. Don Wilson, owner. Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Don Wilson.

Talk with Don Wilson. 1993. Nov. 24. His wife is Korean. He started making tofu in 1978, after he was sprouting soybeans and growing several other types of sprouts. The *Sentinel Star* did a story on his company in 1980.

3906. **Product Name:** Tofu.
Manufacturer's Name: Community Mercantile Co-op.
Manufacturer's Address: 700 Main St., Lawrence, Kansas.
Date of Introduction: 1978.
New Product–Documentation: Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 395. Mercantile Food Co-op, 615 Massachusetts, Lawrence, Kansas 66044. Owner: Unknown.

Talk with Molly Hamaker at Institute for the Arts of Democracy, San Rafael, California. 1991. Oct. 4. Her first husband (Dave Van Hee), Thom Leonard, and another man whose first name was Tom, made tofu in the basement of their private home and sold it at the Community Mercantile Co-op, of which Molly was the manager. They made about 30-40 lb of tofu (1 5-gallon bucketful) several times a week. The co-op is still active in Lawrence. The tofu company, itself, had no name. The only product they made was plain tofu. Molly knows it was 13 years ago because her daughter, who is now age 13, was just born.

3907. **Product Name:** Eastern Flavor Tofu.
Manufacturer's Name: Eastern Foods, Inc.
Manufacturer's Address: Minneapolis, Minnesota.
Date of Introduction: 1978.
New Product–Documentation: Shurtleff & Aoyagi. 1983. Soyfoods Industry and Market; Soyfoods Center Computerized Mailing List. 1983. June 20. Owners: Lee R. Lee & Calvin Lutzke. Ostman. 1985. Morning Pioneer News Dispatch (St. Paul, Minnesota). Sept. 15. p. 1G, 3G. He first

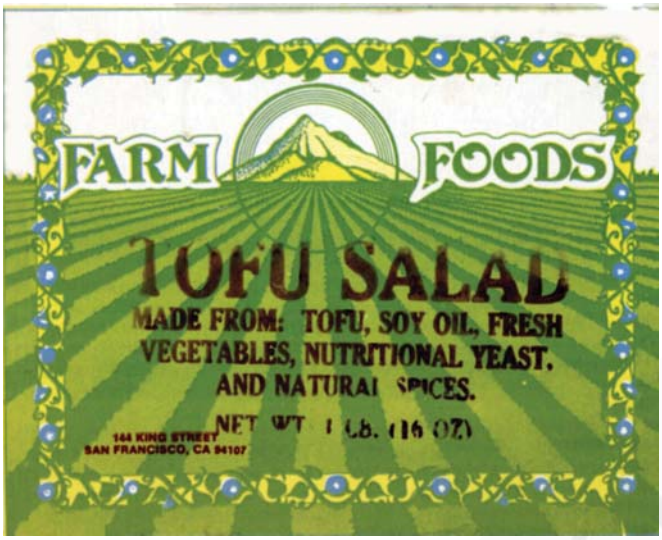
made tofu in a small plant in Roseville.

3908. **Product Name:** Tofu Salad.
Manufacturer's Name: Farm Foods.
Manufacturer's Address: San Rafael, California.
Date of Introduction: 1978.
Ingredients: Tofu, soy oil, fresh vegetables, nutritional yeast, vinegar, prepared (wet) mustard, natural spices.
Wt/Vol., Packaging, Price: 1 lb deli container sealed with film.
How Stored: Refrigerated, 14 day shelf life.



New Product–Documentation: Shurtleff & Aoyagi. 1979. Tofu & Soymilk Production. p. 163. Label. ca. 1979. Light green and yellow on white, with product name and ingredients stamped onto label template. 1 lb. 144 King St., San Francisco 94107.

Note: This product, which resembled an eggless egg salad, was first made by Farm Foods in San Rafael, then in San Francisco.

3909. **Product Name:** Farm Style Full Fat Soy Flour: Coarse Grind.
Manufacturer's Name: Farm Foods.
Manufacturer's Address: 156 Drakes Lane, Summertown, TN 38483.
Date of Introduction: 1978.
Ingredients: Soybeans.
Wt/Vol., Packaging, Price: 2.5 lb (1.14 kg). Poly bag inside a paper bag.
How Stored: Refrigerated.
New Product–Documentation: Label. 1978, dated. 4 by 9 inches. Brown, green, yellow and orange on beige. "Make soymilk and tofu at home. Recipes included." Farm Foods Products Catalog. 1978. p. 1.

Ad in Tom Riker and Richard Roberts. 1979. *The Directory of Natural & Health Foods.* p. 189. A photo shows the label. "Soyflour: This full-fat, farm style coarse ground flour is especially good for making soymilk and tofu at home. Farm Foods soy flour is ground fresh in Tennessee, and should be refrigerated. No preservatives have been added. Available in 2½ lb. display package and in bulk. Recipe flyer included."

3910. Farm Foods. 1978. Products catalog. 156 Drakes Lane, Summertown, TN 39483. 6 p. 21 cm.
• ***Summary:*** Products sold include Whole Cleaned Soybeans, Full-Fat Soy Flour, Good For Ya Texturized Vegetable Protein, Nigari, Tempeh Kit, Tempeh Starter, Good Tasting Nutritional Yeast, The Farm Vegetarian Cookbook, and Yay Soybeans! T-Shirts. Free literature includes: Yay Soybeans!, Vitamin-B-12 for Complete Vegetarians, Feeding Your Baby Vegetarian, Feeding Your Young Vegetarian Child, and Vegetarian Prenatal Nutrition and High Protein Recipes.

This innovative catalog is printed with brown ink on white paper. At the top of the cover are the words "Farm Foods"; to the left of them is a circular logo, which shows rows of crops (soybeans) in a field converging in the distance at the foot of three mountains. Below that is the address, phone number, and catalog title. On the bottom half of the cover is a photo of many young soybean plants growing in a field. Address: Summertown, Tennessee.

3911. **Product Name:** Natural Nigari for Curding Tofu.
Manufacturer's Name: Farm Foods.
Manufacturer's Address: 156 Drakes Lane, Summertown, TN 38483. Phone: 615-964-3575.
Date of Introduction: 1978.
Ingredients: Potassium, magnesium, calcium, and sodium salts from sea water.
Wt/Vol., Packaging, Price: 1 lb or bulk.
How Stored: Shelf stable.

3913. **Product Name:** Hinode Soymilk.
Manufacturer's Name: Hinode Tofu Company.
Manufacturer's Address: 526 Stanford Ave., Los Angeles, CA 90013.
Date of Introduction: 1978.
New Product–Documentation: Shurtleff & Aoyagi. 1984. Soymilk Industry & Market. p. 32.

3914. **Product Name:** Tofu.
Manufacturer's Name: Hwa Chang.
Manufacturer's Address: Toronto, ONT, Canada.
Date of Introduction: 1978.
How Stored: Refrigerated.
New Product–Documentation: Talk with Jhasun Koo, owner and founder of Pyung Hwa Food Co. 1989. May 4. He started making tofu in 1978 on Dundas St. In 1978 the only other tofu companies in Toronto were Yet Sing (probably the first) and Hwa Chang. Both were run by Chinese-Canadians and both are still in business.

3915. **Product Name:** Island Spring Plain Soymilk.
Manufacturer's Name: Island Spring, Inc.
Manufacturer's Address: P.O. Box 747, Vashon, WA 98070.
Date of Introduction: 1978.
Ingredients: Soybeans, water.
Wt/Vol., Packaging, Price: 64 fluid oz (½ gallon) 1.89 liters.
How Stored: Refrigerated.
Nutrition: Per 8 oz.: Calories 75, protein 7.7 gm, carbohydrate 5 gm, fat 3.4 gm.
New Product–Documentation: Leviton. 1981. Soyfoods. Winter. p. 17. Label. 1982. 2.75 by 7 inches. Self adhesive. Green, yellow/gold, white on blue. Illustration of sun or moon behind island mountains. "A healthy natural beverage which may be substituted cup for cup in any recipe calling for regular milk. As a drink, for added flavor try a pinch of salt and honey to taste."

3916. **Product Name:** Island Spring Pressed Silken Tofu. Renamed Organic Silken Soft Tofu (Nov. 1987).
Manufacturer's Name: Island Spring, Inc.
Manufacturer's Address: P.O. Box 747, Vashon, WA 98070.
Date of Introduction: 1978.
Ingredients: Soybeans grown without chemical pesticides or fertilizers; water; Nigariko (Pure food grade calcium sulfate).
Wt/Vol., Packaging, Price: 16 oz.
How Stored: Refrigerated.
Nutrition: Per 4 oz.: Calories 82, protein 8.9 gm, carbohydrates 2.6 gm, fat 5 gm, calcium 166 mg, phosphorus 120 mg, iron 1.9 mg, thiamine 0,02 mg, riboflavin 0.02 mg, sodium 6.8 mg, potassium 34.4 mg.
New Product–Documentation: Label. 1978. 5.5 by 4.5 inches. Brown and light green on clear film. "Pressed silken tofu is best used or pureed for cream sauces, spreads, dips and salad dressings." Gives recipe for Tofu Curry Dip.

Talk with Luke Lukoskie. 1987. Oct. 19. The curd is set in a vat then scooped into cloth-lined tofu boxes and pressed. It has always been pressed. It sells about 5-10% as much as the traditional firm tofu. Island Spring Inc. Fact Sheet and Price List. 1988. This product is still being sold. Eventually this will become "'Autofu,' the automatically made tofu."

3917. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: La Moisson.
Manufacturer's Address: Geneva, Switzerland.
Date of Introduction: 1978.
New Product–Documentation: Verena Krieger. 1981. Tages Anzeiger Magazin. Aug. 22. p. 6-12. "Gestern Steak, Morgen Tofu. The Geneva restaurant "La Moisson" has had tofu on the menu for 5 years."

Anne-Marie Jaccard and Verena Krieger. 1982. Illustre (Lausanne, Switzerland). No. 4. p. 59-63. Jan. 27. "Une graine pour l'an 2000." "In the two macrobiotic restaurants of French-speaking Switzerland (Romandie), tofu is found regularly à la carte: at 'The Bio' in Lausanne, and 'La Moisson' in Geneva."

Letter from Verena Krieger. 1983. March 8. "The first people to make tofu in Switzerland were at the restaurant 'La Moisson' ["Moisson" means, the harvest, harvest time, or crop] in Geneva in 1978. They are macrobiotic and they made tofu for their restaurant and store only. The first large-scale production was by Sojalade in Aug. 1981."

Letter from Verena Krieger. 1990. Aug. 10. She has no way of finding out what in 1978 this company started selling tofu, who made the tofu, or how they learned.

3918. **Product Name:** Tofu No-Egg Salad, Marinated Tofu, Okara Salad.
Manufacturer's Name: Lecanto Tofu.
Manufacturer's Address: P.O. Box 444, Lecanto, FL

32661.
Date of Introduction: 1978.
New Product–Documentation: Talk with Marvel Huffman. 1988. May 17.

3919. **Product Name:** Tofu Pies (Deli).
Manufacturer's Name: Madison Tofu Co-op. Renamed Bountiful Bean Plant by Sept. 1979.
Manufacturer's Address: 903 Williamson St., Madison, WI 53703. Phone: 608-251-0595.
Date of Introduction: 1978.
How Stored: Refrigerated.
New Product–Documentation: Letter/Order for pamphlets on tofu, tempeh, and miso from "Bountiful Bean Plant." 1979. Sept. 20. The company is located at the address shown above.

James Lubbe. 1988. March. Abbreviated History of the Bountiful Bean.

3920. **Product Name:** Marjon Tofu.
Manufacturer's Name: Marjon Specialty Foods.
Manufacturer's Address: 600 27th St. South, St. Petersburg, FL 33712. Phone: 813-894-3310.
Date of Introduction: 1978.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: John Miller.

Soyfoods Center Computerized Mailing List. 1983. June 20. The company has moved to 3508 Sydney Rd., Plant City, Florida 33566. Phone: 813-752-3482. Owner is still John Miller.

Trent Rowe. 1988. Sept. 29. "Business sprouts from humble bean." Marcia and John Miller started the business in 1972 making sprouts. The have been making tofu for 10 years. They are now in Plant City, between Tampa and Lakewood.

Also published in *Daily News* (Palatka, Florida). 1988. Oct. 5.

Talk with John Miller, owner. 1993. April 28. John and his wife learned how to make tofu at the Island Spring Apprenticeship Program. John has always thought that he was the first person in America to vacuum-pack tofu [he wasn't]; they started with simple Multi-Vac single-chamber packaging machines. Marjon has never made a water-packed tofu. A brochure notes that the company now has 65 employees and almost 200 products. Tofu and tofu crumbles are featured. Marcia and her executive chef give tofu seminars in the Marjon Test Kitchen.

NATURAL SOY PROTEIN

Morinaga
BRAND
EVER-FRESH
SILKEN
TOFU
SOYBEAN CURD

WHAT IS TOFU?

TOFU is one of the world's most popular sources of high-quality, low-cost protein. Yet unlike most other protein sources, TOFU is entirely free of cholesterol and very high in polyunsaturated fats. Excellent also for dieters, it contains only 52.6 calories per 100-grams! TOFU is, in short, the ideal food for every health-minded person.

A traditional, natural food discovered by a Chinese prince in 164 B.C., TOFU is now prepared fresh each morning at 38,000 shops in Japan alone, plus over 100 shops in America. It is the most important soy protein food throughout East Asia, a protein backbone of the diet for more than one billion people.

Remarkably versatile, TOFU can become a key ingredient in many of your favorite Western-style dishes including dressings, dips, spreads and hors d'oeuvres; salads, sandwiches, soups, and sauces; egg, vegetable, and grain preparations; barbecued and deep-fried specialties, casseroles, and even desserts . . . as the following tasty recipes show.

After opening the carton, keep it refrigerated and serve within 2 days. Slight separation of water from TOFU (as from yogurt) is perfectly normal.

Morinaga SILKEN TOFU

This SILKEN TOFU is packaged in a revolutionary new way—developed by Morinaga—that allows the TOFU, which contains no preservatives of any kind, to stay as fresh as the day it was made for up to six months *without refrigeration*. Even on hot summertime travels, picnics, or camping trips, it will never lose its freshness. The secret lies in the Tetrapak container, developed in Sweden and now used throughout the world, especially in areas without refrigeration. The mixture of pasteurized soymilk and coagulant is run into the package under highly sanitary conditions, sealed, and heated in water to form the TOFU. The laminated Tetrapak container thereafter keeps out all spoilage microorganisms.

Morinaga SILKEN TOFU is made with thick soymilk which gives it a rich and creamy flavor and silken smooth consistency, plus enough body and firmness that you can puree it, slice it, or fry it like regular TOFU. Since it is not packed in water, it is easier and neater to use than regular TOFU. and it retains its full natural sweetness, since it is made without separation of curds and whey. Delicate and tasty as a fine custard, it is perfect for

CREAMY TOFU DRESSING OR DIP

Makes 1½ cups

1 pack Morinaga SILKEN TOFU
2 tablespoons lemon juice
3 to 4 tablespoons oil
½ teaspoon salt
1 teaspoon natural soy sauce (shoyu)
½ to 1 clove of garlic, crushed
½ teaspoon dill seeds (optional)
2 tablespoons minced parsley

Combine all ingredients but the parsley in a blender and puree for 30 seconds, or until smooth. Serve chilled, topped with a sprinkling of the parsley. Delicious served over salads like a thick Roquefort dressing, as a dip with fresh vegetable slices or potato chips, as a topping for various cooked vegetables, or even as a sandwich spread. Store refrigerated or frozen.

Or, substitute ½ teaspoon curry powder and 2 to 3 teaspoons minced onion for the garlic and dill. Stir in parsley.

SILKEN TOFU & STRAWBERRY WHIP

Serves 4

1 pack Morinaga SILKEN TOFU
2 cups (7 oz.) strawberries
2 tablespoons honey
Several drops of pure vanilla extract

Combine TOFU, 1 cup strawberries, and the honey and vanilla in a blender; puree for 30 seconds, or until smooth. Spoon into four custard cups and top each portion with 3 to 5 strawberries. Serve chilled.

For variety, substitute 2 cups (7 ounces) fresh pineapple or peach chunks for the strawberries; or add ½ cup cold milk (soy or dairy) and puree to make a refreshing and healthful milkshake.

BREADED TOFU CUTLETS

Serves 2

1 pack Morinaga SILKEN TOFU, cut crosswise into 8 slices, each ½ inch thick
3 tablespoons whole wheat flour
Dash of salt and pepper
1 egg, lightly beaten
¾ cup bread crumbs, bread crumb flakes (panko), or corn meal
½ cup oil for shallow-frying
¼ cup ketchup
2 tablespoons Worcestershire sauce

ArrangeTOFU slices between triple layers of a clean dishtowel and allow to stand for 10 to 15 minutes to reduce moisture. Mix flour, salt, and pepper, then dust TOFU slices in flour mixture, dip into beaten egg, and dust with bread crumbs. Heat the oil in a large skillet and shallow-fry for 2 minutes on each side until crisp and golden brown. Mix ketchup and Worcestershire sauce; serve as a topping for the hot TOFU.

3925. **Product Name:** Tofu.
Manufacturer's Name: Musubi Foods (Paul's Tofu).
Manufacturer's Address: 155 Archway Rd., Highgate, London, N6 4NA, England. Phone: 013-481-192.
Date of Introduction: 1978.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Paul Jones.

Shurtleff & Aoyagi. 1982. Soyfoods Industry: Directory & Databook. p. 3. Letter from Sjon Welters. 1982. April 16. "I only know of one tofu maker in Britain, Paul Jones (Tofu Shop), 155 Archway Rd., London N19."

Leaflet titled "Paul's Tofu" (undated, but sent in 1982). Address: The Old Brewery, Wheathampstead House, Wheathampstead, Hertfordshire, UK. Phone: Wheathampstead (058283) 4241. 3 panels on each side. Each panel: 21 x 10 cm. Printed brown ink on beige paper. Contents: Introduction to tofu. For whom is tofu intended? The qualities of tofu. Suggestions for use. Storage. Try these recipes with your tofu (5 recipes from *The Magic of Tofu*, by Jane O'Brien; Thorsons Publishers). Community Health Foundation (188-94 Old Street, London EC1V 9BP). "Paul's Tofu Burgers are made from organically grown soya beans, whole grain cereals, vegetables and herbs..."

Soyfoods Center Computerized Mailing List. 1983. June 20. The company is now listed as Paul's Tofu, with a second location at Wheathampstead House, Wheathampstead, St. Albans, Hertfordshire, England. This latter address is also listed at the First European Soyfoods Workshop, Sept. 1984.

E-mail from Paul Jones, founder. 2011. June 6. Q1. On what date did you make your first commercial tofu? Ans: It must have been 1977/78–I was already in production when we came to 'Soyfoods Comes West' in 1979. Peter Bradford might remember for it was he who gave us the Chinese stone grinder to make the 'Go.' Q2. Was the address at that time you started commercial production: 155 Archway Rd., Highgate, London, N6 4NA, England? Ans: Yes.

Letter (e-mail) from Paul Jones in England in reply to questions. 2013. March 25. (1) What was the name of your company when it started making tofu? Ans: "I was called 'Musubi foods' (made by bringing yin & yang together), but people called me Paul Tofu as they had previously called me Paul the baker." (2) Where did you first learn about tofu and tempeh? Ans: "I learned about tofu & tempeh from Macrobiotics–Chris Dawson (Mitoku / Clearspring) & others at East West / Community Health Foundation."

"Peter Bradford might remember when he gave us the Chinese quern for making the 'go'. I did all this at 155 Archway Rd but on a small scale. The macrobiotic community were the customers in 1979/80. We moved to Wheathampstead House Herts, home of Murphy & Son where they had a former brewery which we occupied until we set up in Melton Mowbray." Letter (e-mail) from Peter Bradford. 2013. March 29. "I too have no records going as far back that far but I think that Paul is correct. We must have supplied him with his quern for making tofu sometime mid/late 1970's.

"Paul was as far as I know the first person in the UK to make tofu using organic soybeans and Japanese nigari. Before that from when we started our wholefood shops in the early/mid 70's we used to buy in fresh tofu from London's Chinatown for resale. In those early days I also remember that people also used to make homemade tofu using kits that we imported from Japan."

3926. **Product Name:** Laughing Grasshopper Organic Nigari Tofu [Firm Style, or Medium].
Manufacturer's Name: New England Soy Dairy Inc.
Manufacturer's Address: 305 Wells St., Greenfield, MA 01301. Phone: 413-772-0746.
Date of Introduction: 1978.
Ingredients: Water, organic soybeans, nigari (natural solidifier).
Wt/Vol., Packaging, Price: 16 oz packed in water in

3928. **Product Name:** Tofu, and Tempeh.
Manufacturer's Name: Pillar of Dawn (Amud Ha Shachar).
Manufacturer's Address: Moshav Me'or Modi'im, Doar Na Hamercaz, Israel.
Date of Introduction: 1978.
New Product–Documentation: Shurtleff & Aoyagi. 1979. July. New Tofu Shops & Soy Dairies in the West. Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Avraham Sand.

Talk with Avraham Sand. 1981. This was Israel's first tofu shop; it started in 1978. The tofu was curded using bittern (nigari) from a salt factory on the Dead Sea. The company also made soymilk, tempeh, and miso, but only the tofu and miso were sold commercially, off the moshav, in Jerusalem. Avraham was an American, born Roger Sand, the son of Ralph Sand, who did work on soy cheeses with Anderson Clayton in Texas. Ralph tried to develop a casein-free soy cheese that would melt, but he never was able to.

Shurtleff & Aoyagi. 1982. Soyfoods Industry: Directory & Databook. Owner is now Ben Zion Soloman.

Talk with Avraham Sand. 1990. Sept. 9. Gives a detailed history of this company.

Talk with Nathan Segal. 1994. Sept. 12. He lives in Natanya, Israel. Shlomo Carlebach started this moshav, and it soon became a leading purveyor of natural foods in Israel. It was within that context that a tofu shop started there. He thinks the tofu shop is still in operation. Note: A moshav (the word was first used in 1931) is a cooperative settlement of small individual farms in Israel. By comparison, a kibbutz (the word was also first used in 1931) is a collective farm or settlement in Israel.

3929. **Product Name:** [Tofu: Soybean Cake].
Foreign Name: Tofu: Gâteau aux Feves de Soya.
Manufacturer's Name: Pyung Hwa Food Co. Inc.
Manufacturer's Address: 2139 Dundas St., Toronto, ONT, M6R 1X1, Canada. Phone: 416-534-0237.
Date of Introduction: 1978.
Ingredients: Soya beans (Feves de soya), water, magnesium chloride (chlorure de magnesium), calcium sulfate (sulfate de calcium).
Wt/Vol., Packaging, Price: 600 gm.
How Stored: Refrigerated.
New Product–Documentation: R. Leviton. 1980. Soyfoods magazine. Summer. p. 16-17. "Mr. Jhasun Koo's Korean tofu shop (2139 Dundas St.) is located underneath a garage and service station. The traditional-style shop, which began operation in 1976, produces about 5,000 pounds of tofu weekly, in the form of 2000, 40-ounce containers of nigari-made tofu." He has 7 workers. Two-thirds of Pyung Hwa's market is Oriental stores, the rest going to natural foods stores. With Vital Eat handling his tofu distribution now, and Mr. Koo's recent conversion to nigari and organic soybeans, he expects to increase sales to the natural foods trade.

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Mr. Jhasun Koo.

Label. 1983, undated. 5 by 4.25 inches. Plastic film. Blue and light blue on clear film. "Soybean cake. Gateau aux feves de soya. Keep refrigerated."

Talk with Martha Gifford Thompson of Rochester Zen Center. 1989. April 11. She once visited a small tofu shop on Dundas in Toronto. She is not sure what nationality of people ran it. Talk with Jon Cloud of Soy City Foods. 1989. May 3. Pyung Wa was an early tofu company on Dundas St.

Talk with Jhasun Koo, owner and founder. 1989. May 4. He started making tofu in 1978 (not 1976) on Dundas St. Before that he had made soy sprouts in his home basement. In 1978 the only other tofu companies in Toronto were Yet Sing (probably the first) and Hwa Chang. Both were run by Chinese-Canadians and both are still in business. In 1986 he moved from Dundas St. to his current address: 115 McCormack St., Toronto, ONT, M6N 1X8. Phone: 416-767-7604.

3930. **Product Name:** Firm Pressed Tofu.
Manufacturer's Name: Quong Hop & Co.
Manufacturer's Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.
Date of Introduction: 1978.
Ingredients: Water, soybeans, magnesium chloride (nigari).
Wt/Vol., Packaging, Price: 6 oz.
How Stored: Refrigerated.
New Product–Documentation: Label. 1987, undated. 3 by 2 inches. Blue on white. "No preservatives." Talk with Ben Lee. 1988. Oct. He guesses it was launched in about 1978.

© Copyright Soyinfo Center 2013

3931. **Product Name:** Raw Fried Tofu.
Manufacturer's Name: Quong Hop & Co.
Manufacturer's Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.
Date of Introduction: 1978.
Ingredients: Water, soybeans, safflower oil, magnesium chloride (nigari).
Wt/Vol., Packaging, Price: 7 oz (198 gm).
How Stored: Refrigerated.
New Product–Documentation: Label. 1987, undated. 3 by 2 inches. Red on yellow. "No preservatives." Talk with Ben Lee. 1988. Oct. He guesses it was launched in about 1978.

3932. **Product Name:** Flavored Soy Bean Cake.
Manufacturer's Name: Quong Hop & Co.
Manufacturer's Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.
Date of Introduction: 1978.
Ingredients: Water, soy beans, soy sauce (consisting of water, soy bean, salt, wheat caramel), soy oil, salt & spices, 1/10 of 1% calcium sulfate.
Wt/Vol., Packaging, Price: 6 oz (170 gm).
How Stored: Refrigerated.
New Product–Documentation: Label. 1979, undated. 3 by 2 inches. Black and silver on shiny red. The Chinese characters read: "Wu hsiang doufu kan." Five-spice tofu. Talk with Ben Lee. 1988. Oct. He guesses it was launched in about 1978. In Jan. 1979 a similar product, named Savory Baked Tofu, was introduced; it was also a type of five-spice tofu, but was baked.

Note: This is the earliest known five-spice pressed tofu sold in the Western world.

3933. **Product Name:** Organic Tofu (Natural Nigari, Firm-Style Nigari, Calcium Sulfate, or Firm-Style Calcium Sulfate).
Manufacturer's Name: Quong Hop & Co.
Manufacturer's Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.
Date of Introduction: 1978.
Ingredients: Water, organic soybeans grown in accordance with California Health and Safety Code 26569.11, natural nigari (magnesium chloride). Or calcium sulfate (a natural earth mineral).
Wt/Vol., Packaging, Price: 16 oz packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.
How Stored: Refrigerated.
New Product–Documentation: Label. 1980, undated. 5 by 4 inches. Nigari is green on clear film, firm-style nigari is red, calcium sulfate is blue, firm-style calcium sulfate is brown. "Fresh and natural. Since 1906. No preservatives." "Quong Hop" written in Chinese characters at top of circle.

Product with Label purchased at Safeway supermarket in Lafayette, California. 1993. Aug. 25. In two stickers on the front of the package, Quong Hop now claims that (1) their tofu is "The original reduced fat tofu;" and (2) "The original reduced fat–High protein tofu: Serving size 4 oz., Fat per serving 3 gm. Protein per serving 14 gm." This is probably in response to White Wave's reduced fat tofu. The film label for the 1 lb tub is now dark red, light red, and white. The price is $1.39.

3934. **Product Name:** [Tofu].
Foreign Name: Tofu or Tau-Fu.
Manufacturer's Name: Roland A. di Centa.
Manufacturer's Address: Via Maffei, Milan, Italy.
Date of Introduction: 1978.
New Product–Documentation: Letter from Roland A. di Centa. 1993. Aug. 9. Roland was one of the first people to introduce soyfoods to Italy. He was very interested in macrobiotics and was a close friend of Michio Kushi. "My interest in food was to heal people with food and I had a lot of success using a holistic approach to help people with major diseases. For all these cures I used a lot of miso, tempeh, and tofu. Good miso was available. However tempeh and tofu had to be locally produced. I cured people from 1980 until about 1985." Roland started to make and sell tofu in Italy in 1978. He made it by himself out of his apartment at Via Maffei, Milan, Italy. For details on how he got started, see the 1993 letter cited above.

3935. **Product Name:** Tofu & Brown Rice Burrito.
Manufacturer's Name: Season's Harvest.
Manufacturer's Address: 52 Broadway, Somerville, MA 02145. Phone: 617-628-1182.
Date of Introduction: 1978.
Ingredients: Incl. tofu, brown rice.
New Product–Documentation: Talk with Ademar Reis. 1993. Nov. 29. He introduced this product in about 1978.

3936. Shurtleff, William. 1978. Notes on visit to Wo Chong tofu factory in San Francisco. Lafayette, California: New-Age Foods Study Center. 1 p. Unpublished manuscript.
• ***Summary:*** The company uses 2,000 lb/day of dry soybeans to make firm tofu, sui-doufu (silken tofu), deep-fried tofu cubes (puffy but not hollow) with no expanding agent, and soy sprouts.

Walter Louie says that both Wo Hop and Wo Chong both used to make fermented tofu; they started at about the same time as Quong Hop. George Young was in Charge. Walter Louie arrived at Wo Chong in about 1949. He stopped making it because he was short of manpower.

Note: This is the earliest document seen (April 2001) that contains tofu industry or market statistics for smaller companies. Address: 790 Los Palos Manor, Lafayette, California 94549. Phone: 283-3161.

3937. **Product Name:** Tofu [Soft, Firm, or Bulk].

© Copyright Soyinfo Center 2013

Manufacturer's Name: Southwest Soy Foods.
Manufacturer's Address: 121 E. Santa Fe Ave., Santa Fe, NM 87501. Phone: 505-988-1889.
Date of Introduction: 1978.
Ingredients: Organic soy beans, calcium sulfate, filtered water.
Wt/Vol., Packaging, Price: 16 oz packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.
How Stored: Refrigerated.
New Product–Documentation: Talk with Kathryn Bennett. 1989. Aug. 28. She introduced these three types of tofu in 1978.

Label from about 1982 brought by Richard Jennings. 1990. Sept. 20. About 5.5 by 4.5 inches. Printed brown ink on clear film. Illustrations: Around perimeter of container is a stylized southwest snake-like animal with an arrow tongue pointing at its tail. In the center is a sort of thunderbird. The company name is written with filigree letters. "The traditional food of the future. a.k.a. bean curd or soy bean cheese. Send stamped envelope for free recipes and nutritional information."

Label for "Firm Tofu" from about 1982. Red on pink. Made from organically grown soybeans and calcium sulfate.

Label for "Firm Organic Tofu." Sent by Richard Jennings. 1990. Sept. 28. 6 by 5 inches. Plastic lidding film. Red and black on pink. With UPC indicia. Company name now spelled "Southwest Soyfoods." Weight: 16 oz. Ingredients: "Organically grown soybeans, water, calcium sulfate (a natural mineral). All natural ingredients. No preservatives."

3938. **Product Name:** Tofu Vegetable Stew.
Manufacturer's Name: Swan Foods Corporation.
Manufacturer's Address: 5758½ Bird Rd., Miami, FL 33155.
Date of Introduction: 1978.
Wt/Vol., Packaging, Price: 8 oz pack. Wholesales for $0.65 (April 1978).
How Stored: Refrigerated.
New Product–Documentation: "Swan Food Corp." order form and price list for distributors. 1978. April. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. This was America's first refrigerated tofu entree.

3939. Takatsuka Marugo Shokuhin. 1978. Kaisha annai [Introducing our company]. Soya 3-41-10, Ichikawa-shi, Chiba-ken, Japan. 11 p. Manufacturer's catalog. Color. [Jap]
• ***Summary:*** The company was founded in March 1894 as Takatsuka Marugo Seika Shijo Yugengaisha. In Nov. 1908 they established their first tofu plant. Jan. 1957: Started making bean sprouts (probably mung beans) Oct. 1965: Bought their first automatic tofu forming machine, a second one following in Oct. 1973. Today the company makes mung sprouts, soybean sprouts, sushi age (tofu pouches), ganmodoki, nama age, inari age, abura age, yaki-dofu, tofu.

Note: This is the earliest document seen (April 2013) that uses the term *sushi age* to refer to deep-fried tofu pouches. Address: Chiba-ken, Japan.

3940. **Product Name:** Tofu.
Manufacturer's Name: Unknown Tofu Shop.
Manufacturer's Address: Carbondale, Colorado.
Date of Introduction: 1978.
New Product–Documentation: Talk with Matthew Schmit. 2002. Sept. 19. In 1978 Matthew heard that Spinning Kitchen in Boulder had stopped making tofu. Their shop had been upstairs in a building, and water had leaked through the floor into the restaurant downstairs. A couple had bought their classic tofu equipment, moved it to Carbondale, Colorado (near Aspen), started a small tofu shop, and began making tofu–the reincarnation of The Spinning Kitchen. Matthew also heard that this couple had decided to stop making tofu and that their equipment was for sale. He and Suzanne drove to Carbondale and met the two people, who took them to a storage unit where they had all their possessions in storage: A big cast-iron pot on three legs, capacity about 25 gallons; a hand-made cedar curding barrel (which Matthew still uses as an end table in his living room); an old apple-cider press that was used to press soymilk from the okara; and a great old grinder with metal plates, a hopper on top, a fan belt and an electric motor below, made by C.W. Bell Co. in Ohio. Matthew ended up buying this classic old equipment for several hundred dollars.

3941. White Wave. 1978. We've got an alternative. White Wave Soy Dairy (Poster). 1738 Pearl St., Boulder, CO 80302. 1 p. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.
• ***Summary:*** A large illustration (see next page), inside a circle formed of tiny beans, of a man leading his cow, standing under a beanstalk, looking in wonder at the seeds (soybeans); reminiscent of Jack and the Beanstalk.

3942. Yoshikawa, Koichi. 1978. Sosen no sugureta tôfu-zukuri to gendai no shinpo. Nigari tôfu, aburaage no kihon. Kôen yôshi [Our ancestors' superior way of making tofu and modern progress. The basics of nigari tofu and tofu pouches. Lecture outline (Brochure)]. Yoshikawa Shoji Co., Honmachi Wako Building, 2-50 Kita-Kyuhoji-machi, Higashi-ku, Osaka, Japan. 4 p. [Jap]
• ***Summary:*** Yoshikawa believes that tofu is most delicious when made in the traditional way, using their nigari as a coagulant. Address: Osaka, Japan.

• ***Summary:*** A macrobiotic cookbook. From the front cover: "Toward the prevention and elimination of disease." "Amazing cures from the kitchen."

The chapter on "Legumes" (p. 39-45) includes: Cooking beans in a pressure cooker (chickpeas, lentils, aduki beans). Sweet beans casserole (with aduki beans). Soft adukis. Chickpea stew. Soja jardinire (with "1 cup cooked soya beans" and "2 tablespoons soy bean paste (miso)"). Bean sprouts (mung beans or lentils). Vegetarian cheese [tofu] (made with 2 cups soybeans, ½ cup lemon juice, salt, and cold water). Soya milk from soybeans. Soya milk from soya flour. Vegetarian cheese from soya flour [tofu].

Miso: The chapter on "Soups" begins with a long quotation by Dr. Tatsuichiro Akizuki, M.D. (no source is cited) about the use of miso to changes one's constitution and prevent radiation sickness (p. 49-52). Miso soup (p. 52). Miso sauce (p. 137). Miso spread (with tahini, p. 145). Miso pate (with aduki beans, p. 147).

A common seasoning in this book is "soya sauce." There are also many recipes for "seaweed" (p. 91-95).

Michel Abehsera arrived in the USA (New York City) from North Africa in 1964, and "was startled to find an entire generation of rootless youth." In the late 1960s he left the East Village [a largely residential neighborhood to the east of Greenwich Village on the west side of lower Manhattan in New York City] for Binghampton, New York, intending to slow the pace at which he had been living and to write a few books. His first book was *Cooking for Life* (1970, Swan House). Address: Brooklyn, New York.

3944. Araki, Nancy K.; Horii, Jane M. 1978. Matsuri–Festival: Japanese American celebrations and activities. San Francisco, California: Heian International Publishing Co. 140 p. Illust. Index. 20 cm.

• ***Summary:*** Japanese words are used in this book whenever possible, followed by their translation into English.

In the chapter titled *Oshôgatsu* (New Year's) is a section on Mochi tsuki (pounding mochi) (p. 27). Freshly pounded mochi is delicious when eaten with a garnish of grated daikon (giant white radish) mixed with sesame seeds and soy sauce. It can also be seasoned with soy sauce and wrapped in nori, "or a mixture of sugar, salt and *kinako* (soybean flour).

In the same chapter is a recipe for Ozôni (traditional soup with mochi) (p. 46). One optional ingredient is "*tofu* (bean cake)." Address: San Francisco.

3945. Ballentine, Rudolph. 1978. Diet and nutrition: A wholistic approach. Honesdale, Pennsylvania: The Himalayan International Inst. 634 p. Illust. Index. 24 cm. Seventh printing (revised): 1982. [799* ref]

• ***Summary:*** Ballentine is an M.D. The book, advocating a vegetarian diet and based in part on the principles of Indian Ayurvedic medicine, is carefully researched and well written. He has a nice 1-page statement on tofu. Concerning de-gassing beans: "The gas that comes from eating beans is caused primarily by two unusual starches, stachyose and raffinose (Rackis 1970). They are rather short chains of sugar molecules, but they are joined by a special linkage that cannot be broken by any of the enzymes usually found in the intestine. For this reason they cannot be absorbed, but remain behind in the digestive tract where they are metabolized by certain bacteria that are more common in those who eat meat. Especially in one who is not accustomed to a vegetarian diet, these bacteria break down the short starches into carbon dioxide and hydrogen, the two main components of gastrointestinal gas (Rackis 1975). These starchy villains (stachyose and raffinose), responsible for so many unsavory misdeeds, can fortunately be removed from the beans. Soaking overnight helps a little since enzymes in the bean break down the starches into sugars. But this probably eliminates less than a tenth of the problematic starches. Boiling for 20 minutes will remove a third of them, and 85% can be removed if soybeans, for example, are boiled 5 minutes, soaked for a half hour in tap water, rubbed until the hulls float free, then cooked for an hour (Wolf 1975, Latin Am.).

Most of the gas-producing starches can be eliminated by sprouting. This also increases the protein content, decreases the starch content, and shortens the cooking time of legumes.

"Phytic acid (p. 71) is phosphorous compound found in most plant foods but in especially large amounts in whole grains, beans, and peas. It has the property of combining with minerals, especially calcium, iron and zinc, to form insoluble compounds which are carried out in the stool." It can lead to rickets or softening of the bones in adults. Chapter 6, titled "Protein," contains interesting sections on legumes ("The soybean holds a position of honor in traditional Chinese culture... the higher the income in India the greater the quantity of legumes consumed"), history of attitudes toward protein (origin of the ideas of complete proteins, incomplete proteins, and complementary amino acids), and beans and grains (p. 135-40).

Note 1. By 1987 this book was in its 14th printing and had sold over 100,000 copies. Note 2. This is the earliest document seen (July 1999) with the word "wholistic" in the title. Address: Honesdale, Pennsylvania.

3946. Ballero, Mireille. 1978. Les meilleures recettes végétariennes du monde entier [The best vegetarian recipes from around the world]. Paris: Albin Michel. 286 p. Illust. Index. 22 cm. [Fre]

3947. Calella, John R. 1978. Cooking naturally: An evolutionary gourmet cuisine of natural foods. Berkeley, California: And/Or Press. ix + 112 + 5 p. Illust. by Pedro J. Gonzalez. Index. [81 ref]

• ***Summary:*** The author of this vegetarian cookbook, of Italian ancestry, is popularly known as "Organic John." He

© Copyright Soyinfo Center 2013

likes to use fresh foods, and he has a call-in radio show in San Francisco. In chapter 4, Ingredients (p. 16-), he discusses soya butter [margarine], miso, tamari, instant protein powder (incl. Shaklee's Instant Protein), lecithin granules, Soyamel powder (powdered soymilk made by Worthington Foods), Balanced protein seasoning (powdered HVP made from soybeans).

Chapter 10 (p. 79-83) contains a long section on soya beans, with recipes: Homemade soya bean curd (tofu). Things you can do with tofu. Soya patties (with dry soya beans). Soya bean loaf. Green soya bean mix (with dry green soya beans). Soya beans in a beet stew. Soya bean spread.

In the section on Fruit Sherbets, many of the recipes contain 2 tablespoons Soyamel (powdered soymilk) and lecithin granules. Address: Berkeley, California.

3948. Calkins, Peter H.; Huang, Kuang-Rong. 1978. Soybean production in Taiwan: A farm survey. *AVRDC Technical Bulletin* No. 11 (78-89). 27 p. (Shanhua, Taiwan). [15 ref. Eng]

• ***Summary:*** Describes profitability and yield from soybean, the motivations and problems of farmers, and the reaction of farmers in the past to measures such as the extension of improved varieties. Since 1973 scientists at the Asian Vegetable Research and Development Center (AVRDC) have been working to improve soybean's contribution to consumer diets and farmer incomes in Asia. In Taiwan soybean is used as a source of cooking oil, "milk, beancurd, sprouts, fresh seed, dried seed, flour and a green vegetable (the stems and leaves are fried)." It is also used to make textured vegetable protein products such as artificial chicken and fish; when cooked with miso, soysauce, and various spices, these "are practically indistinguishable from the real versions. Entire banquets of rice and little else but soybean are routinely served in the vegetarian restaurants and Buddhist monasteries of Taiwan."

"In 1976, the government of Taiwan started guaranteeing a price of US$277/tonne to encourage farmers to plant more soybeans. The response has been modest, largely because soybeans have not been as profitable as competing winter crops, such as adzuki beans." Table 1 (p. 2) shows that between 1967 and 1976, the area planted to soybeans in Taiwan decreased from 52,000 ha to 36,000 ha, the farm price increased from US$188/tonne to $256/tonne, production decreased from 75,000 tonnes to 53,000 tonnes, but imports increased dramatically from 347,000 to 780,000 tonnes (more than doubling). Thus the total supply/consumption of soybeans in Taiwan (domestic production + imports) increased from 422,000 tonnes to 833,000 tonnes, while domestic production as a percentage of total consumption decreased from 18% to 6%.

"Before 1945 most soybean cultivars in Taiwan were of local origin, with an average yield of only 500-600 kg/ha. However, the government introduced Japanese cultivars such as 'Shih-shih' and Palmetto' in 1952. Since the early 1960s, scientists in Taiwan have also worked to develop improved cultivars by crossing cultivars introduced from abroad (in this report, the former will be termed 'improved' and the latter 'introduced' cultivars). As a result, the percentage of farmers planting introduced and improved cultivars has increased steadily, from about 53% in 1963 to 92% in 1976 and yield has risen to 1.5 tonnes/ha." Address: 1. Assoc. Agricultural Economist; 2. Research Assistant. Both: AVRDC, Shanhua, Taiwan.

3949. Dahlinger, John Côté; Leighton, Frances Spatz. 1978. The secret life of Henry Ford. Indianapolis/New York: Bobbs-Merrill Company Inc. 243 p. See p. 170-77. Index. 24 cm.

• ***Summary:*** The author was born on 9 April 1923 at Henry Ford Hospital. His mother was Evangeline C. Dahlinger, who was married at the time to Raymond C. Dahlinger, one of Henry Ford's most trusted employees and later Manager of the Ford Farms. The author makes the case convincingly that Henry Ford was his father, making him Henry Ford's illegitimate son.

Chapter 12, titled "Quadrapeds are out" (p. 170-77) contains extensive information about Ford's work with soybeans and soyfoods. Ford believed that the world of the future would be a world without quadrupeds. "We don't need horses. We've got the tractor. We've got the automobile. We don't need cows–we can make synthetic milk. We can make meat substitutes out of soybean and coconuts–you can hardly tell the difference. We don't need sheep. We will be able to make wool out of synthetic things–it will be better than wool... Ford had good reason to distrust horses. He told me that when he was a young boy, his foot caught in the stirrup when a horse bolted. He was dragged around and could have been killed. I don't recall ever seeing him ride a horse... Ford considered the horse a very inefficient instrument. He called it a thousand-pound hay-burning motor with one-horse power.

"As Henry Ford worked toward his great vision of a world that had no need of quadrupeds, I was his guinea pig. And I wasn't the only one. Everyone had to eat the strange concoctions he was putting together and calling milk, meat, and vegetables, depending on their color. Soybean milk was his triumph. I had to drink it while he asked me eagerly, 'Can you tell the difference? Isn't that a fine glass of milk?'

"I loved milk, but his soybean milk almost cured me. It tasted like chalk. I was perfectly satisfied with the job a cow did, and his version was simply terrible. For a time, Ford was eating so much ersatz foods he was concocting that Mrs. Ford worried about his health.

"Ford would eat soybean pie and drink the soybean milk that made even milk of magnesia taste good. Ford was working on a soybean body for an automobile. They used to say that if it didn't run, Ford could eat it.

© Copyright Soyinfo Center 2013

Ford had a "car body built from the soil" with wheat straw, flax, and hemp [*Cannabis*] that proved to be so strong it was promoted in photo sessions by whacking it with an ax.

"Ford's ultimate triumph along the soybean line was the soybean dinner he himself dreamed up and had served at the time of the Ford exhibit at the Chicago Century of Progress Fair in August 1934." A list of the 16 items served is given; soy ice cream is not mentioned.

"I was about eleven [i.e. in about 1934] when Ford was at the peak of his excitement about soybeans. You had only to talk to him for five minutes and soybeans would enter the conversation. He kept bottles of soybean milk in our refrigerator in case he got thirsty and in case I weakened a little to drink a little too. I only drank it, however, under the greatest duress.

"I still have the recipe he gave to mother for making soybean milk. The formula was developed by his chemical engineers... Soak one-half pound soybeans overnight and grind to a fine powder. Add two quarts of water and heat in a double boiler for one-half hour. Strain liquid through a fine cloth and season with a dash of salt. Add one or two tablespoons of syrup to sweeten. A dash of banana oil can also be added to make it resemble cow's milk more closely. Ford was always shifting the formula around a trifle to see which sweetening syrup was best–maple or sorghum or honey–and whether a little more or less salt would improve the taste.

"Ford was evangelical about soybeans. He talked of how cooked soybeans tasted much better than lima beans did, and how soybean spread was much better for children than peanut butter. He advised me to try it in a soybean and jelly sandwich.

"Ford urged Mother to tell our cook to use a lot of soybeans in cooking and to overcome the strong flavor of the beans by adding plenty of onions. In his own household the cooks were ordered to sneak a few soybeans into every food on the table–into soup, salad, the peas or other vegetable of the day.

"Ford would now and then flash a letter around from some doctor or other who was grateful for Ford's experiments with soybean milk because babies who were allergic to cow's milk were able to use inexpensive, life-saving soybean milk. And also those adults who were allergic to milk were able to enjoy puddings and things that they had never been able to enjoy before.

"Incidentally, Ford's son was named after the man who was in charge of food research at Ford, Doctor Edsel Ruddiman. Ruddiman worked in the engineering lab and was one of Ford's favorite people. Ford, of course, worked closely with Dr. Ruddiman in maximizing the uses of soybeans." Ford also fancied soybean cottage cheese.

"If I recall correctly, Ford at one time had twenty thousand acres of soybeans under cultivation under Dad's direction, and it was said he was spending over a million dollars a year experimenting with the plant in various ways–as food, as plastic, as animal food, as a high-protein, low-calorie diet food, and as a source of industrial oils. Ford would brag about how there was nothing in the soybean plant that was wasted; even the stalk could be made into fiber.

"As Ford saw the world of the future–and I'm sorry it didn't come to pass–every farmer would become wealthy by running his own little factory, or 'cottage industry,' as Ford called it. He would produce soybeans in his field and make at least one soybean product for sale to factories or grocery stores.

"As Ford foresaw the world, farmers wouldn't need barns. 'With no animals, there need be no buildings on a farm except the granaries,' he said. Except, of course, the little farm factories..." (p. 176).

Henry Ford grew marijuana [hemp] for experimental reasons. It was "enclosed by a large cyclone fence. The Ford people thought it had all been destroyed after Ford died, but some years ago they found it growing wild again" (p. 177).

"His campaign against the quadruped never quite ceased. He was forever sounding off against four-footed animals, especially those that provided meat. As early as 1919 or '20 he had said that the world would be better off without meat... And he further insulted the cow by calling it 'the crudest machine in the world'" (p. 177).

Ford was as trim and lean as a split rail fence. He did not smoke or drink alcohol. He was a "health nut" and for a time he preached that sugar was dangerous (p. 78). At the top of things he disliked most were Franklin Roosevelt, "monied" Jews and Judaism, Catholics and Catholicism (p. 216).

3950. Duquette, Susan. 1978. Sunburst Farm family cookbook: Good home cookin' the natural way. 2nd ed. Santa Barbara, California: Woodbridge Press Publishing Co. 303 p. Illust. by Donna Wright. Photographs by Mehosh Dziadzio. From the Sunburst Farms Communities. Recipe index. 23 cm.

• ***Summary:*** This book is identical to the 1976 edition except that it comes from Sunburst Farms Communities instead of The Brotherhood of the Sun. The title and first paragraph of the introduction have been changed to read: "Sunburst Farms Communities is a family of more than 300 people, who have dedicated themselves to living in harmony with all people and all things." Address: Santa Barbara, California.

vegetable protein, nigari for curding tofu, tofu and home tofu presses, and tempeh. The Farm Construction Co. Government. Financial statement. The Book Publishing Co. (in the last 5 years they have sold over 1 million books; half of these they have printed themselves). Media (telephone system, CB radio, video production crew, audio tapes, The Farm Band). Education. The Gate. How we really make it ("We try to be spiritual in everything we do"). Other Plenty centers in Guatemala, South Bronx, Bangladesh). Quotation from Stephen ("I really know we are all One"). Plenty. The Planet. The Noble Bean. The midwives. Farm health. This brochure contains 27 wonderful blue-and-white photos. Address: 156 Drakes Lane, Summertown, Tennessee 38483. Phone: (615) 964-3584.

3952. Farm Foods. 1978. Cooking with soy flour. Summertown, Tennessee. 8 p. *
Address: Summertown, Tennessee.

3953. Farm Foods. 1978. Good Tasting Nutritional Yeast (R), Tempeh starter, Good For Ya Textured Vegetable Protein, Soy Ice Bean (Leaflet). 156 Drakes Lane, Summertown, TN 39483. 1 p. Feb. Front and back.
• ***Summary:*** Front: A description of each of these four commercial products and a color photo of the package, all on a tan background.

Back: Nutritional information about each of the four products. The bottom one-fourth of the back is devoted to a description (with photo) of *The Farm Vegetarian Cookbook* (Revised Edition), edited by Louise Hagler. It begins: "Here are recipes and nutritional information for a completely vegetarian [vegan] diet based on the versatile and Noble Soybean... There are chapters on cooking with Good Tasting Nutritional Yeast and with Textured Vegetable Protein. Twenty-five tofu and seven tempeh recipes help make this book a total reference for nutritious and varied vegetarian cookery." Address: Summertown, Tennessee.

3954. Farm, The. 1978. Yay soybeans! How you can eat better for less and help feed the world. Second revised edition. Summertown, Tennessee: The Book Publishing Co. 14 p. Illust. 22 cm. 2nd rev. ed. 1978, 14 p.
• ***Summary:*** The first edition of this creative little booklet, published in 1974, was printed with blue ink on white paper; this 1978 edition uses brown ink on white paper. Contents: Living on soybeans. Some of our favorite ways to eat soybeans. Basic cooked soybeans: Soybeans and tortillas, Soybean stroganoff, Soy fritters, Cheezy soybeans (Good Tasting Nutritional Yeast gives the cheezy flavor), Soyburgers, Soy nuts (dry roasted), Soy coffee. Soymilk: Using soybeans or using soy flour, Soy mayonnaise (made with soymilk), Soy yogurt.

Tofu: How to make at home (6 step process using nigari, epsom [sic, Epsom] salts, vinegar, or lemon juice as a coagulant), Tofu salad dressing, Tofu salad [like an eggless egg salad], Scrambled tofu, Pan fried tofu, Tofu cheesecake. Soy pulp: Introduction, Scalloped tomatoes and pulp, Soy pulp burgers, Soy pulp cookies. Soy flour: Basic salad and sandwich spread, Seasoned sandwich spread. TVP–Textured Vegetable Protein: Introduction, TVP tortilla and taco filling, Taco filling sauce, TVP spaghetti sauce, Sloppy Joes. Good Tasting Nutritional Yeast: Introduction, Melty cheese, Cheese crackers, Golden gravy, Yeast 'omelette.' Eggless cookery: Introduction, Pancakes (with soymilk), Chocolate cake (with sour soymilk), Cookie crust for cheesecake. A word about vitamin B-12. Some facts about people and food. Plenty. Address: Tennessee.

3955. Farwagi, Peta Lyn. 1978. Full of beans. New York, NY: Harper & Row. London: Pierrot Publishing Ltd. 158 p. Illust. Index. 19 x 19 cm.
• ***Summary:*** The author, while British Vogue's travel editor, collected more than 150 bean recipes from around the world–from family fare to feasts. Soya beans are called "The most nutritious of all beans. Weight for weight with steak, soya beans have more proteins. Also discusses and defines: "Bean curd: "Fresh, custard-like cakes of pressed, pureed soya beans. Sold by the cake which is usually ½ inch thick and 3 inches square, in Oriental provision stores." Fermented black beans (black soya [fermented black soybeans]). Soya bean sprouts. Soya oil.

Contains recipes for: Duck and soya beans (China, p. 68). Soya beans & potato salad (p. 146).

3956. Faryna, Paulette J. 1978. Soyabeans in the Nigerian diet. *Ahmadu Bello University, Extension Bulletin.* No. 21. 74 p. Home Economics Series No. 1. Reprinted in Nov. 1985. [64 ref]
• ***Summary:*** Contents: Acknowledgements (especially Mrs. V. Ogunsola of Home Economics Section, Samaru College of Agriculture, and Mr. T. Kay, Dept. of Chemical Pathology, Ahmadu Bello Univ., Zaria). Foreword. The history of soyabeans. The role of soyabeans in the diet. Soyabeans in Nigerian weaning foods. Protein deficiencies. The preparation of soyabeans. Soyabeans enriched paps and porridges. Soyabean soups. Soyabeans as a meal on their own. Soyabean patties. Soyabean sweet snack foods. Soyabean breads. Fermented soyabean products: Soyabean Daddawa, Soyabean Sprouts. Soyabean oriental delicacies: Tofu (curded with lemon juice, vinegar, kuka [the fruit of the baobab tree], calcium sulphate, or epsom salts), Basic Fried Tofu, Soyabean Cheese (with okara), Soy Yogurt. Appendix: Measurements. Home made ovens. Soyabean feeding trials with infants. References.

Note: This is the earliest English-language document seen (April 2013) that uses the term "soyabean cheese" to refer to tofu.

Includes 67 Nigerian-style recipes. Soybeans are used

© Copyright Soyinfo Center 2013

mostly in the form of "soybean paste" (fresh soy puree or gô) and homemade whole soy flour. To make the paste: Soak soybeans overnight, dehull by hand and float off hulls, grind cotyledons with a small amount of water, use in a cooked preparation. To make flour: Boil beans for 30 minutes, wash, soak in two times the volume of water for 12-24 hours, change water every 4-6 hours, sun-dry, grind.

Soyabeans were introduced to Nigeria in 1908, and most of the early research was carried out at the Moor Plantation in Ibadan. Germination of the imported seeds was a major problem, leading to the failure of early attempts to grow soybeans in Southern Nigeria. However subsequent trials in the Guinea Savannah belt proved successful. In 1928 soyabeans were successfully grown at the Samaru Experimental Station. This success encouraged the development of a programme which eventually resulted in the distribution of seed to subsistent farmers in order to establish soyabeans as a cash crop. A world shortage of oil seeds immediately after World War II accelerated the drive for increased soybean production in Nigeria.

A map (Fig. 1, p. 2) shows the main soybean growing area in Nigeria, which is in the Southern Guinea Zone; here a rainy season of 5 months or more discourages the cultivation of groundnuts and cowpeas. Benue state is the main soybean growing area, followed by the Abuja area in Niger State and the southern divisions in Kaduna State. The crop is planted in small holdings of 1 to 2 hectares per farmer. The most common variety planted is the Malayan variety.

Table I shows Nigerian soybean production and market value from 1957-58 to 1972-73. The peak production year was 1962-63 (26,450 long tons); only 234 tons were produced in 1972-73. Address: Extension Home Economist, Ahmadu Bello Univ., Agricultural Extension and Research Liaison Services, P.M.B. 1044, Samaru-Zaria, North Nigeria.

3957. Ford, Barbara. 1978. Future food: Alternate protein for the year 2000. New York, NY: William Morrow and Company, Inc. 300 p. Index. 22 cm. [40+ ref]
• ***Summary:*** The author concludes that soybeans are most likely to be the protein source of the future. Chapter 2, "The Cinderella Bean" (p. 32-53) and Chapter 3, "Soybeans, Oriental Style" (p. 54-71) both discuss the benefits of soybeans. Pages 37-38 note that soybeans were once called "haybeans" and their hay was called "haybean hay."

Note: This is the earliest English-language document seen (Oct. 2011) that which uses the term "haybean" or "haybeans."

The work of the USDA Northern Regional Research Lab. (NRRL) with soyfoods is described at length. While at the NRRL she first encountered "sufu." In "Chinese markets, sufu is not called sufu but 'bean curd' or 'bean cake.' As soon as I saw sufu I realized it has an image problem–not as unappetizing as natto, but distinctly unpleasant. Picture grayish chunks of some odd-looking material floating in a murky liquid, like biology specimens in a bottle, and you have a typical bottle of sufu.

"Sufu looks so bad that my husband, who has faithfully eaten a number of odd-looking sources of protein that I have purchased over the years, refused it. It took a little courage for me to tackle one of the grayish lumps myself but I finally ate one. To my surprise, it was good, rather like a tangy dairy cheese but with a distinctive, nonbeany flavor of its own" (p. 60-61).

Chapter 6, "It Ain't (Just) Hay," is about alfalfa leaf protein and leaf protein concentrate. Research on leaf protein "really started during World War II, when British scientist N.W. Pirie suggested the use of leaves to augment dwindling meat supplies... Pirie's proposal never got underway during the war because of the costs involved, but after the war he was given a laboratory where he carried out most of the pioneering work on leaf protein."

Chapter 9, "SCP: Promises, Promises," is about single-cell proteins such as the bacteria *Cellulomonas* and *Pseudomonas* (the champion, which can double its weight in 9 minutes). A probable culprit in SCPs is "nucleic acids, which have been shown to cause elevated uric acids in humans if used over an extended period of time. Raised uric acid levels lead to gout, kidney stones, and gallstones. Some bacteria contain from 15 to 16 percent nucleic acids, a fairly high level. Yeasts and fungi contain from 6 to 11 percent, still a high level. Algae have less." It is recommended that humans not consume more than 2 grams (0.7 ounces) of nucleic acids per day. Address: USA.

3958. Gaskin, Ina May. 1978. Spiritual midwifery. Revised ed. Summertown, Tennessee: The Book Publishing Co. 473 p. Illust. Index. 23 cm. [10+* ref]
• ***Summary:*** The original 1975 edition of this pioneering book, by "Ina May and The Farm midwives" (380 p.) did not mention soyfoods. However in this edition, the section titled "Taking Care of Yourself While You're Pregnant: Nutrition" (p. 227-31) states: "You will need to increase your protein intake by about 30%. On the Farm, we are complete vegetarians, and our main source of protein is soybeans and soy products such as soymilk; soy yogurt; tofu (soybean curd); hard, pressed tofu (more concentrated); soymilk ice cream; and TVP–texturized vegetable protein. Soybeans and soy products are very high in protein of a quality comparable to eggs and mother's milk (the international standards for complete protein).

"You can get plenty of protein for pregnancy by eating daily one cup of soybeans plus 12 ounces of soymilk or yogurt, or ½ lb. tofu and a pint of soymilk, or one cup hydrated TVP and a cup of soymilk or soy yogurt, or one quart of soymilk or soy yogurt and ½ cup of soybeans. We highly recommend a vegetarian diet for a healthy pregnancy and life."

Note: This is the second earliest published English-

© Copyright Soyinfo Center 2013

language document seen (March 2007) that uses the term "soymilk ice cream." Address: The Farm, Summertown, Tennessee.

3959. Haedrich, Ken. 1978. Good food, good folks: A collection of vegetarian recipes from across America. Plainfield, New Jersey: American Impressions. 46 p. *
• ***Summary:*** The author is a tofu fan, and he features tofu recipes in this cookbook. Address: Plainfield, New Jersey.

3960. Haedrich, Ken. 1978. Good food, good folks: A collection of vegetarian recipes from across America. Plainfield, New Jersey: American Impressions. 46 p. Illust. by Diane Haedrich. 21 cm.
• ***Summary:*** This booklet, printed with brown ink on beige paper, was published by the author. Some of the recipes are from other books, with proper acknowledgment. Contents: Dedication (to World Hunger Year, P.O. Box 1975, Garden City, New York 11530). Introduction (He owns a print shop. The book idea was conceived while listening to singer / songwriter Harry Chapin talking about world hunger on the radio). Recipes–Breads & butter. Soups. Main courses & salads. Desserts. Many of the recipes call for "milk or soymilk," and for "tamari or soy sauce."

Soy-related recipes: Tofu sandwich spread (p. 20). A tofu primer (incl. Tofu "mayonnaise" and praise for *The Book of Tofu*, by Shurtleff and Aoyagi). Soyburgers (p. 23). Sweet & sour soybeans (p. 26). The rear cover states that half the proceeds from sale of this book will be "donated to World Hunger Year–an educational, resource organization focusing on food and hunger issues of local and global impact." Address: Plainfield, New Jersey.

3961. Hagler, Louise. ed. 1978. The Farm vegetarian cookbook. Revised ed. Summertown, Tennessee: The Book Publishing Co. 223 p. Illust. Index. 22 cm.
• ***Summary:*** An expanded and extensively revised version of its pioneering and very creative and influential predecessor. There are excellent expanded sections on gluten (p. 76-81), tempeh and tempeh starter (p. 82-93), miso (p. 93), soymilk (p. 95-101), Ice Bean (soy ice cream, including recipes for 5 flavors), Frogurt (soymilk frozen yogurt, p. 107), soy yogurt (p. 108-13 including a non-fermented cheese made by draining soy yogurt curds in a cotton bag; from this "yogurt cheese" are made soy-based cottage cheese, sour cream, cream cheese, and cheesecake), tofu (p. 114-41), yuba (142-43), soy coffee, soy nuts, granola, and Soysage (p. 144-47), soy flour (p, 148-53), sprouts (incl. alfalfa, mung beans, and soybeans, p. 154-57). Address: Summertown, Tennessee.

3962. Hobson, Phyllis. 1978. The soybean book. Growing and using nature's miracle protein. Charlotte, Vermont: Garden Way Publishing. iv + 172 p. Illust. by Andrea Gray. Index. 23 cm.
• ***Summary:*** Contents: Why soybeans? How to grow, harvest, and store soybeans: Selecting seed (edible varieties and time to maturity for fresh soybeans and dried beans), sources of seed, how much seed, planting the seed, inoculation, germination, the developing plant, the harvest, storing beans. Saving seed. How to process soybeans: Fresh soybeans (in the pods), dried soybeans, soy grits, soy pulp (cooked, mashed dehulled soybeans), soy flour, soy milk (from whole soybeans or from soy flour; the remaining "pulp" may be added to meat loaves or casseroles), soy curd (tofu), soy sprouts. Recipes–Soybean "meats." Roasted soybeans. Fermented soybean cakes (tempeh). Soy beverages. Soy breads. Soy cereals. Soy desserts. Soybeans with eggs. Soy salads. Soy spreads. Soy snacks. Candy and cookies. Soy soups. Soymeat dishes. Soybeans with meat. Soybean vegetable dishes. Supper dishes. Growing soybeans for animal feeds. Homemade dog and cat food. Using soybeans for soil improvement.

Note: The chapter on how to grow soybeans (p. 6-20) is especially useful. Address: USA.

3963. Holmes, Charlotte Van Gundy. 1978. Cooking for living. The art of healing. Sulfur Springs, Arkansas: Philadelphia Institute, Inc. 102 p. No index. 20 cm. [11* ref]
• ***Summary:*** The section titled "Soy beans" (p. 31-33) has the following contents: Introduction and list of different food products made from soy beans. Drying, freezing, canning, and tenderizing whole dry soybeans. How to make soybean milk: From beans, from soy flour, how to use the residue [okara] left from making soy milk. Soy cheese (also called "vegetable cheese" or "tofu"): How to make soy cheese from soy milk, how to make soy cream, how to make soy mayonnaise.

Also discusses: Homemade soy butter [soynut butter] (p. 57-58). Entrees (p. 58-60): Soy bean loaf, Soy cheese patties, Soy loaf, Soy grits loaf, Peanut butter patties. Soy sauce and Sovex (p. 83).

Note 1. The author's father, Theodore Van Gundy, was a soyfoods pioneer in southern California. The first printing of this book was in 1967, the second in 1970, and the third in 1973. Note 2. On the cover is written (as if it were the title): *Keys to Cooking for Living: Recipes and Menus.* Address: M.D., P.O. Box 308, Sulphur Springs, Arkansas 71768.

3965. Jonathan. 1978. Prijslijst 1978–1979 [Price list 1978–1979]. Holleweg 113, 2070 Ekeren (near Antwerp), Belgium. 3 p. [Dut]
• ***Summary:*** This price list is written on the company's letterhead, at the top left of which is written "Jonathan." Below that is an illustration (line drawing) of two seagulls flying. In the top center is a large round yin-yang (*t'ai chi*) symbol, around which is written: "It's the way to a wonderful world." Below that, as part of the letterhead is written (in Dutch and French): "Preparation of macrobiotic, natural, and vegetarian specialties."

Fresh products: Seitan (vegetarian steak, 2 kg or 5 kg). Tofu (*sojakaas*, 2 kg or 5 kg). Mochi (sweet rice and sea salt). Seitanburger (seitan, buckwheat, fresh herbs; 20 burgers). Seitan Saté (seitan, tofu, carrots, onion; 20 skewers). Soy flour (*Sojamel, biologische gele sojabonenat* [organically grown yellow soybeans], 455 gm pots). Soya croquettes (*Sojakroketten*, made from soybeans, 50 pieces). Vegetable pickles.

Dry goods: Sea vegetable condiment (kombu and sesame seeds). Spreads: Nut butter (*Notenpasta*). Peanut butter. Nut mix. Almonds. Cashew nuts. Hazelnuts. Address: Ekeren (near Antwerp), Belgium. Phone: 031-64.41.73.

3966. Lai, H.M. 1978. Island of immortals: Chinese immigrants and the Angel Island Immigration Station. *California History* 57(1):88-103. See p. 96, 102. [59 ref]
• ***Summary:*** This issue (spring 1978) is a special issue titled "The Chinese in California."

Fermented bean curd is mentioned in two footnotes on page 102; both refer back to page 96.

Footnote 40: Breakfast may include "dried bean sticks" [dried yuba sticks]. Dinner includes a main dish "plus one small dish. "The small dish could be salt fish, preserved olive, fermented bean curd, sweet pickles or plum sauce."

Note 1. Footnote 40 refers to a menu listed in *Chinese World*, 28 Feb. 1910 for three meals served in one day at Angel Island. Complaints about food were common so the government agreed to have the food provided by private concessionaires–the first one being a firm run by a Chinese man, Fong Wing (Kuang Zhujing) and his white partner. The dinner meal consisted of a main course plus one small dish–as described above.

Footnote 42. "... pork and mustard greens soup, fermented bean curd (Tues.); pork with greens, salt fish (Wed.); pork with dried bean sticks, plum sauce (Thurs.); pork and winter melon soup, bean curd with soy sauce (Fri.);..."

Note 2. Footnote 42 mentions another menu provided by the white concessionaire who won the next bid. A similar menu was offered which also included fermented bean curd, plus dried yuba sticks and tofu. Address: Vice president and past president of the Chinese Historical Society of America in San Francisco and an instructor in Asian American Studies at the Univ. of California, Berkeley.

3967. Li, Hua-sheng; Chuang, Ming. 1978. Tou fu shih p'u [Bean curd recipe]. Hong Kong: Wan-li Shu-dian (Ten Thousand Mile Bookstore and Publishing Co). 150 p. [Chi]
• ***Summary:*** A large recipe book. Address: Heilongjiang, China.

3968. Mather, Christie. 1978. A tofu poem. Telluride, Colorado. 1 p.
• ***Summary:*** A cute poem, in rhyming couplets, describing how tofu is made. Christie is a member of the Tofu Shop cooperative. Address: 116 N. Oak St., P.O. Box 69, Telluride, Colorado 81435.

3969. Miller, Lindsay. 1978. The apartment vegetarian cookbook. Culver City, California: Peace Press. 312 p. Index. 22 cm. [30 ref]
• ***Summary:*** Soy-related recipes include: Soybean bulgar casserole (p. 148). Soybean stuffed eggplant (p. 157). Soybean creole (with brown rice and tomato paste, p. 175). Soybean patties (p. 182). Whole wheat soy bread (with soy flour). Cornmeal-soy grits bread (p. 211). Wheat germ-soy grits bread (p. 212). Quick wheat-soy bread (p. 219).

The glossary contains substantial entries for miso, peanut butter, soy beans, soy flour, soy grits, tamari soy sauce, tisanes or herb teas, and tofu. Address: Culver City, California.

3970. Needleman, Larry. 1978. The Tofu Kit story. In: 1978. The Briarpatch Book: Experiences in Right Livelihood and Simple Living from the Briarpatch community. San Francisco: New Glide / Reed Book. xiii + 313 p. See p. 237-40. 24 cm.
• ***Summary:*** In the spring of 1976 (about April or May) Larry decided it was time to create a situation that utilized his food karma and experience, "but that wasn't a quick burnout like a restaurant, and was healthy and made sense world economically–one that would provide unlimited personal and spiritual growth and was a service." He committed himself to positive thinking and positive action. He began fasting a lot, meditating, praying and concentrating regularly, taking his jogging seriously and generally just putting out good energy. "About a month into this I remember saying, 'O.K., Lord, I'm ready, lay it on me.' And that week the Tofu Kit was born.

"Inspiration: I had just received test results from a physical exam, saying I was in fine shape but my cholesterol was too high. That day, as I remember, I saw a copy of *The Book of Tofu*, by Bill Shurtleff and Akiko Aoyagi. It blew me wide open. I'd used tofu like any other good, miso-soup loving hippie, but hadn't connected heavily with the bland, unappealing white cake. But the book gave marvelous ways to use this new-found 'friendly' food and pointed out how

© Copyright Soyinfo Center 2013

shifting from meat to tofu could have a direct effect, helping feed people elsewhere. Some 300 pages and 500 pages recipes later I came to the book's last page, 'Sending Tofu to the Four Directions,' an inspirational page that said, 'Do it!' So I did.

"Three of us were sitting around a wood stove in Sonoma County talking about tofu and tofu making, when the word 'kit' popped up. It rang the bell. I immediately began researching and developing the kit the very next day and have continued to work on it daily since then. This is my first venture into the manufacturing world.

"Connection: When the kit was about 3/4 of the way to market, Bill and Akiko arrived from Japan and Bill called me to say he'd heard from Westbrae Natural Foods that I was working on a tofu kit. I was really excited. He invited me to share food, films, and tales of tofu with him and asked me to bring the kit. What a connection! That meeting, one of several, tuned up and accelerated the kit. We talked of and planned many projects together, and then around midnight on the first of October [1976], I bid Bill and Akiko good-bye as they began a four-month speaking tour. Bill left me with instructions to meet with The Farm Food Co. people in San Rafael, California, and to begin organizing a school to share the technology and equipment of small-shop tofu making with hundreds of people in this country who were waiting for it; I left him with 200 Tofu Kits and a sales rep. agreement. Orders started pouring in for Tofu Kits, but production wasn't pouring out."

Larry moved from Occidental, California, to Corte Madera (P.O. Box 829), which was much closer to San Francisco. Describes expansion of production and designing a school, The Learning Tree, at the Farm Food Co. The term will be about 3 weeks long and enrollment limited to about 10 students per term. The kit retails for $11.95. A photo shows Larry holding his Tofu Kit. Illustrations show: (1) The tofu kit. (2) A jar of soy beans, and a cake of tofu on a plate. (3) A small "Tofu School" building in a field. Address: The Learning Tree, P.O. Box 829, Corte Madera, California 94925.

3971. New England Soy Dairy Inc. 1978. Laughing Grasshopper organic nigari tofu (Poster). Greenfield, Massachusetts. 1 p. 33 x 25 cm.
• ***Summary:*** This poster (see next page), printed with green ink on a beige background, and a double-lined border, states in handwritten calligraphy: "Tofu is a high protein food, versatile and easy to prepare, that can form the backbone of the vegetarian diet. An ideal food for dieters and budget-watchers, it is low in fats & calories, free of cholesterol and inexpensive.

"To maintain the highest quality, Laughing Grasshopper Tofu is made in small batches by skilled tofu-makers, using organic soybeans, nigari (natural solidifier), and water.

"Here are the many delicious ways in which tofu may be prepared:

"1. Regular Tofu (Japanese)–dips & spreads; pan frying; puddings; pastries; pie filling; soups; freezing. 2. Firm Tofu (Chinese)–deep frying; scrambling; baking; broiling; barbecuing; soups; freezing." Address: 305 Wells St., Greenfield, Massachusetts 01301. Phone: 413-772-0746.

3972. Null, Gary; Null, Steve. 1978. The new vegetarian: Building your health through natural eating. New York, NY: William Morrow and Company, Inc. 350 p. Index. 22 cm. [63 ref]
• ***Summary:*** In the chapter titled "Incomplete Protein Foods," soybeans are discussed on pages 183-86. A brief introduction is given to soy protein concentrates, isolates, spun protein fibers, and textured vegetable proteins. Full-fat soy flour, soy granules, soy flakes, and defatted soy flour and grits are available in natural-food stores.

"In striking contrast to these highly refined products of the West are the traditional East Asian products, tamari soy sauce, miso (fermented paste), and tofu... Tofu (soy curd or soy cheese) is a truly remarkable food. It is very inexpensive when purchased at Oriental markets or natural food shops and even more so if made at home." A description of how to make tofu and a summary of its nutritional benefits are given.

The soybean is "delicious when served a fresh green summer vegetable, simmered or steamed in the pod." Or as roasted soybeans [soynuts, dry-roasted or oil-roasted], cooked whole dry soybeans, tempeh, or soy sprouts. The same chapter also discusses miso and tamari in detail (p. 197-99), wheat gluten (p. 178-79), and azuki beans (p. 180). Address: Director, Nutrition Inst. of America, New York. Host of the daily radio program "Natural Living.".

p. 136).

China: Fish with hot bean sauce (with hot bean paste or hoisin sauce, p. 146). Lobster with salted black beans and chili (p. 11). Stewed spare ribs with salted black beans (p. 159). Mixed green vegetables with salted black beans (p. 163). Hotpot of vegetables and beancurd (with 8 squares soft beancurd, p. 164). Ma po beancurd (with 6 squares soft beancurd, p. 166). Cold beancurd salad (with 6 squares soft beancurd, p. 166). Fried beancurd (with 8 squares soft beancurd, p. 166). Sharks fin soup (with dark soya sauce, p. 167). Wonton soup (with light soya sauce, p. 168).

Japan: Soya bean paste (miso, homemade from canned chick peas + soya sauce!, p. 178). Tuna glazed with miso (Gyoden, with dark miso paste, p. 180). Sukiyaki (with 3 squares soft bean curd, p. 187). Braised pork and leek rolls (Teriyaki, with light soya sauce, p. 188). Fried eggplant in miso sauce (with white miso paste, 194). Miso soup (miso shiru, with diced bean curd and white miso paste, p. 195).

The Glossary includes: Bean paste, hot (made from chilies and soya beans, La do ban jiang, Chinese). Bean paste, salted (also known as yellow bean paste, made from soya beans, Taucheo, Chinese). Bean paste, sweet (either tien mien jiang or do ban jiang, made from soya beans, Chinese. See also hoisin sauce). Beancurd. Beancurd 'cheese,' fermented (in brine with chilies, wine, and spices, Dofu ru, Chinese). Beancurd skin [yuba] (yellowish, almost transparent sheets). Beans, salted, black: See Salted black beans. Kecap manis (Sweet, slightly thick soya sauce, Indonesian, Malaysian). Miso (Japanese). Soya sauce (light, dark, and sweet). Tahu (Malaysian): See beancurd. Taucheo (Chinese): See Bean Paste, salted. Taukwa (Chinese, hard beancurd). Tien mien jiang (Chinese): See Bean paste, sweet. Tofu (Japanese): See beancurd. Vinegar and soya sauce dip: "A sharp-flavoured Korean accompaniment made by blending 3/4 cup light soya sauce, 3 tablespoons white wine vinegar, 3 tablespoons ground sesame seeds and 2 teaspoons finely chopped spring onions. Serve in individual sauce bowls." Yellow bean paste: See Bean paste, salted.

Note: This is the earliest document seen (Feb. 2011) that contains Vietnamese recipes that use soy as an ingredient. Address: Australian-born food writer.

3974. Perkins, David W. ed. 1978. Hong Kong and China Gas Chinese cookbook. Hong Kong: Published for the Hong Kong & China Gas Co. by Pat Printer Associates Ltd. (Hong Kong). 319 p. Illust. (mainly color). Index to recipes. 31 cm. • ***Summary:*** A treasure for anyone who admires Chinese cookery, this large, oversized, visually spectacular and beautifully designed book is also rich in culture and history. Comprehensive, with many insights, it contains numerous two-page color spreads. One of the best books seen to date (1978) on Chinese cookery, except for its poor index.

Hong Kong is located on the Pearl River Delta in China, bordering the province of Guangdong to the north and facing the South China Sea to the east, west and south. Its cuisine resembles that of Canton.

A full-page color map of China shows (with different colors) China's four main regional cuisines: Northern (incl. Beijing), Eastern (incl. Shanghai and Nanking), Southern (incl. Canton, Kwantung and Kwangsi), and Western (incl. Hupei, Hunan, Szechwan, Kweichow, and Yunnan).

Peking is only 40 miles away from the nearest point of the Great Wall of China, which started to be built during the Ch'in / Qin Dynasty (225 BC to 207 BC) as protection against invasion by Tartar Hordes. Genghis Khan (1162-1227) is said to have been the first to penetrate it (p. 21).

The last period of Imperial rule in China was the long-lasting Ch'ing / Qing Dynasty (1644-1911) (p. 22).

Since ancient times, when the feet become swollen, the Chinese have eaten peanuts and soya beans (p. 38).

Buddhist vegetarian cookery has existed in China since the 10th century AD (p. 60).

The section titled "Soya beans" (p. 62-63) mentions bean curd or tou fu ("the most versatile of foods in the hands of any cook with any degree of imagination"), soy sauce, soya bean 'milk,' dried bean curd, frozen bean curd, and *mao tou* [green vegetable soybeans] (which "make a delicious hors d'oeuvre when prepared Shanghainese-style").

The "mysterious MSG (Monosodium glutamate) is a ubiquitous 'instant flavouring'; but more dishes have been spoiled by the addition of too much MSG rather than by the addition of too little" (p. 76).

A large colored photo and accompanying numbered outlined diagram (p. 77-78) shows many different seasonings, incl. Hoisin sauce, hot bean paste, dark soy sauce, light soy sauce, and Worcestershire sauce. "Soy sauce rules the kitchen as undisputed emperor. Basically a fermented extract of the soya bean with salt added, it is available in three main types: heavy or 'black'; dark, containing caramel as colouring and light (both in colour and flavour)." The finest, most expensive, and most concentrated is the first extraction. Specialty soy sauces flavoured with mushrooms or shrimp roe are also available.

"Black bean sauce is a near relative of soy sauce, being made from salted, fermented black soya beans. Again, mention must be made of the three main types of soya bean pastes: hot (with chillies), sweet (with flour, sugar and spices [t'ien mien chiang]) and yellow, which is very salty indeed... *Hai Hsien* [Hoisin] sauce combines garlic, chilli, beans and ginger with other elements."

A color photo shows most recipes. Soy related recipes include: Shredded pork with dry beancurd saute (p. 112). Chopped soya bean sprouts with pork (p. 113). Stewed lamb with dried beancurd (p. 127). Stir fried chicken with [soya] bean paste (p. 135). Roast Peking duck (with 4 tablespoons "sweet bean paste," p. 153). Braised duck with lo han vegetables (and 60 gm "fried beancurd cubes," p. 156). 'Lu Shui' goose (p. 157; the Lu Shui sauce is made with 250

© Copyright Soyinfo Center 2013

gm sugar, 250 gm salt, 2 five-spice bouquets, 250 ml light soy sauce, 10 slices ginger). Braised fish with beancurd and vegetables (p. 161). Eight treasure beancurd soup (with "4 squares soft beancurd," p. 193). Vermicelli and fried beancurd soup (p. 199). Beancurd with shredded pork in soup (p. 201). Fried beancurd (p. 204-05). Spicy beancurd with ground pork (Ma P'o tou fu, p. 208). Braised beancurd with mushrooms (p. 212).

Beancurd stuffed with shrimp paste (p. 215). Steamed fish and beancurd cake (p. 221). Vegetarian goose (Su ngo, with "20 dried beancurd skins [yuba], about 41 cm = 16 inches in diameter," p. 227). A full-page photo shows a quern = hand turned stone mill (p. 243). Sweet bean paste dip (*tien tou chiang*, with "4 tablespoons sweet bean paste," p. 278).

Note 1. This is the earliest document seen (Oct. 2012) that uses the term "Su ngo" in connection with yuba.

Also: Sweet red bean paste (hung tou sha hsien, with small red beans [azuki], p. 278).

Glossary (p. 302-11; all Chinese words are given only in Chinese characters, which we have romanized in pinyin) incl.: Beancurd (*doufu*). Beancurd, dry (*toufu gan*). Bean curd cubes, fried (*zha doufu*). Beancurd cubes, preserved (*la furu*, spicy fermented tofu); also known as preserved beancurd and Chinese cheese. Beancurd skins, dried (*fupi*) [doufu pi, yuba]. Beancurd sticks, dried (*fuzhu;* [dried yuba sticks]) used frequently in vegetarian cooking. Bean pastes (*gan shi jiang*). Sauces produced from soya beans and other ingredients: Hot bean paste (*xiang shi la jiang*), soya bean paste (*mo shi jiang*), "sweet bean paste (*tian shi jiang;* produced from fermented black soya beans, flour, sugar and spices. Substitute: Hoisin sauce." Note 2. This is the earliest document seen (Feb. 2009) that uses the term "sweet bean paste" to refer to a Chinese paste made with soybeans. Yellow bean paste (*dou ban jiang*).

Bean sprouts: Shoots of the mung bean or the soya bean (*da dou ya cai*), the latter being much larger and stronger flavoured.

Note 3. This is the earliest English-language document seen (Jan. 2013) that uses the term *dou ya* or the term *da dou ya* to refer to soy sprouts.

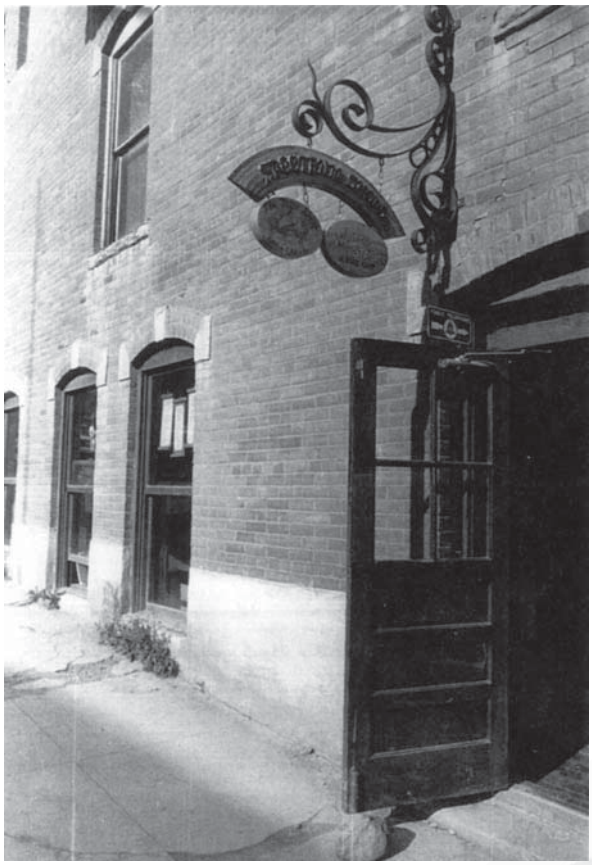
"Black beans (*dou shi*)*:* Salted, fermented black soya beans, Lightly salty in flavour. Used as seasoning. Will keep indefinitely in dry conditions. Chinese cheese (see beancurd cubes, preserved). Dry beancurd (see beancurd, dry). Flour–"High gluten flour (*gao jin fen*)*:* A special kind of 'strong' flour, which gives extreme elasticity, making it possible to roll out the dough to very fine layers. Used for wonton wrappers." Fried beancurd cubes (see beancurd cubes, fried). "Hoisin sauce (*hai xian jiang*)*:* A seasoning sauce or condiment made from red beans (*hong dou*) [azuki], soya beans, sugar and spices. Sweet-spicy and tangy in flavour. Sold in cans or jars... Also known as Seafood Sauce and Barbecue Sauce." Hot bean paste (see bean paste). 'Lu Shui' sauce (*lu shui zhi*, in Cantonese 'Lu Soy'). A 'master sauce' or more accurately, a stock made with soy sauce, sugar, five spices and ginger. Used for simmering foods, particularly poultry, It gives a rich flavour and deep brown colour. For recipe see p. 157. Note 4. Widely used in Shanghai, and in Jiangsu and Zhejiang provinces). "Mao tou green peas (*mao dou*)*:* Small beans, grown in the north, with dark-green, slightly hairy pods, which should be removed. Substitute: lima beans." Monosodium glutamate. Oyster sauce (*hau you*)*:* A viscous dark-brown sauce made from oysters and soy sauce through a process of fermentation. Used as a flavouring and/or colouring agent ad as a condiment. Sold in bottles." Preserved beancurd (see beancurd cubes, preserved). Red beans (*hong dou*), [azuki]. Soya bean paste (see bean paste). Sweet bean paste (see bean paste). Yellow bean paste (see bean paste).

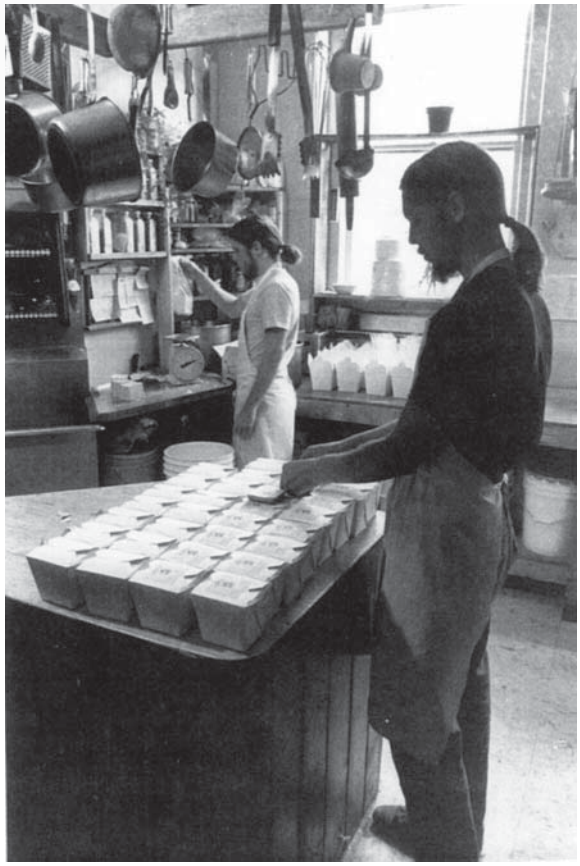
Talk with Cecilia Chiang, founder of The Mandarin restaurant in San Francisco. 2009. Feb. 16. She has this book. The authors of this book are not well known in China; they are mostly amateurs. The best Chinese cookbooks are written by Fu Peimei, a lady who was a real authority on all the different styles of Chinese cooking; she is no longer living. Many of her cookbooks are in both English and Chinese. Concerning "Bean paste," some of these are no longer available in the USA. Cecilia says Sweet bean paste may be something like *t'ien mien chiang.* Hoisin sauce is not used in Beijing, Shanghai, or anywhere in northern China; it is used mainly in Canton and south China. Cecilia thinks "Sweet bean paste" (t'ien shih chiang, p. 303) may be used only in Hong Kong. Most Chinese have never heard of this kind of sweet bean paste. True Cantonese food is quite different from that of Hong Kong. Cecilia knows Cantonese cooking very well; she goes there several times every year. Cantonese make the best soups, the best steamed fish and steamed chicken, and also their famous pork sausage (la chong?). Beijing cookery uses hard tofu, but most soft and silky tofu is imported from Japan.

3975. Photographs of the Telluride Tofu Shop in Telluride, Colorado. 1978. Telluride, Colorado.

• ***Summary:*** Fourteen black-and-white photos (each 3½ by 5 inches), numbered with captions, were sent to Soyfoods Center on 24 Sept. 2002 by Matthew Schmit, founder and owner of the Telluride Tofu Shop. The photos themselves were all taken in 1978. They show: (1) Sign above entrance on Oak Street to Spectrum Shops: The Tofu Shop and Winter Stash food co-op. (2) Restaurant with "Tofools" eating and hanging out. (3) View of the "kitchen" with cutting board, pots, and shelves. (4) "The Tofools" (16 people) standing under sign in front of Oak Street entrance. Incl. Catherine Peterson, Christie Mather (front row, third from left), and Matthew Schmit (in far back). (5) Packing the day's tofu in kitchen. Matthew Schmit (front, with beard and pony tail). Joel Rosenblum (back). Forming boxes of tofu were pressed on cutting board by Joel–who later worked for White Wave

© Copyright Soyinfo Center 2013





© Copyright Soyinfo Center 2013

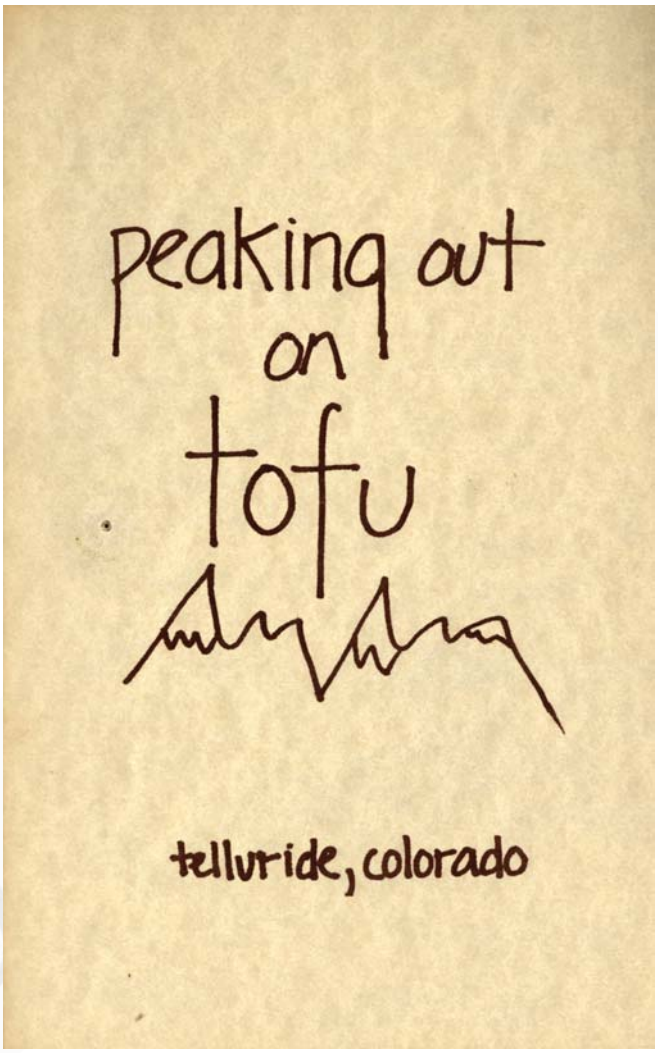
in Boulder, Colorado. (6) Interior of kitchen. Tofu stove with lever press mounted on wall. Refrigerator.

(7) Sprout room and packaging area. (8) Matthew Schmit in sprout room holding a tray of sprouts by its shelf. They grew alfalfa, clover, radish and mung bean sprouts; no soy sprouts. (9) The kitchen. Entrance to restaurant is at back left. Christie Mather and Stuart the Hermit are bagging soy burgers for freezing. (10) Oak Street (torn up in preparation for creating a new park) looking toward the ski slopes. On left: Windows of tofu shop restaurant and entrance to tofu shop and opera house. On right: Entrance to county courthouse. (11) Tofu maker Joel Rosenblum (with pony tail and beard) slicing tofu on scale for packaging. (12) Tofu-making equipment by stove in kitchen. Left to right: 1 gallon Waring blender. Wooden forming box and lid. Wooden lever press on wall. Ceramic 10-gallon cauldron with wooden lid and wooden straining bucket from Olof Brentmar. (13) Top view of many take-out deli 14 oz tofu containers each with a label on top. An illustration shows a dragon in a circle. (14) Another view of the sprout room.

Note: Matthew later moved this tofu shop to Arcata, California, where it was renamed Arcata Tofu Shop. Address: Telluride, Colorado.

3976. Rhoads, Sharon Ann; Zunic, Patricia. 1978. Cooking with sea vegetables: 150 natural-style recipes. Autumn Press, 25 Dwight St., Brookline, MA 02146. 136 p. Illust. by the author. Recipe index. 18 x 26 cm. [99* ref]
• ***Summary:*** Contents. Preface. Acknowledgements. I. Sea vegetables: Past and present. The bounty of the sea. Plants of a thousand uses. Preparing sea vegetables. II. Cooking with sea vegetables: Kombu and the kelps. Arame. Wakame. Nori. Hijiki. Agar. Irish moss. Dulse. Appendixes: Sources of sea vegetables. Nutritional value of sea vegetables. Bibliography. Address: New York City.

3977. Schmit, Matthew. 1978. Peaking out on tofu. Telluride, Colorado: Published by the author. [16] p. No index. 22 cm.
• ***Summary:*** This booklet (brown ink on tan paper) shows a horizon of snow-capped peaks on the cover and contains handwritten 20 recipes (brown ink on tan paper) using tofu or soymilk (2 recipes): Sesame cookies (with soymilk). Refried tofu burrito. Tofu burgers. Soy mayo. Hot n' spicy tofu. Sesame tofu paté. Tofu turkey basting sauce. Vegetable sukiyaki. Tofu loaf. Cabbage noodle bake (with tofu). Eggplant bulgar casserole with tofu sauce. Scrambled tofu 'n veges. Tofu zucchini quiche. Tofu Rubin. Cheeseless cheese sauce (with yeast). Tofu high protein sandwich spread. Tofu sandwich spread. Carob milk (using soymilk). The rear cover states: "these original recipes sprouted in the kitchen of the tofu shop and are prepared with care by the telluride tofool family using our own homemade soy products. Special thanks to: Catherine Peterson, Kathy Greene, Barton Coffman, Becca Smith, and Sharyn." Address: The Tofu



Shop, 116 N. Oak St., Telluride, Colorado.

3978. Smith, Allan K.; Circle, S.J. eds. 1978. Soybeans: Chemistry and technology. Vol. 1. Proteins. Revised. Westport, Connecticut: AVI Publishing Co. xiii + 470 p. Illust. Index. 24 cm. [500+ ref]
• ***Summary:*** This revised edition contains relatively few, unimportant changes from the original, classic 1972 edition. The following changes have been made: Addition of a 7-line preface to the "revised second printing" dated 4 Oct. 1977, updating of a graph of U.S. soybean production (p. 1). Updating (to 1976) of a table on U.S. and world production of important oilseeds (soybeans, cottonseeds, peanuts, sunflower, rape, sesame) (p. 2). Minor textual changes on pages 18-19. Addition of a table showing distribution of the 3 leading soybean varieties in 14 major states and the percentage of acreage harvested for each variety in 1976 (e.g., in Illinois, Williams accounted for 25.1% of harvested acreage, Amsoy 17.3%, and Wayne 12.8%). And updating of a table on U.S. soybean production by state showing acreage harvested, yield per acre, and production for 1974, 1975, and

© Copyright Soyinfo Center 2013

1976 (p. 32).

The foreword, chapter titles, and index have not been changed at all. Note: Vol. 2 was never published. Address: 1. Oilseeds protein consultant, Hot Springs, Arkansas; 2. Oilseed protein consultant, Protein Technology, Richardson, Texas.

3979. Stanley, D.W.; deMan, J.M. 1978. Structural and mechanical properties of textured proteins. *J. of Texture Studies* 9(1/2):59-76. [21 ref]

• ***Summary:*** "Mechanical properties of foods are a direct consequence of microstructure which, in turn results from an interaction of chemical composition and physical forces."

Table 1, "Mechanical and functional properties of freeze-textured soy proteins" includes: Kori tofu (firm). Kori tofu (soft). Dried soybean curd (100ºC). Dried soybean curd (50ºC). Freeze-textured (-1ºC). Freeze-textured (-18ºC).

Also discusses film formation (yuba), thermally extruded soy grits, and the formation of co-extrudates. Address: Dep. of Food Science, Univ. of Guelph, Guelph, ONT, Canada.

3980. Sussman, Vic S. 1978. The vegetarian alternative: A guide to a healthful and humane diet. Emmaus, Pennsylvania: Rodale Press. xvii + 286 p. Index. 22 cm. [39 ref]

• ***Summary:*** Explains the fundamentals of a vegetarian diet. Covers nutrition, protein requirements, health, world food crisis, recipes, and kitchen techniques. Paul Obis, editor of *Vegetarian Times*, has called this "the most complete, concise, and nondogmatic book we have come across." Keith Akers says that this is one of his four favorite books on vegetarianism.

This book contains extensive information on soyfoods (p. 248-50) including soymilk, tofu, tempeh, miso, and soy flour. The author's greatest praise is for tofu. Of *The Book of Tofu*, by Shurtleff and Aoyagi, he says (p. 274): "The most important book on food ever published for vegetarians–if not all the world. Clear prose and beautiful illustrations... Five hundred recipes for preparing this versatile and nutritious food. Buy this book..." Address: Travilah, Maryland.

3981. Wu, Jingrong. 1978. A Chinese-English dictionary. Beijing, China: Shang wu yin shu guan. 976 p. 27 cm. [Eng; Chi]

• ***Summary:*** This comprehensive dictionary uses pinyin romanization / transliteration, with accents; Chinese characters are given and definitions are in English. It contains over 6,000 single-character entries, including characters with variant tones. There are over 50,000 compound-character entries and over 70,000 compound words, set phrases and examples. The Chinese title is *Han Ying ci dan.* Soy-related terms include:

Page 92: chi, douchi; see Douchi below.

Page 125: Dadou (soybean, soya bean).

Page 164: Doubanjiang (thick broad-bean sauce). Doubing (defatted soya bean cake; bean cake). Douchi (fermented soya beans, salted or otherwise [fermented black soybeans]). Doufu (bean curd [tofu]). Doufufang (bean-curd plant [tofu shop]). Doufugan (dried bean curd [pressed tofu]). Doufunaor (jellied bean curd). Doufuru (fermented bean curd). Doufupi (skin of soya bean milk [yuba]; thin sheets of bean curd). Doujiang (soya-bean milk). Douqi (bean stalk). Dousha (sweetened bean paste). Douyou (soya-bean oil). Douzha (residue from beans after making soya-bean milk; bean dregs [okara]). Douzhipin (bean products [soyfoods]).

Pages 210-11: Fu (rotten, putrid). Furu (fermented bean curd). Fuzhu (dried bean milk cream in tight rolls [dried yuba sticks]).

Note: This is the earliest English-language document seen (Oct. 2012) that contains the term "dried bean milk cream" or the term "dried bean milk cream in tight rolls." Both probably refer to dried yuba sticks.

Page 294: Huangdou (soya bean, soybean [yellow soybean]).

Page 324: Jia (pod). Jiaguo (pod, legume).

Pages 336-37: Jiang (1. A thick sauce made from soya beans, flour, etc. 2. Cooked or picked in soy sauce, such as pork or braised pork; tomato sauce, ketchup). Jiangcai (vegetables pickled in soy sauce, pickles). Jiangyou (soy sauce, soy). Jiangyuan (a shop making and selling sauce, pickles; sauce and pickle shop).

Page 459: Maodou (young soya bean [edamame, green vegetable soybean]).

Pages 470-71: Mianjin (gluten [wheat gluten]). Miao (young plant, seedling).

Page 487: Nai (breasts, milk, suckle, breast-feed [dounai = soymilk]).

Page 553: Qi (beanstalk). Page 561: Qu (leaven, yeast, Aspergillus [koji]).

Page 661: Taijiquan (a kind of traditional Chinese shadow boxing [taichi]).

Page 957-59. Pinyin–Wade-Giles conversion tables.

Page 972: A brief Chinese chronology [of dynasties]. Address: Peking, China.

3982. Yaghoubian, Vazgen. 1978. Preparation and evaluation of cheese from cow's and soybean milk. PhD thesis, Dep. of Food Science, Louisiana State University. xi + 239 p. Page 3743 in volume 39/08-B of Dissertation Abstracts International. 28 cm. [174 ref]

• ***Summary:*** "Abstract: Soy curd prepared from soymilk extracted from Lee-74 variety of soybeans was incorporated in the proportions of 1:3, 1:2 and 1:1 with cow's milk curd in the preparation of three cheese-type products, Cheese I, II and III, respectively. During ripening periods of six weeks at 4.4ºC and three weeks at 29.4ºC, aliquots of each of these

© Copyright Soyinfo Center 2013

three kinds of cheese were removed from storage at weekly intervals and analyzed for" many different variables of chemical composition as well as hedonic

organoleptic scores.

"According to the overall mean hedonic scores for each of the fifteen sensory attributes, the three soy cheese products were found to be organoleptically acceptable" (p. x).

"Significantly associated with increased soy curd content were lower hedonic scores for general appearance, color, odor, smoothness, firmness, mouthfeel, cheese flavor, beany flavor, rancidity and acidity.

"Significantly associated with elevated storage temperature were lower hedonic scores for odor, elasticity, mouthfeel, cheese flavor, rancidity, acidity and bitterness.

"There were significant differences with respect to the effects of elapsed storage time on the preferences of the two panels regarding general appearance, odor, smoothness, firmness, graininess, mouthfeel, cheese flavor, beany flavor, rancidity, saltiness and spreadability. In general, Panel II preferred the organoleptic qualities of fresh soy cheese whereas Panel I preferred the qualities of cheese that had been stored for a few weeks" (p. xi).

On pages 5-47 is a good review of the literature, including: Composition of soybean seeds. Chemical and physical properties of soybean protein. Carbohydrates. Soybean milk. Soybean curd. Growth of lactic acid bacteria in soymilk. Soybean cheese. Soft pickled cheese. Cheese flavor. Fats and fatty acids. Proteins and amino acids. Bitter flavor in cheese.

Summary and conclusion (p. 155): "This investigation was undertaken to study the feasibility of preparing cheeselike products, acceptable in terms of palatability and shelf life for Iranian and American markets, by incorporating large amounts of soybean curd into a white pickled cheese prepared from cow's milk which would be essentially free of the bean-like flavor normally associated with soybean products." Address: Louisiana State Univ.

3983. Zurbel, Runa; Zurbel, Victor. 1978. The vegetarian family: With recipes for a healthier life. Englewood Cliffs, New Jersey: Prentice-Hall, Inc. 185 p. Edited by Lester Alexander. Illust. Index. 23 cm. [44 ref]

• ***Summary:*** The section on soybeans (p. 62-67) discusses soybeans and soyfoods, then gives recipes for: Basic soybeans. Mediterranean soybean casserole Soybean casserole. Soybean salad. Soy milk. Sesame soy milk. Roasted soybeans (baked). Other soy-related recipes include: Soyburgers (p. 80). Ginger tamari sauce (p. 118). Miso yogurt dip (p. 127).

The section titled "Basic Macrobiotic Cooking" discusses shoyu tamari, and miso, and gives recipes for: Miso soup. Miso spread. Nerimiso (Sweet simmered miso).

Chapter 7 (p. 88-101) is titled "Tofu: The food of the future–Discovered over two thousand years ago." A full-page photo opposite the title page shows a wooden forming box, with cakes of tofu and soybeans nearby. *The Book of Tofu,* by Shurtleff and Aoyagi, is praised and credited as the source of much of the information on tofu in this book. Recipes include: Quick tofu. Homemade traditional tofu. Tofu sandwich. Tofu salad. Tofu and peas. Tofu and snow peas. Tofu and Chinese vegetables. Tofu and [mung] bean sprouts. Tofu and sesame. Kinugoshi and how to make custard style kinugoshi. The chapter ends with 2 pages on tempeh, but no recipes.

3984. **Product Name:** Tofu.
Manufacturer's Name: Rajneesh Disciples Tofu Shop.
Manufacturer's Address: Poona, India.
Date of Introduction: 1978?
How Stored: Refrigerated.
New Product–Documentation: Letter from Pascal Pinault of Martinique. 1993. April 2. Pascal saw and ate tofu for the first time in May 1980 when he was living in India, while visiting some friends in Poona (Maharashtra). He bought 1 pound of tofu at a tofu shop but he is not sure if they were making the tofu in a back room of the shop or at some other place. "I suppose this tofu manufacturing plant in Poona was an offshoot of the Rajneesh Ashram, which was very active at that time and place."

Talk with Peter Schober of Pebble Beach, California. 1993. April 17. He lived at the Rajneesh Ashram in Poona from about 1976 until about May 1981, when "the whole place sort of disintegrated." There were about 500 disciples of Bhagwan Sri Rajneesh living in the ashram and another 2,000 living in houses in the surrounding community. Starting in about 1978 or 1979 some 2-3 disciples of Rajneesh set up a tofu shop in a large kitchen in the house they were renting in Poona. The shop probably had no formal name. There they made and sold enough tofu to support themselves. This tofu was often served in the ashram, and became a major source of protein. On some occasions enough tofu was made to serve for lunch and dinner to 500 people.

3985. Shurtleff, Willam. 1978? La soja, esperanza mundial: Nuevos alimentos con modalidades muy antiguas [The soybean, hope for the world: New foods with ancient roots]. *Chacra y Campo Moderno* (*Buenos Aires, Argentina*). [8 ref. Spa]

• ***Summary:*** Discusses soy protein and world hunger, tofu, tempeh, and miso. Growth of the soybean industry worldwide. Address: P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

3986. Leviton, Richard. 1979. Re: Questions and answers to questions about making tofu. Letter to William Shurtleff at New-Age Foods Study Center, Jan. 3. 2 p. Typed, with signature on letterhead.

© Copyright Soyinfo Center 2013

• ***Summary:*** "Dear Bill: Thanks for the envelope containing the lists. Work on *Soycraft* is moving right along. I built myself a big desk and I am soliciting information on soybeans around the country. Do you have copies of the general articles on soyfoods that have appeared in the media, such as the one I sent you? And do you have any other bibliographic information that we might use, that you haven't already sent? If so, please send us copies and we will pay for the zeroxing. Don't worry about the phone calls you made at my house; they hardly add up to anything.

He then answers 12 questions from Shurtleff about the tofu process and equipment at New England Soy Dairy. "Sincerely, Ira." Address: New England Soy Dairy, 305 Wells St., Greenfield, Massachusetts 01301. Phone: 413-772-0746.

3987. Sheraton, Mimi. 1979. Restaurants: Oriental delights and a taste of India. *New York Times.* Jan. 19. p. C12.
• ***Summary:*** This a review of the Chinese restaurant Say Eng Look (1 East Broadway, New York City). It features Shanghai cooking with a few Peking specialties. Fried fish was served "in a batter tinted green with seaweed.

"The most extraordinary dish that we had as an appetizer was a fried fish roll in bean curd sheets–moist, flaky white fish in a gold leaf and crustacean of fried bean curd that remained miraculously crisp for 30 minutes." This was among the recommended dishes.

And: "creamy pillows of bean curd in a fiery sauce were also excellent,..."

Note: These "bean curd sheets" are what we call "pressed tofu sheets."

3988. Shurtleff, William. 1979. Notes on visit to The Farm tofu factory in San Francisco. Meeting with Robert Dolgin. Lafayette, California: New-Age Foods Study Center. 1 p. Jan. 22. Unpublished manuscript.
• ***Summary:*** Saw Sweco vibrating screen and Brown No. 2203 extractor. Good wooden pressing box lids made of 2 by 4 boards; invert box in water and cut tofu on lid. Weigh each cake, put dry into tubs, then run in water from filling machine. Improvise own sink on wheels, 4 by 5 feet. Overflow holes 1 inch below rim. Address: Lafayette, California.

3989. Birnbaum, Alfred. 1979. Re: Comments on new condensed edition of *The Book of Tofu.* Letter to William Shurtleff at New-Age Foods Study Center, Jan. 26. 1 p. Handwritten (in pencil) and signed.
• ***Summary:*** He received the condensed version from Shurtleff and Aoyagi. "I think that the compact format should reach a large readership. Excellent work!"

"I particularly liked your having created a separate section on 'Fermented Tofu,' and of course, I noticed your updating the sections on nattô, Daitokuji nattô & hamanattô. No doubt you did considerable revision.

"On rereading some parts of the original edition for comparison I did have some questions (I am not sure if I had brought them up with you or not):

"P. 312, unabridged. 4 Chinese characters (Cc). You have read as 'Nishiyama Sodo,' though when I went there I was told it was called 'Saizan Sodo.' (Incidentally it was there that I had what I consider probably the finest tofu dinner I can remember).

pp. 309, 312, unabridged; p. 385 revised = 4 Cc. I have always heard this read as 'Fusa Ryôri,' not 'Fucha,' though perhaps the case is the same as with 2 Cc, which can alternatively be read 'sado' or 'chado' [the way of tea]. Note: Major Japanese dictionaries and glossaries all say *fucha ryôri*.

"Incidentally, have you seen the new Shufu-no-tomo English translation out on *Shojin Cooking* ($7.95)?"

• ***Summary:*** Five large, superb photos show tofu-making at Northern Soy in Rochester, New York. (1) Peter Kilbridge puts soybeans, which have been soaked in water, into a

© Copyright Soyinfo Center 2013

grinder. (2) Jay Stiler draws off they whey from above the curds, formed by natural nigari. (3) Kilbridge scoops the curds into cloth-lined forming boxes. (4) Kilbridge and Norman Holland fold cloths over the top of the curds in the forming boxes. (5) Cut blocks of tofu are placed into a plastic bucket to be shipped (in bulk) to market.

Northern Soy is one of the few tofu-manufacturing firms in the USA. Andy Schecter and Greg Weaver began making tofu in the Zen Center's basement at Arnold Park a few years ago. Production has grown from 70 lb/week to 2,000 lb/week. Now they have set up a retail outlet, The Tofu Shop, at 686 Monroe Ave. in Rochester. There they serve chocolate, lemon, or carob pies made with tofu, tofu lasagna, tofu burgers without beef, tofu sloppy joes, tofu spinach casserole, tofu reuben sandwiches, tofu peanut butter cookies, and tofu gingerbread with lemon sauce. Wegmans supermarkets carry Northern Soy's tofu and Clear Eye distributes it. Address: Rochester, New York.

• ***Summary:*** This is basically a history of The Soy Plant and some of its creative financing schemes. The Soy Plant began operation in August 1977. New products include soymilk, tempeh, spiced tofu, two spreads (one with eggless soy mayo and turmeric; one with tofu, sweet miso and tahini), ice bean [soy ice cream], tofu pies, okara peanut butter balls, and soy sausage. Address: The Soy Plant, Ann Arbor, Michigan.

3996. Industrial Services Centre. 1979. Soyabean processing industry in Nepal. Kathmandu, Nepal: Industrial Services Centre. ii + 39 p. + 15 p. Appendix. Jan. Prepared for NIDC. 39 cm. [1+ ref]
• ***Summary:*** Contents: Introduction. Background. Market: Uses and introduction of soybean products (soybean oil, flour and grits, milk, sauce, curd, lecithin, neutral spray dried soybean protein, soybean protein and flour in ice cream), possible uses of soybean products in Nepal, basic idea of consumption of soybean in Nepal, possibilities of export of soybean oil in India, general conclusion. Raw material. Technical. Financial. Conclusion.

"The purpose of this study is to examine the feasibility of setting up a soybean processing industry in Nepal and the report is prepared by the Centre at the request of the Nepal Industrial Development Corporation (NIDC), Kathmandu."

"Out of the various crops under cultivation in Nepal, soybean is one of them but a very little attention is given to the cultivation of this product. It is usually cultivated during the Monsoon time and harvested during November-December. The Department of Agriculture is carrying out varietal trials in the different stations with a view to introduce high yielding varieties and promote the cultivation of it in the different parts of the country. Although at present, it is cultivated mainly in the hilly regions at different altitudes ranging from 6000 to 4000 feet, the observations made at the plain region reveal that there is a possibility of extending its cultivation in the terai region too."

"Soybean oil: In India, soybean oil is being widely used in the manufacture of vegetable ghee and constitutes the major part of consumption in the Vanaspati industry. The little production of soybean oil in Nepal is being used as a cooking oil."

"Possible uses of soybean products in Nepal. A few of the soybean products that are in use in Nepal are soybean oil for cooking, soy curd and soy sauce in the restaurants and full-fat soy flour product by simple grinding in the different houses. If soybean oil could be made available, it may find its wide use in the future in the Vegetable Ghee Factory the installation and erection of which is nearly complete at Hetuuda, Soap factory, and in Paint Varnish industry to act as a film forming material. The soy sauce requirement of to-day in Nepal is met by the imports... Soy milk would be another product which might come into wide use in the future." Address: Balaju, Kathmandu, Nepal.

3997. Kinderlehrer, Jane. 1979. Tofu: Food of 10,000 flavors. *Prevention* (*Emmaus, Pennsylvania*). Jan. p. 111, 116-18, 120, 122.
• ***Summary:*** "If you're into New Year's resolutions, I have a nifty one for you. Resolve to try tofu, the soft creamy cake made from cooked soybeans. Its sensational!... There 's no doubt about it–tofu's time has finally arrived on our shores. Spurred by the work of William Shurtleff and Akiko Aoyagi, who wrote *The Book of Tofu* (Autumn Press, 1975), tofu shops are springing up in many communities; tofu can be found in quite a few supermarkets, health food stores, Oriental stores, and food cooperatives." Rodale Press will soon be publishing its own book on tofu, titled *The Americanization of Tofu* by Bauer and Anderson.

Contains recipes for: Poached egg in a tofu basket. Tofu and brown rice casserole. Corn soufflé. Green goddess dressing. Carrots Parmesan with tofu. Tofu cream pie (from The Tofu Shop in Rochester, New York). Carob-mint pie. Tofu dogs (from the New England Soy Dairy, Inc., Greenfield, Massachusetts).

3998. Leviton, Richard. 1979. Soyship enterprises: The grasshopper that said "moo." *Whole Foods* (*Berkeley, California*) 2(1):36-37. Jan.

• ***Summary:*** Contains a good history of Laughing Grasshopper Tofu Shop in Massachusetts, which has now become the New England Soy Dairy. Discusses the company's rapid growth, larger marketplace, and new soy products. A photo shows Sue Fahey cutting and wrapping Soysage at Crystal Hills Tofu Shop in Bethlehem, New Hampshire. Address: 100 Heath Rd., Colrain, Massachusetts 01340.

3999. Monroe, Linda. 1979. The many faces of tofu. *Alch Mist of Ann Arbor* (*Michigan*). Jan.
• ***Summary:*** The Soy Plant, located at 211 East Ann St., is a tofu shop–but they also make soysage, missing egg salad, tempeh, spiced tofu (various spices are added when curdling the soy milk), soy milk (regular or flavored with honey and vanilla), missing egg salad, tofu-tahini spread, tofu tarts (a tasty dessert). Coming soon: Soy Scream (soy milk ice cream), and Boston brown bread (steamed). Tofu is made four days a week. "Soy products can be and indeed are the staple of many vegetarian diets."

"The Soy Plant sells one pound cubes of tofu for 70 cents (if you bring your own container), 72 cents with their plastic bag, or 85 cents in their container [plastic tub]. They encourage people to bring their own containers so as to cut down the use of plastic." "The collective has been very creative with the versatile little soy bean. Their ideas seem to be endless. They have developed many tasty foods by experimenting with different combinations of ingredients."

"The Soy Plant is a cheerful, pleasant place to visit. You'll usually find samples of their different spreads and beverages. Any questions about soy products are gladly answered either by collective members or by just looking in any of the various books available there on tofu, miso and other soy products. You can be sure the collective will always be coming up with new items to surprise and satisfy your taste buds.

"The Soy Plant is open Mondays–Fridays, 10-6, and Saturday, 9-5."

In the middle of the article is The Soy Plant Logo, two soybean plants growing (to left and right) out of Planet Earth. Around the bottom is written "The Soy Plant."

Talk with Steve Fiering, a founder of The Soy Plant in Ann Arbor. 2000. Dec. 3. The title of this periodical derives from the word "Alchemist." The logo was Steve's idea, developed by Marge Bruchac, Susanna Middaugh, and Dan Ecclestone.

• ***Summary:*** This full-page black-and-white ad shows a large photo of a package of this tofu. "Six month shelf life. No preservatives. No refrigeration." Exclusive distributor is Mutual Trading Co., Inc., 431 Crocker St., Los Angeles, California 90013.

Note: This is the earliest Morinaga tofu ad seen (March 2013) in the United States. Address: Japan.

4001. **Product Name:** Savory Baked Tofu (Vacuum Packed).
Manufacturer's Name: Quong Hop & Co.
Manufacturer's Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.
Date of Introduction: 1979. January.
Ingredients: Water, organically grown soybeans, soy sauce (water, soybeans, wheat, salt) spices, nigari (magnesium chloride).
Wt/Vol., Packaging, Price: Vacuum packed.
How Stored: Refrigerated.
Nutrition: Per 3.5 oz.: Calories 193, protein 23 gm, carbohydrate 5 gm, fat 9.
New Product–Documentation: Label. 1981. 3.5 by 2 inches. Self adhesive. Brown and silver on light green. 7.5 oz. Label. 1979. 2 by 2 inches. Self adhesive. Mustard yellow on white. Back label. 3.75 by 2 inches. Self adhesive. Brown on white. "Savory Baked Tofu has a flavor and consistency remarkably like that of smoked or seasoned ham. Enjoyed for centuries in Northern China, it is prepared by marinating pressed tofu in natural soy sauce and seasonings, then baking it to give a meaty texture and wonderful flavor. The finished savory tofu is 23% protein, more than chicken or steak, and almost three times as much as regular tofu. One 4 oz serving provides you with 27 gm of quality protein, nearly half your daily need with only 219 calories.

"Savory baked tofu is ready to eat. Sliced or diced, it can be used in sandwiches, for hors d'oeuvres or in salads like ham, bacon, or cheese. It is also delicious in soup or with noodles. For outdoors, enjoy it from the package as a quick, high-protein snack. Our unique vacuum packaging allows savory baked tofu to remain fresh in the package over one week without refrigeration.

"For more recipe ideas see *The Book of Tofu* by Shurtleff & Aoyagi (Autumn Press or Ballantine Books)." Ad in Whole Foods. 1979. Jan. p. 40. Poster. Color. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Vacuum packed tofu! Savory baked–Deep-fried cutlets.

4002. Quong Hop & Co. 1979. Soy foods in San Francisco since 1906 (Ad). *Whole Foods* (*Berkeley, California*) 2(1):40. Jan.
• ***Summary:*** This ¼-page black-and-white ad begins: "The traditional soy foods of China have been our family's business now for three generations. Since 1906, when our doors first opened in San Francisco's Chinatown until today, we have built our business on a firm commitment to producing only the finest quality products for our customers." Vacuum-packed tofu products include: Natural Nigari Tofu, Savory Baked Tofu, Fried Tofu Cutlets, and

4004. **Product Name:** Tofu Burger (Vacuum Packed. Renamed New Leaf Tofu Burger by 1980).
Manufacturer's Name: Quong Hop & Co.
Manufacturer's Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.
Date of Introduction: 1979. January.
Ingredients: Nigari tofu, diced carrots, diced onions, sesame seeds, sunflower seeds, dried currants, safflower oil, sea salt, spices.
Wt/Vol., Packaging, Price: 100 gm vacuum pack patties. Retails for $2.59/lb.
How Stored: Refrigerated.
Nutrition: Per pattie: 8.5 gm protein, 107 calories.
New Product–Documentation: Label. 1981. 4 inch diameter. Self adhesive. Red, mustard on white. "Heat & Serve!" Ad in Whole Foods. 1979. Jan. p. 40. Recipe given by Shurtleff & Aoyagi. 1979. Tofu & Soymilk Production. p. 182. Poster. 1982. Color. "Tofu Burgers Bring Tofu West, in its Most Delicious Form Ever." Vacuum packed.

4005. Shurtleff, William; Aoyagi, Akiko. 1979. The book of tofu: Food for mankind. Condensed and revised. New York, NY: Ballantine Books. A division of Random House, Inc. xii + 433 p. Jan. Illust. by Akiko Aoyagi Shurtleff. Index. 18 cm. [60 ref]

• ***Summary:*** This book has been extensively revised and updated. Many names of Japanese tofu have been Americanized. Contents: Preface. Acknowledgements. 1. Protein East and West. 2. Tofu as a food. 3. Getting started: Favorite tofu recipes. 4. Soybeans. 5. Fresh soy puree. 6. Okara (Soy pulp). 7. Curds and whey. 8. Tofu & firm tofu. 9. Deep-fried tofu: Deep-fried tofu cutlets, deep-fried tofu burgers & treasure balls (tofu treasure balls, p. 269), and deep-fried tofu pouches. 10. Soymilk. 11. Silken tofu. 12. Grilled tofu. 13. Frozen & dried-frozen tofu. 14. Fermented tofu. 15. Yuba. Appendices: A. Tofu restaurants in Japan. B. Tofu shops and soy dairies in the West. C. Varieties of tofu in East Asia. D. Table of equivalents. Bibliography. Glossary. Contains 250 recipes and 100 illustrations. Price: $2.95.

This new edition features: (1) New recipes: Over fifty new American-style tofu recipes including Creamy Tofu Dressings, Tofu Teriyaki, Tofu Burgers, Tofu Eggless Egg Salad, and the like. The key to the book is an updated list of favorite tofu recipes plus suggestions for incorporating them into a weekly menu (p. 56). (2) New sections: An extensive new introduction to Soy Protein Foods (p. 66), dairylike products made from tofu (p. 150), dairylike products made from soymilk (p. 302) including soymilk yogurt (fermented), ice cream, kefir, mayonnaise, whipped cream, popsicles, buttermilk, and soy shakes. (3) New chapters: Fermented Tofu and Varieties of Tofu in East Asia. (4) New basic methodologies: The key recipes for homemade tofu and homemade soymilk have been simplified and improved. (5) Updates: A complete listing of the 120 tofu shops and soy dairies now operating in the West; over 60 Caucasian-run shops have opened in the past two years. (6) New Americanized tofu names: Including deep-fried tofu burgers, deep-fried tofu cutlets, deep-fried tofu pouches, deep-fried tofu puffs, silken tofu, wine fermented tofu, and fresh soy puree. A major goal of this book is to coin English names for tofu products that will catch on and come to be used in labeling commercial products, in cookbooks, etc. (7) No sugar.

Note 1. This is the earliest English-language document seen (April 2013) that contains the following terms related to deep-fried tofu: "fried tofu cutlets" or "deep-fried tofu cutlets" (p. v, to refer to *nama-agé*), "fried tofu burgers" or "deep-fried tofu burgers (to refer to *ganmodoki*), "tofu treasure balls" or "deep-fried tofu treasure balls" (p. v, 269, to refer to *Hiryozu*), "fried tofu pouches" or "deep-fried tofu pouches" (p. v, to refer to *aburagé*).

Page 110: "In Japan, tofu is also called *momen-goshi* ('cotton-filtered') to distinguish it from its popular counterpart *kinu-goshi* ('silken tofu')." Note 4. This is the earliest English-language document seen (April 2013) that uses the term "silken tofu."

Note 5. This is the 2nd earliest English-language document seen (Oct. 2011) that contains the term "Wine-fermented tofu" (p. 361).

© Copyright Soyinfo Center 2013

In Jan. 1988 a new printing (but not a new edition) of this book (the 13th), slightly revised, appeared. It had a new cover and many new small illustrations. The subtitle was "Protein Source of the Future–Now!" The heading: "The World's Bestselling Book on Tofu." Address: New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549.

4006. Shurtleff, William; Aoyagi, Akiko. 1979. Appendix C: Varieties of tofu in East Asia (Document part). In: William Shurtleff and A. Aoyagi. 1979. The Book of Tofu. New York: Ballantine Books. 433 p. See p. 402-05.

• ***Summary:*** Gives the local, vernacular name for and a description of many varieties of tofu found in China and Taiwan, Indonesia, South Korea, Philippines, Thailand, and Vietnam.

China and Taiwan:

Taiwan, with a population of 15 million people, has about 2,500 tofu shops. There are no statistics yet available on the number of shops in mainland China, but if the proportion of shops to people is the same as in Taiwan, we can expect there to be 158,000 shops serving China's 950 million people. Unless otherwise stated, all Chinese terms are standard Mandarin. The "t" in toufu is pronounced like the "d" in "doe."

Chinese-style Firm Tofu (*toufu; dowfu* or *daufu* in Cantonese). The most popular type. Coagulated with calcium sulfate (gypsum) and sold in 3-inch squares weighing about 4½ ounces each. Contains 10 percent protein. One special type made in Shantung province is called *t'aian toufu;* another made in Anhui province, Chunnan, is called *pa-kung-shan toufu.*

Pressed Tofu (*tofu-kan*)*:* Similar to firm tofu but pressed until as firm as ham. Contains 22 percent protein. Often simmered in mixtures of water and burnt millet sugar, molasses, turmeric, or tea to create a variety of colors and flavors and increase shelf life.

Five-Spice Pressed Tofu (*wu-hsiang toufukan* or *hsiang toufukan*)*:* Made by simmering pressed tofu squares in a mixture of soy sauce, oil, and "five spice powder" (ground anise, cinnamon, cloves, plus fennel and Szechuan chili powder or ginger and nutmeg). Now prepared in San Francisco, it has a flavor and texture resembling smoked ham.

Soy-sauce Pressed Tofu (*chiang-yu toufu-kan*)*:* Made by simmering small squares of pressed tofu in a mixture of soy sauce and water.

Pressed Tofu Sheets (*pai-yeh* or *ch'ien-chang*)*:* Tofu pressed into very thin sheets that look like a 6-to-12- inch-square of canvas.

Pressed Tofu Noodles (*toufu-ssu* or *kan-ssu*)*:* Made by cutting pressed tofu sheets into noodlelike strips.

Pressed Tofu Loops (*pai-yeh chieh*). Made by cutting pressed tofu sheets into ½-inch-wide strips. Each is then tied into a simple overhand knot.

Salt-dried Tofu (*toufu-kan*)*:* Made from squares of pressed tofu that are rubbed with salt, tied together with strands of rice straw, and hung in the sunlight to dry.

Hard tofu (*lao-toufu*)*:* A general term for all tofu that is not soft.

Chinese Silken Tofu (*shui-toufu, nan-toufu, nen-toufu,* or *shih-kao toufu*)*:* One popular type is like a soft Japanese silken tofu; another is so soft it cannot be cut into cakes.

Smooth Soymilk Curds (*toufu-nao*)*:* Literally "tofu brains." Sold in the West as Tofu Pudding. Sold by street vendors in China topped with a brown sugar & peanut sauce.

Curds-in-Whey (*toufu-hua* or *rou-hua*)*:* Literally "tofu flowers." Available at some Chinese restaurants in the West.

Deep-fried Tofu (*yu-toufu* or *cha-toufu*)*:* A general term for deep-fried tofu cutlets, cubes, triangles, or netlike cutlets.

Hollow Deep-fried Tofu Cubes (*toufu-kuo* or *cha-toufu*)*:* Made by deep-frying 1-inch cubes of firm tofu.

Sautéed Tofu (*kuo-lao toufu*)*:* Made by thinly slicing firm tofu and frying it over low heat in a skillet until it turns a rich brownish yellow.

Frozen Tofu (*tung-toufu* or *ping-toufu*)*:* Made by setting firm tofu out overnight in the snow.

Fermented Tofu (toufu-ru): See Chapter 14. Varieties include *nan-ru, nan-chiang toufu, ru-fu, mei-kui ru-fu,* and *chiang-toufu.*

Soymilk (*toufu-chiang tou-chiang,* or *tou-ru*)*:* See Chapter 10.

Chinese-style Yuba (*toufu-p'i* or *doufu-i*)*:* See Chapter 14.

Bamboo Yuba (*fu-chu* [*dried yuba sticks*])*:* U-shaped, dried rolls.

Okara (*tou-cha*)*:* See Chapter 6.

Indonesia:

Over 11,000 tofu shops make tofu for this country's 130 million people.

Indonesian tofu (*tahu*)*:* Similar to Chinese firm tofu (*toufu*). In many shops, the whey, allowed to stand overnight until it ferments, is used as the coagulant. Pressed tofu simmered in turmeric (also called simply *tahu*) is popular.

Deep-fried Tofu Cubes (*tahu goreng*)*:* 1¼-inch cubes deep-fried fresh by market vendors. Served crisp and hot, often with a fiery chili perched on top.

Tofu Chips (*krupuk tahu*)*:* Salted tofu sliced into long, thin strips and sun-dried. Broiled until crisp, then eaten as a snack or topping for Gado-gado (cooked vegetables with peanut sauce).

Fermented Tofu (*taokoan* or *takoa*)*:* Steamed and pressed into thin slices before being fermented.

Okara (*ampas tahu*)*:* Usually made into delicious okara tempeh or okara onchom.

South Korea:

There are more than 1,000 tofu shops scattered throughout this country of 32 million population. If there

© Copyright Soyinfo Center 2013

were a proportional number in North Korea, there would be 470 shops for 15 million people.

Korean Tofu (*tubu*)*:* Slightly firmer than its Japanese counterpart; not as firm as Chinese toufu.

Deep-fried Tofu Strips (*yubu*)*:* Each strip is about 7 by 1 by 3/4 inch. Unique.

Soymilk Curds (*sun tubu*)*:* Widely used.

Okara (*piji*)*:* Also popular.

Philippines:

Philippine Tofu (*tokwa*)*:* Identical to Chinese firm tofu (toufu).

Soymilk curds (*tajo* [*tajo*])*:* Pronounced ta-HO; made by Chinese. Sold topped with a little brown sugar.

Brine-fermented Tofu (*tahuri*)*:* Made like Chinese brine-fermented tofu but with an *Aspergillus elegans* mold and a little soy sauce in the brining liquor.

Thailand:

Thai Tofu (*tao-hu*)*:* Identical to Chinese firm tofu (*toufu*). Made mostly by Chinese.

Deep-fried Tofu (*tao-hu tod*)*:* Small (l¼-inch) cubes of deep-fried tofu. Often sold strung on split bamboo and tied in a loop.

Soymilk (*nom rua-liung*)*:* Sold hot each morning by Chinese. A thin soymilk is called *nam tao-hu.*

Soymilk Curds (*tao-huey*)*:* Sold by street vendors, topped with grated gingerroot and brown sugar syrup.

Red Fermented Tofu (*tao-hu yee*)*:* A Chinese product. Sold in 2-inch squares wrapped in either banana leaves or paper.

Lactone Silken Tofu (*tau-hu lord* or *tau-hu lawd*)*:* A modern product.

Vietnam:

Vietnamese Tofu (*dau hu* or *dau phu;* these and all of the following terms are spelled with many diacritical marks): Similar to Chinese firm tofu.

Smooth Soymilk Curds (*dau hu*)*:* Similar to the Chinese product of the same name. Served warm in a sauce of brown sugar and ginger.

Fermented Tofu (*chao*)*:* Similar to Chinese fermented Tofu.

Soymilk (*sua dau nanh*)*:* Identical to Chinese soymilk.

Pressed Tofu Sheets (*mi cang*)*:* Identical to the Chinese product.

Yuba (*dau phu truc*)*:* Identical to Chinese yuba.

Note 1. This is the earliest English-language document seen (April 2013) that uses the word "daufu" to refer to Chinese-style tofu.

Note 2. This is the earliest English-language document seen (Oct. 2010) that uses the word "nan-ru" to refer to fermented tofu. Address: P.O. Box 234, Lafayette, California 94549.

4007. Shurtleff, William. 1979. Protein source for the future. *Cosmos* (*NSW, Australia*) 6(6):1, 4-5. Jan.

• ***Summary:*** Gives ten reasons why soybeans will be the protein source of the future: 1. Optimum land utilization. 2. Lowest cost protein. 3. High nutritional value. 4. Time tested. 5. Remarkably versatile. 6. Appropriate technology. 7. New dairylike products. 8. Hardy and adaptive. 9. Free nitrogen fertilizer. 10. Energy and resource efficient. "All of these ten factors work together synergistically, reinforcing one another, to give added weight to the prediction that soybeans will be a key protein source for the future on plant earth."

Note: This information was published in July 1979 in *The Book of Tempeh* (p. 21-24). Address: Lafayette, California.

4008. Shurtleff, William; Aoyagi, Akiko. 1979. Soybeans (Document part). In: William Shurtleff and A. Aoyagi. 1979. The Book of Tofu. New York: Ballantine Books. 433 p. See p. 58-75. Chap. 4.

• ***Summary:*** Contents: Introduction. Soy protein foods– Traditional non-fermented soyfoods: Whole dry soybeans, soynuts, roasted soybeans, fresh green soybeans, soy sprouts, natural soy flour and soy grits, roasted soy flour (kinako).

Traditional fermented soyfoods: Tempeh, miso, shoyu (Japanese natural soy sauce), natto (fermented whole soybeans, including Japan's cracked natto {*hikiwari natto*} and finger lickin' natto {*yukiwari natto,* containing rice koji and salt}, and thua-nao from northern Thailand), soy nuggets (inc. Japan's Hamanatto and Daitokuji natto).

Modern western soyfoods (developed using high-level technology): Soy flakes, defatted soy flour and grits, soy protein concentrates, soy protein isolates, spun soy proteins, textured soy proteins (TVP is an ADM brand name), textured soy concentrates, soy oil products. Address: P.O. Box 234, Lafayette, California 94549.

4009. Singh, B.B.; Saxena, M.C. 1979. Soybean production in India. *Indian Farming* 28(10):7-9. Jan. Series 2.

• ***Summary:*** The soybean has been traditionally grown in the northern hills and several other scattered areas of India for many centuries, although there is no available record as to when it was introduced to the country. It has become an essential part of the daily diet in those regions and has been known by various names such as Bhat, Bhatman, Bhatmas, Ramkulthi, Bhut, Kalitur, Teliakulth and Garryakalay. Since the varieties grown in these areas were apparently poor yielding types, with small black seeds and twiny growth habit, they did not become popular in India. Although several attempts have been made to popularize soybeans, these attempts have failed, probably due to lack of sustained efforts and systematic trials.

"A fresh interest in soybean became evident with the preliminary studies conducted at Pantnagar and Jabalpur during the years 1963 to 1966 using improved varieties from the U.S.A. Some of the U.S. varieties yielded between 30 and 36 quintals per hectare (ha) which was almost 3 times

© Copyright Soyinfo Center 2013

as compared to the traditional kharif pulses. [Note: 1 quintal = 100 kg.] Encouraged by these results, the Indian Council of Agricultural Research initiated an All India Co-ordinated Research Project on Soybean in 1967 with 3 main centres (Pantnagar, Jabalpur and Delhi) and several sub-centres covering different agro-climatic regions. The main emphasis of the project has been to develop high-yielding varieties and package of cultural practices for soybean cultivation in various agro-climatic zones of India."

The acreage under soybean has been increasing every year, although not as fast as targeted, from the modest beginning of about 300 ha of soybean in kharif 1968. The total area under soybean in kharif 1975 was about 160,000 ha of which about 82,000 ha were in U.P. and about 40,000 ha in M.P. The fastest expansion in soybean cultivation has been in the low hills and foot-hills (Bharbar) of U.P. where the average yield of soybean has ranged from 20 to 36 quintals per ha giving the highest net return per acre as compared to any other crop. Soybean is also becoming popular in Madhya Pradesh on current fallows.

The main problem in expanding the area under soybean is the limited market for soybean and uncertainty of price.

"Most of the indigenous soybean varieties like 'Kalitur,' 'Bhat' and 'T-1" are black seeded and, therefore, many people feel that black color is better than yellow. This is not true... The main reason for growing these varieties in India is not the black seed color but the small seed size. It has been experimentally demonstrated that small seeded varieties do not lose viability during the storage and as such there is no germination problem."

Extensive research has been done in India on food uses of soybeans. Wheat flour fortified with soybean flour makes more nutritious and good quality chapati. Detailed processes have been established for preparing soy-milk, soy-cheese, soy-curd, soy-sweets, soy-nuts and soy-baby foods both at home level and at commercial scale. G.P. Pant University of Agriculture and Technology, Pantnagar has been running a pilot plant producing about 1,000 liters of soybean milk per day. Similar attempts are also being made at Nagpur.

"Industrial processing of soybean to produce protein-rich food has been initiated in the country, but only on a small scale. The defatted soy-flour available from some solvent extraction plants is being used by bakeries for making bread, chocolates and biscuits. The Soya Production and Research Association, Bareilly in collaboration with G.B. Pant University of Agriculture and Technology, Pantnagar have been manufacturing a series of products using an extruder cooker. Products like, 'Nutri Nugget' with 50% protein and 'Proteinsnack' with 15% protein have become extremely popular." Address: G.B. Pant Univ. of Agriculture & Technology, Pantnagar.

4010. **Product Name:** Tofu Tarts [Banana Cream, Honey-Tahini, Peanut Cream, Pumpkin Cream, Yam, Mocha, or Lemon].
Manufacturer's Name: Soy Plant (The).
Manufacturer's Address: 211 East Ann St., Ann Arbor, MI 48104. Phone: 313-663-0500.
Date of Introduction: 1979. January.
New Product–Documentation: Monroe, Linda. 1979. *Alch Mist of Ann Arbor* (Michigan). Jan. "The many faces of tofu." "Tofu tarts are a tasty dessert found at The Soy Plant. Tofu is blended with bananas or peanut butter and honey and tahini (ground sesame seeds) and set in a crust of oats and sunflower seeds."

Talk with Steve Fiering, a founder of The Soy Plant in Ann Arbor. 2000. Dec. 3. The shell was baked, but the filling was not. The shells were not a pastry filling, rather more like a graham cracker crust but with oats and seeds.

5. Soybean food uses in North America. United States. Canada. References–Soybean food uses in North America.

6. Soybean food uses in Australia. 7. Summary of soybean food uses. Traditional soybean foods: Soybean milk, soybean curd and processed soybean curd products, protein-lipid film, soybean sprouts, tempe (tempeh), green soybeans, boiled soybeans, roasted soybeans, soybean flour, soy sauce, fermented soybean paste, fermented whole soybeans, natto, fermented soybean curd. Experimental soybean foods: Whole soybean foods, soybean paste, soy flour, soy beverage. Production and consumption.

8. Simple village process for processing whole soybeans: Equipment, process, sanitation requirements, quality of product, evaluation of product in formulas and procedures for family and institutional use in developing countries. NRRC village process. 9. Industrial production and selling prices of edible soybean protein products.

10. Barriers to accepting and using soybeans in food: Availability. Cultural and social factors. Texture. Flavor. Nutrition and food safety. Technology development. Technology transfer.

Tables: (1) Soybean production, imports, and total supply in Taiwan, 1962-1975. (2) Consumption of soybean foods in Taiwan, 1964-1974 (incl. tofu, which increased from 18.75 kg per person per year in 1964 to 32.04 kg per person per year in 1974). (3) Supply and disposition of soybeans in Japan, 1971-1974. (4) Metric tons of whole soybeans used in the production of traditional foods (miso, shoyu, tofu and others) in Japan, 1970-1974, etc. Address: NRRC, Peoria, Illinois.

4014. Weaver, Greg. 1979. Re: The Tofu Shop retail outlet in Rochester, and its favorite recipes. Letter to William Shurtleff at New-Age Foods Study Center, undated. 6 p. Handwritten.

• ***Summary:*** Describes the reasons for setting up "the retail shop." Numerous favorite tofu and tempeh recipes are attached. Some were used by Shurtleff & Aoyagi in their book *Tempeh Production.* Address: The Tofu Shop, 686 Monroe Ave. / 277 N. Goodman St., Rochester, New York 14607. Phone: 716-442-1213.

4015. *Whole Foods* (*Berkeley, California*). 1979. The soyfoods revolution. 2(1):22-47. Jan. Illust. 28 cm. [3 ref]

• ***Summary:*** This is the cover story. Contains numerous articles, each cited separately.

Note 1. The word "soyfoods" appears on the cover of the magazine–the first such appearance.

Note 2. This is also the earliest English-language publication seen (Sept. 2011) with the word "soyfoods" in the title (one of two in this issue).

4016. *Whole Foods* (*Berkeley, California*). 1979. Soysage from the Crystal Hills. 2(1):40-41. Jan.

• ***Summary:*** Crystal Hills Tofu Shop started production in Sept. 1977 at Bethlehem, New Hampshire. It began before that in the kitchen of Pat and Jay Gibbons. The shop is now run by 3 full-time and 2 part-time people, who make up to 1,500 lb of tofu and several hundred pounds of "Soysage" each week. These products are delivered weekly throughout New Hampshire and Vermont. The Soysage is made from okara, whole wheat flour, wheat germ, nutritional yeast, oil, soy sauce, honey, herbs and spices.

4017. *Whole Foods* (*Berkeley, California*). 1979. The

© Copyright Soyinfo Center 2013

beaning of Motown. 2(1):41. Jan.
• ***Summary:*** In January 1978, Carol Ann and Timothy Huang, founders of the Yellow Bean Trading Co. in Detroit, Michigan, started to distribute tofu, soymilk, and tempeh made at The Soy Plant in Ann Arbor, Michigan. Yellow Bean takes the products to health and natural food stores, restaurants, fruit markets, and Oriental grocery stores in Detroit. In the beginning they distributed 100 lb/week of tofu; that figure has now risen to 400 lb/week. They also carry nutritional yeast, sprouts, textured vegetable protein, soybeans, soy flour, and *The Farm Vegetarian Cookbook,* which contains excellent soyfoods recipes.

Timothy and Carol Ann made soyfoods a major part of their diet while living on The Farm in Tennessee. They were married on a branch of The Farm in Wisconsin, where their son was born. Carol and Tim now also give demonstrations on how to cook with tofu and other soyfoods.

"As the wholesale business grows, the Huang family is now setting up a store and restaurant, Yellow Bean Vegetarian Foods. At first, the restaurant is planned as a carry-out, including a deli case." Later they hope to expand to a larger location, open a sit-down restaurant, and begin making their own tofu and soymilk.

The Huangs feel "really glad to be part of this 'revolution,' and offer what we've learned."

4018. *Whole Foods* (*Berkeley, California*). 1979. The food of the future. 2(1):22-24. Jan.
• ***Summary:*** The article begins: "Why devote an entire issue of *Whole Foods* to the subject of soyfoods? Soyfoods are a rapidly growing part of the natural foods industry..."

"The bringing of the 'Soyfoods Revolution' to the natural foods industry is the work of individuals, toying and playing with new recipes in their own kitchens and shops. No person deserves more credit for this revolution than William Shurtleff who, along with Akiko Aoyagi, wrote *The Book of Tofu,* and told us all how to do it. (An updated pocket-size version of *The Book of Tofu* is just off the presses of Ballantine Press.) Shurtleff travels the globe, sharing his expertise on soyfoods, covering topics as specific as chip-dip recipes and as broad as the role of soybean production in future patterns of world protein hunger.

"Other individuals, most of them with small soyfoods shops of their own, met recently to form the Soycrafters Association of North America (SANA), which is likely to serve as the backbone of the Soyfoods Revolution in the natural foods industry. [Note: This historic first meeting was held on 28-30 July 1978 at The Soy Plant in Ann Arbor, Michigan.] SANA selected Larry Needleman as its first president. Needleman, whose Bean Machines, Inc. imports the prime line of Takai tofu and soymilk equipment from Japan, has been a major source of information about soyfoods equipment for our industry.

"Needleman wrote about the spirit of the new organization at its first gathering in Ann Arbor.

"'Imagine a group of seventy people representing enthusiastic dedication (almost to the point of craziness) to the production and distribution of tofu and other soyfoods, gathered in an informal setting in a university town in the Midwest, with meetings scheduled from nine in the morning till eleven at night–and you've got a good idea of what went on... 'Sharing began immediately. Groups of people gathered here and there and began asking each other about their shop or organization. Those passing by would hear a familiar word such as 'yield' of 'pressure-cooker' and just stopped to join the conversation. It was apparent that here was a gathering destined to be stimulating and mutually beneficial...

"'The first evening, Bill Shurtleff set up a slide show about tofu and miso production in Japan. The presentation ran the gamut from small, traditional shops built over their own well, to large, fully-automated factories turning out tens of thousand of pounds per day. Bill answered questions and added a personal touch to the showing because he had shot the photos himself over a period of years, and was familiar with the language, traditions and production of the Japanese...

"'On Saturday morning, The Soy Plant showed us their method of producing tofu and soymilk. Those with less experience absorbed information and asked questions, and those with more experience volunteered information, clarified points and offered suggestions. Then Wataru Takai, the overseas manager for Takai Tofu and Soymilk Equipment Co., Japan's largest manufacturer of this equipment, explained principles behind each step of production, and the uses of the equipment...

"'At a later session, it was remarked that many soyfoods producers are operating on an inefficient and labor-intensive basis. Some felt this was a good way to begin, first becoming intimate with the steps of production and developing a market 'track record,' and then using that base to upgrade production by purchasing more sophisticated equipment. Others felt that the time and energy involved in putting together a makeshift shop which was outgrown in about six months would be better spent in the capital to start at higher technological level...

"'In one of the most popular and exciting discussions of the conference, the consensus of the group was that tofu and soymilk were the foods that Americans have been waiting for. A list of related products that have been marketed with incredible success included tofu burgers, no-egg salad, honey soymilk ice cream, tofu chip-dips and dressings, flavored soymilk, tofu 'mayonnaise,' and pressed, marinated tofu. There was unanimous agreement that it was these new soyfoods that would capture the interest and palate of middle America, people who had turned up their noses at that tasteless white cake of tofu floating in water...

"'Later we discussed the problems of proper storage and display of our products. In US food markets, tofu has usually

© Copyright Soyinfo Center 2013

been sold with Oriental foods in the vegetable section. Getting it moved to a cooler, more appropriate cheese display case, where it will stay fresh longer and compete favorably with dairy products, has met with resistance...

"'In the evening, another slide show by Bill Shurtleff showed us how tempeh, a key protein source for millions of people in Indonesia, is quickly and simply produced as a cottage industry in their homes. Having sampled this unusual food at lunch, we were eager to learn about it because it was delectable. Somewhere between a deep-fried fish cake and Kentucky fried chicken in flavor and texture, it lent itself to use in a seemingly endless variety of ways...'

"Toward the end of the conference, discussion turned to marketing and finance. It was found that some firms lacked capital for growth, while others had enough capital but needed greater management skills to keep up with the growing demand for soyfoods. That demand is not uniform nationwide. Different regions show various levels of consumer awareness, interest in, and acceptance of soyfoods. Printed hand-out sheets and cooking classes were suggested as promotional efforts were an important part of the creation of a desirable image for soyfoods.

"Before leaving Ann Arbor, the participants formed the Soycrafters Association of North America as a trade association to promote soyfoods and exchange information among the members. With the founding of SANA, the Soyfoods Revolution took its longest recent stride. Soycrafters were no longer isolated persons, groups and shops, but had become a nationwide network devoted to the same purposes, sharing their experiences for mutual benefit and the ultimate benefit of the American consumer."

Note: The word "soyfoods" is used throughout this article.

4019. **Product Name:** Amazake.
Manufacturer's Name: Woman in San Francisco.
Manufacturer's Address: San Francisco, California.
Date of Introduction: 1979. January.
New Product–Documentation: Orange leaflet. Late 1978 or 1979?, undated. 5.5 x 8.5 inches. "AMAZAKE' (ah-mah-ZAH-kay) is a natural sweetener as well as a delicious warm drink. It is made from fermented sweet rice and a special enzyme, Koji. As a drink: 1 part AMAZAKE', 2-3 parts spring water. Heat mixture. Do NOT boil. Serve topped with grated gingerroot." Then recipe for cookies. "Amazake' as a sweetener: 3T for 1 T honey. Listen om shanti. Near the bottom of the leaflet is an illustration (line drawing) of a Japanese nobleman in formal dress seated on a raised mat. Monique Brief Miksis sent this leaflet in March 1988, stating that it was given out by the woman who made amazake in San Francisco and sold it at Rising Sun in early 1978.

Talk with Tony Plotkin of Grainaissance. 1988. Jan. 21. When Tony worked at Rising Sun in San Francisco in 1978 he recalls that they sold amazake in 16 oz. jars made by a woman in San Francisco. Made from whole grain brown rice, it was unfiltered so that it had a chunky texture. Only a plain flavor was made. She also made and sold pastries. Another talk with Tony. 1988. Jan. 30. He started working at Rising Sun in the fall of 1978. No amazake was being sold at that time. It first arrived in late 1979 or early 1980. They only stocked it for a few months; the lady apparently left. Yuki Muramoto (415-822-4711), Aine Travis (415-222-9446, in El Sobrante, who worked with Yuki as office person), or Paul Miksis might have more information about this amazake.

James Udesky calls from Japan. 1988. Jan. 30. He worked at Rising Sun/Herb T Co. in SF from 1972-1975. He never saw a commercial amazake in San Francisco during that time. Yuki Muramoto took over when he left for Japan. Tony Plotkin came later. But Cornellia Aihara taught amazake making in classes. Alice Feinberg made an amazake cake in 1972-73. Star Peterson, John Peterson's wife, in Marin may know. He was in Japan 6 years. Hazle Lerman of Oregon may know. She helped Cornellia on books.

Talk with Aine Travis. 1988. Feb. 18. She worked at Rising Sun for 3 years but does not recall selling amazake as such. They sold koji and someone (probably a woman) baked amazake cookies, which they sold. Shiwa and Ron Harris made seitan, some of the first in America, which they also sold. Jane Gelly, from Sweden, was very good at using the koji to make her own amazake.

Talk with Monique Miksis. 1988. Feb. 27. She had lived in California for 7 years. She worked for Rising Sun from about 1976 or 1977 until early 1979; she left at that time to start the East West Center in San Francisco with Paul Miksis. She recalls that in about late 1977 or early 1978 a woman who made amazake started selling it at the Rising Sun. She only did it for a few months; it was more of a pudding than a drink, sold in a pint jar. Talk with Aine Travis. 1988. Feb. 29. She thinks she worked at Rising Sun from late 1977 until 1980. When she started, only she and Yuki Muramoto were there. Monique definitely arrived after Aine did. Monique worked mostly with Herb T Company, which was the profitable part of the business. So Monique and Aine were there at the same time.

Talk with Yuki Muramoto. 1988. Feb. 29. He worked at Rising Sun from about 1975 to 1979. He recalls that amazake was sold there in about 1978-79, but in pastries rather than as a drink. Later he sold Paul Miksis' amazake. He thinks that Shiwa Harris, the first wife of Ron Harris, bought amazake from a San Francisco woman who made it and used it as a sweetener in her macrobiotic pastries (such as bran muffins). Ron Harris made seitan for a long time. Michael Pierce made his label. Their company was Grain Dance. Tony was a founder of Grainaissance but for the first several years he also worked at Rising Sun. Yuki thinks Shiwa is in California (she came from Oregon).

Talk with Ron Harris and Debbie Brent. 1988. March 6. San Mateo. Tel. 415-347-1378. Ron arrived in San Francisco

© Copyright Soyinfo Center 2013

in about 1975, having studied macrobiotics previously in Ohio from 1974. He founded Grain Dance and started making seitan in his house in the Haight-Ashbury district of San Francisco about 1977-78. Later David "Devo" Knepler came is as a partner (Devo now works with Wildwood Natural Foods). He delivered his seitan regularly to Rising Sun (which was his first account) and stocked their one small refrigerator. He was interested in amazake and would definitely have noticed if they stocked any. He does not recall Rising Sun selling any amazake before that sold by Paul Miksis. Ron's first child was born in 1976 and would have used amazake as a sweetener for the child if it had been available. He also does not recall his wife, Shiwa, using amazake to sweeten her date bars or muffins (pastries); he thinks she was using barley malt syrup or maple syrup. He does recall a macrobiotic woman in Berkeley, Carolyn Goldwasser (now in Portland: Phone 503-629-9213), making amazake in the late 1970s but does not think she sold it, at least not regularly. She did make rice bran pickles out of her home and sell them.

Talk with David Rabinowitz in Mill Valley. 1988. Nov. 8. He worked at Rising Sun, and left on 3 Sept. 1978, flying to Cincinnati. Tony Plotkin took his place, making mochi. During the summer of 1978 he and Yuki Muramoto lived together and made mochi. He does not recall any amazake being sold at Rising Sun before Sept. 1978. Shiwa's cupcakes were sold later. Jacob "Bud" Israel, who was at Rising Sun almost all the time Jimmy Udesky was there, might recall. He probably left just before Aine started.

Talk with Shiwa Harris. 1988. Nov. 8. She thinks she got the amazake for her cupcakes from Rising Sun but is not sure. She definitely did not make it herself. Her first child, Rebecca, was born on 25 Sept. 1976 (after she lived at Vega with Herman & Cornellia Aihara), and her second, Elizabeth, on 31 July 1978, about 3 months premature. She first sold her amazake cupcakes at the Haight Street fair one June in San Francisco, maybe 1979. Lots were sold at a store on Haight St. and Cole owned by a Chinese guy with a long black braid. Shiwa's Cupcakes came at least a year before the Shiwa's Cheesecake. Daughter Elizabeth was in a walker when she started the cheesecake. She thinks she was selling cupcakes to Yuki before David Rabinowitz started at Rising Sun. She is sure she was selling the cupcakes while David's wife Sharon was still alive (she was killed in an auto accident on 23 Jan. 1979) and before Elizabeth was born. Yuki was the main person to whom she sold the cupcakes.

Talk with Yuki Muramoto (Tel. 4125-822-4711). 1988. Nov. 9. He came to America from Japan in Jan. 1975, then started at Rising Sun on Judah St. in Sept. 1975. He agrees with Plotkin and Rabinowitz that no amazake was sold there before Sept. 1978. He remembers Shiwa's cupcakes.

Talk with Gail & Michael Percy (Tel. 415-669-7181). 1988. Nov. 9. Gail worked at Rising Sun from early-1977 until the middle of the year. Does not recall any amazake nor any Shiwa's cupcakes with amazake being sold there.

Note: REWARD! Soyfoods Center hereby offers a reward of $100 to the person who first provides the correct name of the person who made the amazake described in this orange leaflet.

4020. [Shurtleff, William; Aoyagi, Akiko]. 1979. Soyfoods buyer's guide [Tofu, tempeh and miso shops in the USA and Canada]. *Whole Foods* (*Berkeley, California*) 2(1):42-44. Jan.
• ***Summary:*** A listing of all companies in the USA and Canada, by food type, by state.

Note: This is also the earliest English-language publication (one of two in this issue) seen with the term "Soyfoods" in the title. Shurtleff and Aoyagi compiled this list and gave *Whole Foods* permission to use it free of charge. Address: P.O. Box 234, Lafayette, California 94549.

• ***Summary:*** If you want to be left alone, visit Fuji, a Japanese restaurant at 76 W. Lake St. "Take tea for two in one of three private tea houses..." "The sukiyaki features sliced beef, soy bean cake [tofu], bamboo shoots, fresh mushrooms, and assorted fresh vegetables prepared at your table and priced at $8.50."

4022. Rubenstein, Judith. 1979. Re: Standard of identity for tofu, and request for help in making tofu an accepted protein source for the Child Nutrition Programs of the USDA. Letter to Ms. Carol Tucker Foreman, Director, Child Nutrition Programs, USDA, Washington, DC, Feb. 9. 3 p. Typed, with signature on letterhead.
• ***Summary:*** This letter begins: "As both a parent of a school-aged child, and as an institutional consultant for the New England Soy Dairy, Inc., I am concerned that at the present time there is no standard of identity for tofu, and therefore, it cannot be used in any of the Child Nutrition Programs which the U.S.D.A. sponsors: The School Lunch Program, The Breakfast Program, and W.I.C."

Discusses tofu and argues that tofu should be included in these child nutrition programs, then asks for advice about the proper procedure for making an application for such inclusion.

This is the earliest document seen (Sept. 2000) concerning a standard of identity or standards for tofu. Address: Institutional Consultant, New England Soy Dairy, Inc., 305 Wells St., Greenfield, Massachusetts 01301. Phone: (413) 772-0746.

4023. Claiborne, Craig. 1979. Q & A: (Includes a question on tofu). *New York Times.* Feb. 14. p. C4. [1 ref]
• ***Summary:*** Question: "In this day and age when everyone is talking and, apparently, cooking Chinese, there are many

© Copyright Soyinfo Center 2013

recipes that call for bean curd or tofu. Is it possible to make this at home? Is there a book with instructions for making it?"

Answer: "The best, and I believe the only, book on the preparation of bean curd or tofu is 'The Book of Tofu, Food for Mankind,' by William Shurtleff and Akiko Aoyagi. It contains 500 recipes using bean curd, plus instructions for making it yourself. The publisher is Autumn Press, P.O. Box 469, Soquel, California 95073. I believe the book is available in many major bookstores." Address: Food Editor, New York Times.

• ***Summary:*** The New England Soy Dairy, which will use 500,000 pounds of soybeans in the coming year, has been trying to interest farmers closer to home in raising soybeans. Richard Leviton will be working with the Franklin County Agricultural Task Force to supply information about soybeans to area farmers. A photo shows Richard Leviton filling a bucket with soybeans. Address: Staff reporter.

4025. Leviton, Richard. 1979. Re: Your section on Advertising and Educational Activities. Letter to William Shurtleff at New-Age Foods Study Center, Feb. 26. 1 p. Typed, on letterhead.
• ***Summary:*** Ira thought this section was good. "Two areas that you might want to expand on are (3) Free Samples, and (8) Media Advertising." He elaborates on these points.

Note: The bottom ¼ of this letter has been cut off and is missing. Address: New England Soy Dairy, 305 Wells St., Greenfield, Massachusetts 01301. Phone: 413-772-0746, 773-3141.

4026. Klein, Barbara P. 1979. Re: Comments on tofu and soymilk production manuscript. Trypsin inhibitors. Letter to William Shurtleff at New-Age Foods Study Center, Lafayette, Feb. 28. 1 p. Typed, with signature on letterhead.
• ***Summary:*** It is still unclear whether trypsin inhibitors are important in human nutrition, and if the 80% inactivation which undoubtedly occurs during production of tofu and soymilk is adequate. She and co-workers have been doing some studies of trypsin inhibitor destruction in home cooked soybeans. The main objective is to determine if partially cooked ground soybeans can be satisfactorily incorporated into food products such as bread and meatloaves. Address: Asst. Prof., Foods and Nutrition, 274 Bevier Hall, College of Agriculture, Univ. of Illinois, Urbana, IL 61801. Phone: 217-333-3790.

4027. Sheridan, Margaret. 1979. Mighty bean zaps food bills, packs in protein. *Detroit News.* Feb. 28. p. E-1, E-9.
• ***Summary:*** A weak history of the soybean followed by recipes from the book *Barbara Farr's Super Soy* (Keats Publishing). The article begins: "Fed up with the soaring cost of meat? Dine like the cows. Eat soybeans. These homely beige beans have been nourishing livestock, peasants and dynasties for 5,000 years."

A great half-page illustration (cartoon), by John R. Clarey, shows Super Versatile Soy, a character like Superman with a bean-like body, a cape, and two thunderbolts in one hand. Address: News staff writer.

4028. Sheridan, Margaret. 1979. It's more like ricotta than feta; call it tofu. *Detroit News.* Feb. 28. p. E-1, E-8.
• ***Summary:*** An introduction to tofu, a brief interview with Dan Ecclestone and Sue Kalen of The Soy Plant ("Michigan's only soybean processing cooperative"), and some tofu recipes. "In appearance, tofu is a cross between cream cheese and ricotta with a similar taste." Address: News staff writer.

4029. Dominguez de Diez Gutiérrez, Blanca. 1979. Alimentacion integral para una vida plena: Los mil usos de la soya [Whole foods for a full life: The thousand uses of soya]. San Angel, Mexico: Editorial Posada. 232 p. Feb. Dedicated to Swami Pranavananda Saraswati. Illust. 21 cm. Series: Biblioteca Natura. [13 ref. Spa]
• ***Summary:*** Contents: Introduction. Satvic (pure) cookery and its contents. Part I: Food for the body. I. Transcendence. II. Satvic cookery (pure). 1. Balanced diet. III. What ingredients are necessary? Discusses whole grains, starting with a lengthy section on soya, plus 6 pages of nutritional tables. IV. How to start? (p. 71-140). Each of the following sections contains basic recipes and draws on *The Book of Tofu* by Shurtleff and Aoyagi. 1. Go (Fresh soy puree, *Masa de frijol de soya*). 2. Soymilk (*leche de soya*). 3. Tofu (*Cuajada de soya*). 4. Okara (*Sobrante* [*residue*] *de la masa de soya*). 5. Kinako (*Harina tostada de soya*), including soy coffee (*Soyafé–Cafe de soya*), soy nuts (*Soya–Nuez*), and whole dry soybeans (*Frijol de soya natural*). 6. Other soy products: Soy flour (*harina de soya*), soy chocolate (*choco soya*), soy oil (*aceite de soya*) are illustrated, but with no text.

V. What can be done with seeds? (p. 141-92) 1. Cereal grains, legumes, and oilseeds. Recipes–Pickles (Curtidos or encurtidos) and sauces in the style of the Hindu culinary art, to accompany dishes composed of cereals. 2. Sprouts (*Germinados*, p. 179-86, including *germinados de soya* = soy sprouts). 3. Coconuts. VI. Useful advice.

Part II: Food for the mind and spirit. Discusses the teachings of Swami Pranavananda Saraswati and yoga. A brief introduction to Swami Pranavananda and his world yoga mission.

Letter from Blanca. Though copyrighted in 1978, this book was not published (6,000 copies) until 1979. A second edition of 5,000 copies was published in Nov. 1979. Address: Mexico.

4030. *GOMF News* (*Oroville, California*). 1979. Nigari/Tofu quality. Feb. p. 4. *
Address: 1544 Oak St., Oroville, California.

4031. **Product Name:** Tofu.
Manufacturer's Name: Kirpalu Yoga Retreat.
Manufacturer's Address: Box 120, Summit Station, PA 17979. Phone: 717-754-3051.
Date of Introduction: 1979. February.
How Stored: Refrigerated.
New Product–Documentation: Letter from Chris Yorston, Kitchen Dep., Kirpalu Yoga Retreat. 1979. Feb. 20. They make tofu and soymilk on a community scale, and use the resulting okara to make okara tempeh.

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Chris Yorsten [Yorston].

4032. Takai Tofu & Soymilk Equipment Company. 1979. Takai catalog of large-scale equipment. 307 Inari, Nonoichi-machi, Ishikawa-ken 921, Japan. 6 p. Feb. 30 cm.
• ***Summary:*** This catalog is printed with green ink on glossy white paper. 29 photos in horizontal rectangular frames show the company's many pieces of equipment and systems for manufacturing tofu and soymilk. The catalog is divided into five sections: (1) Front page and introduction; (2) Basic tofu & soymilk equipment; (3) Deep-frying equipment and systems; (4) Whole systems; (5) Ingredients & literature. For more information, contact Wataru Takai.

Letter (fax) from Wataru Takai. 1996. Aug. 2. Takai's records show that their green catalog of large-scale equipment was printed in Feb. 1979. Address: Ishikawa-ken, Japan. Phone: (0762) 48-1355-59.

4033. Yao, M.Y.; Peng, A.C. 1979. New chemical coagulant for making soybean curd. *Ohio Report on Research and Development* 64(1):11. Jan/Feb.
• ***Summary:*** Compares GDL (Glucono delta-lactone) with gypsum (calcium sulfate). Address: Ohio Agricultural Research and Development Center, Ohio State Univ., Columbus, Ohio.

4034. Gordon, Ralph. 1979. "Soy dairy" urges Pioneer Valley farmers to produce [soy] beans. *Morning Union* (*The*) (*Springfield, Massachusetts*). March 2. p. 11, 26.
• ***Summary:*** The New England Soy Dairy expects to use 750,000 pounds of soybeans this year and 1,000,000 pounds in 1980. The company, which (up until now) has had to buy all its soybeans from the Midwest, would like to be able to obtain them from farmers in Franklin County, or anywhere in the Pioneer Valley, even as far south as Springfield, where the growing season is about 10 days longer (120 days). The last large crop of soybeans in New England was grown in Connecticut about 20 years ago, according to Richard Leviton who is supervising the local soybean production project. The Soy Dairy uses only organically grown soybeans from fields treated that way for 3 years.

4035. Flower Dragon. 1979. A very special menu (Ad). *New York Times.* March 11. p. WC2.
• ***Summary:*** "The Flower Dragon announces Chef Lau of Hong Kong who devised our popular Chinese New Year Feast has been invited to extend his stay and has prepared for you A Very Special Menu."

The menu is given. Appetizers include: "Lobster on bean curd sheet." Entrees include: Succulent pig with aromatic soy bean." Call for reservations. $15 per person.

Note: This "bean curd sheet" is probably what we call a "pressed tofu sheet." Address: Route 128, Armonk, New York–only 7 minutes from White Plains on I-64.

4036. Tofu Shop (The). 1979. By-laws. Telluride, Colorado. 4 p. 28 cm.
• ***Summary:*** Article I. Identity and purpose. II. Divisions. III. Definition of a worker. IV. Definition of an owner. V. Worker meetings and worker council. VI. Owner meetings and owner council. VI. Managers. VII. Managers. VIII. Amendments (4). IX. Dissolution.

"These By-laws and the above Amendments were approved at a meeting of all Tofu Shop workers on March 11, 1979 in Telluride, Colorado.

"Article I. Identity and purpose. The name of this organization is the Tofu Shop. It is a profit-making, worker-owned business existing to develop self-sufficient food systems on the local community level; and to grow, process and distribute organic, pure and unadulterated foods of the highest quality." Address: 116 N. Oak St., P.O. Box 69, Telluride, Colorado 81435.

4037. Davis, Melissa. 1979. The soy of cooking: Out of the field, into the kitchen. *Washington Post.* March 15. p. E1, E14, E20.
• ***Summary:*** Starts by discussing Henry Ford's interest in and work with soybeans. He wanted to find a way to "grow automobiles out of the soil. In 1940 he discovered that soybeans were his bumper crop."

Last week a milestone in soybean history was made on Capitol Hill [Washington, DC]. "About 500 people including senators, representatives, ambassadors, diplomats and freeloaders turned up at the International Soybean Fair.

While Chai Zemin (of the People's Republic of China) and Bob Bergland (U.S. Secretary of Agriculture) stood shaking hands, people pushed and shoved to get to the bar and to hors d'oeuvres made from every soybean product imaginable–soy flour, bean curd, textured vegetable protein (TVP), soy milk, soy sauce, etc. Also mentions tempeh and miso.

© Copyright Soyinfo Center 2013

The event was largely sponsored by the Food Protein Council and its member companies. "There were a few interesting hors d'oeuvres including soy nuts and garlic smothered bean curd." Contains recipes.

4038. Foreman, Carol Tucker. 1979. Re: The use of tofu in the child nutrition programs. Letter to Ms. Judith Rubenstein, Institutional Consultant, New England Soy Dairy, Inc., 305 Wells St., Greenfield, MA 01301, March 16. 2 p. Typed, with signature on letterhead.
• ***Summary:*** "Schools participating in a child nutrition program, such as the School Lunch Program or School Breakfast Program agree to serve meals meeting specific requirements established by the U.S. Department of Agriculture." The requirements for the Type A Pattern are explained as an example. Tofu is not authorized in this pattern, and "does not appear to be a usable food alternative." "As you know, tofu has no Standard of Identity or any other standard to enable the Food and Nutrition Service to use it in its program. The U.S. Food and Drug Administration (FDA) is the agency that writes Standards of Identity. The initial step in obtaining a Standard of Identity is to petition FDA..." Their address in Washington, DC, is given. Address: Asst. Secretary of Food and Consumer Services, USDA, Washington, DC 20250.

4039. Mallory, Margaret. 1979. Tofu enriches with or without Zen Buddhism. *Oakland Tribune.* March 21. p. 1F, 12. Reprinted in Nichibei Times. 1979. May 30. p. 2, as "American Couple Updates Book on Uses of Tofu." [1 ref]
• ***Summary:*** A brief history of the work of William and Akiko Shurtleff with tofu, and the new Ballantine mass-market edition of their Book of Tofu. Address: California.

4040. Schecter, Andy. 1979. Re: Tempeh at Northern Soy. Letter to William Shurtleff at New-Age Foods Study Center, March 31. 1 p. Typed, with signature. [1 ref]
• ***Summary:*** In 13 steps describes the process for making tempeh at Northern Soy in perforated Ziploc bags.

A handwritten notes at the end states: "Here is our tempeh process. We're doing some experimentation with starter production, which is not exactly trouble-free at this point. Tried your 'sporulated inoculated soybean method' but must have left it in incubator too long 'cause it started to smell like ammonia. Will try again. Pics [pictures = photos] to follow as soon as we can get them processed. Best wishes, Andy." Address: The Tofu Shop, 277 N. Goodman St., Rochester, New York 14607. Phone: 716-442-1213.

4041. *Ann Arbor Observer* (*Michigan*). 1979. One of the few U.S. tofu manufacturers is right here in Ann Arbor: At the Soy Plant on Ann Street a collectively-run business combines political and nutritional interests to produce over 2000 pounds of soybean curd weekly. March. p. 29. [1 ref]
• ***Summary:*** This February morning Steve Fierling [sic, Fiering] arrives at The Soy Plant at 5 a.m. to start the day's work in the back room of the former pizza carryout at 211 East Ann St. in Ann Arbor. He turns on the lights and the boiler, then starts cooking soy milk for the first batch of tofu. Fiering is part of a nine-member collective; this week he's the cooker. The first batch of tofu should be ready by 7 a.m. Making tofu is a demanding discipline. Fiering, Sue Kalen, Chris Coon, and Al Dynak were the original founders of The Soy Plant one and a half years ago. Steve originally came from Camden, New Jersey, to the University of Michigan, where he majored in geology and, as he puts it, "minored in extracurricular political activism." Politics led to a job as coordinator of the People's Food Co-op, and that led to helping to start The Soy Plant. The Soy Plant is one of the few places in America where people can buy fresh tofu daily. A low-cost vegetable source of protein, retails for $0.70/lb in the consumer's tub or $0.85 in a plastic tub.

Henry Ford was deeply interested in soybeans. He believed that "mechanized soybean production would help free the farmer from the drudgery of dealing with animals by eliminating the need for most meat... In fact his large demonstration soybean farm was near Macon, south of Saline, in Lenawee County." Tofu can become an economical vegetarian alternative to ground beef.

The company began as the Tofu Collective, a Sundays only operation at Wildflour Community Bakery around the corner on North Fourth Avenue. A few months later, in the summer of 1977, the name was changed to The Soy Plant, and the collective moved into the basement of Eden Foods, where it attempted to produce tofu to sell wholesale. Fiering recalls that the early days were *really* hard. They used to work 14-16 hours a day. But the hard work paid off. By last spring The Soy Plant had the track record and credibility to be able to raise $10,000 in loans to purchase more efficient equipment and move into larger quarters at its present location on Ann Street near Fourth.

For each $100 loan, supporters were compensated with an unusual but sensible kind of interest: a pound of tofu each week, which yields a 35% annual return. Backers included both typical co-op supporters and quite a few native Asians eager to find a local source of fresh tofu.

Members of the collective now earn $3.25 an hour–a big increase over the $50 a week that they were paid in the beginning. But that cheap labor was the capital that got the business started. Current members of the collective are Fiering, Sue Kalen, Dan Ecclestone, Anne Elder, Kurt Getman, George Hanley, Mike Mazzie, Jerry McKenna [sic, MacKinnon], and Ann Wilson.

The Soy Plant makes its tofu in 50-pound batches. Of the more than 2,000 lb of tofu it makes each week, about 350 lb are sold at The Soy Plant retail store, where soy milk, soy byproducts, and prepared soy foods like sandwich spreads, missing egg salad, soysage, and pies are also sold. Another

© Copyright Soyinfo Center 2013

1,700 lb/week of tofu goes to local restaurants, retail stores (incl. Meijer's Thrifty Acres, Asian-, and natural food stores), and to Midwest Natural Foods, which distributes the tofu to as far away as Pennsylvania and West Virginia.

Soy Plant workers have strong political motivations. They believe that soy products can help to solve world food problems. Fiering, a decentralist, talks about his personal beliefs. An excellent introduction to tofu is the 15-cent pamphlet titled "What is tofu?" available at The Soy Plant. It contains ten popular recipes plus basic information. "For the truly committed, there's the encyclopaedic *Book of Tofu: Food for Mankind* by William Shurtleff and Akiko Aoyagi." Shurtleff "has been the tofu guru for America in the 1970s, and this book has inspired and instructed most of the country's approximately fifty tofu shops operated by non-Asians."

A sidebar titled "Take-out tofu treats" mentions the following made and sold at The Soy Plant: Tofu-tahini spread. Tempeh–which resembles Brie cheese in texture and flavor. Tofu tarts in several flavors: pecan cream, pumpkin cream, yam, mocha, and lemon.

Photos by Peter Yates show: (1) Anne Elder adding soy puree to boiling water in the cooking kettle to make a foamy brew that is eventually curded to become tofu. (2) Steve Fiering filling one-pound tofu retail packages (in a bathtub) with water from a hose before shipping. Address: Ann Arbor, Michigan.

4042. Hundley, Kris. 1979. New England's tofu factory. *In Business.* March. p. 40-43. Premier Issue.
• ***Summary:*** Once called the Laughing Grasshopper, the New England Soy Dairy is now producing 10,000 pounds of tofu a week and anticipating year-end gross sales of $250,000. Photos show: (1) Aproned Kathleen Leviton lifting tofu from a large pressing box into a tray of cold water. (2) Tofu being pressed mechanically in perforated metal boxes. (3) A worker standing with lifted hand beside a grinder. "The entire process, from soaked soybeans to tofu, requires three people and takes 10 minutes. One pound of soybeans yields about 2½ pounds of tofu."

4043. *Industry* (*Massachusetts*). 1979. Oriental staple from Greenfield. 44(3):66-70. March.
• ***Summary:*** "The New England Soy Dairy started business in 1976 as an under-capitalized cottage industry with 3 partners. Today it is a corporation with 23 employees and with project gross sales of $300,000." It makes nearly 3,000 lb/day of tofu. Three photos show tofu being made at the Soy Dairy.

4044. **Product Name:** French-Style Soyannaise (Eggless & Sugarless Tofu Mayonnaise).
Manufacturer's Name: Nasoya Foods.
Manufacturer's Address: Mechanic St. Ext. (P.O. Box 841), Leominster, MA 01453.
Date of Introduction: 1979. March.
Ingredients: Tofu, unrefined safflower oil, wood-aged organic apple cider vinegar, honey natural spices, sea salt.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Refrigerated.
New Product–Documentation: Label. 1982. 3.75 inches diameter. Red and blue on white. "Use as you would mayonnaise–but so much better! No Preservatives. No Eggs. No Sugar." Letter from John Paino. 1982. April 17. Gives starting date. Spot in Soyfoods. 1983. Summer. p. 52. "Nasoya Restyles Tofu Dips. The line of 5 spreads and salads, introduced in December 1979, was restyled and repackaged in December 1982." 1984. Summer. p. 43. "Nasoya's Vegi Dips."

4045. New England Soy Dairy, Inc. 1979. New York product and price list. March 19, 1979. 305 Wells St., Greenfield, MA 01301. 2 p.
• ***Summary:*** Products include bulk tofu and packaged tofu (both regular and firm), Soymayo, Light Lunches (Muenster and Sprouts, Sesame Cheddar, Tofu-Fried Mushrooms, Tofu and Olives, each 6 oz.), and Greek Spinach Pie (Spanakopita). "Packaged Soy Dairy Tofu now has recipes on the label. There are four different labels with two recipes each." Address: Greenfield, Massachusetts.

4046. **Product Name:** Tempeh.
Manufacturer's Name: Northern Soy.
Manufacturer's Address: 277 N. Goodman St. Rochester, NY 14607. Phone: 716-442-1213.
Date of Introduction: 1979. March.
New Product–Documentation: Letter from Andy Schecter on stationery with no letterhead. 1979. March 31. "Tempeh at Northern Soy." A 1-page description of how the company makes tempeh in perforated Ziploc bags.

Letter from Andy Schecter on The Tofu Shop letterhead. 1979. May 26. Seven small photos show the company's tempeh-making process and equipment: (1) Cooking soybeans with steam. (2) Cooling cooked beans on a table. (3) Mixing in starter in plastic buckets. (4) Bagging and flattening inoculated soybeans. Tofu is being made in the background. (5) Placing screen trays loaded with bagged tempeh into the incubator. (6) Tempeh (and starter in Petri dishes) in the incubator. (7). Front of incubator. Soyfoods Center Computerized Mailing List. 1981. Jan. 22. Address listed as 30 Somerton St., Rochester, New York 14607.

4047. **Product Name:** Tofu.
Manufacturer's Name: Ohio Miso Co.
Manufacturer's Address: Route 2, Monroeville, OH 44847.
Date of Introduction: 1979. March.
New Product–Documentation: Soycraft. 1979. Summer.

© Copyright Soyinfo Center 2013

p. 30. "Monroeville, Ohio: Ohio Miso Company." To supplement their miso business, Thom Leonard and Richard Kluding produce between twenty and fifty pounds of tofu every week.

4048. *Plenty News* (*Summertown, Tennessee*). 1979. Soybean project in Guatemala highlands. 1(2):1-3. March.
• ***Summary:*** Plenty was incorporated on 4 Oct. 1974 in the State of Tennessee as a non-profit relief and development corporation. In Solola, Guatemala, Plenty will "be setting up a village-scale soy dairy to produce 100 pounds of tofu and 40 gallons of soy ice bean (ice cream made from soymilk) three times a week. The dairy will supply free ice bean for local school lunch programs. It is intended that the dairy will produce low-cost, high-protein foods and become a local cottage industry, run by indigenous people of Solola. This project is co-sponsored by the NGO Division of the Canadian International Development Agency [CIDA] as phase one of an Integrated Development Project..." Some 1,500 pounds of soybeans have been donated by UNICEF. Suzy Jenkins is one of the soyfood teachers.

"In cooperation with UNICEF and the International Soybean Program (INTSOY), Plenty has screened 20 varieties of soybeans, determining which ones would grow at 6,000 feet in the Guatemalan highlands... The beans were successful, yielding up to 40 bushels per acre. Approximately 100 farmers from San Andreas Itzapa and neighboring towns will be planting trial patches of soybeans in their own fields this coming spring. Plenty will supply them with the seed of the best-performing varieties."

Contains many purple photos of soybeans and soyfoods in Guatemala, including: Suzy Jenkins carrying water in a pot on her head for a soymilk demonstration. A Guatemalan man standing waist-deep in a field of soybeans with a bearded Farm member looking on, smiling. Guatemalan women crushing soybeans in a metate, filtering out soymilk using a cloth sack, then drinking the soymilk. A little girl drinking soymilk from a big cup. Planting soybeans. Amaranth plants.

Note 1. This is the earliest document seen (April 2004) that mentions Solola, Guatemala, in connection with soy.

Note: This is the earliest document seen (Jan. 2003) concerning Plenty Canada. Address: 156 Drakes Lane, Summertown, Tennessee.

4049. *Plenty News* (*Summertown, Tennessee*). 1979. Plenty-Video. 1(2):7. March.
• ***Summary:*** "The Plenty-Video crew recently returned from Guatemala with a video report of Plenty's Guatemala project. It includes beautiful color footage of village tofu making, life of the native people, and reconstruction work Plenty has completed in the highlands. We are producing a half-hour program suitable for rebroadcast or home use."

This video is available for sale or rental. For further information (price, format) write Plenty-Video, 156 Drakes Lane, Summertown, Tennessee 38483.

Note: This is the earliest document seen (Feb. 2002) that mentions a video about soy. Address: 156 Drakes Lane, Summertown, Tennessee.

4050. Tofu Shop (The). 1979. Traditional vegetarian cuisine (Ad). *Telluride Times.* March.
• ***Summary:*** Features a large illustration of a dragon and "Traditional vegetarian cuisine" as part of the company logo. States: "Menus from different nationalities every night. Whatever you're in the mood for, we can probably help you out. Thurs. 3/15 [Thursday, March 15]. Tofu Turkey, Vegetable stuffing, baked potatoes, fruit salad. Note: The Tofu Shop in Telluride is now selling "Tofu Turkey" commercially, with all the trimmings–even though it was out of season.

Fri. 3/16. Pizza, Minestrone soup, Tossed green salad.

Sat. 3/17. Ganmo (Mock Goose), Stir-fried vegetables, miso soup, etc.

"Dine in or phone ahead for takeout (728-9940). Open Mon.–Sat. 11 a.m. to 9:30 p.m. Closed Sundays."

Note: Unfortunately the exact date and page of this ad are unknown, but it was shortly before March 15. Address: 116 N. Oak–on the Sheridan Mall–Telluride, Colorado.

4051. **Product Name:** Tofu Pies (Carob, Cocoa, Peanut Butter).
Manufacturer's Name: Yellow Bean Vegetarian Foods.
Manufacturer's Address: 15309 Mack Ave., Detroit, MI 48224.
Date of Introduction: 1979. March.
New Product–Documentation: Interview with Tim Huang. 1981. April 9.

4052. **Product Name:** Tofu Salad (Bulk).
Manufacturer's Name: Yellow Bean Vegetarian Foods.
Manufacturer's Address: 15309 Mack Ave., Detroit, MI 48224.
Date of Introduction: 1979. March.
New Product–Documentation: Interview with Tim Huang. 1981. April 9.

4053. Dwan, Lois. 1979. Where the 'Mandarin' is master. *Los Angeles Times.* April 8. p. N98.
• ***Summary:*** This is a restaurant review of Lotus West, 10974 W. Pico Blvd., West Los Angeles–one of an estimated 1,000 Chinese restaurants in Los Angeles County. For dessert the writer enjoyed "squares of beancurd [tofu] and litchis in cold almond syrup and... a small, flaky delicate pastry filled with sweet bean paste" [probably *an*, made with azuki beans].

In another dish, "Beancurd was steamed and flattened, rolled like a jelly roll around back mushrooms."

"Dinner was climaxed with eight-precious duck... It had

© Copyright Soyinfo Center 2013

been wrapped in cabbage leaves, in beancurd skin [yuba], in foil and then in clay, baked for 7 hours."

4054. Bulkeley, William M. 1979. Good old bean curd is suddenly popular, but you call it tofu: Longtime food of the Orient now is providing protein to American vegetarians. *Wall Street Journal* 100(72):1, 31. April 12. Eastern ed.; p. 1, 27. Western ed.
• ***Summary:*** This front-page story focuses on the New England Soy Dairy of Greenfield, Massachusetts. Sales of tofu in America are climbing sharply. "'We project a 25% to 30% annual growth with virtually no promotion,' says a spokesman for Quong Hop & Co., a South San Francisco firm that has been making tofu since 1906. Tofu is showing up in 'health foods' and on vegetarian menus; even non-Oriental Americans are making it commercially and developing ways to use it in Western dishes. It is available mainly at health-food stores and restaurants and at grocery stores operated by Chinese- or Korean-Americans. An occasional supermarket carries it.

"Another yogurt? Tofu's rising popularity in the U.S. results partly from the increase in the Oriental population on the East and West Coasts, but much of the demand for it is clearly coming from non-Orientals... 'Our sales are increasing because a lot of people are learning to eat tofu for health reasons,' says Shizuko Yamauchi, wife of the owner of Matsuda-Hinode Tofu Co. of Los Angeles, the nation's biggest tofu maker, with estimated production of 10 tons daily. Mrs. Yamauchi won't disclose figures..."

100 grams (3.2 oz) of regular fried tofu contains about 18% of the recommended daily protein allowance for an adult, and only 150 calories, according to the USDA.

"The tofu produced by New England Soy Dairy sells for between 69 cents and 99 cents a pound at most outlets. Hamburger these days costs an average of $1.60 a pound... Its popularity as a health food developed after the January 1976 publication of 'The Book of Tofu,' a volume that fanciers describe reverently as 'a seminal work.' The book sold 65,000 copies and has recently been condensed and reissued as a mass-market paperback by Ballantine Books. It lists hundreds of recipes for making vegetarian dishes with tofu and gives instructions for starting a tofu-making shop. The book inspired entrepreneurs to set up tofu shops...

"New England Soy Dairy now turns out nine tons of tofu a week, up from 500 pounds a week two years ago. It expects revenue of more then $750,000 this year. Mr. Leviton [Richard started the predecessor of the company with his wife two years ago], who like many tofu fans has an almost evangelical zeal for the product, now is starting a trade magazine and is working to organize a trade group, the Soycrafters Association of North America." Address: Staff reporter.

4055. Finast. 1979. The new Finast: You'll like the difference (Ad). *Hartford Courant* (*Connecticut*). April 15. p. 80.
• ***Summary:*** "Stir fry cooking features!... Tofu bean cake. New England Soy Dairy 79¢ lb. Tofu is a versatile, high protein soy food. It can be used fried, stewed or baked. Free recipes available in our produce dept. We'll have Tofu demonstrations in the following stores–10 a.m. till 4 p.m." Lists the name and address of two stores (Enfield and Hadley, each for two days).

4056. Rackis, J.J. 1979. Re: Cooking time required to inactivate trypsin inhibitors when making tofu. Letter to William Shurtleff at New-Age Foods Study Center, April 24. 2 p. Typed, with signature on letterhead. [1 ref]
• ***Summary:*** "The rate of destruction of TI is dependent upon time, temperature, pressure, and initial moisture levels prior to heat treatment. Particle size is also an important factor... It would be generally true that once the temperature of a slurry of soybeans reached 100ºC, at least 80% of the TI activity would most likely be destroyed. However, in order to provide a safety margin because of the factors cited above, recommendations call for a longer cook. In thin flakes, 90% of the TI activity can be inactivated in only 20 minutes of cooking."

"Soybean meal is toasted prior to feeding cattle in order to destroy urease activity. This is necessary because urea is often added to cattle rations and low urease activity is required to prevent conversion of urea into ammonia. Rapid release of ammonia from urea can cause toxicity in cattle." Address: Research Chemist, Oilseed Crops Lab., NRRC, 1815 N. University St., Peoria, Illinois 61604.

4057. Shurtleff, William. 1979. Notes on visit to Quong Hop & Co. tofu factory in South San Francisco. Lafayette, California: New-Age Foods Study Center. 1 p. Unpublished typescript. April 26.
• ***Summary:*** Quong Hop is the leading (and perhaps the only) manufacturer of fermented tofu in North America. We were allowed to study and photograph the process in detail, and all our questions were answered. The entire process is described, with illustrations, in *Tofu & Soymilk Production*, by Shurtleff & Aoyagi (1979) in the Chapter 16 titled "Fermented tofu" (p. 283-86). Taken that day, photos show: (1) A man standing next to rolling rack of skewered inoculated tofu cubes, which are about to be incubated. (2) Pouring brining liquor over mold-covered tofu cubes packed into empty glass jars. (3) A close-up view of the previous view showing labels of the two different types of fermented tofu made by Quong Hop & Co.–Bean Cake (*Fu-Yu*) and Pepper Bean Cake (with hot chili flakes in the brining liquor). (4) A sample of well-molded tofu cubes.

Also describes the process and equipment used by the company to make tofu. The soybeans are ground in a Rietz disintegrator. The whole system is run by a control panel from Japan. "You *must* have an in-house repairman for

© Copyright Soyinfo Center 2013

the control panel says owner Stanley Lee. From the slurry tank, the slurry is pumped into a two-chamber continuous cooker. The slurry fills the chambers and cooked slurry exits by overflowing. It works well. The cooked slurry is then pumped onto a vibrating screen and down into the Brown soymilk extractor. The soymilk from the screen is run directly into a huge steam-jacketed holding tank. The soymilk extracted by the Brown is run back into the slurry tank. Curding is done in barrels. Pneumatic pressers are used to press the curds into tofu. Vacuum packaging with a Multivac vacuum packager. Then pre-weighed labels are applied with a Hobart. But the labels are too small and unattractive; need two labels per package.

Tofu burgers: Run through three-patty former. Arrange on trays. Deep fry on screens in batch oil fryer. Slow. They have an oven for Savory Baked Tofu, which is pre-dipped in hot teriyaki sauce mixture. Address: Lafayette, California 94549. Phone: 283-3161.

4058. Shurtleff, William. 1979. Re: Request for clarification and additional information on making tempeh at Northern Soy. Letter to Andy Schecter at Northern Soy in Rochester, New York, April 29. 1 p. Typed, without signature (carbon copy). [1 ref]

• ***Summary:*** Shurtleff thanks Andy for his letter of March 31, asks him to check Shurtleff's rewritten description for the book *Tempeh Production*, then asks 7 questions with space after each for a response. Andy's handwritten responses are included.

Shurtleff's typewritten P.S. adds: *"Tofu & Soymilk Production* went to the printers last week. We hope to have it ready by the SANA conference. 320 pages." Andy's handwritten note at the end: "Keep up the good work, Bill! We're real interested in *The Book of Tempeh* [not yet published]–especially a pocket size edition will help us to get sales going." Address: New-age Foods Study Center, P.O. Box 234, Lafayette, California 94549.

4059. Banzon, Julian A.; Escueta, Elias E. 1979. Progress in the technology of soymilk production. In: Hideo Chiba, et al., eds. 1979. Proceedings of the Fifth International Congress of Food Science and Technology (1978-Kyoto). Tokyo: Kodansha Ltd.; Amsterdam and New York: Elsevier Scientific Publishing Co. xi + 436 p. See Chapter 2.2, p. 74-78. Illust. Author index. Subject index. 26 cm. Series: Developments in Food Science, Vol. 2. [12 ref]

• ***Summary:*** Contents: Introduction. Progress in processing. Progress in increasing acceptability. Nutritional improvement. Soybean varieties. Customer presentation. Philippine experience in soymilk production (3-year history). Simplified soymilk production. Calculation methods.

"CDCP, a construction group involved in a variety of ventures, entered into a contract with the Food Science/ Technology Department of U.P. Los Banos, to produce PHILSOY, using the latter's 600 bottle/day pilot plant. PHILSOY was well received and production reached 3500 bottles/day. The retail price was kept below a competing skim milk chocolate-flavored beverage, and at about the same price as the better soft drinks. After about 3 years of operation, the venture stopped due to breakdown of the processing equipment which had been made to run at 3500 bottles/day even though it was designed for only 600 bottles/ day. Acquisition of additional equipment was imperative but the contracting parties failed to make a decision. The CDCP experience proved that soymilk production can be profitable in the Philippines. The need for a nutritious beverage is in the hinterlands where transporting a bottled product from a distant processor is expensive. The buying power is low, so that the unit price must also be low. The most expensive step is in-bottle sterilization. A cheaper system lies in serving soymilk "on draught", and prepared locally as a "home brew", a system not uncommon in the villages. Unsold soymilk can be converted to tofu, and the soy press-cake [okara] can be used as an ingredient of the locally made rice cakes (puto)."

Tables show: (1) Nutrient recoveries from different soybean varieties and processing methods (incl. Clark, Bragg, Hsi-Hsi. Protein recovery ranged from 95% to 71.8%. Solids recovery ranged from 89% to 42.2%). (2) Composition of seven soymilks. Address: Dep. of Food Science and Technology, Univ. of the Philippines, Los Baños College, Laguna, The Philippines.

4060. Duienga, Suzanne; Duienga, William. 1979. The Soy Plant. *Beansprout Flyer and Pocket Reader: Grand Rapids Food Co-op Newsletter* 2(3): April.

• ***Summary:*** "A current personal interest in soybeans combined with a concern about the high price of tofu at the coop led us to visit the Soy Plant in Ann Arbor. What we found was not a 'plant' or a factory at all, but a downhome group of people with a genuine interest in their work.

"Steve Fiering, the man who first envisioned the Soy Plant, stopped his work to show us around the shop and talk with us about his experiences and his soybean philosophy.

"When asked why Soy Plant tofu costs so much, Steve gave us some pretty impressive reasons. First of all the soybeans that the Plant uses are organic. Secondly, Steve values the people with whom he works and so wages ($4.00 per hour) reflect this. Lastly and most importantly, the Soy Plant is the first of its kind in this area. As with all first, 'We make mistakes and they cost money.'" Steve made much of the machinery in the shop himself.

"The Soy Plant already has a large line of delicious soy products (all personally sampled and 'wholestomachally' approved of), including soysage, tempeh, soymilk, brown bread, sweet white miso, spiced tofu, spreads, tofu pies, and okara peanut butter balls. Free samples of the delectable spreads are available on the counter.

© Copyright Soyinfo Center 2013

"During the visit our basic curiosity evolved into true inspiration. The Plant is a living, breathing, organically growing example of how a cooperative group of people can come together and make something happen. The place truly is a center of learning, staffed by people eager to share their newly found knowledge about the creating of this very old food.

"Do you often wonder what to make with this nutritious but strange stuff called tofu? Here are some delightful recipes:" The recipes, from *The Book of Tofu* by Shurtleff and Aoyagi, are for Tofu-nut butter spread or topping, and Banana-tofu milkshake. Address: Michigan.

4061. **Product Name:** Tofu Salad.
Manufacturer's Name: Garden of Eatin' (Distributor). Made in San Francisco by Farm Foods.
Manufacturer's Address: 5300 Santa Monica Blvd., Los Angeles, CA 90029.
Date of Introduction: 1979. April.
New Product–Documentation: Interview with Al Jacobson. 1981. April 13. His invoices show that he first started distributing Farm Foods Tofu Salad on April 3, to just a few stores.

4062. Jack, Alex. 1979. The taste of America: Our changing diet. *East West Journal* 10(4):46-61. April. [24 ref]
• ***Summary:*** This is a macrobiotic view of the changing American diet. Contents: Modern dietary trends. The rise of the standard diet. Food origins: Meat-centered, traditional, vegetarian. Food changes: 1910-1976 (percentage change). The effects of meat and dairy. Effects of sugar and spice. The limits of modern nutrition. The rise of vegetarianism: Adolf Hitler [in Germany], Mohandas Gandhi [in India]. You are what your grandparents ate. Popular health foods: Honey, yogurt, herb teas. The traditional diet of humans. Seven levels of eating. The future diet of humanity.

"Underlying nearly all modern dietary trends is a shift from meals centered around animal products toward ones derived from plant sources. According to a 1978 Roper Poll, 7 million Americans over age 18 do not eat any meat and 37 million more are cautious about how much meat they consume. Another 44% regard a reduction of meat consumption as healthy." In all, nearly 50% of Americans are concerned about meat and the standard American diet. Then lists 12 signs of a major shift in our attitudes toward meat and dairy products; No. 10 incl. "the rising popularity of soy products such as miso, tofu, and tempeh as alternative protein sources to meat." Address: [Boston, Massachusetts].

• ***Summary:*** Compiled for the Loma Linda Market and its patrons. Contents: Introduction (from *Japanese Country Cookbook*). Nutritional composition. Recipes–Appetizers and dips. Dressings and spreads. Entrees. Vegetables. Recipes taken from: *Laurel's Kitchen, The Book of Tofu, The Farm Vegetarian Cookbook.* A simple black on white booklet, saddle stitched. Address: Loma Linda, California.

4065. Obis, Clare Barrett. 1979. Bill Shurtleff: The Johnny Appleseed of tofu. *Vegetarian Times* No. 30. March/April. p. 43-46. [1 ref]
• ***Summary:*** This interview, conducted in early Aug. 1978, discusses the work that Shurtleff and Aoyagi have been doing with soyfoods and world hunger since publication of *The Book of Tofu* in Dec. 1975. Contains 3 photos of Shurtleff.

4066. **Product Name:** Tofu.
Manufacturer's Name: Soy Bean Factory (The).
Manufacturer's Address: 56 Sophia St., 1st Floor, Surrey

© Copyright Soyinfo Center 2013

Hills, NSW, Australia.
Date of Introduction: 1979. April.
New Product–Documentation: Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 400. Owners: Marcea Newman and Yoshiko Wright.

Fenwick & Oakenfull. 1981. (Manuscript received 19 May 1980). Tofu was received from The Soy Bean Factory, Surrey Hills, New South Wales. Soyfoods Center Computerized Mailing List. 1981. Jan. 22. Owner: Marcea Weber & Yoshiko Wright.

Martha Wagner. 1981. Soyfoods. Summer, p. 11. "Soy down under." "Marcea Weber owns The Soybean Factory located just outside of Sydney, Australia... Marcea, originally from New York, began her tofu business three years ago, about a year after arriving in Australia from England..."

Letter from Ken Alexander of Daylesford, Australia. 1982. Oct. 21. Marcea Weber is working on a small scale in Sydney for a relatively "innocent" market.

Letter from Marcea Newman Weber. 1995. Feb. 12. "The Soy Bean Factory was established in Dec. 1978, when Michael De Campo, Yoshiko Wright and Marcea Weber started a company devoted to producing traditional Japanese tofu using nigari (a sea water extract) as a coagulating agent. The fresh Japanese-style tofu began to arrive in the health food stores and Japanese supermarkets around April 1979." See this letter for a history of the company. Marcea thinks (but is not sure) that the name was originally spelled "Soy Bean Factory." She would guess that they first started to make and sell tofu in about March or April of 1979. Tofu was the only product they ever made commercially. The owners were Marcea Weber, Michael De Campo, and Yoshiko Wright.

4067. S.W. 1979. Japan via Italy . . . tofu casserole. *Sunset* (*Menlo Park, California*). April. p. 214. Central edition.
• ***Summary:*** "Versatile tofu combines with vegetables, mozzarella cheese, and Italian seasonings to make a substantial meatless casserole with a taste rather like lasagna. Glazed with soy sauce and honey, the tofu acquires a pungent meaty flavor when fried." Gives a recipe for Tofu Vegetable Casserole [with tomato sauce]. Address: Makawao, Hawaii.

4068. Tofu Shop (The). 1979. Workshops in tofu-making on the community level (Portfolio). Telluride, Colorado. Eight inserts. 28 cm.
• ***Summary:*** Rather than being a typical portfolio, with many inserts, that all arrive at one time, this is a collection of eight documents all related to a common theme.

(1) "Workshops in community level tofu-making: Beginning in April 1977, the Tofu Shop of Telluride, Colorado, is making available to interested groups and communities training workshops in tofu-making on the community level. Topics to be covered in these workshops will include: The process of tofu-making. Setting up shop. Other soy products. Marketing. Financing and fundraising. Bookkeeping and record keeping. Restaurants and delis, Nutritional info. Community education. The community food chain. The personal benefits. Inner-shop organization. Contacts and resources.

"Workshops are led by members of the Telluride Tofu Shop and may include an experience in tofu-making... Apprenticeships–The Telluride Tofu Shop also has a limited number of openings for workers / owners in its restaurant and wholesale business. A one year time commitment is required."

(2) "Dear ___: The Telluride Tofu Shop was born in October, 1977, when we moved into our small, unfurnished shop with a meager one-thousand dollars capital and began making tofu. Now in April, 1979, twelve of us operate a growing restaurant and wholesale food business with annual sales approaching fifty-thousand dollars annually. What happened during this period is something we want to share with other communities and groups of interested people." So we are offering a workshop in "How to Start a Community Tofu Shop." (3) "The community level tofu shop and the local food chain." A complex circular diagram shows many complex relationships.

(4) "Supplies and information for community level tofu-making." Lists five key organizations: (a) Soycrafters Association of North America (SANA; Greenfield, Massachusetts, Richard Leviton). (b) New-Age Foods Study Center (Lafayette, California; Books, brochures, tofu-making materials, slides, tapes, general info.). (c) Bean Machines Inc. (Bodega, California; Larry Needleman. Tofu-making equipment from Japan). (d) Farm Foods (Summertown, Tennessee. Attn. soydairy; tempeh starters, tvp, cookbook, general info.). (e) Westbrae Natural Foods (Emeryville, California; Nigari).

(5) A tofu recipe: For making approximately 15 pounds of tofu. Gives equipment, ingredients (soybeans and nigari), and recipe [process].

(6) A settling box press. Two views showing how to make one yourself.

(7) Soymilk: Nutritional information and recipes courtesy of The Spinning Kitchen, Boulder, Colorado.

(8) Our favorite tofu recipes.

Letter (e-mail) from Matthew Schmit. 2009. March 30. "Our motivation for doing tofu workshops was primarily to spread the word. But also hoping to make a little money.

"We (Christie Mather and myself) conducted three workshops in early 1979. There were approximately 12-15 participants per workshop. These workshops were far from Telluride, so there was no concern about competition.

"The first was in Arcata, CA, (little did I know I would be moving there soon), to a group known as the Arc Community which was trying to form an intentional community to purchase land. My sister and brother-in-law

© Copyright Soyinfo Center 2013

were members, hence our invitation. After we left, they began making tofu weekly in home kitchens and selling it informally in the community. When I moved to Arcata, I joined the group as they began planning to rent a production space. As it turned out, it was too big of a leap for them. Their effort dwindled. I went ahead and opened the Arcata shop. The Arc Community eventually disbanded.

"The second workshop was held in Ashland, Oregon, in the home of friends from Telluride. They were very involved in the Ashland Food Co-op. Later when the Co-op expanded and installed a commercial kitchen, co-op members began making tofu in-house. I visited them once during production after moving out to Arcata. Eventually, Ashland Soyworks started up and Co-op production stopped.

"The third workshop was held in The Dalles, Oregon, also in the home of ex-Telluridians. As far as I know, nothing every grew out of that." Address: 116 N. Oak St., P.O. Box 69, Telluride, Colorado 81435.

4069. Tofu Shop (The). 1979. Cost analysis information–April, 1979. Telluride, Colorado. 1 p.
• ***Summary:*** "The following analysis is of our costs for the production of 66 pounds of tofu (4 batches). Soybeans (30 lb) $6.60. Nigari $0.32. Packaging (using 1 quart [Chinese-style take-out] food pails, plastic bags and ties) is $0.14 per package or $10.50 per 66 lbs. "We sell a majority of our tofu in packaged, 14 oz. blocks." "Our total materials cost for the production of 66 pounds of tofu is $17.42.

"Sales: We sell all of our tofu at wholesale prices, and a majority of it is pre-packaged. Our wholesale price ranges from $0.57 per package to distributors to $0.70 per package to local retailers which we deliver to. The average price is $0.65 per package or $0.75 per lb. We receive $48.75 for the sale of 75 packages at $0.65 per pack."

Labor: Tofu making and clean-up–6 hours. Packaging and delivery–2 hours. Total labor involved in making 66 pounds of tofu–8 hours.

"Conclusion: Total sales = $48.75. Total materials = $17.42. Balance = $31.33." Note 1. The word "profit" is not used.

"This balance of $31.33 must pay 8 hours of wages, and cover rent, utilities, insurance, advertising, equipment repair, and expansion. Our Shop trades tofu to our restaurant (approximately 10 pounds per day, at a market worth of $7.50) in exchange for rent, utilities, insurance, and similar expenses."

Note 2. How would one use the above information to determine how much the company should charge for a pound or package of tofu? Address: 116 N. Oak St., P.O. Box 69, Telluride, Colorado 81435.

4070. Watanabe, Tokuji. 1979. Developments in the processing of traditional soybean foods in Japan. In: Hideo Chiba, et al., eds. 1979. Proceedings of the Fifth International Congress of Food Science and Technology (1978-Kyoto). Tokyo: Kodansha Ltd.; Amsterdam and New York: Elsevier Scientific Publishing Co. xi + 436 p. See Chapter 2.1, p. 66-73. Illust. Author index. Subject index. 26 cm. Series: Developments in Food Science, Vol. 2. [9 ref]
• ***Summary:*** Chapter 2, titled "Efficient utilization of food resources," has three parts, of which this is the first. Contents: Introduction. Tofu (incl. "packed tofu" using GDL as a coagulant). Kori-tofu. Miso. Soy sauce (shoyu). Natto. Conclusion. A figure shows five flow-sheets, one for making each of the different foods mentioned above.

The importance of soybeans as a food ingredient in Japan is evident from the fact that nearly 1 million metric tons of soybeans, including those used after oil extraction, are consumed each year to make tofu, kori-tofu, natto, miso, soy sauce, and other foods. "The development of automated equipment for continuous processing has made mass production of these foods possible, ensuring evenness of quality and lowness of price, to the benefit of consumers." Address: Kyoritsu Women's Univ., 2-2-1 Hitotsubashi, Chiyoda-ku, Tokyo 101, Japan.

4071. Winslow, Marj. 1979. Ancient and honorable tofu moves in as meat substitute. *Packer* (*The*). April. Ideas in Marchandising Supplement.
• ***Summary:*** Inflation is causing shoppers to look for alternatives to meat–such as tofu. Murrae Haynes, marketing director of the New England Soy Dairy (Greenfield, Massachusetts), says that tofu retails in the New England area for $0.79 to $0.99 per pound. "'The tofu market has shifted from the traditional health food store to the supermarket,' Haynes commented. 'We (New England Soy Dairy) have gone into produce departments for the obvious connection between tofu and Oriental vegetables.'" The company markets its product using in-store demonstrations and is preparing a series of recipe brochures. Two photos show tofu being made at the Soy Dairy.

4072. Associated Press (AP). 1979. Soybeans: Hottest food story of the '80s? *Journal* (*Ithaca, New York*). May 4. p. 8.
• ***Summary:*** This wire service story has a Peoria, Illinois dateline. A large photo shows a smiling Dr. Clifford Hesseltine, a microbiologist at the USDA Northern Regional Research Center in Peoria, holding a plate with a large cake of tofu. He believes that "by 1985 it will be common to buy tofu... in any supermarket... The reason tofu is catching on now is because with the proper flavorings and served with the proper vegetables, it is a beautiful source of protein... My wife just dips it in batter and fries it like chicken, adds a little seasoning and its delightful."

Murrae Haynes of the New England Soy Dairy (one of about 50 tofu companies established by non-Orientals during the past 3 years) notes that "The tofu market has shifted from the traditional health food store to the supermarket."

4074. Rhodes, Elizabeth. 1979. A tofu-tempeh tycoon on Vashon Island? *Seattle Times Magazine.* May 6. [1 ref]
• ***Summary:*** William Luke Lukoskie was born 24 November 1946 in Duluth, Minnesota. His Catholic family moved to Edmonds, Washington, in 1956 and he attended parochial schools. After earning a BA in philosophy (math minor) from Carroll College in Helena, Montana, he returned to Seattle. He enrolled in graduate business school at the University of Washington in 1968, then switched to working on a doctorate in educational psychology, then dropped out. In 1976 he founded Island Spring tofu factory. Today Island Spring produces tofu, tempeh, soymilk, Soyfreeze soy ice cream, and Delicious Steamed Tofu. Future products may include soy mayonnaise, soy yogurt, frozen tofu lasagna, and cheesecake. A photo shows Lukoskie smiling and holding a block of his tofu with a six-petaled flower pressed into the surface. Address: Seattle.

4075. Leviton, Richard. 1979. Parting shots from a minority of one. New England Soy Dairy, 305 Wells St., Greenfield, MA 01301. 5 p. May 7. Unpublished manuscript. Typed, with signature on letterhead.
• ***Summary:*** "Since my opinion in matters relating to this company is no longer given much validity, I will indulge myself and express it volubly. In brief, I think this company stands in significant danger of ruining itself... This is why I think the New England Soy dairy is in trouble. 1. Lack of management discipline and disappointing inability to attain stated professed goals. 2. Neglect of the production process. 3. Lack of intelligent concern and empathy for the workers. 4. Lack of attention to budgeting, lack of financial restraint. 5. At best, attention to daily matters is sluggish... 7. We are compromising our reputation by distributing inferior, irrelevant products (baked goods, sandwiches). 8. A perennial penny-wise and pound foolish attitude." Address: Greenfield, Massachusetts. Phone: 413-772-0746 or 773-3141.

4076. *Columbia Missourian* (*Missouri*). 1979. Soybeans come of age as a protein source. May 9. *

4077. Flinders, Carol. 1979. Soybean key to world food plight? Notes from Laurel's Kitchen. *Rocky Mountain News* (*Denver, Colorado*). May 16. p. 24A.
• ***Summary:*** Twelve years ago (i.e., in late 1968) Carol spent a memorable week at the Tassajara Zen Mountain Center near Big Sur, California. "Among the many good people I met, one I've always remembered was Bill Shurtleff, who helped run the kitchen out of which was issued the well known Tassajara bread.

"Spare of words, lean and thoughtful, he had a kind of banked fire in his eyes that told you he was a man in search of a vocation. Last week Bill and his wife, Akiko, came to our home to visit and exchange ideas. It's clear that he has found the vocation he's been looking for, and that, in a sense, all of us stand to gain from the passion with which he's answered it.

"The cause Bill has taken up is that of the more than one billion people of the world for whom hunger is *the* central fact of life. To be as continually mindful of their plight as he is would probably be unbearable if he didn't believe he holds a significant key to relieving it. The key? 'Glycine max'–soybeans to you and me.

"Western exploitation of the soybean has been absurdly slight until recent years. Mostly we've fattened our livestock with it. That soy is 'king of beans' we've long recognized." But they have entered the American food supply well disguised in such forms as textured vegetable protein. "The soybean foods Bill is promoting are of a much more sophisticated nature. Their names fall oddly on the Western ear:" tofu, shoyu, tempeh, miso.

Bill and Akiko met in Japan. She "was a fashion designer in Tokyo before they were married. The image of big city haute couture doesn't attach easily to the simply dressed and unpretentious Akiko, and everything makes a little more sense when you find out the fashions she designed were actually for handicapped children.

"Akiko's skill as a graphic artist and fine cook are the perfect complement to Bill's, as writer and investigator. Her warmth and gentleness are the perfect balance to his single-minded intensity. (Akiko doesn't just invite you for dinner. She seizes your arm as you're walking along together, wraps it close in her own and holds on tight, convincing you life will be pure misery for them until you come to their house).

"Tofu was the soyfood that first captured Bill's interest." Discusses its virtues. "But what really wins him over, I think, is the sheer romance of tofu. What you know of tofu, and what I've told you about Bill, might make that seem unlikely. But read his book and see for yourself–beneath that samurai exterior beats the heart of a Shelley or a Keats. Listen:

"'Like water that flows through the worlds, serving as it moves along, tofu joyfully surrenders itself to the endless play of transformation. Pierced with a skewer, it sizzles and broils above a bed of live coals... deep-fried in crackling oil, it emerges crisp and handsome in robes of golden brown, frozen all night in snow under vast mountain skies, it emerges glistening with frost and utterly changed. All as if it knew there was no death to die, no fixed or separate self to cling to, no other home than here.'"

Contains a favorite Flinders' recipe for tofu patties.

4086. Bulkeley, William M. 1979. The Americanization of bean curd: Tofu in tacos and burgers? *Washington Post.* May 24. p. E1, E11, E26.
• ***Summary:*** This article is reprinted from *The Wall Street Journal* April 12 (p. 1, 31).

An original cartoon (by Ray Driver for the Washington Post) shows a promoter in a top hat standing in the back of a covered wagon speaking to five contemporary Americans. On the side of the wagon is written: "The amazing bean curd. Tofu. Fry it. Bake it. Broil it. Grill it. Scramble it. High in protein. Low in cholesterol." An illustrated hand is pointing to the term "bean curd."

4087. Burros, Marian. 1979. The Americanization of bean curd: Cooking the curds and whey. A staple whose time has come. *Washington Post.* May 24. p. E1, E26.
• ***Summary:*** A praiseful article. Tofu has a lot to recommend it, with it mild flavor and low price. It picks up flavors easily and is often seasoned with soy sauce and garlic. "Its popularity as a health food developed after the January 1976 publication of 'The Book of Tofu,' a volume that fanciers describe reverently as 'a seminal work.'" The book has already sold 65,000 copies and recently appeared as a mass-market paperback, published by Ballantine Books. It contains hundreds of vegetarian tofu recipes and instructions for starting a tofu-making shop. The book as inspired entrepreneurs to set up tofu shops across the United States. One of these was Richard Leviton who, with his wife, started the predecessor of the New England Soy Dairy [NESD] two years ago. The company now makes nine tons of tofu a week, up from 500 lb/week two years ago–and expects revenue of more than $750,000 this year.

"Mr. Leviton, who like many tofu fans has an almost evangelical zeal for the product, now is starting a trade magazine and is working to organize a trade group, the Soycrafters Association of North America."

Describes how tofu is made at NESD; the hot milky-white soy liquid [soymilk] is coagulated with nigari, a residue of sea-water desalination.

Mr. Leviton stresses that tofu can be prepared in many ways. And its acceptance is spreading. This spring, Smith College of Northampton, Massachusetts, plans to test tofu on students in its food-service cafeterias. Nearby Hampshire College has been serving tofu cutlets for almost two years.

Talks with Tom Timmins and consultant Judith Rubenstein.

Recipes: Meatloaf with tofu. Yogurt pie. Honey yogurt tofu sauce. Tofu in Liptauer fashion. Egg salad with tofu. Fried tofu sandwich. Spaghetti sauce. Deviled tofu. Also includes instructions for making tofu at home.

4088. Shulman, Martha. 1979. Tofu takes on liqueur, spices in hi-pro cheesecake. *American Statesman* (*Austin, Texas*). May 24. p. G2.
• ***Summary:*** A recipe for Tofu cheesecake. Tofu made in Elgin, Texas, is sold in some specialty stores. Photos show: (1) The cheesecake with one wedge removed. (2) Martha Shulman.

4089. *Tampa Tribune* (*Florida*). 1979. Japanese tofu is soy cheese or curd. May 24. *

4090. Tallent, W.H. 1979. More on tofu and trypsin inhibitors. *Notes from the Director: Northern Regional Research Center* (*Peoria, Illinois*) No. 1377. p. 2. May 23.
• ***Summary:*** "NRRC research on tofu has produced great dividends both at home and abroad (Issue 1372). Coincidentally, NRRC involvement in the development of a reliable assay procedure for trypsin inhibitor (TI) has resulted in additional benefits. Ted Tyler (Research Supervisor, Herbert V. Schuster Company, Quincy, Massachusetts) reports that, with the assistance of J.E. McGhee and J.D. Glover (ED) and J.J. Rackis (OC), he has been able to successfully adapt the official American Association of Cereal Chemists-American Oil Chemists' Society TI Method to analysis of TI activity in tofu. Other procedures proved to be unreliable after an exhaustive study.

"The AACC-AOCS TI assay was developed in 1975 by a group of collaborators from university, government, and industrial laboratories; J.E. McGhee was a member of the group and J.J. Rackis was its chairman." Address: Center

4091. Schecter, Andy. 1979. Re: Equipment and process for making tempeh at The Tofu Shop. Letter to William Shurtleff at New-Age Foods Study Center, May 26. 1 p. Handwritten, with signature on letterhead. [1 ref]
• ***Summary:*** Seven small photos (contact prints) show the company's tempeh-making process and equipment: (1) Cooking soybeans with steam. (2) Cooling cooked beans on a table. (3) Mixing in starter in plastic buckets. (4) Bagging and flattening inoculated soybeans. Tofu is being made in the background. (5) Placing screen trays loaded with bagged tempeh into the incubator. (6) Tempeh (and starter in petri dishes) in the incubator. (7). Front of incubator.

He concludes: "Looking forward to seeing you & Akiko at the SANA conference and in Rochester afterwards! Take care, Andy. P.S. Please send $10 to defray film, processing & the photographer. Thanks." Address: The Tofu Shop, 277 N. Goodman St., Rochester, New York 14607. Phone: 716-442-1213.

4092. Flinders, Carol. 1979. Fresh tofu is like fresh bread–worth making: Laurel's Kitchen. *Spokesman-Review* (*Spokane, Washington*). May 30. p. B14.
• ***Summary:*** "To make tofu seem like the girl next door, some of her well-meaning proponents have stripped away her exotic name and called her 'soy cheese,' or 'soy curd' instead. Save us from the literalists, but in fact they have given us a clue to exactly how tofu comes into being. Fr me, finding out about the process has provided all the more motivation to learn how to use this fine food–so I thought I'd tell you about it." Describes the traditional process for making tofu in Japan, based on descriptions in *The Book of Tofu*, by William Shurtleff and Akiko Aoyagi. Contains a recipe for Eggless Egg salad from Shurtleff and Aoyagi.

4093. *New Haven Register* (*Connecticut*). 1979. Tofu: An Oriental bean curd that's high in protein. May 30. *

4094. *Pawtucket Valley Daily Times* (*West Warwick, Rhode Island*). 1979. Tofu anyone? Tofu is a protein source. May 30. *

4095. *Farmweek* (*Knightstown, Indiana*). 1979. Soybeans: Food of the future? May 31. *

4096. Glover, Earl R. 1979. After 20-year wait, bean curd catches on. *NCR Employee Letter* (*Peoria, Illinois*) No. 77. p. 5. May 31.
• ***Summary:*** "Research investments don't always pay off as soon as we'd like them to. That's true about making tofu–the protein packed bean curd. As a result of social, economic, and cultural changes, our research investment 20 years ago at the Northern Regional Research Center in Peoria now is paying big dividends at home and abroad. Part of this research identified U.S. soybean varieties best suited for making tofu in Japan and resulted in a sizeable export market through the years for selected soybean varieties grown in the Middle West.

"In the past 3 years, nearly 50 small U.S. companies now supply tofu–a curdled soybean milk product that looks like soft white cheese–to health food stores and restaurants and an occasional supermarket. Here in Peoria, Kroger's recently began stocking a domestically produced tofu. And one of the largest of the tofu suppliers, the New England Soy Dairy Inc., Greenfield, Mass., produces 3,000 pounds daily, distributing it by refrigerated truck throughout New England, New York, New Jersey, and Pennsylvania.

"And interest continues to grow at an even more rapid pace. At least it was fanned by articles in the press during April and May, stimulated partly by a press release from the NCR Information office about Utilization Research Report No. 5, "Soybeans as Human Food," authored by Hwa L. Wang at the Peoria Center.

"The release appeared in many metropolitan newspapers, including the Seattle *Post-Intelligencer,* the New Orleans *Times-Picayune*, the Champaign-Urbana *News-Gazette*, and the *Coshocton* (*Ohio*) *Tribune.* More than that, it created such a large demand for the publication that it is now being reprinted. The release also stimulated a national AP [Associated Press] wire story about tofu and the Peoria Center research, which has further fanned public interest. Now, after such a long wait, tofu–an ideal meat substitute for many–is suddenly becoming a most popular old-new food of the day."

Note: NCR stands for "North Central Region" Address: Regional Administrator, Agricultural Research, SEA–Science and Education Administration.

4097. Glover, Earl R. 1979. NRRC process featured in new book on tempeh. *NCR Employee Letter* (*Peoria, Illinois*) No. 77. p. 5. May 31.
• ***Summary:*** Page proofs for a 288-page book about tempeh were received for review by one of the contributors, Clifford W. Hesseltine, NRRC. He and Hwa L. Wang, Earl W. Swain, and John J. Ellis are credited for supplying most of the information on NRRC's process for developing tempeh fermentation and for reviewing the technical sections. *The Book of Tempeh,* which includes 205 line drawings, will be a companion volume to two others; *The Book of Tofu* and *The Book of Miso.*

Note: NCR stands for "North Central Region." Address: Regional Administrator, Agricultural Research, SEA–Science and Education Administration.

4098. Hanes, Phyllis. 1979. Have a go at tofu: Cheeselike food from Orient a versatile economizer. *Christian Science Monitor* 71(130):14. May 31. Eastern edition.

© Copyright Soyinfo Center 2013

• ***Summary:*** "Anyone who is serious about cutting down on food expenses has not really tried until he's had a go at tofu. A favorite food in the Orient for years, tofu looks to most of us like a soft, white cheese, but it is far more versatile. The time has come for tofu to be used in all kinds of dishes in Western kitchens, because it is economical. It has about as much protein as a pound of hamburger, but less fat. It blends easily with all kinds of food, with meat or fish, and in dishes such as stuffed zucchini, enchiladas, sandwiches, or scrambled eggs...

"The answer to using more tofu is found in a most comprehensive book, *The Tofu Cookbook*, by Cathy Bauer and Juel Anderson (Rodale Press, Emmaus, Pennsylvania, $8.95). Instruction are just about perfect, with answers for all the questions you could possibly think of on this subject."

Contains a recipe for Kima (Indian Curry) with tofu. Also mentions okara, TVP, and ymer (a dairy product used as a topping). Address: Food editor, Christian Science Monitor.

4099. Brown, Marlene. 1979. How to put together a co-op party. *Better Homes and Gardens* 57(5):128, 130, 132, 138-42, 184. May.
• ***Summary:*** The menu for a traditional Japanese dinner includes "Chilled tofu hors d'oeuvres." "Garnished chunks of chilled tofu (also called soybean curd) set the stage for this Far Eastern presentation. Assemble the tofu on a bed of crushed ice at the party site..." Shabu-shabu includes tofu and soy sauce.

4100. **Product Name:** Hickory Smoked Tofu.
Manufacturer's Name: Central Soy Products.
Manufacturer's Address: 7 W. 14th St., Lawrence, KS 66044. Phone: 913-843-0653.
Date of Introduction: 1979. May.
Ingredients: 1998/07: Filtered water, whole soybeans, mignesium chloride (*Nigari*) and natural smoke flavor.
Wt/Vol., Packaging, Price: 1998: 14 oz.
How Stored: Refrigerated.
New Product–Documentation: Invoice no. 7018. Dated 1979 May 30. Written to Community Mercantile by Central Soy Products, 7 W. 14th St., Lawrence, Kansas 66044, for 56 "cakes of smoked tofu," each $0.40.

Talk with Jim Cooley of Central Soyfoods. 1989. Feb. 16. Jim got the idea and recipe for this product from a Chinese cookbook. A Chinese customer from Hunan says it tastes just like the smoked tofu his grandmother used to make. In May 1988 he promoted the product at Bloomingdale's in New York as part of a promotion for Kansas Food Products. Daiei in Japan asked them to send him a sample. Note: This seems to be America's first commercial smoked tofu. In May 1990 the company makes about 800 lb/month of smoked tofu ($1.98 for 14 oz. retail).

Form filled out and label sent by Jim Cooley, owner. 1998. July 7. Central Soyfoods is located at 11 W. 14th St., Lawrence, KS 66044. Phone: (785) 843-0653. Includes a Label for "Hickory Smoked Tofu." Label: 5¼ by 4½ inches. Self adhesive on a plastic bag. Yellow, green, blue, and black or reddish orange. "From the Land of Kansas. Naturally." Established 1978.

Talk with Jim Cooley and Mary Coral. 1998. July 14. "How smoked tofu came to America" (which see).

4101. McDermott, Chris; Klein, Ruth Hodgson. 1979. Tofu: The once and future food? (Leaflet). New York: Cornell University, Cooperative Extension. 2 p. May 7. Focus on the food markets. [1 ref]
• ***Summary:*** "You can do just about anything to a soybean: sprout it, ferment it into soy sauce; grind it into flour; isolate the protein for use as a meat extender, or extrude and texture it into imitation meat and fish products. While agribusiness spends $20 million a year on high-technology research into soy foods, consumers are increasingly turning to tofu, the ancient staple of Oriental diets, as an inexpensive source of protein. Tofu, more familiar to some as bean curd, is widely available at health food stores, fruit and vegetable markets, and an occasional supermarket; it usually sells for about 70 cents to $1.09 a pound."

Discusses how to buy and store tofu and the many different type. A table compares the nutritional value of tofu, hamburger, cottage cheese, and cheddar cheese–based on USDA Agriculture Handbook No. 456, *Nutritive Value of American Foods*. Address: 1. Editor; 2. Senior Extension Associate. Both: Consumer Education, Cornell Univ.

4102. Midwest Natural Foods Distributors, Inc. 1979. Catalog 13. Spring, 1979. Ann Arbor, Michigan. iv + 290 p. Index by product category. Index of manufacturers. Index of advertisers. Illust. 28 cm.
• ***Summary:*** One the cover are two kites (colored orange and red) flying in the sky. This catalog, largely printed by a computer, contains many ads on numbered pages. Contents: Policies and terms. Catalog information. Packaged. Books. Refrigerated and frozen. Bulk. Literature and flyers. Indexes (3).

"One stop shopping... We are now a Full Line distributor." List of new lines. List of new products within existing lines. Symbols and abbreviations.

Suppliers are listed alphabetically: Arrowhead Mills, Balanced Brand [Balanced Foods, New Jersey], Bragg's (Liquid Aminos), Dr. Bronner's (with full page ad showing the doctor), Carmé (lecithin), Cedar Lakes, Cellu (Soy bean flour), Chico-San, A.A. Debole (Spaghetti sauce–soy conc), Dragon's Milk (Arica), Elam's (soy flour), El Molino, Ener-G–Jolly Joan, Erewhon (with "Erewhon West" full-page ad), Family Orchards (Tamari mixes, Trail mix), Fantastic Foods, Fantastic Falafel [Felafel], Fearn Soya Foods, Flavor Tree, Hain Pure Foods ("Cold pressed" vegetable oils, mayonnaise, nut butters), Hansen's juices,

© Copyright Soyinfo Center 2013

Health Valley (incl. Vegetarian Chili), Hi-Energy Foods (food bars), Hoffman's (protein powders, snack bars), Lact-Aid (p. 109, ad p. 118), Jack La Lanne, Lange's, R.G. Lecithin, Lifestream (p. 113, 251, ads p. 249-50), Malt-O-Meal, Maya Grainburgers (p. 119, ad p. 126–mix with tofu), Midland Lecithin, Miso Cup, Modern Products (Gayelord Hauser), Mus-L-On (MLO), NF Factors, Niblack ("Tamari toasted sunflower seeds," Tamari pumpkin seeds," raw or toasted wheat germ, unprocessed miller's bran), Old Stone Mill (soy), Orjene, Parkelp, Plus Produces (incl. Tiger's Milk), Richter Bros., Soken, Sovex, Viobin, Waring (blender, juicer), Westbrae.

Books, Talking Foods, Meats (nitrate and nitrite free), Poultry (no hormones or antibiotics), Soy Products (Health Valley soy milk, tofu), Soy Plant Tofu (nigari, and tofu sausage, p. 259-60), Tumaro's, Willow Run (Soybean spread [margarine]). Bulk–Beans, dry roasted soybeans, fruit & nut mixes (trail mix), nut butters, condiments, vegetable oils, pasta (with nomenclature), granola, teas & herbs. Literature & flyers. Indexes. Note: Many companies have a large selection of herbs. Address: 170 Aprill Dr., Ann Arbor, Michigan 48103. Phone: 313-769-8444 or in Area 313 1-800-552-6297.

4103. Moore, Karen. 1979. Tofu, a Far East import, offers potential as meat, fish, cheese substitute. *Food Product Development* 13(5):24. May.
• ***Summary:*** Discusses both tofu and tempeh. "New England Soy Dairy has already increased production [of tofu] from 500 pounds per week in 1977 to 9 tons [18,000 lb] per week in 1979, and the company expects revenues to exceed $750,000 this year. Matsuda Hinode Tofu Co. of L.A. produces approximately 10 tons [20,000 lb] of tofu daily."

"Interest in tempeh is beginning to build. Within the last year USDA's Northern Regional Research Center filled 36,000 requests for inoculum." Address: Assoc. editor.

4104. Tofu Shop (The). 1979. Our favorite tofu recipes (Leaflet). Telluride, Colorado. 1 p. Spring. Single sided. 28 cm.
• ***Summary:*** Typewritten on letterhead. The four recipes are: "Tofu Turkey with Mushroom Gravy (serves 12-16)." Tofuburgers. Spicy tofu and rice burritos. Creamy tofu salad dressing.

The Tofu turkey is especially innovative: Place 8 lb tofu (one large block if possible) in a large, shallow baking pan. Melt ½ lb soy margarine or butter in a small sauce pan, mix in herbs, and use this sauce to baste "turkey." "Bake tofu for 2 hours at medium temperature, or until a golden crust forms all around. Baste regularly. Garnish with sprouts, parsley, and thin apple rings, and serve with mushroom gravy. For an extra treat, hollow out blocks of tofu and stuff with vegie and rice mixture prior to baking."

Mushroom gravy" Add 3 tablespoons arrowroot and ½ cup whole wheat flour to 4 cups hot water, and cook 10 minutes. Sauté 2-4 cups sliced mushrooms and one small diced onion. Combine all ingredients and season to taste with shoyu [Japanese-style soy sauce], garlic, lemon, and cayenne (optional).

Letter (e-mail) from Matthew Schmit. 2009. March 28. Concerning the Tofu turkey recipe: "As technically simple as the recipe was, it was how the turkey idea started. Note the sentence at the end of the first paragraph describing 'stuffing' the tofu turkey. This is what I later started doing in Arcata with our tofu turkeys." Matthew thinks this sheet of recipes was printed in the spring of 2009. Address: The Tofu Shop, 116 N. Oak St. (P.O. Box 69), Telluride, Colorado 81435.

4105. Ebersole, Phil. 1979. The Zen work ethic: Small but thriving businesses spring up because of Zen Center's presence here [The Tofu Shop and Northern Soy]. *Democrat and Chronicle* (*Rochester, New York*). June 2. p. 1D, 9D.
• ***Summary:*** The tofu company, Northern Soy, ships 3,200 to 3,300 lb/week of tofu, up tenfold over this time last year.

4106. Smith, Allan K. 1979. Re: History of soybean foods in the United States. Letter to William Shurtleff at New-Age Foods Study Center, June 3. 2 p. Typed, with signature. [1 ref]
• ***Summary:*** Gives a brief overview of the history. Discusses what Dr. Smith sees as the bright future of tofu and fermented tofu, and the work of Dr. Harry Miller.

"I do know from past experience that an excellent fermented cheese product can be prepared [from soybeans]. You will find a description of the use of soy milk in making cheese in chapter 10 and eleven in our book" [*Soybeans: Chemistry and Technology*]. Address: 4 Nacozari Lane, Hot Springs Village, Arkansas 71901.

4107. Arnold, David. 1979. Tofu or not tofu? Hamburgers aren't made of ham. So try soybeans, and leave ol' Bessie's beef alone. *Eugene Register-Guard* (*Oregon*). June 6. p. 1D, 3D.
• ***Summary:*** About Surata Soyfoods, 815 Olive St., Eugene, Oregon. This full-page article says that Toby Alves is Eugene's "tofu queen." A color photo shows Ben Coonrod and Benjamin Hills of Surata Soyfoods cutting a large block of tofu into cakes.

4108. *Eugene Register-Guard* (*Oregon*). 1979. Eugene cook tells how to prepare tofu so it's palatable. June 6. *

4109. *Lufkin News* (*Texas*). 1979. Bean curd integral part of Oriental diet. June 13. *

4110. *San Francisco Chronicle.* 1979. Tofu hepatitis toll doubles. June 16. p. 7.
• ***Summary:*** Seventy persons in the San Francisco Bay area

© Copyright Soyinfo Center 2013

contacted hepatitis from eating contaminated tofu salad sandwiches dispensed at the Haight Street fair on May 6. While tofu was finally exonerated. The outbreak was blamed on a man in the early stages of hepatitis "who prepared the onions for the bean curd concoction." But tofu, and the Bay Area's largest tofu supplier, Farm Foods (which did not even produce the spoiled product) received all the immediate blame and unfavorable publicity. "It wasn't us. We didn't even use onions," reported Robert Tepper, a Farm Foods spokesman. "But I'm afraid we're going to lose a lot of sales over this." Note: This is the earliest article on soy seen (Aug. 2002) in the *San Francisco Chronicle* newspaper. Address: California.

4111. Foreman, Carol Tucker. 1979. Re: Use of tofu in the National School Lunch Program. Letter to Mrs. Judith Rubenstein, Institutional Consultant, New England Soy Dairy, Inc., 305 Wells St., Greenfield, Massachusetts 01301, June 18. 2 p. Typed, with signature on letterhead.
• ***Summary:*** "Thank you for your April 16 letter concerning the possible use of tofu in the National School Lunch program." Ms. Foreman then advises Rubenstein to please "await the completion of USDA's current review of crediting policies within the program. At this time, we have no means of allowing non-standardized foods in school lunches to meet meal requirements while still assuring that the nutritional integrity of the Type A lunch is maintained...

"Please be assured that we are well aware that there are a number of non-standardized foods like tofu that can make a positive contribution to the lunch. This is one of the important issues that the Department will be considering in its review of policies for crediting foods to be served in Type A lunches...

"There are two provisions in the regulations that allow for variations in the meal requirements. One is to accommodate the special dietary needs of individual students; the other is to accommodate ethnic, religious, economic or physical needs of groups of students...

"As explained by Dr. Audrey Maretzki, Director of Nutrition and Technical Services Division, during your meeting on May 9, although tofu may not be used at this time to satisfy meal requirements, it may be served as an 'Other Food' in school lunches. 'Other Foods' may be served with lunches to help improve acceptability, to satisfy children's appetites, and to increase the nutritional quality of the lunch, but they cannot be used toward fulfilling the minimum meal requirements... When inquiring about the status of this issue in the future you can write directly to Dr. Maretzki."

Note: This is the earliest document seen (Jan. 2005) concerning the use of tofu in U.S. school lunch programs. Address: Asst. Secretary of Food and Consumer Services, USDA, Washington, DC 20250.

4112. Blair, Betty. 1979. Kids get a taste of 'health food.' *Detroit News.* June 20. G-10.
• ***Summary:*** The Great American Nutrition Campaign visited Detroit last weekend, sponsored by the Center for Science in the Public Interest (CSPI). The breakfast menu featured some unusual but highly nutritious dishes; the unrivaled star was scrambled tofu. CSPI nutritionist Bonnie Liebman and staff member Letitia Brewster were at the breakfast with toys and posters, including the Junk Food Hall of Shame. They are teaching people that many inexpensive foods are tasty and nutritious. The whole campaign will cost only $30,000.

Carol Ann Huang, owner of the Yellow Bean Trading Co. (a natural food store and deli in Detroit) was in charge of food preparations. Recipes are given for two dishes served at the breakfast: Scrambled spiced tofu, and Smoothies. Address: News staff writer.

4113. *Newsday* (*Garden City, New York*). 1979. Notes of a suspicious tofu watcher. June 20. *

4114. Sprague, Terry. 1979. Non-Orientals turn out tofu for Brattleboro buyers: New England Soy Dairy Co. *Reformer* (*Brattleboro, Vermont*). June 23. p. 7-8. Saturday.
• ***Summary:*** The New England Soy Dairy is in Greenfield, Massachusetts. "The Americanization of tofu is a major goal of the Soy Dairy Co. Stephen Hassel [sic, Hassell], the company's product development manager, foresees a time when the bean curd is served in school lunch programs, fast food stores and in place of the ever increasingly expensive meat and cheese. He likens the future of tofu to what is happening now with yogurt."

New England Soy Dairy has committed itself to testing soybeans on 30 acres of land in western Massachusetts. The company will buy the seed. In the meantime, the company imports organically grown soybeans from the Midwest and makes them into tofu. "Soy Dairy Co. is owned by two major investors. Eventually they hope to have it owned by those who work there. But it won't be a cooperative... The firm now produces 20,000 pounds of tofu a week, an increase of 12,000 pounds a week since last June. And a new system has been purchased that should produce three times that amount. The company currently is working 24 hours a day with one shift just for clean up.

"A number of new products are currently being test marketed, including soy milk, an 'eggless egg salad, and a soft syrup product which will be similar to soft ice creams. 'We'd like to make a fresh baby formula substitute also,' Hassel said." Four photos show tofu being made at the Soy Dairy.

4117. Bianchini, Gilberto. 1979. Re: Plans to start a tofu shop in Rimini, Italy. Letter to Wataru Takai at Takai Seisakusho in Japan, June 30. 2 p. Typed, with signature. [Eng]
• ***Summary:*** "Ref.: Your letter of March 14, 1979. Dear Sir, As I said in my letter from Berkeley, California, I'm starting a tofu shop in Rimini, Italy. I do not have any automated machinery yet, and I'm working on a small scale, hoping to expand.

"I've solved some difficulties in coping with Italian government laws regarding soybean products; my immediate need is a hot sealing machine, for a good hygienic standard of packing the tofu cakes, and actually this machine is all that I can afford to buy from your Company. As I told you, my shop will surely be of interest in the future for other people from Health Food Centers in Italy.

"For the diffusion of this product, I'm going to distribute in most parts of the country some leaflets explaining what I experienced about soybean products in my visit to tofu producers in the USA. I am not in any condition at the moment of importing and selling your equipment, but my shop, when completely finished, will be a good showroom for others interested."

He then asks for prices of equipment (especially HS-KYO-300) CIF (if possible) to the Italian port of Livorno (preferably) or Genova. He also requests a complete chemical analysis of the natural nigari sold by Takai.

"Post Scriptum: I plan to pay a visit in the future to Japan; I am studying Oriental medicine and philosophy, and I appreciate very much your country's culture and tradition." Address: Via Cuoco 9, 47037 Rimini, Italy. Phone: 0541-33670.

4118. *San Francisco Chronicle.* 1979. Cracking S.F.'s tofu salad mystery. June 30. *

4119. *Down to Earth* (*Eco-Info, Walnut Creek, California*). 1979. Meet Bill & Akiko [Shurtleff]. May/June. p. 5-6. [3 ref]
• ***Summary:*** "Bill Shurtleff and Akiko Aoyagi conducted the February 16th Eco-house workshop on tofu. The sixty-five people in attendance found it so interesting and worthwhile that we decided to share with our 'Down to Earth' readers some information about the Shurtleffs and their work."

Gives: Brief biographies of William Shurtleff and Akiko Aoyagi, with a photo of each. The 8 goals and activities of their New-Age Foods Study Center, founded in 1975. Four chilling facts about world hunger. Four tofu recipes. The address and phone number of the New-Age Foods Study Center. "Bill and Akiko are now looking for people living in the Lafayette–Walnut Creek–Orinda area to work with the Center. If you are interested, please contact" them.

Note: This newsletter was published by Ecology Information Inc. and edited by Elizabeth Leite, under the direction of Mark Maloney (he later changed his name to Mark Westwind). It was preceded by Survival Lifestyle News. The workshop was held at the Mt. Diablo Unitarian Church, located near Eco House and the Peace Center in Walnut Creek. Address: Walnut Creek, California.

4120. **Product Name:** Island Spring Soy Bean Tempeh.
Manufacturer's Name: Island Spring, Inc.
Manufacturer's Address: P.O. Box 747, Vashon, WA 98070. Phone: 206-622-6448.
Date of Introduction: 1979. June.
Ingredients: Organic soy beans, water, apple cider vinegar, Rhizopus oligosporus.
Wt/Vol., Packaging, Price: 8 oz (227 gm).
How Stored: Frozen or refrigerated.
New Product–Documentation: Form filled out by Luke Lukoskie. 1979. Oct. 3. He buys his soybeans from Living Farms; Pacific Coast Soybeans in Walla Walla, Washington, went out of business last year when the Chinese undersold them in the Japanese market. Discusses how to buy used food processing equipment. Shurtleff & Aoyagi. 1979. The Book of Tempeh. p. 149. Made by Russ Pals and Ben O'Loughlin, this was the world's first tempeh to be packaged in a tofu tub.

Label. 1980, undated. 4 by 5 inches. Red and black on white. Soyfoods Center Computerized Mailing List. 1981. Jan. 22. Owner: Luke Lukoskie. Form filled out by Yvonne Kuperberg. 1988. Oct. 1. Launched June 1979. Discontinued after the fire, Feb. 1986.

4121. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: La Soyarie.
Manufacturer's Address: 25 rue St. Etienee, Hull, QUE, J8X 1H5, Canada. Phone: 613-235-5356.
Date of Introduction: 1979. June.
Ingredients: Organically grown soya beans (*Feves de soja biologiques*), water, magnesium chloride (*chlorure de magnesium*).
Wt/Vol., Packaging, Price: 500 gm.
How Stored: Refrigerated.
New Product–Documentation: Won. 1979. The Ottawa Journal (ONT, Canada). Nov. 28. p. 35. Crosby. 1979. The Citizen (Ottawa, ONT, Canada). Dec. 4. p. 58. "Miracle tofu a busy way of life for couple."

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owners: Koichi & Francine Watanabe.

Label. 1983. 5.5 by 4.5 inches. Plastic film. Red and black on clear film. "No preservatives. To keep fresh, replace water daily." A bit of information, "that may amuse you [from Steve Rowat, March 29, 1989]. Koichi Watanabe who

runs La Soyarie in Hull, Quebec, and who left Japan at age 17, and whose brother runs a tofu operation in Japan, learned to make tofu by reading *The Book of Tofu*, in English, like I did."

4122. **Product Name:** Tofu.
Manufacturer's Name: MU Tofu Shop.
Manufacturer's Address: 1735 W. Greenleaf, Chicago, IL 60626. Phone: 312-743-1339.
Date of Introduction: 1979. June.
How Stored: Refrigerated.
New Product–Documentation: Shurtleff & Aoyagi. 1979. July. New Tofu Shops & Soy Dairies in the West. Rebecca Uchida.

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Rebecca Uchida.

Leviton. 1981. Soyfoods. p. 28. Letter from Rebecca Uchida. 1982. April 20. They are still at 1735 W. Greenleaf in Chicago. She and her husband, Yoshi [Yoshiharu], own and run this tofu shop. Yoshi is a native of Japan.

Talk with Rebecca Uchida. 1990. May 14. They have been making tofu and soymilk since 1979.

Label for "Soydrink" sent by MU Tofu Shop. 1998. July 2. They still make this soymilk. 2¼ by 4¼ inches. Orange on white. "16 fl. oz. Keep refrigerated. Ingredients: Organic soybeans and water. 1735 Greenleaf, Chicago, Illinois 60626." On the label are the Japanese characters for soymilk. A note says they have been making this soymilk since 1984. Talk with Terri Sangrash, office manager at Mu Tofu. 1998. July 13. Yoshi still makes the tofu, but his wife, Rebecca, now teaches kindergarten. Terri started working at MU in 1983, and they first really started selling soymilk with a label to various customers in 1984; they may have sold it to one customer as early as 1979 without a label. They had a labeling problem, so they had to change the name to Soydrink.

4123. *New Roots* (*Greenfield, Massachusetts*). 1979. Beans, beans... The magical plant. No. 6. p. 16. May/June.
• ***Summary:*** Part 1: The New England Soy Dairy (305 Wells St., Greenfield, Massachusetts), has prepared a 50-page information packet about growing soybeans in New England. An illustration shows the storefront of a soy dairy with large signs for "soy milk" and "tofu" in the window.

Part 2: Bill Boyd (RD2, RT318, Phelps, NY 14532) writes that "A group of farmers in central New York State have been meeting for the past year to investigate whether a soybean processing [crushing] plant would do well in central New York State. They have noted the paradox that while New York and bordering states make up one of the largest soybean consuming areas in the world, over 3/4 of the beans grown in New York are exported for processing in the Midwest. Hmmm."

4124. Shurtleff, William. 1979. The tofu and soymilk industry in the United States (News release). Lafayette, California: New-Age Foods Study Center. 1 p. June.
• ***Summary:*** The first statistics compiled on the U.S. soyfoods industry. "There are presently 150 tofu shops and soy dairies in the U.S. Ninety of these, mostly run by Caucasian Americans, have opened within the past 3 years since publication of *The Book of Tofu;* they now have about 35% of the industry sales. The remaining 60 are Japanese and Chinese run; they have an estimated 65% of the market. The industry has a brisk sales growth rate of 25% per year.

"The largest tofu factory in the U.S. is the Matsuda-Hinode company in Los Angeles; they produce about 16,000 pounds of tofu a day under fourteen different labels. The largest of the new breed of Caucasian-run plants is the New England Soy Dairy in Greenfield, Massachusetts. Founded in 1977, it now produces some 4,500 pounds of tofu a day and expects revenues of $750,000 in 1979. In its April 12 front page story on the tofu industry, *The Wall Street Journal* focused on The New England Soy Dairy.

"The U.S. tofu and soymilk industry presently uses approximately 7000 tons of dry soybeans per year.

"In July of 1978, tofu and soymilk producers founded the Soycrafters Association of North America (SANA), an educational and trade association. Its quarterly publication *Soycraft* is the primary source of information on soy protein foods in the Western World. For details contact:

"Ira Leviton, president
"Soycrafters Association of North America
"305 Wells St.
"Greenfield, MA 01301

"Worldwide, the tofu and soymilk industry is rapidly expanding. There are presently a total of 211,000 producers, including 38,000 in Japan, 158,000 in mainland China, 11,000 in Indonesia, 2500 in Taiwan, and 1470 in Korea. The largest tofu factories, located in Japan, produce over 100,000 pounds of tofu a day (15,000 tons a year) and the largest soy dairy [Vitasoy], located in Hong Kong, produces 500,000 bottles of soymilk a day (150 million bottles a year).

"Most of the new tofu shops and soy dairies in the U.S. have gotten into production using the technical manual *Tofu & Soymilk Production* by William Shurtleff & Akiko Aoyagi (who also wrote *The Book of Tofu,* which now has over a quarter million copies in print). This technical manual is available for $17.50 from:

"New-Age Foods Study Center
"P.O. Box 234
"Lafayette, CA 94549. Tel: 415-283-2991." Address: 790 Los Palos Manor, Lafayette, California 94549.

4125. **Product Name:** Eggless Soy Mayo.
Manufacturer's Name: Soy Plant (The).
Manufacturer's Address: 211 East Ann St., Ann Arbor, MI

© Copyright Soyinfo Center 2013

48104. Phone: 313-663-0500.
Date of Introduction: 1979. June.
New Product–Documentation: Steve Fiering. 1979. Whole Foods. Jan. p. 38, 40. "A Midwestern Interest in Tofu." This is included in a list of products presently produced by the company. Talk with Steve Fiering. 1988. June 10. This was introduced in the deli as a separate product about a year after the Missing Egg Salad. It was sold occasionally outside the deli as a wholesale product.

4126. *Spiral News* (*The*) (*Jamestown, Missouri*). 1979. Time to celebrate. Everyone is invited! No. 6. Summer. p. 4.
• ***Summary:*** "We are happy to announce that we have secured a very suitable 405 acre property for the Midwest Macrobiotic Homestead Community and a ready to start selling homestead size acreages. The location is excellent," 30 minutes from Columbia, Missouri and 20 minutes from Jefferson City, Missouri. Nearby is the Spiral Inn East/West Center located at Route 3 Box 114, Bowling Green, Missouri 63334. After 1 July 1979 the Spiral Inn East/West Center will be located several miles to the north at Route 1 Box 9, Moniteau Farm, Jamestown, Missouri 65046. Phone: (816) 849-2157. A map shows the area.

"'Moniteau' is derived from the Native American Indian word meaning 'Great Spirit.'" At the Third Annual Midwest Summer Festival and Solstice Celebration, topics to be discussed will include miso, tofu, sake, pickle and condiment production.

"The Spiral Inn East/West Center offers macrobiotic food, lodging and information to east/west travelers and interested visitors... Rates are $3.00 per day for those who want to help around the place, or $6.00 per day for those who just want to take it easy." People who have visited since the last issue of the newsletter was published include: Paul Duchesne (Fairfax, California), and Les Karplus (Champaign, Illinois).

Note: This is the earliest document seen (Dec. 2003) related to the company that later became Imagine Foods, pioneers of Rice Dream. However Imagine Foods' first commercial product was not introduced until April 1982. It was made at Moniteau Farm, Jamestown, Missouri. The company's first rice-based product, Amasake, was launched in March 1983. Address: Rural Route 1, Box 9, Jamestown, Missouri 65046. Phone: 816-849-2157.

4127. Shurtleff, William; Aoyagi, Akiko. 1979. The book of tempeh: A super soyfood from Indonesia. New York, NY: Harper & Row. 160 p. Illust. by Akiko Aoyagi Shurtleff. Index. July. 28 cm. [24 ref]
• ***Summary:*** Contents: Acknowledgments. What is tempeh? Preface. 1. Soybeans–Protein source of the future: Introduction, the causes of hunger and starvation–two analyses (*The Twenty-Ninth Day*, by Lester Brown–population, affluence; *Food First: Beyond the Myth of Scarcity*, by Lappé and Collins–population, narrow focus on increasing food productivity, international food exploitation, land monopolization and misuse, cash crop system of export agriculture). Ten reasons soy will be the protein source of the future: 1. Optimum land utilization. 2. Lowest cost protein. 3. High nutritional value. 4. Time tested. 5. Remarkably versatile. 6. Appropriate technology. 7. New dairylike products. 8. Hardy and adaptive. 9. Free nitrogen fertilizer. 10. Energy and resource efficient. "All of these ten factors work together synergistically, reinforcing one another, to give added weight to the prediction that soybeans will be a key protein source for the future on plant earth." Present patterns of soy protein utilization. New developments. An idea whose time has come.

2. Tempeh as a food. 3. Getting started (incl. basic preparatory techniques and 18 recipes, incl. a recipe for sweet Indonesian soy sauce {*kechap manis*}). Favorite tempeh recipes (13 Western favorites, 6 non-fried favorites, and 12 Indonesian favorites; also Suggestions for serving tempeh throughout the day). 4. Western-style and Oriental tempeh recipes (68 recipes). 5. Indonesian tempeh recipes (70 recipes). 6. Making tempeh at home or in a community. 7. Making tempeh starter. 8. The Indonesian tempeh shop. Map of Southeast Asia, including Indonesia. Map of Java, Madura, and Bali (p. 144). Appendix A: A brief history of tempeh East and West. Appendix B: Tempeh shops in the West. Weights, Measures, and Equivalents. Glossary. Bibliography. About the authors. About the New-Age Foods Study Center.

This book contains the first sizeable collection of American-style and Indonesian tempeh recipes (130 in all), the first illustrated descriptions of making tempeh, tempeh starter, and onchom on various scales in Indonesian tempeh shops, the first history of tempeh, detailed discussion of tempeh in Indonesian culture and of the many varieties of Indonesian tempeh, and the first recommendations for commercial names for the more than 30 types of tempeh that could easily be made in the West. It also contains chapters and reviews of the literature on tempeh nutrition and the microbiology and biochemistry of tempeh fermentation, plus the largest bibliography on tempeh to date (including many new Indonesian references), an annotated listing of 61 people and organizations around the world connected with tempeh, and the first list of tempeh companies in the West.

Page 26 states: "Modern soy-protein products, such as textured soy proteins, are increasingly available at supermarkets, often in forms that simulate the fibrous, chewy texture of meat.

Note 1. This is the earliest known book in any language worldwide devoted entirely to tempeh. Note 2. This is the earliest English-language document seen (Aug. 2011) that contains the term "modern soy protein products;" Shurtleff would soon start to use it to refer to defatted soy flour or grits, soy protein concentrates, soy protein isolates, and

© Copyright Soyinfo Center 2013

textured soy protein products.

4128. Shurtleff, William; Aoyagi, Akiko. 1979. The book of tempeh: A super soyfood from Indonesia. Professional hardcover edition. New York, NY: Harper & Row. 248 p. Illust. by Akiko Aoyagi Shurtleff. Index. July. 28 cm. [190 ref]

• ***Summary:*** A special cloth-bound professional edition of *The Book of Tempeh* prepared for libraries, commercial tempeh producers, microbiologists, students of Indonesian foods, and those who love fine books. In addition to the full contents of the paperback edition, it contains the following lengthy appendixes: B: Tempeh in Indonesia (an overview of the tempeh industry and market, including the number of shops by province, per capita consumption, etc.). C: The Varieties of Tempeh. D: Soybean Production and Traditional Soyfoods in Indonesia. E: The Microbiology & Chemistry of Tempeh Fermentation. H. Onchom or Ontjom. A Glossary of Indonesian Foods (the most extensive one available in English). Bibliography on Tempeh containing over 190 entries: Works on the world food crisis, works on tempeh cookery or Indonesian cuisine, scientific journal articles on tempeh, early Dutch- and German-language works on tempeh, Indonesian-language works about tempeh, key English-language works on microbiology, film and color slides on tempeh. Illustration of an Indonesian dancer. Expanded Index. A great deal of original research is contained in the extra 88 pages and 54 illustrations.

Appendix C, "The varieties of tempeh, states: "The many varieties of tempeh may be grouped into five basic types, according to the primary ingredient used: legumes, grains & soy, grains, presscake residues, and nonlegume seeds. Legume tempehs: Soy tempeh (*témpé kedelé or kedelai*, made from the seeds of *Glycine max*). Velvet-bean tempeh (*tempe benguk or tempe koro benguk*, made from the seeds of *Mucuna pruriens*, which are called *kara benguk* in Indonesian). Winged-bean tempeh (*tempe kecipir*, made from the seeds of *Psophocarpus tetragonolobus*). Leucaena tempeh (*tempe lamtoro or tempe mlandingan*, made from the seeds of *Leucena leucocephala*). Mung bean tempeh (*tempe kacang hijau*, made from the seeds of *Vigna radiata*, which are called *kachang hijau* in Indonesian). Broad-bean or fava-bean tempeh (*tempe kacang babi*, made from the seeds of *Vicia faba*, also called horse beans). Sesban-bean tempeh (*tempe turi*, made from the seeds of *Sesbania grandiflora*). Pigeon-pea tempeh (*tempe kacang iris*, made from the seeds of *Cajanus cajan*). Green-bean tempeh (*tempe kacang merah*, made from the seeds of *Phaseolus vulgaris*, which are called *kacang buncis* in Indonesian). Lima-bean tempeh (*tempe kara or tempe kara kratok*, made from the seeds of *Phaseolus lunatus*). Lablab-bean tempeh (*tempe kara-kara or tempe koro wedus*, made from the seeds of *Lablab purpureus*, which is called hyacinth bean in the USA). Jack-bean tempeh (*tempe kara bedong or tempe kara pedang*, made from the seeds of some strains of *Canavalia ensiformis*). Lupin tempeh (developed in Australia, made from the seeds of the narrow-leafed sweet lupin (*Lupinus angustifolius*) or the Andean lupin (*Lupinus mutabilis*)). Cowpea or black-eyed pea tempeh (developed in West Africa and Thailand, made from the seeds of *Vigna unguiculata*). Note: Chickpeas (garbanzo beans), baby limas, and great northern beans have also been used to make tempeh.

Grain & soy tempehs: Wheat & soy tempeh, barley & soy tempeh, rice & soy tempeh, bulgur & soy tempeh. Grain tempehs: Barley, rice, wheat, oats, and rye have been used with good results.

Presscake tempehs: Okara tempeh (called *tempe gembus* in Central and East Java where it is most popular, and called *oncom hitam* in West Java where it is not widely used). Peanut presscake tempeh (called black onchom (*oncom hitam*) in the Bogor region of West Java where it is most widely consumed, or white onchom (*oncom putih*) in the Tasikmalaya region, or "tempeh from peanut presscake" (*tempe bungkil kacang*) in East Java). Coconut presscake tempeh (*tempe bongkrek, tempe bungkil kelapa, or tempe kapuk*) comes in several varieties and can be can be poisonous if the pathogenic aerobic bacterium *Pseudomonas cocovenenans* grows on it and produces either yellow-colored toxoflavin or the more toxic colorless bongkrek acid. Peanut- & coconut-presscake tempeh (*tempe menjes*). Mung-bean-presscake tempeh (*oncom hitam or oncom ampas kacang hijau*). Soy- & peanut-presscake tempeh. Defatted soy-meal tempeh.

Seed tempehs (nonleguminous): Rubberseed tempeh (*tempe kaloko*) is made from the seeds of the rubber tree (*Hevea brasiliemsis*). Okra tempeh. Sesame & soy tempeh. Tempeh extenders and adulterants: Okara, cassava, mung-bean presscake, soybean hulls, sweet potato, coconut- or peanut presscake, papaya. The stages of tempeh fermentation (underripe to overripe): Premature tempeh (*tempe koro*), mature tempeh, slightly overripe tempeh (*tempe semangit or tempe lanas*), overripe tempeh (*tempe busuk or tempe bosok*), rotten tempeh. Tempeh wrappers.

Appendix D: "Soybean production and traditional soyfoods in Indonesia" discusses: Soybean production in Indonesia, traditional Indonesian soyfoods: Kechap (*kecap / ketjap, incl. kecap manis*), taucho (*tauco or taoco*), okara onchom, sereh (*sere*), taokoan or takoa, tofu (*tahu*). Other nonfermented soyfoods: Soy sprouts (*taugé kedele*), yuba (*bungah tahu*), soymilk, roasted soybeans (*dele sangan, kedele sangrai*), roasted soy grits or full-fat flour (*bubuk*

© Copyright Soyinfo Center 2013

kedele), fresh green soybeans (*kedelai rebus*).

Note: This is the earliest English-language document seen (March. 2009) uses the word "taucho" (spelled in that way) to refer to Indonesian-style miso.

Appendix E: "The microbiology and chemistry of tempeh fermentation" discusses: What are fungi?, general characteristics of *Rhizopus* molds, *Rhizopus* species used to make tempeh, pure cultures versus mixed cultures, preparing soybeans for fermentation, requirements for mold growth, general changes during tempeh fermentation, changes in nutrients and digestibility, the finished tempeh, the advantages and disadvantages of tempeh fermentation, suggestions for further research.

Appendix H: "Onchom or ontjom" discusses: Introduction. The varieties of onchom (*onchom merah* or *onchom beureum*)*:* Peanut-presscake onchom, okara onchom, soy onchom, coconut-presscake onchom. Making peanut-presscake onchom in a commercial shop. Making okara onchom in a commercial shop. The microbiology of onchom. Laboratory studies of onchom. Aflatoxins. Works on onchom and Neurospora. People connected with onchom and Neurospora. Continued. Address: New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549.

4129. Finer, Steven. 1979. Oriental tofu factory arrives in New England. *Christian Science Monitor.* July 5. Food section. p. 17. New England edition.
• ***Summary:*** About the New England Soy Dairy. Describes how tofu is made there using soy milk coagulated with nigari–in much the same way rennet works with cheese. The whey, a by-product, is discarded and the curds are pressed in large stainless steel boxes.

By the end of 1979 the Soy Dairy expects to be using more than 25,000 pounds of soybeans a week, according to founder Tom Timmins. Later this year he hopes to introduce four flavors of soy milk, soy mayonnaise, and a variety of soy cutlets.

Also discusses *The Book of Tofu* by Shurtleff and Aoyagi. Gives recipes for Tofu Guacamole and Marion's Saucy Tofu.

4130. Fiering, Steve. 1979. Re: Thanks for hospitality. Next Soycrafters conference. Tempeh equipment. Letter to William Shurtleff at New-Age Foods Study Center, July 11. 1 p. Typed, with signature on letterhead.
• ***Summary:*** Across the top of the letterhead is written "Organic Soy Products." "Thank you again for your hospitality. The evening with you and Akiko was one of the highlights of the trip for both Sue and myself. I came back to The Soy Plant with many new insights into the soy foods business and our shop in particular and my approach has changed quite a bit. I feel interested in being more businesslike and professional in my work...

"All plans are still go for the conference, I'm really quite excited... Please confirm my order for 30 *Book of Tempeh* and order 25 Ballantine *Book of Tofu."*

Gives the address and phone number of Kerry Sandford of Ann Arbor, Michigan, who is interested in making bean busters–a pedal-powered Corona mill for dehulling soybeans.

Gives details on the company's tempeh incubator and perforated plate. Address: The Soy Plant, 211 East Ann St., Ann Arbor, Michigan 48104. Phone: (313) 663-0500.

4131. Sheridan, Margaret. 1979. Soybeans sprout on Detroit's east side [Yellow Bean Trading Co.]. *Detroit News.* July 11. p. 1E, 6E.
• ***Summary:*** Tim and Carol Ann Huang, both vegetarians, learned about soyfoods while living on The Farm in Tennessee. Both had experience cooking. The Yellow Bean Trading Company, which they opened recently [March 1979] on Mack Ave. in Detroit, is a natural foods store and deli. "Yellow Bean is really an information center on soybeans," says Carol Ann. The deli offers: Whole wheat sandwiches with sprouts and crunchy vegetable spreads; blocks of tofu (soybean cheese); pies with whole-wheat crusts and creamy fillings like peanut butter, carob, or cocoa; egg rolls and nori rolls. All the products contain soy–often tofu. For their two children, Eva and Ethan, the Huangs use soy flour in pancakes and soy pulp [okara] in baked goods. They concoct milkshakes using soymilk and use Ice Bean instead of ice cream. A large photo shows Carol Ann slicing tofu on a plate surrounded by many dishes containing tofu. Address: News Staff Writer.

4132. Cooley, Oscar. 1979. Soybean: China's gift to America. *Anaheim Bulletin* (*California*). July 13. p. B6.
• ***Summary:*** This editorial discusses the remarkable soybean's many uses. It is good to eat and good for you, and has many uses in industry. "Another culinary import from the Orient is 'tofu,' which is made of soybeans. If you are tired of hamburger, try tofu, which is said to be a fine substitute for lean meat and cost about half as much. A tofu maker in Los Angeles [Hinoichi] is turning out about ten tons a day."

A legume, the soybean adds nitrogen to the soil. "It sort of pays rent for the land which it occupies." "When we eat meat, milk, cheese, or eggs, we are also consuming soybeans, one step removed, since soy meal is a basic element [the main protein source] in many animal feeds. Soy flour, one of the least expensive sources of edible protein, is used in many foods from bread and other baked goods to sausages and whipped toppings.

The USA now grows well over half the world's soybeans–more than China. "To the American farmer, the development of the soybean has been a godsend."

The U.S. has begun to warm up to Communist China. However little we may get from the Chinese politically, "we may be thankful for their botanical gift, the amazing soybean."

4133. Leviton, Richard. 1979. Financial statement: Soycrafters Association of North America. Period: January 1 to July 15, 1979. Colrain, Massachusetts. 1 p. July 15. Unpublished manuscript.
• ***Summary:*** The statement is divided into Income and Expenses. SANA has total income of $7,650, including $2,600 in new SANA memberships (65 x $40 each), $1,447 in Soycraft advertisements, $830 in Soycraft subscriptions (55 x $15 each), and $2,300 in loans ($800 from Country Bank, Greenfield, Massachusetts; $600 from New England Soy Dairy, Greenfield; and $900 [loan] from Bill Shurtleff, Lafayette, California). Expenses total $6,598, including $1,575 for Soycraft magazine production, $1,070 for telephone, and $1,008 for postage and mailing. Address: Heath Rd., Colrain, Massachusetts 01340.

4134. *Family Circle.* 1979. Tofu: The Oriental way to high-protein, low-calorie meals. July 17. p. 140, 157, 160, 164.
• ***Summary:*** Describes, with color photos, how to make tofu at home and gives 6 recipes, reprinted from *The Tofu Cookbook* by Cathy Bauer and Juel Andersen. "An ancient Oriental secret isn't a secret anymore–almost everyone is discovering tofu, the protein packed bean curd made from soybeans. Tofu contains no cholesterol, is low in fat and has one of the lowest ratios of protein to calories. It is also low-cost. In fact, with homemade tofu, you can add protein to your diet for only 22 cents per meal per adult–and that's a bargain! More good news: tofu is extremely versatile. It takes on the flavors of the other ingredients in a dish so you can hardly know it's there. That means you can make the Tofu Vegetarian Lasagna... and never miss the meat and ricotta you substituted it for. Or, try the delicious Stir-Fried Tofu with Vegetables... rich with the flavors of garlic and ginger."

• ***Summary:*** "Tofu is a four letter word for a soybean product which is rich in protein and can be very versatile in the hands of a meal planner." The Soycrafters of North America will sponsor its conference next week on 26-29 July at Hampshire College in Amherst, Massachusetts. It is expected to attract some 200 persons from all parts of the United States. Coordinating the conference will be executives and staff of the New England Soy Dairy in Greenfield, MA. The Soy Dairy has a staff of 35. The association has its office in Greenfield and functions, including the conference, are directed by Richard Leviton. Leviton is editor of a new publication, The Journal of the Soycrafters Association of North America, which has its first issue this month.

4137. *Soycraft.* 1979-1980/02. Serial/periodical. Greenfield, then Colrain, Massachusetts, USA. Richard Leviton, editor and publisher. Vol. 1 Summer 1979. Quarterly magazine.
• ***Summary:*** Continues (informally) *Soycraft* (Lawrence, Kansas), privately published by David and Danette Briscoe, starting in Oct. 1977. The first issue of this *Soycraft* magazine (Summer [July] 1979) was published from Leviton's office at the New England Soy Dairy, 158 Main St. No. 3, Greenfield, Massachusetts 01301 USA. The second issue was published from Leviton's office in his home at 100 Heath Road, Colrain, Massachusetts. Both these issues bore the subtitle *The Journal of the Soycrafters Association of North America* on the cover and title page This high-quality periodical is the world's first English-language magazine devoted solely to foods made from soybeans. Leviton was an excellent researcher and writer. Renamed *Soyfoods* with issue No. 3 in the summer of 1980.

On the cover of No. 1, Greg Weaver serves at customer at the Rochester Soy Deli (New York state).

On the cover of No. 2, Jeremiah Ridenour and Akiko Aoyagi are seated at a wooden table in the Rochester Soy Deli; it is loaded with dishes prepared at and sold by the Rochester Soy Deli. Address: Massachusetts.

4151. **Product Name:** Tofu.
Manufacturer's Name: Banyan Enterprise USA. (Banyan Enterprises).
Manufacturer's Address: 6909 Renwick #88, Houston, TX 77081. Phone: 713-995-6885.
Date of Introduction: 1979. July.
Ingredients: Hard Tofu (7/93): Soybeans, water, natural calcium sulphate, glucono-delta-lactone.
How Stored: Refrigerated.
New Product–Documentation: Shurtleff & Aoyagi. 1979. July. New Tofu Shops & Soy Dairies in the West. David Chiu (who is Chinese-American).

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). New name and address: Banyan Enterprise USA, 7332 Rampart St., Suite 113, Houston, Texas 77081. Phone: 713-995-6885. Owner: David Chiu.

FIND/SVP. 1981, May. "The tofu market: Overview of a high-potential industry." p. 95. Name given as Banyan Enterprises. Talk with Bob Phipps. 1989. Feb. 27. Banyan is run by a Korean man [sic]. He and Calco have a fierce competition in Houston; both sell their tofu at very low prices.

Label for "Hard Tofu" sent by Walter Lin, purchased in Houston. 1993. July. 5 by 4 inches. Red, blue, and black on clear plastic film (which covers a 1-pound tub of tofu). The company is now named Banyan Foods, located at 7332 Rampart #104, Houston, TX 77081. The label reads: "Pasteurized. Delicious and tasty. Keep refrigerated." The ingredients are shown above.

Talk with Gary Chiu, son Carol Chiu, who now owns Banyan Foods. 1997. Nov. 24. David Chiu is no longer with the company. Banyan Foods is now located at 1090 S. Wilcrest Dr., Houston, TX 77099. Phone: 281-575-8801. In addition to tofu, they also make egg roll skins and other Chinese flour products. They moved to this address in about 1990, but for several years had to use up labels with the old Ramparts address. Gary is quite sure that this company has always been run by his family, and was never run by a Korean man.

4152. Bean Machines, Inc. 1979. North America's most complete source of tofu and soymilk equipment (Ad). *Soycraft* (*Greenfield, Massachusetts*) 1(1):25. Summer.

4158. J.F. [Janice Fillip]. 1979. In times of Plenty. *Whole Foods* (*Berkeley, California*). July. p. 9-10.
• ***Summary:*** Discusses the work of Plenty (run by The Farm in Tennessee) in Guatemala and Tennessee. In Guatemala: "When an earthquake devastated Guatemala in 1976, some members of the Plenty team went there to assess the damage... Drawing on eight years of experience in soybean cultivation and soyfood production on The Farm, Plenty volunteers introduced the high-protein soybean to local farmers in hops of enhancing the Guatemalan diet. Experiments in adapting soybeans to tropical highland growing conditions captured the interest of local farmers who began planting soybeans from seeds donated by UNICEF. Plenty started teaching local women how to make soymilk and tofu with native utensils. Note: This earthquake, which struck Guatemala on 4 Feb. 1976, magnitude 7.5, killed 22,778 people.

"Funded by UNICEF, Plenty is now involved in construction of a soy dairy in Solola, the Cakchiquel capital, near Lake Atitlan. The dairy is expected to produce 100 pounds of tofu and 40 gallons of soy ice bean (soymilk ice cream) three times a week and to supply free ice bean to school lunch programs. The solar-powered soy dairy is designed to become a cottage industry for local people to produce low-cost, high-protein foods.

"At Plenty-On-The-Farm, a Village Technology training program provides instruction for Third World trainees in nutrition and soy production, agriculture, mechanics, village construction, radio communications and electronics, solar and water systems, primary health care and midwifery. Trainees are given free room and board at The Farm while they study. The program has already trained 27 people from Guatemala, Mozambique, West Germany, Portugal, South Africa, Brazil and India, and there is currently a backlog of people applying to study in the program."

4159. Kajs, T.; Lawhon, J.T.; Rhee, K.S. 1979. Tamucurd: A high protein ingredient. *Food Technology* 33(7):82-86. July. [23 ref]
• ***Summary:*** Tamucurd (after Texas A&M University) is a sort of tofu made from glandless cottonseed, which contains no gossypol in pigment glands. It has been most extensively evaluated as a cream cheese substitute. Address: Procter and Gamble, Cincinnati, Ohio.

4160. **Product Name:** Tofu.
Manufacturer's Name: Korea Farm.
Manufacturer's Address: 3456 (or 3707) N. Clark, Chicago, IL 60613. Phone: 312-348-1625.
Date of Introduction: 1979. July.
How Stored: Refrigerated.
New Product–Documentation: Shurtleff & Aoyagi. 1979. July. New Tofu Shops & Soy Dairies in the West. Mr. Young Sun Yo. Soyfoods Center Computerized Mailing List. 1981. Jan. 22.

shake (with frozen bananas and soymilk), carobanana. The deli case at White Wave. The outside of The Cow of China.

Note 1. This is the earliest document seen (Feb. 2007) that mentions the use of frozen bananas to add thickness to a smoothie–a breakthrough idea.

"Matthew Schmit–proprietor of The Tofu Shop, in Telluride, Colorado, Juice Bar, Dining, Catering, Wholesale Kitchens, 'producers and suppliers of specialty foods for the western slope–operates a soy-based restaurant that seats about thirty people and has waiters and waitresses. The Restaurant, which opened in October 1977, and had gross sales last year of twenty thousand dollars, is open six days a week from 11:00 A.M. to 9:30 P.M. Matthew astonished me with the figure of one thousand dollars as the initial capital investment for this business, which now produces 250 pounds of tofu for weekly wholesale distribution in addition to the flourishing restaurant.

"The menu, which features a stunning photograph of Rocky Mountains rising out of a misty valley, and which they use as a promotional brochure, delineates the fare: Entrees (Stir-fried tofu, Rice & vegetables; Soy burgers, Tofu burgers, Okara burgers, Grilled tofu & vegetables in pita bread, Guacamole & tofu, Spicy tofu & rice filling with guacamole for burritos); Smoothies (Carob-honey soymilk with banana, Carrot sunny shake); Beverages (Miso broth, soymilk, [soy] whey); and Salads (Tofu & guacamole salad, okara salad, tofu & vegetable salad)." Matthew explains the okara salad and whey.

"Matthew and his associates regard the tofu and soyfoods as an entrance into an expanded food processing line for their local market, a move that will lessen their dependence on only one or two products. Believing that every community should have its own fresh tofu, Matthew adds that 'everyone develops their own business according to the nature of their community.'" During the holiday season, Matthew's community created an exotic recipe for "tofu turkey." "Chunks of tofu are seasoned and basted, often carved in the shape of turkeys, and baked for an entire day"–after which "they taste exactly like turkey."

Note 2. This is the English-language document seen (Jan. 2007) that contains the term "Okara burgers" (or "Okara burger"). Address: Sunrise Farm, 100 Heath Rd., Colrain, Massachusetts 01340.

4163. Leviton, Richard. 1979. Soycrafters Association of North America. Director's Report. Colrain, Massachusetts: SANA. 17 p. July 28.

• ***Summary:*** Contents: I. Summary of progress. II. Financial report. III. Proposals to the membership: 1. Establish regional coordinators & develop infrastructure; Activities of the RCs. 2. Soyfoods Data Book (SANA would publish its own Green Book, like the ASA Blue Book). 3. Soyfoods publicity program. Soycrafters questionnaire (Please complete and return to registration desk before leaving conference). 4. Lobbying FDA/USDA for acceptance of soyfoods in school lunches. 5. Liaison and cooperation with American Soybean Association and Food Protein Council. 6. 1980 SANA Conference in conjunction with INTSOY & NRRC [at the University of Illinois, Champaign]. 7. Children's educational program with theater and video. IV. Organizational plans.

The "Summary of progress" section (p. 1) begins: "Perceiving a lull in the forward movement of the newly formed Soycrafters Association, last October I offered to assume leadership of SANA and to publish its journal, Soycraft. The appointed director, Larry Needleman, found himself swamped with work with his new tofu equipment importing company, Bean Machines, Inc., and willingly handed over the directorship, which consisted of one box of folders and stationery. In January, SANA opened a small office at the New England Soy Dairy, in Greenfield, Massachusetts and David Kilroy joined as advertising and production supervisor for Soycraft." An international mailing was done to all the 900 names on Bill Shurtleff's mailing list, with about a 10% response. The summer conference at Hampshire College was a success, attracting "225 people from all over the USA including Hawaii, Puerto Rico, three from England, one from Switzerland, and a broad mixture of academics, soycrafters, farmers, food technologists. As of July 28, we had generated 65 new members (85 as of 8/27) and 50 subscribers (87 as of 8/27).

"On June 1, SANA took new office space in downtown Greenfield, set up files, began to accumulate review copies [of books] for its library, and purchased an electric typewriter. Essentially, SANA has used its funds to organize and sponsor the Soycrafters Conference (which cost about $14,000) and publish Soycraft #1, sixty pages long."

Two tables (p. 2) compare the types/categories of SANA membership and the number of members in each category in January and in July, 1979, before and after the conference.

Two maps show: (1) The USA and Canada divided into 9 regions. (2) Location of soycraft companies (manufacturers) on an outline map of the USA.

Addenda: Report of the SANA Committee on Committees (3 p.). Overview of committees and proposed activities. Organization chart showing relationship of SANA membership, Regional representatives, executive board, director, and six committees. Address: Director, SANA, 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

4164. Leviton, Richard. 1979. Nasoya: Soyfoods for the everyday American consumer. *Soycraft* (*Greenfield, Massachusetts*) 1(1):26-29. Summer.

• ***Summary:*** This is the earliest known in-depth story published on Nasoya Foods. The company was conceived on 5 March 1977 by "John Paino and Bob Bergwall (Nasoya's two owners), who have known each other since college

© Copyright Soyinfo Center 2013

some 10 years ago. At the time Bob was making tofu boxes in Boston and working as a laboratory technician for the state; John was a manufacturer's representative for a welding company in Concord. Before this, both John and Bob were sailors, skippering yachts from Cape Cod to the West Indies."

That March they scoured the counties west of Boston looking for an old dairy. Finally they purchased Harper's Dairy, in Leominster near Route Two, primarily for its superb well and well water. Nasoya produced its first batch of tofu in late April 1978. Their system was designed to produce 2,000 lb/day of tofu. "After only one year's operation, they have already achieved their envisioned goal of 10,000 lb/week and are concerned that their shop–which is 1,200 square feet, with a 10 by 12 foot walk-in cooler, and three 35-foot trailers–is nearing its capacity. John expects they will have to move and set up an even larger facility in the next year. 'After one year of tofu-making,' Bob remarks, 'we feel we are beginning to learn how to make tofu properly...'" These days John and Bob, burned out from too much hands-on tofu making, spend their time managing the business. John's wife, Sarah, keeps the books. There follows a detailed description of the plant's equipment and tofu-making process. The finished tofu is placed in individual plastic tubs and sealed with a manual "monkey-packer" heat sealer. The company's main competitor, New England Soy Dairy (located 60 miles to the west) had a firm hold on the natural foods market, causing Nasoya to look at other markets, such as institutions. But finding little interest there, they were forced to compete for the natural foods market.

John Paino notes: "'We stopped making sweetened soymilk because we felt it made everyone too yin, it spaced people out. If you drink sweetened soymilk every day, you will loose touch with reality.' Bob Bergwall says that when Nasoya first introduced their soymilk last year, the market was wide open and they could have sold enormous quantities. 'But we didn't want to put out a product we couldn't believe in. We might produce a plain soymilk sometime.'"

"This summer Nasoya will release a new line of tofu products, including soy mayonnaise, 'eggless' egg salad, and an onion, a dill, and a zesty Italian dip." Address: Colrain, Massachusetts.

4165. Leviton, Richard. 1979. Judging the suitability of soybeans for tofu-making. *Soycraft* (*Greenfield, Massachusetts*) 1(1):30-38. Summer. [40 ref]
• ***Summary:*** Contents: Introduction, Strategies for selecting suitable soybeans: Composition analysis, shop tests, soybean pedigrees. Soybean agronomy: Maturity groups, Japanese and U.S. soybeans compared, environmental stress and soybean composition. The physical and chemical properties of soybean proteins: Physical description of the proteins, hydration, solubility, soak-water pH, heat treatment, phytates, disulfide polymerization. ionic environment and salt concentration, denaturation of the proteins, future studies.

Tables show: (1) Soybeans classified by maturity group and composition. (2) Map of Maturity Groups in North America. (3) Pedigrees of selected soybean cultivars released in the U.S. and Canada. (4) Selections from Uniform Soybean Tests: Year, variety, lowest protein, highest protein.

"Novice tofu-makers in this country undoubtedly have experienced a full range of bewildering difficulties and perplexing performances with their soybeans. In the early days of Laughing Grasshopper Tofu Shop, for example, a full day's production, quite often, was (tearfully) discarded because the tofu was too oily, or too crumbly, or too dense, or, plainly, no good, and we were never able to determine precisely the origin of the problem. We soon learned, thereafter, about varietal differences among soybeans–there are hundreds–and that certain varieties are simply better suited for tofu production than others. Later, we received two shipments of Corsoy–one from Minnesota, one from Iowa–and the performances for each were startlingly different, as if they were two different varieties altogether. This was puzzling and the situation was repeated again, when we experimented with Hodgson, reputedly good for tofu-making: our results demonstrated poor performance, yet reports from another shop indicated Hodgson was a satisfactory tofu bean. Why is this?

"In this article we will look at the questions, how to tell which varieties of soybeans are suitable for tofu, what makes them so, why do some varieties perform poorly, and why proven varieties can vary so greatly in their performances. We will examine these problems from two primary angles-first, soybean agronomy, in order to assess the effect of field conditions on soybean composition and quality, and second, the physical and chemical properties of the proteins, in order to examine the subtle biochemical interactions among soybean components in tofu-making–and we will begin with an assessment of several strategies for establishing guidelines for selecting suitable soybeans for tofu." Address: Colrain, Massachusetts.

• ***Summary:*** This is the first article (actually, more like an editorial) in this new magazine. "Making and marketing soyfoods is becoming an increasingly widespread and satisfying practice. What attracts many people to soycrafting,

© Copyright Soyinfo Center 2013

I think, is that it serves as a focal point 'for many vital life-ambitions currently circulating in our generation.'

"Some of these are: 'Desire for social service, anguish over world hunger, meaningful political action, skilled traditional foodcrafts, employing appropriate technology, self-employment, health-consciousness, food-awareness and vegetarian lifestyles, ecological concern, local economies and community food self-reliance, an integrated, non-alienated workplace, and right livelihood–these are some of the core motivations that are the inspiration for many of the newly-formed tofu shops and soy dairies in the United States."

Note: For these reasons, some people have referred to the "soyfoods movement" in North America and soyfoods as a "way of life."

4168. **Product Name:** Tofu.
Manufacturer's Name: Meiji-ya.
Manufacturer's Address: 1569-F Redondo Beach Blvd., Gardena, CA 90247. Phone: 213-770-4677.
Date of Introduction: 1979. July.
New Product–Documentation: Shurtleff & Aoyagi. 1979. July. New Tofu Shops & Soy Dairies in the West. Owner: Mr. Charles Iwana. Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Charles Iwana. Talk with owners. 1989. Feb. 22. Company is called Meiji-ya Tofu, 16440 Southwestern Ave., Gardena, California. Phone: 213-538-0403. They are very uncooperative, unfriendly, almost rude.

4169. *Money.* 1979. Americanized tofu. July. p. 25-26.
• ***Summary:*** High meat prices are popularizing tofu in America. In recent years the number of U.S. producers has gone from 60 to 150. "Tofu costs $0.55 to $1.09 a pound, compared with about $1.60 a pound for hamburger. Tofu has only a third the protein of hamburger. But it's the same high-quality protein, and tofu has a third the calories of hamburger, very little fat and no cholesterol. For recipes, write to the New England Soy Dairy, 305 Wells St., Greenfield, Massachusetts 01301."

• ***Summary:*** Discusses visits to Takatsuka Marugo, Tengu Tofu, Izumiya Shokuhin, Tokyo Tofu, and Takai Tofu & Soymilk Equipment Co. Address: Bodega, California.

4171. **Product Name:** New World Rice & Tofu Sandwich.
Manufacturer's Name: New World Enterprises. Renamed New World Natural Foods in 1985.
Manufacturer's Address: 226 Cypress St., Brookline, MA 02146. Phone: 617-232-5973.
Date of Introduction: 1979. July.
Ingredients: Organic short grain brown rice, tofu, carrot, lettuce, scallions, peanut butter, miso, safflower oil, tamari, ginger root, and sea salt, wrapped in chapati bread.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Refrigerated.
New Product–Documentation: Talk with Paul Duchesne. 1989. Aug. This company was started in about 1980-81 by a woman in Brookline. He does not know from whom she learned to make the sandwich. The product was called Rice and Tofu Sandwich. Label sent by Paul Duchesne. 1989. Aug. 11. 3 inch diameter. Dark blue lettering on a light blue and orange background illustration of the world. This label is currently in use by Emily Merghart in Brookline. Phone: 617-232-5973.

Talk with Emily Morse Merghart. 1989. Aug. 18. Emily started this company on 5 July 1979 at 226 Cypress St. in Brookline. Before that she was a ballet dancer. Her husband was a dancer. She developed the product herself and did not learn the process from anyone else. She never met Paul Duchesne. This was her first sandwich. She is positive that there were no other rice and tofu sandwiches on the market at the time; she never saw any in the many stores to which she distributed hers. In mid-1988 she moved to her present address, 157 Sutherland Rd., Brookline, Massachusetts 02146. Phone: See above. She now has a line of ten sandwiches, and makes 1,000 a day.

4172. **Product Name:** Tofu.
Manufacturer's Name: Oanh's Tofu Shoppe.
Manufacturer's Address: 541 Hopkins Blvd., Biloxi, MS 39530.
Date of Introduction: 1979. July.
New Product–Documentation: Shurtleff & Aoyagi. 1979. July. New Tofu Shops & Soy Dairies in the West. Oanh or Nick Drozdowski.

4173. **Product Name:** Tofu Tarts.
Manufacturer's Name: Pie in the Sky Bakery.
Manufacturer's Address: San Francisco, California.
Date of Introduction: 1979. July.
Ingredients: Filling: Firm tofu, water, maple syrup, vanilla, almond extract, oil, lemon juice, carob powder, salt. In pie shell, topped with almonds and raisins.
Wt/Vol., Packaging, Price: 4.5 inch tart tins.
How Stored: Refrigerated.
New Product–Documentation: Recipe given by Shurtleff & Aoyagi. 1979. Tofu & Soymilk Production. p. 165.

4174. **Product Name:** Tofu.
Manufacturer's Name: Prem Soyfoods.
Manufacturer's Address: 538 Fredricksburg Rd., San Antonio, TX 78201. Phone: 512-828-2027.
Date of Introduction: 1979. July.
New Product–Documentation: Shurtleff & Aoyagi. 1979.

July. New Tofu Shops & Soy Dairies in the West. Bill Hyde.

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives phone number. Owner: Bill Hyde.

4175. **Product Name:** Nori Rolls (With Tofu Filling).
Manufacturer's Name: Real Food Co.
Manufacturer's Address: Boulder, Colorado. Phone: 449-7790.
Date of Introduction: 1979. July.
Ingredients: Rice, nori, tofu, zucchini, green pepper, carrots, turnips, onions, sesame oil, miso, umeboshi salt plums, shoyu, garlic, spices.
Wt/Vol., Packaging, Price: 8 oz.
New Product–Documentation: Label. 1981. 6.25 by 2.5 inches. Paper. Black on tan. Shurtleff & Aoyagi. 1979. Tofu & Soymilk Production. p. 167.

4176. Schulz, Julie. 1979. Small is beautiful for tofu, too. *Well Being* No. 44. p. 45. July.
• ***Summary:*** "Mia Posner and Harry MacCormack are partners–both in marriage and in business–and the 'work like dogs.' The business is Sunbow Farm, a corporation dedicated to providing alternative, low cost protein to the Corvallis, Oregon community in the form of tofu, soy sausage [made from okara], and soy burger."

Describes make tofu at Sunbow Farm using a wood stove. They decided to begin a tofu business last July, in part because the only tofu producer in Corvallis, the Welcome Home Bakery and Tofu Shop, had recently closed. Sunbow currently transforms 1,400 lb of soybeans a month into soy products, and makes 115 pounds of tofu daily.

Harry works some nights as a carpenter on the stage crew at Oregon State University. This moonlighting helps buy new equipment and supplement their income from the business. In addition to the tofu business, Harry and Mia run a 27-acre organic farm where they grow fruits, vegetables, and grains. They use whey (a by-product of tofu) and crop rotation to enrich the soil. A photo shows Harry pressing soymilk from the pulp; Mia is about to add nigari.

4177. Senti, Richard. 1979. Tofu: New staple for the American diet. *Well Being* No. 44. p. 40-44. July.
• ***Summary:*** The New England Soy Dairy, in operation since Jan. 1977 and the largest new-age tofu shop in America, makes about 23,000 lb/week of tofu in a 3,000 square foot production area. The company also makes and sells "Soymayo," an eggless mayonnaise. Four photos show tofu being at the New England Soy Dairy: Drawing off the soymilk. Adding nigari. Ladling the curds into the press. Pressing the tofu.

In San Francisco, California, the Farm Food Co. makes 2 tons of tofu a week–even in the midst of a major expansion. This company is an outgrowth of The Farm in Tennessee, a religious vegetarian community led by Stephen Gaskin. Gives a brief history of The Farm. Page 43 gives "a partial inventory of the many possible uses for tofu." Page 44 gives 5 tofu recipes.

and energy drinks, soymilk eggnog (soy nog), soymilk whipped cream, chip dips, puddings, custards. 13. Silken tofu & pressed silken tofu (Silken tofu is made from concentrated soymilk). 14. Lactone silken tofu (GDL). 15 Grilled tofu. 16. Fermented tofu. 17. Dried-frozen tofu. 18. Yuba. Appendix A: Resources. People & institutions connected with tofu & soymilk production. B: Weights, measures & equivalents. Bibliography. About the New-Age Foods Study Center.

See ¼-page ads in *East West Journal.* 1979. Dec. p. 4. 1980. Jan. p. 19.

Note 1. This is the earliest English-language book seen with the term "soymilk," spelled as one word, in the title.

Note 2. This is the earliest document seen (Feb. 2002) that mentions tofu jerky or any kind of soy jerky.

Note 3. This is also the earliest English-language document seen (April 2013) that uses the word "quark," or "queso blanco" in connection with soy cheese or tofu.

Note 4. This is the earliest English-language document seen (Sept. 2012) that contains the term "cultured soymilks" (or "cultured soymilk").

Note 5. This is the earliest English-language document seen (Sept. 2012) that contains the term "ripened soymilk cheeses" (or "ripened soymilk cheese").

Note 6. This is the 2nd earliest English-language document seen (April 2013) that uses the term "smoked tofu," but the first that uses it in its modern sense.

Note 7. This book contains the most detailed and complete descriptions seen to date (Oct. 2012) of how to make tofu, soymilk, and yuba on a commercial scale.

Note 8. This book was first printed on 1 Aug. 1977 in a photocopied and rough-typed edition with a yellow and black cover.

Note 8. Reviews of this book appeared in many publications: (1) Richard Leviton. 1980. *Soycraft* (Massachusetts). 2(1):63-64. Winter. "An indispensable operating manual for soyfoods entrepreneurs... The illustrations alone make the book a valuable reference tool... a sustained inspiration. The only book of its kind in English." (2) *Food Chain* (Intermediate Technology, England). 1997. No. 20. March. p. 6. Address: New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549.

4180. Shurtleff, William; Aoyagi, Akiko. 1979. Distributors of natural nigari in North America (Document part). In: William Shurtleff and A. Aoyagi. 1979. Tofu & Soymilk Production. New-Age Foods Study Center. 336 p. See p. 312.

• ***Summary:*** July 15–9:45. Akiko and I fly to New York City from Lafayette. The previous day our *Book of Tempeh* had arrived from Harper & Row, and we took it with us to the conference. Stay in a hotel near a park, with fear of being mugged or robbed in this unfriendly city.

We attend and I speak at Buckminster Fuller's World Games (about world hunger and world resources) in New York City. Have a nice talk there with Robert Rodale.

Akiko and I meet Uri Geller at his home / apartment–at his invitation, because he knows and admires our Book of Tofu; he is a very nice, healthy man with world-famous psychic abilities. He bends my house key before my eyes by psychic force, without touching it; I carry that useless house key on my key chain for years and show it to many people.

© Copyright Soyinfo Center 2013

Uri also replicates a drawing I made of a stick figure standing with both hands held high under a rayed sun; he was sitting across the room and could not see what I had drawn.

I do about 3 live radio broadcasts for Gary Null (WBAI Natural Living) and visit his home for taping segments; he is a bachelor. Also do an evening program on soyfoods for Annemarie Colbin at her home. And we have dinner at The Cauldron (that makes tofu–and probably tofu cheesecake–we visit the kitchen) and Souen (which makes tofu cheesecake), both macrobiotic restaurants.

While in New York City, Akiko and I visit our editors at Harper & Row headquarters–many stories up in Manhattan.

July 22–Overnight at Ira and Kathy Leviton's home at Sunrise Farm, 100 Heath Road., Colrain, Massachusetts.

July 24? Visit Michael and Shelley Cohen's Tempeh Works, which is preparing to open in a gas station in Greenfield, Massachusetts (production officially began on Oct. 1). I take 3 pages of handwritten notes and many photos for our forthcoming book *Tempeh Production* (see p. 95-98). I first describe each piece of equipment in the shop and illustrate some, then describe the process (20 lb of dry beans makes 52 lb of tempeh), and finally draw a detailed floor plan of the shop. This was the first batch of tempeh Michael had ever made in this shop. He sold 200 lb of tempeh to the Soycrafters Conference later that week.

July 25. Our book *Tofu & Soymilk Production*, published by our New-Age Foods Study Center, arrives from the printer (Braun Brumfield) in Ann Arbor, Michigan. It is the first book we have self-published properly, and the first to contain an ISBN (our second, 0-933332-01-7) and an LCCN.

July 26-29 (Thurs. to Sun.) Second Annual Soycrafters Association of North America (SANA) conference at Hampshire College in Amherst, Massachusetts, organized and run by Ira / Richard Leviton. 230 people attend. It is Akiko's first SANA conference. A magnificent event. Also first issue of *Soyfoods* magazine out, published by Leviton. One evening there is a square dance. I recall Jon Lee of New England Soy Dairy being a superb square dancer. I meet Paul Duchesne. Steve Earle from San Jirushi gives a wooden speech on the history of his company and the tamari they make.

July 30-31. After the conference, with Richard Leviton driving and Jeremiah Ridenour on board, we visit The Tofu Shop, a soy deli at 686 Monroe Ave., Rochester, New York, founded by Andy Schecter, Greg Weaver, and Norman Holland. Very interesting. Ira takes lots of photos for an article in *Soyfoods* magazine. One nice one shows Akiko and Jeremiah Ridenour seated in the Deli at a table which is loaded with soyfoods dishes ready to eat.

While in Rochester, Shurtleff presented a lecture and slide show to 150 people at the Eisenhart Auditorium in the Rochester Museum and Science Center; it was sponsored by The Tofu Shop.

Aug. 2–We arrive back in Lafayette. Address: New-age Foods Study Center, Lafayette, California.

4183. Shurtleff, William; Aoyagi, Akiko. 1979. The book of tempeh: A super soyfood from Indonesia. Professional hardcover edition (Continued). New York, NY: Harper & Row. 248 p. Illust. by Akiko Aoyagi Shurtleff. Index. July. 28 cm. [190 ref]

• ***Summary:*** Continued: Numbered figures (line drawings unless otherwise stated. The capital letter before the decimal refers to the appendix number). B.1 Table: Tempeh shops in Indonesia by province: Home-industry scale. B.2 Table: Relative frequency of tempeh consumption in Indonesia (by province). B.3 Carrying tempeh to market in Java using a shoulder pole and trays stacked on two baskets. B.4 Cost of one day's supply of protein in Indonesia.

C.1 Table: Edible grain legumes. C.2 Map: Distribution of legumes in southeast Asia. C.3 Winged bean, showing leaves, pods, flowers and beans. C.4 Leucaena leaves and pods (*peté china*). C.5 Reduction in bongkrek toxicity from bongkrek acid during fermentation (Ko 1977). Okra. Packets of tempeh, ready to sell, wrapped in leaves and tied. A large soybean, with hilum showing.

D.1 Table: Soybean production in Indonesia (1950-1976). D.2 Table: Major Indonesian food crops, D.3 Table: Indonesian soybean production and yields (by province).

© Copyright Soyinfo Center 2013

D.4 Map: Major soybean producing districts in Java (1976; most are in East Java, led by Jemper and Pasuruan). Table: Daily per capita consumption of tempeh (by province, led by Central Java, then West Nusa Tenggara, Yogyakarta, and East Java). Table: Percent of dietary protein supplied by major food categories (led by cereal grains, then fish, nonlegume vegetables, and soy products). Table: Percentage of dietary protein supplied by soy products (by province, led by Central Java, then East Java, Yogyakarta, and West Java). D.5 Table: Statistics on production and consumption of basic Indonesian soyfoods (led by tempeh, then tofu, kechap, taucho). D.6 Star anise. Grinding soybeans for tofu using traditional push-pull stone mills. Pouring soy curds into cloth-lined forming box. Javanese shadow puppet (*wayang kulit*).

Note. This is the earliest English-language document seen (April 2013) that uses the term "soy curds in connection with tofu. The curds, when pressed in the box, will become tofu.

Table: Classification of *Rhizopus oligosporus.* E.1 Two stages in the germination of a spore (after 1½ and 10 hours). E.2 Two successive views of hyphal tip growth at half-hour intervals.

E.3 Rhizopus oligosporus (Frazier 1957, showing sporangium, columella, apophysis, sporangiophores, stolon, sporangiospores, node, rhizoid). E.4 *Rhizopus stolonifer.* A. Columella and attached spores. B. Collapsed (invaginated) columella (Webster 1970).

E.5 Life cycle of *Rhizopus* (Raven and Everet 1976). E.6 Graph: Changes in tempeh oil and moisture content during fermentation (Sudarmadji 1977). E.7 Graph: Three phases of tempeh fermentation (rapid, transition, and deterioration; Sudarmadji 1977). E.8 Graph: Changes occurring during tempeh fermentation (temperature, soluble solids, pH, soluble nitrogen, and reducing solids; Steinkraus et al. 1960). E.9 Graph: Yields of tempeh and of solids and different stages of the fermentation process (100 gm of whole dry soybeans yield 173 gm of tempeh on average; Steinkraus 1960; Murata 1967). E.10 Table: Loss of solids and protein during tempeh fermentation. E.11 Table: Percentage changes in composition of key essential amino acids during tempeh fermentation. E.12 Table: PER (protein efficiency ratio, a measure of protein quality for humans) changes during tempeh fermentation. E.13 Graph: Changes in concentration of three carbohydrates during tempeh fermentation (sucrose, stachyose, and raffinose, all decrease; Shallenberger et al. 1976). E.14 Table: Amount of B-complex vitamins in 100 gm of tempeh vs. 100 gm unfermented soybeans (all increase in tempeh except thiamine {vitamin B-1}). Changes in peroxide value and TBA value tempeh and soy flour during storage at 37ºC (98.6ºF; both rise rapidly in soybeans, but stay near zero and stable for tempeh; Watanabe et al. 1971).

H.1 Table: Foods known in Indonesia as "onchom" (made from peanuts or soybeans). H.2 Selling onchom in a Javanese market. H.3 Graph: Changes in soy onchom during fermentation (temperature, soluble solids, pH, soluble nitrogen, and reducing solids; Steinkraus et al. 1965). H.4 Flowchart for preparation of peanut presscake onchom. Unnumbered illustrations show 12 steps in the process of making onchom in a commercial shop in Indonesia. Neurospora: Budding conidia, conidiophore. H.5 Graph: Reduction in onchom aflatoxin during fermentation with *Neurospora* (Ko 1974). A thermometer, showing both Fahrenheit and Centigrade.

4184. Shurtleff, William; Aoyagi, Akiko. 1979. Fermented tofu (Document part). In: Shurtleff and Aoyagi. 1979. Tofu & Soymilk Production. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549 USA. 336 p. See p. 283-86.

• ***Summary:*** Contents: Introduction. Making wine-fermented tofu at Quong Hop. Red, redolent & savory fermented tofu: White-wine fermented tofu, red-wine fermented tofu, redolent fermented tofu, savory fermented tofu.

There are two types of "Redolent fermented tofu (*ch'ou* or *tsao toufu*)*:* (1) Drunken (*tsao-toufu-ru*)*:* Age plain or molded tofu cubes in a mixture of sake lees (*chu-tsao*) and a large portion of rice wine. For variety add cloves and orange peels.

© Copyright Soyinfo Center 2013

Green (*ch'ou toufu*)*:* Age plain squares of pressed tofu (*toufu-kan*) for at least 12 hours in a crock containing a mixture of sake lees, and a green *Mucor* mold.

Note: This is the earliest English-language document seen (Oct. 2011) that uses the word "redolent" to describe *ch'ou toufu.*

(3) Three types of fermented tofu. (4) Molded tofu cubes in incubator. (5) Rolling rack of skewered inoculated tofu (Quong Hop, San Francisco). (5) Adding brining liquor to molded tofu cubes in jars. Address: New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549.

4185. **Product Name:** Tofu.
Manufacturer's Name: Silver Sprout Co.
Manufacturer's Address: 124 Russ St., San Francisco, CA 94133. Phone: 415-431-5031.
Date of Introduction: 1979. July.
How Stored: Refrigerated.
New Product–Documentation: Shurtleff & Aoyagi. 1979. July. New Tofu Shops & Soy Dairies in the West. Owner: Paul Louie.

4186. **Product Name:** Tofu.
Manufacturer's Name: Soy Shop.
Manufacturer's Address: 1081 Memorial Dr. S.E., Atlanta, GA 30316. Phone: 404-577-8896.
Date of Introduction: 1979. July.
Ingredients: Organic soybeans, water, nigari.
Wt/Vol., Packaging, Price: 1 lb and 1 lb/16 oz.
How Stored: Refrigerated.
Nutrition: Per 4 oz, Calories 90, protein 10 gm, carbohydrates 1 gm, fat 6 gm, sodium 6 mg.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address (Zip is 30316), and phone number. Owners: Sara & Steve Yurman.

FIND/SVP. 1981, May. "The tofu market: Overview of a high-potential industry." p. 87. The company now makes about 3,000 lb/week of tofu, and is planning to increase to 5,000 lb in the near future. Label. 1983. 6.5 inches square. Plastic film. Black, orange, white and blue, printed on clear film. "Tofu is a wholesome food rich in protein and completely cholesterol-free. It fits into many special diets–perfect for reducing calories in hearty, satisfying meals. Send a stamped, self-addressed envelope for recipe ideas and more nutritional information." Seven serving suggestions on rear panel.

Interview with Sarah Yurman. 1984. Jan. The company started in July 1979. They now make 7,000 lb/week of tofu and 300 lb/week of tempeh.

Label. 1984. 4.5 by 2 inches. Plastic film. Brown and yellow on clear plastic.

Talk with Steve Yurman. 1989. Nov. 8. In 1979 he and his wife, Sarah, were in North Carolina when they heard that Lotus Moon (a tofu shop in Atlanta, Georgia) had gone out of business. They went to Atlanta and met with Charles Unger, the owner, who had purchased the company from someone named Mike. Lotus Moon only made tofu and soymilk. Steve never heard of Chandler Barrett. Lotus Moon at that time was not connected with Sevananda Co-op; Charles had moved it out. The Yurmans did not buy Lotus Moon, but rather in July 1979 went into a joint venture with Unger for about a month, but it did not work out, so they separated. Then in Aug. 1979 Steve and Sarah founded The Soy Shop and set up operations making tofu in the kitchen of the St. Peter and Paul Church in Atlanta. After 1-2 months they were asked to leave, so they moved to 1081 Memorial Drive S.E., in Atlanta in early Sept. 1979. There they made tofu, soysage, a little soymilk, and a little tempeh. They owned the Atlanta tofu market until Calco moved in, followed by Swan Gardens. Both of those companies, instead of working to expand the market, went after Yurman's market with low prices. In the fall of 1981 the Yurman's moved their company to 1863 Memorial Drive S.E. in Atlanta.

The Yurmans sold The Soy Shop to Kich Lam, a Chinese American, in April 1985. Why? (1) Many of their distributors went out of business, owing them lots of money, and (2) The competition from Jimmy Wang and Calco was fierce because Calco kept its tofu prices very low, and (3) There was employee theft.

4187. *Soycraft* (*Greenfield, Massachusetts*). 1979. Soymilk ice cream in Guatemala. 1(1):50-51. Summer.
• ***Summary:*** This spring Plenty commenced installation of a small scale soy dairy, which will manufacture soymilk ice cream and tofu, in the Indigenous Municipal Building in Solola, Guatemala. Plenty received a $30,000 grant from CIDA (the Canadian International Development Agency) for the project.

4188. *Soycraft* (*Greenfield, Massachusetts*). 1979. Monroeville, Ohio: Ohio Miso Company. 1(1):8. Summer.
• ***Summary:*** "Thom Leonard and Richard Kluding ladled their first batch of miso into their one-ton wooden vats on March 15 this year. They began construction of their miso shop, one of the first in the United States, in late October [1978], on Richard's rural farm assembling a frame structure of forty feet by thirty with slab floors. As *koji*-making requires constant monitoring, they chose to locate the shop–partitioned into a storage and fermentation area, production space, a small koji room, and office cubicle–close to where they live.

"Their weekly miso volume is in excess of one thousand pounds, spread over four working days, and recently,

© Copyright Soyinfo Center 2013

they began selling Mellow Barley Miso, which takes only five weeks to mature but requires refrigeration to extend its comparatively short shelf-life. The bulk of their miso production is Barley Miso which requires up to eighteen months to ferment. To supplement their business, Richard and Thom produce between twenty and fifty pounds of tofu every week.

"Thom learned miso-making through a blend of Bill Shurtleff's writings, a two-week intensive course with Muramoto sensei at Asunaro, actual production of two thousand pounds of miso in Arkansas, and work at Island Spring in Vashon, Washington."

Note: This miso was never sold by Ohio Miso Co. Before the miso had finished aging, the company was put up for sale and purchased by Christian and Gaella Elwell, who started South River Miso (SRM) Co. The vats of aging miso were transported to Conway, Massachusetts, where the finished miso was sold by the Elwells in late 1980.

4189. *Soycraft* (*Greenfield, Massachusetts*). 1979. Greenfield, Massachusetts: Tempeh Works. 1(1):9. Summer.
• ***Summary:*** Michael Cohen is now opening what promises to be one of the largest volume tempeh shops in the U.S., with a capacity of 3,000 lb/week in the 1,200 square foot workshop. He intends to have the New England Soy Dairy handle the bulk of his distribution.

Note: This is the earliest document seen (Sept. 2011) concerning The Tempeh Works.

4190. *Soycraft* (*Greenfield, Massachusetts*). 1979. New England Soy Dairy plans expansion. 1(1):10. Summer.
• ***Summary:*** "Equipment being used to produce 25,000 pounds of tofu weekly is designed to make only 10,000 pounds weekly. The company plans to triple its soymilk capacity and double its tofu production. It will introduce plain and flavored soymilk beverages, tofu salad, soy mayonnaise, deep-fried tofu cutlets, and soymilk ice cream, sometime this summer."

4191. *Soycraft* (*Greenfield, Massachusetts*). 1979. "Tofu shops have sprung up like mushrooms all over North America." A conversation with Bill Shurtleff. 1(1):58-59. Summer.
• ***Summary:*** "Among many of the people I know today, the beginning of a change in lifestyle and a new way of thinking about one's own life, about one's planet, is somehow inaugurated by a change in diet. Why should it be diet? Why shouldn't it be clothing? I changed my way of eating and suddenly my way of looking at the world began to change. Gandhi is interesting in this sense. Gandhi set out to become an Englishman but at the height of his depression about becoming an Englishman in India, he suddenly changed his diet and that was the first step in the total transformation of himself as the person who went on to change the whole complexion of the world. The change seems to be healthy, a change towards a simpler lifestyle, a spiritual or religious attitude, a more compassionate stance. I feel diet is the very substance of our senses and brains and bodies and that by having a healthy body and clear mind, we really begin to see everything in a more sane, more real, light. I never would have believed that until I had actually experienced it for myself, having grown up on a standard American diet.

"When I went to Japan, I went as a poor student and I discovered tofu shortly after arriving there. I felt it was a delicious food. I knew it was nutritious and considered that anything that played such an important role in my diet would be of great importance, great potential interest, to the majority of people on this planet who were even poorer than I was. I felt I wanted to share what I thought was a discovery and I would share that by writing a small book, and that book, which I imagined would take six months to write, ended up taking over five years.

"How do I approach people reluctant to try tofu? I guess I approach it in a pragmatic way. I just like to serve people our favorite recipes and most people try them, like them. They say, 'That's great! What is it?' and I say, 'Oh, its made from tofu, a staple food made from soybeans.' 'Oh, that's interesting. I've never tasted that before.' It's the same way Italian entrepreneurs introduced people to pizza. They didn't introduce them philosophically or nutritionally; people just like pizza and pizza caught on. I'm enough of a pragmatist to know that's the best way to introduce people to soyfoods in America–to introduce foods they like, and, after that, to explain to them, for instance, to those watching their weight, that soyfoods are low in calories, or to those watching their cholesterol, that all soyfoods contain no cholesterol, and to those watching their pocketbooks, that all soyfoods are relatively inexpensive. Actually, I don't ever like to convince people at all because I think the foods speak for themselves, the same way pizza does. What we're seeing now is that all over America, tofu shops last year experienced a growth rate of about twenty-five percent, which is very healthy for an industry; and that just indicates that people are discovering these foods and enjoying them.

"In the U.S. a lot of people are discovering for the first time how they can make the different soyfoods part of their daily American diets, and I want to underline the word 'American.' Today we went out to lunch and we had tofu burgers and eggless egg salad, both made from tofu and invented by the guy who runs a little restaurant here in Greenfield. People are finding ways of using soy products to make foods just like what they're used to using, except that they are free of cholesterol, low in cost, high in protein. And people somehow get an experimental sense as they tune in with tofu and that's a key part of the enjoyable thing that's happening–people have a sense of developing things themselves.

"The success continues to surprise me. We had hoped

© Copyright Soyinfo Center 2013

our ideas would catch on in the West, but we never imagined they would take root as quickly as they have. I think the times were ripe for this type of effort and there were many people who shared the same consciousness that I did about food; they were ready and saw the relationship between diet and world hunger, diet and health, diet and the need for simpler, lower-cost lifestyles, and all those ideas fit in beautifully with soyfoods. So, in fact, tofu shops have sprung up like mushrooms all over North America. People connect with this personally, they're taking the message to heart, going beyond what we have done. We find ourselves once again in the position of being students, learning from the people who maybe have gained some of their original inspiration from us and done a great deal of researching on their own.

"There is a very definite relationship between the way people eat and hunger on planet earth. In the U.S. today, fifty percent of the farmland is used to grow food for animals. In a world in which fifteen million people die each year of starvation, a country that has the capacity to produce food the way we do, is using fifty percent of its land to grow food for animals. The crops being used are corn, soybeans, oats, and wheat, in that order. This pattern of food misuse is a pattern that was pioneered in America and today America is still the world's leading developer of this wonderful way of turning abundance into scarcity.

"When did it start? Basically, it started during the 1950's when American farmers had huge surpluses of basic agricultural crops. People began to ask, what can we do with these surpluses that will convert them from a problem into an asset? and they developed what is called the *feedlot system.* This means you take cattle off the rocky hillsides and hill tops–places where crops couldn't be grown yet cattle made good use of the land by converting grass into food–and put them into huge feedlots, or corrals. You begin taking all the extra soybeans, corn oats, and wheat and feeding them to the livestock. But in this process, it takes eight pounds of grain protein to produce one pound of livestock protein; basically, you're converting grain protein at only twelve percent efficiency, or at an eighty-eight percent loss. The most inefficient of all processes is raising the feedlot steer, the prime candidate of the American Steak Religion. In order to produce one pound of feedlot steer protein, you have to feed the animal fifteen to twenty pounds of grain. That means ninety-five percent of the earth's bounty is being wasted.

"The point is that in a world where hunger is becoming more and more a grim reality in the lives of many people, we have to return to the traditional pattern of eating directly the food Mother Nature provides us with. The problem is not that the earth is unable to provide humans with enough food. The problem is that humans have developed a system that makes gross misuse of the food and one of the best examples in the U.S. is the misuse of the soybean. We have never really learned all the wonderful things you can do with soybeans and, in a sense, I felt like I was discovering this first hand when I went to Japan. Other people have felt the same thing and all of us are working to introduce these soyfoods to Americans. In using soybeans directly as food rather than running them through animals, we simply liberate ninety-five percent more food."

4192. *Soycraft* (*Greenfield, Massachusetts*). 1979. New England local soybean production. 1(1):5. Summer.
• ***Summary:*** The New England Soy Dairy is encouraging area farmers, through production contracts, to grow soybeans this summer. To assist and encourage this, the company prepared a 50-page booklet titled "Local Soybean Growing Project Prospectus."

4193. *Soycraft* (*Greenfield, Massachusetts*). 1979. Tofu meets the USDA–a favorable response. 1(1):6. Summer.
• ***Summary:*** "The New England Soy Dairy Institutional Representative, Judy Rubenstein, met with Dr. Audrey Maretski, Director of the Division of Nutrition and Technical Services Staff, of the Food and Nutrition Service, USDA, in Washington DC this May to discuss a Standard of Identity for tofu and its subsequent nationwide use in school lunch programs."

4194. *Soycraft* (*Greenfield, Massachusetts*). 1979. Successful soyfoods booth at Detroit Symposium. 1(1):6. Summer.
• ***Summary:*** The Soy Plant of Ann Arbor, Michigan, dispensed a lavish array of soyfoods at the Detroit Symposium on Humanity, held at the University of Detroit, from March 30 to April 1. The Soy Plant's theme was "Soybeans Can Feed the World."

The Soy Plant prepared tahini-tofu spread sandwiches, missing-egg salad sandwiches, and Sloppy Barney's (half soysage and half tofu) served in pita bread with sprouts. They also had four flavors of tofu pies (banana, strawberry, peanut, and cheesecake), and peanut butter balls (made with okara, sweet white miso, and tofu). According to Dan Ecclestone, who helped man the Soy Plant booth, the purpose was to demonstrate the wide flexibility of tofu. "It was fantastic, the acceptance was very good. We were surely the most talked about booth at the exhibition." In total, they sold 450 sandwiches and 200 tofu pies.

4195. *Soycraft* (*Greenfield, Massachusetts*). 1979. Soyfoods at San Francisco's New Earth Exposition. 1(1):4. Summer.
• ***Summary:*** "The Soycrafters Association of North America was offered the free use of a booth at the New Earth Exposition in San Francisco from March 15-18. The booth was manned by Bill Shurtleff, Akiko Aoyagi, Larry Needleman, and friends from Quong Hop Tofu Company. Over 50,000 people attended the exposition and an estimated 12,000 visitors stopped by the booth and tasted free samples of Creamy Tofu Dip and slices of Tofu Burgers and Teriyaki

© Copyright Soyinfo Center 2013

Tofu, all prepared by Quong Hop. Over 6,000 "What is Tofu?" pamphlets were given away and Bill Shurtleff gave two one-hour slide presentations about soyfoods, protein, and world hunger on the main Exposition stage to an audience of 400. Down the aisle, the Gilman Street Gourmet had a large booth where over 3,000 tofu burgers were sold while The Farm [Farm Foods] sold delectable soymilk ice cream (Soy Ice Bean), tofu salad [like an eggless egg salad], and tofu cheesecake."

4196. Takai. 1979. Takai Tofu & Soymilk Equipment Co. (Ad). *Soycraft* (*Greenfield, Massachusetts*) 1(1):39. Summer.
• ***Summary:*** This full-page ad: (1) Gives an introduction to the company. (2) Explains that they have worked closely with William Shurtleff, author of *The Book of Tofu* to develop their first English-language catalog. (3) States that they are working with Bean Machines, Inc., a California-based company to get Takai equipment to customers at the lowest possible prices with the minimum delay. (4) Shows illustrations of 11 pieces of Takai equipment, ranging from traditional to modern. (5) Gives the address, phone number, and logo of both Bean Machines and Takai. Address: 307 Inari, Nonoichi-machi, Ishikawa-ken 921, Japan.

4197. *Times-Union* (*Rochester, New York*). 1979. Wegman's savings guide. July. *
• ***Summary:*** Tofu (made locally) is advertised in the guide.

4198. **Product Name:** Tofu Turnover.
Manufacturer's Name: Tumaro's, Inc.
Manufacturer's Address: Los Angeles, California.
Date of Introduction: 1979. July.
Ingredients: Crust: Whole wheat flour (organic), corn oil, water, sea salt. Filling: Tofu, mung bean sprouts, celery, green peppers, onions, shoyu, arrowroot, ginger, garlic, pepper.
How Stored: Refrigerated.
New Product–Documentation: Recipe given by Shurtleff & Aoyagi. 1979. Tofu & Soymilk Production. p. 165.

4199. **Product Name:** Tofu Mayo (Eggless and Dairyless Mayonnaise).
Manufacturer's Name: White Wave.
Manufacturer's Address: 3869 Walnut St., Boulder, CO 80301.
Date of Introduction: 1979. July.
Ingredients: Tofu [organically raised soy-beans, filtered water, nigari (salt bitterns)], safflower oil, apple cider vinegar, honey, lemon juice, salt, spices.
Wt/Vol., Packaging, Price: 16 oz, 1 pint jar. Retails for $1.26.
How Stored: Refrigerated, 30-60 day shelf life.
New Product–Documentation: Label. 1979. 2½ by 2½ inches. Self adhesive. Blue on beige. White wave logo.

Shurtleff & Aoyagi. 1979. Tofu & Soymilk Production. p. 162. "White Wave in Boulder, Colorado, uses the following recipe for Tofu Mayonnaise: Combine the following ingredients in a (sterilized) high-speed VCM and blend at high speed until creamy smooth: 60 pounds tofu, parboiled for 7 minutes; 24 cups oil; 13.5 cups apple cider vinegar; 6.75 cups honey; 10 tablespoons salt; and 2 lemons, juiced. Pack hot in 1-pint glass jars. Yields 55 pints that retail for $1.26 a pint (1979). Nice also as a base for spreads or dips. Keeps 30 to 60 days."

4200. **Product Name:** Missing Egg Salad.
Manufacturer's Name: White Wave.
Manufacturer's Address: 3869 Walnut St., Boulder, CO 80301.
Date of Introduction: 1979. July.
Ingredients: Tofu (organically raised soybeans, filtered water, nigari salt bitterns), celery, dill pickles, tofu mayonnaise, shoyu, prepared (wet) mustard, honey, granulated onion, granulated garlic, granulated kelp, turmeric, poppy seeds, dill weed, paprika.
Wt/Vol., Packaging, Price: 10 oz deli container. Retails for $1.43.
How Stored: Refrigerated.
New Product–Documentation: Label. 1981. 2.5 by 2.5 inches. Paper. Brown on tan. Wings on chicken legs illustration. Shurtleff & Aoyagi. 1979. Tofu & Soymilk Production. p. 163. "White Wave in Boulder, Colorado, uses the following recipe for their Missing Egg Salad. Parboil 48 pounds of tofu for 7 minutes and drain very well. Add tofu and the following ingredients to a VCM: 2½ bunches celery, chopped; 3 pounds chopped dill pickles; 13 cups Tofu Mayonnaise, 2¼ cups shoyu; 14 ounces prepared (wet) mustard; 3/4 cup honey; 9 tablespoons granulated onion; 5½ tablespoons granulated garlic; 4½ tablespoons granulated kelp; 3 tablespoons turmeric; 1 tablespoon poppy seeds; 9 teaspoons dill weed; and 4 teaspoons paprika. Mix briefly on low speed to preserve chunks. Yields 56 pounds. Sold in

© Copyright Soyinfo Center 2013

10-ounce containers for $1.43 retail or sold on a tofu salad sandwich for $1.25 retail by Grateful Sandwiches in Denver; their best seller!"

4201. **Product Name:** Tofu Cheesecake.
Manufacturer's Name: White Wave.
Manufacturer's Address: 3869 Walnut St., Boulder, CO 80301.
Date of Introduction: 1979. July.
Ingredients: Tofu, maple syrup, vanilla, orange or lemon rind, water, cashew butter, arrowroot, cinnamon, sesame tahini, sea salt. Plus graham cracker crust.
How Stored: Refrigerated.
New Product–Documentation: Shurtleff & Aoyagi. 1979. Tofu & Soymilk Production. p. 164.

4202. **Product Name:** Tofu Creamies (or Tofu-Coconut Cream Bars).
Manufacturer's Name: White Wave.
Manufacturer's Address: 3869 Walnut St., Boulder, CO 80301.
Date of Introduction: 1979. July.
Ingredients: Crust: Whole wheat flour, cut oats, oil, shredded coconut, sea salt. Filling: Tofu, bananas, honey, oil, vanilla, arrowroot, sea salt, shredded coconut.
How Stored: Refrigerated.
New Product–Documentation: Recipe given by Shurtleff & Aoyagi. 1979. Tofu & Soymilk Production. p. 165.

4203. **Product Name:** Tofu Turnover (with Spinach).
Manufacturer's Name: White Wave.
Manufacturer's Address: 3869 Walnut St., Boulder, CO 80301.
Date of Introduction: 1979. July.
Ingredients: Crust: Whole wheat flour, water, salt. Filling: Tofu, spinach, mushrooms, nutritional yeast, chopped onion, oil, shoyu, sesame salt, dill weed.
How Stored: Refrigerated.
New Product–Documentation: Recipe given by Shurtleff & Aoyagi. 1979. Tofu & Soymilk Production. p. 165. This was one of America's earliest refrigerated tofu entrees.

4204. **Product Name:** Tofu Cinnamon Rolls.
Manufacturer's Name: White Wave.
Manufacturer's Address: 3869 Walnut St., Boulder, CO 80301.
Date of Introduction: 1979. July.
Ingredients: Glaze: Margarine, honey, walnuts, raisins. Filling: Tofu, walnuts, honey, vanilla, cinnamon, salt. Dough: Whole wheat flour, soymilk, raisins, honey, oil, baking powder, salt.
Wt/Vol., Packaging, Price: Retails for $0.66 each.
How Stored: Refrigerated.
New Product–Documentation: Recipe given by Shurtleff & Aoyagi. 1979. Tofu & Soymilk Production. p. 166.

4205. **Product Name:** Marinated Tofu Cutlets.
Manufacturer's Name: White Wave.
Manufacturer's Address: 3869 Walnut St., Boulder, CO 80301.
Date of Introduction: 1979. July.
Ingredients: Firm tofu. Marinade: Shoyu, water, granulated onion, granulated garlic, dark (toasted) sesame oil, powdered ginger, cayenne.
How Stored: Refrigerated.
New Product–Documentation: Recipe for this non-fried product is given by Shurtleff & Aoyagi. 1979. Tofu & Soymilk Production. p. 166.

4206. Yao, Moon-Lan; Peng, Andrew C. 1979. The effect of coagulants on protein content and amino acid composition of soybean-cheese whey curd. *Ohio Agricultural Experiment Station, Research Circular* No. 250. p. 48-51. July. [11 ref]
• ***Summary:*** Soymilk was mixed with "cheese whey milk" (made by mixing sodium cheese whey protein concentrate). The protein quality of the mixture was higher than that of soymilk alone. Adding various coagulants (GDL, calcium sulfate, or magnesium chloride) resulted in soft, white gelatinous curds. Address: Dep. of Horticulture, Ohio State Univ., and Ohio Agricultural Research and Development Center.

4207. **Product Name:** Tofu.
Manufacturer's Name: Yaupon Soyfoods.
Manufacturer's Address: 404 S. Main St., Elgin, TX 78621.
Date of Introduction: 1979. July.
Ingredients: Organically grown soybeans, water, natural nigari.
Wt/Vol., Packaging, Price: 1 lb.
How Stored: Refrigerated.
New Product–Documentation: Shurtleff & Aoyagi. 1979. July. New Tofu Shops & Soy Dairies in the West. Chico

Wagner & Doug Cox.

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owners: Chico Wagner & Doug Cox.

Label. 1982, undated. 3.25 inch diameter. Self adhesive. Green on blue. Illustration: bean vine. "Keep refrigerated."

Talk with Chico Wagner. 1989. June 21. This was his first product, launched in 1979. The company name, pronounced YOE-pon, comes from the name of a native shrub that grows widely in the area. About 1-2 years after it started, the company moved to its present location at 226 East. Austin St., Elgin, Texas. Phone: 512-285-3810. He sent a new label. 6 by 4.5 inches. Greenish blue and white on clear film.

Note 1. According to *Scientific American* (1872 March 30, p. 209) "Yaupon is the name given by the Indians to the leaves of the *Ilex Cassine*, a plant indigenous to the Southern States, but found only along the coast, from Florida to North Carolina. Mixed with the leaves of other species of the same plant, *Ilex vomitoria* and *Ilex dahoon*, it formed 'Cassena,' the basis of their famous 'black drink,' which was used by the red men as a medicine, and as a state drink at some of their religious festivals... Yaupon is largely used in the South as a substitute for tea, coffee, and other stimulants; and it is reported to be very beneficial to inebriates who wish to cure themselves of their love of liquor.–Henry M. Smith."

Note 2. This is the second earliest known company in the USA (after Surata Soyfoods, founded Dec. 1976, began production March 1977) to use the term "Soyfoods" in the company name.

Talk with Chico Wagner. 1992. May 29. He now makes about 5,000 lb/week of tofu. The company makes 4 basic products: Tofu (1 lb packages and bulk), plain soymilk, and tempeh.

4208. *Morning Union* (*The*) (*Springfield, Massachusetts*). 1979. Tofu tomatoes, tofu mayonnaise, tofu pops. Aug. 1. *

• ***Summary:*** About the work of William Shurtleff and Akiko Aoyagi with tempeh. A photo shows Akiko standing by a skillet with a freshly-made tempeh burger. The Shurtleffs are on the East Coast to attend the second annual Soycrafters of North America Conference at Hampshire College, Amherst, Massachusetts; it was attended by about 230 people. Greg Weaver, a partner in The Tofu Shop, 686 Monroe Avenue, the soy delicatessen of the Northern Soy Tofu Company of Rochester, attended the conference and invited Shurtleff to Rochester to sample the deli's selection of soyfoods and to share ideas about the production and marketing of tempeh. Contains 3 favorite recipes from *The Book of Tempeh.* Address: D&C Food Writer.

growth industry [soyfoods]. Aug. 8. p. A6.
• ***Summary:*** This editorial states that the New England Soy Dairy has moved into the former Bete Fog Nozzle building on Wells Street and plans to add 1,200 square feet for refrigeration. New equipment will help maintain production of 25,000 pounds of tofu weekly.

Michael Cohen is opening The Tempeh Works on French King Highway; he hopes it will be one of the largest volume tempeh businesses in the United States. And Lama Trading Co. [formerly Llama, Toucan & Crow], which moved to Greenfield from Brattleboro, Vermont, is growing as a major soyfood-natural foods distributor throughout the Northeast.

"To help coordinate and build the industry, Richard Leviton and David Kilroy have formed the Soycrafters Association of North America and are publishing a slick quarterly magazine called *Soycraft.* Both use the Wells Street address. More than 200 industry representatives gathered in Amherst recently for a national conference organized primarily under Mr. Leviton's direction."

4231. Beckman, Maryann. 1979. Tofu an ancient staple in Oriental diets. *Kalamazoo Gazette* (*Michigan*). Aug. 15. p. B1.
• ***Summary:*** "Tofu (phonetically pronounced 'toe-foo') is an ancient staple of Oriental diets that's becoming increasingly popular with curious consumers and may even promise to be a 'food of the future.' One reason for its popularity is the increased interest in and exposure to Oriental foods and wok cookery, where it is often listed as one of the ingredients. Tofu is also an inexpensive source of protein.

"Tofu, familiar to many as bean curd, is the curd of soy 'milk.'" A short description follows of how it is made, using coagulants such as magnesium chloride, other magnesium or calcium salts, lemon juice or vinegar.

Tofu "is now available in many fruit, vegetable and supermarkets. It was once available only in health food stores and Oriental specialty shops.

"It is usually displayed with the exotic produce and sells for about 70 cents to $1.09 a pound. Though many Orientals produce their own or in small shops, most of that available in Michigan markets is made by a few soy 'dairies' that produce large quantities for sale in interstate markets. Most brands are pre-packaged in water, while some are vacuum packed."

Describes popular ways to use tofu and compares its protein content with that of other major protein sources, such as cottage cheese, hamburger, and cheddar cheese. "Tofu is also low in fat (5 grams per serving), low in calories (86) and low in sodium (8 milligrams)." In Oriental restaurants, it is often served as stir-fried cubes with vegetables, or with thin strips of beef in Sukiyaki. Address: Kalamazoo District, Consumer Marketing Agent, Michigan State Cooperative Extension Service.

4246. Steiman, Harvey. 1979. Taking tofu seriously–for nutrition and economy. *San Francisco Examiner.* Aug. 22. Food section. p. 22, 23, 26.
• ***Summary:*** Starts by talking about Juel Andersen and her book *The Tofu Cookbook.* Juel wrote the book with Kathy Bauer, a poet and her neighbor at her summer home in Arnold (Mendocino County).

Anderson wanted to eat less meat and she was looking for an alternative to chicken and fish. Kathy and her husband, who are vegetarians who had discovered tofu and soymilk, invited Juel for dinner and served tofu enchiladas. Joel thought they were delicious.

So Juel went looking for information on tofu, but she found only a few books that even mentioned it in passing. One book was published in the 1940s and the other was more recent. But she didn't like the recipes in either. She felt she could do better.

Andersen emphasizes that tofu is not a substitute for meat or eggs, and encourages people to make their own tofu; page 23 describes how to do this. Tofu is inexpensive; she calculates it costs her less than 25 cents a pound to make at home. "With the money I save using tofu, I can treat myself to a filet mignon occasionally."

Photos show: (1) Irish soda bread made with tofu; it has an unusual chewiness in addition to its protein and good taste. (2) Juel Andersen seated at a table; in front of her are various tofu dishes. (3) Tofu is a surprise ingredient in Citron Fromage–shown in two dishes on a wooden table. (4) A dish of Mushroom a la Creme Tofu, served on a white plate. (5-10) Various steps showing how Juel Andersen makes tofu at home, starting with whole soybeans, making soymilk, removing the okara and whey, and ending with a round cake of tofu.

Contains four recipes: Citron fromage. Mushrooms a la creem tofu. Tofu-cheese cake. Nelly Twomey's Irish soda bread. Address: Food Editor.

4252. **Product Name:** Tofu Salad.
Manufacturer's Name: New England Soy Dairy, Inc.
Manufacturer's Address: 305 Wells St., Greenfield, MA 01301.
Date of Introduction: 1979. August.
Ingredients: Organic tofu, 'Soymayo' (soymilk, soy oil, apple cider vinegar, spices), fresh carrots and celery, prepared mustard, natural soy sauce, sea salt, garlic powder, turmeric.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Refrigerated.
New Product–Documentation: *Soycraft* (Greenfield, Massachusetts). 1979. "New England Soy Dairy plans expansion." 1(1):10. Summer. The company plans to launch Tofu Salad later this summer.

Label. Undated. Sent by New England Soy Dairy. 3.25 inches diameter. Brown, yellow and green on beige.

4253. New-age Foods Study Center. 1979. Soyfoods tour of the Pacific Northwest (Itinerary, Aug. 27–Sept. 6). P.O. Box 234, Lafayette, CA 94549. 1 p. Aug. Unpublished manuscript.
• ***Summary:*** On this tour Shurtleff and Aoyagi conducted a number of public programs on soyfoods (tofu, tempeh, miso, etc.), showing color slides and sampling foods. They also did research for their forthcoming book *Tempeh Production* and held numerous media interviews. In California they visited Bean Machines, Ramagiri (home of Laurel's Kitchen), Farallones Inst. (Donna Calvaud). In Oregon, Surata Soyfoods (Benjamin Hills), Blair Island (Toby Alves), Sunbow Farm (Mia Posner), and *Rain* magazine. In Washington, Island Spring (Luke Lukoskie). Address: Lafayette, California.

4254. *Plenty News* (*Summertown, Tennessee*). 1979. Guatemala. 1(3):2-3. Aug.
• ***Summary:*** After the 1976 earthquake that devastated Guatemala, "Plenty became involved with the construction of hundreds of homes, schools, and clinics... Foundation and walls have been completed on a 22- by 44-foot solar dairy being constructed in the village of San Bartolo. Work is continuing with the building of roof trusses, final solar design, and delivery of the tons of equipment. The first step in the solar aspect of the project is a water pre-heater."

In a sidebar, Laurie Praskin, soy technician with Plenty Guatemala, writes: "...our soy demonstrations are going good... you keep seeing kids you want to bring home and feed for awhile. It feels great to be teaching their mothers how to make soymilk and tofu, and giving them nutritional information... it's good to see these malnourished kids stuff their faces with tofu and soy milk... protein... they all love it...

"As a result of holding one class last year in San Martin, 45 ladies were inspired to plant soybeans this year... This is really the heart of the project, to introduce The Noble Bean so they can be recognized and used at the village level, in the homes, so they can become a regular part of the life and diet..."

Photos show: (1) Villagers constructing a gravity-fed water system. (2) Plenty volunteer Jane Graf with a little Guatemalan girl (looking healthy and happy): "She's been fed a soy-based diet, loved a lot..." (3) Members of Plenty's Agricultural Project preparing for variety trials in Solola (altitude 7,200 feet) with soybeans, amaranth, quinoa, and winged beans–all high protein crops that grow in the

tropical highlands. Address: 156 Drakes Lane, Summertown, Tennessee 38483.

4255. Saio, Kyoko. 1979. Tofu–Relationships between texture and fine structure. *Cereal Foods World* 24(8):342-45, 350-54. Aug. [8 ref]
• ***Summary:*** A very thorough, detailed and complex discussion of the subject with 21 figures and 1 table. Many of the figures are amazing scanning electron microscope images of different types of tofu, and seven are graphs. Address: National Food Research Inst. (Shokuhin Sogo Kenkyujo), Ministry of Agriculture, Forestry and Fishery, Kannon-dai 2-1-2, Yatabe-machi, Tsukuba-gun, Ibaraki-ken, Japan.

4256. Simonds, Nina. 1979. Chinese cuisine: Soybeans. *Gourmet* 39:28-29, 74-77. Aug.
• ***Summary:*** After a brief history of soya in China, gives recipes for: Fried soybeans [soynuts]. Sweet soybean milk. Stir-fried soybean sprouts red-in-snow (incl. how to sprout soybeans). Braised soybeans and meatballs. Spareribs and soybean sprout soup. Stuffed wheat gluten balls with soybean sprouts (*Mien Chin Jou Yüan*). Braised bean sticks [*fu tsu;* dried yuba sticks] with black mushrooms. Buddha's delight (*Lo Han Su Ts'ai*). Stuffed bean curd rolls. Sweet-and-sour fish in bean milk skin [yuba]. Bean milk skin (*fu p'i*) and eggplant rolls.

4257. Stahler, Charles. 1979. Tofu: The cheese of the Orient. *Nutrition Action.* Aug. p. 13.
• ***Summary:*** A table compares tofu and whole milk. "The nutrient content of tofu is remarkably similar to milk in several respects, yet has significantly fewer drawbacks... A cup of milk has 122 mg of sodium compared to only 8 mg in a serving (120 mg) of tofu, so it is a fine food for people with high blood pressure. Both tofu and whole milk have moderate levels of fat, but tofu's fat is mainly unsaturated. Also, tofu has no cholesterol. However, like whole milk, constant consumption of tofu could substantially increase fat intake. If tofu ever becomes popular in the U.S., it is conceivable that low-fat versions will be produced commercially, just as low-fat and skim dairy products are available (New England Soy Dairy has begun distributing a fat-reduced variety of tofu)."

A photo shows Kathy Leviton making tofu at New England Soy Dairy. Contains a recipe for Tofu Manicotti from New England Soy Dairy. Address: Manager, Reports Dep., Center for Science in the Public Interest.

4258. Suwa, Junichi; Koyanagi, T.; Kimura, S. 1979. Studies on soybean factors which produced goiter in rats. *J. of Nutritional Science and Vitaminology* (*Tokyo*) 25(4):309-15. Aug. [8 ref. Eng]
• ***Summary:*** The goitrogenic factor in soybeans appears to be concentrated in the curd, but the goitrogenicity of soybean curd was not eliminated by proteolytic digestion. This report supports the findings of Sharpless et al. (1939) that rats fed soybeans required twice as much dietary iodine as control animals to prevent goiter. The method for making soybean curd is described and illustrated on page 311. Address: Lab. of Nutrition, Faculty of Agriculture, Tohoku Univ., Sendai, Miyagi 980, Japan.

4259. *Vashon-Maury Island Beachcomber.* 1979. Tofu gurus to talk here. Late Aug.
• ***Summary:*** "The people who wrote the Book of Tofu and the Book of Miso are to show Islanders Sept. 4 (at Ober Park, 7:30 to 9:30 p.m.) how to prepare tofu and miso at home." The talk will be hosted by Luke Lukoskie of Island Spring Inc. Address: Washington.

4260. Demos, Steve. 1979. Re: Making tempeh at White Wave, Inc. Letter to William Shurtleff at New-Age Foods Study Center, Sept. 2. 3 p. Handwritten.
• ***Summary:*** "Dear William and Akiko, I'm sorry for not having written sooner. I've meant to, however I've been extremely busy here at White Wave. Most of my time is taken up in tofu production, as we've been producing quite a lot lately.

"At the present moment, tempeh is a very minor product at White Wave. I make only two batches a week at 80 10 oz packages per batch. The growth of tempeh consumption in this area is very slow, as few people know about it. However we are trying to turn more people on to it, and have plans to expand our production, perhaps this winter.

"I am very interested in your new Book of Tempeh. I haven't read much of it, as yet, but plan to go through it thoroughly I'll also be interested in obtaining a copy of your book on Tempeh Production.

"The following is a description of our current mode of tempeh production. Please keep in mind it is a very small operation, and that the same equipment is also used in tofu production." The rest of the letter is that description. Address: Boulder, Colorado.

4261. Kanthamani, S. 1979. Re: Introducing soyfoods to India. Letter to William Shurtleff at New-Age Foods Study Center, Sept. 3. 2 p. Handwritten on aerogram.
• ***Summary:*** She thanks Shurtleff for the copy of *The Book of Tofu.* She resigned her job in Sri Lanka in July 1979; the situation was unsatisfactory and there was too much discrimination. She has had a few offers in India but she is still debating whether to accept a job or start her own business.

She is revising her book *Tasty Recipes from Soyabean.* She is looking for a publisher. When she succeeds in getting the revised edition published, she will send a copy to Shurtleff.

She would not recommend use of a nylon sock for soya

© Copyright Soyinfo Center 2013

milk preparation because of sanitation problems, however a thin white cloth works well. Her level of preparing soyamilk at the home level has become very popular as there has been a scarcity of coconuts. Sinhala people [in Sri Lanka] usually use coconut milk for preparing all types of curries. "Now they have replaced coconut milk with soyamilk." She provides here new address [see above]. Address: 559-A 10th A Main Rd., V Block, Jayanagar, Bangalore 560041, India.

4262. Barat, Oak. 1979. Re: Founding of the McNaturals project. Letter to William Shurtleff at New-Age Foods Study Center, California, Sept. 4. 1 p. Handwritten.
• ***Summary:*** Oak [Gary] orders another copy of *Tofu & Soymilk Production.* "Things are going very well here. Putting pieces of the puzzle together. So far Sept. 24 is my target date for [arriving in] California. I will be speaking to you shortly with more details.

"Looking forward to our meeting. You will be meeting the founding team of 'Operation Soy Bomb' the McNaturals project.

"With Respect and Peace. Oak."

Note: This is the earliest document seen (March 2013) concerning Legume, Inc. (which was established in June 1980) or the work of Oak / Gary Barat with soyfoods. Address: New York.

4272. Krieger, Verena. 1979. Re: Thoughts on returning to Switzerland. Letter to William Shurtleff at Soyfoods Center, Sept. 17. 1 p. Typed, with signature.
• ***Summary:*** "Dear Bill, It has finally become possible for me to return to my native Switzerland (just as you told me two years ago at the first national 'soyfoods conference' [Held July 28-30, 1978, in Ann Arbor, Michigan]). I am determined to continue my work as a natural foods cook, teacher and possibly writer... What would be new here is the contribution from the Far East, especially soyfoods and seaweeds. It may take a long time for these products to spread in Europe, and especially in Switzerland, since many popular-traditional and cultural values are so much connected with cattle raising. Also, soybeans grow poorly here... Anyway, these were considerations I did not have to face, while I was using pounds and pounds of tofu, tempeh, miso, etc. in our restaurant in Chicago, and I feel I have a lot to learn and rethink at this point."

Note: In 1978-79 Verena worked at the vegetarian, natural-foods restaurant "It's Natural," owned by Brian Schaefer, at 502 & 514 Main St., Evanston, Illinois 60202 (a suburb of Chicago). Address: Frauenfeld, Switzerland. Phone: 041-22 50 34.

© Copyright Soyinfo Center 2013

operation in the tiny northern town of Bethlehem, New Hampshire, converts certified organically grown soybeans from Minnesota into about 1 ton of tofu every week. The founding partners, Pat and Jay Gibbons, both of Bethlehem, are "two energetic, forward-looking and unusual people who nurture a vision of tofu-based diets in a world of plenty for all." She was formerly a New York City schoolteacher and he a London researcher for Amnesty International. Even before they met, both were vegetarians on the path of New-Age consciousness. In 1974 they moved to The Farm in Tennessee and there learned about soy crafting for the first time. After leaving The Farm, they moved to Bethlehem and started by making tofu at home. Then two years ago (1977) they decided to start a commercial tofu shop. The biggest impetus to the growth of the tofu industry was publication of *The Book of Tofu,* which not only tells what tofu is and how to make it, but also provides technical instructions for starting and operating your own soy dairy. Today Crystal Hills has two full-time and two part-time employees in addition to Pat and Jay. The process for making tofu at Crystal Hills is described in detail. The company also makes Soysage. Pat and Jay plan to open a soy deli in Bethlehem next year. All tofu sales are in bulk, shipped in plastic buckets to retail outlets. Photos show Jay and Pat, with their equipment (all made in New Hampshire) and two workers. Recipes are given for Breaded tofu sticks, French dressing, Bulgur casserole, Tofu-vegetable pie.

4283. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Carmel Hill Tofu Shop.
Manufacturer's Address: P.O. Box 3, New Carlisle, QUE, G0C 1Z0, Canada.
Date of Introduction: 1979. September.
New Product–Documentation: Letter/Order for 100 copies of the pamphlet "What is Tofu" from "Carmel Hill Tofu Shop." 1979. Sept. 25. The company is located at the address shown above.

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Dennis Connolly.

4284. Esko, Wendy. 1979. Introducing macrobiotic cooking. Tokyo: Japan Publications. 144 p. Foreword by Aveline Kushi. Preface by Edward Esko (both written June 1978). Illust. by Bonnie Harris. Index. 26 cm. Reprinted in 2006 by Square One Publishers (Long Island, NY, 240 p.).
• ***Summary:*** The author was introduced to macrobiotics in upstate New York in about 1971. This is her first book on macrobiotics. It was originally published under the title of *An Introduction to Macrobiotic Cooking* by the East West Foundation, 17 Station Street, Brookline, Massachusetts 02146. Though copyrighted in 1978, the first edition appeared in Sept. 1979. The fourth printing was May 1981.

The chapter titled "Beans including tofu and natto" gives descriptions of and recipes for making: Japanese black beans (black soybeans, p. 54; "These beans are therapeutic for the sexual organs and will relieve an overly yang condition caused by too much animal food or fish.") Soybeans (p. 54. "These beans are the most yin of the bean family... It is recommended that soybeans be eaten only occasionally as a separate side dish. Because they are very yin, they should be cooked with yang vegetables such as lotus root or burdock, for balance. The best way to eat soybeans is in the form of *tofu, okara, natto, tempeh,* and, of course, miso and tamari.") Tofu, and Homemade tofu (curded with nigari, p. 54-55). Okara (p. 55-56). Tofu and corn. Tofu, onions and water cress. Dried tofu (dried-frozen, p. 57). Yuba (dried soy milk; how to make at home). Vegetables and dried soy milk (p. 57). Ganmodoki (Tofu and jinenjo patties, p. 57-58). Natto (description and how to make at home, p. 58-59).

Other soy-related recipes include: Tofu soup (p. 68). Miso soup (p. 69-70, basic, or quick). Watercress miso soup (p. 71). Daikon and sweet rice dumpling soup (with miso). Chinese cabbage and tofu miso soup (p. 71). Aveline Kushi's miso stuffed lotus root (p. 86). Tofu dressing (p. 91). Miso-tahini spread (p. 92). Miso-sesame spread (p. 92). Miso-lemon sauce (p. 93). Tofu dip (p. 93). Miso with scallions (p. 95). Tamari (description, p. 95). Tekka (made with Hatcho miso, p. 96). Miso pickles (p. 100-01). Tamari pickles (p. 101). Tofu plaster (p. 130). Ume-Sho-Kuzu drink (with umeboshi, tamari and kuzu, p. 131). Ume-sho-bancha (with tamari, p. 131). Use of tamari, miso, and tekka (p. 132).

© Copyright Soyinfo Center 2013

Also includes instructions for making amasake at home (p. 116; it is a natural sweetener made from fermented sweet rice), and a recipe for Amasake bread (p. 107), instructions for making seitan at home (p. 46-47, using 3½ lb of hard spring or hard winter whole wheat flour; spring wheat flour produces a much softer texture of seitan than the winter variety), and recipes for seitan stew, seitan-barley soup, sauteed vegetables and seitan, stuffed cabbage with seitan, and seitan croquettes (p. 47-49), plus recipes for leftover seitan (p. 125). Address: East West Foundation, near Boston/ Cambridge, Massachusetts.

4285. Simonds, Nina. 1979. Chinese cuisine: Bean curd. *Gourmet.* Sept. p. 28-29, 84-91.
• ***Summary:*** Contains a discussion of regular tofu, fermented tofu (*ch'ou tou fu, tou fu ju*), tofu sheets ("bean curd skin," *pai yeh*), tofu noodles (*kan szu*), fried tofu, pressed tofu (*tou fu kan*), and yuba in East Asia, how tofu is made, and 11 recipes. A full-page color photo shows a dish of "Cold bean curd with carrot and celery..." The recipe is given.

Taipei in the morning in Taipei is teeming with food smells, including the aroma of "deep-fried Chinese crullers." But in stark contrast to the delightful panorama of aromas "was a putrid odor that defied classification. That baffling pungent smell, present throughout the entire day in every part of the city, I soon traced to stinky bean curd (*ch'ou tou fu*), a favorite snack of the Chinese."

Vendors of this unsavory delicacy can be found all over the city with their portable deep fryers. "The children in my Chinese family's house, all great fans of the stuff, used to race outside excitedly with empty plates at the stinky bean curd man's call (The smell usually preceded him by two blocks).

"This foodstuff is a type of fermented bean curd which is generally deep-fried and eaten with a choice of soy sauce, vinegar, mashed garlic, and chili paste." It is but one of many bean curd products made by the Chinese.

When a coagulant is added to hot soymilk, the "liquid is transformed into a delicate custardlike substance. Chinese love to eat bean curd in this tender state–sometimes adding a little cornstarch as a stabilizer–with a sugar syrup and softened peanuts or flavored with sesame oil, scallion and pickled vegetable."

The tofu recipes are: (1) Leng teng tou fu (Cold bean curd with red-in-snow; from Szechwan, with five 3-inch squares of bean curd). (2) Pan kan szu (Cold bean curd with carrot and celery; from Szechwan). (3) Ma p'o tou fu (Spicy bean curd; from Szechwan). (4) Hung shao tou fu (Red-cooked bean curd with vegetables). (5) Tung ku p'a tofu fu (Braised bean curd with black mushrooms; from Szechwan). (6) Hsieh jou p'a tou fu (Stir-fried bean curd with crab meat). (7) Pa pao la chiang (Eight-treasure stir-fried vegetables with pork; from Szechwan). (8) Hsiang tofu fu (Stuffed bean curd pockets, from Canton). (9) San hsien kan szu t'ang (Three-flavor bean curd soup; from Shanghai). (10) Kuo t'ieh tou fu (Panfried stuffed bean curd). (11) San hsien tofu fu tun (Steamed three-flavor molded bean curd).

4286. **Product Name:** Tofu (Vacuum Packed).
Manufacturer's Name: Summercorn Foods Inc.
Manufacturer's Address: Community Cannery, 1508 W. 6th St., Fayetteville, AR 72701. From spring 1981: 401 Watson, Fayetteville, AR 72701. Phone: 501-521-9338.
Date of Introduction: 1979. September.
Ingredients: 1988: Certified organic soybeans, purified water, natural calcium sulphate.
Wt/Vol., Packaging, Price: 16 oz vacuum packed.
How Stored: Refrigerated.
Nutrition: Per 100 gm: Calories 72, protein 9 gm, carbohydrates 2.4 gm, calcium 828 mg, sodium 14 mg, fat 4 gm.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address (401 Watson St.) and phone number. The owners are Steve Kectner and David Druding.

Soyfoods Center Computerized Mailing List. 1981. Jan. 22. Owners are now Steve Keltner, David Druding, and Annee Littell. 1981. Spring. Swallows. Summercorn Soyfoods is now producing tofu, soymilk, and soysage.

Talk with David Druding. 1987. Oct. The company started in 1974 as a bakery. Rodale Press published their Uprisings Cookbook. Label. 1988. 3 by 4 inches. Blue and brown on tan.

Talk with David Druding. 1988. May 18. They started making tofu in September 1979 in a place they rented in the Community Cannery, which was about 8 blocks from the main bakery, and located at 1508 West 6th St. in Fayetteville. Steve Keltner learned the process from a Korean man who had worked with Thom Leonard in Lawrence, Kansas. He also learned from *The Book of Tofu.* They would cut up the tofu as soon as it was chilled, transport it to the main building, package it and make carob pudding, tofu onion dip, and creamy tofu dressing. They sold the products locally (Fayetteville and Little Rock) and in Missouri, not to the 11-state region that was part of New Destiny Federation. The formal trade name of the company/co-op from the beginning was Summercorn Foods Inc. The name on the incorporation paper is Summercorn Collective Co, Inc. but at time the trade name Summercorn Bakery and Soyfoods was used, informally. The latter never appeared on labels.

Talk with David Druding. 1994. Nov. 2. He moved in about Dec. 1992 from 401 West Watson St. to 1410 Cato Springs Rd., Fayetteville, Arkansas. Same phone. At that time he changed the business name from Summercorn Bakery and Soyfoods to Summercorn Foods. His business is doing well. He just started selling his tofu to Walmart, which is selling it at their new natural and gourmet foods

department in several of their division 1 stores. A health inspector said that he must establish another barrier to botulism and other food poisoning bacteria in his vacuum packed tofu.

4287. **Product Name:** Tofu.
Manufacturer's Name: Tofu Factory (The).
Manufacturer's Address: Route 1, Box 216, St. Ignatius, MT 59865. Phone: 406-745-4538.
Date of Introduction: 1979. September.
New Product–Documentation: Letter (order form) from Gerald Minsk of The Tofu Factory (formerly Swan Gardens; Box 216 Rt 1, St. Ignatius, Montana 59865). 1979. Sept. 28. He order the books *Tofu & Soymilk Production, The Book of Tempeh, The Book of Tempeh, Vol. II.*

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owners: Gerald Minsk and Brenda Adley. Soyfoods Center Computerized Mailing List. 1983. June 20. Owners: Gerald Minsk and Brenda Adley.

Talk with (call from) Liz Elliott of Dixon, Montana. 1996. June 19. She would like to start a tofu shop in Montana. She says there was one in St. Ignatius until several years ago but they had water contamination problems and then the management fell apart. They no longer exist.

Letter from then talk with Daniel Reddish of Montana. 2000. July 12. He used to work for the Tofu Factory, a co-op in St. Ignatius, Montana. His phone: 406-859-3544.

Talk with Daniel Reddish of Philypsburg, Montana. 2000. July 23. He talked with Vicky Allbright, who was an early member of the co-op (she started in about 1980) and still lives in St. Ignatius, Montana. Daniel joined the co-op in about 1981. It was a co-op from day one. In about 1979 a group of about 12 people (including Gerald Minsk), named Friends Unlimited, came to Montana from Boulder, Colorado. They were oriented to whole foods. They purchased 230 acres on the Flathead Indian reservation and began to grow foods organically. At about the same time they bought 7 acres of very good land in St. Ignatius, about 3 miles from the organic farm, which had formerly been a dairy farm [and, unbeknownst to Daniel, Swan Gardens tofu shop]. The co-op built a nice, new building on this land in St. Ignatius for their tofu shop. Near the dairy farm building was a large main house made of logs; it could house 6-15 co-op members. But soon the members had erected 3 yurts and several tepees, each heated with a wood stove during the winter.

By about 1982 the farm was looking to distribute their produce over a larger area, so the co-op established The Whole Food Connection. They got a 22-foot semi truck and The Tofu Factory began taking produce on their distribution route, which soon was reaching as far east as the Midwest. When all the food was delivered, they would go to Wisconsin and fill up with organically grown soybeans for the trip home.

The Tofu Factory was a pioneer in vacuum packing tofu. They would put a cake of tofu into each of four plastic bags, then seal all four at once in a pneumatic vacuum sealer. By 1981 they were selling about 90% of their tofu in these vacuum packs and the other 10% in bulk in spring water.

The cooperative was located in an area inhabited by many ranchers and red-necks. One day a local farmer stopped by to see what was going on. He asked about the pulp and ended up taking home a bucket of okara. The next day he came back with 15 fifty-gallon drums in his 32-foot horse trailer. He said that his cows ate okara "like it was ice cream." So an ongoing trade was agreed upon: okara for firewood. Daniel got increasingly involved with the marketing side of the tofu business. He did tofu demos in Safeway supermarkets, and soon landed the Safeway account for all of Montana, northern Idaho, and eastern Washington as far as Spokane. The future looked very bright.

But in the cooperative, the problems of factions and consensus decision making were taking their toll. In about 1984 the cooperative broke up; they sold their tofu equipment to a local LDS (Mormon) group, who used it to make dairy cheese.

4288. *View: Santa Cruz City Schools* (*California*). 1979. Food program 'shines' across the country. 1(6):1, 3-4. Sept. • ***Summary:*** Discusses the work of Thelma Dalman, Maxine Prairie, and Mary Tolan (a photo shows each) in introducing natural foods and tofu to the city's schools. Tofu serves as a partial substitute for meats, and some dishes contain up to 30% tofu. Nutrition education is one of the program's goals. Foodservice people from across American contact Dalman regularly to seek advice on how to upgrade their programs. She is western regional director of the American School Food Services Association. Address: Santa Cruz, California.

• ***Summary:*** These include bean sprouts, lentils, tofu, cracked wheat, bran, carob, and Graham flour (for whole wheat bread, biscuits, etc.).

Tofu is a Japanese word. The mild flavor of this bean cake makes it easy to add to just about any dish when you want to increase the protein content. Tofu adds an interesting texture and a little of its own flavor to dishes from stir-fried vegetables to noodle casserole. "We stir-fried tofu with bits of tomato, onion, and fresh basil and came up with a refreshing main dish that tasters raved about." It was also delicious with East Indian spices, such as turmeric, or scrambled as an alternative to scrambled eggs.

4299. Nathan, Joan. 1979. The venerable soy sauce from Vietnam. *Washington Post.* Oct. 4. p. E1, E3.
• ***Summary:*** After the fall of Saigon in 1975, Vietnam no longer exported goods to the United States. So Vietnamese living in the USA were no longer able to buy their traditional soy sauce, named Tuong, a key ingredient in many Vietnamese recipes. Tuong is quite different from its Japanese or Chinese counterparts. It is "much lighter in color and thicker in consistency, with a slightly sour taste."

Now Tuong is being made in Bowie, Maryland (in the Ardmore Industrial Park), by Hoang Van Chi (a chemist) and his wife Hoang Phan. Many relatives have helped them to start the small business named Vietnam Food and Drink.

Their first shipment, in June 1975, was 4,000 pounds, sent to Paris where the largest community of expatriate Vietnamese live. "The second shipment went to California and the third to Texas."

Tuong is not used in place of salt as is soy sauce in Japanese and Chinese cookery. For that the Vietnamese use Nuoc Mam, made by layering fresh fish and salt, in alternating layers, in barrels

Describes briefly how Tuong is made and gives three Vietnamese recipes: (1) Dau phu ran cham tuong (Fried tofu dipped in Vietnamese soy sauce). (2) Bo tai tuong gung (Steak with soy sauce and ginger). (3) Banh xeo (Pork, shrimp and vegetable pancake / omelet).

Before becoming a voluntary exile in 1959, Hoang Van Chi wrote his classic book *From Colonialism to Communism.*

A photo shows Hoang and his wife holding bottles and jars of their soy sauce.

• ***Summary:*** A family is sitting around the dinner table. A man looks down at his plate with a puzzled look on his face and asks "Bean curd?" The woman sitting next to him replies "Tofu! It's very good for you. It gives you as much protein as the meat you're used to eating." A second man is tasting it with a dubious look on his face. The child at this table of 4 says enthusiastically, "Make it look like meat, Mom." The second frame shows only the first man and the woman. To the horror-stricken man who is still staring at his plate, the woman says heartily, "I can shape it to look like a drumstick or a hamburger patty if that'd help. Tofu can be molded into any shape..." The last frame shows all 4 people, the first man now angry, the second bewildered, and the child smiling as the woman gleefully states, "Starchild taught me that."

Note: This is the earliest cartoon seen (Oct. 2001) that mentions soy.

4318. Carlin, Margaret. 1979. Soy to the world! Tofu is cheap, nutritious and low in calories. *Albuquerque Tribune* (*New Mexico*). Oct. 23. p. B-1. [1 ref]
• ***Summary:*** About Southwest Soy Foods. "Tofu has fed Orientals for thousands of years, and now Americans are learning to appreciate the bland white nutritious stuff.

"Tofu is bean curd, a custard-like cake made from curdled soybean milk. It is cheap, high in protein, low in calories and saturated fats and it has no cholesterol. Anybody trying to lose weight can enjoy tofu with a clear conscience.

"Tofu is practically tasteless so it blends well with other flavors. It is delicious fried, baked in souffles and casseroles, broiled, scrambled and made into burgers, tacos, enchiladas, tamales, lasagna and almost anyway you like." Tofu mayonnaise is good tasting but low in calories.

"Tofu is showing up on vegetarian restaurant menus, health food store shelves and in Oriental shops and supermarkets as well." Stephen and Kathryn Bennett Clarke own Southwest Soy Foods in Santa Fe, New Mexico. It started only 18 months ago but now makes more than 2,400 pounds/week of tofu. Their tofu is also sold in Albuquerque. "Mrs. Clarke wandered into the world of tofu because her daughter, Madena, 9, was allergic to milk." She learned about soy milk and before long she was making her own tofu.

"She and her husband also were inspired by 'The Book of Tofu,' by William Shurtleff and Akiko Aoyagi ($6.95), a book widely regarded as definitive. When it was published a few years ago, the book created an explosion of interest in tofu, and resulted in the opening of many tofu shops throughout the country, including the Clarke venture in Santa Fe." "Tofu costs from $1.09 to about $1.20 a pound."

Of course, if you make your own tofu at home it costs much less. "An Albuquerque engineer, Al Geduld, has designed a wooden tofu maker [tofu kit] which sells for $20."

Recipes from Kathryn Clarke include: Tofu mayonnaise. Missing egg salad. Ruthie's tofu / seafood stir fry. Tofu protein pops. Photos show: (1) Overhead view of Stephen Clarke stirring soy milk before adding the curdling agent. (2) Stephen Clarke, Kathryn Clarke, and Thalia Plantian, standing behind a sink in which their tofu is cooling. Address: Tribune Accent Editor.

• ***Summary:*** About the New England Soy Dairy.

4326. Frank, Stephen. 1979. Soybeans take root in county. *Recorder* (*Greenfield, Massachusetts*). Oct. 30. Section B. p. 1. Tuesday.
• ***Summary:*** "The first cash crop of soybeans grown in Franklin County has been harvested and loaded onto the bed of Charles Warner's truck... From Warner's truck the beans will be put through a fanning mill to separate out rocks and dirt. Then the beans will be loaded into bushel bags" and transported to the New England Soy Dairy at 305 Wells St. in Greenfield for use in making tofu.

Warner, whose farm is in Sunderland, "was one of three farmers enticed by Richard Leviton, founder of the New England Soy Dairy in Greenfield, to experiment with the new crop. The soy dairy uses about 600,000 pounds of soybeans annually to produce the creamy white cakes of soy curd known as tofu.

"Of more than 30 acres of soybeans planted in fields in Belchertown, East Leveratt, and Sunderland, only Warner's plants grew to maturity and were harvestable." Leviton blamed the failures of the other crops on late planting, early frost, and excessive weeds. Address: Recorder staff.

4327. Barton, David. 1979. Foods from the Far East. *Whole Foods* (*Berkeley, California*). Oct. p. 28-34, 54.
• ***Summary:*** Mutual Trading Co. is making 500 tons of miso a year, and this is expected to increase by 10-15% in 1980. Their miso sales are up 300% in 5 years. Erewhon wholesale sales by product for the year ended June 1979 were: Miso $100,000, shoyu $200,000, tofu $110,000. Japanese trade commission figures for 1978 natural food imports are: Miso $625,528, and shoyu $1,466,909.

4328. Belson, Abby Avin. 1979. Super soy. *Family Health* 11(9):52-53, 55. Oct.
• ***Summary:*** "Healthier than a hearty hamburger, more maligned than a little liver pill, able to leap from salads to stews in a single bound... It's a bean, its protein, its Super Soy." An introduction to: Soybean history. Ways of using soybeans and commercial soy foods (incl. bean curd, or tofu). Textured soy protein as a hamburger extender. Soy lecithin, choline, and the human brain. Recipe for soybean salad. Soy sprouts. Soy and cancer (protease inhibitors). Frederic Stare, M.D., professor of nutrition at the Harvard School of Public Health (in Boston, Massachusetts) says: "Nutritionists used to think that 50 percent animal protein was appropriate to an average diet, but they now realize that this is an unnecessarily large supply of animal food. If you get ten to fifteen percent of your total protein from animal sources, the rest can come from plant foods. And soy products can provide half of that vegetable protein." David Kritchevsky of the Wistar Institute in Philadelphia, Pennsylvania, is finding that both soy oil and soy protein may be capable of lowering dangerously high levels of cholesterol in the blood of consumers.

4329. D.B. 1979. Soy deli's to go! *Whole Foods* (*Berkeley, California*). Oct. p. 44.
• ***Summary:*** About Northern Soy (Rochester, New York) and White Wave (Boulder, Colorado). A list of the items served by each is given. Greg Weaver and his two partners–Norman Holland and Andy Schecter–started their soy deli in Nov. 1978. Sales now run over $2,000 a week in August. "Other soy delis currently known to be in operation are the Soy Plant in Ann Arbor, Michigan, and Yellow Bean in Detroit, Michigan."

4330. Frank, Ellen Perley; Rubenstein, Judith. 1979. Tofu power: Protein for a small planet. *New Age Journal* (*Boston, Massachusetts*). Oct. p. 52-53.
• ***Summary:*** About the New England Soy Dairy and tofu. "It may just turn out to be the most popular food of the '80s. You can fry it, freeze it, blend it, bake it. It can serve as the basis of dishes ranging from cheesecake to fake burgers. In the past three years this lightweight white blob has jumped from the confines of Chinese restaurants to become a near-staple in many American homes." Tofu is "blocks of intense protein made from soybean curds."

Two years the co-founders of the Soy Dairy, Ira Leviton and his wife Kathy, were running a natural-foods bakery

© Copyright Soyinfo Center 2013

"when they read the tofu-eater's bible, William Shurtleff and Akiko Aoyagi's *The Book of Tofu* (Autumn Press, 1975) and got tofu fever. Five people banded together and built the tofu shop... Since *The Book of Tofu* was first published, fifty tofu shops have sprung up around the country." Photos show: New England Soy Dairy owners Tom Timmins, Kathy Leviton, and Ira Leviton standing behind a large, round tank in which cakes of tofu are soaking. Richard Leviton pressing tofu. A worker removing the cloths from large sheets of pressed tofu. Address: 1. Writer for New Age; 2. An ace tofu chef.

4331. Ohta, Teruo; Takano, Kenji; Nikkuni, Ikumi; Hashizume, K.; Saio, K. 1979. Shokuhin-yô daizu no chôki hokan-chû no hinshitsu henka [Soybean quality change and its influence on food processing]. *Shokuhin Sogo Kenkyujo Kenkyu Hokoku* (*Report of the National Food Research Institute*) No. 35. p. 56-70. Oct. [6 ref. Jap; eng]
• ***Summary:*** As soybeans were stored for 1 year, the changes in their quality were measured and the effects of these changes on natto, tofu, and aburage were investigated under different temperatures (15, 25, and 35ºC) and humidity (RH = Relative Humidity 60, 70, and 80%). New crop (recently harvested) soybeans grown in the USA and China were used in this experiment.

Soybean quality deteriorated with time, and there were definite measurable changes in the ability to germinate / sprout, acid values, titratable acidity, Nitrogen Solubility Index (NSI), solids extracted in soakwater, and extraction rates of protein and solids into soybean milk.

The passage of time in storage led to harder cooked beans for natto, lower yield of soybean milk and tofu, lower coagulation rate in tofu, and less ability to expand during deep frying in aburage.

Increased temperatures and relative humidity increased the rate of soybean quality deterioration as measured above, and increased RH caused more deterioration than the increased temperature. Therefore, soybeans awaiting processing into natto, tofu, or aburage should be stored in a cool, dry place. Address: National Food Research Inst. (Shokuhin Sogo Kenkyujo), Kannon-dai 2-1-2, Yatabe-machi, Tsukuba-gun, Ibaraki-ken 305, Japan.

4332. Taira, Harue; Taira, Hirokadzu; Mori, Y.; Ushirogi, T.; Fujimori, I. 1979. Daizu shushi no kansô shori hôhô to sono hinshitsu ni tsuite. IV. [Influence of dry treatment after harvest on quality of soybean seeds. IV. Suitability for food processing of stored seeds]. *Shokuhin Sogo Kenkyujo Kenkyu Hokoku* (*Report of the National Food Research Institute*) No. 35. p. 160-71. Oct. [11 ref. Jap; eng]
• ***Summary:*** The effects of dry treatment (drying) after harvest on the physical properties, chemical composition, and suitability for food processing of soybean seeds were investigated. The heat treatments were natural drying and air drying using heated and non-heated air at 20, 30, and 40ºC.

The seeds were then stored at 15ºC with RH (Relative Humidity) of 65% and 75%, at 30ºC with RH of 65% and 75%, and at room temperature and humidity in a paper bag for 30, 60, 120, 180, 270, and 360 days, respectively. These various storage conditions were further investigated for their effects on suitability for food processing.

At a given RH, the seed moisture rose as the temperature rose; many figures are given. Seed quality degenerated as storage time increased. The following decreased: absorbability of water in seeds, rate of germination, extractability of protein from soaked seeds by hot water, pH of soybean milk, and ratio of weight of steamed seeds to raw seeds. And the following increased: soluble matter and protein in soak water, moisture content, hardness and darkness of color of steamed seeds.

Conclusion: Soybeans should be stored in a cool, dry place, ideally at a temperature of 15ºC (50ºF) or below and an RN of 75% or below. Remarkable deterioration was observed at 30ºC with RH of 75%. Seeds heat dried at 40ºC showed a significant decrease in suitability for making miso, natto, or cooked soybeans. Tofu making was less affected by drying the seeds with heated air.

4340. Lukoskie, Luke; Shurtleff, William. 1979. Re: Need for industry-wide support for the Soycrafters Association and *Soycraft* magazine. Letter to "Fellow Soycrafters," Nov. 9. 1 p. Typed, with Shurtleff's signature on letterhead (photocopy).
• ***Summary:*** SANA needs additional funds and support. "Because we feel so strongly about the worth of what everyone here in North America is doing and the promise it holds for people everywhere, the two of us (Luke and Bill) have decided to make regular contributions to SANA of between $30 and $50 a month... in good times and bad. Why not take a good hard look at what you wish to contribute, and join us." Note: This letter was drafted by Shurtleff but sent out on Island Spring's letterhead. Address: 1. Island Spring, P.O. Box 747, Vashon, Washington 98070; 2. New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549. Phone: (1) 206-622-6448; (2) 415-283-2991.

4341. Universal Press Syndicate. 1979. Cathy (Cartoon). *Unknown newspaper.* Nov. 19.
• ***Summary:*** This 4-part cartoon begins with a mother and daughter standing by the kitchen refrigerator. Daughter: "It's 3 days before Thanksgiving, mom. Why is your refrigerator full of bean curd?" Mom: "Oh, didn't I tell you? I've become an Earth Mother.

"My consciousness-raising group has decided to celebrate our pioneer spirits with an all-natural feast this year.

"We feel that a self-basting turkey in a self-basting oven is simply no longer an expression of the real me."

Daughter: "Is bean curd an expression of the real you?" Mom: "Please sweetie... You're wadding up our main course" (as the daughter crushes a blob of tofu in her left hand).

4342. Reed, M.H. 1979. Dining out: 100 Hunan tastes and parking, too. *New York Times.* Nov. 25. p. WC19.
• ***Summary:*** This is a review of the Chinese restaurant Hunan Manor (149 South Central Ave., Hartsdale–a hamlet and a census-designated place (CDP) located in the town of Greenburgh, Westchester County, New York). The "Beancurd Sichuan style" was recommended. "Of the regular offerings, fresh prawns with black bean sauce appeared flawed only by the intensely salty black beans that should have been sliced fine or mashed."

4343. Ohlund, Tim. 1979. Re: Ted Nordquist and Aros Soymilk Products in Sweden. Letter to William Shurtleff at New-Age Foods Study Center, P.O. Box 234, Lafayette, California, Nov. 26. 1 p. Handwritten.
• ***Summary:*** "Ted [Nordquist], a business man named Gunnar, a Korean–Professor Kim, and myself are now deeply involved in setting up the Aros Soymilk Products company. We've found a suitable factory location in Örsundsbro (my village) at a reasonable price. Now the architect is busy working out the floor plan [500 square meters] which will have to be approved by the health authorities. An estimate of the factory remodeling plus all other prospected costs will be the basis for a loan from the State development agency. We hope to get a loan for the whole shebang. The interest rate and other conditions will be very favorable. If all goes well we hope to start production of tofu, soymilk, salad dressing and later a few other products next fall. We'll let you know more later as it develops. Love–Tim, Annalena & Finn."

Note: The date of this letter is not clear. It was probably 26 Nov. 1979 but could be 20 April 1979, with a follow-up card from Tim on 5 Dec. 1979 (or 12 May 1979). The books were finally sent on 10 Dec. 1979. Address: Box 559A, 19063 Örsundsbro, Sweden.

color photo shows Koichi as he uses a hand-turned winch to lift a pressing sack filled with okara and soymilk.

Note: This is the most recent English-language document seen (June 2012) with the phrase "Meat without bones" (or a similar phrase) in the title; it is used to refer to tofu. Address: Ontario, ONT.

4346. **Product Name:** Cottage Tofu (Non-Dairy Cottage Cheese).
Manufacturer's Name: Garden of Eatin'. Made in San Francisco by Farm Food Co.
Manufacturer's Address: 5300 Santa Monica Blvd., Los Angeles, CA 90029.
Date of Introduction: 1979. November.
Ingredients: Tofu (from organically grown soy beans, water & Nigari Bitterns), soy oil, apple cider vinegar, natural herbs & spices, sea salt.
Wt/Vol., Packaging, Price: 8 oz. or 16 oz.
How Stored: Refrigerated.

New Product–Documentation: Label. 1981. 3.5 diameter. Self adhesive. Red and blue on white. "Tofu never had it so good!" Article and photo in Soyfoods. 1981. Winter. p. 59-61. Summer p. 44-45. 8 or 16 oz. retails for $1.39 or $2.15. Interview with Al Jacobson. 1981. April 13. His invoices show that he first started marketing Cottage Tofu in November 1979. It was his formula, made by Farm Foods in San Francisco. Note: This is the world's first commercial tofu (or soy) cottage cheese.

4347. Leviton, Richard; Kilroy, David. 1979. Media bibliography. Greenfield, Massachusetts: Soycrafters Association of North America. 16 p. Nov. Unpublished manuscript. 28 cm. [243 ref]
• ***Summary:*** Each page of this soyfoods (mostly tofu) bibliography is on letterhead that reads: *Soycraft: The Journal of the Soycrafters Association of North America.* Most of the articles cited were published in 1979, between May and November. However 9 articles were published from June 1976 to Feb. 1979. It is divided into 5 sections: (1) Profiles of individual soycraft companies (3 p., 38 ref). (2) Soybean and soyfoods industry (2 p., 32 ref). (3) Sanitation and soyfoods production (2 p., 18 ref). (4) Local and regional general accounts of soyfoods (8 p., 140 ref) (5) National and mass circulation coverage (1 p., 15 ref).

Note 1. How did Richard Leviton collect all these references? In an interview (2005 March 2) he recalls that New England Soy Dairy (of which he was a co-owner and where he worked) subscribed to a clipping service on the subject of soyfoods (tofu, tempeh, food uses of soybeans, soybean oil, soy based infant formula, etc.) starting in about May 1979.

Note 2. It is quite remarkable to see the level of nationwide media coverage that tofu received as early as 1979. Leviton's tireless and effective activities (organized national conference in July 1979 in Amherst, Massachusetts, wrote and published *Soycraft* magazine, and perhaps did a news release) may well have been the main reason for this positive media coverage. As of March 2005, of the 225 food-related references in this bibliography, Soyfoods Center had not seen 161, or 71.6%. Address: 305 Wells St., Greenfield, Massachusetts 01301. Phone: 413-774-5480.

4348. **Product Name:** Soysage. Briefly renamed Soy Loaf in the early 1980s.
Manufacturer's Name: Northern Soy.
Manufacturer's Address: 30 Somerton St., Rochester, NY 14607. Phone: 716-442-1213.
Date of Introduction: 1979. November.
Ingredients: Incl. okara.
New Product–Documentation: Talk with Andy Schecter of Northern Soy. 1991. Feb. 5. This product was launched as Soysage in Nov. 1979 at 30 Somerton St. For a short time in the early 1980s the name was changed to Soy Loaf, then the company "decided to stop bucking the tide, and changed the name back to Soysage. The product was discontinued about 2 years ago, then re-introduced in 1990."

4349. Rodale, Robert. 1979. The amazing three-way bean. *Organic Gardening.* Nov. p. 28-35.
• ***Summary:*** Some people see soybeans as just another bean. Soycrafters see in soybeans the potential for a natural, healthful and even profitable new way of life. And one doctor even sees in soybeans a possible way of controlling cancer.

After discussing tofu and tempeh, and why one might want to become a soycrafter, Rodale continues: "What may really cause soycraft to boom, though, is new information

© Copyright Soyinfo Center 2013

that the eating of soy foods may give people a potent weapon in the control of cancer. Walter Troll, Ph.D., a researcher at New York University Medical Center, is about to publish details of experiments which show that experimental animals fed soybeans were able to resist the effects of chemical carcinogens (cancer-causing substances). It is already known that women living in countries where soybeans and other seeds are important sources of protein have less breast cancer. Now there is laboratory evidence showing why. Substances called protease inhibitors [or trypsin inhibitors] are the key."

"If you are interested in tofu or tempeh-making as a business, you may want to check out *Soycraft* magazine. The address is 158 Main Street #3, Greenfield, Massachusetts 01301. A one-year subscription–four issues–is $15." Photos show: Robert Rodale. Tofu being made at the New England Soy Dairy.

4350. Rubenstein, Judith. 1979. Soycrafters: A New-Age guild. *New Age Journal* (*Boston, Massachusetts*). Nov. p. 51-53.
• ***Summary:*** "The production of soyfoods has become one of the fastest-growing food industries in the western world. Some 230 people gathered at Hampshire College in Amherst, Massachusetts, this July for the second annual Conference of Soycrafters Association of North America (SANA)–four days of workshops and lectures about producing and marketing soyfoods." Photos by Lionel Delevingne show: (1) Robert Rodale and Richard (Ira) Leviton seated on a low stone wall and talking. (2) Kathy Leviton working in the kitchen. (2) Akiko Aoyagi and Bill Shurtleff (portrait photo). Address: [Institutional Consultant, New England Soy Dairy, Inc., 305 Wells St., Greenfield, Massachusetts 01301].

4351. **Product Name:** Shiwa's No-Cheese Cake (Tofu Cheesecake) [Strawberry, or Blueberry].
Manufacturer's Name: Shiwa's No-Cheese Cake. Div. of Grain-Dance Natural Foods.
Manufacturer's Address: San Francisco, California.
Date of Introduction: 1979. November.
Ingredients: Tofu, honey, natural whole-wheat graham cracker (made with honey) crust, pure vanilla. Topping: Seasonal fruits (strawberry, blueberry, etc.).
Wt/Vol., Packaging, Price: 12 oz in aluminum pie tin with clear plastic raised dome top.
How Stored: Refrigerated.
New Product–Documentation: Talk with Shiwa Harris. 1988. March 13. She thinks that "Shiwa's No-Cheese Cake" was the first tofu cheesecake in San Francisco. Started making it in late 1977, shortly after Ron Harris went commercial with seitan and before her second daughter Elizabeth was born. She made it at home from a recipe she created independently, and distributed it to 8-10 natural food stores. Rainbow was her best customer. It sold fairly well; would have been more marketable if she had sold it frozen. It was on the market for over a year. She still has a label. That was her only soy product. She recalls that this cheesecake was introduced about a year after her amazake cupcakes.

4352. Shurtleff, William. 1979. Rapid growth of tofu shops and soy dairies in North America (News release). Lafayette, California: New-Age Foods Study Center. 1 p. Nov.
• ***Summary:*** "There are presently 164 tofu shops and soy dairies in North America and, as shown in the accompanying graph, the increase in numbers is rapidly accelerating. Ninety-six of these run by Caucasian Americans have opened in the past 3 years since publication of *The Book of Tofu*, by Shurtleff & Aoyagi, which has sold over a quarter of a million copies. The industry has a brisk sales growth rate of 25 to 30% a year, and uses an estimated 35% of the industry sales; the 68 Oriental shops have 65%.

"The largest tofu factory in the U.S. is the Matsuda-Hinode company in Los Angeles; they produce about 16,000 pounds of tofu a day under 14 different labels. The largest of the new breed of Caucasian-run plants is the New England Soy Dairy in Greenfield, Massachusetts. Founded in 1977, it now produces some 4,500 pounds of tofu a day and expects revenues of $750,000 in 1979. In its April 12 front page story on the tofu industry, *The Wall Street Journal* focused on The New England Soy Dairy...

"Worldwide, the tofu and soymilk industry is rapidly expanding. There are presently a total of 211,000 producers, including 38,000 in Japan, 158,000 in mainland China, 11,000 in Indonesia, 2,500 in Taiwan, and 1,470 in Korea. The largest tofu factories, located in Japan, produce over 100,000 pounds of tofu a day (15,000 tons a year) and the largest soy dairy, located in Hong Kong, produces 500,000 bottles of soymilk a day (150 million bottles a year).

"Most of the new tofu shops and soy dairies in the U.S. have gotten into production using the technical manual *Tofu & Soymilk Production* by William Shurtleff & Akiko Aoyagi, which has just been published in both paperback and hardback editions." Address: P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

• ***Summary:*** "There is no smoking in the tofu factory in Greenfield [Massachusetts]. The tofu maker described the taste of his product as subtle, bland, and that describes the smell of it too." Address: Massachusetts.

4358. *Boston Globe.* 1979. Novel N.H. foster home stresses love. Dec. 23.
• ***Summary:*** Tom Hartman (age 28) is director of New England's Salem Children's Trust, which includes Salem New England, in Concord, New Hampshire. It offers a home with a family atmosphere for homeless and foster children. It also offer a diet natural foods such as wholewheat bread and tofu, plus plenty of hugs and love. Address: Massachusetts.

4359. *SoyaScan Notes.* 1979. Chronology of soybeans, soyfoods and natural foods in the United States 1979 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** Jan. Yvonne and Irene Lo incorporate The Soya Bean Products Co., N.A. in San Francisco as a marketing company and immediately begin to import and distribute Vitasoy, the world's most popular soymilk, to Canada from their parent company in Hong Kong. It is not yet sold in America due to an FDA ban on aseptic Tetra Pak cartons.

Jan. Soycrafters Association of North America headquarters moves to Colrain, Massachusetts. Richard Leviton takes over as Director. Decides to edit and publish *Soycraft* magazine.

Jan. "The Soyfoods Revolution" published as a cover story by *Whole Foods* magazine.

Jan. 15-18. Second International Workshop on Low-Cost Extrusion Cookers held in Dar es Salaam, Tanzania, with 43 participants.

Feb. Takai catalog of large scale equipment published.

Feb. 9. Judith Rubenstein, institutional consultant for the New England Soy dairy, initiates a correspondence with Carol Tucker Foreman, Director of Child Nutrition programs at USDA, on the subjects of tofu standards and acceptance of tofu in USDA Child Nutrition Programs, including the school lunch program. Four letters are exchanged between Feb. and Aug. 1979. This is the start of work of tofu standards and tofu in school lunch programs.

Feb. *Natural Foods Merchandiser* magazine starts publication, founded by Doug and Karen Greene.

March 11. KOPTI is founded in Indonesia. It soon functions as an active, effective trade association for Indonesian tempeh and tofu manufacturers. By June 1986 it has more than 12,000 members from 40 cooperatives, and is promoting mechanization of production.

March. Soycrafters Assoc. and Quong Hop & Co. have adjoining booths at the New Earth Expo in San Francisco. 6,000 people sample free tofu burgers, tofu chip dips. Farm Foods sells Ice Bean (soymilk ice cream) and tofu cheesecakes. Gilman Street Gourmet sells tofu burgers.

March. Oak Feed Miso Company founded by Sandy Pukel, John Belleme, and Barry Evans. Joe Carpenter, Michio Kushi, and James Kenny are also involved. It is soon renamed American Miso Co.

March 26-29. World Soybean Research Conference II held at North Carolina State University. The 897-page proceedings, edited by F.T. Corbin, are published in 1980.

March. Food Protein Council holds International Soybean Fair in Washington, D.C. Many Congressmen, consular officials, etc. attend and sample soy protein products and tofu dips.

March. The Ohio Miso Company, founded by Thom Leonard and Richard Kluding, begins production in Ohio. America's first Caucasian-run miso company.

March. Richard Leviton takes a 3-week soyfoods research trip to the Midwest. Establishes many important contacts.

April. *New England Soy Dairy Product and Merchandising Guide* published.

April 12. "Good Old Bean Curd Is Suddenly Popular, But You Call It Tofu" by W.M. Bulkeley published as a front page article in *The Wall Street Journal.*

May 24. "The Americanization of Bean Curd," an expansion of Bulkeley's April article, published in the *Washington Post.*

May. Quong Hop & Co. in San Francisco introduces vacuum packed firm tofu, tofu cutlets, tofu burgers, and teriyaki tofu. Each of the latter three products is the earliest known product of its type in America.

June. *The Tofu Cookbook* by Kathy Bauer and Juel

Andersen published by Rodale Press.

June 29. An internal FDA memorandum is prepared by FDA headquarters personnel to set forth the agency's views on the attributes of tofu. Publication of a "pull date" on tofu packages is encouraged.

July. Farm Foods starts national advertising of tempeh starter and tempeh kits.

July. David Mintz, owner of Mintz's Buffet, a kosher Jewish deli in New York City, first learns of tofu from Pesach Lazaroff, a young Jewish vegetarian. That summer Lazaroff spends many hours working with Mintz as a paid consultant, developing tofu recipes. Mintz later becomes rich and famous for developing Tofutti, a soy ice cream. Over the years Mintz pushed the date that he supposedly learned about tofu further and further back, from 1979 to 1976, to 1974, then finally to 1972.

July. *The Book of Tempeh,* by Shurtleff and Aoyagi published by Harper & Row in both large-format paperback and professional hardcover editions. The world's first book about tempeh.

July. *Tofu & Soymilk Production*, by Shurtleff and Aoyagi published by The Soyfoods Center. This is the first book to use the term "soyfoods" in English.

July 17. "Tofu–The Oriental Way to High-Protein, Low-Calorie Meals" published by *Family Circle.*

July 23. Judith Rubenstein (see Feb. above) writes the Commissioner of the FDA requesting that the agency establish a standard of identity for tofu. She notes that the Director of Nutrition and Technical Services for USDA suggested that FDA give top priority to this issue. Issues of imitation tofu products and bacterial contamination are raised.

July 26-29. Second Soycrafters of North America Conference: "Producing and Marketing Soyfoods," held at Hampshire College, Amherst, Massachusetts, organized by Richard Leviton and financed on a shoestring. A major milestone for the U.S. soyfoods industry. 230 people attend and the content is a great success, but Leviton loses $1,000 on the venture. The first issue of Soycraft magazine, written and published (1,900 copies) by Leviton, is distributed at the conference. In the keynote address, Shurtleff notes that the biggest challenges facing the industry are to build a strong trade association with adequate funding, and to develop soyfoods standards.

July. *Alimentacion Integral Para Una Vida Plena: Los Mil Usos de la Soya* (*Integral Nutrition for a Full Life: The Thousand Uses of Soya*), by Blanca Dominguez published by Editorial Posada in Mexico. The country's first book on soyfoods.

Aug. Robert Rodale and Rodale Press gives strong support to *Soycraft* magazine, with ads and a nice mention in an article, which brings in 135 subscriptions in November.

Sept. The Soycrafters Apprenticeship Program is started by Luke Lukoskie at Island Spring, Vashon, Washington. Here people can spend about 3 weeks getting hands-on experience in making tofu, soymilk, and tempeh.

Sept. Tempeh Works, America's first Caucasian-run commercial tempeh shop in a commercial building and making only tempeh, starts production in Greenfield, Massachusetts. Founded and run by Michael Cohen.

Sept. Many articles about the Amherst Soyfoods Conference published in national magazines, such as *New Age.*

Sept. New England Soy Dairy opens America's first in-house tofu & soymilk sanitation laboratory.

Sept. "Chinese Cuisine: Bean Curd" by Nina Simonds published in Gourmet magazine.

Nov. 26. A fire destroys Eden Foods warehouse and $800,000 inventory. The company, struggling for life, moves to rural Clinton, Michigan.

Oct. The Great American Tofu Cookbook by Patricia McGruter published by Autumn Press.

Dec. Rodale Press contacts Richard Leviton to announce plans to do a Soybean Newsletter, with Leviton as editor. The idea later falls through.

Dec. *Frijol Soja* (Soybeans) published in Peru by INTSOY.

Dec. *The Soysage Cookbook,* by Cloud and Burdett self-published in Vermont.

* San-J tamari starts to be imported to America from Japan.

* California and Maine become the second and third states to enact organic labeling laws. California's becomes a model and a standard for many other similar laws, and it is cited on many soyfood product labels. By 1988 there are 12 states with organic laws, and 5 more planned.

* Tofu production in Japan tops 1.1 million metric tons for the first time.

* Soybean research in America begins to shift from emphasis on production to emphasis on utilization.

* Syntex corporation of Palo Alto, California, recalls its soymilk Neo Mull Soy after it is found to be missing a key nutrient, chloride. Many children who used this product were mentally damaged.

* Lauhoff Grain Corp. acquired by Bunge.

* 1979-82. Years of the "salt craze." Growing concern with the level sodium in American food products begins to hurt sales of miso and shoyu. Continued.

4360. *SoyaScan Notes.* 1979. Chronology of soybeans, soyfoods and natural foods in the United States 1970s (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• ***Summary:*** Overview of the 1970s:

The Soyfoods Movement Begins. This industry focused on traditional, low-tech soyfoods such as tofu, soymilk, tempeh, and miso. Many of the pioneer Caucasian-American (non-Asian) soyfoods companies started during this decade,

© Copyright Soyinfo Center 2013

often for philosophical and ideological reasons. The founding of the Soycrafters Association of North America in July 1978 marks the beginning of this movement.

By Dec. 1979 there are 159 tofu manufacturers in the United States. Ninety of these are run by Caucasian Americans and are less than 3 years old. There are also 18 tempeh companies and 3 commercial miso companies (not including those in Hawaii).

Natural Foods and Vegetarian Movements Grow. The basic philosophy of natural foods and vegetarianism became more widely accepted, and this greatly helped the soyfoods movement.

Unprecedented Interest in Nutrition, Health, and Fitness. During this decade, the interest in nutrition grew dramatically, both among consumers and professionals. Consumers, seeking ways of protecting themselves from the ravages of heart disease and cancer, try more healthful diets. Exercise and looking healthy are now "in." For example, the New York Marathon, which had 55 finishers (no women) in 1970, boasted 10,477 finishers (including 1,621 women) in 1979. Preventive medicine is becoming a new profession.

Steady Increase in Population of Asian-Americans. The number of Asian- and Pacific-Americans living in the USA increased from about 800,000 in 1960 to 1,369,000 in 1970 to 3,500,000 in 1980, at which time they comprised 1.5% of the total U.S. population. Their burgeoning numbers were a major factor in steadily growth of the soyfoods industry, since many Asians use soyfoods in their daily diets.

U.S. Soy Sauce and Miso Consumption Grows. Soy sauce consumption grew from about 9,000 kiloliters in 1970 to about 38,000 kl in 1979, a 4.2-fold increase during the decade. In 1974 domestic production passed imports.

U.S. miso consumption grew from about 750 metric tons (tonnes) in 1970 to about 1,800 tonnes in 1979, a 2.4 fold increase.

Shipments of Soy-Fortified Foods in the Food For Peace (P.L. 480) Program Jumps. Shipments of two products in 1970 totaled 131,000 tonnes. In 1979 a record 664,000 tonnes of ten products were shipped to needy countries, a 5-fold increase during the decade. In 1979, the main products whipped were SFB (soy-fortified bulgur), CSM (corn-soy-milk), and WSB (wheat-soy blend).

The Ongoing Protein-Versus-Calories Debate. As Nevin Scrimshaw concluded prophetically in his insightful 1977 lecture "Through a Glass Darkly: Discerning the Practical Implications of Human Dietary Protein-Energy Interrelationships": "To the extent that the pendulum swung too far in emphasizing protein in the 1960s, and too far in emphasizing calories in the 1970s, it must come to a more appropriate position for the 1980s and beyond." He noted that two big protein issues concerned (1) human requirements for protein at different ages and physiological states, and (2) the evaluation of the protein quality of foods as related to human requirements.

Reappraisal of the Value of Plant and Animal Proteins. During the late 1960s and early 1970s, animal proteins probably reached their historical peak of popularity in the U.S. A diet rich in animal protein was considered a "better diet." However during the 1970s a growing body of nutritional and ecological evidence, and changing attitudes toward world hunger and animal rights, led to a new appreciation of the quality, now more broadly defined, of plant (and soy) proteins. They were more healthful, less expensive, more efficient in utilizing farmland, energy and water, less polluting, and obviated animal slaughter.

Switch from Animal to Vegetable Fats. In the early 1950s Americans were consuming approximately equal amounts of animal and vegetable fats. By 1978 the ratio of vegetable to animal fat was 84 to 16. The same shift occurred worldwide, where the 1978 ratio was 71 to 29.

There were at least three basic reasons for this shift: (1) The growing concern, especially after 1960, with the health dangers associated with consumption of saturated fats and cholesterol, most of which came from animal fats such as butter and lard; (2) Hydrogenation, which allowed vegetable oils to be used in making substitutes for butter and lard (i.e., margarine and shortening); and (3) the lower price of vegetable oils, shortening, and margarine.

Production of soy oil grew dramatically during the postwar period, filling most of the increased demand for vegetable oil.

Boom Years for U.S. Agriculture. The 1970s was a decade of rapid growth for U.S. farmers. With high inflation and low interest rates, American farm products dominated world trade. The boom ended with the second "Oil Shock" of 1979-80, which set off the most serious recession of the post-war era, and marked the start of the Latin American debt crisis that later had a major negative effect on U.S. soybean farmers. 1979 was the last year of roughly 50 years of essentially non-stop, rapid soybean growth. During the next decade, U.S. soybean production zigzagged sideways and declined slightly.

Rapid Increases in Soybean Production in New Third World Countries. Prior to the 1970s, soybeans had never been widely grown in the tropics or semi-tropics (except perhaps in Indonesia). But during this decade a host of countries in such areas started to grow soybeans on a large scale for the first time. Major causes for this were the U.S. soybean boycott of 1973, the pioneering work done by INTSOY in Illinois, IITA in Nigeria, and AVRDC in Taiwan, and the development of day-neutral soybean cultivars that gave high yields at low latitudes. The major areas of rapid new production growth were...

Latin America. Total production increased from 1,746,000 tonnes in 1970 to 15,384,000 tonnes in 1979, an 8.8 fold increase during the decade. Latin America's three leading soybean producers in 1979 were Brazil, Argentina, and Mexico. Brazil's production rose 7.8 fold between 1970

© Copyright Soyinfo Center 2013

and 1979, but Argentina's jumped 137-fold!

In 1979 soybean production in Latin American passed that in all of Asia, the birthplace of this ancient crop, and became second only to that of North America (61,722,000 tonnes in 1979/80).

In 1974, Brazil passed China to become the world's second largest soybean producing nation after the USA. The ranking in 1979 by tonnage was USA, Brazil, China, Argentina, Mexico, Indonesia, Paraguay, USSR, Romania, India, and North Korea.

Africa. Total production increased from 67,000 tonnes in 1970 to 300,000 tonnes in 1979, an 4.5 fold increase during the decade. By 1979 Egypt had become the largest producing country, followed by Zimbabwe, Nigeria, and South Africa. This promising growth was doubly important because it came at a time of steadily falling per capita food production in Africa as a whole, down 20% from 1970 to 1987.

India. Total production increased from a mere 18,000 tonnes in 1971 (production was negligible in 1970) to 450,000 tonnes in 1980, an astonishing 25-fold increase in ten years, and a growth rate greater than that of Latin America. Meanwhile, in Asia as a whole soybean production was slowly declining.

4361. Anliker, Jean Ann; Rosen, Jacalyn A. 1979. Energy efficiency comparison of tofu, soybean, and beef production. Greenfield, Massachusetts: New England Soy Dairy. 51 p. Dec. Unpublished manuscript. [21 ref]
• ***Summary:*** This report was prepared by two college students working with and at the New England Soy Dairy. Tom Timmins, head of the Soy Dairy, thinks the findings are inaccurate. Address: 1. 43 Breckenridge Rd., Hadley, Massachusetts 01035.

4362. **Product Name:** Tofu.
Manufacturer's Name: Blue Ridge Soyfoods.
Manufacturer's Address: Fletcher, North Carolina. Phone: 704-684-8501.
Date of Introduction: 1979. December.
New Product–Documentation: Leviton. 1982. Soyfoods. Summer. p. 35. Jeanne and Bob Hunt started company in Dec. 1979 then in June 1980 moved to renovated dairy milking parlor on the grounds of a Seventh-day Adventist Hospital.

4363. **Product Name:** Tofu No Egg Salad.
Manufacturer's Name: Garden of Eatin'.
Manufacturer's Address: 5300 Santa Monica Blvd., Los Angeles, CA 90029.
Date of Introduction: 1979. December.
Wt/Vol., Packaging, Price: 8 oz. of 16 oz.
New Product–Documentation: Article and photo in Soyfoods. 1981. Winter. p. 59-61. The label reads "Tofu No Egg Salad" on both round tubs and rectangular trays. 8 or 16 oz. retails for $1.39 or $2.15. Interview with Al Jacobson. 1981. April 13. His invoices show he started selling this in December 1979. He gave the basic idea for the formula to a gal who developed it for him.

4364. **Product Name:** Super Tofu (Curried Sandwich Filling or Salad with Cayenne and Herbs).
Manufacturer's Name: Garden of Eatin'.
Manufacturer's Address: 5300 Santa Monica Blvd., Los Angeles, CA 90029.
Date of Introduction: 1979. December.
Ingredients: Tofu (100% certified organically grown soybeans, water, nigari), organically grown sunflower seeds, vegetables, apple cider vinegar, lemon juice, tamari, honey, natural herbs, spices, sea salt.
Wt/Vol., Packaging, Price: 16 oz.
New Product–Documentation: Interview with Al Jacobson. 1981. April 13. His invoices show he was selling this by December 1979. Leaflet and price list. 8 or 16 oz. retails for $1.39 or $2.15. Food Report (Lehmann). 1984. Oct.

• ***Summary:*** A glossary titled "Odds and Ends" (p. 32-33) contains entries for tamari, miso soybean paste, and tofu. Soy-related recipes include: Rye oatmeal soy bread (p. 69). Soybean casserole (p. 142). Soy flour and grits are discussed under "Complementary protein proportions" (p. 113). Page 117 notes that soybeans should be cooked for 3 hours or more, soy grits for 15 minutes. Address: Eau Claire, Wisconsin.

4366. **Product Name:** Nasoya Tofu Spread [Creamy Dill, Zesty Italian, or Onion].
Manufacturer's Name: Nasoya Foods.
Manufacturer's Address: Mechanic St. Ext. (P.O. Box 841), Leominster, MA 01453.
Date of Introduction: 1979. December.
Ingredients: Creamy Dill: Nasoya tofu, unrefined safflower oil, wood-aged organic apple cider vinegar, dill, garlic and sea salt. Zesty Italian: herbs, onion, sweet peppers, garlic, cayenne pepper. Onion: Onion, garlic, parsley.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Refrigerated.
New Product–Documentation: Labels. 1982. 3.75 diameter. Hard plastic. Creamy Dill: Blue, cream, tan and black on white. Dill illustration. Zesty Italian: Maroon, blue and black on white. Illustration of gondola with man rowing. Onion: Blue, yellow, tan and black on white. Onion illustration. Leviton. 1980. Soyfoods. Summer. p. 49. Soyfoods. 1983.

• ***Summary:*** This tiny, hand-lettered "take one" reads: "Gift certificates may be purchased at a 10% discount through January 31st 1981. Visit our retail store, 211 E. Ann, Ann Arbor, Michigan. 663-0500." An illustration shows a wheel with spokes; on each spoke is written: Tempeh, soysage, tofu, soymilk, miso. Across the diameter: "Soy foods for body & planet." In large letters across the bottom: "The Soy Plant." Address: 211 East Ann St., Ann Arbor, Michigan. Phone: (313) 663-0500.

4373. *Vegetarian Times.* 1979. The New England Soy Dairy. No. 34. Nov/Dec. p. 52, 54-56.
• ***Summary:*** "In January, 1977 Richard and Kathleen Leviton started a 'cottage' business, which they felt would enable them to make enough money working two or three days a week, to allow them to have the rest of their time off for other pursuits." Laughing Grasshopper's sales of tofu hit $70,000 the first year. "In February, 1978 the Levitons convinced some of their friends and a few private investors

© Copyright Soyinfo Center 2013

to ante up $50,000 for an expansion program. They changed their name to 'The New England Soy Dairy,' incorporated, sold stock (to raise the money), imported large-capacity tofu equipment from Japan, and moved to a new, larger location in Greenfield." Today the Soy Dairy produces on average 22,000 lb/week of tofu. Sales have been increasing by about 300% a year notes President and Sales Manager Tom Timmins. Annual sales are estimated at more than $500,000, which makes the Soy Dairy the largest Caucasian-owned tofu manufacturer in the USA. The company sells about 30 cases a week of soy mayonnaise. A soy milk is scheduled to be introduced at the end of this year and a soy-based ice cream next spring. Photos show: Tofu being packaged into plastic water-filled tubs. A man cutting tofu into one-pound cakes.

4374. White Wave Soy and Natural Foods. 1979. Product price list: Winter. 3869 Walnut St., Boulder, CO 80301. 6 panels. Catalog. Dec.
• ***Summary:*** Soyfoods: Nigari tofu (bulk, packaged, doufu [extra firm Chinese style]). Salad dressings (mellow miso salad dressing, hearty miso salad dressing). Tempeh. Soysage. Tofu Mayo. Savory baked tofu. Polar bean (banana-carob soy ice cream).

The company also sells sesame products (raw tahini, roasted tahini, sesame butter, sesame salt), peanut butters (salted or unsalted; crunchy natural, creamy natural, Valencia {crunchy or creamy}), more nut and seed butters (roasted almond butter, raw cashew butter, roasted cashew butter, roasted sunflower butter), and tamaried nuts and seeds (tamaried almonds, tamaried cashews, tamaried Spanish peanuts, tamaried sunflower seeds, and tamaried nut mix [a blend of peanuts, sunflower seeds, cashews, and almonds]). Note: This is the earliest English-language document seen (April 2012) that uses the word "tamaried" to refer to nuts and seeds that have been seasoned with tamari soy sauce and then baked.

"White Wave was founded in 1977 upon the principle of supplying the Rocky Mountain region with high quality protein foods. As these foods are an extension of our own lifestyles, we offer only products we personally feel are wholesome and nutritious. It is our pleasure to guarantee the quality of all our products. All foods carrying a White Wave label are made solely by us. We thank you for supporting our business. The Folks at White Wave." Address: White Wave, 3869 Walnut St., Boulder, Colorado. Phone: 303-443-3470.

4375. **Product Name:** Doufu (Extra Firm Chinese Style Tofu).
Manufacturer's Name: White Wave.
Manufacturer's Address: 3869 Walnut St., Boulder, CO 80301.
Date of Introduction: 1979. December.
New Product–Documentation: Product Price List. 1979, winter. Bulk or packaged. 16 oz. for $0.75.

4376. **Product Name:** Savory Baked Tofu.
Manufacturer's Name: White Wave.
Manufacturer's Address: 3869 Walnut St., Boulder, CO 80301.
Date of Introduction: 1979. December.
New Product–Documentation: Product Price List. 1979, winter. 10 oz. "Ready to eat, flavored tofu. Delicious!"

4377. Soyfoods Standards Committee, Soyfoods Association of North America. 1979-1985. Development and drafts of the Tofu Standards (Archival collection). Lafayette, California. 2 file folders, 1½ linear inches.
• ***Summary:*** This collection consists of two file folders contain letters, drafts, comments, and memoranda concerning the U.S. Tofu Standards. The first covers the years 1979 to 1984, and the second 1985. The earliest document in this collection is a letter dated 9 Feb. 1979 from Judith Rubenstein of the New England Soy Dairy (Greenfield, Massachusetts) to Ms. Carol Tucker Foreman, Director, Child Nutrition Programs, USDA. The early drafts were developed by William Shurtleff and Tom Timmins, with excellent legal help from Stephen H. McNamara of the Hyman, Phelps & McNamara, a law firm based in Washington, DC. Each new draft was sent to an ever widening circle of interested parties. The standards were never finalized or officially adopted.

Note: For a good overview of the development of these standards see: Shurtleff, William. 1986. "Chronology and analysis of the U.S. tofu standards: One viewpoint." Soyfoods Center, P.O. Box 234, Lafayette, California 94549. 15 p. April. Unpublished manuscript. Address: Soyfoods Center, P.O. Box 234, Lafayette, California. Phone: 415-283-2991.

4378. **Product Name:** Tofu.
Manufacturer's Name: Bean Mountain Soy Dairy.
Manufacturer's Address: 121 W. Howard St., Boone, NC 28607. Phone: 704-264-0890.
Date of Introduction: 1979.
Ingredients: Water, organic soy beans, nigari.
Wt/Vol., Packaging, Price: 1 lb.
How Stored: Refrigerated.
New Product–Documentation: Rick Mashburn. 1980. *The Sentinel* (Winston-Salem, North Carolina). Feb. 15. p. 7. "From beans to 'cheese.'" Four photos show Jerry MacKinnon and Marc Crowell making tofu. A blow-up photo shows one of their tofu labels. Below the ingredients is written: "Store in fresh water."

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Jerry McKinnon.

Talk with Jon Kessler of Virginia Soyworks, then with

© Copyright Soyinfo Center 2013

an employee of the company. 1991. Sept. 14. The company, now named Bean Mountain Natural Foods, has just moved to 1096 New Stock Rd., Weaverville, North Carolina (phone: 704-658-2326), and has just gotten a major account with Tree of Life. John Swann is president. The company is privately owned and presently makes only tofu and tempeh.

D. Christner. 1992. Dec. 14. *Times-Dispatch* (Richmond, Virginia). Bear [Bean] Mountain Natural Foods of North Carolina went out of business during 1992.

Letter (e-mail) from John Swann. 2012. July 18–in reply to a question from Shurtleff. "I did indeed own a tofu and tempeh shop from 1987 until 1992. Your books on commercial tofu and tempeh production were invaluable to us, and I still have them. Thank you for writing them. I would be glad to share a brief history of the company.

"The shop was started in 1979 in Boone, NC, by Gerry McKinnon. I helped Gerry get it started for the first few months (he actually rented the production space from me at the time), but was not actively involved in the business until I bought it in 1987. We ran it in Boone for three more years, then moved the plant to Weaverville, NC, (north of Asheville) in 1990. At the height of the business, we had two refrigerated trucks and were delivering weekly to retail stores throughout most of NC. We had Tree of Life, Harris Teeter, Biggers Brothers (Fresh Market), and Mountain Warehouse Co-op as wholesale accounts. We also distributed American Miso Co. and a few other products on our delivery runs, which is when I met John and Jan Belleme.

"For the tofu operation, we used a hammer-mill disintegrator and an 80-gallon steam jacket kettle with a steam injection wand. Our hydraulic okara press was homemade. We curdled with nigari. We used weighted buckets to press the tofu, with locally made stainless steel press boxes. We hand packed in a 16-oz printed cup and lid, packed 6/ and 12/case, as well as bulk in 12# and 25# buckets.

"For the tempeh, we used an antique stone mill to split the beans and a centrifugal commercial laundry extractor to dry them. We used a sausage mixer to inoculate, and we incubated on dishwasher trays set in rolling bread racks, in an incubator room that I designed. We packed in perforated poly bags, over-wrapped by printed poly bags after steam oven pasteurization. We packed (24) 8-ounce frozen cakes in a punch-out display box.

"Unfortunately, the same month that we opened our new plant near Asheville, Cornucopia Natural Foods (now UNFI) opened their warehouse in Atlanta, bringing with them Nasoya tofu and Lightlife tempeh. We worked hard for two years to get Cornucopia to pick up our products, but they never would pick them up. And my associate John Paino (we served together on the Soyfoods Association of America for a year) made good on his promise that he (Nasoya) would "own tofu in the eastern US," with killer promos and pricing through both Tree and Cornucopia. We ran for two more years, but never could get sales to grow enough to cover the higher cost of the new plant. So, in 1992 we sold the assets of the company to Jon Kessler and Twin Oaks Community Foods in Virginia, and moved on.

"That's the short story. If you want any more of the bloody details, I would be glad to fill in the blanks.

The only product that we made other than regular soy tofu and tempeh was a Dulse Tofu, which only had modest success.

"Thanks again for your work and all you have done for the industry.

"Best Regards,..."

"P.S. I am still in Asheville. After Bean Mountain, I worked in several food related businesses, including a year as general manager at Great Eastern Sun, and four years with a local produce distributor. Since then, I have been working mostly in retail, with seven years at Earth Fare and seven years with Greenlife Grocery, of which I was a partner. Since Whole Foods bought out Greenlife two years (over my strenuous objections), I have been consulting and am currently developing a new retail venture here in Asheville."

4379. **Product Name:** Captain Organic Vital Burgers (Meatless Burgers).
Manufacturer's Name: Captain Organic.
Manufacturer's Address: P.O. Box 606, Hermosa Beach, California.
Date of Introduction: 1979.
Ingredients: Incl. tofu, lentils, rice.
Wt/Vol., Packaging, Price: Paperboard box.
How Stored: Frozen.
New Product–Documentation: Talk with Andrew Harrison, President, Heart & Soul, Common Objective Inc. 1991. Nov. 27. This frozen veggie-burger, introduced in 1979, was the first soy product he ever developed. It was on the market until 1983, made with tofu, lentils, and rice. Another similar product of his was made with garbanzos, zucchini, and millet; it contained no tofu. He made the products in his own plant, and bought the tofu from Mr. Yamauchi of Hinode Tofu Co. He mixed the ingredients, put them through a patty machine, and then froze them. They were not fried. On the package was a cartoon of Captain Organic. Andrew's forte is sales and marketing; he has worked with distributors and brokers in the natural foods industry for 12 years. In the early days he worked with a yogurt company named Natural and Kosher, then went to a distribution company named Nature's Food Farms, then spent 4 years at a brokerage named MBA and Associates where he represented a lot of soy lines like Legume and Pizsoy. In 1988 he went to Westpico Foods, which is a kosher poultry and secondary frozen supermarket distributor and he got a lot of perishable natural foods into supermarkets in southern California. From there he started Heart and Soul because he was competing against Cedarlane and Soy Power, who had their brands. One he was a vicious

© Copyright Soyinfo Center 2013

competitor of Cedarlane; now he works very closely with them.

4380. Chen, W.L. 1979. [Soybean pudding or touhua processing]. *Shih Ping Kung Yeh* (*Food Industry*) (*Hsinchu, Taiwan*) 11(9):40. [Chi]*
• ***Summary:*** This is a very soft beancurd prepared by pouring hot soy milk suddenly into a container in which there is a suspension of calcium sulfate and starch. After setting for 10 minutes, the pudding is formed. This product is usually put in a sweet ginger syrup with well-cooked peanuts and consumed hot in winter or cold in summer. Other coagulants, such as agar or carrageenan may also be used.

4381. Chiang, L.G.; Huang, S.Y. 1979. [Study on the supply and demand of soybeans in Taiwan]. Dep. of Agricultural Economics, Faculty of Agriculture, National Taiwan University. [Chi]*
• ***Summary:*** More than 1,400 small tofu plants are located throughout Taiwan.

4382. Frail, F.S. 1979. The soy dairy: I never saw a tofu cow. *Savor* (*Boston, Massachusetts*). Date unknown. p. 5, 30, 32, 34.
• ***Summary:*** A visit to the New England Soy Dairy in western Massachusetts, where dedicated food enthusiasts mass-produce tofu for sale throughout the Northeast.

Note: Savor is published by The Boston Phoenix, 100 Massachusetts Ave., Boston, MA 02115. Phone: 536-5390.

4383. Han, B.-H.; Kim, K.-S.; Chom, D.-J. 1979. Processing of soybean powder with soybean and krill. *Bulletin of the Korean Fisheries Society* 12(3):137-41. [Eng]*
• ***Summary:*** Soy curd [tofu] was made using the traditional process. The use of 3% glucono-delta-lactone (GDL) at 90ºC gave the highest bulk yield in relation to the crude protein of the tofu. Soy curd powder was prepared by spray drying soybean milk. It was then suspended in water and coagulated by adding GDL at 90ºC. When krill autolysate was dried with the soymilk then made into tofu, coagulated under the same conditions, it produced a softer tofu. Another powder, made by spray drying the mixture of soybean milk, krill autolysate, and GDL could be coagulated by suspending in water, bringing to a boil, then letting it stand at room temperature for 2 minutes.

Note: Krill (*Euphasia superba*) are planktonic crustaceans and larvae that constitute the main food of baleen whales. Address: Dep. of Food Science & Technology, National Fisheries Univ., Busan, Korea.

4384. **Product Name:** Tofu.
Manufacturer's Name: Institute of Buddhist Dialectics.
Manufacturer's Address: Macleod Ganj, Dharmasala, Dist. Kangra, H.P. 176219, India.
Date of Introduction: 1979.
New Product–Documentation: Letter from Institute. 1987. Person is charge: Kalsang. The Buddhist monks from Tibet use 6.5 kg/week of dry soybeans. Note: This is the earliest commercial product seen made by Tibetans (one of two documents), although not in Tibet.

4385. **Product Name:** Tofu Pudding [Carob, Sweet Potato, or Coconut], and Soysage.
Manufacturer's Name: Lecanto Tofu.
Manufacturer's Address: P.O. Box 444, Lecanto, FL 32661.
Date of Introduction: 1979.
New Product–Documentation: Talk with Marvel Huffman. 1988. May 17.

4386. Magic Bean Co-Op (The). 1979. Wanted: Loans for Milwaukee's soyfood future (Leaflet). Milwaukee, Wisconsin. 2 panels each side. Each panel: 22 x 14 cm.
• ***Summary:*** "The Magic Bean Coop is a non-profit producer cooperative controlled by the workers through the consensus decision-making process." Its 6 goals are described. The company is presently located at Mike's Bakery but "we are moving to 330 East North Avenue and we will be sharing working and warehouse space with Milwaukee Area Cooperative Services (a coalition of cooperatives in the Milwaukee area) and Milwaukee Area Cooperative Supply (a cooperative produce distributor and trucking service).

"We are seeking community support in the form of small personal loans of a minimum of $50.00. Initially we ask that your loan be given for a minimum of one year on a no-interest basis. However, we will begin to pay you in-kind interest on your loan upon the opening of our storefront on North Ave. This is how it works: Folks who loan us $100.00 will receive one lb. of Tofu FREE every two weeks for the time the loan is left with the Magic Bean." Address: 330 East North Ave., Milwaukee, Wisconsin 53212. Phone: 414-933-COOP.

4387. *Meditation* (*Tokyo, Japan*). 1979. Daizu wa eiyô no haha [Soybeans are the mother of nutrition]. No. 7. p. 42-44. [Jap]
• ***Summary:*** About the work of William Shurtleff, age 38, with soybeans, tofu, and miso. A photo shows Shurtleff.

4388. **Product Name:** The Original Fried Rice Sandwich (With Tofu).
Manufacturer's Name: Natural Cafe.
Manufacturer's Address: 1494 Cerrillos Rd., Santa Fe, NM 87501.
Date of Introduction: 1979.
Ingredients: Organic brown rice fried with scallions and soy sauce, wrapped in a whole wheat tortilla with steamed organic carrots, alfalfa sprouts, miso tahini sauce, tofu, green

© Copyright Soyinfo Center 2013

leaf lettuce.
Wt/Vol., Packaging, Price: 10 oz. Retails for $2.95 (1988).
New Product–Documentation: Label sent by Paul Duchesne. 1989. Aug. 11. Handwritten "Naturally delicious. Made fresh today. To eat; peel back wrapper from one end." When Paul went to Boston, he taught Barbara and Marty Roth how to make the Brown Rice & Tofu Sandwich. (Barbara's maiden name was Svenning; she married Jack Garvey then lived for years with Marty Roth.) After he left, they made it for a while. Then they began as a restaurant in Santa Fe, New Mexico based on a this sandwich. At one point they were making their own tofu, sprouts, and chapatis. When Barbara separated from Marty (they were never officially married), she moved to Black Mountain (near Asheville), North Carolina, where she continued to make a line of tofu sandwiches.

Talk with Martin Roth. 1989. Aug. 17. He learned how to make The Original Fried Rice Sandwich (With Tofu) from Paul Duchesne at the macrobiotic study house on Boylston St. in Brookline, Massachusetts. In about 1979 Martin (unable to convert his macrobiotic house to a Zen center) moved to the Bodhi Mandala Zen Center in Jimenez, New Mexico. He was the head cook (Tenzo) for a while. Then, forsaking Zen for tofu, he and Barbara Svenning Garvey moved to Santa Fe into the Linda Motel on Cerrillos Rd. They got a room with a stove, and then persuaded the Santa Fe Health Inspector to certify the room as a facility for tofu sandwich production. They fried the rice and made the chapati-wrapped sandwiches early each morning, wrapped them in plastic, and delivered them to the local co-ops and health food stores. The sandwiches soon became very popular (they were selling 30-50 a day, six days a week), so they expanded into an apartment and decided to start a natural foods manufacturing and distribution company named New Mexico Natural. In the apartment they made the sandwiches, and started to make tofu, mochi, sweet white miso, sauerkraut, pickles, amasake, etc. In late 1979 or early 1980, as the sandwich grew even more popular they bought an old Mexican restaurant in Santa Fe named El Charro and converted it into a natural foods and macrobiotic restaurant called the Natural Cafe, based on the brown rice and tofu sandwich which evolved into the Fried Rice Plate (with tofu) and remained their most popular item. They were purists and self sufficient. All ingredients were organically grown and they used only spring water, even in their ice cubes. They made their own tofu from soybeans, their own miso, and their own chapatis from wheat. They grew their own sprouts and ground their own sesame seeds for the sauce. They made seitan and sold seitan burgers. As the restaurant business demanded more and more of their time, they decided to discontinue the distribution company.

At one point Martin considered starting a tofu shop, but a rebuff from a local Japanese restaurant, the fact that they were too busy with other things, and the availability of good tofu from Kathryn Peterson Bennett of Southwest Soyfoods (which she had started by June 1978) led him to drop the idea. But they sold miso out of the restaurant as a commercial product. At the restaurant they also made and sold amasake, amasake shakes (which the Mexican men loved, and called "chakes"), and amasake ice cream. Martin believes this was America's first amasake ice cream.

In 1981 Martin and Barbara sold the restaurant to one of their employees; it still exists under the same name. Then they went to Boulder for several months, then to Miami for several months, then to North Carolina, where they stayed for several years while Martin helped to start Great Eastern Sun. In about 1985 they separated and Barbara moved back to North Carolina.

4389. **Product Name:** Tofu.
Manufacturer's Name: Natural Pacific.
Manufacturer's Address: 153 Makaala St. (P.O. Box 4352), Hilo, Island of Hawaii, HI 96720. Phone: 808-935-3220.
Date of Introduction: 1979.
Ingredients: Water, soybean curd precipitated with natural nigari. Made with organically grown soybeans.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: David Gantz.

Talk with Ty Katibah. 1988. Feb. 10. He bought the company from David Gantz, the founder in 1987. The company was started in 1979. Business is booming. He now makes about 3,000 lb/week of tofu. Labels. Both the original and the current. The latter says Firm Tofu.

Talk with Paul Duchesne. 1989. Oct. 27. He talked with Ty, who for a while was coagulating his tofu with sea water–but it was too much work.

Talk with Ty Katibah. 1999. Dec. 2. His company moved to a new address in July 1999: 15-205 Wiliama Place, Keaau (near Hilo), Hawaii 96749. Phone: 808-966-9579. His tofu sales have dropped about 15% from local newspaper publication of Lon White's research. Two other tofu makers in the island of Hawaii (big island) have indicated a 30-40% drop in sales. His company is a maker and distributor of natural foods.

4390. New England SoyDairy Inc. 1979. Soydairy summertime tofu (Poster). 305 Wells St., Greenfield, MA 01301. 1 p. 28 x 22 cm. Color. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.
• ***Summary:*** Printed on rigid card stock with a peel-off adhesive stop across the top and bottom of the back so that poster can be attached to a flat surface. On a wooden table by a window showing blue sky is a vase filled with flowers, a bowl of lemons, many prepared tofu dishes, a package

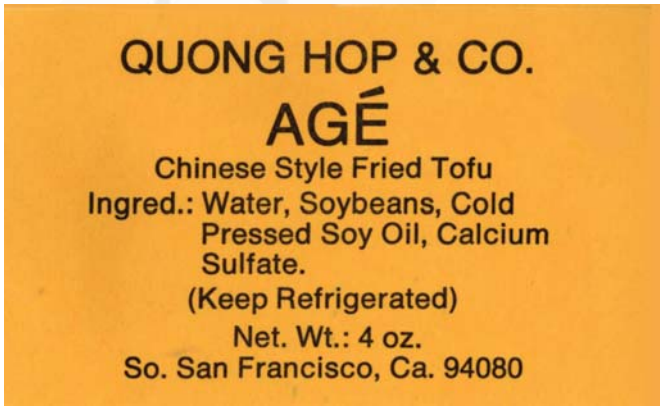
© Copyright Soyinfo Center 2013

(yellow label) of Soy Dairy tofu in the left foreground, a large cake of tofu, plus cubes and pieces of finely-diced tofu. Address: Greenfield, Massachusetts.

4391. **Product Name:** Tofu Pattie.
Manufacturer's Name: Prasad.
Manufacturer's Address: P.O. Box 7434, Thousand Oaks, CA 91359.
Date of Introduction: 1979.
New Product–Documentation: The tofu used in this product is purchased from Quong Hop & Co.

4392. **Product Name:** Tofu (Vacuum Packed) [Firm, Firm Nigari, or Nigari].
Manufacturer's Name: Quong Hop & Co.
Manufacturer's Address: South San Francisco, California. Phone: 415-873-4444.
Date of Introduction: 1979.
Ingredients: Firm Nigari Tofu: Water, organically grown soybeans, nigari (magnesium chloride).
Wt/Vol., Packaging, Price: 10 to 12 oz vacuum pack.
How Stored: Refrigerated.
New Product–Documentation: Labels. 1979, undated. 2 by 3.5 inches. Blue, red, or green on light green background with silver border. "Vacuum packed. Since 1906. No preservatives. Firm Tofu (10 oz., blue), made with calcium sulphate, is for dressings, omelettes & soups. Nigari Tofu (12 oz., green) is for stir frying, baking, and deep frying. Firm Nigari Tofu (10 oz., red) is for dressings, dips, and spreads. Later labels. Red and brown on salmon tan. 5 by 3 inches. "High in complete protein. No cholesterol.

4393. **Product Name:** Agé. Chinese Style Fried Tofu.
Manufacturer's Name: Quong Hop & Co.
Manufacturer's Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.
Date of Introduction: 1979.
Ingredients: Water, soybeans, cold pressed soy oil, calcium sulfate.
Wt/Vol., Packaging, Price: 4 oz.
How Stored: Refrigerated.



New Product–Documentation: Label. 1979. 3.75 by 2.25 inches. Paper. Black on yellow.

4394. **Product Name:** Spinach Tofu Pie.
Manufacturer's Name: Soy Plant (The).
Manufacturer's Address: 211 East Ann St., Ann Arbor, MI 48104. Phone: 313-663-0500.
Date of Introduction: 1979.
Ingredients: Filling: Tofu, spinach, onion, miso, cider vinegar and spices. Crust: Whole wheat flour, sunflower seeds, oats, corn oil, water.
Wt/Vol., Packaging, Price: 6 oz.
How Stored: Refrigerated.
New Product–Documentation: Oval Label in Soy Plant scrapbook from 1979 or 1980. 3 by 3 inches. Green on beige. 6 oz.

Talk with Steve Fiering, a founder of The Soy Plant in Ann Arbor. 2000. Dec. 3. This was like a quiche (savory, not sweet) probably developed by an African-American guy named Jura (pronounced ju-RAH) McDowell. "He was a very creative cook, definitely interested in what we were doing, and became a real part of the whole group."

4395. **Product Name:** Country Style Tofu.
Manufacturer's Name: Sunbow Farm Products.
Manufacturer's Address: Route 2, Box 46, Corvallis, OR 97330. Phone: 503-929-5782.
Date of Introduction: 1979.
Ingredients: Organically grown soybeans, natural nigari (minerals remaining after sea salt extraction), well water.
Wt/Vol., Packaging, Price: 1 lb.
How Stored: Refrigerated.
New Product–Documentation: Label. 1979, undated. 3.25 by 2.25 inches. Self adhesive. Black on white. "Prepared the traditional way over a woodfire. Keep refrigerated." Shurtleff & Aoyagi. 1979. July. New Tofu Shops & Soy Dairies in the West; Mia Posner & Harry McCormick. Soy Cookbooklet. 1979.

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Owners: Mia Posner & Harry McCormick.

4396. **Product Name:** Firm Tofu, Soft Tofu, Fried Tofu, Flavored Tofu (Wu-Hsiang Kan), and Soymilk.
Manufacturer's Name: Superfoods.
Manufacturer's Address: 1257 4th St. N.E., Washington, DC 20002. Phone: 202-546-5205.
Date of Introduction: 1979.
New Product–Documentation: Call from Paul Wilson, PhD of Chapel Hill, North Carolina. 1996. July 2. When he was in Washington, DC, recently, he bought soymilk, fried tofu, marinated tofu, and silken tofu made by a local company named Superfoods. The soymilk was very sweet.

Talk with Tom Lee, founder and owner of Superfoods.

© Copyright Soyinfo Center 2013

1996. July 2. Tom, who is Chinese-American, started this company in 1979 in Maryland. The name was slightly different at that time. In 1981 or 1982 he moved the company to its present address in Washington, DC. His main competition in the local tofu market comes from two Korean-run companies.

4397. **Product Name:** [Tofu (Made with Natural Nigari), Okara Burgers].
Foreign Name: Tofu, Okaraburgers.
Manufacturer's Name: Svadesha Pflanzen-Feinkost.
Manufacturer's Address: Winterlehnen 1½, Einweging, West Germany. Phone: 099-73-1066.
Date of Introduction: 1979.
Ingredients: Tofu: Water, organic soybeans, nigari.
Wt/Vol., Packaging, Price: Tofu packed in water in round plastic deli containers.
How Stored: Refrigerated.
New Product–Documentation: Form filled out (about mid-1982) by Swami Anand Svadesha (Ruediger Urban). The address is Aeussere Kötzinger Str. 52a, 8492 Fuerth im Wald, West Germany. The company started at this address in Fuerth am Wald on 1 March 1981. They now use 20 lb of soybeans, 3 days a week.

Letter from Sjon Welters. 1982. April 16. Svadesha is a tofu producer who bought tofu from Manna.

Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: Ruediger Urban.

Interview with Bernd Drosihn. 1987. Nov. 30. They make about 1,500 kg/week of tofu.

Letter from Harry Whitford of Soyastern. 1987. Dec. 14. Svadesha makes about 1,200 kg/week of organic nigari tofu. The address is now: Ostpreussenstr. 22, 8000 Munich 81, West Germany. It is well known that Svadesha started the first tofu shop in Germany.

Talk with Michael Pierce of Georgia (Phone: 912-752-8083 Office). 1989. Oct. 30. Svadesh, who started making tofu before Peter Wiegand, had a small operation in central eastern Bavaria right near the Czechoslovakian border. He made only about 25-30 lb/week of tofu, then he drove all the way to Munich and sold it at 10-11 health food stores there and along the way. It was in small round lidded plastic deli containers immersed in water. His tofu was in the stores when Auenland introduced theirs. Pierce thinks Svadesh was a Bhagwani, a follower of Sri Rajneesh. Auenland's growing business also got Svadesha going; he decided to come out of the woods and move to Munich. So he set up his little tofu kitchen/plant in a little place called the Werkhaus (Workhouse), a little community restaurant and counter-culture hangout in Munich.

Die Geschaeftsidee. 1989. Dec. p. 26-27, 32-33. Ruediger Urban was West Germany's first tofu maker. "Since his business was founded in 1979, Urban's clientele has grown greatly. The former proprietor of a restaurant on the Mosel (Moselle) River cooked in the early days in his own kitchen in the Bavarian forest only with a wood fire and normal kitchen utensils. Twice a week he produced 30-40 kg of tofu. He personally visited each natural food store (*Bioladen*) in Munich to enlist outlets for his product. Soon he was getting more and more orders. In 1983 he moved to Munich and started a small kitchen; the transportation had gotten too complicated for him. In 1985 he settled into his present location near Denning, a suburb of Munich. Today he makes about 230 kg/day of tofu." A photo (p. 33) shows Svadesha and his present shop.

Label sent by Anthony Marrese. 1990. March 22. 8 by 6 inch pre-printed plastic bag. Green, blue, and orange on clear plastic. Logo of orange sun behind breaking wave. Company is now Svadesha R. Urban, Ostpreussenstr. 22, 8000 Munich 81, West Germany. Phone: (089) 93 90 05. "Fresh tofu, made by hand (*in Handarbeit hergestellt*), rich in high-quality protein for light cuisine. Ingredients: Soybeans (organically grown) and water. 300 gm. 9% protein. Our tofu is made with the traditional coagulant nigari, obtained from whole sea salt. Nigari tofu is famous for its smooth consistency and its fine aroma. Tofu is free of cholesterol and non-acid forming (*nicht saeuerebildend*). Tofu contains all the essential amino acids, which make the protein high in quality."

Talk with the receptionist at this company. 1990. June 12. Ruediger Urban is now in the hospital. He is very sick, with cancer of the cheeks, but he can walk and he visits the company occasionally. The company changed ownership on 1 June 1990. It is now owned by Robert Mayer and Erhardt Schwartz. The present business name is Svadesha, and the "subtitle" is Vegetarische Feinkost.

Talk with Svadesha R. Urban. 1990. June 13. In about 1979, he started on the side to make tofu in a little farmhouse at Winterlehen 1½, Einweging, in the Bavarian Forest (*Bayerischer Wald*). He made only one product, tofu, using organically grown soybeans and nigari coagulant. He made the tofu using a gas stove, which he sometimes used in the kitchen and sometimes moved out into the garden. The tofu was sold under his name Svadesha (he was a disciple of Bhagavan Sri Rajneesh) but he had no officially registered business. Twice a week he produced about 30-40 kg of tofu, which he packed in small plastic tubs, and drove more than 200 km (120 miles) into Munich. There he personally delivered it to a handful of the new generation of natural food stores (*Biolaeden*) that sold all of his tofu.

After about a year making tofu at this location, he decided to go to India for 6 months, so he entrusted his small business to another person while he was gone. The company fell apart during this time. Upon his return from India, Svadesha moved the business to Aeussere Kötzingerstr. 52a, D-8492 Fuerth im Wald, very near the Czechoslovakian border, and farther away (about 200 km or 120 miles) from Munich.

© Copyright Soyinfo Center 2013

Talk with Ruediger Urban in hospital (8621-871-326). 1990. June 13. He has cancer of the cheeks. Letter (fax) from Bernd Drosihn. 1991. Nov. 11. "All the telephone numbers I have for Svadesh are no longer valid. The last contact I had was half a year ago. I have heard that he is now in a hospital for psychiatric problems, but I am not sure about this."

Note: This is the earliest record seen (April 2001) concerning Tofurei Svadesha Naturkost Produkte GmbH.

4398. **Product Name:** [Herb Tofu].
Foreign Name: Kraeuter Tofu.
Manufacturer's Name: Svadesha Pflanzen-Feinkost.
Manufacturer's Address: Winterlehnen 1½, Einweging, West Germany. Phone: 099-73-1066.
Date of Introduction: 1979.
Wt/Vol., Packaging, Price: Sold in round plastic deli containers.
How Stored: Refrigerated.
New Product–Documentation: Talk with Svadesha R. Urban, company founder. 1990. June 13. He introduced this product while his company was still in Einweging. It is made by mashing tofu with herbs to give it a cottage cheese consistency.

4399. Trader Vic's. 1979. Let us put a little tofu in your life (Poster). San Francisco, California. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.
• ***Summary:*** The background for this poster is a Polynesian / Hawaiian lady with a flower in her hair. "Tofu is low calorie. No cholesterol. High protein. It digests like a damn, and its taste and texture is fantastic! Try any or all of our Tofu specialties. Trader Vic."

Trader Vic's restaurants now serve: Appetizers: Tofu Chicken Tidbits, Pistachio and Veal-Tofu Pate; Tofu-Vegetable Salad with Dill Dressing; Entrees: Quenelles of Mahi Mahi with Tofu, Trader Vic's Tofu Pork Sausage, Tofu Tomato Beef, Parmesan Tofu with Ham and Tomato Sauce. Address: San Francisco, California.

4400. **Product Name:** Creamy Tofu Dressing [Italian, or Bleu Cheese].
Manufacturer's Name: Traditional Tofu.
Manufacturer's Address: Oakland, California.
Date of Introduction: 1979.
Ingredients: Italian: Tofu, water, vinegar, salt, soy sauce powder, fructose, onion powder, garlic powder, natural flavors, spices, vegetable gum. Blue Cheese: Tofu, water, vinegar, blue cheese powder, salt, soy sauce, onion & garlic powders, parsley other spices, calcium phosphate, vegetable gum.
Wt/Vol., Packaging, Price: 1 pint jar.
How Stored: Shelf stable.
Nutrition: Italian: Per 14 gm.: Calories less than 1 gm, protein less than 1 gm, carbohydrate less than 1 gm, fat less than 1 gm. Cholesterol 0 mg. Blue Cheese: Per 14 gm.: Calories 10 gm; Proteins less than 1 gm; Carbohydrate less than 1 gm; Fat less than 1 gm; Cholesterol less than 1 mg.

4401. **Product Name:** White Tiger Tofu Sauce.
Manufacturer's Name: Westbrae Natural Foods.
Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.
Date of Introduction: 1979.
Ingredients: Soy sauce (water, soybeans, wheat, seasalt), honey, vinegar, toasted sesame oil, lecithin, gum tragacanth, cayenne.
Wt/Vol., Packaging, Price: 10 fluid oz, 12 fluid oz (355 ml) bottle.
How Stored: Shelf stable.
New Product–Documentation: Two Labels. 1979. undated. 3.5 by 3.5 inches. Paper. Red, black, and white or green and yellow-orange. Stalking tiger illustration. 5.25 by 3.5 inches. Paper. Brown, blue, black, orange, white. Mt. Fuji logo illustration. Small tiger in title. Ingredients: Soy sauce, malt syrup, cider vinegar, honey, sesame oil, natural gum stabilizers, ginger, cayenne. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Westbrae Natural Wholesale Food Catalog. 1980. Spring. Ingredients are now: Tamari, honey, apple cider vinegar, toasted sesame

oil, guar gum, gum tragacanth, cayenne. Letter from Gordon Bennett. 1987. Oct. Gives date as 1979.

4402. Aihara, Cornellia. 1979. The calendar cookbook. George Ohsawa Macrobiotic Foundation, 1544 Oak St., Oroville, CA 95965. 253 p. [unnumbered]. Illust. by Nan Schleiger. Index. 17 x 24 cm.
• ***Summary:*** This macrobiotic cookbook is designed for cooking with the seasons. Breakfast and dinner menus are given for every day of the year. A glossary gives brief descriptions of the Japanese foods listed in the recipes. For example: "Tamari: traditional soy sauce (*shoyu*) made without chemicals. Tofu: curdled soy milk. Tekka: condiment of miso and vegetables cooked a long time." All recipes are numbered.

Soy-related recipes include: 2d. Baked mochi with kinako. 4. Kombu, age, albi nishime. 5. Black bean nishime [these are almost certainly black soybeans]. 8. Amasake. 8a. Amasake kanten. 13. Natto with pickled daikon leaves. 18. Vegetable miso soup. 20. Mackerel with ginger miso. 28 Wakame miso soup. 32. Kidney beans with miso. 35 Onion miso. 46. Burdock, carrot and lotus root with oily miso. 60. Vegetable oden (with stuffed age). 63. Collard greens with age nitsuke. 64. Home-made age (deep-fried tofu). 73. Home made natto I and II. 75. Northern white beans with miso. 80. Home made tofu and nigari. 80a. Clear soup with tofu and shingiku [sic, *shungiku* = chrysanthemum leaves]. 80b. Tofu-scallion miso soup. 82. Amasake cake with cream cheese frosting (3-layer, using 1 lb of dairy cream cheese). 87. Wheat gluten (made from 10 cups whole wheat flour and 4 cups unbleached white flour). 87a. Seitan (with wheat gluten and tamari soy sauce). 87b. Fresh wheat fu (with wheat gluten). 87c. Boiled fu. 87d. Fried fu (Gluten cutlet). 87e. Cutlet kabobs (with cooked wheat gluten). 97. Scallion miso. 100. Okara nitsuke (okara is "soybeans which are leftover after making tofu"). 132. Amasake cake. 135. Amasake yeasted doughnuts. 138. Vegetable kabobs with lemon miso sauce. 159. Koi-koku (carp soup with barley miso). 161. Amasake cake with fruit and nuts. 177. Buckwheat dumpling miso soup. 183. Cooked vegetable salad miso ai (miso

dressing). 191b. Tomato sauce with miso. Amasake cookies. 197. Onion cream miso soup. 199. Soybean soup. 220. Tofu, snow peas and white rice miso soup. 229. Cucumber with miso. 233. Fresh corn tortillas with scallion and oily miso. 236. Toasted rice balls with soy sauce or miso. 244. Barley miso soup. 245. Tekka [miso]. 251. Pan-fried eggplant with lemon-miso sauce. 257. Green pepper with sauteed miso. 259. Tofu with mustard sauce. 261. Goma tofu (made from sesame butter and a little tamari soy sauce). 263a. Parsley miso pickles. 263b. Miso pickles. 266. Amasake wedding cake. 274. Shingiku miso soup. 290. Tofu with kuzu sauce. 294. Soybean nitsuke. 304. Kombu, dried tofu, age nitsuke. 305a. Millet and soybean soup. 329. Amasake crescent cookies. 333. Tofu-egg clear soup with watercress.

The Acknowledgments section begins: "After the French Meadows Summer Camp sponsored by the George Ohsawa Macrobiotic Foundation in 1972, I looked over the menus of the meals I served at camp. In revising them, I had the idea to keep a one-year record of menus. I thought this would be a practical, everyday help for those people beginning to cook...

"Since then, seven years passed." Address: Oroville, California.

• ***Summary:*** This is largely a compilation of information from many other books and articles. On the cover is a color painting of The Gardener (or Vertumnus), from his series, The Four Seasons, c. 1590, by Giuseppe Arcimboldo (or Arcimboldi) of Milano.

In Chapter 12, on China, the section titled "Meats and alternates" (p. 110-13) notes that the soybean is called the "Chinese Cow" [sic, "Cow of China"] because of its versatility. Soybeans are used as whole dry beans and as sprouts, or they can be made into a firm white curd called "Chinese cheese" [sic], which can be used in many different ways. Soybean milk may be used in much the same way that westerners use cow's milk. They are fermented to make the favourite condiment, soy sauce. "Bean curd sauce is fermented bean curd that is packed in jars and sold as red bean curd sauce or white bean curd sauce,..." Cantonese names for soy products are (p. 111-12): Mien chiang: A syrup-like sweet bean paste. Dow-foo (tofu). Foo yu (fermented tofu). Tiem jook (dried yuba, broken into pieces [sweet dried yuba sticks]). Wow doo [Wu dou]. Black soybeans. Dow see [doushi, fermented black soybeans]: Salted, fermented black bean paste [sic, fermented black soybeans] often garlic flavoured and used in small amounts as a condiment or seasoning.

In Chapter 30, on Japan, the section titled "Meats and alternates" (p. 336-37) notes that products made from soybeans include: (1) "Shoyu, a sweetish soy sauce made from wheat and barley [sic], soybeans, salt, and water." (2) Miso, or "fermented soybean paste," used mostly for flavouring soups [miso soup]. (3) Tofu, or soybean curd, is a staple in Japanese cookery. "Its smooth, custard-like texture and bland flavour make it an ideal ingredient. It is extremely versatile and readily absorbs other flavours. Many "restaurants in Japan take great pride in their tofu dishes."

In Chapter 31, on Korea, the section titled "Fruits and vegetables" (p. 350-51) discusses soybeans and their products at length. Soy sauce is used to season *kim* (nori) and other edible seaweeds. Soy sauce is an ingredient in "hot pepper mash" [*kochu jang*]. Soybeans are used to make "soybean mash" [*doen jang*]. Dry soybeans are roasted in an iron pot, then ground, and the roasted soy flour is used as a garnish over rice cakes [mochi] or plain cooked rice; children enjoy eating the coarser roasted bits that are sifted out of roasted flour or meal. Soybeans sprouts are eaten lightly cooked as a vegetable. Soybeans are also made into tofu (*tu bu*)*;* a brief description of the process is given, in which the drained curds are left in their hemp bag to form a firm cake, which may be cut, dipped into soy sauce, or fried in sesame oil. "Oil can also be made from the soybeans, but it is not commonly used or prepared."

Although commercial soy sauce, made in factories, is now widely available, many Korean households still prepare their own soy sauce each fall. Boiled soybeans are pounded, molded into a cone shape, and set to dry until hard. They are then wrapped with rice straw, hung from eves, rafters or ceilings, and allowed to ferment for several weeks [until they become *meju*]. During the winter, these fermented cones may be stored in huge rice-straw bags kept in a cool place.

In the spring, break the cone into small pieces and place in a large earthenware jar, nearly filled with water. Add salt, spices, red peppers, and a few charcoal lumps. Leave this in the sun for a few days [sic, 30-60 days] until the molded soybean chunks float to the top and the resulting liquid turns black. Ladle out and filter the black liquid, then boil it to make soy sauce. The solids remaining in the jar are used as soybean mash [after the charcoal is removed].

A portrait photo of the author, with a brief biography,

• ***Summary:*** In this macrobiotic cookbook, note (despite the subtitle) that fish are used in some recipes, so it is not actually a vegetarian cookbook. The term "shoyu (natural soy sauce)" is used throughout. Contents: Part I: Theory: A kitchen philosophy. Where we are now. Choosing our food. Balance. Menu planning: General guidelines, food categories. In the kitchen: Cooking: why and how, setting up the kitchen, buying, storing, and preserving food, cutting vegetables. Special situations: Eating away from home, if you live alone, entertaining, the art of eating.

Part II: The practice. Using this book. Fall meals. Winter meals. Spring meals. Summer meals. Basic beverage recipes. Homemade bread. Appendix. Bibliography (24 cookbooks, 65 reference books and others).

Soy-related recipes include: Miso soup (with tofu, p. 69), Hiziki [Hijiki] with mushrooms and tofu (p. 74), Tofu-ginger dressing (p. 93), Miso-tahini spread I (p. 94), Oden stew (with fried tofu, p. 112), Fried tofu (p. 113), Miso-tahini spread II (p. 118), Tofu-miso spread (p. 127), Daikon with miso (p. 139), Cold tofu with garnish (p. 144), Tofu-sprout spread on toast (with alfalfa sprouts, p. 146), Tofu cream pie (p. 156), Scrambled tofu (p. 158), Noodles with tofu and bean sprouts (p. 165; the type of "bean sprouts" is not specified), Miso-dill dressing (p. 172), Tofu mayonnaise (p. 182-83), Lemon-miso soup (p. 185), Peanut-apple-miso spread (p. 190), Tofu pickle spread (p. 191), Miso-dill dressing with tahini (p. 195), Miso-vinegar dressing (p. 204), Baked tomatoes with miso (p. 207), Tofu dip (p. 208), Miso dip (p. 209), Tahini-tofu dressing (p. 209), Tofu-mustard dressing (p. 213). 4407. Doyle, Rodger Pirnie. 1979. The vegetarian handbook: A guide to vegetarian nutrition and foods. New York, NY: Crown Publishers. x + 182 p. Illust. Index. 24 cm. [20+ ref]
• ***Summary:*** Table 3, "Daily food guide for vegan adults" (p. 30) recommends soy milk, tofu, and fermented soybean curd [fermented tofu].

The section titled "Weaning infants on vegan diets" (p. 40-44) also discusses soy milk and The Farm in Tennessee. Soy milk is also recommended for pregnant and lactating women (p. 54-55).

Chapter 9, titled "A pair of unusual diets," discusses macrobiotic diets and fruitarian diets. The author is quite critical of a number of macrobiotic practices and teachings: Studies have shown nutritional deficiencies. Restricted intake of liquids may lead to kidney stones and kidney failure. "The greatest danger of a macrobiotic diet is not to adults but to newly weaned infants... Don't wean infants on Kokoh... Wean them instead on either milk or fortified soy milk."

Page 93 states: "Soybeans are among the most valuable of vegetarian foods, not only because of their high-quality protein but because they can be made into soy milk and tofu (soybean curd)... Two other soy products that are widely used in the United States are soy sauce and miso." Pages 96-97 discuss soy milk and textured vegetable protein (TVP).

vegetable from artichokes to yams."

The recipe for Mongolian fire pot (Shua yang jou) (p. 224-25) calls for (in the "Sauce"): "5 teaspoons canned fermented red bean curd."

The section titled "Soya beans, mung beans, and bean sprouts" (p. 459-61) notes that bean sprouts are easily grown at home. Soya beans have been grown in China since at least the Western Chou dynasty (1027-770 B.C.).

During the Tang dynasty [618-906 AD] in China, Buddhist vegetarians, in their temple kitchens, "were the first to turn soya bean-curd [sic, yuba] into imitation meats, imitation poultry and imitation fish, which they prepared with great tastiness." The practice continues in China to this day.

Recipes are given for: Stir-fried bean sprouts. Chop suey. Note: When speaking of "bean sprouts" she does not distinguished between soy sprouts and mung bean sprouts. Address: Broad Town & Trôo, England.

4410. Hsiung, Deh-Ta. 1979. Chinese regional cooking. New York, NY: Mayflower Books; London: Macdonald. 224 p. Illust. (chiefly color). Maps. 28 cm. 1st American ed.
• ***Summary:*** A superb and beautiful book, loaded with beautiful color photos printed on glossy paper. It identifies four regional schools: Peking (Northern school). Shanghai (Eastern School). Sichuan (Western school). Canton (Southern school). The Pearl River delta, with Canton as the capital of Guangdong (W.-G. Kwangtung) province, "is undoubtedly the home of the most famous of all Chinese cooking styles... Because Canton was the first Chinese port opened for trade, foreign influences are particularly strong in its cooking." Note: Likewise, what most Westerners have traditionally thought of a "Chinese cooking" comes from Canton.

Archaeological evidence shows that by 5000 B.C. the people of north China had begun to settle down, to farm, and to make painted pottery and cooking utensils. Written records first appeared in about 3500 B.C. "Later, during the Chou dynasty (11th century to 221 B.C.) soy beans were added to the Chinese diet" (p. 32.).

Northern soy-related recipes: Fried bean-curd [tofu] (with 2-3 cakes of bean curd) and a color photo of "A bean-curd factory run by a unit of the People's Liberation Army on the outskirts of Peking" (p. 53). Rinsed lamb in fire-pot (with 2 cakes of bean curd, fresh or frozen, p. 68-71). The Yangtse [Yangtze], China's longest river, is a natural divide between north and south in China. Those in the north eat more wheat and soybeans (p. 94).

Shanghai / eastern soy related recipes: The Yangtse River has already traveled 3,000 miles before it reaches its Lower Plain where many crops, including soy beans are grown (p. 98). A page titled "Buddhist and Taoist dishes," notes that they are vegetarian (actually vegan), since "Chinese vegetarians are not allowed anything remotely connected with animals, including eggs or milk. They get their protein mainly from the soy bean and its by-products, such as bean-curd and imitation meat. Curiously these imitation meats (known as vegetarian meat, chicken, fish, and so on) bear an amazing resemblance to their fleshy counterparts in form, texture and flavor.

"For some unknown reason, the best vegetarian restaurants [in China] are to be found in Shanghai–a thriving commercial center and seaport..." (p. 119). Buddha's fry (with 1 oz. dried bean-curd skin [yuba], p. 120-21). A small color photo shows sheets of dry yuba. Eight treasure bean curd (p. 132). "This recipe used to be called 'Prince's Bean-Curd' and originally appeared in *Sui-yuan Shihtan* (Recipes of Sui-yuan), by the 18th century man of letters and gourmet, Yuan Mei." A small color photo shows fresh bean-curd on a wooden table in a Chinese market stall. Bean curd a la maison (p. 144).

Sichuan / western soy related recipes: Bean curd fish in chili sauce (p. 164). Steamed beef with ground rice (with 1 tablespoon {15 ml} salted black beans, crushed). 'Pock marked woman' bean curd (Mabo doufu, with salted black beans, p. 173). This is another nationally popular dish that originated in Sichuan. The woman was the wife of a well-known chef who worked in Chengdu about 100 years ago; she created the dish. Hot and sour soup (with 1 cake bean curd, p. 174). Fish soup (with bean curd, p. 181). Soy braised duck (with Hoi Sin sauce and soy sauce, p. 182).

Cantonese / southern soy related recipes: Fish and bean-curd casserole (p. 194-95). Eight treasure stuffed bean-curd (a well known Hakka dish, p. 198). Squid and peppers with shrimp (prawn) balls (with 1 tablespoon crushed black bean sauce, p. 202-03). Fish head casserole (with 2 cakes bean-curd, p. 203). Steamed bass in salted black beans (p. 209).

Glossary of main ingredients (p. 219-21) has entries for: Bean-curd (toufu, incl. dried bean-curd skin). "Bean sauce: Sometimes called 'Crushed bean sauce,' this thick sauce is made from black or yellow [soy] beans, flour and salt. It is sold in tins... (N.B. Black bean sauce is very salty, while yellow bean sauce is sweeter with sugar added)." Bean sprouts: Of the two kinds, yellow soy bean sprouts are sold only in Chinese provision stores.

A large excellent photo (p. 219) shows: 1. Hoi Sin [hoishin] sauce in white bowl. 2. Salted black beans in can. 3. Light soy sauce in bottle. 4. Dark soy sauce in bottle. 5. Red bean-curd sauce in small brown crock. 6. Crushed yellow bean sauce in bowl. 7. Yellow bean sauce in white bowl.

"Chili paste: Also called 'Chili purée,' is made of chili, soy bean, salt, sugar and flour. Sold in jars; will keep almost indefinitely." "Hoi Sin sauce: Also known as barbecue sauce. Made from soy beans, sugar, flour, vinegar, salt, garlic, chili, and sesame." "Red bean curd sauce: A thick sauce made from fermented bean curd and salt. Sold in cans or jars, will keep indefinitely." "Salted black beans: Whole bean sauce,

© Copyright Soyinfo Center 2013

very salty." Sesame seed oil: Chinese typically use vegetable oils; soy bean oil is very widely used. Soy sauce: "The darker colored sauces are strongest and more often used in cooking, whereas the lighter are used at the table."

• ***Summary:*** Contains several tofu recipes.

4412. Kohler, Jean Charles; Kohler, Mary Alice. 1979. Healing miracles from macrobiotics: a diet for all diseases. West Nyack, New York: Parker Publishing Co. 290 p. Index. 24 cm. [70* ref]
• ***Summary:*** This book is by and about people who were cured of cancer, apparently by following a macrobiotic diet, lifestyle, and worldview.

Miso soup is mentioned on pages 29, 30, 112, 122, 161, 169, 173. Miso-tahini spread p. 208. Miso, tekka, p. 131. Shoyu, p. 169. Soybeans, p. 122, 169. Soy ice cream, p. 214. Tamari, p. 112, 169. Tofu, p. 178 ("you can often find some tofu {some natural-foods stores are equipped to handle this perishable bean-curd}").

Seitan is mentioned on pages 202, 216, and 218.

The index also contains many entries for seaweed (edible), sesame oil, sesame seeds, sugar, sunflower seeds, tahini, umeboshi plum, vegetarian diets and nutrition, Zen, etc.

At age 16, while visiting a shrine in Akita (in northeastern Japan), Michio Kushi had a profound spiritual experience, which is described at length (p. 88). "I saw... that everything was being; everything was radiating light. I could then understand that everything is living, everything is breathing, including plants, grasses, trees, birds, and even houses, stones, and soil; everything without exception. Then I understood that life is nothing but light and vibration, or waves, and the universe is full of life, and is one continuity, yet is manifested in everything and every being."

Michio visited an organization in Tokyo named the World Government Organization. To Michio's surprise, the young people there "talked about food and cooking rather than world government. They introduced Michio to their teacher: Nyoichi Sakurazawa, whose name in the Western world was George Ohsawa."

"Ohsawa never spoke to Michio about food. It was always the view of the Universe he talked about–and of yin and yang."

Jean Charles Kohler (husband) was born in 1916 and Mary Alice Kohler (wife) was born in 1917.

4415. Lo, Kenneth H.C. 1979. The encyclopedia of Chinese cooking. New York, NY: A & W Publishers, Inc. viii + 369 p. Plus 10 unnumbered pages of color plates. Illust. Index. 26 cm.
• ***Summary:*** The Introduction notes: "Everybody who has lived through the last couple of decades in the West has noted the tremendous expansion in the desire for increased sensuality; for the freer and fuller use of our senses of sound, sight, taste, and touch" (p. 1).

"Chinese meals are communal meals." Chinese food and cooking "are undoubtedly one of China's unique contributions to the sum total of the world's civilization" (p. 3).

Note: This book calls for the use of monosodium glutamate in many recipes.

Soy related recipes: Peking soy-meat sauce for noodles (with soy sauce, brown bean paste, and hoisin sauce, p. 39). Soy-celery sauce for deep-fried chicken (with soy sauce, p. 42). Soy-stock sauce for deep-fried chicken (with soy sauce, p. 42). Soy-vinegar sauce for deep-fried chicken (with soy sauce, p. 42). Soy and mixed vegetable sauce for deep-fried chicken (with soy sauce, p. 43). Soy-stock sauce for boiled, white-cut, or sliced chicken (with soy sauce, p. 43). Soy-red bean cheese marinade for pork or spare ribs (with "1 tablespoon red bean cheese," p. 48). Basic soy-vinegar dressing (with soy sauce, p. 49). Strengthened soy-vinegar dressing (with soy sauce, p. 49). Hot soy dressing (with soy sauce, p. 50). Soy-sesame dressing (with soy sauce, p. 50). Soy-onion dressing (with soy sauce, p. 50).

Basic condiments: Soy sauce (p. 52). Hoisin sauce (p.

© Copyright Soyinfo Center 2013

53). Soy sauce comes in three grades: light, dark, and heavy. The heavy type can be used as a tasty dip. "Good quality heavy soy-sauce has a flavor of its own..."

Various dips for chicken (all with soy sauce): Soy-oil dip for chicken (p. 55). Soy-oil-garlic dip (p. 55). Soy-oil-ginger dip (p. 55). Soy-ginger-garlic dip (p. 55). Soy-oil-scallion dip (p. 56). Soy-mustard dip (p. 56). Hot soy-oil dip (p. 56). Soy-sherry dip (p. 56). Hoisin or plum sauce for pork (p. 56). Soy-sesame dip for pork (p. 57). Dip for deep-fried bean curd (with soy sauce, peanut butter, sesame oil, etc., p. 58). Sliced pork and bean curd soup (with "2-3 cakes bean curd," p. 67).

Hot noodles with soy jam and fresh vegetables (with "6¼ tablespoons soy jam or paste," p. 102).

The chapter titled "Vegetable and vegetarian dishes" (p. 106-21) begins: "There are three background factors in Chinese vegetable and vegetarian cooking which give them strength, tradition, and variety.

"The first of these is the widespread use of soy beans and their by-products [soyfoods] which, as we have already seen, add a great deal of flavoring power to Chinese meat cooking, as well as the cooking of other foods. One must also recognize that the use of bean curds is of great importance–for shear versatility–for shear versatility they have few equals in the whole realm of food materials." This type of cooking is derived "principally from Buddhist monastery and temple cooking. "Soy beans and their by-products (soy sauce, soy paste [jiang], soy cheese [fermented tofu], soy bean curd, and fermented salted black beans) [fermented black soybeans] act as a common denominator between meat and vegetable dishes." The "Basic vegetarian stock" has three main ingredients: fresh and dried mushrooms and mushroom stalks, 1½ lb yellow [soy] beans, and ¼ teaspoon MSG. The technique of "Splash frying" is used in the recipe for "Splash-fried bean sprouts" (p. 112). Soy related: Vegetarian toasted 'shrimp' (with 2 cakes bean curd and 1 teaspoon bean curd cheese, p. 119). Vegetarian spring rolls (with 2 cakes bean curd 1 teaspoon bean curd cheese, p. 119).

Spare ribs with black beans (Chinese style) (with "2 tablespoons fermented black beans," p. 142).

Spare ribs with black beans (overseas Chinese style) (with "2 tablespoons fermented black beans," p. 142). Spare ribs with red bean curd cheese (p. 143-44). Sliced roast pork stir-fried with bean curd (p. 150). Diced chicken in soy jam (with "2 tablespoons soy jam or paste," p. 212-13). Soy eggs (made by simmering hard-boiled eggs in soy sauce).

The Glossary (p. 343-46) includes entries for: Bean curd. Bean curd cheese ("It is used extensively for flavoring, and is often eaten in small quantities with congee {plain, boiled rice porridge} for breakfast in China"). Bean sprouts ("Young sprouts of the mung bean"). Black beans (Fermented) ("Small, black, salted soy beans"). Hoisin sauce ("Literally translated it means 'Sea-Fresh Sauce.' The ingredients are soy sauce, soy paste, ground yellow beans, garlic, sugar and vinegar). Light soy sauce. Monosodium glutamate ("It can be eliminated from the recipes if desired"). Red bean curd cheese [a type of fermented tofu]. Soy jam (soy bean paste) (This is almost a solid version of soy sauce; it is somewhat less salty but often tastier than soy sauce).

Note: This book was first published in 1974 by William Collins Sons & Co. in London.

4416. Making tofu at The Soy Plant in Ann Arbor, Michigan (Photographs). 1979.
• ***Summary:*** These two black-and-white photos (each 5 by 7 inches) were sent to Soyfoods Center in 1979 by Steve Fiering of The Soy Plant. Both photos show Ann Elder making tofu at The Soy Plant. She is wearing a bandana over her hair and a plastic apron over her clothes. In the first photo, she is using a wooden paddle to stir the *gô* (soy slurry) in a steam-jacked cooker / kettle and spraying it with cold water from the sprayer in her left hand. The rim of the cooker is several inches below the height of her shoulders. When the slurry would boil and start to rise, she would spray it down. After it rose three times, it was removed from the cooker, and the soymilk was pressed out.

In the second photo, she is tilting a second large kettle in which the soymilk was curded with nigari. The kettle is shown full of curds and whey. After the whey was ladled off, the curds were gently scooped into forming boxes.

Note from Steve Fiering. 1999. July 6. Steve, who was a founder of The Soy Plant, is now a Professor of Microbiology, at the Dartmouth-Hitchcock Medical Center, in Lebanon, New Hampshire. He says that Ann Elder still lives in Ann Arbor and works for the co-op bakery there.

• ***Summary:*** Contents: About NESD. What is tofu? Why buy tofu?: Consumer benefits, retailer benefits, institution benefits (shows package label). Why buy Soy Dairy tofu?:

© Copyright Soyinfo Center 2013

High quality ingredients (soybeans, natural nigari, water), good taste, freshness, long shelf life (18 days from day of production), sales service, product liability insurance. How tofu is made (with 7 large photos showing each step). The many uses of tofu. Nutritional highlights. Nutritional information: Tofu, firm tofu. Point-of-purchase materials and program (incl. 3 recipe brochures, color poster). Letters of recommendation. Kosher letter (1 Sept. 1978 from Rabbinical Council of New England; Tofu and Soymayo have been granted the KVH symbol of Kashruth endorsement). Care and handling: Packaged tofu, bulk tofu. New products and guarantees. Price list (enclosure).

"New products scheduled for release in 1979 are plain and flavored soymilk, deep-fried ready-to-eat tofu cutlets, eggless no-cholesterol mayonnaise, and soymilk ice cream. In the testing stages are soymilk yogurt and soymilk kefir, and other traditional foods made from soybeans... Guarantee: New England Soy Dairy guarantees the quality and integrity of all its products." Address: 305 Wells St., Greenfield, Massachusetts 01301. Phone: (413) 772-0746.

4420. New England Soy Dairy Inc. 1979. Soy Dairy tofu (Poster). 305 Wells St., Greenfield, MA 01301. 1 p. 44 x 28 cm. Color. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.

• ***Summary:*** This large and colorful poster has a yellow title and color photos of prepared tofu dishes on a black background. The photos on the top two-thirds are: 1. Tofu tomato cheese sauce on broccoli. 2. Tofu garlic dressing on a green salad and alfalfa sprouts. 3. Tofu strawberry whip in a stem glass. 4. Soy milk. 5. Deep fried sweet & sour tofu. 6. Organic Soy Dairy Tofu. 7. Organic Soy Dairy Firm Tofu. The bottom one-third is text and explanation. Address: Greenfield, Massachusetts.

4421. New England Soy Dairy. 1979. Cooking with Soy Dairy tofu. Volume 1 (Leaflet). Greenfield, Massachusetts. 3 panels each side. Each panel: 22 x 9 cm.

• ***Summary:*** This two-color leaflet is printed with brown and green on beige. Contents: Introduction to tofu and *The Book of Tofu*, by Shurtleff and Aoyagi. Nutrition information per serving. Percentage of U.S. Recommended Daily Allowances (protein 15%, iron 15%, phosphorus 15%). Serving suggestions. Storage. Recipes: Pan-fried tofu with sauce. Stewed tofu. Tofu manicotti. Tofu eggless "egg salad." Tofu guacamole. Tofu Russian dressing. Tofu onion garlic dip. Tofu strawberry whip. Tofu "cheesecake." Address: 305 Wells St., Greenfield, Massachusetts 01301. Phone: (413) 772-0746, 774-3141; NYC (212) 532-1404.

4422. New England Soy Dairy. 1979. Cooking with New England Soy Dairy tofu: Summer recipes. Volume 2 (Leaflet). Greenfield, Massachusetts. 3 panels each side. Each panel: 25.5 x 9 cm. Dated 1979.

• ***Summary:*** This two-color leaflet is printed with brown and green on beige. Contents: Introduction to tofu and *The Book of Tofu*, by Shurtleff and Aoyagi. Serving suggestions. Storage. Nutrition information per serving. Percentage of U.S. Recommended Daily Allowances (protein 15%, iron 15%, phosphorus 15%). Recipes: Chocolate or carob tofu creme pie. Tofu "Mayonnaise." Creamy tofu dip. Tofu vinaigrette [Salad]. Tofu "Steaks" on the outdoor grill. Tofu garlic dressing. Tofu blue cheese dressing. Tofu protein pops. Tofu raspberry pudding. Batter-fried tofu with vegetables. Summery tofu salad. Address: 305 Wells St., Greenfield, Massachusetts 01301. Phone: (413) 772-0746, 774-3141; NYC (212) 532-1404.

4423. Ng Sock Nye. 1979. Soya bean–Nutritious food for the people. Malaysia: Institut Masyarakat Berhad, 9 Lorong Kucing, Pulau Tikus, Penang. 19 p. Illust. 21 cm. [3 ref]

• ***Summary:*** A very original and informative booklet, containing a photo or illustration (line drawing) of most of the soyfood products discussed.

Contents: Nutritional value of soya bean, soya bean milk (tau chui [soymilk]), soya bean curd (tau fu fah [soymilk curds]), soya bean jelly (tau fu [tofu]), fried bean cake cubes (tau fu pok [deep-fried tofu cubes]), bean cakes (tau kuah [pressed tofu]), dried soya strands (tau ki / fu chok [dried yuba sticks]), soya skin sheets (tau pui; dried yuba), sweet bamboo (t'im chok [sweet dried] yuba), vegetarian duck (chai ak [Buddha's duck made from seasoned and steamed yuba]), vegetarian salted fish (chai kiam hu [Buddha's fish made from tofu spread on yuba]), vegetarian meat (chai tu kar [Buddha's ham made from seasoned yuba; may be steamed]), soya bean sprouts (tau geh [soy sprouts]), soya sauce (tau eu [soy sauce]), salted soya beans (tau chio [Malaysian fermented black soybeans]). Bibliography.

On page 18 is a photo of all the soyfood products discussed on one table, each neatly labeled with its Malaysian name.

4424. NHK. 1979. Tôfu ryôri [Tofu cookery]. Tokyo: Nihon Hoso Kyokai. 128 p. Illust. No index. 19 cm. [Jap]

• ***Summary:*** Contents: Part I: Japanese style tofu recipes. Boiled/simmered (niru), steamed, broiled, fried, sauteed, tossed salad (with tofu dressing), soups, other, okara, deep-fried tofu cutlets, deep-fried tofu pouches, kôya-dofu. Part II: Chinese style tofu recipes. Tossed salad, steamed, boiled/simmered, deep fried, deep-fried tofu cutlets, deep-fried tofu pouches. Address: Tokyo, Japan.

4425. Nordquist, Ted. 1979. Re: Planning a natural soy products industry in Sweden. Letter to William Shurtleff and Akiko Aoyagi at New-Age Foods Study Center, undated. 1 p. Typed, with signature. [Eng]

• ***Summary:*** "Thank you again for the lovely evening [19 May 1979, in Lafayette] and all the helpful materials. A

© Copyright Soyinfo Center 2013

© Copyright Soyinfo Center 2013

great deal has transpired here since we last met. I am now in the process of planning a 'natural soy products' industry in Sweden, along with a long time friend and Engineer, Ki Yong Kim. Towards this end, Kim will be visiting Japan in August." He would like to visit medium- and large-scale companies that make tofu equipment.

"Ray Nagai of Traditional Tofu mentioned the ideas of soy-milk yogurt and tofu salad dressings as good starters on the Swedish market (Swedes have a taste for 'sour' milk products)."

"We are in the process of researching all available Swedish machinery suitable for soy products. We are aiming at December [1979] as the month when we put together our findings concerning machinery, marketing, distribution, initial products, aims, etc. and can present a convincing deal to probable financiers, hopefully by February of 1980... It took me a great deal of deep thinking to make the final jump from academics to soy products. Now that I have turned down a two-year grant and both Anne-Marie and I have decided to 'make or break' our lives on soy products I have a good gut sensation that I am headed in the right direction. My love to you both. Om Tat Sat. Ted A. Nordquist, FD."

Note: This is the earliest English-language document seen (Sept. 2012) that contains the term "soy-milk yogurt." Address: Blodstensvägen 16, 752 44 Uppsala, Sweden.

4426. Okita Enterprises, Inc. 1979. Masuko Sangyo Miniplant: Tofu & soy milk machine. 960 E. 12th St., Los Angeles, CA 90021. 12 p. Undated. 28 cm.
• ***Summary:*** A photo on the cover shows the Masuko Sangyo Miniplant on a blue background. Okita Enterprises is the sole agent in the USA for the equipment shown in this catalog. Okita has a training center at 723 S. Stanford Ave., Los Angeles, California 90021. The body of the catalog shows photos and gives details on the following equipment: The Miniplant and related parts (p. 2-5). The Super Masukoroider, a soybean grinder with special non-permeable grinding stones made by Masuko Sangyo K.K. in Japan (p. 6-7). Various sizes of manual and automatic tray packagers, the smallest of which is the Monkey Packer 1 (p. 8-9). The new Asahi Container (tofu pressing and forming box), made of stainless steel and Tofu-Tex "cloth" by Toyo Plant in Japan. Address: Los Angeles, California. Phone: (213) 629-2206.

4427. Okita Enterprises, Inc. 1979. Sany Ace "Unit": Unit type sanitary plant [Automatic tofu & soy milk machine]. 960 E. 12th St., Los Angeles, CA 90021. 6 p. 30 cm.
• ***Summary:*** On the cover is a photo of the Sany Ace plant on a blue and white background. The manufacturer is Sato Shoji Co. Ltd. in Japan. Okita Enterprises is an importer of this equipment. Contents: DEvelopment of the "Sany Ace (Unit)." Characteristics of Sany Ace. Flow sheet, with the names and a mechanical drawing of each piece of equipment in the system. Features of the grinding unit, boiling unit, and squeezing unit (with a photo of each). Option: Advanced separator for labor saving: Vibrating screen, Brown squeezing unit (with photos of both). Address: Los Angeles, California. Phone: (213) 629-2206.

4428. Okita Enterprises, Inc. 1979. Rietz Manufacturing Co. 960 E. 12th St., Los Angeles, CA 90021. 4 p. Undated. 28 cm.
• ***Summary:*** A black-and-white photo on the front cover shows a Rietz disintegrator on a green background. A black-and-white photo on the rear cover shows a Rietz tofu and soymilk cooker on a white background. The inside two pages show mechanical drawings of these two pieces of equipment integrated into the OK-FRSB 1000 tofu plant, which has a capacity of 10-15 gallons/minute. The text states that this "could very well become the Tofu plant of the future." Note: Rietz (c/o Bepex Corp.) is located in Santa Rosa, California. Address: Los Angeles, California. Phone: (213) 629-2206.

4429. Okita Enterprises, Inc. 1979. Brown International Corp. Sato Shoji Co., Ltd. 960 E. 12th St., Los Angeles, CA 90021. 4 p. Undated. 28 cm.
• ***Summary:*** A black-and-white photo on the front cover shows a Brown 2202 disintegrator-extractor on an orange-brown background. Black-and-white photos on the other three panels show the following pieces of equipment, each on a white background. (1) Okita-type separation unit consisting of a Sweco Separator and a Brown Extractor. (2) Brown 3900 continuous process screw extractor. (3) Sany Ace unit, made by Sato Shoji Co., Ltd. of Japan. Address: Los Angeles, California. Phone: (213) 629-2206.

4430. Okita Enterprises, Inc. 1979. Automatic tray packager: US 900 ss–electro-mechanical press, and US 90 ssa–compressed air press (Leaflet). 960 E. 12th St., Los Angeles, CA 90021. 1 p. Undated. 28 cm.
• ***Summary:*** A black-and-white photo on the front cover shows one of these large packaging units on a white background. The packaging machine is "for tofu, seafood, pickled vegetables, or any other product that may require a water tight seal." Produces 500 to 1,500 packages/hour. The dimensions of each machine are given. Address: Los Angeles, California. Phone: (213) 629-2206.

4431. Padilla, Jean. 1979. Les recettes végétariennes de l'Auberge "in" [The vegetarian recipes of the Auberge "Inn"]. Paris: Editions Robert Laffont. 142 p. Illust. No index. 22 cm. [Fre]
• ***Summary:*** The Auberge "Inn" is apparently a restaurant in France. In French, the word *Auberge* refers to an inn, public house, hostel, or tavern. Soy-related recipes include: Macao salad (with soy sprouts, p. 113). Tropical salad (with soy sprouts, p. 116). Macrobiotic pâté (with soy flour, sesame

© Copyright Soyinfo Center 2013

butter, etc., p. 125). Miso pâté (with miso [soja fermenté em pâté], chickpea flour, Chinese-style tofu [pâte de soja = fromage de soja], and soy sprouts, p. 126). Shallot sauce (with tamari, p. 127). Clafoutis Auberge "In" (with soy flour, p. 137). Address: Paris, France.

4432. Peppler, Henry J.; Perlman, D. eds. 1979. Microbial technology. 2nd ed. Vol. 1. Microbial processes. Vol. 2. Fermentation technology. New York, NY: Academic Press. Vol. 1, 544 p. Vol. 2, 536 p. Subject index.
• ***Summary:*** Contents of Vol. 1: 1. Beer brewing. 2. Cheese. 3. Distilled beverages. 4. Mold modified foods, by Hwa L. Wang and C.W. Hesseltine (p. 95-129, cited separately; incl. soy sauce, miso, hamanatto, sufu, tempeh). 5. Wine. 6. Vinegar. 7. Ketogenic fermentation processes. 8. Mushroom fermentation. 9. Inocula for blue-veined cheese and blue cheese flavor. 10. Microorganisms for waste treatment. 11. Elementary principles of microbial reaction engineering. 12. Microbial culture selection. 13. Methods for laboratory fermentations. 14. Instrumentation of fermentation systems. 15. Computer applications in fermentation technology. 16. General procedures for isolation of fermentation products. 17. Use of immobilized cell systems to prepare fine chemicals. 18. Economics of fermentation processes. 19. Fermentation processes and products: Problems in patenting.

Page 111: "Sufu, a traditional Chinese food, is a soft cream cheese-type product made from cubes of soybean curd (tofu) by the action of a mold. In the Western world, sufu has been referred to either as Chinese cheese or as bean cake. Because of the numerous dialects used in China, the product is also known as fu-ju, tou-fu-ju, and others (Wang and Hesseltine, 1970a)." Address: 1. Universal Foods Corp., Milwaukee, Wisconsin; 2. School of Pharmacy, Univ. of Wisconsin, Madison.

4433. Rattazzi, Ilaria; Rivetti, Franz. 1979. La soia. Semi e germogli: come coltivarli, prepararli e cuocerli. Gli abbinamenti con carne e verdure. Come prepare il go, il latte di soia e il tofu [Soybeans. Seeds and sprouts: how to grow, prepare, and cook them. Combining with meat and vegetables. How to prepare fresh soy puree (gô), soymilk, and tofu]. Milano, Italy: Sonzogno. 127 p. [73 ref. Ita]
• ***Summary:*** Contains many recipes. Address: Italy.

4434. Riker, Tom; Roberts, Richard. 1979. Directory of natural and health foods: A sourcebook for dietary revolution. New York, NY: Putnam (A Paragon Book). 320 p. Index. 37 cm.
• ***Summary:*** The first part of this book (p. 7-49) consists of essays on natural foods and nutrition (some reprinted). Part two is a commercial catalog/directory of natural foods available in 1979; it lists and describes (with may photos and labels) products from most of the major U.S. natural foods manufacturers. An Index (p. 293-308) lists participating companies alphabetically.

Soy-related products include: Hain Super-E Soy Oil and Crude [unrefined] Soy Oil (Los Angeles, California, p. 55). Health Valley Soy Moo (Montebello, California, p. 56). Edward & Sons Miso-Cup (Union, New Jersey, p. 57). Family Orchards Fruit & Nut mixes, incl. Back Packer+*, Hi-Fiber Mix+, Hi-Iron Mix+, Hi-Protein Mix+*, Hiker's Helper, Mixed Nuts*, Mountain Munchies*, Tamari Mixed Nuts* (+ = contains Soy Nuts; * = contains Tamari Peanuts) (Berkeley, California, p. 60-61). Niblack Tamari Pumpkin Seeds (Pepitas), Tamari Roasted Sunflower Seeds, Liquid Lecithin, Granular Lecithin (Rochester, New York, p. 72-73). Arrowhead Mills Unrefined Soybean Oil (Hereford, Texas, p. 75). Good Morning New England Granola incl. Cashew-Raisin Bran-ola (with okara soy fiber), Happy Trails Mix (with roasted soynuts) (Amherst, Massachusetts, p. 79). Elam's Soy Flour (Broadview, Illinois, p. 81).

A long section on Erewhon and its products (p. 84-108) is probably the reproduction of an Erewhon catalog. Erewhon is now located at 3 East Street, Cambridge, MA 02141. Following several pages about the company and its philosophy and standards, each of its major products is discussed in detail, often with nutritional analyses. A label for Soy Flour (organically-grown stone-ground, 24 oz.) is shown; the main recommended use is for making soy milk! A major part of the presentation is titled "Japanese food guide." Products described include: Umeboshi (2 pages): Plums pickled in brine (umeboshi). Umeboshi paste. Plum concentrate (*bainiku ekisu*). Miso (2 pages): Hatcho, waka-Hatcho, soybean, barley, brown rice, rice, and natto miso varieties. Tekka (made with Hatcho miso). Sweets made from mizu ame [rice syrup]. Nigari. Gomashio. Koji starters for various types of miso or shoyu. Goma-muso (60% barley miso and 40% whole sesame seed butter). *Gomamiso furikake* (with barley miso, whole roasted sesame seeds, and shredded nori seaweed). Kombu candy. Kokkoh. Dried tofu (*Kohya-dofu*). Brown rice sake. Mirin. Gluten cakes (*Kuruma-fu*). Seitan (Gluten cooked in shoyu). Rice crackers seasoned with tamari soy sauce. Kuzu (3 pages). Tamari and shoyu (4 pages; Johsen Shoyu is made in Sendai and tamari is made by San-jirushi Co.). Seaweeds (4 pages): Kanten, arame, hijiki, kombu, ne-kombu, nori, seasoned nori, kanten, kanten flakes, wakame, and mekabu.

Good Food brand Soy-Millet Bread (Austin, Texas, p. 120). Arrowhead Mills Bulgur-Soy Grits (p. 121). Erewhon Morning Cereal, and Infant Cereal (each containing soy beans). Chico-San Black Soybeans (imported), and Azuki Beans (Dainagon imported small red), and Lima Soy Sauce (Chico, California, p. 126-27). Arrowhead Mills 7 Grain Cereal, and Deaf Smith Crunch (granola-type cold cereal) (each contains soybeans, p. 130).

The section on pages 188-197 is titled "Soy." It lists Farm Foods Tempeh Kit, Tempeh Starter, Natural Nigari for Curding Tofu, Soyflour, Whole Cleaned Soybeans, Good for

© Copyright Soyinfo Center 2013

Ya Textured Vegetable Protein (Summertown, Tennessee, p. 189). New England Soy Dairy Tofu (with many tofu recipes, Greenfield, Massachusetts, p. 192-96).

The Redwood Sprouter Co. sprouter containing Soy Sprouts (1976, Austin, Texas, p. 202-04). Worthington Foods (a photo shows their line of 38 products). Millstone Burger-Like (with soy flour and TVP), Wheat Fries (with wheat gluten), Tender Cuts (with wheat protein and soy flour) (Penryn, California, p. 222-23). Sunrise Health Products Lecithin Granules (p. 274-75).

4435. **Product Name:** [Tofu kit].
Foreign Name: Tofu kit.
Manufacturer's Name: Roland A. di Centa.
Manufacturer's Address: Via Maffei, Milan, Italy.
Date of Introduction: 1979. January.
New Product–Documentation: Ad (in French, 2 inches square, black and white) in Le Compas (France). 1981. No. 17. Spring. p. 52. "Tofu kit. Contains everything to prepare tofu in your own home, including a 16-page booklet and enough nigari for two batches of tofu. Price: 120 francs, postpaid. Send a check to De Centa, 12, rue des Patriarches, 750-05, Paris."

An undated booklet accompanied this tofu kit made in Italy by Roland A. di Centa, Italy's first Caucasian tofu maker. On the yellow cover of the French-language booklet the word "tofu" is also written using Chinese characters. Contents of the booklet: Tofu: What is tofu?, vitality and energy, proteins, easy to digest, saturated fats and cholesterol, easy to prepare in recipes, make tofu at home using the tofu kit. The tofu kit and its contents. Details on the tofu kit and how to use it. How to store and press tofu. How to make tofu at home: Detailed instructions with illustrations. Ingredients used in preparing tofu recipes: Tamari, miso, kuzu, unrefined sea salt, sesame oil, sesame seeds and gomashio, tahini (most sold at macrobiotic food stores). Recipes for using tofu. Recipes for using okara. Soymilk.

Note: This booklet was sent with a letter by Roland A. di Centa. 1993. Aug. 9. For details, see that letter.

4436. **Product Name:** [Tofu kit].
Foreign Name: Tau-fu kit.
Manufacturer's Name: Roland A. di Centa.
Manufacturer's Address: Via Maffei, Milan, Italy.
Date of Introduction: 1979. January.
New Product–Documentation: An undated booklet accompanied this tofu kit made in Italy by Roland A. di Centa, Italy's first Caucasian tofu maker. On the white cover of the Italian-language booklet the word "Tau-Fu Kit" is written in brown outline letters. Contents of the booklet: Tofu: What is tofu?, vitality and energy, proteins, easy to digest, saturated fats and cholesterol, easy to prepare in recipes, make tofu at home using the tofu kit. The tofu kit and its contents. Details on the tofu kit and how to use it. How to store and press tofu. How to make tofu at home: Detailed instructions with illustrations. Ingredients used in preparing tofu recipes: Tamari, miso, kuzu, unrefined sea salt, sesame oil, sesame seeds and gomashio, tahini (most sold at macrobiotic food stores). Recipes for using tofu. Recipes for using okara. Soymilk.

Note: This booklet was sent with a letter by Roland A. di Centa. 1993. Aug. 9. For details, see that letter.

4437. Rovira, Eleanore. ed. 1979. The what to do with tofu cookbooklet: Recipes for soybean curd. The Grow-cery, 6526 Landsdowne Ave., Philadelphia, PA 19151. 28 p. Illust. No index. 22 cm.
• ***Summary:*** There is a page of acknowledgments, and a section titled "What is Tofu?" followed by 12 pages of recipes. At the end is a blank page entitled "Tofu a la your own imagination," is a dedication and a page-long poem. Address: Philadelphia, Pennsylvania.

4438. Sato Shoji Co. Ltd. 1979. Hôsô-dôfu shisutemu [Bean curd product system]. Nakano 3-33-9, Nakano-ku, Tokyo, Japan. Manufacturer's catalog. [Jap; Eng]
• ***Summary:*** On the cover, a large rectangular color photo in a blue frame shows a a cake of tofu, served as chilled tofu with a dab of ginger on top, in a glass bowl, with green shiso leaves on one side. Near it is a pair of wooden chopsticks on a stand and a second smaller glass bowl. All three of these items are set atop eight pieces of green bamboo, which are on a background of white pebbles. On the inside 3-page spread, a color photo shows Sato's modern Sany System. Since 1958 Sato has specialized in tofu packaging machines. Its Sany Ace System is widely used. "Bean curd is protein source in the world!" On the back page is a flow sheet of the Sany System, plus three color photos showing finished and packaged tofu products, a case of packaged tofu, and the tofu displayed in the refrigerated section of a department store. Address: Tokyo, Japan.

4439. Shulman, Martha Rose. 1979. The vegetarian feast. New York, NY: Harper & Row. xii + 319 p. Illust. by Beverly Leathers. Index. 24 cm.
• ***Summary:*** The author, born in Connecticut in 1950, is the daughter of writer Max Shulman. A color photo on the back dust jacket shows Martha Shulman. Address: Austin, Texas.

4440. Smith, Elizabeth Bernice. 1979. Vegetarian meal-planing guide: A lacto-ovo-vegetarian diet. Winnipeg, Manitoba, Canada: Hyperion Press Ltd. 104 p. Illust. (some color). 21 x 22 cm. [57+ ref]
• ***Summary:*** At head of title: "Dr. Elizabeth Smith's New World of Eating." Table 5e (p. 25) lists calories for meat alternates group. Soybean sprouts, miso, soybean curd (tofu), soybean milk, and TVP are moderate calorie, while soybeans and soy grits are high calorie.

© Copyright Soyinfo Center 2013

Page 47 notes: "Generally speaking, legumes are moderately deficient in methionine. Soybeans are an exception, as are their by-products, tempeh (fermented), tofu (the curd formed for soya), and soybean milk. All these are roughly equivalent in quality to cow's milk.

Page 49 notes that when breast feeding is not possible, soyamilk may be formulated as a very satisfactory substitute; vitamin B-12 must supplement it in pill form. "An infant who cannot tolerate cow's milk because of allergy and cannot be breast fed may accept a soybean formula until 3 to 4 months of age. At weaning, according to Fomon, the child should continue to receive by cup either soybean formula or soybean milk fortified with vitamin B-12.

Pages 54-56 describe in detail how to sprout soybeans at home, and how to prepare homemade soymilk and tofu (soybean curd). It is advised that fermented soybean products such as miso and tempeh not be produced at home "as the control of the fermentation process by specific micro-organisms is too difficult to achieve without specialized training and equipment."

Soy-related recipes include: American soybean loaf (with soaked, ground soybeans, p. 76). Soybeans printanier (with cooked soybeans). Soya sesame loaf. Soya cheese balls (with cooked, seasoned soybeans). Soybean casserole (p. 77). Sprouted soybean Creole. Sprouted soybeans au gratin. Bean sprout chop suey (with tofu, p. 77). Skillet soya sprouts and beans (p. 78). Soybean stroganov (p. 78). Address: Winnipeg, Manitoba, Canada.

4441. Sunbow Farm Products. 1979. Soy cookbooklet. Corvallis, Oregon. 8 p. 22 cm.
• ***Summary:*** Sunbow produces tofu, soy sausage, and burger mix. Contents: Why the "noble" bean. What is tofu? 20 quick ways to use tofu: Main dishes (13 brief recipes), smoothies (2), salad dressings and sandwich spreads (6), desserts (2).

12 ways to use Sunbow Soy Sausage (11 brief recipes). Sunbow's Burger Mix (3 recipes). "Our burger mix is another high fiber product and a lot more."

The two recipes for "Smoothies" read: (1) Banana: In blender put ¼ lb. tofu, one ripe banana, ¼ tsp. vanilla and some crushed ice or cold water. Sweeten to taste. (2) Berry: Blend ¼ lb. tofu, ¼ cup water or crushed ice and drop in fresh or frozen berries to taste. Sweeten to taste. Note: This is the earliest document seen (Feb. 2007) that uses frozen fruit (berries) to add thickness to a smoothie. Address: Route 2, Box 46, Corvallis, Oregon 97330.

4442. Takenaka, Haruko. comp. 1979. Nihon kaseigaku bunken-shu 1969-1978 [Bibliography of home economics 1969-78]. Tokyo: Nihon Kasei Gakkai (Japan Home Economics Assoc.). 678 p. See p. 52-57. [275 ref. Jap]
• ***Summary:*** Bibliographies are given for soybeans (protein), soybeans (other nutrients), tofu, natto, other soyfoods, and azuki beans. Address: Nihon Joshi Daigaku, Kaseigaku-bu [Home Economics Dep., Japan Women's Univ.].

4443. Timmins, Tom. 1979. Re: Flow chart for system for making soy mayo. Letter to William Shurtleff at Soyfoods Center, Undated. 2 p. Handwritten on letterhead.
• ***Summary:*** "Here is a flow chart for a simple, relatively inexpensive, yet high capacity system for mayo." A bottle washer is needed along with a bottle labeler. Address: New England Soy Dairy, Inc., 305 Wells St., Greenfield, Massachusetts 01301. Phone: (413) 772-0746, 774-3141.

4444. Tofu Shop (The). 1979. Soyboy Tofu recipes (Leaflet). Rochester, New York. 4 panels each side. Each panel: 23 x 11 cm.
• ***Summary:*** The front panel contains an illustration of a boy flexing his muscles, holding a pail of soybeans on his shoulder, and wearing a T-shirt with a large soybean pod on it. "Did you know that tofu is eaten by more than one billion people every day? It's true–in East Asia,..."

Contains about 15 tofu recipes including 3 types of baked tofu, three salads and dips (Tofu dip, Tofu "egg" salad, and tofu guacamole), and two tofu desserts (Tofu cheesecake and Chocolate mint pie). Address: 686 Monroe Ave., Rochester, New York 14607. Phone: 716-244-4270.

4445. Tofu Shop (The). 1979. Soyboy Tofu (Leaflet). Rochester, New York. 4 panels each side. Each panel: 23 x 11 cm. Dated 1979.
• ***Summary:*** Brown ink on beige paper. On the front panel is an illustration of a laughing boy in a circle with soybean pods and leaves at the bottom. "High protein. Low calorie. Low sodium. No cholesterol. Tofu, the subtly sweet soybean 'cheese,' has been the key source of protein in Japan and China for thousands of years."

Contains 10 American-style tofu recipes, including: Tofu for babies. Chilled tofu. Lime tofu. Tofu "cottage" cheese. Pan fried tofu. Scrambled tofu. Tofu burgers. Ginger-garlic tofu. Tofu manicotti. Tofu spinach pie. Address: 686 Monroe Ave., Rochester, New York 14607. Phone: 716-244-4270.

4446. **Product Name:** Packaged Lactone Silken Tofu.
Manufacturer's Name: Unicurd Food Co.
Manufacturer's Address: Singapore.
Date of Introduction: 1979. January.
New Product–Documentation: Letter from Francis N.K. Goh. 1994. Nov. 3. This company, originally named Unicurd Food Co., was founded in 1978 as a partnership by two housewives, Madam Tan Ai Wang and Madam Chiang Kuei Chin. In late 1979 the company began to make and sell tofu, operating on a small scale in a combination 2-story shop and home, with the residence located above the shop. The approximate size was 800 square feet. They produced mainly *juten tofu* (lactone silken tofu), packed in 300 gm trays (known as 2B shape in Japan) and also 250 gm sausage-

© Copyright Soyinfo Center 2013

shaped polyethylene bags (known as sakura tofu in Japan), at the rate of about 150 kg/day. In 1980 the company moved into a factory building at Block 1012, Aljunied Ave. 3, #01-35/37, Singapore 1438. The building, of about 2,400 square feet, was constructed by the Government of Singapore. For more details, see separate entry for this letter.

4447. Voldeng, Harvey D. 1979. Soybeans in Canada–Past, present and future. Based on an article [sic, manuscript] by Dr. H. Voldeng. In: 1979. Fats and Oils in Canada: Annual Review. Ottawa, Ontario, Canada: Grain Marketing Office, Dept. of Industry, Trade and Commerce, Agriculture Canada. [vi] + 95 p. See p. 1-10. Chap. 1. [7 ref]

• ***Summary:*** Contents: Introduction. Introduction of soybeans to Canada. Importance of the soybean [worldwide]. Utilization. Food uses of soybeans: Oriental foods–Soy milk, tofu, sufu, miso, soy sauce, tempeh, Hamanatto, natto. Western ingredients–Full fat flour, defatted flour, soy protein concentrates (70% protein), soy protein isolate (more than 90% protein), textured soybean protein. Soybeans in Ontario. Development of short season varieties. Soybeans in Quebec and the Maritimes. Soybeans in the Prairies (southern Manitoba and Alberta).

A table shows soybean acreage in Ontario's leading counties in 1978. Kent 205,000. Essex 192,000. Lambton 170,000. Elgin 63,000. Middlesex 40,000. Other 7,000. Total (Ontario) 705,000 acres.

Soybeans grown in Ontario can be crushed at three plants: (1) Victory Soya Mills (owned by Procter and Gamble) in Toronto. (2) Canadian Vegetable Oil Processing Limited (owned by Canada Packers) in Hamilton. (3) The recently completed Maple Leaf Monarch plant (affiliated with Unilever Corporation) in Windsor. Total crushing capacity in Ontario is about 35 million bushels per year.

The CSP Foods Plant in Altona, Manitoba, has in some years crushed limited amounts of soybeans imported from the U.S.

"Development of short season varieties: The justification for the effort to develop a large acreage outside of southwestern Ontario has been the magnitude of imports of soybeans, meal and oil. This has been and continues to be sizeable. The situation (in metric tons = tonnes) is outlined below for the 1977/78 crop year: (1) Whole soybeans: Production 527,361. Imports 262,835. exports 64,173. Domestic crushing 728,400.

(2) Soybean oil: Imports 28,100. Exports 1,400. Domestic production 125,600.

(3) Soybean meal: Imports 376,300. Exports 45,600. Domestic production 575,400. Source: *Fats and Oils in Canada, Annual Review,* 1978.

Letter (e-mail) from Dr. H. Voldeng of Agriculture and Agri-Foods Canada. 2010. Feb. 16. The original "article" was not an article but a manuscript that was sent to the publishers of this volume; they reduced the length slightly. It was never published separately, no longer exists, and cannot be cited separately. Address: Agriculture Canada, Ottawa, Ontario.

4448. Wang, Hwa L.; Hesseltine, C.W. 1979. Mold-modified foods. In: H.J. Peppler and D. Perlman, eds. 1979. Microbial Technology. 2nd ed. Vol. 2. Fermentation Technology. New York: Academic Press. 544 p. See Vol. 1, p. 95-129. [90 ref]

• ***Summary:*** Volume 1. Microbial processes. Volume 2. Fermentation technology. Contents: 1. Introduction. 2. Soy sauce. 3. Miso. 4. Hamanatto. 5. Sufu [fermented tofu]. 6. Tempeh. 7. Ang-kak (red rice, used as a color agent). 8. Absence of mycotoxins in fermented foods. 9. Conclusions.

For each food is given: General description, method of preparation, composition [chemical / nutritional]. In addition for tempeh is given: Tempeh-like products, biochemistry and physiology of *Rhizopus oligosporus*, changes occurring during fermentation, nutritional value.

"Soy sauce "is known as chiang-yu on China, shoyu in Japan, kecap in Indonesia, kanjang in Korea, toyo in the Philippines, and see-iew in Thailand. In the Western World the product is often referred to as soy sauce." Japan is the leader worldwide in sauce production; it has the largest fermentation plant and uses the most advanced technology.

Hamanatto: Products similar to Japan's hamanatto are known as tou-shih in China, tao-si in the Philippines, and tao-tjo [sic] in the East Indies [Indonesia]. A typical process for making hamanatto in Japan, based on information supplied by Dr. T. Kaneko of Nagoya Univ., Japan, is as follows: Wash soybeans, then soak, steam until soft, drain, and cool. Mix with parched wheat flour in the ratio of 2 parts soybeans to 1 part flour. Inoculate the soybeans with a short- or medium-stalked strain of *Aspergillus oryzae*. Incubate for 1-2 days until the beans are covered with a fragrant mycelium and have become soybean koji. Pack the soybeans in a container [wooden keg] with (for example) 2.5 kg soybean koji, 650 gm salt, 3.6 liters water and some freshly sliced gingerroot. Cover the container tightly and age under pressure for 6-12 months. Remove beans from liquid and dry them in the sun to give hamanatto. The composition of the brine may differ among manufacturers.; thus the finished hamanatto differs somewhat in taste and appearance. "Japanese hamanatto is rather soft, having a high moisture content. Chinese tou-shih has a much lower moisture content... and therefore is not so soft. Tao-tjo tends to have a sweet taste because sugar is often added to the brine."

Shoyu in Japan: Although there are more than 4,000 shoyu makers in Japan, the largest 4-5 companies produce about 50% of the total.

Note: A wide variety of dairy cheeses, especially of French origin, are made with surface mold growth. Typical varieties are Camembert, Coulommiers, and Brie. Address: NRRC, Peoria, Illinois.

• ***Summary:*** A very useful book with excellent definitions of Japanese words in English. It is divided into nine parts; No. 2 is titled "dietary habits" (p. 79-131). Each definition has four parts: (1) The word is written in romanized English, with diacritical marks and a hyphen in compound words. (2) The word is written in characters. (3) A long definition is given in English. (4) Related words and "see also" words are given (romanized) and key words in the definition are defined in Japanese (Chinese characters).

Words only distantly related to soy are preceded below by an asterisk. Soy-related words: abekawa-mochi (with "sweetened yellow soybean powder–kinako"), abura-age (fried soybean curd), aemono, age-dama, age-dashi ("soybean curd fried lightly without a tenpura batter"), Aji-no-moto ("a popular brand of monosodium glutamate"), ama-zake, * an (sweet bean jam = azuki-an; Can be strained {*koshi-an*} or mashed {*tsubushi-an*}), dengaku-tofu, doburoku, eda-mame, fu ("dried, bread-like pieces of wheat gluten"), fucha-ryori ("Chinese-style vegetarian dishes served in some Japanese temples of Chinese origin"), gan-modoki, goma-ae, goma-shio (widely used with sekihan), hiya-yakko, inari-zushi, isobe-maki (with mochi, soy sauce and nori), kara-age, kashiwa-mochi (stuffed with sweet [azuki] bean paste), kina-ko ("yellowish soybean powder"), kishimen (seasoned with soy sauce and topped with a few pieces of fried bean curd), kitsune udon (seasoned with soy sauce and topped with a few pieces of fried bean curd), koji, koya-dofu, * kuzu-manju (a ball of sweet redbean paste {azuki-an} with a covering of kuzu starch), kuzu-mochi (with kinako), masu (a small square measuring box, usually made of Japanese cypress {*hinoki*}. The three sizes measure 0.18, 0.9 and 1.8 liters. It is constructed by dovetailing, without the use of nails or adhesive. It is used for measuring soybeans, cereal grains, or for drinking saké), miso, miso-shiru, miso-zuke, * mochi, nabe-mono (often contain tofu; examples are sukiyaki, yose-nabe, and mizu-taki), nama-gashi (traditional Japanese confections made with beans and/or glutinous rice, cooked but not baked), natto, * nori (a dried sheet of laver, a seaweed), * oboro (related to sushi, not soy), oden, * ohagi (coated with sweet redbean paste {*azuki-an*}), shiru-mono (the two basic types are clear soup and miso soup), * shiruko (sweet beanpaste soup with mochi; see zenzai), shojin-age, shojin-ryori, shoyu, suki-yaki, sukiyaki-nabe, suri-bachi, suriko-gi [suri-kogi], sushi, sushi-ya, teri-yaki, tofu, * ume-boshi (a Japanese pickled plum), wa-gashi (Japanese-style confectionery), wakame, warishita (soy sauce flavored seasoning), washoku = nihon-ryori, yaki-dofu, yaki-mono, yakko-dofu, yu-dofu, * zenzai ("a thick kind of sweet redbean soup").

Page 24 defines hiragana (lit. flat kana) as "The cursive form of *kana* script, one of the two sets of Japanese syllabary writing. *Hira-gana* is more commonly used than the other set called *kata-kana*. It is usually used for writing inflectional endings and function words not represented by Chinese characters (*kanji*)." Address: Tokyo, Japan.

4451. Yueh, Jean. 1979. The great tastes of Chinese cooking: contemporary methods and menus. New York, NY: Times Books. A Division of Quadrangle / The New York Times Book Co., Inc. xiv + 302 p. Illust. (line drawings and photos). Index. 24 cm.
• ***Summary:*** "Western food technology is applied to classical Chinese recipes, allowing for the use of the food processor, blender and microwave oven in preparing a variety of Chinese dishes" (from the publisher). The romanization / transliteration is in Pinyin (which means "transcription"). The index contains 8 recipe entries for black beans, salted, 6 for brown bean sauce, 4 each for black bean sauce and for hoisin sauce, 3 each for bean curd and for soy sauce, and 1 for fermented bean curd.

The section titled "Chinese ingredients" (p. 267-80) includes: Bean curd, fresh (2 Cc = 2 Chinese characters are given): Dou-fu. "This ivory-colored, smooth and custard-like product is made from soybean milk..."

"Black beans, salted (2 Cc): Dou-chi–One of the most interesting seasonings, they are salty with a distinct flavor. The beans are available in cans or plastic bags. To store: Will keep indefinitely in a covered jar at room temperature. Tiny white salt crystals may appear after a long period..."

Brown bean sauce (3 Cc): Yuan shai-chi. "Made from fermented soybeans, salt, flour, and water, it is a salty, thick, brownish sauce. When the beans in the sauce are ground up, it is called *ground* brown bean sauce."

Fermented bean curd (red or white) (4 Cc): Fu-ru (Hong, Bai): "Both are pungent and salty in taste, and are used mostly for seasoning or as condiments for Chinese breakfast with rice congee."

Hoisin sauce (3 Cc): Hai-xian-jiang. "Thick, reddish brown sauce made from sugar, vinegar, soybean, salt, flour, fermented rice, chili, and spices."

Soy sauce (2 Cc): Jiang-you. "This is the most important and distinctive seasoning in Chinese cooking." Light soy sauce (or thin soy) (2 Cc): Sheng-chou. Use when you wish to retain the natural color of the food. Dark soy sauce (thick or black soy) (2 Cc): Lao-chou. It has a slightly sweet taste from the caramel that is added for coloring. Use when a dark, rich color is desired.

authority, native of Shanghai and protégé of noted Hong Kong chefs, runs the Jean Yueh cooking school in Berkeley Heights, New Jersey." A portrait photo shows Jean Yueh (inside rear dust jacket). Address: Berkeley Heights, New Jersey.

4452. *Manna Bulletin.* 1979--. Serial/periodical. Meeuwenlaan 70, 1012 JK Amsterdam, Netherlands. Editor: Sjon Welters. Illust. 21 cm. [Dut]
• ***Summary:*** This is a magazine about natural foods, macrobiotics, and alternative lifestyles. Soyfoods Center owns Vol. 3, No. 2 (June 1979), and Vol. 4, No. 3 (autumn 1982). In the former issue, the advisors are Adelbert Nelissen and Willem de Ridder. The editors are Hans den Hoed, Wieke Nelissen, etc. The latter issue contains one article titled "Macrobiotic Economics and the Practice of Manna" (a photo shows Adelbert Nelissen, Manna director), and another titled "Fermented products, an essential supplement to a vegetarian (*plantaardig*) diet." Page 12 shows an ad for Witte Wonder Products (2 Riemerstraat 186, 2513 EZ Den Haag), producers of tofu and seitan.

Talk with Sjon Welters. 1994. April 4. He was once the editor of this publication. He thinks it stopped being published in about 1984-1985. Address: Amsterdam, Netherlands.

4453. Hamilton, William. 1979? The now society (Cartoon). *San Francisco Chronicle.* Undated.
• ***Summary:*** One man, looking like a business executive, is holding a glass in one hand and a spoonful of something in the other. He is facing four other similar-looking executives. The caption reads: "Taste the future, gentleman. It's called tofu."

4454. Soy Plant (The). 1979? [Loan request description and form] (Leaflet). Ann Arbor, Michigan. 2 p. Undated. 28 cm.
• ***Summary:*** Page 1 contains a description of The Soy Plant and the terms of the loan request. "The Soy Plant is a democratically managed producer's cooperative. Our goals are: (1) to provide quality soy products. (2) at a minimal price. (3) with a minimum of exploitation. (4) educate and do research concerning the ecological, nutritional, and plain good eating of soy products. (5) aid and assist others founding community tofu shops.

"The demand for tofu and soy products continues to grow rapidly. The Soy Plant, Ann Arbor's Tofu Shop and Deli, has moved and expanded to meet this demand. Our expansion has meant better community service to a community who has supported us handsomely through our loan program. Our new production facility is a direct manifestation of the capital we have borrowed from you. To continue to realize our goals, we are seeking your funding and involvement in the form of small personal loans of one hundred dollars. We pay interest in tofu.

"Here's how it works: Folks who loan us $100 will receive one pound of tofu a week for each week the loan is with us. The loan is repayable after a minimum of 90 days, subject to the approval of the Soyplant's Board of Directors. We ask that requests for withdrawal be made at least 14 days before payment is desired. Repayments may be deferred by action of the Board of Directors if necessary to insure sound financial management of the Cooperative. Community loans are not secured by the assets of the Soyplant and are subordinate to other debts and obligations of the Cooperative.

"If you deposit money in the bank, you receive 5 3/4% interest and the bank uses your money to do some things you wouldn't want done. You have no control. Loan us your money. We offer 39% interest in monetary value of tofu, and you have a clear idea of what your money is supporting. We are a community minded people who feel the best way to capitalize The Soy Plant would be small loans from the community we serve. If you can help us with a loan, please call.

"The Soy Deli–663-0500."

Page 2 is a boilerplate loan form, with blanks for the date, amount of money borrowed, name, address, and phone number of lender, lender signature, Soy Plant signature. Names of others, if any, authorized by the lender to collect interest.

Talk with Steve Fiering, a founder of The Soy Plant in Ann Arbor. 2000. Dec. 3. The Soy Plant was loaned considerably more than $10,000 by members of the community. The total, which was probably over $20,000, is hard to calculate since loans were often being paid back to some lenders as new loans were made by others. They also used this loan arrangement to move into the facility on Airport Blvd. Prior to 1983, anyone who wanted their money back, got it with no problems–in part because new loans were coming in on a steady basis. The problems started in about 1983 Steve had started studying microbiology and The Soy Plant was experiencing increasingly serious financial difficulties. After The Soy Plant declared bankruptcy, no back loans were repaid. But, Steve thinks, most of the lenders didn't care–but some people were upset. Address: 211 East Ann St., Ann Arbor, Michigan. Phone: (313) 663-0500.

• ***Summary:*** Soyfoods Center has done a 16-page translation of this booklet. Address: Osaka, Japan.

4458. Landsberg, Michele. 1980. Family: 25 pounds later, I'm hanging in. *Toronto Star* (*Ontario, Canada*). Jan. 14. p. D1.
• ***Summary:*** She spent 26 days at the Nathan Pritikin Longevity Center in Santa Monica, California, where she "practised the austere virtues of exercise, a no-fat [sic, low-fat] diet of natural whole grains and vegetables, and a nicotine-free life." It wasn't easy for an "unsaintly" lady, but she lost 25 pounds.

She even learned about a new wonder food, as crazily versatile as the famous "shmoo" of L'il Abner fame. It's tofu! As exulted by Jim White, Star food writer, who transforms it into everything from tofu cheesecake to stir-fried tofu to tofu-garlic dip. She will give recipes next Wednesday.

"Tofu is a bland, creamy soya bean curd which is almost solid protein; 3½ ounces of the cute little wobbly stuff has only 72 calories compared to 347 calories for the same amount of rump roast.

"It's goofy serendipities like tofu that filled up the blank space left by cigarettes and steak."

4459. *Toronto Star* (*Ontario, Canada*). 1980. Tofu takes the cake as dieter's delight. Jan. 16. p. D2.
• ***Summary:*** A half page of tofu recipes tested by the Star Test Kitchen. The source of each is given. For example: Tofu orange almond dessert, from The Book of Tofu by Shurtleff and Aoyagi. Tofu smoothie, from The Tofu Cookbook by Kathy Bauer and Juel Andersen. Tofu cheesecake, from the Soja Restaurant, which will soon open on Kensington Ave.

An illustration shows a slice of Tofu cheesecake.

4460. White, Jim. 1980. Close encounter of the tofu kind: A white custardy thing zooms out of the Orient onto your lunch counter. *Toronto Star* (*Ontario, Canada*). Jan. 18. Family section.
• ***Summary:*** This full-page feature states: "Brace yourself, Toronto, for the experience, because there's every indication tofu's going to do more than hover on the horizon like a fleet of sci-fi spacecraft." Victor Food Products in Scarborough [a suburb of Ontario] says that sales of tofu have nearly tripled in one year, from 720 lb/day to more than 1,900 lb/day. Shoppers can now buy tofu in selected Dominion, Lowlaws, Miracle Mart, and A&P outlets. "When the big boys take a bite of the action, you know something is cooking."

The article includes a listing of tofu makers and retailers in the Toronto area. Makers: (1) Pyung Hwa Co., 2139 Dundas St. W. Jhasun Koo. Phone: 534-0237. Korean-style tofu. Firm, 10-oz. cakes cost $0.55. (2) Wah Chong Co., 88 Ossington. Phone: 532-0841. Chinese style. $1.20/dozen. (3) Yet Sing Co., 11 Baldwin St. Phone: 863-0818. Custardy tofu. $0.70/dozen. (4) Victor Food Products. A photo shows Stephen Yu, standing with has packaged tofu and soymilk products.

Paul Smith, owner of Baldwin St. Natural Foods, runs a small night class once a month on making tofu. Branson Hospital (Seventh-day Adventist) has been serving vegetarian meals to patients for 22 years. Much of the protein comes from soyamilk, soya curd, and other soya products. Interest in tofu has been spread by the publication of *The Book of Tofu*, by William Shurtleff and Akiko Aoyagi. Address: Star Food Writer.

4461. Beard, James. 1980. A vegetarian's lunch need not be dull. *Toronto Star* (*Ontario, Canada*). Jan. 23. p. D6.
• ***Summary:*** "Ten years ago, few people would have

4464. ASEAN Sub-Committee on Protein. 1980. ASEAN Protein Project. Bangkok, Thailand. 24 p. Jan. Illust. 29 cm. [Eng]
• ***Summary:*** Contents: Introduction (incl. history, programs, and budget). Administration (incl. list of workshops held by the ASEAN Sub-Committee on Protein). Research and development. High-protein low-cost foods. Full-fat soy flour (a plant at Chiang Rai, northern Thailand, produces 100 tons/month). Fermented foods (incl. soy sauce). Soy products (incl. tofu). ASEAN network (directory).

"The ASEAN Protein Project was conceived at a joint research project on soybeans and protein-rich foods at the first meeting of the ASEAN Permanent Committee on Science and Technology held in August 1971 in Indonesia. Meetings of food specialists soon followed, one in September 1972 in Malaysia and another in November 1972 in Indonesia. At a further meeting in August 1974, involving Australian technical experts, four areas for research co-operation were identified, namely: (1) Identification, development, and utilisation of low-cost, protein-rich foods for children and other vulnerable groups. (2) Processing and utilisation of full fat soy flour (3) Improvement of fermentation technology; and (4) Microbiological culture collection.

Workshops held by the ASEAN Sub-Committee that concern soya include: 1st Workshop on soy products (1976, Kuala Lumpur, Malaysia). 3rd Workshop on culture collection (1977, Bangkok, Thailand). 4th Workshop on soy sauce manufacturing techniques (1978, Singapore). 5th Workshop on solid substrate fermentation (1978, Bandung, Indonesia). 8th Workshop on extruder technology (1980, Bangkok, Thailand).

Photos show: (1-4) Participants, meetings, and tours. (5-6) Full fat soy plant at Chiang Rai, Thailand. (7) Commercial soy sauce factory. Address: Bangkok, Thailand.

4465. Shurtleff, William; Aoyagi, Akiko. 1980. Making money making tofu. *East West Journal.* Jan. p. 18-24.
• ***Summary:*** Describes how to start a tofu company. Contents: Introduction. Key resources: Soycrafters Association of North America, Bean Machines Inc., Soycrafters Apprenticeship Program, the book *Tofu and Soymilk Production,* list of all tofu shops and soy dairies in the West (free from New-Age Foods Study Center). First steps in getting started. Doing a market survey. Determining the type of shop. Making other soyfoods (from tofu or soymilk). Running a retail outlet, soy deli, or restaurant. Obtaining a building and equipment. Putting it all together.

"There are now about 160 tofu shops and soy dairies in the United States (compared to 38,000 in Japan). More than 100 of these have opened during the past three years." Illustrations (line drawings) show: Sangen-Ya tofu shop in Tokyo. A tofu burger–"Watch out Big Mac." Photos show Shurtleff and Aoyagi. Address: New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549.

4466. **Product Name:** Tofu.
Manufacturer's Name: Swan Gardens.
Manufacturer's Address: 1111 N.W. 22nd., Miami, FL 33127. Phone: 305-538-7751.
Date of Introduction: 1980. January.
How Stored: Refrigerated.
New Product–Documentation: Needleman. 1981. *Soyfoods.* Summer. p. 26-27. "Tofu plant profiles: Swan Gardens, Miami." The firm tofu is vacuum packed.

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Dick McIntyre, who lived at 940 17th St., Miami Beach, FL 33139.

FIND/SVP. 1981, May. "The tofu market: Overview of a high-potential industry." p. 76. The company now makes about 9,000 to 10,000 lb/week of tofu in 1 lb vacuum packs. The typical supermarket price for their tofu is 99 cents. Approximately 95% of their tofu is sold through health food stores and restaurants. Note: This company came to Florida from Montana.

Talk with Steve Yurman, owner of the Soy Shop in Atlanta. 1989. Nov. 8. McIntyre is very secretive and doesn't help others, and sometimes hasn't paid those to whom he owes money. Steve heard that the reason McIntyre had to leave Florida was that he got into a dispute with Publix, a big Florida supermarket chain, and they dropped him. So he had

© Copyright Soyinfo Center 2013

to move. Steve's company owned the Atlanta tofu market until Calco moved in, followed by Swan Gardens–with all its fancy equipment. Both of those companies, instead of working to expand the market, went after Yurman's market with low prices. In the fall of 1981 the Yurman's moved their company to 1863 Memorial Drive S.E. in Atlanta.

• ***Summary:*** "New England Soy Dairy Fresh Tofu–bean curd–1 lb pkg. 89¢"

4468. Kalish, Jon. 1980. Let 'em eat tofu. *Soho Weekly News.* Feb. 6. p. 5.
• ***Summary:*** "This spring a dozen schools with heavy populations of Seventh-day Adventists, observant Jews and Muslims (all of whom follow strict dietary laws regarding meat) will be served meals prepared with tofu. Initially the experiment will involve about 2,000 kids. The New England Soy Dairy has already begun teaching school lunch personnel how to prepare tofu burgers, tofu fish cakes, tofu egg salad, and tofu Parmesan." Tofu is also served in schools in Rochester, New York, and Santa Barbara, California.

4469. Giuca, Linda. 1980. It's tofu: You can steam it, fry it, broil it, bake it, simmer it or eat it uncooked. *Hartford Courant* (*Connecticut*). Feb. 13. p. 1A.
• ***Summary:*** The first thing people ask when they see a cake of tofu is "What do I do with it?" The bland-tasting, cream-colored soy food has a custardy consistency. "Tofu (pronounced toe-foo) has been a staple in Oriental diets for centuries; to the Chinese it is 'meat without bones.'" Some Americans know tofu under other names such as "bean curd" or "soybean cake."

From tofu you can make garlic salad dressing, tofu burgers, chocolate creme pie, lasagna, batter-fried tofu with vegetables, or a frozen treat on a stick.

Maria Orefice, a vegetarian and owner of Garden of Eating on Jefferson St., features some tofu recipes on her menu. She learned how to make tofu at home when William Shurtleff and Akiko Aoyagi, authors of *The Book of Tofu* (Autumn Press) stayed with her during a visit to Hartford in 1976. Now she teaches classes in making and cooking with tofu at her restaurant.

Photos show two views inside the New England Soy Dairy in Greenfield, Massachusetts, where about 20,000 pounds of tofu are made each week: (1) Many packages of tofu being cooled in ice water. (2) Soybeans being soaked in water in large vats. Contains four tofu recipes: Breaded tofu, Protein pops, Chocolate creme pie, and Chili con tofu. Address: Food editor.

• ***Summary:*** "Its the year of the monkey!–4678. You're all invited to join in the celebration of Chinese New Year."

"New England Soy Dairy–Tofu (bean cake). A high protein soybean product with the consistency of cottage cheese. Can be kept for several days, covered with water, under refrigeration. (Recipes). 1 lb pkg. 89¢."

4471. Mashburn, Rick. 1980. From beans to 'cheese.' *Sentinel* (*The*) (*Winston-Salem, North Carolina*). Feb. 15. p. 7. [1 ref]
• ***Summary:*** About Jerry MacKinnon and Bean Mountain Soy Dairy of Boone, North Carolina. The shop makes 1,000 lb/week of tofu plus some tempeh and soymilk. MacKinnon left a tofu business he started in Ann Arbor with four other people 2 years ago when it grew too big. "MacKinnon seems reluctant to start sermonizing on the virtues of tofu. He'd much rather hand out a copy of a chapter from *The Book of Tofu*, by William Shurtleff. Crowell, however, is a more zealous missionary." Concerning the future of tofu, he notes: "As soon as General Foods realize Americans are gonna eat tofu, we'll be out of business." Four photos show Jerry MacKinnon, with beard and hat, cooking 50 lb of ground soybeans in steam-jacketed cooker. A portrait shows Marc Crowell. A label for the company's tofu product.

4472. Leonard, Mary Anne. 1980. Tofu: Finding its place in America. *Knickerbocker News.* Feb. 19. p. 1B.
• ***Summary:*** About the New England Soy Dairy. Contains 5 tofu recipes, and 2 photos of tofu being made at the company's plant in Greenfield, Massachusetts. Address: Staff reporter.

4473. Loblaws. 1980. 1/3 off sale (Ad). *Toronto Star* (*Ontario, Canada*). Feb. 20. p. A13.
• ***Summary:*** Near the right center of this full-page grocery store ad: "ToFu (soya bean curd) product of Ontario, package 79¢" Address: Toronto.

4474. New-age Foods Study Center. 1980. Catalog of publications & materials by William Shurtleff & Akiko Aoyagi [mail order]. P.O. Box 234, Lafayette, CA 94549. 20 panels. Feb. 20.
• ***Summary:*** This catalog, folded like a road map, is printed with brown and dark orange ink on white paper. The Japanese-style logo is waves and a moon in a circle. In addition to the many books and pamphlets in the previous catalog, the following have been added: Soyfoods: Protein source of the future... now (1 panel). Many quotations from book reviews. Books about world hunger (1 panel). New-Age Foods Study Center (1 panel). About the authors (1 panel, autobiographical). Photos show William Shurtleff & Akiko Aoyagi. Address: Lafayette, California. Phone: 415-283-3161.

4475. Upton, Kim. 1980. Tofu may be the new revolutionary food of the '80s. *Dallas Times Herald.* Feb. 21.
• ***Summary:*** "Tofu absorbs flavors beautifully and acts in harmony with whatever it accompanies." "Jo Mildyn, cook with Small Planet Catering in Chicago, recently taught a class in cooking tofu. And from her students learned to fashion tofu into eggless nog, cheesecake and a dip for snacking." Contains 3 of Ms. Mildyn's tofu recipes. Address: Chicago Sun-Times wire.

4476. Cone, Joe. 1980. Tip of the tongue [Tempeh and Surata Soyfoods]. *Oregon Daily Emerald.* Feb. 22. [1 ref]
• ***Summary:*** Combines an introduction to tempeh with a description of how it is made by Benjamin Hills of Surata Soyfoods, a cooperatively owned food business with 6 full-time members in dowtown Eugene, Oregon. Surata now makes 300 10-ounce bags weekly; each wholesales for $0.80. "Surata tempeh is available in the freezer case of most food and community markets in Eugene, including the University Food-Op. The Homefried Truckstop and Zoo-Zoo's Cafe regularly feature tempeh and tofu dishes."

4477. *Time.* 1980. Climbing curd. Feb. 25. p. 62.
• ***Summary:*** "Tofu, or bean curd, a custard-like cake made from curdled soybean milk, was a favorite of Taoist priests in ancient China. Now Americans are learning to use the nearly tasteless curd (flavoring must be added) to replace cheese in cheesecake and meat in burgers. A 4-oz serving of tofu has nearly as much protein as an equal amount of hamburger but fewer calories (150 vs. 237) and no cholesterol. At $0.99 per lb, it is also cheaper. One large supplier, the New England Soy Dairy, Inc. of Greenfield, Massachusetts, peddled 300 to 500 lbs of curd a week in 1977, its first year. It now sells 25,000 lbs a week."

4478. Hope, Jane; Bright-See, E. 1980. Tofu: Nutritionally its the ideal food. Nutrition matters. *Toronto Star* (*Ontario, Canada*). Feb. 27. p. C3.
• ***Summary:*** Discusses the many virtues of tofu.

4479. Calkins, P.H.; Wang, H.M. 1980. Improving the marketing of perishable commodities: A case study of selected vegetables in Taiwan. *AVRDC Technical Bulletin* No. 9 (78-86). 60 p. (Shanhua, Taiwan).
• ***Summary:*** Table 3 (p. 8) shows that the area planted to soybeans in Taiwan has decreased from 51,300 ha in 1966 to 35,500 ha in 1976. The soybean's percentage of total cropped area has decreased from 3.04% in 1966 to 2.21% in 1976. However the yield has increased by 21% (no actual yield figures are given) and the price per ton has almost doubled.

Fig 2 (p. 9) gives the expenditures per household per year from 1973 to 1976 on hard soybean curd ($9/yr), soybean curd (regular; $7/yr), and soybeans ($0.50/yr). All are roughly static. Fig. 4 (p. 10) shows the seasonal pattern of consumption of these three foods.

Table 6 (p. 15) shows the dramatic increase in dry soybean imports, from 472,212 tons in 1969 to a record 1,654,874 tons in 1975. Address: AVRDC.

4480. **Product Name:** [Tofu].
Foreign Name: Queso de Soya.
Manufacturer's Name: Centro de Soya, Soy Dairy.
Manufacturer's Address: Barrio San Bartolo, Molino Belen, Solola, Guatemala; Apartado Postal 118, 07091 Solola.
Date of Introduction: 1980. February.
Ingredients: Water, soybeans, coagulant (nigari or vinegar).
Wt/Vol., Packaging, Price: 8 oz and 16 oz cakes are wrapped in large leaves.
How Stored: Unrefrigerated and perishable.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). "Solola Soy Dairy, c/o Clifford Figallo, Molina Belen, Solola, Guatemala. Run jointly with members of The Farm, Tennessee."

4481. Fiering, Steve. 1980. Boilers for beginners. I. Boiler basics. *Soycraft* (*Colrain, Massachusetts*) 1(2):13-15. Winter.
• ***Summary:*** An extremely interesting and useful introduction to almost everything one needs to know when using a boiler in food preparation, with numerous mathematical calculations.

"The boiler is one of the most important, expensive, complicated, and potentially dangerous soycrafting tools. A competent soycrafter must always relate to the boiler in a very 'aware' fashion.

"We need first to understand why using a boiler steam cooking system is the most widely used system for making tofu commercially. The idea is simple: steam cooking enables us to put quickly a lot of heat into the puree without subjecting it to high temperatures that scorch it and give it a burned taste. We must understand the difference between heat and temperature. Putting heat into the puree quickly is our goal. Temperature is the measure of the concentration of heat in matter and describes which way the heat will flow. Heat always flows from a higher temperature material into a lower temperature material. Heat is measured in British Thermal Units, or BTUs. One BTU is the amount of heat needed to raise the temperature of one pound of water by one degree Fahrenheit. We do not need to have large temperature differences in order to put large amounts of heat into the puree quickly."

4483. Fox, Madeline. 1980. Bringing tofu in the front door: An approach to institutional marketing. *Soycraft* (*Colrain, Massachusetts*) 1(2):34-35. Winter.
• ***Summary:*** "Many of us in the tofu industry have pondered the ways and means of marketing, such as, health foods market or chain stores, packaged tofu or bulk, and should we pursue the institutional market. This market of hospitals, colleges, nursing homes, and others, is one where we know tofu could flourish for reasons of its healthfulness, versatility, nutritional profile, and low cost. In a business that's ruled by budgets and setbacks, as the institutional field is, a food that can help cut costs and create a better diet is in great demand. Rising costs have made many institutions more aware of the urgency of finding low-cost but high quality foods.

"At New England Soy Dairy we decided to plant the tofu seed in institutions and to create a demand for the product through teaching them to become familiar with tofu. We were timid at first because of our nonexistent track record and we found ourselves caught in the Side-Door Syndrome. This began first with the food buyer, to whom we gave samples, recipes, and literature, only to have him send us to the food service supervisor (head cook). We once again handed him samples and our materials but learned he felt his hands were tied and we should see the dietician. We went through our spiel with her; she approved, but sent us back to the food buyer again. This is time-consuming, costly, with meager results, and just a little frustrating.

"We were fortunate in meeting Helene Rocket, a dietician at the University of Massachusetts at Amherst. She had experience in the health foods field; she had an understanding of institutional-style recipes, and a good working knowledge of food preparatory techniques. Ms. Rocket was instrumental in our developing a professional approach to the institutional market, most notably in our marketing package. This is a package that we can distribute at one time to the food buyer, the food service supervisor, and the dietician. This is what it contains: (1) a separate cover letter to each department that addresses its specific needs and viewpoint; (2) thirty recipes scaled up in quantities of fifty, one hundred, and two hundred, with a nutritional breakdown for each; (3) three categories for tofu are presented, including tofu in the salad bar, tofu as the main course, and tofu as an extender with other protein foods; (4) a cost comparison between tofu and beef, chicken, eggs, and cheese; (5) a nutritional comparison chart for tofu, beef, chicken, cheese, and cottage cheese; (6) newspaper and magazine articles about the soyfoods movement that emphasize the irresistibility of tofu as a food of the future; and (7) a special section devoted to the digestibility and utilization of tofu in special diets, including lactose intolerance, diabetes, hyperglycemia, high blood pressure, weight control, and heart problems.

"Many of our prospective institutional accounts include hospitals, convalescent homes, out-patient clinics, and senior citizen food services. Tofu greets these people as a flexible and inexpensive alternative to their costly special diets, and I would like to relate here a few of our successes. This past summer, Silers Corporation, a food service company near Boston, that deals with hospitals and nursing homes, sent a nutritionist intern out to our area for a summer project. Her goal was to see how tofu would fit into the hospital context. The intern developed tofu recipes and tested their popularity among staff and patients (with a positive outcome) and wrote a report about her findings. We are encouraged that a company such as Silers saw enough future in tofu to spend time and money on this exploratory project; they now have several institutional tofu customers.

"Recently we were asked to conduct tofu demonstrations for the Food Service supervisor for the elementary schools, New York City Board of Education..." Address: Marketing Director, New England Soy Dairy, Greenfield, Massachusetts.

4484. **Product Name:** Island Spring Smoke Flavored Soyloaf (Okara & Wheat).
Manufacturer's Name: Island Spring, Inc.
Manufacturer's Address: P.O. Box 747, Vashon, WA 98070.
Date of Introduction: 1980. February.
Ingredients: Soybeans (organic), whole wheat flour, soybean oil, water, dried yeast, Dijon mustard, salt, natural distilled wood smoke, spices, garlic oil.
Wt/Vol., Packaging, Price: 1 lb tray. Wholesales for $1.04.
How Stored: Refrigerated or frozen.
Nutrition: Per 2 oz.: Calories 179, protein 8 gm, carbohydrate 9 gm, fat 13 gm.
New Product–Documentation: Spot in Soycraft. 1980. Winter. p. 12. "New Soy Products on Market." Label. 1981. 5 by 4 inches. Plastic. Brown and tan on clear. Gives serving suggestions. Article in Soyfoods. 1981. Summer. p. 41. They make 500 lb/week. A detailed description of the ingredients and process is given. Talk with Luke Lukoskie. 1987. Oct. 19. This product contained okara and wheat, but no whole soybeans and no tofu.

4485. Leviton, Richard. 1980. Soyfoods and the media: Soyfoods are beginning to fascinate newspaper and magazines across the country and major television coverage is bound to follow soon. *Soycraft* (*Colrain, Massachusetts*) 1(2):56-59. Winter.
• ***Summary:*** Discusses coverage of soyfoods, especially

© Copyright Soyinfo Center 2013

tofu, in major American magazines and newspapers, with an analysis which publications ran stories and how these stories are covered. Photos show: (1) Norman Holland being interviewed by a lady with a microphone at the Rochester Soy Deli in New York. (2) A TV cameraman, holding the camera on his shoulder, as he shoots the Soy Deli; Bill Shurtleff is in the background. (3) A collage showing the headlines of major media articles.

The cover photo for this issue, which is connected with this article, shows Jeremiah Ridenour and Akiko Aoyagi Shurtleff seated at a wooden table at the Rochester Soy Deli. On the table are ten different menu items served on small plates, each featuring one or more soyfoods. Address: Colrain, Massachusetts.

4486. Leviton, Richard. 1980. Out of the feed trough and onto the dinner plate: The beanfield (Editorial). *Soycraft* (*Colrain, Massachusetts*) 1(2):3. Winter.
• ***Summary:*** This editorial begins: "Tofu is gradually working its humble way into the pages of the national press and onto the dinner plates of the American mainstream consumer."

"Each week, *Soycraft* receives two dozen newspaper clippings from regional and local papers from all over the country, often from communities or states where there is no tofu producer. Tofu is penetrating the Midwest, the South, the western mountain states, through widespread distribution. Home economists and county extension agents write knowingly in their columns about the uses of tofu in family meals, as an inexpensive food 'worth trying.' Nearly every month now a mass circulation magazine devotes attention to tofu, and one need only compile the circulation figures to appreciate the vast numbers of Americans who are becoming informed through the press." Address: Colrain, Massachusetts.

4487. Leviton, Richard. 1980. Soycrafters Conference: The birthing of a new industry. Director's report: Missed all the meals. *Soycraft* (*Colrain, Massachusetts*) 1(2):16-23. Winter.
• ***Summary:*** A report on the Second Soycrafters Conference, held 26-29 July 1979 at Hampshire College, Amherst, Massachusetts. Over 50 workshops and lectures were presented on all phases of the soyfoods industry. "Miraculously, the $19,000 conference broke even financially, and attracted significant national press in the following three months."

The section titled "The view from the guests" (p. 20-23) contains brief statements (all positive) about the conference from the following attendees: Luke Lukoskie (Island Spring), Rebecca Uchida (Mu Tofu Shop), Michelle Ajamian (Amesville, Ohio), Shag Kiefer (Redbud Creek Tofu), Will Truslow (Jamaica Plain, Massachusetts), Dr. Joseph Rakosky (Rakosky Services, Melrose, Illinois), Marvel Huffman (Lecanto Tofu), Francine Watanabe (La Soyarie, Hull, Quebec, Canada), Dr. Charles Howes (Loma Linda Foods, Mt. Vernon, Ohio), Timothy Metzger (Dannon Milk Products, Long Island City, New York), Lee Cunningham (Wonder Life Corp., Des Moines, Iowa), Joseph Jaffer (Waymart, Pennsylvania), Chico Wagner (Yaupon Soyfoods), Dr. Malcolm Bourne, Frank Pilotte (Golden Key Farm, Grant Park, Illinois), David Patten (Brightsong Tofu, {Redwood Valley}, California), Patti Smith (Erewhon, Cambridge, Massachusetts), Larry Needleman (Bean Machines, Bodega, California), Peter Driscoll, Goodhart Foods (Petosky, Michigan), Bill Shurtleff (New-Age Foods Study Center), George Strayer (Agricultural Exports, Hudson, Iowa), David Blumberg (San Francisco, California), Dr. Keith Steinkraus (Cornell Univ., Ithaca, New York), Bob Bergwall (Nasoya Foods, Leominster, Massachusetts).

Photos show: (1) Overview of the conference registration hall incl. Richard Leviton talking with George Strayer. (2) Kathy Leviton adding finishing touches to large trays of tofu cheesecake. (3) A woman preparing scrambled tofu and fried soysage patties in the Hampshire College kitchens. (4) Members of Okita Enterprises and the Tennessee Farm: Charles Ishigawa, Robert Dolgin, Eddie Okita, and Michael Moorman. (5) Dr. Walter Wolf (Northern Regional Research Center, Peoria, Illinois). (6) Robert Rodale, Rodale Press, Emmaus, Pennsylvania. (7) Dr. Malcolm Bourne, Cornell University, Geneva, New York. (8) Michael Cohen, holding a baby and talking with Dr. Clifford Hesseltine.

Note: This is the earliest publication seen (Feb. 2003) that mentions Brightsong Tofu. Address: Colrain, Massachusetts.

4488. Leviton, Richard. 1980. Sanitary practices and soyfoods production. *Soycraft* (*Colrain, Massachusetts*) 1(2):24-31. Winter. [8 ref]
• ***Summary:*** Discusses: Bacteria, on overview. Six bacterial families. The view from the health department: "In Massachusetts the following serve as guidelines for evaluating tofu: 1. Total plate count: no more than 100,000 colonies/gm product. 2. Total coliform: no more than 100 colonies/gm product. 3. *Staphylococcus:* no "coagulase positive" Staph. Coagulase negative Staph. do not cause food poisoning. 4. Minimal enteric (human intestinal) bacteria, e.g. *Escherichia coli.* 5. Zero or very low product tolerance for pathogenic organisms, depending on the type, e.g. *Salmonella, Klebsiella, Shigella.* 6. Holding temperature of product less than 40ºF or greater than 150ºF." These are compared with milk standards. Recommended building, floor, and drain specifications are discussed. For unpasteurized tofu, the Massachusetts Dept. of Public Health recommends a 7-8 day shelf life, and would like to see (1) a maximum allowable bacterial count established for soyfoods, and (2) what are the ideal lowest counts achievable under good manufacturing practices.

© Copyright Soyinfo Center 2013

Setting up an in-house sanitation laboratory. Last summer New England Soy Dairy employed Amy Braveman, an undergraduate in microbiology and chemistry at the Univ. of Mass. to set up such a lab. Details and photos are given. Typical pH values on the soymilk production line are: bean soak water 6.5, slurry 6.7, soymilk 6.6, tofu curds 5.9. Actual plate count and coliform count for various pieces of equipment and stages in the tofu manufacturing process are given. Phase II of the companies total sanitation program is discussed. Address: Colrain, Massachusetts.

4489. Leviton, Richard. 1980. Tofu production problems: Nigari person as shop coordinator. *Soycraft* (*Colrain, Massachusetts*) 1(2):42-49. Winter. [1 ref]
• ***Summary:*** "The craft of making nigari tofu in the commercial shop is a blend of precision and intuition, and the nigari person emerges as a key production component."

"Traditionally, aspiring tofu apprentices in Japan will train for six years with a tofu master, learning the subtleties and vagaries of coagulating soymilk. They will study the effect of the amount of soybeans and water, the influence of the weather, correct stirring methods, nuances in cooking and soymilk extraction, and the role of mental alertness and physical stamina in the daily production sequence. This information is imparted under the careful supervision of a person who thoroughly understands the art and process of making tofu and who has a coherent body of accumulated knowledge to pass on to students.

"In the West there are few tofu masters available and most aspiring American tofu makers have had to rely on a blend of Yankee ingenuity, intuition, book-derived suggestions, and day-to-day experience, which, examined over a period of a year or two, begins to yield a pattern, and facts and principles about tofu making can be deduced. But to reach this stage involves fumbling, frustration, countless pounds of inferior tofu, and bafflement. It becomes a matter of perception: there is a problem but is it in the mechanical system or is it something I, as nigari person, am doing? For example: oversoaked or undersoaked soybeans can throw off soymilk solids levels and tofu bulk yields. The inexperienced nigari person will attribute the low tofu yields to his own supposed incompetence whereas it is actually traceable to the mechanical system, something that went wrong before he even started working that day. At Laughing Grasshopper it took us many anguished months to stop blaming ourselves for faults in the system. When you can focus on where the problem originates, this means you are beginning to understand the nigari process.

"This perceptual work is contingent on the comparative sophistication of the production system you are working with. The more advanced and automated your equipment, the less variables you have that can throw the production sequence out of kilter, while the more primitive, labor-intensive the system, the more places there are for the nigari process to be upset. At this point, a fair amount of the 'craft' of tofu-making, which is in large measure an ability to deal successfully with the panoply of variables, is transferred to the automated equipment. The production logic is to eliminate as many variables as possible to facilitate the production of a uniform, consistent tofu, every day, every season.

"After twenty-two months of self-instruction in nigari technique, we tofu-makers at Laughing Grasshopper believed we had accumulated a concrete body of knowledge that we could actually impart to new nigari apprentices in a systematic, articulate manner. we could now draft a four-week training program..." Address: Colrain, Massachusetts.

4490. Leviton, Richard; Shurtleff, William. 1980. Estimates of production and sales of tofu and other soyfoods in the USA and Canada (News release). Soycrafters Assoc. of North America, 305 Wells St., Greenfield, Massachusetts 01301. 1 p. Feb.
• ***Summary:*** Early statistics compiled on the U.S. soyfoods industry: 188 tofu companies, employing 680 people, used 13,500,000 lb of soybeans to produce 33,750,000 pounds of tofu that retailed for $33,750,000.

Other soyfood manufacturers (including 27 tempeh companies and 5 miso companies), employing 225 people, used 4,500,000 lb of soybeans to produce 11,250,000 pounds of other soyfoods that retailed for $11,250,000. The figures were compiled largely by Shurtleff, who gave Soycrafters Assoc. permission to use them. On 8 Feb. 1980 Leviton also sent a letter to Linda Madl, Soybean Bluebook, American Soybean Assoc. with a request to publish these statistics; she never did. Address: 1. Sunrise Farm, Heath Rd., Colrain, Massachusetts 01340; 2. New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549.

• ***Summary:*** Discusses Northern Soy and the Rochester Soy Deli. Address: 100 Heath Rd., Colrain, Massachusetts 01340.

4492. Lu, J.Y.; Carter, Eloise.; Chung, R.A. 1980. Use of calcium salts for soybean curd preparation. *J. of Food Science* 45(1):32-34. Jan/Feb. [9 ref]
• ***Summary:*** Adding the coagulant is a delicate step in the preparation of soybean curd. The most widely used calcium salt is calcium sulfate. In this study the use of other calcium salts (calcium chloride, calcium lactate, calcium acetate, calcium carbonate, calcium phosphate, calcium hydroxide, calcium gluconate) and two noncalcium coagulants (glucono-delta-lactone and acetic acid) were investigated.

Calcium acetate received the highest taste panel scores; glucono-delta-lactone got the lowest. Address: Food Science and Nutrition Dep., Tuskegee Inst., Tuskegee, Alabama 36088.

4494. McGregor, Otis. 1980. Report from Ontario [Soya-Bean Growers' Marketing Board]. *Soycraft* (*Colrain, Massachusetts*) 1(2):10-11. Winter.
• ***Summary:*** "The Ontario Soya-Bean Grower's Marketing Board is a growers' board. In 1949, soybean growers in Ontario petitioned the Agriculture Department to establish a marketing plan and soybeans were declared as a regulatory commodity under the Ontario Farm Products Act. Soybean production in Ontario started in tests plots at the Ontario Agricultural College, Guelph, in 1893. By 1927, O.A.C. evaluated over 100 varieties. The Harrow Research Station began soybean plots in 1923 and later produced such varieties as Harman, Hardome, Harasoy, Harlan, Harcor, Harwood.

"Soybean acreage in Ontario competes with field corn."

Soybean production in Canada is 98% of Ontario origin. Ontario is deficient in production to meet the needs of the three crushing plants which now possess a daily production capacity of 3,550 tons. To be self-sufficient, production would require 1.2 million acres. Last crop year, the Ontario crushers purchased 13 million bushels from the U.S. which enter Canada tariff-free.

"In 1954, the Board, endeavoring to achieve greater competition in the marketplace, exported soybeans to Europe. In 1974, with the variety Harwood, the Board entered the human consumption market in Japan. Harwood, having a greater water-soluble protein, soon became distinguished in that market for tofu and miso.

"The Board negotiates on behalf of its 16,000 growers, the terms and condition of sales from the farm-gate to dealers and processors."

"Editor's note: Soybeans that the Board markets, suitable for tofu-making, include Hodgson, Wells, Harosoy 63, Harcor, Amsoy 71, Maple Arrow, and Evans." Address: Secretary-Manager OSBGMB, Box 1199, Chatham, ONT Canada N7M 5L8, Canada.

4495. **Product Name:** Tempeh.
Manufacturer's Name: Monterey Bay Soyfoods.
Manufacturer's Address: 335 Pennsylvania Ave., Santa Cruz, CA 95062. Phone: 408-423-2256.
Date of Introduction: 1980. February.
How Stored: Refrigerated.
New Product–Documentation: Talk with Jeremiah Ridenour. 1988. Aug. 31. This was the first commercial soy product made by Jeremiah or by Monterey Bay Soyfoods.

4496. *Plenty News* (*Summertown, Tennessee*). 1980. Soybeans in the Third World. 1(4):4-5. Winter.
• ***Summary:*** "Soy dairy [in Guatemala]: The village soy dairy in San Bartolo is now complete. The building was constructed during the summer and fall of 1979 in conjunction with the men of the community. The inauguration for the 22 by 44 foot soy dairy occurred on February 15, 1980."

"Several hundred local people and officials attended and enjoyed the festivities and free ice bean. Augustin Xocuic, (pictured above) President of the San Bartolo Community Association, spoke warmly of the cooperation and help given by Plenty."

"The dairy has a split-level design for gravity feed production and also contains a sawdust stove for water heating."

"The dairy is capable of producing 200 pounds of tofu and 35 gallons of ice bean daily. Some will go out free to schools. We will be test marketing the soy products to determine the viability of the soy dairy as a self-sustaining cottage industry.

"The construction of the dairy was a community effort on the part of the people of San Bartolo. Training in soy dairy management will also involve interested members of this community."

"This pilot project has drawn a great deal of interest from other international organizations."

"Tofu is a complete protein and when it is served with a grain food like tortillas or bread it has even more protein value. Ice bean is naturally the popular way to eat the 'Noble Bean'."

Lesotho: "During 1979 Plenty introduced soybean in Lesotho. A demonstration of soy technology for home use was held at the National Agricultural Show in Maseru last June. The booth sparked much interest. Soy demonstrations have been held in the Sebapala villages and were met with acceptance and enthusiasm.

Photos show: (1) The soy dairy equipment being loaded for shipment to Guatemala. (2) Augustin Xocuic of San Bartolo talking with two people from Plenty. (3) A Plenty volunteer and a Guatemalan stirring soymilk with a wooden paddle. (4) A view of the new soy dairy in San Bartolo from the outside. (5) Two little Guatemalan girls enjoying soy ice cream on a cone. (6) A Plenty volunteer (Suzy Jenkins) and a Guatemalan woman each demonstrating tofu on a tortilla. "At the annual fair in the square in Solola, we were invited to set up a booth featuring tofu on tortillas. On the first day we 'sold out' in half an hour... on the second day it all sold out in ten minutes." (7) A Plenty volunteer (man) standing behind a long wooden table on which are soyfoods and simple equipment for making them at home. Looking on are 6-8 people from Lesotho. (8) A Plenty volunteer and

• ***Summary:*** "This past growing season, New England Soy Dairy sponsored the cultivation of 30 acres of soybeans in Franklin County (western Massachusetts)." The company used 1 million lb of soybeans in 1980.

4499. *Soycraft* (*Colrain, Massachusetts*). 1980. Soybeans for sprouting [from Rodale Press' Organic Gardening & Research Center]. 1(2):9. Winter.
• ***Summary:*** "Those who have sprouted soybeans, at home or commercially, have probably noted that they tend to be more problematical to sprout than other smaller seeds. Partly in recognition of this difficulty, and pursuing the possibility that raw soybeans may have a cancer inhibitory effect, the Organic Gardening and Farming Research Center in Kutztown, Pennsylvania, is actively developing lines of small-seeded soybeans suitable for home or commercial sprouting. The following report was submitted by Anne Duncan Edwards, researcher for Rodale Press:

"We feel that the soybean has potential as a sprouting bean because of its high nutritional value, its ease of cultivation, and its range of climatic adaptability. Varietal selection now needs to be researched for type suitability. The small-seeded soybean plots here are made up of yield trials and seed increases for some of our more promising sprouting soybean types. These varieties were chosen from 111 different soybeans grown in 1978 that included varieties from Korea, Indonesia, Taiwan, and the United States.

"Size is one important factor considered in the evaluation of these soybeans for sprouting purposes. Differences among varieties can easily be seen by observing the weight (in grams) of 100 beans of each type. Corsoy, a commercial bean, weighs between 17 and 19 grams per 100 seeds. Varieties being considered for sprouting include: No. 11, Korean, 6-10 gms; No. 46, USA, 5-6 gms; No. 48, USA, 8-9 gms; No. 17, Korea, 9-11 gms. Also considered is attractiveness, taste, and agronomic characteristics. Results of last year's yield trials are not yet available, but many of the beans set large numbers of well-filled pods.

"The soybean project for next season is being expanded to include sprouting bean, vegetable bean, and tofu bean variety trials. Our plot work will be closely linked to the Test Kitchen in Emmaus, where taste testing, recipe formulation, and suitability for tofu-making will be analyzed. We hope to add many more varieties to our collection for next year's research and are currently in the midst of a search for suitable types.

"For more information write: Organic Gardening & Research Center, P.O. Box 323, RD 1, Kutztown, PA 19530."

4500. *Soycraft* (*Colrain, Massachusetts*). 1980. Soyfoods deli update. 1(2):10. Winter.
• ***Summary:*** Discusses Yellow Bean Trading Co. (Detroit, Michigan), The Tofu Shop (Rochester, New York), and The Cow of China (Boulder, Colorado), and The Soy Plant Deli (Ann Arbor, Michigan).

"The Yellow Bean Trading Company of Detroit, Michigan, began business in September 1978, with a truck, garage, and cooler, as Timothy and Carol Huang delivered tofu, tempeh, soysage, and soymilk, made by the Ann Arbor Soy Plant, around the metropolitan area. But in March 1979, they opened a retail delicatessen because they 'wanted to teach people about soyfoods by letting them taste them, which is better than reading about them in books.' The deli retails groceries, juices, herbs, teas, dry grains, bulk tofu, bottled soymilk, nori rolls, tofu carob creme pies, and tofu salad. The Yellow Bean has seating for fourteen and they are planning to introduce hot food items, such as tofu spinach pies, tofu lasagna, rice with tempeh, and bean and vegetable dishes." Though currently losing money, the deli grosses about $600 each six-day week.

Greg Weaver of The Tofu Shop in Rochester reports that August 1979 was their biggest month all year; they grossed $2,000/week. Autumn sales averaged about $1,700/week. During the World Series in October they invented the Not Dog–a hot dog based on baked tofu.

Steve Fiering of the Soy Plant deli in Ann Arbor reports steady sales of about $1,000 a week. Steve Demos at the Cow of China deli in Boulder reports that retail sales peaked in August at $450/day. Now they range from $1,700 to $2,000/week.

4501. *Soycraft* (*Colrain, Massachusetts*). 1980. Rapid growth of the soyfoods industry. 1(2):11-12. Winter.
• ***Summary:*** Presents original statistics gathered by New-Age Foods Study Center (Soyfoods Center, and sent in a news release titled "Rapid Growth of Tofu Shops and Soy Dairies in North America," in Nov. 1979), plus reports from three tofu companies that have recently expanded: Joy of Soy (Minneapolis, Minnesota; making 6,000 lb/week of tofu), Northern Soy (Rochester, New York), and New England Soy Dairy (Greenfield, Massachusetts).

• ***Summary:*** This cover story on Brother Ron Pickarski, a Franciscan brother and a world-class vegan chef, contains a nice portrait of him. Another photo shows an associate chef carving a portion of Tempeh Wellington–an entree served in his Escoffier Dinner Menu. Soy-related recipes include: Tofu dip (p. 34). Dairyless, eggless quiche (with tofu, p. 34). Mushroom stroganoff (with tofu cream, p. 34). Curried tofu and bananas (p. 35).

4506. Hershfield, Joanne. 1980. Film proposal: Surata tofu. Eugene, Oregon. 2 p. Unpublished typescript. March 20. 28 cm.
• ***Summary:*** This film proposal is for a class in "Film and Folklore," English 410, at the University of Oregon (Eugene, Oregon).

"Surata is a locally owned and operated collective in Eugene, Oregon that produces and distributes tofu, a traditional Chinese and Japanese food made from the curds of soybean milk. My film, tentatively titled Surata Tofu, will be concerned with three major objectives: to briefly describe the philosophy and practice of the traditional 'art' of making tofu; to describe the process of making tofu at Surata, adapted from the traditional way to be functionally utilized to meet Western needs; and to examine the philosophy and organization of a particular business collective–how it functions, it's ideological premises, and how it's concept of work relates to the philosophy of making tofu.

"The film will focus on process, community and aesthetics, as interrelated elements within a fundamental belief system and life style. The method of making tofu is traditionally credited to Lord Liu An of Huai (154 B.C.), a Taoist philosopher and practitioner of meditation and alchemy. Tofu making was brought over from China to Japan in the eighth Century by Buddhist priests and has consequently undergone modifications as the knowledge was passed from priests and upper classes, down to the lay people on farms and in villages. Like many Japanese crafts, making tofu is a practice, a spiritual path, a set of knowledge that has been handed down from master to disciple. Work becomes art, the goal is not economic gain or fame, but self-realization discovered in the moment-to- moment process." Address: Eugene, Oregon.

4507. Needleman, Larry. 1980. Tofu Helper: A product idea for Celestial Seasonings. 25 p. March 10. Unpublished manuscript. 28 cm.
• ***Summary:*** Tofu Helper is a dry seasoning mix idea in 3 flavors to be mixed into mashed tofu to make salads, spreads, dips, etc. The idea was never brought to market.

Contents: Putting tofu in historical perspective. Why focus on tofu? Limitations to tofu. My idea. Tofu Helper. Tofu salad. Why celestial seasonings?

Note 1. Tofu Helper was an excellent idea that was never commercialized. Larry Needleman developed the product prototype, then unsuccessfully tried to sell it to Celestial Seasonings.

Note 2. This is the earliest document seen (March 2009) that contains the term "Tofu Helper." Matthew Schmit (also in northern California) invented the same product with the same name about 1 month later; he, too, was unable to commercialize it.

4509. *SoyaScan Notes.* 1980. How Laughing Grasshopper tofu shop (which became the New England Soy Dairy) was founded (Overview). March 31. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** The following story was compiled from various interviews with and writings by Richard Leviton and Tom Timmins from 1977 to 1980. In 1976 Ira (Richard) Leviton and Kathy Whelan were running the successful Corncreek Whole Grain Bakery, which they had started in the spring of 1974. It was located in South Deerfield, Massachusetts, 10 miles north of Amherst, where some 25,000 students attended the University of Massachusetts and Amherst College. In Feb. 1976 an employee from Corncreek Bakery visited the Welcome Home Bakery and Tofu Shop in Corvallis, Oregon, started by Alec Evans in March 1975. He returned to tell Ira in detail how Alec made tofu in Oregon. Ira, a vegetarian, had already been eating tofu since 1970; he bought it at a local supermarket, which in turn bought it from Chinatown in Boston.

In early 1976 Ira bought *The Book of Tofu* by Shurtleff and Aoyagi, then made tofu at home several times successfully. He thought, "This would be a good second food business." He found that the bakery's 100 bread accounts were eager to stock tofu. But his partner, Kathy, was not very interested in the idea. Ira wrote Bill Shurtleff in mid-1976 to explain his idea and ask for advice. Ira then firmly decided to start a tofu shop during a Zen meditation sesshin on 19 July 1976. In August he rented a two-room 1,000-square-foot shop (with handsome wooden floors) at 3 Main St. in the sleepy little papermill town of Millers Falls, Massachusetts, 8 miles from the bakery. Working largely alone, he began to convert the space into a traditional, cauldron-style tofu shop.

For startup capital, Ira and Kathy together put in $4,000 of their own funds, to which Tom Timmins added $1,200 and Michael Cohen added $2,000. In Sept. 1976 Ira got a $7,500 five-year bank loan to bring the total to $14,700. Part of this money was used to equip the shop with a large Hobart VCM-40 (Vertical Cutter-Mixer) to grind the beans, four 15-gallon

© Copyright Soyinfo Center 2013

stainless steel pots set over four gas burners to cook the slurry, a solid-oak apple cider press to extract the soymilk, hand-made oak curding barrels (former cider barrels) and forming boxes, and cedar soaking barrels from a Maine lobster supply house. The "old fashioned" shop was a joy to behold–but soon proved to be a misery to work in!

On 4 Nov. 1976 Shurtleff and Aoyagi, while on a nationwide tour to introduce tofu and miso to America, visited Leviton in Massachusetts. Leviton hosted their program at his bakery and drove Shurtleff to the tofu shop that would open in several months. A day or two later Shurtleff and Aoyagi visited Tom Timmins, in Brattleboro, Vermont. From 1973-75 Timmins had been manager of Yellow Sun Natural Foods Cooperative in Amherst, Massachusetts. This food co-op had 500 member families and was a pioneer in the organic farming movement in New England. From 1975 to 1977 he was sales manager at Llama, Toucan & Crow, a natural foods distributor in Brattleboro.

In early December, Timmins called Leviton to say that he would like to be a partner with Ira and Kathy in the new tofu shop. Timmins' wife, Judy, had started the Equinox Vegetarian Restaurant in Amherst,–which bought bread from Corncreek bakery. Timmins was soon invited to join as the third partner.

Ira, Kathy and Tom made the first batch of tofu at Laughing Grasshopper Tofu Shop on 12 January 1977, a Saturday. Initial output was 300 to 1,000 pounds a week. The young craftsmen, bypassing the traditional Japanese apprenticeship and having made tofu only five times before opening, learned as they went along, partially following instructions in a pre-publication rough draft of Shurtleff and Aoyagi's *Tofu and Soymilk Production*, and benefitting from their daily mistakes and observations.

But before long things started to go awry. Heaving the heavy pressing sacks onto their cider press, they found, required almost superhuman physical strength and conditioning; it left them exhausted and with aching backs at the end of each day. The wooden soaking and curding barrels warped badly, began to rot, and generally were too unsanitary and too heavy to handle. The forming boxes warped and pulled apart at the seams. The pressing sacks often sprang leaks, tore open at the seams, and sprayed hot okara all over the shop and workers. The floor warped (especially after 1 month when the drains clogged permanently; the landlord had done an illegal plumbing job himself) and water dripped through the radiator pipe openings into the room below onto the landlord's stored art materials. The sheet rock walls slowly began to crumble. The landlord, who lived in the building, often showed up drunk (sometimes with a pistol) and occasionally shut off the water in the middle of production. The smell of tofu production seeped into the town library, which was in the same building, prompting complaints. Town and state health inspectors, concerned with the unsanitary conditions, kept a close eye on the operation. Nonetheless, in the process of overcoming these and many other unforeseen difficulties, the young craftsmen soon became proficient in the art of making fine nigari tofu. Timmins later remarked, "Only willpower and dedication kept us going." Ira got mononucleosis in February or March 1977 from stress and overwork, and was out for 7 weeks. Many other early tofu shops in America experienced the same types of difficulties.

The three partners hired Michael Cohen to deliver their tofu 3 times a week. Michael had just returned from The Farm in Tennessee (there and at a satellite community of The Farm he had learned to make soyfoods) and wanted to start his own tofu shop. In Feb. 1977 the company took in Michael Cohen as the fourth partner. This combination of diverse talents proved helpful in running the business. The partners used Corncreek Bakery to develop a Tofu Pie (4½-inch diameter tofu cheesecake), which was launched in April 1977. But it was not on the market very long, since the bakery closed in Aug. 1977 due to a continuing labor dispute.

Yet despite all these problems, business was booming. At the end of its first year in business (Jan. 1978), the little company was employing ten people, each working 40 hours per 7-day week, and making over 7,000 pounds of tofu a week. They packed their tofu in plastic lined 5-gallon plastic pails, storing them overnight in a 10-by-12-foot self-built cooler. They made deliveries in their own van two to four times a week to over 100 small food stores, restaurants, and supermarkets in Boston and Western Massachusetts. With sales for the first year at an impressive $75,000, they company was already planning a first expansion and a new image–just in time, as they were also being evicted by the landlord and town council.

In Nov. 1977 the partners incorporated the company, made Tom Timmins the top man (president), changed the name to New England Soy Dairy, raised $45,000 of new capital, and began to moved the business into a much larger building at 305 Wells St., Greenfield, Massachusetts. Production in Greenfield began on 31 Jan. 1978. In Feb. 1978 the company stopped using the name "Laughing Grasshopper" for their tofu. In Feb. 1978 the former landlord sued the company for $35,000 but *his* lawyer dropped the suit out of embarrassment.

4510. **Product Name:** Boncheese (Tofu).
Manufacturer's Name: Boncheese.
Manufacturer's Address: 128 Kitulwatte Rd., Colombo, Sri Lanka.
Date of Introduction: 1980. March.
New Product–Documentation: *Soyanews.* 1982. April. p. 4-5. "Sri Lanka's first tofu shop." With three photos taken inside the shop. The name of the shop is given in this article only as "Sri Lanka's first tofu shop." The name of the owner is also not given, but we are told that he is a devout Buddhist and vegetarian.

© Copyright Soyinfo Center 2013

Letter from Gai W. Kim, UNDP, Sri Lanka. 1982. April 23. This was Sri Lanka's first tofu shop. Work on the factory was completed by March, 1980. The owner was Mr. U.N. Gunasekera, a large contractor. The product, Boncheese, was retailed at a stall in Kolpetty Market, the largest market in Sri Lanka. The factory had to be closed from Dec. 1980 to March 1981 due to a shortage of soybeans. Presently Boncheese is sold only at Cornel's Super Market (Colombo's only super market); 60 lb a day are supplied. By March 1988 the product has been renamed Soya Bean Curd and the Manufacturer Soya House (which see).

4511. Boyd, Billy Ray. 1980. The Buddha-foods of China. *Asia Mail* (*The*). March.

• ***Summary:*** In Taipei, Canton, or many other Chinese cities or towns you can find Buddhist vegetarian restaurants. The foods, which are displayed in the window, look like pressed duck, sweet-sour pork, chicken soup, fish, etc., and invite you to enter. Yet you will find that these delicacies contain no meats or dairy products. In the island province of Taiwan alone there are almost 100 such eating places, in almost every city and town. "Over the centuries monks and nuns have developed and refined special foods made from various soy products and from gluten." These include tofu (beancurd), gluten meat, and *doupi* [2 Cc = 2 Chinese characters given] "(the tender, fleshy skim from soymilk)." They are high in protein and look and taste remarkably like a wide array of flesh foods. "These foods are manufactured by specialized businesses and sold in market stalls dealing with nothing else. Since the food is prepared is prepared in large quantities that same day, it is inexpensive.

Note. This is the earliest English-language document seen (Oct. 2012) that uses the word *doupi* or the terms "skim from soymilk" or "fleshy skim from soymilk" or "tender fleshy skim from soymilk" to refer to yuba.

"When ordering in a Buddhist restaurant, the simplest approach is to ask for the daily special or 'guest food' *kuh fahn."*

Generally it is lay Buddhists, traveling clergy, and people concerned with health who eat at these restaurants.

"The strictly vegetarian regimen is adhered to in Buddhist temples as well. In west-central Taiwan, at the very top of Lion's Head Mountain (3 Cc) sits the Buddhist temple Shih Yen Tung (3 Cc). The resident nuns and monks here are used to visitors, including occasional westerners, and one can spend the night. As usual in temples, a modest offering of 'incense money' is expected to cover the costs of providing food and lodging: a few dollars for an overnight stay, meals taken with the monks and nuns in the communal dining hall. The mountain itself, when not enshrouded in timeless mists, provides a panoramic view of the region. The food served is, of course, the traditional vegetarian kind, unlike at many other temples–on the mountain and elsewhere–of mixed Buddhist and Taoist allegiance.

"Though Buddhism has in many ways been discouraged in Maoist China, the vegetarian tradition there lives on. Two famous temples where resident monks and nuns still serve elaborate vegetarian meals to pilgrims and visitors are T'ien P'ing Shan (3 Cc) in the suburbs of Soochow, and Ling Yin Ssu (3 Cc) in Hangchow. The latter city is noted for being one of the most beautiful in all China, a pre-Liberation favorite of resident foreigners.

"Chinese Buddhist restaurants can be found in several cities in southeast Asia as well, including Hong Kong, Kuala Lumpur, and Singapore. English will often appear on the menu, and/or be spoken by some of the waitpersons. The Chinese Buddhist gustatory tradition did not, unfortunately, survive the cultural transplant to the United States, though recently some non-Chinese have opened a restaurant in San Francisco where one can begin–just begin–to discover the richness and diversity of the traditional Buddhist foods."

The author, a freelance writer and vegetarian cook, chanced upon and subsequently researched the Chinese Buddhist restaurants during a 4½-year odyssey in Asia. Address: Box 872, Santa Cruz, California.

4512. **Product Name:** Bud Tofu [Firm Style].
Manufacturer's Name: Bud, Inc.
Manufacturer's Address: 1100 Wicomico St., Baltimore, MD 21230.
Date of Introduction: 1980. March.
Ingredients: Soybeans, water, nigari.
Wt/Vol., Packaging, Price: 16 oz. Originally packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid. By 1985 both water- and vacuum packed.
How Stored: Refrigerated.
New Product–Documentation: Morris, Linda. 1982. "Tofu: Soy product can be used like cheese." *Sun* (Baltimore, Maryland). May 12. p. C1. The Liu family, whose business is named Bud, Inc., began making tofu in 1980 and has recently moved into larger quarters on Wicomico street.

Label. 1982. "Bud tofu–Firm style." Green on clear film. Logo is a musical note.

Label. 1982, March. (dated). 4 by 5.5 inches. Red, green, and blue on clear film. Refrigerate in fresh water. Serving suggestions: Boil or fry tofu and serve with desired sauce. Serve diced tofu in tossed salad or soup. Stir fry tofu with vegetables. Substitute tofu for half the amount of ground meat, cheese, eggs, or mayonnaise called for in all recipes. Puree tofu, fruit and milk with drops of vanilla, add desired sweetening for desserts. Blend tofu (½ lb) with lemon juice (2 T.), oil (2 T.), and preferred seasoning for preferred spread, dip, or dressing. Vegetable protein: No cholesterol. Low calories. No preservatives.

New Label. 1985. Oct. (dated). 4.5 by 4 inches. Clear film. Black on green with black on white logo. The logo is a picture of a bud on a soybean. "All natural. No preservatives. Keep refrigerated at 36-38ºF."

© Copyright Soyinfo Center 2013

Talk with Aaron Liu. 1988. July 18. The company started in May 1982. 95% of their products go to the natural food industry, and 5% to Chinese restaurants. They now use 12 x 60 lb bags of soybeans a day to make 1,440 lb of tofu a day, and 7,200 to 8,640 lb a week. Aaron and his sister, Wang Chen, both own the company. Talk with Jon Kessler of Sunergia Soyfoods. 1999. March 21. Jon heard from Ed Mueller of Potomac Whole Foods and Bread of Life that Bud, Inc. of Baltimore has lost its lease and perhaps has ceased operations. Ed is hoping to move the Bud equipment up to Hancock, Maryland, and start a new tofu shop there.

4513. Daizu Kyokyu Antei Kyokai. 1980. Gaiyo [About the Japan Soybean Supply Stabilization Association]. Tokyo: DKAK. 12 p. March 31. 26 cm. [Jap]
• ***Summary:*** Name of organization with diacritics is: Daizu Kyôkyû Antei Kyôkai. This association was founded on 26 Dec. 1974, following the U.S. soybean embargo in 1973. It has 8 member associations, including the Japanese national tofu, dried-frozen tofu, natto, miso, shoyu, oil, oil importer, and coarse grain associations. The name and address of each is given. Address: #2 Makoto Bldg. 5F, 1-4-4 Toranomon, Minato-ku, Tokyo 105, Japan. Phone: 03-591-3879.

4514. Hip Pocket Tofu Deli. 1980. March. New soyfoods restaurant or deli. 1634 N.W. Blvd., Columbus, OH 43212.
• ***Summary:*** Questionnaire filled out by owner of restaurant or deli. 1982. Lists the company's most popular soy-based menu items in descending order of popularity. The highest weekly total sales over the past 6-2 months, the month that this occurred, and why. The average weekly sales during this period. Average hourly wages paid to workers. The business startup cost (amount of money it cost to get the business started). Current profitability status. Plans for the future. Advice the owner would give to someone starting a similar business.

Shurtleff & Aoyagi. 1982. Report on Soyfoods Delis, Cafes & Restaurants. p. 3. Started March 1980 by Mick Vissman and Bill Lutz. Startup cost: $10,000. Avg. weekly sales in 1982: $2.000. Address: Columbus, Ohio.

4515. Island Spring Inc. 1980. Can you make a living making tempeh? (Ad). In: William Shurtleff and Akiko Akiko. 1980. Tempeh Production: The Book of Tempeh, Volume II. Lafayette, California: New-Age Foods Study Center. 176 p. See p. 171.
• ***Summary:*** This quarter-page black-and-white ad is for the Soycrafters Apprenticeship Program, a professional 21-day intensive "hands-on" course in the commercial production and marketing of tempeh, tofu, soymilk, and related soyfoods. Address: P.O. Box 747, Vashon Island, Washington 98070. Phone: (206) 622-6448.

4516. **Product Name:** Tofu.
Manufacturer's Name: Island Tofu Works.
Manufacturer's Address: 318 Main St., Bar Harbor, ME 04609. Phone: 207-288-4969.
Date of Introduction: 1980. March.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Address: c/o Golbitz-Kingma, 318 Main St., Bar Harbor, 04609. Owner: Peter Golbitz.

Shurtleff & Aoyagi. 1982. Soyfoods Industry: Directory & Databook. p. 1. The company was started by Sharyn Kingma and Peter Golbitz.

FIND/SVP. 1981, May. "The tofu market: Overview of a high-potential industry. p. 95. A small tofu shop.

Roy Zalesky. 1987. American (Ellsworth, Maine). March 12. "For Bar Harbor couple tofu manufacture leads to research in soyfoods." In 1980 Sharyn Kingma and Peter Golbitz started to produce tofu in their kitchen.

According to the Registry of Deeds for Hancock County (60 State St., Ellsworth, Maine. Phone: 207-667-8353), no company with the name Island Tofu Works, or any similar name, was established in that county between 1977 and 1986. The earliest records related to the business are a Uniform Commercial Code financial statement for the year 1982 showing Jason P. Golbitz and Sharyn Kingma doing business as Island Tofu Works.

Talk with Peter Golbitz. 1988. Sept. 8. The company was founded in the winter of 1979 as a partnership. Maine does not require registration of partnerships with the county. Production began in February or March 1980. At their peak, they were producing about 2,000 lb/week of tofu but still losing money.

Note: This is the earliest document seen (Feb. 2003) concerning the work of Peter Golbitz with soyfoods.

4517. Murakami, Debbie. 1980. "To me, tofu is like bread." *International Examiner* (*The*) (*Seattle*). March. p. 8-9.
• ***Summary:*** "Island Spring has actually paved the way toward marketing tofu and getting it accepted by the public. The company is located in the middle of an orchard operation on Vashon Island. The biggest sales barrier is unfamiliarity." Address: Seattle, Washington.

4518. Shurtleff, William; Aoyagi, Akiko. 1980. Tempeh production: The book of tempeh, volume II. A craft and technical manual. Lafayette, California: New-Age Foods Study Center (Renamed Soyfoods Center in Sept. 1980). 176 p. Illust. by Akiko Aoyagi Shurtleff. Index. March. 28 cm. [46 ref]
• ***Summary:*** Contents: Preface. 1. How to start a tempeh shop. 2. Setting up shop: Community or kitchen shop, fire cooker shop, steam cooker plant, modern factory, tropical village shop, tropical caldron plant. 3. Ingredients. 4. Principles of tempeh production. 5. Making tempeh in

North America. 6. Making tempeh in Indonesia. 7. Making specialty tempehs: Introduction, specialty soy tempehs, other legume tempehs, grain (or seed) & soy tempehs, grain tempehs, okara tempeh, soy (or grain) & okara tempehs. 8. Quantity tempeh recipes & the soy deli. 9. Making tempeh starter. Appendices: A. Resources: People and institutions connected with tempeh production. B. Tempeh shops in the West. C. Measures, weights & equivalents. Bibliography. New-Age Foods study center. D. Index.

Note 1. This is the earliest known English-language book devoted entirely to tempeh production.

Note 2. On page 10 we read: "For more information about the natural low-tech soyfoods industry and its publication *Soyfoods*, contact the Soycrafters Association of North America,..." This is the earliest English-language document seen (Feb. 2013) that contains the term "low-tech" (regardless of hyphenation) in connection with soy, or the term "low-tech soyfoods." Address: New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549.

4519. Shurtleff, William; Aoyagi, Akiko. 1980. Soyfoods: The Americanization of tofu. *Vegetarian Times* No. 36. March. p. 54-55. [3 ref]
• ***Summary:*** An introduction to tofu in America followed by 6 recipes adapted from *The Book of Tofu.*

"Westerners are doing things with tofu that the Japanese never dreamed of: "Tofu burgers," "tofu cheesecake," and soybean ice cream are all as American as apple pie. In the immortal words of Andy Schecter, of the Northern Soy tofu and tempeh shop in Rochester, New York: 'We can make tofu and soymilk products that rival even the best junk foods in America!' What more could anyone ask for?" Address: New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549.

4520. **Product Name:** Soya Bean Curd (Formerly Boncheese).
Manufacturer's Name: Soya House (U.N. Gunesekara and Co.).
Manufacturer's Address: 128, Kitulwatte Road (Off Elvitigala Mawatham), Colombo 8, Sri Lanka. Phone: 597759.
Date of Introduction: 1980. March.
Ingredients: Soybeans, coagulant.
Wt/Vol., Packaging, Price: 500 gm in sealed plastic bag retails for Rs. 15/-.
How Stored: Refrigerated, 3 day shelf life.
New Product–Documentation: Label. 1988. March. 5.25 x 3 inches. Black on white card stock paper. Form filled out by Jane Gleason. She visited the shop in Colombo on 14 March 1988. Discussion with Mrs. Mendis, shop manager. Marketed from the shop and through Cargills and Cornel's supermarkets in Colombo. Production varies from 30 to 60 lb/day, or 400 kg/month. Production has decreased due to a competitor making silken tofu and selling it through the same outlets. The soybeans are purchased for 9 Rs/kg from the Colombo market. Consumers buy the product because of nutrition and quality. Most consumers are upper middle class and 90% are vegetarians. "Many Buddhist monks, bought for almsgiving, for monks, especially cutlets."

4521. Taira, Harue; Taira, Hirokadzu; Kokubu, Yoshijiro; Otake, Shigeto. 1980. Shihan (Murasaki han?) byôkin ni yoru higai daizu no kakô tekisei [Suitability for food processing of purple specked soybean seeds caused by *Cercospora kikuchii*]. *Shokuhin Sogo Kenkyujo Kenkyu Hokoku* (*Report of the National Food Research Institute*) No. 36. p. 14-20. March. [7 ref. Jap; eng]
Address: National Food Research Inst. (Shokuhin Sogo Kenkyujo), Kannon-dai 2-1-2, Yatabe-machi, Tsukuba-gun, Ibaraki-ken 305, Japan.

4522. Zell, Fran. 1980. Dong Hung Vien wins: Dining. *Chicago Tribune*. April 6. p. E12.
• ***Summary:*** Dong Hung Vien, a Chinese restaurant at 7316 N. Milwaukee Rd. in Niles, serves a delicious "crunchy, batter-dipped nugget of deep-fried bean curd. A tangy sauce as well as a small bowl of sugar were provided for dipping."

4523. Cadwallader, Sharon. 1980. An Asian answer to hamburger: Naturally. *Los Angeles Times*. April 10. p. L34, or J32, or K32.
• ***Summary:*** "I have had quite a bit of response to using frozen tofu in Western-style dishes. It seems the newcomer to the world of tofu–i.e., the Western palate–is more inclined to be comfortable with this texture than with the soft, fresh tofu."

You can easily freeze tofu at home; just put it in the freezer for several days, then thaw, drain, squeeze out any excess liquid, and keep any unused portions in the refrigerator. Contains two recipes using 1-2 cups "crumbled thawed tofu": Spanish rice, and Chili beans.

Note: An almost identical article titled "Naturally" appeared on this same date in the *Washington Post* (p. E8).

4524. *Toyo Shinpo* (*Soyfoods News*). 1980. Tôfu o sôzai ni shita gaikokujin no "Ryorikyôshitsu" kôhyô. Kôbe Jogakuin kôshi Linda Lee Barber-san [Foreigner's cooking class using tofu as an ingredient has a good response. Kobe Women's School teacher Linda Lee Barber]. April 11. [Jap]
• ***Summary:*** Linda Barber, an American home economics and lifestyle teacher, has the theme "Cooking with Love." She says "I like tofu very much." There is a steady stream of applicants for her "Tofu Cooking" classes at the Kobe YWCA, and for the next year twice as many classes each month are planned. Three photos show Linda Barber in a white apron making tofu on a kitchen scale and teaching Japanese about Western-style tofu cookery.

4525. Schmit, Matthew. 1980. Tofu-Helper: New directions in packaging and marketing for the soy industry, 1980. Bayside, California. 5 p. April 12. Unpublished manuscript. 28 cm.
• ***Summary:*** A proposal for a new product developed by Matthew Schmit. Five pages of black and white photocopies: (1) Title page. Handwritten. A rectangular photo in the center shows 3 prototypes of the product and 3 tubs of tofu atop a wooden barrel, outdoors. (2) Statement of original idea (handwritten): Name: Tofu-Helper portion pouch. Description. Purpose. Adaptation. Sketch (blank). Signed: Matthew Schmit, Date: 4/12/80.

(3) Tofu-Helper: Getting off the ground: An example of the steps undertaken by a tofu company beginning to introduce Tofu-Helper sauces into their sales region. "Choose a name for the campaign, such as Tofu Internationale, and sauces such as... Tofu turkey and dressing.

(4) Letter to Mr. Jeno Paulucci, 535 Lake Avenue South, Duluth, Minnesota 55802. From Matthew Schmit, Bayside, California. 1 page typewritten, no letterhead, with signature. Explains the product to Mr. Paolucci and suggests that he make and package it. New foods, "primarily tofu, tempeh, and soysage, have burst upon the American natural foods market in the last two and a half years. I have worked with these now items since September 1977, and have followed closely the 'new soyfoods' industry."

(5) Reply from Jeno F. Paolucci, chairman. May 29. Typed on letterhead with signature. "I appreciate your writing me in this connection. However, I just don't feel we would have any interest in going into soyfoods at least at the present time."

Note 1. Jeno was founder of Chun King Corp. and Jeno's Pizza. Matthew's father, Justin, was the company's executive vice president for years in Duluth, Minnesota, and later engineer.

Note 2. Matthew never commercialized this product. Address: Rt. 1, Box 484, Bayside, California 95524. Phone: 707-443-9054.

4526. White, Jim. 1980. Dining out: Jim White goes on a soya spree at Soja and finds the salads and desserts respectable, but the tofu tiresome. Unlike MacArthur, he will not return. *Starweek* (*Supplement of the Toronto Saturday Star*). April 5 to 12. p. 57.
• ***Summary:*** Soja, a soyfoods vegetarian restaurant at Kensington Market in Toronto, got mixed reviews. The author loved the tofu desserts but found too much tofu in everything. "You know tofu as bean curd, that squiggly, bland stuff that winks at you from the depths of a platter of Chinese mixed vegetables... tofu is a patty of compressed soya milk... its healthy but tasteless."

"Soja, by the way, means soya in Spanish and is pronounced as in 'So'dja like the meal? Wouldja come again?' The answer is No, pronounced emphatically. Not until the menu–like starch–is modified."

A photo shows Lynn Stirling and Mary Anderson in front of their restaurant. Address: ONT, Canada.

4527. Dunn, Carole. 1980. Soya beans are good for human 'beans.' *Chronicle, Tuesday Magazine* (*Eumundi, Australia*). April 15. p. 11.
• ***Summary:*** Cyril and Elly Cain, originally from the USA but now living in Imbil, are selling soyfoods at the Saturday morning Eumundi market, including soymilk drinks, smoothies, plain tofu, flavored tofu dips and spreads, tofu sandwiches and burgers, Soysage rolls, ice bean (soy ice cream), and a variety of cakes and pies such as tofu cheesecake. A photo shows Elly smiling as she makes a sale at a tofu & soymilk stall; Cyril appears in the background.

4528. Haddix, Carol. 1980. Ingrid: Master of the cold buffet. *Chicago Tribune*. April 17. p. S_A1, or N_B1.
• ***Summary:*** Ingrid Kostrubala (Swedish), one of Chicago's hottest caterers, has a constantly varying repertoire. Part of it is her unusual tofu appetizer. "Still a relatively unknown food for most Americans, tofu has a wonderful texture that contrasts well with crisp greens, Ingrid said. But its bland flavor (it actually is soy bean curd) stops many people cold." So Ingrid serves tofu with a dipping sauce that contains soy sauce laced with the hotness of shredded fresh ginger; it contrasts nicely with the mild tofu flavor. Contains several recipes, including Tofu with ginger sauce. Mix ½ cup each freshly grated ginger root and soy sauce with ¼ to ½ cup cream sherry in a small serving bowl. Cut tofu (use 3 cartons, 15 ounces each, drained) into 1-inch cubes. Dip and enjoy. A photo shows Ingrid standing by her buffet.

4529. Will, Joanne. 1980. Saute pan encounters wok in chinois cuisine. *Chicago Tribune*. April 17. p. W_B3, or S_A3, or N_B3.
• ***Summary:*** Ruth Law is an accomplished Chinese cooking instructor. John Snowden is a chef and the proprietor of a French cooking school. Chinois cuisine aims to mate this two great culinary traditions. "Law has had to eliminate soy bean curd, a favored Chinese ingredient but one that Snowden finds offensive. 'We cook things that are compatible, so that the menu is harmonious,' Law explained." Four recipes are given. Flower soup calls for 1 teaspoon light soy sauce and 1½ teaspoons sesame oil. Address: Food editor.

4530. *Toyo Shinpo* (*Soyfoods News*). 1980. Tôfu ryôri no barieeshon [New ways of cooking with tofu]. April 21. [Jap]
• ***Summary:*** Linda Lee Barber, an American home economics and lifestyle teacher, presents three Western-style tofu recipes. A small photo shows Barber.

4531. Belt, Becky; Jelepis, Kathy. 1980. Tofu takes many

forms. *Dispatch* (*Columbus, Ohio*). April 23.
• ***Summary:*** Bill Lutz and Mick Vissman, two entrepreneurs in their 20s, recently started Rainstar Foods, which distributes tofu and other natural foods. They also started the Hip Pocket Tofu Deli [on 1 March 1980]; its popular items include: Chili with tofu, Eggless "egg salad," Saltimbocca (marinated tofu cuts), Tofu burger, Guacamole, and Tofu onion-garlic dips. Soy foods like soymilk, soysage, and seitan roast are also on the menu. For dessert there is tofu cheesecake and banana cream pie. All recipes used at the deli were developed by chef Dennis Prutsman, who cooked with tofu for 15 years in San Francisco, California. No recipes are given.

4532. Dosti, Rose. 1980. Vitamin D hormone produces favorable effects: Relief from osteoporosis? *Los Angeles Times.* April 24. p. L1.
• ***Summary:*** Scientific studies have shown that many adults do not get enough vitamin D and calcium in their diets to maintain strong, healthy bones, according to Hector F. DeLuca, PhD, professor and chairman of the biochemistry at the University of Wisconsin. Breakthroughs in vitamin D research by DeLuca and co-workers could bring relief to millions of aging American women suffering from osteoporosis. Luca has shown that vitamin D cannot be activated without calcium. Our main source of vitamin D is the sun; when it comes in contact with the skin, it converts a form of cholesterol into vitamin D.

DeLuca advises women approaching menopause to drink milk and other dairy products, or to supplement their diets with calcium. An alternative, he says, is to consume "tofu, a soy bean curd which contains good supplies of calcium." Exercise that stresses bones is also important. The vitamin D hormone must not be taken unless prescribed by a physicians. A photo shows DeLuca. Address: Food editor.

4533. Dosti, Rose. 1980. Nutrition class: You practice eating what you preach. *Los Angeles Times.* April 24. p. L29.
• ***Summary:*** "Elementary-school teachers who registered for a course called Nutrition Update at Cal State Long Beach last week learned a thing or two about teaching children nutrition and got to eat what they learned, too." The recipe for Basic stir-fried meat and vegetables calls for "1 (7-ounce) package baked soy bean cakes (tofu)."

A recipe for Chicken marinade calls for "1 tablespoon light soy sauce." Address: Staff writer.

4534. *Santa Cruz Sentinel* (*California*). 1980. Workshop-lecture on tofu and tempeh Monday. April 30. p. 32. [3 ref]
• ***Summary:*** This news release explains that William Shurtleff and Akiko Aoyagi, authors of 3 best-selling books, will present a program and workshop on Monday, May 5, from 7:30 to 9:30 p.m. at Santa Cruz High School Auditorium. Donation is $1. "Sponsoring the lecture Monday is Monterey Bay Soy Foods whose proprietors, Jeremiah Ridenour and Kevin Van Slooten, plan to provide the community with fresh bulk tofu and other soy products." Photos show Shurtleff and Aoyagi. Note 1. This is the first program on Shurtleff & Aoyagi's Soyfoods America Tour 1980.

Note 2. This is the earliest document seen that mentions Jeremiah Ridenour in connection with soyfoods.

4535. Java Murni Restaurant. 1980. April. New soyfoods restaurant or deli. 4509 Adams St., Carlsbad, CA 92008.
• ***Summary:*** Questionnaire filled out by owner of restaurant or deli. 1982. Lists the company's most popular soy-based menu items in descending order of popularity. The highest weekly total sales over the past 6-2 months, the month that this occurred, and why. The average weekly sales during this period. Average hourly wages paid to workers. The business startup cost (amount of money it cost to get the business started). Current profitability status. Plans for the future. Advice the owner would give to someone starting a similar business.

Poster sent by Doug Fiske. 1981. Dec. "Prepare now for Java Murni's vegetarian X-mas dinner. Dec. 26 and Dec. 27. 5-7 or 7:15-10 pm. Contains the menu and an illustration of a shadow puppet. Soy-related dishes include: Appetizers: Gulung Rebung (bamboo shoots wrapped in crispy tofu). Tofu Kembang (tofu flowers). Salad: Gado-gado (with peanut dressing). Entree: Tempeh Treat (tempeh braised in Indonesian soy and safflower oil). Tofu-Saus-Richa (tofu in sweet-and-sour spicy sauce). Chah Tempeh (mixed-tempeh-vegetables). Keringan Tempeh (sweet-piquant tempeh). Satay Tempeh (bbq tempeh). Soyex Malakka (soy cubes in malakka sauce).

Vegetarian menu. 1982. Shurtleff & Aoyagi. 1982. Report on Soyfoods Delis, Cafes & Restaurants. p. 3. Address: Carlsbad, California. Phone: 714-434-4131.

4536. **Product Name:** Light Foods Tofu.
Manufacturer's Name: Light Foods Inc.
Manufacturer's Address: 6144 Bartmer, St. Louis, MO 63133. Phone: 314-721-3960.
Date of Introduction: 1980. April.
Ingredients: Certified organic soybeans, filtered water, nigari (salt bitterns).
Wt/Vol., Packaging, Price: 16 oz packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.
How Stored: Refrigerated.
Nutrition: Per 8 oz.: Calories 164, protein 17.6 gm, fat 9.6 gm, carbohydrate 5.4 gm, calcium 292 mg, iron 4.4 mg, sodium 96.0 mg, potassium 96.0 mg, thiamine 0.12 mg, riboflavin 0.08 mg, phosphorus 286 mg.

St. Louis. Our temporary name and address: "St. Louis Soy Foods, 613C Broadmoor Dr., Chesterfield, Missouri 63017. Phone: 314-469-3624. Love and energy to you all.

Letter from Bob Davis of Light Foods (6144 Bartmer, St. Louis, Missouri 63133). 1979. Nov. 16. He orders *The Book of Tofu, Tempeh Production, The Book of Miso.*

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Bob Davis.

Barbara G. Ostmann. 1980. Post-Dispatch (St. Louis, Missouri). Oct. 29. p. 1E, 4E. "Time for tofu." Bob Davis started making tofu 7 months ago. A large color photo shows the tofu package and label, on which is an illustration of a winged unicorn jumping across a stream in front of a rising or setting sun. Label. 1980, undated. 3 inches square. Self adhesive. Letters blue on white. Color illustration of a unicorn jumping across a stream at sunrise. "Please refrigerate." Label. 1982, undated. 5 by 3 inches. Plastic film. Dark blue, light blue and orange on clear film. Now contains the descriptive phrase "A soy cheese. Low calories. No cholesterol. 100% non-dairy."

4537. Saio, K.; Nikkuni, I.; Ando, Y.; Otsuru, M.; Terauchi, Y.; Kito, M. 1980. Soybean quality changes during model storage studies. *Cereal Chemistry* 57(2):77-82. March/April. [14 ref]

• ***Summary:*** Because of uncertainties in international soybean trade, the Ministry of Agriculture, Forestry, and Fishery in Japan is planning to set aside soybean reserves to avoid possible shortages. This article analyzes changes in soybeans stored under conditions that cause significant changes in qualities important to food uses of soybeans–such as tofu. Address: 1-3. National Food Research Inst., Ministry of Agriculture, Forestry, and Fishery [Japan].

4538. **Product Name:** Yuba Rolls, and Stuffed Agé Pouches.
Manufacturer's Name: Soy Plant (The).
Manufacturer's Address: 211 East Ann St., Ann Arbor, MI 48104. Phone: 313-663-0500.
Date of Introduction: 1980. April.
New Product–Documentation: Talk with Steve Fiering. 1988. June 10. These were developed by Jura McDowell, who was a good cook. The yuba rolls were about 5 inches long and a little less than 1 inch in diameter. He made the yuba (but it was never sold as such) then use it as an outer wrapping around a filling with ground tempeh and soysage. The Agé Pouches were made by deep-frying tofu to make pouches, then opening and stuffing them with a delicious mixture of ground tempeh, and perhaps soysage, nuts, and sweet white miso. They were sold fresh in the deli, and they sold very well. Note: This is the 2nd earliest commercial soy product seen (Sept. 2011) in which tempeh is used as an ingredient.

4539. Steinkraus, Keith H. 1980. Guideline for the production of soybean milk and soybean curd at the village level. *Food and Nutrition Bulletin* (*United Nations Univ.*) 2(2):29-30. April.

• ***Summary:*** A step-by-step guide to making each product using simple equipment. Address: Cornell Univ., Geneva, New York.

4540. **Product Name:** Westbrae Nigari (Bittern).
Manufacturer's Name: Westbrae Natural Foods (Distributor). Imported from Japan. Made in China (PRC).
Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: 415-658-7518.
Date of Introduction: 1980. April.
Ingredients: Incl. magnesium chloride.
Wt/Vol., Packaging, Price: 44 lb. Wholesales for $21.60.
How Stored: Shelf stable.
New Product–Documentation: A series of 3 labels appears on Westbrae's internal print order log: (1) "Westbrae Nigari (Bittern): for use in making tofu." 1976. Printed with dark blue ink on light blue paper. 3.5 by 4 inches. "Made from clear seawater from which most of the tablesalt (NaCl) and water have been removed. Store tight to prevent water absorption. Net weight: 5.29 oz. (150 grams). Imported by Westbrae Natural Foods. Product of Japan. (2) "Westbrae Nigari: Bittern." 1977. July 20. Printed brown on beige. (3) Westbrae Dried Natural Nigari (Bittern)." 1978. Jan. 26. Printed with dark blue on silver. 2¼ by 3¼ inches.

Westbrae Natural Wholesale Food Catalog. 1980. Spring. "Nigari is the mineral-rich liquid that remains after sodium-chloride (table salt) is separated from seawater. Westbrae's natural nigari is made after the traditional methods in the salt fields of the People's Republic of China.

• ***Summary:*** "Santa Monica–A workshop by William Shurtleff and Akiko Aoyagi, authors of 'The Book of Tofu,' will be held from 7:30 to 9:30 p.m. Thursday, May 8, at John Muir High School cafetorium, at Lincoln and Ocean Park boulevards. Admission is $2."

Note: A "cafetorium" is a room, usually in a school, that is used as both a cafeteria and auditorium.

4543. Anderson, Gene. 1980. Re: Thanks for and comments on *The Book of Miso.* Letter to William Shurtleff at Soyfoods Center, May 7. 2 p. Typed, with signature on letterhead. [1 ref]

• ***Summary:*** "A million thanks and blessings for *The Book of Miso.* It is the most impressive single book on food that I have ever seen in a lifetime of rooting around in this literature... I am getting more and more willing to attribute near-miraculous powers to ferments. This is partly because of one recent discovery you haven't picked up: soybeans are about the riches common source of phytic acid, or phytate (ion), which picks up mineral nutrients (specifically active metals: iron, zinc, calcium, copper...) and renders them unavailable in the diet, and also niacin. (Hence the pellagra in corn-eating areas, since corn also has a lot, though nothing like soybeans.) Well, as you would expect, fermentation organisms handle the phytate, metabolizing it away. So soybeans by themselves are dangerous, but all the fermentation products are perfectly fine. Tofu is also OK, since the phytate goes off in the whey." Address: Dep. of Anthropology, Univ. of California, Riverside, CA 92521.

4544. Gullion, Laurie. 1980. State to aid soy dairy expansion. *Recorder* (*Greenfield, Massachusetts*). May 8. p. 1, back page this section.

• ***Summary:*** "The decision of the nation's fourth-largest 'tofu' producer to remain in Franklin County for seven years may help counter Greenfield's sagging reputation in retaining

© Copyright Soyinfo Center 2013

its small businesses. The rapidly expanding New England Soy Dairy in Greenfield will sign Friday a state-funded $200,000 investment agreement which commits it to a seven-year capital improvement program in Franklin County. The agreement is part of an initial $350,000 expansion program expected to double the infant firm's $1.2 million in sales. The 3-year-old business has tripled its sales each year and grown to 44 employees...

"The funds have been made available by the Massachusetts Community Development Finance Corp. through the Franklin County Community Development Corp... The $200,000 deal involves a $100,000 loan and a $100,000 purchase of stock in the company, said Vice Chairman Donald Stone. The state and county development agencies will obtain four seats on a 12-person board of directors to monitor the operation with 30 and 3 percent interests in the company respectively. Stone said the agreement will help in obtaining an additional $150,000 in loans from local banks... President Thomas Timmins said the company will experiment with a new product–tofu ice cream... The soy dairy plans to add 2,400 square feet to the building's north side, primarily for storage, and construct two 40-foot silos, he said." Address: Staff reporter.

4545. *Hartford Courant* (*Connecticut*). 1980. Tofu workshop planned May 14. May 10. p. 11.
• ***Summary:*** "A workshop on how to use tofu in low-cost, low-calorie meal planning will take place May 14 from 7:30 to 9 p.m. at the Holiday Inn, Meriden. The workshop will be co-sponsored by Diet Centers of Southington and the New England Soy Dairy, Greenfield, Massachusetts, producers of tofu.

"Cele Cohen, R.N., Diet Center counselor, and Madeline Fox, Soy Dairy's marketing director, will speak. Samples of salads and hors d'oeuvres made with tofu, a soybean product, will be offered.

"The event is open to the public; admission is $1.50. For further information, call Cele Cohen, 621-7268, or Jane Kenefick, 237-3225."

4546. Hope, Jane; Bright-See, E. 1980. Milk digestion aid now in liquid form: Nutrition matters. *Toronto Star* (*Ontario, Canada*). May 14. p. D3.
• ***Summary:*** Those who don't drink milk because they can't digest its lactose [a sugar], might want to try LactAid; just add 4-5 drops to a glass of milk.

Other people are forced to avoid milk and milk products because they are allergic to milk protein. Babies with milk allergies are often given formulas based on soy protein. "Since soy protein is a high quality protein, the babies grow just as well as if they were getting regular milk."

Adults who are allergic to daily milk might "consider using the soy products which are available in many Chinese grocery stores. These include soybean milk and bean curd (also known as tofu or dow fu). The protein in these products is very good." And they contain no lactose.

Small photos show Jane Bright and Dr. E. Bright-See.

4547. Jerram, Elsie. 1980. Tofu is a hit in Santa Cruz. *Monterey Peninsula Herald* (*California*). May 14. p. 25. Food section.
• ***Summary:*** The article begins: "Santa Cruz children are eating tofu for lunch and loving it." So says Thelma Dalman, director of food services for Santa Cruz City Schools. Her food service program currently pays $1.60/lb for ground chuck hamburger, which is 18% fat; she can buy tofu for $0.50/lb. She incorporates tofu into enchiladas, tamale pies, quiches, and casseroles; all these are offered to the children on the vegetarian lunch menu. Next year she hopes to use tofu in her regular meals, as well as the vegetarian ones. She is working to get USDA, which subsidizes the national school lunch program, to allow a pilot program involving tofu. Address: Editor, Food Page.

4548. *Iowa City Press-Citizen.* 1980. Tofu, tempeh workshop set. May 20. p. 7A.
• ***Summary:*** "Want to learn how to cook with tofu and tempeh? William Shurtleff and Akiko Aoyagi, authors of books on preparing the soybean products, will present a program and workshop from 7:30 to 9:30 p.m. Thursday [May 22] at the Unitarian Church Auditorium, 10 S. Gilbert St." in Iowa City... The program is sponsored by the New Pioneer Cooperative Society. Photos show Shurtleff and Aoyagi. Address: Iowa.

4549. Kudo, Shiro; Hayashi, Mitsuyoshi. Assignors to Asahimatsu Kori-dofu K.K. 1980. Process for producing fibrous food materials. *U.S. Patent* 4,204,005. May 20. 7 p. Application filed 16 Dec. 1977. 1 drawing. [9 ref]
• ***Summary:*** Whole soybeans are soaked in water until fully hydrated (40-55% water). Then they "are passed through a very narrow gap between two grindstones [see drawing] which rotate at high speed (the size of the gap and the sped of rotation depend on both material and desired product but 0.2 mm or less is favorable when fibrous protein is to be made from soybeans)." In this grinding process the whole soybeans are converted into fibers in less than one second. Address: Japan.

4550. *State Journal* (*Lansing, Michigan*). 1980. Annual soy day to promote bean long on protein. May 27. Living Today / Lifestyle section.
• ***Summary:*** Len Stuttman is in charge of the Mid-Michigan "Soy to the World Day" which will be celebrated at a program on June 2 at 7:30 p.m. at the United Ministries in Higher Education, 1118 S. Harrison, East Lansing. His company, INARI Ltd. makes soynut snacks by the ton. "Authors William Shurtleff and Akiko Aoyagi Shurtleff will

© Copyright Soyinfo Center 2013

be the featured speakers, showing slides and explaining how to make soyfoods at home. They will prepare and serve a number of their favorite recipes in addition to discussing soy foods from a nutritional point of view... The program is sponsored locally by, among others, area food cooperatives, Michigan State University's Food Science and Microbiology Club, Tri-County Office on Aging, several area bookstores, INARI, and Unitarian Universalist Church. Admission is free. The Ingham County Task Force on Hunger and Nutrition will sponsor a vegetarian potluck at United Ministries beginning at 6:15 p.m. Those attending are to bring a vegetarian dish and recipe.

"On Tuesday, June 3, Shurtleff will present a program for the Tri-County Office on Aging senior citizen cooks on alternative ways of working protein into meals via soybeans."

Note: This is the earliest published document seen (Sept. 1998) that contains the phrase "Soy to the World," which was coined by Len Stuttman for this event and used later that year for marketing his company's gift packs of soynuts.

4551. Greenwood, Rebecca. 1980. Variety is possible with tofu, tempeh dishes. *Daily Camera* (*Boulder, Colorado*). May 28.
• ***Summary:*** Based on a lecture by William Shurtleff to 200 people sponsored by White Wave.

4552. Bannar, Robert. 1980. Let's talk tofu. *Food Engineering* 52(5):126-28. May.
• ***Summary:*** Contents: Introduction. What is tofu (Shurtleff, New England Soy Dairy). How do you serve tofu? How do you make tofu? (discusses Morinaga tofu). Tofu, step by step. Nutritional data: Tofu vs. lean beef. A photo shows a package of Morinaga Ever-Fresh Silken Tofu.

4553. *Food Product Development.* 1980. Oriental specialty miso expands market horizons. 14(5):26. May.
• ***Summary:*** About Kikkoman Instant Miso-Shiru Soy Bean Soup Mix, available in red (aka) and white (shiro). "Following the lead of its soybean cousin tofu, miso is beginning to break away from its limited market in gourmet, ethnic, and health food stores and filter into select supermarkets." A photo shows the front of the two packages, written in both Japanese and English.

4554. **Product Name:** Whipped Tofu Mousse Pie. Soon renamed Tofu Chocolate Mousse.
Manufacturer's Name: Legume.
Manufacturer's Address: 112 West 75th St., New York, NY 10023. Phone: 212-362-6616.
Date of Introduction: 1980. May.
New Product–Documentation: Letter from Oak Barat to Bill Shurtleff. 1979. Sept. 4. He orders another copy of *Tofu & Soymilk Production.* "Things are going very well here. Looking forward to our meeting. You will be meeting the founding team of 'Operation Soy Bomb' the McNaturals project. With Respect and Peace. Oak."

Letter from Chandri Speer to Bill Shurtleff. 1980. June 23. "We are doing business as Legume and have created a kosher product line including tofu-spinach quiche (eggless), whipped tofu mousse pie, and soon to include contemporary chile..."

Leviton. 1982. Soyfoods. Summer. p. 41. Gary and Chandri Barat isolated a significant product gap–frozen prepared tofu products–then tested their idea at various New York City street fairs during the summer of 1980. They served meals of tempeh chili, tofu chocolate mousse, and tofu cutlets, and watched faces carefully. Buoyed by the positive response, they rented a 90 year old bakery in Brooklyn and set to work. Then in January 1981 they relocated Legume in Verona, New Jersey. Talk with Chandri Barat. 1988. Oct. 28. The Tofu Cutlets and Tempeh Chili were never real products in that they were never packaged and never sold with labels.

4555. Morris, Charles. 1980. International cheese trends. *Food Engineering International* (*Chilton's*). May. p. 30-36.
• ***Summary:*** According to USDA statistics, the world's top 10 cheese producing countries (in metric tons, 1978 preliminary data) are: United States (1,595,000), France (1,060,000), West Germany (710,000), Soviet Union (700,000), Italy (575,000), Netherlands (418,000), Poland (357,000), Argentina (249,000), Brazil (220,000), and United Kingdom (200,000). In the EEC, milk yield per cow has soared 30% since 1960.

The bad news: Agricultural subsidies in the EEC have encouraged farmers to overproduce, creating huge surpluses of milk solids (nonfat dry milk, butter, and whey powder) that have created an international problem. The good news: EEC cheese production expanded 94.4% between 1960 and 1977. Per capita cheese consumption in the UK–13.4 lb in 1976–is relatively static, and less than half of the per capita consumption in West Germany–28.6 lb/year. In the UK, cheddar is by far the most popular cheese, and 88% of all UK grocery shoppers buy cheese at least once a week, with most of them buying at least 2 varieties per week–Cheddar and one other.

One section is titled "Quarg: Potential in the U.S.?" [Note: Tofu is sometimes called soya quark in German.] It states that quarg (or quark, literally *Speisequark*) accounts for 45% of West German cheese production. The average person in West Germany consumes 11 lb of quarg per year, and that 15% of all West German households serve quarg for breakfast. Manfred Kroger of Pennsylvania State University defines quarg as a "soft, unripened, usually low-fat cheese of soft or mildly-supple body and texture, milky-white to fairly yellow in color, with high moisture content, good spreadability and clean–perhaps mildly acidic–taste."

© Copyright Soyinfo Center 2013

Typical skim milk quarg contains 17.2% protein and 0.6% fat. Though quark is sometimes described as "German cottage cheese," this is not at all accurate. Quark is virtually unknown in the U.S. Yet says Kroger: "Deep down inside I feel that American yogurt experience could be repeated with Quarg."

Gist-Brocades NV in the Netherlands has developed a food-grade yeast lactase enzyme, derived from *Saccharomyces lactis* and sold under the brand name Maxilact, which can hydrolyze all or part of the lactose in milk and whey into glucose and galactose at normal refrigeration temperatures of 4ºC within 24 hours. "The product is marketed in the US for both consumer and dairy use in hydrolyzing milk into its component monosaccharides, glucose and galactose, to make low-lactose milk for people suffering from lactose intolerance."

Note: This is the earliest document seen (April 2001) that contains soy cheese industry or market statistics or trends–by geographical region. It gives statistics on quarg in Germany, a potential market for tofu or *soya quark.* However, neither tofu nor soya quark are mentioned. Address: Midwest Ed.

4556. Robertson, Valerie. 1980. Early history of Soyfoods Unlimited, Inc.–a large, pioneering tempeh making company in San Leandro, California.

• ***Summary:*** In Sept. 2011 Bill Shurtleff asked Valerie Robertson, with help from John and Gary Robertson, to reach back 30 years and (with the help of dated documents from those days) to try to reconstruct the origins of Soyfoods Unlimited–a pioneer tempeh maker in California. As Valerie recalls: "I think I first met you and Akiko at Eco House in Walnut Creek, run by Mark Maloney (later Mark Westwind); we kept our bees there and I met you one day when all three of us happened to be there. Then I saw an ad in the *Contra Costa Times* from Soyfoods Center asking for volunteers. I called and started doing work for you both, first doing office work–filing, folding pamphlets and then testing recipes and eating–tempeh!!! You were both very interested in tempeh because your *Book of Tempeh* had recently been published.

"Gary recalls that we were all at your house and you asked Gary (who was a contractor) and John (who was the Biomedical Director at John Muir Medical Center)–'What do you want to do? Are you happy with what you are doing now or would you maybe like to do something else?' You kind of put a bug in their ear. We talked about doing something with tempeh and we started making and eating tempeh.

"We made our own tempeh at our home in Walnut Creek (see photo) using an incubator from John Muir Hospital. It was not hard to make and turned out like magic. Starting in 1981 we sold the tempeh we made at home under the label Vasilia's Homemade Soy Tempeh. My ancestors are Greek and 'Vasilia' is the Greek word for Valerie. Akiko designed the 'Vasilia's' label and we had it printed up. I taught tempeh and tofu cooking classes at a health food store in nearby Concord called The Harvest House. Actually, Akiko came to one of my cooking classes with me as my 'helper.' So I had an outlet via Harvest House and classes to sell tempeh.

"We started to get really interested in starting a tempeh company in the San Francisco Bay Area. Above all it was the tempeh itself that convinced us to do it. 1. We *loved* tempeh. 2. We made excellent tempeh at home. 3. We wholeheartedly believed it was a excellent protein food for vegetarians and all others. We believed in tempeh. It tasted so good, and the texture was amazing. It sold itself (proven during countless demos in stores). We had the desire and ambition to give it a try with a lot of sweat equity (eventually drilling out the concrete for drains, building incubation rooms, setting up a lab etc.).

"But back to the story: You and Akiko were about to leave on a speaking tour, which you called "1980 Soyfoods America Tour," to promote your books and tempeh, and to attend the University of Illinois soyfoods course and the 3rd annual Soyfoods Association of North American conference at the University of Illinois in Champaign-Urbana, Illinois. You both wanted to serve your favorite tempeh recipe during intermission to everyone at each talk. So Akiko asked me to help her make Tempeh Cacciatore (chunks of tempeh in a seasoned tomato sauce) and to "can" these in quart Mason jars. We had a ball together in your tiny kitchen and ended up canning 110 quart jars.

"On May 5, 1980, you and Akiko left Lafayette, California, on your tour, with your big white Dodge van loaded with books, canned tempeh, etc. You were planning to be gone for 3 months. At about this time we decided that we definitely wanted to start a company making tempeh. I think you (Bill) came up with the name, 'Soyfoods Unlimited.' It ended up being a corporation, incorporated in Nov. 1980 as Soyfoods Unlimited, Inc. The 'Inc.' part was costly; we had to paint a lawyer's house in Lafayette in exchange for the Inc.! It also (as you know) protected us as individuals.

"I decided to fly to Illinois to attend the SANA conference to learn as much as I could about making tempeh and the new soyfoods movement; John and Gary were busy with their work and could not go. On July 9-13, 1980, the Third Annual SANA Conference was held at the University of Illinois. It was a big success in every way. About 270-285 people from all over the world attended. I met Dr. Clifford Hesseltine and talked with him about tempeh and our ideas. He was very helpful and encouraging.

"On Aug. 3, 1980, you and Akiko returned to Lafayette from Illinois and your tour. You had given 27 programs and traveled 9,000 miles. At each program you served your favorite tofu and your favorite tempeh recipe, than asked for a show of hands as to which one people liked best–without exception tempeh was the favorite by a 2 to 1 ratio. We were ready to go.

"In about Sept. 1980 we signed the lease on a large

© Copyright Soyinfo Center 2013

building suitable for food processing in San Leandro, California. The first 3 months were rent-free. We knew we would need plenty of money to start the kind of company we envisioned. Gary invested $100,000 cash and John put in more than $35,000 by taking a second mortgage on our home on San Miguel Drive in Walnut Creek. The money started to flow out and our sweat equity began to flow in–John with his engineering mind and logic; Gary with his construction skills, and our knowledge of recipe development. We tested many recipes at home first. Murphy's Law was in full force, as every step in the process took much longer than expected.

"On Oct. 3, Akiko finished designing for us a new Soyfoods Unlimited letterhead, with promotional materials and even aprons for demos. The logo was like a soybean leaf with three leaves, one for each of the three of us (see photo).

"On Oct. 16, 1980, we finished a new 8-panel brochure titled "What is Tempeh?"–a joint venture of the Robertsons and Shurtleffs. We both had the rights to use it as we wished.

"Finally, on Feb. 15, 1981, the three of us begin making tempeh in our state-of-the -American-art $100,000 plant in San Leandro, California. The efficient, 1,850-square-foot operation, had a capacity of 10,000 pounds a week.

A photo shows Valerie seated near some tempeh on a table at her home in Walnut Creek, California. Valerie and John were married. John was Gary's older brother. All three lived in the same large home in Walnut Creek.

"Later that year, on July 8-12, 1981, the 4th Annual Soycrafters Conference was held at Colorado State University, Fort Collins, Colorado. I drove out with you and Akiko and Kazuko Aoyagi and Maria-Elena Nava of Mexico, stopping overnight at your cabin at Lake Tahoe and sleeping out one night in a "snake farm" in the desert.

"Our company did well, launched many delicious tempeh products, and introduced many innovations.

Note: They were the first company to do dry dehulling and hull removal from their soybeans prior to cooking; for this they used a simple and ingenious mill and vacuum cleaner system designed by the Department of Food Science at the University of Illinois but modified and enlarged by the Robertsons. They started selling frozen soy tempeh, but after 2-3 months were selling 90% of their tempeh refrigerated, after steaming. In Sept. 1981 they introduced America's first nonfried tempeh burger, which they vacuum packed. In Jan. 1982 they started air-freighting 1,800 pounds a month of their tempeh burgers to the East Coast. In June 1983 Lonnie "Lon" Stromnes of Namaste Marketing began to work as their full-time marketing director.

"White Wave was a major tempeh maker at that time. In 1986 we met Steve Demos (founder and CEO of White Wave) at Spenger's restaurant in Berkeley and asked him if he would be interested in buying our company. White Wave acquired Soyfoods Unlimited, Inc. on Dec. 1, 1986 and each of the three of us Robertsons ended up owning 1% of White Wave.

"By acquiring Soyfoods Unlimited, White Wave became the largest manufacturer of tempeh in the United States. And he got our greatly superior process for making tempeh, the ability to make his own tempeh starter, our excellent recipes, our list of our distributors, a much greater presence for White Wave products on the West Coast, and much more. He also took on our debt! He thanked us for offering our business and our secrets to him instead of folding up. He is Greek, just like me.

"On May 7, 2002, Dean Foods acquired the remaining 64% of White Wave that it did not already own. At that point we sold our shares of White Wave stock to Dean Foods. Our stocks split and each share became 9,860 shares. We were each bought out at $145.00 a share. Not bad!

"The home I am living in today on the big island of Hawaii was paid for by the sale of the White Wave stock. I only wish I made a deal for endless tempeh!! I love tempeh!"

"I still eat tempeh all the time and still love it. I buy White Wave tempeh out here in Hawaii. I think Turtle Island also has a great white tempeh. I'm so glad it is available here in Hawaii at all the health food stores."

4557. Shurtleff, William; Aoyagi, Akiko. 1980. Soyfoods America Tour: May 5 to June 10; July 25 to Aug. 3, 1980 (Log and trip report–unpublished, including Itinerary with map). Lafayette, California: New-Age Foods Study Center. Unpublished log.

• ***Summary:*** This trip had five purposes: (1) To introduce tempeh to America; (2) To promote the authors' newly published *Book of Tempeh.* Harper & Row, the publisher, paid most of the trip expenses; (3) For William Shurtleff to attend the University of Illinois Short Course in Soybean Processing; (4) To visit and study soyfoods companies in America; (5) To introduce people to the many advantages of a meatless / vegetarian diet.

A photo shows: Shortly before the trip, Akiko (left) and Valerie Robertson (right) (working in the Shurtleff's small home kitchen) "canned" many quart Mason jars of Tempeh Cacciatore to serve at the intermission of each lecture / presentation.

Includes the name and address of 37 people and organizations visited. Many of these were pioneers in the soyfoods and natural foods movement: April 25–Optimum Foods (Napa, California). April 27–David Burns (Sebastopol, CA). May 5–Jeremiah Ridenour of Monterey Bay Soyfoods (Santa Cruz, CA). May 6–Thelma Dalman, Foodservice Director for the Santa Cruz City Schools, *Monterey Peninsula Herald*, Ted & Marie Fehring (Carmel), Paula Welch Terui of Jack and the Beanstalk (Carmel Valley, CA). May 8–Al Jacobson of Garden of Eatin', Mr. Kaye Dunham of Tumaro's, Hugh Roberts of Meals for Millions. May 9–Eddie Okita of Okita Enterprises, and Noritoshi Kanai of Mutual Trading Co. (Los Angeles, CA). May 10–Kay Glass (La Cañada, CA). May 11–Frazier Farms natural

© Copyright Soyinfo Center 2013

foods supermarket (Escondido, CA), Bill Walton vegetarian and basketball star (San Diego, CA; we stay with Craig Wright and Andrew Solony of TriLife; they hope to market Bill Walton's tofu under the TriLife brand). May 12–Clare Quinn of The Farm (Tucson, Arizona; her check bounced so we never got paid). May 13–Kathryn Bennett of Southwest Soyfoods (Santa Fe, New Mexico), Tracy McCallum, Taos. May 14–Leslie Wertz (Alamosa, Colorado). May 16–Stay with Christie and John Baker (Boulder, Colorado). May 17–Steve Demos of White Wave Soyfoods and Good Belly Deli. May 18–Sanford and Rebecca Greenwood of East West Center (Boulder, Colorado). May 19–Judson Harper and the low cost extrusion cooker program at Colorado State Univ., Carol Hargadine of Nupro Foods & Soywaze Tofu (Fort Collins, CO). May 21–Gale Randall of the Indonesian Tempeh Co. (Palmyra, Nebraska). May 22–David Tucker of New Pioneer Co-op Society (Iowa City). May 23–George Strayer of Edible Soy Products (Makers of Pro-Nuts, May 23) and Agricultural Exports (Hudson, and Cedar Falls, Iowa). May 24–Cedar Falls (Iowa) and Minneapolis media. May 25–Pat Aylward and Jamie Stunkard of Joy of Soy Tofu (Minneapolis, Minnesota). May 27–Richard Cihoski (Duluth, MN). May 28–Chris Burant of Bountiful Bean Plant and Jehan Ziegler of Higher Ground Cultured Foods (Madison, Wisconsin). May 29–Danji Fukushima of Kikkoman Foods (Walworth, Wisconsin), Diane Loomans of The Magic Bean Co-op (Milwaukee, Wisconsin). May 30–Susan Dart (Lake Forest, Wisconsin), Research staff of Kraft Foods (Glenview, Illinois), Brian Schaefer of It's Natural (Evanston, Illinois). May 31–Paul Obis of *Vegetarian Times* magazine (with Brother Ron Pickarski) (Oak Park, Illinois). June 2–Lou Richard of Fearn Soya Foods, Leonard and Irene Stuttman of INARI, Ltd. June 3–John Gingrich of The Soy Plant. June 4–Tim and Carol Ann Huang of Yellow Bean Trading Co. (Detroit, Michigan). June 5–Glen Blix and Charles D. Howes of Loma Linda Foods (Mt. Vernon, Ohio; furthest point east on tour). June 6–Warren Hartman of Worthington Foods (Worthington, Ohio). June 7–Mick Vissman and Bill Lutz of Hip Pocket Tofu Deli and Rain Star (Columbus, Ohio), Ed Willwerth of Soya Food Products (Cincinnati, Ohio). June 8–Jay McKinney of Simply Soyfoods (Bloomington, Indiana). June 9–Lynn Adolphson and Bob Thompson of Archer Daniels Midland Co., and Grant Smith of A.E. Staley Mfg. Co. (Decatur, Illinois). June 10-11–Les Karplus of Corn Country Foods and Strawberry Fields. June 11–William Thompson and John Santa of INTSOY (Champaign, Illinois).

During the INTSOY Short Course: July 6–We did a program hosted by Patricia Mutch at Andrews University (Berrien Springs, Michigan). July 9-13–Third Annual Soycrafters Association of North America conference was held at the University of Illinois, produced by Richard Leviton. There were 270-285 attendees, and it made good money.

People at the University of Illinois we met during the course: Dr. William Thompson, Frances Van Duyne, Harold Kauffman, John Erdman, L.S. Wei, A.I. Nelson, M.P. Steinberg, Munir Cheryan, Ted Hymowitz, Woody Yeh.

Return trip after course: July 28–Bob Davis of Light Foods (St. Louis, Missouri). July 30–James Lowrie of Iowa State University (Ames, Iowa). Aug. 2–Lake Tahoe. Aug. 4–Home in Lafayette, CA.

At most of the public classes/lectures on this trip, Shurtleff and Aoyagi served their favorite tempeh and tofu dishes. They wanted to find out how Americans liked tempeh, so they asked for a show of hands as to which the attendees liked best. The tempeh dish was usually Tempeh Cacciatore, and the results were, on average, that the tempeh was preferred by a ratio of 2 to 1 over the tofu.

On this trip, Shurtleff and Aoyagi did 27 public programs, had 28 media interviews and appearances, traveled 9,000 miles, earned $13,000 gross income and $8,500 net income. Address: P.O. Box 234, Lafayette, California 94549.

4558. **Product Name:** Tofu.
Manufacturer's Name: Soy City Foods.
Manufacturer's Address: 2847 Dundas Street West, Toronto, ONT, M6P 1Y6, Canada. Phone: 416-762-1257.
Date of Introduction: 1980. May.
Ingredients: 1985: Water, organically grown soybeans, magnesium chloride.
Wt/Vol., Packaging, Price: 550 gm.
How Stored: Refrigerated.
Nutrition: Per 100 gm.: Calories 72, protein 7.6 gm, carbohydrate 2.3 gm, fat 5 gm.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owners: Pat Guardino & Paul Whitehead.

Label. 1985. 6.75 by 9.5 inches. Plastic film. Orange, green, yellow, and brown on clear. "A Good Source of Protein. Made from Soybeans Organically Grown in Canada." Back label says, "Health is the most precious thing you have. Sustain it by eating good food. Come to our Soyateria for information, education and cooking ideas on Tofu, Soy-Pro, Soyettes, and all of Soy City's delicious and nutritious products. Soyateria–The Soybean Information Center."

Label sent by Jon Cloud. 1989. May 5. Says that this product was introduced in the spring of 1980.

Leaflet (glossy, color, printed in about 2002) sent by Lorraine Guardino, sales manager at Sol Cuisine. 2013. March 11. "Sol Cuisine: Second Nature has found its Sol Mate." This leaflet gives a color photo of the front of the organic tofu package, nutritional information, and the ingredients. Lorraine adds a note that this product was introduced in 1980 and became organic in 1985. The label is now red, dark green and yellow. 500 gm of tofu (drained).

© Copyright Soyinfo Center 2013

Ingredients: Organic soy milk, calcium chloride, and magnesium chloride.

4559. Stuttman, Leonard; Stuttman, Irene. 1980. Mid-Michigan Soy to the World Day (Leaflet). East Lansing, Michigan. 1 p. Single sided. 14 x 22 cm.
• ***Summary:*** "Save money and eat well. Free! Everyone is welcome. Free! Featuring William Shurtleff and Akiko Aoyagi, authors of: *Book of Tofu, Book of Tempeh, Book of Miso.* * slides * good nutrition * recipes * excellent cuisine for pennies! Taste and enjoy delicious soy food samples! June 2, 1980, 7:30 p.m. at U.M.H.E. [United Ministries in Higher Education], 1118 S. Harrison Ave., W. Lansing, Michigan (right behind the Trowbridge Spartan shopping center * park in the rear of the Church)."

Printed with black ink on pink paper. Illustrations show a soybean plant growing (upper right) and a wok on a wok stand with a spatula in it (lower left). This huge and very successful dinner was organized by Leonard and Irene Stuttman of INARI Ltd.

Note: This is the earliest document seen (Sept. 1998) that contains the phrase "Soy to the World," which was coined by Len and Irene Stuttman. Talk with Len and Irene Stuttman. 1998. Sept. 5. Documents show that Len and Irene coined this phrase for this event and later that year used it for marketing his company's gift packs of soynuts. Address: East Lansing, Michigan.

4560. Sunshine Soy Co. Inc. 1980. Retail price list–Effective May, 1980. 4015 Laguna St., Suite "H," Coral Gables, FL 33146. 1 p. 28 cm.
• ***Summary:*** Printed in black on yellow paper. Lists five products: Regular Tofu (14 oz package, or 1 lb bulk), Golden Light Baked Tofu, Soy Melk–Plain, Soy Salad, Eggless Egg Salad. Also: Bulk container deposit: $3.00. At the top center is the company logo, name, address, and phone number. At the top left: "Power packed. Certified organic soybeans." Top center, above the logo: "Missing something? Try soyfoods!" Top right: "Quality, naturally." Address: Coral Gables, Florida. Phone: 305-447-1277.

4561. *Tilth* (*Arlington, Washington state*). 1980. Yay, soybeans! 6(1):18. May
• ***Summary:*** "'Growing and Using Soybeans in the Pacific Northwest' was the title of a conference held on February 23-24 on Vashon Island, Washington. Sponsored by Island Spring Soy Products and the Abundant Life Seed Foundation, the conference goal was to promote more regional food self-reliance by stimulating more local production of soybeans. Luke Lukoskie of Island Spring told the group that he would much rather buy the 275,000 pounds of organically grown soybeans Island Spring uses yearly from a local source than from Minnesota.

"Thirty participants, mainly farmers from Washington and Oregon, were treated to expert lecturers, tours of Island Spring's operation and delicious meals featuring soy foods. The featured speaker was Dr. William Judy, a noted agronomist from the University of Illinois. He talked about soy cultivation techniques and distributed varieties of beans with which to experiment in this climate.

"Growers interested in trying out any of the twenty varieties available for experimentation should contact the Abundant Life Seed Foundation, PO Box 772, Port Townsend, WA 98368, (206) 385-5560."

Note: The subtitle of *Tilth* is "Biological Agriculture in the Northwest." It is published at Rt. 2, Box 190-A, Arlington, WA 98223. The word "tilth" refers to (1) The quality of cultivated soil. (2) The cultivation of wisdom and the spirit.

4562. **Product Name:** [Tofu, and Miso].
Foreign Name: Tofu, Miso.
Manufacturer's Name: Weg Der Natur.
Manufacturer's Address: A-2380 Perchtoldsdorf, Merzg. 34, Austria.
Date of Introduction: 1980. May.
New Product–Documentation: Letter from Lawrence Dreyer of Weg der Natur. 1982. April 27. "The Way of Nature (Weg der Natur), a foundation, was established in Austria with the express purpose of disseminating information about macrobiotics, food, and their relationship to our health... The foundation has, for the past two years been linked to a Natural Food Shop and has been, for this period, producing tofu and miso.

Shurtleff & Aoyagi. 1983. The Book of Miso. 2nd ed. p. 255. Lawrence Dreyer, proprietor. Note: This city is just southwest of Vienna.

Soyfoods Center Computerized Mailing List. 1983. Jan. 17. Owner: Lawrence Dreyer. Soyfoods Center Computerized Mailing List. 1983. June 20. The address has now changed to Helmgasse 75/2, A-8070 Graz, Austria.

Talk with Guenter Ebner of Sojarei Ebner-Prosl. 1990. May 28. This company is now the same as SoyVita and they get their tofu from SoyVita.

4563. Westbrae Natural Foods. 1980. Wholesale food catalog: Spring 1980. Emeryville, California: Westbrae. 23 p. 22 by 28 cm.
• ***Summary:*** On the cover, the lettering is in dark blue and dark red on a tan background. Contents: Westbrae juices. Honey butters. Unsweetened spreads. Preserves. Applesauce. Nut butters (Almond butter roasted, cashew butter roasted, cashew butter raw, cashew-peanut-date butter, raw sesame tahini, toasted sesame tahini, peanut butter crunchy, peanut butter smooth, peanut butter crunchy salted, organically grown Valencia peanut butter crunchy). Cereals (mostly granola, incl. cashew granola, maple almond granola).

Trail mixes: Bay to Breakers trail mix (with sunflower

seeds and Valencia peanuts, both roasted and coated with shoyu), Chisholm trail mix (with sunflower seeds, cashew pieces, and almonds, each roasted and coated with shoyu).

Roasted nuts (bulk, 12-25 lb; * = 9 oz package also available): Tamari almonds*, Tamari cashews*, Tamari Chisholm mix*, Tamari Valencia peanuts, Tamari pepitas (pumpkin seeds), Tamari sunflower seeds*, Tamari nutroaster's mix*, Deluxe tamari nut mix, roasted Spanish [peanuts] splits for butter stock, roasted Valencia peanuts. Packaged nuts.

Wholegrain pasta (incl. Soy linguini). Westbrae miso (imported from Japan): Red miso, brown rice miso, barley miso, Hatcho miso, soybean miso, natto miso. Cold Mountain miso (made in Los Angeles): Light yellow, mellow white, red. Sea vegetables: Kombu, hijiki, arame, wakame, nori. Atlantic Mariculture dulse.

Westbrae tamari and other Asian foods: Johsen shoyu-tamari, Traditional (true) tamari–wheat free, White tiger tofu sauce, natural nigari, agar flakes and sticks, umeboshi salt plums, rice wine vinegar, brown rice wine vinegar, ramen with soup stock.

Helpful tools (incl. Learning Tree tofu kit, wok, vegetable steamers, vegetable brush, utility knife). Informational pamphlets: What is miso? What is tofu? Miscellaneous (incl. falafel mix, tabouleh mix, Ak Mak crackers, sea salt, mayonnaise, black spiced olives, kosher dill pickles). Oils. Sweeteners. Bakery products. Dried fruit. Beans (incl. azuki beans, soybeans). Grains. Nuts and seeds. Non edible (drums, jars, and bottles). Glossary of manufactured products showing ingredients. Address: 4240 Hollis St., Emeryville, California 94608; 4841 Eastern Ave., City of Bell, CA 90201 (10 miles southeast of Los Angeles). Phone: (415) 658-7518 (orders).

4564. Stop & Shop. 1980. Reach for a peach instead of a sweet–and stay in great shape! (Ad). *Hartford Courant* (*Connecticut*). June 1. p. W1CTA.
• ***Summary:*** The section titled "Specialties" (in the shape of a recipe card) includes "Soy bean cake–Fresh, 'Tofu' 16 oz. pkg.–89¢." Also includes fresh bean sprouts, and "alfalfa sprouts."

4565. New England Soy Dairy, Inc. 1980. Action by unanimous consent of stockholders. Greenfield, Massachusetts. 2 p. June 3. Unpublished manuscript.
• ***Summary:*** "Voted: That the Corporation borrow from the Massachusetts Business Development Corporation, Country Bank, N.A. and Pioneer National Bank–Franklin a sum not in excess of $175,000.00." The names of 20 stockholders are given. They include John Baldwin, Michael Cohen, Stephen Hassell, Steven Heller, Jon Lee, Kathleen Leviton, Richard Leviton, Judy Rubenstein, and Thomas Timmins. Address: Greenfield, Massachusetts.

4566. Battin, Sandy. 1980. Tofu is cheap, tasty, high in protein, too. *Herald* (*Duluth, Minnesota*). June 4. p. 1D, 5D. Living & Food section. [2 ref]
• ***Summary:*** An introduction to tofu and soybeans, with several recipes, including Creamy tofu dressing with curry. William Shurtleff and Akiko Aoyagi recently conducted a program on tofu in Duluth, hosted and sponsored by Richard Cihosky, a Duluth city planner. A large photo shows Shurtleff and Aoyagi with dishes of Tempeh sloppy Joes and a Creamy tofu dip for vegetables. They are holding their books on tofu and tempeh.

4567. Bernardino, Minnie. 1980. The question: Tofu or not tofu? *Los Angeles Times.* June 5. Part VIII, p. 12.
• ***Summary:*** In this question and answer column, a reader asks about tofu: How many calories does it have? What is the protein content and how does it compare with the protein in animal foods? Is tofu high in cholesterol and saturated fats?

Ms. Bernardino gives good answers, noting that tofu is "a complete protein, that ism one containing all of the eight essential amino acids." Address: Times staff writer.

4568. Klein, Pamela. 1980. Soy Plant finds room to sprout. *Ann Arbor News* (*Michigan*). June 8. p. F-10.
• ***Summary:*** The Soy Plant has grown rapidly during its three years in Ann Arbor. It began when several people joined to make several hundred pounds of tofu a week in the basement of Eden's Deli at 330 Maynard Street. The 15 to 20 members of the Soy Plant Cooperative, now located at 211 East Ann Street, are about to relocate their production facility to 771 Airport Road what they say may be the best tofu production plant in the country. Producing 1,500 pounds of tofu a day, they have outgrown their present quarters.

Walt Rogaczewski says The Soy Plant plans to enlarge its deli at 211 East Ann St. after the production equipment is moved to the new location, and eventually hopes to operate a restaurant there when next-door The Herb Shop moves. The aim of the restaurant and deli are to educate the public on the virtues of tofu.

Photos by Larry E. Wright show: (1) Jean Raubar and Walt Rogaczewski [later Wally Rogers] taking orders for tofu. Wally is wearing a T-shirt with "Yay soybeans" written across the front. (2) Bob Schroeder pressing out soymilk. (3) ... then pouring the soymilk into containers. (4) John Gingrich cutting a large block of tofu into squares.

A sidebar titled "An introduction to tofu," by Pamela Klein describes how tofu is made and gives three recipes: Scrambled tofu & eggs. Tofu rollups. Tofu lemon cream pie (dairy free). Address: Business-Labor reporter.

4569. Chiavetta, Lee. 1980. Protein-rich soybean may be wise solution to world food crisis. *Iowa City Press-Citizen.* June 9. p. 8. [3 ref]
• ***Summary:*** William Shurtleff (who calls himself "the

© Copyright Soyinfo Center 2013

Johnny Appleseed of tofu") and his wife, Japanese painter and cook, Akiko Aoyagi, discussed soyfoods and global food problems before a soyfood workshop sponsored by the New Pioneer Food Cooperative. Shurtleff said the audience response is generally quite good, even in this beef-and-pork country. Address: Staff Writer, Iowa.

4570. Tufford, Carolyn. 1980. Versatile vegetable assumes many uses and may be the answer to world hunger. *Herald-Tribune* (*Bloomington, Indiana*). June 11.
• ***Summary:*** A summary of a speech which William Shurtleff and Akiko Aoyagi presented about soybeans and soyfoods, especially tempeh and tofu, to about 100 persons of all ages at the Whittenburger Auditorium in Bloomington. Simply Soyfoods, a Bloomington-based company, provided recipes for tofu burgers and tofu onion dip. Address: Asst. Lifestyle Editor.

4571. *Daizu Tanpaku Shinbun* (*Soy Protein Newspaper*). 1980. [Ministry of Agriculture (Norinsho) report on the Japanese tofu industry]. June 15. [Jap]
• ***Summary:*** Percentage of tofu shops using various amounts of dry soybeans per day: 0-30 kg 32.0%, 30-60 kg 31.5%, 60-300 kg 28.1%, 300+ kg 8.4%.

Various types of ownership: Sole proprietorship 81.6%, limited co. (Ltd.) 10.3%, corporation 4.9%, cooperative and other 2.3%.

When the tofu shops were started: After 1945 56.0%, before 1941 15.8%, Taisho period 10.2%, Meiji period (1868-1912) 8.8%, pre-Meiji 0.7%, after 1967 8.5%.

Source of income: Tofu making only 73.4%, tofu plus another job 26.6%.

Number of workers in tofu plant: 1 worker 18.5%, 2 workers 28.4%, 3 workers 16.8%, 4 workers 12.6%, 5-9 workers 14.2%, 10-19 workers 4.7%, 20 or more workers 4.8%.

The biggest problem for the small shops is that the large plants sell their tofu at very low prices.

4572. Speer, Chandri. 1980. Re: Dissolution of Natures Inn Corporation, establishment of Legume. Letter to William Shurtleff at Soyfoods Center, June 23. 1 p. Typed, with signature.
• ***Summary:*** "This is to inform you of the legal dissolution of the entity formerly known as "Natures Inn Corporation."... Gary (Oak) [Barat] and myself are continuing our work in the development and sale of soyfoods. We are doing business as Legume and have created a kosher product line including tofu-spinach quiche (eggless), whipped tofu mousse pie, and soon to include contemporary chile as soon as we can arrange for the koshering of Michael Levine's plant. We have witnessed an extremely favorable public response to our products." Address: Legume, 112 West 75th Street, New York, NY 10023. Phone: 212-362-6616.

4573. Boyd, Billy Ray. 1980. Tofu in the public schools: Santa Cruz's Thelma Dalman introduces a natural foods lunch program. *East West Journal.* June. p. 46-50.
• ***Summary:*** For over 20 years Thelma Dalman has been head of the school lunch program in Santa Cruz, California, schools. As early as 1970, the program was running its own bakery, producing whole-grain breads and pastries. In 1972 Dalman eliminated practically all chemical additives from the school lunches. In 1975 sugar was also eliminated. In Sept. 1978 a vegetarian alternative was instituted (about 8% of elementary students now take that option) and in Oct. 1978 tofu was introduced into the kids' diet in a limited way. "The result is what is perhaps the most progressive school lunch program in the nation, and all without any added burden to the taxpayer.

Today tofu is used increasingly in the program, but it still may not be used to meet the meal requirements of the Type A lunch. So Dalman went to the USDA with a proposal to do a pilot program using tofu in school lunches, but funding was denied. Dalman feels frustrated, and believes that the USDA is not fully meeting the mandates of school lunch legislation. According to a Roper Poll there are almost 7 million individuals in America eating whole foods instead of meat and another 37 million "cautious" about the amount of meat they eat. Two photos by Susan Hillyard show Thelma Dalman, the "Tofu Queen." Address: Santa Cruz and Honolulu.

4574. *Consumer Reports.* 1980. Soybeans–the "meat" that grows on vines. 45(6):360. June.
• ***Summary:*** This sidebar to the article "Vegetarianism: Can you get by without meat?" gives a brief description of the soybean and its food uses. "Roasted soybeans [soynuts] can be a delicious snack food." A small amount of soy flour added to bread or pasta dough appreciably increases those foods' protein content. Sprouted soybeans can be eaten cooked or as a salad vegetable and are a good source of vitamin C.

"Soybeans can be made into a milk that, when fortified, can supply nutrients usually obtained from cow's milk. That's important for total vegetarians or those allergic to milk protein. Soy milk can be made into a cheese: soybean curd, or tofu, familiar to many as the little white cubes floating in the soup at a Chinese restaurant." Also mentions soy sauce, miso, tempeh, and meat extenders or meat analogs.

4575. DeRoin, Nancy. 1980. Tofu: Versatile soybean curd, miracle food of the East, comes West. *Cuisine.* June. p. 32-38, 40, 73-75. [1 ref]
• ***Summary:*** A cover story, with elegant color photos by John Stewart. In Japan, the author visited Taku Watanabe, director of Kyoto's famous Junsei restaurant which specializes in

tofu, Sasa-no-yuki restaurant in Tokyo, Okutan and Takocho restaurants in Kyoto, and 120-year-old Morika tofu factory outside Kyoto. Contains tips for buying and storing tofu plus Japanese-type tofu recipes.

4576. **Product Name:** Living Tempeh Starter [Kit Size 15 x 60 mm Petri dish, or Professional Size 15 x 100 mm Petri dish], Koji Starter for Miso (40 gm) [Light Rice, Red Rice, Barley, or Soybean Koji], Shoyu Koji Starter (60 gm), Natural Nigari (Tofu Coagulant).
Manufacturer's Name: GEM Cultures.
Manufacturer's Address: 30301 Sherwood Rd., Fort Bragg, CA 95437. Phone: 707-964-2922.
Date of Introduction: 1980. June.
New Product–Documentation: Article and ad in Soyfoods. 1980. Summer. p. 4-5. "New Source of Tempeh Starter." "Gordon McBride, PhD, former manager of the Living Culture Department at Ann Arbor Biological Center [Inc. in Michigan], and his wife, Betty Stechmeyer, B.S., announced the formation of GEM Cultures, which will provide high-quality tempeh starter cultures at reasonable prices."

Letter and catalog from GEM Cultures to Tempeh producers. 1980. July. Offers a free sample of professional size Living Tempeh Starter (a pure culture of *Rhizopus oligosporus*).

Shurtleff & Aoyagi. 1985. History of Tempeh. p. 55. This starter, sold live, was grown on agar in petri dishes.

Letter from Betty L. Stechmeyer of GEM Cultures. 1991. Oct. 18. These four basic products were introduced in June 1980. For a while, they tried to import commercial shoyu and miso cultures from Nihon Jozo Kogyo but it never worked, so they ended up ordering via Mitoku.

4577. Jayawardene, Ellen. 1980. Sri Lanka soya recipes. Unpublished manuscript. 15 p. Undated. Unpublished typescript. [Eng]
• ***Summary:*** "In soyabean cookery, time is saved by using broken soyabeans." Contains the following 29 recipes: Soya curry (with broken soyabeans). Soya sambol (with blanched roasted soybeans). Soya string hoppers (with soya flour). Soya waddai (with broken soyabeans). Soya milk (1, made from finely ground raw soya flour). Soya milk curry. Soya milk residue and wheat roti (with okara). Soya murukku (with "full fat soyaflour"). Soyabean milk (2, made from soyabeans). Soya pakoda [pakora] (with soya residue or soya flour). Soya tofu (made from 5 cups soya milk). Tofu curry. Soya milk watalappam (with jaggery or *kitul*). Soya rice thosai [Indian = dosa, dosai] (with broken soyabeans). Soya wheat thosai. Soya rice hoppers (with soya flour). Soya rice kanjee (kande, congee [from Tamil; rice porridge or gruel]; with soya flour or soya milk). Soya–rice keum (with blanched roasted soyabeans). Soya kurakkan roti (*karukkan* = millet; with processed soya flour). Soya groundnut sweet (with blanched and roasted soyabeans). Soyamilk with broken beans. Soya pittu (with soya milk residue). Soya kiri bhat (with soya milk). Soya vegetable mixed curry (with broken soyabeans). 25. Soya coconut chutney (Indian type; with blanched and roasted soyabeans). Fried soyabeans. Soya mixture (with fried soyabeans and flattened rice–*Habala Peti*). Soya rice aluwa [halva, halwa] (with dehulled soyabeans). Soya potato cutlets (with broken soyabeans).

4578. **Product Name:** [Tofu Salad (Soya-Vegetables). Natural].
Foreign Name: Tofusalat (Soja-Gemuese), Salade de Tofu (Soya-Légumes), Tofusalade (Soja-groenten).
Manufacturer's Name: Jonathan P.V.B.A.
Manufacturer's Address: Antwerpsesteenweg 336, B-2080 Kapellen, Belgium.
Date of Introduction: 1980. June.
Wt/Vol., Packaging, Price: Jar.
New Product–Documentation: Photo in Le Compas. 1986. March-April. No. 26. p. 14. Label. Received 1988. 4 by 3.5 inches. Card stock. White, gold, and black on orange. "Tofu Salad. Natuur. Nature. Naturell. Natural. Ingredients (in 4 languages): Tofu (soya proteins)*, sunflower oil*, water, arrow-root, vegetable extract, sea-salt, herbs, spices. * = organically grown. Product weight = 100 gm. Nutritional composition: Vegetable proteins 8.3%, vegetable fats 13.9%, ash 1.62%, carbohydrates 2.3%, 168 calories (Kcal) per 100 gm." Label. Received 1988. 10.5 by 1.25 inches. Glossy paper. Orange and black on a pastoral background with sea gull and duckling. Additional ingredients include (organically grown) carrots and parsley. Note that we have 3 labels for Tofu Salad from Jonathan, probably from different periods. Form filled out by Jos van de Ponseele. 1989. Jan. 11. This product was introduced in June 1980. It appears to be the first of the second-generation tofu products introduced to Europe by the new wave of tofu companies.

4579. **Product Name:** Tofu Spinach Quiche (Eggless).
Manufacturer's Name: Legume.
Manufacturer's Address: 112 West 75th St., New York, NY 10023. Phone: 212-362-6616.
Date of Introduction: 1980. June.
Ingredients: Tofu, soymilk, soy oil, spinach onions, mozzarella cheese, garlic, soy margarine, spices. Crust: Whole wheat flour, soy margarine, sea salt.
Wt/Vol., Packaging, Price: 10 oz.
How Stored: Refrigerated or frozen.
New Product–Documentation: Letter from Chandri Speer to Bill Shurtleff. 1980. June 23. "We are doing business as Legume and have created a kosher product line including tofu-spinach quiche (eggless), whipped tofu mousse pie, and soon to include contemporary chile..." Label. 1980, undated. 3.25 by 4 inches. "Complete protein meals by Legume. 100% natural. No preservatives. No sugar. No artificial additives... If frozen, bake for 35-40 minutes." This is an

© Copyright Soyinfo Center 2013

early American frozen tofu entree. It is eggless and kosher, but not dairyless. Shurtleff & Aoyagi. 1980. List of soyfoods products.

4580. **Product Name:** Legume Tofu Muffin [Tofu-Carrot-Bran, or Tofu-Banana-Bran].
Manufacturer's Name: Legume.
Manufacturer's Address: 112 West 75th St., New York, NY 10023. Phone: 212-362-6616.
Date of Introduction: 1980. June.
Ingredients: Carrot-Bran: Whole wheat flour, bran, carrots, honey, tofu, soymilk, raisins, soy margarine, safflower oil, baking powder, arrowroot, sea salt, natural flavorings.
Wt/Vol., Packaging, Price: 4 oz, cellophane wrapped.
How Stored: Shelf stable.
New Product–Documentation: Label. 1980, undated. 1.5 by 2 inches. "The complete protein snack by Legume. All natural."

4581. Lerner, Andrea. 1980. Tofu: an ideal protein for athletes. *Running Times* No. 41. p. 18-20. June.
• ***Summary:*** New England Soy Dairy now produces about 30,000 pounds of tofu a week. "Tom Timmins attributes tofu's recent surge in popularity to four streams of influence: the maturing natural foods movement, the recognition of a world protein shortage, the need for energy conservation, and the growth of self-help health care. He regards the 1975 publication of *The Book of Tofu* as the catalyst which coalesced these into an outpouring of physical energy, financial investment, and intensive research and development, all focused toward making tofu a staple in the American diet."

4582. Leviton, Richard. 1980. Kicking the dairy habit: Healthy soyfoods are putting old cows out to pasture. *East West Journal*. June. p. 60-65.
• ***Summary:*** Discusses: The infant soyfoods industry. Luke Lukoskie. Soyfoods industry and market statistics. The soy deli. Five established soy delis in the USA. Third Annual Soycrafters Association Conference next month at the University of Illinois. Media coverage of tofu.

Tofu and soymilk recipes (from *The Book of Tofu,* by William Shurtleff and Akiko Aoyagi). Gives six tofu recipes and 3 soymilk recipes. Address: 1. Publisher and editor of *Soycraft,* 100 Heath Rd., Colrain, Massachusetts 01340.

4583. **Product Name:** Atlantean Marinade.
Manufacturer's Name: Light Foods Inc.
Manufacturer's Address: 6144 Bartmer, St. Louis, MO 63133. Phone: 314-721-3960.
Date of Introduction: 1980. June.
How Stored: Refrigerated.
New Product–Documentation: Barbara G. Ostmann. 1980. Post-Dispatch (St. Louis, Missouri). Oct. 29. p. 1E, 4E. "Time for tofu." Bob Davis' company Light Foods Inc. makes marinated tofu.

Talk with Bob Davis, founder of Light Foods. 1994. May 7. His marinated tofu was a commercial product named Atlantean Marinade. It was packed in a heat sealed tofu tub. At first he marinated the product in an oil system, but then he replaced the oil by water, and added a little of that to the tub with the product. He started making it about 3 months after the company started making tofu.

4584. Mintz's Buffet. 1980. June. New soyfoods restaurant or deli. 1040 Third Ave., New York, NY 10021.
• ***Summary:*** Questionnaire filled out by owner of restaurant or deli. 1982. Lists the company's most popular soy-based menu items in descending order of popularity: Tofu ice cream, tofu spinach egg rolls, tofu burgers, tofu quiches, tofu vegetable salads, tofu (cheese) non-dairy burger, tofu rugalach, steamed broccoli with tofu sauce, baked fish with tofu cheese sauce, veg. casserole pies with tofu, spinach tofu pancakes. The highest weekly total sales over the past 6-2 months, the month that this occurred, and why. The average weekly sales during this period. Average hourly wages paid to workers. The business startup cost (amount of money it cost to get the business started). Current profitability status. Plans for the future. Advice the owner would give to someone starting a similar business.

soyfoods industry statistics (News release). Sunrise Farm, Heath Rd., Colrain, MA 01340. 1 p. June.
• ***Summary:*** Raw soybean usage, number of companies, employees, food production, wholesale value, and retail value are given for tofu, other soyfoods (mainly tempeh and miso), and total. Coverage: USA and Canada. Based in part on statistics gathered by Soyfoods Center.

For tofu: Raw soybean usage: 13,500,000 lb. Number of companies: 188. Employees: 680. Production (of tofu): 33,750,000 lb. Wholesale value: $27 million. Retail value: $33.75 million.

For other soyfoods: Raw soybean usage: 4,500,000 lb. Number of companies: tempeh 27, miso 5, other 5. Employees: 225. Production: 11,250,000 lb. Wholesale value: $9 million. Retail value: $11.25 million.

Industry total: Raw soybean usage: 18,000,000 lb. Number of companies: 225. Employees: 905. Production: 45,000,000 lb. Wholesale value: $36 million. Retail value: $45 million. Address: Colrain, Massachusetts.

4588. **Product Name:** Golden Light Baked Tofu.
Manufacturer's Name: Sunshine Soy Co. Inc.
Manufacturer's Address: 4015 Laguna St., Suite "H," Coral Gables, FL 33146. Phone: 305-447-1277.
Date of Introduction: 1980. June.
Ingredients: Tofu, organic soybean, pure water, natural nigari, yeast, tamari, spices.
Wt/Vol., Packaging, Price: 8 oz. retails for $1.50.
How Stored: Refrigerated.
New Product–Documentation: Sunshine Soy Company. 1980. Retail price list–Effective May 1980. 8 oz retails for $1.50. One case of 12 units weighs 6 lb 6 oz and retails for $18.00.

Needleman. 1981. Soyfoods. Summer. p. 29-30. "Tofu plant profiles: Swan Gardens and Sunshine Soy (Miami)." Danny Paolucci started Sunshine Soy in June 1980.

Label. 1983. 3.5 by 3 inches. Self adhesive. Orange, green, blue and yellow on white. Soy fields with sun illustration. "Natural. No preservatives." Label says: "Mtd. by Sunshine Soy Co. Inc., Coral Gables, Florida 33146."

Talk with Danny Paolucci, founder and former owner of Sunshine Soy. He thinks this product was introduced in about Oct. 1980.

4589. **Product Name:** Regular Tofu (Organic, Firm; Packaged or Bulk).
Manufacturer's Name: Sunshine Soy Co. Inc.
Manufacturer's Address: 4015 Laguna St., Suite "H," Coral Gables, FL 33146. Phone: 305-447-1277.
Date of Introduction: 1980. June.
Ingredients: Soybeans, pure water, natural nigari.
Wt/Vol., Packaging, Price: 14 oz. package retails for $0.90.
How Stored: Refrigerated.
New Product–Documentation: Sunshine Soy Company. 1980. Retail price list–Effective May 1980. "Certified organic soybeans." "Regular Tofu." The 14 oz package retails for $0.90; one case weighs 13 lb 8 oz and retails for $10.80. The 16 oz (1 lb) cake sold in 25 lb bulk retails for $0.89. So 25 lb costs $22.25.

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Danny Paolucci.

Needleman. 1981. Soyfoods. Summer. p. 29-30. "Tofu plant profiles: Swan Gardens and Sunshine Soy (Miami, Florida)." Danny Paolucci started Sunshine Soy in June 1980. "Sunshine Soy produces 500 to 750 pounds of tofu daily, of which two thirds is packaged, one third bulk."

Label. 1983, undated. 4.5 by 4 inches. Plastic film. Orange, yellow, blue and green on clear plastic. "Keep refrigerated. Place in water after opening. Change water daily for freshness." Address: 4015 Laguna, Coral Gables, Florida 33146. Recipe for Savory Pan Fried Tofu on back panel. Also on back panel, "Tofu is a Healthy Economical protein source, that can serve as an alternative to traditional protein sources."

Letter from Tom Nazzaro. 1990. Aug. 17. He worked for Sunshine Soy for about 18 months after graduating from the Soycrafters Apprenticeship Program at Island Spring (Vashon, Washington). Now he lives in New Rochelle, New York, and wants to get back into the soyfoods industry.

4590. **Product Name:** Eggless Egg Salad.
Manufacturer's Name: Sunshine Soy Co. Inc.
Manufacturer's Address: 4015 Laguna St., Suite "H," Coral Gables, FL 33146. Phone: 305-447-1277.
Date of Introduction: 1980. June.
Ingredients: Incl. tofu.
Wt/Vol., Packaging, Price: 8 oz. package retails for $1.15.
How Stored: Refrigerated.
New Product–Documentation: Sunshine Soy Company. 1980. Retail price list–Effective May 1980. "Eggless Egg Salad." One case of 12 packs weighs 6 lb and retails for $13.80.

Needleman. 1981. Soyfoods. Summer. p. 29-30. "Tofu plant profiles: Swan Gardens and Sunshine Soy (Miami)." "Sunshine soy markets a mushroom pate and a tofu eggless egg salad under their own label."

4591. Thompson, William N. 1980. History of work with soy and views on the potential of soyfoods around the world (Interview). Conducted by William Shurtleff of Soyfoods Center, July 3. 3 p. transcript.
• ***Summary:*** 1. What is your background and how did you become interested in soy and INTSOY? Ans: He grew up on a farm in Illinois when soy was still a very small crop. In college, he was an ag economist, specializing in farm management, with work on the economics of various types of cropping systems. In 1965 he helped to develop an

© Copyright Soyinfo Center 2013

agricultural university in Sierra Leone, This experience was very valuable in orienting him toward the problems of the developing world. Since then, most of his work has been on these problems. He has had short-term assignments in India, Nepal, and Thailand, where he developed research and education organizations. He is the first director of Intsoy. He had no special interest in soy before joining Intsoy except that soy and maize are major crops in Illinois. He is mainly an administrator, not a technical man. His major role has been to develop an institutional structure to make knowledge on soy available worldwide.

2. What do you feel are the two or three main advancements that INTSOY has made worldwide? 1. Facilitate worldwide network to improve communications among people interested in soy. Regional conferences, newsletter, publication series, training courses at the Univ. of Illinois. 2. Focus on the key problems of soy in tropical countries. Intsoy has more impact in India than in any other country. The India program started in 1965 (funded by US AID) with the cooperation of Indian food scientists and agronomists, specially at Pantnagar and Bareilly. The two university development projects in India were in Madhya Pradesh and Uttar Pradesh. Then the Coordinated Research Project on Soybeans was developed–both utilization and production. The results were exciting. Intsoy grew out of that program as the potential became clear. Now India has 1 million acres in soybeans. Develop soybean varieties that will grow in areas where it was formerly not thought possible. Develop new Maturity Groups 0 and 00 to the north and 9 and 10 to the south as soybeans are grown ever closer to the equator. Work on soybean diseases (mosaic virus), pest control. Intsoy has done more work in soybean production than in utilization. It is hard to get financing for utilization.

New soybean countries working with Intsoy: Ecuador now has 30,000 acres of soybeans, Egypt 50,000 acres, Ivory Coast, Pakistan (good yields), Colombia, Guatemala (work with Plenty from Tennessee), Indonesia, Thailand, Zambia, Kenya, Ghana, and Nigeria. 3. The method for boiling and processing whole soybeans using sodium bicarbonate has been a breakthrough. Soy + cereals make low-cost infant foods.

3. Do you feel that in 20 to 30 years most countries in the world will be growing and processing soybeans. Yes, he thinks that, in the next 15-30 years, most developing countries will have soybeans growing somewhere in their country. This will take adaptive research domestically. Some areas and climate in most countries are suited to soybeans, which can now be grown under a wide range of conditions. The soybean is a high producer of both energy (calories) and protein per hectare.

4. What are your views on low-technology soyfoods in Third World Countries? Which particular foods do you feel will become widely used in South Asia, South America, and Africa. Intsoy's primary orientation is low-tech–using less capital and more labor. The Sri Lanka program is medium- to low-tech. Intsoy is proud of that program and its training activities. There is great potential to expand soybean utilization in this way.

5. How do you feel about the use of soy in livestock feeds in poor countries? Is there a danger that the upper classes will use most of the soy protein to make their meat leaving little for direct food use? This is not much of a problem since prices for soy will always be low for use as livestock feed. We should use soy to help as many people as possible. The more affluent, with economic and political power, will consume more animal proteins and soy. Soy will easily find its way into feed. We need strategies to get soy to the poor–those who need it most. It can also be used in feeds for animals of the poor. Intsoy's bias is to help soy find its way into the diets of low-income people. We must be very careful with the crop that is displaced, so that a net gain results. In India, the soybean fit in as a monsoon crop where no other crop was grown. Beware of the Brazil problem. Intsoy did some variety testing in the Amazon in Brazil. They now have varieties that yield very well in northern Brazil. Brazil has lifted some technologies from the U.S., such as highly mechanized farms, but this will not work in northeastern Brazil. There has been aggressive government support and subsidies for soy in Brazil. Dr. Thompson has lots of respect for Brazil and the government's support for agricultural development. Now they need to work on nutrition and food uses. The main problem for Intsoy is to figure out how soy can met the needs of a particular country or region; not to get soy growing everywhere.

6. Are you aware of a deemphasizing of the role of protein in the diet in Third World countries? How might this affect soy? If we grow enough grains, will the protein take care of itself? Soy fits in nicely with the Green Revolution, although this revolution has led to a decrease in legume production in India. This leads to more funding for IRRI and less for soy. But there is still a problem of protein in some countries that have done a lot to meet calorie needs. It is an oversimplification to say that a diet with adequate calories will contain enough protein. Indians now realize this. They now want more dairy milk–the white revolution.

7. Recent findings at MIT and INCAP have shown that for humans soy protein is approximately equal in quality to that of milk and meats. How long do you think it will be before this finding has an impact in America and the Third World? Dairy milk is no longer considered to contain higher quality protein than soymilk. Dr. Thompson thinks this research data is solid. Perhaps more important, we can produce 4 times as much protein from a unit area of land in the form of soymilk than of dairy milk. So the key problems are acceptability and cost.

In the U.S., as with margarine replacing butter, there is a gradual move toward vegetable proteins. That move is faster in the Third World where people have less choice with

© Copyright Soyinfo Center 2013

their food dollars. Dr. Thompson thinks that when people are introduced to soyfoods in the Third World, they will generally like them, and buy or make them. They are not as resistant to change as we might think–as shown clearly in the Sri Lanka program. Moreover, ingredients like ground whole soybeans or soy flour can be added to baked goods or tortillas where people are not aware that they are eating a more nutritional food.

8. How might the Soycrafters Association and our New-Age Foods Study Center cooperate with INTSOY? Specific projects? He thinks our two organizations are more oriented toward the USA, whereas Intsoy is oriented toward the Third World. Yet he sees good opportunities for cooperation–as in Intsoy learning more about traditional Asian soyfoods such as tofu, tempeh, miso, etc. He hopes our two organizations can have more of an impact on the Third World. Les Ferrier has done lots of overseas utilization work. Maybe we could be on a technical advisory committee (TAC).

9. Would you favor legislation requiring 5-10% fortification of items such as baked goods and chapaties in poor countries growing soybeans if this did not decrease the acceptability of the foods. How might it affect cost? Is there any such legislation?

10. Any other comments? Intsoy's annual budget is less than $2 million, including $850,000 from AID for Urbana and Puerto Rico. IRRI's budget is about $15 million. Part of the reason for the difference is due to the reevaluation of the importance of protein in human diets. Address: Director, INTSOY, Univ. of Illinois at Urbana-Champaign, Urbana, Illinois.

4592. United Press International (UPI). 1980. Tofu–Food that mixes with almost anything. *Journal Star* (*Peoria, Illinois*). July 7.
• ***Summary:*** This article begins: "Remember the lovable schmoo in Al Capp's Dogpatch comic strip–the critter that could turn itself into the most succulent dish or almost anything else? The oriental version of the schmoo could be tofu (toe-foo)."

Lee L. Lee, tofu manufacturer and owner of Tofu, Inc. in Roseville, a suburb of Minneapolis, says tofu can be used to make anything from appetizers to desserts. He considers tofu the perfect health food. Lee came to the USA from Korea in 1963. His handmade tofu began to sell well in about 1975. In 1977, when one woman started buying ten pounds at a time, he bought Japanese equipment to mass produce the product. By April 1978 his production has reached 2,000 lb/week, rising to 13,000 lb/week by Jan. 1980. His tofu retails for $0.90 to $1.00 a pound.

• ***Summary:*** Contents: Introduction. Heart disease and atherosclerosis. Diabetes. Hypoglycemia. Lactose intolerance.

In diabetic diets, tofu is low in carbohydrates (2.25 gm per 3 oz) and saturated fat (0.9 gm), contains no cholesterol, is low in calories (112.5) and is a good source of protein (12 gm). Address: Marketing Director, New England Soy Dairy, Greenfield, Massachusetts.

4604. **Product Name:** Tofu.
Manufacturer's Name: Greenleaf Farm Foods, Inc.
Manufacturer's Address: Box 206, R.D. 2, Waymart, PA 18472. Phone: 717-937-4071.
Date of Introduction: 1980. July.
Ingredients: Well water, organically grown soybeans, purified magnesium chloride nigari.
Wt/Vol., Packaging, Price: Bulk, 3.5 gallon plastic pails, 25 lb/pail.
How Stored: Refrigerated.
New Product–Documentation: Talks with Joel Schuman. 1989. Sept. 5 and 15. Dr. Joseph Jaffer learned how to make tofu in the early 1980s. He developed a really superior product. He was a chemical engineer and thought of this as a pilot project. He made it on his farm and sold it out of his station wagon for several years. He kept trying to interest someone in scaling up, but never was able to find the right person. Finally he sold the pilot equipment to Bob Whitcomb in Woodstock. Joe Jaffer is now at Box 206, R.D. 2, Waymart, Pennsylvania, 18472. Phone: 717-937-4071.

Talk with Joe Jaffer. 1989. Sept. 16. In 1979 he had just finished working elsewhere as a consultant and was looking for good work that he could do on his rural farm, where he preferred to live. He first got interested in tofu after reading

© Copyright Soyinfo Center 2013

a *Wall Street Journal* article titled "Good old bean curd is suddenly popular, but you call it tofu" (12 April 1979). So at age 48 he attended the Second Annual Soycrafters Conference (26-29 July 1979) at Amherst, Massachusetts, and was inspired. He renovated an old barn on his farm in Waymart, incorporated the company as Greenleaf Farm Foods, Inc. in Jan. 1980 (he just checked the incorporation papers), and started a small scale plant making a moderately firm tofu in July 1980. He strove for a quality product, using untreated water from his deep well, organically grown soybeans, and purified magnesium chloride nigari. The key to his good quality was a combination of good water, good ingredients, a sensible processing stream, rigid sanitation control, and product consistency. He delivered his tofu once a week. In bulk in a pail under his ideal conditions, the tofu had a shelf life of almost a month. He did all the work himself, including the delivery. Still by 1987 he was able to make 1,000 lb/day of tofu and a maximum of 3,000 lb/week. He made good money at the business. He wanted to build this into a large, substantial business but never could find the labor and right capital source. So he finally sold the company in June 1987 to Bob Whitcomb, his second largest customer.

• ***Summary:*** This quarter-page black-and-white ad is for the Soycrafters Apprenticeship Program, a professional 21-day intensive "hands-on" course in the commercial production and marketing of tempeh, tofu, soymilk, and related soyfoods. Address: P.O. Box 747, Vashon Island, Washington 98070. Phone: (206) 622-6448.

4607. **Product Name:** Tofu, and Soymilk.
Manufacturer's Name: Jack and the Beanstalk.
Manufacturer's Address: Buckeye Building, 65 W. Carmel Valley Rd. (P.O. Box 525), Carmel Valley, CA 93924. Phone: 408-659-4366.
Date of Introduction: 1980. July.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. The owners are Paula and Nobukatsu Terui. Bill and Akiko Shurtleff visited them and stayed overnight at their home in the Carmel Valley at about the time they started production.

Michael Shedlin. 1985. Monterey Life. Feb. p. 12 "Tofu: That chameleon of the food world." Buck and Leslie Patton, owners of Jack and the Beanstalk, make tofu in Carmel Valley Village. They make 1,700 lb/week of nigari tofu.

Letter announcing sale of business. 1985. "Jack and the Beanstalk began manufacturing tofu in July 1980. Leslie and Buck Patton bought the business in May 1983. It is the only tofu manufacturer in Monterey County. Current tofu production is 1,800 to 2,000 lb/week. Soymilk production is about 15 gallons a week [it is not clear when soymilk production started]. Sale price is $50,000. The gross income grew from $43,705 in 1981 to $81,000 in 1985, when profit was $13,100."

Talk with Russel Hicks of Sweet Earth. 1991. Jan. 31. His company now buys its tofu from Jack and the Beanstalk, which is located in Salinas.

Talk with Albert Park, owner. 1991. Feb. 1. The company, whose name has not changed, is now located at 401 Victor Way, Suite 16, Salinas, California 93907. The previous owner, Mr. Hun Kim, moved it to that location from Carmel Valley about 5 years ago. Both Mr. Kim and Mr. Park are Korean-Americans. The company now makes only 3 products: tofu, soymilk, and soybean sprouts. It is a very small business that makes 1,500 to 1,700 lb/week of tofu.

4608. Kimura, Yuko. comp. 1980. Amerika-jin no kangaeta okara ryôri [Okara recipes developed by an American (William Shurtleff)]. Tokyo. 40 p. Illust. 14 x 20 cm. Translated from *The Book of Tofu* by Miyuki MIE. [1 ref. Jap]
• ***Summary:*** Contents: Forward (preface). Menu. Okara recipes. Tofu salads. About the translators. Address: 1-10-3, Tamagawa Gakuen, Machida-shi, Tokyo 194, Japan.

4609. Leviton, Richard. 1980. Soyfoods in Toronto. *Soyfoods* 1(3):14-19. Summer.
• ***Summary:*** Discusses Vital Eat, Pyung Hwa, Soy City Foods, and Victor Food Products. Victor Food products (102 Hymus Rd., Scarborough, Ontario, Canada M1L 2C9) was founded and is owned and managed by Mr. Stephen Yu. In the 3,600 square foot tofu factory, 13 workers (mostly Vietnamese refugees) produce 1,900 lb/day of tofu, 750 gallons/week of Nutrisoya soymilk, and about 200 quarts/day of kinugoshi soybean pudding. Mr. Yu, who was born in China and educated in California, came to Toronto in 1977 to make an initial market survey. He opened his plant in Feb. 1978, with an initial production of 900 lb/day. Mr. Yu now has accounts in all major Toronto supermarket chains. He reaches about 40% of the Oriental market and about 40% of the overall soyfoods market. He speaks fluent English and is "far more forward looking and market conscious than his Oriental competitors in the Toronto area." His production process and equipment are described in detail. Last summer he appeared on a 10-minute television feature that depicted the story of soybeans from field to shop to table. This was followed, in Jan. 1980, by a major article which profiled his

© Copyright Soyinfo Center 2013

company in the *Toronto Star.* This publicity ushered his tofu into the three big supermarket chains not yet carrying it and sales in the four chains that were rose 100%. Note: This is the earliest document seen (April 2001) that mentions Victor Food Products in Canada.

Soy City Foods, at 2847 Dundas St., is a new soy production site due to open in the spring. Pat Guardino is general manager and Leonard Bugyra is sales manager. The company is a subsidiary of Golden Age, Inc., a spiritual group which operates a successful vegetarian restaurant downtown and is currently installing a second one next door. The company will start by producing about 600 lb/day of tofu, as well as soymilk and soysage. They will supply their contiguous restaurant and sell bulk soyfoods from their own retail counter in the storefront. They will also produce tofu cheesecakes and okara cookies in the restaurant.

Photos show: (1) Soy City Foods and its owners (incl. Pat Guardino) under the storefront sign. (2) Pyung Hwa Tofu Shop, with cakes of tofu cooling in a bathtub. (3) Stephen Yu of Victor Food Products with Nutrisoya soymilk. Address: Colrain, Massachusetts.

4610. Leviton, Richard. 1980. Traditional tofu in New Hampshire. *Soyfoods* 1(3):34-37. Summer.
• ***Summary:*** There are two tofu shops in New Hampshire. Discusses the work of Jay and Pat Gibbons of North Country Soyfoods (once called Crystal Hills Tofu Shop, in Bethlehem, New Hampshire) and Robert Cook and Viney Loveland of Willowbrook Soyfoods (Gilsum, New Hampshire). Each shop "illustrates the virtues and drawbacks of operating a small, labor-intensive, low-technology, low-capital shop that serves a local clientele. Each shop embodies a portion of that original inspiring vision from *The Book of Tofu* of a multiplicity of tiny, traditional, community based tofu shops whose tofu crafters deliver fresh bulk tofu every day.

Crystal Hills opened in September 1977, after a year of preparation by Jay and Pat. Now named North Country Soyfoods, it has modified the traditional soysage recipe by eliminating wheat germ, substituting barley malt for honey, and adding 5% vinegar to increase the shelf life. The company supplies large amounts to Jon Cloud of Cloud Mountain, who helps to export about 1,000 lbs every 3 weeks to co-ops in Montreal and Toronto.

Photos show: (1) Robert Cook and Viney Loveland standing in front of the Willowbrook Soyfoods shop. (2) Jay and Pat Gibbons. (3) Adding nigari to soymilk at Crystal Hills. (4) Stirring the soy slurry in a large caldron. (5) Then pressing the okara for soymilk. Address: Colrain, Massachusetts.

4611. Leviton, Richard. 1980. Effective soyfoods marketing: "We want to do for tofu what flavors did for yogurt." *Soyfoods* 1(3):46-51. Summer.
• ***Summary:*** Discusses the tofu marketing strategies of: (1) Steve Demos at White Wave (Boulder, Colorado); he makes 7,500 lb/week of tofu and tofu products; (2) John Paino of Nasoya Foods (Leominster, Massachusetts). Nasoya makes four tofu spreads and a tofu mayonnaise; (3) Luke Lukoskie of Island Spring, Inc. (Vashon, Washington). Each week the company produces 10,000 lb of tofu, five flavors of Soyfreeze (soymilk ice cream), soyloaf, tempeh, soymilk, and spicy Korean tofu; (4) Madeline Fox, director of Marketing at the New England Soy Dairy (Greenfield, Massachusetts).

Photos show: (1) Tom Timmins (rear view) addressing a soyfoods press conference audience in Boston. (2) A waiter in a black bow tie setting up the tofu buffet at the Seventh Inn.

Note: This is an earliest document seen comparing the marketing of tofu to yogurt (the dairy product) in the title. Address: Colrain, Massachusetts.

4612. Lusas, Edmund. 1980. Tofu from glandless cottonseeds. *Soyfoods* 1(3):11-12. Summer.
• ***Summary:*** "'Did you know that many Asiatic- type foods (including tofu) can also be made from a variety of oilseeds like glandless cottonseed, white-skinned peanuts, sesame, etc., each giving its unique flavor and texture characteristics?' So reports Dr. Edmund Lusas, director of the Food Protein Research and Development Center at Texas A&M University. The Center's objective is the development of food ingredients and products from low-cost protein resources, mainly oilseeds, wherein, as Dr. Lusas notes, 'Processes are developed for converting crops into food ingredients, then uses of these ingredients are demonstrated in compounded food products.' Researchers there are currently working with cottonseed, coconut, sunflower, lupine, sesame, peanut, and soybean."

Tofu made from glandless cottonseed is called TAMUcurd. where "TAMU" stands for Texas A&M University. Address: Director, Food Protein R&D Center, Texas A&M Univ., College Station, TX 77843.

4613. Needleman, Larry. 1980. The natural nigari mystique and the calcium sulfate misconception. *Soyfoods* 1(3):13. Summer.
• ***Summary:*** Since "natural nigari" has the word "natural" in its name, it must be good. Right? "You mean natural nigari is a chemical? Yes, several chemicals. All the coagulants are. And what's more, it has foreign matter present and requires filtering; it's quite expensive, hard to get, not approved by the FDA, slow, inconsistent, difficult to use, and gives lower bulk yields. Well then, what's it good for? Well, it has 'natural' in its name and some people think that if properly used, it gives slightly sweeter tofu with a slightly creamier texture. However, in commercially made tofu, after a day or more in water, I doubt if anyone can tell well-made natural

© Copyright Soyinfo Center 2013

nigari tofu from well-made calcium sulfate tofu. And fresh and warm, they both taste creamy, sweet and delicious."

"Often consumers here in the U.S. think that calcium sulfate (CaSO4) is a chemical preservative or, at the very least, an artificial or human-made ingredient. As you can tell from the preceding paragraph, this is definitely not the case. As a matter of fact, American calcium sulfate is an extremely pure, naturally mined mineral, whereas natural nigari (gathered from extremely clean water) still contains some pollution and foreign matter. Calcium sulfate costs an average of 14¢ per pound (compared with a 50¢ per pound average for natural nigari); it is easy to use; can be added all at once (natural nigari requires careful adding in stages); is easy to obtain; nigari is often hard to locate as it is imported; provides the often much-needed calcium to the vegetarian diet (which natural nigari does not); produces sweet and creamy curds; and generally gives bulk yields of 3.1 of tofu to dry soybeans by weight (natural nigari generally yields 2-2.5 to 1)." Address: President, Bean Machines, Inc., Bodega, California.

4614. Needleman, Larry. 1980. Sanitary bean mill. *Soyfoods* 1(3):42. Summer.
• ***Summary:*** Bean Machines, Inc. announces production of the Bean Machines Disintegrator M6A, a sanitary stainless-steel grinder for soaked soybeans used in making tofu. Address: President, Bean Machines, Inc., P.O. Box 76, Bodega, California 94922. Phone: (707) 876-3341.

4615. **Product Name:** Soydairy Numu (Soymilk).
Manufacturer's Name: New England Soy Dairy Inc.
Manufacturer's Address: 305 Wells St., Greenfield, MA 01301.
Date of Introduction: 1980. July.
Ingredients: Water, soybeans (grown without artificial chemical materials), barley malt, honey.
Wt/Vol., Packaging, Price: Quart.
New Product–Documentation: Ad in Soyfoods. 1980. Summer. p. 11. "Numu. New England Soy Dairy brings you a unique nutritional beverage. Blast off with Numu." Soya Bluebook. 1980. p. 51. "Pure-Pak Soymilk." Article in Soyfoods. 1981. Winter. p. 18-19.

4616. New-Age Foods. 1980. Calling all soycrafters... Start your own soyfoods business. Tofu, soymilk, tempeh, miso. Here are the books that show you how! (Ad). *Soyfoods* 1(3):45. Summer.
• ***Summary:*** This 2/3 page ad is for three books by Shurtleff and Aoyagi: *Tofu & Soymilk Production. Tempeh Production. Miso Production.*

"Since publication in 1976 of *The Book of Tofu* by William Shurtleff & Akiko Aoyagi (there are now a quarter million copies in print), more than 120 new tofu shops and soy dairies have been started in North America. Based on the authors' *Book of Tempeh* and *Book of Miso*, many new tempeh and miso shops have also come into being. The founders of these shops have joined to form the Soycrafters Association of North America. Indeed a growing number of people are joining the Soyfoods Revolution and finding that the soycrafting arts offer just the type of creative, satisfying, and financially rewarding work and way of life they have long been seeking–plus an opportunity to make a vital contribution to the future.

"Three beautiful technical manuals: Based on over seven years of research with master craftsmen and modern producers in the U.S. and around the world, Shurtleff and Aoyagi have prepared three beautiful craft and technical manuals, containing all the information you'll need to start and run your own soyfoods business on any of various scales and budgets from low-cost community shops up to large modern plants. These books, used to start virtually all the shops mentioned above, each come in a handsome large (8½ by 11-inch) format, filled with informative illustrations."

A brief description is given of each, along with the price, and a photo of the cover. "Free with each book: A list of all tofu, tempeh, or miso shops in the West, and applications for the Soycrafters Apprenticeship program, Soycrafters Assoc. of North America, and *Soyfoods Magazine.*"

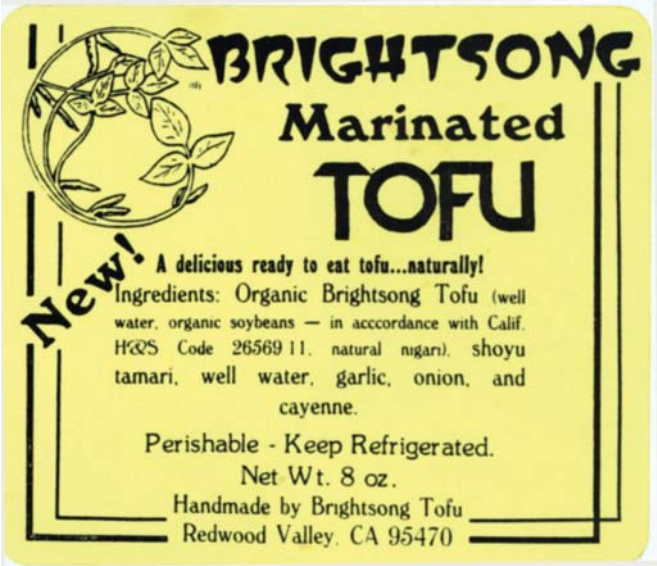
Note: Each time William Shurtleff contributed a full-length article to a magazine, always free of charge, the magazine agreed to run this ad in exchange. Address: New-Age Foods, P.O. Box 234, Lafayette, California.

4617. **Product Name:** New Leaf Soy Ice Dream. Renamed Soy Ice Delight by May 1981 [Orange, Fresh Banana, Carob, or Vanilla].
Manufacturer's Name: Quong Hop & Co.
Manufacturer's Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.
Date of Introduction: 1980. July.
Ingredients: Fresh organic soymilk (water, organic soybeans), honey, soy oil, orange juice concentrate, soy protein, lecithin, vegetable gum.
Wt/Vol., Packaging, Price: 16 oz (1 pint).
How Stored: Frozen.
New Product–Documentation: Labels. 1980, undated. 3.5 inch diameter. Orange, black, and cream on silver-gold. Shurtleff & Aoyagi. 1985. Tofutti & Other Soy Ice Creams. p. 48. FIND/SVP. 1981, May. "The tofu market: Overview of a high-potential industry." p. 69. The company "recently introduced frozen desserts called Soy Ice Delight."

4618. **Product Name:** Marinated Tofu (Tofu in a Marinade).
Manufacturer's Name: Redwood Valley Soyfoods Unlimited.
Manufacturer's Address: P.O. Box 371, (8473 East Rd.), Redwood Valley, CA 94570.
Date of Introduction: 1980. July.

© Copyright Soyinfo Center 2013

Ingredients: Tofu, shoyu, garlic, onion, cayenne. Yellow label: Organic Brightsong tofu, soy sauce, filtered water, garlic, onion, cayene.
Wt/Vol., Packaging, Price: 8 oz cakes.
How Stored: Refrigerated.



New Product–Documentation: Label. 1981. 4 by 3.5 inches. Self adhesive. Black on yellow. "New! A delicious ready to eat tofu... naturally!" Spot in Soyfoods. 1982. Summer. p. 56. "Prepared Tofu Salads and Desserts." Letter from Richard Rose. 1987. Aug. 29. The company was named Brightsong Tofu from its founding in June 1978 to June 1980. Then it changed to Redwood Valley Soyfoods Unlimited, until June 1982, when it changed to Brightsong Light Foods.

4619. **Product Name:** Vege-Herb Tofu (With Fresh Vegetables and Herbs Pressed into the Curds).
Manufacturer's Name: Redwood Valley Soyfoods Unlimited.
Manufacturer's Address: P.O. Box 371, Redwood Valley, CA 94570.
Date of Introduction: 1980. July.
New Product–Documentation: Letter from Richard Rose. 1987. Aug. 29. "Bulk packing; had fresh basil, beets, chard, and carrots pressed into the curds." Brightsong's second product.

4620. *School Food Service Journal.* 1980. Soybean products: New vegetarian delights. Children are special. 34(6):48, 50. June/July.
• ***Summary:*** Tofu and soy oil are used in the School Foodservice Program in Santa Cruz, California. A photo shows Food Service Director, Thelma Dalman, and Central Kitchen Manager, Maxine Prairie, with dishes they have prepared that look good, taste good, and are nutritious–low in fat and cholesterol and rich in protein. A recipe is given for Tofu Tamale Pie (100 servings). Dalman prepares and serves about 5,000 school meals a day, with a staff of 52 full-time employees and an annual budget of $1.5 million.

4621. Shurtleff, William; Aoyagi, Akiko. 1980. Soyfoods: One answer to world hunger. *New Age Journal* (*Boston, Massachusetts*). July. p. 34-38. [3 ref]
• ***Summary:*** Here are ten reasons why: 1. Optimum land utilization. 2. Lowest cost. 3. High nutritional value. 4. Time tested. 5. Remarkably versatile. 6. Appropriate technology. 7. New dairylike products. 8. Hardy and adaptive. 9. Free nitrogen fertilizer. 10. Energy and resource efficient. Also discusses: Present patterns of soy-protein utilization, and new developments with soyfoods in America (120 tofu shops and soy dairies, The Farm in Summertown, Tennessee, *Soycraft* magazine, Bean Machines, etc.). Excerpted from *The Book of Tempeh.* Address: New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549.

4622. Shurtleff, William. 1980. Soyfoods in America 1980: Progress, problems, challenges. Opening remarks to the 1980 Soycrafters Conference at the University of Illinois. Opening paper presented at Third Annual Soycrafters Conference, Urbana, Illinois. July 9. 14 p. Unpublished manuscript.
• ***Summary:*** The full text of this presentation has been transcribed. Ten trends and the major events of the past 12 months are reviewed. The key challenge is still to build a strong Soycrafters Association. Address: New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549.

4623. **Product Name:** Tofu Spinach Quiche.
Manufacturer's Name: Soy Plant.
Manufacturer's Address: 711 Airport Blvd., Suite 1, Ann Arbor, MI 48104.
Date of Introduction: 1980. July.
Ingredients: Tofu (organic soybeans, nigari), spinach, onions, nutritional yeast, tahini, soy sauce (soybeans, wheate, salt), vinegar, spices. Crust: Wholewheat flour, corn oil, sea salt.
Wt/Vol., Packaging, Price: 5 oz.
How Stored: Refrigerated.
New Product–Documentation: Oval Label in Soy Plant scrapbook from about 1980. 3¼ by 1½ inches. Black on white. 5 oz. Hand lettered.

4624. *Soyfoods.* 1980. Centrifuge proves efficient in tempeh production. 1(3):40. Summer.
• ***Summary:*** The Tempeh Works (Greenfield, Massachusetts) has purchased a laundry extractor to spin dry their cooked soybeans for tempeh production. This centrifuge works much better than the simple drying table with overhead fans described in *Soycraft* (1(2):39–Winter 1980). The extractor was purchased used for less than $1,000. It dewaters the

© Copyright Soyinfo Center 2013

beans in 2 minutes.

Island Spring (Vashon, Washington) also uses a centrifuge for making tempeh; theirs cost $225 from a junk dealer who buys equipment lots from Army surplus. A photo shows a long-haired production worker at The Tempeh Works with their centrifuge.

4625. *Soyfoods.* 1980. Custom designed conveyorized tofu cooling tank. 1(3):41. Summer.
• ***Summary:*** New England Soy Dairy plant manager and technical expert Jon Lee has designed and had manufactured a 32-foot-long conveyorized tank filled with cold water for cooling and rinsing tofu. Details are given. The tank lowers the temperature of the tofu to 65ºF. A photo shows the tank, filled with tubs of tofu, and with workers standing at each side.

4626. *Soyfoods.* 1980. Soyfoods to the American taste: An interview with Drs. Clifford Hesseltine and Hwa L. Wang. 1(3):58-62. Summer. [1 ref]
• ***Summary:*** Dr. Hesseltine has just returned from a six-week trip to East Asia. In Taiwan he studied soy sauce fermentation and gave advice on setting up a national collection of microorganisms used in soybean fermentations. In Indonesia he attended an international symposium on various aspects of fermentation as a method a processing foods, with an emphasis on soybeans in Southeast Asia. "These people look to us in the West as far as science is concerned. Suddenly we see scientific institutions in the U.S. and now in Europe being interested in high protein foods made from soybeans. The East Asians follow and say, 'Well, if its very interesting for the West, then we should be interested in it.'" There is increasing interest in traditional, lightly-processed soyfoods.

Way back in 1963 the NRRL did research on making tempeh perforated plastic bags. Today, "on the island of Java, 90 percent of tempeh is now produced using plastic bags, including the tempeh I saw being sold on the street,..."

Dr. Wang, who was born and raised in China, recently returned there to visit family. She noted: "To me, it is a very sad story... Even tofu is rationed now. You can't buy tofu every day, probably once a week." "Soy sauce is not hard to get. Miso never had as much importance as in Japan... Tofu and soymilk are the two foods that were very common before. We stayed at a hotel and we only had soymilk once a week, in the morning for breakfast. And tofu, I don't even remember having eaten any."

"Dr. Hesseltine: Natto is one of the most rapidly growing fermented soyfoods in Japan, which surprised me, over something like miso. Natto has become more popular because it's supposed to be the great aid for digestion. In the new form, natto is much more acceptable as a food because the old, traditional type is sticky (it's a real mess) and this isn't. This is coated, so what you get is like small peanuts coated with powder; they don't stick to your hands."

Dr. Hesseltine: "What I saw in Taiwan really fascinated me–pressed tofu sheets [*pai-yeh*]. We would like to see the soycrafters making some recommendations [for us] as to practical areas of research for soybeans."

Portrait photos show (1) Dr. Clifford Hesseltine. (2) Dr. H.L. Wang. Two photos of each, seated. Address: NRRC, Peoria, Illinois.

4627. *Soyfoods.* 1980. Bringing the soybean home to the Northwest. 1(3):6. Summer.
• ***Summary:*** Island Spring recently sponsored a 2-day seminar on the production of soybeans in Washington and Oregon. 35 people attended, including 6 farmers.

4628. *Soyfoods.* 1980. Pressing cloths. 1(3):39. Summer.
• ***Summary:*** An excellent coarse woven pressing cloth that works better than Japanese press bags and is cheaper is available from: Tekto Inc., 420 Saw Mill River Road, Elmsford, New York 10523. Phone: 914-592-5010. The fabric is identified as 3A-15GG and is AGB monofilament Nylon.

4629. **Product Name:** Tofu Salad.
Manufacturer's Name: Soyplant (The).
Manufacturer's Address: Ann Arbor, Michigan.
Date of Introduction: 1980. July.
Ingredients: Fresh tofu, fresh vegetables, wine vinegar, safflower oil, soy sauce, spices.
How Stored: Refrigerated.
New Product–Documentation: Label in Soy Plant scrapbook from about 1980. 3 by 2 inches. Black on white. The variable weight and incomplete listing of ingredients indicates this must have been made at the deli on East Ann St. This product was sold in bulk or in plastic tubs, unpasteurized, like a fresh salad.

4630. **Product Name:** Soynaise: Imitation Mayonnaise.
Manufacturer's Name: Soyplant Co-op Inc. (The).
Manufacturer's Address: 711 Airport Blvd., Suite 1, Ann Arbor, MI 48104. Phone: 313-663-8638.
Date of Introduction: 1980. July.
Ingredients: Tofu (soymilk, nigari), sesame oil, soymilk (organic soybeans, water), cider vinegar, honey, salt, garlic, dulse, love.
Wt/Vol., Packaging, Price: 12 oz.
How Stored: Refrigerated.
New Product–Documentation: Label in Soy Plant scrapbook from about 1980. 3 by 3 inches. Black on white. 12 oz. "Please reuse or recycle this container." This product was sold in plastic tubs, unpasteurized, like a fresh dressing.

4631. **Product Name:** Miso-Garlic Dressing.
Manufacturer's Name: Soyplant Co-op Inc. (The).

© Copyright Soyinfo Center 2013

Manufacturer's Address: 711 Airport Blvd., Suite 1, Ann Arbor, MI 48104. Phone: 313-663-8638.
Date of Introduction: 1980. July.
Ingredients: A rich, smooth blend of miso (fermented soybeans and rice), safflower, shoyu sauce, garlic, onion, cider vinegar, water, lemon oil.
Wt/Vol., Packaging, Price: 16 oz.
How Stored: Refrigerated.
New Product–Documentation: Label in Soy Plant scrapbook from about 1980. 2½ by 2½ inches. Black on white. 16 oz. Sold in a plastic tub.

4632. Switzer, Larry. 1980. Spirulina: The whole food revolution. Proteus Corp., 2000 Center St., Suite 1221, Berkeley, CA 94704. 94 p. Illust. by Akiko Aoyagi Shurtleff. 22 cm. [78* ref]
• ***Summary:*** Contents: Acknowledgements. Preface. Earthrise 1969. 1. Introduction to microalgae. 2. History of spirulina. 3. Cultivating around the world. 4. Farming and processing. 5. Nutritional value. 6. How to use spirulina. 7. Recipes. 8. Spirulina as a world food. 9. Global impact of microalgae. New earthrise 2001. References.

Soy-related recipes include: Aquamole dip or dressing (with tofu and tamari soy sauce, p. 64). Pro-miso soup (p. 65). Pro-miso canape (p. 69).

The Preface notes that Larry Switzer, who used to be a filmmaker, first learned about spirulina in the winter of 1974 from a small article in *Solar Energy Digest.* Earlier that year he had formed a partnership with Dr. William J. Oswald, a University of California prof. of public health and engineering, and a recognized world expert on the mass cultivation of microalgae. Proteus is being financed by a far-sighted philanthropist, David Donneley, a wonderful guy. Proteus was incorporated in California in late 1975. In 1975-76 extensive laboratory and pilot scale experiments were conducted in Concord, California. Robert Henrickson and Dr. Alan Jassby joined Proteus in 1976. Small ponds were constructed in the Imperial Valley of Southern California, and by 1979 larger farms were in operation there. In 1978 Proteus began importing spirulina from Sosa Texcoco, S.A., of Mexico, the major world producer. Address: Founder and President, Proteus Corp.

4633. **Product Name:** Kinugoshi Soybean Pudding.
Manufacturer's Name: Victor Food Products, Ltd.
Manufacturer's Address: 102 Hymus Rd., Scarborough, ONT, M1L 2C9, Canada. Phone: 416-752-0161.
Date of Introduction: 1980. July.
New Product–Documentation: Leviton. 1980. Soyfoods. Summer. p. 17. The company makes "about 200 quarts daily of *kinugoshi* soybean pudding."

4634. Palmer, Jane. 1980. Yogurt's success inspires tofu backers. Soybean product adapts to main dishes, desserts. *World-Herald* (*Omaha, Nebraska*). Aug. 6. p. 17.
• ***Summary:*** William Shurtleff and Akiko Aoyagi were in Omaha, Nebraska, last week to present a program on tofu and tempeh, two soybean products. Contains three tofu recipes: Tofu burgers. Creamy tofu dressing. Tofu cheesecake. Photos show Shurtleff and Aoyagi. Note: This is an second earliest document seen comparing the marketing of tofu to yogurt (the dairy product) in the title.

4635. Porter, Sylvia. 1980. Tofu gaining popularity as cheap protein source. *Washington Post.* Aug. 7. Special to the Washington Star. Widely syndicated.
• ***Summary:*** "Once found only in health stores and Oriental restaurants, this white, custard-like substance is sold today in major supermarket chains, served in schools and hospitals, and added to cakes, quiches and casseroles available at urban delicatessens. Many nutritionists regard tofu as an ideal diet food.

"I've got tofu fever," claims David Mintz, owner of a Manhattan kosher catering service and deli, Mintz's Buffet. "It's a food of the future, a miracle food. We're using it in almost everything–a Caesar dressing, noodle charlotte, even in fresh fruit salad–and people are so glad because they can eat these foods now whereas they couldn't before because they weren't kosher or because of their low-fat, low-sodium diets." Mintz now turns out a range of foods from beef stroganoff, muffins, cheesecake and quiches, items which Jewish dietary law prevented his making before he discovered non-dairy tofu. Also mentions Matsuda-Hinode Tofu Co., Harry Tanikawa (their sales supervisor), New England Soy Dairy, and *The Book of Tofu* by Shurtleff and Aoyagi. "Tofu in some form is among the possible new products Dannon Co. is investigating for distribution."

Note: This is the earliest document seen (Oct. 2001) concerning the work of David Mintz with soyfoods. In Aug. 1981 he created and introduced Tofutti, a pioneering non-dairy, kosher soy ice cream based on tofu. He later founded a company named Tofutti Brands, Inc.

Note 2. Also appeared in *New York Daily News.* Aug. 7. "Japan's tofu may be next big import"; *Transcript-Telegram* (*Holyoke, Massachusetts*). Aug. 11, p. 12. "Tofu–another Japanese import"; San Francisco Chronicle. Sept. 8. "Import that's not hard to swallow."

4636. Ralphs. 1980. Ralphs super savings (Ad). *Los Angeles Times.* Aug. 7. p. I18.
• ***Summary:*** Includes: "Everfresh Silken Tofu. 10½ oz. pkg. 59¢." Note: The "Ever-Fresh" brand is made and sold by Mori-Nu (Morinaga). Address: [Southern California].

4637. Recchia, Camille. 1980. Takoma Park changing: Influence of Seventh-day Adventists wanes before influx of newcomers. *Washington Post.* Aug. 10. p. B1.
• ***Summary:*** Takoma Park, Maryland, has long been the

© Copyright Soyinfo Center 2013

world headquarters of the Seventh-day Adventist Church. Thousands of Adventists, a group that is largely vegetarian and known to eat a healthy diet, live in the area. But today at a local health food store, "Adventist grandmothers buying soy bean curd and organically grown cantaloupes are outnumbered by young people who are only dimly aware of the church's connection with Takoma Park."

In addition, "the influence of the Adventists, who were once a dominant force in the town's politics, real estate, and commerce, is beginning to wane." Church leaders are becoming more sensitive to community issues and more willing to solicit and listen to the views of others. Address: Staff writer.

4638. *Journal Star* (*Peoria, Illinois*). 1980. Tempeh, tofu, miso may replace hot dog. Aug. 11.
• ***Summary:*** At a recent national conference held at the University of Illinois, William Shurtleff discussed the potential and possible future of these three foods. His remarks were supported by those of Dr. Clifford Hesseltine, a microbiologist at the USDA's research laboratory in Peoria, Illinois. Hesseltine added that the use of tempeh is growing "at a phenomenal rate."

4639. Huey, Pamela J. 1980. Conference sees future for tofu, tempeh, miso. *Hartford Courant* (*Connecticut*). Aug. 13. p. 1A.
• ***Summary:*** "If the 1980s are the years of tofu, the '90s belong to tempeh and miso. All three are soybean products long used as staple foods in several Asian countries." William Shurtleff spoke about these foods at a recent national conference at the University of Illinois.

Eight years ago tofu was largely unknown in the United States. During the past four years, the number of tofu makers in the U.S. has gone from 60 to 240, according to Shurtleff.

"Tempeh is a fermented soy food held together by the fibers of the tempeh culture. It has a meaty texture and flavor." Dr. Clifford Hesseltine spoke about tempeh, whose use is growing "at a phenomenal rate."

"Shurtleff is convinced the system of feeding animals for slaughter is the major reason for hunger in the world. Soy foods are a logical replacement for the feedlot system, he said." Address: United Press International (UPI).

4640. Palm, Göran. 1980. Företag för sojaförädling till Örsundsbro [Company for soybean processing in Orsundsbro]. *Uppsala Nya Tidning* (*Sweden*). Aug. 16. p. 10. [Swe]
• ***Summary:*** First major article on Ted Nordquist's tofu. Address: Sweden.

4641. Palm, Göran. 1980. De ska laera svenskarna att aeta tofu [They will teach Swedes to eat tofu]. *Industri-Handel-Hantverk.* Aug. 20. [Swe]
• ***Summary:*** About Ted Nordquist's pioneering work with tofu in Sweden. A photo shows Nordquist. Address: Sweden.

4642. **Product Name:** Tofu (Bulk).
Manufacturer's Name: California Kitchen.
Manufacturer's Address: 1919 Park Ave., Chico, CA 95928. Phone: 916-893-0986.
Date of Introduction: 1980. August.
Wt/Vol., Packaging, Price: Bulk.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Owner: Cal Parrott. Address listed as 1020 Main St., Chico, California 95926. Talk with Cal Parrot. 1987. Dec. 16. He started the business. Also makes mochi. Sells at only 2 stores in Chico, plus several restaurants.

Form filled out by Cal Parrott. 1998. July 18. California Kitchen, 1919 Park Ave., Chico, CA 95928. Phone: 530-342-1405. His company began making and selling tofu in August 1980.

4643. Dinshah, Freya. 1980. More vegan recipes. Malaga, New Jersey: American Vegan Society. 27 p. Aug. No index. 22 cm. Spiral bound.
• ***Summary:*** Soy-related recipes include: Soy bean cheese spread (with cooked, ground soybeans, p. 5). Slicing soya cheese (with vegetable margarine and soya powder/flour, p. 5). Simple soy cheese (with soya powder and nutritional yeast, p. 5). South Jersey soy patties (with soy granules, p. 7). Corn bread (with soya powder/flour, p. 9). Sesame soy milk (with soya powder/flour, p. 11). Sunflower soy milk (with soya powder/flour, p. 11). Scrambled tofu, Tofu salad dressing, Yeasted tofu, Tofu Cantonese, Tofu, mushrooms and greens, Tofu in savory crumbs, Tofu turino, Tasty tofu strips (baked with soy sauce) (all p. 15). A photo on the title page shows the author. Address: 501 Old Harding Highway, Malaga, New Jersey 08328.

4644. **Product Name:** Original Tofu Press.
Manufacturer's Name: Health Science Enterprises.
Manufacturer's Address: P.O. Box 186, Yakima, Washington. Phone: (509) 722-3601.
Date of Introduction: 1980. August.
New Product–Documentation: Ad and poster. 1980. "Now honorable American women can make their own nutritious tofu with the original tofu press." 2 pages.

Letter from Loren D. Price, President of HSE to William Shurtleff of Soyfoods Center. 1980. Aug. Loren wants to put the Soyfoods Center catalog in his tofu kit, then have Soyfoods Center pay him a commission on each copy of *The Book of Tofu* that he sells. The kit is manufactured in Fruitland, Washington. Sales are less than 11 kits/month. The suggested retail price is $19.95 each.

4645. **Product Name:** Island Spring Tempeh Burgers.
Manufacturer's Name: Island Spring, Inc.
Manufacturer's Address: P.O. Box 747, Vashon, WA 98070.
Date of Introduction: 1980. August.
New Product–Documentation: Letter from Luke Lukoskie. 1982. July 18. He started selling tempeh burgers in Aug. 1980; Shurtleff & Aoyagi. 1985. History of Tempeh. p. 56. These were "America's (and the world's) first commercial tempeh burgers, made on a small scale in individual petri dishes." Form filled out by Yvonne Kuperberg. 1988. Oct. 1. These were sold only in bulk. No labels in existence.

4646. Norton, Reggi; Wagner, Martha. 1980. The soy of cooking: A tofu and tempeh recipe book. White Crane, P.O. Box 3081, Eugene, OR 97403. 24 p. Aug. Illust. No index. 22 cm.
• ***Summary:*** Contents. Introduction. Recipes: Salads and dressings. Lunches and light meals. Main courses. 5. Desserts. Address: Eugene, Oregon.

4647. **Product Name:** Tempeh.
Manufacturer's Name: Pacific Tempeh.
Manufacturer's Address: 1508 62nd St., Emeryville, CA 94608. Phone: 415-655-4441.
Date of Introduction: 1980. August.
New Product–Documentation: This company was founded by Travis Burgeson. His initial interest was in making okara tempeh. Label. 1980, undated. Black and white on yellow. Label, 1983, undated. 3.5 by 4.5 inches. Red and brown on white.

Leaflet. About 1980, undated. "Pacific Tempeh: A Cultured Soyfood." 4.5 by 8.5 inches. Black on beige. Contents: What is tempeh? It tastes good! Recipes for: Deep-fried tempeh. Pan-fried tempeh. Seasoned tempeh. Sweet and sour tempeh. Tempeh burgers. Tempeh salad spread.

Soyfoods Center Computerized Mailing List. 1982. July 23. Owner: Travis Burgeson. Ad in Whole Life Times. 1982. Aug. "It tastes good!" Shurtleff & Aoyagi. 1985. History of Tempeh. p. 51-52. America's second true tempeh company and the first to sell vacuum packed tempeh. It was refrigerated, not frozen.

4648. Shurtleff, William; Aoyagi, Akiko. 1980. How to make tofu at home easily and inexpensively. *Vegetarian Times* No. 40. Aug. p. 36-40.
• ***Summary:*** Describes a new and improved method, with illustrations of the utensils needed, 3 designs for a homemade forming box, and 11 illustrations of key steps in the process. Partially adapted from *The Book of Tofu* (Ballantine edition). Address: New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549.

4649. *Soyanews* (*Sri Lanka*). 1980. Over 100 take part in Open House. 3(1):1, 4-5. Aug.
• ***Summary:*** "The first Open House on the processing of soya foods organized by the Soya Foods Research Centre at Gannoruwa last month turned out to be a highly successful event which surpassed the expectations of is organizers.

"The Soya Open House, primarily meant for those in the commercial food business, was attended by over 100 representatives from both the private and public sectors from many parts of the island.

"There were caterers and bakery owners, canteen managers and hostel keepers as well as researchers and designers of food processing machines. Most of them were visiting the Centre for the first time."

Photos show: (1) Participants following closely the words of home level instructress, Miss Etampawala. On display are puddings, salad creams, biscuits and watalappan all made with soya. (2) A demonstration of home level soya food preparation. (3) Participants examining samples of soya flour. (4) Soya milk being strained, in a hanging square of muslin, during preparation of tofu. (5) Participants examining bakery products that contain 5% soya flour. (6) Demonstration of intermediate level preparation of soya snacks. The cracker prepared is a mix of rice flour and soya flour.

4650. *Vashon-Maury Island Beachcomber.* 1980. Lukoskie chairs soycrafters. About July or Aug.
• ***Summary:*** Luke Lukoskie has been named chairman of the board of directors of the Soycrafters Association of North America. This honor was bestowed upon him last week at the association's third annual conference held at the University of Illinois at Urbana-Champaign. A portrait photo shows Lukoskie. Address: Washington.

4651. Victoria, Hugo. 1980. Re: Intention to start a company named S.R. Natural to make tofu in Mexico. Letter to William Shurtleff at Soyfoods Center. 1 p.
• ***Summary:*** Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the proposed company's name, address, and phone number. Owner: Mr. Hugo Victoria.

Note from Nicole Black. 1988. Oct. 24. "I know this man personally and he has never made tofu." He may once have intended to. Address: Vasconcelos 143 Ote NL, Col. de Valle, Mexico.

4652. **Product Name:** UFO Tofu (Water Packed in Bulk).
Manufacturer's Name: Wildwood Natural Foods.
Manufacturer's Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1980. August.
Ingredients: Filtered water, organic soybeans, nigari.
Wt/Vol., Packaging, Price: 10, 15, 20, or 25 lb of tofu in a bucket with water.

© Copyright Soyinfo Center 2013

How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Paul Duchesne.

Leviton. 1981. Soyfoods. Winter. p. 61. "Putting tofu in the lunch boxes of America."

Leviton 1983. Soyfoods. Summer. p. 42. "Wildwood's sandwich power." With their 340 square foot steam kettle tofu shop, Wildwood, located in Fairfax, California, produces 2200 pounds of nigari tofu every week of which one half is used for sandwiches, the other half for distribution as bulk tofu under the "UFO" brand name ("us feeding ourselves").

Leaflet. 1983. 8 by 6 inches. Blue on white (see next page). "UFOTOFU" (UFO tofu) is a palindrome, which reads the same forward or backward. (Soybean Curd). "Made in the tradition of the open cauldron shop with hand presses, filtered water and lots of good energy."

Talk with Paul Duchesne. 1989. Aug. 16. This was the first tofu produced by Wildwood, introduced in Sept. 1981. It had this name from day one. Bill Bramblett came up with this palindrome, which also meant "us feeding ourselves tofu." The wings were similar to Sufi wings.

Talk with Billy Bramblett, one owner of Wildwood Natural Foods. 1998. Aug. 8. On 8 August 1980 (08-8-80) Wildwood first made their own tofu. Though Billy was already a palindrome freak he did not plan for the date of the first day that Wildwood made tofu to be a palindrome. Already, one of his favorite books was "Goedel, Escher, Bach." He invented "UFO Tofu," a palindrome (it can be spelled forward and backward the same way) which was the "official" name of all Wildwood's early tofu. Some people called in to ask what it meant; he told them "Us Feeding Ourselves Tofu." One person asked if they got their tofu from a UFO (unidentified flying object). Ans: Sure. Q: Were the soybeans organically grown? Ans: There are no pesticides in outer space. Yo Soy, Wildwood's soymilk, is also a palindrome. All of the tofu Wildwood made in the early days was sold in bulk, floating in water in a white plastic bucket that was refrigerated, had a plastic bag liner, a lid, and a large blue and white label on the side that read "UFO Tofu." One could buy 10, 15, 20, or 25 lb of tofu in a bucket. He has a Wildwood T-shirt with "UFO Tofu" written on it. Actually, Wildwood has made many T-shirts; the first one probably appeared in about 1981-82. Michael Pierce did the art for all of the early ones. They were green on white, silkscreened. One of them showed all the equipment used in the tofu process, in the order used, so that one can see how tofu is made. The current T-shirt has Wildwood's logo on it. All Wildwood's drivers wear them.

One year for Christmas in the late 1980s, some of Billy's friends who knew he was into palindromes, gave him a crossword puzzle book titled "Rats Live on No Evil Star"–which is a palindrome. There were 101 (a palindrome) puzzles. The answer to all the clues in all the puzzles were palindromes. One of the answers in one puzzle was "UFO Tofu." The clue was "Close Encounters of the Curd Kind" (a play on words derived from the title of the 1977 movie "Close Encounters of the Third Kind," by Stephen Spielberg). A fellow named Bella Fleck, who has a band named the Flecktones, came out with an album several years ago titled "UFO Tofu." One of the songs was also titled "UFO Tofu."

4653. Steiman, Harvey. 1980. Tofu: Trader Vic's creativity Americanizes an Asian staple. *San Francisco Examiner* 116(72):B7-B8. Sept. 3.
• ***Summary:*** Two photos show Trader Vic Bergeron, the famous San Francisco restaurateur. His menu now features tofu in dishes such as tofu Parmesan. and tofu mixed into fish balls, salad, chicken liver pate, and chicken balls. Recipes are given for tofu-chicken liver pate, chicken balls, fish balls, Parmesan tofu, and tofu herb chicken. Address: Food Editor.

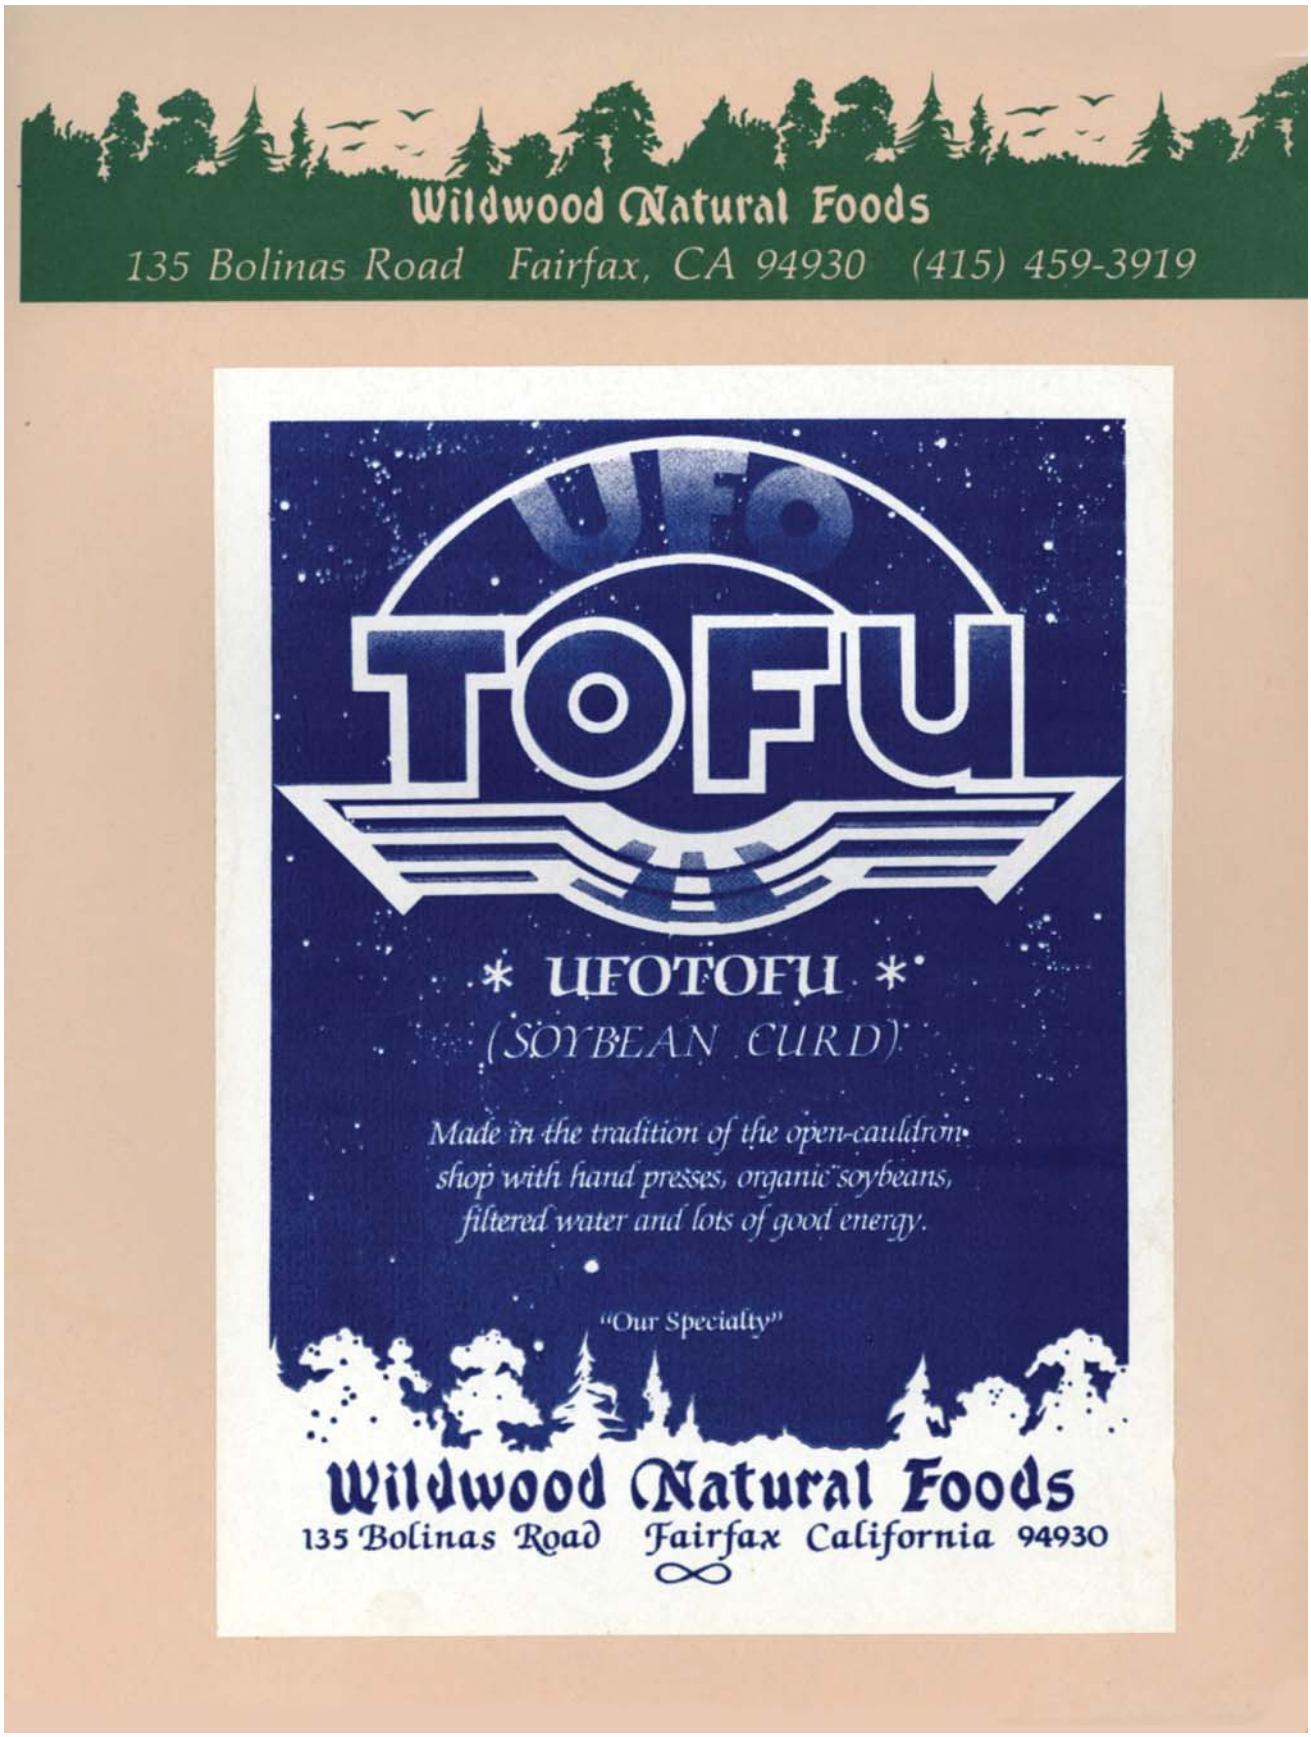
4654. Dwan, Lois. 1980. Trader Vic's: Divided, not conquered. *Calendar* (*Los Angeles*). Sept. 7. p. 98. Sunday.
• ***Summary:*** Trader Vic Bergeron, born in 1902, started his first restaurant, Hinky Dinks, in Oakland. In 1938 he announced he was going to go fancy, and sent everyone home to put on a jacket. Now he owns 20 fine restaurants extending from San Francisco (opened in 1951) to the Beverly Hills Hilton (opened in 1955) to Tokyo, from London to Munich. Today Trader Vic "is into tofu," as is his vice president, Chan Wong. "He rolls it into little balls with minced ham and spices, coats them with Japanese bread crumbs (*panko*), deep fries. He serves big chunks of *tofu* in a sauce with thin beef. He makes a terrine with chicken livers and *tofu*, garlic, mace, nutmeg, brandy... No cholesterol. Fantastic." A photo shows Trader Vic seated at his desk, smiling and gesturing. Address: Los Angeles.

4655. Nelson, David. 1980. Wok's cooking? Well, Chinese burritos and more. *Los Angeles Times.* Sept. 11. p. SD_A6.
• ***Summary:*** This is a review of the Chinese restaurant named China Camp, on Pacific Highway near downtown San Diego; it builds its menu and theme around the cooking and environment experienced by pioneer Chinese immigrants to California. They presumably adapted local ingredients to Chinese cookery.

For example, the "Mother Lode Tofu" is a meatless appetizer or entree that "features wedges of deep-fried *tofu* (bean curd) and a good selection of shredded vegetables in an excellent spicy sauce." Since tofu is bland in flavor, it made an excellent backdrop for the subtle mix of flavors in the sauce.

4656. *SoyaScan Notes.* 1980. Is naturally occurring MSG found or formed in tofu or shoyu? (Overview). Sept. 11.

© Copyright Soyinfo Center 2013



© Copyright Soyinfo Center 2013

Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** There are no sodium glutamates in tofu or shoyu. They exist in tofu as glutamic acid residues incorporated into the protein molecules, and in shoyu as ammonium glutamates. Both of these are different from commercial MSG (monosodium glutamate) as sold by Ajinomoto, both in their chemical composition and in their physiological effects.

4657. *Toyo Shinpo* (*Soyfoods News*). 1980. Shokubunka kenkyûka Nagayama-shi, Nihon sôzô gakkai de kôen: Sekai ni rui o minai kansei sareta shokuhin nattô [Mr. Nagayama, a food culture researcher, lectured at a creative Japanese academic meeting: There is only one complete food like nattô in the world]. Sept. 11. [Jap]
• ***Summary:*** During the natto fermentation, vitamin B-2 increases fivefold. Natto sells best in the winter, whereas tofu sells best in the summer. A photo shows Mr. Nagayama standing in front of a blackboard, holding some papers.

4658. Soyfoods Center. 1980. Re: Morinaga Ever-Fresh Silken Tofu. Letter to U.S. natural and health food distributors, Sept. 17. 2 p. Typed, without signature on letterhead.
• ***Summary:*** This form letter, written by William Shurtleff, begins: "As you well know, one of the brightest new stars on the natural- and health foods horizon is *tofu.* Recent statistics published by the Soycrafters Association of North America show that $33.7 million of tofu (retail value) were sold in the U.S. during the past year, and that the market is expanding at the remarkable rate of 25 to 30 percent a year!"

Soyfoods Center has been working as a consultant for the Morinaga company of Japan, which is one of Japan's largest and oldest producers of fine foods... Morinaga has developed a high-quality new product called Morinaga Ever-Fresh Silken Tofu. This tofu is packaged in a revolutionary new way–developed by Morinaga–that allows the tofu to stay as fresh as the day it was made for up to six months without refrigeration or preservatives of any kind... The secret lies in the Tetra Pak container, developed in Sweden and now used throughout the world."

"For you, as a distributor of natural and health foods, this tofu has several important advantages: 1. No refrigerated distribution required." 2. No spoilage losses or returns. 3. Wonderful silken-smooth texture. 4. Color recipe brochure. 5. Excellent price. 6. Private branding available. 6. Free trial offer.

"Free sample offer: Please clip here. YES. Please send me one carton of Morinaga Ever-Fresh Silken Tofu and 24 free color recipe brochures, free of all charge and obligation." A form for the person's name, company name, address, and phone is provided. "Please return this form to: The Soyfoods Center, P.O. Box 234, Lafayette, California 94549." Address: P.O. Box 234, Lafayette, California 94549. Phone: (415) 283-2991.

4659. Thalman, Margaret Morse. 1980. Memories of her father, William J. Morse (Interview). Conducted by William Shurtleff of Soyfoods Center, Sept. 18 and Oct. 3. 1 p. transcript.
• ***Summary:*** William Morse, her father, as born on 10 May 1884 in Lowville, New York (upstate). His father was a butcher. W.J. Morse's wife, Edna, went on the trip to East Asia, as did Margaret, who was an only child. Edna kept diaries for her daughter and wrote down what happened every day–in child's language such as "Played in the park."

William Morse wrote much of the book about soybean foods that he hoped to publish. He wrote it by hand on yellow lined paper; it was never published and she has sent the manuscript to the American Soybean Association.

During World War II W.J. Morse was under a great deal of pressure. A great many people called on him for information. He first became aware that he had an ulcer in about 1943, and this affected his diet. He lost a lot of weight (you can see it in the photos of him from that period) and he had to go on a "baby food diet." He ate soft, bland foods including soymilk, tofu and acidophilus soymilk and yogurt. He bought soyfoods at the Seventh-day Adventist health food store in Takoma Park, Maryland–including the soy ice cream he loved. She does not recall that he ever made tofu or soymilk at home.

After returning from their two years in East Asia, he and his wife used soyfoods regularly in their diet. He liked very much to make sukiyaki for dinner, especially for guests or special occasions. He had a low sukiyaki table made by having the legs cut of a regular table. Everyone would sit on cushions on the floor, with an electric hot plate on the table. His sukiyaki recipe always included tofu.

He and his wife liked to put soy flour in homemade breads and waffles. He did not eat a lot of meat but neither was he a vegetarian. He ate Boston baked soybeans when his wife fixed them.

William Morse bought the house in Tacoma Park, DC, in 1917 and lived there until he retired, shortly after which he and his wife moved to Eastchester New York, where he lived the rest of his life.

He spent the last ten years of his life writing his book (from time to time she typed up his notes), doing lots of gardening and reading, and writing many letters. He kept in touch with the world of soy.

His office, where he had shelved with packaged soyfoods, was in Washington, DC. He did not move his office to Beltsville until about 1939–when all of USDA moved there.

Note: P.H. Dorsett was born on 21 April 1862. So at the time the expedition first arrived in Japan he was age 67. Dorsett had a grown daughter.

"William Morse was a gentle, soft-spoken person,

© Copyright Soyinfo Center 2013

who liked others and they liked him. He liked to tease, and the secretaries at his office all loved it. He was a very easy person to get along with; he was slow to anger and never cursed. He wasn't aggressive; where some might push, he would give in. He was intelligent. His work came first. He was not financially ambitious." He was a rather heavy cigarette smoker. His daughter remarked that "If anything upset him, he didn't let it out on his fellow workers."

"His friends and co-workers called him "Bill." His family called him "Will."

She still has her diaries and some of her father's small notebooks of the trip plus many photographs glued into scrapbooks. She has no files of his left; she sent them all to the American Soybean Association.

Verna Donavan was W.J. Morse's secretary at USDA starting not long before he went to the Orient to study soybeans. After Morse returned, when the Bureau of Home Economics became interested in soybeans, the two of them were often asked to come over and to taste the soybean dishes they had prepared.

Update. 2004. April 14. She has a book that was given to her father when he retired from USDA. In it are letters from many companies (cereal companies, oil companies, etc.) praising his work. It also has letters of praise from his co-workers and his superiors. Address: 22 Interlaken Rd., Eastchester, New York 10709. Phone: 914-632-2508.

4660. Lundberg, Göran. 1980. Tofu. Kan det varna na't foer Orsundsbro? [Tofu: Are there lessons to be learned from Orsundsbro?]. *Enkoepings Posten Tisdagen.* Sept. 23. p. 16. [Swe]

• ***Summary:*** About Ted Nordquist's pioneering work with tofu in Sweden. A photo shows Nordquist sitting in a chair.

4661. Hope, Jane; Bright-See, E. 1980. Vegetarian diets need good planning: Nutrition. *Toronto Star* (*Ontario, Canada*). Sept. 24. p. C-3.

• ***Summary:*** Describes the different types of vegetarians and their different needs. The section titled "Soy protein" begins: "But the amount and quality of protein in plant foods is usually lower than that found in animal foods. The exception, of course, is soy protein. Soy products, such as cakes [tofu?] and soy milk, are excellent sources of protein."

Discusses protein complementarity and good books on vegetarian nutrition and recipes.

4662. Sass, Lorna J. 1980. A couple on a tofu mission in the West. *New York Times.* Sept. 24. p. C3. Reprinted in the San Francisco Chronicle. Nov. 12. p. 22.

• ***Summary:*** About William Shurtleff and Akiko Aoyagi, authors of *The Book of Tofu.* A large photo shows each person. "The two people most responsible for catapulting tofu from the wok into the frying pan are William Shurtleff and Akiko Aoyagi." In the early 1970s they began to work on introducing this inexpensive foodstuff, high in protein and free of cholesterol, to the United States. Concerned that there is a world food crisis, they are committed to the philosophy expressed in the book *Diet for a Small Planet,* that if people in Western cultures relied on beans and grains rather than meat, the problem would start to improve. Shurtleff says that they wanted to find a way to make soy foods appealing to Big Mac [hamburger] fans. "'We decided to try to do for tofu and other soy foods what Johnny Appleseed did for apples.'"

A graduate of Stanford University in physics and industrial engineering, Shurtleff first became interested in natural foods and a healthy diet starting in 1968, while living at the Tassajara Zen Mountain Center near Carmel Valley, California. In 1971 he went to live in Japan where, as a student with little money, he found he could eat for as little as 30 cents a day by relying on tofu as his major source of protein. There he met Miss Akiko Aoyagi, a Tokyo-born fashion designer who was also fine cook. Using the seven different types of Japanese tofu, she prepared her favorite tofu recipes for him. A turning point came when they shared a meal at Japan's oldest haute cuisine tofu restaurant [Sasa-no-yuki, in Tokyo].

At the time they had no publishing experience and only about $100 between them. Yet within several weeks they had found a publisher and were hired on a part-time basis by an American company to do interpreting, that paid enough to free them to research the subject thoroughly for the next four years.

In December 1975 their first book, *The Book of Tofu,* as published by Autumn Press, a small publisher originally headquartered in Japan and now in Massachusetts, interested in both tofu and vegetarianism. The book was received so enthusiastically–over 100,000 copies are now in print, that Ballantine Books decided last year to publish a revised mass market pocket-book edition.

In 1975 they founded the New-Age Foods Study Center, with offices in Tokyo and Lafayette. Their center has published three volumes: *Tofu and Soymilk Production* ($17.95), *Tempeh Production* ($15.95), and *Miso Production* ($17.95). These books are directed at people interested in manufacturing "soy foods." In 1978 they helped to found the Soycrafters Association of North America. Last July the association held its third annual conference.

Lorna Sass is also the "general editor of the forthcoming reprint series of significant historical cook books." Address: Culinary historian, New York.

ginger sauce;...” Chicken teriyaki is also served. Address: Restaurant critic.

4664. **Product Name:** Firm Tofu, and Soft Tofu.
Manufacturer’s Name: Aloha Grocery Store.
Manufacturer’s Address: 4515 Centinela Ave., Los Angeles, CA 90066. Phone: 213-822-2288.
Date of Introduction: 1980. September.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company’s name, address, and phone number. Owner: Mr. Uehara.

Talk with Tom Uyehara. 1988. Oct. 24. His parents, Hiroshi and Alice Uyehara started making 2 types of tofu just for sale at their grocery store in 1981. The firm was made with calcium sulfate. In 1983 when Tom graduated from college he set up a plant on the property and continued to make those two types of tofu.

4665. **Product Name:** Tofu.
Manufacturer’s Name: Annelies’ Breads & Tofu.
Manufacturer’s Address: Route 2, Box 72, Floyd, VA 24091. Phone: 703-789-7080.
Date of Introduction: 1980. September.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company’s name, address, and phone number. Owner: Annelies Brady.

4666. **Product Name:** [Tofu].
Manufacturer’s Name: Aversano Tofu Shop.
Manufacturer’s Address: Driestratt 87, Waregen W-VL, Belgium.
Date of Introduction: 1980. September.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company’s name, address, and phone number. Owners: Eduardo & Racine Aversano.

4667. **Product Name:** Tofu.
Manufacturer’s Name: Caldron Tofu Shop.
Manufacturer’s Address: c/o The Caldron Restaurant, 308 E. 6th St., New York, NY 10014. Phone: 212-473-9543.
Date of Introduction: 1980. September.
How Stored: Refrigerated.
New Product–Documentation: Letter from Steven Zeev Berg (c/o Caldron Restaurant, 308 E. 6th St., New York, NY 10003). 1976. Aug. 20 and Sept. 14. He encloses $12 for a photocopy of *The Book of Tofu, Vol. II.*

Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). “Appendix B: Tofu Shops and Soy Dairies in the West.” p. 397. Caldron (The), 306 E. 6th St., New York, NY 10003. Phone: 212-473-9543. Owner: Unknown.

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Caldron Tofu Shop is now at 308 E. 6th St., 10114. Owner: Gloria Bremmer. This tofu shop operated out of the kitchen of The Caldron, a macrobiotic restaurant in New York City.

Talk with Richard Sandler. 1997. Sept. 16. “My first recollection of tofu cheesecake (or tofu pie) was 1969 in New York. The Caldron restaurant was started by Marty Schloss, his wife Glory, and his mother, Seena. I was the first cook at The Caldron; I set up the kitchen, the menu, the bookkeeping, etc. The Caldron first opened for business on 18 April 1969.” About a month of two after The Caldron opened, its three founders started a natural-food grocery story and bakery right next door to The Caldron; it was named The Caldron’s Well.

4668. **Product Name:** Tofu.
Manufacturer’s Name: Cantai Tofu Corp.
Manufacturer’s Address: 700 S. Leland Ave., Thunder Bay, ONT, P7E 2P6, Canada.
Date of Introduction: 1980. September.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company’s name and address. No phone number.

4669. **Product Name:** Tofu (Hard & Soft), Tofu/Okara By-Products, Soymilk.
Manufacturer’s Name: Cleveland Tofu Co.
Manufacturer’s Address: 1797 Radnor St., Cleveland Heights, OH 44118. Phone: 216-371-3222.
Date of Introduction: 1980. September.
Ingredients: Tofu: Water, organic soybeans, nigari.
Wt/Vol., Packaging, Price: Tofu: 1 lb.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company’s name, address, and phone number. Owners: Paul Sheldon & Bob Karr.

Label. 1982, dated. 4 inch diameter. Green on clear plastic lid. “Keep refrigerated. Store in fresh water.” Founded by Bob Carr. Form filled out by Brooks Jones and Bob Carr. They started on 22 March 1982. They presently make hard & soft pressed tofu, tofu/okara by-products, and soymilk.

Levin. 1984. Crain’s Cleveland Business Weekly. Feb. 19. “Cleveland Tofu Co. must educate the market.”

Dun & Bradstreet database search. 1984. May. Company has two names: Ohio Tofu Company Inc. and Cleveland Tofu. Address: 6210 White Ave., Cleveland, Ohio 44103. Phone: 216-361-8638. Year started: 1983. Sales this year: $250,000. Employees: 11. Principals: Brooks Jones, President; Robert N. Carr, Vice President.

© Copyright Soyinfo Center 2013

Talk with someone from Ohio. 1988. Feb. 22. Brooks Jones had to close his business in December 1987. His plant was in a bad part of town and he had to spend all his profits on security guards.

Talk with Charles Meeker of VitaLite Foods. 1992. Feb. 27. Charles does not know why Brooks went out of business but he has heard that his father was extremely wealthy and he was just doing the tofu business as a sort of hobby. He didn't really need the money. A year or so ago he was painting strips on parking lots, and now he is in the consulting business. Moreover, he ran the business poorly. When Vitalite Foods bought the Cleveland Tofu name and trademarks from Brooks, he did not even know the names of his accounts. His records were poor. The man who did the deliveries knew where the accounts were but Brooks didn't. Cleveland Tofu was selling a lot of tofu at the time VitaLite took it over.

4670. **Product Name:** Organic Tofu.
Manufacturer's Name: Downeast Soy Dairy.
Manufacturer's Address: RFD No. 2, Box 162, Lincolnville, ME 04849. Phone: 207-596-6525.
Date of Introduction: 1980. September.
Ingredients: Organic soy beans, water, nigari (natural coagulant).
Wt/Vol., Packaging, Price: 16 oz packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name (Downeast Soy Dairy) and address. No phone. Owners: Robert Lovell & Fauna Kenison.

Soyfoods Center Computerized Mailing List. 1981. Jan. 22. Address: Main St., Throndike Arcade, Rockland, ME 04841. Owner: Rob Lovell. The listing gives another entry: Downeast Soy Dairy, R.F.D. 2, Box 162, Lincolnville, ME 04609. Shurtleff & Aoyagi. 1982. Soyfoods Industry: Directory & Databook. p. 1. Owner is Rob Lovell. Label. 1982, dated. 5 by 4 inches. Plastic film. Red, black, brown and white on clear film. "Keep refrigerated." Company is now Down East Soy, in Camden, ME 04843. In about 1987 Down East Soy was at P.O. Box 1246, Rockland, Maine 04841.

Talk with (call from) Lynn Farver. 1991. Aug. 12. She and her husband are thinking of starting a tofu shop in Maine. She has talked to Rob Lovell who was and is a school teacher and tried to make tofu as a part-time business. He stopped making tofu 5 years ago but he still has all his equipment, which he wants to sell. Rob's phone is now 207-236-2161.

4671. **Product Name:** Tofu.
Manufacturer's Name: Firewood Foods.
