William Shurtleff. 1983. "History of Soya in Latin America," p. 38. "In 1980 the American Richard Jennings founded the TAO-FU Foundation in Quito and began making tofu for orphanages, day-care centers, restaurants, and food stores. By 1982 production had reached 55 kg (120 lb) per day and acceptance was greatly improved when the tofu was preseasoned with salt. In mid-1982 Jennings returned to the USA to buy and run a tofu shop in New Mexico. At that time he turned the tofu shop in Ecuador over to Arnulfo Ibarra, an employee of the Ministry of Agriculture of Ecuador, who was also actively interested in soynuts, both the salted and brown-sugar-coated types."

4675. **Product Name:** Tofu.
Manufacturer's Name: Gems Tofu.
Manufacturer's Address: 58 Pond Ct., Webster, MA 01570. Phone: 617-943-5880.
Date of Introduction: 1980. September.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Mary Chabot.

4676. **Product Name:** Tofu.
Manufacturer's Name: Golden Temple Tofu.
Manufacturer's Address: Route 1, Box 132-D, Espanola, NM 87532. Phone: 505-753-9865.
Date of Introduction: 1980. September.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Hargobind S. Khalsa.

Card labeled "New Tofu Shops." Soyfoods Center Computerized Mailing List. 1981. Jan. 22. The company is now Golden Temple Foods, P.O. Box 247, Espanola, New Mexico 87532. Phone: 505-753-3270. Owner: Hargobind S. Khalsa.

4677. **Product Name:** Ready to Eat Tofu.
Manufacturer's Name: Hatsuko's Oriental Food.
Manufacturer's Address: 1410 S. 11th St., Lawton, OK 73501. Phone: 405-353-5560.
Date of Introduction: 1980. September.
Ingredients: Soybeans, water, bittern.
Wt/Vol., Packaging, Price: 1 lb packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Gene Burns.

Label. 1982, undated. 6 by 4.5 inches. Plastic film. Reddish purple and green on clear film. "Fresh. Serve hot or cold. Proteins with no cholesterol. Water change recommended for freshness." Drawing of Mt. Fuji and a pagoda. Company name: Hatsuko's.

4678. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Institut Tenryu.
Manufacturer's Address: 8 rue Rochebrune, 75011 Paris, France. Phone: 805-913-5.
Date of Introduction: 1980. September.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Tsuyoshi Ito. Note: By 1981 the address has been changed to 2 rue Rochebrune.

Shurtleff & Aoyagi. 1982. Soyfoods Industry: Directory & Databook. p. 3. Letter from Noboru Sakaguchi of Paris. ca. 1984. Says Tenryu is no longer in business.

4679. **Product Name:** Tofu.
Manufacturer's Name: Lampley Tofu Shop.
Manufacturer's Address: 525 S. 16th St., Philadelphia, PA 19146.
Date of Introduction: 1980. September.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name and address. No phone number. Owner: David Lampley.

4680. **Product Name:** [Tofu].
Manufacturer's Name: Le Grain d'Or.
Manufacturer's Address: Rue Voltaire 29, Geneva CH-1201, Switzerland.
Date of Introduction: 1980. September.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name and address. No phone number or owner.

Letter from Sjon Welters. 1982. April 16. Some Italian people started a tofu plant in Geneva. They bought a whole system from Jakso in the Netherlands.

Anne-Marie Jaccard. 1982. Illustre (Lausanne). No. 4. p. 63. Jan. 27. "Une graine pour l'an 2000." In the French-speaking cantons of Switzerland, there are only two places: (1) The Macrobiotic Center of Lausanne, 7 ruelle de Bourg, and (2) Le Grain d'Or, 7 rue Voltaire, Geneva.

4681. *League for International Food Education* (*LIFE*) *Newsletter.* 1980. Soybeans in Guatemala. Sept. p. 3.
• ***Summary:*** "With 1500 lbs of soybeans donated by UNICEF, Plenty has been teaching the people of Guatemala,

concentrating on the wives of farmers who have shown an interest in growing soybeans, how to make soymilk and tofu (bean curd) using a metate and utensils traditionally found in their homes.

"Classes are held once a week for four students at a time. All students have learned the process in one lesson. They return to their homes provided with cheesecloth and small bags of beans. After they use those, they can return for more. Most students have successfully made tofu in their homes and say their families like it.

"Plenty plans to set up a village-scale soy processing plant which will produce 100 lbs of tofu and forty gallons of icebean (ice cream made from soymilk) three times a week. Funded by Plenty and CIDA/Canada, the plant will supply free icebean for school lunch programs. After an initial period of training, the soy plant will evolve into a local cottage industry and a means of financial support for members of the community.

"For further information, please write to: Suzy Jenkins; Soy Technician; Plenty; 156 Drakes Lane; Summertown, Tennessee 38483 USA."

4682. **Product Name:** [Tofu].
Manufacturer's Name: Michel Horemaus Tofu.
Manufacturer's Address: Le Helmerstraat 67-I, Amsterdam 1054 DC, The Netherlands.
Date of Introduction: 1980. September.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Michel Horemaus.

number. Owner: Fausto Carrasquillo.

Label. 1982, undated. 3.5 by 3 inches. Self adhesive. Black and green on red. "No preservatives. Keep refrigerated, change water daily."

Letter from Fausto. 1982. May 4. They are producing about 3,000 lb/month of tofu; they had very hard times economically, but are trying again.

Talk with Fausto. 1991. Jan. 31. He sold this company in Aug. 1985 to a lawyer named Federico Rivera Zaez, who still owns it. Zaez has hired another person who makes the tofu, which Fausto thinks is poor in quality and very high in price. The company moved to a new location several weeks ago (Calle Guayama #14, Hato Rey, Puerto Rico 00917. Phone: 758-4614). Fausto recently sold the natural foods distribution company that he started after he sold the tofu company, but he is still actively involved with the distribution company. Now he is planning to get back into the tofu business. Mr. Zaez has offered to sell the tofu company back to Fausto, but the price is too high and the plant is not in good condition. So Fausto will start by importing Lecanto Tofu and Mori-Nu Tofu, then begin to make his own again. He hopes to have his own tofu shop open by the end of 1991.

Talk with Fausto. 1995. May 15. Nature Foods is still making tofu in Santurce, but the quality is poor. When he introduced this product in 1980 it was sold water packed in a plastic tray. Five years later, after he met his partner Federico Rivera Zaez, he started to sell it vacuum packed. Note: This is the earliest known commercial soy product made in Puerto Rico.

4688. **Product Name:** Tofu.
Manufacturer's Name: New Moon.
Manufacturer's Address: 1550 W. Michigan, Kalamazoo, MI 49007.
Date of Introduction: 1980. September.

4696. **Product Name:** Tofu.
Manufacturer's Name: Shaw Grocery.
Manufacturer's Address: 1447 Gerard St. East, Toronto, ONT, M4L 1Z9, Canada. Phone: 416-466-8058.
Date of Introduction: 1980. September.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Mr. Yen Yung Shaw.

4697. Shurtleff, William. 1980. Tofu shops and soy dairies in the West. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549. 2 p. Sept. Unpublished typescript.
• ***Summary:*** Lists the name, address, phone number and owner of all known tofu shops and soy dairies in the USA (alphabetically by state), Canada, Latin America, Europe, Australia & New Zealand, Africa, and the Middle East. Address: Lafayette, California. Phone: 415-283-2991.

4698. Shurtleff, William; Aoyagi, Akiko. 1980. The soyfoods explosion–Here come soyfoods: Tofu & tempeh. *CSC Reports* (*Elkins Park, Pennsylvania*) 2(3):8. Fall/Winter. [1 ref]
• ***Summary:*** This full-page article describes how to make tofu at home, and gives recipes for Tofu cheesecake (with strawberry topping), and Tofu fruit whip. Also tells how to make a tempeh incubator, with illustration. Address: New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549.

4699. *Soyanews* (*Sri Lanka*). 1980. Letters: The art of tofu making. 3(2):2. Sept.
• ***Summary:*** A reader asks about how a tofu box and how tofu itself are made. An illustration of a homemade box, with dimensions, is given. To learn the art of tofu making, why not drop in at the Soyabean Foods Research Centre at Gannoruwa (which is near where the reader lives) and "Wilmot Wijeratne, the Manager, will be glad to help. The Centre makes Tofu daily and is open from 8 a.m. to 4 p.m."

4700. Soyfoods Center. 1980. Growth of tofu shops and soy dairies in the West (Report). Lafayette, California. 1 p. Sept.
• ***Summary:*** Subtitle: "(Since publication of *The Book of Tofu* by Shurtleff & Aoyagi in December 1975).

This 1-page report consists of a table (compiled by William Shurtleff) and 4 graphs based on the table. The table, which contains 9 columns, gives statistics for 7 dates from Sept. 1975 to Aug. 1980.

In Sept. 1975 in North America there were no Caucasian owned tofu shops or soy dairies, but 53 such shops owned by Asian-Americans. Outside of North America, there were 2 others for a total of 55.

In Sept. 1978 in North America there were 60 Caucasian owned tofu shops or soy dairies, and 52 such shops owned by Asian-Americans. Outside of North America, there were 3 others for a total of 115.

In July 1979 in North America there were 76 Caucasian owned tofu shops or soy dairies, and 60 such shops owned by Asian-Americans. Outside of North America, there were 29 others for a total of 165.

In April 1980 in North America there were 80 Caucasian owned tofu shops or soy dairies, and 80 such shops owned by Asian-Americans. Outside of North America, there were 36 others for a total of 196.

In Aug. 1980 in North America there were 89 Caucasian owned tofu shops or soy dairies, and 85 such shops owned by Asian-Americans. Outside of North America, there were 42 others for a total of 216. Address: P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

4701. **Product Name:** Tofu.
Manufacturer's Name: Spring Creek Soy Dairy.
Manufacturer's Address: 136 Main St., Spencer, WV 25276. Phone: 304-927-1815.
Date of Introduction: 1980. September.
Ingredients: Organic soybeans, water, nigari.
How Stored: Refrigerated.

New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Stan Kenner.

Label. Undated. "Tofu." Spring Creek Soy Dairy, Inc., Spencer, WV 25276. Printed blue on white; self adhesive label.

Talk with Tenley Weaver. 1990. May 22. The company name was changed to Spring Creek Natural Foods at the time they moved in July 1989. New address: 212-C East Main St., Spencer. Owner: Mark Bossert. It is a co-op and Mark has been with the company since it started.

Talk with Jon Kessler of Twin Oaks Community Foods. 1996. Feb. 9. Spring Creek now makes about 10,000 lb/week of tofu and tofu products.

Talk with Mark Bossert, President. 1998. Oct. 11. They were worker-owned until the start of 1997. They now make about 10,000 lb/week of tofu. In addition to tofu, they now make baked tofu, soysage, soy burgers, tofu and salads. Their main regional competitors are Fresh Tofu (Easton, Pennsylvania) and Twin Oaks.

Label. Undated. "Traditional nigari tofu" [organic]. 1 lb. Spring Creek Soy Dairy, Inc., Spencer, WV 25276. Printed red, blue and yellow on white, on a clear film pouch.

4702. **Product Name:** Tofu, and Tempeh.
Manufacturer's Name: Taos Tofu & Tempeh.
Manufacturer's Address: Box 137, Arroyo Seco, NM 87514. Phone: 505-776-2971.
Date of Introduction: 1980. September.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Tracy McCallum.

4703. **Product Name:** Tofu.
Manufacturer's Name: Tofu for You.
Manufacturer's Address: 207 N. Acacia St., Solano Beach, CA 92075. Phone: 714-481-6914.
Date of Introduction: 1980. September.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Paul Beeson.

Talk with Paul Beeson, who calls from California. 1996. Dec. 16. His company was named Tofu for You. He also had these words on his license plate. He started making tofu in 1980.

4704. **Product Name:** Tofu.
Manufacturer's Name: Unicorn Village.
Manufacturer's Address: 332 E. 7th St., Tucson, AZ 85705. Phone: 602-622-4963.
Date of Introduction: 1980. September.
How Stored: Refrigerated.
New Product–Documentation: Letter/Order for the book *Tofu & Soymilk Production* from Leslie Snyder of Unicorn Village. 1979. Sept. The company is located at the address shown above. At this time they probably made foods other than soyfoods (probably sprouts).

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Les Snyder. Company listed as Unicorn Village Soyfoods.

Poster. 1982, undated. "Unicorn Village–Tofu Comes West. A remarkably versatile healthful food. Protein for less." Note: This company was bought out by Fuji Foods, owned by Hinoichi in Los Angeles, in about 1985. The production manager moved to Tomsun in Massachusetts. For details ask Tucson Co-op Warehouse (Russell: 602-884-9951).

4705. **Product Name:** Tofu.
Manufacturer's Name: Uwajimaya Inc.
Manufacturer's Address: 519 Sixth Ave. South, Seattle, WA 98104. Phone: 206-624-6248.
Date of Introduction: 1980. September.
How Stored: Refrigerated.

4706. **Product Name:** Tofu.
Manufacturer's Name: Voda Tofu Shop.
Manufacturer's Address: 671 Jacoby Mill Rd., Xenia, OH 45385.
Date of Introduction: 1980. September.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name and address. No phone number. Owner: Andy Voda.

4707. Wagner, Martha. 1980. Okara: The little-known superfood & soy cookbooks. *New Age Journal* (*Boston, Massachusetts*). Sept. p. 69, 71.
• ***Summary:*** Part I is about Okara, which is defined as "the pulp left behind when soymilk is strained to make tofu. As a by-product, it is a free food for tofu makers and people who make soymilk at home or on a commercial scale... Fluffy, cream-colored okara is easily as versatile as tofu. Some American tofu shops are now using okara to make 'soysage,' a spicy, meatlike food. It can be used in yeasted and quick breads; just substitute packed okara for a third of the flour called for... Dry-roast okara in the oven and you have the

© Copyright Soyinfo Center 2013

makings for granola or a crumb crust."

Part II is a brief review of some soy cookbooks, of which there has been a proliferation in the past few years. "It all began in 1975 with *The Book of Tofu* (Autumn Press, $8.95). With this tome of 300-plus pages, including over 500 recipes, William Shurtleff and Akiko Aoyagi introduced tofu to America. A fascinating book, attractively illustrated;... the condensed, revised 1979 paperback edition (Ballantine $2.95) has a more manageable amount of material (including 250 recipes) and is still packed with information..." Other books reviewed: The Tofu Cookbook, by Kathy Bauer and Juel Andersen (Rodale Press). The Farm Vegetarian Cookbook. Tofu Goes West, by Gary Landgrebe (Fresh Press, $4.95). The Great American Tofu Cookbook, by Patricia Gaddis McGruter (Autumn Press, $6.95).

"Shurtleff and Aoyagi have recently followed up their tofu classic with The Book of Tempeh (Harper & Row, $6.95)... a thoroughly researched and fascinating book." Contains two illustrations reprinted, with permission, from *The Book of Tofu.*

4710. Wildwood Natural Foods. 1980. The grand opening of Wildwood Natural Foods (Leaflet). Fairfax, California. 1 p. 28 cm.
• ***Summary:*** "Celebrate with us Sunday, September 28, 1-6 PM. 135 Bolinas Road, Fairfax. A circular illustration (line drawing) shows the front of Wildwood's new tofu shop–the original one, with a sidewalk along the front. Above the building is a moon, and behind it are the silhouettes of evergreen trees.

Talk with Billy Bramblett, one owner of Wildwood Natural Foods. 1988. Aug. 5. This building had been a store front before Wildwood took over the space. It has a big glass window across the front. If you happened to be walking along this sidewalk and you looked in this window early in the morning, you could see people making tofu–though the window might be a little steamy. The building was long and skinny–about 25 feet across the front and 100 feet from front to back. If you entered the door on the right, a low "pony-wall" (about 3 feet tall) was all that separated you from the tofu shop. In the back half of the building, the fresh tofu was made into other Wildwood products such as sandwiches, salads, etc. There was a hood in the middle of the building to vent the steam and heat. The tofu cauldron was on one side of a pony wall (5 feet tall); on the other side of that was a 6-burner stove and a convection oven. So all the cooking was done under one hood. The second floor above the tofu shop was a residence, occupied by some artists, followed by some friends of Billy's for about 2 years, followed by an employee for about a year. Then Wildwood moved its accounting offices into this upstairs space–and they are still there today. Wildwood still leases the whole building. They sublet to a separate caterer, who now uses the downstairs space.

4711. **Product Name:** Tofu.
Manufacturer's Name: Willowbrook Soyfoods.
Manufacturer's Address: Vessel Rock Rd., Gilsum, NH 03448. Phone: 603-357-3762.
Date of Introduction: 1980. September.
How Stored: Refrigerated.

• ***Summary:*** "A 'Tofu and you' nutrition workshop will take place Oct. 8 from 7:30 to 9:30 p.m. at Picadilly [Piccadilly] Square restaurant, New Haven. The New England Soy Dairy and Diet Centers of New Haven will co-sponsor the event."

4715. Dart, Susan. 1980. After thousands of years, tofu catches on: Natural foods. *Chicago Tribune*. Oct. 9. p. W_ A14.
• ***Summary:*** "Much of the popularity of tofu is due to Bill Shurtleff and his Japanese wife, Akiko. Together they have written the definitive book on the subject, 'The Book of Tofu' (Ballantine, $2.95), which contains hundreds of recipes."

Gives a recipe for Tofu burgers (makes eight patties).

4716. Hodgson, Moira. 1980. Restaurants: Sushi and more and new Italian. *New York Times.* Oct. 10. p. C22.
• ***Summary:*** A review of Sushiko, a small Japanese restaurant in New York City between Broadway and Eighth Avenue, which has a "sushi bar." Inexpensive side orders include: "Natto, mustard-colored fermented soybeans, gooey and unusual, were seasoned with mustard, chopped scallions and soy sauce, and had an extraordinary and subtle flavor, tasting slightly smoky, resembling food that has been cooked over charcoal. Bean curd came in large moist squares in a bowl of water, accompanied by a sauce of dried tuna [sic, bonito] flakes and scallions mixed with soy."

Paper-thin yakinori (toasted nori) could be used as a wrap for natto. Spectacular nasu shigiyaki was an eggplant sliced in half, covered with miso sauce, and grilled. Misoshiru [miso soup] is a rich brown soybean soup. Tofu is added to a tossed American-style salad.

4717. Waggoner, Dianna. 1980. With his book on tofu, William Shurtleff hopes to bring soy to the world. *People* 14:57-58. Oct. 13.
• ***Summary:*** Tells the story of how William Shurtleff and Akiko Aoyagi Shurtleff played a major role in introducing tofu to the Western world. With two recipes. Photos (see next page; reprintd with permission) show Shurtleff and Aoyagi: (1) Sitting behind a table on which are six tofu dishes; (2) In the kitchen preparing deep-fried tofu patties.

A sidebar with a photo of model Cheryl Tiegs notes that she has been eating tofu for several years and gives it some of the credit for helping her loose 35 pounds in 1972. Note: This is the earliest article on soy seen (Aug. 2002) in *People* magazine.

4718. Ellis, Merle. 1980. A reunion with Japanese food: The butcher. *Los Angeles Times.* Oct. 16. p. K10.
• ***Summary:*** "If good food, simple preparation, beautiful presentation and economy are some of the things you look for in a meal, look to the Japanese."

Three recipes are given. Mizutaki means (literally) "water + boiling." "Legend has it that Samurai warriors (and ancient Mongolian warriors in China before them) used their helmets to cook a meal of whatever was at hand in a helmet full of boiling water." That is mizutaki. A "Mongolian hot pot" is a special utensil used for this dish, when available. The mizutaki recipe calls for "1 block tofu (soy bean cake) cut in 1-inch cubes." The Mizutaki sauce recipe calls for ¼ cup soy sauce.

Note: This article, titled "Japanese cuisine: Simple, beautiful and economical" also appeared in the *Hartford Courant* (Connecticut) (Oct. 16, p. E12). Address: Staff writer.

• ***Summary:*** "It looks like an albino brick. Or a soap eraser with a thyroid problem. Steve Marshall's brother calls it 'toad food.'" Tofu lovers at The Bountiful Bean Plant say tofu, "the lowly soybean curd," is headed for a popularity boom to rival that of yogurt several years ago. This company started in 1978 and was taken over 2 years ago by Debra Bachmann and Chris Burant. When they joined the business, about 200 lb/week of tofu were made in a large bathtub in the back of the building. Since then the company has installed shiny new equipment that allows its six employees–called "beaners"–to make about 1,200 lb/week of tofu. "Its going to be another yogurt," says Bachmann. Address: Madison, Wisconsin.

4721. Hauser, Nao. 1980. The joy of eating this Thai's food. *Chicago Tribune.* Oct. 20. p. E1.
• ***Summary:*** Chanpen Ratanadilokchai is the cook at Thai Room Restaurant in Chicago. A recipe for Fried whole red snapper calls for "1 tablespoon each: soy sauce, brown bean sauce."

© Copyright Soyinfo Center 2013

At the end of the recipe we read: "Note: Chanpen prefers Kikko-man soy sauce because it is the right weight."

When shopping, she buys "thick bean sauce" and "bean cake [probably tofu] to use in fresh egg rolls."

A photo shows Chanpen happily at work in the restaurant kitchen.

of its food. For 2 years, Kerr was co-manager of the Yellow Sun Natural Foods Coop in Amherst, Mass. Now she is part of Nut Ed, a nutrition education group, which supports local food companies such as the New England Soy Dairy and the Tempeh Works, two businesses in Greenfield that produce soybean products–including tofu and tempeh. Address: Massachusetts.

4725. Ostmann, Barbara Gibbs. 1980. Time for tofu. *Post-Dispatch* (*St. Louis, Missouri*). Oct. 29. p. 1E, 4E. Food section.
• ***Summary:*** When Bob Davis moved to St. Louis about 18 months ago, he was able to find tofu only in health food stores. So he started his own tofu company, Light Foods, Inc., which began making tofu 7 months ago. He got the idea from his cousin in Indiana [Rob Davis] who has a tofu shop named Simply Soy [sic, Simply Soyfoods in Bloomington]. "Prior to his involvement with tofu, Davis earned a bachelor's degree in political science and a master's degree in planetary development. He worked at the Solar Energy Institute in Washington [DC] while finishing his master's thesis. His concern about energy sources and his enthusiasm for soybeans and a vegetarian diet are a part of his philosophy of living." Davis, age 27, says that Light Foods now produces up to 1,000 lb of tofu daily, as well as assorted tofu products such as Soysage (okara-based soy "sausage"), Soyloaf (soy "meatloaf"), Marinated Tofu, soy cookies, and Tofu Cream Pies (with fruit). "His newest development is bean cream, 'to challenge yogurt' said Davis. 'I think its better than yogurt and its lower in calories."

Photos show: Bob Davis pouring nigari coagulant into soymilk to make curds, ladling curds into tofu forming boxes, then cutting the finished tofu. A close-up of a package of Light Foods tofu with a winged unicorn jumping across a stream. Packages of five products (with labels). Bob's mother [Donna Davis] cutting a tofu cream pie. Contains a recipe for homemade tofu (adapted from *The Book of Tofu* by Shurtleff & Aoyagi) and 5 tofu recipes.

Talk with Bob Davis, founder of Light Foods, Inc. 1994. May 7. Bob was one of the first people in America during the 1970s to try to develop a soy yogurt ("bean cream"). Actually he was working with viili cultures to try to develop a soy viili. But he was short on capital and overextended in terms of trying to do too many things with his product line, so was never able to get the product into commercial production. Bob left St. Louis in about 1983-84 for 3 reasons: (1) His company couldn't make tofu inexpensively enough to compete with regular tofu being imported from elsewhere (as from Hinoichi in California); (2) Bob had just introduced his Light Links (meatless tofu hot dogs) by August 1982. He made the tofu and the hot dogs were made and packed by a meat packer in Columbia, Missouri. Then Bob began looking for another company to make the basic tofu, since he could not make enough at a low enough price, and for a meat packer near the tofu supplier. He flew out to California and after visiting several places decided to get the tofu from Sacramento Tofu and to have the hot dogs packed by MadeRight Meats in Sacramento initially, then shifted over to Safeway; (3) He wanted to get out of the run-down neighborhood in St. Louis where his first company was located. Address: Post-Dispatch Food Editor.

4726. Boyer, Robert A. 1980. Work with Henry Ford and soybeans. II (Interview). Conducted by William Shurtleff of Soyfoods Center, Oct. 30. 2 p. transcript.
• ***Summary:*** It seems very possible that soyfoods were being sold in the Ford stores in 1923–though Boyer has no firsthand knowledge of this. Dr. Edsel Ruddiman started his research on food uses of soybeans in the late 1920s, about 2 years before Boyer started his work with soybeans. Ford converted an old residence into a lab for Ruddiman, his boyhood pal.

Boyer attended the Henry Ford Trade School, located at the Rouge Plant, from 1927 to 1929. It was a work-study program and he spent one month in each of the major departments at the plant. Then he went to the Edison Institute of Technology Lab. It was both a school and a research lab. Boyer was part of the first class of students. The idea was to learn by doing. It was a "school for inventors." Over the door was a sign that read "Place for Damn Fool Experiments." Consultants were sometimes brought in to help with research projects and answer questions. "In 1930 we started building the soybean laboratory." Boyer knew John Harvey Kellogg, but he does not think Henry Ford knew him.

Boyer uses some meat analogs in his daily diet but he is disappointed in the quality so they are not a regular part of his diet. Manufacturers have to make compromises in equipment and to keep costs down. He can make a much better flavor and texture in the laboratory, but it takes time and hand work. One major problem is that all isolates are made from defatted soybean meal which already has a strong beany flavor. There is no way to control the off-flavors that far back in the process. Boyer prefers the meat analogs made by Worthington to those made by Loma Linda. Boyer uses both tofu and Bacon Bits quite a bit in his daily meals.

Concerning the plastic car: The importance of soy decreased as the researchers got farther into the project since they could not make soy 100% waterproof no matter how much resin they mixed with it. So in the 1941 car body, soy was only a very minor component–but the popular notion that it was a major component persisted; that was a distortion. Soy was, however, a major component in non-structural car parts. The real importance of the soybean was as a renewable resource. When the "plastic car" made its debut in 1941, an all-soy luncheon was served.

When Ford struck the trunk of his car with an axe, he used the back/blunt side of the axe, and it was covered with a plastic guard to help cushion the blow. Once Walter Chrysler

© Copyright Soyinfo Center 2013

hit the body with an ax and fractured it slightly. Boyer drove the plastic car. The whole white body of the car was plastic, but it contained little soy.

The idea of using spun soybean fibers in food occurred to Boyer while he was working for Ford in about 1942. He left Ford in 1943 and applied for his first spinning patent in 1949. It was allowed in 1951. He abandoned this first application since everyone realized it was a much broader patent. So the 1954 patent application was the best and most important one that everyone worked under. "No one can use a man-made fiber in a food without violating that claim."

The industry that makes spun soy protein fibers for food use reached a plateau starting in early 1979. He is now aware that there are 2 companies in Europe very actively spinning soy fibers and advertising their products. Two are Dutch and one is in Belgium. The patents are now public property. Dawson Mills bought General Mills' soy protein fiber spinning equipment. In an article in the *Journal of Textural Studies* Boyer explained why the spinning part of the program has now grown as much as expected. "This is still a product whose time has not yet arrived. It was mushroom when meat prices become 10-20% high than soy. The danger is that some of the techniques we've developed in the past 2-3 years for improving texture and flavor might get lost if they are not actively pursued. Worthington is in a state of change and Bayer may try to sell it. All the work is secret." Boyer may someday write a book about it, but his eyes are very bad now.

Boyer felt Ford was a great man, great to work with and for. He knew how to judge men and he always picked the right men for the job. Ford would drive the 4-5 miles up from the Rouge Plant and be in Boyer's office by about 8:00 every morning for years and years. He was always very generous money and essentially gave Boyer a blank check to pursue any research project he wanted. But he could be pretty tough with some guys, especially if they did not produce results. Ford was a real thinker, always trying to find the basic reasons behind what was going on.

Worthington bought the patent rights for the health food industry. Loma Linda started spinning soy protein fibers after Boyer's patents expired. He did not known that Loma Linda made soy meat analogs; he thought they used only gluten.

Note: This is the earliest English-language document seen (Dec. 2004) that uses the term "spinning soy protein fibers." Address: 632 Edgewater Dr., Apt. 731, Dunedin, Florida 33528. Phone: 813-734-2415.

4727. Business Trend Analysts, Inc. 1980. The health and natural food market: An analysis of current performance & future prospects. Dix Hills, New York. viii + 234 p. Oct. No index. 28 cm. Spiral bound. Project director: Amadee Bender. [9 ref]

• ***Summary:*** Section 12 (p. 85-113) of this study is titled "Soyfoods & Other Soy Products." It consists largely of statistics compiled by the Soyfoods Center and Soycrafters Association of North America. On pages 95-110 is published, without permission, complete lists of all U.S. tofu shops, tempeh shops, and miso and koji manufacturers from books copyrighted by Shurtleff and Aoyagi. Acknowledgement of the source of all this information is given only at the bottom of tables, on the last page of the plagiarized list of manufacturers, and in Appendix 6, page 234. No permission was obtained from the Soyfoods Center to use any of this material.

On page 113 is a table on U.S. lecithin production from 1976 to 1979, based partly on U.S. Census figures. Production averaged about 60 million lb/year, worth $19 to $23 million. The estimated percentage consumed for health purposes rose from a estimated 2.5% worth $500,000 in 1976 to an estimated 5.5% worth $1.3 million in 1979.

Page 232 lists the largest health food wholesalers in the USA: Balanced Foods Inc. (Ridgefield, New Jersey), Landstrom Distributing (San Francisco, California), Erewhon, Inc. (Cambridge, Massachusetts), Health Foods Inc. (Des Plaines, Illinois), Kahan & Lessin Co. (Compton, California), Nature's Best (Torrance, California), and Tree of Life Inc. (St. Augustine, Florida). Address: Dix Hills, New York.

4728. **Product Name:** Tofu.
Manufacturer's Name: Harvest Wholefoods.
Manufacturer's Address: 403 Richmond Rd., Grey Lynn, Auckland, New Zealand.
Date of Introduction: 1980. October.
Ingredients: Soybeans, water, nigari.
Wt/Vol., Packaging, Price: Packaged in bulk, under water.
How Stored: Refrigerated.
New Product–Documentation: Martha Wagner. 1981. Soyfoods. Summer, p. 11. "Soy down under." Harvest Whole Foods began producing tofu in a backroom kitchen last October [1980]. The three owners, Greg and Ricky Chalmers and Ricky's wife, Elizabeth, are producing about 170 to 299 kilos (374 to 440 pounds) of tofu a week.

Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Owners: Greg, Ricky, and Elizabeth Chalmers.

Chalmers, Elizabeth. 2007. Jan. 16. "Business history of the Chalmers family: Making soyfoods in New Zealand" (Interview). This tofu was packaged in bulk, refrigerated under water. We didn't start using organic soybeans until we started the Organic Soy Company in 1996.

Note: This is the earliest known commercial soy product made in New Zealand.

• ***Summary:*** Andrew Solony (ex-personal manager of the Beach Boys) and Doug Fiske (former editor of *Surfing Magazine*), and Craig Wright (former solar home builder [and TV character Mork from Dork]), team up with basketball star Walton in TriLife. They hope to market Bill Walton's tofu under the TriLife brand. A photo shows Bill Walton

Talk with Doug Fiske. 1996. July 14. Tri-Life was started as a natural foods company. The three people of "TriLife" were Andrew, Craig, and Bill Walton. Doug was the reason it got involved with soyfoods. Doug had been in touch with Bill Shurtleff, had read The Book of Tofu, and Bill had written an encouraging letter back to Doug. Doug felt that tofu was coming new idea and could be the basis of a viable business. Bill Walton had committed to put up the capital for the business; he was involved because Craig met him at a health spa named Healing Waters in Eden, Arizona. Bill may have been trying to heal a foot he had hurt. Doug and Andrew had previously known one another when they lived on Long Island, New York. Andrew was from Beth Page, Long Island, and Doug was from Massapequa, near Oyster Bay. Shurtleff spent an evening during a tour with Andrew and Craig at Craig's home in southern California on 9 May 1980. Doug and Shurtleff first met later that day and took a long walk through Balboa Park near the San Diego Zoo, including a visit to the spectacular arboretum. Doug got involved with the group after this.

Doug, Andrew, Craig, and Bill Walton all went to the Soycrafters' Conference in the summer of 1980 at the University of Illinois. There Doug first met Richard Leviton and Bernie Levy. They held a press conference, centered around Walton. The whole idea fell apart after Bill Walton injured his foot again. His handlers and money people advised him to withdraw from all speculative ventures, so he dropped out of Tri-Life before any products had been launched.

4738. **Product Name:** Soymilk, or Honey Vanilla Soymilk. Renamed Yo Soy! by about Sept. 1981.
Manufacturer's Name: Wildwood Natural Foods.
Manufacturer's Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1980. October.
Ingredients: Honey-Vanilla: Filtered water, organic soybean grown in accordance with Sec. 2659.11 of the Cal. health and safety code, honey, vanilla extract, and a trace of sea salt.
Wt/Vol., Packaging, Price: Pint or quart plastic bottle.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods. 1983. Summer. p. 42-43. Labels sent by Wildwood on their letterhead. 1983, undated. 2 by 3 inches. Self adhesive. Black and green on ivory. Silhouette of woods with birds. "It's rich. Not to be sold after date stamped on container." The product names are

© Copyright Soyinfo Center 2013

"Soymilk" and "Honey Vanilla Soymilk."

Talk with Billy Bramblett, an owner of Wildwood. 1998. Aug. 8. Soymilk was not a product made from day one. Billy would estimate that Wildwood started bottling soymilk (plain and honey-vanilla) in the spring of 1981. Because Wildwood was distributed outside the country they were in (Marin), their products suddenly became regulated by the state–rather than the county. Shortly after this product, labeled "Soymilk" was launched, the California Department of Health sent two women (dressed in lab coats) to the plant; they went through every product Wildwood had, took samples, examined labels, etc. They found various problems with Wildwood's labels. So they went back to Wildwood and told them how to change their labels to bring them into compliance with state labeling law. Paul Orbuch was in charge of Wildwood's labels at the time; he was a photographer, so he had a lot to do with the text and graphic design of the labels. A guy who came along (sort of a Nazi type) told Billy "You can't use the word "Soymilk." Billy asked "Why not? I've got a book right here, written by Shurtleff and Aoyagi, that says its soymilk." He said, "If it's milk, the label must say "dairy," otherwise it must say "imitation." Billy shot back, "How about milk of magnesia." The guy got really mad–like a bureaucrat without an answer, and said "Look–Change the label or we're gonna pull the product." Billy had a huge debate with this guy for about 2 months. Wildwood toyed with the idea of calling it *Tonyu,* which is the Japanese word for soymilk, but they realized nobody would know what that meant. They wanted to keep the word "Soy" in the name, so Billy came up with "Yo Soy," which is a palindrome.

Talk with Paul Duchesne, founder of Wildwood. 1998. Aug. 28. Paul still has detailed typewritten records showing sales of individual Wildwood products in 1980 and 1981. According to these records, Wildwood first made and sold soymilk in October 1980; $32,00 worth of plain soymilk was sold that month. The company consistently made soymilk from that time on. Sales increased to $34 in November. In November Wildwood added Honey Soymilk and sold a total of $40.00 worth of the two flavors that month. By July 1981 Wildwood was selling $200/month of Honey Soymilk and $172/month of plain.

4739. Barber, Linda. 1980. Re: Thinking of writing a book about natto in English. Letter to William Shurtleff & Akiko Aoyagi at New-Age Foods Study Center, Nov. 7. 1 p. Handwritten (aerogram).

• ***Summary:*** Thank you for sending a copy of *Tofu and Soymilk Production.* "I'm spinning from all the new information."

"I wrote to you before about my work with tofu in Japan and now I'm beginning to study natto as well. Through my interest in tofu I met Hisao Nagayama (author of *Natto no Shimpi* and free lance writer about food culture). He wants to work with me, hopefully, to get a book about natto in English. I really feel honored but because of our language barrier, there are many problems. I remembered that the Center has many resources and, I hope, about natto! I don't need the slides you advertized in your catalog, but any other information would be great! Could you let me know what is available and how much it would cost?"

"Thank you..."

Note 1. Linda and a Japanese author wrote a booklet (25 pages) in Japanese titled *Tôfu, Nattô Ryôri* [Tofu and Natto Cookery] which was published in Japan in 1981.

Note 2. Nishinomiya is a city located in Hyogo prefecture, Japan, between the cities of Osaka and Kobe. Address: c/o Kobe College, 4-1 Okadayama, Nishinomiya, 662 Japan.

4740. Watanabe, Hidekazu. 1980. Re: Early work by San-iku Foods in Japan with tofu and soymilk. Letter to William Shurtleff at Soyfoods Center, Nov. 20. 5 p. Handwritten, with signature on letterhead. [Jap; eng]

• ***Summary:*** Starting in about 1955 Dr. Harry Miller began to recommend that the Saniku school in Japan serve soymilk instead of dairy milk to its students. But the school decided not to do this because they thought the taste of the soymilk was not very good and it was considered less nutritious than cow's milk; moreover, it would cost a lot of money to buy soymilk equipment.

In 1957 Mr. Hanzo Ueda (who had previously worked at the post office in Hachioji and was a Seventh-day Adventist) was running a tofu shop. He and Mr. Hidekazu Watanabe were making soymilk at the tofu shop, packing it in 180 ml bottles, and selling it around Hachioji–under Dr. Miller's guidance.

In 1959 people from the Saniku school visited the tofu shop and gained confidence. They bought similar (but not identical) equipment, and started to produce soymilk at the school. They bottled it in 180 ml containers and started to serve it to 500 students at every meal.

Ten years later, in 1969, they started to produce Soyalac infant formula soymilk with help from Loma Linda Foods in America. They produced it at College Health Foods–a separate organization from the Saniku school.

Dr. Miller gave us helpful advice on technical and nutritional matters, and furthermore he always supported our spirit and spirituality as we developed the soymilk plant (1959) and the infant formula (1969). In 1969 Luppy Kôsan began to make Luppy soymilk. This was the first really serious commercial soymilk product in Japan.

Note: See also Mr. Watanabe's follow-up letter of July 1981. Address: San-iku Foods, Sodegaura-machi, Chiba-ken 299-02, Japan.

• ***Summary:*** This is a review of the Japanese restaurant Kura

© Copyright Soyinfo Center 2013

Barn, 479 New York Ave., Huntington [on the north shore of Long Island]. One of the favorites is "fried tofu."

"Tofu, the snowy, slippery soybean curd that has no flavor whatever but plenty of nutritional value, is transformed into mildly seasoned patties, deep-fried and bathed in a rich black mushroom sauce for a particularly splendid appetizer." Address: Restaurant critic.

4742. Associated Press (AP). 1980. Lowly soy bean curd enjoying popularity rivaling yogurt. *Los Angeles Times.* Nov. 27. p. C3.
• ***Summary:*** This article about the Bountiful Bean Plant in Madison, Wisconsin, first appeared as: Porath, Ellen. 1980. "Tofu makers predicting boom for lowly soybean curd." *Register* (The) (Madison, Wisconsin). Oct. 19. p. J3.

4743. Andoh, Elizabeth. 1980. At home with Japanese cooking. New York, NY: Alfred A. Knopf. 254 p. Illust. by Michiko Fujiwara. Index. 25 x 22 cm.
• ***Summary:*** A beautiful, intimate and very useful book, approachable and suffused with a unique tranquility and charm. The illustrations (line drawings) are exquisite.

Contents: Acknowledgments. Introduction. A note about the romanization of the Japanese language (Hepburn system). In the Japanese kitchen: Techniques and equipment–Grilling, broiling, steaming, braising and simmering, frying, dry roasting, grinding, crushing and mixing, using knives (four types, and how to hold and use them), skewering, straining and mashing, grating, pots and pans, miscellaneous equipment (chopsticks, rice paddle, rice tub, flat fan, bamboo mats, bamboo trays, metal mold, etc.). Meals and menu planning. The recipes: Soups, rice, noodles, braised and simmered foods, grilled and skillet-grilled foods, deep-fried foods, steamed foods, mixed, sauced and tossed foods, pickles, sweet things and beverages. In the Japanese kitchen: Foodstuffs. Suggestions for ordering Japanese foodstuffs, A glossary of Japanese terms.

The very helpful glossary includes (soy related): Abura agé: fried bean curd [tofu]. Aka miso: dark bean paste [miso]. Daizu: dried soybeans. Eda mamé: fresh soybeans. Kikkoman: brand name of soy sauce. Kinako: soy flour [roasted]. Marukomé miso: brand name of medium fermented bean paste. Miso: fermented bean paste. Miso shiru: soup thickened with fermented bean paste. Natto: fermented sticky soy beans. Okara: by-product of fresh tofu-making. Saikyô miso: light bean paste, a brand and regional name. Sendai miso: dark bean paste, a brand and a regional name. Shinshû Ichi miso: medium bean paste, a brand and regional name. Shiro miso: white (or light) bean paste. Shôyu: soy sauce. Teri yaki: glaze grilling. Tôfu: bean curd. Usu kuchi shôyu: thin or light soy sauce. Yuba: thin brittle sheets of soy milk (by-product of tôfu-making).

Note: This is the earliest English-language document seen (April 2013) that uses the word *Abura-agé* (hyphenated with diacritics) to refer to deep-fried tofu pouches.

Also includes: Each of the basic sea vegetables / sea greens used for food in Japan (ao nori, hijiki, konbu, nori, wakamé, etc.). Umé-boshi: pickled plums.

The book contains excellent recipes and descriptions (see the index) using bean curd [tofu] (7 recipes), eda mamé (1), fried bean curd (*abura agé*) (5), grilled bean curd (*yaki-dôfu*) (3), miso (17), and soybeans, dried (1); natto is not mentioned.

Elizabeth concludes the Introduction by explaining: "What I've tried to write here is the very book I wish I'd had with me when I started out fourteen years ago."

About the author (last page and with portrait photo on inside rear dust jacket): Elizabeth, who was raised in New York and graduated from the University of Michigan, traveled to Japan in 1966 to study Japanese, lived with the Andoh family on the island of Shikoku, and married into that family two years later. Shortly after her marriage, she enrolled in a class at the Yanagihara School of Classical Japanese Cooking, where she studied for six years. She has a daughter, Rena, to whom this book is dedicated.

The copyright page states: "Many of the recipes which appear here were originally printed in slightly different form in *Gourmet* magazine, 1975, as part of a 6-part series entitled 'The Seasonal Japanese Kitchen,' by Elizabeth Andoh." Address: Tokyo, Japan.

4744. Barber, Linda Lee. 1980. Let's cook: A beginner's cook book–starring "Pooh," the culinary cat. Translated by Kazuko Kagotani and Tomoko Matsuda. Kobe, Japan: Published by the author. 102 p. Nov. Illust. No index. 30 cm. Comb bound. [Eng; Jap]
• ***Summary:*** Letter (e-mail) from Linda Barber. 2012. July 7. A bi-lingual step-by-step cookbook for children that uses tofu and kinako in the recipes. I developed the recipes, my sister Wendy, illustrated them, and my assistants Kazuko and Tomoko translated them. I haven't seen anything like this before. I wrote this while I was in Japan in the early 80's. It is self published.

The recipe for "Tofu cheesecake" (p. 64-67) calls for many ingredients including "momen-dofu" (450 gm), 2 eggs, crumb crust, natural sugar, yogurt cheese, lemon, etc. The crumb crust and yogurt cheese must be prepared in advance; the recipes are in this book.

The recipe for "Power flour" (p. 68-69) calls for Kinako. To make this Power flour: Measure into a bowl: 1 kg all purpose flour, 5 tablespoons nonfat dry milk granules, 5 tablespoons wheat germ, and 5 teaspoons kinako. Mix well. "Store in a cool place in a covered container, and use this flour mixture when a recipe calls for flour." This recipe alone contains 15 illustrations. Many subsequent recipes in this book call for Power flour.

The recipe for "Moon bread" (p. 78-81) calls for 450 gm "momen tofu" and produces croissants with a tofu filling.

© Copyright Soyinfo Center 2013

The recipe for UFO's (p. 82-85) begins: "This cookie has an Unidentified Food Object... tofu! They are really out of this world with a glass of milk!!!" Address: Kobe College, 4-1 Okadayama, Nishinomiya 662, Japan.

4745. Esko, Edward; Esko, Wendy. 1980. Macrobiotic cooking for everyone. Tokyo: Japan Publications, Inc. 272 p. Nov. Foreword by William Tara, Director, Community Health Foundation, London, England. 26 cm. [50 ref]
• ***Summary:*** The authors studied in Japan (mostly Kyoto), from Sept. 1978 to May 1979, at which time they returned to Boston. In the summer of 1979 "more than 100 delegates from various regional centers throughout the United States and Canada met in Boston for the first North American Congress of Macrobiotics." Part I of this book discusses the theory of macrobiotics and Part II gives recipes. Unfortunately, the book has no index, and the bibliography gives no years of publication. There are chapters on: Seitan, fu, and noodles (incl. soba), and Sea vegetables.

Soy-related recipes include: Brown rice and soybeans (p. 90). Miso soft rice (p. 96). Somen with deep-fried tofu (p. 118). Kenchin soup (with deep-fried tofu cubes and tamari, p. 130). Okara soup (p. 132). Miso soups (p. 137-143; 12 recipes are given plus a long letter from Jan Belleme, about how she and her husband, John, who arrived in Japan in late October 1979, are now living with the Onozaki family and studying miso-making there–p. 138-39). Sauteed cucumbers and miso (p. 154). Boiled cabbage, sweet corn, and tofu (p. 155). Udon-vegetable bane (with deep-fried tofu, p. 159). Steamed kale and tofu (p. 161). How to make sprouts (incl. soybean sprouts, p. 177).

Chapter 5 is titled "Bean dishes, including tofu and natto." It states (p. 178-79, without citing the source) that "In China and Japan there is a proverb, 'A man who eats too many beans becomes a fool.'... Lima beans and soybeans are both very yin, and require thorough chewing. They should be eaten only on occasion and in small quantities... Kombu can be placed on the bottom of the pot when cooking chickpeas, soybeans, lima beans or kidney, pinto and navy beans. I have found that kombu definitely improves their flavor, and because of its high mineral content, creates a very balanced dish." To pressure cook soybeans so that they do not clog the steam escape valve, first boil them for 30 minutes. Skim the foam off the top as it rises, and when no more foam rises to the surface you may place them in a pressure cooker and continue cooking until done. Recipes include: Japanese black beans (black soybeans). Soybeans with kombu and burdock. Soybeans with lotus root and salmon. Following a long discussion of tofu, Homemade tofu. Tofu with scallions. Tofu with bonito flake broth. Baked tofu with miso/lemon sauce. Broiled tofu. Tofu loaf. Steamed tofu rolls. Deep-fried tofu cakes. Aburage (Age or deep-fried tofu). Stuffed age pouches. Okara. Okara croquettes. Sautéed natto. Natto rice or noodles. Natto tempura. Dried natto.

Note 1 This is the earliest English-language document seen (April 2013) that uses the term "broiled tofu" to refer to grilled tofu.

Hijiki with soybeans (p. 193). Hijiki and deep-fried tofu (p. 194). Tempuraed tofu-nori rolls (p. 198). Koi-koku (Carp miso soup, p. 220). Daikon and tamari. Scallion miso. Green peppers and miso (p. 224). Miso condiments (p. 226). Tamari. Moromi (p. 227). Rutabaga-tamari pickles (p. 233). Quick miso pickles (p. 234). Tofu tamari dressing (p. 236). Tofu-sesame dressing. Shiro-miso-tofu dressing. Miso dressing (p. 237). Tamari-lemon dressing. Tamari-rice vinegar dressing. Miso-tahini dressing (p. 238). Miso-rice vinegar dressing. Miso walnut dressing. Miso-tahini spread. Sesame miso spread. Miso-nut spread (p. 239). Lentil-miso spread. Lima bean miso spread (p. 240). Tofu dip (p. 243). Amazake (p. 247-48). Clear broth soup with tofu & scallions (p. 253). The glossary lists many soy products plus azuki beans, sea vegetables (many types), gluten, koji, kuzu, mochi, natto, nigari, okara, seitan, tekka, tempeh, umeboshi, unohana (okara), and yuba.

Macrobiotic periodicals include: *East West Journal* (Brookline, Massachusetts). *Kushi Institute Study Guide and Kushi Inst. Newsletter* (Brookline, MA). *The Order of the Universe* (East West Foundation, Brookline, MA). *The Macrobiotic Review* (East West Foundation, Baltimore, Maryland). *Spiral* (Community Health Foundation, London). *Le Compas* (Paris). Note: The date each periodical began publication is not given.

The lengthy section on seitan (p. 110-13) gives a detailed recipe for making seitan at home using the short method and 3½ lb hard spring wheat flour or hard red winter wheat flour. The broth is made with kombu and tamari. Seitan recipes include: Seitan stew. Seitan fried rice. Stuffed mushrooms (with sauce). Stuffed squash or Hokkaido pumpkin. Address: Boston, Massachusetts.

4746. Gery, Michael E.C. 1980. Tempeh: A tempting soyfood with culture. *New Roots* (*Amherst, Massachusetts*) No. 12. Nov. p. 50-53.
• ***Summary:*** A long sidebar tells about Michael Cohen and The Tempeh Works of Greenfield, Massachusetts. "The Tempeh Works in Greenfield, Mass. produced 300 pounds of tempeh per week when Cohen opened the business in the fall of 1979. A year later it makes more than 3,000 pounds per week." The Tempeh Works buys its soybeans from the New England Soy Dairy. Photos show Cohen holding a tray of fresh tempeh, a man at Tempeh Works making tempeh, and the Tempeh Works label. Address: Ashfield, Massachusetts.

4747. **Product Name:** Tofu.
Manufacturer's Name: John Francis Tofu.
Manufacturer's Address: Brunswick Rd. 1, Wanganui, New Zealand.
Date of Introduction: 1980. November.

© Copyright Soyinfo Center 2013

New Product–Documentation: Soyfoods Center. 1980. Nov. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: John Francis. The name of this very small town is pronounced wan-ga-NEW-ee.

4748. Real Food Tofu Cafe (The). Also known as The Brightsong Cafe. 1980. November. New soyfoods restaurant or deli. 8473 East Rd., Redwood Valley, CA 95470.
• ***Summary:*** Leaflet. 1980. "Now open! The Real Food Tofu Shop and Cafe. Mendocino's only 100% vegetarian cafe!! Soy, natural & live foods. No animal products." Plus 1-page news release announcing the opening of the 14-seat restaurant.

Page 33 of the "1981 Harvest Issue" of an unknown magazine tells about this new business. A photo shows Dik Rose (with a beard and bandana cap) "Separating soymilk from the fiber (okara)" as he makes soymilk for tofu.

Questionnaire filled out by owner of restaurant or deli. 1982. Lists the company's most popular soy-based menu items in descending order of popularity. The highest weekly total sales over the past 6-2 months, the month that this occurred, and why. The average weekly sales during this period. Average hourly wages paid to workers. The business startup cost (amount of money it cost to get the business started). Current profitability status. Plans for the future. Advice the owner would give to someone starting a similar business.

Shurtleff & Aoyagi. 1982. Report on Soyfoods Delis, Cafes & Restaurants. p. 3. Started in Nov. 1980 by Richard & Sharon Rose. Address: Redwood Valley, California. Phone: (707) 485-7050.

4749. Shurtleff, William; Aoyagi, Akiko. 1980. Que es el tofu? Traducido por Corina Gutman [What is tofu? Translated into Spanish by Corina Gutman]. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549 USA. 6 p. Nov. [3 ref. Spa]
• ***Summary:*** Contents: Introduction. A family of distinctively varied foods. A storehouse of high-quality protein. Low in saturated fats: free of cholesterol; an ideal diet food. Natural backbone of the meatless diet. Buying and storing tofu. Making tofu at home and in communities. Soybeans, tofu, and the world food crisis. Tofu shops in Japan. Cooking with tofu (13 recipes). • ***Summary:*** Table 3 shows fermented foods prepared in Thailand from legumes and cereals. Fermented foods having soybeans are the main substrate are: See iew (a condiment, made in central and south Thailand using bacteria, molds, and yeasts). Thua nao (main dish, made in north Thailand using bacteria). Tao hoo (tofu, main dish, made in central and south Thailand using bacteria, molds, and yeasts). Tao jiao (flavoring, made in central and south Thailand using bacteria, molds, and yeasts). Tao si ([fermented black soybeans], flavoring agent, made in south Thailand, using molds).

A survey of all soy sauce factories in Thailand was conducted in 1975. Representative samples were analyzed for both pathogenic organisms and aflatoxin, but neither was found (Biological Science Division, 1975-1976).

Note 1. This is the earliest English-language document seen (April 2013) that uses the word "Tao hoo" (or "Tao-hoo") to refer to tofu.

Note 2. This is the earliest English-language document seen (Jan. 2012) that uses the term "Thua nao" (with no hyphen) to refer to Thua-nao. Address: Biological Science Div., Dep. of Science Service, Ministry of Science, Technology and Energy, Thailand.

4752. **Product Name:** Weissman's Original Tofu Sausage.
Manufacturer's Name: Vegetable Protein Co.
Manufacturer's Address: 140 River St., Cambridge, Massachusetts.
Date of Introduction: 1980. November.
Ingredients: Incl. tofu, seasonings.
Wt/Vol., Packaging, Price: 6 oz vacuum pack. Retails for $2.29.
New Product–Documentation: Manufacturer's leaflet. 1985. Nov.

East West. 1987. June. p. 65. The Vegetable Protein Co. makes Tofu Sausage. Company not listed in Natural Foods Merchandiser Supplier Guide (Aug. 1988).

Talk with Paul Duchesne, founder of Wildwood Natural Foods in Fairfax, California. 1991. Nov. 19. Paul was in Boston for 9 months starting in Sept. 1978. He met Johnny Weissman, who was a partner with some other person in the Vegetable Protein Co. in Cambridge. Johnny was very creative in making foods. In 1979 he developed a Tofu Bologna and some other tofu-based meatlike product, but he was so paranoid that other companies would copy him after he launched them that he never did. "I tasted the Tofu Bologna at his home and I flipped out. It was just fantastic–great texture and flavor–I'll never forget it. He was good at product development but poor at marketing."

Talk with then letter from John Weissman. 1992. May 8. This product was introduced in Nov. 1980. His Vegetable Protein Co. made this product for the first 4 years of its

© Copyright Soyinfo Center 2013

existence. It eventually became his best-selling item. As its popularity increased, he phased out retail sales of Wheatmeat and Solar Burgers, and sold only these Tofu Sausages to Restaurants in Bulk. After this period he invented only tofu products. In May 1984 he had to leave his food factory on River Street so he arranged with Michael Cohen to make the Tofu Sausage at his plant in Greenfield, Massachusetts. This was disastrous for John, since the product's new poor quality almost ended any reputation it had left in the marketplace. But it was quite an education for John. In January 1985 he took back the product and began making it for himself again.

4753. *Toyo Shinpo* (*Soyfoods News*). 1980. [Nutritional analysis of tofu using various coagulants]. Dec. 1. [Jap; eng+]
• ***Summary:*** Table 1 gives the nutritional composition of two types of tofu: Regular handmade tofu, and lactone silken tofu (made by machine). Analyses are given for three types of regular tofu, each made with a different coagulant/curding agent. For each of these four types of tofu, the content of water, protein, fat, calcium, and magnesium per 100 gm is given.

The calcium content (per 100 gm) of the four types of tofu is as follows, with the coagulant shown first: calcium sulfate 139 mg, natural nigari 42 mg, magnesium chloride 36 mg, lactone silken tofu coagulated with GDL (glucono delta lactone) 14 mg. Note that tofu coagulated with calcium sulfate contains more than 3.8 times as much calcium as that coagulated with magnesium chloride (refined nigari).

The tofu curded with calcium sulfate contains 89.0% water, 3.6% protein, 1.7% fat, and 25 mg of magnesium. The tofu curded with magnesium chloride (refined nigari) contains 88.6% water, 5.3% protein, 2.9% fat, and 84 mg of magnesium.

Table 2 compares the nutritional composition of machine-made lactone silken tofu (given above) with handmade silken tofu that contains a chemical additive (Glycerin fatty acid ester = *Guriserin shibosan esuteru*) used to prevent burning while cooking the soybean puree, and improve the tofu yield and texture; each type is coagulated with GDL. The calcium content is 14 mg vs. 129 mg.

Table 3 shows tofu yield using 3 different coagulants: From 1 kg of soybeans a manufacturer can get: 2.75–3.25 lb of tofu coagulated with nigari; 3.50–4.00 lb of tofu coagulated with calcium sulfate; or 4.50–5.00 lb of tofu coagulated with GDL.

The analyses were conducted by the Omiya Consumers' Living Center in Japan.

4754. Ambrose, Elaine. 1980. The "perfect" alternative? *Montachussett Review* (*The*) (*Massachusetts*). Dec. 3.
• ***Summary:*** A good introduction to tofu and a close look at Nasoya Foods, co-owned by John Paino and Bob Bergwall, and how they make tofu. They have been producing high-quality tofu for 3 years and recently business has been booming. The company has worked to Americanize tofu, and they have been pioneers in developing tofu spreads and dips. Their motto: "We've done for tofu what flavors did for yogurt." John and Bob's wives, Sarah Paino and Margery Bergwall conduct the Nasoya Cooking School in Ashby, Massachusetts, where students are introduced to cooking with tofu and other natural foods.

4755. Ferretti, Fred. 1980. Gastronomes' Christmas visions: Oysters, crabmeat, a live goat [and tofu]. *New York Times.* Dec. 3. p. C1, C8. [2 ref]
• ***Summary:*** Various food authorities were asked: "After truffles, foie gras and caviar, what would you like for Christmas?" Alice Waters of Chez Panisse wanted "a live goat so I could get warm goats milk every morning into which I would melt Swiss chocolate. What a breakfast!" James Beard wanted choice Dungeness crab meat from the West Coast. "Finally a wish for enough food for the '15 to 20 million people starving throughout the world' was expressed by William Shurtleff, who with his wife Akiko Aoyagi wrote 'The Book of Tofu' and 'The Book of Miso.' And, he added, the realization by Americans that their diet is exceedingly harmful would be a fine Christmas gift." Other than that Shurtleff said he could think of nothing else but tofu (bean curd) or tempeh (cakes made of soy) as things he wanted for Christmas 'Anything else, he said, 'would be insignificant.' Contains a cartoon of Shurtleff, Julia Child, and others.

4756. Martin, Dale. 1980. New age eatery owners hope to attract diners from all over the state to tofu cafe in Redwood Valley. *Daily Journal* (*Ukiah, California*). Dec. 4. p. 2-3. [1 ref]
• ***Summary:*** The article begins: "Redwood Valley may be an unlikely place to open a tofu shop and cafe, but store owners Dik and Sharon Rose are hoping this new age eatery will catch on and attract diners from all over the area. Tofu is becoming quite a business these days, as more and more people are starting to discover the cheap, nutritious, and versatile soybean product... tofu is finding its way into the American mainstream. It isn't just a health food any more."

"Tofu, made from curdled soybean milk, is also called bean curd. A complete protein, the custardy textured product has been hailed as being highly digestible and an excellent diet food. With meat prices going up and up, many meat eaters as well as vegetarians are increasing their tofu intake.

"Dik and Sharon Rose bought into the tofu dream in June [1980], when they took over Brightsong Tofu in Redwood Valley from its former owner, David Patton. The shop is now in its third year of production. Through increased advertising and hard work, the Roses tripled the output of the shop in five months. The shop is now producing 1300 pounds of tofu a week... The Roses currently employ two workers who make the tofu by hand with wellwater,

© Copyright Soyinfo Center 2013

fresh soybeans and 'a lot of care and love,' according to Dik."

Until a few months ago, Brightsong was the only tofu shop between South San Francisco and Eugene, Oregon. But now there is a new shop in Marin and one opening soon in Arcata.

"Dik and Sharon became interested in tofu after hearing a lecture in 1976 by the 'gurus' of the soybean product, William Shurtleff and Akiko Aoyagi, who wrote 'The Book of Tofu.' After visiting a shop in Oregon, the Roses came to Mendocino County where they discovered 'Brightsong' for sale in the spring."

The Real Food Tofu Cafe seats 14. "The cafe's menu offers such dishes as spiced baked tofu sandwiches, tofu burgers, brown rice tofu burritos, 'soyannaise' spread and tofu cheesecake." Tempeh is also served.

Photos show: (1) Sharon Rose (with long curly hair) standing at the front counter, with a large menu on the wall behind her. Menu items include cheese cake, ice bean cone, soy juice, spirulina, vege herb tofu. (2) A grinder, out of which ground soybeans are dropping into a 5-gallon plastic bucket labeled Brightsong Tofu. (3) A large, round curding basin: "After the nigari is added, the tofu solidifies and separates into curds and whey." (4) Dik Rose, with beard and pony tail, cutting tofu into cakes. (5) Cakes of tofu cooling in water in a stainless steel sink.

Note 1. This is the earliest dated document seen (Aug. 2012) that mentions Brightsong Tofu. Note 2. This is the earliest document seen (Aug. 2012) that mentions Dik or Sharon Rose in connection with this company.

4757. Soyfoods Center. 1980. Catalog: Publications & materials by William Shurtleff & Akiko Aoyagi [mail order]. P.O. Box 234, Lafayette, CA 94549. 20 panels. Dec. 8.
• ***Summary:*** On 17 Sept. 1980, the name of New-Age Foods Study Center was changed to Soyfoods Center. This catalog, folded like a road map, is printed with brown and light green ink on white paper. 12,500 copies were printed. Address: Lafayette, California. Phone: 415-283-3161.

4758. Ferretti, Fred. 1980. The gastronomes' Christmas wish list. *Chicago Tribune.* Dec. 11. p. W_B2, or S_B2, or N_B2. [2 ref]
• ***Summary:*** This article (under a slightly different title) first appeared in the New York Times (3 Dec. 1980, p. C1).

4759. Anderson, Eugene N. 1980. Re: Soybeans, tofu, and tempeh. Letter to William Shurtleff at Soyfoods Center, Dec. 12–in reply to inquiry. 2 p. Typed, with signature on letterhead. [4 ref]
• ***Summary:*** A sinophile, he is collaborating with Dr. Paul Buell (an historian at Western Washington University, Bellingham, WA) on various books on Chinese agriculture, including an economic botany. "We are currently working on the soybean article for this and drawing heavily on your books. He is an inveterate tofu maker who lives by your books."

The spices in real curry are fascinating and much different from those in the "nauseating and disgusting 'curry powder' of commerce."

He is aware of some spectacularly fine Chinese books on vegetarian soyfoods cookery, written by Buddhist religious groups. "Most of the Chinese cookbooks in English are obscene and should be banned as pornography."

It is now known that the old Shen Nung Herbal is from ca. 100 A.D.

"Tempe I assume to be an application to soybeans of earlier technology used on coconut. Incidentally the soybean was introduced to the Malay world by people from the Fujian-Guangdong border between Xinmen (Amoy) and Swatow (Shandou), as shown by the distinctive dialect words borrowed into Malay (*bahasa Indonesia, bahasa Malaysia*)–*taohu, taugé, taucho, tausi*, etc. These are also in Indonesian and Filipino–though tausi could be from Cantonese. These are direct borrowings of precisely the dialect forms of the border area, the southern dialects of the Southern Min or Hokkien language. Tauhu, for instance, is their pronunciation of tofu (doufu in standard Chinese). One word I can't explain is *kecap* (formerly spelled ketjap and so pronounced), the Malay word for soy sauce. It seems to have referred earlier to quite a different, local brew. It has nothing whatever to do with ketchup.

"The latest soy news is yet another proof that peasant techniques have their reasons. It now appears that soybeans have a huge amount of phytate, amounting to up to several percent of the bean. Phytate (the distinctive ion of phytic acid) takes up calcium, zinc magnesium, niacin and other chemically active items in food and makes chemical compounds that humans can't digest effectively. Thus the calcium, niacin, etc., of food is lost. This leads to calcium deficiency, zinc deficiency (as with whole-grain wheat bread eaters in the Near East), or worst of all, pellagra (corn is classically associated with pellagra because it's high in phytate and low in niacin). But of course if you add calcium or magnesium or the like to your food, it takes up the phytate and you're OK. Heat also destroys some of it. Micro-organisms such as yeasts and *Aspergillus* can also destroy it, having appropriate enzymes. Thus processing soybeans with gypsum, nigari or fungal fermentation wipes out this danger." Address: Dep. of Anthropology, Univ. of California, Riverside, CA 92521.

4760. Lowe, Janet. 1980. City's first tofu plant due soon in Hillcrest: San Diego Soy Dairy hopes a demand for exotic food will follow. *San Diego Daily Transcript.* Dec. 24. p. 1A, 12A.
• ***Summary:*** "Gary Stein is building the San Diego Soy Dairy in a building next to the Kung Food restaurant on Fifth

© Copyright Soyinfo Center 2013

Avenue. Kung Food will use part of the former gasoline station for a bakery, and Stein will use the remaining space for his steam injected cauldron system. Stein says his plant should be operating by Jan. 15."

Note: In late 1980 Gary C. Stein of San Diego Soy Dairy (P.O. Box 33778, San Diego, CA 92103. Phone: 714-692-0132) wrote an undated letter on his company's letterhead which stated: "Dear friends, Our new company, the San Diego Soy Dairy, is happy to announce that we will soon be producing tofu and soy milk on a daily basis. By early January we will be able to serve your store or restaurant with fresh tofu and soy milk. We are using only organically grown soy beans and filtered water in our process."

"It would be great service to us if you would indicate on the enclosed card your interest in fresh tofu and soy milk and return the card to us. If you would like to met with a representative of our please indicate that on the card or call 692-0132. We will be happy to answer any further questions. Thank you for your help." Address: San Diego, California.

4761. Root, Waverley. 1980. Soybean: An underdog sneaks up on the world's diet. *Los Angeles Times.* Dec. 29. p. I15.
• ***Summary:*** "Mahatma Gandhi, after much experimentation with various diets, expressed the opinion that the world's best staple food was the soybean."

This article focuses on uses of whole soybeans and unfermented soybean products such as: Fried soybeans [soynuts] in China and Japan. Cooked whole soybeans, which may be added to soups. The young unripe beans [green vegetable soybeans] may be eaten raw in salads.

Whole mature soybeans may be soaked, ground and made into a white liquid which looks like milk. In China "soybean milk is prescribed for babies allergic to human milk, and it is also recommended for invalids."

"Soybean milk is used in cooking in both China and Japan. It is because of this product that the soybean has been called 'the cow of China.'"

For adult Chinese a "typical breakfast is hot soybean milk with bread–a sesame bun or a cruller."

"A byproduct of soybean milk is soybean milk skin (*fu p'i*)" [yuba] which forms on the surface of heated soymilk and can be skimmed off and dried into sheets.

Dried yuba can be "rolled up and deep fried to make the crisp crusty bean sticks (*fu tzu*)" [dried yuba sticks] which appear in both Chinese and vegetarian dishes.

A by-product of the manufacture of soymilk is okara, a high-fiber sediment that is generally fed to pigs in China. Yet okara can be made into pancakes, etc.

"The most important derivative of soybean milk is bean curd [tofu],..." In China it is often pressed, and in both China and Japan it is deep-fried. Or it can be frozen and dried.

4762. Timmins, Tom. 1980. Re: Dates and statistics related to the history of Laughing Grasshopper Tofu Shop and New England Soy Dairy, Inc. Letter to William Shurtleff at Soyfoods Center–in reply to questions of Dec. 29. 1 p.
• ***Summary:*** 1. In Feb. 1978 New England Soy Dairy (NESD) stopped using the name "Laughing Grasshopper" for its tofu.

2. At 305 Wells St., Greenfield, Massachusetts, NESD presently has 3,300 square feet of production space and a total of 7,800 square feet (including offices, storage space, etc.).

3. In July or August 1979 NESD stopped using a batch pressure cooker and replaced it with an Okita continuous cooking system.

4. In Feb. 1978 NESD landed its first big supermarket chain account. It was Food Mart (a division of Waldbaums, New York). They initially purchased 50 cases of tofu a week and are now buying 250 cases a week.

5. NESD got its two latest big loans in May 1980 and July 1980.

6. NESD presently makes about 30,000 lb/week of tofu.

7. The company's total sales were about $70,400 for calendar year 1979 and $1,025,000 for 1980.

8. In about March 1979 Richard Leviton left day-to-day work at NESD to work for the new Soycrafter's Association of North America (SANA; later renamed Soyfoods Association of North America).

9. NESD now has two big projects: Developing consumer markets. Developing four institutional markets (e.g., hospitals, restaurants, business cafeterias, etc.).

10. Laughing Grasshopper's address was 3 Main St., Millers Falls, Massachusetts. Address: New England Soy Dairy, Inc., 305 Wells St., Greenfield, Massachusetts 01301.

4763. Mullarkey, Barbara. 1980. Lots of goodies to munch on at the Good Nature Deli. *J. of Oak Park & River Forest* (*Illinois*) 1(23):9, 12. Dec. 31. Wednesday.
• ***Summary:*** Good Nature Deli is located at 810 Harrison St. in Oak Park. The owners are Kevin D. O'Brien and Mary Ellen Sackett. A big hand-written wall board advertises the daily fare. A recipe for Happy Turkey Pot Pie (with tofu) is given.

4764. *SoyaScan Notes.* 1980. Chronology of soybeans, soyfoods and natural foods in the United States 1980 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** Jan. 4. An embargo on the sale of grain to the USSR is announced by President Carter in retaliation for the Soviet invasion of Afghanistan. Though the embargo was lifted in 1981, it led to a subsequent reduction on Soviet purchases of U.S. soybeans and products.

Feb. Second issue of *Soycraft* magazine published by Leviton. 5,000 copies. On Shurtleff's suggestion, Leviton decides to change the magazine's name to *Soyfoods* in future issues.

© Copyright Soyinfo Center 2013

Feb. New England Soy Dairy holds a big press conference and soyfoods luncheon in Boston.

Feb. First statistics on the size of the U.S. soyfoods industry and market published by SANA (Soyfoods Association of North America) and The Soyfoods Center.

Feb. Plenty, a Third World development and relief organization run by The Farm in Tennessee, works with the people of Solola, Guatemala to open a solar-heated soy dairy. They make tofu and soy ice cream. Partial funding comes from Canadian International Development Agency (CIDA). A promising, original concept and model for taking soybeans and soyfoods to Third World countries.

March 10. Tempeh Production by Shurtleff and Aoyagi published by The Soyfoods Center.

March. Trader Vic (Bergeron), internationally famous San Francisco restaurateur, publishes a poster titled "Put a Little Tofu in Your Life," containing a lovely Polynesian girl and names of tofu recipes served at his restaurants. Three major newspaper stories on his tofu cuisine follow.

March. Soja Soyfoods Cafe opens in Toronto, Canada.

March. Hip Pocket Tofu Deli and Rainstar, a distributor of soyfoods, open at same location in Columbus, Ohio.

March. A second commercial source of tempeh starter culture is now available from Ann Arbor Biological Supply and GEM Cultures, run by Gordon McBride and Betty Stechmeyer.

April. "Climbing Curd," an article on tofu, published in Time magazine, as a result of the New England Soy Dairy Press Conference in February.

May. New England Soy Dairy puts Numu brand soymilk on the market after 2 years of product development. It is quickly withdrawn and dropped, due to short shelf life.

May 5 -June 9. Shurtleff and Aoyagi do Soyfoods America Tour: 20 public programs, 30 media interviews, and 5,800 miles of driving to promote and teach about tempeh and tofu. Ends in Champaign, Illinois where Shurtleff attends the INTSOY Short Course on Soybean Processing for 2 months.

May. Gary and Chandri Barat start selling soyfoods (Whipped Tofu Mousse Pie, Tofu Muffins, Tofu Spinach Quiche) at street fairs in New York City under the name Legume. During 1980 both Legume and Quong Hop & Co. in South San Francisco introduce tofu quiches (both sold frozen); these are America's first tofu entrees to be sold frozen.

June. "Tofu" by Nancy DeRoin published as a cover story by *Cuisine magazine*.

June. U.S. Supreme Court rules that man-made organisms created by genetic manipulation can be granted copyright protection. This ushers in a new era of research on and commercialization of soybean varieties by private companies.

June. INTSOY and Land of Lincoln Soybean Farmers establish International Soybean Institute, headed by Russ Odell, to expand soybean utilization overseas.

June. American Soybean Association's *Soya Bluebook* publishes its first information on the new wave of U.S. soyfoods producers.

July. *Das Miso Buch* (The Book of Miso), by Shurtleff and Aoyagi published in German by Ahorn Verlag.

July 9-13. Third Annual Soycrafters Conference at the University of Illinois. Organized and financed by Richard Leviton. 270-285 attendees from 10 foreign countries. Very successful, with a profit of $7,000. Third issue of Soyfoods magazine published by Leviton. A new Board of Directors is elected with Luke Lukoskie as chairman.

July. Mark Brawerman starts Jolly Licks (later renamed Pacific Trading Co.), a soyfoods marketer-distributor, in San Francisco. First product is soymilk ice cream. Quickly expands to tofu cheesecakes, tofu tamales, etc. Best existing model of this new concept.

Aug. 15. Archer Daniels Midland Co. enters the soy protein isolate market with its purchase of Central Soya's isolate plant.

Aug. Wildwood Natural Foods, Inc. formed in Fairfax, California. Original owners are Paul Duchesne, Paul Orbuch, Bill Bramblett, and Frank Rosenmayr. They do very creative work with prepared, convenience tofu products, such as sandwiches and salads.

Aug. *Tofu: Everybody's Guide*, by Stephen Cherniske published by Mother's Inn Center for Creative Living.

Aug. *The Soy of Cooking*, by Norton and Wagner self-published.

Aug. 20. "Tofu Gaining Popularity as a Cheap Protein Source," by Sylvia Porter published in the *Washington Post.* This is the earliest known publication to mention David Mintz's work with tofu. It describes the numerous deli products he makes from tofu. Ice cream is not mentioned.

Sept. 3. "Tofu: Trader Vic's Creativity Americanizes an Asian Staple" by Harvey Steiman published in San Francisco Examiner. Trader Vic is one of America's foremost restaurateurs.

Sept. Richard Leviton (Soyfoods Association) and Thelma Dalman (food service director for Santa Cruz city school system) lobby for tofu in Washington, D.C. USDA grants 1-time approval for a test program using tofu in Santa Cruz County School Lunches. But this failed to set a national precedent.

Sept. Soyfoods Association board holds first meeting in Colrain, Mass. Plans fund raising program that fizzles.

Sept. 17. New-Age Foods Study Center (run by Shurtleff & Aoyagi) changes its name to The Soyfoods Center. Creates new logo and letterhead.

Sept. 24. "A Couple on a Tofu Mission in the West" (about William Shurtleff and Akiko Aoyagi) by Lorna Sass, published in The New York Times.

Oct. First issue of *The Beanfield* (named after a chapter in *Walden* by Henry David Thoreau) a monthly soyfoods

© Copyright Soyinfo Center 2013

newsletter, published by Leviton. Name changed to *Soyfoods Monthly* in March 1982.

Oct. Tofu and The Bountiful Bean Plant in Madison, Wisconsin are on the Today Show for 2 minutes. This TV segment is aired 2-3 times.

Oct. 13. "With his Book on Tofu William Shurtleff Hopes to Bring Soy to the World" by Dianna Waggoner published in *People* magazine (circulation 3.4 million). The same issue noted: "Model Cheryl Tiegs" has been eating tofu for several years and gives it some of the credit for helping her to lose 35 pounds in 1972. Her favorite recipe for Oriental Pudding is published.

Oct. Severe nationwide shortages of peanuts and peanut butter. Soyfoods producers miss a golden opportunity to make and sell soynut butter.

Nov. 9-14. World Conference on Soya Processing and Utilization held in Acapulco, Mexico, organized primarily by the American Soybean Assoc. 1,100 participants from 35 nations; of these approximately 300 registrants and 250 student attendees were from Latin America. Proceedings published in March 1981 issue of Journal of the American Oil Chemists' Society. Leviton attends and mans a SANA booth, but is not invited to speak.

Nov. Soyfoods Center publishes three pamphlets on soyfoods in Spanish: *Que es el Tofu? Que es el Tempeh? Que es el Miso?*

Nov. *East West Journal* and Michio Kushi stop misusing the term "tamari" and start using the proper term, shoyu or "natural shoyu."

Dec. The Soyfoods Center and Soyfoods magazine merge and computerize their mailing lists of people and organizations world wide actively interested in soyfoods. 5,000 names now on list. Soyfoods Center pays all costs of computerization. By mid-1981 there were 10,600 names in 50 categories. List is available for rent.

Dec. Farm Foods starts national ad campaign for Soy Ice Bean with full-page color ads in national magazines: New Age, Whole Foods, East West Journal, and Vegetarian Times.

Dec. First branch of the International Soyfoods Center Network starts in Sweden, run by Ted Nordquist. Headquarters are in Lafayette, California.

Dec. *The Tofu Primer* by Juel Andersen published by Creative Arts.

Dec. Soymilk viili first made (on a home scale) by Gordon McBride and Betty Stechmeyer of GEM Cultures in Fort Bragg, northern California. This cultured milk product, similar to the traditional Finnish dairy product, has a thick consistency almost like honey.

Dec. New England Soy Dairy becomes the first of the new generation of Caucasian-run tofu companies to top $1 million in annual sales (they hit $1.2 million). With only 6 workers in the plant, they are making $4,000 profit per month during the last quarter.

* In Diamond v. Chakrabarty, the U.S. Supreme Court upholds by 5 to 4 the patentability of genetically altered microorganisms, opening the door to greater patent protection for any modified life forms.

4765. Barber, Linda. 1980. Color slides taken at a small tofu shop in rural Japan. Kobe, Japan. 1 p. Based on e-mail of 2 Nov. 2012.

• ***Summary:*** Linda took these color slides at a tofu shop in a very rural farm town in Japan while on a trip that friends arranged for her. She writes (Nov. 2012). "I loved the old tools and the owners / makers who were a mother and son. It was like going back in time." (1) A traditional stone grinder mounted on stone supports, surrounded by traditional tofu-making utensils. (2) Soaked soybeans being ground between granite stones, which are now turned by a motor. The fresh soy puree runs down into a metal can.

(3) Stirring the soy puree as it cooks and foams up in the caldron. (4) Ladling the cooked soy puree into a coarse pressing sack–as the steam rises.

(5) After the soymilk has been pressed out, only okara (soybean residue) remains in the flattened pressing sack. (6) While stirring hot soymilk with a paddle in the curding vat, the mother prepares to pour in a nigari solution slowly so as to transform the soymilk into curds and whey.

(7) Ladling the curds into a cloth-lined wooden forming box. (8) Pouring the last of the curds from curding vat into the cloth-lined forming box, where they will be pressed into tofu.

(9) A young man (at another tofu shop) carefully cutting a large block of tofu in the cooling sink into individual cakes of tofu, which will remain under water in the sink until they are sold. Address: Resident Director of Practice House and Oral English Instructor, Kobe College, 4-1 Okadayama, Nishinomiya, Japan.

4766. Bau, H.M.; Debry, G. 1980. L'art de l'utilisation du soja: Habitudes et traditions [The art of soya utilization: Customs and traditions]. *Cahiers de Nutrition et de Dietetique* 15(4):277-84. Oct/Dec. [40 ref. Fre; eng]

• ***Summary:*** "For many centuries, soybeans have meant meat, milk, cheese, bread, and oil to the people of Asia. Because of their great food value, they not only have long had a definite place in the oriental diet but now belong in the diet of America and of the entire world. In Europe, the use of soybean products in the quotidian diet is still limited, however it is sure that they will be an important factor in the balanced diet of the future."

Note 1. Soyfoods Center has a 16-page English-language translation of this article.

Note 2. *Webster's Dictionary* defines quotidian (derived from the French *quot* = as many as + *dies* = day) as "occurring every day." Address: University of Nancy, France.

4767. Gerratt, David. 1980. The selling of soyfoods [Interviews with Tom Timmins of New England Soy dairy, Michael Cohen of Tempeh Works, and Martin Strasman of Nature's Table]. *Sprouts: The Newsletter of Western Mass Co-ops* (*Hatfield, Massachusetts*) 2(7):4-5. Dec.
• ***Summary:*** Tom Timmins started his career in natural foods as a manager of the Yellow Sun Food Co-op in Amherst, in 1973. He was introduced to tofu through his work at the Equinox, Amherst's first natural foods restaurant. In 1974 the Equinox started serving tofu, which was purchased through a local Chinese restaurant, which was in turn supplied from Boston's Chinatown. "In 1976, while working for a local natural foods distributor [Llama, Toucan & Crow], Tom was turned on to *The Book of Tofu.* It excited him to such a degree that by the next year he began to work on the Laughing Grasshopper Tofu Shop, together with Richard (Ira) Leviton... The New England Soy Dairy now employs 40 people and sells over 100,000 lb/month of tofu (25,000 lb/week by Jan. 1980).

Michael Cohen, a vegetarian since 1971, stopped eating foods containing *any* animal products in 1975. He too was involved with the Equinox restaurant when it first opened and was introduced to tofu there and at The Farm in Tennessee. In 1978, after 6 months at The Farm, he returned to what had become the New England Soy Dairy. But he decided to leave for personal reasons to start his own tempeh business.

4768. Inagaku, Naoka. 1980. Minami no tôfu, kita no tôfu: Hakusan fumoto–Hakusan no kata tôfu o tazunete [Southern tofu, northern tofu: At the foot of Mt. Hakusan–A visit to Hakusan very firm tofu]. *Daizu Geppo* (*Soybean Monthly News*). Dec. p. 27-29. [Jap]
• ***Summary:*** Hakusan is a mountain in Ishikawa prefecture, western Japan (Honshu), south of Kanazawa, on the Gifu border. 8,862 feet tall with 5 peaks, it is an extinct volcano that last erupted in 1554.

4769. **Product Name:** Adults Only Snacks & Cakes [Almond Delight (Tofu Cheese Cake), Cheeseless Cake with Fruit Topping, Carob Almond Swirl, or Carob Mousse].
Manufacturer's Name: Nature's Table.
Manufacturer's Address: P.O. Box 909, Greenfield, MA 01302.
Date of Introduction: 1980. December.
New Product–Documentation: Gerratt. 1980. Sprouts: The Newsletter of Western Mass Co-ops. Dec. p. 5. The tofu for this product was made by New England Soy Dairy. Interview with Martin Strassmore. 1982. His two cheese cakes are doing okay. Distribution is a problem. Selling frozen.

4770. **Product Name:** Tofu.
Manufacturer's Name: Oak's Soybean Products.
Manufacturer's Address: 5059 Fairforest Dr., Stone Mountain, Georgia. Phone: 404-296-8538.
Date of Introduction: 1980. December.
New Product–Documentation: Talk with Ock Kye (pronounced Kay), owner. 1989. June 16. He started making tofu in December 1980, and still makes only this one product. His is a small company that sells only to restaurants and Oriental grocery stores.

4771. **Product Name:** Tofu.
Manufacturer's Name: Sam Sung Foods, Inc.
Manufacturer's Address: 409 Morse St., Washington, DC 20002. Phone: 202-544-6660.
Date of Introduction: 1980. December.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Samsung Foods, Inc. Owner: Kim Salazar. Leviton. 1982. Soyfoods. Summer. p. 34. Henry & Kim Salazar opened in December 1980. Previously they had been in the bean sprout business. By 1983 the company was named Sam Sung Food Inc.

Sam Sung Soy Foods, Inc. Organic Tofu. Seen at Giant Foods in College Park, Maryland. 1992. July. 16 oz retails for $1.39.

4772. Skurray, G.; Cunich, J.; Carter, O. 1980. The effect of different varieties of soybean and calcium ion concentration on the quality of tofu. *Food Chemistry* 6(2):89-95. Dec. [8 ref]
• ***Summary:*** A slight variation in the texture of tofu was due to the 7S and 11S proteins in the soybean but an important factor affecting the texture of tofu was found to be the amount of calcium ions added during processing. The firmness and coarseness of the product increased with increases in the amount of calcium ions added and a linear relationship was found between the protein content of the beans and the calcium sulphate concentration required for good quality tofu. Address: School of Food Sciences, Hawkesbury Agricultural College, Richmond, NSW 2753, Australia.

4773. *Soyanews* (*Sri Lanka*). 1980. Recipes: Curds and yogurt from soya milk. 3(5):3. Dec.
• ***Summary:*** The "curd from buffalo milk along with treacle [like molasses] still remains the *piece de resistance* of the traditional Sri Lankan table." Inoculate warm soya milk with dairy curd.

4774. **Product Name:** Tofu: Soybean Curds [Packaged, or Bulk].
Manufacturer's Name: Tofu Shop (The).
Manufacturer's Address: 768 18th St. (Box 4716), Arcata, CA 95521. Phone: 707-822-7409.
Date of Introduction: 1980. December.
Ingredients: Organic soybeans, water, nigari (magnesium chloride).

© Copyright Soyinfo Center 2013

Wt/Vol., Packaging, Price: 14 oz water pack or 10 lb minimum bulk, plus refundable bucket deposit.
How Stored: Refrigerated.
New Product–Documentation: Label. Undated (Dec. 1980). 2.5 inches square. Self adhesive. Blue on white. An illustration (line drawing) shows a dragon. "Soybean curds. Perishable. Keep refrigerated." Leaflet. Undated. The Tofu Shop. Soyfoods Center Computerized Mailing List. 1981. Jan. 22. Owner: Suzanne Schmit.

Talk with Matthew Schmit. 1988. July 20. He presently makes about 1,500 lb/week of tofu. He sells at a premium price to the gourmet market that wants fresh tofu. Some customers bring their own containers right into his shop to get the very freshest product. Label (from 1983), sent in 1988. 3 inch diameter. Self adhesive. Gold, blue, green, and white. "Natural Firm Nigari Tofu." Text in a diagonal sash–gold on green: "Handmade since 1977, for a Sweet, Delicate Flavor." Around the edge of the label–blue on gold: "Keep refrigerated. High Protein. Low Calorie. Cholesterol Free." Dragon logo.

Unpublished manuscript by Matthew Schmit. 1988. Brief history of the Tofu Shop (Arcata, California). "The Tofu Shop Specialty Foods Company, a member of the Soyfoods Association of America, was born in the Colorado Rockies [Telluride, Colorado] in 1977 and relocated in Northern California [Arcata] in 1980. The deli opened in Dec. 1980."

Leaflet from ABC Realty in Eureka, California. 1993. June 10. The Tofu Shop–Specialty Grocery and Deli in Arcata is for sale, asking $32,500. Three photos show the deli: one outside and two inside.

Talk with Mara Devine of Arcata, California. 1995. June 1. Matthew Schmit sold his deli (it never really made money) but he continues to be active with his tofu business.

Form filled out by Matthew Schmit. 1998. July 16. Tofu Shop Specialty Foods Inc., 100 Ericson Ct. Suite 150, Arcata, CA 95521. Phone: 707-822-7401. His company started making tofu in Arcata in December 1980.

New Label sent by Matthew Schmit. 2002. Sept. 9. The product was introduced in 1980. 4½ by 3½ inches. Self adhesive. Blue, black, and orange-yellow on white. A handsome, impressionistic watercolor illustration shows a tofu shop (with an Oriental-style roof) on stilts on a cliff near the ocean, with a tree arching overhead. "Traditional nigari. Crafted in small batches from whole soybeans for a sweet, *delicate flavor.* Low in saturated fat. Cholesterol free. Contains 170 mg Omega 3 fatty acids per serving. Made in Humboldt."

Talk with Matthew Schmit. 2002. Sept. 23. When he started making tofu in Arcata in Dec. 1980 he used the same label (blue on white with a blue dragon in the middle) he had used in Telluride. The word "organic" still did not appear on the label.

4775. Tofu Shop (The). 1980. December. New soyfoods restaurant or deli. 768 18th St., Arcata, CA 95521.
• ***Summary:*** Matthew Schmit. 1981 Feb. 13. "Fresh tofu comes to Northern Cal." "The Tofu Shop of Arcata, California, officially opened its doors on December 12, 1980..."

Questionnaire filled out by owner of restaurant or deli. 1982. Restaurant opened for business in Dec. 1980. Lists the company's most popular soy-based menu items in descending order of popularity: 1. Tofuburger (authentic). 2. Tofu-vegetable sushi rolls. 3. Tofu spinach turnovers. 4. Tofu pumpkin pie. 5. Tofu cream pie. 6. Tofu vegetable patties. 7. Tofu tahini salad. 8. Tofu potato salad. 9. Carob soy pudding. 10. Happy-dragon soydrink. The highest weekly total sales over the past 6-2 months: $1,200 in Oct. 1981 because of deli expansion and return of students to Humboldt State. The average weekly deli sales during this period: $850. Note: The company also sells $850/week wholesale. Average hourly wages paid to workers: $3.50. The business startup cost (amount of money it cost to get the business started): $11,000. Current profitability status: Profitable. Plans for the future: Deli display cooler, steam table for hot food, tempeh production. Advice the owner would give to someone starting a similar business: Choose the perfect community. Prepare a detailed business prospectus. Obtain sufficient capital (plus some extra). Prepare for at least one year of double-time work. Love soyfoods. Be professional. Other: "Our goal has been to develop a model for the 'all-American neighborhood tofu shop,' which produces its own fresh tofu and other soy products; where the neighbor down the street can grab a quick bite on the run, or pick up staple groceries (tofu, soymilk, soy margarine, bread, etc.) for home cooking. A large portion of our business is from people who walk to our shop. A balance of wholesale / retail and deli foods / groceries makes small scale tofu production feasible."

Shurtleff & Aoyagi. 1982. Report on Soyfoods Delis, Cafes & Restaurants. p. 3. Started in Dec. 1980 by Matthew & Suzanne Schmit, who formerly ran Far Pavilions in

Telluride, Colorado.

Packet from Matthew Schmit. 2002. Sept. 24. He encloses three original, undated menu leaflets, all vegetarian: (1) Earliest, printed in about 1982, is dark blue ink on tan paper. 3 panels each side, each panel 22 x 9 cm. The menu is on the inside 3 panels. On the 1st panel: Welcome! The Tofu Shop Deli and Grocery. A nice (3 by 2¼ inch) illustration of "The Tofu Shop Specialty Grocery and Deli" appears in the center. "We make our own tofu fresh daily..." (2) Similar. Printed in about 1987. Blue ink on light beige paper. Prices have risen a little. (3) Larger. Printed in about 1992, green ink on beige recycled paper, 8½ by 14 inches, folded into 4 panels on each side. More menu items in these categories: Green salads. Deli salads. Tofu salads. Burgers. Sandwiches. House specialties. Soups & sides. Beverages. Tofu cold-cuts. Address: Arcata, California.

4776. **Product Name:** Potato-Tofu Salad.

Manufacturer's Name: Tofu Shop (The).
Manufacturer's Address: 768 18th St., Arcata, CA 95521.
Date of Introduction: 1980. December.
Ingredients: Organic soybeans (California Health Code, Sect. 26569.11), and water.
Wt/Vol., Packaging, Price: Pint or quart plastic bottles.
How Stored: Refrigerated.
New Product–Documentation: Leaflet 1980, undated. "New deli foods from The Tofu Shop" (768 18th St., Arcata, California 95521). "Your local soyfoods producer." In the upper left corner is a dragon in a round circle. In the lower right is a little man whose body is a paper deli takeout container; he has two arms and two legs, and is wearing a top hat. Pints or quarts.

Label. Received July 1988. 2.5 by 4 inches, vertical oval. Self adhesive. Gold, blue, and green on white. "Fresh Joy o' Soy Soymilk. Natural Unflavored." "Additive-Free. Traditional Methods Since 1977. Cholesterol-Free. Lactose Free." Address: 768 18th St., Arcata, California 95521.

Note: This is the company's 2nd and nicest soymilk label in Arcata; it was first used in 1983 The first (sent by Matthew Schmit in March 2009), which first appeared in Dec. 1980, was round, 3 inches in diameter, green and yellow on white. A large, horizontal, white oval in the middle enabled the product name ingredients, and volume to be stamped on in blue ink, as follows: "Fresh Joy O' Soy. Ingredients: Water, organic soybeans. 16 Fluid ounces (1 pint)."

As of 2002, the unflavored soymilk is sold in pints, quarts, half gallons, and gallons.

4782. **Product Name:** Tofu Veggie Patties. Delicious and Baked.
Manufacturer's Name: Tofu Shop (The).
Manufacturer's Address: 768 18th St., Arcata, CA 95521. Phone: 707-822-7409.
Date of Introduction: 1980. December.
Ingredients: Tofu (water, organic soybeans grown according to Cal. Health Code Sect. 26569.11 and nigari). Fresh vegetables (carrots, green onions, parsley). Tamari (natural soy sauce made with water, soybeans, wholewheat and salt). Garlic and ginger.
Wt/Vol., Packaging, Price: 10 oz.
How Stored: Refrigerated.
New Product–Documentation: Label (metallic). Received 1988. 4 by 2.5 inches. Self adhesive. Green, red, gold, and white. "Ready to eat... or reheat, naturally fresh... from our deli. A perfect snack fresh from the pack. Great in your favorite burger with all the fixin's or as a main dish. Simple to heat in oven (350ºF, 10 minutes) or frying pan. Perishable, keep refrigerated, 34-39º." Matthew Schmit says (March 2009) that the metallic label was first used in 1985.

4783. Tofu Shop (The). 1980. New deli foods from The Tofu Shop (Leaflet). Arcata, California. 1 p. Single sided.
• ***Summary:*** Across the bottom is written: "Your local soyfoods producer." In the upper left corner is a dragon in a round circle. In the lower right is a little man whose body is a paper deli takeout container; he has two arms (with white-gloved hands), two legs (with white spats and black shoes), and is wearing a top hat.

The top half of this leaflet reads: "Dear friends and customers, We hope you'll try our new, ready-to-eat deli foods! They're all made with our traditional-style tofu. Each item is tasty, low in calories, and cholesterol free. And of course, they're all packed with high quality protein.

"Every tofu shop deli product you order is custom-made just for you, and delivered fresh to the northcoast cooperative warehouse in Eureka. This means a high quality product for your customers, and a good shelf life for you.

"You can help by keeping these fresh foods well refrigerated (34-37ºf) and observing the pull date on each label. Thank you.

"Happy eating, The Tofu Shop

"P.S. Just a note about our tofu! It's handmade right here in northwestern California, shipped fresh, and our traditional slow-cooking technique gives it a sweet, delicate taste."

On the bottom half are listed (with ingredients and weights, but without prices) soy products made by the company: Tofu: 14 oz. 14 oz package, or 10 lb bulk. Soymilk: Unflavored pints or quarts. Salads (8 oz): Potato-Tofu Salad, Tahini-Tofu Salad, Tofu Egg(less) Salad. Desserts (8-10 oz): Carob-Soy Pudding, Cocoa-Carob Creme Pie, Pina-Colada Creme Pie, Pumpkin-Tofu Pie. Address: 768 18th St., Arcata, California 95521.

4784. **Product Name:** Basic Everyday Tofu Spread.
Manufacturer's Name: Tofu Shop (The).
Manufacturer's Address: 768 18th St., Arcata, CA 95521. Phone: 707-822-7409.
Date of Introduction: 1980. December.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Refrigerated.
New Product–Documentation: Two Labels sent by Matthew Schmit. 2002. Sept. 9. The product was introduced

Note: Matthew says (May 2012) this tofu burger was and always has been baked.

4786. Tofu Shop Deli & Grocery. 1980. Welcome to the Tofu Shop (Sign). 768 18th St., Arcata, CA 95521.
• ***Summary:*** Sign (8½ by 11 inches, in black calligraphy on white) sent by Matthew Schmit 2002 Sept. 24. It was located inside the Tofu Shop. "A blending of the delicatessens of the West with the tofu shops of the Orient. We produce tofu, soymilk and other soyfoods using traditional methods and demonstrate how these versatile foods are adapted to the Western Diet. Try our take-out deli. We use the finest ingredients which are often organic and locally produced. Browse our shelves for specially chosen condiments and grocery items to tastefully enhance your own homecooking with soyfoods. Thank you for you patronage." Address: Arcata, California. Phone: 707-822-7409.

4787. *Annual Directory of Vegetarian Restaurants.* 1980-1983. Serial/periodical. Angwin, California: Daystar Publishing Co. 22 cm.
• ***Summary:*** The first (1980) edition, compiled and edited by Loren Kennett Cronk, contains 283 pages (not illustrated, 22 cm tall). It gives details on nearly 1,000 restaurants in 450 cities in the USA. Subtitle on cover: "Access to prepared health foods over the entire United States."

At the rear of the book are four ads for restaurants: (1) Whole Wheat 'n Wild Berries (New York City). (2) Real Good Karma (San Francisco). (3) Jack LaLanne's Nutrition Center (Los Angeles). (3) The Prophet (San Diego, California).

The book is organized alphabetically by states, and within each state, alphabetically by city. A detailed description of each restaurant is given, including the name, address, phone number, how to get there, days and hours, days and hours, cost of lunch and dinner. Types of meals served: Lacto-ovo-vegetarian, vegetarian, or macrobiotic. Use of organically grown foods, preservatives, and artificial flavors or colors. What alcoholic beverages are served (if any). Number of seats. Whether or not "food to go" (takeout) is available. Type of ownership. Year established. The earliest vegetarian restaurants seem to have been established in the early 1960s.

In San Francisco, the Real Good Karma Natural Foods Restaurant was established in 1964. The Real Food Company Cafe was established in 1976.

Restaurants that list tofu among the items they serve in 1980 include: The Sleeping Lady Cafe (Fairfax, California; tofu stroganoff). Real Food Company Cafe (San Francisco, California; tofu burgers). Taste of Honey Bakery (San Francisco, CA; tofu cheesecake). The Good Shepherd Restaurant (Santa Barbara, CA; tofu specials). Staff of Life Deli (Santa Cruz, California; tofu vegie lasagna). Mandala Cafe (Santa Rosa, California; tofu almondine). The Regular Restaurant (Rochester, New York; tofu mozzarella).

The last issue of this annual periodical was published in 1983. Address: P.O. Box 707, Angwin, California.

4788. **Product Name:** [Soy Flake Number 1].
Foreign Name: Daizu Fureeku No. 1.
Manufacturer's Name: Ajia Protein.
Manufacturer's Address: Main Office: Miyanomori Palace, Miyanomori 4 jo, 11 chome, Chuo-ku, Sapporo-shi, Japan. Phone: (011) 644-1760.
Date of Introduction: 1980.
Ingredients: Whole soybeans.
Wt/Vol., Packaging, Price: 15 or 30 kg (33 or 66 lb).
How Stored: Shelf stable, 10 month shelf life.
New Product–Documentation: Leaflet. 1983. *Daizu Fureeku No. 1: Gyokai no machinozonde ita kakumei-teki genryô desu* [Soy flake Number 1: The revolutionary ingredient that the industry has long been waiting for]. 4 p. Describes whole (non-defatted) soybean flakes that are used to make tofu in Japan. Stored under the proper conditions (in a cool, dry, dark place), they are guaranteed to keep their quality for 10 months. They are packaged in quantities of 15 kg and 30 kg (33 or 66 lb). An annotated flow sheet of the process for using the flakes to make tofu is given.

A table shows that from 30 kg of Soy Flake No. 1, a tofu

© Copyright Soyinfo Center 2013

maker can obtain 400 cakes (400 gm each) of regular tofu, compared with only 250 cakes if whole soybeans were used. This implies that the flakes give a 60% higher yield of tofu per unit weight than whole soybeans.

The address of the factory is Aza-Toyoni, Hirô-machi, Hirô-gun, Hokkaido.

Talk with (call from) Art Mio of Morinaga. 1990. March 28. He says that Morinaga has used these flakes to make tofu, and the resulting tofu is more bitter than that made from whole soybeans.

Letter from David Nichols of Nichii Co. of America. Asia Protein Co. was established in 1977 by Mr. Chikaarashi; they started to make soy flakes in 1980.

Note: This is the earliest document seen (July 2011) concerning Nichii Co. and soy.

4789. **Product Name:** American Pride Tofu: Soybean Cake [Firm, or Soft].
Manufacturer's Name: American Pride Whole Foods.
Manufacturer's Address: 208 N. 2nd St., Fairfield, IA 52556. Phone: 515-472-9244.
Date of Introduction: 1980.
Ingredients: Soybeans, water, natural nigari.
Wt/Vol., Packaging, Price: 1 lb.
How Stored: Refrigerated.
New Product–Documentation: Label. 1980, dated. 3.5 by 5 inches. Self adhesive. Blue and red on white. "Soybean cake. High protein. One pound supplies 77% of the Adult Minimum Daily Requirement for complete protein. No cholesterol. Keep refrigerated. No preservatives."

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name (American Pride), address, and phone number. Owner: Fredrich Shaefer.

Talk with Rick Desmond, partner in American Pride. 1990. Aug. 2. He is now selling his half of the partnership. Alex Green is his partner but Alex does not want to expand the business; he has other interests. Alex was never really into the tofu business. He bought it as an emergency bailout situation for his financial needs. The company was originally set up to supply Maharishi International University, which is out in the middle of nowhere, amidst corn and soybean fields. The university was one of the founders and provided some funding. Originally the tofu was made in the university kitchen, then it became independent with Frederick Schaefer as the first owner. He owned it for 2 years. He sold it to another person who is now in the appliance business in the San Francisco Bay Area. Alex Green came in in 1985. Now the company makes only one product, tofu. Formerly it made Non-Meat Balls, Soft Tofu, Firm Tofu, and maybe soymilk.

Form filled out by Alex Green. 1998. July 28. American Pride Soyfoods, P.O. Box 524, 1603 N. Fourth St., Fairfield, Iowa 52556. Phone: 515-472-4881. Alex Green in Charge. Started making and selling tofu: Fall 1978.

4790. **Product Name:** Deli Items: Tofu Dips, Salads, Okara Orbs, Baked Fu.
Manufacturer's Name: Bountiful Bean Plant.
Manufacturer's Address: 903 Williamson St., Madison, WI 53703.
Date of Introduction: 1980.
New Product–Documentation: James Lubbe. 1988. March. Abbreviated History of the Bountiful Bean.

4791. Continental Soyfoods Inc. [Joy of Soy]. 1980. Discover tofu! (Leaflet, with recipes). Minneapolis, Minnesota. 1 p.
• ***Summary:*** Contains 9 recipes and 6 preparatory techniques. Note new company name. Address: 510 Kasota Ave. S.E., Minneapolis, Minnesota 55414.

4792. **Product Name:** Honorable Tofu [Dri-Pak (Packed Without Water), or Water Pack].
Manufacturer's Name: Garden of Eatin' (Marketer/Distributor).
Manufacturer's Address: 5300 Santa Monica Blvd., Los Angeles, CA 90029.
Date of Introduction: 1980.
Ingredients: Dr-Pak: Organically grown soybeans, water, nigari bitterns (derived from seawater).
Wt/Vol., Packaging, Price: 16 oz.
How Stored: Refrigerated.
New Product–Documentation: Invoice/Catalog. 1981. April. Leaflet. The world's first dry-packed tofu, sold pasteurized in tofu tubs that contain no water. 16 oz. retails for $1.29. Label. 1981. 4.75 by 4 inches. Plastic film. Blue red and black on clear film. "Tofu never had it so good! The Wizard's guarantee." That the soybeans are organically grown, and no artificial ingredients or preservatives are used. Illustration of Japanese lady in Edo period kimono.

4793. **Product Name:** Tofu "No Cheese" Cake (Dairyless Cheesecake).
Manufacturer's Name: Garden of Eatin'.
Manufacturer's Address: 5300 Santa Monica Blvd., Los Angeles, CA 90029.
Date of Introduction: 1980.
Ingredients: Tofu, honey, almonds, vanilla, agar, almond extract.
Wt/Vol., Packaging, Price: 3.5 oz.
New Product–Documentation: Article and photo in Soyfoods. 1981. Summer. p. 44-45. "No dairy products. No eggs. No oil."

4794. **Product Name:** Eggless Tofu Salad.
Manufacturer's Name: Grateful Sandwiches.
Manufacturer's Address: 2859 Colorado Blvd., Denver, Colorado.

© Copyright Soyinfo Center 2013

Date of Introduction: 1980.
Ingredients: White Wave tofu, tomatoes, sprouts, eggless soy mayonnaise, sunflower seeds, celery, pickles, herbs, spices, and love on rye bread.
Wt/Vol., Packaging, Price: 7 oz.
How Stored: Refrigerated.

4797. **Product Name:** Island Spring Soymilk (Flavored) [Raspberry, Orange, Vanilla, Coffee].
Manufacturer's Name: Island Spring, Inc.
Manufacturer's Address: P.O. Box 747, Vashon, WA 98070.
Date of Introduction: 1980.
Ingredients: Raspberry: Soy milk with mixed fruit concentrate and raspberry concentrate.
Wt/Vol., Packaging, Price: 8 fluid oz (236 ml) plastic jar.
How Stored: Refrigerated.
New Product–Documentation: Labels. 1980. 5.5 by 1.75 inches. Self adhesive. Raspberry is black and white on raspberry. Orange flavor is black and white on orange. "100% Non-Dairy. No sugar. No preservatives." Talk with Luke Lukoskie. 1987. Oct. 19. Island Spring Inc. Fact Sheet and Price List. 1988. This product is still being sold. Now called "Soymilk" and sold 16 quarts or 9 half gallons to the case. Form filled out by Yvonne Kuperberg. 1988. Oct. 1. Gives flavors. Not currently produced.

4798. **Product Name:** Tofuna Salad.
Manufacturer's Name: Lecanto Tofu.
Manufacturer's Address: P.O. Box 444, Lecanto, FL 32661.
Date of Introduction: 1980.
New Product–Documentation: Talk with Marvel Huffman. 1988. May 17. She learned how to make this at one of the annual soyfood conferences.

4799. **Product Name:** Local Tofu.
Manufacturer's Name: Local Tofu.
Manufacturer's Address: R.R. #1, Box 404, Stony Point, NY 10980. Phone: 914-429-2292.
Date of Introduction: 1980.
Ingredients: Water, nigari, Terra Alba.
Wt/Vol., Packaging, Price: 16 oz.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Address listed as R.R. #1, Box 404, Stony Point, NY 10980. Talk with Sam Weinreb. 1987. Dec. 29. Company started in 1979-80. He now makes 1,800 lb/week of tofu. Label. 1987. 3 by 1.6 inches. Red or blue on white. Made in West Nyack, NY 10994.

Talk with Sam Weinreb when he visited Soyfoods Center. 1989. Aug. 17. Sam got interested after he bought *The Book of Tofu* at a bookstore in Los Angeles. He took a plane back to Gate Hill, the artist colony where he lived in Stony Point, New York and proposed to the Gate Hill Co-op that he supply them with tofu. They liked the idea so he set up a small tofu shop in the kitchen of a dome he had built himself at R.R. #1, Stony Point (now 540 Gate Hill Rd.), NY. There he made tofu two mornings a week. Occasionally others came in to help but it never became the co-operative effort involving many people as Sam had hoped. His main outlets were the Gate Hill Co-op, a local health food store in Sloatsburg, and various food co-ops in the county. After a year and a half, two problems arose: He was using so much of the community's water that there was not enough left for anyone to take a shower. He didn't know how to compost the okara and on some hot days, when the wind blew a certain direction, it gave off an objectionable smell. Because of these problems he was urged to move the shop from his home to a rented building 10 minutes drive away at 26 Main St., Haverstraw, NY 10927. In Nov. 1984 Sam moved his shop from Haverstraw to its present location at 307 Route 59, West Nyack, NY 10994.

Sam is now trying to sell his tofu shop. He is burned out and feels it is time for another career (his fifth). Crystal Run, a local group interested in ecology and natural farming and part of the Lakeside community, is showing a strong interest. They would move his soy dairy to their community in Spring Valley. The Ananda community in New York is also interested.

Call from Sam Weinreb. 1997. Sept. 30. He was forced out of his tofu shop at 307 Route 59 in West Nyack, New York, when a huge mall opened across the street. His landlord thought he could now earn more rent. So on Labor Day (end of August) 1997 Sam moved into a new shop at 203 Main St., Nyack, New York 10960. Phone number is the same. He had been at the previous address for 12 years. His present building is one-third smaller than the previous one. But now he is in a community, on Main Street, and he would like to do more retail business, with a deli, fresh take-out foods, etc.

4800. **Product Name:** Tofu (Made with Seawater).

© Copyright Soyinfo Center 2013

Manufacturer's Name: Lotus Food Products.
Manufacturer's Address: Km. 6 Superhighway, Buhangin, Davao City 8000, Mindanao, Philippines. Phone: 241-0278.
Date of Introduction: 1980.
Ingredients: Soybeans, water, seawater.
New Product–Documentation: Talk with Andrew Rawlings. 1994. Nov. 1. This organization is a training center for Americans run by Ananda Marga, established by Shrii Shrii Anandamurti. Andrew is in the process of becoming a missionary in the organization, whose motto is "Self Realization & Social Service" (Namaskar). They have been making tofu for at least 5-6 years and selling it unpackaged in bulk to local people in the area and at their own health food store in Davao. The tofu maker in the community is a Filipino, who makes at least 5 lb/day each morning during meditation. It is the most delicious tofu he has ever tasted. He hopes to buy a tofu making machine in Taiwan for under $2,000.

Letter from Andrew Rawlings. 1994. Nov. 22. He reached Davo a week ago after spending 6 days in Taipei at the Ananda Marga center there. In Taipei he bought a new soybean grinder for US$200 and carried it with him on the plane to Davao. "To my surprise the fellow here has been making tofu for Ananda Marga for 14 years here. Now he is making about 15 kg/day. The name of this shop in Lotus Food Products, not Baba's Foundation as I told you before... Our people here are jubilant about all the useful info contained in your book *Tofu & Soymilk Production."*

4801. **Product Name:** Tofu.
Manufacturer's Name: Mainely Tofu.
Manufacturer's Address: Starks, Maine.
Date of Introduction: 1980.
Ingredients: Soybeans, nigari.
Wt/Vol., Packaging, Price: 12 oz.
How Stored: Refrigerated.
New Product–Documentation: Label. 1980, undated. 2.5 inches square. Self adhesive. Red on white.

4802. **Product Name:** Bottled Soymilk.
Manufacturer's Name: Matsuda-Hinode Tofu Co.
Manufacturer's Address: 526 Stanford Ave., Los Angeles, CA 90013.
Date of Introduction: 1980.
Wt/Vol., Packaging, Price: Bottle.
New Product–Documentation: Soya Bluebook. 1980. p. 50.

4803. **Product Name:** Dry Tofu Burger Mix.
Manufacturer's Name: Maya.
Manufacturer's Address: Ann Arbor, Michigan.
Date of Introduction: 1980.
New Product–Documentation: Shurtleff & Aoyagi. 1980. List of Soyfoods Products. To be blended with fresh tofu to make burgers.

4804. Nasoya Foods. 1980. Summer recipes. Nasoya tofu. A natural soy protein food (Leaflet). Leominster, Massachusetts. 2 panels each side. Each panel: 22 x 14 cm. Undated.
• ***Summary:*** Contains 15 American-style tofu recipes. Address: Leominster, Massachusetts.

4805. Natural Recipes. 1980. Getting to know tofu. Recipes & info (Leaflet). Boston, Massachusetts. 1 p.
• ***Summary:*** This "pamphlet" contains 8 American-style recipes. Any company can have its name and logo printed on the "Getting to know tofu" pamphlet, at the top of the front panel. We have one from Garden of Eatin'.

Note: At about this time, Natural Recipes had the following recipe pads that featured tofu: Creamy tofu dips/dressings. Spicy fried tofu. Sweet & Sour tofu & veggies. Tofu cheesecake. Tofu cutlets parmigiana. Tofu egg-less salad. Tofuburgers. What to do with tofu. They also had the following recipe pads that used tofu as one ingredient, but not the main ingredient: Applesauce cake (icing). Marinated veggies. Old world noodle pudding (dairyless "new world" variation). Peking fried rice. Tokyo fried noodles. Prices: 24-45 pads: $0.88/pad. 50-145 pads: $0.80/pad. 150+ pads: $0.70/pad. One can also order display boards and foam mounting tape for pads. Address: Boston, Massachusetts 02130.

4806. **Product Name:** Nature's Finest Tofu: Natural Soybean Curd.
Manufacturer's Name: Nature's Finest (Distributor).
Manufacturer's Address: Gardena, CA 90249.
Date of Introduction: 1980.
Ingredients: Selected soybeans, water, soybean oil and food grade lime.
Wt/Vol., Packaging, Price: 11 oz.
How Stored: Refrigerated.
New Product–Documentation: Label. 1980, undated. 5 by 4.25 inches. Plastic film. Orange and yellow on clear film. "Natural soybean curd." Four serving suggestions on front panel.

4807. New England Soy Dairy Inc. 1980. Soydairy Tofu recipes (Leaflet, 4 sets: Basic, easy recipes, Oriental recipes, main dishes). Greenfield, Massachusetts.
• ***Summary:*** Contain respectively 9, 5, and 5 American-style tofu recipes. Address: 305 Wells St., Greenfield, Massachusetts 01301.

4808. **Product Name:** Soyboy Tofu (Bulk).
Manufacturer's Name: Northern Soy.
Manufacturer's Address: 30 Somerton St., Rochester, NY 14607. Phone: 716-442-1213.

© Copyright Soyinfo Center 2013

Date of Introduction: 1980.
Ingredients: Water, organically grown soybeans, natural nigari.
Wt/Vol., Packaging, Price: 25 pound bucket, approximately fifty 8-ounce pieces.
How Stored: Refrigerated, 21 day shelf life.
New Product–Documentation: Label. 1980, undated. 4.5 by 7 inches. Black on yellow. "Keep refrigerated. Change water daily. 25 pounds. _____ pieces." Illustration of a laughing boy in a circle surrounded by soybeans.

Talk with Andy Schecter. 1991. Feb. 5. Northern Soy began using natural calcium chloride as a coagulant in about Sept. 1983. The first tofu product they coagulated with this natural calcium chloride was their Soyboy bulk tofu, which had formerly been coagulated with natural nigari. As far as Andy knows, no other tofu manufacturers in America are coagulating their tofu with natural calcium chloride, which is made by pumping water underground and bring up a solution of several minerals, then crystallizing out the calcium chloride. The company moved to 30 Somerton St. in the summer of 1979.

4809. **Product Name:** Tofu.
Manufacturer's Name: Northland Soy Products.
Manufacturer's Address: 5650 Old Seward Hwy., Unit J, Anchorage, AK 99502. Phone: 907-349-4235.
Date of Introduction: 1980.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Bernie Soupanavong.

Times (Anchorage, Alaska). 1986. Oct. 9. "Small Business Administration lauds Northland Soy owner." Fuerst. 1987. Alaska Business Monthly. p. 16-17. "Bernie and the Beanstalk." Note: This is the earliest document seen (March 2011) that mentions tofu in Alaska. This is the earliest known commercial soy product made in Alaska.

4810. **Product Name:** Tofu (Chinese Style).
Manufacturer's Name: Oryana Soy Shop.
Manufacturer's Address: c/o Oryana Food Co-op., 601 Randolph, Traverse City, MI 49684. Phone: 616-947-0191.
Date of Introduction: 1980.
New Product–Documentation: Letter and form filled out by Tom Tofu (Tom Slater). 1988. June 12. He has been making tofu for 5 years and tempeh for 2½ years. "The work is wonderful and personally satisfying." Tom and Deb Trowbridge are in charge. Talk with Tom Slater. 1988. Sept. 7. The company started making tofu in about 1980, as part of the Oryana Food Co-op, Inc. The first tofu makers were Pam Faye Clingdale and Kathy Vargas. Michael Williams was the store's general manager. Today Oryana Soy Shop makes 250-300 lb/week of tofu, and that is increasing. They are located at 16591 Cherry Bend Rd. Phone 616-941-0254.

Talk with Mary Blocksma of Beaver Island, Michigan. 1995. Oct. 4. She just visited the Oryana Food Co-op, a health food store in Traverse City, Michigan. They have a kitchen where they make tofu and tempeh at a separate location (601 Randolph, Traverse City). Eric Bartell is in charge there; call him at 616-941-0254.

4811. Quong Hop & Co. 1980. Quong Hop. Quality soy foods since 1906. Now vacuum packed. Recipes inside (Leaflet). South San Francisco, California. 3 panels each side. Each panel: 22 x 9 cm.
• ***Summary:*** Contains 6 recipes, one for each of their products, with a color photo of each. The products are Soy Milk, Savory Baked Tofu, New Leaf Tofu Burgers, Fresh Tofu, Deep-Fried Tofu Cutlets, and New Leaf Tofu Dressing.

The top half of one panel shows an old black-and-white photo of two men standing in a Chinese food store, surrounded by wooden, boxes, sacks, and shelves. Plainly visible on the back wall is a wooden plaque with two large gold letters bearing the company name. [Note: In a 1986 leaflet from Quong Hop & Co. we are told that this photo was of "The Family Store, 1911"]. The Chinese characters for "Quong Hop" appear on the back wall. The text reads: "The traditional soy foods of China have been our family's business for three generations. Since 1906, when our doors opened in San Francisco's Chinese settlement, we have maintained a firm commitment to quality in every product we manufacture. In 1976, we were the first company to pioneer a return to the use of traditional, time-proven methods and completely natural ingredients in the commercial

© Copyright Soyinfo Center 2013

manufacturing of fresh tofu and soy milk. Today, our organic Nigari tofu is widely regarded as the finest made. To further develop the expanding soy foods marketplace, we are now offering a complete line of vacuum-packed soy products. Our historical commitment to quality and, more recently, to the adaptation of soy foods to the American marketplace, have placed us at the forefront of the 'Soy Foods Revolution'. We offer a growing line of soy products based on Western Recipes, including Tofu, Burgers, Creamy Tofu Dressing, and soon Tofu Salad and other items." Address: 161 Beacon St., South San Francisco, California 94080.

4812. **Product Name:** Teriyaki Tofu.
Manufacturer's Name: Quong Hop & Co.
Manufacturer's Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.
Date of Introduction: 1980.
New Product–Documentation: Shurtleff & Aoyagi. 1980. List of soyfoods products.

Note: This is the world's earliest known Teriyaki Tofu (or Tofu Teriyaki). Interesting that it was developed by a Chinese company in California.

4813. **Product Name:** Tofu Cutlets Marinara.
Manufacturer's Name: Quong Hop & Co.
Manufacturer's Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.
Date of Introduction: 1980.
Ingredients: Tofu cutlets (organic tofu, whole wheat flour, wheat germ, soy milk, safflower oil), tomato sauce (water, tomato paste, onion, spices, salt), cheese.
Wt/Vol., Packaging, Price: 10.5 oz.
How Stored: Frozen.
New Product–Documentation: Label. 1981. 3 by 2 inches. Self adhesive. Red and brown on white. Shurtleff & Aoyagi. "From the Soy Deli. New Leaf Quality Soyfoods." 1980. List of soyfoods products. Frozen entree. Talk with Ben Lee. 1988. Sept. 30. Introduced in 1980. Frozen.

4814. **Product Name:** Tofu Eggplant Marinara.
Manufacturer's Name: Quong Hop & Co.
Manufacturer's Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.
Date of Introduction: 1980.
Ingredients: Organic tofu, eggplant, breading (whole wheat flour, wheat germ, soymilk), safflower oil, tomato sauce (water, tomato paste, spices, salt), cheese.
Wt/Vol., Packaging, Price: 10.5 oz.
How Stored: Frozen.
New Product–Documentation: Label. 1980. 3 by 2 inches. Self adhesive. Red and orange on white. "From the Soy Deli." Baking instructions. Shurtleff & Aoyagi. 1980. List of soyfoods products. Frozen entree. Ad in Whole Foods. 1981. Sept. Talk with Ben Lee. 1988. Sept. 30. Introduced in 1980.

4815. **Product Name:** Tofu Quiche.
Manufacturer's Name: Quong Hop & Co.
Manufacturer's Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.
Date of Introduction: 1980.
Ingredients: Filling: Organic tofu (water, organic soybeans, magnesium chloride-nigari) Gruyere cheese, zucchini, mushrooms, scallions, wheat germ, salt, spices.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Frozen.

4818. **Product Name:** Tofu Salad.
Manufacturer's Name: Solar Winds.
Manufacturer's Address: Ojai, California.
Date of Introduction: 1980.
Ingredients: Tofu, fresh mixed vegetables, miso, safflower oil, vinegar, natural herbs & spices.
Wt/Vol., Packaging, Price: 6 oz.
How Stored: Refrigerated.
New Product–Documentation: Label. 1982. 3 by 2 inch oval. Self adhesive. Yellow, brown on orange. Shurtleff & Aoyagi. 1980. List of soyfoods products.

4819. **Product Name:** Tempeh of the Sea (Containing Sea Vegetables).
Manufacturer's Name: Soy Plant (The).
Manufacturer's Address: 211 East Ann St., Ann Arbor, MI 48104. Phone: 313-663-0500.
Date of Introduction: 1980.
Ingredients: Organic soybeans, arame, hiziki [hijiki], dulse, nori, kelp, vinegar, rhizopus oligosporus culture.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Frozen.
New Product–Documentation: Rectangular Label in Soy Plant scrapbook. 1980. 4½ by 4 inches. Black on white. An oval illustration in the center shows plants growing by the sea shore.

Shurtleff & Aoyagi. 1985. History of Tempeh. p. 56. Sliced, this tempeh "resembled fish sticks."

4820. **Product Name:** SoyAmaze (Soy Mayonnaise).
Manufacturer's Name: Soy Plant (The).
Manufacturer's Address: 211 East Ann St., Ann Arbor, MI 48104. Phone: 313-663-0500.
Date of Introduction: 1980.
Ingredients: Soymilk, safflower oil, sesame oil, cider vinegar, honey, salt.
Wt/Vol., Packaging, Price: 16 oz.
How Stored: Refrigerated.
New Product–Documentation: Label in Soy Plant scrapbook from about 1980. 4½ by 3 inches. Black on white. 16 oz. "Serving suggestions; Use in cold salads, on sandwiches. Add spices, or chives, serve on baked potatoes, rice & vegetables, or tofu filets... (Separation may occur, stir before using)." This product was sold in plastic tubs, unpasteurized, like a fresh dressing.

4821. **Product Name:** Soysage [Mild, or Spicy].
Manufacturer's Name: Spring Creek Soy Dairy.
Manufacturer's Address: 136 Main St., Spencer, WV 25276. Phone: 304-927-1815.
Date of Introduction: 1980.
Ingredients: Okara (soy pulp), whole wheat flour, nutritional yeast, water, salt, caraway, mustard, sage, onion powder, garlic powder, cayenne.
Wt/Vol., Packaging, Price: 1 lb.
How Stored: Refrigerated.

cholesterol. Low calorie." Talk with David Druding. 1988. May 18. They made this while they were still in the Community Cannery.

4823. **Product Name:** Carob Pudding (With Tofu).
Manufacturer's Name: Summercorn Foods Inc.
Manufacturer's Address: 401 Watson, Fayetteville, AR 72701. Phone: 501-521-9338.
Date of Introduction: 1980.
Ingredients: Tofu, honey, carob powder.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Refrigerated.
New Product–Documentation: Label. 1980. 2.5 inch diameter. Self adhesive. Black on white. "Low cholesterol." Talk with David Druding. 1988. May 18. They made this in a 40-liter VCM that they bought from The Farm in Tennessee while they were still in the Community Cannery.

4824. **Product Name:** [Dried Flavored Tofu].
Foreign Name: Tofu Saveur Sec (Wu Hsiang Doufu Kan).
Manufacturer's Name: Sunrise Market Ltd.
Manufacturer's Address: 729 Powell St., Vancouver, BC, V6A 1H5, Canada. Phone: 604-254-0701.
Date of Introduction: 1980.
Ingredients: Water, extract of soy, water, salt, calcium sulphate, soy sauce, egg color, monosodium glutamate, spices.
Wt/Vol., Packaging, Price: 250 gm (8.8 oz).
How Stored: Refrigerated.

New Product–Documentation: Label. 1987. 5 x 2 inches. Red on white. Form filled out by Peter Joe. 1988. May 20. Gives date. The term "dried" in the product name means that the tofu is pressed until it is very firm. It does not undergo a drying process.

4825. **Product Name:** Tempeh.
Manufacturer's Name: Swan Gardens.
Manufacturer's Address: 1111 N.W. 22nd., Miami, FL 33127. Phone: 305-324-8910.
Date of Introduction: 1980.
New Product–Documentation: Soyfoods Center. 1982. Jan. Tempeh Shops in the West. Unpublished computer printout. Soyfoods Center Computerized Mailing List. 1982. July 23. Owner: Dick McIntyre. Phone: 305-324-8910.

4826. **Product Name:** Tree of Life Organic Tofu.
Manufacturer's Name: Tree of Life, Inc. (Distributor).
Manufacturer's Address: St. Augustine, FL 32084.
Date of Introduction: 1980.
Ingredients: Purified water, organically grown soy beans, natural nigari (an extract of sea water).
Wt/Vol., Packaging, Price: 16 oz packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.
How Stored: Refrigerated.
New Product–Documentation: Label. 1983, undated. 5.5 by 5 inches. Plastic film. Dark green, cream, and white on film. "We appreciate your confidence in choosing this Tree of Life product. To ensure your satisfaction, we have made certain it contains the freshest, most natural ingredients available. Each Tree of Life product states clearly on the label what is inside and we know because we put it there." As of 1987, this tofu is made by Swan Gardens in Georgia. Talk with Donna Detoro at Tree of Life. 1988. Sept. 23. This product was introduced in April 1980. By 1988 they were selling 6,000 to 8,000 units/week.

4827. **Product Name:** [Tofu, and Soymilk].
Manufacturer's Name: Unimave Tofu.
Manufacturer's Address: Rua Mouzinho da Silveira 25, 1200 Lisboa, Portugal.
Date of Introduction: 1980.
New Product–Documentation: Letter from Sjon Welters. 1982. April 16. "In Portugal some macrobiotic centres are busy in promoting soyfoods as part of the macrobiotic diet. They produce tofu and soymilk on a small scale. This macrobiotic centre is very active and did have a lot of success and publications. A friend who studied at Manna for a while, José Parracho is planning to make tempeh and tofu in Portugal. The business will be Quinta da Portugesa in Setubal."

Letter from Miguel de Abreu in Belgium. 1989. Oct. 2. His profession is a natural foods, macrobiotic, vegetarian cook. He began in April 1978, when he started cooking at Unimave, a vegetarian macrobiotic cooperative in Lisbon, Portugal. "Around 1980 we started making tofu and soymilk at Unimave on a community scale... Today I am living in [Oostduinkerke] Belgium with my wife and we would like to start making tofu" and tofu products.

Note: This is the earliest known commercial soy product made in Portugal.

4828. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Unknown.
Manufacturer's Address: Guadalajara, Jalisco, Mexico.
Date of Introduction: 1980.
New Product–Documentation: Letter from Nicole Black. 1988. Oct. 24. "I knew of a tofu shop in Guadalajara that started about 8 years ago but only lasted for 2-3 years."

4833. Bloodroot Collective; Beaven, Betsey; Giordano, Noel; Miriam, Selma; Shea, Pat. eds. 1980. The political palate: A feminist vegetarian cookbook. Sanguinaria Publishing, 85 Ferris St., Bridgeport, CT 06605. xxiii + 325 p. Illust. Index. 23 cm. [39 ref]
• ***Summary:*** This feminist collective and restaurant is named Bloodroot for an eastern woodland wildflower, *Sanguinaria canadensis.* They "found something symbolic in its slow spreading rhizomatous root system and the way each piece of root throws up its own grey-green leaf furled protectively around the eight-petaled white flower. Any part of the root, stem, or leaf 'bleeds' a red juice." The cookbook is largely vegetarian (though 8 recipes which use fish are included), seasonal, and ethnic/regional. The introduction praises the books on tofu, tempeh, and miso written by Shurtleff and Aoyagi as "truly political books." Their favorite vegetarian cookbook is Julie Jordan's *Wings of Life* (Crossing Press). The book is interspersed with feminist quotations and has a separate lengthy feminist bibliography.

Soy-related recipes include: Harvest vegetable platter with miso gravy (p. 17-19). Winter miso soup (with soybeans, p. 80-81). Kasha platter (with miso gravy, p. 91-92). Indonesian tempeh dinner (p. 96-97). Urab: Indonesian steamed vegetable salad (with tofu, p. 98). Sea vegetable salad (with tofu dressing and wakame, p. 134-35). Grilled Ma-Po tofu and rice (p. 169-70). Hot and sour soup with wild daylily buds (and tofu, p. 188-89). Snow pea salad with tofu sauce (p. 196). Omelet grandmere (with miso gravy, p. 280-82). Address: Bridgeport, Connecticut.

4834. Calkins, Fern; Register, U.D.; Sonnenberg, Lydia. 1980. It's your world vegetarian cookbook. Enlarged, 2nd ed. Washington, DC: Review and Herald Publishing Association. 304 p. Illust. Index. 24 cm. Sponsored by Dept. of Nutrition, School of Health, Loma Linda University, and Southern California Conference of Seventh Day Adventists.
• ***Summary:*** It's Your World" is a television series hosted by Art Linkletter and sponsored by the Seventh-day Adventist Church in Glendale, California. The original edition was published in 1973. Contains a number of quotations on diet and health by Ellen G. White.

Soy-related recipes include: Catalina cutlets (with cooked soybeans, p. 13). Florentine fritters (with soybeans, p. 18). Frontier fritters (with soybeans, p. 21). Saucy soy sizzlers (with soybeans, p. 23). Hawaiian chestnut balls (with tofu, p. 24). Tofuburgers (p. 24). Tasty tofu timbales (p. 25). Millet gourmet casserole (with soybeans, p. 34). Tender soya broccoli (with FriChik and Soyannaise, p. 40). Savory baked beans (p. 45). Baked soybeans Americana (p. 48). Beans 'n' apples (p. 50). Soybeans Hawaiian (p. 54). Mandarin garden soys (using Loma Linda Green Soybeans, p. 60). Celebrated red rice (with adzuki beans, p. 63). Oriental tofu (p. 69). Stir-fry vegetables with tofu. Luncheon tofu (p. 70). Tofu dippers (p. 71). Pepper-olive tofu (p. 78). Emperor's feast (with tofu, p. 78). Tofu "steak" (p. 79). Tofu scramble (p. 88). Quick 'n' easy tofu (p. 89). Crispy tofu sticks (p. 89). "Cheesy" spread (with tofu, p. 96). Soybean soup a la Creole (p. 106). Tokyo special (with tofu, p. 111). Tofu salad (p. 130). Tofu stuffing (p. 132). Garlic-dill dressing (with tofu, p. 145). Tofu sour crème topping (p. 151). Garden vegetable dip, or Confetti dip (with tofu, p. 152). Whole-wheat bread (with tofu, p. 174). Wabash fried mush (with soy beans and soy flour, p. 182). Tofu "jerky" (p. 200). Roasted soy smacks (dry-roasted, seasoned soynuts, p. 201).

Pages 42-43 contain a cooking guide for dry beans, peas, and lentils. Adzuki (or Chinese red) beans are included. Concerning soybeans: "It is better to soak soybeans longer than other beans–2 or 3 hours or overnight. Soaked

© Copyright Soyinfo Center 2013

beans in small quantities may be frozen in containers as a convenience. Thaw before cooking or drop frozen into boiling water. 2/3 teaspoon of salt is enough for each cup of dry soybeans, or use 1 tablespoon chicken-like seasoning and ¼ to ½ teaspoon salt. When pressure cooking 1 cup soybeans, use 2 cups water; 1 teaspoon of oil may be added to keep from foaming; at the end of cooking time cool immediately under cold running water. Soybeans have a more nutty flavor and are more tender when they are served immediately after cooking."

Many recipes also called for commercial branded soy-based products made mostly by Loma Linda Foods or Worthington Foods. Pages 273-75 give a list of "Vegetable Protein Alternates (Analogs)." Those made by Loma Linda Foods or Worthington Foods are so marked. Details on tofu are given on pages 24, 69, 79, 275, and 298. Address: 1. B.A.; 2. PhD, RD, Chairman, Dep. of Nutrition; 3. M.A., R.D., Assoc. Prof., Dep. of Nutrition. All: School of Health, Loma Linda Univ., Loma Linda, California.

• ***Summary:*** Japan imports 3,600,000 tonnes (metric tons) of soybeans each year for use as food and crushing. Previous studies have shown that the ratio of 7S to 11S proteins and the ratio of phosphorus to nitrogen are important in determining the texture of tofu. However this study shows that these ratios are not as important as the amount of calcium sulfate used as a tofu coagulant. Variation in the first two ratios could be counteracted by changing the amount of calcium sulfate used. Address: Hawkesbury Agricultural College, Richmond, NSW 2753, Australia.

4836. Chan-Yap, Gloria. 1980. Hokkien Chinese borrowings in Tagalog. Canberra, Australia: Dept. of Linguistics, School of Pacific Studies, Australian National University. viii + 155 + 10 p. Illust. 25 cm. Series: Monograph Publication of Philippine Linguistics, Series B. No. 71/ *
• ***Summary:*** Page 94 states "... preparation of food such as spices, seasoning and other food preservatives. Examples are angkak "red-coloured grains of rice used as colouring for food."

However in the actual word list, angkak is described as being made from red leaves, which is incorrect.

The Tagalog word *utaw* meaning soybean (or perhaps black soybean) is derived from the Hokkien word *otau* (black + bean).

The Tagalog word *togu* meaning bean sprouts (often soybean sprouts) is derived from the Hokkien word *tauge* (bean + sprout).

The Tagalog word *taho* meaning tofu is derived from the Hokkien word *tauhu* (bean + curd).

The Tagalog word *tahure* meaning fermented salted soybean curd / tofu is derived from the Hokkien word *tauhu* (bean + curd).

The Tagalog word *tawsi* meaning fermented black soybeans is derived from the Hokkien word *tausi* (bean + preserved).

The Tagalog word *tokwa / tokuwa* meaning pressed tofu is derived from the Hokkien word *taukua* (bean + dried).

The Tagalog word *toyo* meaning soy sauce is derived from the Hokkien word *tauiu* (bean + oil).

• ***Summary:*** About vegetarianism, vegetarian menus and recipes, hatha yoga, and naturopathy. Soy-related recipes include: Russian vegetable pie with spiced yogurt (with soy butter, p. 32). Fresh bean curd with ginger and scallions (p. 34).

4841. Doi, Tadao; Takeshi, Morita; Chonan, Minoru. 1980. Hôyaku Nippo jisho [Vocabulary of the language of Japan]. Tokyo: Iwanami Shoten. xxxiv + 862 p. 27 cm. [Jap; Por]
• ***Summary:*** This is a Japanese-language translation of the original 1603 edition, *Vocabulario da Lingua de Iapam,* the second earliest dictionary of the Japanese language compiled by Europeans. Soy-related terms in this dictionary, which are translated from the original hard-to-read Portuguese into modern Japanese, are described in detail at the reference for the original 1603 dictionary, which see.

In the Forward, the author notes that this is the entire translation of the Nagasaki edition of the Japanese Portuguese Dictionary. The original title is *Vocabulario da Lingoa de Iapam com a declacaraçao em Portugues* (Japanese dictionary with explanation in Portuguese), published in 1603 by the Japanese Society of Jesus (Nihon Iezuzu-kai). In 1604 a second dictionary was published, titled *Arte da Lingoa de Iapam Composta Pello Padre Iaao Rodriguez* (1604-1608).

Christian priests traveled by boat to Japan to teach the Japanese Christianity. As a result, they left many historical documents. Francis Xavier first arrived in Japan in 1549 and only 54 years later his group published this remarkable Japanese dictionary. The year 1603 was also the year that Tokugawa Ieyasu became the shogun (Seiitaishogun, or highest ranking samurai), founding the Tokugawa Shogunate or Edo period. In Japanese history it was the turning point at which the country changed from the medieval period to the modern one. This dictionary is a very unique mirror which reflects this period and is regarded as an important document that raises many questions in Japanese cultural history. The dictionary is indispensable in Japanese linguistic history since it contains many Japanese words of the period with explanations in Portuguese. In those days the Japanese had dictionaries that focused on Chinese characters (kanji) and simple dictionaries for waka and renka poems. This dictionary picked up a wide range of words from daily conversation, organizing and defining them in modern dictionary form. The original edition was stored in a secret place in Europe, inaccessible to Japanese, who therefore had to largely depend on a 19th century French translation by Leon Pajes. A rotogravure edition of the book stored at Oxford University entered Japan during the Taisho period (1912-1926) and was studied. Only recently was a facsimile copy of the original edition published, and it is being used increasingly.

This dictionary was produced by the Japanese Society of Jesus [Jesuits] to further their goal of spreading Christianity. The 1603 dictionary was developed to help the priests understand dialects, lower-class speech, and the confessions of the local common people. The 1604 dictionary focused on the speech of the upper classes and more educated people. Thus the 1603 dictionary collected words the priests needed to understand, while the 1604 dictionary collected those that they wanted to use.

• ***Summary:*** A vegetarian cookbook. Page 45 describes how to sprout various seeds and beans, including soybeans. The section titled "Soybeans Simplified" (p. 66-75) begins by asking "Why are soybeans so highly praised?" then gives recipes for: Basic cook soybeans. Soyburgers (from cooked, mashed soybeans). How to make soy milk (12 cups, using soy flour or soybeans). Soy "coffee." Tofu (soybean curd). Tofu sandwich spread. How to roast soybeans (dry). The last page of the section, titled "Soybean Terminology" gives 1-2 line descriptions of: Soy grits, soy meal, soy granules, soy flour, soy powder (extra fine soy flour, used to make soy milk), soya (implies that the product has been toasted), roasted soybeans, tofu, miso, tamari.

Other soy-related recipes include: Wheat-soy pancakes (with soy flour, p. 169). Soy fritters (with mashed soybeans, p. 222). Simple soy bean loaf (p. 228). Vegetarian sukiyaki (with tofu and soy sauce, p. 231). Soy cheesecake (with tofu, p. 291). Address: Illinois.

4843. Ebling, Gerd. 1980. What is tofu? Win these prizes (Ad). *Willamette Valley Observer* (*Oregon*). Advertising Supplement. 4 p.
• ***Summary:*** On the front of this 4-page supplement is the Surata Soyfoods logo plus a brief description of the prizes: "1st–One year supply of tofu. 2nd–Six month supply of tofu... and many more." On pages 2 and 3, under the title "Welcome to the Tofu-Quizz," are 41 multiple choice questions about tofu, including its history, nutritional value, etc. "You must answer all questions to be eligible for the prize." On the last page are a list of 7 prizes, contest rules, and a listing of 13 retail outlets and 8 restaurants where Surata tofu is sold and where extra copies of the Tofu Quizz may be obtained and where answers must be submitted. "No entry will be accepted after October 21st, 1980." Address: Surata Soyfoods, Oregon.

4844. Fessler, Stella Lau. 1980. Chinese meatless cooking. New York, NY and Scarborough, Ontario, Canada: New American Library. 298 p. Illust. by Janet Nelson. Index. 20 cm.
• ***Summary:*** This vegetarian cookbook, which contains more than 180 recipes, demonstrates vividly how much Chinese

© Copyright Soyinfo Center 2013

vegetarian cookery depends on soyfoods–especially tofu (bean curd). The glossary includes excellent descriptions of bean curd–fermented red (*nan-ru*), bean curd–fermented white (*tofu-ru*), bean curd–pressed threads or noodles, bean curd sheets (*tofu-pi* [*yuba*]), bean curd sheets (*er-ju*), bean curd sheets–pressed or hundred-leaf (*bai-yeh*), bean curd sticks (folded bean curd sheets), brown bean paste or brown bean sauce, bean paste–Szechuan hot bean or spicy soy, bean sprouts–soy or yellow, fermented or salted black beans, Hoisin sauce, Oyster sauce (with soy), soy sauce, soy sauce–light or thin.

The chapter on soups stocks notes that soybeans or soybean sprouts have a delicate flavor and are most suitable for making stock. Soy sprouts, which are much larger than mung bean sprouts, have a more chewy texture and a very sweet, delicate taste; they are often used to strengthen the flavor of a dish (see recipe p. 90).

Soy-related recipes (each with the name written in Chinese characters) include: Mixed pressed bean curd threads (p. 68). Spinach and deep-fried bean curd puff salad (p. 70). Soybean sprout salad (p. 73). Pressed bean curd salad (p. 76). Monks in a storm of wind and snow (Asparagus and bean curd salad, p. 82). Soybean sprout stock (p. 90). Deep-fried bean curd and mung bean noodle soup (p. 93). Spinach and bean curd soup (p. 98). Seaweed and bean curd soup (p. 99). Soybean soup (p. 100). Soybean with fried gluten soup (p. 101). Asparagus and bean curd soup (p. 106). Goddess of Mercy (Kuan-yin) soup (With bean curd and tiger lily bulbs, p. 112-13).

One long chapter (p. 118-160) is titled "Bean curd dishes, mock meat dishes, and mock fish dishes." It gives good definitions of and home-scale recipes for: Bean curd. Deep-fried bean curd puffs. Plain pressed bean curd cakes. Five-spice pressed bean curd cakes. Braised deep-fried bean curd puffs. Bean curd with oyster sauce (not vegetarian). Braised bean curd. Spicy bean curd. Steamed bean curd with spicy bean paste sauce. Bean curd with tomatoes. Bean curd with fresh mushrooms. Cold bean curd. Stubborn stones' obeisance (Fried bean curd with vegetables). Braised frozen bean curd with chives. Braised Fukien [Fujian] bean curd. Stir-fried Chinese chives with pressed bean curd. Stir-fried pressed bean curd with carrots and bamboo shoots. Mock lion's head (with five-spice pressed bean curd). Stir-fried green peppers with mock meat (pressed bean curd). Mock moo goo gai pan (Stir-fried pressed bean curd with vegetables). Mock roast duck (with dried bean curd sheets and soy sauce). Mock soy sauce chicken (with fresh or frozen hundred-leaf bean curd sheets). Mock velvet chicken (fried bean curd with egg whites). Spicy mock chicken (with mock soy sauce chicken). Mock ham (with dried bean curd sheets). Bock abalone (braised gluten balls). Mock mu-shu pork (with five-spice pressed bean curd, shredded). Fried mock squab (with chopped pressed bean curd). Mock twice-cooked pork (with five spice pressed bean curd). Bean curd with thousand-year eggs.

Other interesting recipes include: Wheat gluten (homemade mein jin or vegetable steak, p. 165-66; At Chinese grocery stores, wheat gluten is sold in various forms–fried, dried, steamed, boiled, canned, and frozen). Fried gluten balls. Boiled gluten. Lo Han vegetable dish (with fried wheat gluten balls, p. 169-70). Chinese mustard greens in black bean sauce (p. 173-74). Stir-fried leeks with bean curd (p. 186). Fresh soybeans stir-fried with fresh mushrooms (p. 187). Boiled fresh soybeans in their pods (p. 188). Bean sprouts stir fried with wheat gluten (p. 190). Stir-fried soybean sprouts with bean curd puffs (p. 191). Cauliflower and bean curd sticks (p. 192). Winter melon with red fermented bean curd sauce (p. 195). Stir-fried asparagus with fermented bean curd (p. 197). Stir-fried lettuce with white fermented bean curd sauce (p. 198). Sweet and sour fried gluten and cabbage (p. 208). Two immortals in the apricot garden (fried gluten with vegetables and almonds, p. 209). Braised eggs with bean curd sticks (p. 213-14). Scrambled eggs with fermented bean curd (p. 214). Bean curd with salted eggs (p. 216-17). Wonton soup (with fresh bean curd, p. 233-34). Fried wontons (filled with five-spice pressed bean curd, coarsely chopped). Soybean milk, sweet soybean milk, and salty soybean milk (p. 247-48). Deep-fried crullers (*yu chiao;* sometimes served in hot soymilk, p. 249-50). Noodles with spicy bean paste sauce (and five-spice pressed bean curd, p. 258-59).

Note 1. This is the earliest English-language document seen (Oct. 2011) that uses the term "red fermented bean curd" to refer to red fermented tofu.

Note 2. This is the earliest English-language document seen (Oct. 2011) that uses the term "white fermented bean curd" to refer to regular white fermented tofu. Address: Cornell Univ., Ithaca, New York.

4845. Fukushima, Danji; Hashimoto, Hikotaka. 1980. Oriental soybean foods. In: F.T. Corbin, ed. 1980. World Soybean Research Conference II: Proceedings. Boulder, Colorado: Westview Press. xv + 897 p. See p. 729-743. [7 ref]

• ***Summary:*** Contents: Fermented soybean foods. Non-fermented soybean food. Conclusion. References.

The following statistics show the amount (tons) of whole soybeans / defatted soybean grits / total of whole and grits consumed for various soybean foods and feeds in Japan in 1976.

Fermented soyfoods: Shoyu (soy sauce) 10,000 / 165,000 / 175,000, miso 190,500 / 5,000 / 195,500. Natto 69,000 / 0 / 69,000.

Non-fermented soyfoods: tofu and aburage (fried tofu pouches) 411,500, 55,000 / 466,500. Kori-tofu (dried-frozen tofu) 29,000 / 0 / 29,000. Others 16,000 / 75,000 / 91,000.

Animal feeds: 30,000 / 1,950,000 / 1,980,000. Thus total use for foods and feeds is whole soybeans 756,000.

© Copyright Soyinfo Center 2013

Defatted soybean grits 2,250,000, total of both 3,006,000. By type of use, animal feeds account for 65.9% of total Japanese usage of whole soybeans and defatted grits, non-fermented soyfoods account for 19.5%, and fermented soyfoods account for 14.6%. The top three food users are tofu (466,500 tons, 45.5% of all food uses), miso (195,500), and shoyu (175,000). There are 35,000 tofu plants in Japan.

Fermented soybean foods described are shoyu (soy sauce; 5 types), miso (3 basic types, 6 varieties), sufu (Chinese soybean cheese), tempeh (fermented soybean cake), natto (fermented whole soybeans; itohiki-natto and hama-natto), and fermented soymilk (recently a new fermented soybean product appeared on the market in Japan. It is a soy milk drink fermented by lactic acid bacteria).

Non-fermented soybean foods described are tofu (soy milk curd), aburage (fried tofu pouches), kori-tofu (dried-frozen tofu), yuba (coagulant film of soy milk), kinako (roasted soybean powder), moyashi (soybean sprouts), and soybeans. Production, chemical composition, and use of each of these foods is discussed.

Figures (flow sheets) show: (1) Shoyu manufacturing process. (2) Rice miso manufacturing process. (3) Sufu manufacturing process. (4a) Tempeh manufacturing process. (4b) Natto manufacturing process. (5a) Tofu manufacturing process. (5b) Kori-tofu manufacturing process. Address: Kikkoman Foods Inc., P.O. Box 69, Walworth, Wisconsin 53184.

4852. Hyoe, Murakami; Richie, Donald. eds. 1980. A hundred *more* things Japanese. Tokyo: Japan Culture Institute. 215 p. Illust. (some color). 22 cm. [Eng]
• ***Summary:*** The section titled *Daizu* (soybeans, p. 48-49) begins with the often-told story of Ogyû Sorai (1666-1728), one of the outstanding Confucian scholars of the Edo / Kamakura period and official tutor to the shogun. When Sorai was young and poor, he was unable to afford any food other than okara, the lees of tôfu (soybean curd). The local tofu maker would occasionally take pity on him and treat him to a feast of fresh tofu. Yet far from being malnourished or sick from his okara diet, the young man thrived on this protein-rich food, and went on to become a great man.

The great soy triumvirate–soy sauce, miso, and tofu–towers high in Japanese cookery. Other foods from the soybean are soy milk, soy oil, and yuba.

A song from the Edo period states: "The nightingale stays far from the crowds.

"Twelve kilometers from the saké shop,

"Eight kilometers from the tofu shop."

A large photo shows a tofu-maker cutting cakes of tofu.

A yatai (p. 66) is a movable nighttime street stall from which food and drink are sold. They are a compact wooden restaurant on wheels. The food may include oden, fried bean-curd cakes [fried tofu].

On pages 44-45 is a section on "Umeboshi (pickled plums) and on pages 46-47 a section on "Kaisô (algae; seaweed [sea vegetables]). These include wakame, which is invariably found floating in the morning's miso soup. Also nori, tengusa / agar, hijiki, and konbu. Address: Tokyo.

4853. Jensen, M.W. 1980. Variability of proteins, flavor contribution, and food products among four winged bean selections. PhD thesis, Purdue University. *
• ***Summary:*** Discusses the variability of protein content in winged bean tofu. Address: Purdue Univ., W. Lafayette, Indiana.

4854. Jordan, Darryl; Jenkins, Suzy. 1980. Plenty Agricultural Program: Guatemala. Summertown, Tennessee: Plenty. 46 p. Illust. 28 cm. Presented to UNICEF Guatemala.
• ***Summary:*** This is the single best report on the innovative 1978 Plenty-UNICEF project in the San Andres Itzapa area (Chimaltenango) of the Guatemala highlands. Most of the report focuses on trials with soybeans and other crops (written by Darryl Jordan), but there is also an excellent supplement, with 15 magnificent, lively photos showing the local people involved in the soy dairy project. Many of these photos were taken by Jenny Banks Bryant and others.

Contents: Preface, by Edward Sierra, executive director of Plenty. Soybean variety trials. Photoperiod response experiment. Soybean insects and diseases. Continuation of the soybean project. Grain amaranth. Quinoa. Winged bean. Cover crops and crop rotations. Nematodes. Fertilizer use. Seed collection. Plenty report for UNICEF, by Suzy Jenkins (Plenty soy technician). Supplement: Soy utilization and nutrition. List of figures: Field data for soy variety trials. Graphs of soybean yield data. Three graphs of soybean yield data. Yield equivalents for soybeans. Oil and protein analyses. Relative yields of protein for various crops. Crop rotation.

A table (p. 12) shows field data on INTSOY variety trials in 1978. The highest yields came from the soybean varieties Davis (40.1 bushels/acre = 4,161 lb/manzana; 1.7 manzanas = 1 hectare), Cobb (34.6 bu/acre = 3,590 lb/manz.), Bossier (32.8 bu/acre = 3,400 lb/manz.), Forrest (31.4 bu/acre = 3,251 lb/manz.).

Photos in the Plenty report for UNICEF show: (1-3) Severely malnourished babies lying on their backs. (4) Suzy Jenkins holding Baby Cruz, now age 8 months, after 4 months of soymilk. "She is one of several children who were able to regain good health."

(5) Suzy Jenkins (5' 4"), a Plenty volunteer (on left) walking with her friend Juana (4' 10"), each carrying water in a pot on their heads for a soy demonstration in Solola. "Juana stands about the average height for the ladies of Guatemala. She eats a protein-deficient diet.

(6) A Mayan lady grinding soaked soybeans on a *metate*, traditionally used for grinding corn / maize. (7) Add the ground soybeans and, stirring regularly, cook for 20 minutes over a wood fire. Suzy stirs.

(8) Ladle the cooked soybean slurry into a colander lined with several layers of cheesecloth and set over a pot to catch the soymilk. Soy pulp [okara] remains behind in the cheesecloth.

(9) "Soymilk, slightly sweetened, contains 9.1 grams of protein per cup. One pint of soymilk or 1 cup of tofu will provide nearly one-half of a child's total protein requirement for a day. Children love it." (10). To make soy cheese [tofu]: Add vinegar (or other coagulant) to hot soymilk, causing it to separate into curds and whey. Ladle or gently pour the mixture into a colander lined with several layers of

© Copyright Soyinfo Center 2013

cheesecloth and placed over a pot. The cheesecloth catches the curds, while the whey drains through into the pot. The whey can be used as a soup stock; it contains some vitamins and other nutrients.

(11) A happy group enjoying their soymilk. (12) Press the curds to make tofu, which can be sliced and fried, eaten plain with salt, or scrambled and fried with onions and tomatoes. A boy, standing, is enjoying a tofu sandwich. (13-15). People eating tofu, which is a complete protein; when served with grain foods like tortillas or bread, its protein quality is increased. Address: 1. Plenty Agricultural Technician; 2. Plenty Soy Utilization Technician. Both: The Farm, Summertown, Tennessee.

4855. Kan, Johnny; Leong, Charles L. 1980. Eight immortal flavors. Rev. ed. San Francisco, California: California Living Books. xiii + 236 p. Illust. 24 cm. 1st edition 1963.
• ***Summary:*** The title page states: "Including new recipes kitchen-tested by Master Chef Sun Pui Wong, Executive Chef, Kan's Restaurant." This book is almost identical to the original 1963 edition. However Roman numerals have been assigned to the front matter, so the recipes are on different pages. None of the original soy-related recipes or definitions have been changed or deleted.

On the rear cover (undated): "Will probably become a standard reference work... It is admirable for its scope and authenticity." Address: 1. Chef, Chinatown; 2. Historian of Chinese life in America.

4856. Kasin, Miriam. 1980. The age of enlightenment cookbook. New York, NY: Arco Publishing, Inc. v + 342 p. Illust. Index. 25 cm. [1 ref]
• ***Summary:*** A vegetarian cookbook. The chapter on Basic Ingredients discusses dairy substitutes (incl. recipes for soy milk [made from whole soybeans or soy flour], coconut milk, nut milk {from blanched almonds or raw cashews}, and soy margarine [free of preservatives]), bean curd (as a substitute for panir), and soy flour. The chapter on beans (p. 129-37) has recipes for: Roasted soybeans. Aduki (azuki) beans. Stewed soybeans. Soyburgers. Soy loaf. Bean curd (tofu or dofu). Stir-fried or deep-fried bean curd. Scrambled bean curd.

Other soy-related recipes include: Soy mayonnaise (p. 170). Soyburgers or tofu sandwiches (p. 186). Soy spread or dip (with whole soybeans, p. 187). Soy noodles (with equal parts soy flour and unbleached white flour, p. 201). Noodles and bean curd (Japan, kitsune udon or domburi, p. 205).

4857. Kendig, Joan; Kendig, Keith. 1980. Modern vegetable protein cookery. New York, NY: Arco Publishing, Inc. viii + 339 p. Illust. Index. 24 cm. [1 ref]
• ***Summary:*** Contents: Preface. Introduction. Cooking hints. Recipes: Basic recipes, oven loaves, oven patties and individual forms, skillet burgers, pies and crust items, crepes and thin pancakes, casseroles and oven dishes, skillet dishes, stuffed vegetables, pasta dishes. Appendixes 1, 2. Contains 200+ recipes. Joan Kendig was born in 1938. Address: USA.

4858. Lai, Him Mark.; Lim, Genny; Yung, Judy. 1980. Island: poetry and history of Chinese immigrants on Angel Island, 1910-1940. San Francisco, California: Hoc Doi (History of Chinese Detained on Island); Chinese Culture Foundation. Distributed by San Francisco Study Center. 174 p. Illust. (photos). Portraits. 24 x 20 cm. A project of the Chinese Culture Foundation of San Francisco. [Eng; Chi]
• ***Summary:*** This is a remarkable book, another painful example of American racism and insensitivity. The majority of the approximately 175,000 Chinese immigrants (most from Canton) who came to the United States from 1910 to 1940 passed trough the detention center at Angel Island–the West Coast counterpart of Ellis Island. Here they awaited jurisdiction on the outcomes of medical examinations, interviews, and immigration papers. It was an ordeal that left many scars. Some wrote poems on the walls of the center to express their grief or sadness. The poems, written on facing pages in both Chinese and English, are divided into chapters. There are also many transcriptions of interviews, each accompanied by a Chinese person's name, age, and date, plus some footnotes of explanation.

In the chapter on "The detainment" Mr. Dea, age 26, writes in 1939 (p. 74): "We would get up in the morning and there was no set time for this, and have plain congee with fermented bean curd. Then, after breakfast, we could go out and exercise..."

In the same chapter, Mr. Low, Kitchen helper, 1923-25, wrote (p. 77): "The main dish included soup, and the following served in turn: vermicelli and pork, dried bean curd [*doufu-gan*] and pork, potatoes and beef, dried greens and fish... The small dish was usually either salted fish, fermented bean curd, or *hoisin* sauce."

Footnote 20: Soya bean is one ingredient in *hoisin* sauce. Address: California.

4859. Leneman, Leah. 1980. Slimming the vegetarian way. Wellingborough, Northamptonshire, England: Thorsons Publishing Group. 96 p. *
Address: 19 Leamington Terrace, Edinburgh EH10 4JP, Scotland.

4860. Li, Shizeng. 1980. Li Shizeng xian sheng wen ji. 2 vols. [Collected works of Li Shizeng. 2 vols.]. Taipei, Taiwan: Zhongguo guo min dang zhong yang wei yuan hui dang shi wei yuan hui: jing xiao chu Zhong yang wen wu gong ying she [Party History Committee, Central Committee, Republic Party of China (Guomindang)]. 11 + [8] + 495 p. Illust. Portraits. 22 cm. Reprinted in 1990. [Cht]
• ***Summary:*** These two volumes contain a collection of Li's works, mostly expressing his political opinions and

© Copyright Soyinfo Center 2013

comments, plus lists of rules of the many associations and universities that were written by Li.

The two volumes contain a total of five sections. Volume I contains sections 1 and 2. Section 1 (p. 1-174) is titled "New century" collection. Section 2 (p. 175-493) is "Political comments."

Volume II contains 3 sections. Section 1 (p. 1-226), titled "Li' notes," is Li's essays and writing (mostly non-political). For example. His birth place (p. 17). Establishing the World Society in Paris (p. 37+). Travels from age 22 (p. 68-76; includes Learning French, attending school, and doing research on soybeans {p. 73}, and his tofu company in France {p. 76}). Chinese New Year (p. 83). Section 2 (p. 227-84) is Li's "Public speeches." Section 3 (p. 285-387) is "Telegrams." One telegram of 5 June 1915 (p. 306) from Li in France to Wu Zhi Hui (apparently not in France) states: Sales of tofu are getting better. During the first 5 years, tofu sales averaged 500 pieces a month, but they have been increasing ever since. Sales of tofu have averaged 10,000 pieces a month this year, and sometimes they are more than 17,000 pieces a month. If sales will continue like this, the tofu company will never go out of business.

Another telegram of 2 Feb. 1947 (p. 374-76) was sent from Shanghai to many of his friends immediately after his 2nd marriage. He has ended his 2-year relationship with Ru Su in New York City. Li was married to his 1st wife, Yao, for 45 years; then she passed away. Today (in Shanghai) he married his 2nd wife Lin Su Shan; she had been married before and divorced. Li is now almost 70 years of age.

Another telegram (p. 343) is about his tofu company. Li had three reasons for starting this tofu company: (1) To raise funds for Chinese organizations, or to sell the factory and use the profits to help fund the World Society. (2) To find a French business partner. (3) If neither of the above works, the company can be used as part of a work-study program for Chinese students in France. By working at the tofu company, Chinese students can earn money to support their studies and pay for their food, rent, and other basic expenses.

Appendix 1 (p. 387-401) is a biography of Li by the publisher, including (p. 388) his five names: (1) Li Yu-ying. (2) Li Shizeng, probably given to him by his parents at birth. (3) Li Shizeng, pronounced the same as his 2nd name but the 2nd character of his given name is the character for "monk," implying perhaps selflessness or simplicity. (4) Li Zhenming. (5) Kuowu, a name he called himself in later life; many people had such a name in old China. And (p. 389) attending school in France, publishing a book about soybeans, the tofu company, Mr. Li has been in France for 6 years, he only returned to China once in 1908 for a few months. In 1909 he founded a tofu manufacturing company near Paris. One of his friends, Qi Shu Shan helped Li to start the tofu company. Qi was a follower of Cai Yuan Pei (a very famous man in China). He founded and was chancellor of many universities, incl. Beijing University. Li Yu-ying was a vegetarian; Cai Yuan Pei agreed with Li's ideas about vegetarianism.

There is not much description of Li's work with soyfoods in Paris. There is also no information as to whether he did any work with soy after he returned to China. And there is no description of his genealogy or family.

Photos 1-3 and 6 are all in *Legend of a Generation–A Biography of Li Shizeng*, by Chen Jiying (1982). (4) Li Shizeng (far right) with Zhang Jing Jiang, Cai Yuan Pei, Wu Zhi Hui, and others in 1933. (5) 19th anniversary of Beijing Research Institute, 1948.

Note: Li Yu-ying, a soyfoods pioneer in Paris, France, lived 29 May 1881 to 3 Sept. 1973. Near the front of the book are six photos of Li Yu-ying.

Note: In old China, it was not uncommon for a man to have more than one wife or to have concubines. If a man had a wife and 3 concubines, and if the man approved, each could use his surname. They could also be called: Wife #1 (his real wife), wife #2, wife #3, and wife #4. All might be present at his funeral.

• ***Summary:*** Soya is discussed under: Estrogenic factors (p. 430). Antivitamin A (Raw soybeans are know to contain the enzyme lipoxidase, which oxidizes and destroys carotene; p. 442). Antivitamin D (which leads to rachitogenic activity and can cause rickets; p. 442-43). Antivitamin E (p. 444). Antivitamin B-12 (p. 447). Other enzyme inhibitors (inhibitor of pancreatic lipase; p. 452). Flatus-producing factors (p. 455-56).

The estrogenic principles of plants have been, in most cases, chemically identified as isoflavones, which occur naturally in the form of glucosides. Isoflavones have been isolated from the soybean.

"One of the major factors limiting the human consumption of legumes is their ability to produce gas in the gastrointestinal tract, also referred to as flatulence." The intestinal gas is "composed largely of carbon dioxide, hydrogen, and, to a lesser extent, methane. Studies have clearly implicated the oligosaccharides raffinose and stachyose as causative factors of flatus. These oligosaccharides are related by having one or two α-D-galactopyranosyl groups attached to sucrose via α-1,6-galactosidic linkages. Owing to the absence of enzymes in the human intestinal mucosa that are capable of hydrolyzing this linkage, the intact oligosaccharides accumulate in the lower intestine, where they undergo fermentation by anaerobic bacteria. The gases so produced are responsible for the characteristic features of flatulence, namely, nausea, cramps, diarrhea, abdominal rumbling, and the social discomfort associated with the ejection of rectal gas. Such traditional soybean foods as tofu (soybean curd) and tempeh

© Copyright Soyinfo Center 2013

have little flatus activity." Address: Dep. of Biochemistry, College of Biological Sciences, Univ. of Minnesota, St. Paul, MN 55108.

4862. McConnaughey, Evelyn. 1980. Sea vegetable recipes from the Oregon coast. Oregon Inst. of Marine Biology, Charleston, OR 97420. [32 p.]. Illust. by Lynn Rudy. No index. 22 cm. [8 ref]
• ***Summary:*** The pages are not numbered. Soy related recipes: Miso soup with tofu. Suimono (with cubes of tofu). Miso soup with egg. Address: Oregon.

4863. McConnaughey, Evelyn. 1980. More sea vegetable recipes from the Oregon coast. Plus seaweeds from the Orient. 1653 Fairmount Blvd., Eugene, OR 97403. 41 p. Illust. by Catherine Vignaux. No index. 22 cm. [8 ref]
• ***Summary:*** On page 7 is nutritional information about tofu, tempeh, miso, and tamari (shoyu). Soy-related recipes: Green salad with dulse, and miso-lemon dressing (p. 13). Tofu creamy mayo (p. 15). Alaria tempeh triumph (p. 26). Alaria soyfood delight (with tofu or tempeh, plus tamari / shoyu, p. 27). Pressure cooked soybeans with hijiki (p. 37). Curried stir-fried noodles with tempeh and hijiki. Line drawings of sea vegetables appear on most pages. Address: Oregon.

4864. Miller, Lani; Rodgers, Diane. 1980. We love your body. Seattle, Washington: Morse Press, Inc. vii + 256 p. Illust. by Joanie Oliver. 25 cm.
• ***Summary:*** A natural foods, vegetarian cookbook. The glossary describes soybeans (incl. soy flour, milk, and tempeh, p. 246), tamari sauce, and tofu (p. 247).

4865. Nakamura, Hiroshi. 1980. Desirable qualities of soybeans–Japanese viewpoints. In: F.T. Corbin, ed. 1980. World Soybean Research Conference II: Proceedings. Boulder, Colorado: Westview Press. xv + 897 p. See p. 1-9.
• ***Summary:*** The author believes that both protein and oil contents should be incorporated in soybean quality standards. "I think efforts should be made to develop different varieties for different uses, so that soybeans could be traded on an oil or protein basis in the future." Address: Hohnen Oil Co., Ltd., Tokyo, Japan.

4866. Needham, Joseph. 1980. Science and civilisation in China. Vol. 5, Chemistry and chemical technology. Part 4: Spagyrical discovery and invention: Apparatus, theories and gifts. Cambridge, England: Cambridge University Press. xlviii + 772 p. See p. 192. Illust. Index. 25 cm.
• ***Summary:*** In the section on "Alchemy and Chemistry," page 192 discusses how nigari or magnesium chloride is a by-product of the manufacture of saltpeter (potassium nitrate or sodium nitrate). "After the evaporation the saltpetre crystallised around maize sticks which could be lifted out, while the dark mother-liquor, *lu yen shui* [nigari] was used for salting out soya-bean curd and as a fertilizer.

Note: *Webster's Third International Dictionary* shows "spagyric" as being related to alchemic or iatro-chemical–which see. Address: East Asian History of Science Library, Gonville & Caius College, Cambridge, England.

4867. Northern Soy. 1980. Soyboy Tofu: Cooking with tofu. Vol. 1 (Leaflet). Rochester, New York. 4 panels each side. Each panel: 14 x 11 cm.
• ***Summary:*** Brown ink on beige paper. On the front panel is an illustration of a laughing boy in a circle with soybean pods and leaves at the bottom. "High protein. Low calorie. Low sodium. No cholesterol. Tofu, the subtly sweet soybean 'cheese,' has been the key source of protein in Japan and China for thousands of years."

Contains 9 American-style tofu recipes, including tofu for babies, pan fried tofu, tofu burgers, tofu cranberry loaf, tofu onion dip, eggless tofu salad, and tofu leek quiche. Address: 30 Somerton St., Rochester, New York 14607. Phone: 716-442-1213.

4868. Null, Gary. 1980. The new vegetarian cookbook. New York, NY: Macmillan Publishing Co., Inc.; London: Collier Macmillan Publishers. x + 310 p. Recipe index. 24 cm.
• ***Summary:*** One chapter (p. 52-60) titled "Soybeans and Soybean Products" discusses: "Whole, raw soybeans" [green vegetable soybeans], dried soybeans, soybean milk soy flour, soy grits, soy flakes, tempeh, tamari, miso, and tofu. The long section on tofu begins: "As a high-quality source of complete protein, tofu (soybean curd, usually called bean curd) is hard to beat, not to mention inexpensive, low in calories and versatile." It ends: "As you become more familiar with tofu, you'll come up with many of your own innovations. But no matter how you choose to serve this natural, high-protein food, serve it often and savor its benefits!"

Page 78, under "Bean Sprouts," states that "Soybeans make the most delicious sprouts, but are a little more difficult to grow" than mung bean sprouts. Page 88 notes that tamari and miso are good alternatives to salt.

Soy-related recipes include: Miso tofu soup (p. 132-33). The section titled "Tofu Dishes" (p. 199-208) includes: Butternut tofu. Tofu cauliflower casserole. Herby tofu croquettes. Mushroom and tofu sautéed in miso. Tofu Orleans. Red and green peppers with tofu. Soba tofu dinner. Tofu eggplant Parmesan. Yogurt tofu casserole [with cow's milk yogurt]. Tomato tofu and kidney beans. Bulghur, lentil and tofu casserole. Tofu à la king. Sesame tofu (Tofu plus sesame seeds). Hot breakfast for two (tofu with oatmeal, raisins, and walnuts).

Soy-enriched wheat berry bread (p. 242). Page 304 contains a list of food suppliers, including Chico San, East West Journal Mail Order, and Walnut Acres (Penns Creek, Pennsylvania). Address: New York City, NY.

4870. Perl, Lila. 1980. Eating the vegetarian way: Good food from the earth. New York, NY: William Morrow and Company. 93 p. Illust. Index. 25 cm. [9 ref]
• ***Summary:*** This children's book discusses the reasons for vegetarianism, the different types of vegetarian diets, and why modern meat-raising techniques are causing many Americans to change their diets. Also offers alternative protein-rich recipes.

Pages 42 mentions soybeans, and page 48 mentions tofu, tempeh, and soy sauce. Address: Beechhurst, New York.

4871. Rain Star Foods. 1980. Tofu. What it is. How to cook with it. What it can do for you (Leaflet). P.O. Box 2582, Columbus, Ohio 43216. 4 panels each side. Each panel: 26 x 9 cm. Dated 1980.
• ***Summary:*** This superb glossy color recipe leaflet contains 4 recipes: Tofu eggless "egg salad," Tofu Cutlets Parmesan, Tofu Cheesecake, Tofu Onion-Garlic Dip. The most attractive tofu recipe brochure seen to date (1986). Address: Columbus, Ohio.

4872. Raymond, Jennifer. 1980. The best of Jenny's kitchen. Mendocino, California: Mendocino Presbyterian Church. [x] + 180 p. Preface and Foreword by Lois Jean Raymond. Illust. Index. 22 cm. [9 ref]
• ***Summary:*** A vegetarian cookbook (comb-bound), printed with brown ink on tan paper. Contents: Nutrition–Nutrition: protein. Nutrition: carbohydrates. Nutrition: fats. Nutrition for pregnancy and lactation. Vegetarian diets for pets. Legumes and grains. Sweeteners. Salt and sodium.

Menu planning–Menu ideas. Seasonal eating. Growing sprouts (a table, p. 31, gives details on sprouts grown from aduki beans, alfalfa, chia, cress, lentils, wheat, rye, radish, and mung). "Mung bean sprouts are the typical bean sprout used in Chinese cooking." Protein content of recipes.

The recipes–Breakfasts. Soups. Salads, spreads and sandwiches. Breads. Entrees. Desserts. Making the basics.

Sources, substitutes, and equivalents–Sources (books). Substitutes. Equivalents.

Soy related recipes: Tofu, scrambled (for breakfast, in place of eggs, p. 45). Tofu salad sandwich spread (p. 74). Soy paté (with cooked whole soybeans, as a sandwich spread, p. 76). Tofu cornbread (p. 82). Tofu burgers (p. 97). Soybean crockpot stew (p. 108). Tofu stuffed shells (p. 127). Tofu lasagne (p. 129). Tofu & vegetables (p. 142). Okara & coconut macaroons (p. 151). Okara tofu spice bars (p. 152). Making tofu at home (p. 163). Many recipes call for either "tamari soy" or "soy sauce."

Publishing history: First published by Mendocino Presbyterian Church, Mendocino. California. 1980. Comb binding. Next published by SunRay Press. 1980.

Jennifer sold the rights to this self-published vegetarian cookbook to Avon Press, which published it in 1982 as *The Best of Jenny's Kitchen: Cooking Naturally with Vegetables* (180 p.). Address: Teacher of Vegetarian Cooking, College of the Redwoods, Mendocino Coast Branch, California.

4873. Redfield, Linda. 1980. Vegetarian cooking with tofu. Davis, California: Printed by the author. 9 p. 21 cm.
• ***Summary:*** This typewritten booklet of vegetarian tofu recipes has the Chinese characters for "tofu" written on the brown cover. It was reproduced by photocopying and bound with four staples (saddle stitched). Contents: Nutritional information. A simplified method of preparing tofu from soybeans. Sauces (incl. Miso spread, Dipping sauce with tamari, Tofu marinade with tamari, Teriyaki marinade with tamari). Tofu salads. Chinese recipes. Mexican recipes. Recipes using sliced tofu. Italian recipes. Tofu desserts and fruit whips.

Talk with Linda Redfield. 2002. Sept. 23. She developed this booklet in about 1980 in Davis–before she went to Arcata, where she now lives. Her business is now named

Holistic Self Healing. She does nutritional and wellness counseling, whole foods meal service, cooking and nutrition classes, and energy therapies. After her name are the following title abbreviations: D.C. (Diet Counselor), N.E. (Nutrition Educator), W.C. (Wellness Consultant). She is like a wholistic dietitian. Address: Davis, California.

4874. Shandler, Nina; Shandler, Michael. 1980. How to make all the "meat" you eat out of wheat: International gluten wheat "meat" cookbook. New York, NY: Rawson, Wade Publishers, Inc. xiv + 241 p. Index. 24 cm. [10 ref]
• ***Summary:*** How to make and use wheat gluten in a vegetarian diet, with 250 American and international recipes. Contents: Acknowledgements. Author's note. Part I. Introducing wheat "meat": 1. The cost of the meat-centered diet: How meat consumption affects ecology, economy and health, food economy, fuel conservation, water reserves and pollution, heart disease, cancer and meat eating, premature aging, chemical residues in meat, medical costs. 2. Introducing wheat "meat": a low-cost, homemade alternative to meat (gluten meats cost about $0.15 per serving). 3. How to make "meat" from wheat: Preparing raw gluten (from 7 cups whole wheat flour), seven varieties of wheat "meat," cutlets (a veal substitute), steak (a mock beef steak), ground gluten (a hamburger taste-alike), spiced links (an alternative to sausage), roast with a beef flavor, seawheat (a clam alternative), poultry pieces (chicken-flavored wheat "meat), using the reserved starch, bran and germ: Gluten-free crackers, and cold crunchy cereal.

Part II. Hundreds of international ways to serve wheat "meat": 4. All-American wheat meat recipes. 5. Mexican wheat "meat" food. 6. Latin American. 7. British. 8. French. 9. Spanish. 10. Italian. 11. Austrian. 12. Greek. 13. African. 14. Indian (from India). 15. Chinese. 16. Japanese wheat "meat" cooking.

Note 1. Tamari soy sauce and miso are used to flavor a number of recipes in this book. Other soy-related recipes include: Spiced bean curd and cutlet (with tofu, p. 212). Spares with black beans (mock spare ribs with "Chinese prepared black beans [fermented black soybeans], p. 216). Family-style bean curd (with tofu, p. 219). Poultry with orange-flavored soy sauce (p. 228-29). Seawheat in soy and ginger sauce (p. 229). Seawheat with bean curd and vegetables in casseroles (p. 230). Seawheat with vinegared miso (p. 231). Note 2. This book does not mention "seitan," but a Japanese recipe titled "Seawheat in Soy and Ginger Sauce" is quite similar; It uses tamari soy sauce and grated gingerroot, and kombu is used in making Seawheat, a clam alternative. A photo on the inside back dust jacket shows Nina and Michael Shandler.

Talk with Michael Shandler in Amherst, Massachusetts. 1992. Jan. 14. He and Nina became vegetarians in 1969. They were first introduced to wheat gluten in about 1970; at that time they were served gluten steaks by a friend, Jayanti Peterson, in Santa Cruz, California. At the time their book was published, they were probably not aware of "seitan." They did not know of any other books on gluten when they were writing their book–which is why no gluten books are listed in their bibliography. The book sold about 2,000 copies in hardcover and 5,000 to 6,000 in quality paperback; it went out of print 6-7 years ago. They have had many requests for the book since it went out of print. He is an organization development consultant and Nina is a child psychologist. Food is their hobby. Their best-selling book is *The Complete Guide and Cookbook for Raising your Child as a Vegetarian* which has sold over 50,000 copies (Shocken & Ballantine). Address: Amherst, Massachusetts. Phone: 413-549-1671.

4875. Shufu-no-tomo sha. 1980. Wa-yô-ka no tôfu ryôri [Japanese, Western, and Chinese-style tofu cookery]. Tokyo: Shufu-no-tomo-sha: Shufunotomo Bunka No. 568. 84 p. Illust. No index. 19 cm. [Jap]
• ***Summary:*** Contents: Healthy menu. New discovery of taste. Making tofu recipes more filling by adding some oil. The main character of the diet. Tofu side dish for wines (sake). Contains many recipes.

The entire rear cover contains a color ad for Higashimaru Shoyu (usukuchi), and shows the label in a size that all ingredients are legible. Address: Tokyo, Japan.

4876. Sung, Ying-sing. 1980. *T'ien Kung K'ai Wu:* Exploitation of the work of nature: Chinese agriculture and technology in the XVII century. Taipei, Taiwan: China Academy. xii + 488 p. Illust. Index. 22 cm. [Eng]
• ***Summary:*** The *T'ien Kung K'ai Wu,* by Sung Ying-hsing (pinyin: *Tiangong Kaiwu,* by Song Yingxing) was published in 1637. This English-language translation of the 17th century work on Chinese technology contains 18 chapters, 166 superb illustrations, and extensive information on soybeans. Each chapter was translated by a person specializing in that subject matter.

4877. Thio, Goan Loo. 1980. Processing and application of soya beans for human nutrition at home and village levels (Abstract). In: F.T. Corbin, ed. 1980. World Soybean Research Conference II: Abstracts. Boulder, Colorado: Westview Press. 124 p. See p. 35-36.
• ***Summary:*** "It is of utmost importance that the less developed and the developing countries avail themselves of simple methods for processing soya beans into easily digestible soya products, which can be manufactured at home and village levels. These products should have a high nutritive value and preferably a neutral, bland taste, so that they can be incorporated into local dishes of the countries concerned, without the risk of being refused by the population. Because of the neutral bland taste, these soya products will take on the taste and flavor of the national dish into which they are incorporated. In this way they will

© Copyright Soyinfo Center 2013

in most cases be directly accepted by the consumers. Soya products like soya milk and soya bean curd (also called toufu [tofu]), which have proved to be high quality protein sources and which have existed for thousands of years, can easily be flavored or spiced so that they will become as delicious as meat and fish dishes.

"Soya milk can be prepared easily at home and village levels just like soya bean curd and soya steak (also called tempeh). The most important factor is the absence of the beany taste in these products, and also the absence of trypsin inhibitors and of hemagglutinins. Especially for babies and toddlers these two antinutritive factors should be inactivated. As they both belong to the proteins, simple heat treatment during a few minutes at temperatures above 90 C is sufficient. With soya products prepared at home and village levels, a great variety of delicious dishes and high quality weaning food can be prepared." Address: Royal Tropical Inst., Amsterdam, The Netherlands.

4878. Tsuchiya, Kanji. 1980. Tônyû: Yomigaetta dentô shokuhin [Soymilk: Traditional food that's make a comeback]. Tokyo: Shokuhin Kenkyusha. 176 p. 2nd edition published in Dec. 1982. Illust. 17 cm. [Jap]
• ***Summary:*** This is the best book seen on soymilk in Japanese. For contents and details, see the enlarged 2nd edition (Dec. 1982). A portrait photo on the rear cover shows the author, Kanji Tsuchiya, and gives a brief biography. Address: Technical consultant, Okazaki Marusan, Japan.

4879. Tsuji, Shizuo; Sutherland, Mary. 1980. Japanese cooking: A simple art. New York and Tokyo: Kodansha International. 518 p. Introduction by M.F.K. Fisher. Illust. (510 line drawings by Yoshito Suzuki. 16 color pages, mostly photos). Index. 27 cm.
• ***Summary:*** This is a beautiful and informative book by a great Japanese chef, though the awkward English terminology often sounds like "Japlish." The illustrations are very nicely done, but the artist's name does not appear in the book. Tsuji is the author of 29 books on gastronomy, travel, and music. His basic thesis is that "like Japanese and poetry, cooking is simply the result of an acute awareness of the seasons, Freshness and naturalness are the *sine qua non* of Japanese cuisine."

This definitive treatise on Japanese cooking, the most complete and well-thought-out to date, is written by the head of the *Ecole Technique Hoteliere Tsuji*, the technical hotel school in Osaka, Japan. This is the "largest school training professional chefs in Japan," according to the publisher.

The excellent "Ingredients" section (p. 53-100) gives detailed descriptions (with Japanese characters) of: Azuki beans (p. 55). including red rice (*sekihan*) and "sweet red-bean paste" (*an*). Bean curd (*tôfu*, p. 56-61) incl. *momen* tofu (regular; "The type described here as 'regular' is known in Japan as *momen*–'cotton' tofu... 'Cotton' bean curd is the type most commonly used in Japan"), *kinu-goshi* (silk tofu), *yakidôfu* (lightly broiled or grilled bean curd), atsu-age or nama-age (thick cakes), aburage or usu-age (thin deep-fried tofu), ganmodoki (mixed tofu), *kôya-dôfu* or *kôri-dôfu* ("freeze-dried bean curd"), *yuba* ("soybean milk 'skin'" [soybean milk skin]), *okara* ("bean curd pulp or 'lees'").

Note 1. This is the earliest English-language document seen (April 2013) that contains the term *atsu-age* or the term *usu-age* or the term "thin deep-fried tofu" (all regardless of hyphenation), all of which refer to types of Japanese of deep-fried tofu.

Miso (p. 76-77) incl. shiro-miso, Shinshû-miso, inaka-miso, Hatchô miso, akadashi miso. Soybeans and edamame. Soy sauce (shôyu, p. 90-93) incl. Natural Japanese soy sauce, synthetic soy sauce, Kikkoman, light soy sauce (*usukuchi shôyu*), tamari ("In Japanese cooking tamari is generally used as a dipping sauce or a base for basting sauce such as Yakitori Sauce"). "Dutch traders in Nagasaki in the seventeenth century exported soy sauce to Europe, and it was the secret seasoning served at the court banquets of Louis XIV of France" (sic). Kuzu (p. 93-94). Wheat gluten (p. 98, 60).

Soy-related recipes include: Making soups (p. 151-56). Miso soup (*Miso-shiru*, p. 156-57). Ginger soy sauce (*Shôga-jôyu*, p. 172). Ponzu sauce (p. 172, with soy sauce and tamari). Mustard-vinegar miso sauce (*Karashi-su-miso*, p. 172-73). Dengaku, dengaku miso toppings, and bean curd dengaku (*Tôfu dengaku*) (p. 190-93). Teriyaki (p. 199-202, 370; the meaning in the United States is now different from the original meaning in Japan. Definition and history, homemade teriyaki sauce, teriyaki yellowtail, chicken teriyaki, steak teriyaki). Egg "tofu" (*Tamago-dôfu*, p. 216). Dressings for aemono (salads, p. 246, incl. white tofu dressing, white miso dressing, red miso dressing). Rice with miso soup and pickles (p. 270-71). Nori-roll sushi (*Nori-maki*, p. 300, with freeze-dried bean curd). Fox noodles (*Kitsune udon*, p. 312). Pickling vegetables (*Tsukemono*, p. 315, 318, with miso). Pureed corn soup (*Tômorokoshi surinagashi-jiru*, p. 347, with miso). Thunder soup (*Kaminari-jiru*, p. 349, with "1 cake *tôfu* (bean curd)" and "2-3 cakes thin deep-fried *tôfu* {*aburage or usuage*}, cut into julienne strips). Potatoes simmered in miso (*Jaga-imo miso-ni*, p. 393). Radish with white miso sauce (*Furofuki daikon*, p. 394). Chinese cabbage and deep-fried tofu (*Age-dôfu hakusai-ni*, p. 398). Tortoiseshell tofu (*Tôfu bekkô-ni*, p. 398-99). Fried and simmered freeze-dried tofu (*Kôri-dôfu age-ni*, p. 399-400). Gold purses (*Fukuro*, p. 400, with thin deep-fried bean curd). Deep-fried tofu (*Agedashi-dôfu*, p. 412-13). Green beans with sesame-miso dressing (*Sandomame goma-miso ae*, p. 420). Savory okra (cold) (*Okura wasabi-joyu*, p. 420-21). Tangy white salad (*Shirazu-ae*, p. 421-22). "River Bank" oyster stew (*Kaki dote-nabe*, p. 433-34, with miso). Simmering tofu (*yudôfu*, p. 436-37). Mushroom rice (*Shiitake gohan*, with "1 cake thin deep-fried

© Copyright Soyinfo Center 2013

bean curd (*aburage* or *usuage*)," p. 438-39). Soybeans in the pod (*Edamame,* p. 471-72).

Murasaki (p. 287): Japanese love *sushi* so much that they have developed a special aficionado's vocabulary. "At a *sushi* restaurant, you do not ask for soy sauce as *shôyu,* but, rather, as 'purple,' or *murasaki.* Every shop has its own house sauce, made by reducing soy sauce or thicker *tamari* sauce over heat with *saké, mirin,* bonito flakes and so on." Since the resulting sauce is darker than regular soy sauce, the name *murasaki* seems appropriate.

The recipe for Abe River mochi (Abe-kawa mochi) uses "1 cup kinako (roasted soybean flour)" as a major ingredient (p. 469).

Concerning azuki beans (red beans; characters small + bean) (p. 55): "This small, red bean is the legume you will most frequently encounter in Japanese cooking besides soybeans (*daizu*). It is used in the cooking of many countries, so it is stocked in most supermarkets throughout the United States. For some historical reason this bean is commonly spelled *adzuki.* This spelling is a Victorian romanization; phonetically, *azuki* is correct.

"These beans are steamed with glutinous rice on special occasions to make the festive red rice (*sekihan;* p. 280). They are more commonly boiled with sugar to make sweet red-bean paste (*an*), which forms the base of a large percentage of Japanese sweet confections (see p. 327). *An* is made in two textures: smooth puree (*koshi-an*) and 'chunky,' with beans partially crushed (*tsubushi-an*). If there is no time to make *an* from scratch, ready-made *an* is available canned and stocked in most Japanese food stores."

Note 2. This is the earliest English-language document seen (March 2006) that uses the term "sweet red-bean paste" to refer to sweet azuki bean paste [*azuki-an*], or the term "smooth puree" to refer to *koshi-an,* or the term "chunky" to refer to *tsubushi-an.* Address: Tsuji Professional Culinary Inst., Osaka, Japan.

• ***Summary:*** This is a roundtable discussion with Bill Shurtleff, Larry Switzer, and Mark Wetzel, hosted by the editors of *Well Being.* They discuss mainly tofu, other soyfoods, and spirulina. Address: Santa Cruz, California.

4881. Yang, Kailing. 1980. Min guo Li Shizeng xian sheng Yuying nian pu [A chronicle of Li Shizeng's life]. Taipei, Taiwan: Taiwan shang wu yin shu guan. 8 + 200 p. + [2] leaves of plates. Illust. 19 cm. Series: Xin bian Zhongguo ming ren nian pu ji cheng; Di 8 ji. [Cht]
• ***Summary:*** This entire book is a chronology of Li's life. It discusses his life year by year, one after the other in chronological order. This biography of a Chinese statesman contains no table of contents, and there is no record of the author's title of affiliation.

Li's work with soyfoods in France is first described on pages 17-18: 1906–After graduating from the school of agriculture in France, Li Shizeng enrolled in the Pasteur Institute to study biochemistry, specifically to do research on soybeans. His professor was Gabriel Emile Bertrand.

The story continues on pages 20-23:

1907–Li continued to study biochemistry and conduct research on soybeans. He discovered soybeans can be used to make many nutritious foods. Mr. Li published his first book, *The Soybean* (*Le Soja*).

1908–Li founded the Tofu Manufacturing Company (*Usine Caseo-Sojaine*). He went back to China to raise money for his company. A few months later, he returned to France with 5 workers. The company was located in Colombes, northwest of Paris.

1909–More workers traveled to France to join the tofu company. The founder of the Republic of China, Sun Zhong-shan [Sun Yat-sen], visited the company and wrote an encouraging article that said, "My friend Lin Shizeng studied abroad in France and researched agriculture and soybeans. He stands for replacing meat with soyfoods."

1910–A third round of workers arrived in Paris from China to join the tofu company. The total number of workers was now more than 30. When the workers weren't working, they were studying Chinese and French. The workers weren't allowed to smoke, drink, or gamble. Also in 1910 Mr. Li's book, *The Soybean,* was published in Chinese.

1911–The tofu company attended an exhibition at a park in France [whose name sounds like Linan or Rinan] to show people all kinds of foods made from soybeans. Later in 1911, Li traveled back to China.

Li did not do any work with soy after he returned to China.

Li's genealogy and family are discussed on pages 2-5, 12, 14, 23, 100-103. Father: Li Hong-Zao (died 1897) (p. 12). Mother: 2nd wife of Li Hong-Zao, Mrs. Yang. Li was the fifth of five brothers. (1) Li Zhao-Ying. His 2nd and 3rd brothers each died at early age. (4) Li Kuan-Ying. (5) Li Yu Ying (Li Shizeng). Li had 3 sisters: (1) Li Zhu-Yi. His 2nd, 3rd, and 4th sisters each died at early age.

Li's first wife: Yao Tong-Yi (She was Li's older cousin). Li and Yao married in 1897 (p. 12). Li and Yao had two children, a boy and a girl. Son: Li Zong-Wei (born in 1899) (p. 14). His son's wife: Ji Xieng-Zhan. Daughter: Li Ya-Mei (born in 1910) (p. 23). Grandsons: Li Da-Yang. Li Er-Yang. Granddaughter: Li Ai-Lian. Li's first wife, Yao, died in 1940 (p. 94).

Three years after Li's first wife died, he met Mrs. Ru Su, who was Jewish, in New York. She became his partner, but they never married. They were involved from 1943-1947, but Li lived in the USA only from 1943 to 1945. In 1947 he telegrammed Mrs. Ru Su from China that he had decided to marry a Chinese lady. (p. 100-103).

© Copyright Soyinfo Center 2013

Li's second wife: Lin Su-Shan. Li married Lin in 1947 (p. 104). Lin passed away in 1954 (p. 120).

Li's third wife was Tian Bao-Tian. Li married Tian in 1957 when Li was 77. Tian was 42 (p. 133). This biography includes a chronology of Li Shizeng.

Near the front of the book are four portrait photos which show Li: (1) In 1922 when he was age 42. (2) In 1932 when he was age 52. (3) In 1962 when he was age 82. (4) In 1970 when he was age 91.

Note: Li Yu-ying, a soyfoods pioneer in Paris, France, lived 29 May 1881 to 3 Sept. 1973 (p. 6, 76).

Date of Introduction: 1980?
New Product–Documentation: Brochure. undated. Green and white.

4889. Soy Plant (The). 1980? Tofu from The Soy Plant (Scrapbook). Ann Arbor, Michigan. 7 p. Undated. 51 x 63 cm.
• ***Summary:*** This large 6-ring binder has stiff black covers and holds large black sheets with acetate sheet protectors. Each hand-lettered sheet (unnumbered and undated), in dark green, light green and black letters, is designed to give information about and promote the company's tofu, as follows: (1) "A Michigan product. Made from organic soybeans, water and nigari." (2) "Ways to use Soyplant tofu: As an alternative source of protein–Stir-fried vegetables and tofu, tofu-based dips and salad dressings, sautéed tofu sandwich. As a substitute for meat, cheese and eggs–'Missing egg' salad, tofu chili or stroganoff, tofu pudding or

© Copyright Soyinfo Center 2013

'cheese' cake. As an extender for other protein food–tofu-meat loaf, tofu-fish cakes, tofu-hamburger spaghetti sauce."

(3) Nutritional value. Versatility. Handling. Cost savings. (4) Nutritional value. (5) "Tofu is recommended for: Athletes, dieters, lactose-intolerant individuals, diabetics and cardiac patients, persons with digestive conditions, infants and the elderly." (6) Versatility. "Tofu takes on the flavor of other ingredients and seasonings. Tofu adapts to many recipes–Dips, soups, entreés, casseroles, desserts. Tofu can be prepared in many ways–Baked, blended, fried, marinated, cubed, mashed sliced, frozen." (7) Handling. It comes packaged in water in a 1-lb tub or a 20-lb pail. An illustration of each is shown. "The water should be replaced after one week. Tofu will stay fresh at least two weeks."

Location: As of Dec. 2000 this binder is owned by Bruce Rose, president of Rosewood Products, Inc., Ann Arbor, Michigan. Address: 771 Airport Blvd., Ann Arbor, Michigan 48104. Phone: (313) 663-8638.

4890. Davis, Richie. 1981. Soy food prices to increase: Soybeans in shorter supply. *Recorder* (*Greenfield, Massachusetts*). Jan. 2.

• ***Summary:*** The New England Soy Dairy of Greenfield now manufactures nearly 30,000 lb/week of tofu. They buy 15,000 lb/week of soybeans from Minnesota and Illinois. The Tempeh Works buys 10,000 lb/month of soybeans to make 4,200 lb/week of tempeh.

Richard Leviton, "who said shipping costs account for 25 percent of the price of soybeans, said he, his wife and a third partner plan to start growing soybeans in the Hadley-Hatfield area this spring... The first year, he said, he plans on growing between 25 and 50 acres of organic soybeans on rented land. Eventual plans call for between 1,000 and 1,500 acres of soybeans." A photo shows Louis H. Battalen checking tempeh at the Tempeh Works. Address: Staff reporter.

4893. Ikegami, Seishiro. 1981. History of Morinaga tofu sales (Interview). *SoyaScan Notes.* Jan. 14. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Prior to 1976, hence prior to Morinaga's introduction of their aseptically packaged tofu, the Japanese government passed protective legislation for small and medium sized industries, not just for tofu shops. Morinaga now sells Sasa-no-Yuki brand Sealed Lactone Silken Tofu (buro-dofu; buro means "blow" not "overflow") in Japan. It has a 30-day shelf life. They sold it before the protective law was passed, so they can sell that volume now. Many middle-size Japanese companies, which are not bound by the legislation, are increasing their rate of buro-dofu production, even now. Morinaga did not make Japan's first buro-dofu.

Ever Fresh Silken Tofu (EFST) was developed in 1976, mainly for the American market, and was introduced (first sold) in 1977. It is not sold at all in Brazil since import duties are 100%. The number 3 market is Europe. Presently, Morinaga could sell a fixed amount of EFST in Japan, but there is no need to since buro-dofu is cheaper. Address: c/o Beech-Nut California Corp., P.O. Box 5759, San Jose, CA 95150-5759. Phone: 408-293-8330.

4894. Hansen, Barbara. 1981. Rice leads the flavorful parade of dishes in this Indonesian feast: 'Colonial cooking' a blending of cultures. *Los Angeles Times.* Jan. 15. p. J1.
• ***Summary:*** The Indonesian *rijsttafel* is a magnificent parade of dishes, featuring rice. When Bob Blansjaar, who was born in Surabaya on the Island of Java, prepares *rijsttafel* for guests, he makes more than 20 dishes–marking it as the real thing.

A standard recipe is *Gado Gado,* a sort of salad topped with peanut sauce. "He also sliced and fried tofu for the salad, using Chinese style hard tofu rather than the softer variety."

Another key dish is Sambal Ketjap (hot sauce); the ingredients include "2½ teaspoons Indonesian sweet soy sauce" [probably ketjap manis]. Ten recipes are given, including Gado Gado and Sambal Ketjap.

Photos show: (1) The *rijsttafel* served in many dishes on a large table. (2) Bob Blansjaar as he chops vegetables in the kitchen. Address: Staff writer.

4895. Root, Waverley. 1981. A cordial bow to the byproducts of the soybean. *Los Angeles Times.* Jan. 15. p. J42.
• ***Summary:*** This article is indebted to: Simonds, Nina. 1979. "Chinese cuisine: Bean curd." *Gourmet.* Sept. p. 28-29, 84-91.

The soybean, which offers extraordinary versatility as a human food, can be transformed into soybean milk, "the soybean milk skin [yuba] derived from the milk, the bean sticks [dried yuba sticks] made from the milk skin, the also edible sediment given off by the milk [okara], untreated bean curd [regular tofu and perhaps silken tofu], pressed bean curd which produces bean curd noodles [pressed tofu noodles], more tightly compressed bean curd cakes, and frozen-and-thawed bean curd [dried frozen tofu]." Note: This is the earliest English-language document seen (April 2013) that uses the term "frozen-and-thawed bean curd" to refer to dried-frozen tofu.

In the process of making "pressed bean curd, another soybean food is created–bean curd skin [*pai yeh,* pressed tofu sheets], which should not be confused with soybean milk skin [yuba]. Dried bean curd skin," which needs no refrigeration and is often stuffed, for example with chopped meat, is sold by weight by Chinese specialty shops throughout the world; five or six sheets weigh one ounce.

"There is a whole family of foods made from fermented bean curd" [fermented tofu]. Bean curd can be fermented in various ways. Bean curd loaves, for example, can be stored for the winter in a cool dark place; micro-organisms from the air cause fermentation. "The loaves acquire a fungoid coating, which has to be scraped off, and as far as I know is not used for food,..." Fermented bean curd, which has been called "soybean cheese," is easier to digest than unfermented bean curd. Bean curd can also be marinated in rice wine, flavored with spices, and then allowed to ferment. A most unusual type of fermented tofu is stinky bean curd (*sh'ou tou fu*), a favorite Chinese snack. In Taipei, there are many street vendors who ply the streets with their portable deep fryers. This fermented tofu is usually deep-fried and usually eaten with one's choice of soy sauce, vinegar, mashed garlic, and chili paste.

Other fermented foods include miso, natto, hamanatto (which is of Korean origin), tempeh (of Indonesian origin), and shoyu (Soybean sauce, soy sauce).

"It is said that the best grades of soy sauce can take as much as six to seven years of aging to reach perfection, and that the making of a superb soy sauce requires 'as much art in its preparation as good French wines.'"

Flavorings are added to some Chinese soy sauce "various herbs, especially citronella; spices (ginger); aromatic vegetables (onions); and not only fermented fish, but even fermented chicken meat. To produce three liters (3.1 quarts) of sauce requires on kilogram (2.2 pounds) of beans.

"Fukien has the reputation of producing the best soy bean sauce in China and consequently stews many foods in it, giving them a color which has caused the culinary techniques of this region to be called 'red cooking.'"

© Copyright Soyinfo Center 2013

Soybean sauce is "often an important ingredient in many more complicated sauces–for instance Hoisin sauce in China and Worcestershire sauce in England."

4896. Dominguez de Diez Gutiérrez, Blanca. 1981. Re: Current work with tofu in Mexico and India. Letter to William Shurtleff at Soyfoods Center, Jan. 16. 1 p. Typed, with signature.
• ***Summary:*** Blanca now lives in Acapulco. At Christmas time she went to Mexico City to try to find a publisher for a booklet titled "What is Tofu?" developed by Soyfoods Center–but the person she had hoped to see was on vacation. "I think he would be interested as we have nothing like it in Mexico and they publish little booklets, although it would need about 50 more pages of tofu recipes. Anyhow, I shall try again." The person who translated it into Spanish did a poor job; the published will have to put it into Mexican Spanish. "I think instead of *queso* for tofu I would use *cuajada,* or curd. For *Gô; masa de soya* and for okara *pasta de soya."*

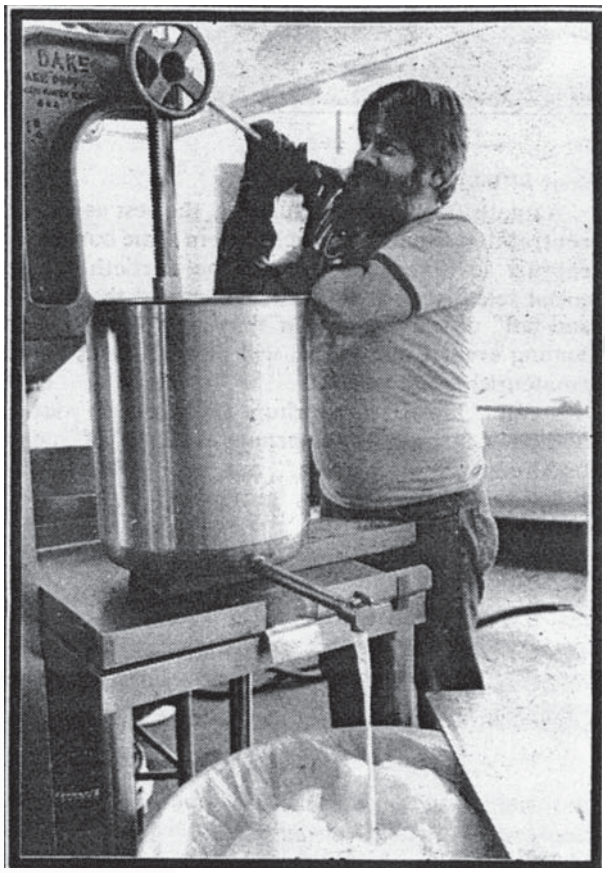
Blanca asks Shurtleff to send her again the 40 addresses of people working with soya in India. The last time they got lost. "I have a wonderful invitation to go to India. My book will be translated into Tamil. I pray that all goes well.

"Have been invited by Soyacraft to assist a Soya Congress in July. [Note: On 8-12 July 1981 the annual Soycrafters Conference was held at Colorado State Univ., Fort Collins, Colorado]. Very honored to go and looking forward to the trip. Perhaps I shall meet you. Hope so. All the best for 1981–with affectionate regards, Blanca Dominguez." Address: Acapulco.

4897. Xiques, Linda. 1981. A surprised convert to tofu [Wildwood Natural Foods]. *Pacific Sun* (*Mill Valley, California*). Jan. 16-21. p. 2. Food & Drink section.
• ***Summary:*** The author (whose last name is pronounced HEE-kays), formerly skeptical about tofu, becomes a convert to "Tofuism" after this visit to Wildwood and a talk with the four partners. Bill Bramblett, the partner in charge of production, is the former breakfast manager at the Sleeping Lady Cafe. Paul Orbuch is a commercial photographer, and Frank Rosenmayr a building contractor. Describes the company's tofu making process and equipment (including a Rietz disintegrator). The company has 18 part time employees. Gives recipes for Vegan Quiche and Tofu Mayo.

"Wildwood Natural Foods started out in August 1980 as a wholesale sandwich and 'deli' products supplier. A month later, the founders decided to start making their own tofu since they were stuffing so much of it into their sandwiches. Their Brown Rice and Tofu Sandwich is highly popular with the Marin vegetarian set, and the 'Tofunofish Sandwich' not only uses tofu for the 'nofish' but features 'tofunoegg' mayonnaise. Wildwood's latest invention, the Tofu Steak Sandwich, is rising on the charts as well."

Bramblett explains that Wildwood makes four or



five batches of tofu a day, each starting with 20 lb of dry soybeans and ending up with 40 lb of tofu. "It's *magic!"* He has written a song about tofu, titled "Tofunction," which goes: "Rinse 'em up, soak 'em up, grind 'em up, cook 'em up, squeeze 'em up, curd 'em up, press 'em up, cool 'em up, cut 'em up, pack 'em up, eat 'em up!*

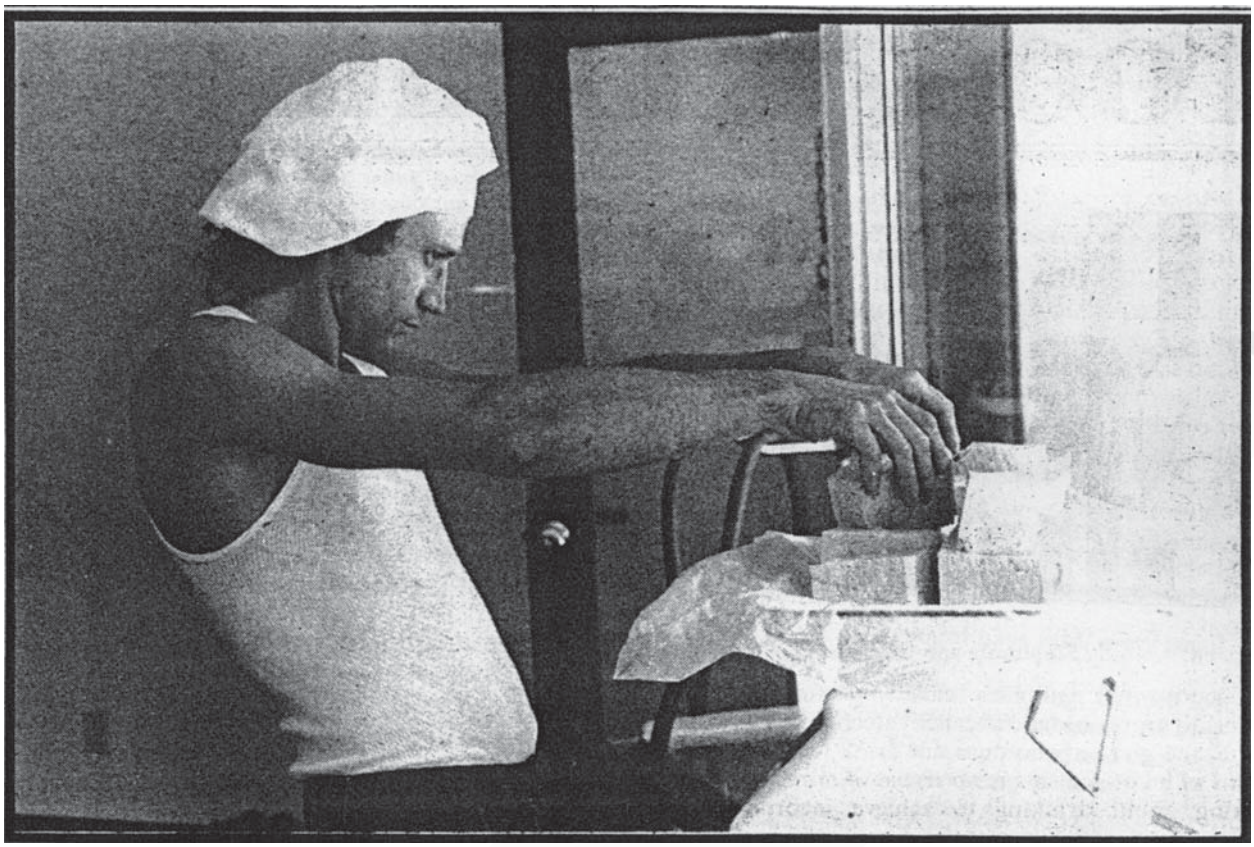
"A quick shuffle and a quick chorus and he was ready for applause. 'Here,' he said, dishing up a small container of hot tofu for me to try. "Isn't this wonderful stuff? So good when it's fresh and few people get to eat it when it's really fresh." Spooning it in, I was surprised at how flavorful it was, tender and delicate. I was softening toward tofu."

"Extending their small-is-beautiful, do-right-while-doing-well philosophy to its logical conclusion, Wildwood Natural Food products are delivered by bicycle. Pulling a small low-slung trailer, Mark Horowitz, a bike racer of some local renown, hauls their wares from Fairfax to outlets as far south as Mill Valley, delivering them fresh, with nary a drop of gasoline wasted."

Photos show: (1) Bill Bramblett using a ratchet press to press soymilk from a stainless-steel vat into a curding barrel. (2) Paul Duchesne, focused on weighing the tofu before packing.

Talk with Bill Bramblett. 2013. May 6. (1) Concerning the four original partners: Paul Duchesne put up his sandwich company and no additional money. Bramblett, Orbuch and Rosenmayr each put up $12,000 to capitalize

© Copyright Soyinfo Center 2013



the new startup company. (2) Wildwood Natural Foods Inc. started making tofu from the very first day in their new shop in Aug. 1980; they did not start as a wholesale sandwich and deli products supplier and then start to make tofu a month later. However they did continue to make sandwiches (at The Sleeping Lady) using their own fresh tofu as an important ingredient.

4898. Anderson, Alice Marie. 1981. Employee dispute [at Island Spring] prompts tofu boycott. Tofu is more than a four-letter word. *University of Washington Daily.* Jan. 21. p. 6.

• ***Summary:*** The dispute began last October when the company introduced a new automatic cooker and a company employee policy manual. The workers wanted to all receive the same pay. The owner refused to meet with a group to discuss the subject. In mid-October when the owner found out the employees were talking union, he fired three of them. A union election was held but over half the votes were contested. A boycott of the company's products began Jan. 3.

4899. Flinders, Carol. 1981. Notes from Laurel's Kitchen: Chinese cooking, vegetarian style, uses soybeans for meat. *Hartford Courant* (*Connecticut*). Jan. 21. p. E8.

• ***Summary:*** The traditional teachings of both Buddhism and Taoism prohibit the eating of any food that requires killing animals, birds, fish, or other sea creatures. For this reason "the native culinary genius of China has produced a superb vegetarian cuisine. It has flourished for centuries, mainly in Buddhist monasteries."

Now Stella Lau Fessler has written "Chinese Meatless Cooking" which contains authentic recipes. The next step is to locate a store in your town that sells Oriental foods. Tofu, sesame oil, and even shiitake mushrooms are now widely available.

"Soybeans make an impressive showing throughout the recipes: As tofu in many forms (did you know there's a fermented tofu, 'tofu-ru,' which aficionados compare with blue cheese?), as soybean milk, and even as just plain soybeans, boiled fresh in the pods."

4900. Flinders, Carol. 1981. Lecithin keeps fats from separating: Notes from Laurel's Kitchen. *Hartford Courant* (*Connecticut*). Jan. 28. p. E2.

• ***Summary:*** Why is lecithin (an emulsifier) sold in health food stores? "Primarily because it has been suggested from time to time that lecithin might work in our blood stream the same way it does in foods. That is, that it would take up globules of cholesterol and keep them moving along, instead of forming deposits on the walls of our arteries. Scientific research has failed to reward this hypothesis. But once a substance takes on that super-food aura, it doesn't lose it overnight.

"Commercial lecithin is derived from soybeans. In

© Copyright Soyinfo Center 2013

fact, when you make tofu, you end up with a whey-like by-product that is extremely rich in lecithin. It feels slick and soapy, and forms a sudsy 'head' when agitated. Bill Shurtleff describes the many uses the Japanese have for soy 'whey.' Its knack for cutting grease makes it an ideal bio-degradable soap for cooking utensils and fine fabric. It's used as a facial cleanse, a plant nutrient, and a nourishing, well-received drink for cattle."

Contains a recipe for Special soy plate, that includes "2 cups soy puree."

4901. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Alexander's Tofu Shop.
Manufacturer's Address: Das Werkhaus, Leonrodstr. 19, D-8000 Munich 19, West Germany. Phone: 089-160-474.
Date of Introduction: 1981. January.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Jan. 22. Owner: Alexander Nabben. Talk with Svadesha Ruediger Urban. 1990. June 13. This company was a very early one, located in the Werkhaus in Munich. Svadesha moved into the same building.

4902. **Product Name:** [Soymilk, and Soy Yogurt].
Manufacturer's Name: Alternatur.
Manufacturer's Address: Korte Spekstraat, Hallaar, Belgium.
Date of Introduction: 1981. January.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. March 4. This was the second earliest known soy yogurt made in Europe, and the first made after 1911.

4903. **Product Name:** [Tofu].
Manufacturer's Name: Biogarten.
Manufacturer's Address: Riesenfeldstr 16, 8000 Munich 40, West Germany. Phone: 089-359-1955.
Date of Introduction: 1981. January.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Jan. 22. Owner: Gunther Scholl. Talk with Svadesha Ruediger Urban. 1990. June 15. He thinks this company sold tofu but did not make it themselves.

4904. **Product Name:** Tofu.
Manufacturer's Name: Bountiful Bean Plant.
Manufacturer's Address: 903 Williamson St., Madison, WI 53703. Phone: 608-251-0595.
Date of Introduction: 1981. January.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Jan. 22. Owner: Chris Burant.

4905. **Product Name:** Tofu.
Manufacturer's Name: Cheng's (Mrs.) China Bean.
Manufacturer's Address: 1829 E. Palolo Ave., Honolulu, HI 96816. Phone: 808-737-2571.
Date of Introduction: 1981. January.
How Stored: Refrigerated.

4906. Chico-San, Inc. 1981. Chico-San products: A catalog of unique natural foods. P.O. Box 1004, Chico, CA 95927. 28 p. Revised Jan. 1981.
• ***Summary:*** Contents: A message from the president, J. Robert Kennedy. Chico-San rice products: Rice Cakes (6 varieties; plain, millet, or buckwheat, each salted or unsalted), Carob Crunch (carob-coated rice cakes in plain or mint flavors), Golden Rice Nuggets, Yinnies candies (Taffy made from rice and barley; Caramel made from rice, barley, oat powder, raisins, almonds, sesame oil, coconut, rice bran, lecithin, natural vanilla, and agar agar).

Yinnies brand Rice Syrup ("A pure, natural sweetener made from rice, water, and barley malt..."). "How Yinnies brand Rice Syrup is made: Chico-San's process involves the conversion of the natural starches in the rice into complex sugars. Extended low temperature cooking allows the enzymes from the malted grains to create a fermentation which occurs in a liquid mash. After an optimum period of fermentation, the process is halted and liquid squeezed from the mash. This liquid is then vacuum cooked at low temperature, bringing the syrup to the proper consistency." Yinnies brand rice syrup and refined sugar comparison. This rice syrup is high in maltose.

How Chico-San guarantees Oriental-type organically-grown brown rice (describes in detail how the rice is grown in California). Chico-San whole grains, seeds and beans (Incl. organically-grown brown rice, sweet brown rice, sesame seeds, black soybeans, and azuki beans). Chico-San condiments: Lima soy sauce, soybean puree (miso, in 3 types, mugi, kome, or hacho), barley koji, kuzu, malt vinegar malt vinegar, salt plums, nigari (for tofu making), sesame oil (light or dark), tekka. Chico-San imported seaweeds: Hijiki, kombu, wakame, nori, sea vegetable gelatin (kanten). Herb teas and other products. Chico-San cookbooks. Chico-San special recipes–including recipes for Sesame miso spread, Black soy beans, Azuki beans, and Wakame miso soup. Address: Chico, California.

4914. Fukushima, Danji. 1981. Re: History of tofu in Japan. Letter to William Shurtleff at Soyfoods Center, Jan. 22–in reply to inquiry. 1 p. Typed, with signature on letterhead. [2 ref]
• ***Summary:*** Tofu was first introduced into Japan in the 8th century; from that time until about the 12th century it was called "okabe." Source: Tomomi Kono. 1970. *Encyclopedia Japonica*. Tokyo: Shogakukan. Vol. 13, p. 227. Please see enclosed photocopy.

Fermented tofu originated in China in the 5th century A.D. Source: T. Watanabe, H. Ebine, and T. Ota. 1971. *Daizu Shokuhin*. Tokyo: Korin Shoin. p. 196. Please see enclosed photocopy.

In Japan today, several factories produce 50,000 to 100,000 packages of packaged tofu per day.

By separate mail, Dr. Fukushima is sending a copy of a color slide showing Kibun's Soena. Address: Kikkoman Foods, Inc., Walworth, Wisconsin 53184.

4915. **Product Name:** Tofu.
Manufacturer's Name: Homeland Foundation.
Manufacturer's Address: Upper Thora, Bellingen, NSW 2492, Australia. Phone: 066-558-514.
Date of Introduction: 1981. January.
New Product–Documentation: Letter from Marcea Newman Weber of Sydney. 1981. Nov. 8. Gives the address of Homeland Community, Upper Thora, Bellingen 2454 NSW, Australia.

Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Owner: David Wilson.

Interview with Jonathan Gordon of White Wave, Inc. 1995. Nov. 16. Jonathan left Findhorn in March 1981 and arrived in Australia in about July or August 1981. He traveled in Australia with a girlfriend and lived at the Homeland Foundation in Upper Thora, Bellingen, New South Wales, where he made tofu with other members of the community. Upper Thora is a little town in the Bellingen (pronounced BEL-ing-un) valley. Some community members had already been making tofu for a long time before he arrived; the tofu company was a completely established local business, with customers and delivery routes, when he arrived. They made about 300 lb/week of tofu and delivered it themselves to nearby communities in insulated cold boxes

© Copyright Soyinfo Center 2013

(called "Eskis," short for Eskimos) in a van. Homeland was also making tempeh at the time, but Jonathan was not a tempeh maker. He left Australia in about Dec. 1981 to return to England.

4916. Kamen, Sy; Kamen, Betty. 1981. The tofu connection (filmstrip). New York, NY: Cold Spring Harbor. *
• ***Summary:*** This entertaining and educational color filmstrip, created and produced by Sy and Betty Kamen, consists of two different parts, each of 79 frames and lasting 15 minutes. Part One, "The Making of Tofu," depicts how tofu is made in both the traditional Japanese shop and in a large-scale American tofu plant. Part Two, "Tofu–America Style," features a cooking class led by Madeline Fox of the New England Soy Dairy. She prepares tofu meatballs and buckwheat spaghetti, tofu sloppy joes, tofu salad, tofu dip, tofu fruit cream, and tofu chocolate mousse.

The Tofu Connection is available from Encore Visual Education Inc., 1235 South Victory Boulevard, Burbank, California 91502 (Catalog No. 203); the price is $46 for both filmstrips and audio cassettes. Address: Cold Spring Harbor, New York.

4917. **Product Name:** Tofu [Water Pack, or Vacuum Pack], Soysage, Tofu Pudding, Marinated Tofu.
Manufacturer's Name: Lecanto Tofu.
Manufacturer's Address: Route 2, Box 764, Lake Butler, FL 32054. Phone: 904-496-3714 or 904-496-3698 (HM).
Date of Introduction: 1981. January.
Wt/Vol., Packaging, Price: Water and vacuum packed.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Jan. 22. Owner: Jean Huffman. Address is given as P.O. Box 444, Lecanto, FL 32661. Talk with Rodney and Carol Prins. 1988. May. They bought the business in late 1983 from Marvel Huffman. They have continued to make the products they bought, and have not introduced any new ones, except vacuum packed tofu. The business is on a small farm. Sales are about $50,000/year. The business is for sale.

4918. **Product Name:** Tofu.

Moved to Petaluma in June 1982.

4931. **Product Name:** Tofu.
Manufacturer's Name: Rose Kitchen Tofu.
Manufacturer's Address: 515 E. Central, Wichita, KS 67202. Phone: 312-267-8024.
Date of Introduction: 1981. January.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Jan. 22. Owner: John Guffey.

4932. **Product Name:** Tofu.
Manufacturer's Name: Ruch Co-Op Soy Dairy.
Manufacturer's Address: 6091 Hwy 238, Jacksonville, OR 97530.
Date of Introduction: 1981. January.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Jan. 22.

4933. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Solola Soy Dairy.
Manufacturer's Address: Solola, Guatemala.
Date of Introduction: 1981. January.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Jan. 22. Owner: Figallo Molina Belen.

4934. Soy Plant Co-op Inc. (The). 1981. Price list effective 1/28/81 [28 Jan. 1981]. Ann Arbor, Michigan. 1 p. 28 cm.
• ***Summary:*** This hand-lettered sheet contains four columns: Manufacturer, product, unit price, and case price. The Soy Plant is manufacturer of: Tofu, plain soy milk, flavored soy milk, tempeh, miso garlic dressing, and Soyanaise (soy mayo). Other manufacturers are Sunshower (fruit juices and butters), Hills Brothers (apple cider), Toper (pickles), Westbrae (miso–3 types), and Canadian Soya (Soya Lecithin Spread, non-hydrogenated). Address: 711 Airport Blvd., Suite #1, Ann Arbor, Michigan 48104. Phone: 313-663-TOFU (663-8638).

4935. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Soy-Can Dairy Ltd.
Manufacturer's Address: 59 St. James St. W #601, Montreal, QUE, Canada.
Date of Introduction: 1981. January.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Jan. 22. Owner and phone not listed.

4936. **Product Name:** Tofu.
Manufacturer's Name: Suzuki Tofu Shop.
Manufacturer's Address: 480 E. 20th St., Chico, CA 95926.
Date of Introduction: 1981. January.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Jan. 22. Owner: Aiko Suzuki.

4937. **Product Name:** Tofu.
Manufacturer's Name: Thistle Down Tofu.
Manufacturer's Address: R.R. 5 Church Rd., Duncan, BC, V9L 4T6, Canada. Phone: 604-748-9514.
Date of Introduction: 1981. January.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Jan. 22. Owner: Jan Norris.

4938. **Product Name:** Tofu.
Manufacturer's Name: Tofu In-Sted.
Manufacturer's Address: Box 805 Frederickstead, St. Croix, VI 00840.
Date of Introduction: 1981. January.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Jan. 22. Owner: Monty Thomson.

Note: This is the earliest known commercial soy product made in the U.S. Virgin Islands, or in the Lesser Antilles.

4939. **Product Name:** Wel Pac Tofu.
Manufacturer's Name: Tokyo Food Processing Corp. Affiliate of JFC International.
Manufacturer's Address: 40 Varick Ave., Brooklyn, NY 11237. Phone: 212-456-8805.
Date of Introduction: 1981. January.
How Stored: Refrigerated.

Computerized Mailing List. 1981. Jan. 22. Owner: Mr. Shirata & Mr. Terry Terahira. Soya Bluebook. 1986. p. 107. New name for an existing product. Note also new affiliation.

4940. **Product Name:** Zakhi Tofu (1 lb. Vacuum Packed in Box with Window).
Manufacturer's Name: Tris Inc.
Manufacturer's Address: 340 Greenhills Ct., Greenwood, IN 46142. Phone: 317-881-1299.
Date of Introduction: 1981. January.
Wt/Vol., Packaging, Price: 1 lb vacuum packed.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Jan. 22. Owner: David Yang. Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Alternate address given as 500 S. Polk St., #2, Greenwood, Indiana 46142.

4941. **Product Name:** Tofu.
Manufacturer's Name: Tropi-Pak.
Manufacturer's Address: 3664 N.W. 48th St., Miami, FL 33142. Phone: 305-635-1968.
Date of Introduction: 1981. January.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Jan. 22. Owner: Dennis Murasaki.

4942. Tsuchiya, Kunio. 1981. Minami no tôfu, kita no tôfu: Aizu Tajima no tsuto-dofu ni tsuite [Southern tofu, northern tofu: Tsuto-dofu from Aizu Tajima]. *Daizu Geppo* (*Soybean Monthly News*). Jan. p. 39-47. [Jap]
• ***Summary:*** Aizu Tajima is a place in the northeast prefectures (Tohoku Chiho), near the border of Fukushima prefecture and Tochigi prefecture. During the Edo period it was a major town through which travelers passed. Tsuto-dofu is wrapped in a bamboo mat (*sudare*), then boiled in water until small holes form in the tofu.

4943. **Product Name:** Tofu Steak Sandwich.
Manufacturer's Name: Wildwood Natural Foods.
Manufacturer's Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1981. January.
Ingredients: UFO Tofu by Wildwood, whole grain bread, sprouts, lettuce, brine pickles, mustard, tamari, safflower oil, apple cider vinegar, herbs & spices, sea salt.
Wt/Vol., Packaging, Price: 7 oz.
How Stored: Refrigerated.
New Product–Documentation: Xiques. 1981. Pacific Sun. Jan. 16. "A surprised convert to tofu... Wildwood's latest invention, the Tofu Steak Sandwich, is rising on the charts as well. It looks questionable... but it is quite delicious." Fillip. 1981. May. East West Journal. p. 40 "The Amazing Tofumobile." Cohen. 1981. Nov. 23. San Francisco Business Journal. p. 6. "To make tofu steak for tofu steak sandwich, the end cuts of raw tofu blocks are marinated in tamari and baked.

Label sent by Wildwood on their letterhead. 1983, undated. 3 by 2 inches. Self adhesive. Black and green on orange-yellow. Silhouette of woods with birds. "Fresh Daily. Ready to Eat Foods. Naturally. Perishable. Keep Refrigerated."

Note. This is the earliest known commercial soy product named "Tofu Steak."

4944. **Product Name:** Tofunofish Sandwich.
Manufacturer's Name: Wildwood Natural Foods.
Manufacturer's Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1981. January.
Ingredients: UFO Tofu by Wildwood, onions, lettuce, scallions, brine pickles, safflower oil, tamari, apple cider vinegar, garlic, kelp, sea salt, spices, whole grain bread.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Refrigerated.
New Product–Documentation: Xiques. 1981. Pacific Sun. Jan. 16. "A surprised convert to tofu... The Tofunofish Sandwich not only uses tofu for the 'nofish' but features 'tofunoegg' mayonnaise." Fillip. 1981. May. East West Journal. p. 40 "The Amazing Tofumobile." Cohen. 1981. Nov. 23. San Francisco Business Journal. p. 6. "The tofunofish sandwich contains many of the same ingredients as the brown rice and tofu sandwich, minus the brown rice. To give it a tuna fish taste and texture, the sandwich has okara in it.

Label sent by Wildwood on their letterhead. 1983, undated. 3 by 2 inches. Self adhesive. Black and green on white. Silhouette of woods with birds. "Fresh Daily. Ready to eat foods, Naturally. Perishable, keep refrigerated."

Talk with Billy Bramblett, an owner of Wildwood. 1998. Aug. 8. This product definitely contained okara; Billy will ask Paul Orbuch and Doug Porter why okara was not listed on the label. He thinks he has the original recipe in his archive of old Wildwood recipes that are no longer in production. This was an actual sandwich, but Billy thinks that from time to time Wildwood marketed the Tofunofish filling/spread in a plastic tub.

4945. **Product Name:** Zakhi Tofu (1 lb. Vacuum Packed in Box with Window).
Manufacturer's Name: Zakhi Soyfoods.
Manufacturer's Address: 124 S. Hadley Rd., Fort Wayne, IN 46804. Phone: 219-432-1291.
Date of Introduction: 1981. January.
Wt/Vol., Packaging, Price: 1 lb vacuum packed.
How Stored: Refrigerated.
New Product–Documentation: Letter and order for the

book *Tofu & Soymilk Production* from Doris Zakhi. 1979. Nov. 9. She is located at the address shown above. "We are very interested in starting a soy dairy here in Ft. Wayne."

Soyfoods Center Computerized Mailing List. 1981. Jan. 22. Owner: Victor Zakhi. Spot in Soyfoods. 1984. Summer. p. 45.

4946. Fabricant, Florence. 1981. A good place to sample sushi: Dining out. *New York Times.* Feb. 1. p. LI17.
• ***Summary:*** This is a review of the two-star Japanese restaurant Taiko. Recommended dishes include "fried bean curd appetizer."

"Hot appetizers of deep-fried bean curd, the squares of tofu finished with a crunchy coating and seasoned with a gingery sauce..."

"Rich miso soup with diced bean curd provides a warmly restorative interlude between the main courses, especially on a biter winter evening."

Sukiyaki casserole includes "bean curd in a soy-based broth."

Note that the word "soy" (used by itself, at this late date) refers to soy sauce.

4947. Stop & Shop. 1981. Happy Chinese New Year! (Ad). *Hartford Courant* (*Connecticut*). Feb. 1. p. V5.
• ***Summary:*** "La Choy, 10 ounce bottle–Soy Sauce–69¢... Soy bean cake–Tofu 1 pound package–89¢." Also includes Azumaya egg noodles, egg roll wrappers, wonton wrappers (each in a 1-lb. package).

4948. Wakai, Ted. 1981. Dictionaries and raw fish (Letter to the editor). *Los Angeles Times.* Feb. 1. p. I14.
• ***Summary:*** Discusses the meanings of the words "sushi" and "sashimi." Not all sushi contains raw fish. His understanding is that "that sushi is a type of rice dish or delicacy made in a variety of sizes, shapes, recipes, appearances, tastes, etc. It comes rolled in seaweed [nori] or egg omelette, rolled into a ball, pushed through a mold, filled into a bag of deep-fried bean curd, loose, etc." Address: Oxnard, California.

4949. Burros, Marian. 1981. Chinese New Year: The year of the rooster. Gathering around the fire pot. *Washington Post.* Feb. 5. p. A1, A15 (E15).
• ***Summary:*** The fire pot (the Chinese version of a chafing dish) is specially popular during the Spring Festival, which Americans call Chinese New Year. In Mandarin it is called *huo kuo,* while in the Cantonese dialect it is *ta pin lou.* Popular ingredients include tofu, "frozen tofu" (made by slicing and freezing fresh tofu), soy sauce, and red fermented tofu. One recipe is given for Aline Berman's fire pot, and another for Fire pot sauce.

4950. Miller, Jim. 1981. Re: Chronology of Quong Hop's firsts in American soyfoods. Letter to William Shurtleff at Soyfoods Center, Feb. 9. 1 p. Typed, with signature on letterhead.
• ***Summary:*** In response to Shurtleff's request for additional information about Quong Hop's "contributions to the making of soyfoods history in the West, I thought I would send along the following list of firsts and other significant things pertaining to our own involvement in soyfoods, just to set the record straight."

1972–"The first orientally owned and operated tofu company to make a significant move to introduce tofu to the American consumer."

1972–"The first producer of fresh soymilk for the health and natural food as well as the oriental food market."

1973 Jan.–"The first to promote tofu in its many varieties as an economical and nutritious alternative to meat and dairy products using the enclosed pamphlet and other p.o.p. [point of purchase] material for supermarket promotions."

1975 Dec.–"The first commercial producer of tofu to use organically grown soybeans."

1976 Aug.–"The first commercial producer of tofu to use natural nigari."

1977 June–"The first commercial producer of tofu burgers" [labeled "Tofu Burgers"]. Note: Azumaya started commercial production of tofu burgers labeled "Ganmodoki" in about 1937.

1978 April–"The first producer of vacuum packed nigari tofu."

1980 May–"The first to produce aseptically packed creamy tofu dressings requiring no refrigeration."

1980 Sept.–"The first to produce a line of frozen tofu entrees for sale to the Western market for natural convenience stores." Address: Quong Hop & Co., 161 Beacon St., South San Francisco, California 94080. Phone: 415-873-4444.

4951. Schmit, Matthew. 1981. Fresh tofu comes to Northern Cal. Arcata, Clifornia. 2 p. Feb. 13. Unpublished manuscript.
• ***Summary:*** "The Tofu Shop of Arcata, California, officially opened its doors on December 12, 1980, after a year of low-key planning and three months of shop/equipment renovation. Owners Matthew and Susanne Schmit label the shop 'a soy deli and whole grain bakery,' and have designed the wholesale and retail operation to be a family run business.

"Upon entering the 500 sq. ft. shop, customers find themselves in a quaint, hand-crafted retail area, offering a full line of whole grain breads and a variety of 'tofu-support grocery items' such as sauces, condiments, sea vegetables, grains, and cookbooks. Deli specials, recipes-of-the-week, and soy news items are listed on central bulletin boards. Regular deli features include soymilk, tofu cheesecake, tofu-pumpkin pie, ganmo patties, and tofu-spinach turnovers.

© Copyright Soyinfo Center 2013

Behind the service counter customers can see dough mixers and baking ovens, and portions of the tofu-making process are also visible from the shop's front windows–all an attempt to bring the consumers closer to the source of their food.

"The traditional-style cauldron shop is presently producing 100 pounds of firm nigari tofu per day with a capacity of 300 pounds per day. The equipment is all American made and adapted to its present function. Grinding is done with a C.W. Bell steel plate grinder. Soymilk is extracted with a traditional cider press. Settling boxes are actually stainless steel steam table inserts with drilled holes. Pressing is done with a custom-made jig using cargo jacks as adapted by Surata Soyfoods of Eugene, Oregon (Soyfoods, Summer, 1981).

"Future plans for the shop include upgrading the tofu equipment to increase production capabilities, and at the same time developing the deli facility to attract a larger cross-section of the community. Matthew and Susanne Schmit are dedicated to the community-level tofu shop concept and are happy to play a part in the growth of a viable small shop model in the United States. For information call or write: The Tofu Shop, P.O. Box 4716, 768 18th Street, Arcata, California, 95521. Phone: (707) 822-7409." Address: 768 18th St., Arcata, California 95521. Phone: 707-822-7409.

4952. Sheraton, Mimi. 1981. Restaurants: Tempura treats, a neighborhood spot. *New York Times.* Feb. 13. p. 58.
• ***Summary:*** This is a review of Inagiku, a Japanese restaurant inside the Waldorf-Astoria at 111 East 49th St. They serve "soba (cold buckwheat noodles enlivened with soy sauce and scallions),..." and "small dishes such as nimono, a combination of simmered vegetables and bean curd [tofu]..." Also teriyaki fish.

"At one dinner we asked a waiter for natto, a cool side dish of fermented soybeans in a spicy, eggy sauce..."

4953. Jennings, Richard. 1981. Re: Use of soybeans in Ecuador. Letter to William Shurtleff at Soyfoods Center, Feb. 14. 1 p. Typed, with signature on letterhead. [Eng]
• ***Summary:*** "The most popular use for soya in Ecuador is solvent extracted oil, with the presscake being fed to chickens. As to machica (máchica), this is made with frijol tumbre (black-eyed peas = cowpeas) which are grown in the coastal areas and are somewhat similar in shape and size to soya. Mehica (Méhica) is made in the Sierra, and while the black-eyed peas are used, it is usually made with maize/corn or barley (cebada).

"The other use for soya is at the Chinese-run soy sauce and miso factory in Quevedo, in the lowlands where there is a constant warm climate for fermentation. They make a kind of miso but with some sugar and spices. When I visited the factory, I was not enough in the owner's confidence to ask about specifics, but I saw tangerine peels being dried, and also tasted anise and maybe cinnamon. The recipe on the jar recommends using their product for cooking pig and turkey. The people there also make an edible soy sauce. Ecuadorian soy sauce is for the most part horrible, consisting of a lot of burnt sugar and very little soy. I would with some confidence rank it as the worst in the world. It is used for *chaulafan,* which is the name here for a fried rice dish, and is preferred because it is thick and dark, and turns the rice a brown color. Anyway the Chinese in Quevedo make this petroleum-like glop, but also make an edible normal soy sauce which I am distributing along with the miso until I can get it together to make a better product.

"There are few Chinese and Japanese making tofu at home, and there is one restaurant that claims to sell about 40 lbs daily, so a friend tells me. No soymilk that I know of." Address: Casilla 252A, Quito, Ecuador. Phone: 529-679.

4954. Hesseltine, C.W. 1981. Aflatoxins in soyfoods (Interview). *SoyaScan Notes.* Feb. 18. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Concerning the 1969 *Time* magazine article on aflatoxins in homemade miso and soy sauce in Korea–There is a lot of incorrect information in the literature based on a problem with determining aflatoxins, since not all things that fluoresce are aflatoxins. A test for fluorescence needs to be followed by a chemical test. He found that one-third to one-half of all oats sampled in the USA contained fluorescent material that looked like aflatoxin–but was not. The oats were fed to animals and no problems resulted.

A study in Japan showed that when homemade miso was properly inoculated, it contained no aflatoxins, but when inoculated with natural spores, it did contain some aflatoxins. He has never seen any figures on the aflatoxin content of the latter miso. He has seen no evidence to indicate that there are problems with aflatoxins in naturally inoculated homemade misos. Good studies conducted in Japan have found aflatoxins in homemade miso but they were found only in a few samples and the levels were so low that there was no problem. No aflatoxins have ever been found in commercial misos as far as he knows. In short, he feels there is no risk is consuming any type of miso.

Dr. Hesseltine is now on a low-sodium diet and has therefore started eating a lot of tofu. In addition, he and Dr. Wang are conducting an interesting study on microbial spoilage of tofu. Address: NRRC, Peoria, Illinois.

4955. Bailey, Dennis. 1981. The selling of soy: If you don't know much about tofu yet, don't worry, you will soon. *Maine Times* (*Topsham, Maine*). Feb. 20. p. 32.
• ***Summary:*** "Everybody knows what tofu is, right? It's that chalk-colored square hunk of cheese-like matter in hermetically sealed plastic tubs that sits between the lettuce and tomatoes in the produce sections of large grocery stores. Perhaps you have on occasion halted your shopping cart

© Copyright Soyinfo Center 2013

and picked one up to marvel at its weirdness, puzzle over its presence, or to ask a basic question, 'What in the world is this?' One person supposedly bought one thinking it was some sort of scrubbing utensil or a sponge, only to get it home to realize that sponge companies don't normally list their product's nutritional value on the outside wrapping. Of course, after taking a bite, the befuddled buyer's faith in the adage that initial impressions are always reliable was restored. Yup, it had to be a sponge. Food was never meant to taste like this."

In Maine, the larger grocery stores get their tofu from the New England Soy Dairy of Greenfield, Massachusetts. The Soy Dairy sells about 12 tons of tofu each week. In the major chain markets, Soy Dairy tofu is likely to be the only brand available, but that too may soon change. Other companies are getting into the act, including the Dannon Company. Yes, the folks at Dannon are thinking about doing for tofu what they did for yogurt–Americanize it, popularize it, commercialize it and cash in on it. Today the health food stores, tomorrow the IGAs. Out of the coops and into the Frigidaires." #2." Madeline Fox, Soy Dairy sales director, discusses the many benefits of tofu.

4956. Yoshimura, Sam. 1981. Re: Chronology of work at Madison Foods and reminiscences. Letter to William Shurtleff at Soyfoods Center, Feb. 20. 2 p. Typed, with signature.

• ***Summary:*** 1937-1943. Sam attended Madison College and received a B.S. degree in nutrition in 1941. "At that time extensive study on soy beans and human nutrition was conducted at the college under the direction of Francis Dittes, (Ph.D. in nutrition) Phillip Chen, (Ph.D. in chemistry) and Perry Webber (Ph.D. in nutrition). Madison Foods (owned by the college) was manufacturing various canned and dried vegetable protein products including Kre-O-Soy (soy milk) and Cheze-O-Soy (seasoned tofu) and marketed them nationally. I received valuable experience working in the food plant.

1943-1946. Sam went to Emmanuel Missionary College located in Berrien Springs, Michigan (now renamed Andrews University), and received a B.S. degree in agriculture in 1945.

1945-1956. Sam returned to Japan and re-established San-iku Foods (owned by the Japan Missionary College). The college was closed during World War II. The company made canned and baked products based on wheat and soy proteins and marketed them extensively, including at Mitsukoshi, Seibu and other department stores. A series of pilot scale tests of soy milk production was conducted under the direction of Dr. Harry Miller. However, they did not start commercial production due to the somewhat weak public response to the product.

1956-1963. He worked for Madison Foods in Tennessee, where he was responsible for managing the production, research, and development program. Various canned vegetable protein products were produced. Madison Burger based on wheat and soy protein and improved Cheze-O-Soy were well accepted by the market. At the beginning of 1962, production of Infa Soy using Dr. Harry Miller's formula, was started under the direction of his son, Willis Miller; J.B. Craw was general manager at that time.

1963-1964. Sam left Madison Foods and went to work for Madison Hospital (owned by the organization). He was assigned to develop economical vegetable protein products suitable for hospitals, schools and other institutions. A series of frozen products including the so-called "Sam's Chicken," made with wheat protein [gluten] and tofu, were formulated. The product was well accepted by institutions as it had a torn chicken-like texture. "It was a least expensive product. I understand a dish prepared with Sam's Chicken (supplied by Southern Missionary College) received recognition at the International Restaurant Show in Chicago several years ago.

1965 to present. He joined Worthington Foods after Worthington acquired Madison Foods. Worthington sent him to Africa Basic Foods Inc. in Uganda, East Africa, to assist development of soy protein products. During his 6-month stay the company produced soy milk, tofu, CSM (combination of corn, soy and powdered skim milk) and other high protein products for hospitals and the school lunch program. It was a missionary project for the company to take part in solving kwashiorkor problems. It was an unforgettable and rewarding experience for Sam. He is a staff member of the R&D department, especially assigned to develop new products. He is also a professional member of the Institute of Food Technologists.

For information regarding Krem-O-Soy and other products from the early days of Madison Foods, contact Dr. Register (Chairman, Dep. of Nutrition, Loma Linda Univ.) or Dr. Shirou Kunihara at the same university. They were students at Madison College and did R&D work for the food plant. The son of Dr. Philip Chen (deceased) is at the Weimar Institute, Box A, Weimar, California 95736. Address: 8200 Colonial Meadows, Westerville, Ohio 43081. Phone: 614-882-0625.

4957. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Aros Sojaprodukter KB.
Manufacturer's Address: Bergsvagen 1, S-19063 Orsundsbro, Sweden. Phone: 0171-604 56.
Date of Introduction: 1981. February.
Ingredients: Soybeans, water, magnesium chloride.
Wt/Vol., Packaging, Price: 400 gm packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.
How Stored: Refrigerated, 14 day shelf life.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Owner: Ted Nordquist. Address listed as Box 13012, 75013 Uppsala,

© Copyright Soyinfo Center 2013

Sweden. The company's original name before production started was Aros Sojamjolkprodukter. KB (*kommanditbolag*) means "limited partnership." Ad and article in Haelsa. 1981. March 3. p. 29, 32 (a black-and-white photo shows the package), plus 4 page color insert (p. 35-38) of tofu recipes with color photos of the recipes and of Ted Nordquist, and 1 page of instructions for making tofu at home.

Aros Catalog. 1982. The company is now at Bergsvaegen 1. On the cover of the 6-panel catalog is a company logo and "Aros Sojaprodukter Örsundsbro, and next to it Soyfoods Center Sweden with the Soyfoods Center logo. The company sells books, soyfoods, nigari, tempeh starter, and miso and koji starter. Soyfoods Center owns a large black-and-white photo of Ted Nordquist and Tim Ohlund loading cases of Aros tofu into the back of a vehicle.

Form filled out by Ted Nordquist of Aros. 1984. Aros started making commercial tofu in Feb. 1981, and is now making 800 kg/week. One year ago they were making 500 kg/week. Started vacuum packing in 1983.

Talk with Ted Nordquist. 1985. Jan. 7. Now making 1,750 kg/week of tofu. During the past year they lost the Finland market but Sweden's sales doubled. Talk with Ted Nordquist. 1990. May 18. Starting in about 1987 this product was renamed Tofu Line Tofu Naturelle. All Aros products are now sold under the Tofu Line brand.

4958. Chu, Yung-shung. 1981. Soybean protein food in China. *J. of the American Oil Chemists' Society* 58(2):96A, 98A, 100A. Feb. Reprinted in APCC Quarterly, 30 June 1981, p. 23-27.

• ***Summary:*** Contents: Abstract. Methods of preparation: Bean curd (tu fu), bean curd derivatives (tough bean curd, smoked tough bean curd, dried soybean sheets, fried bean curd, vegetable chicken), fermented bean curd (fu ru), dried bean milk cream (fu tsu [dried yuba sticks]).

For 4,000 years soybean have been one of the main crops cultivated in China. The history of extracting protein to prepare tofu is about 1,000 years old. The soybean was important not only as a food but also as a seasoning. The earliest fermented soybean products were dou-jiang (soybean ch'iang) and dou-chi [fermented black soybeans].

Note: This is the earliest document seen (Nov. 2011) that uses the term "dou-chi" to refer to fermented black soybeans.

The preparation of these two products was recorded briefly in *On Medical Emergency Treatment* written by Si Yu during the Western Han Dynasty (100 B.C.). [Note: This is the *Chi chiu p'ien* by Shih Yu.] Later, these procedures were described in detail in the *People's Agricultural Calendar* written by Cui-Zi during the Han Dynasty (200 A.D.). Illustrations of techniques appeared in 600 A.D. in special chapters of *The Principal Methodology of Economics*, by Jia Si-Yi.

According to historical literature of the Min [Ming] and Qing [Ch'ing] Dynasties, the preparation of bean curd [tofu] was first recorded in Han Zi, written by Liu An, King of Huai Nan (179-122 B.C.) In the book of Qin-Yi, Tao Gu (907-960 A.D.) said that bean curd was a common food in the market of the south Huai district.

Fu ru is the fermented form of bean curd. The earliest record of this is in the book called *Night Dialogue Under the Shade*, written by Li Ri-huo (1636-1661). He said that fu ru was prepared between summer and autumn in the Qi Men district and briefly described the procedure. In a famous book on Chinese herbal medicine, *Compendium of Materia Medica,* the author, Li Shizen (1518-1593), describes the preparation technique in detail.

Later, these procedures were described in detail in the *People's Agricultural Calendar* written by Cui-Zi during the Han Dynasty (200 A.D.). Illustrations of techniques appeared in 600 A.D. in special chapters of *The Principal Methodology of Economics*, by Jia Si-Yi. Address: Oil and Fat Research Inst., Shaanxi, China.

4959. Dalman, Thelma. 1981. From Thelma's kitchen: Tofu Italiano. *Soyfoods* 1(4):68. Winter.

• ***Summary:*** Contains a recipe for Tofu Italiano. "Thelma Dalman's school lunch program for Santa Cruz city schools in California has been the bellwether for nutrition, innovation, and economy for many years now. First, with their vegetarian menu and the elimination of foods with preservatives and artificial ingredients; more recently her (to some) audacious introduction of tofu into the meal plan..." Thelma and her staff, including central kitchen manager Maxine Prairie, direct some 8,000 meals daily that are delivered fresh to 18 different school locations.

"She remarks that the institutional kitchen takes tofu back a step, from its slablike delivered state, to a more cottage-cheese curd physical appearance. She is encouraging a local tofu supplier to consider delivering tofu as curds rather than blocks, and she believes tofu is more attractive to the average housewife in the form of cottage-cheese-style curds."

Contains a recipe for Tofu Italians that serves 50 and uses 10 lb of tofu. Address: Director, Santa Cruz City School Lunch Program, Santa Cruz, California.

4960. Fiering, Steve. 1981. Low technology soybean dehuller. *Soyfoods* 1(4):52. Winter. [1 ref]

• ***Summary:*** An essential article for anyone wishing to dehull soybeans using low-cost equipment, with one useful illustration. The basic machine, a simple stone dehuller, was developed and patented by Nelson and Ferrier at the University of Illinois. U.S. Patent 3,981,234. The separator, based on a vacuum cleaner blower, neatly and cleanly separates the hulls into a cloth bag.

"During last summer's *Soyfoods Showcase* I was excited by the work of the University of Illinois in expanding the use of soybeans as human food. Their work with technology-

© Copyright Soyinfo Center 2013

deficient countries has led them to develop a 'low tech' soybean hull separator. This machine holds promise for immediate use by the growing ranks of tempeh makers."

Note 1. This is the earliest document seen (Sept. 2011) with the term "low technology" (or "low tech") in the title.

Note 2. This is the earliest document seen (Sept. 2011) that contains the term "low tech" (or "low-tech").

Note 3. The description of this dehuller and hull separator (with different illustrations) first appeared in: Nelson, A.I.; Ferrier, L.K. 1976. Soybean processing using low level technology. Urbana, Illinois: University of Illinois. 34 p.

Note 4: In a 2-page letter to Bill Shurtleff dated 16 July 1984, A.I. Nelson says: "The hull separator is not patented and can be used by any interested parties." Address: The Soy Plant, Ann Arbor, Michigan.

4961. Fiering, Steve. 1981. Demystifying refrigeration. *Soyfoods* 1(4):48-51. Winter. [2 ref]
• ***Summary:*** An excellent introduction to an essential subject for soyfoods makers who sell refrigerated or frozen products. "A cooler takes heat from within an insulated box and releases the heat into the environment outside the box. This is accomplished by taking advantage of the fact that when a liquid changes to a gas (evaporates), it absorbs a great deal of heat, and when a gas changes to a liquid (condenses), it releases heat.

"All coolers work on this very simple principle. A substance, generally freon [Freon], is brought inside the cooler box as a liquid and once in the box, allowed to evaporate; thus absorbing heat from within the box. The freon is taken out of the box as a gas and then condenses back into a liquid releasing heat. The liquid is sent back into the cooler, allowed to evaporate, then once more taken out and condensed. This cycle–called the refrigeration cycle–continues until the box is cool enough. It's a simple idea, though the mechanics of accomplishing it may be complex."

The three basic units of every refrigeration unit are the compressor, evaporator, and condenser. Two illustrations show the relationship between these basic components. Address: The Soy Plant, Ann Arbor, Michigan.

4962. **Product Name:** Tofu Spreads [Teriyaki, or Curry].
Manufacturer's Name: Harvest Wholefoods.
Manufacturer's Address: 403 Richmond Rd., Grey Lynn, Auckland, New Zealand.
Date of Introduction: 1981. February.
Ingredients: Tofu, tamari, garlic vinegar.
Wt/Vol., Packaging, Price: 200 gm plastic tub.
How Stored: Refrigerated.
New Product–Documentation: Chalmers, Elizabeth. 2007. Jan. 16. "Business history of the Chalmers family: Making soyfoods in New Zealand" (Interview). Letter (e-mail) from Elizabeth Chalmers. 2007. Jan. 24. Harvest Soyfoods made "Tofu Spread" in two flavors, Teriyaki and Curry. Teriyaki sold best. Ingredients: Tofu, tamari, garlic, vinegar. They were sold in 200 gm small plastic tub, refrigerated. Bean Supreme discontinued them. "We did actually start to make these again when we started the Organic Soy Company, but only for about 6 months, as we could not get a long enough shelf life out of them–only 2 weeks. All our products (except Teriyaki sauce) have always been refrigerated. New Zealand has a population of 4 million in a country the size of the whole United Kingdom. Because of these logistics we are always 'playing to a small audience,'" and need to send our products to all corners of the country. Hence we need to get a shelf life of 6-8 weeks out of all of our products. If we were just to sell locally in Auckland, it would not be enough business to keep us going."

Letter (e-mail) from Elizabeth Chalmers. 2007. Jan. 24. "Now that I really set me mind to it, I think we started making the spreads before we made Tempeh. I would take a guess at early 1981, February, when we were still in the back of Harvest Wholefoods.

4963. *Jewish Times.* 1981. Food of life (Mintz's Kosher Buffet). Jan/Feb.
• ***Summary:*** Tofu use is spreading to the Jewish community. Mintz's Kosher Buffet now offers "a full line of tofu products, including non-dairy quiches, muffins, vegetable souffle's, spinach pies, and egg rolls. Mintz's will soon add chocolate cream and banana cream tofu pies to the menu."

4964. Kawashima, Masao. 1981. Kôri-dôfu to shite no genryô daizu [Soybeans as raw materials for dried-frozen tofu]. *Daizu Geppo* (*Soybean Monthly News*). Feb. p. 9-21. [Jap]
Address: Habutae Tofu K.K., Kikaku, Kagaku Kenkyu-shitsu-cho, Kanazawa-shi, Ishikawa-ken 921, Japan.

4965. Kay, Nancy. 1981. Discovering tofu in Guyana. *Soyfoods* 1(4):65-66. Winter.
• ***Summary:*** During her recent trip to Guyana, while looking up some members of Guyana's one and only vegetarian society, the author found a small but thriving tofu manufacturing company–in the village of Golden Grove, 15 miles outside of the capital, Georgetown. She met the founders and owners, Peter and Rosemary Kempadoo, who make 100 pounds of tofu a week, with no government assistance. Every Friday they truck it into town to sell to and through members of the vegetarian society–so that their operation won't be subject to government licensing. "They claim their customers keep the tofu without refrigeration several days in a salt water brine."

Soybeans are not a cash crop in Guyana. "But Peter is determined to increase soybean production and to develop seed beans more suitable to Guyanese growing conditions. He encourages farmers in his village to grow soybeans

© Copyright Soyinfo Center 2013

and to come to see soyfoods as human food." Rosemary works to adapt traditional recipes to locally produced foods, vegetarian ingredients, and (sometimes) tofu. Peter and Rosemary are parents of nine children of their own plus two adopted children. Peter is East Indian, his ancestors having come from Madras, in southern India. Rosemary claims to be a mix of six of the main ethnic groups in Guyana.

Recipes are given for: Tofu pepperpot (Amerindian). Tofu curry (East Indian). Roast garlic tofu (Portuguese). Cutty-cutty soup (Creole African). A photo shows Nancy Kay working in a kitchen. Address: Vegetarian chef and proprietor, Small Planet Catering Service, Chicago, Illinois.

4966. Leviton, Richard. 1981. Making soymilk in America. *Soyfoods* 1(4):16-24. Winter.
• ***Summary:*** A review of soymilks available nationwide and a detailed analysis of Numu, New England Soy Dairy's problematic soymilk and the reasons for its failure in September 1980, at a cost of $40,000. Also discusses: Vitasoy (imported to California). President Soybean Drink (imported to California). Soy Fresh (made by Quong Hop in California since 1972). Soy Moo (made by Health Valley in California). Fresh Soybean Juice (made by Wy Ky of Los Angeles). Soymilk (made by Mighty Soy). Soybean Beverage (made by Hoven Foods, Seattle). Soy Juice (made by Redwood Valley Soyfoods Unlimited [Richard Rose]). Plain Soymilk (made by Island Spring, Vashon, Washington). Nutrisoya (made by Victor Food Products, Toronto, Canada). Soy-Ya! (made by Joy of Soy, Minneapolis, Minnesota). Soy Milk (made by White Wave of Boulder, Colorado). Soyalac and Soyagen (made by Loma Linda of Mt. Vernon, Ohio). In 1978 Nasoya introduced Vidasoy–prematurely; it was a disaster. A photo shows Stephen Yu holding a bottle of Victor Foods' Nutrisoya. Address: Colrain, Massachusetts.

4967. Leviton, Richard. 1981. Putting tofu in the lunch boxes of America: A report on serious soyfoods marketing. *Soyfoods* 1(4):54-61. Winter.
• ***Summary:*** About New England Soy Dairy, Timothy Metzger and Dannon Yogurt, Larry Needleman and Bean Machines, Thelma Dalman (Food Service Director for Santa Cruz city school system), Al Jacobson (The Wizard of Foods, "a tidy, bustling, elfin, walking idea man") and his Garden of Eatin', Paul Duchesne and Wildwood Natural Foods, Steve Demos and White Wave. A photo shows Victor Food Products on sale in Canada: VFP Tofu, and VFP Nutrisoya soymilk.

A sidebar by Timothy Metzger, gives an interesting history of marketing dairy yogurt in America. Dannon introduced its yogurt to the U.S. some 38 years ago (i.e. about 1943). Concerning Wildwood (p. 61): "In Fairfax, just over the hills from the Golden Gate Bridge and San Francisco, Paul Duchesne's Wildwood Natural Foods appears to fulfill the dreams of many soyfoods proprietors by combining both light tofu manufacture with light sandwich production in a clean, efficient, and industrious little shop. Mr. Duchesne designed his shop as a tofu showcase with broad wall-to-wall front windows so that passers-by may glimpse tofu production during the days. Wildwood produces a line of eight packaged vegetarian sandwiches including *Brown Rice and Tofu Sandwich* (with vegetables in a whole wheat bun), *Tofu Vegetable Salad, Two Beans in a Bun, Carrot-Raisin Salad, Marinated Bean Salad,* and *Beet Salad.* While they enjoy the luxury of a delivery van for San Francisco accounts, Mr. Duchesne impressed upon me the fun of using a bicycle that pulls a small flat trailer for on-the-street sales in Fairfax on those endless California summer days when folks are out relaxing on their skateboards and zipping down the street on roller skates and sailboats crisscross Sausalito Bay." Address: Colrain, Massachusetts.

4968. Leviton, Richard. 1981. With spoon in hand: A survey of soymilk ice creams. *Soyfoods* 1(4):62-64. Winter.
• ***Summary:*** Soymilk ice creams are on the rise in America. Discusses: Ice Bean (made by Farm Foods in San Francisco, but removed from the market in early 1980). Jolly Licks Ice-C-Bean (developed and marketed by Mark Brawerman's Jolly Licks of San Francisco). Soy Freeze (made by Island Spring of Vashon, Washington). Soy Dream (formerly named Ice Dream Frozen Dessert, made by Quong Hop & Co. in South San Francisco). Soy Dream (developed and marketed by Al Jacobsen's Garden of Eatin' in Los Angeles). Polar Bean (made by White Wave Soyfoods of Boulder, Colorado). Soy Dream (made by Joy of Soy in Minneapolis, Minnesota). Sunflower Frozen Desserts (made by Susan Gershuny and Kirk Meyer of Tivoli, New York). Soy Softee (made by Cindy and Steve Hassell of The Granary in Northampton, Massachusetts, and sold from a soft serve machine in their retail store).

For most products, the flavors and ingredients are given. Photos show: Cindy Hassell of the Granary in Massachusetts holding up a cone filled with her Soy Softee. Many pints of Ice Dream. Mark Brawerman of Jolly Licks. Address: Colrain, Massachusetts.

4969. Leviton, Richard. 1981. Tofu plant profiles: Soycrafters on the Island [Luke and Suni Lukoskie of Island Spring on Vashon Island, near Seattle, Washington]. *Soyfoods* 1(4):42-44. Winter.
• ***Summary:*** "From the back step of Island Spring's soyfoods plant on Vashon Island near Seattle, Washington, when you take a moment's break from making tofu and look out over the orchard and small plane airstrip, you enjoy a stunning view (when the sky is clear) of towering, snowcapped Mt. Rainier, rising 14,000 feet above sea level some 120 miles to the south. Island Spring, Inc., founded in 1977 by Luke Lukoskie and Suni Kim, his wife, shares space in a broad, squat building with Wax Cannery, a small-scale orchardist

© Copyright Soyinfo Center 2013

and fruit juice bottling company that constructed the Island Spring production space to their specifications. Outside the tofu plant, there's a miscellany of second-hand steam kettles and bulk holding tanks and Army surplus discards, that Mr. Lukoskie was quick to scrounge up and rejuvenate for his production needs.

"The Island Spring plant is tightly laid out with five long aisles of equipment, workspace, and production supplies, flanked by an overhead loft that runs along the back wall and houses dry materials, coagulants, labels, and boxes. Immediately outside the shop, a metal silo stores 50,000 pounds of dry bulk soybeans which are augered, when needed, into the shop for soaking in either steam kettles on wheels or in stainless steel twin compartment moveable tanks. The soaked beans are then scaled up in measures (the batch size is 140 pounds of beans and 30 gallons of water) on a large industrial scale wrapped in plastic against the ubiquitous moisture, placed in polyethylene tubs, and hoisted to the floor of their five-foot raised platform. The worker mounts the platform to dump the hydrated beans into the hopper of their soybean mill (a J.C. Ford Master wet corn grinder, which they bought for $2,850 in 1976; 548 Monterey Pass Road, Monterey Park, CA).

"The worker tends two adjacent 60-gallon steam kettles that receive (alternately) the ground soybean puree from the mill; the foam is sprayed down with cold water, and when the cooking is finished, the slurry is pumped into their home-made, hand-hydraulic soymilk press. After extraction, the soymilk is pumped into one of three steam kettles that serve as curding barrels. Each barrel, which has a 120-pound capacity, produces three 40-pound batches of tofu curds, or enough for three forming boxes. The soymilk is coagulated using either nigari or calcium sulfate. The curds are then ladled into the three forming boxes, most of the whey is drained off before ladling, and buckets filled with water are hoisted on top of the lids for weight. The finished tofu is sliced on the lid which floats in the water in the cooling tank; it's sliced according to an imprinted grid that forms a cutting pattern on the tofu during pressing. The cooling tank, which is 25 feet long and was purchased for only $300, holds 1,800 pounds of tofu, has circulating cold water, and freon coils for chilling the water (not presently used). Metal screens on four-inch risers are set on the tank bottom to facilitate packing and to prevent the tofu from making contact with the tank bottom. Almost all of the tofu (silken and regular) is packaged in 16-ounce tubs, then packed in cardboard boxes and cooled until delivery. In late October the daily tofu production was 15 batches (1,800 pounds) requiring four people working 6½ hour shifts. Mr. Lukoskie reports that 70 percent of their tofu sales are to Washington supermarkets.

"Island Spring produces both regular and silken tofu (calcium sulfate-based, made every 10 days in 120-pound batches) for a weekly total of 10,000 pounds. One thousand pounds are converted into Delicious Steamed Tofu, fresh griddled slabs of tofu packed in a soy sauce, 480 pounds of Soyloaf, 210 quarts of Soyfreeze [soy ice cream] (described in With Spoon in Hand, this issue), nine gallons of soymilk daily, and some 700 pounds of soy tempeh every week.

"Let's look briefly at the Island Spring tempeh process. For tempeh, the daily batch size is 80 pounds of dry soybeans that produces 260 eight-ounce units. They use a CeCoCo dehuller for bean dehulling, an item they purchased second-hand in 1976 for less than $1,000 (purchased originally in Japan in 1966); this removes most of the hulls and the rest are skimmed off when the beans are boiled. The dehulled beans are kept at a racing boil for 30 minutes in a portable steam kettle, followed by spin-drying in the centrifuge. This requires three or four loads to get the beans sufficiently dry. This stage is slow as each load handles only 25 pounds of beans.

"The inoculated beans are packed in shallow tofu tubs which have no bottom aeration or drainage; therefore excess moisture in the beans condenses on the top lid and "rains" down on the fermenting soybeans (rather than escaping as steam), sometimes causing spoilage or retardation of the Rhizopus. The beans and inoculant are blended thoroughly in a Leland rotary mixer and vinegar is added; then the inoculated beans are scooped out and placed in eight-ounce tubs to be stacked on trays on moveable bakery racks. The tubs are heat-sealed with film and holes are pricked in the film with a special nail punch. This punch has been sterilized for one hour in a special Sterilizing Hood that purifies and filters air with fans and ultraviolet light; the hood is also used as a sterile workspace for tempeh starter production. The tempeh is incubated in a 6 foot x 6 foot incubator at 85ºF for 12 to 18 hours. For the last step, they apply 'crack-and-peel' tempeh labels over the pin-pricked film, and refrigerate until delivery.

"As a soy plant, Island Spring is a model to emulate, impressive for its efficiency, economy and scale, thrift, ingenuity, and product wholesomeness. Specifically, here are 14 points of commendation: (1) their bulk soybean storage and augering system, one of only a few such systems in the country; (2) the innovative use of steam kettles and the concept of 'kettles on wheels' which saves space; (3) the efficient but inexpensive dehuller and wet grinder, both not commonly known; (4) the trim production floor layout designed for compartmentalization of products, high-volume production, and efficiency; (5) the large cooling tank with inside raised mesh and freon coils' that was still inexpensive; (6) the use of removable steam injection hoses for the 'kettles on wheels'; (7) the marvelous steaming bell that is lowered over the racks of Soyloaf to the floor with a steam hose injected in the side, then hoisted up out of the way when not in use;

"(8) iodine dip buckets for hand disinfecting, soaking tanks for production cloths, and the general high level of sanitation awareness; (9) the Sterilizing Hood used for

© Copyright Soyinfo Center 2013

tempeh starter production and purification of the nail punch; (10) the use of shallow broad sinks at the curding barrel stations for utensils used in coagulation; (11) the electric insect grill suspended from the ceiling; (12) the simple pumping system that moves the puree from the grinder to cooker, slurry from cooker to press, and soymilk from press to curding barrels; (13) the use of both nigari and calcium sulfate, unusual among Western shops; (14) their unique batch-piecework payment schedule that enables some production workers to earn over $7 an hour, including a health plan and flexible schedule, making Island Spring workers just about the highest paid soycrafters in the country.

"Island Spring has not only mastered the demands of engineering a smooth production system with low-technology, low-expense solutions, they have also introduced North America's pioneer Soycrafters Apprenticeship Program, an invaluable service where soycrafters are trained for three weeks in all aspects of soyfoods production and business management. Apprenticeship Program Director Steven Sloan reports they receive 50 inquiries a month, that they have graduated 15 students already, and that several of them have since inaugurated their own soy plants in places like Utah and Mexico. Other innovations continue. The tempeh makers are experimenting with producing preformed tempeh burgers by incubating the tempeh in round petri dishes; already they are selling 75 four-ounce patties weekly. To streamline tofu production, Mr. Lukoskie will install a new Okita three-compartment cooker and a Brown-Sweco soymilk extraction unit; and to simplify forming box tofu pressing, he will construct a series of overhead hydraulic beam presses with cement weights. With this new system he expects to increase his production capacity per hour by 25 percent. In addition, Island Spring is the first shop in America to install Bean Machine's brand new BMI Disintegrator for soybean grinding.

"As for new products, Younghee Kim, Suni Kim's sister, is developing a commercial *kim che* [*kimchi, kim chee, kimchee*] (fermented Chinese cabbage, very popular among Koreans) for the Western, rather than Oriental (which has suppliers) market in Seattle. Their label describes *kim che* as 'a spicy Korean pickled condiment in a piquant sauce,' and includes, in one-pint jars, 'napa cabbage, green onions, garlic, ginger, red pepper, water, salt.' *Kim che* contains no preservatives with a shelf life of at least 50 days, and requires refrigeration after opening."

Photos show: (1) Emptying hot okara at Island Spring. (2) Suni Kim Lukoskie. (3-4) Two views of the inside of the plant. (5) Laminar sterilizing hood for tempeh-starter. Address: Colrain, Massachusetts.

4970. Leviton, Richard. 1981. Small scale commercial soybean farming. Colrain, Massachusetts. 15 p. Unpublished manuscript.
• ***Summary:*** The New England Soy Dairy is contracting with local farmers to grow soybeans in Massachusetts. Address: 100 Heath Rd., Colrain, Massachusetts 01340.

4971. Leviton, Richard. 1981. Tofu plant profiles: This is as far as our statement goes [Ray Nagai and Gary Sato of Traditional Tofu in Oakland, California]. *Soyfoods* 1(4):44. Winter.
• ***Summary:*** Traditional Tofu produces 6 to 7 tons of tofu a week in the form of 22-ounce cakes; this requires three people working 4 days a week. Of this tofu, 80% is sold packaged in water-filled trays for $0.47 wholesale. Bulk tofu is kept chilled with the abundant supply of ice cubes made every minute by their large ice-making machine. Photos show: Ray Nagai and Gary Sato in their tofu-making clothes (p. 44). Cleaning the equipment at Traditional Tofu (p. 45). Address: Colrain, Massachusetts.

4972. Leviton, Richard. 1981. Tofu plant profiles: Competing in the Diho Market [Maung Myint and Mrs. Jin Yee Lee of Mighty Soy in Los Angeles, California]. *Soyfoods* 1(4):46. Winter.
• ***Summary:*** Mighty Soy opened in August 1980. The two owners employ three workers. Together each day they produce 700 pounds of tofu (both silken and firm), 500 pints of soymilk, and 100 x 14-ounce containers of Soybean Gelatin Dessert (a pudding made by adding gelatin to hot soymilk). The prestigious Diho Market is "an Oriental supermarket with the largest section of tofu, soymilk, tofu pouches, and soy products I've ever seen in a store." The tofu arrives here at $0.42 a pound wholesale and the competition is fierce among companies like Hinode, Wy Ky, American Foods, and Mighty Soy. Photos show: Maung Myint. His hydraulic forming box presses. Address: Colrain, Massachusetts.

4973. **Product Name:** Tofu Spread [Original], and Sesame Tofu: Spread and Dip.
Manufacturer's Name: Natural Alternatives.
Manufacturer's Address: Alexandria, Virginia.
Date of Introduction: 1981. February.
Ingredients: Sesame (7/92): Organic tofu, tahini, vegetables, nutritional yeast, sesame seeds, tamari sauce, spices, salt.
Wt/Vol., Packaging, Price: 8 oz. plastic tub. Retails for $2.25 (7/92, Maryland).
How Stored: Refrigerated.
New Product–Documentation: Product with Label purchased at Beautiful Day Trading Co., College Park, Maryland. 1992. July. Label is 3 inch diameter. Green on white. Illustration of 4 beans holding hands and dancing.

Talk with Robert Ashton, founder and owner of Natural Alternatives / Promart. 1992. Sept. 14. He started this company (sort of as a hobby) out of his home kitchen in 1981 in Alexandria, Virginia. His first product was Tofu

© Copyright Soyinfo Center 2013

Spread (Original flavor, introduced in about Feb. 1981), followed by Sesame Tofu Spread (June 1981). He has never made tofu; he first purchased it from a company in Maryland named something like Natural, Inc., owned by a Caucasian American. In about Sept. 1985 the company moved to its present location at 721 T St., N.W., Washington, DC 20001. Phone: 202-462-8415. He now purchases his tofu from Sam Sung. His company now officially uses the name Promart, since they learned that a vitamin company on the West Coast owns the name Natural Alternatives. The Sesame Tofu Spread is presently his best-selling product. A similar product is made by Michelle's in Philadelphia. The company also makes Hummus and Black Bean something.

4974. **Product Name:** Tofu Cream Pie (Tofu Cheesecake) [Strawberry, Carob, or Mocha].
Manufacturer's Name: Redwood Valley Soyfoods Unlimited.
Manufacturer's Address: P.O. Box 371, Redwood Valley, CA 94570.
Date of Introduction: 1981. February.
New Product–Documentation: Letter from Richard Rose. 1987. Aug. 29. 14 oz.

4975. **Product Name:** Tofu Salad Dressings [Thousand Island, Green Goddess, or Herb].
Manufacturer's Name: Redwood Valley Soyfoods Unlimited.
Manufacturer's Address: P.O. Box 371, Redwood Valley, CA 94570.
Date of Introduction: 1981. February.
New Product–Documentation: Letter from Richard Rose. 1987. Aug. 29. 16 oz.

4976. **Product Name:** Tofunofish Salad (Vegetarian Tuna Salad).
Manufacturer's Name: Redwood Valley Soyfoods Unlimited.

New Product–Documentation: Letter from Richard Rose. 1987. Aug. 29. 16 oz.

4977. **Product Name:** Tofu Mayo (Eggless Mayonnaise).
Manufacturer's Name: Redwood Valley Soyfoods Unlimited.
Manufacturer's Address: P.O. Box 371, Redwood Valley, CA 94570.
Date of Introduction: 1981. February.
New Product–Documentation: Letter from Richard Rose. 1987. Aug. 29. 16 oz.

4978. Ridenour, Jeremiah. 1981. The dead refrigerator transformation [into a tempeh incubator]. *Soyfoods* 1(4):47-48. Winter.
• ***Summary:*** Jeremiah transformed a "dead" refrigerator into a tempeh incubator. Details of the transformation (including window, thermostat, fan, and placement of racks) are given. For about $35 he was able to achieve a capacity of 25 to 35 lb of tempeh every 24 hours, or 175-245 lb/week. Address: Monterey Bay Soyfoods, 335 Pennsylvania Ave., Santa Cruz, California 95062. Phone: 408-423-2256.

4979. Shurtleff, William. 1981. Dr. Harry Miller: Taking soymilk around the world. *Soyfoods* 1(4):28-36. Winter.
• ***Summary:*** Contents: Introduction. Growing up (1879-1902): Birth, early contact with Dr. J.H. Kellogg, marriage. Early years in China (1903-1911). Washington, DC (1912-1925). Pioneering soymilk in China (1925-1939): Research, development of plant, destruction of plant 13 Aug. 1937, U.S. patent, No. 2,078,962 for soymilk process and equipment, work before return to U.S. Introducing soyfoods to America (1939-1949): In Mt. Vernon, new products, work with AMA, American Soybean Assoc. speaker and lifetime member 1958, contact with K.S. Lo and Vitasoy. Research and work around the world (1949-1977): Quick visit to Shanghai, death of second wife, sale of International Nutrition Foundation, Taiwan work, Indonesian plant, Trinidad, Libya, Japan, old age and relationship with William Shurtleff, the "Great Man." Contains 5 photos, and a sidebar titled "Early History of Soymilk."

Among the many people who pioneered in bringing soyfoods to America and to the West, two men of great vision, dedication, and perseverance deserve special mention: Dr. Harry W. Miller and William J. Morse. Dr. Miller, the well-known 'China Doctor'(after his biography by that title), was a world-famous missionary doctor and surgeon, and founder of more than 15 Seventh-day Adventist hospitals around the world. He was one of those unique individuals who was both a dreamer and a doer, and who inspired almost everyone who knew him.

"Like W.J. Morse, he considered it his personal 'responsibility to awaken the West to the wonders of the soybean and to promote its use as food. (But where Morse was interested in soybean agronomy, livestock feeding, and food, Miller was interested only in food uses.) Dr. Miller can also be considered the founder of the modern soymilk renaissance in Asia. The development and popularization of soyfoods, and especially soymilk, was his lifelong hobby and despite his other numerous and demanding careers, he never lacked the time, over a span of almost 75 years, to continue his ongoing research and work in this new field that he loved so well.

"Growing Up (1879-1902): The first of five children of Amanda Ehlers and John Oliver Miller, Harry was born in a log cabin on a farm in the small town of Ludlow Falls, Ohio (just north of Dayton) on 2 July 1879. His father was

© Copyright Soyinfo Center 2013

a school teacher. He later wrote that he delighted in working on the family farm but found it 'disgusting' to have to kill and eat the animals he had raised. When he was 12, Harry's parents became Seventh-day Adventists. Two years later, after much study, at the annual camp meeting, he and a friend decided to be baptized and become Adventist church members.

"At age 15 Harry entered secondary school at the Adventist-run Mt. Vernon Academy in Mt. Vernon, Ohio. He loved the strict, puritan atmosphere, the vegetarian diet, and the teachings of the church. In 1898, at age 19, he enrolled in medical school at the newly opened, Adventist-run American Medical Missionary College in Battle Creek, Michigan, which was associated with Dr. John Harvey Kellogg's Battle Creek Sanitarium (founded in 1866), the largest and most progressive medical institution of its kind in America at that time, and the birthplace of modern dietetics. Opposing the popular cures of the day (drugs, bleeding, etc.), the sanitarium recommended diet (especially a simple grain-based vegetarian diet), exercise, hydrotherapy and good mental health as the foundations of healthful living and natural healing. These teachings had a lifelong effect on Miller.

"Working to pay his own tuition, room, and board, Miller led guided tours through the sanitarium and food factory, which forced him to learn more about the various foods (America's first meat analogs and breakfast cereals) and how they were made. Miller was deeply influenced by the personality and teachings of Dr. J.H. Kellogg, who personally taught a number of the classes Miller attended, treated him like a son, and helped put him through college. One of America's great pioneers of both nutrition and of soyfoods, Kellogg stressed to the small class the importance of preventive medicine, nutrition, and diet. He strongly opposed the use of alcohol, tobacco, caffeine, and narcotics. Miller later noted that almost all the students in the small class lived past the age of 90; Kellogg lived to age 91, Miller to 97½ and one classmate to 101.

"Miller graduated in 1902 and was married to a classmate-doctor, Maude Thompson, the same year. During an internship autopsy, Dr. Miller cut his finger badly and suddenly contracted systemic blastomycosis, an infection considered at the time to be fatal. With deep faith he prayed to God, promising that if he were to be healed, he would go anywhere in the Lord's service. To the astonishment of his doctors, Miller was miraculously healed. This greatly deepened his faith. Shortly thereafter a call came from the Adventist church for a missionary doctor in China. Miller accepted the challenge. For the rest of his life he prayed for his patients before all operations (minor or major), and, according to others, apparently his great faith was rewarded by their recovery.

"Early Years in China (1903-1911): In October 1903, Dr. Miller and Maude, together with another physician couple, sailed for China, stopping briefly in Japan. In Kobe, at the home of fellow Adventists, Myrtle Lockwood first introduced Miller to soyfoods serving an entree called Tofu Loaf, with which Miller was particularly impressed. In China the couple went deep into the interior, near the center of Honan Province, where they found great poverty and malnutrition. They both learned Chinese, dressed like the local people, and even adopted the hair style of a long queue and shaved pate. They also ate Chinese foods, and soon Miller was visiting local tofu shops, learning about and sampling tofu, yuba, curds, soymilk, and the like. He found that tofu was much more widely consumed than soymilk, although the latter was quite widely used as a spicy hot breakfast soup and a warm, sweetened beverage. Dr. Miller later said (1961) that many Chinese and other East Asians told him that they did not drink much soymilk since they believed it caused them intestinal disturbances, which tofu did not. Perhaps this was why soymilk was not generally fed to infants-and children.

"In 1905, Dr. Miller's beloved wife died suddenly of an unknown disease. He was 26. 0ut of his deep sadness grew an even deeper commitment to help the impoverished and suffering millions of China. After a brief return to America two years later, where he married Marie Iverson, Miller returned to Shanghai. Two daughters were born in 1908 and 1910. Then Dr. Miller contracted a severe unknown disease and was forced to return to America in 1911.

"Washington, D.C. (1912-1925): Miller eventually managed to heal himself of what he later learned was a vitamin deficiency illness called sprue. During recovery he taught the Bible at Mt. Vernon Academy, his former alma mater and in 1912 his first son. Harry Willis, Jr., was born. Soon he was called to the position of medical superintendent and surgeon of the Adventist-run Washington Sanitarium and Hospital, which he developed into a Mecca for congressional leaders of the day. He became consulting physician to three U.S. presidents. In Washington he pioneered new techniques of thyroid goiter surgery, which lowered fatalities from 50 percent to about one percent. He eventually performed over 6,000 goiter surgeries around the world. In Washington he also met Dr. W.J. Morse and Dr. J.A. LeClerc, both soy pioneers from the USDA. He later wrote that these men filled him with 'inspiration, enthusiasm, and information,' and both later made frequent visits to Miller's soymilk plant in Ohio. In 1915 a fourth child, Clarence, was born.

"Prior to 1917 the Sanitarium had used a lot of dairy products on its vegetarian menus, but in that year, with World War I under way, all milk supplies from the local dairy were requisitioned by the Walter Reed Military Hospital. The sanitarium bought its own herd, but the problems that Miller found with contamination, animal disease (tuberculosis), and the like, convinced him of the need to develop a good alternative to dairy milk. In the small food plant connected with the hospital, where several soyfoods were already

© Copyright Soyinfo Center 2013

being produced for use in the lacto-vegetarian diet, Miller began a few basic soymilk experiments in 1925." Continued. Address: Lafayette, California.

• ***Summary:*** Continued. "Pioneering Soymilk in China (1925-1939): In 1925 Miller accepted the church's invitation to return to Shanghai to develop a network of Adventist health care facilities, the first of which was the Shanghai Sanitarium and Hospital, which opened January 1, 1928, with Dr. Miller as medical director. Deeply touched by the high infant mortality rate caused by malnutrition, Dr. Miller began again in 1926 to turn his attention to soymilk, working on it steadily in his spare time at a small food plant located behind the hospital building. A growing number of orphaned infants began to appear at the hospital. Their only hope of finding food was to find a wet nurse or to be fed cow's milk, which was very expensive in China and which not all infants tolerated well.

"Dr. Miller was determined to develop a soymilk that had good flavor and digestibility, could be formulated to nutritional equivalency to mother's milk, was low in cost, and had a good storage life. Preparing his soymilk at the small soy plant in the typical Chinese way, with cold extraction of the soymilk from the okara, followed by cooking, he began to study ways to remove the beany flavor and make the soymilk more digestible.

"On his medical travels in other parts of China, and in Korea and Japan, he visited tofu shops and studied their methods. He believed that the beany flavor resulted from natural oils in the soybean; perhaps if the soymilk were spray dried and then reformulated with fresh soy oil, the flavor would improve.

"In the early 1930s, returning to America on furlough, he purchased the necessary equipment for a small soy dairy and had it shipped to China; a motorized stone mill, an American extractor, and a small homogenizer. Soon he was making improved formulated soymilk for the babies, patients, and staff at the Shanghai Sanitarium. The Chinese, too, liked the flavor. Some friends cajoled that it was 'undignified for a talented surgeon to be always playing around with beans.' Miller was undaunted, yet the beany flavor persisted.

"One day, in the mid 1930s, the breakthrough came as he was standing in the kitchen of the compound working with slurry from a tofu maker. He later wrote: 'I heard a divine voice behind me that said "why don't you cook it longer with live steam?" No one had ever thought of that before. Soon the staff and patients noticed the improved flavor and digestibility, and he added some soy oil or peanut oil during homogenization to make it even better. With new enthusiasm he began more baby feeding experiments. Soymilk was added to what was called the sanitarium's 'Universal Diet,' which also included whole wheat bread and half polished rice, plus other soyfoods. During a trip to the Philippines at this time he learned from refiners of coconut oil that steam distillation and flash pasteurization improved flavor of foods containing fats by driving off volatile oils and gases.

"So promising was the new product that Miller began to move forward on three fronts: controlled feeding studies on infants, establishment of a commercial soy, dairy, and application for a U.S. patent. In 1932 Dr. Miller had established the Vetose Nutritional Laboratory for furtherance of his research. For two years (1936-37) he fed formulated soymilk to several hundred small children at the Shanghai Clinic, running control tests with fresh cow's milk and various types of American and European prepared baby foods. The study turned out well and the results were published in the April 1936 issue of the prestigious *Chinese Medical Journal*, an English-language publication read widely in the U.S. and China. Here it was officially noted that babies could be nourished from birth fully as well with soymilk as with animal milks. This led to increased interest in the product. Dr. Miller later wrote: 'I regarded that work as of far greater importance than the building up of the sanitarium because it had to do with the preservation of thousands of lives that otherwise would be lost if they did not have a proper substitute for mother's breast milk, since cow' milk is beyond the economic level of the Chinese people and almost all Oriental races.' In later years follow-up infant feeding studies were done by other researchers using Dr. Miller's soymilk at the Indigent Hospital in the Philippines, at Tokyo University, and at Ohio State University at the Children's Hospital in Columbus, Ohio.

"In January 1936 Dr. Miller and his oldest son, Willis (who did much of the plant design and equipment construction and was the production manager), opened a full-scale soy dairy, the first of its kind in the world, on Pingliang Road in Shanghai, not far from the Shanghai clinic. The milk was cooked with live steam in open-top kettles. Soon a fresh liquid beverage, called Vetose Soya Milk, was available in natural, chocolate, and acidophilus flavors, in half-pint and quart bottles. The tangy acidophilus, cultured, bottled (but not sterilized) and delivered chilled was a real favorite. Ice cream was sold to institutions and meat analogs were under development. Production skyrocketed, doubling each month. Eventually the entire city of Shanghai had a soymilk route with thousands of families receiving door to door deliveries (by three- wheel pedicycles with carts behind them) of 3,000 quarts and 4,000 half-pints a day. The commercial product sold for less than dairy milks and cost less than one-fourth as much to produce. The soymilk proved so successful that it was soon included in rations for the Chinese army. A system for making dehydrated soymilk was also set up using a locally made Grey Jensen spray dryer; the government planned to use the dehydrated soymilk in rations that were

© Copyright Soyinfo Center 2013

lighter in weight and could be stored longer.

"But the Japanese were now invading China and on August 13, 1937, just eight months after the plant opened, it was totally destroyed by Japanese crossfire and bombs. (At the same time another soy dairy was being run by Julean Arnold of California and Nellie Lee, a Chinese, both of the China Nutritional Aid Council, in Dr. Fu's Children's Hospital in Shanghai. They provided their soymilk to 25,000 to 37,000 refugee children a day and distributed millions of biscuits containing 40 percent okara from their soy dairy.) The Japanese occupied Shanghai in November, 1937, and soon thereafter the Shanghai Sanitarium was closed, to become a refugee center. The political situation forced Miller to leave Shanghai.

On May 4, 1937, while his Shanghai soy dairy was still in full swing, Dr. Miller was awarded U.S. Patent No. 2,078,962. He introduced methods for eliminating beany flavor, and for the use of a centrifuge, and an homogenizer. In the patent he referred to his product as 'vegetable milk;' however subsequent pressure from the powerful dairy industry and the USDA convinced him to Latinize the name to Soya-Lac. This term was first used in late 1939 for Miller's first American soymilk; the spelling had been changed to the present one-word Soyalac by September 1941.

"Miller's patented process was as follows: Soak 1 part by weight of soybeans in 8 parts of water at 60 to 75ºF for 6 to 10 hours. Grind well in a burr mill, adding a little water while grinding, to produce a mixture of 20 gallons water and 25 pounds ground beans. Ex- tract the soymilk through a fine cloth in a centrifuge at 2,500 RPM in either of two ways: (1) before heating; or (2) after bringing to a boil, stirring constantly, in a caldron and simmering briefly. Now to the simmering soymilk add 7 pounds each grain sugar (dextrose, maltose) and oil plus 3 ounces salt. Return to the boil and simmer, stirring constantly, for 30 to 60 minutes, or until the flavor changes from 'beany' to 'nutty.' Homogenize in a colloid mill or homogenizer to give a milk containing 3.5 to 4 percent protein and 5 percent fat. Cool, bottle, and refrigerate, or dehydrate.

"From late 1937, Dr. Miller was in Hankow-Wuhan establishing the Wuhan Sanitarium Hospital, where he also had a small soy dairy. Eventually over 15,000 Chinese refugees, escaping the Japanese troops in the north, filled the hospital compound. Finally in January 1939, as the war got too hot, Dr. Miller left China and returned to America in April of that year." Continued. Address: Lafayette, California.

• ***Summary:*** Continued. "Introducing Soyfoods to America: Undaunted, Dr. Miller returned to the U.S., convinced that soymilk was destined for worldwide acceptance. He decided to settle in Mt. Vernon, Ohio, where he had formerly gone to school and later taught. Dr. Miller's oldest son, Willis, had returned from Shanghai after the plant there had been destroyed and in 1938 started his own business, Miller's Soy Foods, in Utica, New York. Later that year it moved to Washington, DC, and was successfully marketing canned soymilk, okara spreads, and gluten cutlets.

"When Dr; Miller returned to the U.S. he suggested that he and his son go into business together; Willis liked the idea. Working with his son, Dr. Miller set up a company called the International Nutrition Foundation and then began searching for a suitable site in Mt. Vernon for their new soy dairy. Soon they found a 140-acre farm, containing a number of fine springs, located several miles outside of town–and for the remarkably low price of $7,000. Dr. Miller borrowed money from his brother Clarence to purchase this farm, then moved into the one large house on the property. Willis moved his soyfoods equipment from Washington, DC, into a garage near the house and got the plant running while the new buildings were being built. In April 1939 Clarence, Dr. Miller's second son, left his job in Washington, DC, and went to Mt. Vernon to help with the work; he later became accountant and treasurer of the soy business. To help raise money for the soymilk operation, Dr. Miller set up a private part time medical practice, with an office in one wing of the local hospital. Although he had very little money, Dr. Miller made plans for a 60- by 130-foot building, which he planned to enlarge later by adding a second story. A local high school had been recently torn down and he obtained all the bricks for free if he would haul them away. So each evening after his medical work was done, Dr. Miller and his sons trucked the bricks over to their land, cleaned them, and built the new soy dairy building. The surgeon's skilled hands were not too delicate for the rough work. The original building still stands strong; today it houses the office, lab, and pilot plant where Loma Linda still makes Soyalac.

"The new plant was completed in the fall of 1939 and the first products, canned Soya Lac (made in a pressure cooker and fortified with vitamins and minerals) and Soy-A-Malt were available late that year; powdered Soya Lac was first produced in 1940. But contrary to Miller's expectations, the American public was simply not ready for soymilk; acceptance was painfully slow. He decided that, in order to survive, he would have to develop new products, try to get his soymilk approved by the American Medical Association, and, in the meantime, sell his soymilk and related soyfoods to ready markets in East Asia.

"With his typical boundless energy, Dr. Miller, now 61 years old, started by setting up a plant near the soy dairy to can fresh green soybeans of the tasty, large-seeded or vegetable variety, which were grown on the farm. Partially because of the mushrooming growth of interest in soyfoods during World War II (due to the rationing and

© Copyright Soyinfo Center 2013

high prices of meat, milk, eggs, and cheese), these found a ready market and became his most profitable product, with 40,000 cases a year being sold at supermarkets and health food stores around the Midwest by 1943. The company's best selling product (which was not as profitable due to the high production costs) was Miller's Cutlets, a canned gluten entree. He began to develop other meat analogs similar to those developed initially by Dr. J.H. Kellogg at Battle Creek. He now perfected his acidophilus soymilk but sold it only to the local Mt. Vernon hospital since he did not want to kill the culture by sterilization required for long distance distribution. (In 1934, Kellogg had patented a similar acidophilus soymilk.) He made tofu from his basic soymilk and did extensive experiments, working with Ohio State University, in making a fermented tofu cheese; tofu was pressed as hard as possible, inoculated with Cheddar microorganisms, then allowed to ripen. The product was fairly good but often excess moisture in the tofu led to the growth of unfriendly bacteria. Next came a soymilk ice cream. Dr. Miller put all of his medical income into the soyfoods business and by 1940 the company was producing an exciting line of vegetarian soyfoods and meat substitutes, sold nationwide, mostly at health food stores. A pamphlet of that year lists the following, all sold under the brand name 'Miller's': Soya Lac, a liquid soymilk in natural and chocolate flavors sold in 13 ounce and 30 ounce cans. Soy-A-Malt, spray dried soymilk in natural and chocolate flavors in one-pound cans. Soya Sauce, produced in South China. Soya Curd, made by coagulating Soya Lac with lactic acid to make curds, then blending this with tomato puree, pimento, and soy sauce. Soya Loaf, made from a seasoned mixture of okara (soy pulp and gluten). Soya Spread, for sandwiches, also made from okara and sold in 16-ounce jars. Whole Soya Bean Flour, a naturally alkaline full-fat soy flour. Green Soya Beans, canned, vegetable type. Giant Soya Beans, cooked and canned mature vegetable-type soybeans, and Soya Beans with Tomato Sauce, edible soybeans canned with tomato puree and malt.

"Products added years later included Vegetable Chili Con Carne and Vegetable Chop Suey, both sold in 16-ounce jars with wheat gluten used in place of meat. In 1942 Kellogg's Battle Creek Food Company had a similar line of soyfoods: Soy Protose (a meat analog), Soy Gluten Wafers, canned Green Soybeans, Soy Flour, Soykee (soy coffee), and Soy Acidophilus. A few years later Dr. Miller developed Vege-Links, the world's first meatless wiener, made of seasoned okara and wheat gluten packed in a sausage casing, and Vege-Chee, a cheese analog made of curdled soymilk.

"During the years that he was developing new products, Dr. Miller made countless trips to the American Medical Association trying to convince them that the research he had done in China proved that his Soyalac was an acceptable substitute for dairy milk in feeding both infants and adults. But the AMA, apparently strongly influenced by the dairy industry, refused to grant any recognition to the product. Finally, after one fruitless trip, a member of the board took Dr. Miller aside and explained frankly that he would never get endorsement for his product unless he started to market his product specifically for that 7 percent of U.S. infants who are allergic to cow's milk, and avoided unfriendly comparisons with cow's milk. Dr. Miller was not too pleased, since he had hoped that soymilk would gradually replace cow's milk in the American diet. He felt that soymilk made much more efficient use of the world's land to feed people, and that it was a lower cost, more healthful product of comparable nutritional value. Yet he reluctantly accepted the AMA's advice and within a few months had their approval. Soyalac began to be prescribed by physicians for allergic infants and soon started to sell quite well." Continued. Address: Lafayette, California.

4982. Shurtleff, William. 1981. Dr. Harry Miller: Taking soymilk around the world (Continued–Document part IV). *Soyfoods* 1(4):28-36. Winter.

• ***Summary:*** Continued. "From 1939 to 1941 most of Miller's powdered soymilk and some of his other soyfoods were sold in the Philippines and China. However World War II cut off his business, so he began to promote his soymilk more vigorously in the U.S. not only as an allergy-free infant formula that would not clog the nipple, but as a healthful beverage that alkalized the bloodstream and was good for diabetics, postoperative patients, ulcer and colitis patients, and those with atherosclerosis.

"Before World War II started, Dr. Miller had set up a branch of his International Nutrition Laboratory and a Soymilk plant in the Philippines at 41 Nagtahan in Manila. It was run by Paul Sycip (pronounced SIS-up), a private Chinese Christian (but not Adventist) businessman, who had come briefly to Mt. Vernon to learn Miller's process, and buy equipment. Miller was in the Philippines helping to set up the plant when the Japanese attacked. During the war the Japanese stole all of the soymilk equipment but did not harm the building. In 1948 Mr. Sinclair Pinnick, a foreman at the Mt. Vernon plant since 1944, went to the Philippines, took new equipment, and got the plant reestablished. It produced regular soymilk, the first ever in the Philippines.

"The expanding success of Soyalac encouraged the growth of competing products but Dr. Miller didn't mind. A true evangelist, he was happy to see the message finally reaching the people.

"To fully appreciate Dr. Miller's great energy and diverse talents, we should note that during the early 1940's, as he developed, produced, and marketed his line of innovative new soyfoods, he also maintained an active medical practice, partially because the other two doctors at the hospital where he worked were called for military duty, and partially to support his work. Prior to World War II he would fly to the Philippines about once a year, do 12 to 15

© Copyright Soyinfo Center 2013

thyroid surgeries a day for two to three weeks, give half of his income to the hospital there, then return to America with the balance. In 1942 he and his brother bought the local hospital in Mt. Vernon where he worked; his son Clarence came in to manage, renovate, and expand it. Miller was the only surgeon in Knox County (population 35,000).

"At his Mt. Vernon soy dairy, Miller was always the first one to start the day's work. One day, while experimenting with a new formula, he cut off end of his finger in a food grinder. He calmly picked up the severed part, walked into his office, and sewed it back on.

"During the years he spent introducing soyfoods to America, Dr. Miller was one of the most active supporters of the American Soybean Association, a regular speaker at conventions and contributor of articles to the Soybean Digest. His first speech was "The Role of the Soybean in Human Nutrition" (1940) and his first article "Soybeans and the Orient" (1943), was followed by "Feeding the World with Soya" (1946), "Survey of Soy Foods in East Asia" (1948), and others. Then in September 1958 he was made an honorary member of the Association and awarded a gold medal.

"By the late 1930s the seeds that Dr. Miller had planted in East Asia began to sprout. It is interesting to note that most of the remarkable expansion of interest in and production of soymilk that has taken place throughout Asia during the last half of the twentieth century can trace its origins directly back to the work of Dr. Miller.

"While Dr. Miller was in Shanghai, an Adventist named Howard Hoover had come and learned the soymilk process, then started his own soy dairy and health food plant in a mission school in Canton in about 1938. This was the first offshoot.

"In 1940 Mr. K.S. Lo of Hong Kong asked Hoover if he would help him set up a plant. Hoover got approval from Miller, then went to Hong Kong and designed Lo's first plant. [Note: K.S. Lo recalls the origin of has company quite differently; we accept his version of the story]. By 1940 Lo's Hong Kong Milk Factory was making homogenized soymilk and selling it in natural and chocolate flavors, like dairy milk, in standard half-pint bottles sealed with a paper cap and hood. The soymilk was sweeter and a little thinner than Miller's and had more of the natural (so-called beany) flavor, which the Chinese prefer. By 1942, when the Pacific War broke out, Lo's company had gone broke. But in 1945, after the war, the company reopened as the Hong Kong Soya Bean Products Co., Ltd, and reintroduced their product, now called Vitasoy, not as a milk substitute, but as the world's first soymilk soft drink. By 1974 Vitasoy passed Coca Cola to become Hong Kong's best selling soft drink, with sales of 150 million bottles a year. In the meantime many other large soymilk plants had started up in Singapore, Malaysia, and Thailand.

"In 1948 the Chinese Quartermaster Department, with the help of Dr. Miller's son, Willis, set up the largest soymilk plant in the world in Shanghai, using a process patterned after that used in Ohio, to make spray-dried soymilk. Costing over $1,000,000, it had a capacity of 5 tons of dry soymilk every 12 hours. The dried soymilk would be mixed with puffed rice, pressed into wafers, and packed into cans, then opened in the field and soaked with hot water for rations. The plant was completed and ready for operation (Dr. Miller was at the dedication ceremony) just prior to the Communist takeover of Shanghai in 1949.

"Research and Work Around The World (1949-1977): In 1949, at age 70, Dr. Miller accepted the invitation of the Adventist church to take over the direction of the Shanghai Sanitarium and reestablish a soy dairy there. China was in the throes of revolutionary war and Shanghai was still held by the Nationalist forces. A daring pilot dropped Miller at the besieged Shanghai airport, hardly pausing to stop. But Shanghai fell to the Communists in May 1949; Miller was soon evacuated, and returned to America.

"In 1950 Dr. Miller's second wife died. Shortly thereafter he decided to sell his Mt. Vernon business. There was the increasing pressure of running a food plant and although sales were good ($1.25 million gross in 1950) profits were only $120,000 due to high taxes. He wanted to devote more of his time to research and medicine. Although offered a large sum of money by a private company outside the Adventist denomination, he decided to divide the company into two parts, the meat analogs and the soymilk plus related products, and sell these to Adventist-run firms. In June 1950 he sold the meat-analog part of his business (gluten meats, nut loaves, frankfurters, etc.) to Worthington Foods in Worthington, Ohio, a private company owned by Adventist laymen that had been making meat analogs since 1939. They bought the patents, recipes and formulas, equipment, technology, and good will that went with Miller's meat analog business. Most of these analogs contained no soy. Worthington kept the brand name "Miller's" for several years thereafter as they sold Miller's Cutlets, Miller's Burger, Miller's Stew, Vege-Links, and the like. Willis Miller worked with Worthington for some time after the sale.

"In early 1951, Dr. Miller sold the rest of his business at a very low price (book value) to Loma Linda Foods of Riverside, California. This sale included the Mt. Vernon land, buildings, equipment, technology, and recipes and formulas for soymilk, canned fresh green soybeans, Vege-Cheese (a canned tofu cottage cheese) and related products. All these products continued to be produced in Ohio. Loma Linda Foods, an integral part of the Seventh-day Adventist Church, was founded in 1906 and had run a plant in Riverside making meat analogs, soymilk, and other foods since 1936. Dr. Miller had always believed that the process for making soymilk was not something that he had originated; the key to it had been a gift to him from a higher power. Thus, he felt it was simply not his to sell. So

© Copyright Soyinfo Center 2013

he gave the process to the Adventist church but sold the rest of the business to Loma Linda Foods (they operate the Mt. Vernon plant to this day), and loaned them the money to buy it. They paid him in installments and he returned half of the money to them for them to set up laboratories and a pilot plant in their headquarters at 11503 Pierce Boulevard in Riverside (the town was then called Arlington). Here he established the International Nutrition Research Foundation, which he further endowed heavily with his own funds; 95 percent of its future research was on soyfoods. He bought a home nearby. For the three years following his wife's death he worked intensively on soyfoods research. In 1951 Loma Linda first introduced Soyagen, a lightly fortified soymilk for adults to match their Soyalac for babies. Miller did extensive work on further eliminating the beany flavor from soymilk using a vacuum pan and flash pasteurization. By 1958 his labs had developed new and improved soymilks, soy cream, improved acidophilus soymilk and ice cream, cottage cheese, a soy-cream cheese spread, cholesterol-free cheese, and a non-dairy margarine." Continued. Address: Lafayette, California.

4983. Shurtleff, William. 1981. Dr. Harry Miller: Taking soymilk around the world (Continued–Document part V). *Soyfoods* 1(4):28-36. Winter.

• ***Summary:*** Continued. "In 1953, at the age of 74, he married for a third time (his wife was about 35) and shortly thereafter was asked to establish an Adventist Sanitarium in Taipei, Taiwan. With it, of course, he started a soy dairy at a school, which supplied the school, the Sanitarium, and the surrounding community with soymilk daily. In 1956, when it came time for Miller to leave Taiwan, Generalissimo Chiang Kai-shek personally gave him China's highest award, the Blue Star of China, in appreciation for his tireless service to the people of China in saving the lives of thousands of infants with the use of soymilk and in establishing some twelve sanitarium-hospital clinics. At the time, the Generalissimo, who had been a former patient of Dr. Miller's, recalled how he had become so fond of the sanitarium's soymilk that he had once sent his private plane over 1,000 miles to Shanghai to replenish his supply.

"In 1954 the World Health Organization became interested in Miller's work with soymilk. His oldest son, H.W. (Bill) Miller supervised the construction of a joint FAO / UNICEF soymilk plant in Yogyakarta, Java, Indonesia, which opened in 1957 and produced about two tons a day of a spray-dried soymilk called Saridele.

"After filling in for other surgeons in Trinidad and Libya from 1956 to 1957, Miller went to Japan in 1957 to spend seven months as medical director and surgeon at the Tokyo Sanitarium-Hospital. He was now 79. Despite his busy medical routine, he found time to set up a small soymilk pilot plant in the hospital kitchen where they made soymilk, soy whipping cream, soy ice cream, and soy spread, which were served to the staff and patients. In cooperation with the Japanese Ministry of Health, he then developed the concept of helping existing small tofu producers to set up a soymilk operation right in their shops by adding on a boiler, pressure cooker, homogenizer, cooler, and bottler. The equipment could be installed for less than $2,000 and would enable each plant to produce 150 pounds of tofu and 200 gallons of soymilk a day using three trained workers. Miller personally helped at least one small rural tofu shop set up such a system; their soymilk was sold fresh and hot or cold and bottled for half the price of fresh dairy milk.

"Starting in about 1955 Dr. Miller began to recommend that the Adventist-run Japan Saniku School serve soymilk instead of cow's milk to the students; however the staff hesitated because of questions about its nutritional value and flavor. In 1957 two Japanese Adventists, Mr. Hidekazu Watanabe and Mr. Hanzo Ueda (who ran a tofu shop at the time) started making Japan's first soymilk on a small scale in Hachioji, Tokyo, bottling it in 180-ml bottles, and selling it locally. Mr. Watanabe later described the great value to them of Dr. Miller's ongoing technical, nutritional, and spiritual guidance.

"After some time, directors of the Saniku School visited the small soymilk plant, liked the soymilk flavor, and understood its nutritional value. In 1959 they bought similar equipment, set up a small plant in the school, and started to produce soymilk, which was bottled in 180-ml bottles and served to the students at every meal. In 1969 the Saniku School set up an independent food production company called College Health Foods (which later became today's Saniku Foods) and through it, with the help of Loma Linda Foods in America, began to produce Soyalac soymilk infant formula. That same year, the Luppy Soymilk Company started and went on to produce Japan's first widely popular commercial soymilk.

"By 1980 Japan's largest soymilk producers were Kibun Foods (33,000 pacs a day), Saniku Foods (23,000 pacs a day), Okazaki Marusan (23,000 pacs a day), and Mitsubishi Kasei (18,000 pacs a day), A typical pac is 200 ml (6.8 fluid ounces).

"Prior to 1960, a small soymilk plant similar to those established by Miller in Japan, was set up at the Adventist-run Mountain View College in Central Mindanao, Philippines. The college farm raised edible soybeans and the 700 students were served fresh soymilk each morning for breakfast and fresh tofu for lunch.

"In 1960 Dr. Miller again accepted the invitation of the Adventist church to start a new hospital, this time in Hong Kong. As always, it was accompanied by a little soymilk plant. By 1960 soy dairies had also been established in Hong Kong at the South China Union College and at an Adventist-run college in Bandung, Indonesia.

"Dr. Miller spent most of his time from 1960 to 1973 in East Asia. He practiced surgery until the age of 93. In 1961

© Copyright Soyinfo Center 2013

his biography *China Doctor* by Raymond S. Moore was published by Harper & Bros. In 1963 Dorothea Van Gundy Jones in *The Soybean Cookbook* wrote: 'Certainly Dr. Miller has done more than any other person to introduce soybeans and soybean products, especially the milk, to the population of this country.'

"In 1973 Dr. Miller formally retired from medical practice and returned to California, where he spent the last few years of his life doing the work he loved so much: soyfoods research. He lived about one mile from Loma Linda Foods in Riverside, and he walked to work each morning. He continued his experiments with tofu and soymilk, making improved acidophilus soymilk, tofu-based cheese, and cheese spreads. He made a good tofu-based Cheddar cheese but could not make it melt. His later years were not as productive as they might have been since, in old age, he had lost most of his sense of smell; when he would ask others how new products tasted, they would often tend to flatter him instead of giving an honest and objective response. Yet this work was still of real potential value.

"In 1972 the Southern Asia Division of the Adventist church asked Mr. Pinnick of Mt. Vernon to go to India to set up a soymilk plant at their Spicer Memorial College in Poona. In March 1973 Dr. Miller flew over from Hong Kong to help the operation get started. Pinnick writes: 'He would work all day with us at the plant (at age 94) then spend nearly-every evening speaking to some group on healthful living. There seemed to be no limit to his endurance.'

"Starting in 1975, while in Japan, I exchanged numerous letters with Dr. Miller. He typed each letter himself and was always full of questions about new developments in tofu and soymilk production in Japan. In 1976 he sponsored and hosted a program about tofu and soymilk that my wife and I did for several hundred members of the faculty and community of Loma Linda University, La Sierra campus. During the day of our visit he took us through his pilot plant and described his latest experiments making tofu-based fermented cheese spreads. He seemed extremely alert and well informed.

"Dr. Miller died on New Year's Day, 1977, at the age of 97, just as he was getting ready to go to his beloved church.

"Harry Miller was a shining example of what the Chinese call 'The Great Man.' He dedicated his life to the welfare of all beings, human and nonhuman. He chose a life of voluntary simplicity, finding his real joy in giving. Close associates estimate that, in professional fees alone, he turned over some $2.5 million to the hospitals, church, and nutritional work with which he was connected. Spiritual values were at the center of his life. Though world famous, he was the most humble of men; though very busy, he had time for each person who needed him. His vision was fifty years ahead of his time. He left an indelible impression on the world. Would that he could he here with us now to see the blossoming of his work in America and around the globe.

"The author wishes to give special thanks to Dr. Miller's two sons, Willis and Clarence, and to Glen Blix, plant manager at the Loma Linda Mt. Vernon plant, for extensive information provided in interviews and letters. For a bibliography of Dr. Miller's publications, send a SASE to *Soyfoods* magazine." Address: Lafayette, California.

• ***Summary:*** The members of the Young Farmers' Club of Kansalgamuwa, who do not eat meat, are learning to make tofu. This article describes the process and offers some tips.

4985. *Soyfoods.* 1981. Soyfoods showcase 1980 [Third Annual Soycrafters Association conference at the University of Illinois is a big success]. 1(4):6. Winter.
• ***Summary:*** The conference, titled *Soyfoods Showcase* under the direction of Richard Leviton, was convened at the University of Illinois at Urbana on 9-13 July 1980. Over 270 people attended, including representatives for 10 other nations, in addition to 15 Third World students already on campus for the INTSOY summer training program. Representatives of a number of large American food companies also attended, including Kraft, Beatrice Foods, General Foods, and General Nutrition.

"In addition to its rigorous intellectual format, *Soyfoods Showcase* featured 12 vegetarian-soyfoods meals prepared by Small Planet Catering of Chicago and Catering Plus of Champaign. Buffet meals included tofu lasagna, tofu spread in pita bread, tofu enchiladas, tofu 'egg salad' sandwiches, tempeh 'sloppy joes,' barbecued tofu in Chinese stir fry, miso paté, Indonesian gado-gado with tempeh, spinach tofu quiche, and tofu cheesecake." • ***Summary:*** Redwood Valley Soyfoods Unlimited recently opened their Real Food Tofu Shop and Cafe, a 14-seat restaurant at 8473 East Road, Redwood Valley, California 95470. The many menu items are listed. Address: P.O. Box 371, Redwood Valley, California 94570.

4987. *Soyfoods.* 1981. Giant tofu market: School lunches. 1(4):8-9. Winter.
• ***Summary:*** The federally-subsidized school lunch program serves an estimated 3,800 million meals annually. Thelma Dalman (director of Food Service for Santa Cruz city schools, a district that has experimented with tofu-based vegetarian meals for three years) and Richard Leviton (director of Soycrafters Association) went to Washington, DC, on 13-18 September 1980 to investigate the possibilities of having tofu "legalized" for school lunches. "The result was not only favorable but startling in significance." Dalman

© Copyright Soyinfo Center 2013

and Leviton met with numerous senators and representatives who were sympathetic to enlist their support. "Aides to these congressmen each expressed lively and informed interest in tofu and a willingness of their office to cooperate. Dalman and Leviton presented a two-hour program on tofu and public schools to 15 members of the Nutrition and Technical Services Division (NTSD), a regulation advisory group in the Food and Nutrition Service. A request was made for the USDA to grant interim permission to use tofu at 30% substitution for the meat requirement (2 oz. lean cooked meat) in the school meal pattern. For a lunch to meet the 'reimbursable meal pattern' its components must conform to a strict nutritional code, essentially based on meat protein. Textured Vegetable Protein (TVP) has been granted use in meals at 30% replacement... So the strategy was to bring in tofu on the shirttails of TVP. As it developed, we fared better than we had expected; the USDA, in fact, let us know they favored a higher equivalency rating for tofu than TVP and chose to regard tofu as a whole food rather than like TVP [which is considered a fortified, highly processed food].

"Henry Rodriguez, director of NTSD, stated: (1) Tofu may now be used as part of the reimbursable meal pattern based on section 210.H of the *National School Lunch Program...* (2) To obtain approval, individual school boards must apply to their Department of Education, Child and Nutrition Division, to request them to apply to USDA-FNS for permission to use tofu based on section 210.10.H. (3) Meanwhile FNS and SANA will draft a USDA *Specification* for tofu which will legalize and standardize tofu's use in school meals."

Richard Leviton made a second visit to Washington, DC on 24-27 Nov. 1980 to meet with the USDA again as well as with a handful of congressmen and the FDA.

4988. *Soyfoods.* 1981. Soyfoods in America: 1981 Soycrafters Conference. 1(4):7-8. Winter.
• ***Summary:*** The Fourth Annual Soycrafters Association Conference, *Soyfoods in America*, will be held at the Colorado State University, July 8-12, 1981. This promises to be the most exciting and thorough soyfoods meeting ever held." Highlights include: (1) A Tofu Cheesecake Bakeoff, for the best vegetarian cream pie made from tofu; (2) The "soycraft industry's first trade show, Soyfoods Expo–1981." The meeting is expected to attract at least 300 people for the 4 full days and several hundred additional visitors for the trade show.

5001. O'Conell, Jean. 1981. First cousins in Greenfield [Massachusetts]: Tempeh follows tofu to market. *Morning Union* (*The*) (*Springfield, Massachusetts*). March 18. p. 25-26.
• ***Summary:*** A few nights ago the New England Soy Dairy organized a dinner meeting in Greenfield for the members of the Northeast Chapter of the Institute of Food Technologists. The meal included cottage cheese made without milk and lasagna made without meat. "Fairly tasty, but hardly exciting." But the dinner menu wasn't the point. Rather the "event served to point out that soy is coming of age here in the Connecticut Valley." More people are including tofu in their cooking, and tofu is now available in the lunch program of the Springfield public schools. "Soy is a good, cheap source of protein and it's receiving more attention as people scramble to beat, or at least meet inflation."

A little tofu shop named Laughing Grasshopper opened in 1976 in Greenfield. It was the forerunner of the New England Soy Dairy which is now the third or fourth largest tofu maker in the USA. Eighteen months ago Michael Cohen, one of the four partners, left the Soy Dairy to establish his own soy business, the Tempeh Works, which is also located in Greenfield. Cohen's shop now produces an average of 4,000 lb/week of tempeh. Photos show: (1) Michael Cohen putting soybeans into a centrifugal extractor for removal of the water before adding tempeh culture. (2) Skat McPherson examining finished cakes of tempeh on a rack at the Tempeh Works.

"Another chapter in the soy story in the Connecticut Valley is expected to begin in the fall of this year with the opening of the South River Miso Company in Conway [Massachusetts]. Christian Elwell and his family are moving

© Copyright Soyinfo Center 2013

the company here from Ohio.

"Miso, even less known than tempeh, is a fermented soybean puree made with water and barley or rice. It has a long fermentation period and is used for such things as soup stock, according to Elwell who attended the Soy Dairy dinner in Greenfield.

"There are only three miso companies in the United States, one on the West Coast, one in North Carolina [American Miso Co.] and the one which is coming to Conway, it was noted by Richard Leviton at the Greenfield meeting." Leviton added that he and others in the soy industry are heartened that a few farmers in the Connecticut Valley are trying to grow soybeans, since the nearest source is now about 1,000 miles away. Contains a recipe for "Peanutty Soy," peanut butter extended with tofu, from Madeline Fox, marketing director and recipe developer at the New England Soy Dairy.

Note: This is the earliest document seen (Nov. 1999) that mentions the South River Miso Company–which began selling miso under its name in Oct. 1982. Address: Union Food and Fashion Editor.

5002. Sheridan, Margaret. 1981. A versatile cube of soy with Oriental origins. *Chicago Tribune.* March 19. p. N_A1 or S_A1, or W_A1 (2 p.).
• ***Summary:*** "It is pronounced *toe-foo* and it is not the name of a Bruce Lee movie. A soybean curd sometimes called soybean cheese, tofu looks like a cross between a spongy block of cream cheese and a hunk of ricotta." It has a bland taste; if eaten alone, it leaves a lot to be desired. But tofu is a food worth getting to know: it is inexpensive, nutritious, and versatile. High in protein, and low in saturated fat and cholesterol, a 12 ounce container costs about 98 cents. Although rich in calcium, iron, B vitamins, and vitamin E, an 8-ounce serving contains only 147 calories.

There are about 38,000 tofu shops in Japan, and it is made in the USA by more than 170 tofu shops and soy dairies. Discusses *The Book of Tofu,* by Shurtleff and Aoyagi. Shurtleff, a vegetarian, hopes to introduce soyfoods as a practical, low cost source of protein. Contains a recipe for Tofu yung. Address: Food editor.

5003. Yoshimura, Sam. 1981. Re: Reminiscences of work at Madison Foods. Letter to William Shurtleff at Soyfoods Center, March 19–in reply to inquiry. 3 p. Handwritten.
• ***Summary:*** Sam attended Madison College from 1937-1943, then worked for Madison Foods 1956-63. As far as he knows, no graduate of Madison College owns or presently operates a viable soy food plant.

Mr. H.J. Miller was supervisor for canned and cereal sections of the Madison plant when Sam was there. He was not related to Dr. Harry W. Miller.

Okara was used in the Madison Zoyburger exclusively. The product consisted of wheat gluten, okara, tomato paste and seasonings. It was a canned, meat loaf type of product.

Compro was a canned product made of wheat gluten, soy cheese [tofu] and seasonings. It was first distributed commercially in 1957.

Sam's Chicken was modified and called Chickettes. The product contained wheat gluten, soy protein, and seasonings. Address: 8200 Colonial Meadows, Westerville, Ohio 43081. Phone: 614-882-0625.

5004. Sheraton, Mimi. 1981. Restaurants: East side steak and side dishes of Japan. *New York Times.* March 20. p. C16.
• ***Summary:*** This is a review of the one-star Japanese restaurant Aikahana (at 1034 Second Ave. in New York City). Recommended dishes include "deep-fried bean curd with special sauce."

Aikahana "offers one of the most complete and interesting listings of the small side dishes that most Japanese restaurants reserve for their Japanese customers and rarely include on the English menus."

The writers favorite small side dishes include "squares of bean curd in ice water [hiya yakko], which made them as firm and delicate as fresh farm cheese; bean curd fried in a fresh brown sauce with shrimp;..."

5005. Hicks, Alastair. 1981. Re: History of the full-fat soy flour factory in Thailand. Letter to William Shurtleff at Soyfoods Center, March 25. 2 p. Typed, with signature on letterhead.
• ***Summary:*** "The full fat soy flour factory in Thailand commenced production of soyflour during commissioning trials which I ran in the week April 24-28, 1978, as food engineer to the project. The location is Mae Chan, a small village outside Chiang Rai in the far north of Thailand, near the Golden Triangle. The plant was initiated by the ASEAN Sub-Committee on Protein, whose chairman is Professor Amara Bhumiratana, Director of the Institute of Food Research and Product Development (IFRPD), Kasetsart University, Bangkok, Thailand.

"The king of Thailand, King Bhumibol Adulyadej, provided the land and buildings, as part of the Thai contribution to the project. One aim of the Royal Preserved Foods Project is to encourage Hill tribe farmers to grow crops other than opium poppies, in this case, nutritious soybeans, as part of an overall crop substitution program...

"The factory is able to make the following products: cleaned soybeans (up to 3 ton/hour); clean, cracked, debittered soybeans (a possible tempeh raw material); enzyme inactive full fat soyflour. The latter products can be produced at 1.1 tonne/hour. Enzyme active products could also be produced. Most of the full fat soyflour is utilized in the production of Kaset Infant food, a baby food produced at the I.F.R.P.D. in Bangkok. This product in turn is supplied to the hundreds of baby health centers throughout Thailand.

"For further information on these and other details, I

• ***Summary:*** All radio stations are divided into two types: Music and talk. Under talk: "Noon-1 P.M., WBAI: Natural Living. With Gary Null. 'Soyfoods in America.'" Note: Gary Null will be talking with William Shurtleff.

5007. Timmins, Tom. 1981. President's 1980 report to the corporation. New England Soy Dairy, Inc., 305 Wells St., Greenfield, Massachusetts 01301. 3 p. March 28. Unpublished manuscript.
• ***Summary:*** "1980 has been a milestone year for New England Soy Dairy, Inc. Our first major financing agreement was reached on May 9, 1980 with the Massachusetts Community Development Finance Corporation for $200,000 equity and debt financing. On July 23, 1980 we signed an agreement with the Massachusetts Business Development Corporation for an additional $150,000 debt financing. These moneys have allowed the company to improve dramatically in all departments.

"Our manufacturing operation has clearly benefitted from the financing. The Wells Street facility has nearly finished its transformation from machine shop to sanitary food processing plant. Tofu production efficiency has increased and the Soy Dairy continues to lead the industry in hygienic food production. We produce the finest tofu made in America.

"Sales grew 47% from 1979 to $1,026,000 for 1980, while tofu poundage sold increased 36% to 1,630,000 pounds. Many new programs were undertaken. The emphasis was on developing product awareness in New England. Opening loyal distribution channels has put the Soy Dairy in a strong position for major entry into the New England consumer market.

"As in any rapidly changing organization, our employees felt the stress of growth. A company-wide effort to address the personnel problems and difficulties has resulted in improved working conditions in the plant, reduced turnover among the workforce, shop benefits and wages competitive with other comparable businesses in the area, and consistently high quality produce.

"The ultimate gauge of company strength, our financial condition, has continued to improve. Our operating losses were reduced to less than 2% of sales with additional one-time expenses incurred by loan costs bringing total loss to a little over 2% of sales. This is an improvement from 1979 when losses were nearly 9% of sales. Internal accounting operations have been developed to provide managers with accurate and immediate information. The result has been improved decision making and quick feedback to help company leaders adjust their plans to real life situations.

"The Massachusetts CDFC investment brought with it several professional businesspeople to our board of directors. Their years of front-line experience and long-range views enhanced the quality of board discussions. These board members provided the company with valuable counsel that was otherwise unavailable.

"The management team has set high goals for the company in 1981. We intend to complete the installation of equipment to provide a 21-24 day shelf life for tofu. Productivity measured by pounds of tofu produced per labor hour will improve at least 10% by this fall. Through these positive changes, we will be able to further improve employee wages and benefits. The sales goal is a 35% increase in tofu sales, with a 40% increase in dollar volume to 1.4 million. Continued focus on the New England consumer market, opening the New York and Mid-Atlantic markets, and new product development for institutional sales will occupy our sales staff for the year. I foresee greater allocation of company resources to our marketing efforts with a corresponding improvement in efficiency of sales efforts. We will be selling for profitability while expanding the total tofu market through advertising. Profit goal for 1981 is $100,000.

"I look to 1981 as the year when New England Soy Dairy, Inc., enters a strong growth stage. With continued interest from the stockholders, the employees, and the board of directors, the Soy Dairy will accomplish its goals in a manner beneficial to all participants."

Note: New England Soy Dairy's production of tofu has increased steadily and quite dramatically, starting from zero in Jan. 1977 to 4,500 lb/week in Aug. 1977, to 14,200 lb/week in June 1978 to 20,000 lb/week in March 1979, to 26,000 lb/week in June 1980. Address: President, New England Soy Dairy, Inc..

• ***Summary:*** Linda took these color slides in early 1981 in Kyoto, Japan, at a small neighborhood tofu shop (whose name she does not remember) where she worked for a month. The shop was owned and operated by a husband and wife under the same roof as their home.

(1) A 60-kg sack of whole soybeans grown in Japan. (2) Soaked and drained whole soybeans in a woven bamboo colander, with dipper, shortly before grinding. (3) Tofu shop utensils: Metal caldron and hand turned screw press for pressing soymilk from okara. (4) Tofu shop utensils: Wooden curding vat (foreground), metal pressing box (rear), and nigari in earthenware vessel on floor. (5) Mixture of simmering soybean puree and water rising in the caldron, ready to be stirred down by bamboo defoamer rod / whisk resting in bowl of defoamer (*awakeshi*). (6) Steaming cooked soy puree being ladled by from caldron into pressing sack. (7) Soymilk pressed from okara in pressing sack runs into wooden curding barrel. A new batch of soybean puree is cooking in the background. Forming cloths line perforated forming box in foreground. (8) Soymilk pressed from okara runs through fine-mesh straining cloth into wooden curding barrel. (9) Wife wrings last of soymilk out of straining cloth into curding barrel. (10) Stirring nigari coagulant into hot soymilk in curding barrel. (11) Ladle of soymilk curds in ladle set in cloth-lined forming box. (12) Curds pressed to make tofu, ready to be cut into cakes. (13) Tofu cut into cakes next to cooling sink. Address: Resident Director of Practice House and Oral English Instructor, Kobe College, 4-1 Okadayama, Nishinomiya, Japan.

5011. Fenwick, Dorothy E.; Oakenfull, D.G. 1981. Saponin content of soya beans and some commercial soya bean products. *J. of the Science of Food and Agriculture* (*London*) 32(3):273-78. March. [23 ref]
• ***Summary:*** The saponin content for various soybean products, in grams per kg of dry weight, is as follows: whole soybeans 56, defatted soy flour 22-25, soya hulls 20, soy protein isolate (Promine D 3, GL-750 8, Maxten C 19, Maxten E 25), lecithin (Crown 53, Vitaplex 29), tofu 21. Some manufacturers use ethyl alcohol extraction to prepare soy protein concentrates; this process removes a substantial portion of the saponins. Address: CSIRO Div. of Food Research, P.O. Box 52, North Ryde, NSW 2113, Australia.

5012. Fukushima, D. 1981. Soy proteins for foods centering around soy sauce and tofu. *J. of the American Oil Chemists' Society* 58(3):346-54. March. [41 ref]
• ***Summary:*** Contents: Abstract. Introduction. Soy sauce varieties: Koikuchi, usukuchi, tamari, saishikomi, and shiro shoyu. Soy sauce manufacturing process (for each of the 5 types). Miso. Other fermented products: Tempeh and natto. Tofu and related products: Regular and silken tofu, dried-frozen tofu, deep-fried tofu. Fermented tofu (Sufu). Other soy products: Soy milk, fermented soy milk beverages, yuba.

This paper discusses traditional Oriental soy protein foods which are growing rapidly in popularity in the USA among non-Asian-Americans.

"Generally speaking, soy sauce is divided into two groups: fermented soy sauce and chemical soy sauce. Fermented soy sauce has a long history as a human food, whereas chemical soy sauce has a history of only several decades. In fermented soy sauce, the proteins and carbohydrates contained in the materials are hydrolyzed very slowly under mild conditions below 30ºC for over six months, whereas in chemical soy sauce they are hydrolyzed quickly by hydrochloric acid at 80ºC for 8-10 hours. Chemical hydrolysis is a cheap and rapid process, but during the hydrolysis, various secondary reactions occur and produce undesirable compounds, e.g. dark humins, furfurol, dimethyl sulfide, hydrogen sulfide, levulinic acid and formic acid, which are not present in fermented soy sauce. Furfurol, dimethyl sulfide and hydrogen sulfide, which have strong, bad odors in themselves, are derived from pentose, methionine, and sulfur-containing amino acids respectively. Furthermore, tryptophane, one of the nutritionally important amino acids, is destroyed almost completely. As shown in Figure 1 [two chromatograms], the main organic acid of fermented soy sauce is lactic acid, whereas the main organic acid of chemical soy sauce is formic acid. Levulinic acid, present in chemical soy sauce, does not exist naturally.

"To improve the odors of chemical soy sauce, semichemical soy sauce was devised. It is made by hydrolyzing raw soybeans with a lower concentration of hydrochloric acid (7-8%) as the first step, followed by fermenting the hydrolysate with osmophilic yeasts in the presence of wheat koji." In Japan, chemical soy sauce is not used as a soy sauce in itself, but as an extender for fermented soy sauce.

Table 1 gives the typical chemical composition (per 100 ml) of the five varieties of traditional soy sauce in Japan, including Bé [Baumé; a measure of the relative density of liquids], sodium (koikuchi is lowest at 17.6%, usukuchi is highest at 19.2%), total nitrogen (koikuchi has 1.55 gm, tamari has 2.55 gm or 65% more), formol nitrogen, reducing sugar, alcohol (koikuchi is 2.2%, by far the highest), pH (ranges from 4.6 to 4.8), and color.

A brief description of each of the five traditional varieties: (1) Koikuchi: This "dark-colored" shoyu is by

© Copyright Soyinfo Center 2013

far the most popular of the five types of fermented soy sauce in Japan, comprising 85% of the total. It is an all-purpose seasoning with a strong aroma, complex flavor, and deep, reddish-brown color. These characteristics are mainly derived from the use of equal amounts of wheat and soybeans in the koji; (2) Usukuchi [light-colored] shoyu is characterized by a lighter, red-brownish color and a milder flavor and aroma. It is used mainly for cooking when one wishes to preserve the original flavor and color of the food itself. As in koikuchi, equal amounts of soybeans and wheat are used in the koji, but the fermentation is done under conditions which prevent the development of a dark color. (3) Tamari shoyu has a higher amino acid content, but it lacks aroma. The koji is made primarily from soybeans with little or no wheat. (4) Saishikomi (twice-fermented) shoyu is made using equal amounts of wheat and soybeans in the koji, but using raw (unpasteurized) soy sauce instead of salt solution, which is mixed with the harvested koji. Saishikomi is characterized by aroma and full-bodied taste. (5) Shiro (clear, or "white") shoyu is made by using a very high ratio of wheat to soybeans in the koji, and further by fermentation under conditions which prevent dark color development. It is characterized by a very light yellow to tan color, though the amino acid content is very low because of the low soybean content in the koji. Flow sheets (Figures 2-5) show the process for manufacturing koikuchi, usukuchi, and tamari shoyu. Each has three basic parts: Koji making process, brine fermentation process, and refining process.

Concerning soy sauce production and consumption: The total annual production of soy sauce in Japan in 1979 reported by the Japanese Agricultural Standard (JAS) was 1,252,431 kiloliters (kl). In 1979 in Japan, about 70% of the soy sauce products in Japan were purely fermented, 25% contained some semichemical soy sauce, and the remaining 5% contained chemical (HVP) soy sauce. The most recent estimates of annual consumption of soy sauce in the USA are as follows: Fermented soy sauce 17,850 kl; Chemical (HVP) soy sauce 25,500 kl. Within fermented soy sauce, production of koikuchi soy sauce is estimated to be 16,500 kl/year.

In Japan an "instant tofu powder" is actually a spray-dried soy milk. This product was made and introduced by *Nihon Tanpaku Kogyo* (Japan Protein Industry) about 15 years ago (ca. 1966) and was used mainly as a raw material for making regular or silken tofu in order to save time. "Recently, however [1973], the product was placed on the market as an instant powdered tofu [named *Hausu Hontôfu*] by Hausu [House] Foods Co."

Other figures show: (5) Manufacturing process of rice miso. (6) Manufacturing processes of soy milk used for making tofu, regular tofu, and silken tofu. (7) Manufacturing process of freeze-dried tofu (kori-tofu). (8) Manufacturing process of fermented soy milk beverage. *Lactobacillus casei*, *L. acidophilus*, and *L. bulgaricus* are usually used as starters. One such product recently appeared on the market in Japan.

5015. Holmes, Charlotte Van Gundy. 1981. The life of T.A. Van Gundy (Three interviews). Conducted by William Shurtleff of Soyfoods Center, March-May 1981. 6 p. transcript. Also 3 letters from Charlottte in March, April, and May 1981.

• ***Summary:*** Birth and early life: Theodore Ananias Van Gundy (his friends called him "Van") was born on 8 July 1874 in the tiny rural community of Osoflaco, near Arroyo Grande, on the California Coast midway between San Francisco and Los Angeles. In 1886, at age 12, he became a Seventh-day Adventist, and began to show his mechanical talent by building an engine powered by steam from his mother's stove. He went to college in Healdsburg, California.

Early work with peanut butter: In 1897, at about age 23, he began his first commercial food production, making peanut butter (which, at the time, was a new food) with Dr. Hare in Fresno, California. In February 1898 he married Lulu Pond and moved to San Jose. It is not known what became of his peanut butter business.

Founding La Sierra Industries in 1928: In the fall of 1928 (probably not in 1927 as reported by Dorothea Van Gundy Jones in 1963), T.A. Van Gundy moved to La Sierra, California (now a suburb of Riverside) and started La Sierra Industries, the business that would make his famous as a soyfoods pioneer. The plant was on a lot behind his brother-in-law's home. By continuous experimentation and using equipment he designed and built himself, he soon developed a line of eleven soyfood products, plus canned garbanzos (chick peas), brown rice, and whole wheat. The first eight La Sierra-brand soyfood products were probably on the market by late 1929. They included Smoein (bacon-flavored smoked soy powder), Soy Beans (canned, unseasoned green-seeded

© Copyright Soyinfo Center 2013

type or with tomato sauce; his next products developed after Smoein), Soy Milk (canned, with the beany flavor removed by processing with live steam), Soy Cheese (canned tofu, with pimiento added to prevent graying after canning), Soy Flour, Soy Mamenoka (roasted soy flour; a Chinese name), Soy-Co (soy coffee substitute with an excellent coffeelike flavor; coarse grind or fine), B-Nuts or Beanuts (oil-roasted soynuts), B-Nut Butter (soynut butter made from B-Nuts), Soy Spread (canned okara or soy pulp, salt, mace, and other seasonings; it had a soft consistency and was said to taste and smell like "potted chicken"), Soy Gluten (a meat analog made of soy spread mixed with ground wheat gluten, resembling Dr. John Harvey Kellogg's Protose, but with soy), and Soy Cereal. In 1929 or 1930 he designed and built the mill that produced this Soy Cereal, a ready-to-eat, toasted and shredded, all-soy product. Address: California.

5016. Jacobson, Al. 1981. Pioneering soyfoods in Los Angeles (Two interviews). Conducted by William Shurtleff of Soyfoods Center, March 30 and April 13. 2 p. transcript.
• ***Summary:*** His work with soyfoods started in early 1979. He was introduced to Farm Foods at the New Earth Expo on 15-18 March 1979, then started to distribute Farm Foods' products on a small scale 2-3 months later–in their packaging under their label. He sold a lot of Farm Foods' tofu salad (he couldn't keep up with the demand), but they didn't want him to distribute their Ice Bean (soy ice cream) because he didn't have any freezer trucks. Then about 2 months later Farm Foods dropped Al to go with Nature's Finest (NF), a bigger distributor–but that new arrangement didn't work out since NF didn't have a any freezer trucks either. That fall, Al considered coming out with his own tofu salad. Then Robert Tepper of Farm Foods called Al and asked if he wanted to distribute the salad again. He replied "No, but I'd like to have you make my product for for me under my label." Farm Foods said okay. This product under Al's label sold even better than before. It was his second soy product, after Cottage Tofu, which was also made by Farm Foods in San Francisco. By late 1979 he was marketing a Cottage Tofu, Tofu no-Egg Salad, and Super Tofu (curried spread). Address: Garden of Eatin', Los Angeles, California.

5017. **Product Name:** Legume Tofu Country Pie [Spinach, or Broccoli].
Manufacturer's Name: Legume, Inc.
Manufacturer's Address: 150 Bloomfield Ave., Verona, NJ 07044. Phone: (201) 857-9010.
Date of Introduction: 1981. March.
Ingredients: Spinach: Tofu, spinach or broccoli, onions, soy margarine, soy oil, mozzarella & Romano cheese, whole wheat flour, spices, arrowroot flour, salt. Crust: Whole wheat flour, pure vegetable shortening, salt.
Wt/Vol., Packaging, Price: 5 oz. or 10.5 oz.
How Stored: Frozen or refrigerated.
New Product–Documentation: Leaflet from Legume, Inc. 1981, March. "Who says rich, creamy foods have to be high in cholesterol and calories?" The company's "Product list" includes this product.

Ad in Whole Foods. 1981. Sept. p. 56. "What's 2000 years old and tastes brand new? Tofu." States that Legume Tofu Country Pies are now available.

Label. 1982. 2.25 inches square. Green, chartreuse, and a third color on white. "A delicious protein meal by Legume. 100% natural. No preservatives. No sugar. No artificial additives. If frozen, bake..." Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Article in Soyfoods. 1982. Winter. p. 56. Weight: 5, 10,5, or 32 oz.

5018. **Product Name:** Legume Tofu Muffin [Raisin Bran, or Blueberry Bran].
Manufacturer's Name: Legume, Inc.
Manufacturer's Address: 150 Bloomfield Ave., Verona, NJ 07044. Phone: (201) 857-9010.
Date of Introduction: 1981. March.
Ingredients: Raisin bran: Whole wheat flour, honey, raisins, bran, soy margarine, soy oil, baking soda, baking powder, arrowroot flour, lemon juice, spices, vanilla, salt.
Wt/Vol., Packaging, Price: Raisin Bran weighs 2.25 oz. and 3.25 oz., Blueberry Bran 3.25 oz.
How Stored: Refrigerated.

New Product–Documentation: Leaflet from Legume, Inc. 1981, March. "Who says rich, creamy foods have to be high in cholesterol and calories?" The company's "Product list" includes this product.

Ad in Whole Foods. 1981. Sept. p. 56. "What's 2000 years old and tastes brand new? Tofu." States that Legume Tofu Muffins are now available.

5019. **Product Name:** Legume Tofu No-Creme Pie (Tofu Cheesecakes) [Strawberry, Coconut, or Banana].

© Copyright Soyinfo Center 2013

Manufacturer's Name: Legume, Inc.
Manufacturer's Address: 150 Bloomfield Ave., Verona, NJ 07044. Phone: (201) 857-9010.
Date of Introduction: 1981. March.
Ingredients: Tofu, bananas, honey, lemon juice, whole wheat flour, soy oil, spices, vanilla, salt. Crust: Whole wheat flour, pure vegetable shortening, salt.
Wt/Vol., Packaging, Price: 3 oz in plastic wrap.
How Stored: Refrigerated.
New Product–Documentation: Leaflet from Legume, Inc. 1981, March. "Who says rich, creamy foods have to be high in cholesterol and calories?" The company's "Product list" includes this product.

Ad in Whole Foods. 1981. Sept. p. 56. "What's 2000 years old and tastes brand new? Tofu." States that Legume "No-Creme" Pies are now available.

Spot in Soyfoods. 1982. Winter. p. 56. Label. 1981-82. 2 inches square. Green, chartreuse, and orange or white. "A delicious protein snack by Legume. 100% natural. No preservatives. No sugar. No artificial additives."

5020. **Product Name:** Legume Tofu Cake [Carrot, or Banana].
Manufacturer's Name: Legume, Inc.
Manufacturer's Address: 150 Bloomfield Ave., Verona, NJ 07044. Phone: (201) 857-9010.
Date of Introduction: 1981. March.
New Product–Documentation: Leaflet from Legume, Inc. 1981, March. "Who says rich, creamy foods have to be high in cholesterol and calories?" The company's "Product list" includes this product.

Ad in Whole Foods. 1981. Sept. p. 56. "What's 2000 years old and tastes brand new? Tofu." States that Legume Tofu Cakes are now available.

Spot in Soyfoods. 1982. Winter. p. 56. Cake weighs 8 oz.

5021. Liener, I.E. 1981. Factors affecting the nutritional quality of soya products. *J. of the American Oil Chemists' Society* 58(3):406-15. March. [145 ref]
• ***Summary:*** Contents: Abstract. Introduction. Heat-labile factors: Protease inhibitors (incl. trypsin inhibitors), lectins (hemagglutinins; they have the unique property of binding carbohydrate substances), goitrogens, antivitamins (antivitamin D, antivitamin E, and antivitamin B-12), phytate, phytic acid. Heat-stable factors: Estrogens (incl. isoflavones, genistin, daidzin, coumestrol), saponins, flatulence factors, lysinoalanine, allergenicity.

Goitrogens: Unheated soybeans have been reported to cause significant enlargement of the thyroid gland of rats and chicks; this effect can be counteracted by supplementing the diet with iodine (as potassium iodide) or partially eliminated by heat. Several cases of goiter have also been reported in human infants fed soybean milk, a situation which could likewise be alleviated by iodine supplementation. Therefore iodine supplementation of soyamilk infant formulas is recommended as a precautionary measure against the goitrogenic potential of this product.

The component responsible for the goitrogenic effect of soybeans is still unknown. It appears to be concentrated mainly in the curd, but goitrogenic activity has also been detected to a lesser extent in toasted soya flours, concentrates, and isolates. Unlike most goitrogenic plants of the Cruciferae family, soybeans do not contain glucosinolates. The goitrogenic principle in soybeans has been reported to be a low molecular weight oligopeptide; this appears to be inconsistent with the observation that the goitrogenicity of soybean curd was not eliminated by proteolytic digestion.

Most of the evidence indicates that, whatever the goitrogenic principle is, it seems to exert its effect by inhibiting the uptake of iodine into the thyroid gland. However other researchers believe that goiter from soy-containing diets may result from an increased fecal loss of thyroxine or a simple iodine deficiency (Halverson et al. 1949; Van Middlesworth 1957; Beck 1958; Hydowitz 1960; Shepard et al. 1960). One study (Kimura et al. 1976) found that female rats which were fed defatted soybeans with an iodine-free diet for 6-12 months showed thyroid carcinomas. This effect, however, was completely prevented by iodine supplementation.

"Heat-stable factors: Estrogens. The banning of the use of diethylstilbestrol [DES] as a growth stimulant for animals in meat and poultry production has served to focus attention on the possible toxic effects of naturally occurring estrogens." Fig. 9 shows the structure and formula of isoflavonoid compounds isolated from soybeans (Naim et al. 1974). Table 9 shows the estrogenicity of compounds isolated from soybeans and their potency relative to DES. The compounds are genistin, daidzin, glycitein 7-O-Beta-glucoside, and coumestrol. All figures are from other sources (Naim et al. 1974; Bickoff et al. 1962; Knuckles et al. 1976). Address: Dep. of Biochemistry, College of Biological Sciences, Univ. of Minnesota, St. Paul, MN 55108.

5022. McDonnell, Kathleen. 1981. From fodder to fast food: Soybeans crop up more than ever on farms and in stores. *Maclean's* (*Canada*). March.
• ***Summary:*** Recently soybean breeders have created early-maturing varieties which are enabling soybeans to spread northward "beyond their traditional growing area in extreme southern Ontario, which now produces more than 90 per cent of Canada's total harvest." This year substantial acreage will be seeded in Alberta, Manitoba, P.U.I. [Prince Edward Island], Quebec and eastern Ontario.

"With last year's harvest of 26.2 million bushels worth more than $200 million, Canada has now moved into fifth place among world soybean producers–after the U.S., Brazil,

© Copyright Soyinfo Center 2013

China, and Argentina.

Human consumption of soybeans is definitely catching on in Canada. At one health food store in Vancouver, BC, the most popular item is tofu, or soybean curd, which is now "being touted as the 'yogurt of the '80s.' Packaged tofu is now being sold in major supermarket chains across the country..."

The largest consumers of soy products by far are vegetarians. Elsie Sokol, chief dietitian at Toronto's Branson Hospital (run by Seventh-Day Adventists) "receives 'thousands' of requests from across the country for information about soybeans and gives lectures on their nutritional value and preparation." She believes the day will come when people in general will praise soybean growers. Mary Anderson, who shares her enthusiasm, is one of three partners who run a soy-food restaurant named Soja in Kensington Market. A photo shows Mary, with a tray of soy cheesecake and burgers, in front of her restaurant's sign.

5023. **Product Name:** [Soymilk (Plain, Coffee, Orange)].
Foreign Name: Morinaga Tônyû (Pureen, Koohii, Orenji).
Manufacturer's Name: Morinaga Milk Co. (Morinaga Nyugyo) (Marketer). Made in Japan by Mitsubishi.
Manufacturer's Address: Shiba 5-33-1, Minato-ku, Tokyo 108, Japan.
Date of Introduction: 1981. March.
Wt/Vol., Packaging, Price: 200 ml Tetra Brik Aseptic carton.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: Toyo Shinpo. 1982. July 21. "The soymilk industry and market in Japan." States that Morinaga Nyugyo first sold commercial soymilk in Japan in 1981.

K. Tsuchiya. 1982. Dec. *Tonyu* [*Soymilk.* 2nd ed.]. p. 73. States that these three products were introduced in Nov. 1981 in 200 ml long-life packs, and distributed nationwide. Product (coffee flavor) with Label (200 ml Tetra Brik carton) purchased in Tokyo in June 1983.

Shurtleff & Aoyagi. 1984. Soymilk Industry & Market. p. 63-64. In March 1981, Morinaga Milk Co., Japan's third largest milk company, was licensed by Mitsubishi to distribute their soymilk.

5024. *Prevention* (*Emmaus, Pennsylvania*). 1981. A health food dictionary: Soybeans. March. p. 144-46.
• ***Summary:*** Soybean foods include soybean oil, tofu, tamari, soy milk, tempeh, miso, soybean sprouts, soy flour, soy ice cream, and soy nuts.

The article ends: "Do yourself a favor. Get to know the soybean." Address: Emmaus, Pennsylvania.

5031. *Recorder* (*Greenfield, Massachusetts*). 1981. MBDC loans. April 1. p. 8.
• ***Summary:*** "New England Soy Dairy of Greenfield was able to purchase new equipment for producing tofu through the help of a $150,000 loan last year from the Massachusetts Business Development Corporation. MBDC approved 23 loans totaling $6.7 million during 1980. The corporation's 111 members are Massachusetts financial institutions."

A photo shows the inside of the New England Soy Dairy, with many cakes of tofu in the long, water-filled, conveyorized cooling tank, and tofu being pressed with hydraulic presses in the forming boxes.

5032. *Hartford Courant* (*Connecticut*). 1981. 'Cooks Tour' opens Sunday at Fox stores. April 4. p. A11.
• ***Summary:*** "The G. Fox 'Cooks Tour,' an event including cooking and housewares demonstrations, food sampling, new products and more, will take place Sunday through April 12 at all stores."

"Madeline Fox, representative of the New England Soy Dairy, demonstrating 'nutritious budget cooking with tofu,' on Saturday."

"The events are free and open to the public."

5033. Flinders, Carol. 1981. 'Tofu-kit' for at-home making. *Hartford Courant* (*Connecticut*). April 8. p. E3. [1 ref]
• ***Summary:*** "It looks as if tofu is here to stay. Americans ate just short of 33 million pounds of it last year, and the figure is expected to have doubled this year.

"Tofu and soyfoods business are opening at the rate of two a year. And the Soycrafters Association of North America (SANA) is presently at work with the United States Department of Agricultural officials to establish standards of identity and acceptance for use in school lunch programs. A driving force behind these developments is Larry Needleman, who lives almost in my backyard, in Bodega, California. I'm tempted to put the initials 'F.A.' after his name. There should be some such title for the true food activists among us–the people who are helping in very practical ways to implement today's dietary reforms.

"Two American companies import and manufacture equipment for making soyfoods on a commercial sail. One is Bean Machines, and Larry is president. He was a founding member and the first director of SANA, too. And by designing and marketing his 'Tofu Kit,' he has performed a great service to people who want to make their own today at home.

"Larry's interest in soyfoods goes back a ways. He graduated from Cornell University [Ithaca, New York] in 1965 with a degree in Hotel Administration, and worked several years after that in restaurant and consulting. Then a routine medical checkup in 1967 revealed that his serum cholesterol level was seriously elevated.

"Larry had been a vegetarian for some time, using dairy

© Copyright Soyinfo Center 2013

products and eggs freely. Now, looking for alternatives, he ran across the newly published 'Book of Tofu,' by Bill Shurtleff and Akiko Aoyagi. Within a few weeks he was making his own tofu and eating it in every form imaginable.

"Delighted with his new mainstay and impressed by the role he thought it could play in solving the world food problem, Larry was eager to encourage tofu's popularity in the U.S. While he was putting together his own tofu making set-up following the Shurtleff's instructions, it struck him that some potential users of tofu just wouldn't get past this first hurdle. That's how the Tofu kit was born, and shortly after that, Learning Tree, as the company that would market it.

"About this time, Bill and Akiko returned to the U.S. from a 3-year stay in Japan and heard what Larry was up to. Here was a man with zeal to match their own! Thrilled to see the kit, they took it with them on a cross-country demonstration tour, and it was effectively launched, Bean Machines and SANA both came along in short order–fruits of a warm working relationship between Larry and the Shurtleffs...

"I have to confess that I'm just the sort of person the tofu kit was meant for: well-meaning, but not awfully resourceful! You still need your own grinder or blender, but the hard-to-obtain items are all there: a pressing box built from Philippine mahogany [red lauan] (so handsome you can't wait to use it), strainer cloths, 'nigari' (a coagulant), and complete instructions, including 'troubleshooting' and recipes. The kit costs $19.95."

"Larry isn't just a man with a cause. He's an experienced and innovative cook too." The latest version of his recipe for Creamy tofu mayo is given.

5034. Iggers, Jeremy. 1981. Tofu: Tasty tofu recipes, for you. *Detroit Free Press* 150(339):1D, 8D. April 8.
• ***Summary:*** A banner at the top of the front page reads: "Tofu is not a martial art. The Chinese have been eating it for 2,000 years. Page 1D."

This article is largely about The Soy Plant (in Ann Arbor, Michigan) which has more than 20 employees and makes 7,000 lb of tofu a week. The company recently moved into a larger building in an Ann Arbor industrial park. The tofu they make is distributed to Farmer Jack, Kroger, Meijer, and A&P stores in the Ann Arbor area. The Soy Plant also operates a retail store, the Soy Plant Deli at 211 E. Ann St. A photo shows Tristram Seidler cutting a block of fresh tofu into cakes. Recipes are given for: Spicy tofu with minced pork. Tofu ambrosia.

On p. 8D are recipes for: Tofu and peanut salad. Tofu Tetrazzini. Vegetable stock. Banana-tofu milkshake. A photo shows Lisa Jackobs packing tofu in plastic tubs at The Soy Plant in Ann Arbor. Address: Free Press food writer.

5035. Jones, Irmarie. 1981. Firm seeks U.S. seal of approval for tofu. *Recorder* (*Greenfield, Massachusetts*). April 8. p. B4.
• ***Summary:*** According to Richard Leviton of Colrain, a director of Soycrafters Association of North America, Inc., tofu is being considered for complete approval by the U.S. Department of Agriculture for use in public school lunch programs. "'We want tofu approved to allow it to take the place of meat,' Leviton said."

"Madeline Fox, sales manager of the New England Soy Dairy, said the New York City school department is buying tofu from the local firm, the third largest tofu shop in the country. 'Everything looks good. Springfield schools, Portland, Maine, and some Connecticut school systems are using tofu. I know that Amherst and Smith colleges and the University of Massachusetts incorporated tofu in their meals.'...

"Leviton and Ms. Dalman [Thelma is director of food services for Santa Cruz, California, schools and a friend of Leviton's] went to Washington [DC] last September and Leviton went again in November, meeting with USDA officials, congressmen and various other agencies, to influence the 'legalizing' of tofu for school lunches." Address: Staff reporter.

5036. Huang, Timothy. 1981. Early work with soyfoods distribution and the Yellow Bean deli in Detroit (Interview). Conducted by William Shurtleff of Soyfoods Center, April 9. 1 p. transcript.
• ***Summary:*** Timothy started a soyfoods marketing and distribution company called Yellow Bean Trading Co. in Detroit in about Sept. 1978. His first products were Soy Plant products from Ann Arbor, sprouts, TVP and soy flour (from Farm Foods), and soyfoods books. In March 1979 he and Carol Ann, his wife, started a soyfoods deli named Yellow Bean Vegetarian Foods at 15309 Mack Ave. in Detroit. They made 3 types of tofu pies (carob, cocoa, peanut butter) and a bulk tofu salad [like an eggless egg salad]. He was selling these 2 products to 25 accounts by summer 1979. Address: Detroit, Michigan.

5037. Kempadoo, Peter. 1981. Re: My work with soyfoods in Guyana. Letter to William Shurtleff at Soyfoods Center, April 12. 2 p. Typed, with signature on letterhead.
• ***Summary:*** Peter started making tofu in 1972, when he learned the process from an elderly Chinese gentleman in Guyana. Since then he has made tofu for his family and for the local Seventh-day Adventist Hospital. Two years ago he started a vegetarian society. They enjoy Soyburgers (made from whole soybeans), tokara (tofu with the okara fiber), soynut butter (75% peanuts, 25% soybeans), soy bread (10% okara in whole wheat bread). Address: The Sarvodaya Development Education Organisation Ltd., 423 Golden Grove, E.C.D., Guyana.

5038. Sammons, Robert L. 1981. A very low bow to Japanese cuisine. *Los Angeles Times.* April 12. p. H10.
• ***Summary:*** "Tokyo–In Japanese cooking, emphasis is placed on enhancing rather than eclipsing the natural flavors of the food–and as with most things Japanese, those flavors generally are subtle."

At Shirakawago, a restaurant in Shinjuku, Tokyo, you dine in an ancient wooden farmhouse built in the Gassho (praying hands) architectural style. Brought from the Japan Alps in 1958, it transports you back to the Edo period.

Zakuro, a restaurant in Asakusa, you can enjoy Tokyo's most delicious *shabu-shabu* (beef and fresh vegetables). The latter "vary with the season, but mushrooms, soy bean curd [tofu], bamboo shoots, spinach, green onions and chrysanthemum leaves are usually included." All are cooked in a pot at the table and served with a number of sauces.

At Nabeya you can enjoy paper-thin slices of *fugu* (blowfish) "dipped in a piquant sauce (soy and shredded ginger)" an eaten like any other sashimi–except that *fugu,* if not properly prepared, can be poisonous.

5039. Garden of Eatin'. 1981. Invoice, catalog, and order form. Los Angeles, California. 1 p. April 20. 28 cm.
• ***Summary:*** Soy products: Honorable Tofu (16 oz). Honorable Tofu Dri-Pak (16 oz). Honorable Tofu Salad (8 oz). Cottage Tofu (8 oz or 16 oz). Tofu No Egg Salad (8 oz or 16 oz). Super Tofu (16 oz).

Ice Dream (soy ice cream, each in 3½ oz or pint): Vanilla, Strawberry, Tropical Fruit, Maple Nut, Carob Mint.

Written in by hand: Baloogie Foofoo (mild or wild). Jerky Soy. Address: 5300 Santa Monica Blvd., Los Angeles, California 90029. Phone: (213) 462-5406 or 5421.

5040. Lukoskie, Suni Kim. 1981. Re: Korean natto and miso. Letter to William Shurtleff at Soyfoods Center, April 20–in reply to inquiry of March 5. 1 p. Typed, with signature on letterhead.
• ***Summary:*** About Joenkuk-jang and Damsue-jang. I always call them Chungkuk-jang and Dambuk-jang.

To eat and serve them, we make pretty thick Miso type soup with Tofu and Vegetables in it. This is the miso that we can make very easily and quickly in the winter time.

I can't explain what they look and taste like, but I'm sure you could buy them at Korean grocery stores in California.

I don't know when or where they originated in Korea.

Chungkuk-jang and Dambuk-jang are made by almost the same process. (1) Chingkuk-jang: Wash soybeans then soak for 10-12 hours. Cook for 5-6 hours until they are very tender so that when you touch them they crumble. Put them in a bowl and leave it in the room with a blanket over it; no culture is added. After 2-3 days the surface will be white and sticky, and it smells rotten. Then add salt, garlic and cayenne, and pound it until coarse. This is the traditional method. As you may know, the Korean floor is very warm in the winter time.

Another method is to make it more like making tempeh. My text-book says that after cooking the beans add the culture then incubate them 30-35 hours at 40ºC.

Dambuk-jang: Same as above but no spices.

The Korean word for okara is BéGé [piji].

People in Korea don't eat whole soybeans much, except that sometimes we roast them.

I have never eaten green vegetable soybeans in Korea. I don't think we even have word for them in Korean. But the general name for soybean is *Mayjekwong.*

Note: Suni married to Luke Lukoskie. Address: 1. Island Spring Inc., P.O. Box 747, Vashon, Washington 98070. Phone: 206-622-6448.

5041. **Product Name:** Tofu.
Manufacturer's Name: Bridge (The).
Manufacturer's Address: 598 Washington St., Middletown, CT 06457. Phone: 203-346-3663.
Date of Introduction: 1981. April.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Owner: Roberto Marrocchesi & Bill Spear. Leviton. 1982. Soyfoods. Summer. p. 42. Tofu made at this macrobiotically inspired shop by Roberto Marrocchesi and Bill Spear, since March 1981. They also make amazake and seitan, and hope to make mochi. Talk with Bill Spear. 1988. Jan. 26. They now make 4,000 to 4,500 lb/week of tofu. They have always made it by hand using a cauldron. It retails for about $1.45/lb. They stopped making mochi because they felt that the grinding process they were using (also used by Kendall Foods and Grainaissance) was not giving it the "ki" found in real pounded mochi. His company has always emphasized quality and traditional processes.

Talk with Bill Spear. 1988. March 1. He is looking at early company records: The Bridge incorporated on 1 Aug. 1980. Purchased its first soybeans 4 March 1981. Sold its first tofu 2 April 1981. Purchased its first wheat flour to make seitan 17 Feb. 1982. Sold first seitan commercially on 22 Feb. 1982. Purchased first sweet (glutinous) rice for amazake and mochi on 10 March 1982. Sold first amazake 27 March 1982. Sold first Tofu Salad on about 16 April 1981. Talk with Bill Spear. 1991. Sept. 7. The company is still located at 598 Washington St. in Middletown, Connecticut.

Note: This is the earliest known edible soy product made in Connecticut.

5042. **Product Name:** Tofu Salad.
Manufacturer's Name: Bridge (The).
Manufacturer's Address: 598 Washington St., Middletown, CT 06457. Phone: 203-346-3663.
Date of Introduction: 1981. April.
Wt/Vol., Packaging, Price: 1 lb.

© Copyright Soyinfo Center 2013

How Stored: Refrigerated.
New Product–Documentation: Leviton. 1982. Soyfoods. Summer. p. 42. Tofu made by Roberto Marrocchesi and Bill Spear, since March 1981. Talk with Bill Spear. 1988. March 1. This product was introduced in April 1981, about 2 weeks after they introduced tofu.

5043. Cling Peach Advisory Board. 1981. Color recipe cards for tofu & peaches. P.O. Box 7111, San Francisco, California 94120. 6 color recipes. And 4 black and white.
• ***Summary:*** Each color recipe card, yielding typically 24 portions, is 5 by 8 inches, with a color photo, the recipe name, and a brief description on the front. On the back are ingredients, directions, and nutritional analysis of one serving. Color recipes are for: Cheeseless cheesecake with peach glaze, Double peach tofu pudding cups, Fruited tofu rice pudding, Peach banana tofu smoothie, Peach tofu whip (with soft tofu), and Tofu fruit 'n rice custard.

Recipes with black-and-white photos are for Tofu french toast with peaches, Peach tofu salad dressing, Peach tofu cobbler, and Tofu fruit gelatin salad combo. Finally there is a card titled "Tofu: What every foodservice operator should know."

The front of the card for "Peach Banana Tofu Smoothie" begins: "For inbetween mealtime snacks or instant meals, serve this Peach Banana Tofu Smoothie. It's a tasty, nutritious drink that's quickly prepared in a blender..." The recipe on the back reads: "Tofu, soft custard type–8 oz. Cling peach slices, drained–2 cups. Peach syrup–¼ cup. Orange juice–¼ cup. Banana, small–1. Honey–3 to 4 Tbsp. Almond flavoring–¼ tsp. Drain tofu; rinse in cold water and drain again. In a blender or food processor, whirl all ingredients until smooth. Keep refrigerated. Serve chilled."

5044. **Product Name:** Honorable Tofu Salad (with Olives).
Manufacturer's Name: Garden of Eatin'.
Manufacturer's Address: 5300 Santa Monica Blvd., Los Angeles, CA 90029.
Date of Introduction: 1981. April.
Wt/Vol., Packaging, Price: 8 oz.
New Product–Documentation: Interview with Al Jacobson. 1981. April 13. New product. Invoice/Catalog. 1981. April 20.

5045. Gubhaju, T.B. 1981. Letters: A Tofu plant. *Soyanews* (*Sri Lanka*) 3(9):3. April.
• ***Summary:*** "I am interested in setting up a tofu plant in Kathmandu [Nepal] with a capacity of about 30 to 50 kg per hour. I am looking for a manufacturing company which can supply a full line of equipment to make tofu from raw soyabeans.

The editor suggests the writer contact The New-age Foods Study Center, P.O. Box 234, Lafayette, California 94549. The Center sent Mr. Gubhaju a Takai catalog right after reading this article. Address: B.E. (Civil), 29/321 Naya Bazaar, Kathmandu, Nepal.

5046. Hoefer, Hans Johannes; Lueras, Leonard; Chung, Nedra. 1981. Korea. Hong Kong: Apa Productions. 377 p. Illust. (some color). 23 cm. Series: Insight Guides.
• ***Summary:*** In the section titled "Korean cuisine" (p. 316-19), soy beans, soy sauce, *twoenjang-guk* (a popular "fermented soybean paste soup"), and soybean curd (*tubu*) are mentioned on p. 317 (right side).

Page 318 (right): "At important celebrations, steamed rice cakes (*ttôk*), sometimes embellished with aromatic mugwort leaves or dusted with toasted soy, barley, or millet flour, are presented as tasty ritual food."

Directed by Hans Johannes Hoefer; produced, edited, and designed by Leonard Lueras and Nedra Chung.

Note: The 2nd updated edition (1983) has the same number of pages as the 1st edition (April 1981).

5047. **Product Name:** Tofu.
Manufacturer's Name: Jack's Beanstalk, Inc.
Manufacturer's Address: 2160 West 2300 South, Salt Lake City, UT 84119. Phone: 801-973-9777.
Date of Introduction: 1981. April.
New Product–Documentation: Clifton Jolley. 1981. Deseret News. Oct. 20. Sect. C. Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Owner: Jack & Bonnie Roddy.

Letter from Bonnie H. Roddy, President, to Luke Lukoskie of Island Spring. 1982. March 29. "April marks the first anniversary of Jack's Beanstalk, Inc... We're still struggling with cashflow problems, but our successes have really been in terms of marketing and research." The company is involved with research in both Brigham Young University and the University of Utah Medical Center.

5048. **Product Name:** Firm Tofu.
Manufacturer's Name: San Diego Soy Dairy.
Manufacturer's Address: 2965 5th Ave., San Diego, CA 92103. Phone: 714-296-8029.
Date of Introduction: 1981. April.
Ingredients: Organically grown soy beans, filtered water, natural nigari (derived from sea water).
Wt/Vol., Packaging, Price: 16 oz.
How Stored: Refrigerated.
New Product–Documentation: San Diego County Clerk. 1980. Dec. 1. Fictitious business name statement approval. Application by Gary C. Stein for San Diego Soy Dairy of 2965 Fifth Ave., San Diego, CA 92103.

Shurtleff & Aoyagi. 1981. The company is owned by Gary C. Stein at 2965 Fifth Ave., San Diego, CA 92103. Phone: 714-296-8029. Label. 1981. 3.5 by 2.25 inches. Blue on white. "Premium Tofu. Firm Style." Talk with Gary Stein. 1989. Feb. 17. In about 1977 Gary and two friends (one was

© Copyright Soyinfo Center 2013

Todd Takeuchi) started apprenticing with Mr. Haruki Koba, the tofu maker at Oriental Groceries in San Diego. Haruki's son was Dwayne Koba. Initially they worked for no pay as they learned, but after 6-8 months they were paid as they helped the business to grow. The apprenticeship continued for about 18 months. Then Gary left and started his own company from scratch at 2965 5th Ave. in San Diego. He signed the lease in Dec. 1980. His first product, firm tofu, was launched on 1 April 1981. He began the Soycrafters Apprenticeship Program; 3 weeks training for $1,500. To date only one person (Liz Appel) has gone through it. He moved the business to El Cajon (1330 Hill St., Suite B), California 92020 in Nov. 1986.

Talk with Gary Stein. 1989. Oct. 25. He is now redoing all his labels except the tofu with wilderness scenes (mountains, streams, etc.) in 4-color process.

Label sent by Gary Stein. 1990. Dark blue and green (bamboo and bamboo leaves) on white. Printed on film.

5049. Shulman, Martha Rose. 1981. Terrific tofu. *House and Garden* 153:189, 194, 196-97. April.
• ***Summary:*** Contains praise for tofu ("The all-purpose, fresh-as-a-spring day food that costs little, keeps forever, and is delightfully low in calories"), hints for using it, plus 7 recipes.

5050. **Product Name:** Firm Tofu.
Manufacturer's Name: Soy Power Company, Inc. (Marketer-Distributor). Made in Los Angeles by Wy Ky.
Manufacturer's Address: 235 Montana Ave. #105, Santa Monica, CA 90403. Phone: 213-394-5682.
Date of Introduction: 1981. April.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Owner: Tom Binder. Talk with Kevin Cross. 1988. Sept. 22. He and Tom Binder were partners in the company, then Tom left. This product, introduced in April 1981, was originally made by Wy Ky. It now has a red label and is made by Mighty Soy. "They are a great company."

5051. *Soyanews* (*Sri Lanka*). 1981. Hospitals take to soya milk. 3(9):1. April.
• ***Summary:*** "Two hospitals in Kandy... are now using soya milk in the preparation of curries for patients." They started in February of this year. The patients and staff who tasted the curries can't tell the difference. "The soya bean milk is supplied by the Gannoruwa Soyabean Foods Research Centre in powdered form. Kitchen staff in the two hospitals are pleased with the use of soya milk as preparation is now shorter and less tedious.

"A 250 gm packet of soya milk powder is equivalent to the amount of milk extracted from about 5 coconuts, the manager of SFRC, Mr. T.D. Siriwardena told Soyanews."

"He added that the hospitals using soya milk can make further savings and added nutritional gains if they prepare the soya milk in their own kitchens from raw soaked beans.

"This would involve, he said, the use of a motorised stone grinder which can be turned out locally. But the long term advantages are many, Mr. Siriwardene said. As Tofu is an excellent food for invalids and convalescents, the next step in the preparation of soya milk is the making of tofu..." The residue [okara] is available at no extra cost for making rotis, and it can partly replace the coconut that goes into pol sambol.

"Last year the General Hospital in Colombo tried out using the slurry (the ground paste from soaked soyabeans) directly in curried and found that it was well received by patients."

Note: Sri Lanka may be the first developing country to begin to grasp the great potential of soymilk and tofu for its food culture.

5052. Soyfoods Center; Soycrafters Assoc. of North America. 1981. Soyfoods production in America and the West (News release). Lafayette, California: New-Age Foods Study Center. 1 p. April. Updated in Sept. 1981 in a neater format.
• ***Summary:*** A table shows production statistics for 25 types of soyfoods. Number of manufacturers in the USA, Canada, Other West, Total; Tons of raw soybeans/year used by each food. Yield of food from 1 unit weight of soybeans. Wholesale value. Retail value. Number of people employed. Address: P.O. Box 234, Lafayette, California 94549.

5053. Ted Nordquist and Tim Ohlund in Sweden lifting cases and packets of Aros tofu into the back of a delivery van (Photograph). 1981. April.
• ***Summary:*** This 7 by 9½ inch black-and-white photo is copyrighted by (please credit) Folklore Film, Stockholm, Sweden. Aros Sojaproduckter first made and sold tofu commercially in Feb. 1981.

© Copyright Soyinfo Center 2013

In Feb. 2013 Bill Shurtleff, an old friend of Ted's, sent him a digital scan of the photo as an attachment to an e-mail which stated simply "Handsome Viking." Ted wrote the following reply and forwarded the photo to his friends: "Bill Shurtleff's wife Akiko taught me how to make tofu in 1975. Bill is the author of just about every soyfood book worth reading including tofu, tempeh, miso and the history of soy. Bill must be cleaning house and found this picture of Tim Öhlund, partner and plant manager, and me loading the back of my 1969 Volvo station wagon with cases of 18 four hundred gram packs of tofu to be delivered to Stockholm every Tuesday and Thursday of each week. This must be 1981. The name of our company in Örsundsbro, Sweden was Aros Sojaprodukter. Aros is the old Viking name for 'river mouth' represented by Uppsala which was a major Viking stronghold around 800 AD. Boy, how a picture lets you know how life rushes by!

The next day, in an e-mail reply to Akiko, Ted wrote: "Yes, you taught me how to make tofu at Bill's mother's home in Lafayette, California! I started making it at home in Alameda at my parents' home. The first time it took about 4 hours before I finished in the kitchen. Then I learned how to add some of the water to the cooking kettle, then boil it and add the *go* [puree] very slowly. That way it did not burn to the bottom of the kettle. When my father became ill with stomach cancer, vegetable soup with homemade tofu became his favorite dish. No gas or pain! By making tofu almost every morning for awhile, I got it down to one hour from start to finish. I also made 'tofu kits' for sale in my Dad's garage for a few months. He died in January, 1976. I stayed on until July helping my Mom get settled. Then I returned to Sweden." Hope you are enjoying a full life.

5054. **Product Name:** BRT: Brown Rice & Tofu Sandwich (In a Chapati) [Regular, Curry, or Mustard].
Manufacturer's Name: Wildwood Natural Foods.
Manufacturer's Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1981. April.
Ingredients: Regular 1983: Brown rice, UFO Tofu by Wildwood, alfalfa sprouts, tahini, barley miso, seasonal vegetables (celery, carrots, zucchini, chard, or parsley), whole grain chapati, lettuce, scallions, tamari, sea salt.
Wt/Vol., Packaging, Price: 11.5 oz.
How Stored: Refrigerated.
New Product–Documentation: Leviton. 1981. Soyfoods. Winter. p. 61. "Putting tofu in the lunch boxes of America."

Leviton 1983. Soyfoods. Summer. p. 42-43. "Wildwood's sandwich power." "Dated for 1 day although they stay fresh for 2. Their Brown Rice & Tofu Sandwich accounts for 30% of sandwich sales." Labels set by Wildwood on their letterhead. 1983, undated. 3 by 2 inches.

© Copyright Soyinfo Center 2013

Self adhesive. Mustard: Black and green on orange-yellow. Curry: Orange and green on white. Regular: Black and green on white. Silhouette of woods with birds. "Fresh Daily. Ready to Eat Foods. Naturally. Perishable. Keep refrigerated."

Labels for all 3 flavors. Sent by Paul Duchesne. 1989. Aug. 11. This set of labels is slightly different from those described above; each has the slogan "Ready to eat foods, naturally." In the ingredients, the tofu is listed as "Wildwood Tofu" rather than "UFO Tofu by Wildwood." Talk with Paul Duchesne. 1989. Aug. 17. The term "BRT" probably started to be used in late 1981 or early 1982, while Paul was still with Wildwood. The term "UFO Tofu" was used for all tofu made by Wildwood. It is a palindrome, which reads the same backward or forward.

5055. **Product Name:** [Tofu {Vacuum Packed}].
Foreign Name: Tofu.
Manufacturer's Name: Witte Wonder Products.
Manufacturer's Address: Piet Heinstraat 80, 2518 CK, Den Haag, Netherlands. Phone: 070-464-5225.
Date of Introduction: 1981. April.
Wt/Vol., Packaging, Price: Vacuum packed 250 gm retails for 1.75 guilder (11/83). Also in 3 kg bulk pails.
How Stored: Refrigerated.
New Product–Documentation: Letter from Sjon Welters. 1982. April 16. "Witte Wonder is a macrobiotic center and production plant for tofu in Den Haag (The Hague); our competitor." Shurtleff & Aoyagi. 1982. Soyfoods Industry: Directory & Databook. p. 3. Niko van Hagen is contact person. Richard Leviton. 1983. Trip to Europe with American Soybean Assoc. Oct/Nov. Unpublished manuscript. p. 24. Nov. 3. Visited Witte Wonder Products, Piet Heinstraat 80, 2518 CK Den Haag (The Hague). Talked to Nico van Hagen and wife Loes Witteman, the principal tofu makers. They make 900-1,200 kg/week of tofu, plus 500 kg/week of seitan. They make tofu dips at another shop and will soon consolidate the two operations. In 1979 they started their foundation called Stichting Natuurvoeding as a health food shop and in April 1981 began to make 100 kg/week of tofu, plus seitan. "They know of 3 big Chinese tofu shops in Den Haag but they are not biological [organic], another 3 in Amsterdam. Holland is probably the best market for tofu in Europe says van Hagen, but Indonesians are already supplying themselves so the market is closed to Witte Wonder. Indonesian products cost less, use calcium sulfate, and regular (non-organic) soybeans."

Interview with Sjon Welters. 1984. Oct. 25. They now make 2,000 lb/day of tofu.

5056. Burghi, Allen H. 1981. Re: Cling Peach Advisory Board is developing tofu recipes. Letter to William Shurtleff at Soyfoods Center, May 3–in reply to inquiry. 2 p. Typed, with signature on letterhead.

• ***Summary:*** "May 15th the Board sponsors a special luncheon in Chicago during the National Restaurant Show (100,000 people in attendance) for the Major Cities Directors of the American School Food Service Association. It is only a small luncheon for about 50 of the top directors. I have asked the Hilton to duplicate your cheesecake recipe–so that will be interesting. I don't intend to tell the directors the ingredients until afterwards."

Note: A very stylish color letterhead shows cling peaches on the tree and a can of cling peaches. Address: Foodservice Promotion Manager, Cling Peach Advisory Board, One California Street, San Francisco, California 94111. Phone: 982-0970.

5057. Lesem, Jeanne. 1981. Will Americans swallow soybeans? *Morning Union* (*The*) (*Springfield, Massachusetts*). May 13. p. 29. [1 ref]
• ***Summary:*** According to this summary of an article by Judy Brown in the *National Food Review,* a USDA quarterly, tofu, tempeh, and miso are becoming increasingly popular.

5058. Lesem, Jeanne. 1981. Will soybeans now follow margarine on road to success? *Hartford Courant* (*Connecticut*). May 13. p. E12.
• ***Summary:*** This article is a telephone interview with Judy Brown, based on her article in the *National Food Review,* a USDA quarterly. "Tofu (toe-foo) is as much a part of Japanese culture and cookery as bread is in the United States," says Brown. Also discusses tempeh, miso, soy flour and grits, and "textured vegetable products."

Note: Syndicated by United Press International, this article appeared in several other newspapers.

5059. Hansen, Barbara. 1981. Indonesia in the heart of L.A.: Let's eat out. *Los Angeles Times.* May 14. p. L33.
• ***Summary:*** This is a review of the small Indonesian restaurant Dewi (Alpine Plaza, 211 Alpine St No. 4, Los Angeles). It has been open for about four years and is popular with local Indonesians.

Dewi simulates the *rijsttafel* with a combination plate that includes spiced hardcooked egg and "bean curd."

Dewi sometimes serves *nasi gudeg,* a specialty of Yogyakarta in central Java, that includes "bean curd cubes."

"*Tahu ketoprak* is a salad of deep-fried bean curd cubes in a sweet peanut sauce."

If you like the meal, pick up some "sweet Indonesian soy sauce" [probably ketjap manis] and coconut milk at Dewi's grocery.

5060. *Hartford Courant* (*Connecticut*). 1981. Tofu: You can cook it up, but don't look it up. May 14. p. C2E.
• ***Summary:*** "Tofu. You can't find the word in the 1966 Random House dictionary and you can't find it in the 1977 unabridged Webster's." But you can call the New England

© Copyright Soyinfo Center 2013

Soy Dairy Inc. of Greenfield, Massachusetts, and learn all about it. This Sunday Madeline Fox will give cooking demonstrations, and show the many ways it can be used.

"In fact, so far it seems that about the only thing it hasn't been used in is a dictionary."

5061. Shurtleff, William. 1981. Analysis of the U.S. and Western world tofu industry. Lafayette, California: Soyfoods Center. 1 p. May 17. Unpublished typescript.

• ***Summary:*** In this 1-page summary, prepared for Kikkoman Corporation, a table gives the following statistics for the years 1979, 1980, and 1981: Number of tofu manufacturers in the USA (120, 145, 159), Canada (7, 14, 19), other non-Asia, total. Raw soybeans used (tons/year) in USA. Percentage of total raw soybeans used for all soyfoods in the USA. Yield (pounds of tofu made from 1 pound of soybeans) (2.5). Tons of tofu produced in USA (16,250, 20,500, 26,000). Wholesale value (million dollars) (12.0, 17.5, 25.0). Retail value (million dollars) (23.2, 33.9, 48.5). Number of production employees (602, 759, 965).

Notes: The largest food uses of soybeans in the USA in 1981 are: Soy flour and grits (defatted) 52.6% (of all soybeans used), textured soy flour (incl. TVP) 19.7%, soy protein isolates 16.9%, soy protein concentrates 7.7%, soy sauce 1.2%, tofu 0.8%, soymilk and dairylike products 0.6%.

Estimates of regional markets for tofu: Largest market–California. Second largest–East Coast from Massachusetts to Maryland. Third largest–Pacific Northwest. Fourth largest–Northern Midwest (Wisconsin, Michigan, Illinois, Minnesota, Indiana).

Addresses of tofu manufacturers is included. Address: The Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

5062. Takai, Wataru. 1981. Re: Wish to have booth at Soyfoods Conference at Fort Collins, Colorado. Letter to Richard Leviton, Conference Chairman, SANA, 100 Heath Road, Colrain, MA 01340, May 17. 1 p. Typed, with signature on letterhead.

• ***Summary:*** "I shall enclose $100 for the balance.

"Thank you for your letter of 'Soyfoods Expo 1981' for exhibitor and No. 18 booth for Takai.

"We will display our Sub-System S30C at Soyfoods Conference at Fort Collins and want to sell it at conference. S30C System consists of two crates. One is Mill & Cooker (1720 x 1270 x 1670mm, 520 kgs) and another is Continuous Roller Extractor (1260 x 1060 x 1700mm, 300 kgs). Our S30C system will arrive at Oakland at the middle of June.

"I must talk demonstration with B.M.I. Our electrical requirements is 3 phase, 1.35 Kw. S30C occupy only one space and we hope B.M.I booth is next to Takai.

"I will also bring Sony Video Cassette (L-500 Betamax) of our automatic pressure cooker plant. Please contact Sony shop in Denver (Mr. Jack Emerson. Tel: 303-238-6493) and prepare Sony Videocassette Recorder (SLO-350) and Color TV. Many people can see our Automatic tofu plant.

"I will go to the U.S.A. alone and will stay at campus room. But please send me a list of off campus hotel.

"See you in Conference. Yours truly,..."

Note: Only 19 May 1981 Takai wrote a similar letter to Larry Needleman. In addition he asks Larry to print 1,000 each small-scale catalog and large-scale catalog in California. Shurtleff now sends out about 50 catalogs a month. Address: Manager of Overseas Department, Takai Tofu & Soymilk Equipment Co., 307 Inari, Nonoichi-machi, Ishikawa-ken 921, Japan. Phone: 0762-48-1355.

5073. Fillip, Janice. 1981. The amazing tofumobile. *East West Journal.* May. p. 38-40.
• ***Summary:*** Marc Horwitz has developed and runs a bicycle-powered vehicle for delivering tofu from Wildwood Natural Foods in downtown Fairfax to local natural foods stores. A state champion bike racer and avid cyclist. Marc takes about two and a half hours to service his route in Marin County. Paul Duchesne (whose photo is shown) recalls that an article in *East West Journal* that mentioned a book on tofu production (*Tofu & Soymilk Production* by Shurtleff & Aoyagi) inspired the founding of the business. Wildwood presently produces about 240 lb/day of tofu. Horwitz "envisions a time when the neighborhood tofu route joins the neighborhood paper route as a revenue source for local kids. The dream of a tofumobile network may be realized in the

© Copyright Soyinfo Center 2013

near future. Paul Orbuch and Marc Horwitz are discussing the logistics of combining automobiles and tofumobiles to deliver Wildwood products to Berkeley, a community 25 miles across san Francisco Bay from Fairfax."

Note: Talk with Paul Duchesne. 1989. Aug. 26. This vehicle was Paul's idea, inspired by the bicycle driven by Japanese tofu makers. Paul and Marc developed the actual vehicle together. Address: California.

5074. FIND/SVP. 1981. The tofu market: Overview of a high-potential industry. New York, NY: FIND/SVP. 140 p. May. No index. 28 cm. [34 ref]
• ***Summary:*** This report, largely plagiarized from Soyfoods Center documents without permission or credit, predicted that "tofu may be the next yogurt." The tofu market shows many parallels to the growth of the yogurt market. Tofu must break away from its bland image, like yogurt before flavors were introduced. Sales of tofu in the U.S. are predicted to grow from their present $50 million level to $200 million by 1986.

Contents: Preface. 1. Executive summary. 2. Tofu: History, background and definition. 3. Methods of production. 4. U.S. soybean supply. 5. Tofu products currently on the market. 6. Current market trends. 7. Institutional markets: School lunch programs. 8. Tofu and the consumer. 9. Major producers of tofu: Hinode Tofu Company, Inc., Azumaya, Inc., Quong Hop, Island Spring, Nasoya, New England Soy Dairy, Swan Gardens (Miami Beach, Florida), White Wave, Tofu Inc. (Roseville, Minnesota), The Soy Plant Co-op Inc., Northern Soy Inc., American Tofu Inc. (Brooklyn Park, Minnesota), Soy Shop, Lecanto Tofu, Traditional Tofu, Chicago Tofu Company, Hashizume Food Products Co.

10. Tofu imports. 11. Packaging. 12. Distribution. 13. Pricing and margins. 14. Advertising and promotion. 15. Market outlook and forecasts. Appendices: A. Names and addresses of major tofu producers in the U.S. B. List of tofu consultants. C. Bibliography of tofu literature. D. Tofu consumer survey questionnaire. E. Notes on the growth of the yogurt market in the U.S.

An advertisement is shown in Soyfoods magazine. 1981. Summer. p. 11. This study sells for $695 and its companion on Tofu Consumer Awareness sells for $650.

Concerning the growth of the dairy yogurt market in the U.S.: Though yogurt has been sold in the U.S. since about the 1930s, it did not enter the mainstream of American food consciousness until the late 1960s and early 1970s. They key event was the introduction of flavored yogurt varieties in 1968. Yogurt sales grew from 17 million lb in 1955 to approximately 580 million lb in 1978. In the ten years between 1968 and 1978, per capita sales of yogurt grew 325%–remarkable for a product that was so slow to catch on. In 1970, according to one survey, yogurt was perceived as a "new product" with 43% of consumers having eaten the product for less than one year. Yogurt's popularity has been attributed to changes in the American lifestyle: more health and weight conscious, faster paced, and more interested in natural foods. Yet yogurt is eaten mainly for its taste. Yogurt's protein is digested twice as fast as that of plain cow's milk. Only about 30% of Americans consume yogurt, and of those that do, 26.4% consume 76.2% of all the yogurt sold. The average American consumes about 3 lb of yogurt per year. U.S. sales of yogurt in the USA in 1980 were about $500 million; the market is highly decentralized, with about 100 manufacturers. Today yogurt, the "glamour of the dairy case," is the fastest growing dairy product in America.

Note: This is the earliest document seen (Feb. 1999) which compares the potential market for tofu with the current market for yogurt. Address: The Information Clearinghouse, 500 Fifth Ave., New York NY 10110.

5075. FIND/SVP. 1981. Tofu consumer awareness and purchasing patterns. New York, NY: FIND/SVP. 87 p. May. No index. 28 cm.
• ***Summary:*** A phone survey of 1,700 people nationwide in major metropolitan areas revealed that 33% of the total sample (819 respondents) had heard of tofu, 18% had tasted tofu, and 10% had purchased tofu. The greatest awareness was on the west coast. Reasons for purchase: Nutrition (65%; high protein content was cited by 45%). Blandness was cited as the major reason for disliking tofu. Address: The Information Clearinghouse, 500 Fifth Ave., New York NY 10110.

5076. **Product Name:** Canned Tofu, Instant Powdered Tofu [Powdered Soymilk with a Separate Coagulant], Silken Tofu.
Manufacturer's Name: Japan Food Corp. (Importer). Made in Japan.
Manufacturer's Address: San Francisco, California.
Date of Introduction: 1981. May.
Wt/Vol., Packaging, Price: Can.
New Product–Documentation: FIND/SVP. 1981, May. "The tofu market: Overview of a high-potential industry." p. 103. A tofu importer.

5077. Keltner, Steve; Druding, David; Littell, Annee. 1981. New Arkansas regional tofu producer: Summercorn Soyfoods. *Swallows* (*Newsletter of the New Destiny Federation of Food Co-ops, Fayetteville, Arkansas*). Spring. p. 8-9.
• ***Summary:*** The soyfoods business grew out of Summercorn Bakery. It is now producing tofu, soymilk, and soysage. Contains 6 photos of the tofu making equipment, including photos of Keltner, Druding, and Claudia Smith. Annee is Druding's wife.

5078. **Product Name:** Legume Tofu Lasagna.
Manufacturer's Name: Legume, Inc.

© Copyright Soyinfo Center 2013

Manufacturer's Address: 150 Bloomfield Ave., Verona, NJ 07044. Phone: (201) 857-9010.
Date of Introduction: 1981. May.
Ingredients: Feb. 1982: Crushed California tomatoes, organic tofu, water, whole soy and peanut oil, pure vegetable shortening, whole wheat flour, arrowroot, garlic, onion, oregano, basil, parsley, salt, pepper. Pasta: Fancy durum semolina pasta, soy flour, wheat gluten, wheat germ.
Wt/Vol., Packaging, Price: 1 lb.
How Stored: Frozen.
Nutrition: Per 8 oz.: Calories 296, protein 13 gm, carbohydrates 38 gm, fat 9 gm, cholesterol 0 mg, sodium 660 mg.
New Product–Documentation: Ad in Whole Foods. 1981. Sept. p. 56. "What's 2000 years old and tastes brand new? Tofu." States that Legume Tofu Lasagna is now available.

Food Report (Lehmann). 1982. Jan. Article in Soyfoods. 1982. Winter (Feb.), p. 56. Shows original lasagna label and lists all ingredients. Spot in Vegetarian Times. 1982. Issue #55. March. p. 59. A photo shows the original box with the Legume trefoil logo but no food illustration on cover. "Legume Inc. has announced the addition of Tofu Lasagna to its line of protein meals and snacks. This non-dairy, cholesterol-free meal is made with DeBole's Jerusalem Artichoke Flour–a specially created blend of organic tofu and spices, and an all-natural whole tomato sauce. Also available are Tofu Ravioli, Tofu Country Pie, Tofu Muffins, Tofu "No Creme" Pies and Tofu Cakes.

Label. 7 by 9 inches. Color boxes. Now it has color illustration of lasagna on cover. "A delicious meal by Legume. 100% natural. No cholesterol. No artificial preservatives. No sugar." The ingredients are now: Crushed tomatoes, organic tofu, whole wheat flour, water, soy and peanut oil, garlic, onion, oregano, basil, parsley, salt, pepper. Pasta: Unbleached fancy durum semolina, soy flour, DeBoles American (Jerusalem) artichoke flour, wheat germ, wheat gluten. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Article in Soyfoods. 1982. Winter (Feb.), p. 56. Shows original label and lists its ingredients. Ad in Whole Foods. 1982. March. p. 57. "What's 2000 years old and tastes brand new? Tofu makes the difference!" Same ad in Vegetarian Times. 1982. April. p. 27, and Whole Life Times. 1982. July/Aug. p. 20.

S.L. Jacobs. 1983. The Wall Street Journal. Jan. 24. "Company finds a niche selling frozen foods made with tofu." A large Italian food company [Celentano] went on to make Legume's first tofu lasagna in May 1982, and now produces all its products. Eventually the baked goods were dropped in favor of the Italian frozen products.

5079. Leviton, Richard. 1981. Soyfood nutrition: Inadequacies of knowledge. *Vegetarian Times* No. 46. May. p. 63-65. [2 ref]
Address: 100 Heath Rd., Colrain, Massachusetts 01340.

5080. Obis, Clare Barrett. 1981. The versatile soybean. *Vegetarian Times* No. 46. May. p. 66-71. [7 ref]
• ***Summary:*** One place you won't hear any arguments about soybeans is in the kitchen of knowledgeable cooks. "High in protein, fiber and minerals, soybeans are one of nature's truly universal miracle foods." "Here is a sampling of recipes from some of our favorite cookbooks" (cites 7).

How to use soy flour. Soy coffee cake (with 1 cup soy milk and 1 cup soy flour). Tofu cheesecake. Spiced tofu marinade. Tofu spinach pie. Soy burgers. Soya paté. Scotch eggs. Arancini Siciliani (Soybean and rice croquettes). Creamy tofu dip or dressing. Dairyless, eggless quiche. Scherezade casserole. Shepherd's pie (with tofu). Zuccanoes. Spicy Sichuan tofu. Soy stock gravy. Tofu stroganoff. Tofu stuffed mushrooms. Vegetable bean noodle bake. Address: Chicago, Illinois.

5081. Sano, Rinji. 1981. Minami no tôfu, kita no tôfu: Tôfu kasutera no kokyô [Southern tofu, northern tofu: The birthplace of tofu kasutera]. *Daizu Geppo* (*Soybean Monthly News*). May. p. 36-40. [Jap]
• ***Summary:*** The Japanese word *kasutera* comes from the Portuguese *castella* meaning a spongecake. It is probably named after the kingdom of Castile, which is now in Spain. Japanese kasutera is a damp, rich, sweet spongecake with a light, delicate texture. It is made from flour, eggs, malt syrup, and a mixture of finely granulated large-crystal sugar.

In Yokote city, Akita prefecture, scraps of tofu are sometimes added to the ingredients when making this delicious and popular spongecake; it is served with tea.

5082. **Product Name:** [Tofu Kit and Instruction Booklet titled "How I Make Tofu"].
Foreign Name: Tofu-Set und "So mache ich Tofu".
Manufacturer's Name: Verena Krieger.
Manufacturer's Address: Bruchmattstr. 24, CH-6003 Lucerne, Switzerland. Phone: 041-22 50 34.
Date of Introduction: 1981. May.
New Product–Documentation: Letter from Verena Krieger. 1981. May 29. "I have started to sell Tofu-Kits..." Letter from Verena Krieger. 1983. March 8. She sells a "tofu set." The instruction booklet that accompanies it is titled "So mache ich Tofu" (How I Make tofu). It is copyrighted 1981 by Verena Krieger and published jointly by Sojaquelle in West Germany and Oekullus (Bruchmattstr. 24, CH-6003 Lucern, Switzerland). A second edition was published in 1984. It contains many illustration and techniques from *The Book of Tofu* by Shurtleff and Aoyagi.

Letters from Verena Krieger. 1990. May 31 and July 5. She started to sell this wooden kit in 1981. It was made by Stefan Suhner in CH-6000 Lucerne. It is still available. Now it is made by Ulmenhof, CH-8973 Ottenbach, and sold by Engel Tofurei, CH-8913 Ottenbach.

© Copyright Soyinfo Center 2013

5083. Wang, Hwa L. 1981. Oriental soybean foods: Simple techniques produce many varieties. *Food Development* 15(5):29-34. May.
• ***Summary:*** Methods of preparation are given for the following soyfoods: Tofu, soy sauce, miso, hamanatto, sufu, tempeh, natto. A table gives local names, descriptions, and uses for traditional East-Asian non-fermented soyfoods: "Fresh green soybeans (mao-tou, edamame)," soybean sprouts (huang-tou-ya, daizu no moyashi), soybean milk (tou-chiang), protein-lipid film (tou-fu-pi, yuba), soybean curd (tofu, tou-fu, tubu, tahoo, touhu, taufoo, dou-fu, dan-fu), and soybean flour (tou-fen, kinako). Local names, organisms used, substrate, and description of the product are given for traditional East-Asian fermented soyfoods: soy sauce, miso, hamanatto, sufu, tempeh, and natto.

Note: This is the earliest English-language document seen (April 2013) that uses the word "taufoo" to refer to Chinese-style tofu. Address: NRRC, Peoria, Illinois.

5084. **Product Name:** Potato Salad (With Tofu Mayonnaise Dressing).
Manufacturer's Name: Wildwood Natural Foods.
Manufacturer's Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1981. May.
Ingredients: Potatoes, scallions, celery, tofu dressing (nigari tofu, safflower, apple cider vinegar, garlic, sea salt), spices.
Wt/Vol., Packaging, Price: 8 oz plastic tub.
How Stored: Refrigerated.
New Product–Documentation: Label sent by Wildwood on their letterhead. 1983, undated. 2.5 by 1.5 inches. Self adhesive. Black and green on white. Silhouette of woods with birds. "Ready to Eat Foods. Naturally. Perishable. Keep refrigerated."

5085. **Product Name:** Good Puddin' (Tofu Pudding).
Manufacturer's Name: Wildwood Natural Foods.
Manufacturer's Address: 135 Bolinas Rd, Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1981. May.
Ingredients: Fruits, tofu, carob.
New Product–Documentation: Fillip. 1981. May. East West Journal. p. 40 "The Amazing Tofumobile." Cohen. 1981. Nov. 23. San Francisco Business Journal. p. 6. "Good Puddin' is a product with fruits, tofu, and carob."

5086. Phillips, Kathryn. 1981. It's tough to be a tofu tycoon but Stein finally is on his way. *San Diego Union.* June 8. p. B-2.
• ***Summary:*** "Will soybean curd become a household word? Gary Stein, age 32, is father of San Diego's first full-scale tofu factory... About 3 years ago, Stein, a vegetarian who has been eating tofu since 1971, decided to get serious about a hazy dream he had of someday opening a tofu shop. He became an apprentice of sorts to Haruki and Mitchiko Koba at Oriental Groceries in downtown San Diego. The Kobas make about 90 lb of tofu each day for a few restaurants and regular customers. After about 13 months, Stein was ready to strike out on his own. The problem was money. Digging up financing for the novel business took some creative thinking. He received about $2,000 through a weekly newspaper advertisement promising readers that for a $100 investment, they would receive 1 lb of tofu a week until the investment was returned. Other money to start the business came in from relatives, friends and, in some cases, strangers who had heard about Stein's plans."

"He signed a lease on an abandoned service station next to a health-food restaurant at Fifth and Quince... Problems with the boiler and in getting certain equipment from Japan delayed the expected January opening about 5 more months. The factory is now turning out about 130 lb of tofu each day, and he and partner Sean Meloy hope to be making 300 lb daily in a few months to sell to local restaurants and markets." Stein is a tall, slender man who meditates 2½ hours each day and studies Taoism. Address: San Diego, California.

5087. O'Neill, K. 1981. America, God willing, becomes a tempe nation. *Tempo.* June 13. p. 49-50. [1 ref]
• ***Summary:*** Tempeh has started to be sold in Indonesian supermarkets. They are displayed on the stands at Pekan Raya in Jakarta. KOPTI was founded on 11 March 1979. The cooperative split off from a firm which equalized the distribution of soybeans, which are still imported and always in short supply. Indonesia requires 4,300 tons of soybeans a day. Of that total, 3,000 tons is for tempeh and 1,300 tons for tofu. KOPTI, which now has more than 12,000 members from 40 cooperatives, is headed toward mechanization.

Note: This is the earliest document seen (Sept. 2011) that mentions KOPTI. Address: New York.

5088. Jacklin, Michele. 1981. The Good Harvest Food Coop Inc. Soy what? For 10 years! *Hartford Courant* (*Connecticut*). June 18. p. B5E.
• ***Summary:*** Good Harvest, in Middletown, Connecticut (about 10 miles south of Hartford), is celebrating its 10th anniversary. The membership numbers between 600 and 700 depending on the time of year. The produce still looks fresh and the loaves of bread (some of which use soy as an ingredient) are freshly baked. "The tofu, sesame tahini paste, seven kinds of granola and carob are popular items, but not for junk food addicts who need their daily fix of additives and preservatives."

Several months ago the food coop added a snack bar, whose menu changes daily. "Favorites include lentil stew, sandwiches stuffed with hummus (garbanzo beans) and guacamole, tofu (soy bean curd) pot pie, carrot juice and

© Copyright Soyinfo Center 2013

carob brownies." During warm weather, "soy milk softees," which resemble milkshakes, are very popular. Meat and fish are not sold. Address: Staff writer.

5089. Arum, Nancy. 1981. Cooking what's light for summer. *New York Times.* June 21. p. L18.
• ***Summary:*** In Sea Cliff, "Cooking with natural foods" (Phone: 676-0242) is offering a course titled "Cooking with natural foods for summer, beginning and intermediate. One session course in tofu and a one-session course in desserts.

"Instructor: Melanie Nelia. Cost: $80 for four classes or $20 for individual sessions. Classes begin: Beginning of July. Type: Demonstration and limited participation. Maximum number in class: 10. 'What is tofu, how to make it and what to do with it' include recipes for barbecued tofu, tofu sauces and tofu pie."

5090. Giuca, Linda. 1981. Neighborhood markets are starting to sprout: Food notes. *Hartford Courant* (*Connecticut*). June 24. p. E6.
• ***Summary:*** The section titled "Tofu demonstration" says that the New England Soy Dairy will present one at FoodMart on Thursday from 10 a.m. to 4 p.m. "Recipe booklets and samples will be provided." Gives a recipe for Tofu eggless salad. Address: Food editor.

5091. Dosti, Rose. 1981. Trader Vic Bergeron offers timely tips on tofu. *Los Angeles Times.* June 29. p. 1, 6. Monday.
• ***Summary:*** Gives recipes for some of the most popular recipes at Trader Vic's Beverly Hills restaurant: Trader Vic's tofu chicken meatballs. Trader Vic's tomato beef (with tofu). Trader Vic's poached halibut with tofu. Trader Vic's Parmesan tofu. Chef Elmo Yee demonstrated how to make these tofu dishes at the restaurant. Photos show Yee and three dishes. Address: Staff writer.

5092. Chu, Yung-shung. 1981. Soybean protein food in China. *APCC Quarterly Supplement.* June 30. p. 23-27. [Eng]
• ***Summary:*** This article was first published in the Journal of the American Oil Chemists' Society (1981, Feb. p. 96A). Address: Oil and Fat Research Inst., Shaanxi, China.

5093. Murray, Megan Baldrige. 1981. Tofu fever in New York. 3 p. June 30. Unpublished English-language manuscript. Published in Japanese in Sept.
• ***Summary:*** "This American tofu lover, David Mintz... started experimenting with tofu as a milk and cheese substitute five years ago [i.e. in 1976]... Mintz found that he could make cream sauces, quiches, and souffles without needing to use dairy products if instead he used tofu. Says Mintz, 'I've got tofu fever. Its a food of the future, a miracle food... The whole secret is tofu's flexibility. It lends itself to becoming Dutch chocolate ice cream, and it can also become roast duck... I dream about it. Its a miracle food I never expected to see. I have to learn how to harness it.'

"After several years experimentation with ice creams based on tofu, Mintz is now producing his own tofu ice creams... in several flavors: vanilla, chocolate, maple-walnut, peach, apple, apricot rum, and peanut butter & chocolate. He is making 275 gallons a week... Mintz loves to introduce his customers to tofu. He is proud of the tofu wedding he recently planned, in which the bride and groom started off their married life on a tofu menu." Address: New York.

5094. Soy City Foods. 1981. Wholesalers of Tofu and other Soy Products (Ad). *Toronto Star* (*Ontario, Canada*). June 30. p. B13. Advertising supplement.
• ***Summary:*** "Soyateria–Soyfoods Specialty Shop. Try our fast, tasty, all natural soyfoods–to take out." Address: 2847 Dundas Street West, just east of Keele St. [Toronto]. Phone: 762-1257.

5095. *Toronto Star* (*Ontario, Canada*). 1981. New miracle food is protein rich Tofu (Advertorial). June 30. p. B13. Advertising supplement.
• ***Summary:*** A large advertorial in praise of tofu. An illustration shows a cake of tofu on a white plate.

"Just what is this tofu everyone is talking about?

"Tofu (pronounced TOE-fu) is a rich source of protein that can serve as the backbone of any diet–replacing or alternating with meat and dairy products. It originated in East Asia several millennia ago... In the West, it is known as soybean curd."

"Tofu has a white cheese-like consistency made from soybean curds just as cheese is made from dairy curds. Unlike cheese, Tofu is not fermented, aged and ripened."

5096. *Toronto Star* (*Ontario, Canada*). 1981. Many foods promote health (Advertorial). June 30. p. B11. Advertising supplement.
• ***Summary:*** "The subject of health foods opens a wide and complex canvas." What are they? Are they the same as "natural foods" and "pure foods"? Are they all organic?

"'Health foods are,' as Barbara Towns, manager of Soyateria Delicatessen in Toronto explains, 'anything that enhances the body. Anything that prmotes health instead of disease.'"

"Tofu is a health food staple. It is a soybean curd which looks like a block of cheese. It is high in protein..."

5097. Bassett, Barbara. 1981. Surprise! Its soy: New ideas for soy cookery from the Soyfoods Center. *Bestways.* June. p. 70-71, 74.
• ***Summary:*** This is an interview with William Shurtleff plus recipes for their latest favorite (previously unpublished) tofu recipes, including Yummy no-egg carob-applesauce cake with tofu, No-egg tofu carrot cake with tofu-tahini icing,

© Copyright Soyinfo Center 2013

Tofu cheesecake with strawberry topping, Tofu-apple-nut whole-wheat bread, Savory tofu cutlets (fried), Tofu carob parfait, Wonderful creamy tofu dip or dressing: our favorite latest discovery, and Eggless egg salad sandwich. Photos show: Each of the above recipes. Akiko Aoyagi seated behind a table on which are various tofu recipes.

Tempeh is mentioned as a source of vitamin B-12.

5098. *Daizu Geppo* (*Soybean Monthly News*). 1981. Saikin no tônyû shijô o kataru [Discussion of Japan's soymilk market today]. June. p. 4-23. [Jap]
• ***Summary:*** On May 22 industry leaders from various companies met to discuss the market. The industry is only about 10 years old. In 1980 the value of soymilk was estimated to be about 3,000 million yen, and in 1981 it was 5,000 million yen. About 3,000 tons of soybeans are used to produce soymilk compared with 450,000 tons for tofu. Soymilk and cow's milk complement one another as products, rather than competing. One is animal and the other is vegetable. Kids need more animal protein and adults need more vegetable protein. Soymilk gives stamina whereas dairy milk gives growth. The price of soymilk is a little higher than that of dairy milk. About 10% of Japanese are allergic to dairy milk. Kibun makes soymilk potage (thick and creamy soup) and also ice cream. Drinking a 50:50 mixture of soymilk and dairy milk gives a better flavor and complementary nutrition. At any department of the Kibun company they answer the phone by saying "Tonyu no Kibun" (Kibun, the soymilk company).

5099. Holazo, Ma. Ava F.; Punzalan, Erlinda J.; Gonzales, Olympia N. 1981. Development of instant soy tokua: Effect of freezing and chemical treatments. *Nutrisyon* (*Philippines*) 6(1):48-65. Jan/June. [10 ref]
• ***Summary:*** This study, undertaken under the ASEAN-Australia Economic Cooperation Program, is about making dried frozen tofu. Increasing the freezing time increases the product quality and rehydration ratio. Increased frozen storage also increases product quality and rehydration ratio. The use of magnesium sulfate as a coagulant gave better results than the use of calcium chloride or vinegar. Soaking the frozen tofu in sodium bicarbonate solution prior to dehydration also gave better product quality. Address: National Institute of Science and Technology, National Science Development Board, Philippines.

5100. Keough, Carol. 1981. Tofu goes All-American. *Organic Gardening* 28(6):97-99. June. [1 ref]
• ***Summary:*** "New recipes and techniques from our kitchen translate tofu into down-home cooking. Tofu seems weird to people who have never tried it. The word itself is funny. The English translation, bean curd, is even less appealing. If you buy some at a health food store or supermarket, and bite off a big hunk–you probably won't think it's delicious. Bland is the word for raw tofu.

"That's because tofu is an *ingredient,* to be combined with other foods. Like flour, cooking oil and yeast, it does not stand well alone. But, as those ingredients can be turned into a delicious loaf of bread, so can tofu be combined into a variety of wonderful dishes."

Contains tofu recipes which will appear in a upcoming book, *Home Soyfood Equipment:* Scalloped tofu au gratin. Quick blender tofu soufflé. Tofu and pineapple pastry filling. Carob tofu pudding.

5101. Krieger, Verena. 1981. Die schweizerische Sojaforschung [Soybean research in Switzerland]. Bruchmattstr. 24, CH-6003 Lucerne, Switzerland. 2 p. June. Unpublished manuscript. [Ger]
• ***Summary:*** Most Swiss people would be astonished to hear that there is a Swiss Soybean Growers Assoc. (*Vereinigung schweizerischer Soja-Produzenten; VSSP*), established in Nov. 1973 through the efforts of Dipl. agricultural engineer Edgar W. Schweizer. Following Schweizer's untimely death [on 15 April 1979], most of the practical soybean cultural experiments ceased. But private industry such as Nestlé is now showing active interest. Address: Lucerne, Switzerland.

• ***Summary:*** The United States is the world's leading producer of soybeans, harvesting 136 billion pounds a year. Yet instead of enjoying foods made directly from soybeans, we feed them first to animals, converting them into meat and dairy products.

"Meanwhile, East Asians, who have lived with the soybean for millennia, and who are not as affluent as we, have a simple, economical and healthful answer: simple, nutritious, inexpensive foods such as tofu, tempeh, soymilk, miso, and many others less known in the West." Address: Colrain, Massachusetts 01340.

5103. **Product Name:** Tofu, Silken Tofu, Tofu Dressings.
Manufacturer's Name: Little Prince (The).
Manufacturer's Address: Rehov Mac-Donald 16, Ramat Gan, Israel.
Date of Introduction: 1981. June.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: Joseph Fresco. They started in June 1981 and now use 24 kg/day of soybeans.

5104. **Product Name:** Tofu Time Non-Dairy Frozen Dessert [Carrot-Raisin, Chocolate, Vanilla, Walnut, Maple-Walnut, Peach, Apple, Apricot-Rum, or Peanut Butter-Chocolate].
Manufacturer's Name: Mintz's Buffet.

© Copyright Soyinfo Center 2013

Manufacturer's Address: 1040 Third Ave. (between 61-62 St.), New York City, NY 10021.
Date of Introduction: 1981. June.
Ingredients: Incl. tofu.
How Stored: Frozen.
New Product–Documentation: Poster. 1981, undated and roughly handwritten. Tofu Time. Non-Dairy Frozen Dessert. Glatt Kosher Pareve. "It's Beyond Cream." Cook. 1983. Home News (NY). Aug. 24. p. D1. "New frozen ice cream dessert uses healthy tofu as base for mix." Shurtleff & Aoyagi. 1985. Tofutti & Other Soy Ice Creams. p. 56. This product was renamed Tofutti in late summer, 1981. It was sold commercially inside Mintz's Buffet from that time, and to other retail outlets from May 1982.

5105. Photographs of Paul Duchesne and Peter Wiegand making tofu at Wildwood Natural Foods in Fairfax, California. 1981. Fairfax, California.
• ***Summary:*** These three color photographs (each 3½ by 5 inches) were taken in mid-1981 at the Wildwood Natural Foods tofu shop in Fairfax. They show: (1) The entire shop, including the red tile floor, taken from the back of the shop look out through the three big windows onto the street. On the windows, in large gold letters, is written "Wildwood Natural Foods." In the foreground are the mill and cooker. Near the windows are yellow soybeans soaking in buckets, a curding vat on wheels, a stainless steel sink, and Peter watching Paul cut tofu. (2) Paul, dressed in a white apron and tank-top white shirt, examining curds and whey in the curding barrel. He holds a stainless steel paddle in his right hand and his left hand rests on the rim of the vat. Peter is standing facing the camera, holding a stainless steel can of nigari, wearing high boots, a white apron, and a Tofu t-shirt. (3) Paul placing a cake of tofu into a bucket of water for delivery. The shop window and a stainless steel sink are in the background.

A fourth photo, black-and-white Polaroid, shows Michael Pierce, standing by a steaming cooker. The caption: "My first batch of tofu."

5106. **Product Name:** Tofu Pudding [Lemon, or Olallieberry].
Manufacturer's Name: Redwood Valley Soyfoods Unlimited.
Manufacturer's Address: P.O. Box 371, Redwood Valley, CA 94570.
Date of Introduction: 1981. June.
New Product–Documentation: Letter from Richard Rose. 1987. Aug. 29. 16 oz.

5107. Shurtleff, William; Aoyagi, Akiko. 1981. Survey of tofu production in the United States. Lafayette, California. 1 p. June. Unpublished manuscript.
• ***Summary:*** This is a handwritten (in pencil) table with 8 columns: (1) Shop name. (2) Type of shop. (3) Date interviewed. (4) Lbs of [whole] dry soybeans per week. (5) Lbs of tofu per week. (6) Size of building (square feet). (7) Sales ($). (8) Notes.

The survey began in April 1977 and continued to Jan. 1981. Only key information in each row will be included below.

The Soy Plant [Ann Arbor, Michigan]. March 1979. 2,000 lb/week of tofu. Jan. 1981. 5,600 lb/week of tofu.

Rochester Tofu [New York]. Jan. 1978. 1,000 lb/week of tofu.

Surata Soyfoods [Eugene, Oregon]. June 1978. 900 lb/week of tofu.

Island Spring [Vashon, Washington state]. June 1978. 5,500 lb/week of tofu. Jan. 1981. 2,300 lb/week of tofu.

Lecanto Tofu [Lecanto, Florida]. April 1978. 600 lb/week of tofu.

The Farm [Soy Dairy, Summertown, Tennessee]. June 1977. 1,125 lb/week of tofu.

New England Soy Dairy [Greenfield, Massachusetts]. March 1979. 4,050 lb/week of dry soybeans and 22,500 lb/week of tofu. Nov. 1978. 8,250 lb/week of tofu.

Swan Foods [Swan Gardens; Montana or Florida]. Confidential.

Ota Tofu Co. [Portland, Oregon]. April 1977. 4,165 lb/week of tofu.

Quong Hop & Co. [South San Francisco, California]. 10,000 lb/week of dry soybeans and 32,000 lb/week of tofu.

Azumaya [South San Francisco, California]. March 1979. 18,000 lb/week of dry soybeans. Building is 40,000 square feet. They are building a new, larger tofu factory.

Matsuda-Hinode [Los Angeles, California]. 27,000 lb/week of dry soybeans.

Northern Soy [Rochester, New York]. Aug. 1980. 2,000 lb/week of dry soybeans.

White Wave [Boulder, Colorado]. $450,000 sales in 1980. Jan. 1981. 5,833 lb/week of tofu.

Joy of Soy [Minneapolis, Minnesota]. June 1981. 4,000 lb/week of tofu. Traditional Tofu [Oakland, California]. June 1981. 15,000 lb/week of tofu.

Sunshine Soy Co. [Danny Paolucci, Coral Gables, Florida]. June 1981. 3,750 lb/week of tofu.

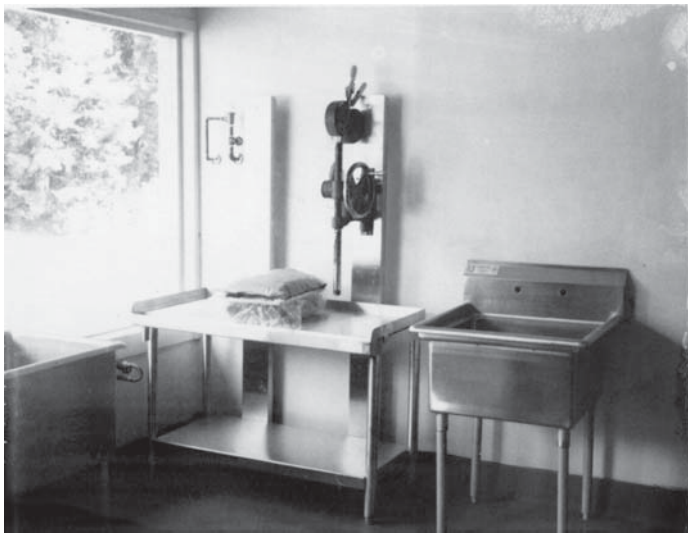
Panda Food Products [Woodhaven, New York]. June 1981. 14,000 lb/week of tofu (sold in bulk).

Nasoya Foods [Leominster, Massachusetts]. Jan. 1981. 11,700 lb/week of tofu.

Note: In 1979 the U.S. tofu industry used about 7,000 tons/year of dry soybeans. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

5108. Smith, Paul. 1981. Re: Pioneering work with debittered full fat soy flour and with soybeans in Australia. Soybean production in Australia. Letter to William Shurtleff at Soyfoods Center, undated. 2 p. Handwritten. Plus

© Copyright Soyinfo Center 2013



© Copyright Soyinfo Center 2013

comments on draft of History chapter.
• ***Summary:*** Comments on "History of Soya in Australia" manuscript: Vincent R. Smith was a soyfoods pioneer in Australia. In 1951-52 he began to manufacture Australia's first whole (full-fat) heat-treated (debittered) soy flour. From 1953-54 to 1974-75 V.R. Smith also canned soybeans in tomato sauce or puree. In 1956 he founded Soy Products of Australia Pty. Ltd. Between 1965 and 1974-75 Mr. Smith developed and manufactured two soyabean meat substitutes–Soya Bean Luncheon Loaf, and Savoury Roast–for Bellevue Health Supplies, as part of his product range within F.G. Roberts' Health Foods Proprietary Ltd. This latter company has since been absorbed within Soy Products of Australia Pty. Ltd. Technically and nutritionally these products were excellent, but they were discontinued due to rising labour costs, the small Australian market, and competition from larger, more highly automated companies like Sanitarium and Heinz. At the time, possibly due to the very cheap cost of meat in Australia, there was very little market interest in soyabeans either as a food, meat substitute, and/or extender.

By 1981 Soya Products of Australia Pty. Ltd. was making debittered full-fat soy flour and grits, Soy Crunch (a breakfast cereal containing soy grits), Soy Compound (containing dry soymilk, whole soy flour, malt, and lactose), and several types of Muesli containing soy grits. The company's main role is in supplying high grade, human consumption quality raw (enzyme active) and debittered (heat-treated) soy grits and soy flour to industry [food processors] for a wide variety of uses: cakes, biscuits, bread, bread premixes, pizzas, breakfast cereals and mueslis, hamburgers, smallgoods, baby foods, soy milk, soy ice cream, tofu, and calf- and piglet rations.

Interest in soyfoods is growing in Australia, and will continue to grow fostered by increasing health consciousness and the rising prices of meats of all kinds. After the end of the Vietnam war in 1975, there was a big influx of Vietnamese into Australia, swelling the number to 50,000, of which 30,000 are ethnic Chinese. There are also some 10,000 Indonesians currently residing in Sydney alone.

Letter: "Thank you for your hospitality during my visit to the USA... We are now more than fully occupied running, maintaining, and expanding our soy flour mill and our health food business. In the last two years we have made substantial improvements in our quality control, throughput, and heat-treatment process. We have also been working on improving our bulk unloading and grain cleaning system, and plans for extending and further automating our plant are well in hand... We are actively participating in research and development work on soy flour and its end uses: particularly in the areas of liquid and powdered soymilks and soy ice cream.

"We were amongst the first people in Australia to use soya beans to make products for human consumption, in particular heat-treated or debittered full fat soy flour. We were actively involved with the first commercial crops of soybeans grown in Australia in the early 1950s at Kingaroy; we even had a plot of several varieties of soyabeans growing in our own backyard for several years from about 1953-55. Though the bushes grow, the soybeans never mature properly. We also did some interesting work in canning beans in tomato sauce or purée and in manufacturing soy meat substitutes. In addition to our conventional bakery and small goods outlets, our own specialty products and breakfast cereals, we are now supplying several small manufacturers of tofu, soymilk with soybeans, soy flour (raw), and soy grits (raw) and have recently become involved in tempeh manufacture. The trend here in Australia is definitely following that in the USA and interest seems to have grown dramatically in the last year or so. Soyfoods seem to have taken off... Unless you can afford shiploads, freight to Australia is a killer, so we do our best to avoid importing soybeans.

"I am enclosing a recent newspaper article about a tofu producer. We supply him with soy flour for making his tofu and soymilk."

Concerning soyabean production in Australia: "Soyabeans are widely grown in Australia from just north of Shepparton in Victoria (120 miles north of Melbourne), through the Riverina district of southern New South Wales (NSW), through central, north, and northeastern NSW; the Darling Downs area (around Toowoomba) and Kingaroy districts of Queensland. More recently soyabeans have been grown in Western Australia, near Perth.

"A great deal of work has gone into developing suitable varieties of soyabeans for Australian conditions; much of this has been built on American research and experience. U.S., Chinese and Australian beans, while generally similar, are very different to handle and process, in our experience.

"Initially, soyabeans were grown under natural rainfall but this is now rare as bean size tends to be small and yield poor. Soyabeans are definitely not suited to dryland farming techniques. Nearly all soya beans now grown in Australia are grown under irrigation."

Update (March 1995): Paul Smith joined this family-run company in April 1980. In 1981 he was just starting to learn about its history. By 1986 he had done extensive research and writing (which see) on the company history, which showed that it had much earlier and very interesting origins. Address: Soy Products of Australia Pty. Ltd., 69 Power Road, Bayswater, VIC 3153, Australia. Phone: (03) 729-1738 or 729-3611.

5109. *Soyanews* (*Sri Lanka*). 1981. How to do it: Tofu as a meat substitute. 3(11):3, 8. June.
• ***Summary:*** How to make tofu on a small commercial scale. Describes the process then gives 3 tables related in costs and income: (1) What you require to make about 20 kilos of tofu a day (Prices as of Aug. 1980). A list of equipment and the price of each. Total price: Rs. 4,220. (2) Costs and returns:

© Copyright Soyinfo Center 2013

Variable costs + fixed costs: Rs. 145. Revenue: 210. Net profit per day: Rs. 65.00.

5110. Vaidehi, M.P. 1981. A few soyabean products requiring better attention. *Lal-Baugh Journal* (*The*) 26(2). April/June. [Eng]
• ***Summary:*** "Soyabean should be considered not primarily as a meat substitute, but rather as a food ranking with meat, eggs, milk, and cheese, in protein content and supplementing these foods in the diet."

"The most popular south Indian fermented breakfast foods are 'idli' and 'dose'" [dosai]. Their batters are naturally fermented with wild yeasts present in the atmosphere. Soya dhal could be used as a partial replacement for black gram dhal in making either of these popular foods. A recipe is given.

Recipes are also given for making tempeh, tempeh chips, tempeh curry, soy milk, soy curd and butter milk, tofu (like paneer). Cow's milk paneer retails for over Rs. 25/- per kg. whereas tofu retails for Rs. 8-10 per kg–less than half the price.

Note. This is the earliest English-language document seen (Oct. 2012) that suggests the use of the soya dhal or soya bean in preparing "dose" [dosai]. Address: Univ. of Agricultural Sciences, Bangalore, India.

5111. *Nation's Restaurant News.* 1981. Healthy tofu winning converts. Food of the future? July 6. p. 25.
• ***Summary:*** About Dik Rose, owner of Soyfoods Cafe in Redwood Valley, California. He serves sandwiches, soups, burgers, desserts and dips–all made with tofu. "His tiny restaurant, which has 10 seats, has been in operation three years and does about $2,000 a week in sales." Rose is not alone. Tofu is "becoming a mainstay at small nutrition-oriented restaurants across the country." Rose also owns a tofu company, which makes about 1,500 lb/week plus 40 gallons of soymilk. None of the foods served in the cafe contain any animal products. Items on the menu are described.

5112. Hymowitz, Theodore. 1981. The history of soybeans. Paper presented at the Soycrafters Conference, Fort Collins, Colorado. 8 p. July 8. Unpublished manuscript.
• ***Summary:*** This lecture was taped, with permission, by conference organizers. Soyfoods Center has an 8-page transcript of the tape, plus a copy of the audio tape. Contents: Introduction. Taxonomy of the genus *Glycine.* The origin and domestication of the soybean. Domestication of the soybean in Asia. Dissemination of the soybean to Europe. Dissemination of the soybean to the United States. The soybean industry in the United States. Address: Univ. of Illinois at Urbana-Champaign, Champaign, USA.

5113. Fleck, Michael. 1981. Soybeans gain popularity as uses for them grow. *Daily Camera* (*Boulder, Colorado*). July 15. p. 47-48.
• ***Summary:*** Discusses the forth annual conference of the Soycrafters Association of North America, held for 5 days last week at Colorado State University, Ft. Collins, Colorado. It attracted 250 members and enthusiasts from 22 countries. Steve Demos, co-founder and president of White Wave, says: "I thought I was starting a little cottage industry." In October 1977 he and Pat Calhoun opened a small tofu shop next to the Good Earth restaurant in Boulder and began putting in 14-hour days. Today White Wave has a large, modern plant with 12 employees who can barely keep up with demand.

William Shurtleff, the "Johnny Appleseed of soy," notes that the tofu industry's biggest challenge today is consumer education.

Thelma Dalman has been Director of Food Services for the Santa Cruz City Schools for the past 13 years. She has successfully introduced vegetarian entrees and now tofu into the 8,000 daily meals served at her 32 schools. She has lobbied successfully in Washington, DC, so that federal school lunch program regulations now allow the use of 30% tofu in combination with eggs or cheese as a "meat alternative," and 100% directly in dressings, spreads, and tofu mayonnaise. At this conferences, she and her senior partner, Maxine Prairie, ran a lively seminar on institutional cooking. "Tofu is the ideal solution to reduced school budgets and increased nutritional concern," she said.

5114. Mounts, T.L. 1981. Soycrafters annual meeting. *Northern Regional Research Center, Notes from the Director* (*Peoria, Illinois*) No. 1468. p. 1-2. July 17.
• ***Summary:*** "The fourth annual meeting of the Soycrafters Association was held on the campus of Colorado State University at Fort Collins, July 8-12. The foods receiving the most attention were tofu and tempeh, and modifications of them. Richard Leviton, Executive Director of the organization, pointed out that the growth rate of traditional soy foods is 25 to 30% each year, and he projected gross sales of $620 million by 1990. Currently the total sales are more than $50 million. California now has a pilot study on tofu for the school lunch program."

"Since 1979, the taste and appearance of soy foods served at these meetings has greatly improved. The tempeh burgers, served on a bun with lettuce and tomatoes, were exceptionally good." Address: Director.

5115. Watanabe, Hidekazu. 1981. Re: Early work by San-iku Foods in Japan with tofu and soymilk. Letter to William Shurtleff at Soyfoods Center, July 19. 2 p. Handwritten. [Jap]
• ***Summary:*** Discusses the early history of this product. "The Ueda Tofu Shop in Hachioji helped with the development of our first soymilk in 1957; I was there at the time. In those days our name was *San-iku Gakuin Shokuhin-bu,* not San-iku Foods. The purpose was to provide a place of labor for the

© Copyright Soyinfo Center 2013

students and opportunities to learn food processing. It was not a business. Dr. Perry Webber was the principal of our school at the time. I think that our company did not make commercial soymilk before 1957. The food company is said to have been founded in 1928 in connection with the school, but legally it did not become an independent company until December 1970."

Note: In 1969 the food company, named College Health Foods (later renamed San-iku Foods), introduced Soyalac soymilk. Address: San-iku Foods, Sodegaura-machi, Chiba-ken 299-02, Japan.

5116. Hevrdejs, Judy. 1981. Cheap eats–Mine Gen: Easy to miss, but worth the search. *Chicago Tribune.* July 24. p. B6.
• ***Summary:*** Mine Gen Chinese Restaurant, at 2709 N. Clark St., Chicago, features Peking-style cookery. The hot-sour soup includes "chunks of tofu." A spicy vegetable dish, "hot braised bean curd,... features creamy white cubes of the soybean curd tofu in a flavorful sauce" for $4.50. Address: Food editor.

5117. Kornblatt, Sasha. 1981. Re: Request for permission to use a quotation from *The Book of Tempeh, Vol. II* (*Tempeh Production*). Letter to William Shurtleff and Akiko Aoyagi at New-Age Foods Study Center, July 24. 2 p. Typed, with signature on letterhead.
• ***Summary:*** "Since we moved into our new facility, things here at Surata have been very exciting. While we are still a co-operative, we have organized to insure a strong management to effectively respond to the fast pace of the food industry. In May, I became Marketing Manager."

At the new plant, for the first time, Surata is able to produce more than the demand. "While natural food stores have always been responsive and pioneering accounts for us, that market is saturated and becoming increasingly competitive..." Now Surata is working to become "competitive and effective in the supermarket arena. We have been doing very well in a supermarket that sells [tofu in] bulk, surprisingly, and we are planning to approach other accounts with a co-ordinated, professional, and service-oriented view.

Sasha has been working with a graphics firm to redesign Surata's logo and labels. She encloses a copy of their new tofu label. "We are also switching to eight-ounce tempeh as we redesign the package." She requests permission to use a quote from *The Book of Tempeh, Vol. II* on their new tempeh label.

Note: The permission was granted in writing. Address: Marketing Manager, Surata Soyfoods, Inc., 302 Blair Boulevard, Eugene, Oregon 97402. Phone: (503) 485-6990.

5118. Abrams, Bill. 1981. The next yogurt? Sales of tofu will quadruple. *Wall Street Journal.* July 30. p. 23, Western ed.; p. 27, col. 1, Eastern ed.
• ***Summary:*** ..."to $200 million by 1986, predicts FIND/SVP. It found that one of every three food buyers is familiar with the bean curd. 'Even with appropriately promoted and branded products,' the research concern says, it'll take 5 to 10 years for tofu to equal yogurt's present popularity."

5119. Miller, Dwight L. 1981. Tofu studied. *Notes from the Director: Northern Regional Research Center* (*Peoria, Illinois*) No. 1470. p. 1. July 31.
• ***Summary:*** "Over the past decade, the food habits of Western consumers have slowly changed. A growing interest in foods of plant origin has become evident, especially among younger Americans and those living in large cities. These consumers may have medical, philosophical, or religious reasons for choosing vegetarian diets. One food product that is gaining general acceptance and attention is soybean curd or tofu.

"Tofu, a highly hydrated gelatinous product, has been the most important source of protein in the Orient since Liu An (179 B.C.-122 B.C.) of the Han dynasty invented the method of preparation. Today, tofu is prepared in essentially the same way that it was more than 2,000 years ago. Soybeans are washed, soaked, and ground with water. After the bean slurry has been boiled and filtered through cheese-cloth, it yields a milk-like product known as soybean milk. When bittern (the bitter mother liquor that remains after salt is crystallized from seawater), gypsum, or vinegar is added to the hot soybean milk, curd forms; this curd is pressed to form a soft, whitish cake or tofu. Tofu production is estimated at $50,000,000 and is growing at a rate of 25-30% per year.

"Hwa Li Wang (PL) has made a study of the conditions for making various types of tofu. The results of this study, to be published in *Process Biochemistry,* suggest that in processing tofu the quality and quantity can be manipulated by selection of coagulating conditions, such as type and concentration of coagulants, temperature, and mode of mixing, as well as pressure applied to remove the whey. By observing selected conditions, uniform products can be obtained from the same lot of soybeans or from other lots of the same variety of soybeans. Some of the results from this study were presented earlier this month at the Soycrafters annual meeting in Fort Collins, Colorado (Issue 1468). As a result of this presentation, Mr. Richard Leviton, Executive Director of the Soycrafters Association, has written a personal letter to Dr. Tallent supporting and commending the work of Drs. Wang and C.W. Hesseltine (FL) on traditional foods." Address: Acting Center Director.

5120. Strayer, George M. 1981. Re: Pro-Nuts and Soy Ahoy soynuts. Letter to William Shurtleff at Soyfoods Center, July 31. 2 p.
• ***Summary:*** During the year ending 31 March 1981, Edible Soy Products Inc. used slightly less than 2,000 tons of raw soybeans in producing Pro-Nuts. "It is my understanding

© Copyright Soyinfo Center 2013

that Malt-O-Meal is no longer making a soynut product. They had their inventory of finished product up for sale a while back, with the announcement that they were going to utilize their facilities to manufacture other products. I have not personally contacted them, but I have not seen any Malt-O-Meal products on shelves of either health food or grocery stores in the past few months."

Strayer is very upset with Richard McIntyre of Swan Gardens who is refusing to pay for $10,000 worth of soybeans. Address: President, Agricultural Exports, Inc., P.O. Box 266, Hudson, Iowa 50643. Phone: 319-988-4593.

Address: Soy Plant, Ann Arbor, Michigan.

5123. **Product Name:** Tofuna (Tofu-Based Meatless Tuna).
Manufacturer's Name: Garden of Eatin'.
Manufacturer's Address: 5300 Santa Monica Blvd., Los Angeles, CA 90029.
Date of Introduction: 1981. July.
Ingredients: Tofu, vegetables, soy oil, apple cider vinegar, barley malt, natural herbs & spices, sea salt.
Wt/Vol., Packaging, Price: 16 oz.
New Product–Documentation: Article and photo in Soyfoods. 1981. Summer. p. 44-45.

5124. **Product Name:** Fresh Viili Starter, Powdered Tempeh Starter, Homemaker Light Rice Koji Spore Kit [for Amazake], Natural Terra Alba Calcium Sulfate (Tofu Coagulant).
Manufacturer's Name: GEM Cultures.
Manufacturer's Address: 30301 Sherwood Rd., Fort Bragg, CA 95437. Phone: 707-964-2922.
Date of Introduction: 1981. July.
New Product–Documentation: Letter from GEM Cultures. 1981. "Just a few words about our Powdered Tempeh Starter. Our PTS is prepared on the same all vegetable (non dairy, non animal origin) medium on which our Living Tempeh Starter is grown." It is mixed with sterilized flour to extend it.

Letter from Betty Stechmeyer of GEM Cultures. 1991. Oct. 18. These three basic products were introduced in July 1981.

5125. Jacobson, Al. 1981. Labels that tell...sell. *Soyfoods* No. 5. p. 44-45. Summer.
• ***Summary:*** Jacobson is the 67 year old founder and president of Garden of Eatin', Inc. in Los Angeles. Across the bottom of the article are clear photos of the labels of six soyfood products: Cottage Tofu, Tofuna, Mild Jerky Soy, Tofu "No Cheese" Cake (cheesecake), Vegie Yaki, and Ice Dream. Across the top of the first two labels is printed the registered trademark "Tofu never had it so good!"

Two photos show Jacobson in a chef's top hat, across the front of which is written "Wizard of foods." Address: Garden of Eatin', Los Angeles.

5126. Leviton, Richard. comp. 1981. Soyfoods in America. The Fourth Annual Soycrafters Association Conference on Producing and Marketing Soyfoods: Schedule, abstracts, expo information, the menu, registration list, and directory of instructors. Colrain, Massachusetts: Soycrafters Assoc. 150 p. Held 8-12 July 1981 at Colorado State Univ., Ft. Collins, CO. No index. 28 cm.
• ***Summary:*** These proceedings were given to the registrants when they arrived. Schedule: Wed., July 8. Lectures: Directions for the soyfoods industry, by Richard Leviton. Soyfoods: Protein source of the future, by William Shurtleff.

Thurs., July 9. Class period 1: Review of tofu-making equipment, by Larry Needleman. International soyfoods cooking class, by Melodie Phipps. Small business management, by Dr. Harry Kreuckeberg. Tofu plant tour. Seminars: Sensory evaluation, part I, by Adrian Pearson. Soyfoods & human nutrition, part I, by Dr. Joseph Rackis, chairman. Home soymilk preparation, by Linda Gilbert. Tempeh production laboratory, by Dr. Clifford Hesseltine [NRRC, Peoria, Illinois], chairman. Class period 2: Soyfoods master chef cooking class, by Akiko Aoyagi. The Real Food Tofu Cafe, by Dik Rose. Soyfoods marketing strategies, by Dr. Harry Krueckeberg. Tofu plant tour. Tempeh production laboratory II, by Dr. Clifford Hesseltine, chairman. Lecture: Low cost extrusion cooking, by Dr. Judson Harper. Expo opens. Class period 3: Cooking soyfoods, macrobiotic style, by Rebecca Greenwood. Effective advertising and promotion, by Dr. Harry Krueckeberg. Seminars: Levels of tofu production, Luke Lukoskie, chairman. Introduction to nutrition and dietary analysis, by Jennifer Andersen & Suzy Pelican. Lectures: The view from tofu towers, by Thelma Dalman. The history of soybeans in the West, by Dr. Theodore Hymowitz. The year in review: Progress, problems & challenges, by William Shurtleff.

Fri., July 10. Class period 4: Tofu in Ecuador cooking class, by Ricardo Jennings. Quality control of soy products, by Dr. Joseph Maga. Labor / management relations, by Dr. Ron Wiggins. Demonstrations: Tofu making, at White Wave, Boulder, Colorado. Soymilk ice cream, by Jamie Stunkard & Al Jacobson. Extrusion cooking, by Dr. Ron Tribelhorn. Seminars: Soyfoods & human nutrition, by Dr. J. Rackis, chairman. Sensory evaluation, part 2, by Adrian Pearson. Business management, by William Scott. Class period 5: Soyfoods master chef cooking class, part 2, by Akiko

© Copyright Soyinfo Center 2013

Aoyagi. The small tofu shop, by Dik Rose. Tempeh making demonstration, at White Wave. Lecture: The nutritional value of extruded foods, by Dr. Richard Jansen. Expo open. Class period 6: How to open a tofu or tempeh plant, by William Shurtleff. Infant and child nutrition, by Dr. Barbara Smith. Soyfoods desserts cooking class, by Darrilyn Jackson. Seminar: Recall programs for soyfoods, by Dr. Joseph Rakosky. Lecture: Soyfoods & the natural foods industry, by Gil Johnson. Tofu cheesecake bake-off awards. Live music & refreshments.

Sat., July 11. How to open a tofu business on nothing down, by Al Jacobson. Soyfoods & the kosher market, by Chananyah Kronenberg. Government taxes and small business, by Dr. Terry Lantry. Demonstrations: Design and maintenance of the soy plant, by Steve Fiering (at White Wave). Soysage production, by Jamie Stunkard & Bob Davis (at White Wave). Seminars: Quality assurance programs, by Dr. Joseph Rakosky. Tofu and institutional feeding, by Thelma Dalman and Maxine Prairie. Class period 8: Sweden's first tofu plant, by Dr. Ted Nordquist. Quick home tempeh method, by Linda Gilbert. Frozen tofu cooking class, by Robin Clute. Expo open. Lecture: Tofu from cottonseeds, by Dr. Khee Choon Rhee. Class period 9: Tempeh microbiology and technology, by Chananyah Kronenberg. Financial management, by Dr. Oscar Varela. Tofu production cost control and analysis, by John Baldwin. Mexican village soya cooking class, by Blanca Dominguez. Seminar: Principles of tofu production, by Dr. Hwa Wang, Dr. C. Hesseltine, Dr. K.C. Rhee. Dinner. Square dance.

Sunday, July 12. Class period 10: Soyfoods in the North Woods cooking class, by Demetria Nanos Hamdorf. Workers & management / conflict resolution. What are organic soybeans, by Ardell Andersen. Open technical seminar on soyfoods, by William Shurtleff. Tempeh producers roundtable: Dr. Clifford Hesseltine, chairman. Lectures: The woman's role in promoting soya in Mexico, by Blanca Dominguez. Morinaga aseptically packaged tofu, by Kunisuke Kuwahara. Closing remarks, by Richard Leviton.

A SANA business meeting was held on Sat. July 11, starting at 7:00 p.m., moderated by Luke Lukoskie of Island Spring (president) and Richard Leviton (Executive Director). Format: President's report, by Luke Lukoskie. Financial report, by Richard Leviton. Proposals, by Richard Leviton. Open discussion. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

5127. Leviton, Richard. 1981. Directions for the soyfoods industry. Paper presented at the annual Soyfoods Association Conference, Ft. Collins, Colorado. 12 p. Unpublished manuscript.
Address: 100 Heath Rd., Colrain, Massachusetts 01340.

5128. Leviton, Richard. 1981. MU Tofu in Chicago. *Soyfoods* No. 5. p. 28. Summer.
• ***Summary:*** MU Tofu Shop, owned and operated by Rebecca and Yoshiharu Uchida, is a steam jacketed kettle tofu plant located in the Korean district of Chicago. The company began tofu production on 1 June 1979 and now makes 3,000 lb of tofu a week. A description of the process and equipment is given. Besides 2 styles of tofu, MU turns out 300 five-ounce pieces of deep-fried tofu pouches. Photos show: Rebecca and Yoshiharu Uchida, and Richard Park. A man stirring the contents of a cooker, with a stone mill in the foreground. Address: Colrain, Massachusetts.

5129. Leviton, Richard. 1981. Using okara. *Soyfoods* No. 5. p. 41-42. Summer.
• ***Summary:*** Gives details of the recipe, process, and packaging for three types of soysage made in the USA. Island Spring, Inc. (Vashon Island, near Seattle, Washington) makes 500 lb/week of Smoked Soy Loaf. Four photos show this product being made; the ingredients are mixed in a Leland mixer, steamed, sliced into 16-ounce slabs, and packaged. One pound retails for about $1.90.

At Redwood Valley Soyfoods Unlimited (Redwood Valley, California), owner Dik Rose makes 100 lb/week of Brightsong Soysage. And at Light Foods (St. Louis, Missouri), owner Bob Davis makes up to 300 lb/week of Soyloaf. Address: Colrain, Massachusetts.

5130. L.H. 1981. Tofu salad with nuts, vegetables. *Sunset* (*Menlo Park, California*) 167(1):144. July. Central edition.
• ***Summary:*** This recipe for Deviled Tofu Salad includes medium-firm tofu, peanuts or walnuts, and various vegetable. Address: Auburn, California.

5131. Londin, Louise. 1981. Soy delis & Mintz's Buffet. *Soyfoods* No. 5. p. 6-7. Summer.
• ***Summary:*** Discusses the Good Nature Deli in Oak Park, Illinois, started on 14 December 1980 by Kevin O'Brien and Mary Ellen Sackett; The Soyateria in Toronto, Canada, situated in front of Soy City Foods and started in 1980 by Jon Cloud; and Mintz's Buffet (Glatt Kosher Cookery and Catering) in New York City. "David Mintz's popular recent contribution to tofu cookery is his creamy, delicious Tofu Ice Kream, which has been attracting large numbers of people into the shop. It is an original blend of tofu, soymilk, fresh fruits, natural essences of apples, figs and raisins, pure wildflower honey, egg whites, and soy oil. It comes in such tempting flavors as country vanilla, old fashioned chocolate, strawberries n' kream, peaches n' kream, apples n' kream, dutch nut chocolate, and apricot rum. At the Buffet, they call him Mintz, the Prince of Tofu." Photos show: David Mintz at his Tofu Time ice cream machine. The deli case at Mintz's Buffet.

5132. **Product Name:** Tofu Time Tofu Ice Kream [Country Vanilla, Old-Fashioned Chocolate, Strawberries n' Kream,

© Copyright Soyinfo Center 2013

Peaches n' Kream, Apples n' Kream, Dutch Nut Chocolate, or Apricot Rum].
Manufacturer's Name: Mintz's Buffet.
Manufacturer's Address: 1040 Third Ave. (Between 61-62 St.), New York City, NY 10021.
Date of Introduction: 1981. July.
How Stored: Frozen.
New Product–Documentation: Londin. 1981. Soyfoods. Summer. p. 6-7. "Mintz's Buffet." Note: Londin designed the first poster and menu on which the term "Tofu Ice Kream" appeared. Nation's Restaurant News. 1981. Sept. 14. "His (Mintz's) most popular item is an imitation ice cream made with tofu and called 'tofu ice kream.'" Shurtleff & Aoyagi. 1985. Tofutti & Other Soy Ice Creams. p. 56. This product was renamed Tofutti in late summer, 1981. It was sold commercially inside Mintz's Buffet from that time, and to other retail outlets from May 1982.

5133. **Product Name:** Deep-fried Tofu Pouches (Aburage).
Manufacturer's Name: MU Tofu Shop.
Manufacturer's Address: 1735 W. Greenleaf, Chicago, IL 60626. Phone: 312-743-1339.
Date of Introduction: 1981. July.
New Product–Documentation: Leviton. 1981. Soyfoods. p. 28.

5134. Needleman, Larry. 1981. Tofu plant profiles: Swan Gardens, Miami. *Soyfoods* No. 5. p. 26-27. Summer.
• ***Summary:*** Swan Gardens, located in Industrial Miami, is a family-run business which was started by and is now owned by Jocelyn and Dick McIntyre. It has 6 employees, including the McIntyre's daughter and, earlier, Jocelyn's mother. "The company began in St. Ignatius, Montana in 1978 where they produced 500 pounds of tofu weekly from a small shop situated on an organic vegetable farm, Jocelyn McIntyre had been making tofu at home for 8 years previously and finally yielded to her friends' encouragement to produce tofu commercially. In August 1979 they sold their company and farm and used the proceeds to launch Swan Gardens in Miami, which they opened in January 1980. They wanted to get into tofu in a big way and Miami seemed like a promising, wide-open market. Today they manufacture 2,100 lb of firm, vacuum packaged tofu, 5 to 6 days weekly, and distribute over 50% of it outside of Florida, often as far as Illinois and Ohio." A detailed description of the tofu production process and equipment is given. "What I find most impressive about Swan Gardens is their excellent application of American equipment to fashion a smooth production flow in a very clean and well maintained plant. They are among a few innovative companies that are trying vacuum-packing tofu as a way to extend shelf life and attract customers. Jocelyn McIntyre describes the company as 'a stable, solid business with a good work crew.' They are preparing an okara tempeh for the market and plan to release soysage and baked tofu in the future." Photos show: (1) Dick McIntyre and his daughter, Cecilia/Ceci, standing behind a 200 gallon tank of soymilk (p. 26). Ceci and her grandmother (Joci's mom) preparing tofu for vacuum packaging (p. 27). Address: Bean Machines Inc., Bodega, California.

5135. Needleman, Larry. 1981. Tofu plant profiles: Sunshine Soy, Miami. *Soyfoods* No. 5. p. 29-30. Summer.
• ***Summary:*** Sunshine Soy is owned and operated by Danny Paolucci in Coral Gables, a suburb of Miami. "Starting in 1970 when he became acquainted with the vegetarian diet and the food uses of soybeans, Mr. Paolucci has been 'screaming soybeans,' as he remarks. In the mid-1970s he was cook at the Mt. Baldy Zen Center in California where he experimented with soybean dishes and made community scale miso. In 1974 he wanted to open a soy plant but there was no technology or information available; existing Oriental plants were unwilling to help him. In December 1977 he linked up as manager with the meteoric Swan Foods of Miami, an early multiproducts soy company that in its one intense year of business lost some $140,000. Mr. Paolucci emerged from the experience with considerable insight and some manufacturing equipment so that in June 1980 he was able to launch his own soy venture"–Sunshine Soy.

The company now makes 500-750 lb of tofu a day, plus tempeh, baked tofu, soymilk, miso salad dressing, and soysage. Photos show: Danny Paolucci. A hydraulic forming box press. A clamshell sealer. A Chisholm-Ryder screw extractor; unfortunately it is no longer manufactured. Address: Bean Machines Inc., Bodega, California.

5136. Rakosky, Joseph, Jr. 1981. Tempeh today: Report from Indonesia. *Soyfoods* No. 5. p. 34-35. Summer.
• ***Summary:*** This year Rakosky traveled to Southeast Asia on behalf of the American Soybean Association (ASA), the Foreign Agricultural Service (FAS), and the USDA. He visited five countries: Philippines, Singapore, Malaysia, Thailand, and Indonesia. The purpose of his trip was to encourage people to use soy protein products in their foods and the report his impressions on the market potential.

In Indonesia he found that soymilk was being made in villages by licensed businesses for use in schools; it was flavored with ginger and contained 8% added sugar and 0.03% salt. Plans were underway to start a special soymilk project in which the beverage would be retorted, then distributed in shelf-stable cans and bottles.

Dr. F.G. Winarno, head of Nutritional Research and Development at the Agricultural Institute of Bogor in Jakarta, is involved in a program to improve the nutritional level of Indonesians living in villages. His group is concerned with the design and construction of equipment suitable for village level food processing.

Dr. Winarno said the biggest change in tempe processing occurred in 1976 when the university showed tempe makers

© Copyright Soyinfo Center 2013

that they could get a better product, faster, by incubating their inoculated soybeans in plastic bags rather than in the traditional banana leaves. "'Twenty years ago the people of Java ate tempe and the Chinese ate tofu,' Dr. Winarno explained. 'Today they are both considered national dishes for the Indonesian people.'" About 70% of the soybeans in Indonesia are used to make tempe, with 20% used to make tofu. The biggest tofu maker in Indonesia uses a little less than 10 metric tons per day.

There follows a detailed description of how tempe and tempe starter are made commercially in a traditional Indonesian shop. "The government requires tempe shops to offer small preparation areas for villagers to use to make their own tempe."

"While the Chinese make up about 4% of the total population, they control about 80% of the wealth; obviously they are the country's businessmen, an imbalance the government is trying to correct."

KOPTI is an cooperative organization of independent tempe and tofu makers, mostly small companies, with a current membership of 2,035. To become a member, a company pays a one-time fee (depending on the size of the company) then a monthly fee of $1.62. Members buy their soybeans from KOPTI, which presently handles 4,800 metric tons a month and uses its large volume to get low prices. KOPTI also helps its members upgrade their products and schools them in sanitary practices.

"Since tempe is so popular in Indonesia, one would expect to find it in local supermarkets, but it cannot be found there." A photo shows a small tempe shop in Jakarta, with soybeans being soaked in metal barrels. Address: Morton Grove, Illinois.

5137. **Product Name:** Cal-gari Tofu (Regular Tofu made with a Blend of Calcium Sulfate and Nigari Coagulants).
Manufacturer's Name: Redwood Valley Soyfoods Unlimited.
Manufacturer's Address: P.O. Box 371, Redwood Valley, CA 94570.
Date of Introduction: 1981. July.
New Product–Documentation: Letter from Richard Rose. 1987. Aug. 29. Bulk packing.

5138. Ridenour, Jeremiah. 1981. Honey extractor for tempeh [centrifuge/dewaterer]. *Soyfoods* No. 5. p. 50. Summer. [1 ref]
• ***Summary:*** For beginning or small-scale tempeh makers who wish to get into business on a shoestring. After converting a dead refrigerator into an in incubator, you can get a low-cost, manual centrifugal honey extractor for cooling and drying the cooked soybeans or splits. Describes how to convert the equipment to tempeh use, and how to use it. The total cost of the extractor and conversion was about $125. A list of two honey equipment suppliers is given. A photo shows the cylindrical extractor and its internal basket. Address: Santa Cruz, California.

5139. Ridenour, Jeremiah. 1981. Tofu has a fling with cling [peaches]. *Soyfoods* No. 5. p. 44-46. Summer.
• ***Summary:*** "On April 12 to 14 in Sacramento, California, institutional tofu awareness took a step forward. A well-respected organization called the Cling Peach Advisory Board decided to use tofu as the theme of their exhibitors booth at the 1981 California School Food Service Association's (CSFSA) 28th Annual Meeting. In conjunction with Thelma Dalman of Santa Cruz City Schools, the Cling Peach group tested several recipes using peaches and tofu.

"Allen Burgi, who is the food service director for Cling Peach, is the source for Cling's enthusiasm about tofu. Allen visits Japan yearly and provides the Japanese with American cling peaches for their school lunch programs. Allen also had a more personal experience with tofu. By eating tofu in various forms twice a day he lost 19 pounds in 60 days. Tofu couldn't have found a better sponsor than Allen and Cling Peaches.

"Allen needed a tofu addict to answer the questions that were bound to arise when tofu appeared with Cling Peach at the CSFSA. Thanks to Thelma Dalman's recommendation, Allen asked me to appear at the exhibition and to write a short statement ('What ever food service operator should know about tofu'), which was handed out during the show." Address: Santa Cruz, California.

5140. Rosenau, J.R.; Herrick, J.P. 1981. Cheddar cheese & tofu mixtures. *Soyfoods* No. 5. p. 9-10. Summer. [3 ref]
• ***Summary:*** Using tofu to extend cheddar cheese has some advantages over using typical soy-based extenders. "(1) The flaking step mixes lipoxygenase (the 'off flavor' enzyme) with substrate generating flavor problems that are hard to correct.

"(2) Heating the flakes to inactivate growth inhibitors often produces toasted flavors.

"(3) Raffinose and stachyose remain in the meal causing potential flatus problems.

"(4) Excess fiber remains in the meal causing texture problems in the extended cheese."

To make processed tofu-cheddar cheese, drain tofu and press it in nylon press cloth until only about 60% moisture remains. Mix 27% tofu with 73% aged, extra-sharp cheddar cheese, grind the mixture, the homogenize using a colloid mill. Emulsify, adding 2.5% disodium phosphate as an emulsifying salt; heat and agitate as the pH rises to 6-7. Add 6N hydrochloric acid the adjust the pH downward to 5.5–5.7. Form into molds, package, and cool to 1.1ºC. The manufacturing cost of this product is estimated to be 23% below regular sharp cheddar cheese. Address: 1. Dep. of Food Engineering, Univ. of Massachusetts, Amherst, MA 01003; 2. General Foods Corp.

Tofu and yuba in China, Taiwan, and Korea. 17. Farmhouse tofu for large families. 19. The ethos and tradition of handmade tofu production. 20. Making tofu in a traditional shop. Appendices: A. Tofu restaurants in Japan. B. Varieties of tofu in East Asia. C. People and institutions connected with tofu worldwide (Incl. directory of tofu manufacturers). D. Sources of supply for tofu production. Bibliography. Glossary. Favorite tofu recipes. About the authors and their work (autobiographical). Tofu–An opportunity for poor and rich lands. The tofu kit (from Sojaquelle in West Germany and Oekullus in Switzerland).

Note 1. This is the earliest publication seen (April 2013) that uses term "Tofurei" to refer to tofu shops / manufacturers. The term was coined by Gabriele Furth-Kuby of Ahorn Verlag.

Note 2. "Sojaquark" is used to refer to soymilk curds rather than to tofu. Published in a hardcover edition only. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

5142. Shurtleff, William. 1981. Soycrafters conference speech: The year in review, 1980-81. Paper presented at Fourth Annual Soyfoods Association of North America (SANA) Conference, Colorado State University, Fort Collins, Colorado. July 8. 14 p. Unpublished manuscript.

• ***Summary:*** In outline form: Discusses the major events of the past year, month by month, overall developments, and the main problem: To build a strong trade association. The conference was held on 8-12 July 1981. Address: Co-founder and director, Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

5143. Shurtleff, William. 1981. William Morse: The father of soybeans in America (Continued–Part II). *Soyfoods* No. 5. p. 56-60. Summer.

• ***Summary:*** Continued: "It is truly remarkable that the authors were able to write such a complete and detailed book when neither of them had been to East Asia. (Morse would later spend two years there; 1929-1931.) Most of the book was actually written by Morse who, nevertheless, kindly listed Piper as the senior author. He gathered his information and photographs by extensive correspondence with researchers throughout East Asia and apparently drew heavily on a large collection of books on Chinese agriculture called the Swingle Collection, named after Walter T. Swingle of the Office of Crop Physiology, who spoke Chinese, had traveled extensively in the Orient collecting plants and the books, and had housed them at the USDA library, where Morse did much of his research. Decades ahead of its time, *The Soybean* soon became the standard work on the subject and was referred to by many as 'the soybean bible.' Dr. Piper died in February 1926 at the age of 69.

"Morse's fine work was already starting to give real substance to Piper's dream. In 1920, Morse helped to found the American Soybean Association (ASA) and thereafter helped to unify and direct an ongoing program of research and experimentation. Morse distributed seed from new introductions to anyone interested in soybeans. Among his closest contacts at the State Agricultural Experiment Stations were W.L. Burlison in Illinois and C.B. Williams in North Carolina. As late as 1927, most soybean agronomy research was still done on plots in Washington, D.C. outside the USDA south building. Morse sent out seeds to the states but farmers had problems; they shattered at maturity, were hard to harvest, and were abrasive on the binder canvas in those days before combines. Thus in the early years the tide of interest in soybeans ebbed and flowed. Doubters were always ready to laugh at anyone who talked of the soybean becoming a major U.S. farm crop. But this only served to spur Morse on to greater efforts. He was a very effective extension worker with many contacts, a deep knowledge of his subject, and good intuition. His desk at the USDA soon became the clearing house for information about the soybean. In 1927 he wrote: 'We may keep this work going and place the soybean where it belongs–in the King row with King Corn and King Cotton.'

"The Dorsett-Morse Expedition to East Asia (1929-1931): In the late 1920s it became evident to the USDA that the soybean had definite promise as a crop in America and it was decided to send W.J. Morse and P.H. Dorsett to East Asia for two years on what was officially known as the Oriental Agricultural Exploration Expedition (but which people interested in soy usually call the Morse Expedition) to 'make investigations regarding the utilization of the soybean in Oriental countries and the securing of varieties that might be of value to widespread American conditions' (Morse, 1929). In 1929 when the expedition left, Morse was age 45 and had worked on soybeans with the USDA

© Copyright Soyinfo Center 2013

for 22 years. Dorsett (1862-1943), now age 67, was a plant explorer from the USDA Office of Plant Introduction; he was described by a fellow agricultural explorer, David Fairchild, as one of the most ingenious and indefatigable workers he had ever known. Whereas Morse was a specialist, interested in soybeans, Dorsett was a generalist, interested mainly in persimmons, but also in grasses, forages, and other plants.

"During the expedition, Morse and Dorsett kept detailed daily journal notebooks, which were typewritten after the trip and bound in 17 hardback volumes. These volumes, primarily the work of Dorsett, also contain correspondence plus thousands of black-and-white photographs taken by both men. In the bound volumes there are several references to a 'special report on the soybean and its products' that Morse intended to write. Apparently he never completed it, although he did complete detailed chapters on tofu and soymilk. The only original copy of the documents described above is in the archives of the American Soybean Association in St. Louis, Missouri. [Note: As of 2011, it is in Rare and Special Collections, at the National Agricultural Library, Beltsville, Maryland].

"The group arrived in Tokyo on March 18, 1929, and set up headquarters. In August they traveled to Hokkaido, the northernmost island of Japan and center of soybean production, where they studied both soybean cultivation and food uses. In December 1929 they returned to Tokyo and spent full time until March 1930 collecting soyfoods and studying their production and use. On April 1, 1930, they arrived in Dairen, Manchuria, to study soybean cultivation and oil extraction. Dorsett left Morse in the summer of 1930 and went to Peking. He did not rejoin Morse on the trip, although he wrote regularly. Morse went to Korea on August 22, to Mukden in Manchuria on September 29, back to Dairen, the oil-processing capital of East Asia, and then to Peking on October 20; Morse apparently spent only 20 days in China on the entire trip. In late December they took a ship from Dairen back to Kyoto and then Tokyo. On February 17, after several more months of soyfoods research in Tokyo, they sailed for America, arriving in San Francisco on March 4, 1931. Morse's collection efforts–months of tramping through the fields of East Asia–were a bonanza. He discovered that almost every village in the Orient had its own distinctive soybean varieties, developed during thousands of years of close cultivation and inbreeding. Unlike their Western counterparts, Chinese farmers didn't think of looking for improved varieties in nearby villages and then growing these in their own village. They loyally grew the varieties that had been handed down by their honorable ancestors, and wouldn't dream of growing a variety handed down by someone else's ancestors. Morse's major accomplishments on the expedition were: (1) he collected approximately 4,600 distinct soybean seed samples representing roughly 2,000 soybean varieties and including 150 large-seeded vegetable type varieties collected mostly in Korea and Japan; all of these were introduced into the U.S. germplasm collection; (2) he realized for the first time the superiority and potential of the vegetable-type soybeans for food use and later played the leading role in propagating them and teaching others of their value; (3) he developed a much better understanding of soybean growing methods and technology; and (4) he collected more than [commercial] 250 food products made from soybeans, which he took back to America, and did by far the most extensive studies on soyfood production of any Westerner up to that time.

"In his journals and letters, Morse wrote more than once that he was 'amazed at the extent to which the soybean was used for food in Japan.' He was intrigued by the techniques for making tofu, miso, shoyu, natto, and other soyfoods, spent many days in small shops with producers, and described their processes in great detail, taking hundreds of pages of typed text with hundreds of photographs.

"The two-year trip was a tremendous adventure for both Morse and Dorsett. Morse later remarked that he considered it the highlight of his career. He was finally able to fully grasp the great potential of the soybean, which he had only been able to glimpse through his years of reading and work in America." Continued. Address: Soyfoods Center, P.O. Box 234, Lafayette, California.

5144. Shurtleff, William. 1981. William Morse: The father of soybeans in America (Continued–Part III). *Soyfoods* No. 5. p. 56-60. Summer.

• ***Summary:*** Continued: "Later years in America (1931-1959): Morse returned to America in March 1931 with great enthusiasm and interest in transmitting to America all that he had learned in East Asia. He was now a principal agronomist at the USDA Bureau of Plant Industry. With the stage set for the fruition of years of work and research that would transform the place of the soybean in the Western world, let us pause for a minute to ask, 'What kind of a man was Bill Morse?'

"In appearance, he was tall and lean, with a kind face and soft features. Farmers all over America, with whom he had met and talked in their fields, might remember his baggy suspendered pants, loose tie, and slouched hat, his great interest in their problems and successes.

"George Strayer, editor for 27 years of the American Soybean Association's *Soybean Digest*, who had known Morse since 1927, said of him: 'He was a quiet, unassuming, yet brilliant fellow, not particularly dynamic as a speechmaker, but intensely interested in seeing soybeans progress. He would sit up half the night talking with people about soybeans and soyfoods.'

"An article by Mary Burr Pieters in the September 1944 *Soybean Digest* described Morse as 'modest and retiring but sure and right as rain... He studied, he traveled, he toiled, he experimented–he exhorted–and the result of all of this singleness of purpose and devotion surely borders on

© Copyright Soyinfo Center 2013

fantastic.'

"Edward J. Dies, his close colleague, described him in Gold from the Soil as 'heedless of material gain or personal honor, shy, modest, agreeable, and easy going, but with the repressed intensity of a crusader.' Martin G. Weiss, who worked under Morse for many years and succeeded him when Morse retired, said of him: 'He was a kindly man, always willing to encourage and give moral support to his subordinates. He was loved by all, and his employees worked hard–they never wished to disappoint him.' His daughter Margaret described him in 1980 by saying: 'He was a gentle, soft-spoken person, who liked others and they liked him. He liked to tease, and the secretaries at his office all loved it. He was a very easy person to get along with; he was slow to anger and never cursed. He wasn't aggressive; where some might push, he would give in. He was intelligent. His work came first. He was not financially ambitious.'

"After returning from East Asia, Morse was more interested than ever in soyfoods, and much of the subsequent increasing interest in America derives from his efforts. He expanded his work with the USDA Office of Home Economics in Washington, D.C. and interested researchers in the Department of Home Economics at the University of Illinois to get involved with research on soyfoods, especially on use of the large-seeded, vegetable-type soybeans he had brought back from East Asia. He encouraged development of soyfoods recipes suited to American tastes and talked a lot about soyfoods at American Soybean Association meetings and many other gatherings. Working with others, he was largely responsible for the development of soy flour and grits. One entire wall of Morse's Washington office was covered with floor-to-ceiling shelves, filled with soyfood samples from Asia.

Except for Dr. Harry Miller, Morse was probably the first soy researcher in America to make soyfoods a regular part of his diet. While in East Asia, he and his family had become very fond of Oriental cooking, and especially of soyfoods, and they enjoyed them often after returning to America. Of the many recipes they brought back from the Orient, Morse's favorite was sukiyaki. He built a low sukiyaki table with a hot plate on top and cushions around it on the floor in his home and at every opportunity would invite over guests to serve them his specialty which of course featured tofu and sprouts. He also liked to take family and friends out to a good Chinese or Japanese restaurant. The family enjoyed using soy flour when making breads, muffins, or waffles. Morse's mother [Edna] liked to cook him fresh green soybeans and his wife regularly fixed him her favorite Boston Baked Soybeans. Morse loved soymilk ice cream; one magazine ran a full-page photo of him happily eating it. He also regularly enjoyed tofu, soymilk (plain and acidophilus), and soymilk yogurt, and these foods became increasingly important in his largely meatless diet after he found he had an ulcer. In fact he once told George Strayer that, with his ulcer, he felt these soyfoods had greatly extended his life and good health.

"Morse also actively continued his soybean selection and propagation work at the Arlington Farm. He realized more than ever that if the soybean was to become a national crop that hundreds of different varieties, adaptable to different latitudes, soils, and climates, would have to be found and developed by breeding. He was especially interested in working with farmers and the USDA to stimulate research and development on the vegetable-type soybeans, which had been little more than a curiosity prior to his trip to East Asia. While Morse was the first to popularize the vegetable-type soybeans, he was not the first to introduce them. The variety Easycook (which took less than half as long as most field-type soybeans to become tender after boiling) was introduced to the U.S. in 1894 and the Hahto was introduced in 1915. Morse mentioned both of these in *The Soybean* in 1923 but did not mention the term 'vegetable-type soybeans,' and was apparently unaware of their significance. Many of the vegetable-type soybeans that Morse brought back from East Asia were grown out and starting in 1934, distributed to various state agricultural experiment stations for trial.

"Up until 1928, Morse, in charge of soybean research, had been the only USDA employee working full time in this field. In 1928 the USDA hired a second full-time soybean researcher, Jackson L. Cartter, who had just graduated with a master's degree from Iowa State College. From 1928 to 1933 Cartter did soybean research on a farm in Holgate, Ohio that was managed by the Ohio Experiment Station. From 1933 to 1936 Cartter worked directly under Morse at the USDA Experiment Station, Arlington Farm, Virginia; he tested, grew out, and classified many of the soybeans from Morse's trip to East Asia. In 1936 Cartter helped to organize the U.S. Regional Soybean Laboratory at the University of Illinois. He became the first director of its agronomic division and was placed in charge of the soybean breeding program for the 12 Midwestern states; he studied the soybean's oil and protein composition, and served as director of the laboratory until his retirement in 1965.

"Unfortunately the long-term results of Morse's collection efforts in East Asia are not what they might have been. It was estimated in 1980 that only 25,000 acres of the 70.1-million-acre U.S. soybean crop were planted in vegetable-type soybeans, a mere 0.04 percent of the total. They have never become popular here for various reasons; they give 20 to 30 percent lower per-acre yields than field-type soybeans, tend to shatter easily at maturity and are thus hard to harvest, and consequently sell for 12 to 18 percent more than other soybeans. If they were less expensive, large amounts would probably be used in East Asia to make tofu, soymilk, tempeh, and miso by producers who already buy their beans from America." Continued. Address: Soyfoods Center, P.O. Box 234, Lafayette, California.

5145. Shurtleff, William. 1981. William Morse: The father of soybeans in America (Continued–Part IV). *Soyfoods* No. 5. p. 56-60. Summer.
• ***Summary:*** Continued: "Moreover, in the U.S. only about 11,350 tons of soybeans (a mere 0.02 percent of the total U.S. crop) are used directly as food in a lightly processed form that allows the virtues of the vegetable-type bean (better flavor and texture, higher protein, larger seeds) to shine through. About half of the U.S. vegetable-type soybeans are exported to soyfoods producers in Japan and Europe and half are used for American soyfoods. The major uses, in order of importance, are for tofu, soynuts, soymilk, whole canned (mature) soybeans, and tempeh.

"Bill Morse was a strong supporter of the American Soybean Association. He was at the founding meeting in 1920 and was elected president three times (1924, 1925, and 1932). Pioneer soybean grower, E.F. 'Soybean' Johnson later said that 'for many years the ASA existed mainly through Morse's untiring efforts.' He was the mainspring that kept the clock ticking year after year through good times and bad. In 1944 George Strayer said: 'Morse might be called the 'daddy' of the American Soybean Association as well as of the soybean in America, since our organization has probably leaned on him more than any other man through the years. He has always been a guiding light and missed few if any meetings (except 1929-31 when he was in Asia). It is doubtful if anyone can equal his record.'

"Morse was a highly competent researcher and a prolific writer. Between 1910 and 1950 he wrote some 87 articles and bulletins on soybeans and soyfoods, including The Soybean–in addition to making hundreds of speeches. Many of his articles appeared in publications of the American Soybean Association. He was editor of the Association's first publication in 1928 entitled *Proceedings of the American Soybean Association*, which contained 192 pages of papers given at the annual ASA conferences between 1925 and 1927. He contributed several papers to this volume, including 'The Distribution of Soybeans in the U.S.' (1927). He was also a frequent contributor to the *Soybean Digest*, which the ASA started in November 1940.

"The first article on soyfoods run by *Soybean Digest* was an article by Morse about vegetable-type fresh green soybeans entitled 'Shanghied... A Super Food' (July 1941). His second article was also on vegetable-type soybeans, 'Soys in Food: Future of Vegetable Varieties' (September 1945). In 1951 he wrote 'What's in a Name,' describing the significance of the poetic names given to varieties of soybeans in East Asia.

"In November 1949, when Morse retired after 42 years of service, he was known throughout the world, but especially in the U.S. and East Asia, for his work on soybeans and soyfoods. In 1907, when he started work, the soybean was such a small crop that no records of its production were kept. One measure of the success of his work is the amazing expansion of the crop from about two million bushels in 1919 to 9.4 million in 1929, 91 million in 1939, and 200 million in 1949.

"On retirement, Morse turned his work over to Martin G. Weiss, a professor of plant breeding and genetics from Iowa State University. From his home in Takoma Park, Maryland, where he had lived since 1917, Morse moved to Eastchester, New York, next door to his daughter, Margaret, who had accompanied him on the trip to East Asia. During the last ten years of his life he worked from time to time on his book on soyfoods (which, unfortunately, he never finished), did a lot of reading and gardening (he planted his own vegetable-type soybeans and enjoyed them each spring as fresh green soybeans, or later in the season, as mature cooked soybeans), and kept in active touch with the world of soybeans and soyfoods through many visitors and an extensive correspondence. He continued to enjoy soyfoods in his home meals.

"On the morning of July 30, 1959, at age 75, William J. Morse died of a cerebral hemorrhage at his home in Eastchester, New York.

"The work of Bill Morse runs like a bright thread through the whole tapestry of soybean and soyfood development in the Western world. We can pay no greater tribute to the man than to carry on his work and help fulfill his dream.

"For their help in providing information related to this article, the author would like to thank Mrs. Walter Thalman (Morse's daughter), George Strayer, Martin G. Weiss, Theodore Hymowitz, Jackson Cartter, R.W. Howell, and Verna Donavan." Address: Soyfoods Center, P.O. Box 234, Lafayette, California.

5146. Southfork Tofu Cafe. 1981. July. New soyfoods restaurant or deli. 322 Fuller Ave., Helena, MT 59601.
• ***Summary:*** R. Leviton. 1982. Vegetarian Times. April. "On the road for the fast food burger: A soy deli odyssey." Ad for "South Fork Cafe" in Montana Prospect (undated), page 9. Questionnaire filled out by the 3 owners: Bruce Anfinson, Vicki Keller, Richard Saravalli. ca. 1982. "Originated last May. Open for business July 1." Menu for "The Southfork." about 1982. 5147. Soycrafters Association of North America. 1981. Soyfoods in America (T-shirt). 100 Heath Rd., Colrain, MA 01340.
• ***Summary:*** This beige T-shirt is 100% cotton. On the front is an 8.5-inch diameter illustration of a person (Richard Leviton) standing behind a vat of hot soymilk, stirring in the coagulant to make tofu. The drawing, by Akiko Aoyagi Shurtleff, is brown, largely inside of a circle, against a

© Copyright Soyinfo Center 2013

background that goes from red at the bottom, through orange, to yellow at the top. It is largely the same as the Association's logo. Around the bottom of the circle, in outline brown capital letters is "Soyfoods in America." This T-shirt was developed by Richard Leviton for the annual soyfoods symposium at Colorado State University. Address: Colrain, Massachusetts.

5148. *Soyfoods.* 1981. Mini-Mite Bean Mill. No. 5. p. 55. Summer.
• ***Summary:*** "The need by the small-scale, traditional-style tofu shop for an inexpensive, all stainless steel, sanitary soybean mill prompted Bean Machines, Inc. to develop their new 'Mini-Mite.' This economy model uses the same heavy rotor, screen, and control disc as their huskier models, but utilizes standard food service industry stainless steel containers for its housing. The result is a powerful, but lighter, machine, powered by a two-horsepower motor with a capacity of 100 pounds of dry soybeans per hour, compared with capacities of 300 and 600 pounds for the heavier-duty models. The Model M6C combines simplicity and efficiency and uses a 'butterfly' rotor rotating at 3600 rpm (driven by a two horsepower, 115/230 volt single-phase motor, painted with sanitary white enamel) within a 360 degree stainless steel screen. The control flow disc meters the beans for an even, steady feed. The M6C is constructed from lightweight 304 stainless steel with sanitary surface finish inside and outside. The Mini-Mite has a 3¼-inch diameter inlet, a 2 x 3 inch outlet, a two-blade removable hammer with one full circle perforated screen (inside dimension 6 inches x 2 7/16 inch high). The Mini-Mite comes with a one-year warranty against mechanical defects and sells for $1485 with a four-week delivery time. For more information, write: Bean Machines, Inc., P.O. Box 76, Bodega, CA 94922; tel. (707) 876-3341." Address: Bean Machines, Inc., P.O. Box 76, Bodega, California 94922.

• ***Summary:*** Contains a recipe for Tofu Tamale Pie that serves 50. A photo shows Maxine Prairie as she mashes tofu. Address: Director of Food Services, Santa Cruz City Schools, California.

5150. *Soyfoods.* 1981. Innovative soy technologies [at Food Protein Research and Development Center, Texas A&M University]. No. 5. p. 13. Summer.
• ***Summary:*** On 14 April 1981 the Food Protein Research and Development Center (FPRDC) at Texas A&M University celebrated the official opening of its new 28,000 square foot facility with a two-day industrial open house and oilseeds conference. Dr. Edmund Lusas, the center's director, prepared an informative program and tour of the innovative pilot plant. Dr. Khee Choon Rhee is assistant director and Dr. J.T. Lawhon is pursuing new commercial applications.

A photo shows a large extrusion cooker that has been used to make cottonseed tofu (called TAMU-curd), roasted cottonseed nuts (TAMU-nuts), and textured vegetable protein. It might be a new tool for making tofu from soybeans. Address: Food Protein R&D Center, Texas A&M Univ., Faculty Mail Box 183, College Station, TX 77483.

5151. **Product Name:** Mexican Pastry (With Tofu)
Manufacturer's Name: Tofu Shop (The).
Manufacturer's Address: 768 18th St., Arcata, CA 95521.
Date of Introduction: 1981. July.
Ingredients: Tofu, brown rice, beans, onions, salsa, herbs, spices, whole wheat flour, soy margarine, sea salt.
Wt/Vol., Packaging, Price: 6 oz.
How Stored: Refrigerated.
New Product–Documentation: Label. 1983. 3 inch diameter. Self adhesive. Green, blue and yellow on white.

5152. Wagner, Martha. 1981. Soy down under. *Soyfoods* No. 5. p. 11-12. Summer.
• ***Summary:*** First discusses the work of Marcea Weber and Debbie Schmetzer in Australia. Marcea Weber owns The Soybean Factory located just outside of Sydney, Australia. Debbie, formerly a tofu maker at Surata Soyfoods in Eugene, Oregon, is now living in New Zealand, where she plans to start a soyfoods business. "Marcea, originally from New York, began her tofu business three years ago, about a year after arriving in Australia from England where she operated a small natural foods bakery. Koreans and Chinese were already producing large volumes of tofu in Australia but her business was the first to produce a nigari tofu. After three years, tofu is still quite foreign to Australians, Marcea says...

"The Soybean Factory sells to natural food stores, restaurants, and juice bars. It produces only 600 half-pound blocks a week. Using simple Takai machinery with a 45-gallon Australian pressure cooker, only 30 pounds are produced in each batch so the selling cost is high, about double U.S. prices, and much higher than Korean and Chinese tofu sold in Australia." "The factory employs three production workers and a manager. Marcea does the promotion. She also spends much of her time teaching cooking and nutrition classes at the East-West (Macrobiotic) Center, which she and her husband, Daniel, an acupuncturist, established when they arrived in Australia."

In New Zealand, "no one outside the Chinese community had even heard of tofu until an Auckland health food store, Harvest Whole Foods, began producing it in a backroom kitchen last October [1980]. The enthusiasm for tofu was shown by several restaurants doing an alternative lifestyle festival, which featured tofu burgers, has produced healthy sales for the shop. The three owners, Greg and Ricky Chalmers and Ricky's wife, Elizabeth, are producing about 170 to 299 kilos (374 to 440 pounds) of tofu a week. They

© Copyright Soyinfo Center 2013

expect sales to grow and are planning to expand production facilities."

Debbie Schmetzer arrived in New Zealand in Jan. 1981 with her husband, Peter (who was born in New Zealand) and their young son. She describes the process and ingredients used to make tofu at Harvest Health Foods, then notes that "Even in the Chinese community, only two Chinese restaurants are making tofu. Harvest's main customers are Indonesians, vegetarians, people switching from dairy to soy on the advice of naturopathic doctors, and spiritual seekers such as Hare Krishna and Divine Light people." On the Run is a fast food deli that makes excellent tofu dishes in Auckland, including tofu burgers, curried tofu salad in pita bread, and tofu tacos with locally made tortillas.

Letter from Martha Wagner. 1981. July 24. "Before this article went to press I learned that Debbie and her husband had become disillusioned with attitudes in New Zealand toward food and organic agriculture, red tape, and toward setting up business–especially concerning a mold to make tempeh. So they took off for greener pastures in Australia. They are now mulling over the scene in the Melbourne are and may well do a bagel business combined with a soy deli. She would be a good person for a soyfoods information center there. Address: 35 Flower Street, Essendon 3040 Victoria, Australia.

"For the addresses of the Koreans and Chinese making lots of tofu in Australia, contact Marcea Weber, 29 Belmore St., Rozelle 2039, NSW.

"Did you meet the Australian couple Fred and Radhika Koch at the SANA conference? They are planning to set up a good size tofu operation as a support for a 26-person community in the country." Address: USA.

5153. Dukess, Karen. 1981. Tofu, tofu everywhere. *New York Times.* Aug. 2. Section 3. p. 17, col. 1.

• ***Summary:*** Yogurt didn't catch on in America until Dannon added fruit to the plain product in 1968 and won the hearts of a newly diet-conscious nation. Yogurt production climbed from 44 million pounds in 1960 to 589 million pounds in 1980. Production of tofu and tofu products in 1980 was about 52 million pounds. But Tom Timmins, owner of New England Soy Dairy, predicts that tofu could be the yogurt of the 1980s.

The big American food companies aren't biting yet. "'Most companies are aware of the incredible blood, sweat, and tears it will take to create another yoghurt,' said Timothy Metzger, director of new products/planning at Dannon."

The Hinode Tofu Co. started in Hawaii in 1939, and opened in Los Angeles in 1947. Today it is the largest in the USA, producing 20,000 lb of tofu a day. It reaped $110,500 profit on $3.5 million sales last year.

Mintz's Buffet is a "kosher-soy delicatessen in Manhattan. David Mintz, the buffet's owner, became intrigued when asked to create a kosher beef stroganoff. Answer: substitute tofu for the sour cream, which under Jewish law cannot be mixed with meat. Now, after four years in the kitchen, Mr. Mintz has created an all natural, no cholesterol tofu ice cream that looks and tastes like the real thing. Producing 200 gallons a week, Mr. Mintz says he cannot satisfy the demand, which includes a request from Mt. Sinai hospital for 500 portions daily. There are also tofu bran muffins, vegetable pies, and salads–plus a $2,000 tofu wedding, from tofu roast duck to tofu wedding cake.

"But the real future of tofu could lie in Washington [DC]. If President Reagan has his way, the Child Nutritional Program (mainly the National School Lunch Program, which serves approximately 4,350 million meals a year) will have to cut $1,500 million from its annual budget. Now tofu costs roughly $1.10 a pound, while hamburger is upward of $1.50 and fish over $3. (Chicken runs more like 71 cents, but that includes bone.) With that sort of math in mind, an Agriculture Department task force recommended last month that tofu be accredited to the program."

Note 1. This is the earliest document seen (Feb. 1999) which conceives of tofu as "the yogurt of the 1980s." This theme would repeated many times during the 1980s.

Note 2. This is the earliest document seen (Oct. 2001) that contains industry or market statistics on soy ice cream for individual companies.

5154. Sobocinski, Sylvia. 1981. Tofu: destined to become as American as apple pie. *Country News* (*Massachusetts*). Aug. 6.

• ***Summary:*** About tofu and Nasoya Foods, which is owned by John Paino and Bob Bergwall. They met 10 years ago when they lived in the same dorm and played soccer at Hartwick College in Oneonta, New York. That's when they got interested in natural foods and in providing an alternative to meat. Then they explored different jobs for several years. John sailed the seas as a licensed Captain and also worked as a sales representative for his father-in-law. Bob worked as a gourmet cook on Nantucket Island and then used his biochemistry background working as a lab technician in Boston.

After reading "The Book of Tofu" by Shurtleff and Aoyagi they made some small batches of tofu at home, then decided to start producing it for natural food stores. They have been making tofu commercially for the past 3 years. Today they use 2,100 lb of organically grown soybeans a day to make 4,500 lb of tofu. Nasoya in now producing 5 unique spreads. Paino predicts that within the next 5 years tofu will be as popular as yogurt in America. A photo shows Paino.

5155. Magida, Phylis. 1981. How to eat well and still kiss salt, sugar, and fat goodbye. *Chicago Tribune.* Aug. 10. p. A11.

• ***Summary:*** Many Chinese, Japanese and Korean dishes consist largely of vegetables. Instead of using meat, many

© Copyright Soyinfo Center 2013

use tofu (soy bean curd) as a protein source, since tofu contains no cholesterol and relatively little fat. When eaten with rice, the protein quality of tofu increases.

To decrease salt intake, use a low-salt soy sauce available from Yamasa soy sauce company. Or you can decrease the amount of salt or soy sauce by increasing the amount of garlic and/or ginger.

5156. Sass, Lorna J. 1981. Soy foods: Versatile, cheap and on the rise. *New York Times.* Aug. 12. p. C1, C6. Widely syndicated.

• ***Summary:*** The article begins: "Soy foods have come west and, apparently, are here to stay. No longer restricted exclusively to the world of woks and cleavers, soybeans in America are now patted into soyburgers, and tofu (soybean curd) is puréed into soy mayonnaise, baked into 'cheesecake' and fried as 'cutlets,' while soy milk emerges from the blender as a frothy carob shake or from the freezer as cantaloupe 'ice cream.'

"Because soy foods are an inexpensive source of protein, low in fat and completely cholesterol-free, they have been attracting more and more attention among the growing number of weight-conscious, health-conscious and dollar-conscious Americans. Until recently, soy sauce was the only soy product familiar to most Americans.

Contains a long discussion of David Mintz (owner of Mintz's Buffet, a kosher delicatessen at 1040 Third Avenue at 62nd Street). He makes a tofu ice cream, and a tofu-spinach quiche. "A large Japanese company wants to buy exclusive rights to distribute Mintz's tofutti 'ice cream' in Japan. 'The more dishes I make with tofu, the better my business is,' said Mr. Mintz." He is frequently called upon to cater "tofu weddings."

Also discusses Light Foods in St. Louis (Missouri), and the Rochester Soy Deli (in New York). "Two of the people most responsible for introducing soy foods to Americans are William Shurtleff and his wife, Akiko Aoyagi, who in 1975 wrote 'The Book of Tofu,' a comprehensive cookbook and introduction to the untapped potential of soy foods as an alternate source of protein."

There follow seven recipes featuring tofu and tempeh: Mintz's tofu herb dip. Breaded tofu cutlets (with frozen tofu. Might also be called "Fillet of tofu," plus a note on how to freeze tofu at home). Tofu tartare sauce. Tempeh salad. Carob-tofu-mint pie. Whole wheat pastry crust (with soy milk and soy oil). Lotus Cafe not-dogs (meatless hot dogs).

Next comes a section titled "Learning more about soy: A listing of useful books." For example: "There is no more thorough book on the history and myriad Oriental forms of tofu than the profusely illustrated *"Book of Tofu,"* by William Shurtleff and Akiko Aoyagi (Autumn Press / Random House; 334 pages; $8.95). First published in 1975, it is credited by most tofu cookbooks as the one that 'spread the light.' The hundreds of recipes, mostly Oriental in style, will fascinate adventurous cooks. Beginners may prefer the condensed, somewhat more Americanized version (Ballantine, 433 pages, $2.95)."

The long article ends with a helpful sidebar titled "How to buy and store tofu." "A four-ounce piece of tofu (bean curd) sells for about 30 cents..." One main difference "between the tofu sold in health food stores and the Oriental-style tofu sold by many greengrocers is the type of coagulant used. Tofu from health food stores is almost always made with nigari (primarily magnesium chloride and trace mineral elements derived from evaporated seawater), while Oriental tofu makers generally use calcium sulphate."

A photo shows Katherine Iselin with some of the special sandwiches at the Tofu Shop, a fast-food soy deli in Rochester, New York. She is wearing a Soyboy Tofu T-shirt. On the wall behind her is the restaurant menu.

Note: A similar article titled "Out of the wok and into the frying pan" appeared in *The Durham Sun* (9 Sept. 1981, Section B).

Another similar article titled "More budget-conscious Americans are hitting the soy–its not just sauce" appeared in the *Chicago Tribune* (29 Oct. 1981, p. W_A21).

5157. Spencer, Colin. 1981. Food: Bean feast. *Guardian* (*Manchester*). Aug. 14. p. 7.

• ***Summary:*** A recent cartoon in the *New Yorker* showed a wife serving a suckling pig, as her husband sourly remarked, "Not tofu disguised again." "Tofu is a soybean curd" that has been made in China more 2,000 years. In the 6th century, Buddhist monks made elaborate imitations of fish and poultry out of tofu. "In the United States, thanks to the moral health movement, tofu has become an 'in' food."

Although Americans constitute only 6% of the world's population, they consume 30% of its meat and dairy products. "The vegetarian minority–estimated at 10 million–are blazingly articulate in their diatribes against this injustice.

"William Shurtleff and Akiko Aoyagi have again written the definitive work, *The Book of Tofu* [Autumn Press] £4.50, available at Cranks and all health stores which stock a wide range of publications."

In England, Granose Foods Ltd. makes soya milk; it is delicious and such a book for vegans and children allergic to dairy milk. A new brand of tofu is now available. Sunwheel Foods, whose products are always impeccable in quality, are selling a tofu made by Morinaga and imported from Japan. It retails for 60 pence for 297 gm. Contains 4 recipes using Morinaga [silken] tofu: Stir-fried tofu. Sesame tofu. Tofu salad dressing. Tofu-stuffed pancakes. Address: [England].

Oder was man mit einer Bohne so alles machen kann [Yesterday steak, tomorrow tofu: Or all the things that can be made with one bean]. *Tages Anzeiger Magazin* No. 34. p. 6-12. Aug. 22. Also translated in English, French, and Italian. [4 ref. Ger; Eng; Ita; Fre]

• ***Summary:*** A lengthy, pioneering account of the virtues of tofu, and its development in the USA and Switzerland by the Sunday supplement to Switzerland's biggest daily newspaper. Contains numerous color photos of soyfoods from around the world. Also defines and discusses soymilk, miso, tamari, shoyu, and soy sauce, tempeh, and soy sprouts. Discusses the work of Edgar W. Schweizer (underway by 1977) in attempting to grow soybean varieties suited to Switzerland.

The Geneva restaurant "La Moisson" has had tofu on the menu for 5 years. In Bern, in the beginning of July, the restaurant "Sesam" was acquired by the first Swiss organic food store (*Bioladen*), the "Lotusbluemli" (Little Lotus Blossom). Since Sesam opened, the people of Bern have been able to get to know a rich treasure of dishes from tofu made at Sesam, as well as many applications of miso and shoyu or tamari. The vegetarian restaurant "Bristol" in Lucerne is launching tofu as its summer hit this year, in the form of Tofu Schnitzels and Burgers... In organic food shops, Reform Houses and Oriental specialty shops, miso and soy sauce are available. The following places in Switzerland sell fresh tofu, which they make on the spot: (1) Centre macrobiotique de Lausanne, ruelle de Bourg 7, 1003 Lausanne. (2) S. Gänterli, Vonmattsrr. 50, 6003 Lucern. (3) Le Grain d'Or, rue Voltair 27, 1201 Geneva. (4) De Lade, Oberaltstadt 8, 6300 Zug. (5) S. Lotusbluemli, Gerechtigkeitsgasse 17, 3011 Bern. (6) Madal Bal, Kreuzplatz 10, 8032 Zurich. On the last page of the article is an ad for Soyana in Zurich.

Note: The Italian-language edition of this article is titled "Ieri bistecca, domani il tofu." It is the earliest Italian-language document seen (Sept. 2011) that mentions tempeh, which it calls "tempeh." Address: Lucerne, Switzerland.

5160. Sklarz, Eleen. 1981. Vegetarian stakeout: Surveying restaurants in the southland that feature meatless menus. *Los Angeles Times.* Aug. 25. p. I1, I14.

• ***Summary:*** Today vegetarian restaurants are widely available. In Los Angeles County: Butter Thief (Venice): Known for its vegetarian pizza. Comeback Inn (Venice): Includes a "bistro burger" with tofu, and wok-fried vegetables with tofu. Follow Your Heart (21825 Sherman Way, Canoga Park).

Golden Temple Conscious Cookery of Los Angeles (7910 West 3rd St., Los Angeles): "This is one of the oldest of vegetarian restaurants, with other locations throughout the United States and Europe." "The restaurant is collectively owned by Sikh Pharma, a religion founded in India 500 years ago." The "Marrakesh Vege-Kebab" is a broiled vegetable and tofu kebab.

Govinda's (9624 Venice Blvd., Culver City). Meyera (Santa Monica). Natural Fudge Co. (Hollywood; Among other entrees are tofu platters). Organic-ville Vegetarian Restaurant (Los Angeles). Our Contribution (Van Nuys; serves a tuna sandwich). Paru's Indian Vegetarian Restaurant (Hollywood). Two Worlds Kosher Vegetarian Restaurant (8022 West 3rd St., Los Angeles; all the dishes are kosher. If you like soybeans, this is the place for you. "Two Worlds offers soy chicken, soy scallops, soy steaks, soy fish, and even soy chicken chow mein").

Orange County: Mother's Market and Kitchen (Costa Mesa).

San Diego (City): Cornucopia (112 W. Washington St.; Omelet choices include tofu and mushrooms. The whole-wheat spaghetti has tofu as an ingredient). Kung Food (Serves sandwiches and dinner entrees made with tofu; tofu tostada; tofu-vegetable enchiladas, and braised tofu over brown rice, served with guacamole and *tabbouleh*). Peaceable Kingdom (Serves spring rolls stuffed with stir-fried vegetables and tofu, with sweet-and-sour sauce. Also creative sandwiches with ingredients including tofu). Prophet International Vegetarian Restaurant (Serves miso soup).

A large cartoon shows a rabbit seated at a table, with knife and fork, launching into a large vegetarian entree.

5161. McNees, Pat. 1981. Natural & organic: Taking the health food approach. *Washington Post.* Aug. 27. p. E1, E15, E20.

• ***Summary:*** The author's position on health food is slightly to the left of Julia Child and "considerably right of tofu lemon pie." She still eats more for pleasure than virtue [health]. She quickly adds: "You don't have to be a health nut or food faddist to take advantage of what health food stores have to offer." Their prices aren't always more expensive than those of supermarkets–and they tend to be much less expensive on some items, such as bran or stick cinnamon, and grains, nuts, herbs, and dried foods sold in bulk–which two photos show.

Includes the name and address of 15 such stores in Washington, DC, and 20 in Maryland (incl. Beautiful Day Trading Co. and Smile Herb Shop). Contains 8 recipes incl. one for Seasoned Crisp Fried Tempeh, from *The Book of Tempeh*, and one for Creamy Tofu Dip, from *The Book of Tofu* (both by Shurtleff and Aoyagi).

5162. McNees, Pat. 1981. Questions? Read on [A list of books about healthy foods]. *Washington Post.* Aug. 27. p. E1, E26. [30 ref]

• ***Summary:*** The books listed here are a good introduction to the subject of healthy and natural foods. Includes books on whole foods, whole grains, macrobiotics, vegetarianism, and soybean products. "Serious vegetarians and lovers of Oriental cuisine will want to take a look at, if not own, three

© Copyright Soyinfo Center 2013

thoroughly fascinating and informative books about how to prepare and make the best use of three important soybean products: 'The Book of Miso' (Autumn Press), 'The Book of Tempeh' (Harper & Row), and 'The Book of Tofu' (Autumn Press), all by William Shurtleff and Akiko Aoyagi. Aoyagi creates the recipes, which work better than those we've tried in some other recipe books mainly because she doesn't try to make the principal ingredients taste too much like something they're not (although even she fails to make tofu palatable as a dessert, in the recipes we tried). What makes these books seductive for cookbook buffs is the research, which is Shurtleff's bailiwick; he tells you more than you could ever want to know about a subject, but he sure keeps you reading..."

5163. Sellman, Per; Sellman, Gita. 1981. Tofun har kommit till Sverige [Tofu has come to Sweden]. *Saxons* No. 36. p. 68-69, 71. Aug. 31. [Swe]
• ***Summary:*** On the first page, color photos show: (1) Ted Nordquist and Tim Öhlund, founders of Aros, seated at a table, enjoying food together. (2) A tofu burger and other tofu dishes. The next page shows a 6-step process for making tofu at home and several tofu recipes. A black-and-white photo on the last page shows packages of Aros Tofu (10 korner for 400 gm), Morinaga Ever-Fresh Silken Tofu, and a can of Sunbest Bean Curd. Address: Sweden.

5164. Colchie, Elizabeth Schneider. 1981. Tofu: Light, low calorie, and versatile. *Bon Appetit.* Aug. p. 52-56.
• ***Summary:*** Contains an introduction to tofu, details on how to make tofu at home, and 6 tofu recipes. Address: Cookbook author and food writer, New York.

5165. **Product Name:** Fried Rice Sandwich (With Tofu).
Manufacturer's Name: Community Kitchens.
Manufacturer's Address: Maplewood St., Boulder, Colorado.
Date of Introduction: 1981. August.
Ingredients: Organic brown rice fried with scallions and soy sauce, wrapped in a whole wheat tortilla with steamed organic carrots, alfalfa sprouts, miso tahini sauce, tofu, green leaf lettuce.
New Product–Documentation: Talk with Marty Roth. 1989. Aug. 16. Barbara started her own sandwich business in Boulder making a brown rice sandwich with tofu. Talk with Barbara Svenning. 1989. Aug. 21. She went to Boulder by herself in mid-Aug. 1981 and started a business to support herself. Her only product was the Fried Rice Sandwich. She called it Community Kitchens. It was a cover to keep her away from the health inspector. She was pregnant with her son, Ricky, who was born later on 28 April 1982. For the first 3 weeks she made the sandwiches out of Rebecca Woods' kitchen, then she moved right across the street on Maplewood St. She made and distributed 30-40 sandwiches a day to 3-4 natural food stores in Boulder. She continued until the health inspector shut her down. She bought her tofu in the form of fresh scraps from White Wave. She continued until the health inspector shut her down, then she sold the business to Gloria Gilbert.

5166. Lenetsky, Mark. 1981. Short course on soyfoods: What they are, how they are used. *Health Foods Business.* Aug. p. 46, 49-50, 52, 53. [2 ref]
• ***Summary:*** Contents: Introduction. Tofu or "soy cheese." The many uses of tofu. Makings of miso. Tamari–by any name. Tempting tempeh. 'High tech' approach (TVP). 5176. Shurtleff, William; Aoyagi, Akiko. 1981. History of Cedar Lake Foods (Document part). In: William Shurtleff and A. Aoyagi. 1981. History of Small Seventh-day Adventist Food Companies and Sanitariums. 8 p. See p. 6-7. Unpublished manuscript. Available online at www.soyinfocenter.com. [1 ref]
• ***Summary:*** In operation from 1949 to the present, this was a private company in Cedar Lake, Michigan. "In 1949 when the Cedar Lake Academy ceased operating the former Butler Foods, Vesper Sias, a former employee of both companies, purchased the name Cedar Lake Foods and the food manufacturing rights from the Academy. He then started a business in rooms in the back of his home, working on a kitchen scale with his wife, making meatless products similar to those developed by Butler Food Products. The line started with Vegetarian Chops (like a veal cutlet with a savory soy sauce), Vegeburger, Soynut Cheese (whole soaked soybeans and nuts milled together, slurried, then cooked down to form a spreadable or sliceable loaf), Soynut Loaf, and Meatlike. They also made tofu. In 1959 the business expanded into a newly constructed plant, and four workers were kept busy meeting a growing demand and adding new products such as meatless frankfurters. Sias soon opened a storefront in his plant where all of his products were retailed (*Grand Rapids Press* 1962). In 1968 Cedar Lake bought the production of Sunnydale Foods of Centralia, Missouri. At the same time, Sias purchased the canning division of Lange Foods. The product Turkettes, Hostess Cuts, Vegebits, Lentil Roast, and Breakfast Links were added to the Cedar Lake line. In 1975, after several months of illness, Sias sold Cedar Lake

© Copyright Soyinfo Center 2013

Foods (which employed 26 people and had $500,000 yearly sales) to a corporation of five stockholders, who operated the business as Cedar Lake Foods Inc. of Tennessee. In the spring of 1981 the business, after being closed for 6 months, was sold to Country Life Natural Foods, a non-profit corporation and self-supporting Adventist group that made other vegetarian health food items such as nut butters, pastas, and juices, and ran several natural food restaurants. Many of the new company's foods contained soy products. TSF (textured soy flour) and soy sauce were used in the Vegeburger. Defatted soy flour was used in the Soynut Loaf. And soy sauce was the only soyfood used in the Hostess Cuts, Sloppy Joe, Vege-bits, Chops, and Chipettes. Wheat gluten served as the primary ingredient in most of the products. In March 1981 a typical 19-ounce can retailed for $1.75-$1.95. The plant continued to be located in Cedar Lake, Michigan, near the original Cedar Lake Academy, founded in 1898." Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

5177. Well Bean Deli (The). 1981. August. New soyfoods restaurant or deli. 349 Soquel Ave., Santa Cruz, CA 95062.
• ***Summary:*** Letter from Kevin Van Slooten. 1980. Dec. 15. Written on letterhead that reads: Monterey Bay Soyfoods, 594 Redwood Dr., Santa Cruz, California 95060. Phone: 408-476-5833. Producers of tofu, tempeh and other fine soy foods. "I'm planning a soy deli for the Santa Cruz area. I'm 3/4 done defining and strategizing the plan... It will be structured partly as a non-profit educational organization so I can continue doing classes on soyfoods cooking etc. We did a booth of tempeh burgers and tofu salad at a food festival last weekend. It was a big hit and I've attracted interest by the local heart association."

Leaflet. 1981. "Announcing the Grand Opening" at 349 Soquel Ave., behind the Breadline Eatery. Article in *Santa Cruz Mobile News.* 1981. Oct. 2. p. 19. "A restaurant with accent on health." A photo shows part of the menu on the wall.

Candace Atkins. 1981. Green Sheet (Santa Cruz, California). Nov. 4. p. 3. "Tofu–the 'natural' kind of fast food."

Questionnaire filled out by owner of restaurant or deli. 1982. Lists the company's most popular soy-based menu items in descending order of popularity. The highest weekly total sales over the past 6-2 months, the month that this occurred, and why. The average weekly sales during this period. Average hourly wages paid to workers. The business startup cost (amount of money it cost to get the business started). Current profitability status. Plans for the future. Advice the owner would give to someone starting a similar business.

Shurtleff & Aoyagi. 1982. Report on Soyfoods Delis, Cafes & Restaurants. p. 3. Started on 25 August 1981 by Kevin Van Slooten. Startup cost: $43,000. Avg. weekly sales in 1982: $2,200. Address: Santa Cruz, California. Phone: (408) 425-4544.

5178. **Product Name:** Seventh-Heaven Bread (Wheat-Free with Tofu).
Manufacturer's Name: Wildwood Natural Foods.
Manufacturer's Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1981. August.
Ingredients: UFO Tofu by Wildwood, brown-rice flour, rolled oats, millet, sunflower seeds, raisins, carob, apple-juice, safflower oil, sea salt, vanilla, baking soda.
How Stored: Refrigerated.
New Product–Documentation: Label sent by Wildwood on their letterhead. 1983, undated. 3 by 2 inches. Self adhesive. Black and green on white. Silhouette of woods with birds. "Ready to Eat Foods. Naturally. Perishable. Keep refrigerated." On sale in Berkeley. 1988. Aug. 30. Talk with Paul Duchesne. 1989. Aug. 26. This was being made while Paul was still at Wildwood. It was created by a woman named Tarrane.

Talk with Billy Bramblett, an owner of Wildwood. 1998. Aug. 8. A woman named Tarane Sayler developed this recipe to fill the great void for a tasty, wholesome, whole-wheat bread. She originally called it the "Bread of the Seven Happinesses." It was just delicious, and the conscious combination of tofu with grains added protein complementarity.

5179. Leviton, Richard; Shurtleff, William. 1981. U.S. per capita consumption of soyfoods grows to nearly 9 pounds per year (News release). Soyfoods Assoc., Sunrise Farm, Heath Rd., Colrain, MA 01340; and Soyfoods Center, P.O. Box 234, Lafayette, CA 94549. 4 p. Sept. 4. Published in Soyfoods, winter 1982, p. 6. [2 ref]
• ***Summary:*** Compiled largely by Shurtleff, circulated by Leviton. "In 1981 Americans spent $4.57 per capita on soyfoods [not including soy oil] while consuming 4.9% of the U.S. soybean crop–possibly an all-time high." Address: 1. Colrain, Massachusetts; Lafayette, California.

5180. *Federal Register.* 1981. National School Lunch, School Breakfast, and Child Care Food Programs; Meal pattern requirements. Proposed rule. 46(172):44452-71. Sept. 4. 7 CFR Parts 210, 220, and 226.
• ***Summary:*** It is proposed that tofu (three types–regular, firm, and silken, are described in detail on p. 44455) be available as an alternative protein source in these programs. For example, in secondary school lunch programs, ½ cup tofu could be substituted for 2 oz of cooked lean meat, poultry, or fish. Or for 2 oz cheese or 1 large egg or 8 oz yogurt. These alternatives are shown in tables on p. 44465, 44470, and 44471.

5181. The Soycrafters Association of North American (SANA) board of directors meets at the home of John and Valerie Robertson, 2101 San Miguel Drive, Walnut Creek (near San Francisco), California (photograph). 1981. Sept. 13.

• ***Summary:*** The board decides (unanimously) to change the name of the association to Soyfoods Association of North America to broaden its scope and base of support.

That evening a dinner party for the board is held at the home of William and Akiko Aoyagi Shurtleff. The vegetarian meal (featuring tempeh and other soyfoods) is prepared by Akiko. A photo shows (left to right): Steve Demos (White Wave; gray sweater), Mark Brawerman (Living Lightly), Pat Aylward (Joy of Soy), Bob Davis (Light Foods), Luke Lukoskie (Island Spring), Larry Needleman (Bean Machines), Richard "Ira" Leviton (Soyfoods Association, Soyfoods magazine), Valerie Robertson (Soyfoods Unlimited), Akiko Aoyagi (Soyfoods Center). The photo was taken by William Shurtleff (of Soyfoods Center) on the evening of 13 Sept. 1981 at Soyfoods Center, the home of William and Akiko Shurtleff, 951½ Mountain View Drive, Lafayette, California.

5182. *Nation's Restaurant News.* 1981. Tofu triggers big boom for Mintz's. Sept. 14. p. 48.

• ***Summary:*** "Since David Mintz [the owner of Mintz's Buffet], introduced tofu into his food store, 14-seat restaurant and catering business, sales have grown to $1 million and he now expects to develop other tofu restaurants in the city."

Mintz says of tofu: "It's the food of the future." "Mintz offers tofu in noodle charlotte, spinach quiche, egg rolls, cheesecake, bran muffins in blueberry, carrot apple, strawberry rhubarb, banana, pineapple and dutch apple, to name just a few items. His most popular item is an imitation ice cream made with tofu and called 'tofu ice kream.' This nondairy frozen dessert is made with tofu, soy milk, fresh fruits, natural essences of apples, figs, raisins, wildflower honey, egg whites and soy oil. It comes in flavors such as country vanilla, old fashioned chocolate, strawberries and 'kream,' dutch nut chocolate, and apricot rum... Mintz also operates a catering business which accounts for about half his sales."

Note: This is the earliest English-language document seen (March 2007) that uses the term "nondairy frozen dessert" to refer to soy ice cream.

"Mintz developed an interest in tofu about four years ago [1977] and many of the recipes are his own concoctions. Because tofu is pareve (neither meat nor dairy), Mintz was able to develop kosher dishes previously off limits in a kosher diet since meat and dairy can not be mixed." Products made with tofu now account for two-third of Mintz's sales. A large photo shows the front exterior of Mintz's buffet. The signs over the windows read: "Take home foods. Party catering. Strictly kosher. Glatt kosher buffet catering."

5183. White, Jim. 1981. Chinese take-out gets the taste test: Our experts explore Metro's other 'Chinatown'–the busy suburban take-out scene–and find some of the food good,

© Copyright Soyinfo Center 2013

much of it predictable but none of it exceptional. *Toronto Star* (*Ontario, Canada*). Sept. 20. p. D1.
• ***Summary:*** A Chinese woman observes that women's tastes are changing: "'Younger women tend to order a lot of bean curd [tofu] dishes, now. Its very popular. I think many of them are on diets.'" Address: Food editor.

5184. Soy Plant Co-op Inc. (The). 1981. Re: Discontinuing delivery service along many routes. Letter "To our valued customers," Sept. 22. 2 p. Typed, without signature on letterhead.
• ***Summary:*** "Last January, we began production in our new facility. The new building is great, with lots of room for movement and growth... Unfortunately, at the same time, an increase in rent, added to numerous cost incurred in moving, and building improvements, has drained our resources to the limit. To further complicate the matter, the summer sales slump has caused us to tighten-up all the more.

"Truck repair, fuel & labor have reached the point of being so high as to make long delivery runs not only unprofitable but costly. We pondered the discontinuation of our Kalamazoo run for several months before finally making the move. At this point, we opted for combining the Lansing and Grand Rapids runs into one day to try to conserve. Shortly thereafter, we lost our largest Grand Rapids account (Meijer's Warehouse) to California Brand Tofu. The proverbial 'last straw' was dropped on our western runs. We were forced to stop delivery to Grand Rapids, leaving only the Lansing run." Address: 711 Airport Blvd., Suite #1, Ann Arbor, Michigan 48104. Phone: 313-663-8638.

5185. *Oakland Tribune.* 1981. Tofu products are expected to leap in '80s. Sept. 23.
• ***Summary:*** David Mintz is having great success with tofu at his New York delicatessen and catering service. He has developed and is selling dozens of western-style tofu products from broccoli with tofu mustard sauce to "tofu frozen desserts."

FIND-SVP, a New York-based market research and publishing company, suggests that Mintz is part of a national trend. John Perry, director of research for FIND-SVP, think the potential market for tofu "is at least as great as the current market for yogurt." But it will probably take 5-10 years to reach that level. The FIND-SVP survey estimates current tofu sales at about $50 million/year and predicts they will increase 300% in the next 5 years. Cassandra Marrone thinks William Shurtleff, author of *The Book of Tofu,* is responsible for a great deal of the interest in making and selling tofu in America.

Note: This is the earliest document seen (Feb. 1999) which compares the potential market for tofu with the current market for yogurt. Address: California.

5186. Centell, Linda. 1981. Tofu pioneer crosses the Rockies to establish neighborhood soy deli [Matthew Schmit and The Tofu Shop in Arcata, California]. *Union* (*Arcata, California*). Sept. 24. p. 17.
• ***Summary:*** Schmit started selling tofu products in a restaurant in Telluride, Colorado, 3-4 years ago. Now he makes tofu and at his deli sells sushi rolls, spinach pies with tofu, soymilk, herb onion dip, salads, pumpkin pies, cookies, carob pudding, and tofu burgers. Photos show: (1) Schmit holding a handful of Minnesota certified organic soybeans. (2) Melanie Patrick holding up a cake of tofu. (3) Happy Dragon Soydrink and products made with tofu. Address: Arcata, California.

5187. Board of Directors, Soycrafters Association of North America. 1981. SANA Board's agreement with Richard Leviton. Walnut Creek, California. 1 p. Handwritten, with signature.
• ***Summary:*** "In order to ensure the continuation of *Soyfoods: The Journal of the Soycrafters Association of North America,* and due to a need for capitalization at present, and because the editor/publisher Richard Leviton has not been adequately compensated for his extensive work on the magazine, the Board makes the following agreement with Richard:

"1. He may create a corporation with 12,500 shares and may own 4,200 shares. 2. No more than 49% of the total stock may be sold without SANA Board approval. 3. SANA Board has the right of first refusal on all shares re-sold. 4. SANA will put up $2,500 to own 1,250 shares. 5. The subtitle, *Journal of the Soycrafters Assoc. of North America,* will continue to be run on the cover and title page of the magazine. 6. Given the above, Richard will continue to be able to use the SANA/Soyfoods Center mailing list."

Dated: Sept. 13, 1981. Signed: Richard Leviton, and W.M. Luke Lukoskie, Chairman SANA B.O.D. Address: 2101 San Miguel Dr., Walnut Creek, California.

5188. Corn Country Whole Foods, Inc. 1981. Market Street: Natural foods with a difference (Catalog). 132 South Market St., Champaign, IL 61820. 24 p. Index. 28 cm.
• ***Summary:*** This natural foods, vegetarian catalog is printed on beige paper with black ink. Corn Country is now distributing products made by many other companies. Interesting products: (1) Stoneground flours: Soy flour-full fat (OG = Organically Grown). Chickpea (garbanzo) flour. Our "old fashioned granite stone mills keep the flour at the lowest grind temperature..." Soybeans and chick peas are preheated before grinding. (2) Beans: Soybeans OG. Azuki beans. Chickpeas (Garbonzos). Lentils (green or red). Mung beans (for sprouting). (3) Peanut butter. Almond butter. Sesame tahini. (4) Sea vegetables (10 types). Westbrae miso (7 types). (5) Light Foods: Tofu. Marinated tofu. "Soyproducts are becoming an increasingly attractive source of protein throughout the world... We offer a small

© Copyright Soyinfo Center 2013

variety of soy products." (6) Condiments. Nigari (bulk or 5 lb). Umeboshi plums. Shoyu (pints to 4.75 gal tin). Miso (red or white). Tamari (with dispenser to quarts). (7) Market Street meals (vegetarian): Nutburger. Soyburger. Chick 'n sea burger. (8) Nutritional (brewer's) yeast (20 lb to 125 lb): "These yeasts are primary yeasts cultured on molasses for human consumption. They are not a byproduct of petroleum, or paper industries." Sold in powder or flakes. (9) Natural oils: Sesame oil. Safflower oil. (10) Seeds. Alfalfa seed for sprouting. Sesame seeds whole brown. Sesame seeds hulled white. Sunflower seeds. (11) Market Street shoyu almonds, suns (sunflower), cashew pieces. (12) Soy & corn "nuts": Soy nuts salted. Soy nuts plain. (13) Market street mixes (unsulfured fruits and natural nuts): Sweet & shoyu mix. (14) Literature: 26 Talking Foods pads. (15) Dr. Bronner's soap (14 types). (16) Kitchen help: Tofu kit. Sprouter lids. Wok set. Address: Champaign, Illinois. Phone: 217-359-8843.

5189. **Product Name:** [Sojalada Tofu].
Foreign Name: Sojalade Tofu.
Manufacturer's Name: Genossenschaft Sojalade. Renamed Genossenschaftstofurei in 1982. Then renamed Tofurei Genossenschaft Engel in 1989.
Manufacturer's Address: Dorfplatz, 8913 Ottenbach ZH, Switzerland. Phone: 01-769-0349.
Date of Introduction: 1981. September.
New Product–Documentation: Form filled out by owners: Gernot Schneider, Martin Mueller, Hansruedi Opplinger, Verena Krieger. They make tofu, and started on 1 Sept. 1981; Recipe leaflet. 1981. "Tofu-Rezepte." Black on yellow. Contains illustrations from *The Book of Tofu* by Shurtleff and Aoyagi. Leaflet. 1981. "Tofu: The natural soya protein." Black on green. Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Sojalade. Owner: Verena Krieger. A. Hoesli. 1982. Oeko Journal (Switzerland). Oct. p. 10-13. "Tofu." RSL. Retailed for F4.70 per 380 gm. Letter from Sjon Welters. 1982. April 16. Verena Krieger is a founder of Sojalade, Tellenrutistr. 106, 6390 Engelberg, Switzerland. Sjon says he thinks that Hans Rudolph Opplinger has a separate shop at Weinbergstrasse 13, Cham/Chaim 6330, Switzerland.

Letters from Gauthier Loeffler. 1982. Oct. 3 and 24. He has been producing tofu at Sojalade for almost a year. Wants to start a tofu plant in a Third World country.

Letter from Verena Krieger. 1983. March 8. "The first people to make tofu in Switzerland was the restaurant 'La Moisson.' They made tofu for their restaurant and store only. The first large-scale production was by Sojalade in Aug. 1981."

Soyfoods Center Computerized Mailing List. 1984. Feb. 7. The name is now Genossenschaftstofurei, Engel Dorfplatz, CH-8913 Ottenbach, Switzerland. Contact: Verena Krieger. Phone: 017 69 03 49.

Soya Bluebook. 1984. p. 79. "Sojalada Tofu. Contact: Gauthier W. Loeffler."

Letter (fax) from Verena Krieger. 1990. May 31. This company now makes 600-700 kg/week of tofu. They also make and sell a tofu kit.

Letter from Verena Krieger. 1990. Aug. 10. This company makes only plain tofu. They do not make any soymilk or any other soy products for sale.

5190. Hymowitz, T.; Newell, C.A. 1981. Taxonomy of the genus *Glycine*, domestication and uses of soybeans. *Economic Botany* 35(3):272-88. Sept. [100 ref]
• ***Summary:*** Contents: Taxonomic history of *Glycine*. Domestication [and dissemination of the soybean]. Uses [of the soybean] (The four most important foods developed from the soybean in East Asia are miso, shoyu (soy sauce), tempeh, and tofu). "These traditional foods have little physical or flavor identity with the original bean. Hence it is not too surprising that Marco Polo, who raveled from Venice to Cathay and throughout the Orient between 1271 and 1295, makes no mention of the soybean (Rugoff, 1961)."

The earliest accurate description by a European seen for the use of soybeans as food was by Friar Domingo Navarrete. He wrote about them in 1665.

East Asian nonfermented soy foods: Tofu, soy milk, yuba, kinako, sprouts, green soybeans.

East Asian fermented soy foods: Miso, soy sauce, tempeh. Soy uses in the West: Oil, protein (from defatted soybean meal). A brief history of each of these foods is given.

Tables: (1) The species of *Glycine* according to Linnaeus, 1753, and their subsequent classification. (2) The genus *Glycine* L. according to Bentham (1864, 1865). (3) The genus *Glycine* L. according to Hermann (1962). (4) The genus *Glycine* Willd. as revised by Verdcourt (1966, 1970). (5) The genus *Glycine* Willd. as accurately delimited.

Figures: (1) *Shu*, the archaic character for soybeans (five stages in the character's development; Hu {1963} believes that the shu pictograph can be traced back to approximately the 11th century B.C.). Address: Dep. of Agronomy, Univ. of Illinois, Urbana.

5191. **Product Name:** Legume Tofu Ravioli.
Manufacturer's Name: Legume, Inc.
Manufacturer's Address: 150 Bloomfield Ave., Verona, NJ 07044. Phone: (201) 857-9010.
Date of Introduction: 1981. September.
Ingredients: Tofu mixture: Tofu, soy oil, garlic, basil, parsley, pepper, sea salt. For the pasta: High gluten enriched wheat flour, organic whole wheat pastry flour, organic soy flour, DeBoles American Jerusalem artichoke flour, wheat germ, wheat gluten, corn flour.
Wt/Vol., Packaging, Price: 24 ravioli per box.
How Stored: Frozen.
Nutrition: Per 4 oz serving: 250 calories, 11 gm protein,

Manufacturer's Name: Quong Hop & Co.
Manufacturer's Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.
Date of Introduction: 1981. September.
Ingredients: Filling: Tofu, soy margarine, honey, carob chips, walnuts, pure vanilla, pure almond extract, spices. Shell: Organic whole wheat flour, soy oil, natural flavors, sea salt, spices, fried in pressed safflower oil.
Wt/Vol., Packaging, Price: 2 oz.
How Stored: Refrigerated.
New Product–Documentation: Label. 1981. 3 by 2 inches. Self adhesive. Brown and black on white. "Authentic Italian dessert. All natural dessert treat." Leaflet (8½ by 11 inches, color). Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Tofu wholly cannoli! An authentic Italian dessert. A non dairy product. Interview with Jim Miller. 1982. April 17. This product introduced in Sept. 1981. Soya Bluebook. 1982. p. 78. "wholly tofu cannoli."

5202. **Product Name:** Tofu Ravioli.
Manufacturer's Name: Quong Hop & Co.
Manufacturer's Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.
Date of Introduction: 1981. September.
Ingredients: Pasta: Organically grown whole wheat flour, enriched unbleached flour, water, eggs, sea salt. Filling: Organic tofu (water, organically grown soybeans, nigari solidifier), ricotta cheese, eggs, Romano cheese, potato flour, fresh parsley, salt, pepper, spices.
Wt/Vol., Packaging, Price: 6 oz.
How Stored: Frozen or refrigerated.
New Product–Documentation: Ad in Whole Foods. 1981. Sept. Label. 1982. 4.75 by 2.25 inches. Self adhesive. Red and black on white. Soya Bluebook. 1982. p. 78. New Leaf Tofu Ravioli.

5203. *Soyanews* (*Sri Lanka*). 1981. Snack foods sales up at fair. 4(1):1, 8. Sept.
• ***Summary:*** The Soya Sales Centre conducted by the Department of Agriculture during the Kandy Esala Fair last month had, once again, a successful run with a turnover reaching record levels. This was the fourth year in succession" that the Centre was open at the fair.

"The Sales Centre opened for the first time in 1978 with only a soya milk bar run by the Milk Board which produced the milk from its Pallekele factory. A cup of chilled soya milk was sold at -/25 cents. It was an instant success with 30,000 cups of milk sold during the first ten days.

"In 1979 more soya foods were put out for sale at the Esala Fair Soya Sales Centre which was taken charge of by the Department of Agriculture for the first time."

"On sale at the 1979 exhibition were soya nuts [oil roasted soyabeans], murukku [a deep-fried snack, popular in southern India and Sri Lanka], and cutlets which were all turned out at the home level kitchen of the Soyabean Foods Research Centre in Gannoruwa.

In 1980 "Soya ice cream which was on sale for the first time was the most popular item and along with the rising demand each night of the fair for fried [soya] nuts, cutlets and [soya] milk it was clear that soyafoods had come to stay."

This year soya ice cream was popular again; the new soyafood on sale was tempeh. "Both tempeh and tofu had satisfactory sales considering that they were not items that could be consumed on the spot."

5204. Soyfoods Center; Soycrafters Assoc. of North America. 1981. Soyfoods production in America and the West (Report). Lafayette, California. 1 p. Sept.
• ***Summary:*** This full-page table contains statistics for the following soyfoods and soy ingredients: Low technology, traditional. Tofu & tofu products. Tempeh. Soymilk & soymilk products. Soy sauce, shoyu & tamari. Soynuts & soynut butter. Miso. Soy sprouts. Whole dry or mature soybeans. Whole soy flour & grits, full fat. Fermented soymilk. Fermented tofu. Fresh green soybeans. Roasted soy flour & soy coffee. Natto, thua nao & kinema. Yuba. Soy nuggets (Hamanatto, tou-ch'ih [Fermented black soybeans]). Soy delis and restaurants. Secondary soyfoods prod-distributors. Soyfoods marketer-distributors. Subtotal.

High technology, modern [soy ingredients]: Soy flour & grits, defatted. TSP / TVP (extruded soy flour). Soy protein concentrates. Soy protein isolates. Meat analogs (secondary products), Soy oil.

Subtotal: High tech. Total: Low tech & high tech.

This table has 12 columns with information about each soyfood. (1) Type of soyfood. (2-5) Number of manufacturers: USA, Canada, Other West, Total. (6-7) Raw soybeans used (tons / year): USA, % of total used. (8) Yield (lbs of food from 1 lb of soybeans). USA only–(9) Tons produced. (10) Wholesale value (million $). (11) Retail value (million $). (12) Number of employees.

Note: Total retail value in USA is $998 million. Address: P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

5205. *Sunset* (*Menlo Park, California*). 1981. It's tofu, breaded and fried. 167:160-61. Sept.
• ***Summary:*** "Fried fish? No, it's low-cal tofu, fried crispy, served with a choice of [three] sauces." Teriyaki sauce, cocktail sauce, or caper sauce. The breading is done with Japanese panco. Tofu is described as coming in "blocks." A recipe and photo of it are given.

5206. **Product Name:** Tempeh, and Tofu.
Manufacturer's Name: Teac Bán Macrobiotic Center–Fad Saol Foods.
Manufacturer's Address: 6 Parnell Road, Harold's Cross Bridge, Dublin 6, Ireland. Phone: 01-543943.
Date of Introduction: 1981. September.
Ingredients: Tempeh: Organic soybeans, rice, Rhizopus oligosporus culture.
New Product–Documentation: Letter concerning an interview with owners and founders Ann Currie and Patrick Duggan conducted by Anthony Marrese. 1993. March. This organization was founded in 1985 or 1986. "They say they were the first in Ireland to make tempeh in any quantity and to sell it commercially. The name "Fad Saol Foods" is used for their products; It means "Long Life," or, for them, macrobiotics. Their first contact with tempeh was through the Community Health Foundation in England. They were given the first tempeh hand grinder that was used by the Foundation, and they say it was the first organization in England to make tempeh. Since tofu and tempeh were generally not available for their needs in macrobiotics and dietary counseling, they started making these foods. They supplied most of Dublin with tempeh at that time, and their fresh tofu was sold at health food shops. There are Chinese shops that produced their own tofu at that time and still do. Ann and Patrick use nigari to make their tofu. They also run tofu-making classes and tofu cookery courses. They presently sell most of their tofu and tempeh through only one retail shop. They have little desire to supply more because of their current focus on courses and teaching. At present they make about 35 lb/week of tempeh (sold frozen) and 70 lb/week of tofu. Patrick produces both these soyfoods on his own. In the future they are open to increasing production if people from their courses come in to help. Once a week they serve a meal prepared by their cooking class and explain the significance of the foods, their preparation, etc. Approximately 15 people can be served and they are generally sold out.

In a letter of 12 May 1994 Anthony Marrese also sends a business card for the Macrobiotic Centre, a tempeh label, an issue of *Teac Ban News* (Vol. 7, No. 3, Autumn/Winter 1992; the Centre offers shiatsu treatment and classes, macrobiotic consultations, and courses in alternative medicine [10 sessions] and wholefood cookery [8 sessions, including tofu and tempeh]), and 2 pages of tofu recipes (from *The Magic of Tofu* and *The Book of Tofu*).

Tempeh Label. 4 by 6.75 inches. Blue on beige. Printed on both sides–with 6 recipes or recipe suggestions on the back. "Gluten free. No cholesterol. High protein. No preservatives."

Form filled out by Patrick Duggan and Ann Currie. 2001. May 29. Their food company is named Fad Saol Foods. They started making tempeh in Sept. 1981. They also send their tempeh label, a one-panel tempeh leaflet, and a 6-panel brochure describing "Teac Ban: The home of healthy living, macrobiotic cooking, feng shui, and shiatsu."

5207. **Product Name:** Yo Soy! [Plain, or Honey-Vanilla].
Manufacturer's Name: Wildwood Natural Foods.
Manufacturer's Address: 31 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1981. September.
Ingredients: Honey-Vanilla: Filtered water, organic soybean grown in accordance with Sec. 2659.11 of the Cal. health and safety code, honey, vanilla extract, and a trace of sea salt.
Wt/Vol., Packaging, Price: Pint or quart plastic bottle.
How Stored: Refrigerated.
New Product–Documentation: 1988 Aug. 15–Bill Shurtleff saw this new brand of soymilk at Living Foods, University Ave., Berkeley.

Label for Plain flavor sent by Claire and Jim Wickens of Lafayette. 1993. Sept. 1.75 by 3.75 inches. Self adhesive. Blue and green on white.

Talk with and Label sent by Bill Bramblett, part owner of Wildwood Natural Foods. 1998. Aug. 8. Yo Soy! is a palindrome. He thinks this product was introduced in about the fall of 1981 at Fairfax. It replaced an identical product that had formerly been called "Soymilk."

the wall. Many of the dishes feature tofu or tempeh–Tofu burger, tempeh burger, missing egg salad or sandwich, tempeh mock chicken salad, tofuna salad or sandwich, tempeh salad, soy milk, tofu cheesecakes, etc. Address: Santa Cruz, California.

5209. Shurtleff, William; Aoyagi, Akiko. 1981. History of Loma Linda Foods. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549. 8 p. Oct. 4. Unpublished typescript. Available online at www.soyinfocenter.com.
• ***Summary:*** A comprehensive history of the subject. Contents: Background. Early years (1906-1937): Sanitarium Food Co. (1905-06); first soyfoods (copied from Van Gundy): Smokene (1921), tofu, soymilk, and soy sandwich spread (1933-34); no one at Loma Linda knows how these foods originated. New plant (1938-1950): Started 1938 under Chapman, World War II years. The 1950's: Acquisition of Dr. Harry Miller's company, International Nutrition Laboratories (1951). The 1960's. The 1970's and 1980's: Many new products from 1972, products in 1981, 1980 takeover by Sanitarium Health Foods Co. of Australia, present. Address: Lafayette, California. Phone: 415-283-2991.

5210. Adilman, Sid. 1981. Relief from chow mein: Breaking bread. *Toronto Star* (*Ontario, Canada*). Oct. 11. p. F15.
• ***Summary:*** Outside of Toronto's Chinatown the writer discovered an excellent restaurant named Dinner King, that serves Chinese vegetarian food. From "the four pages of strictly vegetarian offerings" he chose and enjoyed: (1) Bean curd and straw mushroom soup. Sparkling–with fresh tofu, straw mushrooms juicy and round, and no MSG. (2) Sangkan with pepper in garlic and black bean sauce. The writer was unable to find out what "Sangkan" was; it "had the texture and look of fried bean curd, made with dough." He called it "Breathtaking!" (3) Fried bean curd skin [yuba] rolls.

• ***Summary:*** A comprehensive history of the subject. Contents: Introduction. University of Illinois and INTSOY: Home Economics Department's work (in the 1930's, 1940-1961, and 1974-1981), Food Science Department (1955-1981), International Soybean Program (INTSOY) founded July 1973, large number of talented faculty made the Univ. of Illinois one of the world's top soy research centers. Iowa State University. Cornell University: First work with soy 1883, first soyfoods work in 1927 (soymilk thesis by Y.T. Chiu), one of leading centers of U.S. soyfoods research during World War II (see chapter on Clive and Jeanette McCay), rebirth of interest in soyfoods in late 1950's, 1960 paper on tempeh, soymilk work 1963-1980, other soyfoods studied, arrival of Dr. Van Veen in 1962 (had studied tempeh since 1932, had lived in Indonesia, and had a lifelong interest in tempeh), renewed program of soybean development and production initiated in New York state in 1964. USDA Northern Regional Research Center (NRRC): Originated with 1929 USDA soybean lab in Ohio, 1936 soybean lab in Urbana, IL, transferred to Peoria, IL, 1942, expanded research on food uses of soybeans and soy oil, fermentation division headed by Langlykke, work on soy sauce, life of Dr. A.K. Smith, at NRRC from 1942-1964, arrival of Drs. Watanabe and Shibasaki, Smith one of first American researchers to realize the potential of tofu, work with miso, 1960 arrival of respected Indonesian microbiologist Ko Swan Djien, work on tempeh, NRRC hosted 2 of first major conferences on soy protein foods in 1961 and 1966, sponsorship of overseas contract work, expansion of research in 1960's, soy flour extrusion, Rackis' work with oligosaccharides (flatulence-causing factor in soybeans), life of Dr. C.W. Hesseltine, 1962 arrival of Dr. H.L. Wang at fermentation lab, Mustakas' studies on soymilk, NRRC's interest in soyfoods steadily growing, legitimizes soyfoods to people in U.S. and around the world. INTSOY: Founding, 5 basic objectives, main accomplishments with soybeans, main accomplishments with soyfoods. Address: Lafayette, California. Phone: 415-283-2991.

5212. Cohen, Richard L. 1981. Local tofu makers and sellers trying to stir up interest within food market. *San Francisco Business Journal.* Oct. 20. p. 18-19.
• ***Summary:*** This interview with Jim Miller begins with the early history of Quong Hop & Co. The characters "Quong Hop" can be translated as "expanding oneness" or "immense unity." The company is one of the largest tofu makers on the West Coast, and, so far as the company knows, "it is the oldest in the country having been started shortly before the 1906 earthquake and fire in San Francisco.

Founded by Lee Sing How on Wentworth Street in [San Francisco's] Chinatown, the company spent the year after the earthquake in Oakland, and then returned to San Francisco to a new location on Waverly Place.

"During those early years, tofu was manufactured daily on the premises and sold."

"It was customary for many in San Francisco's Chinese community to get up at dawn and go to their local tofu shop–which had been open since 2 a.m.–and buy their daily needs."

Quong Hop did well as a business until the start of World War II when a shortage of soybeans occurred, since almost all of the company's soybeans used at that time were imported from China. So Quong Hop "stopped making regular tofu and restricted its product line to regular tofu, a product used as a condiment."

In the early 1960s the company moved to a new location on Folsom Street, maintaining its factory but eliminating its retail store.

© Copyright Soyinfo Center 2013

Then the natural foods movement arrived and Quong Hop was swept up in it. In 1971 the company decided "to expand its product line back to what it had once been, several varieties of tofu and soymilk." But Quong Hop's main customers remained basically the same; Chinese Americans. In 1976 Quong Hop began using completely natural ingredients–including natural nigari.

Today Quong Hop's products are distributed to three main types of markets: (1) Oriental groceries and restaurants. (2) health and natural food stores. (3) supermarkets and other restaurants.

Photos show: (1) Jim Miller. (2) Some of Quong Hop's many soyfood products.

5213. Jolley, Clifton. 1981. Eat tofu? Our man would as soon eat crow. *Deseret News* (*Salt Lake City, Utah*). Oct. 20. Section C.
• ***Summary:*** "I shouldn't have done it. I shouldn't have made light of tofu. When I suggested that the government was going too far by considering the addition of tofu to the school lunch program, when I described tofu as a 'colorless, tasteless, postage paste coagulation,' I should have known that there were tofu lovers out there, somewhere.

"Three of them, to be precise. They bill themselves as the 'Tofu Trio,' three SLC businesswomen who about a year ago started an enterprise called 'Jack's Beanstalk' that specializes in the production and marketing of tofu."

Jack's Beanstalk is Salt Lake City's first tofu manufacturer. The trio are Bonnie Roddy, Sally Roddy (her daughter), and Pat Hodgson. They went to Jolley's office and served him "a salad (with tofu dressing), manicotti (with tofu filling), pizza (with tofu substituting for cheese), and pineapple cream tofu pie." He liked it, and loved the pie. See follow-up article Nov. 20.

5214. *Hartford Daily Courant* (*Connecticut*). 1981. 'Sideways sushi' full of memories: Notes from Laurel's Kitchen. Oct. 21. p. E7.
• ***Summary:*** Carol has very fond memories of the time her judo instructor, Fukuda sensei (a woman) gave her a lesson in Japanese cooking. The main dish was a vegetarian version of sushi–the scattered kind [*maki-zushi*] rather than rolled sushi. The ingredients included tiny cubes of carrots (barely cooked) "and small pieces of a deep-fried tofu 'pouch' sold in Oriental markets," as well as shiitake mushrooms, thin strips of omelet, and crumbled sheets of nori sea weed (optional). A recipe for "Sideways sushi" is given. Address: Staff writer.

5215. Jones, Irmarie. 1981. Explaining 'how to' of tofu. *Recorder* (*Greenfield, Massachusetts*). Oct. 21. p. C1.
• ***Summary:*** A large photo shows authors Madeline Fox, Judith Timmins, and Kathy O'Connor showing off their new cookbook *Soydairy Delights of Tofu.* The 40-page $2.95 book was issued Oct. 1. Mrs. Fox, involved in sales promotion for tofu, was introduced to the food at an oriental cooking class 12 years ago [i.e. in 1969]. Mrs. Timmins has four children. Like pasta, tofu has little or no taste, which serves to its advantage. Address: Staff reporter.

5216. Brownstone, Cecily. 1981. Fond meetings at Trader Vic's: A new food combination at the international eatery. *Los Angeles Times.* Oct. 29. p. WS42.
• ***Summary:*** Trader Vic's four children have now taken over the bulk of the responsibilities of managing his international chain of restaurants, leaving more time for the Trader to be on the look-out for new food combinations.

"A few months ago I was offered his version of Chicken and Tofu Puffs..." She tried the recipe in her test kitchen and found the Puffs easy to make. A recipe is given for Trader Vic's Chicken and Tofu Puffs; its ingredients include "12 ounces bean curd (tofu)."

Note 1. These Tofu Puffs are very creative and original; they are not the traditional Japanese aburagé.

Note 2. Victor J. (Trader Vic) Bergeron died on 11 Oct. 1984 at his home in Hillsborough, California. He was age 81. Mr. Bergeron entered the restaurant business on 17 Nov. 1934, borrowing $500 to open Hinky Dinks, a hole-in-the-wall eatery at 65th St. and San Pablo in Oakland. Address: Associated Press food editor.

5217. *Chicago Tribune.* 1981. 'Tofu' and other soy books: Reader's guide to good eating. Oct. 29. p. W_A21, or N_ B19.
• ***Summary:*** This is a briefly annotated list of useful books about soy products: (1) *Soybeans for Health and Longevity,* by Philip S. Chen. (2) *The Soybean Book: Growing and Using Nature's Miracle Protein,* by Phyllis Dobson. (3) *The Farm Vegetarian Cookbook,* edited by Louise Hagler. See recipes for making ice bean, soy yogurt, and soysage. (4) *The Book of Tofu,* William Shurtleff and Akiko Aoyagi. Profusely illustrated, with hundreds of recipes. "There is no more thorough book on the history and myriad Oriental forms of tofu... First published in 1975, it is credited by most tofu cookbooks as the one that 'spread the light.'" (5) *The Tofu Cookbook,* by Cathy Bauer and Juel Anderson. Incorporates tofu artfully into familiar international dishes Many recipes assume access to the by-products of making tofu at home: okara (soy pulp) and whey. (6) *The Great American Tofu Cookbook,* by Patricia McGruter. (7) *Tofu Goes West,* by Gary Landgrebe. For those who enjoy the chewy texture of "frozen tofu." (3) *The Book of Miso,* by Shurtleff & Aoyagi. The best-known book about miso. (8) *The Book of Tempeh, by Shurtleff & Aoyagi.* A thorough study of this traditional Indonesian food.

5219. Pathiravitana, S. 1981. Re: Tofu shop in Sri Lanka. Soybean acreage figures. Impact of the loss of Intsoy. Letter to William Shurtleff at Soyfoods Center, Oct. 31–in reply to inquiry of Sept. 26. 1 p. Typed, with signature on letterhead.
• ***Summary:*** "1. The tofu shop you mention was set up in May 1980, A few months later it stopped work due to a lack of soyabeans. It has started functioning again and this time it looks as if it can go on. Shall write about it when it starts cutting its teeth.

"This shop has been opened mostly at the insistence of Mrs. Kim, the wife of the UNDP rep here, who is really putting heart and soul into popularizing soya in Sri Lanka. Her home address is 17/1 Bagatelle Road, Colombo 3. You may also reach her at her husband's office: UNDP Office, 202-204 Bauddhaloka Mawatha, Colombo 7.

"2. The soyabean acreage is not very spectacular. Last yala (1980) was a mere 50 acres in Anuradhapura! But this yala (1981) it rose to over 1,500. I shall send you the official figures the moment I get them from the Dep. of Agriculture.

"It is still [too] early to say what the loss of Intsoy means. As far as the agronomy goes, the expertise is now, I believe, available locally. But the lack of an Intsoy man on the spot may perhaps be felt more keenly in securing Intsoy help for any matter that may come up. Dr. Hittle was also a good trouble shooter.

"I am sending you a copy of the Department of Agriculture publication *Soya Bean, the Miracle Crop of the 20th Century."* Address: CARE, P.O. Box 1024, Colombo 3, Sri Lanka. Phone: 20894/5.

5220. Storup, Bernard; Ruel, Françoise. 1981. Re: Studying tofu in America and starting work with tofu in France. Letter to William Shurtleff at Soyfoods Center, Oct. 31. 6 p. Typed, with signature. [2 ref. Eng]
• ***Summary:*** Bernard and Françoise enjoyed the 8 months they spent studying soyfoods in the USA, and have now been back in France for nearly 10 weeks. "During the time we were in the U.S., we had a rather good survey of the small and medium scale tofu industry, and I think we learned a lot from all the people we met, and very often what not to do.

"I have been really surprised by the quality of the welcome we had all along our way, as well as the spirit prevailing among most of the people involved with soyfoods (we did not visit the big factories). This too has been a good lesson. Another small surprise has been the general lack of technical experience of most of the people working with tofu... They could learn a great deal from the dairy industry–chiefly the small and medium scale cheese-making industry–by using the techniques and the equipment (very often not expensive) employed when curding, putting in pressing boxes by gravity, pressing, etc."

Concerning Li Yu-ying, "we went with Jean de Preneuf to the location of 'La Société Française pour l'exploitation du soja et de ses dérivés,' located at 48 Rue Denis Papin, Les Vallées, Colombes (west of Paris). The buildings had been pulled down about 20 years ago, but were used for other manufacture since at least the beginning of the thirties. We met an old man who has always lived in the neighborhood and remembers that 'some Chinese people were making cakes there before the first world war.' So, it is certain that this address was the one of Li's plant in 1912. We have been to the town hall of Colombes, but nobody was able to help us. We have to come back there at the end of November...

"Since our return to France, we had have, with Jean de Preneuf, a lot of contacts with different people to introduce, at least, the idea of soyfoods. We met people of the medical corps, all having an important role in scientific research (Dr. Sautier, INSERM, Hôpital Bichat, Paris; Dr. Mirouse, Dean of the Faculty of Medicine in Montpellier–the most important in France) working on plant proteins for years (as Dr. Cheftel, Universite de Montpellier, who has been to Japan several times and has worked on soymilk with experimental equipment made by Alfa-Laval) and people from INRA (Institut National de la Recherche Scientifique). All these people knew or at least had heard about tofu, and are ready to help us in their own field (analysis or sometimes technical assistance).

"We also met people from large industry (researchers for Nestlé, and an executive of Prolait) to ask if they had worked on soy products other than T.V.P. and soymilk formulas for infants. They all knew tofu and other soyfoods very well but said that 'the market in Europe is not ready yet for this.' Finally, we met organic soybean producers (and non-organic too); we wanted to know more about the future policy of the Economic European Community on soybeans...

"Actually, 9000 hectares of soya (22,500 acres) are cultivated in France, mostly in the south of France. Soya represents in value the second largest (after oil) national import for the French budget.

"In France, we can find tofu only in very few places, most of the time at a prohibitive price, between $4 and $7 a kilo. Vietnamese shops in all big cities have tofu, but their tofu is rather special with a sandy texture and a strong (sour) taste. We found only one (bad) tempeh producer in Paris. For these reasons, we have thought more and more that it would be a good thing to open a tofu shop and to work at the same time on the informational level. We are now working on a small recipe book (adapted to the French habits) as well as on a technical flyer, a pamphlet and other things...

"We are thinking of starting a Soyfood Center in France but we will tell you about this in the future as soon as we have found a new place to settle (it should be near Paris). We have already made an application.

© Copyright Soyinfo Center 2013

"Jean de Preneuf contacted different (good) publishers, and one said *The Book of Tofu* has been found to be very interesting by a committee of readers. We are now waiting for a definitive answer from this publisher (Editions Denoel, one of the best in France, by quality and volume)."

Accompanying the letter are photocopies of books by Li Yu-ying and Grandvoinnet (1912) and Rouest (1921) which Shurtleff had been unable to find in America. Key portions were highlighted in yellow and translated into English.

Note: This is the earliest document seen (Feb. 2013) concerning Société Soy or its founders, Bernard and Françoise Storup. The company's first soy product was launched in June 1982. Address: 48 Rue Bouffard, 33000 Bordeaux, France.

5221. Asahimatsu Shokuhin. 1981. Asahimatsu sanjû-nen no ayumi [Asahimatsu Shokuhin: Thirty-year history]. Iida-shi, Nagano-ken, Japan: Asahimatsu. 290 p. Oct. 18. Illust. No index. 23 cm. [Jap]

• ***Summary:*** Contents: History of kori-dofu. 1. History of the early days. 2. When the company began. 3. The spirit of starting the business. 4. The birth of Asahimatsu Kori-dofu K.K. 5. Becoming an independent business. 6. The construction of a new factory and problems producing soft kori-dofu. 7. The challenge of becoming first in the industry. 8. Chronology:

1904–Artificially frozen tofu was displayed at the Fourth Industrial Exhibition in Japan.

1923–The Matsuo Kori-dofu Union was established.

1925 Dec. 25–The Association of Kori-dofu Unions in Nagano prefecture was established.

1930–The Anonymous Asahimatsu Improved Kori-dofu Union was established.

1932–The Anonymous Asahimatsu Improved Kori-dofu Union was reorganized as Asahimatsu Improved Kori-dofu Company, Ltd.

1932–Misuzu-dofu Sales Union (predecessor of the present Misuzu Tofu, Inc.) was established.

1935–Responsibility-guaranteed Suwa Sales Union (the predecessor of the present Daiya Tofu, Inc.) was established.

1937–Kori-dofu Union of East Tsukuma County in Matsumoto City (the predecessor of Miyama Tofu, Inc.) was established.

1939–The All Japan Kori-dofu Association was founded.

1939–The factory for making artificially frozen tofu was built in Matsuo village by Asahimatsu Improved Kori-dofu Company, Ltd.

1940 May–The All Japan Kori-dofu Union Association was established in order to serve as an organization controlling the distribution of soybeans, the raw material.

1941–The Asahimatsu Improved Kori-dofu Company, Ltd. built a branch factory in Korea.

1943–The All Japan Kori-dofu Industry Union Association was established under an order given by the Ministry of Agriculture and Forestry.

1944–The All Japan Kori-dofu Industry Union Association was re-established as The All Japan Kori-dofu Industry Control Union.

1945–The Asahimatsu Improved Kori-dofu Company, Ltd. gave their factory to Fujikura Aircraft Industry Company, Ltd. to be used as a munitions factory.

1945 Aug. 15–The Korean branch factory of Asahimatsu Improved Kori-dofu Company, Ltd. was closed due to the termination of World War II.

1945–The All Japan Kori-dofu Industry Control Union was dissolved.

1947 March–The All Japan Kori-dofu Industry Association was established and joined the Japan Soybean Association.

1950 Dec. 19–The Asahimatsu Kori-dofu Company, Ltd. was established having a total capital of 3,750,000 yen.

1950–The naturally frozen tofu industries were struck by the unusually warm winter.

1951 Jan. 19–The factory of the former Asahimatsu Improved Kori-dofu Company, Ltd. (4873 Matsuo village) was purchased from the Fujikura Aircraft Industry Co., Ltd. and reconstruction of the factory began.

1951 April–The Soybean Control Order was abolished.

1951 May 15–The Asahimatsu Improved Kori-dofu factory started operation. The average daily production was 30 sacks (1 sack = 60 kg = 132 lb) of soybeans. Labor productivity per unit was 13.90 hours/1,000 cuts.

1952–The products of Kansai (the Kyoto-Osaka area) and the natural products from all areas in Japan declined steeply.

1953 Feb.–The All Japan Kori-dofu Industry Cooperative Union Association was founded.

1954 July 1–Asahimatsu's factory was designated by the Ministry of Labor as a model plant having safety and sanitation management.

1956 Aug.–The second construction of the SupeCo style dryer was completed. A current style thawing machine was installed which made the flow of operation continuously automatic.

1957 Nov.–The third construction of a freezing process and boiler was completed. A combustion machine for coal powder was introduced. A new chimney for the boiler was built. The average daily productivity was 112 sacks.

1958 Oct.–'Asahi-dofu' was used as food by the observation party of Showa base at the South Pole.

1958–Competitive sale of kori-dofu began.

1959 March–The first TV commercials for the Kori-dofu industry began in the Osaka area.

1959 Jan. 1–The 'meter' rule was put into practice.

© Copyright Soyinfo Center 2013

1959–A specialized dryer for cubes was newly installed. Sprinkler-type thawing equipment was completed. The complete continuous operation by exchanging labor made the increase in productivity possible after the completion of the third construction.

1960–The average daily productivity: 154 sacks. Productivity of labor per unit: 7.50 hours/1000 cuts.

1962 July–Began sales of soft tofu.

1962–Began refrigeration of products.

1963 Feb.–Frequent occurrence of browned and hardened products.

1963 July–Tenryû plant began full-scale operation.

1963 Oct. 24–Success in making the products soft. Became number one in both quality and productivity among the industries.

1963 Nov. 1–Awarded by the Japan Food Sanitation Association an official commendation for having a well controlled sanitary plant. Began to use heavy oil as boiler fuel at Iida plant. The average daily productivity: At Iida plan, 97 sacks; at Tenryû plant, 136 sacks. Productivity of labor per unit: 6.50 hours/1000 cuts (at both Iida plant and Tenryû plants).

1964 July 7–Awarded by the Nagano Labor Standards Bureau of Ministry of Labor an official commendation for having a well controlled and safe plant. Stabilization of quality of 'soft' products.

1966 Oct.–Shinshu Tofu Co. Ltd. was entirely destroyed by fire.

1966 Nov. 1–Awarded by the Minister of Health and Welfare an official commendation for having a sanitary plant.

1966 Nov.–Misuzu-tofu Co. Ltd. expanded its plants and began to make 'soft' products.

1967 July 1–Asahi-dofu Sales Co. Ltd. was founded.

1967 July–Development at Iida plant of a forming box which does not require removal of whey.

1967 Dec.–Daiya Tofu Co. Ltd. began a plant to work in concert with Asahimatsu Kori-dofu Co. Ltd.

1968 April–Daiya Tofu Co. Ltd. tied up with Asahimatsu Kori-dofu Co. Ltd. Asahimatsu has 53% of the Japanese market.

1968 June 22–Asahi Dofu Sales Co. Ltd. was dissolved. Shinshû-dofu Sales Co. Ltd. was established. Ginseki Kori-dofu Co. Ltd. consigned production to Misuzu Kori-dofu Co. Ltd. Established a sales company entering into partnership with Misuzu Kori-dofu Co. Ltd.

1969 March–Decision to install a test plant which treats liquid effluent waste by the lagoon method inside Asahimatsu Kori-dofu Company's plant.

1969 July 21–'New Asahi-dofu' began to be sold.

1970–Wrapping and boxing machines were introduced at the Iida plant. Specialized dryer for cubes was completed. Percentage of good products at Iida plant is 96% and that of Tenryû plant is 95.3%. The average daily productivity at the Iida plant: 232 sacks, and at the Tenryû plant: 224 sacks. Productivity of labor per unit at the Iida plant: 3.97 hours/1000 cuts, and at the Tenryû plant: 3.28 hours/1000 cuts.

1970 Jan. 1–Genichi Akaba became the new president of Asahimatsu Kori-dofu Co. Ltd.

1970 May–Genichi Akaba, the president of Asahimatsu Kori-dofu Co. Ltd. took office as the chief director of the Kori-dofu Industry Association Union of Nagano prefecture.

1971 Aug. 17–An overseas training program was established. The first trainee was sent to the University of Illinois. A liquid waste management facility was completed.

1972–Operations began in January in the Iida plant and in August in the Tenryû plant. 'Asahikoya with Seasoning' was developed and began its sales with a test market.

1972 Aug. 17–A second trainee was sent to the University of Illinois.

1973–'Asahikoya with Seasoning' was introduced to the public in the Tokyo market. Misuzu Tofu Co. Ltd. began to sell Koya-dofu with seasoning.

1975 Jan.–Tie-up with Mitsubishi Shoji in sales. President Fukui of the National Nutrition Research Institute and the nutritionist Kozu reported the results of an experiment using kori-dofu for preventing anemia.

1976 July–The machine for dehydrating okara at the Tenryû plant began operation.

1976 Oct. 23–The 30th anniversary of Asahimatsu Company was celebrated and a party was held. The percentage of good products at the Iida plant was 96.0%; at the Tenryû plant was 96.4%. The average daily productivity at the Iida plant was 244 sacks (1 sack = 60 kg of soybeans); at the Tenryû plant was 251 sacks. The productivity of labor per unit at the Iida plant was 1.99 hours/1000 cuts; at the Tenryû plant was 1.80 hours/1000 cuts. Address: 1008 Dashina, Iida-shi, Nagano-ken 399-25, Japan.

Manufacturer's Name: Ashland Soy Works.
Manufacturer's Address: 280 Helman St., Ashland, OR 97520. Phone: 503-482-1865.
Date of Introduction: 1981. October.
Ingredients: Water, organically grown soybeans, natural magnesium chloride or nigari (a derivative of seawater).
Wt/Vol., Packaging, Price: 16 oz.
How Stored: Refrigerated.
New Product–Documentation: What is Tofu? 1981. Label. 1981. 6 by 4 inches. Red and green on clear film. "No artificial additives or preservatives of any kind. To keep fresh, rinse and change water daily." Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Owner: James Muhs. Talk with Diana Muhs. 1988. Feb. 10. The company started making soyfoods in October 1981. Their first product was tofu, followed by soymilk about a year later.

5223. Clarke, Christina. 1981. Cook with tofu. New York,

© Copyright Soyinfo Center 2013

NY: Avon Books. 223 p. Oct. Index. 21 cm. Published in both trade and mass-market paperback editions.
• ***Summary:*** Contents: Acknowledgments. Introduction. 1. Tofu for all occasions (some sample menus). 2. Buying and storing tofu. 3. Ways to prepare tofu. 4. The recipes. 5. Points to remember. 6. Dips, spreads, and appetizers. 7. Soups. 8. Sandwiches. 9. Salads. 10. Dressings and Sauces. 11. Entrées. 12. Baked goods and desserts. 13. Substitutions. 14. Helpful sources. Glossary.

"Over 150 delicious, nutritious recipes you and your family will love." Note: As of Sept. 1989, 57,500 copies of this book have been printed. Of these, 47,500 were sold before March 1984, and 32,500 before Nov. 1982. It is still in print. Address: Rochester Zen Center, Rochester, New York.

5224. Fox, Madeline; O'Connor, K.; Timmins, J. 1981. Delights of tofu: Soydairy. Greenfield, Massachusetts: Soy to the World Publishing Co. 41 p. Oct. 1. Illust. No index. 22 cm. 2nd edition, 1986, retitled Tomsun Delights of Tofu.
• ***Summary:*** Contains 56 tofu recipes. Some use fish, poultry, and meat. A color photo on the cover shows a tofu quiche, salad, and chocolate parfait in a stemmed glass. Address: Greenfield, Massachusetts.

5225. Greenwood, Rebecca. 1981. Recipe for a prizewinning tofu cheesecake. *East West Journal.* Oct. p. 34-35.
• ***Summary:*** About the Great America Tofu Pie Bakeoff held as part of the 4th annual Soycrafters Association of North America convention in Fort Collins, Colorado. Ten tofu cheesecakes were submitted for the judges to sample. The first-prize winner was Sally Sheppard, an elementary school teacher from Salt Lake City, Utah. The recipe for her tofu cheesecake with peaches is given. Ms Sheppard is in partnership with her husband and four friends, forming a soyfoods business in Salt Lake City named Jack's Beanstalk. A photo shows Robin Clute slicing a tofu cheesecake.

Note 1. Ms. Greenwood changes the ingredients in the winning recipes to suit her personal macrobiotic beliefs, then adds a long paragraph criticizing tofu based on those beliefs, with no reference to her sources. "As a footnote I would like to add that I never use tofu in sweetened desserts... Tofu reduces the blood flow to the sexual organs and was traditionally used in Oriental monasteries to help reduce sexual desire." Note 2. When asked twice for the sources of her information about Oriental monasteries, she failed to respond. Address: Co-director, East West Center, Boulder, Colorado.

5226. Leviton, Richard. 1981. Things go better with soyburgers: The new all-American food. *East West Journal.* Oct. p. 24-30. Cover story. Photos by Frank Ward.
• ***Summary:*** Contents: Of tempeh burgers and tofu dips: An industry poised for growth. The soyfoods industry: Building on a solid foundation. Market penetration: Mainstreaming convenience soyfoods. Soyfoods market snapshot: Crystal ball gazing. Soy sense. Address: Editor and publisher of *Soyfoods,* the quarterly journal of the soyfoods trade, and executive director of the Soycrafters Assoc. of North America, 100 Heath Road, Colrain, Massachusetts 01340.

5227. Lima N.V. 1981. Lima natural foods pricelist. Lima Foods, Edgar Gevaertdreef 10, B-9830 Sint-Martens-Latem, Belgium. 12 p. Catalog. 30 cm. [Eng]
• ***Summary:*** Lima has been making organic, unrefined foods, without additives, for 20 years. Organic quality is guaranteed. Contents: Whole cereal grains. Stone-ground whole flours (incl. soya flour, 500 gm). Whole pulses (incl. soya, and azuki, each 500 gm). Coffee substitutes (incl. Yannoh with azuki, Dandelio [dandelion root], roasted barley, and chicory). Lima specialties (incl. Kokoh with azuki flour, Seitanpast [Vegetable spread with seitan]). Oriental specialties: Tamari-shoyu (from soya and wheat), Tamari, Hatcho miso, Barley miso, rice miso, instant miso soup (with dried vegetables), Kozou (kuzu), Mebosi (umeboshi), Tekka (natural seasoning with miso). Seaweeds. Unrefined oils. Sea salt. Vegetable protein products: Seitan (vegetable protein concentrate, 150 gm jar), Seitan goulash (seitan with vegetables), Soya filtrate (soyamilk), Tofu (curdled soya filtrate). Concentrated soups (incl. azuki soup). Books (incl. 2 cookbooks by Anette Gevaert). Address: Lima Foods, Edgar Gevaertdreef 10, Sint-Martens-Latem 9830, Belgium.

5228. Members of The Soy Plant collective in Ann Arbor, Michigan, outside their deli at 211 East Ann St. (Photographs). 1981.
• ***Summary:*** This color photo (see next page; 6¼ by 4¼ inches) shows eleven members of the Soy Plant. They are (back row, left to right): Suzanna Middaugh, Steve Fiering, Walter Rogaczewski, Margaret Shaw (she is holding up a small sign that reads "No Nukes), Dan Ecclestone, Kelly Kinney (Steve Fiering's wife since 1990), Tristram Seidler. Front row (left to right): Bob (surname unknown), Rob (surname unknown), John Gingrich, Jura McDowell.

To the left of the door is the large round sign of "People's Herb and Spice Co-op." To the right of the door is the large round sign of "The Soy Plant–Soy Dairy." The photo was taken at about the time The Soy Plant moved its manufacturing operations to 711 Airport Blvd. in Ann Arbor, leaving the deli at 211 East Ann St.

Location of original: The Soy Plant scrapbook, c/o Rosewood Products, Ann Arbor, Michigan.

5229. Nasoya Foods. 1981. Nasoya tofu cookbook. P.O. Box 841, Leominster, Massachusetts. 28 p. Oct. No index. 22 cm.
• ***Summary:*** Contents: Introduction. General serving suggestions. Nutritional benefits of tofu. Terms which may

© Copyright Soyinfo Center 2013

be new to you. Recipes (contains 62 recipes): Salads, soups, entrees, desserts, baked foods, snacks.

This cookbooklet is not vegetarian; Recipes use chicken and tuna. The cover of one edition is green on white, and of another is brown on white with a photo. Address: Leominster, Massachusetts.

5230. New England Soy Dairy, Inc. 1981. Put time on your side. New Soydairy cookbook increases tofu use. *Erewhon Monthly.* Oct. p. 2-3.
• ***Summary:*** These are the titles of two full-page ads. The first shows a package of Soydairy tofu "with the soydairy 28 day shelf life advantage." The second shows a man holding a cookbook titled "Delights of Tofu." Address: Greenfield, Massachusetts.

5231. Ontos Yogaville. 1981. Tofu, Ontos style. *Ziriuz* (*Australia*). Oct. p. 21.
• ***Summary:*** This spiritual community is planning "construction of a tofu-making building. We are planning to supply East Gippsland and Melbourne with this wonderful food. This will provide an important source of income to the community, and provide a real service to those foods to better their diet." Address: Buchan, 3885, Australia. Phone: 051 55 0215.

5232. Soy Plant (The). 1981. An all-soy deli: Tofu, miso, soymilk, tamari, tempeh (Ad). *Ann Arbor Calendar* (*Michigan*). Oct. p. 21.
• ***Summary:*** At the top of this small ad (2½ by 1.75 inches) is the collective's logo. At the bottom: "Present this ad for a 10% discount on listed items through 10/31/81. Limit one per customer." Address: 211 East Ann St., Ann Arbor, Michigan 48104. Phone: 663-0500.

5233. **Product Name:** Tofu.
Manufacturer's Name: Thistledown Soyfoods.
Manufacturer's Address: R.R. 5, Duncan, BC, V0L 4T6, Canada.
Date of Introduction: 1981. October.
New Product–Documentation: Leviton. 1982. In a Small Bright Building. They began making tofu in Oct. 1981.

© Copyright Soyinfo Center 2013

5234. **Product Name:** Tofu.
Manufacturer's Name: Tofu Lady (The).
Manufacturer's Address: Hector, NY 14841. Phone: 607-546-8258.
Date of Introduction: 1981. October.
New Product–Documentation: Talk with (call from) Carol DeSarno, founder and owner of The Tofu Lady. 1993. Oct. 27. She started making tofu in Oct. 1981. She still makes it in a 12 by 18 foot building attached to her home; the shop is and has always been licensed and inspected. Age 43, she now makes about 300 to 500 lb/week of tofu which she sells to health food stores, restaurants, and Wegmans. Her shop is near Ithaca, and her main competitor is Ithaca Soy.

5235. Garden of Eatin'. 1981. Price list. 5300 Santa Monica Blvd., Los Angeles, CA 90029. 1 p. Nov. 1.
• ***Summary:*** For 7 soy products, gives case pack, size, and distributor, wholesale, and retail prices. Address: Los Angeles, California.

5236. Tarzan, Deloris. 1981. Tofu: It's soul food. Sages, yogis eat it right after sips of heavenly mists and morning dew. *Seattle Times.* Nov. 1. p. E8. Sunday. [1 ref]
• ***Summary:*** "Luke Lukoskie, the Northwest's tofu tycoon... views tofu less as a business than as a way of life. The concept of right livelihood, he says, helps define a new approach to work." Photos show: (1) Russ Terry, an apprentice at Island Spring, Inc., ladles "soy curds into long forming boxes to drain," cool and be pressed. (2) Issie Rosford arranges grilled slices of Delicious Steamed Tofu in containers, ready to be shipped to stores. Address: Staff writer, Washington.

5237. Mossman, Josef. 1981. Tofu finally comes into its own, gets its own 'complete' cookbook. *Des Moines Register* (*Iowa*). Nov. 2.
• ***Summary:*** A review of Christina Clarke's new book *Cook with Tofu*–"a first-rate cookbook." "The book contains generous mentions of the Shurtleff-Aoyagi *Book of Tofu,* so generous, in fact, that I am nearly convinced that perhaps *The Book of Tofu* would be my choice between the two."

5238. Atkins, Candace. 1981. Tofu–the 'natural' kind of fast food. *Green Sheet* (*Santa Cruz, California*). Nov. 4. p. 3.
• ***Summary:*** About Kevin Slooten and his Well Bean Deli, a "fast and natural" soy food restaurant at 349 Soquel Ave. in Santa Cruz. A photo shows Kevin and Susie Lord preparing a tofu menu.

5239. Weber, Marcia. 1981. Re: New developments with tofu and tempeh in Australia. Letter to William Shurtleff at Soyfoods Center, Nov. 8. 1 p. Typed, with signature on letterhead.
• ***Summary:*** "Here in Sydney there are only two other major producers of Bean Curd. They are both Chinese and are very enterprising.

"Our factory has shut down, and now one of the Chinese producers [Sin Ma Trading Co., 9 Meeks Road, Marrakville, NSW] is allowing us to use their premises to make our tofu... We are hoping to start another factory with more capital behind us. Unfortunately, we were grossly undercapitalized, and this was our downfall. The demand here in the healthfood line has stabilized at about 600 [pieces of tofu] weekly. Many people buy the Chinese bean curd, because they don't know the difference. When they experience our brand, they realize that there is a vast difference.

"However, it is impossible to compete with the price; our Tofu is twice the price. Because our volume is so low, we have very little choice. I myself teach cooking, and try to promote it as much as I can... Don't forget that this whole country is only 13 million people. It's very small compared to the U.S."

Gives addresses for Castle Trading Pty. Ltd. in Ranwick NSW, Homeland Community in Bellingen NSW, Sin Ma Trading Co. in Marrakville NSW, and Elly & Cyril Cain in Eumundi. The latter are just starting tempeh making on a very small scale. Address: East West Foundation of Australia, Suite 507, 363 George Street, Sydney 29 5481, Australia.

5240. Wiegand, Peter. 1981. Re: Starting Auenland Tofu in Germany. Letter to Michael Pierce at Wildwood Natural Foods, 135 Bolinas Rd., Fairfax, California, Nov. 9. 1 p. Handwritten, with signature. [Eng]
• ***Summary:*** This letter is written on an artistic letterhead showing a green tree-vine growing up the right side and part way across the top. The paper is light gray. In the lower left is a little green house with a shale roof and a blooming tree by the chimney.

In Germany, things are going pretty well for Peter and his wife, Elgard. A few days ago they settled in a beautiful place in the mountains. Winter time has already started and all of nature has fallen asleep, but life keeps the Wiegands very busy. Peter has already gotten a room for the "Tofu Kitchen." After Christmas they want to start getting it ready to make tofu. They invite Michael to come to Germany, and to pay his way. "So give our love to Wildwood and to Craig the gardener, and give the other letter to him."

Note: This is the earliest document seen (Oct. 2000) concerning Auenland Tofu in Germany.

Talk with Michael Pierce of Georgia. 2000. Oct. 11. Craig was an organic gardener in Marin, California. They used to take all of Wildwood's okara over to Craig's garden and compost it for the community garden. Peter was a musician, and he also made candles. Michael is quite sure Peter did not illustrate this letterhead. Address: Hub Bleimhaus, D-8210 Prien-Chiemsee, West Germany.

5241. Sugawara, Akiko. 1981. Amerika no tôfuyusan [American tofu company (K. Tanaka & Co. in New York City)]. *Living Book.* Nov. 11. p. 82. [Jap]
• ***Summary:*** Sugawara, Akiko. 1981. The Living Book (Japan). Nov. 11. p. 82. In this 3 by 4 inch sidebar to a larger article on tofu, color photo shows the front of K. Tanaka & Co. in New York, Founded in 1903, the company is located on Amsterdam St. The 45 year old owner, Mr. Keisuke Murakami, succeeded to the shop ownership 20 years ago. His tofu sells for $0.50 a piece. He previously worked for Pan Am. The shop also sells other Japanese foods. His 3 workers also make Spinach Tofu Pie and Tofu Lasagna. Address: 326 Amsterdam Ave., New York, NY (Manhattan's West Side).

5242. Jolley, Clifton. 1981. Well, uh, 20 years does make a difference. *Deseret News* (*Salt Lake City, Utah*). Nov. 20. Section C.
• ***Summary:*** "Drat those tofu ladies. OK, so what they made with *the terrible tofu* was a lot better than it had any right to be. But when they documented the quality of their cuisine by saying that BYU's Cannon Center was using it, I responded (in print–oh, rue the day!) that Cannon Center didn't seem like much of an epicurean endorsement. Cannon Center was not pleased. BYU Food Services was not pleased. My word!"

He son received a call. "Mr. Jolley, we are pleased to inform you that next Wednesday is going to be Clifton Jolley Day at Cannon Center."

5243. Cohen, Richard L. 1981. Fairfax firm finds wild growth in business of tofu sandwich. *San Francisco Business Journal.* Nov. 23. p. 6-7.
• ***Summary:*** "On Dec. 31, Wildwood Natural Foods in Fairfax [California] will have chalked up its first complete fiscal year with total sales in excess of a quarter of a million dollars. The company has grown this large, this quickly, by concentrating its efforts on preparing 3 kinds of tofu sandwiches that are distributed fresh every day to approximately 30 health food stores in Marin [County] and San Francisco. 'I knew that the company would be successful right from the beginning,' said president Paul Duchesne. 'I had studied other tofu manufacturing shops closely and concluded that the keys to success in this business were to manufacture mostly secondary tofu products rather than just raw tofu, distribute the products fresh every day and minimize the physical area of the tofu-producing operation.'

"Duchesne said that the tofu is manufactured in an area of only 150 square feet. This, he said, leaves most of the space in the shop for sandwich making. 'The sandwich business is a manpower-intensive business,' he said, 'but it is also a high-profit business compared with simply distributing raw tofu.'"

"Buoyed by his success with that [brown rice and tofu] sandwich, Duchesne decided to make a career of it. He found 3 partners who each invested $10,000 in the business. A tofu manufacturing facility was built and in August 1980, the company officially geared up for production as Wildwood Natural Foods and began to produce other sandwiches besides the popular brown rice and tofu."

"The sandwich operation accounts for 60% of Wildwood's business... Raw tofu, distributed to 8 health food stores and representing 15% of total sales, is changed every day... Tofu deli products include such delights as tofu salad and Good Puddin', a product with fruits, tofu and carob. 'We run our tofu-making equipment 6 days a week, 8 runs a day and 40 pounds at a run,' Duchesne said. 'That totals 1,920 pounds a week.'"

"For 10 years Duchesne was an associate engineer for AT&T Long Lines, first in New York and then in San Francisco."

5244. Leviton, Richard (Ira). 1981. Re: Memorandum to the SANA board. Letter to board members of the Soyfoods Association of North America, Nov. 24. 1 p. Typed, with signature on letterhead.
• ***Summary:*** The letter begins: "Hello friends: All 4 of you now, as Pat Aylward has resigned from the Board. Bill Shurtleff has agreed to loan SANA the sum owed Colorado State University (approximately $3,100) which we will pay back monthly in $200 installments, the balance at the conference next July. Luke Lukoskie has agreed to back the [upcoming] conference financially and to provide some financial assistance to me in advance of the conference. Luke is also going ahead with the fund raising letter and program which we outlines at the September Board meeting in California. As usual, SANA hovers on the edge of bankruptcy and grand success.

"In regard to the July conference at the University of Washington, July 7-11, can I enlist your help presently in two areas? Four requests for help are described." Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

5245. MacCormack, Harry; Posner, Mia. 1981. Re: Integration of the soy dairy with the bio-farm. Letter to William and Akiko Shurtleff at Soyfoods Center, Nov. 24. 1 p. Typed, with signature on letterhead.
• ***Summary:*** "We've had people from all over the world visiting the farm to see the integration of the Soy Dairy with the Bio-Farm process. Also to see and watch the wood-fired processing. We're more committed than ever to the need for small, local, capital-non-intensive, soy dairy operations. There seem to be others, so we've done a fair amount of teaching and have spawned a couple new dairy farms." Address: Sunbow Farm Products, Route 2, Box 46, Corvallis, Oregon 97330. Phone: (503) 929-5782.

5246. J.D. 1981. Nofu [The Koba family of Oriental Groceries in San Diego will soon stop production of handmade tofu]. *Reader* (*San Diego, California*). Nov. 25. p. 3. City Lights section.
• ***Summary:*** "Chill news is blowing through San Diego's Japanese-American community: Haruki and Michiko Koba are going out of business. This means soon, very soon, it will be impossible to buy handmade tofu anywhere in Southern California." The Kobas have made tofu by this painstaking process for the past 33 years; but now the city is buying the building which houses their oriental groceries storefront, with plans to demolish it and replace it with a park. "The Kobas will be moving out sometime shortly after the beginning of next year. (The city offered to help them relocate, but the couple decided it wasn't worth the trouble to move the business.) They first began paying $45 a month for a single room in the building in late 1947, not long after Haruki was discharged from the U.S. Army. Born in Coronado, he had studied business at the University of Redlands until the outbreak of the war, when he volunteered for the service (and fought in France and Italy). When he got out, he and his wife had the chance to buy the foundering tofu business, which another second-generation Japanese-American had been operating unsuccessfully."

"Haruki had a cousin in Tokyo who wanted to emigrate to the United States, so the cousin worked in a tofu factory there [in Tokyo] to learn the manufacturing process, then came to San Diego to aid the Kobas."

"They rise before dawn and usually by 6 in the morning Haruki and Michiko arrive at the storefront, where Haruki grinds about 13½ lb of yellow soybeans. He uses an old electric grinder equipped with volcanic stones... He harbors a few other secrets which he declines to divulge." Toward the end of the tofu-making process, Michiko fills wooden forms with the softly congealed curd. The Kobas sell the 1½-lb cakes in the front of the store for $0.89 apiece. "Up to last year, Haruki also sold them (along with the fried tofu cakes called *age,* which Michiko also makes) from the back of a truck. Just like a milkman, he plied a regular route."

Contains a nice photo of Mr. and Mrs. Koba.

5247. Lukoskie, W.M. Luke. 1981. Letter of intent between Island Spring Inc. and Soyfoods Association of North America. Vashon, Washington. 2 p. Nov. 27. Typed, with signature.
• ***Summary:*** Island Spring has applied for a trademark on the name "Soyfreeze," which refers to a soy-based ice cream. Island Spring is willing to make use of the term "Soyfreeze" available to SANA, who may allow its members to use the term under the terms outlined in this agreement. Note: The agreement was never signed by SANA and the term was never used by any company other than Island Spring. Address: P.O. Box 747, Vashon, Washington 98070. Phone: (206) 622-6448.

5248. *Diet and Exercise.* 1981. Diet food of the 80's. Fall. p. 26-27. [1 ref]
• ***Summary:*** The subtitle reads: "It makes delicious Sloppy Joes, meatless meatloaf, eggless egg salad. When you cook with it, you not only like what you eat, but you save calories and money and add a high protein, low cholesterol, low fat food to your diet." Bill Shurtleff and Akiko Aoyagi see a bright future for tofu in America. Contains 8 recipes and two photos of the New England Soy Dairy.

5249. Elliot, Sharon. 1981. Dinner can be a picnic all year round: Meatless recipes. Palo Alto, California: Fresh Press. 128 p. Nov. Illust. by Tonia Macneil. Index. 21 cm.
• ***Summary:*** A vegetarian cookbook. Soy-related recipes include: Tofu Mexicano (p. 14). Find-the-tofu lasagna (p. 28-29). Surprise loaf (with dried soy beans, p. 49). Zesty soy soup (with cooked soy beans, p. 63). Address: Palo Alto, California.

5250. **Product Name:** Tofu Spinach Pie.
Manufacturer's Name: K. Tanaka & Company.
Manufacturer's Address: 326 Amsterdam Ave., New York, NY (Manhattan's West Side).
Date of Introduction: 1981. November.

5251. **Product Name:** Tofu Lasagna.
Manufacturer's Name: K. Tanaka & Company.
Manufacturer's Address: 326 Amsterdam Ave., New York, NY (Manhattan's West Side).
Date of Introduction: 1981. November.
New Product–Documentation: Sugawara. 1981. Living Book magazine. Nov. 11. p. 82.

5252. Leviton, Richard. 1981. Plenty to eat at "Soyfoods in America" conference [at Colorado State University]. *Vegetarian Times* No. 51. Nov. p. 86-88.
• ***Summary:*** More than 240 people, from 18 nations, attended the 4-day conference. The "Soyfoods Expo 1981" featured a 30-booth trade show, including much production equipment. A strong feature of the conference was the opportunity it offered everyone to sample soyfood dishes in daily meals and cooking classes. The vegetarian food service program was developed and supervised by Pat Calhoun and Pattie Morris, soyfood chefs associated with White Wave, which helped plan the conference.

"Another world's first was the Tofu Cheesecake Bakeoff, never before dreamed of anywhere, anytime (according to our far-flung sources) in the tofu-eating world. Ten daring contestants baked their tofu creme pies and cheesecakes (free from dairy, eggs, sugar, white flour) during the conference

© Copyright Soyinfo Center 2013

while the panel of hungry judges went delirious in sampling, then evaluating, what was agreed were the finest tofu cheesecakes ever submitted to a panel of soyfoods judges."

A series of ten cooking classes were taught by Akiko Aoyagi, Rebecca Greenwood, Richard Jennings, Darrilyn Jackson, Robin Clute, Blanca Dominguez, Demetria Nanos Hamdorf, Melodie Phipps, and Thelma Dalman. Linda Gilbert and Ray Wolf of Rodale Press demonstrated their shortened and simplified home tempeh method.

Photos show Robin Clute, Akiko Aoyagi, and Rebecca Greenwood. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

5253. Leviton, Richard. 1981. Status report: The USDA, school meals, and tofu. Colrain, Massachusetts: Soycrafters Association of North America. 10 p. Nov. Unpublished manuscript.
• ***Summary:*** "Background: Between February and May 1979, Judith Rubenstein of New England Soy Dairy, established contact with Carole Tucker Foreman, Director of the Food and Nutrition Service at USDA, regarding approval for tofu in school meals. The response was favorable. On May 9, Ms. Rubenstein visited Foreman's office and made a presentation; Ms. Foreman stated 'We are making every effort to find a means to authorize foods such as tofu to meet meal requirements of the Type A lunch.' Meanwhile, tofu industry members, at their annual meeting in Massachusetts, in late July 1979, express common interest in pursuing USDA approval for tofu. No further action was taken until August 1980, as the Chronology presented here explains.

"It was expected that Carole Tucker Foreman would have secured the approval for tofu. With the change in administrations, the certainty of approval seemed to wane. However, President Reagan's proposed budget cuts to school lunches intensified the need for approval, although stressing the desirability from a different angle. As tofu is now part of the overall revised meal pattern, as distinct from being a separate, highly visible, regulation, and as many school food service directors are financially pinched, the approval of tofu for school meals seems highly likely and imminent." A chronology then gives 24 dates and events from 10 July 1980 to 25 Sept. 1981 concerning steps taken by SANA and USDA to help get tofu into the USDA school lunch program. The last event is dated 25 Sept. 1981. "President Reagan instructs USDA to withdraw all proposals; USDA withdraws permission to use tofu as a creditable protein in Santa Cruz schools." Address: Executive Director, SANA, 100 Heath Rd., Colrain, Massachusetts 01340. Phone: (413) 624-5591.

5254. Norton, Reggi; Wagner, Martha. 1981. The soy of cooking: A tofu and tempeh recipe book. Revised ed. White Crane, P.O. Box 3081, Eugene, OR 97403. 58 p. Nov. Illust. 22 cm.
• ***Summary:*** Contents: Introduction. 1. Tofu and tempeh basics. Recipes–2. Salads, dressings, and dips. 3. Light meals and snacks, including appetizers and soups. 4. Main courses. 5. Desserts and muffins. Address: Eugene, Oregon.

5255. *Plenty Canada News* (*Lanark, Ontario, Canada*). 1981. Soy Dairy: Integrated soy project–Guatemala. Fall. p. 3.
• ***Summary:*** "The Integrated Soy Project which Plenty Canada introduced into the Guatemala Highlands is continuing without the presence of Plenty volunteers. The Indigenos of San Bartolo, trained by Plenty Volunteers in soy technology, now operate their Soy Dairy on a daily basis. Two hundred local farmers have grown enough soybeans to supply the dairy for the rest of this year.

"The dairy is currently sustaining itself by selling soy ice bean and tofu at an affordable price in the local market. Every week it sells about 75 gallons of ice beans and 50 lbs. of tofu, and is making just enough money to cover weekly operating expenses."

"Just about everybody seems to love ice cream. The soy ice bean is rich and creamy and is made with all natural native fruits and flavors such as: banana, pineapple, orange, raspberry, zapote, papaya, melon and chocolate."

An illustration shows a cone of "Soy Ice Bean." A photo shows many Guatemalan children happily holding up cones of soy ice bean. Below this article is a form requesting donations to Plenty Canada. Address: R.R. 3, Lanark, Ontario K0G 1K0, Canada.

5256. **Product Name:** Pumpkin Pie (Tofu-Based. Baked with a Crust).
Manufacturer's Name: Redwood Valley Soyfoods Unlimited.
Manufacturer's Address: P.O. Box 371, Redwood Valley, CA 94570.
Date of Introduction: 1981. November.
Ingredients: Pumpkin, tofu, honey, vanilla, spices. Graham cracker crust.
Wt/Vol., Packaging, Price: 4 oz.
New Product–Documentation: Spot in Soyfoods. 1983. Winter. p. 48. "For a Soyful Christmas."

5257. **Product Name:** Tofu.
Manufacturer's Name: Sin Ma Trading Co.
Manufacturer's Address: 9 Meeks Rd., Marrickville, NSW, Australia.
Date of Introduction: 1981. November.
New Product–Documentation: Letter from Marcea Weber. 1981. Nov. 8. They are allowing us to make tofu at their plant. Marrickville is in is the southwestern part of Sydney.

5258. Soy Plant (The). 1981. The Soy Plant Deli / retail store presents... (Ad). *Ann Arbor Calendar* (*Michigan*). Nov. p. 7.
• ***Summary:*** "Our community loan program. Inquire at 211

© Copyright Soyinfo Center 2013

E. Ann at how you can receive tofu as interest on a $100.00 returnable loan. Or give the interest to a friend while retailing ownership of the money loaned. And while you're there try our home style non-dairy vegetarian food to go! Pasties, pot pies, seitan roast, salads, sandwich spreads, and sweet delights." Address: 211 East Ann St., Ann Arbor, Michigan 48104. Phone: 663-0500.

5259. **Product Name:** Tofu Links.
Manufacturer's Name: Soya Food Products.
Manufacturer's Address: Cincinnati, Ohio.
Date of Introduction: 1981. November.
Ingredients: Tofu, all natural spices, salt, vegetable oil.
New Product–Documentation: Spot in Soyfoods. 1982. Summer. p. 54. "The Missing Link." Introduced Nov. 1981.

5260. **Product Name:** Furama Tofu (Bean Curd) [Regular, or Soft].
Manufacturer's Name: Soyfoods of America.
Manufacturer's Address: 1091 E. Hamilton Rd., Duarte, CA 91010. Phone: 213-358-4526.
Date of Introduction: 1981. November.
Ingredients: Soybeans, water, calcium sulfate.
Wt/Vol., Packaging, Price: regular: 19 oz. Soft: 12 oz.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Owner: Ken Lee. Shurtleff & Aoyagi. 1983. Soyfoods Industry & Market. Starting year given as 1981. Talk with Ken Lee. 1988. Aug. 29. This product was launched in Nov. 1981. It now accounts for about 30% of his company sales. Mrs. Lee recalls introduction date to be Aug. 1981. Labels. 5 by 4 inches on plastic film. Regular: Red, black, and white. Soft: Yellow, brown, and white. "No preservatives."

5261. Suzuki, Tsuguyoshi; Okazaki, M.; Kashiwazaki, H.; Moriyama, M.; Takemoto, T-I. 1981. Changing food consumption of Japanese immigrants in the lowland of Bolivia. *Ecology of Food and Nutrition* 11(2):103-16. Nov. [13 ref. Eng]
• ***Summary:*** During a 3-day period in July and August 1975, dietary records of 34 households of Japanese immigrants in the lowlands of Bolivia were analyzed for the amounts and types of food consumed. The colony of Japanese immigrants, *Colonia San Juan de Yapacaní,* was established in 1955 on the basis of a governmental agreement between Bolivia and Japan. From 1955 until 1974 a total of 297 households, including 1,649 individuals, immigrated into the colony; the majority came during the first ten years. Among the items consumed were soybean products (not including soy sauce; consumed by 79.4% of the households), *tsukudani* (small fish cooked in soy sauce), wakame, nori, and kombu (3 sea vegetables), *furikake* (a seasoning containing nori), and azuki beans. "Among legumes, soybeans occupied the top position even after excluding the consumption of soybean sauce. The usual preparation was miso (soybean paste fermented and salted) and tofu (soybean curd), raw or fried, which the colonists could buy from a tofu shop in the colony."

Adzuki beans were boiled with glutinous rice and served at celebrations. "Immigrants procured the seed from Japan or Brazil and cultivated the beans." Also served was *kintsuba* (a sweet adzuki bean cake). One of the most widely used seasonings was soybean sauce, used in 85.3% of the households. Address: 1. Dep. of Human Ecology, School of Health Sciences, The Univ. of Tokyo, Tokyo, Japan.

5262. **Product Name:** Santa Cruz Tempeh. Soy-Rice.
Manufacturer's Name: Western Soy Complements.
Manufacturer's Address: 335 Pennsylvania Ave., Santa Cruz, CA 95062. Phone: 408-423-2256.
Date of Introduction: 1981. November.
Wt/Vol., Packaging, Price: ½ lb. and 1 lb.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. July 23. Owner: Jeremiah Ridenour. Talk with Jeremiah Ridenour. 1988. Aug. 31.

5263. Knoblauch, Mark. 1981. Restaurants: Jade East, Thai Hut: 2 fresh finds on the dining front. *Chicago Tribune.* Dec. 6. p. G5.
• ***Summary:*** Includes a review of the Thai Hut (1509 W. Devon Ave.). "A lot of people who claim they don't like bean curd probably have never tasted deep-fried bean curd. The heat of deep frying removes the liquid from the bean curd, leaving a puffy brown shell with a light, nutty flavor that takes particularly well to a variety of dipping sauces. Thai Hut's version ($2) sauces the bean curd with a thin spicy sauce of Thai fish sauce, chopped peanuts, and red peppers."

5264. White, Jim. 1981. Food gifts good enough to give and receive: Christmas gifts. *Toronto Star* (*Ontario, Canada*). Dec. 6. p. E4.
• ***Summary:*** No. 3 is tofu, also known as the "white steak" of the Orient [sic], bean curd, or dofu. It "is that shimmery, squiggly custard found in Chinese and Japanese restaurants."

Made from soy beans, tofu is just catching on. It is a healthy food, a good source of protein, that contains no cholesterol and is low in calories and sodium. Vegetarians like tofu, as do those who are allergic to dairy products. In fact, many alternatives to dairy products are now made from tofu.

Since tofu is inexpensive, it should grow in popularity among those who are budget minded or thrifty.

For the many people who run out of ideas for how to prepare tofu, its smart to buy a good tofu cookbook. *Cook with Tofu,* by Christina Clarke is one of these. Address: Food editor.

5265. Burns, Ken. 1981. Re: George Ohsawa and a brief

© Copyright Soyinfo Center 2013

history of macrobiotics in America. Letter to William Shurtleff at Soyfoods Center, Dec. 9–in reply to inquiry. 7 p. Typed, with signature. [1 ref]

• ***Summary:*** An excellent, in-depth history by a very knowledgeable source, who occasionally teaches a course in Boston on the history of macrobiotics in the USA. With numerous fond personal recollections and character sketch of Ohsawa. 1959 Dec.–Ohsawa first visited the USA. 1960 Jan.–He published, in mimeograph form, his astonishing book *Zen Macrobiotics* in English in New York City. "Although not in great detail, here he introduced miso, tamari, and tofu to the general public. The first two especially quickly become essential ingredients in the diet of almost all macrobiotic people in the US.

"During January, February, and March [1960] he lectured extensively at the Buddhist Academy in New York City. He returned to the US in July and lectured at the First American Summer Camp on Long Island daily for two months.

"The Second American Summer Camp was held in July and August of 1961. I am not sure whether he was present or not. This was in Wortsboro, New York. In that year also, thirteen macrobiotic families left New York and moved to Chico, California on his advice. The next year, 1962, they founded the first American macrobiotic food distribution and processing center in this country.

"In 1963, in the summer he came to the US again and lectured in Boston, NYC, and at the Chico Summer Camp.

"In 1964, he lectured at the Big Sur Summer Camp.

"In 1965, he lectured at Mayoro Lodge near Pulga, California.

"In 1966, on April 24th [or 23rd] he died in Japan.

"All in all, George Ohsawa visited this country either five or six times, each time lecturing, and speaking to the people individually without rest. He was ceaselessly active. I have heard many anecdotes concerning him during that period. As best I can determine, his affect on people was quite simply shattering–they had never seen anything like it.

"According to Madame Ogawa (who spoke in great and loving detail of him at the 1981 French Meadows Summer Camp) he was a very sharp dresser and had quite an eye for beauty in the female of the species. She was so obviously still in love with this 'terrible man.'

"Jacques DeLangre... never tires of telling about the time when they were descending the mountain after a long and intensely yangizing summer camp. Their car rounded a bend and there!, suddenly!, was a huge patch of luscious juicy *blackberries!* The car as though it had a mind of its own, screeched to a halt, all the doors flew open, and all the passengers were catapulted into the middle of that patch. It would be hard to imagine a clearer, cleaner-cut example of the attraction of yang to yin. Their ecstatic reverie was broken, a few moments later, by the sound of another car coming around the bend. 'Oh my God, it's Ohsawa himself; what will he say?' (In those days people were, understandably, a little naive in their application of yin and yang.) Well, that second car did just exactly what the first one had done–the screeching halt, the doors flying open, and of a sudden there was George Ohsawa right in the middle of that patch too, crying out in his basso profundo voice, 'Oh blackberries, they are sooo delicious!'

"That voice–possibly there is the key to understanding Ohsawa's impact in this country; I didn't personally meet him; he died about a month after I began macrobiotics in 1966. But I have heard him on many tapes, poorly-recorded as most of than were. And I have spoken to others who did know him personally, and sooner or later they get around to mentioning his voice. Peter Magnusson here in Boston describes it as the kind of voice that rattled the windows. I have done a course here in Boston I call 'The Healing Power of the Spoken Word;' and for that course I have listened to all the recordings of the great speakers of this era that I can get my hands on–Kennedy, Churchill, Roosevelt, William Jennings Bryan, John L. Lewis, etc. Probably the best orator in the world today (or was anyway, I haven't heard him lately) is Fidel Castro. His is a warm, rich, full voice, capable of a startling range of thoroughly human emotions–from the righteous indignation and anger of an oppressed people through endless shades and nuances to a profoundly warm and compassionate voice that might be that of your very best friend. Take that voice in account and you can understand Castro's success against seemingly insurmountable odds in Cuba. Well, I can tell you of an even better voice–that of Ohsawa. Peter Magnusson goes on to say that when he spoke it seemed as if the very world itself was speaking. As I have said above, his was a profoundly rich, deep voice, ranging from bass to baritone. But at the same time it was very delicate, sensitive, and poised, as ready to go up as down, as ready to go left as right–flexible! But the one quality that his voice had that I have never heard equaled I can sum up with one adjective–Vibrant.

"Probably this is not the kind of material you can use in your book, but I have taken a lot of time here on it anyway. The reason is that all the discussions I have heard about Ohsawa and his impact on this country have centered on what he said and not how he said it. Otherwise, how are we to explain how he was able to inspire so many people, along than Michio and Aveline Kushi, Herman and Cornellia Aihara to literally give up everything and come to a strange land to struggle against apparently insurmountable odds. Because that's what they did, arriving here penniless, operating on a wing and a prayer so to speak. And it is to them that we must go in the next chapter of this little story:"

Note: People were also attracted to the great sense of happiness, vitality, love of life (*joie de vivre*), and purpose that Ohsawa radiated. Continued. Address: Boston, Massachusetts.

5266. Hoang, Van Chi. 1981. Re: Vietnamese soy sauce, xi dau, and nuoc tuong. Questions answered on Soyfoods Center letterhead (dated 9 Dec. 1981) and returned to SC. 1 p. Plus 2 enclosures.

• ***Summary:*** Upon receiving Mr. Hoang's answers by mail, Shurtleff called him on 6 March 6 1982 to ask for clarification on some points. The two sets of answers are merged below.

Xi dau (pronounced "si zao") is the Vietnamese term for *siyu* or black soy sauce served mostly in Chinese restaurants in Vietnam. It is made in Vietnam, but only by Chinese, in both North- and South Vietnam. It is exposed to air for many months to make it dark.

Nuoc Tuong (pronounced "Nuc Tung"–"Nuoc means "liquid") is the water in which soybeans are soaked, typically for about 9 days, but sometimes as long as 30 days. This soak water (also called "soybean self-autolysis water") is removed because otherwise (many believe) it would lower the quality of the finished Tuong. The soak water contains some soluble soybean nutrients and is pale yellow to clear in color. The Japanese discard this water, but some Vietnamese add salt and use it for pickling eggplants, etc.

There is no filtered soy sauce in Vietnam. Of the soy "sauces" made in Vietnam, about 60% is tuong cuda (ground jiang) and 40% is tuong ban (not ground; made in the village of ban). The origin of these two fermented Vietnamese soy products is unknown, but Mr. Hoang suspects they are of ancient origin. Mahayana Buddhists must be vegetarian. Buddhism went to Vietnam (from India) before it went to China, because Vietnam was an international port, trading with India. In about the 3rd century AD Buddhist monks came to Vietnam and spread Buddhism. They ate tofu and soy sauce.

What percent salt (sodium chloride) exists in your finished tuong? 10% in Tuong Cu Da for Vietnamese consumers. 6% in Bodhi Sauce for those who follow a low-salt diet.

In Vietnam are there any traditional soy sauces that have the liquid separated from the solids like Japanese soy sauce? If so, what are they called? Ans: Yes, Tuong Ban; it is usually used for cooking and is made in the Ban village.

One of the enclosures is from the International Register of Profiles. Born on 1 Oct. 1915 in Thanh-hoa province in Vietnam, Hoang Van Chi descended from a long line of Confucian scholars. He attended the best universities in Vietnam (1928-1940) earning a Baccalaureate in mathematics and another degree in physics, chemistry, and biology. He studied Oriental philosophies with a critical and non-dogmatic mind. Like his father and grandfather, he persistently opposed the French colonial rule. In 1940 he married Le Han Phan. In 1945 he joined the resistance and served the Ho Chi Minh government in many high offices, including Director of the National Mint. In 1948 he won an award for his brilliant work from Ho Chi Minh. But in 1955 he fled Saigon when the regime turned towards a full Communist dictatorship. He went into voluntary exile in Europe, settling in Paris from 1960-65 where he wrote his book "From Colonialism to Communism." Address: Bowie, Maryland.

5267. Jootla, Susan Elbaum. 1981. Re: Making miso and tofu at home in India. Letter to William Shurtleff at Soyfoods Center, Dec. 15. 2 p. Typed, with signature.

• ***Summary:*** She and her husband have used up their first batch of homemade white miso and are now consuming a great pot of modified red miso. She thanks William and Akiko Shurtleff for the guidance their Book of Miso and Book of Tofu have given them in making these soybean products over the past few years.

She gives details of their experiments making tofu and miso 7,000 feet up in India's western Himalayas. Her husband had been trying unsuccessfully ever since he worked in Indonesia in the 1950s. Finally a friend who worked in a Florida health food store sent them The Book of Tofu. Using Epsom salts and an electric blender they succeeded in making good tofu. Susan then wrote an article on making tofu in India for an Indian woman's magazine, which was published in the spring of 1979. She is working on another longer article.

Having conquered tofu, she turned to miso. The big problem was getting koji starter, which she eventually obtained from Kikkoman in Tokyo.

Susan is now thinking of making tofu commercially on a small scale to cater to the interest evinced by several boarding houses in town. There are already a few soyamilk producers in India. In India, Susan uses tofu as "a substitute for paneer, which is the fresh cheese from milk, drained and pressed briefly to a compact solid texture. Tofu can be used in curries and pakoras (a very common snack, spicy fritters) in almost the same way as paneer is traditionally prepared, thus decreasing the problem of tofu's novel taste.

"We have also found that okara can be incorporated into dough for chapaties [chapatis], in equal proportions to the wholewheat flour. When the dough is seasoned with salt and ground cumin and coriander seeds, and baked as a chapati on a cast iron griddle, the resultant thick bread should be attractive for Indian cooks who begin to make tofu but are reluctant to waste the residue.

"As you can see, we are tofu enthusiasts and are trying to spread an appreciation of soyfoods in this country in a small way. So far, texturized soy protein is the only product that seems to have caught on here." Doubtless, this is because it does not require refrigeration, is not affected by heat or moisture, and is a useful and inexpensive meal stretcher.

Note: As of April 2008, Susan has long practiced Buddhist meditation and is the author of many related books. Google "Susan Elbaum Jootle" and you will see. Address:

Jeet Villa, Dalhousie, H.P. [Himchal Pradesh], India.

5268. Kim, Gai W. 1981. Re: Introducing tofu to Sri Lanka. Letter to William Shurtleff at Soyfoods Center, Dec. 18–in reply to inquiry of Nov. 18. 1 p. Typed, with signature.
• ***Summary:*** "I sincerely hope that you and your wife will come to Sri Lanka in the near future to teach me how to make aburaage [deep-fried tofu pouches], which I simply fail to make although I tried all the instructions written in your *The Book of Tofu.*

"As for my project, at present, Tofu, which I named Boncheese here because 'bean' in Sinhalese is Bonchi and the method of making tofu is just like making cheese. Soy Bread are daily sold at the Cornel's, the only Super Market in Colombo. I managed to make Miso out of Tempeh within a week's time and you have to taste it to appreciate its beauty. The biggest breakthrough is to supply about 50 pounds of *soyamesh* [soybeans ground in water; soybase or soy puree] every morning to the Colombo General Hospitals and the Welikada Prison to be used in lieu of coconut milk for the daily curry cooked in their kitchen. The plant I helped to set up is using about 1.5 to 2 tons of de-hulled [soya] beans a month at the moment.

"I am enclosing a report from the Super Intendent [superintendent] of the Welikade Prison in Colombo for your perusal. If you are really interested in my project in can send you some correspondence and newspaper cutouts [clippings] upon request.

"I just finished writing a letter to BMI regarding an order of BMI 100 for the expansion of the project."

A handwritten note says that Kim is contacting the Navy and Air Force canteens for her soy project.

Attached are two letters which are cited separately: (1) From H.G. Dharmadasa, Superintendent of Welikada / Welikade Prison (Oct. 1981). (2) From Dr. W.S. Weerasooria, Secretary, Ministry of Plan Implementation (16. Oct. 1981). Address: c/o UNDP in Sri Lanka, P.O. Box 1505, Colombo, Sri Lanka.

5269. Hughes Markets. 1981. Christmas (Ad). *Los Angeles Times.* Dec. 21. p. I19.
• ***Summary:*** The section titled "Foods of the Orient" includes: Kikkoman soy sauce, gallon can–$4.35. Fresh age, Hinode 1.8 oz.–83¢. Kikkoman 10 oz. Tempura Sauce–95¢. JFC soy bean flour 7 oz. Kinako–69¢. Hime black [soy] beans 6.35 oz., Kuromame amani–99¢. Wheat cake [sic, dried frozen tofu] 3.5 oz. Misuzu Koya Dofu–$1.19.

Also includes: Umeya frozen Mochi. Kokuho rice. Hime rolled kelp–Honporo Maki. Hime dried seaweed–Sushinori [Sushi nori]. Kikkoman sweet cooking sake–Aji Mirin. Ozeki sake. Bamboo tips. Dried gourd strip–Kezuka Kampyo [Kanpyo]. Rice vinegar–Mitsukan Su. Sliced pickled ginger–Miyako Kizami Shoga. Dried mushrooms–Miyako Shiitake. M.S.G.–Asahi Aji.

Note: Hughes now has 21 stores in the greater Los Angeles area–all open 24 hours a day. "We welcome food stamp shoppers."

5270. *SoyaScan Notes.* 1981. Chronology of soybeans, soyfoods and natural foods in the United States 1981 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** Jan. *Soyfoods* magazine issue No. 4 published. Silver cover. 10,000 copies published. Steve Fiering loans SANA money for mailing it and agrees to make a loan for a test mailing.

Jan. Union activity begins at New England Soy Dairy.

Jan. Boxed tofu (1 lb. vacuum packed in a box with a window) first made by Zakhi Soyfoods in Fort Wayne, Indiana. This important innovation of packaging tofu in a box was later employed by New England Soy Dairy (1982), Quong Hop & Co. (1983), Swan Gardens (1983), and White Wave (1985).

Jan. Hain Food Co. starts nationwide color ads for Natural Onion and Jalapeno (Soy) Bean Dips.

Jan. Travis Burgeson of Pacific Tempeh near San Francisco, CA, introduces the world's first commercial tempeh burger.

Jan. Paul's Tofu & Tempeh, the first European tempeh company in Europe outside of the Netherlands, opens in England.

Jan 20. Ronald Reagan inaugurated as president of the United States. His Secretary of Agriculture is John R. Block. The regulatory climate in Washington begins to shift toward less federal regulation and more encouragement for industries to regulate themselves. The Republican administration favors free-market policies with less government regulation and involvement.

Jan. 23. Legume, run by Gary and Chandri Barat, is incorporated in New York, then that month moves to Verona, New Jersey.

Feb. 2. Island Spring in Washington becomes America's first unionized tofu plant.

Feb. San-Jirushi International starts its first major American ad campaign using the slogan "San-J is the real tamari." The full-color, full-page national ads aim to clarify the confusion between tamari and shoyu created by the macrobiotic movement.

Feb. Soyfoods Unlimited tempeh plant starts operation in San Francisco area. It is the most modern U.S. tempeh plant, although output is small.

Feb. Vitasoy soymilk and Morinaga tofu start to be imported and sold in the USA from Hong Kong and Japan respectively, immediately after the FDA lifts its ban on aseptic Tetra Pak type cartons. Morinaga tofu was sold by Beech Nut California Corporation, a joint venture with Beech Nuts Food Corp., established in 1977 in San Jose, California.

© Copyright Soyinfo Center 2013

Feb. "Soyfoods Catching On" by Judith Brown published in *USDA National Food Review.* About tofu and tempeh.

Feb. Many tempeh plants switch to using GEM cultures tempeh starter.

March 1. Svadesha Pflanzen-Feinkost, West Germany's first commercial tofu company, starts production. Founded by Swami Anand Svadesha (Rudiger Urban) in Fuerth im Wald.

March. Institute of Food Technologists meeting at New England Soy Dairy. Tour, dinner, and speeches.

March. Richard Leviton on National Public Radio's "All Things Considered" talks for 10 minutes about soyfoods to 2 million people.

March. *The Book of Miso,* by Shurtleff and Aoyagi published by Ballantine Books in a mass market paperback edition.

April. USDA decides to establish tofu standards, then announce them in the Federal Register, but this plan is dropped in September, amid controversy over changes in the School Lunch Program.

April. Dr. Cook at Kansas State University publishes a paper on the possible inhibitory effects of soy proteins on nonheme iron absorption in humans. USDA becomes concerned.

April. *Tofu at Center Stage,* by Gary Landgrebe published by Fresh Press. First tofu cookbook containing many recipes calling for use of meat.

April. Bean Machines introduces new sanitary disintegrators/ grinders for tofu and soymilk production.

April. "The Miso-Master's Apprentice," by John Belleme published in *East West Journal.*

May. "The Amazing Tofumobile," by Janice Fillip, about Wildwood Natural Foods, published in *East West Journal.* Revival of interest in small tofu shops in areas where there is a high density of interest and high food consciousness, and rediscovery of soyfoods craftsmanship.

May. *Tofu Boken* by Ted Nordquist and Tim Ohlund published by Aros Sojaprodukter in Sweden. Europe's first book on tofu.

June. *Tofu Fever in New York,* by Megan B. Murray notes that David Mintz is making 275 gallons of tofu ice cream a week. This is the earliest known publication on his work with soy ice cream. He had been making it for 3-4 months.

June. "Surprise, It's Soy" by Barbara Bassett published in *Bestways.*

June. FIND/SVP survey of the U.S. tofu industry and tofu consumer survey published. 33% of respondents in major metropolitan areas were aware of tofu and 10% had purchased it. Predicts market will grow 32% a year for the next 6 years... an over-optimistic prediction.

June 29. "Trader Vic Bergeron Offers Timely Tips for Tofu" by Rose Dosti published in *Los Angeles Times.*

July. *Soyfoods* magazine is incorporated by Richard Leviton, and offers stock.

July 8-12. Fourth Annual Soycrafters Convention at Colorado State University. 240 people from 18 nations attend, 210 pay. First National Tofu Cheesecake Bakeoff and Soyfoods Equipment/Supplies Expo in the western world.

July. Mary Tolan selected Registered Young Dietitian of the Year by the American Dietetic Association. Invited to present speech on "Tofu–Food of the Future" at ADA convention in Philadelphia.

July. *Tofu Cookbook,* by Sally Sheppard published by Jack's Beanstalk.

July. "Soybean Ice Creams: Getting your Licks In" by Richard Leviton published in *Vegetarian Times.*

July. Soyfoods Center is working to build the world's largest library of documents on soyfoods, each with a bibliographic card, filed by author. Also building a large library of color slides on soyfoods.

Aug. "Tofu, Tofu Everywhere," by Karen Dukess published in *The New York Times'* Business section.

Aug. "Soyfoods: The Future Is Here but Are You Ready" by Alan Richman published by *Health Foods Business* as a cover story.

Aug. 12. "Soy Foods: Versatile, Cheap and on the Rise" by Lorna Sass, and "A Source of Quality Protein" by Jane Brody published in *The New York Times,* and syndicated nationwide.

Aug. "My Favorite Tempeh Recipes" by Aveline Kushi published in *East West Journal.*

Aug. *Delights of Tofu,* by Fox, O'Connor and Timmins published by New England Soy Dairy.

Aug. *Das Tofu Book,* by Shurtleff and Aoyagi published in Germany by Ahorn Verlag.

Sept. "Soyfoods Report" published by *Natural Food Merchandiser.*

Sept. *Home Soyfood Equipment,* by Ray Wolf published by Rodale Press.

Sept. 13. At SANA Board of Directors Meeting held near San Francisco, the Soycrafters Association of North America has its name changed to Soyfoods Association of North America to broaden scope and support base.

Sept. SANA and The Soyfoods Center do a major press release on soyfoods production and consumption in America to 250 key media. Many magazines publish this report and conduct radio interviews.

Sept. Okita Enterprises takes 22 tofu and bean sprout makers to Japan for a 10-day tour. SANA executives Richard Leviton and Luke Lukoskie make important contacts with Japanese tofu trade officials and publications.

Sept. USDA publishes tofu regulations in the Federal Register, then withdraws entire school lunch revisions and revokes permission given to the Santa Cruz (Calif.) school system to use tofu in school lunches.

Sept. Dr. Hirayama of the National Cancer Center in

© Copyright Soyinfo Center 2013

Japan announces that miso soup is effective in combating stomach cancer and stroke.

Oct. "Things Go Better With Soyburgers: The New All-American Food" by Richard Leviton published in *East West Journal* as a cover story.

Oct. *Cook with Tofu,* by Christina Clarke published by Avon Books in mass market edition.

Oct. John Belleme's American Miso Corp. begins miso production in North Carolina.

Oct. Workers at Hinode Tofu Co. in Los Angeles go on strike for 2 weeks.

Oct. *Nasoya Tofu Cookbook,* published by Nasoya Foods.

Oct. *O Livro da Soja,* by Jane Cadwell published in Brazil by Editora Ground. One of the country's first books on soyfoods.

Nov. 10. Erewhon, America's natural foods pioneer, files for Chapter 11 reorganization under the U.S. bankruptcy laws. On 2 April 1982 Erewhon is sold to Nature Food Centers.

Nov. Autumn Press, publisher of *The Book of Tofu,* original edition, files for Chapter 11 bankruptcy.

Nov. New England Soy Dairy announces 28-Day Self Life Advantage Pasteurized Tofu in a 2/3 page ad in *Natural Foods Merchandiser.*

Nov. Soyfoods Unlimited advertises tempeh burgers in *Natural Foods Merchandiser.*

Nov. The Ministry of Agriculture and Forestry in Japan announces a Japanese Agricultural Standard (JAS) for soymilk. The soymilk boom in Japan starts.

Dec. *Juel Andersen's Tofu Kitchen* published by Bantam Books in mass- market paperback.

Dec. "World's Best Tofu Cheesecake" by Richard Leviton published in *Vegetarian Times.*

Dec. Food Protein Council, a trade association, changes its name to Soy Protein Council, since all of its members make only soy protein products.

Dec. *La Soya y Sus Derivados* (*Tofu, Tempeh, Miso*), by Shurtleff and Aoyagi published by Quadernos de Natura in Mexico.

Dec. *The Tofu-Miso High Efficiency Diet,* by Yoshiaki Omura M.D. published by Arco Publ.

Dec. *Cooking with Tofu.* by Mary Anna DuSablon published by Garden Way.

Dec. There are now 158 tofu manufacturers and 41 tempeh manufactures in the USA.

Dec. The Farm Vegetarian Cookbook published as *Soja Total* in German.

* Global economic activity is shifting from the Atlantic to the Pacific. In 1981 Asia passed Europe to become the largest market for U.S. agricultural products. In fiscal 1981 Japan bought $6,700 million worth of U.S. farm products.

* Soybean breeders, which have formerly focused their research efforts on increasing quantity (yield) of soybeans, now start to give more attention to quality (composition). Increasing total protein, methionine, and oil, and decreasing linolenic acid and antinutritional factors are priorities.

* U.S. soybean exports reach their peak this year of 25 million metric tons (tonnes). By 1987 they have fallen to 18 million tonnes, a 28% drop, due largely to competition from Brazil and Argentina, and to foreign subsidies. The market changes from a seller's to a buyer's market.

5271. **Product Name:** Tofu.

5272. Andersen, Juel. 1981. Juel Andersen's tofu kitchen. New York, NY: Bantam Books. x + 211 p. Illust. by Juel Andersen. Index. Dec. 18 cm.
• ***Summary:*** Contents: An introduction. Tofu is... Making tofu and soymilk. Recipes–Salad dressings, dips, appetizers, and sauces. Salads and sandwiches. The tofu burger. Soups. Tofu for dinner. Tofu for breakfast and brunch. Baking with tofu. Desserts: Pies, puddings, and pastries. Beverages. Afterword. Appendix 1: Protein and protein complementarity, including a table showing the RDA for grams of protein for children, males, females, and pregnant and lactating women of different ages, weights and heights. Appendix 2: Substitutions and equivalents. Appendix 3: Nutrients in selected foods (mostly protein sources). Address: California.

5273. **Product Name:** Tofu.
Manufacturer's Name: Bob & Toni's Tofu Works.
Manufacturer's Address: 746 N.W. 29th St., Miami, FL 33127. Phone: 305-635-6052.
Date of Introduction: 1981. December.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Owner: Bob & Toni Heartsong.

5274. Brown, Judy. 1981. Soyfoods: Catching on in the U.S. diet. *National Food Review.* Winter. p. 10-11. [6 ref]
• ***Summary:*** Begins with a brief history of soyfoods and soy modern soy protein ingredient in the United States. Contains a long section on tofu and a shorter section on tempeh and miso.

"Soybeans are finding a new place in the U.S. food system."

"Another indication of the growing popularity of soy protein as food can be found in industry figures which show that in 1971 food use of soybeans was estimated to be around 10 million bushels annually or less than 1 percent of the

© Copyright Soyinfo Center 2013

crop. Today, almost 50 million bushels or nearly 2 percent of the total soybean production goes to human consumption each year (excluding oil)." Address: USDA Economics, Statistics, and Cooperatives Service. Phone: (202) 447-6364.

5275. **Product Name:** Tofu.
Manufacturer's Name: Castle Trading, Ltd.
Manufacturer's Address: 93 Belmore Rd., Randwick, NSW, Australia.
Date of Introduction: 1981. December.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Dec. 8.

5276. **Product Name:** Tofu.
Manufacturer's Name: Clearway Soyfoods and Deli Products.
Manufacturer's Address: 1037 17th Ave., Santa Cruz, CA 95062. Phone: 408-476-6390.
Date of Introduction: 1981. December.
New Product–Documentation: Shurtleff & Aoyagi. 1982. Soyfoods Industry & Market. p. 1. Owner: Buddy Hamel. Talk with Paul Duchesne. 1989. Aug. 25. This is the best tofu he ever tasted.

5277. **Product Name:** Tofu.
Manufacturer's Name: CNK Corp.
Manufacturer's Address: 165 Main St., Paterson, NJ 07505. Phone: 201-742-3830.
Date of Introduction: 1981. December.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Owner: L.H. Cho.

5278. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: De Morgenstond.
Manufacturer's Address: Kreilen 3, 9243 WC, Bakkeveen, Netherlands. Phone: 051-696-51.
Date of Introduction: 1981. December.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Owner: Wout Gerritsma. Letter from Sjon Welters. 1982. April 16. De Morgenstond is a small tofu shop at Keilen 3 in Bakkeveen. Shurtleff & Aoyagi. 1982. Soyfoods Industry: Directory & Databook. p. 3. Wout Gerritsma is contact person.

5279. Hoang, Van Chi. 1981. How to make Tuong (Vietnamese unfiltered, ground soy sauce) (Interview). Conducted by William Shurtleff of Soyfoods Center, Dec. 1 p. transcript.
• ***Summary:*** 1. Prepare soybeans: Dehull 10 lb soybeans with a mill and remove hulls with a seed cleaner. Roast the cotyledons at 450ºF (232ºC) for 15 minutes in any type of roaster. Pressure cook the roasted cotyledons with adequate water at 5 lb pressure for 30 minutes. Transfer the contents of the cooker (beans and water) into a plastic 40 liter (10.6 gallon) container, place in a warm room (80ºF or 26.5ºC) for 10 days; this enables the soybeans to undergo auto-hydrolysis. Each day skim off any surface foam.

2. Make glutinous rice koji: On the 3rd day of the soybean fermentation, soak 10 lb of glutinous rice overnight. Drain and steam at atmospheric pressure for 30 minutes, then cool to body temperature. Mix koji starter (*Aspergillus oryzae* mold spores propagated on glutinous rice) with water, sprinkle over rice, then drain on a perforated tray. Transfer inoculated rice into shallow wooden trays (each 10 by 15 by 4 inches deep) and place them in a warm koji room (80ºF or 26.5ºC) for 6 days. Do not stir during this time. Finally the mold-fermented rice koji (*moc*) will be floating in a glucose syrup. Mix the koji with 7.5 lb salt, grind the mixture in a mill, then transfer ground mixture to a plastic vat and leave for 2 days to stop the fermentation.

3. Combine and ferment: Place the fermented soybeans and their water in a Hobart VCM (Vertical Cutter Mixer) and blend until smooth. Mix in the ground salted koji and allow the mixture to stand at room temperature for 3 days. Bottle and cap without heating. Use as a dipping sauce for fresh or fried tofu, or as a pickling medium. In Vietnam, Tuong is also used as a dipping sauce for roast beef, as a cooking sauce for fish, or as a pickling sauce for pork.

Hoang adds: There are less than 200,000 Vietnamese in the USA, and about the same number in France. Traditionally, soy sauce was made and used mostly in North Vietnam. But for the last 30 years (i.e., since about 1951) there has been no soy sauce in North Vietnam due to two factors: (1) The shortage of soybeans and rice; (2) The fact that those who formerly made it were classified as "landlords" by the Communist regime. Today in Vietnam people try to make it using peanut- or cottonseed presscake instead of soybeans. Address: Bowie, Maryland. Phone: (415) 253-1065.

5280. **Product Name:** Tofu.
Manufacturer's Name: Ithaca Soy.
Manufacturer's Address: 403 N. Plain St., Ithaca, NY 14850. Phone: 607-272-4903.
Date of Introduction: 1981. December.
New Product–Documentation: Form filled out by Robert Shapiro, the person in charge. Undated. They make only tofu (for now). Use about 300 lb/week of soybeans to make 750-800 lb/week of medium-firm tofu. The company started in Dec. 1981.

Talk with Shiva Khalsa. 1990. May 16. He made nigari tofu at Ithaca Soy starting in about 1982-83. Rob Shapiro was the owner. At that time there was great concern about toxins in the natural nigari from polluted sea water. So they switched from natural nigari to calcium chloride as their coagulant. He also helped to develop Tofu-Kan. He now represents Mori-Nu tofu in the northeastern USA.

© Copyright Soyinfo Center 2013

Letter from David Scovronick. 1994. Aug. 14. David opened his company 14 years ago, inspired by reading *The Book of Tofu.* He built the shop himself and did virtually all of the maintenance and repair work that was required. The company eventually produced over 2,000 lb/day of tofu and tofu products. "And all of it was made by hand, using time-honored and traditional techniques that were so beautifully encouraged by your writing and by Akiko's illustrations."

5281. **Product Name:** [Tofu].
Manufacturer's Name: Jaime Valencia Tofu.
Manufacturer's Address: Ave. Ninos Heroes 1633-307, Guadalajara, JAL, Mexico.
Date of Introduction: 1981. December.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Owner: Jaime Valencia.

5282. Java Murni. 1981. Reserve now for Java Murni's Vegetarian X-mas dinner. 4509 Adams St., Carlsbad, California.
• ***Summary:*** The dinner will we held on Dec. 26 and 27 from 5-7 or 7:15 to 10 p.m. The menu is given: Soup: Soto (mild) or Laksa (spicy). Appetizers: Gulung rebung (bamboo shoots wrapped in crispy tofu). Tofu kembang (tofu flowers). Salad: Gado-gado (with peanut dressing). Urap (with coconut dressing).

Entree: Tempeh treat (tempeh braised in Indonesian soy and safflower oil). Tofu-saus-richa (tofu in sweet-and-sour spicy sauce). Sambal goreng boontjis (green beans in savoury sauce). Sayur lodeh (vegetables in coconut milk). Chah tempeh (mixed tempeh & vegetables). Keringan tempeh (sweet-piquant tempeh). Satay tempeh (barbecue tempeh). Beehun goreng (rice noodles). Soyex malakka (soy cubes in malakka sauce). Nasi kuning (yellow rice).

Dessert: Onde-onde (mung beans wrapped in glutinous rice and sesame). Pisang goreng (coated fried banana).

Dinner includes all the above: Per person $12.95.

A map shows the way to the restaurant. Illustrations: A bamboo border. A large Javanese shadow puppet on the left border, looking right. Address: Carlsbad, California. Phone: 434-4131.

5283. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: La Maison du Tofu Carmel.
Manufacturer's Address: CP 567, Bonaventure, QUE, Canada G0C 1E0. Phone: 418-752-5869.
Date of Introduction: 1981. December.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Owner: Dennis Connolly.

5284. Leviton, Richard. 1981. The world's best tofu cheesecake. *Vegetarian Times* No. 52. Dec. p. 74-77.
• ***Summary:*** The subtitle reads: "Containing no animal fat and far fewer calories than its dairy counterpart, tofu cheesecake is soo-o good that you'll probably start dancing at the dinner table." The world's first Tofu Cheesecake Bake-Off took place at the 4th annual Soycrafters Association Conference, held July 8-12 in Fort Collins, Colorado. Ten tofu cheesecakes were submitted for the 16 judges to sample. The first-prize winner was Sally Sheppard, an elementary school teacher from Salt Lake City, Utah. Recipes for four tofu cheesecakes are given: Carob almond-swirl tofu cheesecake, by Donna Davis. Darrilyn's Best Tofu Cheesecake, by Darrilyn Jackson. Country Life Tofu Cheesecake, by Josette Wahl. Tofu Cheesecake with Fruit Topping (not entered in the contest but a favorite in New England).

Photos show: Robin Clute slicing a tofu cheesecake. The four winners holding their cheesecakes: Amethyst Montfort, Sally Sheppard, Linda Gilbert, and Darrilyn Jackson. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

5285. **Product Name:** Kori Tofu (Dried-Frozen Tofu).
Manufacturer's Name: Marusan, Inc. (Importer). Made in Japan.
Manufacturer's Address: 1 Branca Rd., East Rutherford, NJ 07073.
Date of Introduction: 1981. December.
New Product–Documentation: Ad in Vegetarian Times. 1981. Dec. Issue #53. p. 48. A pie chart compares the nutritional composition of kori tofu with regular tofu. A photo shows the product package and the product served. Leaflet. 1982. "Kori-Tofu." Contains nutritional information and 14 recipes.

5286. **Product Name:** Tofu.
Manufacturer's Name: New Ark Foods.
Manufacturer's Address: Route 1, Box 252B, Stanley, VA 22851. Phone: 703-778-3890.
Date of Introduction: 1981. December.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Owner: Melinda Siska.

5287. **Product Name:** Tofu.
Manufacturer's Name: New World Soyfoods Co.
Manufacturer's Address: 2028 Katerri Dr., Vista, CA 92083. Phone: 714-727-4903.
Date of Introduction: 1981. December.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Owner: Alex Press.

5288. **Product Name:** Tofu.

© Copyright Soyinfo Center 2013

Manufacturer's Name: North Country Soyfoods.
Manufacturer's Address: Box 572, Jefferson St., Bethlehem, NH 03574. Phone: 603-869-2677.
Date of Introduction: 1981. December.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Owner: Jay & Pat Gibbons.

5289. **Product Name:** Tofu.
Manufacturer's Name: Palomar Mountain Soyfoods.
Manufacturer's Address: 31405 N. Highway 395, Escondido, CA 92025. Phone: 714-749-2476.
Date of Introduction: 1981. December.
Wt/Vol., Packaging, Price: In a cottage cheese container with a snap-on lid.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Alex Press. Talk with Alex Press. 1990. Feb. 28. He began by taking the Soycrafters Apprenticeship Program at Island Spring for 3 weeks in Sept. 1980. He started a tofu company in Escondido and began selling this tofu in Dec. 1981. In 1984 he started to make and sell mochi with Muramoto sensei. In 1984 he moved to a new location in Escondido, reopening there in about March 1984. His business closed in Aug. 1986. He started to work for White Wave in April 1989. He is now purchasing agent.

5290. **Product Name:** Tofu.
Manufacturer's Name: Protein City.
Manufacturer's Address: 22 Lombard St., North Adelaide, SA 5006, Australia. Phone: 082-673-635.
Date of Introduction: 1981. December.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Owner: Terrell & Laryssa Neuage. They are located in the state of South Australia.

Letter from Terrell and Laryssa (28 Lombard St.). 1982. Aug. 21. They plan to visit the USA in Sept. and Oct. to visit as many tofu producers, nationwide, as possible. "The last year has been a very frustrating year for us. No one that we've contacted seems to know anything about soyabeans, except for yield and acreage. I have called and written departments of agriculture and schools, etc.–no one has responded to anything beyond acreage and yield. I believe that the Chinese tofu makers here use beans from China, as that is what they have offered us... We look forward to seeing you."

5291. **Product Name:** Tofu.
Manufacturer's Name: Purist Foods.
Manufacturer's Address: 4100-A Ed Bluestein St., 105, Austin, TX 78721. Phone: 512-928-0191.
Date of Introduction: 1981. December.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Owner: Reed Murray. Talk with Allen Maurer, consultant. 1988. Oct. 12. Purist foods is still in business, run by Reed Murray. Address is now 6014 Techni-Center Dr., Suite 105, Austin, TX 78721. Phone: 512-928-0191. They also make Wheat Roast and Texas-Style Vegetarian Bar-B-Q from Gluten (both with only soy sauce and soy oil), plus White Mountain Premium Bulgarian Yogurt with Live Acidophilus. Purist Foods started as a yogurt company in 1979. They added tofu in 1981, when they bought out a small tofu company in Austin named "Soyfoods Texas."

5292. **Product Name:** Soynog (Soymilk-based Eggless Eggnog. Renamed Lite Nog in 1982 and Tofu Nog in 1985).
Manufacturer's Name: Redwood Valley Soyfoods Unlimited.
Manufacturer's Address: P.O. Box 371, Redwood Valley, CA 94570.
Date of Introduction: 1981. December.
Ingredients: Brightsong soymilk and tofu, honey, maple syrup, spices, lecithin.
Wt/Vol., Packaging, Price: Pint bottles.
How Stored: Refrigerated.
New Product–Documentation: Spot in Whole Foods. 1983. Jan. p. 39. "Winter dairy-free treats." Brightsong Light Foods has introduced two new special products for the winter season. SoyNog is an egg and dairy-free blend of Brightsong Soymilk and Tofu, honey, maple syrup from Shady Maple Farms, vanilla, spices and lecithin. SoyNog is a cholesterol-free alternative to egg nog, packed in pint bottles.

Spot in Soyfoods. 1983. Winter. p. 48. "For a Soyful Christmas... Soynog." Shurtleff & Aoyagi. 1984. Soymilk Industry & Market. p. 60.

Note: This is the earliest known commercial soy-based eggless eggnog.

5293. **Product Name:** Tofu, Tofu Burgers, Okara Cakes.
Manufacturer's Name: Regular Tofu Company Ltd.
Manufacturer's Address: 75 Chandos St., Leicester, LE2 1BU, England. Phone: (0533) 549839.
Date of Introduction: 1981. December.
New Product–Documentation: Form filled out by John Holt. ca. 1982. The company opened in Dec. 1981. He now uses 50-100 lb/day of dry soybeans to make regular tofu (vacuum packed), tofu burgers, and okara cakes. Letter from John Holt. ca. May 1982. "Having used your book to learn how to make tofu, we now have a small business here making about 700 lb/week of tofu and about 2,500 tofu burgers per week. We give our okara to a pig farmer... We sell the nigari tofu vacuum packaged." Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: John Holt.

5294. **Product Name:** Tofu.
Manufacturer's Name: Sequoia Soy.
Manufacturer's Address: P.O. Box 685, Redway, CA 95560.
Date of Introduction: 1981. December.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Owner: Lewis Headrick. Lewis learned to make tofu at The Farm in Tennessee.

5295. Shurtleff, William; Aoyagi, Akiko. 1981. La soya y sus derivados: Tofu, miso, tempeh [The soybean and its products: Tofu, miso, tempeh]. *Quadernos de Natura* (*Editorial Posada, Mexico*) No. 20. 87 p. Dec. [3 ref. Spa]
• ***Summary:*** Contents: Introduction: The miracle of soya, by Ma. Teresa Piazza. 1. Soya: Source of protein. Ten reasons that soy will be the protein source of the future. 2. Tofu: Introduction A family of distinctive foods. A storehouse of high-quality protein. Cost of protein from different sources. Low in saturated fats: free of cholesterol; an ideal diet food. Natural backbone of the meatless diet. Buying and storing tofu. Making tofu at home and in communities. Soybeans, tofu, and the world food crisis. Table of different tofu varieties. Tofu shops in Japan. Our favorite tofu recipes.

3. Miso: Introduction. Delightfully varied; highly versatile. A nutritional treasure trove. The varieties of miso (including a table). The preparation of miso. Traditional natural miso and quick modern miso. A brief history of miso. Buying, storing, and using miso. Miso in Japan. Traditional Japanese miso shops and modern factories. Making miso at home. Our favorite miso recipes (contains 16 recipes).

4. Tempeh: Introduction. Rich in protein and vitamin B-12. Tempeh comes west (a brief history). How tempeh is made. The miracle of fermentation. Buying and storing tempeh. Tempeh for Latin America. Our favorite tempeh recipes (contains 8 recipes).

Note: This book is largely a Spanish-language translation of three English-language brochures written by the authors in the late 1970s: What is tofu? What is miso? What is tempeh? Chapter 1 is summarized from the first chapter of *The Book of Tempeh.* Address: Soyfoods Center, P.O. Box 234, Lafayette, California.

5296. **Product Name:** Tempeh (Soy & Okara), Tofu, Soysage, Egg-less Salad, Flavored Soymilk (Carob & Honey, or Maple).
Manufacturer's Name: Soy Beings.
Manufacturer's Address: 13-C Railroad Square, Waterville, ME 04901. Phone: 207-872-8790.
Date of Introduction: 1981. December.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Owner: Richard Tory. Shurtleff & Aoyagi. 1982. Soyfoods Industry: Directory & Databook. p. 1. Form filled out by Richard Tory. ca. 1982. This is a 5-person collective. "We have a small, light catering business and wholesale sandwich business selling locally to natural food stores, etc. Potato salad, tofu dips, tempeh sandwiches, whole wheat tofu pizza, and natural pastries." The tofu contains nigari and organically grown soybeans. Soysage is made with nutritional yeast, safflower oil, honey and spices in an okara base. Egg-less salad made with tofu and eggless mayonnaise.

5297. Soyfoods Center; Soycrafters Assn. of North America. 1981. Per capita use of soyfoods grows to nearly 9 lbs. in U.S. *Vegetarian Times* No. 52. Dec. p. 6.
• ***Summary:*** Based on a Sept. 1981 news release copyrighted by the Soyfoods Center and the Soycrafters Assoc. of North America, this summary of a market study gives for each major soyfood product the number of manufacturers in the USA, Canada, and worldwide. The tons/year of raw soybeans used. And (in the USA only) the tons of food produced, wholesale value, retail value, and number of employees.

In the USA, the number of manufacturers, tons of product produced, and retail value in million dollars are as follows for low technology, traditional: Tofu and tofu products (154, 22,700, $50.4), tempeh (32, 494, $1.78), soymilk and soymilk products (14, 148,000, $118.0), soy sauce, shoyu & tamari (15, 54,837, $203.0), soynuts and soynut butter (12, 2,750, $4.6), miso (10, 2,000, $4.8), soy sprouts (5, 360, $0.25), etc. Subtotals for low-tech (284 manufacturers, 231,305 tons produced, $392.25 retail value).

For high-technology, modern: Soy flour & grits, defatted (12, 400,000, $190.4), textured, extruded soy flour (TSP/TVP) (2, 200,000, $179.2), soy protein concentrates (3, 45,000, $56.7), soy protein isolates (3, 45,000, $126.0), meat analogs (secondary products) (6, 20,000, $55,000). Subtotals for high-tech (26 manufacturers, 710,000 tons produced, $615.6 retail value). Total low and high tech: 310 manufacturers, 941,305 tons produced, and $1,007.85 million dollars.

The news release reads: "Americans are consuming an average of nearly nine pounds of foods made from soybeans per year, according to the Soycrafters Association of North America and the Soyfoods Center. The largest growth is occurring in the consumption of tofu (or beancurd) and tempeh (fermented patties).

"Traditional soyfoods, which include tofu, tempeh, soymilk, miso, soy sprouts, soynuts and soy sauce, account for $390.7 million in annual retail sales. High technology, modern soy protein foods, which include soy flour and grits, soy protein isolates and concentrates, extruded soy flour and meat analogs, account for $615.6 million in annual sales. This amounts to nearly $1 billion worth of soy products consumed by Americans per year.

"Per capita consumption of the low technology foods is now at 2.13 lbs. per year, while consumption of the high

© Copyright Soyinfo Center 2013

technology foods, which are generally used as ingredients in other products, is now at 6.45 lbs. These figures represent a steady growth in consumption of the large soybean crop produced annually; the greatest part of the crop goes to feed livestock. In 1980, for example, only 2.1% of the 60 million ton crop was used in America for food, which is believed to be the highest percentage ever; 57% of that crop, however, was exported.

"The director of the Soycrafters Association, Richard Leviton, and William Shurtleff of the Soyfoods Center have forecast the following trends for soyfoods use in the United States over the next five years:

"A steady growth in the use of tofu and tempeh by non-vegetarians.

"Growth in the use of convenient, prepared foods made from soyfoods.

"The Big Tempeh Boom" an upsurge in the use of fermented soy patties.

"Large corporations will start marketing secondary soyfoods (such as dips and dressings) via national advertising.

Also published in *New Age* (Jan. 1982, p. 17) under the title "Tofu Takes Over."

5298. **Product Name:** Tofu.
Manufacturer's Name: Squee-za-Bean.
Manufacturer's Address: 302 Market St., Santa Cruz, CA 95060. Phone: 408-427-1231.
Date of Introduction: 1981. December.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Owner: Buddy Hamel.

5299. **Product Name:** Tofu Creme Pies (Dairyless Tofu Cheesecakes) [Piña-Colada, or Cocoa-Carob].
Manufacturer's Name: Tofu Shop (The).
Manufacturer's Address: 768 18th St., Arcata, CA 95521. Phone: 707-822-7409.
Date of Introduction: 1981. December.
Ingredients: Pina-Colada: Pineapple, coconut, tofu, honey, corn starch, vanilla, salt, whole wheat crust. Cocoa-Carob: Tofu, honey, cocoa, carob, vanilla, agar, whole wheat crust.
Wt/Vol., Packaging, Price: 10 oz.
How Stored: Refrigerate at 34-39ºF.
New Product–Documentation: Leaflet 1980, undated. "New deli foods from The Tofu Shop" (768 18th St., Arcata, California 95521). "Your local soyfoods producer." In the upper left corner is a dragon in a round circle. In the lower right is a little man whose body is a paper deli takeout container; he has two arms and two legs, and is wearing a top hat.

Label for Pina-Colada (Delicious Dessert). Received 1988. 2.5 inches diameter. Self adhesive. Green on yellow. "Fresh 'n Natural. Lactose-free and cholesterol-free." The ingredients now read: Fresh organic (Cal. Health Code 26569.11) tofu, pineapple, coconut, honey, safflower oil, corn starch, real vanilla, a touch of sea salt. Crust: Whole wheat pastry flour, soybean margarine, water. The weight is now 6 oz (170 gm).

• ***Summary:*** There are 1,410 tofu plants in Taiwan. Address: 1-3. Dep. of Food Science, The National Chung Hsing Univ., Taichung, Taiwan; 4. American Soybean Assoc., Taipei, Taiwan.

5301. **Product Name:** Tofu.
Manufacturer's Name: Vegetable Protein Co.
Manufacturer's Address: 53 Thomas St., Unley 5061, Australia.
Date of Introduction: 1981. December.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Owner: David Hammond.

5302. Wolf, Walter J. 1981. Foreign travel report. Peoria, Illinois. 4 p. Dec. 18. Typed, with signature.
• ***Summary:*** "Country visited: Japan, Oct. 10-21, 1981. Purpose of trip: (a) Participate in the U.S./Japan Cooperative Program in Natural Resources (UJNR), Protein Resources Panel Meeting; (b) participate in UJNR panel study tour; (c) visit research institutes and industrial laboratories working on soybean proteins; and (d) participate in symposium on soy protein foods. Summary: The UJNR meeting in Tsukuba included 10 presentations by seven Japanese research workers from six different research institutes and three U.S. scientists from three USDA regional research centers. Topics discussed included... (f) single cell protein production from soybean cooking waste waters; (g) soybean storage; (h) food uses of soy protein; and (i) nutritional evaluation of soy proteins. The study tour included a visit to a miso and soy milk factory which was impressive and confirms earlier reports that soy milk has become very popular in Japan in the past 5 years. Visits to industrial laboratories revealed that soy proteins are now used in a large variety of foods. Flavor is one of the last problems holding back development of soy protein-based foods."

The UJNR program, initiated in 1964, plays an important role in implementing the policy of scientific cooperation between the United States and Japan. The protein panel was organized in 1968, and there are now 17 different panels in UJNR.

Dr. Ebine reported that about 790,000 metric tons (29 million bushels) of soybeans are used in traditional Japanese foods–miso, natto, tofu. Organizations visited included Okazaki Marusan Co. Ltd (makes miso, soy milk, and

Ingredients: Incl. sauteed tofu, brown rice, pineapple, tomato sauce, herbs, spice, sweet and sour flavor.
New Product–Documentation: Leaflet. Talk with Robert Atallah, president of Cedarlane. 1988. Feb. 5. Tofu Luau and Marinara, which he made, were discontinued because they were not feasible. Retailing for $1.99, they did not sell. Yet everybody who tasted them liked them.

Vegetarian Times. 1990. Feb. p. 69. Shows a color photo of the Soypreme Tofu Luau box in an article on vegetarian frozen dinner entrees.

Ad in Whole Foods. 1991. July. p. 76. "Soypreme. Substituting without sacrificing." This product is now part of the "Tofu Dinners" line, consisting of Tofu Marinara, Tofu Luau, and Tofu Stroganoff.

5311. **Product Name:** Tofu Quiche in a Cup [Spinach, Mushroom, or Onion].
Manufacturer's Name: Cedarlane Foods.
Manufacturer's Address: 4928 Hollywood Blvd., Los Angeles, CA 90027.
Date of Introduction: 1981.
New Product–Documentation: Leaflet. Talk with Robert Atallah, president of Cedarlane. 1988. Feb. 5. Tofu Luau and Marinara and Tofu Quiche in a Cup, which he made, were discontinued because they were not feasible. Retailing for $1.99, they did not sell. Yet everybody who tasted them liked them.

5312. **Product Name:** Tofu Dip [Dill, Basiga (Basil), or Hot Curry], and Tofu Pudding [Carob-Almond].
Manufacturer's Name: Central Soyfoods.
Manufacturer's Address: 11 W. 14th St., Lawrence, KS 66044. Phone: 913-843-0653.
Date of Introduction: 1981.
New Product–Documentation: Talk with Jim Cooley of Central Soyfoods. 1989. Feb. 16. He started making these when he bought a Hobart blender. Both have been discontinued. Volume was too small to be profitable.

5313. **Product Name:** Tofu.
Manufacturer's Name: Dairy Foods.
Manufacturer's Address: 28 E. Broadway, New York, NY.
Date of Introduction: 1981.
New Product–Documentation: Talk with Kevin Chan. 1989. Nov. 16. This company his Fong-Inn Pastry's main competition. The original owners used to work for Fong-Inn then they left and started their own company. They ran the company for 20 years then sold out to the new owners 8 years ago. Philip Wong is the manager.

5314. Dronne, Yves. 1981. Le problème mondial du soja [The problem of soybean worldwide]. Paris: Institute National de la Recherche Agronomique. [Fre]*
• ***Summary:*** Gives details on Japanese consumption of industrially processed plant proteins (tons/year of defatted soybean meal equivalent): Unfermented: Tofu 84,200, Dried-frozen tofu 22,400, Other products. including texturized soy protein 87,800. Fermented: Soy sauce 173,000, miso 157,400, natto 55,200. Total: 580,000

Concerning Japanese consumption of new "purified" protein in tons/year. In 1971/1977 total consumption was 27,300/44,000. Of this the amount made from soybeans was 15,900/17,000 and the amount made from wheat gluten was 11,400/27,000. As for the texture, the amount sold in the form of a powder was 17,400/19,600 and the amount sold in textured form was 9,600/24,400.

In 1977, of powdered products, the amount from soybeans was 9,500 (6,000 isolates and 3,500 concentrates) and from gluten 10,100. Of the textured products, the amount from soybeans was 7,500 (6,000 dry extruded, 1,500 moist, and no paste), whereas the amount from gluten was 16,900 (200 dry extruded, 12,000 moist, and 4,700 paste). Address: Paris, France.

5315. *Ekoteket.* 1981. Tofu–användbart sojaprotein [Tofu–useful soy protein]. No. 2. p. 14-15. [Swe]
• ***Summary:*** On the first page, black-and-white photos show: (1) A package of Aros Tofu and a partly-sliced cake. (2) Ted Nordquist, founder of Aros, with his tofu plant (grinder, cooker, press). An illustration shows the cover of a book titled *Tofu Boken,* by Ted Nordquist and Tim öhlund. Five black-and-white photos (p. 2) show Tim Öhlund making tofu in the Aros plant: Grinding the soybeans with water, curding the soymilk with nigari, pressing the curds in stainless steel boxes with a mechanical lever press, cutting the large block of tofu into cakes with a knife, transferring the tofu cakes that are under water in a cooling tank into plastic trays (packages). Contains a recipe for making tofu burgers.

5316. Encore Visual Education. 1981. The tofu experience (Filmstrip). Burbank, California: Encore Filmstrips. *
• ***Summary:*** Consists of two filmstrips: Part 1. The making of tofu (79 frames, 17 minutes). Part 2. Cooking with tofu (79 frames, 17 minutes). The sound accompaniment contains both audible and silent signals. A young homemaker demonstrates the practical aspects of using tofu, including preparation of recipes for tofu balls, casseroles, sloppy Joes, salads, and desserts. Address: 1235 S. Victory Blvd., Burbank, California 91502.

5317. **Product Name:** Fortune Tofu.
Manufacturer's Name: Fraser & Neave Pte., Ltd., Food Div.
Manufacturer's Address: 253, Pandan Loop, Singapore 0512, Singapore.
Date of Introduction: 1981.

© Copyright Soyinfo Center 2013

New Product–Documentation: Letter from Melvin Wee, Mgr. 1985.

5318. **Product Name:** [House Mabo-dofu Seasoning Sauce Mix].
Foreign Name: Hausu Maaboo-dôfu no Moto.
Manufacturer's Name: House Shokuhin Kogyo.
Manufacturer's Address: Japan.
Date of Introduction: 1981.
Ingredients: Sugar, sesame oil, spices, soy sauce, lard, starch, oyster sauce, salt, monosodium glutamate, soy bean paste, red pepper, beef extract, citric acid.
Wt/Vol., Packaging, Price: 7 oz (200 gm). In foil packet in paperboard box with full-color photo on cover.
How Stored: Shelf stable.
New Product–Documentation: Label in Japanese. Distributed in the USA by Nishimoto Trading Co., Los Angeles, CA 90058. Mix diced tofu with this sauce to make the popular Chinese recipe, Mabo-dofu.

5319. **Product Name:** Tofu?
Manufacturer's Name: Island Style Soybean Products Inc.
Manufacturer's Address: 94-137a Leoleo St. (WAIP), Honolulu, Oahu, Hawaii.
Date of Introduction: 1981.
New Product–Documentation: Honolulu City Directory. 1981. p. 275. Island Style Soybean Products, Inc. 94-137a Leoleo St. (WAIP), Honolulu. The name of the product is not given. Note: By 1984 a company by this same name is making tofu at a different address in Wahiawa.

6. Light Foods Inc. (St. Louis, Missouri).

5339. **Product Name:** [Manna Tofu-Based Spreads (Natural, Dill, Sandwich), and Soyanaise (Imitation Mayonnaise)].
Foreign Name: Manna Tofu Spreads (Naturel), Soyanaise.
Manufacturer's Name: Stichting Natuurvoeding Amsterdam. Renamed Manna Natuurvoeding B.V. in 1982.
Manufacturer's Address: Meeuwenlaan 70, 1021JK, Amsterdam, The Netherlands.
Date of Introduction: 1981.
Ingredients: Naturel: Manna's tofu-soycheese (*sojakaas*)*, unrefined cold-pressed vegetable oil, grain [corn] syrup (*graanstroop*), demeter-apple cider vinegar*, ume (Japanese plum) paste, mustard, white seasalt, guar vegetable binder.
* = *van biologische grondstoffen of teelt* = from organically grown raw materials or agriculture.
Wt/Vol., Packaging, Price: 215 gm glass jar.
How Stored: Shelf stable.
New Product–Documentation: Letter from Sjon Welters. 1982. April 16. "Manna started this month to market tofu spreads, which are a great success right now. It lasts for at least 3 months refrigerated, with no chemicals or artificial additives." Richard Leviton. 1983. Trip to Europe with American Soybean Assoc. Oct/Nov. Unpublished manuscript. p. 25. "Manna started to make tofu spreads in 1981. They are now made in a Hobart blender. 200 kg/week of tofu is used to make 1,000 x 250 gm bottles of spreads. Some are pasteurized at 85ºC and some sterilized at 100ºC. The flavor of the spreads is lost at temperatures higher than 85ºC. The Manna spreads are 3.45 guilders per 45 gm jar for 3 flavors. The natural spread contains tofu, unrefined oil, miso, apple vinegar, corn syrup, sea salt, guar." Soya Bluebook. 1987. p. 100. Label. 16.5 cm by 3.5 cm.

5340. **Product Name:** [Tofurin Tofu Cheese (With Miso)].
Foreign Name: Tofurin.
Manufacturer's Name: Stichting Natuurvoeding Amsterdam. Renamed Manna Natuurvoeding B.V. in 1982.
Manufacturer's Address: Meeuwenlaan 70, 1021JK, Amsterdam, The Netherlands.
Date of Introduction: 1981.
Ingredients: Tofu, miso.
New Product–Documentation: Richard Leviton. 1983. Trip to Europe with American Soybean Assoc. Oct/Nov. Unpublished manuscript. p. 25. "Tofurin tastes like cheese. It is tofu fermented with miso, then sterilized at 100ºC for 1 hour." Letter from Sjon Welters. 1989. July 24. Tofurin was developed by Sjon Welters for Manna and introduced together with Manna's tofu spreads [in 1981], in the same size glass jar. It was not really fermented, just tofu mixed with miso.

Manna Bulletin. 1983. 5(4):1. June. The price of Tofurin has been reduced from 3.90 to 3.45 guilders.

5341. **Product Name:** Hing's Tofu.
Manufacturer's Name: Sun Hing Foods Co.
Manufacturer's Address: 147 Onepu Rd., (P.O. Box 14-213, Kilbirnie), Lyall Bay, Wellington 3, New Zealand. Phone: (04) 877 313.
Date of Introduction: 1981.
New Product–Documentation: Letter from Alan Tam of Hing's Tofu, 275 Cuba St., Wellington, New Zealand. 1985. May 1. "We have been makers of tofu for many years now, initially on a small scale, only making it for friends and family. But in recent years, with growing awareness of health and nutrition among the general public, there has been growing demand for tofu in Wellington. This has led us to making tofu on a commercial scale, supplying the local health food stores, restaurants, and the local community in general. After reading your book, *The Book of Tofu*, I am

© Copyright Soyinfo Center 2013

very impressed at the extent of your research into tofu and soybean foods, its historical, cultural, and nutritional aspects. I also find your recipes very interesting, covering a wide range of tastes and exploring many new ways of eating tofu. In fact it is the most comprehensive book on soyfoods that I've ever seen!" He asks about ordering the book *Tofu & Soymilk Production.*

Letter from Alan Tam, Owner. 1986. Nov. 18. He has just moved into new premises, so this address is probably incorrect. Current production is about 1,000–1,200 lb/week of tofu. Leaflet. 1986. Hing's Tofu. Brown and blue on white. Contains 18 recipes, nutritional analysis and illustrations from *The Book of Tofu* by Shurtleff and Aoyagi.

Letter from Alex Leung, Director. 1992. Dec. 9. The company is now named Hing's Limited, located at 147 Onepu Road, Kilbirnie, Wellington, New Zealand.

Note: This is the earliest known commercial soy product made in New Zealand.

5342. **Product Name:** Tofu Vegie Patties: Seasoned and Baked.
Manufacturer's Name: Tofu Shop (The).
Manufacturer's Address: 768 18th St., Arcata, CA 95521. Phone: 707-822-7409.
Date of Introduction: 1981.
Ingredients: Our own fresh tofu (water, organic soybeans grown according to Cal. Health Code Sect. 26569.11 and nigari), fresh vegetables (carrots, green onions, parsley), tamari (natural soy sauce made with water, soybeans, wholewheat and salt). Garlic and ginger.
Wt/Vol., Packaging, Price: 10 oz. vacuum packed.
How Stored: Refrigerated.
New Product–Documentation: Three Labels sent by Matthew Schmit. 2002. Sept. 9. The product was introduced in 1981. Label #1 of 1981. 4 by 2.5 inches. Self adhesive. Metallic gold, red, white, and silver on green. "Ready to eat... or reheat, naturally fresh... from our deli. A perfect snack fresh from the pack. Great in your favorite burger with all the fixins, or as a main dish. or Simple to heat in oven (350ºF, 10 minutes) or frying pan. Perishable, keep refrigerated, 34-39º." Illustration in a vertical parallelogram shows a tofu shop on stilts near the ocean with a tree arching overhead.

Label #2 of 1992. "Tofu Vegie Patties: 2 Baked." 3 inches diameter. Black, yellow, and white on green. "Crafted from whole organic soybeans. Illustration shows a tofu shop on stilts near the ocean with a tree arching overhead.

Label #3 of Oct. 2002. Dark green and orange-yellow on white. 3 inches diameter. No adhesive. A handsome, impressionistic watercolor illustration shows a tofu shop on stilts on a cliff with a tree arching overhead. "Good source of protein. Low in saturated fat. Cholesterol free."

5343. **Product Name:** Teya's Chinese Rice and Tofu. Curried Rice & Tofu. Stuffed Golden Soybean Cakes. Pizza (with whole wheat crust).
Manufacturer's Name: Tumaro's Inc.
Manufacturer's Address: 5300 Santa Monica Blvd., Los Angeles, CA 90029.
Date of Introduction: 1981.
Ingredients: Chinese Rice & Tofu: Organically grown brown rice, zucchini, baked tofu (soy beans, water, soy bean oil, nigari), water chestnuts, eggplant, peanuts, mushrooms, onion, tamari (soy beans, water, sea salt), sesame oil, garlic, sea salt. Curried Rice & Tofu: above plus curry powder. Stuffed Golden Soy Bean Cakes: Brow rice, deep fried soy bean cakes, sprouted soy beans, zucchini, eggplant, water chestnuts, onion, tamari, sesame oil, garlic, ginger.
Wt/Vol., Packaging, Price: 10 oz.
How Stored: Frozen.
New Product–Documentation: Labels. 1981. 3 by 2 inches. Self adhesive. Chinese Rice & Tofu: Tan on brown. Curried Rice & Tofu: Brown on tan. Stuffed Golden Soy Bean Cakes: Black on red. "No Meat or Meat Derivatives." Poster. Back to back, color. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.

5344. **Product Name:** Vegetarian Entrees: Tamale, Burrito, Empanada, Enchilada, Pizza, Sprout & Tofu Pie.
Manufacturer's Name: Tumaro's Inc.
Manufacturer's Address: 5300 Santa Monica Blvd., Los Angeles, CA 90029.
Date of Introduction: 1981.
New Product–Documentation: Poster, back to back color. "Tumaro's Brings You This All-Natural Family of Protein-Rich Vegetarian Entrees." Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.

5345. Tôfu seihin to eiyô [Tofu products and nutrition]. 1981. Aichi Prefecture, Japan: Aichi Prefecture Tôfu Shokô Kyokai. [Jap]*
• ***Summary:*** This booklet contains 13 chapters, one of which is about soyfoods and health. The trypsin inhibitors in tofu and soymilk are said to be effective in treating diabetes. Address: Japan.

5346. **Product Name:** Tofu-Dill Salad.
Manufacturer's Name: Wildwood Natural Foods.
Manufacturer's Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1981.
Ingredients: Tofu-Dill: UFO Tofu by Wildwood, green peppers, celery, brine pickles, lemon juice, safflower oil, apple cider vinegar, dill, mustard, spices, sea salt.
Wt/Vol., Packaging, Price: 12 oz plastic tub. Retails for $2.25.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods. 1983. Summer.

© Copyright Soyinfo Center 2013

p. 42-43. “Dated for 7 days shelf life.” Label sent by Wildwood on their letterhead. 1983, undated. 3 x 2 inches. Dark and Light green on white. Silhouette of woods with birds. “Ready to Eat Foods, Naturally. Perishable. Keep refrigerated.” Saw Tofu Curry Salad and Tofu Veggie/ Vegetable Salad on sale in Berkeley. 1988. Aug. 30.

Label sent by Billy Bramblett. 1998. July. He says this product was introduced in 1981.

Ingredients: Wildwood tofu (filtered water, soybeans organically grown in accordance with the California Organic Foods Act of 1990, nigari/magnesium chloride, a natural firming agent), okara (soybean pulp), celery, lemon juice, safflower oil, apple cider vinegar, dill weed, mustard, garlic, spices and salt.

5347. **Product Name:** Tabouli Salad.
Manufacturer’s Name: Wildwood Natural Foods.
Manufacturer’s Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1981.
Ingredients: Bulgur, filtered water, onions, olive oil, tamari, lemon juice, parsley, mint, garlic, salt.
Wt/Vol., Packaging, Price: 8 oz plastic tub.
How Stored: Refrigerated.
New Product–Documentation: Labels sent by Wildwood on their letterhead. 1983, undated. 2.75 by 1.75 inches. Self adhesive. Black and green on ivory. Silhouette of woods with birds. “Ready to eat Foods, Naturally. Perishable. Keep Refrigerated.”

Label sent by Billy Bramblett. 1998. July. He says this product was introduced in 1981, and made at Wildwood’s plant in Fairfax. On the front label, the text below the product name reads: “A refreshing combo of bulgur wheat, tomatoes, parsley, lemon and mint.” The ingredients are now: Bulgur wheat, vegetables (tomato, cucumbers, red onion), lemon juice, olive oil, parsley, mint, salt. On the back label, next to the UPC indicia: “Contains no animal products.”

5348. Wood, Brian J.B.; Hounam, Laura. 1981. Dairy products from soy beans. In: 1981. Proceedings of Dairy Symposium at the Food Industries Exhibition, London. See p. 19-23. [16 ref]
• ***Summary:*** Contents: Introduction. History (of soy milk). Preparation and nature of traditional soy-milk and tofu. Practical aspects of soy milk and tofu. Products derived from tofu (salted tofu, smoked tofu, spiced and flavored tofu, tofu burgers, Sufu {resembling Camembert cheese}). Economic considerations. Address: 1. Dep. of Applied Microbiology; 2. Centre for Industrial Innovation. Both: Univ. of Strathclyde, Glasgow, Scotland.

5349. Altman, Nathaniel. 1981. Nathaniel Altman’s total vegetarian cooking. New Canaan, Connecticut: Keats Publishing, Inc. 229 p. Index. 18 cm. Series: A Pivot Original Health Book. [180 ref]
• ***Summary:*** The author was born in 1948. The first page of the book begins: “It’s not just spinach. The vegetarian way of eating is incredibly varied, employing such exotic, appealing foods as calcium-rich hijiki, tempeh from Indonesia, and tofu.”

The glossary (p. 139-44) describes: Lecithin, milk (soy), miso, soybeans, soy grits, sprouts (incl. soy), tamari, tempeh, tofu, and textured vegetable protein (TVP).

Chapter 11, titled “A vegetarian diet can save you money” (p. 146-51) mentions soybeans and soyfoods (incl. soy milk powder, dry tofu [probably dried-frozen tofu], soy sprouts, soy flour, soy sauce, tofu) repeatedly as low-cost sources of protein.

The book has several very interesting appendixes: C. The vegetarian bookshelf (p. 208-10). D. Vegetarian contacts–Some vegetarian societies and publications (p. 211-12). Bibliography by chapter (p. 213-20).

5350. Aoki, Hiroshi. 1981. Misoshiru sanbai kenkô-hô [Three bowls of miso soup daily for good health]. Tokyo: Goma Books. 220 p. Illust. 20 cm. [Jap]
• ***Summary:*** Miso soups and health recipes. He worked for food companies, including Ajinomoto, for 30 years on development of new soy protein foods. A popularizing book. Discusses Hirayama.

Contents: Preface. Why are miso soups and soyfoods appreciated again now? 1. The many benefits from eating miso soups and soyfoods every day. 2. The Japanese people have forgotten the goodness of miso soups and soyfoods. 3. Healthy soyfoods: From miso to soymilk (miso, natto, shoyu, tofu, deep-fried tofu pouches, dried-frozen tofu, yuba, okara, kinako {roasted whole soy flour}, soymilk, soy oil). 4. Miso soups and soybean cooking make a healthy body. Soybean recipes which are suited to people in the younger generation. Mother’s favorite recipes are good for health, too. Appendix. Maps of Japan showing areas of miso soups and natto.

5351. Barber, Linda; Matsuda, Tomoko. 1981. Tôfu, nattô ryôri [Tofu and natto cookery]. Kumamoto City, Kumamoto prefecture (on the island of Kyushu), Japan: Marumiya Co. 25 p. Illust. (color photos). No index. 22 cm. [Jap]
• ***Summary:*** Contents: Recipes of tofu and natto: 13 western style, 2 Japanese.

Note: A photo (see next page) shows Linda (left) with co-author, Tomoko Matsuda; she translated Linda’s recipes into Japanese. She was also Linda’s assistant at Kobe College, and she traveled everywhere that Linda went as a friend and translator. She also helped Linda with food styling.

5352. Barber, Linda. 1981. Color slides of making soymilk curds and tofu at home in Japan. Kobe, Japan. 1 p. Based on e-mail of 9 May 2012.

© Copyright Soyinfo Center 2013

• ***Summary:*** (1) Fresh homemade soymilk curds, ready to be served, seasoned with soy sauce. (2) Fresh homemade tofu, placed in cold water in a bowl to be chilled. (3) Homemade frozen tofu; its spongy porous texture absorbs sauces like magic. (4) Tofu can be used as a source of protein in a wide variety of dishes–including many healthy desserts. Address: Resident Director of Practice House and Oral English Instructor, Kobe College, 4-1 Okadayama, Nishinomiya, Japan.

5353. Beasley, Sonia. 1981. The spirulina cookbook: Recipes for rejuvenating the body. Boulder Creek, California: University of the Trees Press. viii + 184 p. Illust. by Reenie Haughey. Background by Dr. Christopher Hills. Index. 15 x 23 cm.

• ***Summary:*** Contains over 100 recipes using spirulina, a type of fresh-water algae. Soy-related recipes include: Scrambled eggs with tofu (p. 2). Pam's green goop (with tofu and miso; p. 18). Spirulina Aztec soup (with miso; p. 29). Chris's spirulina soup (with miso; p. 41). Pam's dressing (with miso; p. 166).

Note: Sonia was born in 1941 in Ceylon. She is a gourmet cook with her own catering business specializing in international cuisine. On the rear cover is a color photo of Sonia Beasley and Dr. Christopher Hills.

5354. Block, Lawrence; Morrison, Cheryl. 1981. Real food places: A guide to restaurants that serve fresh, wholesome food. Emmaus, Pennsylvania: Rodale Press. xiii + 296 p. 22 cm.

• ***Summary:*** The real food places are arranged alphabetically by state, and within each state alphabetically by city. Each entry was written by a "reviewer," whose name appears at the end. For example, under California: "Glendale–Foods for Life, 504 E. Broadway. 213-249-2660. Natural wood is the decorating motif of this attractive natural foods restaurant. The tables and chairs (wood and padded seats) are custom made. Bright lights permit reading, and the surroundings are clean and neat at all times. Mostly women dine here; there are very few children, and few men.

"The foods and drinks are top quality; they seem slightly high-priced but are apparently worth it because sales volume is high. Sandwiches are a big seller, assembled to order and served with a mixed green salad including chopped walnuts. Menus are posted on the walls and they're so extensive it takes a while to absorb them. Tuna with sprouts is very popular. There are many delightful desserts, made without sugar; carrot cake is the most popular, but others come close.

"Coffee and a substitute are available; no beer, wine or liquor. Finding a place to sit at meal time is a problem; it is recommended that you arrive early or late–Alan W. Farrant."

California (p. 6-68) is the state best represented in this book. Other restaurants in California: Hollywood–The Source, 8301 Sunset Blvd., 213-656-6388. Serves fish and chicken. The desserts contain no refined sugar. The menu states: "Only whole grains and pure honey... all our oils are cold pressed."

Los Angeles–Golden Temple Conscious Cookery, 7910 Third St., 213-655-1891. "Bright yellow paint on the outside makes this restaurant especially easy to find." Vegetarian menu. Drinks: Nectaral Rose is Red Zinger tea mixed with apple juice and sparkling mineral water. Sparkling cider is served, too, but there is no coffee or alcohol."

San Francisco: Good Earth, 2323 Powell St. Seats 250. Special section for smokers.

San Francisco: Greens, Building A, Fort Mason. This old Army warehouse has been renovated by the San Francisco Zen Center. The brochette includes tofu. Desserts, which come from Zen Center's own bakery, are extra special. Reservations are a must. Smoking permitted.

San Francisco: Real Good Karma, 501 Dolores St. A vegetarian restaurant, with many hanging plants and fresh flowers. Everything is prepared without preservatives or chemical additives, using only whole grains, cold-pressed oils, and natural rennetless cheese. Tofu is used in at least one salad. "Coffee is served but no alcohol. Customers may bring their own wine."

Florida: Oak Feed Restaurant, 3008 Grand Ave., Cocoanut Grove. "Under the sign of a huge carrot in the center of this artistic village is Oak Feed." "Desserts are sugar free, with the soybean cake deserving special attention." Smoking on the patio only.

Boston, Massachusetts: Sanae (which means "little sprout" in Japanese), was Boston's first natural food and macrobiotic restaurant; it opened in 1969. It has mellowed somewhat since it started, enough to serve coffee and offer dairy products in the baked good. No meat or sugar is on the menu, which does include: Tofu stew. Miso soup with tofu. Hiziki [sic, Hijiki] topping with creamy tofu. Desserts are sweetened with maple syrup. "No alcohol. No credit cards. No smoking."

Boston: Seventh Inn, 288 Boylston St. This is the elegant, grown-up sister of Sanae. The pedigree is macrobiotic. Specializes in vegetarian and fish dishes, and it also serves tofu and eggs–but no meat and very little cheese. "Smoking permitted. MasterCard and Visa accepted."

Many of the other restaurants are vegetarian and

© Copyright Soyinfo Center 2013

quite a few serve soyfoods, especially tofu. Address: 1. Novelist who has been a vegetarian for several years; 2. Nonvegetarian but health-conscious freelance writer. Both: New York City.

5355. Bragg, Paul C.; Bragg, Patricia. 1981. Hi protein vegetarian health recipes: With history and reasons. Santa Barbara, California: Health Science. 184 p. Illust. No index. 21 cm.

• ***Summary:*** This book is quite similar to the 1975 edition, however one word in the title has been changed (to vegetarian meatless from meatless), and small changes have been made on several pages following Paul Bragg's death in Dec. 1976. Nevertheless, the book gives the strong impression that Paul Bragg is still alive. Whereas he used to advocate moderate amounts of meat and fish in the diet, he now advocates a vegetarian diet [which is becoming increasingly popular, especially among young people, in the USA]. On the book's cover these words appear in large bold letters: "Vegetarian. Salt free. Sugar free."

We will discuss here only the changes that have been made in the 1980 edition. The copyright page states that this is the fifth printing. The address of Health Science, the publisher, has changed to Box 7, Santa Barbara, California 93102–from Hot Springs, California.

At the bottom of the next page a message has been added, which starts: "Our sincere blessings to you dear friends, who make out lives so worthwhile and fulfilled by reading our teachings on natural living as our Creator laid down for all of us to follow... Our prayers reach out to you for the best in health and happiness..." Signed Paul C. Bragg and Patricia Bragg.

On the page facing page 1, under the large photo of Bragg, is a different caption: "Paul C. Bragg in Hawaii, where he spends much of his time during the latter years of his vigorous, long life (almost a century!)." Describes how he writes, teaches, and exercise each day. Below that is "An old English Prayer," which begins: "Give us, Lord, a bit of sun, / A bit of work and a bit of fun. / "... Our daily whole grain bread and a bit of nut butter."

On page 66, at the bottom of the full-page ad for Bragg Liquid Aminos, readers are directed to order from a new address: Live Food Products, Box 7, Santa Barbara, CA 93102. "For 8 ounces of Bragg New Super Concentrated Liquid Aminos send $3.50 which covers postage and handling." Note: In 1975 the price was $2.99 for 16 ounces of "Bragg Liquid Aminos."

On page 81, an illustration of a pot and vegetables has been replaced by an illustration of Ponce de Leon, with a message about how he searched for the fountain of youth. "If he had only known–it's within us." There is also a new quotation from Patricia Bragg which states: "The more natural food you eat, the more radiant health you will enjoy and you will be better able to promote the higher life of love and brotherhood."

On page 157, the section titled "Sickness is expensive," has been updated (new statistics) and slightly expanded.

On page 160, a new photo, titled "When you are healthy–You are happy! shows the members of the "Longer Life, Health and Happiness Club" at Fort DeRussy on Waikiki Beach, Honolulu, Hawaii.

The end of the book (after a blank page titled "My favorite recipes") contains: Advertisements: (1) Send for important free health bulletins. (2) Bragg live longer, live stronger self-improvement library (list of 25 books by Bragg, with prices). From the authors. Brief biography of Patricia Bragg, Ph.D., Nutritionist, beauty and health consultant. Advisor to world leaders, glamorous Hollywood stars, singers, dancers, athletes. Lecturer and author (She says she is the daughter of Paul C. Bragg. An accomplished musician, dancer, tennis player, swimmer, and mountain climber. The youngest woman to ever have been granted a U.S. patent. Graduate of the University of California. Lists her famous clients). Biography of Paul C. Bragg. Address: 1. N.D., Ph.D., Life Extension Specialist; 2. Beauty and diet expert. Both: Santa Barbara, California, and Honolulu, Hawaii.

5356. Cadwell, Jane. 1981. O Livro da Soja [The book of soya]. Sao Paulo, Brazil: Editora Ground Ltda. 79 p. Illust. Index. 21 cm. [Por]

• ***Summary:*** Contents: Preface. Introduction. The soybean. Soybeans and health (nutritional composition). Our daily foods and our health. Auxiliary foods and ingredients (incl. miso). Kitchen utensils. Recipes: Whole soybeans (incl. cooked ground soybeans, green vegetable soybeans {*Soja fresca* (*verde*)}, soynuts {*castanhas de soja*}) Soymilk (incl. homemade using the Cornell method, soymilk yogurt), okara, tofu (incl. homemade, tofu miso soup, cakes, pies, baby foods).

Jane writes in a letter dated 5 July 1982 of her book: "My book is the first one [published in Brazil] exclusively on soyfoods. The intent was to show people all the varieties of things that they could make starting principally from whole dry soybeans. Consequently I did not include the topics of miso, soyflour, and textured proteins. I began writing the book as a result of a government campaign last year to get people to use soybeans in place of regular beans. As you probably know, rice and beans is really the principal dish at the noon and evening meals. There was a shortage of the regular beans and the price was very high... Consequently the government campaign to introduce soybeans. They were ridiculously cheap, yet there was hardly any information on how to use them. Thus–my book... Soybeans are now available in many supermarkets and well as health food stores and oriental shops." Address: Brazil.

5357. Cho, Joong Ok. 1981. Home style Korean cooking in pictures. Tokyo: Japan Publications. Distributed by Harper &

© Copyright Soyinfo Center 2013

Row (New York). 96 p. Illust. (mostly color photos). Recipe index. 27 cm.
• ***Summary:*** Soy related recipes: Cooked tofu and ground meat (*Dubu jjim*, p. 32). Garnished rice (*Bibim bap*, p. 44, with soy sprouts).

About the author: "Mrs. Cho Joong Ok was born and raised in Seoul, Korea. A descendant of a noble family from which six Korean queens have come, Mrs. Cho is as versed in palace cuisine as she is in family cooking." She has written a number of books on Korean cooking, "contributes regularly to magazines and teaches Korean cooking on television. She lives in Tokyo with her husband..." Unfortunately, this book has a poor index. Address: Tokyo, Japan.

5358. Daenzer, A. Walter. 1981. Soya-Eiweiss: Nahrung der Zukunft [Soy protein: Food of the future]. Zurich, Switzerland: Verlag Bewusstes Dasein. 84 p. Illust. No index. 21 cm. [Ger]
• ***Summary:*** Contents: 1. The long journey of a new basic food (TVP, or Soyameat). 2. How it came to Soyameat. 3. The significance of Soyameat for nutrition. 4. Meat or soy protein? (starts with a photo of 25 famous vegetarians). 5. Soy products, the Third World, and world food supplies in the future. 6. Tips and recipes.

This is Dänzer's first book, about textured soy protein (especially Soyana brand TVP), which his company sold. Born in 1947, he is a disciple of the Indian spiritual teacher, Sri Chinmoy. He wrote the book largely to promote his TVP, which he imported and packaged for the Swiss Reform Houses. Address: Soyana, Postfach 8039, CH-8002, Zurich, Switzerland.

5359. Dahlen, Martha; Phillips, Karen. 1981. A further guide to Chinese market vegetables. Hong Kong: South China Morning Post Ltd., Publications Division. xi + 74 p. Illust. Index. 21 x 28 cm.
• ***Summary:*** This is the 2nd in a series of three books about Chinese market vegetables in Hong Kong. The inquisitive authors have learned much about this subject since their first volume was published in 1980–and this book shows it! When "beginner's mind" meets a subject, we too learn many new things that the expert overlooks. The romanization of names in this book represent the Cantonese pronunciation system of Herklots. The color illustrations of these foods are large and exquisite.

The book is divided into two parts–with the first part of this book being very similar to the first part of the first book in the series (1980). (1) Foreword. Chinese cooking utensils. Acknowledgements. Basic methods of Chinese cooking. Basic seasonings: Drygoods & sauces. Chinese numbers & market figures.

The section titled "Basic seasonings" (p. 3) includes three made from soybeans–with a somewhat different format and definitions than found in the 1980 volume.

"Fermented black beans (2 Cc = Chinese characters are given) Dau see [fermented black soybeans]. These are whole soybeans which have been fermented with salt and other ingredients to give them a rich flavour. They are black in colour, each bean measuring about ¼ inch long, soft rather than hard and dried in texture, and sold in plastic bags. Dau see are commonly mashed with garlic and stir-fried with pork, beef, shellfish, or vegetables.

"Light soy sauce (2 Cc) See yau; sang chau. This is the best grade of soy sauce. 'Light' means it is not thick or viscous, and has a delicate, fine flavour. Use this when stir-frying, for a final seasoning of soups and steamed fish, and as a sauce at the table.

"Dark soy sauce (2 Cc) Lo chau. 'Dark' here means thick and of stronger flavour; often it has been fermented with other ingredients such as molasses, mushrooms, etc. This is mainly used for braised or long cooked dishes."

(2) The vegetables (41 not in the 1980 volume, including soybean sprouts and various types of bean curd).

Soybean sprouts. Daai dau nga choi (4 Cc). A color illustration shows a small bundle of fresh soybean sprouts. "Appearance: 'Na choi' are bean sprouts; 'daai dau' means big beans" or soybeans. The large seed attached to each sprout distinguishes soybean sprouts from all other sprouts. Each sprout measures 2-3 inches in length with a yellow, ½-inch-long bean at one end. "Whereas vendors display mung bean sprouts in jumbled heaps, they neatly align these sprouts, either tied in bunches or arranged in a shallow wooden tub, heads to the outside and root-tails in, like hundreds of spokes of a wheel."

"Quality: The beans should be yellow, with no tint of green or emerging leaves; the shoot should be clear, crisp and white from head to tip." (N.B. Green soybean sprouts are not harmful to eat, just less delicious).

"Availability: Ubiquitous and perennial, except during Chinese New Year; inexpensive.

"General comments: Soybean sprouts are one of the most nutritious and economical foods available." They are comparable in food value to meat and eggs, and have a rich, nutty taste. "The process of sprouting converts much of its already minimal starch into vitamins (particularly vitamin C), enzymes, and tender, sweet new plant.

"Cooks should keep three precautions in mind when preparing this vegetable: First, because raw soybeans are slightly poisonous, the sprouts must always be cooked before eating. Second, soy sprouts tend to be slightly fibrous and less tender than mungbean sprouts, especially if old or overcooked. Third, sprouts will keep longer and remain whiter if stored in water in a covered container in the fridge.

"Preparation: Before untying the bundle, if the vendor has not already done it, trim off the lower root portions of the shoots with a single blow of the cleaver. Then wash and drain, discarding any blackened or otherwise disreputable

© Copyright Soyinfo Center 2013

heads.

Cooking: (1) "*Western:* Blanch in boiling, salted water, drain, and marinate with other vegetables (chopped tomatoes, celery, green pepper, fuzzy melon–ts'eet gwa–spring onions, etc.) in an oil and vinegar or Italian salad dressing. Saute. Mince and add to meat loaf or hamburger meat patties.

"*Chinese:* Three styles of preparation seem standard: one, simply stir-fried with ginger and/or pork; two, boiled with pork bones in a soup to make a traditional 'poor man's' stock; and three, minced with pork in a meat patty."

There follow two recipes: (1) Pork & soy sprout soup (with "soybean sprouts" and "1-2 slices of ginger, crushed," p. 31). (2) Soybean and pork mince (with "1 bunch {about 1 lb} soybean sprouts, minced).

Bean curd. Dau-foo (2 Cc). With 2 color illustrations.

"Appearance: Most bean vendors sell mungbean sprouts, soybean sprouts and between two and five different kinds of bean curd. Each of the different varieties will be dealt with separately on the following pages.

"Quality: The quality of fresh dau-foo mostly depends on the quality of the water used to make it. Thus quality–and price–are more or less fixed within any market, if not throughout Hong Kong."

"Availability: "Soi dau-foo" (literally "water tofu," also called *sui-doufu*) is in virtually every market every day; the other types are irregularly available according to vendor (not season); that is, some bean vendors habitually carry all five types, while others may carry only two or three.

General comments: Describes briefly how bean curd is made. "This fresh bean curd may be sold as is or processed further: pressed, fried, dried, or fermented." It is a good source of protein and oil with little starch. "Bean curd in any state is bland is taste."

(1) "Deep-fried bean curd (Dau-foo pok, 3 Cc): These are small cubes or large squares of bean curd which have been deep-fried. The outer surface is a golden-brown crust, while the inside is porous." Describes preparation (pour boiling water over squares to remove excess oil and dirt) and cooking (usually braised). Gives one recipe: Lettuce and dau-foo pok.

(2) "Water-type bean curd (Soi dau-foo, 3 Cc). This is the most common type of bean curd. It is made in a cloth-lined wooden tray about 12 inches square; the vendor removes the surrounding frame and cuts the curd into 1½-inch cubes for selling. The cakes are shiny, white and smooth on all surfaces.

"Preparation: Rinse well but carefully, with cold or boiling water. Note: The tofu is not sold immersed in water. It is fundamentally different from Japanese silken tofu.

"Cooking: This type has a very light, delicate texture. It is best used for steaming or simmering briefly in soup where it is least likely to disintegrate under rough handling." One recipe is given: Green & bean curd soup.

(3) "Bean curd (Dau-foo, 2 Cc): Although this type of curd seems to have no name of its own, vendors and cooks always distinguish it from its twin, 'soi dau-foo.' The cakes are "cut from a square block on a wooden board. This variety, however, has been slightly pressed so it is shorter [from top to bottom], bears the faint imprint of cloth on its top surface, and will stand rougher treatment than soi dau-foo. Thus this type is recommended for frying or braising." One recipe is given: Braised dau-foo.

(4) "Wrapped bean curd (Bo-baau dau-fu 4 Cc): With one color illustration. This bean curd is sold from tubs of water rather than from a wooden board. Each square of curd has been wrapped in cloth so that each piece measures about 2 inches square with rounded, rather than sharp, edges and each piece is 2-3 times more expensive than common fresh dau-foo. This is the finest, most delicate bean curd and is usually used only for steaming as in the following recipe." Recipe for: Lo-siu ping-on (with "3 squares bean curd {either bo-baau or soi type}," p. 34).

(5) "Hard-pressed bean curd (Dau-foo gonn [pinyin: doufu-gan], 3 Cc): This type of curd is solid, and thus easily sliced or cut in shreds and stir-fried with other bits of meat and vegetables. Two types are available, as illustrated (two color illustrations on p. 34): the larger, 3-inch square, white one is the plain Cantonese type; while the smaller, 2-inch square one is reddish in colour due to a light coating of 5-spice powder (*ng heung fun*, 3 Cc). As both tend to be bland and dry in texture, prepare them with a rich sauce or with other highly flavoured, slightly oily ingredients, such as duck." Recipe for: Chop choi ("Chop all of the following in ¼-inch cubes, in proportions to taste"). Address: Hong Kong.

• ***Summary:*** Chapter 6, titled "Issei life histories," includes a history of Tsuru Yamauchi (p. 488-509, based on an interview with Michiko Kodama), the mother of Shoan Yamauchi, who founded Hinoichi Tofu, the largest tofu company in the United States.

Tsuru Kamiawa was born in 25 Dec. 1890 (Meiji 23; the year of the tiger) in Shuri, Okinawa, into a poor family that had once been "of samurai lineage." When she was age 3, the family moved to the countryside, to Itoman and

© Copyright Soyinfo Center 2013

Ahagun, where she was raised. When she was about 13 or 14 [1903-04] she learned to make tofu, grinding the [soy] beans by hand early in the morning. She made one kettleful each morning, then sold it on a sidewalk where things were for sale. She also tended her own agricultural field, where she grew and harvested various crops.

She was married in about 1908 (Meiji 41) as a "picture bride," to Shokin Yamauchi, who was the eldest of four boys and two girls. At the time of the marriage, he was away in Kauai, Hawaii, cutting sugarcane, so she went to live with his parents–who were kind to her, but who also lived in a small, crowded rented house of one room. There was a tofu shop next door, and she was careful never to waste tofu or okara.

In 1910 she went to Wapiahu, Hawaii (on a 15-day trip by ship via Japan), to meet her husband for the first time. They lived deep in the canefields, where her husband worked, in one big crowded cottage in Camp 35. In 1911 she had her first child, a daughter. They usually ate tofu once a week only, but they had it twice in one week only about once a month. The people who made it carried it by foot from Wapiahu to sell it to them. The sugarcane workers worked hard, six days a week, with only Sunday off. They moved to Camp 1 and then to Camp 10, where they lived for 8 years in the middle of the canefields. For breakfast they now had miso soup and daikon pickled in miso. By the age of 30 Tsuru had had 4 children, most born with a midwife and all without a doctor. The children's grandfather on their husband's side [i.e., her husband's father, Mr. Yamauchi, had come to live with them in Hawaii].

Around 1919, after being away from home for 8-9 years, she returned with her 4 children to visit parents in Itoman, Okinawa. After 4 years in Okinawa, she return alone to Hawaii to be with her husband; later on they called their children one by one to be with them in Hawaii. In Hawaii she found a job where her husband was then working, at the Hawaii Military Academy on 18th Avenue. She worked in the boarding school–even though she spoke almost no Hawaiian or English. She had three more children in 1925, 1927, and 1929–bringing the total now to seven. When Mr. Yamauchi decided to start working for the Ewa landing pier, she worked as a housemaid (for very little money), until 1937, when she started to work at Libby's cannery–starting at 30 cents an hour. She worked at Libby's for three years (during the pineapple season), then during the off-season she worked at a tuna canning factory for 20 cents an hour. It smelled terrible. Around that time she also did housecleaning in Kahala, two or three houses a week. Their small income helped to pay for the elder children's school tuition in Japan.

Then on 15 July 1940, with almost no money, they purchased an existing tofu shop [Haruko Uyeda Tofu] and renamed it Aala Tofu Co. She made the tofu and ran the shop; her husband had a job gardening. In 1938 her boy came back from Okinawa. He helped her to make tofu while he was going to school. "Later this boy [Shoan Yamauchi] when to the States and is now involved in the tofu business in a big way. He had gone to America for a vacation, intending to play, but he started making tofu there and lives in Los Angeles."

In Hawaii the tofu was made differently from the way she had learned to make it in Okinawa; in Hawaii the okara was cooked with the slurry before it was removed. Since they had no machines at that time, it took a long time to make tofu and was hard work. They got up and started work at 1-2 o'clock in the morning. They ground the [soy] beans with a stone mortar [sic, hand-turned stone mill].

Kanai Tofu, run by Mr. Kanai, is the oldest tofu shop in the area. "We've been doing it for 40 years and he was before us. There was one more on River Street, Green Mill, which used to be on Maui, came afterwards. After the war others also came up–Aloha Tofu and other smaller ones that do the work themselves. Many are Okinawans" (p. 505). At the shop they also made and sold *age* (fried bean curd), konnyaku, and okara. Pig keepers would by the okara very cheaply for feed.

The tofu business stopped for about 3 weeks after Pearl Harbor and the start of war. Then business was good and tofu sold well because of food shortages. In 1942 they started a noodle shop (*saimin-ya*) to augment their income. They used their age to make "cone sushi." During the war, their son [Shoan Yamauchi] doing tofu went into the U.S. army when his number came up. Fortunately, there was no internment of Japanese or Okinawans in Hawaii.

Today, one of their boys is in jewelry; three are in tofu. Her girl who was born in Okinawa now lives in California with her family. Tsuru was age 91 at the time of this interview. Her life consisted mostly of ceaseless hard work and poverty. Life is good now in Hawaii.

Note: Tsuru Yamauchi died in 1990 in Hawaii. Address: Manoa, Hawaii.

5362. Ford, Richard. 1981. Soy foodery cookbook: Tofu, tempeh, miso, sea vegetable recipes and resources. Santa Barbara, California: Published by the author. ii + 78 p. Illust. No index. 22 cm. Spiral bound. [20+ ref]
• ***Summary:*** Contents: Introduction: Creative balance. Soyfoods: Foods for the future. Soyfoods resources. Tofu: A soy product catching on. Tempeh: The super soy. Soysage. Sea vegetables: The tide is rising. Miso: A food doing it with culture. Soyfood travelers guide. Contains many recipes using tofu, tempeh, sea vegetables, and miso. At the end of each chapter is a bibliography. Address: Santa Barbara, California.

Entrées. Contains many recipes. The cover is black on red. The text is handwritten calligraphy. Address: Avalon, California.

5364. Hinode Tofu Company. 1981. Hinode Top Silken Tofu. Natural high protein (Leaflet). Los Angeles, California. 4 panels each side. Each panel: 22 x 9 cm.
• ***Summary:*** This color leaflet contains 8 tofu recipes from *The Book of Tofu* by Shurtleff & Aoyagi: Tofu mushroom meatloaf. Chinese chilled tofu. Salmon tofu salad with sesame dressing. Crisp-pan-fried tofu. Deep fried tofu. Eastern omelet. Tofu with vegetables. Tofu fruit pudding.

Other panels: The joy of tofu (nutrition). Tofu and you (protein; how silken tofu is made). Top silken tofu (firmer than kinugoshi tofu, pasteurized in the package). Easy to use and enjoy. Up to 60 day shelf life under refrigeration. Address: 526 Stanford Ave., Los Angeles, California 90013.

5365. Hom, Ken; Steiman, Harvey. 1981. Chinese technique: an illustrated guide to the fundamental techniques of Chinese cooking. New York, NY: Simon & Schuster. Wallaby Books. 345 p. Illust. (photos by Willie Kee). Index. 29 cm.
• ***Summary:*** This "comprehensive, illustrated guide to the art of Chinese cooking provides step-by-step instruction in the basic techniques of Chinese cuisine and more than one hundred traditional recipes." A full-page photo of Ken Hom faces p. 13, and a biography of both authors appears at the end of the book.

The section on "Ingredients" includes descriptions and a photo of: Bean curd (fresh–Chinese style tends to be firmer than Japanese; "red bean curd," also known as "red bean curd cheese and preserved bean curd–red" is red fermented tofu. "Two other types of preserved bean curd are wet bean curd and fermented bean cake"). Beans, fermented black [Fermented black beans]. Bean sauce (Brown bean sauce, Brown bean paste; comes in two forms–whole bean and ground bean. Whole is preferred. "Both are very salty and are made from soybeans, flour, and salt"). Hoisin sauce (Duck sauce, Red seasoning sauce. Made from soybean flour, red beans, chili sugar, salt, garlic, and spices). Soy sauce (The two main types are light and dark. Other variations include mushroom soy and shrimp soy. Japanese soy sauce is not a good substitute).

"Shredding ginger" (p. 66): "If the ginger is fresh, it is not necessary to peel it; simply wipe it clean with a damp cloth."

In the section on "Vegetables" under "Main-ingredient vegetables" we find: Bean curd (p. 89-93): It is an inexpensive source of protein used throughout China. How to deep-fry it. Fried tofu with vegetables and cooked meat. Stuffed bean curd (use "firm Chinese bean curd").

Soy-related recipes: Cantonese roast duck (with bean sauce, p. 171). Peking duck (with hoisin sauce, p. 176-85). Chinese beef stew (with "2 cubes fermented red bean curd," p. 217-19). Steamed fish with black beans (with "2 tablespoons fermented black beans," p. 231-32). Braised Sichuan fish (with dark soy sauce, and "1 tablespoon bean sauce," p. 233-35). Shrimp in lobster sauce (with fermented black beans and thin soy sauce, p. 261-62). Clams with black beans (with "2 tablespoons fermented black beans, coarsely chopped," p. 273-74). Sizzling rice soup (with "4 small cakes Chinese bean curd, cubed, rinsed in cold water," p. 327-28). Address: 1. Chinese cooking school teacher, California; 2. Food and wine writer for *San Francisco Examiner*.

5367. Immegart, Mavis; Dansby, Patti Jon. 1981. The incredible tofu cookbook: California style. Published by the authors, P.O. Box 1145, Yorba Linda, CA 92686. 128 p. Illust. No index. 22 cm. Spiral bound.
• ***Summary:*** Contents: What is tofu. Storing tofu. Freezing tofu. Thawing frozen tofu. Drying tofu. Restoring freshness. Diet food. Types of tofu. Dips, appetizers, misc. Soups. Salads. Main dishes. Breads. Not just desserts. Helpful hints. Equivalents. Substitutions. Baking pan substitutions. Cooking at high altitudes. Contains many recipes. A color photo on the rear cover shows Mavis and Immegart and Patti Jon Dansby. Address: Yorba Linda, California.

5368. Jaffrey, Madhur. 1981. Madhur Jaffrey's World-of-the-East vegetarian cookery. New York, NY: Alfred A. Knopf, Inc. 461 p. Illust. by Susan Gaber. Index. 20 x 20 cm. A second edition was published in 1983 in London by J. Cape.
• ***Summary:*** The Indian woman author of this creative book presents 21 recipes for bean curd (tofu), 7 for tempeh, and some for yuba and miso. Green soy beans with sauce (p. 7). Cabbage with miso (p. 15). Eggplant slices with white miso (p. 22-23). Fresh soy beans, steamed (p. 57). Spinach with fermented bean curd (p. 59). Stuffed yellow squash (with

© Copyright Soyinfo Center 2013

yuba, p. 62-64). Pecel (Vegetable salad with spicy peanut sauce, plus tofu and tempeh; p. 73-74). Tempura (with tofu; p. 75-77). Soy bean sprouts (how to grow; p. 100). Soy-bean and mung-bean sprouts seasoned with sesame oil (p. 105). Tempeh, Fried tempeh, Fried, preseasoned tempeh, Sambal goreng tempeh kering (Sweet and sour tempeh), Tempeh cooked in coconut milk (p. 108-110). Thai fried rice (with Red Bean Curd or Nam Yee [red fermented tofu]; p. 150-51).

One chapter (p. 160-89) is titled "Soy milk, bean curd, and wheat gluten." Making your own soy milk. Making your own bean curd. Udofu (*Yudofu*, simmering bean curd with seasonings). Bean curd with watercress. Korean-style bean curd in a hot water bath. *Hiya-yakko* (Chilled bean curd). Bean curd with Chinese parsley. Bean curd with broccoli. Cabbage cooked with bean curd. Bean curd with a deliciously spicy sauce. Carrots and beans with bean curd dressing. Bean curd, mushrooms, and peanuts in hoisin sauce. Sautéed bean curd. Tofu dengaku (Toasted bean curd with a miso topping). Fried bean curd cubes, soy-bean sprouts sautéed with fried bean curd. Fried bean curd with a sweet-and-sour sauce. Fried bean curd cakes with a mustard surprise. Inari-zushi ("Bags" of fried bean curd stuffed with sushi rice). Pressed bean curd with cabbage. Salad of pressed bean curd, mung-bean sprouts, and agar-agar. How to make fried and baked wheat gluten balls (plus 5 gluten recipes). Buddha's delight (with yuba and fried bean curd).

Chawanmushi (Steamed savory custards, with tofu; p. 192-94). Omelette with bean curd (p. 198-99). Soy sauce eggs (p. 209). Paneer (milk cheese; p. 237-40). Hot or cold noodles with a soy-sauce dressing (p. 248). Noodles with a hot-and-sour bean sauce (p. 250). Vegetarian mee krob (Crisp noodles with pressed bean curd and eggs, from Thailand, p. 255-56). Noodles with quail eggs, mushrooms, spinach, and yuba (Japan; p. 256-57). Hoppers (yeast pancakes from Sri Lanka). Roti (Flat whole-wheat bread). Delicious stock made with soy-bean sprouts. Clear soup with enok mushrooms, bean curd skins [yuba], and spinach (p. 297). Clear soup with soft bean curd and celery cabbage (p. 298). Miso soup with bean curd (p. 307). Miso soup with carrots and mushrooms (p. 308). Fried, munchable soy beans [soynuts] (p. 321-22). Potato and tempeh patties (p. 339). Dipping sauces (with soy sauce; p. 357-59). Kombu relish (with soy sauce, p. 374). Shoyu daikon (White radish pickled in soy sauce). Ginger quick-pickled soy sauce (p. 375). Aomidaikon (Quick pickled small white radishes, with slightly sweet yellow miso; p. 377-78). Chinese-style jellied bean-curd sweetmeat with a peanut topping (p. 399-400).

General information (p. 418-36; lots on soyfoods, see: bean curd [regular, fried, fermented (Nam Yee), pressed, pressed seasoned], kochu chang [jang], miso, soy-, tempeh, yuba). Sources (of ingredients; p. 437-40). Address: New York City, NY.

5369. Kloss, Jethro. 1981. Back to Eden: A human interest story of health and restoration to be found in herb, root, and bark. Loma Linda, California: Back to Eden Books. xxxii + 684 p. Illust. Index. 18 cm. Kloss Family Heirloom Edition. • ***Summary:*** One of the most creative and original sources of early soyfoods recipes, which include "Soybean Cream" and "Soybean Ice Cream." This revised edition contains the complete original text of this classic work on healing herbs, home remedies, diet, and health–plus 16 pages of new family recollections by Jethro Kloss' daughter, son, and granddaughter at the beginning of the book, and 16 pages of previously unpublished photographs in the middle of the book. This edition was first copyrighted in 1972. The book has been published continuously by the Kloss family since 1946. A blurb on the cover of the 1981 printing (which retails for $2.95) states: "Two million copy bestseller. The complete original text [with the same page numbers]. New family additions!" A color illustration by Harry Anderson shows a man and woman seated by an idyllic river, surrounded by birds and animals, in the Garden of Eden. The rear cover states that this is "The heirloom authorized Kloss family edition."

The contents of the book, except for the new sections mentioned above, are identical to the original 1939 edition. But the recollections of Jethro Kloss by his children and granddaughter contain a wealth of new and interesting information. The recollections by his daughter Promise Kloss Moffett note: "My father was born on a large farm near Manitowac, Wisconsin, on April 27, 1863. The ninth of eleven children born to his pioneering parents lived a healthy and happy life in that primitive Indian country...

"When he was about twenty, he went to Florida and worked in the orange groves, finally owning a large grove at Deland. Later he attended school in Nebraska and then in Battle Creek, Michigan. While in Battle Creek he worked closely with the then revolutionary medical leadership of the world-renowned Battle Creek Sanitarium. He saw clearly the disastrous results of the use of dangerous drugs then prevalent in caring for the sick. He developed further his own philosophy and understanding of the laws of nature...

"He was married March 5, 1900 to Miss Carrie Stilson, who had trained as a Bible worker and teacher and had labored in a mission in Madison, Wisconsin and taught several terms of grade school. At that time he was a licensed minister in Wisconsin and they established their home at Rose Lawn. Two children were born to this union, Promise Joy and Paul, who died when only four weeks old of whooping cough. During these years, besides my father's ministerial work, my parent's operated a branch of the Battle Creek Sanitarium and also sold Battle Creek Sanitarium health foods. My mother died in July of 1905.

"In March, 1907, my father married Mrs. Amy Ponwith, a widow with a small daughter, Mabel. My father and step-mother owned and operated an attractive sanitarium in pleasant surroundings in St. Peter, Minnesota, which they

© Copyright Soyinfo Center 2013

named *The Home Sanitarium*... Their daughter Lucile was born here in St. Peter in 1908 and their son, Eden, in 1910.

"Next the Kloss's became interested in the self-supporting work being conducted in the south and visited some of the schools in North Carolina and Tennessee. About 1911 they sold the sanitarium in Minnesota and moved to Fountain Head, Tennessee, where their youngest daughter, Naomi, was born in 1913. Here they bought a 250 acre farm, built a large house and barn, and raised many kinds of fruits and vegetables...

"A later development in good health was his creation of a significant health food manufacturing operation in Amqui, Tennessee after receiving a call from them to take charge of their food factory...

"Before this factory was sold to the Nashville Agricultural Normal Institute he was shipping health foods all over the United States and Canada. It was during this time at this place that he originated many new health food recipes. This establishment later became a part of what has since become the well-known Madison College near Nashville, Tennessee.

"Our next move was to Brooke, Virginia where [in 1921] papa established a health food factory and retail market. Each of us children was pressed into service in one way or another with this family enterprise. At times we would be helping with some food experiment, or perhaps in typing and retyping the material that later became *Back to Eden*, which was many years in preparation. Jethro Kloss's son Eden was for many years his right hand helper. Whatever my father did in spreading the gospel of health and natural living, he did with all his might and trained his children in that same pattern of living...

"One of my favorite memories as a family is the daily worship hour when Father would gather his family of seven about him and we would sing hymns, read Bible verses around the circle, and pray together. He was a gentle but firm family leader.

"Although a strict disciplinarian, my father was warm-hearted and affectionate–devoted to his family. When he was away from home, we invariably received a letter from 'papa' every day...

"Eventually this health food factory at Brooke, Virginia was taken over by my step-sister, Mabel and her husband.

"The Kloss's then moved to Washington, D.C. and carried on his work of treating the sick, lecturing on health and a more intensive study of herbs and preparation of his book, *Back to Eden.* I still have in my possession an attractive menu... for a Demonstration Dinner he gave March 27, 1933, at the Dodge Hotel in Washington, D.C. The menu was completely vegetarian and included 'Sweetbreads a la Kloss.' The pumpkin pie and strawberry sundae were made with soy milk...

"*Back to Eden* was at last published in 1939, the fruition of much toil and sacrifice for many years by the entire Kloss family... [Jethro's] wife Amy [Pettis] Kloss died in 1944 at Fredericksburg, Virginia...

"In 1945 papa became acquainted with Mr. and Mrs. Deloe Robert Hiatt on a trip to Madison, Tennessee. Together they found a property at Coalmont, Tennessee, where the Hiatts took over the promotion and publication of *Back to Eden*... [Jethro] peacefully went to sleep in June of 1946, his eighty-fourth year [but he was age 83], and today rests in a little cemetery in Tennessee."

The recollections by his son, Eden, note: "I was born in St. Peter, Minnesota, on February 10, 1910, to Jethro and Amy Kloss... After the move to Tennessee, my parents developed a plant for the manufacture of a line of vegetarian meat substitutes, cereals, crackers, and other items, at Amqui, near Nashville. (Our business was called the Nashville Sanitarium Food Factory.) Many of my early memories center on that large two-story factory, where raw materials were transformed into good-tasting, healthful food products...

"My father was an untiring worker. He would be up hours before the rest of the family–building fires, starting cracker dough, and making everything ready so that the work could go full speed ahead when the workers arrived in the morning... One day when Eden was burned while canning tomatoes, Jethro rushed him to the Madison Sanitarium for treatment. Kloss also made gluten there.

"When I was nine or ten years old, the factory was sold to the private school at Madison and transferred to that campus, and our family traveled in our pickup truck, camping en route, from Tennessee to Virginia. Here, at a town named Brooke, we found an ideal location–a plot of ground with a building in which we could make and sell health foods and teach people about healthful living...

"It was here at Brooke, Virginia, that Papa started to put in uncounted hours working on the beginnings of his book, *Back to Eden.*

"After some years, my oldest sister and her husband took over the food factory, and my parents moved to Takoma Park (on the outskirts of Washington, D.C.)...

"Papa's travels to give lectures and food demonstrations took him to places like Miami, Florida, and Houston, Texas."

There are also recollections by his granddaughter, Doris Joyce Kloss Gardiner. In about 1939-40 she used to be with her grandparents when they visited relatives in Falmouth, Virginia, just north of Fredericksburg. There she helped make soymilk: "Nor was I happy to stand at the stove stirring and stirring large kettles of soybean milk (so the milk wouldn't stick and be scorched)–a laborious and time-consuming process. But Grandpa's soybean milk was delicious, and so were the twenty or so other soy products that he originated and produced–including meat substitutes and soybean bread, butter, cheese, and ice cream...

"Often Grandpa would prepare soybean ice cream to serve at the close of his lectures or cooking demonstrations.

© Copyright Soyinfo Center 2013

One of my favorite treats was to lick the paddle from the ice-cream freezer before we left home to go to the lecture...

"Grandpa and Grandma Kloss died when I was in my mid-teens." The frontispiece (facing the title page) is a portrait photo of Jethro Kloss. An original of this photo was sent to Soyfoods Center in 1985 by Doris Kloss Gardiner of Loma Linda, California. On the 4th page of photos in the center section is an ad by "Kethro Kloss Health Food Company, Brooke, Virginia." Photos show two hand grinders, a large-scale gas-fired pressure cooker, a large stove-top pressure cooker, and a hand scaler. The text begins: "We manufacture a large line of health foods." In 1921 Kloss opened this health food factory in Brooke, VA, and it as on this site that he began writing *Back to Eden.* Address: P.O. Box 1439, Loma Linda, California 92354.

5370. Kloss, Jethro. 1981. The Back to Eden cookbook. Loma Linda, California: Back to Eden Books. 159 p. Illust. by Daniel Guild. Index. 22 cm.
• ***Summary:*** The yellow cover of this 1981 edition ($2.95) features a color illustration (by Harry Anderson) showing a man and woman seated by an idyllic river, surrounded by birds and animals, in the Garden of Eden. The cover text states: "From the renowned author of Back to Eden. This is a golden treasury of recipes and priceless information on natural foods for health and healing. Based on the work of the late Jethro Kloss. Published under the supervision of Promise Kloss Moffett and Doris Kloss Gardiner. The copyright page of the 1981 printing states that the book is published and distributed by Back to Eden Books, P.O. Box 1439, Loma Linda, California 92354. The book is copyrighted by Doris Kloss Gardiner, Promise Kloss Moffett, and Eden P. Kloss. The book was previously published by Woodbridge Press under ISBN 0-912800-05-4.

Contents: Jethro Kloss... Pioneer nutritionist. Return to Eden... Return to happiness. Soy milk, cheese, butter, and cream. Nut milk, cheese, butter, and cream. Main dishes. Using sprouted seeds (including soybean sprouts). Bread... A health food. Life-giving breads. Natural breakfast foods. Soups... Total nutrition. Salads and dressings. Vegetables. Sauces, seasonings, and spreads. Desserts for health. Coffees, teas, and broths (including a recipe for making soybean coffee at home, p. 151).

The chapter titled "Nut milk, cheese, butter and cream" has recipes for: Nut milk (made from raw peanut butter). Nut cheese (from raw peanut butter and soy butter). Dieters nut cheese (from raw peanut butter). Malted nut cream (from raw peanut butter and malt powder). Superb peanut butter. Blanched peanut butter (add water to make into milk or cream). Simple peanut butter. To blanch peanuts. Nut meal. Nut butter cream (add warm water to nut butter).

Photos (p. 6 and 9) show: daughter Promise Kloss Moffett, son Eden Kloss, and granddaughter Doris Kloss Gardiner. Address: P.O. Box 1439, Loma Linda, California 92354.

It was pirated and produced by L'Entrepôt Coopératif L'Engoulevent, 320 rue St-Roch, Quebec, G1K 6S2. Phone: (418) 522-3347. 2,000 copies were printed in 1991. Address: Quebec, Canada.

5373. Legume, Inc. 1981. Who says rich, creamy foods have to be high in cholesterol & calories? (Leaflet). 150 Bloomfield Ave., Verona, NJ 07044. 1 p. 28 cm.
• ***Summary:*** "All Legume Protein Products are made with Tofu and No sugar, No artificial additives, No preservatives, No eggs, No cream, and are 100% natural. Best of all, they're delicious. Product list: Tofu Country Pies (Tofu Spinach, Tofu Broccoli), Assorted Tofu-Bran Muffins (Blueberry, Raisin, Carrot, Banana), Tofu "No-Cream" Pies (Banana, Coconut, Strawberry), Tofu Carrot & Tofu Banana cakes." An illustration (line drawing) shows Legume's many products.

Interview with Chandri Barat. 1988. Oct. 28. This leaflet was printed in early 1981, shortly before they met Celentano. All these products were shipped frozen, nationwide. Address: Verona, New Jersey.

5374. Leviton, Richard. 1981. Tofu. Colrain, Massachusetts: Published by the author. 19 p. Unpublished manuscript. 28 cm.
• ***Summary:*** Each page contains a large photo (mostly color) with a caption below explaining it. There are photos of: Nasoya Organic Tofu. Richard and Kathy Leviton and Tom Timmins behind a round cooling tank of tofu at New England Soy Dairy.

Packaging tofu at Victor Food Products in Canada. The production process used for tofu at Tomsun including soaking, grinding, cooking in a triple compartment steam cooker, separation of soymilk and okara, coagulation, pressing of the curds, manual cutting of the tofu, cooling the tofu in water in a long stainless steel cooling tank. Four photos of tofu recipes. Address: Colrain, Massachusetts.

5375. Lugay, J.C.; Kim, M.K. 1981. Freeze alignment: A novel method for protein texturization. In: D.W. Stanley, E.D. Murray, and D.H. Lees, eds. 1981. Utilization of Protein Resources. Westport, CT: Food & Nutrition Press, Inc. 403 p. See p. 177-87. Chap. 8. [7 ref]
• ***Summary:*** "The two most common methods for protein texturization are spinning and extrusion. A new texturization process is described here involving freezing a protein dispersion to generate fibrosity, followed by removal of water by freeze drying to maintain the integrity of the frozen structure and heat-setting the protein to stabilize the structure. The use of the freezing method to produce textured protein is not new. It is a tradition practiced in Japan in the preparation of Kori-tofu... This product, however, is spongy rather than fibrous and, therefore, does not resemble meat...

"Freeze-aligned soy milk: To prepare a texturized soy protein product having highly oriented, well-defined fibers, a soy milk (having a protein concentration of 2-25%) is used as a protein source." The pH of the soymilk is adjusted to 7.5 using 2N sodium hydroxide and an antioxidant is added to the soymilk at a level equivalent to 0.02% of the fat content. The soymilk is "then placed in an aluminum pan to a depth of about 1 in. The pan is placed on a block of dry ice (-76ºC) which extends across the entire bottom surface of the pan. Unidirectional ice crystals, substantially perpendicular to the bottom of the pan, are generated. The mass is completely frozen in about 30 min. The mass is then freeze-dried immediately to prevent rearrangement of the ice crystal structure. After freeze-drying, the fibrous structure is stabilized by heat treating with moist heat at 15 pounds per square inch gauge for about 10 min. The heat-set fibrous mass is then rehydrated by soaking in water for about 20 min to yield a product having discrete long, soft and chewy fibers or sheets."

A number of very interesting photographs and photomicrographs show the product at various stages in its preparation. Address: General Foods Corp., Technical Center, 250 North St., White Palins, New York 10625.

5376. Madlener, Judith Cooper. 1981. The sea vegetable gelatin cookbook and field guide. Santa Barbara, California: Woodbridge Press Publishing Co. 154 p. Illust. Index. 15 x 21 cm. [51* ref]
• ***Summary:*** This cookbook and field guide for foraging contains 200 gelatin recipes with no animal-based gels for gourmet, kosher, or vegetarian dining with a flair.

Soy-related recipes include: Cold tofu in lemon jelly (p. 80). Tofu chunks in aspic (p. 86). Cold tofu mousse (p. 87). Jellied Japanese tofu (p. 95; tofu is called "soybean cake"). Contains a good bibliography. Address: P.O. Box 5560, Elmwood Station, Berkeley, California 94705.

5377. Marks, Copeland; Soeharjo, Mintari. 1981. The Indonesian kitchen. New York, NY: Atheneum. 278 p. Illust. Index. 22 cm. [2 ref]
• ***Summary:*** "'This is to my mind, the best and most easily followed of all the books on Indonesian cooking. And I would certainly rank Indonesian cooking among the greatest on earth.' Craig Claiborne, Food Editor, The New York Times" (rear cover).

Soy related: Spices–"Sweet soy sauce, which you can make at home (see p. 237-38)" (p. 13). Barbecued chicken in sweet soy sauce (Ayam Panggang kecap, Tuban, Java, p. 86-87. "Sweet soy sauce [kecap manis], reconstituted from a dark Chinese soy sauce with caramelized sugar and various spices added, must be considered the most popular and universally accepted of Indonesian flavorings"). Beef stew with sweet soy sauce (Karangmenanci, Java, p. 98-99).

Vegetarian recipes: Stuffed soybean cake (Tahu isi, Jakarta, Java, with "4 Chinese soybean cakes" [tofu], p. 120-21). Eggplant in sweet soy sauce (Semur terong, Java, p. 155). Happy heart (Suki hati, Java, with 3 Chinese-style soybean cakes [tofu], p. 160-61). Bean cake in mixed spice sauce (Bumbu rudjak tahu, Wonosobo, Central Java, with tofu, p. 161-62). Soy bean cake fry (Tahu kering, East Java, with "4 Chinese soybean cakes" [tofu], p. 163-64). Fried soybean cake with peanut dressing (Tahu goreng, Kediri, East Java, with "4 Chinese soybean cakes," p. 164-65). Fresh vegetable salad with soybean cake (Asinan, Jakarta, Java, with "2 Chinese soybean cakes [tofu], boiled in water for ten minutes and drained, p. 197-98).

Beef and soybean cake fritters (Perkedel tahu, Java, with "2 Chinese soybean cakes [tofu], mashed, p. 215-16).

Bean cake fritters (Tahu perkedel, Java, with "2 Chinese soybean cakes [tofu], mashed, p. 218-19). Soybean cake omelet (Tahu telor, Java, with "2 Chinese soybean cakes [tofu], cut into 1-inch cubes," p. 235).

Sweet soy sauce (Kecap manis, all Indonesia, p. 237-38. "The homemade sauce based on this recipe is infinitely superior to the store-bought brands found in Chinese and Southeast Asian food shops." Ingredients: 2½ cups sugar, 2.75 cups Chinese dark soy sauce, 3 cloves garlic, ½ teaspoon star anise pods, 2 salam leaves, 2 pieces laos, ½ cup water. Do not strain sauce after cooking since all ingredients continue to provide flavor. Makes about 2.75 cups. Keeps for several months refrigerated). Rijsttafel (with sweet soy sauce, p. 256-59). Address: 1. Textile importer, Brooklyn Heights, New York; 2. Central Java, Indonesia.

5378. McCallum, Cass. 1981. The real food guide. Vol. 2: Pulses, grains and seeds. Glasgow, Scotland: The Molendinar Press. 196 p. Index. 20 cm.
• ***Summary:*** The section on "Anti-nutritional factors in pulses" discusses those found in many legumes (such as haemagglutinins, trypsin inhibitors, phytic acid, flatulence factors) and those of importance in specific legumes; for soybeans, only heat-resistant trypsin inhibitors are mentioned. The section on "Basic bean cookery" gives

© Copyright Soyinfo Center 2013

general guidelines and tips (never add salt until beans are cooked tender). A table (p. 54) shows that soybeans require the longest cooking time of any bean listed.

The section titled "A-Z pulses" gives details (incl. the scientific name) concerning many legumes listed alphabetically. Includes adzuki, kura mame [sic, kuro mame = black soybeans] (p. 65), and winged beans. By far the longest section is on soy beans (p. 71-82). Contents: Introduction. Nutritional values. Dried soy bean products: Soy grits, soy coffee, soy flour (full fat, medium fat, fat free), soy nuts, soy milk, soy yolk (a concentrated form of soy flour), textured vegetable protein, soy splits, tofu powder. Fermented soy bean products: Black beans–fermented, chao, chee-fan, chiang (Chinese miso), Hamanatto, ketjap, koji, meitauza, miso, mame miso, Hatcho miso, kome miso, mugi miso, natto, okara. Soy sauces: Introduction, Chinese soy sauce, ketjap, synthetic sauce, tamari. Sofu [sic, sufu], tahuri, tamari, tao-cho, taokoan or tao koan, taotjo or tao dji [sic, taotjo is Indonesian-style miso; tao dji are Indonesian fermented black soybeans], tempeh, tofu. Tofu from whole beans (homemade recipe). Tofu from powdered [soy] milk.

The part titled "Recipes" (p. 129-92) is divided into three sections. Soy-related recipes in each are listed here: (1) Soups and starters: Iced tofu (p. 134). Miso soup (p. 138). Adzuki bean soup (p. 141). (2) Main dishes: Deep-fried tofu (p. 167). Szechuan bean curd (p. 168). (3) Bread, side dishes, sauces and desserts: Miso lemon sauce (p. 186). Miso ginger sauce (p. 187). Peanut butter (homemade recipe, p. 191).

The rear cover states: "These books fight a war against junk food–and win." The author is a woman.

Note: This is the earliest English-language document seen (April 2013) that uses the word "tao koan" (or "tao-koan") to refer to tofu. Address: United Kingdom.

5379. Mintz's Buffet. 1981. Glatt kosher cookery and catering–Menu. 1040 Third Ave. (between 61st & 62nd Streets), New York, NY 10021. 4 panels each side. Each panel: 28 x 14 cm. Undated.
• ***Summary:*** Printed with brown ink on beige paper. This menu includes prices. Contents: Front 4 panels: Appetizers. Hors d'oeuvres & party snacks. Home made soups. Salads. Entrees: Poultry, beef, veal, fish. Side dishes. Quiches and Moussakas. Nosh department. Deli-by-the-pound. Custom-made sandwiches. Specialty sandwiches. Slim gourmet department. From Mintz's freezer. Beverages and fresh squeezed juices. Desserts from Mintz's bakery [no ice cream].

Back 4 panels: An affair to remember (catering service). Specialties from Mintz's vegetarian kitchen: Hors d'oeuvres (incl. Bean curd spinach snacks). Salads (incl. Mushroom salad with creamy tofu). Meatless entrees (incl. Cucumber and creamy spiced tofu). Address: New York City. Phone: 212-751-9367.

5380. Natural Messages Co. 1981. Tofu egg-less salad: You'll hardly believe it has no eggs! (Tear-off recipe pad). Boston, Massachusetts.
• ***Summary:*** The ingredients in this popular recipe are: 1 lb tofu. ¼ to ½ cup mayonnaise. 2 teaspoons prepared mustard. ¼ teaspoon garlic powder. 1 green pepper, minced. 1 rib celery, chopped fine. ½ teaspoon salt. Pepper to taste 2 or 3 scallions, or 1 small onion, minced (optional). 1/8 teaspoon turmeric (optional). ½ teaspoon soy sauce (optional). Address: 74 McBride Box 226C, Boston, Massachusetts 02130-0226.

5381. New England Soy Dairy Inc. 1981. Put time on your side, with the Soydairy 28 day shelf life advantage (Poster). 305 Wells St., Greenfield, MA 01301. 1 p. 28 x 22 cm. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.
• ***Summary:*** A green snipe in the upper right corner proclaims: "Announcing Soydairy pasteurized tofu." A photo shows the water-packed tray with a printed film label. As of 15 Sept. 1981 all Soydairy tofu will bear a 28-day open date on all its packages. Address: Greenfield, Massachusetts.

5382. New England Soy Dairy Inc. 1981. Fresh & light: Summer salads with soydairy tofu (Poster). 305 Wells St., Greenfield, MA 01301. 1 p. Undated. 17 x 41 cm.
• ***Summary:*** A large color sideways photo shows crumbled tofu, cherry tomatoes, sliced mushrooms and cucumbers, asparagus heads, and alfalfa sprouts against a bed of lettuce. In the lower right corner is a small inset color photo of two water-packs of Soydairy Tofu, one soft style and one firm style. The text by the inset photo reads: "Look for free recipe cards on package. 90 calories per 4 oz. serving of soft tofu. 150 calories per 4 oz serving of firm tofu." Address: Greenfield, Massachusetts.

5383. New England Soy Dairy Inc. 1981. Try Soydairy tofu (Poster). 305 Wells St., Greenfield, MA 01301. 1 p. Undated. 21 x 41 cm.
• ***Summary:*** This large, colorful sideways poster is divided into three parts. On the left one-third is a color photo of three prepared tofu dishes on a dark brown background. They are: A chocolate parfait with a whipped tofu topping in a stem parfait class. A green salad topped with mashed tofu and cherry tomatoes. A tofu quiche.

The right two-thirds is bold brown text on a yellow background. It states: Guaranteed fresh: Only tofu pasteurized for purity. Easy to use: Free Soydairy recipes. Lowest calorie tofu: Soydairy soft tofu. Highest protein tofu: Soydairy firm tofu.

In the lower right corner is a small inset color photo of two water-packs of pasteurized Soydairy Tofu, one soft style and one firm style. On the front of each is a stylized green soybean leaf, each with three leaflets. Address: Greenfield,

Massachusetts.

5384. Nordquist, Ted; Ohlund, Tim. 1981. Tofu-boken [The tofu book]. Orsundsbro, Sweden: Aros Sojaprodukter. 52 p. Illust. No index. 22 cm. [Swe]
• ***Summary:*** This is Sweden's first book about tofu. The cover is black on yellow with illustrations of a soybean plant and of a tofu-making kit. Contains many recipes. Four blue-and-white photos (p. 51) show: (1) Tim Ohlund grinding the soybeans using a modern mechanical grinder. (2) Ted Nordquist pressing the soymilk, using an hydraulic press. (3) Ladling the curds into a cloth-lined forming box before they are pressed. (4) Ted lifting ca. 12 kg of finished tofu in a stainless-steel forming box into a sink of cold water. Address: Orsundsbro, Sweden.

5385. Omae, Kinjiro; Tachibana, Yuzuru. 1981. The book of sushi. Tokyo, New York and San Francisco: Kodansha International Ltd. Distributed through Harper & Row. 127 p. Foreword by Jean-Pierre Rampal. Illust (some color; 40 color plates). Index. 27 cm.
• ***Summary:*** Shôyu (soy sauce) is discussed in depth on pages 99-100. The section titled "Sushi shop vocabulary" (p. 20) states that *murasaki* refers to soy sauce, which is usually called "shoyu."

The section on "Materials" (p. 56) states that soy sauce is absolutely essential to sushi–as essential as rice, rice vinegar, wasabi (nose-tinglingly sharp when freshly grated), pickled ginger, nori, and tea.

Natto and tofu (p. 49) are mentioned as sushi ingredients. Address: 1. Former chairman, Tokyo Sushi Assoc., then president of the Federation of Japan Sushi Shops.

5386. Omura, Yoshiaki. 1981. The tofu-miso high efficiency diet. New York, NY: Arco Publishing, Inc. xvi + 221 p. Index. 21 cm. [70 ref]
• ***Summary:*** Contents: Acknowledgments. Foreword. A natural, balanced diet for health, weight loss, and longevity. 1. The benefits of a diet based on traditional Japanese foods. 2. How being overweight affects your health. 3. Why certain foods? What is needed to maintain health (The key concept is balance). The diet plan: Changing your eating habits. 4. What is misoshuru? Miso, tofu, and seaweed. 5. The first two weeks: Rapid weight loss. 6. The third week: Transition. 7. The maintenance diet. How to calculate your individual calorie requirements. Food plan. Adapting Japanese foods and cooking methods. 8. Representative Japanese and American menus. 9. Japanese foods and how to shop for them. 10. Some Japanese cooking methods which you can adapt to American foods. 11. Some recipes for Japanese dishes. Changing your lifestyle. 12. Exercise. 13. The mental side of losing weight: How your mind can help your body. Appendices: 1. Charts and records for your personal use. 2. Nutritional information on miso, tofu, seaweed, and green tea. 3. Vitamins. 4. Distributors of Japanese foods. Bibliography: Cookbooks and foodbooks, nutrition books and articles, books in Japanese, books and articles on health and weight control by alternative approaches. Notes.

5387. Osman, Jack D. 1981. Thin from within: Vegetarian edition. Washington, DC: Review and Herald Publishing Association. 159 p. 21 cm. [31+ ref]
• ***Summary:*** Discusses the psychological aspects of losing weight via a low-calorie, vegetarian diet. Page 102 lists soybeans as a good source of iron; 2 tablespoons provide 2.0 mg. Page 130 lists soybeans and tofu as good iron sources. Address: Towson, Maryland.

5388. Photograph of various types of Chinese and Japanese of soy sauce sold in the San Francisco Bay Area. 1981.
• ***Summary:*** Back row (left to right): Superior Soy, Longevity Brand Soy Sauce, Superior Soy, and Westbrae White Tiger Tofu Sauce. The first three brands are Chinese style.

Front row (L-R): Westbrae tamari, illegible, Kikkoman soy sauce in table-top dispenser, illegible. Longevity Brand Soy Sauce.

The Chinese brands were purchased in San Francisco Chinatown by William Shurtleff, who also shot the photo at home on Mountain View Dr. in Lafayette, California.

5389. Sakaguchi, Koichi. 1981. Tomago no okazu, tôfu no okazu 500 sen [500 selected egg side dishes and tofu side dishes]. *Kamakura Orange Series* No. 2. 274 p. Illust. Index. 26 cm. (Kamakura Shobo, Tokyo). [Jap]
• ***Summary:*** Contents: Recipes–Eggs: Omelet, frying, boiling, tojiru, poaching, scrambling, steaming, raw, soups (Japanese, western, Chinese styles), sandwiches, drinks, lunch ideas, good cooking information–Do you know about eggs? Tofu: Raw, sauteed, stir-fried, fried, cooked in sauce, steamed, salads (*aeru*), soups (Japanese, western, Chinese styles), broiled, okara, deep-fried pouches, koya-dofu, deep-fried, ganmodoki (tofu burgers), good cooking information–Do you know about tofu? Writing about my challenge in tofu making. How to make menus.

American Linda Barber is mentioned on page 242.

peanuts with garlic. Note 1. Soybean is not mentioned here.

"Kècap manis–Indonesian sweet soy sauce." Note 2. Plain Indonesian soy sauce is not mentioned here.

Note 3. Kedelai, kedelé–Not listed.

"Tahu–bean curd. Tahu pong–bean curd cut into small pieces and baked until it pops up. Tahu tempe–a side dish of tahu and tempe."

Note 4: Tauco–Not listed.

"Témpé–a protein-rich cake of fermented soybeans. témpé bangsa–a small and insignificant nation. témpé pemuda–a good-for-nothing kid. témpé gembos–fermented beancake made from peanut residue."

The Preface begins: "The form of Malay used in the Indonesian archipelago was already different from peninsular Malay when, on October 28, 1928, a nationwide youth congress held in Jakarta named Bahasa Indonesia, the Indonesian language, as the national language. Since August 17, 1945, when Indonesia declared its independence, the language has changed rapidly, especially in the area of vocabulary." Address: 1. Freelance translator and author of many books and articles on the Indonesian language; 2. Prof. of Linguistics, Queens College and the Graduate Center, City Univ. of New York.

5391. Shandler, Michael; Shandler, Nina. 1981. The complete guide and cookbook for raising your child as a vegetarian. New York, NY: Schocken Books. xiv + 337 p. Index. 24 cm. [65 ref]

• ***Summary:*** On p. 22 soybeans and rice are used to illustrate protein complementarity. Fats survival plan (p. 70-71): Describes how to make clarified butter (ghee); it is superior to other fats for frying purposes and is not subject to the same polymerization as vegetable oils. "Eggs do not constitute a cholesterol risk," but "soy milk and tofu are... excellent high-protein substitutes for eggs if your children are allergic." Good sources of protein during pregnancy include beans, grains, tofu, gluten, dairy products, and soy products. Use complementary proteins together. Tofu can be blended into creamy salad dressings.

"Homemade soy milk is deficient in vitamin B-12, vitamin D, and calcium. Commercial soy drinks for infants [infant formulas] are fortified with these and other nutrients but often contain sugar and other detrimental additives" (p. 110).

"After approximately 1 month of eating solid foods, a second series of foods can be introduced to your infant." These may include puréed tofu or light miso soups (p. 116-17).

Soy-related recipes include: Whole wheat soy flakes (p. 206). Tamari broth with dumplings (and soy flour, p. 216). Nondairy cream of vegetable soup (with tofu, p. 216). Summer cucumber tofu soup (p. 218). Soyburgers (with whole soybeans, p. 222-23). Barbecued tofu sandwiches (p. 226). Tofu cheesie macaroni (p. 232). Tofu noodle casserole. Fried tofu over rice. Tomato tofu lo mien (p. 233-34). Tofu and rice seaweed rolls (p. 236). Pizza (with soy flour and gluten flour, p. 236-37). Creamed spinach with tofu (p. 254). Tamari-glazed "trees" (Broccoli, p. 255). Vegan dips (p. 264-65): Avocado tofu dip. Cucumber tofu dip. Nondairy dressings (p. 271-72): Tofu dressing. Nut and soy milks (p. 311-13): Fortified soy milk. Carob soy milk. Spiced soy milk. Almond milk. Cashew milk. Coconut milk. Tahini milk. Nondairy sandwich fillers (p. 320-21): Soy sandwich "meat" (with whole soybeans and tamari soy sauce). Tofu sandwich spread.

3. Surata Soyfoods (Eugene, Oregon).
4. Soyfoods Unlimited (San Leandro, California).
5. Community Food (Rimini, Italy).
6. Nature's Touch Soyfoods (Encinitas, California). 7. Bud, Inc. (Baltimore, Maryland).

5399. Stobart, Tom; Owen, Millie. 1981. The cook's encyclopedia: Ingredients and processes. New York, NY: Harper & Row, Publishers, Inc. xii + 547 p. Illust. 25 cm. [20 ref]
• ***Summary:*** Soy related entries include: Bean curd (incl. tofu). Bean-curd cheese [fermented tofu]. Bean paste and bean sauce (incl. Red bean paste) is sweet and made from adzuki beans. Yellow bean paste is made from soybeans and is salty and pungent. "Fermented salted black beans" is made from a black variety of soybeans; these salted black beans can be used to make "black bean sauce" which can be used as a flavoring in fish, lobster, chicken, and pork dishes.

Soybean (incl. soya bean, soja bean, flour {"pork soya links" used in Britain during World War II}, sprouts, soy oil, soy sauce, soymilk, vegetable yogurt [soy yogurt], vegetable cheese [soy cheese], tempeh, bean curd skin [yuba], miso, tamari, soy sauce, soy protein isolate, soy granules or grits, textured plant protein [textured soy protein]). The name in four European languages is given.

Soy sauce or shoyu (It "is said to be one of the ingredients of Worcestershire sauce." Incl. the "very heavy Indonesian *ketjap* {*ketjap manis or ketjap benteng*}, which is a type of soy sauce,..."). The name in four European languages is given.

Textured plant protein (a high-protein foodstuff manufactured from plants (soybeans, peanuts, wheat, cottonseed, etc.). "Originally it was aimed at the vegetarian market." Also called "textured vegetable protein" in the USA. Incl. textured soy flour, textured soy protein gel and fibers).

Worcestershire sauce: Begins with a history (starting in 1837) based on the fanciful story so widely known. "Thus was born what is probably the world's best-known and most ubiquitous bottled sauce, one which has become a standard ingredient." Note: How about soy sauce? "The exact formula is secret. Although it is much imitated, nobody seems to be able to get quite the taste of the original."

Also contains entries for adzuki, ketchup ("Javanese katjap [ketjap], for example, is a very sweet soy sauce"), peanut (groundut or monkey nut), pulses, seaweed, sesame seed, tahini.

Note: Millie Owen prepared the American edition of this book. Address: 1. Hassocks, Sussex, England; 2. Northfield, Vermont.

5400. Sunset menus & recipes for vegetarian cooking. 1981. Menlo Park, California: Lane Publishing Co. 96 p. Illust. Index. 28 cm.
• ***Summary:*** Written and compiled by the editors of Sunset Books and *Sunset Magazine,* this is a lacto-ovo vegetarian cookbook. In 1986 the title was shortened to simply *Vegetarian Cooking.*

Soy-related: Hot & sour soup (with "4 ounces tofu, diced" and "1 tablespoon soy sauce," p. 29). Soybean soup, bistro style (with "2½ cups cooked soybeans {page 49}," p. 30). Cooking beans, soybeans ("Strong-flavored, near-perfect protein source. Refrigerate while soaking. 3 to 3½ hours," p. 49). Sweet & sour soybeans (with "2½ cups cooked soybeans {page 49}," p. 51). Sesame tofu sticks (with "About 1 pound medium-firm tofu," and "Teriyaki sauce (recipe follows)," p. 59-60). Savory vegetables & tofu, p. 61. Vegetable sauces, Herbed tofu sauce, p. 69. 5401. Teraoka, Hisayuki; Morii, F.; Kobayashi, J. 1981. Shokuhin-chû ni fukumareru 24 shu no genso ryô oyobi ichi nichi no genso sesshu-ryô ni tsuite [The concentrations of 24 elements in foodstuffs and the estimate of their daily

© Copyright Soyinfo Center 2013

intake]. *Eiyo to Shokuryo* (*J. of Japanese Society of Food and Nutrition*) 34(3):221-39. See p. 232-35. [Jap]
• ***Summary:*** The 24 chemical elements whose concentrations are given are: potassium (K), phosphorus (P), magnesium (Mg), calcium (Ca), sodium (Na), iron (Fe), silicon (Si), zinc (Zn), manganese (Mn), aluminum (Al), copper (Cu), boron (B), strontium (Sr), lead (Pb), titanium (Ti), barium (Ba), nickel (Ni), vanadium (V), molybdenum (Mo), silver (Ag), cadmium (Cd), cobalt (Co), tin (Sn), and chromium (Cr).

Concentrations (in micrograms per 100 gm) of these elements were measured in the following soyfoods: Soybeans 1,200, tofu (momen/regular) 410 (average of 2 samples), tofu (natural foods, probably made with nigari) 280, tofu (kinugoshi/silken) 280, and natto 770.

These aluminum concentrations were about average compared with the other foods tested. Examples of foods with much higher aluminum concentrations were: kombu seaweed 33,000, tsukushi (a vegetable) 22,000, white sesame seeds 4,400.

Note: This is the earliest document seen (Aug. 2002) that gives the concentration of aluminum in soybeans or soyfoods. Address: Inst. for Agricultural and Biological Sciences, Okayama Univ., Kurashiki, Okayama, Japan.

5402. Tranggono, -. 1981. Studies on the stability of dried soybean curds. PhD thesis, Michigan State University. 161 p. Page 2294 in volume 42/06-B Dissertation Abstracts International. *
• ***Summary:*** Tofu was prepared by conventional methods and modified by addition of either sesame milk or ground sesame and air dried, frozen, aged, thawed and then air dried, dried frozen or freeze dried. Stability of the dried products with respect to lipid oxidation and non-enzymic browning were studied. Accelerated storage studies were conducted at 37ºC and 50ºC. Peroxide values, diene conjugated and thiobarbituric acid tests were used to follow oxidative changes in lipids. Results are discussed in detail. It is concluded that oxygen appears to be the primary cause of product deterioration. Optimum water activity for storage with respect to lipid oxidation and browning was 0.22. Loss of available lysine was correlated with browning (increased at high temperatures and in products with ground sesame). Address: Michigan State Univ.

• ***Summary:*** For production and use of high-protein, low-calorie tofu, tempeh, and soymilk. Contents: Section I. Introduction. 1. What soyfoods are. 2. Using soyfoods (recipes). Section II. Introduction. 3. Tofu box. 4. Pot-mount press. 5. Table-mount press. 6. Tempeh incubator. Section III. Blueprints. Address: Rodale Press, 33 East Minor St., Emmaus, Pennsylvania 18049.

5405. World of God. 1981. The cookbook for people who love animals. 2nd ed. Route 2, Box 98E, Brooksville, Florida 33512. 176 p. Edited by Butterflies. Illust. and cover design by Flowers. Recipe index. 26 cm. Spiral bound. The 4th edition was copyright in 1987. [31 ref]
• ***Summary:*** The top of the title page reads: “Over 300 totally vegetarian recipes. From beginner to gourmet. No meat. No eggs. No dairy. No honey.” At the bottom of the title page is a field of red and orange flowers, with butterflies around them, and a rayed sun overhead against a light yellow background. This is a good, spiral-bound collection of vegan recipes, which are straightforward, appetizing, and nutritious. Special section includes recipes for cat and dog food.

The book is interspersed with nice quotations about vegetarianism, veganism, and animal rights from great thinkers such as Longfellow, Emerson, Schopenhauer, John Gallsworthy, Jeremy Bentham, Cicero, Herbert M. Shelton, John Ruskin, John Stuart Mill, Tagore, Plutarch, Tolstoy, Cardinal Newman, George Bernard Shaw, Thoreau, St. Francis, Leonardo da Vinci, Harriet Beecher Stowe, Romain Rolland, and Friedrich W. Nietzsche.

The glossary of ingredients lists okara, soy powder, tamari, tofu. “Soy powder [whole soy flour]–Made from cooked soybeans, it contains all the natural oil of the soybean. Used in casseroles, sweets, and for making soy milk. It can also be used as an egg substitute. Use 1 heaping tablespoon soy powder and 2 tablespoons water in place of 1 egg.”

Recipes with soyfood terms in the title include: Quick instant soy milk (p. 12). Soy milk. Soy yogurt (p. 13, made from tofu, frozen and non-frozen bananas, etc; not fermented). Soy margarine (p. 13). Soy tofu. Scrambled tofu. Tofu cottage cheese (p. 14). Tofu cream cheese (p. 15). Bran

© Copyright Soyinfo Center 2013

muffins (with soymilk, p. 22). Most baked goods include soymilk in place of dairy milk. Miso soup (p. 37). Tofu eggless salad. Okara salad (p. 54). Tofu potato salad (p. 56). Tomato tofu salad (p. 57). Tofu tahini dressing. Blond miso dressing (p. 67). Orange tamari dressing. Soy mayonnaise (p. 68). Miso spread (p. 69). Hot miso dressing (p. 73). Tahini-tamari sauce (p. 75). Stuffed tomato with soybeans (p. 92). Tofu saute (p. 104). Potatoes with tofu. Noodle tofu (p. 105). Tofu bean-thread saute (p. 106). Matzoh tofu bake (p. 124). Soy burgers (p. 131). Okara cylinders (p. 132). Tofu cheesecake (p. 141). Carob tofu cream pie (p. 143). Recipes for dogs and cats: Okara delight (p. 163). Soybean mash (p. 164). Instant soybean-meal dinner (p. 165).

At the back is a 6-page section titled "The Spirit of Ahimsa" by H. Jay Dinshah, president of the American Vegan Society. It is excerpted from his books "Out of the Jungle" and "Here's Harmlessness."

Note: This is the earliest document seen (Sept. 2012) that mentions (or gives a recipe for) a nonfermented soy yogurt. Address: Brooksville, Florida.

5406. Yan, Martin. 1981. The Yan can cook book. Garden City, New York: Doubleday & Company Inc. 355 p. Illust.
• ***Summary:*** This Chinese cookbook, published in both hardcover and paperback, contains at least 15 recipes using bean curd (tofu), especially in the chapter titled "Bean Curd, Eggs, and Other Protein-Rich Foods" (p. 179-99). Tofu is usually referred to as "soybean curd" or "bean curd." Pages 185-87 contain a recipe for making tofu at home, and give a nutritional comparison of firm bean curd, chicken eggs, ground beef, and cottage cheese. In the chapter "Saucy Dips" is a recipe for "Black Bean Sauce" using "salted black beans" [fermented black soybeans].

The glossary (p. 313-) gives good descriptions of the following soyfoods: Black beans salted, brown soy sauce, Hoisin sauce, Hot bean paste, MSG (monosodium glutamate), soy sauce, bean curd, and soybean sheets dried (yuba).

The author is the star of a popular daily Chinese cooking show named "Yan Can," which he has hosted since 1978. Born and raised in Kwongchow, China, he left China in 1963 and began cooking at the age of 13 as an apprentice in a popular Hong Kong Restaurant (owned by his uncle) and at age 18 he had earned a diploma from the Overseas Institute of Cookery. Arriving in the USA in 1969, he earned a masters degree from the University of California at Davis.

5407. Yepson, Roger B. ed. 1981. Home food systems. Emmaus, Pennsylvania: Rodale Press, Inc. 475 p. Illust. Index. 29 cm. [15 ref]
• ***Summary:*** Extensive, positive information on soyfoods is contained in the chapters on Grains (and bread, see p. 35), Beans (p. 94-95, 99-115; tofu, tempeh), Sprouting (p. 120, 125, 127), Canning (p. 203), and The Home Dairy (p. 298; soymilk, soy yogurt). Reviews and photos of many soyfoods books are given, with a sample recipe from most.

Pages 298 notes: "Soymilk is low in riboflavin (vitamin B-2), totally lacking in vitamin B-12, and has drastically less calcium than dairy milk. On the other hand, soymilk is lower in carbohydrates, has 12% fewer calories, 25% less fat, no cholesterol, and contains 15 times more iron than cow's milk." Address: Emmaus, Pennsylvania.

• ***Summary:*** A good introduction to tofu and to *The Book of Tofu*, by Shurtleff and Aoyagi, "a definitive work..." Contains recipes for: Far East tofu soup. Greek tofu soup. Tofu burritos with Cheese sauce.

5414. MacCormack, Harry; Posner, Mia. 1982. Re: The soy dairy farm. Letter to William Shurtleff at Soyfoods Center, Jan. 14. 2 p. Typed, with signature on letterhead.
• ***Summary:*** "Yes, the soy dairy farm notion has taken hold." Sunbow has helped to start: 1. Colony Soy Dairy in Mt. Angel, Oregon. 2. Turtle Island Soy Dairy (Seth Tibbott). 3. A small operation near Boonesferry, Idaho. At last report they were making several hundred pounds of tofu a week. 4. A man named Sarvarhara did an apprenticeship with Sunbow last summer. He plans to set up a soy dairy on his peach farm near Coleville, Washington, later this spring. He is now travelling in Honduras where he is teaching organic farming. 5. John, who has been working at Sunbow for the past "two years, will be moving on in March to join with a group of people in the Cottage Grove area, farming with a soy dairy center. The latter two setups are modeled on our woodfired system, double boiler." Address: Sunbow Farm Products, Route 2, Box 46, Corvallis, Oregon 97330. Phone: (503) 929-5782.

5415. Sheridan, Margaret. 1982. Touring a tofu factory 6,000 miles east of the Orient. *Chicago Tribune.* Jan. 14. p. 1, 3.
• ***Summary:*** Tofu is on the rise in America, where there are now about 150 tofu shops. Although a growing number of supermarkets are now selling tofu, and more restaurants are serving it, it is still new to many Americans. There are four tofu factories in Chicago; this article is based on a visit to one of them, MU Tofu, run by Rebecca and Yoshihara Uchida. The word "MU" comes from her maiden name, Miller, two years ago, and his family name, Uchida. They met in 1977, when they both worked in the field of cameras. "A common interest, tofu and its manufacture, started to jell when he was transferred back to Japan. She followed, they married," and decided to start a tofu shop. So they apprenticed themselves to a tofu maker–who thought they were crazy. Describes how soft and firm tofu are made at MU Tofu. "Uchida believes tofu has the same marketing potential as yogurt." He believes it will become part of the American diet. Includes recipes for Tofu lasagna, Potato surprise, Cheese tofu dip, and Tofu carrot cake. A photo shows Yoshihara Uchida removing tofu from a metal forming box.

Note: This is the second earliest document seen (Feb. 1999) which compares the potential market for tofu with the current market for yogurt.

• ***Summary:*** This grain is the soybean, which is imported in huge quantities from the USA to Europe. The article discusses the soybean plant, tofu, miso, tamari and shoyu, tempeh, homemade soy sprouts, and yuba.

A photo shows Paul Simon, a specialist in macrobiotic food at Lausanne. He makes tofu in the traditional way using nigari, and serves it with tamari and ginger. "Fresh tofu, prepared on the spot, is difficult to find in Switzerland. In the French-speaking cantons of Switzerland, there are only two places: (1) The macrobiotic Center of Lausanne, 7 ruelle de Bourg, and (2) Le Grain d'Or, 7 rue Voltaire, Geneva." Recently a factory opened at Zurich, and another will open soon at Nyon. In the two macrobiotic restaurants of French-speaking Switzerland (Romandie), tofu is found regularly à la carte: at "The Bio" in Lausanne, and "La Moisson" in Geneva.

5422. *Vashon-Maury Island Beachcomber.* 1982. That tofu you bought can be saved. Jan. 28. p. 2.
• ***Summary:*** According to Washington state epidemiologist Dr. Jack Allard, Yersinia bacteria caused 23 instances of diarrhea and severe stomach cramps in Washingtonians last month. Half were hospitalized. Of the 23 people, 19 said they ate tofu in the previous two weeks and 16 of those thought it was Island Spring's tofu. Consumers are advised to cook tofu thoroughly. The company installed a $3,000 automatic continuous ultraviolet cold water purifier, filters, tanks of iodine dip, and a chlorinator for the water. Employees now must wear face masks and hair restrainers. Address: Washington.

5423. **Product Name:** Tofu.
Manufacturer's Name: American Soy Products. Renamed American Soyfood Industries.
Manufacturer's Address: 2222 Aisquith St., Baltimore, MD 21218. Phone: 301-235-5554.
Date of Introduction: 1982. January.
Wt/Vol., Packaging, Price: 20 lb tub and (later) 1 lb vacuum packs.
How Stored: Refrigerated.
New Product–Documentation: Letter from Mark Courtney. 1980. Sept. His photocopied letterhead says: South River Tofu Shop, 174 Mayo Rd., Edgewater, MD 21037. Letter (on South River Tofu Shop photocopied letterhead) from Mark Courtney. 1980. Oct. 31. His new address (handwritten over the printed one) is: 9220 Fowler Lane, Lanham, Maryland 20801. "Our enterprise is alive but not yet kicking. Two or three more months before we're in production." In February of 1980 he ordered books on tofu and on tempeh production.

Owner: Mark Courtney. Letter (on South River Tofu Shop photocopied letterhead) from Mark Courtney. 1980. Oct. 31. His new address (handwritten over the printed one) is: 9220 Fowler Lane, Lanham, Maryland 20801. "Our enterprise is alive but not yet kicking. Two or three more months before we're in production." In February of 1980 he ordered books on tofu and on tempeh production.

Morris, Linda. 1982. "Tofu: Soy product can be used like cheese." *Sun* (Baltimore, Maryland). May 12. p. C1. American Soy Products, established by Larry Betzler, Mark Courtney and Dick Leshuk, has been making tofu in Baltimore at a plant on Aisquith street since the start of 1982.

Talk with Mark Courtney of Baltimore, Maryland. 1998. Feb. 15. Phone: 410-243-9353. This company (South River Tofu Shop) never happened, but the idea led to the establishment of American Soyfood Industries.

Computerized Mailing List. 1983. June 20. Owner: Talk with Larry C. Betzler of American Soyfood Industries. 1988. April 1. The company is now at 419 Frankford Ave., Baltimore, Maryland 21206. Originally he was in a partnership with Richard Leshuk and Mark Courtney. Production of tofu started on the first business day of 1982. About a year later Leshuk wanted to declare bankruptcy. Betzler hung on and paid off all debts. Then he stopped manufacturing and became a marketer/distributor. Eddie Tsai of Natural Inc. in Elkridge, Maryland, makes his products now. The secret to the long shelf life of his vacuum packed tofu is to pack it hot, before immersion in water. He uses a Smith chamber vacuum packer. Shelf life is 2-3 months, up to 9 months. Larry now runs this company as a hobby. He runs a travel agency as his main business. Total sales are $75,000 a year. 20% of that is soymilk.

Talk with Mark Courtney in Baltimore, Maryland. 1998. Feb. 15. Phone: 410-243-9353. It was his idea to start this company. He joined with Glen Nichols and with Richard Leshuk to start the company. They rented space from another company named Mrs. Minnick's Salads (which made potato salads, macaroni salads, etc.) on Aisquith Ave. in Baltimore. But every time the salad company needed high-pressure water to wash and peel their potatoes, the tofu operation had to shut down for 30-40 minutes. This became a major problem. Their only product was tofu which was not initially vacuum packed. They made tofu 2-3 days a week for about 18 months. Larry Betzler entered the company after it had started. He was a "slick character," and with him big problems arrived. For example, he was caught taking payroll taxes but not forwarding them to the government. Later Mark and Glen left the company and started a business in

Baltimore.

5424. **Product Name:** Tofu Sunny Eggless Salad.
Manufacturer's Name: Ashland Soy Works.
Manufacturer's Address: 280 Helman St., Ashland, OR 97520. Phone: 503/482-1865.
Date of Introduction: 1982. January.
Ingredients: Tofu, oil, tamari, vinegar, lemon juice, mustard, celery, onion, garlic, spices.
Wt/Vol., Packaging, Price: 16 oz.
How Stored: Refrigerated.
New Product–Documentation: Label. 1982. 3 by 2.25 inches. Self adhesive. Red on yellow. "No preservatives or additives." Talk with Diana Muhs. 1988. Feb. 10.

5425. *Beanfield Newsletter* (*The*) (*SANA, Colrain, Massachusetts*). 1982. Tempeh sales. 2(4):1. Jan.
• ***Summary:*** *"The Beanfield* recently contacted 15 tempeh companies around the U.S. to determine industry production figures and general prospects for tempeh sales. While overall poundage remains light except in Massachusetts and California most producers foresee a bright future and expanding sales." Lists weekly tempeh production figures (in pounds) for each manufacturer.

The largest are: Soyfoods Unlimited (San Leandro, California; 5,900, including 3,200 lb of soy tempeh, 400 lb of five grain tempeh, and 400 lb of soy/rice, and 1,000 lb of packaged tempeh burgers every week. In addition they ship some 6,000 lb of tempeh burgers once a month to New England Soy Dairy in Massachusetts for East Coast distribution. Promotion to the local Indonesian market netted a 33% sales increase in one month).

The Tempeh Works (Greenfield, Massachusetts; 4,500), and Pacific Tempeh (Emeryville, California; 2,500). White Wave (Boulder, Colorado; 700). Cricklewood Soyfoods (Mertztoown, Pennsylvania; 500). Northern Soy (Rochester, New York; 500).

• ***Summary:*** An interview with Patti Davis, the first child of President Ronald and Nancy Davis Reagan. For dinner, Patti enjoys chopped raw vegetables mixed with tofu. A half-page photo shows Patti.

5427. Dominguez de Diez Gutiérrez, Blanca. 1982. Re: Introducing soyfoods to Mexico. Letter to William Shurtleff at Soyfoods Center, Jan.–in reply to inquiry. 5 p. Typed. [Eng]
• ***Summary:*** The following is Blanca's response to and editing of a history of her work with soyfoods in Mexico, written by William Shurtleff and sent to her, requesting that she check it for accuracy. Shurtleff's history is a based largely on letters from Blanca to Shurtleff in the early 1980s.

An independent soyfoods pioneer in Mexico who deserves special mention is Blanca Domínguez de Diez Gutiérrez, a small, sparkling-eyed woman who, initially alone and unfunded, has taught the many uses of soyfoods to people (especially women in poor villages) throughout Mexico. She became interested in soyfoods after reading *The Book of Tofu* in 1976. In 1977 she founded a Yoga Center in the village of Tepoztlan, Morelos, but after seeing poverty and malnutrition all around her, she gave up her position as president of the Center to devote herself entirely to teaching others about soyfoods and better nutrition. She developed a low-cost, tasty, and easy to practice system of nutrition based on protein complementarity from soyfoods and grains (including underutilized grains widely used only for livestock feed) plus the use of sprouts [including soy sprouts]. Using this nutritious model, which was a great success wherever it was introduced, she began to develop soyfoods recipes and preparatory techniques that were suited to local tastes and would help lower income people to help themselves and provide their families with better nutrition. In 1977 Dominguez's booklet 'Los Mil Usos de la Soya' (The Thousand Uses of Soy) was published as an entire issue of the popular magazine *Quadernos de Natura* by Editorial Posada. Shortly thereafter the magazine published two articles about Dominguez's work ('The Soy Cooperative' [1980] and 'The Woman who is Taking Soy to the Countryside' [April 1978]) and then in 1978 a major book on soyfoods and Dominguez's system of nutrition featuring soyfoods and whole grains: *Alimentacion Integral Para Una Vida Plena: Los Mil Usos de la Soya.* Focusing on low-technology soyfoods such as fresh soy puree, soymilk, tofu, okara, roasted soy flour, and soy sprouts, plus many original recipes, this was the first book of its type in Latin America. A second printing was out within a year.

"Dominguez was one of the first people in Latin America to grasp the spirit of the soyfoods movement in the U.S. and to see the great potential for working directly with the people to introduce soyfoods 'from the bottom up.' Her fine publications were accompanied by lots of hard work with local people. In the 1970s in Tepoztlan she founded the Soya Cooperative Padma Xochitl, with the help of three teachers there whose students regularly fell asleep in class from lack of a proper breakfast–or any breakfast at all. A number of people joined with Dominguez, working with a most creative and generous spirit, to make the Cooperative into a very active and extremely effective center of soyfoods information: Victor Ariel Barcenas, Albino Quiroz, Marisela Penaloza de Quiroz, and Coti Nava deserve special mention. The fine work started here first reached the people of Morelos, then quickly spread throughout Mexico. It proved that soyfoods in conjunction with the new yet traditional diet were well received wherever they were tried.

"Dominguez was a creative and inspiring teacher and

© Copyright Soyinfo Center 2013

the people with whom she worked felt her love and care. She developed Tofu Chorizo (like a garlic sausage), enchiladas, and tamales, pozole (stew) soy-flour enriched masa, and many soymilk recipes. Women understood quickly when she showed that from 16 pesos of soybeans they could get 10 liters of soymilk (worth 130 pesos) and 1.5 kg of okara (worth 150 pesos). She asked that women pay for their classes by teaching 10 other women what they had learned. Deploring that food had fallen into the hands of men, who thought only of its monetary and rarely of its nutritional value, she never failed to teach of the dangers of junk foods (like proliferating soft drinks) and the ease with which traditional diets could be improved with soy.

"Dominguez worked closely with a host of other people, who in turn became soyfoods teachers. Maria Esther Rosete of IMSS did pioneering work with Dominguez introducing soyfoods into her area and to the workers and their wives at a big sugar mill in Zacatepec. They gave many demonstrations and trained volunteers who introduced the healthful diet in many places in the state of Morelos. In 1980 Maria Esther was transferred to Xalapa, Veracruz, where she continued her work with soyfoods with great effectiveness. In 1981, Dominguez was invited to train a group of social workers, nutritionists, and cooking teachers there to take the diet to villagers, schools, and the poorest sections of the city. In 1979 Dominguez was invited by the Teachers College in the state of Durango to train a group of teachers in using soybeans. Today this college has a one-semester course in the theory and practice of soyfoods use, directed particularly at rural teachers. Señora Elvia de Jesus Hidalgo de Sanchez, one of Dominguez's former students from Tepoztlan, who initiated he program, has also trained one hundred volunteers from the DIF (Family Integral Development) in Durango and given many soyfoods courses throughout the state of Durango, including at the Agricultural Experiment Center. Starting in 1979 Laura Mendez, earlier from the Tepoztlan Cooperative, worked with Dominguez and many others to introduce soyfoods to the state of Mexico. Obdulia Herrera Bazan, Dr. and Mrs. Arturo Aldama, Arcadia Ramirez, and many others also did fine work with soyfoods.

"In late 1981 Dominguez, who had previously worked entirely without outside financial support, was invited by DIF in the state of Veracruz to work for one year as an employee teaching about soyfoods. She developed a nutritional program for the state and trained a group of young nutritionists, who taught soyfoods to housewives, jails, orphanages, etc. throughout the state, emphasizing home preparation of low-cost substitutes for meat and milk. The program was a great success, and many of these and other workers gave generously of their time, energy and money with almost missionary zeal in the strong belief that soyfoods could play a key role in uplifting the poor and improving their diet. Throughout this ongoing work, Dominguez viewed her efforts as a part of their spiritual practice of Yoga, to serve others selflessly and lovingly, to help relieve suffering." Address: Mexico City.

5428. Harrison, Sharon L.; Konishi, Frank. 1982. Development and evaluation of a tofu (soy curd)-with-fiber product for the elderly. *J. of Nutrition for the Elderly* 2(1):19-29. Jan. [18 ref]
• ***Summary:*** The new product, named FibraTofu, containing fiber in the form of pulverized soybean hulls, was developed for the elderly. It has a very bland flavor and is an excellent source of protein, calcium, and dietary fiber, but with very low levels of sodium and saturated fat, and no cholesterol. When FibraTofu was added at levels of about 20% to a variety of foods (onion dip, fried rice, potato salad, fudge), it significantly improved their nutritional value without sacrificing overall acceptability. If people consumed 16 ounces of FibraTofu daily, they would receive 50% of their daily protein requirements and more than 100% of their daily calcium and dietary fiber requirements. Address: 1. Dep. of Human Nutrition & Food Management, Ohio State Univ., Columbus, OH 43210; 2. Southern Illinois Univ., Carbondale, IL 62901.

with her book Tofu Primer.

5432. **Product Name:** Tofu, and Soymilk.
Manufacturer's Name: Midwest Soy Products, Inc.
Manufacturer's Address: 608 S. Belmont Ave., Champaign, IL 61820. Phone: 217-398-57560180.
Date of Introduction: 1982. January.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: Anthony & Patricia Kao.

5433. Murphy, P.A. 1982. Phytoestrogen content of processed soybean products. *Food Technology* 36(1):60, 62-64. Jan. [32 ref]
• ***Summary:*** The phytoestrogens, genistin and daidzin; their agluticones, genistein and daidzein; and coumesterol are the principal isoflavonoid substances found in soybeans. These 5 types of soy phytoestrogens (which are hormones) were separated using HPLC from soybeans, toasted defatted soyflakes, textured soy protein, soy-containing breakfast patties, soy sprouts (germinated for 5 days), tofu, soy isolates (acid precipitated), and fermented soy sauce. There was a general decrease in genistin concentration with additional processing. But there is a significant carryover of soy phytoestrogens into processed soy protein products. Thus soy products have high estrogenic activity. Analysis of phytoestrogens in food mixtures may be a useful technique for estimating soy protein concentration in foods. Address: Dep. of Food Technology, Iowa State Univ., Ames, Iowa 50011.

5434. **Product Name:** Tofu, and Soysage.
Manufacturer's Name: Rising Sun Soy Farms.
Manufacturer's Address: 2810 Banwick, Columbus, OH 43227. Phone: 614-231-4073.
Date of Introduction: 1982. January.
New Product–Documentation: Leviton. 1982. Trip notes. They opened in January 1982. Form filled out by Tim Nusser and C.H. Burnett, in charge of Risingsun Soy Farms. They opened on 1 Jan. 1982. Gives address.

5435. *Seattle Times.* 1982. Tofu suspected in outbreak of intestinal illness. Jan.
• ***Summary:*** An outbreak of bacterial illness was suspected of being caused by Island Spring's tofu. The company voluntarily stopped production and ordered a voluntary recall of the product. Between January 1 and yesterday, 24 cases of the infection were reported in the state, 17 of them in King County.

Note: This was the earliest known outbreak of illness in the USA caused by tofu. The outbreak was thought to be yersiniosis, caused by the bacterium *Yersinia enterocolitica.*

Note: The source of the contamination was thought to be the untreated well water used by Island Spring at Wax Orchards where the company was leasing. This was a spring-fed well, but it was several hundred yards away from a cattle pasture. The local county health department requires a setback of only 100 feet from such a pasture. Luke Lukoskie, owner of Island personally believes that the cause of the contamination may have been a bird that flew into a water storage tank through an unscreened opening and died there. He never saw such a bird, but he heard a rumor to this effect that originated with a maintenance man. Address: Olympia (AP), Washington.

VI. Influence of combine harvesting and drying of low moisture seed on qualities for soybean food processing and tests for factory production of tofu and natto]. *Shokuhin Sogo Kenkyujo Kenkyu Hokoku* (*Report of the National Food Research Institute*) No. 39. p. 23-31. Jan. [7 ref. Jap; eng]
• ***Summary:*** Two harvesting methods and 4 drying methods were tested with the middle-sized seed variety Kitamishiro (Table 1). Address: 1. National Food Research Inst. (Shokuhin Sogo Kenkyujo), Kannon-dai 2-1-2, Yatabe-machi, Tsukuba-gun, Ibaraki-ken 305, Japan; 2-4. Hokkaido National Agric. Exp. Station, Memuro, Hokkaido, Japan.

5437. Wood, Brian J.B. 1982. Soy sauce and miso. *Economic Microbiology* 7:39-86. Jan. A.H. Rose, ed. Fermented Foods. [50 ref]
• ***Summary:*** Contents: 1. Introduction. 2. The preparation of soy sauce: Introduction, preparation of raw materials (the beans, wheat), mixing, koji, moromi. 3. Of beans, microbes, and miso: Beans, microbes, miso. 4. Trade in soy sauce: Introduction, statistics. Table 1 (p. 64-66) shows exports of soy sauce in 1978, in tonnes (metric tons) from Hong Kong, Korean Republic, Singapore, Japan, and total, to almost every country in the world (with each country's population in millions), grouped by region as follows:

1. North America: Canada, USA (#1)–Regional total imports: 6,052.3 tonnes.

2. South and Central America [and Caribbean]: Argentina (#3 in region), Bolivia, Brazil, Chile, Costa Rica, Ecuador, El Salvador, Guatemala, Guyana, Honduras, Mexico (#2), Nicaragua, Panama, Paraguay, Surinam, Venezuela (#1), Granada, Jamaica, Trinidad and Tobago, total. Former Dutch West Indies–Regional total imports: 1,046.4 tonnes.

3. Europe: Austria, Belgium, Czechoslovakia, Denmark,

© Copyright Soyinfo Center 2013

Finland, France (#4 in region), Germany (West #3), Greece, Italy, Netherlands (#2), Norway, Portugal, Spain, Sweden, Switzerland, UK (#1), USSR–Regional total imports: 3,017.7 tonnes.

4. Near and Middle East: Bahrain (#3), Egypt, India, Iran (#2), Iraq, Jordan, Kuwait, Oman, Qatar, Saudi Arabia (#1), United Arab Emirates, Yemen Arab Republic–Regional total imports: 1,193.5 tonnes.

5. Far East and Western Pacific: Brunei, Hong Kong (#3 in region), Indonesia, Japan, Korea (South), Macao, Malaysia (#2), Philippines, Sabah (#1; A state of Malaysia from 1963; Formerly British North Borneo), Sarawak (A state of Malaysia from 1963), Singapore, Taiwan, Thailand–Regional total imports: 3,139.4.

6. Pacific and Australasia: Australia (#1 in region), Cook Islands, Christmas Islands, Fiji, Guam (#2), Nauru, New Caledonia, New Hebrides, New Zealand, Oceania n.c.s. (#3), Papua New Guinea, Portuguese Timor, Samoa and Tonga, Solomon Islands, Tuvalu (Ellis Island), U.S. Oceania–Regional total imports: 1,647.5 tonnes.

Note: This is the earliest document seen (March 2010) concerning soybean products (soy sauce) in Kiribati (Christmas Islands), in Nauru, in Qatar, in Portuguese Timor (later renamed Timor-Leste [East Timor]) or in Tuvalu. This document contains the earliest date seen for soybean products in Kiribati (Christmas Islands), in Nauru, in Qatar, Portuguese Timor, or in Tuvalu (1978); soybeans as such have not yet been reported.

7. Africa: Algeria, Canary Islands, Ethiopia, Gambia, Ghana, Kenya, Libya, Malagasy, Malawi, Mauritius (#2 in region), Nigeria, South Africa (Republic of, #1), Sudan, Réunion Islands (#3), Tanzania, Zaire. Other African countries–Regional total imports: 365.7 tonnes. World total imports: 15,731.5 tonnes, of which 6,192.8 tonnes from Hong Kong, 1,233.5 tonnes from South Korea, 1,713.6 tonnes from Singapore, 6,591.6 tonnes from Japan. The value in pounds sterling and in pounds sterling per tons of soy sauce is given for each exporter.

Other tables show: (2) Soy sauce exports (in tonnes and value) each year from 1976 to 1976 from Hong Kong, South Korea, Singapore, and Japan. A large percentage of Hong Kong's exports are re-exports (probably from China). (3) Total soy sauce exports from Japan, 1976-1978, by container type, with amount and value. (4) Soy sauce and miso production in Japan every 5 years from 1965 to 1978 (in tonnes). (5) Soy sauce and miso production in Japan for export in 1976, 1977, and 1978. Miso production (in tonnes) averaged about 40% of soy sauce production, and miso exports (in tonnes) averaged about 13% of soy sauce exports. (6) Imports of soy sauce into Hong Kong, Singapore, and the USA from exporting countries in 1978 (with figures for exports from China in 1976 and 1977). (7) Re-exports of soy sauce (made in China) from Hong Kong and Singapore in 1978 to major importing countries worldwide, by region, by country. Small countries that are the destination of this soy sauce include: Honduras, Nicaragua, Panama, Venezuela, Trinidad and Tobago, Former Dutch West Indies [also called Netherlands Antilles; they are part of the Lesser Antilles and consist of two groups of islands in the Caribbean Sea: Curaçao and Bonaire, just off the Venezuelan coast, and Sint Eustatius, Saba and Sint Maarten, located southeast of the Virgin Islands. The islands form an autonomous part of the Kingdom of the Netherlands], Pakistan, Saudi Arabia, United Arab Emirates, Brunei, Sabah, Sarawak, Fiji, Nauru, Oceanea (non-U.S.), Oceanea (U.S.), Papua, Samoa and Tonga, Solomon Islands, Ghana, Malagasy Republic, Togo. Total from Hong Kong: 2,945.3 tonnes, and from Singapore 109.5 tonnes.

(8) Exports of miso (in tonnes) from South Korea and Japan in 1978 to major importing countries worldwide, by region, by country. The leading importers are: USA (622), Saudi Arabia (353), Singapore (66), Bahrain (64), Netherlands (38), Iran (29), Iraq (29) France (28), German Federal Republic (23), Smaller importers include: Chile, Guyana, Surinam, Bangladesh, Iran, Iraq, Jordan, Kuwait, Quatar, Saudi Arabia, United Arab Emirates, Yemen Arab Republic, Sabah, Fiji, Guam, New Hebrides, Papua New Guinea, Samoa, Solomon Islands, Algeria, Canary Islands, Ghana, Kenya, Libya, Mozambique, South Africa Republic, Zaire.

Note: This is the earliest document seen (June 2007) concerning soybean products (miso) in Quatar. This document contains the earliest date seen for soybean products in Quatar (1978); soybeans as such have not yet been reported.

(9) Exports of miso from South Korea and Japan in 1976, 1977, and 1978 (quantity and value each year; no importing country names are given).

5. Tour of South East Asia: Technical and scientific aspects, trade aspects. 6. Acknowledgments. References

The chapter on Trade states: Soy sauce and soy paste (miso) are traded between all countries of South East Asia. The Korean Republic's exports nearly quadrupled in tonnage. The Kikkoman Company's production facility in Wisconsin produced 21,6000 tonnes of soy sauce in 1978. This was equal to 3 times the total exports from Japan in the same year. Japan's total share of the world soy sauce market remains very healthy. Miso exports are still small in comparison with soy sauce. On a rising market Japan's exports still only represent 0.2% of its annual miso production; "clearly there is considerable room for expansion here."

Miso is of greater relative importance to Korea than it is to Japan. Among the European countries, Belgium and Holland import the greatest amount of miso on a per capita basis. Spain imports a fair amount of miso. The U.S.A. and Canada had total miso imports totaling about 10% of their soy sauce imports.

© Copyright Soyinfo Center 2013

"In Thailand, there are about 50 soy sauce factories, the majority of which are small, producing less than 100 kilolitres per year, although it should be noted that most of them also produce soybean paste and soybean cheese [probably tofu]. The total annual consumption of soy sauce in Thailand is estimated at about 6,000 kilolitres (about 7,200 tonnes).

"In Malaysia, there are about 140 soy sauce factories producing in total an estimated 5.5 million gallons of soy sauce per year according to the proprietor of a leading brewery in Kuala Lumpur. This is about 21,000 tonnes per annum" (p. 84). Address: Dep. of Applied Microbiology, Univ., of Strathclyde, Glasgow [Scotland], U.K.

5440. Wollner, Joel. 1982. History of Erewhon, macrobiotics, and soyfoods in America (Interview). Conducted by William Shurtleff of Soyfoods Center, Feb. 2. 2 p. transcript.
• ***Summary:*** Evan Root was the first attendant at the Erewhon retail store, below street level at 303-B Newbury Street. He lacquered the walls with Michio. Evan is a great storyteller, very intelligent. The initial store was just one room, about10 by 20 feet. Very few people came in to buy food, so it was more like a stock room than a store. Some evenings there were lectures there. Redwing Books now occupies that space. Most of the food (a tin of miso, a keg of tamari) was just being sent by the Kushis' friends from Japan as gifts; it didn't go through customs.

The Kushis got nigari and made tofu at home. It was not for sale, but for dinner guests and cooking classes. Joel made some tofu using lemon juice when nigari was not available.

As tofu started to become more popular, Erewhon started to buy it from a tofu maker in Boston's Chinatown. First they just bought and sold that tofu, but before long (in about 1973-74) they convinced him to start making nigari tofu for them. They guaranteed to buy what he made, and they sold him the nigari at cost. This might have been the first nigari tofu made in USA. A lot of nigari tofu is still made in Boston's Chinatown. Joel thinks the tofu maker was located on Tyler, Street, perhaps Yah Kee. Nigari came in 66 pound sacks from Japan. Erewhon also sold small quantities of nigari in the retail store. Chinatown was Erewhon's main source of tofu until Laughing Grasshopper appeared.

What was the macrobiotic movement's contribution to the history of soyfoods in the United States? Macrobiotic teachers and students talked and wrote about them, ate them, and sold them. They felt soyfoods were an important part of a good diet. They educated people and developed a market for soyfoods. Few Americans had eaten miso and tofu at home before 1966–the year Erewhon started. Macrobiotics were the first Caucasian Americans to really use soyfoods regularly. Before that, soyfoods (except perhaps soy sauce) were just interesting oddities. Once could say that the macrobiotic movement introduced soyfoods to America.

As for tofu, Joel thinks that Michio Kushi's students misinterpreted his remarks about tofu being yin. Macrobiotics now eat tofu regularly, 3-4 times a week. There are endless ways to prepare it. It's been years since Joel has heard that tofu is "too yin."

What did *The Book of Tofu* (published in Dec. 1975) do for tofu? It expanded its relevance for the Western diet. Before that book, most of the tofu in the United States was consumed by people of East Asian ancestry.

Charles Kendall played a key role in making and introducing natto, mochi, and amazake to Caucasian Americans. He made these foods in his home and sold them locally. Initially, it was not a formal / legal business. But today his business, Kendall Foods, sells $500 a week of these three foods. He has been making natto for 4-5 years. He was America's first Caucasian natto maker. Natto was served in macrobiotic restaurants in Boston.

The latest soyfood to hit Boston has been tempeh. It's been a phenomenal success. Macrobiotics are going crazy over it. Thom Leonard has been giving lots of tempeh classes for the past 1½ years. For more than a year, lots of sandwich makers in Boston have been making and selling tempeh sandwiches. Tempeh is made into cutlets, burgers, tempeh mock-tuna salad. Why is it so popular? Because it is rich and meaty in texture and flavor–the opposite of rice. Most macrobiotics crave rich, meaty foods.

Ron Kotzsch is very close to the Kushis. A very unpretentious person with a wonderful sense of humor, he is now teaching in North Carolina. He is friends with Helen and Scott Nearing. He toured China and Japan with John Denver, the singer and songwriter–who did a benefit for Michio's new college.

How does Joes see the future of Erewhon? He thinks the company will focus on manufacturing only. Now is the critical time. He'd give Erewhon a 30-70% chance of survival. Address: Boston, Massachusetts.

5441. Hillyard, Roger. 1982. History of Erewhon, natural foods, and macrobiotics in America. Part II (Interview). Conducted by William Shurtleff of Soyfoods Center, Feb. 7. 2 p. transcript.
• ***Summary:*** While Roger was in Boston, no tofu was sold at the Erewhon retail store at 342 Newbury St.–since there was no refrigeration and no room. He thinks tofu was introduced after Erewhon got 33 Farnsworth St.

The trickiest question, which has no place in this book, is about work as a disciple / discipline vs. for money / as business. Work can be a spiritual practice (*karma yoga*), and that is how many of the early workers at Erewhon viewed it.

Roger does not know why so many people left Erewhon. Maybe Michio Kushi planned it that way. He does not know why Erewhon went bankrupt; maybe it was because the company was undercapitalized, there was no worker equity, and Michio did not know American business. "Maybe Michio did not care so much. Distributing foods was always a minor focus for Michio."

Other macrobiotic food distributors outside the U.S. were Lima in Belgium (by far the earliest), Harmony and Sunwheel in England, and some company in Italy. Address: California.

5442. White, Jim. 1982. Carobs brighten dull winter dishes. *Toronto Star* (*Ontario, Canada*). Feb. 10. p. C8.
• ***Summary:*** Frieda Caplan, the queen of exotic and interesting new fruits and vegetables, and a California food wholesaler, is in Toronto to brighten the dull, cold winter with California sunshine. This year her company hopes to ring up $10 million in gross sales.

According to Kaplan, trends in the U.S. are towards fresh herbs and tofu, and away from salt.

Nearly half of the 10,000 letters Caplan receives each year come from consumers who want "to know more about tofu, the Orient's soybean cake, and how to use it.

"Tofu is available in many Toronto supermarkets." A 500-gram package of Victor Food Products' tofu, containing four slices packed in water, retails for $1.19 at A&P.

Karen Kaplan, Frieda's daughter (age 26), who is in charge of developing recipes for the company's line of exotic foods, prefers to treat tofu simply–by broiling it.

Cut slices about 3/4 inch thick, brush with soy or teriyaki sauce, and place beneath the broiler on an oiled pan. Broil until nicely browned and crusty, then turn to brown the other side.

Before broiling the 2nd side, you may want to "top it with a slice of mozzarella cheese (though this works better without the brushed-on sauces). Broil until the cheese is melted."

A photo shows Kaplan tasting a Mexican carob pod. Address: Food editor.

5443. Dominguez de Diez Gutiérrez, Blanca. 1982. Re: Current work with soyfoods in Mexico. Letter to William Shurtleff at Soyfoods Center, Feb. 16. 4 p. Typed, with signature. [Eng]
• ***Summary:*** "We are making the most incredible tamales." Blanca's maiden name is Dominguez. Her husband's double surname is Diez Gutierrez. She has decided to use only her maiden name–otherwise it is too long. She regrets that she does not know her husband's address.

"I have gone to three good agricultural libraries. When I enquire about the history of soya in Mexico, the librarian looks at me wide-eyed. So they bring out all they have on soya, plenty of information, but no history. I know Manuel Gamio wrote about it and was a great promoter." But Blanca has been unable to find any of his books.

"Soya flour was widely used by the Social Security in Mexico for many years; they began in the 1960s, and only recently gave it up. It was distributed freely among the people. It was never very successful and was not accepted permanently, because only the Social Security distributed it. I have been told that many years ago, even as early as the 1940s, the soya bean was sold or introduced in some shops; but it later was removed because people rejected it. They tried cooking it like Mexican beans, which are much softer and cook into a nice gravy sort of sauce. This soya bean never cooked, was hard as a rock, so it did not succeed. Now many people realize you must learn how to use it, and are willing to learn.

"I am sure there was some very goos stuff around in the 1930s. I have this clue from an old teacher, who told me she had some notes, which sounded terrific." But she has not yet been able to find them.

"You must write to Dr. Nuren Banfunzi (Apdo. Postal #6, Iguala, Guerrero). He has made many important contributions to Mexico in the field of Soya, among them creating the variety BM2, with no odor or beany taste, so that people do not reject the milk for human consumption. He might have all the information you need. He is now working in *el tecnológico* of Monterrey; also in Queretaro and also in Michoacan. He has been in contact with many fine people (incl. one lady in Michoacan) who are doing a lot to take the soya to the common folk. I am sure he can help you. He is a scientist. We are very good friends, and he has done a lot to introduce the soya to the ordinary housewife, even creating some recipes himself.

"Soya is almost like a conversion. When people adopt it, they turn inside out." Blanca encloses a sheet of the names she uses for basic soyfoods in Spanish. "Soyafoods = *alimentos de soya.* Fresh green soybeans = *frijol de soya tierno* (no special name). Soya nuts = I call them *soya-nuez* and so do my students, but this is only amongst us. Soya sprouts = *germinados de soya.* Roasted soya flour = *harina de soya tostada.* Coffee = I call it *soyafee* but this is only known among my students and at the cooperative I founded

© Copyright Soyinfo Center 2013

in Tepoztlán. Soya-choc = I call it *soyalate,* same as above. Tofu = *tofu o queso de soya o cuajada* (curd) *de soya.* Okara = *Okara o pasta de soya.* Soya oil = *aceite de soya.* Soy flour = *harina de soya.* Textured soya protein products = *productos de soya texturizada.* Soya grits: are not known here. Roasted soya beans with salt = like peanuts, I call them *soya-huates,* but my names are not well known yet, only among those who study with me. Gô = *masa de soya* which looks very much like the corn dough with which we make tortillas." Note: This is the earliest English-language document seen (Nov. 2012) that contains the term "roasted soya flour."

"In Mexico there are some commercial products: *Chocosoya,* like chocolate soya to drink with water or milk. *Soyavena,* a soya powder for children, soya and oats. *Pinole de soya,* is soya powder with cinnamon and sugar. *Horchata de soya,* invented by me but very well known, soya milk with plenty of ice, cinnamon, vanilla and sugar (I made it in Denver [Colorado, at the annual Soyfoods Conference])." Address: Apdo. Postal 226, Jalapa, Veracruz, Mexico.

5444. O'Brien, Jane M. 1982. Re: Re-thinking starting a tofu and soymilk factory in Ireland. Letter to William Shurtleff at Soyfoods Center, Feb. 17. 1 p. Typed, with signature.
• ***Summary:*** "We have had to backpedal a bit on any plans for a tofu and soymilk factory for many reasons–there is just not presently enough demand to warrant such a venture, but the time will come eventually.

"My book is coming along midst all the other things that are happening which have to do with family life, Baha'i life, and my interest in the many aspects of health and healing." Address: 7 Woodside Drive, Rathfarnham, Dublin 14, Ireland. Phone: 909-769.

5445. Nabben, Alexander. 1982. Re: Work with soyfoods in Germany and France. Letters to William Shurtleff at Soyfoods Center, Feb. 20 and July 17. 1 p. Typed, with signature. [Eng]
• ***Summary:*** "I have given our vegan restaurant [Wildwuchs] in Munich to friends, who are continuing to make tofu there. We [Irene and I] went with our friends from the Eire-Farm to the mountains of southwest France to start a new European Farm. In the beginning we are living in tents, planting a big soybean field and more. But we're still connected with Germany, so we're going to have a tour through the country, doing soy-cooking lessons in Berlin, Hamburg, Bremen, Frankfurt (at the International Bookfair), Stuttgart and in Munich. Beside all that we're working on a small book about soyfoods and life alternatives... Soon we'll have some people with us who worked in the tempeh plant on the Tennessee Farm." Address: Europa Farm, Ferme la Garringue, Besse-Festes St. André, 11300 France; or Berlin, West Germany.

5450. Fiering, Steve. 1982. An armchair guide to pressure washers. *Soyfoods.* Winter. p. 42-48.
• ***Summary:*** "Clean-up in a food processing facility is a major responsibility. A great deal of labor, energy and material resources go into maintaining sanitation. One tool that can reduce the labor and expense of cleanup, while improving the level of sanitation, is the pressure washer. Don't expect to stop buying scrub pads, they are still in fashion; but you can expect to have a cleaner shop, and to see your facility closed up earlier by smiling clean-up crew members.

"Soyfoods has looked at and used pressure washers, spoken with manufacturers and sales reps, and studied the literature. Our report here outlines the basic concepts, identifies areas of choice and important detail, and introduces the companies that manufacture pressure washing equipment.

What is a pressure washer? It is basically the most effective and inexpensive tool for partially mechanizing the cleaning operation. More basically, it is a pump that will increase the pressure of the water or solution that you are cleaning with. The high pressure water removes surface soil that would otherwise have to be removed by hand-scrubbing, or not removed at all.

© Copyright Soyinfo Center 2013

"Most of us have used pressure washers. A common example is the coin operated, 'wash your own' car wash. For your coins you get a high pressure spray of hot water that you apply with a 'wand' to clean your car. It is not hard to imagine this high pressure spray being as useful in cleaning a food processing facility as it is in cleaning your car, but your clean-up crew won't need a pocketful of change. Another common example of pressure cleaning is the dish washer.

"Cleaning of surfaces is accomplished through the application of force to dislodge the particles of soil, a solution to dissolve and carry off the soil, and heat to aid the dissolution process. In food plants a final disinfecting solution kills microorganisms. A pressure washer is an aid to all aspects of this process. You can expect a good pressure washer to: reduce labor time and effort, reduce water and sewage expense, economize cleaning chemical usage, improve sanitation quality, clean more completely, minimize energy usage, reduce wear on equipment. The actual change you can expect in the above areas depends to a great extent on what your present clean-up procedures are. In most cases this type of equipment will be a 'profit maker' by reducing the cost of production and improving sanitation, which will improve product quality and shelf life.

"By applying much of the force needed to clean, the pressure washer reduces the amount of force the worker must apply. This allows the work to proceed faster. More work gets done in less time and with less human effort. The morale of the cleaning crew is improved as we all know that spraying is more enjoyable than scrubbing.

"If your present clean-up involves a lot of spraying with a garden type hose and city water pressure, then you can save water and sewage by using a pressure cleaner. A garden hose uses 4 to 10 gallons per minute (gpm). A pressure washer adequate for food processors uses from 2 to 5 gpm on the average. However, this savings in water usage may be negated by the probability that you will spend more time spraying with a pressure washer than with your present procedure, because the spraying will replace the scrubbing..." Address: A founder of the Soy Plant Co-op Inc., Ann Arbor, Michigan.

5451. Fiske, Doug. 1982. Presenting tofu's calling card. *Soyfoods*. Winter. p. 50-55.
• ***Summary:*** "How does soy sound? For various reasons and in most contexts, the words soy, soybean and bean don't carry positive connotations. They go the other way and prompt negative, unpleasant associations. Soybeans are regarded by many as animal fodder. People associate beans with flatulence.

"For those old enough to remember rationing during World War II, soybeans will never escape their perceived role as second-rate replacements for, or extenders of, meat–nearly every well-to-do person's first choice protein source. For these people, soy products are reminders of a time when they had to do without; they represent sacrifice. Sorry, there's not enough meat to go around, you'll have to eat beans.

"Beans are what poor people eat in place of meat. There's no prestige in eating beans. Doing so is like admitting you're not cutting the mustard; it involves shame. Prime rib says elite, beans say proletariat. Soybeans also suffer from the 'Are-they-still-trying to-make-those-things-taste-good?' syndrome.

"For these reasons I don't think it's in our interest to wave the soybean banner. Let the value of soy products creep into the American consciousness over a long period of time as they gradually gain popularity. We're much better off emphasizing the economy, nutrition, and tasty versatility of our products than we are stressing their soy origin.

"I think the context in which the great majority of people are familiar with soy is soy sauce. And soy sauce is a black, salty liquid that they first found in a funny shaker on the table in a Chinese restaurant. There are many clever names involving soy, soybean, or bean that can be conjured up but I think it's best to let your fingers do the walking in other parts of your thesaurus.

"If all this makes the hairs on the back of your neck stand up, I think the word 'soy' does the least damage when it's placed other than at the beginning of a name. Vitasoy, for example, is a good name. Soy as the final syllable creates a new context, especially when coupled with vita–that's life. Let me know if Midasoy strikes gold for you. Does Satisoy satisfy anyone?

"It's a hindrance to sell the soy cause in your marketing program. Precious few people will consume soyfoods because it's the charitable or environmentally righteous thing to do." Address: California.

5452. Hinode Tofu Company. 1982. Hinode Tofu [Japanese or Regular Style, Chinese or 4-piece, Kinugoshi or Silken, Yaki or Broiled, Age or French Fried Pouches, Nama Age or Deep-Fried Tofu Cutlets] (Ad). 526 Stanford Ave., Los Angeles, CA 90013.

introduced when they started the business in 1947. Label. 1988, received. 5 by 7 inches. Red, white, black, and gold on clear plastic film. Hinoichi brand. Recipe on front of package for Rolled Tofu Pouches. $0.98 (10/88).

5454. Leviton, Richard. 1982. Tofu for institutions: Recipes for 225. *Soyfoods.* Winter. p. 66-67. [7 ref]
• ***Summary:*** These recipes were developed by Thelma Dalman (foodservice director of the Santa Cruz City Schools) and Mary Tolan (Dalman's former co-worker, and newly appointed foodservice director for Manteca Unified School District in California). On 15 Sept. 1981, Tolan made a landmark presentation on tofu for institutional feeding programs at the American Dietetic Association's annual convention in Philadelphia, Pennsylvania. "In working with our students," she told an audience of 600 enthusiastic nutritionists, "we have found high acceptance of the incorporation of tofu into popular Italian and Mexican foods, such as pizza and tacos. The seasoning is the key to its success." Ms. Tolan distributed bulk tofu recipes to the group that "the protein cost savings yielded per serving of tofu pizza is approximately 44.69 percent."

Large-scale recipes are given for: Tofu and egg muffin supreme (serves 50). Tofu tamale pie (serves 225). Tofu patties (serves 50). Photos by Frank Ward show: Thelma Dalman holding a tray of tofu pizza. Tofu Lasagna being offered in a school lunch line. Tofu Lasagna for 25 being prepared in the Colorado State University kitchens. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

5455. Leviton, Richard; Shurtleff, William. 1982. The coming tempeh boom. *Soyfoods.* Winter. p. 26-34, 38-40. Cover story. [13 ref]
• ***Summary:*** Company profiles of Soyfoods Unlimited (San Leandro, California) and Pacific Tempeh (Emeryville, California). "On February 15, 1981, Valerie, John, and Gary Robertson began tempeh production in their state of the American art $100,000 plant in San Leandro, California." The 1,000 square foot plant has a capacity of 10,000 lb/week of tempeh. "While the three Robertsons are each principals, Valerie is the chief dynamo, tempeh-maker, and sales-stormer, staging three in-store product demonstrations (called 'Tempeh Tastings') every week while managing their line of three tempehs and tempeh burgers." "Soyfoods Unlimited produces 1,000 pounds of tempeh weekly and 1,000 pounds of marinated, steamed tempeh burgers. The tempeh intended for distributors is frozen immediately, then thawed and predated 16 days ahead of the day of delivery. Fresh tempeh is steamed then refrigerated until delivery. The Robertsons refrain from vacuum packing their tempeh in order to preserve the firm, white cake; the vacuum compression tends to darken and crush the fragile white mycelium. Although their tempeh was presented initially as a frozen food, the lack of product shelf visibility prompted the Robertsons to supply a refrigerated tempeh as well. The tempeh burgers, which are vacuum packed in six ounce plastic bags (with two burgers) are marinated in a steam kettle, then steamed... Their Brown Rice Soy Tempeh is fast becoming popular while the burgers are available in both round and square shapes (called "Tempeh Cutlets / Burgers").

"The energetic Valerie continually drives around the Bay Area to conduct new Tempeh Tastings in the high volume stores among the region's natural foods outlets. At a typical demonstration she offers samples of Tempeh with Herb Tomato Sauce, Sweet and Sour Tempeh, Mock Chicken Tempeh Salad, and Tempeh Burgers. To complement the demonstrations, the Robertsons have launched a cautious advertising campaign targeted for both the Bay area and selected national natural foods publications."

The plant has a powerful sanitation system, which is described in detail.

Pacific tempeh was launched in Aug. 1980 on a $40,000 investment that secured a 1,000 square foot facility in Emeryville, California. "The plant has a per week capacity of 5,500 pounds while current weekly tempeh production is 2,400 pounds."

Photos show: (Cover) Valerie Robertson standing behind a table of tempeh dishes and promotional materials. (1) Valerie Robertson pulling a tray of finished tempeh in perforated plastic bags from a rolling rack. (2) Inside of the Soyfoods Unlimited plant. (2) Travis Burgeson holding a tray of finished tempeh. (4) A person vacuum packing tempeh burgers. (5) Travis Burgeson standing by a rolling rack. Address: 1. 100 Heath Rd., Colrain, Massachusetts 01340; 2. Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 413-624-5591.

5456. Leviton, Richard. 1982. Silken tofu and fried pouches: Inside the Japanese tofu industry. *Soyfoods.* Winter. p. 18-25.
• ***Summary:*** Leviton is on a two-week tour of Japan's tofu industry. He is part of "Okita Enterprises' whirlwind tofu and beansprout study tour, expertly arranged by Hideyoshi Okita and Charles Ishikawa of Los Angeles. Twelve tofu entrepreneurs and eight bean sprout enthusiasts [total 20] will bus their way through Tokyo traffic for 8 days in late September [1981] searching for the state-of-the-art of the Japanese tofu industry, and two of us will remain another week for more far-flung tofu travels."

Discusses: Takatsuka Marugo, Kinugoshi, Ikuta, Yahima, Asahi Shokuhin, Asahimatsu, Japan Packaged Tofu Assoc., Ninomiya Tofu Factory, Machida, Supermarkets, Linda Barber. Contains many photos of huge tofu factories and small, traditional neighborhood tofu shops. There is no mention of bean sprouts in Japan. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

5457. Leviton, Richard. 1982. Soy delis: Fast, natural, and

© Copyright Soyinfo Center 2013

growing. *Soyfoods.* Winter. p. 35-37.

• ***Summary:*** Discusses the Well Bean Deli in Santa Cruz (with a photo of Kevin Van Slooten); Real Food Tofu Cafe in Redwood Valley; and The Tofu Shop in Arcata. All in California. 2-3 photos show each location.

Concerning The Tofu Shop (768 18th St., Arcata, CA 95521): It "combines retail take-out with small scale tofu production and bakery products in a wood-lined airy storefront. Owner Matthew Schmit (who earlier managed a soy deli in Telluride, Colorado) has filled his 1,000 square feet with a small commercial cauldron-style tofu shop, small bakery, and 200 square foot retail front, all of which he launched on $11,000 investment on December 15, 1980. The cozy retail space features racks of soy cookbooks and crackers, teas, packaged miso, tofu and tempeh kits, noodles, seaweed, and a handsome reach-in cooler where the tofu herb burgers, tofu spinach pies, vegetable tofu sushi rolls, tofu tahini salad, tofu herb dip, tofu cream pies, and bottled soymilk are displayed. Monthly sales average $3,500 with some outside distribution of tofu, soymilk, and burgers. The deli attracts walk-in customers from the nearby Humboldt branch of the University of California while tofu burgers and tofu spinach turnovers are probably the most popular products at the deli." Photos show: (1) Matthew Schmit standing at the wood-lined counter. (2) Matthew and Susan [Suzanne] Schmit with their shop's specialties.

Concerning the Real Food Tofu Cafe (8473 East Rd., Redwood Valley, California): The Tofu Cafe is "in the tiny inland town of Redwood Valley (population: 400). Real Food (billed as 'Vegetarian whole foods, specializing in delights from the humble soybean') opened its 900 square foot facility (which includes in-house tofu production and secondary tofu products) in November 1980. The cafe is open for leisurely lunches, from noon until four and the customer often feels as if he is dining in someone's large, lovely living room. The deli is outfitted with wall-to-wall carpeting, an authentic rock wall, hefty wooden tables, plants. The decor, in fact, in most soy delis is typically tasteful, low key, earthy, and exudes a subdued sense of quality. 'Anyone who runs a soy deli,' Dik Rose remarks 'should make secondaries because of their promotional value for the deli name.' Rose's cafe, which is the retail branch of his Brightsong Tofu Company, produces Missing Egg Tofu Salad, Tofummus, Almond Tofu Creamie, and Strawberry Tofu Creamie, packaged in 8 ounce plastic tubs, and shipped frozen (with a 17 day refrigerated shelf life) around the San Francisco market. Missing Egg Tofu Salad sandwich and banana carob soymilk shakes are the deli best sellers, the average ticket is $3.50, and take-out and sit-down each draw 50 percent." Photos show: (3) The inside of the deli. (2) Dik and Sharon Rose behind the counter, with their large menu on the wall behind them. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

Canadian soyabean mission, South East Asia, Feb. 12th–27th, 1982: Mission member reports. Chatham, Ontario: Ontario Soya-Bean Growers' Marketing Board. 12 p. Feb. 12 p. Feb. 24 x 11 cm. [Eng]

• ***Summary:*** Contents: Comments, by Peter H. Epp, Chairman. Japan: Home Shokuhin Tofu Manufacturing Co., Komatsuya Shokuhin (natto mfg. plant), Nihon Miso (manufacturing plant), Japan Miso Assoc., Japan Tofu Assoc., Federation of Japan Natto Manufacturers' Cooperative Society, Wako Shokuryo Co. (makes natto; Jacob Hartz in Arkansas supplies them with "936X" variety small-sized natto soybeans; Wako also supplies Nihon Miso Mfg. Plant), X-Can Far East Ltd. Korea: Seoul meeting at embassy, Chung's Food Ltd., Agriculture and Fisheries Development Corp., Korean Soybean Curd Cooperative Manufacturing Assoc. Singapore: Okura & Company Ltd., Eng Huat Pte. Ltd., Intraco. Malaysia: Yeo Hiap Seng Co. Ltd. (the largest manufacturer of soymilk in Malaysia and Singapore). Follow-up. Conclusion.

Each of the following members of the mission wrote a chapter in this book, discussing each visit mentioned in the contents: Peter H. Epp, Bernard Calhoun, Otis McGregor, Richard I. Buzzell, M.D. Pennell (General Manager, R&D, H.J. Heinz Company of Canada Ltd.), Michael Loh (Export Development Specialist, Ontario Ministry of Agriculture and Food).

Details are given on the soybean characteristics desired for each type of soyfood product, especially in the chapter by Dr. Buzzell. Popular soybean varieties include: For Miso: Enlei [Enrei], Fujimejiro, Harcor.

For natto: The main natto specifications are: 1. Seed size–small but fully developed, less than 5.0 mm diameter if possible. 2. Round seed. 3. Total sugar content < 22%. 4. Oil content > 19%. 5. White / yellow hilum. Best natto varieties: Jizuka (the smallest, from Ibaraki prefecture) and Suzuhime (small, from Hokkaido), "two domestic [Japanese] varieties used for superior quality natto, were priced at $100 U.S. for 60 kg. The U.S. varieties which have been, and are being used presently, are not satisfactory. Both Nattawa and Pioneer 1677 varieties should adapt well to the natto product." Jennett (H24) from the USA is good. (p. 5, "Natto specifications Japan, unnumbered page near rear).

For tofu: Amsoy, Coles, Harcor.

Letter from Fred Brandenburg of OSGMB. 1994. Nov. 9. "Regarding export promotion before 1982, any activities would have been part of larger government sponsored trade missions. For example, in 1979 Otis McGregor participated in a mission to Asia which was co-ordinated by Michael Loh. It included a number of marketing boards and associations from Canada."

Note: This is the earliest document seen (Dec. 1998) that

(apparently) mentions the soybean variety Enrei. Address: P.O. Box 1199, Chatham, ONT N7M 5L8, Canada. Phone: 519-352-7730.

5459. Pacific Trading Co. (Living Lightly brand). 1982. Product catalog. P.O. Box 40429, San Francisco, CA 94110. 12 p. [1 ref]
• ***Summary:*** Includes photocopies of all product labels, showing all ingredients. A pioneering and extremely creative product line. Address: San Francisco, California.

5460. **Product Name:** Living Lightly Ready to Eat Tofu Cutlet (Deep-fried Cake of Tofu).
Manufacturer's Name: Pacific Trading Co. Distributed by Living Lightly.
Manufacturer's Address: P.O. Box 40429, San Francisco, CA 94110.
Date of Introduction: 1982. February.
Ingredients: Water, soybeans (organically grown in accordance with Section 26569. 11 of the California Health & Safety Code), soy oil, curded with natural calcium sulfate.
Wt/Vol., Packaging, Price: 6.5 oz.
How Stored: Refrigerated.

New Product–Documentation: Label. 1982, undated. 4 by 2.75 inches. Self adhesive. Blue, brown, green and white.

Film label. 1983. 7.5 by 4.5 inches. Blue and green on white. "Organic soybeans. Use like meat or cheese." "Serving Suggestions: Tofu Cutlets are ready to eat. Serve like cheese, ham, or bacon; sliced in sandwiches or with fried eggs; diced in salads, soups, casseroles, stews, or scrambled eggs. Or reheat in a toaster, oven or barbecue, and serve with a little soy sauce, and garlic or grated ginger."

5461. **Product Name:** Living Lightly Tofu Lasagna.
Manufacturer's Name: Pacific Trading Co.
Manufacturer's Address: San Francisco, California.
Date of Introduction: 1982. February.
Ingredients: Rennetless ricotta cheese, tofu, tomatoes, rennetless mozzarella and Romano cheese, whole wheat flour, green onions, carrots, eggplant, soy oil, garlic, herbs and spices.

Wt/Vol., Packaging, Price: 18 oz.
How Stored: Frozen.
New Product–Documentation: Label. 1982. 4 by 2.75 inches. Self adhesive. Green and red on white. "Tofu with pastabilities... For more about tofu see *The Book of Tofu...*" Spot in Soyfoods. 1982. Winter. p. 57. 18 oz.

5462. **Product Name:** Tofu (Water or Vacuum Pack) [Organic, Not Organic, Firm, Regular, Nigari-Style, or Calcium Sulfate].
Manufacturer's Name: Pacific Trading Co.
Manufacturer's Address: P.O. Box 40429, San Francisco, CA 94110.
Date of Introduction: 1982. February.
Ingredients: Organic Firm Tofu: Made with: Water, soybeans (Organically grown in accordance with Section 26569.11 of the California Health and Safety Code), Curded with natural calcium sulfate. (This pure natural earth mineral contains calcium and has been used in China for 2,000 years).
Wt/Vol., Packaging, Price: 14-16 oz water pack or vacuum pack.
How Stored: Refrigerated, 21-30 day shelf life (if pasteurized).
New Product–Documentation: Manufacturer's catalog. Label reads: "For delicious TOFU recipes see THE BOOK OF TOFU by Shurtleff & Aoyagi."

5463. **Product Name:** Living Lightly Savory Broiled Tofu (Vacuum Packed).
Manufacturer's Name: Pacific Trading Co.
Manufacturer's Address: P.O. Box 40429, San Francisco, CA 94110.
Date of Introduction: 1982. February.
Ingredients: Tofu (organic), magnesium chloride (nigari), natural soy sauce, herbs and spices.
Wt/Vol., Packaging, Price: 8 oz, vacuum packed.
How Stored: Refrigerated.
Nutrition: Per 4 oz. serving: 180 calories, 17 gm protein, 5 gm carbohydrates, 10 gm fat.
New Product–Documentation: Label. 1982. 2.75 by 4.25

© Copyright Soyinfo Center 2013

inches (circled top). Plastic. Red and yellow. "Ready to eat. No preservatives."

5464. **Product Name:** Tofu (Vacuum Pack) [Organic, Not Organic, Firm, Regular, Nigari-Style, or Calcium Sulfate].
Manufacturer's Name: Pacific Trading Co.
Manufacturer's Address: P.O. Box 40429, San Francisco, CA 94110.
Date of Introduction: 1982. February.
Wt/Vol., Packaging, Price: Vacuum packed.
New Product–Documentation: Manufacturer's catalog. Text on label: "For delicious TOFU recipes see THE BOOK OF TOFU by Shurtleff & Aoyagi."

garlic, ginger, cayenne, black pepper.
Wt/Vol., Packaging, Price: 10 oz / 284 gm.
How Stored: Refrigerated.
Nutrition: Per 100 gm: Calories 104, protein 12 gm, carbohydrates 3.4 gm, fat 8.2 gm.
New Product–Documentation: Label. 1988, received. 6 by 4.5 inches. Yellow, green, blue and white on clear plastic film. "Ready to serve–Hot or cold. For snacks, sandwiches, or as a main course. A good source of protein. No preservatives."

5472. **Product Name:** [Soyana Tofu (Firm)].
Foreign Name: Soyana Tofu.
Manufacturer's Name: Soyana.
Manufacturer's Address: Postfach 8039, Friedensgasse 3, CH-8002 Zurich, Switzerland. Phone: 012-028-997.
Date of Introduction: 1982. February.
Nutrition: Per 100 gm.: Protein 12.9 gm, fat 4.0 gm, usable carbohydrates 0.1 gm, minerals 1.0 gm, fiber 9.1 gm, calories 90.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: Walter Daenzer.

Letter from Verena Krieger. 1983. March 8. The Soyana tofu shop opened in Feb. 1982.

Leaflet (1 panel, 21 x 15 cm, single sided, printed black on white). *Gehalt von Soyana-Tofu* (*fest*) [Content of Soyana Tofu (firm)]. 1982? (undated). Gives the nutritional composition of the product, as shown above.

R. Leviton. 1983. Report on trip to Europe with American Soybean Assoc. Oct-Nov. p. 17, 19. Product seen in Reformhaus health food store in Zurich, Switzerland. Tofu production started in Feb. 1982. Letter from Michael Karlen. 1986. Feb. 16. They make organic nigari tofu.

5473. **Product Name:** Tofu, and Soymilk.
Manufacturer's Name: Soyfoods Australia (Renamed Nutrisoy. Pty Ltd. by 1987).
Manufacturer's Address: Rear 355 Parramatta Rd., Leichhardt, NSW 2040, Australia. Phone: 560 0792.
Date of Introduction: 1982. February.
New Product–Documentation: Letter from T. [Tony] Wondal. 1982. Dec. 17 (only stamp-dated envelope survives); Soyfoods Center Computerized Mailing List. 1983. June 20. Owners: Marcea Newman Weber and John Fenwick. Phone: 025-600-792. They make tofu and soymilk.

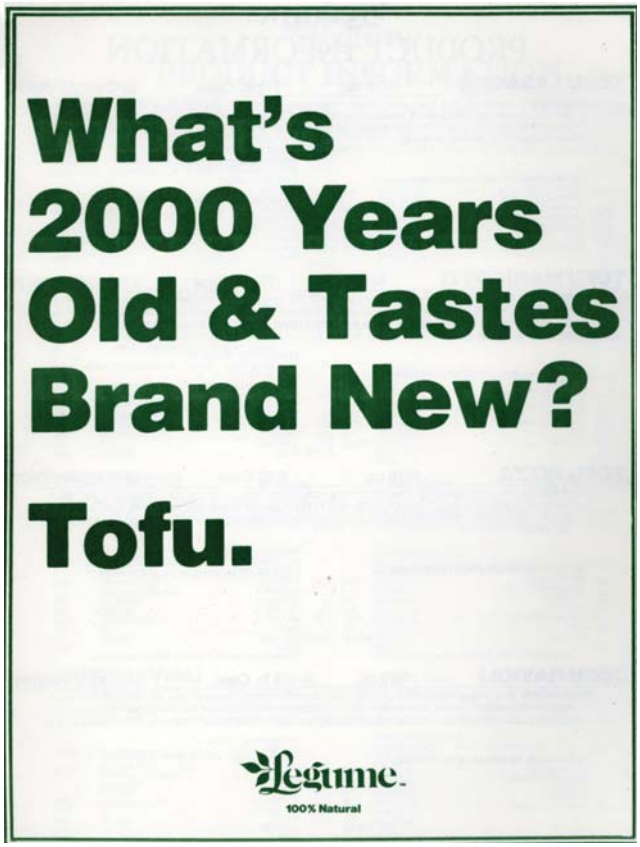
Letter from Marcea Newman Weber. 1995. Feb. 12. The company moved to 14/2 Paton Place, Manly Vale, NSW 2093 in about 1983, and Pty. Ltd. was added to the company name in about 1984.

Letter from Marcea Newman Weber. 1995. March 3. "We started making tofu in Leichhardt in 1982–first part of the year."

5474. *Soyfoods.* 1982. California yuba plant opens. Winter. p. 7.
• ***Summary:*** "Soyfoods of America's Ken Lee and Lawrence Wu, of Duarte, California, plan to make yuba far more available, visible, and talked about as they launch America's first semi-mechanized (and only) yuba plant.

"The yuba operation, which precedes tofu production in their daily schedule, begins with a low density, low solids soymilk which is pumped automatically across the plant from the tofu line to a series of shallow heating tubs in a 30 foot long stainless steel yuba forming machine. The soymilk is heated and a worker manually lifts off the skins and hangs them on metal drying tiers. Lawrence Wu reports that as many as 22 skins can be obtained from a 2¼ inch basin of soymilk but that as the oil portion is used up, more carbohydrates comprise the yuba and it darkens slightly. Wu's yuba has 51% protein, 20% oil, and 2% lecithin on a dry weight basis. Ken Lee plans to package his yuba semi-moist with a nitrogen flush to increase shelf life, but he's experimenting with vacuum-packing as well. Yuba in its dry form can last up to 2 years at room temperature... Yuba will be positioned in natural foods and supermarket outlets as a sandwich wrapper, eggroll-style, for entrees, as a dry soup mix powder, or as a steamed bologna-like yuba roll flavored with shoyu."

5475. *Soyfoods.* 1982. What's 200 years old and tastes brand new? Legume Tofu Lasagna. Winter. p. 56.



© Copyright Soyinfo Center 2013

• ***Summary:*** "Legume, Inc. of Verona, New Jersey, now uses this slogan to market a line of frozen tofu convenience foods to 22 natural foods distributors covering 30 states. Legume's line, which includes tofu snacks and tofu entrees, is sold in 20 New Jersey supermarkets."

Tofu Ravioli appeared in January 1982. Robert Shapiro, Legume's Sales Director, remarks: "Our Lasagna is a smash success, while the introduction of Ravioli should substantially increase sales of our Italian line." Address: Verona, New Jersey.

5476. *Soyfoods.* 1982. Soyfoods marketer. Winter. p. 57.
• ***Summary:*** "Mark Brawerman's Pacific Trading Co. distributes a diverse line of frozen and refrigerated soyfoods around the greater San Francisco area. Besides his stock of yogurt, cheeses, juices, eggless honey dairy ice cream, and middle eastern specialty foods, Brawerman distributes soyfoods from three West coast producers including Island Spring (Smoked Soyloaf, Steamed Tofu), Redwood Valley (Almond Creamie, Berry Creamie, Soysage, Tofumous, Missing Egg), and Soyfoods Unlimited (Tempeh, Tempeh Burger). Brawerman also handles two brand name lines of his own, Jolly Licks Non-Dairy Frozen Desserts and Living Lightly. The Jolly Licks line of soymilk ice creams was introduced in July 1980 and includes these flavors: Toasted Almond, Strawberry, Coffee, Carob, Orange, Carob Mint, Vanilla, Chocolate, (in pints and 5 oz cups). The Living Lightly line includes soft and firm tofu (water-packed and vacuum packed), tofu cutlets, SoyMoo beverage (plain, vanilla-cinnamon, in pints and quarts), two flavors of Tofu No-Cheese Cake (Hawaiian, Strawberry, at 12 oz), and six frozen tofu entrees, (Tofu Tamale, 7 and 12 oz; Tofu Enchilada, 12 oz; Tofu Lasagna, 18 oz; Tofu Ravioli, 14 oz; Tofu Italian Salad, 8 oz; and Tofu No Egg Salad, 8 oz)."

5477. Stephensen, Susie; Frumkin, Paul. 1982. Budget stretching entrees: The economy and you. *Food Management.* Feb. p. 47-53.
• ***Summary:*** "One budget stretcher that is increasing in popularity all over the country is tofu." At Bryn Mawr College in Pennsylvania, foodservice director Gail Finan serves chopped tofu on the salad bar, plus a tofu parmigiana and a tofu served in marinara sauce. These have proved "quite successful among students and faculty."

Other tofu recipes described are: Marinated orange tofu salad (Boston College). Tofu with taco. Tofu burger on a sesame bun. Tofu cutlet with cheese (the tofu is deep fried). Tofu tempura. Address: 1. Senior editor; 2. Contributing editor.

• ***Summary:*** Discusses mostly natto and tofu. This journal is published by the Tokyo Metropolitan Agric. Exp. Station. Address: Tokyo-to Nogyo Shikenjo.

5479. Wang, Hwa L.; Hesseltine, C.W. 1982. Coagulation conditions in tofu processing. *Process Biochemistry* 17(1):7-8, 11-12. Jan/Feb. [32 ref]
• ***Summary:*** Contents: Introduction. Preparation of the soybean milk. In vitro measurement of protein digestibility. Evaluation of coagulation conditions. Texture evaluation. Effect of heat treatment. Effects of coagulants (Calcium sulfate, calcium chloride, magnesium sulfate, magnesium chloride). Effects of coagulant conditions. Effect of coagulation temperature. Effect of mixing on coagulation. Conclusion.

Figures (all graphs) show: (1) In vitro digestibility of soybean milk (% of protein digested) as affected by boiling time. (2) Relationship of concentration and type of 4 coagulants to the yield of tofu (4 graphs). (3) Force-distance curve of tofu for brittleness and elasticity (2 graphs) obtained from Instron universal testing machine. (4) Relationship of concentration and type of 4 coagulants to the texture characteristics of tofu (4 graphs; cohesiveness, hardness, elasticity, brittleness). (5) Effect of coagulation temperature on tofu (2 graphs; gross weight, corrected gross weight, moisture content, total solids, hardness, elasticity, cohesiveness).

Tables show: (1) Effect of boiling time on the essential amino acid composition (g/16 gm of nitrogen) of soybean milk. (2) Effect of mixing on coagulation temperature in making tofu. Address: NRRC, Peoria, Illinois.

5484. Root, Evan. 1982. Re: History of macrobiotics. Letter to William Shurtleff at Soyfoods Center, March 4–in reply to inquiry. 1 p. Typed, with signature on letterhead.
• ***Summary:*** "Here is my reply to your questionnaire." Discusses Sanae, Erewhon, Paul Hawken, Michio Kushi. The original Erewhon store started in April 1966 at 303-B Newbury St. Prior to that, some food sales were done from the Kushi's home on a very small scale.

In Oct. 1967, Paul Hawken took over the management of Evan Root moved up the street to commence renovations for Sanae Restaurant. Paul was the main force in expanding and developing Erewhon in the early days. Prior to him it was mainly a cracker barrel style store where people came in to talk philosophy and swap recipes, whether or not they bought anything.

Sanae opened its doors to the public in Feb. 1968.

In the early days of Erewhon one of the suppliers not to be overlooked is Japan Food Corporation. From them we bought seaweeds, fish flakes, gourd strips, and most importantly from your point of view, Hatcho miso. Chico-San and Infinity Foods were in operation before Erewhon and we got most of the Japanese items from them except for a couple of kegs of miso that Junsei Yamaguchi put up in the Kushi's basement.

I do not know this for a fact, but I have speculated that the early tamari that was available when I first got into macrobiotics in 1964 may have been, in fact, real tamari as I distinctly remember that it was thicker and richer than what became available a little later. Address: Relationships, 39 Harvard St., Brookline, Massachusetts 02146. Phone: 617-739-3300.

• ***Summary:*** This is a review of the two-star Japanese restaurant Asahi Tokyo (2 Village Square, Glen Cove, New York). Recommended dishes include "fried bean curd." One of the many delicious appetizers is "squares of deep-fried bean curd with a tangy dipping sauce..."

5487. *Ann Arbor News* (*Michigan*). 1982. Soyplant firm given loan. March 19. p. C-2. [1 ref]
• ***Summary:*** The Soyplant Cooperative Inc. of Ann Arbor has been given a loan of $12,600 by the National Consumer Cooperative Bank of Washington, DC. Company president Kathleen Jackson said the money will be used for working capital, inventory and refinancing existing debt. The Soyplant operates two facilities: the Soy Dairy Deli at 211 E. Ann St. and a production facility at 771 Airport Blvd., where more than 8,000 lb/week of tofu and other soy products are made. The company delivers its products throughout Michigan and to several Midwest states.

5488. Lopez, Alejandro. 1982. El trabajo del maestro Ejo Takata con la soya en Mexico [Re: The work of Zen master Ejo Takata with soya in Mexico]. Letter to William Shurtleff at Soyfoods Center, March 19. 3 p. Typed, with signature. [Spa; eng]
• ***Summary:*** In 1969 Rev. Ejo Takata, a Japanese Zen monk and later Zen master who first arrived in Mexico in 1967, began his work with soyfoods. That year, while traveling in the mountains of Oaxaca state, he became aware of the malnutrition among the Mixes and Mazatecos Indians. With the help of the Japanese agronomist Toshihiko Onuki and of a group of Mexicans from the School of Agriculture of Chapingo and of his Zen A.C. community, he established an experimental soybean farm in Oaxaca and promoted the cultivation of soybeans and the use of soyfoods among the Indian communities. He taught the Indians how to make soymilk and how to use the okara (soy pulp) in making corn tortillas. He gave demonstrations in more than 100 communities and in almost all of these the soyfoods

© Copyright Soyinfo Center 2013

were received with such enthusiasm that they became and remain a part of the daily diet. They are made from soybeans now grown locally by the Indians. In 1971 Takata and co-workers opened a dining room at the Universidad Nacional Autonomo de Mexico. During the next 6 months they gave demonstrations and prepared 200 meals a day based on soyfoods including soymilk, okara with green vegetables, tortas with fresh soy puree, tofu in various recipes, crackers (*galletas*), breads, etc. In 1972 they began to give soyfoods demonstrations to the National Workers Syndicate of the ISSSTE, and to peasants and farm workers' organizations. They traveled widely into the countryside and their presentations and food were always well received. This work played a significant role in paving the way for soyfoods in Mexico. In 1973 the President of Mexico, Lic. Luis Echeverria, at a reception, recognized Rev. Takata for the work he had done with soybeans and soyfoods, then inaugurated a national soy program. In 1976 Takata and colleagues established an organization to teach appropriate technology (for food and energy), including soyfoods production. This work expanded in 1981 to the application of Japanese low-cost soyfoods equipment to small businesses, and participation in a national food program called Sistema Alimentario Mexicano (SAM). Takata and his co-workers have demonstrated vividly what individuals can do to help bring soybeans and soyfoods to the people in a country where they are not known. Address: Lic. Alejandro Lopez, Zen A.C., Ave. Revolucion #2036, San Angel, Mexico, DF, Mexico.

5489. *Toyo Shinpo* (*Soyfoods News*). 1982. T-shyatsu [Yoshikawa Shoji is giving away American T-shirts to people who buy his nigari or sumashiko]. March 21 [Jap]
• ***Summary:*** This sort of idea for publicity didn't used to exist. Tofu makers are now very interested in T-shirts and a lot of them have been ordered.

Foreign Name: Tofu Apfel-Kuchen, or Tofuschnitte.
Manufacturer's Name: Auenland Tofu und Soja Produkte.
Manufacturer's Address: Hub 2, D-8210 Prien-Chiemsee, West Germany.
Date of Introduction: 1982. March.
New Product–Documentation: Letter from Peter Wiegand. 1982. June 22. Followed by phone talk. Talk with Peter Wiegand. 1987. Nov. 11. He introduced 7 tofu products on the day he started. the day he started.

Talk with Michael Pierce (Graphic artist, Macon, Georgia). 1989. Oct. 30. He recalls this as being a tofu apple cake (*Apfelkuchen*), made with apples.

5495. **Product Name:** [Tofunafish Salad or Tofu Salad].
Foreign Name: Tofunafish Salad.
Manufacturer's Name: Auenland Tofu und Soja Produkte.
Manufacturer's Address: Hub 2, D-8210 Prien-Chiemsee, West Germany.
Date of Introduction: 1982. March.
Wt/Vol., Packaging, Price: Round plastic deli tubs.

© Copyright Soyinfo Center 2013

How Stored: Refrigerated.
New Product–Documentation: Letter from Peter Wiegand. 1982. June 22. Followed by phone talk. Talk with Peter Wiegand. 1987. Nov. 11. He introduced 7 tofu products on the day he started.

Talk with Michael Pierce (Graphic artist, Macon, Georgia). 1989. Oct. 30. He recalls that the Tofunafish Salad was sold in round plastic deli tubs.

5496. **Product Name:** [Tofu Mayonnaise].
Foreign Name: Tofu Mayonnaise.
Manufacturer's Name: Auenland Tofu und Soja Produkte.
Manufacturer's Address: Hub 2, D-8210 Prien-Chiemsee, West Germany.
Date of Introduction: 1982. March.
New Product–Documentation: Talk with Peter Wiegand. 1987. Nov. 11. He introduced 7 tofu products on the day he started.

Talk with Michael Pierce (Graphic artist, Macon, Georgia). 1989. Oct. 30. He thinks the mayonnaise was used on their burger, but not sold as an independent product.

5497. **Product Name:** [Tofu Burger (Ready-to-Eat in Buns, or 3 Pieces in Vacuum Pack)].
Foreign Name: Tofu Burger.
Manufacturer's Name: Auenland Tofu und Soja Produkte.
Manufacturer's Address: Hub 2, D-8210 Prien-Chiemsee, West Germany.
Date of Introduction: 1982. March.
Wt/Vol., Packaging, Price: Vacuum packed.
New Product–Documentation: Talk with Peter Wiegand. 1987. Nov. 11. He introduced 7 tofu products on the day he started. The Tofu Burgers were the most successful of his products, followed by the Tofu Cakes. He was in business for two and a half years, closing in Oct. 1986. He was very evangelical during that time.

5498. **Product Name:** [Auenland Tofu].
Foreign Name: Auenland Tofu.
Manufacturer's Name: Auenland Tofu und Soja Produkte.
Manufacturer's Address: Hub 4, 8210 Prien-Chiemsee, West Germany. Phone: 08054 579.
Date of Introduction: 1982. March.
Wt/Vol., Packaging, Price: Bulk.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Owner: Peter Wiegand. Letter from Peter Wiegand. 1982. June 22. Followed by phone talk. Note: Apparently the company had not yet started. Peter got interested in tofu, in part, through Wildwood Natural Foods in Fairfax, California.

Form filled out by Peter Wiegand. 1982 (probably). Says that his company, Auenland Tofu, started making tofu on a commercial scale in April 1982. It is sold both vacuum packed and bulk in water.

Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: Peter Wiegand. Label. 1983, undated. 6.25 by 4.5 inches. Self adhesive. Many colored. Shows rayed sunrise over a rural village.

Letter from Wolfgang Furth-Kuby of Sojaquelle. 1984. April 26. "Lukas Kelterborn is not with us any more. The *Rundbrief* was mainly his thing. I knew it was not going to work this way, but I let him do it his way so he could learn. Lukas wanted to go into production of tofu so badly. He joined with Peter Wiegand and some other people and after having stuffed some 70,000 German marks into Peter's exhausted business, all went bankrupt."

Talk with Paul Duchesne. 1989. Aug. 26. Much of the following is the result of a conversation Duchesne had yesterday with Michael Pierce in Georgia (Phone: 912-752-8070 Office; 912-742-4234 Home). Wiegand sometimes used to refer informally to his company as "Wildwood II" because he felt such a strong connection with Wildwood in Fairfax, but neither the company nor the product was ever officially named Wildwood Tofu. It was always called Auenland Tofu, from the first day. Michael Pierce was present in Germany when the company started production (from Feb. to July 1982) in a small dairy barn, not in a garage. Michael did the artwork for the original labels. As soon as the products hit the market, the first plant was too small. Peter will now be very hard to get hold of. Try contacting his friend and benefactor, George Eich, Aumuehle 8210, Prien Chiemsee. George is a filmmaker who has money and may have invested in Auenland. Wiegand is presently on the outs with almost everyone–maybe including George. Wiegand also knew Wolfgang Furth-Kuby, whom he called "the Shurtleff of Germany."

Wiegand ran the small company for a while, then built a larger plant. In July 1983 Wiegand visited Fairfax for the 2nd or 3rd time. That fall, in October, Duchesne's son Paul went back to Germany with him at his new and larger facility. So the new operation, which Michael described as a huge dairy almost the size of a basketball court, contained 4 large pots for cooking, troughs, etc. and it never got completely used. Wiegand was very much in debt and working very hard. Everyone wanted the tofu but not the second generation products. So he sold his tofu mostly to food processors who made their own second generation products. He was not good at organizing, negotiating, scheduling, or managing his workers, who were not very productive. He was enthusiastic and a good salesman. After a while, he went crazy. His wife, who had a better head for business than Peter, did the bookkeeping.

For more history, see interview with Paul Duchesne, 25 Aug. 1989.

Talk with Michael Pierce (Graphic designer, 408 2nd St., Macon, Georgia 31201. Phone: 912-752-8083 Office). 1989. Oct. 30. Svadesha, who started making tofu before

© Copyright Soyinfo Center 2013

Wiegand, had a small operation in southeast Germany near the border, making only about 25-30 lb/week of tofu, sold at 10-11 health food stores in small lidded plastic tubs immersed in water. His tofu was in the stores when Auenland introduced theirs. Pierce went to Germany in Feb. 1982. The kitchen was getting put together when he arrived. He helped Wiegand develop a press and they started making tofu in late Feb. They also made soymilk (*sojamilch*), a baked tofu sandwich, tofu pizza, and tofu apple cake. He has an early German-language publication with recipes plus some labels. Auenland's early tofu was sold in bulk. Everyone was ready for it and people wanted more. In the early days, Auenland's people would go to the Rajneesh center and give classes on how to cook with tofu to 60-70 people. The day the company opened, it was too small. So Wiegand tried to expand, but that was a disaster, which also destroyed his family. He couldn't make enough money. Michael went to India in Feb. 1983 and when he came back in June 1983 Wiegand had a gymnasium sized building with 4 big kettles. He got the money from his ex-wife's father. Auenland got hooked up with a company near Salzburg that made mochi and seitan. (Note: It sounds like Sojvita Produktions & Norbert Brunthaler in Lichtenwörth, which was making seitan and mochi by mid-1984, but Sojvita was located southwest of Vienna, far away from Salzburg). That company had a store in Salzburg but produced foods in a home about 15 miles outside of the city. Auenland smuggled tofu to them in Austria and brought back excellent Austrian-grown soybeans. Later that Salzburg company started to make tofu. Auenland also bought organic soybeans from France, and used them to make tofu. Pierce got to know Wolfgang Furth-Kuby, whom he feels played a key role in getting tofu started in Germany, in part by translating *The Book of Tofu* into German. Pierce never heard Wiegand call the company Wildwood, only Auenland. Auenland is a folk name for that part of Germany (a mystical golden triangle in the mountains); its not a map term. The area was also called the Chiem-gau meaning "Bay Area." And it was also in a place called Wildenwald, which means "Wildwood." So there seemed to be many cosmic connections with Wildwood in California. It was located about 60 miles southeast of Munich on the Way to Salzburg.

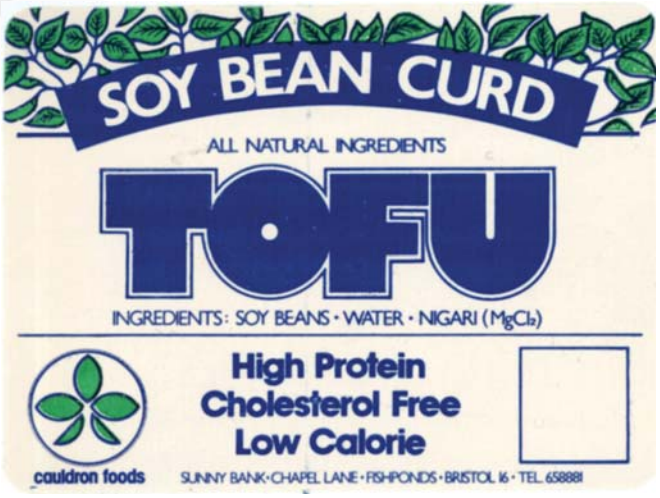
Pierce also recalls hearing about a big research organization connected with a university in Stuttgart, both growing and utilization. They wanted to develop a soybean that grew in the area.

5499. **Product Name:** [Baked Tofu Sandwich].
Manufacturer's Name: Auenland Tofu und Soja Produkte.
Manufacturer's Address: Hub 2, 8210 Prien-Chiemsee, West Germany.
Date of Introduction: 1982. March.
New Product–Documentation: Talk with Michael Pierce (Graphic artist, Macon, Georgia). 1989. Oct. 30. He recalls this as being different from the tofu burger, which was fried.

5500. **Product Name:** Tofu Burger.
Manufacturer's Name: Bud, Inc.
Manufacturer's Address: 1100 Wicomico St., Baltimore, MD 21230.
Date of Introduction: 1982. March.
Ingredients: Natural nigari tofu, carrots, cabbage, onion, celery, okara, soymilk, sesame seeds, sunflower seeds, soybean oil, sea salt, spices.
Wt/Vol., Packaging, Price: 7 oz vacuum pack.
How Stored: Refrigerated or frozen.
Nutrition: Per 3.5 oz.: Calories 190, calories 12 gm, carbohydrates 11 gm, fat 12 gm, sodium 250 mg (250 mg/100 gm).
New Product–Documentation: Label. 1982. March (dated). 4.5 inches square. Black and white on yellow. "Keep frozen. Completely vegetarian. All natural. No preservatives." Logo reads: "Soyfoods for a healthy world"; This company is run by a Taiwanese family.

This product is still being sold with the same label in July 1992.

5501. **Product Name:** Tofu: Soy Bean Curd.
Manufacturer's Name: Cauldron Foods Ltd.
Manufacturer's Address: Sunny Bank, Chapel Lane, Fish Ponds, Bristol 16, England. Phone: 858-881.
Date of Introduction: 1982. March.
Ingredients: Soy beans, water, nigari, magnesium chloride.
How Stored: Refrigerated.



New Product–Documentation: Soyfoods Center Computerized Mailing List. 1983. June 20. Owners: Philip Marshall and Peter Fagan. Original address: Sunny Bank, Chapel Lane. Later: 4, Conduit Place, Lower Ashley Rd., St. Paul's, Bristol BS2 9RL, England.

Richard Leviton. 1983. Trip to Europe with American Soybean Assoc. Oct/Nov. Unpublished manuscript. p. 26-28. See history of the company. Philip Marshall and Peter

Fagan started their partnership in Cauldron Foods in Sept. 1981. Philip was previously a partner with Paul Jones, and at the time he joined with Peter he was already a Bristol tofu maker selling some tofu in bulk to the converted. They now make 1,200–1,500 lb/week of tofu, all in one day. They are planning to do a fermented tofu spread.

Labels. 1983. 4 by 3 inches. Self adhesive. Blue and green on white. Bean vine drawing. "Soy Bean Curd. All Natural Ingredients. High Protein. Cholesterol Free. Low Calorie." Label. 1983, undated. 3 by 4 inches. Self adhesive. Red, beige, green, and white. "Soy Bean Curd. High protein 9.3%. Cholesterol Free. Low Calorie 85Kcal per 100 grams. All Natural Ingredients." Address: 4, Conduit Place, St. Paul's, Bristol, BS2 9RL.

Soya Bluebook. 1985. p. 100. Ad in The Vegan. 1986. Summer. p. 4. "Cooking with tofu? Look for the mark of quality. Tofu and smoked tofu." Address: 149A South Liberty Lane, Ashton Vale, Bristol, England.

Letter from Neil Robinson. 1989. Aug. 7. The three major tofu products in Britain, as far as I know, are (1) Tofeata Tofu by Haldane Foods (Hera), Leicester, England; (2) Cauldron Foods, Bristol, England; (3) Truehealth Tofu by Birchwood Foods, Wrexham, Wales.

Talk with Philip Marshall, founder. 1990. March 29. Cauldron Foods was founded in 1980 and began to produce tofu in late 1981 in Bristol. This was a pioneer tofu company in England.

Note: This is the earliest record seen (April 2001) in connection with Cauldron Foods Ltd.

5502. Herath, H.M.E. 1982. [Soybeans in] Sri Lanka. *INTSOY Series* No. 22. p. 172-75. J.B. Sinclair and J.A. Jackobs, eds. Soybean Seed Quality and Stand Establishment (College of Agric., Univ. of Illinois at Urbana-Champaign).
• ***Summary:*** Contents: Introduction. Liquid soymilk. Dried soymilk. Full fat soy flour. Soy-fortified bakery and other products. Low cost weaning food. Tofu. Tempeh. Soy dhal. Home level training and demonstrations.

"At the present time, the government has included soybeans with a few other field crops into a floor price system. During the last 12 months, the demand for soybeans has increased tremendously, with their use by some agencies in fortification programs... There is an immediate demand for 30,000 ha of soybeans. This target will be achieved by 1982.

"The bulk of the area under soybeans is presently confined to the rainfed highland... The primary objective of the Sri Lanka program is to develop a balanced soybean industry including production, marketing, processing and utilization...

"Accomplishments of the Soybean Food Research Centre (SFRC) include: Liquid soymilk. Dried soymilk: Nearly 5,000 lbs of dried soymilk (DSM) was manufactured... as a coconut milk extender/substitute. DSM has been found acceptable as a coconut milk extender by General Hospital in Kandy and Teaching Hospital in Peradeniya. The Rajarata Food Grain Processing Co., Ltd., a joint venture of the GSL and the private sector, is putting up a 4-ton FFSF/DSM plant in Maha Illuppallama, under the technical guidance of the staff at the SFRC.

"Full fat soy flour:... Nearly 70,000 lbs of FFSF has been produced at the pilot plant and sold through various sales outlets for fortifying wheat/rice flour at 5-10 percent levels... Soy-fortified noodles are being successfully marketed by Forbes and Walker...

"Tofu: Regular production of about 20 lbs of tofu per day has been done with a view to testing its acceptance for use in various curry preparations... Tempeh: Processing parameters for the production of tempeh at the cottage scale have been standardized... Soy dhal.

"By May, 1981, 1,077 trainees had followed the one- to two-week regular course, and 483 had completed the 'Sandwich Course.' More than one hundred demonstrations have involved about 6,000 participants, both from governmental and voluntary organizations." Address: Coordinator, Sri Lanka Soyabean Production Project, Deputy Director of Horticulture, Ministry of Agricultural R&D, Sri Lanka.

5503. Legume, Inc. 1982. Tofu makes the difference! Legume 100% Natural Tofu Lasagna (Ad). *Natural Foods Merchandiser.* March. p. 26. Also in Vegetarian Times, May 1982, p. 16. No. 55.
• ***Summary:*** "The 2,000 year old miracle food of the Orient is now available in convenient, heat & serve entrees and

© Copyright Soyinfo Center 2013

ready-to-eat snacks.

"Legume has created a full line of convenience foods based on the outstanding nutritional benefits of tofu. In today's high-pressure world of deadlines and responsibilities, we are dedicated to bringing you delicious, protein-packed foods that will meet both your busy schedule and your demand for high-quality nutrition. And it's all based on tofu.

"Try out other delicious tofu meals & snacks: whole wheat pizza, country pie, muffins, no-creme pies & cakes.

"Institutional pack available. A non-dairy product." Address: 150 Bloomfield Ave., Verona, New Jersey 07044.

5504. **Product Name:** [Soyabec Baked Tofu Roti].
Manufacturer's Name: Les Alimentents Soyabec Inc. (Importer). Made in Miami, Florida, by Swan Gardens.
Manufacturer's Address: 1215 Boulevard St. Joseph, Montreal, QUE, H2J 3K1, Canada.
Date of Introduction: 1982. March.
Ingredients: Eau, feves de soya, sauce soya (feves de soya, ble entier, sel de mer), epices, sulfate de calcium.
Wt/Vol., Packaging, Price: 227 g vacuum packed.
How Stored: Refrigerated.
New Product–Documentation: Talk with Yvon Tremblay and Richard Milon. 1987. Dec. 11. *Roti* means "A roast."

5505. **Product Name:** [Soyabec Tofu].
Foreign Name: Soyabec Tofu.
Manufacturer's Name: Les Alimentents Soyabec Inc. (Importer). Made in Miami, Florida, by Swan Gardens.
Manufacturer's Address: 1215 Boulevard St. Joseph, Montreal, QUE, H2J 3K1, Canada.
Date of Introduction: 1982. March.
Ingredients: Eau, feves de soya, sulfate de calcium.
Wt/Vol., Packaging, Price: 454 gm vacuum packed.
How Stored: Refrigerated.
New Product–Documentation: Talk with Yvon Tremblay and Richard Milon. 1987. Dec. 11. They imported the tofu by air freight 3,000 lb at a time, then delivered it to stores. It was the first vacuum packed tofu in Quebec. Soyabec stopped operations in early 1983. They had no money left to import. Transportation costs had increased and the U.S. dollar had become more expensive.

5506. **Product Name:** [Tofu Salad].
Foreign Name: Salad au Tofu.
Manufacturer's Name: Les Aliments Soyabec Inc.
Manufacturer's Address: Montreal, QUE, H2J 3K1, Canada. Phone: 514-276-9570.
Date of Introduction: 1982. March.
Ingredients: Tofu, shallots (échalotes), celery, carrot, parsley, mustard, sunflowerseed oil (huile d'tournesol), turmeric (curcuma), thyme, basil, chervil (cerfeuil), salt, pepper, garlic, salty-tasting herbs (herbes salees).
Wt/Vol., Packaging, Price: 250 gm plastic tub.
How Stored: Refrigerated.
New Product–Documentation: From Yvon Tremblay and La Magie du Tofu. In six years he served at least 100,000 samples. Sold about 500 lb/week.

5507. Leviton, Richard. 1982. The American soy deli: A collection of articles, interviews, artifacts, and recipes from practitioners of the new marketing innovation for retailing delicious, ready-to-eat soyfoods to the public. 100 Heath Rd., Colrain, Massachusetts 01340. 74 p. March. Unpublished manuscript. 28 cm.
• ***Summary:*** An interesting collection and collage of reprints and photos, containing some original material such as: A soyfood primer and cookbook roundup by Lorna Sass. Article–"On the road for the fast food burger: A soy deli odyssey," by Richard Leviton (Vegetarian Times, April 1982, p. 62-65. Note: This is the longer, unedited original manuscript, 13 pages). Ad and 3-page menu from The Southfork Tofu Cafe (322 Fuller Ave., Helena, Montana). Menus from Far Pavilions (Telluride, Colorado), The Tofu Shop (768 18th, Arcata, California), Brightsong–The Real Food Tofu Café (Redwood Valley, California).

Article–"Kicking the dairy habit," by Richard Leviton (East West Journal, June 1980, p. 60-65). Article–"Food Showmanship," by Linda Reedy (Foodservice Marketing, Nov. 1981, p. 36-41). Article–"Fast food: A nutritional trap" (New York Times, 19 Sept. 1979). Article–"Restaurant fast foods in the grocery store? Franchises could test new income source," by Stan Merritt (April 1980, p. 18, 22). Menu–"Recipes for a versatile food" (6 tofu recipes). Shopping list (form to fill out)–Mother Earth, natural foods, 604 N.W. 13th Street, Gainesville, Florida 32607. Phone: (904) 378-5224. "Fresh tofu comes to Northern Cal.," by Matthew Schmit (Sketch of The Tofu Shop in Arcata, 13 Feb. 1981). Article–"'Back to basics' approach provides answers to challenges facing product developers," by James S. Burns (Oct. 1979, p. 40, 42, 46, 58). Address: Colrain, Massachusetts. Phone: 413-624-5591.

5508. Quebral, Florenco C. 1982. [Soybeans in] The Philippines. *INTSOY Series* No. 22. p. 166-71. J.B. Sinclair and J.A. Jackobs, eds. Soybean Seed Quality and Stand Establishment (College of Agric., Univ. of Illinois at Urbana-Champaign).
• ***Summary:*** Contents: Introduction. Cultivar improvement. Planting. Inoculation and fertilization. Pests and diseases. Intensive cropping. Utilization. Costs and returns. Marketing. Marketing program. Areas that need attention. Cooperating agencies.

"The domestic supply of soybeans has never been sufficient to meet national demands for food, feed, and industrial uses. Total domestic soybean production in 1978 was reported to be 7,099 metric tons. Approximately 176,000 metric tons of soybeans, costing $30.8 million, were

© Copyright Soyinfo Center 2013

imported.

"To boost domestic production, the government has launched projects like Masaganang Maisan, the white corn and feed grains program, and the National Soybean Development Program...

"Researchers at the University of the Philippines at Los Baños have produced bottled soymilk (Philsoy) using the hot water grind technique... Fermented soybean products, such as soy sauce, soy cheese (tokwa [tofu]), soy paste (miso), soy curds (tahuri [tofu in brine]), and canned salted beans (tausi [fermented black soybeans]) are the most common soybean products used as ingredients in traditional Filipino dishes. A cheese-like product served with sugar syrup (taho) is sold by ambulant peddlers in urban centers." Address: Prof. of Plant Pathology, College of Agriculture, the Univ. of the Philippines at Los Baños.

5509. Saio, Kyoko; Nikkuni, Ikumi; Ando, Yoko; Otsuru, Masaru; Takeuchi, Yutaka; Kito, Makoto. 1982. Soybean quality changes during model storage studies. *Shokuhin Sogo Kenkyujo Kenkyu Hokoku* (*Report of the National Food Research Institute*) No. 40. p. 189-95. March. [14 ref. Eng; jap]

• ***Summary:*** Reprinted from *Cereal Chemistry* 57:77-82 (1980). Address: 1-2. National Food Research Inst. (Shokuhin Sogo Kenkyujo), Kannon-dai 2-1-2, Yatabe-machi, Tsukuba-gun, Ibaraki-ken 305, Japan.

5510. Shurtleff, William; Aoyagi, Akiko. 1982. History of the soyfoods movement in North America. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549. 50 p. March. Unpublished typescript. Available online at www.soyinfocenter.com.

• ***Summary:*** A comprehensive history of the subject. Contents: New image of soyfoods and causes of interest: Good health, nutrition and fatness, weight loss diets, low-cost protein, meatless and vegetarian diets, world hunger, appropriate technology and right livelihood, voluntary simplicity, ecology and conservation, interest in East Asian cultures, spiritual practices, and cuisines.

Allied movements: Macrobiotics, natural foods, Rodale Press, vegetarianism.

Characteristics of the soyfoods movement: Major foods and types of products, comparison of soy protein industry (high tech) and soyfoods industry (low tech), appropriate technology, relevance to the Third World, conclusion.

The Farm in Tennessee. *The Book of Tofu* and Soyfoods Center. Early soyfoods manufacturers. Soyfoods delis and restaurants. Second-generation soyfoods manufacturers and distributors (e.g. Swan Foods in Florida). Tofu kits and equipment. Soyfoods terminology. Founding of the Soycrafters/Soyfoods Association of North America: Richard Leviton. Growth of the Soyfoods Association: First conference, Soyfoods magazine, subsequent conferences, SANA problems, The New Soyfoods Association–Gary Barat and Michael Austin of New York City.

Soyfoods books and booklets. Media coverage. Growth of the soyfoods industry, including the Soycrafters Apprenticeship Program. Soyfoods Marketer/Distributors: Yellow Bean Trading Co., Garden of Eatin', Jolly Licks. Soyfoods in foodservice institutions. Influence and activities abroad. The future.

Note: This is the earliest document seen (Oct. 2008) that uses the term "Second-generation" in connection with soyfoods to refer to a soyfood product which uses a basic soyfood as its major ingredient. Thus, Tofu Cheesecake, Tempeh Lasagne, and Instant Miso Soup are all commercial "second-generation soyfood products." If made at home for home use, they would be "second-generation soyfoods." For some products, the line between basic and second-generation soyfood products is blurred, since some second-generation products that have a long history have come to be thought of as basic. For example: Deep-fried tofu burgers (*ganmodoki*), teriyaki sauce, etc. Address: Lafayette, California. Phone: 415-283-2991.

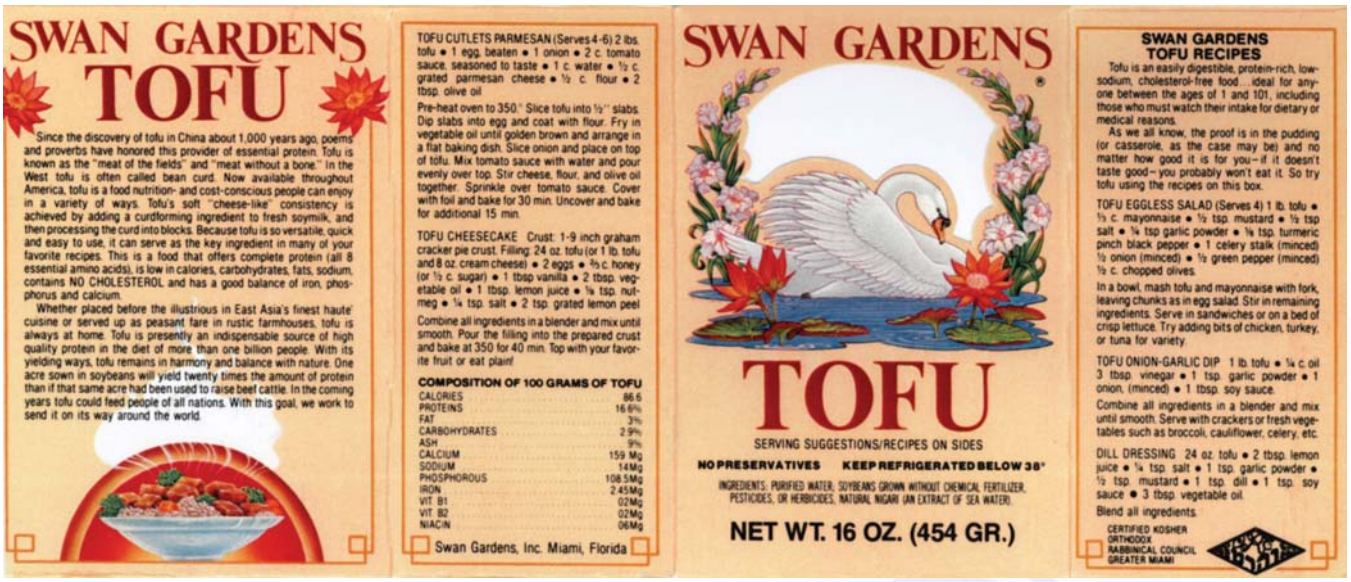
5511. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Soy Joy or Tofu Denmark.
Manufacturer's Address: 231 Valbylangade, 2500 Valby, Denmark.
Date of Introduction: 1982. March.
New Product–Documentation: Letter from Sjon Welters. 1982. April 16. This company was just started by macrobiotic people in Denmark. Contact: Per Fruergaard, Valbylanjady 231, 2500 Valby, Denmark. The health inspectors refused to allow them to use nigari. The distribution will be done by Urtekram, a macrobiotic distributor.

Talk with Thomas Andersen. 1990. May 25. Followed by letter of June 23. The two earliest tofu companies in Denmark, which started at about the same time, were Dansk Tofu (owned by Ted Goldberg and some other guys) and Soy Joy (231 Valbylangade, 2500 Valby, Denmark) in the Valby district of Copenhagen. The owners of Soy Joy were very idealistic. They never got a packaging machine for their tofu; they just delivered it in bulk in water, which the Danish health authorities, who are very strict, did not like. They were only in business for about 3-6 months.

5512. Soy Plant Co-op Inc. (The). 1982. Price list effective 3/22/82 [22 March 1982]. Ann Arbor, Michigan. 1 p. 28 cm.

• ***Summary:*** This typewritten sheet contains three columns: Supplier, product, and price. The Soy Plant is supplier of (packaged or in bulk): Tofu (1 lb tub), plain soy milk and flavored soy milk (quarts), tempeh (8 oz), soysage (8 oz), miso garlic dressing (16 oz), Soyanaise (soy mayo, 16 oz), carob tofu pies, missing egg salad, tofu spinach quiche, gomaseao [gomashio]. Other suppliers are Micro Farms

© Copyright Soyinfo Center 2013



(alfalfa- or mung bean sprouts), Westbrae Foods (miso–3 types), The Grocery (The Tofu Cookbooklet), and Learning Tree (tofu kit, $13.50 each).

New products available soon: Tempeh salad. Tofu tahini spread. Address: 711 Airport Blvd., Suite #1, Ann Arbor, Michigan 48104. Phone: (313) 663-8638.

5513. **Product Name:** Tofu (Vacuum Packed in a Box with Window).
Manufacturer's Name: Swan Gardens.
Manufacturer's Address: 940 17th St., Miami Beach, FL 33139. Phone: 305-324-8910.
Date of Introduction: 1982. March.
Wt/Vol., Packaging, Price: Vacuum packed.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods. 1983. Summer. p. 39. "The Miami soyfoods scene. In March 1982 Swan introduced their boxed tofu." Spot in Soyfoods. 1983. Summer. p. 55. "The Boxed Look." The 1 lb cake of tofu contains 16.6% protein and retails for $1.19 in supermarkets. The first boxed tofu appeared in 1982, and was the second major tofu packaging innovation, after vacuum packaging, which started in about 1979.

Talk with confidential source. 1987. Lisa tofu undersold Swan and drove the company into Georgia. Swan moved to Decatur, Georgia. Oct. 1988. Stops making vacuum packed tofu for Tree of Life, by mutual consent. Swan has too much business.

5514. Tremblay, Yvon; Boyte, Frances. 1982. La magie du tofu: 80 recettes simples et économiques [The magic of tofu: 80 simple and economical recipes]. Montreal and Paris: Stanke Ltee. 101 p. Illust. No index. 22 cm. [Fre]
• ***Summary:*** Contents: Preface. The health advantages of tofu. Preparation of tofu. 1. Hors-d'oeuvres. 2. Soups. 3. Salads. 4. Sauces. 5. Main dishes. 6. Desserts. Address: 1. Chef, Montreal, QUE, Canada; 2. Dietitian.

• ***Summary:*** Discusses Yvon Tremblay and his new book La Magie du Tofu. He has been a specialist in vegetarian cuisine for 10 years. Address: Canada.

5519. Carlson, Lisa. 1982. Tofu–the new yogurt of the '80s? *Middlesex News* (*Massachusetts*). April 14. Wednesday.

© Copyright Soyinfo Center 2013

• ***Summary:*** Includes interview with John Paino of Nasoya, which makes 5,000 lb of tofu a day. A portrait photo shows John Paino, "tofu entrepreneur." Note: This is the earliest document seen (Feb. 1990) that uses the phrase "yogurt of the '80s" in the title with reference to tofu.

5520. Lemov, Penelope. 1982. Family out: Golden China. *Washington Post*. April 14. p. MD13.
• ***Summary:*** This is a review of the Chinese restaurant Golden China in Rockville, Maryland. "The sixth dish in our dinner was deep-fried bean curd with vegetables ($5.25), ordered for the vegetarian in our midst. He didn't like it, and neither did we." Address: Special to the Post.

5521. Welters, Sjon. 1982. Re: Recent developments with soyfoods in Europe, and ties with macrobiotics. Letter to William Shurtleff at Soyfoods Center, April 16. 6 p. Typed, with signature on letterhead (photocopy).
• ***Summary:*** This letter, whose letterhead reads "Manna Natuurlijke Levensmiddelen," contains names and addresses of many new soyfoods companies, many of them started by people interested in macrobiotics. Names and addresses of the following companies are given: Tofu Denmark (in Valby, run by Per Fruergaard, a macrobiotic), Bernard Storup, Ab & Paulien Schaft (Dutch, setting up a small shop in Baillestavy, France, to make miso, shoyu, natto, and koji), Traditions du Grain (Jean Luc Alonso is setting up a macrobiotic tempeh shop in Ivry France; they will start this summer), Paul Jones (Tofu shop in London), Saskia de Jong (may make miso in Ireland), de Brandnetel (tofu shop in Antwerp, Belgium), Jonathan (makes tofu, ganmo, seitan, mochi in Ekeren, Belgium. Run by J. v. Ponseele), Seven Arrows (Leuven, Belgium; making tofu), Lima Foods (now sell miso made at their plant and farm in France), Witte Wonder (Den Haag, Netherlands), De Morgenstond (Bakkeveen, Netherlands), Jakso (Heerewaarden, Netherlands. Run by Peter Dekker. The first and only shop making tempeh from organic soybeans), Firma Lembekker (Amsterdam), Unimave (Lisbon, Portugal), Jose Parracho (Setubal, Portugal), Swame [sic, Swami] Anand Svadesha (Furth im Wald, West Germany), Bittersuess (Cologne, West Germany. Attn: Thomas Kasas/Karas). Three distributors of soyfoods and natural foods in Germany are YinYang (Berlin), Rapunzel (Heimraadshofe), and Mutter Erde (Werbelen). In Finland: Luonnonruokakauppa AUMA (Helsinki). In Switzerland: Verena Krieger of Sojalade (Engelberg, tofu shop), Hans Rudolph Opplinger (Cham, tofu shop), Marty Halsley (Nyon, tofu & tempeh), Restaurant Sesam (Bern). P. Ton van Oers is a Dutch priest who works in Kananga, Zaire. The natives have grown soya for 10 years and he is thinking of making tofu and soymilk from them.

"In Great Britain the East West Centre is very active in promoting soyfoods. As a part of the Kushi Institute program they have home-scale processing, in which tofu, tempeh, and miso-making are taught by Jon Sandler [Sandifer?]. He is the tempehmaker of the EWC too at Community Health Foundation, 188 Old St., London EC1. In the Netherlands, a great deal of soyfoods promotion is done by the East West Center and Manna. As you probably know, Manna was the first to introduce miso, tamari, shoyu, tempeh, tofu and koji to the larger public and we are still the main promoters of soyfoods as part of a more natural, vegetarian, and economic diet. Manna has been followed by a lot of other distributors of natural and health foods. We have two competitors in the tofu business: Witte Wonder and De Morgenstond.

"At the moment I'm the only teacher giving lectures on homescale miso-, tofu-, tempeh-, shoyu-, tamari-, natto-, and koji-making in the Netherlands. Mainly at the East West Centre and sometimes at different places in the country. People are starting to get interested."

Note: This is the earliest document seen (Jan. 2003) concerning the work of Swami Anand Svadesha of West Germany, and of Thomas Karas of Bittersuess (Cologne, West Germany). Address: Stichting Natuurvoeding Amsterdam, Meeuwenlaan 70, 1021 JK Amsterdam-N, Netherlands. Phone: 020-323977.

5522. Timmins, Tom. 1982. Re: Recent developments at New England Soy Dairy. Questions answered on Soyfoods Center letterhead (dated April 17) and returned to SC. 3 p. Typed, with signature on letterhead.
• ***Summary:*** The company name was changed to New England Soy Dairy from Laughing Grasshopper in Nov. 1977, at the time of incorporation. The company's Naturally Gourmet program was started in Sept. 1981, when egg roll skins, won ton wrappers, ginger soy sauce, and five-spice powder were launched, In Sept. 1982 bean sprouts, fresh noodles, and new tofu products will be added. In Oct. 1981 the company published a cookbook titled *Soydairy Delights of Tofu.* Sales for 1981 were $1.25 million. Bongrain was interested in buying the company but they were not willing to pay the required price.

Other new developments: Company expansion into primary markets of Philadelphia, Metro New York, and Boston; secondary markets of Hartford and New Haven (Connecticut), Albany and Buffalo (New York), and Portland (Maine). Company sales people in New England and New York are doing many tofu cooking classes in supermarket chains. There are 3 classes a day and 100-200 people attend each. Tofu production (in lb/week) grew as follows: 8,000 in Jan. 1978, 18,500 in 1979, 24,500 in 1980, 30,000 in 1981, and 40,000 in 1982.

"Our success to this point emerges from a combination of extremely talented and hard-working people focused on specific goals. Our team grows personally as it grows professionally."

Attached are: (1) Four pages of edited manuscript about the history of the company, with 1½ pages of handwritten

© Copyright Soyinfo Center 2013

comments. (2) A graph of the company's tofu production from 1977 to 1982, in 1,000 lb. manufactured per week. Address: Greenfield, Massachusetts.

5523. Hawken, Paul. 1982. History of Erewhon and macrobiotics in America. Part I (Interview). Conducted by William Shurtleff of Soyfoods Center, April 18. 3 p. and 5 p. transcripts.

• ***Summary:*** Hawken played an important and very innovative role in establishing the natural foods industry in America and in building Erewhon into a major distributor of macrobiotic and natural foods.

Chico-San imported foods from Tokyo CI (Centre Ignoramus); Muso didn't exist at that time.

The Kushis never made tofu or nigari tofu. They were not big tofu eaters, largely because tofu was considered too yin–ridiculous. Then people started craving it, and buying it from Chinatown. But the tofu they bought was not made with nigari.

By the mid-1960s there were roughly 300 to 2,000 people actively involved with macrobiotics in the USA–including Michio Kushi's students, Herman Aihara's students, and those in New York and Boston.

Beth Ann Simon had started using heroin again before she died [on her No. 7 macrobiotic diet]. The family covered it up, blaming Japanese and tamari. But she was not the only one who died. George and Lima Ohsawa's only child died within a year of being born in Tokyo (according to Lima) from excess salt.

Erewhon was started by Aveline Kushi, not by Evan Root. Paul does not know who gave Erewhon its name [it was Aveline Kushi]; of course, it is "Nowhere" scrambled, as in the title of the famous 1872 novel by Samuel Butler about a utopian island divested of machinery. Originally various people would drive to Pennsylvania to see the Mennonites and Walnut Acres. It was a buying club for students who lived in the Kushi's house in Cambridge, Massachusetts. Foods such as wheat, [whole-wheat] flour, oatmeal. Nothing imported from Japan. It was started with $500 cash in the basement of the Kushi's house. It backed into being a store since it was cheaper to buy larger quantities. The food was divided up into little bags and a price was written on each. It was sort of a way of buying food for people at the Kushi's house, like Aveline doing her shopping for 10-12 people in the first big macrobiotic study house. It began to outgrow the house and outside students wanted good food. It was never seen as a business or a money-making venture. Good food was so difficult to get in those days.

Another source of good food was Infinity Foods in New York City, started and owned by Howard Rower; they had a warehouse and were wholesaling by mid-1965. Soon Howard was importing miso and tamari (shoyu / soy sauce) from Tokyo CI. "This 'guaranteed' its quasi-medicinal effects. Otherwise it didn't work. It was actually the best food–really." Then Howard started to import directly from the manufacturers of miso and shoyu in Japan: Hatcho miso and Marushima shoyu (whose owner knew Ohsawa intimately). Paul visited Marushima in 1969. Paul thinks Marushima bought their shoyu from other shoyu factories on the island, or maybe they made it in the early days. Paul thinks there is a big difference in taste between shoyu made from whole soybeans and that made from defatted soybean meal (*dasshi daizu*). Paul was suspicious of Marushima shoyu in 1970; he demanded that Muso Shokuhin change to Johsen [Sendai Miso Shoyu] as their source; Johsen has a long history and the owner was also one of Ohsawa's cronies.

Paul left Erewhon in 1973. He went to Japan three times. The first trip was in March 1969, when he set up Mitoku in the natural foods business; before that they were an importer of hockey equipment. Muso was called Osaka CI; neither of those two companies were exporters before that time.

In the early days of the below-ground store in Boston, more of the foods came from Lima Foods in Belgium than from Japan. The miso and shoyu in those day came from Infinity Foods in New York City. They did not carry tofu because there was no refrigeration. None of the food was sent by the Kushis' friends.

In the early days of that store, Evan Root just tended the store, which had sales of about $20–$30 a day. The store was Aveline's idea. Evan was Aveline's lover–and not the only one. The store was originally called simply "Erewhon." Paul later added the words "Trading Co." when he incorporated it in the late fall of 1967. Paul and Aveline each owned 50% of the corporation. During its first year as a corporation, sales went from $1,000/month to $9,000/month–and not because it was macrobiotic. Erewhon was the first natural food store (as opposed to health food store) in America. It sold no pills. Many of the customers were not macros; they wanted whole foods. In mid-1968, as Paul was ready to leave Erewhon, someone came into the store and asked: "How do you know the oil is cold-pressed? And how do you know the grains are organically grown? He couldn't answer. So he wrote letters and found out that most were not what they claimed to be. Then Paul decided to use Erewhon to create a true food supply. He went directly to farmers. He didn't trust anyone. The idea was to know where the food came from and to have no middlemen between Erewhon and the producers.

In Oct. 1968 the little Erewhon retail store moved up and across the street to a new location at 342 Newbury Street. At that time they began to sell wholesale and to import from Japan, by correspondence with Mr. Kazama. The first import order from Japan, dated Aug. 1968, was *aka miso* (red rice miso–superb) from Sendai Miso Shoyu and Marushima shoyu. Soon customers who used to drive 400 miles to buy staples from Erewhon started to open their own stores. The natural foods business mushroomed. Erewhon started selling tofu in 1968 at 342 Newbury; they got it from

© Copyright Soyinfo Center 2013

a Chinese tofu maker in Boston. Nigari came in much later, after 1973. Neither Evan nor anyone else wanted to work at or run Erewhon; they all wanted to teach macrobiotics.

Paul was selling whole dry soybeans at that time, but mostly non-macros were eating those soybeans. Erewhon's first supplier, in mid-1968, was a wheat grower in North Dakota. Carl Garrich in Lone Pine, Arkansas, was much later. Paul got his first soybeans from a guy in a boxcar who was an insurance salesman, but who worked one day a week selling soybeans and wheat. Paul also bought soybeans from Deaf Smith County, Texas. Paul knew Frank Ford of Deaf Smith County in the early days. Paul was vice president of Arrowhead Mills before Roger Hillyard even worked for them. He ground his flour in a boxcar.

Paul wrote a long and detailed article about the early history of Erewhon titled "Erewhon: A biography. The view within," published in the Aug. 1973 issue of *East West Journal*. He was upset at the time. It was critical of the Kushis, and Paul explained why he was about to leave Erewhon. Robert Hargrove, editor of the journal, ran it anyway. Since then, Erewhon's history has been sanitized. Continued. Address: California.

5524. Schmit, Matthew. 1982. Re: The booklet "Peaking Out." Letter to William Shurtleff at New-Age Foods Study Center, April 19. 1 p. Handwritten, with signature on letterhead.

• ***Summary:*** "I'm sending one of the last known copies of 'Peaking Out.' The booklet was originally put together by our collective group in 1978. When the group disbanded in the Fall of 1979, Catherine Peterson purchased the restaurants and renamed it 'Far Pavilions.' She still operates it, I've heard, although I haven't been back there for almost 3 years."

"The Arcata Shop is holding its own... and growing in fact. Our group has recently been joined by Linda Redfield, compiler of the booklet 'Vegetarian Cooking with Tofu.' Last month was our record month, over $6,000 in gross sales. The increase was due largely to hot take-out food and retail / wholesale deli items."

Note: A dragon logo is in the upper right corner of the letterhead. Address: Founder and owner, Tofu Shop (The), 768 18th St., Arcata, California 95521. Phone: (7007) 822-7409.

5525. Shurtleff, William; Aoyagi, Akiko. 1982. History of tofu. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549. 119 p. April 21. Unpublished typescript. Available online at www.soyinfocenter.com.

• ***Summary:*** A comprehensive history of the subject. Contents: Introduction. Etymology. Part I: History of tofu in China. Origin and developments to 960 A.D. Sung dynasty, 960-1279. 5526. Kim, Gai W. 1982. Re: Details of introducing tofu [Boncheese] to Sri Lanka. More on replacing coconut milk with soymilk. Letter to William Shurtleff at Soyfoods Center, April 23–in reply to inquiry of April 13. 2 p. Typed, with signature.

• ***Summary:*** "Thank you for your letter dated 13 April 1982 asking me for information about Sri Lanka's first tofu shop."

The name of the show was Boncheese, 128 Kitulwatte Rd., Colombo, Sri Lanka. Phone: 596-992. Owner: Mr. U.N. Gunasekera; he is one of the few big contractors in Sri Lanka.

Work on the factory was completed by March 1980. The product, Boncheese, was publicly retailed at a stall in Kolpetty Market, the largest market in Colombo. The factory had to be closed from December, 1980 to March, 1981 due to a shortage of soybeans in the local market. At the moment, Cornel's Super Market, which opened in early August, the only Super Market in Colombo, is the sole sales outlet for Boncheese; 60 lb per day is supplied.

Sri Lankans usually cut tofu into ½-inch cubes and deep fry them before adding them to curry in place of whole boiled eggs or beef. Foreigners and Sri Lankans who have lived abroad are the best customers. "I have already given quite a few demonstrations on how to use tofu but, I think, more efforts should be made.

"I named tofu as 'Boncheese' in order to give Sri Lankans a name that was more familiar to them. Locally any bean is called 'Bonchi.' I added 'Cheese' to make it 'Boncheese' because of its similarity in texture and in the way it is made like *farmer's cheese* which I used to replace

© Copyright Soyinfo Center 2013

with tofu when it as not available.

Sri Lankans use coconut milk to make their curries; it is not only very expensive but also very rich in cholesterol [high in saturated fats]. So far I succeeded in replacing coconut milk with diluted soya paste at the kitchens of Colombo General Hospital and Welikade Prison. The Boncheese factory delivers about 30 kg (dry weight) of soybeans wet ground every morning to those institutions 365 days a year. Since 500 gm of soybean replaces 10 coconuts, 600 coconuts are not used and that means 100% saving in cost to the institutions.

At my urging, the Nutrition section of the Ministry of Plan Implementation already ordered two grinding machines from Bean Machines, Inc. One machine will be given to the Welikade Prison kitchen so that it will not only be self-sufficient in making its own soy paste (at the moment only 30% of the coconut milk is replaced by soy paste) but will also be able to make tofu and soy bread. The prison farms are already growing their own soybeans! Address: c/o UNDP in Sri Lanka, P.O. Box 1505, Colombo, Sri Lanka.

5527. Dreyer, Lawrence. 1982. Re: International fair and symposium on soya products in Salzburg. Letter to William Shurtleff at Soyfoods Center, April 27. 2 p. Typed, with signature. [Eng]

• ***Summary:*** "The Way of Nature (*Weg der Natur*), a foundation, was established in Austria with the express purpose of disseminating information about macrobiotics, food, and their relationship to our health. Each of the founding members have had at least 2 months training at a temple in Japan." The foundation plans to hold an international fair named Bio Life 2000 in Salzburg from 17-20 Nov. 1982. "The foundation has, for the past two years been linked to a Natural Food Shop and has been, for this period, producing tofu and miso. This shop will be represented at the Fair and will be exhibiting and selling macrobiotic foods, snacks, and drinks. To run concurrently with the Fair, the Foundation is also planning a symposium on Soya products, Miso, Tofu, Tempeh, etc.

"The program will include lectures and discussions on planting and growing soya beans, making soya products, the suitability and advantages of soya products in the diet of Mankind with particular emphasis on the peoples of the West, and the substitution of soya products for animal products as a source of protein. There will also be demonstrations on cooking natural foods and the production of tofu and miso.

"The symposium will be conducted in both English and German and possibly also in French. The media, press, radio and TV have all expressed a keen interest in this fair, so a wide coverage is assured. We would be delighted if you, as the initiator of the use of tofu in the West, would be prepared to participate in this fair."

Note: A handwritten letter from Lawrence Dreyer (1983 Feb. 15) states that this fair was never held. His company is still producing tofu with equipment purchased in Japan a couple of years ago. Address: Director.

5528. Mizono, Jack. 1982. History of Azumaya (Interview). *SoyaScan Notes.* April 30. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Azumaya started in about 1920 in Stockton. Jack does not know the name of the man who started it. A Mr. Teranishi bought the company in 1926 and moved it to San Francisco in about 1928. His son took over the business in 1930 and ran it until 1936, then sold it to Mr. Sakamaki, who ran it for 6-12 months, then in Feb. 1937 sold it to George and Jack Mizono, and their mother and father. The father was named Saichi Mizono.

George, the eldest brother, worked at Azumaya from the time his family bought it. The father loved tofu. Jack joined them as soon as he graduated from high school. The business was closed during World War II, but after the war the 4 brothers ran it. It was very slow, a real struggle. In the early 1960s business started to pick up. At that time, they delivered direct to stores. The Berkeley Co-op was their first account outside the Japanese stores. They sold tofu to the Co-op loose, in bulk, before Azumaya began individual packaging. After Azumaya began packaging, there was resistance from the Co-op. People complained and feared bad sanitation. Address: Azumaya Inc., 1575 Burke Ave., San Francisco, California 94124. Phone: 415-285-8500.

5529. Auenland Tofu und Soja Produkte. 1982. Auenland Tofu und Soja Produkte [Auenland Tofu and soy products (Brochure)]. Prien-Chiemsee, West Germany. 4 p. 29 cm. [Ger]

• ***Summary:*** The colorful cover of this brochure (see next page) was illustrated by Michael Pierce, an American friend of Peter Wiegand, who started the company. The cover is filled with an illustration of a rayed orangish-red sun setting behind a range of green mountains over a little German village with red-roofed houses and a church. In the foreground is green grass, then flowery knolls and a small river. The inside two pages are devoted to a nine-point explanation of "What is Tofu?" On the rear cover are six recipes, below which we read: "Further recipes are available in *Das Tofu-Buch* (Ahorn-Verlag [published July 1981]).

Talk with Michael Pierce of Georgia. 2000. Oct. 11. He confirms that he illustrated this cover in about April 2000. It appeared at about the same time as Auenland's first products. Peter Wiegand started the company using his wife's money; that's one reason he is no longer married to her. Address: Hub Bleimhaus, D-8210 Prien-Chiemsee, West Germany.

5530. **Product Name:** Soybean Curd, and Soy Milk. **Manufacturer's Name:** Dae Han and Company. **Manufacturer's Address:** 18300 S.W. Boones Ferry Rd.,

© Copyright Soyinfo Center 2013

Durham, OR 97223. Phone: 503-620-8983.
Date of Introduction: 1982. April.
New Product–Documentation: Form filled out by Yeun Mo Koo (Korean). The company started on 1 April 1982.

Talk with Paul Moss, who has worked with Dae Han for 7 years. 1990. May 28. The company name is now Dae Han, Inc., 737 S.E. Alder St., Portland, Oregon 97214. Phone: 503-233-8638. Paul plans to use their plant to make tempeh. Labels sent by Paul Moss. 1990. May 10. The soymilk is now called Fresh Wonder Soy (Plain Soy Beverage). The two types of tofu are Organic Regular Tofu (Japanese Style), and Organic Firm Tofu (Chinese Style). Both are certified kosher by Rabbi Yonah H. Geller.

5531. *East West Journal.* 1982. Bookshelf (Ad). April. p. 70-72.
• ***Summary:*** This mail order catalog includes four types of books; the first two are related to macrobiotics. 1. Getting started. 2. Cooking. 3. Exercise. 4. General topics: Incl. *The Book of Tofu* and *The Book of Miso* by Shurtleff & Aoyagi.

5532. Everybody's Vegetarian Restaurant. 1982. Menu. Nashville, Tennessee. 1 p.
• ***Summary:*** Contains many recipes using tofu, tempeh, cooked whole soybeans, plus soymilk ice cream ("The original soy milk Ice Bean" in cones, cups, milk shakes, or sundaes), soy sour cream or mayo, soy milk shakes, tofu cheesecake, and apple crisp a la mode. Address: 120 21st Ave. North, Nashville, Tennessee. Phone: 329-2000.

5533. **Product Name:** Eden's Orchard Tofutini (Non-dairy Frozen Dessert; Renamed Tofu-Zert by Jan. 1984) [Banana, Vanilla, Rum-Raisin, Maple-Walnut, Chocolate, Strawberry, or Almond].
Manufacturer's Name: Heller Enterprises.
Manufacturer's Address: 395 Atlantic Ave., East Rockaway, NY 11518.
Date of Introduction: 1982. April.
How Stored: Frozen.
New Product–Documentation: Talk with Carl Tropper of Heller Enterprises. 1985. Jan. 17 and 25. Shurtleff & Aoyagi. 1985. Tofutti & Other Soy Ice Creams. p. 50-51. David Mintz's Tofutti and Carl Tropper's Tofutini were both launched in New York retail stores in the spring of 1982. Mintz threatened to sue for trademark infringement and his lawyer got a cease and desist order. Tropper changed the

© Copyright Soyinfo Center 2013

name to Tofu-Zert. See Also Tofutini Dessert, launched by American Food Lines in Merrick, NY, Dec. 1982.

5534. Jacobs, Leonard. 1982. The Chico-San story: Popularizing rice cakes in America (Continued–Part II). *East West Journal*. April. p. 58-61.

• ***Summary:*** Continued: "By the end of the year, Ohsawa had located an old rice cake machine in Japan and shipped it to Chico. Kennedy had it refurbished and assembled and began the first rice cake manufacturing in America. (Basically, rice cakes are made by soaking rice, adding measured portions into individual molds, heating them under pressure, and then releasing the pressure so they puff uniformly and take on the shape of the mold.) However, this first machine was manually operated and required a strenuous effort to stamp out individual crackers. Since the operation of the machine was sending the employees to the chiropractors more and more frequently, Kennedy redesigned it to operate more automatically. Eventually he created a design which worked fairly easily, and they began selling the rice cakes as quickly as they could manufacture them.

"To ensure the quality of the rice, Kennedy and Aihara started searching for the best rice farmers in the area. Eventually they found a Farmer Koda who was growing a strain of short grain brown rice 200 miles south of Chico [Koda Farms in South Dos Palos]. Although his rice was of excellent quality, he was located in an area of cotton growers who used large quantities of chemicals. Kennedy felt compelled to find another farm which was relatively free of surrounding chemicalized agriculture and which would be willing to experiment with growing completely organic brown rice. In 1968 he signed a contract with the Lundberg's of Wehah Farm [Richvale, California], guaranteeing the purchase of their first organic crop. This was a considerable risk on each side, since at best the farmers felt the yield would be half as much as the conventional crop, and even then the weeds and insects, especially during the paddy stage, would be extremely competitive with the rice. However, the experiment proved successful, and we all have been benefiting ever since. (Other farmers have since begun producing organic brown rice, most notably Farmer Garrich of Lone Pines Farm in Arkansas.)

"Interestingly, with the recession of 1973 and 1974, the price of organic rice increased quite a bit and the demand for organic rice cakes decreased considerably, so Chico-San discontinued the organic rice cakes–selling only organic rice. However, by 1976, they were able to reintroduce the organic rice cakes and the demand has again been on the up-swing.

By the late '60s/early '70s the FDA began a close scrutiny of the relationships between food companies and educational programs. They would not allow promotion of foods based on educational or health claims. As a result Kennedy and Aihara established the George Ohsawa Macrobiotic Foundation (GOMF) to continue the educational activities separately from the food company. Kennedy became the director of Chico-San, Aihara the director of GOMF. This relationship has proved very productive for both sides as each continues to promote the other. Aihara is still involved in the selection and quality control of the food products, and he gives weekly classes to approximately thirty-five of the seventy-five staff members of Chico-San. Kennedy began to devote himself completely to the development of the food company.

"In addition to enlarging the ware- house space, Kennedy looked for ways to expand and improve the product line. In 1974 he brought Junsei Yamaguchi into the company to begin manufacturing miso and tamari soy sauce according to Chico-San's standards. Chico-San also began to produce yinnie rice syrup, a traditional sweetener Kennedy had discovered on one of his trips to Japan. Yinnie syrup is a whole grain product made from malted wheat and rice and has a much lower concentration of refined sugars than most other malted grain sweeteners such as barley malt or corn syrup. During this time Chico-San had acquired additional rice cake machines purchased from Japan, but Kennedy felt that these machines could be improved. Eventually he developed a completely hydraulic machine which was capable of increasing the supply of rice cakes up to the market demand. Unfortunately, soon after they got the new machine into production, it shorted out, blew up, and caused a fire which totally destroyed the Chico-San warehouse, all the incubating miso and tamari, and the majority of their other products. The founders of Chico-San had escaped the threat of destruction in New York, but over a decade later they witnessed their almost total devastation in California.

"However, by that time the company had developed a strong reputation in the market. In addition, Kennedy was willing to withstand considerable odds and start from scratch. So within a year of the fire (and a loss of $250,000 beyond the insurance settlement), he began again with a larger warehouse and what he considered to be better rice cake machines. Presently, Chico-San is making rice cakes twenty-four hours a day, seven days a week. It is selling these cakes in the natural foods stores, and has distribution in the supermarkets and (under the label of Landau and Kemach) in the Jewish Kosher foods stores. Kennedy is also attempting to get his rice cakes into the institutional food services, such as hospitals and prisons, but finds this to be very slow. 'The bureaucracies involved are very difficult to work with. But we do have a few public schools in California using rice cakes in the lunch programs,' Kennedy claims.

Although Chico-San never got back into miso and tamari production, it did expand its own product line by increased importing of traditional macro- biotic foods from Japan. These include Lima Soy Sauce (named after George Ohsawa's wife, Lima), miso, barley koji, kuzu, and rice malt vinegar; the sea vegetables hijiki, kombu, wakame, nori, and kanten; nigari (for making tofu); tekka (a

© Copyright Soyinfo Center 2013

condiment rich in iron); umeboshi plums; and the Japanese teas kukicha, mu, and renkon (lotus root). In this country Chico-San makes yinnie syrup, yinnie taffy candies, rice cakes, carob-covered rice cakes, and rice nuggets. Chico-San also publishes the *Chico-San Cookbook*, which was written by Cornellia Aihara. The products sold by Chico-San undergo close scrutiny by Kennedy, Smith, and Herman Aihara. They are very careful about quality control and generally agree about standards. One exception has been the carob-covered rice cakes. It is difficult to solidify the carob without adding some type of refined sweetener. Although they have been experimenting with yinnie syrup, at this point they are using fructose but without consensus within the company as to whether it is a healthful ingredient. Besides the manufacturing company in Chico, Kennedy is planning to reopen the Chico-San retail store. He has also opened up a warehouse and rice cake plant near Trenton, New Jersey and is considering opening up another outside of London [England]. In addition, Kennedy and Aihara went to Japan in early December, 1981, to conclude formal discussions with the Ohsawa C.I. macrobiotic teaching organization in Tokyo, concerning the creation of a distribution company called Ohsawa U.S.A. Lima Ohsawa's sister, Flora, will be in charge of this company which will allow for the increased distribution of many Japanese macrobiotic specialty foods.

5535. **Product Name:** [Ganmo {Tofu Burger}].
Foreign Name: Ganmo.
Manufacturer's Name: Jonathan P.V.B.A.
Manufacturer's Address: Antwerpsesteenweg 336, B-2080 Kapellen, Belgium. Phone: 03/664 58 48.
Date of Introduction: 1982. April.
Ingredients: Crushed tofu, sesame seeds, vegetables, tamari, fresh herbs and spices, wheat flour.
Wt/Vol., Packaging, Price: Vacuum packed.
How Stored: Refrigerated.
New Product–Documentation: Letter from Sjon Welters. 1982. April 16. "Jonathan is a macrobiotic food company. They produce a wide assortment of macrobiotic products, such as tofu (3,000 lb/week), ganmo, etc.

Jonathan catalog. 1988. A full-page color plate shows all these products. These are deep-fried tofu burgers. Ingredients are listed (see above).

5536. **Product Name:** [Horium Tofu].
Foreign Name: Tofu Horium.
Manufacturer's Name: Les Aliments Horium Foods Inc.
Manufacturer's Address: 1050 rue Lacasse Street, C1-18, Montreal, QUE, H4C 2Z3, Canada. Phone: 514-933-4605.
Date of Introduction: 1982. April.
Ingredients: Organic soybeans, natural salt or sea salt, purified water.
Wt/Vol., Packaging, Price: 450 gm.
How Stored: Refrigerated.
New Product–Documentation: Talk with Yvon Tremblay and Richard Milon. 1987. Dec. 11. Form filled out by Mr. Chong-Hong Ho, owner. 1988. Nov. 11. The product was launched in April 1982. Label. 5 by 7 inches. Red, green, and black on white. In French and English. "All natural. After removing package, submerge tofu completely in cold water and change it regularly."

5537. Leviton, Richard. 1982. On the road for the fast food burger: A soy deli odyssey. *Vegetarian Times* No. 56. April. p. 62-65.
• ***Summary:*** Includes visits to and detailed descriptions of the ambience and menu at: The Well Bean Deli in Santa Cruz, California (Kevin Van Slooten), Real Food Tofu Cafe in Redwood Valley, California (Dik & Sharon Rose), The Tofu Shop in Arcata, California (Matthew & Susanne Schmit), South Fork Tofu Cafe in Helena, Montana (Bruce Anfinson, Vicki Keller, and Richard Saravalli), The Good Nature Deli in Oak Park, Illinois (Kevin O'Brien and Mary Ellen Sackett), The Soy Plant Deli in Ann Arbor, Michigan (a co-op), Hip Pocket Tofu Deli in Columbus, Ohio (Bill Lutz), Nature's Grace in Honesdale, Pennsylvania (Jamie and Nancy Stunkard), Lotos Cafe in Rochester, New York (Greg Weaver), Soyateria in Toronto, Ontario (owned by Soy City Foods), Mintz's Buffet in New York City (David Mintz), and Everybody's Vegetarian Restaurant in Nashville, Tennessee (run by The Farm).

At Mintz's Buffet (1040 Third Ave., 10021) "David Mintz would like to stuff the Big Apple with savory tofu, judging by the enthusiasm with which he embraced tofu a year ago in his traditional Jewish kosher deli and catering company. Mintz added tofu to his line of 'soup to nuts, old time foods like Grandma used to make, a big menu,' and placed tofu vegetable pies and tofu ice cream proudly next to the gefilte fish, chopped livers and matzoh balls. Located on New York's upper east side near Bloomingdale's, Mintz's (which seats 15) receives celebrities and ordinary folk alike, people who are drawn to its special 'Mintz's Tofu Buffet of Vegetable Quiches,' Tofu Vegetable Pies, Tofu Vegetable Salads (for instance, steamed broccoli with tofu mustard sauce), Tofu Egg Rolls, Tofu Blintzes, Tofu Bran Muffins (strawberry-rhubarb, apple-walnut, blueberry-bran, carrot-apple, pecan, lemon-granola, pineapple-coconut and cherry-granola), Soy Burgers and Soy Pizza. Before we glide out of Mintz's soy emporium on a cloud of soybeans, we must sample his renowned Tofu Ice Kream (also called *Tofutti*) made from tofu, soymilk, fresh fruit, essences of apples, figs and raisins, honey, egg whites, soy oil–'creamy and delicious, it's beyond cream.'" Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

Foreign Name: Tofu, Seitan.
Manufacturer's Name: Restaurant Sesam.
Manufacturer's Address: Byouxstr., Bern, Switzerland. Phone: 032-257-077.
Date of Introduction: 1982. April.
New Product–Documentation: Letter from Sjon Welters. 1982. April 16. "The most active macrobiotic center in Switzerland is located in Bern. They have a restaurant and home-scale tofu and seitan production. The last time I had contact with them, they were planning to set up a tofu plant."

Letter from Verena Krieger of Switzerland. 1990. July 5. Sesam was a macrobiotic restaurant in Bern. It has been out of business since 1987.

5542. **Product Name:** Tofu, and Soy Sprouts.
Manufacturer's Name: Sam Hwa Beansprout Co.
Manufacturer's Address: 5642 N. Broadway, Chicago, IL 60660. Phone: 312-271-0330.
Date of Introduction: 1982. April.
New Product–Documentation: Letter from Rebecca Uchida of Mu Tofu Shop. 1982. April 20. Sam Hwa is the owner.

5543. **Product Name:** [Tofu].
Manufacturer's Name: Seven Arrows Tofu.
Manufacturer's Address: Hoogaardenstr. 83, 3000 Leuven, Belgium.
Date of Introduction: 1982. April.
New Product–Documentation: Letter from Sjon Welters. 1982. April 16. Seven Arrows is a small shop producing tofu and tofu products in Leuven.

5544. Shurtleff, William; Aoyagi, Akiko. 1982. Survey of tofu production in the United States and Canada. Lafayette, California. 1 p. April. Unpublished manuscript.
• ***Summary:*** This is a typewritten table with 8 columns: The three main ones are (1) Company name. (2) Date started operations. (3) Tofu production in April 1982 (in 1,000 lb/week). Companies are arranged in descending order of tofu production.

Hinode Tofu Co. (Los Angeles, California; 1937?). 140.
Azumaya, Inc. (South San Francisco, California; 1920?). 110.
Aloha Tofu Co. (Honolulu, Hawaii; 1950?). 60.
Quong Hop & Co. (South San Francisco, California; 1906). 43.
England Soy Dairy (Greenfield, Massachusetts; Jan. 1977). 36.
C.R. Food (Los Angeles, California; April 1979). 28.5.
Wy Ky (Los Angeles, California; July 1970). 28.
Wo Chong & Co. (San Francisco, California; 1928). 24.
Kanai Tofu Factory (Hawaii; 1923). 16.
Traditional Tofu (Oakland, California; 1978?). 17.
Mighty Soy, Inc. (Los Angeles, California; Aug. 1980). 16.6.
Eastern Foods Corp. (Minneapolis, Minnesota). 15.
Panda Food Products (Woodhaven, New York; 1981). 15.
Nasoya Foods (Leominster, Massachusetts; April 1978). 12.
Island Spring (Vashon, Washington; Dec. 1976). 12.
Swan Gardens (Miami, Florida). 12.
Sam Sung Food Inc. (Washington, DC; 1980). 11.
Ota Tofu Co. (Portland, Oregon; 1919). 10.4.
Victor Food Products (Scarborough, Ontario, Canada; Feb. 1978). 10.
Hashizume Food Products (New York City, New York; 1969). 10.
Soyfoods of America (Duarte, California; 1981?). 10.
White Wave (Boulder, Colorado; Sept. 1977). 9.
The Soy Plant (Ann Arbor, Michigan; Sept. 1977). 7.
Chicago Tofu Co. (Chicago, Illinois; 1960). 6.
Nomura Tofu Co. (Chicago, Illinois; 1975). 6.
Northern Soy (Rochester, New York; May 1977). 6. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

5545. **Product Name:** [Tempeh, Tofu, and Natto].
Manufacturer's Name: Soy Joy.
Manufacturer's Address: Chemin de la Prelaz 1, CH-1260 Nyon, Switzerland. Phone: 022-61-9312.
Date of Introduction: 1982. April.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. July 23. Owner: Marty Halsey. Form filled out by Martin Halsey ca. 1982. Company opened in April 1982. His initial products were tempeh, tofu, and natto. "Working on miso. Supplying macrobiotic community on a small scale."

Note: This is the earliest known commercial natto manufacturer in Europe.

Letter from Sjon Welters. 1982. April 16. Gives his home address as c/o Costello, Mafroi 6bis, 1260 Nyon, Switzerland. He is "An American sportsman who started a small tofu and tempeh shop."

R. Leviton. 1983. Report on trip to Europe with American Soybean Assoc. Oct-Nov. p. 17. Marty Halsy [sic, Halsey] makes 200 kg/week of tofu, plus some handmade tempeh.

5546. *Soyanews* (*Sri Lanka*). 1982. Sri Lanka's first tofu shop. 4(8):4-5. April.
• ***Summary:*** "'Sri Lanka's first tofu shop,' set up at Kitulwatta Road off the Elvitigala Mawatha in Borella" [a district of Colombo], was not started with the intention of making profits. Its founder is a philanthropist and a devout Buddhist, who would be glad if it just breaks even. If people take to soyafoods "this would be one way of saving the dwindling cattle population of this country as well as the lives of many other domestic animals.

"The owner of the tofu shop and all members of his family are practising vegetarians and when the subject of soya was brought up one day by Mrs. Gai Kim, wife of the UNDP Resident in Sri Lanka, it struck him that if more people took to soya less animals would be killed and the people would become healthier and more humane.

The shop started in 1980 but had to close because of a lack of soyabeans grown in Sri Lanka. It resumed production in 1981, when the soya acreage was a little larger "but more important from the point of view of sales was the opening the same year of a new supermarket in Kollupitiya [a major city within Colombo] run by Cornel in collaboration with Fitzpatrick of Singapore.

Today about 60 pounds of bean curd are produced daily at the shop.

© Copyright Soyinfo Center 2013

Photos show: (1) A lady ladling soaked soyabeans into the hopper of a motorised stone mill. (2) The slurry being cooked and stirred. (3) Ladling the curds into a woven bamboo basket floating on the mixture of curds and whey. (4) A man with tofu on sale at Cornel's supermarket.

Note: This shop first opened in March 1980.

• ***Summary:*** Discusses: The parallels between tofu and yogurt. *The Book of Tofu,* by Shurtleff and Aoyagi. Surata Soyfoods in Eugene, Oregon. Al Jacobson and his Garden of Eatin' in Los Angeles.

5548. Holt, John. 1982. Re: New developments at The Regular Tofu Co. Letter to William Shurtleff at Soyfoods Center, May 1. 1 p. Handwritten, with signature on letterhead.
• ***Summary:*** "Having used your book to learn how to make tofu, we now have a small business here making about 700 lb/week of tofu and about 2,500 tofu burgers per week. We give our okara to a pig farmer... We sell the tofu vacuum packaged. As yet we don't have a means of packaging soya milk. It is sold over here in Tetra Briks and is very expensive. We want to expand the business to make larger quantities of tofu (regular and silken if possible) and to sell soymilk more cheaply... At present, our equipment is very similar, I should imagine, to a small Japanese tofu shop. We use nigari.

An accompanying form states that this company started business in Dec. 1981 and now uses 50-100 lb/day of dry soybeans. Address: 75 Chandos St., Leicestershire LE2 1BU, England. Phone: (0533) 549839.

5549. Reed, M.H. 1982. Japanese spot bridges East, West. *New York Times.* May 2. p. WC23.
• ***Summary:*** This is a review of the Japanese restaurant Ichi Riki in Nyack, New York. Recommended dishes include agedofu and salmon teriyaki.

"For instance, it would have been a pity to miss the superb example of agedofu–silken bean curd deep fried to 'meatiness' and flavored with daikon and dashi;..."

Note: This is the earliest English-language document seen (April 2013) that contains the term "silken bean curd."

5550. Lorenz, -. 1982. Tofu 'n Tab (Cartoon). *New Yorker.* May 3. p. 44.
• ***Summary:*** This cartoon a shows sporty couple stepping into a bistro named "Tofu 'n Tab." As he opens the awning-covered door, he turns to her and jauntily remarks, "Another nice thing about this spot–it hasn't been discovered yet."

Note: This cartoon also appeared in the *Washington Post* (7 Jan. 1983, p. WK36). Address: New York.

5551. Burros, Marian. 1982. Food notes: How about tofuburgers? *New York Times.* May 5. p. C9.
• ***Summary:*** "When the students at P.S. [Public School] 128, on West 169th Street in Manhattan [New York], were introduced to tofuburgers last week, some ate them and some didn't; some liked them and some didn't."

"Two years ago the city received permission from the United States Department of Agriculture for a pilot program to serve meatless meals as part of the approved school-lunch program. The first year 17 schools participated; this year there are 40. The meatless meals include peanut butter made with tofu; beans and rice; vegetarian chili, and now, for the first time, tofuburgers.

"But Barbara Friedlander, nutrition education coordinator for the city schools, is returning to the stove. Next time she is going to have the cooks add soy sauce to the tofu mixture 'so it will look brown instead of white,' and she will have them make hamburgers of a mixture of tofu and ground beef." Address: New York.

5552. Cadwallader, Sharon. 1982. Try tempting them with tofu. *San Francisco Chronicle.* May 5. p. 24.
• ***Summary:*** Contains recipes for Tofu Crepes, Creamy Tofu Vegetable Soup, Tofu-Oatmeal Muffins.

5553. Morris, Linda Lowe. 1982. Tofu: Soy product can be used like cheese. *Sun* (*Baltimore, Maryland*). May 12. p. C1. [3 ref]
• ***Summary:*** Two companies in Baltimore in Baltimore make tofu: (1) American Soy Products, established by Larry Betzler, Mark Courtney and Dick Leshuk, has been making tofu at a plant on Aisquith street since the start of 1982. (2) The Liu family, whose business is named Bud, Inc., began making tofu in 1980 and has recently moved into larger quarters on Wicomico street.

Both companies use organic soybeans. A large photo shows Larry Betzler and Mark Courtney making tofu.

5554. Parker, Joyce. 1982. Re: Soybeans and the Peace Corps in Nepal. Letter to William Shurtleff at Soyfoods Center, May 12. 4 p. Handwritten on lined paper.
• ***Summary:*** She is a Peace Corps volunteer living in the eastern middle hills of Nepal. She works at a tuberculosis clinic, and is thinking of starting to make tofu for herself and the TB patients. Friends sent her a copy of *The Book of Tofu.* Nepalese have the basic idea of "hot and cold foods." Boiled soybeans are considered "cold" whereas dry roasted soybeans are "hot." Address: c/o U.S. Peace Corps, P.O. Box 613, Kathmandu, Nepal.

5555. Soroka, Monica. 1982. Re: Poland is ready for tofu. Thinking of starting a tofu shop there. Letter to William Shurtleff at Soyfoods Center, May 16. 3 p. Handwritten, with signature.
• ***Summary:*** Monica has worked at the Magic Bean Co-op in

© Copyright Soyinfo Center 2013

Milwaukee, and at Light Foods in St. Louis. "During the past year the women of Poland were frantic that their children would not have enough milk. The Polish farmers were coming into the cities and buying out the bread supplies to feed their cattle because of the unavailability of grains! Total chaos! The Poles need to be exposed to alternative protein sources, such as tofu.

"I'm considering returning to Poland this summer." Address: 4100 Jordan Lane, Stevens Point, Wisconsin 54481.

5556. Parker, Joyce. 1982. Soyfoods and soybeans in Nepal (Interview). Conducted by William Shurtleff of Soyfoods Center, May 17. 1 p. transcript.
• ***Summary:*** Tofu is made in Kathmandu, but on a very small scale. Soybeans (*bhatmas* in Nepali) are used as food in various ways in various parts of Nepal. In Eastern Nepal, they are used mostly as a snack (*khaajaa*) served with early afternoon tea. The snack is called *bhatmas ani chiura* ("soybeans and beaten rice"). To make it: Roast dry soybeans in a dry, well-seasoned, heavy cast iron wok over an open hearth for 5-10 minutes, stirring constantly, until nicely browned but with no burned beans. Run through a hand-turned stone mill to just split the soybeans into halves. In the wok, heat mustard oil (*mattitel*) and heat until the smoke rises. Then add minced green onion, chili pepper, and gingerroot. Stir fry until the soybeans are enrobed with the mixture, salt lightly, then stir over beaten rice [also called flattened rice; dehusked rice which is flattened into light dry flakes]. It is delicious and crunchy.

In Nepal, soybeans are usually grown as companion plants with corn or along the borders of irrigated fields. A British AID agricultural farm [Agricultural Research Station] at Pakhribas has developed soybean varieties for different terrains.

Kinema, a fermented soyfood, is a good trekking food. Nepalese make a soup of it and pour it over rice. It keeps well and is easy to cook. To make kinema, boil soybeans until they are soft, then grind to a mush with a local mortar and pestle. Mix in the ash of any type of wood and place the mixture in a shallow bamboo basket (*dhahi*), cover and leave for 24 hours. Then remove and sun dry.

Note: This is the earliest document seen (Dec. 2011) that uses the word "kinema" to refer to this fermented soyfood from Nepal; it is a close relative of Japanese natto. Address: Peace Corps volunteer, Nepal.

5557. Halsey, Marty. 1982. Re: Recent developments with soyfoods Switzerland. Letter to William Shurtleff at Soyfoods Center, May 18. 1 p. Handwritten, with signature.
• ***Summary:*** Marty encloses a business card for Eric Dougoud, who will be starting a soyfood business in September in Geneva. Marty visited Eric's plant today and saw his tofu making machines. "He has a large, very professional space, and the Takai W-30B whole system. He has a large vacuum packager that he plans to use for various tofu related products. He is working in unison with a group in Milan, Italy, and plans to export his products there as well. I showed him all the information that you sent me." Address: Switzerland.

5558. Sheraton, Mimi. 1982. Restaurants: Rumania to China on the East Side [of Manhattan]. *New York Times.* May 21. p. C20.
• ***Summary:*** This is a review of the Chinese restaurant Sichuan Pavilion (322 East 44th St., between First and Second Avenues, Manhattan, New York City).

Among the best main courses are: "Crispy shrimp packets–pounded shrimp deep-fried in wrappings of golden, crackling bean curd sheet."

Also tasty were "bean curd slices with ground pork that were properly dosed with chili oil. Perhaps the biggest disappointment on two recent visits was Buddha's duck," formerly tender and aromatic, now fatty, stale and bland.

Note: This "bean curd sheet" is what we call a "pressed tofu sheet."

5559. Deakin, Doris. 1982. Hand-me-down recipes that taste of tradition. *Washington Post.* May 26. p. E1, E8, E10.
• ***Summary:*** In this era of fast foods, we have lost the tradition of mothers handing down to daughters their favorite recipes–often handwritten and often together with stories about the family. These recipes and stories are a special kind of nourishment.

Yet many other cultures have their traditional dishes and story accompanies many of them. In China, one such dish is Ma-Po Tofu. Victoria Chen, formerly of Shanghai and Taiwan, who teaches Chinese cooking in Montgomery County, tells her students this story. "Ma" means smallpox scar and "Po" means woman. "Tofu" is bean curd. After this woman contracted smallpox, her face was scarred. Then her brother died, leaving a widow and two children. The family land was so small that they could not earn a living from it. To help her brother's family, the scarred woman tried to find a husband, but she could not. So the sisters-in-law developed this recipe, and sold it to passers by. In this way all were able to survive.

The recipe calls for "1 pound bean curd... 1 tablespoon black fermented beans, chopped... 2 tablespoons soy sauce... 1 tablespoon hot doe-ban paste [douban-jiang] for hot bean sauce." Cut the "tofu" into 1 by 1 by ½-inch pieces. Saute the "black beans" for a few minutes but do not crush.

5560. Freiberg, Karen. 1982. New company [Royal American] has unusual food, backers. *Kansas City Star* (*Missouri*). May 28.
• ***Summary:*** The 25 investors in Royal American Food Co. raised nearly $1 million. Located at 24307 E. 40 Highway in Blue Springs, Missouri, the firm is a multi-level marketing

company that sells flavored instant tofu and dehydrated soy-based desserts.

5561. Pautz, Jane Abe Cadwell. 1982. Re: Directory of soyfoods manufacturers in Sao Paulo, Brazil, and comments on the availability of these foods. Letter to William Shurtleff at Soyfoods Center, May 29. 3 p. Typed.
• ***Summary:*** List all known companies in Sao Paulo that make soyfood products. A separate listing is given for each product with the full company name and address. The product categories include: Tofu and tofu products (2 companies). Soymilk (4). Shoyu (3). Sellers of whole dry soybeans (1). Lecithin (1). Soyflour (1; soyflour is available in many stores without a brand name). TSP / TVP (2).

"As you know we have a large Japanese colony here in the country. I am only aware of what is here in Sao Paulo."

"Soynuts are available in health food stores in small unlabeled packages. I have not seen soynut butter. Misso (miso) is plentiful. Soy sprouts are sometimes available in open-air markets along with other Japanese products. They aren't common. Fresh green soybeans [edamamé] are also available at certain times of the year in these markets. Of course there is lots of soyoil. I think that Sanbra is one of the big producers or sales company of the beans [soybeans]. In some of the healthfood stores there is a product available called 'carne de soja' (literally "soy meat [textured soy flour]). There is no brand name and I have not experimented with it."

"I will be working on a book of tofu recipes during this vacation. The publisher wants to publish it yet this year.

"Last year I gave 3 lessons in working with soyfoods at the Nestlé experimental kitchen here in Sao Paulo, and may be working with a new health foods store / restaurant in developing foods. I would like to see them try some typical soy-deli kinds of things. There is a lot of interest here, new stores of 'produtos naturais' [natural food products] and vegetarian restaurants are quite popular." Address: Rua Spinagés 1974 Apto. 61, 01258 Sao Paulo, Brazil.

5562. *Daizu Geppo* (*Soybean Monthly News*). 1982. Tottori meisan, tôfu chikuwa [Tofu chikuwa, famous product of Tottori prefecture, Japan]. May. p. 30-39. [Jap; eng+]
• ***Summary:*** It was first produced about 120-150 years ago, in the late Edo or early Meiji periods. To use up leftover tofu, tofu makers mixed it with starch, shaped it into dumplings, and steamed it. In later years they mixed in fish paste. The formula now is: tofu 55-65%, fish meat 25-35%, starch, seasonings (salt, sugar) 10%. The preparation is described.

5563. Fitzpatrick, Brian. 1982. Soya milk in Asia. In: Theng Chye Yam, W-L Kwik, and C-Y Fong, eds. 1982. Proceedings of Food Conference 1982. viii + 382 p. See p. 261-62. Held 16-20 May 1982 in Singapore. Publ: Singapore Inst. of Food Science & Technology.
• ***Summary:*** Contents: History. Consumption of soymilk. Nutrition. Soymilk- the product. Unprocessed raw materials suitability. Clarified and suspended products. Packaging. Yields for clarified and suspended. Product mix (yogurt, tofu, ice cream). Present market.

Recent introductions of commercial soymilk products include: Green Spot Bangkok (1960), Coca Cola test market of SACI in Brazil (1969), Singapore Cold Storage (1969), Kibun, Japan (1976), and Ace Canning (1980). Address: Alfa-Laval South East Asia, Singapore.

5564. **Product Name:** Tofu Kit.
Manufacturer's Name: Homefood Co.
Manufacturer's Address: P.O. Box 1242, East Lansing, MI 48823.
Date of Introduction: 1982. May.
New Product–Documentation: Ad in Vegetarian Times. 1982. May. p. 62. This new tofu kit contains a TofuPres (2-pint capacity tubular design, apparently transparent plastic), TofuSeed (3 oz. natural nigari), and TofuBag (washable nylon netting and instructions). Ordered by direct mail, each kit costs $17.99, including shipping and handling.

5565. Island Spring, Inc. 1982. Island Spring installs MENUVISION at QFC Supermarket in Seattle (News release). P.O. Box 747, Vashon, WA 98070. 1 p. May.
• ***Summary:*** To solve the problem that many people do not know how to use tofu, a video monitor and cassette deck have been installed near Island Spring Tofu in the produce department. A continuous tape shows a cook preparing Guacamofu (Tofu Guacamole) and Tofuna (Tuna and Tofu). Address: Vashon, Washington.

5566. Krieger, Verena. 1982. Die tausend Talente von Tofu [The thousand talents of tofu]. *Natuerlich* 2(5):69-73. May. [Ger]
• ***Summary:*** An excellent overview, with numerous color photos of recipes, products, and plants. "Tofu found its way to Europe not over the steppes of Asia but through the kitchens of North America, starting with *The Book of Tofu* by Shurtleff and Aoyagi."

Contents: What is tofu? Why tofu? Soya–king of the beans (Switzerland imports 100,000 tonnes of soybeans each year to feed to animals). Tofu and its brothers. Is soy an exotic plant? The most important traditional soyfoods of East Asia: Tofu, miso, soymilk, tamari, shoyu and soy sauce (*sojasauce*), tempeh, soy sprouts (*sojakeime*).

5567. **Product Name:** Legume Tofu Pizza.
Manufacturer's Name: Legume, Inc.
Manufacturer's Address: 150 Bloomfield Ave., Verona, NJ 07044. Phone: (201) 857-9010.
Date of Introduction: 1982. May.
Ingredients: Organic tofu, crushed tomatoes, peanut and

© Copyright Soyinfo Center 2013

soy oil, salt, oregano, onion, garlic, parsley, basil, pepper. Crust: Whole wheat pastry flour, high gluten enriched flour, DeBoles American (Jerusalem) artichoke flour, water, vegetable shortening, yeast.
Wt/Vol., Packaging, Price: 1 lb.
How Stored: Frozen.
Nutrition: Per 4 oz.: Calories 220, protein 8 gm, carbohydrates 33 gm, fat 7 gm.
New Product–Documentation: Label. 7 by 9 inches. Color boxes. "A delicious meal by Legume. 100% natural. No cholesterol. No artificial preservatives. No sugar." The pizza crust contains whole wheat pastry flour as a major ingredient. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Article in Soyfoods. 1982. Winter. p. 56. Ad in Whole Life Times. 1982. July/Aug. p. 20. "Tofu Makes the Difference." Spot in Soyfoods. 1982. Summer. p. 54. "The Legume Food System. Tofu Makes the Difference."

5568. Leviton, Richard. 1982. Discovering Japanese soyfoods. *Vegetarian Times* No. 57. May. p. 60-62, 65. [1 ref]
• ***Summary:*** Recently Richard Leviton traveled to Japan with a group of Americans to get a firsthand look at the Japanese soyfoods industry. There he got his first look at the fabled neighborhood corner tofu shop. He discusses tofu (the Japanese consume 10 million cakes a day) and tofu manufacturers (large and small), types of tofu include silken tofu (called kinugoshi), fresh soft tofu called momen. "In the typical supermarket we counted as many as 60 different soyfood items (often several brands or product sizes), ranging from fresh miso and tofu to packaged soymilk and shoyu, natto, dried frozen tofu, yuba rolls and kinako powder."

Also: Takatsuka Marugo (a large tofu maker that churns out 100,000 lb/day of tofu), Yuba Han (a traditional yuba shop in Kyoto), Asahimatsu Kori-dofu Co., natto, Hamanatto, soymilk, cooked soybeans with wakame, soy sprouts, kinako powder, packaged green soybeans in the pods, miso (fresh and freeze-dried), Linda Barber (an American home economist who is teaching at Kobe Girl's College in Nishinomiya, and also teaching American-style tofu recipes to Japanese housewives via television and the print media), and Sasa-no-Yuki, a 279-year old restaurant that specializes in tofu cookery.

Photos show: (1) Eleven different tofu dishes in bowls as served at Sasa-no-Yuki restaurant in Tokyo. (2) A man hanging up fresh yuba at Yuba Han. (3) Members of the group seated on tatami mats on the floor around a huge table enjoying dishes served at Sasa-no-Yuki. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

5569. Leviton, Richard. 1982. Mainstreaming tofu. The soyfoods industry comes of age. Colrain, Massachusetts. 20 p. Written and re-written for New Age magazine but never published. One-fifth published by Vegetarian Times, Nov. 1982, as "Soyfoods Come of Age." Unpublished manuscript. Address: 100 Heath Rd., Colrain, Massachusetts 01340.

5570. Leviton, Richard. 1982. Tour: April 21-28, 1982. Itinerary and notes from trip to study soyfoods on the East Coast and in the Midwest. Colrain, Massachusetts. 21 p. Unpublished typescript. 28 cm.
• ***Summary:*** Visited: Nature's Grace (Honesdale, Pennsylvania), Real Foods (Allentown, PA), Cricklewood Soyfoods (Mertztown, PA), Kingdom Foods (Washington, DC), Sam Sung Tofu Co. (Washington, DC), Edward & Sons Trading Co. (Saluda, North Carolina), American Miso Co. (Rutherfordton, NC; April 24), Blue Ridge Soyfoods (Fletcher, NC), The Farm (Summertown, Tennessee), Everybody's Restaurant (Nashville, TN), Soya Food Products (Cincinnati, Ohio), Rising Sun Soy Farms (Columbus, OH), Hip Pocket Tofu Deli (Columbus, OH), Legume (Verona, New Jersey), The Bridge (Middletown, Connecticut). Includes directions by car to each place. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

5571. Mandoe, Bonnie. 1982. Soy power! Part I. *Bestways.* May. p. 98, 99, 101.
• ***Summary:*** "However familiar–or unfamiliar–we may be with soy foods, the eighties are certain to increase our appreciation of these versatile and varied products. The same marketing skills that turned yogurt from the curious 'health-food oddity' it was in the sixties, to the popular supermarket item it is today, are being applied to soy foods, particularly tofu, tempeh, and soya ice cream."

Contains a short section on tofu that mentions Larry Needleman and *Soyfoods* magazine, and a shorter section on tempeh. Gives 3 tofu recipes and 4 tempeh recipes. Photos show: (1) Bonnie Mandoe. (2) A cake of tofu.

5572. Mason, Robert M.; Carden, John L. 1982. Controlled ecological life support system: Research and development guidelines. Moffett Field, California: National Aeronautics and Space Administration (NASA). 99 p. May. 28 cm. Report No. NASA CP-2232–NASA Conference Publication 2232. Proceedings of a NASA workshop held 9-12 Jan. 1979 at Ames Research Center, Moffett Field, California.
• ***Summary:*** Contents: Preface. List of figures and tables. 1. Introduction: Background, approach, overview of report, references (5 refs). 2. Evaluation of a ground based manned demonstration as a milestone in CELSS development: Introduction, summary of workshop findings (Group 1), food production (Group 2), waste processing (Group 3), systems engineering and modeling (Group 4), ecology-systems safety (Group 5). 3. Development requirements for a successful ground based CELSS demonstration (Introduction plus comments from the five groups). 4. Research recommendations (Introduction plus comments

© Copyright Soyinfo Center 2013

from the five groups). Appendixes: A. Individual research recommendations (Group 2). B. Interactions of waste processing group with other groups. C. Group membership. D. Names and addresses of workshop participants.

"Preface: The purpose of this workshop was to consider research and development guidelines for Controlled Ecological Life Support Systems. (CELSS)" and to "Identify considerations critical to a successful ground-based manned CELSS demonstration (GBCD)." "The workshop was supported by NASA as a part of the work under Grant No. NSG-2323."

In Chap. 3 (p. 21) the Nutrition and Food Processing Group (Group 1) states: "Some conventional sources are advanced (i.e. soy milk, oriental 'cheeses' [such as tofu], fabricated meats, textured vegetable protein, sausages, and candy),..." Much recycling is involved, including "food regeneration from wastes" (incl. higher plants grown in urine). Higher plants have many valuable functions in addition to food production for humans: air revitalization including addition of oxygen and removal of carbon dioxide and certain gaseous contaminants, conversion of wastes into food, aesthetic value, etc. Vegetarian diets, and use of algae (single cell proteins) are considered important.

The first paper in Appendix A is titled "Quantitative analysis of biomass production and compatibility studies of early maturing soybean cultivars for GBCD, by Jagmohan Joshi, Univ. of Maryland (Eastern Shore at Princess Ann). It begins: Justification: Soybean is one of the recommended plants to be grown in GBCD This has been clearly shown by various investigators in the earlier studies conducted for NASA. In CELSS it is very important to know the total amount of biomass produced by each crop." Six early maturing soybean will be grown under hydroponic conditions. Note: This is the earliest document seen (July 1999) concerning space travel and soy. Address: 1. METRICS, Inc.; 2. Georgia Inst. of Technology. Both: Atlanta, Georgia.

5573. Moriyama, Yukiko. 1982. Quick & easy tofu cookbook. Tokyo: Joie. c/o J.P. Trading Inc., 300 Industrial Way, Brisbane, CA 94005. 104 p. May. Illust. Index. 27 cm.
• ***Summary:*** Contents. Introduction. Preparation tips. Recipes–1. Cheese 2. Egg. 3. Just tofu. 4. Meat. 5. Sea foods. 6. Vegetables. 7. Salad. 8. Soup. 9. Dessert.

Reissued in 1988 under a new title: "Quick & Easy. A taste of tofu: Mastering the art of tofu cooking."

5574. Price, Charlene C.; Brown, Judy. 1982. A natural twist to the school lunch program. *National Food Review.* Spring. p. 20-22. [7 ref]
• ***Summary:*** Natural foods "are inching their way from specialty stores to supermarkets and into the school lunch program. As knowledge about the relationship of diet to health grows, more emphasis is being placed on using natural, additive-free foods in the school lunch program. In 1980 USDA's Food and Nutrition Service (FNS) rewrote the guidelines to reduce the levels of starch, sugar, and fat in school lunches. The Nutra Breakfast and Lunch Program, emphasizing natural foods, was introduced in 1976 into schools in Atlanta, Georgia.

"In 1978, the public school system in Santa Cruz, California, became the Nation's first to experiment with tofu, an inexpensive protein made from curdled soybean milk. In 1981, USDA granted temporary approval to the Santa Cruz school system to serve tofu as a primary meat replacer in its 8,000 daily school meals. The approval has since expired, and reapproval is being sought. Tofu is now federally reimbursable only if it is used with either eggs, cheese, or beans which qualify as complete proteins. Santa Cruz claims that the soybean product has helped cut the program budget from $1.5 million in 1980 to $1.2 million in 1981. Use of the tofu has been a big part of the savings because it sells for 45 cents a pound compared with beef which goes for $1.68 and cheese for $1.27 a pound in that area. The Santa Cruz school system intends to make even more use of soy products which are less expensive than animal products."

Note: This is the second earliest English-language document seen that contains the term "meat replacer" or "meat replacers" (with any combination of quotation marks). Address: USDA. Phone: 202-447-6363.

5575. **Product Name:** [Tofu Itaquera].
Manufacturer's Name: Proteija Ind. & Comercio.
Manufacturer's Address: Estrada D, No. 1300, Itaquera, Sao Paulo, Brazil.
Date of Introduction: 1982. May.
New Product–Documentation: Letter from Jane Cadwell Pautz. 1982. May 29. "Very good firm tofu." Soyfoods Center Computerized Mailing List. 1982. Sept. 17.

5576. Shurtleff, William; Aoyagi, Akiko. 1982. Soyfoods directory and databook. 1st ed. Lafayette, California: Soyfoods Center. 21 p. May. 28 cm. 2nd ed. published in June as Soyfoods Industry: Directory and Databook. 56 p. [24 ref]
• ***Summary:*** A detailed study of the rapidly emerging soyfoods industry and market. Contains original statistics compiled by the Soyfoods Center through interviews with companies. Contents: 1. Names and addresses of soyfoods manufacturers in the Western world, plus major soymilk, miso, shoyu, and yuba manufacturers in East Asia. 2. Analysis of the soyfoods industry in the U.S. 3. Soyfoods production statistics for America and the West. 4. America's prime soyfoods market regions. 5. The tofu industry in the West: Three-year analysis of the tofu industry in the West. The U.S. Tofu market: overview and outlook. Graph of number of tempeh and tofu manufacturers in the West. North America's twenty largest tofu manufacturers. 6. Analysis of

the soymilk industry in the United States. 7. Key institutions working with soyfoods in the West.

Note: This is the first market study published by Shurtleff and Aoyagi. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

5577. **Product Name:** Nutcracker Sweets Creme Pie (Tofu Cheesecakes) [Very Berry, Pineapple Coconut, or Carob Mint].
Manufacturer's Name: Sonoma Specialty Foods.
Manufacturer's Address: 2317 Bluebell Dr., Santa Rosa, CA 95403.
Date of Introduction: 1982. May.
Ingredients: Topping: Soy milk, soy oil, honey, pure vanilla. Filling: Tofu (Organic soybeans, nigari), honey, carob, soy oil, pure mint, pure vanilla, guar gum. Crust: Graham crackers, nuts, honey, vegetable margarine.
Wt/Vol., Packaging, Price: 8 oz in plastic deli tub.
How Stored: Frozen.
New Product–Documentation: Labels. 1983, undated. Multi-color. "A naturally delicious, ready-to-eat, cholesterol-free dessert." Spot in Soyfoods. 1983. Summer. p. 55, and 1984. Summer. p. 43.

5578. *Soyanews* (*Sri Lanka*). 1982. Recipes: The quicker way to make bean curd. 4(9):7. May.
• ***Summary:*** Describes how to make tofu with soya flour. Also gives two tofu recipes.

5579. Soyplant Co-op Inc. (The). 1982. Price list: Effective 5/21/82 (Leaflet). Ann Arbor, Michigan. 1 p. 28 cm.
• ***Summary:*** This is a photocopy sheet, black on white. At the top center is the company logo, two soybean plants growing out of a round Planet Earth. Office hours: 9:00–4:00 M-F. These are wholesale prices, with suggested retail prices listed in parentheses. "A minimum order of $25.00 is required for all deliveries."

Tofu–1# tub. $0.85 per lb ($1.10).

Tofu–Bulk. $0.70 per lb plus 5¢/lb outside Ann Arbor.

Plain soy milk. $0.80 per quart ($1.04).

Flavored soy milk. $0.88 per quart ($1.14).

Plain soy milk–Bulk. $2.10 per gallon (5–gallon minimum).

Flavored soy milk–Bulk. $2.50 per gallon (5–gallon minimum).

Tempeh. $0.90 per half lb ($1.25).

Tempeh–Bulk. $12.00 per 8 lb sheet. Address: 771 Airport Blvd. Suite 1, Ann Arbor, Michigan 48104. Phone: (313) 663-8638.

5580. Switzer, Larry. 1982. Spirulina: The whole food revolution. New York, NY: Bantam Books. vii + 135 p. Illust. by Akiko Aoyagi Shurtleff. No index. 18 cm. [78* ref]
• ***Summary:*** Contents: Acknowledgements. Why spirulina? 1. Introducing your venerable ancestors: The microalgae. 2. The history and rediscovery of spirulina. 3. Nutritional value. 4. A natural way to weight control: The diet of no-diet. 5. From vitamin food to vegetable protein breakthrough. 6. Survive and thrive: Food reserves and future microfarms. 7. Cooking with spirulina: Three favorites and thirty recipes. 8. State of the art: Algae farming around the world. 9. Marketing spirulina: Breaking the food barrier. 10. Spirulina and world protein politics. 11. The future: Farming deserts, oceans, and planets. Appendix A: The Proteus-Earthrise story. Appendix B: Product standards and quality controls.

Soy-related recipes include: Instant spirulina miso soup (p. 51). Aquamole dip or dressing (with tofu and tamari soy sauce, p. 53-54). Tofu dip (p. 54). Pro-miso canape (p. 56). Pro-miso soup (p. 57). Tofu eggless salad (p. 63). Miso salad dressing (p. 65). Pastalina (with tofu chunks, p. 68).

"Nature's oldest protein is now a perfect food supplement for diet, energy, and total health." Appendix A expands on the history of Proteus-Earthrise from the 1980 edition of this book. In 1979 Proteus launched the first U.S. market test of spirulina, first in aquatic specialty feeds and then in the health foods market, under the Earthrise brand. Earthrise products have been marketed through Spruce Street Marketing of Boulder, Colorado, run by Bob Bellows and Terry Cohen, formerly of Celestial Seasonings.

Pages 126-27 note: "One possible criticism of single-cell proteins, such as microalgae and yeast, is their relatively high level of nucleic acid (RNA and DNA) compared to other common foods. The ingestion of large amounts of nucleic acid can raise the uric acid level in the body and increase the chances of kidney stones and gout. The Protein Advisory Group of the United Nations currently recommends that daily nucleic acid intake be limited to 2 grams. These levels are conservative. They allow significant intake with no ill effects. Two grams would be found in 45 grams of Spirulina, which provides 45% of the U.S. RDA adult protein intake. Spirulina will present no problem when taken at the 10 to 20 gram level daily, as suggested by Earthrise." Address: Founder and President, Proteus Corp.

5581. Thornock, Kaylene. 1982. The usability of tofu in schools and colleges. Jack's Beanstalk, P.O. Box 26615, Salt Lake City, Utah. iii + 102 p. May. No index. 28 cm.
• ***Summary:*** Contents: About tofu. Acknowledgments. Agreement for research on tofu. Statement of objectives. Research objectives #1-6. Summary of research findings by objectives.

Tofu was served and evaluated by students at Brigham Young University in a number of popular recipes. Generally, the more students knew about tofu, the higher their acceptance level. Tofu was very well accepted in both entrees and dessert items. A cheesecake, in which tofu was substituted for one-third of the cream cheese, was preferred almost 2-to-1 over that without.

© Copyright Soyinfo Center 2013

Among the recipes tested which contained tofu were: Brownies, burritos, chow mein, chili rellenos, cheesecake, enchiladas, French toast, fruit smoothies, guacamole dip, onion dip, pizza, pumpkin pie, quiche, scrambled tofu, spaghetti sauce, stroganoff, tofu stew, and yakisoba (fried buckwheat noodles).

Cost savings: Ground beef at $1.39/lb was found to be 74% more expensive than tofu at $0.80/lb. At 50:50 extension a foodservice operation would save $29.50 per 100 lb of food product, or 21%. If 600 lb a week was served, this would result in an annual savings of $9,204 in one entree item. Foodservice directors find this very impressive. Tofu may replace all or part of the following ingredients to realize substantial cost savings: Bleu cheese $4.60/lb. Mozzarella cheese $3.60. Cream cheese $2.95. Round steak $2.15. Beef sirloin roast $1.79. Ground beef $1.39. American cheese $1.29. Tofu $0.80. Other economical substitutions are for mayonnaise, salad dressing, cottage cheese, sour cream, ice cream, eggs, chicken, sausage, pork. Note that TVP (textured soy flour) is now widely used by foodservice institutions in tacos and to some extent in hamburgers.

Nutritional value: Tofu is a star, being free of cholesterol, low in total fats and saturated fats, very low in calories, and free of salt... in addition to being an excellent source of high-quality protein.

Acceptability: Jack's Beanstalk (a tofu manufacturer in Salt Lake City, Utah) introduced a 50-50 mixture of tofu and ground beef under the catchy name of "Burgerlite" in college food lines. "Where tofu content has been 25-50% and all recipes tested have been in a form familiar to the college students (i.e. meat loaf, tacos, spaghetti sauce, etc.), acceptability has been equal to that of products not containing tofu." The more education and exposure people have concerning tofu, the more their general level of acceptance increases. The more accurate information they have, the less they fear change. To boost acceptability, two things are important: educate frontline foodservice employees and give general (or, even better, specific) recommendations for using tofu. In addition, develop a general strategy for introducing tofu as a new food to students, much as you would launch any new product. For example, prepare a campaign slogan: "Tofu, the new and upcoming food of the future is coming your way." Tofu seems to work best in desserts, entrees, salads and dressings, sauces, soups, and beverages. Try to develop recipes to yield at least 75 to 100 portions.

5582. **Product Name:** Tofutti (Soft Serve Non-Dairy Soy Ice Cream).
Manufacturer's Name: Tofu Time, Inc. (Marketer). Made in Middletown, New York by Gem Ice Cream Co., then in New Jersey by Welsh Farms.
Manufacturer's Address: 1638–63rd St., Brooklyn, NY 11204.
Date of Introduction: 1982. May.
Ingredients: Water, high fructose corn sweetener, corn oil, tofu, isolated soy protein, all natural flavorings (if strawberry--color is derived from the juice of beets; if chocolate, cocoa is added), soy lecithin, vegetable gums (guar seed, carob bean, carrageenan), salt.
Wt/Vol., Packaging, Price: Pint.
How Stored: Frozen.
New Product–Documentation: Spot in Soyfoods. 1983. Summer. p. 54. "The Tofutti Union. Tofutti, which is a soft-serve dairyfree ice cream made from tofu, soymilk, lecithin, soy oil, fruits, flavorings, and honey, is distributed to 11 states in gallon containers (in liquid form with a 7-week shelf life). The soft-serve form has been on the market since May 1982 and is sold in 60 outlets in New York City alone, including Bloomingdale's 40 Carrots, Zabar's, The World Trade Center's Big Kitchen, New York Health and Racquet Clubs, and the Great American Health Bar."

5583. Tsuchiya, Kunio. 1982. Minami no tôfu, kita no tôfu: Tottori meisan "Tôfu chikuwa" o tazunete [Southern tofu, northern tofu: A visit to "tofu chikuwa," a famous product of Tottori prefecture]. *Daizu Geppo* (*Soybean Monthly News*). May. p. 30-39. [Jap]
• ***Summary:*** Ordinarily the Japanese word *chikuwa* refers to a kind of fish paste.

5584. Grosserode, Teresa Willson. 1982. There's nothing fishy about this diet: Cook's corner. *Press* (*Ypsilanti, Michigan*). June 2.
• ***Summary:*** Chef Larry Janes is executive chef for Weight Watchers Inc. in central and eastern Michigan. One of his favorite low-calorie recipes, for Missing egg salad, is given here. Photos show Janes (age 30) and the salad.

5585. Gillis, Cydney. 1982. "Tofu madness" hits Seattle. *Daily of the University of Washington.* June 3. p. 13, 14, 19. [1 ref]
• ***Summary:*** Professor George Pigott [pronounced PAI-gut] teaches graduate courses in the food sciences. Each spring his students work with one local company to improve their process. This year he chose tofu and Island Spring. The one condition is that all of the students' findings may be published in research journals. A recent dinner at Pigott's home featuring tofu and attended by 10 of his students plus their guests was a big success. Guacamofu, Tofuna, and Tofu-Sambusa were among the fast moving appetizers.

5586. Nave, Robert W. 1982. Re: History of work with soyfoods and soybeans at SPRA in India. Letter to William Shurtleff at Soyfoods Center, June 5. 7 p. Typed (single spaced), with signature on letterhead.
• ***Summary:*** Gives details of his pioneering work, starting in 1968 when he was working at the Nave Technical Institute,

© Copyright Soyinfo Center 2013

Shahjahanpur, UP, India. In March 1970 Nave visited Joe Wenger and his plant in Sabetha, Kansas. He was impressed and the Wenger company then offered to give him the machinery (a Wenger X-25 extruder) necessary to set up a pilot project making extruded soy flour in India. During 1970 USAID in Delhi and the G.B. Pant University joined the proposed project. "From 1970 to late 1971 or early 1972 the project operated as NTI Soya Products. It was set up as a Part of Nave Technical Institute. After the University became a partner, the name was changed to Soya Production & Research Association. The association has been set up as a charitable company...

"SPRA produced Nutri Nugget (TVP), Protesnac (a soya-rice spiced snack), Protein Plus (a corn-soya weaning food), Nutriahar (a wheat-soya–fullfat [full-fat]–weaning food) and extruded fullfat soya flour. SPRA has not produced soymilk, tofu, etc. except on an experimental basis."

SPRA started building a factory in March 1971 at Bereilly. In July 1972 SPRA produced 40 tons of corn-soy weaning food for some feeding trials to be conducted by USAID in Madras state. Nutri Nugget (TVP) was the company's first product; the defatted soybean meal was originally purchased from Prag Ice & Oil Mills, and then from General Foods of Indore (owned by the Sahara brothers). In 1978 the company began having problems with its factory manager (George Grundy) and with production. Grundy and an electrical contractor, Kalim, had been approached by the Sahara brothers to build an extruder for them and set up a competing factory. "Grundy and Kalim then took our machinery apart on the pretext of maintenance and copied it, mostly at SPRA expense."

"Nutrela is produced by Ruchi. Ruchi is the name of one of Kailash Shahra's daughters after whom the company is named. The first extruder they used in this plant is the one made by Grundy as explained above. Unfortunately and in spite of their large media campaign their impact has been negative. They have gone so far as to provide retailers with new packages into which to fill the contents of the outdated packages which did not sell. Because they have little or no quality control, neither Meal Maker nor Nutrela sell well in the markets where Nutri Nugget is available. Both took the wordings used on their boxes and in their ads almost verbatim from the Nutri Nugget boxes and ads...

"Dr. Al Nelson was the key figure in setting up the soybean utilization lab at Pantnagar. Dr. Surjan Singh was head of the department of Food Science and Technology and in charge of the utilization lab. Both were key people in the University's roll in working with us when we were setting up the SPRA–although it had already existed for almost a year at NTI Soya Products.

"As far as I know, no one is extracting soy oil by expellers. All is being extracted by solvent. In Nagpur, someone who had been in the states for some time set up a soy milk project which has local distribution and was a private commercial effort...

"The government figures on soybean cultivation are not accurate. It is less than they say–largely because certain agricultural officers pad figures in order to make their efforts look better. However, cultivation is on the increase and will increase even faster when the market becomes adequately developed to assure sale of the crop.

"Almost as long as I can remember, it has been possible to get tofu in various foods in Chinese restaurants in India. I assume the Chinese were making this for their own limited use but did not try to market it outside.

"I have heard of soy flour being used in idli but think it is very limited if at all. Defatted soy flour and soybeans just aren't available in most places. I have never seen defatted soya flour on sale in retail stores anywhere. If it is now available, it has come very recently...

"TVP is the major soy food product in India. I imagine the total production of this is not much more than 200 tons per month at present but that this is more restricted by ability to produce than lack of market.

"I think the first solvent extraction of soy oil was in about 1969 or 1970.

"When I was in India last April 1982, the milk production at Pantnagar was closed and Sipso was not doing well. In both cases it seemed to be more because of management problems than anything else. The product was good. I have no knowledge of the Jabalpur plant.

"Possibly 50% of the people in India would eat eggs, meat, fish or poultry if they could afford them. Perhaps 20% eat these regularly. There is a great market for soy foods in India and it will grow at an increasingly rapid rate until India is one of the biggest users of soy foods in the world. It is a natural for soya foods if they are produced in a way that suits Indian tastes and conditions."

Attached is a 3-page news release (undated) about: (1) Dr. Vivian Erasmus, a native of India and general manager of SPRA in Bareilly, Uttar Pradesh, who will be in Minnesota from June 24 to July 13. A full-page biography is given. (2) SPRA in India; it is an association of the Methodist Church in India through the Nave Technical Institute (80% shares) and the G.B. Pant University of Agriculture (20% shares). The Methodist Church in India is affiliated to the United Methodist Church of the U.S. "All surplus earnings of the association are use to support charitable projects." The "main impact of SPRA has been in private homes through distribution and sales of its products in retail outlets. It now has nation-wide distribution. Its products include textured soy protein under the name of Nutri Nugget, a soy rice snack, a wheat soy weaning food and full-fat soy flour. Due to the pioneering work of SPRA, soybean based foods are now well established in India." Address: Compatible Technology, Inc, 7600 Harold Ave., Minneapolis, Minnesota 55427. Phone: (612) 545-0378.

5587. Andersen, Juel. 1982. Re: Tofu association and Tofu Institute prospectus. Letter to Steve Snyder, Hinode Foods, 519 Gladys, Los Angeles, CA, June 8. 3 p. Typed, without signature.
• ***Summary:*** Juel first met with Steve Snyder on June 3. She and Loren Fink co-produced a TV tape she left with Snyder. Juel is still trying to decide whether or not to go to the SANA meeting in Seattle, Washington, so she could explore the aims of the "other" camp. She talked with Jeremiah Ridenour who knows all the insiders, and says there is still a huge rift between the small [tofu] producers and the large primarily Oriental producers. Juel wants to convince the large producers that they need to promote tofu in general in order to protect their market, as well as to grow.

Her bid is $1,500 for the Tofu Institute prospectus, plus out of pocket expenses. Prepared by Carol Schreiber of ProCom, San Jose, California. Address: San Jose, California.

5588. Flinders, Carol. 1982. Children meet soy food in school lunch program. *Hartford Courant* (*Connecticut*). June 9. p. E5.
• ***Summary:*** Cartoonist Gary Trudeau drew up a series of comic strips in "Doonesbury" that poked fun at the federal guidelines for school lunches.

"Two teenaged boys sit before sparsely furnished cafeteria trays, expressions bleak.

"'Trade you an ounce of milk for your bean curd?'

"'No way, man! Bean curd's an entree."

This article is really about Thelma Dalman and her efforts to introduce tofu to the Santa Cruz (California) school lunch program, of which she is food service director. She has been serving tofu for years as part of an extremely successful program. "Outside of a brief, federally sanctioned experiment last year, Dalman is not permitted to use tofu as the primary protein food in school lunches. But she does use it in many dishes where cheese and eggs fill that role, and in non-entree dishes," such as an eggless mayonnaise, dips, or spreads. Dalman prefers tofu as it is, just stir fried or baked in a sauce. But she finds it is easier for the kids to accept it at first in quiches, tamale pies, or tacos.

Contains a recipe for Tofu tartar sauce.

5589. Farm Foods. 1982. American Booksellers Association tastes tofu and Ice Bean at annual convention (News release). 156 Drakes Lane, Summertown, TN 39483. 1 p. June 11.
• ***Summary:*** "Anaheim, California: Farm Foods and sister company The Book Publishing Company sampled recipes from their new book, *Tofu Cookery* at the annual Booksellers Convention and Exposition May 28-June 3. Seventeen thousand people filed through one of the largest trade shows in this country, sampling tofu onion dip, tofu cheesecake and soy Ice Bean (a nationally distributed soymilk ice cream similar to a recipe for tofu-ice cream in the new cookbook).

"'For many people it was the first time they ever tasted soy foods. The response was great. So many people thanked us for showing them how tasty tofu and soymilk ice cream can be... We kept the serving bowl filled for four days, using well over 150 pounds of tofu,' says Robert Tepper, Marketing Director for Farm Foods and collaborator on *Tofu Cookery."* Address: Summertown, Tennessee.

5590. Sheraton, Mimi. 1982. Restaurants: A Chinatown find, old-style French. *New York Times.* June 11. p. C24.
• ***Summary:*** This is a review of the Chinese restaurant Say Eng Look (5 East Broadway, Manhattan, New York City).

"A hefty belt of chili oil brings life to the... satiny squares of bean curd with ground pork,..."

"Seaweed lends a verdant, parsleylike freshness when crispy fried and crumbled over a miraculously crunchy fried whole sea bass or in the batter that coats the fried fish fillets..."

"If standard Cantonese appetizers... are inexcusably greasy and banal, there are a few exceptional alternatives, such as the fish roll wrapped in sheets of bean curd fried to gold-leaf fragility and topped with minced scallions..." Recommended dishes: "Fried fish roll in bean curd sheet."

Note: This "bean curd sheet" is what we call a "pressed tofu sheet."

5591. Foley, Terrence B. 1982. Soybeans and soyfoods in China (Interview). Conducted by William Shurtleff of Soyfoods Center, June 12. 2 p. typed manuscript.
• ***Summary:*** Terry is now in the USA, visiting American Soybean Assoc. headquarters. He has been an ASA employee for 1½ years. He is a specialist in East Asia, who studied Chinese history in college and worked in Massachusetts. He knows our work, has all our books on soyfoods, and hopes we can meet some time. There are no official statistics published by China on its agricultural production or area.

Terry's inquiries in Peking indicate that peanut oil is preferred for food use, followed by soybean oil, rapeseed oil, and lard–in that order. Sesame oil is not mentioned. He does not know what oils are preferred in southern China. He has read that Manchurians prefer soy oil. Like all basic foods, vegetable oil is rationed, to maybe a couple of cups per family per year; he has no figures on the exact amount. Vegetable oil is replacing lard. Koreans strongly prefer sesame oil; they drizzle it on foods.

About 85% of the oil made in China is obtained using hand-turned screw presses; the remaining 15% comes from modern solvent extraction plants. He has visited such plants in Shanghai, and knows they are operating in Dairen and elsewhere in Manchuria such as Harbin and perhaps Shenyang. These large solvent plants probably refine their oil. He would guess that both refined and traditional unrefined soy oil are sold in China. When a consumer buys oil, she takes her own bottle to a distribution point in a store, then has it filled. He strongly suspects the quality would be

© Copyright Soyinfo Center 2013

very poor by Western standards.

The Chinese are moving to low-fat hogs, since the people want more meat and less fat. There are now two prices established by the government: fatty pork and lean pork.

The main area of soybean production in China is the northeast (Manchuria), followed by the North China Plain. There is now a big export push in China to raise money. Some soybeans have been exported to Japan; most soybean meal is spread on the fields.

Tofu is in especially short supply in China; housewives almost get into a fistfight waiting in long lines for it.

ASA's top priority in China is the livestock industry, including the formulation of modern livestock diets, confinement methods, disease prevention, and genetics (to get modern breeds of animals to China). Address: Director, China Office, American Soybean Assoc.

5592. Krieger, Verena. 1982. Re: Recent developments with tofu in Switzerland. Letter to William Shurtleff at Soyfoods Center, June 14. 3 p. Typed, with signature. [1 ref]
• ***Summary:*** A person who is knowledgeable on macrobiotics and soyfoods in Europe is Mario Binetto from the Macrobiotic Center in Bern. He can be reached at Restaurant Sesam, Monbijourstr. 19, CH-3011 Bern. Marty Halsey is doing work at his tofu shop. Tevan Thieu is trying to start a tofu business in the Basel-area. In the late 1970s Verena worked at a natural foods vegetarian restaurant near Chicago, Illinois, where tempeh and tofu were made frequently. In June 1979 she and her husband David returned to her native Switzerland and began work that played a key role in getting soyfoods into the Swiss consciousness and Swiss kitchens.

"The milestone was set, when I managed to publish my article 'Gestern Steak, morgen Tofu.'...into a Sunday magazine, which is respectable and progressive at the same time and widely read in Switzerland.

"Thanks to the foresight of my friend Lukas Kelterborn, who knew that this publication would stir a wave of interest, we [she and 4 other people interested in tofu] hastily set up a tofu shop to meet the coming demand for tofu. This was the birth of the 'Sojalade.'

"Two months later Swiss national TV did a 30-minute show during prime time on soybeans, using basic information from 'Das Tofu-Buch' (the book was actually shown and recommended through the channel), at the end of which I was given a few minutes to present a meal of five tofu dishes, tailored to the Swiss palate. Since then tofu has been a favorite child of the medias. A couple of weeks ago, our tofu group was even mentioned in the 'Blick' (the 'National Enquirer' of Switzerland)... With all this noise, things have remained small and still beautiful. Our shop is approaching the 1,000 lb/week production level, and we are distributing our tofu mainly in Zurich (population about half a million). Demand has gone up steadily, especially in Zurich. Considering that Switzerland is a classic dairy country, where the cow is held more holy than in India, where milk is the next best thing to our life-blood, and where there is no Asian population to speak of, this is a compliment to both tofu and the Swiss. Of course, the bulk of tofu is still being sold in health and natural foods markets...

"The present soyfoods market wants only organically grown soybeans, and to promote soybean growing just on that basis is ten times harder than conventionally grown beans...

"For the fall, Swiss national radio plans a series of two programs on soybeans, especially directed to farmers." Address: Bruchmattstr. 24, CH-6003 Lucerne, Switzerland. Phone: 041-22 50 34.

5593. Fabricant, Florence. 1982. Recipes on microfiche to assist chefs. *New York Times.* June 16. III, 3. p. 1.
• ***Summary:*** Dieter Hannig, Director of Food Research for Hilton International Hotels, has compiled many recipes on microfiche to inspire Hilton hotel chefs. A part of the menu is devoted to what Mr. Hannig calls the "new healthy food." It includes foods that appeal to vegetarians and those on a salt-free diet.

One of the most recent microfiche series covered tofu, with serving suggestions that ranged from traditional East Asian dishes to "some of Mr. Hannig's personal creations such as tofu terrines with vegetables and herbs, vegetable pasta with tofu sauce, and tofu dumplings." A photo shows Dieter Hannig looking at a recipe on a microfiche reader. Address: New York.

5594. *Vashon-Maury Island Beachcomber.* 1982. Tofu education begins. June 17. p. 5.
• ***Summary:*** Island Spring has installed a video show at the QFC Supermarket. A continuous tape shows a local cook using tofu in two simple recipes: Guacamofu (tofu guacamole) and Tofuna (tuna and tofu). "TV at point-of-purchase puts us in touch with people when they're in a food buying mood." Address: Washington.

5595. Wells, Patricia. 1982. Fast food on the fast track: On–or near–Japan's railroads, box lunches are first-class fare. *New York Times.* June 20. p. XX37.
• ***Summary:*** "In much of the world, fast food has become a synonym for mediocre, mass-produced fare." But not so in Japan. The *ekiben* (box lunch for train travelers) has a long tradition of high quality, inexpensive, healthful food. A part of almost every box lunch is a tiny container of soy sauce for seasoning.

One excellent part of this box lunch, "a favorite of Japanese children, is inari zushi, seasoned rice wrapped with fried bean curd or tofu that's been boiled in a sweet sauce."

5596. Re: First International Natural Food and Health

© Copyright Soyinfo Center 2013

Exhibition. 1982. Letter to William Shurtleff at Soyfoods Center, June 21. 1 p. Typed, on letterhead. [Eng]
• ***Summary:*** "We were introduced to you by Mr. Lawrence Dreyer from "Weg der Natur" in Austria who forwarded us all the mail received from you.

"At the moment we are organizing the "First International Natural Food and Health Exhibition, Conference, Seminar and Film Festival," which will be held in West Germany in autumn 1984, with the expected attendance of over 40,000 persons.

"We will appreciate very much if you join us to organize within our exhibit the "First International Soyaproducts Conference."

"For this matter we would urgently need your "Soyfood directory" and "Data Book" as well as the "Soyfood Mailing List."

"Also we are very interested to establish a Soya Food Center in Munich, Germany. Please send us information and application forms.

"Also we want a one year subscription to the "Soyfoods Magazine." When possible we want to buy a camera-ready copy of pamphlets about Tofu and Miso in German." Address: Weg der Natur, Amalienstrasse 45, D-8000 Munich 40, West Germany. Phone: (089) 28 37 51.

5597. Wiegand, Peter. 1982. Re: Starting Auenland Tofu in Germany. Letter to William Shurtleff at Soyfoods Center, June 22. 1 p. Typed, with signature on letterhead. [Eng]
• ***Summary:*** This letter is written on a colorful letterhead showing a rayed reddish-orange sun setting over a village. "I learned to make tofu in Fairfax, California, at Wildwood Natural Foods, working with Paul Duchesne for about 6 months. In the autumn of last year my family and I returned to Germany and opened a tofu kitchen in the spring of this year [March 1982]. At the beginning we named our kitchen the same as in California (Wildwood Natural Foods), but we soon decided to give it a German name. Tofu is getting a bigger market more and more. Our small kitchen is now able to produce about 200 kg/day of tofu. Since we started I have met a lot of people who are really interested in tofu and Sojaproducts, and they want information. We are right at the beginning and tofu needs a lot of promotion because it is unknown. The health department gives us a lot of trouble about using nigari, the shelf life, packaging, using another name than tofu, etc.

Follow-up phone talk: Since the beginning we have made tofu burgers, tofu salad, tofu pizza, and Tofu Apfel-kuchen (Apple Tart, using tofu instead of quark). There was a big party when the company started. Address: Auenland Tofu & Sojaprodukte, Hub 4, D-8210 Prien/Chiemsee, West Germany.

5598. Bernard, Alain. 1982. Re: Work with soyfoods at Auroville, India. Letter to William Shurtleff at Soyfoods Center, June 24–in reply to inquiry of March 17. 1 p. Handwritten, with signature on aerogramme.
• ***Summary:*** "We would like, in addition to the toffu [tofu] making, to start more developing the consumption of Soya Milk." He asks: (1) How can make it so it keeps for more than a few hours in tropical climates. (2) What other ingredients can be added to the milk to make it more palatable, in order for people to accept it more quickly. Address: "Pour Tous" Food Processing Unit, Aspiration–Auroville, Kottakuppam 605104, South India.

5599. Lee, Bill. 1982. History of Wy Ky and its struggle to enter the Los Angeles tofu market (Interview). Conducted by William Shurtleff of Soyfoods Center, June 29. 1 p. transcript.
• ***Summary:*** Wy Ky started in July 1970. Bill was the first Chinese-American tofu manufacturer in Los Angeles Chinatown. Matsuda-Hinode, which then controlled 100% of the Los Angeles Chinese tofu market, used every trick in the book to try to keep Bill out of the market, but to no avail. Eventually Wy Ky captured 90% of the Los Angeles Chinese tofu market, but now has 60-65% after other Chinese tofu makers came in.

Note: In 1984 Bill sold his to Yuk-Ming Man and Mrs. Ho, who is the mother of David and Elaine Ho. The latter two people run the company.

Talk with Raymond Lea. 1993. Oct. 13. His father, William Lee, founded this business. He was the first Chinese-American tofu maker in Los Angeles Chinatown. In about 1988 Wy Ky stopped manufacturing tofu, tofu products, and soymilk, but they continue to distribute and sell these products which are made by other companies; Hinoichi makes the basic tofu, Furama makes the soymilk, and Visoy makes a pudding. At the Wy Ky plant there are two walk-in refrigerators where the soyfoods products are stored. All the equipment is in the basement. Bill Lee, the founder, died in Jan. 1993 while on a trip to the Philippines. He had been divorced in about 1980 and sold the business in 1984. Raymond is assembling a team to try to buy back the company. Address: Owner, Wy Ky Food Products Inc., 237 San Fernando Rd., Los Angeles, California 90031.

5600. Yamauchi, Shoan. 1982. History of Matsuda-Hinode Tofu Co. (Interview). *SoyaScan Notes.* June 29 and Aug. 11. Conducted by William Shurtleff of Soyfoods Center. Then two follow-up interviews in Oct. 1988.
• ***Summary:*** The company traces its roots back to Hawaii to the Uyeda/Ueda Tofu Co., which may have started at an earlier date. In 1939 Mr. and Mrs. Shokin Yamauchi, who had 6 (8??) children and very little money (the effects of the Depression were still being felt), bought Uyeda/Ueda Tofu Co. on Aala Street from Mr. and Mrs. Uyeda/Ueda, who had bought it 2-3 years earlier from someone else. It was a very small mom and pop operation. Two friends of the family, one

© Copyright Soyinfo Center 2013

an uncle, helped the Yamauchi family to buy the company. Either shortly before or shortly after the Yamauchi family bought the business, it was renamed Aala Tofu Co. It was never named Shoan Yamauchi Tofu, the name that appears in a 1942 Honolulu City Directory. Mrs. Yamauchi and her two sons, Shoan (the #2 son, who had previously baked cakes in a bakery) and Shojin (the #3 son, who was still in high school), ran the family business successfully. Shoan, who learned how to make tofu from Mr. Ueda, the eldest son did most of the work. He recalls: "I worked like a dog, 15-16 hours a day, 7 days a week, for no pay and with almost no help from machines." Shoan's father did other work in the shipyards. In 1942 Shoan married Shizuko ??, who also lived in Hawaii. She joined him working at the tofu shop.

After World War II, in 1946, on his younger brother's recommendation, Shoan went to Los Angeles. The Japanese were just coming out of the wartime intern camps, many having lost everything. First he talked to the five partners at Matsuda Tofu Co., which had about 5,000 square feet versus 700 square feet for Hinode, but Matsuda didn't want to sell? What did they say? So 1946, Shoan gave the family tofu shop in Hawaii to his brother, Shojin, and in September 1947 he and his wife moved to the mainland. Before buying a business?? The owners of the Hinode Tofu Co. in Los Angeles offered to him their company for $4,000; it had cost them $8,000 to set it up. Shoan decided to buy it, even though his wife didn't want to.

A little background on tofu in Los Angeles. The two early tofu companies were Japanese-run Matsuda and Chinese-run Wing Chong Lung. Both had started in about the 1920s (or perhaps before) in Los Angeles.

Matsuda Tofu Co. was started in about 1920 by a Mr. Matsuda. During World War II the company was closed. Mr. Matsuda and his workers were sent to intern camps. After the war, 5 partners (including Ken Osaki and a Mr. Sasaki), who had very little money, obtained the Matsuda name from Mr. Matsuda and essentially started a new company. They had to move the business to a new location, probably because of zoning problems.

Shortly after the war a new company named Tomoi Tofu Co. was established in Los Angeles at First and San Pedro Streets. But they were bought out by Matsuda in 1946 for $8,000. Thereafter, having no competition, Matsuda raised prices and there was a furor among consumers. So the former owners of Tomoe (Mr. Tomoe and probably a partner) started Hinode Tofu Co. in March 1947 at 6th St. and Towne Ave. They made 1,500 cakes of tofu a day.

Then the owner of Tomoe Tofu Co. got sick. Shoan Yamauchi's younger brother, Shojin ("Jin"), had visited Hinode in May 1946, then returned to Hawaii and told Shoan to go to Los Angeles, as described above.

In November 1947 Shoan and Shizuko began to run Hinode Tofu Co. at 6th St. and Towne Ave. They made only three products: Japanese-style soft and Chinese-style firm tofu, plus agé (deep-fried tofu pouches). The early years were tough; it was a small company with no reputation, and almost no machinery or capitalization. The tofu wholesaled for $0.20/lb and was sold only in bulk. Again the work was hard and the hours long. In 1952-53 he moved the business to 4th St. and Towne Ave (Why??), where he bought his own building. Most of Mr. Yamauchi's customers were Chinese and Japanese, with very few Caucasians. Hinode Tofu Co. grew steadily, and in 1956 Mr. Yamauchi bought out his competitor, Matsuda Tofu Co., the only other Japanese tofu maker in the area. The new company, named Matsuda-Hinode Tofu Mfg. Co. was now the biggest on the mainland United States. In 1964 (1962) the company established three milestones: (1) It became the first company on the West Coast (and perhaps in the world) to package tofu; (2) It became the first U.S. company to get tofu into a supermarket chain (Boy's Market in Los Angeles); and (3) It became the first U.S. company to make natto.

In 1969 the company built and moved into its present location at 526 S. Stanford Ave. That same year the company introduced several new tofu products that Yamauchi had learned to make in Hawaii, which were not yet widely made on the mainland: Kinugoshi (silken) tofu, nama agé (deep-fried tofu cutlets), and yaki-dofu (grilled tofu).

In about 1976 he added ganmodoki (deep-fried tofu burgers). In 1978 the company expanded into a million-dollar automated factory, which made the first pasteurized tofu in the western world. In 1981 the company's name was shortened to the original name, Hinode Tofu Co. That year tofu production was 81,000 pounds a week, rising to an estimated 140,000 lb/week in 1982–27% more than the next largest tofu manufacturer in the western world, Azumaya.

Mr. and Mrs. Yamauchi have three children, all adopted. John Yamauchi, the second oldest, is very involved with the tofu business. Rodney does sprouts. Address: 526 S. Stanford Ave., Los Angeles, California.

5601. Chico-San, Inc. 1982. Mail order–Price list. P.O. Box 1004, Chico, CA 95927. 4 p. June. 28 cm.

• ***Summary:*** Products include: Rice Cakes (6 varieties, with 4 new ones coming soon); all in 3 different packages. Carob coated rice cakes in plain or mint flavors. Yinnies brand products: Taffy, Caramel, or Rice Syrup. Grains, beans, and seeds: Incl. Sweet brown rice, azuki beans, black [soy] beans (the latter two imported from Japan since 1962). Tea. Natural condiments from Japan (some imported since 1962): Lima soy sauce. Mugi (barley) miso. Kome (rice) miso. Rice malt vinegar. Tekka (soy plus). Nigari (for tofu making). Kuzu (wild arrowroot). Salt plums (umeboshi). Sesame oil (dark). Koji, barley. Seaweeds from the Orient: Wakame (curly dulse). Kombu. Hijiki. Kanten (gel). Nori. Household goods: Incl. The Yinnies Brand Rice Syrup Cookbook.

Introducing a new Chico-San Product: Tamari Soy Sauce. Address: Chico, California. Phone: 916-891-6271.

5602. Daenzer, A. Walter. 1982. Tofu: Ein neues altes Produkt aus Asien [Tofu: A new old product from Asia]. *Reform + Diaet.* June. p. 2. [Ger]
• ***Summary:*** For some months a new biona exclusive product has been available in biona-Reform Houses: Soyana-Tofu. He compares it to quark and emphasizes how pure, pure, pure it is. Black-and-white photos show: (1) Tofu being pressed at the Soyana tofu shop. (2) The tofu product's label. An ad for new biona Soyana Tofu is on the same page.

5603. Five Seasons Restaurant (The). 1982. Menu. Jamaica Plain, Massachusetts. 1 p.
• ***Summary:*** This menu, dated June 1982, printed with dark brown ink on beige paper, is divided into the following categories: Appetizers: incl. Tofu cream cheese & crackers, Tenpura nori roll, Marinated tofu. Staples. Salads: incl. Chef's salad with slices of seitan and marinated tofu, Tofu cream cheese platter. Desserts. Luncheon specials. Sandwiches: incl. Fried tempeh sandwich, Tofu cream cheese sandwich. Noodles: incl. With tofu & vegetables, topped with fried tofu or tempeh. Pan-fried rice or noodles. Side orders: incl. fried tofu, fried tempeh. Beverages. To go: Tofu cream cheese. Address: Jamaica Plain (near Boston), Massachusetts.

5604. Granny Goose Potato Chips. 1982. California Style Chips (Ad). Radio broadcast. KYA 1260. June. 30 seconds. 1 p. transcript.
• ***Summary:*** Woman: Ooh, try this avocado, sprouts, and tofu quiche. Man: Oh, no thank you. I'm happy with my California Style Chips.

Woman: Don't you relate to tofu? Man: Basically, I relate best to Granny Goose California Style Potato Chips.

Woman: California Style Chips. I can dig it. I've got a thing about California. Jogging, sharing, staying mellow. Man: Well, that's just where California Style Chips are coming from. They've got a subtle, buttery flavor that's incredibly mellow. (Crunch, crunch)

Woman: Ooh, they are buttery. I could really munch out on them. Man: And they're crisped in a pure golden sunflower oil to make them really light tasting.

Woman: Mmmm, light things are so heavy. Listen, lets take this bag of chips and go eat them in my hot tub. Man: Won't we get the chips all wet? Woman: Not if I fill the hot tub with guacamole.

5609. Mandoe, Bonnie. 1982. Soy power. Part II. *Bestways.* June. p. 91-92.
• ***Summary:*** The author recently had the opportunity to visit an old Hawaiian tofu shop on the island of Maui. The Teruya family has made Valley Isle Tofu there since 1916. Walter and Takeshi Teruya now make the tofu. Takeshi has been making tofu since he was age 15. Production begins at midnight, 6 nights a week. The author has been using tofu for over 12 years. Her two strongest impressions of the shop are its cleanliness and tranquility.

Contains 3 Oriental style recipes (adapted from Sakae Teruya) and 3 western style tofu recipes.

5610. **Product Name:** Tofu.
Manufacturer's Name: Methow Valley Foods.
Manufacturer's Address: General Delivery, Twisp, WA 98856. Phone: 509-996-2372.
Date of Introduction: 1982. June.
Ingredients: Water, organic soybeans, nigari.
Wt/Vol., Packaging, Price: 1 lb.
How Stored: Refrigerated.
New Product–Documentation: Label. 1982. 5.25 by 3 inches. Self adhesive. Light green and black on white. Illustration: man on horse riding up mountain. "Keep refrigerated." Letter from Joyce Campbell and Bernie Bigelow. 1982. June 30. They are "The Tofus" who started the business. Photo from Joyce and Bernie of Methow Valley Foods. 1987. May. Shows the inside of their tofu shop and all its equipment. Their address is now P.O. Box 247, Carlton, Washington 98814.

Letter from Joyce Ann Campbell. 1999. March 2. She and Bernie have seen a lot of changes and their tofu company is changing too. The began a community style tofu business in 1982. In 1995 they stopped and recently they began plans to reopen, in collaboration with a cooperative, in the spring of 1999.

5611. Shurtleff, William; Aoyagi, Akiko. 1982. Report on soy delis, cafes and restaurants. Lafayette, California: Soyfoods Center. 116 p. Illust. June. 28 cm. [21 ref]
• ***Summary:*** Contains 150 recipes. Based on extensive original surveys conducted by Soyfoods Center, including questionnaires sent to each of the soy delis. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

5612. Shurtleff, William; Aoyagi, Akiko. 1982. Soyfoods industry: directory and databook. 2nd ed. Lafayette, California: Soyfoods Center. 56 p. June. 28 cm. [24 ref]
• ***Summary:*** A detailed study of the rapidly emerging soyfoods industry and market. Contains original statistics compiled by the Soyfoods Center through interviews with companies. Contents: 1. Terminology: The many types of soyfoods. I. Traditional low-technology soyfoods. 1A–Nonfermented soyfoods: Fresh green soybeans, whole dry soybeans, soynuts and soynut butter, soy sprouts, whole soy flour & grits, roasted soy flour [kinako] & soy coffee, soymilk and dairylike soymilk products, tofu (eight types), okara or soy pulp, yuba.

1B–Fermented soyfoods: Tempeh, miso, soy sauce, shoyu & tamari, natto & thua-nao, fermented tofu & soymilk, soy nuggets [fermented black soybeans] (Hamanatto & tou-ch'ih).

II. Modern soy protein foods: Defatted soy flour, grits & flakes, soy protein concentrates, textured soy protein products, soy protein isolates.

III. Soy oil products: Soy salad oil & cooking oil, soy oil margarine & shortening, soy lecithin.

2. Soyfoods industry directory: Names and addresses of over 850 soyfoods manufacturers in the Western world, plus major soymilk, miso, shoyu, and yuba manufacturers in East Asia. 3. Analysis of the soyfoods industry in the U.S.

4. Trends in U.S. and world soybean production: Graph of world soybean production (1922-1979) including graphs for the world total, USA, Asia total, and Latin America. Graph of U.S. soybean production, yields, and exports (1924-1979).

5. Analysis of the tofu industry in the West: The U.S. tofu market: overview and outlook. Graph of the number of tofu (and tempeh) manufacturers in the West from 1975 to 1982. Four-year analysis of the tofu industry in the West. Listing of North America's largest tofu manufacturers and their weekly tofu output. Japan's largest tofu manufacturers and their daily output. Favorite tofu, soymilk, and tempeh recipes as served at U.S. soyfoods, delis, cafes, and restaurants, or marketed as ready-to-serve products. Books on tofu published in America.

6. Analysis of the tempeh industry in the West: Graph of number of tempeh manufacturers. Recipes. Listing of North America's largest tempeh manufacturers and their weekly output.

7. Analysis of the worldwide soymilk industry: Analysis of the soymilk industry in the United States. Analysis of the soymilk industry in Japan. Major Japanese soymilk companies and their products.

8. Analysis of the soy sauce / shoyu and miso industries worldwide. Statistics on fermented soyfoods in East Asia. The soy sauce market in the United States (1981). U.S. imports of soy sauce. Graph (1947-1981. Source: U.S. General Imports, Schedule A. Commodity by Country. U.S.

© Copyright Soyinfo Center 2013

Dept. of Commerce, Bureau of Census). U.S. imports of soy sauce. Table (1947-1981. Source: U.S. General Imports, etc. See above). The shoyu / soy sauce market in Japan. Graph. (1886-1980. Includes: Number of manufacturers. Per capita consumption. Shoyu production. Kikkoman's market share (%)). The miso market in Japan. Graph. (1930-1980. Includes: Per capita consumption. Total miso production. Factory production. Number of manufacturers. Home production. Amount of soybeans used). Overview of the miso market in the United States. Miso exports from Japan (1981). Japan's ten largest miso manufacturers and their output.

9. Other: Analysis of the soynuts industry in the U.S. North America's larger soyfoods delis, cafes & restaurants. The soybean crushing industry; overview.

10. Soyfoods terminology and standards (Glossary of soyfoods terms): I. Traditional nonfermented soyfoods: Fresh green soybeans, okara, roasted soy flour (soy coffee, soy chocolate), soybeans, soymilk (soymilk ice cream, soymilk soft serve, frozen soymilk yogurt, soymilk mayonnaise, soy shakes, soy nog, soymilk whipped cream), soynuts, soy sprouts, tofu (regular tofu, deep-fried tofu {deep-fried tofu cutlets called nama-age or atsu-age in Japan, deep-fried tofu burgers or burger balls, called ganmodoki or hiryozu in Japan, deep fried tofu pouches (called aburage in Japan; the words "deep-fried" may be dropped from the names after the initial usage, and in recipes or on package labels, if desired}), silken tofu {made without separation of curds and whey, called kinugoshi in Japan; modern types, all made with glucono delta-lactone as coagulant, and all known in Japanese as juten-dofu, are packaged lactone silken tofu, bagged lactone silken tofu (fukuro-dofu), sealed lactone silken tofu (buro-dofu), and Ever-Fresh Lactone Silken Tofu (in Tetra-Pak}), grilled tofu, frozen and dried-frozen tofu. (Note 1. It is illegal to describe the latter product as "freeze-dried tofu," since freeze-drying is a completely different process), terms associated with making tofu {fresh soy puree, a coagulant or curding agent, forming box, filter bag or pressing sack, tofu comes in cakes, not blocks}), whole soy flour, flakes and grits, yuba.

II. Traditional fermented soyfoods: Fermented soymilk products (soymilk yogurt {Soy Yogurt, Soyogurt, Soygurt}, acidophilus soymilk, soymilk kefir, viili, piima, buttermilk {Soy Kefir, etc.}), fermented tofu (wine-fermented tofu, brine-fermented tofu), miso (rice miso, barley miso, soybean miso, Chinese soybean chiang), natto (thua-nao from Thailand and kinema from Nepal; all are non-salted), fermented black soybeans [fermented black soybeans] (Chinese fermented black soybeans know as shih, tou-ch'ih, tou-shih, or dow-si; savory fermented black soybeans called Hamanatto in Japan, Daitokuji fermented black soybeans called Daitokuji natto in Japan, Philippine fermented black soybeans called tausi or tao-si in the Philippines, Indonesian soy nugget paste called tauco, formerly spelled tao-tjo, Malaysian soy nugget sauce called tao-si), soy sauce (shoyu. The five basic types of Japanese shoyu are: regular shoyu called koikuchi shoyu in Japanese, light-colored shoyu called usukuchi shoyu, tamari shoyu, clear shoyu called shiro shoyu, and rich shoyu called saishikomi shoyu), tempeh, other fermented soyfoods.

Note 2. This is the earliest document seen (Sept. 2012) that uses the word "Soygurt" to refer to soy yogurt.

III. Soy oil and modern soy protein foods: soy oil, defatted soy flour, flakes and grits, soy protein concentrate, soy protein isolate, textured soy protein products (TSP, TVP is a registered trademark of the Archer Daniels Midland Company and cannot be used as a generic name for this product), meat analogs (foods typically made from spun soy protein fibers to resemble meat, fish, or poultry products).

11. Names of soyfoods around the world: Names of 40 products. Brazilian / Portuguese names. British English names. Chinese names (fermented tofu is Toufu-ju or Sufu). French names, German names. Japanese names. Spanish names.

12. Key institutions working with soyfoods in the West: The Soyfoods Center, Soyfoods Association of North America, INTSOY, American Soybean Association, Bean Machines, Inc., Soycrafters Apprenticeship Program, USDA Northern Regional Research Center, Sojaquelle.

About The Soyfoods Center.

Note 3. This is the 2nd market study published by Shurtleff. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

5613. **Product Name:** [Tofu].
Foreign Name: Tofou.
Manufacturer's Name: SOY (Société Soy).
Manufacturer's Address: Plateau de l'Ardennais, 91590 Cerny, France. Phone: (6) 457.52.01.
Date of Introduction: 1982. June.
Ingredients: Water, French-grown soybeans*, sea salt. * = Organically grown.
Wt/Vol., Packaging, Price: 250 gm vacuum pack.
How Stored: Refrigerated.
New Product–Documentation: Letter from Sjon Welters. 1982. April 16. The most important development with soyfoods in France is that Bernard Storup has just bought a whole system for tofu production.

Letter from Bernard Storup. 1982. Aug. 19. Bernard and Jean Preneuf have been making tofou [tofu] since mid-June. The plant is located at Cerney but he and Françoise (who had a baby girl on May 9) live at nearby Arpajon. "I think things will go quicker for soyfoods in Europe than in the U.S."

Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Company is named Soy S.A.R.L. at Plateau de l'Ardennais. Owner: Bernard Storup & Jean de Preneuf.

Richard Leviton. 1983. Oct. 16-17. Visit to Societe Soy in Cerny. This tofu plant, the largest in France, is

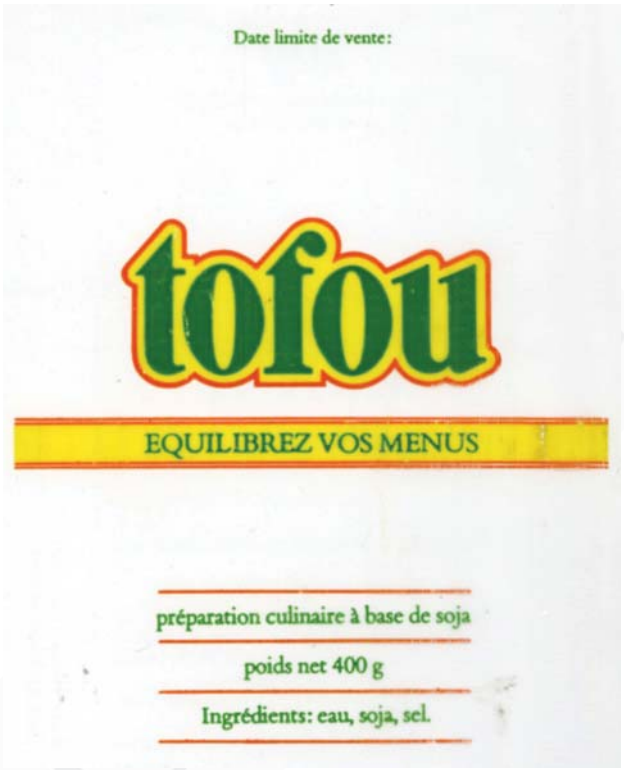
© Copyright Soyinfo Center 2013

distinguished for its dairy style machinery innovations. Societe Soy uses 6 workers two days a week to produce 5,000 lb/week of tofu. They use the "tofou" spelling and Soy not soja for the company name so they could trademark both in France. Societe Soy began production in Sept. 1982.

Label. Undated. Printed with green, yellow and red on plastic pouch. *Tofou: Equilibrez vos menus*) (Tofu: Balance your menus).

Letter from and form filled out by Bernard Storup. 1984. March 22. Contains a brief history of the company. They now make 2,500 kg/week of tofu, including 1,400 kg/week of tofu burgers. One year ago they made 1,000 kg/week.

Letter from Bernard Storup. 1986. Jan. 1. "Bernard, Françoise and I are on the way to move to the center of France in a new shop (near the mountains and French best quality water, in St.-Chamond, near St.-Etienne, a little southwest of Lyon) end of summer 1986. From: 16 Avenue de le Republique, 91590 Arpajon, France." Soya Bluebook. 1986. p. 107. Company now named "Soy." Their product is listed as "Croque Tofu." Letter from Harry Whitford of Soyastern. 1987. Dec. 14. "My feeling is that this company has lots of capital but not so many good ideas. I wasn't impressed by their products, mostly because their professional packaging awakens professional expectations. We don't have much information about their production amounts. As far as I know they distribute through natural/health food channels." Letter from Bernard Storup. 1989. March 3. "We started to make tofu commercially in June 1982. The company itself was founded in Feb. 1982."



Label. 1988. 2.5 by 4 inches. Self adhesive. Green, yellow, and red on white. "The green protein (*La proteine verte*). Culinary preparation based on soya. Consume before 1 Aug. 1984. Store refrigerated at + 4ºC. After opening the sachet, put in a bowl filled with water. For information and recipes, write Société Soy at Saint-Chamond."

5614. **Product Name:** Soft Organic Tofu.
Manufacturer's Name: Surata Soyfoods.
Manufacturer's Address: 302 Blair Blvd., Eugene, OR 97402.
Date of Introduction: 1982. June.
Ingredients: Certified organically grown soybeans, water, nigari (natural sea minerals).
Wt/Vol., Packaging, Price: 16 oz packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.
How Stored: Refrigerated.
New Product–Documentation: Form filled out by Shevah Lambert. 1990. July 2. Surata now makes 4,300 lb/month of this product. Production started in June 1982. Label sent by Shevah Lambert. 1991. Jan. 16. 6 by 4.5 inches. Green and red on clear plastic film. "Perfect for blending–use in dressings, dips, puddings...! For recipes and information send a S.A.S.E. to: Surata Soyfoods, Inc."

5615. Tofu Shop (The). 1982. Take-out deli (Menu). 768 18th St., Arcata, CA 95521. 3 panels each side. Each panel: 22 x 9 cm. Undated.
• ***Summary:*** This 6-panel leaflet and menu is mostly hand-written but partly printed. On the front cover is the logo of a

© Copyright Soyinfo Center 2013

dragon in a circle. "9-6 Monday–Saturday. Hot food served 12-6 daily. In a hurry? Call ahead: 822-7409. Your local soyfoods producer." One panel, titled "Welcome to the tofu shop," states that this is "one of only a handful of traditional-style tofu shops in the Western Hemisphere."

Another titled "Inside our sandwiches" lists the ingredients in each sandwich. Soy-related menu items include: Sandwiches: Tofuburger. Dragonburger. Tofucadoburger. Spinach turnover (with tofu filling). Sesame tofu pocket. Mexican pastry (a mini-burrito filled with spicy tofu). Fuji roll (with rice, [mung] bean sprouts, tofu, and miso). Sushi roll (with nattoh miso filling). Tofu burrito. Salads: Potato-tofu. Tahini-tofu. Desserts. Beverages: Soymilk. Sides: Tamari, olive and lemon. Sesame tofu dressing. Miso onion sauce. Tofu vegie patty. Baked tofu cutlet. Specialty groceries: Tofu, miso, condiments, crackers, recipes, supplies for tofu and miso making. Address: Arcata, California. Phone: 707-822-7409.

5616. *Toyo Shinpo* (*Soyfoods News*). 1982. Kontesuto [Tofu cooking contest]. July 1. [Jap]
• ***Summary:*** Recipes are given for the top three winning recipes in the content: (1) Tofu layer cheesecake. (2) Soy cake pizza. (3) Tofu white mousse.

5617. Japan Packaged Tofu Association. 1982. U.S. Soycrafts Study Tour: Member list. Japan. 3 panels each side. Each panel: 19.4 x 10 cm.
• ***Summary:*** This glossy black-and-white leaflet gives a portrait photo and basic information about each of the 22 Japanese who will attend the Seattle soyfoods conference. For each person the following information is given: Member of the Packaged Tofu Association: Yes or no (all are members). Name written in Japanese characters. Name written in Roomaji (Roman letters, last name first). Name of person's company, his position, and the full company address. The leader of the group is Mr. Minemoto Shunichi of Asahi Foods Co. in Tokyo.

Note: Mr. Wataru Takai may have helped to organize this group, although he was not a member of it.

5618. Nilsson, B. 1982. I Örsundsbro görs tofu [Tofu is made in Örsundsbro]. *Enkopings Posten.* July 7. p. 10. [Swe] Address: Orsundsbro, Sweden.

5619. White, Jim. 1982. Restaurant busts spiral as depression hits home. *Toronto Star* (*Ontario, Canada*). July 7. p. C14.
• ***Summary:*** A year ago many new restaurants were opening in Toronto. Among those already gone from the local food scene is "the tofu palace Soja (Kensington Market)."

"The depression (you can call it a recession all you want to, but when 1.25 million Canadians are on the pogey [welfare, dole], I call it a depression) has really hit the restaurant trade hard." Address: Food editor.

5620. Bhatnagar, P.S. 1982. Re: Request for proforma invoice for publications and materials. Letter to William Shurtleff at Soyfoods Center, July 8. 1 p. Typed, with signature on letterhead.
• ***Summary:*** He would like to order popular books on miso, tofu, and tempeh. Address: Project Coordinator, All-India Coordinated Research Project on Soybean, G.B. Pant Univ. of Agriculture and Technology, Pantnagar (Uttar Pradesh), India. Phone: 291-292 Rudrapur.

5621. Dominguez de Diez Gutiérrez, Blanca. 1982. Re: Names of soyfoods around the world: Spanish. Form filled out and returned to William Shurtleff at Soyfoods Center, July 9. 1 p. Handwritten. [Eng]
• ***Summary:*** Gives the names of all the various soyfoods in Spanish. Note: A typed list of these names is published in *Soyfoods Industry and Market: Directory and Databook,* 1985. 5th ed. p. 164.

"Fresh green soybeans–Frijol de soya tierno o ejote de soya. Whole dry soybeans–La soya, Frijol de soya. Black soybeans–Frijol de soya negro. Fresh soy puree–Pure de frijol de soya. Soy sprouts–Germinados de soya. Soynuts–Soya-nuez (nuez means walnuts or pecans), Soya-huate (means peanuts from cacahuate). Oil roasted soynuts–Soya nuez tostada (meaning nut). Dry roasted soynuts–Soya-huate tostado (meaning peanuts). Soynut butter–Mantequilla de soya. Roasted soy flour–Harina de soya tostada (kinako). Soy coffee–Soyafee. Soy chocolate–Soyalate. Soymilk–Leche de soya. Soymilk ice cream–Helado de leche de soya. Soymilk curds–Cuajada de soya, Jocoque de leche de soya. Tofu–Tofu, Queso de soya, Cuajada de soya. Soft tofu–Tofu blando. (Regular) Tofu–Tofu comun. Firm Tofu–Tofu firme. Extra firm tofu–Tofu extra firme. (Deep fried) Tofu cutlets–chuletas de tofu. (Deep fried) Tofu burgers–Hamburguesas o tortitas de tofu. (Deep fried) Tofu pouches–Saquitos de tofu. Silken tofu–Tofu sedoso. Pressed silken tofu–Tofu sedoso prensado. Grilled tofu–Tofu a la parrilla. Dried frozen tofu–Tofu seco congelado. Okara or soy pulp–Okara, pasta de soya, pulpa de soya. Yuba–Yuba. Fermented black soybeans–Palanquetas de soya. Miso or soybean jian–Miso (el). Soy sauce–Salsa de soya. Shoyu–Shoyu (el). Tamari–Tamari. HVP soy sauce–Have not found it. Tempeh–Tempeh (el). Fermented tofu–tofu fermentado. Fermented / cultured soymilk–Leche de soya fermentada. Natto, thua-nao, kinema–Natto (el). Soy oil–aceite de soya. Soy lecithin–Lecitina de soya. Soy flour–Harina de soya. Whole (full fat) soy flour–Harina de soya entera. Defatted soy flour–Harina de soya degrasada. Soy grits and flakes–Soya martajada y hojuelas de soya. Cereal-soy blends (CSM, WSB, etc.)–Soyavena (with oatmeal). Soy protein concentrate–Concentrado de proteina de soya. Soy protein isolate–Aislado de soya. Textured soy protein products–Productos de soya texturizada. Textured soy flour, TSF, or TSP–Harina de

soya texturizada. Textured soy concentrates–Concentrados de soya texturizada. Textured soy isolate–Aislados de soya texturizada. Spun soy protein fibers–Fibra de proteía hilada de soya. Soy casmar, Soya Cocoa, Coco soya–Beverages made with chocolate or cocoa. Pastisoya–Like spaghetti or noodles of different kinds made with soy flour–commercial products. Vegesoya–Commercial products for soups. Soya mex and Chocosoya–for beverages. Soya pac–Textured soya like meat, also a commercial product." Address: Apdo. Postal 226, Jalapa, Veracruz, Mexico.

5622. Furth-Kuby, Wolfgang. 1982. Quark or Quarg (Non-fermented dairy cheese or curds) (Interview). Conducted by William Shurtleff of Soyfoods Center, July 15. 2 p. transcript.
• ***Summary:*** Quark is a traditional non-fermented cheese, which has no counterpart in the U.S. It is the dairy counterpart of tofu. Wolfgang describes how to make and serve quark, popular German recipes in which it is used, types of quark such as herb quark and low-fat quark, geographical distribution (Bavaria has the highest per capita consumption), and how sold. Address: West Germany.

5623. Pautz, Jane Abe Cadwell. 1982. Re: Brazilian names for soyfoods. Letters to William Shurtleff at Soyfoods Center, July 15 and Aug. 22. 3 p. Typed.
• ***Summary:*** Portuguese names for the following foods are given: Green vegetable soybeans, whole dry soybeans, fresh soy puree, soynuts, soynut butter, deep-fried tofu cutlets, tofu burgers, tofu pouches, fermented black soybeans; isolated soy protein, textured soy protein products, textured soy flour.

Jane's book is the first book published in Brazil that is exclusively on soyfoods. Address: Sao Paulo, Brazil.

5624. *Toyo Shinpo* (*Soyfoods News*). 1982. Tônyû no peeji: 2-3 baizô no urigae o tassei. Sudeni 150 oku shijô keisei no koemo [The soymilk industry and market in Japan: Sales have increased 2-3 fold to an estimated 15,000 million yen per year]. July 21. p. 26. [Jap; eng+]
• ***Summary:*** Industry sources say that the Japanese soymilk market has already reached about 15,000 million yen. The order in which companies started making or marketing soymilk is: 1959 San-iku Foods. 1969 House Shokuhin. 1972 Ishihara Food Center. 1974 Tokyo Soymeal, Kenbi-Sha, Okazaki Marusan. 1976 Asahi Shokuhin, Soken-sha, Kyushu Nyugyo. 1977 Kibun, Natural Foods. 1979 Mitsubishi Kasei Shokuhin. 1980 Chiba Seisen Shokuhin Kogyo, Meiji Nyugyo. 1981 Yakuruto, Nagano Tomato, Morinaga Nyugyo. 1982. Seven-Up Inryo. Among these, House Shokuhin and Tokyo Soymeal have discontinued.

Major Japanese brands of soymilk, aseptically packaged in Tetra Brik cartons are (percentages indicate market share): Kibun Foods (Plain, Yogurt flavored, Fruit, Barley Malt & Coffee), 41.7%; Okazaki Marusan (Plain, Orange, Barley malt), 23.3%; Mitsubishi Kasei (Maburon plain, Orange, Coffee, Honey), 10.0%; San-iku Foods (Soya Neo Cocoa), 8.0%; Kyushu Nyugyo, 6.0%; Meiji Nyugyo (Sun-Glow), 5.8%; Kenbisha, 2.5%; Asahi Shokuhin (Plain, Orange, Coffee), 2.5%; Soken-sha, 1.3%; and Natural Foods, 1.3%. Most sizes are 200 ml, which retail for 75 yen with a 60 day shelf life.

Companies with the largest number of different soymilk products are: (1) Okazaki Marusan has 15 products including soymilk in a Pure-Pak carton (500 ml for 150 yen) and in a can (195 gm); (2) Kyushu Nyugyo has 13 products incl. Midori Tonyu; (3) San-Iku Foods has 10 products, including canned soymilk; (4) Kibun has 8 products. Mitsubishi Kasei is taking a different approach; they have only 5 items (honey, coffee, fruits, sour, and plain) but are aiming at large production.

Kibun's sales have been very good, especially after they switched to the Brik Pak-type carton. Last year they had sales of 2,500 million yen and they are aiming to double that this year. Industry analysts believe that Kibun will be the industry leader for a while.

Mitsubishi Kasei established Mitsubishi Kasei Shokuhin in January of this year, and transferred all soymilk sales to that new department. They are hoping this year's sales will be three times as large as last years, hopefully 1,800 to 2,000 million yen. They are now constructing a new soymilk plant in Okayama, and when it is done they hope sales will reach 8,000 million yen.

Okazaki Marusan has grown 20-fold in the past 5 years. They predict this year's soymilk sales to be 2,000 million yen.

A photo shows 24 soymilk products. Most are in Brik Pak Aseptic cartons. Three Soyalac products are in cans. One product is in a retort pouch.

5625. *Toyo Shinpo* (*Soyfoods News*). 1982. Kissaten de ninki jôshôochû. Tôfu "aisukuriimu" Mada mada uremasu. Jishin tappuri no tenchô. Mr. Pû [Tofu ice cream is becoming popular in tea parlors, such as Mr. Poo's. He has confidence he sell a lot more]. July 21. [Jap]
• ***Summary:*** Soymilk ice cream is selling well in this tea house at 380 yen for a dish. The owner calls it "tofu ice cream." The owner, Mr. Yamanouchi, got the idea when he traveled to Los Angeles. He has been selling it for 4 years, since 1978.

5626. Sheraton, Mimi. 1982. Restaurants: West Side duck, swinging brasserie. *New York Times.* July 23. p. C18.
• ***Summary:*** This is a review of the Chinese restaurant Peking Duck West (199 Amsterdam Ave. at 69th St., Manhattan, New York City).

"But greasiness marred such appetizers as... vegetarian duck, which is formed of bean-curd sheets."

Note: These "bean curd sheets" are what we call

© Copyright Soyinfo Center 2013

"pressed tofu sheets."

5627. Zalbowitz, Marcia. 1982. Americans are taking to tofu. *Boston Globe.* July 28. p. 44-S.
• ***Summary:*** Not long ago, tofu was sold only in health food stores and oriental food shops. Now cakes of soybean curd can be found in most grocery stores. Norman Holland of Northern Soy in Rochester, New York, is one of the leading experts in the production of "health-food style tofu." The following tofu recipes are given: Tofu chili. Tofu curry with vegetables. Marinated mushrooms. Tofu cheesecake. Pesto tofu souffle. Note: This is the earliest article on soy seen (Aug. 2002) in the *Boston Globe* newspaper.

5628. Tally, Gene. 1982. The Coca-Cola Company's work with soymilk in Asia (Interview). Conducted by William Shurtleff of Soyfoods Center, July 29. 1 p. transcript.
• ***Summary:*** Coca-Cola Co. (CCC) does not have a soymilk on the market in Thailand; they are still at the talking stage.

CCC has introduced soymilk, named H-C, in Hong Kong. They use their franchise Coca-Cola bottler there. They just bottle soymilk like any other soft drink by using isolates. So no need for a soymilk plant or buying soybeans etc. This is the way soft drink companies can easily get into soymilk.

In the Philippines, CCC is not presently involved with soymilk. The Magnolia Dairy Co. is owned by the same group that owns the Coke business in the Philippines. They have made it in the past, are not doing it now, but will resume soon, after they develop a new formulation. In the future they will probably not use Coke's soymilk formulations. Get from Dong Bang in Korea, or a group in Belgium, which has technology. Not the same as the Singapore company. This is a split-off of the Singapore company.

CCC has not yet introduced soymilk in USA, but they are looking at it. They are now in a feasibility study. They have Tetra Brik lines in the U.S. making Hi-C juices. The company's decision to go or no-go is imminent. We'll be the first to know.

Lots of talk with Vitasoy in the past about a joint venture in Hong Kong.

Thailand. CCC would probably contract with one of the local dairy companies there to co-pack for them. Probably Siam Foods. Its a bit early; only in the talk stage. Originally did a lot of exploratory work concerning Thailand with Vitasoy but it took a long time and the Los wanted to use their own formula, so they went different ways. CCC may not get a product on the market for Thailand in less than 1-1½% years.

Talley would like to be marketing manager for Morinaga's tofu products in the US. Address: Coca-Cola Co., Atlanta, Georgia.

5629. **Product Name:** Calco Tofu, Soy Sprouts, and Mung Bean Sprouts.
Manufacturer's Name: Calco of Atlanta.
Manufacturer's Address: 2059 Manchester St., N.E., Atlanta, GA 30324. Phone: 404-874-3650.
Date of Introduction: 1982. July.
Ingredients: Organically grown soybeans, water, calcium sulfate (a natural mineral).
Wt/Vol., Packaging, Price: 16 oz packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.
How Stored: Refrigerated.
Nutrition: Per 4 oz.: Calories 70, protein 10 gm, carbohydrates 7 gm, fat 0.5 gm.
New Product–Documentation: Label. 1983, undated. 5.25 by 4.25 inches. Plastic film. Green and white on clear film. "High quality protein, low in calories & no cholesterol." Serving suggestions. Soyfoods Center Computerized Mailing List. 1984. Feb. 7. Owner: Jim Y. Wang.

Interview with Bob Phipps. 1989. Sept. 7. Gives a brief history and background of Calco in the USA, especially in Houston.

Talk with Steve Yurman. 1989. Nov. 8. Jimmy Wang, Taiwanese, owns Calco in Atlanta. He started doing bean sprouts then expanded into tofu. He sold his tofu at very low prices and used his family to help keep labor costs down. He hasn't raised his tofu prices in 10 years. He is a tough competitor but helped the Yurmans nicely at times.

Talk with Jimmy Wang and Karen, his sister-in-law. 1989. Nov. 9. The company started in July 1982, making 3 products: mung bean sprouts, soy sprouts, and tofu.

Form filled out and photocopies of Labels sent by Eric Wang. 1998. July 14. W & W Bean Products, Inc., dba Calco of Atlanta Inc., 2059 Manchester St. N.E., Atlanta, Georgia 30324. Phone: 404-874-3650. Began making and selling tofu in 1983. Labels for: Calco Tofu (Extra Firm, or Soft), and Wonderful Brand Tofu (Firm Style). Weight: 1 lb. Curded with calcium sulfate.

plain, tofu is *terrific."* Gives recipes for: Stir-fry tofu and vegetables. Tofu salad.

5632. *Daizu Geppo* (*Soybean Monthly News*). 1982. Rokujô [Rokujo-dofu]. July. p. 31. [Jap; eng+]
• ***Summary:*** This is a type of very firm tofu from Yamagata prefecture, which was originally created as a vegetarian katsuobushi (dried bonito) on Mt. Koya.

5633. *Daizu Geppo* (*Soybean Monthly News*). 1982. Matsuyama no kansôage [Dried Aburaage from Matsuyama]. July. p. 26. [Jap; eng+]
• ***Summary:*** Gives a description of his it is made. It contains 3.5% moisture and 52.9% fat versus 44% moisture and 31.4% fat for regular age (tofu pouches). It will keep for 3 months in a cool place. Four companies in Matsuyama now make it.

5634. Fiering, Steve. 1982. Vacuum-packing: Is it the new wave for soyfoods? *Soyfoods.* Summer. p. 42-48.
• ***Summary:*** "Two packaging technologies–pasteurization and vacuum packing–can extend tofu shelf life to one month or more. As competition for the large warehouse accounts heats up, it seems certain that most of the sales will be captured by tofu with the 30 day shelf life." Discusses: 1. What is vacuum packaging? "Possibly the most important marketing consideration is that most of the other familiar protein foods, such and cheese and lunchmeats, are also vacuum packaged... Most of the common spoilage organisms are aerobic... Tests done for Nasoya Inc. indicate that the total plate count of tofu is reduced by at least 80% after vacuum packaging..." Is botulism a reasonable concern? Maybe. But not if an oxygen permeable film is used. Most films have a polyethylene inside and nylon outside, which permits some oxygen permeability. 2. What is botulism? 3. Botulism and vacuum packaging. 4. Vacuum packaging equipment "Available machinery varies according to evacuating, sealing, and product handling systems." Chamber system, nozzle type machine, double chamber style machine, conveyor chamber, horizontal form-fill-seal machine (which start at $50,000). 5. The companies. Cryovac, Hantover Inc., Koch Supplies Inc., T.W. Kutter, Inc., Packaging Aids Corp., Smith Equipment Co., Tipper Tie. Photos show Kutter's Tiromat in action at Nasoya Foods in Massachusetts. Address: The Soy Plant, Ann Arbor, Michigan.

Address: Emmaus, Pennsylvania.

5636. Leviton, Richard. 1982. Touring for soyfoods. *Soyfoods.* Summer. p. 32-37, 41.
• ***Summary:*** At The Farm in Tennessee, the soy dairy, managed by Chuck Haren, "operates 3 days a week, turning out 7,500 lb/week of calcium sulfate tofu for immediate consumption by the Farm's 1,300 soyfood lovers." They use a Sweco-Brown filtration system. The okara is composted. They make 600 gallons per week of fresh soymilk. Their tempeh shop makes 700 lb/week of fresh tempeh–the 7th largest in the UA. Both the tofu and tempeh plants have been used as training grounds for apprentices from Europe, South America, and Africa, who come to The Farm to stay for 6 month sessions. A ice cream manufacturer in Memphis makes their Ice Bean. Plenty is active in Haiti, where they are providing soymilk for malnourished children, and in Lesotho, South Africa, where they are aiding in the construction of a village soy dairy and demo site as part of the Motsemocha Village Technology Center. They recently conducted a Caribbean cruise with 8 soy technicians.

Legume: "Gary and Chandri Barat and Robert Shapiro have a booming company on their hands after 1 year of business with an impressive line of prepared frozen tofu entrees and desserts. Jan. 1981 rented facility in Verona, New Jersey. May 1981 Celantano started co-packing. Photos show: Chandri Barat, Gary Barat, and Robert Shapiro of Legume (see also photo on p. 3).

The following people and their companies are also discussed, with photos: Tim Nusser of Rising Sun Soy Farms (Columbus, Ohio). Jim Saunders of Real Foods (tofu shop in a supermarket in Allentown, Pennsylvania). Renate and Karl Krummenoehl of Cricklewood Soyfoods. Jamie and Nancy Stunkard of Nature's Grace. Joel Dee of Edward & Sons in Saluda, North Carolina (marketers of Miso-Cup). Henry Salazar of Sam Sung Tofu Co. Eileen Foote and Eileen Judge of Kingdom Foods. Bob Hunt of Blue Ridge Soyfoods. Soya Food Products in Cincinnati (Ben & Nina Yamaguchi). Rising Sun Soy Farms. Bill Lutz of Hip Pocket Tofu Deli (Columbus, Ohio). Robert Marrochessi and Bill Spear of The Bridge (Middletown, Connecticut, macrobiotic, run by Roberto Marrocchesi and Bill Spear. Began tofu production in March 1981). • ***Summary:*** Discusses Pacific Tempeh, White Wave, Quong Hop Tofu Cutlets Marinara, Burgers, Cannoli. Photos show: Jim Miller and his wife Emily of Quong Hop, with the New Leaf products. Steve Demos at Pat Calhoun in the White Wave booth at the Natural Foods Expo, 1982, Anaheim, California. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

5638. Leviton, Richard. 1982. Everybody's Restaurant. The Farm brings soyfoods to Nashville. *Soyfoods.* Summer. p. 38-39.

© Copyright Soyinfo Center 2013

• ***Summary:*** Everybody's Vegetarian Restaurant, founded and owned by Judd and Diane Hoffman, opened in July 1980 in the university district of Nashville, Tennessee, and now seats 45. Many of the items on the meatless and dairyless [vegan] menu feature soyfoods–especially tofu, soymilk, and tempeh. The facility has 2,700 square feet, with 1,500 for retail and 1,200 for kitchen. The 12 restaurant workers, who are all members of The Farm (Summertown, Tennessee), live together communally in a large house outside Nashville.

Photos show: (1) Judd and Diane Hoffman. (2) A view of the front of the restaurant from outside. (3) Inside the kitchen. Address: Colrain, Massachusetts.

5639. Leviton, Richard. 1982. Soyfoods of America. High volume Duarte company takes on California market. *Soyfoods.* Summer. p. 30-31.
• ***Summary:*** America's first yuba plant opened in September 1981, requiring nearly one million dollars of startup capital. They move 18,000 lb/week of tofu in the very competitive Los Angeles market. Their lines are Furama and Nature's Touch.

Photos show: 1. The company's line of yuba, tofu, and soymilk products; 2. Ken Lee with his innovative semiautomatic yuba machine and freshly packaged sheets; 3. The part of the plant that makes tofu and soymilk; 4. Ken Lee and sales manager Doug Fiske holding water-packed and vacuum-packed tofu. Address: Colrain, Massachusetts.

5640. **Product Name:** Light Links (Meatless Tofu Hot Dogs with Egg Whites). Renamed Tofu Light Links by 1987.
Manufacturer's Name: Light Foods Inc.
Manufacturer's Address: 6144 Bartmer, St. Louis, MO 63133. Phone: 314-721-3960.
Date of Introduction: 1982. July.
Ingredients: Tofu, soy oil, okara, dried egg white, textured soy protein, salt, barley flour, honey, shoyu, locust bean gum, natural spices.
Wt/Vol., Packaging, Price: 16 oz vacuum pack. Ten links per pack.
How Stored: Frozen.
Nutrition: Per 1.6-oz. link: 105 calories, 6.36 gm protein, 7.04 gm fat, 0.59 mg cholesterol.
New Product–Documentation: This pioneering and creative product was introduced by Robert Davis at the NNFA convention in New Orleans, Louisiana, July 1982. Food Report (Lehmann). 1982. Aug. The product "Has absolutely no meat, no nitrites, no additives, no preservatives, no artificial coloring and no sugar." Spot in Soyfoods. 1983. Winter. p. 49. "Tofu Dogs. Possibly the most maturely conceived, expertly produced, and appropriately packaged prepared convenience soyfood on the market."

Label (orange, brown, and yellow on white) reads: "Meatless. A vegetable based product. A food for thought. 99% cholesterol free. Low calories." Spot in Whole Foods.

1983. Jan. p. 39. "New Tofu Line. Light Foods, Inc. presents a new dimension to soyfoods: Light Links, Light Tofulogna and Light Soysage.

Leaflet (see next page). 1983. "Light Foods Inc. presents Light Links: A tofu-based hot dog developed for the healthy child in us all." 1 p. Single sided. 28 cm. Brown ink on beige paper. "This product has absolutely: No meat. No nitrites. No additives. No preservatives. No artificial coloring. No sugar... and are 99% cholesterol free."

Spot in Soyfoods. 1984. Summer. p. 42. Label. 1988, received. Tofu Light Links. 5.5 inches square. Light and dark purple, beige, and white. Logo of smiling sun in upper left. "A meatless vegetable based product. No cholesterol. Low calories." Ingredients are now: Tofu, soy oil, water, dried egg white, textured soy protein (made from soy flour), salt, barley flour, honey, tamari (a natural soy sauce), beet juice, spices, natural extractives of paprika, natural spice oils. Now contains only 76 calories and 6.0 gm of fat per 1.2 oz serving.

LIGHT FOODS INC. PRESENTS:
LIGHT LINKS

A Tofu based Hot Dog developed for the healthy child in us all.

This product has absolutely,

- **No meat**
- **No nitrites**
- **No additives**
- **No preservatives**
- **No artificial coloring**
- **No sugar**

Light Links are also low in calories and are 99% cholesterol free.

Delicious when broiled, browned, or bar-b-qued.

In Joy!

Consciously crafted by Light Foods Inc.
6144 Bartmer / St. Louis, MO 63133

for $3,000, they opened their soy dairy in a room attached to their home. They now make 600 to 800 lb/week of tofu which wholesales for $0.75 to $0.85/lb and retails for about $1.14.

Many small farms have a dairy room, and soycrafters may be able to rent it in exchange for okara which the farm can use as compost. Sunbow also has an apprenticeship program; a person agrees to live in a cabin on their farm and work for minimum wages. Address: Philomath, Oregon.

5643. Nelly. 1982. Rendez-vous mit Nelly. Sojaspeisen [Rendezvous with Nelly. Soyfoods]. *Fuer Uns Aktuell.* June. p. 58-61; July. p. 50-53. [Ger]
• ***Summary:*** The June issue discusses the work of Shurtleff and Aoyagi in America, and *The Book of Tofu*, soyfoods in general with a focus on tofu and Tofureien (tofu shops). Ten color photos show how tofu is made and served at Sojalade in Ottenbach. Also mentions Oekullus (Bruchmattstrasse 24, 6000 Lucerne).

The July issue focus on tofu cookery and contains color photos of tofu dishes. Address: Switzerland.

5644. Pickarski, Ron. 1982. Tofu makes a gourmet debut in Miami. *Soyfoods.* Summer. p. 40.
• ***Summary:*** Brother Ron tells the story of his life and his current work at Unicorn Village, a natural foods restaurant in North Miami Beach. He entered the seminary, became a Franciscan brother, and worked even then in the foodservice business. He graduated at the top of his class from Washburne Trade School, a prominent Chef Training School in Chicago. He then became an executive chef in one of the order's seminaries in Chicago. "Since 1968 I have been involved in nutrition, and as it escalated, I became a vegetarian and eventually a vegan... My concept is to carry tofu and natural foods into the realm of gourmet and nouvelle cuisine. I want to see–and indeed I will–natural vegetarian foods on the gourmet four star level."

An Editor's note describes the Unicorn's recent welcoming party which cost $15,000, drew 55 invited guests, and featured a dazzling all-natural buffet made primarily from vegetarian foods. The theme of the meal was "Foods for the Future." The following soy-related dishes were included in the buffet: Italian antipasto, garnished with cucumber and tofu strips. Tofu spinach pie. Raw vegetable platters with creamy sunflower and tofu herb dips. A serving tray with tofu cottage cheese and vegetable garnish and another tray with Tofu-E Salad with black olives and tomatoes. Four styles of canape (tofu butter with pea; carrot paté with pea; pea paté with carrot; tofu butter on lentil paté). Maple cream tofu cheesecake (with granola crust, tahini tofu icing with raspberry filling). In addition, Chef Pickarski unveiled a lifesize flamingo carved from soy butter [probably soy margarine]. Address: Brother, Unicorn Village Restaurant, North Miami Beach, Florida.

5645. **Product Name:** Vegetarian Tofu Pizza.
Manufacturer's Name: Pizza Naturally.
Manufacturer's Address: Blenheim, New Jersey.
Date of Introduction: 1982. July.
Ingredients: Stone ground whole wheat flour, tomatoes, SoyDairy tofu, mushrooms, peppers, shoyu, honey, yeast onion, garlic, oregano, basil, pepper.
Wt/Vol., Packaging, Price: 9-inch pizza weighing 16 oz. Retails for $2.39.
How Stored: Frozen.
New Product–Documentation: Spot in Soyfoods. 1982. Summer. p. 55. "Frozen Tofu Pizza Introduced."

5646. **Product Name:** The Soy Deli Starter Kit: Tofu Cutlets Marinara, Tofu Eggplant Marinara, Tofu Cacciatore, Tofu Quiche, Tofu Ravioli, Tofu Burgers-in-a-Bun, Tofu Wholly Cannoli.
Manufacturer's Name: Quong Hop & Co.
Manufacturer's Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.
Date of Introduction: 1982. July.
New Product–Documentation: 2-page leaflet (see next page). 1982. Each of these is a separate commercial soy product. Each label is 4 by 2.75 inches.

5647. Quong Hop & Co. 1982. New Leaf. The Soy Deli in natural food store freezers everywhere (Ad). *Natural Foods Merchandiser.* July. p. 136.
• ***Summary:*** A 1/3 page vertical black and white ad. "Now, open a full-line gourmet soyfoods deli right in your own store's freezer and give your customers all they've been looking for in natural food goodness, gourmet quality and selection, and super-convenience.

"Natural food goodness: Every product from your New Leaf Soy Deli contains only the finest quality natural ingredients including organic tofu, garden fresh vegetables, organic whole wheat pastas, and pressed oils. NO sugars, NO preservatives, and NO artificial ingredients whatsoever are used, We give you tofu, the food of the future, in its most delicious forms ever.

"Gourmet quality and selection: Plump and juicy tofu ravioli, ready to boil and serve in just minutes, an eggless tofu quiche with Gruyere cheese and fresh mushrooms on a whole wheat crust, and rich and savory tofu cacciatore with garden vegetables are just a few of the many items you can offer to satisfy even the most discriminating tastes. For desserts or snacks, they'll always come back for more of our baked tofu no-cheese cakes or our incredible dairy-free tofu 'Wholly Canolli.'

"Convenience for your customer and for you: For your customer, convenience means desserts that are ready to thaw and serve from the package and entrees that are piping hot and ready to eat from the oven or microwave in just minutes.

© Copyright Soyinfo Center 2013

For you, the retailer, convenience means that just one phone call and as little as $50.00 can put you into the soy deli business with our soy deli 'Grand Opening' kit. Included in one package are window posters, shelf talkers, and a selection of the best moving products in the line.

"The Grand Opening: For piping hot samples and specials, drop by our grand opening at the coming NNFA Show in New Orleans, Booth 755." Address: 161 Beacon St., South San Francisco, California 94080.

5648. Shurtleff, William. 1982. Re: Leaders of the soyfoods movement in Europe. Letter to Wolfgang Furth-Kuby at Sojaquelle, Soyen, West Germany, July. 1 p. Typed, without signature on letterhead.
• ***Summary:*** The name, address, and phone number of the following people are given: Wolfgang Furth-Kuby in West Germany, Verena Krieger in Switzerland, Sjon Welters in the Netherlands, Ted Nordquist and Tim Ohlund in Sweden, Bernard Storup and Alexander Nabben in France, and Gilberto Bianchini in Italy. As of July 1982 there are 609 European names and addresses on the Soyfoods Center Mailing List. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

5649. Shurtleff, William. 1982. What the Japanese can learn from the American soyfoods industry. Paper presented at Fifth Annual Soyfoods Association of North America (SANA) Conference, University of Washington, Seattle. July 8. 2 p. Unpublished manuscript–outline.
• ***Summary:*** Presented to a special meeting of Japanese attendees. Contents: Introduction. Americans' basic view of soybeans and soyfoods. Nutrition and attitudes toward animal and vegetable proteins. Tofu innovations. Tempeh. Kikkoman. Conclusion. Accompanied a slide show. Address: Co-founder and director, Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

• ***Summary:*** Presented on Thursday, July 8, 9:30 to 10:15. Includes popular media coverage of soyfoods from 1975 to the present. Address: Co-founder and director, Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

5651. *Soyanews* (*Sri Lanka*). 1982. Book review: Food for kings and philosophers. 4(11):6, 8. July.
• ***Summary:*** A full page, positive review (by. S. Pathiravitana) of *The Book of Tofu* (updated and condensed, Ballantine Books edition) by William Shurtleff and Akiko Aoyagi. With 250 recipes and 100 illustrations, the retail price is $2.50.

5652. **Product Name:** Nature's Touch Tofu [Regular Style: Soy Cheese, or Extra Firm].
Manufacturer's Name: Soyfoods of America.
Manufacturer's Address: Duarte, CA 91010.
Date of Introduction: 1982. July.
Ingredients: Organic soybeans, water, natural calcium

© Copyright Soyinfo Center 2013

sulfate.
Wt/Vol., Packaging, Price: Regular style, 16 oz, 19 oz; Extra firm, 8 oz.
How Stored: Refrigerated.
Nutrition: Per 4 oz.: Calories 90, protein 15 gm, carbohydrate 1 gm, fat 5 gm.

New Product–Documentation: Labels. 1982, undated. 5.25 by 4.25 inches. Plastic film. Red, yellow, brown, blue and white on clear film. Logo of a long-haired damsel in an oval window. Kosher. Leviton. 1982. Soyfoods. Summer. p. 30-31. This line was developed by Doug Fiske. Ken Lee later changed the brand to Nature's Spring but kept the same logo and package design. Mrs. Lee recalls the introduction date as Sept. 1981.

Spot in Whole Foods. 1983. Jan. p. 39. "Nature's Touch Tofu. Nature's Touch introduces the first in a line of soyfoods produced by Soyfoods of America. Nature's Touch Regular Style (8.5% protein) tofu is available in two versions: one and four piece, water packed in 19-ounce units and pasteurized for a 30-day refrigerated shelf life." A photo shows both labels. Talk with Doug Fiske. 1983. Dec. 13. The company is now making 10,000 lb/week of tofu. The basic tofu was in a 19 oz pack, but now changed to 12 oz. Letter from Ken Lee. 1988. Oct. 10. He stopped marketing the product in July 1984.

5653. **Product Name:** Nature's Touch Seasoned Tofu (Baked).
Manufacturer's Name: Soyfoods of America.
Manufacturer's Address: Duarte, CA 91010.
Date of Introduction: 1982. July.
Wt/Vol., Packaging, Price: 8 oz (227 gm).
How Stored: Refrigerated.
New Product–Documentation: Leviton. 1982. Soyfoods. Summer. p. 30-31. This line was developed by Doug Fiske. Label. 1982. 5.5 by 3.75 inches. Film. Red, yellow, blue, black and brown on white. "Low fat. High protein. Cholesterol free. Sandwich sliced. 100% natural."

Letter from Ken Lee. 1988. Oct. 10. He stopped marketing the product in July 1984.

5654. **Product Name:** Nature's Touch Deep-Fried Tofu.
Manufacturer's Name: Soyfoods of America.
Manufacturer's Address: Duarte, CA 91010.
Date of Introduction: 1982. July.

New Product–Documentation: Leviton. 1982. Soyfoods. Summer. p. 30-31. This line was developed by Doug Fiske. Letter from Ken Lee. 1988. Oct. 10. He stopped marketing the product in July 1984.

5655. *Soyfoods.* 1982. On creating a brand name for tofu [New England Soy Dairy]. Summer. p. 50, 52.
• ***Summary:*** A photo shows Madeline Fox, Judith Timmins, and Marcy Brown in Soydairy aprons.

5656. *Soyfoods.* 1982. Soy isolates: New tofu ingredient? [ADM Foods]. Summer. p. 7-8.
• ***Summary:*** "ADM Food's search for new applications for its high protein soy isolates have led them to frozen soymilk dessert, a flavored soymilk beverage, imitation cheeses, and, most recently, silken tofu.

"ADM, one of the nation's largest soy isolate producers, located in Decatur, Illinois, has been devoting considerable research effort to find new product applications for its basic soy ingredient, isolated soy protein. Initial commercial interest in isolates (which contain 90% protein, as most of the carbohydrates have been removed) began in the 1930s when they had industrial uses such as paper coatings. But by 1967, at least 22 million pounds were produced, and by 1981, annual production was estimated at 90 million pounds as isolates were used in numerous foods.

"Soy isolate production begins with defatted soybean flakes, from which protein is extracted, in an aqueous solution, from the insoluble residue with the aid of screens or centrifuges. The 'soy curd' is precipitated at

© Copyright Soyinfo Center 2013

the isoelectric point (pH 4.5, where the solubility of the protein is at a minimum) using a food grade acid such as acetic or phosphoric. The curds and whey are separated by centrifuging, the curds are washed, then neutralized with food grade alkali. Finally the isolate is spray-dried for storage.

"Recently ADM Foods announced the development of a 'wet' curd isolated soy protein" that has maximum functional properties. The curd is suitable for interaction with milk, whey, and egg proteins in foods. The wet curd can be used as a partial replacement (up to 50%) for casein (a milk-derived protein) in imitation mozzarella cheeses, and as a coffee whitener that will not coagulate after immersion in the hot liquid. The soy isolate slurry is not heat denatured, has a pH of 4.5, solids content of 23%, is easily pumped, can be delivered in stainless steel tanks of 45,000 pounds capacity, and is stable for two days at room temperature.

"At first glance, soy isolates may seem a world away from everyday tofumaking, yet this year ADM researchers began experimenting with their Ardex isolated soy protein for a silken tofulike product and even custom designed yogurt type desserts. A soy beverage base, made from soy isolate, is heated to 80ºC; then 1% (by weight) glucono-delta-lactone (GDL) is added. After 20 minutes the milk has set to a yogurt-style smooth consistency. To make a 'firmer' silken tofu, ADM scientists added (5% by weight) kappa-carrageenan and 0.5% tetrapotassium phosphate to the beverage before heating.

"This method, ADM researchers suggest, greatly simplifies the tofumaking process while providing significant cost reductions. 'These products can be formulated to achieve up to 80% ingredient cost reductions compared to conventional tofu,' their report states. The use of soy isolates also allows for the extension of several dairy systems using soy such as puddings, sour cream, yogurt, baby food, and frozen desserts.

"ADM Foods has experimented with three processing methods for preparing a soymilk beverage including batch pasteurization, high temperature, short time pasteurization, and ultra high temperature (UHT) for aseptic packaging.

"For the batch method, water at 50-55ºC is agitated while the soy isolate powder is mixed in, followed by corn sweetener (fructose) and vegetable oil. The mix is heated to 60ºC and held for 30 minutes with constant agitation.

"Next comes a two stage hot homogenization (at 2500 psi, then 500 psi) followed by immediate cooling to 5ºC. Flavorings are added and the product is packaged for storage. The ingredient cost per 8 fluid ounce serving for unflavored soy beverage is $0.032 compared to $0.086 for whole milk. The cost per pound of protein served is $1.701 compared to milk's $4.938. The soy beverage's nutritional profile includes 3.47% protein, 2.00% fat, total solids l3.97%, and 67.70 calories per 100 grams.

"The soy isolate has been applied in making frozen soymilk ice creams that yield protein contents twice the level of those in standard ice creams. With the isolate-based desserts, as the fat content is reduced, the caloric density is also reduced, so that a 4% fat soy dessert has about 20% less calories than standard ice cream, while a 2% fat dessert has nearly 30% fewer calories. The ingredients include Ardex soy isolate, sucrose, CornSweet (corn sweetener), corn syrup, stabilizer, emulsifier, while the ingredient cost is $0.017 compared to $0.048 for standard ice cream–a savings of 64.6%. Nutritionally, the product is comparable to standard ice creams, with 1.8% protein, 2.00% fat, 142.50 calories per 100 grams, and 117 calories per 4 fluid ounce serving.

"ADM representatives provided samples of their strawberry soymilk dessert along with chocolate and unflavored (but sweetened) soymilk beverage at the recent U.S. International Food Show in New York City."

5657. *Soyfoods.* 1982. The industry survives its first tofu recall. Summer. p. 6-7.
• ***Summary:*** In January Island Spring recalled its tofu because of an unfamiliar food poisoning organism, *Yersinia enterocolitica.* 20 residents of Seattle, Washington had become ill with gastroenteritis and 16 recalled eating tofu in the previous 2 weeks.

5658. *Soyfoods.* 1982. Soyfoods at Natural Foods Expo in Anaheim, California. Summer. p. 7.
• ***Summary:*** "Juel Andersen, with her tofu kit and various tofu cookbooks, and Robert Tepper of Farm Foods with samples of Ice Bean, were among the 15 soy exhibitors at the Natural Foods Expo, March 1982, in Anaheim, California." Photos show Juel Andersen and Robert Tepper.

5659. **Product Name:** Mild Italian Soysage (Meatless Okara-based Sausage).
Manufacturer's Name: Swan Gardens.
Manufacturer's Address: 940 17th St., Miami Beach, FL 33139. Phone: 305-324-8910.
Date of Introduction: 1982. July.
Ingredients: Soy press cake, whole wheat flour, nutritional yeast, soy oil, soy milk, salt, seasonings, spices.
Wt/Vol., Packaging, Price: 8 oz. Retails for $1.79.
How Stored: Refrigerated.
New Product–Documentation: Find/SVP. 1981. May. The Tofu Market. Gives Miami Beach address. Spot in Soyfoods. 1982. Summer. p. 55. "Vacuum Packed Soysage." 250 lb are produced weekly.

Soyfoods. 1983. Summer. p. 43. They make a "spicy Soysage."

Label. 1985, undated. 3.25 inch diameter. Self adhesive. Blue and red on gold. Swan on lotus. "Ready to eat!" Made by Swan Gardens, Inc. Miami, Florida 33127.

5660. **Product Name:** Baked Tofu.

© Copyright Soyinfo Center 2013

Manufacturer's Name: Swan Gardens.
Manufacturer's Address: 940 17th St., Miami Beach, FL 33139. Phone: 305-324-8910.
Date of Introduction: 1982. July.
Ingredients: Tofu, soy sauce, spices.
Wt/Vol., Packaging, Price: 8 oz vacuum pack.
How Stored: Refrigerated, 60 day shelf life.
New Product–Documentation: Label, 1984? 2.25 by 3.5 inches. Self adhesive. Black and red on gold. Swan on lotus illustration. "Ready to eat. No Preservatives." Spot in Soyfoods. 1982. Summer. p. 55. "Vacuum Packed Soysage." Soyfoods. 1983. Summer. p. 43.

5661. **Product Name:** Tofu Egg(less) Salad. Renamed Eggless-Tofu Salad by 1983.
Manufacturer's Name: Tofu Shop (The).
Manufacturer's Address: 768 18th St., Arcata, CA 95521. Phone: 707-822-7409.
Date of Introduction: 1982. July.
Ingredients: Tofu, tofu mayonnaise, green pepper, celery, onions, pickles, mustard, seasonings.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Refrigerated.
New Product–Documentation: Leaflet 1980, undated. "New deli foods from The Tofu Shop" (768 18th St., Arcata, California 95521). "Your local soyfoods producer." In the upper left corner is a dragon in a round circle. In the lower right is a little man whose body is a paper deli takeout container; he has two arms and two legs, and is wearing a top hat.

Label. Received 1988. Launched Dec. 1981. July. 2.5 inches diameter. Self adhesive. Green on yellow. "Fresh 'N Natural." Net weight: 5 oz. (142 gm). Ingredients: Fresh organic tofu, tofu mayo (tofu, safflower oil, fresh lemon juice, cider vinegar, a touch of sea salt), celery, bell pepper, green onion, natural pickles, mustard, spices. Great hot or cold as a spread, salad, or side dish; lactose-free and cholesterol free.

Two Labels sent by Matthew Schmit. 2002. Sept. 9. The product was introduced in 1985. Label #1 of Jan. 1997. "Eggless Tofu Salad." 3 inches diameter. Self adhesive. Dark green on yellow. Illustration shows a tofu shop on stilts near the ocean with a tree arching overhead. Ingredients: Tofu (filtered water, organic* soybeans, calcium sulphate), organic* pickles, fresh vegetables (celery, green onion, green pepper), mustard, organic* canola oil, distilled vinegar, fresh lemon juice, organic cider vinegar, sea salt, organic* dill, basil, organic* turmeric. * = Grown in accordance with the California Organic Food Act of 1990. 8 oz.

Label #2 of Oct. 2002. "Organic Eggless Tofu Salad." 3½ inches diameter. Self adhesive. Blue and orange-yellow on white. A handsome, impressionistic watercolor illustration shows a tofu shop on stilts on a cliff with a tree arching overhead. "Low in saturated fat. Cholesterol free. Contains 170 mg Omega 3 fatty acids per serving." 8 oz.

Talk with Matthew Schmit. 2002. Sept. 21. He hired a lady named Linda Redfield, who had been teaching tofu classes in the Davis area, to work in the deli. She brought this recipe into the shop, and also the Tofu Sausage patty. Talk with Linda Redfield. 2002. Sept. 23. Linda arrived in Arcata in May 1982 and introduced this recipe to The Tofu Shop; as far as she knows, she developed it. The tofu and veggies were mixed together first, then tofu mayonnaise was folded in at the end. It was probably first sold commercially at The Tofu Shop in the summer of 1982.

5662. **Product Name:** [Traditional Tofu].
Foreign Name: Traditionelle Tofu.
Manufacturer's Name: Tofuhaus Belsen. Changed to Yamato Tofuhaus Sojaprodukte GmbH on 1 Jan. 1984.
Manufacturer's Address: Moessingerstr. 41, D-7406 Moessingen 2-Belsen, West Germany. Phone: 07071-71094 or 95.
Date of Introduction: 1982. July.
How Stored: Refrigerated.
New Product–Documentation: Interview with Bernd Drosihn of Soyastern. 1987. Nov. 30. They make about 3,500 kg/week of tofu. Letter from Harry Whitford of Soyastern. 1987. Dec. 14. They make 3,000 to 3,500 kg/week of organic calcium sulfate tofu. Address: Mössingerstr. 41, D-7406 Mössingen-Belsen, W. Germany. Letter from Klaus Gaiser. 1989. May 5. "In the year 1978 I had the chance to learn the basic principles of making tofu at Kamakura/Japan. The master there said that another 'hen-na gaijin' [Shurtleff] had spent the nights on the meadow opposite the house in order to take part in the early morning work making tofu. He even wrote a book about it and dedicated one copy to him (the master). It was your 'Book of Tofu' which I had the chance to study during my stay. It's about time to say thanks for this initial help on making tofu. By now, I am looking back on 7 years of running a Tofu-Ya. And if there is ever a chance, I would be pleased to meet you."

Die Geschäftsidee. 1989. Dec. p. 27-28. Klaus Gaiser (with photo and interview), a former student of Sinology and Japanology, started Yamato Tofuhaus in 1983 in Tuebingen, making about 150 kg/week. He learned to make tofu in Japan, where he lived for a year. He now makes 3,500 kg/week of tofu (up 35% during the past year) and is West Germany's most successful company.

Talk with Klaus Gaiser. 1990. March 12. This tofu is now sold in 250 gm and 400 gm packs. Note 1. Mössingen is in Baden-Wuertemberg, a little south of Tuebingen.

Talk with Klaus Gaiser. 1990 May 8. The name of his first company was Tofuhaus Belsen, started as a "single man's company" in the village of Belsen near the small town of Mössingen. He started to make tofu commercially in the summer of 1982 (June or July). The company's main product was tofu (called Traditionelle Tofu, and coagulated with

© Copyright Soyinfo Center 2013

calcium sulfate), but it also made a lot of sprouts as a side business–from mung beans, azuki beans, lentils, and alfalfa seeds. It changed into Yamato Tofuhaus GmbH on 1 Jan. 1984 at the same address. The company moved from Belsen to Hirschau near Tuebingen in March 1987.

Letter (fax) from Klaus Gaiser. 1990. May 5. The information from *Die Geschäftsidee* about his company starting in 1983 was incorrect. They also wrote that he stated with the money somebody else started with. He definitely started in the summer of 1982.

Note 2. This is the earliest record seen (Feb. 2013) concerning Huegli.

5663. **Product Name:** Tofu Muffins [6 Flavors Incl. Blueberry, Spice, or Strawberry].
Manufacturer's Name: Victoria's.
Manufacturer's Address: Columbus, Ohio.
Date of Introduction: 1982. July.
Ingredients: Unbleached flour, tofu, fruits or vegetables, honey, eggs, vegetable shortening, baking powder, lemon juice, herbs, spices, salt.
Wt/Vol., Packaging, Price: 6 per container weigh 16.5 oz. Retails for $2.60.
How Stored: Refrigerated.
New Product–Documentation: Spot in Soyfoods. 1982. Summer. p. 54. "Tofu Muffin Madness."

5664. *Toyo Shinpo* (*Soyfoods News*). 1982. Bungei Shunjû ni mo tofu [Bungei Shunjû and other famous publications are writing about tofu]. Aug. 1. [Jap]
• ***Summary:*** In addition to tofu, they are also writing about vegetable protein and their relation to good health.

5665. Gardiner, Doris Kloss. 1982. Re: Jethro Kloss' work with soyfoods. Letter to William Shurtleff at Soyfoods Center, Aug. 3. 1 p. Answers handwritten after typewritten questions on Soyfoods Center stationery.
• ***Summary:*** Doris is Jethro Kloss' only grandchild. She was born on 28 Feb. 1929 in Miami, Florida. Concerning her grandfather's work with soy ice cream she recalls: "My mother and I, my uncle Eden, and my grandfather spent the winter of 1935-36 in Miami, Florida. I know he was preparing soy ice cream to serve at the close of his lectures and food demonstrations at that time. I used to get to lick the freezer paddles before he left for the lectures.

"I have no idea where and when and why Jethro Kloss became interested in soybeans. The soy foods that I remember that he made and that I ate as a child were the soy ice cream (of course!), delicious soy bean bread, soy bean butter, soy milk, soy cheese, pie crust, soy coffee, broth, soy mayonnaise, and soy bean roast.

"I just talked with my aunt (Promise Kloss Moffett), who lives in Hagerstown, Maryland, and who turned 79 today, and she does not recall if Jethro used any soy in the commercial health foods he made at the Nashville Sanitarium Food Company (which was sold in 1919-1920). She said that she does recall his experimenting with soy beans when they lived in Brooke, Virginia (in about 1924)." Address: Back to Eden Books, P.O. Box 1439, Loma Linda, California 92354. Phone: (714) 796-9615.

5666. *Times-Standard* (*Eureka, California*). 1982. Tofu specialist joins company. Aug. 7.
• ***Summary:*** "Arcata–Linda Redfield, author of 'Vegetarian Cooking with Tofu,' has joined the staff of the Tofu Shop Specialty Foods Co. here." She will supervise new product development for a line of soy-based deli foods.

5667. Dominguez de Diez Gutiérrez, Blanca. 1982. Re: Current work with soyfoods in Mexico. Letter to William Shurtleff at Soyfoods Center, Aug. 8. 1 p. Typed, with signature. [Eng]
• ***Summary:*** "Thank you for sending me a copy of the letter sent to you from Zen, A.C. For many years I have heard of [Ejo] Takata and I never could get in touch with him." Blanca plans to write to Takata and send him her book.

"Will end my commitment with the DIF next month. I have made up my mind to consolidate all the work I have done, have a base in the city, and from there organize little groups everywhere I have been and I am asked to return. Once I have everything organized I shall be happy to include all you have on soya. Have given your address to a lot of university students interested in your *Book of Tofu.*

"Hope you managed to get in touch with Nuren Banfunzi. He has done a tremendous amount of work in Guerrero as a scientist and in social work. He is practically unknown and deserves a lot of credit.

"You must know about the devaluation of the peso. Never before will soya be so much in demand in Mexico, not only to combat undernourishment [malnutrition] but for the sake of survival.

"Please note new address. Leaving for Mexico City the 25th of September."

To this letter Blanca attaches two sheets of paper: (1) Biographical and contact information for Dr. Nuren Banfunzi, head of the Department of Promotion and Difusion of ISAEAG (Institute Superior Autonomo de Estudios Agropecuarios de Guerrero) in Iguala, Guerrero. He has a PhD in genetics and has done a lot of fine work planting the new variety he developed, BM2, and using it to make soyfoods in Monterrey, Michoacan and Queretaro. Has address is Apdo, Postal #6, Iguala Guerrero, Mexico. Office phone: 21555. Home phone 23637 from 7 p.m. to 9 a.m. "I'm sure he can be very useful."

(2) Carbon copy of a letter written by Blanca to Maestro [Ejo] Takata (Zen) dated 22 Aug. 1982. She also sent him a copy of her book. Address: Apdo. Postal 21140, Mexico, 04000, D.F., Mexico.

• ***Summary:*** A photo shows the office.

5669. Storup, Bernard. 1982. Re: Work with tofu in France. Letter to William Shurtleff at Soyfoods Center, Aug. 19. 2 p. Handwritten and typed, with signature. [Eng]
• ***Summary:*** Bernard and Jean Preneuf have been making tofou [tofu] since mid-June. Bernard has been so busy for the last 6 months that he has had no time to write. He and Françoise had to change addresses (move) four times before they found a place to live rather near their tofu shop. This shop is: SOY SARL (or Société SOY), Plateau de l'Ardenay, 91590 Cerny, France. Phone: (6) 457 52 01. Their personal residence is 16 avenue de la République, 91290 Arpajon, France. Phone: (6) 490 24 44.

On 9 May 1982 Françoise gave birth to a baby girl named Aurore.

In recent months Bernard and Jean have had to organize everything for the new tofu shop, develop contacts with other shops, distributors, journalists, etc. "But we won't really begin before September 1981 as all is dead in France during July and August. Only the two of use are working, Jean and I, and it's a rather good association. In fact, we are completely different from one another; he has no real discipline, is afraid of anything related to administration, papers or figures, has no real practical background, but he is much more inventive that I am, dares to meet people and do things that I don't, has great common sense, has a more futurist vision of what things can be, is very generous, and believes in Soyfoods at least as much as I do.

"As I said to you a few days ago, I think things will go quicker for soyfoods in Europe than in the U.S. Most of the soycrafters who will set up a shop in the next few years will take advantage of the American experience and will avoid some mistakes. Same thing with the media and a lot of potential customers who have heard about TOFU."

Bernard then answers some questions about Li Yu-Ying, a French translation of *The Book of Tofu*, and a French-language pamphlet about tofu. He is waiting for information about the history of macrobiotics and soyfoods from *Institut Tenryu* (run by Mme. Rivière, an old disciple of George Ohsawa). Address: SOY SARL (or Société SOY), Plateau de l'Ardenay, 91590 Cerny, France. Phone: (6) 457 52 01.

5670. Parker, Joyce. 1982. Re: Soyfoods and soybeans in Nepal. Letter to William Shurtleff at Soyfoods Center, Aug. 28. 3 p. Handwritten with signature on letterhead of the Britain Nepal Medical Trust (Koshi Anchal).
• ***Summary:*** She is a Peace Corps volunteer living in the eastern middle hills of Nepal, eating the local food, and going crazy. Nepal is extremely diverse culturally, so what is done in one part of the country may not be true of other parts. Tofu is made in Kathmandu, the capital of Nepal, but only on a very small scale. In the eastern middle hills, soybeans are used mostly for a snack (*khaajaa*) in the early afternoon, often with tea–to sustain people until the evening meal. "The snack I'm familiar with is called *Bhatmas ani chiuraa*... and is made with soybeans and beaten rice. The mature soybeans are roasted over an open hearth, usually in a heavy cast iron wok–stirred with a stick continuously (the pan is dry but well seasoned) for 5-10 minutes. Remove from heat–put into a *jato* (primitive grinding stone) only to split the soybeans in half. A small amount of *mattitel* (mustard oil) is heated until the smoke rises (otherwise the taste is foul)–pyaaj (green onion–chopped fine) and jursaani (chili pepper also chopped fine) and fresh ginger are added, and next the bhaatmas–stir until they are covered with the oil mixture–salt is also added. It is then served hot or cold over the beaten rice. Its delicious–a real favorite with me–puts a bit of crunch into your diet.

"Soybeans are usually grown in a companion planting system with the *makai* (corn) or along the borders of the rice *khets* (irrigated fields). I have never seen the soybean grown in a *bari* (dry field) as a main crop. Main crops include rice, wheat and corn. Soybeans are always an afterthought. There is a British Aid Agricultural Farm at Pakhribas (in the Kosi Zone of eastern Nepal, 3 hours from Dhankuta) working on soybean trials." They came up with 3 varieties of soybeans which will grow in different terrains. More technical information can be gathered from them.

The Limbu live in the high hills and are "junglely types." "One of my co-workers is of Limbu origin and was the only one that knew about kinema or kenima (couldn't get the correct spelling but will keep trying). It seems it is a good trekking food. They make a soup of it and pour it over rice–keeps well–easy to cook. Lentils, a much preferred food, take too long to make on the trail. After my trip to Ilam–investigating the Limbu land–I'll write more specific details. From what I could gather:" Boil soybeans until they are soft. Grind to a mush with a local mortar and pestle. Add ashes (*kharain*) from the cooking stove (*chulo*) and mix with the soybeans. Place in a bamboo basket (*dhahi*), cover, and leave for 24 hours. Remove from basket, place on a bamboo mat, and dry in the sun. Recipes vary. "I have never tasted any but it sounds awful. More research is required. I'll keep you informed."

Newsflash–the SCF clinic is looking into using soymilk as a substitute food for babies–only when the mother is unable to breast-feed. We have also discussed possible weaning foods. One problem–soymilk is not high in calories; both calories and protein are rare commodities. "The value of the soybean's body building protein would be lost and just burned off as energy." The biggest problem here is just a lack of food. The Nepali diet is healthy but too many mouths to feed. Address: c/o U.S. Peace Corps, P.O. Box 613,

5676. *Soyanews* (*Sri Lanka*). 1982. Bring up the kids on tofu. 4(12):6-7. Aug.
• ***Summary:*** "The Wattegama Children's Home, situated a few miles away from Kandy town, has been using tofu as part of its feeding program since 1980. There are 54 children in the Home whose ages range from 3 to 17. The Home is managed by the National Council for Child and Youth Welfare and is supervised by the Department of Social Services and Probation.

"The decision was taken in early 1980 to send one of the staff working in the Home for training in soya cookery to the Gannoruwa Soyabean Foods Research Centre." "After her return the children have been treated to many preparations with soya, both sweet and savoury, and tofu soon came to be a favorite with them."

Describes how tofu is made at the home throughout the week with three large photos.

5677. **Product Name:** Tempeh, Tofu Tart (Tofu Pudding) [Chofu with Carob, Vanillafu with Vanilla, Lemonfu with Lemon, and Bananafu with Banana], Cottage Tofu.
Manufacturer's Name: Star Soyfoods.
Manufacturer's Address: Route 2, Box 337, Sandpoint, ID 83864. Phone: 208-265-4720.
Date of Introduction: 1982. August.
Ingredients: Tofu Tart: Crust: Vegan graham crackers, soy margarine. Soy Whip: Soy oil, soy milk, honey, vanilla. Fillings: Tofu, honey, vanilla for Vanillafu; plus lemon juice, soy oil and lemon rind for Lemonfu; carob powder and soy milk for Chofu; bananas, soy oil and lemon juice for Bananafu.
Wt/Vol., Packaging, Price: Tempeh: 8 oz. perforated poly bag sealed in a printed outer bag. Tart and Cottage Tofu: 2-4 oz small clear plastic cup with snap-on lid.
How Stored: Refrigerated.
New Product–Documentation: Order from Penny Billiter of Rt. 2, Box 337, Sandpoint, Idaho. 1981. Oct. 23. She orders 100 "What is Tempeh" pamphlets. On Dec. 8 she writes: "I have found your books very helpful and full of information. Thanks."

Form filled out by Penny A. Billiter. ca. 1981. Label with a smiling orange star is enclosed. "I am making tempeh, mock happy chicken, and baked tofu for the three health food outlets here in Sandpoint. I am only using 3-4 lb dry beans/week." Second form states the company started officially on 3 August 1982. Makes Tempeh and Tofu Tarts. Label. 1982, undated. 3.5 by 4 inches. Blue and orange on white. Label. 1983. 2 by 2 inches. Self adhesive. Blue on white with orange smiling star. Soyfoods Center Computerized Mailing List. 1982. July 23. Owner: Penny Billiter.

Talk with Penny Billiter Miller. 1993. Feb. 23. She still lives in Sandpoint and is still interested in soyfoods. She called the tarts "puddings" and she made several flavors: carob, vanilla, and banana. Sometimes she omitted the graham-cracker crust and just sold the product as a pudding.

© Copyright Soyinfo Center 2013

The Cottage Tofu, introduced at about the same time as the tempeh and tarts, was on the market for only a short time; she did it through the local food co-op. She still has records.

5678. **Product Name:** Tofu Sausage Patties: Seasoned and Baked.
Manufacturer's Name: Tofu Shop (The).
Manufacturer's Address: 768 18th St., Arcata, CA 95521. Phone: 707-822-7409.
Date of Introduction: 1982. August.
Ingredients: Tofu (water, organic soybeans grown according to Cal. Health Code Sect. 26569.11 and nigari). Marinated in a sauce of Tamari (a natural soy sauce made with water, soybeans, wholewheat and salt). Unrefined coldpressed Safflower oil, and a blend of eight herbs and spices.
Wt/Vol., Packaging, Price: 8 oz. vacuum packed.
How Stored: Refrigerated.
New Product–Documentation: Label. Received 1988. 4 by 2.5 inches. Self adhesive. Metallic red, blue, gold, and white. "Ready to eat... or reheat, naturally fresh... from our deli. A perfect snack fresh from the pack. Great for breakfast, in a burger, or in your favorite pizza or spaghetti sauce. Simple to heat in oven (350ºF, 10 minutes) or frying pan. Perishable, keep refrigerated, 34-39º." Matthew Schmit says (March 2009) that the metallic label was first used in 1985.

Two Labels sent by Matthew Schmit. 2002. Sept. 9. The product was introduced in 1985. Label #1 of 1992. "Tofu Sausage Patties: 4 Seasoned & Baked. 3 inches square. Self adhesive. Black and yellow on red. Illustration shows a tofu shop on stilts near the ocean with a tree arching overhead. Ingredients similar to above, but more organic. * = Grown according to California Natural Foods Act of 1990. "With whole, organic, GMO-free soybeans." Ready to eat or heat. A Perfect snack fresh from the pack."

Label #2 of Oct. 2002. No adhesive. Red and orange-yellow on white. A handsome, impressionistic watercolor illustration shows a tofu shop on stilts on a cliff with a tree arching overhead. "Good source of protein. Low in saturated fat. Cholesterol free."

Talk with Linda Redfield. 2002. Sept. 23. Linda arrived in Arcata in May 1982 and introduced this recipe to The Tofu Shop; as far as she knows, she developed it. It was probably first sold commercially at The Tofu Shop in about Aug. 1982; there was only one flavor.

5679. Vijayalakshmi, K.; Vaidehi, M.P. 1982. Evaluation of tofu and its products prepared from soymilk and combination with sunflower seed milk and skimmilk [skim milk]. *J. of Food Science and Technology* (*Mysore, India*) 19(4):139-42. July/Aug. [8 ref]
• ***Summary:*** "Tofus from soymilk and combinations with sunflower seed milk and skimmilk were developed as a ready-to-use and prepare base for various Indian dishes." A sensory panel decided that tofu made from soymilk or from 60% soymilk and 40% skimmilk was acceptable, whereas tofu made from 60% soy and 40% sunflower seed milk or from 60% soymilk + 20% sunflower seed milk + 20% skimmilk were not acceptable.

Two snack foods, Burfi and Pakoda [Pakora], prepared from the acceptable tofu were both acceptable with no significant difference ($P < 0.05$) among the products.

Note: A pakora is a fritter–any kind of food coated in batter and deep fried. Address: Dep. of Rural Home Science, Univ. of Agricultural Sciences, Hebbal, Bangalore 560 024, India.

5680. Wagner, Martha. 1982. Dairyless cooking. *Vegetarian Times.* Aug. p. 46-48.
• ***Summary:*** It's easy when you learn how to use soy milk, tofu, and nut milks as dairy substitutes. Contains recipes for: Soy milk (homemade). Tofu sour cream. Tofu creme (like whipped cream). Cashew nut cream. Nut milk (using almonds, cashews, or brazil nuts). Cashew milk gravy. Address: White Crane Publications, P.O. Box 3081, Eugene, Oregon 97403.

5681. Roi, Caroline. 1982. Re: Distributing through Sun Farms, owned by Ben Wenzel. Letter to "Dear customer," Sept. 1. 1 p. Typed, with signature on letterhead.
• ***Summary:*** "This month we will begin distributing our products through Sun Farms. The prices for tofu will remain the same ($.85 in tubs, $.75 in bulk)...

"We are confident that Ben Wenzel, owner of Sun Farms, and his company will give you excellent, dependable service. Sun Farms will handle your weekly orders and billings. Their address is:

"Sun Farms, Ben Wenzel, owner, 1635 South State Street, Ann Arbor, Michigan 48104. (313) 665-2233. Our intention is to provide you with the freshest, highest-quality tofu and soyfoods available in this area." Note: D.J. Ben Wenzel's business card is attached. Address: Coordinator, Sales and Marketing, The Soy Plant Co-op Inc., 711 Airport Blvd., Suite #1, Ann Arbor, Michigan 48104. Phone: 313-663-8638.

5682. Krieger, Verena. 1982. Re: Update on soyfoods in Switzerland. Letter to William Shurtleff at Soyfoods Center, Sept. 8. 2 p. Typed, with signature. [1 ref]
• ***Summary:*** "There is a widespread error in German speaking countries about mung beans. These are sold as 'gruene Sojabohnen' ("green soybeans") in health food stores and many people think that the soybean is green... Note: A similar problem occurs in French speaking countries.

"Soy sprouts can be translated as 'Soyasprossen' and 'Sojakeimlinge'. Both are common... The tofu shop in Nyon is run by Marty Halsey, an American... My article 'Gestern Steak, morgen Tofu' has been translated into English, French

© Copyright Soyinfo Center 2013

and Italian."

Soybean growing in Switzerland. This is a hard nut to crack. The first of the three farmers we have contracted to grow organic soybeans for us had to cut the beans and plow them under, since the whole field was totally overgrown with weeds. In a desperate attempt to save the beans, our tofu group (9 people) spent a weekend there, pulling out weds by hand. That same night a tornado-like thunderstorm ravaged the field and the next morning we could nothing but stems. The second farmer is having better results (if the weather holds out, so that the beans can reach maturity) but he says with all the work and worry he's had, he is not going to do it again next year. The third one is having good results with Maple Arrow (a Canadian breed [variety / cultivar]), but less good results with Fiskeby (Swedish). A third breed we have tried, Giesso (German) also seems to yield less good results.

"I continue to believe that soybean growing is possible in Switzerland, but many years of practical experience is necessary before it can be widely accepted by farmers."

"5. The tofu shop in Nyon is run by Marty Halsey, an American."

"7. I have told Wolfgang [Furth-Kuby] that I would help him as much as I can with the 'Newsletter' and with a conference" [for soycrafters in Europe who want to start a soyfoods association]. Address: Bruchmattstr. 24, CH-6003 Lucerne, Switzerland. Phone: 041-22 50 34.

5683. Marshall, Philip. 1982. Re: The establishment of Cauldron Foods Ltd. Letter to William Shurtleff at Soyfoods Center, Sept. 8. 3 p. Handwritten.
• ***Summary:*** Cauldron Foods was formed in Nov. 1981 as a partnership between Philip Marshall and Mr. Peter Fagan. They began tofu production in March 1982. They now have a "cauldron shop" type tofu plant presently producing 200 lb. of firm tofu (9.3% protein) 3 to 4 times weekly. "Sales of tofu itself may not have risen very dramatically, but public awareness concerning tofu and related products is growing steadily. A local television station filmed the process of tofu being made at our plant, to be included in a program on nutrition later this year... We have had more success perhaps with our burger containing tofu and grains, vacuum packed giving it a shelf-life of 3 weeks. Our turnover is rising at a good pace, and we are introducing new products to our range as we improve production methods. We would like to move into sterilized tofu creams and spreads... We would like to keep informed of new developments in the industry in America..." and to establish contact with similar American businesses.

Note: This is the earliest document seen (April 2001) that mentions Cauldron Foods. Address: Chapel Lane, Sunnybank, Fishponds, Bristol 16, England.

5684. Winter, Christine. 1982. News for you: Good 'n' healthy. *Chicago Tribune.* Sept. 15. p. E2.
• ***Summary:*** "Health foods are becoming increasingly popular, and even mainstream foods are taking on a healthy glow..." New Product News is filled with page after page of new health food products including tofu hot dogs (Light Links, from Light Foods) and soy ravioli (New Leaf Soyfoods).

5685. Weiner, Steve. 1982. Cashing in on 'natural foods.' *Eugene Register-Guard* (*Oregon*). Sept. 19. p. 1E, 2E.
• ***Summary:*** A large color photo shows Surata Soyfoods tofu and tempeh, plus Nancy's Honey Yogurt. Sue Kesey, co-owner of the Springfield Creamery (founded 22 years ago), is president of the fledgling Lane County Natural Foods Association, a 20-member group that wants everyone to eat natural foods. Gil Johnson is a spokesman for the Association. Callix Miller is Surata's marketing manager.

5686. Rasmussen, Carol. 1982. Japan's delicacies lose nothing in translation at Star Market. *Chicago Tribune.* Sept. 23. p. N_B1 or W_B1.
• ***Summary:*** "We in the United States are known for our culinary curiosity." We're learning to eat raw fish and Japanese sushi. A good place to explore Japanese food and culture is Star Market, 3349 N. Clark St. in Chicago. The small grocery store is owned and run by two Japanese couples. It is the epitome of order, neatness, cleanliness and warm hospitality.

The various type of tofu include: (1) *"Kinu goshi"* [*Kinugoshi*], which "has been silk-screened [sic, curded as a gel, without separation of curds and whey] so that its texture is very fine like silk." (2) *"Momen goshi,* which is regular tofu." and (3) "tofu pouches" that can be stuffed with vinegared rice, cooked chopped vegetables, soy sauce and sugar [to make a type of sushi named *Inari-zushi*].

5687. Fitzpatrick, Jean Grasso. 1982. Separate and equal. *New York Times.* Sept. 26. p. SM96, 121.
• ***Summary:*** What happens in households where vegetarians and meat eaters regularly have meals together? Living with a vegetarian has its pluses and minuses. If you are a gourmet, remember that they tend to be upwardly mobile–trying to eat like the people they aspire to be. Vegetarians tend to be downwardly mobile. Who makes the meals, and how? Can they respect one another? One way is to make one base, say from vegetables, then add chicken to one half and tofu to the other.

Two recipes are given: Tempeh / lamb kebabs. Chinese broccoli with chicken or tofu. "Each of these recipes serves two–one vegetarian and one meat eater. To cook for a group, multiply the meat or the soy food (depending on who's in the majority) and add accordingly to the remaining ingredients."

Lindholm.

5695. **Product Name:** Firm Tofu: Soybean Curd Cake, Soymilk, Soy Sprouts.
Manufacturer's Name: Chunco Foods Inc.
Manufacturer's Address: P.O. Box 883, Kansas City, MO 64141. Phone: 913-362-8097.
Date of Introduction: 1982. September.
Ingredients: Tofu: Soy beans, water, nigari (calcium sulphate).
Wt/Vol., Packaging, Price: 16 oz packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17. President: Peter Chun. Talk with and business card from Peter Chun at Soyfoods Conference in Seattle, Washington. 1982. He is a Korean-American, who presently makes tofu, soymilk, and soy sprouts. Label. 1983, undated. 5.5 by 4.25 inches. Plastic film. Blue, black, and orange on clear film. "No preservatives. Keep refrigerated." Contains serving suggestions. In March 1990 his tofu retailed for $1.29 for 18 oz. It was very low priced and probably not pasteurized.

5696. **Product Name:** Tofu.
Manufacturer's Name: Chung Hing Bean Curd Manufacturing.
Manufacturer's Address: 268 Victoria St., Melbourne, VIC, Australia. Phone: 033-284-596.
Date of Introduction: 1982. September.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17.

5697. **Product Name:** [Tofu].
Manufacturer's Name: Circolo L'Aratro.
Manufacturer's Address: V Cavour 35, 46100 Mantova, Italy. Phone: 037-636-8760.
Date of Introduction: 1982. September.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: Sergio Mambrini.

5698. **Product Name:** Tofu: Shinsen [Soft, or Regular].
Manufacturer's Name: Continental Soyfoods Inc. [Joy of Soy].
Manufacturer's Address: 510 Kasota Ave. S.E., Minneapolis, MN 55414. Phone: 612-378-0464.
Date of Introduction: 1982. September.
Ingredients: Soy bean curd cake: Soybeans, water, calcium sulfate.
Wt/Vol., Packaging, Price: 16 oz packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.
How Stored: Refrigerated.

The word "tofu" is written in Chinese characters. In very small letters, vertical to the bottom of the label, is the phrase "soy bean curd cake."

5699. Corn Country Whole Foods, Inc. 1982. Fall-winter 1982: New & improved (Catalog). 132 South Market St., Champaign, IL 61820. iv + 26 p. No index. 28 cm.
• ***Summary:*** The cover of this natural foods, vegetarian catalog is printed on orange paper with brown ink. Corn Country has increased the number of products it distributes, both those under its own Market Street brand and those made by many other companies. Corn Country trucks deliver throughout the Midwest: Freight is free with a minimum order of $400. Product categories: Refrigerated products. Bulk foods. Packaged foods. Snacks. Other.

Interesting products: (1) Tofu: Packaged ($0.82/lb) or bulk ($80/lb). (2) Market Street bread: Cinnamon raisin and Whole wheat both contain "whole soy flour." (3) Stoneground flours: Soy flour-full fat (OG = Organically Grown) ($0.42/lb). Corn Country uses old fashioned granite stone mills to keep the temperature low, which "preserves the nutritional value and flavor of the whole grain... Whole soy flour is milled from soybeans which have been heated first to destroy an enzyme which interferes with protein digestion. It is milder tasting compared to the defatted soy flour typically sold commercially." (4) Market Street granolas: Of the 7 varieties, 6 contain small amounts of "soy flour." (5) Beans, peas, and lentils: Soybeans OG ($0.28/lb). Azuki beans. Chickpeas (Garbanzos). Lentils (green or red). Mung beans. (6) Market Street meals (vegetarian): Nutburger (incl. soy flour). Soyburger (soy flour is main ingredient). (7) Sea vegetables (9 types). (8) Westbrae miso (6 types). (9) Market Street nut butters: Peanut butter ("coarsely ground to retard oil separation"). Almond butter. Sesame tahini. (10) Natural oils: Sesame oil. Safflower oil. (11) Condiments. Nigari (bulk or 5 lb). Umeboshi plums. Shoyu (pints to 4.75 gal tin). Tamari (with dispenser to quarts). (12) Seeds: Alfalfa seeds. Sesame seeds whole brown. Sesame seeds hulled white. Sunflower seeds. Pepitas. (13) Market Street snack nuts: Shoyu almonds. Shoyu suns (sunflower), Shoyu cashew pieces. (14) Soy & corn snacks: Soy nuts salted. Soy nuts unsalted. (15) Market street mixes (unsulfured dried fruits, nuts and seeds): Sweet & shoyu mix (ingreds: Raisins, date pieces, dried bananas, shoyu almonds, shoyu cashews, shoyu sunflower seeds). Flatland mix (incl. unsalted "soynuts" {soybeans, vegetable oil}, fancy cashew pieces, and pumpkin seeds). (16) Health and beauty aids: Dr. Bronner soap (14 types). (17) Literature: 25 Talking Foods pads. (18) Traditional medicinal herb teas (27 types). (19) Celestial Seasonings teas (38 types); (20) Packaging supplies and kitchen help: Tofu kit ($12.56). Address: Champaign, Illinois. Phone: 217-359-8843.

5700. **Product Name:** Tofu.
Manufacturer's Name: Creative Soyfoods, Inc.
Manufacturer's Address: 526 N. Clark St., River Falls, WI 54022. Phone: 715-425-0467.
Date of Introduction: 1982. September.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: David Nackerud.

5701. **Product Name:** Dayspring Tofu, Deep-Fried Tofu, Soy Pudding, and Tofu Kit.
Manufacturer's Name: Dayspring Soyacraft Corporation.
Manufacturer's Address: 626 Esquimalt Rd., No. 5., P.O. Box 7285, Station D, Victoria, BC, V9A 3L4, Canada. Phone: 604-382-2144.
Date of Introduction: 1982. September.
New Product–Documentation: Form filled out by Michael and Paul Hsieh. ca. 1982. Soya Bluebook. 1986. p. 107.

5702. **Product Name:** Tofu.
Manufacturer's Name: Devi's Country Soy Sausage.
Manufacturer's Address: 81472 Cassidy Lane, Eugene, OR 97405. Phone: 503-344-7454.
Date of Introduction: 1982. September.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: Virginia Ruffulo.

5703. **Product Name:** Earth Angel Tofu Cheesecake.
Manufacturer's Name: Earth Angel Soyfoods.
Manufacturer's Address: 53 Stanley Ave., Mt. Waverley (E. Oakleigh), VIC 3149, Australia. Phone: 03-544-8020.
Date of Introduction: 1982. September.
New Product–Documentation: Letter from Debbie Schmetzer. 1982. March 3. "At the moment we are selling tempeh as well as tofu cheesecakes to a natural foods restaurant, and the response was great."

5704. **Product Name:** Earth Angel Tofu.
Manufacturer's Name: Earth Angel Soyfoods.
Manufacturer's Address: 53 Stanley Ave., Mt. Waverley (E. Oakleigh), VIC 3149, Australia. Phone: 03-544-8020.
Date of Introduction: 1982. September.
New Product–Documentation: Letter from Debbie Schmetzer. 1982. March 3. Earth Angel is just getting underway and their first product is tempeh. They soon hope to produce tofu and tofu puddings for the health food stores. "Right now there are two Chinese factories that produce inorganic gypsum tofu and people would rather see organic tofu on the market... At the moment we are selling tempeh as well as tofu cheesecakes to a natural foods restaurant, and the response was great."

Letter from Darren Fletcher of Darkville, Melbourne. 1984. Sept. 4. "Earth Angel Soyfoods makes tofu and tempeh. They may close down in the near future. They told me that they would like to finish and take off for a laid-back country life style. Too much hard work they said. They will look for someone to buy the business."

5705. **Product Name:** Eastern Flavor brand Tofu [Soft, Regular, Organic, or Firm Organic].
Manufacturer's Name: Eastern Foods Corporation.
Manufacturer's Address: 3225 E. Hennepin Ave., Minneapolis, MN 55413. Phone: 612-331-3353.
Date of Introduction: 1982. September.
Ingredients: Firm organic: Organic soybeans, water, nigari (magnesium chloride derived from sea water).
Wt/Vol., Packaging, Price: 16 oz packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.
How Stored: Refrigerated.
Nutrition: Firm organic: Per 4 oz.: calories 80, protein 9 gm, carbohydrates 3 gm, fat 5 gm, sodium 8 mg. Percentage of USRDA: Protein 15%, iron 12%, thiamine 4%.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: Mr. Lee & Calvin Lutzke. Labels. 1985. 5.5 by 6 inches. Red, black, and green on clear film. The soft is coagulated with calcium sulfate and glucono delta-lactone, the regular organic with only calcium sulfate, and the firm organic with nigari. Letter from Tom Menie. 1988. June. Introduced in 1985.

5706. **Product Name:** Not Cheesecake (Tofu Cheesecake).
Manufacturer's Name: Evolutionary Bean.
Manufacturer's Address: P.O. Box 707, Bolinas, CA 94924. Phone: 415-868-0188.
Date of Introduction: 1982. September.
Ingredients: Filling: Tofu, soy oil, honey, banana. Crust: Oats, wheat germ, soy oil, honey, cinnamon, vanilla, nutmeg. Topping (One of the following): Pineapple, strawberry or apple.
Wt/Vol., Packaging, Price: 4. oz.
How Stored: Refrigerated.
New Product–Documentation: Label. 1982. 2.5 inch diameter. Self adhesive. Green and purple on white. Form filled out by Claire Heart.

5707. **Product Name:** Tofu.
Manufacturer's Name: Flying Dragon Foods.
Manufacturer's Address: 3311 8th St. E, Saskatoon, SASK, Canada S7H 4K1. Phone: 306-373-9040.
Date of Introduction: 1982. September.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: Tak K. Sue.

5708. **Product Name:** Tofu.
Manufacturer's Name: Fong-Inn Pastry (Fong-On).

© Copyright Soyinfo Center 2013

Manufacturer's Address: 46 Mott St., New York, NY 10013. Phone: 212-962-5196.
Date of Introduction: 1982. September.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: Kevin Chan. This company started in 1935. Talk with Kevin Chan. 1989. Nov. 16. His grandfather Eng Fong-on and a partner started this company as Fong-On in 1933, across the street at 43 Mott St. His grandfather passed away many years ago. In 1982 the company changed from a 4-person partnership to a 2-person partnership, owned by Kevin and his brother. At that time, the English-language name of the company changed to Fong-Inn Pastry but the Chinese name (which has not changed since the company was started) remained Fong-On. The company now makes a rice cake pastry named Bok Tung Go.

Kevin gives me an overview of the New York tofu market, with names of all major players. Tofu products he now makes are: Tofu, firm tofu (¼ lb), soft tofu (nun-daufu, ½ lb), extra firm tofu, and fried tofu. He is fortunate in that he owns his own building. All the competition has had to move to Brooklyn to escape the high rents. He has been offered more than a million dollars for his building. He remembers 25 years ago they sold tofu for $7 per 100 pieces. Now with all the competition it sells for only $8-$9 per 100 pieces. His main competition is Dairy Foods at 28 East Broadway in New York City.

Talk with Paul Eng of Fong Inn Too. 1995. Dec. 12. The company name changed from Fong Inn to Fong Inn Too in about Jan. 1995. They are still located at 46 Mott St.

5709. **Product Name:** Tofu.
Manufacturer's Name: Greatwater Soyfoods.
Manufacturer's Address: 1039 E. Pioneer Rd., Duluth, MN 55804. Phone: 218-525-3913.
Date of Introduction: 1982. September.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: Doug Hamdorf & Demetria Nanos.

5710. **Product Name:** Tofu.
Manufacturer's Name: Hannes Bakery.
Manufacturer's Address: 605101 Auroville, Tamil Nadu, India.
Date of Introduction: 1982. September.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17.

5711. **Product Name:** Tofu.
Manufacturer's Name: Himalayan Tofu.
Manufacturer's Address: Jeet Villa, Dalhousie, HP India.
Date of Introduction: 1982. September.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: Susan Jootla.

5712. **Product Name:** Tofu.
Manufacturer's Name: Hong Kong Supermarket.
Manufacturer's Address: Shaftsbury Ave., London, England.
Date of Introduction: 1982. September.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17.

5713. **Product Name:** Tofu.
Manufacturer's Name: Hong Oriental Food.
Manufacturer's Address: 189 Lt. Bourke St., Melbourne, VIC, Australia. Phone: 036-632-811.
Date of Introduction: 1982. September.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17.

5714. **Product Name:** Tofu.
Manufacturer's Name: Jomar Inc.
Manufacturer's Address: 8404 E. Brookville Rd., Indianapolis, IN 46239. Phone: 317-353-1008.
Date of Introduction: 1982. September.
New Product–Documentation: Form filled out by Fred Mark. 1982. Company started in Sept. 1982.

5715. **Product Name:** [Tofu].
Manufacturer's Name: Jose Parracho Tofu.
Manufacturer's Address: Quinta da Portugesa, Fieguesia da Annuciada, Setubal, Portugal.
Date of Introduction: 1982. September.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: Jose Parracho. Note: This way of writing the company name and address are probably correct.

5716. **Product Name:** [Tofu].
Manufacturer's Name: Joya.
Manufacturer's Address: Le Lieu, 1345 Vaud, Switzerland.
Date of Introduction: 1982. September.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: Joanna White.

R. Leviton. 1983. Report on trip to Europe with American Soybean Assoc. Oct-Nov. p. 17. Joanne White in Le Lieu makes about 20 kg/week of tofu.

5717. **Product Name:** Tofu.
Manufacturer's Name: Knitty Gritty City, Inc.
Manufacturer's Address: P.O. Box 736, Hurricane, UT 84737. Phone: 801-635-4369.
Date of Introduction: 1982. September.

New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: Joanne Michaels.

5718. **Product Name:** [Tofu].
Manufacturer's Name: Les Sept Marches.
Manufacturer's Address: Les Creusettes, Chemin des Mouille, 74330 Poisy, La Balme de Sillingy, France. Phone: 50.22.13.45.
Date of Introduction: 1982. September.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Address listed as Chemin Des Mouille, 74330 Poisy, France. Shurtleff & Aoyagi. 1983. Feb. Soymilk Industry and Market. p. 7. Richard leviton. 1983. Oct. 16. Trip to Europe with American Soybean Assoc. Jacques Mitler makes about 500 lb/week of tofu at this company. It is sold pasteurized in a glass jar. Poor quality. Le Compas. 1986. March-April. p. 32. Mitler did not respond to a questionnaire from Anthony Marrese. 1989. Nov. Address is now Les Creusettes, 74330 Poisy, France. Same phone.

5719. Leviton, Richard. 1982. In a small bright building: Cottage soy industries on Vancouver Island. Colrain, Massachusetts. 15 p. Sept. Unpublished typescript.
• ***Summary:*** Discusses Sooke Soyfoods (Wayne Jolley), Thistledown Soyfoods, Shin Mei Do Miso, and Metta Tofu. Note: This article was commissioned by *East West Journal* but never paid for or published. For a good summary, see: *Soyfoods.* 1983. Winter. p. 36-37. "Cottage soy industries thrive on Vancouver Island."

Concerning Shin Mei Do on Denman Island: Lulu Yoshihara recalls: In 1976 we picked up *The Book of Miso* at Uwjimaya department store in Seattle [Washington]. It didn't look like it would be all that hard [to make miso] or take that much time or technology. Plus miso wasn't perishable and didn't need to be marketed right away. Ray [Lipovsky] was already here doing tofu and that gave us the idea we could do a little home soy business on the island and make a living. So I went to Japan in 1977 to find a miso teacher. We've been together since 1971. Address: Colrain, Massachusetts 01340.

5720. **Product Name:** Tofu.
Manufacturer's Name: Manoa Soy Works.
Manufacturer's Address: 2561 Manoa Rd., Honolulu, Oahu, HI 96822. Phone: 808-949-1815.
Date of Introduction: 1982. September.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: Bev Lum.

5721. **Product Name:** Tofu.
Manufacturer's Name: Many Happiness Tofu.
Manufacturer's Address: 305 Smith St., Mt. Shasta, CA 96067. Phone: 916-926-3939.
Date of Introduction: 1982. September.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: Susan Ergas. Note: Susan later moved to Israel and ran a tofu company named Jerusalem Tofu there.

5722. McNeil, Maggie. 1982. Soybeans: The payoff from export promotion. *Foreign Agriculture.* Sept. p. 20-22.
• ***Summary:*** Every year since 1966, U.S. soybean growers have been using a checkoff program to invest a small part of their income in activities designed to create new or expanded demand for U.S. soybeans overseas. In fiscal year 1982, some 475,000 farmers in 23 states ear-marked nearly $5 million for these activities. For example, soybean oil now commands a 50% share of the total German edible oils market. In 1977 Blauband, a Unilever Co. product, became the first major identified soybean oil product to hit West German retail shelves. Address: Soybean update editor, Information and Education, American Soybean Assoc., St. Louis, Missouri.

5723. **Product Name:** Marinated & Broiled Tofu (Tofu Slices).
Manufacturer's Name: Nasoya Foods.
Manufacturer's Address: Mechanic St. Ext. (P.O. Box 841), Leominster, MA 01453.
Date of Introduction: 1982. September.
Ingredients: Tofu, soy sauce, honey, herbs, spices.
Wt/Vol., Packaging, Price: Semirigid 8 oz vacuum package is opaque, with pre-printed film.
How Stored: Refrigerated.
Nutrition: Per 4 oz.: Calories 180, protein 17 gm, carbohydrate 5 gm, fat 10 gm.
New Product–Documentation: Label. 1983. 4 by 4.5 inches. Self adhesive. Orange, green, yellow and black on white. "High in protein. Serve hot or cold as an entree, sandwich, or high protein snack." Spot in Soyfoods. 1983. Winter. p. 49. "A Slice of Tofu." Summer. p. 52. These are vacuum packed.

Letter from John Paino of Nasoya. 1990. Sept. 25. Bob Bergwall says this product was introduced in Sept. 1982.

5724. *Natural Foods Merchandiser.* 1982. Soy producers prepare a marketing strategy. Sept. p. 84-85.
• ***Summary:*** A summary of the annual Soyfoods Assoc. conference at the Univ. of Washington (Seattle) in July 1982. Several companies and individuals [Gary Barat of Legume, and Steve Snyder] are "talking about forming an American Tofu Council, similar to the American Dairy Council, and running promotional ads along the same line–you know, 'Everybody needs tofu.'" Regardless of whether SANA is used as a base or not, the companies planning the campaign were talking about spending $250,000 the first year and

5735. **Product Name:** [Tofu].
Manufacturer's Name: Small Tofu Shop.
Manufacturer's Address: Rome, Italy.
Date of Introduction: 1982. September.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17.

5736. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Sojatour Tofu Shop.
Manufacturer's Address: Paris, France.
Date of Introduction: 1982. September.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17.

5737. **Product Name:** Tofu.
Manufacturer's Name: Sonoma Natural Foods.
Manufacturer's Address: 100A Poultry, P.O. Box 603, Petaluma, CA 94953. Phone: 707-778-8638.
Date of Introduction: 1982. September.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: Dik & Sharon Rose.

5738. **Product Name:** Tofu.
Manufacturer's Name: Sopro Products, Inc.
Manufacturer's Address: 111 West Ave., Albion, NY 14411. Phone: 716-589-7074.
Date of Introduction: 1982. September.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: Stephen Hwa.

5739. **Product Name:** [Tofu].
Manufacturer's Name: Soy-Lin or F.M. Lin.
Manufacturer's Address: Burgemeester Huydecoperweg 18, 3615 AD Westbroek, The Netherlands. Phone: 034-69-1996.
Date of Introduction: 1982. September.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: Mr. F.M. Lin.

Proceedings of the First European Soyfoods Workshop. 1984. Sept. 27-28. Mr. F.M. Lin, owner of a company named F.M. Lin, at the address shown above, was in attendance at the Workshop.

Talk with Sjon Welters. 1990. March 30. Lin Tahoe (Soy Lin) is a traditional Indonesian tofu company that makes an estimated 1,000 kg/week of calcium chloride tofu.

Talk with Sjon Welters. 1990. Sept. 9. He talked with his co-worker Bernard Faber in Holland who is trying to find out more about Soy Lin. He called them but could get any information. "The Chinese and Indonesian business people in Holland are so secretive. They hide everything behind different brand names, small companies here and there, so its very hard to find out what is happening. Even if you know the address and go there, you might not find anything there but an empty storefront."

Talk with Bernd Drosihn. 1991. Aug. 25. He thinks Vanka Kawat is a brand of Soy Lin.

5740. *Soyanews* (*Sri Lanka*). 1982. Deep frozen tofu. 5(1):3. Sept.
• ***Summary:*** Describes frozen tofu and tells how to make it in homes that have a deep freezer. Gives a few recipe ideas.

© Copyright Soyinfo Center 2013

"Deep frozen tofu when thawed and oven or solar dried turns into a chewy meaty product like TVP."

5741. **Product Name:** Tofu.
Manufacturer's Name: Sugar Ridge Soyfoods.
Manufacturer's Address: Box 726, Ashland, NH 03217.
Date of Introduction: 1982. September.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: Mary Bates.

5742. **Product Name:** Tofu.
Manufacturer's Name: Sung's Oriental Grocery.
Manufacturer's Address: 471 Englewood Ave., Buffalo, NY 14223. Phone: 716-836-3611.
Date of Introduction: 1982. September.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Form filled out by Soo Y. Lee. 1998. July 2. This company stopped making tofu in 1988, but they are still in business as a grocery store that sells a variety of different types of tofu; they are interested in starting tofu production again. The present address is 3605 Sheridan Dr., Amherst, New York 14226. Phone: (716) 836-3611. Talk with Mr. Soo Lee. 1998. July 9. He personally started making tofu in 1982 but he had to stop in 1988 because his equipment got too old. Now he wants a catalog of tofu equipment.

5743. **Product Name:** Tofu.
Manufacturer's Name: Tofu, Inc.
Manufacturer's Address: 6216 Madison Ct., Morton Grove, IL 60053. Phone: 312-967-0090.
Date of Introduction: 1982. September.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: Eileen Friedman.

5744. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Tofu Quebec, Inc.
Manufacturer's Address: 451 47th St. E, Charlesbourg, QUE, Canada G1H2M7. Phone: 418-622-0471.
Date of Introduction: 1982. September.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: Pierre Laflanne; Soyfoods Center Computerized Mailing List. 1983. June 20. Owners: Guy de Valter and Pierre la Flamme. The address is now 344 Rue St. Roch, Quebec, QUE, G1K 6S2, Canada. Phone: 418-525-7207.

5745. **Product Name:** Tofu, Tofu Cakes, Tofu Sandwiches, and Soymilk.
Manufacturer's Name: Tofu Shop.
Manufacturer's Address: 78 Bridge Rd., Richmond, Melbourne, VIC, Australia. Phone: 03-429-6024 or 6204.
Date of Introduction: 1982. September.
New Product–Documentation: Form filled out by Malcolm Green. 1983. They also operate a deli serving soyburgers, sushi rolls, kanten (agar) sweets, tofu rice sandwiches, various soy drinks, and health foods. They use 10-15 lb/day of dry soybeans.

Soyfoods Center Computerized Mailing List. 1983. June 20. Owner: Malcolm Green.

Newspaper article by Jeni Port. 1983. "The tofu is here!" (Title of newspaper and exact date unknown). A photo shows Malcolm and Guna Green and their baby, Georgia, in their Richmond home, the first tofu shop in Melbourne. At "The Tofu Shop" (78 Bridge Road, Richmond) Malcolm and Guna make and sell a variety of soy foods, "specialising in tofu and tempting tofu cakes and sandwiches for the take away trade. It seems incongruous that the former butcher shop now contains Melbourne's first retail outlet for tofu, a food so strongly associated with vegetarianism." Making tofu is an art "that has taken Malcolm many years to master." They also sell soy milk for 90 cents a litre.

Letter from Darren Fletcher of Darkville, Melbourne. 1984. Sept. 4. "I've decided I don't want to commit myself to the tofu business. Too much long and hard work and I really think Melbourne has enough tofu shops. I also work with Malcolm Green's Tofu Shop."

5746. **Product Name:** [Tofu].
Manufacturer's Name: Unisoya, Inc.
Manufacturer's Address: 17911 LeBeau, C.P. 929, Quebec, QUE, J0N 1L0, Canada. Phone: 514-430-8690.
Date of Introduction: 1982. September.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Address is now 17911 LeBeau, C.P. 929, Quebec, QUE, J0N 1L0, Canada. Phone: 514-430-8690. Note that in July 1982 Norbert Argiles was an owner of SoyBios, C.P. 929, St. Janvier, QUE, J0N 1L0, Canada.

Soyfoods Center Computerized Mailing List. 1983. Jan. 17. Owner: Norbert Argiles. The address is now C.P. Box 278, Prevost, QUE, J0R 1T0, Canada. Phone: 514-224-2628.

Fran Halter. 1984. The Gazette (Quebec). March 5. "A Committed True Believer Spreads the Word About the Curd." About Norbert Argiles of Unisoya. Talk with Yvon Tremblay and Richard Milon. 1987. Dec. 11. Unisoya was started in 1976 by Norbert Argiles. It was one of the first tofu shops in Quebec. Their tofu was sold in Montreal. Argiles worked for 10 years then burned out. He sold the company, which still exists.

5747. **Product Name:** Tofu.
Manufacturer's Name: Veggie Table.
Manufacturer's Address: P.O. Box 8029, 31 Altona, St. Thomas, VI 00801. Phone: 809-774-1810.

© Copyright Soyinfo Center 2013

Date of Introduction: 1982. September.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: P.A. Callwood.

Talk with Pia Izack, owner of Rastafari Dynasty; she phones from St. Thomas, Virgin Islands. 1996. July 15. Veggie Table is still active and in business. They prepare hot meals daily and are also a basic health food store. They carry homeopathic remedies, herbs, and water-packed tofu, but they no longer make the tofu themselves.

Talk with Benita Martin of St. Thomas, U.S. Virgin Islands. 1996. Aug. 6. She has been making tofu on a home scale in a rural area and selling it to farmers in St. Thomas since 1995, but she was not the first to make tofu there. The first was the lady at the Veggie Table. She is the mother of four, and she hopes to start a tofu shop for her four sons to run as a source of income. She first called Soyfoods Center in March 1995.

5748. **Product Name:** Tofu.
Manufacturer's Name: Yong Ho Pak Food, Inc.
Manufacturer's Address: 3201 Ross Ave., Dallas, TX 75204. Phone: 214-821-0542.
Date of Introduction: 1982. September.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: Yong Ho Pak.

5749. Timmins, Tom. 1982. Re: Calcium, tofu, and osteoporosis. Letter to William Shurtleff at Soyfoods Center, Oct. 4. 2 p. Handwritten on letterhead.
• ***Summary:*** Tom thanks Bill Shurtleff for including him on a list of people to whom Shurtleff sent a problem about his [Shurtleff's] low bone mineral density. Tom's family is basically, and has been, lacto-ovo [vegetarian] since they stopped eating meat. His wife, Judy, has been primarily vegan for 15 years, so she is a prime candidate for osteoporosis. Tom thinks the mass market people get plenty of calcium from dairy products. Address: New England Soy Dairy, Inc., 305 Wells St., Greenfield, Massachusetts 01301. Phone: (413) 772-0746, 774-3141.

5750. Flinders, Carol. 1982. Greens popular Zen restaurant [at Fort Mason, San Francisco]. *Hartford Courant* (*Connecticut*). Oct. 6. p. E6.
• ***Summary:*** Fort Mason served as an Army post for more than 100 years, initially as a coastal defense site and subsequently as a military port facility. During World War II, Fort Mason was the point of debarkation for all troops leaving for the South Pacific. Today it is part of the Golden Gate National Recreation Area. Greens, owned and operated by members of the San Francisco Zen Center, "is easily and deservedly the most popular vegetarian restaurant in San Francisco."

One popular dish is the "charcoal-grilled tofu sandwich" with a touch of horse radish.

Note: This article also appeared (in slightly varied form) in the Washington Post (Nov. 3, p. E19).

5751. Miko Seisakusho. 1982. Nigari tofu kikai ni [Machine for making natural nigari tofu (Ad)]. *Toyo Shinpo* (*Soyfoods News*). Oc. 11. p. 8. [Jap]
• ***Summary:*** A full page ad. A photo shows the machine.

5752. Fiske, Doug. 1982. Re: First proposal for a publicity program for soyfoods. Letter to William Shurtleff at Soyfoods Center, Oct. 12. 2 p. Typed, with signature on letterhead.
• ***Summary:*** "I think you suggested some time ago that I could be providing for other soyfoods companies the same services I'm now performing for Ken Lee. I'm going to take you up on that suggestion and I have asked Ira [Leviton] to reserve some ad space for me [in *Soyfoods* magazine]."

"With the help of free-lance associates, we would offer the following:" The name of Doug's Company to be is "Hope Springs Marketing." Address: Nature's Touch Soyfoods, P.O. Box 511, Encinitas, California 92024. Phone: (714) 753-5979.

5753. DeSimone, Bonnie. 1982. 'Small is beautiful, but invisible is not. We want to be effective without selling out.' *Ann Arbor News* (*Michigan*). Oct. 14. [1 ref]
• ***Summary:*** Ann Arbor's "new wave" cooperatives and worker collectives are facing hard times, and having to take a long look at themselves. "Many are struggling to maintain their identity as economic realities call their idealistic business practices into question. But that was when the economy was healthy and alternative lifestyles were thriving." Ann Arbor's food co-ops were "small, tight-knit groups with a consensus on the importance of natural foods and the principles of a democratic workplace. Now efficiency has become paramount." Collective management and decision making is giving way to more traditional management practices. Volunteerism is down as workers worry about survival for themselves and their workplaces.

The small Soy Deli on East Ann Street took the expansionist plunge two years ago. Last year they lost about $20,000. After much soul searching, the collective took action, broke even during the first half of this year and managed to repay some old debts. Production is up to 6,000 to 7,000 lb/week of tofu. Steve Fiering, who was a founder of the Soy Plant six years ago, explains that he was in favor of expansion. He notes that the company knows how to make tofu but not how to make money.

The Michigan Federation of Co-ops, based in Ann Arbor, sells $9 million a year wholesale to its 450 member stores and "buying clubs." Co-ops also flourished in the 1930s. Address: News staff reporter.

5754. Wittels, Beatrice. 1982. World Food Day Symposium & Soyfoods Supper (Poster). Philadelphia, Pennsylvania: CSC. 1 p. Oct. 15. 11 x 14 inches.
• ***Summary:*** This poster, printed with black ink on orange-yellow paper, announces the 2ns annual "World Food Day Symposium & Soyfoods Supper," at Friends Meeting House, 4th & Arch, Philadelphia.

"Come meet, hear, see a slide show by Richard Leviton, Director of SANA (Soyfoods Association of North America), 'The World of Soy.'" Beatrice Wittels, founder and director of CSC, will speak about "Alternative Proteins." Address: Cooking for Survival Consciousness, Elkins, Pennsylvania.

5755. Leviton, Richard. 1982. Re: Traveling (Color postcard). Letter to William and Akiko Shurtleff at Soyfoods Center, Oct. 24. 1 p. Handwritten.
• ***Summary:*** "Hello–I should become a truck driver. Then I'd get paid more for this driving–3,200 miles so far but, no speeding tickets. The speeches are well received, & the tofu companies put together good programs but I'm not selling any books or mags [magazines] which means I will only break even for the whole exertion. I'm disappointed because I'm not really enjoying the whole experience. Oh well. Best wishes, Ira." Address: 100 Heath Rd., Colrain, Massachusetts 01340.

5756. Buchwald, Art. 1982. PAC-ing the House: Capitol punishment. *Washington Post.* Oct. 26.
• ***Summary:*** Buchwald, observing the man in the airplane next to him arranging $100 bills in neat piles, asks what business he is in. The man replies that he is with the Tofu Growers Political Action Committee (TOF-PAC) and he has to get out to congressional supporters before election day. His PAC "supports people who favor a strong American bean-curd policy, and we also try to defeat those whose voting record on tofu is a national disgrace."

5757. Fiske, Doug. 1982. Re: Second proposal for a publicity program for soyfoods. Letter to William Shurtleff at Soyfoods Center, Oct. 26. 2 p. Typed, with signature on letterhead.
• ***Summary:*** Doug is shocked to find that many food professional have never even heard to tofu. "Each soyfoods manufacturer or interested party would contribute a flat monthly fee of $50 for the first soyfood category publicity plus $10 per month for each additional category to be publicized." Address: Nature's Touch Soyfoods, P.O. Box 511, Encinitas, California 92024. Phone: (714) 753-5979.

5758. Appropriate Foods, Inc. 1982. Eat Appropriately! [Catalog and price list]. P.O. Box 57, Sea Cliff, NY 11579.
• ***Summary:*** The following lines are carried and distributed: Tempeh Brothers, No Cow (Soymilk), Nasoya, The Bridge (Amazake, Seitan, Tofu Salad), Grainaissance (mochi), Island Sprouts (alfalfa), Sunshine Soyfoods (soysage), Sister Shorter (tofu spinach pie).

Note: This is the earliest document seen (Sept. 2011) that mentions Tempeh Brothers or Appropriate Foods. Address: Sea Cliff, New York.

5759. Asunaro Eastern Studies Institute. 1982. Natural foods preparation with Sensei Noboru Muramoto (Poster). P.O. Box 2546, Escondido, CA 92025. 1 p.
• ***Summary:*** Noboru Muramoto, author of *Healing Ourselves,* will be presenting a series of 2 week classes on natural foods preparation at the Asunaro Institute in rural southern California. Students will participate in the preparation of miso, tamari, koji, amasake, mochi, tofu, and tekka. Address: Escondido, California.

5760. Barrett, Clare. ed. 1982. The Hilton Hotel's gourmet tofu dishes. *Vegetarian Times.* Oct. p. 32-36. [1 ref]
• ***Summary:*** Dieter Hannig, Director of Food Research for Hilton International Hotels, has compiled 49 recipes on microfiche. Fourteen of them are given here; color photos show ten. A black-and-white photo shows Hannig, standing in his kitchen with a white top-hat and camera in hand. Address: Chicago, Illinois.

5761. **Product Name:** Strawberry Diet DeLite (Low Calorie Tofu Pudding with Saccharin Sweetener).
Manufacturer's Name: Brightsong Light Foods.
Manufacturer's Address: 100-A Poultry St. (P.O. Box 2536), Petaluma, CA 94953.
Date of Introduction: 1982. October.
Ingredients: Tofu, strawberries, saccharin, lecithin.
Wt/Vol., Packaging, Price: 8 oz cup.
How Stored: Refrigerated.
New Product–Documentation: Letter from Richard Rose. 1987. Aug. 29. Developed for Diet Centers, not for natural foods market.

5762. **Product Name:** Cottage Salad (Diet Center Formulation; Non-Dairy Tofu Cottage Cheese).
Manufacturer's Name: Brightsong Light Foods.
Manufacturer's Address: 100-A Poultry St. (P.O. Box 2536), Petaluma, CA 94953.
Date of Introduction: 1982. October.
Ingredients: Brightsong tofu, soy oil, onion, dill, sea salt, citric acid.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Refrigerated.
New Product–Documentation: Label. 1982. 3 inch diameter. Blue on white. Letter from Richard Rose. 1987. Sept. 19. Diet Center is a chain of 2,000 clinics in the U.S. and Canada, somewhat like Weight Watchers. The ingredients differed from regular tofu Cottage Salad to meet

Diet Center's specifications. Brightsong sold both products, but to different markets.

5763. **Product Name:** Missing-Egg Salad (Diet Center Formulation).
Manufacturer's Name: Brightsong Light Foods.
Manufacturer's Address: 100-A Poultry St. (P.O. Box 2536), Petaluma, CA 94953.
Date of Introduction: 1982. October.
Ingredients: Organic Brightsong tofu, soy oil, soy sauce, mustard, spices, citric acid, salt.
Wt/Vol., Packaging, Price: 8 oz in plastic cup.
How Stored: Refrigerated.
New Product–Documentation: Label. 1982, undated. 3 inch diameter. Orange on white. "Non-dairy Salad or Dip. Contains no eggs." Letter from Richard Rose. 1987. Sept. 19. Diet Center is a chain of 2,000 clinics in the U.S. and Canada, somewhat like Weight Watchers. The ingredients differed from regular Missing-Egg Tofu Salad in that the honey and pickles were removed. Brightsong sold both products, but to different markets.

5764. Ewing, Sandra. 1982. Tofu: The perfect source of protein. *Vegetarian Times.* Oct. p. 18-19.
• ***Summary:*** Discusses use of tofu as a baby food. The basic recipe is 2 T. tofu mixed with 2 T. pureed fruit or vegetables.

5765. Hagler, Louise. 1982. Tofu cookery. Summertown, Tennessee: The Book Publishing Co. 160 p. Oct. Illust. (color). Index. 29 cm.
• ***Summary:*** Contents. Introduction. Recipes–1. Dips and spreads. 2. Soups. 3. Salads. 4. Salad dressings and sauces. 5. Main dishes. 6. Side dishes. 7. Breads. 8. Cookies and bars. 9. Desserts. 10. Making tofu at home.

This vegan cookbook contains no recipes calling for eggs or dairy products. Note: Robert Holzapfel of The Book Publishing Co. says (Jan. 1991) that this book has sold about 205,000 copies. Sales during the last few years have averaged about 18,000 copies/year. Sales rose substantially in 1989 and 1990, largely because of the rapid increase of interest in vegetarianism in America, especially among young people. A new edition will be out in Feb. 1991. Address: Summertown, Tennessee.

5766. Hoesli, Annemarie. 1982. Tofu [Tofu]. *Oeko Journal* (*Switzerland*). Oct. p. 10-13. [2 ref. Ger]
Address: Sojalade, Dorfplatz, CH-8913 Ottenbach ZH, Switzerland. Phone: 017-690-349.

5767. Hundley, Kris. 1982. Update: Sales quadrupled at [New England] Soy Dairy. *In Business.* Sept/Oct. p. 55. [1 ref]
• ***Summary:*** Production has reached 38,000 pounds of tofu a week and 1981 net sales were over $1.25 million. 35 full-time employees.

5768. Leviton, Richard. 1982. The Perriers of soy foods: With large initial capital investments and national marketing plans, these companies are positioned for rapid growth. *In Business.* Sept/Oct. p. 53-56.
• ***Summary:*** Discusses three soyfoods companies: Legume, Soyfoods Unlimited, and American Miso Co. "While most companies in the industry operate on local or regional levels at best, these three progressive firms uphold nationwide market goals, have tied up large amounts of capital, and nurture vigorous plans to capture the American mainstream market. Legume, located in Caldwell, New Jersey, and run by Gary and Chandri Barat, and Robert Shapiro, "distributes an impressive line of tastefully packaged, prepared convenience soyfoods in 40 states. Legume practically invented the product category, which includes tofu pizza, lasagna, ravioli, egg-plant Parmesan, tofu-vegetable pot pies, muffins, cakes, and tofu cheese-cakes. Currently the company, with weekly sales of $8,000, contracts out all its food production, thereby allowing its lean staff of three to concentrate on sales and marketing. The Barats expect 1982 sales to top $1 million with three employees, and $3 million by 1983 with only five workers." A good history of Legume begins: "Gary and Chandri Barat first caught wind of the swelling enthusiasm for soy products in July, 1979 at the Second Soycrafters Conference in Amherst, Massachusetts. They gathered over 500 pages of industry documentation and while uncertain of a specific product line, they were convinced that soyfoods, particularly prepared convenience offerings, were to be *the growth* area of the general food industry. Yet in their search for venture capital, holding only their prospectus as bait, they experienced difficulty... 'Let's taste the product,' potential investors demanded.

"The Barats lacked a track record in the food industry,... But today, investment money firmly in hand, Gary reflects: 'When raising money, make it a learning experience.' Ask a lot of questions. Find out why people say no, listen carefully, study their answers, then make adjustments to address their concerns. Then ask again. Never take the rejections personally. Developing a business plan is an ongoing venture; it never stops and never ends. In the summer of 1980 the Barats took their fledgling concept to the streets of New York City, where they served their new line of prepared tofu products to a series of street fairs. "They served over 10,00 meals of tempeh chili, tofu chocolate mousse, and tofu cutlets, and studied faces carefully for reactions. Buoyed by the positive response," they added tofu muffins, then vegetarian quiche to their line. The "R&D Taste Testing" at the street fairs eventually secured them $50,000 in capital and $100,00 in loans. They still managed to hang on to 51% ownership in their new company. They did careful market research using the influential SAMI (Standard Area Marketing Index) data, read reports, and interviewed

© Copyright Soyinfo Center 2013

industry leaders. They began to promote frozen tofu entrees but the profit margins were too slim. Their latest 1982 plan "calls for introducing six or eight boxed, frozen tofu entrees for national distribution."

Valerie, John and Gary Robertson launched Soyfoods Unlimited in San Leandro, California in Feb. 1981. They focus on making and marketing selling. A big break came when New England Soy Dairy in Massachusetts bid to distribute 2,700 lb/month of their tempeh burgers. Once a week Valerie delivers the cases of frozen tempeh to the San Francisco airport.

John and Jan Belleme started the American Miso Co. in Aug. 1981 in Rutherfordton, North Carolina, after a $300,000 investment in plant and equipment. They hope to produce 500,000 lb/year of miso. They did an 8-month apprenticeship in Japan with a master misomaker.

Photos (by Richard Leviton) show: (1) Valerie Robertson of Soyfoods Unlimited with a tray of freshly-made tempeh. (2) John, Valerie, and Gary Robertson; the two men are wearing masks. (3) John Belleme of American Miso Co. empties hot, steaming soybeans. Address: Colrain, Massachusetts.

5769. Leviton, Richard. 1982. The Bridge: Bringing traditional Eastern foods to middle America. *East West Journal.* Oct. p. 22, 24-27.
• ***Summary:*** Founded in March 1981 by Roberto Marrocchesi and Bill Spear, macrobiotic friends, this company in Middletown, Connecticut, makes soyfoods (incl. tofu), seitan, amasake, and mochi. Includes a good history of the company and of its founders.

Photos show (clockwise from bottom right): (1) Jordan Stearn, Bill Spear, and Roberto Marrocchesi in their Middletown shop. (2) Roberto stirring boiling soymilk in a 60-gallon kettle. (3) Roberto folding forming box cloths over tofu curds before they are pressed. (4) Roberto cutting the fresh tofu. (5) Jordan Stearn packaging tofu salad. Address: 100 Heath Rd., Colrain, Massachusetts 01340.

5770. **Product Name:** Tofu Spinach Pie.
Manufacturer's Name: Sister Shorter.
Manufacturer's Address: P.O. Box 207, Livingston, NY 12541. Phone: 518-851-2007.
Date of Introduction: 1982. October.
New Product–Documentation: Appropriate Foods. 1982. Fall catalog. Made by Rick & Gwen Shorter. Interview with Robert Werz of Appropriate Foods. 1987 Oct. 16. They are still making the pie.

5771. *Soyanews* (*Sri Lanka*). 1982. Tofu dishes from Jaffna. 5(2):2. Oct.
• ***Summary:*** "The following recipes are from Mr. K.S. Kumaraswamy of Jaffna. Mr. Kumaraswamy began making tofu in 1977 in Jaffna at a time when few people here had heard about tofu" (see p. 4-5). The recipes are: Tofu stew (with 1 lb bean curd). Bean curd achcharu. Bean curd cutlets. For tips for making god tofu are given.

A photo shows a Chinese earthenware vessel used by Mr. Kumaraswamy in tofu making.

5772. *Soyanews* (*Sri Lanka*). 1982. Jaffna's first tofu shop. 5(2):4-7. Oct.
• ***Summary:*** "The credit for opening Sri Lanka's first tofu shop should perhaps go to Mr. K.S. Kumaraswamy of 235, Navalar Road, Jaffna. Sixty-three year old Mr. Kumaraswamy opened his tofu ship in 1977... but within two months the venture folded up. He was born in Singapore and raised in Sri Lanka. In 1968 he returned to Singapore on a visit. Since he was a vegetarian, his sister prepared a tofu dish for him, but he was reluctant to eat a dish that looked so much like meat. After many assurances that the dish contained no animal products, "he agreed to taste tofu for the first time in his life. What he ate was a revelation, so much so that he decided to take a closer look at the process of tofu-making itself. He visited many tofu shops in Singapore and she saw the equipment for grinding the soaked beans. He also discovered Tau fu fah," the sweetened curds.

A man with excellent mechanical skills, he believed that he could make the necessary equipment in Sri Lanka. All that he needed were the grinding stones.

"On a second visit to Singapore in 1975 he selected the equipment he needed and in 1976 began his experiments of making tofu in Sri Lanka." Although soyabeans were not readily available at that time, he did manage to get some locally. "He even found farmers in Jaffna growing soya from whom he obtained some of his requirements.

"All in all he followed the Chinese technique of making tofu, not the cold water method but the hot grind. He built a fireplace about 3½ feet tall with a built-in large pan in which to cook the slurry."

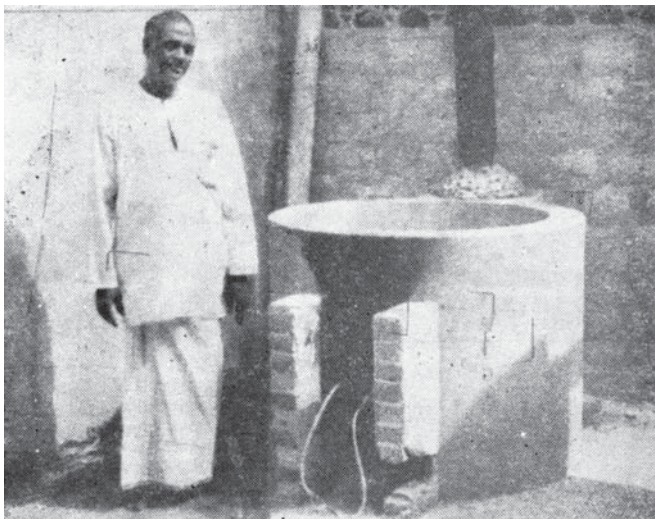
After "the ceremonial opening on August 20, 1977," he began making and selling his first tofu. But he soon faced the harsh realities of trying to market an unfamiliar food.

Nonetheless, he found a hard core of consumers who encouraged him–but not enough to justify his efforts at running a power mill. He tried to educate his customers by issuing printed recipes (see p. 3) along with his product. But after 2-3 months he was forced to shut down his shop. At one point there was a faint hope that the business might revive if he sold only soya milk. He got a hotelier in Jaffna town interested in making ice cream from soya milk. The results were exciting but in the end the hotelier said he could buy dairy milk power much cheaper than the soya milk.

"A house he is building for himself has diverted him temporarily from his life-long ambitions. Once that is over he plans to give tofu-making another try."

Photos show: (1) "Mr. Kumaraswamy standing beside the fireplace he built with mud. A pan for cooking

© Copyright Soyinfo Center 2013



the slurry is built into the fireplace. (2) Some of the cane [bamboo] utensils used in Singapore for tofu-making... The finely woven baskets are used to remove the whey without disturbing the curds." (3) "The machine built by Mr. Kumaraswamy for grinding soaked soyabeans. Only the grinding stones are imported." The rest of the equipment was made locally.

5773. **Product Name:** Tofu.
Manufacturer's Name: SoySource Tofu Shop.
Manufacturer's Address: 79 Mandeville St., Riccarton, Christchurch, New Zealand.
Date of Introduction: 1982. October.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Jan. 22. Owner: Jon Judson. Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Address given as 917-B Colombo St., Christchurch, New Zealand. Letter from Alan Tam. 1986. Nov. 18. "On a recent visit to Christchurch, I found that the previous owner of this company had sold out; the address and names of the new owners are not known. They make about 500 lb/week of tofu."

Letter (fax) from Jan Batchelar of Tremanco / The Soy Works. 1993. Feb. 3. "Soysource was sold and the business changed its name to Pacific Foods. The address is 377 Selwyn Street, Christchurch, New Zealand. Phone: 643-365-5268."

Talk with Elizabeth Chalmers of The Organic Soy Co., Auckland, New Zealand. 2007. Jan. 15. She, Greg, and Rick Chambers taught Jon how to make tofu. He came to Auckland, worked in the factory, and stayed with Greg. Elizabeth thinks Jon started actually his own company after Oct. 1982.

5774. **Product Name:** Tofu, Soymilk, Soysage, Seasoned Tofu, Falafel Made with Okara, Granola with Okara.
Manufacturer's Name: Springfield Community Foods.
Manufacturer's Address: 300 N. Waverly, Springfield, MO 65802. Phone: 417-866-1337.
Date of Introduction: 1982. October.
New Product–Documentation: Letter from Jim Hawkins. 1982. Oct. 12. Nice letterhead. "Home Town Tempeh is one of several businesses operating under one roof as Springfield Community Foods. The tofu shop in association with Springfield Community Foods makes tofu, soymilk, soysage & seasoned tofu. Other products available at the store include falafel made with okara, granola with okara, tempeh & tofu sandwiches (in pocket bread made by our in-house baker). The deli section is evolving, and other soy products are in the works, including a tofu dressing/dip and tempeh salad."

Soyfoods Center Computerized Mailing List. 1983. June 20. Muckfoot Farms and Springfield Community Tofu are both listed as tofu manufacturers at 300 N. Waverly, Springfield, Missouri 65802. Phone: 417-866-1337. Owner of Muckfield is Paul Day.

5775. *Sunset* (*Menlo Park, California*). 1982. It's a tofu burger open-faced. 169:180. Oct.
• ***Summary:*** The recipe, which is accompanied by a photo, was submitted by R.K. of Soquel, California.

5776. **Product Name:** Tree of Life Baked Tofu, and Savory Yeast Baked Tofu.
Manufacturer's Name: Tree of Life, Inc. (Distributor).
Manufacturer's Address: St. Augustine, FL 32084.
Date of Introduction: 1982. October.
Ingredients: Organically grown soybeans, purified water, natural Nigari, soy sauce and spices.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Refrigerated.
New Product–Documentation: Label. 5 by 4.5 inches. Plastic. Brown, yellow, green and white. Picture of tree (may be logo). "We appreciate your confidence in choosing this Tree of Life product. To ensure your satisfaction we have made certain it contains the freshest, most natural ingredients available." Talk with Donna Detoro at Tree of Life. 1988. Sept. 23. This product was introduced in Oct. 1982.

• ***Summary:*** About 160 companies are now making tofu in the USA.

5780. Norvell, Candyce. 1982. Can this be the stuff of a dietary revolution? *Ann Arbor News* (*Michigan*). Nov. 3. p. E-1. [1 ref]
• ***Summary:*** A superbly written article about the first five years of the soyfoods revolution in America, and The Soy Plant in Ann Arbor, Michigan, including much interesting dialogue with Steve Fiering, a founder of The Soy Plant. Photos by Larry E. Wright show: (1) A hand in a sanitary plastic glove holding a cube of tofu. (2) Soymilk curds. (3) Metal lever presses pressing the curds into large blocks of tofu. (4) Cutting the blocks into cakes for packaging. (5) Packaging the cakes of tofu in plastic tubs. Address: News special writer, Ann Arbor, Michigan.

5781. Furth-Kuby, Wolfgang. 1982. Re: New developments with tofu and soyfoods in Europe. Letter to William Shurtleff at Soyfoods Center, Nov. 4. 2 p. Typed, with signature on letterhead. [Eng]
• ***Summary:*** "The term 'Tofurei' was invented by Gabriele Furth-Kuby. We thought it would be nice to have a similar name as 'Backerei' for bakery, 'Metzgerei' for butchery, etc. Consequently a miso shop would be called 'Misorei' or a soy foods shop 'Sojarei' or a Tempeh shop 'Tempehrei.'

To date, the German edition of *The Book of Tofu* has sold 2,203 copies and *The Book of Miso* 3,040 copies. There are two new books about soyfoods out in German. One is *Kochen mit Tofu* (originally published by Autumn Press), the other *Soja Total* the new Farm cookbook. Sojaquelle has a full-page ad in each of them. Advertising our Tofu-kit we will get the addresses of people interested in soyfoods and then they will also buy our soybooks.

Wolfgang will see Herrn Wolf in Vienna [Austria] "within the next two weeks and then will get copies of the two soybooks [that Shurtleff requested]. As soon as I have them I will send them to you."

In December the German TV will broadcast a six-minute film about Tofu. Gabriele's brother has done the film and we expect a breakthrough with it."

Note: Sojaquelle became inactive in 1986.

Letter from Bernd Drosihn of Viana. 1995. April 19. Wolfgang Furth-Kuby's new address is: Nelkenstrasse 11, 83125 Eggstätt, Germany. Phone: 08056 240. Fax: 836. "Wolfgang is now working as a consultant mostly for natural food stores and seems to be a little bit disappointed by the soyfoods business. He wants to get in contact with you again." Address: President Sojaquelle and Ahorn Verlag, Weidgarten 2, D-8091 Soyen, West Germany. Phone: 08071-4220.

5782. Hughes Markets; El Rancho Markets. 1982. Here–Gift giving's easy with certificates (Ad). *Los Angeles Times.* Nov. 4. p. K27.
• ***Summary:*** The section titled "Foods of the Orient–in our fresh produce dept." includes: "Fresh noodles... Kokuho rice... Morinaga Tofu–10.5 oz. box Soy Bean Curd–45¢. Ramen noodles. Dried mushrooms (shiitake). Pickled plum (aka umezuke).

Note: This is the earliest English-language document seen (Dec. 2006) that uses the word "umezuke" or the term "aka umezuke" (literally "red plums pickled") to refer umeboshi salt plums.

5783. Nelissen, Tomas. 1982. Re: Jakso and soyfoods in the Netherlands. Letter to William Shurtleff at Soyfoods Center, Nov. 9. 2 p. Typed, with signature on letterhead.
• ***Summary:*** "Maybe you still remember me from the time we were in Japan; once we met at Kichijoji station, next to Mitaka station. You tasted my genmai [brown rice] miso at a coffee-bar (next door).

"At this moment I am living in Holland with my wife Yvonne and two children. We set up a farm called Jakso. The whole idea is about becoming self-sufficient from the 30 hectares of land (including 6 hectares of fruit trees), a sourdough bakery, a soyfoods workshop, a futon workshop and educational activities.

"For the three workshops we "cut" the big barn into two halves and made a third floor. We built a very nice wood-burning bakery which produces all kinds of bread, cookies and savories. The soyfoods workshop makes tempeh and tofu, as well as seitan. Year-round we produce an average of about 1,500 pieces of tempeh a week at 210 grams each, about 50 kg of tofu a day and a little less than 100 kg of seitan.

"We distribute our products all over Holland... in a 100 km circle around the farm. Our future products will be miso, shoyu, amasake and mushrooms. These are the products we studied in Japan for about 4 years...

"There are 12 people working on the farm (plus 7 children)... The meals are on a macrobiotic base." Address: Director, Jakso, St. Natuurlijke Land- en Tuinbouw, Voorne 13, 6624 KL Heerewarden, Netherlands. Phone: 08877-2189.

5784. Fiske, Doug. 1982. Re: Juel Andersen has put together an organization proposal. Letter to William Shurtleff at Soyfoods Center, Nov. 14. 2 p. Handwritten, with signature on letterhead.
• ***Summary:*** "Hello Bill, If you haven't heard, Juel has put together an organization proposal and is calling for a meeting in San Jose in January. I read it and responded that I thought she should send a one-page letter to all prospects outlining the organization and how it would benefit them and soliciting pledges in $ that would be contributed should such

© Copyright Soyinfo Center 2013

an approved organization and plan come about. Depending upon response, do whatever is appropriate. Since whatever she does conflicts with my press release program (which, incidentally, I want to call Soyfoods Data), I think I'll hold off pending her action.

"There seems to be conflict between you and her, I don't know if you communicate, hence this letter." Address: Nature's Touch Soyfoods, P.O. Box 511, Encinitas, California 92024. Phone: (714) 753-5979.

5785. *Toyo Shinpo* (*Soyfoods News*). 1982. Seibu Shokuhin-kan ni okeru... [In newly opened Tokyo food department store there are two tofu retail shops]. Nov. 21. [Jap]
• ***Summary:*** In the newly opened Seibu Food Department Store (Ikebukuro, Tokyo) there are two tofu retail shops. One is "Homemade Tofu Shop Asahi" (*Tezukuri Tofu no Mise Asahi*) where Japanese soybeans and natural nigari are used to make fresh tofu in the department store. The price, 180 yen per cake, is high.

The other one is Tanaka Tsune; they bring tofu from Kyoto every morning. The price, 190 yen per cake, is also high. Yet both are selling very well.

5786. Parker, Paula. 1982. San Diego vegetarians celebrate the Soy of Cooking with the unturkey. *Los Angeles Times.* Nov. 25. p. SD_A1.
• ***Summary:*** The Prophet International Vegetarian Restaurant, on University Ave. in San Diego is offering a "living Thanksgiving" today, with a choice of three meatless entrees, says owner Marianne (Makeda) Cheatom. One features a "soy turkey," with cornbread dressing and cranberry relish. Another is built around Wham (a meatless ham made of soy), covered with pineapple glaze and served with raisin sauce. Cheatom (who insists people can't tell the difference between her soybean turkey and the real thing) wonders why should have to kill to express thankfulness. "Everything's centered around this dead thing," she says.

The Thanksgiving favorite of Sandy Katz, a waitress at Kung Food vegetarian restaurant in Hillcrest, is "'tofu turkey,' a blend of soybean curd, nuts, vegetables, and breadcrumbs."

5787. Aihara, Herman. 1982. History of work with macrobiotics and Chico-San. Part II (Interview). Conducted by William Shurtleff of Soyfoods Center, Nov. 29. 5 p. transcript.
• ***Summary:*** Continued: Chico-San imported their first Japanese foods from Herman personally. At that time, there was no Muso and no Nippon CI. Ohsawa Japan (which started in about 1965) was the trading / export company and Nippon CI was devoted to education. Before Muso was "Three Boys," the "Three L" (*San-L*) company. Ohsawa told them to take charge of exports. Then Mr. Okada took over from them. Osaka was PR and education. "Three L" (which started in about 1962 in Osaka) was whom Chico-San was importing from. George Ohsawa kept a careful watch over what was being exported from Japan. Chico-San later imported from both Muso (Osaka) and Ohsawa Japan (Tokyo). Note: Did Ohsawa have two trading companies? If so, why?

The first edition of *The Book of Judgment* was printed in Japan in about 1956, then revised in 1966. There is no publication date in the book. This book came after *Zen Macrobiotics.* It is actually *The Philosophy of Oriental Medicine* (subtitled The Book of Judgment), probably first written in French.

Herman has just started writing a biography of Ohsawa, but he is too busy, so it will not be finished for a long time.

The Ohsawa Foundation in Paris was started by 1956 by George Ohsawa. The Ohsawa Foundation in Tokyo started before 1960. The Ohsawa Foundation in Los Angeles was started in 1965 by Lou Oles, an older Jewish trumpet player. The Ohsawa Foundation of New York was founded in 1961 by Michio Kushi and Irma Paule. The name "GOMF" was coined in 1970.

Herman has a green 8½ by 11 inch edition of *Zen Macrobiotics.* Herman says the date was about 1960. It shows that the Ohsawa Foundation then existed in New York, Paris, Brussels, and Tokyo. It also contains lots of recipes. I copied some pages. Copyright date of the fifth edition was 1966, Ignoramus Press, the Ohsawa Foundation, 1424 N. Curson Ave., Los Angeles.

Michio Kushi was Ohsawa's senior student in the sense that he came to America first. I should omit the concept that Herman was Ohsawa's closest associate. Herman and Michio simply have different styles. Michio has broad appeal; he has started a mass movement, and is more businesslike. Herman appeals to a small group, deeply; he works more with individual students.

Lou and Shayne Oles got involved with macrobiotics during the second summer camp, in 1961. They traveled with the group from New York to Chico. He was a famous trumpet player, worked with Benny Goodman. In California he emphasized publishing more than his trumpet. His first publication was titled *Spiral;* 1-2 issues were published. Then *Macrobiotic Monthly.* After Beth Ann Simon's death, Chico-San was separated from educational work. Lou Oles went to Los Angeles and that year established the Ohsawa Foundation; he did education and publication. He published three books: *Zen Macrobiotics, Book of Judgment,* and *Guidebook for Living.* Jacques DeLangre helped him. Lou died in 1967 of cancer. He got depressed when George Ohsawa died; he started drinking coffee, which may have activated his cancer growth. Shayne continued his work. Lima asked Herman to be president, so he traveled to Los Angeles once a month. In those days they sold lots of *Zen Cookery* books. The Ohsawa Foundation in Los Angeles closed in about 1970.

© Copyright Soyinfo Center 2013

Yes, Ohsawa was age 72 when he died. He died April 24 (Japan date) in Japan.

The spirallic multidimensional scale from yin to yang was Peter Milford's idea, not Herman's. It is generally a linear scale.

Infinity Foods, founded by Howard Rower, is still in existence. Herman thinks they started in about 1962, and they imported foods from Japan.

Chico-San established only one organic grower–the Lundbergs for rice. The controversy was complicated. The Lundbergs and Bob Kennedy of Chico-San made a contract. Eventually there was a lawsuit between Chico-San and Lundberg [but it was resolved before it went to court]. Herman thinks Lundberg sued Bob Kennedy.

In 1963 Herman went on the lecture circuit with Bob Kennedy as they tried to educate people about the macrobiotic foods that Chico-San was selling.

The first summer camp without Ohsawa was 1967 (or perhaps 1968).

Macromuse is published in Washington, DC, by Michael Rosoff. It started in 1981.

Chico-San was founded in Jan. 1962. In Nov. 1962 Chico-San's first location (a retail store) opened, downstairs with hearing aid company. It moved upstairs to a different location and opened on 6 March 1962; they had an open house.

In 1973 the Aiharas established the Vega Institute, a residential program for macrobiotic studies in San Francisco. Then in 1974, they moved the Vega Institute and the George Ohsawa Macrobiotic Foundation to Oroville, a town southeast of Chico, where the Aiharas continued their work, together with their students. Herman and Cornellia Aihara moved to Oroville instead of Chico because it was more rural and because Peter Milbury, a high school teacher in Oroville, knew of some good land. The Ohsawa Foundation in San Francisco bought the land, and then they moved. Herman owns the Vega Institute on Oak Street.

Junsei Yamazaki came to the USA in 1963. Ohsawa told him to help Americans grow brown rice. First he tried in New York, but there was not enough sun. He originally graduated with a degree in fermentation from a major Japanese university, but he then became a rice farmer. Then in New York City he went to work with Michio at Musubi near Takashimaya–for little pay. The Chico group invited him to Chico. He worked on the rice cake machine–again poor pay. Like Herman he also worked with orchids.

In 1971 Herman invited Noboru Muramoto to be on his lecture trip. His first guest was Alcan Yamaguchi in 1970. Herman read Muramoto's articles in a Japanese magazine. He had family problems in Japan and was happy to stay here. Herman was his guarantor, and he became a permanent resident.

Chico-San began baking in March 1962 in an upstairs store; Herman was the first baker.

Herman talked with Michio Kushi this summer. They have a friendly relationship but both are very busy.

Junsei Yamazaki's plans with Chico-San are not clear; he may end up working on his own.

A good Japanese-language biography of George Ohsawa is *Kakumei-ji*, by Matsumoto Ichiro; he interviewed Lima Ohsawa.

Herman likes the term "a macrobiotic" better than "a macro" or "a macrobiotic student / follower."

Cornellia arrived in the U.S. in 1955.

The Ohsawa Foundation did not move from Chico to Los Angeles; it never existed in Chico–only in Los Angeles.

Overview of macrobiotic contribution. Typical Americans overemphasize the importance of protein (even though nutritionists may not agree). Most people who stop eating meat start consuming more dairy products. Macrobiotics avoid dairy products and go straight to grains plus legumes–with little mention of protein.

Mari Metz has a good color photo of Herman and Cornellia together.

Erewhon was hurt by high interest rates and inflation.

In 1960 the handbound book Zen Macrobiotics was made in Herman's apartment in New York City. In it Ohsawa used the word "syoyu" [shoyu]. He changed to tamari because when he introduced soy sauce to Europe he initially called it "shoyu." He then gave exclusive distribution rights to a European to distribute Ohsawa's selected shoyu. The man called it "Ohsawa Shoyu," but then in about 1960-61 he started importing low-quality shoyu from Japan and selling it under the same brand name. Ohsawa could do nothing to stop him. That was when Ohsawa started using the word "tamari" to refer to natural shoyu. Herman heard this story directly from George Ohsawa–whose name in Japanese is pronounced OH-sawa.

Herman says a healthy person may eat 12-16 ounces of tofu a week, but it is not recommended for cancer patients who need a diet that is more yang.

Herman came from Kyushu, moved to Tokyo at age 9. He likes natto. Address: Oroville, California.

5788. Aihara, Cornellia. 1982. Macrobiotic kitchen: Key to good health. Tokyo: Japan Publications, Inc. 140 p. Illust. Index. 26 cm.
• ***Summary:*** This book was originally published under the title *The Chico-san Cookbook* (1972). This completely revised and enlarged edition was published in Nov. 1982. Address: Chico, California.

5789. Barber, Linda. 1982. Tofu sampler. Menomonie, Wisconsin: University of Wisconsin-Stout Print Shop. 24 p. Nov. 22 cm. [7 ref]
• ***Summary:*** A saddle-stitched (stapled) booklet of creative American-style tofu recipes with an orange cover and black lettering. Contents: What is this thing called tofu?

© Copyright Soyinfo Center 2013

Tofu mayonnaise. Deviled tofu salad. Tofu mayo dip. Tofu cheese rolls. Tofu burgers. Chinese steamed buns with tofu. Nail soup (with heart-warming story about the hobo who came for dinner). Tofu pancakes. Tofu quiche. Easy pie crust. Tofu jumbles. Tropical tea bread. Dark mystery cake. Chocolate tofu creme. Tofu ambrosia pudding. Banana cream pudding or pie filling. Tofu cheesecake. Bread crumb crust. Tofu carrot cake. Tofu nog. Tofu peach frozen dessert. One more idea [about a beautiful geisha in Japan who used tofu externally as an aid to beauty]. A sampler of soyfood books [cites 7 books].

E-mail from Linda Barber Pike in reply to questions after she sent booklet to Soyinfo Center. 2012. May 11. "The booklet was developed for a presentation I gave to the Vocational, Technical and Adult Education meeting in Wausau, Wisconsin, November 19th, 1982. The title of my workshop was 'Creativity with Tofu... The Food of the Future,'

"The first printing was done by the print staff at the University of Wisconsin-Stout, Menomonie, Wisconsin. About 30 booklets were printed. I was a grad student earning a Masters degree in Vocational and Adult Education. I completed the degree in 1983. I used the booklet as a take home for the participants. There were about 30 home economics teachers there.

The second printing was done about 16 years later; I was married and a teacher. I used it for my students who were enrolled in the foreign foods class, Family Consumer Science Department, Carmel High School, Carmel, Indiana, 1998. The reason the pages are out of order in this booklet, second printing (1998) is that the student print shop at Carmel High School messed up... I had about 35 students enrolled in this class. About 40 booklets were printed in second printing. This booklet is very typical of what we used to make for our students for classroom use and hopefully, the participants in both situations would take the booklet home and use the recipes! Address: Menomonie, Wisconsin.

5790. **Product Name:** Tofu Pumpkin Puddin' (Non-Dairy. Later renamed Pumpkin Pie and Pumpkin Puddin' with Tofu).
Manufacturer's Name: Brightsong Light Foods.
Manufacturer's Address: 100-A Poultry St. (P.O. Box 2536), Petaluma, CA 94953.
Date of Introduction: 1982. November.
Ingredients: Pumpkin, tofu, fructose, honey, spices, natural vegetable gums, lecithin.
Wt/Vol., Packaging, Price: 6 oz.
How Stored: Frozen or refrigerated.
New Product–Documentation: Spot in Whole Foods. 1983. Jan. p. 39. "Winter dairy-free treats... Pumpkin Pie4 is egg and dairy free and is made with pumpkin, Brightsong Tofu, honey, vanilla and spices in a graham cracker crust. The pie is pre-baked and ready to eat in a 4 oz. slice." May be frozen and will be available through January 1984.

Spot in Frozen Food Age. 1985. Nov.; Poster. 1986. "Back for the holiday season for the fifth year in a row."

5791. Cohen, Michele. 1982. Local bean makes good: A look at Wildwood Natural Foods. *T&T Natural News* (*San Rafael, California*). Oct/Nov.
• ***Summary:*** When the author visited Wildwood, "Marin's local tofu-making factory in Fairfax, she was given a guided tour by Paul Orbuch, one of the company's four owners. The place was "a flurry of impressively organized activity in an area of less than 1,000 square feet. Paul explained that each morning at 5 A.M. 8 workers arrive and begin the day's preparation of sandwiches, which have become standard favorites of many. The selection includes a brown rice and tofu sandwich, Tofunofish, Avotofu, Tofu-Steak and a Supreme-Bean Tempeh Burger. The Deli line offers hummus, potato salad, tofu-dill salad, tobouli [sic, tabouli, tabbouleh] and tofu-vegetable salad."

"Bill Bramblett, another partner who popped into the office added that the clear structure, right personnel and smooth system are what keep those soybeans cooking."

The author then describes how "20 pounds of organic Midwestern soybeans are alchemically transformed into 40 pounds of tender tofu... The capacity of Wildwood's facilities allows them to manufacture a maximum of 330-340 pounds of tofu per day."

Photos show: Eleven Wildwood employees, around a table with their products. Tom Meyer stirring tofu curds in a large stainless steel barrel. Soybeans soaking and a press.

Note: *T&T Natural News* is published by a two-chain food store in San Rafael, California. The T&T stands for Throckmorton and Thunderstrand.

5792. **Product Name:** Tofu (Momen/Medium Firm), and Agé.
Manufacturer's Name: Fresno Tofu Co.
Manufacturer's Address: 943 E Street, Fresno, CA 93706. Phone: 209-268-1717.
Date of Introduction: 1982. November.
New Product–Documentation: Talk with Brad (Musashi) Kubota, owner. 1990. Nov. 28. He bought this company in Nov. 1982, when it was named Goto Tofu, owned by Nagaki Goto. He started by making the same two tofu products that Mr. Goto had made, as shown above. He put his own logo on the label. All the text was in English, with no Japanese characters. Goto Tofu was formerly named Star Tofu, run by David Goto. David asked his younger brother, Nagaki, to come to America from Japan to help him make tofu. After a while, Nagaki took over the company. David left the business and started farming. Nagaki Goto changed the company name from Star Tofu to Goto Tofu.

Note: According to Shin Sekai-sha. 1922. *Zaibei Nippon-jin Kan* (*Directory of Japanese in the USA*). p.

© Copyright Soyinfo Center 2013

238, in 1922 Yokota Tofu-ya was located at 940 E Street in Fresno.

Talk with Brad Kubota, who called. 1993. Oct. 12. He leased the business to Terry Sasaki and Debbie Sasaki Diaz for 1 year, but they abandoned it at the last minute, so he is now stuck with it, and trying to sell it again.

5793. Kushi, Michio. 1982. Cancer and heart disease: The macrobiotic approach to degenerative disorders. Tokyo: Japan Publications, Inc. 224 p. Nov. Illust. Index. 26 cm. [50* ref]
• ***Summary:*** Contents: Foreword, by Michio Kushi. Foreword by Edward Esko. 1. The macrobiotic approach, by Michio Kushi. 2. Cancer and diet. 3. Diet and heart disease. 4. Macrobiotics, preventive medicine, and society. 5. Case histories. Appendixes: Food policy recommendations for the United States, by Michio Kushi. East West Foundation–Diet and health related activities, 1972-1982. Bibliography.

Many of the subchapters in this book are written by physicians. For example, William P. Castelli, M.D., contributed a 5-page original article titled "Lessons of the Framingham Heart Study." There are also articles by Robert S. Mendelsohn, M.D., Keith Block, M.D., and Christiane Northrup, M.D. Miso, tempeh, natto, tofu, and soy sauce are all discussed as foods that can be used to help in the prevention and cure of these two major diseases. Address: Brookline, Massachusetts.

5794. Leviton, Richard. 1982. Soyfoods come of age. *Vegetarian Times.* Nov. p. 28-29, 31. [1 ref]
• ***Summary:*** "Soybean based foods made with simple technology are gradually replacing meat in America diets. Originally developed in the Far East, foods like miso, tofu, and tempeh are becoming Westernized as manufacturers add convenient packaging, modern marketing and pizzazz to their soyfoods. Discusses: New tofu marketing techniques, the impact of *The Book of Tofu* by Shurtleff & Aoyagi and other tofu cookbooks, secondary soy products (prepared, convenient soyfoods), Legume, Quong Hop, Garden of Eatin', Edward & Sons, the soy deli, interest in tofu by large American food companies (Del Monte and Kraft).

Includes "A Guide to Soyfoods" the briefly defines miso, soy sauce, texturized soy protein, tofu, and tempeh. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

5795. McGruter, Patricia Gaddis. 1982. Kochen mit Tofu [Cooking with tofu]. Munich, West Germany: Hugendubel. 134 p. Illust. 22 cm. [Ger]
• ***Summary:*** Originally published in the USA as *The Great American Tofu Cookbook* (1979, Autumn Press). A second German printing was apparently done by Otto Maier Verlag in Ravensburg.

Contents: Introduction. How to make tofu at home. Methods of preparing tofu for cooking. Hors d'oeuvres. Soups. Salads. Main dishes. Desserts and tarts (*Torten*). Address: USA.

5796. *Plenty News* (*Summertown, Tennessee*). 1982. Central America. Fall. p. 3.
• ***Summary:*** Refugees continue to pour out of Guatemala and El Salvador. "Recent reports have an estimated 100,000 Guatemalans seeking sanctuary in southern Mexico. These are poor rural people, mostly Indians. Many of them have seen their homes destroyed, crops burned..."

"In a country where 81% of the children under the age of five suffer some degree of malnutrition, soy ice bean is a tasty way to bolster protein and calorie intake in the diet. Thanks to Food Fund donations, we'll be giving away free ice bean to a thousand kids at the town's annual fair this summer."

"Two years since we departed, and through continuing civil war, our intrepid soy dairy near Solola is still operating–producing tofu and ice bean for sale in the market."

Photos show: (1) Many happy Guatemalan boys eating soymilk ice cream from cones as they sit on the grass. (2) A Guatemalan child in a cowboy hat hold two soy ice cream cones.

5797. **Product Name:** American Gold Tofu Mousse Mix [Chocolate, Vanilla, Raspberry, or Lemon].
Manufacturer's Name: Royal American Food Co. (Distributor).
Manufacturer's Address: P.O. Box 1000, Blue Springs, MO 64015.
Date of Introduction: 1982. November.
Ingredients: Isolated soy protein, fructose, partially hydrogenated vegetable oil, corn syrup solids, natural flavors, natural color, propylene glycol monostearate, milk protein, acetylated monoglycerides, mono- and diglycerides.
Wt/Vol., Packaging, Price: 2.4 oz foil packet. Each produces four 2-ounce servings. Retails for $1.40-$1.58.
How Stored: Shelf stable.
Nutrition: Per 2 oz.: Calories 80, protein 4 gm, carbohydrate 8 gm, fat 3 gm.
New Product–Documentation: Label. 1982, dated. "Natural Protein Dessert." Spot in Soyfoods. 1983. Summer. p. 53. "A Questionable Mousse."

5798. **Product Name:** Royal American Instant Tofu Mix. High Protein Mix.
Manufacturer's Name: Royal American Food Co.
Manufacturer's Address: P.O. Box 1000, Blue Springs, MO 64015.
Date of Introduction: 1982. November.
Ingredients: Isolated soy protein, maltodextrin, gluconic acid, partially hydrogenated soybean oil, milk protein, lactose, mono- and diglycerides.

© Copyright Soyinfo Center 2013

Wt/Vol., Packaging, Price: 2.4 oz foil packets, 20 per case. Each makes 16 oz tofu, and retails for $1.25-$1.43.
How Stored: Shelf stable.
New Product–Documentation: Label (foil pouch). 1982, dated. Spot in Soyfoods. 1983. Summer. p. 53. "A Questionable Mousse." Accompanied by a brochure that gives benefits, cost comparisons, instructions for preparation, nutritional analysis, and ingredients.

5799. **Product Name:** Homestyle Natural Tofu "No Eggo" Salad.
Manufacturer's Name: Sonoma Specialty Foods.
Manufacturer's Address: Santa Rosa, CA 95401.
Date of Introduction: 1982. November.
Ingredients: Tofu (organic soybeans, water, nigari), celery, nutritional yeast, soy oil, apple cider vinegar, soy sauce, mustard, natural herbs and spices, sea salt.
Wt/Vol., Packaging, Price: 8 oz plastic deli tub.
How Stored: Refrigerated.
New Product–Documentation: Label. 1983, undated. 3.75 inch diameter. Plastic. Multi-color: Yellow, green, blue, orange, red on white. "Naturally light & delicious. Use on sandwiches, in dips and salads." Spot in Soyfoods. 1983. Summer. p. 55. Interview with Benjamin Hills. 1987. Sept. 7. Presently the company's best seller. Talk with Benjamin Hills. 1988. Feb. 19. Says introduced in Nov. 1982.

5800. **Product Name:** Cottage Salad (Non-Dairy Tofu Cottage Cheese).
Manufacturer's Name: Sonoma Specialty Foods.
Manufacturer's Address: 2317 Bluebell Dr., Santa Rosa, CA 95403.
Date of Introduction: 1982. November.
New Product–Documentation: Spot in Soyfoods. 1983. Summer. p. 55. "Can be used like cottage cheese with fruits or vegetables." 8 oz. or 15 oz. Talk with Benjamin Hills. 1988. Feb. 19. Gave introduction date as 11/82.

5801. *Soyanews* (*Sri Lanka*). 1982. Soya saves the coconut. 5(3):1. Nov.
• ***Summary:*** By mixing two parts coconut milk with one part soya milk, the Welikada Prison has saved 108,000 coconuts in one year. The also relieved the pressure on the kitchen budget. "At present soya milk is supplied to the prison in the form of a paste [soy base]... This paste is then added to curries. Now the Welikada Prison will be able to make it own paste because, with the saving it has made, it has bought two grinding machines from Bean Machines, U.S.A.

"One of these machines will be installed at the Bogambara Prison, Kandy. There are also plans to install more of these machines at the Anuradhapura, Jaffna, and Mahara prisons." Soymilk is considered more healthful than coconut milk. "There have been no complaints from the prisoners regarding any changes of taste.

"The commissioner of prisons also said that with these new machines it will be possible to begin a new prison's industry–making soyafoods. Already he was planning to use the residue left after making soya milk by incorporating it in the bread made in the prison bakery. Tofu also could be made and put on sale.

"There are other soyafoods that can be made and they are now looking into the possibilities of making soya sauce, soya ice cream and soya yogurt.

"The Commissioner of Prisons, Mr. Delgoda, thanked Mrs. Gai Kim, wife of the Resident Representative of the UNDP, Mr. Y.Y. Kim, for suggesting the introduction of soya into the diet of prisoners."

A photo shows a man standing next to "the grinding machine installed at the Welikade Prison. The machine grinds 100 pounds in an hour."

5802. *Soyanews* (*Sri Lanka*). 1982. The day tofu came to Jaffna. 5(3):4-5. Nov.
• ***Summary:*** "Over 250 representatives from the Jaffna Multi-Purpose Co-operative Societies Women's Guilds attended the lecture / demonstrations in soyafood preparations conducted last September by Miss Ellen Jayawardene, Chief Instructress of the Soyafoods Research Centre's Home Level Training Program. The lecture / demonstrations were spread over five days. It was the first time such an intensive training program was held in Jaffna."

Three large photos show lively scenes women making soyafoods. A fourth photo shows a sales transaction following a demonstration at the Veerasingham Hall, Jaffna. Soya flour and dried tempeh were greatly in demand. Tempeh, either fresh or dried, can serve as a substitute for the ever popular *karawadu* [karawala] (dried fish).

5803. *Soyanews* (*Sri Lanka*). 1982. Science: Curd and yogurt–the difference. 5(3):7. Nov.
• ***Summary:*** "These questions on fermented milks are being answered by Dr. B.K. Mital, Associate Professor in the Department of Food Technology" of the G.B. Pant University, Pantnagar, India.

"1. What is the difference between curd and yogurt?"

Ans: "Curd (known in India as Dahi) is a popular fermented milk product of South Asia. It is obtained by lactic fermentation of cow or buffalo milk. The starter used in homes and by vendors for preparation of curd contains a mixed flora [various species] of lactic acid bacteria.

"Yogurt is a popular fermented milk of Western cultures. It is prepared by fermentation of low fat cow milk. A mixed culture of *Streptococcus thermophilus* and *Lactobacillus bulgaricus* is used as starter for preparation of yogurt. A variety of fruits can be added to the yogurt.

"Curd resembles plain yogurt in appearance, taste and consistency. From the consumer view point, it can be termed as a fermented milk analogous to yogurt."

© Copyright Soyinfo Center 2013

"4. Sri Lankan curd made with buffalo milk has won the acclaim of consumers as well as foreigners. Is there anything special about this curd?"

Ans: "Buffalo milk contains more total solids (15-17%) than cow milk (13%). Therefore the gel of curd obtained from buffalo milk is firmer" than that of cow milk and there is less wheying off. The higher fat content of buffalo milk imparts a smooth and creamy texture to the product.

5804. Soyplant (The). 1982. Getting to know your tofu (Leaflet). Ann Arbor, Michigan. 1 p. Undated. 28 cm.
• ***Summary:*** Contents: What is tofu? Taste. Texture. Freshness. Cooking methods. Blending. Freezing. Marinating. Measuring. Draining. Variations: Frozen tofu, dried-frozen tofu, fermented tofu, deep-fried tofu. Address: Ann Arbor, Michigan. Phone: (313) 663-8638.

5805. **Product Name:** [Soyastern Tofu].
Foreign Name: Soyastern Tofu.
Manufacturer's Name: Thomas Karas und Ingeborg Taschen. Renamed Soyastern Naturkost GmbH in Dec. 1985.
Manufacturer's Address: Roonstr. 38, D-5200 Siegburg, West Germany.
Date of Introduction: 1982. November.
Ingredients: Water, organically grown soybeans (*Soyabohnen aus kontrolliertem biologischen Anbau*).
Wt/Vol., Packaging, Price: 300 gm.
How Stored: Refrigerated.
Nutrition: Protein 11.1%, fat 6.7%, carbohydrate 1.3%. 110 cal/100 gm.
New Product–Documentation: Letter from Sjon Welters. 1982. April 16. "Bittersuess (Händelstr. 35, D-5000 Koeln 1, W. Germany) is a macrobiotic store that ordered an almost complete tofu system from us. They will start in the summer, 1982. Attn: Thomas Kasas [sic, Karas]." Note: Thomas Karas writes on 21 April 1989: "Bittersuess is a natural food store in Cologne. It was owned by me from 1979 to 1984 and still exists, but it has nothing to do with soyfoods. It was only the contact address for Soyastern at the very beginning." Soyastern started making tofu in Dec. 1983.

Interview with Bernd Drosihn of Soyastern. 1987. Nov. 30. He is business manager at Soyastern. This product is still the company's best seller, accounting for about 30% of total sales. They make about 4,000 kg/week of all types of tofu products. Label. 1987. 3.5 by 5.5 inches. Yellow, red, and blue. "Traditional nigari tofu, made purely from plants (*rein pflanzlich*). A fresh soy delicacy for the light kitchen. A soy protein preparation (*Eine frische Soyadelikatesse für die leichte Kueche. Soyaeiweiss–Zubereitung*)."

Letter from Harry Whitford of Soyastern. 1987. Dec. 14. Soyastern makes 7,000 to 8,000 kg/week of organic nigari tofu. Germany is probably the most diversified tofu market in Europe. There is every kind of tofu shop imaginable here, from tiny one-man hip handycraft traditional shops with local distribution to middle-sized factories with distribution both domestically and abroad. Nearly all tofu is sold through the Naturkostläden (Natural food stores) and Reformhäuser (Reform Houses or Health food stores). A fair amount is also sold to restaurants and commercial kitchens, and a few supermarkets are beginning to introduce tofu. The four largest companies are Soyastern, Yamato Tofuhaus GmbH, Henselwerk GmbH, and Svadesha.

Talk with Thomas Karas. 1990. March 14. This company started making tofu in Siegburg (at Roonstr. 38, D-5200 Siegburg, West Germany) in Nov. 1982. The original name of the company was Thomas Karas und Ingeborg Taschen. It was not a GmbH. The original brand was Soyastern. Since the first day it has always been spelled "Soyastern," never "Sojastern." Ingeborg Taschen was a woman. Thomas' residence and the business office during this time was Hauptstrasse 1, D-5232 Ziegenhain, near Siegburg. While in Siegburg, they had three products: Regular tofu, Herb Tofu (Tofu Provence), and Tofu Burgers.

Note: This is the earliest record seen (April 2001) concerning Sojastern of Germany.

5806. *Toyo Shinpo* (*Soyfoods News*). 1982. [Recipes for tofu cheesecake and Chocolate cream pie]. Dec. 1. [Jap]
• ***Summary:*** A photo shows both prepared dishes.

5807. Cauwenberghe, Marc van. 1982. Re: George Ohsawa's early work with soyfoods from 1956, especially miso and soy sauce. Letter to William Shurtleff at Soyfoods Center, Dec. 2. 5 p. [12 ref]
• ***Summary:*** The earliest document seen, written by Ohsawa, that mentions miso is the *Guide Pratique de la Medicine Macrobiotique d'Extreme-Orient*, which appeared in 1956. He arranged for miso and soy sauce to be imported to Europe from Japan and he organized the production of miso and soy sauce in France and Belgium in the Lima Foods factory by putting two of his Japanese students, Clim Yoshimi and "Jim" Takanami, to work there. Both are still living in Belgium. Clim's address: c/o Kusa, Sportstraat, 319, 9000 Gent, Belgium. The home-made tofu he sells at his store is known as the best.

Klim wrote a book in Japanese on macrobiotics titled *Shin Shokuryo-ho*, which he translated into English as Macrobiotics–The biological and physiological foundation of Zen. It contains recipes using miso, tamari, soy sauce, and tofu. "In 1972 I attended cooking classes by Aveline Kushi where she was teaching tofu making and tofu recipes. In 1974 Michio Kushi gave a month long seminar on natural agriculture and food processing. This included the preparation of tofu and miso. The seminar was published in the series 'Michio Kushi Seminar Reports.'" Address: East West Foundation, 62 Buckminster Rd., Brookline, Massachusetts 02146. Phone: 617-734-3853.

5808. Daenzer, Walter. 1982. Re: Work with tofu in Switzerland. Letter to William Shurtleff at Soyfoods Center, Dec. 6. 1 p. Typed, with signature on letterhead. [Eng]
• ***Summary:*** Walter prefers to spell the word as Soya rather than Soja. *Tofurei* is a natural way of saying "tofu shop" in German, similar to Baeckerei (bakery). "Soyana is the exclusive brand of our tofu for the health food stores organised as 'biona.' The Soyaquell brand we sell anywhere." Address: Soyana, Postfach 8039, Zurich, Switzerland. Phone: 01/202 89 97.

5809. Leviton, Richard. 1982. Re: Summary of soyfoods research trips in the Midwest and Canada (Oct. 14-28) and West Coast (Nov. 21-30). Letter to William Shurtleff at Soyfoods Center, Dec. 6. 2 p. Typed, with signature on letterhead.
• ***Summary:*** The letter begins: "As you requested, the notes on my 'historic' tour, hysterically unprofitable, but at least fun." Traveling 4,700 miles, Leviton gave programs about tofu, tempeh, and other soyfoods sponsored by various companies, and was on TV and newspaper interviews. Companies visited in the Midwest and Canada: Rising Sun (Columbus, Ohio), Prairie Soyl, Community Foods Tofu/ Tempeh Shop, Light Foods, Michiana Soyfoods, Zakhi Soyfoods, Bountiful Bean, Higher Ground Tempeh, Steve Fiering (disappointing business meeting), Soyateria, Victor Foods (Toronto, Ontario, Canada), La Soyarie (Ottawa), Unisoya (Quebec).

West Coast and British Columbia: Wildwood Natural Foods, Brightsong Light Foods, Dayspring Soyacraft, Sooke Soyfoods, Metta Tofu, Sin-Mei-Do, Thistledown, Lifestream, Surata.

Leviton is thinking about relocating in California or working with Soyfoods Center on writing books. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

5810. Nordquist, Ted. 1982. Re: New developments with tofu at Aros in Sweden. Letter to William Shurtleff at Soyfoods Center, Dec. 17. 1 p. Typed, with signature.
• ***Summary:*** "We have landed a contract with a large wholesaler in Finland with 250 health food and 9,000 grocery chain stores. The first two weeks of January 1983 we will export per week more than we sell in Sweden. So it looks good for the future. But it is still an 18 hour a day, seven day a week job for me." Address: President, Aros Sojaprodukter, Bergsvagen 1, S-190 63 Orsundsbro, Sweden. Phone: 0171-604 56.

5811. Vogel, Lothar. 1982. Re: Work with tofu in Austria. Letter to William Shurtleff at Soyfoods Center, Dec. 28. 2 p. Handwritten, with signature. [Eng]
• ***Summary:*** Lothar is a professional chef. Yesterday he made a batch of tofu for a natural food store and restaurant in Vienna. For the next 3 months he is obligated to work at the Walfisch. He is fascinated with the soybean and wants to spend the rest of his life learning about it and teaching others. "Candle and I had a very fine journey across the US... holding two workshops, one in Kansas City and one in Ft. Wayne, Indiana. I also had the opportunity to appear on TV, being interviewed for 15 minutes in a life show." Address: Walfisch, Walfischgasse 14, 1010 Vienna, Austria.

5812. Rehert, Isaac. 1982. '83 bash with spirit–not spirits. *Sun* (*Baltimore, Maryland*). Dec. 29. p. B1-B2.
• ***Summary:*** You don't need alcohol or a hangover to usher in the new year. Nor do you need meat or cigarettes. Why not "spend New Year's Eve with Baltimore Vegetarians at Christ Church, 1110 St. Paul St." The $4 fee covers all food and drink, music and entertainment. "You don't need to be a vegetarian (although you will feel more comfortable if you are).

"The other day Charles Stahler and Debra Wasserman, organizers of Baltimore Vegetarians who are sponsors of the party, took time out from cooking a vegetarian meal in their home in Ridgely's Delight, to explain what the organization and the coming party were about." A photo shows Stahler (age 28) and Wasserman (25), both vegans, preparing food in a kitchen. Five recipes are given: Hot apple cider, hummus, tabbuli [tabbouleh, tabouli, tabbouli], carob tofu pie, and baked apples and Freya's cashew cream topping.

5813. *SoyaScan Notes.* 1982. Chronology of soybeans, soyfoods and natural foods in the United States 1982 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** Jan. White Wave in Colorado is the first company to get its tofu placed in the yogurt / dairy case in supermarkets.

Jan. Legume, Inc. launches Tofu Lasagna, frozen in a box. It is soon followed by Tofu Ravioli.

Jan. *The Incredible Tofu Cookbook, California Style,* by Immegart and Dansby self published.

Jan. New England Soy Dairy launches "Year of the Dog" Chinese New Year tofu promotion and nets 47% immediate sales increase.

Jan. Island Spring survives industry's first publicized tofu recall and the discovery of new tofu spoilage microorganism, *Yersinia enterolitica.*

Jan. ADM becomes sponsor of "This Week with David Brinkley" on Sunday ABC TV, with 4.4 million viewers.

Jan. Soyfoods Unlimited in California introduces tempeh burgers and ships them air freight to East Coast markets; Pacific Tempeh in California follows suit.

Feb. Yuba is first produced and sold commercially in the Western world by Ken Lee of Soyfoods of America, in Duarte, southern California. Trial production had begun in Nov. 1981.

July. Bean Machines introduces its new Continuous Pressurized Slurry Cooker. July. *Tofu: Einladung ins Schlaraffenland* (Tofu: Introduction to the Land of Milk and Honey), by Walter Daenzer published by Verlag Bewusstes Dasein in Zurich, Switzerland (in German). Europe's third tofu book.

July. *Using Tofu, Tempeh & Other Soyfoods in Restaurants, Delis & Cafeterias,* by Shurtleff and Aoyagi published by The Soyfoods Center.

July. Soyfoods Come West, the Fifth Annual Soyfoods Convention and Expo, in Seattle draws 250 people from 12 nations and makes a profit. Plans are made for a new tofu trade group to represent the larger manufacturers. Gary Barat of Legume and Steve Snyder lead this effort to break away from SANA.

July. *Diet for a Small Planet,* by Frances Moore Lappe, a completely revised edition, published by Ballantine Books. Over 2 million copies of the book have been sold since 1971. The new edition contains many new soyfoods recipes, including 8 tofu and tempeh recipes submitted by Shurtleff and Aoyagi as part of a recipe contest.

Aug. The BBC of London, England, runs a 30-minute program on the U.S. tofu industry and market.

Aug. "Why Are Soyfoods Catching On?" by Judy Brown published in *Whole Life Times.*

Aug. Soy Protein Council in Washington, D.C. releases filmstrip on soy proteins.

Aug. *Tofu, Tempeh, Miso & Other Soyfoods,* by Richard Leviton published by Keats. 32 p., 15,000 copies printed.

Aug. Mexico announces that it can no longer meet its foreign debt repayment obligations. The first major debtor nation to do so.

Sept. New England Soy Dairy launches herb and spice preflavored tofu in colorful boxes. This is an important innovation in tofu packaging.

Sept. Miyako / Cold Mountain Miso in Los Angeles moves into new plant, has $15,000 reopening party.

Sept. Dr. C.W. Hesseltine, at USDA Northern Regional Research Lab., receives $50,000 research grant to study shelf life of tofu, tempeh, miso.

Sept. *Soyfoods Labels, Posters, and Other Graphics,* compiled and edited by Shurtleff and Aoyagi, published by Soyfoods Center. 185 p.

Sept. Soyfoods Unlimited runs full-page color ads for tempeh burgers in national magazines: *Vegetarian Times* and *New Age.*

Sept. Richard Leviton plans to move to Ann Arbor. Steve Fiering offers to recapitalize Soyfoods magazine and buy typesetting equipment. Plan dropped by Fiering in October.

Oct. Legume Inc. has its first of many public stock offerings; raises $100,000 from sale of stock plus $100,000 from a loan. Legume thus becomes the first of the new wave of soyfoods companies to be publicly owned. In Nov. 1983 Legume raised $600,000 more, two-thirds from sale of stock and one-third from debt.

Oct. Richard Leviton does "Soyfoods in the Heartland" nationwide tour with 13 programs, 11,000 miles. Net loss of $300 but lots of fun.

Oct. *Tofu Cookery,* by Louise Hagler published by The Farm's Book Publishing Co.

Oct. *Tofu Cookery* by Fusako Holthaus published by Kodansha, New York. Japan's first tofu book aimed at the American market. Both this and the Farm's tofu book are America's first tofu books with color plates.

Oct. Beatrice Wittels' CSC sponsors World Food Day in Philadelphia, with speech by Richard Leviton and soyfoods banquet. 200 people, including a Pennsylvania senator, attend.

Oct. South River Farm Miso Co. opens in Massachusetts as nation's second Caucasian-run miso manufacturer. It was formerly Ohio Miso Co.

Oct. "The Hilton Hotel's Gourmet Tofu Dishes" by Clare Barrett published by *Vegetarian Times.* Dishes made from Dieter Hannig's tofu recipes are shown in full color.

Nov. Unicorn Restaurant in Miami prepares three tofu turkeys for Thanksgiving Day.

Nov. Restaurant Business magazine praises Legume products as "tasty, superb."

Nov. Whole Life Expo held in New York. Farm Foods gives speech on soyfoods.

Nov. "Mainstreaming Soyfoods" by Richard Leviton published by *Vegetarian Times.*

Nov. Campbell Soup makes offer to buy Legume stock. Quaker Oats is reported to make tender to buy any of America's largest tofu makers. But nothing happens.

Nov. Pacific Tempeh introduces nitrogen-flush vacuum packaging for tempeh.

Nov. Well Bean Soy Deli in Santa Cruz changes its image to "Fast Natural Foods" after soy deli sales sag.

Nov. *East West Journal* publishes article on The Bridge tofu company in Connecticut.

Nov. Lane County Natural Foods Assoc. sponsors large, Natural Horizons Expo in Eugene, Oregon. Richard Leviton gives speech. Surata Soyfoods and Devi's Country Soy Sausages have exhibits.

Nov. *Quick & Easy Tofu Cookbook,* by Yukiko Moriyama published by Joie in Japan. Aimed at American market; over 400 full-color photos but poor English translation.

Nov. *La Magie du Tofu* (The Magic of Tofu), by Tremblay and Boyte published by Stanke in Montreal. Canada's first original tofu cookbook. It becomes a best-seller.

Nov. *Le Plaisir de la Cuisine au Tofu* by Marie Poirier published by Unisoya in Quebec, Canada.

Nov. *Cooking with Tempeh,* by Claire Seguin published by Higher Ground Press. America's second tempeh

cookbook.

Dec. Light Foods helps establish a soup kitchen in St. Louis; will provide okara and tofu scraps free of charge to the city's indigent.

Dec. Nasoya restyles their tofu dips as "Vegi-Dips" in new containers.

Dec. Soyfoods of America runs $2,800 large display ad in Los Angeles Times (circ. 1 million) with tofu recipes.

Dec. *Washington Post*, in the Style section, says frozen yogurt is "Out" and frozen tofu desserts are "In."

Dec. Swan Gardens, Miami, after 3 years of R&D, announces informally that it has three flavors of "meltable" cheeselike tofu. It is introduced as Soya Kaas in Feb. 1986.

Dec. *Le Tofu dans le Cuisine Macrobiotique*, by Eddie H. Hara published in France by Editions de la Maisnie.

Dec. Since 1974, 25 books on tofu have been published in the U.S. In 1981 and 1982 publication of books on tofu in North America and Europe reaches its peak, with 12 published each year.

Dec. There are seven brands of tempeh burgers on the market; four brands of frozen tofu ravioli; 8 brands of soy ice creams.

5815. **Product Name:** Tofutini Dessert (Non-dairy Frozen Dessert; Renamed Tofu-Zert by Jan. 1984) [Banana, Rum-Raisin, Maple-Walnut, Strawberry].
Manufacturer's Name: American Food Lines.
Manufacturer's Address: Merrick, New York.
Date of Introduction: 1982. December.
Ingredients: Incl. pure honey, soya oil, organic tofu, soy flour, soya lecithin, guar seed gum, sea salt, water.
Wt/Vol., Packaging, Price: Liquid mix, 2-gallon dipping tubs, pints, or 4 oz cups.
How Stored: Frozen.
New Product–Documentation: Food Report (Lehmann). 1982. Dec. Note that a product with a similar name was introduced earlier this year by Heller Enterprises in East Rockaway, New York.

5816. **Product Name:** Skinny Dip, and Spicy Skinny Dip (Tofu-Based Dip with Vitamin B-12).
Manufacturer's Name: Brightsong Light Foods.
Manufacturer's Address: 100-A Poultry St. (P.O. Box 2536), Petaluma, CA 94953.
Date of Introduction: 1982. December.
Ingredients: Skinny Dip: Brightsong tofu, soy oil, olives, onion, soy sauce, nutritional yeast, garlic, natural spices, citric acid.
Wt/Vol., Packaging, Price: 7, 8 oz.
How Stored: Refrigerated.

© Copyright Soyinfo Center 2013

Nutrition: Per 3.5 gm.: Calories 160, protein 11 gm, carbohydrate 5 gm, fat 11 gm.
New Product–Documentation: Label. 1982. 3 inch diameter. Self adhesive. Green on white. Label. 1983, undated. 3 color. Reprinted in Soyfoods Marketing. Label. 1983. 2.5 inch diameter. Plastic tub. Green and blue on white. "Low in calories, fat and salt, a good source of protein, vitamins and minerals, all natural. Use as a dip, salad, spread or..." Lafayette, CA: Soyfoods Center. Spot in Soyfoods. 1984. Summer. p. 42. Letter from Richard Rose. 1987. Aug. 29.

5817. **Product Name:** Lite & Creamy (Tofu Pudding for Natural Foods Market) [Almond, or Chocolate].
Manufacturer's Name: Brightsong Light Foods.
Manufacturer's Address: 100-A Poultry St. (P.O. Box 2536), Petaluma, CA 94953.
Date of Introduction: 1982. December.
Ingredients: Chocolate: Brightsong tofu, honey, natural cocoa, vanilla, lecithin. Almond: Brightsong tofu, honey, almonds, vanilla, lecithin, almond extract.
Wt/Vol., Packaging, Price: 4 oz, 6 oz or 8 oz in plastic deli tub.
How Stored: Refrigerated.
Nutrition: Per 3 oz.: (Chocolate) Calories 160, protein 9 gm, carbohydrates 24 gm, fat 4 gm, sodium 75 mg; (Almond) Calories 170, protein 9 gm, carbohydrates 15 gm, fat 8 gm.
New Product–Documentation: Label. 1982. 3 inch diameter. Self adhesive. Blue on white. Label. 1983, dated. Brown and red on white background. "Light... and nondairy." Label. 1983. 2.5 inch diameter. Plastic tub. Almond: Orange and blue on white. Chocolate: Brown and red on white. "Low in calories, fat and salt, a good source of protein, vitamins and minerals, and all natural. A delicious light desert..." Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Spot in Whole Foods. 1984. Jan. p. 39. "Almond-Amaretto Lite & Creamy contains toasted almonds and non-alcoholic Amaretto [It was heated to vaporize off the alcohol]. Almond Lite & Creamy has 165 calories per 4 oz." Spot in Soyfoods. 1984. Summer. p. 42.

5818. **Product Name:** Cottage Salad (Non-Dairy Tofu Cottage Cheese) [Herb].
Manufacturer's Name: Brightsong Light Foods.
Manufacturer's Address: 100-A Poultry St. (P.O. Box 2536), Petaluma, CA 94953.
Date of Introduction: 1982. December.
Ingredients: Brightsong tofu, soy oil, onion, dill, salt, citric acid.
Wt/Vol., Packaging, Price: 7 oz plastic deli tub.
How Stored: Refrigerated.
Nutrition: Per 3.5 oz.: Calories 150, protein 10 gm, carbohydrates 10 gm, fat 4 gm, sodium 180 mg.
New Product–Documentation: Label. 1983, dated. 2.5 inch diameter. Plastic tub. Red and blue on white background. "Light... and nondairy." Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Spot in Soyfoods. 1984. Summer. p. 42.

5819. **Product Name:** [Tofu, and Seitan].
Foreign Name: Tofu, Seitan.
Manufacturer's Name: C.D.S. Pianeta Terra Soc. Coop. A.R.L.
Manufacturer's Address: Via de' Serragli 4, 50124 Florence, Italy. Phone: 055-298804.
Date of Introduction: 1982. December.
New Product–Documentation: Letter from Giorgio Rosso, Import Manager. 1984. Dec. 14. "We have been producing tofu and seitan now for 2 years and would like to increase this production to supply other Italian macrobiotic centers with books and foods. Could you please send information and the application forms for becoming a Soyfoods Center member and to receive all your materials."

5820. **Product Name:** Tofu Settling Box [Kit].
Manufacturer's Name: Heron's Flights.
Manufacturer's Address: Box 221A, Star Route, Sarona, WI 54840.
Date of Introduction: 1982. December.
New Product–Documentation: Ad in Vegetarian Times. 1982. Dec. p. 37. Price: $18.00. Comes with soybeans and nigari.

5821. Kim, Kil Hwan. 1982. Kohng, dubu wa kohng nah mul eh kwah hak [The science of soybeans, tofu and soy sprouts]. Seoul, South Korea: Korean Science Foundation. 211 p. Dec. Illust. Index. 21 cm. [200+ ref. Kor]
• ***Summary:*** Contents: I. Soybeans. Introduction. World soybean production: Areas of production, quantities produced, amount produced in Korea, amount imported to Korea, chemical composition of all soybeans. How to use soybeans: Foods and processed soybean foods (sauces, tempeh, natto), industrial uses. Nutritional composition of soybeans: Common components, protein and amino acids (protein, essential amino acids, necessary protein intake, necessary amino intake, chemical score, biological value of soybean protein, the need to heat soy protein, the use of soy protein as a protein supplement), soybean oil (components of soybean oil, oil assimilation / absorption), other nutritional components (carbohydrates, vitamins, minerals), references.

II. Tofu. Introduction. Kinds of tofu and production: Soybean curd (production in factories, production at home, instant tofu, kinugoshi tofu, grilled tofu, frozen tofu, how to freeze and dry tofu). Movement of nutritional values during tofu processing: Movement of common nutrients, movement of amino acids. Nutritional components of tofu: Tofu protein, tofu protein as a protein supplement, digestion

of tofu, calories in tofu, fat and cholesterol, minerals and vitamins, toxins, *hwe bun* in tofu. Tofu and group meals: School meals in Japan, in America, in Korea. Tofu factories and associations involved with tofu: Member list of food associations in Korea, regular member and extra member list of tofu packaging associations in Japan, directory of tofu shops and factories in North America, in Europe, in other countries, list of companies selling tofu coagulants, list of tofu restaurants in Japan. References.

III. Soy sprouts. Introduction. Production of soy sprouts: Soybean varieties, selecting and washing the soybeans, soaking, watering the sprouts, machines for cultivating soy sprouts, maintenance. Nutritional composition of soy sprouts: Common nutrients, increase of vitamin C during growth, changes in vitamin C during heating, changes in riboflavin during heating. Glossary.

Soybeans arrived in Korea in about 200 B.C. (p. 11). Contains many useful tables. Address: Korea.

5822. **Product Name:** Tofu Vegi-Dip [Onion, Eggless Salad, Blue Cheese, Italian Garlic, Soyannaise, Soyannaise with Dijon Mustard, or Creamy Dill].
Manufacturer's Name: Nasoya Foods.
Manufacturer's Address: Mechanic St. Ext. (P.O. Box 841), Leominster, MA 01453.
Date of Introduction: 1982. December.
Ingredients: Italian-Garlic: Tofu, unrefined safflower oil, apple cider vinegar, honey, sea salt, vegetable gum, citric acid, natural spices, herbs, flavorings.
Wt/Vol., Packaging, Price: 8 oz plastic tubs.
How Stored: Refrigerated, 30 day shelf life.
New Product–Documentation: Spot in Soyfoods. 1983. Summer. p. 52. "Nasoya Restyles Tofu Dips. The line of 5 spreads and salads, introduced in December 1979, was restyled and repackaged in December 1982." 1984. Summer. p. 43. "Nasoya's Vegi Dips."

5823. *Soyanews* (*Sri Lanka*). 1982. Recipes: Gourmet dishes with bean curd. 5(4):7. Dec.
• ***Summary:*** Taucho [sic, tahuri] (fermented tofu immersed in brine) is now available at the Darley Road sales room of Lankasoy, "It is a salty preparation quite flavorful like our *jaadi* and a little adds a lot to make dishes extra tasty."

Recipes are given for: Braised bean curd (with "4 slabs bean curd (tofu) cut into 8 slices each"). Spicy bean curd sambol (with "2 slabs tofu. 2 tbsp. preserved soya beans (taucho)"). "Note: The taucho may be fairly salty: wash before use."

Note: Taucho is Filipino miso, whereas tahuri is Filipino brine-fermented tofu. The recipe probably intends to call for tao-si (fermented black soybeans from the Philippines).

5824. Tsuchiya, Kanji. 1982. Tônyû. Shinban [Soymilk. 2nd ed.]. Tokyo: Shoku no Joho-sha. 223 p. First edition was published in 1980. Illust. 17 cm. [Jap]
• ***Summary:*** This is the best book seen to date on soymilk in Japanese. A detailed chronology of tofu and soymilk is given on pages 173-76. Over 20 years ago, when Mr. Tsuchiya was plant manager of the Kyôdo Nyûgyo dairy milk plant at Matsumoto, he became interested in using soy protein to replace dairy protein. Although soybean crushers had investigated the use of defatted soybean meal, the techniques for removing the beany flavor and smell were not yet good enough to allow substitution of soy protein for milk solids. At that time there was a shortage of imported nonfat milk for use in ice cream bars. It was said that a small numbers of manufacturers of the inexpensive ice cream products were already using some soy protein to increase their over-run. "Discovering this, Nisshin Seiyu, after some research, found a method of removing the beany smell by fermentation with a yeast; they asked if Kyodo Nyugyo could make a test run of 10 kg of spray-dried soymilk in our plant. So they dissolved soy powder (*daizu-ko;* which had been defatted at a low temperature) in water, added yeast, waited until the reaction was finished, diluted it with some water, and put it in a spray dryer. Yet the spray drying caused some protein denaturation and an increase in the viscosity of the soy powder, which made it difficult to pump the solution to the top of the spray dryer. Glucose was used to replace half the soy powder. The spray-dried powder would not dissolve in water and the resulting mixture had a muddy brown color, a flavor that was too sweet, and a beany flavor. It was useless. They had discovered that defatted soybean meal and nonfat dried milk behave differently. Defatted soybean meal contains about 20% sugars, but less than 1/3 of these are water soluble and many have a very complicated structure and high viscosity."

Therefore they started to study the basic nature of defatted soybean powder (*dasshi daizu-ko*) and after much trial and error, in 1961 they applied for a Japanese patent on "The method of refining defatted soybean powder" (*Dasshi daizu-ko no seisei hôhô*). They were issued the patent (#16,658) in 1962. The key to the success of this patent was the use of meta potassium bisulfite (*meta jûaryusan karium*), which lowers the viscosity, bleaches it and increases the amount of soluble nitrogen. Not enough of the beany flavor had been removed, yet at that time it was an excellent product, which could be used in place up to 30% of nonfat dried milk to make an ice cream product without a beany flavor. Mr. Masaharu Sato (who is presently head of the soybean department of Kyodo Nyugyo's central research lab) was the person who contributed most to the discovery. He is now conducting research on tofu and soymilk. "I still see him often since we are both members of Soyfoods Development Study Group (*Daizu Shokuhin Kaihatsu Kenkyû-kai*). He recently told me, 'After that incident, I became captivated by soy protein.'"

"After about 2 years of research, during the summer we

© Copyright Soyinfo Center 2013

received an order from Nisshin Seiyu for 200 tons of soy protein. Our plant had been losing money for a long time, and this discovery helped to make some profit during my time of work there. I will never forget it. I feel real gratitude to Nisshin Seiyu for helping us to become captivated by soybeans."

At about that time dairy farmers throughout Japan began to compete with one another in a price war which lowered milk prices. The battle between them and the owners of dairy milk companies got worse and worse. Among the leaders of this struggle were progressive dairy farmers in Matsumoto. "Although we made soy powder very secretly, one of the plant workers, who was the son of a dairy farmer, leaked the secret. This caused an uproar (we were using soy powder instead of dairy milk) and the local farmers asked us to stop immediately. However we decided to continue making soy powder for various reasons: (1) We had to fulfill the order that we had accepted; (2) Since we simply processed soy and sold it to another company, this had no effect on our plant's use of unprocessed dairy milk; (3) The soy business allowed out plant to operate profitably and this allowed us to return some money on the dairy farmers' investment." For a variety of complex reasons related to this conflict, Mr. Tsuchiya was fired as plant manager for Kyodo Nyugyo's Matsumoto dairy milk plant. Though his retirement was very near, he left the dairy industry without regret to continue his research on soy powder (p. 14-19).

"Meeting with Dr. Miller: During the period 1965-1969 I was involved in the founding of Taiwan Ryokusô Kogyô Kôshi, and I took a leadership role in constructing modern plants to make powdered soymilk and chlorella. One of the leaders in the chlorella industry, the late Dr. Yoshio Takechi, was in charge of the chlorella cultivation department and I was in charge of chlorella product development and of powdered soymilk production. In 1966 Dr. W.A. [sic, Harry W.] Miller (who was a founder of Loma Linda Foods) and his son visited our company, under the guidance of Dr. Taisei of Taikei University. At that time Dr. Miller stood on the platform atop our spray dryer, which was 20 meters tall and had 500 liters/hour capacity. Admiring it, he said: 'I've never seen a soymilk plant which has this much facilities!' He also tasted the soymilk (from which the beany flavor had been removed) and said 'I wonder if you have to refine soymilk to this degree for Chinese people.' His words left a strong impression in my memory. Sure enough, when the factory was completed and we launched our canned soymilk powder, we heard Chinese saying, 'This is not real soymilk. It's an imitation.' But we did a good marketing campaign and soon the soymilk started selling. When my 2-year contract ended, I returned to Japan. After that, the products produced in this plant were used as food for the Taiwanese army and were not sold to the public. Moreover, because of the chlorella boom in Japan, the spray dryer was used for chlorella and soymilk production stopped. Since I had great expectations for this plant, I was greatly disappointed.

"Right after I returned to Japan in 1970, I was asked to provide technical assistance to Keijô Shison Shokuhin Kenkyusho, a research lab in Korea headed by pediatrician Son Zaien. I visited there several times and even drafted a floor plan, then suddenly the Japanese government told me that the money which had been available for helping Koreans was no longer available, so I could do no more" (p. 18-21; see p. 53 for more on soymilk in Korea). Continued. Address: Technical consultant, Okazaki Marusan, Japan.

5825. Tsuchiya, Kanji. 1982. Tônyû. Shinban [Soymilk. 2nd ed.]. Tokyo: Shoku no Joho-sha. 223 p. First edition was published in 1980. Illust. 17 cm. [Jap]

• ***Summary:*** Continued. Pages 31-32. In the literature of Japan's Muromachi period it is written that after eating confections (*tenshin* such as okashi, oyatsu) they ate light and simple food (*tanpaku na tabemono*). One of the latter was called *tofu no uwamono*, which means yuba.

A flow diagram (p. 35-36) gives Chinese names of soymilk, yuba, fermented tofu, etc.

Part III (p. 39-64) titled "Soymilk around the world," has chapters on the USA, Korea, Hong Kong, China, Taiwan, Southeast Asia, and Europe. Soymilk in America (p. 47-52) includes a 1975 table showing major manufacturers of soymilk and soy-based infant formula, their location, and the names of their products. Soymilk in Korea (p. 53-54): In 1968 the Keijo Shison Shokuhin Kenkyujo made soymilk using the regular tofu making equipment adjusted to make a product as similar as possible to dairy milk, then bottled it in cider bottles, pasteurized it, and sold it. They made 500 to 800 bottles a day and sold it nationwide. It was brownish in color and tasted like soybean cooking liquid; there was no comparison between that and today's soymilk in quality. The head of this research lab was Dr. Son Zaien, who also ran the children's hospital and was a professor of pediatrics at Seoul Medical University. As a pediatrician his concern was that the soymilk promote the growth and health of children; he was not concerned about its acceptance among adults. The children accepted it within 2-3 days. Later, in May 1982, Tsuchiya visited Korea again. They had developed their own method of making soymilk and the soymilk plant had been expanded. Now they produced 500,000 bottles a day (180 cc each, retort sterilized); they call it Vegemil / Vegemeal. It contains added fat and sugar to make it closer to dairy milk., but the sugar content is 10%, which is sweeter than Japanese soymilk. The plant is built on a lot of 4-5,000 tsubo and has 24 retort sterilizers; each machine has 2,500 bottles capacity. Tôhô Yuryô, as part of a Korean technical joint venture with Kibun in Japan, is going to make 120-130,000 Tetra Brik cartons (each 200 cc). Also other dairy milk makers (Sojû and Sangan) are going to have some sort of equipment to start making soymilk. Also, I head that Tôa Shokuhin (K.K.), a pharmaceutical company, is planning a joint venture with

© Copyright Soyinfo Center 2013

Meiji in Japan to make soymilk.

Also, Lotte Chilsung Beverage Co. is planning to use Marusan's (Japan) technology to make soymilk. They are constructing a plant to start to making soymilk in Feb. 1983.–The population of Korea is about 40 million and the GNP 24,000 million won (unit of currency) a year; it is the largest in Asia. But it is a tough war for market share among these fine companies.

Soymilk in Taiwan (p. 57-61): People who were born in Taiwan [the former Japanese colony of Formosa (1895-1945)] have Japanese food habits and don't like soymilk as much as the Chinese. Also, Taiwanese young people don't like soymilk much. In mainland China people only drink water that has been boiled and cooled–just as they do with tea. The same with soymilk. They boil soymilk in a flat pan (*hira-nabe*) for 20-30 minutes before selling it. The buyers don't buy it without seeing that it has been properly boiled. If you cook soymilk in a flat pan for a long time, you can eliminate much of the beany smell and flavor, the antidigestion substances, and harmful bacteria. They don't care about a little burned flavor, bitterness, or beany flavor. But this is ancient wisdom. There they continue to drink soymilk up to this day and it is still very popular. It is said that the annual sale of soymilk in Taiwan is about 5,000 million yen.

In China, sellers of ice candy (like ice Popsicles) call out loudly *kaishui bingo. Kaishui* means boiled and cooled water. *Bingo* means Popsicle.

In the Philippines, about 10 years ago, the University of the Philippines developed soymilk and a blend of soymilk and coconut milk for American children. It was test marketed among the students and teachers of elementary schools, junior and senior high schools, and universities. It was acceptable only to comparatively well educated people. A 200 ml bottle (about 7 ounces) sold for 15 cents, making it more expensive than most other drinks. The taste was plain but the bean smell was not completely removed. In October 1982 Dr. William G. Padorina and other economically influential people came to Japan at the request of President Ferdinand Marcos and studied Marusan's soymilk plant. They are planning a Food Development Symposium in Feb. 1983 and they would like to have nutritious soy products that contain coconut oil (they account for 70% of the world's production). They have asked Marusan to cooperate in the effort.

In Denmark, a company named Starna [Nutana?] makes various soyfoods such as textured soy flour (*daizu nikku*), defatted soymilk, and soymilk. They are selling these products in Denmark and neighboring countries. *The Book of Tofu* by Shurtleff and Aoyagi is mentioned on pages 46 and 117.

Okazaki Marusan makes a soy yogurt named *Tôgurt / Tôguruto* in Japanese. The character *tô*, which means bean, is also the first character in the word *tôfu* (p. 71). Address: Technical consultant, Okazaki Marusan, Japan.

5826. Tsuchiya, Kanji. 1982. [Soymilk in Japan, and its history (Document part)]. In: Kanji Tsuchiya. 1982. Tônyû. Shinban [Soymilk. 2nd ed.]. Tokyo: Shoku no Joho-sha. 223 p. First edition was published in 1980. [Jap]

• ***Summary:*** Building a plant specialized in making soymilk (p. 21-24): After my two overseas attempts ended in failure, I returned to studying the basics. With the help of a friend, I had a soymilk test plant (55 liters/hour) built on the outskirts of Sendai, in the Tohoku region. There I worked on making soymilk with less beany flavor and better digestibility. Over a period of about 2½ years I completed development of a new heating system (Japanese Patent No. 19,928 issued in 1973), and also completed a report on digestibility of soymilk with my co-worker Kazuhiro Ootomo. In order to test the results of my research, I went to Tokyo in 1974. I found an investor, taught my techniques to Tokyo Soymeal K.K., spent 9,000,000 yen, and started to build a soymilk plant in the Tokyo area. At about this time other early soymilk manufacturers like House Luppy, Soyalac, etc. were building the market slowly but steadily, making about 10,000 to 20,000 packs/day. Our company, Tokyo Soymeal, cut into this market share, and spent 3 very tough years. But finally we were producing 6,000 packs/day and we first started to break even financially. Our soymilk product, named Soymeal, marketed as a soft drink, had a good flavor and was accepted as a new type of soymilk by consumers.

"However I realized at that time that soymilk was being sold only in the health food market. Because of that, no regular mainstream consumers bought our soymilk since distributors placed it only in Diet- and Health food stores, and in the drug section of other stores. Thus our share of the milk or beverage markets was extremely small, and expansion was difficult. Our next step was to change consumers preconceptions about soymilk.

"I want to make a tasty soymilk: Rather than placing emphasis on health or medical care, beauty care, changing one's constitution, etc. I wanted to make a soymilk product that was simply delicious and nutritious. But unfortunately our Soymeal company had to close its plant in December 1978 because the landlord sold the land on which the plant was located. This land was located next to the Tachikawa U.S. military base, and when the U.S. army gave the land back to the Japanese government, the price of land in the whole area rose. Thus our landlord wanted to sell his land too.

"In order to use my past effort and experience to make a new start, I was planning to build a plant in the Chûbu area. I did not have the means to do this by myself, but by good fortune, in 1979 Okazaki Marusan K.K. decided to help this enterprise and I was accepted as a member of their company. And furthermore it is planned to build a plant that can produce 4 times as much soymilk as plants that existed in

© Copyright Soyinfo Center 2013

May 1980. I would like to produce the best soymilk in Japan. The Japanese Department of Food, Agriculture, and Forestry is now studying soymilk with the intent of establishing a JAS standard in 1980."

Pages 50-52 show a chart of different brands of soymilk and soy-based infant formulas sold in the USA, with the name of the manufacturer, ingredients, and/or composition. These include: Loma Linda Food Co. of Arlington, California (Soyagen [liquid or powder], Soyalac); Mead Johnson & Co. of Evansville, Indiana (Metrecal, Sobee); Dietetic Food Co. Inc. of Brooklyn, New York (Diamel no Sorina); Ovaltine Food Products of Villa Park, Illinois (Ovaltine, 2 types which contain soy protein); Gerber Food Products of Fremont, Michigan; Plus Products of Los Angeles, California; Borden Co. of New York (Mullsoy, 2 types); Pavo Co. Ice of Minneapolis, Minnesota.

Early history of soymilk: In the *Teikun Orai,* written during the Muromachi (Ashikaga) period in Japan, the word *tofu-kan* appears in the section titled *Shojin Ryori* (Buddhist Vegetarian Cookery). That word used to mean "tofu soup" but it actually refers to what Japanese today call soymilk (*tônyû*). In the book *Sôgo Daisô-shi,* written in about 1417-1473 by Ise no Jôshin, there is a section on cooking okara (*unohana*). Mr. Tsuchiya thinks this soup was similar to today's soymilk except that the okara had not been removed. The author was the ancestor of Ise no Teijô, who lived during the Tokugawa (Edo) period and wrote that the word *Tofu-kan* should actually be pronounced *Tofu-ko,* and means "soup" (*shiru*). When the last character is pronounced "kan" it means "yokan." Note: Could Mr. Tsuchiya be confusing Manpukuji's tofukan (hard tofu) with the word tofukan that means soymilk?

A table (p. 72-75) lists all Japanese soymilk products made to date, including the name of the manufacturer, the exact date of introduction, range of distribution, package size and type, and retail price. Products sold by the following companies are listed: Kibun, Okazaki Marusan, Mitsubishi Kasei Shokuhin, Meiji Nyugyo, Kyushu Nyugyo, Nisshi Seiyu, Asahi Shokuhin, Kyodo Nyugyo, Yakuruto Honsha, Furuta Shokuhin Kogyo, Morinaga Nyugyo, Sugiyo, Koshin Nyugyo, Kenbi-Sha, Saniku Foods / Fuuzu, Nagoya Seiraku, Nagano Tomato, Zenkoku Nokyo Chokuhan (Nokyo), Yamato Shokuhin, Sokensha, Ishihara Fuudo Senta, Chiba Seisen Shokuhin Kogyo, Asahi Fuuzum Sebun-Irebun (7-11), Fukushima-ken Rakuren, Nacuraru Fuuzu (Natural Foods), Sebun Appu Inryo (7-Up). This entire table has been translated by Soyfoods Center; printed copies are filed with the book. The word processing filename is d:\w\hss\MilkJap1.doc. In addition, most of these soymilk products have a commercial soy products (CSP) record in the SoyaScan database. Address: Technical consultant, Okazaki Marusan, Japan.

5827. **Product Name:** [Natto, Agé, Okara].
Foreign Name: Natto, Ague, Okara.
Manufacturer's Name: Agro-Nippo Produtos Alimenticios Ltda.
Manufacturer's Address: Av. José Alves de Mira 185, Piribuba, Sao Paulo, Brazil.
Date of Introduction: 1982.
New Product–Documentation: Letter from Jane Cadwell Pautz in Sao Paulo, Brazil. 1982. May 29. The company sells natto, sprouts (mung bean type), agé (*ague*)*;* sometimes they sell the okara in the open market.

Note: We have no idea when each of these products was introduced. This is the earliest known commercial natto maker in Brazil.

5828. **Product Name:** [Marinated Tofu (Vacuum Packed)].
Foreign Name: Tofu Marinerad.
Manufacturer's Name: Aros Sojaprodukter KB.
Manufacturer's Address: Bergsvagen 1, S-19063 Orsundsbro, Sweden. Phone: 0171-60-456.
Date of Introduction: 1982.
Wt/Vol., Packaging, Price: Vacuum packed.
New Product–Documentation: Talk with Ted Nordquist. 1988. Nov. 22. The product, introduced in 1982, was named Tofu Marinerad. It later became part of the Tofu Line line.

5829. **Product Name:** Tofu.
Manufacturer's Name: Bean Machine.
Manufacturer's Address: 45 Maes Ingli, Newport, Pembrokeshire Coast National Park, Wales, UK. Phone: 820-896.
Date of Introduction: 1982.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1983. June 20. Owner: Zorah Groom. Richard Leviton. 1983. Trip to Europe with American Soybean Assoc. Oct/Nov. Unpublished manuscript. p. 29. Bean Machine is a 12-member co-op in Wales using someone's kitchen. Their best-seller is soysage. Cauldron Foods in Bristol invited them to move to Bristol and consolidate. Jon and Zorah Groom. 1985. La Lettre de L'ARTS. No. 3. p. 8. "Bean Machine story."

Carolyn Rees. 1987. April. Soyfoods (ESFA). "The Bean Machine story" The tofu is made largely by hand at the rate of 60 lb every 2 hours. The soymilk is curded with calcium sulfate. The company presently makes a range of three flavors of tofu, plain, chives, and garlic. The tofu is put into round presses and cut into two sizes, 227 gm and 454 gm, then vacuum packed in bags.

Letter from Simon Bailey. 1988. Oct. 10. Ceased trading.

5830. **Product Name:** Soysage [Regular, Tomato, or Spicy].
Manufacturer's Name: Bean Machine.
Manufacturer's Address: 45 Maes Ingli, Newport, Pembrokeshire Coast National Park, Wales, UK. Phone:

chamber vacuum pack machine.

Witte Wonder says that Manna's tofu production has not gone up in 3 years. Manna uses its own distribution system to reach 250 health food stores. Talk with Sjon Welters. 1989. Sept. 20. Sjon started working at Manna the second time in Jan. 1980. At that time, Manna was selling tofu in bulk. It was Sjon's idea to start selling it vacuum packed, in part so that it could be labeled. He got the idea of vacuum packing from other Dutch tofu makers in Limburg (maybe in Kirkrade, a city in Limburg), perhaps from Heuschen (which was in Limburg and which private labeled under about 12 different brands), which he recalls were vacuum packing tofu before 1977, especially the tofu that they sold in Germany. Manna bought their vacuum packaging machine at the same time they bought their Takai tofu system, which Sjon thinks was in late 1981 or early 1982. But Takai sales figures show that a tofu production system was sold to Manna on 20 Sept. 1982.

5870. **Product Name:** Pasteurized Tofu: Firm Style. Renamed Organic Tofu: Firm Style by 1992.
Manufacturer's Name: Stow Mills (Distributor).
Manufacturer's Address: Brattleboro, VT 05301.
Date of Introduction: 1982.
Ingredients: Filtered water, organic soybeans, nigari (a salt-free sea mineral, magnesium chloride).
Wt/Vol., Packaging, Price: 16 oz. Retails for $1.19 (7/92, Maryland).
How Stored: Refrigerated.
Nutrition: 7/92. Per 4 oz.: Calories 120, protein 13 gm, carbohydrates 3 gm, fat 6 gm, cholesterol 0 mg, sodium 9 mg.
New Product–Documentation: Label. 1982, undated. 4 by 4.75 inches. Plastic film. 4 color featuring blue, green, red, orange, yellow and white on clear plastic. Picture of plate with brocoli, carrots and tofu with card which says, "100% Natural." Package says, "No Chemicals. No Cholesterol. No Preservatives. Low in Sodium. Low in Calories. High in Protein."

Product with Label purchased at Fresh Fields, Rockville Pike, Maryland. 1992. July 20. Label is 4 by 6 inches. Blue, black, green and orange on white. "Creamy texture. No cholesterol. No chemicals. No preservatives. 100% natural. Low sodium. Los calories. High in protein. High in calcium. Refrigerate 34-38ºF. Vacuum packed for freshness." Ingredients: "Filtered water, organically grown soybeans, natural calcium chloride Nigari–a naturally occurring mineral coagulant, not a preservative." Distributed by Stow Mills, Chesterfield, New Hampshire 03443.

5871. **Product Name:** Baked Marinated Tofu.
Manufacturer's Name: Summercorn Foods Inc.
Manufacturer's Address: 401 Watson, Fayetteville, AR 72701. Phone: 501-521-9338.
Date of Introduction: 1982.
Ingredients: Certified organic soybeans, purified water, natural calcium sulfate, soy sauce, spices.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Refrigerated.
New Product–Documentation: Label. 1987. 3.25 x 2.75 inches. Self adhesive. Brown and green on tan. "High in protein and calcium. No cholesterol. Contact us for detailed nutritional information & menu ideas."

5872. **Product Name:** Bean Cake, Tofu Curds, Pressed Tofu, Grilled Tofu.
Manufacturer's Name: Superior (Tofu) Soy Products Co. Renamed Superior Tofu Ltd. in 1994.
Manufacturer's Address: 1752 Commercial Dr., Vancouver, BC, V5N 4A3, Canada. Phone: 604-253-1050.
Date of Introduction: 1982.
New Product–Documentation: Business card from Percy Chan. Received 1987. Sept. Chinese characters read: Doufu, Doufu-hwa, Dou-jiang, Doufu-gan, Zha-doufu.

Talk with Rita Chan, owner. 1997. June 23. She and her husband started this company in 1982 at 1752 Commercial Dr., Vancouver. Originally they made 4 types of tofu plus soymilk. They stayed at this location until 1992. However in 1986 they expanded into a new location at 438 Main Street in Vancouver. In 1994 they moved out of the building on commercial drive and into their present, much larger building at 1469 Venables St., Vancouver, BC Canada V5L 2G1. Phone and fax: (604) 251-1806. Also in 1994 they changed the company name to Superior Tofu Ltd., the present name. Then in 1996 they moved out of Main St., consolidating all operations at 1469 Venables St. Over the years they have added many new soy products. In Feb. 1997 they started a restaurant named Superior Tofu in the heart of Chinatown in Vancouver. They serve mostly fast foods–using much of their own tofu and soymilk–and they also have a retail outlet.

5873. **Product Name:** Tofu Cutlets: Marinated and Baked.
Manufacturer's Name: Tofu Shop (The).
Manufacturer's Address: 768 18th St., Arcata, CA 95521. Phone: 707-822-7409.
Date of Introduction: 1982.
Ingredients: Tofu (water, organic soybeans grown according to Cal. Health Code Sect. 26569.11 and nigari). Marinated in a sauce of Tamari (a natural soy sauce made with water, soybeans, wholewheat and salt). Water, lemon, garlic and kelp.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Refrigerated.
New Product–Documentation: Label of 1985. Received 1988. 4 by 2.5 inches. Self adhesive. Blue, green, gold, and white. "Ready to eat... or reheat, naturally fresh... from our deli. A perfect snack fresh from the pack. Great in your favorite sandwich, diced and sauteed with rice and

© Copyright Soyinfo Center 2013

vegetables, or as a main dish. Simple to heat in oven (350ºF, 10 minutes) or frying pan. Perishable, keep refrigerated, 34-39º."

Two Labels (front and back) sent by Matthew Schmit. 2002. Sept. 9. The product was introduced in 1982. Label #1 from Feb. 2002. 3¼ by 2.75 inches. Self adhesive. Blue and orange-yellow on white. A handsome, impressionistic watercolor illustration shows a tofu shop on stilts on a cliff with a tree arching overhead. Label #2. Larger watercolor illustration. More white in the background. Will be used when the company is certified organic in Oct. 2002.

5874. Tofu Shop (The). 1982. Take-out deli foods–Naturally (Menu). 768 18th St., Arcata, CA 95521.
• ***Summary:*** "In our coolers and ready to go. Ready to eat or take home to reheat." Tofu burgers. Tofu-spinach pies. Vegetable pastries (arabian rice, hijiki, burritos). Avocado sandwiches (On 9-grain bread). Vegetable sushi rolls (brown rice, tofu, carrot, green onion, flavored with miso). Tofu-tahini salad. Tofu-herb dip (for chips, raw vegies or as salad dressing). Tofu cream pie (with real maple syrup and fresh fruit). Tofu pumpkin pie (on whole wheat crust with walnuts). Carob-soy pudding (creamy, topped with coconut & nuts). Plus more! The logo is a circular dragon by a circle. "Mon-Sat 9-6. Makers of fine tofu and other soyfoods." Address: Arcata, California. Phone: 822-7409.

5875. **Product Name:** [Tofu, Grilled Tofu, Tea-Time Tofu (Marinated), Vegetable-Soya Patties (Okara)].
Foreign Name: Tofu, Grilltofu, Jausen Tofu, Getreide-Soja Laibchen.
Manufacturer's Name: Tofurei Wels. Renamed Schoen Tofurei in 1987.
Manufacturer's Address: Prinz Eugen Strasse 1, A-4600 Wels, Austria. Phone: 07242/834222, 78073.
Date of Introduction: 1982.
New Product–Documentation: Letters from Norbert Brunthaler of Sojvita. 1988. Jan. 4 and Feb. 2. Price List. 1988. With dates products were introduced. Tofu. 250 gm and 1000 gm. Grilled tofu, 200 gm, is basted in soy sauce and ready to grill. Jausen Tofu, 170 gm, is marinated and pre-baked for use with bread, soups, or salads. The croquettes, 200 gm, provide bulk. A letter from I.A. Gertraud, managing director, notes that Walter Schoen is the owner. In 1987 the company name was changed to Schoen Tofurei. They have created a video about tofu. Envelope reads: Tofurei. Producer of plant foods. Reformfrischdienst.

Talk with Guenter Ebner of Sojarei Ebner-Prosl. 1990. May 28. He says this is the third largest tofu maker in Austria, after Sojarei Ebner-Prosl and SoyVita.

5876. Tosovic, T. 1982. [Use of soybean products in the milk processing industry]. *Hrana i Ishrana* (*Food and Nutrition*) 23(1/2):43-49. [27 ref. Ser; eng]*
• ***Summary:*** This review, referring mainly to developments in the USA, compares the composition of soymilk and cow's milk, and discusses the production of dairy-type products made from soymilk or soy protein isolate (including soy curd [tofu], yoghurt, cheese, and non-dairy creamers) and the use of soy products with milk or caseinates to produce fatty spreads, filled milks, cultured milk products, etc. Address: Visa Pedagoska Skola za Ekonomiku Domacinstva, Yugoslavia.

5877. Unicorn Village Restaurant. 1982. Menu. North Miami Beach, Florida. 1 p.

© Copyright Soyinfo Center 2013

• ***Summary:*** The five "Sensational Sandwiches" include Tofu Reuben Sandwich. The nine Lunch Specialties include: Sweet & sour tofu stir-fry. Unicorn burgers (with tofu). Tofu vegetable tempura. Address: North Miami Beach, Florida.

5878. Well Bean Deli (The). 1982. Menu. Santa Cruz, California. 1 p.
• ***Summary:*** Hot sandwiches: Tofu burger. Tofu Santa Cruz. Tempeh burger. TLT. Falafel burger. Mochi burrito. Bean taco.

Cold sandwiches: Missing egg sandwich. Tempeh salad sandwich. Sushi rolls.

Soups with Ak Mak crackers: Miso. Cream of mushroom (changed daily).

Spreads: Tossed. Tofu salad. Tempeh salad. Salad of the day.

Special entree: Tofu quiche. Tofu eggplant Parmesan (changed daily).

From the deli: Tempeh salad. Missing egg salad. Tempeh chips. Garlic onion dip. Tahini dip. Burger mix. Soy yogurt. Fresh fruit salad.

Desserts: Carob mint pie. Tofu cheesecake. Fresh fruit salad.

Drinks: Carobanana shake. Shake-a-leg hi protein drink. Strawbanana shake. Soymilk–plain, carob. Herb teas (assorted). Fruit smoothie–apple plus choice of orange plus two fruits.

Note: This deli was previously located at 349 Soquel Avenue, Santa Cruz. Address: 594 Redwood Dr., Santa Cruz, California 95060. Phone: (408) 427-2586.

5879. **Product Name:** Santa Cruz Tempeh. Soy-Rice: Tempeh of the Sea with Nori Seaweed (Vacuum Packed).
Manufacturer's Name: Western Soy Complements.
Manufacturer's Address: 1560 Mansfield Ave., Suite D, Santa Cruz, CA 95062. Phone: 408-479-05968.
Date of Introduction: 1982.
Wt/Vol., Packaging, Price: 8 oz vacuum packed. Retails for $1.59 (8/88 Berkeley, CA).
How Stored: Frozen.
New Product–Documentation: Products with Labels purchased in Berkeley, California. 1988. Aug. 30. 2.75 by 5 inches. Black, white and brown. "A cultured soyfood. Preparation: Use as a protein-rich staple food: slice, fry, bake, or steam. Season to taste. Occasional black or grey spots are part of the tempeh culture and not indicative of spoilage.

Note that this company is at the same address as Wildwood Natural Foods of Santa Cruz.

5880. **Product Name:** BRT: Brown Rice & Tofu Sandwich (In a Chapati) [Hot Peanut].
Manufacturer's Name: Wildwood Natural Foods.
Manufacturer's Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1982.
Wt/Vol., Packaging, Price: 11.5 oz.
How Stored: Refrigerated.
New Product–Documentation: Label sent by Paul Duchesne. 1989. Aug. 11. "Ready to eat foods, naturally." In the ingredients, the tofu is listed as "Wildwood Tofu" rather than "UFO Tofu by Wildwood." Talk with Paul Duchesne. 1989. Aug. 17. The term "BRT" probably started to be used in late 1981 or early 1982, while Paul was still with Wildwood. The hot peanut flavor was introduced after he left Wildwood in Dec. 1981.

5881. **Product Name:** Tofu-Curry Salad. Later renamed Curry-Tofu Salad.
Manufacturer's Name: Wildwood Natural Foods.
Manufacturer's Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1982.
Ingredients: Wildwood tofu (filtered water, soybeans organically grown in accordance with the California Organic Foods Act of 1990, nigari/magnesium chloride, a natural firming agent), okara (soybean pulp), celery, carrots, dried apples, soy sauce, safflower oil, curry powder, mustard, apple juice, garlic, spices and salt.
Wt/Vol., Packaging, Price: 12 oz plastic tub. Retails for $2.25.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods. 1983. Summer. p. 42-43. "Dated for 7 days shelf life." Label. 1983, undated. 3 x 2 inches. Dark and Light green on white. Silhouette of woods with birds. "Ready to Eat Foods. Naturally. Perishable–Keep refrigerated." Saw Tofu Curry Salad and Tofu Veggie / Vegetable Salad on sale in Berkeley. 1988. Aug. 30.

Label sent by Billy Bramblett of Wildwood. 1990.

Label sent by Billy Bramblett of Wildwood. 1998. July. He says this product was introduced in 1982.

5882. **Product Name:** Tofu Noodles (tou-kan ssu).
Manufacturer's Name: Wy Ky Inc.
Manufacturer's Address: 237 San Fernando Rd., Los Angeles, CA 90031.
Date of Introduction: 1982.
New Product–Documentation: Interview with Bill Lee of Wy Ky. 1982. June 29. Wy Ky is the only maker of this product in America.

5883. **Product Name:** Tofu Pudding (toufu hwa).
Manufacturer's Name: Wy Ky Inc.
Manufacturer's Address: 237 San Fernando Rd., Los Angeles, CA 90031.

Manufacturer's Address: 237 San Fernando Rd., Los Angeles, CA 90031.
Date of Introduction: 1982.
New Product–Documentation: Interview with Bill Lee of Wy Ky. 1982. June 29. Lee thinks Wy Ky was the first company to make this product in America.

5885. Aihara, Cornellia. 1982. The *dô* of cooking: Complete macrobiotic cooking for the seasons. Oroville, California: GOMF Press (George Ohsawa Macrobiotic Foundation). 230 p. Illust. by Carl Campbell. Index. 28 cm.
• ***Summary:*** This is a compendium of four seasonal cookbooks, each with the title *The Dô of Cooking* (*Ryorido*), first published individually in 1971. Contents: Preface. Introduction. Selecting good foods. The secret of cooking. Spring. Summer. Autumn. Winter. Glossary. Cutting styles. Topical index (within each major food category {grains, grains with vegetables, seaweeds, beans and tofu, etc.}, recipes are listed alphabetically). Recipe index (of all recipes).

Contains many recipes calling for: Miso, natto, tofu (regular, deep-fried, and frozen). Also: Amazake, azuki beans, kuzu, mochi, sea vegetables, seitan (wheat gluten), sesame seeds and gomashio.

Near the front of the book is a biographical sketch and photo of Cornellia Aihara. She was born in 1926 in Fukushima, Northern Japan. She learned macrobiotics from George Ohsawa when he came to her town (Aizuwakamatsu) for lectures; this changed her life. While in school, she began corresponding with Herman Aihara, who was living in New York. In 1955 he invited her to New York. Although they had never met, she trusted him and went to American with only ten dollars in her pocket. They were married soon after her arrival in New York. There they engaged in retail business. When Mr. and Mrs. Ohsawa came to the USA from Europe, Cornellia studied macrobiotic cooking by helping Mrs. Lima Ohsawa at the first macrobiotic summer camps on Long Island in 1960; in the Catskill Mountains in 1961; at the University of California at Chico in 1963; and at the Big Sur Camp in 1964. Since 1961 Cornellia has devoted her life to the teaching of macrobiotic cooking, childcare, home remedies, and philosophy. Since 1965 Cornellia and Herman Aihara have organized fourteen macrobiotic summer camps in California; her cooking has been the biggest attraction.

On the cover is a large color photo of freshly prepared food, including slices of deep-fried tofu. Address: 902 14th St., Oroville, California 95965.

5886. Alejandro, Reynaldo G. 1982. The Philippine cookbook. New York, NY: Coward, McCann & Geoghegan. 256 p. Illust. Index. 25 cm.
• ***Summary:*** Tausi [fermented black soybeans] is called for in two recipes: Lapu-lapu with tausi: Grouper with black bean sauce (with "1 tablespoon minced ginger, 4 tablespoons tausi {black beans; sold in Oriental food stores}, p. 141). Alimango sa tausi: Crabs in black bean sauce (with "8-ounce can black bean sauce," p. 149).

Bean curd or tokwa is called for in recipes on 7 pages including p. 19, 33, 140, 141, 163, 167, 187. Page 163: "1 cup diced tokwa or bean curd (sold in Oriental food stores)."

Soy sauce is mentioned on 58 pages, including pages 12, 13, 18, 20, 23, 24, etc. "Adobo" is defined as "cooked in vinegar, soy sauce, and garlic."

The "Glossary" (p. 238-41) includes: Misu–soybean paste. Tausi–black soy beans, salted and fermented. Togue–bean sprout. Tokwa–soy bean cake [tofu]. Address: Manhattan, New York City, New York.

5887. American Soybean Assoc. 1982. Tofu and the American soybean. *Checkoff Successfile.* Japan #105. 2 p.
• ***Summary:*** Contents: Summary. The problem. ASA's program and execution. Results. "In 1958 Japan's tofu industry used only 955,000 bushels of U.S. soybeans. Government restrictions and the tofu industry's quality

© Copyright Soyinfo Center 2013

standards held back the growth of U.S. imports by the tofu industry." Meanwhile Japanese tofu makers were using nearly 8 million bushels of soybeans grown in Japan or imported from China.

Step 1. ASA arranged for two senior Japanese food scientists to spend several months at USDA's Northern Regional Research Lab in Peoria, Illinois. They conducted research on tofu and miso to determine which U.S. soybean varieties worked best. "At the same time, ASA, the Japan Tofu Association, and the Food Research Lab of the Japanese Ministry of Agriculture repeated the tests using various varieties of U.S. soybeans.

"The result was the development of a soft tofu production method, which gave reduced loss of water-soluble proteins and higher yields of tofu [because the tofu contained more water]. "Most important to U.S. farmers it was discovered that U.S. soybeans were the most suitable to the new process."

Next a "series of technical seminars were held in which demonstrations were presented to illustrate the superior quality of U.S. soybeans and the new processing methods." Gil Griffis, ASA director for Asia, says, "We succeeded in destroying the myth that only Japanese and Chinese soybeans could serve the tofu market."

ASA's next goal was to increase tofu consumption in Japan. In cooperation with the Japan Tofu Association, ASA conducted a nationwide series of cooking classes from the back of a kitchen-equipped bus that traveled from city to city. New tofu recipes were developed to appeal to the young homemaker. Several of the cooking seminars were televised, thus expanding the audience. "In addition, attractive posters were created and displayed outside nearly 25,000 tofu shops in Japan.

"Results: After 22 years of promoting U.S. soybeans to the Japanese tofu industry, the U.S. has made great inroads into the market. Last year Japan's tofu industry used nearly 17 million bushels of soybeans. Nearly 16 million bushels of the total industry purchases [about 94%] came from the U.S.–the production of over half a million acres of U.S. soybeans."

A large graph shows "Consumption of whole soybeans in foods" from 1975 to 1980 [in Japan]. Tofu and others has risen from 525,000 tonnes (metric tons) to about 590,000 tones. Miso has remained unchanged at about 180,000 tonnes. Photos show: (1) ASA's Ms. Kojima with a Japanese man making tofu in a traditional shop. (2) An ASA cooking class attended by women. (3) A Kentucky Fried Chicken outlet in Japan. Address: St. Louis, Missouri 63141.

5888. An, Tzu-chieh (An, Zijie). 1982. Cracking the Chinese puzzles. 5 vols. Hong Kong: Stockflows Co. 24 cm.
• ***Summary:*** Vol. 2, p. 1099 contains an entry for the Chinese character "Fu," which means "rotten, putrid, stale, corroded, bean curd,..."

Doufu is "bean curd."

Furu is "fermented bean curd." *Fuzhu* is "dried bean milk cream in tight rolls" [i.e., shaped into tight rolls–called "dried yuba sticks]."

Note: Vol. 2 contains pages ix + p. 675-1358.

5889. Aykroyd, Wallace R.; Doughty, Joyce. 1982. Legumes in human nutrition. 2nd ed. Revised by Joyce Doughty and Ann Walker. Rome, Italy: Food and Agriculture Organization of the United Nations (FAO). viii + 152 p. Illust. 28 cm. The original edition was 1964. [293* ref. Eng]
• ***Summary:*** Contents: Preface. Introduction. History of legumes. Production and consumption. Composition and nutritive value. Methods of processing and cooking. Effects of processing on nutritive value. Toxic substances. Legume proteins. Observations on the value of legumes in human feeding. The place of legumes in human diets. Appendixes. References.

On pages 49-51 are sub-sections on: Traditional fermented soybean products (methods of home preparation are detailed in Appendix 5, p. 120-22): Soy sauce (shoyu), soy paste (miso), tempeh, natto, Hammanatto. Protein separation and other extraction techniques. Soy-milk. Soybean curd (tofu). Modern products from soybeans. Soy flour and grits. Soy protein concentrates. Isolated soy protein.

Under tofu (p. 50): "The curd may also be fermented to make soy-cheeses, which resemble the more highly flavoured European cheeses. These are known in China as *chou tofu*, which means stinking bean curd." See also p. 120, where yuba is mentioned.

Note: This 1982 edition was made by revising the original 1964 edition. Ann Walker is from the Dep. of Food Science, University of Reading. Dr. Wallace Aykroyd died in Feb. 1979 just as he was taking the first steps toward this revision. Address: 1. Dep. of Human Nutrition, London School of Hygiene and Tropical Medicine; Former Director, Nutrition Div., FAO, Rome, Italy.

5890. Berman, Louis Arthur. 1982. Vegetarianism and the Jewish tradition. New York, NY: Ktav Publishing House, Inc. xxi + 119 p. Illust. General index. Index to Biblical references. Nutrition and cookery index. 24 cm. [115* ref]
• ***Summary:*** Contents: Preface and acknowledgments. Foreword by Rabbi Zalman Schachter. Introductory remarks on vegetarianism by Dr. Jean Mayer. 1. One man's meat is another man's porridge. 2. Compassion for animals in the Hebrew Bible. 3. The psychological roots of human compassion. 4. The craving for flesh. 5. Slaughter as a mode of worship. 6. The dietary laws as atonements for flesh eating. 7. The celebration of life. 8. What science can tell us 9. Steps toward vegetarianism in recent Jewish life. 10. Eight questions and answers. Appendixes: I. What's cooking? II. Protein complementarity. Notes.

Foods mentioned include: Gluten (wheat protein). Lecithin. Marmite. Peanut butter. Tofu (p. 82, 106). TVP (p. 76). Address: Univ. of Illinois at Chicago Circle.

5891. Bernstein, Richard. 1982. From the center of the earth: The search for the truth about China. Boston & Toronto: Little, Brown and Co. xii + 260 p. Index. 24 cm.
• ***Summary:*** Page viii, titled "A note on romanization," states: "Every system ever devised for rendering the Chinese language into the Roman alphabet has its imperfections. The Communist Chinese in 1979 put into use an alphabet called *pinyin* (literal meaning: combine sounds) that has gained international acceptance. It is the system that I have used for most Chinese names and phrases. It has a couple of idiosyncrasies. The initial *x* is pronounced like the English *sh;* for example, *Deng Xiaoping* might be more phonetically rendered as *Deng She-ao Ping.* The letter *q,* which in *pinyin* is sometimes not followed by a *u,* sounds like the English *ch,* as in the Emperor *Qianlong* (pronounced *Chee-en Loong*). The letter *c* is pronounced *ts,* as in *Cao Yu,* the famous dramatist, whose name was formerly spelled *Tsao Yu.* Otherwise, *pinyin* gives a pretty close idea of the way Chinese words are actually spoken.

"In two kinds of situations, however, I do not use *pinyin.* First, for two well known figures, Mao Tse-tung and Chou En-lai (*pinyin* would be Mao Zedong and Zhou Enlai), I have stuck with the old alphabetization for reasons of greater familiarity. The second case concerns some words that by common practice have for decades been spelled in a way that conformed to no standard system of romanization. These include the place-names Peking (*pinyin:* Beijing), Canton (Guangzhou), Nanking (Nanjing), Chungking (Chongqing), and Hong Kong (Xianggang), as well as a few historical figures, like the ancient philosopher Chuang-tse and Nationalist leader Chiang Kai-shek. These alphabetizations are more likely to be recognized by the nonspecialist than are the standardized *pinyin* spellings."

During the "three disastrous years"–the period from 1959 to 1961–after the Great Leaf Forward, there was extensive starvation in China, but the number of those who died were never made public (p. 199).

Tang remembers the time that "prisoners were given some pieces of bean curd to eat. She was so overjoyed that she didn't want to eat all of it at once but kept some of it apart and managed to ferment it. She says that it was the most delicious thing that she ever ate in her life" (p. 213). Address: Time magazine correspondent, China.

5892. Blair Island. 1982. Menu. Eugene, Oegon. 1 p. both sides. 24 x 11 cm. Black on yellow.
• ***Summary:*** This soy deli serves breakfast and lunch. Soy-related products in the breakfast menu include: Tofu pocket (sauteed tofu in a pita pocket). Tofu scrambles (Blair Island style tofu, sauteed onions and cheddar cheese). Tofu breakfasts: "Blair Island style tofu is pressed, then sauteed with seven herbs, spices, and shoyu. Served with sprouts, fresh-baked toast or muffin and a side of sweet and sour tomato sauce. Regular (tofu, sprouts and sauce), or Special (tofu smothered with mushrooms and onions)." Side orders: Cup of tofu. Cashew milk.

Lunch. Tofu tia (tofu with sprouts and sauce wrapped in a corn tortilla). Tofu pocket sandwich. Tempeh tia. Tia special. Buddah burger (tofu-mushroom burger). Temptation (tempeh burger). Tempeh burrito. Bean burrito with tofu sour cream. Salads with tofu sour cream dressing. Tofu cheesecake desserts with different toppings.

Note: This company was in business in Aug. 1979, located on an island between two branches of the road. Address: 325 Blair Blvd., Eugene, Oregon 97402. Phone: 683-5117.

5893. Bunka Shuppan Kyoku. 1982. Tôfu no hon: Tsukutte tabeyô [The book of tofu: Let's make and eat]. Tokyo: Bunka Shuppan Kyoku. 94 p. Illust. Index. 25 cm. [Jap]
• ***Summary:*** Packed with recipes and color photos, this book also describes how to make tofu at home (a wooden tofu kit is pictured on page 95), and gives a brief history of tofu (by Abe Koryu), with two early woodblock prints. One print (p. 91) from the *Wakoku Shoshoku E-zukushi,* by Hisakawa MORONOBU (a famous Japanese artist of the Edo period) (1685) shows a Japanese man carrying two water-filled wooden tubs of tofu suspended by 4 ropes at each end of a shoulder pole. He is selling tofu, probably in Kyoto. To his left is walking a kimono-clad woman, with a similar wooden tub (covered with a cloth but probably containing tofu) atop her head. She probably bought the tofu from him. Both people are bare footed. The caption says: "Please eat tofu. I came all the way from Nara."

The other print (p. 92) titled "Tofu seller" (*Tofu uri*) from the book *Shichijû-ichiban Shokunin-zukushi Uta Awase,* by Mitsunobu TOSA (1657) shows a Japanese woman seated on her heels in the seiza position on the ground behind a short table (about 4 inches high, 4½ feet long, and 14 inches wide). On the table is one large cake of tofu (about 10 inches square and 3 inches high) and four smaller pieces (each about 6 inches square and 1 inch high).

5894. Butterfield, Fox. 1982. China: Alive in the bitter sea. New York, NY: Bantam Books. 468 p. Illust. Index. 23 cm.
• ***Summary:*** A section discussing food shortages and rationing (p. 100-01) states that each neighborhood state grocery shop issues a special type of ration booklet. "It includes monthly allotments of soap, sugar, bean curd, corn starch, some types of fish, and several Chinese delicacies like sesame paste and vermicelli noodles made from green beans."

In Chongqing–a city in Sichuan province that was Chiang Kai-shek's wartime capital–the author enjoyed "a

peppery bean-curd treat" (p. 105-06). Getting enough to eat is an obsession for most Chinese. Popular cooking oils (especially peanut or rapeseed oil) are hard to get (p. 117). Address: Peking, China & USA.

5895. Chen, Jiying. 1982. Yi dai zhen qi ren: Li Shizeng zhuan [Legend of a generation: Biography of Li Shizeng (Li Yu-ying)]. Taipei, Taiwan: Jin dai Zhongguo chu ban she: Zong jing xiao Zhong yang wen wu gong ying she, min guo 71 [1982]. 4 + 4 + 4 + 350 p. + [8] p. of plates. Illust. 22 cm. Series: Xian lie xian xian zhuan ji cong kan, Jin dai Zhongguo cong shu. [5 ref. Cht]

• ***Summary:*** Li Shizeng is the "courtesy name" of Li Yu-ying. Li's courtesy name was used mostly in his political and public life. This book is written using the Taiwanese form of Chinese characters, which most Chinese from mainland China have great difficulty reading. The author of this book is a woman.

Contents: 1. Ancestry. 2. Birth and childhood. 3. Life as a young adult. 4. From Yi He Tuan to founding of Republic of China. 5. Political life while studying abroad. 6. Cruise on Xin Ming and others. 7. Jin De Club and the Work-Study Club. 8. World Club. 9. Li Huang-works while studying abroad. 10. Summary of the life of work-study students in France. 11. Club of Chinese in France and Communist Party in France. 12. Li Shuhua–works while studying abroad. 13. End of the Ch'ing Dynasty and the National Palace Museum. 14. Revolutionary Army and University of China-France. 15. The meaning of Revolution and Social Movement of Saving the Republic Party and the Country. 16. Start and end of Beijing University. 17. Founding of Federal Beijing Research Institute and Development, and the Result. 18. Transformation of Pan Yang and Government movement to Taiwan. 19. Late life of Li Shizeng and Mung Do. 20. Li's legacy.

Li's work with soybeans: Page 41. Li attended a university in France, where he majored in biochemistry. He discovered that, not only could many kinds of nutritious food be made with soybeans, but soybeans could also be used to make fake ivory, which no one had ever discovered before. He wrote his first book, *The Soybean*, which was published in France. Note: There is no mention that Li did any work with soybeans when he returned to China.

Pages 42-43: After staying in France for 6 years, Li Yu-ying went back to China in order to raise funds for his tofu company. Six months later, he returned to France with 5 workers. They bought machines and set up the tofu company at a place near Paris, called Colombes. The name of the company is *Usine Caseo-Sojaine*, and it produces foods made from soybeans.

Page 44. In 1909, Sun Zhong-shan [Sun Yat-sen] (founder of the Republic of China) visited the company and wrote, "My friend Li Shizeng has conducted research on soybeans, and advocates eating soybean foods instead of meat." That is the principle of the tofu company.

Pages 110-11: Mr. Li was a biochemistry major while he was studying in France. The company only made sweet soy bean cake for Chinese workers and dried bean curd. He tested the nutritional composition of soybeans. The result: Soy beans contain more oil and protein than milk. He founded a tofu company in Paris and a vegetarian restaurant. Unfortunately the French didn't like to eat tofu; they didn't even like soy milk. So the business of the tofu company was not so good towards that end.

Li Shizeng's genealogy: Father: Li Hong-Zao (1819-1897), who had 2 wives. The 2nd wife (Yang Shao-Ji) was the mother of Li Shizeng (Li Yu-Ying). Li Yu-Ying had 5 brothers and 4 sisters. Li was the 5th boy in the family. Brothers (Birth and death dates not given): (1) Li Zhao-Ying. 2nd and 3rd brothers died at early age. (4) Li Kuan-Ying. (5) Li Yu-Ying (Li Shizeng). Sisters (Birth and Death dates not given): (2nd sister) Li Shu-Yi; died at early age. (4th sister) Li Shu Lian; died at early age.

There were four women involved in Li Shizeng's life. He was married 3 times, and lived with one other woman. First wife: Yao Tong-Yi. Married in 1897 when Li was 17. Yao, who was Li's cousin, died in 1940. They had two children, a boy (Li Zongwei) (1899-1976) who married Ji Xieng-Zhan, and a girl (Li Yamei) (birth and death dates not given) who married Zhu Guangyi. Li Shizeng had two grandsons and one granddaughter from this marriage: Grandsons: Li Da-Yang. Li Er-Yang. Granddaughter: Li Ai-Lian.

After Yao died, Li Shizeng was in a relationship with an American woman called Mrs. Vegetarian (Ru Su). They met in New York and were involved with each other there from 1943-1947. Li's second wife: Lin Su Shan. Married in 1947. Lin died in 1954. Li's third wife: Tian Baotian. Married in 1957 when Li was 77. Tian was 42. Tian later moved to the USA and stayed there for the rest of her life.

On page 349 is Li's biography.

Note: Li Yu-ying, a soyfoods pioneer in Paris, France, lived 29 May 1881 to 3 Sept. 1973.

Of the 8 glossy pages of plates, there are 7 photos of Li, including one portrait and three in considerable detail. These photos show:

(1) Li Shizeng in about 1961. (2, top): Li Shizeng and classmates in 1900; Li is in the top row, far right. (3, bottom): Founders of World Club (right to left): Li Shizeng, Zheng Jing-Jiang, Wu Zhu-Hui.

(4) Li Shizeng and the president of Republic Party [in Taiwan] in 1953.

(5) Li Shizeng and his third wife Tian Baotian in 1958. (6, top): Li Shizeng in 1972.

(7, bottom): Li Shizeng giving a speech in Taiwan in 1973. Address: Big Lake Road, Inner Lake, Taipei, Taiwan (ROC).

5896. Coyle, L. Patrick, Jr. 1982. The world encyclopedia of food. New York, NY: Facts on File, Inc. xv + 790 p. Illust. Index. 28 cm.
• ***Summary:*** Contains basic information (sometimes interesting, often superficial, with quite a few errors) about some 4,000 foods and beverages, including worldwide staples (potatoes, soybeans, apples), local specialties, delicacies, major brand-name products (Coca-Cola) and oddities (penguin eggs, grasshoppers). With 200 line drawings, 150 black-and-white photos, and 50 color plates.

See entries for soybean (incl. black soybeans, fermented tofu, miso, soybean flour, soybean milk, soybean oil, soy sauce, tempeh; tofu, "white soybeans"), and Worcestershire sauce (which "is said to contain more than 100 ingredients, including soy sauce, vinegar, molasses, chili, anchovies, garlic, shallots, tamarinds, limes and many spices").

Tofu: "A fermented form of this, called stinking tofu, is a favorite snack of the Chinese. It has a pungent smell and is usually deepfried [deep fried] and seasoned with soy sauce, vinegar, mashed garlic or chili paste. The food value is high..." (p. 643).

Note: This is the earliest English-language document seen (Oct. 2011) that contains the term "stinking tofu."

Also has entries for: Almond, chufa, peanut, peanut butter, peanut oil, seaweed (incl. algae, dulse, laver, rock weed / sea wrack, agar-agar, carrageen, kelp), sesame (with illustration of leaves, flower, and pods). Address: Freelance writer, Oceanside, California.

5897. Daenzer, A. Walter. 1982. Tofu, l'invitation au pays de cocagne [Tofu, invitation to the land of Cockaigne]. Zurich, Switzerland: Editions Bewusstes Dasein. 107 p. Illust. No index. 21 cm. [Fre]
• ***Summary:*** Contains 100 recipes. Contents: Soy proteins. What is tofu? How is tofu made? A visit to a tofu factory. The biological value in food and diet. Tofu and soymilk in Third World Countries. 100 tofu recipes from the land of milk and honey.

Note: Cockaigne, or Fool's Paradise, is often contrasted in literature to The Garden of Eden. *Webster's Dictionary* defines Cockaigne (from the Middle English *cokaygne*, which comes from the Middle French (*pais de*) *cocaigne* = land of plenty), a term first used in the 14th century, as an imaginary land of great luxury and ease. Note also the connection with the addicting drug cocaine. Address: Soyana, Friedensgasse 3, CH-8002, Zurich, Switzerland.

5898. Daenzer, A. Walter. 1982. Tofu, die Einladung ins Schlaraffenland [Tofu, invitation to the land of plenty]. Zurich, Switzerland: Verlag Bewusstes Dasein. 97 p. Illust. 21 cm. [Ger]
• ***Summary:*** Contains 100 recipes. Contents: 1. Soy protein–Food of the future. 2. What is tofu? 3. How is tofu produced. 3. A visit to the Soyana tofu shop (Tofurei; includes a discussion of Sri Chinmoy and 8 photos of the Soyana tofu-making process). 4. The value of organic tofu for nutrition and the diet. 6. Tofu and soymilk in developing countries. 7. 100 tofu recipes from the land of milk and honey.

The author talks a lot about purines, antibiotics, hormones, and cholesterol in meat. Also emphasizes organically grown (biologisch) soybeans and tofu (made at Tofurei), and Reform Houses. Living Farms, one source of organic soybeans, was founded on 6 Jan. 1975. Address: Soyana, Zurich, Switzerland.

5899. Editors of Time-Life Books. 1982. Dried beans and grains. Alexandria, Virginia: Time-Life Books, Inc. 176 p. Illust. Index. 28 cm.
• ***Summary:*** Soy-related recipes include: Stewed bean curd (p. 108). Fried bean curd (p. 108). Mrs. Chen's bean curd (Ma-po dou-fu, p. 109). Sizzling bean curd with ginger ankake sauce (p. 109). Bean curd and vegetable tempura (p. 110). Red-cooked pork chops with bean curd (p. 110). Home-style bean curd (p. 110-11). Seafood sizzling rice (San hsien kuo pa) with soy chicken sauce (p. 135). Bean (soy) and chicken stew (p. 159). Split peas with barley (and soy grits, p. 161). Bean curd (p. 165). Address: Alexandria, Virginia.

5900. Elliot, Rose. 1982. Vegetarian dishes from around the world. 1st American ed. New York, NY: Pantheon Books. xxii + 296 p. 17 line drawings. Index. 24 cm.
• ***Summary:*** The name of each of these traditional vegetarian recipes is given with its country of origin. The only soy-related recipe that could be found was Mushrooms and tofu (China, p. 104-05). The introduction to this recipe states: *"Tofu*, or bean curd, is creamy white and extremely high in protein. It is sold in small squares in Chinese-food shops and now that tofu is gaining in popularity, even in your regular grocery store."

"Originally published in a somewhat different form in Great Britain as *Vegetarian Dishes of the World* by William Collins Sons & Co. The author, a self-proclaimed vegetarian since the age of 3, is one of England's most popular cookbook authors. She was born and educated in England, and now lives in Hampshire with her husband and 3 daughters. "The real strength of the British contribution lies in baking... I love the easy-going, inventive feel of American cookery; its exciting and its fun. Address: Hampshire, England.

• ***Summary:*** The author started and ran the Ranch House Restaurant in the Ojai Valley of southern California, which served vegetarian food. Soy-related recipes include: Baked soy beans (p. 69). Sesame-soy bread (p. 76). Tofu with tempura vegetables (p. 126). Soybean loaf (p. 132). Mushrooms with tofu (p. 148). Address: Ojai, California.

5908. Horsley, Janet. 1982. Bean cuisine. Stable Court, England: Prism Press. 89 p. Illust. (by Andrew Pomeroy). 20 cm. General index. Recipe index. U.S. edition published in 1989 by Avery Publishing Group (Garden City, New York). * Address: England.

5909. Iibuchi, Sadaaki; Yano, Yoshimasa; Kawashima, Masao; Nakagawa, Keizo. 1982. Energy analysis of a kori-dofu plant. *J. of Food Engineering* 1(1):17-29. [35 ref]
• ***Summary:*** In a plant which used 13 operations to process 6 tons/day of soybeans to make dried-frozen tofu (kori-tofu), total energy consumption per 1 kg of dried-frozen tofu was 27.1 MJ of fuel energy plus 8.3 MJ of electrical energy. This total of 35.4 MJ of energy required to produce 1 kg of product is rather high compared to the energy required to make other foods. The waste-water treatment consumed more energy than the entire manufacturing process. The analysis was made in 1980 on a plant owned by Habutae Tofu Co. Ltd., Kanazawa-shi, Japan. The term "exergy" (the ability of work) is used frequently. Address: 1-2. Dep.

of Agricultural Chemistry, The Univ. of Tokyo, Tokyo 113, Japan; 3-4. Habutae Tofu Co. Ltd., Kanazawa-shi, 921, Japan.

5910. Jack's Beanstalk. 1982. Tofu institutional recipes: Developed for schools and college by Brigham Young University Food Science and Nutrition Department (Recipe cards). Salt Lake City, Utah. 11 cards.
• ***Summary:*** The research report contains: 30 tofu recipes–15 entrees. Each recipe card, 5½ by 8½ inches, is color coded: Soups (salmon cards), salad dressings and salads (green), breads and pancakes (blue), entrees (yellow), and desserts (pink). Each recipe yields 100 servings. All recipes have been used successfully in cafeteria kitchens on the Brigham Young University (BYU) campus. Research data showing staff and student acceptability. Cost comparison of tofu to animal products. Preparation techniques and equipment for the institutional kitchen. An attitude survey with recommendations for a successful introduction of tofu to staff and students.

The recipes are: Canadian cheese soup with tofu. Guacamole with tofu. Creamy blue cheese dressing. Thousand island dressing. Potato and tofu salad. Grenadine tofu dressing. Corn bread with tofu. French toast with tofu. Banana nut tofu bread. Buttermilk and tofu hotcakes. Macaroni and cheese and tofu.

Note: A letter dated 8 June 1982 from Bonnie Roddy of Jack's Beanstalk, Inc. (Salt Lake City, Utah), on company letterhead, announces the publication of these institutional recipes. Jack's Beanstalk funded this research at a cost of more than $2,000. Address: 2160 West 2300 South, Salt Lake City, Utah 84119. Phone: 801-973-9777.

5911. Jenkins, Suzy; Praskin, L.; Praskin, A. 1982. Plenty integrated soy program, Guatemala. Summertown, Tennessee: The Book Publishing Co. 48 p. Illust. 28 cm.
• ***Summary:*** This remarkable, inspirational, creative booklet contains the best summary of Plenty's Solola Soy Program, with 71 excellent black-and-white photos, many of them taken by Jenny Banks Bryant and others. "Plenty Canada" (founded in 1976 by a group of Canadians) provided the funding for this project and Plenty International provided the volunteers. It was a very successful and innovative project, that unfortunately was suspended in 1980 when the political situation became too dangerous for Americans to stay in the area. Happily, it was restarted by Plenty Canada in mid-1985 and as of early 1988 is active and growing.

Contents: Plenty. Preface. Soy agricultural program. Soy demonstration program. Soy extension program. Step-by-step demonstration process (how to make soymilk and tofu in a Guatemalan village). Plenty Solola soy dairy. Soy dairy floor plan and flow sheet. Step-by-step production procedures. Marketing soy products. Poor people and nutrition. Training apprentices. Appendix.

The Preface, by Plenty director David Purviance, notes that Plenty went to Guatemala in 1976 to help with reconstruction following a severe earthquake. Plenty set up a primary health care program and an orphanage. "In these programs, we fed soymilk to the children who were brought to us for care. The beneficial effects on these malnourished kids were unmistakable. Many of the Indian mothers observed that our own children remained healthy on a soy-based diet. Living in the village and learning the language and lifestyle of the people, Plenty volunteers remained accessible to our Indian neighbors.

"In 1978, agronomist Daryl Jordan began testing the feasibility of growing soybeans in the highland area. The results were good, and Suzy Jenkins started demonstrating how to make soymilk and tofu in some of the local homes. As interest and support for the soybeans grew, they were joined by Laurie and Alan Praskin to help expand the project. During the next two years, their efforts produced a three-phase program of soy introduction that improved the lives of several thousand Guatemalan Indians. What follows is their account of a program that included the cultivation of soybeans by village farmers, home demonstration of soy preparation techniques and the creation of a village-scale soy dairy which produces soy ice cream and tofu for sale in the local market and for free distribution to hungry kids."

Page 15 states: "The Extension Program was implemented by one soy technician and the 18 trained cooperative extensionists. In six months over 1,000 men and women were taught how to make soymilk and tofu through this program. One hundred ten classes were held in 74 different areas." Photos show tofu and soymilk being made. Thirteen photos (p. 12-17) show the step-by-step process for making tofu in a Guatemalan village, including:

(1) San Martin soy extensionists preparing tofu at a nutrition class.

Twenty-four photos (p. 18-32) show the Solola Soy Dairy, including its construction, inside, outside, floor plan, and the step-by-step process for making tofu and soy ice cream. Page 21 states: "The soy dairy started operation in February of 1980. It produces approximately 90 to 100 gallons of soy ice cream and 60 to 75 pounds of tofu a week. Its maximum production capacity with the present equipment is 200 gallons of ice cream and 450 pounds of tofu a week. It was stocked with a year and a half supply of soybeans and has since been supporting itself by selling soy ice cream and tofu from the dairy in the local marketplace."

(2) "The soy dairy is open for selling tofu and soy ice cream seven days a week. Suzy Jenkins hands soft-serve soy ice cream in cones from a soy dairy window (p. 32).

(3) Little Mayan girl eating seasoned tofu from a bowl. "A one-half pound serving of tofu sells for 25 cents [U.S.] and contains: 163 calories (10% of the Recommended Dietary Allowance for a child age 4-6 years), and 17.7 grams of protein (59% of RDA) (p. 37).

© Copyright Soyinfo Center 2013

(4) Little Mayan girl licking a big soy ice cream cone as she runs. "Our soy ice cream contains soymilk, tofu, sugar and oil, which make it abundant in calories and protein. A half-cup serving of our soy ice cream sells for 10 cents and contains 183.4 calories" (11% of the Recommended Dietary Allowance for a child age 4-6 years) and 3.1 grams of protein (10% of RDA) (p. 38).

In the chapter titled "Marketing soy products," a photo (p. 33) shows the Soy dairy booth in the Solola market. The sign over the window reads: "Helados y Queso–Hecho de frijoles de soya" ["Ice cream and cheese–Made from soybeans"]. Photos on the next two pages show: Mayan women preparing tofu to be sold on tortillas at the Solola State Annual Fair. The booth at the fair with a sign advertising soy ice cream and tofu. Guatemalan soldiers enjoying soy ice cream cones. Many happy kids holding up soy ice cream cones. A Plenty volunteer "giving away soy ice cream to 180 children at a school in a rural village."

Note: This is the earliest document seen (Jan. 2003) that mentions "Plenty Canada" (see p. 4). Address: The Farm, Summertown, Tennessee.

5912. Joy of Soy. 1982. Tofu (Leaflet, with recipes). Minneapolis, Minnesota. 3 panels each side. Each panel: 22 x 12 cm.

• ***Summary:*** Printed with blank ink on a salmon-pink background. Contents: Introduction. High protein. Low in saturated fats. No cholesterol. Low calorie. Protein source of the future. How tofu is made. How to store your tofu. Who we are. Recipes–Tofu quick and easy. Salads and dips. Fried tofu. Tofu and vegetables. Address: 510 Kasota Ave. S.E., Minneapolis, Minnesota 55414.

5913. Kamel, B.S.; deMan, J.M. 1982. Composition and properties of bean curd made from Ontario soybeans. *Canadian Institute of Food Science and Technology Journal* 15(4):273-76. [7 ref. Eng; fre]

• ***Summary:*** The composition and properties of tofu made from 11 varieties of soybeans grown commercially in Ontario were determined. The crude protein content of the soybeans (in gm/100 gm, on an "as is" basis) ranged from 31.6 to 38.9. The minimum concentrations for coagulation were 0.1% for calcium chloride, 0.25% for calcium sulfate, and 0.20% for calcium acetate. Calcium citrate did not coagulate soymilk. Both anion and pH appear to influence coagulation. The initial pH of the soymilk was 6.58 and coagulation occurred at pH 5.91 for calcium chloride, 5.74 for calcium sulfate, and 6.09 for calcium acetate. Curd yield ranged from 20.7 to 27.3% and protein yield from 59.0 to 69.8%.

Queso Blanco (recently being studied in the author's department) is a cheeselike product made in Latin America from dairy milk that is heated and coagulated using acidic fruit juices or acidic solutions (citric acid or calcium chloride). It is salted, separated, and pressed. The white creamy fresh cheese, which is ready to be used after a short period of ripening, has a high yield and interesting functional properties. "The similarity between this process and the manufacture of Tofu is obvious. It should be interesting to study production of a mixed soymilk Queso Blanco." Address: Dep. of Food Science, Univ. of Guelph, Guelph, ONT N1G 2W1, Canada.

5914. Kapleau, Philip. 1982. To cherish all life: A Buddhist case for becoming vegetarian. San Francisco, California: Harper & Row, Publishers. 104 p. Illust. No index. 21 cm. [110 ref]

• ***Summary:*** Contents: Acknowledgments. Introduction. Part I: The sufferings of animals raised for slaughter. Factory farming of chickens. The cruelties of overcrowding and castration. Terrors of transportation to slaughter. Execution in the slaughterhouse. Ritual slaughter. The complicity of meat eaters in animal slaughter. Meat eating and violence toward humans. Part II: Religious basis of the first precept. Buddhist and Christian views of animals. Did the Buddha die from eating meat? Meat offerings as alms. Meat in the diet of Japanese monks. Flesh eating in a Southeast Asian monastery. Did the Buddha sanction meat eating?: Theravada version, Mahayana version. The doctrine of Ahimsa in India. Denigration of meat animals. The Pali canon on meat eating. Meat eating as a family issue. What is vegetarianism? Whale killing and Japanese Buddhism. Human beings distinguished from animals. Eating animals while 'loving' them. The killing and eating of animals by native peoples. Is killing a vegetable the same as killing an animal? Hitler–Vegetarianism's skeleton in the closet.

Part III: Supplements: 1. The protein issue–Raising waves when there is no wind. 2. Meat is no treat–The hazards of eating animal flesh. 3. Meat's by-products–Hunger, waste, and pollution. 4. Food for thought–What notable persons have said about flesh eating and animal suffering (famous vegetarians including Henry David Thoreau, Leo Tolstoy, Francois Voltaire, etc.). 5. Further reading. Notes and glossary. Text. Supplements. Address: Roshi, Rochester Zen Center, Rochester, New York.

5915. Katzen, Mollie. 1982. The enchanted broccoli forest. Berkeley, California: Ten Speed Press. 307 p. Illust. Index. 27 cm. [1 ref]

• ***Summary:*** This entire remarkable vegetarian cookbook (excepting the index) is hand-lettered. The index contains 25 entries for tofu, and 19 for tamari sauce (soy sauce). Address: Berkeley, California.

5916. Kushi, Micho; Kushi, Aveline. 1982. Macrobiotic dietary recommendations. East West Foundation, P.O. Box 850, Brookline Village, MA 02147. 48 p. 22 cm. [15 ref]

• ***Summary:*** Contents: Introduction. Standard dietary

5917. Leneman, Leah. 1982. Vegan cooking. Wellingborough, Northamptonshire, England: Thorsons Publishing Group. 126 p. *
• ***Summary:*** Contains an introduction to tofu, a recipe for making tofu at home, and 9 recipes using tofu. A recipe for making soya milk at home is also given, and soya milk is used in a number of recipes. Address: 19 Leamington Terrace, Edinburgh EH10 4JP, Scotland.

5918. Leneman, Leah. 1982. Dieta vegetariana para adelgazar [Slimming the vegetarian way]. Madrid, Spain: EDAF. 95 p. [Spa]*
• ***Summary:*** This is the Spanish edition of *Slimming the Vegetarian Way,* first published in the United Kingdom in 1980. Address: 19 Leamington Terrace, Edinburgh EH10 4JP, Scotland.

5919. **Product Name:** Tofu.
Manufacturer's Name: Liberty Soy Foods.
Manufacturer's Address: R.R. 1 Box 400, Honesdale, Pennsylvania 18431. Phone: 570-253-3469.
Date of Introduction: 1982. January.
Ingredients: Water, organic soybeans, nigari (magnesium chloride).
Wt/Vol., Packaging, Price: 16 oz packed in water in molded plastic tray, heat-sealed, peel-off plastic film lid.
How Stored: Refrigerated.
New Product–Documentation: Label (undated) sent by Bruce Rose of Rosewood Products. 2000. Oct. 15. Printed brown on yellow. "Economical. 100% non-dairy. Versatile." Talk with Jamie Stunkard, founder and owner. 2002. Aug. 21. Liberty Soy Foods, which started in 1982, and makes about 180 lb/week of tofu. Located in the basement of the Himalayan Institute in Honesdale. He also runs Nature's Grace: Health foods and Deli (947 Main St., Honesdale, Pennsylvania) 18431.

Label sent by Jamie Stunkard. 2002. Sept. 2. Printed red on yellow film. Same text and weight as above.

5920. Lifespan Community Collective Ltd. 1982. Full of beans. Sheffield, England: Lifespan. 24 p. Illust. 21 cm. [1 ref]
• ***Summary:*** "This is a book about cooking pulses and beans," with several vegetarian recipes for each type. Contents: Introduction. Red kidney beans. Brown lentils. Soya beans. Chick peas. Butter beans [Lima beans]. Haricot beans. Red lentils. Field beans. Aduki beans. Split peas. Marrowfat peas. Black eye beans. Mung beans. Tofu or bean curd. Miso or bean paste. Bean sprouts.

Soya bean recipes: Soya and carrot pistou. Soya bean curry. Soya swede pie. The section on tofu describes "Tofu using soya beans" and "Tofu using soya flour. There is also a section on miso.

"Who we are: Lifespan is a workers' collective registered under Industrial & Provident Society rules. We live communally in two terraces of houses and share our work including childcare, domestic work, gardening, building maintenance, craft workshops and the printing business. We are part of a network of communities, seeking to provide an alternative lifestyle to the nuclear family, patriarchy and the nuclear state." Address: Townhead, Dunford Bridge, Sheffield S30 GT6, England. Phone: Barnsley (0226) 762359.

5921. Liu, Chen. 1982. Dou zhi pin shi pu (Tou chih pin shih pu) [Soyfoods recipe book]. Harbin, China: Heilongjiang Science and Technology Publishing Co. 499+ p. 19 cm. [Chi] Address: Heilongjiang, China.

5922. Magariños, Hélène. 1982. Cuisine pour une vie nouvelle [Cuisine for a new life]. Paris: Editions Debard. 230 p. Preface by Aveline Kushi. Preface by Dr. Yves Nani. Illust. (some color). No index. 22 cm. [195 ref. Fre]
• ***Summary:*** This is a book about macrobiotic foods, cookery, and medicine. On the cover: *La macrobiotique, pratique alimentaire de la sagesse orientale.* Lacking an index, the book is difficult to use.

Contents: Introduction by the author. Macrobiotic / yin-yang terminology. Glossary. 1. Cereals. 2. Vegetables. 3. Legumes and sea vegetables. 4. Soups, sauces and condiments. 5. Seitan and fish. 6. Desserts and beverages. 7. For mothers and infants. 8. Suggestions for some familiar remedies.

The glossary (p. 41-43) includes: Sea vegetables, amazake, azuki, gomashio, hijiki, koji, kombu, kuzu, miso, natto, nigari, nori, potimarron (or Hokkaido pumpkin / kabocha), rice koji, sake, seitan, shoyu, soba, suribachi, tahini, tamari and shoyu, tekka, tea (3 years old), tofu, udon, umeboshi, wakame, yang and yin.

The section on sauces (p. 76-77) includes: Cream of umeboshi. Creame of umeboshi and tofu. Tamari with citron. Tofu mayonnaise. Grilled sesame miso. Miso with grated orange rind. Miso nuts. Note: Miso and tamari are used as seasonings throughout the book.

Chapter 3 includes (in the section on Soya, p. 109-15): Edamame. Special recipe for anemia or fatigue. Soybeans cooked with miso. Homemade tofu (curded with nigari,

© Copyright Soyinfo Center 2013

with 5 helpful photos). A kind of fromage blanc made from tofu. Tofu mayonnaise. Tofu cooked with tamari. Tofu and vegetables. Homemade natto. Natto with onions. Natto with hard-boiled eggs.

About the author (with a photo) appears on the rear cover. Address: France.

5923. McDonnell, Christine. 1982. Toad food & measle soup. New York, NY: The Dial Press. 111 p. Illust. by Diane de Groat. 20 cm.
• ***Summary:*** In this children's story, "toad food" and "measle soup" are Leo Nolan's words for tofu and miso soup (see p. 14-16). Though he (secretly) liked the first miso soup with tofu that his mother made and served as part of a new family experiment with vegetarian cooking, he quickly grew to dislike them, and to dread mealtimes. Leo liked hot dogs, hamburgers, french fries, and Coke. He had his troubles at school too. "In five funny, very real episodes mischievous Leo copes with many of the problems and insecurities that beset children today." A color illustration on the cover shows Leo seated at the table, looking wryly at a bowl of miso soup with cubes of tofu floating in it. A black-and-white illustration (p. 11) shows a bowl of miso soup.

5924. Nagai, Masaki; Hashimoto, Tsutomu; Yanagawa, Hiroshi; Yokoyama, Hideaki; Minowa, Masumi. 1982. Relationship of diet to the incidence of esophageal and stomach cancer in Japan. *Nutrition and Cancer* 3(4):257-68. [8 ref. Eng]
• ***Summary:*** In a study of food intake in 1,040 Japanese households, consumption of tofu was negatively related to these two cancers–after adjustment for income, population ratio of census industry, and other dietary variables. Thus, high rates of tofu consumption were associated with low rates of these cancers. An inverse association between the consumption of miso soup and stomach cancer seen in women was not significant on multivariate analysis. Address: 1-3. Dep. of Public Health, Jichi Medical School, Tochigi-ken, Japan.

5925. Natural Messages Co. 1982. Tofu cheese 'n vegie bake (Tear-off recipe pad). Boston, Massachusetts.
• ***Summary:*** The subtitle reads: "A scrumptious casserole of succulent vegetables, your favorite cheese, savory herb seasonings, and tofu." Address: 74 McBride Box 226C, Boston, Massachusetts 02130-0226.

5926. Nippon Shokuryo Shinbun-sha. 1982. Shokuhin sangyô jiten [Encyclopedia of the Japanese food industry. 3rd ed. 2 vols.]. Tokyo: NSS. 528 p. [Jap]
• ***Summary:*** Contains substantial entries for the following soy-related foods: Tofu and tofu products (p. 81-87), frozen and dried-frozen tofu (p. 96-97), natto (p. 98-101), and vegetable oils (p. 107-13). Address: Japan.

5927. Ohara, Teruko; et al. 1982. Tôfu hyaku chin now [One hundred favorite tofu recipes, now]. Tokyo: Shibata Shoten. 130 p. Illust. 19 cm. [Jap]
• ***Summary:*** Contains 100 recipes. Contents: Preface. Western style tofu cookery, by Teruko Ohara. Japanese style tofu cookery, by Hiroshi Fukuda. Chinese style tofu cookery, by Yutaka Yamamoto.

5928. Photographs of Peter and Elgard Wiegand establishing Auenland Tofu in Germany and making tofu there. 1982. Prien-Chiemsee, Germany.
• ***Summary:*** These twenty color photographs (each 3½ by 5 inches or 3 inches square) were taken at Prien-Chiemsee in southern Germany in 1982 by Michael Pierce, while he was visiting his friend Peter Wiegand. They show: (1-5) Farmhouses in the village near the tofu kitchen. (6) The tofu kitchen, which was an old dairy but looks like a small village farmhouse. (7) Three containers of okara by the door of the tofu kitchen. (8-9) A person preparing the tofu kitchen building. (10) Portrait of Elgard. (11) Peter Wiegand sitting cross-legged by a wide waterfall. (12) Peter & Elgard hugging on the steps of a house. (13) Their children, Lila and Jauna, pulling toys on a road. (14) "Another tofu freak in Germany" riding a very high bicycle, which he invented and built. (15) Michael trying to cheer up Peter (lying on the ground) after a long day in the tofu kitchen. (16-18) A cake of Auenland Tofu, vacuum packed, on a snowbank. The label shows a colorful rayed orangish-red sun setting over a little village behind a range of green mountains. (19) The village of Prien-Chiemsee with its tall spired church and snow-capped mountains in the background. (20) Three young people seated by the door of the tofu kitchen.

Update. Talk with Michael Pierce of Georgia. 2000. Oct. 11. Peter is now a singer with his own band. He sings many songs written and record by Tom Waits. Peter no longer does graphic art. Michael goes to Germany once or twice a year fora month or so to be with Peter and to help move his band from one gig to the next.

5929. Plenty International. 1982. Soy Demonstration Program: Introducing soyfoods to the Third World. A step by step guide for demonstrating soymilk and tofu preparation. Summertown, Tennessee. 16 p. Undated. Illust. 21 cm.
• ***Summary:*** Actually written by Suzy Jenkins and Laurie Praskin, this booklet is a summary of two larger works published in 1980 (written by Darryl Jordan and Suzie Jenkins) and earlier in 1982 (by Suzy, Laurie and Alan Praskin).

As interesting as it is innovative, this summary focuses on Plenty International's Soy Demonstration Project in Guatemala, showing how soybeans are being grown in local villages and women are making soymilk and tofu using traditional equipment. All Guatemalans are shown in

© Copyright Soyinfo Center 2013

traditional Mayan clothing (*traje*).

Contents: Introduction. Soy extension program. A soy demonstration in photographs: Soaking the beans, grinding, cooking, straining, soymilk, curding tofu, straining the curds, storing the products. Helpful hints. Recipes. A nutritional comparison. Soybean agricultural impact statement.

Black and white photos show soyfoods and people in Guatemala. These include: (1) A little Guatemalan girl, kneeling, licking her fingers as she eats seasoned tofu from a bowl. (2) Women smiling and laughing as they grind soybeans on traditional stone *metate*. (3) Women's nutrition group (with children) from San Jose Poaquil standing behind their soybean patch. (4) Simple tools needed for making tofu. (5) Close-up of a woman grinding soybeans on a *metate.* (6-8) Cooking ground soy slurry and filtering the soymilk from the pulp. (9) A little girl drinking a big cup of soymilk. (10-14) Curding the tofu, straining the curds, and pressing the tofu. (15) Girl eating tofu on a bun. (16) A happy group of Guatemalans and Americans standing around a stove, enjoying soymilk and tofu. (17) Soybean variety trials in Solola, Guatemala. Elevation: 7,200 feet (2,195 meters). (18) A little bustling along as she licks a cone of soymilk ice cream.

On the rear cover: "The Soy Demonstration Project was funded by Plenty International, UNICEF (United National International Children's Educational Fund) and CIDA (Canadian International Development Agency), and donations from supporters." For further information write: "Suzy Jenkins or Laurie Praskin, Plenty Soy Technicians, 156 Drakes Lane, Summertown, Tennessee 38483 USA." Address: Summertown, Tennessee.

5930. Poirier, Marie. 1982. Le plaisir de la cuisine au tofu [The pleasure of tofu cuisine]. Prevost, Quebec, Canada: Unisoya Inc. 52 p. No index. 22 cm. [2 ref. Fre]
• ***Summary:*** Includes recipes for main courses, soups, salad dressings, salads, and desserts. Many of the recipes call specifically for Unisoya tofu. There is also an ad for Unisoya on the rear cover. Address: Quebec, Canada.

5931. Random House College Dictionary. 1982. New York, NY: Random House Inc. See p. 1381.
• ***Summary:*** "Tofu" has replaced "bean curd" as the main entry. Tofu "is a soft, bland, white, cheeselike food made from curdled soybean milk..."

5932. Re: Names of soyfoods around the world: French. 1982. Form filled out by William Shurtleff based on sources given below. 1 p. [Eng; Fre]
• ***Summary:*** Gives the names of the main soyfoods in French. Sources: Bernard Storup; Bau & Debry, of France.

"Soyfoods–Aliments à base de soja.
Fresh green soybeans (edamamé)–Edamamé. Soja frais.
Whole dry soybeans–(haricots de) Soja sec / secs.
Black soybeans -
Fresh soy puree–Purée de soja.
Soy sprouts–Pousses de soja. Soja germe.
Soynuts–Soja grillé. Graines de soja grillées.
Oil roasted soynuts–Graines de soja grillées (à l'huile). Soja grillé, revenu dans l'huile.
Dry roasted soynuts–Soja grillé à sec. Graines de soja grillées à sec (or sans huile). Haricots de soja, grillés à sec.
Soynut butter–Buerre de soja grillé.
Roasted soy flour–Farine de soja grillé.
Soy coffee–Cafe de soja.
Soy chocolate–Chocolat de soja.
Soymilk–As of Feb. 2012 only the terms "boisson au soja" or "jus de soja" or "tonyu" (the Japanese word for "soymilk") can be used legally on commercial soymilk products in France–because of dairy lobby protests. The term "lait de soja" is generally used in cookbooks, books, articles, etc.
Soymilk ice cream -
Soymilk curds -
Tofu (regular)–Tofu or Tofou (le). Note: Many French speakers, who are also soyfoods experts, prefer "Tofou."
Soft tofu–Tofu mou.
Firm Tofu–Tofu ferme. Extra firm tofu–Tofu très ferme.
(Deep fried) Tofu cutlets–Tranches de tofu frites.
(Deep fried) Tofu burgers–Tofuburgers frits. Burgers de tofu (frits).
(Deep fried) Tofu pouches–Poches de tofu (frites).
Silken tofu–Tofu soyeux.
Pressed silken tofu–Tofu soyeux.
Grilled tofu–Tofu grillé.
Dried frozen tofu–Tofu séché. Tofu déshydraté.
Okara or soy pulp–Okara (l').
Yuba–Yuba (le).
Dried yuba sticks -
Sweet dried yuba -
Fermented black soybeans -
Miso or soybean jiang–Miso (le).
Soy sauce–Sauce de soja. Sauce soja. Shoyou (le).
Chinese sauces -
Tamari–Tamari (le).
Tempeh–Tempeh (le).
Fermented tofu–Tofu fermenté (au vin).
Fermented soymilk–Lait de soja fermenté.
Natto, thua-nao, kinema–Natto (le).
Soy oil–Huile de soja.
Soy lecithin–Lecithine de soja.
Soy flour–Farine de soja.
Whole (full fat) soy flour–Farine de soja entière.
Defatted soy flour–Farine de soja dégraissée.
Soy grits and flakes–Flocons et granule de soja.
Cereal-soy blends (CSM, WSB, etc.) -
Soy protein concentrate–Proteine de soja concentrée.
Soy protein isolate / Isolated soy protein–Isolat de

© Copyright Soyinfo Center 2013

proteines de soja. Proteine de soja isolée.

Textured soy protein products–Protéines de soja texturées (Produits à base de proteines de soja texturée).

Textured soy flour, TSF, or TSP–Farine de soja texturé.

Textured soy concentrates–Concentrat de soja texturé.

Textured soy isolate–Isolate de soja texturé.

Spun soy protein fibers. Address: Soyinfo Center, Lafayette, California 94549.

5933. Royal American Food Co. 1982. Royal American. Blue Springs, Missouri. 16 p. 28 cm.

• ***Summary:*** Contents: A company founded on proper principles. By the right people. In the right place. At the right time. With the right products. And the right program.

The four main executive officers are Robert L. Montgomery (Chairman of the Board and CEO), N. James Adams, Dr. Carl W. Hastings (Executive vice president; Co-founder, Chairman, and CEO of Spectrum Foods, Inc.; he resides in Mt. Zion, Illinois), and Richard N. Kreher. A color photo shows the four, and a biographical sketch of each is given. On 9 Jan. 1982 they presented their ideas for a powerful new company to a group of business professionals in Decatur, Illinois. Other corporate founders (a color photo and biographical sketch of each is given) are: Jon R. Anfinsen, Joel E. Cansler, Hugh E. "Ed" Clemmons, Jr., James E. Cummings, Dr. Thomas J. Futch, Dr. Glyn J. Godwin, Joseph E. Granville, Alfred E. Guebert, Ron Hadley, Evan H. Johnson, Alan R. Kimbell, Ronald W. Neureuther, Mike Nuzum, Neal Pfeiffer, Jim Proffitt, Robert Rieckenberg, Dean L. Robinson, Jack Rudnay, Dr. James M. Spata, Paul G. Walther, H.L. Weatherford.

An important group within Royal American is Spectrum Foods, formed in 1981. "By Jan. 1982 Spectrum had already developed a number of food products which were well received in the market. A color photo shows Spectrum Food scientists (all PhDs) Carl W. Hastings, Glyn Godwin, James Spata, Thomas Futch, and Jon Anfinsen.

Royal America is a multi-level marketing company (MLM)–which offers an alternative to current high unemployment. The American public has developed a new consciousness concerning the nutritional value of food. The Royal American products include: American Gold, a line of whey-based nutritious beverages; Royal American dinners, a line of soy protein-based nutritious dinners. The first to be introduced are Sweet and Sour and Mexican-Style dinners. The meat textures and flavors are truly remarkable. Eventually there will be a complete line of 12 dinners, with a new one introduced every 4 months. Includes a form titled "Commitment to become a Royal American distributor" (a Distributor Kit costs $40) and a Product Purchase Order.

5934. Seifert, Kim A. 1982. Tofu recipes developed for health care institutions. Salt Lake City, Utah: Jack's Beanstalk. 26 recipe cards. 28 cm.

• ***Summary:*** Each recipe card, which is 8.5 by 5.5 inches, lists: Exchanges: Meat, fat, milk, fruit, bread, vegetable. Nutrients per serving incl. sodium. Applicable diets (such as regular, soft, diabetic, low calorie, low sodium, etc.). Portion size. Yield. Ingredients. Amount. Methods. Two salmon colored cards are for sauces and toppings. Four green cards for vegetable dishes. Sixteen yellow cards for entrees. And four pink cards are for desserts. Address: Director, Nutrition Care Service, Univ. of Utah Hospital, Medical Center.

5935. Sherman, Kay Lynne. comp. 1982. The Findhorn family cookbook: A vegetarian cookbook which celebrates the wholeness of life. Boulder, Colorado: Shambhala. Distributed in the U.S. by Random House. 152 p. Illust. Recipe index. 24 cm.

• ***Summary:*** Originally published in Findhorn, Scotland, by Findhorn Publications. Soy-related recipes include: Tofu whey soup (p. 23; the whey is from homemade tofu). Tofu teriyaki (p. 48). Tofu (marinated and baked, with peanut sauce, p. 65).

There is an entire chapter on tofu (p. 68-76). The method for making tofu is that developed by Jacques Cormier, using rather large equipment to make enough tofu for many people. "If you become intrigued with the art of making tofu, and would like to have more tofu recipes, as well as information about this centuries-old tradition, we highly recommend reading *The Book of Tofu* by William Shurtleff and Akiko Aoyagi (Autumn Press, 1975)." Recipes: Homemade tofu (with 29 photos showing each step in the process at Findhorn's tofu shop). Scrambled tofu (p. 111). On the unnumbered page after p. 75 is an illustration of a tofu forming box for home- or community-scale tofu. Address: Scotland.

5936. Shulman, Martha Rose. 1982. Fast vegetarian feasts. New York, NY: The Dial Press. 312 p. Illust. Index. 24 cm.

• ***Summary:*** This is a book of "delicious healthful meals in under 45 minutes. It is interested in protein complementarity with a low-fat diet. Soyfoods are used extensively. Wherever a heart symbol appears next to a recipe, it is acceptable for low-salt and low-fat dishes. The ingredients section (p. 13-18) discusses and defines soybeans ("the king of beans, as far as nutrients are concerned"), soy flakes, soy grits, miso, and tofu. "Tofu is my mainstay. It is a miracle food." Savorex, Marmite, and Vegex are three different brand names for the same product, a yeast extract that comes in the form of a dark viscous paste." Never cook soybeans in a pressure cooker. They tend to foam and clog the safety valve, which can cause an explosion.

Page 14 states: "Soy flakes: Soybeans that have been cooked, split, and dehydrated. Because they take only 30 minutes to cook and are as high in nutrients as soybeans, they are a perfect high-protein convenience food. Soy flakes can always be substituted in recipes for soybeans.

© Copyright Soyinfo Center 2013

"Soy grits: Cracked soybeans. These are a nutritious addition to grain dishes (you can cook them along with the grains), have a nutty texture and taste, and take only 40 minutes to cook–another good convenience food."

Soy-related recipes include: Tofu mayonnaise (p. 57). Tofu cream sauce. Tofu béchamel (p. 58). Morning tofu spread or evening pudding (p. 59). Roasted soybeans [dry roasted soynuts] (p. 60). Tamari-bouillon broth (p. 62). Instant tamari-bouillon broth (p. 63). Simple miso soup (p. 68-69). Miso soup with buckwheat noodles (p. 70).

One chapter is titled "Grains, legumes, tofu, and vegetables" (p. 91). Easy hiziki [hijiki] and squash dinner with soba and soy (flakes and tamari, p. 101). Brown rice "risotto" with soy flakes. Eggplant stuffed with rice and soy "risotto" or risi e bisi (p. 110). Fried rice and soy grits with vegetables (p. 114). Spicy eggplant miso sauté with bulgur. Purple cabbage, tofu, onions, and winter squash with miso (p. 125-26). Cabbage leaves stuffed with kasha, with creamy tofu sauce (p. 130). Tofu cutlets (p. 131). Chilled tofu with dipping sauces (p. 132). Teriyaki sauce (p. 133). Tahini-tamari sauce. Miso toppings for tofu and grains (adapted from The Book of Miso, p. 134-35). Tofu vegetable curry (p. 136). Chinese-style tofu with vegetables and grains (p. 138-39). Tomato sauce with soy grits (p. 205). Tofu tomato sauce. Pasta with tofu cream sauce (p. 209). Pesto with miso (p. 217). Potato, tofu, and tomato tacos (p. 226). Tofu and poblano tacos (p. 228). Green tomato, corn, and tofu tacos (p. 230). Tofu mayonnaise (p. 237). Green tofu dressing (p. 238). Watercress, mushroom, and tofu salad (p. 252). Cottage cheese and tomato salad with miso dressing (p. 256). Tofu noodle kugel (p. 279).

Note: A revised 356-page edition was published in 1986. The author is now living in Paris (May 1985) and there is an added chapter of fish recipes. She has become "a more serious fish cook..." How can a vegetarian book contain a chapter of fish recipes? Address: Paris, France.

5937. Shurtleff, William; Aoyagi, Akiko. 1982. Report on soyfoods in delis, cafés, and restaurants. Lafayette, California: Soyfoods Center. 127 p. 28 cm. [21 ref]
• ***Summary:*** Contents: 1. Introduction and overview: A. Names and addresses: Soyfoods delis, cafes, restaurants; Secondary soyfoods manufacturer-distributors; Soyfoods marketer-distributors. B. Chronology of soy delis starting in business (Farm Food Company in San Rafael, California, was first in Aug. 1976). C. North America's largest soy delis, cafes, and restaurants, with startup cost and average and maximum weekly sales.

2. Names of recipes served at each soy deli and ranking of the best-selling of these recipes: Data for 18 soy delis, cafes, and restaurants. 3. Names of recipes produced by secondary soyfoods manufacturer-distributors: Data for 4 soyfoods manufacturer-distributors. 4. Names of recipes produced by soyfoods marketer-distributors: Data for 4 soyfoods marketer-distributors. 5. Individual bulk recipes for tofu and tempeh dishes: 21 bulk tofu recipes and 21 tempeh recipes. 6. Alphabetical listing of recipes given above: 250 recipe names listed alphabetically. 7. Articles published about soyfoods delis, cafes, and restaurants: 19 articles. 8. Menus, posters, and promotional materials: 15 menus, posters, and flyers. 9. Conclusion and summary. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

5938. Simonds, Nina. 1982. Classic Chinese cuisine. Boston, Massachusetts: Houghton Mifflin. xi + 353 p. Illust. Map. Index. 23 cm.
• ***Summary:*** This is a remarkable book by one who is part "of a new generation of American chefs and food writers." The Pinyin system of romanization, "which was officially adopted by the People's Republic of China in 1979, has been used for most of the Chinese words in this book" (p. vi).

A map of China (facing page 1) shows the individual provinces and the four main culinary schools: northern, western, eastern, and southern–as explained on pages 1-4. Taiwan is considered part of the eastern school. The southern school is comprised of only two provinces: Guangdong (which includes the city of Guangzhou–formerly named Canton) and Guangxi.

Soyfoods are used and discussed liberally throughout this book. The section titled "Condiments, seasonings, and special ingredients" (p. 5-11) gives detailed discussions of hoisin sauce, oyster sauce, soy sauce (the three grades are light, medium and heavy, with light having a delicate and slightly more subtle flavor than the other varieties), sweet bean sauce (and bean pastes including brown bean paste and yellow bean paste), fermented black beans (and black bean sauce).

The next section, "Selected fresh and pickled vegetables" (p. 11-14) has an entry for bean sprouts (the two main types are sprouted from mung beans {which are green} and soybeans {which are yellow}; soybean sprouts have a stronger flavor and require longer cooking).

Soy related recipes: Beef with noodles in a pot (with "2 cakes bean curd," p. 76). Cold spicy noodles (with "2 cakes bean curd, about 3 inches square and 1 inch thick," p. 80).

One chapter, titled "Soybeans and bean curd" (p. 113-29) begins with a charming introduction to "stinky bean curd" (fermented tofu). As evening fell after dinner, luscious scents and fragrances filled the air. Yet there was "a putrid smell that defied classification. What was that baffling, pungent odor, present in every part of the city." After a bit of research she soon discovered that it came from "stinky bean curd (*chou dou fu*), a favorite snack of the Chinese." Vendors of this unusual "delicacy ran rampant all over the city with their portable deep deep-fryers. My Chinese surrogate sister and brothers, who were great fans of the stuff, used to race outside, armed with empty bowls and chopsticks, at the sound of the stinky bean curd man's call. (The smell usually

© Copyright Soyinfo Center 2013

preceded him by two blocks, giving everyone plenty of notice.)" It is "made by fermenting fresh bean curd squares in a brine with assorted spices and pickled vegetables." The resulting cakes are deep-fried... until golden and eaten with soy sauce, vinegar, mashed garlic, or chili paste."

The soybean is used to make various Chinese seasonings including soy sauce, hoisin sauce, sweet bean sauce or paste, and hot bean paste. Fresh green soybeans are cooked and served with soy sauce and sesame oil. Whole dry soybeans are fried and eaten as a snack.

"The nutritious properties of the soybean further explain why it is so popular with the health-conscious Chinese."

Heating soybean milk gives "bean milk sheets (*fu pi*)" [yuba]. Also mentions "bean curd sticks (*fu zu*)" [dried yuba sticks], bean curd sheets (*bai ye*)," and "bean curd noodles (*gan si*)." In terms of consistency, the three basic types of bean curd are soft, medium, and hard (*dou fu gan*)." "Bean curd is also fermented in rice wine and spices to make a popular seasoning (*dou fu ru*), which has a "slightly cheeselike flavor."

Nina concludes the introduction: "As most nutritionists will agree, the soybean and its many by-products are the foods of the future." Line drawings show: soybeans, bean curd, bean milk sheets, bean curd sheets, bean curd sticks, and bean curd noodles. Recipes in this soy chapter: Meatball and soybean casserole (with "4 cups dry soybeans, p. 116). Sweet soybean milk (How to make at home; the Chinese equivalent of America's cup of coffee for breakfast, with 2 cups dry soybeans and 1 cup sugar. Typically accompanied by a sesame flat bread {*shao bing*} and a fried cruller {*you tiao*}). Stir-fried soybean sprouts with red-in-snow. Stuffed bean curd rolls (with "8 dried bean curd sheets or bean milk sheets"). Sweet-and-sour fish slices (with "10 dried bean milk sheets"). Eggplant rolls (with "6 dried bean milk sheets"). Buddha's delight (a well-known vegetarian dish, with "2 ounces bean curd sticks"). Cold tossed bean curd and celery shreds (from Sichuan, with "8 cakes bean curd, about 3 inches square and 1 inch thick"). Red-cooked bean curd. Braised bean curd with black mushrooms in oyster sauce (from Sichuan). Stuffed bean curd (from Canton). Ma po bean curd (from Sichuan). Eight-treasure stir-fried vegetables with meat (with "3 cakes bean curd, about 3 inches square and 1 inch thick"). Northern-style bean curd (p. 129).

More soy related recipes: Steamed fish fillets in black bean sauce (with "1 tablespoon fermented black beans, rinsed, drained, and minced," p. 183). Double-cooked pork slices (with "3 cakes bean curd," p. 230). Steamed spareribs in black bean sauce (with "2 tablespoons fermented black beans, rinsed, drained, and coarsely chopped," p. 234). Stuffed peppers in black bean sauce (with "1 tablespoon fermented black beans, rinsed, drained, and minced," p. 272).

One entire chapter is titled "Vegetarian dishes" (p. 279-94). The introduction discusses the Kuantu Temple (a Buddhist-Taoist sanctuary about 1 hour drive from Taipei), and the origin of vegetarian cuisine in China in early Buddhist and Taoist monastery kitchens. Wheat gluten (*mian jin*) and related preparations such as deep-fried wheat gluten balls (*mian jin pao*) steamed wheat gluten chunks (*kao fu*), plus seasonings such as "pickled bean curd (*dou fu ru*)" are often used. Soy related: Broccoli in mock crabmeat sauce (with "1 cake bean curd," p. 285). Vegetarian lion's head (with "4 cakes bean curd," p. 287). Mock goose (with "20 bean milk sheets" [yuba], p. 290-91). Vegetarian eight treasures (with "2 cakes bean curd," p. 291). Wheat gluten (how to make at home from wheat flour, p. 292).

More soy related: Eight-treasure mixed soup pot (with 2 cakes bean curd," p. 310-11). Hot and sour soup (with "2 cakes bean curd," p. 316).

About the author: A photo of Nina Simonds (in Chinese clothing) appears on the inside rear dust jacket. She studied Chinese food and cooking, language and culture, in Taiwan for more than three years (she arrived there at age 19) with Chinese master chefs at the Wei-Chuan school in Taipei, while living with a Chinese family. She subsequently received the Grand Diplôme from La Varenne École de Cuisine in Paris, where she also taught Chinese cooking. "For the past eight years (prior to 1982) she has taught in cooking schools all over the United States and Canada and her articles have appeared in *Gourmet* and *Cuisine* magazines and the *Boston Globe*" (from the inside rear dust jacket). Address: Salem, Massachusetts.

5939. Surata Soyfoods, Inc. 1982. Our consensus affirms us. Goals of Surata Soyfoods Cooperative. Eugene, Oregon. 2 p. Unpublished typescript. Undated. On letterhead. 28 cm.
• ***Summary:*** Page 1 has no title: "We affirm as the working consensus of our cooperative the practice of soycraft not as a job we 'have', but as an inner discipline through which our lives are centered, while our livelihoods are maintained. We seek to create a workplace serving the spiritual dimensions of our labor, that we may nourish the inner riches found within the cyclic rhythms of soycraft.

"In concert with our commitment to a humane workplace is our commitment to a world where human beings are the beneficiaries of our labor, and not the victims of our technology. Our products derive their high quality from the earth's ecology, and provide people with a protein source to counter the immense wastefulness of our culture's meat-centered diet. Our product reflects our belief that a global diet be based on need, not affluence.

"At the same time our efforts to create a democratically-managed workplace serve as a constant awareness that hunger in our world will never be eliminated until people everywhere take control over their own lives and their own resources. Our consensus confirms our willingness to work for each other in the name of world equity with the power of a consciously directed labor.

"Our consensus affirms us, The Surata Soyfoods

Cooperative"

Page 2, titled "Goals of Surata Soyfoods Cooperative" states: "Produce and market top quality soyfoods.

"Operate as a successful business providing economic wellbeing to its workers.

"Develop as a worker owned and operated business providing a responsive work environment.

"Expand the knowledge and use of soyfoods." Address: 302 Blair Boulevard, Eugene, Oregon 97402. Phone: (503) 485-6990.

5940. Takai, Motoo. 1982. Tôfu seizô no chiekku pointo [Check points for making tofu]. Takai Tofu & Soymilk Equipment Co., 1-1 Inari, Nonoichi-machi, Ishikawa-ken 921, Japan: Takai Seisakusho. 13 p. [Jap]
Address: Ishikawa-ken, Japan.

5941. Time Inc. 1982. People weekly cooks. New York, NY: Time Inc. 49 p. Illust. No index. 21 cm. [1 ref]
• ***Summary:*** This hardcover, spiral-bound book features cooks who have appeared on the pages of *People* magazine. Each person (or people) is given a two-page spread. On the left page is a large black-and-white photo. On the right page is a favorite recipe and some information about both the recipe and the person. William Shurtleff and Akiko Aoyagi Shurtleff appear on pages 40-41. The photo shows her using chopsticks to deep-fry tofu burgers in a heavy skillet at their home at 951½ Mountain View Drive, Lafayette, California. He is holding a metal baking sheet on which are a number of unfried burger patties. The recipe is for "Tofu eggless egg salad sandwich." The text notes: "'I want soyfoods to be the most important source of protein in the world,' declares William Shurtleff." Address: New York City.

5942. Tropp, Barbara. 1982. The modern art of Chinese cooking. New York, NY: William Morrow and Co. 623 p. Illust. Index. 23 cm.
• ***Summary:*** One of the best and most authoritative books on Chinese food written by a Westerner, who is a Chinese scholar turned Chinese cook, and who lives in San Francisco. Contains an excellent, long "Glossary of Ingredients" (p. 529-81) with extensive information about Chinese foods (plus their names spelled phonetically in Mandarin and Cantonese) including: Hoisin sauce (Mandarin: hai-hsyen-jyang; Cantonese: hoi-seem-jyenug. The characters mean "sea-freshness sauce." She uses a widely distributed brand, Koon Chun, that is jam-like in consistency and on the sweet side). Mock meat (Mandarin: myen-jin; Cantonese: ming-gun. incl. Companion brand Braised Dried Bean Curd, Curried Braised Gluten, Curry Vegetarian Mock Duck, and Longevity brand Curried Mock Abalone). MSG ("Originally made from dried fermented wheat gluten"). Salted black beans (Mandarin: doe-jrr; Cantonese: dao-see; fermented black soybeans. This "popular Chinese seasoning is also known as Chinese black beans, salted beans, fermented black beans, and occasionally ginger black beans." "Shreds of ginger or orange peel or a dash of five-spice powder occasionally added to season the beans in the final soaking stage." Barbara prefers salted black beans that are seasoned with ginger and she avoids the kind seasoned with five-spice powder. She uses Mee Chun brand and does *not* wash salted black beans, as is common; it is a practice she has never understood).

A recipe for Hot and sour Hunan chicken (p. 142-43), in the ingredients section titled "Aromatics," calls for "2 tablespoons Chinese salted black beans (page 561)."

Note: This is the earliest English-language document seen (Nov. 2011) that uses the term "Chinese salted black beans" or the term "ginger black beans" to refer to fermented black soybeans. This term former is also used in recipes for Garlic-stewed sparerib nuggets (p. 203) and Hunan eggplant with spicy meat sauce (p. 293).

Soyfoods: Introduction, soy sauce (Kikkoman soy sauce {Barbara's everyday favorite}, thin soy sauce, black soy sauce, mushroom soy sauce; good Chinese brands are Superior and Koon Chun). Tofu (fermented tofu {incl. Pepper Bean Cake with hot chili flakes–[*la jiao doufu-ru*]}, fresh tofu, pressed tofu.

"Mushroom soy sauce is a flavored soy sauce, something between thin soy sauce and black soy sauce in saltiness. The brand I like best is Pearl River Bridge, which is made specifically with straw mushrooms and is classified in Chinese as black soy sauce owing to a touch of sugar that is included in the mixture," p. 569).

Note: This is the earliest document seen (June 2011) that uses the term "ginger black beans" to refer to fermented black soybeans (*douchi*).

Ms. Tropp (see photo on inside rear dust jacket) studied Chinese language, poetry, and art history at Columbia University, Yale, Princeton, and the University of Taiwan. Her two-year sojourn in Taiwan found her living with remarkable Chinese families. On the rear cover is a nice long quotation from James Beard.

5943. Unicorn Village. 1982. Tofu comes West. A remarkably versatile healthful food. Protein for less (Poster). Tucson, Arizona. 1 p. 27 x 34 cm.
• ***Summary:*** Near the top of this large color poster is a unicorn galloping across the top of a globe. In the center is a place to attach recipes, with an arrow pointing to it: "Take one." Color photos to the left and right show: (1) Fried tofu, sprouts, and tomato sandwich, with a glass of soy milk in the background. (2) Two stemmed parfait glasses filled with strawberry tofu pudding and Banana tofu pudding. Address: 332 E. Seventh Street, Tucson, Arizona 85705.

Tofu quiche. Tofu dip. Address: 16, 18 Bushloe End, Wigston, Leicester, LE8 2BA England. Phone: Leicester (0533) 883701.

5946. Yoneda, Soei; Hoshino, Koei; Schuefftan, Kim. 1982. Good food from a Japanese temple. Tokyo, New York, and San Francisco: Kodansha International. 224 p. Illust. Index. 27 cm.
• ***Summary:*** An outstanding, beautiful book, the best seen to date on Buddhist Vegetarian Cookery (*shojin ryori*)–after you get past the poor, almost embarrassing introduction, written by Robert Farrar Capon of New York. The author, Sôei Yoneda, is a great Zen Abbess and cook, and a visit to Sankô-in, a Rinzai nunnery, is an unforgettable experience. The recipes are arranged by season: Spring, summer, autumn, winter, all seasons. For every recipe, both a Japanese and an English-language name are given. Soy-related recipes include: Soybean rice (*mame gohan,* p. 73). Unohana rice (with fried okara, p. 75). Thick-rolled sushi (with dried-frozen tofu, p. 75). Tofu rice (p. 80). Soy bean dashi (p. 82). Miso soups (p. 85-88; 14 recipes, one for each month but two for Jan. 1 and 2–White miso Ozoni and Zen temple ozoni–and one for all seasons–Saké lees soup). Pickling with miso (p. 89). Rape blossoms with miso-mustard dressing (p. 93). Bamboo shoots with vinegar-miso dressing (p. 98-99). Quick oden (with tofu, p. 107-08). Green beans with miso dressing (p. 113-14). Eggplant with miso sauce (p. 123). Zucchini with sesame-miso sauce (p. 129). Steamed zucchini with three-color miso (p. 130-31). Jade nuggets (*kizami nattô no ao-jiso age,* p. 136). Pine cones (*matsukasa,* with tofu, p. 151). Miso-pickled vinegared konbu kelp (p. 153). Crisp turnip with sesame-miso dressing (p. 158). Amazake (p. 162). Daikon with miso sauce (*daikon oden,* p. 170). Brussels sprouts with miso sauce (p. 179-80). Dried-frozen tofu mélange (p. 181-82). Not exactly hamburger ("patties" with dried-frozen tofu and okara, p. 182). Simmered dried-frozen tofu (p. 182-83). Dried-frozen tofu tempura (p. 183). Konnyaku in miso dressing (p. 184). Fried unohana (*iri unohana,* with thin deep-fried tofu and okara, p. 187; "The mash or lees (*okara*) remaining after making tofu are inexpensive, plentiful, and nourishing–ideal everyday temple food. By itself *okara* is not interesting, but it is brought to life by the addition of a little oil and a few other ingredients"). Inari-zushi (p. 189-90). Grilled usuage (with thin deep-fried tofu, p. 190). Deep-fried usuage (p. 190-91). Golden sushi rolls (with usuage, p. 191). Rôbai (Sanko-in fresh wheat gluten, p. 192-93). Deep-fried dried yuba (p. 195). Fried and simmered dried yuba (p. 196). Sesame "tofu' (with kuzu, p. 196-99). Almond tofu (p. 202). Salt-grilled tofu (from old Naniwa, today's Osaka, p. 203-04). Steamed tofu loaf (p. 206). Salad with white [tofu] dressing (*shira ae,* p. 206-07). Steamed tofu cup (*otôfu no chawan mushi,* p. 208). Deep-fried tofu in thick sauce (p. 209). Tofu sauté (*yaki-dofu no atsuyaki,* p. 213). Bean flowers (*nattô no mochi gurumi,* p. 215). Buckwheat-miso topping (p. 215-16). Miso mayonnaise (with sweet white Saikyo miso, p. 216-17). Contains 17 pages of color photos showing dishes prepared from recipes in this book. The 510 delicate illustrations (both line drawings and simple brush paintings) clarify and enhance the text throughout.

In 1987 this book was re-issued with a new title: The Heart of Zen Cuisine: A 600-year Tradition of Vegetarian Cookery. Address: 1. Abbess, Sanko-in Zen temple, Honcho 3-1-36, Koganei-shi, West Tokyo (Musashi Koganei Station).

5952. **Product Name:** Diet Tofu.
Manufacturer's Name: Lucky Bean Cake.
Manufacturer's Address: 1060 W. 39th St., Norfolk, VA 23508. Phone: 804-489-1493.
Date of Introduction: 1982?
Ingredients: Organically grown soybean, purified water, calcium sulphate.
Wt/Vol., Packaging, Price: 16 oz packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.
How Stored: Refrigerated.
New Product–Documentation: Label (undated) from about 1982 sent by Bruce Rose of Rosewood Products. 2000. Oct. 15. Red, black, and white on yellow, printed on clear film. Note: The company name is not clear. Contains four serving suggestions.

5953. **Product Name:** Tofu, and Soysage.
Manufacturer's Name: Mainley Tofu.
Manufacturer's Address: P.O. Box 209, Anson, ME 04911. Phone: 207-696-5845.
Date of Introduction: 1982?
New Product–Documentation: Letter from Peter Beane. ca. 1982. David Friedman and Amythyst Montford are friends at Mainley Soyfoods. He is making tofu and soysage again, but now his main business is growing alfalfa sprouts (450 lb/week). He is about to marry Noreen O'Leary. Shurtleff & Aoyagi. 1982. Soyfoods Industry: Directory & Databook. p. 1.

5954. Northern Soy. 1982? The tofu pasteurization myth (Leaflet). Rochester, New York. 1 p. Single sided. 28 cm. Undated.
• ***Summary:*** "At Northern Soy we only package tofu in bulk so that the retailer can take proper care of the product by changing the water regularly. In this way the customer is assured of purchasing fresh, good tasting tofu. We take pride in guaranteeing that our retailers always sell fresh tofu. To this end, we give frequent delivery service and educate our retailers in the proper car of tofu.

"So remember, no matter what steps are taken, stale packaged tofu will never compare in taste and quality to the fresh product."

At the bottom of the sheet is a label (2.5 by 1.25 inches) labeled "Soyboy Tofu." Address: 30 Somerton St., Rochester, New York 14607. Phone: (716) 442-1213.

• ***Summary:*** "It's clear to us that the tofu industry now stands at a crucial point. Our most immediate need is to push tofu sales in the fastest, most efficient way possible. The most effective way to do this, both in terms of time and dollars, is to form a tofu council to conduct mass education programs, largely through a public relations campaign in the media.
"At the Seattle [Washington] Soyfoods Conference last July, many of the larger tofu companies spoke of the need to act together in expanding public awareness of tofu. The consensus was that forming some kind of tofu council would be the best way to proceed." Address: 1. Chairman; 2. President. Both: Legume Inc., 91 Roseland Ave., Caldwell, New Jersey 07006. Phone: (201) 228-9466.

restaurant at 231 West 55th St., between Broadway and Eighth Ave. in New York City. They sell: "fried half-eggplant mellowed with miso sauce, topped with sesame seeds; soybean cakes [tofu] in seaweed soup with vegetables; oshitashi [o-shitashi, o-hitashi], a salad of marinated spinach with soy sauce and crunchy flakes of dried bonito, and natto, winy, fermented soybeans in an egg and scallion sauce."

And "zaru soba, cold buckwheat noodles with soy sauce, horseradish and scallions were refreshing." "Broiled fish, meats and poultry, done teriyaki-style are stringy and less interesting..."

5965. Flinders, Carol. 1983. Tofu industry prepared for boom times in '80s. *Hartford Courant* (*Connecticut*). Jan. 19. p. E2.

• ***Summary:*** "That faint rumble that you hear just offstage is the tofu industry, tooling up for its Great Leap Forward in the 1980s." Yearly production are expected to grow to 200 million pounds by 1986, from 50 million pounds now.

Carol met with Dik and Sharon Rose, co-owners of Brightsong Light Foods of Petaluma, California. They operate out of what used to be a poultry processing plant; Petaluma used to be the "chicken capital of the West."

Brightsong makes 400 lb/day of tofu, as well as "soy milk, soyshakes, and a number of tofu-based salads, spreads, and desserts.

"Brightsong is an example of the first phase of the soy-foods industry–low profit margin, relatively low volume and very labor intensive."

An illustration shows the Brightsong logo. There is a recipe for Hot and sour tofu soup.

5967. Jacobs, Sanford L. 1983. Company finds a niche selling frozen foods made with tofu. *Wall Street Journal.* Jan. 24. p. 23 or 27.

• ***Summary:*** Chandri and Gary Barat assume that they can get Americans to eat bean curd and like it. They envision frozen products made of the white, cheesy, nearly tasteless ingredient–properly known as tofu–selling briskly in supermarkets across the country.

"Many businesses are started with such visions. Seldom do they succeed. Three out of four new frozen food products don't make it in the marketplace and disappear...

"The Barats' company, three-year-old Legume Inc., can't be counted a success yet. A private sale of stock last year raised $100,000 that saved it from bankruptcy. But the Bloomfield, N.J., concern has succeeded in placing its products in health-food stores across the country and in a few supermarket chains on both coasts...

"Legume's success doesn't depend on people eating plain tofu. 'Our idea,' says the 40-year-old Mr. Barat, 'was to put it in finished products in ways that Mr. and Mrs. Average American can understand.'

"... In Legume's frozen lasagna, ravioli and pizza, tofu replaces cheese. The result is convenience food that is low in fat and calories...

"The Barats had something to do with it, too. 'These people are totally committed to what they are doing,' says Mr. Bloom. Both vegetarians, they worked together before they were married in researching tofu and the food industry. By early 1980 they had a 100-page business plan but little money. Legume was created when the couple began making quiches, muffins and desserts of tofu in their New York City apartment and selling them with mixed success at local street fairs.

"A break moved the Barats quickly beyond the cottage-industry stage. A friend introduced them to a baker in New Jersey. He was impressed by their business plan and put $19,500 into the company and let them use his bakery after his daily baking was done. The professional facilities enabled the Barats to develop new products and produce more tofu baked goods, which they were able to sell to health-food stores.

"Another fortuitous move was plucking Ira Shapiro's name from a list of food distributors and asking him to represent Legume. Mr. Shapiro is a veteran distributor who represents major low-calorie frozen food lines–something the Barats didn't know when they picked him out. He thought tofu-baked products could be big, but Legume was too small for his company then. However his son, Robert, put $10,000 into Legume and became sales manager.

"As luck would have it, a large Italian food company is near the bakery used by the Barats. Its owner was introduced to the couple by the baker, and they found that his philosophy of food coincided with theirs... From that start, the food company went on to make Legume's first tofu lasagna in May 1982, and now produces all its products. Eventually, the baked goods were dropped in favor of the Italian frozen products, which have gained supermarket acceptance quicker than quiches, muffins and desserts could have...

"Legume's sales are only $40,000 a month, $20,000 less than the breakeven point. But the company will survive, Mr. Barat says, even if it doesn't get the money he is after. There's enough left from last year's financing to see it through to profitability." Address: Staff reporter.

5968. Oers, Ton van. 1983. Re: Soya in Kananga, Zaire. Letter to William Shurtleff at Soyfoods Center, Jan. 25. 1 p. Typed, without signature.

• ***Summary:*** In Nov. 1982 Sjon Welters in Amsterdam wrote

© Copyright Soyinfo Center 2013

William Shurtleff: "A Dutch priest who works in Zaire came to visit our tofu plant to learn about possibilities for soyfoods in the village in which he worked. The local people have grown soybeans for 10 years and he is thinking of making tofu and soymilk from them."

Ton van Oers responded as follows to a letter from Shurtleff: "I am a great believer in soya myself. Masuika is a fertile agricultural region which provides foods such as manioc, corn, and soya to much of the city of Kananga and Mbuji Mayi.

"The soybean crop this year in Masuika was about 200 tons; part was bought by the mission and the rest by commercial firms. The price (3.00) is low. Lots is exported to Kananga, located about 260 km north of here, to a factory named Bisoka, where it is processed to make cakes, cookies, and soy flour (soyameel). In Masuika, 30-40 tons of soybeans are processed into soy flour, which is packaged in 750 gm plastic bags and then sold elsewhere. People use it mostly in food for children. Very often, it is prescribed by doctors. For us, due to the limited possibilities, the most suitable method to sell soya is to roast it then grind it into flour. It stores well in this form. We would like to learn about other ways of possibilities.

"Soybean cultivation started here in 1965. In Kananga there was an agricultural school of which Father Vaneste was the director. The people introduced soya under his direction. The pastor explained the benefits of soya during a catechism lesson, then he gave everyone a 250 gm glassful of soybeans. In 15 years this has expanded to 200 tons. Sales of soybeans have always been guaranteed by the mission. The seeds are planted in January and harvested in May. Yields are 600-800 kg/ha.

"I cannot predict the future of soya. I hope it will continue to exist and that the population will see its usefulness, not only as a cash crop, but also as a means to improve nutrition. Personally I feel the possibilities for doing things with soya are pretty limited: soy flour and soya cakes or cookies. Making tofu seems pretty complicated and it does not store well." Address: M.C. Masuika, B.P. 70, Kananga, Zaire.

5969. Gevaert, Pierre. 1983. Re: Making miso, tofu, and soy sauce in Europe. Questions answered on Soyfoods Center letterhead (dated 26 Jan. 1983) and returned to SC. 1 p.
• ***Summary:*** Q1. Are you now making soy sauce (shoyu or tamari) in both Belgium and France? Please give the address and phone numbers of each plant where you are making soy sauce. When did you start making soy sauce in France?

Answer 1. We will finally start making shoyu in April 1982, only in France. At Lima-Andiran, 47170 Mezin, France. Tel. 5365 1002. Lima is presently making miso at their plant in Mezin.

Q2. Do you make miso at your plant at Sint-Martens-Latem? Answer 2. No.

Q3. Are you making tofu, yourselves, anywhere in Europe or is it made for you by other companies? Answer 3. Jonathan at Antwerp, Belgium, makes it for us using our organic soybeans.

Q4. Can you tell me (if it is not a secret) roughly how much of the following in metric tons you produced in 1982? Answer 4. Soy sauce 0. Miso 5 tons. Tofu 2/3 tons. Address: Lima Foods, Edgar Gevaertdreef 10, Sint-Martens-Latem 9830, Belgium. Phone: 09-52-4176.

anybody and everybody to fund a press release program as I outlined in my October letter is more likely to come about." Address: Nature's Touch Soyfoods, P.O. Box 511, Encinitas, California 92024. Phone: (714) 753-5979.

5974. Arasaki, Seibin; Arasaki, Teruko. 1983. Vegetables from the sea: Low calorie, high nutrition, to help you look and feel better. Tokyo: Japan Publications. 196 p. Illust. (color plates and line drawings). Index. Jan. 26 cm. [Eng]
• ***Summary:*** This is probably the best English-language book written about sea vegetables. Contents: Preface. Part I: General information. Introduction. 1. In the human diet: In general, in Japan. 2. Dietary and medical applications: Chemical composition (polysaccharides, proteins, amino acids and peptides, fats and lipids, vitamins, minerals, nutritional value, pigments), flavor and taste (specific Japanese seaweeds as foods), medical applications (antilipemic and blood-cholesterol reducing substances, blood anticoagulants, antitumoral {anti-cancer} effects, antibiotics, toxic compounds, medical uses of alginate), folk medicine, thalassotherapy and algotherapy, longevity. 3. Biology of the algae: Differences, pigment systems, photosynthetic products and storage substances, land and marine vegetation, life-spans and seasonality, generation alterations. 4. Harvesting and farming: General (Monostroma and Enteromorpha), brown algae (Laminariales and Undaria, artificial cultivation), red algae (Porphyra, Eucheuma and Gelidium), freshwater algae. 5. Processing and preserving: General, amanori and aonori, green algae (*Caulerpa*, sea grapes), brown algae (wakame, kombu, arame and hijiki, mozuku), red algae, nostoc freshwater algae, domestic algae. 6. Illustrations of major sea vegetables.

Part II: Cooking with sea vegetables. Kombu (*Laminaria*). Wakame (*Undaria pinnatifida*) and Matsumo (*Analipus japonicus*). Hijiki (*Hizikia fusiforme*). Arame (*Eisenia bicyclis*). Asakusa nori (*Porphyra tenera*). Tosakanori (*Meristotheca papulosa*). Kanten (*Agar*). Green laver (*Enteromorpha*).

Index of scientific names of sea vegetables. Index of Japanese names of sea vegetables. List of recipes. Address: 1. Prof. and lecturer on Fisheries Botany and Marine Ecology, Univ. of Tokyo and Nihon Univ., Japan; 2. Prof. Kobe-Yamate Women's College, Lab. of Biochemistry.

5975. **Product Name:** Vegie Burger.
Manufacturer's Name: Bud, Inc.
Manufacturer's Address: 1100 Wicomico St., Baltimore, MD 21230.
Date of Introduction: 1983. January.
Ingredients: Natural nigari tofu, carrots, cabbage, onion, celery, potato, yam, okara, soymilk, sesame seeds, sunflower seeds, soybean oil, sea salt, spices.
Wt/Vol., Packaging, Price: 7 oz vacuum pack.
How Stored: Frozen.
Nutrition: Per 3.5 oz.: Calories 210, calories 12 gm, carbohydrates 13 gm, fat 13 gm, sodium 235 mg (235 mg/100 gm).
New Product–Documentation: Label. 1983. Jan. (dated). 4.5 inches square. Black and white on reddish-purple. "Keep frozen. Completely vegetarian. All natural. No preservatives." Logo reads: "Soyfoods for a healthy world"; East West. 1987. June. p. 65.

5976. Forbes, R.M.; Erdman, J.W., Jr.; Parker, H.M.; Kondo, H.; Ketelsen, Sandra M. 1983. Bioavailability of zinc in coagulated soy protein (tofu) to rats and effect of dietary calcium at a constant phytate:zinc ratio. *J. of Nutrition* 113(1):205-10. Jan. [10 ref]
• ***Summary:*** Zinc bioavailability as expressed by weight gain was reduced by about 48% by tripling the calcium content of a tofu-based diet, but this effect was not seen on an egg-white-based diet. Address: Univ. of Illinois.

5977. Kingaard, Jan. 1983. The winning recipe for tofu sales: The marketing menu. *Whole Foods* (*Berkeley, California*). Jan. p. 8-10. [19 ref]
• ***Summary:*** Tofu's selling points: Budget stretcher. Natural product. High protein source. Diet food. Convenience food. Versatile staple. Other considerations. Tofu booklist.

On page 13 is a full-page introduction to tofu titled "Getting to know your tofu." In the upper right corner is a rectangle in which is written: "Attach your business card here so consumers know who to contact when they are ready to buy."

5978. Shurtleff, William. 1983. Graph of tofu and tempeh manufacturers in the West. Lafayette, California: Soyfoods Center. 1 p. Jan. Unpublished manuscript.
• ***Summary:*** This graph shows how the number of tofu manufacturers in the West grew from 56 in Oct. 1975 to 310 in Jan. 1983. The number of tofu manufacturers in the USA grew from 48 in Oct. 1975 to 182 in Jan. 1983.

The number of tempeh manufacturers in the West grew from 8 in Oct. 1975 to 78 in Jan. 1983. The number of tempeh manufacturers in the USA grew from 1 in Oct. 1975 to 56 in Jan. 1983. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

5979. **Product Name:** Soya Nova Tofu.
Manufacturer's Name: Soya Nova Tofu Shop.
Manufacturer's Address: Glen Echo Rd., R.R. #1, Mayne, BC, V0N 2U0. Canada.
Date of Introduction: 1983. January.
New Product–Documentation: Talk with Debbie Lauzon. 1990. Dec. 28. Then letter from her on 11 Feb. 1991. She learned how to make tofu 15-20 years ago in California, where she also bought tofu. Then she moved to Canada and was living on a farm in the Ottawa Valley, Ontario, Canada.

© Copyright Soyinfo Center 2013

A friend bought and sent her a little tofu kit that enabled her to make about 1 pound of tofu. She and Chris Kodaly first started making tofu commercially in Jan. 1983 at Mayne, BC, Canada. Mayne Island is a small island in the Gulf Islands, with a population of about 500. The official name of the company was and still is Soya Nova Tofu Shop. The market was small so she only made 10 lb of tofu a week. But nearby Galiano Island is a larger market, so on Fridays she took went there and sold her tofu at the farmers' market. The only way back to Mayne Island was via Saltspring Island (the largest of the Gulf Islands), so she sold her tofu there at the Saturday farmers' market. Saltspring (population 5,000) soon became her biggest market so she and Chris moved there from Mayne in 1985. Their tofu shop is part of their home and is considered a cottage industry.

As of Feb. 1991 Soya Nova makes about 800 lb/week of tofu on Saltspring (up from 400 lb/week in Dec. 1990); they have about 3 employees, not all full time. Chris Kodaly has not been directly involved with the company for the last couple of years. He is a piano teacher, but he is still her business partner. "The most important thing for Soya Nova is to produce the freshest and best tofu for our community, friends, and family."

Leaflet sent by Deborah. 1991. Feb. 6. The company is now located at 1200 Beddis Road, Ganges, B.C. V0S 1E0. Phone: 537-9651. But the return address on the envelope is RR#2 Rourke Rd. C-28, Ganges. Products that are coming soon are Okara Granola Bars and Tofu Cheesecake.

5980. Wasserman, Debra. 1983. Tofu cooking demonstration: Friday 8 pm. January 28. *Baltimore Vegetarians* 2(1):1. Jan.
• ***Summary:*** "Baltimore Vegetarians will be sponsoring both an enjoyable and educational event on Friday evening, January 28th, 1983. At 8 pm, in the Mt. Vernon Place Methodist Church located at 10 East Mt. Vernon Place. Baltimore Vegetarians member Sandy Weinstein will do a tofu cooking demonstration as well as a discussion.

"Sandy will be preparing an appetizer–tofu tahini dip, a main dish–tofu arame seaweed pie, and a dessert–tofu cheese cake. She will also speak about the various ways tofu can be prepared–for instance in spreads, marinades, desserts, main dishes, etc.

"The cost for this event is $1.00 for members and $3.00 for non-members. We will also be offering pita sandwiches for 75 cents each and free cider.

"Call 752-VEGV and let us know if you plan to attend this event." However reservations are not required. Address: P.O. Box 1463, Baltimore, Maryland 21203. Phone: 301-752-VEGV.

5981. *Whole Foods* (*Berkeley, California*). 1983. Getting to know your tofu. Jan. p. 13. [2 ref]
• ***Summary:*** A one-page introduction to tofu based on *Tofu Cookery* by Louise Hagler and *The Book of Tofu* by Shurtleff and Aoyagi. Contents: What is tofu? Taste. Texture. Freshness. Cooking methods. Blending. Freezing. Marinating. Measuring. Draining. Variations: Frozen tofu, dried-frozen tofu, fermented tofu, deep-fried tofu.

5982. Dominguez de Diez Gutiérrez, Blanca. 1983. Re: Work with soyfoods in Mexico. Letters to William Shurtleff at Soyfoods Center, Feb. 6, Feb. 12, March 1, and Aug. 10. 7 p. total. Handwritten, with signature. [Eng]
• ***Summary:*** In a typed letter dated 5 Dec. 1982 William Shurtleff sent Blanca a new, updated draft of a history of soy in Mexico and of Blanca's work. "Could you please read it again and given me your additions and corrections. The section on your work is too long already, so please don't make it longer–but its really nice. Also please try to help me in answering the enclosed questions.

Blanca was away in Paris, France, teaching yoga and diet, so the letter was delayed in reaching her. Her three letters are all handwritten, the first from Boston, Massachusetts. She is on her way to teach about Ann Wigmore's inexpensive healing diet at a hospital in Houston, Texas. She hopes to be back at her "spiritual school" in Mexico teaching yoga and soyfoods in about April. "I find that today there is no longer the same interest that there was before in the U.S. for soya. Everybody seems to be mad about raw food."

The DIF has disappeared, having been absorbed by the Dept. of Public Health. Questions: (#2) The National Autonomous University of Mexico. (#4) Blanca left Tepoztlan in order to reach more people, in particular low income ones, who couldn't come to her. (#21). In the year 1977.

Letter of Feb. 12. "I was not the founder of the Circle Yoga de Tapasthona in Tepoztlan, Morelos; I was the president of it. The founder was Swami Pranavananda Saraswati from India."

Letter of March 1. "I have been a vegetarian for 22 years but have not adhered to any diet in particular. Perhaps the closest is the macrobiotic, [but] with more vegetables & fruits. Have never consumed milk, eggs, or cheese..." Address: Apdo. Postal 226, Jalapa, Veracruz, Mexico.

5984. Piotrowski, Joyce Dodson. 1983. Chinese barbecue no longer requires torching the hut. *Washington Post.* Feb. 9. p. E1, E16.
• ***Summary:*** The tradition of Chinese barbecue has an ancient origin. The Chinese invented charcoal, which burns hotter than wood, probably for use barbecuing, using cast-

© Copyright Soyinfo Center 2013

iron cylindrical ovens, with a grate and openings at the bottom for supplying air to the charcoal fire. Any Chinese dish that is cooked in an oven (including Peking duck) can be considered a barbecued dish.

Describes the details of making good Peking duck with its thin crisp skin, moist and fragrant meat, and golden-brown color.

The secret of making delicious barbecued Chinese spareribs and this strips of red roast pork lies in the sauce, which "is a blend of hoisin sauce, soy [sauce], honey, garlic, ginger, and five-spice powder. This sauce is used as both a marinade and a basting liquid, and sometimes even as a sauce to pour over the meat.

"In fact, there are recipes in Chinese cookbooks for dishes such as barbecued bean curd that are not really barbecued but are really stir-fried in barbecue sauce." For best results, make the barbecue fresh yourself rather than buying a ready-made product.

Note that the word "soy" (used by itself, at this late date) refers to soy sauce.

5985. Hansen, Barbara. 1983. Cookbook welcomes the new year: A few celebrity recipes added to old favorites. *Los Angeles Times.* Feb. 10. p. L1, L29. [1 ref]
• ***Summary:*** The Los Angeles Chinese Women's Club has reissued its cookbook, *Gourmet Celestial,* first published in 1970. Income from sales is used to fund scholarships. The book includes several meatless recipes that are traditionally served during the 24-hour fasting period that runs from midnight of Chinese New Year's Eve to the sundown of New Year's day. One of these given here, Chinese meatless dish (Law Hon Jai) includes: "¼ pound dried bean curd stick [dried yuba sticks], soaked overnight and cut into 2 inch lengths,... ¼ pound sweet dry bean curd [probably sweet dried yuba], soaked overnight then halved,... 4 or 5 pieces fried bean curd, quartered,... ½ cup fermented bean curd cake [fermented tofu], ¼ cup red bean curd" [red fermented tofu]. Address: Times staff writer.

5986. Leonard, Thom. 1983. Pioneering work with miso in America (Interview). *SoyaScan Notes.* Feb. 12. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** In the fall of 1974, Thom Leonard made his first batch of barley koji and barley miso using a recipe in Herman Aihara's new book titled *Soybean Diet.* The 80-pound batch of miso was aged in a soy sauce keg from Hong Kong. He then made 80-pound batches of chunky wheat miso in the fall of 1975 (he later pickled tofu in it) and of barley miso in early 1976. After moving to Fayetteville, Arkansas, he and Jim Hemminger made larger scale miso equipment and on 15 April 1977 packed their first 35-gallon cedar vat with brown-rice miso. Soon over 1,000 lb were aging in the vats. This miso was sold to and distributed by the Ozark Cooperative Warehouse.

Thom and Richard Kluding founded the first Caucasian-run miso company in North America, Ohio Miso Co. in Monroeville, Ohio. They began production on 13 March 1979. By Jan. 1980 Ohio Miso was making several varieties of miso: brown rice, barley (one or two year), mellow brown rice, mellow red, and black soybean; output was 2,400 lb/week.

Then in the spring of 1980 Leonard and Kluding split up, largely because of interpersonal problems. In the summer of 1980 Leonard taught miso classes at the macrobiotic Spiral Inn and Moniteau Farm in Missouri. Then in late 1980 he taught 2 classes on making miso, natto, tofu, and tempeh at the Kushi Institute in Boston, Massachusetts, with 30-40 people per class. In 1981 and 1982 he taught 8 similar classes out of his home in Boston, plus four 3-day residential workshops on the same subjects. All were sold out every time. In 1983 he plans to travel Ireland to start a miso plant in County Kilkenny. Friends of his own several old buildings. The Irish government will help pay startup costs, covering 45% of the required startup capital plus 25% of the rent for the first 5 years. He hopes to start in July 1983 and to be producing miso by late 1983. He hopes to make 100,000 to 200,000 pounds of mostly barley miso, both mellow barley and 12-24 month barley miso. Thom's constitution is so yang that he can't eat much miso–which is also very yang. But this week he enjoyed miso soup twice, which is more than he has had for the past year.

Note: Thom and his wife went to Ireland but they never started a miso plant or commercial miso production there. Address: Brookline, Massachusetts.

5987. Mintz, David. 1983. History of the development of Tofutti (Interview). Conducted by William Shurtleff of Soyfoods Center, Feb. 14.
• ***Summary:*** Extensive, frank discussions on his pioneering work, from its earliest days. Mintz says that Tofutti contains lots of tofu. Address: New York.

5988. *Chicago Tribune.* 1983. Homemade tofu: Preparation is easy when you know the Asian secret. The good cook. Feb. 17. p. S_A8.
• ***Summary:*** Gives a recipe for making "Bean curd" at home using nigari as a solidifier. It is not hard to make tofu at home. "Homemade cakes are incomparably fresh in flavor and fine in texture."

5989. Krieger, Verena. 1983. Vielseitiger Tofu [Many-sided tofu]. *Schweizer Familie.* Feb. 23. p. 81-84. [Ger]
• ***Summary:*** Letter from Verena Krieger. 1983. March 8. "This is the largest family magazine in Switzerland."

5990. Zacharowicz, Paul. 1983. Re: Soybeans and soyfoods in Austria. Letter to William Shurtleff at Soyfoods Center, Feb. 23. 2 p. Handwritten. [Eng]

© Copyright Soyinfo Center 2013

• ***Summary:*** He will try to find out about the Salzburg Faire. He discovered a relatively old Austrian book in which the Soybean, for Western standards, is rather extensively discussed. It appears that before World War II, the soybean was making inroads here. Currently he is aware of only two farmers in Austria who produce soybeans–and in only extremely limited quantities (for their pigs, of course). "There appears to be some sort of restriction on soybean production between the U.S. and Austrian governments."

Lothar Vogel is developing a specialty tempeh from dried peas. He has created contacts with farmers who have tons of peas and no idea of what to do with them. "The spectrum of soyfoods is still a future endeavor. With positive, constructive collaboration it will become a bona fide reality in the near future. Currently we are working on an information awakening of the general public regarding whole foods in general. Further, there are an increasing number of Austrian Macrobiotics who are producing tofu regularly and delivering it to whole foods stores as well as Chinese restaurants." Address: Hasnerstr. 159/18, 1160 Vienna, Austria.

5991. Pantry Supermarkets. 1983. Double coupons! (Ad). *Los Angeles Times.* Feb. 24. p. SG3.
• ***Summary:*** The section titled "Oriental foods" states: "Hinode natto (steamed soybeans) 5 oz.–49¢. Hinode Japanese tofu 19 oz.–59¢. Hinode kinugoshi tofu 12 oz.–59¢. Hinode Chinese tofu 20 oz. 59¢. Sisco koji miso 1 lb.–$1.25. Kokuho Rose rice 15 lb. bag–$7.99."

Note: The Pantry has 11 supermarkets in southern California: Pasadena (3), Duarte, Placentia, Arcadia, Santa Ana, Fullerton, Tustin, Costa Mesa, and Monrovia. Address: Los Angeles Co. and southern California.

5992. *Better Homes and Gardens.* 1983. Homemade tofu. Feb. p. F7.
• ***Summary:*** Contains recipes for: Homemade tofu. Peppery tofu with cashews. Peanut butter-tofu cookies.

5993. **Product Name:** The First Great Tofuburger Mix.
Manufacturer's Name: Essential Foods, Inc. (Product Developer-Marketer).
Manufacturer's Address: P.O. 8462, Emeryville, California. Phone: 314-832-7575.
Date of Introduction: 1983. February.
Ingredients: Sunflower seed meal, soy flour, sesame seed flour, arrowroot, garbanzo flour, sea salt, soy sauce, garlic, onion, torula yeast, natural herbs & spices.
Wt/Vol., Packaging, Price: 5.3 oz (150 gm) foil packet.
How Stored: Shelf stable.
New Product–Documentation: Label (foil packet). Undated. 5.5 by 7.5 inches. Orange, blue, red, tan. Color photo of burger on front. Recipes on back for Tofuburgers, Tofuballs or Appetizers, Tofuloaf. Spot in Soyfoods. 1983. Summer. p. 54. The contents of the packet is mixed with 1 lb of tofu to make 6 tofu burgers.

Leaflet. 1983. The First Great Tofuburger Mix. 2 p. Address is 5565 Fremont St., Oakland, CA 94606. Talk with Craig Ramsell. 1989. March 14. This product was discontinued in late 1983, having been replaced by the Lite Chef California Burger. The product was co-packed by another company.

5994. **Product Name:** Firm Tofu.
Manufacturer's Name: Golden Jerusalem Tofu.
Manufacturer's Address: P.O. Box 6212 (Zichron Tuvia 19), Jerusalem 91061, Israel. Phone: 022-495-69.
Date of Introduction: 1983. February.
New Product–Documentation: Form filled out by Zvi Weisberg. ca. 1981-82. Shurtleff & Aoyagi. 1983. Soyfoods Industry and Market: Directory & Databook. p. 7.

Letter from Gloria Freedland in Franklin Village, Michigan. 1985. Feb. The new owner of Golden Jerusalem Tofu in Jerusalem, Israel, is Karen Freedland, her daughter. The business address has not changed.

Letter from David Silverstein from Setagaya-ku, Tokyo, Japan. 1987. Sept. 6. I have fond memories of Zvi Weisberg "with whom I studied tai chi for 4 years at 6:00 A.M. on a Jerusalem mountain top. I remember when Zvi was the only tofu maker in town and his lugging around always by foot his heavy water protected loving tofu. I'd love to get his address as I lost track of him when he finally left Israel after 10 or so years and headed back to the USA."

Talk with Avraham Sand. 1990. Sept. 9. This shop opened shortly after his Pillar of Dawn closed. It was a very funky, primitive operation located off Rehov Bezalel (Betzalel). He thinks that Simcha Susan Ergas bought this company, then scaled up to more sophisticated equipment imported from Japan.

5995. Legume, Inc. 1983. Now...Frozen prepared tofu entrees for institutional kitchens: Tofu Lasagna, Tofu Pizza, Tofu Ravioli, Tofu Manicotti (Ad). *Soyfoods.* Winter. p. 2.
• ***Summary:*** A half-page, horizontal, black and white ad. "Legume Inc. is proud to announce that its line of fully prepared, all natural tofu entrees are now packed for institutional use." Photos show the cover of the a box of Tofu Lasagna, Tofu Pizza, and Tofu Ravioli, and beneath each photo is a brief description of the product.

"It's time the Legume food system became part of your institutional meal planning. Good health and convenience, finally." Address: 91 Roseland Ave., Caldwell, New Jersey 07006.

5996. **Product Name:** Legume Tofu Manicotti.
Manufacturer's Name: Legume, Inc.
Manufacturer's Address: 91 Roseland Ave., Caldwell, New Jersey.

Date of Introduction: 1983. February.
Ingredients: Sauce: Crushed tomatoes, organic tofu, water, peanut oil, soy oil, garlic, onion, oregano, basil, parsley, pepper, San-J miso; For the pasta: high gluten enriched wheat flour, whole wheat flour, soy flour, DeBoles Jerusalem artichoke flour, wheat germ.
Wt/Vol., Packaging, Price: 16 oz carton.
How Stored: Frozen.
Nutrition: Per 8 oz.: 240 calories, 12 gm protein, 11 gm fat, 24 gm carbohydrates, 390 mg sodium.
New Product–Documentation: Ad in Soyfoods. 1983. Winter. p. 2. Spot in Soyfoods. 1983. Summer. p. 53, and 1984. Summer. p. 42.

5997. Leviton, Richard. 1983. Jack's Beanstalk: The American tofu dream on trial in Salt Lake City. *Soyfoods*. Winter. p. 18-27.
• ***Summary:*** This very interesting cover story bears the second subtitle: "A disillusioning report on a professionally run Utah tofu company that gambled its marketing success on selling to institutions–and went down gracefully in the end." Jack's Beanstalk was founded by Bonnie and Jack Roddy. Contains many photographs. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

5998. Leviton, Richard. 1983. Profile: Hinode Tofu Company. *Soyfoods*. Winter. p. 33-36.
• ***Summary:*** Hinode, America's largest tofu producer, with 1981 sales of $3.85 million, makes 150,000 pounds of tofu a week (30,000 lb/day) in the 15,000 square foot plant on 2 floors. 5,400 pounds of soybeans are used each day, 5 days a week. The company employs 60 people, with 50 in production at $4.50/hour plus medical insurance and benefits. Hinode handles at least 6 dealer brands (worth 10% of their tofu volume) and 20% of Hinode brand tofu is sold outside California. The emphasis today is to restrict private labeling and to promote the Hinode trademark instead. 85% of the tofu is sold at supermarkets and 15% at natural/health food stores. All tofu has been made with calcium sulfate since 1981. The shelf life of the pasteurized (60 minutes at 180ºF or 82ºC) is 28 days. The challenge is to get a fresh tofu texture after pasteurization.

In 1939 Yamauchi's mother purchased the Aala Tofu Co. in Hawaii, a company Shoan's brother still manages today. In 1947, after studying tofu-making at Aala, Shoan Yamauchi moved to Los Angeles and bought the existing Hinode Company; in 1957 he bought the Matsuda Tofu Co. Both plants produced handmade tofu in traditional, kettle-style shops. By 1957 Yamauchi had 22 employees making tofu. The Hinode plant had 5,500 square feet and Matsuda 4,500; between them they made about 3,000 pounds of tofu a day (2,000 cakes weighing 24 oz. each).

During the next 12 years, Yamauchi relocated one or another of his plants three times. In 1969 he consolidated them at 526 Stanford Street, purchased new, more productive equipment, and increased total volume to 7,500 pounds daily. He had 27 workers and turned $1 million in sales. In 1981 the company was traumatized when the 75% Mexican labor force voted to unionize–a strife-filled time. Then in 1982 Yamauchi committed his company to undoubtedly the most ambitious expansion plan to date. He spent $600,000 on new tofu equipment featuring new Nagasawa and Sany Ace systems and slated another $500,000 for construction of a new 16,000 square foot warehouse and processing building across the street. Steve Snyder joined Hinode in 1980 as western sales manager. Mr. Yamauchi owns a prosperous Santa Ana restaurant and a large interest in Airtight Containers. He is preoccupied with tofu quality, which he considers the key to success. John Yamauchi, age 22, is being groomed to take over the company sometime in 1983.

Peak seasons are Christmas, New Years, and Chinese New Years: sales typically rise 15%. Special products include tofu cutlets (4,000 units/week at 5 oz.) and tofu pouches (30,000 puffs/week at 1 oz. each).

Photos show: (1) Nine packages of tofu made by Hinode. (2) Shoan Yamauchi, age 66, standing in front of equipment in his plant. (3) Plant manager Phil Higa standing in front of the 110,000 capacity soybean silos. (4) Shoan Yamauchi holds pasteurized water-packed Hinode tofu, predated for a 28-day shelf life. (5) Overhead view of one of Hinode's two production floors, about 7000 square feet. (6) Hinode's marketing team, Phyllis Friar and Steve Snyder. (7) The main production floor. (8) A worker stands beside a large cooling tank that holds some of Hinode's daily tofu output of 30,000 pounds. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

5999. **Product Name:** Light Tofulogna (Cooked Tofu Bologna).
Manufacturer's Name: Light Foods Inc.
Manufacturer's Address: 6144 Bartmer, St. Louis, MO 63133.
Date of Introduction: 1983. February.
Ingredients: Organic tofu, okara, soy oil, water, dried egg white, textured soy protein, salt, barley flour, honey, shoyu, locust bean gum, onion and garlic, natural spices, paprika, natural spice oils.
Wt/Vol., Packaging, Price: 12 oz cylinder, plastic wrapped and vacuum packed.
How Stored: Refrigerated.
Nutrition: Per 1.6 oz. slice: Calories 105, protein 6.4 gm, carbohydrates 5.9 gm, fat 7.0 gm, sodium 510 mg, cholesterol 590 mg.
New Product–Documentation: Spot in Whole Foods. 1983. Jan. p. 39. "New Tofu Line. Light Foods, Inc. presents a new dimension to soyfoods: Light Links, Light Tofulogna and Light Soysage. Spot in Soyfoods. 1983. Winter. p. 48; Manufacturer's leaflet. 1983, undated.

Label. 1988 received. Chub-packed in a sausage-style waxed paper tube. 10 by 3 inches. Orange, yellow, and tan. With label printed directly on tube. "Pre-cooked. Meatless. 100% cholesterol free."

6000. Light Foods Inc. 1983. Light Foods Inc. is proud to present tomorrow, today: A light line of distinction (Leaflet). St. Louis, Missouri. 1 p. Feb. Front and back.
• ***Summary:*** This 4-panel leaflet is printed with brown ink on beige paper. On the front panel is a stylized smiling sun. On the two inner panels are descriptions of the following meatless products, each with ingredients and nutrition facts. Right page: Light Links (tofu hot dog) [launched July 1982], Light Soysage (sausage featuring okara, whole wheat flour, and soymilk), Light Tofulogna (featuring tofu and okara).

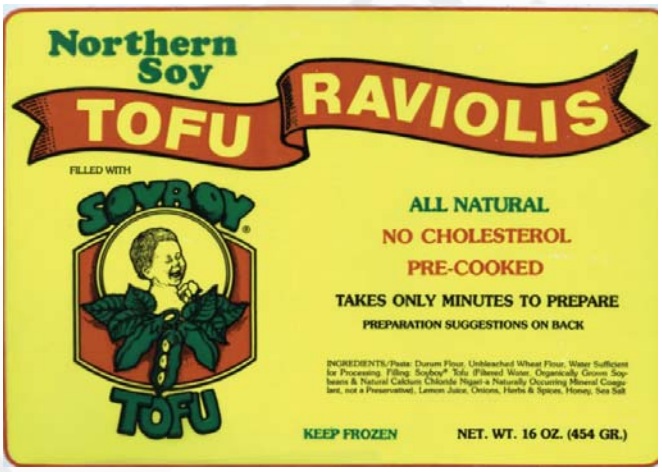
Right page (the label of each product is shown): Crusts (frozen): Golden Crusts (featuring whole wheat flour and soy margarine), Amazing Crusts (featuring cornmeal, okara, whole wheat flour). Pie in the Sky (Tofu Spinach Pie, Tofu Tamale Pie [launched June 1983], Tofu Apple Pie).

Back panel: "Thank you for your attention. In the spirit of light. In Joy."

Talk with Robert Davis. 2007. June 5. He recently underwent a personal transformation of spiritual death, dying to the Self and opening of the heart. The illustration of the sun was probably drawn by Martha Johnson. He will soon be moving to Nelson, BC, in the Kootenays (mountains) near Kootenay Lake to create the Shunya Institute, a safe space. Address: 6144 Bartmer, St. Louis, Missouri 63133. Phone: (314) 721-3960.

6001. **Product Name:** Cooked Raviolis.
Manufacturer's Name: Northern Soy.
Manufacturer's Address: 30 Somerton St., Rochester, NY 14607.
Date of Introduction: 1983. February.
New Product–Documentation: Spot in Soyfoods. 1983. Winter. p. 50. The 16-ounce frozen bags contain 10 large shells filled with tofu.

6002. **Product Name:** Northern Soy Tofu Raviolis. Renamed Soyboy Tofu Ravioli in Jan. 1987.
Manufacturer's Name: Northern Soy.
Manufacturer's Address: 30 Somerton St., Rochester, NY 14607. Phone: 716-442-1213.
Date of Introduction: 1983. February.
Ingredients: Pasta: Durum flour, unbleached wheat flour, water. Filling: Tofu, herbs & spices, lemon juice, fresh onion, honey, sea salt.
Wt/Vol., Packaging, Price: 16 oz package (without sauce).
How Stored: Frozen.
Nutrition: Per 4.5 oz. (4 ravioli): Calories 169, protein 9 gm, carbohydrates 29 gm, fat 1.5 gm, sodium 75 mg.



New Product–Documentation: Label. 1983, undated. 8.5 by 6 inches. Plastic. Green and orange on yellow. "Filled with Soyboy Tofu. All natural. No cholesterol. Pre-cooked. Takes only minutes to prepare." Manufacturer's catalog. 1987. Lists ingredients. Label. 1987, undated. Prepare by boiling, baking, deep-frying, or microwaving. Richard Rose review. 1987. Oct. 28. "Very good." Label. 1987. 9.5 by 7 inch plastic bag. Black, red, yellow, and green on white. "SoyBoy all natural meatless entrees." Talk with Andy Schecter. 1988. Feb. 17. The product was renamed in Jan. 1987. The plural of ravioli is ravioli, not raviolis.

6003. Okubo, Kazuyoshi. 1983. Tôfu no hanashi [The story of tofu]. Yamagata-ken Tofu-Aburage Shogyo Kumiai. 20 p. [Jap]
Address: Yamagata-ken, Japan.

6004. **Product Name:** Tempeh Lite (Okara & Brown Rice Tempeh).
Manufacturer's Name: Pacific Tempeh.
Manufacturer's Address: 1508 62nd St., Emeryville, CA 94608.
Date of Introduction: 1983. February.
Ingredients: Soy puree [Okara], brown rice, water, tempeh culture.

© Copyright Soyinfo Center 2013

How Stored: Refrigerated.
Nutrition: Per 4 oz.: Calories 84.
New Product–Documentation: Label. 1983. "New. 71% less fat. Only 84 calories per 4 oz. serving." Spot in *New Age*. 1983. June. p. 63. "Pacific Tempeh sells an unusual Tempeh Lite, which has half the calories of standard whole-soy tempeh and 71% less fat." Talk with Travis Burgeson of Pacific Tempeh. 1983. April. This product was introduced in Feb. 1983. It contains 25% by weight of brown rice and is more expensive to make than soy tempeh. He received a super response to the product at the Natural Foods Expo at Anaheim, where he served it sliced and deep-fried, dipped in shoyu seasoned with garlic, coriander and lemon juice.

Shurtleff & Aoyagi. 1985. History of Tempeh. p. 52. America's first commercial product of this type. Okara tempeh was the product concept that got Travis Burgeson interested in tempeh.

6005. Pickarski, Ron (Brother). 1983. Gourmet cooking: Tofu. *Vegetarian Times.* Feb. p. 41.
• ***Summary:*** Starts with a brief introduction to tofu. Contains recipes for: Tofu trio salad (a full dinner salad). Tofu cottage cheese (with "1 cup crushed tofu"). Tofu hummus. Soy mayo (with "1½ lbs. tofu"). Tofu eggless salad.

Note: Brother Ron Pickarski is a Franciscan brother and a world-class vegan chef.

6006. Shurtleff, William; Aoyagi, Akiko. 1983. The soyfoods industry and market: Directory and databook 1983. 3rd ed. Lafayette, California: Soyfoods Center. 112 p. Feb. No 28 cm. [191 ref]
• ***Summary:*** As of May 1982, America's four largest tempeh makers (in lb/week) are Pacific Tempeh (5,000, California, started 1980), Tempeh Works (4,250, Massachusetts, started 1979), Soyfoods Unlimited (3,000, California, started 1981), White Wave (1,900, Colorado, started 1979). About 17,455 lb/week of tempeh are sold by 15 companies in the USA.

• ***Summary:*** Discusses Carl Tropper, Heller Enterprises, Eden's Orchard, David Mintz and Tofutti.

6009. *Soyfoods.* 1983. Soyfoods mini-boom underway in Europe. Winter. p. 8-9.
• ***Summary:*** "'This year we became aware that the kind of developments that took place in the U.S. in 1977-78 are now taking place in Europe with the sudden increase in the number of soyfoods companies,' reports Bill Shurtleff of The Soyfoods Center. 'Historically speaking, this will probably be the most important event for the soyfoods industry in 1982. Europe is coming on strong and it's a tradition of soyfoods that goes back 130 years that is now being revived.'

"Most of the impetus for soyfoods in Europe apparently stems from the vigor of the macrobiotic community. Per Fruergaard started Tofu Denmark in Valby and has encountered legal problems regarding the use of nigari. In Paris, France, Bernard Storup purchased a Takai tofu system; Ab and Paulien Schaft are setting up a small plant in Baillestavy to make miso, shoyu, natto, and koji; in Ivry, Jean Luc Alonso's macrobiotic center, Traditions du Grain, prepares for tempeh production.

"In the British Isles, Paul Jones' Tofu Shop in London, England, has been active since 1981 while Community Health Foundation, also in London, promotes homescale tofu, tempeh, and misomaking. In Dublin, Ireland, Jane O'Brien gives tofu cooking classes, has published a tofu cookbook and is considering commercial production.

"The macrobiotic movement is strong in Belgium where de Brandnetel, a large Antwerp-based distributor of natural foods, operates a tofu shop in the rear of their retail store. Jonathan Company in Ekeren makes 3000 pounds of tofu weekly, along with seitan, mochi, soups, canned foods, and soymilk. Seven Arrows in Leuven is another small tofu shop in operation in Belgium.

"In the Netherlands Manna was the first company to introduce soyfoods to the public and is now an important promoter. Manna's John Welters (who provided much of this information) lectures on homescale soy processing and reports interest and sales are rising as are the number of magazine articles on soyfoods. Manna itself markets tofu spreads and distributes a joint equipment price list with Takai Company of Japan. Witte Wonder in The Hague makes tofu, as does De Morgenstond in Bakkeveen, while Peter Dekker's Jakso produces tempeh. In Portugal, Unimave promotes soy as part of the macrobiotic diet and makes small amounts of tofu and soymilk; Jose Parracho in Setubal is starting a self-sufficient center involving tofu and tempeh production.

"In Soyen, West Germany, Wolfgang Furth-Kuby, who published *Das Tofu Buch* (by William Shurtleff) in German, is interested in tofu production at his Sojaquelle. Tofu producers are Swame [sic, Swami] Anand Svadesha in Furth-im-Wald, Thomas Kasas [sic, Karas] who installed a tofu system last summer at his Bittersuess [later Soyastern] in

© Copyright Soyinfo Center 2013

Cologne, and Alexander Nabben in Munich.

"In Sweden Tim Ohlund and Ted Nordquist have been operating Aros Sojaprodukter since early 1981 in Örsundsbro using a Takai pressure cooker system and vacuum packaging. In Rimini, Italy, Gilberto Bianchini makes tofu at Community Foods. And Switzerland is the home of four soy companies including Restaurant Sesam in Bern, an active macrobiotic center with homescale tofu and seitan production; Marty Halsey makes tofu in Nyon; Hans Opplinger produces tofu in Chan; and Verena Krieger operates Sojalade in Luzern (Lucerne).

"Sojalade, whose tofu output at mid-summer 1982 was 1000 pounds weekly, is a company launched mainly on the results of an article Ms. Krieger published ('Yesterday Steak, Tomorrow Tofu') in a Swiss Sunday magazine. Krieger then established her shop to meet the expected tofu demand stirred up by her article. Swiss national television ran a 30 minute feature on soybeans this year in which Krieger made a brief demonstration of 5 tofu dishes. 'Since then tofu has been a favorite child of the media,' she says, adding that tofu appeared in the pages of *Blick*, a mass market newspaper."

Photos show: (1) European representatives at the international Soyfoods Come West conference in Seattle, Washington: Gilberto Bianchini, Marina Casazza (Italy); Joanna White (Switzerland); Kym Olsen (England); Wolfgang Furth-Kuby (W. Germany); Tim Ohlund (Sweden); Roger Kayes (England). (2) Ted Nordquist and Tim Ohlund of Aros Sojaprodukter, Sweden's first tofu company.

6010. *Soyfoods.* 1983. Haarman & Reimer experiments with flavoring tofu. Winter. p. 8-9. [1 ref]
• ***Summary:*** Discusses tofu meatball, okara snack bar, simulated crab legs.

6011. *Soyfoods.* 1983. Yersinia: Tofu's new spoilage organism. Winter. p. 10-12.
• ***Summary:*** According to Dr. Clifford W. Hesseltine of the USDA NRRC in Peoria, Illinois, the earliest publication seen on *Yersinia enterocolitica* dates from 1939. It was first identified as a food contaminant in 1960. In 1966, 23 cases of Yersinia-related food poisoning were reported, but by 1974 this had climbed to 4,000. "In the last decade there have been four major outbreaks of *Yersinia* poisoning in the U.S. including an incident in New York involving 200 people who had consumed chocolate milk. Sixteen had their appendix removed while 22 exhibited the symptoms of appendicitis. In Jan. 1982 it was positively linked to an outbreak of food poisoning from water-packed tofu made with well water in Washington.

"*Yersinia enterocolitica* grows well at 4ºC, which is unusually low for pathogens. The optimal growth temperature range is 22-29ºF while the highest toxin production (which cannot be formed in the human body) occurs at 26ºF but not above 30ºF. Even if *Yersinia*-contaminated tofu is heated at 100ºC for 15 minutes and the organism itself perishes, the toxin may survive. The bacterium, which is not sporeforming, can be destroyed (before it produces the toxin) at 60ºC held for 8 minutes." The organism grows under nearly anaerobic conditions, such as those found in vacuum packaging, but it is more likely to grow in water-packed tubs. The organism often appears in cold spring or well water. Pasteurization of incoming water (at 60ºC for 8 minutes) or chlorination are the cheapest, most dependable ways to safeguard against *Yersinia* contamination.

"The particular tofu company that suffered the *Yersinia* outbreak now uses chlorinated water and surface sterilizes the tofu with boiling water in the package just prior to sealing. The hot tofu is not immersed in the cooling tank but is placed by gloved hands in tofu tubs, then, after packaging, it is rapidly cooled in cold water or in a freezer."

6012. *Soyfoods.* 1983. Cottage soy industries thrive on Vancouver Island. Winter. p. 36-37.
• ***Summary:*** Wayne Jolley's Sooke Soyfoods, which opened in early 1981, produces 1,800 lb/week of nigari tofu. Thistledown Soyfoods, run by Jan Norris, opened in October 1981. Each week the company produces 350 lb of tofu, 150 lb of tempeh (vacuum packed), and 75 lb of soy pate from okara. At Shin Mei Do Miso, Lulu and Yoshi Yoshihara have been making miso since 1979. They now produce 10,000 lb of 3 styles of miso each year. Metta Tofu is owned by "Ray Lipovsky, who might be North America's original cottage tofumaker as he's been coagulating soymilk with sea water since 1975... Besides producing 600 pounds of nigari tofu every week, Lipovsky is hot on the trail of Frozen Buddha, his multi-flavored line of frozen soymilk ice cream, already producing 360 gallons weekly."

Also on the island in Victoria, though too large for the cottage scale, is Dayspring Soycraft Corporation, operated by Michael Hsieh. Hsieh, a trained dentist, and his brother, Steven, and their families, emigrated to British Columbia from Taiwan and decided to launch a pressure cooker tofu plant in 1982.

6013. *Soyfoods.* 1983. The soy deli experience at Well Bean. Winter. p. 38-40.
• ***Summary:*** The Well Bean is a soy deli at 349 Soquel Ave., Santa Cruz, California, run by Kevin Van Slooten. It features "Natural Fast Foods." 6014. *Soyfoods.* 1983. A second look at vacuum packaging [for tofu]. Winter. p. 41-44.
• ***Summary:*** T.W. Kutter's Barry Zweiban delineates 7 primary advantages to the vacuum packaging system. 1. Extends shelf life, typically 28 days for tofu. 2. Longer shelf

© Copyright Soyinfo Center 2013

life allows a larger inventory of products. 3. More effective and attractive packaging because of more available package surface space. 4. Package is smaller for same amount of tofu, so more fits in the cooler and truck. 5. Less contamination during packaging. 6. All these lead to an extension of a company's sales and marketing area. 7. Overall packaging costs are lower than with water packed tofu: 4-5 cents versus 7 cents. Vacuum packaging can lower production, packaging, and shipping costs by a minimum of $0.05 a unit. Water packed tofu typically carries 5 ounces of water. The rest of the article concerns potential botulism problems. The bacterium *Clostridium botulinum* strongly resists heat. Thus in a vacuum packed container with a film that allowed no oxygen permeation, and that was pasteurized, and that did contain some *C. botulinum* initially, there is the possibility of a botulism problem.

6015. *Soyfoods.* 1983. Tofu recipes on file [Dieter Hannig's 49-item microfiche on tofu recipes, complete with color photos, for the Hilton International Hotels' 87 restaurants]. Winter. p. 47. [2 ref]

• ***Summary:*** Hannig is director of the Food Research Center for the Hilton International Hotels. His microfiched recipes were developed for use by the chain's executive chefs in 87 of their worldwide restaurants. The chain (which is not related to the U.S.-based Hilton Hotels) operates one location in the USA, the Vista International in New York City–which happens to be Hannig's workplace. A photo shows Dieter Hannig, wearing a toque and mustache. Address: Food Research Center, Hilton International, 3 World Trade Center, New York, NY 10048. Phone: 212-938-9100.

6016. **Product Name:** Tofu.
Manufacturer's Name: Super Bean Foods. Renamed The Soy Works in Nov. 1986.
Manufacturer's Address: 205A High Street, Motueka, South Island, New Zealand. Phone: MPX 22252.
Date of Introduction: 1983. February.
How Stored: Refrigerated.
Nutrition: Per 100 gm.: Moisture 79%, fat 4.3%, protein 12%, ash 1.2%, energy (calories) 120, calcium 146 mg, sodium 6 mg, phosphorus 105 mg, iron 1.7 mg.
New Product–Documentation: Letter from and form filled out by Linda Carrington and Cindy Maisey. 1984. Oct. 11. "Our business (26 York St., Motueka) is very small; we work one day a week, which includes delivery. The local population is small and conservative but we are slowly getting regular customers. We hope to begin using the okara to make tempeh which isn't (as far as we know) being produced in New Zealand... We have a lot of problems getting a supply of good beans at a reasonable price... My partner, Cindy, and I are both dedicated to helping people eat a healthy, meatless diet. We have organised a promotion at a fair in mid-November and hope to win a few more converts. Our production methods are very labour intensive as we began with no capital but we have just received a grant of $1,000 and a loan of $2,000. This has made all the difference to our operation and we feel inspired to continue despite hassles with packaging."

Letter and business card sent by Jan Batchelar, owner. 1989. Nov. 8. "I have a small tofu kitchen presently producing approximately 150 kilos, 2 days a week... I am vac-packaging the tofu, but the production side is very labour intensive, using large pots–a hand press... I am also looking to develop a vegetarian sausage from the okara."

Letter (fax) from Bruce Trevett and Jan Batchelar of The Soy Works. 1991. Aug. 5. "The Soy Works has been in operation since February 1983 producing tofu for the local market. Our most recent product is Vegetarian Sausages [okara and soy protein are the two main ingredients] which are selling extremely well." The phone/fax is now 64-03-528-9170. At the bottom of the letterhead is written "Manufacturers of tofu & vegetarian food."

Pre-cooked. Dairy free."

Label, leaflet, and letter sent by Bruce Trevett & Jan Batchelar. 1992. Jan. 23. 6 by 8 inches. Plastic bag. Green, white, and blue. "High protein. No cholesterol Low fat. Storage: Keep refrigerated. Rinse on opening. Immerse any excess in water and change water daily." Address on front of bag is: 205A High St., Motueka. Back of bag states: "For more information and recipes send SAE to The Soy Works, P.O. Box 158, Motueka."

The leaflet (8½ by 11½ inches, 6 panels) titled "The Soy Works Tofu, a Healthy Alternative" is blue on green. It discusses the benefits of tofu and gives 6 recipes.

The letter notes that the company, originally named "Super Bean Foods" [Superbean, on Tudor St., Motueka], was formed in Feb. 1983 in a partnership with Cindy Maisey and Linda Carrington. "In Nov. 1986 Cindy and Jan Batchelar formed a new partnership and changed the name to "The Soy Works." This partnership ran for two years, then Jan took over as sole trader until Nov. 1990, when she formed another partnership with Bruce Trevett, who brought with him his machinery manufacturing skills and business management abilities. With increased business skills and forward planning to expanding markets, plus the introduction of the Vegetarian Sausages in March 1991 (the first product of its type in New Zealand) The Soy Works has continued to prosper and grow. We are in the process of planning consent to build a new manufacturing facility that will enable us to expand our product base and increase our market share throughout New Zealand. We know of only three other tofu manufacturers in New Zealand: Bean Supreme in Auckland, Hing's Tofu (Sun Hing Foods Co.) in Wellington, and Pacific Foods in Christchurch."

Letter (fax) from Jan Batchelar of Tremanco / The Soy Works. 1993. Feb. 3. "Super Bean Foods started selling tofu on a commercial basis in Feb. 1983. Their address was the

© Copyright Soyinfo Center 2013

same then as it is now–205A High Street, Motueka." But on the fax, the only address given is Huffam Street, P.O. Box 158, Motueka.

6017. Taira, Harue; Takagi, Hideo; Kokubun, K.; Koyama, S.; Hoshino, S.; Miyauchi, N. 1983. Kokusan daizu no hinshitsu. II. Futsû hatake to suiden tenkan saibai daizu shijitsu no kagaku seibun sosei oyobi kakô tekisei no sai [Quality of soybean seeds grown in Japan. II. Differences in the chemical composition and suitability for food processing between upland and drained paddy field cultures / crops]. *Shokuhin Sogo Kenkyujo Kenkyu Hokoku* (*Report of the National Food Research Institute*) No. 41. p. 14-33. Feb. [33 ref. Jap; eng]
• ***Summary:*** The chemical composition and suitability for making tofu, miso, natto and cooked whole soybeans were investigated with 78 seed samples of 31 varieties which were grown in upland and drained paddy fields at five Agricultural Experiment Stations in 1980.

The qualities tested were chemical composition (moisture, protein, and oil content) and suitability for food processing as measured by weight of 100 seeds, weight increase ratio of soaked seed, germination ratio, solid matter content of soaking water, solid matter extractability, pH, color of soybean milk, weight increase ratio by steaming, moisture content, softness, and color of steamed seeds. Drained paddy field cultivation, as compared with upland cultivation, gave high moisture and heavy weight of 100 seeds, and low *x* color value of soybean milk and steamed soybean seeds.

From the results of contribution ratios, it was shown that the moisture content of soybean seeds was influenced by cultural conditions, whereas the chemical composition of protein and oil, and all the suitabilities for food processing were influenced by variety. Address: 1. National Food Research Inst. (Shokuhin Sogo Kenkyujo), Kannon-dai 2-1-2, Yatabe-machi, Tsukuba-gun, Ibaraki-ken 305; 2. Hokkaido Agric. Exp. Station, Hitsujigaoka, Sapporo, Hokkaido; 3. 6020. Welters, Sjon. 1983. Re: Brief history of Stichting Natuurvoeding Amsterdam and Manna Natuurvoeding B.V. (Manna Natural Foods) in the Netherlands. Letter to William Shurtleff at Soyfoods Center, March 2. 2 p. Typed, with signature on letterhead.
• ***Summary:*** "Manna was started in 1971 by Adelbert and Wieke Nelissen with a few hundred guilders in a small garage where some natural food products were sold. One year later they gave it an official status by founding the Natural Foods Foundation Amsterdam [Stichting Natuurvoeding Amsterdam; this Manna started as a foundation, and Manna was their brand]. Their first store was on Rozenstraat in Amsterdam. Two years later a second store was opened and the first sourdough bakery in Holland opened. The name of the bread became 'Manna.' Soon after this a third and fourth store opened in other parts of Amsterdam while at the end of 1975 the distribution of bread, nutbutters, cereals and miso, tamari, shoyu, and seaweeds began all over the Netherlands. In 1976 it became clear that a warehouse should be rented. Meanwhile production grew and more and more stores carried Manna products. Again a new Manna store started. In 1977 the warehouse was moved to a bigger place. Another new store opened its doors. We began making tofu and were the first to do so with organic beans and nigari. Also soymilk and seitan were produced. In 1978 sales went steadily up. In 1979 two new stores were opened.

"Meanwhile the East West Center was founded by Adelbert and Wieke, promoting natural foods as part of a healthy and natural way of living. This was a great help for Manna. Two more stores opened in 1980 and 1981. In the beginning of 1982, Manna suffered from bankruptcy and was started one day later as Manna Natural Foods, a holding company mainly owned by the Foundation 'Manna Natural Foods' [Manna Natuurvoeding B.V.; B.V., pronounced Bay Fay, is an abbreviation for Besloten Vennootschap, which means a private company with limited liability]. A reorganization was necessary but the promotion and sales of quality natural foods went on.

"In 1983 Manna is going steady and probably will cooperate with other natural foods distributors to form one strong network of farmers, producers, distributors and retailers. The purpose will be to eliminate competition and put more energy into publications and promoting by cooking

© Copyright Soyinfo Center 2013

classes, radio and television programs and education.

"Soyfoods played quite an important role in the history of Manna because it was the soyfoods Manna promoted that made it different from the other health and natural food businesses. Because Manna is based on the macrobiotic view of life, miso, tamari, tofu and so forth were an essential part of the diet of the Manna people.

"Instead of the cheese, milk, yogurt (of which consumption is one of the highest in the Netherlands) we advise soyfoods as a healthy alternative. We did no business in dairy foods. Soyfoods are the number one product to introduce in Netherlands. A great deal of sickness in the Netherlands is caused by the overconsumption of dairy foods, meet and eggs (and other animal products). From this point of view Manna is a unique company in Holland, even in the alternative natural foods business. This difference is a reason of conflict with them. Only by eating a diet which is based mainly on vegetable products such as grains, legumes, soyfoods, seaweeds, fruits and nuts, etc., can a healthy and peaceful world be created. No animals can be mistreated and no land wasted, or misused or destroyed." Address: Manna, Meeuwenlaan 70, 1021 JK Amsterdam-N, Netherlands.

6021. Hansen, Barbara. 1983. Mexican cook-in: Emphasis on health. Border line. *Los Angeles Times.* March 3. p. W1.
• ***Summary:*** Marcia Zlotnik teaches adult education classes in natural foods cookery at East Los Angeles College. "Tofu (bean curd) may sound foreign to Mexican cooking, but that is what Marcia urges those in her classes to put in their enchiladas, chiles rellenos, and a timely dessert, the Lenten bread pudding called *capirotada."* Tofu is introduced "as a high-protein, low-cost, low fat substitute for cheese." A large photo shows Marcia teaching about tofu. Address: Times staff writer.

6022. Joyce, Michael; Joyce, Julie. 1983. Re: Growing soybeans in Australia. Tempeh and tofu down under. Letter to William Shurtleff at Soyfoods Center, March 5. 4 p. Handwritten.
• ***Summary:*** "In Queensland, Australia, soybean still are grown mainly inland, away from the coast. But in coastal regions the wet season occurs when the bean is mature (March-April).

"The beans are sown the first week in December. Inland the yield averages 1.25 tonnes (metric tons) per acre while on coastal regions, if weather permits, yields can be up to 2.25 tonnes per acre. The Department of Primary Industries is presently encouraging sugar cane farmers to intercrop soybeans as a nitrogen fixer, while contracting at $217.00 per tonne this year to the United Grasiers Association.

"Most of the production is high oil content, small beans. I believe we have a similar climate to Florida and I would be interested in high protein soybeans grown in that region for tempeh and soyfoods production. Names of varieties would be a big help. The varieties grown for oil here are Wills, Leslie, and G522 and their heritage can be traced to the Florida region.

"Most soybeans are now grown by a method called "No tillage direct drill," which is by no means organic. It requires aerial spraying with Round-Up, a systemic herbicide, then direct drilling sowing (same as planting sugar cane) one week later.

"We are fortunate to have an organic farmer, supplier, of three generations, farming 200 acres for the culinary trade. He grades and cleans and supplies to us only his biggest beans which we find suitable for tempeh and tofu.

"Cyril and Elly Cain have indeed pioneered tempeh in Australia. They have now set up a small, low-tech shop in Maroochydore, Queensland, and are proud parents of a 7 week old beautiful girl named Jessimin. They are soon to return to the U.S. and Julie and I will be taking over the tempeh shop and moving production to our farm at Cooloolabin, which is west of Yandina and Eumundi at 1,000 feet. We feel it will be more suitable for tempeh in the mountains where we will be more subject to a tropical climate than on the coastal regions only 10 miles away.

"We hope to develop these small beginnings into a "pilot plant" which may spread knowledge of soyfoods to both residents and non-residents of Australia. As our vision unfolds we shall keep you informed of all aspects of progress and the greater good prevailing in this important work. Cyril and Elly will always be remembered as the producers of Australia's first and finest commercial soy tempeh. Their tempeh is known throughout the East Coast to be unsurpassed for flavour and shelf life. Always sold fresh, not frozen. Delicious. We wait in hope and peace. Giving glory to God." Address: Queensland, Australia.

6023. Krieger, Verena. 1983. Re: Reform Houses and Soya in Switzerland. Letter to William Shurtleff at Soyfoods Center, March 8. 3 p. Typed, with signature. [1 ref]
• ***Summary:*** The first Swiss Reform House, named Reformhaus Engli, was opened in Zurich in 1899. Before that a similar retail health food store had already been started in Germany. There are now about 500 Reform Houses (Reformhaeuser) in Switzerland. Most of them are independent businesses with similar product lines. Reform Houses with a similar set-up also exist all over Germany.

On 25 and 28 Oct. 1982 there were two 15-minute programs on soyfoods and growing soybeans on Swiss national radio, with interviews with people from Soyana, Sojalade, and a director of Nestlé. Address: Bruchmattstr. 24, CH-6003 Lucerne, Switzerland. Phone: 041-22 50 34.

6024. Krieger, Verena. 1983. Re: Recent developments with soybeans in Switzerland. Letter to William Shurtleff at Soyfoods Center, March 8. 1 p. Typed, with signature.
• ***Summary:*** The soybean growers union was renamed in

1982 to SVFKO. The Swiss soybean expert Alberto Soldati is one of the main initiators of the new EUCARPIA section of the FAO. Address: Bruchmattstr. 24, CH-6003 Lucerne, Switzerland. Phone: 041-22 50 34.

6025. Vogel, Lothar. 1983. Re: Anton Wolf and the history of soybean breeding in Austria. Letter to William Shurtleff at Soyfoods Center, March 13. 2 p. [Eng]
• ***Summary:*** Lothar spent 5 hours talking about soybeans with Anton Wolf at the latter's home. He learned more during that time than he had been able to learn in the previous 5 years. Wolf said that Franz Anton Brillmayer was Austria's outstanding soy expert. Wolf thinks of himself as the third generation from Brillmayer; they have done much the same work with similar results. Wolf has a collection of virtually all the old Austrian literature on soybeans. The work that Wolf and his colleagues are doing is quite amazing. He has started the SoyaRing and has 100 farmers as members, all growing soybeans under his guidance.

One big problem is that tofu is so expensive here that it is an elitist food, and soybeans cost $2.00/kg. A man in Salzburg is producing tempeh and a couple outside of Vienna is making tofu. Address: Vienna, Austria.

6026. *Ann Arbor News* (*Michigan*). 1983. Action please! Soy Plant repays loan–in cash. March 16. [1 ref]
• ***Summary:*** Mr. S. Takata of Ann Arbor writes asking the newspaper to help him recover $500 he lent to the Soy Plant. He needs the money now so he can return to Japan. The Soy Plant did refund the money shortly after this plea was published. The article goes on to explain that two years ago The Soy Plant borrowed $20,000 from the National Cooperative Bank [in Washington, DC]. The repayment of loans to community members is now limited by restraints connected with the national loan.

6027. Steiman, Harvey. 1983. Tofu. Will it become the yogurt of the '80s? *San Francisco Examiner.* March 16. p. E1, E6, E7. Wednesday.
• ***Summary:*** One cartoon / illustration shows a samurai standing atop a huge block of tofu, holding a long sword over his head in both hands, about to slice the tofu in two–again. Another shows him standing beside the same giant block of tofu, ready to cut it horizontally with his long sword.

Steiman notes: "Those who believe in the future of tofu point to the parallels between the success of yogurt in the 1970s and the first stirrings of widespread interest in bean curd in the 1980s."

Parallel No. 1 is the "Ethnic secret discovered." Parallel No. 2. is "The Strange Food Phenomenon." Big tofu makers include Hinode, Azumaya, and Quong Hop. A sidebar is titled "The facts about tofu." "A sampler of tofu recipes" includes three. A sidebar titled "For your bookshelf" begins: "At last count some two dozen cookbooks have been published on tofu. 'The Book of Tofu,' by William Shurtleff and Akiko Aoyagi (Autumn Press, $9.95 paperback) started it all in 1976 with what still ranks as the definitive book..." Address: Examiner food editor.

6028. Daenzer, Walter. 1983. Re: Work with tofu and TVP in Switzerland. Letter to William Shurtleff at Soyfoods Center, March 17. 2 p. Typed, with signature on letterhead. [Eng]
• ***Summary:*** "Soyana was founded in 1980. We give 10% of our TVP sales to the Swiss Red Cross. They use it in India and the Sudan. They are very happy with it.

"Right now, we just had our first debut on Swiss TV. It was extremely successful. We are writing a book which will multiply the tofu sales not only here, but quite probably also in other countries like yours. This is a bold statement, but I am sure because it comes from a totally new angle.

"All the workers in our tofu plant are disciples of Sri Chinmoy. They practice their master's teachings to unite the aspiration in the inner world with the dedication in the outer world and thus understand their work as a service which they try to do in a good consciousness–with their heart's love and their mind's vastness. They meditate not only before and after work, but most of the time also at every hour for a few minutes. Therefore, Sri Chinmoy has honored their tofu factory with the name 'The Secrets of Perfection-Flames.' Sri Chinmoy has shown unending concern to the soy world. He is the only spiritual master who has spoken at length on how God feels about His soybean." Address: Soyana, Postfach 8039, Zurich, Switzerland. Phone: 01/202 89 97.

6029. Outrigger (The). 1983. Display ad: The Polynesians set course under the stars. At the Outrigger. *Times of India* (*The*) (*Bombay*). March 20. p. 5.
• ***Summary:*** At this Polynesian restaurant, appetizers include Barbecued baby spare ribs Hawaiian: Choice pork ribs marinated in soya ginger and honey.

Another dish (whose name is hidden by the illustration) includes bamboo shoots and "bean curd."

The main part of the ad is a photo of the menu; superimposed on it is an illustration of a slim Polynesian lady, wearing a lei, riding in a sort of Polynesian canoe–but without outriggers. Address: Hotel Oberoi Towers.

6030. *Washington Post.* 1983. Key. March 20. p. SM26.
• ***Summary:*** Includes a brief review of the Berwyn Cafe (5010 Berwyn Rd., College Park, Maryland). "A half-dozen years ago, the Berwyn Cafe served delicious and carefully prepared food. Now they've too often gone the way of convenience, serving frozen tofu burgers, packaged tofu dressing spread on predictable salads and pita bread sandwiches."

6031. Sinclair, Valerie. 1983. Chinese dining with a

© Copyright Soyinfo Center 2013

difference: Dining out. *New York Times.* March 27. p. NJ29.
• ***Summary:*** This is a review of the Chinese restaurant Ledgewood Mall (on Route 10, Ledgewood). The "triangles of braised bean curd had a resilient outer skin that was difficult to cut and an average sauce with red and green peppers."

6032. Wiegand, Peter. 1983. Re: Moving Auenland Tofu to a larger plant. Letter to William Shurtleff at Soyfoods Center, March 28. 1 p. Typed, with signature on letterhead. [Eng]
• ***Summary:*** "Right now I want to put all my energy into the new place I have found for the tofu plant. A lot of money is going into it and I can't make any mistakes." Address: Auenland Tofu & Sojaprodukte: Residence: Schlossstr. 11, D-8201 Wildenwart-Frasdorf, West Germany. Phone: 08051/2799.

6033. Belanger, Michael G. 1983. Re: Suggestion that "tofu" replace "bean curd" as the main entry in Merriam Webster's dictionary. Letter to William Shurtleff at Soyfoods Center, March 29. 1 p. Typed, with signature on letterhead.
• ***Summary:*** Earlier this year, Shurtleff sent the editors of *Webster's Collegiate Dictionary* a report (based on a search of his SoyaScan database), which showed that on product labels and in newspaper and magazine articles the word "tofu" is much more widely used than the old term "bean curd."

Belanger replies: "You certainly make a strong, impassioned case for the ascendancy of tofu over bean curd. From the evidence that you have presented, we much agree that tofu has become the standard term in the soyfood business. The establishment of a standardized terminology in 1979 by the Soyfoods Association of North American is a persuasive piece of supporting evidence." Address: G.&C. Merriam Company, 47 Federal St., Box 281, Springfield, Massachusetts 01101. Phone: (413) 734-3134.

6034. Aulisio, Calvin C.G.; Stanfield, J.T.; Weagant, S.D.; Hill, W.E. 1983. Yersiniosis associated with tofu consumption: Serological, biochemical and pathogenicity studies of *Yersinia enterocolitica* isolates. *J. of Food Protection* 46(3):226-30, 234. March. [18 ref]
• ***Summary:*** Recently the Food and Drug Administration reported a Class II recall of tofu because of adulteration with *Yersinia enterocolitica* that involved 87 cases in the state of Washington. Address: Div. of Microbiology, Food & Drug Administration (FDA), Washington DC 20204; and Seattle, Washington 98174.

6035. *Courant* (*Hartford, Connecticut*). 1983. Study deals tofu unhealthy blow: Producers object. March 15. [1 ref]*
• ***Summary:*** A summary, for popular consumption, of the findings of *Connecticut Agricultural Experiment Station Bulletin* No. 810. The reporter stated that "Tofu may not be as healthy as its consumers think," mentioning that only 1 out of 17 products tested met the dairy standards. One tofu industry spokesperson stated that it was unfair to apply dairy standards to soyfoods and that improper handling of the foods by retailers rather than unsanitary production or packaging was to blame. A second railed against supermarket negligence at holding tofu at produce temperatures.

6036. **Product Name:** Tofu Burger Mix (Meatless).
Manufacturer's Name: Fantastic Foods.
Manufacturer's Address: 106 Galli Dr., Novato, CA 94947. Phone: 415-883-7718.
Date of Introduction: 1983. March.
Wt/Vol., Packaging, Price: 4.4 oz box.
How Stored: Shelf stable.
New Product–Documentation: Label. Ad in Whole Foods. 1983. Oct. p. 23. "Tofu Burger. The Most Fantastic Way to Enjoy Tofu." Just mix 1 lb of tofu with the contents of the package to make 5-6 tofu burgers. All vegetarian. Also in East West Journal. Dec. Inside front cover. Full page, color.

6037. Hankin, Lester; Hanna, J. Gordon. 1983. Quality of tofu and other soy products. *Connecticut Agricultural Experiment Station, Bulletin* No. 810. 4 p. March. [8 ref]
• ***Summary:*** This cooperative study by the Connecticut Agric. Exp. Station and the Connecticut Department of Consumer Protection analyzed the microbial and nutrient content of 17 soy products: 5 tofu products made by New England Soy Dairy (Greenfield, Massachusetts), Firm Organic Tofu, and Tofu Slices (Marinated and Broiled) made by Nasoya Foods (Leominster, MA), Soy-Moo soymilk sold by Health Valley Natural Foods (Montebello, California), Tempeh Burgers made by Soyfoods Unlimited (San Leandro, CA), Tempeh Burger made by Pacific Tempeh (Emeryville, CA), Tofu Lasagna with Sauce marketed by Legume, Inc. (Bloomfield, New Jersey), Tempeh made by Tempeh Works (Cambridge, MA), Genmai Miso distributed by Erewhon, Inc. (Cambridge, MA), Kome Miso distributed by Tree of Life (St. Augustine, Florida), and 3 tofu products made by The Bridge (Middletown, Connecticut). Ingredients of each product are given.

The study showed high levels of bacterial contamination in many of the products, much higher than for dairy products. Only 41% met the coliform bacteria standard of less than 10 per gram of product, 29% met yeast standard of less than 10/gm, 41% met the 10 mold standard of less than 10/gm, and only 12% met the standard for total aerobic bacterial count (less than 25,000/gm). In addition, soyfoods generally contained more fat than claimed.

This report had widespread repercussions for the soyfoods industry, which (in the short term) were negative. The authors had previously published studies on the microbiological quality of numerous dairy products. Address: P.O. Box 1106, New Haven, CT 06504. Phone: 203-789-

6038. Krieger, Verena. 1983. Re: History of work with tofu in Japan, Illinois, and Switzerland. Letter to William Shurtleff at Soyfoods Center, March. 2 p. Typed, without signature. [1 ref. Eng]
• ***Summary:*** "The year of 1973 I spent in Japan, where I got to know tofu and learned how to make it. The following years I spent in the U.S., working at several natural foods restaurants using soyfoods as important parts of the menu. The last of these jobs was at It's Natural (Brian Schaefer), where we made our own tempeh. We were also the first (and an important) customer of Mu-Tofu of Chicago.

"In 1979 I returned to Switzerland, where I first started to sell a Tofu-Set [tofu kit, for making tofu at home], using it in private cooking classes. (The publication 'So mache ich Tofu,' is the instruction booklet, accompanying the set, written by me and printed by the Ahorn-Verlag.)

"In 1980, just before going to the Soyfoods Conference in Illinois, I approached Morga, asking them if they were interested in producing tofu. They had all the right equipment and I even went there to make tofu for them once, but we could not come to terms, since they wanted to sell a sterilized tofu with long shelf life at room temperature. But such tofu was already on the market from Belgium, made by Lima. I wanted the fresh product.

"I then started to make tofu in my home kitchen for a local vegetarian restaurant. In the spring of 1981, I heard about Hans-Ruedi Oppliger, who was then also making tofu in his home kitchen for a natural foods store. I contacted him and we decided to join efforts in creating a market. But it was only after 'Yesterday Steak, Tomorrow Tofu' was published that we could start full scale production. We set up the Sojalade with 3 other people and founded a co-op. This co-op has now 9 members and both Hans-Ruedi and I are still part of it. (Hans-Ruedi does not have a shop of his own.) The Sojalade was set up in August 1981, but Restaurant Sesam in Bern and Restaurant La Moisson (both macrobiotic) had been making tofu for their own use for several months, or even years before us. Soyana started their tofu production in February 1982.

"The Sojalade is now also working on a project to help organic farmers get started with soybean cultivation... By the spring of 1983 interest in tofu production has become quite considerable. Therefore, the Sojalade has instituted a small apprenticeship program, where we train people in tofumaking for at least ten days. Since we can only take one person at a time, we already have a waiting list till June."

Update: 1990 April 9. Verena is now writing cookbooks, and has 5 in print. One on beans just been published. Her tofu cuisine is still in print. A condensed version has been taken over and distributed by Migros. She is no longer involved with Genossenschaft Tofurei, which is quite a distance from her home. She was on the board of directors but she keeps in touch and she still has some money involved.

Note: This is the earliest document seen (Feb. 2013) that mentions Migros in connection with soy. Address: Bruchmattstr. 24, CH-6003 Lucerne, Switzerland. Phone: 041-22 50 34.

6043. Shurtleff, William; Greenslade, David. 1983. Mahatma Gandhi: Soyfoods pioneer in India. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549 USA. 2 p. March. Published in part in Vegetarian Times, June 1983, p. 4. Unpublished manuscript. [5 ref]
• ***Summary:*** Although it is well known that Mahatma Gandhi revitalized the vegetarian movement in India, it is less well known that he was one of India's first pioneers to introduce soybeans and soyfoods. His work during the 1930s still serves as an inspiration to many Indians, who are today transforming India into one of the world's leading soybean growing and soyfoods using countries.

Gandhi's earliest known mention of soybeans or soyfoods was in the July 1935 issue of *Harijan,* his popular magazine for village uplift. There he referred to a book by Dr. H.V. Tilak called *Balanced Diets.* Dr. Tilak's book was based in an orphanage of over a hundred children, whose diet was made richer in protein and more balanced by the addition of soybeans.

In September 1935, Gandhi reprinted a report on soybeans by the Bombay Health Association. This article listed the nutritional and medicinal values of soybeans and also explained how to make soymilk, soy flour, and soy coffee. The October issue of *Harijan* reported that the kitchens at Gandhi's ashram has introduced experimental rations of soybeans into the communal diet. The same article compared soybeans with eggs, wheat, and ghee. Since the more economical soybeans were rich in protein and oil, Gandhi later ordered reductions in the portions of wheat and ghee and suggested that all beans, other than soy, be omitted altogether.

November's *Harijan* reported that soybeans were being boiled, steamed, and used in soups. The ration of ghee had been stopped and soybean portions increased. Gandhi pointed out that everyone seemed to thrive on the new diet. in the same issue, Gandhi reprinted a leaflet by the Baroda State Food Office describing soybean crop cultivation. By December 1935, *Harijan* reports that soybeans had become a substantial part of the diet at Gandhi's ashram.

The December 1935 and January 1936 issues printed a dozen soyfood recipes, including the techniques for making, "TO-FU," "shoyu-sauce," and "soya bean sprouts," Gandhi said he was particularly fond of the sprouts.

By September 1936 *Harijan* was recommending an exhaustive book on soybeans written by F.S. Kale, an Englishman in charge of the Baroda State Food Service Department. Entitled, *The Soya Bean: Its Value in Dietetics; Cultivation and Uses,* this was the first book on soyfoods published in India. *Harijan* also carried a report on soybean cultivation experiments in the USA and the Soviet Union in the same issue.

By 1936, after careful consideration of economic, nutritional and medicinal evidence, Gandhi wholeheartedly favored the cultivation and widespread use of soybean in India and his magazine ran lists of prices and of the places where soybeans could be obtained.

We lose track of Gandhi's interest in soyfoods in late 1936. However in 1949 his ideas were republished in *Diet and Diet Reform,* a book which sold thousands of copies. The fact that Gandhi took such an interest in soybeans and soyfoods is a major source of encouragement to the many Indians working in this burgeoning field today. In 1982 India produced 500,000 metric tons of soybeans, making it the world's ninth largest producer, and soyfoods (such as TVP, soymilk, and soy oil) were catching on rapidly in this country where an estimated 50 percent of the population is vegetarian, and another 30 percent eats only a very small amount of meat. Address: Lafayette, California.

6044. **Product Name:** Saucy Joe (Sloppy Joe Made with Tofu).
Manufacturer's Name: Simple Soyman.
Manufacturer's Address: 3015 N. Buffum St., Milwaukee, WI 53212. Phone: 414-765-3733.
Date of Introduction: 1983. March.
Wt/Vol., Packaging, Price: Sold in a cottage cheese container.
New Product–Documentation: Talk with R. Jay Gruenwald. 1989. June 12. This was the company's first product. Ready to eat, cold or warm. Every product that company has ever launched is still being made. Simple Soyman has never made their own tofu; for 4 years they have

© Copyright Soyinfo Center 2013

bought the basic tofu from Mu Tofu, where it is made by Yoshi Uchida and his wife. Simple Soyman has been very happy with their product. Now he wants to start making his own tofu, since he needs a larger market and the price of tofu is going up and the logistics of shipping are complicated. He now has some equipment from the Magic Bean, which he recently bought from the person who recovered it when Magic Bean went bankrupt. He now needs a grinder/ disintegrator. People named Cassel and Carla Pulley were involved with the company in its early days.

Talk with R. Jay Gruenwald. 1991. Jan. 24. The Bountiful Bean is now for sale. He is thinking of a joint venture with Mu Tofu. The competition from Nasoya and White Wave is becoming severe.

6045. *Soyanews* (*Sri Lanka*). 1983. Book review: Handy guide to the soyafoods world. 5(7):6. March.
• ***Summary:*** A full page, positive review (by. S. Pathiravitana) of *Soyfoods Industry: Directory and Databook* (1982), by Shurtleff and Aoyagi. A graph of world soybean production (total and by region) is shown.

"The databook section is only one-half of this book. The other is a directory, which helps to bring people in the soyafood business together. Soyafoods is now a worldwide phenomenon to judge from the scattered places in the globe where people are quietly and patiently making tofu and tempeh.

"From Mexico to the Philippines and from New Zealand to Canada there is a growing global soya network which the Shurtleffs have now drawn closer. The glossary of soyafoods terms, names and addresses, of business houses and soycrafters make this databook a useful addition to libraries."

6046. Soyfoods Center. 1983. The Soyfoods Industry and Market: Directory and Databook 1983 (Leaflet). Lafayette, California. 2 p. March 26.
• ***Summary:*** This leaflet, printed with brown and black ink on glossy white paper, advertises the new 1983 edition of this market study. On the front are endorsements from Yvonne Lo of Vitasoy, Luke Lukoskie of Island Spring, and Tom Timmins of New England Soy Dairy, plus excerpts of two reviews. On the back is a detailed table of contents and an order form. Address: P.O. Box 234, Lafayette, California 94549. Phone: 415-283-3161.

6047. Soyfoods Center. 1983. Professional publications and services (Leaflet). Lafayette, California. 2 p. March 26.
• ***Summary:*** This leaflet, printed with brown and black ink on glossy white paper, advertises the following: Soyfoods consulting services. Computerized soyfoods mailing list. *Using Tofu, Tempeh & Other Soyfoods in Restaurants, Delis & Cafeterias* (spiral-bound book, with excerpt of book review). *Soyfoods Labels, Posters & Other Graphics* (spiral-bound book, with excerpt of book review). Special bulk discounts on books and materials. Soyfoods document center and library (which owns 3,500 documents). Soyfoods color slide shows. Tempeh pamphlet reprint rights. Order form. Address: P.O. Box 234, Lafayette, California 94549. Phone: 415-283-3161.

6048. **Product Name:** Okara Tempeh.
Manufacturer's Name: Swan Gardens.
Manufacturer's Address: Miami, Forida.
Date of Introduction: 1983. March.
New Product–Documentation: Soyfoods Monthly. 1983. Feb.; Soyfoods. 1983. Summer. p. 43; Shurtleff & Aoyagi. 1985. History of Tempeh. p. 56-57.

Jane was a soyfoods pioneer in Ireland. In the Introduction (p. 18-21) Jane explains that "I was frequently ill as a child, and on several occasions I was very near to death's door." Yet as she got older, she grew to enjoy gourmet food and gourmet cooking. The man who became her husband gave her the first book she read on natural foods. "As soon as I became aware that food contributed to the maintenance or destruction of health, I began a lifetime of experimentation. I changed from refined foods to whole foods, gave up eating red meat, studied macrobiotics, so much so that over ten years ago I went to Boston [Massachusetts] with two children under the age of four, and pregnant with a third, to study the subject, and I continued from there to develop my own system." Her husband, an actor, is now quite happy with her cooking, after "an austerity programme involving giving up meat, cutting down on and nearly eliminating dairy food, getting rid of sugar."

"I have been working on creating meals that are increasingly more healthful for over seventeen years now [since 1966], and I find it a fascinating study. It is wonderful to witness the vast improvement in my own health..." Her son Quinn is now 15 years old. Her religion is Baha'i. "In furthering my interest in natural foods, I have given cooking classes in Dublin [Ireland] for over ten years [since 1973], not steadily, but from time to time when there were people interested. In the early days of my cooking classes, I also imported the necessary foods: whole grains, beans, miso and natural soy sauce from suppliers in England as they were not available in shops here in Dublin. There was no other way of getting these foods for my family. During the cooking classes I sold much of the stock... That led to the beginning of Ireland's first natural food store which I started with my husband's patient assistance, but which we left to someone else for many reasons."

"Several years ago I began to use tofu and soyfoods and to include them in the cooking classes. Because I was so interested in learning more about them, I attended the soyfoods conference held in Illinois in 1980 and the one in Colorado in 1981... I think that I became so excited about tofu, soymilk and soyfoods really because I had long been a lover of puddings, custard, and creamy toppings, often made with dairy foods. However, because I needed to cut down on my use of dairy foods, I had nearly eliminated all of those things from my diet. When I discovered that it was possible, not only to make tofu and soymilk successfully in my own kitchen, but to use it for very accurate substitutions of my childhood favorites which were far more healthful than the things I had eaten as a child, I was thrilled."

Note: On 9 November 1979 Mrs. Jane M. O'Brien (7 Woodside Drive, Rathfarnham, Dublin 14, Ireland), ordered books on tofu, tofu & soymilk production, miso, and tempeh from Shurtleff & Aoyagi at Soyfoods Center in California.

Talk with Jane O'Brien. 1980. July 13. She developed the many recipes in this book using soybeans that she imported from England to Ireland, starting in about 1980.

Letter from Jane O'Brien. 1983. May 28. This book was published in April 1983. "It is presently on sale in England but not yet here in Ireland." Address: 7 Woodside Dr., Rathfarnham, Dublin 14, Ireland.

6065. Rosenbaum, Ron. 1983. The alternative Big Mac. *Esquire* 99(4):126. April.
• ***Summary:*** "I'm sorry, I draw the line at tempeh. I had no qualms about tasting soy burgers, tofu burgers, lentil-walnut burgers, and sunflower-seed burgers, but I simply refuse to taste a tempeh burger.

"Tempeh, if you must know, is soybeans fermented with a mold. Soyheads say that tempeh has all sorts of high-quality-protein benefits you can't get even from the highly acclaimed soybean-curd tofu. It's the hot new item on the health food scene. I don't care. All I can think of when I hear 'tempeh' is those pallid squares of tofu floating in basins of dirty water in health food stores and developing mold. Yucch. I'm all for the health benefits of natural foods, but I have some aesthetic standards.

"The idea here was to search for a health food alternative to the hamburger, something that tasted good on the sensual level and satisfied on the soulful level...

"Do the substitutes offer that kind of satisfaction? Well, forget about tofu burgers. We're looking for hamburger alternatives, not hamburger helper. Tofu burgers are so bland, so ascetic, so utterly tasteless that they may be natural as hell but they taste like polyester."

6066. **Product Name:** Incredible Tofu Salad, and Cottage Tofu Salad (Non-Dairy Cottage Cheese).
Manufacturer's Name: San Diego Soy Dairy.
Manufacturer's Address: 2965 5th Ave., San Diego, CA 92103.
Date of Introduction: 1983. April.
Ingredients: Tofu (organically grown soybeans, filtered water and natural nigari), celery, carrots, sunflower seeds, nutritional yeast, parsley, scallions, Dr. Bronner Bouillon, olive oil, lemon juice, spices, fresh garlic, rice vinegar.
Wt/Vol., Packaging, Price: 9 oz.
How Stored: Refrigerated.

introduced in about April 1983.

6067. **Product Name:** Baked Tofu in Teriyaki Sauce.
Manufacturer's Name: San Diego Soy Dairy.
Manufacturer's Address: 2965 5th Ave., San Diego, CA 92103.
Date of Introduction: 1983. April.
Ingredients: Tofu–organically grown soy beans, filtered water, natural nigari, tamari, sesame oil, rice vinegar, barley malt, fresh garlic and ginger, Dr. Bonner's Mineral Bouillon, spices, sesame seeds.
Wt/Vol., Packaging, Price: 12 oz.
How Stored: Refrigerated.
New Product–Documentation: Label. 1983. 3.5 by 2 inches. Self adhesive. Brown on white. "Delicious." Talk with Gary Stein. 1989. Feb. 17. He thinks these products were introduced in about April 1983.

6068. *Soyfoods Monthly* (*Colrain, Massachusetts*). 1983. Soyfoods Association rejuvenated at first meeting of new board, new goals. 3(4):1. April.
• ***Summary:*** "Thirty two industry members attended a 2 hour planning session of the new Soyfoods Association in Anaheim, February 7 and appointed board of directors and officers. Michael Austin was selected the new Executive Director following Richard Leviton's resignation. Board members include: Gary Barat, Legume (President), Yvonne Lo, Vitasoy USA (Vice President), Tom Timmins, New England Soy Dairy (Vice President), Dan Burke, Pacific Soybean (Treasurer), Richard Leviton, *Soyfoods Magazine* (Secretary), Travis Burgeson, Pacific Tempeh; Michael Fountain, SanJi [San-J] Int'l.; Jim Miller, Quong Hop; Jack Mizono, Azumaya; Morris Shriftman, Tree of Life; Robert Tepper, Farm Foods; Shoan Yamauchi, Hinode Tofu Co. An initial pledge of $12,000 from 14 companies was received at this organizational meeting."

6069. Sunset international vegetarian cook book. 1983. Menlo Park, California: Lane Publishing Co. 96 p. April. Illust. 28 cm. Retitled Vegetarian Favorites in 1987.
• ***Summary:*** This book is by the editors of Sunset books and Sunset magazine; the supervising editor is Maureen Williams Zimmerman. A table titled "Choosing nutritiously" (p. 5) shows that soybeans are a good source of thiamin (B-1), niacin, vitamin B-6, folic acid, calcium, and iron. Another table titled "Protein partnerships" (p. 7) states that soybeans and soyfoods (soybean curd/tofu, soy flour, soy milk, and tempeh), like dairy products and eggs, have no limiting amino acid. Soy-related recipes include: Miso grilled mushrooms (p. 14; Japan). Golden tofu cauliflower soup (p. 34; Thailand). Greens & tofu in peanut sauce (p. 48; Thailand). Stir-fried tofu & vegetables (p. 50; Vietnam). Whole wheat & soy pasta (p. 52). Mandarin pancakes with spicy tofu filling (p. 70; China). Address: Menlo Park. Phone: 415-321-3600.

6070. **Product Name:** Natural Nigari Tofu.
Manufacturer's Name: Sweet Whey.
Manufacturer's Address: P.O. Box 154, Redwood Valley, CA 95470. Phone: 707-485-7498.
Date of Introduction: 1983. April.
New Product–Documentation: Form filled out by Joel Brightbill. They opened on 1 April 1983, and now (1983) use 50-75 lb/day of soybeans. Soyfoods Center Computerized Mailing List. 1983. June 20. Owner: Joel Brightbill.

Talk with Richard Rose. 1988. May 13. See Brightsong Tofu, 1978. Joel Brightbill and Bob Heartsong were the original founders of Brightsong, back in 1977 or 1978. Their last names were used to make the company name. He is the "Bright" in Brightsong. Heartsong left after a short time and David Patton came in, taking his place; it was an equity partnership with no employees. The partners worked. Then Brightbill sold his interest to Patton. Richard and Sharon Rose bought the company from Patton. In June 1982 the Rose's lease ended in Redwood Valley and the landlord planned not to renew it. So the Roses decided to move the business to Petaluma. Patton and Brightbill did not want the Roses to move out of the county; they felt their note was in jeopardy and that the business was a county resource. The day before the Roses were to move, Brightbill, Patton, and a bunch of others entered the shop in the middle of the night, removed all the equipment, and stored it without a perfected security interest. This was illegal, so lawyers came in, negotiated, and the Roses finally got their equipment back and moved to Petaluma.

About 6 months later Brightbill started Sweet Whey, essentially in the 10 x 10 foot garage on his ranch. Finally the county shut him down. He had tofu spoilage problems.

tofu production. Publication re-commenced in March 1988 with Vol. 3, No. 1.

Letter from Mr. Teruo Masuda. 1988. Sept. 3. He is planning to resume publication as a serial. The first new issue, Volume 3, Number 1 was published in March 1988 by the Zenkoku Daizu Tanpaku Kenkyukai (Japanese National Soy Protein Research Society). This was an organization of about 50 to manufacturing companies throughout Japan to study scientific production of tofu. Mr. Masuda's company makes and sells tofu equipment. Address: Tokyo, Japan. Phone: 0426-91-3885.

6073. *Vegetarian Times.* 1983. Tofu in a starring role. April. p. 42-44, 52.
• ***Summary:*** Contains 13 recipes, with color photos, from *Tofu Cookery* by Louise Hagler.

6074. Dreyer, Lawrence. 1983. Re: Work with soya in Austria. Letter to William Shurtleff at Soyfoods Center, May 1. 3 p. Handwritten, with signature. [Eng]
• ***Summary:*** "Herr Anton Wolf was here yesterday and told me that only 100 hectares of soybeans were planted in Austria in 1982. The yield was about 2,500 kg/ha."

Dreyer's main work is as the architect of the additions they are making to their facilities in Wiener Neustadt. At present they have a small shop and restaurant. There will be a new area for producing tofu on a small scale, gluten, mochi, bread. "At present we produce a limited quantity of tofu with equipment bought in Japan... A group of people loosely related to us uses a small centrifuge to make soymilk. This group has also recently started making tempeh... I have given copies of your chapter on "History of Soya in Austria" to Anton Wolf." Address: Weg der Natur, Austria.

6075. Stark, Bruno. 1983. Re: WSL and Haus Minerva in Switzerland. Letter to William Shurtleff at Soyfoods Center, May 4. 1 p. Typed, with signature.
• ***Summary:*** WSL, run by Bruno in Wolfhaden, Switzerland, is a society or club (*Verein*). Since 1982, among other things, every other month, they have given a course in making tofu and tofu dishes. Those attending have been very enthusiastic about it. This year they want to put on a tempeh course. Tempeh is not yet sold in Switzerland. "We hope with our work to make soyfoods better known."

Bruno also sent Soyfoods Center several brochures: One 4-page brochure is titled "*Programm* 1983." One course is titled Cooking Course (Soya cookery: Tofu & tempeh). An introductory tofu course is given 4 times during the year, as in an advanced tofu course. An introductory tempeh course is given twice.

Another brochure (black on pink), titled "Tofu Cooking Course," gives details about tofu and the course. Address: CH-9427 Wolfhaden, Switzerland. Phone: 071-91 26 75.

6076. Welters, Sjon. 1983. Re: Soyfoods in the Netherlands. Letter to William Shurtleff at Soyfoods Center, May 10. 1 p. [Eng]
• ***Summary:*** "Together with this letter, I am sending you the translation into Dutch of the Soyfoods Center slide show. I hope you can use it in your work. Concerning the translation of *The Book of Tofu*, I hope everything has been arranged with TAO-books... I am leaving Manna next August to join Mountain Ark Trading Co. in Fayetteville, Arkansas." Address: Manna Natuurvoeding, Meeuwenlaan 70, 1021 JK Amsterdam-N, Netherlands. Phone: 020-32 3977.

6077. Megan, Kathleen. 1983. Tofu: Its a staple food of health enthusiasts and the subtle ingredient of Oriental cuisine. Ironically, it's being made by an Italian immigrant in Middletown. *Hartford Courant* (*Connecticut*). May 11. p. E1, E10.
• ***Summary:*** About Robert Marocchesi (age 32) and his company, The Bridge, in Middletown, Connecticut. He grew up in Italy, and now makes fresh tofu daily. Each week The Bridge makes, then trucks about 3,000 pounds of tofu across the state and to retail outlets in New York and Massachusetts. His philosophy is to make fresh food for local consumption and to teach people about good nutrition.

For about two years he has been the only tofu maker in Connecticut. His small, white cinderblock building is squeezed in among pizza palaces and fast-food restaurants on Route 66, yet he makes tofu in the traditional way. Visitors are invited to come to the plant and watch the process from beginning to end. The day's work starts at 4 a.m. and the hot soymilk is curded with natural nigari. According to the Soyfoods Association, a trade association based in New York City (the executive director is Michael Austin), there are now about 250 tofu makers in the United States. Since 1979, annual sales of tofu nationwide have jumped from $23.2 million to $55 million this year, and are projected to double again by 1988.

The Bridge also makes several other healthy foods from East Asia, including amasake and seitan.

Photos show: (1) Kent Nelson, an employee, pours fresh soybean puree into a cauldron for cooking. (2) Robert Marocchesi stirs nigari into hot soymilk. (3) Robert carries a large tray of finished tofu, ready to be cut and packaged.

6078. Burros, Marian. 1983. Food notes: Bacteria in soy products. *New York Times.* May 18. p. C4.
• ***Summary:*** A summary of Connecticut Agricultural Experiment Station, Bulletin 810, by Dr. Lester Hankin and J. Gordon Hanna. "Many soy products, including tofu, have extremely high levels of bacteria." The names of the manufacturers and their soyfood products are listed but without any accompanying damaging bacterial statistics.

Niowanai nattô [Natto that doesn't smell: Tempeh]. May 20. Evening ed. p. 14. [Jap]

• ***Summary:*** Tempeh is very different from natto: it is fermented with a mold, whereas natto is fermented with a bacterium. Natto is indigenous to Japan, whereas tempeh is indigenous to Java, and neither is widely consumed in the country of the other. Yet both are fermented soyfoods.

Natto is growing more popular as a breakfast food in Japan–related to the growing interest in natural foods, vegetable protein, and riding the same wave of popularity as soymilk. Young people are eating less rice. In 1982 each family in Japan spent ¥1,531 on natto, up 12% from the previous year. Dr. Teruo Ohta says one reason Japanese have the greatest longevity is because they eat a lot of plant protein instead of animal protein. Representative of these plant protein foods are soyfoods. But miso and shoyu contain salt, and tofu and soymilk contain no dietary fiber. Natto (like tempeh) is doubly good in that it contains fiber but no salt.

But the rice Japanese usually eat with natto is steadily decreasing; will this eventually cause a decrease in natto consumption as well? Maybe only those older than middle age are the main natto consumers.

This article uses the term "tempeh natto" three times. Note: We think this is unfortunate and confusing. Last year Dr. Ohta visited natto plants in Indonesia. Medical research shows natto is good for health.

Did natto originate in China? Was that Chinese natto salted or not? Was it disseminated by Buddhist monks to Japan and Southeast Asia?

Next month the Japanese National Natto Association will send a delegation to Java (Indonesia) to study tempeh.

6080. Shurtleff, William. 1983. Fly from California to Hong Kong: First impressions, May 26 (Document part). In: William Shurtleff. 1983. Log of Soyfoods Research Trip to China and Japan: 29 May to 10 July. Lafayette, California: Soyfoods Center. 117 p. See p. 1. Unpublished manuscript.

• ***Summary:*** May 24. I leave by jet for China, from Lafayette, California, my trip paid for by Danish Turnkey Dairies (DTD/STS).

May 25. In Hong Kong with jet lag. Stay at Sheraton Kowloon, meet John Davies and Asger Somer Hansen of DTD.

Singapore soymilk regulations: The protein content must be greater than 2% to label / call it "soymilk"; if less, it must be labeled "soy drink."

When soymilk in a Tetra Pak carton stands for 6-8 months, there is: (1) Physical oil separation. (2) Graying of the color. (3) Some of the enzymes, which are not inactivated by UHT (Ultra-High Temperature) processing, can coagulate the soy protein.

I buy and taste Coca-Cola's soymilk in Hong Kong. The flavor is mediocre, a little watery and cereal-like, but not bad. A 250 ml carton retails for $HK 1.5, about US$0.22.

Ma Po Doufu (Japanese: Mabo-dofu) is a popular Chinese dish from Sichuan (W.-G. Szechuan) province. It is of fairly recent origin.

Note: It is a combination of tofu (bean curd) set in a spicy chili- and bean-based sauce, typically a thin, oily, and bright red suspension, and often cooked with minced meat, usually pork or beef. The character "ma" stands for "mazi," which refers to a person whose face is disfigured by pockmarks. "Po" translates as "old woman." Thus "Ma Po" is an old woman whose face is pockmarked. According to a Chinese legend, the pock-marked old woman lived in the Chinese city of Chengdu (Chengtu)–the capital of Sichuan province in southwest China.

Due to her condition, her home was placed on the outskirts of the city. By coincidence, it was near a road where traders often passed. Although the rich merchants could afford to stay within the numerous inns of the prosperous city while waiting for their goods to sell, poor farmers would stay in cheaper inns scattered along the sides of roads on the outskirts of the ancient city.

According to *Mrs. Chiang's Szechwan Cookbook:* "Eugene Wu, the Librarian of the Harvard Yenching Library, grew up in Chengtu and claims that as a schoolboy he used to eat Pock-Marked Ma's Bean Curd or mapo doufu, at a restaurant run by the original Pock-Marked Ma herself. You ordered by weight, so many grams of bean curd and so many grams of meat, and your serving would be weighed out and cooked as you watched. It arrived at the table fresh, fragrant, and so spicy hot, or la, that it actually caused sweat to break out."

Nowadays there are several Mapo Dofu restaurants in Chengdu. (Source: Wikipedia, at Mapo doufu, retrieved 26 June 2011).

"Dim Sum" literally means "dot heart." Lo Han Tsai ("Monk's Food") is a vegetarian recipe served at Chinese New Year. When tofu is a prominent ingredient it is called "Lo Han Tsai Doufu."

There are two words for deep-fried tofu: (1) *You doufu* (literally "Oil doufu"). (2) *Zha doufu* ("Deep-Fried Doufu"). The first has bigger holes in it.

Note: This is the earliest English-language document seen (April 2013) that contains the term *You doufu.*

Since the 1930s, affluent city people have consumed cow's milk in China.

The soymilk label of Dong Bang (from Korea) is similar to that of Kibun from Japan. An illustration (line drawing) shows the Dong Bang label. Address: P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

6081. Shurtleff, William. 1983. Talk with Louis Chiang about tofu plants he sold in China (Hong Kong, May 27) (Document part). In: William Shurtleff. 1983. Log of Soyfoods Research Trip to China and Japan: 29 May to 10

© Copyright Soyinfo Center 2013

July. Lafayette, California: Soyfoods Center. 117 p. See p. 2-3. Unpublished manuscript.

• ***Summary:*** Tofu plants he sold in China. He has sold two lines to Guangdong province, the province in which Guangzhou (formerly Canton) is located. One line can process 500 kg/hour of dry soybeans. Shurtleff asks: Why do they not go low-tech? Answer: Because they want to modernize; they want everything the best and the newest. Tofu is a monopoly in China; only one organization handles it. Louis feels that the large plant is rational. The key is to retrain those who were not educated during the cultural revolution,

Advice: Preparing a catalog and advertizing letters is a waste of time. Best to find a decision maker directly, via the right channel. You need personal connections, built up gradually, which takes time. Finding the right man may take 3-6 months. They must know your background and purpose. Many Westerners get frustrated if they have no orders after 1-2 years; they must be patient. He also feels it is important that old plants should be demolished.

The proper introduction is very important. Beware of making outside contacts. Stick with your invited group. Let them make contacts and allow contacts.

In Beijing there is a "Food Research Institute." They may be of help.

Ask key contacts for a letter from their organization, on letterhead. Don't discuss politics or economics–its to sensitive.

In China, tofu production may have increased, but quality may have decreased. Party leaders, not food technology experts, make decisions. They are now trying to change that. Scientists and intellectuals had a very low status, but now some are trying to put them in front. But the masses resist. They either use fast radical means or go slowly.

His tofu equipment was paid for by Chinese money–the equivalent of $500,000 for two lines.

Louis Chiang would like to work with Takai Tofu & Soymilk Equipment Co., especially if Takai developed a continuous process system. Takai sold a production line to Harbin but it is not working now.

Research people are hungry for knowledge; the bureaucrats are not.

With new private, personal freedoms, people are generally happier.

Hong Kong yuba: See the trade promotion council, a government organization on the 3rd floor of the Connaught Centre, an office tower in Hong Kong. They have a research library.

Mr. Wang says: Ask the trade promotion council to ring and introduce me as a researcher.

They want immediate gain, not long term research, so our soymilk seminars at various places in China may not work.

He likes Deng Xiaoping (who initiated the Four Modernizations, in December 1978 at the Third Plenum of the 11th Central Committee); he is not so fond of Hua Guofeng.

China is now learning about tofu technology from Japan.

Adding almond to soymilk improves its flavor.

All his trade is with China. Address: P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

6082. Ikawa, Kazuhisa. 1983. Higashi Ajia fukugo bunka-ken. Tôfu bunka to nattô no toraianguru [East Asia's culture complex. Tofu culture and the natto triangle]. *Asahi Shinbun* (*Asahi Daily News, Tokyo*). May 28. p. 11. [Jap]

6083. Ikawa, Kazuhisa. 1983. Ajia fukugô nattô-ken: Tôfu bunka to Nattô toraianguru [Asia's multi-combined natto zone: Tofu culture and the natto triangle]. *Mainichi Shinbun* (*Mainichi Daily News, Tokyo*). May 28. p. 11. [Jap]

• ***Summary:*** Contains three maps showing the "natto triangle." The three points on the triangle lie at Japan (natto), Java (tempeh), and Bhutan + eastern Nepal (kinema).

Note: All these foods are un-salted, however tempeh is fermented with a mold whereas natto and kinema are both fermented with bacteria. Therefore, Java should not be part of the "natto triangle."

6084. O'Brien, Jane M. 1983. Re: Recent history of soybeans and soyfoods in Ireland. Letter to William Shurtleff at Soyfoods Center, May 28–in reply to inquiry. 1 p. Typed, with signature.

• ***Summary:*** "I was in touch with Tony Walshe at the Golden Dawn Restaurant in Dublin who said that they have been selling tofu more or less regularly since 1979. They use it in the restaurant for various recipes, but at the moment, I believe they could use more than they are able to get.

"There is an oriental [tofu] shop in Dublin which must have been open for about a year now which supplies tofu regularly, I gather. I never seem to be in town when it is open because it opens at 11:00 a.m., and when I shop I am usually in town before 9:00 and ready to leave as early as possible...

"Philip Guiney has been wholesaling Morinaga tofu for about a year now, and it seems to be moving for him...

"Ken Kinsella of Kelkin Naturproducts Ltd. has been wholesaling Granose Soya Milk for about 18 months now, and it is selling quite well for him because of the numbers of people who suffer from lactose intolerance and because of the general interest in getting away from dairy [products]. Ken's daughter, Hillary Kinsella, with a friend of hers, did a project called "Soya–The Modern Food" for the Young Scientists Exhibition in January 1983, for which she won two awards, and she is planning to do it again with further information in 1984, also for the Young Scientists Exhibition.

"For my part, I have taught tofu making in some of my cooking classes a couple of years ago, but I haven't given any cooking classes for the last couple of years for

© Copyright Soyinfo Center 2013

various reasons. Roughly from September 1983 through May of 1983, I provided about 12 pounds of tofu per week which Kelkin Naturproducts delivered to the Golden Dawn restaurant as a kind of pilot project to try to determine the demand for tofu in this area. At the end of that period, we discontinued it for a number of reasons and we felt that the time was not yet right to consider tofu production an economic possibility in this country. In fact, in many ways, we feel that soy milk might be a better starting off point here, but we are still not ready to do anything about it at this time." Address: 7 Woodside Drive, Rathfarnham, Dublin 14, Ireland. Phone: 909-769.

6085. Shurtleff, William. 1983. Fly from Hong Kong to Guangzhou (Canton); Give seminar on soymilk (May 29-30) (Document part). In: William Shurtleff. 1983. Log of Soyfoods Research Trip to China and Japan: 29 May to 10 July. Lafayette, California: Soyfoods Center. 117 p. See p. 5-6. Unpublished manuscript.

• ***Summary:*** On Sunday, May 29. Our group of three (John Davies and Asger Somer Hansen of Danish Turnkey Dairies {DTD}, and I) took an airplane from Hong Kong to Guangzhou, in the far southwest of China. Today is my first day in the People's Republic of China. Canton is very different from the rest of China, more affluent, western, capitalistic. The people speak Cantonese. Seminar rehearsal.

May 30, Monday. In our nice Chinese hotel, built around a big garden, I conduct my first of four seminars on soymilk for government officials China. I have prepared a 2-hour slide show with 60 color slides. The main topics: (1) Ten reasons soybeans will be the protein source of the future (2) The role of soymilk in China's modernization program (3) Various products a soy dairy can make from soymilk (ice cream, tofu, yogurt, yuba, etc.) (4) The advantages of a combined soy-cow dairy (5) Soymilk as a modern food.

Part II: DTD described its soymilk process and we served 3 samples: plain, sweetened, and chocolate. Out of the 35 participants, most liked the plain-unsweetened flavor best. They said it was free of grassy and burnt flavors and was not too thick or too thin. The second favorite was the sweetened. Only 1 person rated the chocolate as the best. The thickness was just right; the sweetness too. They would like to drink it hot in the winter. A general complaint regarding the sweetened and the chocolate was that they coated the mouth and were too thick, but I noted that they were not cold when served.

1. Soymilk could be used to make ice sticks. 2. *Mingun* = a type of firm, deep-fried tofu. 3. Bamboo yuba [dried yuba sticks]–*Fu Chuk* in Cantonese. 4. There is a lot of dried Yuba in Guangzhou. 5. Henan is a major soybean growing region in China.

Lawrence Yung-Lu Li.

1. Dr. Chow (initials = I.C. or En-Tsu) got a PhD on tofu in the USA in the 1930s from Cornell University (Ithaca, New York). See Cal (Berkeley) thesis list of dissertation abstracts. 2. Guangzhou dairy is planning to make soymilk. 3. There are no books on tofu in China, new or old.

May 31. I walk out in the early morning to watch thousands of people doing Tai-chi. I conduct Guangzhou seminar #2. Then drive out into the Guangdong countryside to see proposed DTD dairy site. Address: P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

6086. *Ann Arbor Observer* (*Michigan*). 1983. A too-generous tofu loan repayment. May. p. 18.

• ***Summary:*** To raise money during its early years, The Soy Plant borrowed money from about 200 community members, paying the interest in tofu. However, for $23,000 in loans it gave away $18,000 worth of tofu in interest–and was still unable to repay the principal.

In 1980 the company expanded into a new facility on Airport Boulevard. During its first two years there, the Soy Plant lost over $30,000. Caroline Roi, company president, reports that the business is now doing better financially. Its losses dropped from $30,000 in 1981 to only $4,000 in 1982. Some of the stiffest competition has come from Abbey Hearth, a new company in Detroit which the Soy Plant helped to establish. A 1979 photo shows Steve Fiering adding water to round tofu tubs. Address: Ann Arbor, Michigan.

6087. Bermudes, Fernando. 1983. Building a soy dairy [in Lesotho]. *Soyanews* (*Sri Lanka*) 5(9):4-5, 8. May.

• ***Summary:*** Plenty has "successfully introduced soya as a garden crop and a useful addition to local diets."

"Under the Soyabean Agricultural Project and the Village Soya Dairy Project, soyabean cooking demonstrations are being carried on in some of the villages of the project area. The women grind soaked soyabeans using a traditional "leloala" grinding stone. Then they make soya milk and tofu, using the leftover soya pulp to make "makoenya."

A pilot village soya dairy is now being built, at Motsemocha, designed to produce about 100 litres of soyamilk per day. Plenty's first experiment in planting soyabeans in Lesotho was in 1979/80 in the Sabapala area of Quthing district. This initial crop was badly damaged by frost and drought. This past season, Plenty planted 35 different soyabean varieties. Five varieties were from the Republic of South Africa; sixteen were from the INTSOY's ISVEX program, a 12 came from AVRDC (Taiwan).

Photos show: (1) Lesotho women preparing soya milk–but not at the soy dairy. (2) Soya ice cream being sold at the Solola Soya Dairy, Guatemala. Address: Soy Technician, Plenty International, Lesotho.

6092. **Product Name:** [Tofu Burgers (Garlic / Herbs, Black & Green Olives, Mushrooms, Provencale with Tomato & Olives, Emmenthal Cheese)].
Foreign Name: Croque Tofou (Ail / Fines Herbes, Olives Noires et Vertes, Aux Champignons, Provençale, Emmenthal).
Manufacturer's Name: SOY (Société Soy).
Manufacturer's Address: Plateau de l'Ardennais, 91590 Cerny, France. Phone: (6) 457.52.01.
Date of Introduction: 1983. May.
Ingredients: Garlic/Herbs: French-grown soybeans, rolled oats (organically grown), soy sauce, sunflowerseed oil, aromatic herbs.
Wt/Vol., Packaging, Price: 160 gm vacuum pack, 2 croquettes per pack.
How Stored: Refrigerated, 30 day shelf life.
New Product–Documentation: Richard Leviton. 1983. Oct. 16-17. Visit to Societe Soy in Cerny. The company

produces 10,000 Tofu Croques (burgers) a week in 6 flavors. They are vacuum packed for a 3 week shelf life, refrigerated. The Labels. 1983, undated. 2.75 inches diameter. Self adhesive. Red and green, brown, yellow or black on white. Flavors include Olives, and Garlic & Fines Herbes. Ad in Le Compas. 1986. March-April. No, 26. p. 32. Letter from Bernard Storup. 1984. March 22. They now make 1,400 kg/week of tofu burgers. Label for Ail-Fines Herbes from about 1986. 3.5 by 6.5 inches. Red, green, yellow, blue, and white. Self adhesive. Address is still Cerny. Letter from Bernard Storup. 1989. March 3. The first 5 varieties were launched in May 1983. Three more were launched in March 1985, which see.

New Labels (for Ail et Fines Herbes, Provençale, Forestiere, Emmenthal). Introduced in Jan. 1989. 3.25 by 5.25 inches. Self adhesive. Green, gold, and one other color on a white background. Beautiful color combinations and design. But the labels are confusing since each says "Léger" at the top but these are different from Croque Tofou Léger. "Mention Nature et Progres logo."

Letter from Bernard Storup. 1990. Dec. 26. Since Jan.

1989 this product has been the same as Dorés de Soja (Tofu Burgers) but with different packaging.

Product ("Soy Croque Tofou: aux olives") with Label brought by Taro Mikuriya of the Nutrition & Santé Group (Revel, France). 2011. Dec. 14. Paperboard box. 4 by 6 by 1.5 inches. Dark green, light green and black on white.

Letter (e-mail) from Bernard Storup, founder of Nutrition & Nature (Revel, France). The product named "Soy Croque Tofou: aux olives" was first sold commercially in March 1990.

6093. **Product Name:** [Tofu, and Tempeh].
Foreign Name: Soja-Quark (Tofu), Soja-Brie (Tempeh).
Manufacturer's Name: SoyVita Austria.
Manufacturer's Address: Herrengasse 30, A-5020 Salzburg, Austria. Phone: (0662) 43 09 85.
Date of Introduction: 1983. May.
New Product–Documentation: Letter (typed, with signature on letterhead) from Norbert Brunthaler 1983. May 11. "In our last letter we informed you of our intention to start a soyfood company. We have set up a company named SoyVita Austria (Herrengasse 30, A-5020 Salzburg, Austria. Phone: 0662 43 09 85). We produce tofu, tempeh, and have also put up small amounts if miso. In the future we'll try to produce soysauce. For all of our products we use Austrian soybeans, ecologically grown.

Letter from Lawrence Dreyer. 1983. May 19 (which see). Note: Brunthaler's partner was apparently Anton Krizmanics. By 1984 Brunthaler was part of another company named Sojvita Produktions GmbH in Lichtenwörth, Austria. Soyfoods Center Computerized Mailing List. 1983. June 20. Owner: Norbert Brunthaler.

Talk with Guenter Ebner of Sojarei Ebner-Prosl. 1990. May 28. He says SoyVita is the second largest tofu maker in Austria, after Sojarei Ebner-Prosl.

6094. Warberg, Willetta. 1983. All about tofu. *Modern Maturity.* April/May. p. 68-69.

6095. **Product Name:** Tofu (Vacuum Packed but not in a Box).
Manufacturer's Name: White Wave, Inc.
Manufacturer's Address: 1990 North 57th Court, Boulder, CO 80301.
Date of Introduction: 1983. May.
Wt/Vol., Packaging, Price: Vacuum packed.
New Product–Documentation: Interview with Steve Demos. 1989. They got their vacuum packer in May 1983. It was a used Tiromat from a beef jerky company in Los Angeles. That one machine almost broke the company's back.

6096. **Product Name:** [Tofu Spread (Natural, Garlic, Celery, or Paprika)].
Foreign Name: Tofu Spread (Naturel, Knoflook, Selderie, Paprika).
Manufacturer's Name: Witte Wonder Natural Products B.V.
Manufacturer's Address: Piet Heinstraat 80, 2518 CK Den Haag, Netherlands.
Date of Introduction: 1983. May.
Ingredients: Garlic: Tofu, olive oil, apple vinegar, garlic, guar.
Wt/Vol., Packaging, Price: Bottled, for 3.15 guilder per bottle.
How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Label. 1983. 6 by 1.5 inches. Self adhesive. 2 color: Green and light green on white. Illustration of product vegetable. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.

Richard Leviton. 1983. Trip to Europe with American Soybean Assoc. Oct/Nov. Unpublished manuscript. p. 24. They started making their dips in May 1983. Sales are now exploding. They sell 4,000 bottles/week total of 3 flavors of dips and 3 marinated tofus, mostly in Holland but some in Germany. "Tofu spreads sell for 3.15 guldens/guilder; they also repackage soy sauce. Sampled products. Garlic is creamy, tart, no water separation, smooth and creamy." Soya Bluebook. 1987. p. 95. Witte Wonder B.V. is now owned by Solnuts, Inc. Letter from Sjon Welters. 1989. July 24. The company was started by Cees van Rest, who was director until 1 April 1986, at which time Solnuts acquired the majority ownership. Tofu Aufstrich (spread) is not a separate product; it is made by Witte Wonder. The company exports mainly to Germany and England. The current address is Gelreweg 4b, 3843 AN Harderwyk, Netherlands. Letter from Sjon Welters. 1989. Aug. 9. The paprika spread was introduced in 1983 but is no longer on the market.

6097. Arcure, Catherine. 1983. Food of the future, tofu has many uses. *Ann Arbor News* (*Michigan*). June 1. [1 ref]
• ***Summary:*** Christine Liu, a local proponent of using tofu,

© Copyright Soyinfo Center 2013

is in the process of completing a tofu cookbook. To see some of the many interesting possibilities, stop by The Soy Plant Deli, 211 East Ann St., in Ann Arbor, Michigan, where many of the delicious take-out treats use tofu in imaginative ways. A large color photo shows Christine, dressed formally, with many tofu dishes she has developed on a table atop a table cloth. Recipes are give for: Curried tofu strudel. Spinach tofu strudel. Tofu stroganoff. Fluffy tofu. Tofu whole wheat sesame cookies. Tofu peanut honey bars. Tofu coconut lemon bars. Address: News food columnist, Ann Arbor, Michigan.

6098. Shurtleff, William. 1983. Fly from Guangzhou (Canton) via Changsha to Zhengzhou (June 1 to 3) (Document part). In: William Shurtleff. 1983. Log of Soyfoods Research Trip to China and Japan: 29 May to 10 July. Lafayette, California: Soyfoods Center. 117 p. See p. 6-8. Unpublished manuscript.

• ***Summary:*** June 1. Take a long walk around the major market in Guangzhou. I don't see much tofu [*dow foo*]. It is always in 18 inch squares, 2 inches thick. Also saw *dow-gan* (pressed brown tofu squares) and *dow-pok* (small deep-fried tofu cubes).

11:00 Fly to Zhengzhou (capital of Henan province). Turbulent airplane ride; after a very long wait in a small airport, it is decided we must stay overnight at Changsha.

June 2, Thursday. Zhengzhou seminar #1 on ground floor of hotel lobby. Maotai banquet #1 in evening, with ten toasts and a 25-course meal.

Question: How does the cost of aseptic Tetra Pak cartons compare with the cost of other aseptic or sterile pouches, bottles or cans?

Ching-sha Fujook is Bamboo yuba [dried yuba sticks] in a medium-thick tan sauce at the Maotai banquet.

Question: Is China now a net importer or exporter of soybeans?

June 3, Friday. Zhengzhou. 6:00 a.m. walk with Eddie Siu to the big Zhengzhou market (largely indoors). See lots of soft tofu and soymilk. For each type of product you must stand in a different line, and each line is very long–sometimes requiring a wait of 20-30 minutes! I thought the Communist motto was "Serve the people." What a huge waste of everyone's time.

Types of tofu: Most is soft tofu (*Shui-doufu*, like Japanese Momen-dofu, made with the separation of curds and whey) 15 slabs on wood boards 18 x 18 x 4 to 5 inches thick. Pieces are cut with a knife, weighed in a scoop on a hand held lever arm, and put into customer's bag. (b) Dofu-gan, tan squares 1.5 x 1.5 x 3/8 inches. (c) "Thousand sheets" are very thin (like paper). 10-inch squares called *qian zhang.* (d) Tofu rolls (dou-fu? = maki) 3 inches in diameter and 8 inches long make of tofu wrapped in cloth and boiled (illustration). (e) Doufu-ru = fermented tofu in jars. (f) Doufu-fen = soy flour (full fat?) used to make tofu and soymilk. (g) A semi-firm tofu.

Buying: You must present a ration ticket an also pay money. 500 grams of *shui-dofu* costs 10 cents (i.e., ¥0.10). If you use up your tofu ration tickets, you may go to a separate place and use a grain ration ticket, but it costs more.

Soy sprouts: Saw 2 baskets (wicker 18 inch diameter, 14 inch deep) sold outdoors next to 5 baskets of mung beans. *Lu Dou-Ya* = mung sprouts. *Huang Dou-Ya* = soy sprouts.

Note: This is the earliest English-language document seen (Jan. 2013) that uses the term "Huang Dou-Ya" (regardless of capitalization or hyphenation) to refer to soy sprouts.

Flour: *Doufu-fen.* Probably whole soy flour? In a plastic bag containing 500 grams? Instructions read (in Chinese):

1. To make soymilk (*dou-jiang*)*:* Add 13-15 *jin* (6.5 to 7.5 kg or liters) of water (cold or hot) to contents of bag, adding a little at first to make a paste. Then, add the rest and mix/beat until contents of bag are smooth and bring to a boil.

2. To make *doufu-fa* (tofu curds): Proceed as for soymilk using any 3-4 kg of water per bag. Then, add coagulant (what coagulant? No pack of it in the bag) to 0.15 kg of water. Pour boiled milk into coagulant solution and let stand for 5-10 minutes.

3. To make doufu: Wrap tofu curds (#2) in a cloth and press for 20 minutes. (Made in Zhengzhou: Tel. 26644)

This product is widely sold. 1 bag cost ¥0.40?

Soymilk is now one of the hottest subjects in the food field in China. Interest has grown rapidly since 1982 because (1) Vitasoy's success in Hong Kong (yet Vitasoy still has no plant in China and no joint venture). (2) Japan and Southeast Asia's soymilk success. (3) Alfa Laval-Kibun and DTD's competing efforts to sell soymilk plants to China. I predict that there will soon (in 3-10 years) be many modern soymilk plants in China, most run by the Ministry of Light Industry.

One of the new AB-9 Tetra Pak machines sells for about $665,000 in July 1983. It has a capacity of 3,000 liter/hr of milk.

Jiaozi = (Chiao-tsi) = meat dumplings.

Tetra Pak is a family-run business. Address: P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

6099. Shurtleff, William. 1983. In Harbin (June 6-7) (Document part). In: William Shurtleff. 1983. Log of Soyfoods Research Trip to China and Japan: 29 May to 10 July. Lafayette, California: Soyfoods Center. 117 p. See p. 10-12. Unpublished manuscript.

• ***Summary:*** 6:00 a.m. I walk to the local market. See one stall (a mobile cart) selling gelled tofu curds (*doufu-fa*) over which is poured a sweet brown sauce then topped with some diced red chilies and green herbs. Served with deep-fried breadsticks. One other place serves soymilk hot with deep-fried breadsticks. No tofu at all in the market. Some say it is sold only in winter. No other soyfoods seen.

Soymilk terminology: (1) Dou Nai–it sounds more modern than "Dou Jiang." Implies or connotes no beany

© Copyright Soyinfo Center 2013

flavor, is thicker and has a higher protein content. (2) Dou Ru–(Alfa Laval used this) is harder to pronounce.

[Henan Area grows lots of soybeans]: more than Heilongjiang? The money to build soymilk plants in China is partially foreign capital. People and institutions are falling all over each other to help China develop "China Orient Leasing." 50% are Japanese.

Eaton [Eton], A consortium from Cleveland, Ohio, is planning to build a $50 million oil extraction and protein refining plant in Jiamusi. Oil = extract, refine, make margarine, shortening, etc. Protein = feed, isolate, concentrate, tofu and soymilk production.

Tuesday June 7, 1983 (Harbin): Min-Lite = the Ministry of Light Industry is interested in a soymilk plant. Also, the State Farm Bureau (Bean processing division) and the Soybean Institute is working in breeding (for both protein and oil), diseases, and physiology.

Soymilk Taste Tests in Harbin: Chocolate was vastly the first choice, second was sweetened, third was plain / dairy-like. They dislike added oil in soymilk and would like to try fruit-flavored soymilk (apple, pineapple). Added fat coats the mouth with a greasy / gummy film. Vitasoy has no added fat.

Dou Ru Fen: Niu Nai Mai Jing. 205 gm. This product consists of a white powder containing 10% cow's milk powder, 40% soymilk powder (spray-dried traditional soymilk, not soy flour), and 50% (!!) sugar. 1000 tonnes a year are made, starting in 1978 or 1979. Sold to housewives who use it to make breakfast soymilk. Costs RMB 0.78–0.80 = 70-80 cents. Cow's milk powder is stirred into hot soymilk. The mixture is concentrated and spray dried. Also made in Beijing, but this one is the best quality.

Pure: Soymilk powder is made in Beijing by Beijing Foodstuff Corp. since 1980. Called Doujiang-Fen (Soymilk powder) and also retailed to housewives for breakfast use. It is 50% powdered soymilk and 50% sugar. It is spray dried.

Fresh green soybeans (Maodou = Hairy bean): Mostly eaten by farmers. Also sold in markets. Not packaged or canned. Whole dried soybeans: some canned in China. It is sold in Beijing.

Tofu in Heilongjiang: None is sold during the summer because it spoils easily and people do not like to eat tofu in the summer. A lot is sold in winter.

Soybean use: Of China's 9 million tonnes produced, one man estimates that 80% of soybeans are crushed. The meal is used mainly for feed, but some for tofu, soy sauce, and textured vegetable protein (TVP).

Main uses for foods made with whole soybeans in approximate order: (1) Tofu and kan-dofu. (2) Soymilk. (3) Soy sauce. (4) Miso = Doujiang. (5) Yuba. (6) Fermented tofu.

Main uses for foods made with defatted soybean meal: (1) Tofu. (2) Soy Sauce. (3) Miso. (4) Soymilk.

Soy nuggets [fermented black soybeans] are made only in the south of China. This state farm bureau man estimates that there are 200,000 tofu shops in China, one in every village, but there are no statistics on tofu.

Big tofu factory in Harbin. Ministry of Light Industry people in charge. He does not think as many soybeans will ever be used for soymilk as for tofu.

Many government groups are doing research on soyfoods, such as tofu and soy sauce, but no single group. Address: P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

6100. Shurtleff, William. 1983. Meet Susan Scurlock, American Embassy Agricultural Attache (Attaché) in Beijing (June 9) (Document part). In: William Shurtleff. 1983. Log of Soyfoods Research Trip to China and Japan: 29 May to 10 July. Lafayette, California: Soyfoods Center. 117 p. See p. 18-20. Unpublished manuscript.

• ***Summary:*** Sources of information on soybean production in China: The *China Review of Agriculture.* 1981 outlook for 1982 is my best source of overall summary of her data.

Her best sources, as U.S. Ag Attache, are (1) Statistical Yearbook of China. The best primary data, but 1½ years late. I got all relevant data in the 1981 edition. (2) Four Chinese researchers at the embassy read Chinese newspapers for all of Chinese's provinces, looking all over for clues. (3) Travel to the provinces for information from each province. (4) Meet with Beijing Ministry of Agriculture (its Foreign Affairs Bureau) but they usually have poor data. (5) Most Chinese trade statistics come from other countries.

My best channel for the latest statistics and summaries is to call the USDA Foreign Agricultural Service (FAS) or the USDA Economic Research Service (ERS) and to ask for the latest data in their computers on soybeans, foreign country production, imports and exports.

ERS has the best data on soybeans in China. They only do research and have commodity analysts, especially for the USA. In the USA, phone 202-447-8676. FAS promotes the exports of U.S. farm products. Susan works for FAS in their oilseeds division. Phone: 202-447-7037 or 8809. Jerry Harvey is the head of the FAS oilseeds division. Ralph Detro is an oilseeds analyst. Deborah Pumphrey is with FAS oilseeds.

Data on soybean production in Heilongjiang from a Heilongjiang newspaper dated 15 May 1983 stated that the province's soybean production in 1982 was 2.55 million metric tons. This was up 26.8% from 1981.

Total soybean production statistics in China:

In 1980 some 7.94 million metric tons were produced on 7.226 million hectares.

In 1981 some 9.33 million metric tons were produced on 8.024 million hectares.

In 1982 some 9.03 million metric tons were produced on 8.226 million hectares.

In 1980 the central government increased the soybean "procurement price."

© Copyright Soyinfo Center 2013

But 1.25 million metric tons of soybeans in storage at the same time is not enough for the needs of food (tofu) and compound feeds–due to mismanagement.

China both exports and imports soybeans. They export since it is easier to export from Heilongjiang to Japan than to ship to south China. In 1982 China imported no soybeans from the USA–partly related to textile quotas. After a huge jump in textile imports from China, the U.S. limited the growth rate. But China is not really importing soybeans from anyone. In China today soybeans are mostly grown on the dykes around rice paddies. In 1981 Hunan and Anhui both doubled soybean production. Yet tofu is scarce.

The main activities of the American Soybean Association in China: They are in it for the long pull. (1) To promote compound feeds, which are seen as the wave of the future. (2) To promote the use of new technologies–for making soy protein isolates and concentrates, soymilk, etc. There will be a "Soybean Symposium" in Jilin. Susan does not foresee much growth of soybean production in China. However she does see much growth in rice, cotton, and tobacco production. And rapeseed production doubled in two years.

That evening we have a maotai banquet with Mr. Pan. We discuss the following:

Meiji makes soymilk ice cream in Japan.

Ice stick prices in China: Sugar and flavor–3 fen. Sugar, flavor and a little milk–5 fen. Sugar, flavor and much milk–15 fen.

Of four soy experts from southern China, none has heard of tou-cha-ping (Chinese tempeh).

Beijing soymilk flavor tests: 15 people prefer sweetened soymilk vs. 12 people prefer it unsweetened (plain). The majority like chocolate, yet they would like it better if it were less thick; the sweetness is just right. They also like sour orange which has the consistency of soy yogurt.

Pre-Pak: These are inexpensive plastic bags for milk or other beverages; widely used in Europe, and some in Japan. China is thinking of using these for packaging soymilk.

Alfa-Laval soymilk systems are promoted by ASA; they do not know DTD.

In China, dried yuba sticks are known as *fuzhu* (in pinyin). Address: P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

6101. Shurtleff, William. 1983. In Beijing (June 10-11) (Document part). In: William Shurtleff. 1983. Log of Soyfoods Research Trip to China and Japan: 29 May to 10 July. Lafayette, California: Soyfoods Center. 117 p. See p. 20-23. Unpublished manuscript.

• ***Summary:*** Soy sauce, miso, and fermented tofu (*doufu-ru*) are all sold at one type of store, a pickle shop that sells salted foods. I visited one of these named *Tien Yuan Jiang Yuen.* A color photo shows various types of soy sauce sold in Beijing.

In the market, the sign above the soyfoods section reads *Douzhi Shipin.* In this section they sell *fuzhu* (bamboo yuba [dried yuba sticks]), Doufu-fen (a type of soy flour made in Beijing), cubes of fried tofu (1 inch on a side, called *doubao*).

Note: This is the earliest English-language document seen (April 2013) that contains the term *doubao.*

In 1949 the East Asiatic Co. (which is owned by rich Danes) was the leading exporter of soybeans from China. They started exporting soybeans from China in the 1920s. When exporting, they had offices in Dalien (Dairen), Harbin, etc. The company now has about 80,000 employees worldwide. It is the biggest company in Denmark and the biggest foreign trading company in China, except for several Japanese companies such as Marubeni, Nissho Iwai, etc.

June 11, Saturday. Beijing seminar #1 in downstairs room. Talk with Mr. Chen of the Food and Fermentation Research Institute. Mr. Chen says the most popular vegetable oils in China are: 1. Peanut. 2. Soy (not generally refined). 3. Rapeseed.

Two organizations do research on soyfoods in Beijing: (1) His Food and Fermentation Research Institute (under MinLight, the Ministry of Light Industry); three people who work there are Mr. Chen, Mr. Dai Jiakun, and Mrs. Xu Lin. (2) Beijing Municipal Food Research Institute; contact Mr. Dai Xinjun (Dong [East] Zongbu Lane, Beijing).

Four acid tests for the buyer of any soymilk process and equipment: (1) Equipment cost (fixed). (2) Processing cost (including labor, energy, water, etc.). (3) Soymilk flavor. (4) Protein and solids recovery (percentage).

The Chinese name for thin pressed tofu sheets ("1,000 sheets / 1,000 folds) is Qianzhang or Baiyeh.

The best local markets (which have more variety of produce in the winter) are: Chongwen Vegetable Market and Xidan Vegetable Market (Chinese characters are given for both). The Chinese term for "soyfoods" is *dadou shipin* ("soybean products").

There is a new Chinese method (in Shanghai) for continuous pressed tofu sheets.

Commercial soy products made by Mr. Chen's institute: (1) Formulated soymilk for infant food. (2) Soy protein concentrate. (3) Later a modern soymilk plant will use this to make (1). Plain and sweetened soymilk in glass bottles, plus fruit (citrus = orange flavor) and malt. There are some technical problems with using plastics bags as soymilk containers; they leak and are fairly expensive. Later he will work on a lactic soymilk drink.

Research on soy sauce: Improved method. Low salt, done in factories in Beijing and Shanghai.

Most soy oil in Beijing is not refined. People like the flavor OK, but they do not know the refined flavor. Rapeseed oil is used mostly in South China. In Beijing, mostly peanut and soy oil; peanut is more expensive and has a higher class image. Rapeseed is the cheapest but people don't like it.

The debate over more meat vs. more protein. Recently

© Copyright Soyinfo Center 2013

Chinese officials have come to understand the problem better. Send him *Diet for a Small Planet*, by Lappé.

In 3-4 months, Mr. Chen will send me an article about soyfoods in China–Tell Ira Leviton.

I visit a bookstore and buy a pinyin dictionary and a book (published last year in Chinese) about tofu. Visit the Forbidden City and a very famous square in central Beijing. Address: P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

6102. Foley, Terrence B. 1983. Work with soybeans and soyfoods in China (Interview). *SoyaScan Notes.* June 12. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** This interview was conducted in the dining room of a major hotel for foreigners in Beijing. Mr. Foley has been the American Soybean Association's country director for China for about 2 years. A previous interview gives his background and credentials. Shurtleff had prepared a list of questions to ask him.

Terry wants to hire a human nutritionist (Beth Branthaver, married name Woon; her husband is in the military, and she is working on a PhD in nutrition).

Human nutrition is the first interest in China. In China, people live in little boxes; society is very secretive. Terry formerly taught Chinese language and history, and was in the military.

In China, knowledge is power. Therefore they don't like to publish statistics. Secrecy. The other reason for no statistics is "socialist methodology" and the fact that China is not yet used to the scientific viewpoint, and methodology. "There is obsessive, pervasive, perverse secrecy." They feel no need and make no effort to compile statistics, and even if they did, they wouldn't give them to foreigners. Tofu is too informal to track; its like asking how many tortillas are made in Mexico.

There is very little modern, mass production of any foods, except for export. They want modern soyfoods for export to get hard currency. Agriculture is now the top priority in China and the government is very interested in improving food production. They are making great strides in agriculture, for example exporting swine.

In Thailand Terry's soymilk group visited Greenspot. K.S. Lo wants a joint venture but to sell the product under his brand. The Chinese basically want to steal Lo's technology, then sell the soymilk back to Hong Kong and put him out of business.

Ministries in China don't do what you'd think. There is no cross communication between Ministries. They are intensely competitive among one another. Now profit is no longer a dirty word in China. Tofu shops are under the jurisdiction of the Ministry of Commerce. The Ministry of Light Industry (MinLight) does canning and processing of some foods, esp. canned, jarred, and bottled foods. Commerce does sausages, grain handling, and setting prices. Terry is very fond of MinLight; they are open, competent, cooperative. Mr. Pan is Chairman of the National Taste Testing Board. He's very sharp and nice. Many bureaucrats are very dull; but not the plant managers. In the ministries, overlapping and diffusion of responsibilities is a big problem, as is inefficiency. China's soymilk expert is Chen Xihau. Three ministries are interested in soy. The Bureau of State Farms is under the Ministry of Agriculture. Communes are not under the Ministry of Agriculture. Commune is a new name for "town." A state farm is basically a new project, on reclaimed land, with a planned development. They all look like army bases, with dorms and all.

ASA is active in sending soy-related teams abroad, and bringing in soy technicians. Doing basic promotion on animal feeding and human foods. Big interest in improving the human diet. This is the most rudimentary of all the world's ASA programs. In July a team of six from the Harbin Commercial College under Prof. Wu Mung will go to USA to study soy protein foods (modern). The team makeup is strongly influenced by ideology and politics, i.e., who is chosen to go. ASA cannot pick the members. In Sept. a second team from Ministry of Commerce will go to USA, to study modern soy protein products. China is interested in self-sufficiency. Cut off from the rest of the world, they don't like to buy from abroad. Terry does not see much expansion in soybean production. Their "midwest" = main soybean belt (northeastern China) is on about the same latitude as America's New England / Maine.

The peak historical year for soybean production in China was 1955, with 10 million tonnes.

The Western view of history presently is that great new, impersonal forces are the main determining factor. China believes more in the effect of individuals, but also with some historical determinism.

The masses in China will demand more meats. Building a livestock industry is a very high priority of China's. Current trends. 1. Big beef industry in the prairies, on land that cannot be used for food. Chinese may destroy their grasslands. 2. Conflict between people's demand for meat and a rational food policy for maximizing food resource use. 3. Huge plans to promote milk as the perfect source of protein. It is now rationed, sold like a prescription item (except the yogurt drinks) to people under 3 or over 70 years old. Not even pregnant mothers can get it. Cow's milk has much more prestige than soymilk. They plan to use soymilk as an interim product until their cow's milk industry is developed. 4. Fascination with modern technology, like all Third World countries. They have a hangup about being backward, maybe inferiority complex. 5. Tendency to look for shortcuts. 6. Isolates and other modern, high-tech soyfoods are attracting much more interested than other types of soyfoods; a some what childish attitude. They want only the most modern, the biggest, the one with the *most* protein (isolates). The *mystique* of isolates. They want to use

© Copyright Soyinfo Center 2013

them in baby foods, carbonated beverages, soymilk, etc.

Chinese foods are chopped into little chunks, then fried with sauces and spices. Textured soy protein (TSP) fits into this pattern perfectly. In addition, China is like one big military base or institutional feeding system. Thus it is easy to introduce modern soy protein products like TSP; they understand it like U.S. foodservice institutions. There is No popular resistance to it. There is an isolate plant in Manchuria. Which? They also want to make some TSP in the Nanyuan plant in southern suburbs of Beijing.

Extruders in the USA grew out of the process for extruding plastics. Chinese extraction plants do not adequately toast their soybean meal, which leads to bad flavor and poor nutritional quality. No one likes soy flour. This is not a basic lack of interest, just a reluctance to use a poor quality product.

Foley is part of a generation of Sinologists who couldn't get to China. US-China relations have deteriorated during the past 1½ yrs. Problems: 1. Textile quotas are symbolic of the problem. 2. Taiwan recognition. Terry wants to stay in China a long time so tries to be very careful not to offend anyone.

Transportation: Food doesn't move much by road. They use boats. There is a shortage of railcars. Port and dock facilities for imports are woefully inadequate for grains. This creates domestic "exports" problems. The 7-9 international ports incl. Shanghai, Tientsin, Dahlien.

Travelers don't get sick much in China. Foods are not eaten raw. Tea is boiled; all food is cooked. Continued. Address: Director, China Office, American Soybean Assoc.

6103. Foley, Terrence B. 1983. Work with soybeans and soyfoods in China (Continued–Part II) (Interview). In: William Shurtleff. 1983. Log of Soyfoods Research Trip to China and Japan: 29 May to 10 July. Lafayette, California: Soyfoods Center. 117 p. See p. 27-28. Unpublished manuscript.

• ***Summary:*** Continued. Soy oil: 90% is degummed crude, packed in 55 gallon drums and distributed by trucks. Shanghai is the leading center of oil refining. Only 20% of China's internal is solvent extracted; the rest is expelled. Largest plant is 350 tonnes/day, solvent extracting. Most are 50-150 tones/day. Oil is rationed. In retail shops it's pumped out of 55-gallon drums into your personal bottle, about 1 liter/month. Only about 5-10% of all soy oil in China is refined, and much of that by commercial crushers.

People in Northeast China and Shanghai like soy oil especially. Canton only uses peanut oil. It's also a function of price. After refining, they make margarine, shortening, and dressings in Shanghai. In China, there is a problem with sickness from eating raw veggies in salads.

The Chinese are extremely conservative with food. They do not like foreign food. During his soymilk tour to Japan, the group ate no Japanese food at all on the trip. They found a Chinese restaurant for every meal!!!

Do the Chinese prefer refined soy oil to crude?

In 1997, the U.S. Wheat Association built a full-scale bakery in China. Ed Quinones and Dennis Blankenship were very excited about the potential of soymilk worldwide. Quinones is the regional manager for Asia and Latin America. He is Terry's boss. A 6 man team & the American Soybeans Association agreed to build China a soymilk pilot plant. Now, they want a big one, with one factory equaling 2,000 L/hr. Mr. Pan thinks 2,000 L/hr is the ideal plant size. The China soybean embargo also affects the ability to raise funds for the Chinese market. Everyone likes the idea but doesn't have the money beyond $30,000 for the demo plant.

Cyrus Eaton's company pioneered trade with the Communists. It got together with Farmland, the largest agricultural co-op in the USA. Gene Vickers and Bob Bergland of Farmland-Eaton (in Crystal City, Virginia) are working on the Manchuria plant project. He is concerned that they may not be up to it. He hears that it's off.

Question #8. No idea; total blank. Only 5% of the soybeans in China are used for feed. There is a lot of unease and soybean trips and inhibitors. A little soybean meal is still used for fertilizer. Most solvent extraction is done with variants of the Rotocel design, not the Desmet.

Question #13. Everyone fries everything, like doufu and soy sauce. There is a great need for milk. Soy flour won't succeed until the Ministry of Commerce does better toasting or does subsequent toasting in food plants. There is great potential in China for tofu and soymilk. The Chinese system "falls apart in the middle from bureaucratic sludge."

There are no trade associations in the Chinese soyfoods industry; this is one reason for the slowness to modernize.

The Chinese don't know much about isolates and concentrates, but they are convinced they can be used to advantage. They want to make them in China, not import them. They aren't sure which applications are best. There are lots of applications for tofu and soymilk production. USA uses concentrates and isolates in modern foods; China has no modern foods.

Alfa Laval. The concept of offering soymilk to Beijing on a 1 year trial basis is still under discussion and isn't yet finalized. John Wilson will decide. It's probably about 500 liters/hr, not 2000 liters/hr. It's not yet in the bag, at all. That project will not obviate the need for the American Soybean Association's $30,000 pilot plant. In Shenyang and Shanghai, he's not sure whether or not Alfa has contracts, but they have made some progress. These are autonomous municipalities, so they have their own funds.

The crux of the American Soybean Association's programs are teams and technical travel. Terry wants to draw more on East Asian trips. Countries are at various stages of development here, but the Chinese have no interest in low level technology. All third world countries must have the *best*, yet they espouse self-sufficiency, not small-is-beautiful. They eschew foreign or traditional things.

© Copyright Soyinfo Center 2013

Soybean acreage in China: Heilongjiang. World Bank. Heilongjiang is reducing soybean acreage by 20%.

Exports from China: Exported meal. Low price, low quality. The cost of U.S. soybeans delivered to South China is probably less than the cost of soybeans "imported" from Heilongjiang.

The Chinese have never imported much U.S. soybeans, around 500,000 tonnes maximum. They cut this off after the textile quotas squabble, only because it wasn't important to them. This is a symbolic gesture. They could do without it. Terry expects they will be a *net* soybean importer over the next 5-10 years. Brazil has no export office in China, but does have a few traders.

Terry does not know how much soybeans are grown on the banks of rice paddies or about the Jilin seminar, as he was not invited. He's not interested in Chinese expansion of soybean production and, like Susan, does not think it will expand much.

American Soybean Association dispenses technology; China must receive and implement it.

In Beijing, the Chinese eat fermented black soybeans when they have a fever.

The word for "soybean" is *da dou*, not *huang dou. Da dou fen* refers to soy meal and cake. *Dou bing* is soybean cake.

The American Soybean Association (ASA) is like an agricultural extension office. They dispense publications and do translations.

Foley does not now get *Soyfoods* magazine. What a shame.

American Soybean Association is committed to upgrading Chinese soybeans and animal technology.

There is a 25% discount on books bought by Foley from us. Send him a list of all of our books and check history materials.

Foley would like Leviton to come to China when he visits East Asia but visas are nightmarish to get, as are hotel reservations.

The tofu and soymilk production plant in Tientsin (which is Peking's port) is under the Ministry of Commerce. Also, there are oil plants in the southern suburbs.

We talked for a long time about the need for a Soyfoods Industry Directory in China, giving names, addresses, phone numbers, and key contact people of major organizations or researchers involved actively with soyfoods. We made a sample table of contents. Terry will follow up on this. Perhaps give it to Beth as a project. I met Beth in the Beijing Hotel that night and we discussed it. Address: Director, China Office, American Soybean Assoc.

6104. Sutton, Horace. 1983. Traveler's diary: Savoring flavorful Seattle in the sun. *Los Angeles Times.* June 12. p. J13.

• ***Summary:*** "A king-size supermarket called Uwajimaya in the four-square-block Chinatown [in Seattle] is a fantasy of Oriental pleasures–everything from 'white flown analgesic balm' to a do-it-yourself tofu kit."

6105. Andersen, Kurt. 1983. "The new Ellis Island." *Time*. June 13.

• ***Summary:*** A neighborhood of Japanese immigrants was thriving in downtown Los Angeles in Little Tokyo when Beverly Hills was empty land. The area was renamed Bronzeville during World War II when its residents were interned; but now it has been retaken by the Japanese, and is again a main gathering spot for the roughly 175,000 Japanese-Americans scattered around the county. "A brand new, $12.6 million cultural complex provides reminders of home: a lush, still garden of camphor and golden-rain trees, a sleek theater for Japanese-language productions, a brick plaza for a snack of age tofu (deep-fried soybean curd) and a stroll."

6106. Shurtleff, William. 1983. In Beijing (Monday, June 13) (Document part). In: William Shurtleff. 1983. Log of Soyfoods Research Trip to China and Japan: 29 May to 10 July. Lafayette, California: Soyfoods Center. 117 p. See p. 32-33. Unpublished manuscript.

• ***Summary:*** Some reflections: China has not yet begun to modernize its tofu and miso industries like Japan has.

From Terrence Foley, try to get a list of key people involved with soy in China for our mailing list.

Morning in the Beijing market: A line of 15-20 people. No fresh tofu. Lots of (1) Deep-fried tofu cubes. (2) Tofu noodles/shreds. (3) Scraps of firm tofu that have been simmered in soy sauce (heat and salt extend the shelf life). (4) Deep-fried or simmered tofu "fingers"–1½ by 1½ by 5 inches. (5) Tofu roll made of pressed sheets. Most tofu in the market this morning uses soy sauce simmering or deep-frying to preserve it; there is no refrigeration and no fresh "white" tofu.

Vegetarian delicatessen named Quan Zu Zhai at Ba Mien Tsao near Wang Fujin: At 8:15 a van pulls up and unloads its total contents of buckets and trays of 18 types of meatless meat analogs, each with a name and price listed on a board. They are all either simmered in soy sauce, or made of deep-fried tofu and/or yuba. 30 foods are listed on the price list. The foods were put out on shelves. 25 people of all ages lined up early to wait for the foods, mostly (they say) for health reasons. All of the foods are dark brown and most are amorphous / without form. There are no forms of ducks, chicken, fish, etc. However there are many rolls, large and small. 8 workers are employed here in a big black room. The fresh, dark foods are stored in huge crockery vats.

Terrence Foley of ASA says: Dou p'o is half-processed soybean meal or "soy slop," after half of the oil has been pressed out.

Gunnar Lynum is the new head of ASA Japan.

© Copyright Soyinfo Center 2013

He has seen green vegetable soybeans (*maodou*) for sale in big baskets in local outdoor markets.

There is no margarine or shortening sold at present in China, since there is no refining or hydrogenation.

Lecithin: After degumming soy oil in China, lots of lecithin remains, but the Chinese don't know what to do with it.

China is the most xenophobic country Foley has ever experienced. During the Qing (Manchu) dynasty in China (1644-1912), they created a foreign affairs bureau to deal with *fangui* (foreign devils, foreigners). Though they fear and loathe foreigners, they are also fascinated by them. Foreigners live in hotels in a ghetto and dislike China intensely; they gripe all the time and are under constant surveillance. Most foreigners can stay / last in China only 1 year. They feel humiliated and frustrated.

Chinese are most fascinated by foreign technology. China allows foreigners in China largely in hopes of acquiring their technology and know-how. Chinese do not want bourgeois, capitalistic ways and culture contaminating their society. They reject and repudiate everything foreign except technology = the gimmick or black box.

The Chinese delegation that Foley took to Japan ate no food except Chinese food; they had no interest in and would not touch Japanese food. However they were very interested in learning as much as possible about Japanese technology– in this case soybean technology.

Southern China has a very different culture than northern China. Northerners are sodbusters, aggressive, and they fit in overseas.

A key man I should meet is Professor Wu Meng of Harbin Commercial College. He started the Heilongjiang Soybean Association, and is now studying soybean isolates and concentrates. He will soon visit the USA.

Mao Zedong underestimated the importance of science and technology in the modern world.

Most soybeans in northeast China are double cropped after wheat or corn: farmers must race to harvest the soybeans before the snows or killing cold.

John Deere is the #1 farm equipment manufacturer worldwide. International Harvester is #2 and Massey Ferguson is #3.

Dou tung (2 Chinese characters given = 2 Cc) are finger-sized pieces of pressed tofu that are deep-fried. They are from Fujian, China (on the mainland, opposite Taiwan).

A deep-fried cutlet net I have seen in Beijing is called Lan Hua Gan (3 Cc); Lan-Hua is a kind of flower. After seep frying it is simmered in a soy-based liquid.

Yen Lu (2 Cc) is nigari, used to make firm tofu. Shi Gao is calcium sulfate, used to make softer tofu. Lu Dou are mung beans, used in many ways.

ASA is run by Midwest farmers / farm boys who think of soybeans as sources of livestock feed and oil. They think the soyfoods movement is irrelevant. But by the late 1970s trends worldwide have forced ASA to take serious interest in soyfoods. Many offices have hired a human nutritionist (e.g., Ruth Orelenna in Mexico, Sabrine Lee in Singapore, Beth in Beijing). ASA tried to get Foley to focus on hogs, but he knows humans represent a much bigger market; 2 billion people vs. 200 million hogs. Foley says it is fine to mention his name and what he has told me repeatedly in the article I will write about this trip to China. Foley was a hippie in San Francisco. He is very supportive of soyfoods, and personally loves tofu and soymilk. I find him to be a very good man. We talk and I take notes for 6 hours. We are on the same wavelength.

Statistical (and other) information about soyfoods in China is in surprisingly short supply, and what does exist is hard to find. There are no private companies so individuals with a personal interest or historical sense. People are assigned to do the jobs they do. There is only a very superficial soy "culture."

Joe Rakosky has lots of fine color slides and charts on soy protein products.

I must meet Ed Quinones; we have similar interests. Quinones is the regional manager for Asia and Latin America. He is Terry's boss.

Big food markets in Beijing, in order of size / importance: (1) Ching Wen Sai Chua. (2) Dong Dan. (3) Chao Yan. They open at 7:30 or 8:00 each morning. Get there early before all foods are sold out. Sunday morning has the best selection of all foods.

The lack of fridges

refrigerators in China is a key factor in the limited availability of fresh tofu; people buy it shortly before they eat it. This factor is also important in all Third World countries.

Su jiang rou is meat or tofu pickled in jiang (Chinese miso).

The place I visited that makes meat analogs is Quan Su Zhai at Ba Mien near Wan Fu Jin.

In a salted foods shop I see La Jiang-you, a type of soy sauce. What is it? How is it made?

At the morning market, 80 people are waiting in line for fish, 40 for vegetables. What a huge waste of people's time. Why not have 2-3 lines instead of one. The retailers just stand there, almost dead-looking. There is no tofu left by 3:30 p.m. Bean threads are sold in the "bean products / foods shop."

KoKo = Ke Ke Doufu Fen, 250 gm. Made in Beijing. Soymilk powder with chocolate flavor.

Most yuba in Beijing is dried yuba sticks. It is tough, so it will not break during shipping.

Da Dou Tanpaku Shokuhin is a leathery looking type of extruded soy flour. Tan in color, sold in a 500 gm bag. Lots of these bags are seen in the market. Made in Beijing. It doesn't seem to be selling to well.

In Japan in the late 1950s and early 1960s, the advent

© Copyright Soyinfo Center 2013

of refrigeration in plants, distribution, retail and homes played a major role in the expansion of tofu into large factories and the gradual demise of small tofu shops. The lack of refrigeration has limited the modernization of the tofu industry in China, as has the switch decentralized to centralized state-controlled markets. Are there no traditional outdoor markets in Beijing? Are all markets in these huge uninviting warehouse-like buildings? Address: P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

6107. Rasmussen, Carol. 1983. Goldbeck's cookbook is an excellent primer on using natural foods. *Chicago Tribune.* June 16. p. N_A3B or S_A8 or W-A8 or G3E or D8 or NW3A.
• ***Summary:*** Starting in 1971, when the immensely popular *Diet for a Small Planet* was published, Americans have been discovering "natural" foods. Many cookbooks are now available for both vegetarians and natural foods enthusiasts who also want recipes that include meat.

Into this rapidly expanding new field comes *Nikki & David Goldbeck's American Wholefoods Cuisine,* containing 1,300 meatless recipes and a wealth of other information packed into 523 pages. Much more than a cookbook, it is a guide to the whole concept of whole foods, and the wholefoods kitchen.

The focus is on using whole, natural foods and avoiding processed and refined foods. The book includes eggs and dairy products.

One of their systems "is to use frozen tofu, which is a way of keeping tofu on hand at all times. Freezing also toughens the curd, which they think is more acceptable to the American palate."

A photo shows Nikki and David Goldbeck with their new book.

6108. Wagner, Martha. 1983. A growing galaxy of cookbooks helps Americans come to terms with tofu. *Chicago Tribune.* June 16. p. G10. [7 ref]
• ***Summary:*** "As tofu moves out of the hinterlands of America, as it begins to appear in university cafeterias, chic restaurants and gourmet food magazines, tofu cookbooks are multiplying." At least 20 titles are now available in this category. Those mentioned are: (1) *Tofu Goes West,* by Gary Landgrebe (vegetarian, reflects the common theme). (2) *The Book of Tofu,* by William Shurtleff and Akiko Aoyagi ("put tofu on the American map back in 1975, with more than 500 vegetarian recipes... and beautiful illustrations"). (3) *The Tofu Cookbook,* by Kathy Bauer and Juel Andersen. (4) *Cook with Tofu,* by Christina Clark. (5) *Tofu at Center Stage,* by Gary Landgrebe. (6) *The Great American Tofu Cookbook,* by Patricia Gaddis McGruter. (7) *The Book of Tempeh,* by Shurtleff and Aoyagi.

Concludes with three tofu recipes: Sunny tofu salad. Tofu tartar sauce. Baked marinated tofu.

6109. Wilson, Lester A. 1983. Re: Recent research and publications on soyfoods at Iowa State University. Letter to William and Akiko Shurtleff at The Soyfoods Center, June 22. 2 p. Typed, with signature on letterhead. [11 ref]
• ***Summary:*** "Dear Bill and Akiko:

"I have enclosed a copy of Nelson's B.S. thesis (Chemical Engineering), 1935 on "Soynut Spread from Soybeans." Thank you for your check covering the copying and postage charges.

"I thought you might like a quick update on our soy research here in Food Technology.

"One of my masters students (Lamar Johnson) is presently completing his thesis on 'The Influence of Soybean Variety and Method of Processing on Tofu Manufacturing, Quality and Consumer Acceptance.' I will get back to you later when the thesis is completed later this summer. (I will be presenting some of the results of this study at the 6th World Congress of Food Science and Technology, September 18-23, 1983 in Dublin, Ireland).

"Some of the other manuscripts recently published or submitted for publication by Dr. Patricia Murphy, Dr. Ken H. Hsu or myself are as follows:" Nine documents are cited, of which 3 have been published.

"We feel that we have some exciting research going on here, it just takes longer with graduate students. Sincerely yours...

"P.S. I also gave a Summer Events Seminar on 'Tofu and You' last week that was well attended (50 attended) and received." Address: Assoc. Prof., Dep. of Food Technology, Iowa State Univ., Ames, IA 50011. Phone: 515-294-3011.

6123. **Product Name:** [Tofu, Tofu Pâté, Muesli with Okara].
Manufacturer's Name: Dansk Tofu.
Manufacturer's Address: Soendre Vinge Mejeri, Soendre Vinge, Jylland, Denmark. Phone: 45-646-3037.
Date of Introduction: 1983. June.
Wt/Vol., Packaging, Price: 8 oz in plastic see-through tubs.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1983. June 20. Owner: Ted Goldberg. This listing is soon changed to D-8860 Ulstrup, and the phone to 066-463-037.

R. Leviton. 1983. Report on trip to Europe with American Soybean Assoc. Oct-Nov. p. 23. On a visit to a department store in Denmark, Dansk Tofu was "sold in plastic see-through tubs, 8 oz. 10.95 krone, 2 week shelf life if unopened. Refrigerate at 1-6ºC. After opening, keeps 8 days if water is changed daily. There are only 3 packages on the shelf. There is no side panel labeling, so people can't see what the container is. Not impressive at all."

A tiny natural foods store in Aarhus sells 30 units/week of Dansk brand Tofu Pâté (packed in tin with film cover), also Muesli with Okara.

Talk with Thomas Andersen. 1990. May 24. Followed by a letter of June 23. Denmark's two earliest tofu companies, which started at about the same time, were Soy Joy and Dansk Tofu. Dansk Tofu was located in an old dairy plant called Soendre Vinge mejeri in a small village named Soendre Vinge, which is on the continental part of Denmark called Jylland (Jutland). One of the owners was named Ted. Thomas bought most of the tofu equipment owned by this company in 1985. At that time, the company disappeared.

6124. Davis, William L. 1983. Japan: Surge in soy milk popularity could benefit U.S. *Foreign Agriculture.* June. p. 22.
• ***Summary:*** The growing popularity of soy milk in Japan is good news for U.S. soybean farmers. Current production is estimated at 70,000 tonnes/year, valued at $87.5 million. The industry expects the market to expand to over $260 million as several large firms are now starting production. Currently 11 major firms are producing soy milk. Tofu shops also market soy milk. Soy milk puddings are also now on the market. Address: Agricultural Counselor, Tokyo.

6125. **Product Name:** [Tofu, and Soymilk].
Manufacturer's Name: Ets. Co-Lu.
Manufacturer's Address: 38 Rue Chateaubriand, 13007 Marseilles, France. Phone: 913-144-14.
Date of Introduction: 1983. June.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1983. June 20. Owner: Andrew Moody. Leviton. 1988. Oct. 16. Trip to Europe with American Soybean Assoc. This traditional Vietnamese-run company makes about 700 kg/week of tofu for the local Asian market. Also makes soymilk.

6126. **Product Name:** Ice Bean (Non-Dairy Frozen Dessert) [Soft Serve: Vanilla, or Chocolate].
Manufacturer's Name: Farm Foods.
Manufacturer's Address: 156 Drakes Lane, Summertown, TN 38483.
Date of Introduction: 1983. June.
How Stored: Frozen.
New Product–Documentation: News Release. 1983. June.

6127. **Product Name:** Tofu.
Manufacturer's Name: Feliciano Laiz Tofu.
Manufacturer's Address: 1518 Sande St., Tondo, Manila, Philippines. Phone: 269-761.
Date of Introduction: 1983. June.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1983. June 20.

6128. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Fondazione Est-Ouest.
Manufacturer's Address: Via de Serragli #4, 50123 Florence, Italy.
Date of Introduction: 1983. June.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1983. June 20. Owner: Ferro Ledvinka.

6129. Gullo, Karen. 1983. Soyfoods consumption hits all-time high. *Vegetarian Times.* June. p. 12. [1 ref]
• ***Summary:*** This is a review and summary of *Soyfoods Industry Directory and Databook 1983* by Shurtleff and Aoyagi. 1982 USA production and retail sales figures are given for the following foods: Tofu (27,500 tons, $50 million in 1981), tempeh (450 tons, $2 million), and miso (750 tons). Four factors contributing to the growth of soyfoods are summarized. "Low-calorie convenience soyfoods products and frozen, meatless 'heat and serve' entrees will play and important role in soyfood's entrance into the mainstream American diet... Dairy-like soymilk and soymilk shakes, yogurt and ice cream, tofu cottage cheese and tofu burgers will soon be low-cost, low-calorie alternatives to mainstream supermarket fare."

Sojaprodukte [On soybeans and soybean products]. *Ernaehrungs-Umschau* 30(6):175-79. June. [17 ref. Ger]
• ***Summary:*** Contents: Introduction, nutritional composition, amino acids in soy sauce. Unfermented soy products: Soymilk, tofu (*sojaquark*), aburage, kori-tofu, yuba, kinako. Fermented soy products: Soy sauce, miso (*sojapaste*), tempeh, sufu, natto. Address: Instutut fuer Lebensmittelchemie, Hannover Univ., Wunstorfer Str. 14, D-3000 Hannover 91 [West Germany].

6131. **Product Name:** Island Spring Salad Dressing (with Tofu).
Manufacturer's Name: Island Spring, Inc. Co-packed by Blue Banner Foods.
Manufacturer's Address: Seattle, Washington.
Date of Introduction: 1983. June.
Wt/Vol., Packaging, Price: 12 oz jar.
How Stored: Refrigerated.
New Product–Documentation: Spot in Soyfoods. 1983. Summer. p. 55. "Tofu Salmon Balls & Tofu Dressings. Island Spring, in conjunction with Seattle-based Green Gardens, a salad dressing company, has developed a 5-flavor gourmet, spoonable, low-calorie tofu dressing. Island Spring supplies bulk calcium sulfate-GDL tofu in 4 gallon pails." Form filled out by Yvonne Kuperberg. 1988. Oct. 1. The co-packer was Blue Banner Foods.

6132. Island Spring Inc. 1983. Make a living making tofu! (Ad). *Soyfoods* Summer. p. 72.
• ***Summary:*** This quarter-page black-and-white ad is for the Soycrafters Apprenticeship Program, a professional 21-day intensive "hands-on" course in the commercial production and marketing of tempeh, tofu, soymilk, and related soyfoods. "Start your own soyfoods enterprise!... Join the soyfoods movement!." Address: P.O. Box 747, Vashon Island, Washington 98070. Phone: (206) 622-6448.

6133. **Product Name:** Gourmet Northwest Wood Smoked Salmon Ball.
Manufacturer's Name: I.V. Hart's Inc. (Distributor).
Manufacturer's Address: Vashon, WA 98070.
Date of Introduction: 1983. June.
Ingredients: Smoked salmon, tofu (soybeans, water, bittern), onion, soy oil, horseradish, sunflower seeds, egg whites, modified food starch, natural cream cheese flavor, parsley, Lite salt.
Wt/Vol., Packaging, Price: 7 oz or 12 oz.
How Stored: Refrigerated.
Nutrition: 420 calories per 7 oz, or 700 calories per 12 oz.
New Product–Documentation: Spot in Soyfoods. 1983. Summer. p. 55. "Tofu Salmon Balls & Tofu Dressings. This salmon ball manufacturer recently redid their frozen product substituting tofu (made by Island Spring) for cream cheese to lower the calorie content." Labels. 1987. Front and back. 2.5 inch diameter. Red and black on metallic gold. "A unique spread. Only 420 calories per 7 oz."

6134. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Jakso. Center for Agriculture & Craftsmanship. (Also/later called Yakso Farms).

Manufacturer's Name: Keiko's Tofu House.
Manufacturer's Address: P.O. Box 1641, Sitka, AK 99835. Phone: 407-747-8249.
Date of Introduction: 1983. June.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1983. June 20. Owner: T.M. Frederick.

6137. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Lagadec Tofu.
Manufacturer's Address: Quartier Celhay, Garateko Borda, 64240, Hasparren, France. Phone: 592-958-18.
Date of Introduction: 1983. June.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1983. June 20. Owner: Dominique Lagadec.

6138. **Product Name:** Incredible Vegetable Turnover (with Tofu).
Manufacturer's Name: Laughing Moon Food Company.
Manufacturer's Address: 220 Third Ave., Venice, CA 90291.
Date of Introduction: 1983. June.
Ingredients: Filling: Onion, green pepper, tofu, bean sprouts, peas, potatoes, spices, shoyu. Crust: Whole wheat flour, water, vegetable oil, sea salt.
Wt/Vol., Packaging, Price: 4.5 oz in plastic bag.
How Stored: Frozen.
Nutrition: Per 4.5 oz. turnover: 294 calories, 7 gm protein,

23 gm carbohydrates, 14 gm fat, 44 mg sodium.
New Product–Documentation: Spot in Soyfoods. 1983. Summer. p. 54. "Turn Over Tofu."

6139. Leviton, Richard. 1983. "We've taken a step into capitalism"–The soyfoods industry: A five year perspective. *Soyfoods.* Summer. p. 46-47.
• ***Summary:*** Gives an insightful and humorous comparison of the soyfoods industry in 1978 and 1983. "On July 31, 1978 [sic, July 30], riding high on a spirit of cooperation and enthusiasm among small tofu shops, the Soycrafters Association of North America was founded in Ann Arbor, Michigan. On February 7, 1983, with intentions of greatly expanding the market through media promotions and backed by the industry's leading producers, the Soyfoods Association held its formative meeting in Anaheim, California. In a brief five years, the soyfoods industry has survived, blossomed, and changed considerably, in ways disappointing to original founders, in other respects, with a measure of success beyond what was ever imagined."

Describes the spirit of the infant soyfoods industry in 1978, then compares it with that of 1983. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

6140. Leviton, Richard. 1983. In search of the elegant plate: Using tofu in restaurants. *Soyfoods.* Summer. p. 22-32.
• ***Summary:*** *Soyfoods* magazine recently interviewed 50 restaurants around the country to learn how they were serving tofu, the amount of tofu they used each week, and their prognosis for tofu's future in restaurants. The interviews focused on natural foods and macrobiotic style restaurants–where much of the current use and innovation is taking place. The 50 restaurants represent an estimated 8% of America's estimated 600 natural foods restaurants. The 50 restaurants interviewed purchase about 111 tons of tofu yearly; by extrapolation, all natural foods restaurants would purchase a total of 611.5 tons of tofu yearly, or 2.25% of current tofu production. Asian restaurants are estimated to use an additional 3,822 tons, or 14% of total production. Many restaurants prefer to buy their tofu in bulk directly from the manufacturer. Leading centers for tofu innovation in restaurants are Boston (from the macrobiotic community), New York, then San Francisco and Los Angeles (which have large numbers of Asian-Americans and tofu manufacturers). Open Sesame, one of Boston's foremost macrobiotic restaurants, uses 350 pounds/week of tofu according to owner Gary Welkin. Also discusses tofu use and dishes served at various natural food vegetarian restaurants: Lotos/Lotus Cafe (Rochester, New York; owner Greg Weaver), Woodlands (Vancouver, BC, Canada), Blair Island (Eugene, Oregon), Meyera (Santa Monica, California), Penthouse Garden (New York City; chef George Roeger), Greens (San Francisco, California; run by Zen Center, head chef Jim Phalon), Sojourner Coffee House (Santa Barbara, California), Amazing Grace (San Francisco), Blue Heron (Minneapolis, Minnesota), Sunshine Inn (St. Louis, Missouri), Pachamama (Boulder, Colorado), Brownies (New York City), Moosewood Restaurant (Ithaca, New York), Latacarta (Boston), Blind Faith (Evanston, Illinois), Whole Wheat 'N' Wild Berries (New York City), Earth Angel (New York City), Green River Cafe (Greenfield, Massachusetts), The Garland (Tucson, Arizona), Cafe Shalom (Boston). At macrobiotic restaurants: L'Odeon (Boston), George's (Philadelphia, Pennsylvania), Grain Country (Hollywood, California), Paul & Elizabeth's (Northampton, Massachusetts), Five Seasons (Jamaica Plain, near Boston; owner John Pell), The Caldron (New York City; they have been open since 1970, and making their own tofu since 1975), Angelica's Kitchen (New York), Seventh Inn (Boston), Harvest Cafe (Washington, DC). At mixed cuisine natural foods restaurants: The Unicorn (North Miami Beach, Florida; Terry Dalton, owner, opened in late 1979, uses 335 lb/week of tofu), Nature's Oven (Miami), The Natural Cafe (Santa Fe, New Mexico), The Eatery Amulette (Monmouth Junction, near Princeton, New Jersey), The Haven (Santa Fe, New Mexico), The Copper Star (Tucson, Arizona). At tofu fast food takeout restaurants and delis: The Unicorn (Florida), Erewhon Healthycatessen (Los Angeles), The Patisserie (Boulder), Golden Temple (St. Louis). Natural foods Oriental restaurants: The Wok (Greenfield, Massachusetts), Real Good Karma (San Francisco; has served tofu since 1976), Souen (New York City), Golden Horde (Cambridge, Massachusetts), Plum Tree (New York City), Shangrila (San Francisco), Inaka (Los Angeles), Fuji-Ya (Minneapolis). Specialty atmosphere white tablecloth restaurants: Trader Vic's (San Francisco), Cambridge Crossing (Salt Lake City, Utah), The Good Earth (chain of 30 restaurants owned by General Mills). Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

6141. **Product Name:** Pie in the Sky Tofu-Tamale Pie.
Manufacturer's Name: Light Foods Inc.
Manufacturer's Address: 6144 Bartmer, St. Louis, MO 63133.
Date of Introduction: 1983. June.
Ingredients: Filling: Light Soysage, tomatoes, tomato paste, sunflower seeds, mushrooms, raisins, honey, herbs, spices. For the yeast cheese: Tofu, nutritional yeast, soy margarine, soy oil, brown mustard, apple cider vinegar, herbs, spices; Crust: Cornmeal, okara, whole wheat flour, soy margarine, salt, baking powder.
Wt/Vol., Packaging, Price: 10 oz in pie tin.
How Stored: Frozen.
New Product–Documentation: Spot in Soyfoods. 1983. Summer. p. 53. Label. Received 1988. 3.25 inches diameter. Self adhesive. Dark purple on white. An illustration (line drawing) shows a winged pie in front of clouds.

6142. **Product Name:** Tofu Apple Pie.
Manufacturer's Name: Light Foods Inc.
Manufacturer's Address: 6144 Bartmer, St. Louis, MO 63133.
Date of Introduction: 1983. June.
Ingredients: Filling: Apples, honey, soy margarine, lemon juice, spices, vegetable gum. For the cream: tofu, soy oil, honey, lemon juice, vanilla, salt. Plus crust.
Wt/Vol., Packaging, Price: 9 oz in pie tin.
How Stored: Frozen.
New Product–Documentation: Spot in Soyfoods. 1983. Summer. p. 53.

6143. **Product Name:** Tofu.
Manufacturer's Name: Maple Leaf Soyfoods Co.
Manufacturer's Address: 49 Bushmills Square, Agincourt, ONT, M1V 1K5, Canada.
Date of Introduction: 1983. June.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1983. June 20. Owner: M. Wei. Phone: Not listed.

6144. **Product Name:** Tofu.
Manufacturer's Name: Mid-South Soyfoods.
Manufacturer's Address: P.O. Box 17254, Memphis, TN 38117. Phone: 901-365-7003.
Date of Introduction: 1983. June.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1983. June 20. Owner: G. Barzizza.

6145. **Product Name:** Tofu.
Manufacturer's Name: Miller's Soy Inc.
Manufacturer's Address: Route 2, Box 2088, Greenbriar, TN 37073. Phone: 615-643-7506.
Date of Introduction: 1983. June.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1983. June 20. Owners: Harry Miller Jr. (Willis), and Mike Bishop. On the same printout, the company is listed at 206 Amherst Dr., Nashville, Tennessee 37214. Phone: 615-643-7506. Owner: Wayne Miller. Note: It is not clear whether or not either of these companies every produced tofu commercially. Willis later made a successful with R. Fischer called Miller Farms Food Co. in Cedar Falls, Iowa.

6146. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Nanda-Line Soy Products.
Manufacturer's Address: 4058 Rue St. Urbain, Montreal, QUE, H2W 1V3, Canada.
Date of Introduction: 1983. June.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1983. June 20. Owner: Nantha Kumar. Phone: Not listed.

6147. **Product Name:** Tempeh.
Manufacturer's Name: Nasoya Foods. (Distributor). Made in Greenfield, Mass., by The Tempeh Works.
Manufacturer's Address: Mechanic St. Ext. (P.O. Box 841), Leominster, MA 01453.
Date of Introduction: 1983. June.
New Product–Documentation: Poster. 1983; Soyfoods. 1983. Summer. p. 52; Ad in Soyfoods. 1984. Summer. p. 3. Soya Bluebook. 1987. p. 94.

6148. **Product Name:** Tempeh Burgers.
Manufacturer's Name: Nasoya Foods (Distributor). Made in Greenfield, Mass., by The Tempeh Works.
Manufacturer's Address: Mechanic St. Ext. (P.O. Box 841), Leominster, MA 01453.
Date of Introduction: 1983. June.
Ingredients: Organic soy tempeh, natural soy sauce, herbs, spices.
Wt/Vol., Packaging, Price: 7 oz.
How Stored: Refrigerated or frozen.
New Product–Documentation: Label. 1983, undated. 4 inches square. Yellow, black, blue, green. "100% natural." Coupons. 1983. Dated.

6149. **Product Name:** Tofu.
Manufacturer's Name: Nutri Soy Foods.
Manufacturer's Address: 20 Big Red Lane, Agincourt, ONT, M1V 1N9, Canada. Phone: 416-291-6823.
Date of Introduction: 1983. June.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1983. June 20. Owner: Harry Kwok.

6150. **Product Name:** Tofu.
Manufacturer's Name: Oriental House Restaurant.
Manufacturer's Address: 4403 Wrightsville Ave., Wilmington, NC 28403. Phone: 919-392-1620.
Date of Introduction: 1983. June.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1983. June 20. Owner: Mrs. Kyong Riddle.

6151. **Product Name:** Penguino's Dairy Free Frozen Dessert (Using Soymilk and Tofu) [Dutch Chocolate, Strawberry, Carob Mint, Almond, Orange, or Maple Walnut].
Manufacturer's Name: Penguino's Inc. Made in Syracuse, New York, by Darling Ice Cream Co.
Manufacturer's Address: 192 Hillside Ave., Rochester, NY 14610.
Date of Introduction: 1983. June.
Ingredients: Carob Mint: Water, soybeans, honey, tofu, soy oil, carob, vanilla, pure peppermint flavor, lecithin, guar

gum.
Wt/Vol., Packaging, Price: Pint.
How Stored: Frozen.
Nutrition: Per 3.5 fl oz.: Calories 115, protein 2 gm, carbohydrate 13 gm, fat 6 gm, sodium 2 mg.
New Product–Documentation: Labels. 1984, undated. "Cholesterol free. Dairy free. Low sodium. No sugar added. No preservatives. No artificial ingredients." Talk with then Letter from Miriam Phalen of Penguino's. 1985. Jan. 4. Gives a brief history of the company.

Shurtleff & Aoyagi. 1985. Tofutti & Other Soy Ice Creams. p. 76-77. Introduced in June 1983, it was first made and sold in the Lotus Cafe. In September 1983 it was first sold in outside, in Wegmans supermarkets.

6152. **Product Name:** Tofu.
Manufacturer's Name: Philip Thorpe Tofu.
Manufacturer's Address: Arundel Blackrock Rd., Ballintemple, Cork, Ireland.
Date of Introduction: 1983. June.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1983. June 20.

Note: To make tofu, this company must have imported soybeans to Ireland. This is the earliest known commercial soy product made in Ireland.

6153. **Product Name:** Tofu.
Manufacturer's Name: Phoenix Bean Products.
Manufacturer's Address: 5438 N. Broadway, Chicago, IL 60640. Phone: 312-784-2503.
Date of Introduction: 1983. June.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1983. June 20.

6154. **Product Name:** Chili Con Tofu.
Manufacturer's Name: San Diego Soy Dairy.
Manufacturer's Address: 2965 5th Ave., San Diego, CA 92103.
Date of Introduction: 1983. June.
Ingredients: Incl. kidney and pinto beans, tofu, a vegetable variety, green chilies, tamari.
Wt/Vol., Packaging, Price: 16 oz deli container.
How Stored: Refrigerated.
New Product–Documentation: Spot in Soyfoods. 1984. Summer. p. 45. "Tofu Ole." Talk with Gary Stein. 1989. Feb. 17. He thinks this product was introduced in about June 1983.

6155. Shurtleff, William. comp. 1983. Main Japanese soymilk manufacturers and their products–June 1983. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549 USA. 4 p. Unpublished typescript.
• ***Summary:*** This table contains six columns: Manufacturer, brand name, package size, type of packaging, launch date, and distribution (nationwide).

The manufacturers are: Kibun. Okazaki Marusan. Mitsubishi Kasei Shokuhin. Meiji Nyugyo. Kyushu Nyugyo. Nisshin Seiyu. Asahi Shokuhin. Kyodo Nyugyo. Yakuruto Honsha. Furuta Shokuhin Kogyo. Morinaga Nyugyo. Sugiyo. Koshin Nyugyo. Kenbi-sha. Saniku Foods (Saniku Fuuzu). Nagoya Seiraku. Nagano Tomato. Zenkoku Nokyo Chokuhan (Nôkyô). Yamato Shokuhin. Sokensha (Sôkensha). Manufacturer's Name: Soyarei–Erich Wallner Tofu.
Manufacturer's Address: Meiseng 13, A-2521 Trumau, Austria. Phone: 022-537-3022.
Date of Introduction: 1983. June.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1983. June 20. Owner: Erich Wallner. Soyfoods Center Computerized Mailing List. 1984. Feb. 7. This company has now become Soyarei Wallner Ebner, Augasse 2, Baden bei Wien, Austria. They make 150 kg/week of tofu and 1,000 okara burgers.

Talk with Guenter Ebner of Sojarei Ebner-Prosl. 1990. May 28. He thinks this company started in about Nov. 1983. Erich Wallner and he later merged their two companies.

Note: This is the earliest record seen (April 2001) concerning Sojarei Ebner-Prosl of Austria.

6160. *Soyfoods.* 1983. Soy marketing: Promotions [Hinode tofu, New England Soy Dairy, Ice Bean sandwich, Bread & Circus, Tree of Life]. Summer. p. 48-51.
• ***Summary:*** Soy Dairy discontinued selling its Herb Garden and Spice Garden Tofu in boxes, switched to redesigned, less expensive, standard tofu tubs.

Farm Foods predicts that sales of Ice Bean will jump 50% in 1982, and will top $1 million by the year's end. Farm Foods recently established a Los Angeles warehouse to handle its 14 West Coast distributors. Farm Foods also recently landed the Alpha Beta supermarket account; Ice Bean is now sold in 15 of the chain's leading Northern California outlets in their natural foods centers. In February 1983, Ice Bean moved into 40 Raley's Supermarkets in the Sacramento area. And Ice Bean is sold at 500 General Nutrition Centers (about half of all outlets) nationwide.

6161. *Soyfoods.* 1983. Tofu bacteriological qualities called into question by report. Summer. p. 8-12. [5 ref]
• ***Summary:*** Discusses the "controversial" Bulletin 810 of the Connecticut Agricultural Experiment Station, titled "Quality of tofu and other soy products" by Hankin and Hanna, released in March 1983 to at least 1,000 readers, including the press, libraries, and consumers. High levels of contamination were found in a number of soy products. Three products showed coliform counts exceeding 30,000 per gram.

The media aftermath in New England was even more devastating: The Hartford *Courant* (March 15), the Holyoke *Transcript-Telegram* (March 23), The Middletown (CT) *Press* (March 16) and the *Springfield Union* (March 16) all ran stories based on the original Experiment Station study. The Associated Press newswire service sent out a study of the report. Channel 11 in New York City ran a 2 minute news feature on the 10 o'clock evening news, referring to tofu's high bacterial counts, possible retailer negligence, and advised consumers to check for discoloration in spoiled tofu. Channel 7 in New York (in mid-March) also ran a negative story. On April 6, the *Valley Advocate* (Amherst, Massachusetts) published "The Dirt on Soy" after interviewing New England Soy Dairy. Finally Marian Burros in her "Food Notes" in the *New York Times* ran a judicious assessment on May 18 titled "Bacteria in Soy products."

The author then presents ten criticisms of Bulletin 810 and concludes that "there are considerable grounds for rejecting the Connecticut study as methodologically invalid, imprecise, and misleading." During March and April tofu companies (including New England Soy Dairy, Nasoya, The Bridge, and Legume) began to take action. Nasoya's preliminary results of temperature readings in the produce section of "75 stores monitored showed an average local temperature of 45ºF, which is 8-10º warmer than is desirable for tofu." Four suggestions are given for dealing with the industry's vulnerable position.

6162. *Soyfoods.* 1983. Tofu research in Iowa. Summer. p. 15.

6163. *Soyfoods.* 1983. Calcium absorption, soyfoods, and vegan diets. Summer. p. 20-21. [1 ref]

6164. *Soyfoods.* 1983. Profile: Azumaya tofu company. Summer. p. 34-37.
• ***Summary:*** One of the best studies of Azumaya ever published, including an in-depth history. The family-run company, which has 70 employees, is now America's second largest tofu manufacturer, making 110,000 pounds/week of tofu and shipping it to 20 states. The plant, with 6,000 square feet of tofumaking space, starts operation at 3:00 A.M. each morning. The 147,000 Asian Americans in San Francisco are a major market.

Jack Mizono's parents bought the business from a Mr. Sakamaki in June 1937. According to Jack, "Azumaya Company had been founded in Stockton, California, in 1920 by a Mr. Teranishi, who later moved it, in 1927, to San Francisco; in Feb. 1936 he sold it to Sakamaki."

"In 1937 Azumaya was processing soybeans on Post Street in a nondescript building all of 35-by-40 feet, or 1,000 square feet. In 1940 the rent went up considerably and they moved to Geary Street, setting up shop in the basement of a 25-by-40 foot building. Their equipment was traditional: stone grinder, gas steamers, large kettles, brick-reinforced wok cookers; they hand-scooped soymilk into flour sacks, hand twisted them, then hung them from hooks to lever press out the soymilk. Jack and brother George were Azumaya's principal tofumakers then but their parents still helped with the tofu pouches, burgers, and grilled tofu.

"Jack didn't like tofumaking too much. The work started at three in the morning, he wasn't making a living from it, he had to paint houses, refinish floors on weekends, and his wife, Aya, worked as a seamstress. I'll try this for a few years to help my parents, Jack said to himself. For the generation of new Caucasian tofu companies, this would seem like 1976

© Copyright Soyinfo Center 2013

all over–the good old traditional, laborious, back-straining, unprofitable, daylong adventure.

"The war in 1941 seriously disrupted the business and their lives. The Mizono family was involuntarily 'resettled' in a government camp in California; after a few years there, Jack was sent to Utah, then to New York City where he worked 6 months in the shipyards. Then he was drafted into the U.S. Army. Finally in 1947 the Mizono family reassembled in San Francisco to re-open Azumaya."

"Azumaya remained on Geary Street for about 10 years until their neighborhood underwent 'redevelopment' and the Mizonos lost their occupancy rights. Once again they packed up their tofu plant and in 1957 settled on [855] Golden Gate Avenue where they invested $25,000 in constructing a 25-by-75 foot building (to which they added an additional 25-by-100 feet soon after). They were still using the labor intensive manual tofumaking tools.

"Around this time, Jack Mizono made the acquaintance of Mr. Kunishi, the proprietor of Sacramento Tofu Company, which had opened in the Capitol in 1948. Kunishi introduced Mizono to high technology Japanese equipment and showed him the proper import channels. In 1957, when Azumaya ordered its first pressure cooker system and hydraulic press, Jack's brothers, John and Bill, joined the company and together the four Mizonos ran the plant. In production 6 days weekly, Azumaya began making 7,200 pounds of tofu a week.

"Then in 1968 the Mizono clan made a move that would continue to favorably affect their business for the next 15 years. Packaging. Shoan Yamauchi of Hinode Tofu Company in Los Angeles had already begun to package tofu in 21 ounce sealed plastic tubs and had acquired a special blow-mold form from Sealright Containers. Yamauchi agreed to supply Mizono with tofu tubs which Azumaya initially sealed with a laborious primitive hand sealer until 1971 when they bought a semi-automatic Japanese model. At the time, Azumaya was making 3 weekly deliveries to accounts in the East Bay, and 4 to San Jose, but the bulk of their tofu sales were right in San Francisco. With the new packaging system on line, facilitating wider distribution and longer shelf life, their tofu sales nearly doubled in the next year.

Once again it came time to move the plant. This time, in 1970, it was to [95] Boutwell Street. Redevelopment had edged them out and Azumaya needed more production space for expanding sales. The brothers sold their Golden Gate building, took the $40,000 to buy the new equipment and construct a 40-by-120 foot building to which they soon added another 30-by-120 feet. In 1973 they added noodles to their product line and downscaled the size of their packaged tofu from 21 ounces to 16 ounces for supermarkets.

"In 1975 they began shipping tofu out of state, a smart move apparently, as in 1983 about 50% of Azumaya sales were out of state. In 1978 noodle production represented only 20% of their business but by 1983 pasta madness had blossomed and noodles are half their wholesale business. The company began to grow fast. By 1978 Azumaya's gross sales topped $1 million; by 1980 their tofu production was 48 bushels [60 lb each] of soybeans a day, 6 days weekly, or about 43,000 pounds of tofu every week.

"In late 1979 Azumaya purchased 2½ acres of land and began the process of moving into their present, very modern plant. Once installed at Burke Avenue, Azumaya introduced pasteurization to obtain a longer shelf life for their widely, and increasingly wider, distributed tofu. Tofu lovers in Illinois, Missouri, Oregon, Georgia, and Massachusetts are now able to buy Azumaya brand tofu." Regular and firm tofu are code dated for 21 days, silken for 30 days. Azumaya investigated vacuum packaging but dismissed it because they found it couldn't produce a dependably long shelf life and it tended to compact the tofu, making the texture undesirably dense; a 19-ounce block ended up weighing only 16 ounces after the 2-hour treatment.

"Once a year Jack travels to Japan to monitor the latest tofu and noodle equipment innovations." His tofu equipment can now process 18 bushels (1,080) lb of dry soybeans an hour to yield 3,000 pounds of tofu an hour (yield = 2.77). Last year Azumaya switched from the Sweco vibrating screen to the traditional roller extractor. A detailed discussion is given of Azumaya's progressive employee benefit package, including medical insurance, bi-annual bonuses, pensions, and profit sharing. In total in 1982, these benefits "cost Azumaya $40,000 for medical insurance, $120,000 for pensions and profit sharing, and $45,000 in bonuses and raises–$2,928.57 per employee, to be exact. With a program as comprehensive as this, it is not too surprising that Azumaya operates productively and it doesn't have a union, nor is likely to."

Photos show: Three views of the inside of the plant. Azumaya's products. John, Dorothy, Aya, and Jack Mizono.

6165. *Soyfoods.* 1983. The Miami soyfoods scene [Heartsong Tofu, Sunshine Soy, Swan Foods, Swan Gardens, Unicorn Village, Oak Feed Store]. Summer. p. 38-39, 43.

• ***Summary:*** In Miami, three major tofu companies make about 25,000 pounds a week of vacuum packed tofu, prepared tofu products, and tempeh.

Brightsong Tofu: Bob and Toni Heartsong began making tofu in "1976 in a south Miami cottage style tofu shop which lasted until 1978. Making 900 pounds of hand-made tofu every week, the Heartsongs pioneered the Miami market, fully one year before the legendary and short-lived Swan Foods was opened in 1977. In January 1978 the Heartsongs moved to Redwood Valley, California, to help launch Brightsong Tofu. Meanwhile in 1977 they had written and Banyan Books had published, *The Heartsong Tofu Cookbook*, one of the first designed-for-tofu cooking guides. Bob Heartsong then worked in Hawaii for Mrs. Cheng's Soybean Products where he made 600 pounds of tofu daily."

© Copyright Soyinfo Center 2013

Finally, the Heartsongs, peripatetic tofumakers, returned to Miami and in January 1982 opened Heartsong Tofu, a "1,200 square foot plant where today they produce 4,500 pounds of vacuum packed tofu each week (with an 18-day shelf life)." The company employs 6 full-time and 2 part-time workers. A list of their tofu products and equipment is given. The Grand Union supermarket chain sells $2,200/week of their tofu products.

"Sunshine Soy, owned and managed by Danny Paolucci, occupies 2,500 square feet, in suburban Coral Gables, of what once was a Borden's walk-in cooler... Paolucci opened Sunshine in June 1980, a company which today produces 4,000 pounds of tofu and various secondary products every week.

"Previously Paolucci served as production manager for Swan Foods until its closing in December 1978. [Note: Swan Foods opened in 1977.] Paolucci often measures his Sunshine Soy's sensible survival against Swan Foods exciting but disastrous history. Swan Foods was, unfortunately, a textbook example of uncontrolled growth marked by nonmanagement: no competition, distribution by the formidable Tree of Life, a wildly innovative product line, a quadrupling of sales in the first 18 months, $2,200 in weekly sales–ending in a disheartening crash. Their product line included baked, marinated, regular, and caraway tofus, soymilk (1,000 quarts weekly), tofu cashew pie, tofu dips and salads, soy yogurts, and soymilk shakes.

"Sunshine Soy, which employs four workers, has a privately labelled vacuum packed tofu (Golden Harvest brand) in most of Florida's 100 General Nutrition Centers; Tree of Life, out of St. Augustine, handles the distribution."

Swan Gardens: "Commanding the top tofu market position in Miami, Jocelyn and Richard McIntyre's Swan Gardens, which moved to south Florida in 1979 from Montana, produces 15,000 pounds each week of vacuum packed tofu. Their 10,000 square foot plant uses only 3 production workers, each working 10 hour days, 5 days weekly–a model of streamlining. In March 1982 Swan introduced their boxed tofu (see New Products, this issue) featuring their firm (16.6% protein) tofu which sells for $1.19 a pound in produce at Winn Dixie. A major Florida distributor moves an estimated 5,000 pounds of their dealer brand every week as far north as Washington, DC. Recently Swan introduced an okara tempeh with a two week refrigerated shelf life, and this product joins their Spicy Soysage and Baked Tofu, also vacuum packed. Swan Gardens tofu is pre-dated 4 weeks for the supermarkets but McIntyre claims it remains microbially sound for 6 weeks. The company is comfortably profitable."

Photos show: (1-2) Bob Heartsong, with tofu pressing in stainless steel forming boxes, and a close-up of his line of products. (3-4) Danny Paolucci and a close-up of his line of products. (5) A close-up of Swan Gardens' products.

"On the retail natural foods level, four major stores share the bulk of Miami soyfoods sales. The Unicorn Village in North Miami Beach is stocked with 25 soy products... The Unicorn itself prepares a Tofu Cottage Salad, Eggless Egg Tofu Salad, Baked Tofu, and Tofu Onion Dip in their restaurant for retail sale in their adjoining store." Also discusses: The Oak Feed Store, a macrobiotic retailer in Coconut Grove (carries 44 soy products). Sundance Natural Foods in downtown Miami (many tofu-based deli items prepared in their kitchen). Nature's Touch in Miami.

6166. *Soyfoods.* 1983. Wildwood's sandwich power [Tofu sandwiches from Wildwood Natural Foods in Fairfax, California]. Summer. p. 42.

• ***Summary:*** "Wildwood Natural Foods has carved out a successful market niche in the competitive Bay Area soyfoods scene with their daily delivery of fresh tofu sandwiches and tempeh salads. The three year old company has built its reputation and sales volume on same-day freshness as all products reach the stores by 12 noon on the same day as manufacture. Wildwood's concept, backed by their in-house tofu shop, is eminently worth imitating in other similarly strong retail marketplaces.

"The Wildwood shop begins bustling with sandwich-making activity at 5 a.m. six mornings a week as about a dozen (out of a 35 member staff) workers prepare the daily quota of 800 sandwiches completing them by 10 when the truckers take them down to San Francisco, about 60 minutes drive away. With their 340 square foot steam kettle tofu shop, Wildwood, located in Fairfax, California, produces 2200 pounds of nigari tofu every week of which one half is used for sandwiches, the other half for distribution as bulk tofu under the "UFO" brand name ("us feeding ourselves"). In the busy summer months, sandwich production can easily soar to 6000 a week; surprisingly the returns on day-old sandwiches is only 5%.

"Under the guidance of Paul Duchesne and Bill Bramblett, the company was launched in August 1980 [Note: Actually that was when Wildwood began manufacturing tofu, on 8 Aug. 1980; they had incorporated in April or May 1980]. Duchesne had been supplying Marin County with his brown rice and tofu sandwiches since 1975 [Note: Actually since late 1977] when Bramblett suggested they expand his concept, make tofu, and distribute a wider line of tofu sandwiches.

"Today in mid-1983 (with partners Bramblett, Frank Rosenmayr, and Paul Orbuch) Wildwood distributes an impressive line of sandwiches (which retail for $2.25 each) including Avo-Tofu, Brown Rice & Tofu, Mustard Brown Rice & Tofu, Curry Brown Rice and Tofu, Sushi, Tofu Steak, Supreme Bean Tempeh Burger, Hijiki Rice Pie, and Seventh Heaven Bread. They also make prepared salads, packaged in 12 ounce containers which retail for $2.25, including Curry Tofu, Tofu Vegetable, Temptation, Potato, Hummus, Tabooli, and Good Puddin', in addition to bottled plain and honey-

© Copyright Soyinfo Center 2013

vanilla soymilk. The salads are dated for 7 days and the sandwiches for 1 although they stay fresh for 2 days.

"To service their Bay Area accounts, Wildwood employs four drivers who ply four different routes, which often take them further north to Santa Rosa or south to Santa Cruz. The limit to fresh sandwich distribution, Paul Orbuch explains, is simply how far they can be transported after production and before 12 noon, the cut-off period as the lunch hour business is crucial to retail sandwich sales.

"Wildwood's distribution system also handles local natural foods products such as Grain Dance seitan, Evolutionary Bean's Not Cheesecakes, and Solar Tacos (with soy protein). Wildwood's line, states Orbuch, is now moving into supermarkets, their Brown rice and Tofu sandwich accounts for 30% of total sandwich sales, and their products are handled by at least two area college lunch concession stands. Wildwood has been noted for their novel pedal-powered Tofumobile which they use in the summertime to bicycle sandwiches around to stores in trendy Marin County."

6167. *Soyfoods.* 1983. The soyfoods industry on display [at Natural Foods Merchandiser Expo in Anaheim, California and Whole Life Times Expo in San Francisco]. Summer. p. 7.
• ***Summary:*** Sixteen soyfoods companies exhibited at Anaheim to 7,600 paying visitors. "Six soyfoods companies shared an official Soyfoods Association booth, where they retailed their own products and provided liberal tasting samples as well. Participants included Legume Inc. (tofu pizza, tofu lasagna), Farm Foods (Ice Bean, in cones), Quong Hop (tofu burgers, tofu canolli, soymilk), Sonoma Specialty Foods (tofu salads, tofu cheesecakes), Laughing Moon (vegetable tofu turnovers), and San-Jirushi International (samples of San-J Real Tamari). The Association booth, one of 10 food catering booths at the Expo, was 'packed solid through the whole show,' reports Farm Foods' Robert Tepper."

"William Shurtleff gave a one hour speech and slide presentation on soyfoods to an enthusiastic audience."

Other interesting companies include: Pacific Tempeh, Light Foods, Essential Foods, Garden of Eatin', Living Lightly, Kibun, Westbrae Natural Foods, Edward & Sons, Cedarlane Foods, Morinaga, Worthington Foods.

Interesting products: Light Links tofu "hotdogs," Ravioli, Tofumale Tamale, Tempehroni Pizza, Chili Con Tempeh, Tempeh Enchilada.

Photos (without captions) show: (1) Danielle Lin of Laughing Moon. (2) Steve Snyder of Hinode. (3) The Morinaga booth, with Mr. Seishiro Ikegami.

6168. *Soyfoods.* 1983. Nasoya restyles tofu dips. Summer. p. 52.
• ***Summary:*** These dips and dressings (Onion, Eggless Salad, Bleu Cheese, Italian Garlic, Soyannaise, Soyannaise Dijon Mustard Flavor) were originally introduced in Dec. 1979. Plans to release a tofu burger this summer. Address: Nasoya Foods, Leominster, Massachusetts.

6169. *Soyfoods.* 1983. A questionable mousse [five varieties of dry "tofu" mousse desserts from Royal American Food Company of Blue Spring, Missouri]. Summer. p. 53.
• ***Summary:*** "These products, in our view, have no business calling themselves 'tofu' and Royal America Food Company's use of 'tofu' in the name is misleading and should be halted. Further, considering the abundance of unsavory chemicals found in the Mousses, it is ludicrous to describe them as 'natural' desserts... The use of isolated soy protein as 'tofu' marks the entry of 'white bread' tofu in the industry."

6170. *Soyfoods.* 1983. The Tofutti union. Summer. p. 54. [3 ref]
• ***Summary:*** "The soft-serve form of Tofutti has been on the market since May 1982 and is sold in 60 outlets in New York City alone including Bloomingdale's 40 Carrots, Zabar's, the World Trade Center's Big Kitchen, New York Health and Racquet Clubs, and the Great American Health Bar."

6171. **Product Name:** Tofu, and Soymilk.
Manufacturer's Name: Stewart Batchelder Tofu.
Manufacturer's Address: 6 Tweed St., N. Lancaster, High Bentham, England.
Date of Introduction: 1983. June.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1983. June 20. Owner: Stewart Batchelder/Batcheldor. The company has a second address in addition to the one listed above: Wholefoods Shop, Singl St., 78-A Penny St., Lancaster, England. Neither location has a phone.

6172. **Product Name:** Tofu.
Manufacturer's Name: Susan Hem Lee Tofu.
Manufacturer's Address: 108 Cascade Rd. #3, Port of Spain, Trinidad, Trinidad and Tobago.
Date of Introduction: 1983. June.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1983. June 20. Owner: Susan Lee Hem.

Letter from Susan Lee Hem of Santa Cruz, Trinidad. 1986. Jan. 15. Describes her work making and selling tofu in Trinidad, West Indies.

6173. **Product Name:** [Tofu].
Manufacturer's Name: Taiwan Restaurant.
Manufacturer's Address: Paulangasse, A-1040 Vienna, Austria.
Date of Introduction: 1983. June.

© Copyright Soyinfo Center 2013

New Product–Documentation: Soyfoods Center Computerized Mailing List. 1983. June 20.

Talk with Guenter Ebner of Sojarei Ebner-Prosl. 1990. May 28. He does not know this company but there is one person who makes tofu for the Vienna Chinese restaurants. But many or most of the Chinese restaurants make their own tofu.

6174. **Product Name:** Tofu-Mousse (Delicate Dessert) [Cocoa-Carob].
Manufacturer's Name: Tofu Shop (The).
Manufacturer's Address: 768 18th St., Arcata, CA 95521. Phone: 707-822-7409.
Date of Introduction: 1983. June.
Ingredients: Fresh organic (Cal. Health Code 26569.11) tofu, water, honey, cocoa, carob, agar, arrowroot, real vanilla, a touch of sea salt.
Wt/Vol., Packaging, Price: 5 oz (142 gm).
How Stored: Refrigerate at 34-39ºF.
New Product–Documentation: Label. Received 1988. 2.5 inches diameter. Self adhesive. Brown on sky-blue. "Fresh 'n Natural. Lactose-free and cholesterol-free." Matthew Schmit says this product was introduced in 1983.

6175. **Product Name:** Tofu-Charlotte (Rich Dessert) [Maple Almond].
Manufacturer's Name: Tofu Shop (The).
Manufacturer's Address: 768 18th St., Arcata, CA 95521. Phone: 707-822-7409.
Date of Introduction: 1983. June.
Ingredients: Fresh organic (Cal. Health Code 26569.11) tofu, water, real organic maple syrup, safflower oil, arrowroot, agar, real vanilla, almond extract, a touch of sea salt. Crust: rolled oats, barley malt, coconut, sesame seeds, wheat germ, corn oil, vanilla & cinnamon.
Wt/Vol., Packaging, Price: 5 oz (142 gm).
How Stored: Refrigerate at 34-39ºF.
New Product–Documentation: Label. Received 1988. 2.5 inches diameter. Self adhesive. Blue on peach. "Fresh 'n Natural. Lactose-free and cholesterol-free."

6176. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Tofuco Foods Inc.
Manufacturer's Address: 3637 Cremaize E. #1215, Montreal, QUE, H1Z 2J9, Canada. Phone: 514-376-5010.
Date of Introduction: 1983. June.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1983. June 20. Owner: Not listed.

6177. **Product Name:** Tofu Scramble (Egg-less Seasoning Mix).
Manufacturer's Name: Vegetarian Health Society.
Manufacturer's Address: Chicago, Illinois.
Date of Introduction: 1983. June.
Ingredients: Dehydrated potato, mushroom flavor, vegetable bouillon, turmeric, black pepper, dill weed, garlic powder, onion flakes, chives, herbs, and spices.
Wt/Vol., Packaging, Price: 1 oz foil packet. Retails for $1.19.
How Stored: Shelf stable.
New Product–Documentation: Spot in Soyfoods. 1983. Summer. p. 54. Intended to replace scrambled eggs, the product is mixed with diced tofu, water, and vegetable oil, then cooked (scrambled) for one minute. On package: "100% natural. No eggs. No sugar. No animal ingredients. No preservatives."

6178. **Product Name:** Tofu.
Manufacturer's Name: Wah Chong Co.
Manufacturer's Address: 80 Ossington Ave., Toronto, ONT, M5T 2R4, Canada. Phone: 416-532-0841.
Date of Introduction: 1983. June.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1983. June 20. Owner: Anthony Kim.

6179. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Walter Brunnader Tofu.
Manufacturer's Address: Lainzerstr. 21, A-1130 Vienna, Austria. Phone: 022-282-5778.
Date of Introduction: 1983. June.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1983. June 20. Owner: Walter Brunnader.

Talk with Guenter Ebner of Sojarei Ebner-Prosl. 1990. May 28. Walter Brunnader presently has a health food shop. Years ago he made tofu by himself; now he buys it from Sojarei Ebner-Prosl or from SoyVita.

6180. Wang, H.L.; Swain, E.W.; Kwolek, W.F.; Fehr, W.R. 1983. Effect of soybean varieties on the yield and quality of tofu. *Cereal Chemistry* 60(3):245-48. May/June. [14 ref]
• ***Summary:*** Tofu was made on a laboratory scale from five U.S. and five Japanese soybean varieties. Protein content of the soybeans was positively correlated with the protein content and the protein:oil ratio of the resulting tofu (dry basis). The tofu yield was positively correlated with protein recovery during processing, but not with the protein content of the soybeans. Varieties that have a light hilum and high protein content are preferred for making tofu.

Table 1 (p. 246) shows the physical and chemical properties of 5 U.S. and 5 Japanese soybean varieties. The U.S. varieties (Coles, Vinton, Weber, Hodgson, and Corsoy) contain, on average (on an as-is basis) 42.18% protein (range 40.8% to 45.1%), 18.8% oil (range 17.9% to 19.4%), and

© Copyright Soyinfo Center 2013

19.24 gm per 100 beans (range 17.74 gm to 24.71 gm for Vinton). The Japanese varieties (Kitamusume, Tokachi-Nagaha, Wase-Kogane, Yuuzuru, and Toyosuzu) contain, on average (on an as-is basis) 42.84% protein (range 40.8% to 45.2%), 18.0% oil (range 17.3% to 19.4%), and 23.69 gm per 100 beans (range 17.53 gm to 35.51 gm for Yuuzuru). Thus, the American soybeans contain, on average, 1.5% less protein and 4.6% more oil than their Japanese counterparts, and the weight per 100 seeds is 18.2% less. Address: 1-3. NRRC, Peoria, Illinois. 4. Dep. of Agronomy, Iowa State Univ., Ames.

6181. **Product Name:** Temptation (Tempeh Salad).
Manufacturer's Name: Wildwood Natural Foods.
Manufacturer's Address: 135 Bolinas Rd, Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1983. June.
New Product–Documentation: Soyfoods. 1983. Summer. p. 42-43. "Dated for 7 days shelf life."

6182. **Product Name:** Avo-Tofu Sandwich.
Manufacturer's Name: Wildwood Natural Foods.
Manufacturer's Address: 135 Bolinas Rd, Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1983. June.
Ingredients: Whole grain bread, UFO Tofu by Wildwood, avocado, lettuce, alfalfa sprouts, tomato, onion, nutritional yeast, tamari, lemon juice, vegetable juice, herbs, spices, sea salt.
New Product–Documentation: Soyfoods. 1983. Summer. p. 42-43. "Dated for 1 day although they stay fresh for 2. Their Brown Rice & Tofu Sandwich accounts for 30% of sandwich sales." Label sent by Wildwood on their letterhead. 1983, undated. 3 by 2 inches. Self adhesive.

6183. **Product Name:** Supreme-Bean Tempeh Burger.
Manufacturer's Name: Wildwood Natural Foods.
Manufacturer's Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1983. June.
Ingredients: Tempeh, whole grain bread, lettuce, celery, cucumber, green pepper, onion, tofu dressing (UFO Tofu by Wildwood, safflower oil, mustard, apple cider vinegar, garlic, sea salt), tomato sauce, mustard, tamari, lemon juice, spices, sea salt.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods. 1983. Summer. p. 42-43. Label sent by Wildwood on their letterhead. 1983, undated. 3 by 2 inches. Self adhesive. Black and green on white. Silhouette of woods with birds. "Fresh Daily. Ready to eat Foods, Naturally. Perishable. Keep Refrigerated."

6184. **Product Name:** Pâté Wildwood.
Manufacturer's Name: Wildwood Natural Foods.
Manufacturer's Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1983. June.
Ingredients: Lentils, whole grain bread, onions, carrots, celery, mushrooms, parsley, tomatoes, miso, tahini, safflower oil, sea salt, and spices.
Wt/Vol., Packaging, Price: 8 oz plastic tub.
How Stored: Refrigerated.
New Product–Documentation: Labels sent by Wildwood on their letterhead. 1983, undated. 2.75 by 1.75 inches. Self adhesive. Black and green on ivory. Silhouette of woods with birds. "Ready to eat Foods, Naturally. Perishable. Keep Refrigerated."

6185. **Product Name:** Tofu.
Manufacturer's Name: Winnie Imrie Tofu.
Manufacturer's Address: Route 1, Comp. 9, Site 1, Edgewood, BC, V0G 1J0, Canada. Phone: 604-269-7275.
Date of Introduction: 1983. June.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1983. June 20. Owner: Winnie Imrie.

6186. **Product Name:** Natural Touch Tofu Garden Patties.
Manufacturer's Name: Worthington Foods, Inc.
Manufacturer's Address: 900 Proprietors Rd., Worthington, OH 43085. Phone: (614) 885-9511.
Date of Introduction: 1983. June.
Ingredients: Water, tofu, isolated soy protein, carrots, peas, soy oil, flavorings (HVP, onion powder), spices, garlic powder, yeast, natural flavor, essential oil of paprika, turmeric, carrageenan.
Wt/Vol., Packaging, Price: 10 oz box contains 4 white patties. Retails for $1.95 to $2.37.
How Stored: Frozen.
Nutrition: Per 70-gm. patty: 11 gm. protein.
New Product–Documentation: Talk with Craig Klatt of Seventh-day Adventist Bookstore in Pleasant Hill, California. 1983. Aug. 8. This product is now on the market, with 4 white/unfried patties per package, retailing for $1.95. Craig does not know who is the man behind this new concept or who makes the tofu.

Interview with Frank Poston. 1983. Dec. 16. This is the start of a new line developed for the health foods market. The Tofu Garden Patties were introduced in June 1983. Worthington bought all of the tofu equipment from Rising Sun Soy Farms in Columbus, Ohio, and are now making the tofu for the product at the Worthington plant in Ohio. The product was developed for the health food market, and will be part of the larger new Natural Touch line of products. More new products will be out in April 1984. This is a big and important new trend for the company and they plan to put a lot of energy and money into promoting it. Some (but not all) of the new products will contain tofu.

6190. **Product Name:** [Tofu Powder].
Foreign Name: Doufufen.
Manufacturer's Name: Zheng Zhou Shi Shu Cai Gong Si, Nan Guan Fu Shipin Chang (Zheng Zhou City Vegetable Company, South District Food Factory).
Manufacturer's Address: Zheng Zhou, China.
Date of Introduction: 1983. June.
New Product–Documentation: Label. 1983, undated. In plastic bag. Instructions for making soymilk, tofu curds, silken tofu, and firm tofu.

6191. Hitchcock, Susan Tyler. 1983. Tofu into the mainstream. *Washington Post.* July 24. p. K4. Food section.
• ***Summary:*** "Invite your friends in for a meal of tofu, and nine times out of ten they'll turn thumbs down. Tofu's got that bland, self-righteous flavor that makes health-conscious eaters endure it and makes epicureans say no thanks.

"But tell your friends you're serving cheese-filled crescents, moussaka or dumplings florentine, stuffed potatoes or broccoli crunch, banana cream pie or chocolate mocha fondue–all of which just happen to have a little tofu in them–and you'll find that you've still got company for dinner."

This is the discovery of Jana Crutchfield, who has written a book titled *Tofu: Not just for the health of it* and published it herself. Contains 8 tofu recipes.

6192. Iggers, Jeremy. 1983. Soy Plant struggles to keep its '60s ideals in '80s business world. *Detroit Free Press.* July 31. p. 6G.
• ***Summary:*** About The Soy Plant in Ann Arbor, Michigan. Includes discussions with Steve Fiering, Rick Whealey, Jane Southwell, Geof Beck (production co-ordinator), Carolyn Roi (marketing co-ordinator), and Steve Fiering (one of the founders). Hours and wages have been cut–wages from $5/hour to $3.50/hour last fall because the business was losing money. Difficulties include inefficient equipment, too little capital, and lack of professional management. Federal corporate taxes went unpaid for three years before anyone noticed; it then took years to pay both the taxes and the penalty.

The company got about $20,000 in loans from members of the community. They paid interest in the form of one pound of tofu a week, but the $18,000 they eventually paid in free tofu was a huge drain on the struggling enterprise. Last may the workers decided the tofu interest payments had to stop. Letters were sent to all lenders explaining the financial difficulties and offering three choices: They could forgive the debt, take payment of the principal in tofu, or put their names on a list for eventual repayment. It was a hard choice for the company to make.

Now things are looking up. Several new products are selling well: Tempeh-filled tacos, Soysage, tempeh burgers, and spiced tofu.

6193. **Product Name:** [Tofu (Organic Nigari)].
Foreign Name: Tofu.
Manufacturer's Name: Albert Hess Tofuhaus Rittersheim.
Manufacturer's Address: Hauptstrasse, D-6719 Rittersheim, West Germany. Phone: 06-352-3473.
Date of Introduction: 1983. July.
Ingredients: Soybeans, water, nigari.
Wt/Vol., Packaging, Price: 250 gm and 400 gm vacuum pack.
How Stored: Refrigerated.
New Product–Documentation: The company was apparently originally called Albert Hess Tofuhaus Rittersheim, 6719 Rittersheim, W. Germany. Phone: 06-352-

3473.

Interview with Bernd Drosihn of Soyastern. 1987. Nov. 30. They make about 1,000 kg/week of tofu.

Letter from Harry Whitford of Soyastern. 1987. Dec. 14. Albert Hess of Tofuhaus Tiefental, Hauptstrasse 13, D-6719 Lautersheim, W. Germany. He makes about 1,000 kg/week of organic nigari tofu. Form filled out by Albert Hess. 1988. Jan. 25. Production began June 1983. He makes 4,000 to 6,000 kg/month of tofu. Leaflet. 1988. "Produced in the traditional hand-crafted way, using soybeans and nigari." Label. 1988, received. 2.5 by 3.5 inches. Black on brown. Note: As of 1 Dec. 1988 the company letterhead reads Tofuhaus Tiefenthal, Tofu und Soja-Produkte. Albert Hess. The logo is taken from *The Book of Tofu* by Shurtleff & Aoyagi. Some products now have the brand "das Tofuhaus."

Die Geschäftsidee. 1989. Dec. p. 32. Albert Hess began to make tofu in 1983, starting with a DM 2,000 investment. He now makes 1.5 tonnes/week of tofu.

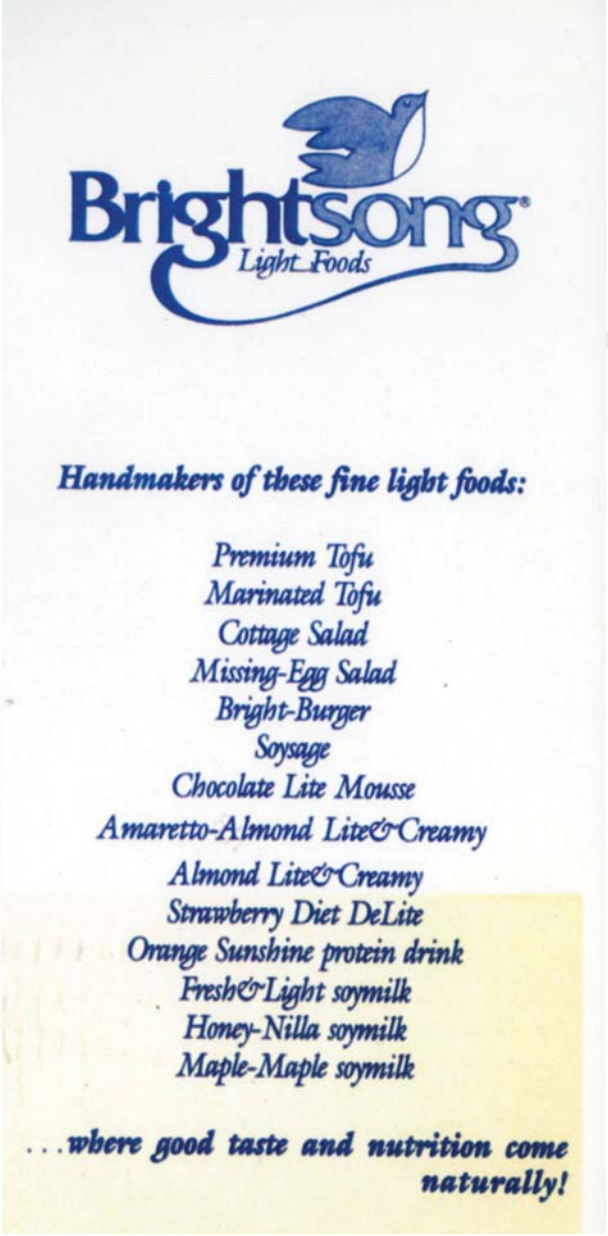
Label brought by Albert Hess of Albert's Tofuhaus. 1995. March 11. 2.5 by 4 inches. Green and white on purple. An illustration shows a large personified cake of tofu, with smiling face and arms held out.

This is the earliest commercial soy product seen (Feb. 2013) made by Albert Hess or Tofuhaus Rittersheim.

6194. **Product Name:** [Tofu Sandwich Spread (Paprika, Herbs & Garlic)].
Foreign Name: Tofu-Brotaufstrich (Paprika, Kraeuter-Knoblauch).
Manufacturer's Name: Albert Hess Tofuhaus Rittersheim.
Manufacturer's Address: Hauptstrasse, D-6719 Rittersheim, West Germany. Phone: 06-352-3473.
Date of Introduction: 1983. July.
Ingredients: Paprika (1995): *Tofu, *brown rice, *safflower oil (*disteloel*), paprika, *tomato paste, vegetable broth, sea salt, herbs. * = Organically grown (*Rohstoffe aus kontrolliert biologischem Anbau*).
Wt/Vol., Packaging, Price: 180 gm glass.
How Stored: Refrigerated.
New Product–Documentation: Leaflet. 1988. The ingredients are pureed, filled into glasses, and sterilized. They make 50 kg/month of the garlic spread. The horseradish is new. Form filled out by Albert Hess. 1988. Dec. 1. This product was introduced in July 1983. Labels. 1988, received. 5.5 by 1 inch. Black on yellow or orange.

Label brought by Albert Hess of Albert's Tofuhaus. 1995. March 11. 5.5 by 1.3 inches. Black, red, and white on light yellow.

6195. Brightsong Light Foods. 1983. Handmakers of these fine light foods: Premium Tofu, Marinated Tofu, Cottage Salad, Missing Egg Salad... (Leaflet). Petaluma, California. 3 panels each side. Each panel: 22 x 9.5 cm.
• ***Summary:*** The front panel of this leaflet, printed blue on white, lists 14 soy products made by the company. The logo is a flying bird with a white throat. The slogan: "Where good taste and nutrition come naturally." The inside three panels discuss: About Brightsong (since 1978). What makes Brightsong Tofu so special. About the other Brightsong products. Address: P.O. Box 2536, Petaluma, California 94953. Phone: 707-778-8638.



6196. **Product Name:** [Tofu Balls (Ganmo), Tofu Pizza, Seitan Burger].
Manufacturer's Name: De Vuurdoop.
Manufacturer's Address: Warder 108, 1473 PG Warder, Den Haag, Netherlands.
Date of Introduction: 1983. July.
New Product–Documentation: Richard Leviton. 1983.

© Copyright Soyinfo Center 2013

Trip to Europe with American Soybean Assoc. Oct/Nov. Unpublished manuscript. p. 25. "She started in July 1983. The pizza is baked with a layer of smooth tofu on top, with tomato, olive, green pepper. Sells for 1.40 guilder/slice. Makes 800 units of tofu balls and pizza a week." Letter from Sjon Welters. 1989. July 24. Vuurdoop is the company name. Lita Hoogervorst is the name of the woman who founded it and still runs it. The company sells other products now too (seitan and a lentil-based product; maybe no soyfoods), and has moved to Groningen or Friesland in the north of Holland.

6197. *Environmental Nutrition Newsletter.* 1983. What is this thing called tofu? 6(7):S-3. July. *
• ***Summary:*** Recipes for Green Goddess tofu dressing and Tofu Spinach Quiche are given.

6198. Guo, Xiang-ao. 1983. Research on heat denaturation of soy protein after solvent extraction, and traditional Chinese soy foods. *INTSOY Series* No. 25. p. 64-66. B.J. Irwin, J.B. Sinclair, and Wang Jin-ling, eds. Soybean Research in China and the United States (College of Agric., Univ. of Illinois at Urbana-Champaign).
• ***Summary:*** Solvent extracted soybean flakes and meals (moisture content 9.6%) were subjected to 80ºC, 90ºC, and 100-105ºC temperatures for 15 or 20 minutes. The critical temperature for protein denaturation was 80ºC. At higher temperatures, solvent-extracted soybean meal was denatured more rapidly than soy flakes. Preparation of the following traditional Chinese soyfoods was described briefly: Soy sprouts (*dou ya*), soybean jiang (*dou jiang*), fermented black soybeans (*dou chi*), soy sauce (*jiang you*), soy beverage (*dou jiang*), tofu (regular and soft, *doufu*), firm tofu (*doufu gan*), pressed tofu sheets (*doufu yi*), vegetarian chicken (*su ji*), fried tofu (*you-doufu*), fermented tofu (*doufu-lu*), and yuba (*doufu pi*).

Note: This is the earliest English-language document seen (Oct. 2012) that uses the term *doufu pi* (spelled in pinyin) to refer to yuba, which he describes as follows: "Soy beverage is poured into a shallow pan and heated slowly. A protein film forms on the surface. This film is rolled and dried until it resembles bamboo. The taste and composition are similar to textured soy protein. It is a very nourishing food." Address: Zhengzhou Grain College, China.

6199. **Product Name:** Heartsong's Herbal Garden Tofu (Firm Tofu with Vegetable Chunks).
Manufacturer's Name: Heartsong Tofu.
Manufacturer's Address: Miami, Florida.
Date of Introduction: 1983. July.
New Product–Documentation: Soyfoods. 1983. Summer. p. 38. 16 oz.

6200. **Product Name:** Heartsong's Tofu Turkey (also called Baked Veggie Loaf).
Manufacturer's Name: Heartsong Tofu.
Manufacturer's Address: Miami, Florida.
Date of Introduction: 1983. July.
New Product–Documentation: Soyfoods. 1983. Summer. p. 38. 16 oz.

6201. **Product Name:** Heartsong's No Egg Salad (With Tofu).
Manufacturer's Name: Heartsong Tofu.
Manufacturer's Address: Miami, Florida.
Date of Introduction: 1983. July.
Ingredients: Tofu, carrots, celery, parsley, dill, onion, salt, turmeric, vinegar, yeast, spices.
Wt/Vol., Packaging, Price: 8 oz plastic tub.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods. 1983. Summer. p. 38.

6202. **Product Name:** Heartsong's Tofu Herb Dip.
Manufacturer's Name: Heartsong Tofu.
Manufacturer's Address: Miami, Florida.
Date of Introduction: 1983. July.
Ingredients: Tofu, white miso, oil, vinegar, honey, garlic, parsley, dill, onion.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Refrigerated.
New Product–Documentation: Soyfoods. 1983. Summer. p. 38.

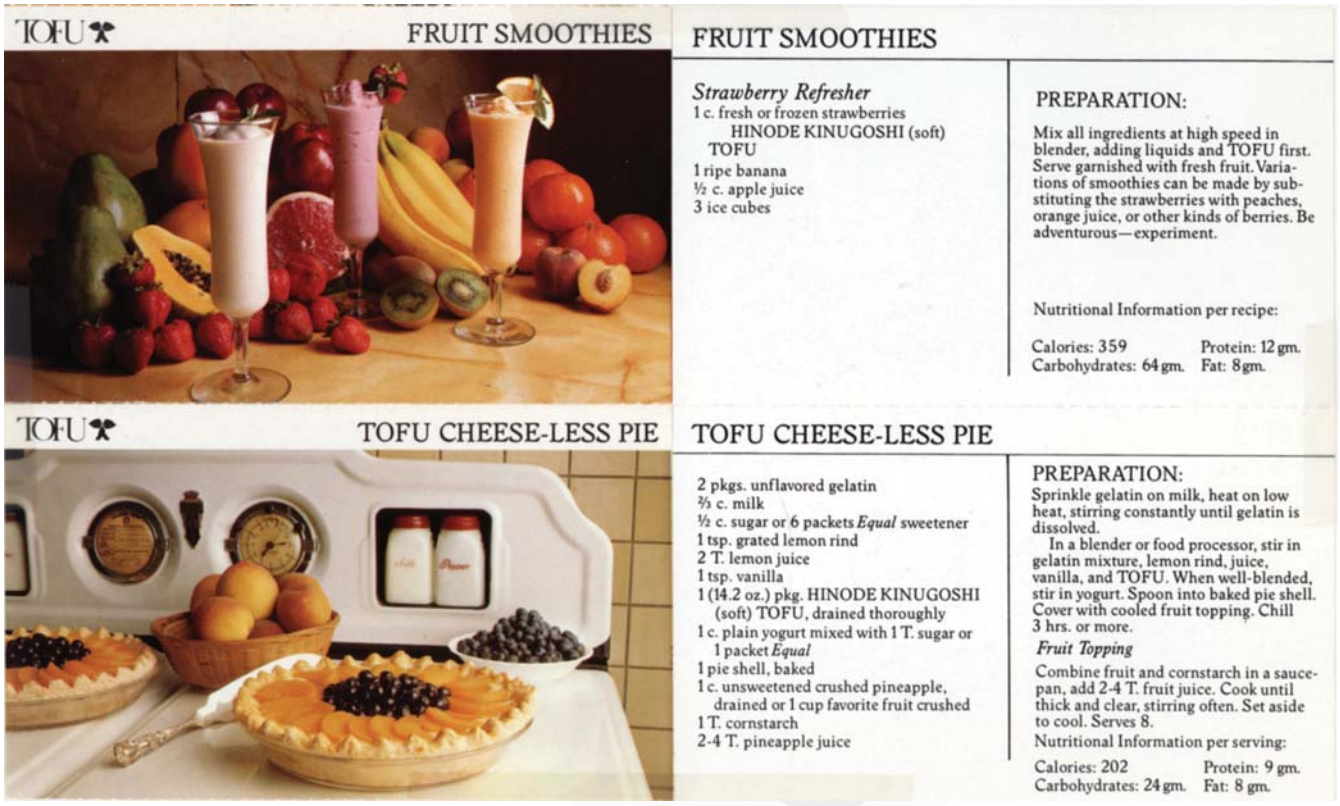
6203. **Product Name:** Heartsong's Baked Tofu Thins (Crispy Cutlets).
Manufacturer's Name: Heartsong Tofu.
Manufacturer's Address: Miami, Florida.
Date of Introduction: 1983. July.
New Product–Documentation: Soyfoods. 1983. Summer. p. 38. 8 oz.

6204. Hinode Tofu Co. 1983. Hinode summer series of tofu recipes (Leaflet). Los Angeles, California. 8 panels each side. Each panel: 7.5 x 12.7 cm.
• ***Summary:*** The 8 color recipes (see next page) include: Fruit Smoothies, Tofu Cheese-less Pie, Fruit Salad with Tofu Dressing, Broccoli a la Hollandaise, Tofu Crab Quiche, Tofu Banana Nut Bread, Enchilada Tofu Casserole, Minestrone Soup.

On the last panel is a coupon: 15¢ off on your next purchase of Hinode Tofu. And: "If you know anyone else who would like a set of Hinode's Summer Series of Tofu Recipes, send a self-addressed, stamped envelope to: Hinode Summer Series, 526 Stanford Ave.,..." Address: 526 Stanford Ave., Los Angeles, California 90013.

6205. **Product Name:** [Kikkoman Instant Tofu Miso Soup (Soybean Paste Soup with Tofu)].

© Copyright Soyinfo Center 2013



Foreign Name: Tôfu Misoshiru.
Manufacturer's Name: Kikkoman Corporation.
Manufacturer's Address: Noda 278, Chiba-ken, Japan.
Date of Introduction: 1983. July.
Ingredients: Powdered miso, dehydrated tofu, dried seaweed, monosodium glutamate, powdered yeast extract, powdered dried bonito, dehydrated leek.
Wt/Vol., Packaging, Price: 1.5 oz (30 gm). Foil packet containing 3 individual foil packets. Makes 2/3 cup.
How Stored: Shelf stable.
New Product–Documentation: Label. 1983. 5.5 by 7 inches. Plastic packet. Brown, red, green, and yellow on white. Full color picture of wooden bowl of miso soup on tray. Individual foil packets inside are 2.75 by 4 inches. Brown, black and red on white. Picture of bowl of soup on front, instructions on back. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. "Distributed by Kikkoman Corporation, Noda 278, Japan." Text on label in both English and Japanese.

Note: This is the earliest known commercial soy product that uses dried-frozen tofu as an ingredient.

6206. Landgrebe, Gary. 1983. Quantity tofu recipes for institutions and restaurants: Recipes for 50. Palo Alto, California: Fresh Press, with Soyfoods Magazine. 96 p. July. Index. 23 cm.

6210. Norin Suisan-sho, Nosan Engei Kyoku, Hatasaku Shinko-ka. 1983. Daizu ni kansuru shiryo [Statistics concerning soybeans]. Tokyo, Japan. 157 p. 26 cm. [Jap]
• ***Summary:*** This yearly report, published by Japan's Ministry of Agriculture, Forestry, and Fisheries (MAFF), is packed with detailed statistics on soybean production, trade, and utilization in Japan. The table on p. 129 gives statistics on miso production, shipments, and use of raw materials by prefecture and for Japan as a whole. In 1981 Japan produced 575,782 tonnes of miso and shipped 578,610 tonnes. Raw materials used were 14,417 tonnes of domestically grown whole soybeans, 167,539 tonnes of imported whole soybeans, 103,611 tonnes of polished rice, 24,667 tonnes of polished barley, 476 tonnes of defatted soybean meal, 71,325 tonnes of salt, and 96 tonnes of cornmeal (used mainly in Nagano and Hyogo prefectures). The top 5 miso producing prefectures were Nagano (164,510 tonnes; 28.6% of Japan's total), Aichi (54,529), Niigata (38,156), Aomori (28,602), and Hokkaido (25,908). The source of these statistics is: Shokuryô-cho, Kakô Shokuhin-ka, Kome Mugi Kakô Shokuhin Seisan Dotai, Tokei Chosa.

The table on p. 130 gives similar statistics on shoyu for 1981. In 1981 Japan produced 1,190,618 kiloliters (kl) of shoyu and shipped 1,118,799 kl. Raw materials used were 6,473 tonnes of whole soybeans, 175,205 tonnes of defatted processed soybean meal (*dashi kakô daizu*), 177,407 tonnes of wheat, 204,777 tonnes of salt, and 80,642 kl amino acid liquid (*amino-san*, either purchased or made on site). The top 7 shoyu producing prefectures were Chiba (424,498 kl; 35.7% of Japan's total), Hyogo (203,374) Aichi (59,201 kl), Kagawa (45,430 kl), Fukuoka (36,575 kl), Oita (31,860 kl), Mie (30,354 kl), The source of these statistics is the same as for the miso statistics, above.

The table on p. 132-33 gives statistics on consumption of shoyu (in 100 ml), miso (100 gm), whole soybean foods (yen), tofu (cakes = *cho*), aburagé and ganmodoki (yen), natto (yen), and other soyfoods (yen) from 1963 (Showa 38) to 1981. Under shoyu, miso, and tofu is given the amount of money spent (*kingaku*), the quantity purchased (*sûryô*), and the price. Annual shoyu consumption per household has decreased from 30.5 liters in 1963 to 16.3 liters in 1981. Annual miso consumption per household has decreased from 18.4 kg in 1963 to 12.1 kg in 1981. Tofu consumption per household has remained about constant, with 87.3 cakes in 1963 and 86.9 cakes in 1981. A breakdown is also given for each food by annual household income, with 5 income levels. One grouping is for all households (including those with a retired head of household or on welfare) and the other is only households with at least one working member. In each case, the higher the household income, the greater the consumption. In the case of tofu, for example, households with an annual income of less than 2.65 million yen consumed 76.1 cakes of tofu, while households with an annual income of more than 5.8 million yen consumed 99.3 cakes. Next is a breakdown by age of head of household. Generally, the younger the head of household, the less the consumption. In the case of tofu, households whose head was 24 years or younger consumed 55.5 cakes/year, while households whose head was age 60-64 consumed 95.4 cakes. The source of these statistics is the *Kakei Chosa Nenpo* (*Sôri-fu, Tôkei-kyoku*).

The table on pages 134-35 shows consumption per household by geographical area of the same foods as the previous table. Geographical areas include: all of Japan, all cities, cities with 50,000 or more population (broken down into large, medium, and small), cities with less than 50,000 population, towns and villages (*machi* and *mura*), 14 major regions, and large cities. Note: Statistics by prefecture are not given. In the case of tofu, the highest consumption is cities with less than 50,000 population (92.0 cakes), while the lowest is in medium-sized cities with more than 50,000 population (84.2 cakes). The regions with the highest tofu consumption are Tohoku (the northeast prefectures; 101.9 cakes) and Chugoku (southwest provinces; 98.1 cakes), while the lowest two are Hokkaido (58.3 cakes) and Okinawa (72.3 cakes). The cities with the highest annual tofu consumption per household are Toyama city (118.9 cakes), Morioka city (118.4), Yamaguchi city (107.9), Matsuyama city (102.9), Fukushima city (102.8), Tokushima city (102.0), Fukui city (100.7). The source of these statistics is the same as for the statistics on p. 132-33.

Tables on pages 136-39 give a detailed nutritional analysis of soybeans and each of 23 soyfoods made in Japan. The following minerals are listed: calcium, phosphorus, iron, sodium, and potassium. Vitamins: A (retinol, carotene, international units), B-1 (thiamine), B-2 (riboflavin), niacin, and C. Soybeans grown in Japan contain, on average, 35.3% protein and 19.0% fat, compared with 33.0% protein and 21.7% fat for soybeans grown in the USA, and 32.8% protein and 19.5% fat for soybeans grown in the China. Address: Tokyo, Japan.

6211. **Product Name:** [Tofu {Vacuum Packed, Nigari}].
Foreign Name: Tofu.
Manufacturer's Name: Regal Naturel (Marketer). Made in Quebec by Unisoya.
Manufacturer's Address: Montreal, QUE, Canada.
Date of Introduction: 1983. July.
Wt/Vol., Packaging, Price: 1 lb vacuum packed.
New Product–Documentation: Talk with Richard Milon. 1987. Dec. 11. He bought the tofu in bulk from Unisoya and vacuum packed it. He had 4 products. Making each one was labor intensive. He sold them to 100 retail stores. The

© Copyright Soyinfo Center 2013

company survived until late 1984.

6212. **Product Name:** [Baked Tofu Roti (Sausage Flavor, or Bacon Flavor)].
Foreign Name: Baked Tofu Roti (Saveur de Saucisse, or Saveur de Bacon).
Manufacturer's Name: Regal Naturel (Marketer). Made in Quebec by Unisoya.
Manufacturer's Address: Montreal, QUE, Canada.
Date of Introduction: 1983. July.
Wt/Vol., Packaging, Price: 8 oz vacuum packed.
How Stored: Refrigerated.
New Product–Documentation: Talk with Richard Milon. 1987. Dec. 11. He bought the tofu in bulk from Unisoya. Both products were sold vacuum packed.

6213. **Product Name:** [Tofu Salad].
Foreign Name: Salade de Tofu.
Manufacturer's Name: Regal Naturel (Marketer). Tofu made by Unisoya.
Manufacturer's Address: Montreal, QUE, Canada.
Date of Introduction: 1983. July.
New Product–Documentation: Talk with Richard Milon. 1987. Dec. 11. He bought the tofu in bulk from Unisoya.

6214. *Rundbrief: Interessengemeinschaft fuer Sojaspeisen.* 1983--. Serial/periodical. Weidgarten 2, D-8091, Soyen, West Germany. Vol. 1. July 1983. Lukas Kelterborn, editor. [Ger]
• ***Summary:*** This is Germany's first soyfoods newsletter. The first issue, typewritten and photocopied, was 5 pages long. Issue No. 2. was probably never published.

Letter from Wolfgang Furth-Kuby of Sojaquelle. 1984. April 26. "Lukas Kelterborn is not with us any more. The *Rundbrief* was mainly his thing. I knew it was not going to work this way, but I let him do it his way so he could learn. Lukas wanted to go into production of tofu so badly. He joined with Peter Wiegand and some other people and after having stuffed some 70,000 German marks into Peter's exhausted business, all went bankrupt. I will not continue the *Interessengemeinschaft* but I think something new has to come. The IG in its old form was too freaky and 'alternative.'" Address: Soyen, West Germany. Phone: 08071-4220.

6215. Shulman, Martha Rose. 1983. The health food industry. *Cosmopolitan.* July. p. 240-45.
• ***Summary:*** "These days, as interest in nutrition burgeons, health food is no longer the fringe fad it once was. Jane Fonda, Barbra Streisand, Sidney Poitier, Jerry Brown, Carol Channing, and Erica Jong are all avid fans of nutritious cuisine... and did you know Doris Day, Cheryl Tiegs, and Bill Walton have a distinct weakness for tofu? Sales of health food, now $2.4 billion a year, have *tripled* in the last decade. There are more than eight thousand natural-foods stores in the United States–over thirteen hundred in Los Angeles County alone–and over eighteen million people shop in them. Increasingly, too, the funky natural-foods shops of the late sixties and early seventies are becoming sophisticated supermarkets. Health-food chains are–excuse the expression–sprouting up nationwide. The largest, General Nutrition Centers, has about eleven hundred stores."

6216. **Product Name:** Tempeh Burgers.
Manufacturer's Name: Soy Plant Co-op Inc. (The).
Manufacturer's Address: 711 Airport Blvd., Ann Arbor, MI 48104. Phone: (313) 663-8638.
Date of Introduction: 1983. July.
New Product–Documentation: Iggers, Jeremy. 1983. *Detroit Free Press*. July 31. p. 6G. "Soy Plant struggles to keep its '60s ideals in '80s business world." Several new products are selling well, including tempeh burgers.

Soyplant pickup distributor price list effective April 16, 1984. Lists Tempeh Burgers, sold 3 per package or in bulk (50 singles).

6217. Richie, Donald. 1983. Tofu cooking: The Asian bookshelf. Book reviews / features. *Japan Times.* Aug. 6 (8/6/83).
• ***Summary:*** "Tofu is certainly the single Asian food best known in the West" [assuming that soy sauce is considered a seasoning rather than a food].

Tofu originated in China, where it is said to have been invented by an official of the T'ang dynasty [618-907].

"During the Han dynasty [202 BC to AD 220] it is said, overly honest and/or underpaid government staff were called 'tofu officials.'

Note: There is an obvious contradiction here.

Tofu "first entered Japan during the Nara period [710-794] having been brought back by Japanese envoys. Since there were mostly priests tofu was a welcome adjunct to their diet. Buddhist vows prohibited their eating meat–and in the Zen sect they could not eat fish either.

"The earliest document concerning tofu in Japan shows that it was fully domesticated by 1183." In 1782 a best-seller, published in Osaka, was titled "One Hundred Rare Tofu Recipes" [*Tofu Hyaku-chin*].

In Japan, tofu is served in ways that "retain the delicate tofu taste." By contrast, in China, "tofu is often prepared with meat or fish and serves mainly as a nutritional base.

"The West had long known Chinese tofu but it was not until Japanese food became popular abroad that tofu became loved for itself. At the same time the health-food boom occurred and shortly after that appeared a most important tofu document, *The Book of Tofu* by William Shurtleff and Akiko Aoyagi. Tofu had arrived in the West." Address: Japan.

6218. Klatt, Craig. 1983. Update on Worthington Foods and

© Copyright Soyinfo Center 2013

other Seventh-day Adventist companies making soyfoods (Interview). *SoyaScan Notes*. Aug. 8. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Worthington Foods is going stronger than ever. They are expanding into new, more natural products, such as Tofu Garden Patties, as part of their Natural Touch line. They plan to develop more new products in this line. Worthington bought back their company from Miles Laboratories for less than they sold it for, and got a new factory and the Morningstar Farms line as part of the deal.

Payless and Longs drug stores in California sell Loma Linda infant formula.

Country Life, formerly Cedar Lake, now imports bottled soymilk (free of sugar) from Japan, and has a chain of vegetarian restaurants, including one on Wall Street. Address: Manager, Adventist Book Center, 2300 Nourse Rd., Pleasant Hill, California 94523. Phone: 415-685-4300.

6219. *Presse* (*La*) (*Montreal, QUE, Canada*). 1983. Le tofu, de la viande sans os [Tofu, the meat without bones]. Aug. 10. p. D4. [Fre]
• ***Summary:*** Contains recipes for tofu gratin and tofu cheesecake.

6220. Hansen, Barbara. 1983. What's in a namesake?: Let's eat out. *Los Angeles Times*. Aug. 11. p. O33.
• ***Summary:*** This is a review of the Taiwanese restaurant Green Leaves Restaurant (No. 117 in the Food Center, 727 N. Broadway, Los Angeles). It specializes in small, simple dishes that Taiwanese like with drinks, such as salted spiced prawns or "braised bean curd." Address: Times staff writer.

6221. Torii, Yasuko. 1983. Re: New developments with tempeh and tofu in Japan. Letter to William Shurtleff at Soyfoods Center, Aug. 14. 2 p. Typed, without signature (carbon copy). [Eng]
• ***Summary:*** Tempeh: "(1) There was a seminar on soyfoods on Aug. 5. The topics were: 'Tofu and Japanese foods in the U.S.,' by Prof. Okubo. 'Does tempeh fit into the Japanese diet,' by Prof. Katsuyoshi Tsujimura of Tokyo. A party was held after the seminar to celebrate the 15th anniversary of the Soyfoods Development Association. Many businessmen showed interest in tempeh.

"(2) Mr. Kato of the Ministry of Agriculture [*Nôrinsho*] arranged for a meeting for Nihon Kogyo KK and Kyodo Press on Aug. 9. I prepared soy and okara tempeh, and Mr. Kato brought Torigoe's tempeh. According to Mr. Kato, articles on tempeh will be distributed to many local papers thru Kyodo Press. Nihon Kogyo seems to be interested in producing [tempeh] starter. A few researchers are going to visit the U.S. in September to attend a convention and they hope to visit some tempeh and tempeh starter factories in California. Is it possible to make such arrangements for them?

"(3) Mr. Sakata of Shibata Shoten [a publishing company] visited Natto Kumiai [Japan Natto Association] and attended the soyfoods seminar. A final decision concerning publication will be made in a few days.

"(4) Natto Kumiai has distributed tempeh cultures to some members to study production. A meeting is scheduled in September and I was asked to attend and talk about tempeh."

Also discusses: Publication of The Book of Kudzu in Japanese. The Book of Tofu on NHK-TV. Address: Kamitsuchidana 324, Ayase-shi, Kanagawa-ken 252, Japan. Phone: 0467-76-0811.

6222. Sheraton, Mimi. 1983. Restaurants: A long line forms in Chinatown. *New York Times*. Aug. 19. p. C16.
• ***Summary:*** This is a review of the Cantonese Chinese 3-star restaurant Siu Lam Kung Restaurant (18 Elizabeth St., south of Canal Street). One exceptional soup is meat broth with straw mushrooms and a side platter of bean curds, green vegetables and pork. A tasty first course is clams in black-bean sauce. Both lobster and cracked crab are delicious with black-bean sauce, or with ginger and scallions. Likewise pork chops with pepper and black-bean sauce. Another masterpiece is crisp cushions of bean curd stuffed with minced shrimp.

Yocca, a leafy vegetable resembling spinach but with a haunting licorice flavor, is generally not on menus, yet it is ordered by Chinese customers. Yocca was served in a winy sauce with garlic and fermented bean cake [fermented tofu]. "Braised bean curd with black mushrooms and Chinese broccoli in oyster sauce" was also flavorful.

6223. Cook, Winnifred I. 1983. New frozen ice cream-type dessert uses healthy tofu as base for mix. *Home News* (*New Jersey*). Aug. 24. p. D1. Wednesday. Lifestyle section.
• ***Summary:*** "Already the famous and the not-so-famous que up at some of the most chic New York eateries to devour the new food–Tofutti. It is a frozen dessert resembling soft ice cream in texture and is sold in five flavors... It has a creamy smooth texture, and is cool, light and sweet, and has about 115 calories for a four-ounce serving... The major ingredient is tofu..."

"Tofutti, the frozen dessert Mintz is selling, took almost 10 years to perfect. He has been in the food business for 27 years... He'd read a book about tofu and Oriental cooking. It intrigued him enough to head for Chinatown in search of the soybean product. 'It was spooky. I went down into a basement where I found these people manufacturing tofu. I didn't, of course, speak Chinese, and I spent a long time trying to get across what I wanted. They call it "tof" so they didn't even know what I was saying.'"

Back at his deli, the first dish Mintz made using tofu was a beef stroganoff, in which the ingredient replaced the sour cream. Photo shows: David Mintz, sporting large

sunglasses. A one-gallon container of Tofutti soft-serve mix, made by Welsh Farms in Long Valley. Address: Home News consumer writer.

6224. Barber, Linda Lee. 1983. Development, presentation and evaluation of an instruction package on tofu for high school students. MSc thesis, Home Economics, University of Wisconsin, Stout. vii + 105 p. Aug. No index. 28 cm. [67 ref]
• ***Summary:*** Contents: Acknowledgments. List of tables. List of figures. 1. Introduction. 2. Review of literature. 3. Methods and procedures. 4. Results and discussion. 5. Summary, conclusions and recommendations. Bibliography. Appendices. Dr. Thomas Holman was the research advisor.

The description on the title page begins: "'Hurry for Tofu,' an instructional package that includes a slide/tape, motivational tools, taste-testing food samples, was developed and presented to 31 high school students. Using the one group pretest / posttest design, and applying a t-test for data analysis, it was found that the students who participated in the 'Hurray for Tofu' presentation had posttest scores that were significantly higher than their pretest scores. Posttest attitude scores were positive. It was concluded that the 'Hurray for Tofu' presentation was an effective method to create an awareness of tofu for high school students, and that positive attitudes toward tofu were exhibited following the presentation."

Letter (e-mail) from Linda Barber. 2012. July 7. The value of this study is that I think it is still relevant today as introducing soyfoods to the Betty Crocker society still needs work. I believe this is the first teaching / learning packet developed for students in a public setting. "Hurray for Tofu" was the title I gave to my instructional slide show that I created. I used that as an educational tool along with a demonstration and recipe booklet.

Letter (e-mail) from Linda Barber. 2012. Nov. 7. Linda has now digitized her entire slide show. She writes: I do think the thesis ideas still has value today as I don't find many (make that any) schools that use tofu in their cooking classes. Most Family Consumer Teachers have no idea what to do with it either. Maybe this is because my experience has been in the Midwest? Address: Univ. of Wisconsin.

China: Guangzhou (May 29-30), Zhengzhou, Beijing, Harbin, Beijing #2 (Scurlock, Chen Xi-Hau, Joe Rakosky, Terrence Foley, local markets, vegetarian deli). Singapore: STS and Anders Lindner, Alan Yeo, American Soybean Association (Don Bushman, Sabrine Lee, Lars Wiederman).

Japan: Seiyu department store, Kibun, ASA Tokyo (Ms. Kojima), Kanji Tsuchiya, Japan Soymilk Assoc., Sano Rinji, Kikori, Prasad and natural foods, Goro Kanasugi and tempeh, Tsuchiya soymilk #1, Kikkoman at Noda (Yokotsuka #1, Mizunuma, Plant #6 modern, Yokotsuka #2, Goyo Gura, Noda Museum, Noda Library, Mr. Ichiyama), Morinaga, Kikkoman Tokyo, Japan Packaged Tofu Assoc., Natto statistics, Asahimatsu, Natto-tempeh meeting, Mr. Katoh, Nakano Masahiro, Mr. Iitsuka of Kikkoman, Daizu Shokuhin Kaihatsu, Tsuchiya #2, Nagayama, soynuts, oil association, kinako, Ishige, Mr. Mori and soy sprouts, Katoh, Arai-san, Kodansha, Nagayama and kinako, Dr. Nakano #2, Arai shoyu, Tsuchiya #3, Tenmi. Address: Lafayette, California.

6226. Shurtleff, William; Aoyagi, Akiko. 1983. The book of tofu. 2nd ed. Berkeley, California: Ten Speed Press. 336 p. Illust. by Akiko Aoyagi Shurtleff. Index. Aug. 28 cm. [321 ref]
• ***Summary:*** Three parts of this new edition have been extensively revised and updated: (1) "Tofu Makers in the West" (p. 313-16) has been updated and now includes 310 tofu producers in the Western world (with the name, address, phone number, and contact person for each company), arranged by state or foreign country. This is the only tofu book containing such a directory.

(2) The "Bibliography" (p. 319-324) has been greatly expanded and updated. It now contains 321 publications on tofu, including all known scientific and nutritional journal articles, the 33 books about tofu written in North America since publication of the first edition of *The Book of Tofu* in 1975, and other key articles and books about tofu from East Asia and Europe, the earliest from Europe dating back to 1613!

(3) An updated listing of "People and Institutions Connected with Tofu" in the U.S. and around the world, including researchers, major tofu manufacturers in Japan, trade associations, publications, equipment dealers, and tofu apprenticeship programs.

The "Glossary" (p. 325-27) has been condensed to make space for the expanded bibliography and back matter. There is a new page about the Soyfoods Center (p. 333). The page "About the Authors" (autobiographical) has been expanded, and the photograph has been updated. "Sending Tofu to the Four Directions" (p. 335) and the inside rear cover have both been updated. Still contains 500 vegetarian recipes–both western and eastern style.

Note: A news release of 17 Aug. 1983 states: "The Book of Tofu, which introduced the Western world to tofu and inspired the founding of more than 200 tofu shops and soy dairies in North America, has sold 340,000 copies to date, making it the world's best-seller on this popular new 'protein source of the future.'" 6227. Shurtleff, William; Aoyagi, Akiko. 1983. History of soyfoods in China. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549. 19 p. Aug. Unpublished typescript. Available online at www.soyinfocenter.com.
• ***Summary:*** A comprehensive history of the subject. Contents: Introduction: Soyfoods widely used in all parts of China. Overview of Chinese food and diet. Animal products and soyfoods as protein sources in China. China's great cuisines and soyfoods. General characteristics of Chinese soyfoods industry. Information on soyfoods. Soy trade associations. Attitudes toward technology, modernization, and traditional soyfoods. Private enterprise, bureaucracy, and competing ministries. Availability of soyfoods. Address: Lafayette, California. Phone: 415-283-2991.

6228. *TV Guide.* 1983. Oh Madeline. Sept. 10. p. 52.
• ***Summary:*** Contains an interesting reference to tofu.

6229. Shurtleff, William. 1983. Re: Joint venture with K.S. Lo to have books by Shurtleff and Aoyagi translated into Chinese and sold in China. Letter to Mr. K.S. Lo, Hong Kong Soya Bean Products Co. Ltd., 41, Heung Yip Rd., Aberdeen, Hong Kong, Sept. 24. 2 p. Typed, with signature (carbon copy).
• ***Summary:*** "I was so pleased to see you again in San Francisco and to have found a way that our two companies can work together to mutual benefit. I am very excited about having our books translated into Chinese, starting with *Tofu & Soymilk Production.* If that is successful, I hope we can explore publication of our *Book of Tofu* in Chinese as well. This book also contains extensive information on soymilk.

"As I understand our agreement, we will proceed as follows: 1. You will find a quality translator and arrange to have the book translated at your expense." Three other basic ideas are listed.

Note: Mr. Lo took the book to various publishers in China and Hong Kong, but none were interested in publishing it. What could the Chinese possibly learn from a Westerner about making tofu or soymilk? So the project never got off the ground. Address: Director, Soyfoods Center, P.O. Box 234, Lafayette, California. Phone: 415-283-2991.

6230. **Product Name:** [Tofu Meatless Slices].
Foreign Name: Tofu–Bratschnitte.
Manufacturer's Name: Albert Hess Tofuhaus Rittersheim.
Manufacturer's Address: Hauptstrasse, D-6719 Rittersheim, West Germany. Phone: 06-352-3473.
Date of Introduction: 1983. September.
Ingredients: Incl. tofu, tamari, sea vegetables, carrots, and herbs.
Wt/Vol., Packaging, Price: 200 gm vacuum pack.
How Stored: Refrigerated.
New Product–Documentation: Form filled out by Albert Hess. 1988. Jan. 25. Leaflet. 1988. They make 300 kg/month. Form filled out by Albert Hess. 1988. Dec. 1. This product was introduced in Sept. 1983. Label. 1988, received. 2.5 by 4 inches. Black on orange. Self adhesive.

Label brought by Albert Hess. 1995. March 11. 2.5 by 4 inches. White and purple on yellow. An illustration shows a large personified cake of tofu, with smiling face and arms held out. Ingredients in 1995: Tofu, vegetables, herbs, algae, tamari.

6231. *Food Trade News* (*Ardmore, Pennsylvania*). 1983. New England Dairy sees future in Oriental tofu. Sept.
• ***Summary:*** In late 1982 Tomsun began to reposition its tofu from an Oriental position to a mainstream American position. Juan Metzger (a founder and former chairman of the original Dannon Yogurt Co.) and David Kirsch (former owner and president of Kirsch No-Cal Beverages) convinced Tom Timmins the repositioning was in the long-term best interests of Tomsun Tofu. In 1983, as part of the repositioning, the name of the product was changed from Soydairy Tofu to Tomsun Tofu; the latter has a slight hint of the Orient, but sounds more American and is easier to remember and to spell. The package is also entirely new. Tomsun now has 5 tofu products.

6232. Fruin, W. Mark; Shurtleff, William. 1983. A soyfoods training center network: Soyfoods technology transfer from the United States and Japan to East, Southeast, and South Asia. Palo Alto, California. 29 p. 28 cm.
• ***Summary:*** Contents: 1. Introduction. 2. Japan: Asia's leading source of soyfoods technology. 3. America: World's leading supplier of soybeans. 4. Soybeans in U.S.-Asian economic and trade relations. 5. The aims of this proposal. 6. Groups interested in expanding food uses of soybeans in Asia. 7. The Sri Lanka success story. 8. United States-Japan soyfoods technology transfer. 9. Project investigators, collaborators, advisors. 10. Conclusion.

Note: This Fulbright grant proposal was submitted on 28 Sept. 1983 to Ms. Jennifer Keefe, Program Officer, Council for International Exchange of Scholars, Eleven Dupont Circle, N.W., Washington, DC 20036. Accompanying it were CVs for Fruin and Shurtleff, plus letters supporting the project from the following collaborators: Kanji Tsuchiya (Japan), Gunnar Lynum (American Soybean Assoc. director for Japan), Tokuji Watanabe (Prof., Food Science Lab., Kyoritsu Women's Univ., Japan), Harold E. Kauffman (INTSOY Director, Urbana, Illinois), Michael A. Phillips (Director, Market Development, ASA, St. Louis, Missouri), and P.S. Bhatnagar (All India Coordinated Research Project on Soybean, G.B. Pant Univ. of Agriculture and Science, Pantnagar, UP, India). Address: 1. Prof., 4060 Amaranta Ave., Palo Alto, California 94306; 2. Director, Soyfoods

6233. **Product Name:** Green World Festive Frozen Dessert (Non-Dairy Tofu Ice Cream) [Carob, Carob Mint, Vanilla, Strawberry, Blueberry, Piña Colada, Raspberry, Banana-Coconut, Tofrutti].
Manufacturer's Name: Green World, Inc.
Manufacturer's Address: Mayfield Stage, Boise, ID 83706.
Date of Introduction: 1983. September.
Ingredients: Tofu, soymilk, honey, oil, carob, lecithin, vanilla.
Wt/Vol., Packaging, Price: 16 fluid oz (1 pint). Retails for $1.19 to $1.25.
How Stored: Frozen.
New Product–Documentation: Boise Statesman. 1984. June 6. Shurtleff & Aoyagi. 1985. Tofutti & Other Soy Ice Creams. p. 77. Interview with James Herrington. 1987. Dec. 30. The Tofrutti flavor, introduced in the fall of 1983, was before he had ever heard of Tofutti. It contained pineapple, orange, banana, and apricot. The first two flavors were carob and carob mint. This is their second most successful and profitable product after tofu.

6234. Leviton, Richard. 1983. Report on soyfoods research trip across America, September 1983. Colrain, Massachusetts. 8 p. Unpublished typescript.
• ***Summary:*** Visited or discusses: Grainaissance (makes amazake and mochi), Brightsong (Dik / Richard Rose), Sonoma Specialty Foods (California), Northern Soy (Rochester, New York), Southwest Soyfoods (Richard Jennings), White Wave (Steve Demos, Boulder, Colorado), Quong Hop & Co. (South San Francisco, California), Modern Fare (Loveland, Ohio), Soyfoods Unlimited (Valerie, Gary and John Robertson, San Leandro, California). Soyfoods Center (Lafayette, California), Soyfoods of America (Doug Fiske and Ken Lee, Los Angeles), Real Foods (Polk St., San Francisco), Tumaros (Los Angeles), Unicorn (Terry Dalton, Florida), Japantown and Rainbow Grocery (San Francisco), Berkeley Natural Grocer and Berkeley Co-op (Bob Gerner, California), Hinode Tofu Co., Edensoy, Farm Foods, New England Soy Dairy, and Nasoya (Leominster, Massachusetts). Legume (Gary & Chandri Barat, New York City), Lotos / Lotus Cafe (Greg Weaver, Rochester, New York).

NRRL (Hesseltine and Wang, Peoria, Illinois): Their work is in mixed starter culture fermentation, vitamin B-12 work. Japanese man from Tokyo to work one year on natto at NRRL, paid by Japanese government. B-12 can withstand some heat during cooking and the percentage of B-12 lost depends on the initial percentage present. Natto research: examine all Japanese publications for review article. Experiment using U.S. soybeans to make natto since the Japanese buy Chinese beans for their thinner seed coat. See what happens to the oil to protein ratio during fermentation. Natto as such has no possibilities in the U.S. as it is a slimy food with a rotten smell; hard to tolerate. There might be vitamin B-12 in natto produced by *Bacillus subtilis.* Koreans have done lots of B-12 research with kimchee and other pickled vegetables. Earl Swain died this summer of a heart attack at age 36. Natto research will help U.S. soybean exports. USDA bureaucrats are making it difficult for Dr. Hesseltine to do natto research. They have 65 objectives, but Dr. Wang's projects don't fit any of them clearly, so they won't mention "food" in their research outlines, just fermentation methods. Secretary of Agriculture John Block [served 1981-86 under President Ronald Regan] says the U.S. needs more ag exports and more basic information about crops uses, so he is in support of this natto research.

Out of business: Michiana Soyfoods, St. Ignatius shop, Sunshine Soy, Heartsong, probably Joy of Soy and a Korean shop in Salt Lake City, Utah.

Concerning soymilk: 10. In Oak Park, Illinois, a natural foods retailer says Edensoy outsells San-J by two to one. (Note: San-J imports "To-Neu Natural Soy Beverage" made in Japan by Kibun). Teenagers buy the carob Edensoy along with popcorn in the store, and use it as a soft drink. But most retailers say the Eden package [stand-up foil retort pouch] is a disaster; it is impossible to open without scissors, then if you squeeze, it sometimes spills out. San-J [in a Tetra Brik carton] is convenient but the taste is poor and the front graphics are confusing–too many words and images. According to Shurtleff, both are inferior products compared to Japan's best.

22. Concerning Edensoy at the NNFA show in Denver, Colorado: Mike Potter says "it went over great." He sold two container loads right away. People liked the package and the taste. About 4,000 people sampled it and were "generally amazed." The results were as good as they could want; it generated interest and excitement. Now they are setting up the distribution system. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

6235. Leviton, Richard. 1983. Soyfoods in the heartland: A colorful program on tofu and tempeh, by Richard Leviton (Poster). Colrain, Massachusetts. 1 p. Undated (Sept/Dec). 11 x 17 inches.
• ***Summary:*** This poster, printed with black ink on off-white paper, was used to advertise a series of programs that Richard Leviton gave in the Midwest in the fall of 1983. The text states: "Editor / publisher *Soyfoods* magazine, Executive Director Soyfoods Association of North America, & widely published author on soyfoods.

"At the program you will... Learn how to make tofu and tempeh at home.

"Learn how to set up your own kitchen soy deli–from tofu cheesecake to tempeh burgers.

"Enjoy a color slide show: over 200 stimulating images.

© Copyright Soyinfo Center 2013

"Meet soyfoods, today's No. 1 versatile, low cost protein.

"Discover nutrition and convenience in soyfoods–fast foods to gourmet.

"Sample delicious tofu or tempeh recipes."

Near the bottom are blank spaces to fill in the date, time, admission fee, place, and sponsored by.

Color photos show: Portrait of Richard Leviton with impish grin. A tempeh burger with all the trimmings. Address: 100 Heath Rd., Colrain, Massachusetts 01340.

6236. McDougall, John A.; McDougall, Mary A. 1983. The McDougall plan. New Century Publishers Inc., 220 Old New Brunswick Rd., Piscataway, NJ 08854. 340 p. Foreword by Nathan Pritikin (8/83). General index and recipe index. 24 cm. [804* ref]

• ***Summary:*** This carefully researched and documented book and cookbook argues convincingly in favor of a vegan diet that uses no animal products, that is low in fats, calories, and sodium, and rich in complex carbohydrates. Pages 89-90 give the percentage of calories from fats in various foods under 3 categories: low-fat vegetable foods (incl. oatmeal 16% of calories from fat, apple 9%, broccoli 9%), high-fat vegetable foods (incl. avocadoes 88% of calories from fat, almonds 82%, peanut butter 77%, sunflower seeds 76%, tofu 53%, soybeans 40%, wheat germ 27%, tempeh 25%), and animal foods (bacon 94%, t-bone steak 82%, frankfurters 80%, cheddar cheese 73%, egg 65%, tuna in oil 64%, milk [whole 3.5% fat] 49%, ice cream 49%, milk low-fat 31%, chicken [light-skinned] 18%, tuna in water 6%, buttermilk 3%, skim milk 2%).

Note: The author, however, argues repeatedly against the use of tofu and tempeh based on the "percentage of calories from fat" concept. His figures are correct but we and many nutritionists feel the basic concept, originally popularized by Nathan Pritikin, overlooks two key points: (1) the percentage of water in the food, and (2) the average serving size.

Page 198, in a section on rich [high fat] plant foods, states that tofu, tempeh, soybeans, textured vegetable protein (TVP), and miso contain excessive fat and most are high in calories. "The rich plant foods may account for a small portion of your daily food (less than 10 percent of your calories per day) but only after you have attained the level of health you are striving for. In general, these foods are more harmful than health-supporting. Never eat these foods if you have problems with your health that remain unsolved. If you begin using this group of foods and find that you are also gaining weight or getting back some of your old ailments, then stop eating these foods immediately."

Appendix I, p. 322-28 contains a table listing the percentage of calories from protein, fat, and carbohydrates in many foods. It also gives the calorie concentration (in calories per gram) for each food; foods with a low concentration aid in weight-loss programs. Tofu has only 0.72 calories per gram, and soy sprouts only 0.46; both are low. No soyfoods are used in the many recipes in this book.

Note: According to a colleague, John McDougall suffered a stroke at age 19, which led to much of his current interest in diet and health. He is not a Seventh-day Adventist. Address: 1. M.D. Both: Near Kailua Bay, Oahu, Hawaii.

6237. **Product Name:** Tofu, Soymilk, Soymilk Yogurt.
Manufacturer's Name: Merrickville Bakery & Tofu.
Manufacturer's Address: St. Lawrence Street, Merrickville, ONT, K0G 1N0, Canada. Phone: 613-269-3200.
Date of Introduction: 1983. September.
New Product–Documentation: Form filled out by Steven Rowat. He uses 2 lb/day of dry soybeans. The tofu shop does not have its own name. Started 15 Sept. 1983.

6238. New England Soy Dairy Inc. 1983. Tomsun Tofu. The perfect protein (Poster). 305 Wells St., Greenfield, MA 01301. 1 p. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.

• ***Summary:*** "Now nutritionally improved with natural calcium. The calcium in 4 oz. Tomsun Firm Tofu = 8 oz of cow's milk." Address: Greenfield, Massachusetts.

6239. **Product Name:** Tofu, and Soymilk.
Manufacturer's Name: Plenty Soyfoods.
Manufacturer's Address: P.O. Box 21, Mount Moorosi, Quthing District, Lesotho.
Date of Introduction: 1983. September
How Stored: Refrigerated.
New Product–Documentation: Talk with Peter Schweitzer of Plenty USA. 1994. June 7. Chuck Haren of Plenty helped to set up this soy dairy which had solar cells on the roof and was located inside a traditional, round Lesotho house with a thatched roof. Peter does not know whether or not it is still in operation.

Note: These are the earliest commercial soy products seen in Lesotho.

6240. Shurtleff, William; Aoyagi, Akiko. 1983. The book of miso. 2nd ed. Berkeley, California: Ten Speed Press. 278 p. Illust. by Akiko Aoyagi Shurtleff. Index. Sept. 28 cm. [223 ref]

• ***Summary:*** Contents: What is miso? Preface to the second edition. Preface to the first edition. Acknowledgments. Part I. Miso: Savory, High Protein Seasoning. 1. Soybeans, protein and world hunger. 2. Miso as a food. 3. The miracle of fermentation. 4. The varieties of miso: Regular Miso: Rice miso (red / aka, light-yellow / shinshu, mellow red / amakuchi akamiso, mellow beige / amakuchi tanshoku, mellow white / shiro koji, sweet red / edo or edo ama-miso, sweet white / Kyoto shiro miso), barley miso (karakuchi mugi, mellow barley / amakuchi mugi), soybean miso /

6248. Oda, Lorraine. 1983. Tofu enjoys increasing popularity. *Hawaii Herald.* Oct. 7. p. 5. Friday.
• ***Summary:*** Jack Tsuneyo Uyehara manages Aloha Tofu Factory Inc. His father, Kamesaburo, brought the plant in 1951 from a pig farmer, Kamehachi Shimabukuro, who used the okara for pig feed. Back then the factory was located on Dillingham Blvd. and produced only tofu and abura-age. Today the plant on Akepo Lane in Kalihi produces each week: 3,500 pieces of soft, firm, and mini-tofu, 6,000 pieces of aburage, 2,000 packages of natto, and enough atsu-age and nama-age to supply stores in Oahu. The four Uyehara brothers run the company.

Note: This is the earliest document seen (Dec. 2001) that contains industry or market statistics for natto by individual companies. Address: Editorial Asst., Honolulu.

6249. Leviton, Richard. 1983. Société Soy, France's largest tofu manufacturer (Document part). In: R. Leviton. 1983. Report of Trip to Europe with American Soybean Assoc. 82 p. Unpublished manuscript. See Oct. 16.
• ***Summary:*** This tofu plant in Cerny, the largest in France, is distinguished for its dairy style machinery innovations. Bernard Storup is the 4th generation of a cheesemaking family; his brother, a cheese specialist, went to cheese school. Societe Soy uses 6 workers two days a week to produce 5,000 lb/week of tofu and 10,000 Tofu Croques (burgers) in 6 flavors. Burger sales are rising rapidly, and may hit 20,000 by Dec. 1983. Both products are vacuum packed for a 3 week shelf life, refrigerated. They use the "tofou" spelling and Soy not soja for the company name so they could trademark both in France. They plan to replace their Takai W30-C system with dairy style equipment. The new equipment has curd tanks on a raised platform; the curds flow into a 4x12 foot stainless steel shallow bed trough. One or two large pneumatic presses press the whole lot, then it gets cut all at once. The company reached break-even after 12 months. Their tofu wholesales for 14 French francs/kg which is $0.80/lb. Breakeven is 2,000 lb/week of tofu. Bonneterre distributes 40% of their tofu. Bonneterre started in 1963 but in 1980 nearly went bankrupt and was acquired by a large dairy company [Triballat].

Societe Soy began production in Sept. 1982. France has at least 5 other tofu manufacturers, whose weekly output combined is about 3,500 lb. Paris, then the Marseilles, Mediterranean Coast, are the best markets in France for Tofu, and the typical customer is female, educated, age 25-35. The 13,000 Japanese and 200,000 Chinese in Paris can't get enough tofu. Paris has 3-5 small tofu producers, but sprouts are their main line. Societe Soy tofu has 12.3% protein, 24 day shelf life with hot packing at 60ºC, no cooling tank involved, pasteurization after vacuum packing in vertical steam tank. The company is energetic, professional, and quite aware of sanitary procedures and the need for appropriate packaging. The future of tofu is believed to lie in mixing it with other foods, possibly meat or cheese, or to follow the Asiatic example of using strong spices. Tofu needs a strong, memorable flavor. Americans have been too strict in their essentially vegetarian approach to formulating soyfoods.

For financing, Bernard got 25,000 francs then 60,000 francs from banks for a novel business plan competition that he won twice. His total initial investment was 250,000 francs or US$30,000; half of this came from the government. Address: Colrain, Massachusetts.

6250. Lindner, Anders. 1983. Swedish Better Butter is called Laette & Lagom (Interview). Conducted by William Shurtleff of Soyfoods Center, Oct. 20. 1 p. transcript.
• ***Summary:*** In America "Better-Butter" refers to a blend of 1 cup each vegetable oil and butter plus 2 tablespoons each water and dried skim milk, ¼ teaspoon lecithin, and ½ teaspoon salt (See *Laurel's Kitchen* 1976, p. 123). Easily made at home in minutes, it is an excellent substitute for margarine; the butter provides its unmatched flavor and the vegetable oil reduces the percentage of saturated fats–and the cost.

In Sweden such a product is sold commercially under the name Laette & Lagom–which means "Light and sufficient," or just right. In Japan, Morinaga makes Laette & Lagom under license. Address: STS, Singapore.

6251. **Product Name:** Nama-agé, and Atsu-agé.
Manufacturer's Name: Aloha Tofu Factory Inc.
Manufacturer's Address: 961 Akepo Lane, Honolulu, Oahu, Hawaii. Phone: 808-845-2669.
Date of Introduction: 1983. October.
New Product–Documentation: Oda. 1983. Hawaii Herald. Oct. 7. p. 5. "Tofu enjoys increasing popularity." Ad in Hawaii Herald. 1983. Oct. 7. "Make your favorite recipe even better with the best in soy bean products. Tofu, natto, aburage, konnyaku, okara, yakidofu. 961 Akepo Lane. Phone 845-2669."

6252. **Product Name:** TF-10 (Spray-Dried Tofu Powder) [High Protein, Regular Protein, or High Solubility].
Manufacturer's Name: Clofine Dairy Products, Inc.
Manufacturer's Address: P.O. Box 335 (1407 New Rd.), Linwood, NJ 08221. Phone: 800-441-1001.
Date of Introduction: 1983. October.
Ingredients: Soybeans, water, coagulant.
Wt/Vol., Packaging, Price: 150 lb multiwall paper bag.
How Stored: Shelf stable, 6-12 month shelf life.
Nutrition: Moisture 2-3%, fat 25.5%, protein 53.5%, ash 4.5%, fiber 1.2%, carbohydrates 14%.
New Product–Documentation: Spot in Food Processing. 1985. May. p. 46. This spray dried tofu is said to be produced from a fresh silken curd tofu. Note: Clofine is a dairy products company. Interview with Ed Pedrick. 1986. Feb. 11.

© Copyright Soyinfo Center 2013

"Our spray-dried tofu was first sold commercially in about February 1985." Note: Soyfoods Center is suspicious of this product. Numerous enquiries for information yield nothing. Spot in Prepared Foods. 1986. March. p. 177. Contains 52% protein and 25% fat; Cereal Foods World. 1986. March. "Spray-Dried Tofu." Kingma. Soya Newsletter. 1987. May/June. p. 1, 11. July/Aug. p. 2. Clofine estimates that it held 70% of the U.S. market for tofu powders in 1986, and that sales will triple in 1987. Ad in Soya Newsletter. 1988. Jan/Feb. p. 10. "Clofine Dairy and Food Products. World's First and Leading Source of Tofu Powder. Quality spray dried tofu and soymilk powder for food industry applications."

Talk with Richard Rose. 1987. Aug. 6. Clofine just bought a continuous cooker from Bean Machines. Richard is skeptical if this product is really tofu. They sell it for $0.80/lb, and they admit it contains soy protein isolate. Everyone is using the Clofine product in second generation products. It is cheaper than isolate.

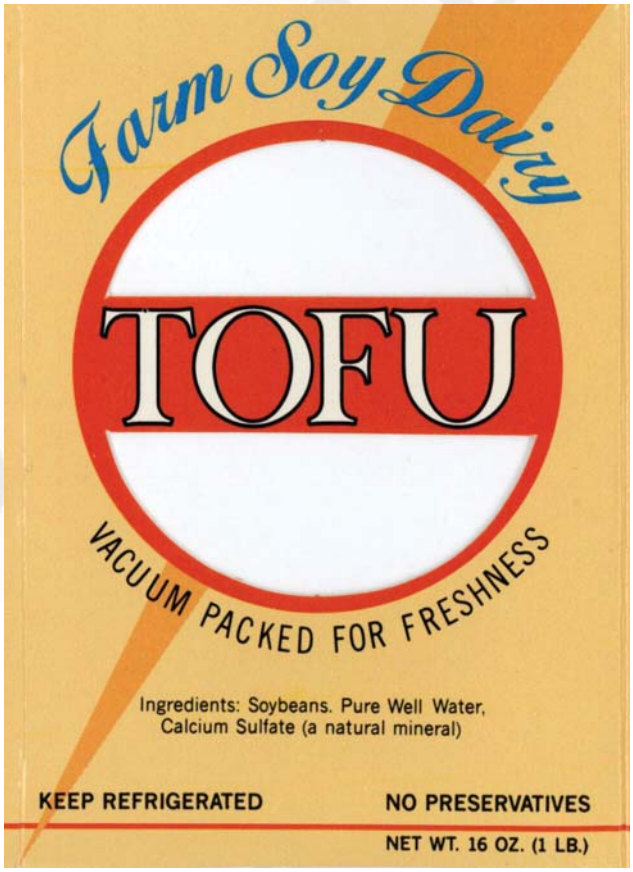
Talk with Clofine customer. 1988. Sept. 9. Clofine makes their spray-dried tofu starting with soy flour. They extract the soymilk, add a little calcium sulfate, then spray dry it. The finished product is very satisfactory, but it is not clear why the spray-dried tofu should cost 30-40% more than the spray-dried soymilk. Maybe it is simply that people are willing to pay more for spray-dried tofu.

Talk with Ed Pedrick. 1989. March 2. This product was launched in late 1983. The first commercial product in which it was used was Tofutti. Clofine dehulls soybeans and grinds them to a fine flour. They take this flour to the Armour Foods plant (Phone: 606-336-3922) a former cheese facility, now owned by ConAgra, Inc. in Springfield, Kentucky, where the soy protein is extracted from the flour and coagulated with calcium sulfate, then spray dried. The spray drying costs about $0.18-$0.20/lb of dry product, very low. The spray dried tofu now sells for an average of $1.50/lb, but as high as $1.95/lb in small quantities. Their spray dried soymilk sells for $0.70-$0.85/lb. One of their spray dried tofu products contains soy protein isolate, but this is for a specific application where the functionality of the isolate is needed. The spray dried tofu sells for about twice the price of the spray dried soymilk because the tofu requires additional processing and monitoring, and because the large demand will bear that price.

Ad in Soya Bluebook. 1992. p. 51. "Since 1982, Clofine Dairy & Food Products, Inc. has been a pioneer in the world's soyfood industry, being one of the first companies to commercially produce and sell spray-dried soymilk and tofu for use as a dairy substitute ingredient." Three dried tofu products are listed: Low-Fat Spray-Dried Tofu–TF-7 (2.0% fat max.), Full-Fat Spray-Dried Tofu–TF-15, Spray-Dried Tofu–TF-10.

6253. Dremann, Mary Carroll. 1983. Give tofu the freeze: For added texture & longer shelf life. *Vegetarian Times.* Oct. p. 42-43.
• ***Summary:*** Starts with a description of how to make frozen tofu at home, and then how to dry it. Recipes using frozen tofu: Tofu burritos. Salsa verde. Stuffed mushroom caps with tofu. Vegetarian tofu chili. Vegetarian eggrolls.

6254. **Product Name:** Farm Soy Dairy Tofu (Water Pack).
Manufacturer's Name: Farm Soy Dairy.
Manufacturer's Address: 156 Drakes Lane (P.O. Box 96), Summertown, TN 38483. Phone: 615-964-2529.
Date of Introduction: 1983. October.
Ingredients: Pure well water, soybeans, calcium sulfate.
Wt/Vol., Packaging, Price: 16 oz.
How Stored: Refrigerated.



New Product–Documentation: Label obtained in 1984. 4 inches diameter. Plastic lid. Green on clear plastic lid. The text below the ingredients reads: "Quality Tofu Since 1973." Talk with Michael Lee, owner. 1988. Oct. 12. This company, formerly a Farm co-operative, became a partnership (Michael Lee and Ron Maxen) in Oct. 1983, This is their main product, and they now make 10,000 to 12,0000 lb/month in both vacuum and water pack. Gross sales in 1987 were $110,000. Before that, about $65,000. Packaging is in Airlite high density polyurethane water-pack tubs. Talk with Robert Holzapfel. 1988. Oct. 22. "Farm Tofu" is now sold at Krogers in Tennessee and Alabama.

© Copyright Soyinfo Center 2013

Two Labels for Farm Soy Dairy Tofu sent Dec. 1988 by M. Lee, Box 96, Summertown, TN 38483. However this tofu is vacuum packed.

Letter (in reply to questions) from Barbara Elliott. 2013. April 10. She and her husband Thomas Elliott presently own the business; they bought it from Michael Lee. (1) "Tom decided to quit using the vacuum packaging when the outer box price went sky high. Tom & I have been water packing the tofu for as long as I can remember. It would require further search of check stubs to determine the exact date.

(2) "I would say that we took over the operation on July 1, 1991. Present owners are Barbara and Thomas Elliott (although the business is for sale and if we don't complete a sale this year, we will probably use up our beans and go out of business). On July 1, 1991, we made the soy milk and tofu. I'm not positive if we made the soy yogurt at that time or later. Again, would require further research and/ or ask Tom. We made our first purchase of certified organic soybeans in November of 1991, having used conventional beans before that.

(3) "We make soymilk only for on the Farm use as it has a short shelf life. More research needed to find out when we started making extra firm date and Soygurt. The Soygurt is a name we coined when designing a preprinted container for commercial sale of our plain, unsweetened soy yogurt. Soygurt is currently sold at the Whole Foods Market in Franklin, TN and Nashville. We just use a plain deli container and simple label for the soy yogurt here on the Farm. We had an account with the Fresh Market stores for several years. They requested and we developed a Soft Tofu at that time. We could still make it, but have not had much demand for it so haven't made it in awhile. We no longer supply the Fresh Market stores.

(4) "Yes, we are at the same location, which is now formally 116 Second Rd, Summertown, Tennessee. Yes it was originally a canning and freezing tent, which became a building over time. The building was in terrible disrepair when we took over. In addition to redoing much of the production equipment, we remodeled the building starting in November of 1992."

6255. Leviton, Richard. 1983. The market boom for soyfoods in the United States. Paper presented before the Euvepro General Assembly, Parma, Italy. Oct. 11. 13 p. Unpublished typescript on Soyfoods magazine letterhead..
• ***Summary:*** An excellent overview of the subject, presented with color slides. Contents: Introduction. The U.S. soyfoods industry and market. Eight reasons for the soyfoods boom in America. New U.S. soyfoods products. Ten trends in the soyfoods market. The European soyfoods boom (what it is and 4 steps to expand it). Conclusions. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

6256. Leviton, Richard. 1983. The soy deli case. *Whole Foods* (*Berkeley, California*). Oct. p. 27-28.
• ***Summary:*** "The Hinode Tofu Company of Los Angeles recently propelled the industry years by running a series of full page, full color ads for their branded tofu in regional editions of *Good Housekeeping, Weight Watchers, Runner's World, Bon Appetit,* and the Los Angeles *Times* (circulation: one million). Their ad included a 15¢ discount coupon (eight million were printed in total). Edward & Sons has been advertising its Miso-Cup instant soups and Miso+Plus Chive and Jalapeno dry miso dips in national trade and consumer publications. And Farm Foods, with their expanding line of Ice Bean soy ice creams (hard packed and soft-serve) recently launched a cooperative advertising and discount program in cooperation with retailers..."

The Real Food Store on Polk Street in San Francisco has introduced what is probably the first distinctly labeled soy case. It consists of a self-standing reach-in cooler filled with about 34 different soyfood products, from bulk and packaged tofu to soymilk and tempeh burgers.

"At press time, Bread & Circus, a leading natural foods retailer in Boston, was planning a week-long soy promotion in cooperation with a half dozen Bay State producers... Elsewhere, Tree of Life, Florida's $35 million distributor and manufacturer, designated August as Soyfoods Month and ran promotions in their 60-page monthly newsletter sent to their 2,000 accounts. Soyfoods were presented as that month's 'Super Specials' with 'deep pocket discount' for retailers, reports Morris Shriftman, vice president." Address: Colrain, Massachusetts.

6257. Leviton, Richard. 1983. Soyfoods in your kitchen: The variety is infinite! *Your Good Health: Review & Digest* 1(6):16-18. Oct.
• ***Summary:*** An introduction to tofu and tofu products, tofu main dishes, tofu desserts, tempeh, miso, soysage, "green soybean pods in plastic bags," soynuts, natto, Hamanatto, and yuba.

Gives recipe names and ideas for each soyfood type, but no actual recipes. Concludes with the thought: "If you remember this diversity of applications of tofu and tempeh... never again will you comment, 'Tofu is nice but it's just a bland white block.'" Address: Colrain, Massachusetts 01340.

6259. **Product Name:** [Tofu, and Tofu Tart/Cheesecake].
Foreign Name: Tofu, Tofu Taart.
Manufacturer's Name: Premier Foods p.v.b.a. (Marketer). Tofu made in the Netherlands by Heuschen.
Manufacturer's Address: Dietsestraat 197, 3000 Leuven, Belgium. Phone: 016.23.31.48.
Date of Introduction: 1983. October.
How Stored: Refrigerated.
New Product–Documentation: Poster (color, 17 by 23 inches). 1984. "Try our Tofu Tart. Low in calories. Rich in protein. Easily digestible. 100% natural. Tofu is made from soybeans, water, and nigari." The company claims to have a registered trademark on the word "Tofu." The poster shows 3 tofu tarts and a cake of tofu in a white plastic tub, all against a light blue background. One tart is plain, one is topped with strawberries and sliced, and the third is topped with sliced kiwi fruits and red berries.

Letter from Pauline Six-Chan, manager of Premier Foods p.v.b.a., to Michael Martin at American Soybean Assoc. in Brussels. 1984. May 3. "This year we have started campaigning actively to introduce the soya product 'tofu' or 'beancurd' on the Belgian market." 1. Premier Foods has developed original recipes, in both Dutch and French, adapted to the Belgian taste. Copies of these are regularly given to clients of the shop in Leuven, and to those who attend demonstrations. 2. In the very near future a big supermarket chain will start selling tofu in its various stores. This looks like an important breakthrough. 3. Premier Foods has developed a Tofu Tart, which has met with great success so far. 4. 200 color posters presenting tofu and the tofu tart have been printed and will be given to supermarkets who sell the products. 5. Premier Foods has developed a tofu salad which it hopes to launch soon. She asks the ASA for financial assistance to help her young firm get started.

Talk with Pauline Six-Chan. 1984. Aug. 18. In 1982 she started Premier Foods to focus on foods that were international, fresh, and healthy. Since Oct. 1983 the company as been very active in presenting tofu and tofu products to the Belgian public and to buyers at supermarkets, cafeterias, etc. She buys all of her tofu from Heuschen in the Netherlands, and has an exclusive distribution contract for Belgium with him. She is most interested in developing second generation tofu products. She already has a tofu tart/cheesecake.

6260. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Soja d'Oc.
Manufacturer's Address: Saint Paul de Mamiac, 81140 Penne, France. Phone: 63.56.34.09.
Date of Introduction: 1983. October.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1983. Jan. 17. No company name given but two similar listings. Owner is Olivier Attié. Addresses are: Presb. St. Paul de Marmiac, Penne du Tarn, Castelnau, Montmr. Or, Presbytere de St. Paul d'Mammiac, 81140 Pene du Tarn, Par Castelnau.

Richard Leviton. 1983. Oct. 16. Trip to Europe with American Soybean Assoc. Alain Lacombe makes about 200-300 lb/week of tofu at this company. Le Compas. 1986. March-April. p. 32.

Letter from Patrick Roger of Arts. 1985. June 12. Sojadoc (Contact Jacques Isnard; Phone (63) 931015) is at the temporary address St. Paul de Mamiac 81140 Penne. They make Tofu brut, and Tofu cuisiné (with vegetables, with fish).

Letter from Bernard Storup of Société Soy. 1989. March 3. In Dec. 1981 Olivier Attié began to make tofu on his farm in a small village named Penne-d'Agenais, 47140 in southwest France. With 3 friends, he decided to start a small company to sell tofu in shops and market places, so they founded Sojadoc S.A.R.L. The group split up rapidly, and only 2 of them, Alain Lacombe and Jacques Isnard, went on with the business, which began operation at the end of 1983. In 1985 they had financial problems–they were making only plain tofu and distributing it locally.

Note: This is the earliest record seen (April 2001) concerning Sojadoc of France.

6261. *Soyanews* (*Sri Lanka*). 1983. How to make tofu with soya flour. 6(2):2. Oct.
• ***Summary:*** The process (which is described) is an American contribution to the art of making tofu.

6262. *Sunset* (*Menlo Park, California*). 1983. Tofu pinch-hits for cottage cheese. 170:226. Oct.
• ***Summary:*** Uses silken tofu in a Tofu luncheon salad recipe, and regular tofu in White tofu with dark dressing (incl. soy sauce). Two photos accompany the recipes.

6263. *Tetra News* (*Singapore*). 1983. Soya bean: The meat of the Orient. Oct. p. 6-7.
• ***Summary:*** For centuries, the soya bean has been the king of beans in East Asia. "Almost every Asian household eats the bean in various guises–as soya milk, tofu, soya sauce or beancurd." It makes sense to eat the soya bean–it's one of the least expensive sources of high-quality protein.

"One leading soya bean drink producer in Malaysia and Singapore is Yeo Hiap Seng. For years, this company has been distributing soya bean drink in bottles besides marketing other traditional popular soft drinks like chrysanthemum and herb-tea.

"What Yeo Hiap Seng has developed is a set of soft drinks which are traditionally close to the people who have grown up with these drinks which they used to buy from street hawkers. 'What we have also done.' says Mr Francis Lim, Group Marketing Manager at Yeo's, 'is modernise

© Copyright Soyinfo Center 2013

production and pack them in bottles and packages.'

"Yeo Hiap Seng also distributes a vitaminised soya bean drink in Tetra Brik Aseptic cartons and sold under the brand name Vitabean. `What we are giving consumers is a soft drink with a plus–with vitamins added to make it a nutritious drink. And no preservatives are used,' Mr Lim stresses.

"While Yeo's bottled soya bean drink is produced for on-premise selling. Vitabean packages cater more to home consumers. 'Packages are lighter, disposable and very convenient for consumers living in highrises,' Mr Lim says. Yeo's Vitabean is exported to Hong Kong, UK, Australia, Canada and the USA.

"While companies like Yeo Hiap Seng market their soya bean beverage as a soft drink, others like Nestle market their product, Bonus, as soya milk. This is not purely a case of terminology. Legally, a soya beverage can only be marketed as soyamilk if it contains at least two per cent protein by weight of volume.

"And in their quests for product individuality, manufacturers have come up with a sweet list of flavours for their soya drinks. For example. President Enterprises Corporation in Taiwan produces soya drink in almond, peanut, coconut, egg, strawberry, chocolate, apple and orange flavours. One of the two flavours Nestle chose for their soya milk is fragrant pandan. There is also a sesame-flavoured soya drink marketed by Wei Chuan Foods Corporation in Taiwan.

"In whatever flavour, soya drink or milk makes a better soft drink in terms of value for money compared to the empty calories of conventional soft drinks."

Photos show: (1) A Tetra Brik package of Morinaga Ever Fresh Silken Tofu. (2) About 30 different East Asian soymilk products in Tetra Brik cartons.

• ***Summary:*** A comprehensive history of the subject. Contents: Introduction: Acknowledgement of Ron Kotzsch. The roots of macrobiotics: *Yellow Emperor's Classic of Internal Medicine*, Shinto classics, Ekiken Kaibara (1630-1714), Nanboku Mizuno (late 1700's–early 1800's), Sagen Ishizuka (1850-1910), Manabu Nishibata. The life of George Ohsawa (1893-1966): To Paris 1929-36, return to Japan and World War II, Internationalism 1946-53, ran school Centre Ignoramus, "world journey" 1953 to India, Africa, then Paris, started Muso Shokuhin (macrobiotic food company) in Osaka, Japan, in 1959, work in Europe 1956-66, earliest reference seen to soy (miso) in 1956, first visit to New York City Dec. 1959, post-visit institutions, second visit 1960, first American macrobiotic summer camp on Long Island, exodus to Chico, California, Aug. 1961 to escape feared nuclear war, establishment of Chico-San, move of Michio and Aveline Kushi to Boston in 1963, *Zen Cookery* 1963, *Zen Macrobiotics* second edition 1965, growth of the movement, Beth Ann Simon's death blamed on macrobiotics in 1965, response of U.S. Food and Drug Administration is to close N.Y. Ohsawa Foundation, Ohsawa's general macrobiotic teaching, view of Western civilization as one in crisis, with fundamental biological change required to improve it, death in 1966 in Tokyo at age 72 of cardiac failure, seen as sage by his followers, seen as inconsistent crackpot by his critics, work carried on by wife Lima and by his students. Development of macrobiotics in Boston: Kushi's lectures and classes from 1965, early food sales from house, Erewhon's start in 1966 and subsequent growth, establishment of organic suppliers in the U.S., first imports from Japan 1968, 1970 natural foods boom, National Food Distributors Association, *East West Journal,* Autumn Press founded in Japan by macrobiotic student from Boston, Boston institutes, centers, and foundations from 1972 on, increasing popularity of soyfoods (tofu, tempeh, and miso) in Boston, Erewhon from 1973 to bankruptcy in 1981 and sale to Ronald Rossetti in 1982. Development of macrobiotics in New York City: Void after departure of Aihara group and Kushis, establishment of Infinity Foods in mid-1960's, Michel Abehsera's restaurants, cookbooks, and tour. Development of macrobiotics in California: Influence of Chico-San on natural foods movement to 1970, Lundberg rice 1968-69, Yamazaki miso and shoyu 1970, 1972 fire in Chico-San warehouse, educational activities and institutions, growth of Chico-San, Noboru Muramoto. Nutritional views of macrobiotic diets: General critical attitude from 1965 to 1977, not countered by macrobiotic leaders, scientific studies pro and con, specific critique of the diet, turnaround in attitude since 1977 (*Dietary Goals* published by U.S. Senate's McGovern Committee), Dr. Mendelsohn, Nathan Pritikin, cancer cures and Anthony Sattilaro (1980). Macrobiotics in Europe and Latin America: First European company Lima N.V., other distributors, centers, publications, tours, active in South America since 1954. A major contribution: Type of overall influence on soyfoods, number of followers in 1981. Address: Lafayette, California. Phone: 415-283-2991.

6270. Shurtleff, William; Aoyagi, Akiko. 1983. George Ohsawa and the macrobiotic movement: Noboru Muramoto (Document part). Soyfoods Center, P.O. Box 234, Lafayette, CA 94549. 46 p. See p. 39-40. Nov. 10. 28 cm. Unpublished typescript.
• ***Summary:*** "In June 1971 Noboru Muramoto emigrated to America from Japan and lived with the Aiharas in San Francisco at GOMF. In Japan he had studied Chinese literature and philosophy at Tohoku University and Kanazawa University, then began his own study and practice of herbal medicine. He had begun studying Ohsawa's writings in 1942, then studied with Ohsawa after 1964, while running a family business cleaning the cotton from futons. In 1973 he gave a series of lectures in New York which were published that year as the popular book, *Healing Ourselves* (Avon/Swan House). Many uses of miso and natural shoyu were given; soybeans and tofu were not recommended in the book, except that tofu was used in making poultice-like 'plasters' for use in healing. In 1974 Muramoto started Rising Sun, a macrobiotic storefront containing the Herb Tea Co. in San Francisco. Here he gave classes on making miso and shoyu. In November 1976 he acquired Top of the World Ranch on 140 acres of land near Glen Ellen, California, and established Asunaro Institute, a residential program of macrobiotic studies. He also published a newsletter 'Asunaro Notes.' At Asunaro he set up a regular shop for making miso and shoyu, complete with a nice koji incubation room. Many unique and American-style misos were developed, including some made with peanuts, garbanzos (chickpeas), azuki beans, and even natto. A number of Americans apprenticed at the miso-shoyu school. A nice article about the school, 'Making Miso in America,' appeared in the *East West Journal* (Lachman 1978). In March 1979 Muramoto displayed his miso and shoyu equipment and samples of his products at the famous New Earth Exposition in San Francisco. He also sold these products at Rising Sun, and some customers swore that they were the best in America."

Note: On 11 Jan. 1976 William Shurtleff attended a class on how to make miso at Rising Sun (Judah Street, San Francisco), given by Noboru Muramoto. Jimmy Udesky was there, as were about 15 other people.

On 19 Sept. 1977 William Shurtleff and Akiko Aoyagi visited Muramoto sensei at his place, Asunaro, in Glen Ellen, California. He makes miso there and teaches miso making.

Shurtleff interviews him about his life and history of interest in macrobiotics and soyfoods. We stay overnight and help him the next morning with royalty problems connected with his book *Healing Ourselves;* he is quite sure he is not being paid the royalties due based on his contract with the publisher. Address: Lafayette, California. Phone: 415-283-2991.

6271. Shurtleff, William. 1983. Re: Concern over deceptive use of the word "tofu" in promoting Tofutti, when it contains no tofu. Letter to David Mintz of Tofu Time Inc., Nov. 11. 3 p. Typed, with signature on letterhead.
• ***Summary:*** This letter was written less than 1 month before David Mintz and Tofu Time planned to have their first public stock offering. Shurtleff, who has learned from a tofu manufacturer that Tofutti has been made for roughly 6 months without any tofu, begins by thanking Mintz for all the work he has done over the years to introduce tofu and other soyfoods to America. "Recently, however, like many other people in our industry who have contacted me, I have become very concerned about what you are doing. As I understand it (and please correct me if I am wrong), some time ago you stopped using tofu as an ingredient in your ice cream. Yet you continue to state and to lead others, many others, to believe that your product is still made with tofu as the primary ingredient. It is this ongoing activity of deliberately preying on the good image of tofu to deceive the public that concerns me deeply, for when it is exposed by the media, as it inevitably will be, it will create a scandal that will hurt not only you, but our entire industry and tofu's public image as well.

"Your activities to make others believe that your product contains tofu have been manifold. At trade shows you are passing out promotional literature that talks about tofu. On Good Morning America TV and National Public Radio you and your interviewers talked extensively about tofu, implying to millions of people that your product contains it. Most of the articles in my files about your product imply that it contains tofu, and some say specifically that it does. On the ingredients listing for your product displayed on the side of soft serve machines, 'tofu isolated soy protein' (a term which you must have coined) is prominently written. You continue to distribute to places serving your products a flyer that was written years ago stating that your product is made with 'tofu dessert base' and honey... which it no longer is. The name of your product (Tofutti) and the name of your company (Tofu Times) all combine to create the unmistakable impression that what you are doing is intimately involved with tofu... when in fact it is not. Are you deliberately trying to misrepresent your product and to deceive the public, David?"

Shurtleff then discusses the differences between tofu and isolated soy proteins. As long as Tofutti contains no tofu (or even a token amount), he encourages Mintz to (1) Stop mentioning tofu in his promotional materials and public appearances, (2) Drop the word *tofu* from all ingredient listings in which it appears, and (3) Drop the word *tofu* from the name of name of his product (Tofutti) and the name of his company (Tofu Time) within 6 months. If Mintz fails to take corrective action, Shurtleff plans to propose that the Soyfoods Association notify the Food and Drug Administration (FDA), Federal Trade Commission (FTC), and SEC (Securities and Exchange Commission; which could jeopardize Mintz's forthcoming stock offering), then publish an exposé in *Soyfoods* magazine. The letter closes: "I hope you will clean up your act before it hurts us all." Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

6272. Chen, Steve. 1983. Re: Soymilk, soy sprouts, and tofu in Taiwan. Letter to William Shurtleff at Soyfoods Center, Nov. 16. 1 p. Typed, with signature.
• ***Summary:*** It is estimated that in 1982 Taiwan used 26,250 tonnes (metric tons) of soybeans to make 262,500 tonnes of soymilk. Thus 1 kg of soybeans yields 10 kg of soymilk. This amount of soymilk is 5.5 times as much as the amount of cow's milk produced in Taiwan (47,740 tonnes). Taiwan's population is 18.5 million. The per capita consumption of soymilk is estimated at 14.2 kg in 1982.

There is no large manufacturer of soy sprouts in Taiwan. Tai-yi is the brand name of the packaged tofu made by the Nan-Yang Tofu Plant.

"Thanks again for your kind and warm hospitality which you and Akiko extended me during my last visit to your Soyfoods Center." Address: Country Director, American Soybean Assoc., P.O. Box 3512, Taipei, Taiwan. Phone: 7815880.

6273. Soyfoods Center. 1983. Catalog: Publications & materials by William Shurtleff & Akiko Aoyagi [mail order]. P.O. Box 234, Lafayette, CA 94549. 20 panels. Nov. 18.
• ***Summary:*** This catalog, folded like a road map, is printed with reddish brown and light blue ink on white paper. Address: Lafayette, California. Phone: 415-283-3161.

6274. Leviton, Richard. 1983. Short summary of trip to Europe sponsored by the American Soybean Association (Interview). *SoyaScan Notes.* Nov. 19. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The trip was very good, and Richard feels ASA was favorably impressed with his work. Richard did 6 programs, including 5 for ASA in Paris (France), Milan (Italy), Budapest (Hungary, with Tom Brennan from Vienna), and the Netherlands (small seminar for 10 people). He delivered a speech before 150 people at the Euvepro General Assembly in Parma, Italy. In Switzerland he visited Soyana and Verena Krieger.

ASA says they want to sponsor a conference and a newsletter. Richard will be chair of the conference, which

© Copyright Soyinfo Center 2013

will be held in late Sept. 1984 in Amsterdam. They will get more sponsors, put up all up-front costs, and ensure plenty of media coverage. Richard can keep all the profits. The newsletter on soyfoods, funded by ASA, will be sent to 200 people 3-4 times a year.

The most interesting general concept was that virtually all tofu in Europe is vacuum packed; he saw no water-packed tofu. Lima Foods packs their tofu in glass jars. Witte Wonder, Soyana, Manna, and Cauldron Foods (Bristol) sell pasteurized, unrefrigerated tofu dips and spreads in jars. They have a good shelf life without preservatives, and no spongy consistency. Some are quite amazing (like sweet curry)–far better than any products we have in the USA. Nutana has 3 tofu entrees (noodles, chili, in cans like Loma Linda); the word "Tofu" appears on the label. Address: Colrain, Massachusetts.

6275. Shurtleff, William; Aoyagi, Akiko. 1983. Dr. D.W. Harrison and Africa Basic Foods: History of work with soyfoods. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549. 10 p. Nov. 22. Unpublished typescript. Available online at www.soyinfocenter.com.
• ***Summary:*** A comprehensive history of the subject. D.W. Harrison is an African-American physician and a Seventh-day Adventist. Contents: Introduction. Early years: Birth and education, army, first trip to Africa, attraction of Ghana's Nkrumah, Meals for Millions. Work in Ghana (1960-63): contract as surgeon, start of farm machinery company, start of bakery and small school, return to U.S. in 1963. Work in Uganda (1964-71): Attractions of Uganda, hired by Uganda government, establishment of Africa Basic Foods (ABF, 1965), 3 objectives, expansion of soybean production, early food production, home-roasted soy flour, grants, equipment, church ties, 3 early products, marketing and demonstrations, end of government contract, start of private medical practice, Worthington Foods purchase of ABF stock and loan of Sam Yoshimura, new tofu and soymilk products, soynuts and soynut butter, Wenger's extruder, speech to United Nations Industrial Development Organization (1969), balance of business and service, Idi Amin and 1970's instability to present. Work in Kenya (1974-82): Move to Kisii, work with soybean production, start of New Soya Enterprises. Summary. Address: Lafayette, California. Phone: 415-283-2991.

6276. Coakley, Michael. 1983. Nation / world: What burns Americans? Their heartburn. *Chicago Tribune.* Nov. 23. p. D6, or p. 6.
• ***Summary:*** The writer, on assignment, is studying America by traveling from Los Angeles [California] to New York by bus. Looking for a decent meal in Columbus, Ohio, he found a Chinese restaurant named Ho Toy on a side street. "It was one of those typical Formica-laden Cantonese establishments with about 300 entrees, most with names like fung mee har or char shui dow foo" [tofu].

6277. Bates, Cynthia. 1983. Re: Thanks for new editions of *The Book of Tofu* and *The Book of Miso.* Letter to William Shurtleff at Soyfoods Center, Nov. 25. 2 p. Handwritten, with signature on letterhead.
• ***Summary:*** Cynthia would like to make some miso this winter in some big wooden barrels, but they are moving the tempeh shop, so they'll have to wait and see. Address: 156 Drakes Lane, Summertown, Tennessee 38483. Phone: (615) 964-3584.

6278. Barat, Gary. 1983. Re: Soyfoods Association members invited to participate in Soyfoods Pavilion '84 at Natural Foods Expo in Anaheim, California. Letter to members of Soyfoods Association, Nov. 28. 1 p. Typed, with signature on letterhead.
• ***Summary:*** "I am happy to announce that the Soyfoods Pavilion '84 is rapidly taking form. We now have approximately 15 companies participating in our pavilion area at the Natural Foods Expo in Anaheim, California. In addition to the pavilion, we have commitment from approximately 20 manufacturers for ad space in the *Natural Foods Merchandiser* March issue." Address: President, Soyfoods Assoc., P.O. Box 36, New York, NY 10009. Phone: 212-254-6698.

6279. Leviton, Richard. 1983. Long summary of trip to Europe sponsored by the American Soybean Association (Interview). *SoyaScan Notes.* Nov. 29. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Discusses: Euvepro in Italy, ASA in Italy, Alpro / Vandemoortele, British Arkady, the confusion of mung beans and soybeans, tofu made from soy protein isolates that doesn't develop a spongy texture when frozen, regulatory restrictions, Bernard Storup, tofu burgers, Prolait, Le Bol en Bois, ASA soybean program in England, desire in Eastern Europe for more meat, the many small private businesses in Hungary, Soyana's excellent products (Daenzer makes 5,000 lb/week of tofu in Switzerland), the Reformhaus chain, Vietnamese tofu shop in Dornach, less refrigeration at the distribution and retail levels in Europe has led to new packaging, soyfoods have started to appear in the big international food trade shows in Europe (e.g. ANUGA). Witte Wonder opened in 1981, now makes 1,000 lb/week of seitan. Cauldron Foods (UK) makes mostly tofu burgers, and has a lot of good technical innovations such as control panels. Cauldron also makes a fermented tofu spread. Dragon & Phoenix (UK) makes several tons of tofu a day. In July Wolfgang Furth-Kuby and Lucas Kelterborn (Germany) published the first issue of a European soyfoods newsletter titled *Rundbrief.* Paul Jones (UK) has 2 plants and makes 5,000 lb/week of tofu. One man from Cauldron Foods was Paul Jones' original partner. Full of Beans also makes miso.

© Copyright Soyinfo Center 2013

Oct. 28. "I have an all morning meeting at ASA's headquarters in Brussels, Belgium, with Dennis Blankenship, Rita Batens, Roger Leysen, and Michael Martin. It is proposed that I chair the 1984 First European Soyfoods Conference to be held in late September, probably in Amsterdam. ASA agrees to be a sponsor and to help secure another 6 or so sponsors. ASA also agreed to finance the production and mailing of a bi-monthly European Soyfoods Newsletter." Address: Colrain, Massachusetts.

6280. *SoyaScan Notes.* 1983. Recent changes on The Farm in Tennessee: The Changeover (Overview). Nov. 29. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** This overview was compiled after talks with several long-time members of The Farm in Tennessee. Many people have left The Farm. The population has dropped to about 700 from a peak of about 1,300 several years ago. Some feel that "the boat is sinking." The farm is now in a period of transition called "the Changeover." The reasons for this change in basic economic structure are quite complicated, but a major reason is the large population of people who did not have a paying job. Formerly everything on The Farm was collectively owned (there was no private property), and all income went into a common pool to pay the community's expenses. At the end of the changeover, each community member will be required to pay their own way, including monthly dues voted by the members for debt reduction plus ongoing community services: roads, water, fuel, taxes, bookkeeping, etc. However, the land and all other non-business community assets will continue to be held in common.

There are two types of work on The Farm: (1) "Service jobs" such as working on the Farm as a teacher, in the Soy Dairy, as a mechanic, etc. at a job which provides valuable services to Farm members but does not generate any income. (2) Money-making jobs, mostly off The Farm, and especially in construction–a construction crew of 40-50 skilled men brought in the majority of The Farm's income. The basic problem is that although everyone works every day, not enough people are making money. Summertown, in Lewis County, is in one of the poorer, rural parts of Tennessee, and there are not many paying jobs available in Summertown or the surrounding area.

The Farm worked very hard to create its own companies (such as Farm Foods and The Book Publishing Co.) that would employ members and earn money to support the community, but it took time for these companies to become profitable and, since they were collectively owned, they could not attract investors. When the changeover started, people working in community-owned businesses were given those businesses. For example, those working in the soy dairy when the changeover started, now owned it. They could sell the soyfoods they made both to community members and off The Farm; they shared the profits from their enterprise, and each used that income to buy whatever they needed.

Many Farm members agree that a basic part of the problem was The Farm's great generosity. They generously allowed almost everybody who came to the gate to join the Farm. Stephen went on tours in buses to talk about vital issues of the day; The Band went with him and neither ever charged people to hear them. The community generously helped those in need around the world, in part through Plenty a relief organization created on The Farm in 1974, and with much volunteer labor.

Over the years The Farm had to borrow money to pay its bills–just like most American families and businesses. The amount borrowed was not unreasonable given the size of the community, however these loans and the interest on them eventually became so large that they were the main catalyst for the changeover. A large percentage of the early dues went toward debt reduction, enabling The Farm to pay off its total debt of $1.2 million in a little more than three years.

Many of those who left were the ones making money; some of them got tired of supporting the others.

The big change from a collective to a cooperative took place in mid-October 1983. Many people who had given all their money and personal possessions to The Farm and imagined living their entire lives there felt considerable bitterness and anguish; they often left with nothing but good memories and had begin to hunt for a job. People are now employed at and paid by The Book Publishing Co., Farm Foods, Solar Electronics, and Satellite Dishes. Things that used to be given away for free on The Farm (such as soyfoods made at the Soy Dairy) are now bought and sold. People can start their own business on The Farm. Its the "real world" now. The Farm still has big debts and could even dissolve. Big medical bills hurt The Farm. Plenty is totally independent of The Farm financially, and has grown much bigger. The Farm Soy Dairy has trained several hundred people from Third World countries over the years.

Plenty Canada is in Lanark, Ontario. They have a little basement tofu and tempeh shop, and want to make it a soyfoods training center.

6281. *Presse* (*La*) (*Montreal, QUE, Canada*). 1983. Le "tofu" connait une faveur grandissante [Tofu wins growing favor]. Nov. 30. p. E-12. [Fre]
• ***Summary:*** Discusses Yvon Tremblay and Frances Boyte. A photo shows a package of Vitasoy. Address: Canada.

6282. **Product Name:** Tofu Spreads [Tofu Vegetable, Tofu Garlic Chive, Tofu Fruit and Nut].
Manufacturer's Name: Blue Twine Farm.
Manufacturer's Address: Polly Dan Road, Burlington, CT 06013. Phone: 203-589-3593.
Date of Introduction: 1983. November.
Ingredients: Tofu Vegetable: Tofu, cream cheese, radishes

© Copyright Soyinfo Center 2013

(Israeli or Japanese), onions (Egyptian or Japanese), Italian parsley, mayonnaise, horseradish, dill, sea salt.
New Product–Documentation: Talk with Cipah Shapiro. 1988. Dec. 28. She has been an organic gardener for many years. She started this business making these products in the fall (Nov.) of 1983. Most contain cheeses [such as cream cheese]. Two of her products are sold year-round (Tofu La Mexicana and Smoked Bluefish), then there are six new flavors each season, for a total of 26 products a year. All labels contain a calorie count.

Letter with Labels sent by Cipah Shapiro. 1988. Dec. 29. Gives the date that each product was introduced. Each label is 4 inches diameter, self-adhesive, printed with black and blue ink on white paper. Across the top of each is written: "Four Seasons Dips and Spreads."

Ingredients for Tofu Garlic Chive: Tofu, cream cheese, garlic, chives, anchovies, capers, horseradish, spices.

Ingredients for Tofu Fruit & Nut: Tofu, cream cheese, unsweetened pineapple, unsalted roasted cashews, shredded coconut, maple syrup, natural flavorings, sea salt.

"By early summer of this year (1988) I made the Tofu Veggie available because people had been asking for 'something' without dairy. It has proved to be very popular, and doing this with my own organic vegetables year-round gives it a freshness and crunch that makes it very interesting."

Includes an article from the *Register Citizen* (Torrington, Connecticut), 1988. Aug. 31. p. 6. "Area woman's home business based on tofu." The article says: "The tofumania began in fall 1983, Shapiro said, but she did not become 'serious' until about two and a half years ago" [i.e., until about May 1986].

6283. **Product Name:** Fearn Tofu Mixes [Breakfast Patty Mix, Sesame Burger Mix, Brazil Nut Burger Mix, or Sunflower Burger Mix].
Manufacturer's Name: Fearn Natural Foods.
Manufacturer's Address: -
Date of Introduction: 1983. November.
New Product–Documentation: Spot with photo in Whole Foods. 1983. Nov. "Fearn Tofu Mixes." "Four new Burger Mixes from Fearn Foods are low-calorie alternatives to meat burgers, are high in protein and fiber and easy to prepare... Mixes cup for cup with mashed tofu."

6284. Fitzell, Phil. 1983. Food [Mark Brawerman, Pacific Trading, and Jolly Licks]. *Venture*. Nov. p. 54-57.
• ***Summary:*** Tells how Mark Brawerman, age 35, developed and distributes Jolly Licks, a soy-based ice cream. "When two frozen food distributors declined to handle the product, in July, 1980, he rented a van and hired drivers to deliver his ice cream. Within two months, claims the entrepreneur, 175 health food stores in the San Francisco area were buying Jolly Licks. Brawerman incorporated Pacific Trading, San Francisco, to distribute that product and a line of 100 different Living Lightly soy-related natural foods (mostly cheeses) as well as to distribute other manufacturers' brands, including yogurt and bulk cheese.

"Brawerman estimates he poured between $50,000 and $75,000 into his distribution operation, borrowing from his family in addition to using his own capital. Brawerman projects Living Lightly food sales for 1983 at more than $1 million, and close to $2 million for distribution sales, including business from other manufacturers' brands. To handle his burgeoning business, Brawerman moved into 10,000 sq. ft. of a 35,700-sq.-ft. warehouse." Two photos show Brawerman.

6285. **Product Name:** Tofu Turkee (Meatless Turkey Made with Tofu).
Manufacturer's Name: Garden of Eatin' (Formulator and Distributor).
Manufacturer's Address: 5300 Santa Monica Blvd., Los Angeles, CA 90029.
Date of Introduction: 1983. November.
Ingredients: Tofu (coagulated with calcium-sulfate), soy sauce, soy oil, vinegar, honey, herbs, hickory smoke.
Wt/Vol., Packaging, Price: 9 oz.
How Stored: Refrigerated.

New Product–Documentation: Label. 1983. 5.5 by 2.75 inches. Paper. Black on tan. "100% Vegetarian." Soyfoods Newsletter. 1984. Jan. p. 1. A firm slab of the tofu is marinated then baked.

6286. Jackson, Vicki. 1983. Squirrels vegetarian cook book. William Brooks Queensland, 921 Kingsford Smith Drive, Eagle Farm, Brisbane 4007, Queensland, Australia. 143 p. Illust. by Vicki Jackson. Index. Nov. 29 cm. 2nd ed. 1984.
• ***Summary:*** This hand-lettered cookbook was written for Squirrels Vegetarian Restaurant, Corner Melbourne & Edmonstone Streets, South Brisbane. The owners, Bronwyn Moses and Diana Mitchell, plan to open Squirrels on the Park, a second restaurant at 685 South Dowling St., Moore Park, Sydney, by Sept. 1984.

Soy-related recipes include: Chinese tofu soup (p. 12). Broccoli-pasta salad (with Soyaroni pasta, p. 30). Soyaroni marinaria [marinara?] (p. 52). Saucy soy stew (with cooked

© Copyright Soyinfo Center 2013

soybeans, p. 67). Tofu & peppercorn strudel (p. 79). About tofu (p. 86). Tofu satays with peanut sauce (p. 87). Battered tofu in sweet & sour sauce (p. 88). Tofu & peanut sauce (p. 89). Tofu & veggie curry (p. 90). Tofu & mushroom on spinach pasta (p. 91). Tofu & spinach loaf (p. 92). Tofu Chinese style (p. 93).

About tempeh, by Julie & Michael Joyce (p. 94; "Little did we know in early 1982, when we first ate tempeh made by Cyril & Ellie Cain of Eumundi, Sunshine Coast, that we were soon to become tempeh makers." They supply Squirrels with the tempeh they make). Tempeh chips (p. 96). Tempeh & tomato bake (p. 97). Tempeh sweet & sour (p. 98). Tempeh Indonesian style (p. 99). Tempeh Chinese style (p. 100). Tofu dessert (p. 125). Pages 141-42 describe tamari, tempeh, tofu, and miso. Address: Brisbane, Queensland, Australia.

6287. Leviton, Richard. 1983. Report of soyfoods research and speaking trip to Europe with American Soybean Assoc., Oct. 8–Nov. 15, 1983. Colrain, Massachusetts. 82 p. Unpublished typescript. 28 cm.
• ***Summary:*** Describes visits to or discusses: ASA Belgium (Dennis Blankenship, Rita Batens, Michael Martin), Parma, Euvepro Conference, Parmalat, Guy Coudert and Dr. Sabin president of ONIDOL, Anuga, Jonathan, Société Soy (Bernard Storup, Jean de Preneuf), Le Bol en Bois, Budapest (Hungary), Agrimpex (Hungary), Migros, Sojalade / Die Genossenschafts Tofurei (Verena Krieger), Galactina, Soyana (Walter Daenzer), Alpro (Belgium; Philip Vandemoortele and Christian Daems), Aarhus (Denmark), Witte Wonder, Manna, Cauldron Foods Ltd. (Phillip Marshall, Peter Fagan). Contains a directory of principal people contacted, listed by country. Those not mentioned above are: England: Wild Oats Wholefoods (Mike & Loes Abrahams), British Arkady Co. (Bill Pringle), Sunworld Inc. (David White), Health Foods Manufacturers' Association (Britain). Belgium: ASA, Le Paradoxe (Dota Figuera). China Trading, Ralston Purina (A.G. van der Horn), Premier Foods (Pauline Six Chan). Italy: Cargill SpA (Claudio Rocchietta), Parmalat SpA (Dr. Alberto Rota, Mr. Barilla), ASA (Sergio Monari). France: Robert Bonneterre, Aux Rayons Verts. Germany: European Federation of Health Products Manufacturers (Wolfgang Reinsch, Bad Homburg). Hungary: Central Food Research Inst. (Balint Czukor), Agrimpex (Potori Karoly). Denmark: Danish Turnkey Dairies, Det Gronne Kokken. Netherlands: Witte Wonder Products (Niko van Hagen), Manna (Hans den Hoed), Albert Heijn Supermarkets, Dutch Seed Crushers & Oil Processors Assoc. (Dr. C.J.M. Meershoek). Switzerland: Sojalade (Verena Krieger), Soyana (Walter Daenzer). Austria: Tom Brennan.

Bound in the back of the report are photocopies of labels and promotional materials (graphics) from the following companies: Witte Wonder, Société Soy (Cerny), Cauldron Foods, Manna, Dansk Tofu (Sdr. Vinge Gl. Mejeri, 8860 Ulstrup), Sojalade, Bonneterre, Mutter Erde, Genossenschaftstofurei Engel (Dorfplatz, Ottenbach).

Note: This is the earliest document seen (May 2005) that mentions Parmalat in connection with soy.

Migros (p. 18-19) is Switzerland's biggest supermarket / department store; it sells some whole wheat products. Consumers oppose them for their size, but they attract foreign customers. Natural foods people are very political; they are opposed to Third World imports. Migros is expected to start selling tofu soon. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

6288. Leviton, Richard. 1983. Brief history of Manna Natural Foods (Document part). In: R. Leviton. 1983. Report of Trip to Europe with American Soybean Assoc. 82 p. See p. 26. Unpublished manuscript.
• ***Summary:*** Based largely on an interview with Hans den Hoed. Manna started in 1971 as a little natural food retail shop in De Jordan, the Jewish section of Amsterdam. They sold foods made by Lima N.V. in Belgium. In 1972 they started a second retail store and in 1974 a bakery using the Manna name. Hans den Hoed, the source of this information has been with the company since 1977.

Manna began to make tofu in 1978 in a small village north of Amsterdam, behind the Manna store. They started to make tofu spreads in 1981. Manna now has 8 stores in the Netherlands; 5 of these are in Amsterdam. They distribute their products to 200-250 other stores in Holland, plus some in Germany, Denmark, and France.

Adelbert Nelissen is the director of the Stichting (Foundation). Macrobiotics grew fast here because Nelissen started an East West Center and gave classes all over Holland. Holland and the Dutch/French part of Belgium is presently the best in Europe for soyfoods. The Kabouters, young 1960s types looking for new lifestyles, with interests in ecology, and belonging to small organizations, grew up here. Macrobiotics is very popular in Holland. In 1981 the company declared bankruptcy, then restarted. One man put of 50% of the capital/ownership necessary to restart. He has now left the business.

Manna uses a Takai W30C system and a stone mill in a tile-lined room. Klaus Hillberg is the tofu maker. Manna's address is Meeuwenlaan 70, 1021 JK Amsterdam, Netherlands. Address: Colrain, Massachusetts.

6289. Leviton, Richard. 1983. Brief history of Cauldron Foods Ltd. (Document part). In: R. Leviton. 1983. Report of Trip to Europe with American Soybean Assoc. 82 p. See p. 26-27. Unpublished manuscript.
• ***Summary:*** Based on an interview with Philip Marshall and Peter Fagan. These two men started their partnership in Cauldron Foods in Sept. 1981. Philip was previously a partner with Paul Jones, and at the time he joined with Peter he was already a Bristol tofu maker selling some tofu in

© Copyright Soyinfo Center 2013

bulk to the converted. They spent 12 months searching for premises. They now make 1,200–1,500 lb/week of tofu, all in one day. They started business doing burgers and tofu, handed out leaflets, and did recipe demos for shops. They prepared and served tofu quiche, cheesecake, mayo, and burgers.

The company was built on the burger. In 1982, selling 6,000 burgers a week, they reached plant capacity in their old 350 square foot plant and in Feb. 1983 they moved to their present location 1,200 square foot plant in Bristol. In 1981 there were 17 natural food stores in Bristol. Today (11/83) there are 24, more per capita than anywhere else in England. In Jan. 1984 Cauldron Foods and Bean Machine (from Wales) will host an all-day meeting in Bristol to form a Tofu & Soymilk Producers Association for England. The main item on the agenda is to take action on "burger" as a product name. Address: Colrain, Massachusetts.

6290. Leviton, Richard. 1983. Visit with Christian Daems and Philippe Vandemoortele at Alpro, Izegem, Belgium. Oct. 28 (Document part). In: R. Leviton. 1983. Report of Trip to Europe with American Soybean Assoc. 82 p. See p. 21. Unpublished manuscript.

• ***Summary:*** Vandemoortele doesn't like soy protein isolates in soymilk because of their poor image. A good tasting plain soymilk is possible if it is properly made. Isolate-based foods don't have the old basic food Oriental image. They also don't like isolates because, if the product's sales become large, the dairy industry will jump on the isolates for fakery and low quality. If used in place of dairy, the product would be called 100% synthetic. So not using isolates is a defensive measure. Codex Alimentarius (in Feb. 1984) will look at this issue. They may allow the term "soymilk" if a product is made from whole soybeans, but "soy drink" if it is made from isolates.

Alpro is opening a new soymilk plant in Ghent in Feb. 1984–the biggest in the world. They will make a 100% natural product from liquid and powder. [Note: Alpro never ended up making the powdered soymilk, says Philippe Vandemoortele 9/91.] This soymilk plant will have a sewage treatment system to recover all the water. The okara will be sold to the mixed feed industry. They will try to make soymilk powder at the same price as subsidized dairy milk and sell the powder for reconstitution. Alpro soymilk will be sold in supermarkets by Sept. 1984. They want high margins, will do promotions, and plan new products. Vandemoortele uses 50,000 tons of soybeans every 2 weeks [for all products, not just soymilk]. Alpro uses organically grown beans from France to make soymilk for Lima Foods in Belgium; these are 100% more expensive than regular soybeans. They will look to the USA and Asia for more markets for this output since the European market is too small. They will focus on areas that have a protein shortage or lactose intolerance. They have sold one turnkey soymilk plant to Madagascar. Alfa-Laval has not sold any soymilk plants recently due to currency problems.

Europe is such a bad market for soymilk, in part because of the many languages. With 10 European countries and languages, labeling requirements make it very complicated to market one food uniformly. Alpro sells more soymilk in north Belgium than in the south. There are more macrobiotics and more money in the north. This is typical for Europe as a whole with natural foods.

At ANUGA, British Arkady received lots of interest in their soymilk made from soy protein isolates, and health foods interest in their soy proteins. It is a Tetra Pack soymilk in raspberry, banana, and strawberry flavors. They exhibited meats and biscuits using isolates. A.E. Staley was pushing isolates for bakery uses.

Michael Martin of the American Soybean Assoc. explains European regulation problems. Soymilk is taxed at 17% when it is traded in the EC. This Value Added Tax (VAT) would be only 6% if soymilk were reclassified as a health food instead of a liquid, powder, or paste. The VAT varies by country but is usually higher on beverages. Dinner with Martin at Le Paradoxe, a natural foods restaurant in Brussels. They serve "croquettes de soja, tofu brochette, and Tofu Ganmo (2 burgers). There are 6 natural foods restaurants in Brussels and all use tofu. The Japanese wanted Alpro to do their soymilk in Europe. They started soymilk in 1975 with the idea of bringing alternative vegetable sources to developing countries.

Vandemoortele's sales are now $600 million/year. In 1936 Philippe's grandfather imported Manchurian soybeans for crushing in Europe. Vandemoortele, which now competes with Unilever in margarine, has a high level of expertise in R&D.

"We sample Alpro soymilk. One tastes thin, metallic, then gives a fatty mouthfeel. Another with sugar and vanilla is too sweet. I'm not impressed with them.

"Philippe is about age 35 and macrobiotically oriented in diet. Very confident, perhaps overly."

The tofu market is completely different from that of soymilk. Tofu is all education work and no comparison of products. With soymilk, there is comparison, but no education work needed. Philippe and Christian are concerned that most of the low-tech soyfoods industry and retailers in Europe are unskilled, small, and unprofessional. They don't want the average public to associate their soymilk with this vegetarian style. They want it to be seen not as a special food, but for everyone.

The European vegetable protein industry made a classic blunder. They put soy steaks in German supermarkets in the 1970s using TVP from British Arkady and ADM. Address: Colrain, Massachusetts.

6291. Leviton, Richard. 1983. Brief history of Soyana and Walter Daenzer (Document part). In: R. Leviton. 1983.

© Copyright Soyinfo Center 2013

Report of Trip to Europe with American Soybean Assoc. 82 p. See p. 19-20. Unpublished manuscript.
• ***Summary:*** Based on an interview with Walter Daenzer. Soyana is Switzerland's largest tofu company. Soyana's factory and office are at two very different locations in Zurich. Daenzer, who first became familiar with soy in New York City, has been a vegetarian for 15 years. He first saw soy as textured meats. The company began in 1980, when they started to re-package sell TVP in consumer-size in Zurich. He did 1-3 demos/week that year. "De Gustation" then published his first cookbook about soy protein.

In Sept. 1981 he started to plan tofu production, then on 1 Feb. 1982 he began to produce tofu, and now produces about 6,000 lb/week (2,727 kg/week) of very firm tofu with 13% protein. Of this, it sells about 40 kg/month in bulk to the University of Zurich. The company, which has 5 production and 3 office employees, makes tofu 3 days/week and burgers 1 day/week. They use a Takai W30C system. Daenzer didn't want to use water-filled tubs for packing the tofu, so he uses a Tiromat form-fill-seal vacuum packer that gives tofu a 2-week shelf life (dated), but could actually go to 3 weeks.

Soyana also makes several shelf-stable tofu spreads and dips, packaged in tins, pasteurized, with a 6-month shelf life. "Zurich has the most innovative, dynamic people in Switzerland, I am told, with an international atmosphere; there is a widespread interest in trying new foods." Soyana displays the Biona symbol (a "Y") on its products in recognition of having passed the inspection by the federation of Swiss Reform Houses (about 400 shops). Biona is an association of Reform House stores, "VRSD," with 400 members, called in Swiss the Assoc. of Swiss Reform & Diet Specialty Stores. It corresponds to West Germany's Neuform which has 2,500 members. Only one-half of these shops have refrigeration facilities. The Soyana brand is sold only in Biona stores, whereas Soyana's Sojaquelle brand is sold elsewhere. The "*Bioladen*" stores are more like American natural foods stores. There are 60 of these in Switzerland; they are environmentally oriented, political, and wholistic.

Soyana's director says that Migros, Switzerland's leading supermarket chain with about 2,000 stores and 70-80% of Swiss food sales, is likely to sell tofu, but under its own label and possibly manufactured in-house. Migros has a bad reputation among food manufacturers, because Migros often starts selling a company's product, then if it becomes successful they make their own product and drop the original manufacturer. Co-op is the second largest Swiss food chain. Meanwhile, Soyana is active presenting cooking classes on tofu, has published two tofu cookbooks (each has sold 10,000 copies), and have a third at the printers, *Tofu Kur* (actually it ended up being titled *Schlank mit Tofu*) in full color, a weight-loss book with 127 low-calorie tofu recipes. It should be out in Nov. 1983. Weight Watchers International contributed 30 recipes to the book.

In April 1982 Daenzer tested Tetra Pak soymilk using taste panels and got good reports. The milk was made using his Takai system and flavored with honey. The Swiss Milk Industry Assoc. protested, asking the Tetra Pak company to stop working with Soyana, and they did. 95% of all Swiss milk is in Tetra Pak cartons so if people see a soymilk in such a carton they assume it is dairy milk. Address: Colrain, Massachusetts.

6292. Leviton, Richard. 1983. Brief history of Sojalade (*Die Genossenschaftstofurei*) and Verena Krieger's work with soyfoods in Switzerland (Document part). In: R. Leviton. 1983. Report of Trip to Europe with American Soybean Assoc. 82 p. See p. 17-19. Unpublished manuscript.
• ***Summary:*** Based on talks with Verena Krieger. Sojalade in Ottenbach was renamed Genossenschaftstofurei in 1982. It is an 8-member cooperative that makes 400-500 kg/week of tofu and services the Zurich-Lucerne market. The company started in Aug. 1981 in a small laundry room in Zurich then moved downstairs to a butcher shop with a tile floor on the ground floor of a 300 year old home. Elsewhere in the building is a co-op cafe. They use a BMI Mini Mite disintegrator, double steam jacketed kettles, an Erme Verpackungen vacuum packer (2 chamber, 1 lid), and a ratchet press.

Zurich is the best and biggest market in Switzerland. The country's population is only 6 million. They even sell some tofu by mail-order. Their tofu is sold in some dairy stores (Molkerei/Laiterie), specialty produce stores, 10-12 Japanese or Chinese restaurants, 4 vegetarian restaurants, and health food outlets. The Reform Houses are a chain of 500 outlets in Switzerland stemming, at least in spirit, from the days of Dr. Bircher-Benner and his natural nutrition reform ideas. Tofu is strong in Switzerland because of this established health foods tradition and the country's general affluence. Sojalade works with local farmers to grow organic ("biological") soybeans, without herbicides. In 1982 some 2 tons of soybeans were produced biologically and another 4 tons by conventional means. Maple Arrow and Giesso (from Germany) are the best suited varieties. Fiskeby gave low yields.

Soyana sells its tofu throughout Switzerland, while Marty Halsey services Geneva. Hans Opplinger in Cham is not a company. An English guy, Jean Spearing, is starting a shop named Tofurei Pfannenstiel in Maennedorf. In Bern, the macrobiotic group, Infinity, will start making tempeh and seitan mainly for use in their restaurant. [Note: This later became Berner Tofurei.] In Thusis, someone makes 5 kg/week of tofu. Susan Gerber is converting a dairy into a tofu shop. [Note: It never was finished.] A friend of Verena's, Gauthier Loeffler, sells 200 tofu burgers one day a week in the Zurich open market.

Letters from Verena Krieger. 1990. July 5 and Aug. 10. In 1989 this company's name was changed from Genossenschaftstofurei to Tofurei Genossenschaft Engel,

© Copyright Soyinfo Center 2013

because the former name was not acceptable to Swiss trade regulations. The present manager is Peter Martmer. Mr. Hans Opplinger never owned a company making soyfoods in Switzerland, but he is still a member of Tofurei Genossenschaft Engel in Ottenbach. The company has never sold soymilk (despite a listing in Soya Bluebook, 1984, p. 63). Address: Colrain, Massachusetts.

6293. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Nyingma Dzong.
Manufacturer's Address: Chateau de Soleils, 04120 Castellane, Alpes de Haute Provence, France.
Date of Introduction: 1983. November.
New Product–Documentation: Richard Leviton. 1983. Report on trip to Europe with American Soybean Assoc. p. 22. "Nyingma Dzong: This community of 80 people makes its own tofu."

6294. **Product Name:** [Tofu Ravioli].
Manufacturer's Name: Pasticcio.
Manufacturer's Address: CH-8910 Affoltern, Switzerland.
Date of Introduction: 1983. November.
Ingredients: Incl. frozen tofu.
New Product–Documentation: R. Leviton. 1983. Report on trip to Europe with American Soybean Assoc. Oct-Nov. p. 18. A friend of Verena Krieger's makes about 10 kg/week of tofu ravioli in Amfoltern [sic, Affoltern]. They use frozen tofu. It is packaged fresh like pasta with a 5-day shelf life.

Letter from Verena Krieger of Switzerland. 1990. July 5. This company has been out of business since about 1985.

6295. Shurtleff, William; Aoyagi, Akiko. 1983. Tofu & soymilk production. 2nd ed. Lafayette, California: Soyfoods Center. 344 p. Illust. by Akiko Aoyagi Shurtleff. Index. Nov. 28 cm. [223 ref]
• ***Summary:*** Some information in Chapter 1, Appendix A, and many advertisements have been changed. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

6296. **Product Name:** [Soyana Tofu Spreads and Dips (Curry, Carob, Sea Buckthorn/Sour-Cherry [Sanddorn/Argousier], Sesame, and Nutritional Yeast)].
Manufacturer's Name: Soyana.
Manufacturer's Address: Postfach 8039, Zurich, Switzerland.
Date of Introduction: 1983. November.
Ingredients: Curry: Incl. tofu, pears, hazelnuts, raisins, tamari, lemon juice, wheat flour, and salt.
Wt/Vol., Packaging, Price: 136 gm thin-walled aluminum tins with peel off lids, pasteurized.
How Stored: 6-month shelf life.
New Product–Documentation: R. Leviton. 1983. Report on trip to Europe with American Soybean Assoc. Oct-Nov. p. 19, and Part II, p. 16. Soyana also makes several shelf-stable tofu spreads and dips, packaged in tins, pasteurized, with a 6-month shelf life. Done by an outside company. The company has a new sesame-herb spread that tastes like cheese–excellent. The carob with nuts is their best spread. Sanddorn is a small red fruit like a small orange rich in vitamin C.

Talk with Walter Dänzer. 1990. May 30. These products are no longer on the market.

6297. **Product Name:** [Soyana Soya Lunch {Firm Tofu Marinated in Soy Sauce & Herbs}].
Foreign Name: Soyana Soya Lunch.
Manufacturer's Name: Soyana.
Manufacturer's Address: Postfach 8039, Zurich, Switzerland.
Date of Introduction: 1983. November.
Ingredients: Incl. tofu, soy sauce, herbs.
Wt/Vol., Packaging, Price: Vacuum packed.
How Stored: Refrigerated, 14 day shelf life.
New Product–Documentation: R. Leviton. 1983. Report on trip to Europe with American Soybean Assoc. Oct-Nov. p. 20.

Talk with Walter Dänzer. 1990. May 30. The product called Soyana Soya Lunch in German was introduced in about 1983.

6298. *Soyanews* (*Sri Lanka*). 1983. Recipes: The many uses for residue [okara]. 6(3):3. Nov.
• ***Summary:*** "Residue is now available at No. 128 Kitukwatta Gardens off Elvitigala Mawatha which is about 300 yards from the Senanayaka Junction at Borella towards Narahenpita. The price is Rs. 2/- a pound. Tofu is made daily here and supplied to Cornel's as well as the Paddy Marketing Board's sales room at 77 Union Place, Slave Island." Gives on recipe.

6299. **Product Name:** [Tofu, Spring Rolls (with Meat, or Vegetables), Tofu Burger, Soya Cakes, Soy Sprouts].
Foreign Name: Tofu, Fruehlingsrollen (mit Fleisch oder Gemuese), Tofu Burger, Sojakuchen, Soya Sprouts.
Manufacturer's Name: Thieu's Soja Spezialitaet.
Manufacturer's Address: Kirchgartenweg 20, CH-4143 Dornach (near Basel), Switzerland. Phone: 06-172-8831.
Date of Introduction: 1983. November.
New Product–Documentation: Richard Leviton. 1983. Report on trip to Europe with American Soybean Assoc. p. 18. Thieu (or Tieu) The Van is a Vietnamese tofu maker in Dornach near Basel. According to a newspaper report dated 9 Sept. 1983 his was a "boat people" family that came from Saigon in 1979. He makes *Fruehlingsrollen* ("spring rolls" with meat or vegetables), tofu, tofu burgers, *Sojakuchen* [Soya Cakes], and Soya sprouts. Soyfoods Center Computerized Mailing List. 1984. Feb. 7. Thieu's

Soja Spezialitate, Kirschgartenweg 20.

Letter (fax) from Verena Krieger. 1990. May 31. This company cannot be located.

6300. **Product Name:** [Tofu, Marinated Tofu, Tofu Ice Cream, Tofu Burgers].
Manufacturer's Name: Tofurei Ebner.
Manufacturer's Address: Obere Oedlitzerstr. 8A, A-2560 Berndorf, Austria. Phone: 026-723-507.
Date of Introduction: 1983. November.
How Stored: Frozen.
New Product–Documentation: Soyfoods Center Computerized Mailing List. 1984. Feb. 7. Owner: Guenter Ebner.

Talk with Guenter Ebner of Sojarei Ebner-Prosl. 1990. May 28. This company started in Nov. 1983. It merged with Erich Wallner's company, Soyarei, in 1984 in a new location in Baden, where the company is still located. Before the merger the company made tofu, marinated tofu, soy ice cream (a small amount), and tofu burgers.

6301. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Tofurei Pfannenstiel.
Manufacturer's Address: Alte Landstrasse 276, CH-8708 Maennedorf, Switzerland. Phone: 01-920-5548.
Date of Introduction: 1983. November.
New Product–Documentation: R. Leviton. 1983. Report on trip to Europe with American Soybean Assoc. Oct-Nov. p. 17. Verena Krieger says that an English guy, Jean Spearing, is starting a shop named Tofurei Pfannenstiel in Männedorf. Letter (fax) from Verena Krieger. 1990. May 31. This company now makes 160 kg/week of tofu including Herb Tofu and Curry Tofu.

Talk with Walter Dänzer. 1990. May 30. The person who started this company came to Soyana to learn how to make tofu but he didn't say that he wanted to start his own tofu shop. Pfannenstiel is the name of a mountain near where he opened. Walter does not know if he still makes tofu.

6302. **Product Name:** [Tofu, Seitan].
Foreign Name: Tofu, Seitan.
Manufacturer's Name: Vajra.
Manufacturer's Address: Rue Jean Baus, B-1970 Brussels, Belgium.
Date of Introduction: 1983. November.
New Product–Documentation: Richard Leviton. 1983. Report on trip to Europe with American Soybean Assoc. p. 22. This local tofu shop is run by Patrick Gigi. He also makes seitan, and imports products from Japan.

6303. Weston Graham & Associates Ltd. 1983. Eastern Ontario soybean production and marketing feasibility study. Ottawa, ONT, Canada. 26 + 138 + 114 p. Nov. 28 cm. Looseleaf.
• ***Summary:*** This report was prepared largely by William W. Graham of Weston Graham & Associates for the Ontario Soya-Bean Growers' Marketing Board in cooperation with the Government of Ontario and the Government of Canada. Contents of Executive summary: Introduction. Soybean crop development needs: Producer problems and concerns, elevator operator problems and concerns, crusher problems and concerns. Conclusions and recommendations: The potential for increased soybean production, technology transfer and producer information needs, the potential for a new crushing facility in Eastern Ontario (250 tons/day at Prescott), additional handling and storage facilities for soybeans, servicing specialty food markets (natto, tofu). Summary of situation, requirements, effects and future scenarios of soybean production and Marketing in Eastern Ontario: Production, transportation/handling/storage, crushing, import and export markets.

Contents of main report: 1. Introduction. 2. Profile of production. 3. Soybean production and management. 4. Production potential. 5. Marketing and use patterns. 6. Market infrastructure options. 7. Opportunities and impacts. 8. Soybean development needs. 9. Recommendations and conclusions. List of 33 tables. List of 1 map and 2 figures.

Canadian soybean production has traditionally been restricted to the southernmost areas of Ontario. "The release of the soybean variety Maple Arrow in 1975 [developed by Dr. Donovan and Dr. H. Voldeng using Fiskeby V and Harosoy crosses] made commercial scale soybean production a reality in Eastern Ontario." Maple Presto, an extremely early maturing variety, was licensed and released in 1978, but it did not gain wide acceptance due to its relatively low yields. In 1981 Maple Amber was released and has since become popular in shorter-season zones; its yields are generally only a little less than Maple Arrow. Maple Arrow is currently the variety most widely grown in Eastern Ontario. "Soybeans have been grown in Eastern Ontario since the mid-1930s, but until recently were only produced on a very limited scale. During the 1940s and 1950s Dr. Dimmock carried out a research program at the Central Experimental Farm in Ottawa. Varieties such as Comet, Crest, and Acme were adapted to the short season..." In 1976 only 462 acres of soybeans were grown in Eastern Ontario and most of these (197 acres) were grown in Glengarry County. But in 1981 some 11,089 acres of soybeans were grown in Eastern Ontario; the 3 top counties were Prince Edward (4,263 acres), Dundas (1,474 acres), and Ottawa/Carleton (1,129 acres). Since the 1981 census of agriculture, soybean acreage has more than doubled, to an estimated 23,000 acres in June 1982.

In Quebec province, only 66 acres of soybeans were grown in 1961, rising to 1,234 acres in 1971 and 3,555 acres in 1981. The main soybean growing counties in southern Quebec in 1981 were Richelieu (1,840 acres) and SW

Montreal (1,333 acres). Address: 1684 Woodward Dr., Suite 217, Ottawa, ONT, K2C 3R8 Canada. Phone: (613) 225-0226.

6304. Yasuda, Masaaki. 1983. Tôfuyô to beni kôji [Okinawan fermented tofu (tofuyo) and red koji]. *Nippon Jozo Kyokai Zasshi* (*J. of the Brewing Society of Japan*) 78(11):839-42. Nov.; 78(12):912-15. Dec. [72 ref. Jap; eng+]
• ***Summary:*** How to eat tofuyo (p. 839): In the *Gyozen Honzo* (*Food Herbal*) (1832, a book about food and medicine) the physician TOKASHIKI Tsûkan Peichin wrote: Tofuyo has a delicious flavor and is good for the stomach. It makes eating a pleasure and is good for various types of sickness" (Ref. #9; Note: This book contains the earliest direct reference seen to tofuyo. Peichin refers to a high-ranking officer). It seems that tofuyo was consumed by the upper classes during the Ryukyu Ocho period in Okinawa and it was also used as a food for recovering after a sickness, and as a side dish. According to old people in Okinawa, Tofuyo was popular among upper class people in Shuri or Naha, during the Taisho period (1912-1926) and at the beginning of the Showa period (1926+). It was eaten with tea by ladies or with millet brandy (*awamori*) by men. But it was too for the regular people to afford. The best way to eat tofuyo is to place one cube of it (2-3 cm on a side) on a small dish and eat it with chopsticks or a toothpick a little bit at a time.

Note on the geography and history of the Ryukyu Islands (also called Luchu or Loochoo Islands): This chain of islands extends in a 600-mile long arc southward from the southern tip of Kyushu (Japan's southernmost main island) down to Taiwan. It includes Okinawa, Sakishima, and the Amami island groups. The population in 1970 was 945,000. The chief town is Naha on Okinawa. History: In 1372 these islands came under the political influence of China. In 1451 they became a tributary to Japan as well as China, and 1609 a Japanese protectorate (part of Satsuma-Han). Thus the islands have long had cultural ties with both Japan and China. During Japan's Edo period (1600 to 1868) the kingdom of Ryukyu formally belonged to China, but in fact it was more closely tied with the Satsuma Han, a powerful domain in southern Kyushu. Like China and Japan, Ryukyu had its own emperors and dynasties. The imperial palace was on the island of Okinawa, in the southern city of Shuri. Imperial messengers (*sakuho-shi*) were frequently sent to Okinawa from China and there were cultural exchanges between the two countries. In 1871 the Meiji government in Japan made Ryukyu part of Kagoshima prefecture. In 1872 they made it Ryukyu-Han. After this change, Shôtai (lived 1845-1901) became king of the Ryukyu-Han. In 1879 Ryukyu became an integral part of Japan. Under the Japanese, the Amami group belonged to Kagoshima prefecture and the Okinawa and Sakishima groups constituted Okinawa prefecture. In 1945, after World War II, it was placed under a U.S. military government. In 1966 it received local self-government, and in 1972 was returned to Japan.

History of tofuyo in Okinawa (p. 839-40). The earliest document seen concerning soybeans in Okinawa appeared in 1534 in the *Record of the Messengers to Ryukyu* (*Shi Ryukyu Roku;* Ref. #16). Thereafter soybeans became a widely grown crop (Ref. #17). The *History of Ryukyu* by Ryukyu Opu (1713, Ref. #19) noted that it was not clear at the time when and how tofu came to the country. Although this uncertainty still remains, tofu is thought to have arrived in Ryukyu in the mid-1600s. According to the *Various Records of the Messengers to Ryukyu* written by Osho? (Wang-shu?, Ref. #18) in 1683, tofu was widely available at that time in Okinawan market places. being produced by many companies. It was an important food not only for the local people, but also for the Chinese imperial messengers (Refs. #20-22). Okinawa's tofu was a firm tofu, made in the Chinese way by pressing the soymilk out of the okara before cooking it. This method was also traditionally used in Korea and southern Japan (in Kumamoto–Itsugi-mura, Yamaguchi, Ishikawa, and Koichi prefectures). The method was probably introduced to Okinawa by Chinese imperial messengers or by exchange students, although it could have been brought from Japan by Buddhist monks, who served it in their temple cuisine.

Note: For much more detail about the history of tofu-ru in the Ryukyu islands, please see "History of Fermented Tofu" on the Soyinfo Center website. Address: Dep. of Agricultural Chemistry, University of the Ryukyus.

6305. Southwell, Jane. 1983. Re: Discontinuing Soy Deli at 211 East Ann St. in Ann Arbor. Letter to "Community loan holder," Dec. 5. 1 p. Typed, with signature on letterhead.
• ***Summary:*** "We no longer operate the Soy Deli at 211 East Ann St. The People's Produce Coop, which shares that building space with the Herb and Spice Coop, now handles Soyplant products. You can continue to pick up tofu and soymilk as payment on the principal of your loan, if this is the option you chose. Coordinators of the Produce Coop are keeping records for the Loan Program, and we appreciate their willingness to do this. Other Soyplant products are still available. We apologize for any confusion this change-over may have caused.

"We are seeing a gradual but steady improvement in the company's position. Beginning this month, we will repay loans at the rate of $100 a month, according to the list of loan holders we have compiled who requested cash repayment. We will increase the rate as quickly as we can." Address: The Soyplant, 711 Airport Blvd., Suite #1, Ann Arbor, Michigan 48104. Phone: (313) 663-8638.

table books. Dec. 8. p. 7. [12 ref]
• ***Summary:*** One of the entries is: "'The Book of Tofu–This updated and revised edition by William Shurtleff and Akiko Aoyagi contains more than 500 original recipes and easy-to-follow instructions for making tofu at home. (Ten Speed Press, $11.95. Available by mail order to Ten Speed Press, P.O. Box 7123, Berkeley, CA 94707–(415) 845-8414). These two also have a book entitled 'The Book of Miso' ($9.95)."

6307. Poston, Frank. 1983. Worthington is now making tofu and Tofu Garden Patties as part of their new Natural Touch line (Interview). *SoyaScan Notes.* Dec. 16. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Tofu Garden Patties is the start of a new line developed for the health foods market. The Patties were introduced in June 1983. Worthington bought all of the tofu equipment from Rising Sun Soy Farms in Columbus, Ohio, and are now making the tofu for the product at the Worthington plant in Ohio. The product was developed for the health food market, and will be part of the larger new Natural Touch line of products. More new products will be out in April 1984. This is a big and important new trend for the company and they plan to put a lot of energy and money into promoting it. Some (but not all) of the new products will contain tofu. Address: Worthington Foods, 900 Proprietors Rd., Worthington, Ohio 43085-3194. Phone: 614-885-9511.

6308. Hughes Markets. 1983. Merry Christmas! (Ad). *Los Angeles Times.* Dec. 22. p. I30-I131.
• ***Summary:*** Two full pages of ads. The section titled "Happy holidays from Hughes Markets!" (p. I30) includes: "Fresh Hinode age [deep-fried tofu pouches] 1.5 oz. pkg.–79¢. Kikkoman soy sauce gallon can–$4.39. Kikkoman Aji Mirin, 10 oz. bottle, sweet cooking sauce–$1.59. Hime kuromame amani 6.35 oz. can, Black [soy] beans–95¢."

The section titled "Foods of the Orient holiday specials!" (p. I31) includes: "JFC Kinako 7 oz. pkg. Soy bean flour–69¢... Misuzu koya tofu, 3.5 oz box Wheat cake [sic, Dried frozen tofu]–$1.15." Also: "Hime sushinori dried seaweed, Kikkoman tempura sauce, Su Hiro kombu maki Rolled kelp, Umeya frozen mochi."

6309. *SoyaScan Notes.* 1983. Soymilk and dairy milk prices in California, December 1983 (Overview). Dec. 28. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** In Lafayette, California, whole fluid cow's milk retails for $0.39/pint (1 pint = 16 ounces) and nonfat cow's milk retails for about $0.43/quart. Milk is the least expensive popular beverage, less expensive than Coca-Cola, beer, or orange juice. Prices of unflavored fluid soymilks are as follows: Vitasoy, 8.4 oz. Tetra Brik sold to the Asian-American market $0.35 (which is the equivalent of $0.67 per pint), Quong Hop Soy Fresh 10.16 oz. Pure Pak carton $0.59 ($0.89/pint), Wildwood Yosoy pint plastic bottle $1.05, Brightsong Honey-Vanilla pint plastic bottle $1.08, San-J To-Neu 6.76 oz. Tetra Brik $0.74 ($1.75/pint), Edensoy 6.0 oz. retort pouch $0.74 ($1.97/pint). Vitasoy, the least expensive soymilk, is 1.72 times as expensive as cow's milk. The average price of the pint equivalents of all 6 U.S. soymilk products mentioned above is $1.24 a pint (which would be $2.48/quart). Thus the average soymilk in a typical pack is 3.53 times as expensive as dairy milk per unit volume.

Finds Niche Selling Frozen Foods Made with Tofu, published by The Wall Street Journal.

Feb. *Soyfoods* magazine No. 8 published by Richard Leviton. Blue cover, 5,000 copies

Feb. 6-8. Sixteen soyfoods companies exhibit at the Natural Foods Expo. in Anaheim, California. A new trade association named Soyfoods Association of America (SAA) is formed; it is basically a restructured version of the original Soyfoods Association of North America, which was founded in July 1978 and which now ceases to be active. SAA elects a new board of directors; Michael Austin is chosen new Executive Director and Gary Barat of Legume becomes new President. Fourteen companies pledge $12,000. Headquarters established in New York City.

Feb. 7. The First Great Tofu Burger, a dry mix, made in Oakland, introduced at Anaheim Natural Foods Expo.

Feb. 18. Wm. Shurtleff has idea for forming a Soy Sauce Council to help encourage soy sauce companies to join Soyfoods Association, develop soy sauce terminology and standards, and eliminate mislabeling.

Feb. Jack's Beanstalk, innovative tofu company in Salt Lake City, goes out of business.

March 10. *Soyfoods Industry and Market: Directory and Databook 1983* published by Soyfoods Center, accompanied by glossy flyer and catalog of professional publications and services.

March 10. *Tempeh Primer,* by Juel Andersen and Robin Clute, published.

March 14. Connecticut Agricultural Experiment Station, in Bulletin 810 "Quality of Tofu and Other Soy Products," reports high bacterial and coliform counts. A virtual expose, revealing the tofu industry's erratic quality control, it gets wide media coverage and hurts sales of New England and New York tofu companies.

March. Hinode Tofu Co. starts major tofu ad and coupon campaign, with full-page ads in four national magazines. Most extensive national publicity ever done for tofu. Triggers lawsuit from a rice company over the Hinode brand, with which Hinode Tofu Co. is subsequently forced to part.

April 27-30. Six soyfoods companies exhibit at Whole Life Expo in San Francisco, as part of Soyfoods Association's booth. Shurtleff presents a speech and color slide show.

April. Hartz Seed Co. is purchased by Monsanto.

May. *The Au Naturel Tofu Manual,* by Chloe & Abraham Fox self-published in Canada. Vol. 1 is *Tofu Recipes for Families.* Vol. 2 is *Modern Jewish Tofu Cooking.*

May 3. Michael Austin mails out Soyfoods Association Charter Member letter. By year's end $18,000 in membership fees had been raised.

May 4. Richard Leviton decides to move to California.

May 8-11. Hinode Tofu Co. exhibits five flavors of Tofu Parfait at the prestigious and influential Food Marketing Institute convention in Chicago, a major national supermarket convention, attended by 20,000.

May 9. Dr. Hwa L. Wang of USDA NRRC speaks on "Tofu and Tempeh as Potential Protein Sources in the Western Diet" at the American Oil Chemists' Society symposium on "Potential New Protein Sources" in Chicago.

May 16. Quong Hop & Co. introduces the first Soy Deli cooler display case to Raley's supermarkets in Reno and Sacramento. In July they introduce the idea to Safeway supermarkets in California. By August there are Soy Delis in ten Safeway supermarkets in the San Francisco Bay Area.

May 18. The New York Times article on "Bacteria in Soy Products" as a follow-up on the Connecticut tofu contamination report.

May 24. Wm. Shurtleff goes to China for three weeks to study soyfoods, sponsored by Danish Turnkey Dairies; the first trip for this purpose since Dr. A.K. Smith of the USDA went there in 1949. Shurtleff writes 75-page report on *Soybeans and Soyfoods in China: 1949-83.* After China, Wm. and Akiko Shurtleff spend 3 weeks studying the soymilk industry and market in Japan.

May 31. Leviton and Wang speak on the soyfoods industry at Iowa State University conference on grains and legumes.

June. Worthington Foods introduces Tofu Garden Patties, developed for the health food market as part of a larger new line of natural food products, all sold under the Natural Touch brand. This is a new trend for the company and they commit money to promoting it. In 1984 they launch Okara Patties (which contain okara as the 4th ingredient).

June. *Quantity Tofu Recipes for Institutions & Restaurants,* by Gary Landgrebe published by Soyfoods magazine and Fresh Press.

June. *The Magic of Tofu,* by Jane O'Brien of Ireland published by Thorsons in the UK.

June. *Tofu: Not Just for the Health of It,* by Jana H. Crutchfield self-published.

June. *Handbook of Indigenous Fermented Foods,* edited by Keith H. Steinkraus, published by Marcel Dekker. Extensive original material on traditional soyfoods. It soon becomes a classic.

June. *Soyfoods* magazine No. 9 published, 7,000 copies. *Soyfoods Newsletter* published in new typeset, 4-page format with new design.

June. Torigoe Seifun, Japan's fifth-largest flour miller, starts production of tempeh. This is the earliest known commercial tempeh ever made in Japan.

July 1. Quong Hop & Co. purchases Pacific Tempeh Co.

July. INTSOY publishes *Proceedings of the First China/USA Soybean Symposium,* held July 1982 at the University of Illinois.

July 3-Aug. 22. Richard Leviton in England, lectures on soyfoods in London and Leicester, and does some soyfoods research.

July 25. Soyfoods Association meeting in Denver.

© Copyright Soyinfo Center 2013

Tom Timmins, president of Tomsun Foods Inc. (one of the companies seriously affected by negative publicity on tofu quality) is asked to be head of the Soyfoods Association's Standards Committee, and to appoint people to work with him on the development of standards, especially tofu standards. In October he sends a 4-page survey letter concerning soyfoods standards to the 18-person Soyfoods Association Standards Committee that he has appointed.

July 28-Aug. 2. Second US/China Soybean Research Symposium, held in Jilin, China

July. NNFA show in Denver. Eden Foods surprises the natural foods industry by launching designed-for-America Edensoy in plain and carob flavors. Made in Japan by Marusan-Ai and exported by Muso, it is packed in a 6-ounce retort pouch. San-J's To-Neu brand soymilk is also debuted in Tetra Brik cartons.

Eden Foods is the first Caucasian-American company to import soymilk, and their gamble soon pays off; sales skyrocket, sparked by an extensive magazine advertising campaign. Between Sept. and Dec. 1983 over 1 million packs are sold. A host of competitors rush to follow Eden's lead... and many of them go to Muso. Eden objects.

July 31. Fifth Anniversary of the founding of the Soyfoods Association of North America.

Late July. Hot, dry summer weather heats up the price of soybeans from $6/bu to over $9.50/bu in August and September, falling back to $8 in December.

Aug. 15. *Time* magazine article on stylish ice creams has a paragraph on Tofutti soy ice cream.

Aug. 15. Delegation of four soyfoods experts from People's Republic of China spends 5 hours at The Soyfoods Center. First stop of the first Chinese soyfoods team to visit the USA.

Aug. 15. Soyfoods Center makes the first photocopy of the entire Log of the Dorsett-Morse Expedition to East Asia, 1929-31. 6,170 pages. The only original is owned by the American Soybean Assoc. in St. Louis.

Aug. Farm Foods serves Ice Bean soymilk ice cream at the American Soybean Association convention in Nashville, Tennessee.

Sept. Legume in New Jersey, in their second public stock offering in 15 months, raises an additional $400,000 ($300,000 net).

Sept. Continental Soyfoods, run by Pat Aylward in Minneapolis, goes out of business.

Sept. 9. Leviton leaves Massachusetts, moves Soyfoods magazine to Encinitas, California. But he decides to leave there a week later.

Sept. 21. New Ten Speed Press edition of *The Book of Miso,* by Shurtleff and Aoyagi published. Extensively revised. Shows miso consumption in U.S. has increased 300% since 1975.

Sept. 25. Open House at new headquarters of Soyfoods Center for 30 people, including Nancy Dailey, who is writing a major story on soybeans for *National Geographic* magazine, and for Richard Leviton, newly arrived in California. Shurtleff shows color slides of soyfoods in China.

Sept. 26–Oct. 1. Symposium on "Soybean in Tropical and Subtropical Cropping Systems" held at Tsukuba, Japan. About 200 people attended. Proceedings were published in 1985.

Sept. 28. Soyfoods Center buys its first computer and begins computerization, which soon leads to development of the world's three largest computerized databases focusing on soyfoods and the soybean industry–from which this chronology is compiled.

6314. *SoyaScan Notes.* 1983. Chronology of soybeans, soyfoods and natural foods in the United States 1983 (Continued) (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• ***Summary:*** Continued. Oct. 9 to Nov. 14. Leviton travels to Europe as a consultant for the American Soybean Association. Gives six speeches on soyfoods in Italy, Belgium, Denmark, France, Netherlands, and Hungary. The 50-minute speech in Italy is about the soyfoods industry in the USA, presented to 150 members of EUVEPRO, the European Vegetable Protein Association. Leviton studies soyfoods throughout Europe, the first representative of the American soyfoods movement to do so. He reports that virtually all tofu in Europe is vacuum packaged. On Oct. 28, ASA Belgium Office expresses interest in sponsoring a European Soyfoods Conference and a European Soyfoods Newsletter. Leviton writes a 56-page report on the trip.

Oct. New England Soy Dairy starts to sell its tofu under the Tomsun brand.

Oct. The world's first spray-dried tofu is introduced by Clofine Dairy & Food Products of Linwood, New Jersey. St. Peter Creamery first began spray-drying soymilk powder in late 1984, and tofu in the summer of 1985, under the Oberg patent.

Oct. Kikkoman: Company, Clan, and Community (358 p.) by W. Mark Fruin published by Harvard University Press as part of their series Studies in Business History.

Oct. Major reorganization of The Farm in Tennessee. It is no longer a cooperative. Every participant must pay his/her own way. All workers earn wages. The soy dairy sells its tofu and soymilk to Farm residents. Farm Foods becomes an independent, for-profit corporation.

Nov. Hymowitz and Harlan's "The Introduction of the Soybean to North America by Samuel Bowen in 1765" published in Economic Botany. This brilliant piece of historical research pushes the introduction date back 39 years, and shows that by the late 1760s Bowen, in Georgia, was making soy sauce and exporting it to England. It also credits Benjamin Franklin with the earliest known reference by an American to tofu, in 1770.

Nov. 11. Wm. Shurtleff and Gordon Bennett (Westbrae

© Copyright Soyinfo Center 2013

Natural Foods) mail out a packet including proposed U.S. soy sauce standards, English translation of Japanese Shoyu Standards, and proposal for formation of a Soy Sauce Council to 60 companies connected with soy sauce in the USA.

Nov. Soyfoods Assoc. officers meet with David Mintz of Tofu Time (maker of Tofutti) asking him to either use tofu as an ingredient in Tofutti or drop the term "tofu" from his product name and stop stating or insinuating that his product contains tofu.

Nov. 11. Wm Shurtleff writes a strongly worded letter to Mintz threatening to report the matter to the Securities and Exchange Commission and the FDA if Mintz fails to stop deceptive practices. Mintz quickly re-adds tofu to Tofutti.

Nov. 19. House Shokuhin Kogyo, a major Japanese food company, invests $2.5 million in Hinode Tofu Co. in Los Angeles as part of a joint venture to expand tofu production.

Nov. 25. Dr. Clifford W. Hesseltine of the USDA NRRC receives the award of the Third Class of the Order of the Rising Sun from the Emperor of Japan in recognition of the meritorious services he has rendered: proving the safety of Japan's traditional fermented foods, training Japanese scientists, and promoting technical cooperation in the field of food fermentation between the United States and Japan.

Dec. New England Soy Dairy, in a half-page article in *Inc*. magazine, is named as one of America's 500 fastest growing small private companies.

Dec. Inari Trading Co. in Michigan develops a delicious Christmas Soynut Sampler with seven flavors of Super Soys, including yogurt-coated, carob-coated, and butter-toffee. Runs full page color ad in Soybean Digest.

Dec. *International Bibliography of Soybeans* (3 volumes, 2,500 pages) published in Brazil. 19,571 references total, under 75 subject headings, all published during 1970-1982. Volume III contains author and subject indexes. Mostly soybean agronomy, but 1,584 references on soyfoods.

Dec. 1. The title of *Soyfoods Monthly* is changed to *Soyfoods Newsletter.*

Dec. 5-7. Symposium on Soybean Utilization held at Ibadan, Nigeria, Sponsored by IITA. First event of this type in Africa.

Dec. 8. Tofu Time Inc. in New York raises $3.2 million ($2.4 million net) in their first public stock offering, to finance national marketing of Tofutti soy-based ice cream.

Dec. 10. Doug Fiske becomes majority owner (55%) of *Soyfoods* magazine, Leviton owns 45%. Fiske will take over most publishing responsibilities. Leviton moves to San Francisco Bay Area.

Dec. Soyastern starts to make tofu in West Germany. By 1987 they are the country's largest tofu manufacturer, making 4,000 kg/week.

* *Eurosoya,* the annual publication of the European Cooperative Network on Soybean, begins.

* Soymilk production peaks in Japan at 116,724 kl. By 1986 it has fallen to 43,392 kl, which is only 37% of the peak.

1983 New Trends:

New Capital and Expertise are Flowing into the Soyfoods Industry, leading to many exciting new ideas and products and marketing programs. A dozen or so large companies with nationwide marketing are emerging.

New Emphasis on Soyfoods Marketing, now that production techniques have been fairly well mastered, is seen throughout the industry, and is reflected in new editorial and advertising policies of *Soyfoods* magazine.

Brand-Name Promotion by larger companies is surpassing generic or commodity promotion.

Stylish Second-Generation Products, prepared convenience soyfoods, are appearing with better product quality, better marketing and promotional programs, and better packaging and graphics. These are the fastest growing component of the soyfoods industry.

Extensive Professional Advertising of Soyfoods in natural and health food consumer magazines, as by Legume, Eden Foods, San-J, Hinode, Edward & Sons, and Pure & Simple. Each of these companies run very attractive, professional ads. Brightsong Light Foods has top graphics for a small company.

Exhibits at National Trade Shows are now a matter of course: The Natural Food Merchandiser show, followed by the National Nutritional Foods Association (NNFA) show are most popular.

Tofu Market Control is Increasingly Concentrated in the hands of large manufacturers, who distribute nationally and have professional marketing. Most companies are getting much more professional, but many small tofu companies are going out of business. The total number of companies is stabilizing.

Soymilk Makes its First Big Splash in the American Caucasian Market, led by Eden Foods' Edensoy. Vitasoy has big plans for early 1984. Vitasoy had the largest total imports in 1983, but mostly sold to the Asian-American market. Large new soymilk plants are planned to open in 1985.

East Asian Soymilk Sales are Skyrocketing, leading to a general soyfoods Renaissance, and reevaluation of traditional soyfoods staples. Production of soymilk in Japan tops 100,000 metric tons (tones) for the first time, reaching 116,724 tonnes, up 71% over last year. The per capita consumption of soybeans in Japan is 5.8 kg/year, up 3.6% from last year.

Soy Ice Cream is Becoming Fashionable. Made with tofu, soymilk, and/or isolated soy protein, it is emerging as a major way that Americans are discovering soyfoods.

Tofu Industry is Vulnerable to Sanitation and Credibility Problems as vividly demonstrated by the Connecticut quality/contamination report in March and subsequent adverse publicity, and by a Tofutti mislabeling incident in November. The industry urgently needs standards and better

© Copyright Soyinfo Center 2013

sanitation. Tofu souring and spoilage is the tofu industry's number one problem.

The Soy Deli Concept: Defunct or Ready for Takeoff? No new openings and some closings. But more and more natural food and vegetarian restaurants are starting to use soyfoods, and Chinese and Japanese restaurants are increasing their traditional use. In Soyfoods No. 9, Leviton calculated that as much as 16% of all tofu made in the U.S. is being served in restaurants, but this figure is probably far too high. Most promising, plans by Tofu Time/Tofutti to open a chain of natural, fast food restaurants featuring tofu, soymilk and other soyfoods could bring the Soy Deli concept new life and widespread publicity as a healthful alternative to McDonald's, Burger King, and the like.

European Soyfoods Industry is Flourishing, with lots of innovation. Large producers of tofu and tempeh are emerging in the Netherlands.

Tempeh is Starting to Take Off in Japan and interest is rising rapidly: 13 articles were published on tempeh in Japan this year, followed by 20 in both 1984 and 1986.

6315. Ang, Tien-Sê (Hong, Tiansi). 1983. Doufu kaoyuan [On the origin of tofu]. *Xue Shu Lun Wen Ji / Kertas-Kertas Pengajian Tionghua / Papers on Chinese Studies* (*University of Malaysia*) No. 2. p. 29-39. Dec. [35 ref. Chi]
• ***Summary:*** Wade-Giles reference: Hung, T'ien-Ssu. 1983. "Tou fu k'ao yüan." This periodical has three titles.

6316. *Ann Arbor Observer* (*Michigan*). 1983. [A pair of retrenchments]. Dec. [1 ref]
• ***Summary:*** On Ann Street, just west of Fourth, The Soy Plant is discontinuing its retail operation. "The Herb and Spice and Produce co-ops, which have shared the one-time pizzeria at 211 East Ann with the Soy Plant, have taken over the sale of tofu, tempeh, and soy milk, and will continue to redeem the loans the Soy Plant is paying off in bean curd. But the Soy Plant's specialty deli items (which include soy cheesecake and tofu quiche) will now be sold through Arbor Farms instead." Address: Ann Arbor, Michigan.

6317. Daenzer, A. Walter. 1983. Schlank mit Tofu: 177 Schlankheitsrezepte. Die Tofu-Kur: gesund und lecker [Slender with tofu: 177 weight-loss recipes. The tofu cure: healthful and delicious]. Zurich, Switzerland: Verlag Bewusstes Dasein. 249 p. Illust. No index. 21 cm. [Ger]
• ***Summary:*** The 177 tofu diet recipes contain calorie counts. With contributions by Dr. Hecht (Chief physician at the Vita Sana Kurklinik, Lugano), Anita Zimmerman (Nutritional advisor to the city of Zurich), Indu Tamborini (Soyana test kitchen in Zurich), and Annelis Rickli (Test cook for Weight Watchers Organization in Geneva). Contains 42 Weight-Watchers recipes.

Note: Richard Leviton noted during a visit with the author in Nov. 1983 that this book was originally planned to be titled *Tofu Kur* and was scheduled to be published in one month.

Contents: 1. A book for becoming slim, healthy, and happy. With a photo of Dänzer. 2. Facts about tofu. 3. "It would be ideal to eat tofu 2-3 times a week." 4. Organic tofu in high-quality diet therapy. 5. Slender, fit, healthy, and happy. 6. The "tofu treatment & cure." 7. My favorite recipe (four cooks). 8. The production of organic tofu in the Zurich-based firm of Soyana "The Secret of Perfection Flames." 9. 127 diet recipes with tofu: Salads, soups, cutlets and steaks, toasts and burgers, omelets and scrambled eggs, vegetables stuffed with tofu, tofu with vegetables, tofu omelets, gratins and quiches, tofu sauces and dips, tofu cocktails and spreads, tofu dessert feasts (cremes, shakes, puddings, etc.; Schlemmerei). 10. 42 Weight Watchers diet recipes with tofu: Soup, pasta, burgers and snacks, sauces, main dishes, desserts and sweets, breads. Address: Soyana, CH-8039 Zurich, Switzerland.

6318. Grover, Usha; Singh, Surjan; Mital, B.K. 1983. Studies on extending the shelf-life of soybean curd [tofu]. *J. of Food Science and Technology* (*Mysore, India*) 20(6):298-301. Nov/Dec. [14 ref. Eng]
Address: Dep. of Food Science & Technology, G.B. Pant Univ. of Agriculture & Technology, Pantnagar, Nainital, Uttar Pradesh, India.

"Pressed Soybean Curds. No preservatives added. Perishable. Keep refrigerated. Rinse immediately after opening." Soyfoods Center Computerized Mailing List. 1984. Feb. 7. Owner: Mr. Yoshi Mikumo.

6329. **Product Name:** Tofu.
Manufacturer's Name: Nepal Tofu Factory.
Manufacturer's Address: 20/321 Naya Bazar (P.O. Box 520), Kathmandu, Nepal. Phone: 4-13101.
Date of Introduction: 1983. December.
New Product–Documentation: Letter from T.B. Gubhaju published in *Soyanews* (Sri Lanka). 1984. Aug. p. 2. "I am pleased to inform you that I have begun making tofu with equipment brought from Japan. I am confident that soyabean products will play a vital role in the nutritional foods of the future." "I am also trying to make curd from soyamilk similar in quality and taste to curd from cow's milk. If you could suggest some ways of making this curd I would be very grateful to you." Address: "Nepal Tofu Factory, 20/321 Naya Bazar, Kathmandu [Nepal]." Reply: "We are sending some past copies of Soyanews which may help you to make the desired quality of soya milk curd. We wish you all success in the venture..."

Letter from T.B. Gubhaju, founder and owner. 1987. June 13.

Letter from T.B. Gubhaju. 1990. Aug. 12. "I would like to introduce myself as the pioneer in Soy Based Food in the kingdom of Nepal. My present tofu plant, imported from Japan, can produce about 800 liters of soymilk or 200 kg or tofu per day." Since the plant is not yet running at full capacity, due to the perishable nature of tofu, he would like to add new tofu or soymilk products to his line.

Letter from T.B. Gubhaju, owner. 1991. April 22. In reply to letter of 23 Aug. 1990. "At present I am making only Regular Tofu. The daily production varies from 100 to 150 kg/day only. I have purchased the equipment from Takai Tofu & Soymilk Equipment Co. of Japan at a price of ¥30,00,000.00 in 1983. The catalog is enclosed." His tofu shop "was established in 1983. I have published some advertisements in local papers to persuade the Nepalese people to have a habit of eating protein rich Soyabased Food in their dietary. During this period of 7 years, the daily consumption is quite satisfactory."

Letter from T.B. Gubhaju, owner. 1991. May 15. His son, Shekar Bajrachakarya, age 24, who recently passed his 3-year Diploma in Mechanical Engineering, First Division (Tribhuvan University, Thapathali), has been running Nepal Tofu Factory's tofu plant for the past 7 years. He is very interested in having his son learn how to make new soy products such as soymilk ice cream, soy yogurt, and soy products made by low-cost extrusion cooking.

Two letters from T.B. Gubhaju. 1991. June and Oct. 6. Nepal Tofu Factory was founded in 1980 by his wife, Mrs. Ganga Laxmi, for the purpose of making tofu and introducing the people of Nepal to soyfoods. Mr. Gubhaju is a civil engineer; he graduated with a bachelor's degree in civil engineering from India in 1959. He took up the tofu business after his retirement from government service. Actual commercial production of tofu began in Dec. 1983, and he has made only one product, tofu, since the beginning. The product has never been labeled, but consumers recognize it by its distinct dimensions and a mark. The address has not changed from the start. He thinks that his company was the first in Nepal to make tofu at a cottage level with Japanese equipment and technology. He purchased the equipment from Takai Tofu & Soymilk Co. in Japan for Rs. 300,000 (3,000,000 yen) in 1983. He feels that one reason for the company's success is that his tofu is made hygienically with equipment. He presently makes about 1,0000 kg/week of tofu. The company employs 6 people (including the owners): 1 manager, 3 production workers, and 2 office workers. The company has grown at the rate of about 15% a year for the past 2-3 years. The size of the building is 25 by 12 feet. It is a sole proprietorship. Sales last year were about Nepali Rs. 300,000 (approximately US$10,000). The net worth of the business is about US$30,000. He is planning to introduce soy ice cream, yogurt, and cheese. He also holds a license to make Soya Based Cereal Infant Food with a capacity of about 400 tons/year.

6330. **Product Name:** No Egg Salad.
Manufacturer's Name: San Diego Soy Dairy.
Manufacturer's Address: 2965 5th Ave., San Diego, CA 92103.
Date of Introduction: 1983. December.
New Product–Documentation: Talk with Gary Stein. 1989. Feb. 17. He thinks this product was introduced in about Dec. 1983.

6331. **Product Name:** Coco Pudding (100% Dairyless).
Manufacturer's Name: San Diego Soy Dairy.
Manufacturer's Address: 2965 5th Ave., San Diego, CA 92103.
Date of Introduction: 1983. December.
Ingredients: Tofu (organically grown soybeans, filtered water, natural nigari), soymilk, coco powder [cocoa powder], honey, malt syrup, vanilla.
Wt/Vol., Packaging, Price: 4 oz (113.5 gm).
How Stored: Refrigerated.
New Product–Documentation: Label sent by Gary Stein. 1989. 2.5 inch diameter. Dark blue and light blue on white. Talk with Gary Stein. 1989. Feb. 17. He thinks this product was introduced in about Dec. 1983.

6332. Wee, Jae-Joon; Lee, Hyong-Joo. 1983. [Characteristics of amino acid fortified tofu manufactured by coprecipitation of whey and soybean proteins]. *Han'guk Nonghwa Hakhoe Chi* (*J. of the Korean Agricultural Chemical Society*)

© Copyright Soyinfo Center 2013

26(4):205-10. Dec. [11 ref. Kor; eng]
• ***Summary:*** "The contents of total solids and protein of traditional tofu were about 19% and 13%, respectively, while those of the whey-soybean tofus were 17.3%-18.1% and 10.9%-11.3%, respectively. The 5-15% of lactose in whey-soymilk mixture was transferred into the tofus. The content of sulfur-bearing amino acids in the fortified tofu from 3:1 mixture of whey and soymilk was 3.8g/100g protein which indicated about 50% fortification of the amino acids as compared to the traditional tofu which contained 2.54g/100g protein of the sulfur-bearing amino acids." Address: Dep. of Food Science and Technology, College of Agriculture, Seoul National Univ., Suwon, South Korea.

6333. Soyfoods company business cards. 1983-1984. 1 p.
• ***Summary:*** 1. American Soybean Association (St. Louis, Missouri).
2. The Soyfoods Center (Lafayette, California).
3. Penguino's Inc. (Rochester, New York).
4. Michiana Soyfoods, Inc. (Mishawaka, Indiana).
5. Kikkoman Marketing & Planning, Inc. (San Francisco, California).

6334. **Product Name:** Firm Tofu (Soybean Curd Cake), and Soft Tofu (Soybean Curd Cake).
Manufacturer's Name: Aloha Products.
Manufacturer's Address: 4515 Centinela Ave., Los Angeles, CA 90066. Phone: 213-822-2939.
Date of Introduction: 1983.
How Stored: Refrigerated.
New Product–Documentation: Talk with Tom Uyehara. 1988. Oct. 24. In 1981 his parents, Hiroshi and Alice Uyehara started making 2 types of tofu just for sale at their Aloha Grocery Store. The firm was made with calcium sulfate. In 1983 when Tom graduated from college he set up a plant on the property in a warehouse behind the grocery store and continued to make those two types of tofu. The business was a partnership between himself, his sister, and his sister in law. The grocery store still exists and is run by his brother.

6335. Amrit, The Oakland Siddha Meditation Ashram. 1983. A vegetarian restaurant (Leaflet). Oakland, California. 2 panels each side. Each panel: 21.5 x 9.5 cm. Undated.
• ***Summary:*** Printed with brownish-red ink on off-white paper. "The Ashram is connected to the Amrit Restaurant..." Soyfoods menu items include: Tofu burger. Tempeh burger. Weightwatcher (Tofu or tempeh burger). Tofu salad melt. Tofu salad.

On one panel is a quotation from Swami Muktananda: "Food is the essence of life. It is through food that a person is born. He lives by food too. Therefore, food should be treated with love and respect." Address: 1107 Stanford Ave. at San Pablo, Oakland, California 94608. Phone: 415-655-8677.

6336. **Product Name:** [Asahi Kôya-dofu (Dried-Frozen Tofu)].
Foreign Name: Asahi Kôya-dofu.
Manufacturer's Name: Asahi Shokuhin K.K.
Manufacturer's Address: Nagano-ken, Japan.
Date of Introduction: 1983.
How Stored: Shelf stable.
New Product–Documentation: This colorful Japanese-language label was purchased in Japan in mid-1983. It is orange, red, yellow and black on white. On the front panel, a color photo shows a prepared dish containing two pieces of dried frozen tofu, 5 snow peas, a mushroom, and a shrimp. Logo: JAS seal of approval.

6337. **Product Name:** [Organic Tofu, and Seitan].
Manufacturer's Name: Berner Tofurei.
Manufacturer's Address: Monbijoustr. 19, CH-3000 Bern, Switzerland. Later: Obere Bahnhofstrasse, CH-3714 Frutigen, Switzerland. Phone: 33-71-3090.
Date of Introduction: 1983.
New Product–Documentation: Talk with Thomas Andersen, founder of Thomas Tempeh. 1990. May 24. In late 1986, after selling his company (Thomas Tempeh) in Denmark, he went to Switzerland to help out at Berner Tofurei, which was owned by Infinity, which was owned by all the macrobiotic big shots in Switzerland. He would guess that they had been in business for about 2 years. Their main product was organic tofu, but they also made seitan. Thomas worked there until 1987.

Letter (fax) from Verena Krieger. 1990. May 31. Berner Tofurei used to be named Restaurant Sesam. The company is now located at Obere Banhofstrasse, CH-3714 Frutigen, Switzerland. Phone: 33-71-3090. The owners are Roland and Dassa Wickart. They make 400 kg/week of tofu and 100 kg/week of tempeh.

6338. **Product Name:** Taboolie with Tofu.
Manufacturer's Name: Bountiful Bean Plant.
Manufacturer's Address: 903 Williamson St., Madison, WI 53703. Phone: 608-251-0595.
Date of Introduction: 1983.
Ingredients: Bulgar, tofu, celery, carrots, scallions, parsley, vinegar, water, shoyu soy sauce, oil, mint.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Refrigerated.
New Product–Documentation: James Lubbe. 1988. March. Abbreviated History of the Bountiful Bean. Label. 1985. 3.5 inch diameter. Self adhesive. Green on white. "Mid-Eastern Salad."

Label sent by Elizabeth Hanson of Bountiful Bean. 1991. Nov. 12. Same label as above, but company is now located in Ridgeway, Wisconsin 53582.

Leaflet sent by Paul Olson, new owner of Bountiful

6342. **Product Name:** Tofu.
Manufacturer's Name: Clearwater Farms.
Manufacturer's Address: 6125 Oakleaf Ave., Baltimore, MD 21215.
Date of Introduction: 1983.
Ingredients: Soybeans, water, nigari.
Wt/Vol., Packaging, Price: 16 oz.
How Stored: Refrigerated.
New Product–Documentation: Label. 1983, undated. 3 by 3.25 inches. Self adhesive. Black, green, red, blue, and brown on white. Illustration of a rural farm and stream. "Fresh as a mountain stream. Keep refrigerated. Send for free recipes."

6343. Daizu Fureeku No. 1: Gyokai no machinozonde ita kakumei-teki genryô desu [Soy flake Number 1: The revolutionary ingredient that the industry has long been waiting for (Leaflet)]. 1983. Hokkaido, Japan. 4 p. [Jap]
• ***Summary:*** Describes whole (non-defatted) soybean flakes that are used to make tofu in Japan. Stored under the proper conditions (in a cool, dry, dark place), they are guaranteed to keep their quality for 10 months. They are packaged in quantities of 15 kg and 30 kg (33 or 66 lb). An annotated flow sheet of the process for using the flakes to make tofu is given.

A table shows that from 30 kg of Soy Flake No. 1, a tofu maker can obtain 400 cakes (400 gm each) of regular tofu, compared with only 250 cakes if whole soybeans were used. This implies that the flakes give a 60% higher yield of tofu per unit weight than whole soybeans.

The address of the factory is Aza-Toyoni, Hirô-machi, Hirô-gun, Hokkaido.

6344. Davies, M. 1983. Erinomaista ravintoa soijapavuista [Tofu]. *Voi Hyvin* No. 1. p. 20-21. [Fin]

Manufacturer's Name: Fresno Tofu Co.
Manufacturer's Address: 943 E Street, Fresno, CA 93706. Phone: 209-268-1717.
Date of Introduction: 1983.
New Product–Documentation: Talk with Brad Kubota, owner. 1990. Nov. 28. He started making these two products in 1983.

6346. **Product Name:** [Hensel Tofu].
Foreign Name: Hensel Tofu.
Manufacturer's Name: Henselwerk GmbH (Marketer). First made by Auenland Tofu, then by Soyastern, then by KMK (Kurhessische Molkerei Kassel) in Kassel, West Germany.
Manufacturer's Address: Muehlenstrasse 5-7, Postfach 1120, D-7037 Magstadt, West Germany. Phone: 0719-4906.
Date of Introduction: 1983.
New Product–Documentation: Interview with Bernd

© Copyright Soyinfo Center 2013

Drosihn of Soyastern. 1987. Nov. 30. KMK (formally Kurhessische Molkerei Zentrale eG, Falderbaumstr. 23, D-3500 Kassel) is a dairy cooperative which produces tofu for Hensel. Hensel does not produce any tofu itself. KMK makes about 2,500 kg/week of tofu for them. Letter from Harry Whitford of Soyastern. 1987. Dec. 14. Henselwerk GmbH, Muehlstrasse 5-7, Postfach 1120, D-7037 Magstadt, West Germany, makes an estimated 2,000 to 2,500 kg/ week of non-organic calcium sulfate or calcium chloride tofu. Hensel is a brand of Schoenberger Pflanzensäfte GmbH. They started to sell tofu in 1983. First they bought it from Auenland, then from Soyastern. Nowadays a dairy cooperative in Kassel (KMK) makes it for them.

Die Geschäftsidee. 1989. Dec. p. 33. This company in Magstadt, well known as a large supplier of dietetic foods, now makes tofu. Formerly, the enterprise dealt with other soy products. Because of its financial strength, its investment in fully automatic production equipment, and its large scale production, it is able to produce tofu at a low price.

Listed on the back of the package for Hensel Soja-Kost Soja-Schrot: Other products from the Hensel Soja-Kost Program. "Tofu comes in neutral tasting or marinated forms. It is made purely from plants and is a cholesterol free alternative to flesh or milk protein." Ad (2 by 5.25 inches, full color) in Kurier/Neuform. 1989. Dec. p. 21. "For Hensel Tofu and Tofu Rolls. The tofu is free of cholesterol and rich in protein. A color photo shows the tofu package and sliced tofu on a plate with onions and parsley.

Talk with Thomas Karas of Soyastern. 1990. March 14. Hensel's tofu is made by a dairy company named KMK (Kurhessische Molkerei Kassel) in Kassel.

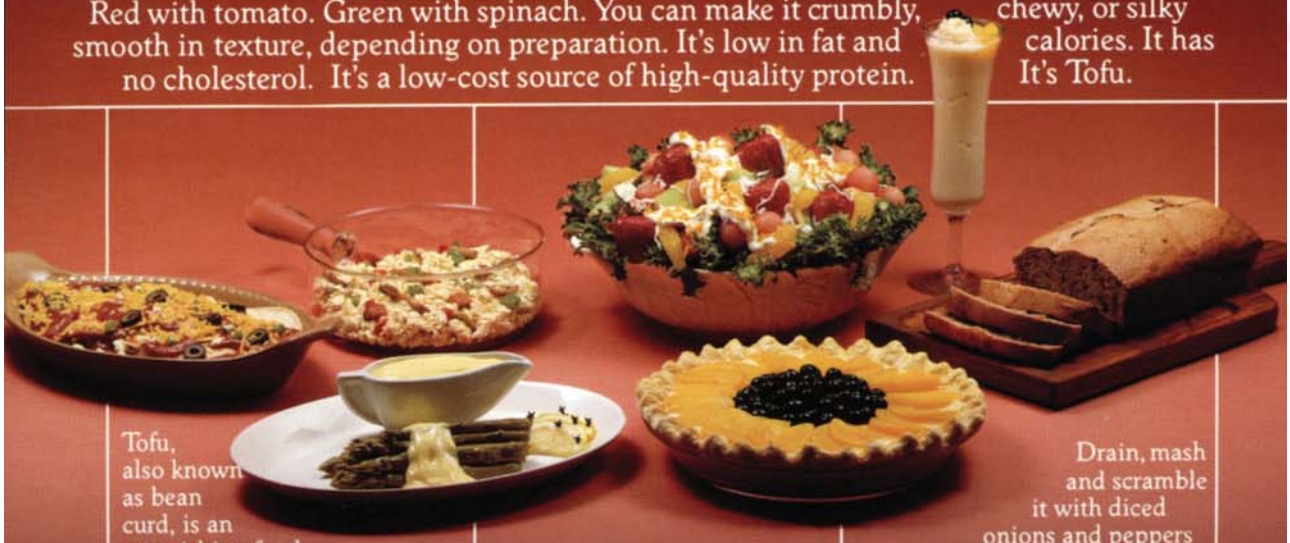
TOFU: The nutritious ingredient of 1,001 delicious meals.

With no taste of its own, it tastes like whatever you mix it with. It can be sweet as apples, hot as chili, or tart as lemons. Colorless, it takes on the color of other ingredients. Red with tomato. Green with spinach. You can make it crumbly, chewy, or silky smooth in texture, depending on preparation. It's low in fat and calories. It has no cholesterol. It's a low-cost source of high-quality protein. It's Tofu.



Tofu, also known as bean curd, is an astonishing food. It's natural—made by curding the mild white "milk" of the soybean, much like cheese is made from cow's milk.

Tofu is good for you. It's easy to digest.

It's rich in protein: comparable to beefsteak and whole milk. It provides your body with needed calcium and iron. What it doesn't provide is cholesterol. And it is low in saturated fats and sodium—things your body needs less of, if you're like most people.

Like rice, potatoes, cheese, wheat flour and corn, Tofu is a staple. It can be used in hundreds of ways to make thousands of dishes.

Tofu can be sliced, diced, mashed, pureed, frozen or dried. You can fry, steam, broil, boil, toast, or marinate it. You can blend it into almost any recipe and make a delicious meal richer in protein.

Freeze, defrost and squeeze it dry, and you get an excellent substitute for hamburger meat.

Drain, mash and scramble it with diced onions and peppers in place of eggs. It's terrific!

Breads, dips, sauces, dressings, soups, entrees, salads, casseroles, cookies, pies—you name it; you can make it with Tofu—and Tofu makes it healthier.

Use the coupon below. Get free Hinode Tofu recipes and get started on a whole new approach to nutritious, delicious cooking.

HINODE TOFU

Hinode Tofu is the finest quality Tofu available. It is made from the freshest soymilk from the finest quality soybeans; packaged with the freshness sealed in; dated for your protection and rushed to grocer's shelves daily. FITNESS FOOD

High in protein; low in saturated fats, calories and carbohydrates; devoid of cholesterol:
Hinode Tofu is the nutritious ingredient of 1,001 delicious meals.

Tofu. It's a simple, natural food. It's made by curding the mild white "milk" of the soybean, much as cheese is made from cow's milk.

Versatile

Tofu is versatile. You can fry, steam, broil, toast, bake it, or eat it fresh. You can slice, cube, mash, puree, freeze, dry or blend it.

Tofu is close to tasteless, so it mixes well with virtually any other ingredient. It picks up the taste and aroma of whatever you combine it with.

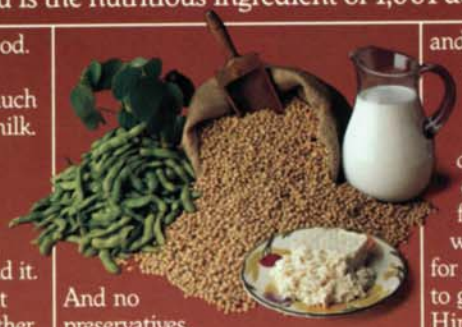
Near-perfect protein.

Best of all, Tofu is nutritious. It is rich in useable protein, the kind with all eight essential amino acids.

Tofu is efficient, delivering over 35% of its calories in protein. (Sirloin steak delivers about 24%; whole milk, about 22%.) And, gram-for-gram, protein from Tofu costs less than protein from beef. A lot less.

Tofu is low in saturated fat and carbohydrates. The fat it does have, is loaded with lecithin and the essential nutrient, linoleic acid.

There's no cholesterol in Tofu. None.



And no preservatives, no coloring, no additives of any sort.

Try it

If you're fitness conscious—or simply nutrition conscious—Tofu is one staple that should never be absent from your refrigerator.

Substitute it for milk products in your favorite recipes. Use it to replace fats and oils in dips, dressings and sauces. Use it with or instead of meat. Add it to breads and baked goods for more moisture and protein.

Hinode Tofu

Hinode Tofu is the finest quality Tofu available. It is made of the freshest soymilk from the finest quality soybeans; packaged with the freshness sealed in; dated for your protection and rushed to grocer's shelves daily. Ask for Hinode Tofu to be sure you're using only the very best.

For Hinode's Summer Series of Tofu Recipes, send a self-addressed, stamped envelope to Hinode Tofu Company, 526 Stanford Avenue, Los Angeles, CA 90013.

6355. Morinaga. 1983. The supermarket profit makers. Morinaga ever-fresh Angel silken tofu. The favorite new food for Western tastes (Poster). Morinaga Milk Industry Co., Ltd. 5-33-1 Shiba, Minato-ku, Tokyo 108 Japan. 2 p. Color. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.

6356. **Product Name:** Corn Cakes (Contain Okara) [Plain with "Bran," Cranberry, or Blueberry].
Manufacturer's Name: Nasoya Foods.
Manufacturer's Address: Mechanic St. Ext. (P.O. Box 841), Leominster, MA 01453.
Date of Introduction: 1983.
Ingredients: With Bran: Whole grain organically grown cornmeal, organically grown whole wheat flour, soybean bran, well water, 100% pure barley malt, unrefined corn oil, 100% pure maple syrup, non-aluminum baking powder.
Wt/Vol., Packaging, Price: 8.5 oz.
Nutrition: 35 mg sodium per 100 gm.
New Product–Documentation: Labels. 1983. 4 by 4.5 inches. Multi-colored. "100% Natural." Four cakes per packet. No sodium added.

Talk with John Paino. 1990. Sept. 9. The "soybean bran" in the bran muffin was okara. The product was a "toaster cake," like Thomas' Toaster Cakes, between a pancake and an English muffin. You heat them in a toaster then enjoy them for breakfast. They stopped making the product when they moved to their new plant. The oven broke.

6357. **Product Name:** Tofu Dip (Like Eggless Egg Salad).
Manufacturer's Name: Natural Pacific.
Manufacturer's Address: 153 Makaala St., P.O. Box 11001, Hilo, Island of Hawaii, HI 97520. Phone: 808-935-3220.
Date of Introduction: 1983.
Ingredients: Tofu (water, soybean curd precipitated with filtered seawater and/or natural nigari), sunflower seed oil, soy sauce, rice vinegar, onion powder, dill, garlic powder, turmeric, celery salt.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Refrigerated.
New Product–Documentation: Not listed in any Hawaiian City Directory prior to 1968. Talk with Ty Katibah. 1988. Feb. 10. Label. 1987. 2.5 by 2.5 inches. Rounded top. Black, yellow and white. "Free from preservatives and artificial additives."

6358. **Product Name:** Teriyaki Tofu.
Manufacturer's Name: Natural Pacific.
Manufacturer's Address: P.O. Box 4352, Hilo, Island of Hawaii, HI 96720. Phone: 808-935-3220.
Date of Introduction: 1983.
Ingredients: Tofu (water, organically grown soybeans, filtered seawater), shoyu, honey, ginger, onion, garlic, spices.
Wt/Vol., Packaging, Price: 3 oz.
How Stored: Refrigerated.
New Product–Documentation: Not listed in any Hawaiian City Directory prior to 1968. Talk with Ty Katibah. 1988. Feb. 10. Labels. Both original and current. Brown and white.

6359. New England Soy Dairy. 1983. Thank you for properly rotating and refrigerating your Tomsun Tofu (Poster). Greenfield, Massachusetts. 1 p. 11 x 14 inches.
• ***Summary:*** A lovely young lady with long blondish hair and short pants is sitting so that the top half of her body is upright on the left side of the ad and her bare legs run across the bottom. She is wearing a white T-shirt, on the front of which is written: "The best tofu is Tomsun fresh tofu." Just above that and centered is a rayed sun. Address: Greenfield, Massachusetts.

6360. **Product Name:** [Nutana Tofu Bolognese].
Foreign Name: Nutana Tofu Bolognese.
Manufacturer's Name: Nutana Helsekost.
Manufacturer's Address: Ringstedvej 531, DK-4632 Bjaeverskov, Denmark.
Date of Introduction: 1983.
Ingredients: Incl. Tomatoes, tofu, margarine, vegetable bouillon.
Wt/Vol., Packaging, Price: 440 gm can.
How Stored: Shelf stable.
Nutrition: Per 100 gm.: Calories 90, protein 4.5 gm, carbohydrate 6 gm, fat 5.5 gm.
New Product–Documentation: Manufacturer's catalog. 1981. Nutana Helsekost. 19 p. Contains a photo of and detailed information about every product. Label for cans. 1983. 9.5 by 4.25 inches. Paper. 6376. **Product Name:** Tempeh-Taco.
Manufacturer's Name: Soyplant Co-op Inc. (The).
Manufacturer's Address: 211 East Ann St., Ann Arbor, MI 48104. Phone: (313) 663-8638.
Date of Introduction: 1983.
Ingredients: Tempeh, tomatoes, tomato sauce, soy sauce, peanut oil, sesame oil, garlic, molasses, spices.
Wt/Vol., Packaging, Price: 12 oz.
New Product–Documentation: Label in Soy Plant scrapbook from about 1983. 3 by 2 inches. Red on white. 12 oz.

6377. **Product Name:** Tempehroni.
Manufacturer's Name: Soyplant Co-op Inc. (The).
Manufacturer's Address: 211 East Ann St., Ann Arbor, MI 48104.
Date of Introduction: 1983.
Ingredients: Tempeh, tomatoes, tomato sauce, soy sauce, peanut oil, olive oil, garlic, molasses, spices.
Wt/Vol., Packaging, Price: 12 oz.
New Product–Documentation: Label in Soy Plant scrapbook from about 1983. 3 by 2 inches. Green on white. 12 oz.

6378. **Product Name:** Sweet Earth Fiesta Rice Vegeburger.
Manufacturer's Name: Sweet Earth Natural Foods.
Manufacturer's Address: 597 Lighthouse Ave., Pacific Grove, CA 93950. Phone: 408-375-8673.
Date of Introduction: 1983.
Ingredients: Incl. tofu.
Wt/Vol., Packaging, Price: 12 oz vacuum packed.
New Product–Documentation: Listed in Fowler Brothers' catalog. 1991. Jan. p. 74. Talk with Russel Hicks of Sweet Earth. This product was introduced in 1983.

6379. **Product Name:** [Tofu Spread (Smoked, or Rustic)].
Foreign Name: Raeucher Tofu Aufstrich, and Tofu Aufstrich Rustical.
Manufacturer's Name: Tofuhaus Belsen. Changed to Yamato Tofuhaus Sojaprodukte GmbH on 1 Jan. 1984.
Manufacturer's Address: Moessingerstr. 41, D-7406 Moessingen 2-Belsen, West Germany. Phone: 07071-71094 or 95.
Date of Introduction: 1983.
Wt/Vol., Packaging, Price: Glass jar.
New Product–Documentation: Talk with Klaus Gaiser. 1990. May 8. This spread was meant to be spread with a knife on bread. It had a creamy consistency. It differed from Tofu Pastete, introduced in 1985, in that the latter could be cut into slices. The pastete is more like jelly; it contains agar. It is like a sausage in a glass jar. You can get it out in one piece. Note: This seems to be the first smoked tofu made in Europe since 1911.

6380. **Product Name:** [Tofu].
Manufacturer's Name: Tofurei Giorgio Sapia and Jenny Scott.
Manufacturer's Address: Munich, West Germany.
Date of Introduction: 1983.
New Product–Documentation: Die Geschäftsidee. 1989. Dec. p. 32. In 1983 Georgio Sapia and his business partner Jenny Scott opened a tofu shop in Munich with DM 7,500 of startup capital. He also ran a nearby Aikido studio. He learned by a taking a course from Takai Tofu & Soymilk Equipment Co. in Japan. Now the company makes 375 kg/week, sold direct to natural food stores.

6387. **Product Name:** Tofu (Organic Soft Style).
Manufacturer's Name: White Wave, Inc.
Manufacturer's Address: 1990 North 57th Court, Boulder, CO 80301.
Date of Introduction: 1983.
Ingredients: Organic soybeans, water, nigari (salt bitterns).
Wt/Vol., Packaging, Price: 16 oz packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.
How Stored: Refrigerated.
New Product–Documentation: Label. 1983. 4 by 5.75 inches. Blue, yellow and green on white. A huge wave is breaking from the left.

6388. **Product Name:** Wildwood Natural Sushi.
Manufacturer's Name: Wildwood Natural Foods.
Manufacturer's Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1983.
Ingredients: Organically grown brown rice, carrots, seasonal vegetable (zucchini, cucumber, red or green cabbage, broccoli or scallions), brown rice vinegar, nori sea

vegetable, umeboshi plum (salted Japanese plum), ginger, tamari.
How Stored: Refrigerated.
New Product–Documentation: Labels sent by Wildwood on their letterhead. 1983, undated. 2.75 by 1.75 inches. Self adhesive. Black and green on ivory. Silhouette of woods with birds. "Ready to eat Foods, Naturally."

6389. **Product Name:** Hijiki Rice Pie.
Manufacturer's Name: Wildwood Natural Foods.
Manufacturer's Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1983.
Ingredients: Brown rice, whole wheat pastry flour, hijiki, shiitake and button mushrooms, unrefined or safflower oil, tamari, ginger, garlic, sea salt.
Wt/Vol., Packaging, Price: 5 oz squares.
How Stored: Refrigerated.
New Product–Documentation: Label sent by Wildwood on their letterhead. 1983, undated. 3 by 2 inches. Self adhesive. Black and green on yellow. Silhouette of woods with birds. "Ready to eat Foods, Naturally. Perishable–Keep refrigerated."

Talk with Billy Bramblett, an owner of Wildwood. 1998. Aug. 8. This delicious product had a whole-wheat crust with a filling based on brown rice. They made it on big baking sheets, then they would cut it into 5-oz squares and wrap it. They sold it hot at the Good Earth.

6390. **Product Name:** Hummus.
Manufacturer's Name: Wildwood Natural Foods.
Manufacturer's Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1983.
Ingredients: Garbanzo beans, tahini, tamari, scallions, parsley, apple cider vinegar, olive oil, sea salt, spices.
Wt/Vol., Packaging, Price: 7 oz plastic tub.
How Stored: Refrigerated.
New Product–Documentation: Label sent by Wildwood

© Copyright Soyinfo Center 2013

on their letterhead. 1983, undated. 2.5 by 1.5 inches. Self adhesive. Black and green on white. Silhouette of woods with birds. “Ready to Eat Foods. Naturally. Perishable. Keep refrigerated.”

6391. **Product Name:** Good Puddin’.
Manufacturer’s Name: Wildwood Natural Foods.
Manufacturer’s Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1983.
Ingredients: Couscous, apples, raisins, apple juice, tofu, carob.
How Stored: Refrigerated.
New Product–Documentation: Point-of-purchase (POP) card sent by Wildwood Natural Foods. 1983, undated. 4 by 6 inches. No adhesive. Dark green on white. Silhouette of woods with birds. “Ready-To-Eat Foods, Naturally.” Of the five items listed, the bottom one reads: “Good Puddin’. Couscous, apples and raisins cooked in apple juice with a creamy carob-tofu topping. Sweetened with apple juice.”

6392. **Product Name:** Wildwood Tofu (Water Packed in Bulk).
Manufacturer’s Name: Wildwood Natural Foods.
Manufacturer’s Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1983.
Ingredients: Organic soybeans*, filter water, natural nigari. * = Grown in accordance with Section 26569.11 of the California Health and Safety Code.
Wt/Vol., Packaging, Price: 10, 15, 20, or 25 lb of tofu in a bucket with water.
How Stored: Refrigerated.
New Product–Documentation: Label for Wildwood Tofu sent by Michael Pierce. 1983. 3 by 6.5 inches. Self-adhesive label. Green on white. There is a ¼-inch-wide green border around the top, left, and right sides. Along the bottom is the green silhouette of a wild wood (forest) with birds flying over it in three places. The text below the product name reads: “Handmade with organic soybeans*, filter water and natural nigari, using the traditional cauldron method to produce the highest quality and finest flavor. ‘Our Specialty.’ Delivered fresh–Taste the difference.” Perishable, keep refrigerated. Note: In 1983. this label replaced the UFO Tofu label on Wildwood’s bulk water-packed tofu. Since this actual label has both the Fairfax and Santa Cruz addresses written across the bottom in white letters, it must date from 1986 or afterwards since Wildwood opened its Santa Cruz facility in 1986. The same label was used, from about 1986 on, on the outer of sleeve of trays of 16 x 10 oz cakes of vacuum pack tofu make at Santa Cruz. Wildwood used this label on their bulk tofu until about 1994.

On sale in Berkeley. 1988. Aug. 30. Vacuum packed in 10 oz. and 20 oz. sizes.

Product with Label purchased at Safeway supermarket in Lafayette, California. 1992. Dec. 9. The product is now named “Wildwood Natural Foods Organic Tofu–Firm.” It is sold in a 16 oz. water-packed tub, retailing for $1.39. 4.75 by 5.75 inches. Plastic film. Green, black, white, and red. “Local and fresh. Complete vegetable protein–Contains all 8 essential amino acids.” “Fresh tofu” is written in Chinese characters on the front panel. Nutritional information is given. “Ingredients: Soybeans (organically grown in accordance with the California Foods Act of 1990), filtered water, nigari. Santa Cruz, CA 95062. Fairfax, CA 94930.”

6393. Wilson, L.A.; Johnson, L.D.; Love, J.A. 1983. Influence of soybean variety and method of processing in tofu manufacture. In: 1983. Proceedings of the 6th World Congress of Food Science and Technology. Dublin, Ireland. See p. 102-03. *

6394. **Product Name:** [Tofu in Sauces (Tamari Sauce, Herb Sauce, or Tomato Sauce)].
Foreign Name: Tofu in Tamarisaus, Kruidensaus, or Tomatensaus.
Manufacturer’s Name: Witte Wonder Natural Products B.V.
Manufacturer’s Address: Den Haag, Netherlands.
Date of Introduction: 1983.
Wt/Vol., Packaging, Price: Bottles.
New Product–Documentation: Label. 1983. 6 by 1.5 inches. Self adhesive. 2 color: Brown and light green on white. Illustration of product vegetable. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Richard Leviton. 1983. Trip to Europe with American Soybean Assoc. Oct/Nov. Unpublished manuscript. p. 24. The three varieties of marinated tofu were selling very well by Nov. 1983. Tofu in tamari sauce, in spicy sauce, in tomato sauce–very good. Bottled, shelf stable, pasteurized, boiled in the bottles in a giant kettle for 1.5 hours, they keep for 1 year. In all of Holland there are about 500 health food stores. Tofu in tomato sauce: dice sized chunks clumped together in marinade. Not premarinated but flavor soaks in during pasteurization. Not too salty. Weak tomato taste.

6395. Aubert, Emmanuelle. 1983. Les 9 grains d’or dans la cuisine [The nine golden grains in the cuisine. 2nd ed.]. Paris: Le Courrier du Livre. 286 p. Illust. by C. Galinet. Index. 22 cm. [Fre]
• ***Summary:*** The subtitle on the cover reads: 400 simple and savory recipes. Menus and advice on good health. Contents: Introduction. 1. The cereals (see p. 28-31 for instructions for making seitan at home from 500 gm wheat flour, plus 8 seitan recipes). 2. Breads. 3. Legumes: Cooking legumes, lentils, haricots, dry peas, chick-peas, azuki beans, soya. 4. Vegetables. 5. Soups. 6. Animal products. 7. Condiments, aromatics, and sauces (incl. tamari and miso). 8. Desserts. 9.

Beverages. 10. 80 menu ideas. 11. Pregnancy and the feeding of young infants. 12. Some natural remedies. Where to buy supplies.

Soy-related recipes include: Making tofu at home (p. 87-91; illustrations and method taken without credit or permission from *The Book of Tofu* by Shurtleff & Aoyagi). Yuba. Grilled tofu (p. 91). Tofu with nuts (*noix*) and miso. Skewered tofu. Tofu salad (p. 92). Tofu with vegetables. Onions with tofu. Okara croquettes. Soymilk with fruits (p. 93). Making tempeh at home (p. 94-95). Tempeh goreng. Tempeh bachem (p. 95). Keripik tempeh (tempeh chips; p. 96). Tempeh croutons (p. 96). Pate of vegetables with tofu (p. 126). Jardinière au tofu (p. 128). Peas with tofu (p. 128). Soy sprouts made from mung beans (p. 129-30).

Pages 191-94 give basic information on the following fermented soya condiments: tamari, miso (Hacho [sic, Hatcho] miso, barley miso, rice miso). Pages 278-79 list manufacturers and handlers of various foods used in this book, and pages 280-81 give their addresses: Yellow soybeans: Celnat, Les Sept Marches, Le Seuil, Lima. Miso: Celnat, Lima, Les Sept Marches, Le Seuil, le Bol en Bois, Tenryu. Only Lima and Les Sept Marches manufacture miso in France. Tamari: Celnat, Le Seuil, Les Sept Marches, Lima, le Bol en Bois, Tenryu. Nigari: Le Bol en Bois, Tenryu. Tofu: Le Bol en Bois, Tenryu, Soy. Tempeh: Traditions du Grain, Le Bol en Bois. Tempeh culture: Semailles. Koji: Les Sept Marches, Tenryu, Le Bol en Bois. Amasaké: Traditions du Grain. Soymilk: Celnat, Lima.

A photo on the rear cover shows Aubert, a woman.

Note: This is the earliest French-language document seen that mentions amazake, which it calls "Amasaké." Address: France.

6396. Azumaya Inc. 1983. Tofu! New way to serve the world's oldest meat substitute. Meet the bean that thinks it's meat. San Francisco, California 94124. 1 p. Undated. 21 x 43 cm.

• ***Summary:*** This two-color poster is printed yellow and white on brown. To the left is a yellow soybean cartoon character (registered trademark), whose two arms are held up in a gesture of joy, legs are short and feet are oval. His big smile comes up to the level of his eyes and eyebrows. Below him is written in white: "Hi! I'm li'l soy." In the lower right corner: "Write for recipes. Send self-addressed stamped envelope to: Consumer Services, Azumaya Inc." Beside the address is the Azumaya company logo: The letter "A" inside a sort of four-leaf clover with four arrows pointing at it. Address: 1575 Burke Ave., San Francisco, California 94124.

6397. Bramblett, Billy. 1983. Tofunction. Fairfax, California.

• ***Summary:*** This song, 2 minutes and 35 seconds long, is on an audio cassette accompanied by rock music (guitar and drums). The lyrics go: "White 'n' creamy / Hot 'n' steamy / Smooth 'n' dreamy / Soya beany.

Chorus: Tofunction. Tofunction. Tofunction [pronounced toe-FUNK-shun].

Repeat first verse and chorus.

Rinse 'em up, soak 'em up, grind 'em up, cook 'em up, squeeze 'em up, curd 'em up, press 'em up, cool 'em up, cut 'em up, pack 'em up, eat 'em up!

Repeat first verse, chorus, and second verse.

Repeat first verse and chorus.

Note: The lyrics to the second verse were first published in January 1981 in an article by Linda Xiques titled "A surprised convert to tofu" in the *Pacific Sun* (Mill Valley, California). The lyrics to the second verse were published in April 1985 in an article by Gilbert Chan titled "Business owner sings tofu's praises" in the *Marin Independent Journal* (California).

Letter from Bill Bramblett. 1998. July 27. "The recording of Tofunction is a songwriter demo not for release, but since you expressed interest... I also have a video of me singing this song solo and acoustically on a student TV show (called Totally Tofu) and will send my only copy if you promise to send it back."

An article by Gary Klein titled "King of tofu getting ready to make a run" (*Marin Independent Journal,* 14 May 1999) states that in 1983 Bramblett composed and recorded "Tofunction," a song extolling the virtues of tofu. The recording can be heard at Wildwood's Web site, www.wildwoodnaturalfoods.com. The lyrics are given in full.

Talk with Bill Bramblett. 1999. May 27. He wrote the lyrics to this song (both parts) in 1981 but first recorded and registered it with the Library of Congress in 1983 as a copyright. Even though Billy is a member of ASCAP (American Society of Composers, Authors and Publishers) as a song writer, he has never gotten any royalties from this song. Address: Owner, Wildwood Natural Foods, Fairfax, California.

6398. Burwash, Peter; Tullius, John. 1983. Peter Burwash's vegetarian primer. New York, NY: Atheneum. xvii + 227 p. Illust. No index. 24 cm. [23 ref]

• ***Summary:*** "An incredibly energetic and highly motivated man, Peter Burwash has been described as the most famous vegetarian athlete in the world today." He is best known as a tennis player.

Contents: Contents

Part I: The vegetarian fugitive. Becoming a fugitive. The myth of vegetarianism. So you want to be a fugitive?

Part II: If it's good enough for Pythagoras, it's good enough for me: A short history of vegetarianism. Pythagoras. The Romans, The Renaissance and Enlightenment. Byron, Tolstoy, and Wagner. Gandhi. George Bernard Shaw.

Part III: The pros and cons of meat-eating. Are you turning your body into a garbage can? Is man designed to eat meat? (carnivores, omnivores, herbivores, frugivores, what about man? Man is clearly a frugivore, just like the

© Copyright Soyinfo Center 2013

anthropoid apes, our immediate ancestors). Diseases and impurities in the animals we eat (undulant fever, trichinosis, salmonellosis, toxins in fish). Chemicals we pump into our animals (pesticides in meat, antibiotics in meat, growth promoters, tranquilizers, what slaughtering can do, what the butcher does when he gets his chance). Diseases related to meat-eating (heart disease, cancer, kidney and intestinal disease). The ethical side of vegetarianism (ecological considerations, the waste of our energy and water, the cruelty of modern farming, experimenting with animals, the slaughterhouse).

Part IV: Going vegetarian. Phase One: The nutritional concerns. An adequate diet without meat (making the change gradually, is a vegetarian diet adequate, variety and balance–the keys to a healthy diet, the four basic food groups). Protein (getting the right amounts of protein, but does a vegetarian diet supply enough protein?, protein complementing–yes or no?). Fats and Cholesterol (saturated or unsaturated–does it matter?). Carbohydrates and Sugar (are carbohydrates fattening?, fiber). The Special Problems of a Vegetarian Diet (veganism, the lacto-ovo vegetarian diet, crank diets).

Part V: Going vegetarian. Phase Two: Making Your Vegetarian Diet Work. Shopping for Vegetarian Foods (where to shop, what to look for, grains, legumes, nuts and seeds, dairy products, sweeteneers, oils, fruits and vegetables, miscellaneous foods). Weird foods, or What'll I do with this bag of tofu? (the soybean and its relatives, other weird foods). Selecting vegetables and fruits (vegetables, fruits). The basic preparation of vegetarian foods (basic cooking of vegetables, basic cooking of grains, basic cooking of beans, sprouts). Dining Out (restaurants, handling yourself in a vegetarian restaurant, dining at 40,000 feet).

Part VI: Vegetarianism and the athlete. The vegetarian athlete. How an athlete gets his energy (carbohydrates or protein for energy?, carbohydrate loading, eating before competition, the importance of drinking water).

Part VII: Vegetarian recipes (breakfast, lunch, soups, homemade bread and pastry, salads, dinner, sauces, desserts).

The chapter on "Weird foods" has many nice, very positive things to say (p. 121-23) about tofu, soy milk, soy flour, soy grits, tamari, miso, tempeh okara, lecithin granules and liquid lecithin.

Soy related recipes: Mystery sandwich spread (with 1 cup whole soybeans, cooked until soft, p. 174). Eggless mayonnaise (with soy milk, p. 188). Tofu cabbage casserole (p. 196). Almond stir-fried vegetables with tofu (p. 208-09). Sweet and sour tofu (p. 209). Tofu cheesecake (p. 216-17).

6399. Business Trend Analysts, Inc. 1983. The health and natural food market. Commack, New York: Business Trend Analysts. 199 leaves. 28 cm. [9 ref]
• ***Summary:*** One section of this study (including pages 108-111) concerns the soyfoods market. It consists largely of statistics compiled by the Soyfoods Center and Soyfoods Association of North America. No permission was obtained from Soyfoods Center to use this information. Address: 2171 Jericho Turnpike, Commack, New York 11725.

6400. Cadwell, Jane. 1983. Tofu [Tofu]. Sao Paulo, Brazil: Editora Ground Ltda. 87 p. Illust. No index. 21 cm. [2 ref. Por]
• ***Summary:*** This is the earliest known book or cookbook about tofu ever published in Portuguese or in Brazil. Contents: Preface. Introduction. Main dishes. Soups and salads. Sauces, patês and shakes. Tarts, cakes, and pies. The book is dedicated to William Shurtleff and Akiko Aoyagi Shurtleff. The author is married to a Japanese man, Mr. Abe. Address: Sao Paulo, Brazil.

6401. Chico San Inc. 1983. Mrs. Lima Ohsawa–Pioneer in health. Chico-San's specialist in macrobiotic foods (Leaflet). Chico, California 95927. 1 p. 28 cm.
• ***Summary:*** On the top half of this black-and-white leaflet is a portrait photo of Lima Ohsawa. Near the bottom is Chico-San's logo, a spiral. Just above that: "Look for these special Chico-San imports: Lima Soy Sauce and Lima Tamari; soybean puree (miso); salt plums; mineral-rich mercury-tested seaweeds–hijiki, kombu, wakame, nori, and kanten; 16 Herb Lima Mu tea; Ohsawa Twig tea; malt vinegar; azuki beans; black soybeans; barley koji; kuzu; nigari [a coagulant for making tofu]; tekka; light and dark sesame oils; and lotus root tea." Address: Chico, California.

6402. Chinese menus: Great meals in minutes. 1983. Alexandria, Virginia: Time-Life Books. 104 p. Illust. (some color). Index. 29 cm.
• ***Summary:*** These recipes were contributed by nine chefs; a brief biography and photo is given for each. Barbara Tropp and Nina Simonds are among them (p. 4). Contains detailed instructions on the preparation of Chinese food, recipes, and sample menus.

The section titled "Pantry (for this volume) includes: On the shelf–"Black beans, canned or packaged. Chinese fermented black beans, also known as Chinese salted black beans." Hoisin sauce (sweet, soybean based). Oils: Oriental sesame oil, a highly aromatic oil, is for garnishing, not cooking. Always buy Chinese or Japanese brands. Sesame paste. Soy sauce: Extracted from fermented soybeans, comes in light and dark. In the refrigerator–Bean curd or tofu.

Soy related recipes: Bean curd salad with peanuts (p. 65). Steamed sea bass with black bean sauce (which includes "1 tablespoon Chinese fermented black beans," p. 65). Mushroom soy sauce is good to have on hand (p. 71). Crisp chicken strips with black-bean orange sauce (the sauce ingredients include "2 tablespoons Chinese salted black beans," p. 81).

Diced chicken with fermented black beans (p. 87). Stir-

fried spinach with fermented bean curd (with "1 small square fermented bean curd, mashed," p. 90).

6403. Dahlen, Martha; Phillipps, Karen. 1983. A popular guide to Chinese vegetables. New York, NY: Crown Publishers, Inc. x + 113 p. Illust. (color). Index. 29 cm. [2 ref]

• ***Summary:*** This book was written for non-Chinese in the maze of Hong Kong's street markets; it originally appeared in 1980 and 1981 as two volumes, published in Hong Kong. This is the 1st American edition. The romanization of names in this book represent the Cantonese pronunciation system of Herklots.

The section on "Seasoning sundries" has entries (p. 3-4) for: Light soy sauce (2 Cc = Chinese characters are given) See yau [Note: See = fermented black soybeans] or Sang chau. "This is the best grade of sauce. 'Light' means it is not thick or viscous and has a delicate or fine flavor."

Dark soy sauce (2 Cc) Lo chau. "'Dark' here means thick and of stronger flavor." There are various types, each of which has been fermented with different special ingredients such as mushrooms, ginger, etc. Yet they all stain food black.

Fermented black beans (2 Cc). Dau see [fermented black soybeans]. "These are whole soybeans which have been cooked, salted and fermented." "These beans are one of the most versatile, convenient, economical and flavourful Oriental seasonings. The Cantonese usually mash them with garlic and stir-fry or braise them with pork, beef, shellfish, fish or vegetables, particularly with green and red vegetables for colour.

"General directions for making black bean sauce are as follows: Use approximately twice as much, by volume, of black beans as garlic. Crush the garlic cloves by smashing them with a single blow of a heavy object (flat side of a cleaver) on a cutting board. Remove the papery husk, then put both beans and garlic in a small bowl and mash together, either with a spoon or the butt of the cleaver's handle. Approximately 1 tablespoon of mash will season 1-2 cups of food.

"To cook, add the mash to the hot oil before the ingredients. In a mixture, add the mash just before the last batch of ingredients to be fried, return all the rest to the wok, season with a pinch of sugar and light soy sauce,... Vary the sauce from heavy to light."

The section on "Soybean sprouts" (*Daai dau nga choi,* 4 Cc = large bean sprout vegetable) has an unusual structure. First comes information on soybean sprouts: Appearance, quality, general comments, preparation, cooking. Then a nice color illustration, followed by two recipes using these sprouts.

Then come subsections on Bean curd (*Dau fu,* 2 Cc).

Water bean curd (*Seui dau fu,* 3 Cc. "This is the most common, and perhaps most versatile, kind of bean curd." Three recipes).

Note. This is the earliest English-language document seen (April 2013) that contains the term "Water bean curd."

Wrapped bean curd (*Bo baau dau fu,* 4 Cc. This type is sold from tubs of water rather than from a wooden board. "Each square has been wrapped in cloth, so pieces have rounded edges and cost 2-3 times more than common fresh dau foo. This is the finest, most delicate curd, and is usually used only for steaming" as in Lo Siu Ping On, a traditional Cantonese dish).

Dry or pressed bean curd (*Dau fu gonn,* 3 Cc [pressed tofu]. This type is firm and therefore "easily sliced or cut into shreds and stir-fried. Two types exist as illustrated; the larger, 3-inch square white one is plain; the smaller, 2-inch square reddish one is lightly coated with 5-spice powder {ng heung fun, 3 Cc}." One recipe is given).

Deep-fried bean curd (*Dau fu pok,* 3 Cc. These are small cubes or squares about 1 inch on a side. Color illustration. One recipe is given).

Page 81. Recipe for Mushrooms & ribs with black bean sauce. In the section on Lotus root is a recipe (p. 87) for Braised pork and lotus which calls for "Fermented red bean curd" (*Naam yue,* 2 Chinese characters are given).

"Because the 'naam yue' tends to preserve the other ingredients, this dish will keep for at least a week in the fridge, and will improve in flavour as it keeps."

Note: "A combination of equal parts dark and light soy sauce may be substituted for the 'naam yue,' but the taste" and texture will be completely different.

On page 106 is a short section on Kudzu (*Fun got,* 2 Cc, with no specific recipes but with suggestions for cooking).

6404. Driver, Christopher. 1983. The British at table, 1940-1980. London: Chatto & Windus–The Hogarth Press. xi + 212 p. Illust. Index. 23 cm. [220* + 169 endnotes]

• ***Summary:*** Chapter 2, titled "The seven lean years," discusses the period from 1941 to 1947 when food was rationed during World War II in Britain. An excerpt from the diary of Vere Hodgson for 7 May 1944 (p. 16) states: "I have an order with the Dairy for a pound of sausage... of soya bean flour."

Chapter 6, "Tastes of Britain: the age of choice" includes long discussions (p. 99-107) of the rise of vegetarianism and health / whole foods. Since "the free market in 'flesh food' returned to Britain it has been clear that shortages converted fewer people to vegetarianism than abundance does." "The distinction between vegetarianism and whole food is fine." Almost all health food restaurants are vegetarian, but not all vegetarian restaurants serve health food. "By 1980, the profession of vegetarianism no longer sounded like the equivalent of wearing sackcloth and ashes." Also discusses TVP and Worcestershire sauce (p. 99), "plant milk" and single cell proteins (p. 137-38), "TVP (texturised vegetable protein)," "meat extenders or substitutes of this kind, chiefly derived from the soy-bean," "march up to Soho

© Copyright Soyinfo Center 2013

Chinatown and sit down to a dish of beancurd [tofu] made from the same soybean staple by a cottage industry process ecologically superior to the multi-million pound machinery and vast energy input that western culture tolerates for the sake of making fake steak," "The first tentative flights of artificial protein may seem a long way from the precious mating calls of contemporary British foodies..." (p. 139).

World population continues to grow, and global food production must grow with it. "At some point not very far along that road, the role played in human diet by comparatively inefficient protein conversion machines such as cows, pigs and chickens, however intensively bred and farmed, would have to be diminished or abandoned. Here and there, the animals concerned would be relegated to agricultural zoos, to be gazed at with wild surmises by people who obtained their nourishment chiefly from the protein output of those industrious worms, bugs, and funguses, appropriately flavored."

Contains an interesting bibliography and endnotes. Address: England.

6405. Editors of *China Pictorial*, Beijing. 1983. Chinese cuisine from the master chefs of China. Boston, Massachusetts, and Toronto, Ontario, Canada: Little, Brown and Co. 240 p. Illust. Index. 26 x 24 cm.

• ***Summary:*** An overview with many color illustrations. The section titled "The ingredients" contains color photos of them plus a glossary that includes Chinese names: Dried bean curd stick, dried bean curd sheets, bean curd fresh gluten, fried gluten (p. 42-43). Soybean paste (salted and fermented), fermented bean curd, soy sauce (p. 47). Qingdou (green soybean), huangdouya (soybean sprouts) (p. 51). Doufu (bean curd, tofu), fuzhu (dried soybean milk [dried yuba sticks]), mianjin (gluten), youpi (dried soybean curd sheets [pressed tofu sheets]), kaofu (wheat gluten / vegetable steak) (p. 52). Jiangyou (soy sauce) (p. 54). Huang jiang (soybean paste, salted and fermented), jiangdoufu (fermented bean curd).

White soup (bai tang, with soybean sprouts, p. 56).

Folk nutrition: "All illnesses originate from what is taken into the mouth." On this page is a description of the therapeutic properties of: "Soybeans: their flavor is sweet, raw; their character is warm, and when fried [or cooked] it becomes hot..."

A long section on soybeans (p. 74) begins: "They are the pivot-point of Chinese flavor and nutrition." Includes brief descriptions of how to make soybean milk, bean curd, deep-fried bean curds, "bean curd puffs," and yuba.

Soy-related recipes: Slab bacon with fermented bean curd (Nanru kouru, with "3 cubes fermented bean curd, p. 113). Sweet bean paste sauce (tiendoujiang, for Peking duck; it is made from "fermented black soybeans," p. 140). Braised "shark's fin in white sauce (baipa yuchi, with white soup and soy sauce, p. 199). Mrs. Pockmark's bean curd (mapo doufu, p. 207). Silkworm cocoon bean curd (canjian doufu, p. 208).

Note: This is the earliest English-language document seen (Nov. 2011) that uses the term "fermented black soybeans" to refer to fermented black soybeans.

There is a section of seven vegetarian recipes (p. 199-205).

6406. Flaws, Bob; Wolfe, Honora Lee. 1983. Prince Wen Hui's cook: Chinese dietary therapy. Brookline, Massachusetts: Paradigm Publications. v + 201 p. Index. 23 cm. [16 + 25 footnotes]

• ***Summary:*** The story of Prince Wen and his cook appears in Chuang-Tzu's *Inner Chapters* (trans. G.F. Feng & J. English, New York: Vintage Books, 1974, p. 55). Diet is the third of the Eight Limbs of Classical Chinese Medicine. The other 7 limbs are meditation, exercise, astrology, geomancy, massage, herbology, and acupuncture.

If a man is diagnosed as having a liver imbalance, such as "liver fire blazing upwards," he should consume food and herbs that will sedate, calm, and cool the liver and lower the Yang; foods that raise the Yang, produce internal fire, or aggravate the liver should be avoided.

Page 35 notes that foods that are energetically cool and cold include soy products (such as tofu, tempeh, soymilk). Foods that produce fluid and are damp in nature include soybean and tofu.

In the section titled "Categorization of Foods," a number of individual foods are analyzed in detail, based on characteristics described below: Aduki bean, agar (p. 143), alfalfa, almond, and amasake (fermented glutinous rice) (p. 144), black soybean (p. 148), gluten (seitan, p. 158), kudzu root powder (p. 161), seaweed (p. 179), soybean (p. 181), soybean oil (p. 181), and tofu (p. 185).

Taking tofu, then black soybeans, as examples of the format used. Tofu: Nature: Cool. Flavor: Sweet. Meridian: Lungs, large intestine, stomach. Direction: Descending. Quality: Yin and yang. Elemental quality: Earth. Treatment principles: Tonifies Qi [ch'i] and Blood, clears Heat, sedates Yang, tones Yin, harmonizes the Middle Burner, produces Fluid, lubricates Dryness, counteracts toxins. Commonly used in the treatment of conjunctivitis, chronic amoebic dysentery, diabetes, sulfur poisoning, and alcoholism. Contraindications: spermatorrhea.

Black soybean: Nature: Neutral. Flavor: Sweet. Meridian: spleen and Kidneys. Direction: Ascending. Quality: Yang. Elemental quality: Earth. Treatment principles: Tonifies Qi [ch'i] and Blood, activates the Blood, benefits Water, expels Wind, counteracts toxins. Commonly used in the treatment of edema, Wind Bi (rheumatism), jaundice, beriberi, and spasms.

The remedial recipes are divided into Chinese (p. 96-116) and American (p. 117-35) types. Soy-related recipes include: Lord Buddha's delight casserole (with tofu, p. 88-89). Clams with black bean garlic sauce (with salted

© Copyright Soyinfo Center 2013

black beans [fermented black soybeans], p. 91). Five jewel casserole (with tofu or tempeh, p. 92). Quick braised soybean sprouts (p. 104).

Amasake cheesecake with cherry topping (p. 119). Shepherd's pie with seitan (Gluten meat, p. 122). Ginger seitan beef (p. 122). Seitan veal marsala (p. 129). Aduki bean brownies (p. 133). Dairyless pumpkin pie (with soymilk or cashew milk, p. 135). Many recipes use soy sauce or tamari in their braising liquid. The cookbook also uses meat, poultry, fish, and sugar quite extensively.

6407. Ford, Richard; Andersen, J.; Andersen, S. 1983. Juel Andersen's sea green primer. A beginner's book of sea weed cookery. Creative Arts Book Co., 833 Bancroft Way, Berkeley, CA 94710. 64 p. Illust. Index. 23 cm. [13 ref]
• ***Summary:*** A Glossary (p. 9) includes miso, mochi, tahini, tamari, tempeh, tofu, suribachi. Soy-related recipes: Tempeh (p. 23, 24). Tofu (p. 25, 28, 29, 43).

Sea vegetable chapters: Agar. Arame. Dulse. Hijiki. Kombu. Nori. Wakame. Common sea greens. Address: California.

6408. Fruin, W. Mark. 1983. Kikkoman: Company, clan and community. Cambridge, Massachusetts: Harvard University Press. xiv + 358 p. Illust. Index. 24 cm. [230 ref. Eng]
• ***Summary:*** A superb business history and No. 35 in the series Harvard Studies on Business History. Contains 8 illustrations, 16 figures. and 30 tables. All Japanese names are written, Japanese style, with the family name first, followed by the given name.

Contents: Editor's introduction, by Alfred D. Chandler, Jr. Acknowledgments. Introduction (author's. The company began brewing shoyu in 1661 in the town of Noda, 90 minutes by modern train northwest of Tokyo. Phase I: 17th century to 1887. Phase II: 1887 to 1917. Phase III: 1918 to 1946. Phase IV: Postwar democracy.

1. Factories in the fields: Rural-centered industrialization, the origins of shoyu, Noda soy sauce (In 1661 Takanashi Hyozaemon XIX began brewing shoyu in Noda), Mogi domination of the market, fermentation technology (preparation of wheat for koji, preparation of brine solution, culturing of the wheat and soybeans to make koji, process of fermentation), extraction or pressing (At the end of the Tokugawa period {1867} the standard wooden keg held 9 *shô,* 4.33 gallons, which was said to be the amount of shoyu consumed in one year), production and scheduling, the dual employment system (organization of work, work rules, 1909 wage agreement, hierarchies of work {in front office and factory}), industry and community, farms and factories in 19th century Japan.

2. Clan and cartel in Meiji Japan: Clan and cartel in the Meiji period, government-regulated markets, Noda brewers assert themselves (registration and promotion of the brand-name Kikkoman by Mogi Saheiji, in Japan, Amsterdam, Austria and California), the Noda Shoyu Manufacturers' Association (*Noda Shôyu Jôzô Kumiai;* a cartel formed in 1887 to stabilize price, control supply, and guarantee markets, cartel and costs, the challenge of Suzuki Tôsaburô / Tosaburo), research and development, distribution: the railroad (opened in late April 1911), social change and the cartel (the cost of charity, noneconomic motivation, from philanthropy to paternalism), the transformation of shoyu manufacture in the countryside.

3. From cartel to corporation and beyond ("A corporation requires a nucleus for centralization and coordination"): 1909 to 1918: period of preparation ("in 1914 three shoyu brewers from Choshi in Chiba prefecture had formed the Choshi Shoyu Company." The owners were Hamaguchi Yoshiuemon, Fukai Yoshibei, and Tanaka Genba) (remains of the cartel, the Noda Shoyu Company {began operations on 1 Jan. 1918}), 1918 to 1927: the first decade–process of incorporation (Jinsen Shoyu was a brand brewed in Inchon, Korea) (1918 to 1925: from committees to functional departments {sales committee, research committee}, 1925 to 1927: holding company reorganization), the making of a rural zaibatsu (1925 on).

4. A loyal retainer's farewell (translation of a small, privately published eulogy for Mogi Shichirouemon VI, of the Kashia clan, first president of the Noda Shoyu Co, written in 1929): Shinshima's views on Japanese management, the master as seen by the apprentice (preface, introduction, brief biography, the president's principles and policies, the president as businessman, the president's everyday life, an impressive personality, a man of unquestionable character, ancestor worship, a model of love, on being what you are, accepting fate, the president's personality as revealed in a game of go, people rather than things, the president and wine {"A proverb says 'a drinker resembles a cake of tofu: in the beginning it's square and has shape, but it ends up shapeless, formless"}, life as a spiritual exercise, three great men of Kashiwa, is Ito crazy?, called by God, everything is one), editor's postscript.

5. Prelude to turmoil: The murder (of Kimura Junichiro), union activities up to the homicide, traditional wage labor (problems associated with the employment system, "internal contracting"), internal contracting and the Noda Shoyu Company, from homicide to the 1923 strike, reorganization of work design and structure (Jan. 1923).

6. The Noda Strikes: 1923 and 1927-28: Worker discontent rises, the strike of 1923 (negotiation and compromise, memoranda), the 1927-28 dispute (it lasted 218 days; work environment, transportation issues: prelude to the strike, 1927-28: an overview), conclusion: Japanese industrial relations at a crossroad.

7. Corporate maturation: The new paternalism (membership in the new paternalism), paternalism and patriotism, two features of the Japanese employment system, the prewar employment system at the Noda Shoyu Company,

© Copyright Soyinfo Center 2013

the end of an era, the limits of a family firm, a corporate coming of age

8. Democratization and internationalization (In 1964 Noda Shoyu Co. was renamed Kikkoman Shoyu Co., and in 1980 the name was changed again to Kikkoman Corporation): The course of democratization, democratization of the family (the individual replaced the household / family as the locus of legal responsibility. Zaibatsu were dismembered), unionization–within and without the Noda factories (effect of unionization upon the company), company and community after 1962, antitrust and business strategy, background to marketing development), the growth of internationalization (effect of exogenous factors on Kikkoman, development of a new business strategy), internationalization (in June 1957 Kikkoman International Inc. was established), diversification (Manjo brand, Yomohoharu brand, Del Monte brand, Disney brand, Mann's brand, Higeta brand {marketed but not made by Kikkoman}, Ragu brand, Kikko brand, Monet brand). Conclusion. Appendix A. Ie [stem family lineage] and the shoyu industry. B. Scroll from Mogi Fusagoro with preface by Mogi Keizaburo on the founding of a Noda Shoyu brewery, 1872. C. Rules and Regulations of the Noda Shoyu Brewers' Association. D. Noda Shoyu Brewers' Association Income and Expenses, 1888-1918 (yen). E. Property held by Mogi-Takanashi families joining Noda Shoyu Co. Inventory taken November-December 1917. F. New wage and work proposal, Noda Shoyu Company, 1919. Notes. Glossary.

This book was very favorably reviewed by Masaru Udagawa in *Business History Review.* 1986. Spring. p. 169-70.
