The second section is titled "Soyfoods as ingredients–Soy protein, soy fiber, soy isoflavones. By type of product: Largest share–Soy flour (defatted). Fastest growth–Soy protein concentrates. Next fastest growth–TSP [Textured Soy Proteins] Good growth: Soy protein isolates. Slow growth–Soy grits, soy fiber. Soy isoflavones. By application: Largest share–Substitute meat products. Fast growth–Substitute dairy products.

The third section is "Soyoil products–Soybean oil and lecithin." Address: Norwalk, Connecticut.

12164. Dean Foods Co. 2000. 75th anniversary annual report: 1925-2000. Franklin Park, Illinois. 42 p. 28 cm.
• ***Summary:*** Net sales in 1999 was $4,065 million ($4.065 billion). Net income after taxes was $106.118 million. This annual report contains an excellent history and chronology of the company, and also a list of its "firsts."

1925 June–Dean Foods begins as Sam Dean, Sr. purchased the Pecatonica Marketing Co., an evaporated milk processing facility in northwestern Illinois.

1927 Jan.–The company name was changed to Dean Evaporated Milk Company. During 1927 Dean purchased dairy plants in Belvidere and Chemung, Illinois. 1929–The company name was changed to Dean Milk Company. 1936–The last horse-drawn milk wagon was replaced by a Dean milk truck.

1940–Dean introduced fluid milk, packaged in waxed paper cartons.

1993 Dec.–Dean acquired its first national brand label, *Birds Eye* frozen vegetables. But then Dean vegetable operations were sold in Sept. 1998.

1998–Dean introduced its innovative Chug packaging, providing single-serve containers for on-the-go consumers with the "Milk Where You Want It" slogan.

2000 July–Dean completed its largest dairy acquisition with the purchase of the Land O' Lakes Upper Midwest fluid Dairy operations, expanding Dean's marketing area.

Accompanying the annual report is an announcement of the Annual Meeting of Shareholders and Proxy Statement (26 p.). Howard M. Dean is chairman of the board and CEO. This year (2000) his salary was $700,000 and his bonus $677,408. He was also granted 86,000 shares of company stock, with each share worth $37.31 = $3,208,660.

Under "Specialty Products" (p. 15) we read: "Another promising relationship was established in fiscal 2000 with an equity investment in Colorado-based White Wave, Inc., a producer of soy-based products. White Wave sells its refrigerated soymilk products under the brand name *Silk.* Other products include soy-based yogurt and tofu products. Recent focus on the value of soy-based products and the related health benefits has increased consumer awareness in this area and contributed to White Wave's strong sales growth. We are encouraged by the long-term prospects in this exciting functional food area." Color photos show a half-gallon carton of Silk Vanilla Soymilk, and a pint carton of Silk Soymilk Creamer. Address: 3600 North River Rd., Franklin Park, Illinois 60131. Phone: 847-678-1680.

12165. Hagler, Louise. 2000. Soja: Wandelbarste Bohne der Welt. Eine 'coole' Proteinquelle [Soya: The most versatile bean in the world. A 'cool' source of protein]. Aitrang, Germany: Windpferd. 140 p. Illust. Index. 18 cm. [Ger]
• ***Summary:*** Foreword by Peter Golbitz. Foreword by Louise Hagler. Introduction by Dr. Mark and Virginia Messina. Basic soyfoods. Feeding babies and children soyfoods. Breakfast, brunch & bread. Whole soybeans. Sauces, spreads, dips & dressings. Soup & salad. Main dishes. Desserts. Drinks & yogurt.

No dairy products or eggs are used; honey is called for in some recipes. Address: The Farm, Summertown, Tennessee.

12166. **Product Name:** ChefTofu [Original, Herb & Garlic, Chili & Veggie].
Manufacturer's Name: House Foods America Corporation.
Manufacturer's Address: 7351 Orangewood Ave., Garden Grove, California 92841. Phone: (714) 901-4350.

Date of Introduction: 2000. September.
How Stored: Refrigerated.
New Product–Documentation: Leaflet (glossy, color, single-sided) sent by Patricia Smith from Natural Products Expo (Baltimore, Maryland). 2000. Sept. "House ChefTofu. Terrific new firm texture. Hurrah!! Here it comes. A new revolutionary tofu. It's flavored." Photos show: (1) Two pieces of grilled tofu on a plate with trimmings and a pocket or burger. (2) The front panel labels of the three flavors.

12167. Mangels, Reed. 2000. Nutrition hotline: The phytate component of soy products. *Vegetarian Journal* (*Baltimore, Maryland*) 19(5):2. Sept/Oct.
• ***Summary:*** "Phytates interfere with the absorption of minerals, but do not completely prevent us from absorbing minerals like calcium and iron. The presence of phytates is not a good reason for avoiding soy products. Whole grains and other dried beans also contain phytates."

"Fermented soy products, including tempeh and miso, have a lower phytate content so that zinc from these foods is better absorbed than from unfermented soy products like tofu and soymilk." Address: PhD, R.D., Baltimore, Maryland.

12168. Morinaga Nutritional Foods, Inc. 2000. Made with non-GMO soybeans: Mori-Nu Tofu, the perfect tofu in the perfect package is made with perfect soybeans (Ad). *Natural Foods Merchandiser* 21(9):2. Sept.
• ***Summary:*** This full-page color ad shows a large circular logo that reads "Made with Non-GMO Soybeans against a background of soybeans in green pods. Below the titled is printed: "See Mori-Nu at Expo East Booth 1208-1210. The text at the bottom of the ad reads: "Mori-Nu uses only Non-GMO soybeans in its great tasting tofu. We think that what is natural and good should be left that way. Mori-Nu Tofu is made without preservatives and never irradiated. Mori-Nu tastes "first day fresh" from its long-life aseptic * package.

Below the ad are small color photos of five Mori-Nu Tofu products, each with the "Non-GMO" logo near the upper right corner. Below that is a Tetra Pak logo, after which we read: "* In 1996 [the aseptic package] received the Presidential Award for Sustainable Development, the White House's highest environmental prize..."For more information visit www.tetrapak.com and www.morinu.com. Address: 2050 W. 190th St., Suite 110, Torrance, California 90504. Phone: 1-800-669-8638 (NOW TOFU).

12169. **Product Name:** [Tofinelle Tofu Sausages (Spinach and Pine Nuts).
Foreign Name: SOY Tofinelle (Épinards et pignons de pin).
Manufacturer's Name: Nutrition & Santé S.A. (Formerly SOY / Société Soy).
Manufacturer's Address: B.P. 33, Z.I. de la Pomme, 31250 Revel (near Toulouse), France. Phone: +33 62 18 72 50.
Date of Introduction: 2000. September.
Ingredients: Tofu* 70.5% (water, dehulled soybeans* 17.6%, coagulants: calcium sulfate, nigari), spinach* 16.6%, rice flour*, powdered egg white*, sea salt, pine nuts* 1.1%, non-deodorized sunflower seed oil*, garlic*, nutmeg*, pepper*. * = Organically grown ingredients Certified by Ecocert F 32600 L'Isle Jourdain.
Wt/Vol., Packaging, Price: 200 gm paperboard box, 2 sausages per pack.
How Stored: Refrigerated, store at 4ºC.
New Product–Documentation: Product with Label brought by Taro Mikuriya of the Nutrition & Santé Group (Revel, France). 2011. Dec. 14. Paperboard box. 4 by 6 by 1.5 inches. Dark green, light green, dark blue and black on white. Color photo of a cut sausage on a plate. On the front panel are the Soy logo (white on dark green), two organic certification symbols.

Letter (e-mail) from Bernard Storup, founder of Nutrition & Nature (Revel, France). This product was first sold commercially in Sept. 2000.

12170. *Nutrition Business Journal* (*San Diego, California*). 2000. Pacific Foods targets $50 million sales: Soymilk manufacturer scrambles to expand production, expects 35% growth to continue. 5(7/8):12. Annual Industry Overview 2000.
• ***Summary:*** Pacific Foods Inc. of Tualatin, Oregon, was established in 1987 to make shelf-stable tofu in aseptic packaging. After buying expensive manufacturing equipment, made in Europe, the tofu business failed.

The company had to scramble in order to stay in business and put its large capital investment to work, so they found clients for private-label soymilk–the main product that is made into tofu. In 1989, after watching the category grow rapidly, Pacific Foods began producing its own brand of soymilk. The company has been growing at more than 35% a year and in calendar year 2000 expects to exceed $50 million in sales.

In 1998 Pacific Foods expanded to 250,000 square feet, doubling its production capacity. It now also makes soymilk and rice milk under the Trader Joe's and Fred Meyer brands.

Pacific Foods is not for sale, but it has recently entered into a marketing alliance with a major company to help it enter the mass market via Albertson's and other supermarkets in the Pacific Northwest. Martell of Pacific Foods declined to reveal the name of the partner, but it is a non-U.S. company with "a big name worldwide."

Pacific Foods has changed its soymilk packaging design quite frequently, each time based on reformulation of the products. The company conducts many taste panels and focus groups. Most of its advertising is in trade publications, but in the last few months it began advertising in *Vegetarian Times* and a few other consumer magazines. It has recently done a cross-promotion with cereal maker Nature's Path. One innovative product introduced last year was named

© Copyright Soyinfo Center 2013

Soy Synergy, a functional food designed to be mixed with soymilk or rice milk. In March 1999 Pacific launched several products targeted to the mass market, including a blend of lactose-free cow's milk and soymilk; the products are moving slowly.

12171. Sunergia Soyfoods. 2000. Company story (Leaflet). Charlottesville, Virginia. 1 p. Sept. 15. Single sided. 28 cm.
• ***Summary:*** A 1-page history of Sunergia Soyfoods, started in late 1997 by Jon Kessler and Janus Raphaelidis. Address: P.O. Box 1186, Charlottesville, Virginia 22902. Phone: 877-336-8973.

12172. **Product Name:** Melissa's Organic Tofu [Soft, Firm, or Extra Firm].
Manufacturer's Name: World Variety Produce Inc. (Marketer-Distributor).
Manufacturer's Address: 5325 S. Soto St., Vernon, CA 90021. Phone: 323-588-0151.
Date of Introduction: 2000. September.
How Stored: Refrigerated.
New Product–Documentation: Wright, Allison. 2000. "Melissa's/World Variety Produce introduces new soy products." *Produce News* (Fort Lee, New Jersey). Sept. 11. These organic tofu products are made with soybeans that have been certified by the Organic Crop Improvement Association (OCIA) and Quality Assurance International (QAI).

12173. Singh, J. 2000. Re: Making tofu and soymilk in Belgium, and tempeh in The Netherlands. Letter (fax) to William Shurtleff at Soyfoods Center, Oct. 2. 1 p. Handwritten with signature on letterhead. [Eng]
• ***Summary:*** This company makes tofu and soya milk in Belgium, and they also own a tempeh factory (the biggest in Europe) in The Netherlands. They make about 20,000 kg/week of tofu and 8,000 kg/week of tempeh.

The tempeh company is: Tempé Produkten B.V., Tunnelweg 107, 6468 EJ Kerkrade, Netherlands. Another name of the company is YIP Soya Products (Bolda, Holland). Mr. Singh purchased the tofu company in Belgium in 1986, and the tempeh company in Holland in 1990. Address: Benelux Soya N.V. Factory: Industrieweg 3, 2320 Hoogstraten, Belgium. Phone: 03-314-5632.

12174. Severson, Kim. 2000. Soy hops from pod to pan: The young green soybean called edamame is moving from appetizer menus at sushi bars to innovative dishes at high-end Bay Area restaurants. *San Francisco Chronicle.* Oct. 4. Food section.
• ***Summary:*** In San Francisco: At Gary Danko, edamame is pureed in soup with fennel or used to add texture to fall vegetable risottos. At Jianna, edamame are used in a salsa with tempura-fried shrimp. At Ponzu, hot steamed edamame are set out as an *amuse bouche* [appetizer], or folded into tuna tartare sauce, or used in fish and vegetable stir-fried. In Sausalito, at Ondine, edamame are a staple in a sort of hash of brown rice, chanterelle mushrooms, and jicama, tossed with vinaigrette on a bed of salmon. Chef Seiji Wakabayashi occasionally chops edamame, tofu, and shiitake mushrooms, then uses the mixture as a garnish. And, the FDA says, they are good for you! Address: Staff writer.

12175. Efron, Sonni. 2000. Japanese company tries making tofu trendy. *Daily Journal* (*Orem, Utah*). Oct. 11.
• ***Summary:*** Kyo Tofu Fujino, a famous Kyoto tofu shop, is trying to survive by reinventing itself as an upscale, designer chain selling European-style tofu confections. Seiji Fujino, the company's second-generation president, says he wants to teach kids, who are growing up on McDonald's and Mr. Donut, how to eat tofu. The company already has outlets in fancy department stores in Kyoto, Osaka, and Tokyo, plus its own specialty stores and a tofu restaurant. It opened the latter, Tofu Kaho, in April at Fujino, a quiet neighborhood of northern Kyoto. Its offerings: Tofu doughnuts, chocolate peach soy-cream layer cake, tofu cream fig shortcake, or a pastry filled with shipped soy cream and purple sweet potato. In addition to many types of cakes and puddings made with tofu, the sweet shop also offers four flavors of tofu ice cream–ginger, white sesame, vanilla, and black bean coffee. And it bakes cookies using the left-over okara. Then there are traditional dishes: Oboro-dofu (served cold), tofu flavored with yuzu (a citrus-like lime), sesame tofu, black bean tofu, and deep-fried tofu with lotus root.

Recently, some 500-600 neighborhood tofu shops across Japan have gone bankrupt each year, although there are still some 16,500 shops in Japan–according to the Japan Tofu Association. In 1967 the average Japanese household consumed 72 pounds of tofu; by 1999 that figure had fallen to 59 pounds–an 18% decline in 32 years. During the same period, consumption of rice and fish also fell, which meat consumption rose sharply.

Fujino tofu, like many other brands, carries a label stating that it contains no genetically modified soybeans. Address: Los Angeles Times.

12176. Rose, Bruce. 2000. How Bruce got involved with natural foods, soyfoods, Rosewood Products, Inc. and Tofu International Ltd. (Interview). *SoyaScan Notes.* Oct. 15. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** In 1967, while enrolled at Wayne State University in Detroit, Michigan, Bruce got involved with macrobiotics. His main education came from "street school." He would drive to Ann Arbor for the fun of it, and there he discovered Eden Foods, a little upstairs co-op that was the first he found that sold brown rice. He would buy foods, and take them back to the little center which was in Detroit. Michio Kushi visited their center several times and gave

© Copyright Soyinfo Center 2013

lectures.

One of his childhood friends was Tim Redmond, whom he later met during his college years and then at Eden Foods. Redmond's dad invested money in Eden Foods on the condition that they cease to be a co-op. Michael Potter later contributed money "from spurious sources in tune with the times." Potter's attitude has long been "It's Mike against the world."

Many of the food co-ops were started by potheads; most were in university towns and part of the counterculture–a mix of politics and natural foods.

From time to time, usually when some problem or opportunity arose, Eden Foods would run out of money and call on Bruce. He loaned them money (once $12,000) and they paid it back each time. In 1978 Bruce started to work for Eden Foods at their warehouse on Platt Road in Ann Arbor. They were already a fairly big food distribution company with large semi trucks [semitrailers]. Soon Bruce learned about the Soy Plant, which was a co-operative on Ann Street in Ann Arbor. He started to visit their deli. In 1979, Bruce and his family moved to a town about 20 miles north of Ann Arbor–before the fire.

Then in Nov. 1979 the Eden warehouse at 4601 Platt Road was destroyed by a large fire. Bruce was a manager at the time. He is quite sure that the fire was *not* caused by arson. If it was arson, it certainly was not done by the owners. They definitely didn't burn down the company to collect on the insurance. The main reason is that Eden was greatly underinsured; they lost a lot more than they got back or than could ever have gotten back. In the best case, insurance pays you 80% of what you're insured for. To this day, nobody knows for sure what caused the fire. The fire almost put Eden out of business; they lost a lot of money. They were able to stay in business because of the help of their friends. Before the fire, the insurance companies were always trying to get Eden to buy more insurance coverage–but they never did.

The fire was devastating for Bruce as well. He had been working on some automatic packaging equipment for Eden; it all melted. So after the fire, he decided to leave the company. They owed him $15-30,000 at the time. He sat down with Potter and his good friend Redmond and made them an offer. You can forget the debt if you will give me just 15% of the stock in Eden Foods. Potter said "Yes" and Redmond said "No."

Cliff Adler, who had joined the company before the fire, had a profound effect on its recovery. After the fire, he converted a $100,000 loan into stock so that in 1980 he owned 34% of the company. "Cliff was great. He was an upper management mover and shaker and eased the company's debt burden. He moved the company forward."

At one point Bruce considered starting a company to make tofu, but he didn't want to compete with the Soy Plant. Then he happened to meet Ben Wenzel who was delivering (by contract) the Soy Plant's tofu out of the Ann Arbor area and outside of Michigan. "He was delivering cider and tofu in his old hippie van." So Bruce decided to go into the raw milk cheese business. He got into it by accident by misunderstanding the difference between markup and profit margin. "Had I known the difference, I never would have gone into the business." So in Aug. 1980 he started a distribution company named Rosewood Products, Inc. After about a year, he started to distribute the Soy Plant's products along with his cheese. Then the Soy Plant got into trouble financially. Bruce tried to help them. He said: "I had a long history with the Soy Plant and this looked easy. Making tofu sounds exciting. East meets West type products was the reason I went in. I never dreamed I'd be packing tofu for 20 years. You never know what life has to offer you."

Bruce ran the Soy Plant for 3 months before they went bankrupt. Then he bid on the company when they were in bankruptcy, and won the bid. He tried to keep all the employees but they came from a co-op background. "I was a pretty traditional business guy. I wasn't smoking dope any more, had short hair, hard working. A lot of the co-opers wouldn't work for me. I found the best workers were good old meat-eaters. The idealists would do great for three months, and then peter out."

For years after he took over the company, people who had loaned the Soy Plant $100 or so, came to Bruce and said they wanted their money back. He tried to explain that the Soy Plant had declared bankruptcy and their debts were not his. But that didn't satisfy most of them. Bruce estimates that The Soy Plant paid back about half of the roughly $10,000 they borrowed from members of the community.

In the end, Bruce merged the Soy Plant, a pioneer soy company, into his Rosewood Products, then later renamed it Tofu International Inc.

Update: Letter (fax) from Bruce Rose. 2001. May 22. Bruce says Rosewood Products no longer makes tempeh. They bought from White Wave from 1990-1998, but now buy their tempeh from Lightlife. They sell mostly bulk tempeh burgers. The Soy Plant started making tempeh in 1977. Rosewood started in 1987, stopped about 1995. Address: Founder and President, Rosewood Products, Inc., 738 Airport Blvd., Suite 6, Ann Arbor, Michigan 48108. Phone: 734-665-2222.

12177. Barovick, Harriet. 2000. I was a teen vegetarian. *Time.* Oct. 16.

• ***Summary:*** TV-cartoon heroine Lisa Simpson is a vocal vegetarian. "With mainstream groceries carrying products like Boca Burgers, soy milk and tofu, and fast-food restaurants like Wendy's offering veggie pitas, meat-eating meat-eating parents are having an easier time accommodating their kids and, in some cases, are following suit."

12178. Cleland, Nora T. 2000. Couple takes unique approach to farming. *Farm Talk* (*Parsons, Kansas*). Oct. 18.
• ***Summary:*** Innovation is the watchword for Lee and Cindy Quaintance who farm near Edgerton, Kansas, close to Olathe.

Their main crop is organic soybeans, especially those varieties made into tofu. This year they are trying another variety named "Nato" [for making natto], which is smaller than most soybeans. Whereas the count of typical soybeans is about 3,500 per pound, "the little Nato beans run about 6,500 beans per pound."

They have found a company in Garden City, Missouri, which will buy the Nato beans and export them directly to Japan. They expect to be paid about $15 a bushel, but that isn't quite as lucrative as it sounds because Nato yields only about 35 bushels per acre.

When growing soybeans organically, they have found that it is easier when they are planted in rows 36 inches apart rather than 30 inches. The beans rapidly grow and shade a 10-inch space on both sides of the row–which eliminates the need for herbicides. Still he cultivates the area between the rows once each season to eliminate weeds.

• ***Summary:*** To produce soymilk, the researchers used 80 gm samples of the grain of each of 3 soybean varieties and applied four treatments. The first two treatments involved soaking the beans overnight in 485 ml water at either 4ºC or 20ºC before grinding into a slurry. The second two treatments were to pre-grind dry beans or to grind dry beans into a slurry using a kitchen blender and 485 ml added water. The samples were then heated in a microwave oven, stirring after each 30 seconds until the mean temperature of the slurry reached 75ºC. Samples were then transferred to a water bath held at 98ºC, and removed 4 minutes after the temperature of the slurry reached 98ºC. The slurry was then poured slowly through a centrifugal juice extractor... Address: CSIRO Tropical Agriculture, 120 Meiers Rd., Indooroopilly 4068, Qld, Australia.

In: Kyoko Saio, ed. 2000. Proceedings–Third International Soybean Processing and Utilization Conference. Tokyo, Japan: Korin Publishing Co., Ltd. [xxiv] + 728 + 8 p. See p. 31-32. [3 ref]
• ***Summary:*** Promising soybean varieties for food and feed uses have been identified, and may well lead to breakthroughs to increase soybean utilization in India. The varieties Shilajeet and KhSb2 have low levels of lipoxygenases. The variety Hardee, followed by JS335 had the lowest levels of trypsin inhibitor of all varieities tested to date. The varieties Punjab1 [Punjab-1] and PK 472 were found to be especially well suited for making soypaneer [tofu]. Harit Soya has been released for consumption at the green pod stage. "Work with renewed thrust to enhance utilisation of soybean in India is underway to benefit millions of under-nourished country-persons and to open new avenues for domestic market of Indian deoiled cake (DOC)." Address: National Research Centre for Soybeans (ICAR), Khandwa Road, Indore-452017, India.

Manufacturer's Name: Morinaga Nutritional Foods, Inc.
Manufacturer's Address: 9960 S.W. Potano, Tualatin, OR 97062. Phone: 503-692-3498.
Date of Introduction: 2000. October.
Ingredients: Firm: Filtered water, organic soybeans*, isolated soy protein, gluconolactone**, calcium chloride. * = Organically grown and processed in accordance with the California Organic Foods Act of 1990. ** = Gluconolactone is a non-dairy coagulant derived from food starch.
Wt/Vol., Packaging, Price: 12.3 oz (349 gm) Tetra Brik Aseptic carton. Retails for $1.69 (2000/10, California).
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: Samples of the four new products with leaflet sent by Art Mio of Morinaga. 2000. Oct. 17. These four products will be available in retail stores by the end of October. Each product is made with non-GMO organic soybeans. On the right front of each package are two green vegetable soybeans and two green vegetable soybean pods. On the lower left corner are whole dry (yellow) soybeans. Each texture is color coded: Soft = red. Firm = blue. Extra firm = green. Lite Extra Firm = purple. On one side of the package for each texture is a different recipe, suited to that texture: Soft: Strawberry banana shake. Firm: Savory spinach dip. Extra firm: Mixed medley stir fry. Lite extra firm: Chocolate dream pie. On the top of each package we read: "Non-GMO soybeans. No preservatives. No irradiation. No cholesterol. Non-dairy. Low-fat soy protein. Aseptic package locks out bacteria and protects from spoilage; keeps Mori-Nu fresh without refrigeration until opened."

Leaflet (glossy color; see next page): "New from Mori-Nu. Made with organic soybeans." Shows the front of each package. "Mori-Nu uses only O.C.I.A. certified organic soybeans in its newest tofu." On the back are details about each product. Lite extra firm has the "Highest protein to fat ratio of any tofu." 6 gm of protein and 0.5 gm of fat per 3 oz serving.

Talk with Art Mio. 2000. Oct. 20. Morinaga has been under pressure for a long time from its customers to introduce organic tofu. These four new products are not intended to replace the previous five non-organic tofu products, but the market will decided which ones do best and survive. Art thinks that health food stores will prefer the organic but Asian-Americans will prefer the less expensive ($1.69 vs. $1.49) non-organic. It is not yet clear which supermarkets will prefer, but they will probably not carry 9 SKUs.

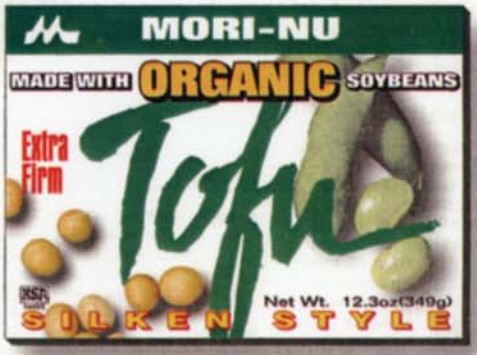
New from Mori-Nu.



MADE WITH ORGANIC SOYBEANS

Mori-Nu uses only O.C.I.A. Certified Organic Soybeans in its Newest Tofu. 4 NEW varieties of our great tasting tofu that you can now offer your customers. We think that what is natural and good should be kept that way. And so do a lot of your customers. Mori-Nu Tofu is made without preservatives and is never irradiated. Mori-Nu tastes "first day fresh" from its long-life aseptic* package...whether Mori-Nu is used on the day it's brought home from the store, or if kept in the cupboard for several months. Trust Mori-Nu Tofu.

NON-GMO Soybeans. No Preservatives. No Irradiation.

MORI-NU

12190. *Nikkei Shinbun* (*Tokyo*). 2000. Bei ni reitô tôfu kôjô: Genchi meekaa baishu mo suishin. Tendore [Frozen tofu factory in America: Also push to buy local tofu makers. Tendre]. [Jap]
• ***Summary:*** The American Soy & Tofu Co. has been incorporated in Massachusetts by Michio Kushi. They hope to raise $15 million and are now raising venture capital. They plan to purchase 18 local tofu makers. The four prospective partners are: American farmers $2.6 million. East West Foundation (Kushi) $2.0 million. Tendre, a maker of frozen tofu from Wakayama prefecture, Japan $1.0 million. Michio Kushi $1.0 million. The company is planning to build a factory in Macon, Georgia, and to make tofu, margarine, and cheese.

Talk with Christine Akbar, who works with Michio Kushi at his home. 2000. Nov. 20. Macon, Georgia is the center for Japanese cherry trees in America; some 200,000 to 300,000 cherry trees now grow there. Mr. Kato who is head of the International Cherry Park Commission in Japan wants to disseminate Japanese cherry trees all over the world. His dream is to buy several hundred acres of land in Macon, Georgia, and to plant cherry trees in the form of a huge American flag: Red blossoms for the red stripes, white blossoms for the white stripes, and a 40-acre reflecting pond for the field of blue, with sprinklers coming out for the 50 stars. Each tree will have a donor/sponsor, whose name will appear on a plaque on or by the tree. Mr. Kato is from Wakayama, and he established a connection with the Tendre company which makes frozen tofu there. On the part of this land not used for cherry trees, Mr. Kato and Michio Kushi would like to build a factory to make soy products for the company he has started–American Soy and Tofu Co. Mr. Kato discovered Tendre; they could make frozen tofu in the factory. Aveline discovered the Okinawan fermented tofu named *Tofuyo,* which she loves; she would like to learn how to make it at the factory. Fred Sternau, who lives and works in New York state, (phone: 914-763-3662) is an old friend of Michio's, and has a background in the investment banking business with Dean-Witter, is working now to raise the money from venture capitalists in America for the new corporation, and to develop a business plan. Christine thinks that someone else is working to raise money in Japan. Christine thinks that some money has been committed but she does not think that any of it has been "transferred." "We should know more in one month. It's just getting started."

Note: Hiroaki Iwamoto is president of Tendre, Tanabe City, Wakayama prefecture. He holds a patent on his frozen tofu.

• ***Summary:*** The lipids / fats in tofu are stable and no subject to oxidation. During the curd formation, first protein particles (80 nm = nanometers in size) combine with an oil globule (300 nm) because of the addition of magnesium or calcium ions [in the coagulant]. Then the bound globules aggregate with one another to hold water. The curd is formed as soluble proteins are combined with a decrease in the pH. The oil is packed in triple layers of protein, that is oleosin (oil body protein), protein particles, and soluble proteins.

Figures show: (1) Scanning electron micrograph of the floating fraction of soymilk. (2) Formation of tofu-curd from soymilk (speculation). Address: Dep. of Agro-Bioscience, Faculty of Agriculture, Iwate Univ. Ueda 3-18-8, Morioka, Japan.

Proceedings–Third International Soybean Processing and Utilization Conference. Tokyo, Japan: Korin Publishing Co., Ltd. [xxiv] + 728 + 8 p. See p. 53-54.
• ***Summary:*** Genotype and year effects were found to be significantly greater than location effects on protein content, its sub-unit profile, and seed composition; soymilk and tofu yields, solids levels, and pH; and tofu color, and hardness and firmness in ten soybean lines grown at three locations for two years. Individual protein fractions (such as 7S and 11S) expressed as a percentage of the total detected, all showed significant genotype effects. The 7S fraction, especially alpha and alpha prime content, and the glycoprotein fraction were positively correlated with tofu yield. Ingredients: Water, soybeans, oregano, garlic, nigari (sea water extract).
Wt/Vol., Packaging, Price: 14 oz packed in water in molded plastic tray, with heat-sealed, peel-off plastic film top. Retails for $1.09 (2000/11, Lafayette, California).
How Stored: Refrigerated.
Nutrition: Per 3 oz.: Calories 110, calories from fat 60, total fat 6 gm (10% daily value; saturated fat 1 gm), cholesterol 0 mg, sodium 15 mg (0%), total carbohydrate 2 gm (dietary fiber 1 gm, sugars 0 gm), protein 12 gm. Calcium 10%. Iron 8%. Percent daily values are based on a 2,000 calorie diet.
New Product–Documentation: Product with Label purchased at Trader Joe's in Lafayette, California. 2000. Nov. 16. 5.75 by 4.75 inches. Brown, white, dark green, and gold on plastic film. "No preservatives. Perishable. Keep refrigerated." Talk with employee at Trader Joe's. 2000. Nov. 20. This product was introduced in Oct. 2000.

12201. United Soybean Board. 2000. 7th annual national report: Consumer attitudes about nutrition, 2000/2001. Seattle, Washington. 8 p. Oct. 28 cm.
• ***Summary:*** This seventh annual nationwide survey, commissioned by USB, was conducted in July 2000 by an independent research firm in Seattle, Washington. Random telephone interviews were completed with 800 consumers. The study's margin of error is ±3.5 percent and has a confidence level of 95%.

Contents: Nutritional concern and habits. Dietary changes in eating habits. Consumer awareness of nutrition terms and information. Media sources and nutritional information. Consumer perceptions of genetically modified food, biotechnology, and labeling. Consumer perceptions of *trans* fat and hydrogenation. Consumer perceptions of cooking oils. Consumer awareness and perception of soy products. Consumer perceptions of the healthiness of soy.

Consumer awareness and perception of soy products: 1. The number of consumers eating soy products once a week or more continues to rise, up to 27% in 2000. 2. The top 3 soy products that consumers are aware of are tofu (86%), soy veggie burgers (79%), and soymilk (79%). Other products that received a high level of awareness include soybean oil (78%), soy infant formula (67%), soy protein bars (50%), and soy supplements (49%). 3. Tofu and soy veggie burgers are the top two products consumers have tried, at 45% and 41% respectively. 4. There was a significant increase in the number of consumers who have tried soymilk, from 18% in 1999 to 25% in 2000.

Note: As of Aug. 2008 this full survey is available gratis in PDF format at www.soyconnection.com /health_nutrition / pdf/.

• ***Summary:*** In 1997 the U.S. Food and Drug Administration (FDA) allowed a health claim for soluble oat beta-glucan when consumed at a level of 3 gm per day. Since soybeans and oats both have promising futures in nutraceutical foods, the combination of both materials is being studied. Soy protein foods included in the study are soy flour, soy protein concentrates and isolates, tofu, and soymilk. Address: Avinashiligam Deemed Univ., Coimbatore, India.

12203. Watanabe, Shaw; Uesugi, S.; Zhuo, X. G.; Uehara, M.; Takamatsu, K. 2000. Effects of soy rich diet and isoflavone supplement on healthy women. In: Kyoko Saio, ed. 2000. Proceedings–Third International Soybean Processing and Utilization Conference. Tokyo, Japan: Korin Publishing Co., Ltd. [xxiv] + 728 + 8 p. See p. 203-206. [8 ref]
• ***Summary:*** Japanese consume 20-30 mg/day of isoflavones on average. This isoflavone intake is mostly attributable to tofu, natto, and miso. Address: 1-4. Dep. of Nutritional Science, Tokyo Univ. of Agriculture, Tokyo 156-8502, Japan; 5. Research Inst. of New Materials, Fuji Oil Company.

12204. Reynolds, Jonathan. 2000. Do you tofu? Soybean curd isn't just for health-food nuts anymore. *New York Times.* Nov. 5. p. SM181.
• ***Summary:*** The author used to be an overweight steak and potatoes guy, who despised the taste of "health foods." "Until recently, I couldn't stand to even *look* at tofu. Cold and uncooked, it's squeaky, with the texture and disposition of a particularly upbeat sponge. In the mouth, it's so darned watery and perky, it feels as though it will clean the enamel off your teeth, suck all the saliva from your mouth, and then bounce right onto the street to do some more good somewhere else."

"Processed foods made from tofu are, by and large, dreadful. The 'hot dogs' are weird, soy cheese is nasty, and Tofutti ice cream is downright punitive. Tofu yogurt is nearly as wretched as the food at Shea Stadium"–which is probably the worst in the world.

"But that's just my cranky Western palate. Worldwide, tofu is more popular than pasta, potatoes and poi, the staples of other cuisines." He found, to his surprise, that when tofu is cooked and used in a good recipe, it can be delicious–as is the "bean curd" served at most Chinese restaurants. Includes three tofu recipes.

12205. Chiang, Cecilia Sun Yun. 2000. Maodou (green vegetable soybeans) in Chinese food culture (Interview). *SoyaScan Notes.* Nov. 6. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** *Maodou* (characters: hair + beans) are widely

© Copyright Soyinfo Center 2013

used in two types of Chinese cooking: (1) As a seasonal vegetable in the cooking of Jiangsu province (Wade-Giles: Kiangsu; southeastern China), whose major culinary cities are Shanghai (now an independent municipality), Nanjing (Nanking), Wuxi (Wu-hsi), and Changzhou; (2) Chinese Buddhist vegetarian cookery (*su-tsai*). *Maodou* is rarely used in northern Chinese cooking, where the people eat a lot of flours. In Shanghai they eat a lot of beans, including *maodou.* Yet *maodou* is almost never found in the cookery of neighboring Guangdong province or in the famous cookery of its capital, Canton.

Cecilia was born in Wu-hsi near Shanghai, one of 13 children in a family of great wealth. Her father was a high government official. When she was age 4, she moved with her family to Peking, where she was raised in luxury (their famous house had been an old palace) and educated from grammar school to university graduate. Her mother cooked only on special occasions. Among the 14 servants and maids, her family had two chefs; one cooked northern Chinese food and the other cooked Shanghai food. Cecilia learned nothing from these two cooks, since she was not allowed to go into the kitchen! In 1943, when the Japanese marched on Beijing (Peking), her family fled south to Chongqing (Chungking / Ch'ung-ch'ing; capital of "Free China" from 1937-1945); there she was married. It was not until 1945, V-J Day, that she first saw the remains of her parents' house at Wuxi. It had been destroyed by Japanese bombings. She and her husband (plus a cook and a few servants) lived near Shanghai for four years, then in April 1949 they fled to Japan when the Communists arrived, eager to confiscate the property of the wealthy. They lived in Japan for 8 years, until 1957, during the hard, lean years after World War II. Then they came to America. Cecilia learned to cook after she came to America.

In the Shanghai area during the summer months *maodou* are as widely found as edamamé in Japan. They are used in many different dishes. For example, shelled, they are cooked with shrimp, or with shrimp, pickled vegetables, and *pai-yeh* (sliced, pressed tofu sheets). A very large number of Buddhist vegetarian dishes contain *maodou*–such as "Vegetable Delight" which Cecilia used to serve at The Mandarin restaurant. When served in the pods, the pods are first boiled in unsalted water, then sesame oil and soy sauce are sprinkled on the pods, and the *maodou* are served in the pods.

Because they are available fresh for only about two months each year, *maodou* are very expensive. Thus, they are certainly not a poor-man's food. Some people (such as her mother) would dry *maodou* during the summer for use as a vegetable during the snowy winter when vegetables are scarce. The dried *maodou* are washed, soaked, then cooked–often with meat.

Cecilia is aware that edamamé are now starting to become quite popular in the USA. She thinks "the Japanese did something very good. Many Japanese restaurants give you a little edamamé to start with."

Cecilia knows nothing about the history of *maodou,* but she is quite sure these characters have been used in Chinese cooking for at least several hundred years.

Today, lots of edamamé are grown in Taiwan but Cecilia thinks this is not a result of the Japanese occupation of Formosa. Rather, the Japanese used Formosa mainly to grow sugar cane and pineapples. Address: Former owner, The Mandarin restaurant, Ghirardelli Square, San Francisco, California.

12206. *Rafu Shimpo* (*Los Angeles, California*). 2000. House Foods introduces new Chef Tofu. Nov. 6. [Eng]
• ***Summary:*** This new product helps consumers save time but costs a little more. Chef Tofu is firm textured and comes in three flavors–Original, Herb & Garlic, and Chili & Vege. Already sliced into four pieces, it is easy to prepare.

"House Foods America Corporation is based in Japan, where it was founded in 1913 under the name of House Foods Corporation." The largest spice processor in Japan, it is also one of the largest food conglomerates.

"In 1981, the Los Angeles office was established to introduce through importing, Yoshoku–Japanese style western food–to the United States, Canada, and Mexico. In 1983, the Curry House Restaurant chain was opened in Little Tokyo [Los Angeles]. There are now four Curry House Restaurants in Los Angeles County (Beverly Hills, Gardena, Little Tokyo, Torrance), and two in Orange County (Cypress and Irvine.)

"The U.S. Company also started manufacturing tofu in the early 1980s. Shortly after this, House Foods merged with the Hinoichi Tofu Company. Hinoichi is an over 50-year-old firm with long-established ties in the Los Angeles market. Today, House Foods America Corporation not only sells various Japanese style flavored mixes but such traditional Japanese food products, Some of their better-known brands are Hinoichi Tofu, House Foods Organic Tofu and Shao Mi Mi Tofu dessert.

"In 1997, all three divisions were combined to become House Foods America Corporation."

• ***Summary:*** The House Foods tofu plant in Garden Grove, California, opened in 1997, replacing an old plant in

© Copyright Soyinfo Center 2013

downtown Los Angeles that began making tofu in 1981. A unit of Japan's House Foods Corp., the Garden Grove plant is believed to be the largest in the USA, making more than 100,000 packages of tofu a day, and is 128,700 square feet–compared to the 120,000 square foot East Coast Nasoya plant owned by rival Vitasoy USA. The California plant employs about 140 workers, mostly Hispanic.

In May House Foods added two new production lines, bringing their total to five, and their capacity to 220,000 packages per day. Yet Toshifumi Nomura, the company's marketing manager, says Americans have "tofu-phobia."

The U.S. tofu market was estimated at $238 million last year by Peter Golbitz of Soyatech Inc. Southern California is the largest U.S. center of soyfoods production according to William Shurtleff of Soyfoods Center (Lafayette, California). A photo shows Kazumi Kuniyasu, the business administration manager of House Foods America.

12209. Ito-Peterson, Yoko. 2000. Protein play: House Foods betting on spiced-up tofu. *Orange County Business Journal* 23(46):1, 73. Nov. 13-19.
• ***Summary:*** House Foods America Corp. is a unit of House Foods Corp. of Japan. Kazumi Kuniyasu, the company's business administration manager, says that his modern tofu plant, located in an industrial corner of Garden Grove, California, is the biggest one in America; it is 128,700 square feet, whereas the next largest plant (owned by Nasoya in Massachusetts) is only 120,000 square feet. His 140 workers, mostly Hispanic, produce more than 100,000 packs of tofu a day from about 15 tons of soybeans. Last year House Foods America sold $17 million worth of tofu and other soy products, up 15% over 1999. In May the company added two new tofu production lines, bringing their total to five and more than doubling the plant's capacity–to 220,000 packages per day.

In 1997, when the Garden Grove plant opened, it replaced an older factory in downtown Los Angeles that had been set up in 1981. The 1997 move enable the company to double production.

Last year the U.S. tofu market was estimated at $238 million by Peter Golbitz of Bar Harbor, Maine–up 15% over 1998. The largest single company is Vitasoy USA, which claims to make about half of all tofu sold in U.S. supermarkets at their two large plants in California (Azumaya) and Massachusetts (Nasoya). The Osaka-based parent company, House Foods, doesn't make tofu in Japan. To protect small tofu shops, a Japanese law prevents big corporations for entering the tofu manufacturing industry. House is Japan's largest spice manufacturer, selling curry powder and snack foods. In Southern California, the company also operates five Curry House restaurants.

A large color photo shows Kazumi Kuniyasu, wearing a sanitary hair net, standing next to two soybean washing machines in his plant. Five small black-and-white photos show: Three shots of the conveyorized packaging line, curding vats and tofu forming boxes, various packaged tofu products.

• ***Summary:*** A review of cookbooks. For the Gen X cook: Runner-up: "*Joy of Cooking: All About Vegetarian Cooking* (Scribner; $19.95). It's hard to imagine Irma Rombauer cooking up a skillet of tofu. But 21st century palates will appreciate this creative tome."

12211. *SoyaScan Notes.* 2000. How genetically engineered soybeans took over the soybean storage and distribution system and led to increased use of organic soybeans (Overview). Nov. 27. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** In the mid-1990s U.S. farmers began to deliver the first crop of genetically engineered (GE) soybeans to their local elevators. There they were accepted without question and mixed in with the traditional non-GE soybeans. They had entered the "stream" and taken over the system with no notification of soybean users, no discussion with consumers, no debate in Congress. It was a silent coup d'état. But the impact of this "non-decision" and "non-issue" was immense.

Soyfoods manufacturers that for decades had purchased their soybeans from the "stream" now suddenly found that, like it or not, they were buying GE soybeans mixed in with their regular soybeans. Magazines and newspapers began to analyze foods and report that certain brands of tofu, veggie burgers, or soymilk contained GE soybeans–even though there was no mention of this on the labels. Consumers began to call the companies that made their favorite soyfoods and ask if those foods now contained GE soybeans. The honest answer was a simple "Yes." Many companies fudged by saying that they were buying soybeans from the same source they always had.

As consumer concern rose (starting in 1999 and 2000) many company felt compelled to make products that were free of GE soybeans. They had two choices: (1). Buy non-GE soybeans, or (2) Buy organic soybeans. Many chose the organic approach. In this way GE soybeans helped the organic movement to prosper.

12212. Abramowitz, Gary. 2000. Update on work with Fresh Tofu, Inc and Tofu Turkeys (Interview). *SoyaScan Notes.* Nov. 30. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The full story of Gary's work can be found on his website at www.freshtofu.com. His first step into the world of vegetarian cooking was in 1980 when he

© Copyright Soyinfo Center 2013

created a vegetarian lunch truck named Wok 'n Roll, parked at Douglas College, part of Rutgers University in New Brunswick, New Jersey. He did that for 2-3 years. Then he became the chef-manager at High Street Cafe from 1983-85. In 1998 Fresh Tofu, Inc. outgrew its original location at 900 Line St., Allentown, Pennsylvania. Using savings and a bank loan, with funding from Allentown Economic Development Corp., he purchased a building at 1101 Harrison St. in Allentown, Pennsylvania. After gutting and renovating it to allow for future expansion, he moved the company in April 1998. He moved into a building with 18,000 square feet from one in Easton that had 3,700 square feet. He did *not* move into a business incubator (as an article of 24 Nov. 1999 in the local newspaper says). Fresh Tofu Inc. now has 18 employees and is growing at a rate that is too fast to handle. The new building is now full and bursting at the seams.

In 1992 he began commercial production of Tofu Turkey. It has become a major product, and sales this year will top 2,000 by the end of the year. Each year before Thanksgiving things become hectic as they try to make enough "turkeys" to fill the growing demand.

At Gary's 20th high school reunion in 1990 he was given the award for the "most unusual occupation." During its early history the company had to struggle to make ends meet. Some people would laugh at what he was doing. But now all that has changed–in part because people realize you can make money making tofu. So a different kind a person is now coming into the industry–the person who is mainly interested in the money rather than the product. Many of these make second-generation soyfoods using tofu, rather than making the tofu itself. Making tofu is now "valid." It's okay. For the last 5 years sales have grown at 20-25% a year. He can't keep up with the demand. Since 1988 he has not pursued sales through advertising or in any other way–by word of mouth the customers come to him. And he's still turning business away. He would prefer a little slower growth. He could do a second shift, but he doesn't want that kind of life. Still, he finds it very difficult to say "no" to potential customers. Address: 1101 Harrison St., Allentown, Pennsylvania 18103. Phone: 610-433-4711.

12213. *Canadian Soybean Bulletin* (*OSG, Chatham, Ontario, Canada*). 2000. Incoming Japan soybean mission. 14(2):1. Nov.
• ***Summary:*** Japan imports 5 million tonnes (metric tons) or 184 million bushels soybeans each year. Of that, about 1 million tonnes (20%, or 37 million bushels) are used to make soyfoods such as tofu, miso, natto, soy sauce, etc. Of the 1 million tons, 500,000 tonnes (50%) are for tofu, 160,000 tonnes (16%) are for miso, and 130,000 tonnes for natto.

Exports of Canadian soybeans have been increasing rapidly, from 36,000 tonnes in 1995, to 75,000 tonnes in 1998, to 175,000 tonnes in 2000.

In Sept. 2000, the Canadian Soybean Export Association and the Ontario Soybean Growers hosted ten Japanese from the soyfoods industry and showed them the Canadian soybean industry. These Japanese were most appreciative "of our efforts to segregate GMO and non-GMO varieties of soybeans using our Identity-Preserved, or IP program."

12214. Woodrow, Lorna; Poysa, Vaino; Anderson, Dale. 2000. Effects of soy protein composition on soymilk and tofu yield and quality. *Canadian Soybean Bulletin* (*OSG, Chatham, Ontario, Canada*) 14(2):4. Nov.
• ***Summary:*** For these studies, five large-seeded, food-grade soybean cultivars with acceptable agronomic performance were used. 100 seeds averaged 25 gm in weight and his protein contents, averaging 46% on a dry matter basis (range 44-48.4%). They were used to make silken (kinugoshi) tofu, using two different coagulants: glucono-delta lactone (GDL) or calcium sulfate dihydrate (CS).

There was a significant positive correlation between seed protein content and tofu yield, tofu hardness, and tofu firmness. The 11S and 7S proteins represent 70% of the total protein in the soybean and form the gel when soymilk is coagulated to make tofu. "They are considered to be the key proteins in determining tofu quality." They are extracted then separated by electrophoresis. These cultivars demonstrated a wide range in their content of 11S and 7S proteins. The seed protein profile also changed very significantly from year to year. The 7S content was positively correlated with tofu yield, whereas the 11S content was not. Address: Greenhouse and Processing Crops Research Centre (GPCRC), Highway 18 East, Harrow, ON N0R 1G0, Canada.

12215. Fresh Tofu Inc. 2000. Home page and all links (Website printout–complete). www.freshtofu.com Printed Dec. 2.
• ***Summary:*** Links: (1) Home page (1 p.). (2) History: Fresh Tofu Inc. (2 p.). Incorporated in Nov. 1983 by Jeffrey Connerton. In 1984 he met Gary Abramowitz. (3) Our products (1 p.). 12216. Corliss, Richard. 2000. Master of the flying somersault. *Time.* Dec. 4.
• ***Summary:*** "To fans of Eastern action epics, Yuen is revered as the deviser of artful torture for Asia's top actor-athlete: Jackie Chan... Sammo Hung... Jet Li... and Michelle Yeoh (*Wing Chun,* with its amazing battle over a plate of tofu)."

12217. *SoyaScan Notes.* 2000. Soymilk and cow's milk prices in California, December 2000 (Overview). Dec. 10. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** Since Dec. 1983, approximately every other year, Soyfoods Center has conducted a survey of the prices

© Copyright Soyinfo Center 2013

of soymilk and cow's milk in California. In Dec. 2000 at Berkeley Natural Grocery Co. (Berkeley, California), Cindy La reports the following retail prices. (Note: oz = fluid ounces; 32 fl oz = 1 quart; 33.8 fl oz = 1 liter. 2 quarts = one half gallon. All soymilk products at Berkeley Natural Grocery Co. are now organic).

Shelf-stable / Aseptic soymilks: Westsoy Light and Plus all flavors $2.39/quart (but $1.89 when on special). Westsoy original creamy $2.59/quart. Westsoy 3 x 8.45 oz packs all flavors $2.79.

Vitasoy all flavors $1.99/quart. Note: This is the price for half the year. The other half it rises to $2.39. Vitasoy enriched all flavors $1.99/quart (on special). Vitasoy Light all flavors $2.39/quart. Vitasoy 3 x 8.45 oz packs all flavors $2.39.

Soy Dream (Imagine Foods) all flavors $2.15/quart. Soy Dream Enriched all flavors $2.25/quart.

Pacific Foods–Select all flavors $1.99/quart. Pacific Foods–Enriched all flavors $2.25/quart. Pacific Foods–Fat Free all flavors $2.39/quart.

Edensoy and Edensoy Enriched all flavors $2.29/liter. Edensoy and Edensoy Enriched 3 x 8.45 oz packs all flavors $2.29. Health Valley Soy Moo plain $2.59/quart.

Refrigerated / Fresh soymilks (in gable-top cartons) at Berkeley Natural Grocery Co. White Wave Silk $1.79/quart or $2.99/half gallon. Westsoy Plus $3.59/half gallon. Wildwood all flavors $1.99/quart or $3.89/half gallon.

Berkeley Natural Grocery Co. also carries dairy milk: Horizon organic milk $1.89/quart. Clover Stornetta milk (free of BGH–Bovine Growth Hormone) $0.95/quart.

Safeway: Cow's milk (fortified with vitamins A and D) sells for the following prices at the Safeway supermarket in Lafayette, California: (1) Fat free: $0.99/quart or $1.84/half gallon or $3.25/gallon; (2) Low fat (1% fat, protein fortified): $1.07/quart or $2.02/half gallon or $3.39/gallon; (3) Reduced fat (2% fat, protein fortified): $1.07/quart or $2.02/half gallon or $3.39/gallon; (4) Whole (homogenized, fortified with vitamin D only): $1.09/quart or $2.05/half gallon or $3.45/gallon. (5) Acidophilus Plus Bifidus–Low Fat (1% fat): $1.07/quart or $2.13/half gallon. (6) Horizon Organic $2.99/half gallon. (7) Lactaid: $1.89/quart or $3.35 per half gallon. The best-seller among these is Fat free in half gallons or gallons.

Thus, during the past two years, the price of cow's milk has generally decreased slightly for the first time in at least 15 years. Soymilk prices have largely remained unchanged. Therefore the gap between soymilk and cow's milk prices has increased slightly.

12218. *SoyaScan Notes.* 2000. Chronology of major soy-related events and trends during 2000 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• ***Summary:*** Jan. 8–The Kerry Group (of Wisconsin and Iowa) purchases Solnuts, a pioneer manufacturer of dry-roasted soynuts, in Hudson, Iowa.

Jan.–Kraft Foods Inc. (Illinois) purchases Boca Burger Inc., America's third largest maker of veggie burgers, after Worthington Foods and Gardenburger.

March 6–The Hain Food Group announces that it will acquire the Celestial Seasonings tea company to become the largest natural foods company in the USA.

March 9–The USDA formally approves a rule change allowing soy protein products to completely replace meat products in the Federal School Lunch Program.

March 31–Monsanto, the world's leading agricultural biotech company, merges with Pharmacia & Upjohn (a large pharmaceutical company), and the new company is renamed Pharmacia Corporation.

April–An article by Lon White on tofu and brain aging is published in *J. of the American College of Nutrition.*

June 9–20/20 (ABC) television program, titled "Soy–The untold story," airs on Friday at 10:00 p.m. discusses many of the shortcomings of soyfoods, but in a very fair way.

June 13–Martha Stewart, on her popular nationwide TV program *Living,* has a very positive segment on edamamé.

July 14–Lightlife Foods Inc. (of Turners Falls, Massachusetts) is purchased by ConAgra, Inc., a $25 billion food company based in Omaha, Nebraska–for an undisclosed amount. Lightlife's plant, employees, and management team will stay in place. Lightlife is a leading maker of vegetarian meat alternatives, with 150 employees and about $25 million in annual sales.

July–At a joint meeting of ASA and USB, the International Soy Protein Program (ISPP) was born as ASA and the Illinois Soybean Program Operating Board (ISPOB) formalized their joint commitment to "Increase the international consumption of soy protein by humans in new markets–developing countries–and thereby create new opportunities for disappearance of soybeans and provide higher economic returns to U.S. soybean producers." ISPOB and its Executive Director Lyle Roberts were instrumental in conceiving the program and raising its initial funding. This program was later renamed WISHH.

Sept.–Monsanto's patent on glyphosate expires. Glyphosate is the active ingredient in *Roundup,* the world's best-selling herbicide.

Dec.–Sanitarium Foods of Australia acquires the 47% of SoyaWorld owned by Sunrise Soya Foods (Vancouver, BC, Canada).

Trends: 1. This year, the momentum created by the FDA health claim in Oct. 1999 has propelled the soyfoods industry to new heights. Existing companies are growing rapidly, and many new companies (including some of America's biggest food companies) are entering the market with new products.

2. This year, for the first time, soymilk has become a mainstream American beverage. As of May, White Wave Silk soymilk is sold in 24,000 supermarkets nationwide.

© Copyright Soyinfo Center 2013

Edamamé (green vegetable soybeans) have gone mainstream in California, and are rapidly becoming popular on both coasts of the USA.

3. In the United States and Europe, the tide seems to be flowing increasingly against genetic engineering of foods and food plants. More and more companies in the natural foods industry are labeling their products as "non-GMO" or "GMO-free" or "No GMOs." Monsanto has stopped its efforts to develop genetically engineered soybeans for food use and focused its attention instead on livestock feeds. It now seems likely the genetic engineering of plants has a future, but not in the area of foods–at least in developed countries.

4. Interest in "food-grade soybeans" continues to grow in the USA and has increased substantially this year. Canada began focusing on identity-preserved food-grade soybeans 10-15 years before the USA. U.S. interest began to grow in about 1995 with the introduction of genetically engineered soybeans and with the accelerating interest in food uses of soybeans.

5. While pro-soy articles (mostly about health benefits) continue to increase, so do anti-soy articles and Internet sites. The loudest anti-soy voices are those of Sally Fallon and Mary Enig of the USA (they believe traditional fermented soyfoods–such as miso, shoyu, natto, and tempeh–are good, traditional non-fermented soyfoods–such as tofu, soymilk, and edamamé–are not very good, and modern soy protein products–such as soy protein isolates, concentrates, and textured soy flour–are the worst of all, being highly processed with chemicals such as hexane solvent). Also: Richard and Valerie James of New Zealand, and Lon White of Hawaii. Some of the concerns they raise are legitimate and deserve further research, but the majority (we believe) are not. Nevertheless, many of the health claims made for soy in popular articles are exaggerated or somewhat sensational, and not firmly supported by scientific evidence.

6. As we are about to enter a new century and a new millennium on 1 Jan. 2001, soyfoods appear to have a bright future, worldwide. This past year has seen more activity and interest in, and media coverage of, soyfoods than at any time in the history of the United States.

12219. *SoyaScan Notes.* 2000. Soya Clips receives 1,975 clips from Jan. 1 to Dec. 31, 2000 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** This is an average of 165 clips per month. This total of 1,975 compares with 2,105 clips in 1989–the peak year. An invoice from Luce shows the total bill (before returns) for calendar year 2000 to be about $6,351. Thus, one clip costs (on average) $3.21.

12220. Fisher, Kate. 2000. Using the old bean: Commodity soybeans aren't left out of soyfoods surge. *Soybean Digest.* Dec. p. 12, 16.
• ***Summary:*** Walt Fehr says that in the soyfood market there are two types of beans: Specialty beans (premium market) and commodity beans (general market). Low-cost commodity beans are used for such things as soy oil plus some soy protein concentrates, soy isolates and soy flour.

Until recently, Japanese food processors bought large amounts of what they call IOM (Indiana, Ohio, Michigan) soybeans. These are commodity beans that the Japanese believe have higher protein content and are better for food uses than commodity beans grown in other parts of the USA. But biotech issues [concerning genetic engineering] have caused IOM soybeans to lose considerable market share to identity-preserved soybeans–most of which are non-GMO.

The premium food-grade market consists of many soybeans: (1) Small seeded types for natto and soy sprouts. (2) Large-seeded soybeans for edamame, miso, and tofu. (3) Other soybeans with special traits for food use, such as high protein, lipoxygenase free, low saturated fat, low linoleic acid, etc.

Note: This article is bizarre. The words "organic" and "non-GMO" are barely mentioned.

12221. Huang, H.T. (Hsing-Tsung). 2000. Science and civilisation in China. Vol. 6, Biology and biological technology. Part V: Fermentations and food science. Joseph Needham series. Cambridge, England: Cambridge University Press. xxviii + 741 p. Illust. Index. 26 cm. [200+ soy ref]
• ***Summary:*** This is the most important book on soyfoods in China ever written, and it is especially good on their origins and early history in China. It is also one of the best books seen on food in Chinese culture and history.

The section titled "Soybean processing and fermentation" (p. 292-378) comprises 14.3% of the book's text, and has the following contents: Introduction. Soybean sprouts. Soybean curd and related products: The origin of bean curd, transmission of *tou fu* to Japan, products associated with *tou fu* (soymilk {*tou fu chiang*}, tofu curds {*tou fu hua* or *tou fu nao*}, pressed tofu sheets {*ch'ien chang* or *pai yeh*}, yuba {*tou fu i* or *tou fu p'i*}, deep-fried tofu {*yu tou fu* or *tou fu p'ao*}, pressed tofu {*tou fu kan*}, five-spice pressed tofu {*wu hsiang tou fu kan*}, plain dried tofu [pressed tofu] {*pai tou fu gan*}, smoked tofu {*hsün tou fu*}, dried tofu soaked in brine and fermented {*ch'ou tou fu kan*}, frozen tofu {*tung tou fu*}), making fermented tofu {*fu ju*}, comparison of *tou fu* and cheese, addendum. Fermented soybeans, soy paste, and soy sauce: *Ferments* for food processing, fermented soybeans–*shih,* fermented soy paste–*chiang,* fermented soy sauce–*chiang yu,* soy fermentations in China and Japan.

There are also long sections on the history koji (*qu*) and of red rice koji (*hong qu*) in China (p. 192-203).

Note: This is the earliest English-language document seen (April 2013) that uses the term "hsün tou fu" [pinyin: *xun doufu*] to refer to smoked tofu. Soy is also discussed in

© Copyright Soyinfo Center 2013

other parts of the book. Address: Alexandria, Virginia.

12222. Huang, H.T. (Hsing-Tsung). 2000. Soybean curd and related products: Introduction (Document part). In: H.T. Huang. 2000. Science and Civilisation in China. Vol. 6, Biology and Biological Technology. Part V: Fermentations and Food Science. Joseph Needham series. Cambridge, England: Cambridge University Press. xxviii + 741 p. See p. 299-302. [20 ref]
• ***Summary:*** Tofu (*doufu*) is "the most significant gift to the world from the Chinese food system." It represents a unique way of enhancing the nutritional value of the soybean through mechanical and chemical treatment. Early names of tofu were *li ch'i* (pinyin: *liqi*) or *lai ch'i* (pinyin: *laiqi*). Address: Alexandria, Virginia.

12223. Huang, H.T. (Hsing-Tsung). 2000. Soybean curd and related products: The origin of bean curd (Document part). In: H.T. Huang. 2000. Science and Civilisation in China. Vol. 6, Biology and Biological Technology. Part V: Fermentations and Food Science. Joseph Needham series. Cambridge, England: Cambridge University Press. xxviii + 741 p. See p. 302-16. [34 ref]
• ***Summary:*** It is unclear when tofu originated in China. It is also unclear whether or not the engraved mural in Eastern Han Tomb No. 1 (at Da-hu-ting, Mixian, Henan province, China), sealed about AD 50, depicts the making of tofu, or "proto tofu," or something else. The omission of a step showing any cooking is very puzzling. When Dr. Huang tried to make tofu following the steps in the mural, with no cooking, he found it "inedible."

Moreover, there is no mention of tofu in that very important and comprehensive work, Qimin yaoshu [Important arts for the people's welfare], by Jia Sixie (AD 544).

Not until the late Ming dynasty are we given a clear recipe–six steps–for the process of making tofu by Li Shizhen in the *Bencao Gangmu* [The great pharmacopoeia] (1596). Address: Alexandria, Virginia.

12224. Huang, H.T. (Hsing-Tsung). 2000. Soybean curd and related products: Transmission of *tou fu* to Japan (Document part). In: H.T. Huang. 2000. Science and Civilisation in China. Vol. 6, Biology and Biological Technology. Part V: Fermentations and Food Science. Joseph Needham series. Cambridge, England: Cambridge University Press. xxviii + 741 p. See p. 317-19. [10 ref]
• ***Summary:*** There is general agreement that tofu originated in China, but considerable uncertainty as to when and how it arrived in Japan. In recent years, the subject has attracted much interest among food historians in China; they hoped that an answer to these questions might help answer questions about the origin of tofu in China.

Two theories about the transmission of tofu to Japan have been proposed. The first follows the popular Japanese tradition which says that tofu was brought from China by a delegation of Buddhist monks headed by the master Kanshin (Jian Zhen; W.-G. Chien Chên) in A.D. 754. The second holds that tofu came to Japan with the Zen master Ingen (Yin Yuan; W.-G. Yin Yüan) in A.D. 1654. Both theories are probably unfounded.

When Ingen arrived in Japan, tofu was already a common food, and he was surprised to see varieties that were different from those he knew from China. After he established the well-known Mampuku-ji temple south of Kyoto, he taught the monks and local tofu masters how to make Chinese-style pressed tofu. According to *The Book of Tofu,* by Shurtleff and Aoyagi, "although this very firm variety became quite popular in Japan in the next century, it is now made by only one tofu shop in Japan and is featured in Zen Temple Cuisine only in restaurants near Mampuku-ji" (p. 115). Address: Alexandria, Virginia.

12225. Huang, H.T. (Hsing-Tsung). 2000. Processing of wheat flour: Production and usage of gluten (Document part). In: H.T. Huang. 2000. Science and Civilisation in China. Vol. 6, Biology and Biological Technology. Part V: Fermentations and Food Science. Joseph Needham series. Cambridge, England: Cambridge University Press. xxviii + 741 p. See p. 497-502. [20 ref]
• ***Summary:*** Even today in China, in Buddhist monasteries and gourmet vegetarian restaurants, gluten (and tofu) are used to make a remarkable variety of vegetarian dishes–with names such as sweet and sour fish, chicken slices with mushrooms, fried shrimps, etc.–that closely resemble counterparts based on animal products. Yet no animal products are used in these dishes. Until the 1950s, good-quality vegetarian dishes based on gluten were found mostly in Buddhist monasteries and a few gourmet restaurants. However thereafter, a great deal has been done to make such processed foods available to the general population. Address: Alexandria, Virginia.

12226. Huang, H.T. (Hsing-Tsung). 2000. Soybean curd and related products: *Douhu* or Doufu-hua [Curds made from soymilk] (Document part). In: H.T. Huang. 2000. Science and Civilisation in China. Vol. 6, Biology and Biological Technology. Part V: Fermentations and Food Science. Joseph Needham series. Cambridge, England: Cambridge University Press. xxviii + 741 p. See p. 323-24. [2 ref]
• ***Summary:*** *Douhua* (2 Cc = Chinese characters given) (bean flower) or *doufu-hua* (3 Cc) [tofu flowers] is simply the freshly coagulated soymilk curds without additional treatment–such as pressing. It is also called doufu-nao (3 Cc) or funao (2 Cc) (bean curd brain). The earliest reference we have to this delicate food is in the *Suiyuan Shidan* [Recipes from the Sui Garden] (4 Cc), by the famous Chinese Qing dynasty gastronome Yuan Mei in about 1790.

© Copyright Soyinfo Center 2013

The recipe for *Fu yong doufu* (4 Cc) (hibiscus tofu) states (p. 100): Place *funao* (2 Cc) in well water and heat to boiling three times to remove the beany flavor. Suspend the curds in chicken soup and bring to a boil. Before serving, garnish with laver [the sea vegetable used to make nori] and pieces of shrimp.

It is significant that the *funao* is first boiled to remove the beany flavor, as well as to dilute the indigestible oligosaccharides in the whey, indicating that the raw *funao* needed additional processing to make it wholly attractive. Today, *doufu-hua* is usually drained as much as possible to remove the whey, and it is frequently suspended in a sugar syrup and served as a refreshing cold dessert. Address: Alexandria, Virginia.

12227. Kansas Soybean Association. 2000. Its soy easy to cook with soy: A cookbook of simply delicious, easy recipes to incorporate soy protein into a heart healthy diet. Topeka, Kansas. 20 p. No index. 24 cm.
• ***Summary:*** A full-color cookbooklet on glossy paper. Address: 2930 S.W. Wanamaker Dr., Topeka, Kansas 66614. Phone: 1-800-328-7390.

12228. Larson, Stephanie. 2000. The soyfoods boom: What's driving the explosion? First in a series. *Soybean Digest.* Dec. p. 10-11.
• ***Summary:*** Mark Messina says the whole market is driven by consumer demand because of health effects. Sales of soyfoods and soy protein products was $2.1 billion in 1999. Of that total, soymilk sales accounted for $300 million, up 38% from 1998. A graph shows soymilk sales (in million dollars) from 1992 to 1999, with projection to 2002. These sales rose from $100 million in 1993 to $300 million in 1999, projected to reach $500 million in 2001.

The United Soybean Board calculated that last year Americans consumed 37 million bushels of soybeans via soyfoods. A color photo shows many commercial soyfood products with colorful labels: Bergin Nut Company Soynuts (no salt), Fantastic Foods Tofu Scrambler, MCOA Brown Rice Miso, Spectrum Soy Oil, Health Trip Soynut Butter, Midwest Harvest Textured Soy Protein, Low-Fat Soy Flour, and Firm Tofu, Country Choice Soy Cocoa, Eden Organic Black Soy Beans, and Whole Foods Soy Ginger Sauce.

• ***Summary:*** This half-page color ad shows the labels of four new types of Nasoya baked tofu: Mesquite Smoke Flavored, Teriyaki, Thai Peanut, and Tex Mex. Each is made with whole organic soybeans and ready to serve. "Offer your customers an exciting new meat alternative with Nasoya Baked Tofu." Address: One New England Way, Ayer, Massachusetts 01432. Phone: 1-800-4-Nasoya or www.viatsoy-usa.com.

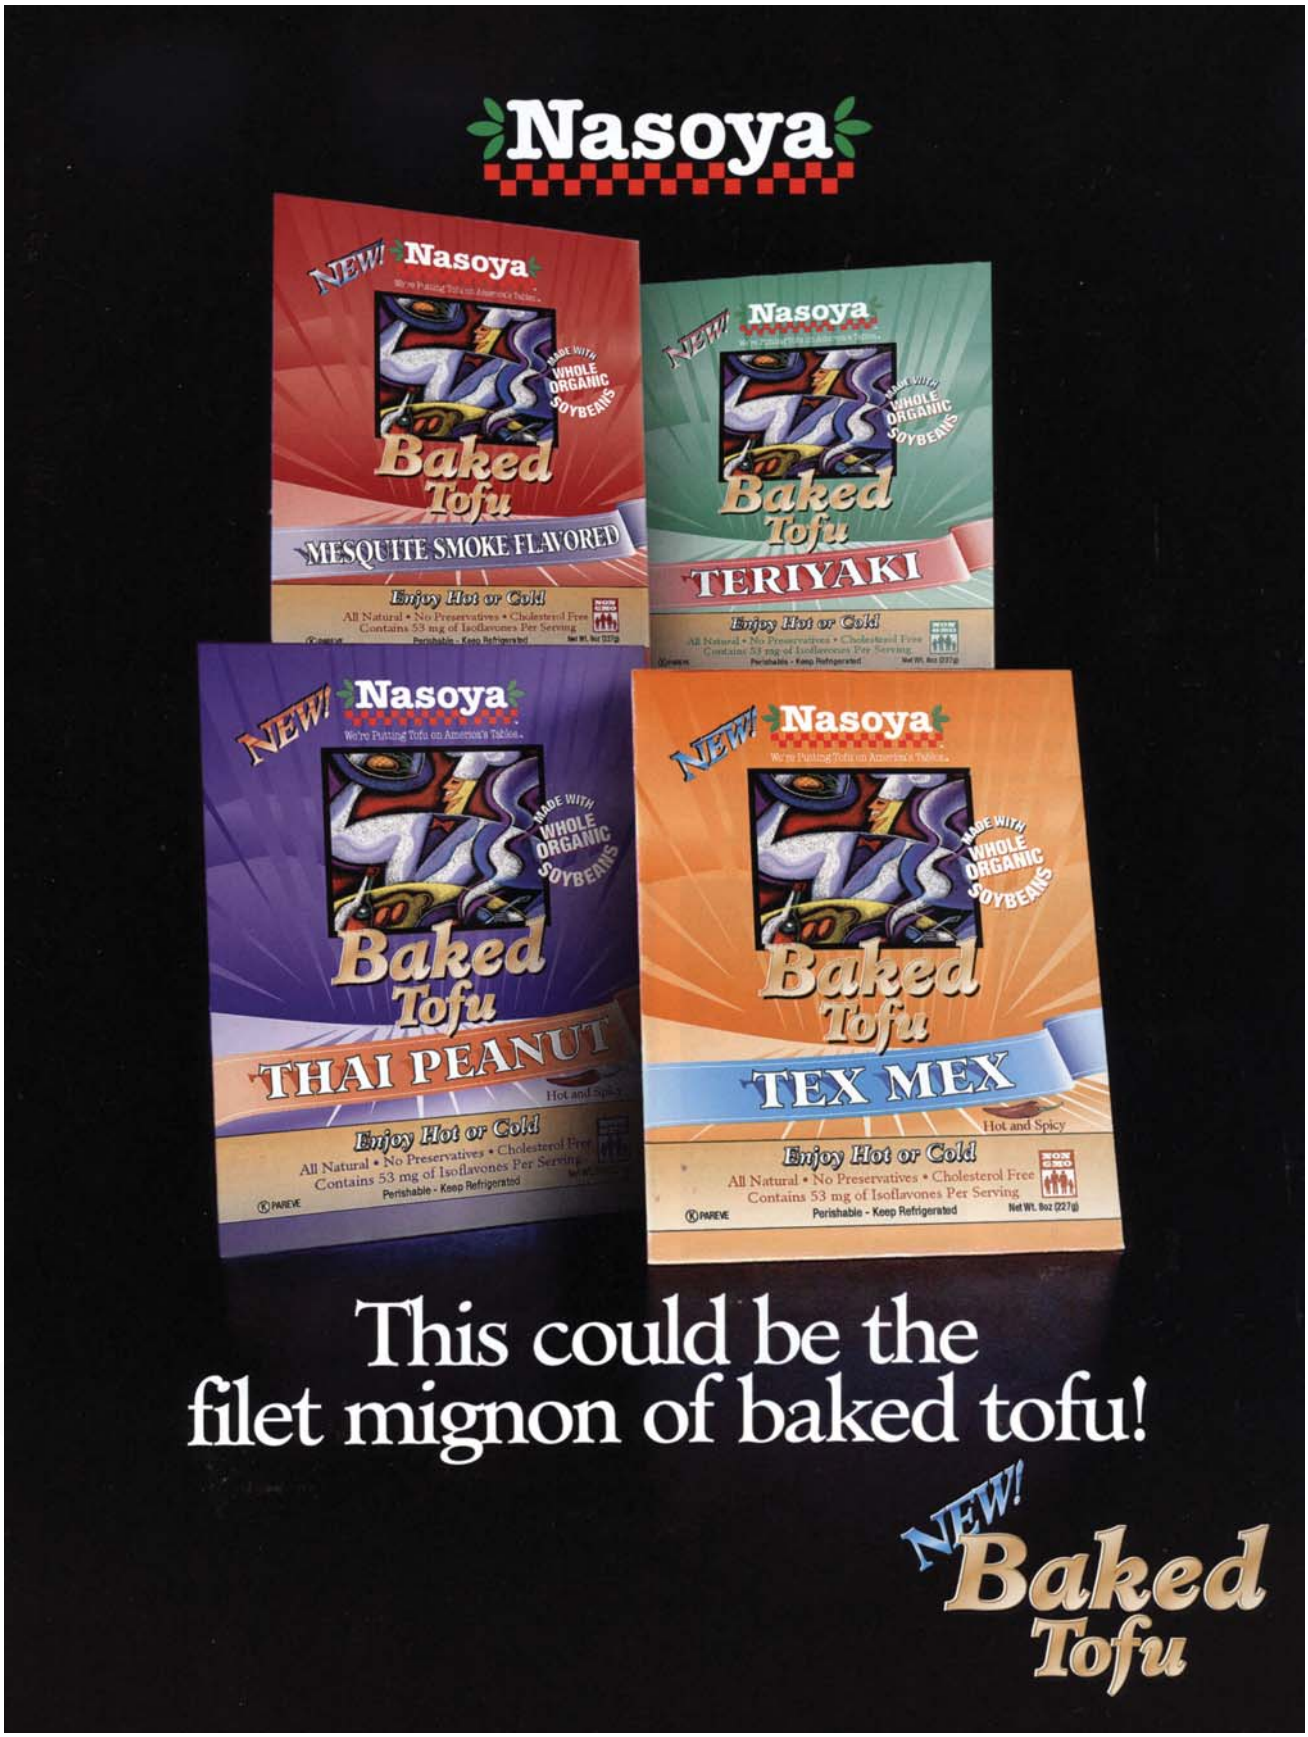
12231. **Product Name:** Nasoya Baked Tofu: Mesquite Smoke Flavored, Teriyaki, Thai Peanut, and Tex Mex.
Manufacturer's Name: Vitasoy USA, Inc.
Manufacturer's Address: Ayer, Massachusetts. Phone: 1-800-4-Nasoya or www.viatsoy-usa.com.
Date of Introduction: 2000. December.
Wt/Vol., Packaging, Price: 8 oz (227 gm).
How Stored: Refrigerated.
New Product–Documentation: Leaflet (dated 2000, 8½ by 11 inch, color; see next page) sent by Patricia Smith from Natural Products Expo West. 2001. March. "This could be the filet mignon of baked tofu!" Shows packages of four different flavors. No ingredients are listed.

Ad (8½ by 11 inch, color) in *Natural Foods Merchandiser.* Dec. p. 16. "Nasoya: This could be the filet mignon of baked tofu!" "Offer your customers an exciting new meat alternative with Nasoya Baked Tofu." Also appeared in the June 2001 issue of this magazine (p. 40). *

12232. **Product Name:** Baked Tofu [Zesty Lemon Pepper Style, Hickory Smoke Barbeque Style, Roma Tomato Basil Style].
Manufacturer's Name: White Wave, Inc.
Manufacturer's Address: 1990 N. 57th Ct., Boulder, CO 80301. Phone: 303-443-3470.
Date of Introduction: 2000. December.
Ingredients: Lemon pepper: Tofu (water, soybeans, nigari {magnesium chloride}, gypsum), expeller pressed canola oil, soy sauce (water, soybeans, wheat, salt), lemon sauce concentrate garlic, onion, black pepper, xanthan gum.
Wt/Vol., Packaging, Price: 8 oz (227 gm) plastic container.
How Stored: Refrigerated or frozen.
New Product–Documentation: Leaflet (13.5 cm x 20.5 cm, glossy color) sent by White Wave. 2000. Dec. "America's favorite way to eat tofu. Three new flavors." On the front is a color photo of the front of the three packages. On the rear: Information about each of six types of White Wave Baked Tofu.

12233. **Product Name:** Fried soybean Wara / Fried tofu.
Manufacturer's Name: Hausa women.

© Copyright Soyinfo Center 2013



© Copyright Soyinfo Center 2013

Manufacturer's Address: Northern Nigeria or Southern Niger.
Date of Introduction: 2000.
Ingredients: Soybeans, coagulant.
Wt/Vol., Packaging, Price: -
How Stored: Unrefrigerated.
Nutrition: -
New Product–Documentation: Osborn, Donald Z. 2008. "Soybeans and soybean products in West Africa: Adoption by farmers and adaptation to foodways." In: Christine M. Du Bois, C.-B. Tan, and S.W. Mintz, eds. 2008. Urbana, Illinois: University of Illinois Press. viii + 337 p. See p. 282-85. According to American Peace Corps volunteers, tofu started to be made in about the year 2000 in the southern parts of the Zinder and Maradi regions of Niger. Since that time, tofu has been made and marketed in Niger using soybeans brought in from Nigeria, in many villages, towns, and markets, mainly in the Hausa-speaking north-central part of Niger. In 2001 it was possible to find tofu in the weekly markets of local villages in these areas, fried and sold with hot red pepper spice. "By 2002 it was more ready available in the cities of Zinder and Maradi and was produced in Birnin'Konni in the Tahoua region. By 2003 it was available in Gaya, and by midyear it was also available in Dosso town in the Dosso region."

12234. Alam, Anwar; Tandon, S.K.; Himanshu, -. comp. and ed. 2000. Technologies from ICAR: for industrial liaison. New Delhi, India: Indian Council of Agricultural Research (ICAR). 353 p. Index. 28 cm. *
• ***Summary:*** In the chapter on "Crop sciences" (p. 1-63), the section on "Seed" (p. 5-12) contains the following subsections related to soybeans: Quality seeds of improved varieties of crops (p. 7-8). Technology for boosting soybean production (p. 11-12). Packaging and storage of seeds for maintaining germination and vigor (p. 25). Improved storability of seeds through better packaging (p. 26).

In the chapter on "Agricultural engineering" (p. 109-242), the section on "Plant machinery and equipment" (p. 111-70) contains the following subsections related to soybeans: Power tiller-operated sweep cultivator (p. 113) Power tiller-operated till plant machine (p. 116). Animal-drawn Jyoti multicrop planter (p. 121). Three-row animal-drawn seed-cum-fertilizer drill (p. 122). Two-row animal-drawn seed-cum-fertilizer drill (p. 123). Tractor-drawn pneumatic precision planter (p. 124). Power tiller-operated Jyoti multicrop planter (p. 126). Power tiller-operated multicrop planter (p. 127). Tractor-mounted cultivator seed planter (p. 128). Tractor front-mounted vertical conveyor-reaper windrower (p. 143). Semi-axial flow multicrop thresher (p. 148). Multicrop thresher (p. 149). High-capacity multicrop thresher (p. 150). Soypaneer [tofu] (p. 191-192). Soyfortified biscuit (p. 193). Full-fat soyflour (p. 194).

In the chapter on "Animal sciences" (p. 243-338), the section on "Animal husbandry" (p. 245-55) contains a subsection titled "Soya pulp–A highly nutritious soya by-product (p. 253).

For Technology adaption [adoption] contact Dr. J.P. Mishra, ADG, (Intellectual Property Rights), ICAR, Krishi Bhavan, New Delhi 110 001.

12235. Chen, Yong. 2000. Chinese San Francisco, 1850-1943: a trans-Pacific community. Stanford, California: Stanford University Press. xvi + 392 p. Plus 16 unnumbered pages of plates. Illust. Index. 24 cm. Series: Asian America. [357* + 771 endnotes]
• ***Summary:*** Page 64: "In 1878 a greater variety of goods and services were available in comparison to what could be had in the 1850s. For lovers of tofu products, for example, the two 'bean cake' shops must have been a special blessing."

protein. 4. Big fat lies. 5. The two faces of carbohydrates. 6. Prospecting for minerals. 7. Vitamins for vegan vigor. 8. Phytochemicals. 9. The vegan food guide. 10. Building vegan dynamos. 11. Growing vegans. 12. The prime of life. 13. Overweight. 14. Eating disorders. 15. Underweight. 16. The vegan athlete. 17. Vegan diplomacy.

This book begins with a good history of veganism and contains (throughout the book) a wealth of accurate, positive information about many different types of soyfoods (especially tofu) and related subjects, including tofu, soymilk, tempeh, soy yogurt, soy cheese, soy sauce, tamari, and soy oil (incl. omega-3 fatty acids). Plus Adventist Health Studies, dietary fiber, phytochemicals and sea vegetables. Address: 1. Kelowna, British Columbia; 2. Langley, British Columbia. Both: Canada.

12238. Evans, K. Lee; Rankin, Chris. 2000. Giant book of tofu cooking. New York, NY: Sterling Publishing Co., Inc. 256 p. Illust. (color photos). Index. 28 cm.
• ***Summary:*** A beautiful vegetarian cookbook, with many color photos on glossy paper, excellent use of standard terminology (except for "freeze-dried tofu"), and 350 healthful, delicious recipes. Contents: Introduction. Tofu basics and techniques: Getting started (buying tofu {soft tofu, firm tofu, extra-firm tofu, silken tofu, marinated tofu, smoked tofu, freeze-dried tofu, fermented tofu}, storing tofu, preparing tofu for your recipes {draining and blotting, pressing, freezing and thawing, blending, cubing and dicing, crumbling, shredding / grating, marinating, boiling slightly sour tofu, frying, deep-frying}), other soy products (edamame, meat alternatives, miso, soy cheese, soy flour, soy ice cream, soy milk, soy sauce, soy sprouts, soy "yogurt," soynut butter, soynuts, tempeh, textured soy protein, whole dry soybeans), tofu and a healthier you (introduction, protein, heart disease, cancer, menopause, osteoporosis, our planet), simple ingredient substitutions (eggs, milk, cheese, butter, salt, sugar {honey, molasses, maple syrup, rice syrup, barley malt syrup}). Ingredient glossary: Incl. arrowroot, balsamic vinegar, bamboo shoots, barley malt syrup, fermented Chinese black beans, filé powder, galangal, garam masala, garbanzo beans, Hoisin sauce, liquid smoke, mirin, miso, nutritional yeast, phylo or filo, pickled ginger, quinoa, rice noodles, rice papers, rice syrup, sake, shoyu, tahini, toasted sesame oil, vegetarian gelatin, vegetarian Worcestershire sauce ("Just like the original, it is made of soy, vinegar, and spices, but without the anchovies"), wakame, wheat germ. Breakfast. Appetizers. Soups. Salads. Lunch and dinner. Dressings, sauces, and spreads. Desserts. Metric conversion chart. Acknowledgments.

12239. Fruehschuetz, Leo. 2000. Soja [Soya]. Schaafheim, Germany: Bio Verlag. 144 p. With recipes by Judith Braun. Illust. Index. 15 cm. [12 ref. Ger]
• ***Summary:*** Contents: Forward: Portrait of the soybean: From China to the entire world, the composition of whole beans, does soya help with cancer?, protein and oil for the world economy. The original soybean and what followed: Introduction (there is not much to improve on in the soybean), the "labor-bean" (Monsanto and Roundup-Ready soybeans), the results for farmers, for the environment, for health, politics without results, for trade and the end-users, the forgotten results, soya in animal feeds. Organically grown soya–without genetic engineering and pesticides. Versatile: Soya in the wholefoods kitchen: Soybeans: whole, ground, and sprouted, the fluid bean–milk, yogurt (fermented), and oil, tofu–the meat without bones, tempeh–the noble cultured food from Indonesia, soy sauce–aged in wooden vats, miso–soya for soups, soyameat–saved from the wolf. Recipes: Soymilk, soy flour and flakes, tofu, tempeh, soy meat and granules, miso, soy sprouts. Address: News journalist for natural foods and long-lived people, co-worker with Schrot&Korn.

12240. Holtzman, Rachel. 2000. Trader Joe's soy foods: Answers to commonly asked questions. Nutrition information (Leaflet). Needham Heights, Massachusetts: Trader Joe's. 3 panels each side. Each panel: 21.5 x 9 cm.
• ***Summary:*** Question and answer format: Contents: What is soy anyway? Why should I include soy in my diet? Does soy have fat? Some soy products say soy wards off heart disease. What does this mean? Ans: The FDA "recently approved a new health claim linking soy protein to a reduced risk of coronary heart disease. Studies show that foods with soy may help stave off heart attacks and other complications of heart disease by lowering cholesterol. The FDA says it takes 25 grams of soy protein a day to have this desired effect (as long as you also follow a diet that's low in saturated fat and cholesterol.) The product needs to meet the strict criteria to bear the new claim, but it will soon be appearing on more labels."

What are isoflavones and where can I find them? Ans: "Soybeans contain a unique compound called isoflavones, which are phyto (plant-based) estrogens. There are three isoflavones: genistein, daidzein and glycitein. Some research suggests that isoflavones are responsible for soy's health properties. One half cup of tofu has an average of 40 milligrams (mg) of isoflavones; one cup of regular soy milk has about 20 mg; one serving of Trader Joe' Soy Protein Powder has 43 mg. Lower fat products have fewer isoflavones. Soy protein concentrates lose isoflavones during processing. Isolated soy protein (ISP) and textured soy protein (TVP) are good sources of isoflavones. Heat treatment does not appear to significantly affect isoflavone content." What is the difference between isoflavones and soy protein? How can I include soyfoods in my diet? Ans: Trader Joe's carries soymilk, tofu, tempeh, soy nuts, edamame (soybeans), soy protein powder, meat substitutes, soybean butter. What is tofu and how can I use it? How

© Copyright Soyinfo Center 2013

much soy should I eat? Ans: About 25-50 grams per day. Address: R.D., Trader Joe's Nutritionist, Needham Heights, Massachusetts.

12241. Hosking, Richard. 2000. At the Japanese table. New York: Oxford University Press. x + 70 p. Illust. (some color). Index. 20 cm. Series: Images of Asia. [19 ref]
• ***Summary:*** Contents: Acknowledgements (thanks to Dr. Naomichi Ishige). The Japanese and food. Food: the raw and the cooked. Seasonal foods and drinks. Appearance, texture, and flavour. The dining room and kitchen. Meals and menus.

Briefly mentions: Soy sauce (p. 2, 12, 20), bean curd (2), tamari (p. 20), Japanese Worcester sauce (p. 20), other soy bean products (p. 20-21), tofu (p. 21, 25), yuba (p. 21, 36), deep-fried tofu–aburaage, agedofu (p. 21), miso (p. 21), green vegetable soybeans (p. 21), teriyaki sauce (p. 28), miso soup (p. 35).

Stanford, California: Stanford University Press. xx + 271 p. See p. 34. Illust. Maps. Index. 24 cm. Series: Asian America. [309* + 563 endnotes]
• ***Summary:*** This is a history of migration from Taishan (in southern China) to the United States. Taishan County is a county in Guangdong province in southwest China, in the Pearl River Delta, 170 km (105 miles) west of Hong Kong and 130 km (81 miles) south of Guangzhou (Canton; see map facing p. 1). It is famous for the many who left China from there, especially to go the California {Gold Mountain} starting at the time of the gold rush (during the Qing / Manchu dynasty) and the Pacific Coast. With 587 km (364 miles) of shoreline, "Taishan seems advantageously situated for travel across the ocean" (p. 20).

Why did they leave? (1) Overpopulation. (2) For economic reasons; both local poverty and the lure of fortune abroad. "Up to 1960, well over half of all Chinese in the United States came from this single county" (p. 3).

Chapter 2, "California Dreaming: Migration and Dependency" (p. 16+) traces the history of migration to and from Taishan. The Taiping Rebellion (1851-1864), which began only two years after the start of California's gold rush, greatly increased the number of men departing from Taishan. By 1860, some 73,890 Chinese had entered the United States through the San Francisco Customs House (p. 32), yet many others entered without being counted. In 1868 Qing dynasty China legalized the emigration of Chinese laborers by signing the Burlingame Treaty with the United States. In 1893, in recognition of the financial potential of overseas remittances, the Qing officially lifted the already defunct ban against those wishing to return (p. 24).

Chinese who traveled overseas clung to the Chinese way of life. Their demand for food and other things Chinese produced a thriving export trade. "The businesses that handled this new demand for Chinese groceries in foreign places were called *jinshanzhuang,* or Gold Mountain firms. They supplied such things as "dried oysters, shrimps, cuttlefish, mushrooms, dried bean curd, bamboo shoots, sweetmeats, duck liver and kidneys, [and] water chestnut flour" to Chinese in the United States. "Preserved ginger was another popular item" (p. 34).

Villagers back in Taishan could use the money sent to them from California to buy soy sauce, tofu, and the like (p. 105). Address: Prof. of Asian American Studies, San Francisco State Univ.

12243. Kiple, Kenneth F.; Ornelas, Kriemhild Coneè. eds. 2000. The Cambridge world history of food. 2 vols. Cambridge, England: Cambridge University Press. See vol. 1, p. 422-27. Vol. 2, p. 1855. [48 soy ref]
• ***Summary:*** In volume one, the chapter titled "Soybean," by Thomas Sorosiak (p. 422-27) is poorly written by a man who is not well-known in this field and does not know the subject well. The following are two examples of incorrect statements: The "ancient Chinese name for the bean was *sou"* (p. 422). Actually it was *shu,* then *dou,* later *dadou.*

For the last paragraph on p. 422, which is about famine in China and *conjee* or gruel, the source is cited as Flannery 1969. However this conference paper by Flannery, titled "Origins and ecological effects of early domestication in Iran and the Near East," does not mention China or Conjee, and the page numbers in the citation are incorrect.

"Soybeans, paradoxically, have a bland taste, which probably inspired the development of flavorful fermented soy products" (p. 425). Actually soybeans are widely considered to have an unpleasant, beany flavor. That is why they are made into tofu (*doufu*), which has an insipid or bland flavor. This chapter contains a fairly good bibliography, but unfortunately few of the references are cited in the text, and some of the references are incomplete.

Includes a food-plant dictionary, which contains more than 1,000 entries and 4,000 synonyms for the names of food plants.

For a scathing (and very fair) review of this book see: Wilkinson, Endymion. 2001. "Chinese culinary history." *China Review International* (Hawaii). 8(2):285-302. Fall.

12244. Kornfeld, Myra. 2000. The voluptuous vegan: more than 200 sinfully delicious recipes for meatless, eggless, and dairy-free meals. New York, NY: Three Rivers Press. [xi] + 305 p. Illust. (by Sheila Hamanaka). Index. 24 cm.
• ***Summary:*** A vegan cookbook with some macrobiotic flavor. The excellent glossary includes: adzuki beans, agar-agar. almond butter, barley malt, barley miso, carob powder, edamame, gluten, haricots verts, Hass avocado, hijiki, Hokkaido pumpkin (kabocha squash), kanten, koji, kombu, kudzu, maple sugar (crystallized maple syrup), mirin,

© Copyright Soyinfo Center 2013

miso, MSG, nori, oden, Rice Dream, rice syrup, sambal (Indonesian word for chutney), sea salt, seitan, shiitake, shoyu, soybean, soy milk, Sucanat, tahini, tempeh, umeboshi paste, wakame, wheat gluten, Yannoh coffee. The index contains 29 entries for tofu, 9 for seitan, 5 for tempeh, 2 for miso, 1 for "Cheese"–tofu (p. 214), "Sour cream"–tofu (p. 25), and teriyaki vegetables. Note: Soy milk is called for in many recipes. Address: Professional Chef, New York City.

12245. Kouwenhoven, Arlette; Forrer, Matthi. 2000. Siebold and Japan: His life and work. Leiden, Netherlands: Hotei Publishing. 111 p. Illust. (Incl. color). No index. 27 cm. [40* ref. Eng]

• ***Summary:*** An excellent biography of Philipp Franz von Siebold (1796-1866), a German physician and naturalist who was one of the first Europeans to live in Japan. In 1823 Siebold wrote a letter to the Governor of Batavia requesting professional help at Deshima. In 1825 two men were finally dispatched: (1) Dr. Heinrich Bürger (1804-1858), a scholar, who worked as a pharmacist in Batavia, and who was to assist with scientific research, chemistry and mineralogy; and (2) Carel Hubert von Villeneuve, an auditor and artist.

On 15 Feb. 1826, Siebold departed from Deshima, accompanying the court journey to Edo (today's Tokyo) of *Opperhoofd* Johan Willem de Sturler; Siebold was joined by Dr. Bürger in the role of secretary, although Bürger's true purpose was to assist Siebold in his scientific research. These were the only three Dutchmen allowed to make the long journey. Siebold and Bürger were well prepared for the trip; they had gathered all sorts of equipment to take with them, including barometers, thermometers, hygrometers, sextants, chronometers, microscopes, crockery, furniture, silver, fine glassware, and even a piano. Some of these items were intended as gifts. En route, the inquisitive Siebold observed and wrote about practically everything. They arrived in Edo on 10 April 1826, about 2 months after leaving Nagasaki, a trip of about 1,400 km. On 1 May 1826 the three Dutchmen had an audience with the shogun. The delegation finally left Edo on 18 May 1826 and arrived at Deshima on July 7. Note: It was almost certainly on this trip that Siebold and Bürger observed soybeans and recorded their observations in the trip's log.

A 3-page chronology of Siebold (p. 100-02) includes: 1796 Feb. 17. Philipp Franz von Siebold born in Würzburg [in today's Germany]. 1815–Starts study of medicine at the University of Würzburg; subjects include chemistry, botany, and physics. 1820–Completes his studies in medicine, surgery, and anatomy, obtains his doctorate, and establishes himself as a physician in Heidingsfeld. 1822 June 21–Appointed Surgeon-Major in the Dutch East-Indies Army. 1823 Feb. 13–Arrives in Batavia. On April 18 he is appointed to the post of physician at the trading post on Deshima, near Nagasaki, Japan. He also receives instructions to conduct research into Japanese natural history, laws, and politics.

1823 Aug. 12. Arrives on Deshima and starts teaching almost immediately. That same year he "married" Kusumoto Sonogi, also known as Otaki (1807-1865); she is 11-12 years younger than he. 1824. Starts a botanical garden on Deshima at the request of the government in Batavia. Opens his school in Narutaki, just outside Nagasaki. 1825. Dr. Heinrich Bürger arrives from Batavia to help Siebold with his geological research, accompanied by C.H. Villeneuve, the illustrator.

1826 Feb. 15 to July 7. He accompanies *Opperhoofd* De Sturler on the court journey to Edo. Bürger, Keiga and several of his Japanese students join the delegation. 1827. The government in Batavia requests his return there, with the possibility that he may have to return to Holland. Also in 1827 Von Siebold's daughter, Oine (1827-1903) is born.

1828 Sept. 18. A severe storm causes the ship, with 89 crates containing Siebold's collection, to run aground on the coast at Nagasaki. The discovery of forbidden objects leads to the detainment of Siebold, Takahashi, and many others. Siebold is placed under house arrest.

1829 Oct. 22. After being subjected to lengthy cross-examination, Siebold is banished from Japan. On Dec. 30 he leaves Japan.

1830 Jan. 18. Arrives in Batavia, then travels to Holland where he arrives on July 7. In Antwerp he meets Dr. Hoffmann, who is later to become the first professor at Leiden University.

Note: 1830. Siebold's first publication on Japanese plants appears (largely in Latin, but with many Japanese characters) in *Verhandelingen van het Bataviaasch Genootschap van Kunsten en Wetenschappen* 12:1-74. See p. 54-57, plus first table at end. He mentions two species of soybeans: *Sooja Japonica,* the cultivated soybean, and *Sooja nomame,* the wild soybean; he says he has seen a living plant specimen of the latter. Soybeans are used to make shoyu, miso, and tofu. A note at the end of table I states that he drafted it at Deshima in November 1827.

1831 April 20. King Willem I agrees to buy Siebold's ethnographic collection and to pay an advance of 12,000 guilders. 1832. Hires a house at 19 Rapenburg in Leiden, Netherlands, where he organises his collection and opens it to the public. He maintains contact with Bürger, who still lives on Deshima. Travels to Germany in the autumn. 1833. Returns to The Netherlands in the summer. Presents the first copy of his opus *Nippon* to the Society of Dutch Letters on 26 Nov.

1835. Travels in Germany and Austria. Meets Zuccarini and others. 1836 Aug. 22. Buys the house at 19 Rapenburg. 1839. From now on he spends winters in Germany, where he meets his future wife, Helene von Gagern.

1840. Buys a piece of land at Leiderdorp, where he builds the villa, 'Nippon' and starts a nursery. 1842. Establishes the plant and seed company, Siebold & Co. with Blume and Rodbard. 1845 July 10. He marries the Lady

© Copyright Soyinfo Center 2013

Helene von Gagern (1820-1877) in Berlin; she is 24 years younger than he. Soon four children are born. 1859. Returns to Japan. Arrives in Nagasaki on Aug. 4. 1861 Oct. He is banished from Edo, and Japan itself. 1866 Oct. 18. Von Siebold dies in Munich, Germany; he is buried in the Alten Südlichen graveyard on the Thalkirchner Strasse.

12246. Kulp, Karel; Ponte, Joseph G., Jr. eds. 2000. Handbook of cereal science and technology. 2nd ed., revised and expanded. New York, NY: Marcel Dekker. ix + 790 p. Illust. Index. 29 cm. Series: Food Science and Technology, No. 99.

• ***Summary:*** Chapter 26, "Fermentation and microbiological processes in cereal foods," by Pierre Gélinas and Carole McKinnon (of Food Research and Development Centre, Agriculture and Agri-Food Canada, St. Hyacinthe, Quebec, Canada) (39 refs) (p. 741-54) contains a long table (p. 742-46) titled "List of foods prepared from fermented cereals." The four columns are: (1) Food name (synonym or related food). (2) Food type (characteristics). (3) Area (country or continent). (4) Main microorganisms.

Under "Soybeans" the following foods are listed: Chee-fan. Chinese yeast. Hama-natto. Kenima. Ketjap. Meitauza. Meju. Miso (chiang, doenjang, kochujang, tauco). Natto. Soy sauce (kanjang, kecap, kicap, shoyu, taosi [sic]). Sufu (tahuri, taokoan tao-hu-yi). Tairu (taire–fermented soybean milk, like yogurt, from Malaysia). Taotjo. Tempe (tempeh).

"Chee-fan" is described as "Curd-like" [fermented tofu] from China. Main microorganisms: *Mucor* spp., *Aspergillus glaucus.*

Note 1. Taokoan (listed under Sufu, above) is not a fermented food. It is the Filipino equivalent of Chinese *doufu-gan* or "pressed tofu." Filipino fermented tofu is *tahuri* (also spelled *tahuli*).

Table 2, "List of representative microorganisms associated with fermented cereal foods" (p. 74-48) contains two columns: (1) Type of microorganism (and within type, genus and species, listed alphabetically by genus). (2) Food produced.

Under "Bacteria" are: *Bacillus natto*–Hama-natto [sic], natto. *Lactobacillus delbrueckii*–Miso, soy sauce. *Pediococcus* spp.–Hamanatto. *Pediococcus halophilus*–Soy sauce. *Streptococcus* spp.–Hama-natto.

Under "Bacteria" are: *Actinomucor elegans*–Meitauza, sufu. *Aspergillus glaucus*–Chee-fan. *Aspergillus oryzae*–Hama-natto, ketjap, meju, miso, saké, soy sauce. *Monascus purpureus*–Anka (ang-kak, beni-koji, red rice), hong-ru (lao-hong). *Mucor* spp.–Chee-fan, ruhi, sufu. *Mucor hiemalis*–Sufu. *Rhizopus oligosporus*–Tempe.

Under "Yeasts" are: *Candida* spp.–Soy sauce. *Zygosaccharomyces rouxii*–Miso, soy sauce.

The section on "Major commercial fermentation processes" includes (p. 752-53) soy sauce (from wheat and soybeans) and miso (from rice and soybeans).

Note 2. Koji, the basis of soy sauce, miso, and saké fermentations, is not mentioned in either of the first two tables. However it is mentioned by name on p. 753. Address: 1. American Inst. of Baking; 2. Prof. Emeritus, Kansas State Univ. Both: Manhattan, Kansas.

12247. Landgrebe, Gary. 2000. Everyday tofu: From pancakes to pizza. Freedom, California: The Crossing Press. 110 p. Illust. Index. 21 cm.

• ***Summary:*** Contents: Dedication. Foreword by Sharon Elliot. Tofu main dishes. Frozen tofu main dishes. Tofu breads. Tofu desserts.

Note: The chapter titles, the recipes, and their order in this book are almost identical to those in a 1978 book by Gary Landgrebe, published by Fresh Press–a company owned by Sharon Elliot. Unfortunately, none of this is mentioned in the present edition, which does have a completely new look–a different size, a new color cover photo, and new interior monocolor photos.

12248. Liberty, Anne. 2000. Super soy! Protect yourself against bone loss, heart disease, cancer, menopause, high cholesterol. Boca Raton, Florida: American Media Mini Mags Inc. 66 p. 14 cm. [1 ref]

• ***Summary:*** This mini-book (only 5½ inches high) was sold (for $1.19) next to the tabloid magazines at the checkout stand at Longs Drug Store in Lafayette, California. On the little cover is a color photo of a grey-haired and healthy-looking lady holding a glass of soymilk. Contents: All about soy: Inside the soybean (phytoestrogen, isoflavones, genistein, protease inhibitors), eight of soy's top health benefits (antioxidant protection from free radicals, breast cancer protection, cholesterol control, colon cancer protection, strong bones, hot flash reduction, a strong immune system, and kidney disease prevention), different soy products (green soybeans, hydrolyzed vegetable protein {HVP}, infant formula {soy-based}, lecithin, meat alternatives, miso, non-dairy frozen soy ("soy ice cream"), soy cheese, soy flour, soy grits, soy protein (incl. TSP = textured soy protein = textured soy flour), soy sauce, soy yogurt, whole soybeans, soy nut butter, soy nuts, soy oil, soy sprouts, tempeh, tofu, whipped soy-based topping, yuba), nutritional value, how much do you need? Bone loss. Heart disease and cancer: Heart disease, cancer (genistein, isoflavones, phenolic acids, phytates, protease inhibitors). Menopause. Cholesterol. Cooking with soy products: Soy flour, miso, soy milk, soy protein, tofu, tempeh. Delicious soy recipes.

The author frequently refers to Earl Mindell, PhD, but has no real scientific references. Many of the recipes were provided by the United Soybean Board. On the last page are two sources of more information and recipes: The United Soybean Board website www.talksoy.com and the Indiana Soybean Board website www.soyfoods.com.

12251. Rose, Robert. ed. 2000. Beans, lentil & tofu gourmet. Toronto, Ontario, Canada: Robert Rose, Inc. 192 p. Illust. Index. 26 cm.
• ***Summary:*** This is an unusual but attractive book, with no real author or publisher. It was written by "The editors of Robert Rose" and published by Robert Rose Inc., with financial support of the government of Canada. Basically, it is a collection of recipes from other cookbooks. Except in the chapter titled "Meatless" (p. 145-62), many recipes contain meat, poultry, fish, or seafood. The section titled "Contributing authors" lists eight authors, with photos and descriptions of their cookbooks, and statements such as "Recipes from this book are found on pages 23, 38, 69, and 180." The book contains 12 full-page color photos of dishes prepared from the recipes.

Contains 13 tofu recipes and one tempeh recipe: Malay vegetable-stuffed fried bean curd with spicy sweet-and-sour sauce. Bak choy noodle and tofu chicken soup. Curry-fried tofu soup with vegetables and udon noodles. Mixed vegetable herb broth with soft tofu. Chickpea tofu stew. Braised stuffed bean curd. Braised roasted pork with tofu and green onions. Steamed shrimp-stuffed tofu with broccoli. Hoisin stir-fried vegetables and tofu over rice noodles. Barbecued tempeh with basil, hyssop and ginger. Chickpea tofu burgers with coriander mayonnaise. Thai dry vegetable curry (with tofu, p. 162). Pea tops with pancetta and tofu. Soy-braised tofu, cabbage and ginger with cellophane noodles (with soya sauce, p. 172-73). Address: 120 Eglington Ave. E., Suite 1000, Toronto, ONT Canada. Phone: (416) 322-6522.

12252. Salmon, Margaret Belais. 2000. Soy discoveries: Recipes for life. Over 700 quick soy recipes. Philadelphia, Pennsylvania: XLibris Corp. 474 p. Recipe index. 22 cm. [60 ref]
• ***Summary:*** Contents: Acknowledgments. Introduction: The truth about food additives and chemicals in food, approximate measurements. Recipes: Soups. Salads and vegetables. Main dishes and appetizers. Omelets. Breads, muffins, pancakes / waffles, cookies. Desserts. Sugar-free desserts. Drinks. Appendix: Food safety.

The rear cover contains a portrait photo and a brief biography of Margaret Salmon with a list of other books she has written. She received a degree in food chemistry and nutrition at the University of California at Berkeley, and degrees at Columbia University in the science of nutrition and nutrition education. She has a certificate of Hospital Dietetics from Duke University. She was formerly research dietitian on the cystic fibrosis research team at Columbia-Presbyterian Medical Center, New York City, and chief dietitian and director of the dietetic traineeship program at St. Joseph's Hospital and Medical center in New Jersey. Address: R.D., L.D. [Licensed Dietician], P.D. [Professional Diploma, Columbia Univ., specialist in nutrition education], Salmon Consultants, 435 Lynn St., Harrington Park, New Jersey 07640. Phone: 201-768-4457.

12253. Sharma, Ratan. 2000. Soymilk and tofu: An update in Indian context. Technical Bulletin. Haryana, India: American Soybean Association (ASA) / United Soybean Board. 10 p. 28 cm. [7 ref]
• ***Summary:*** Contents: Introduction and history. Future of soy products in India. Soymilk, Tofu, Okara. Soymilk powder. Nutritional value. SoyaCow Project. SoyaCow. Cost of SoyaCow component pieces of equipment. ASA International Offices.

Color bar charts show: (1) Protein yield from cultivation of different crops (in kg/ha). The soya bean gives by far the highest protein yield, 509 kg/ha. (2) Percentage of protein in common foods. Soya bean is by far the highest at 40%. (3) Essential amino acids in soya milk and cow's milk as compared to the ideal protein source. (4) Essential amino acids in soya milk and cow's milk as compared to the recommended daily intake by an adolescent. (5) A

© Copyright Soyinfo Center 2013

comparison of nutrients in mother's milk, cow's milk & soya milk, normalised to the same water level. (6) Flow chart of the many different products that can be made from 1 kg of soya beans. (7) Cost benefit analysis for SoyaCow SC20 system, with net cost of production, monthly income, net profit per month, and payback period for four products: Soy milk (plain), flavoured soya milk, curd, tofu. All values are in Indian Rupees. Photo of SoyaCow SC20.

Pages 6-7: The SoyaCow project was started in India in 1991 by Child Haven International (CHI), a Canadian based NGO (non-governmental organization, and follower of Gandhian philosophy) "working in India and Nepal, and ProSoya Inc. of Canada, a leading name in soymilk technology. Initially the project was granted substantial funding by CIDA (Canadian International Development Agency). Its main objective is to provide low cost nutrition to the general Indian population in the form of soymilk and its derivatives.

The "SoyaCow Centre was established in India jointly by Child Haven International and ProSoya in the year 1993, and the patented technology of manufacturing table top soymilk machines suitable for the cottage industry in India was transferred to SSP Ltd., a Faridabad (Haryana) based well known dairy, food processing and pharmaceutical equipment manufacturing company. Now these machines are being manufactured at SSP under the guidance of the SoyaCow Centre. This centre is providing all kinds of assistance" from making business plans to installation of the machines, operator's training, developing recipes suitable to the local taste, helping the users of the machines in marketing soy products, and providing all the know-how on soymilk to the general population. In association with the American Soybean Association this center has developed the technology to give 4-6 months shelf life to soymilk in bottles without any refrigeration. Also, vacuum packaging technology is provided to pack tofu for a longer shelf life. This technology is given free to SoyaCow users. Sites using this technology are doing very well. Address: PhD, The Child Haven International, SoyaCow Centre, KH-177 Kavi Nagar, Ghaziabad–201002, UP, India; American Soybean Assoc., Asia Subcontinent, 168 Jor Bagh, New Delhi–110 003, India.

12254. Shimbo, Hiroko. 2000. The Japanese kitchen: 250 recipes in a traditional spirit. Boston, Massachusetts: Harvard Common Press. xiii + 512 p. Foreword by Ming Tsai. Illust. (by Rodica Prato). Index. 23 cm.

• ***Summary:*** An excellent book with exquisite illustrations. The index contains 46 entries for miso, 20 for tofu, 12 for shoyu, 10 for teriyaki, 7 for edamame, 6 for natto (fermented soybeans), 6 for soybeans, 5 for koji ("a fermentation starter"), 3 for koyadofu (freeze-dried tofu), 2 for soy milk, soy sauce dressing, soybean lover's soybean rice, soybean miso, soybean pulp, 1 each for kinu dofu, moyashi (incl. soybean sprouts; "Until recently, moyashi used for cooking in Japan were predominantly soybean sprouts," p. 42), nama-age, nama-miso, nama-shoyu, okara (soybean pulp), saikyo miso, and tamari.

In the section on *Daizu* "(Dried soybeans)" (p. 96-97) both roasted soybean flour and *kinako* are mentioned. Dried green soybeans, are toasted then ground to a flour (*kinako*) which "is mixed with sugar and used to coat moist or sticky Japanese sweets." During the summertime, edamame (fresh green soybeans) are boiled and served in the pods.

The section on "Koyadofu" recounts the story of its origin: "The dried form of tofu, koyadofu, was invented by accident around the twelfth century, when, it is said, a priest at Mt. Koya Temple left freshly made tofu as an offering on the altar one snowy night. The next morning the tofu was frozen, so he threw it away in the back garden." After several sunny days of melting and evaporation, the tofu was found completely dried. It was found that this dried form can be kept for a long time.

The section on *Tofu seihin*–"Cooked tofu products" (p. 139-41) includes *Abura-age*–"Fried thin tofu." "One type of *abura-age,* called *sushi-age,* is sold specially for the preparation of *inarizushi,* a small barrel-shaped brown sushi, *Sushi-age* comes slit to make a pocket into which sushi rice can be stuffed."

Note: This is the earliest English-language document seen (April 2013) that uses the term *Sushi-age* to refer deep-fried tofu pouches used to make inari-zushi.

Atsuage–"Fried tofu." *Ganmodoki*–"Fried tofu dumplings." *Yakidofu*–"Lightly broiled tofu." *Yuba*–"Soy milk sheet."

The latter section states nicely: "Because freshly collected yuba is soft and fragile, many sheets may be piled together and rolled into a 1-inch-thick stick. The stick is chilled, cut into bite-sized pieces, and eaten with a little shoyu (soy sauce) and grated wasabi. Fresh yuba has a wonderful creamy texture and a sweet, nutty taste."

"Because fresh yuba is perishable, most yuba found in stores is in the form of a dried sheet." It must be reconstituted in water, but after it has regained its flexibility it makes an excellent wrapper for other foods in fried or simmered dishes.

Shimbo-Beitchman is a knowledgeable and talented Japanese cooking teacher who ran a cooking school in Tokyo for eight years and in London for two; she now teaches in New York City. Address: Teacher of Japanese cooking, Hiroko's Kitchen, London, England. Phone: Fax: 44-171-289-0855.

• ***Summary:*** A remarkable and extremely valuable book. Partial contents: Introduction: Recent historiographical trends, center and periphery, periodization, the dynasties. I: Basics. 1. Language. 2. Dictionaries. 3. People. 4. Geography. 5. Chronology. 6. Telling the time. 7. Statistics: Numbers and order of magnitude, population, weights and measures, money, prices. 8. Guides and encyclopedias. 9. Locating books. 10. Locating secondary sources. 11. Libraries.

II: Pre-Qin sources. 12. Archaeology. 13. Pre-Qin archaeology. 14. Prehistoric signs and symbols. 15. Oracle bone inscriptions. 16. The characters: Evolution and structure. 17. Epigraphy. 18. From bamboo strips to printed books. 19. Excavated and transmitted texts.

III: Historical genres. 20. Primary and secondary sources. 21. Annals. 22. Standard histories. 23. Topically arranged histories. 24. Miscellaneous histories. 25. Government institutions. 26. Official communications. 27. Law. 28. War.

IV: Other primary sources... 35. Agriculture, food and the environment. 36. Medicine. 37. Technology and science... 42. Foreign accounts of China.

V: Primary sources by period.

In the chapter titled "Agriculture, food and the environment," section 35.2.2 on "Pre-Qin foodstuffs and cooking" (the Qin dynasty, 221-206 B.C., came just before the Han) states that the staple dishes, cooked mainly by boiling or steaming, were typically "accompanied by a savory paste (*jiang, miso* in Japanese) made from hydrolyzed (fermented) meat, fish, crustaceans, or, most important of all, soybeans" (Footnote 8). "The soybean is indigenous to northeast China. Its cultivation began in the Zhou period. It was a major source of protein, especially for peasants and laborers. Starting in the Yangzi valley, it was brined and hydrolyzed into the characteristic Chinese flavoring, soy sauce (*jiangyou*) (9). By the Han, a new process had been discovered; if the production was interrupted half way and the beans dried, they became blackened and delicious. Along with savory pastes (*jiang*) and pickles (*zu*), these fermented soybeans (*chi*) were immensely popular (10)."

Footnote 8: See *Zhongguo shiqian yinshishi* (A history of Chinese prehistoric food and drink), Wang Renxiang, ed. in chief, Qingdao, 1997.

Footnote 9 (p. 638): "The origin of 'soya' in European and other languages is from either *xiyao* [fermented black soybean sauce] or *shôyu* (the Cantonese and Japanese for *jiangyou* [soy sauce] respectively). The early generic word was *shu* (*Glycine max*), later *dou,* and later still *dadou* to distinguish it from post-Han imported pulses."

Footnote 10: *"Chi* used to be pronounced *shi.* Other names for *chi* were *douchi, daku,* and *nadou* (*nattô* in Japanese)."

Section 35.2.3 on "New foodstuffs and cooking" covers the period from the beginning of the Han dynasty in 202 B.C. Noodles (*bing*) were introduced. Soybeans (in the forms of jiang and fermented black soybeans {*chi*}) remained an important source of protein. Alfalfa (*musu* or *mushu*), peas (*hudou,* modern *wandou*), and sesame (*huma,* modern *zhima* or *mazi*) are said to have been introduced by Zhang Qian, the emissary from the Former / Western Han dynasty. By the Tang "bitter fermented blackened soy beans" (*huchi*) had been introduced; *hu* means "barbarian." Tofu (*doufu*) is first mentioned in the early Song dynasty. It was imported into Japan and first appeared there in a document dated 1183. "It was used as a substitute for meat and fish in Buddhist vegetarian cooking." New World crops which made their way into China from the 16th century include peanuts (*fandou,* modern *huasheng*), chili, corn, sweet potatoes, and tomato (p. 643).

Note: The author was educated in England. Address: Head of Delegation and Ambassador to China for the European Commission.

12257. Yurgionas, Sasha. 2001. Garbanzo bean tofu is made at the Rangoon Restaurant in Philadelphia (Interview). *SoyaScan Notes.* Jan. 8. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** This tofu is made by George (phone: 215-829-8939) from chickpea flour. It is good for people who are allergic to soybeans. The concept of garbanzo bean tofu comes from Burma. Address: Oberlin Student Co-op, Oberlin College, Oberlin, Ohio 44070.

12258. Sievin, Colleen. 2001. Company built on a blender. *Journal* (*Rapid City, South Dakota*). Jan. 14.

• ***Summary:*** Steve Demos, age 51, founder and president of White Wave, "likens his success to the fairy tale, 'Jack and the Beanstalk,' where the main character trades in his cow for magical beans."

A photo shows Demos holding a carton of Silk soymilk. Address: Associated Press.

12259. Coon, Chris. 2001. Memories of the early days at the Soy Plant in Ann Arbor, Michigan (Interview). *SoyaScan Notes.* Jan. 16. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Three people formed the core group that started

© Copyright Soyinfo Center 2013

The Soy Plant in Ann Arbor: Steve Fiering, Sue Kalen, and Chris Coon. They all lived together in a house in Pleasant Lake, a little burg (town) about 15 miles southwest of Ann Arbor. Of these three, Chris was the first to leave the company–in 1980.

He has kept in touch with a number of the members including Ann Elder (who lives near Ann Arbor), Sue Kalen (who lives near Santa Fe, New Mexico), Michael Mazzie, Gaya Kile (formerly David Michaelthon), Leslie Brown, Jean Robars, and Kerrie Sanford. Address: Manchester, Michigan. Phone: 734-428-9249.

12260. Heijdra, Martin. 2001. Books on the history of tofu in Chinese. *Mao-doufu* (Interview). *SoyaScan Notes.* Jan. 26. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** In Princeton's Gest Oriental Library are at least four good Chinese-language books on the history of tofu in China–all published after 1983.

Martin found a word *mao-doufu* ("hairy tofu"), which refers to a type of fermented tofu covered with the hairs of a mold mycelium. Address: PhD, Chinese bibliographer, Gest Oriental Library, 317 Palmer Hall, Princeton Univ., Princeton, New Jersey 08544-1005.

12261. G.T.B. Group of Japan, Inc. 2001. Questionnaire [concerning edamame]. Denver, Colorado. 6 p. Jan. 31. Unpublished typescript.
• ***Summary:*** This research was conducted over a 2 month period from 1 Dec. 1999 to 31 Jan. 2000. The questionnaire was administered by an in-store demonstrator. The GTB is the edamame vender for Whole Foods, Wild Oats, and King Sooper. The questionnaire consists of 11 questions, with about 4-5 choices after each question. The number of respondents to each question varies from 59 to 132.

1. How long have you known about Edamame? More than 1 year: 49%. First time: 22%.

2. How often do you purchase Edamame? 1-2 times per month: 44%. Once every 2 weeks: 22%.

3. How often do you eat soy products? (Tofu, Dried soybeans, Soymilk etc.). 1-2 times per week: 51%. 2-3 times per week: 22%. 1-2 times per month: 18%. 2-3 times per month: 9%.

4. Reasons for purchasing our Edamame. Good Taste: 37%. Great health benefit: 33%.

5. Price. Reasonable: 59%. Expensive: 38%.

6. How do you like the flavor of our Edamame? Just Right: 88%. Do not need any salt at all: 7%. Not Enough Salt: 4%. Too Salty: 1%.

7. How do you eat Edamame? By Itself: 81%. Put them into salad: 13%. Put them into stir fry: 5%.

8. How do you feel about the person doing the demonstration? Very friendly: 59%. Provides great information: 23%. Answers customers' questions clearly: 17%.

9. How did you find out about Edamame? By shopping grocery: 53%. At restaurant: 26%.

10. What are other food products you would prefer to eat as snack or quick-preparation meal? Sushi: 37%. Miso soup: 29%. Noodle soup: 28%.

11. If you have any other comments or suggestions, please feel free to give us anything! Address: Denver, Colorado.

12262. Glenville, Marilyn. 2001. Natural alternatives to HRT* (* hormone replacement therapy) cookbook: Understanding estrogen and foods that benefit your health. Berkeley, California: Ten Speed Press. 192 p. Illust. Index. 24 x 21 cm. [37* ref]
• ***Summary:*** Every woman who experiences menopause has probably experienced unpleasant symptoms such as joint pains, mood swings, weight gain, hot flashes, etc. Yet these symptoms can be avoided, or at least alleviated–by simple and safe changes in diet to include more phytoestrogens and isoflavones. This books tells and shows you how. Already a best-seller in the U.K. with over 20,000 copies in print.

Although this is not a vegetarian cookbook (recipes call for the use of fish and shellfish such as crab, mussels, salmon, tuna, etc.), there is extensive discussion of the benefits of soyfoods in a diet for menopausal women and many recipes that use soy (especially tofu). The chapter titled "What you need to eat at menopause" contains a good discussion (p. 17-18) of the benefits of isoflavones / phytoestrogens and natural soyfoods. It is known that "legumes contain good levels of isoflavones, and soy ranks the highest." Phytoestrogens are also good for bone health, and soy protein helps to reduce cholesterol (p. 25).

In the "Introduction to the recipes" is a section on "Soy products" (p. 47) that discusses miso, soy milk, soy sauce, tempeh, and tofu (which is "wonderfully versatile"). Soy-related recipes include: Scrambled tofu (p. 71). Tofu vegetable quiche (p. 90). Russian salad deluxe with tofu dressing (p. 96). Vegetable, bean sprout and tofu stir-fry (p. 104-06). Tofu and mushroom stroganoff (p. 106-07). Herby tofu and oat sausages with nutty mash (p. 112). Austrian bean salad with tofu dressing (p. 130-132). Deluxe kebabs (p. 136). Apricot tofu ice-cream (p. 156). Tofu cheesecake (p. 157). Mixed berry fool (p. 159). Miso broth (p. 176). Soy mayonnaise (p. 179). Sesame tofu dressing (p. 180). Tofu dip for raw vegetables (p. 180). Mocha tofu cream (p. 183). Tofu cream (p. 183).

Marilyn Glenville, PhD, earned her doctorate at Cambridge University and is Chair of the Governing Council for the British Association of Nutritional Therapists. She has practiced nutritional therapy in the U.K.and U.S. for more than twenty years, and specializes in the natural approach to female hormone problems. She practices from three private clinics in London and Kent, including the prestigious Hale Clinic. Address: PhD, nutritional therapist, UK.

12263. Hagler, Louise. 2001. Miso cookery. Summertown, Tennessee: The Book Publishing Co. 96 p. Illust. Index. 23 cm.
• ***Summary:*** Contains 70 recipes (each with a nutritional analysis) that use miso as an ingredient, and four full-page color photographs. Contents: Introduction. It's alive!!!! (visit to American Miso Co. in North Carolina). Soups. Spreads. Salads and dressings. Sauces and gravies. Vegetables. Main dishes. Side dishes. Sweet things.

Many recipes call for the use of tofu as an ingredient, and some call for the use of edamame, gluten, soymilk, soy yogurt, tempeh,

On the rear cover is a color photo of Louise Hagler; her vegetarian cookbooks have sold over 750,000 (or 742,000) copies worldwide. Address: Summertown, Tennessee.

12264. Okamura, Ao. 2001. Korede wakatta Mito nattô no nazo: Shizen shokuhin [Now I've understood the mystery of Mito nattô: Its a natural food]. Tokyo: Tokyo Shinbun Shuppan Kyoku. 159 p. 19 cm. [Jap]*
Address: Japan.

12265. **Product Name:** Sea-fu (Tofu with Sea Vegetables).
Manufacturer's Name: Silverking Soyafoods.
Manufacturer's Address: 508-C Latimer Street, Nelson, BC, V1L 4T9, Canada. Phone: 250-352-5897.
Date of Introduction: 2001. January.
Ingredients: Incl. water, soybeans, four types of sea vegetables, coagulant.
How Stored: Refrigerated.
New Product–Documentation: Talk with Jeff Mock, owner. 2001. May 18. He introduced this product on 22 Jan. 2001. He stirs four types of sea vegetables (hijiki, dulse, arame, and bull kelp) into the hot soymilk before adding the coagulant to make the tofu.

12266. **Product Name:** Tofutti Super Soy Supreme (Nondairy Ice Cream) [Bella Vanilla, New York New York Chocolate, Cool Cappuccino, and Plum Krazy].
Manufacturer's Name: Tofutti Brands Inc. (Marketer).
Manufacturer's Address: 50 Jackson Dr. (P.O. Box 786), Cranford, NJ 07016. Phone: 201-272-2400.
Date of Introduction: 2001. January.
Ingredients: Water, organic evaporated sugar cane juice, maltodextrin, corn oil cocoa butter, non-GMO isolated soy protein, tofu, mono- and di-glycerides, plus four types of gums, etc.
Wt/Vol., Packaging, Price: 17 fl oz (500 ml) carton.
How Stored: Frozen.
New Product–Documentation: Talk with Dana Jacobi. 2001. Feb. 25. This new product has a purple container with the text in both English and French. It has less fat than the Tofutti Premium. Dana bought a carton of the vanilla and thought it tasted terrible–greasy.

12267. **Product Name:** Azumaya Firm Tofu (Made with Non-GMO Ingredients).
Manufacturer's Name: Vitasoy USA Inc.
Manufacturer's Address: 1575 Burke Ave., San Francisco, CA 94124. Phone: 1-800-328-8638 (= Eat Tofu).
Date of Introduction: 2001. January.
Ingredients: Water, whole non-genetically modified soybeans, calcium sulfate.
Wt/Vol., Packaging, Price: 14 oz (397 gm) packed in water in molded plastic tray (No. 2 HDPE) with heat-sealed, peel-off plastic film lid. Retails for $1.69 (2001/03, Safeway supermarket, Lafayette, California).
How Stored: Refrigerated.
Nutrition: Per 2.8 oz (79 gm): Calories 70, calories from fat 35, total fat 4 gm (6% daily value; saturated fat 0 gm), cholesterol 0 mg, sodium 0 mg, potassium 105 mg (3%), total carbohydrate 2 gm (dietary fiber 0 gm, sugars 0 gm), protein 7 gm (12%). Calcium 15%, iron 6%. Percent daily values are based on a 2,000 calorie diet.
New Product–Documentation: Product with Label purchased at Safeway supermarket in Lafayette, California. 2001. March 4. The text on the front panel reads (from top to bottom): "All natural. Azumaya. Tofu. A good source of soy protein. Best for sautéing, casseroles, and salads. Firm." In the lower left corner is a red heart followed by this statement: "Diets low in saturated fat and cholesterol that include 25 grams of soy protein may reduce the risk of heart disease. One serving of Azumaya Firm Tofu provides at least 30% of the daily soy needed." In the lower right corner is a color photo of strips of deep-fried tofu with sesame seeds, green pasta, and sliced tomatoes in a white bowl.

The back panel, attached to the bottom of the plastic tray, gives nutrition facts, ingredients, UPC / bar code, and additional information. Text in upper left corner: "Contains 25 mg of total isoflavones per serving. Copyright 2000, but dated "1/01" (Jan. 2001). 1-800-Vitasoy (848-2769). Visit us at www.vitasoy-usa.com.

Talk with consumer affairs rep. at Vitasoy in San Francisco. 2001. March 20. This product was introduced in Jan. 2001.

12268. Schmoll, Heike. 2001. Dank BSE zum Bestseller: Die steigende Nachfrage nach Tofu laesst sich kaum noch [Thank BSE for a best-seller: The rising demand for tofu leaves it scarcely feeling self-satisfied]. *Frankfurter Allgemeine Zeitung* (*Germany*). Feb. 10. p. 11. [Ger]
• ***Summary:*** BSE is bovine spongiform encephalopathy = mad cow disease. In Freiburg, they work six days a week, three shifts a day, and even then they are able to deliver only 60-7% of the demand. The BSE crisis has left tofu, a good source of plant protein, occupying the high ground. Germany's largest tofu manufacturer, the Freiburg tofu

company Taifun (Life Food), in November of last year, made 15-20 metric tons (tonnes) of tofu a week. In December and January of this year, production rose to 25 tonnes a week. But they would like to be able to make 40 tons a week.

12269. Shinde, V.N.; Kadam, P.S.; Pawar, V.D.; Kshirsagar, R.B. 2001. Studies of effects of pre-treatments on quality of soypaneer: Research note. *J. of Food Science and Technology* (*Mysore*) 38(1):54-55. Jan/Feb. [11 ref]
• ***Summary:*** The soaking pre-treatment of Pooja variety soybeans in a 1% solution of sodium bicarbonate (baking soda) was found to give the best results in terms of the contents of protein, fat, total solids, and the yield of soypaneer (tofu). The organoleptic qualities of this tofu were also found to be superior to the tofu prepared by other pre-treatments, but inferior to regular paneer made from buffalo milk.

Note: The word "soypaneer" appears 12 times on page 54 and twice on page 55. Address: College of Food Technology, Marathwada Agricultural Univ., Parbhani–431 042, India.

12270. **Product Name:** Soymilk [Natural Unflavored, Vanilla, Chocolate, or Ginger].
Manufacturer's Name: Tofu Shop Specialty Foods Inc.
Manufacturer's Address: 100 Ericson Ct., Suite 150, Arcata, CA 95521. Phone: 707-822-7409.
Date of Introduction: 2001. February.
Ingredients: Vanilla: Filtered water, organic* soybeans, organic* brown rice syrup, organic* cane sugar, vanilla, calcium carbonate, salt. * = Grown in accordance with the California Organic Food Act of 1990.
Wt/Vol., Packaging, Price: Pint and quart plastic bottles.
How Stored: Refrigerated.
New Product–Documentation: Four Labels sent by Matthew Schmit. 2002. Sept. 9. The Vanilla was introduced in 1980, the other three flavors (and their labels) in Feb. 2001. 2.37 by 4 inches. Self adhesive. Red, brown, or green and orange-yellow on white. A handsome, impressionistic watercolor illustration shows a tofu shop on stilts on a cliff near the ocean with a tree arching overhead.

12271. **Product Name:** Azumaya Baked Tofu: Mesquite Smoke Flavored, Teriyaki, Spicy Thai Peanut, and Chile Picante.
Manufacturer's Name: Vitasoy USA, Inc.
Manufacturer's Address: 400 Oyster Point Blvd., Suite 201, South San Francisco, Califronia 94080.
Date of Introduction: 2001. February.
Ingredients: Teriyaki: Tofu (water, whole non-genetically modified soybeans, magnesium chloride), soy sauce (water, whole non-genetically modified soybeans, sea salt, whole wheat, alcohol to preserve freshness), cane juice (dried), sea salt, ginger, natural flavors, garlic (dried), caramel color, carrageenan, sesame seeds.
Wt/Vol., Packaging, Price: 2 pieces in 8 oz (227 gm) shrink pack. Teriyaki retails for $1.29 (2001/08, Lafayette, California).
How Stored: Refrigerated.
New Product–Documentation: Products with Labels purchased at Safeway in Lafayette, California. 2001. Aug. 15. Teriyaki retails for $1.29 but Mesquite retails for $2.69. Teriyaki Label: 3 by 4¼ inches. Red, black, white, and blue. A color illustration shows a large red Japanese Shinto torii arch standing in water with snow-capped Mt. Fuji in the background. In the right front is a Japanese woman in a kimono holding a fan in one hand and a paper umbrella in the other. On the front panel: "Ready-to-Eat. All natural. No preservatives. Cholesterol free. Pasteurized." On the back of the Teriyaki is written: "Soy protein claim: Azumaya Baked Tofu is an excellent source of soy protein. One 4-ounce serving of Azumaya Baked Tofu contains 19 grams of soy protein." A date code: 11/00 (Nov. 2000) is printed in the lower left corner. Soyfoods Center taste test: Mesquite has grill marks on the outside. Not much flavor penetration: 7. Teriyaki has somewhat better flavor. Label design: Okay.

12272. Evers, Marco. 2001. Steaks vom Weizenacker [Steaks from the wheat field]. *Spiegel* (*Der*) (*Germany*). March 12. p. 200-03. [3 ref. Ger]
• ***Summary:*** To deal with the world food crisis, people must get more of their protein from the plant kingdom. But actually they are making plant-based foods that imitate meats–one might say pseudo-meats.

Mentions De-Vau-Ge of Lüneburg, Klaus Gaiser of Topas, and "Life Food Taifun-Produkte," in Freiburg, Germany's largest tofu manufacturer. Last year Life Food made 15 metric tons (tonnes) a week of tasteless tofu. Now they are making 25 tonnes a week, but are hoping to make 45 tones a week.

12273. Horowitz, Janice M. 2001. Good news. *Time.* March 12.
• ***Summary:*** "To get 1.5 oz. of protein from soybeans, you would need to consume 4 oz. of beans, and of tofu–get those taste buds ready–more than a pound."

12280. Andoh, Elizabeth. 2001. Sampling seasonal delicacies, at reasonable prices, in Osaka. *New York Times.* April 1. p. TR6, TR18 (Sunday).
• ***Summary:*** Contains reviews of restaurants in Osaka. Yoshino Sushi offers "plump vegetable rolls stuffed with broth- and soy-simmered koya-dofu (dried tofu).

Shiru Yoshi offers "one tofu kaiseki; each menu is $100 a person. Throughout Japan tofu is not synonymous with vegetarian cuisine. At Shiru Yoshi, it means two of the many courses that feature silky bean curd [kinugoshi; silken tofu]: in the winter a hot pot of tofu and mushrooms with a soy-based dip... and agedashi, a deep-fried block of tofu..." A "succulent chunk of miso-marinated fish was also served" to those who ordered the kobachi kaiseki dinner (literally "feast of small dishes"). Address: Tokyo, Japan.

12281. Ehrenreich, Barbara. 2001. Libation as liberation? Going toe to toe with men is a feminist act; going drink for drink with them isn't. *Time.* April 1.
• ***Summary:*** "Second-wave feminists, meaning those who forged the movement in the 1970s, were, as third wavers never tire of pointing out, just a wee bit on the puritanical side–washing down their tofu with Celestial Seasonings and constantly harping on the danger of date rape."

12282. *SoyaScan Notes.* 2001. Safeway supermarket in California is now carrying many brands and flavors of refrigerated soymilk and rice beverage (Overview). April 2. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** Before March 2001 Safeway supermarket in Lafayette, California, had never carried refrigerated soymilk; they did carry 1-2 flavors of soymilk in aseptic cartons, always unrefrigerated and shelved in an unlikely place. Suddenly in March 2001, as part of a major expansion program, Safeway began carrying the following products in two refrigerated locations. (1) In the dairy case next to cow's milk, all in gable-top cartons: Westsoy Plus, vanilla, organic, $3.19/half gallon (equivalent to $1.60/quart). White Wave Silk (calcium enriched), chocolate, vanilla, or plain, organic, $1.89/quart, or $3.29/half gallon vanilla. Rice Dream (rice beverage), vanilla or original, organic, $3.59/half gallon (equivalent to $1.80/quart).

(2) In the Odwalla cooler at the opposite corner of the store near the produce section: Odwallamilk, original, organic in plastic bottles $1.69/15.2 oz, or $1.99/quart, or $3.49/half gallon (equivalent to $1.75/quart). Odwallamilk, chocolate, non-organic, $1.69/15.2 oz. Wildwood Soymilk, real vanilla or chocolate, organic, gable-top cartons, $1.99/quart.

By comparison: Lactaid is shelved next to soymilk in the refrigerated dairy case. Lactaid quarts are $1.99–the same price as Silk. Lactaid half gallons (fat free, low fat, or fat free) are each $3.59–$0.30 more expensive than Silk half gallons and $0.40 more expensive than Westsoy Plus.

12283. King, Paul E. 2001. Work with soyfoods. Founding *The Soy Daily* (Interview). *SoyaScan Notes.* April 24. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Paul was born in Hawaii of parents who are Theosophists and vegetarians. His father was a sculptor. Raised a vegetarian, he lived in Hawaii until age 10. Then went to law school but never passed the bar. He worked for 17 years as an administrator at Massachusetts General Hospital–the hospital for Harvard University–so it was very rigorous and professional work.

He is still largely a vegetarian, but now eats seafood. His wife, Gail, is a meat eater = omnivore.

Paul and has wife, Gail (married for about 4 years) are very excited about soy; they published a soy recipe book in Jan. 2000 (also available as an e-book that people can download from their website, or on CD-ROM). On 25 Aug. 2000 they started a website named The Soy Fan Club's Drive-in (www.thesoyfanclub.com). The same website is now also named www.thesoydailyclub.com.

On 13 Nov. 2000 they published the first issue of a bi-weekly e-zine (Web magazine that people pay to download) named *The Soy Daily;* back issues can be found at their website. Membership in the Club, which includes the e-zine, costs $21/year. Before long, *The Soy Daily* was sent out free of charge, and began to be published once a week.

The content of the original *Soy Daily* issues covered research into the soybean itself, and use of soy in a variety of ways including food and biodiesel. Some content about soy farming was always part of *The Soy Daily.*

On 22 Oct. 2000 they began to teaching classes at Northern Essex Community College–Timothy School in Methuen, Massachusetts. They taught two classes a week on Wednesday evenings from 7 to 9 p.m. in this non-credit, adult education, special interest course. They gave soy information, taught recipes for breakfast, lunch, and dinner, and had many soy products to taste. Their first class brought in 6 students. Their largest class was 10 students beginning on 25 March 2001. The class is presently held on 3 Wednesday nights each week.

Paul and Gail got a "scholarship" (free admission) to the Natural Products Expo at Anaheim in March 2001. There they first met many people in the natural foods industry, the most memorable and impressive of whom were: (1) Brenda Oswalt of Dixie USA; formerly an anthropologist, she worked on the "Lucy" dig in Africa. (2) Peter Murry of Iowa Soy in Vinton, Iowa–very friendly.

The second generation of SunSoy soymilk is much better than the first; it has been reformulated. Their four favorite soymilks are: Sunsoy Vanilla, Vendon Cappuccino, Pacific Strawberry, and (as a plain soymilk for cooking)

Vitasoy Creamy. Address: The Soy Fan Club's Drive-in, 42 Conrad St., Methuen, Massachusetts 01844-2712. Phone: 978-681-6606.

12284. Drosihn, Bernd. 2001. Miso manufacturers in Europe. Changes at Viana (Interview). *SoyaScan Notes*. April 30. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Hiroshi Kozaki and Karl Selgmann who once founded and ran a miso company named Kanta Kozaki have split up. Hiroshi left the company and tried to do some importing and run a wholesale company and Japanese restaurants. Karl still makes miso in a small way, but he never returns phone calls. His company named has changed to Noka Sojamanufaktur GmbH. Bernd tries to buy miso from Noka but they are an unreliable source. He also used to buy from Paul Chapman in England, but he stopped 6-12 months ago. Paul had business troubles, so now he is planning to go to Thailand and to make miso there. Danival in Andiran, France, is now a good source of miso. Bernd is not sure whether or not Sojvita in Austria still makes miso. They are a macrobiotic company. Günter Ebner, who knows a lot about the soy market in central Europe, would certainly know. Yakso has been sold numerous times. Bernd does not know the present owner, but he thinks they no longer makes miso or any other foods; they are now just a brand name.

Bernd is now moving his business to a new location, about 45 km away near Wiesbaum. The move will be completed early next week. The arrival of mad-cow disease in Germany has been a big help to Bernd's company, Viana. The increased demand forced him to construct a new building with greater capacity during the last two years. He is now making both tofu and meat alternatives in the new building. This weekend snack production will start. His fastest growing product line is meat alternatives, followed by tofu and smoked tofu. All over, the demand for tofu is much bigger than the supply–thanks to mad-cow disease. Bernd has doubled his tofu-making capacity and purchased new tofu-making equipment. Address: Founder and president, Viana Naturkost GmbH, Cologne, Germany. Phone: (02233) 41323 or 221-121175.

• ***Summary:*** Expresses concern that some Americans may be overdosing on soy. People are going way overboard since the FDA announced that soy reduces the risk of heart disease. Address: Staff writer.

12292. Terman, James. 2001. Update on White Wave's Silk soymilk (Interview). *SoyaScan Notes.* May 29. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Vanilla Silk was introduced in quart and half-gallon cartons in Jan. 1996; but the word "Vanilla" did not appear on the carton until "Plain" was introduced in July 1998. Chocolate Silk was introduced in quart cartons in April 1996 and half gallon cartons in April 1998. Plain Silk [dairylike, only two-thirds as sweet as vanilla] was introduced in quart cartons in July 1998 and half gallon cartons in April 1999.

Today, half-gallons are outselling quarts; quarts are more of an introductory size. Plain [dairylike] is now the best-selling flavor. White Wave has never sold just plain soymilk with nothing added; moreover, James is not aware of any other major soymilk company that offers such a product.

Silk is doing very well financially; it is quite profitable. White Wave is working to bring their margins up by bringing their costs down, now that they have their own soymilk extraction facility, which will pay for itself quickly. Silk just got into Walmart, which is a huge nationwide account.

General Mills is planning to introduce a soymilk named 8th Continent in July or August. It will be based on soy protein isolates from DuPont's Protein Technologies International and will be sold in quarts (32 oz) and 8 oz plastic (PET) bottles. James has heard that General Mills plans to spend a lot of money putting this new product in dairy cases nationwide.

White Wave plans to introduce Silk in an 11-ounce single-serve PET bottle (chocolate and vanilla) in July 2001.

James is very excited about the future of White Wave's baked tofu; it will be repackaged, it will be cubed to make it more convenient, and new flavors will be introduced. When America really starts to consume tofu, it will be as a baked, flavored, ready-to-eat product–that is very convenient. "We're only one Mad-Cow outbreak away from having tofu sales shoot for the stars." The sleeper is baked tofu; James thinks it could be as big as or bigger than Silk, in part because America consumes more meat than dairy products.

James has just read a very interesting book, *The Cultural Creatives,* by marketing expert Paul Ray. His premise is that these people are not connected or part of any network. Its 55 million people who all think they are unique individuals and mavericks, and don't think there is anyone else like them out there. Its a psychographic, not a demographic, profile. Financially they range from just below the very poor to just below the very wealthy. But they are not materialists and they do not subscribe to the consumer society or worldview. They are careful consumers. Address: Vice President–Marketing, White Wave Inc., 1990 North 57th Court, Boulder, Colorado 80301. Phone: 303-443-3470.

12293. FutureHarvest. 2001. Research gives birth to Nigerian soybean industry: Tofu becomes a hunger fighter and cash earner for women farmers and entrepreneurs (Web printout). *www.scienceinafrica. co.za /may /tofu.htm.* May. Printed 27 Aug. 2009.
• ***Summary:*** The article begins: "Ask any farmer in central Nigeria which local food crop is good for her children, puts cash in her pocket, and enriches the soil, and she'll probably say 'soybean.' Then ask her how she prepares it, and she'll likely say 'as tofu.'

In just over two decades, Nigeria–the continent's most populous country (est. 148 million in 2007)–has become Africa's largest producer of soybeans and soy products. In the year 2000 Nigeria harvested about 500,000 tons of soybeans, a 20-fold increase in just over 20 years. That crop, which was valued at US$85 million, "was used to produce a variety of traditional dishes, as well as processed foods such as soymilk and specially formulated foods to help malnourished infants and children."

"A near-perfect crop: 'Soybeans are a near-perfect crop for a country like Nigeria,' says Lukas Brader, director general of the International Institute of Tropical Agriculture, IITA, one of the 16 Future Harvest centers. 'Nutritionally, they carry twice the protein of meat or poultry and contain all eight essential amino acids needed for childhood development. Soybeans are also good for the environment,' Brader says. 'Because they evolved in Asia, they are far less vulnerable to local insects than African bean crops and require fewer insecticide sprays. They also fix atmospheric nitrogen, which reduces the need for farmers to purchase fertilizer.'

"Best of all, they are affordable. In Nigerian markets, soybeans cost about one-fifth as much as other forms of protein, including dairy and fish, and are easier to store and transport. "'Those are big advantages for a crop,' Brader says. 'But to get to that stage, our researchers had to produce an entirely new plant type that could cope with high disease

© Copyright Soyinfo Center 2013

pressure, compete with parasitic weeds, and grow in African soils.'

"'Basically, our plant breeders had to redesign the crop,' he says. IITA soybeans, he notes, are two to three times more productive under Nigerian conditions than U.S. and Asian varieties.

"Funding for the research, some US$20 million, was provided by the members of the Consultative Group on International Agricultural Research (CGIAR), building on seed money provided by Canada's International Development Research Centre (IDRC)."

"My Second Husband: 'Soybean has been a godsend for Nigeria,' says Professor Dele Fakorede, an agricultural expert based at Nigeria's Obafemi Awolowo University. 'Our farmers are earning good money, our small industries are prospering, and our children and young mothers are benefiting from a locally-made, protein-rich food.'

"Nigerian women would seem to agree. In Benue State, a major soybean producing area in the central part of the country, women farmers often describe the crop as their 'second husband' because it helps to pay school fees and medical bills.

"'Soybeans are making it possible for a lot of women to earn their own way and achieve a greater degree of independence than ever before,' says Fakorede.

"While the new plant types have made it possible to expand soybean farming across large parts of the country, most observers agree that what sparked production was the development of soy-based food products, including a West African version of tofu. It was a Japanese researcher, Osamu Nakayama, who got the idea to use tofu as a substitute for *wara,* a traditional but expensive kind of local cheese, says Brader. 'And, of course, there were skeptics.'

"'A lot of people had doubts that we would succeed or that tofu would ever be accepted by Nigerian consumers,' Nakayama says, 'but eventually we succeeded in making a good *wara* substitute using soymilk and local plant extracts.' Nakayama worked at IITA as part of a scientific exchange program sponsored by the Japan International Cooperation Agency (JICA).

"The idea, Nakayama says, came from watching what local village women did to prepare food for their families. 'We learned a lot through simple observation and by asking questions about traditional methods, he says.' Nakayama's 'wara-tofu' is similar in appearance to farmers' cheese or firm yogurt and has a taste and texture that's only slightly different than Asian-style tofu. Local cooks say that it is easily incorporated into traditional recipes and costs about a third as much as wara made from cow's milk.

"Today, the demand for tofu and other processed soy foods is growing at an annual rate of 20 percent, fueling a major cottage industry in rural Nigeria. A follow-up report by researchers at Nigeria's University of Ibadan points out that children who grow up in soybean-producing communities are generally healthier and suffer less malnutrition than the average Nigerian child. Improved nutrition, researchers believe, also helps to limit the spread of HIV/AIDS.

"In the places where soybeans are grown, roughly 40 percent of the income earned by women is thought to be derived from soybean production or processing. Thus far, nearly 100,000 Nigerians, three-fifths of them women, have been trained in soybean production and in the preparation of soy products by local NGOs, hospitals, and church groups working in cooperation with IITA and various government agencies.

"Currently, about 140 soy-based food products have been developed for use in Nigeria."

A color photo shows a Nigerian woman, in traditional dress, holding a plate filled with pieces of fried "wara-tofu."

12294. **Product Name:** Spinach Tofu Pastry Pockets.
Manufacturer's Name: Gindi Gourmet Foods, Inc.
Manufacturer's Address: 1845 Range St., Boulder, CO 80301. Phone: (303) 472-9177.
Date of Introduction: 2001. May.
Ingredients: Incl. tofu, spinach.
How Stored: Shelf stable.
New Product–Documentation: Spot in Vegetarian Journal. 2001. May/June. p. 24. "Tasty pastries."

12295. JICA (Japanese International Cooperation Agency). 2001. Tofu production in Nigeria. *Japan Close-Up.* May. *
• ***Summary:*** Describes how Osamu Nakayama (a Japanese) in Nigeria learned how to use the process for making *wara* (unripened Nigerian dairy cheese) to make tofu.

12296. May, Thomas Garvey. 2001. Chef to the stars: Akasha Richmond's entrees have been served at Hollywood's most exclusive events. And now they are available at frozen food sections at naturals stores everywhere. *New Product Review* (*Boulder, Colorado–A Penton Publication*) Spring. p. 1, 3, 20.
• ***Summary:*** Akasha has been called a chef to the stars who eat healthy. She met Michael Jackson in 1982, while working at the Golden Temple, a well-known restaurant. The two just clicked from the day they met. She describes the pop star as a "real person." When she traveled with Jackson, she was part of his inner circle. His personal jet would whisk them away right after the show and fly them to the next town. At the hotel, she'd find the kitchen and see what kind of work needed to be done. It wasn't easy making enchiladas in Czechoslovakia. She always took along plenty of aseptic packages of tofu, masa, and a tortilla press. She loved to cook in Asia, where she'd get up at 6 o'clock to be at the local produce market early. She learned from chefs everywhere she went and was very impressed with Chinese cooks who could create delicious medicinal food–when needed. Going on several tours and working as a private chef

© Copyright Soyinfo Center 2013

for Jackson opened a lot of doors for Akasha. She has catered dinners for Al Pacino, Penny Marshal, Michael J. Fox and Madonna. She has been the tour chef for Barbara Streisand and for Rick Springfield.

She is in the process of developing a line of premium frozen foods–"Chef Akasha's Entrees."

Akasha grew up in a "food-obsessed family" in Miami, Florida. She learned from both her grandmothers, and her mother grew sprouts in the kitchen and made her own bread. Akasha was working in a health food store by the time she was in high school. By age 17 she was baking cakes with honey instead of sugar.

She moved to California for better beaches, better health food stores, and an opportunity to study art in college. During college, she took a semester off to work at a vegetarian restaurant. Since then, her passion has changed from painting to food. She believes strongly that "healthy food should never have to taste bad."

A sidebar shows her four favorites: Food, meal to cook (vegetarian Thanksgiving dinner), great-tasting healthy recipe, and client (Captain Kangaroo). A large color photo shows Akasha. Address: Palo Alto, California.

12297. Shurtleff, William; Aoyagi, Akiko. 2001. The book of tofu. 2nd ed. Revised. Berkeley, California: Ten Speed Press. 336 p. May. Illust. by Akiko Aoyagi Shurtleff. Index. 28 cm. [321 ref]

• ***Summary:*** The spine has a new look, with dark brown letters on a beige background. At the base of the spine is the Ten Speed Press logo in orange.

This edition contains an updated "Appendix B–Directory of Tofu Makers" (p. 313-316, updated to 22 Feb. 2001). The copyright page and inside rear cover have also been updated; the SoyaScan database now contains 62,000 records. The preface has been expanded. Numerous other small changes have been made throughout the book. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 925-283-2991.

12298. Vitasoy USA, Inc. 2001. What does the #1 selling tofu do for an encore? (Ad). *Natural Foods Merchandiser.* May. p. 30.

• ***Summary:*** This 8½ by 11 inch color ad shows creamy dressing being spooned over a salad. Plus bottles of five flavors of Nasoya Vegi-Dressing and 3 types of Nayonaise. "Nasoya: We're putting tofu on America's tables." Address: One New England Way, Ayer, Massachusetts 01432. Phone: 1-800-4-Nasoya or www.viatsoy-usa.com.

12299. Kanai, Atsuko. 2001. Working with Fuji Seiyu to introduce new Japanese-style frozen tofu products to the USA (Interview). *SoyaScan Notes.* June 11. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Fuji Seiyu is a Japanese oil milling company that got interested in soy protein products in the 1970s. They have strong research on soy protein and on developing soy protein products, but they do not have strong marketing or distribution in the USA; that is Mutual Trading Company's forte. So Mutual began working with Fuji Seiyu to bring their ready-to-eat frozen tofu products to the USA, introducing them first to Japanese restaurants in Dec. 2000. Her concept was to sell "authentically Japanese" tofu products that were not easily replicated by American manufacturers. Fuji Seiyu has dozens of such products; Mutual is test marketing only a few. This is one of Mutual's priority food lines in 2001. Eventually Atsuko would like to get one or more of those items into large natural foods retailers.

Atsuko sends two leaflets which describe eleven products in this "Miyako Tofu Course Series." For each is given: A photo of the finished product, the item number, pack size, product name and description in English and in Japanese (*hiragana*), and price per case, pack, and serving. The following products are sold: (1) Fukkura Ogon Tofu: Golden fried tofu puff. (2) Veggie-Fish Tsutsumi: Tofu stuffed squares patty. (3) Gomoku Inari: Vegetable medley squares patty. (4) Yuba to Yasai no Cabbage Tsutsumi: Yuba and tofu stuffed cabbage. (5) Ajitsuke Inari: Inari sushi pocket. (6) Yawaraka Ganmo: Tofu vegetable patty. (7) Yuba Shumai: Yuba and tofu shumai. (8) Vegetable Kinchaku: Tofu vegetable pouch. (9) Koimo Kinchaku: Tofu taro pouch. (10) Shrimp Yubamaki: Tofu shrimp roll. (11) Vegetable Yubamaki: Tofu vegetable roll. Address: Mutual Trading Co., Inc., 431 Crocker St., Los Angeles, California 90013. Phone: (213) 626-9458.

12301. Kanai, Atsuko. 2001. How sushi came to California, and how edamamé came to be served there with the sushi (Interview). *SoyaScan Notes*. June 14. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Mutual Trading Company (MTC) was started in 1926 in Los Angeles (LA), as a co-op for Japanese immigrants who wanted to consolidate their purchases. It was located at 803 East 1st St., three blocks east of central Little Tokyo. During the 1950s, Noritoshi Kanai, Atsuko's father, exported to MTC from Japan. Then in 1964 he came to America and joined the company. Since that time MTC's forte has been the restaurant trade. Back in the 1960s, Mr. Kanai, thinking about how to best introduce Japanese foods to Caucasian Americans, realized that the retail channel was too difficult; it takes too long (25+ years), makes it hard to introduce authentic Japanese food without "Americanizing" it, and cooking authentic Japanese foods is too challenging for average Americans. It would be much easier and faster to introduce Japanese foods through the restaurant trade because then the Americans could taste the foods that had already been prepared and served, in the way they were intended to be, by Japanese chefs.

The story goes back to the 1960s and a man named Harry Wolff, Jr. Harry was a huge man ("He looked like Santa Claus."), Jewish, and a confectionery food broker. Mr. Kanai and Mr. Wolff met at a fancy food show. Mr. Wolff asked Mr. Kanai what he sold. The answer: Rice crackers, and thin honey & sesame biscuits. Mr. Wolff observed: "To be successful in the United States, you have to have a good doctor, a good lawyer, and a good Jewish friend. I am a Jewish broker and I know all the distribution channels, so I'll become your friend and team up with you." He helped Mr. Kanai to sell his high-quality honey & sesame "Harvest Cookies" imported from Japan. Together, they made a little fortune. Then competing American companies, such as Nabisco, got smart and started importing cheaper versions from Taiwan–which ruined Mutual's cookie sales.

So in 1966 Mr. Kanai and Harry Wolff decided to take a trip together to Japan to look for something else to sell. They stayed at a hotel in Tokyo and one day they went to a sushi bar across the street. Mr. Kanai explained that most Americans don't like the raw fish in sushi, but Mr. Wolff was intrigued by both the sushi and the rapport that he built with the sushi chef. In typical American restaurants, you never even see the chef. At the end of the week, as they were preparing to leave Tokyo, Mr. Kanai was surprised to receive a bill for 100,000 yen, which was a lot of money in those days. Mr. Wolff had returned to the sushi bar every day, fell in love with sushi (including the raw fish), and learned a lot about it. The 100,000 yen turned out to be an excellent investment for Mr. Kanai; it confirmed his belief that Americans could be taught to love sushi.

Returning to America, Mr. Kanai worked to expand the sushi restaurant trade, geared to both Japanese and Caucasian Americans. The first sushi bar in Southern California was Kawafuku restaurant, started in 1966 in Little Tokyo, Los Angeles. It was owned by Mr. Nakajima and the chefs were Mr. and Mrs. Shigeo Saito. They made a fortune of $30,000. Upon returning to Tokyo, they started a sushi restaurant in Ginza. Word of Kawafuku's success spread quickly in Japan, starting a flood of young Japanese sushi chefs to the USA.

Soon a second sushi bar opened on mid-Wilshire Boulevard, then a third in Santa Monica. Mr. Kanai worked on the sushi retail trade–which took longer to reach takeoff.

Why did sushi spread so quickly in the USA? From the consumers viewpoint, it's a novel cultural experience which is both interesting and fun–rapport with the chef. The food tastes great, is not easy to make at home, and is healthy. From the business viewpoint, it is profitable and requires special skills which are difficult for others to copy.

To make sushi, a restaurant needs three types of things: Hardware (special knives, graters, mats, etc.), food ingredients (nori, wasabi, shoyu), and a sushi master. Mr. Kanai began to imported these from Japan. Originally, only the special sushi rice was available in the USA; Kokuho Rice was developed in 1963 for Koda Farms by Dr. Williams of the University of California at Davis.

Company records show that on 30 July 1966 Mutual Trading imported its first edamamé (2 cases) from Japan as a test, for sale to Japanese restaurants. However there was

© Copyright Soyinfo Center 2013

no connection between the 1966 trip to Japan for sushi and the 1966 test import of edamamé. On 1 July 1970 edamamé first appeared in Mutual's restaurant catalog. In 1977 Mutual started to import edamamé from Taiwan, in addition to Japan.

The popularity of edamamé in the U.S. is directly related to the rise in popularity of Japanese food–especially sushi. Many Asian cultures eat soy products, but only the Japanese eat soy as a snack in the vegetable form–as edamamé.

In general, Americans regard sushi as a unique food genre, separate from Japanese food. Before the 1970s, Japanese restaurants in America were visited by Japanese-Americans who were familiar mostly with Kansai/Kyoto style sushi such as Inari-zushi, maki-zushi, and oshi-zushi. They were not familiar with the Edo/Tokyo sushi-bar style of raw-fish sushi. During the 1970s sushi bars in America grew as Japanese businesses in various fields set up offices in Southern California. The Japanese businessmen brought Americans into sushi bars and Japanese-Americans began to become familiar with raw fish.

America's sushi boom began in California in Sept. 1980, when the very popular TV miniseries and epic drama *Shogun,* based on the novel by James Clavell, sparked a great interest in traditional Japanese culture among Americans. With the sushi, they drank Japanese beer (especially Sapporo big bottle) and saké. In America, beer is usually served with peanuts. But, true to tradition, Japanese restaurants served edamamé, free of charge, with the beer. "It was a mass sampling of the edamamé without people having ordered it! So the success of sushi, Japanese beers, Japanese saké, and edamamé, are all tied in together."

In 1985 in the White House, sushi was served as hors d'oeuvres at an official presidential dinner; Ronald Regan was president.

On 27 May 1993 Mutual began to distribute its first edamamé grown in the United States–from Minnesota Edamamé. But there were two big problems with this Minnesota product: (1) the soybeans were the wrong kind, grown for oil extraction and feed, rather than the large-seeded vegetable types; and (2) the harvesting equipment damaged the pods, and some of the beans evens fell out. So the edamamé that Mutual received from Minnesota were not very good quality. After 3-4 shipments, MTC discontinued the product.

Another very important issue is the varieties; today Mutual carries only two edamamé varieties, imported from Taiwan and China. The beans are sweeter, bigger, prettier than most other varieties. Moreover, the flavor changes from one soil type to another, and from year to year.

Another issue is freshness. In Japan, edamamé have traditionally been harvested at their peak of flavor (the whole soybean plant is pulled up by the roots), and sold fresh, with the pods still on the branches/stems, and the plants bundled together, roots and all. Edamamé in Japan is always served in the pods because the pods (1) seal in flavor, otherwise lost during the boiling process, and (2) seal in nutrients, also lost in boiling. In fact, some high-class restaurants in Japan serve boiled edamamé, still on the branches–emphasizing their "very fresh" status. Today, during the summer season, most edamamé consumed in Japan are still sold fresh. But during the other three seasons, virtually all are imported frozen.

Commercialization of *fresh* (not frozen) edamamé is impossible in such a large country as the USA because edamamé has only a 3-day window during which it must be picked to be at the peak of flavor–according to MTC's edamamé purchasing manager. If picked before that time, the beans are too small; after that time they start to lose their tenderness and sweetness.

Of the three types of things needed to make sushi, the hardest to find was good sushi masters, so several years ago a Sushi Academy was started in Venice, California, near LA, by Mr. Toshi Sugiura, who owns Hama, a very successful sushi restaurant next door. The California Sushi Academy (phone: 310-581-5272) has courses for both professionals (6 months) and amateurs (weekends) and is very successful. Address: Mutual Trading Co., Inc., 431 Crocker St., Los Angeles, California 90013. Phone: (213) 626-9458.

12303. Tofu Shop Specialty Foods, Inc. 2001. Wholesale price list. Arcata, California. 1 p. June 15. Front and back. 28 cm.
• ***Summary:*** Contents: Fresh tofu, water-pac tubs (firm nigari, regular calcium [sulfate], soft calcium). Fresh bulk tofu–institutional (firm nigari, regular calcium). Baked tofu–retail or institutional (marinated cutlets, sausage patties, Mexi patties, vegie patties). Smoked tofu–Smoked Stiks (original, BBQ, spicy). Fresh soymilk (natural, chocolate, ginger, vanilla). Tofu salad and spreads (eggless egg, basic everyday spread, garlic 'n dill everyday spread, sweet pickled beet dip, hot habañero carrot dip, smoked tofu spread).

Accompanying this price list are the following new and colorful self-adhesive labels: Organic Tofu (Regular, Firm, or Soft). Soymilk (Vanilla or Chocolate). Tofu Shop: Fine tofu products. Crafted in small batches from whole, organic, GMO-free soybeans. Also the following numbered vegetarian "Favorite seasonal tofu recipes": 1. Wild mushroom and asparagus frittata. 2. Tofu egg foo young.

3. Tofu 'ricotta' salad. 4. Creamy miso vinaigrette (with tofu). 5. Hunan style tofu. 6. Tofu turkey with herbed bread stuffing. 7. Almond orange cake (one layer). 8. Tofu apple sausage. Address: 65 Frank Martin Court, Arcata, California 95521. Phone: 707-822-7401.

12304. Slater, Niger. 2001. Tofu at the top. *Observer* (*London*). June 17. p. F50.
• ***Summary:*** Nigel Slater does not like tofu, but he's willing to give it a try. "Tofu, dou fu, bean curd, call the stuff what you will, has never exactly been on my shopping list." Slater quotes from a new book titled *Sichuan Cookery,* by Fuchsia Dunlop, the BBC's East Asia specialist. Note: Chengdu is the capital of Sichuan province.

"In most Chengdu markets the standard white bean curd is available in several consistencies; there is also smoked bean curd in thin, firm slabs with a honey-brown surface, glossy chunks of firm bean curd which have been simmered in five-spice broth, large squares of 'bean curd skin' [probably yuba], sausage-shaped rolls of bean curd with an Edam-like texture, tender flower bean curd and ripe-smelling fermented bean curd in chilli sauce."

Slater notes that in Chinese grocery shops in England, one can generally find three kinds of tofu: Firm tofu, smoked tofu, and silken tofu (slithery, "with the texture of a gently quivering custard, and the non-flavour of spring water").

He gives two recipes from two different books: Fuchsia Dunlop's home-style bean curd (with "500g block of bean curd"), and Vatcharian Bhumichitr's tahu goreng (with "4 blocks soft bean curd, each about 5cm square"). The latter recipe comes from *Vatch's Southeast Asian Salads.*

• ***Summary:*** Tofu brochettes have been on the menu at Greens (Fort Mason, California) since it opened more than 20 years ago. Gives the recipe and secrets of success.

12306. *Bild am Sonntag* (*Germany*). 2001. Aufsteiger Soja: Jetz steckt die Bohne schon in Wurst, Schinken, Aufstrich und Desserts [Social climber soya: It is now found in sausages, ham, spreads and desserts]. June 24. p. 38. [3 ref. Ger]
• ***Summary:*** This is the Sunday edition of the German photo tabloid "Bild." A photo shows 15 different food products in which soy (usually soy protein isolates) are found. One sidebar is titled: "Tastes delicious and goes fast: Tofu burger with tomato relish." A second titled "Recipes and many tips" introduces the cookbook *Soja, Tofu & Co.,* by Ingrid Schlieske.

12307. *ADM Nutrition & Health Update* (*Decatur, Illinois*). 2001. Health effects of phytosterols. 3(1):1-4, 6. June. [35 ref]
• ***Summary:*** Plant sterols or phytosterols are to plants what cholesterol is to animals; they are both key components of plant cell membranes. More than 40 different phytosterols are known to science, but relatively few are found in significant amounts in foods (incl. sitosterol, campesterol, stigmasterol) and all have a chemical structure similar to that of the cholesterol. This structural similarity is probably the reason that plant sterols lower serum cholesterol in humans, with the added advantage of "demedicalizing" the reduction.

Phytosterols are found mainly in oilseeds, nuts, and vegetable oils. Soybeans and whole soyfoods are good sources of phytosterols; 1 cup of tofu has about 40 mg of phytosterols. Yet only a small percentage of that ingested is absorbed. Whereas 40-60% of dietary cholesterol is absorbed, less that 5% of dietary phytosterols is absorbed by most individuals.

12308. *Soyfoods Canada Newsletter.* 2001. Who is buying soyfoods in Canada? June. p. 3.
• ***Summary:*** In Sept. 2000 Flamaglo Food Consultants commissioned a study by Omnitel on the market for soy products. The study was basically a national telephone interview with 2,000 Canadians, randomly selected. The data was provided by Francis Lo.

Findings: Tofu was the most popular soy product; about 25% of the sample had tried it during the past 12 months. About 18% of the sample had tried soymilk and less than 7% had tried soy-based meatless patties or sausages. Only a small percentage had tried soy ice cream.

In general: About 40% of the sample had consumed one of the above four products in the last 12 months. Most current users live in metropolitan areas with a population over 500,000. The higher the person's income and/or the higher their income, the greater their use of soyfoods. Current users tend to be female.

12309. Drosihn, Bernd. 2001. Genetically engineered soybeans and soyfoods in Europe (Interview). *SoyaScan Notes.* July 23. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** In Europe, soybeans are still not familiar and not many are grown in Europe, so no European government would say to the population that they should eat more soy protein or make a health claim like that from the FDA in late 1999. Most of the soybeans now used to make foods in Europe come from South America or China; no more than 10-15% are grown in Europe. Imports from the USA and Canada have dropped dramatically because of the issue of genetically engineered (GE) soybeans.

For consumers, it has become a question of image; the image of North American soybeans is very bad in Europe. "Our customers ask us, 'What kind of soybeans do you use?' If we say that we use American or Canadian soybeans,

© Copyright Soyinfo Center 2013

then they will not trust our tofu." Even though Bernd makes his tofu from organic soybeans, he regularly tests all the soybeans he uses. He generally finds less than 1.01% are GE. Europe is definitely ahead of the USA in their awareness of GE issues.

Note: Since President George W. Bush took office, Europeans seem to be increasingly upset with U.S. unilateralism on a wide range of issues, from global warming to missile defense. They seem to be venting their frustration in the way they buy soybeans as well.

Talk with Jim Skiff, President of U.S. Soy, LLC. 2001. July 23. Jim has repeatedly observed exactly what Bernd described above. European consumers are upset with and distrust the USA; they reflect that in the way they buy soybeans. The U.S. government continues to try to force the Europeans to purchase our soybeans, which just makes matters worse. They don't understand the basic law of marketing–you have to give consumers what they want.

Christian Nagel no longer makes soyfoods; he now buys his tofu from Sojafarm (Lothar Stassen, Trechtingshausen, in central Germany). Tempeh is a very, very small product in Europe; not many companies currently make it.

In September Bernd plans to visit White Wave in Colorado. Address: Founder and president, Viana Naturkost GmbH, 54578 Wiesbaum / Vulkaneifel, Germany. Phone: +49 06593-99670.

12311. Stein, Joel. 2001. Millions of women weep. *Time.* Aug. 6.
• ***Summary:*** Joel Stein wanted to propose to his girlfriend over a casual dinner, so he "made her a big tofu dinner in our studio apartment." Then he woke her up.

12312. Gonzalez, Yvonne. 2001. The L.A. Tofu Festival in Aug. 2001 (Interview). *SoyaScan Notes.* Aug. 23. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** At this year's Los Angeles Tofu Festival, Yvonne was the only non-Asian on the Festival Planning Committee. At least 25,000 tickets were sold, which was an all-time record. At the Festival, she ran the cooking demonstration and she spoke on the stage about the benefits of tofu and the different ways that tofu can be served. Jane Valdez, the Anchor woman for news on Channel 9 TV in Los Angeles, is Mexican-American, bi-lingual, and a vegetarian. She encouraged viewers to attend this year's L.A. Tofu Festival in both English and Spanish. She later went on the Hispanic TV stations and again encouraged viewers to attend. She told people they could eat healthy hot dogs, tacos, burritos, even Chorizo burritos, everyone's favorite. This year more Hispanic food was served at the Festival. El Burrito, a restaurant served a very popular soy chorizo, called Soyrizo. Also, several tofu manufacturers and restaurants offered burritos, tacos, tostadas, quesadillas, and a salsa with tofu. People buy scrip tickets for $1.00 (which benefit Little Tokyo Service Center) then use them to pay for the foods. At the cooking demo, for one scrip ticket you get to taste the dish, to watch the chef, and to take home a copy of the recipe. Manufactures give free samples of tofu and tofu products. Tofutti is also given away free of charge.

Each year, more and more Hispanics and Spanish-speaking people come to the festival. Each year more and more bilingual Spanish-speaking volunteers sign up. For example, Mr. Olympic, who is from Chile, was a Master of Ceremonies one of the two stages at the Festival for the third year. He eats lots of tofu every day. Literature goes out in both languages saying that he is going to be at the Festival.

What was Yvonne's feeling about her participation in the Festival this year? "It's wonderful. Each year it gives me an opportunity to reach out to more people, and I also learn so much. I love the service to others. That's what it's all about."

Next month Yvonne will be going to Costa Rica where she will translate for a spiritual teacher and teach people on the Caribbean side of the country about tofu. Address: 6029 LaPrada St., Los Angeles, California 90042. Phone: 213-254-1712.

12313. Nordquist, Ted. 2001. Making tofu the hard way in Cheboksary, Russia (Interview). *SoyaScan Notes.* Aug. 28. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Ted has just returned from two weeks (Aug. 4-18) in Russia working as a volunteer consultant to Soya-Ch [pronounced SOYA-chee], a small tofu company in Cheboksary, which is a city of about 340,000 people situated on the Volga River about 650 km east of Moscow–a 14-hour train ride from Moscow. "They were great people and I had a wonderful time." He was sent there by ACDI/VOCA, a volunteer overseas organization that uses American tax dollars to send American consultants overseas to help businesses that apply to VOCA for help. VOCA stands for "Volunteers in Overseas Cooperative Assistance." Website: www.acdivoca.org.

The tofu company is: Soya-Ch Closed Joint Stock Company, 42800 Chuvashia Republic, Cheboksary, Kanashskoe shosse, 19, Russia. Phone: 8352/66-93-78 or 66-92-69. Director: Alexeeva Anna Alexandrovna.

© Copyright Soyinfo Center 2013

This tofu company was started in 1998 by Alexeeva, a woman who had previously been hospitalized with severe digestive problems. The doctors couldn't figure out what her problem was; she was near death. Fortunately, her closest friend had read about soy, so in the hospital she stopped consuming dairy products and started eating soyfoods. Her symptoms quickly disappeared, which proved that she was lactose intolerant. As soon as she got out of the hospital, she started a company making tofu. She is now director and she hired her husband, Alexeev Vaycheslav Konstantinovich, as deputy director, and the son of her closest friend as marketing director. They have 32 employees and make about 17 tonnes (metric tons) of tofu a year–which is not very much.

They have two Russian-made SoyaCow USM-150 semi-continuous systems. Each SoyaCow produces 150 liters/hour of soymilk, so the two lines produce about 300 liters/hour. The equipment is very poor quality (it does not use the airless cold grind process so the soymilk has a beany flavor) and the process by which they make tofu is extremely slow and inefficient because their instruction manuals are so poorly written. Each line makes only about 16 kg/hour of tofu. The equipment is made illegally in Russia with no supervision or license from ProSoya Inc., Raj Gupta's company in Canada.

Soya-Ch produces plain tofu and five types of flavored or seasoned tofu (with raisins, dried apricots, caraway, sea tangle or laminaria {*konbu,* a type of sea vegetable}, or salt). They call their tofu "soy cheese" and consumers buy it and use it like cheese. They typically slice it and serve it on bread; it is never pan-fried, deep-fried, sauteed, stir-fried, etc. It retails for about 30% less than dairy cheese–which is its most important selling point in Russia.

The company's total tofu production is about 15,000 kg/month; over 80% of this is plain tofu, which is sold in bulk to a dairy which uses the tofu as an extender for their low-fat dairy cheese. Of the remaining 20%: (1) About 30% is sold as plain tofu 125 gm packs; (2) About 50% is sold as flavored tofu (five flavors) in 125 gm packs; and (3) About 20% is sold as flavored soy cottage cheese dessert in 125 gm round cups.

To make the soy dessert: Place whole raisins or bits of pre-chopped dried apricots in the bottom of a curding vat. Run hot soymilk into the vat in three stages, adding one-third of the total nigari coagulant at each stage. The soymilk flowing into the vat stirs both the fruits and the nigari; no paddle is used for stirring. The fruit distributes itself evenly distributed throughout the curds–naturally! While the soymilk is finishing its coagulation, line a second perforated vat with a cloth pressing sack. Ladle the curd-fruit mixture into the pressing sack; whey will begin to drain out through the holes in the vat. When the sack (and vat) is full, lift the sack out of the barrel and hang it in a cold place over a drain or basin to catch the dripping whey. For best results, hang the sack in a walk-in cooler with a strong fan to hasten cooling and extend the shelf-life of the finished product. Package the fruit-sweetened curds in 125 mg cups. Serve cold as a ready-to-eat dessert. No added sweetener is needed. Ted found this latter product to be very innovative and interesting.

The company sells its tofu at all 42 supermarkets in Cheboksary, and they deliver it in their own refrigerated trucks. They do not make any soymilk for sale as such because of the expense of packaging; however they may sell a small amount in bulk. Financially, they are doing quite well.

It was very easy for Ted to show them how to make tofu correctly, and how to make many additional new products such as flavored tofu, soy yogurt, and soymilk. After Ted's visit, they plan to make soy yogurt using a 140 liter/hour yogurt plant from Israel. They expect to be able to make and sell soy yogurt for 25% less than dairy yogurt. Ted advised them to price the soy yogurt at the same price as dairy yogurt, but to periodically put it on sale at 20-25% off–a Western marketing trick! When they introduce the product, or introduce it to a new store or chain, have it on sale for one month. Then, 2-3 times per year, for one month at a time, have it on sale for 25% off; at those times, try to have demo in as many stores or chains as possible. When introducing new flavors, have the product on sale.

One big problem in Russia is the Sanitation Board. Each new product a company makes must get a permit from this department, but only after they have started to make the product. The product is then sent to Moscow where a bureaucrat must give it his stamp. "The one thing they seem to like most in Russia is stamps." Address: TAN Industries, Inc., 49 Stevenson St., Suite 1075, San Francisco, California 94105-2975; 660 Vischer Ct., Sonoma, CA 95476. Phone: 415-495-2870.

12315. Kimura, Takuji "Tak." 2001. Change in edamame sales trend. In: T. Lumpkin, ed. 2001. Second International Vegetable Soybean Conference. Pullman, Washington:

© Copyright Soyinfo Center 2013

Washington State University. 202 p. See p. 67-70.
• ***Summary:*** This is the outline of a speech that edamame pioneer "Tak" Kimura presented at the Second International Vegetable Soybean Conference. It begins with a brief history of his work to introduce edamame to the USA.

Contents. How and why I was forced to sell precooked edamame. Difficult start. One person made a big difference. Defining two types of processors (1. Buys fresh from domestic growers. 2. Buys frozen, uncooked from importers). Sales performance. Different forms of edamame (4 basic forms {in the pods–regular or organic; shelled–regular or organic}, 16 SKUs). Four different types of packaging. Choosing processors who import frozen edamame–the people that I represent. Advantages of edamame processor over restaurant or catering. Types of accounts to serve (7). Types of freezers and coolers (3). Which department to promote edamame to. Competitive situation. Future of edamame.

Twelve years ago, sushi was becoming popular on the West Coast of the USA. As a food broker, Tak gained a majority of the major accounts, such as Club type accounts, Cash 'n Carry, and wholesalers. They sold sushi in the cooler section. Tak was always afraid of what would happen if these food sellers started to make fresh sushi on their premises. But that is exactly what happened–so he lost the majority of his accounts.

He then began to search for a substitute product or products. He spent the next 4 months doing library research, where he found: Sales at natural and health food stores had been growing on average at 25% a year since 1989. Foods made from soybeans (especially tofu and soymilk) made a big contribution to these sales. Many of the larger companies in this industry were not nationally recognized. The new product that Tak was looking to introduce must meet seven criteria: 1. No identical product on the market. 2. No big companies can get involved. 3. No preservatives, additives, chemical additives, or artificial coloring. 4. No irradiation or ozone. 5. No big investment required. 6. Quick and easy to prepare at home. 7. Delicious, and good for one's health.

Precooked edamame (green vegetable soybeans in the pods) could meet all the criteria.

Sales performance: Sales of edamame from 1994 to 1999 were double that of the previous year (100% increase). This was due to additional distributors, to the introduction of imported products, and to sales in new regions. In 1999 there was a tremendous increase in sales after the FDA announced that soybeans can help prevent heart disease. Not only were there even more distributors, but sales per square foot at existing retailers jumped tremendously. In Oct. 2000 organic edamame from China arrived on the U.S. market; this also contributed to an up-swing in sales. In early 2001 shelled edamame (podless) arrived on the market, again causing sales to increase, but at the same time causing some market swings. Sales of edamame (in the pods) decreased, while sales of shelled edamame increased at existing retailers. This yo-yo phenomenon lasted for about 6 months until the market share stabilized at about 60% for edamame and 40% for shelled edamame–yet total sales were still increasing. With the 2001 crop, organic edamame (both in the pods and shelled) have come to market; this will cause another sales increase, yet they will compete with U.S. grown edamame. In short, there has been a tremendous increase in edamame sales and consumption since 1999–yet the same has been true for other soyfoods, and especially for soymilk. That will continue as new sizes and new products are introduced. Address: Kimura & Associates, Food Broker, Concord, California. Phone: 925 687 2422. Fax: 925 687 5279 e-mail: kimura@astound.net.

12316. Mai, Pham. 2001. Pleasures of the Vietnamese table: Recipes and reminiscences from Vietnam's best market kitchens, street cafés, and home cooks. New York, NY: HarperCollins Publishers. xii + 242 p. Aug. Illust. (Photos by Martin Jacobs, some color). Index. 24 cm.
• ***Summary:*** This is a marvelous, very original book, with real passion for food and cookery and a deep curiosity on this subject and desire to learn. It overflows with warmth, devotion, and kindness, and is full of insights about Vietnam, its food, and most of its best cooks–street food cooks. Here we see the origin of the modern restaurant and its chefs. Contains more than 100 authentic recipes and many black-and-white photos.

The Vietnamese eat fresh herbs like vegetables. The Hmong are one of Vietnam's ethnic groups.

The ancestors of today's Vietnamese migrated south from southern China in about 1500 BC. By the 2nd century BC they had annexed the country and introduced their system of government, Confucianism, and Buddhism. Over the centuries they introduced their food traditions–stir-frying, eating with chopsticks, steaming, and such ingredients as soy sauce, tofu, noodles, and ginger.

Vietnam is often divided into three culinary regions: the fertile south, the cooler central region, and the harsh, mountainous north–which suffered most from recent American war.

Important ingredients include: Bean sauce (tuong hot). Hoisin sauce (sot tuong). Soy sauce (nuoc tuong {liquid}; Brands–Pearl River Bridge, Kikkoman. Although not used as widely as fish sauce, soy sauce is a common seasoning in vegetarian and stir-fried dishes).

Soy related recipes: Vietnamese bean dipping sauce (tuong goi cuon, with ¼ cup fermented whole soybeans {tuong hot}, p. 28). Soy-lime dipping sauce (nuoc tuong pha, with 1/3 cup soy sauce, preferably light Chinese style sold under the brands Kim Lan, Bo De, or Pearl River Bridge, p. 29). Sweet soy sauce with chilies and ginger (nuoc tuong den ot, with 3 tablespoons sweet soy sauce, p. 30, 37). About soy sauces (light, dark, and sweet, p. 37. Kikkoman is considered

© Copyright Soyinfo Center 2013

light. There are two types of dark soy: One, also called "black soy," contains molasses and is thick. The other, called sweet soy sauce, is even thicker and sweeter).

Tofu, tomato and chive soup (canh dau hu he, with 6 ounces soft or medium tofu, p. 74). About fermented black beans [fermented black soybeans] (tau xi, an ancient Chinese seasoning, also called salted black beans, are sold in 1-pound plastic bags, paper cartons, or earthenware jars. The author prefers Yang Jiang Preserved Beans with Ginger by Pearl River Bridge).

Chapter 7 is "Return to the grandmotherland: Vegetarian favorites and meatless recipes." Of her beloved grandmother (now age 102) she writes: "When my grandfather died years ago at an early age, my grandmother was forced to raise seven kids by herself while running the family plantation. That twist of fate turned her into a vegetarian, in part because vegetarianism is a form of merit-making" (gaining merit, duoc phuoc). "In doing so, one's wishes would be granted. In my grandmother's case she prayed for the well-being of her children." "Many Vietnamese are vegetarians who practice vegetarianism on one level or another... With the shortage of animal protein and the pervasiveness of the Buddhist influence in the culture, it is not uncommon to find many Vietnamese dishes eaten in two ways–*man* (with meat) and *lat* (without meat). Indeed almost every meat dish in this book can be made vegetarian."

Vegetarian recipes (p. 185-99, with tofu unless stated): Salad rolls with jicama, peanuts and basil (bo bia chay, with 1 {6 ounce} piece tofu and 1 tablespoon soy sauce). Salad rolls with tofu and mushrooms. About tofu and *tau hu ky* [yuba or dried yuba sticks]. Cucumber and tofu salad (goi chay). Vegetarian pho noodle soup (pho chay). Vegetable curry (ca ri chay, with 2 pieces dried bean curd skin [yuba]). Spicy lemongrass tofu (dau hu xa ot). Rice noodles with stir-fried vegetables (bun chay). Vegetarian claypot rice with ginger (com tay cam chay). Black mushrooms with bean threads in claypot (nam kho). Water spinach with tofu (rau muong xao). Twice-cooked eggplant with garlic and basil (ca tim xao rau que).

Warm soymilk with pandanus leaf (sua dau nanh, with 1 pound dried soybeans made into fresh soymilk, p. 220-21). The headnote to this interesting recipe begins: "I grew up on soy milk, but never thought of making it fresh until I started going back to Vietnam. There, fresh soy milk is sold at markets and on street corners early in the morning and late at night. Sometimes I can walk into a market and just sniff my way to a soy milk vendor. I definitely have a nose for *sua dau nanh,* especially if its been flavored with pandanus leaf."

Glossary (p. 223-32) includes: Bean sauce (*tuong*). Fermented black beans (*tau xi*). Fermented soybeans (*tuong hot*). Hoisin sauce (*sot hoisin,* incl. soybean purée). Peanuts (*dau phong*). Tofu (*dau hu*).

About the author (with portrait photo on inside rear dust jacket): She was born in Vietnam and raised in both Vietnam and Thailand. She fled Vietnam "just days before Saigon fell to Communist rule on April 30, 1975. We left with the clothes on our backs, fighting our way through the pandemonium at the airport before climbing aboard a plane that would fly us to safety." Six years ago she ventured back to Vietnam for the first time–to be with her grandmother (and give her a modern wheelchair) and to eat *pho.* Her inaugural tour to Vietnam in 2000 was televised internationally by CNN, and was frequently rebroadcast on United and Delta airlines. She has returned about once a year since then, for the same reasons but also to learn about the food and cookery from the best cooks in the country–at market stalls, not fancy restaurants. She is now chef and owner of the acclaimed Lemongrass Restaurant in Sacramento, California. She also writes and teaches. Her first book, *The Best of Vietnamese and Thai Cooking* was published in 1996. Address: Chef and owner, Lemon Grass Restaurant, Sacramento, California.

12317. *Nutrition Business Journal* (*San Diego, California*). 2001. Regional distribution depth proves key to success for Wildwood Natural Foods: Organic Growth in San Francisco Bay Area sets up a next stage of national distribution in soy and tofu. 6(5/6):25-26. Industry Overview [Aug.].
• ***Summary:*** Wildwood, which reached $8 million in revenues last year, has continued to grow at 18-20% a year. The company (incorporated in 1980) become the third largest selling tofu through the natural foods channel in the USA. This is remarkable since Wildwood products are distributed only on the West Coast.

Wildwood presently operated 13 direct distribution routes that run 3 days a week throughout the Bay Area. All of the company's products are fresh, refrigerated, and ready to eat. Most are also organic. About 70% of Wildwood's sales are natural foods stores but the remaining 30% are to some mainstream markets in the Bay Area to which it also distributes, such as Andronico's, Molly Stone's, and 30 Safeway supermarkets. A sub-distributor, Rock Island Foods, distributes Wildwood products as far north as Medford, Oregon. Additional sub-distributors in Portland (Oregon), Seattle (Washington state), and Southern California, expand Wildwood's reach to include most of the West Coast.

Wildwood is now in the process of raising money to build a new and larger factory in the South Bay to expand production and enable the company to expand eastward–with the eventual goal of going nationwide.

Soymilk is the company's best-selling product, followed by plain tofu. Soymilk also shows the fastest growth.

12319. Shurtleff, William; Aoyagi, Akiko. 2001. The book of tempeh: A cultured soyfood. 2nd ed. Revised. Berkeley, California: Ten Speed Press. 176 p. Aug. Illust. by Akiko Aoyagi Shurtleff. Index. 28 cm. [374 ref]
• ***Summary:*** This revision has completely new front and rear covers, designed and illustrated by Akiko. It contains a completely new "Appendix B–Directory of Tempeh Makers" (p. 157-58, updated to 16 June 2001). The page "About the Authors" (autobiographical) has been updated, and the original photographs have been replaced with more recent ones–reflecting the fact that Bill and Akiko separated in Nov. 1993 and their marriage ended in May 1995.

The last page, "Soyfoods Center," has been updated.

On page 176 is "The Best of Vegetarian Cooking from Ten Speed Press" (descriptions of eight cookbooks, with price and ISBN).

The inside rear cover has been updated, and now includes current information about: (1) *Tempeh Production,* a book published by Soyfoods Center about how to start and run a company making tempeh on any of four scales and budgets in North America, and on either of two scales in tropical developing countries. (2) *Tempeh and Tempeh Products: Bibliography and Sourcebook,* published by Soyfoods Center. (3) SoyaScan, the unique computerized database produced by Soyfoods Center. This database now contains more than 62,000 records from 1100 B.C. to the present, and more than 76% of all records have a summary / abstract averaging 146 words in length. A description of the four different types of records (published documents, commercial soy products, original interviews and overviews, and unpublished archival documents), and the number of each type, is given.

The title page, copyright page, and table of contents have been redesigned and updated to give the book a much more contemporary look. Other small changes have been made throughout the book. Still contains 130 vegetarian recipes–both western and Indonesian.

Ten Speed Press gave this book a new ISBN: 1-58008-335-8. Yet despite the many changes described above, the authors preferred not to have this called a "new edition" or "revised edition." Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 925-283-2991.

12320. Shurtleff, William; Aoyagi, Akiko. 2001. The book of miso: Savory, high-protein seasoning. 2nd ed. Revised. Berkeley, California: Ten Speed Press. 278 p. Illust. by Akiko Aoyagi Shurtleff. Index. Aug. 28 cm. [223 ref]
• ***Summary:*** This revision has completely new front and rear covers, designed and illustrated by Akiko. It contains a completely new "Appendix D–Miso Manufacturers in the West" (p. 255, updated to 10 May 2001). The page "About the Authors" (autobiographical) has been updated, and the original photographs have been replaced with more recent ones–reflecting the fact that Bill and Akiko separated in Nov. 1993 and their marriage ended in May 1995.

• ***Summary:*** This front-page story contains a long interview with Dana Jacobi, author of *Amazing Soy,* plus a large color photo showing ten different types of soyfoods. The writer has discovered that "there's a whole lot more to soy than plain tofu." A sidebar titled "Name that food" is a glossary including: Edamame, silken tofu, miso, tempeh, fermented bean curd, fried tofu balls, yakidofu, yuba, soynuts, soy sauce, soy milk. Contains four recipes from Jacobi's book. Address: Staff writer.

12324. Lacina, Tom. 2001. Wildwood Harvest Foods, Inc. (News release). Grinnell, Iowa. 1 p. Sept. 20.
• ***Summary:*** "Midwest Harvest Corporation has changed its name to Wildwood Harvest Foods, Inc. as a result of the merger of Wildwood Natural Foods into Midwest Harvest. The resulting corporation remains an Iowa corporation.

"The officers of the corporation are Jeremiah Ridenour–CEO, Tom Lacina–President, Billy Bramblett–Treasurer, and Bill Olson–Secretary.

"Besides Billy Bramblett, Tom Lacina and Jeremiah Ridenour, board members include Dr. Sam Lacina (past Grinnellian and pediatric cardiologist in Grand Rapids, Michigan), Ned Skinner (President of Skinner Agri Products and past CEO of Tone Spices), Van Tunstall (President of The Central Coast Groups and past CEO of a division of McCormick Spices) and Rachel Windsor (Principal of Cybus Capital).

"The Grinnell facility will be built by Septagon.

"Bill Olson will serve as the corporate Secretary and will also maintain a full time practice of law at the Brierly-Charnetski Law Office in Grinnell.

"Francene Coons and Alesia Lacina will sharpen their focus on their educational work as the Soy Sisters. Dave Coons will focus on plant management and new products in the new Grinnell facility.

"Tom states, 'This alliance is a tremendous opportunity for Midwest Harvest as a company. Wildwood brings with it a host of products and a deep understanding of the soyfood industry developed over the past 20 years. Of course, this is also an important step toward developing a strong soyfood industry in the Grinnell area.'

"Get more information at www.MidwestHarvest.com and www.WildwoodNaturalFoods.com." Address: Grinnell, Iowa.

12325. Cybus Capital Markets, LLC. 2001. tecTERRA Fund and Iowa Farm Bureau invest in soy foods venture (News release). Des Moines, Iowa. 3 p. Sept. 21.
• ***Summary:*** "Iowa Agricultural Finance Corporation (IAFC) announces the investment of $3.3 million by its tecTERRA Food Capital Fund in Wildwood Harvest, Inc., a soy foods company created on August 24, 2001 by the merger of Wildwood Natural Foods (Fairfax and Santa Cruz, California) and Midwest Harvest, Inc. (Grinnell, Iowa). Iowa Farm Bureau Federation will make a concurrent investment of $700,000 in Wildwood Harvest.

"According to Cybus Capital, the investment manager for the tecTERRA Fund, proceeds of this investment will be used to build and equip a new 20,000 sq. ft. soy food manufacturing facility in Watsonville, California, into which all California operation will be consolidated. The new enterprise combines the operation of a leading West Coast brand of organic tofu and other soy foods with Midwest organic soybean supplies and a fast growing Midwest tofu line, under the Midwest Harvest brand name. The new company plans to add a complete array of dairy analogs to its product line and is dedicating the Grinnell production to those new line additions.

"This transition marks the tecTERRA Fund's first investment in rapidly growing functional foods sector–the soy foods market. Industry analysts suggest that annual soy food sales will exceed $6 billion by 2005. Wildwood Harvest expects to more than triple its annual soybean usage from the present 30,000 bushels. After completion of the initial expansion plans, the company will employ about 75 people in the California division and 25 people in the Iowa division.

"'We have created a business that will link the growers of highly valued, organic soybeans directly to an exciting retail market,' said Jeremiah Ridenour, CEO of Wildwood Harvest. Ridenour, who along with Billy Bramblett was instrumental in the formation and growth of Wildwood Natural Foods in Santa Cruz and Fairfax, California, and Tom Lacina, the founder of Midwest Harvest, an Iowa farmer and President of Wildwood Harvest, decided to pool their companies' interests and merge in order to take advantage of the strengths of each firm in capturing a share of the national market for organic soy-based foods.

"'We already have access to high quality genetics, the best soil and climate for soy cultivation, central location and the space to expand our food production here in Iowa. It just made sense to work together to reach a larger market,'

© Copyright Soyinfo Center 2013

commented Lacina.

"Ridenour, Bramblett and Lacina noted an immediate match between the companies through their shared mission to nourish human health and well being through the promotion of dietary and agricultural change. The merged company will continue the use of the Wildwood Natural and Midwest Harvest trademarks.

"Duane Acker, Chairman of the IAFC, noted that this first soy foods investment by the tecTERRA Fund demonstrates Iowa's leading position in the changing face of American agriculture. 'Iowa's annual soy harvest is second to none in quality and volume. This new venture draws attention to Iowa's commitment of remaining a leading agricultural state and creating the opportunities for Iowa farmers to participate in fast growing markets.'

"The IAFC is a farmer-owned investor in Iowa-based, value added agricultural business, especially ventures involving agricultural producers in ownership or other benefits of growth. IAFC was started with a $25 million load from the state of Iowa and created the tecTERRA Food Capital Fund to invest in value-added processing and biotechnology business.

"The tecTERRA Food Capital Fund is a unique blend of public and private capital providing growth capital for value-added agricultural processors and biotechnology. Its current portfolio consists of Rudi's Bakery (Boulder, Colorado), now operating the first commercial, organic bakery in North Liberty, Iowa; Sioux-Preme Packing Co. (Sioux Center, Iowa), a specialty pork processor and Stauffer Seeds (Omaha, Nebraska), a leading developer of transgenic corn hybrids for recombinant protein production with plans to build a parent seed facility in Iowa, tecTERRA is dedicated to investing a high-growth, consumer driven, food processing and biotechnology businesses for the benefit of both agriucultral producers and equity stakeholders.

"The Iowa Farm Bureau Federation in an Iowa non-profit corporation organized on March 15, 1921. It is a limited partner of tecTERRA and has a strong history of providing capital to support Iowa-based agricultural companies. The Iowa Farm Bureau is associated with the American Farm Bureau Federation. The primary goal of the American Farm Bureau Federation is to improve net farm income and the quality of life of farmers, ranchers, and other rural residents through education and representation with respect to public policy issues.

"Cybus Capital, a leading Midwest merchant-banking firm with a focus on the food chain, value-added agriculture and allied industries, is the general manager of the tecTERRA Food Capital Fund. Headquartered in Des Moines, Cybus maintains offices in Denver, Colorado, Sacramento, California, and Portland, Oregon."

For more information, contact William A. Summers.

Address: Des Moines, Iowa.

12326. Jacobi, Dana. 2001. The new Soyfoods Council (Interview). *SoyaScan Notes.* Sept. 22. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Dana will know more about this new organization after next week, when she attends the Soyfoods Council's one-day seminar at Kendall College in Evanston, Illinois, near Chicago. The seminar is intended to attract chefs, foodservice personnel, and some registered dietitians. The emphasis will be on sensory education of different soyfoods for professionals. Dana's impression is that the United Soybean Board has woken up and realized that they don't really understand how to pitch soyfoods to the press/public. So they hired Linda Funk, a smart woman who was head of public relations (PR) for the Wisconsin Milk Marketing Board, which is one of the best of the commodity boards. She is now installed as executive director working out of the offices of the Iowa Soybean Promotion Board in Urbandale, near Des Moines, Iowa. She has been working since last January to create an organization from the ground up, that would be like the California potato board or the pork council, etc. They will have a mission, and programs. But they do not have a real budget. The Iowa Board pays Linda's salary but does not fund her programs; so she has to do the fund-raising one program at a time.

In December Linda plans to do a program at the Culinary Institute of America (CIA) in St. Helena, California, about soy targeting chefs.

At Kendall College, Toni Sakaguchi, an Asian-American woman from the CIA in St. Helena, gave an excellent

© Copyright Soyinfo Center 2013

demonstration and used tofu in several recipes. Address: New York City.

12327. Bramblett, Billy. 2001. Wildwood Natural Foods and Midwest Harvest merge to form Wildwood Harvest Foods, Inc. (Interview). *SoyaScan Notes.* Sept. 24. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** On 24 Aug. 2001 Wildwood merged with Midwest Harvest, a small tofu company in Iowa. The new company is named Wildwood Harvest Foods, Inc. but they don't plan to "pump up that new name very much." They are an Iowa corporation, and as a result they got some investment from the state of Iowa, from a fund that is managed by the tecTERRA fund. Iowa is the biggest soybean producing state in America, and also the biggest commodity state. That's a problem, because they are on "the low end of the food chain" as it were. So the mandate of this fund is to help Iowa companies turn Iowa commodities into value-added products. Cybus Capital Markets manages the tecTERRA fund. Thus Wildwood was able to obtain Iowa public money because they agreed to make this an Iowa corporation, located in Iowa, and because Tom Lacina is an Iowa farmer, and because the company was doing at least $5 million in sales–which is why Midwest Harvest needed Wildwood.

Farm Bureaus now do a lot of investing, with the goal of giving their member farmers shares of companies that use the state's farm crops. "We're really trying to live our mission statement." Tom Lacina, who runs Midwest Harvest, is very sharp, and he has a very sharp brother, Dr. Sam Lacina, who is a pediatric cardiologist in Grand Rapids, Michigan. Billy will send a news release by an investment firm that also came into the deal. Paul Orbuch and Frank Rosenmayr are no longer with the company; their shares were purchased for cash by Tom Lacina and his brother, Sam, so that there are now still four shareholders, each owning 25% of the company.

The new company will retain both the existing brand names (Wildwood Natural Foods and Midwest Harvest–they are still "brand building") and the existing products. Tom Lacina built his tofu factory on his organic soybean farm. The new company plans to build another tofu-making facility on 10 acres they bought at the Grinnell Industrial Park, located south of Grinnell, Iowa–about 3-4 miles from the Lacina farm. Zoning and other issues prevented the larger tofu plant from being built on the Lacina farm.

Last week from California (Billy, Jeremiah, and their wives) went to Iowa for the initial board meeting. The wives went because "this is really a family deal." The new board of directors consists of several investment people, the four principals/owners (Jeremiah Ridenour, Billy Bramblett, Tom Lacina, Dr. Sam Lacina), Van Tunstall (former CEO of McCormick Shilling, who is also on the board of Monterey Pasta and Organic Food Products), plus several other people whose names appear in a second new release. Van Tunstall, who has his own consulting firm, has been helping Wildwood with its strategic planning for the past three years. "He's been around the block many times, and he's a great guy."

There was also a ground breaking in Grinnell, Iowa, last week. The mayor of Grinnell and 65 people showed up. They had stainless steel shovels and construction hats that said "Wildwood Harvest" across the front.

Wildwood has already purchased a building in Watsonville, California. It was originally Ken Miller's Meats, then it was Alfaro's Bakery for many years.

Presently both firms are maintaining their own separate websites, but by the end of this year they will probably have a Wildwood Harvest website, which will link the two separate websites.

Tom Lacina's wife, one of the Soy Sisters, will be part of the company's marketing strategy; they have their own website.

This is how the two groups met: Tom e-mailed Billy about 18 months ago and said that he had seen Wildwood's website and heard about the company. He asked for some advice, since he was just an Iowa farmer who had built a tofu factory on his farm. Wildwood has often wished that it had built its tofu factory on the farm that produced its organic soybeans to eliminate freight bills. Billy e-mailed him back: "You're a genius for doing that; we should have done that a long time ago." Tom responded: "My wife, Alesia, probably wouldn't agree with the 'genius' part." Billy answered: "Hey, my wife's also named Alicia–but spelled differently." Tom answered: "My wife is really a graphic artist." Billy answered: "So is my wife." Tom responded: "I'm really a musician." Billy e-mailed back: "Wait a minute here, I'm really a musician too."

Billy continues: "We knew we had something going at that point, so we traded cookbooks, and aprons. He and his brother-in-law, and her wife (Francene Coons, the other Soy Sister) live on the farm in the other house. All four work on their 320-acre farm and in the tofu factory together. They are all incredibly wonderful people. Tom is an 'A-Type' who can do a thousand things and keep it all going. I have many interests but I've got to take a rest every once in a while. Tom is also a practicing attorney, formally trained in music, plays in church every week. Tom's brother, the cardiologist, had a heart attack at age 40, so now he is an expert on heart health and heart nutrition, and a great admirer of Dr. Dean Ornish. We all had a great time together."

They have been working on the merger since May of this year. The new plant in Iowa should be in operation by early 2001, at which time Wildwood's line of products will start being made and distributed from the Midwest. The distributor will be Blooming Prairie, which is Midwest Harvest's distributor to nine Midwestern states. Wildwood is also looking at wider distribution on the West Coast. They

© Copyright Soyinfo Center 2013

have a new sales and marketing person named Pat Deveau; she has been with Nature's Best for the past 8-10 years, is very well connected, and is working on building Wildwood's distribution and broker network.

White Wave will soon become Wildwood's competitor. Billy has known Steve Demos for years. Steve's girlfriend, Cheryl, used to work for Wildwood years ago, before she went to Mountain People's Warehouse.

Wildwood has its soymilk base made in two places: SunRich Northern and Soyfoods of America. Wildwood used to have its soymilk base formulated and packaged at the Morningstar plant (formerly Avocet) in Gustine. Morningstar kicked out Wildwood (for reasons that are not clear) so Wildwood found another co-packer–Heritage Foods, in Santa Ana. Address: Wildwood Natural Foods, 135 Bolinas Rd., Fairfax California 94930. Phone: 415-485-3940 X-47.

12328. NewsEdge Corporation. 2001. Soyfoods companies merge in venture by Iowa Farm Bureau and tecTERRA (News release). Des Moines, Iowa. 3 p. Sept. 24.
• ***Summary:*** Wildwood Natural Foods (Fairfax and Santa Cruz, California) and Midwest Harvest (Grinnell, Iowa) merged on 24 Aug. 2001 to form Wildwood Harvest, Inc. Address: Des Moines, Iowa.

12329. **Product Name:** [Tofu with Vegetables, Tofu Spread with Garlic, Tofu Spread with Sweet Dry Red Peppers].
Foreign Name: Tofu s Povrcem, Tofu Namaz Cesnjak, Tofu Namaz Paprika.
Manufacturer's Name: Annapurna.
Manufacturer's Address: Poljanicki, Prilaz 12, 10000 Zagreb, Croatia.
Date of Introduction: 2001. September.
Wt/Vol., Packaging, Price: Vacuum packed in plastic bags.
How Stored: Refrigerated.
New Product–Documentation: Letter (fax) from Vlatka Kuzmic. 2002. Jan. 12. They started to sell these three tofu products in Sept. 2001. Labels sent by Vlatka. 2002. March.

12330. Carter, Rachel; Kistner, Stephanie. eds. 2001. The soy alternative. Vancouver, BC, Canada: Whitecap Books Ltd. 240 p. Illust. (color). Index. 26 cm.
• ***Summary:*** This is an attractive book, with a full-color photo on almost every other page. However it is edited by a team of people who apparently don't know much about the subject, since it contains many factual errors. It has no real author and many publishers, the main one being Murdoch Books, a division of Murdoch Magazines Pty. Ltd. (Sydney, Australia).

Contents: The soy story. Glossary of ingredients. Soy for breakfast. Breakfast in a glass. Soy for lunch. Soy for Sunday lunch. Soy for vegetarians. Note: The rest of the book is not vegetarian, containing recipes for beef, lamb, chicken, pork, etc. Soy for dinner. Soy for parties. Soy for dessert. Soy at teatime. Cookery terms. Address: 351 Lynn Ave., North Vancouver, BC, Canada V7J 2C4.

12331. **Product Name:** Mori-Nu Creamy Soup Made with Organic Soy [Garden Pea, Corn, Tomato, Butternut Squash]. Renamed Creamy Soy Soup by Oct. 2002.

© Copyright Soyinfo Center 2013

Manufacturer's Name: Morinaga Nutritional Foods, Inc.
Manufacturer's Address: 2050 W. 190th St. #110, Torrance, CA 90504. Phone: 1-800-669-8638.
Date of Introduction: 2001. September.
Ingredients: Garden Pea: Silken tofu puree (water, whole organic soybeans*, magnesium chloride, calcium chloride), pea puree, celery juice, raw washed sugar, onion powder, salt, carrot puree, corn starch, carrageenan (thickener), garlic powder, sodium citrate, natural flavor, spice.
Wt/Vol., Packaging, Price: 32 fl oz (1 qt) Tetra Brik Aseptic Liter Square carton with reclosable cap and foil pull tab.
How Stored: Refrigerate after opening.
New Product–Documentation: Ad (full-page, color; see next page) in Natural Foods Merchandiser. 2001. "New rich, creamy soups from Mori-Nu. Made with organic soy." Aug. p. 26. "Dairy free. All natural. Available soon." A photo shows the front panel of the four packages. Products (all 4) with Labels and leaflet (color) sent by Morinaga. 2001. Aug. Leaflet: The front is the same as the ad. The back contains Nutrition Facts, ingredients, and bar codes. 4 gm of protein per serving.

Products (4 flavors) with Labels sent by Morinaga. 2001. Aug. Talk with Art Mio of Morinaga. 2001. Aug. 14. This product will first be available in stores in Sept. 2001. The most popular flavor is butternut, and the least popular is pea. The recommended retail price is $3.79/liter, which is higher than that of a similar product made by Imagine Foods. Trader Joe's says that they are cutting back on Imagine Foods' soups because they are not selling well.

Leaflet (glossy color, single sided). "Get rich. Quick. (With Mori-Nu creamy soups made with organic soy)." A photo shows the four flavors and two sizes–1 quart (32 oz) and single-serving 11 oz.

Ad (full-page, color) in Natural Foods Merchandiser. 2002. p. 13. "Super soups." They now come in four flavors: Butternut Squash, Corn, Tomato, and Garden Pea. "4 grams of soy protein per serving. 2 sizes–1 quart and 11 oz single serving. All natural. Non-GMO ingredients. Call 1-800-Now Tofu."

12332. Funk, Linda. 2001. The Soyfoods Council (Interview). *SoyaScan Notes.* Oct. 9. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The Soyfoods Council was created by the Iowa Soybean Association. Linda began work on 24 Sept. 2000 and she is managing the "edible budget" of the Iowa Soybean Promotion Board (the one with checkoff funds). The "edible budget" comes under the Marketing Committee. She reported to them every time they meet.

Her first soy event was when the Wisconsin Soybean Association asked her to do a foodservice training event, in June or July of this year. She had Toni Sakaguchi come out from Culinary Institute of America (CIA) in St. Helena, California; they have refined the presentation since then. People absolutely love Toni; she is warm, she knows the products and the principles of cooking, and she is a real professional. She is credible and chefs really like learning from her. She had some wonderful beef dishes and fish dishes. She can answer all their questions. "She's been fabulous."

Linda has finished her mission statement, objectives, etc. and is about ready to send out membership letters. When she has members, mostly soy processors and soyfoods manufacturers, then she will figure out how to structure the new organization.

She gets some funding from the Iowa Board and some from the Iowa Economic Development Group–which is interested in adding value to Iowa commodities. Linda has worked with Midwest Harvest (Tom Lacina and the Soy Sisters). One of her missions is to find ways to introduce soyfoods to mainstream America. She hopes to use specific, fun ways, that don't make the foods weird or strange or scary. "Plunking a pound of tofu in front of a soybean farmer won't get you anywhere. We have to find ways to introduce soyfoods by combing them with foods that people know and love. It doesn't have to be vegetarian. It can be a 'combo,' such as tofu and cream cheese; it doesn't have to be 'all or nothing.' For the farmers who are the Iowa Board, I've started making desserts. They have to be believers before they will approve and fund new projects. We've done some very interesting, fun stuff and people are starting to go 'Wow. This can taste good.'" But a few farmers on the board have told her that what she's doing is all fine and cute, but "Don't you dare take the meat off the center of the plate!"

Linda plans to do a seminar at the CIA in St. Helena on December 3-5. Thirty hand-picked chefs from across the USA will attend, and the Soyfoods Institute will pay all their expenses. United Soybean Board will fund that program. Linda has to raise the funds for each event; she had never been a fund-raiser before she accepted this job.

Linda has a two-pronged approach: (1) Mainstream consumers–Figuring out how to help them start introducing soy into their diets. (2) The foodservice channel–including restaurants, onsite (such as corporate dining rooms). She will start by working with the "fine dining chefs," the ones that people look up to for trends and ideas. Then have it be a trickle-down effect. She believes that getting the foodservice industry involved with help in introducing soyfoods to mainstream Americans.

The most recent seminar was at Kendall College in Evanston, Illinois, near Chicago. Toni Sakaguchi of the CIA did a great job. She demonstrated fun ways to start adding soy flour to recipes chefs were already using–to batters and breads, for example. Toni also used tofu in various recipes. The CIA has developed what they call their "flavor principle package" which enables you to apply flavor principles to whatever recipes you are developing.

Get Rich. Quick.

(With Mori-Nu Creamy Soups made with organic soy.)

Good fortune has smiled on you today. So rich. So creamy. So delicious. NEW Mori-Nu Creamy Soups made from organic soybeans. These rich, creamy soups are a blend of the freshest vegetables and exclusive Mori-Nu silken tofu puree. Dairy free. All natural. Non-GMO. Available in 4 delicious flavors and two sizes: 1 quart and single serving 11 oz. size. Just heat and serve for 4 to 6 grams of soy protein per serving. You can choose from Tomato, Corn, Garden Pea, and Butternut Squash in our long-life package. And like our tofu, Mori-Nu Creamy Soups are made without preservatives or irradiation for the great "made from scratch" taste your customers will enjoy again and again. Call your distributor or Mori-Nu at 800-669-8638 for details. After all, you can never be too rich.

MORI-NU

© Copyright Soyinfo Center 2013

Linda is well aware of edamamé; she talked about it this morning on a radio show. She believes in serving edamamé in the Midwest mixed with familiar foods. She served edamamé in the pods to a farmer's group and "they were fascinated by it and thought it was quite delicious." But they are not going to use it as a new type of snack.

Linda grew up on a farm in Wisconsin. Her dad is a farmer. She understands the mentality of farmers. She worked on Wisconsin Cheese for many years. She started with the Wisconsin Milk Marketing Board in 1988 and headed up the foodservice area. One of her main projects was to get American chefs and mainstream Americans to believe that Wisconsin cheese-makers could make specialty cheese that were as good as their imported counterparts.

One discussion with chefs is "Do you scream it on your menu or do you soft-sell it?" Linda strongly favors the soft-sell approach–until people are really comfortable with it. Many people she talks to, from consumers to food professionals, still turn up their nose at soy. If you start probing as to why they think this way, many of them go back to soy in a school lunch program or with hippies.

Linda has been writing a column for the *Iowa Soybean Review,* a publication of the Iowa Soybean Association. She includes recipes, and advises cooks not to tell their family what they are doing until they say "Wow, was this good!" Then you can tell them.

Linda eats Harmony cereal each morning, and finds that many others also like it. Her favorite recipes: (1) Molasses glazed pork tenderloin, with edamame. (2) A combo tofu cheesecake or dessert, with about half cream cheese; it is lower in calories, saturated fat, and cholesterol plus other soy health benefits. (3) Pizza with edamame in the topping; she is working with a commercial frozen pizza company on this. (4) A seven-layer bar with TVP layered and baked (like a granola bar, developed by the Soy Sisters).

Linda has to dispel those preconceptions. Anderson-Erickson in Des Moines came out with the first dairy yogurt that contains soy protein; it's wonderful! The woman who is president of this family-owned business, Merriam Erickson-Brown, is very forward thinking. Linda has done a lot of press on her. The product has been very successful. *Cooking Light* magazine (Birmingham, Alabama) has published many excellent articles and recipes on soy–especially tofu. Jill Melton, their senior food editor, is Linda's friend, and they talk a lot about introducing people to soy. They had a chocolate mousse on the cover of a recent issue. One issue is taking soy out of the "Asian only" category and introducing it into French or Mexican recipes–without making it appear weird or contrived.

A year ago Linda never ate soy; she came from the dairy industry and it was the arch-enemy. She now tells the dairy industry that these two industries can and should work together.

Marv Wilson, who is a fine actor, does an impersonation of Henry Ford, focusing on Ford's work with soybeans. He does this for soybeans farmers, and anyone who asks him. "It's fascinating." Address: Des Moines, Iowa.

12333. Krizstan, Jan. 2001. Update on work with tofu and soybeans in Slovenia (Interview). *SoyaScan Notes.* Oct. 11. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Jan and Mirko live about 100 km apart in Slovenia. Jan presently earns his living in desktop publishing, working with computers. Mirko lives with his wife, Jan's sister, on a farm, where he makes the best tofu in Slovenia; he has about 75% of the Slovenian tofu market. All his tofu is still made with nigari, which he buys from Natur Garten, located just across the border in Gamlitz, Austria.

Jan plans to move to Croatia (where his girlfriend lives) and start a new company there making tofu and tempeh. There are already several tofu makers in Croatia but Jan thinks the quality of their tofu is not very good; they grind their soybeans with blenders, which is very slow and inefficient.

It is now illegal to import kombu into Slovenia because of the high arsenic levels it contains. Jan believes there are two types of arsenic–good and bad. He thinks kombu has the good type. Kombu is an important ingredient in making seitan. Address: Mestni trg 22/1, 68330 Metlika, Republic of Slovenia. Phone: (386) 068 59 481.

12334. Gonzalez, Yvonne. 2001. Teaching a tofu class in Costa Rica (Interview). *SoyaScan Notes.* Oct. 15. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** While visiting Costa Rica with a devotee of the Indian guru, Ammachi, Yvonne was invited to teach a tofu class on Oct. 3 at the only public school in the small town of Puerto Viejo, on the Caribbean coast of Costa Rica. The class was a great success. Some of the 43 people who attended were Seventh-day Adventists.

Yvonne began her preparations the day before the class. Her friend, Gia, went to a firm named Earth, located in Limón province. One of the companies that grows organic soybeans in Costa Rica on a large scale, they export large amounts of the soybeans they grow. Gia purchased 100 kg of soybeans from them. Yvonne went to the nearby ocean, got a container full of seawater, filtered it, boiled it until only the solids remained, then used the solids as nigari to make tofu the next day. At Gia's home where she was staying, Yvonne made a batch of tofu and a batch of soymilk. She then used this tofu to make Tofu Ceviché (her favorite tofu recipe, where tofu takes the place of fish; it requires no cooking). She added freshly ground cacao beans to the soymilk to make chocolate soymilk. Then she used the okara in a stir-fried dish.

The next day, she made tofu and soymilk again for the class, using a two-burner electric stove and nigari from the ocean. While the little stove was heating the soymilk, she

© Copyright Soyinfo Center 2013

served the three dishes she had prepared the day before. Also Margo, a friend who flew down with Yvonne from Los Angeles, demonstrated (in both Spanish and English) how to sprout and grow soybeans. She grows them in her back yard in Los Angeles. Then Yvonne passed out (free of charge) one kg of soybeans to each of the 30 adults who took the class. The next day, at least four of these adults planted some of the soybeans in their back yards. "The ground is so fertile there that everything grows." They kept the rest for making tofu or cooking.

A number of important local people came to Yvonne's class. First was the mayor's wife. After the class "she wept with happiness–it was so beautiful." She knew what tofu was but she didn't know how to make it. She was so happy to learn that she could feed so many people for so little money using tofu made at their home or congregation. She and her family and many friends are vegetarian, so previously they had to drive 4 hours to the capital, San Jose, to buy their tofu. Of course they also had to pay for the gas and spend all that time.

Second was Carter, a Canadian man who owned the local health food store. Third was Michael, an advanced French chef who owned the local gourmet restaurant named Michael's–as well as a restaurant in Paris. These two businesses cater mostly to European and Canadian customers–who are predominantly vegetarian. These two men drive to San Jose, the capital, once every three weeks to buy tofu–and they often run out of it, as when the local electricity goes out. Fourth was a man who owns a Filipino-Chinese restaurant in town. He hadn't used tofu in any of his dishes because he didn't want to drive to San Jose to buy it. He bought a tofu kit from Yvonne and now he has started to make tofu.

Three people invented and prepared their own dishes at home and brought them to show Yvonne the day after the class. (1) A Costa Rican man of Jamaican descent made a delicious Jamaican hummus using cooked and blended whole soybeans rather than tofu. (2) Carter made his own soymilk, added finely grated coconut to it, then sold it as coconut soymilk shakes; it was delicious, without any added any sweetener. (3) Michael cooked and blended soybeans, then added some other ingredients to make a patty. He fried it then topped it with a creamy garlic sauce to make a "soy steak." He served it to Yvonne, along with other great food, at his restaurant.

Within one week, various people who attended Yvonne's class were selling organic soybeans and chocolate soymilk at the local farmers' market. Some men went to Earth, purchased 100 kg of organic soybeans, divided them up into 1-kg plastic bags, and began to sell them at the farmers' market. One of the ladies who took Yvonne's class (Rachel, an American who is a devotee of Ammachi and has lived in Puerto Viejo for 3 years) decided to make chocolate soymilk and sell it at the market.

In the capital, San Jose, organic soybeans retail for $1.30/kg and wholesale for $1.00. At least three companies make tofu there: Yohann, the well-known Japanese supermarket chain, makes it twice a week in their butcher shop. At least two Chinese markets in Chinatown make 10 kg maximum at least once a week. They sell some of at their markets (stored in cold water in a bucket) and the rest to local restaurants. People known which day each company makes tofu, so they can buy it fresh.

Many foreign tourists travel to Costa Rica. The Japanese go for the deep-sea fish and the bird watching. The most expensive establishments in the capital (restaurants, hotels, the country club) are all owned by Japanese. The Europeans and Canadians go to surf and to party. They fall in love with the country and its virgin natural beauty.

Sam Zaoui, who wants to start a tofu shop in Costa Rica, is a Frenchman presently living in Miami Beach, Florida. A year ago he visited Costa Rica, fell in love with the country, and decided to move there and try to earn his living making tofu. He recently purchased the book *Tofu & Soymilk Production* from Soyfoods Center. William Shurtleff gave Yvonne's phone number to Sam. Sam was unable to locate a source of soybeans; he especially wanted organic soybeans. So Sam called Yvonne after she returned from Costa Rica and was delighted to learn that Earth First grows organic soybeans on a large scale in Costa Rica. Sam also owns a record company in Miami and manages a very popular "roots reggae" band named Johnny Dred; the musicians are Rastafarians who do not eat meat. So when they travel, Sam has to try to find tofu and vegetarian meals for them.

Note: During the last two decades, soyfoods have made major strides in the United States. But they have not begun to realize their great potential in developing countries–such as Costa Rica. Address: 6029 LaPrada St., Los Angeles, California 90042. Phone: 213-254-1712.

12335. Zaoui, Sam. 2001. Plans to start a tofu shop in Costa Rica (Interview). *SoyaScan Notes.* Oct. 20. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Sam was born on 11 Oct. 1972 in France, south of Paris. He came to the USA in late 1989 and has lived in Florida since that time. He owns a record company in Miami Beach and has his own label. He manages a 9-piece band named Johnny Dred (after the lead artist), which plays traditional "roots reggae" music–music with a message, in the Bob Marley style. He distributes his records in Costa Rica.

Sam is planning move from Miami to Costa Rica and to start a tofu shop in Costa Rica. He is thinking of calling it *La Casa de Soya.* He just loves Costa Rica. The people are so nice and the country is so beautiful–like the Garden of Eden. He plans to move his record company and band to Costa Rica with him, so he will then have two occupations and, hopefully, two sources of income. Address: Sam's Family

12336. Brooks, Patricia. 2001. A Japanese cuisine with style & spark. *New York Times.* Oct. 28. p. CT16.
• ***Summary:*** A restaurant review of Yooki Yama ("snow-capped mountain"), 1018 Main St., Branford, Connecticut. The "silk tofu casserole, a Korean dish whose contents were steamy hot and included "custard-soft bean curd cakes" which "floated in a batch of red-hot pepper sauce that made our eyes smart. The tofu was like a sponge, absorbing all the fire of the peppery broth. Wow!" Yooki Yama's owner is Japanese Korean, which explains the spicy hot dishes on the menu.

One of the "recommended dishes" is "Age-dashi tofu" [age-dashi-dofu]–"deep-fried soy bean cakes [tofu] served with a perky ginger scallion dip."

Note: Branford is a seaside town with many lively restaurants just east of New Haven, Connecticut, midway between New York City and Providence, Rhode Island.

12337. Funk, Linda. 2001. Soyfoods: Catch the wave of excitement with soyfoods. Investing checkoff dollars. *Iowa Soybean Review* (*Iowa Soybean Association, Urbandale, Iowa*) 13(1):9. Oct.

• ***Summary:*** Contains a recipe for Creamy lemon-lime tofu cheesecake. A color portrait photo shows Linda Funk dressed in white. Address: Executive Director, The Soyfoods Council, Iowa.

12338. Goldbeck, Nikki; Goldbeck, David. 2001. Eat well the YoChee way: The delicious and easy way to cut fat and calories with natural YoChee (Yogurt Cheese). Woodstock New York: Ceres Press. xviii + 309 p. Oct. Illust. Index. 23 x 19 cm.
• ***Summary:*** This very interesting and original book is about dairy "yogurt cheese," which has a smooth, creamy texture and is easily made by draining fat-free yogurt in a sieve or colander in the refrigerator overnight. For best results, use a yogurt that contains no thickeners or stabilizers, including modified starch, gelatin, or gums, and which has not been pasteurized or heat treated after processing. "YoChee can help you overcome many of today's most pressing dietary concerns–particularly those linked to calcium, fat, and calories.

Though the full-fat product is an ancient one among nomadic people who make yogurt, the name was coined by the authors to refer to its modern nonfat counterpart. Contains 275 recipes. Soy-related recipes include: Mushroom-tofu paprikash (p. 146). A blurb advising use of "genuine soy sauce" appears on pages where soy sauce is called for as an ingredient (p. 53, 85, 111, 146, 186). Address: P.O. Box 87, Woodstock, New York 12498. Phone: (845) 679-5573.

12339. Kohns, Jennifer. 2001. Soy chic in New York City. *Iowa Soybean Review* (*Iowa Soybean Association, Urbandale, Iowa*) 13(1):10-11. Oct.
• ***Summary:*** A visit to chic restaurants in New York City that feature soy on the menu. The name, address, and phone number of 6 restaurants is given. Address: Chef and owner of Lunchbox Catering, Inc.

12340. **Product Name:** Organic Silken Tofu, or Soft Tofu.
Manufacturer's Name: Nutrisoy Pty. Ltd.
Manufacturer's Address: 15 Hannon St., Botany NSW 2019, Australia.
Date of Introduction: 2001. October.
Ingredients: Silken Tofu: Organic soybean (non genetically modified), filtered water, natural calcium sulphate, glucono delta lactone.
Wt/Vol., Packaging, Price: 300 gm pack.
How Stored: Refrigerated.
New Product–Documentation: Labels with dates sent by Tony Wondal of Nutrisoy. 2005. April 26. He started making and selling these products in Oct. 2001. Silken: Orange, purple, green, yellow and red on salmon pink. A color photo shows three slices of silken tofu in a bowl with a white sauce and cut vegetables. Nutrition information is given.

12341. Soyfoods Council and Mushroom Council. 2001. When mushrooms and soy get together–Delicious meals are on the way (Poster). 4554 N.W. 114th St., Urbandale, IA 50032-5410. 1 p. 37 x 57 cm.
• ***Summary:*** A large, attractive poster with recipes for soy and mushrooms, plus one large color photo of Nut-crusted tofu with Szechuan vegetables. Address: Urbandale, Iowa. Phone: 515-727-0796.

12342. United Soybean Board. 2001. National report 2001-2002: Consumer attitudes about nutrition. Seattle, Washington. 8 p. Oct. 28 cm.

© Copyright Soyinfo Center 2013

• ***Summary:*** This eighth annual nationwide survey, commissioned by USB, was conducted in July 2001 by an independent research firm in Seattle, Washington. Random telephone interviews were completed with 800 consumers. The study's margin of error is ±3.5 percent and has a confidence level of 95%.

Contents: Consumer perceptions of cooking oils. Nutritional concern and habits. Consumer awareness of nutrition terms and information. Consumers on soyfoods and health: Awareness that soy reduces risk of heart disease, where consumers get information on soy and health. Consumers consumption of soyfoods. Media sources and nutritional information. Consumer attitudes about *trans* fatty acids. Consumer perception and knowledge of organic foods. Consumer perceptions of genetically modified food, political and activist organizations, and price increases for labeled foods.

Awareness that soy reduces risk of heart disease: 28% in 1999, 35% in 2000, 39% in 2001.

Percentage of consumers who have tried various soyfoods in 2000/2001: Tofu 45%45%. Soy veggie burgers 41%/40%. Soymilk 25%/28%. Soy nuts 14%/20%. Soy protein bars 11%/18%.

Percentage of Americans that consume soyfoods weekly: 24% in 1999, 27% in 2000, and 27% in 2001. And 42% of Americans consume soyfoods once a month or more.

Note: As of Aug. 2008 this full survey is available gratis in PDF format at www.soyconnection.com /health_nutrition / pdf/.

12343. Watanabe, Koichi. 2001. Re: History of La Soyarie Inc. and list of current products. Letter to William Shurtleff at Soyfoods Center, Nov. 7. 5 p. Typed, with signature on letterhead. [Eng; Fre]

• ***Summary:*** Each page, except the cover letter, has a color heading and is written in two columns, the left one in French, the right one in English. "About us: La Soyarie produces many food products with soya: Tofu (firm, regular, silk), Tofu burger, Soy Nuts, Tofu Nuggets, Vegetarian Pate. We also distribute other products under the following brand names: Yves Veggie Cuisine, Fontaine Sante Foods Ltd., Nutrisoya, Noble Bean. Address, phone, and fax numbers." Mme. Jeanne d'Arc d'Astous is chief administrator.

"Company history: From very modest beginnings, La Soyarie produced its first Tofu in 1978, right in our founder's [Koichi Watanabe's] home kitchen. This product was supplied only to small local health food stores and friends.

"In 1979, we moved into our first real production facility at 25 St. Etienne St., Hull (Quebec). During this period, our production consisted of only 7 batches of tofu a week. Our company had 20 customers, and produced bulk tofu blocks for total sales of $1600 a week.

"La Soyarie was incorporated on the 31st of March, 1982.

"In 1823, La Soyarie Inc. launched new product lines derived from traditional Japanese recipes, and made with tofu: the burgers and nuggets.

"On October, 1st, 1989, the business and offices moved to a brand new location, with 6000 square feet, at 94 Adrien-Robert St. in Hull. From then, the company began to prosper and grow rapidly. We now own the building and use all of its space that is 12000 square feet.

"Today, La Soyarie contracts 13 distributors that serve the regions of Montreal, Quebec and Toronto. We sell to some supermarkets chains and we supply 'Fontaine Sante Foods Ltd', on a weekly basis, for them to make their tofu based products.

"We serve more than 70 other businesses in the Ottawa region: Supermarkets, natural food stores, and some restaurants.

"We use more than 400,000 kg of organically grown Canadian soya beans per year.

"We currently employ 24 persons.

"The name for our company, 'La Soyarie' was selected from the entries in a 'name the business' contest. The winner received a year's supply of tofu.

"The logo represents a soya leaf."

A 1-page list of products shows that the company makes the following: Tofu–Regular water pack, 500 gm. Tofu–Regular vacuum pack, 454 gm. Tofu–Herb vacuum pack, 454 gm. Tofu–Vegetable vacuum pack, 454 gm. Tofu–Silk water pack, 500 gm. Tofu burger fried 300 gm. Miso burger fried 300 gm. Teriyaki burger fried 300 gm. Ganmo burger fried 300 gm. Tofu burger baked 280 gm. Miso burger baked 280 gm. Teriyaki burger baked 280 gm. Ganmo burger baked 280 gm. Imperial burger 150 gm. Oriental burger 150 gm. Nut burger 300 gm (no soya). Pinto burger 300 gm (no soya). Regular tofu nuggets 150 gm. BBQ tofu nuggets 150 gm. Soynuts 250 gm (regular, BBQ, plain, no salt). Tofu cutlets (150 gm, or 300 gm). Vege pate 220 gm (yeast free, no soya). Address: President & plant manager, 94 Adrien-Robert St., Hull, Quebec, Canada J8Y 3S2. Phone: (819) 777-6716.

12344. Golbitz, Peter. 2001. Soyfoods sales experience strong growth in 2000. *Bluebook Update* (*Bar Harbor, Maine*) 8(2):1-2. Fall.

• ***Summary:*** A new report, titled "Soyfoods: The U.S. Market 2001," by SPINS and Soyatech, Inc., in association with Arthur D. Little, Inc., gives data for the year 2000. It shows that the category grew by 21.1% to reach $2.77 billion during the year 2000; sales are projected to grow by 15-25% during the year 2001. Since 1995, dollar volume for the category has grown 250%, with double-digit increases every year. The top five soyfoods categories, accounting for 86.5% of total U.S. soyfoods sales, were: (1) Meal replacement beverages and powders. (2) Energy bars. (3) Soymilk. (4) Meat alternatives. (5) Tofu.

New trends: (1) Consumers are now buying more

© Copyright Soyinfo Center 2013

soyfoods products at supermarkets and other mass-market stores than at any other channel; sales here grew more than 30% in 2000. Refrigerated soymilk sales grew more than 500% during 2000, reflecting their new positioning in the dairy case next to dairy milk.

For more information on the report contact SPINS at phone 415-957-4410.

12345. Morinaga Nutritional Foods, Inc. 2001. Get rich. Quick (With Mori-Nu Creamy Soups made with organic soy) (Ad). *Natural Foods Merchandiser.* Nov. p. 13.
• ***Summary:*** This full-page color ad shows a four flavors of Mori-Nu soups (butternut squash, corn, tomato, garden pea) in two sizes (1 quart and 11 oz). "Just heat and serve for 4 to 6 grams of soy protein per serving."

This ad also appeared in the Jan. 2002 (p. 21) issue. Address: 2050 West 190th St., Suite 110, Torrance, California 90504. Phone: 1-800-669-8638 (NOW TOFU).

12346. Wilkinson, Endymion. 2001. Chinese culinary history. *China Review International* (*Hawaii*) 8(2):285-302. Fall. [49 ref]
• ***Summary:*** This article consists of reviews of three books. The first book (p. 285-91) is: H.T. Huang (Huang Hsing-Tsung). *Fermentations and Food Science.* Part 5 of *Biology and Biological Technology,* volume 6 of *Science and Civilization in China,* edited by Joseph Needham. Cambridge: Cambridge University Press, 2000. xxviii, 741 pp. Hardcover. £90. ISBN 521-65270-0. This is an excellent, positive review by a man who is deeply knowledgeable and interested in both Chinese history and Chinese food history. He was European Union Ambassador to China from 1994 to 2001 and author of one of the best books on Chinese history. He begins by noting that this book "goes to the very heart of what makes Chinese food Chinese by tracing the historical development of the chemical basis of the fermentations used in Chinese food processing. Dr. Huang is deeply qualified to write such a study..." He discusses each chapter in order. Concerning chapter (d) on soybean processing and fermentation, he observes: "From the Han to the Tang soybeans were normally cooked into granules (*doufan*) or congees (*douzhou*) and eaten as a staple (*zhushi*). By the Tang, wheat was replacing soybeans, which were increasingly used as a supplemental food (*fushi*)." Because soybeans had an unpleasant beany flavor and required a long time to cook by boiling, the Chinese experimented with other ways of processing them. Sprouting beans (*dadou huangjuan*) had been used as a medicine since at least the Han; soybean sprouts emerged as a foodstuff in the Song. "A form of soybean curd (*doufu* in Chinese, pronounced *tofu* in Japanese) may have been discovered in the Han but it only became a popular foodstuff in the Song (at which time it was imported to Japan by Buddhist monks, who at first called it Chinese curd, *Tôfu*)." Note: The first character, when pronounced *Tô* in Japanese means "China," but when pronounced Tang refers to that Chinese dynasty (618-907) shortly before the Song (960-1279).

"By the Former Han, salted or semi-fermented black beans (*shi;* modern pronunciation, *chi, douchi*) were produced by stopping the fermentation process halfway..." Huang believes that soy sauce made from jiang began to emerge during the Han dynasty but did not acquire its modern name of *jiangyou* (soy sauce) until the Song "(it is only from the Qing [1644-1912] that it became the main condiment and seasoning in Chinese cooking)."

Wilkinson is critical of the series editor for the continued use of Needham's obsolete system of romanization.

The second work is: Xu Hairong, editor in chief. *Zhongguo yinshi shi* (The history of Chinese food and drink). 6 volumes. Beijing: Huaxia Chubanshe, 1999, 4,067 pp. Hardcover. ISBN: 7-5080-1958-X. Since the 1980s, much excellent research has been done on Chinese culinary history, and this 6-volume Chinese-language work sums up much of this scholarship. More than 4,000 pages long (with plenty of illustrations), it is by far the largest history of Chinese food and drink available. Most of the authors are professional historians and several have already made important contributions in this field. A brief analysis of each volume is given. Unfortunately, the absence of an index makes this large work difficult to use as a reference. It is followed by an overview of other valuable works (mostly in Chinese) in the field.

The third book is *The Cambridge World History of Food,* 2 vols. (2000). Wilkinson is sharply critical of this work, both because so little material on Chinese culinary history is presented, and because that material contains so many errors and inconsistencies–examples of which he presents one by one for 4 pages! Address: Harvard Univ. [Cambridge, Massachusetts].

12347. *SoyaScan Notes.* 2001. Chronology of major soy-related events and trends during 2001 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** April 12–Bill Bolduc, founder of Eden Foods and natural foods pioneer, dies in Southern California.

April 17–Martha Stewart, on her popular nationwide TV program *Living,* has a very positive segment on South River Miso Co.

April 18–Richard Rose, a soyfoods pioneer, sells Rella Good Cheese Co. to Tree of Life. He retains his company HempNut, Inc. in Santa Rosa, California. His Hempeh (hempseed tempeh) still contains soy.

May 11–The Kerry Group (of Wisconsin and Iowa) purchases Iowa Soy Specialties, LLC of Vinton, Iowa.

June 12–The Hain Celestial Group acquires Yves Veggie Cuisine (Vancouver, BC, Canada).

Aug. 24–Wildwood Natural Foods (Fairfax and Santa Cruz, California) and Midwest Harvest, Inc. (Grinnell, Iowa)

© Copyright Soyinfo Center 2013

merge to form Wildwood Harvest, Inc. Iowa Agricultural Finance Corporation (IAFC) invests $3.3 million in the new company, and the Iowa Farm Bureau Federation (IFBF) invests an additional $700,000. This investment will be used to build and equip a 20,000 square foot soyfoods plant in Grinnell and to remodel and equip another 20,000 square foot soyfoods plant in Watsonville, California.

Aug. 3–Bunge, in its initial public offering (IPO), raises $278 million by floating 23% of its shares on the New York Stock Exchange. Bunge his been a private grain trading company since it was founded in 1818 in the Netherlands by Johann Peter Gottlieb Bunge.

Sept.–SunRich's new soymilk plant in Wyoming starts production. By Nov. the plant is at full capacity and expansion begins.

Oct.–The Coca-Cola Co. acquires Odwalla, Inc. of California for $181 million. Odwalla has annual sales of about $130 million, mostly in fresh, refrigerated juices plus some delectable soy beverages.

Oct. 21–The U.S. National Organic Program and its standards take effect.

Nov. 4-7–Fourth International Symposium on the Role of Soy in Preventing and Treating Chronic Disease held at San Diego, California. General chairpersons and proceedings editors: Stephen Barnes and Mark Messina.

Dec. 10–The Hain Celestial Group, Inc. acquires Lima NV, the leading Belgian natural and organic foods manufacturer and marketer, and its Biomarché operations. Hain appoints Lima's Chairman, Philippe Woitrin, as Managing Director of Hail Celestial Europe. Lima is also a European pioneer in macrobiotic foods and soyfoods.

Dec. 11–Ralston Purina Co. (St. Louis, Missouri, a soy pioneer) is acquired by Nestle SA for $10.1 billion cash; on this date the deal is approved by the U.S. Federal Trade Commission. The new company is named Nestlé Purina. The merger brings together such household names as Ralston's Dog and Cat Chow and Nestle's Friskies cat food and Mighty Dog brands.

Dec. 24–The Federal Trade Commission approves the merger of Dean Foods and Suiza Foods Corp. (which owns 14% of Horizon Organic Dairy). A federal judge throws out White Wave's lawsuit arguing that White Wave has the right to buy back its own stock at the market price before the merger.

In 2001, for the first time in modern history, the USA lost the distinction of supplying more soybeans and soybean products (oil and meal) than all other countries combined. This year it supplied about 46% of the world's soybean exports. South America (mainly Brazil and Argentina) now supply more than 50%. Devalued currencies in Brazil (the *real*) and Argentina (the *peso*), plus the strong U.S. dollar, make it difficult for U.S. exporters to compete based solely on price. To compete in the future, U.S. growers must find a new strategy, which will focus on soybean quality.

12348. *ADM Health & Nutrition Update* (*Decatur, Illinois*). 2001. Continued interest in soy products, according to a recent survey. 3(3):5. Dec. [1 ref]

• ***Summary:*** The following are results from a survey conducted for the United Soybean Board, based upon a nationwide telephone of 800 adults 18 years and older.

Consumers who believe soy oil is healthy 88%.

Consumers who are aware of tofu 82%.

Consumers who are aware of soymilk 78%.

Consumers who use soy products at least once a week 27%.

Consumers who believe soy products are healthy 69%.

Consumers who are aware of specific health benefits of soy 39%.

12349. *SoyaScan Notes*. 2001. Brief history of Swan Gardens, Inc. of Montana and Florida. Part I (Overview). Dec. Compiled by William Shurtleff of Soyfoods Center.

• ***Summary:*** This history was compiled from talks with various people who worked for Swan Gardens. Dick and Jocelyn declined (May 1994) our offer to answer questions about this history.

Swan Gardens was founded by Dick and Jocelyn ("Joci") McIntyre. Dick was born and raised in Great Falls, Montana. Though he never graduated from college, he was very bright and entrepreneurial. Joci grew up in Seattle, Washington. Dick had received knowledge from one of Guru Maraji's teachers, started to practice meditation, ended up in Seattle at about age 21, and first met Joci, who was already a devotee of Guru Maraji. She was about age 27-29, had 4 children, and was in the process of or had just finished getting a divorce. Not long after they met, Dick and Joci were married, Dick for the first time. They may have lived in a Divine Light Mission community house. In about 1972 Guru Maraji was coming up the coast from Los Angeles to Seattle and his devotees in Seattle were preparing for his arrival and remodeling one of the houses. After Maraji left Seattle, in about 1973 or 1974, Dick and Joci went together to live in St. Ignatius in western Montana. A small town, it is located about 40 miles north of Missoula in the Flathead Valley, which extends from Flathead Lake (south of Glacier Park) on the north down to Missoula in the south. This valley lies parallel to and southeast of the Swan Valley, which is and about 80 miles away by road and over the Mission Range of mountains. Their goal was go back to the land and to start an organic farm. Land was relatively inexpensive there, Dick's father was a dentist or doctor, his parents had a house to the north near Flathead Lake, and they may have helped them buy the land–about 5-6 acres, located in the country about a mile from St. Ignatius (population: 1,500 to 2,000).

Dick and Joci worked hard to get their organic vegetable truck farm started. They also had two children together, making Joci the mother of six. Gradually others who were

© Copyright Soyinfo Center 2013

involved with Guru Maraji joined them: Brenda Wood with her husband and three kids; Chris Taney arrived in Nov. 1977; Bob and Alma Johnson.

The community, which was called Swan Gardens, needed money. Dick got a day job in a hospital in St. Ignatius; he worked his way up from custodian (he mopped the floors) to purchasing agent of the hospital. Brenda's husband, Mike, made very good money as a cabinet maker. Others would pick up seasonal work, as farm workers, grave diggers, etc. Eventually, as income from the farm increased, Dick and others were able to leave their off-farm jobs.

Joci was the one who originally learned to make the tofu at a time when very few Caucasian Americans knew how to do so. In Dick and Joci's home was a 1920s wood stove, and in the beginning Jocelyn made tofu on top of this stove. They had a cauldron and blender, and a little wooden press that made about 1 pound of tofu at a time, so it was pretty simple and small. She learned using *The Book of Tofu* and other sources. Many local people contacted Joci and asked her to make tofu for them. So in early 1976 she started selling this tofu to local people. After a while, Joci was making several dozen pounds of tofu a day on this stove.

Joci got interested in tofu and organic foods largely because she had a medical condition that doctors did not now how to treat–spinal meningitis. While in Seattle, she was in the hospital for a while, and said that she was very near death. But she had so many children that she didn't want to die. A friend came to the hospital and gave her some books on Oriental medicine. One of them recommended a ten-day brown rice fast. She asked the nurses to cook her brown rice but they said no, and wanted to feed her 7-Up and Jello. So she cooked the brown rice herself on a hot plate in the hospital, even though it was extremely difficult for her to get out of bed. It worked. Joci felt the brown rice fast had saved her life. She was soon deeply involved with macrobiotics.

Dick and Joci invited others in the community to live in their house. Some lived upstairs. Brenda and her husband lived in a trailer behind the house. The communal diet was strongly macrobiotic, with only organic, natural foods. Dick would often buy in bulk from a distributor to save money; 50 lb bags of brown rice, sunflower seeds, etc. Apples and vegetables grown on the farm yielded delicious pies, etc.

There was another larger Guru Maraji community in Missoula. Everyone in the community helped with both the organic farm (they sold most of their vegetables from their stand at an organic vegetable market in Missoula) and the tofu shop.

There were a number of buildings on the McIntyre's property, built in about the 1940s: the main house, a simple garage, a sort of bunkhouse, etc.

Then they built their own tofu factory on their land in St. Ignatius. Dick and Joci were the "brains" and a lot of the "muscle." Most of the other people were just "muscle" and they admired and wanted to support Dick and Joci. "It was a lot of hard work." When one of the community members became age 21, he inherited some money from a trust fund (about $8,000), which he donated to the cause–with no strings attached. It formed the seed money for remodeling the building (a bunkhouse, boathouse, or large shed that was in good repair) that became the tofu shop. Dick and Joci designed the tofu shop, including the plumbing and choosing the equipment; it was renovated entirely by members of the community. To get the equipment, Dick and Joci took their van and a U-Haul trailer and went to San Francisco, California, where they bought it from several Japanese companies–probably tofu factories. They got a fire-heated caldron. In Montana they purchased an excellent diaphragm-type soymilk pump (approx. 12-inch diameter diaphragm) from a local dairy. Joci used the occasion to visit an acupuncturist. Dick worked very hard with the other community members to complete the shop. The first tofu was made in the shop in about Jan. 1978. The soybeans were almost certainly organic. Dick and Joci felt very strongly about the importance of organic foods, and they would have ordered the soybeans.

The tofu factory produced large amounts of okara, which they would use as natural fertilizer, distributing it under the straw mulch on their organic farm. Joci's daughter, Ceci, age 16, worked in the tofu factory a lot. Eventually Swan Gardens got the Safeway supermarket account, which was very important. Continued.

12350. *SoyaScan Notes.* 2001. Brief history of Swan Gardens, Inc. of Montana and Florida. Part II (Overview). Dec. Compiled by William Shurtleff of Soyfoods Center. • ***Summary:*** Continued: Move to Florida: The community (about 6 adults and many kids) packed up two vans and U-Haul trailers, left St. Ignatius in August 1979 and moved to Miami, Florida. They sold the organic farm, tofu company, other buildings, and property to Gerald Minsk, who changed the name of the company to The Tofu Factory. Minsk was with a community of people who lived together in Denver, then in Boulder, Colorado, before moving to Montana.

In Florida, the McIntyres and community members lived together in a large house at 940 17th St., Miami Beach, FL 33139. It took a while to find a good factory site, but eventually the company relocated on the second floor of a very old warehouse next to a railroad siding at 1111 N.W. 22nd., Miami, Florida 33127. Immediately below the tofu shop was a large fruit and vegetable wholesaler. Getting the building ready for food manufacturing, moving in existing equipment, and constructing new facilities was a big job. Joci's mom and dad came down to help build the tofu shop. Her dad was a retired steam fitter or plumber, and he helped a lot. In addition to the group from Montana, many people from the large surrounding Maraji community who had specialized skills helped the name company to get started–free of charge. A man with framing and dry-wall skills

© Copyright Soyinfo Center 2013

built a storage room for the soybeans, which the company ordered by the tractor-trailer load. A plumber built a water chilling system to accept the hot tofu. An engineer helped to develop the cooking system. An auger pump, usually used for maraschino cherries, was used to pump the delicate curds. Dick found many used 200-gallon dairy tanks in south Florida; they were used for curding the tofu. Some of these skilled people were also working in Miami to prepare a Boeing-707 at the airport for Maraji. In those day, Guru Maraji and his family spent a lot of time in Miami; many of disciples lived in Miami in ashrams.

Shortly after Swan Gardens started making tofu in Miami, Tree of Life began to distribute their tofu; this was a major breakthrough. Swan had a large vacuum packaging machine and they packed much tofu under the attractive Tree of Life label.

A man named Jim Emmerson (who was probably in his mid-60s at the time) worked very closely with Swan Gardens as a financial and business advisor; he had a great deal of experience running businesses and served as a chief financial officer (CFO) for other organizations. Guru Maraji was very active in the Miami area, and very big events were hosted in his honor. At such events, Swan Gardens would often provide bulk tofu for the vegetarian meals.

Swan Gardens had its tofu distributed as far north as Washington, DC, through Tree of Life, and into the Midwest to Rainstar (Columbus, Ohio). Some of their tofu was even distributed to the Caribbean–probably to the Virgin Islands or the Bahamas. Dick used to say that the company became the largest soyfoods manufacturer in the southeastern USA at the time.

While in Miami, Swan Gardens had a problem, which lasted for about one year, with yellow spots appearing on their tofu. At one point about one-third of their tofu was being returned because of yellow spots on the surface; nobody wanted to buy it. It was borderline disaster. Tests showed that it was caused by a harmless bacterium and the tofu makers came to believe that the bacteria came in on the soybeans.

For the first few years the company struggled to break even or turn a profit. Dick and Joci had a house and earned a salary. The employees either lived with them or in another group house / ashram. Everyone lived simply and worked extremely hard–usually 7 days a week. At the end of each day, the workers had to clean the plant, pipes, etc.

In 1980 Swan Gardens rode out the nearby violent riots in Miami caused when police shot an unarmed black man on the back of a motorcycle.

During December 1985 and Jan. 1986 Swan Gardens launched Soya Kaas, a meltable cheese alternative that contained both tofu and casein (a protein from cow's milk). They developed and manufactured the product in Georgia. Shortly after the product was launched they established Soya Kaas, Inc. as a subsidiary of Swan Gardens Inc.

By Jan. 1986 Swan Gardens had moved from Florida to Georgia, settling in Decatur, a suburb of Atlanta. There are various theories about why Swan Gardens left Miami. Jim Emmerson had a piece of property in or near Decatur; that may have been an attraction, but they would have had to build a new factory. Soya Kass was Dick and Joci's most important and valuable product.

Gradually Swan Gardens became profitable; Dick and Joci kept the financial records. Dick and Joci are truly remarkable people, admired or even revered by most who worked with them at Swan Gardens. But they are also "fiercely private people and quite strong willed. It was a waste of time to argue with Joci; she knew she was right, and she ran the show. It was sort of a brown-shirt mentality. Everyone had to work hard and toe the line for the greater spiritual cause."

At some point Dick and Jocelyn sold Swan Gardens and Soya Kaas. They probably gave a generous portion of the profits to Guru Maraji.

Maraji now does satellite broadcasts twice a week which appear on regular television such as Dish Network. He is also actively traveling and teaching worldwide. He often flies a large jet, which he leases.

12351. Tale of tofu (Continued). 2001. Television broadcast. Canadian TV, Channel 1, The Body, Mind, and Spirit Channel. 1 hour. Dec. 2001.

• ***Summary:*** Continued: Chinese civilization, which is 5,000 years old, has an epic culinary legacy. The numerous tofu recipes and types of special tofu are based on the landscape, environment, and history of this singular nation. Four types of special tofu include iced bean curd, moldy bean curd, blood bean curd, and cured (smoked) bean curd.

Emei mountain (*Emeishan*) in southwest Sichuan province is sacred to Buddhists, with numerous temples throughout the mountain range. A 3-day supply of food is carried up the hill to the monasteries each day. Iced bean curd, found in this remote area, is made when snowy winter conditions make it difficult to transport food up the hill. An old monk tells of a very nutritious wild plant called the "magic taro." The taro is mixed with rice flour and cooked into a porridge–a process similar to making soyamilk from soyabeans. The monks developed the ingenious idea of preserving the taro porridge by ladling it in a layer about 2 inches thick over firm, level snow, then letting it freeze for over a month. Finally they dry the frozen taro in the sun to produce "iced bean curd." Each brown piece (which is about 7 inches square and 1.5 inches thick) can be stored for up to 5 years. It looks like a little honeycomb and has a neutral taste. However it has the capacity to absorb the flavors of myriad spices, herbs, and sauces, from soya and chili, to sweet and sour. Its versatility gives it a place at every meal. Note: This type of tofu is apparently made without the use of soybeans.

The town of Tanko, set against the northern slopes of Huangshan or "Yellow Mountain (Anhui Province), is revered for its moldy bean curd, which is said to have been a favorite of emperor Zhu Yuanzhang, founder of the Ming dynasty and the first Ming emperor [lived 1328-1398; ruled 1368-1398]. Born into a peasant family, in 1344 he became a mendicant Buddhist monk. While begging for alms, he was sometimes rewarded with moldy tofu. When he became emperor [in 1368], he declared moldy tofu a royal dish. Today this Huangshan delicacy is fermented by using the excess water from the initial process of making tofu. The acidic nature of the water [whey] helps to raise the temperature and humidity of the container. Each piece of moldy tofu is about 3 by 2 by 1 inches, covered with a white mold mycelium, is incubated in large, stacked wooden trays. Since wet and humid weather are naturally conducive to fermentation, moldy tofu is best made during the summer, when the process takes only a few days; in winter it takes twice as long. At the end of the fermentation process, moldy tofu is firmer that regular tofu. "It is, in effect, tofu that has gone bad." Famous dishes in Huangshan are well known for various tofu specialties, such as Braised moldy tofu–in which the tofu, with its fluffy white mycelium intact, is stir-fried in a wok. But moldy tofu is an acquired taste and, despite its fame, not everyone appreciates its heady, strong flavor.

In the verdant plateau north of Huangshan (Yellow Mountain) is the age-old town of Xidi. Behind the ancient memorial archway is a tofu specialty that marks an agricultural festival. The palm-sized innovation looks like a Western doughnut, but in place of the hole, the tofu is indented at the center on both sides. At the end of the lunar year, the townspeople prepare for the agricultural festival that marks the end of the agricultural year. For this festival, celebrated on the 8th day of the last lunar month, the community preserves the harvest for the months ahead. Meat would be preserved in salt. In Xidi, the same technique has been adopted to the preservation of tofu. Historically these people have traded and traveled by sea over long distances. So they developed a kind of tofu that can keep for days after being cured over woodsmoke. Many small cylindrical cups made of woven bamboo are each lined with a filter cloth. Fresh curds are ladled in until the cup us full. The ends of the cloth are twisted tightly around the top as the whey begins to drain. A weight is then placed on top to press the curds into very firm tofu. Spices like peppercorn, anise, and cinnamon are added to the soyamilk before it is boiled. Then common salt is used as the coagulant!

Across China, the methods of tofu preparation reflect the availability of ingredients in that locale. In Xidi, salt is added to the tofu in a cloth filter; it quickly absorbs the liquid in the tofu. This tofu is left outdoors, where it is dried by the sun and wind is a week's time, leaving behind a yellowish-brown mass. It is now ready to eat. Regular tofu is soft, smooth, and tender; it must be eaten fresh. Cured tofu is hard and old; it can keep for up to 2 years. This method of curing tofu has been handed down for centuries. The people of Xidi (in Zhouxi) are keepers of a rich and ancient heritage.

China has sovereignty over many ethnic minorities, each with its own history and culture–which each has managed to keep alive. The Miao tribe lives across the Guizhou region. They work hard, love to dance, and have a strong tradition of ancestral worship. Every new year the Miao worship their ancestors and gods by offering sacrifices, at a very important ceremony. They kill a chicken (which is considered a luxury among the hill tribes) and a pig (which they have been fattening for a year). Blood tofu is made only once a year, at the time of the spring festival. The pig is slaughtered and fresh blood is drawn from it. Most of the meat is preserved with salt. Cooking blood tofu is a long and complicated process. First the tofu is crumbled in a large bowl, then ingredients such as lard, peppercorn, and finally fresh pig's blood are mixed in them kneaded together by hand to form a ball about 5 inches in diameter and pink in color.

The technique of smoking food has special significance in China. In ancient times, the preparation of a royal feast of smoked dishes ranked among the highest tributes paid to royal guests. Using firewood and withered grass, the process of smoking blood tofu, which takes about 20 days, will cause each ball to shrink to about 3 inches in diameter and become dark brown in color, but will preserve it for a long time. After being smoked, it is boiled with cured meat for 40 minutes to add a spicy, hot flavor. This Miao delicacy is used to greet and honor their guests. The villagers have waited a year for this feast.

"Eaten in every corner of China, tofu is inexpensive, nutritious, and readily available... Tofu cannot claim the celestial role of manna from heaven. If anything, it is as down to earth and mediocre as the people who have made tofu throughout the millennia. Yet the unassuming masses cannot deny that bean curd has given them sustenance through hardship. Indeed, it has brought with it a certain taste of pleasure and satisfaction in their lives."

12352. Tale of tofu. 2001. Television broadcast. Canadian TV, Channel 1, The Body, Mind, and Spirit Channel. 1 hour. Dec. 2001.

• ***Summary:*** This is a unique color documentary about tofu in China, narrated by John Culkin (with a few English subtitles when Chinese are speaking), written by Zoe Siu Moi Yee and Lo Wing Yi, directed and executive produced by Tely Fung Wing Chuen, with photography by Ko Chiu Lem. Copyright 2000, it was broadcast in Canada in Dec. 2001. The cinematography is very well done, interesting, and often beautiful. Although the narrative contains many errors and much strange and condescending language, it also contains some new information, especially about unusual types of ethnic or regional tofu varieties. However tofu is presented as an ancient, exotic, foreign food, with no

© Copyright Soyinfo Center 2013

suggestion that it might become part of Western diets.

The story begins: In the "epic struggle for survival, one food has emerged the champion of the poor during the centuries of hardship. Inexpensive and yet nutritional, it is the humble bean curd–tofu." It is "rich in amino acids and anticarcinogens." "At once a much-needed protein supplement and a veritable health food for the poor, bean curd is an oddity in its own right. And if legend has it right, then maybe tofu is a manna from heaven for the Chinese.

"The mythology of tofu begins with the diminutive and unimpressive soya bean." In Guizhou province (in southwest China), despite the harsh weather and rough terrain, soybeans grow well. In the village of Shenlin "soyabean constitutes the staple food of the people." All the families in Shenlin know how to make tofu but only 4 make and sell it (for 1 yuan/catty) to earn a living. One "old woman has devoted her life to the art of tofu-making, not so much for the income as for the pleasure of keeping up an old tradition." As pasta is to the Italians, so where you find Chinese you will find tofu. Today most of the tofu in China is made from soybeans imported from the USA and South America.

The Chinese greatly enjoy cooking; more than 30 products are derived from tofu. For example, crispy bean curd is used in Chinese hot pots. Pressed tofu is eaten during Chinese New Year in Nanjing.

Two sisters of the Miao minority hill tribe make tofu starting at 8:00 each evening. The first step is to make soyamilk, which can provide a "valuable nutrition supplement to children in poverty-stricken areas." Soymilk must first be boiled thoroughly (usually in a large wok-shaped container) before it is sold at the market. In rural communities, where central heating is a rare luxury, "many Chinese start the day by warming up with hot soymilk and Chinese-style fried doughnuts." The Miao sisters sell soymilk in plastic bags to make it easier to handle. They make 600 packs each night; it is ready for distribution to retailers at dawn.

When hot soymilk cools, a thin layer forms on its surface. This "looks like a pale wrinkled pancake" and is called "bean curd skin" [yuba]. It is one of the most expensive soya products and only a few good-quality (transparent) pieces can be obtained per batch of soymilk. The rest is considered a lower grade product due to color deterioration which causes the lower layers to gradually turn opaque. Though it is an extravagance, those who love its flavor and texture find it well worth the expense. Modern technology now makes it possible to mass-produce bean curd skin.

"In the half-forgotten village" of Kaili, in Guizhou province, the art of making pressed bean curd still thrives. "Plaster of Paris catalyzes the ingredients and coagulates the soyamilk. Surprisingly, the process has no adverse side-effects." Various local flavoring agents are added, resulting in a line of "dried of products." Regular flavors include marinated bean curd and pungent bean curd. Exotic varieties include cowhide bean curd and tea-flavored bean curd. These are sold as snacks in local markets.

Curing the tofu with woodsmoke enables it to be preserved for 7 more days. Since the smoking process is time consuming, it is fast becoming obsolete, and it costs an extra 4 cents per catty of tofu. Making pressed bean curd requires "back-breaking labor. Each day these girls must stand in the sweltering heat of the smokehouse for 13 hours in order to make 500 catties of pressed bean curd." No effort is spared in making these "edible little bricks of bean curd.

We can try to preserve tofu "or we can let it rot" to make fermented bean curd. The tofu is left to mold for several days is a process "not unlike that of making cheese. The workers spread a kind of mold onto the surface of the bean curd, which is then stored at a temperature of 25-30ºC for 3 days. A layer of thin white hair begins to sprout on top of the bean curd." This tofu is then stored in large jars for 3 months while fermentation takes place, breaking the protein in the tofu down into amino acids. "Sometimes the bean curd is wrapped in mustard leaves and stored for 12 months" to create a special product. In China "it is believed it was not human beings, but apes, that first discovered the joys of fermented food"–according to legends in ancient literature. Chinese greatly enjoy wine, as well as bean curd. "It adds a certain flavor to otherwise harsh rural lifestyles. Here, to make poverty bearable, the saying goes, 'All you need is one piece of fermented tofu for one meal and a bottle of fermented tofu to last the year.'"

In its heyday, a little village in Anhui province (eastern China) was home to about 200 families "solely engaged in making tofu." "It is famed for producing the best and most sought-after in China." Concerning the origin of tofu, "most Chinese generally subscribe to the legend of a certain feudal lord, Liu-An of Huai-Nan. Two thousand years ago, during the Han dynasty, Liu-An searched far and wide for the fountain of youth. He believed he could discover the secret of immortality and turn it into a magic pill. When his valiant efforts failed, he threw his half-finished potion into a river in disgust. Natural plaster in the river chemically reacted with the mythical ingredients. And so it was that the first block of bean curd was bestowed upon humanity." The legendary location of his famous experiment is where the "tofu village" stands today. The little stream of historic fame still runs through the village. In its water, the people "wash their clothes, clean their shoes, and prepare the beans that will be made into tofu." One catty of soybeans will yield as much as 3-5 catties of tofu. "The people of this village are content that theirs is the original and authentic recipe for tofu. They have inherited a gift from history." The myth of Liu-An has secured this obscure little village its place in Chinese history.

Many Chinese use bicycles or walk with a shoulder pole to carry their tofu to the nearest market. Some leave home as early as 5:00 in the morning and walk for 2 hours. Today,

© Copyright Soyinfo Center 2013

mass-produced tofu in China is driving village tofu makers out of business.

Freshness is tofu's strength, but also its weakness. "Tofu has a short shelf life and cannot be taken on longer journeys. Even the highly pungent preserved bean curd needs to be eaten fresh. This bean curd, with its forbidding coloring and pungent aroma, can only be found in Nanjing. This brown, smoked bean curd is a "dry" variety with a special, and no less enticing smell."

To make pungent black tofu, the beans are ground in a mechanical grinder, the soya mixture is first placed in a U-shaped rattan mold, immersed in a large pot, then marinated in a special sauce (made from a centuries-old recipe including anise, cinnamon, peppercorn, and black sesame seeds, in wide-mouth earthenware vats, 3 feet in diameter) to produce its unique color and flavor. This tofu is part of the famous Qinghai cuisine of Nanjing, named after the Qinghai River. To preserve its unique flavor, it must be steamed before it is rinsed. Aficionados of pungent black tofu "agree with most visitors that its bold smell evokes the odor of football [soccer] shirts after a tough game." Continued.

12353. Weed, Susun S. 2001. New menopausal years: The wise woman way. Woodstock, New York: Ash Tree Publishing. xxiii + 280 p. Dec. Illust. Index. 22 cm. [102* ref]

• ***Summary:*** Soy is discussed throughout this book but sources are rarely cited. When they are cited, we insert them below. For heavy bleeding (flooding) during the menopausal years: To nourish and tonify, avoid tofu, soy drinks, and soy protein powders (p. 9-10). For uterine fibroids: Consume lignans, which are anti-estrogenic phytoestrogens, found in all whole grains and beans–including soy (p. 15). Building better bones: Exercise regularly, eat calcium-rich foods, and avoid calcium-leaching foods such as soy "milk," tofu, coffee, alcohol, and white flour products (p. 24). Calcium: Caution–"Unfermented soy (e.g. tofu) is especially detrimental to bone health being protein-rich, naturally deficient in calcium, and a calcium antagonist to boot (p. 28). Beware of calcium antagonists, foods that interfere with calcium utilization. Avoid consistent use of unfermented soy products, including tofu, soy beverages, and soy burgers (p. 29; see p. 163).

Phytosterolic, phytoestrogenic foods: Whole grains and beans are good sources. "Caution: Beans must be cooked or fermented to remove anti-nutritional substances. Tofu and soy 'milk' are not recommended" (p. 70).

Red clover has ten times more phytoestrogens than soy, as well as much more bone-building minerals, such as calcium and magnesium (p. 71). Sea vegetables are second only to flax in concentration of lignans. Seaweeds, not soy, are the real secret of health in the Japanese diet (p. 72). "The phytoestrogens in *dong quai,* like those in soy, promote the growth of cancer cells in petri dishes" (p. 73). Phytoestrogenic herbs: Fermented soy products (miso, tamari, tempeh), ground flax seeds, whole grains, etc. are rich in hormonal precursors and phytoestrogens. Use daily to ease menopausal symptoms, prevent cancer, and lower heart disease risk (p. 94). Lack of vitamin B-12 doubles the risk of severe depression for older women; tofu and soy beverages interfere with its absorption (Fallon 1999) (p. 114).

Preventing breast cancer: 75% of all breast cancers occur in women over age 50. Reduce use of seed oils, such as soy oil. For each 5 gm of polyunsaturated fat (from vegetable oils), risk of breast cancer rose by 70% (Wolk 1997 [sic, 1998]) (p. 145). Eat more beans: "There is a relationship between the large amount of *fermented* soy products (miso and tamari) in the Japanese diet and low incidence of breast cancer. But no relationship has ever been shown between the consumption of processed, fake, imitation soy foods, and breast cancer reduction. Soy beverage is used moderately, or not at all, depending on the specific Asian country" (p. 146).

Herbal allies: Red clover is everything you thought soy would be with none of soy's drawbacks. It contributes to bone health, normalizes the thyroid, and prevents and counters breast cancer. "So do miso and tamari, but not other soy foods. Red clover contains more active phytoestrogens in greater quantity than soy... Red clover contains all four of the major estrogenic isoflavones; soy has only two of them. A cup of red clover infusion (not tea) contains ten times more phytoestrogens than a cup of soy beverage, is richer in calcium, has less calories, and contains no added sugars" (p. 161).

The section titled "Soy" (p. 163-64) praises fermented soy foods (miso, tamari, tempeh, natto) but is quite critical of tofu, soy milk, and "fake soy foods" (burgers, hot dogs, soy cheese, etc.). Soy can reduce hot flashes and prevent heart disease; fermented soy foods can protect against breast cancer. Soy is not a good source of calcium and it is deficient in fats needed for healthy brain/memory functioning. "Soy protein isolate, textured vegetable protein, isolated isoflavones–processed soy foods come in more forms than I can list. I eat miso and tamari freely, tofu and tempeh occasionally, and other soy products not at all. Dosage: 50-200 grams of isoflavones per day, preferably from food. Caution: Excess soy can cause liver damage and is said to feminize men. Soy may be difficult to digest, may cause allergic reactions."

Interstitial cystitis: Tofu may cause problems (Ford 1999).

Heart healthy: Soy, whole grains, vitamin E (from foods), essential fatty acids, and seaweeds are helpful (p. 210).

Osteoporosis risk factors: Being a vegetarian or vegan who eats a lot of tofu or soy beverage (p. 218). "Eliminate soy products except tamari and miso. (Unfermented soy prevents you from utilizing calcium.)" (p. 220).

Aching joints: A tofu poultice may help (p. 229).

© Copyright Soyinfo Center 2013

Vitamins and minerals for the menopausal years: Vitamin B-12, calcium, and iron are depleted by unfermented soy products (p. 248, 250-51).

Note: The author does not cite a single scientific publication to support her many criticisms of soyfoods. In fact, the scientific literature does not support her criticisms. It is well known that the author is an admirer of Sally Fallon. Address: P.O. Box 64, Woodstock, New York 12498-0064.

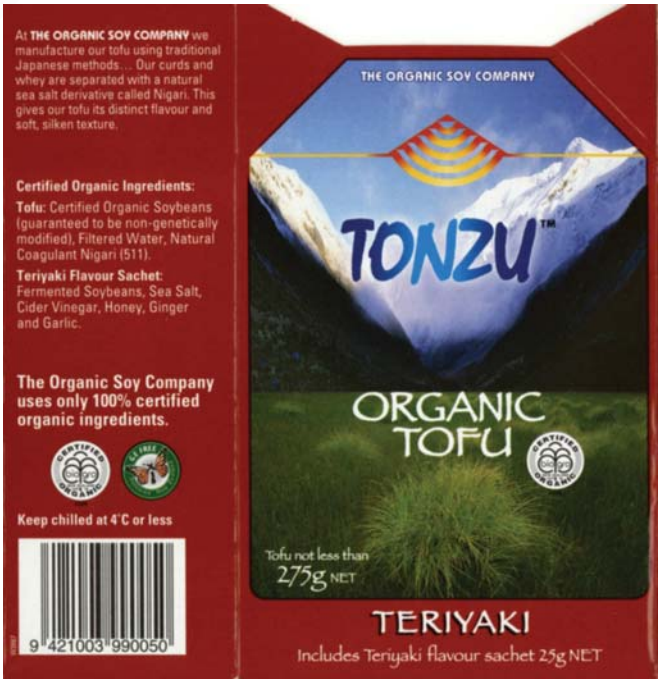
Market and technology trends. Pricing trends. Competitive analysis. Competitive structure. Market share analysis. Product analysis. Recommendations and evaluation. Meat analogs market. Tofu market. Tempeh market.

12355. Hutabarat, L.S.; Greenfield, H.; Mulholland, M. 2001. Isoflavones and coumestrol in soybeans and soybean products from Australia and Indonesia. *J. of Food Composition and Analysis* 14:43-58. *
• ***Summary:*** Gives levels of daidzein, genistein, and coumestrol for the following soybeans and commercial soyfood products: Soybeans (USA, Indonesia, Australia: McKenzie's, Bowyer Riverina NSW), Fresh soybeans [edamame] (Indonesia, Imported from China), Canned soybeans (Australia), Soymilk products Australia (So-Good, So-Good lite, Good Life, Soy drinks No Frills, Soy drink Sungold, Vitalife Natural foods, Vitasoy Vitasoy Int., Natures, So Natural, Soya drink, Instant soy powder), Soymilk from Indonesia (Susu Kedalai Mony, Soya bean milk, Susu Kedalai traditional), Tofu products from Australia (Hard, Silken, Smoked, Firm, with tempeh, Cutlets, Nigari, Organic), Tofu from Indonesia (Traditional, Silken, Tahu Tau Kwa, Skake).

12356. **Product Name:** Pizza Ravioli with Tofu.
Manufacturer's Name: Rising Moon Organics.
Manufacturer's Address: 1695 Elkay Drive, Eugene, OR 97404. Phone: (541) 461-1122.
Date of Introduction: 2001.
Ingredients: Pasta: Organic semolina, water, sea salt, organic turmeric. Filling: Organic tofu (organic soybeans, filtered water, nigari), organic carrots, organic dried tomatoes, organic lemon juice, organic potato flakes, organic garlic, sea salt, organic onion, organic parsley.
Wt/Vol., Packaging, Price: 8 oz (227 gm) plastic tray with sealed lid. Retails for $3.59–$3.99 in Oregon (2003/12).
How Stored: Frozen.
New Product–Documentation: Talk with Kirk Giudici of Rising Moon. 2003. Dec. 19. This product was renamed in 2001. It is made with organic tofu. Label sent by Kirk. 2003. Dec. 22. 4 by 4.5 inches. Self-adhesive. Front panel: Black and yellow on red. Logo: Rising Moon Organics with illustration of half moon. USDA Organic logo. "100% organic. Lowfat. Vegan." Back panel: "Proponents of the ravioli revolution" Tells of the journal of Michaelangelo Gitoni, Kirk's great grandcousin, who sailed from Italy to North America in 1875. "The story tells how the daring and eccentric Michaelangelo created a Pizza Ravioli with tofu." Note: This story is pure fantasy. "Cooking instructions: Never, never cook ravioli in rapidly boiling water. Always bring water to a boil first. Lower heat and gently place frozen ravioli in pot. Let simmer for 8-10 minutes, stirring occasionally until they float and look pillowy. [Remove with a slotted spoon. Let the boiling down cool before pouring it down the drain lest you damage your plumbing]. Toss with olive oil or serve with your favorite Rising Moon sauce." Talk with Kirk. 2004. Jan. 12. The palm with a spiral drawn on it has no significance. Most typical ravioli today contain cheese; traditionally, many contained meat (such as sausage) and cheese.

12357. **Product Name:** Tonzu Organic Tofu [Teriyaki].
Manufacturer's Name: The Organic Soy Company, Ltd.
Manufacturer's Address: Unit A, 2 Corban Ave., Henderson, Waitakere City, Auckland 0612, New Zealand.
Date of Introduction: 2001.
Ingredients: Certified organic soybeans (guaranteed to be non-genetically modified), filtered water, natural coagulant nigari (511). Teriyaki flavour sachet: Fermented soy beans, sea salt, cider vinegar, honey, ginger, garlic.
Wt/Vol., Packaging, Price: 275 gm, vacuum packed inside paperboard box.
How Stored: Refrigerate at 4ºC or less.



© Copyright Soyinfo Center 2013

New Product–Documentation: Label sent by Elizabeth Chalmers, owner. 2007. Jan. 22. The product was introduced by this company in 1996, but it was first sold in this paperboard box in 2001. They started using the Tonzu brand name in 2002. Color photo of snowy mountains beyond a deep green valley, on deep blue background. Superb label design. GE [Genetically Engineered] Free logo. Certified Organic logo.

12358. **Product Name:** Zenzo Organic Burger Patties.
Manufacturer's Name: The Organic Soy Company, Ltd.
Manufacturer's Address: Unit A, 2 Corban Ave., Henderson, Waitakere City, Auckland 0612, New Zealand.
Date of Introduction: 2001.
Ingredients: Certified organic ingredients: Soybeans, onions, palm kernel shortening, rice flour, pea flour, sugar, salt, spices, nigari.
Wt/Vol., Packaging, Price: 220 gm, vacuum packed inside paperboard box. 4 x vegetarian patties.
How Stored: Refrigerate at 4ºC or less.
New Product–Documentation: Label sent by Elizabeth Chalmers, owner. 2007. Jan. 22. The product was introduced by this company in 2001, but it was first sold in this paperboard box in 2006. They started using the Zenzo brand name (for second generation soy products) in 2002. 4 by 4 by 1½ inches. Color photo of waves, surf, and ocean under a blue sky, beyond sand, green grass and a few yellow flowers, on a green background. Superb label design. Certified Organic logo. On side panel: "Consume within 24 hours once opened. Can be frozen." On one side is a list, with each item followed by a white box inside of which is a red check (= yes): Vegetarian. Vegan. Dairy free. Gluten free. Cholesterol free. Certified organic. High protein. High energy.

Books. 144 p. Illust. (color). Index. 25 x 19 cm.
• ***Summary:*** This is a beautiful and strange book, designed and produced by Quintet Publishing Ltd. (London). Beautiful in that almost every other page is a stylish full-color photo of a recipe. Strange in that: (1) Tofu is probably the most common soy ingredient used, yet it does not even appear in the index. Nor does tempeh which is also called for. Yet miso is in the index. (2) A number of the soyfood terms are bizarre and unconventional–such as "beancurd pouches" [abura-age or deep-fried tofu pouches], "sticky beans (natto)." (3) On the inside front cover, the book's title is given as "The Tofu for Health Cookbook."

Contents: Introduction: Nutrition and health, lactose (dairy intolerance), prevention against heart disease, prevention against cancer, prevention of other disorders. How to use this book. Glossary of soyfoods and other ingredients. Basic recipes. 1. Soups and stews. 2. Salads and appetizers. 3. Main dishes. 4. Snacks and side dishes. 5. Desserts.

This book is not vegetarian; some recipes call for beef, pork, chicken, fish, etc.–but none call for dairy products.

12367. Hepinstall, Hi So Shin. 2001. Growing up in a Korean kitchen: A cookbook. Berkeley, California: Ten Speed Press. 254 p. Illust. Index. 26 cm.
• ***Summary:*** The best book seen to date for information and recipes on soyfoods in Korea. The author grew up in Cheongju, South Korea, in her ancestral home. Families made sauces in earthenware crocks (p. 7). A list of ingredients with descriptions includes: Bean curd (Tubu [tofu]). Beans, dried (K'ong, incl. yellow and black soybeans, mung beans and red [azuki] beans). Koch'ujang (Korean hot red pepper paste [with soybeans]). Kudzu (Ch'ik). Meju (Korean fermented soybean paste block [soybean koji]). Piji (Bean curd dregs [okara]). Red bean paste (P'at komul). Soy sauce (Kanjang). Soybean powder (K'ong karu; a yellow powder sold in 1-lb plastic bags). Soybean sprouts (K'ong namul). Toenjang (Korean fermented soybean paste).

Essential sauces and pastes: Recipe for: "Homemade soy sauce and fermented soybean paste: Kanjang and toenjang." It makes 10 gallons and takes about 2 months to prepare. Unusual ingredients include: 3 pieces oak wood charcoal, 1 gallon white grain syrup (choch'ung), 10 toasted jujubes, and 5 dried hot red peppers. For about 60 days, let the crock stand in the open without a lid; cover when it rains. At the end of 60 days the mash is filtered through a bamboo basket lined with a fine-mesh cloth into a crock to yield two products: The fermented soybean paste (toenjang) remains in the strainer, whereas the soy sauce filters through into the crock. Store the paste in a sterilized crock; sprinkle a thin layer of coarse salt on top. "Pour the soy sauce liquid into a caldron, bring to a boil, and allow to simmer over low heat until it is reduced to one-third of its original volume." Adjust saltiness. The paste and the sauce or now ready to be aged, but we are not told for how long.

Soy sauce at this stage (unaged) is called *ch'ongjang* (clear soy sauce) or *Choson* kanjang (Korean soy sauce). A plain and somewhat salty brown sauce, it is used mostly in base seasonings and clear soups. To make *chin kanjang,* a superior thin, syrupy, jet-black soy sauce, similar to the dark soy sauce sold in today's markets, submerge a large-mesh cloth pouch containing black soybeans, p'yogo mushrooms, and strips of kelp (*Miyok*) in the clear, unaged soy sauce and simmer over low heat for about an hour. The longer it is aged, the mellower it becomes, and the more intense the flavor.

Homemade hot red pepper paste (*Koch'ujang,* with 1 cup fine meju powder and ½ cup soy sauce). Instant fermented soybean paste (*Makjang;* uses 5 cups powdered meju and takes 10 days to mature). Vinegar soy sauce (*Ch'o kanjang*). T'ang soybean paste (*T'anggukjang;* "the best tasting soybean paste among all toenjang). Fermented soybean paste with garlic and bean curd (*Ssamjang;* "Probably the tastiest soybean paste made in the Korean kitchen," p. 32).

Main dishes: Five grain rice (*Ogkpap or Chapgokbap,* with ½ cup dried black soybeans, p. 41. Koreans traditionally eat this dish on the 15th day of the 1st month of the lunar year). Soybean sprouts with steamed rice (*K'ongnamulbap,* p. 44). Ceremonial soup (*T'ang,* with medium firm tofu, p. 62). Seaweed soup (*Miyokguk,* with tofu, p. 65). Kimchi soup (*Kimchiguk,* with tofu and soybean sprouts, p. 67). Soybean porridge (*K'ongjuk,* with 1 cup soybean powder, p. 78). Noodles in chilled soybean milk (*K'ong kuksu,* with 1 quart soy milk, p. 86). Stuffed dumplings (*Mandu,* with medium-firm tofu, p. 90-91). Soy sauce kimchi (*Chang kimchi,* p. 103).

Side dishes: Seasoned soybean sprouts (*K'ong namul,* p. 122, incl. Chilled soybean sprouts, and Soybean sprout soup). Sauteed cabbage kimchi with beancurd and pork (p. 130). Bean curd and vegetable stew with fermented soybean paste (*Tubu toenjang tchigae,* p. 138). Bean curd and vegetable hot pot (p. 152). Soybean pancakes (p. 163). Stuffed pan-fried bean curd (p. 167). Stuffed pan-fried p'yogo mushrooms (with bean curd, p. 168). Stuffed pan-fried peppers (with bean curd, p. 169).

More tofu recipes are on pages 170, 171, 172, 196-97, 199, 200, 204-05, 217. Many recipes call for kelp, kim (laver, nori) or seaweed (see index). Address: Washington, DC.

12368. Hsiung, Deh-Ta. 2001. The Chinese kitchen. New York, NY: St. Martin's Press. 240 p. Foreword by Ken Hom. Illust. (color). 29 cm. [30 ref]
• ***Summary:*** This book focuses on ingredients and essential kitchen tools used in Chinese cooking. For each it gives all or most of the following: Name romanized in Mandarin

© Copyright Soyinfo Center 2013

Chinese and Chinese characters. A glossy color photo of the item. A basic description. Appearance and taste. Method of manufacture. Buying and storing. Culinary uses. 1-2 recipes. The many color photos are very useful, but the index is hard to use

Soy related: Black bean sauce recipe (p. 33). Soy (soy sauce; *jiang you,* p. 64-67; Recipes are Soy chicken and Soy duck. Mushroom soy sauce is a Cantonese specialty. Chili soy sauce is sold in small bottles).

Seasonings section: Oyster sauce (*haoyou,* p. 79. Soy sauce is a typical ingredient).

Salted black beans (*douchi,* p. 88-89. "They are very popular all over China, especially in rural households in the South." They are also the oldest recorded soy food in Chinese history, and the ancestor of soy sauce. Indeed the water in which salted black beans has been soaked is often used as a substitute for soy sauce by low-income people, to save money. To make douchi: Boil black soybeans until soft, then soak in water overnight. Steam them for 3 hours the next morning. Inoculate them with *Aspergillus oryzae* mold and ferment for 15-21 days. Then cover beans with a brine solution and alcohol, and allow to mature for at least six months. Then spread them out to dry in the sun. Steam them again until soft and spread in the sun to dry. Repeat the last step one more time. The product is, at last, ready to use).

Black bean sauce (*chizhiang,* p. 90-91. "I have a strong suspicion that commercial black bean sauce {liquidized, salted black beans seasoned with soy sauce, salt, sugar and spice} is a Hong Kong invention concocted mainly for the convenience of Westerners. I cannot remember ever seeing it in China, nor can I find any mention of its existence in any Chinese publication, past or present." "Commercial black bean sauce is less aromatic that the fresh paste one makes oneself... Some varieties also include added orange peel, ginger, chilies or garlic." A number of different brands are available. The author uses this only for convenience. "One of the most popular variations is black bean and garlic sauce." Recipes include: Steamed spareribs with black bean sauce).

Yellow bean sauce (*huang jiang,* p. 92-93. "Sometimes labeled brown bean sauce or ground bean sauce {*mochi jiang*}, this is the soybean paste made from crushed or ground, salted and fermented yellow soybeans, which are sweeter and less salty than black beans." Spices and other seasonings can be added to this basic bean sauce giving many varieties. In different regions of China, seasonings and spices are added in different proportions. Hoi Sin sauce {p. 94} is one example. Guilin chili sauce {p. 95} and Peking Duck sauce {p. 93} are others. To make: Soak soybeans for 16 hours. Then steam until soft. Ferment beans for about 5 days, stirring and turning every other day. Blend into beans salt, sweet glutinous rice wine, and dark brown sugar. Fill a pottery jar with them–not too tightly, nor too loosely. Seal opening tightly then let jar stand for 2 days. Turn jar upside down in a cool, dry place and ferment beans for 3 more months. The beans are now ready to be used as is, or to be ground and blended with additional seasonings).

Hoi Sin Sauce (*haixian jiang* in Mandarin or *hoisin jaing* in Cantonese, p. 95. This very popular Cantonese specialty, also known as "barbecue sauce," has become almost as popular as soy sauce in most households. To make: Season yellow soybeans with sugar, vinegar, salt, chili, garlic, sesame oil, and red coloring; thicken with flour and water. The author believes that Hoi Sin sauce should not be used with Peking Duck).

Guilin Chili sauce (*Guilin lajiao jiang,* p. 95. Guilin is the capital of Guangxi, located just north of Guangdong {Canton}. To make: Mix fermented and salted beans with fresh red chilies. Then stir in the lesser ingredients: garlic, salt, sugar, and starch. The author's favorite authentic brand, Mount Elephant, is sold in a rustic brown earthenware pot. Recipe: Chicken cubes with chili bean sauce).

Chu Hou bean paste (*chuhou jiang,* p. 96. To make: Use yellow soybeans, wheat flour, sugar, lard or vegetable oil, and sesame. Recipe: Chu Hou chicken).

Sweet bean paste (*dousha,* p. 97. Although there are red and black sweet bean pastes, they are both made from red beans [azuki beans]. "I discovered this unexpected fact only very recently, while researching this book." To make basic red bean paste: Gently boil red [azuki] beans in water until soft. Grind to a pulp, then clean and strain them to get rid of the hull / skin; filter and press. To this basic unsweetened paste, mix in crushed rock sugar. For "sweet black bean paste, add additional sugar with lard or vegetable oil, then heat while stirring until the color turns black. Essence of fragrant flowers, such as roses or sweet-scented osmanthus {*Osmanthus fragrans;* cassia} is usually blended with the black paste, which is shiny black. Sweet bean paste is widely used as a filling for steamed buns {*baozi*}, cakes and other desserts. "In China, sweet black bean paste is far more popular than the red variety, and as a child, I always preferred the sweeter taste of the former." Recipe {served in most non-Cantonese restaurants}: Red bean paste pancakes).

Chili bean paste (*toban jiang,* p. 98. This is distinguished from other thick seasonings in that is made from broad beans rather than soybeans. The most delicious product comes from Pixian County, in the Chengdu Plains near Chengdu–the capital of Sichuan province. Recipe: Home-style braised bean curd).

Fermented bean curd (*doufu nai,* literally "bean-curd milk," p. 102-03. It has often been compared with a strong cheese and is definitely an acquired taste: "you either love it {as does almost everyone in China} or hate it {as does almost everyone else}. But everyone loves it when it is disguised as a seasoning. Also called *jiang doufu.* A legend of its origin states that two immortals told a street bean-curd seller how to make it, starting with molded bean curd. "Since the 15th century Fengdu fermented bean curd has held an excellent reputation." Today the two leading brands are The

© Copyright Soyinfo Center 2013

Immortals and The Two Immortals. To make it: (1) Make bean curd [tofu]. (2) Lay cubes of bean curd on beds of rice straw for about 5 days in spring or 7 days in winter. (3) Dry the mouldy [moldy] bean curd in the sun, then marinate with salt, sorghum spirit and spices. Mature in brine in sealed earthenware urns for at least 6 months. The two basic types are red and white. The red type, which has the milder flavor of the two, has ground red rice added to it instead of spice. In China, it is most widely consumed for breakfast with rice congee. Recipes: Pork chops with red fermented bean curd. Sichuan-style fried green beans).

Vegetables section: Soybean sprouts (*Huang douya, Glycine hispida,* p. 150-51. Soybean sprouts are much more widely used in China than mung bean sprouts. For how to grow at home, see p. 148. Soybean sprouts are almost twice as large as mung bean sprouts both in length and diameter. Soybean sprouts are the main ingredient in Vegetarian stock {p. 71}. Neither soybeans nor their sprouts should ever be eaten raw. Recipes: Soybean sprouts salad {with parboiled soybeans}. Assorted vegetable soup).

Note. This is the earliest English-language document seen (Jan. 2013) that uses the term "Huang douya" (regardless of capitalization) to refer to soy sprouts.

Under Lotus root (p. 144) is a recipe for Braised pork with lotus root that calls for "dried bean curd sticks."

Under Ginkgo nut (p. 167) is a recipe for Vegetarian casserole (A slightly simplified version of Buddha's Delight, p. 193) that calls for "3 8 inch long pieces (1 oz.) dried bean curd sticks, soaked."

Note 1. This is the earliest English-language document seen (June 2011) that uses the term "dried bean curd skin sticks" to refer to dried yuba sticks. The recipe intends to call for "Three 8-inch long dried bean curd sticks." Later, we are instructed to "Cut the bean curd sticks into short sections,..."

Preserved and processed foods section: Pickles (*Jiang cai,* p. 185, are vegetables pickled in soy sauce-based hydrolysate).

Bean curd (tofu, doufu, p. 196-99. Bean curd was invented in China "and is regarded as the country's national dish..." Proof exists that bean curd, made from soybeans, was sold in markets during the Tang dynasty {618-907}. Until the 17th century, bean curd was eaten exclusively by the poor until Kung Xi {1662-1722}, a Qing dynasty emperor, "discovered it while visiting Suzhou in Jiangsu province when he ventured out incognito to mingle with the people in the streets. When he returned to Peking, the Emperor ordered the chefs of the Palace kitchen to produce bean curd dishes. Overnight, humble bean curd became nobleman's fare and is now popular worldwide." It is off-white in color. Under "Medicinal uses: The nutritional benefits of bean curd cannot be exaggerated." Free of cholesterol, it is ideal for combating heart disease and high blood pressure. It is also extremely easy to digest, so it is very good for infants, the elderly and invalids. Recipe: Sichuan spicy bean curd {*Ma po doufu*}. Fish and bean curd casserole. Stir-fried shrimp with bean curd. Stuffed bean curd {Popular in Canton and with the Hakka people}).

Deep-fried bean curd (*youzha doufu,* p. 200. Sold in the form of small cubes, large squares, or triangles. Used in soups, stews, casseroles, braised dishes or stuffed triangles).

Pressed bean curd (*doufu-gan,* p. 201. After being pressed it is typically seasoned with soy sauce and a little five-spice, or star anise, or cinnamon).

Dried bean curd skins (*fuzhu, fupi,* p. 202-03. One kind is a thin flat sheet; the other is rolled into a stick. The sticks require much more soaking before use–several hours or overnight. Recipes: Bean curd skin and asparagus soup. Vegetarian bean curd skin roll).

Tofu (in recipes only): p. 75, 139, 189.

Non-soy: Gluten (p. 34). Cooking oils (p. 58; soy oil is not mentioned). Sesame seed oil (p. 60). Sesame paste (p. 61). Peanut (p. 164-65).

Note 2. This book was first published in Great Britain in 1999 by Kyle Cathie Limited. This is the first U.S. edition. Address: Author and chef, London.

12369. Hsiung, Deh-Ta; Simonds, Nina. 2001. Food of China. Sydney, NSW, Australia: Bay Books, an imprint of Murdoch Books Pty Ltd. 296 p. Illust. (color photos by Jason Lowe). Index. 31 cm. [25 ref]

• ***Summary:*** A gorgeous book with many fine color photos on glossy paper. One section titled "Tofu" (p. 184-91) has recipes for: Braised tofu with Chinese mushrooms. Fermented tofu with Asian greens. Ma Po tofu ("A quintessential Sichuanese dish). Braised tofu. Soft tofu with chilli and spring onion.

The next section, titled "Soy" (p. 192-95) discusses: Introduction. Soy sauce. Tofu. Tofu products: Fermented tofu, mouldy tofu, tofu skin [yuba]. Recipes: Northern-style tofu. Stuffed tofu. Stir-fried tofu in yellow bean sauce.

© Copyright Soyinfo Center 2013

Braised gluten. Mock duck (made with gluten). Buddha's delight (vegetarian, with gluten and tofu). Bean sprouts stir-fry ("Bean sprouts can mean either soya bean sprouts or mung bean sprouts and both are used in this recipe. Soya bean sprouts are slightly bigger and more robust for cooking, as well as being more commonly found in China").

Fermented tofu is mentioned on pages 9, 164 (1 tablespoon red fermented tofu), 167, 193. More soy recipes: Tofu rolls (with yuba. An alternative to spring rolls, often served as dim sum, p. 35). Salted soya bean pods ([green vegetable soybeans], p. 53). Tofu and spinach soup (p. 60). Hot-and-sour soup (with tofu, p. 68). Steamed mussels with black bean sauce (p. 76). Clams in yellow bean sauce (p. 76). Scallops with black bean sauce (p. 114). Soy chicken (with dark soy sauce, p. 140). Shanghai soy duck (similar to Cantonese soy chicken, with light soy sauce and dark soy sauce, p. 148). Beef with capsicum and black bean sauce (p. 172). Stuffed bitter melon in black bean sauce (p. 219). Chinese broccoli with soy sauce (p. 220). Soy and vinegar dipping sauce (p. 282). Soy, vinegar and chilli dipping sauce (p. 282). Soy, chilli and sesame dipping sauce (p. 282).

Contains a good glossary of Chinese food and cooking (p. 288-91) which includes entries for: Bean sprouts (incl. soya bean sprouts). Chilli bean paste: Substitute Hot or Sichuan bean pastes. Fermented tofu, which is sometimes called "preserved tofu or tofu cheese and is used as a condiment or flavoring." Hoisin sauce. Master sauce (incl. soy sauce). Salted, fermented black beans. Soy sauce. Soya beans (fresh, "cooked in their fuzzy pods and served as a snack." Or dried, yellow or black). Tofu (called *doufu* in China). Tofu puffs ("Deep-fried squares of tofu, crispy on the outside and spongy in the middle." Can be frozen). Tofu skins [yuba]. Yellow bean sauce (It is actually brown in color).

Photos show: Kung Wo Bean Curd factory in Hong Kong. A soy sauce factory and its canned "Premium Soy Sauce."

12370. Ishige, Naomichi. 2001. The history and culture of Japanese food. London, New York, Bahrain: Kegan Paul. x + 273 p. Illust. Maps. No index. 24 cm. [59 ref. Eng]
• ***Summary:*** This book is crippled by the lack of an index. Moreover, the sources of most of the interesting material in the text are not cited. Otherwise it is very well researched and well written.

Contents: Introduction–The historical framework. Part I: The dietary history of Japan. 1. The prehistoric era: The Paleolithic age, the advent of earthenware, Jômon society and dietary culture. 2. Establishment of a rice-growing society: A crop held in special regard, the dissemination and development of rice, rice cooking, sake brewing, fermented fish and flavourings. 3. The formative period of Japanese dietary culture: Historical setting, the taboo on meat eating, the lack of a dairy industry, annual observances and rites of passage, place settings and table settings, cooking and banquet styles, the roles of the monasteries, the popularization of noodles.

4. The age of change: Historical setting, the diffusion of tea, the impact of the 'Southern Barbarians' (*nanban;* first came the Portuguese and Spaniards, Catholics from Iberia, then the Dutch and English, Protestants from northwest Europe called *kômôjin* {"redheads"} to distinguish them from the Iberians, Saint Francis Xavier, introduction of meat eating {beef} by Catholics by 1557 in the town of Oita in northwest Kyushu, expansion of meat eating by non-Christians in Nagasaki and Hirado island {northeast Kyushu}, in 1612 Christianity and meat eating are prohibited by the Tokugawa shogunate but the Chinese colony in Nagasaki is exempted, Dutch traders are the only Europeans allowed to remain in Japan after the country is closed but they are isolated on a tiny island in Nagasaki harbor and barred from contact with ordinary citizens, dishes with nanban influence include fried tofu patties {called *ganmodoki* in the east of Japan, or *hirôsu* or *hiryôzu* in the west}, tempura, nanban confectionary {such as *kasutera*} is especially popular, introduction of new crops by Europeans {incl. sweet potato, two types of pumpkin squash, cayenne pepper, kidney beans, peanuts}), formation of a new style (banquet-style meals {*honzen ryôri*}, *kaiseki*), change in the frequency of meals (from two to three).

Note 1. This is the earliest (and only) English-language document seen (April 2013) that contains the word *hirôso;* it refers to Kyoto-style deep-fried tofu balls.

5. The maturing of traditional Japanese cuisine: Historical setting town and country, the spread of soy sauce, the emergence of the restaurant, snack shops, books on cooking and restaurants, the Ainu, the Ryukyu Islanders. 6. Changes in the modern age: Historical setting, the resumption of meat eating, milk and dairy products, entry of foreign foods, zenith and nadir, new meal patterns, integration of foreign foods–a model.

Part II: The dietary culture of the Japanese. 7. At the table: Gohan–framework of the meal, the rise of the table, the tabletop as landscape, chopsticks and table manners, etiquette–as you like it. 8. In the kitchen: The secularization of fire and water, from wood fire to electric rice cooker, the knife–a sword in the kitchen, restaurants–the public kitchen. 9. On the menu: Soup and umami flavouring. Sashimi–Cuisine that isn't cooked, Sushi–from preserved food to fast food, sukiyaki and nabemono, tofu and nattô–meat for vegetarians, vegetarian temple food, tempura and oil, noodles and regional tastes, pickled and preserved seafood, mochi, confectionery and tea, the dynamics of sake and tea.

Teriyaki developed during the Edo / Tokugawa period (1600-1867) (p. 116; However no citation for the source of this information is given).

During the Edo period, most commoners living in Japan's cities ate plain and repetitive meals. In Edo (later

© Copyright Soyinfo Center 2013

Tokyo) most had a breakfast of rice, miso soup, and pickles; for lunch and dinner they ate approximately the same thing "with the addition of one dish of simmered vegetables or tofu, or simmered or grilled fish" (p. 113). Address: National Museum of Ethnology, Osaka, Japan.

12371. Jaivin, Linda. 2001. The monkey and the dragon: a true story about friendship, music, politics and life on the edge. Melbourne, VIC, Australia: Text Publishing Co. 438 p. Illust. Index. 24 cm.
• ***Summary:*** About the author's friendship with Taiwanese rock star Hou Dejian. Page 398: "Some things about Taipei were exactly the same as when I'd lived there twenty years earlier: the smells wafting from the ubiquitous snack carts offering egg-wrapped pancakes with chilli sauce, the aptly named 'stinky beancurd' and betelnut wrapped in vine leaves. Open-fronted restaurants served up steaming bowls of soy milk, sweet or savoury, as well as bubbling soups of puffed beancurd [probably fried tofu squares] and stewed meats." Address: Sydney, Australia.

12372. Kang, In-hui. 2001. Kankoku shoku bunkashi: genshi kara gendai made [History of Korean food culture: from the past to the present]. Tokyo: Fujiwara Shoten. [Jap]*

12373. Lemlin, Jeanne. 2001. Vegetarian classics: 300 essential recipes for every course and every meal. New York, NY: HarperCollins. ix + 294 p. 25 cm. Index. Reprinted in 2003 by Quill (New York).
• ***Summary:*** One chapter is titled "Tofu and tempeh" (p. 189-202). Soy related recipes include: Edamame (p. 41). Miso (p. 10-11, 55-56, 73-74).

Jeanne Lemlin, who has been writing about vegetarian food for more than a decade, has won a prestigious James Beard Cookbook Award. Address: Great Barrington, Massachusetts.

12374. Marcus, Erik. 2001. Vegan: The new ethics of eating. Revised ed. Ithaca, New York: McBooks Press. xi + 211 p. Illust. Index. 23 cm. [432 endnotes*]
• ***Summary:*** Very well researched and written. Widely considered to be the best current introduction to Veganism. Contents: Foreword, by Howard Lyman. Introduction. I. Part I: To your health. 1. The beat goes on. 2. Cutting your cancer risks. 3. Eat well to weigh less. 4. The perfect food isn't. 5. How now, mad cow. II. Part II: The truth about food animals. 6. Rescued! 7. Chickens and eggs. 8. Pigs. 9. Milk and beef. 10. The killing business. III. Part III: Beyond the dinner table. 11. World hunger. 12. American rangeland. 13. Awakening. Appendix A: The new four food groups.

The New Four Food Groups (p. 194-95) are vegetables, whole grains, fruit, and legumes. Legumes includes soy milk, tempeh, texturized vegetable protein, and tofu.

On the cover is written boldly: "Urgent. What we eat has devastating effects. Heal our planet and your body."

The chapter on mad cow disease gives a brief but good history of the problem. In Jan. 1997 the U.S. Foods and Drug Administration proposed regulations to prohibit the feeding of cattle parts back to food and dairy cattle. In June 1997, the proposal was passed into law. "If the resultant ban is seriously enforced, it could essentially eliminate the possibility of a British-style mad cow epidemic." However the new legislation still allows livestock producers to take risks with America's food supply by feeding other animal by-products back to farm animals. Pig and chickens have been shown to have developed spongiform diseases. Yet the new law exempts rendered pigs, chickens, horses, milk, blood, and gelatin from the ban.

British BSE researcher Stephen Dealler has tried to calculate how many Britons may actually die from Creutzfeldt-Jakob disease–the human form of mad cow disease. He has calculated 21 scenarios, each of which he considers equally likely. Fifteen of these show at least 140,000 people at high risk of developing the disease, and the six worse predict that over 32 million people in Britain have already been exposed to a potentially fatal dose. The wide range of numbers results from several unknowns: (1) The rate of transmission from infected of beef to humans that eat it; the issue of crossing the species barrier. (2) The human body's resistance to BSE prions. (3) The incubation time and distribution of the infection in humans. A closely related question is how many humans will die from spongiform encephalopathies contracted from infected animals other than cattle–such as pigs, chicken, etc.

Eric Marcus was born in 1966. Address: Vegan.com, P.O. Box 432, Albion, California 95410.

• ***Summary:*** A children's book. Address: Japan.

12376. Namkoong, Joan. 2001. Go home, cook rice: A guide to buying and cooking the fresh foods of Hawai'i. Honolulu, Hawaii: Namkoong Publishing. 104 p. Illust. (color photos by Rae Huo). Index. 28 cm. [28 ref]
• ***Summary:*** "A collection of food stories that appeared in the *Honolulu Advertiser* from 1994 to 2001 and information about food products." "Guide to buying and cooking the fresh foods of Hawai'i" (from the publisher).

The Foreword begins: "'Go home, cook rice' is what we say at the end of the day when we're heading home;..."

The section titled "Soy" (p. 67-71) begins with brief definitions of tofu, fresh soybeans [edamame], soy sprouts, miso, natto, and "fermented black beans." Then come recipes: Basic miso sauce (with "white or red miso"). Spicy soy beans (with "1 pound soybeans"). Soy bean sprouts

© Copyright Soyinfo Center 2013

(*kong na mul* in Korean, with "1 {8-ounce} package soy bean sprouts"). Page 69 titled "Soybean curd," with a sidebar of "Tofu tips" describes more soyfoods: Tofu (incl. okara and silken tofu). Aburage (thicker, denser slabs of fried tofu are called *Dau hu chien* in Vietnamese). Then we read this unusual statement: "Before a coagulant is added to form tofu, a thin skin forms on the surface of soybean milk as it stands. This skin is lifted off and allowed to dry, forming a product that has a firm, chewy texture when reconstituted in water. Known in Chinese as *fu jook* [dried yuba sticks], bean curd skin is used as an edible wrapper, and in braised and vegetarian dishes. They come in large flat sheets or in 'bamboo' sticks that are pleated."

Tempeh. Fermented bean curd (which can be red or white in color. Fermentation in rice wine and salt produces a pungent flavor). A color photo shows 3 forms of tofu: fresh tofu, aburage, and *dau hu chien* [which resembles Japanese deep-fried tofu cutlets–*atsuage / namaage*]. Then a recipe for Lemon grass tofu (Vietnamese). Page 71 discusses "Soy bean sauces" such as hoisin, bean sauce, and shoyu (made with koji). Page 72: "The flavors of soy sauces." Chinese soy sauces (tend to be saltier than Japanese shoyu). Tamari. Kecap manis. Light or sodium reduced soy sauces. Dashi soys. How to use soy sauces. This section ends with recipes for: Basic Korean sauce (with "1 cup soy sauce"). Basic teriyaki sauce (with "1 cup soy sauce, mirin, sake, raw white sugar, smashed garlic, and a piece of smashed ginger). Basic hoisin sauce (with "6 tablespoons hoisin, 2 tablespoons soy sauce, brown sugar, sesame oil, minced garlic, minced ginger, and Sriracha sauce {a Thai, Vietnamese, or Chinese hot sauce}). Address: Former *Honolulu Advertiser* food editor, Hawaii.

Address: Japan.

12378. Northrup, Christiane. 2001. The wisdom of menopause: Creating physical and emotional health and healing during the change. New York, NY: Bantam Books. xi + 589 p. Illust. Index. 28 cm. Revised and expanded in 2006.
• ***Summary:*** "This book is dedicated to the pioneering spirit embodied in the women of the baby boom generation." The stories in this book reflect authentic situations in the lives of the thousands of perimenopausal women Dr. Northrup has seen in her practice. She has "integrated advanced medical techniques with the best natural remedies, offering readers specific guidance on choosing the right approach for themselves."

In this book "Dr. Northrup once again challenges convention. 'The change' is not simply a collection of physical problems to be 'fixed'–whether with hormones or herbs–but a body-mind revolution that brings the greatest opportunity for growth since adolescence... [This] book examines the connection between menopause and a woman's emotional and spiritual life And it stresses how the choices a woman makes now–from the quality of her relationships to the quality of her diet–either secure her health and well-being for the rest of her life, or put her at future risk."

Candid and reassuring, [this book] elucidates the changes women should expect from ages 40 to 55, and how these changes can be wonderfully life-affirming. Instead dreading menopause as a time of loss, women will hear the real message their bodies are sending–that this is a time of personal empowerment and positive energy... and a time for women to break free and thrive." Contains a very positive and accurate section on the ability of soyfoods to relieve menopausal symptoms. But the benefits are dose-dependent. Discusses: Soy and menopause (p. 125). Bone loss (p. 164). Soy capsules or pills (p. 173). Soy and menopausal symptoms, dose dependency, genetic engineering (p. 179-84). Vaginal resiliency / moisture (p. 286). Alzheimer's and dementia (p. 321). Skin and wrinkles (p. 345). Breast health (p. 422). Summary (p. 548-49).

About the author: "Christiane Northrup M.D., trained at Dartmouth Medical School and Tufts New England Medical Center before cofounding the Women to Women health care center in Yarmouth, Maine... Board certified in obstetrics and gynecology, she is past president of the American Holistic Medical Association." Address: M.D. (gynecologist), Women to Women, Yarmouth, Maine.

• ***Summary:*** The contents are the same as those of the original 1997 edition. But the beautiful color photos, many of them full-page, make this a deluxe edition. Address: Los Angeles, California.

12382. Robertson, Robin. 2001. Vegetarian meat & potatoes

© Copyright Soyinfo Center 2013

cookbook. Boston, Massachusetts: The Harvard Common Press. xii + 356 p. Illust. (by Paul Hoffman). Index. 23 cm.
• ***Summary:*** Another outstanding book from Robin Robertson. From the front cover below the title: "275 hearty and healthy meat-free recipes for burgers, steaks, stews, chilis, casseroles, pot pies, curries, pizza, pasta, and other stick-to-your-ribs favorites."

The Introduction begins: "When I married him in 1971, my husband, Jon, was a 'meat and potatoes' kind of guy. He remains so today, even though he has been a vegetarian since 1986. The answer to this seeming paradox can be found in the pages of this book." Chapter 5, "Steaks, vegetarian style" (p. 123-63) is packed with "meaty" main dishes featuring seitan (home made), tempeh, tofu and yuba.

A half-page sidebar titled "All about tofu" (p. 140) gives a basic description and lists the different types.

Another sidebar titled "A brief bean bio" (p. 266) states: "The most useful and versatile bean of all is the soybean. For years, the soybean has been hailed as one of humanity's greatest nutritional treasures, because there are a number of high-protein foods derived from it, such as tofu, tempeh, and miso. Roasted soy 'nuts' and edamame, boiled fresh soybeans in the pod, are other delicious ways to enjoy soy... Beans and grains are like the 'meat and potatoes' of vegetarian cuisine. Add some steamed or stir-fried vegetables for a complete, well-balanced meal."

The word "tofu" appears on 84 pages of this book, "tamari" on 58 pages (she uses the fixed phrase "tamari or other soy sauce"), "soy sauce" on 50 pages, "seitan" on 41 pages, "tempeh" on 35 pages, "hoisin" on 15 pages, "teriyaki" on 8 pages, "yuba" on 9 pages, "soybeans" on 6 pages, "miso" on 5 pages, "soy yogurt" on 4 pages, "shoyu" on 1 page, "edamame" and "soybean" on 1 page each.

12383. Sabaté, Joan; Ratzin-Turner, Rosemary. ed. 2001. Vegetarian nutrition. Boca Raton, Florida: CRC Press. [xxiv] + 551 p. Index. 24 cm. CRC Series in Modern Nutrition. [1732 ref]
• ***Summary:*** The best scholarly book seen to date on this subject. Consists of a Prologue (by Mervyn Hardinge) plus 21 chapters, in five sections, by various authors.

This book contains extensive information on soyfoods as follows: Vitamin B-12, homocysteine, meat analogues and soya milks (p. 47). Summary of epidemiologic studies of soy / tofu intake and breast cancer risk (p. 80-81). Vegetarian diets and soy in the prevention of osteoporosis, diabetes, and neurological disorders (p. 120-21, 125). Iron and soy (p. 202-03). Guidelines to achieve an optimal ratio of essential fatty acids in the diet (p. 203; soy is rich in α-linolenic acid). Zinc, calcium and soy (p. 206). Women's reproductive function, menopausal symptoms, phytoestrogens and soy (p. 232-34, 244). Health advantages of a vegetarian diet for the elderly–and soy (p. 254-55). Vegan children, protein and soy (p. 302). Iron and soy (p. 304; "While the percentage of iron absorbed from soy may be low, the total amount of iron absorbed is adequate, because soy beans naturally contain relatively large amounts of iron" (p. 304-05)). Phytoestrogens and soy (p. 312-13). Macrobiotic diets (p. 313-15). Calcium and soy (p. 316). Vitamin B-12, miso and tempeh (p. 319-22). Iodine and soy (p. 323). Health-promoting phytochemicals beyond the traditional nutrients–soyfoods and isoflavones (p. 342-45; One table shows the isoflavone content (genistein, daidzein, and glycitein) of soybeans, roasted soyflour, roasted soynuts, TVP, tofu, tempeh, miso, and soy milk). Another shows the isoflavone content of commercial soy products by the weight of a typical serving, in descending order of isoflavone content (cooked soybeans, dry TVP, dry roasted soy nuts, tofu, soy flour, soy protein isolate, soymilk, SoyBoy Breakfast Links, soybean chips, tempeh, miso, soy cheese, Ice Bean, Green Giant Harvest Burger, soy noodles, Tofutti, soy sauce, soy oil). Protection against cancer and soy (p. 346-47). Help for menopause and bone loss (p. 347-48). Protective substances and soy foods (p. 397-98). Calcium fortified products such as soy (p. 421). Consuming a wide range of vegetable oils from intact plants–soy (p. 421). Developing a vegetarian food guide–Legumes, lentils and peas (p. 428-29; "Among legumes, the soybean possesses unique nutrient characteristics." Many food guides place soy beverages in the milk-dairy category). Table: Comparison criteria for evaluating soy and grain-based beverages (p. 430). The water efficiency of food production–and soy (p. 449; "The water intensity of animal production is much larger than the water intensity of crops. For instance, per gram dry weight, soybeans require about 0.75 liters of water" compared with about 20 liters for cattle). Note: Joan Sabaté is a man. The series editor is Ira Wolinsky, PhD, Univ. of Houston, Texas. Address: 1. Prof. of Chair, Dep. of Nutrition, and Prof. of Epidemiology, Loma Linda Univ., Loma Linda, California.

• ***Summary:*** A remarkable book! Written by a team of internationally renowned experts, it is based on the landmark, scientifically documented 25-year Okinawa Centenarian Study. Okinawans have the world's longest disability-free life expectancy. Their occurrence of heart disease is only one fifth that of Americans. Their rate of breast, ovarian, and prostate cancer is less than one quarter of American levels. And the number of centenarians per 100,000 is six times that of the USA. This is a book with plenty of solid, practical scientific advice. Address: 1. M.D., Div. of Aging, Harvard Medical School; 2. PhD, medical anthropologist and gerontologist, Asst. Prof., Okinawa Prefectural Univ.–College of Nursing; 3. M.D., PhD, cardiologist and geriatrician, Prof. Emeritus of Community Medicine, Univ. of the Ryukyus, and Prof. and Chair, Dep. of Gerontology, Okinawa International Univ.

12390. Source Family (The). 2001? The Source: Source restaurant "recipes" & Source family. Los Angeles, California. 157 + [20] p. Undated. Illust. No index. 22 cm.
• ***Summary:*** This photocopied, comb-bound book was made for Jim Baker's Source Family / community, and was never sold in bookstores. It is undated and with no copyright page. Most of the pages are numbered, but about 20 (here and there, often containing photos) are not; they were apparently inserted at the last minute. Contents: 1. The Source recipes (p. 1-17) and other family favorites (p. 18-48). 2. Alternative lifestyle choices, for the well being of body, mind and soul (p. 49-93). 3. Father / Yahowha and The Source Family: Truth behind the legends, an epic and never-ending saga (p. 94-157). All photos are courtesy of "the Source Archives." This book emphasizes on the importance of food, community, and a teacher in spiritual practice.

On the rear cover (and on p. v) is a color photo of The Source restaurant taken from across the street, above the following text: "Jim Baker opened The 'Source Restaurant' in 1969, on Sunset Blvd. One of the country's first health food restaurants. Jim's 'Spiritual Family' grew from those who worked at the Source and soon became 'The Brotherhood of the Source' and later 'The Source Family,' living communally in the Hollywood Hills. We called Jim Father, then Father Yod and later Yahowha. We sold The Source in 1974 and moved to Hawaii, where Father left his body in August of 1975. The new owners recently closed the Source doors after 31 years, bringing a Hollywood legend and tradition to an end. We are printing the 'Source Recipes' in honor of our 'Earthly Spiritual Father' and The Family that was created."

In Section 1, recipes used at The Source restaurant include: Hi protein cereal (ground fresh from whole grains and seeds not cooked–like muesli, the raw breakfast cereal). The Source dressing (a version was later sold as Cardini Lemon Herb). Ice cream. Cheese cakes. Source special. Guacamole. Vegetable salads. Entrees: Too much crunch. Magic mushroom.

Section 2 discusses: Fish (recipes for ahi / tuna and salmon). Refined foods to avoid. Good foods (brown rice, miso, tofu, nuts, sesame seeds; p. 57-58). Fasting, enemas and elimination diets (p. 65-66). Tofu (p. 74-75). Miso (p. 75-77). Raw foods.

Section 3, the life story of Jim Baker (1922-1975), mentions: His mother, Cora. The Tarzan audition in Los Angeles. Dora Baker (of France), his second wife. His birth

© Copyright Soyinfo Center 2013

on July 4 in Ohio, parents, childhood, great-grandfather, growth of interest in natural healing and foods, Paul Bragg, weight training and competitive sports, University of Chicago (Illinois), graduation from Swedish School of Massage in Chicago, first big job at the Wright plant, married the boss's daughter Margaret; they had a daughter named Peggy, opened Bakers Gym, joined the Marines in World War II, received Medal of Gallantry and Silver Star, ardent archer and champion swimmer, heavyweight wrestler, and judo expert, etc. Lived in Topanga Canyon and became a Vedantic Monk, met Elaine Baker and they were married, part of Nature Boys which lead into the Hippie movement (Jack LaLanne, Gypsy Boots). Elaine and Jim had three sons and opened two famous restaurants on Sunset Blvd. They were divorced and he married Dora, a French girl who was with him at The Old World. Dora started The Source with Jim. "He finally found His Spiritual Father in a very powerful and famous Yogi Bhajan from the East who was living and teaching in L.A. Jim became a Sikh... Jim then married Robin, who was 20 and he was 47. She supported him on all levels and was a devoted wife. Slowly the small group of people who were working at the Source started to become more of a communal and family energy. Jim went to India with the Yogi and while there realized "Neither Hindu or Sikh shall I be, for my soul is universal and free!"... Jim came back to L.A. and started to teach meditation and spiritual knowledge at the restaurant on Sundays. He became known as Father. "Most of us were living in vans or other rentals but wanted to live more communally. The Mother House was rented and this was the beginning of the Source Family. Father and Robin / Ahom lived above the Source, while the family lived at our mansion on Inverness St. (p. 98-99).

12391. Kuzmic, Vlatka. 2002. Re: Brief history of Annapurna, and work with tofu and seitan in Croatia. Letter (fax) to William Shurtleff at Soyfoods Center, Jan. 11. Followed by letter (e-mail) of 11 July 2006. 1 p. Typed, on letterhead. Followed by a brief interview later the same day.
• ***Summary:*** 1997 March–Vlatka and Miroslav "Miro" Kuzmic (later her husband) started cooking and delivering vegetarian meals to some friends and acquaintances. In order to improve the quality of the meals, they became interested in macrobiotics and tofu.

1998 Feb.–They tried to make tofu, for the first time, from soy flour as described in the book *Super Soy,* by Ruth Winter. They were not successful. So they started reading *The Great Macrobiotic Cookbook,* by Aveline Kushi (in Croatian) and studying a recipe for tofu in that book. At about the same time they asked Suzana Ciceli, a macrobiotic friend, to help them improve their tofu-making process. She gave them her recipe, but after trying it a few times, they made big changes. Suzana suggested that they grind the soybeans, cook the slurry, then press the hot soymilk from the okara. But they decided to do it in the traditional Chinese way, grinding the soybeans, pressing the cold soymilk from the okara, then cooking only the soymilk. The results–firm, Chinese-style tofu–were excellent. At first the tofu was flat and round. They discussed their achievements with their friend Gordana Sibila. She supported them and convinced them to sell tofu and seitan to their friends.

At that time Maca, and his vegetarian restaurant *Vegeterra,* became interested in tofu. But of course they wanted nice square tofu. At first they had a tofu forming box made from a plastic box that could contain about 500 gm of tofu. But this wasn't a very good idea, so their fathers came to help them. Their next forming box was made of stainless steel; it had three compartments that each held about 0.8 kg of tofu, and it had removable sides so that when the tofu was ready they would just remove the sides and have nice squares. They made a mechanical screw press (rather than using a weight) to press the tofu.

They could produce about 5 kg/day of tofu in their small kitchen located at Poljanicki Prilaz 12, 10000 Zagreb, Croatia.

1998 May–They started selling their tofu and seitan to their friends, then to their friends' friends, and soon to many other people they didn't even know. At the same time they began using the business name "Annapurna" with the tag line *"zdrava hrana.* Annapurna is the name of the second highest peak in the Himalayas–but unlike the others, which are covered with snow, it is covered with greenery and flowers. Annapurna is also an Indian goddess of food and wealth (*anna* means "food" and *purna* means "wealth"); *"zdrava hrana* means "healthy food." Their first three products, each introduced in May 1998, were Fresh Tofu, Marinated Tofu, and Fresh Seitan. Marinated Seitan was introduced a month later, and Smoked Tofu in Sept. 1998. The ingredients in their first commercial tofu were soybeans (non-organic, grown in Croatia near the city of Kutina) and refined nigari (in small flakes; they bought it in Croatia at a shop named Biovega).

At the start, they bought a new vacuum packaging machine from Multivac, the best European manufacturer. It packs two bags at a time; you just have to close the lid. After the bag is sealed, the lid opens automatically. Eventually they stopped cooking meals and devoted themselves totally to making tofu and seitan–but still in their small home kitchen. They developed some Croatian-language flyers which they used to help sell their tofu.

1999 April–They start making smoked tofu.

1999 Dec.–They decided to start their tofu and seitan making business officially.

2000 Jan.–They introduced Tofu Mayonnaise.

2000 May–They rented a workplace at Petrinjska 2, bought the necessary equipment, and moved out of their home kitchen. Now their business became serious and really started to grow.

© Copyright Soyinfo Center 2013

2001 Jan.–They moved their business into a larger space at Zumberacka 42.

2001 Feb.–They began to sell their tofu in health food stores.

2001 Feb. 12–Vlatka and Miroslav are married. She writes: "I think Miroslav deserves most of the credit for our business. Most of the ideas were his. It was his idea that we should start making tofu in the first place, and he has always been very enthusiastic about making tofu."

2001 March–They start using natural (unrefined) nigari to coagulate their tofu; they buy it from Austria.

2001 Sept.–They introduce Tofu with Vegetables, Tofu Spread with Garlic, and Tofu Spread with Sweet Dry Red Peppers.

2001 Oct.–They start using organically grown, non-GE (not genetically engineered) soybeans, which are now grown near Pozega, a small town in eastern Croatia, by Zeljko Mavrovic, a very famous Croatian ex-boxer and world champion.

2001 Dec.–They move their business into a larger rented space at Nehajska 42, 10000 Zagreb, Croatia. On Dec. 18 they sold the first tofu made at that location.

2002 Jan.–Today they make about 700 kg/month of tofu, including Fresh Tofu, Marinated Tofu, Smoked Tofu, Tofu with Vegetables, Tofu Mayonnaise, and Tofu Spread (With Garlic and Parsley, or With Red Peppers). They use organically-grown, GMO free soybeans.

But the demand for tofu in Croatia is much larger than they expected. Their equipment is too slow to keep up with the demand, which is increasing every day. Their biggest problems are grinding the beans and draining the okara. Address: Nehajska 42, 10000 Zagreb, Croatia. Phone: +385 1-3639-092.

12392. Carter, Jeffrey. 2002. More research dollars needed to breed export soybeans: There's less focus on producing new lines of foodgrade soybeans than on herbicide resistant beans. *Ontario Farmer* (*Canada*) 34(47):16. Jan. 15.
• ***Summary:*** This was the message of soybean exporter Michael Loh to farmers at the Southwest Agricultural Conference at Ridgetown. Loh emphasized that the Ontario soybean industry must respond to the needs of its customers. "My vision for southwestern Ontario and Canada is for us to have the image as being the place to go for the best foodgrade soybeans."

Roundup Ready varieties tend to produce a smaller sized bean, yet many Japanese customers want larger-seeded varieties–according to Morris Sagriff, a Lambton County farmer. A photo shows Michael Loh.

12393. **Product Name:** Soyco Silken Tofu [Smooth, or Silky Firm].
Manufacturer's Name: Soyco Soyfood Product [Nutrisoy Pty. Ltd.].
Manufacturer's Address: 15 Hannon St., Botany NSW 2019, Australia. Phone: 02-9695-7755.
Date of Introduction: 2002. January.
Ingredients: Soybean (non genetically modified), water, natural calcium sulfate, glucono delta lactone.
Wt/Vol., Packaging, Price: 300 gm.
How Stored: Refrigerated.
New Product–Documentation: Labels with dates sent by Tony Wondal of Nutrisoy. 2005. April 26. He started making and selling this product in Jan. 2002. Smooth: Red, green, yellow and black on brown.

12394. **Product Name:** Soyco Regular Tofu [Original, or Firm].
Manufacturer's Name: Soyco Soyfood Product [Nutrisoy Pty. Ltd.].
Manufacturer's Address: 15 Hannon St., Botany NSW 2019, Australia. Phone: 02-9695-7755.
Date of Introduction: 2002. January.
Ingredients: Soybean (non genetically modified), water, natural calcium sulfate.
Wt/Vol., Packaging, Price: 300 gm.
How Stored: Refrigerated.
New Product–Documentation: Labels with dates sent by Tony Wondal of Nutrisoy. 2005. April 26. He started making and selling this product in Jan. 2002. Original: Red, green, yellow, white and black on blue.

12395. The Mail Order Catalog for healthy eating. Winter 2002. 2002. P.O. Box 180, Summertown, TN 38483. 36 p.
• ***Summary:*** The book section of this mail order catalog contains listings for an excellent selection of vegetarian and vegan cookbooks, vegetarian soyfood cookbooks, plus books on food nutrition & health, alternative healthcare, women's healthcare, native Americans and their cultures, animal rights, and sustainability.

The vegetarian food products section offers TVP granules and chunks, Response textured soy protein concentrates (misleadingly called "Response TVP flakes"), miso soup mixes, wheat free soy pasta, soy & rice pudding mixes, soy & nondairy beverages and beverage mixes, soy protein powders & shake mixes, soynut butters, sea vegetables, vegetarian jerky, soynuts, plus foods from Worthington and Loma Linda, Jyoti India Cuisine, and Dr. John McDougall. Address: Summertown, Tennessee. Phone: 800-695-2241.

12396. **Product Name:** [Viana Life Paté Fine (Delicately Smoked Vegetarian Sandwich Paté), Life Paté Coarse (Delicately Smoked Vegetarian Sandwich Paté), Country Vegetarian Slicing Sausage for Sandwiches, Velami Vegetarian Slicing Sausage for Sandwiches, Veggie Tuna (Chunky Style Paté), VeggieDelight Supreme (Non-Dairy Cream Cheese), VeggieDelight Cheesy (Non-Dairy Cream

Cheese)].
Foreign Name: Lebenswurst Fein, Lebenswurst Gross, Prima Wurst, Velami, Veggie Tuna, VeggieDelight Supreme, VeggieDelight Cheesy.
Manufacturer's Name: Tofutown.com
Manufacturer's Address: D-54578 TofuTown Wiesbaum, Germany. Phone: +496593 9967-0. Fax: 6593 9967-225.
Date of Introduction: 2002. January.
Wt/Vol., Packaging, Price: 200-250 gm pack.
How Stored: Refrigerated.
New Product–Documentation: Color packages sent by Bernd Drosihn. 2004. Nov. 15. Size: 5 by 17.5 by 3.5 cm. Paperboard boxes. Various colors. Color photo of the dish, ready to eat, on round wooden board. Each of these Viana-brand products is a meat alternative, ready to serve introduced in Jan. 2002. The packaging is very attractive, with all information given in 6 languages for the expanded European market: German, Dutch, Spanish, English, French, and Italian.

12397. Sims, Cody. 2002. Arcata tofu-makers going strong in new plant. *Independent* (*South Humboldt Co., California*) 6(6):2. Feb. 5.
• ***Summary:*** Matthew Schmidt has been making tofu for 22 years. In 1980 he moved to California and, with a partner, opened the Tofu Shop in downtown Arcata. It began as a retail store, with the tofu made in the back and products sold out of the front. In 1992 the Tofu Shop moved into the Foodworks building in Arcata. About two years ago, after research found health benefits in tofu, sales jumped and have continued high. After obtaining a bank loan to buy a neighboring building, the company began 2002 in its own building–a custom designed tofu plant. Today The Tofu Shop, his business, makes almost 1,000 lb/day and employs 23 people. Some 80-85% of the company's tofu is eaten in Humboldt County, but some is distributed as far south as Santa Rosa.

A detailed description of the tofu-making process is given. Photos show: (1) Josh Sandler ladling steaming curds into a cloth-lined metal forming box. (2) Ahma Ebu weighing and packaging the Tofu Shop's ready-to-eat flavored snak sticks in the company's own smokehouse.

12398. Huang, Timothy; Krueger, Carol Ann. 2002. Chronology of work with soyfoods (1972-1980) (Interview). *SoyaScan Notes.* Feb. 15-24. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** 1950 Dec. 25–Born in Detroit, Michigan. Growing up in a Chinese-American family, Tim naturally ate tofu (mostly at restaurants) and other soyfoods. At college in Michigan he started to prepare some of his own meals and began to cook with store-bought tofu.

1972–Tim leaves the University of Michigan (he studied architecture, then natural resources/ecology) to join "The Farm," an intentional community in Summertown, Tennessee, where he is exposed to vegetarianism and new uses of soybeans as food. Tim becomes a complete vegetarian (vegan). On The Farm, all of the soybeans were eaten as pressure cooked soybeans; a little oil was added to keep the hulls from clogging up the pressure valve. Stephen Gaskin, The Farm's teacher, expresses an interest in learning more about tofu.

1953 July 5–Carol Ann is born in Medford, Wisconsin. In the fall of 1973, at age 19 and after graduating from high school, she first visits The Farm in Tennessee. In Jan. 1974 she moves there to live.

1973–Tim researches how to make tofu for The Farm by interviewing family acquaintances. He built a forming box, got some cheesecloth, bought all the ingredients necessary to make tofu and made a batch in his family kitchen (West Bloomfield, Michigan–a suburb of Detroit) using soybeans from an Asian food store (in Royal Oak, Michigan), and lemon juice as a coagulant. His parents laughed. However neither Tim nor anyone at The Farm used this information to actually make tofu.

1974 spring–Tim and Carol Ann meet at The Farm in Tennessee. Approximately 600 people are living on The Farm at that time. Tim is a woodcutter and chain saw mechanic. Carol Ann works in the community kitchen and soy dairy–where she learns (briefly) how to make tofu and soymilk.

1974 fall–Tim and Carol Ann move to the "Wisconsin Farm," a sister community of The Farm. The Wisconsin Farm was smaller and better organized than the Tennessee Farm. James Taft is a key person there.

1975 March 9–Tim and Carol Ann are at the Wisconsin Farm; Stephen Gaskin comes up from the Tennessee Farm to marry six couples in one ceremony. Tim's parents are distraught; his father barely escaped from Communist China and now he was losing his son to a commune. Carol Ann (who is a good cook and likes to cook) works with the canning and freezing crew, and becomes involved in making soymilk and tofu regularly for that community; Tim, who is on the wood-cutting crew, helps her occasionally.

1976 Nov. 1–Ethan, the Huang's first child, is born on the Wisconsin Farm.

1977 fall–Tim and Carol Ann leave the Wisconsin Farm and move to Detroit, Michigan, to establish their own business. When they leave, Tim's parents give them some money with which they purchase a Dodge Caravan van. They move into a rented apartment. After several months (with financial help from Tim's parents), they buy and start to make payments on a house on the east side of Detroit.

1977 fall–Tim enrolls in an EMT (Emergency Medical Technician) training program associated with Wayne State University, at Detroit General Hospital; this would qualify him to drive an ambulance. Carol Ann wants to start a business making tofu and/or tempeh.

© Copyright Soyinfo Center 2013

While looking for work on the side, Tim meets a Mr. James Coleman, a wheeler-dealer, who wants Tim to distribute his breads to Detroit from Ann Arbor. Tim begins distributing the bread but quickly realizes he needs a line of products if his route is to be profitable. He soon adds breads from Wildflour Community Bakery. One night at dinner Coleman tells Tim that he should meet Steve Fiering who is part of the 4th Avenue Food Co-op and who started (in about the spring of 1977) a worker's cooperative making tofu next door in the Wildflour Community Bakery in Ann Arbor.

1978 Feb. or March–Tim and Carol Ann meet Steve Fiering of The Soy Plant worker's cooperative making tofu in Ann Arbor, Michigan. Steve's co-op is now located in the small room in the basement of Eden Foods' restaurant in Ann Arbor. It is agreed that rather than create a competing soyfoods production business, that a cooperative business arrangement between the two companies be formed. The Yellow Bean Trading Co. is established by Tim and Carol Ann in Detroit to distribute soy products for The Soy Plant in the metropolitan Detroit area. In Chinese, *Huangdou* or "yellow bean" means soybean.

1978 July–Tim and Carol Ann attend the first meeting of the Soycrafters Association of North America in Ann Arbor, Michigan, hosted by The Soy Plant. They sign the register as: Yellow Bean Trading Co., 4414 Buckingham, Detroit, Michigan 48224. The conference boosts their interest making a business out of soyfoods. Tim, who is now taking some science classes at Wayne State University, has to decide between two careers: A medical technician or doctor, or a soyfoods entrepreneur. He chooses the latter.

1978 Sept.–Tim starts to distribute refrigerated soy products (tofu, tempeh, soymilk, etc.) made by The Soy Plant in Ann Arbor. He would drive the 40 miles from Detroit to Ann Arbor, would pick up the soy products at about noon, drive them to his home in Detroit in his unrefrigerated van, pack them into a refrigerator in the garage for overnight storage, then deliver them to stores along a distribution route he created in Detroit the next morning. The lack of refrigerated storage space and of a refrigerated van becomes an immediate problem. So Tim soon buys an inexpensive second van, insulates the back, and installs a refrigeration unit. He gradually adds more natural-food products to his line.

1978 late–With Tim realizing the need for a walk-in cooler and Carol Ann wanting to start a soy deli, the Huangs begin to rent a storefront at 15309 Mack Ave. in Detroit–a former natural foods restaurant. Tim borrows some money from his parents to make the rental payments

1978 Nov. 17–The Huang's second child and first daughter, Eva, is born.

1979 March–The deli named Yellow Bean Vegetarian Foods opens at 15309 Mack Ave in Detroit. Yellow Bean also bought tofu from The Soy Plant and used it to create "secondary soy products" including tofu eggless salad, tofu cream pies, and vegetable-tofu pockets.

1980 July 19–The Huang's third child, Emma, is born.

1980–Tim helps The Soy Plant relocate to a larger plant on Airport Blvd. in Ann Arbor.

1981–The Huangs sell the distribution route and trucks to The Soy Plant and sell the store to a private party. Tim decides to finish his undergraduate degree, working in food science and technology. They move to Davis, California.

1982–They separate in California. Carol moves to a ranch in Pima, Arizona; their divorce is finalized. She continues living in Arizona and raises their kids. She starts making jewelry. Address: 1. 155 Ridge Grove Rd., Kerrville, Texas 78028; 2. 438 South Star Ave., Tucson, Arizona 85719. Phone: Tim–830-792-3797; Carol Ann–520-740-0393.

12399. Huang, Timothy. 2002. Chronology of work in the soyfoods industry (1981-2001). Kerrville, Texas. 3 p. Unpublished typescript. Feb. 15.
• ***Summary:*** Part I of this chronology (which see) covers the period from 1972 to 1981. 1982–Tom and Carol Ann are divorced. After the divorce and unconnected to it (except that he was feeling lots of stress), Tim suffered a serious spinal cord injury and was paralyzed from the chest down.

1983–He enters the University of California at Davis food science program in a wheelchair. Gradually he regains the ability to walk. Address: 155 Ridge Grove Rd., Kerrville, Texas 78028. Phone: 830-792-3797.

12400. Hirsch, J.M. 2002. Tofu not the only way to get benefits of soy; try using miso. *Advocate* (*Baton Rouge, Louisiana*). Feb. 21.
• ***Summary:*** "The vegetarian love affair with tofu has done as much harm as good for the reputation of the rather mild-mannered soybean." But tofu is not the only source of healthy soy protein. Miso is another tasty source, best known as the primary ingredient in Japanese miso soups. Contains a recipe for "Shish kebabs with miso sauce" from The Book of Miso, by Shurtleff and Aoyagi (Ten Speed Press).

Other soy products besides tofu include: Tempeh, toasted and salted soy nuts, soy milk, breakfast cereals and breads that contain soy, soy flours, soy protein powders, and edamame (fresh soybeans still in the pods; often served at Asian restaurants).

Also appeared in the Press (Ashbury Park, New Jersey). Address: Associated Press.

12401. Tibbott, Seth. 2002. Update on Tofurky (Interview). *SoyaScan Notes.* Feb. 26. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Sales of Tofurky roasts grew nicely during the past year from 82,000 in 2000 to 105,000 in 2001–an increase of 28% during a recession year in the American economy. The product is sold in two forms: Tofurky Roast, and Tofurky Feast (the 26-ounce stuffed roast plus four

Tempeh Drumettes, 14 oz. Tofurky "Giblet" Gravy, and Tofurky Jurky Wishstixs). In recent years, Tofurky has been made for Turtle Island in California. Now Seth is planning to move production in-house, which should enable him to reduce production costs dramatically. Address: Turtle Island Foods, Inc., P.O. Box 176, Hood River, Oregon 97031. Phone: 541-386-7766 OF.

12402. Praskin, Laurie Sythe. 2002. How tofu came to The Farm in Tennessee, and how Laurie got interested in tofu and vegetarianism (Interview). *SoyaScan Notes.* Feb. 27. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** When The Farm was first settled in 1971, one of the really popular books was *Ten Talents,* by Frank and Rosalie Hurd (1968). They were Seventh-day Adventists and the book was a vegan cookbook that contained two recipes for homemade soybean curd (tofu, p. 195-96). The first used whole soybeans, with Epsom salt as a coagulant; the second used soy flour, with lemon juice as a coagulant. During the first 2-3 years of The Farm, before any tofu was made at a central location, people at home in their buses were using soy flour, with vinegar as a coagulant. The soymilk was never filtered so the okara remained in the tofu.

Alexander Lyon, because he had a PhD degree, was put in charge of learning more about soyfoods and developing soyfoods production at a central facility. In 1972 he started The Farm Soy Dairy.

In 1974 when Laurie arrived at The Farm, quite a bit of this tofu was being made by individuals. She recalls: "It was actually quite tasty. I liked it. It was a nice relief from eating whole soybeans all the time." However the Soy Dairy was making mostly soymilk; occasionally they made "soy cheese" by allowing soymilk to stand until it fermented; the resulting acid caused the separation of curds and whey. The curds were then hung in a sack until firm; the resulting product was quite similar to tofu, even though it was made without use of a coagulant or forming box.

In 1974 Laurie wrote Bill Shurtleff in Japan requesting information on making tofu, and sent him the book *Hey beatnik! This is The Farm book,* published in 1974. Bill sent Laurie pre-publication information on homemade tofu from *The Book of Tofu,* which was published in Dec. 1975. Laurie recalls: "That book was a great help, and a key turning point in The Farm's starting to manufacture tofu on a large scale. I remember just eatin' that book up, and saying 'We've got to do this. You don't need a lot to make it work.'" In early 1975, Alexander Left the soy dairy and Laurie took over managing production.

Laurie (whose maiden name was Sythe) grew up in Los Gatos, California, during the 1960s. She became a vegetarian when she was a teenager (age 15-16), living at home with her parents. The main influence came from her elder brother, Dan Sythe, who was living on Haight Street in San Francisco and was a vegetarian–in fact a fruitarian. She did a lot of vegetarian cooking while in high school, and eventually had her whole family eating vegetarian before she went to The Farm. She recalls buying and cooking with tofu several times during this time–perhaps directly from small tofu makers in nearby San Jose. Dan had a bus, which he drove to Tennessee, arriving on The Farm in 1971 or 1972, shortly after the main caravan of buses arrived in May 1971 on the Martin Farm. He lived on that first Martin Farm. He started "Solar Electronics" on The Farm. Address: 17969 Oak Dr., Los Gatos, California 95030.

12403. Amy's Kitchen Inc. 2002. Amy's bowls: Life is just a bowl of... Amy's good food (Ad). *Natural Foods Merchandiser.* Feb. p. 55.
• ***Summary:*** The top two-thirds of the full-page color ad shows Amy's Teriyaki Bowl, with tofu and vegetables in a sauce on top of white rice. The bottom one-third shows the front panel of four new Amy's Bowls: Stuffed Pasta Shells, Santa Fe Enchilada, Brown Rice and Vegetables, and Teriyaki. All but the Stuffed Pasta Shells contain tofu as a major ingredient. Address: P.O. Box 449, Petaluma, California 94953. Phone: 707-578-7188.

12404. Kopf, L.J. 2002. Tofutons (Cartoon). *Funny Times* (*Cleveland Heights, Ohio*). Feb. p. 2.
• ***Summary:*** A salesman is giving his sales pitch to two customers who are standing in front of a couch and chairs. "All of our furniture is made out of the best soybean curd. We have soft, firm, extra firm, silky, and five spice." Address: 84 Williams Hill Rd., Richmond, Vermont 05477.

12405. *Soybean Digest.* 2002. Healthy growth in soyfoods. Mid-Feb. p. 34-35.
• ***Summary:*** This article is part of a special pull-out insert on "New Uses." Notes that soyfoods have reached a new level of acceptance during the past year with the purchase of Kashi Co. (a natural cereal manufacturer) by the Kellogg Co. Kashi already made lines of soy-enriched cereal and the company recently expanded its line to include GoLean soy-based diet drinks and cereals. Founded in 1984 by Philip and Gayle Tauber, Kashi grew by more than 100% during the fiscal year before Kellogg's purchase–for an estimated $30 to $50 million. In the year 2000 Kashi had sales of about $25 million, compared with $7 billion for Kellogg. But Kellogg sees a continuing trend toward healthier eating.

Color photos show: (1) Packages of Kashi GoLean and Westsoy Soy Smoothie. (2) Various unpackaged soy products including textured soy protein, soymilk, silken tofu, edamamé, soy cheese, soy hot dogs, breaded soy cutlets, and soy powder. (3) Tortillas filled with cooked whole soybeans and trimmings, a package of Soy Fusion (Berry), and a soy burger between buns. (4) Cover of the 2001 Soyfoods Guide.

12406. Branaugh, Matt. 2002. Smooth as Silk: White Wave

© Copyright Soyinfo Center 2013

projects huge growth, despite legal matter. *Daily Camera* (*Boulder, Colorado*). March 18. Business plus section. p. 10-11.

• ***Summary:*** In 1977, 25 years ago, entrepreneur Steve Demos founded White Wave in Boulder, Colorado, making tofu by hand in a bathtub. White Wave, for its 2001 fiscal year (ending March 31) expects sales of $136 million. The company has 150 employees and next year expects sales just under $200 million. But in 1996 the company's annual sales were only about $8 million. The growth in sales is largely due to Silk soymilk, which is now found in 94% of America's supermarkets. Yet only about 6% of Americans consistently buy Silk.

Last year Suiza Foods Corp. acquired Dean Foods for $2.5 billion, including $1 billion of debt. Suiza changed its name to Dean Foods and made its headquarters in Dallas, Texas. A color photo shows Steve Demos seated at his office desk. "William Shurtleff, whose 'Book of Tofu' inspired Demos nearly 30 years ago, said Silk created the refrigerated soy milk category... Grocery store officials tell Shurtleff, founder and president of the Soyfoods Center in Lafayette, California, that Silk may be the fastest growing new product in the last 50 years." Silk made its way into 30,000 supermarkets nationwide in only 30 months. Yet few consumers knew the new products was there. White Wave quickly lost $600,000 and came near bankruptcy. Address: Daily Camera business reporter. Phone: (303) 473-1363.

12407. **Product Name:** [Tofu Ravioli, from Whole Wheat Flour, Tofu Sausage].
Foreign Name: Integralni Ravioli od Tofua, Tofu Kobasica.
Manufacturer's Name: Annapurna.
Manufacturer's Address: Nehajska 42, 10000 Zagreb, Croatia. Phone: 01 3639 092.
Date of Introduction: 2002. March.
Ingredients: Durum flour, 850 flour, whole wheat flour: Filling: Tofu, soya, breadcrumbs, onion, spices.
Wt/Vol., Packaging, Price: 150 gm vacuum packed. Sells for 15kn/pack.
How Stored: Refrigerated.
New Product–Documentation: Label sent by Vlatka Kuzmic. 2005. June 6. She wrote the introduction date and English translation of the product name on the back of 6¼ by 6 inch label (folded in half). Dark green, red, white and tan against a light green background. Color illustration of ravioli shells, tofu, red bell pepper, carrots, and greens.

12408. Annapurna. 2002. Annapurna: zdrava hrana [Annapurna: Healthy food (Leaflet)]. Zagreb, Croatia. 1 p. Front only. 29.5 x 21 cm. [Cro]

• ***Summary:*** This leaflet is printed in black ink on beige paper. On the front panel, the company name, Annapurna, is printed in gray ink, the two phone numbers are in red ink, and a stylized tree at the bottom center has a brown trunk and green leaves. Below the company name are listed four tofu products and 3 seitan products; the weight and price of each is given. Note: This is the 4th leaflet printed by Annapurna.

12409. **Product Name:** House Tofu Steak [Garlic & Pepper].
Manufacturer's Name: House Foods America Corporation.
Manufacturer's Address: 7351 Orangewood Ave., Garden Grove, California 92841. Phone: (714) 901-4350.
Date of Introduction: 2002. March.
Ingredients: Original: Filtered water, soybeans, salt, calcium chloride.
Wt/Vol., Packaging, Price: 19 oz.
How Stored: Refrigerated.
New Product–Documentation: Leaflet (glossy, color, back and front; see next page) sent by Patricia Smith from Natural Products Expo (Baltimore, Maryland). 2002. March. "House Tofu Steak." "Nutritious. Easy to prepare. Extra firm texture. Specially seasoned." Photos on the front show: (1) Three tofu steaks (grilled tofu) on a plate, surrounded by mushrooms, vegetables and rice, ready to serve. (2) The front panel of each of the two flavors.

On the rear: "House Tofu Steak launching campaign, starting April 2002." Magazine advertisement in Bon Appetit. TCM Broadcasting. FSI coupon. For more: www.housetofusteak.com.

12410. **Product Name:** House Tofulicious: A Creamy Tofu Dessert [Mango, Vanilla Orange, Chocolate].
Manufacturer's Name: House Foods America Corporation.
Manufacturer's Address: 7351 Orangewood Ave., Garden Grove, California 92841. Phone: (714) 901-4350.
Date of Introduction: 2002. March.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Refrigerated.
New Product–Documentation: Leaflet (glossy, color, single sided; see page after next page) sent by Patricia Smith from Natural Products West (Anaheim, California). 2002. March. "Everything you always wanted a dessert to be." This dessert is presented more like a parfait or pudding than an ice cream.

12411. **Product Name:** SoYummi: Soya Dessert [Chocolate, Raspberry, Lime, Banana-Coconut].
Foreign Name: SoYummi: Dessert de Soya.
Manufacturer's Name: Les Aliments SoYummi.
Manufacturer's Address: 3655 Redpath, Montreal, Quebec, Canada H3G 2W8.
Date of Introduction: 2002. March.
Ingredients: Soy drink (80%; not subjected to UHT), sugar, soy oil (later changed to high oleic sunflower oil), modified cornstarch, modified rice starch, lactic acid (to lower the pH for longer shelf life), modified vegetable gums, xanthan gum, salt, agar, natural flavors, yucca extract (rich in saponins).
Wt/Vol., Packaging, Price: 125 gm in a low plastic

(polypropylene) cup, with flat lid and individual sleeve. Retails for Canadian $1.39.
How Stored: Refrigerated, 35-40 day shelf life.
New Product–Documentation: Cardwell, Mark. 2002. "As good as it gets." Food in Canada. May, p. 38.

Talk with Joanne Hollander. 2008. May 29. They introduced the first four products on 8 March 2002 at a food festival in Montreal; they were available for sale in stores about 2 weeks later. She has product labels in front of her. The products have always been made at the Food Research and Development Center (CRDA) in Saint-Hyacinthe, and the main office has always been at 3655 Redpath in Montreal. She started the research using tofu, but later switched to soymilk. She is a purist, and spent years trying to find the right tofu. Then she found that soymilk sold in ESL gable-top cartons has been subjected to UHT sterilization (up to 123ºC), which destroys 80% of the isoflavones and all of the vitamins–it ends up being a dead, inert food. She has read "many, many papers by Asian scientists about this destruction of isoflavones" and Dr. Ming (who she visited) at the University of Vermont has written about the destruction of vitamins. The process also kills all the enzymes and the bad bacteria–but it also kills the good bacteria. "The whole point of consuming soymilk is to get the isoflavones, the phytoestrogens." Her biggest obstacle to making healthy products is Health Canada; they won't let her use natural sweeteners. Stevia sold off the shelf but not allowed in commercial products. They push Splenda, Aspartame, and all those things that end in the letters "tol" (such an mannitol, sorbitol, glycerol, arabitol, erythritol), all the sugar-alcohols that acidify the body. "It's just a nightmare trying to develop a really healthy product in Canada." Her products has a shelf life of 40 days without using UHT soymilk. Joanne regards sugar (organic or not, including "cane crystals") as poison. "Its the worst thing; I don't think there is a good sugar. They are all acid-forming and terrible." "Soy oil is a omega-6 and it oxidizes quickly, so she doesn't like it, which is why she took it out of her first product. Yucca extract is a good source of saponins, which adhere to cholesterol molecules in the intestines so they can't get reabsorbed into the bloodstream, and are therefore excreted. Saponins are also foaming agents, so they help make a light mousse–which is the same consistency all the way through–no crust or topping. Its basically a pudding that is whipped and set. Her website is www.soyummi.ca. There is also a SoYummi (a different company) in New Jersey; URL: www.soyummi.com.

Because Joanne has done most of her research at the Center for Research and Development in Saint-Hyacinthe, she has access to many very smart food scientists and lots or reliable information about foods, food ingredients, and food processing.

Joanne's original product still contains sugar, but Joanne wanted to develop a product with no sugar, which led to her 2nd product, SoYummi GoLite.

*

12412. Pulmuone USA Inc. 2002. Pulmuone, a plate full of nature. South Gate, California. 16 p. Each page: 18.3 x 26 cm.
• ***Summary:*** Brochure (glossy color) sent by Patricia Smith from Natural Products Expo West. 2002. March. On the cover are five small rectangular photos of foods (including whole dry soybeans) against a white background.

Contents: 1. An Asian approach to natural food. 2. Pulmuone foods bring out the nature to your meals. 4-5. Tofu: Better protein source than meats. A photo shows the company's tofu products: Four types of basic tofu (each 18 oz. / 510 gm, regular, firm, silken, and soft). Two types of extra soft (10 oz / 300 gm) in round tubes. Tofu broth seasoning (1.6 oz / 45 gm). Two private label types of tofu for Japanese markets (firm and soft). Egg tofu (4.3 oz / 122 gm).

6-7. Fresh noodles (uncooked). Ten different types, incl. 2 Ramen and 1 udon.

8-9. Dry noodles / Instant rice noodles. Twelve different types (5 cup type, 3 bowl type, and 4 traditional straight types).

10-11. Traditionals. 4 sizes of hot pepper paste, 3 sizes of soybean paste, 2 sizes of hot bean sauce, 1 cho jang (sashimi sauce), 1 chungkukjang, 9 types of grains and beans, including soybean, red bean, black soy bean, mung bean, sweet brown rice, brown rice, etc.

12-13. Other. Three types of tea, 4 flavors of farm pudding, 2 types of sauce (black bean sauce, and curry sauce mix). Three types of vinegar. 3 types of pickled radish. Imitation crab meat [vegetarian]. Sesame oil.

14. Frozen foods. Beef dumpling and Kimchi dumpling. Frozen udon in tubs (3 types). Buns & pancakes (5 types).

Page 16. Important dates in the history of Pulmuone: (actually chronology).

1981 May–Pulmuone Organic Foods opened to sell organic vegetables from its own farm.

1984 May–Pulmuone Foods Co., Ltd. incorporated.

1984 June–Tofu and Bean Sprout Plant: Yangju, east of Seoul.

1986 Nov.–Mineral spring water plant opened in Chungju, South of Seoul.

1987 May–Pulmuone Kimchi Museum opened in Seoul.

1988 Dec.–Natural House opened (Natural foods chain stores) in Korea.

1989 Jan.–Pulmuone Food Standards Committee started to work (To set up standards for food formulas, ingredients and manufacturing processes): Korea.

1990 Jan.–Soybean paste [jang] plant opened in Doan, south of Seoul.

1991 Jan.–Pulmuone USA Inc. founded.

1991 June–Fresh noodle plant opened in Chuncheon, northeast of Seoul.

© Copyright Soyinfo Center 2013

1993 Aug.–Ilsongjung Foods Ltd., Korean-Chinese joint venture, opened in China.

1995 June–Tofu Plant opened in Los Angeles.

1995 Sept.–ISO 9002 certificate obtained.

1997 Sept.–Fresh Noodle Plant opened in Los Angeles, USA.

1999 Sept.–Tofu plant opened in Shanghai, China.

Below the chronology small photos show: (1) Inside of the Pulmuone Tofu Plant in Los Angeles. (2) Inside the Pulmuone Fresh Noodle Plant in Los Angeles.

"Pulmuone was founded in 1981 with 40 employees. It has grown to become a multinational company of 2,000 employees with annual sales volume of $250 million." "The secret to success lies in uncompromising commitment to better foods and better life." Address: 4567 Firestone Blvd., South Gate, California.

12413. Pulmuone USA Inc. 2002. Pulmuone. Soga (so good!!) (Portfolio). South Gate, California. 12 inserts. 31 cm. Inserts 28 cm.

• ***Summary:*** Portfolio (glossy color) sent by Patricia Smith from Natural Products Expo West. 2002. March. On the cover are the Pulmuone and Soga logos plus various scattered stylized green leaves against a white background.

Inserts: (1) Soga Organic Tofu (firm, soft, or silken). (2) Quick and handy tofu cookbook (15 x 9 cm, 16 p., mostly recipes). (3) Soga Non-dairy Soy Smoothie Base (in a round plastic tube). (4) Non-GMO Nigari Tofu, firm or silken.

(5) Katsuo [dried, shaved fish] udon noodle soup and Katsuo tempura udon. (6) Star-K Kosher certification, for 9 tofu products. (7) OCIO organic transaction certificate, for soybeans. (8) Pulmuone to open 2nd tofu plant in New York (in Tappan, New York, on March 16, 2002. News release, dated 26 Feb. 2002). (9) Overview of company. "We will have a production capacity of 20 million units per year from our new plant facility in New York, opening in March 2002."

(10) Industry facts on soyfoods and health. 69% of Americans recognize soyfoods as healthy, 22% have no opinion and only 9% feel soy is unhealthy. 42% of Americans report that they consume soyfoods once a month or more. 27% consume soyfoods weekly. During the year 2000 the soyfoods category as a whole grew by 21.1% to reach $2.77 billion; during the year 2001 sales are expected to grow by 15-15%, Since 1995 dollar volume has grown by 250% for the category, hitting double digit increases in each year. (11) A natural tofu (firm, soft, or silken). (12) "Pulmuone, a plate full of nature" (color booklet, 16 p.). Address: 4567 Firestone Blvd., South Gate, California.

12414. **Product Name:** Soga Organic Twin-Pack Tofu.
Manufacturer's Name: Soga Soyfoods [Pulmuone U.S.A.].
Manufacturer's Address: 4585 Firestone Blvd., South Gate, CA 90280. Phone: 866-356-2800.
Date of Introduction: 2002. March.
Ingredients: Feb. 2007: Water, organic soybeans, calcium sulfate, glucono delta lactone, magnesium chloride. Certified by Quality Assurance International.
Wt/Vol., Packaging, Price: 15.5 oz (439 gm) packed in molded plastic tray with heat-sealed, peel-off plastic film lid. Retails for $0.99 (2007/02 Lafayette, California).
How Stored: Refrigerated.
Nutrition: Per 3 oz (85 gm): Calories 80, calories from fat 45, total fat 5 gm (8% daily value; saturated fat 1 gm), cholesterol 0 mg, sodium 5 mg (<1%), total carbohydrate 2 gm (dietary fiber <1 gm [3%], sugars 0 gm), protein 9 gm. Vitamin A 0%, vitamin C 0%, calcium 15%, iron 6%.. Percent daily values are based on a 2,000 calorie diet.

New Product–Documentation: Talk with John Sim, head of sales at Pulmuone. 2003. Nov. 10. This product was introduced in March 2002 at the Natural Products Expo West, at Anaheim, California.

Product with Label purchased at Trader Joe's in Lafayette, California. 2007. Feb. 4. "Organic Extra Firm Twin Pack Tofu." This packaging innovation is one of the most original and important since water-packed tofu started to be packaged in plastic tubs with a heat-sealed film lid. The front panel is red, white, pink, blue, black and green. The product name is in both English and Korean. The ingredients (black on pink) are in English, French, and German. In the upper right corner is a color photo of diced tofu served with veggies on a blue dish. An illustration shows the twin packs, with large arrows on each pointing in opposite directions: (1) "Enjoy now." (2) "Enjoy later." Logo: USDA organic. Each

© Copyright Soyinfo Center 2013

No. 5 PP plastic tub is 5.5 by 11 by 5 cm deep.

12415. **Product Name:** Soga Healthy Toppers, and Tenders (Meat Alternatives).
Manufacturer's Name: Soga Soyfoods [Pulmuone U.S.A.].
Manufacturer's Address: 4585 Firestone Blvd., South Gate, CA 90280. Phone: 866-356-2800.
Date of Introduction: 2002. March.
New Product–Documentation: Talk with John Sim, head of sales at Pulmuone. 2003. Nov. 10. This product was introduced in March 2002 at the Natural Products Expo West, at Anaheim, California.

12416. Sunrise Soya Foods. 2002. Pete's Tofu: Nothing beats Pete's–Taking the guesswork out of tofu (Leaflet). Vancouver, BC Canada. 3 panels each side. Each panel: 28 x 21.6 cm.
• ***Summary:*** Leaflet (color) sent by Patricia Smith from Natural Products Expo West. 2002. March. On the front panel are six colorful bags of Pete's Tofu (they look like bags of potato chips) against a golden yellow background. They types are: Super firm for dicing. Super firm Italian herb. Tofu2go: Lemon pepper with mango chipotle sauce. Soft for blending. Very berry dessert tofu. Medium firm for mixing.

Page 2. Pete's taking tofu to a whole new level! Pete's tofu: more turns = more profits. Customers want tofu to be simple. All natural ingredients: Made with only organic soybeans. On-pack recipes. Uniquely color-coded packaging. Innovative overwrap packaging. Handy on-pack storage and usage tips.

Page 3. Pete's super firm regular (2 x 6 oz) and Pete's super firm Italian herb (2 x 6 oz). Pete's medium firm tofu (16 oz). Pete's soft tofu (10.5 oz) and Ready-to-eat dessert tofu (2 x 6 oz). Color photos show each bag.

Page 4. Pete's health benefits promote healthy sales. Pete's "Tofu 101" Marketing support.

Page 5. Pete's Tofu2go: A whole new way to enjoy tofu. An on-the-go snack food; tofu triangles with a zesty dipping sauce. New shape and fun flavors = Unique sales appeal. Three flavors: Sesame Ginger, Santa Fe Sizzle, and Thai tango.

Rear panel. Take tofu to a whole new level. www.petestofu.com.

Note: As of Feb. 2013 this URL and website no longer exist. The information is a www.sunrise-soya.com. Address: 729 Powell St., Vancouver, BC Canada V6A 1H5.

12417. Sunrise Soya Foods. 2002. Pete's Tofu: Three round, colorful and playful adhesive graphics. Vancouver, BC Canada. Each graphic: 6 cm diameter on a white 7 cm square card.
• ***Summary:*** Graphics sent by Patricia Smith from Natural Products Expo West. 2002. March. (1) "Just try it for pete's sake!" (2) "All we are saying is–give pete's a chance. Tofu for the people." (3) Are you ready for–T2G? (Its read you!). Address: 729 Powell St., Vancouver, BC Canada V6A 1H5.

12418. **Product Name:** Nasoya Dijon-Style Nayonaise: Soy-Based Sandwich Spread.
Manufacturer's Name: Vitasoy USA Inc.
Manufacturer's Address: One New England Way, Ayer, MA 01432.
Date of Introduction: 2002. March.
Ingredients: Italian-Garlic: Tofu, unrefined safflower oil, apple cider vinegar, honey, sea salt, vegetable gum, citric acid, natural spices, herbs, flavorings.
Wt/Vol., Packaging, Price: 8 oz plastic tubs.
How Stored: Refrigerated, 30 day shelf life.
New Product–Documentation: Spot in Natural Foods Merchandiser. 2002. March. p. 140. "Vitasoy USA Inc." This product, introduced in December 1982, has been repackaged. It and original Nayonaise are "cholesterol-free, dairy-free, tofu-based mayonnaise alternatives. The spreads are made with whole, certified organic, non-GMO soybeans."

12419. White Wave, Inc. 2002. Tofu with an attitude. (Packed with flavor and ready to eat) (Leaflet). Boulder, Colorado. 2 panels each side. Each panel: 28 x 21.5 cm.
• ***Summary:*** Leaflet (glossy color) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 2002. March. On the front: The front of a package of White Wave Baked Tofu on a red background. Below that, in small white letters: "When it comes to good food, we use our beans." Address: 1990 N. 57th Court, Boulder, Colorado 80301. Phone: 1-800-488-9283.

12420. **Product Name:** Wildwood Soyogurt (Cultured Soymilk) [Precocious Peach, Vivacious Vanilla, Razzmatazz Raspberry, Blue Moon Blueberry, Strawberry Patch].
Manufacturer's Name: Wildwood Harvest Foods, Inc.
Manufacturer's Address: 416 E. Riverside Dr., Watsonville, CA 95076. Phone: 1-800-499-8638.
Date of Introduction: 2002. March.
Ingredients: 1998: Wildwood Tofu (filtered water, organic soybeans grown in accordance with the California Organic Foods Act of 1990, nigari {magnesium chloride, a natural firming agent}), unsweetened pineapple juice, soy sauce, fruitrim (fruit juice, natural grain dextrins), pineapple juice concentrate, ginger, orange juice concentrate, olive oil, molasses, ginger powder, spices.
Wt/Vol., Packaging, Price: 6 oz. plastic cups.
How Stored: Refrigerated.
New Product–Documentation: Leaflet sent by Patricia Smith from Natural Products Expo in Anaheim, California. 2002. March. "Wildwood introduces SoYogurt." Certified organic. Five flavors.

the wildwoods of California & Midwest-Harvest–to the sea of soybeans of Iowa (Leaflet). Grinnell, Iowa; Watsonville, California. 3 panels each side. Each panel: 22 x 9.3 cm.
• ***Summary:*** Leaflet (glossy color) sent by Patricia Smith from Natural Products Expo West. 2002. March. "In 1980 Wildwood Natural Foods began producing organic soymilk and tofu."

"In 1988 an Iowa farmer's decision to make tofu from Midwestern soybeans resulted in the formation of a family business and the building of a factory on the farmer's third generation farm. Midwest-Harvest Tofu is now on natural food shelves throughout the Midwest."

"In the spring of 2000, a small tofu company located on a farm in Iowa contact a well established soyfood company in California. The resulting dialogue between the leaders of the two companies... culminated in the creation of Wildwood Harvest Foods in August 2001." Address: 1810 Blakely Circle, Grinnell, Iowa 50112; 416 E. Riverside Dr., Watsonville, California 95076. Phone: 1-800-499-8638.

12422. Krueger, Carol Ann. 2002. Re: History of work with soyfoods, 1982-2004. Letter to William Shurtleff at Soyfoods Center, April 4. 5 p. + 2 menus. Handwritten, with signature.
• ***Summary:*** 1982–After Carol Ann and Timothy Huang were divorced, Carol Ann lived in Arizona with her kids and started making jewelry. She was director of the Graham County Food Buying Club, grew a huge organic garden, and began traveling to craft fairs, Grateful Dead shows, and festivals where she sold her jewelry. Dealing with rheumatoid arthritis put her on the path of natural healing and interest in diet and nutrition. She found that stress, overwork, lack of sleep, lack of water, lack of green leafy vegetables, and a poor, non-organic diet all made her arthritis worse (it flared up), while their opposite made it better. From 1982 to 1989 she lived on a ranch in Pima, Arizona. In 1982 she met and married Richard Sansom.

1989–Carol Ann and Richard are divorced; she moved to Boulder Creek, California, where she lived for the next 4 years.

1990 June–She met her third life partner, Wild Bill, at the Health and Harmony Festival. He was part of the original Renaissance Festival in Northern California, and he played for a belly dance troupe. They began to co-create the Casbah Tea House. He had created a Bedouin-style tent–40 by 32 feet; he would set it up and serve tea, coffee, and treats. Musicians would play and belly-dancers perform. Carol, who now had a long history of feeding people, began to add more food. Soon they became a traveling tea house on the summer festival circuit, serving an organic vegetarian menu based on the foods she had been involved with for the past 20 years. They served a Middle East type menu–hummus, tabouli, pita sandwiches, Greek salads, etc.–which were very refreshing at a hot festival. However many regular meat-eating Americans couldn't relate to the food. So they added tempeh burgers, vegetarian chili and chili cheese soup, veggie dogs, organic french fries, and tempeh fries–which could serve a wider array of people. Carol bought her basic foods in bulk (e.g., 24 pounds of tempeh) from Mountain People's Warehouse, a natural foods distributor.

1995–They rented a building on 4th Avenue in the university district of Tucson. They put their crafts/imports into a shop in front called the Creative Spirit Gallery. In the back they developed the tea house concept. Over the past six years they have become a full service restaurant with evening entertainment of music and belly dance. "It is a beautiful international scene that embraces many cultures from around the world. It is decorated with low hand carved chairs from Afghanistan, brass trays from India, a bronze gong and carved wooden statues from Bali, and carpets from Persia. The tea house comes into fruition during the International Gem and Mineral Show when Buddhist, Muslim, Hindu, Christian, and pagan people from around the world come together and be at peace drinking tea and sharing a meal... It is a vision of the beauty and diversity of this world in its fullness."

1997–Carol and Bill split up. He went into retirement and she had a new tent made from hemp fabric and ropes. She continued to travel with the Casbah Tea House on the festival circuit each summer, serving a menu based largely on soy.

1999–The hand-written Casbah Tea House Festival Menu includes Middle Eastern favorites plus: Veggie Dog, Veggie Chili Cheese Dog, Vegetarian Chili, Tempeh (Soy) Burgers, and Tempeh Reuben.

2001 Feb.–The typeset Casbah Teahouse Tour Menu includes some new Middle Eastern favorites plus: Tofu Veggie Stir Fry, Vegetarian Chili, Tempeh Pita, and three types of soy burgers served with blue corn chips and a dill pickle: Tempeh Burger, Tempeh Cheese Burger, and Tempeh Reuben Burger. Veggie Hot Dogs (made from soy and seitan). Veggie Chili Cheese Dogs, and Tempeh Fries. A color photo (8 by 4½ inches) shows the colorful Casbah Tea House tent outdoors at the 2001 Seattle Hemp Fest (Washington state).

2002 spring–Carol Ann expanded, moving the gallery down the street to 549 N. 4th Ave., where it has three times as much space–the fullness to be a real store. The teahouse is now expanding into being a deli, bakery, and cafe in the front of the building. They make a lot of desserts that are vegan and sugar free, using tofu in their frostings. "We struggle with being a commercial operation trying to survive and holding to our values of providing as much organic high quality ingredients as we can.

"All three of my kids are now grown up, ages 21, 23, and 25. Emma attends the University of Arizona in the art department; she is our main baker and cake decorator. Eva is attending Pima College in graphic computer arts and is our main cook. Ethan is a part-time cook. Today I walked in here

© Copyright Soyinfo Center 2013

and there were nine gorgeous girls running around. They're all in their 20s, all vivacious and healthy and beautiful. Emma's assistant in the bakery is Rebecca, who is making tofu cheesecakes; her parents worked with us at Yellow Bean in Detroit, Michigan, when Rebecca was 5 years old. It's pretty neat how everything has come around.

"We are developing are wholesale aspect slowly, providing the co-op with packaged food items that we make. We'll see how it all evolves. What a long strange trip its been. One love." Address: 438 South Star Ave., Tucson, Arizona 85719. Phone: 520-740-0393.

12423. Daimler-Chrysler. 2002. Its a big fat juicy cheeseburger in a land of tofu (Ad). *Time***.** April 8. Inside front cover and page 1.

• ***Summary:*** This ad, a two-page color spread, shows a Dodge Durango SUV pulling a trailer home up a steep grade. The title (a put-down of tofu, see above) is written in big white letters across the bottom of the left page. Across the top of the right page is: "Grab life by the horns: Dodge." The smaller text atop the left page says that Dodge Durango is much better than other SUVs, which are "wimpy wanna-bes."

12424. Asimov, Eric. 2002. $25 and under: Japanese noodles make you forget sushi. *New York Times***.** April 10. p. F10.

• ***Summary:*** This is a review of the Japanese restaurant Onyi (330 Avenue of the Americas, near West Forth St., Greenwich Village–in downtown {southern} Manhattan in New York City). Menchanko means foods mixed together in one huge bowl. "The oyster Menchanko ($12.50), a miso broth with ramen noodles, is thick with fat, tender oysters, chunks of tofu, vegetables and billowy sheets of soy-milk skin [yuba] that look like handkerchiefs but are soft as bean curd."

"The already spicy miso Menchanko ($9.75) is... crammed with shrimp. chicken and balls of salmon along with tofu, soy-milk skin and vegetables."

After 5 p.m. you can supplement noodle dishes with "simple edamame ($3.75), boiled green soybeans that are the Japanese equivalent of salted peanuts, to complex yuba chakin ($6.75), crisp tofu [sic, yuba] purses stuffed with vegetables and crab meat."

Note: The word "Oni" means devil in Japanese.

12425. Vaidya, Achutananda. 2002. Re: Answers to questions on soyfoods in Nepal. Letter to William Shurtleff at Soyfoods Center, April 12. 3 p.

• ***Summary:*** On 19 Jan. 1993 William Shurtleff, founder of Soyfoods Center, wrote Mr. Vaidya a series of questions based Mr. Vaidya's last letter. Mr. Vaidya and his uncle seem to be the first people to make tofu in Nepal, so details of their work are very interesting from an historical point of view.

"First, questions about the work of your uncle, Raghubir Baidya. (1) Did he ever sell any of his tofu? Even a few cakes? He Must have sold a few cakes if he tried for several months?" Answer: "First he made Tofu for his own consumption only." He did not sell that tofu. At that time none of the Nepali people understood what tofu was, so he had no idea of selling it.

(2) "At what address did he make his tofu at his residence in Kathmandu?" Ans: The address of his residence in Kathmandu was Tripureswar, Kathmandu, Nepal. Now his family address has changed.

(3) "Did your uncle ever mention that tofu was made commercially (= for sale) in Tibet? Have you ever heard that it is?" Ans: "No I never heard my uncle mentioning that Tofu was made commercially in Tibet. He had no idea about it." I heard he had only one Tibetan friend.

(4) "You said he started making tofu for 'domestic consumption.' Does that mean he made it, free of charge (of course) for members of his immediate family? How did they cook and serve it (what kind of recipes?). Did he also give it to members of his extended family such as brothers, nephews? Did you ever taste it? What did you think of it? How was it prepared when you tasted it?" Ans: Yes, at first when he started making Tofu he made it free of charge for members of his family. At first Tofu is fried in oil. And then it is used with vegetables as a delicious food," like pickles etc. "Yes he gave it to his extended family members. Yes, I've tasted it. I think Tofu is an excellent food for helping to solve world food crisis because it is a high quality nutrition food and the cost is very low. I tested it; I thought it was like a vegetable." I studied your book, *The Book of Tofu***.**

(4a). "How often did you watch your uncle making tofu?" Ans: "Sometimes I watched him making tofu."

(5) "Did he do a special demonstration just for you to teach you the process or did you just watch him while he was making tofu as usual?" Ans: "He never did a special demonstration to teach me but I learned by watching him as usual."

"My uncle was not interested in Tofu because the Nepalese people were not interested because it was a new product for them." The Nepalese concept of the soybean is that it is very cheap and used only by low-class people. "But I was very interested because it was of high quality nutrition and the cost was very low.

"At first no one knew that Tofu was soybean cakes. My uncle's family also didn't know it. They just called it using the Nepali words *Bhatamass Ko Paneer."* But when my friend Mr. Akifumi Nakamura came to Nepal from Kobe, Japan, in 1972, he suggested to me that I call this product Tofu. "Mr. Nakamura was the one who saw my interest in Tofu and taught me to make tofu. He came to Nepal in 1972" to work with Japan Overseas Cooperation Volunteers (JOCV) for two years. He worked at the Central Food Research Laboratory in Kathmandu. During this time he taught me to make Tofu during his after office hours.

© Copyright Soyinfo Center 2013

Then I learned how to make tofu. I started making tofu commercially in Dec. 1974, first at my own residence to keep my expenses low. I started by selling it to small shops and many other places. Then I developed recipes and sold it to even more people. And slowly the people of my country came to understand it as well. At times Mr. Nakamura would help me and we imported some machines from Japan. Then I started commercially.

"Now I want to ask about your company, Nepal Soya Industries. I think you were a pioneer in Nepal not only with tofu, but also with other soyfoods! (7) In what month and year did you start to SELL each of the following soyfoods commercially in Nepal. And approximately what percentage of your total sales does each account for now? Ans: (7a) Shree Akita Miso = Akadashi Miso. Started Oct. 1986. I made miso and sold it in Japanese hotels and restaurants. Even now no Nepalese people know about miso. It accounted for 15% of total sales. Now it is named Akita Miso.

(7b) Soya sauce. Started in March 1982. When I started to make soy sauce nobody knew what it was. Nowadays some people in the cities know about it. And also some local restaurants used soya sauce. It accounted for about 25% of total sales.

(7c) Dry Tofu. I tried making it but never sold it commercially because there was no interest.

(7d) Soya Milk. At first the Nepalese people had not heard of soya milk, but after a few years one International company started it. They named it Indreni Soyamilk. But after some years they stopped selling it. (7e) Soya Curd. I started making it in 1985. It is a part of Yogurt we used. It is sold commercially. But now lots of dairy companies make it commercially, so I stopped producing it. During the period 1985-1990 it accounted for about 10% of sales.

(7f) Vita Tofu. It started making it Dec. 1974. I stopped making it during 1983-185 because at that time I went to Japan and could not manage my factory. My children could not do the work for me. From 1986 to 2000 we again made Vita Tofu, but last year our country had a crisis–the Royal Family accident. Nowadays Maoists are attacking most parts of our country. And now the Nepalese Government has issued an Emergency. Because of this, tourists have stopped visiting Nepal. My business fully depends on tourists. So last year I had to stop making tofu. It once accounted for 40%. "I am interested in working with soyfoods in any country. If you will arrange it I am always ready for it."

(8) "Please circle each product for which you were the first person in Nepal to make that product commercially." Ans: He is not sure, so he circles only Tofu in 1974.

(9) "Are you making all these products commercially now? Are you making any others? Is making soyfoods your main source of income now?" Ans: Nowadays I produce it on a very small scale and this is my main source of income. But now I am retired from my job also [on 15 March 2001 at the Central Food Research Laboratory in Kathmandu and as a food inspector].

(13) "You said that in Japan you learned to make moyashi. Were these soybean sprouts or sprouts from other kinds of seeds?" Ans: They were not soybean sprouts but rather sprouts from some kind of black seeds [probably black mappe].

Mr. Vaidya attaches his business card and a 2-page curriculum vitae with a portrait photo attached. He was born on 28 Dec. 1947. Address: Founder and owner, Nepal Soya Industries, 9/374 Bhedashing, Jamaguthi, Kathmandu, Nepal.

12426. Beyer, Lisa. 2002. The happiest runaway. *Time.* April 22.
• ***Summary:*** Bonnie Raitt describes herself as frugal. "After the band's post-concert meal, she tries to persuade the road manager to pack up the leftover tofu and brown rice. 'Otherwise,' she laments, 'they're just going to throw it out.'"

12427. Klein, Barbara P.; Cadwallader, Keith R.; Chen, Dejun; Khanna, Pradeep; Weingartner, Karl E. 2002. Tofu in the American kitchen. Champaign-Urbana, Illinois: Illinois Center for Soy Foods. 42 p. Illust. No index. 24 cm.
• ***Summary:*** Contents: Introduction: Bringing soy foods to the America table, Illinois Center for Soy Foods, why eat soy?, what is tofu?, types of tofu, storing & buying tofu, tips for using tofu. Recipes (28 recipes). Every right-hand page contains an elegant full-page color photo of the recipe to its left. Most of the recipes are meatless, but a few (such as Tofu-enhanced meatballs, with 2 lb ground beef or turkey) call for the use of meat.

Talk with Barbara Klein. 2002. Aug. 1. This book, the Center's first, was published in April 2002. Each of the recipes was graded, and only those with top grades were included in the book. The Center hopes to publish at least one cookbook a year in the future. Address: 1. PhD, editor, Director, Illinois Center for Soy Foods, 170 National Soybean Research Center, 1101 Peabody Dr., Univ. of Illinois, Urbana, IL 61801. Phone: (212) 244-1706 or www.soyfoodsillinois.uiuc.edu.

12428. **Product Name:** Mori-Nu CalipSoy Smoothie [Wild Berries & Soy, Tropical Fruit & Soy, Strawberry Banana & Soy].
Manufacturer's Name: Morinaga Nutritional Foods, Inc.
Manufacturer's Address: 2050 W. 190th St. #110, Torrance, CA 90504. Phone: 1-800-669-8638.
Date of Introduction: 2002. April.
Ingredients: Wild Berries & Soy: Silken tofu puree (water, whole organic soybeans*, magnesium chloride, calcium

© Copyright Soyinfo Center 2013

chloride), chicory syrup, white grape juice concentrate, red raspberry puree, blackberry juice concentrate, natural flavors, pectin, citric acid, gum arabic, red cabbage color. * = Grown and processed in accordance with the California Organic Foods Act of 1990.
Wt/Vol., Packaging, Price: 11 fl oz (325 ml) Tetra Brik Aseptic carton with foil pull tab.
How Stored: Refrigerate after opening.
Nutrition: Per package: Calories 270, calories from fat 50, total fat 6 gm (9% daily value; saturated fat 1.0 gm), cholesterol 0 mg, sodium 35 mg (1%), total carbohydrate 43 gm (dietary fiber 1 gm [4%], sugars 39 gm), protein 10 gm. Calcium 10%, iron 8%. Percent daily values are based on a 2,000 calorie diet.
New Product–Documentation: Products (all 3) with Labels and leaflet (color) sent by Morinaga. 2002. April. 4 by 3 by 1.8 inches. Purple, red, or pink on white. Color photo of a glass filled with smoothie; two straws are inserted, a berry is wedged on the rim, and berries are clustered around one side of the base. "Dairy free. All natural. Refrigerate for quality. 9 gm non-GMO soy protein." The back panel states: "CalipSoy Smoothies from Mori-Nu satisfy your body's thirst for sun-ripened fruits picked at their peak of perfection blended with our creamy tofu puree." In the lower right is the heart health claim. One side states: "33% pure juice. 54% tofu puree. No preservatives. No irradiation. 9 gm soy protein per serving... Lactose free. Kid-friendly."

12429. Treloar, Brigid. 2002. Tofu. Singapore: Periplus Editions (HK) Ltd. Printed in Singapore. 112 p. Illust. (color). Index. 25 x 24 cm. Series: The Essential Kitchen.
• ***Summary:*** This is a beautiful book, with stylish and informative full-page glossy color photos on every other page. It is well researched, comprehensive, and generally uses standard tofu and soyfoods terminology. It is also strange: We are not told in which country the publisher is located (perhaps Hong Kong or Singapore) or where the author lives. It is distributed in North America, Japan and Korea by Tuttle Publishing. On the inside rear dust jacket: www.tuttlepublishing.com. It is clearly targeted at a world market.

Contents: Introduction. Tofu glossary (introduction, firm and soft tofu, firm and regular tofu, fresh tofu, silken tofu, soft tofu, extra firm tofu, powdered tofu {or instant tofu or soy milk powder}, nigari tofu, flavored or dessert tofu, grilled tofu {yaki-dofu}, deep-fried tofu {age}, freeze-dried tofu {koya-dofu}, thin deep-fried tofu {aburaage or usuage}, thick deep-fried tofu {atsuage or namaage}, seasoned tofu pouches {for *inari-zushi*}, tempeh). Creating texture and flavor. How to use tofu: How to cut tofu, making a chrysanthemum flower, how to remove excess moisture, how to change soft tofu into firm, how to prepare tofu for cooking (marinating, grilling, pureeing or blending, parboiling / braising, panfrying / stir-frying, scrambling, steaming, deep-frying, smoking, how to reconstitute freeze-dried tofu, how to prepare deep-fried tofu for cooking, substituting tofu in recipes). Appetizers Snacks and light meals. Soups. Baked dishes. Stir-fries. Grilled dishes. Noodles, couscous and rice. Vegetables. Salads. Desserts. Glossary (of general ingredients, incl. soy sauce, Teriyaki sauce). Guide to weights and measures.

Note: This is not a vegetarian cookbook. Some recipes call for pork, chicken, fish (salmon, trout, tuna), etc.

Talk with representative of Tuttle Publishing, Vermont. 2004. May 8. Brigid lives in Australia. Periplus, created in 1997 by Tuttle, is located in Singapore and a sister company of Tuttle. Address: Food writer, stylist, consultant, and cooking instructor [Australia].

12430. *SoyaScan Notes.* 2002. The American Tasting Institute (ATI/AOTA) and their Gold Taste Awards (Overview). May. 18. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** The following information comes mostly from the company's website: www.awardsamericas.com. The American Tasting Institute is a private organization, founded in 1985, comprised of about 35,000 professional chefs. They are headquartered at 211 Sutter St., 5th Floor, San Francisco, California 94108. Phone: 415-982-0781. The organization is also called AOTA = Awards of the Americas.

In awarding gold medals, at least six leading chefs conduct a double-blind test on products in a specific category. The highest scoring product in each category is offered the Institute's Commercial Gold Medal Endorsement Program. It is offered to only one company in each category. Acceptance requires payment of an annual fee.

The following companies have accepted gold medal awards in soy-related categories (mostly in the natural-foods category): Soybean milk–Vitasoy. Soy chips/crisps–Snackie Jack. Soy protein drink: Next Nutrition, Inc. Yogurt, soy–Silk Cultured Soy (White Wave). Tofu–Nasoya. Veggie Burgers–Worthington Foods / Morningstar Farms.

12431. Asimov, Eric. 2002. $25 and under: A Sichuan place that puts its name on the line. *New York Times.* May 29. p. F7.
• ***Summary:*** This is a review of the Chinese restaurant Spicy and Tasty, located at 133-43 Roosevelt Ave., Flushing, Queens. Among the "Best dishes" are Lamb with bean sauce, and Ma-po bean curd.

In Sichuan cookery, "la" refers to the spiciness imparted by chili peppers or oil, whereas "ma" refers to a flowery, tingly sensation imparted by Sichuan peppercorns.

The writer loved "the hot bean paste sauce that encased a whole fish." "But the spiciness of ma-po bean curd, made with ground pork, gave shape to this otherwise bland dish."

"But nothing poses a more difficult obstacle than what is disguised on the menu as ma-la fried tofu. This benign name

© Copyright Soyinfo Center 2013

conceals a fermented bean curd dish that, in Taiwan, where it is prized, is known more accurately as 'foul-smelling tofu'" [probably *ch'ou toufu*].

12432. Annapurna. 2002. Annapurna: zdrava hrana [Annapurna: Healthy food (Leaflet)]. Zagreb, Croatia. 1 p. Front only. Each panel 15 x 10.5 cm. [Cro]
• ***Summary:*** This small leaflet is printed in dark green ink on beige paper. On the front panel, below the name of the company, Annapurna, are listed four tofu products, tempeh, and 3 seitan products; no weights or prices are given. Address: Zumberacka 36, Zagreb. Phone: (01) 3010 915.

12433. **Product Name:** Tofutti Mintz's Blintzes: Dairy-free Cheese Filled Crepes.
Manufacturer's Name: Tofutti Brands Inc.
Manufacturer's Address: 50 Jackson Dr. (P.O. Box 786), Cranford, NJ 07016. Phone: 201-272-2400.
Date of Introduction: 2002. May.
Ingredients: Crepe: Water, enriched wheat flour (niacin, iron, thiamine mononitrate, riboflavin), starch, egg whites, canola, lecithin, salt. Filling: Tofutti Better Than Cream Cheese (water, partially hydrogenated soybean oil, tofu, isolated soy protein, maltodextrin, salt, guar seed gum, carob bean gum, mono and diglycerides, carrageenan, natural flavors), matzo meal, seasonings.
Wt/Vol., Packaging, Price: 6 pre-baked crepes (12 oz, 340 gm) in paperboard box. Retails for $2.29 (2002/05 Lafayette, California).
How Stored: Frozen.
Nutrition: CheeIngr
New Product–Documentation: Product with Label purchased at Trader Joe's in Lafayette, California. 2002. June 2. 7.75 by 5 by 1 inch. Paperboard box. Red, yellow, white, and black on purple. A color photo on the lower right front panel shows two blintzes (one cut open), surrounded by strawberries on a white plate. Front panel text: "Tofutti: Living dairy free. Wow! Taste me please. Dairy free. Cholesterol free. Lactose free. No butterfat." On the back panel is a small photo of David Mintz with his signature. "Enjoy in best of health. Since 1981." Soyfoods Center taste test. 2002. June 3. Delicious; slightly sweet. Good flavor, texture, and packaging.

12434. Willems, Nadine. 2002. Tofu: The taste of a hundred things. *Winds* (*JAL Group–Japan Airlines*) 22(12):19-25. May. [1 ref]
• ***Summary:*** "As versatile as eggs or potatoes, but far better for you, tofu–or bean curd–left the specialist health stores in the West long ago and is now a familiar sight on the menus of fashionable restaurants." Starts with a description of making tofu at 5:00 a.m. one morning at Futaba tofu shop in Tokyo's downtown Ningyocho area. A one-page sidebar discusses the *Tofu Hyakuchin* (One Hundred Tofu Delicacies), published in Osaka in 1782 during "The Golden Age of Tofu."

Superb color photos show: (1) A Yokohama tofu maker at work early one morning. (2) Soymilk being poured into a wooden forming box to make silken tofu. (3) Dried yellow soybeans with a wooden measuring box (*masu*). (4) Freshly made silken tofu being cut away from the sides of a forming box. (5) Large block of tofu, held with one hand, being sliced into cakes under cold water. (6) Deep-fried tofu (Ganmodoki and aburage) draining on a bamboo mat (*sudare*). (7) Many tofu dishes served at Ume no Hana chain restaurant. (8) Tofu dengaku. (9) A cake of tofu being held out in one hand.

12435. Rayner, Jay. 2002. Shanghai surprise. *Observer* (*London*). June 9. p. G57.
• ***Summary:*** This is a review of the Shanghai-style Chinese restaurant The Capital (8 Gerrard St., London, W1). A Shanghai-style cold plate combination was served. On one side was "a pile of braised bean curd." "The bean curd was dense and dark and sweet and, oddly, a little like very tender beef."

12436. United Soybean Board. 2002. National report 2002-2003: Consumer attitudes about nutrition. Seattle, Washington. 8 p. June. 22 x 21 cm.
• ***Summary:*** This ninth annual nationwide survey, commissioned by USB, was conducted in early 2002 by an independent research firm in Seattle, Washington. Random telephone interviews were completed with 1,000 consumers. The study's margin of error is ±3.1 percent and has a confidence level of 95%.

Contents: Introduction and methodology. Nutrition concerns and habits. Consumer awareness of nutrition terms and information. Consumer perceptions of cooking oils. Consumer attitudes about fats. Consumers on soyfoods and health: Perceived healthfulness of soy products (74% healthy, 19% neutral, 7% unhealthy), awareness of health benefits of soy (heart health 39%, menopause relief 18%, cancer prevention 16%, osteoporosis prevention 4%, good source of protein 4%, other 19%), where consumers get information on soy and health (magazines 42%, TV news 22%, newspapers 20%, friends/family 20%, etc.). Soyfoods: Consumption and trial (42% of Americans report they consume soyfoods once a month or more, while 28% consume soyfoods weekly, up from 27% last year. 30% of consumers say they never use soyfoods, down from 35% in 2001). Consumer perceptions of genetically modified food. Consumer perceptions and knowledge of organic foods (42% of consumers buy organic food products either frequently or sometimes. On an unaided basis, 48% know that organic foods can't contain genetically modified ingredients and 64% know that organics must be grown without pesticides and herbicides).

Percentage of American consumers who have tried various soy products in 2000, 2001, and 2002: Tofu 45%,

© Copyright Soyinfo Center 2013

45%, 48%. Soy veggie burgers 25%, 28%, 35%. Soymilk 25%, 28%, 35%. Soy nuts 14%, 20%, 26%.

Percentage of Americans who consume soyfoods weekly: 24% in 1999, 27% in 2000, 27% in 2001, and 28% in 2002.

Percentage of Americans who are aware of the term "genetically modified": 48% in 1998, 42% in 1999, 58% in 2000, 62% in 2001, and 68% in 2002.

Note: As of Aug. 2008 this full survey is available gratis in PDF format at www.soyconnection.com /health_nutrition / pdf/.

12437. Corliss, Richard. 2002. Should we all be vegetarians? Would we be healthier? Would the planet? The risks and benefits of a meat-free life. *Time.* July 15.
• ***Summary:*** In reference to athlete vegetarians, Time magazine says, "Don't eat meat? Better learn to love tofu and lentils." TV's favorite vegetarian is cartoon character Lisa Simpson [of The Simpsons], age 8; she once had a crush on a guy who described himself as "a Level Five vegan–I don't eat anything that casts a shadow." Ohio Congressman and vegan celebrity Dennis Kucinich says he "feels much better starting his day with miso soup, brown rice or oat groats."

12438. Sachs, Andrea. 2002. Late bloomer. *Time.* July 22.
• ***Summary:*** "She is addicted to junk food, never mind that tofu is de rigeur."

12439. Booth, Greg. 2002. Grown to taste: Researchers test soybeans for Minnesota climates and Asian palates. *Ag Innovation News* (*AURI–Agricultural Utilization Research Inst., Waseca, Minnesota*) 12(3):16. July/Sept.
• ***Summary:*** With AURI's support, Jim Orf (Prof. of Agronomy and Plant Genetics, Univ. of Minnesota) is growing more than 40 lines of food-grade soybeans for testing by Sam Chang (Prof. of Cereals and Food Science, North Dakota State Univ.). Varieties now available for Minnesota growers include Proto and Toyopro. "A self-professed tofu connoisseur," Chang will make the soybeans into tofu, then test the tofu for processing yield (grams of tofu per 100 gm of soybeans), color, protein content, and texture. Chang thinks "tofu is a health food." His research has show that tofu has antioxidant characteristics, and that storage has a big effect on the quality of the final tofu. "For good tofu, smoothness and firmness are desirable, but not too soft, not too firm."

12440. Schwartz, Randy K. 2002. Henry Ford cranks up the soy industry. *Repast: Quarterly Newsletter of the Culinary Historians of Ann Arbor* (*Michigan*) 18(3):8-9. Summer. [23 ref]
• ***Summary:*** A good overview, with some new information. "Chinese immigration to the Midwest also spurred the use of soyfoods there. When anti-Chinese sentiment erupted in California in 1875, groups of Chinese immigrants began fleeing to cities like St. Louis [Missouri], and Chicago [Illinois]. By 1891, there was a community of some 500 Chinese living on South Clark Street in Chicago. In 1911, the Chinese community there moved to 22nd Place and became the anchor of a Chicago Chinatown that still exists. That same year the Chino-American Publishing Co. in Chicago came out with one of the first Chinese cookbooks in the U.S., Jessie Louis Nolton's *Chinese Cookery in the Home Kitchen* (the book was actually published in Detroit)."

A photo (taken in 1998 by Randy Schwartz) shows the main building of the Ford Soybean Mill in Saline, Michigan. "In 1937, Ford dammed the Saline River and built his water powered mill there. Soybeans, purchased from hundreds of local farms, were cleaned and stored in this building, which featured two large hydroturbines. The beans were processed into meal in an adjacent one-story plant. After U.S. entry into World War II, the property was refurbished to produce aircraft bearings. Following the war, the company sold the property and it was run by Soybrands, Inc. Today it is a restaurant called Weller's Carriage House, at 555 W. Michigan Ave."

12441. Shurtleff, William. 2002. Tofu from China to America: Episodes in global diffusion. *Repast: Quarterly Newsletter of the Culinary Historians of Ann Arbor* (*Michigan*) 18(3):4-7. Summer. [23 ref]
• ***Summary:*** A chronology of tofu from 220 AD to the present. Contains 3 illustrations by Akiko Aoyagi from *The Book of Tofu.* Photos show: (1) Portrait of Li Yu-ying. (2) House Foods America Corporation's ceremonial opening in Garden Grove, California. (3) Seventh Annual Tofu Festival in Los Angeles. Address: Founder, Soyfoods Center, Lafayette, California.

12442. *Vegetarian Journal* (*Baltimore, Maryland*). 2002. It's the 20th anniversary of the Vegetarian Resource Group! 21(3):16-20.
• ***Summary:*** A good history and chronology of an important organization, whose guiding lights and coordinators have been Debra Wasserman, Charles Stahler, and Reed Mangels. Contents: Introduction: Thanks to volunteers and supporters. In the beginning. VRG becomes a publisher. Ingredient and restaurant information. The environment. Outreach to health professionals. Educating educators. Every day is busy but volunteers are especially appreciated. Its our business. The VRG in cyberspace. Food service becomes healthier. Thank you.

"The beginning: In Sept. 1982, The Vegetarian Resource Group was founded by a vegan doctor, vegetarian nurse, a Master's swimmer, and two activists. Our goals have always been to: (1) Provide scientific and practical information; (2) Go beyond those who are already vegan and reach the various segments of the community; and (3) Reduce the

© Copyright Soyinfo Center 2013

barriers to becoming a vegetarian.

"The first incarnation of the *Vegetarian Journal* was a 4-page newsletter produced on a typewriter... Early in 1983 we were surprised when people from all over Baltimore jammed our tofu cooking demonstration... How many of you had heard of tofu back then?" That year they also had kids prepare their own healthful snacks at a Children's Fair, "spoke at a high school, sponsored a World Vegetarian Day Conference, gave a cooking demonstration in the plaza next to city hall, donated food to a local soup kitchen, performed cooking demos at local health foods stores, hosted camping trips, organized booths at the Baltimore City Fair, and distributed information at a community college. Another great success was when, on October 1, 1983, our local mayor proclaimed World Vegetarian Day in Baltimore." Read on for more.

12443. White Wave, Inc. 2002. Beyond Tofutown (Card). Boulder, Colorado. 10 panels plus insert. 16 cm.
• ***Summary:*** On the cover of this printed, folded invitation card (each panel is 6¼ by 4½ inches) is a color illustration of the top front of the Boulder theater. On the next three front panels are written (on the Marquis of the theater against an orange background): "An evening in Tofutown," "Another evening in Tofutown," and "Yet another evening in Tofutown," referring to three past celebrations hosted by White Wave at the Boulder theater. On the fourth panel is the large number "25" against an orange background on a yellow field, representing White Wave's 25th anniversary. And on the sixth front panel is "Beyond Tofutown" written in red on the marquis of the Boulder theater.

On the middle back panel we read: "Three things that make our hearts go thump: The ring of the grocery register. The smell of soymilk in the morning. The joy of bringing Texans to Tofutown." "An evening in TofuTown–August 24, 2002 is brought to you by White Wave. The party, like its host, is a testament to sheer persistence. Details from the Boulder Theater, an Art Deco Historic Landmark in downtown Boulder, Colorado. RSVP by August 2nd. 720-565-2301 or Swynegar@whitewave.com." The logo (with a blue and white breaking wave in an oval) reads: White Wave–TofuTown Cards. Illustrations copyright Spark, dutiful servants to the Bean Curd family since 1980.

An insert (black ink on translucent white paper) states: "You are heartily invited to join us in an all new White Wave adventure–A 25th anniversary evening–Beyond Tofutown. In recognition of a job well done and one whale of a ride. Saturday evening, 6:00 p.m. on the 24th of August 2002 at the historic Boulder Theater, on 14th & Pearl.

"The 4th and perhaps most outrageous event along the Silk Road–Indeed, a quantum wiggle in the tofu timeline–So come prepared to shake, rattle & roll to the stylings of Cabaret Diosa.

"Exemplary organic fare offered at 7:00 p.m. A grudging return to real life occurs at 1:00 a.m. No suit. No tie. No problem."

Note: This is to celebrate both the 25th anniversary and the purchase of White Wave by Dean Foods for $180 million. On August 23, the day before this celebration, Steve Demos and his long-time close friend, Sheryl Lamb, were married in Boulder. Tim Redmond (of American Soy Products), who attended the wedding, said it was a beautiful and joyous occasion. Address: 1990 North 57th Court, Boulder, Colorado 80301. Phone: (303) 443-3952.

12444. Friedrich, Kristin. 2002. Soy you like tofu? Little Tokyo festival celebrates the miracle bean. *L.A. Downtown News* (*Los Angeles*). Aug. 5. p. 16.
• ***Summary:*** The festival, part of Nisei Week festivities, will be held on San Pedro between Second and Third Streets in Little Tokyo. General admission is $2, and food prices range for $1-$4 per serving. See www.tofufest.org or www.niseiweek.org.

12445. Fonda, Daren. 2002. Organic growth. *Time.* Aug. 12.
• ***Summary:*** "Whole Foods has transformed the granola-and-tofu lifestyle into a 'supernatural' gourmet chain with delicious profits."

12446. Smith, Craig S. 2002. A Chinese crematory's work is a matter of life: Shanghai journal. *New York Times.* Aug. 12. p. A4 (Natl).
• ***Summary:*** Describes a visit to a crematorium in Shanghai, China. Until recently at Baoxing, the funeral center and former crematory north of Shanghai, mourners ate their ritual "tofu meal," a vegetarian repast in honor of the dead.

12447. Shamin, Brandon. 2002. L.A. Tofu Festival a success. *AsiaWeek* (*USA*) 23(52):13. Aug. 15.
• ***Summary:*** More than 30,000 people attended the seventh annual L.A. Tofu Festival Aug. 10 and 11 in Los Angeles' Little Tokyo. The weekend event, which benefited the Little Tokyo Service Center (LTSC), focused on the health benefits of tofu and soy. The theme this year was "Good for the Heart, Good for the Community." The festival included the third annual Health and Fitness Expo. Sharon Davis, wife of Governor Gray Davis, served as honorary chairperson and made a special appearance to honor LTSC's commitment to the community since 1979. APA = Asian and Pacific Americans. A photo shows Sharon Davis trying tofu goodies in Los Angeles.

12448. American Soybean Assoc. 2002. Cocinando con soya [Cooking with soya]. Mexico City, Mexico: Asociación Americana de Soya. 96 p. Aug. 28 Illust. 28 cm. Spiral bound, [Spa]
• ***Summary:*** A very attractive, colorful and useful book, published on glossy paper. In July 2001 the first national

© Copyright Soyinfo Center 2013

"Cooking with Soya" contest was held at the Institute of Gastronomy in the University Anáhuac del Sur–sponsored by the American Soybean Association. These recipes are the result of that contest. Each page of the book is devoted to one recipe, with the name of the recipe and its creator, the ingredients, method, nutritional content of 6 portions and of one, symbols, and a color photo (6 cm on a side) of each recipe. Main ingredients used: Tofu, whole dry soybeans, textured soy protein, soy sauce, soy sprouts, okara, soy oil,

Contents: About the contest. Editorial. About the Institute of Gastronomy. Color photos showing: (1) A portrait photo of each participant. (2) Each of the many finalists standing behind his or her recipe. (3) The three winners. Symbols. Salads. Main dish. Desserts. Traditional recipes. Address: Jaime Balmes 8–2º piso, Colonia Los Morales Polanco 11510. Phone: +52 5821 0120/6150.

12449. Arnold, Chris. 2002. The Scoular Company (Portfolio). Omaha, Nebraska. Four inserts. 28 cm.
• ***Summary:*** The inserts are: (1) Cover letter, typed with signature on letterhead. Scoular's IP food grain division is comprised primarily of five people, incl. Greg Lickteig and Chris. Greg is the senior manager of the group with 10-12 years of experience in the IP food grade industry. Their main focus is IP soybeans. Scoular works with several private and public seed varieties to provide its customers with a wide selection of soybean varieties, with uses ranging from tofu, soymilk, miso, natto, and textured soy products. IP and Non-GMO certificates are provided upon demand to customers. Scoular's annual volume is about 45,000 metric tons/year of food soybeans; 80% of these are exported to Asia, and the remaining 20% are consumed in the USA. Scoular is QAI, OCIA, and JAS certified. Web: www.scoular.com.

(2) Twelve pages from the company's website. Contents: Welcome to The Scoular Company. Markets: Introduction, producer markets division, processor markets division, flourmill markets division, industrial markets division. Special company capabilities: Foreign subsidiaries (Scoular Canada, Scoular de Mexico, risk management services, alliance & partnership opportunities). Locations: Regional map of North America, incl. Canada and Mexico.

(3) Company history (3 p. card): "For 110 years The Scoular Company has been serving people in Agriculture. It is our past, our present, and our future." 1892–A grain and lumber company was founded by George Scoular in Superior, Nebraska. 1927–George Scoular Grain & Lumber Company was incorporated in Nebraska and Missouri. 1967–A group of grain industry executives headed by Marshall Faith led the company into a new era. These "Young Turks" were hired by Bob Scoular, the new chairman of the board. 1985–The company diversified from grain warehousing to merchandising and distribution. 1998–The Company acquired International Protein Corporation and Industrial Food Ingredients. 2000–The company restructured to address specific market segments.

(4) Issue of *Scoular Connections* newsletter on company history (2002 vol. 7, no. 2). "Scoular celebrates 110 years of serving people in agriculture." 1898–George Scoular invites Dennis Bishop to become his partner. 1926–Bob Scoular was a traveling salesman. 1930–George Scoular died. That year over half of all farms had cars, about a third had telephones, and a little over 10% had electricity. 1954. George Scoular's widow and her two sons bought out the Bishop family interest. That year just over 70% of all farms had cars, a little less than 50% had telephones, and 93% had electricity. 1979–The Young Turks were successful. The company had sprouted in 12 years from a "ramshackle three-elevator operation into a flourishing Nebraska giant of grain, operating 27 elevators and terminals and merchandising 70 to 80 million bushels of corn, wheat, milo, soybeans, and oats each year to buyers all over the world." At the helm was Marshall Faith. Address: 2027 Dodge St., Omaha, Nebraska 68102. Phone: 1-800-488-3500.

12450. Chang, Irving Beilin. 2002. Fuyu: China's fermented soy bean cheese. *Flavor & Fortune* 9(2):9-10. Summer. [5 ref]
• ***Summary:*** The writer grew up in China. His mother was American born and his father (of Chinese ancestry) was a graduate of Yale Univ. [New Haven, Connecticut]. Describes how his family cook made fuyu [fermented tofu] from fresh tofu at home in China. His wife, Wonona, has selected some recipes using this typical Chinese fermented product: Fried bean curd with chili ("with 2 squares fuyu, also known as fermented soy bean cubes, mashed" and "1 square firm bean cube, cut into 1-inch pieces"). Stewed bean curd with dried fish (with "1 pound silken bean curd, cut into ten pieces," "½ square fermented red fuyu, mashed," "½ square fermented white fuyu with chili," and 1 tablespoon fuyu liquid). Chicken with fuyu flavor. Address: Kings Park, New York 11754.

12451. *Natural Foods Merchandiser.* 2002. Organic trends. Aug. p. 7.
• ***Summary:*** Gives two tables from SPINS and AC Nielsen.

(1) Growth of top 10 categories: The top category is "Nondairy beverages." Dollar volume (natural and mainstream): $325,627,220. Year ago dollars: $252,275,334. Growth vs. year ago: 29.1%.

The 10th category is Tofu. Dollar volume (natural and mainstream): $46,381,125. Year ago dollars: $42,971,416. Growth vs. year ago: 7.9%.

Total organic sales: Dollar volume (natural and mainstream): $2,010,633,349. Year ago dollars: $1,637,033,305. Growth vs. year ago: 22.8%.

Table (2) % of dollar sales by channel. For nondairy beverages: Natural product supermarkets: 22.20% Mainstream food stores: 77.17%. Mainstream drug stores:

© Copyright Soyinfo Center 2013

0.21%. Mass merchandisers: 0.42%.

For tofu: Natural product supermarkets: 44.04% Mainstream food stores: 55.94%. Mainstream drug stores: 0.00%. Mass merchandisers: 0.02%.

Total organic sales: Natural product supermarkets: 45.77% Mainstream food stores: 53.78%. Mainstream drug stores: 0.10%. Mass merchandisers: 0.30%.

Note 1. What about natural food stores that are not supermarkets?

Note 2. Each of the above dollar figures seems to us to be 1,000 times too large.

12452. Lukoskie, Luke. 2002. How Luke and Sylvia Nogaki got involved in making tofu (Interview). *SoyaScan Notes.* Sept. 8. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Luke once "lived in a commune and ate tofu and believed in it as the protein source that could reshape the planet. But it never crossed my mind to got into business, making tofu to sell until *The Book of Tofu, Volume II* was available." Sylvia was his girlfriend and she owned a little house on Vashon Island. In Feb. 1976, he and Slyvia had been in Winslow, Arizona, where his friend Dudley Beck would bring him each year; there they first made the commitment to start a company making tofu. Sylvia must have bought one of the first copies of *The Book of Tofu* [which first went on sale in Dec. 1975]; she read it first then gave it to Luke. In Winslow they liked to buy tortillas. He noticed, after reading *The Book of Tofu,* that the stone grinder that this Mexican man used to make his tortillas was exactly like the pictures in the book. "I tried to buy that grinder off him, but of course it was the heart of his business. However he let me in his back room and I thought, 'Gee what a nice guy. He's sharin' information with me.' I think his initial act of giving, telling me that his stone grinder came from J.C. Ford in Los Angeles, California, was what generated and blossomed into the Soycrafters Apprenticeship Program and my personal desire to make a business and to change the world, to educate people, to give information away, and to teach.

"So after Winslow, Sylvia and I went to Los Angeles and we each had a Visa Card. We borrowed $500 apiece. We each had 100 bucks in our pocket and we put every penny down we could scratch up, and for $1,200 we got J.C. Ford to ship the stone grinder freight collect to Vashon, Washington. That was the key, the first step. We went home to Vashon, borrowed money, and started remodeling her house and the little adjacent building. We had a stone grinder coming, we were in business, and we'd better get our tails in gear."

In Sept. 1976 Sylvia Nogaki (Island Spring, Rt. 1, Box 624, Vashon, Washington 98070) ordered two copies of *The Book of Tofu Volume II.* The next month, W.M. Luke Lukoskie (Island Spring, Rt. 1 Box 625A, Vashon, Washington 98070) ordered another copy. In mid-November 1976 they began commercial production of tofu. Address: P.O. Box 747, Vashon, Washington 98070. Phone: 206-622-6448.

12453. Stunkard, Jamie. 2002. Soy pioneers: Where are they now? (Interview). *SoyaScan Notes.* Sept. 12. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Jamie first got involved with soyfoods in early 1976, when he was working at a vegetarian restaurant named Prasad Kitchen in Minneapolis. At the time he was also doing spiritual practice with the Meditation Center, a branch of the Himalayan Institute in Minneapolis–which had was not connected with Prasad. He was also a member of the large and very prosperous Minneapolis Food Co-op system.

In early 1976 Jamie saw and bought a copy of *The Book of Tofu,* probably at the Co-op. Using the recipe in that book, he started making tofu on the stove at Prasad Kitchen for use only in the restaurant. He used Epsom salts as a coagulant since he could find no source of nigari.

On 14 Oct. 1976 Shurtleff and Aoyagi came through Minneapolis on their Tofu & Miso America Tour. They did a program for about 300 people sponsored by Wedge Community Co-op and Ananda Marga. The host was Georgie Yiannias, a woman from the Co-op. After the talk and slide show, there was a large dinner followed by folk dancing. At Prasad, Jamie prepared the tofu for that dinner. He ground the soybeans in a Hobart extruder at Prasad that had just been used to grind walnuts for baklava (a dessert). Because of the walnuts, the tofu came out purple. Jamie recalls that someone at the dinner asked why it was purple. Shurtleff, who had no idea why, ad-libbed in jest that it was "probably contaminated with some cancerous mold." The problem disappeared.

That program inspired Jamie to start a tofu shop. He knew he had a ready market at the Food Co-op system. At the time, Jamie approached Pat Aylward, who was involved with the meditation center as well, who was unemployed, and was not sure what he wanted to do next. He invited Pat to join him in starting a tofu company. "There's a ready market for it right now; this is the time." So they both worked on it together. Their business, named Joy of Soy, opened for business in July 1978 at 510 Kasota Ave. in Minneapolis, Minnesota 55414. Their first two products were Organic Tofu: Soybean Curd (Regular, or Spiced). That same month they both attended the foundation meeting of the Soycrafters Association of North America, held 28-30 July 1978, in Ann Arbor, Michigan. Not long after that, Jamie met his wife Nancy.

On May 25 1980 Shurtleff and Aoyagi visited Pat Aylward and Jamie Stunkard at Joy of Soy Tofu in Minneapolis.

Today Jamie still owns and runs a small tofu shop, Liberty Soyfoods, at R.R. 1 Box 400, Honesdale, Pennsylvania 18431; it is located in the basement of the Himalayan Institute. There he makes about 180 lb/week of

© Copyright Soyinfo Center 2013

tofu. He and his wife Nancy also run a health food store named Nature's Grace.

Jamie last head of Pat Aylward about 10 years ago. Pat has long been a real estate agent; a top seller in the Minneapolis area, he has became very successful and quite wealthy. "He always had dreams of making a lot of money." Address: R.R. 1 Box 400, Honesdale, Pennsylvania 18431. Phone: 570-253-3469.

12454. Schmit, Matthew. 2002. Soy pioneers: Where are they now? (Interview). *SoyaScan Notes.* Sept. 19. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** September 2002 will mark the 25th anniversary of The Tofu Shop, which began in the fall of 1977 in Telluride, Colorado.

Matthew was born on 13 Sept. 1950 in Duluth, Minnesota. His family moved to Florida when he was in high school. In 1972 he received a degree in social work from Florida State University. Upon graduation, he started working for the state of Florida in its drug prevention social work program. Through training programs, he was exposed to healthy alternatives to a drug-oriented lifestyle–vegetarian food, yoga, etc. He became very absorbed with those new philosophies–like many people in the early 1970s. In 1973 he stopped eating red meat and poultry.

He left his job in late 1973, stopped eating fish, became a vegetarian, and traveled to the West Coast, visiting yoga centers, intentional communities, etc. He visited his sister, Marna, in Arcata, where she was about to have a child. She had married Jack Hice from Florida, where she became pregnant. They wanted to have a natural childbirth–which was against the law in Florida–so they loaded up their possessions in a van and headed west. When they got to Arcata, she was so pregnant they couldn't go any further. Arcata had a great free clinic and midwives, so they settled in Arcata and invited Matthew to attend the birth. Aaron was born in late December 1973.

Shortly after the birth, Matthew traveled with Marna and Jack's family to a remote ranch on the Smith River near Crescent City, California, just south of the California-Oregon border; there they visited Jack's high-school friend, Jackson Hollomon (and his wife, Valerie, and brother, Henry) who were caretaking the ranch for the winter. Matthew stayed for several "magical" weeks, enjoying the wild scenic beauty, crystal-clear air and water, and whole natural foods. One morning he was introduced tofu, purchased fresh locally, and served on homemade whole-wheat bread (made from freshly ground grains) over a bed of sprouts; the tofu was sliced thick, browned in a cast-iron skillet with a little oil, and had soy sauce sprinkled on top. It was good–no big deal.

After that, Matthew traveled to Jackson Hole, Wyoming, to visit some friends from Florida. Together they formed a food-buying club named Body and Soul; they bought bulk natural foods from a company in Salt Lake City, Utah, had them shipped in, then divided them up. Matthew stayed only for the winter of 1973-74. "I was very young and moving fast." That spring, he traveled southward through Colorado, visiting and Naropa Institute in Boulder during its exciting first summer (Ram Dass and Bhagawan Dass and many other spiritual figures were there), and visiting an aunt in Denver. One of her sons, Matthew's close cousin, was in Telluride (located to the southwest), an old mining town with a 3-year-old ski resort. Matthew visited him in the summer of 1974 and ended up staying. The country was spectacular and young city kids were moving in. Matthew was a member of the group that started the food co-op in Telluride, first as a little food-buying club that grew into a store-front co-op called "Winterstash," located in a mini-mall of five tiny shops below the classical old refurbished Sheridan opera house–built in the 1800s. He was very active in the co-op and was on the board of directors. The co-op was also active in leasing land and growing food using sustainable agriculture; the word "natural" was widely used, and the word "organic" was starting to be used. Matthew was practicing yoga regularly, and making part of his living from teaching yoga classes. Eventually he organized and sponsored a woman named Ma Yogashakti Saraswati to come from India to Telluride to lead a week-long yoga workshop and retreat. She eventually came three times, and each visit was very successful. Matthew became very involved with her and her organization. In about 1976 he moved back to Florida to help her buy some property there and to establish and incorporate a meditative community and business office; it is still there and is very successful. Through such activities, Matthew was developing organizational and business experience. After a year, missing the West and the mountains, he decided to move back to Telluride, arriving in the summer of 1977.

While he was gone, Olof Brentmar and his wife had moved to town. They had learned how to make tofu from *The Book of Tofu,* and they started making it in Telluride at The Upper Crust Bakery–at night after the bakery and restaurant had closed. They sold their tofu at the local co-op–perhaps in little plastic bags; Matthew doubts they had a name for their small business. The Brentmars taught the process to a fellow named Timothy Mecke, and Tim taught Matthew. Just as Matthew arrived in Telluride, Olof was bowing out of the scene, and Tim was making the tofu by himself–about 25 lb.–from about 10:00 night until 3:00 in the morning in the restaurant kitchen. Tim and Matthew made tofu together several times in the restaurant, then found a little shop space near the co-op that was for rent–at 116 North Oak Street; they decided to rent the space, increase production, and "make something out of it." They called it "The Tofu Shop"–a humble name that was a basic description of what they did. Nobody coined the name; people just started calling it that–until it stuck. Matthew and Timothy each invested $500. At the time, Matthew had only $65 to his name. However he was able to borrow $250 from

© Copyright Soyinfo Center 2013

each of two friends, Craig Boykin and Gary Lewin. One of the main reasons Matthew started making tofu was because of his interest in vegetarianism; his yoga teacher was also a vegetarian. The basic idea originally was to make tofu and sell it in Telluride; the restaurant idea came later.

The equipment they inherited from Olof included a wooden pressing box (they put rocks on the lid to press the tofu), a 10-gallon ceramic pot for curding the soymilk, a primitive cedar bucket with holes drilled in (that was lined with cheesecloth for pressing the soymilk from the okara). They borrowed a refrigerator and a typical home kitchen stove. They built the entire kitchen out of wood, including counters, sprout racks above sinks, work tables, etc. They had a handyman make a lever press, hinged to the wall; it had a plunger that fit down into the cedar bucket to press the soymilk from the okara. Address: Tofu Shop Specialty Foods, Inc., 65 Martin Ct., Arcata, California 95521. Phone: 707-822-7401.

12455. Schmit, Matthew. 2002. Soy pioneers: Where are they now? Part II (Interview). *SoyaScan Notes.* Sept. 19. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Continued: Initially, they sold all their tofu to the co-op next door. Then people began to come into the little shop to ask what to do with the tofu; for recipes, they referred them to *The Book of Tofu.* Within a month, they decided to build a little wooden counter (so people couldn't walk into the production area) and began selling tofu directly to consumers out of the shop. The co-op didn't mind. "We were all in it together."

Their original logo was a dragon; a woman artist in Telluride had painted it (copying a Chinese vase), and fired it on four tiles, then framed. Matthew and her husband taught Yoga classes together, and he knew their family very well. Matthew traveled with the husband to Durango; he opened the back door of his van and a box of the finished tiles fell out and were damaged. He picked one up and gave it to Matthew; it was a dragon. Matthew liked it, drew a circle around it, and decided to use it as the new company's logo. He hung the four tiles outside the shop door; she then painted "The Tofu Shop" on some new tiles, which were framed and hung below the dragon. The nearest alternative community was in Boulder, about 4 hours by car. They visited The Spinning Kitchen and White Wave, two early tofu shops in Boulder. Once they bought soybeans from Steve Demos of White Wave.

On 8 Dec. 1977 the earliest known article about the little company appeared in the *Telluride Times* on page 11. Titled "Tofu prepared daily in Telluride shop." It gave a brief history of tofu and described the new company; a photo shows Matthew, Susie Imbarrato, and Tim Mecke–all holding a tray of sprouts.

In late 1977 or early 1978, Tim Mecke left the business. Matthew changed the ownership of The Tofu Shop to a worker-owned collective (legally a co-op, if he remembers correctly), although his name was on all legal documents.

About 3 months after the company started, they decided to install a take-out food window. The daily schedule now changed; they made tofu starting at 3:00 in the morning then cleaned and were out by 10:00 a.m.–when the people who made the restaurant products would show up. They developed a nice little two-sided vegan menu–no animal products. Their first deli items were 3-4 tofu sandwiches. Spinning Kitchen in Boulder made a "Kung Fu" open-face tofu sandwich; Matthew's cousin loved it and brought him the recipe; it was a slab of tofu grilled in a skillet with soy sauce and maybe some sesame seeds on top–very simple. Another was a mock tuna salad sandwich. They also made and sold tofu salads, and a tofu dressing, and soyburgers–made with cooked soybeans rather than tofu. Once a month they would boil big pots of soybeans and of rice, then add carrots, spices, etc., mash it all together, run part of it through a Champion Juicer, shape into patties, fry hundreds and hundreds on a skillet, then freeze them. One year the smoke from frying disrupted the fledgling film festival in the opera upstairs. "We filled the opera house with smoke." The guy who organized the festival rushed down to ask "What are you guys doing?"

Note: This is the earliest English-language document seen (June 2006) that mentions the "Champion Juicer."

In 1978, about 6 months after starting The Tofu Shop, Tim, Matthew's partner, decided that making tofu was not the work for him; he was more of a carpenter. He gave Matthew his half of the company, but Matthew insisted on paying him for it. Years later, Tim popped into Arcata and was pleased to see Matthew making tofu there.

Matthew now started to run the business alone; he quickly felt overwhelmed, having no employees. He needed help. He hired a few people to help him make the tofu. But soon a little group formed around the shop–4-5 people who were loyal to the shop, very interested in tofu, and wanted to come in and learn and work. Matthew has always considered what he is doing as teaching, but he still preferred to pay people in exchange for their work.

The little group of loyal people decided to make The Tofu Shop a worker-owned business. People owned shares, and there was a constitution and by-laws based on a worker-owned restaurant in Santa Fe, New Mexico, that Matthew had learned about; he obtained copies of their documents. Telluride is located on the Uncompahgre Plateau of the Rockies; there is also an Uncompahgre River and an Uncompahgre Peak. So the little group decided to create a new organization named Uncompahgre Natural Foods; it was a legal holding company "that ran The Tofu Shop as a vehicle for its mission, which was developing sustainable vegetarian foods."

Matthew was the "mover and shaker" of the group; he had his name on all the legal and tax documents. He was

© Copyright Soyinfo Center 2013

working full time and putting in lots of hours; most of the others were working part time and were less involved. The new ownership structure worked well. They would have business meeting every Sunday and make decisions based on consensus. Matthew made enough money to live in a nice rented stand-alone home–not an apartment.

At about the same time The Tofu Shop rented first one and then another shop space on both sides to their original space. The co-op also expanded into a second space, so between them they filled the entire mini-mall. The Tofu Shop's three rooms were used for: (1) Production of tofu and deli items. (2) A restaurant in the front space, which they remodeled themselves–with all wood and sit-down tables. (3) Sprout production–alfalfa, mung beans, radish seeds (no soybeans). Initially they grew the sprouts only for use in their sandwiches, but soon they began selling them in the co-op in plastic bags.

Also at about that time they started distributing tofu and sprouts beyond the co-op–starting with a small supermarket in Telluride. Red Hat produce company, which brought the only fresh produce up from Grand Junction once a week, took The Tofu Shop's products back down the mountains, and distributed them to health food stores and co-ops in Montrose, Durango, and Grand Junction. They also flew tofu up to Aspen where they competed with White Wave. "We had the western slope of the Colorado Rockies; White Wave had the eastern slope." Address: Tofu Shop Specialty Foods, Inc., 65 Martin Ct., Arcata, California 95521. Phone: 707-822-7401.

12456. Schmit, Matthew. 2002. Soy pioneers: Where are they now? Part III (Interview). *SoyaScan Notes.* Sept. 19. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Continued: In late July 1978 tofu makers from across America met for the first time in Ann Arbor, Michigan, and formed the Soycrafters Association of North America. Those announcing the meeting were unaware of The Tofu Shop in Telluride so–unfortunately–no one from Matthew's group attended, although Catherine Peterson and one other person did attend the second meeting in 1979 at Amherst College in Massachusetts.

In 1978, as an expression of their abundant energy, the group published a booklet titled "Peaking out on tofu." It was handwritten with brown ink on beige paper and contained 20 recipes. On the rear cover was the logo (dragon in a circle) and these words: "these original recipes sprouted in the kitchen of the tofu shop and are prepared with care by the telluride tofool family using our own homemade soy products. Special thanks to: Catherine Peterson, Kathy Greene, Barton Coffman, Becca Smith, and Sharyn." The booklet was for education and publicity. There was no price on it and Matthew thinks they probably gave it away. Other key people in the "core group" were Joel Rosenbloom (Matthew's right-hand man), Christie and Laurie Mather, and Andy Kahn (who ran the sprout operation).

In Nov. 1978, Craig Boyken sculpted a Tofu Turkey from a large block of tofu made by The Tofu Shop. About 30-40 people, including all workers from The Tofu Shop, gathered in his artist's studio for a potluck vegetarian Tofu Turkey Thanksgiving dinner–probably the first in American history.

One day after Catherine Peterson arrived, the group was invited to the Navajo reservation in the four corners area and to do a tofu-making workshop. It was organized by the farm extension, home economics folks. There was a room full of traditional Navajo women and one social worker. After showing the women how to make tofu and passing out samples, a Navajo woman suggested using fine-weave Nylon paint straining bags (which are inexpensive and widely available at hardware stores) for straining the soymilk. Matthew has used that idea for years.

One day in April 1979 the president of the Bank of Telluride brought Matthew a front-page article from the *Wall Street Journal* titled "Good old bean curd is suddenly popular, but you call it tofu" (April 12). Matthew learned more about other tofu makers across America.

In the spring of 1979 Matthew and Christie Mather, a member of The Tofu Shop group, took a trip to California. In about 1977 Matthew's sister, Marna Utman, has relocated to Arcata, California (where her first child had been born) so her husband could attend Humboldt State University. They had become involved with a small group that was interested in buying land together and forming an intentional community. They had been meeting once a week for several years. They had reached the point where they want to establish a business, which would help them raise the money needed to buy the land. Marna mentioned that she had a brother who making tofu as a business. So the group invited Matthew to come to Arcata (at his own expense) and teach them how to make tofu (free of charge). So Matthew and Christie hitchhiked to California from Telluride–a sort of spring vacation, but teaching people how to make tofu on a home scale wherever they stopped–first in Arcata, then in Ashland, Oregon (where they had friends). and finally in the Dalles, Oregon. Typical attendance at each of their three "tofu workshops" was about 12 people. Each class was a combination of hands-on tofu-making and viewing the color slides that Matthew carried in his backpack–along with some nigari and booklets that he passed out at each workshop. Their efforts planted seeds. In Arcata, the group of people trying to form a community, continued for several years to make tofu and tofu burgers in people's kitchens then sell these from a booth at fairs to raise money. In the kitchen of the Ashland Co-op, people soon began to make tofu; they were still making it several years later when Matthew returned to visit.

Matthew and Christie then hitchhiked north to Vancouver Island, then east to Glacier Park, and back home

© Copyright Soyinfo Center 2013

to Telluride–where they returned to their work at The Tofu Shop.

One of the small group of people who owned The Tofu Shop was Suzanne Kosciolek (pronounced kos-ee-OH-lek). In late 1978 she had moved to Telluride as a sort of tourist from Albuquerque, where she had been involved with a small yogurt business–so she came into the group with food processing and business knowledge. Matthew met her one day on the street, and she was soon involved with The Tofu Shop. Suzanne had a van; Matthew didn't.

Telluride was a beautiful town, but the population was small and it fluctuated during the year, from a low of about 1,200 permanent residents during the early spring and early fall, to perhaps triple that amount during the ski season (starting with the snows in the late fall) and the summer season of hiking, camping, enjoying the spectacular scenery, and attending various festivals such as the Bluegrass Festival, the Jazz Festival, and Film Festival. The Tofu Shop and co-op had food booths at some of these festivals.

Four interesting ads from the *Telluride Times* (1979) survive. All have a large illustration of the dragon and "Traditional vegetarian cuisine" as part of the company logo. The Tofu Shop is still located in Telluride at "116 N. Oak–on the Sheridan Mall." One from March 1979 states: "Menus from different nationalities every night. Whatever you're in the mood for, we can probably help you out. Thurs. 3/15 [Thursday, March 15]. Tofu Turkey, Vegetable stuffing, baked potatoes, fruit salad." Note: The Tofu Shop in Telluride is now selling "Tofu Turkey" commercially, with all the trimmings–even though it was out of season.

Fri. 3/16. Pizza, Minestrone soup, Tossed green salad.

Sat. 3/17. Ganmo (Mock Goose), Stir-fried vegetables, miso soup, etc.

A second ad from April 1979 reads: "Thank you Telluride for a successful winter season. We will be closed for a week of remodeling beginning Monday, April 9, reopening Monday, April 16. During this week, Tofu and Sprouts will be available at Winterstash and Roses."

A full-page typed sheet titled "Our favorite tofu recipes," undated but probably from 1979, has as its 1st recipe "Tofu Turkey with Mushroom Gravy (serves 12-16)." There are also recipes for Tofuburgers, Spicy tofu and rice burritos, and Creamy tofu salad dressing. Address: Tofu Shop Specialty Foods, Inc., 65 Martin Ct., Arcata, California 95521. Phone: 707-822-7401.

12457. Schmit, Matthew. 2002. Soy pioneers: Where are they now? Part IV (Interview). *SoyaScan Notes.* Sept. 19. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Continued: Matthew and Suzanne had developed a close personal relationship. In favor of their continuing relationship, they decided to get Matthew out of tofu-making because it was burning him out. So, in late 1979, they decided to leave Telluride together–for where they did not know–to set up another, better-organized tofu shop in a larger community. There were big meetings with the other owners about how to make the transition. Mathew encouraged the members of the cooperative to sell it in order to pay off debts and dissolve the business. Finally the business was split into three parts and each part sold separately, with one group (Catherine Peterson) getting the restaurant (which she renamed Far Pavilions), another the tofu-making and other food production (Joel Rosenbloom was very disappointed he did not get this part), and a third the sprout growing. The New owners of the sprout business renamed it Mt. Sprouts. They hired an attorney and it was all done carefully and legally. The Tofu Shop had been profitable since almost the first day. Each worker was paid the same rate per hour–but Matthew worked many more hours than the others. This enabled Matthew to live off his share of the profits. The new owners took over all existing debt. Both the tofu and sprout companies folded from poor management shortly after Matthew left, but Far Pavilions continued for many years. A woman named Sharon (about age 40) and her two sons ended up owning the tofu production company.

In 1978 Matthew heard that Spinning Kitchen in Boulder had stopped making tofu. Their shop had been upstairs in a building, and water had leaked through the floor into the restaurant downstairs. A couple had bought their classic tofu equipment, moved it to Carbondale, Colorado (near Aspen), started a small tofu shop, and began making tofu–the reincarnation of The Spinning Kitchen. Matthew also heard that this couple had decided to stop making tofu and that their equipment was for sale.

So in about Oct. 1979 Matthew and Suzanne drove to Carbondale and met the two people, who took them to a storage unit where they had all their possessions (both tofu equipment and personal) in storage: A big cast-iron pot on three legs, capacity about 25 gallons; a hand-made cedar curding barrel (which Matthew still uses as an end table in his living room); an old apple-cider press that was used to press soymilk from the okara; and a great old grinder with metal plates, a hopper on top, a fan belt and an electric motor below, made by C.W. Bell Co. in Ohio. Matthew ended up buying this classic old equipment for several hundred dollars. He brought it back to Telluride. Note: Matthew may have a receipt on which he can verify names of people & Co.

By the fall of 1979 Matthew and Suzanne were looking for a larger community in Colorado–preferably on the east slope of the Rockies. They had obtained a 4-level pizza oven from the Upper Crust Bakery Telluride, and a 6-foot-square walk-in cooler; they hoped to eventually start a small bakery and soy deli–somewhere.

In Oct. 1979 they drove to Durango–which is about 2 hours by car south of Telluride. One of Matthew's customers was there and the city had a great co-op. Matthew and Suzanne actually rented a space to start a tofu shop there,

© Copyright Soyinfo Center 2013

made a deposit, and began converting the building. Then they realized that Durango is surrounded by huge mounds of toxic "mill tailings" from the old mining days. No plants will grow on them. One day they decided that, for their health, they didn't want to stay there. So they lost their deposit and headed back to Telluride. They never settled in Durango and never moved their tofu equipment there.

In Telluride, Matthew helped out at the tofu shop and at the co-op–where he was on the board of directors. But winter was coming on, and he and Suzanne were living in a small travel trailer in the town campground. They had some friends, the Boykins, in Telluride who were planning to go to Point Area, California, located just south of Mendocino. Craig Boykin and his wife, Anne, had rented a U-Haul truck; the tofu equipment, pizza oven, and cooler were loaded onto this truck and Craig drove it to Point Arena, California.

In Nov. 1979, in the midst of a snowstorm, Matthew and Suzanne, now very close, said their farewells, left Telluride in Suuzanne's van, and headed west for California. Arriving in Point Arena, they visited with Craig Boykin, and talked about setting up a tofu shop in Point Arena, but decided they weren't ready yet. They continued up the Pacific Coast looking for a community or town in which to settle, arrived in Arcata and visited Matthew's sister, then continued up the coast to Ashland (Oregon) and on into Washington state. Returning to Arcata in early 1980, they began looking for a job. Suzanne quickly found one with United Naturals, a natural foods distributor in Eureka run by Jethren Phillips–who later founded Spectrum Naturals–the vegetable oil company. Again, Matthew had faith that the universe would take him to where he was supposed to be–a style of decision making not much approved of by his father, a conservative Republican. However his dad, who was executive vice-president for Jeno Palucci (who founded Chun King in 1945), has been in the food business since the family lived in Duluth, and has long been Matthew's "greatest business advisor." His mom has also been very supportive.

Suzanne and Matthew rented an old farm house on the edge of tofu; their tofu equipment was on the front porch under tarps, but they were no longer pursuing a tofu business. However, when Matthew arrived in Arcata, he joined the group of people he had taught to make tofu–they were still making it. They were new considering renting a shop space. But when it got to the point of signing a lease and making real commitments, "the group just fell apart."

So Matthew got a job as a carpenter for 6-8 weeks remodeling a house. The whole north coast of California was considered a "depressed area," dragged down by the timber industry. Matthew advertised for a job, but was unable to find work. "I became very depressed for several months. I didn't know what to do with myself. On the drive to California I had sworn to myself I was going to try not to get into tofu-making and/or cooking food. But actually, I was straddling two dreams. So I marshaled my enthusiasm and decided that I was going to start working on a new tofu company–apart from the group in Arcata. It was just something to keep me busy." Matthew decided to develop a new way to market tofu. The product, called "Tofu Helper," came in a divided plastic tub, with a cake of tofu in the large compartment and a various sauces/marinades in the smaller one. Suzanne said she had seen packaging like that in Europe.

In August 1980 Matthew and Suzanne and Suzanne were married in Arcata; the marriage lasted less than a year.

At about this time Matthew found a job as a cook at The Sprouted Seed, a vegetarian restaurant in Arcata–in part because the owner's cousin was the wife of the guy who owned the Upper Crust Bakery in Telluride, where Matthew started making tofu. Matthew's depression vanished; it was a good experience. The founders of the restaurant, Brain and Debbie, developed a superb Tofu-Tahini Dressing recipe which is still being made for use at the restaurant and also sold refrigerated in glass jars at local natural food stores.

One day in the summer of 1980 a man who sold carrot juice to the vegetarian restaurant told Matthew that the shop space next to his little juice operation had just come up for rent. It was just two blocks from The Sprouted Seed. Matthew looked at the space, thought about it, and talked to Suzanne–who was positive. So they started thinking seriously about setting up a soy deli, bakery, and tofu shop like they had planned in Durango. The focus was on the deli, but Matthew knew he could also sell his tofu at the Arcata Co-op–which was then selling tofu made by Quong Hop & Co. in South San Francisco. The Tofu Shop, located right next to Humboldt State University, opened on 12 December 1980. For his tofu, Matthew used the same label (blue on white with a blue dragon in the middle) he had used in Telluride. He initially bought organic soybeans from United Naturals, then switched to Living Farms in Tracy, Minnesota–his source for many years. Address: Tofu Shop Specialty Foods, Inc., 65 Martin Ct., Arcata, California 95521. Phone: 707-822-7401.

12458. Redfield, Linda. 2002. Early work with tofu (Interview). *SoyaScan Notes*. Sept. 23. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Linda graduated from the University of California at Davis in 1972 in science, and stayed on the work as a research assistant in a biochemistry lab at U.C. Davis–but she did not like the work, which ended up being used for development of pharmaceuticals. "I have a deep interest in how things work at a deep level. I reached a dead end; it didn't seem very ethical to me." Also in 1972 she became a vegetarian. Then she became a potter and a gardener for a few years, and eventually found her way into whole foods and cooking. She worked for a few years at the Natural Food Works, a natural foods store, in Davis; she was assistant manager there for a while. Gradually she learned about tofu; she loved experimenting with it and making it.

© Copyright Soyinfo Center 2013

She began making tofu for friends in the area and teaching tofu cooking classes at the extended education program at U.C. Davis and at the Experimental College at Davis. She liked to help people replace meat in their diets with tofu–in dishes that were familiar to people such as tofu burgers or tofu in spaghetti sauce.

On 2 Feb. 1977 Shurtleff & Aoyagi gave a tofu class in Sacramento for the Sacramento Natural Foods Coop. Linda was there, and that class changed her life. "It was the spark that ignited the whole thing. It totally changed my life. It was an inspirational moment."

In about 1980 Linda wrote a booklet, based on recipes she had developed, titled "Vegetarian cooking with tofu." It was typewritten, not typeset, and was never published. She made it available to at her tofu classes and sold copies to friends.

In early 1982 Linda was looking to move away from the Central Valley and the heat of Davis. While visiting friends in Arcata she visited The Tofu Shop, learned that there was a job opening, and applied for it. She got the job. She sold her pottery business in Davis and arrived in Arcata and began to work for The Tofu Shop in May 1982. She brought two recipes with her: Tofu Egg(less) Salad and Tofu Sausage. As far as she knows, both were her original idea. The salad started to be sold commercially in about July 1982 and the sausage in about August.

Also in 1982 she met Patrick and Meredith McCarty in Arcata and began practicing macrobiotics. She worked with them at their center until they left in about 1996.

Linda worked at The Tofu Shop for about a year, then returned to school at Humboldt State Univ. (studied philosophy and art), then returned to work at The Tofu Shop.

She is now a nutrition consultant and she teaches people about whole foods and vegan cooking classes. She does individual nutritional counseling, and she believes some people need to eat fish–especially those who have depleted their health and energy. Linda still lives in the same farmhouse that she moved to when she started living in Arcata; it has a ¼-acre vegetable garden that she loves. Address: Arcata, California. Phone: 707-822-6425.

12459. Schmit, Matthew. 2002. Notes on Tofu Shop, Arcata, California 1980 on. Overview. 65 Frank Martin Ct., Arcata, CA 95521. 2 p. Handwritten on lined paper.

• ***Summary:*** 1980-85: Tofu Shop "Soy Deli and Wholegrain Bakery." 768 18th St.

1980–Rented front half of address initially. 1981–Rented remainder of building, initially for storage.

1982–Subleased back portion to Tofu Shop's baker, Melanie Patrick, who started own business, "18th St. Bakery."

1983–Purchased used equipment from Surata Soyfoods (Eugene, Oregon) (Shivak).

1985-92: Tofu Shop "Special Grocery and Deli." 768 18th St.

1985–18th St. Bakery vacates and Tofu Shop moves tofu production and wholesale into entire back of building. 18th St. Bakery owner Melanie Patrick eventually buys "Sprouted Seed" restaurant and renames it "Wildflower Cafe and Bakery.

Purchased more used equipment from Surata and from Richard Rose (Petaluma, California).

Matthew visits Ashland Soy Works and Alvin Kunishi at Sacramento Tofu Co.

Tofu Shop remodels deli with limited "Bar" seating. Tofu equipment upgrade to include Bean Machines' (BMI) grinder and forming box table, Groen jacketed kettle, and custom made hydraulic soymilk press.

1992 July–Tofu Shop "Specialty Foods (manufacturing & wholesale) moves to new Foodworks Culinary Center at 100 Ericson Ct. (2,000 square feet). One of ten companies–and the largest!

Tofu Shop "Specialty Grocery and Deli" is then remodeled into a full sit-down restaurant (seating 50) with a full-service take-out deli counter. Still located at 768 18th St.

1993–Tofu Shop "Specialty Grocery and Deli" is closed and sold, emerging as Daybreak Cafe.

Tofu Shop "Specialty Foods" incorporates with Ronald Horn investing in company in exchange for 40% ownership of the company. In 1995 Ron sells shares to two Tofu Shop employees and moves to Oregon. These shares are eventually bought back by Matthew Schmit except for 10.25% owned by Tim Payer, a supportive community member, brother of former employee, and computer instructor at Humboldt State University.

2001 June to December–Tofu Shop Specialty Food Inc. purchases property and builds own building. Relocated in Jan. 2002 to 65 Frank Martin Ct. (adjacent to Foodworks Culinary Center). Address: Arcata, California.

12460. Meeks, Bob. 2002. Daybreak Cafe: A successful restaurant featuring soyfoods in Arcata, California (Interview). *SoyaScan Notes.* Sept. 24. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Bob purchased The Tofu Shop, a soy deli and restaurant, from Matthew Schmit, in 1993. It is an alternative restaurant that features soyfoods, all organic ingredients, and mostly local foods. Approximately 75% of his customers are vegetarians. Bob went to culinary school and has spent his life in the restaurant business. He has owned and run his own restaurants for almost 25 years, and has worked in restaurants for almost 32 years.

More than 20 items on his menu include soyfoods or soy substitutions–not including soymilk as a beverage, in coffee, or in smoothies. His most popular menu items that include soyfoods (in descending order of popularity) are: Vegan Florentine (with cashew gravy). Tofu Scrambler (Bob also sells the a packaged dry seasoning mix for Tofu

© Copyright Soyinfo Center 2013

Scrambler). Omelets with tofu instead of eggs. Other specials include Tofu Veggie Scrambler, stir fries with tofu, and curry rice with tofu. He also serves a number of tempeh recipes. Some local farmers that grow organically are too small to be certified. This restaurant is doing very well as a business. An important part of its success is the energy that Matthew put into it before Bob arrived–even though Matthew wasn't really a restaurateur–but rather an excellent tofu-maker. Bob gets all of his tofu from Matthew. After people read his menu they are free to color it!

Bob continues to make a new version of the Tofu Turkey that Matthew used to make in Arcata. Bob blends the tofu with seasonings, then stuffs it with bread, and bakes it in a bowl shape in large, medium, and small sizes. It comes with either cashew gravy or a mushroom-miso gravy. It comes out of the oven ready to go, then customers bake it again at home and baste it. "Tofu Turkeys are a pretty big thing in Arcata." He sells it at the restaurant and also wholesales it to a few food outlets in Arcata. He likes keeping it small and local. "With Matthew's tofu its just awesome." His best year he sold about 1,200 Tofu Turkeys from Thanksgiving to Christmas; last year the number was about 300-400. Tofurky changed so that it was more similar to Bob's product; they now have it in a bowl shape, blended and its stuffed. Bob thinks he saw Tofurky spies some years ago at his restaurant trying to steal his secrets. Address: Owner, Daybreak Cafe, 768 18th St., Arcata, California 95521. Phone: 707-826-7543.

12461. Schmit, Matthew. 2002. Tofu turkey in Telluride, Colorado, and Arcata, California (Interview). *SoyaScan Notes.* Sept. 24. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** The first tofu turkey that Matthew is aware of was made in Telluride, Colorado, in 1978 at Thanksgiving by Craig Boyken, a longtime close friend of Matthew's who loaned him $250 to help start The Tofu Shop in Telluride in the fall of 1977. Craig is an amazing, sort of Renaissance man–an artist, mountain climber, musician–among other things. 1978 Craig and his wife, Anne, were living in Telluride in a studio they had built inside an old deserted brick school building. He used to have big banquets in his studio. Shortly before Thanksgiving of 1978 Matthew brought Craig two large blocks of firm nigari tofu, which he sculpted into the shape of a turkey, basted it with soy sauce and oil, baked it in an oven, and continued to baste it from time to time. He probably fashioned some kind of drumsticks on the side. Matthew does not recall any stuffing inside the turkey. As the turkey baked, it shrunk/contracted and lost its distinctive turkey features. It was carved and served with a vegetarian gravy and probably cranberry sauce and stuffing on the side. It was a potluck Thanksgiving vegetarian banquet, with about 30-40 people present, including all people who worked at The Tofu Shop. It was probably the first "Tofu Turkey Thanksgiving" in American history.

After starting The Tofu Shop in Arcata, California, Matthew continued the turkey tradition each year from Thanksgiving to Christmas, starting in about 1982 or 1983. It was a major event. They started carving the turkey from two large blocks of tofu; they would hollow each out, fill the space with stuffing, then put them together and bake them. It would come out like a loaf; when you sliced it you would get a combination of the white meat plus the stuffing inside. The Tofu Turkey came in three sizes (small, medium, and large–which fed 24 people) and was sold as a special-order product via the deli–either for take-home or as a hot plate (sliced, with gravy, stuffing, and cranberry sauce) to eat at the deli; it was not sold to other retail stores. Their record year, they sold $4,000 worth of Tofu Turkeys including mushroom gravy, and a custom stuffing with okara and miso. People could also special-order tofu pumpkin pies, cranberry sauce, etc.–a full meal. The product was last sold by The Tofu Shop in 1993. Bob Meeks now makes it at the Daybreak Cafe in Arcata, but he has improved the recipe. Also, the Arcata Co-op, which has a service deli named Spoons, has for many years made their own Tofu Turkeys in house.

Matthew met Seth Tibbott of Turtle Island Foods (home of Tofurky) years ago when he came down through Arcata doing in-store food demos for his tempeh products, and Matthew has talked with him periodically over the years.

To this day, Matthew is asked to bring Tofu Turkey to his extended family's get-together on Thanksgiving in Arcata–for the vegetarians in the family. Address: Tofu Shop Specialty Foods Inc., 65 Frank Martin Court, Arcata, California 95521. Phone: 707-822-7401.

12462. Murphy, Patricia A.; Barua, Kobita; Hauck, Catherine C. 2002. Solvent extraction selection in the determination of isoflavones in soy foods. *J. of Chromatography. B, Analytical Technologies in the Biomedical and Life Sciences* 777(1-2):129-38. Sept. 25. [21 ref]

• ***Summary:*** Acetonitrile is better than acetone, ethanol or methanol in extracting the 12 phytoestrogenic soy isoflavone forms found in foods.

Gives the content of daidzein, genistein, and glycitein for soy flour, tempeh, tofu, TVP [textured soy flour], and soy germ. Address: Dep. of Food Science and Human Nutrition, Iowa State Univ., 2312 Food Science Building, Ames, Iowa 50011, USA. pmurphy@iastate.edu.

12463. Schmit, Matthew. 2002. Soy pioneers: Where are they now? Part V (Interview). *SoyaScan Notes.* Aug. 28. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Continued: In about 1983 Tom Nawrocki was hired by The Tofu Shop as a tofu maker, but he arrived with an interest in tempeh. Later he asked Matthew if he could rent a portion of the space to make tempeh; Matthew liked the idea. Tom built an incubator, founded Arcata Soyfoods

© Copyright Soyinfo Center 2013

Co., and made tempeh at the shop for 2-3 years. He may also have made a tempeh salad. After leaving Arcata, he lived in Japan for several years. The last Matthew heard, Tom was working in a bike shop in Santa Cruz, California.

The company's logo has always been a small tofu shop on stilts, with an Oriental-style roof with the ends of the rafters curving upward, facing westward on a cliff above the Pacific Ocean, with a tree arching overhead. It was Matthew's dream of the perfect tofu shop and location. In 1999 Matthew met Yevonne Reynolds, a local watercolor painter and graphic artist, who designed their present colorful and impressionistic watercolor logo–based on her interpretation of their earlier logo.

That earlier three-color illustration (blue, green, gold) was done by Bernice Kagan in about 1983 based upon some prints and drawings that Matthew gave her, which he felt captured the essence of the Tofu Shop. "When Bernice Kagan and I were discussing the new logo, I requested that it include those classic Japanese waves, as symbolic of tofu arriving on our shores from across 'the big lake.' In reality, much of the coastline up here is exactly like that, steep, rocky cliffs with moss and pine. I think it was Bernice's idea to put it on stilts. Do we have tsunamis in Humboldt (our county) and Mendocino? Absolutely. A sizeable tsunami wrecked the Crescent City harbor (80 miles north); it was the Alaska tsunami of March 27, 1964. We have in Humboldt a tsunami warning system and hold periodic tsunami drills." Note: A real tofu shop built that close to the ocean could be destroyed by a tsunami, but this illustration was of an idealized tofu shop.

In Oct. 1999 The Tofu Shop introduced its first new labels plus a series of three promotional signs; across the bottom of each is printed: "Tofu Shop Specialty Foods. The company conducted a major signage campaign in all of their accounts to inform customers of the new labels.

A series of recipe cards began with two spring recipes in the spring of 2001. Two more were added each season.

They owned the Tofu Shop deli until 1992; they were manufacturing tofu and other products in the back. In July 1992 they moved the tofu-manufacturing part of the business from 768 18th St. to a small business food incubator (an economic development project), joining about ten other small local companies. The company's new name and address were: Tofu Shop Specialty Foods, Inc., 100 Ericson Ct., Suite 150, Arcata, CA 95521. At that time they remodeled the vegan deli into more of a sit-down restaurant, called The Tofu Shop. Matthew tried to manage both places for about a year and was unable to keep up with it. So he ended up selling the restaurant in 1993. It was on sale for a while, then he had to shut it down, which lowered the sale price quite a bit. It was purchased by experienced local restaurateurs–a husband, a wife, and a partner. The partner, Bob Meeks, ended up buying out the other two. They reopened on the same location (768 18th St. in Arcata) as the Daybreak Cafe. They used a lot of the Japanese decor and kept the theme. They added some fish and a little chicken to the menu but they feature local, organic ingredients. They offer a vegan alternative to just about everything from eggs to meat. They advertise heavily and are very successful. They use a lot of Matthew's soy products in their recipes. The new owner is Bob Meeks (phone: 707-826-7543).

Talk with Linda Redfield. 2002. Sept. 23. She admires Matthew a lot. "He is very disciplined, determined, and focused. The Tofu Shop takes most of his life, energy and time." Address: Tofu Shop Specialty Foods Inc., 65 Frank Martin Court, Arcata, California 95521. Phone: 707-822-7401.

12464. *Iowa Soybean Review* (*Iowa Soybean Association, Urbandale, Iowa*). 2002. ISU keeps consumer in mind when developing food-grade soybeans. 13(8):17. Summer.
• ***Summary:*** Dr. Walter Fehr, distinguished professor of agriculture at Iowa State University (ISU) and head of the university's breeding program, has as his motto: "The consumer is always right." The university's involvement in breeding soybean varieties for food uses has been driven by the Asian market. In 1978 ISU developed a variety named Vinton; after 20 years it remains the standard of quality in the Japanese tofu industry.

In 1979 Fehr took his first trip to Japan to understand that market. Since that time he has worked closely with Asian food manufacturers and buyers. ISU has also developed large-seeded soybeans tailor-made for miso, vegetable soybeans (edamame), lipoxygenase-free soybeans with no "beany flavor," soybeans with reduced saturated fat content to eliminate the need for partial hydrogenation, varieties that are low in phytate to reduce the amount of phosphorus in animal waste.

• ***Summary:*** Contents: Recipes with soy sprouts. With soy flour. With soy milk. With whole soybeans. With tofu.

12466. Bauch, Hubert. 2002. Obituaries–Hartland Molson: Senator presided over Molson dynasty. *National Post* (*Canada*). Oct. 1. p. S7.
• ***Summary:*** Molson (who died Sept. 28 at age 95) was "perhaps the Canadian establishment's quintessential figure" in his time. "He was a business visionary; he saw the potential of soya beans decades before tofu became a household word in the Western world."

Note: Talk with Jim Zavitz of Canada. 2002. Oct. 1. Jim has a book about the Molson family, but it does not mention soy. The Molson family was one of Canada's oldest, wealthiest, and most influential families. Hartland Molson was a pilot in the Oct. 1941 Battle of Britain (he was shot

© Copyright Soyinfo Center 2013

down but survived), in 1955 (at age 48) he was appointed to the Canadian senate by Canada's Prime Minister, and in 1957 he became long-time owner of the Montreal Canadiens hockey team as they were in the midst of their unequalled run of five consecutive Stanley Cup championships. In 1995 he received the Order of Canada and in 2000 was made a member of the Order of Quebec. A portrait photo shows Hartland Molson.

12467. Corliss, Richard. 2002. Blood bath and beyond: Guerilla filmmaker Michael Moore takes aim at American gun culture, and makes a terrific movie. *Time.* Oct. 7.
• ***Summary:*** "The director is a little spooked by James Nichols, tofu farmer and brother of Oklahoma City bomber Terry, who shows Moore the loaded Magnum .44 under his pillow and points it at his own temple."

12468. *Observer* (*London*). 2002. Om: Top ten tips to beat high cholesterol. Oct. 13. p. G64.
• ***Summary:*** Tip #3 is "Eat soya products. Studies suggest that soya helps to reduce low density lipoproteins (LDL) cholesterol. Try portions of tofu, tempeh (fermented tofu [sic]), and soya milk."

Note: Tempeh and fermented tofu are two completely different foods made from soybeans.

12469. Lukoskie v. Kim. 2002. Court of Appeals, Division 1, State of Washington. Docket No. 49544-5-I. File date: Oct. 28. 5 p. http://caselaw.lp.findlaw.com. [1 ref]
• ***Summary:*** Appellant: William M. Lukoskie, Jr. Respondent: Soon Kim. 1977–Lukoskie and Kim began living together.

1978 May–They were married.

1999 March–They separated. They have three children, two of whom are "emancipated."

2001 Oct.–An order dissolving their marriage was entered.

This appeal is a challenge to the trial court's division and distribution of the couple's property and liabilities. Many monetary statistics are given. The trial court awarded property, including the business, Island Spring, with an approximate value of $712,224 to Lukoskie.

The trial court found that that the net cash flow from Island Spring would be at least $230,000 a year, even assuming that Lukoskie hired a person to replace Kim as production manager at the business.

12471. American Soybean Assoc. 2002. Bean beat: ASA activities increase market for soy products in India. *Soybean Digest.* Oct. p. 26.
• ***Summary:*** Suresh Itapu, ASA/India Technical Director of Soy Food Marketing, says that as a result of ASA promotion work, 55 Indian entrepreneurs are now making soymilk and tofu using the Canadian SoyaCow technology. Last year at this time only 31 such entrepreneurs were in business. In addition, with strong support from the ASA-managed World Initiative for Soy in Human Health (WISHH) program, three medium-sized SoyaCow units (53 gallons/hour capacity) have been installed in India alone. And Godrej, a major Indian food manufacturer which failed in the late 1980s in its efforts to launch soymilk, has entered the market again after extensive trials and test marketing.

As a result of all this activity, soymilk production in India during the past year has increased from 290,000 gallons to 924,000 gallons. And Itapu believes that the future looks bright. Soyfoods look like an idea whose time has finally come in South Asia.

• ***Summary:*** Introduces fresh soybeans (edamame), tofu, soy milk, miso, soy sauce. Includes recipes for: Miso soup with tofu, spinach, and carrots. Sesame marinated tofu with vegetables. Chai tea with soy milk. Edamame succotash.

12473. Marking, Syl. 2002. IP grain imprints the future: But identity preserved has plenty of hoops to jump through. *Soybean Digest.* Oct. p. 6-7.

© Copyright Soyinfo Center 2013

• ***Summary:*** Lester Kroeger and neighbor Jerry Stencel from Waseca, Minnesota, are pioneers in growing identity-preserved (IP) crops. They've been doing it for nearly 25 years. In 1978 they helped to form the Minnesota Waxy Corn Growers as farmer owners. Their company later became SunRich, located in Hope, Minnesota, and their main crop became IP soybeans for export to Japan to make tofu. LaVerne Klecker is grain manager for SunRich. A large proportion of SunRich's production is certified organic, and non-genetically modified soybeans and corn, which they contract from 15 states. The key to the company's success has been good leadership.

In a sidebar, Bill Wicke, University of Minnesota extension ag engineer, offers a checklist of pointers for growing, storing, and marketing IP crops.

12474. Morinaga Nutritional Foods, Inc. 2002. Powered by soy (Ad). *Vegetarian Times.* Oct. p. 31.
• ***Summary:*** A full-page color ad. In the top half of the ad, a large photo shows two young women walking briskly for exercise. Below that is the ad title. The ad is for Mori-Nu Creamy Soy Soup, which is available in three flavors (tomato, butternut squash, and corn) and two sizes (1 quart and 11 oz). The text concludes: "Rev up your day with a kick of soy." Address: 2150 W. 190th St., Suite 110, Torrance, CA 90504.

12475. *Plenty Bulletin* (*Summertown, Tennessee*). 2002. Soy Huichol: Integrated soy project develops in Mexico. 18(3):4. Fall.
• ***Summary:*** Mexico's Huichol people have maintained their traditional culture, language, and spiritual way of life for centuries in their homeland, the rugged and remote mountain terrain in the Mexican states of Jalisco and Nayarit. There an estimated 7,000 of these remaining Aztec descendants reside.

But the Huichol are poor, and are being exposed to the outside world. Over the past year Plenty has been developing a soy food and nutrition project with the Huichol Center for Cultural Survival and Traditional Arts (HCCSTA). Louise Hagler, soy cooking expert and Plenty advisor, visited the Huichol Center in late July. She took 35 soybean varieties to conduct trials. She did a little demo at the Huichol Center with TVP (textured vegetable protein) and also made soymilk, which she turned into tofu, and prepared okara hash.

Chapingo University is the largest and oldest agricultural university in Mexico, located just outside Mexico City in Texcoco. There she met with Dr. José de Jesús Loyola, who is head of the soybean projects at Chapingo University and his compadre Ing. Ciriaco Ayalo Sanchez. Ciriaco has written a 40-page book on how to grow soybeans in Mexico, the only such book available. They told Louise that soybeans were first planted in Mexico in 1909, and that in the 1950s President Diaz started a project to replace indigenous beans with the soybean, but the project failed. "The people did not accept the soybean, most likely because they did not know what to do with it."

Louise had a very encouraging meeting with the American Soybean Assoc. (ASA) in Mexico City. ASA promotes soybeans as both feed for animals and food for humans, and works with DIF (*Departamento Infantes y Familias*) in Jalisco and other states. DIF does nutritional outreach. ASA works to provide good prices for their "soya seca" (dry soy–TVP) which is part of the food baskets DIF distributes to needy families. They have found that the women who cook the soyfoods prefer the whole soybean to the processed products like TVP because the beans are a more familiar form.

• ***Summary:*** Under "the good news" and "the bad news" discusses the benefits and possible (but unclear) disadvantages.

12477. Vitasoy (USA) Inc. 2002. Savor the goodness: Nasoya (Ad). *Natural Foods Merchandiser.* Oct. p. 41.
• ***Summary:*** This 8½ by 11 inch color ad shows a large fork against a yellowish-beige background. On the fork are four cubes of a special Nasoya tofu on some lettuce and onion rings with a little dressing over the top. Below the glass is the Nasoya logo in black, red and green. Below the fork, on the background is printed: "Compelling new messaging. Exciting new packaging. New consumer awareness. All that plus unexpected great taste. There's a whole new vitality at Vitasoy USA. Booth I 453. Natural Products Expo East." Address: New England Way, Ayer, Massachusetts 01432.

12478. Kadokura, Tania. 2002. Sumo stew: Japan's famed wrestlers have been bulking up on chanko-nabe, a hearty, protein-rich one-pot meal, for more than a century. *Saveur* (*New York, NY*) No. 62. p. 68-75. Nov.
• ***Summary:*** Ingredients include tofu and miso. Contains recipes and color photos of sumo wrestlers and chanko-nabe. Address: Tokyo-based cooking teacher.

12479. Kadokura, Tania. 2002. In the *Saveur* kitchen: The beef behind sukiyaki. *Saveur* (*New York, NY*) No. 62. p. 89. Nov.
• ***Summary:*** Sukiyaki is thin slices of meat or seafood with tofu and vegetables, simmered in a sweetened soy sauce base; it is Japan's best-known nabe. Contains a recipe and color photo. Address: Tokyo-based cooking teacher.

12480. *SoyaScan Notes.* 2002. Cow's milk prices at Safeway supermarket in Lafayette, California (Overview). Dec. 12. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** Since Dec. 1983, approximately every other

© Copyright Soyinfo Center 2013

year, Soyfoods Center has conducted a survey of the prices of soymilk and cow's milk in California.

Safeway: Cow's milk (fortified with vitamins A and D) sells for the following prices at the Safeway supermarket in Lafayette, California: (1) Fat free: $1.07/quart or $1.99/half gallon or $3.09/gallon; (2) Low fat (1% fat, protein fortified): $1.18/quart or $2.35/half gallon or $3.22/gallon; (3) Reduced fat (2% fat, protein fortified): $1.18/quart or $2.35/half gallon or $3.12/gallon; (4) Whole (homogenized, fortified with vitamin D only): $1.24/quart or $2.19/half gallon or No gallon. (5) Acidophilus Plus Bifidus–Low Fat (1% fat): No quart or $2.39/half gallon. (6) Horizon Organic $3.69/half gallon. (7) Lactaid: $1.89/quart or $3.35 per half gallon. The best-seller among these is Fat free in gallons.

12481. *SoyaScan Notes.* 2002. Chronology of major soy-related events and trends during 2002 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** Jan. 1–The Kerry Group (of Wisconsin and Iowa) creates Nutriant as its new nutritional division; into Nutriant it merges Solnuts and Iowa Soy Specialties, LLC.

March–Proceedings of the Fourth International Symposium on the Role of Soy in Preventing and Treating Chronic Disease held at San Diego, California, published as a supplement to the *Journal of Nutrition,* 132(3):545S-619S. General chairpersons and Supplement editors: Stephen Barnes and Mark Messina.

March–A new tofu plant owned by Sunrise Soya Foods of Vancouver, starts operation in Toronto, Canada. This is the company's first plant in eastern Canada.

March 15–Minnesota becomes the first U.S. state to pass legislation requiring diesel fuels sold in their state to contain a 2% blend of biodiesel (B2). By 1 July 2002 nearly every gallon of diesel fuel sold in Minnesota must contain a 2% blend of biodiesel.

May 8–Dean Foods announces that it has signed a definitive agreement to acquire the 64% equity interest in White Wave, Inc. it does not currently own. The price of this 64% was approximately $189 million, bringing Dean's total investment to approximately $204 million. White Wave had total sales of approximately $125 million during the 12 months ending 31 March 2002.

May (late)–Central Soya Co. acquires CanAmera, Canada's largest producer of edible oil products. Central Soya had owned 50% of CanAmera since it was established in 1992.

July 22–Bunge Ltd., North America's leading soybean processor, announces an agreement to acquire a majority stake in Cereol S.A., the Paris-based parent of Central Soya Co., headquartered in Fort Wayne, Indiana.

Aug. 13. Pharmacia spins-off Monsanto; as a result, Pharmacia no longer owns any equity interest in Monsanto. During fiscal 2002 Monsanto suffered huge financial losses. Net income showed a *loss* of $1,693 million–down dramatically from +$295 million in 2001.

Oct. 1–Bunge acquires Cereol S.A. (based in Paris), which includes Central Soya (a U.S. soybean processing pioneer and leading manufacturer of soy protein concentrates and soy lecithins) and CanAmera Foods (in Canada).

Oct. 4–Mr. Shoan Yamauchi, the most important tofu pioneer in the United States and Hawaii, dies in Torrance, California. He began making tofu in Hawaii in 1939 at a company that was started in 1923. In 1947 he and his wife came to Los Angeles, where in late 1947 they purchased the Hinode Tofu Co. at 6th St. and Towne Ave. This company, which is now named House Foods America Corporation (still in Los Angeles), is the oldest existing Japanese-American tofu manufacturer in the United States.

Oct. 21–The National Organic Standards take effect.

Sept. (late)–U.S. Food & Agribusiness Exhibition in Havana, Cuba. Some 290 U.S. companies take the rare opportunity to present their products to over 16,000 visitors.

Nov. 14–Biodegradable hydraulic fluid made from soy oil is first used in the elevator inside the Statue of Liberty. Its advantages over the petroleum-based oils previously used are its environmental friendliness and improved safety–says the National Park Service and USDA.

Dec.–Hain-Celestial buys Imagine Foods (maker of Soy Dream and Rice Dream) for $52 million. Imagine has annual sales of about $70 million.

12482. Abiatte, Mabel. 2002. Cocinando soja y adelgazando [Cooking soya and slimming]. Argentina: Acquatint. 52 p. Illust. No index. 22 x 17 cm. [Spa]
• ***Summary:*** Contents: Prologue. Thanks and acknowledgments. Notes and advice. Especially for sportsmen and women. Recipes. Something sweet / sweets. Diets. Basic recipes: Soymilk, soymilk from soy flour, white sauce with soymilk, soy yogurt, tofu or *queso de soja* (like ricota / ricotta cheese), tofu mayonnaise, bread with soy bran (*salvado de soja*). If you don't have balance. About the author. Farewell and contact information.

The author received her degree in soil science (*Edafologia*) from the Catholic University of Santa Fe, Argentina. Address: Argentina.

12483. Huang, H.T. (Hsing-Tsung). 2002. Hypolactasia and the Chinese diet. *Current Anthropology* 43(5):809-19. Dec. [72 ref]
• ***Summary:*** Hypolactasia is the scientific term for lactose intolerance. Gives a good history of the uncommon use of animal milk throughout Chinese history. As early as 400 B.C. Hippocrates is reported to have observed that milk was bad for patients with fever whole bellies were "distended and full of rumbling." In A.D. 200 Galen noted that milk should be consumed only by those who digest it well. It was only in the 1960s that the reason that humans had problems digesting cow's milk was understood; many adults lacked the enzyme

© Copyright Soyinfo Center 2013

lactase needed to digest lactose, the main sugar in milk.

"It is now known that the occurrence of hypolactasia is genetically controlled. It cannot be reversed or ameliorated by adaptation; if an individual is lacking in the lactase-persistence gene, he will lose the ability to produce lactase as an adult no matter how vigorously and for how long he continues to drink milk after weaning."

Extensive population studies have shown that hypolactasia is lowest in Northwest Europe, Australia and New Zealand.

It turns out that that main barrier to the adoption on milk and dairy products in the Chinese diet was economic; land was too scarce to raise dairy cows. With the rise in the standard of living in China during the past 20 years, production and consumption of dairy foods has increased dramatically. "In 1979 the total production of milk was 100,000 tons. In 2,000 in was nearly 7 million tons" or about 6.9 kg per capita per year.

Understanding hypolactasia may help to solve another puzzle in food history in China. Soybeans have been made into soymilk since the astern Han Dynasty (AD 25 to 220) and tofu has been widely made from it since the late Tang (ended in AD 906), "yet nowhere in the Chinese literature before 1800 is there any mention of the consumption of soymilk itself. The reason is now clear." The soybean contains two complex sugars (the oligosaccharides raffinose and stachyose) and the human digestive system lacks enzymes capable of hydrolyzing / breaking down either of these. The effect of consuming these sugars would be similar to consuming lactose! The Chinese soon discovered, no doubt, that whereas soymilk was hard to digest, tofu (pressed curds made from soymilk) was not. Not until the late Qing dynasty (ended in 1912) did Chinese find that prolonged heating of soymilk improved its digestibility; it soon became an accepted item in the food system (Huang 2000, p. 322-23) and is now widely consumed as a breakfast food throughout China. Address: 4800 Fillmore Ave., Alexandria, Virginia 22311.

12484. Jenkins, D.J.; Kendall, C.W.; Faulkner, D.; et al. 2002. A dietary portfolio approach to cholesterol reduction: Combined effects of plant sterols, vegetable proteins, and viscous fibers in hypercholesterolemia. *Metabolism* 51(12):1596-604. Dec. *

• ***Summary:*** Plant sterols, soy proteins, and viscous fibers are known to reduce cholesterol, but their combined effect has never been tested. In this study, 13 subjects were provided with pre-measured quantities of foods and were told what and when to eat for a one-month period. The diet, composed of a variety of foods each known to be moderately effective in combating cholesterol levels, cut bad cholesterol by close to 30% among study participants.

Soy products used in the study included soymilk, margarine, soy deli meats, and tofu. Address: Clinical Nutrition and Risk Factor Modification Center, Division of Endocrinology and Metabolism, St. Michael's Hospital, Toronto, Ontario, Canada..

12485. Jost, Amber. 2002. Grants to spark soy in America: VADG will aid soyfoods and alternative fuels projects. *Bluebook Update* (*Bar Harbor, Maine*) 9(4):1. Dec.

• ***Summary:*** The USDA recently announced more than $37 million in grants awarded to 231 recipients, to fund Value-Added Agricultural Product Development. These value-added development grants (VADG) were authorized by the Agriculture Risk Protection Act of 2000 and later amended by the Farm Bill of 2002. The six-year VADG program provides $30 million in grants each year. This year USDA received 713 applications; of these $7 million went to soy-related projects and businesses. For example, the Ohio Soybean Council received a $50,000 grant to evaluate the feasibility of making and marketing frozen tofu.

12486. Kaplan, J. Kim. 2002. For you, the consumer. *Agricultural Research* 50(12):4-9. Dec.

• ***Summary:*** A color photo on the top half of the first page shows many soy products, both foods and Industrial products, including: Kaukauna Nacho Cheese, Yves Veggie Tofu Wieners, ProSobee soy formula, NutriGrain energy bars, Betty Crocker Creamy deluxe, Wish-Bone salad dressing, Edensoy soymilk, Mori-Nu Tofu, Ken & Robert's Veggie Burgers, SoyGold industrial solvent, Natural Touch Okara Pattie, soy ink and a newspaper printed with it.

Many "products that people use every day could justifiably carry the stamp 'Courtesy of ARS Research.'" Omaha Steaks began offering irradiated hamburger patties and ground beef in November 2000–to be sure it is free of *Escherichia coli* O157:H7, bacteria that can cause serious, even life-threatening illness. Today all the 6.5 million pounds of ground beef they sell is irradiated, which means it is treated with "ionizing radiation produced by cobalt and cesium atoms, machine-produced X-rays, or electron beams. Treated meat in no way becomes radioactive." Final FDA approval for irradiation treatment of meat came in Feb. 2000.

Nutrim, a product similar to Oatrim developed by USDA's Agricultural Research Service (ARS), is now being used to make vegan, organic chocolate truffles. Mrs. Mudd's Inc. (Oceanside, California) makes the delicious products; Nutrim flows like heavy dairy cream or coconut cream.

Tifsport is a variety of bermuda grass developed for football and soccer fields, and golf courses. Address: USDA-ARS Information Staff, 55601 Sunnyside Ave., Beltsville, Maryland 20705-5128. Phone: 301-504-1637.

12489. **Product Name:** Tofu Life Naturally Smoked Tofu [Herbal, or Lemon Garlic].
Manufacturer's Name: North Coast Distributors.
Manufacturer's Address: 4860 East 2nd St., Benicia, CA 94510. Phone: 707-747-0410.
Date of Introduction: 2002.
Wt/Vol., Packaging, Price: 6 oz vacuum packed. Retails for $2.99 at Whole Foods.
How Stored: Refrigerated.
New Product–Documentation: Products and leaflet brought to Soyfoods Center by Hanan Onn. 2006. Feb. 14. He says both were introduced in 2002. The Lemon Garlic has his new label, with both front and back.

12490. **Product Name:** Tofu Life Naturally Smoked Tofu Paté [Olives Tomatoes, or Garlic Teriyaki].
Manufacturer's Name: North Coast Distributors.
Manufacturer's Address: 4860 East 2nd St., Benicia, CA 94510. Phone: 707-747-0410.
Date of Introduction: 2002.
Ingredients: Organically grown soybeans, water, natural calcium sulfate (as hardener), shoyu (water, wheat, soybeans, salt). All fresh: Onions, ginger, hot pepper, garlic green onions, citric acid, herbs & spices.
Wt/Vol., Packaging, Price: 7.5 oz plastic tub, vacuum packed with nitrogen flush. Retails for $3.49.
How Stored: Refrigerated, 35-40 day shelf life.
New Product–Documentation: Product with Label brought by Marina Li of Moraga. 2005. June. It retails for $3.59 at the Natural Grocery Co. in Berkeley. Products with labels and leaflet brought to Soyfoods Center by Hanan Onn. 2006. Feb. 14. He says both were introduced in 2002. His best-selling paté is Olives Tomatoes.

12491. Sol Cuisine. 2002. Second Nature has found its Sol Mate! We are pleased to announce that Second Nature has merged with Soy City Foods and our products will be sold under the brand name Sol Cuisine (Leaflet). Mississauga, Ontario, Canada. 2 panels each side. Each panel: 28 x 21.5 cm. [Eng; Fre]
• ***Summary:*** On the front panel of this glossy, color leaflet, the text continues: "Together we have 28 years if experience serving the health and foodservice industries. Feed your Body, Mind and Sol." At the top of the cover is the Sol Cuisine logo in blue and green, above a yellow stylized sun, all on a variegated brown background. One the two inside panels is given information about the company's ten products: Meatless Burger, Meatless Chili, Meatless Taco Filling (Dry Mixes). Vegetable Burger, Original Burger, Spicy Bean Burger (Frozen). Organic Tofu. Grain Burgers. Falafels. Veggie Burgers. For each product is given: A color photo of the front of the package, nutritional information, the ingredients in English and French. On the back panel is a large photo of a veggie burger on a sesame bun, with this text: "With our expanded new facility, we plan to introduce a variety of healthy, vegetarian products, to better meet the needs of your busy lifestyle. We will continue to focus on exceptional vegan, gluten free and organic ingredients that are good for body, mind and sol." Across the bottom is the company's contact information, plus logos for Soy City Foods and Second Nature (above a yellow stylized sun). Address: 5715 Coopers Avenue, Unit 1, Mississauga, Ontario, Canada L4Z 2C7. Phone: 905-502-8500.

12492. Batmanglij, Najmieh. 2002. Silk Road cooking: A vegetarian journey. Washington, DC: Mage Publishers. 336 p. Illust. (color). 30 cm.
• ***Summary:*** This vegetarian cookbook contains beautiful color photos and an extensive glossary. The Glossary includes entries for agar-agar, almond milk, almonds–sweet, hoisin sauce ("made from fermented soybean paste"), soy sauce (Chinese), sprouts (alfalfa, wheat, mung bean, or lentil; no soy), tahini paste, tempeh, tofu. Yet the Index shows the soyfoods appearing only in the Glossary, not in the recipes or elsewhere.

However the soybean, bean curd and soy sauce are mentioned on page 41. On page 43 is a magnificent full-page color photo of a Chinese bean-curd seller displaying her wares on a Shanghai street; many different varieties of doufu are shown.

The remarkable story of the Silk Road pioneer, Zhang Qian, is told on pages 24-28. The Han dynasty court (under Emperor Wu Di) dispatched Zhang Qian, a military officer who was familiar with the Xiongnu, to the Western Regions in 138 BCE with a group of ninety-nine members to make contact and build an alliance with the Yuezhi against the Xiongnu. He was accompanied by a guide named Ganfu,

© Copyright Soyinfo Center 2013

a Xiongnu who had been captured in war. The objective of Zhang Qian's first mission was to seek a military alliance with the Yuezhi, in modern Tajikistan. No one knows what route Zhang followed. However to get to the territory of the Yuezhi he was forced to pass through land controlled by the Xiongnu who captured him (as well as Ganfu) and enslaved him for ten years. During this time he married a Xiongnu wife, who bore him a son, and gained the trust of the Xiongnu leader.

On the inside front cover and facing page is a 2-page map of the Silk Road region from Shanghai, China, to Genoa, Italy. The author, a woman, has a brief biography and large color photo on the inside rear dust jacket. Born and raised in Iran, "she received her master's degree in education and art in the United States and France. During the past 25 years she has traveled across much of the ancient Silk Road region, working with regional chefs and home cooks along the way. She is a leading authority on Persian cuisine and the author of the best-selling *New Food of Life,* described by the *Los Angeles Times* as the definitive Iranian cookbook..." Address: Washington, DC.

12493. Batt, Eva. 2002. Eva Batt's vegan cookery. London: Thorsons. An imprint of HarperCollins Publishers Ltd. 144 p. Illust. (55 line drawings). Index. 22 cm.
• ***Summary:*** This book, which is deceptively marketed / promoted, is actually identical to Eva Batt's vegan cookery (1985) except that the title has been changed slightly and the design of the front and back cover are different, and with a different photograph. The copyright page states: "First published by Thorsons 1985. This edition published by Thorsons 2002."

Note: We believe there ought to be a law against this sort of deceptive practice. Address: UK.

12494. Challem, Jack; Toews, Victoria Dolby; Knittel, Linda. 2002. The soy sensation: How this incredible food protects against cancer, heart disease, osteoporosis, and other health conditions. Chicago, Illinois: Contemporary Books. A division of The McGraw Hill Companies. xi + 132 p. Foreword by Marcus Laux, M.D. Index. 23 cm. [155 ref]
• ***Summary:*** Contents: Foreword. Introduction. 1. The soy story: The history of the soybean, a look inside the soybean, isoflavones, other phytonutrients, soy antioxidants, estrogen, phytoestrogens and health. 2. How soy prevents cancer. 3. How soy promotes women's health. 4. How soy prevents osteoporosis. 5. How soy fights heart disease.

6. Other health benefits of soy: Soy and diabetes, soy and kidney disorders, soy and gallstones, soy and hearing problems, soy and obesity and fatigue.

7. Does soy have a dark side? Excess estrogen in soy-based infant formula, soy allergy, soy and hormone dependent cancers, soy and the thyroid gland, soy and the brain, soy and digestion, soy and copper / zinc balance, genetically modified soybeans.

Note: The authors show that most or all of these "dark side" problems are of little or no practical importance.

8. Recommendations and guidelines: Whole soybeans, tofu, soymilk, tempeh, soy flour, soy protein powder, textured vegetable protein, meat analogs, soy cheese, soy yogurt, and soy sour cream, soy nuts, okara, miso, soy sauce, natto, soy supplements versus soy foods.

9. Recipes (14 recipes using mostly tofu, miso, tempeh). Resources and readings. Address: 1. Writer and publisher of *The Nutrition Reporter* newsletter; 2. M.P.H.; 3. M.A.

12495. Charney, Ken. 2002. The bold vegetarian chef: Adventures in flavor with soy, beans, vegetables, and grains. New York, NY: John Wiley & Sons. vi + 313 p. Illust. Index. 23 x 19 cm.
• ***Summary:*** Contents: Acknowledgments. Introduction: Vegetarian delights. 1. Starting off right: Appetizers and snacks. 2. Soups and stocks: Warm beginnings. 3. Breakfast, lunch, and brunch: From scrambles to sandwiches. 4. Burgers, fritters, and loaves: Stars of vegetarian cuisine. 5. Outrageous soy: Tempting tofu and tempeh. 6. A bold way with beans: Powerhouse dishes. 7. Pasta, risotto, and polenta: Comfort carbos. 8. Seitan: The power of wheat meat. 9. Vegetables and grains on the side: All the best accompaniments. 10. Green salads: Crisp and well dressed. 11. Just desserts: Sweetness and light.

On the rear cover is a brief bio of Ken Charney; on the front cover is a color portrait photo. Address: Seattle, Washington.

12496. Dragonwagon, Crescent. 2002. Passionate vegetarian. New York, NY: Workman Publishing. x + 1110 p. Illust. (by Robbin Gourley). Index. 23 cm. [10 ref]
• ***Summary:*** A superb, massive book, "with more than 1,000 robust recipes with notes on cooking, eating, loving, and living fearlessly"–as the cover proclaims. Very nicely designed, with many delicious recipes. The author is an outstanding writer with a deep knowledge of ingredients–including soyfoods.

Chapter 10, "Celebrating soyfoods" (p. 623-78) begins: "As a soy-loving girl from way back I invite you to enter an ever-expanding universe of foods: not merely extraordinarily healthful, but delectable and diverse–great ingredients for a passionate cook." This chapter's contents: Introduction. Innecdote. Whole soybeans. Green soybeans (edamame). Canned soybeans. Cooked dry soybeans. Milled soybeans (soy flour and soy grits). Soynuts and soynut butter. Tempeh. Miso. Natto. Okara. Soy protein isolates. Textured soy protein (TSP or TVP). Soy sauces. Soy milk & soy milk products (soy yogurt, soy cheeses). Tofu & tofu products (fresh perishable tofus, classic traditional, seasoned tofus {savory baked tofu, other seasoned baked tofus}, ready-made tofu dips and spreads, ready ground tofu). Dry or packaged

© Copyright Soyinfo Center 2013

tofus (cupboard, like silken tofu). Other miscellaneous tofus (tofu burgers and sausages, deep-fried tofu, freeze-dried tofu [dried frozen tofu], tofu hot dogs, yuba).

Concerning yuba the author writes (p. 656): "I believe this traditional Asian product will explode onto the American soy-scene soon because it is so versatile and delicious and has a long and honorable history as a meat alternative. It is the unique thin-chewy texture of yuba sheets, when layered with seasonings and shaped, stacked, cut, and prepared in certain ways, that gives such a convincingly 'meaty' feeling to such dishes."

The word "tofu" appears on 100 pages in this book, "tamari" on 100 pages (she uses the phrase "tamari or shoyu soy sauce"), "soy sauce" on 100 pages, "shoyu" on 98 pages, "tempeh" on 88 pages, "seitan" on 72 pages, "miso" on 58 pages, "soy milk" on 47 pages, "tofu sour cream" on 40 pages, "silken tofu" on 30 pages, "soybeans" on 25 pages, "baked tofu" on 22 pages, "savory baked tofu" on 16 pages, "firm tofu" on 10 pages, "green soybeans" and "edamame" each on 8 pages, "soy flour" on 6 pages, "soy ice cream" and "TVP" each on 5 pages, "dairy free" on 4 pages, "firm silken tofu," "teriyaki," "textured vegetable protein," "yuba" and "whole soybeans" each on 2 pages, "Silk Soymilk Creamer" and "meat alternatives" each on 1 page.

12497. Emi, Kazuko. 2002. Japanese cooking: The traditions, techniques, ingredients and recipes. London and New York: Hermes House. 256 p. Illust. (color). Index. 31 cm.
• ***Summary:*** A beautiful book, with many old color woodblock prints and creative color photos. With recipes by Yasuko Fukuoka. Contents: Introduction. The development of Japanese cuisine. Foreign influences. The impact of isolation. Sushi: a national favourite. The tea ceremony. Traditions and festivals. Seasonal and regional foods. Cooking and eating. Equipment and utensils. Utensils for cooking with rice. Cooking at the table. Crockery and cutlery. Drinking vessels. The Japanese kitchen: Rice and rice products,... dried beans (incl. soya beans, boiled soya beans, dried yellow beans, dried green beans, black soya bean, soya bean products, kinako, natto), fresh beans (incl. eda-mame), tofu and tofu products (incl. fresh tofu, okara, silken tofu, koya-dofu, yuba, fried tofu, abura-age, atsu-age, ganmodoki, home-made ganmodoki), gluten products, mushrooms, seaweeds, fish, shellfish, fish roes, fish products, fish pastes, meat and chicken, sauces for flavouring and dipping, ready made sauces,... Japanese cooking (recipes). Glossary. Acknowledgements. Shopping information.

The index mentions: Abura-age (tofu), atsu-age (tofu), azuki beans (incl. *an* {sweet bean paste}), eda-mame, gammodoki, kinako (yellow soya bean flour), koya-dofu, miso, miso soup, shoyu (soy sauce), soya beans, silken tofu, sukiyaki (with tofu), tofu, yuba, vegetarian tempura.

Concerning kinako [roasted whole soy flour]: A photo (p. 65) shows kinako made from soybeans with three different color seedcoats: black, yellow, and green. The kinako made from the black soybeans is the darkest of the three–a medium brown–but not at all black. The kinako made from the yellow soybeans is the lightest of the three–yellowish brown. The kinako made from the green-coated soybeans is intermediate between the other two in darkness–light brown–but with no trace of green in its color. When kinako is mixed with an equal volume of sugar and a pinch of salt, it is rolled in lightly-boiled, soft mochi cakes which make tasty confection. Kinako, which is also used to make *wagashi* (Japanese cakes / confections), is sold at most Japanese grocery stores or supermarkets. Address: Japan.

12498. Grant, Amanda. 2002. Fresh & fast vegan pleasures: More than 140 delicious, creative recipes to nourish aspiring and devoted vegans. New York, NY: Marlowe & Company. ix + 230 p. Index. 23 cm.
• ***Summary:*** This vegan cookbook from the UK uses much less soyfoods than its typical counterpart from the USA. The index contains 1 entry each for soy milk/cream and tofu. Soy sauce appears in the title of one recipe. In the headnote to the tofu recipe (p. 114-15) we read: "There are many health benefits to eating this soybean product, not the least of which is its high percentage of protein. It is eaten in vast quantities in Japan, along with other products of the bean such as shoyu and miso." Address: Author and food editor, London.

12499. Katzen, Mollie. 2002. Mollie Katzen's sunlight cafe: breakfast served all day. New York, NY: Hyperion. xvii + 302 p. Illust. (by Mollie Katzen, color). Index. 27 cm.
• ***Summary:*** Offers over 350 easy recipes for vegetarian breakfasts. The index contains 9 entries for soy (incl. soy nuts {p. 67}, soy protein powder {p. 98}, pressed tofu or smoked tofu or savory baked tofu {p. 147}, soy milk {p. 11, 229}), 6 for tofu, 6 for tempeh, and 2 for miso. Address: California.

12500. Kissel, Renate. 2002. Soja & Tofu: Die neue Vitalkueche [Soya & tofu: The new vital cookery]. Frankfurt am Main, Germany: Umschau Buchverlag. 128 p. Illust. (color photos). Recipe index. 24 cm. [Ger]
• ***Summary:*** Contents: Soya–the powerbean for nutrition. 1 Salads and appetizers. 2. Sauces, dips, garnishes, and spreads for bread. 3. Soups. 4. Main dishes. 5. Desserts, baked goods, and drinks. 6. Asian dishes. Glossary. Note: The majority of recipes in this cookbook use tofu.

12501. Kyô-tôfu kyô-yuba kyô-miso: Kyôto de tabeyô herushii Kyôto [Kyoto's tofu, yuba and miso: Let's eat Kyoto's healthy foods]. 2002. Kyoto: Kyoto Shinbun Shupan Senta. 80 p. 26 cm. [Jap]*
• ***Summary:*** A book promoting soyfoods made in Kyoto. Address: Japan.

© Copyright Soyinfo Center 2013

12502. Ling, Kong Foong. 2002. Food of Asia: authentic recipes from China, India, Indonesia, Japan, Singapore, Malaysia, Thailand and Vietnam. Singapore: Periplus. 192 p. Illust. (color photos). Index. 31 cm.

• ***Summary:*** This oversized paperback book, loaded with glossy color photos, is an expanded version of the original 1998 edition. The introduction and essays are by Kong Foong Ling. The index, which is poor, makes the book hard to use if you are looking for particular foods found throughout Asia such as soybeans, soy sauce, miso, salted / fermented black beans, yuba [bean curd skin], etc.

Contents: The flavors of Asia. Ingredients. The Asian kitchen. Burma. China. India. Indonesia. Japan. Korea. Malaysia & Singapore. The Philippines. Sri Lanka. Thailand. Vietnam. Appendix.

The "Ingredients" section (p. 10-17) includes: Bean curd (incl. cotton or momen tofu, silken bean curd, deep-fried bean curd or aburage, grilled bean curd or yakidofu, fermented bean curd or nam yee). Bean curd skin [yuba]. Black beans, salted (and fermented). Hoisin sauce ("A sweet sauce made of soy beans, with spicy and garlicky overtones"). Miso (incl. red miso and white miso). Salted soy beans (incl. "yellow bean sauce"). Soy sauce (incl. light soy sauce, black soy sauce, red soy sauce, Kikkoman, tamari, thick sweet soy sauce (kecap manis–Indonesian)). Tempeh. Also: Red beans (dried azuki). Seaweed (incl. dried kelp, golden kelp, mozuku, salted dried kelp, laver or nori, wakame). Sesame (black and white seeds, tahina {tahini}). Sesame oil. Sesame rice crackers.

Korea (p. 109+). Page 110: There are also many fermented pastes and sauces for dipping, called *chang.* Every restaurant and home has its own formula for making chang. Based on a fermented mash of soy beans, the three most common varieties are *kan chang* (dark and liquid), *daen chang* (thick and pungent), and *gochu chang* (fiery and hot).

Soybean is mentioned on pages 8, 11, 68, 89.

Beancurd or bean curd is mentioned on pages 8, 10, 11, 26, 32, 33, 35, 36, 40-42, 68, 70-71, 74, 89, 90, 92, 93, 94, 96, 100, 102, 104, 107, 111, 112, 113, 119, 120, 127, 133, 158, 172, 175, 185, 189, 190, 191, 192.

Bean curd skin [yuba] is mentioned on pages 11, 35, 36.

Bean paste and bean paste sauces, p. 8, 32.

Fragrant soy sauce is mentioned on page 128.

Also: Red bean paste, p. 46 (canned, azuki).

12503. Nguyen, Chi; Monroe, Judy. 2002. Cooking the Vietnamese way. Revised and expanded to include new low-fat and vegetarian recipes. Minneapolis, Minnesota: Lerner Publications. 72 p. Illust. Index. 23 x 20 cm. Series: Easy Menu Ethnic Cookbooks.

• ***Summary:*** This thin hardcover book is an introduction to Vietnamese cooking, but not a vegetarian cookbook–though it contains some vegetarian recipes. Contains many color photos. The section titled "Special ingredients" includes cellophane noodles (made from mung beans), coconut milk, fish sauce (nuoc mam), ginger root, lumpia, mung beans, sesame seeds, soy sauce, and tofu. The Vietnamese use nuoc cham (p. 33) the way diners in many countries use salt: The main ingredients are fish sauce, garlic, red pepper flakes, sugar, vinegar and water. Soy sauce is also widely used as a seasoning–as in fried rice, grilled lemon-grass beef Soy-related recipes include: Steamed tofu (Dau hui hap, p. 59).

12504. Price, David Clive; Kawana, Masano. 2002. Food of Korea: authentic recipes from the land of morning calm. Singapore: Periplus; North Clarendon, Vermont: Distributed by Tuttle Pub. 120 p. Illust. (Color). 21 cm.

• ***Summary:*** In this attractive book, almost every recipe is accompanied by a glossy, full-page photo (usually of a prepared dish in an attractive table setting) on the facing page. The 60+ recipes were created by the chefs of the Sarabol Restaurant in The Shilla Hotel, Seoul.

Page 16: There are also many fermented pastes and sauces for dipping, called *chang.* Every restaurant and home has its own formula for making chang. Based on a fermented mash of soy beans, the three most common varieties are *kan chang* (dark and liquid), *daen chang* (thick and pungent), and *gochu chang* (fiery and hot).

Note: Soy sauce is also spelled *ganjang* (p. 23, 72). Korean-style miso (thick and pungent) is also spelled *doenjang* (p. 30, 60). Korean chili paste (fiery and hot) is also spelled *gochujang* (p. 23, 26, 31, 82, 106).

Bean curd [tofu] is mentioned on pages 9, 19, 24, 30, 44, 50, 56, 58, 60, 66, 68, 70, and 74.

Soybean sprouts (or bean sprouts) are mentioned on pages 6, 10, 11, 24, 40, 46, 64, 106.

Soy beans are mentioned on pages 6, 9-12, 19, 23-26, 30, 31, 44, 46, 50, 62, 106, and 120.

Fermented soybean paste (doenjang) is mentioned on pages 23, 25.

Soy sauce is mentioned on 27 pages (definition on p. 27). The two main types are light and dark.

12505. Reddy, Kavitha. 2002. The Indian soy cookbook. New Delhi, India: Rupa & Co. xiii + 106 p. Illust. color). No index. 28 cm. [11 ref]

• ***Summary:*** A beautiful hardcover book with glossy color photos and superb food styling throughout. Contents: Acknowledgements. Contents. Foreword, by Virgil Miedema, Regional Director, American Soybean Association, Asia Subcontinent. Introduction: Soybeans in India, health benefits of soybeans (lactose intolerance, cholesterol and heart disease, cancer, menopausal symptoms, osteoporosis, diabetes). Soybeans: Introduction, composition of the soybean, soybean oil, soy flour, texturised soy protein (TSP, soy chunks & granules), soymilk, tofu. 1. Appetizers. 2. Soups and salads. 3. Rice and paranthas. 4. Chunks and granules. 5. Tofu treasures. 6. A few more. 7. Delicious

© Copyright Soyinfo Center 2013

drinks. 8. Dessert selection. Weights and measures. Glossary.

Near the front of the book is a full-page color photo of some soy products (46) available on the Indian market. The product names are: Rasoya blended besan. Rasoya blended jowar atta. Gensoy protein plus atta. Gensoy premium soya flour. Mealmaker protein shake. KPFM paushtika atta. Vigor new protein rich soyabean flour. Vital pure refined soya oil. SoyaLife soya bean atta. Soy-flour. MisTura hi-proteen. Golden Harvest 99% fat free high protein soya flour. Allegro defatted soya flour. Soyfit. Elpro. Rasoya nuggets–granular. Kailora: The big tasty soybean. Rangoli nuggets. Alegro Nutri Nuggets. MDH Soyatein. Ruchi's Nutrela (chunks, granules). Mealmaker. Rasoya nuggets. Jeeo veg meat. A-1 protein. Elpro soyabean. Giant value standard. Allegro soya granules. Soya Sakthi. Soya Bite flakes. Soya oil (in plastic bottle with Hindi name). Soyfresh tofu. Mahakosh refined soyabean oil (in a plastic bag). Sweekar. Mealmaker refined cooking oil (in a plastic bag). Ruchi's Soyumn. Fortune refined soybean oil (in a plastic bag). Priya refined vegetable oil (in a plastic bag). Mahakosh refined soyabean oil (in a plastic bottle).

Note: The American Soybean Association (ASA) office in India is now dedicated to teaching Indians about the various soyfoods mentioned above, how to use them in Indian-style recipes, how to start small businesses making soyfoods in India, the health benefits of soyfoods, etc. It invests significantly in these projects using soybean checkoff dollars paid by U.S. soybean farmers.

But why is ASA doing this? First, to grow the demand for soybeans inside India, so that India will eventually become a customer for U.S. soybeans. ASA did the same thing in China starting in about 1982 and today China is the world's biggest and fastest growing customer for U.S. soybeans. Second, ASA would like to keep as much Indian soybean meal (made by crushing soybeans grown in India into oil and meal) off the international market–where it competes with U.S. soybean meal and depresses the price of both. Address: PhD, New Delhi, India.

12506. Sasaki, Sanmi. 2002. Chado: the way of tea. A Japanese tea master's almanac. Translated from the Japanese *Saijiki* by Shaun McCabe and Iwasaki Satoko. Boston, Massachusetts: Tuttle Publishing, an imprint of Periplus Editions (HK). xli + 742 p. Foreword by Sen Sôshitsu XV. Illust. Index. 24 cm. [Eng; jap]

• ***Summary:*** This book, originally in 1960 in Japanese, is widely regarded as a classic. And this is a superb translation.

Text in English with captions and quotations in Japanese. One page 78, footnote 14, referring to *kitsune-zushi* states: "Also called *inari-zushi. Kitsune-zushi* is sushi in *abura-age* (deep-fried tôfu) pouches. *Abura-age* is considered to be the favorite food of the fox (*kitsune*).

Tofu is mentioned on 10 pages: In the glossary: Dengaku is tofu coated with sweetened miso and grilled on skewers (p. xxii).

Tofu (soybean curd): The two main types are *momen-dôfu* (cotton-like) and *kinugoshi-dôfu* (silk-like) (p. xxxvii).

In the month of February: Footnote explaining *kitsune-zushi* (p. 78). Koori-dôfu (dried-frozen) is an ingredient in one course (p. 92).

For the month of April: Tofu dengaku (p. 171, 207– served as part of *Kaiseki,* meals for tea / tea ceremony meals). A section titled "Tofu dengaku" (p. 212) explains that this dish is "one of the symbols of spring." Gives details on how to prepare it using skewers of green bamboo and a coating of *ki no me miso.* Kenzan, Oribe and other tea masters have designed containers made exclusively for dengaku. However a lacquer or plain wood container is fine. "Nakamura-rô at Gion, Kyoto, is famous for its dengaku."

For the month of May: kinugoshi-dôfu is an ingredient in a course (p. 262).

For the month of August: Shin-tofu ("New tofu") is made from the first soybeans of the year. A poem by Kikaku states: "Just as we were admiring the fine points of the pottery, *shin-dôfu* was served" (p. 427).

Daizu (soybeans) are a major ingredient for making miso, soy sauce, yuba, tofu, natto, and *mame-ko* (roasted soy flour). "A behind-the-scenes contributor for *kaiseki* (p. 431).

For the month of September: The section on "Ochiayu" explains that *ayu* holds the first place among all the fish for summer. Ochi-ayu, those caught in the autumn, taste good when cooked with tofu, but may not be a good choice for kaiseki (p. 469).

For the month of October: Yu-miso (p. 494), also called *yuzu-miso,* is the subject of a section (p. 524). Yuzu is a green Japanese citrus fruit. The top is cut off, the inside is hollowed out, it is packed with a mixture of miso and sugar then grilled. Only the miso is eaten–filled with the fragrance of yuzu. "It is suitable for vegetarian *mukô.* A second way of making yu-miso is described which can be used for dengaku in April. A poem that mentions yu-miso is included.

For the month of November, broiled tofu and kuro-mame (black soybeans) are mentioned (p. 552).

Kuro-mame [black soybeans] are mentioned on 2 pages (p. 42, 552), miso on 33 pages, soy [sauce] on 35 pages, soybean or roasted soybean flour on 6 pages (Uguisu-mochi, p. 87; warabi-mochi, p. 134; hagi no mochi, p. 460), soybeans on 8 pages. Yuba (p. 621). Natto (p. 71, 621-22). Eda-mame (green soybean, p. 701).

Vegetarian: "During the week of the spring equinox a vegetarian meal in vermillion utensils is expected" (p. 139). *Shôjin* means vegetarian (p. 655). Address: Tea master, Japan.

12507. Sass, Lorna J. 2002. Lorna Sass' complete vegetarian kitchen: Where good flavors and good health meet. New York, NY: William Morrow. An imprint of HarperCollins Publishers. xiv + 494 p. Index. 26 cm. [35+* ref]

© Copyright Soyinfo Center 2013

• ***Summary:*** First published in 1992 as *An Ecological Kitchen: Healthy Meals for You and the Planet* (William Morrow). This innovative vegan cookbook offers 250 cholesterol-free recipes. It features a complete glossary of wholesome ingredients for stocking the vegan pantry (no meat, dairy, or eggs). Address: New York City.

12508. Stevanon, Margarita. 2002. Cocinar con tofu: recetas sabrosas y nutritivas para todos los gustos [Cooking with tofu: Savory, nutritious recipes for every taste]. Barcelona, Spain: Integral. 171 p. Illust. (by Carmen Luz Domiñguez Rocha). 21 cm. [Spa]*
• ***Summary:*** Margarita Stevanon was born in 1938.

12509. Sugimoto, Takashi; Iwatate, Marcia. 2002. Shunju: new Japanese cuisine. Sensational recipes from Tokyo's most famous restaurant. Singapore: Periplus Editions. 271 p. Foreword by Charlie Trotter. Illust. (chiefly color, by Masano Kawana). Index. 26 x 23 cm.
• ***Summary:*** Contents: Foreword. The Shunju way: The Shunju philosophy (history, architecture, bar, lighting, *zashiki* {dining room floor}, *chashitsu* {tea room}, hospitality {*motenashi*}). The seasonal kitchen. Spring. Summer. Autumn. Winter. Appendixes: Step by step preparation techniques (incl. Fresh soymilk, Green bean soymilk yuba {*Ryokuto nama yuba*}). Chefs (profile of head chef at each restaurant). Glossary of ingredients. Mail-order sources of ingredients. Acknowledgments.

"The history of Shunju began in 1986 in Mishuku, Tokyo." Today, Shunju has five different outlets in Tokyo–Mishuki, Hiroo, Torizaka, Bunkamura Dori, and Tameiki Sanno (p. 14).

"The most important element in Shunju's cuisine is to be able to truly appreciate the four seasons and the abundant blessings which mother nature has bestowed upon us...–Marcia Iwatate" (p. 24).

At the recipe for Green and lavender tofu squares (*Masu-dofu*) we read (p. 53): Tofu is undoubtedly one of the most representative dishes of Shunju. Our tofu is made daily–soymilk is curdled with *nigari* (bittern)–in different ware unique to each of our five restaurants; in this case in *masu* (traditional square, wooden measuring boxes)." To make green soymilk, see p. 255.

The glossary of ingredients (p. 258+) includes azuki (*koshi an, ogura an*), edamame, miso (many types), okara, sake (incl. koji {molded steamed rice}), shoyu (incl. koikuchi shoyu, usukuchi shoyu, shiro shoyu, tamari shoyu), tofu, ume, umeboshi, wasabi, yuba (famous as a Kyoto delicacy).

Tamari is mentioned on 98 pages of this book, miso on 67 pages, soy sauce on 54 pages, shoyu on 51 pages (incl. "koikuchi shoyu" on 34 pages, "usukuchi shoyu" on 13 pages and "shiro shoyu" and "tamari shoyu" on 2 pages each), tofu on 18 pages, soymilk on 14 pages, yuba on 7 pages, koji on 5 pages, nigari and edamame on 4 pages each, black soybeans on 2 pages (p. 53 and 84).

Natto and kinako are not mentioned. Address: Creators and founders, Shunju restaurants, Japan.

12510. Thompson, David. 2002. Thai food (Aharn Thai). Berkeley, California: Ten Speed Press. xiii + 673 p. Illust. Index. 25 cm. [218 ref]
• ***Summary:*** This is a superb, massive, beautiful and unique book–a wholistic study of food in Thai culture overflowing with lovely and expressive color photos by Earl Carter.

Contents: Acknowledgements. Introduction, by David Thompson, and author's notes. Part one: Thailand and food. 1. A history. 2. Culture and society. 3. Regions of Thailand. 4. Rice.

Part two: Fundamentals of Thai cooking. 5. The Thai kitchen. 6. Ingredients and basic preparations. 7. Relishes. 8. Soups. 9. Curries. 10. Salads. 11. Side dishes and accompaniments. 12. Menus.

Part three: Food 'outside' the meal. 13. Snacks. 14. Desserts. Select bibliography (Books in English: Primary sources 23. Secondary sources 65. Cookbooks 18. Total English: 106. Thai sources: Cookbooks 46. Memorial books: 66. Total Thai: 112. Grand total: 218).

Introduction: The author has written this book, in part, to describe this ancient cuisine which "reached an apex in the last decades of the 19th century," and "before it is eroded, altered and modernised." The transliteration is phonetic; it is not the official system devised by King Rama VI.

The section titled "The importance of Buddhism" (p. 38-40) in Thai cookery and culture states: "It is the obligation of every Thai male to become a monk for at least three months, usually around the age of 20,..." This is a rite of passage from childhood to adulthood; it acquaints each young man with the basics of Buddhism and meditation. Strict Buddhists abstain from eating meat and "there is a strong tradition of vegetarianism in Thailand." Meat does not have a primary role in the Thai diet and most Thai believe that forgoing meat earns merit for themselves or another. Some give up meat once a week, or for a prolonged period, or even for an entire year.

Chapter 6, "Ingredients and basic preparations," discusses the following: Bean curd (*dtor huu*)*:* There are several types, from firm to soft. The author prefers the softest kind, sometimes called "silken bean curd."

Fermented bean curd (*dtor huu yii*)*:* Of Chinese origin and fermented with a red mold, it is sold in small jars and comes in two types: "very red, or creamy white veined with pink. The author prefers the latter, which is more versatile and subtle."

Fermented soy bean (*tua nao*)*:* This ancient fermented product was once used extensively in Thai cookery. But it has largely been replaced by shrimp paste, so it is not so common now. "Before *tua nao* is used in a recipe, it is grilled

© Copyright Soyinfo Center 2013

or toasted, then ground."

Soy sauce (*nahm siu uu*)*:* A lighter-style soy sauce is generally preferred by Thai cooks. "Sweet Indonesian soy sauce (*kecap manis*) is used only occasionally."

Yellow bean sauce (*dtow jiaw*)*:* "This is a sauce based on yellow soy beans, which are salted and then fermented with rice mould... [it] tastes delicious, very much like Japanese miso." Its use usually indicates a dish of Chinese influence. There are two basic types: "the first, and more traditional is creamy white; the more common one is honey brown."

Peanuts and wing beans [winged beans] are also discussed in chapter 6.

Soy-related recipes: Murray perch and mushroom soup with yellow beans (*dtom het dtow jiaw;* p. 249). Light soy sauce (p. 341). Fermented bean curd simmered in coconut cream (*lon dtor huu yii;* p. 430-31). Deep-fried bean curd with crab, pork and spring onions. (*tor huu yord sai tort;* p. 440-42). Prawns and yellow beans simmered in coconut cream (*lon dtao jiaw;* p. 444-46). Pickled ginger with yellow beans (*king dong dtow jiaw;* p. 457). Bean curd stir-fried with bean sprouts (*tor huu pat tua nork;* p. 462). Bean curd and bean sprout soup (*tgeng jeut or huu orn;* p. 469-70). Stir-fried Siamese watercress with yellow beans, garlic and chillies (*pak bung fai dtaeng;* p. 532-33). Yellow bean and ginger sauce (*nam jim dtow jiaw;* p. 545). Spicy yellow bean sauce (*nam jim dtow jiaw;* p. 558).

Note: Although three recipes in this book call for "bean sprouts," no mention is made of the type of bean to be sprouted. In the "Ingredients" section, the entry for "Mung beans (*tua leuang*)*"* says they are used mostly in desserts but makes no mention of sprouting them. There is no "Ingredients" entry for "Sprouts." Address: Chef, restaurateur, cookery writer, and preserver of traditional Thai culture, Sydney, Australia.

12511. Treloar, Brigid; Inge, Karen. 2002. Healthy soy: Cooking with soybeans for health and vitality. Hong Kong: Periplus Editions (HK) Ltd. Printed in Singapore. 112 p. Illust. (color). Index. 24 x 22 cm.

• ***Summary:*** This is a beautiful book, with stylish and informative full-page glossy color photos on every other page. It is well researched, comprehensive, and generally uses standard soyfoods terminology. It is also strange: We are not told in which country the publisher is located (perhaps Hong Kong or Singapore) or where the authors live. It is distributed in North America, Japan and Korea by Tuttle Publishing. On the inside rear dust jacket: www.tuttlepublishing.com. It is clearly targeted at a world market.

Contents: Introduction. The health benefits of soy: The heart, cancer, menopause, osteoporosis, weight control, allergies, lactose intolerance, the nutritional value of soy, protein, phytoestrogens, fats, calcium, soluble fiber, vitamins and minerals, energy, carbohydrates, how much soy do we need? (as an exchange for meat), how to use the nutrition table. Nutrition table (for various soyfoods). Soybeans: Green soybeans–fresh and frozen, dried soybeans, how to buy and prepare soybeans (selecting and storing dried soybeans, preparing dried soybeans, soaking, pan-roasting, boiling, pressure cooking, canned). Soy foods: Tofu (selecting and using, storing, freezing), bean curd sheets (yuba), deep-fried tofu (age; seasoned tofu), miso, tempeh, soya sauce (shoyu; regular, low-salt, light, tamari, ketjap manis), soy milk, soy flour, soy nuts, soy germ powder, soy oil, soybean sprouts, soybean paste (fermented), natto, soy dairy products (soy butter, soy spread {margarine}, soy cheese {plain or flavored}, cream cheese, yogurt, mayonnaise), soy meats (meat alternatives), others (soy breads, cereals, pasta, chocolate, chips, health bars, desserts, tofu ice creams), soy grits, tips (tofu, soy dairy products). Compatible soy flavors. Preparation and cooking techniques: Draining and pressing tofu, cutting tofu, deep-frying tofu, how to reconstitute yuba, how to use deep-fried tofu pouches, how to use miso, miso tips. Soups. Appetizers and dips. Light meals and snacks. Main dishes. Seafood. Vegetables. Salads. Desserts. Soy drinks. Glossary. Guide to weights and measures.

Note: This is not a vegetarian cookbook. Some recipes call for chicken, fish (swordfish, tuna, salmon), shrimp, etc. Address: 1. Food writer, stylist, consultant, and cooking instructor [Australia]; 2. Nutritionist and nutrition correspondent for *Good Morning Australia*.

12512. Weil, Andrew; Daley, Rosie. 2002. The healthy kitchen: Recipes for a better body, life, and spirit. New York: Alfred A. Knopf; London: Ebury. xxviii + 325 p. Illust. (color photos by Sang An, Amy Haskell, and Eric Studer). Ports. Index. 24 cm.

• ***Summary:*** Lifelong good health starts in the kitchen. Includes 135 recipes; none require red meat, but not vegetarian. Rosie's introduction encourages: "Don't be afraid to work with new ingredients, such as... using tofu,..." The section on "Nutrition and health" contains useful information on the glycemic index (p. xx-xxi), the main sources of fat (p. xxi) and protein (p. xxiv) in the American diet. Eat more vegetable protein, especially from soybeans, "and less animal protein, especially from fish and reduced-fat dairy products. The section on "Stocking the pantry" includes Asian foods–soy sauce or tamari, and "miso paste "Made from soybeans" (p. xxxiii-iv).

Soy related recipes include: "A soy shake," with silken tofu (p. 3, for breakfast). The section "Got (too much) milk?" (p. 34-35) recommends soymilk as a healthful alternative. And in the "Poultry" section (p. 54), Weil suggests substituting baked tofu. Weil has a full page (p. 58) about "Soy sauce: Shoyu and tamari," which also mentions "rice starter (koji)." There are recipes for: "Vegetable nori rolls" with natural soy sauce (p. 72-73). Miso pâté (p. 80). Miso

© Copyright Soyinfo Center 2013

soup (p. 125). Meat and meat substitutes (incl. tofu and gluten) (p. 149-50). Greens with tangy miso dressing (p. 244-45). Address: 1. M.D., Clinical Prof. of Medicine, Univ. of Arizona and Director of its Program of Integrative Medicine; 2. Chef trained at the Cal-a-Vie spa near San Diego, former Oprah Winfrey chef.

12513. Menzies, Gavin. 2003. 1421: The year China discovered America. New York, NY: William Morrow & Co. (Imprint of HarperCollins). xix + 552 p. Illust. Index. 25 cm. [850* ref]
• ***Summary:*** Chapter 3, "The fleets set sail," is describing the events in March 1421, when a Chinese fleet sailed from Tianjin near Beijing across the Yellow Sea. On board was an historian, Ma Huan, to document the voyage. His diaries, *The Overall Survey of the Ocean Shores,* were published in 1433. "The staple foods–soya bean, wheat, millet and rice–were carried in separate grain ships, enabling a fleet to stay at sea for several months without replenishing supplies... Soya beans, grown in tubs all year round, were used in several ways. Soaked in water, they sprouted 'yellow curls' from the green bean. The sprouting process increased the content of ascorbic acid, riboflavin and nicotinic acid, the basis of vitamin C, and protected the crew from the deficiency disease scurvy. The Chinese knew well the dangers of scurvy and the remedies to prevent it" (p. 65).

Note: This is the earliest English-language document seen (Jan. 2013) that uses the term "yellow curls" to refer to soybean sprouts.

When they ran out of fresh vegetables, "the sprouting soya beans were particularly valuable. Soya beans also produced 'milk'. When boiled, it became curd, or tofu, rich in vitamin D, and the fermentation of soya produced soy sauce. Tofu and vegetables were flavored from a sauce made from fermented fish, soy, dried herbs and spices, or glutamate made by chewing wheat flour." Address: London, England.

12514. Nasoya Foods, Inc. 2003. It's so easy. It's so delicious. It's so soy (Ad). *Vegetarian Times.* Jan. p. 7.
• ***Summary:*** This full-page color ad shows a photo of salad with cubes of marinated tofu on a fork. Near the bottom are photos of the front of Nasoya the bottom of the ad show the upper two-thirds of two packages of Nasoya Organic Seasoned Tofu, Organic Tofu, and Lite Tofu. "From stir fries to salads to soups and smoothies, trust Nasoya to make it perfectly delicious. For tantalizing, easy recipes, visit www.nasoya.com today." The red and white checkerboard logo reads: "Nasoya: Savor the goodness." Address: One New England Way, Ayer, Massachusetts 01432. Phone: 1-800-848-2769 or www.nasoya.com.

12515. Robertson, Robin. 2003. Vegan planet: 400 irresistible recipes with fantastic flavors from home and around the world. Boston, Massachusetts: Harvard Common Press. xvi + 576 p. Illust. Index. 23 cm. [15 ref]
• ***Summary:*** An outstanding, hefty vegan cookbook by an author who knows her ingredients well and uses a rich and pleasing variety of them. She is also an expert on soyfoods, and the book contains many useful insights about them.

We find the graphic design of the book to be weak to poor; the typeface in the recipe titles is hard to read, the ingredients in the recipes printed in gold on white are hard to read, and the many pages of white ink on a gold or other such background are hard to read.

The word "tofu" appears on 91 pages in this book, "tamari" on 67 pages (she uses the phrase "tamari or other soy sauce"), "soy sauce" on 62 pages, "soy milk" on 56 pages, "dairy-free" on 55 pages, "seitan" on 47 pages, "tempeh" on 46 pages, "silken tofu" on 33 pages, "firm tofu" on 29 pages, "miso" on 28 pages, "soft silken tofu" on 23 pages, "extra-firm tofu on 13 pages, "teriyaki" on 6 pages, "soybeans" on 13 pages, "soy ice cream" and "meat alternatives" each on 10 pages, "TVP" on 8 pages, "baked tofu" on 7 pages, "textured vegetable protein" on 6 pages, "firm silken tofu" on 5 pages, "soy flour" on 4 pages, "soy nuts" and "soft tofu" and "dairy alternatives" each on 3 pages, "edamame" ("fresh soybeans in the pod") on 2 pages, "soy yogurt" and "frozen tofu" each on 1 page (p. 72),

Yuba is mentioned on pages 182, 350-51 (definition and description), 389, 410-11, 414.

Page 29 states that soy flour is "Made from finely ground roasted soybeans" [i.e., kinako].

"Humans are the only animals that drink the milk of another species and the only animals that drink milk after childhood" (p. 9). Address: Virginia Beach, Virginia.

12516. Rose, Bruce. 2003. Soy & bulghur tofu: The best tofu Bruce ever tasted (Interview). *SoyaScan Notes.* Feb. 21. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** In about 1988 Bruce (who was interested in macrobiotics) was looking for a way to make tofu more of a balanced food / meal by adding some whole grains. He tried various combinations and found that bulghur wheat was by far the tastiest. His tofu maker developed the actual formula and process, as follows: Soak then steam bulghur wheat. Prepare firm tofu. As you are ladling the tofu curds into the forming box, sprinkle on about 4 parts of cooked bulghur wheat to every 6 parts of tofu. Try to have the layers of bulghur distributed as evenly as possible throughout the tofu. Fold over the pressing box cloths and press well. The resulting tofu is delicious and balanced. Address: Founder and President, Rosewood Products, Inc., 738 Airport Blvd., Suite 6, Ann Arbor, Michigan 48108. Phone: 734-665-2222.

12519. *Ontario Soybean Growers Newsletter.* 2003. Profiles: Peter Joe, President of Sunrise Soya-Foods, says that with soy, "Tasting is Believing." Feb. p. 7.
• ***Summary:*** "Sunrise Soya Foods is the success story created by Leslie and Susan Joe, who came to Canada from China in 1955. Two years later, they began producing tofu for customers in Vancouver's Japantown and Chinatown. Sunrise Soya Foods grew out of its original location in 1963; the Joe family continues to operate this location as a food store, serving the local community. The tofu manufacturing plant expanded again in 1983 to its current manufacturing and head office location. According to current president Peter Joe, this was the most significant move in the company's 26 year history. "'With the new facility, "pasteurized, packaged" tofu was produced. This allowed the company to open markets in other provinces in Canada, including Ontario and Quebec, and helped build the company into the largest tofu processor in Canada–and fifth in North America,' explains Peter, the eldest of four children, all of whom are involved in the Sunrise Soya Foods business. Peter holds an MBA from the University of British Columbia and has managed the business full-time since 1984.

"Besides running his own business, Peter is helping to improve consumer acceptance of all soy products through his involvement in Soyfoods Canada. This national soy industry group has been working for the last 3 years to show consumers the benefits of adding soy to their diets through in-store promotions, a new soy information / recipe brochure, displays at consumer shows and a website (www.soyfoodscanada.com). Peter is currently President of the association."

A portrait photo shows Peter Joe, looking very happy. Address: Chatham, ONT, Canada N7M 5L8.

12520. *Soyfoods Canada Newsletter.* 2003. Soyfoods Canada member profile–Nutrisoya Foods. Winter. p. 3.
• ***Summary:*** "Nutrisoya Foods Inc. first commenced operations in 1988 as a manufacturer of pasteurized, high protein tofu for sale in supermarkets under the Nutrisoya brand. Its production facilities are ideally located in St. Hyacinthe, Quebec, 30 miles east of Montreal, in the agricultural heartland of Eastern Canada, and is immediately adjacent to the most advanced food research centre in North America.

"In 1992 Nutrisoya Foods made its first foray into the aseptically packaged, dairy alternative beverage market with the launching of its *natur-a* brand of soy beverages.

"Today Nutrisoya Foods operates out of an altra-modern, fully automated, computer driven plant..."

12521. **Product Name:** Trader Joe's Organic Baked Thai Tofu.
Manufacturer's Name: Trader Joe's (Marketer-Distributor). Made by Wildwood Natural Foods in California.
Manufacturer's Address: Monrovia, CA 91016.
Date of Introduction: 2003. February.
Ingredients: Organic tofu (filtered water, organic soybeans, nigari {magnesium chloride, a natural firming agent}), organic soy sauce (water, organic soybeans, sea salt, organic whole wheat, alcohol {to preserve freshness}), organic lemon juice, Fruitrim (fruit juice, natural grain dextrins), rice wine, organic garlic, organic ginger, organic brown rice syrup, organic cilantro, organic toasted sesame oil, peanut oil, jalapeno peppers, organic cayenne pepper, Thai curry paste (garlic, red chili, lemon grass, galangal, salt, ginger root, onion, pepper), organic lemon grass. Certified organic by Quality Assurance International (QAI). Manufactured in a facility that processes peanuts.
Wt/Vol., Packaging, Price: 7 oz (198 gm) vacuum pack. Retails for $2.99 at Trader Joe's (2003/02, Lafayette, California).
How Stored: Refrigerated.
New Product–Documentation: Trader Joe's Fearless Flyer. 2003. Feb. p. 5. "One of the greatest things about tofu, aside from its obvious health benefits, is its ability to absorb the flavors of the marinades and spices with which it's cooked. We have two Organic Baked Tofus that will cause you to seriously reconsider how you view tofu."

Product with Label purchased at Trader Joe's in Lafayette, California. 2003. Feb. 16. 4 by 2 inches. Self-adhesive label on plastic bag. Red, purple, black, and white on greenish yellow. "Perishable. Keep refrigerated. Ready to

© Copyright Soyinfo Center 2013

eat." USDA Organic logo. QAI logo. 2 servings. Soyfoods Center taste test. 2003. Feb. 16. Delicious. Not too spicy.

12522. *SoyaScan Notes.* 2003. Chronology of the pioneering work of Ms. Frances Boyte of Quebec with vegetarianism and soyfoods in Canada (Overview). March 7. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** Frances, who now lives in Quebec City, Canada, is a registered dietitian, and is currently working with a Metro, a chain of 300 supermarkets, to introduce organic foods.

1980–She starts Club Vegetarien (C.P. 8953, Ste-Foy, Quebec G1V 4N8), which at its peak in about 1982 had 100 members. The club held dinners at a restaurant with guest speakers. It was discontinued in about 1987.

1982–*La Magie du Tofu,* which she co-authored with chef Yvonne Tremblay, is published. As of 2003, it has sold 60,000 copies. She developed and started to sell a tofu kit at the time of publication of the book.

1984–She sends her detailed Curriculum Vitae (4 typed pages) to William Shurtleff at Soyfoods Center in California.

1985–She visits Soyfoods Center in California. Shortly thereafter she has the idea for and establishes the Soyfoods Assoc. of Quebec–the first soyfoods association in Canada; however it never really got off the ground.

2001 April 7–Her latest book titled *Le Tofu Internationale* published. An English-language edition will be published in Dec. 2003.

12523. Wilhelm, Steve. 2003. The tofu tycoon of Vashon Island. *Portland Business Journal.* March 21.

12524. Burke, Dan. 2003. The origins of Pacific Soybean & Grain in San Francisco (Interview). *SoyaScan Notes.* March 28. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Dan founded Pacific Soybean & Grain in 1973 in San Francisco. A number of circumstances led him to establish the company; it was not very intentional. His first soybean customers were all in San Francisco: Wo Chong (tofu manufacturer), Quong Hop (tofu manufacturer), and Wing Nien (maker of both traditional Chinese-style fermented soy sauce and HVP soy sauce).

In July 1978 Dan attended the foundation meeting of the Soycrafters Association of North America, in Ann Arbor, Michigan. He flew to the event with Jack Mizono of Azumaya. In Feb. 1993 his company moved from their address at 495 De Haro St., San Francisco, to their present address. Address: Founder, Pacific Soybean & Grain, One Sutter St., Suite 300, San Francisco, California 94104. Phone: 415-433-0867.

12525. *SoyaScan Notes.* 2003. Chronology of the work of Jerry Maynard at Vitasoy (Overview). March 28. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** 1988–Jerry joins the Vitasoy group in San Francisco. 1993 Sept. John Paino resigns from Nasoya (which is owned by Vitasoy). Jerry Maynard from Vitasoy becomes the new president; he moves from California to Massachusetts.

1994 March–Vitasoy International Holdings Ltd. annual report states: Senior management includes: Mr. Jerry Maynard, age 43, who is president of Nasoya. He joined the group in 1988 and became president of Nasoya in Sept. 1993.

1996 March–With Jerry Maynard as president, Nasoya has just had the two best months, back to back, for tofu production in the company's history. One big impetus to growth was the widespread publicity generated by the article by Dr. James Anderson in the *New England Journal of Medicine* on 3 Aug. 1995 stating that soy protein can help reduce cholesterol and reduce risk of heart attacks. In one month in late 1995 Nasoya sold over one million dollars worth of tofu.

1996 August–Jerry Maynard has been moved back to California, where he is director at Azumaya. Fred Eaton, who has an accounting background, has taken his place as president of Nasoya. Nasoya is considered the best performer when compared with Azumaya.

1997 July–Vitasoy International Holdings Ltd. annual report states: Two Americans are on the board of directors: Mr. Jerry Maynard (age 47, Chief Operating Officer of Vitasoy USA, joined the Group in 1988) and Mr. Alfred H. Eaton (age 41, President of Nasoya Foods, joined the Group in 1990).

2001 Dec.–Vitasoy starts moving its corporate headquarters (about 140 people) out of South San Francisco and consolidating it with the 130 people in Ayre, Massachusetts. The move is finished by June 2002. Many jobs are eliminated.

2002 March–Jerry joins with Bob Bergwall and Jan Remak to start a new company named Nutrition Kitchen (www.nutrikitchen).

2002 June–Jerry leaves Vitasoy. In August he starts to work for Dan Burke at Pacific Soybean & Grain (PSG) in San Francisco–as director of sales and marketing. Dan has long been Vitasoy's soybean supplier. PSG, now more than 20 years old, is moving into branding and selling soy ingredients.

2003 March–Nutrition Kitchen introduces a dry pasta made of 100% whole soybeans at the Natural Products Expo in Anaheim, California. Although they did not serve samples of the product, the response from distributors and retailers was excellent. They have three SKUs made from black, green, and yellow soybeans. The product is good for use in diabetic diets. It should be in retail stores in early May.

12526. *Bluebook Update* (*Bar Harbor, Maine*). 2003. Frank celebrates 250 years. 10(1):3. Jan/March.

© Copyright Soyinfo Center 2013

• ***Summary:*** Frank has produced soy flours, isolates, lecithins and Serimpiestremming since the 1950s. Serimpiestremming is used in the production of tofu as a curdling product [coagulant].

12527. **Product Name:** Mori-Nu Silken Firm Tofu (Made with non-GMO Organic Soybeans).
Manufacturer's Name: Morinaga Nutritional Foods, Inc.
Manufacturer's Address: 9960 S.W. Potano, Tualatin, OR 97062. Phone: 503-692-3498.
Date of Introduction: 2003. March.
Ingredients: Filtered water, organic soybeans, gluconolactone*, calcium chloride. * = Gluconolactone is a non-dairy coagulant derived from food starch.
Wt/Vol., Packaging, Price: 12.3 oz (349 gm) Tetra Brik Aseptic carton.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: New product and package with leaflet sent by Art Mio of Morinaga. 2003. March 25. This product no longer contains isolated soy protein. The packaged has been redesigned to conform with the new USDA organic regulations. Red, white, grayish-purple, green, and black on light yellow. On the front panel: "Made with organic soybeans. Great for entrées and desserts." Non-GMO logo. A color photo shows the wide end of a slice of pizza. On a side panel is a recipe for Fresh spinach lasagna.

12528. **Product Name:** Pete's Tofu 2 Go [Sesame Ginger Tofu with Jazzed Ginger Soy Sauce, Lemon-Pepper with Mango Chipotle Sauce, Santa Fe Sizzle with Pineapple Mango Fusion Sauce, Thai Tango with Mango Wasabi Sauce].
Manufacturer's Name: Sunrise Soya Foods.
Manufacturer's Address: 729 Powell St., Vancouver, BC Canada V6A 1H5. Phone: 1-800-661-2326.
Date of Introduction: 2003. March.
Ingredients: Sesame Ginger: Tofu (water, certified organic soybeans, calcium sulfate), whole sesame seeds, dehydrated ginger, dehydrated garlic, spices, soybean oil, soy sauce (water, wheat, soybeans, salt), vinegar, brown sugar, salt. Jazzed ginger soy sauce: water, soy sauce (water, wheat, soybeans, salt), brown sugar, dehydrated organic ginger, sesame seeds, sesame oil, vinegar, lemon juice, dehydrated onion, dehydrated garlic, citric acid, xanthan gum.
Wt/Vol., Packaging, Price: 14.4 oz (206 gm) in tray inside plastic bag. Retails for $2.79 (2004/03, Lafayette, California).
How Stored: Refrigerated.
New Product–Documentation: Leaflet (8½ by 11 inch, color) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 2003. March. "Pete's Tofu: Taking the guesswork out of tofu!" "Pete's Tofu: A whole new way to enjoy tofu."

Product (Sesame Ginger) with Label purchased at Trader Joe's in Lafayette, California. 2004. March 13. 4¼ by 8½ by 2 inches deep. Brown, green, black, and white on tan. Color photo shows four triangles of tofu around a square pan of the sesame ginger sauce with mint leaves on a red plate. "Made from organic soybeans. Cholesterol free, High in soy protein. High in calcium. No preservatives added. Ready-to-eat tofu with sauce for snacking and more." Contains two 6.2 oz pouches of tofu plus two 1 oz packets of sauce. Logo: "Certified organic by Quality Assurance International (QAI)." Soyfoods Center evaluation: This product comes in innovative packaging. Four tofu triangles (which have been marinated and baked, or deep-fried) are packed two-deep in each of two vacuum pack cubes. These cubes are placed in the two compartments (2½ inches square by 3/8 inch deep) of a plastic tray. The sesame ginger sauce comes in small plastic pouches. These three items are invisible inside the outer plastic bag. To serve. Cut open the vacuum pack cubes. Place tofu triangles in compartments of plastic tray. Cut open pouches and pour sauce over tofu. Eat as a finger food or with a food. Product concept: Excellent. Flavor and texture: Very good, but there is too much liquid in the two vacuum pack cubes; it must be drained off when they are opened.

12529. **Product Name:** Pete's Tofu [Medium Firm for Mixing, Super Firm for Dicing, Italian Herb Super Firm Tofu, Very Berry Dessert Tofu, Peach Mango, Soft for Blending, Lemon-Pepper with Mango Chipotle Sauce, Santa Fe Sizzle with Pineapple Mango Fusion Sauce, Thai Tango with Mango Wasabi Sauce].
Manufacturer's Name: Sunrise Soya Foods.
Manufacturer's Address: 729 Powell St., Vancouver, BC Canada V6A 1H5. Phone: 1-800-661-2326.
Date of Introduction: 2003. March.
Wt/Vol., Packaging, Price: 12-16 oz (206 gm) inside plastic bag.
How Stored: Refrigerated.
New Product–Documentation: Leaflets (8½ by 11 inch, color) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 2003. March. (1) "Pete's Tofu: Taking the guesswork out of tofu!" Color photos show 5 of the packages. "Innovative overwrap packaging–now to the tofu category. Unique color-coded packaging. Eye-catching colors." (2) "Pete's Tofu: A whole new way to enjoy tofu."

Manufacturer's Name: Tofu Shop Specialty Foods Inc.
Manufacturer's Address: 65 Frank Martin Court, Arcata, CA 95521. Phone: 707-822-7401.
Date of Introduction: 2003. March.
Ingredients: Tofu (filtered water, organic soybeans, magnesium chloride), organic peanuts, organic coconut, organic cilantro, organic jalapeños, organic herbs and spices, sea salt.
Wt/Vol., Packaging, Price: 8 oz (226 gm) vacuum pack. Retails for $3.99.
How Stored: Refrigerated.
New Product–Documentation: Label sent by Matthew Schmit. 2003. Sept. 8. 2½ by 3½ inches. Self adhesive. Multi-colored on white. A stylish illustration shows a female Thai dancer. "Dice it into your veggies, or steam it to bring out the flavor!"

12534. University of California, Berkeley WellnessLetter. 2003. Healthy eating: How to tell the latest news from the old news (Leaflet). Berkeley, California. 1 p. Single sided. 56 x 21 cm.
• ***Summary:*** This glossy color leaflet has a section on "Soy futures." "Latest news: Soy is a good food, well worth adding to your diet–as soybeans, tofu, soy flour, or soy milk. Soy protein may help lower cholesterol and have anti-cancer effects... But while it's a good food, it's not a magic bullet. Like all plants, soybeans are a mixture of complex substances with many potential effects in the body, some beneficial, some not."

12535. *ASA Today* (*St. Louis, Missouri*). 2003. Soyfoods enjoy growing popularity. 9(6):4-page insert after p. 2. April.
• ***Summary:*** Attractive (with 5 color photos), interesting, and original. This is the first such insert in this 4-page newsletter, and the first time this newsletter has contained a significant amount of information about soyfoods. Below the title is printed: "A special publication from the American Soybean Association." On the back page we read: "ASA thanks the sponsors of this publication...: Solae [DuPont & Bunge], Soyatech, and White Wave. Below the logo of each company is 4½-inch-long column describing the company, its history and activities.

Contents of the insert: Introduction. Soyfoods become mainstream. The most common [widely used] soyfoods. U.S. consumers more aware of soyfoods. The push for soymilk in schools. Soyfoods for the future. Export demand for food ingredient beans.

It begins: "No longer are soyfoods considered unusual or hard to find. No longer are they considered the kind of foods only eaten by so-called 'granola-crunchers' or 'health fanatics'... The menu at the recent American Soybean Association (ASA) awards banquet featured a serving of delicious edamame (sweet green soybeans) that soybean growers and guests alike enjoyed with enthusiasm."

12536. Berkoff, Nancy. 2003. Terrific tofu. *Vegetarian Journal* (*Baltimore, Maryland*) 22(2):8.
• ***Summary:*** Six tips for using extra-firm tofu. Address: RD, EdD, CCE.

12537. Dunnington, Jacqueline. 2003. Tofu toppings. *Vegetarian Journal* (*Baltimore, Maryland*) 22(2):6-7.
• ***Summary:*** Contains 7 recipes. Address: Freelance writer, Santa Fe, New Mexico.

12538. Hobbs, Suzanne Havala. 2003. Nutrition hotline: Alternate Protein Products (vegetarian) in the government's Child & Adult Care Food Program. *Vegetarian Journal* (*Baltimore, Maryland*) 22(2):2, 5.

© Copyright Soyinfo Center 2013

• ***Summary:*** Federal funding of the Child & Adult Care Food Program (CACFP) supports daily meals and snacks for 2.6 million children and 74,000 adults at home day care programs, day care centers, after-school care programs, and shelters. USDA's Food and Nutrition Service (FNS) administers the program at the federal level; at the state level it is administered by state education and health departments. Modifications to the "Vegetable Protein Products" requirements were finalized in March 2000. With the latest group of changes, "Vegetable Protein Products" were renamed "Alternate Protein Products" (APP). The cap on the amount of APPs that can be used in menus was removed, and the new regulations no longer require that APPs be fortified. Tofu and tempeh don't qualify as APPs because they don't meet the requirement in Appendix A that APPs must contain at least 18% protein by weight when fully hydrated or formulated. Soymilk and soy yogurt don't count as APPs either–even though dairy yogurt does.

12539. Morinaga Nutritional Foods, Inc. 2003. Mori-Nu. The tofu created for royalty. Now available for your table (Ad). *Vegetarian Times.* April.
• ***Summary:*** This attractive color ad (8½ by 11 inches) shows a large black-and-white photo of a former emperor of Japan and his wife. In front of it is a large color package of Mori-Nu Extra Firm Silken Lite Tofu–with a new label design. Across the bottom are small photos of the six types of Mori-Nu tofu–each with a new label design. The tofu that is "Made with Organic Soybeans" also has new ingredients–it no longer contains isolated soy protein. All should be available in stores by late April.

This ad also appeared in *Natural Foods Merchandiser* (March 2003, p. 15). Address: 2050 W. 190th St., Suite 110, Torrance, California 90504. Phone: 1-800-NOW-TOFU or 310-787-0200.

12540. Petrie, Susan. 2003. Maryland State Fair Soyfoods Cooking Contest. *Vegetarian Journal* (*Baltimore, Maryland*) 22(2):35.
• ***Summary:*** The second annual Soyfoods Cooking Contest was held last year at the Montgomery County Agricultural Fair in Gaithersburg, Maryland. The "Oh Boy, It's Soy" event, developed to promote good health and nutritional awareness in Maryland, was a state-wide competition that drew 34 entries (twice as many as the previous year) in three divisions: vegan, adult, and youth. More than $500 in prize money was awarded, and some of the winners were under age 18!

Cyndi Reeser, RD, MPH, the contest organizer and a nutritionist based in Washington, DC, received a grant in 2001 from the Maryland Soybean Board for a soyfoods education program, which included the cooking contest and nutrition outreach among 4H youth. The first year's success enabled the contest to return with new sponsors–Morinaga Nutritional Foods (Mori-Nu Tofu) and the Soynut Butter Company. This years contest will be held on 16 Aug. 2003 (Sat.). A winning recipe for Tofu salad is given. A color photo shows 3 winners of the youth division (2 girls, one boy), each holding his or her dish.

12541. Aoyagi, Akiko. 2003. McDonalds in Japan plans to launch a fried tofu burger (Interview). *SoyaScan Notes.* May 2. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Akiko recently saw a program on Japanese TV stating that McDonalds Holdings Co. (Japan) Ltd., the American burger giant, is experiencing lagging sales and decreasing profits for the first time in 29 years in Japan. In response they have decided to start selling a fried tofu burger as a healthy alternative in their Japanese restaurants, and to make other healthy additions to its Japanese menu. The new tofu burger will come with a ginger-flavored soy sauce and sell for $1.91. McDonalds' problems include youth savvy competition from the Freshness Burger chain and fears about Bovine Spongiform Encephalopathy (BSE).

Note: An article in *Bluebook Update* (May 2003, p. 1) stated that On April 23, McDonalds Holdings Co. (Japan) Ltd., a mainstream foodservice company, is adding "tofu hamburgers" to its menu. Address: Walnut Creek, California.

12542. Morey, Jennifer. 2003. Tofu Shop honored as 'super recyclers.' *Times-Standard* (*Eureka, California*). May 2. p. B3.
• ***Summary:*** Out of the hundreds of thousands of businesses in California, only ten received the top award, "WRAP of the Year," from the state's Waste Reduction Awards Program. Tofu Shop Specialty Foods was one of those ten. Owner Matthew Schmit says his company (which has about 22 employees) now recycles 99.7% of its waste. The biggest recycled item is 240,000 lb/year of soybean pulp (okara), which goes into a local farm's feeding trough. The current owner picks it up every day free of charge; he is grateful for the excellent free feed. The pulp isn't for all farm animals because of its very high content of cellulose fiber.

12543. Miller, Wiley. 2003. Non sequitur: When things go from bad to worse (Cartoon). *San Diego Union Tribune.* May 13. Nationally syndicated.
• ***Summary:*** This cartoon shows a large devil with a long pronged tail and a white napkin draped over one arm serving as a waiter. A small, befuddled man is sitting at a restaurant table reading a menu titled "Tofu List." The devil says: "Our special today, as it is *every* day, and for all eternity, is tofu."

• ***Summary:*** She and her partner have been making tofu for a

© Copyright Soyinfo Center 2013

short time and selling a little of it. But they were not the first ones in Tasmania to make tofu commercially. The pioneers were people who made and sold tofu in their restaurant. She plans to order *Tofu & Soymilk Production* and *Tempeh Production* published by Soyfoods Center.

Update. Talk with Christina. 2003. June 11. She first sold tempeh in May 2003. Address: 124 Fourfoot Rd., Geeveston, Tasmania 7116, Australia. Phone: (3) 6297 1293.

12545. Thottam, Jyoti. 2003. Houston's silk road cuisine. *Time.* May 19.
• ***Summary:*** Ocean Palace, a huge banquet hall in Houston's Chinatown [Texas], is frequented by Asians and non-Asians alike. "The steamed buns filled with barbecued pork are as light as clouds; slivers of custard-soft tofu are immersed in a light ginger syrup; and the chili oil at every table is made by the chef."

12546. *Ontario Soybean Growers Newsletter.* 2003. The Australian soybean industry. May. p. 5.
• ***Summary:*** "This article was written by Dr. Malcolm Morrison, an Oilseed Physiologist with Ag Canada. He is currently on a study leave in Australia.

"In 2002, Australia produced 70,000 tonnes (metric tons) of soybean on 30,000 ha (74,000 acres) of land. Major production areas are in southern Queensland and northern New South Wales, with pockets in other irrigated regions of the country. Soybeans are planted during summer and most production is irrigated. Soybeans are used as a green manure crop in sugar cane, returning 40 to 300 kg/ha (35- 267 pounds / acre) of nitrogen, depending on whether the seeds are harvested or the crop ploughed in green.

"Annual Australian demand for soybeans far outstrips national production. The crushing industry imports about 40,000 tonnes of seed and the livestock industry imports up to 360,000 tonnes of solvent extracted meal, mostly from the United States. The baking industry uses another 14,000 tonnes of Australian grown, full-fat soy flour.

"With the drought of 2002-2003, production has dropped by 50%. Farmers have only planted the crops that they could afford to irrigate. This year it was almost as profitable to sell stored water as it was to plant and harvest a field of soybeans. In the irrigated cash crop regions, soybeans are last on the list of preferred crops after cotton, corn, grain sorghum, and sunflowers.

"Phytophthora, white mold, mildew, and soybean rust are major diseases, while insect pests are silverleaf whitefly, green veggie bug, aphids, scale bugs and mites. Plant breeders are developing disease resistant varieties and pest specialists are releasing parasitic insects, and creating viral and fungal biopesticides. Plant breeders are selecting white hilum varieties with good yield, agronomics and natto and tofu characteristics. Many of the new varieties have Canadian parents and are being tested in Asia with favourable results.

"The Australian soybean industry is beginning to target the same high value soyfood markets in Asia that Canada has been focusing on for years. Australia has a 'clean/green' reputation since they do not produce GMO food crops. They intend to capitalize on this image to capture food grade soybean niche markets in the near future. Producing an assured supply of high quality, non-GMO soybeans will be a challenge in the Australian environment." Address: Chatham, ONT, Canada N7M 5L8.

12547. **Product Name:** Tofurky Gourmet Meatless Sausages [Beer Brats with Micro Brewed Amber Ale, Sweet Italian Sausage with Sun Dried Tomatoes and Basil, or Kielbasa–Great Sandwich or Dinner].
Manufacturer's Name: Turtle Island Foods, Inc.
Manufacturer's Address: P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031. Phone: 1-888-TOFURKY (863-8759).
Date of Introduction: 2003. May.
Ingredients: Beer Brats: Tofu (non genetically modified soybeans, water, magnesium chloride or nigari), vital wheat gluten, expeller pressed non genetically modified canola oil, shoyu soy sauce (water, soybeans, wheat, salt, culture), Full Sail Amber Ale, herbs and spices, water.
Wt/Vol., Packaging, Price: Four vegan hot dogs in 14 oz pack. Suggested retail price: $3.89 to 4.29.
How Stored: Frozen or refrigerated.
New Product–Documentation: Color leaflet and news release from Turtle Island. 2003. May 1. "The liberation of the summer grill: No longer meat only." "Turtle Island Foods today announces the first Line of Vegetarian Sausages that Sizzle on the backyard barbeque... 'We hope that these Gourmet Sausages will do for the Vegetarian Grilling experience what the Tofurky Roast did for the Vegetarian Holiday Table...' says Seth Tibbott, founder and company president."

There are 3 sausages in the line. "Turtle Island is the first US company to be certified Vegan by the United Kingdom's Vegan Society. Each pack contain 4, three and one half ounce sausages." In the upper right corner of the front panel of each label is the colorful vegan logo, which is a yellow quarter circle with the words "Certified Vegan" around a sunflower.

Talk with Seth Tibbott of Turtle Island. 2003. May 14. These sausages will be available in early June in retail stores. They were introduced at the Anaheim trade show (March 2003) and attracted long lines of people. Even a janitor at the show kept coming back for more and said they were his favorite product at the show. They barbecue better than all other products for two reasons: (1) They have a little higher fat content; and (2) The main ingredient is tofu, rather than soy protein isolates. In fact, each type of sausage contains more than 50% tofu! The microbrew ale (beer) is made by one of Seth's next-door neighbors. Jean Greenfield, in charge

© Copyright Soyinfo Center 2013

of quality control for Whole Foods Market in San Francisco, California, told Seth that her company plans to phase out products made with hexane-solvent extracted soy protein isolates.

Seth had these sausages certified by the Vegan Society in Jan. 2003. His company has always made only vegan products, but they generally positioned the products as meatless or vegetarian rather than vegan; now that may change. He is now developing a line of Tofurky hot dogs, and may also produce them as private label brands for other companies.

Products (all three) with Labels sent by Turtle Island. 2003. Nov. 19. On the front panel of each label, a color photo shows the product served in a dish (as between bunds or sliced over pasta) against a single-color background. Text: "Meatless & Delicious." "Keep frozen or refrigerated." Logo: "Outdoor Grill Approved." Turtle Island Foods, Inc. logo of turtle with a planet-shaped shell inside of a circle of soybean stem and leaves. Soyfoods Center taste test: We liked the Kielbasa best and found the Sweet Italian Sausage too spicy.

Color leaflet sent by Seth Tibbott of Turtle Island. 2003. Nov. "There's 3 big new dogs in the house." Note: Seth says this was printed in about June 2003.

12548. Huang, H.T. (Hsing-Tsung). 2003. The chemistry and biochemistry of the process of tofu coagulation (Interview). *SoyaScan Notes.* June 14. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** This interview was conducted to try to answer questions from Adrian Chang of Hawaii about the safety of calcium sulfate and its possible contribution to osteoporosis.

If we use calcium sulfate (Ca_2So_4) as a coagulant, we are using a chemical compound containing two positively charged calcium ions (ca++) and a sulfate ion with a negative charge of minus 2. The first step is to dissolve the calcium sulfate (a white powder) in water.

Coagulation or curding takes place when we add a coagulant to hot soymilk. From a chemical viewpoint, the protein molecules in the soymilk react with and become bound to the calcium ions to form a matrix (called soymilk curds) and become insoluble. Most of the sulfate ions go into solution in the whey. When the curds are pressed, they become tofu. Tofu curded with calcium sulfate has a higher calcium content than that curded with nigari or magnesium chloride; this is one of its main benefits.

When we eat this tofu, the digestive process (both enzymes and acids) liberates the calcium from the amino acids in the protein molecules to which it is bound; this process also hydrolyzes the complex protein molecules into simpler peptides or amino acids. The calcium, now called "free calcium" is digested and assimilated into the body and sent to the various places where it is needed (such as bones, blood, etc.); calcium is involved in many of the body's metabolic processes. When the pH is very low, as in the stomach, the calcium will probably be in the form of free calcium ions. When the calcium goes into the small intestine, where the pH is not as low (it is fairly neutral, and not as acidic), the calcium will probably still be soluble and remain in the free form.

Dr. Huang's wife was taking calcium supplements in the form of calcium phosphate–which is very insoluble. He was wondering how effective it is; does it get absorbed. The same would be true of calcium sulfate supplements.

To summarize: Dr. Huang believes that tofu coagulated with calcium sulfate is an excellent source of dietary calcium and should help to prevent osteoporosis. Address: Goodwin House, 4800 Fillmore Ave., Alexandria, Virginia 22311.

12549. Ness, Carol. 2003. Best of fresh soy milks: Taster's choice. *San Francisco Chronicle.* June 18. p. E2. Food section.

• ***Summary:*** Five brands were tasted and rated in descending order of preference as follows: 1. Sun Soy Creamy Original (79 points, $1.99/qt). 2. Silk Organic (76 points, $2.29/qt). 3. 365 Organic Original (67, $2.99/half gallon at Whole Foods). 4. 8th Continent (61, $4.49/half gallon). 5. Wildwood Certified Organic (49 points, $1.99/qt at Safeway). Address: Staff writer.

12550. Yamamoto, Seiichiro; Sobue, T.; Kobayashi, M.; Sasaki, S.; Tsugane, S. 2003. Soy, isoflavones, and breast cancer risk in Japan. *J. of the National Cancer Institute* 95(12):906-13. June 18. [44 ref]

• ***Summary:*** Breast cancer risk was reduced by one half in Japanese women who ate three or more bowls of miso soup on an almost daily basis. The report monitored 21,852 women from 1990 to 2000. Post-menopausal women showed the greatest reduction of risk.

"In Japan, soy is consumed in various forms, including dried or green soybeans, tofu (soybean curd), natto (fermented soybeans), miso (fermented soybean paste), okara (tofu lees), soybean sprouts, soymilk, yuba (soy milk skin), kinako (soy flour), and soy sauce." Address: Cancer Information and Epidemiology Div., National Cancer Center Research Institute, Tokyo, Japan.

12551. Davis, Robert. 2003. Early interest in spiritual development and soyfoods (Interview). *SoyaScan Notes.* June 23. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Bob went to Goddard College and wrote his thesis in "Planetary Development." He still has a copy. He focused on the work of Pierre Teilhard de Chardin (1881-1955; French Jesuit paleontologist and philosopher) and Rudolf Steiner (1861-1925; Austrian social philosopher and mystic). Steiner was a deeply influenced by Goethe, developed biodynamic gardening, and wrote about lost

© Copyright Soyinfo Center 2013

civilizations such as Atlantis (a fabled Island in the Atlantic that, according to legend, sank beneath the sea; Atlantis was first described by the Greek philosopher Plato in the 4th century BC), and Lemuria. Address: Founder, Good Karma Foods (GKF), 4527 Hilltop Drive, Clinton, Washington 98236.

12552. *ASA Today* (*St. Louis, Missouri*). 2003. ASA/India spurs major growth in soy consumption. 9(8):6. June.
• ***Summary:*** In March, the American Soybean Association had a booth at the premier food and beverage trade show in India, the 18th International Food Exhibition, called AAHAR 2003, in New Delhi. "Aahar" means food in Hindi. Eight companies participated in ASA's Soy Pavilion: (1) General Food Ltd. (maker of soy nuts, soy oil, soy flour). (2) M.P. State Oilfed (soy biscuits, soy nuggets [TVP]). (3) Protein Technologies International (soy protein isolates). (4) Ruchi Soya Industries (soy flour, soy chunks, soy oil). (5) Soy Appetite (Soy milk, soy rusk, tofu). (6) Sonic Biochem Indore (Full fat soy flour, defatted soy flour). (7) S.S. Agro Industries (fermented black soybeans, soy chunks, soy granules). (8) S.S.P. Ltd. (SSP, soy milk equipment / machinery).

12553. Morinaga Nutritional Foods, Inc. 2003. We have moved (Card). 2441 West 205th St., Suite C102, Torrance, CA 90501. 1 p.
• ***Summary:*** This 4¼ by 5½-inch card, printed black and red on white, announces that, effective June 1, Morinaga, maker of Mori-Nu Silken Tofu, has moved its corporate headquarters to 2441 West 205th St., Suite C102, Torrance, California 90501. Telephone, fax, and website remain unchanged. The new address is quite near its old one: 2050 W. 190th St., Suite 110, Torrance 90504-6230. Address: Torrance, California. Phone: (415) 583-9888.

12554. Turtle Island Foods, Inc. 2003. There's 3 big new dogs in the house (Leaflet). P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031. 1 p. Front and back. 28 cm.
• ***Summary:*** On the front in the foreground is a huge Tofurky sausage (grilled, between two buns, with all the trimmings) with a sort of brand / logo burned / stamped onto the center of it: "Approved–Outdoor grill." In the background are packages of the three meatless sausage products in the background: Tofurky Gourmet Meatless Sausages (Beer Brats with Micro Brewed Amber Ale, Sweet Italian Sausage with Sun Dried Tomatoes and Basil, or Kielbasa–Great Sandwich or Dinner). Over

On the back are the three product labels with ingredients and Nutrition Facts. SRP (Suggested Retail Price): $3.89 to $4.29 per 14 oz. A sidebar reads: "Our premise: Up till now, the backyard barbeque has primarily been the domain of the carnivore. While the past 20 years have seen many great meat alternatives introduced that cook fine in the microwave, nearly all fall way short when placed on the outdoor grill. Some tofu wieners even say, 'Not recommended for barbeques'... Unlike the smaller dogs on the street, these dogs are not made from soy powders or concentrates. Real tofu is our soy protein! Finally there is a product vegetarians can Sizzle on an outdoor grill or cook in the comfort of your kitchen! We want these sausages to change the vegetarian grilling experience just like the Tofurky Roast changed the holiday dining experience!" Address: Hood River, Oregon.

12555. Wang, June. 2003. Pioneering work of Tau Wang, founder of First Vegetarian Foods Co., in introducing Chinese vegetarian foods to California (Interview). *SoyaScan Notes.* July 10. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** June's father, Tau Wang, was born in 1935 in Shandong province, China. With his elder brother, he moved to Taiwan at age 11, became a veterinarian, married, and started a family. He was a Buddhist and a vegetarian. In 19?? he decided to emigrate to the USA. He knew it would take too much time and money to get another veterinarian's degree in America, so he went through culinary training and cooking school in Taiwan. In the mid-1970s (what year??), while in his 40s, he came to the United States and established what June believes is the first Chinese company to make vegetarian products in California–perhaps in the United States. While his family waited in Taiwan as he created a place for them, he began by working at a Chinese restaurant in Maryland for 1-2 years until he obtained his resident status. Then in the late 1970s (what year??) he moved to Southern California; he liked the semitropical climate and wanted to get away from the cold East Coast climate. In those days, most Chinese still lived in Chinatown in downtown Los Angeles. There he met some Buddhist friends from Buddhist temples. He soon realized that there were almost no Chinese vegetarian foods for them to choose from–other than tofu and vegetables. So he decided to start a company named First Food to make vegetarian foods to supply first the Buddhist temples in Los Angeles, with the hope of soon expanding. His first product was steamed Chinese buns (*mantou*), followed by "Vegetarian Duck" or *Suya* (made by simmering wheat gluten; pinyin: *mianjin;* W.-G. *mien chin*), and steamed and lightly salted wheat gluten (*kaofu*). He experimented with many different vegetarian foods that were not available in Los Angeles. One new product was konnyaku.

June (age 11) and her brother left Taiwan joined their father in Los Angeles in 1979. Mrs. Wang and three more daughters came 6 months later (summer 1980). Soon the whole family was working in the business after school. June recalls: "After school, we kinds would go to work. After work, we would all go home and eat together as a family. Then we'd do our homework. We knew that our life had changed and we all had to pitch in and do whatever we

© Copyright Soyinfo Center 2013

could." When June arrived, she spoke no English. But she learned and graduated from California State Polytechnic University, Pomona, with a degree in accounting.

In about the mid-1980s Mr. Wang introduced his first soy product which was "Vegetarian chicken" called "Suchee" (pinyin: *siji;* Wade-Giles: *ssu-chi*), made out of extra-firm pressed tofu. It was cooked in water seasoned with a little salt, then the water was pressed out and it was sold in the shape of a half-cylinder. When this product was successful, he extended the line with Mushroom Suchee and Savory Suchee (seasoned with soy sauce and his own blend of seasonings). In 1985 he incorporated the company.

Gradually his business expanded to Chinese restaurants, supermarkets, northern California, then to distributors servicing other states. Because of the language barrier, and because it was family-run sole proprietorship where he pretty-much ran the whole show, with the help of his family and a few other workers.

June's father was concerned about what would happen to his business when he retired. Their foods were sold, packaged, and distributed only to the Chinese market. He also hoped it would expand beyond the Chinese market. After working outside the family business for a few years, June bought the business from him on 31 Aug. 1999, with the goal of helping her dad to realize his dream of expanding the business beyond the Chinese community. She invited her younger sister, Saline, to join her as a manager–and a potential shareholder. She soon launched a new line of Hispanic / Mexican hand-held meatless snack products named Starlite Cuisine, including 3 flavors each of Soy Taquitos (rolled in corn tortillas) and Soy Rolled Tacos (rolled in wheat flour tortillas)–both filled with textured soy protein concentrates. She hoped to sell these through Trader Joe's, but after sending many samples to the frozen foods buyer, he stole the product name and idea, and now Trader Joe's has its own Taquitos–Ugh!

A brief biography of Tau Wang's work has been written in Chinese. The company also makes make an abalone alternative based on konnyaku; it contains no soy ingredients. Address: 1429 Virginia Ave., Suite F, Baldwin Park, CA 91706. Phone: 626-338-8233.

12556. Parsons, Tony. 2003. What's in your basket? *Observer* (*London*). July 13. p. 158.
• ***Summary:*** "I snack on tons of Inarizushi–its white rice stuffed inside sweetened tofu wrapping."

12557. Elegant, Simon. 2003. Long lives well lived. *Time.* July 16.
• ***Summary:*** "Okinawa's national dish is a stir-fry called chample." "The exact recipe varies from house to house but the basic ingredients are always there: tofu, soya beans and goya [a local variety of bitter gourd]. Those three are all very high in flavonoids as well as other compounds like isoflavones, saponins and vitamins B and C that provide protection against free radicals." Address: Okinawa.

12558. Toscano, Dawn. 2003. Work with tofu in Japan and Spain (Interview). *SoyaScan Notes.* July 16. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Dawn has been living in Spain since 1988–for the last 15 years. Now she wants to start making tofu in Valencia, Spain, where it is available only at high prices, vacuum packed in plastic, at trendy herb stores or via Chinese distributors.

She knew Nahum & Bev Stiskin, whose fledgling publishing company, Autumn Press, published *The Book of Tofu* in late 1975. In March 1974, when she went to Japan (because she could not find a job in USA), she lived in Minami-ku, Yokohama, and worked at the YMCA. Then, during her yearly gynecological visit, she met a gynecologist at the Yamate Hospital who was a Lt. Commander in the U.S. Navy. He lived on the navy base in Yokohama. Later in 1974 she moved to Hayama and got into paper-making then into weaving. Beverly Stiskin was selling one of her looms, but Bev needed to see a gynecologist, so Dawn took Bev to the Yamate Hospital and Dawn's boyfriend helped her, free of charge. Dawn ended up not buying the loom. But she did talk to Nahum and showed him a newspaper article she had about tofu. He was interested. She may have given Shurtleff's phone number to Nahum or she may suggested to Shurtleff that he call Nahum.

In the 1970s she called Shurtleff at least 3 times in Japan and once in ca. 1980-81 from a phone box in Lafayette, California; her future ex-husband lived in Walnut Creek. In Japan she sent Shurtleff a draft of an article she wrote about tofu and wanted to submit to *Mother Earth News.* Shurtleff suggested some corrections, but it was never published. She used to make tofu all the time at home in Japan, and she has continued since she arrived in Spain. She bought a first edition of *The Book of Tofu,* then wrote a letter to *Mother Earth News* and urged them to review the book. They wrote back saying "no, the timing is not right," because they had never heard of tofu. She still has both letters *Mother Earth News* wrote to her. The second says "Thanks so much for bringing this book to our attention." She was a *Mother Earth News* lifetime subscriber ("Lifer," for $250) #447 or #449. Address: Calle Uruguay 59, pta 13, 46007 Valencia, Spain. Phone: +34 96 380 2129.

12559. Demos, Steve. 2003. Developments at White Wave during the past year since sale of the company to Dean Foods (Interview). *SoyaScan Notes.* July 18. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The most important thing is that "we have successfully gotten ourselves into serious corporate America, and we have the opportunity to influence not the consumer world, but now we can also influence the business world.

© Copyright Soyinfo Center 2013

The mission on the consumer is really a matter of momentum now; any corporation could push Silk and keep it going as a pure product. The question is: Can you establish a business model that is socially responsible, environmentally responsible, consumer responsible, and fiscally responsible (make a handsome profit)–all at the same time. That is the opportunity that is being handed to us. This alignment with Dean Foods, and in particular with CEO Gregg Engles, has been remarkable.

"About two weeks ago Dean Foods announced the purchase of Horizon Organic, another company in Boulder, Colorado. The world's largest commodity dairy processor just sent a very clear signal to Wall Street: 'We are going to invest in wellness, health, and environmental businesses.' They paid about $250 million for Horizon, so they have put almost $500 million on the table for these two soy and organic milk businesses. This is all about Wall Street and large profits. It is not about saving the planet–even though they may well do that. The joke between me and Gregg Engles is 'My green is gonna meet your green on Wall Street!' Gregg has really endorsed this. This is not just an arm's length relationship. White Wave is the focus of Dean Foods' strategy going forward."

Steve has created what he calls the "Wellness Division" of Dean Foods–but he would not be surprised if this concept appears in the Dean's next annual report. Dean's price-to-earnings (P/E) ratio has been up. When Dean acquired White Wave, Dean was trading at a P/E of 16. They are now trading at 18–not because of better earnings but because of the sex appeal and opportunities of this wellness. Gregg told me he will give me anything I want if I focus on his P/E ratio–because that's what his stockholders want to see. If we position the company as a commodity business that is now invested in wellness consumer packaged goods, Dean could become the latest and greatest Procter & Gamble–if you will. There hasn't been the emergence of a serious branded company in the U.S. for quite a while. This is an unusual opportunity for Engles and Dean.

"Dean Foods is remarkably supportive of White Wave. They never interfere with anything that we're doing. Why would they? We're more profitable than any of their other divisions.

"We are now building three new extraction factories in the U.S. White Wave is producing Silk in Jacksonville, Florida, now. We invested the money in the processors and the fillers. The extraction part of that will be up and operational by mid-September of this year. We're putting in spin flash-dryers for our okara to turn it into further eco-products. Remember, now that we have an organic dairy inside Dean Foods, the okara goes to Horizon's cows producing organic milk–a nice fit and inexpensive solution, because drying okara does not cost that much. But we're going to go further than that, by turning it into an actual eco-value product, mixing it with other ingredients so that the Silk story is complete–even our waste stream. So everything is used.

"In Mt. Crawford, Virginia, we are putting in another extractor as we speak. It won't be open until Jan. 2004. Then we are installing a second extractor that will start producing later. So we will have two extraction lines in the same building. That is the major investment center for Dean on the East Coast, where all the plastic bottles are run, etc. Soon we will have facilities up and down the East Coast from Buffalo down to Jacksonville. Presently White Wave extracts soymilk for Silk from whole soybeans in two plants, in New Jersey and Utah. Soymilk for tofu, not Silk, is made in Boulder, Colorado. The dairy White Wave works with in New Jersey put up a $12 million facility next door to White Wave's extraction facility, with a pipe right through the wall; it takes up the entire capacity for this factory, about 16 million gallons a year.

In New York City, Silk soymilk has 4.2% of the dollar share of the entire milk market (including dairy milk), and in Miami 4.3%. Those are White Wave's top markets. In the entire U.S., Silk has from 3.2 to 4.4% of the milk market. One year ago, Silk had about 40% less of those markets–remarkable growth. No wonder Dean Foods likes us so much. We took their factory [in Jacksonville] and increased its value.

"It's a great game out there. It's heating up because we now have some giants gorillas that are chasing us. We figure 8th Continent has spent $40 million chasing us and they don't have much business to show for it. They are planning to spend another $40 million because DuPont owns a patent on a soybean [Synchrony resistant] and if then can establish an American market for products which use that bean, they can expand it into a worldwide market over the next few decades."

Steve has been trying to make an issue out of hexane solvent and extraction but nobody will talk with him about it. Steve refuses to use soy protein isolates in his products because they are currently made using hexane [a petroleum derivative]. He is looking for isolates or isolate-like products that are made using a more natural solvent, ideally from organic soybeans.

A new motto is being used within the company: "A brand that covers you from diaper to diaper." White Wave is developing new Silk products that fit the tastes and nutritional (especially protein) needs of different age groups–such as children, school kids / teens, soccer moms, and geriatrics. "This is the diaper to diaper approach and the direction we are going to try to take Silk. A person needs much different nutrients at age 8 than at age 70. If Silk is organic and natural soy, we can begin to act like the orange juice and the milk people and enhance that delivery, only we can customize more than they ever thought about."

Steve always used to tell people "I'm working for my grandkids." He thought things in the soyfoods industry

© Copyright Soyinfo Center 2013

would eventually turn out the way they have–but not in his lifetime. "That was okay. It has been very exciting to watch things accelerate in the direction we always hoped they would go." Address: President, White Wave Inc., 1990 North 57th Court, Boulder, Colorado 80301.

12560. Egan, Anne. 2003. Edamame (eh-dah-MAH-meh): 60 tempting recipes featuring America's hottest new vegetable. Emmaus, Pennsylvania: Rodale Press. 144 p. Illust. (25 color photos by Mitch Mandel). Index. 24 cm.
• ***Summary:*** Contents: Introduction: Name game, history (of soybeans), the hottest health food today, selection, preparation, grow your own, sources for edamame seeds. Appetizers. Salads. Soups. Main dishes. Side dishes. Conversion chart. An attractive non-vegetarian cookbook. Address: Executive Editor of Cookbooks, Rodale Press, 33 East Minor St., Emmaus, Pennsylvania 18049.

12561. *Plenty Bulletin* (*Summertown, Tennessee*). 2003. Soy Huichol [in Mexico]. 19(2):1-3. Summer.
• ***Summary:*** "Louise Hagler, culinary educator whose expertise is cooking with soyfoods, author of seven cookbooks, and Plenty advisor, recently returned from a six week technical assistance and training visit to the Huichol Center for Cultural Survival and Traditional Arts. The Center is located in the town of Huejuquilla, Jalisco, a frontier town in the Sierra Madre Occidental mountain range, which extends along the Pacific side of Mexico. Since Louise's research visit last July, (see Plenty Bulletin: Fall 2002), Plenty staff and Susana Valadez, founder and director of the Huichol Center, have developed a collaborative project called, Huichol Nutrition Education & Food Supplementation Project. Phase I of the project was funded by Onaway Trust and the AMB Foundation. Plenty is working in partnership with the Huichol Center, the regional DIF, (Departamento Infantes y Familias-a Mexican government Social Welfare Agency), and Chapingo University (the largest and oldest agricultural university in Mexico) to develop and maintain a sustainable program of nutrition education and soy food supplementation for Huichol families."

"Louise worked with Huichol Center staff to develop recipes utilizing soybeans, soymilk, tofu and texturized vegetable protein (*soya seca*) that local Huichol and urban and rural Mexican families would readily integrate into their traditional meals. Malnutrition is a serious problem in rural Mexico, especially among indigenous populations like the Huichols. Soybeans are noteworthy for producing a high-quality protein from limited tillable acreage–ten times more usable protein from an acre than if that same acre were used to raise livestock."

Photos show: (1) A DIF soyfoods class. Louise Hagler (center), with Susana Valadez to her right and Yolanda Ramirez Cordoba to Susana's right. (2) Mexican women squeezing out the soymilk at the soy processing demonstration at the Huicol village of Nueva Colonia.

12562. McCarthy, Terry; Tumulty, Karen. 2003. Davis vs. Davis. *Time.* Aug. 4.
• ***Summary:*** "Governor Gray Davis may have a 22% approval rating and the personality of the tofu shakes he drinks every morning, but he has always been a tough campaigner."

12563. Mangels, Reed. 2003. Nutrition hotline: Omega-3 fatty acids and DHA. *Vegetarian Journal* (*Baltimore, Maryland*) 25(3):2, 23. [43 ref]
• ***Summary:*** The omega-3 fatty acid that Kellogg may be adding to its products is DHA (docosahexaenoic acid), which is usually found in fatty fish. The fish get it by eating microalgae. Martek Biosciences Corp. has skipped the fish and developed a vegetarian (and probably vegan) DHA directly from the microalgae. The health benefits of DHA and omega-3 fatty acids are discussed. "Our bodies are able to produce some DHA from alpha-linolenic acid, another omega-3 fatty acid, but we are not very efficient at this production. To maximize DHA production, vegetarians are encouraged to include good sources of alpha-linolenic acid" in their diet–flaxseed, tofu, soybeans, etc. Address: PhD, RD.

12564. **Product Name:** Soga Puree Soy Smoothie.
Manufacturer's Name: Soga Soyfoods [Pulmuone U.S.A.].
Manufacturer's Address: 4585 Firestone Blvd., South Gate, CA 90280. Phone: 866-356-2800.
Date of Introduction: 2003. August.
How Stored: Refrigerated.
New Product–Documentation: Talk with John Sim, head of sales at Pulmuone. 2003. Nov. 10. This product was introduced in Aug. 2003. It is still being test marketed.

12565. Song, Sora. 2003. Going soy crazy. *Time.* Sept. 1.
• ***Summary:*** If even half the claims being made on behalf of the soybean are true, "it may be the closest thing on earth to a magic bean." "'I think eating soy foods–tofu, soy milk or miso–in moderation, a couple of times a week, should be fine,'" says Anna Wu, professor of preventive medicine at USC's medical school.

12566. Welters, Sjon. 2003. Re: Soyfoods in Russia. Letter to William Shurtleff at Soyfoods Center, Sept. 25. 1 p. Typed, with signature.
• ***Summary:*** Sjon found tofu in only one store in Russia, in a supermarket in Moscow, in the dairy case. He encloses the label. "We ate it. It tasted rather salty, and was like an extra-firm calcium chloride tofu, I would say. Not bad... The only other soyfoods (not counting Maggi by Nestle) we saw were an Alpro (who else!) soymilk carton in the dairy section of a Moscow supermarket. This particular aseptic one-liter

© Copyright Soyinfo Center 2013

pack was made in Austria. The price was about 60 rubles (30 rubles = $1). The other soyfood was Kikkoman soy sauce, a sweetened and an unsweetened variety, in small 12 fl. oz bottles. The price was 90 rubles each. That we saw on the way to Samara."

In Russia, the situation concerning soy is "definitely at ground level. Soy is getting bad press in Russia, according to my hostess, as being bad for you. Specifics they could not give me, but it came up whenever they were promoting soy. Genetically engineered soybeans are not liked. That is a plus in my opinion."

Sjon encloses a number of articles and the title pages of several books related to soy; he found them in the ACDI/VOCA office in Moscow.

12567. Welters, Sjon. 2003. Re: Visit to Malakhova SP soyfoods manufacturer in Russia as a consultant for ACDI/VOCA and Winrock International. Letter to William Shurtleff at Soyfoods Center, Sept. 25. 5 p. Typed, with signature.

12568. *ASA Today* (*St. Louis, Missouri*). 2003. Grower opportunities for identity preserved value-added soybeans. 9(10):8-page insert after p. 4. Sept.
• ***Summary:*** Contents: Front: Introduction. What are specialty soybeans? The rewards of IP production. Cooperative efforts pay dividends. The importance of contract flexibility. Defining identity preservation vs. segregation vs. channeling.

Back: Value-added soybean varieties: Certified seed, clear hilum tofu, high sucrose, low saturated fat / low linolenic, "non-GMO" soybeans, organic food grade, natto, high oleic, high protein. IP soybeans: Production contracts: Introduction, delivery and payment, delivery specifications, developing relationships, other legal considerations, a final word. Sponsored by BASF, makers of Prowl, Pursuit, and Raptor herbicides.

12569. *Iowa Soybean Review* (*Iowa Soybean Association, Urbandale, Iowa*). 2003. Soyfoods: New products equal new markets. 14(8):14-15. Summer.
• ***Summary:*** Discusses Wildwood Natural Foods and ADM's Soy-& products.

12570. Small Planet Tofu. 2003. Handcrafted Organic Savory Baked Tofu (Leaflet). 330112 Hwy 2, Newport, WA 99156. 3 panels each side. Each panel: 22 x 9 cm. Sept.
• ***Summary:*** On the front panel of this color photocopied leaflet is: The Small Planet logo, with a green and blue Planet Earth at the center. Below that an illustration of a lake, mountains and a waterfall. Below that: "'The Micro-Brew of Tofu.' (TM). Handcrafted Organic Savory Baked Tofu." www.smallplanettofu.com.

The rear panel is titled "Small Plant Tofu history." "Owned and operated by Tofu-Phil, Small Planet Tofu started as a dream back in 1981. The tofu-bug bit Phil hard when introduced to Bill Shurtleff, author of The Book of Tofu, while attending a lecture in Boulder, Colorado. That year Phil moved to the Northwest with aspirations of starting a tofu shop, but it seemed that the Inland Northwest wasn't quite ready; neither was Phil.

"Twelve years later, reality struck Phil, Tofu-reality that is. It was time to do it. So in 1992 Small Planet Tofu started production on a part time basis. Located in an old sprout shop in Spokane, Washington, Tofu-Phil began making tofu at night, while working full-time as an engineer by day.

"Since then, Small Planet Tofu has constructed a fully certified facility, Phil quit his day job, and we are growing every day. With a 20+ state distribution and innovative flavors, Small Planet is providing consumers the finest, *fresh* and *baked,* organic tofu available.

"Our *fresh* and *baked* Tofu is available in Firm, Garlic & Herb, Spicy, Curry, and Vegetable flavors.

"We believe that fresh-baked tofu, handcrafted in small batches, makes all the difference. We hope you'll agree and discover what tofu is really supposed to taste like."

Accompanying this leaflet are enclosed the following recipe cards (single sided, each 2.75 by 5 inches wide): Tofu-tabouli salad (Tofuli). Simple tofu stir-fry. Small Planet tofu dips. Tofu pineapple banana smoothie. Deviled tofu. Vegetable tofu pot pie. Tofu pumpkin pie. Marinated tofu salad. Address: Newport, Washington. Phone: 888 401-Tofu (8638).

12571. **Product Name:** Organic Savory Baked Tofu [Firm, Garlic & Herb, Spicy, Curry, or Vegetable].
Manufacturer's Name: Small Planet Tofu.
Manufacturer's Address: 330112 Hwy 2, Newport, WA 99156. Phone: 509-447-5146.
Date of Introduction: 2003. September.
Ingredients: Curry: Small Planet Organic Curry Tofu, filtered water, organic wheat-free tamari, organic apple cider vinegar, organic toasted sesame oil, organic garlic, organic ginger.
Wt/Vol., Packaging, Price: 7.5 oz vacuum pack. 6 count per case.
How Stored: Refrigerated.
New Product–Documentation: Leaflet sent by Phil Spiegel. 2004. March. "Handcrafted Organic Savory Baked Tofu." 3 panels each side.

12572. United Soybean Board. 2003. National report 2003-2004: Consumer attitudes about nutrition–Insights into nutrition, health & soyfoods. Seattle, Washington. 6 p. Sept. 22 x 21 cm.
• ***Summary:*** This tenth annual nationwide survey, commissioned by USB, was conducted in early 2003 by an independent research firm in Seattle, Washington. Random

© Copyright Soyinfo Center 2013

telephone interviews were completed with 1,000 consumers. The study's margin of error is ±3.1 percent and has a confidence level of 95%.

Contents: Introduction and methodology. Consumer nutritional habits and concerns. Healthy food decisions. Consumer knowledge of cooking oils. Consumer attitudes about fats. Awareness, usage, and trial of soy products. Soyfoods and health: Perceived healthfulness of soy products (74% healthy, 21% neutral, 5% unhealthy), awareness of health benefits of soy (heart health 29%, menopause relief 19%, prevent obesity / promote weight loss 14%, cancer prevention 10%, good protein source 5%, reduced risk of osteoporosis 3%, prevent arthritis 2%, other 14%). Consumer perceptions of biotech [genetically engineered] food. Consumer awareness and usage organic products (45% of consumers regularly purchase organic food products. Unaided basis, 47% know that organic foods can't contain genetically modified ingredients and 60% know that organics must be grown without pesticides and herbicides).

Percentage of American consumers who have tried various soy products in 2001, 2002, and 2003: Tofu 45%, 48%, 48%. Soy [veggie] burgers 40%, 43%, 44%. Soymilk 28%, 35%, 39%. Soy nuts 20%, 26%, 26%. Soy protein bars 18%, 20%, 22%.

Awareness of soyfoods: "Overall consumer awareness of soy products increased significantly this year. Soymilk achieved an 89% awareness rating. One in six [16.7%] Americans consume soyfoods or soy beverages once a week or more. Among those who do not, 47% report that nothing in particular prevents them from including soy in their diet."

Genetically modified foods: Consumer awareness dropped to 60%, an 8% decrease from 2002. Awareness is higher among men (66%) than women (57%). Those aged 35-54 had the highest awareness (66%) compared to those 18-34% (57%), and those 55 and older (57%). Negative attitude: 20%, down from 24% last year. Positive attitude: 13%. But 67% feel neutral or don't known enough about biotech foods to form positive or negative feelings. 23% of consumers are willing to pay a premium for foods without biotech ingredients, down sharply from 32% last year.

Note: As of Aug. 2008 this full survey is available gratis in PDF format at www.soyconnection.com /health_nutrition / pdf/.

12573. Welters, Sjon. 2003. Final report for Project RUS 211: Malakhova Sole Proprietorship (MSP), a soyfoods manufacturer in Russia. Cabot: Vermont. 8 p. 28 cm. • ***Summary:*** Sjon served as a consultant to this small company from 10-16 Sept. 2003 for ACDI/VOCA and Winrock International. He submitted this report to Winrock International Inst. for Agricultural Development. (Morrilton, Arkansas 72110-9370). Contents: 1. Scope of work. 2. About Malakhova sole proprietorship. 3. Project approach. 4. Activities completed. 5. Recommendations to MSP. 6. General observations on business, marketing, processing and product improvement, and new products. 7. Notes for ACDI/VOCA and recommended follow-up survey.

Irina Malakhova and a friend started this company in Sept. 2001 in Chapayevsk, Samara Region, Russia. The company presently makes soymilk using a Russian-made SoyaCow capable of producing up to 20 liters/hour.

12574. Hymowitz, Ted. 2003. Position on genetically engineered soybeans–a position which has evolved over many years as a plant geneticist (Interview). *SoyaScan Notes.* Oct. 1. Conducted by William Shurtleff of Soyfoods Center. • ***Summary:*** Why do intelligent soybean farmers in northern U.S. states grow genetically engineered (GE) soybeans? Answer: (1) The information is extremely confusing. There are so many variables and choices for farmers. (2) For GE soybeans, the yields are now generally higher and the total production costs are generally lower than for non-GE soybeans. Breeding is a numbers game and the big seed companies can afford to have huge numbers of plots. (2) They want to simplify the number of variables and unknowns, such as price of fuel (3) Fewer and fewer non-GE varieties are available from seed companies to farmers. Today Monsanto and Pioneer Hi-Bred still offer a few non-GE lines. And a few seed companies cater to organic farmers and non-GE farmers who sell their soybeans, for example, to tofu companies in Japan. But for most farmers, it takes too much effort to try to evaluate many varieties.

The future of GE soybeans is partly a political issue. It started in the Clinton administration when Monsanto put tremendous on the government to push GE soybeans. The U.S. government should be in the business of helping to market U.S. crops, but it should try to provide foreign markets with whatever they want, rather than trying to push certain commodities or crops on them. For example, Russians like the dark meat from chickens and turkeys, whereas Americans like the white meat. So the U.S. sells Russia large amounts of dark meat–which is almost a waste product in the USA. "It is a match made in heaven." Shapiro lost his job at Monsanto; he severely hurt the company with his pushy attitude.

Ted believes that if GE crops had been allowed to evolve naturally, they would have won out in the long run. For example, GE cotton is working extremely well in China. People don't eat cotton and the herbicide saves Chinese farmers the back-breaking labor of hoeing. Moreover, glyphosate is one of the least toxic herbicides to animals; it breaks down quickly into carbon dioxide and water.

Monsanto's patent on glyphosate has expired. But they have many factories and much know-how in place to keep producing it. So Dow and DuPont each negotiate with Monsanto for the best price they can get for glyphosate, which is now a commodity. China and Israel are now making low-cost glyphosate, which costs about $0.35/gallon. The

© Copyright Soyinfo Center 2013

free market is working nicely.

The position of non-believers on GE crops is that they need to be tested more, and that we have to be careful not to let the genie out of the bottle, for it can never be put back in. Ted disagrees; he sees no troubling health or environmental risks. First, soybeans will not cross-pollinate with wild species in the USA and most other major soybean producing areas; the only countries where there is concern are China and Australia. Even if GE corn crosses with its wild ancestors, there is no guarantee that the hybrid will have a selective advantage. If it has none, the trait will fade away in time. As soybean yields rise, the extra land could be set aside for useful or natural purposes. There will be changes in weed populations, but that has happened throughout history as new agricultural technologies (such as the moldboard plow and the herbicide 2,4-D) have been introduced. Moreover, Roundup is not 100% effective on all weeds; so the other weeds will gain an advantage and require herbicide blends–which are already available. There are so many checks and balances, that if a problem arises, it will probably be caught at an early stage and eliminated. Address: Prof. of Plant Genetics, Dep. of Crop Sciences, Univ. of Illinois, Urbana, Illinois.

12575. Bjerklie, David. 2003. What you need to know about... fruits & vegetables. *Time* (*Asia*). Oct. 20.
• ***Summary:*** Fruits and vegetables are so good for you they could save your life. "Don't like tofu? Soybeans–roasted–make a good snack. Or try cooking green soybeans (edamame) like lima beans. Soy milk makes a delicious milk shake."

12576. Turtle Island Foods, Inc. 2003. No holiday guest left behind–Tofurky and Dumplings set for 2003 (Press release). P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031. 1 p. Oct. 21.
• ***Summary:*** "Hood River, Oregon–Turtle Island Foods, Inc. announced today the introduction of a New and Improved version of its flagship product, Tofurky Vegetarian Feast. This year's changes include: the addition of a full pound of Cranberry-Apple, Potato Dumplings, a new 'Tofu Tender' Stuffed Tofu Roast, a new box with beautiful photos and graphics and a larger, 3.5 lb size for the entire package which retails in natural foods and grocery stores for around $20.

"Tofurky was first introduced in the USA during the Thanksgiving Holiday season in 1995 when 500 Tofurky Feasts were sold. It was the first product that had been marketed to fill the need of what to serve vegetarian guests at one's holiday table. The product has been wildly successful providing an alternative to Turkey for people who otherwise were left out of holiday celebrations. Last year, the company sold 120,000 Tofurkys in the U.S., Canada, and UK. This year, the products are to be offered to such major grocery chains as Safeway on a national level as well as in the natural foods supermarkets where it was the #4 overall selling meat alternative in 2002 despite only being sold in the 4th quarter of the year." Address: Hood River, Oregon.

• ***Summary:*** Describes two different types of soy flour sold in retail stores (full-fat and defatted), offers hints and quick tips, plus a recipe for "Chocolate chip soy flour and tofu cookies" (with 1 cup white sugar). Photos show: (1) Linda Funk. (2) A package of soy flour. Address: Executive Director, The Soyfoods Council, Iowa.

12579. HeartHealth Partnership. 2003. Turning over a new leaf: Your heart-healthy living guide (Vol. 4, No. 2). Health Drivers Publishing. 29 p. Illust. No index. 19 cm. [26 ref]
• ***Summary:*** This booklet gives basic information is for people who want to reduce their blood cholesterol levels. It contains ads and touts specific brands. The National Cholesterol Education Program (NCEP) estimates that 52 million Americans are being treated for high cholesterol levels.

"Cholesterol is a soft fat-like substance, which in moderate amounts is essential for good health. It is part of the makeup of all cell membranes, is found in body tissue, and can be made into various hormones. Cholesterol comes from two sources. Your body produces it naturally, mostly in the liver (about 1,000 milligrams a day). The other source is the food you eat, such as meat, poultry, fish, egg yolks, and dairy products. Fruits, vegetables, nuts, seeds, and other plant-based foods do not contain cholesterol and, in fact, some of these foods have been shown to actually reduce blood cholesterol" (p. 2).

HDL (High Density Lipoprotein) is "good" cholesterol. It contains very little cholesterol in its core, but as it travels through the bloodstream it carries LDL or "bad" cholesterol away from the arteries to the liver, where it is either recycled or excreted.

LDL (Low Density Lipoprotein) is "bad" cholesterol. Its makeup is the opposite of HDL cholesterol; its core is almost all cholesterol. "If LDL levels are abnormally high, as it travels through the bloodstream it builds up on the

© Copyright Soyinfo Center 2013

artery walls. When LDL cholesterol combines with other substances, a plaque-like substance is produced that can clog the arteries.

"The ugly: Triglyceride is a form of fat found in food, body fat, and is also carried in the blood as part of the cholesterol molecule. The visible fat on chicken or steak is actually triglyceride. If you are overweight, your body stores the extra calories you eat as triglycerides. People with high triglyceride levels often have low HDL or 'good' cholesterol levels and this combination is considered by many experts to be associated with an increased risk of heart disease."

Fats in your diet and the role they play. Saturated fats, which are higher in meat, dairy products, palm and coconut oils, tend to contribute to LDL (bad) cholesterol levels. Monounsaturated fats are liquid at room temperature but will start to become solid when refrigerated. They can be found in almond, canola, olive, and peanut oils, and seem to have the effect of lowering bad LDL without lowering protective HDL cholesterol. Polyunsaturated fats are found in corn, soybean, safflower, and sunflower oils. They are liquid at room temperature and remain liquid when refrigerated. They may lower bad LDL cholesterol levels and, if used in large enough quantities, they may also reduce protective HDL levels as well. Trans fatty acids "are fats that do not occur naturally in other words, they are created" by hydrogenation. "Hydrogenated fats act like saturated fats." Look for them on labels; effective Jan. 1, 2006, the FDA will be putting trans-fats content on nutrition labels.

Consider substituting healthier alternatives for the following: Mayonnaise, sour cream (use fat-free), milk (try "soy-milk"), cream, cheese ("many varieties of low-fat soy cheese"), egg yolks, meat (switch to extra lean cuts), butter, and cooking oils ("Almond, canola, olive, and peanut are considered best").

Glossary of label terms related to calories, fats, and cholesterol: Example–"Fat free" means less than ½ gram of fat per serving. Plant sterols and stanols actually help lower LDL (bad) cholesterol.

Fiber (also called roughage or bulk) is the "part of plant foods that cannot be digested or absorbed by the body, yet it plays an important role in promoting good health and protecting against some diseases–such as heart disease. Men consuming 29 grams of protein a day have been shown to have a 40% reduction in heart attacks compared to men with the lowest fiber intake. The National Academy of Sciences recommends the following daily fiber consumption: Women ages 19-50 = 25 gm. Women over age 50 = 21 gm. Men ages 19-50 = 38 gm. Men over age 50 = 30 gm. More than 90% of Americans don't meet these recommendations; they average only about 15 gm of fiber a day (p. 12).

Physical exercise "is very likely to lower your risk of heart disease and enhance your overall sense of health and well being." Almonds can help lower blood cholesterol. In July 2003 almonds received a qualified health claim from FDA (p. 16).

"Soy-anara cholesterol: Research has shown that consuming soy protein, rather than animal protein (meat, poultry, milk, cheese, eggs) can decrease your overall LDL (bad) cholesterol." In 1999 the FDA ruled in favor of "heart healthy" labeling for certain soy products. "The most familiar forms of soy protein are those found in Asian cuisine; tofu, tempeh, and miso. To make soy proteins more familiar to Americans, products have been developed that closely resemble meat, poultry, and fish, in taste and texture. One of the great things about soy is that it can be flavored and shaped in an infinite number of ways." On the facing page is a full-page color ad for Boca Burgers and other "Boca meatless products."

12580. Klein, Barbara P.; Cadwallader, Keith R.; Chen, Dejun; Khanna, Pradeep; Sullivan, Cheryl L.; Weingartner, Karl E. 2003. Baking with soy in the American kitchen. Champaign-Urbana, Illinois: Illinois Center for Soy Foods. 63 p. Illust. No index. 24 cm. Series: Soy in the American Kitchen.

• ***Summary:*** Contents: Illinois Center for Soy Foods. Bringing soy foods to the American table. Why eat soy? Baking with soy. Soy flour. Soy protein isolate. Soymilk. Tofu. Textured vegetable protein. Soy nuts. Soy analogs (soy sour cream, soy cream cheese). Nutrient information,

Recipes (42 recipes). Every right-hand page contains an elegant full-page color photo of the recipe to its left. All of the recipes are meatless.

On page 5 we read: "Soy analogs: Soy products that have been made to look and taste like meat or dairy products are known as soy analogs."

Note: This is the earliest English-language publication seen (Dec. 2007) that uses the term "soy analogs" to refer to both meat analogs and dairy analogs. Yet this term is almost never used! The typical terms were "meat analogs" and "dairy analogs"–terms that are probably best avoided in the state of Illinois. Address: 1. PhD, editor, Director, Illinois Center for Soy Foods, 170 National Soybean Research Center, 1101 Peabody Dr., Univ. of Illinois, Urbana, IL 61801. Phone: (212) 244-1706 or www.soyfoodsillinois.uiuc.edu.

12581. Turtle Island Foods, Inc. 2003. Record Tofurky sales reported (Press release). P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031. 1 p. Nov. 4.

• ***Summary:*** "Hood River, Oregon–Turtle Island Foods, Inc. announced that 4th Quarter Tofurky sales have already exceeded the 116,120 Tofurkys sold in the 4th quarter of 2002. With orders for over 118,000 Tofurkys already, the company projects sales could approach 150,000 units by year's end. This would represent a 23% increase over last fall's record-breaking sales.

"Tofurky is seen by many to be a 'bellwether' product

© Copyright Soyinfo Center 2013

reflecting overall strength of the vegetarian category. Each Tofurky Roast weighs 26 oz." A bar chart shows the number of Tofurkys sold each year from 1995 to 2003.

Talk with Seth Tibbott. 2003. Dec. 3. The total for each year equals the number of Tofurky Feasts plus the number of Tofurky Roasts. In 2002 Turtle Island sold 48,230 feasts and 67,890 roasts for a total of 116,120. So far in 2003 Turtle Island has sold 78,868 feasts and 65,214 roasts for a total of 144,082 (up 24%)–and more will be sold before the year's end. Address: Hood River, Oregon. Phone: 1-800-508-8100.

12582. Sim, John. 2003. Update on Pulmuone & Soga (Interview). *SoyaScan Notes.* Nov. 10. Conducted by William Shurtleff of Soyfoods Center. Followed by a letter dated 14 July 1997.

• ***Summary:*** About 3½ years ago T.J. Song, a native Korean who graduated with an MBA from Stanford Business School, joined the company and is now vice president and CEO. It had been an uphill battle to try to get Caucasian American consumers to recognize, pronounce, and buy Pulmuone. Late 2001 he proposed that Pulmuone start to develop tofu products that would be marketed to mainstream American consumers. All the sales and marketing people agreed with his idea. "It was a no-brainer." So Mr. Song spearheaded the idea to expand Pulmuone's focus beyond the Korean ethnic market and to keep the corporate office's basic philosophy of caring for the environment, caring for neighbors. The company motto is: "We do not sell products that we would not serve to our own family." They decided to use the name "Soga"–which has various association: Soy + garden, yoga, etc. The first products (Organic Twin-Pack Tofu) were introduced in March 2002 at the Natural Products Expo at Anaheim. They outsource their graphic design to RAP Communications. Pulmuone's full-time marketing director is Michael Bylinken. Several weeks ago there was a major article about Pulmuone in the Los Angeles Times business section. Address: Marketing Director, Pulmuone, 4585 Firestone Blvd., Southgate, California 90280. Phone: 866-356-2800.

12583. **Product Name:** Annie Chun's Miso Soup: FreshPak Noodle Bowl with Tofu and Scallion.
Manufacturer's Name: Annie Chun's, Inc.
Manufacturer's Address: P.O. Box 2418, San Rafael, CA 94901.
Date of Introduction: 2003. November.
Ingredients: Noodles: Wheat flour [white], water, tapioca starch, lactic acid, salt. Soup: Soybean paste (water, soybean, rice, salt), sugar, rice wine, sea vegetable, yeast extract, onion, shiitake mushroom. Toppings: Tofu*, green onion*, spinach*. * = dehydrated.
Wt/Vol., Packaging, Price: 5.4 oz "biodegradable bowl. Retails for $1.99 (2003/11, Lafayette, California).
How Stored: Shelf stable.
New Product–Documentation: Product with Label purchased at Trader Joe's in Lafayette, California. 2003. Nov. 16. Paperboard sleeve has a color photo of the noodles and soup in a white bowl. To the left are three Chinese characters. "All natural Asian cuisine." "Microwave 1 minute." A small round portrait photo shows Annie Chun, a working mom. www.anniechun.com. Soyfoods Center taste test: Very unsatisfying because of the refined white noodles–which are *not* natural.

New label purchased in June 2010 at Trader Joe's. Annie Chun's All Natural Asian Cuisine: Soup Bowl (Miso). Still contains unsatisfying white udon noodles.

• ***Summary:*** About Chef Akasha and Chef Beth Ginsberg–color photos show each (with Akasha wearing a White Wave "Silk" cap). Akasha is the national spokesperson for White Wave's Silk soymilk. Her favorite experiences include: Traveling the world as Michael Jackson's private chef, catering Pierce Brosnan's 50th birthday party–a luau on Malibu beach, and cooking for Billy Bob Thornton and Barbara Streisand. She likes to shop for organic produce at Santa Monica Farmers Market, Hollywood Farmers Market, and Whole Foods–which has a remarkable selection of organic artisan cheeses. She is typically booked 4-6 weeks in advance. For details: Chefakasha.com.

Beth has written two cookbooks: *The Taste for Living* and *The Taste for Living World Cookbook.* In 1990 she was a chef in a restaurant on Fairfax named "442." The health food cuisine included many tofu dishes. They developed a big celebrity clientele. Now she works for Michael Milken and does all of his events, plus those of some business professionals. Funny stories: She had to cook tofu products for the ABC staff for Barbara Walters *20/20* special. They weren't told what it was. Some said they tasted great, others said they were terrible.

12585. Boyte, Frances. 2003. Tofu gourmet cuisine: Delicious recipes from the four corners of the world. Translation of Le Tofu International, by Ed and Marilyn Bell. Burlington, Ontario, Canada: Dillon Publishing Co. 119 p. Illust. (color photos). Recipe index. 27 cm.

• ***Summary:*** Most of the recipes (more than 100) in this book were developed by four professional restaurant chefs; the name of the chef is given below each recipe name: Éric Boutin, Sébastien Leblond, Benoît Paquet, and José Trottier. The name of the country, a quotation, and symbols for the degree of difficulty and cost are also given for each.

Contents: Acknowledgements: One great book–One great team. A note from the author. Part I: Tofu gourmet cuisine. The art and tools of making tofu. How to make homemade tofu. What is tofu? Its history, varieties, ready to eat tofu, where do we got tofu, how to store tofu. Tofu

12586. Jenkins, D.J.; Kendall, C.W.; et al. 2003. The effects of combining plant sterols, soy protein, viscous fibers, and almonds in treating hypercholesterolemia. *Metabolism* 52(11):1478-83. Nov. *

• ***Summary:*** Jenkins' team has found new ways of achieving dramatic cholesterol-lowering effects through diet. In this study, 25 healthy hyperlipidemic individuals were put on a dietary plan (Portfolio eating plan) which included 30 gm of almonds, 2 gm of plant sterols (from enriched margarine), 15 gm of viscous fibre (from foods such as oats, barley, eggplant, or okra), and 35 gm of soy protein (from foods such as tofu, soymilk, or soy meat alternatives). The diet reduced their LDL cholesterol by 35% in two weeks. Address: Univ. of Toronto, Canada.

Keep frozen. diameter. On the front of the box: "America's #1 turkey alternative since 1995." On the right end panel is a brief company history and a section titled "Travels with Tofurky" showing 3 color photos of Tofurky in Minnesota, India, and above Niagara Falls, Canada. On the back panel are Nutrition Facts and a large panel giving ingredients. On the left end panel are "Preparation Instructions"–quite complex.

Talk with Seth Tibbott. 2003. Dec. 3. The Tofurky is designed to be put into the oven next to a regular turkey on Thanksgiving or Christmas. The Drumettes were not included in this years Tofurky Feast for 3 reasons: (1) They contained isolated soy protein which is made using hexane (a volatile petroleum derivative); Turtle Island has a goal of using only natural ingredients. "The hypocrameter was getting a little too high," says Seth. (2) They took a lot of time to make at a time when Turtle Island is very busy. (3) The dumplings are delicious and could be made by another company. However Seth is getting feedback on the company Website that quite a few people like the tempeh from which the Drumettes were made, so he is looking for a more natural way to make them.

12591. Turtle Island Foods, Inc. 2003. Discovered! Tofurky seed pods. Introducing the new & improved Tofurky Vegetarian Feast with Cranberry-Apple Potato Dumplings (Leaflet). P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031. 1 p. Front and back. 28 cm.

12594. Jacobi, Dana. 2003. Serving soyfoods on Capitol Hill (Interview). *SoyaScan Notes.* Dec. 20. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Each year the American Soybean Assoc. (ASA) has a board meeting in Washington, DC. At that time they have an event for Congress. This year ASA decided to "host its first Soyfoods Luncheon," which they announced in a 2-page news release. Representative Jo Ann Emerson (R-MO) served as the Congressional host of the event. White Wave, Solae, Soyatech, and SANA sponsored the event but it (incl. Dana and her food) was paid for by ASA.

Apparently Nancy Chapman of the Soyfoods Association told ASA that Dana was a professional chef with expertise in soyfoods. So Dana got a call from Anna Pavolva of ASA inviting her take responsibility for catering this event. Dana ended up hiring a local caterer, because she lives in New York City and could not make all the preparations at such a long distance. Dana supplied the recipes and supervised the food preparation.

The event took place at lunchtime on Tuesday, 1 April 2003 at the Rayburn Building in Washington, DC. Dana was told to prepare for 200 people, but about 250-350 showed up–most of them staffers, but there were a few members of Congress. The room (29 by 52 feet, or 1,508 square feet) was packed, with standing room only. Food was served on four draped tables, buffet style like a real catered party, with real China plates (no paper plates), and spoons and forks. The attendees ate *all* the food. Dana's meatless recipes (the majority of which came out of her latest cookbook), all on one long table were: Sweet & sour meatballs. Beans and franks (Using Bratos for the franks). Macaroni salad (using ADM's Soy-7 macaroni). Honey mustard with tofu (served 3 kinds of donated soyburgers from Boca and Morningstar Farms). Chocolate velvet mousse. Edamamé. Finger sandwiches with soynut butter and jelly.

ASA hired a chef (Tod Schiller) from one of Washington, DC's premier restaurants, Kinkead's, and he conducted a cooking demonstration at the luncheon; at a second table he served a very elegant soyfoods recipe that included edamamé.

White Wave / Dean Foods had a 3rd table at which they served Silk Cappuccino soymilk out of a cooling machine. On a 4th table at the end of the room was Solae 8th Continent soymilk and Luna Bars (cut into pieces for finger foods). ASA and United Soybean Board had a 5th long table on which was information (leaflet, pamphlets) and exhibits about soybeans and soyfoods.

Dana mingled anonymously and talked with many of the staffers. "They were astounded by all the good food. This sort of event helps greatly to dispel the negative image

© Copyright Soyinfo Center 2013

that soy still has in terms of how it tastes and looks." Dana notes: "My interest in not in preaching to the converted, it is in introducing soyfoods to the rest of the people." Address: New York City.

12595. FBX. 2003. Soyfoods Summit: February 18-20, 2004. Hyatt Regency La Jolla, San Diego, California. www.foodbevx.com (Brochure). Little Falls, New Jersey: IQPC. 12 p. 28 cm.

• ***Summary:*** This brochure begins: "The Food & Beverage Exchange is proud to present its 7th Annual Soyfoods Summit." In association with Soyatech. Media partners: Nutrition Business Journal, The Soy Daily, Nutraceuticals World. The conference, which is being organized by The Food & Beverage Xchange, a division of IQPC (London, England), will have two separate tracks of presentations: (A) Technology & applications, and (A) Health benefits of soy. Summit chairs: Peter Golbitz, president, Soyatech, is chair of track A. Geri Berdak, Director, Public Affairs, The Solae Company, is chair of track B.

The facts: (1) "The US Soyfoods market has grown at an average annual rate of 14% per year for the past ten years and hit $3.65 billion in 2002." (2) "Per capita soy consumption will rise by 50% in the next 5 years." The main speakers, with their organization, track, an outline of their talk, and a small photo are given. Track A: Dr. Jonathan F. Gordon, Firmenich Inc. Hiraoki Iwamoto, Tendre Corp., Japan (frozen tofu). Phil Fass, ADM. Dr. Michael Shemer, Tivall Corp., Israel. Motohiko Hirotsuka, Fuji Oil Co Ltd, Japan. Brad Strohm, Wenger Manufacturing Inc. Mian Riaz, Texas A&M University. KeShun Liu, Univ. of Missouri at Columbia. Victor Braverman, Braverman & Associates, Mexico. Jorge Arturo Canas Diaz, Central Heledra Diaz, Costa Rica.

Track B: Milagros Virginia C. Lim, Nestle Philippines Inc, Philippines. Mark Messina, Nutrition Matters Inc. John L. Williams PhD, Univ. of South Dakota. Prof. Fujian Yang Zhenhua 851 Bio-Science Co Ltd, China. Omer Kucuk M.D., FACN, Wayne State Univ., Karmanos Cancer Inst. Helen Kim PhD, Univ. of Alabama at Birmingham. Prof. Mindy S. Kurzer, Univ. of Minnesota. Dr. Ari Babaknia, DrSoy. Wendy Barrett, Eat Smart. Deborah Miller, The Solae Group.

Day 1–General session at end of day: John A. Schillinger, PhD, Heartland Fields, LLC. Peter Hannam, First Line Seeds.

Day 2–General session running all day: Paul Lang, Natural Products Inc. Seth Tibbott, Turtle Island Foods. Tom Woodward, Tetra Pak, Singapore. Ted Nordquist, WholeSoy Co. Hsien-Hsin Chang, Lightlife Foods. Gerard Klen Essink, Prosoy Research & Strategy, The Netherlands. Frank Daller, Soyadairy, Canada. Daniel Burke, Pacific Soybean & Grain. Garnet Pigden, The Solae Company. Gerry Amantea, Hain Celestial Group Inc. Johanna McCoy, Soy Happy. Kim C. Kristoff, Gemtek.

Post-conference interactive workshops: Tim Redmond, formerly with American Soy Products. Patricia Godfrey & Danielle Karleskind, Cargill Soy Protein Solutions. Peter Golbitz, Soyatech.

For those who register and pay in full by Dec. 5, the Gold Package of conference plus three workshops the price is $2,999. By Dec. 31 it rises to $3,099. By Jan. 9 it rises to $3,199. After Jan. 9 the full price is $3,299. This does not include lodging and food. The price is $1,299 for those who register by Aug. 1, but $1,599 after Sept. 15.

Note: Talk with two people who will speak at this conference. They are paid no honorarium for speaking, and they must pay their own transportation both ways and all room and board expenses while at the conference. Why do they go? Both say this gives them an opportunity to attend the conference free of charge, to have a nice vacation in a warm and beautiful part of California, and to meet now people and promote their ideas and (informally) their products.

12596. Funk, Linda. 2003. Cookies for the holidays. *Iowa Soybean Review* (*Iowa Soybean Association, Urbandale, Iowa*) 15(3):6. Dec.

• ***Summary:*** Gives recipes for: Frosted apricot cookies (with soy cream cheese, soy flour, and 1 cup white sugar). Wonderful sour cream cookies (soft tofu, soy sour cream, soft tofu, and 1.3 cups sugar). Color photos show: (1) Linda Funk. (2) Baked cookies on a serving tray. Address: Executive Director, The Soyfoods Council, Iowa.

12597. Mescher, Kelly. 2003. Gift giving for the holidays can include soy: Investing Checkoff dollars. *Iowa Soybean Review* (*Iowa Soybean Association, Urbandale, Iowa*) 15(3):22-23. Dec.

• ***Summary:*** Midwest Bakery in Charles City, Iowa, uses soy flour as a top ingredient to bake a variety of soy cookies and soy protein bars sold under the Soy Fields (TM) label. IM Healthy SoyNut Butter "is another great way to add both the nutrition and great taste of soy to the holidays." It contains about 30% less fat than regular peanut butter. The Low Carb SoyNut butter has no sugar added.

The Original Well-Bean Coffee Co. Inc. founded by certified nutritionist / dietitian Claudia Delvecchio [Del Vecchio], uses equal parts premium Columbian coffee and locally grown organic soybeans, which are roasted and ground together. They sell 100 different flavors. Claudia developed the product when her mother-in-law was advised by doctors to consume soy after she was diagnosed with non-estrogen receptor breast cancer. Her body became sensitive to the coffee's acidity; soy acts as a buffer, "mellowing" the coffee and making it less acidic. "She loved the soy coffee and brought it to the cancer center, and they all started drinking it."

ADM makes Soy 7 pastas and textured soy proteins.

© Copyright Soyinfo Center 2013

Other gifts include cookbooks, such as those published by the Illinois Center for Soyfoods.

"Checkoff dollars have been invested in the Soyfoods Council to increase awareness and demand for soyfoods, thereby increasing demand for U.S. soybeans. (www.thesoyfoodscouncil.com) Checkoff dollars were also invested in an educational campaign targeting school foodservice professionals to take an active, positive response to the national overweight epidemic (www.solveobesity.com)."

Note: Filling the cover of this month's issue is a color photo of soy dishes and candles with the title "A soy season: New ideas for the holiday." On the title page, under "About the cover" we read: "It's easy to add a little soy to your holiday meal this year. Try some tofu in your mashed potatoes. Maybe some edamame in your mixed vegetables. Add some soynuts and a soy-based dressing to your green salad. And don't forget... soy-based candles. For recipes and other ideas on how to include soy in your meal, contact Linda Funk, The Soyfoods Council, at lfunk@ iasoybeans. com or call her at 1-800-383-1423."

12598. **Product Name:** Tofu (Vacuum Packed; Curded with Calcium Sulfate) [Regular Organic].
Manufacturer's Name: Tofu Shop Specialty Foods Inc.
Manufacturer's Address: 100 Ericson Ct., Suite 150, Arcata, CA 95521. Phone: 707-822-7409.
Date of Introduction: 2003. December.
Ingredients: Filtered water, organic* soybeans, calcium sulphate (gypsum from the earth).
Wt/Vol., Packaging, Price: 10 oz vacuum pack.
How Stored: Refrigerated.
New Product–Documentation: Labels sent by Matthew Schmit. 2004. March 8. The product was introduced in Dec. 2003. This is the company's first vacuum-packed tofu curded with calcium sulfate, and also one of the first to feature information about the omega-3 fatty acid content. 4 by 2.75 inches. Self adhesive. Green, black, and orange-yellow on white. A handsome, impressionistic watercolor illustration shows a tofu shop on stilts on a cliff with a tree arching overhead. "Good source of calcium. Contains 540 mg Omega-3 fatty acids per serving. Contains 10g Protein per serving. Low in saturated fat." Logo: "Certified by California Certified Organic Farmers."

12599. **Product Name:** Tofu (Vacuum Packed; Curded with Nigari) [Firm Organic].
Manufacturer's Name: Tofu Shop Specialty Foods Inc.
Manufacturer's Address: 100 Ericson Ct., Suite 150, Arcata, CA 95521. Phone: 707-822-7409.
Date of Introduction: 2003. December.
Ingredients: Filtered water, organic* soybeans, magnesium chloride (nigari from the sea).
Wt/Vol., Packaging, Price: 10 oz vacuum pack.
How Stored: Refrigerated.

New Product–Documentation: Labels sent by Matthew Schmit. 2004. March 8. The product was introduced in Dec. 2003. This is the company's first vacuum-packed tofu curded with nigari, and also one of the first to feature information about the omega-3 fatty acid content. 4 by 2.75 inches. Self adhesive. Blue, black, and orange-yellow on white. A handsome, impressionistic watercolor illustration shows a tofu shop on stilts on a cliff with a tree arching overhead. "Good source of calcium. 12600. Choe, Ji Sook; Moriyama, Yukiko. 2003. Korean cooking for everyone. Tokyo, Japan: Joie, Inc. 112 p. Illust. (many color). Index. 26 cm.
• ***Summary:*** A cookbook of "quick & easy recipes," each step of which is illustrated by numerous color photos. The Korean name of each recipe is given, written in both Korean characters and Roman letters. Many recipes are seasoned with soy sauce.

Soy related recipes: Assorted vegetables (Namool, with soybean sprouts and toasted sesame seeds, p. 44-45). Stuffed cabbage rolls (Cabbage sam, with firm tofu, p. 54-55). Seafood and vegetable omelet (Cheon, with firm tofu, p. 56-57). Tofu steak (Tuboo steak, with firm tofu, p. 60). Braised tofu (Tuboo chorim, with firm tofu, p. 61). Tofu hot pot (Tuboo cheongol, with firm tofu, p. 62). Tofu casserole with miso (Tuboo toenjang chige, with tofu, red miso and

© Copyright Soyinfo Center 2013

white miso, p. 63). Vegetables and beef on rice (Bibimpap, with soybean sprouts, p. 64). Rice with soybean sprouts (Kongnamul bap, and with light soy sauce, p. 68). Stir-fried rice (Bokkumbap, with soybean sprouts and kochu jang, p. 69).

In the section titled "Preparation" is a subsection on "How to make kochu jang (hot sauce)" (p. 95). The major soy ingredient is "meju [soybean koji] powder." "No one-pot dish, rice dishes, salads or stews are Korean without this sauce. Each Korean family has its own recipe, but the common method is the 'slow and steady' maturation to form a good harmony of hot, sweet and sour flavors. "Born from the severe weather and environment, *kochu jang* became the Korean's masterpiece of seasonings. Make a large amount and store as it keeps well."

The word "jang" is found in seasonings such as *kan jang* (soy sauce), *toen jang* (miso, soy bean paste), and kochu jang (hot fermented soy bean paste).

Koreans believe that "Food is a medicine." When there is any disorder, the first thing to do is to take revitalizing food, rather than medicine (p. 102).

The glossary of "Ingredients" (p. 107-09) describes miso, nori seaweed, sesame oil, sesame seeds, soybean sprouts, soy sauce, tofu, and wakame seaweed.

12601. Dillman, Erika. 2003. La Soja, un tesoro nutritivo: Sus numeros beneficios para la salud [The soybean, a nutritive treasure: Its numerous health benefits]. Barcelona, Spain: Ediciones Oniro, S.A. 125 p. No index. 21 cm. Series: Terapias Naturales. [Spa]
• ***Summary:*** A Spanish-language translation of the following book: Dillman, Erika. 2001. *The little soy book.* New York, NY: Time Warner. 190 p. Address: [Seattle, Washington].

12602. Emmons, Didi. 2003. Entertaining for a veggie planet: 250 down-to-earth recipes. Boston, Massachusetts: Houghton Mifflin. viii + 470 p. Illust. Index. 23 cm.
• ***Summary:*** A friendly vegetarian cookbook. The index contains 35 entries for tofu, 19 for tempeh, 5 for edamame, 4 for seitan, 3 for miso

Recipes also call for: Adzuki beans, sesame seeds, and tahini.

The section titled "A friendly guide to unfamiliar ingredients" is a glossary with entries including: Adzuki beans. Asian fish sauce (not vegetarian; usually made of an extract of fermented anchovies. Can be replaced by Lee Kum Kee's Vegetarian Stir-Fry Sauce). Barley miso (See Miso). Black beans, Chinese fermented (See Chinese fermented black beans). Black sesame seeds. Brown miso (See Miso). Chinese fermented black beans ("They are often very salty; do not rinse them, just salt your dish less... They keep indefinitely in the fridge"). Edamame ("Young, blanched soybeans." They are commonly eaten in the pods as a snack; the pod is inedible. Also sold podless for cooking). Hatcho miso (See Miso). Miso: The five types are: Barley miso (*mugi miso*), Brown miso (*genmai miso*), *Hatcho miso* (made from soybeans only), Red miso (*aka miso*), White miso (*shiro miso*). Sesame seeds. Sesame tahini. Tempeh (see also p. 231, "Tempeh: the next great frontier"). Tofu (see also p. 217, "Tofu: the other white meat"). TVP (texturized vegetable protein). Vegetarian oyster sauce (Amoy brand). Vegetarian stir-fry sauce (not as sweet as vegetarian oyster sauce. Look for the Lee Kum Kee brand). Address: Author of the book Vegetarian Planet and the chef of Veggie Planet, a restaurant in Cambridge, Massachusetts.

12603. Fukuoka, Yasuko. 2003. Sushi!: 55 authentic and innovative recipes for nigiri, nori-maki, chirashi and more! Philadelphia: Courage Books. London: Salamander Books. 96 p. Illust. (color photos by Paul David Ellis). Index. 29 cm.
• ***Summary:*** Contents: Introduction. Nigiri. Maki-mono. Chirashi. Oshi-zushi. Other sushi.

The ingredients section includes entries for Abura-age (p. 9): "This is thin tofu fried in oil and essential for 'shojin ryori,' vegetarian cooking developed from the diet of Buddhist monks. It is also used opened as a bag to be stuffed with sumeshi rice (see inari, page 89)." Miso paste. Shoyu ("This is the Japanese variety of soy sauce and has quite a different flavor from the Chinese type"). Seaweed (ao-nori, konbu seaweed, nori dried seaweed, tororo or oboro konbu).

Soy-related recipes:

Futo-maki (p. 33) calls for "1 pack pre-seasoned abura-age (thin fried tofu: use 3 or 4 pieces, layered and cut into ½ inch wide strips)."

Shojin oshi (Beets and tofu sushi, with "1 pack {10 ounces} tofu," p. 75).

Inari (Sushi in fried tofu bags, with "10 abura-age {fried thin tofu}," p. 89).

Note: This is the earliest English-language document seen (April 2013) that contains the term "fried thin tofu." It refers to deep-fried tofu pouches. Address: Musician, composer, food writer, England.

21). Classic miso soup (with wakame and silken tofu, p. 40). Sweet-and-sour tofu stir-fry (with arame, p. 70-71). Age tofu [aburage] in sea palm (p. 77). Hijiki with deep-fried tempeh (p. 82). Contain a large color photos of each of the sea vegetables and each of the recipes. Address: Teacher, Chef's Training Program, Natural Gourmet Cooking School, New York City.

12605. Hirahara, Naomi. 2003. Distinguished Asian American business leaders. Westport, Connecticut: Greenwood Press. viii + 242 p. See p. 216-19. Illust. (portraits). Index. 26 cm. [3 ref]
• ***Summary:*** One of these leaders is Tsuru Yamauchi, mother of Shoan Yamauchi, whose story is told on pages 216-19. Born on 25 Dec. 1890, in Shuri, Okinawa, Japan, her full name at birth was Tsuru Kamigawa. She died in 1900 in Hawaii. She was cofounder of the Aala Tofu Co., Honolulu, Hawaii (1940-1958). A "picture bride from Okinawa, she helped her husband, Shokin, establish Aala Tofu Co. in Honolulu, Hawaii, in 1940. This tofu manufacturing company, which traces its roots back to 1923, eventually made its way to Los Angeles, California, where it became Hinode Tofu Co. It eventually merged with a Japanese Spice manufacturer, House Foods, to create Hinoichi Tofu." Address: Independent writer and editor.

12606. Hosoi, Tomohiro; Kiuchi, Kan. 2003. Natto–A food made by fermenting cooked soybeans with *Bacillus subtilis* (*natto*). In: Edward R. Farnworth. 2003. Handbook of Fermented Functional Foods. Boca Raton, Florida: CRC Press. 390 p. See p. 227-50. [111 ref]
• ***Summary:*** Contents: Fermented soybean foods in Asia. Ingredients of natto: *Bacillus subtilis* (*natto*) spores, soybeans (color, size, protein content, sugar content, washing and storage methods). Natto processing: Washing and soaking of soybeans, steaming of soybeans, inoculation with *Bacillus subtilis* (*natto*) spores, packaging, fermentation, packing for shipment, changes in packages. Assessment of quality: Chemical composition, sensory tests (8 criteria), changes in consumers' preferences (growing preference for larger soybeans and natto with markedly weaker odors and strings). Health benefits: *Bacillus subtilis* (*natto*) cells (effects on intestinal microflora and feed efficiency, effects on the immune system, anti-allergy effect of subtilisin, fibrinolytic activity of subtilisin, role of vitamin K-2 (menaquinoe-7) in the prevention of osteoporosis), phytoestrogens–effects on cancer and osteoporosis. Conclusions.

Natto and related foods are all made by fermentation with the bacterium *Bacillus subtilis* (*natto*). These include sweet dou chi (*xian doushi*) in China (where it is used as a seasoning for Beijing duck [Peking duck]), kinema in Nepal and Myanmar, *tua nao* in Thailand, and *chungkuk-jang* in Korea.

In the year 2000 a total of 10.1 million metric tons of soybeans in Japan were converted directly into foods; more than 80% of these soybeans were imported. Between 1991 and 2000 there was a 13% increase in soybean consumption for natto products.

Natto makers prefer to use certain soybean varieties such as Suzuhime and Suzumaru which are grown in Hokkaido, Kosuzu in Iwate, Miyagi, and Akita Prefectures, and Natto-Shoryo in Ibaraki Prefecture.

Natto makers generally desire the following qualities in soybeans: 1. Extra small or small size (for consumers from Tokyo northward). 2. Easily washable. 3. Yellow surfaces and hila. 4. A suitable degree of stickiness when made into natto. 5. Relatively sweet taste. 5. Minimal changes in constituents and appearance during storage.

In Japan, soybeans are classified by diameter into four groups: (1) Extra small is less than 5.5 mm diameter. (2) Small is 5.5 mm to 7.3 mm. (3) Medium is 7.3 mm to 7.9 mm. (4) Large is greater than 7.9 mm in diameter.

Japan's leading natto trade association is called the "Federation of Japan Natto Manufacturers Cooperative Society."

A soybean allergen has been identified as *Gly m* d 28K. This allergen is found in high concentrations in various nonfermented soybean products such as soy protein isolate, tofu, dried frozen tofu, and yuba. However fermented soybean products such as natto, soy sauce and miso do not contain this allergen. "*Bacillus subtilis* (*natto*) produces a serine protease [proteolytic enzyme] of subtilisin NAT during its growth. Subtilisin NAT appears to degrade *Gly m* d 28K."

"Circulating platelets and blood-derived proteins (fibrin) are essential for the formation of blood clots, which prevent bleeding long enough for healing to occur. However, excess coagulation prevents normal physiologic blood flow, which causes thrombotic disorders Thrombolytic therapy is the most direct means of restoring blood flow. *Bacillus* spp. produce serine proteases called subtilisins, which are known to have fibrinolytic activity" [8 references cited]. photos on every page.

Contents of both titles: Introduction. Types of tofu (firm tofu, silken tofu, marinated tofu, smoked tofu, frozen tofu, deep-fried tofu, other soya bean products–bean curd skins [yuba], bean curd sticks [dried yuba sticks], tempeh, textured vegetable protein, shoyu, tamari, miso, soya dairy substitutes {soya "milk," "cream," "yogurt" and "cheese"}). Preparation and cooking techniques (includes draining, marinating, and cutting tempeh). Soups and appetizers. Salads and side dishes. Vegetarian main meals. Meat, chicken and fish dishes. Desserts (incl. homemade Strawberry and vanilla tofu ice cream and Tofu berry cheesecake).

On page 43 is a recipe for Twice-cooked tempeh which contains no tofu. Address: Chef, England.

12609. Kingsley, Farina Wong. 2003. Asian. New York, NY: Simon & Schuster–Source. 119 p. Illust. (color photos by Maren Caruso). Index. 24 cm. Series: Williams-Sonoma collection.
• ***Summary:*** Facing each recipe is a full-page glossy photo. Soy-related recipes: Udon with tofu and egg (with "4 blocks deep-fried tofu (page 107) each 3 inches (7.5 cm) square," p. 14-15). Miso soup with tofu and seaweed (with "3 by 3 by 5-inch (7.5 by 7.5 by 13-cm) block soft tofu" and "6 tablespoons (3 oz / 90 gm) white miso paste," p. 40-41).

Stir-fried pork in black bean sauce (with "1½ tablespoons fermented black beans, well rinsed," p. 65) has a sidebar titled "Fermented black beans" which states: "Sometimes called salted or preserved black beans, fermented black beans are soybeans that have been dried, salted, and allowed to ferment until they turn black. They are distinctly pungent, have an almost smoky character, and are used mainly in Chinese cooking such as in this simple pork stir-fry. Before using the beans, gently rinse them in a fine-mesh sieve to remove excess salt... Sold in plastic bags, fermented black beans will keep for a year in a cool, dry place."

The "Ingredients" section (p. 106-08) has an entry for tofu. The "Basic recipes" section has a recipe (p. 110) for Ginger-soy dipping sauce.

The Glossary (p. 112-15) contains entries for azuki beans, hoisin sauce, soy sauce, white miso paste.

Note: Recipes and text by Farina Wong Kingsley. General editor: Chuck Williams.

12610. Locricchio, Matthew. 2003. The cooking of China. Tarrytown, New York: Marshall Cavendish–Benchmarks Books. 71 p. Illust. (By Janet Hamlin; photos by Jack McConnell). Index. 26 cm. Series: Superchef.
• ***Summary:*** This thin hardcover book, an introduction to the regional cooking of China for young cooks, contains many color photos and illustrations. Soy-related recipes include: Hot and sour soup (*Suan La Tang,* with firm tofu and soy sauce, p. 28-29). Sweet and sour tofu stir-fry (*Tian Suan Dou Fu,* p. 42-43). Stir-fried beef wraps with smoked tofu (*Niu Rou Dou Fu Bao,* p. 52-53).

The section titled "Essential ingredients in the Chinese kitchen" (p. 68-69) includes Hoisin sauce, sesame seeds, shiitake mushrooms, soybeans, soy sauce, and tofu.

12611. Miso, tôfu, nattô [Miso, tofu and natto]. 2003. Tokyo: Nosan Gyoson Bunka Kyokai (Agricultural and Fishing Village Cultural Organization). 249 p. 22 cm. Series: Kikigaki Furusato no Katei Ryori (Written as Heard Home Cooking of the Homeland), no. 16. [Jap]*

• ***Summary:*** A brief overview. Address: Lafayette, California.

12614. Somerville, Annie. 2003. Everyday Greens: Home cooking from Greens, the celebrated vegetarian restaurant. New York, London, Toronto, Sydney, Singapore: Scribner / Simon & Schuster. xix + 395 p. Illust. by Mayumi Oda. Index. 24 x 19 cm. [30+ ref]
• ***Summary:*** A delightful and lovely vegetarian cookbook, filled with the spirit of Greens and Zen Center in San Francisco, California. Soy-related recipes: Crispy spring rolls with spicy dipping sauce (with ½ lb firm tofu brushed with tamari or soy sauce. The refreshing dipping sauce contains ¼ cup tamari or soy sauce, p. 5-6). Vietnamese spring rolls with peanut-hoisin sauce (with 14 oz firm tofu, p. 7-9). Tai's Vietnamese tofu sandwich (with 1 package regular tofu, 14 to 16 oz, fried, p. 129-30. "This warm, braised tofu sandwich is reminiscent of sandwiches sold by street vendors in the cities of Vietnam"). Spring stir-fry with peanut sauce and Thai basil (with ½ lb firm tofu, p. 210-11. For the sauce: "Be sure to use high-quality nonhydrogenated peanut butter; it makes all the difference here"). Udon with miso, shiitake

© Copyright Soyinfo Center 2013

mushrooms, and bok choy (with ½ lb firm tofu, p. 246-48).

"The Asian pantry" (p. 358-60) includes entries for ginger, and "tofu or bean curd" (including silken tofu). "Condiments and seasonings" (p. 360-62) includes coconut milk, hoisin sauce ("This dark, intensely flavored sauce has a perfect balance of sweet and salt; that's what makes it so deliciously addictive"), miso, mushroom soy sauce, tamari, and toasted sesame oil. "The dessert pantry" (p. 363-66) includes various types of chocolate, soy milk ("For desserts and pastries, we prefer vanilla soy milk to plain soy milk; with its smooth vanilla flavor, it's especially good with chocolate"), almond paste ("just plain almonds ground with sugar"). Address: USA.

12615. Vergne, Elisa. 2003. Chinese pavilion: Casual Chinese cooking at home. San Francisco, California: Silverback Books. 119 p. Illust. (color photos by Yves Bagros). Recipe index. 23 cm.
• ***Summary:*** A collection of 78 simple recipes. Soy related: Cucumber stuffed with tofu (p. 53). Tofu fritters (p. 79). Chicken with black beans (with "1 tablespoon fermented black bean sauce," p. 101). Spinach and tofu (with "2 tablespoons spicy fermented tofu," p. 106).

Glossary: Hoisin sauce (substitute heated ketchup mixed with a little soy sauce). Oyster sauce (made from oyster extract, soy sauce, etc.), Soy sauce. Tofu (incl. fried tofu).

12616. Toscano, Dawn. 2004. Re: Translating *The Book of Tofu* into Spanish. Three Spanish-language books on tofu. Updating lists of tofu makers in Spain and Israel. Letter to William Shurtleff at Soyfoods Center, Jan. 1. 3 p. Typed, with signature.
• ***Summary:*** Dawn is working each day to translate *The Book of Tofu,* by Shurtleff and Aoyagi, into Spanish; she has not yet found a publisher. She has found three Spanish-language cookbooks dedicated to tofu, which she cites and will send to Soyfoods Center. She then updates information about 5 tofu makers in Spain and adds new listings for 3 tofu makers in Israel. She and a friend visited Zuaitzo Proteinas Vegetales (legal name: Ekosal-Luz, S.L.) in Vitoria. The founder, Javier Arocena Arumburu, is now a major "stock holder." The director is José Ignacio Orlando. Address: Calle Uruguay 59, pta 13, 46007 Valencia, Spain. Phone: +34 96 380 2129.

12619. **Product Name:** [Non-dairy Philadelphia Cream Cheese (Supreme, Fine Herbs and Pepper, Cheesy)].
Foreign Name: Veggiedelphia (Supreme, Fine Herbs and Pepper, Cheesy).
Manufacturer's Name: Viana Naturkost GmbH.
Manufacturer's Address: D-54578 TofuTown Wiesbaum, Germany. Phone: +496593 9967-0. Fax: 6593 9967-225.
Date of Introduction: 2004. January.
Ingredients: Supreme: Real nigari tofu (pure Eifel water, soybeans*) (32%), sunflower seed oil*, palm oil*, almonds*, spices*, yeast*, lemon juice*, sea salt, carrageenan, carob flour*, ascorbic acid, rice flour*, cane sugar* (0.4%), herbs*, natural vanilla extract*. * = Organically grown.
Wt/Vol., Packaging, Price: 150 gm vacuum pack.
How Stored: Refrigerated.
New Product–Documentation: Color leaflet brought by Bernd Drosihn. 2004. March 15.

12620. **Product Name:** [Veggie Tuna].
Foreign Name: Veggie Tuna.
Manufacturer's Name: Viana Naturkost GmbH.
Manufacturer's Address: D-54578 TofuTown Wiesbaum, Germany. Phone: +496593 9967-0. Fax: 6593 9967-225.
Date of Introduction: 2004. January.
Ingredients: Real nigari tofu (pure Eifel water, soybeans*) (25%), wheat gluten, Viana real smoked tofu (pure Eifel water, soybeans*, smoke), sunflower seed oil*, almonds*, tomato pulp*, spices*, yeast*, red beets*, sea salt, sea vegetables, carrageenan, carob flour*, rice flour*, cane sugar* (0.4%), herbs*. * = Organically grown.
Wt/Vol., Packaging, Price: 150 gm vacuum pack.
How Stored: Refrigerated.
New Product–Documentation: Color leaflet brought by Bernd Drosihn. 2004. March 15.

12621. Wais, Asmat. 2004. Tofu and soybeans in Uzbekistan (Interview). *SoyaScan Notes.* Feb. 11. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Mr. Wais, a native of Afghanistan and an experienced businessman, is thinking about starting a tofu manufacturing plant in Uzbekistan. There is presently only one such plant in Uzbekistan; it is run by a Korean man and it serves a population of about 250,000 Koreans now living in Afghanistan. He thinks that Stalin forcibly removed them from North Korea to do forced labor in Uzbekistan. He would like to buy a tofu shop that makes 1 ton/hour. He would prefer to buy tofu equipment made in the USA since OPAC, a U.S. government agency, finances 80% of U.S. made equipment purchased for use overseas.

Mr. Wais speaks good English and is an experienced

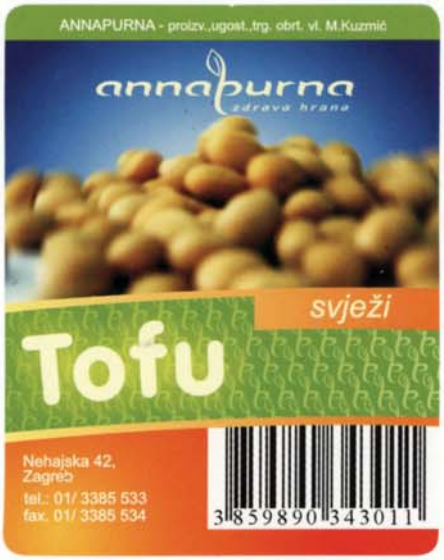
© Copyright Soyinfo Center 2013

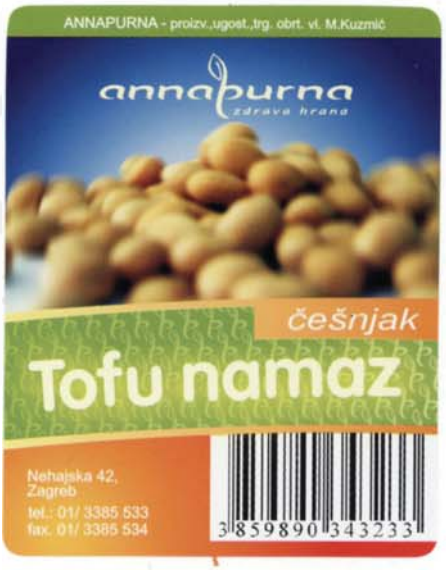
businessman. He earned a degree in business administration at Michigan State University. Then he returned to Afghanistan, where he eventually owned 3 businesses, including a raisin processing plant.

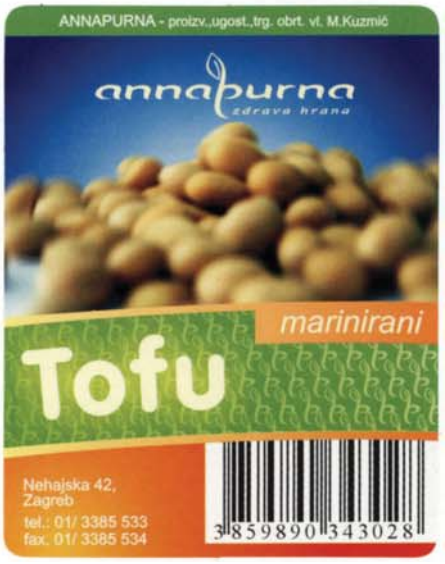
Soybeans have been grown on a fairly small scale in Uzbekistan since 1991, when the country declared its independence from the Soviet Union. All land is still owned by the government; the people lease it from the government.

He travels frequently to Afghanistan and Central Asia. Most people in Afghanistan–except warlords, a few Taliban supporters, and criminals–are extremely grateful to the USA for liberating them from the Taliban. But life in Afghanistan is still difficult and dangerous. Address: 6309 Barnsdale Path, Centerville, Virginia 20120. Phone: 703-815-1360.

12622. **Product Name:** [Fresh Tofu, Smoked Tofu].
Foreign Name: Tofu Svjezi, Tofu Dimljeni.
Manufacturer's Name: Annapurna.
Manufacturer's Address: Nehajska 42, 10000 Zagreb, Croatia. Phone: 01 3385 533.
Date of Introduction: 2004. February.
Ingredients: Fresh: Soybeans, water, nigari. Smoked: Soybeans, water, nigari, natural smoke.
Wt/Vol., Packaging, Price: Fresh: 280-350 gm vacuum packed, 35 kn/kg. Smoked: 200-250 gm vacuum packed, 55 kn/kg.
How Stored: Refrigerated.
New Product–Documentation: Labels sent by Vlatka Kuzmic. 2005. June 6. She wrote the introduction date and English translation of the product name on the back of each 2½ by 3¼ inch label. Self adhesive. Blue, green, and orange. Color photo of yellow soybeans against a blue background. Product name in white letters on light green background.







12623. Shida, Yasuyo. 2004. Soymilk desserts: Quick & easy. Tokyo: Joie, Inc. 92 p. Feb. Illust. (color). No index. 26 cm.
• ***Summary:*** A handsome book loaded with glossy color photos. Contents: About the author. Baked desserts. Steamed / fried desserts. Fruit desserts. Chilled desserts. Drinks & shakes. Nutrition and health benefits of soybean products. Kitchen utensils for making sweets. Glossary: Meringue, mousse, okara, parchment, puree, sesame seeds, sieve, skimmed milk, souffle, syrup, tofu, *tonyu* (the Japanese word for soymilk), whisk, *yuzu* (a sour and fragrant citrus fruit from Japan).

The author has studied confectionary art at both L'Ecole Lenotre in Paris, France, and at Richmond Bakery School in Luzern (Lucerne), Switzerland. A portrait photo shows the author.

12624. *The Non-GMO Source* (*Fairfield, Iowa*). 2004. More global competition seen in organic soybean market. 4(2):1-2. Feb.

© Copyright Soyinfo Center 2013

• ***Summary:*** "Demand for organic soybeans remains strong, increasing 20% per year, driven by the growing consumer demand for soyfood products such as soymilk, tofu, and meat alternatives.

In the USA organic soybeans are grown on nearly 200,000 acres, making them the most widely grown organic crop in the country; their acreage has increased 112% since 1997, according to USDA statistics. The leading states producing organic soybeans are Minnesota, Iowa, and Wisconsin; together they produce almost 45% of the total crop. Yet organic soybeans accounted for only 0.24% of the total U.S. crop in 2001.

Last year the crop of organic soybeans in the US was 25-50% smaller than anticipated, so today there is a huge shortage of organic soybeans in the USA.

Brazil and China are starting to compete with the USA as growers of organic soybeans.

A sidebar is titled "Difficult to gauge market for organic soybeans." There are many players but no reporting requirements, so everything is done in secret.

12625. *The Non-GMO Source* (*Fairfield, Iowa*). 2004. Taiwan's demand for non-GM and organic soybeans increasing. 4(2):3. Feb.

• ***Summary:*** Taiwan has a large market for soybeans for food use, estimated at 225,000 tons. Most of the soybeans are used to make tofu and soymilk. In 2002/03 about 7,500 tonnes (metric tons) of the food-use soybeans came as identity preserved, non-GM "food grade," and organic. Of this total the USA supplied an estimated 4,500 tonnes, Australia 2,000 tonnes, Canada 500 tonnes, and all other countries combined 500 tonnes.

12626. Shurtleff, William. 2004. Why do we in the USA use the Japanese word "tofu" rather than the Chinese word "doufu" to refer to this soyfood product? (Editorial). *SoyaScan Notes.* March 4.

• ***Summary:*** Several important trends would favor the use of the Chinese term "doufu": (1) During the period 1920 to 1960, Chinese cooking was much better known in the USA than Japanese cooking. There were many more Chinese restaurants, Chinese cookbooks, and Chinese recipes in American cookbooks (See *Cooking with a Foreign Accent,* 1952; *Helen Brown's West Coast Cook Book,* 1952, etc.). (2) In 1975, there were also more Chinese-American tofu manufacturers. See list in *The Book of Tofu,* by Shurtleff and Aoyagi–although no list is complete because many were small and sold their products mostly to the local Chinese community. (3) Americans generally prefer Chinese-style firm tofu to Japanese-style soft tofu.

But: (1) The influence of confusing Chinese terminology and spelling due to dialects and lack of standard system of romanization. For example, Cantonese is the main dialect of Chinese spoken in the United States, whereas Mandarin is the standard in China.

(2) Influence of Japanese macrobiotic movement: 1. In the 1950s, George Ohsawa, a Japanese teacher, started the macrobiotic movement in the United States. He and his teachers (Michio and Aveline Kushi; Herman and Cornellia Aihara) developed a great popular interest in Japanese foods. 2. Tofu used as an ingredient in many macrobiotic cookbooks. 3. The macrobiotic movement played a major role in starting the natural foods industry in America, especially with the pioneer company Erewhon–started by Aveline and Michio Kushi, Japanese teachers of macrobiotics. The first Erewhon retail store opened in Boston, Massachusetts, in April 1966. Soon Erewhon became the most important distributor of natural foods in the USA. Tofu was sold at most natural food stores, where it was almost always called "tofu."

(3) Influence of William Shurtleff: He became interested in both macrobiotics and Japanese culture in the mid-1960s. 1967 spring–He took a course in Japanese Art, taught by Michael Sullivan, at Stanford University; that summer he lived in Kyoto, Japan, studying art and architecture and practicing Zen meditation. 1968 May–the Esalen at Stanford program (of which he was director), hosted Michio Kushi, a Japanese teacher of macrobiotics, in a 1-week workshop. At about this time Shurtleff and the members of the commune in which he lived near Stanford University decided to stop eating meat and become vegetarians. 1968 June 10–Shurtleff entered Tassajara Zen Mountain Center south of Carmel, California, where he practiced meditation as a student of Japanese Zen master Shunryu Suzuki, roshi for 2½ years. The delicious vegetarian diet included tofu, miso, and whole soybeans. 1969 Dec.–A photocopied book titled *The Tassajara Food Trip,* which he wrote, was distributed to friends at Christmas. It contained many Japanese and macrobiotic recipes served at Tassajara–including 4 recipes calling for "tofu"–the word that was used by everybody at Tassajara to refer to this food. 1971 Jan. 16–Shurtleff arrives in Japan to study Japanese language and culture, and Zen meditation. He becomes increasingly interested in Japanese foods and especially tofu. 1971 Dec. 26–He meets Akiko Aoyagi in Tokyo. She is an excellent cook and artist, and begins to serve him many Japanese-style vegetarian recipes–often including tofu. 1972 Dec.–He begins to write a booklet about tofu, for friends. But after meeting Nahum and Beverly Stiskin, founders of Autumn Press, the booklet is transformed into a book project. In Dec. 1975 *The Book of Tofu,* by Shurtleff and Aoyagi, was published in Japan by Autumn Press. It was the first popular book about tofu in the Western world, and it quickly became a best-seller–selling more than 500,000 copies by the year 2002. The Preface to the 2001 editions gives details about how the book was written.

(4) Influence of Library of Congress. In the USA the Library of Congress has long been the organization that

© Copyright Soyinfo Center 2013

decides which terms will be used to describe important subjects. The results are published in the well-known Library of Congress Subject Headings (LCSH), which is updated each year as new terms are added or outdated terms change. On 6 June 1977 the term "Bean Curd" was approved by the Library of Congress Subject Headings committee. On the same day they approved "Bean Curd, Dried" and "Cookery (Bean Curd)." So starting at this time, "bean curd" became the official, authoritative name for tofu. According to Tom Yee of the Library of Congress, these headings were probably established as a result of cataloging *The Book of Tofu,* by Shurtleff & Aoyagi. Any books about tofu published in the USA would thereafter be given the subject heading "bean curd" by the Library of Congress and libraries across America in their cataloging and card catalogs. New editions of *The Book of Tofu* published after June 1977 were given the subject heading "bean curd." In May 1985 Shurtleff wrote the Library of Congress, Cataloging in Publication Div., recommending that its subject heading be changed from "bean curd" to "tofu." He gave three carefully researched reasons for recommending the change. The Library of Congress made the change from "bean curd" to "tofu" in their subject headings. Address: Lafayette, California.

12627. Drosihn, Bernd. 2004. Update on soyfoods in Europe. Part I (Interview). *SoyaScan Notes.* March 15. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** This interview was conducted during Bernd's visit to Soyfoods Center. The biggest development for soyfoods in Europe during the past 5-7 years is that soymilk has entered the mainstream market in several countries, driven mainly by Alpro (whose brand was changed to AlproSoya from Alpro 2-3 years ago), the main soymilk maker in Europe. AlproSoya is spending lots of money promoting soymilk and educating consumers about the health benefits of soyfoods. And although there are no health claims in Europe (there is sort of one in the UK) and no FDA, there is a great deal of information available about the health benefits of soy. Women, especially those in their 40s and 50s near the age of menopause, are the target of much advertising and educational material. AlproSoya uses brochures, Internet and TV advertising to educate these people. However Bernd feels that Alpro's style is a little old-fashioned.

Meat alternatives and dairy alternatives are also growing rapidly, but they are still niche products. The organic movement in Europe has long been bigger and stronger than its American counterpart, and it continues to grow at a healthy rate. In Germany, the government greatly helps the organic movement–which is also strong in France, Italy, and Spain in both mainstream and health food sectors. The organic and soyfoods movements have generally worked closely together to help one another, although not all soyfoods companies (especially those based in the Asian market) use organic ingredients. Sojaxa, the former European soyfoods association, is now named Ensa. Ensa is still based in France and it gets some money from the department of agriculture in France because some soybeans are grown in southern France. Since soybeans are not an important European crop (most are imported), they are not promoted by European governments.

The discovery of mad cow disease in about the year 2000 in many European countries outside of the UK had a very positive effect on soyfoods. It was a rising tide that lifted all ships (soyfoods companies). From that time on soyfoods gradually started to be recognized in mainstream markets.

Bernd buys all his soybeans (specific desired varieties at a specified price) under a "Fair Trade" contract from a specific organization in southern Brazil; all are certified non-GE (genetically engineered).

Many European companies now state in their brochures that the FDA has given a heart-healthy claim for soy protein in the USA. But American food has a bad reputation in Europe, being strongly linked with McDonalds, Coca-Cola, Burger King, etc. So Europeans tend to be skeptical of American claims related to food. Instead European companies prefer to cite the original research articles and summarize their findings.

Bernd is not aware of any negative information about soy on the Internet–probably because most of it is in English.

The three largest soyfoods markets in Europe (in total sales) are probably the UK, France, and Germany–in that order. But in terms of per capita consumption, the largest are probably the UK, Netherlands, Belgium, France, and Germany–in that order.

Alpro, which has a very close connection to France, has done a great deal to develop the market there. Bernard Storup's company, Nutrition et Soja S.A., now owned by Novartis, is doing well and is also strong in France. Bernd just saw Bernard (and his business partner Jean de Preneuf) at the Nuremberg show in Germany. Bernard would like to get out of his relationship with Novartis (formerly Sandoz), because they no longer get funding and Novartis has no interest in Nutrition et Soja. Note: Sandoz AG (Basel, Switzerland) merged with Ciba-Geigy in March 1996 to become Novartis. Jean is "the Steve Demos of Europe"–very creative and very crazy. He has an old farmhouse in the south of France and he also has another business that makes sunglasses.

The creation of the EU (European Union) and the euro as a currency has helped Viana and most other soyfoods companies in Europe by greatly facilitating exports and imports across country borders. As a result of its move to a new and larger factory, the creation of the EU, and the advent of mad cow disease, Viana's exports now 35-40% of total sales, and are growing faster than sales in Germany. Viana exports outside the EU (to Croatia, Czechoslovakia, Israel, Morocco, Bahrain, etc.) account for about 1.5% of sales. The

© Copyright Soyinfo Center 2013

economies of eastern Europe are developing very slowly. Bernd knows of 2-3 tofu makers in Poland (incl. Polsoja; tofu is sold in supermarkets) and at least 2 in Czechoslovakia (one employs 60-80 people). In Austria, Guenter Ebner works for Viana, sells Viana products, knows the eastern European market very well, provides much information to Bernd about this market. The founder of Sojarei Vollwertkost GmbH, Guenter had his company taken over by the major shareholder in an unfriendly way; they kicked Guenter out.

The boundaries between eastern and western Europe are slowly breaking down. The move toward a unified greater Europe will be accelerated on May 1 of this year when 10 eastern European countries are scheduled to join the EU: Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, and Slovenia.

Bernd estimates that only about 10% of Germans consume soyfoods at least once a month; this figure is much lower than in the USA. Viana's exports have grown. Continued. Address: Founder and president, Viana Naturkost GmbH, 54578 Wiesbaum / Vulkaneifel, Germany. Phone: +49 06593-99670.

12628. Drosihn, Bernd. 2004. Update on soyfoods in Europe. Part II (Interview). *SoyaScan Notes.* March 15. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Soymilk: A major new soymilk maker in Europe is named Wild (www.wild.de), an old German food company that specializes in fruits and ingredients; their retail soymilk is named Soy and Joy. Their most famous brand is Caprisun, a non-soy drink in a foil pouch, well known in the USA. They and So Good, the Australian soymilk now made with Solae, are both strong competitors of Alpro.

Several weeks ago Hain-Celestial of New York purchased two German soymilk makers, both owned by Bruno Fischer, Jr.: Natumi and Gut Honneroth. He sold both companies at a low price–probably because he had to. Bruno had gotten his soymilk into Aldi, the mother company of Trader Joe's and the No. 1 discounter in Germany–and maybe in all of Europe, and he developed a large soymilk business with Aldi–perhaps so large he could no longer handle it himself. Bruno also made a lot of private label soymilk. With Hain, Bruno found a large German dairy to make soymilk for Aldi under a new Aldi brand. The new European CEO of Hain-Celestial is Philippe Woitrin, who was CEO of Lima Foods when Hain acquired it.

Triballat makes the best soy yogurts (Sojasun brand) in the world–in Bernd's opinion. They have a new brand, Sojadé, which are delicious creamy yogurt drinks–maybe organic. The Japanese Yakult concept of drinking live beneficial probiotic bacteria each morning has now caught on in a big way in Europe. Yakult is one of the best entries into the European food market in years. Bernd just saw White Wave's Silk Alive [the name was soon changed; it was sold commercially only under the name "Silk Live"], a similar product, at the Anaheim Natural Products Expo. But he liked the Wildwood smoothie even better, and the WholeSoy fermented soymilk best of all American products.

In France a small company named Sojami (pronounced so-zha-MEE), which started about 10 years ago, makes very creative, unique, and interesting soy cheeses and cultured soy yogurts. The founder has a university research background and is a very nice guy.

Tofu: Tofu consumption in Europe has expanded steadily over the past 5-7 years, but it is still a very small product. The largest maker of the tofu and tofu products sold in Germany is Life Food GmbH / Taifun Produkte, run by Wolfgang Heck and Guenter Klein. Heuschen-Schrouff B.V. (Landgraaf, Netherlands) and Viana are tied for second place. About 10 years ago, Heuschen-Schrouff started selling their tofu under the organic So Fine brand (www.sofine.nl). An Indian-run company in Kerkrade, Netherlands, run by the brothers Singh (both Sikhs), makes tofu mostly for the Asian (Indonesian) market. In 2001 Viana started selling its tofu to the mainstream market under the Veggie Life brand; this English-language brand name communicates well to people speaking many different languages throughout the EU (European Union)–though distribution is still limited to Germany and Austria. Soto Tofu, formerly run by Rolf Barthof has been sold to a very large dairy company, Algäuland. Viana's main products are tofu and tofu products–such as meat and cheese alternatives. Viana is #1 in Germany in meat alternatives. Germans buy soyfoods for three main reasons: They are good for one's health, they taste good, and good for the environment. Bernd is a vegan, but about 90% of Viana's products are sold to non-vegetarians.

Early tofu companies still active in Europe include Sojafarm (founded and still run by Lothar Stassen), Albert's Tofuhaus (Albert Hess; exports lots of his products to France). A basic problem with the smaller, early tofumakers in Germany is that they didn't have the creativity or power to put a brand on the market. So both these companies produce a lot of tofu under private labels. Lothar bought the Svadesha brand (Svadesha was the first German tofu company) and produces tofu under the Svadesha brand. About 2-3 years ago he also purchased the Nagel's Tofu brand from Christian Nagel, who now markets the tofu under his former brand. So Lothar makes tofu under 3 brands. Berief Feinkost (in Beckum, northern Germany), started 10-15 years ago, tries to cover the mainstream tofu market, but not very successfully. Kassel Tofu Kato (started by Gyoergy / Yuri Debrecini, who was at Soyastern). Thomas Karas is no longer involved with soyfoods; he tried to enter the computer business but Bernd does not know what he is doing now. In Spain, the market leader is Natursoy near Barcelona. Nearby is Salvador Sala of Vegetalia. In Spain, there is a lot of interest in and rapid growth of soyfoods and organic foods. In Italy the Ki Group (Schenker) owns a tofu company–fairly old but not very creative.

© Copyright Soyinfo Center 2013

In the United States, Pulmuone now has three U.S. factories; their first one in Southgate, southern California, a new one at Fullerton, California, and a 3rd one in New York. The Fullerton factory is the most modern Bernd has ever seen. There they make Gourmet Tofu, introduced in about Jan. 2004, which is presliced and marinated, in 4 flavors / styles: Baked, Sliced, and Marinated.

Meat alternatives: Nestle now owns Osem which owns Tivall, the Israeli maker of meat alternatives. Since all of Tivall's products are held together by eggs or egg whites, none of them are vegan–and none are organic. Quorn, which also contains lots of egg protein, is owned by AstraZeneca [Marlow Foods]–which wants to sell the company because growth and profits have been lower than expected. DE-VAU-GE in Germany is a very big company, they make large amounts of meat alternatives (incl. burgers), and they do a lot of business with Aldi in breakfast cereals–not in soyfoods. Bernd thinks they are good, and very economical manufacturers, but they are not very creative and they have no USP (unique sales point); moreover, many of their products contain egg protein, but their quality is lower than that of Tivall. Bernd believes his meat alternatives are as good as Tivall's, but more expensive, in part because of organic ingredients. Tivall makes its raw materials in Israel, then exports these to Europe for cutting and flavoring.

Klaus Gaiser owns Topas which sells Viti brand meat alternatives based on wheat gluten, with no soy; he owns the brand and markets the products, but he has meat companies manufacture them. However, when his typically 3-year contract with the manufacturer expires, he has to find a new manufacturer, but the previous one keeps making his products under their own brand. In the USA: At Turtle Island Foods (Hood River, Oregon), Bernd met Hans Wrobel, a German who does product development. Note: Hans and Rhonda Wrobel of The Higher Taste developed Tofurky in Portland, Oregon. Bernd makes Pizzarella, a tofu-based cheese alternative. Address: Founder and president, Viana Naturkost GmbH, 54578 Wiesbaum / Vulkaneifel, Germany. Phone: +49 06593-99670.

12629. Bittman, Mark. 2004. The minimalist: Tofu without a grimace. *New York Times.* March 17. p. F3(L), col. 1.
• ***Summary:*** "Like almost everyone I know, I think I should eat tofu more often. It is cheap, easy to prepare and convenient, and its health benefits are close to overwhelming." Includes a classical Vietnamese recipe for Tofu and onions in caramel sauce.

12630. Brown, Allan; Brown, Susan. 2004. Tempeh tofu and other new developments (Interview). *SoyaScan Notes.* March 20. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** They recently had a visitor who makes "tempeh tofu" commercially in Australia. Tempeh is probably pasteurized then crumbled and added to the tofu curds before they are pressed into tofu. When you slice the tofu, there is a marbled effect with tempeh in the middle. The visitor is sending Allan the labels. "What a great, original idea! It is widely distributed and Australians love it because it has more flavor than tofu and it is not as heavy as tempeh."

In Vancouver, BC, a company named Gaia Enterprises Inc. makes natto and sells the spores. Noble Bean has been thinking about making natto, but Shurtleff warns against letting natto spores (a strong contaminant) get near tempeh.

Two years ago, Soy City Foods joined with another company, Second Nature, to become Sol Cuisine. They still make lots of good tofu but they have stopped making tempeh; they made only okara tempeh (to add value to the okara left over from making tofu) and only for the institutional market (mostly university cafeterias). The nutritional profile and consistency were both poor. Sol Cuisine is using certified organic soy isolates to make meat alternatives (incl. ground round, hot dogs, etc.), thereby challenging Yves, which uses regular isolates–perhaps made using hexane. The sales manager at Sol Cuisine is a close friend of Allan and Susan's from The Farm. Sol Cuisine wanted Noble Bean to private label tempeh for them. Allan now wants to talk with them about making "tempeh tofu."

The Farm in Summertown, Tennessee, is now a good, reliable source of tempeh spores. Noble Bean gets all its tempeh spores from the Farm.

Sooke Soyfoods has become Green Cuisine in British Columbia; established in 1989, they have a vegan restaurant and also make a line of soyfood products. Address: Founders, Noble Bean, R.R. #1, McDonalds Corners, ON K0G 1M0 Canada. Phone: 613-278-2305.

12631. **Product Name:** Tofu.
Manufacturer's Name: Lotus Organics.
Manufacturer's Address: 36B New England Rd., Brighton, UK BN1 4GG. Phone: 01273-819-756.
Date of Introduction: 2004. March.
How Stored: Refrigerated.
New Product–Documentation: Call from Louis Auton, founder and owner of Lotus Organics. 2004. June 7. He does a lot of catering and he has been making fresh tofu for about 2 years, but he first started selling it commercially, vacuum packed, about 3 months ago. He now makes about 100 kg/ week. He also makes a deep-fried, marinated Tofu Steak for his catering business. His main competitors in selling fresh tofu are: (1) Clean Bean, N. Yorkshire. (2) Full of Beans, Lewis. (3) Dragonfly (Devon). (4) Paul's Tofu (Leicester). Clear Spot (London).

MORI-NU

Refreshing New Package Design...

Tantalizing New Recipes...

THE SAME GREAT MORI-NU SILKEN TOFU now in a new package. So appetizing your customers will absolutely eat it up. There are even new recipes and serving suggestions. Our extended shelf-life means Mori-Nu Silken Tofu stays first-day fresh without preservatives or refrigeration. The silken-smooth texture and just-made taste are still the same. Only the look of the package has changed. Call your distributor or 1-800 NOW TOFU (669-8638) and see our new look for yourself.

MORI-NU Morinaga Nutritional Foods, Inc., 2050 West 190th Street, Suite 110, Torrance, CA 90504. Visit our website at www.morinu.com.

© Copyright Soyinfo Center 2013

Natural Products Expo West, March 2004) contains a color photo of each of the six different types and textures of Mori-Nu Silken Tofu: Soft, Firm (Made with organic soybeans), Firm, Lite Firm, Extra Firm, Lite Extra Firm. The writing and graphics are now in "landscape" mode, with the package horizontally rather than vertically. "The same great Mori-Nu Silken Tofu now in a new package."

On the rear is detailed information about each product, including ingredients. The coagulant in each is "gluconolactone" plus either calcium sulfate or calcium chloride. Address: 2050 West 190th St., Suite 110, Torrance, California 90504.

12633. **Product Name:** Trader Joe's Greek Style Tofu Veggie Burger.
Manufacturer's Name: Trader Joe's (Marketer-Distributor).
Manufacturer's Address: Monrovia, CA 91016.
Date of Introduction: 2004. March.
Ingredients: Organic tofu (filtered water, organic soybeans, nigari–magnesium chloride, a natural firming agent), organic spinach, feta cheese (goat milk, salt, vegetable rennet cultures), organic onions, organic red bell peppers, organic garlic, black olives, organic bread crumbs (organic whole wheat flour, filtered water, organic rosemary, organic garlic, olive oil, sea salt, yeast), organic olive oil, organic dried tomato, tapioca flour, potato starch, nutritional yeast, organic onion powder, organic spices, organic black pepper, sea salt.
Wt/Vol., Packaging, Price: 2 burgers in 6 oz (170 gm) vacuum pack. Retails for $2.69 (2004/03, Lafayette, California).
How Stored: Refrigerated.
New Product–Documentation: Product with Label purchased at Trader Joe's in Lafayette, California. 2004. March 13. Label is 2.1 x 2.75 inches. Orange, red, black, green, and light green. "Made with organic tofu, spinach & peppers." Logo: "Certified organic by Quality Assurance International (QAI)."

12634. **Product Name:** [Veggie Chick'n Nuggets, Veggie Gyro, Veggie Bratwurst Sausages, Veggie Bolognese].
Foreign Name: Chick'n Nuggets, Veggie Gyros, Veggie Bratnacker, Veggie Bolognese.
Manufacturer's Name: Veggie Life.
Manufacturer's Address: Postfach 1154, D-54576 Hillesheim, Germany.
Date of Introduction: 2004. March.
Wt/Vol., Packaging, Price: 200-250 gm pack.
How Stored: Refrigerated.
New Product–Documentation: Color packages sent by Bernd Drosihn. 2004. Nov. 15. Size: 10 by 18 by 3.5 cm. Paperboard boxes. Red, blue, green, and black on light yellow. Color photo of the dish, ready to eat, on a white plate. Each of these Veggie-Life-brand products is a meat alternative, ready to heat, introduced in Feb. 2000. The packaging is very attractive. However the relationship between the two companies Viana and Veggie Life (located in different places) is confusing. We believe that Veggie Life is a brand owned by Viana, but sold at supermarkets.

12635. Viana Naturkost GmbH. 2004. Tofumaker at work: Listen to your heart (T-shirt). Wiesbaum / Vulkaneifel, Germany. Undated.
• ***Summary:*** This t-shirt has a vertical rectangular design (red, green, and purple) on a beige background. Address: 54578 Wiesbaum / Vulkaneifel, Germany. Phone: +49 06593-99670.

12636. **Product Name:** Azumaya Firm Tofu.
Manufacturer's Name: Vitasoy USA, Inc.
Manufacturer's Address: Ayer, MA 01432. Phone: 1-800-VITASOY (848-2769).
Date of Introduction: 2004. March.
Ingredients: Water, whole soybeans, calcium sulfate, magnesium chloride.
Wt/Vol., Packaging, Price: 14 oz (397 gm) packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.
How Stored: Refrigerated.
New Product–Documentation: Product with Label purchased at Safeway supermarket in Lafayette, California. 2004. March 6. 5.75 by 4.75 inches. Dark green, light green, black, and red on white. Front panel: "All natural. Best for sautéing, casseroles & Salads. A good source of soy protein. Contains 25 mg of total isoflavones per serving." A very prominent black on yellow circular sticker near the top of the front panel reads: "2g Carbs per serving"–in response to America's "low-carb" diet craze. A color photo on the front panel shows stir-fried rice with tofu on a white paper plate.

12637. **Product Name:** Nasoya Super Firm Cubed Organic Tofu.
Manufacturer's Name: Vitasoy USA, Inc.
Manufacturer's Address: Ayer, Massachusetts. Phone: 1-800-4-Nasoya or www.viatsoy-usa.com.
Date of Introduction: 2004. March.
Ingredients: Water, organic whole soybeans, calcium sulfate, magnesium chloride.
Wt/Vol., Packaging, Price: 8 oz (227 gm).
How Stored: Refrigerated.
New Product–Documentation: Leaflet (dated 2004, 8½ by 11 inch, glossy color) sent by Patricia Smith from Natural Products Expo West. 2004. March. "Straight from the package to the pan." On the front are photos of the package and of the product being stir fried with noodles and veggies in a wok, On the rear is nutrition information and product specifications for Nasoya's 15 tofu products.

• ***Summary:*** Regular consumption of soya foods, a rich source of phytoestrogens, is associated with a reduced risk of endometrial cancer. Table 2 lists various soya foods including soya milk, tofu, dry soya bean seeds, fresh soya beans, soya bean sprouts, plus soya protein, and isoflavones from these foods. Address: Dep. of Epidemiology, Shanghai Cancer Institute, 2200 Xie Tu Road #25, Shanghai 200032, China.

12643. Aoyagi, Akiko. 2004. Radio ad for a grill on which one can barbecue everything from "tofu to T-bone steaks" (Interview). *SoyaScan Notes.* May 31. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Akiko heard this advertisement today on her car radio, but she was unable to catch any more details. Address: Walnut Creek, California.

12644. Frederick, Jim. 2004. Japan's terror threat. *Time* (*Asia*). May 31.
• ***Summary:*** Tsuneo Taya, a tofu-shop owner in Japan, often saw a well-dressed al-Queda suspect on the street talking on his cell phone.

12645. **Product Name:** [Soy Spread (Garlic), Tempeh, Tofu Mayonnaise].
Foreign Name: Tofu Namaz (Cesnjak), Tempeh, Tofu Majoneza.
Manufacturer's Name: Annapurna.
Manufacturer's Address: Nehajska 42, 10000 Zagreb, Croatia. Phone: 01 3385 533.
Date of Introduction: 2004. May.
Ingredients: Garlic spread: Tofu, water, oil, vinegar, salt, garlic, herbs. Tempeh: Soybeans, water, tempeh starter. Mayo: Tofu, water, oil, vinegar, salt, spices.
Wt/Vol., Packaging, Price: Spread: 150 gm vacuum packed. Sells for 8 kn. Tempeh: 300 gm vacuum packed. Sells for 52kn/kg. Mayo: 200 gm vacuum packed. Sells for 8 kn.
How Stored: Refrigerated.
New Product–Documentation: Labels sent by Vlatka Kuzmic. 2005. June 6. She wrote the introduction date and English translation of the product name on the back of each 2½ by 3¼ inch label. Self adhesive. Blue, green, and orange. Color photo of yellow soybeans against a blue background. Product name in white letters on light green background. The dates of introduction in 2004 are: Soy Spread (Garlic)–April. Tempeh–May. Tofu Mayonnaise–June.

12646. **Product Name:** [Grilled Tofu, Soy Burger, Marinated Tofu, Tofu Spread (Mediterranean, or Red Pepper / Paprika), Tofu with Vegetables].
Foreign Name: Tofu Grill, Burger Soja, Tofu Marinirani, Tofu Namaz (Mediterano, or Paprika), Tofu s Povrcem.
Manufacturer's Name: Annapurna.
Manufacturer's Address: Nehajska 42, 10000 Zagreb, Croatia. Phone: 01 3385 533.

© Copyright Soyinfo Center 2013

Date of Introduction: 2004. May.
Ingredients: Grilled: Tofu, soy sauce, salt, oil. Burger: Soybeans, carrots, onion, oak flakes, breadcrumbs, salt, spices, herbs, oil.
Wt/Vol., Packaging, Price: Grilled: 250 gm vacuum packed. Sells for 56kn/kg. Burger: 148 gm vacuum packed. Sells for 54kn/kg.
How Stored: Refrigerated.
New Product–Documentation: Labels sent by Vlatka Kuzmic. 2005. June 6. She wrote the introduction date and English translation of the product name on the back of each 2½ by 3¼ inch label. Self adhesive. Blue, green, and orange. Color photo of yellow soybeans against a blue background. Product name in white letters on light green background. The dates of introduction in 2005 are: Grilled Tofu–Feb. Soy Burger–March. Marinated Tofu, Tofu Spread (Mediterranean, or Red Pepper / Paprika), and Tofu with Vegetables–April. The soy burger contains okara.

12647. **Product Name:** Whole Soymilk, Tofu Blocks, Soy Custard, Braised Tofu, Tofu Puffs, Tofu Noodles, Soy Omelette (with Yuba), Yuba (Tofu Skin), Poached Yuba Loaf.
Manufacturer's Name: Basic Soy Beanery (renamed Hodo Soy Beanery in Sept. 2005).
Manufacturer's Address: 1600 S. De Anza Blvd., San Jose, CA 95106. Phone: 408-517-8958.
Date of Introduction: 2004. May.
Ingredients: See below.
Wt/Vol., Packaging, Price: -
How Stored: Refrigerated.
New Product–Documentation: Labels by brought to Soyinfo Center by Minh Tsai on 2009. Sept. 16. Ingredients:

Whole Soymilk: Soybeans, filtered water (cane sugar is added to our sweetened soymilk).

Tofu Blocks: Soybeans, filtered water, calcium sulfate.

Soy Custard: Soybeans filtered water, calcium sulfate. Ginger syrup: Filtered water, rock sugar, fresh ginger.

Braised Tofu: Soybeans, filtered water, soy sauce, cinnamon, anise, calcium sulfate.

Tofu Puffs: Soybeans, filtered water, soybean oil, calcium sulfate.

Tofu Noodles: Soybeans, filtered water, calcium sulfate.

Soy Omelette: Soybeans [made into yuba], filtered water, soy sauce, sugar, soybean oil.

Yuba (Tofu Skin): Soybeans, filtered water.

Poached Yuba Loaf: Soybeans [made into yuba], filtered water, soy sauce, white pepper, anise.

12648. **Product Name:** Trader Joe's Organic Firm Tofu.
Manufacturer's Name: Trader Joe's (Marketer-Distributor). Made by Wildwood Natural Foods in California.
Manufacturer's Address: P.O. Box 3270, South Pasadena, CA 91031-6270. Phone: 818-441-1177.
Date of Introduction: 2004. May.
Ingredients: Organic soybeans*, filtered water, nigari (an extract of sea water). * = Organically grown and processed in accordance with the California Organic Foods Act of 1990.
Wt/Vol., Packaging, Price: 16 oz packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.
How Stored: Refrigerated.

New Product–Documentation: Product with Label purchased at Trader Joe's in Lafayette, California. 2004. Brown, black, yellow, and white.

12649. **Product Name:** TofuTown Grilled Tofu Tenders (Organic Frozen Entrees) [Tamari, Sesame Ginger Teriyaki, Mediterranean Tahini, Havana Black Bean].
Manufacturer's Name: White Wave, Inc.
Manufacturer's Address: Boulder, Colorado.
Date of Introduction: 2004. May.
Ingredients: Sesame Ginger Teriyaki: Organic tofu (water, organic soybeans, nigari {magnesium chloride], gypsum), water, tamari soy sauce (water, soybeans, wheat, salt), organic evaporated cane juice, apple juice, ginger, sesame seeds, autolyzed yeast extract, caramel color, molasses, xanthan gum, garlic, lime, orange peel, salt, citric acid. No more, no less.
Wt/Vol., Packaging, Price: 9 oz.
How Stored: Refrigerated.
New Product–Documentation: Akasha Richmond. 2004. *Vegetarian Times.* March. p. 31. "Trends." Shows the cover of a package. Below the title: "Add vegetables, pasta, or grains." Talk with Akasha Richmond. 2004. Feb. 11. This product will be demoed at the Anaheim show, but will not be in stores until a few months after that. Article in *Natural Foods Merchandiser.* 2004. Sept. p. 1, 9. "Demos to lead combined brands." White Wave has launched its TofuTown line of prepared "tofu tenders."

(Anaheim, California). 2005. March. "TofuTown Grilled Tofu Tenders: Marinated. Baked. Grilled. Delicious." Comes in four flavors: Tamari, Sesame Ginger Teriyaki, Mediterranean Tahini, Havana Black Bean.

12650. Schweitzer, Peter. 2004. Re: Soybeans and soyfoods in Nicaragua, at the Huichol Center in Mexico, and in Iraq. Letter sent to *Plenty Bulletin* subscribers, June 21. 2 p. Typed, with signature on letterhead.
• ***Summary:*** "We're not doing a full Bulletin this time, just an update about what's happening with Plenty." After 30 years, "I have come to recognize that what we do together might be described, very simply, as ordinary magic. Where people are connected by their love for each other, miracles are commonplace."

"As you know from the most recent Bulletins, we are working on a new project involving four different organizations–two in Guatemala, one in Managua, Nicaragua and the Huichol Center in Mexico, which have requested Plenty's assistance for their soyfoods and nutrition education efforts. We call it CAFSI (Centra American Food Security Initiative). Through CAFSI we will be purchasing soy processing equipment, and we will help the groups install it, and do trainings in the use and maintenance of the equipment and different ways of preparing soyfoods and making soyfood products for sale. Two of the organizations will be growing soybeans, so seed variety trials have to happen and growing and harvesting techniques learned."

"Thanks to another grant from the Better World Fund, we were able to help the Mayan Soy Dairy operated by ADIBE in San Bartolo near Solola, Guatemala open a shop in a near-by town where they can sell their products. Remember, the ADIBE Soy Dairy is the original Mayan Soy Dairy built by Plenty and the Cakchiquel Maya of San Bartolo in 1979. That Mayan Soy Dairy is 25 years old this year, and they're still making soymilk, tofu, soy ice cream and tempeh using mostly the same equipment we took down in '79. Using your individual donations to Plenty, we were able to provide the funding to upgrade the dairy floor and roof. Now we're raising money to upgrade the equipment."

"The purpose of the Iraq Soy Food Group (ISFG) is to assist economically disenfranchised families improve their access to good planting seed and high nutrient, low cost foods. Plenty is acting as the fiscal sponsor for ISFG. Long-time Plenty soy technician, Charles Haren, is overseeing the project, and Lou Morgan, a Plenty donor for 25 years, has been providing start-up funding. ISFG is working to help families and communities in Iraq improve nutrition intake and financial income by increasing local production, processing, marketing and consumption of soybeans, other dry legumes. Beginning in March ISFG representatives Martin Edwards and Salam Onibi started working with a few farming families and agriculture scientists to re-establish soybean production capabilities (most planting seed has been lost due to the war). The Iraq Soy Foods Group is now seeking funding to establish a Soy Foods Center that will help address immediate and long-term food needs for impoverished populations in Iraq." Address: Executive Director, Plenty, P.O. Box 394, Summertown, Tennessee 38483. Phone: (931) 964-4864.

12651. *SoyaScan Notes.* 2004. Vitamin E: Forms, best sources, function, and value of supplements (Overview). June 23. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** Forms: Vitamin E comes in many forms. Various foods contain the alpha-tocopherol, gamma-tocopherol, and delta-tocopherol forms.

Best sources: Foods such as nuts, vegetable oils, whole grains, tomatoes and tomato products, and leafy green vegetables. Soy oil and traditional soy products (such as tofu, soymilk, edamame) made from whole soybeans are excellent sources.

Vitamin E is a powerful antioxidant. Research suggests that the natural forms found in foods may reduce the risk of cardiovascular disease (heart disease, stroke, etc.) and certain types of cancer.

Are supplements as beneficial as foods: Alpha-tocopherol is the form of vitamin E typically found in supplements. Studies have *not* consistently shown that these supplements provide the same risk reducing effects (such as prevention of heart disease and cancer) as does vitamin E found in foods. The high amounts of alpha-tocopherol in supplements may actually reduce levels of the beneficial forms of vitamin E. However supplements containing natural mixed tocopherols (see the 3 forms above) may provide better health benefits. Read the label to determine what a supplement contains.

An additional benefit of dietary vitamin E is that certain foods rich in vitamin E are also rich sources of other compounds that can protect against disease. Unfortunately, many Americans don't get enough vitamin E.

12652. Pulmuone Co., Ltd. 2004. Pulmuone 2003 annual report. Chungcheongbukdo, Korea. 43 p. 28 cm.

"Corporate profile: Pulmuone Co. Ltd. is one of the world's leading providers of fresh, close-to-nature products with shelf lives of fewer than 15 days." This unique business model, and the foresight to realize in 1984 what consumers want, stems from: "(1) The special Korean culinary style of cooking, with a heavy dependence on fresh, close-to-nature products. Traditional Korean foods are considered on of the world's healthiest diets, with a heavy dependence on soybean-related ingredients. (2) The Pulmuone founder's vision that emphasizes a 'love for our neighbors' and a 'respect for all living beings.' (3) The mixing of corporate values with strong results..." The heavy emphasis on innovation. "May 2004 marks Pulmuone's 20th anniversary... We'll offer the best Asian-type tofu and related products for Asian consumers, and at the same time provide the best alternative soybean protein-protein based food sources for the rest of the globe." Seung-Woo Nam is chairman of the board and CEO. Last year Pulmuone's revenues increased by 30.2%. Net income (profit) however decreased slightly.

A timeline (p. 8-9) shows 35 important milestones in Pulmuone's history from 12 May 1981 to 2004. Of these, 26 are for Pulmuone companies and 9 are for "affiliates."

Values into action: "Since 1993, our company has donated 0.1% of sales on products bearing the 'Love Earth' seal to needy neighbors and to environmental causes." Examples of projects are shown.

Pages 12-13: "Won Kyung Sun: The founder of Pulmuone Cooperative Farm. A true teacher: Born into an indigent farm family in the southern part of Pyong Yang province in 1914, Won Kyung Sun began raising silkworms at the age of six to support his family after the death of his debt-ridden father. The Korean war [June 1950 to July 1953] had a grave impact on him when his eldest son died at age six. In 1955 [when post-war hunger and starvation were widespread in South Korea], Mr. Won organized Pulmuone on 33,058 square meters [8 acres] of usable land to provide a 'rebirth' for those who had been struggling with Christian values. The land was formed into a cooperative farming community. In 1976, Pulmuone adopted an organic farming approach by using organic fertilizers. In the late 1970s Mr. Won solidified his Pulmuone values to be these: Love for our neighbors, because when our neighbors are not happy, we can never be happy, and Respect for all living beings, because everything is interdependent with each other. When we do not protect nature, which in turns supports all living beings, the well being of our future is jeopardized. The top leaders in Korea regard Mr. Won as one of the most profound teachers in 20th-century Korea."

Five small color photos show Mr. Won. A full-page black-and-white photo shows him walking on a road, carrying a hoe over one shoulder. "In 1995 Mr. Won received the UN's 500 Award for Environmental Achievement."

Soy protein: "A key impetus that drives the domestic market (KRW 490 billion) is the switch by consumers from unpackaged to packaged tofu products. Further, the recent mad cow disease scare... A major concern for Korean consumers is whether soybeans are produced in Korea and if these soybeans are genetically modified (GMO). That our tofu products are free from any GMO–meaning their GMO Level tests less than 1%–has won widespread trust among consumers. As a result, our company gained nearly 75% of the national tofu market with a nationwide, chilled supply-chain system capable of delivering products on a daily basis to maintain freshness. In 2003, we completed the world's largest state-of-the-art automated tofu plant at Eum Sung. It is capable to producing 200,000 pieces of tofu daily.

Soga: In 2003 Pulmuone USA's tofu sales increased by 22% to over $250 million. Color photos show the company's tofu plants at South Gate, California, Fullerton, California, and Tappan, New Jersey. Homepage: www.pulmuone.co.kr. Address: 80-1, Samhori, Daesomyun, Eumsunggun, Chungcheongbukdo, Korea. Phone: 82-043-879-4500.

12653. **Product Name:** Tofurky Deli Slices [Italian Deli, Cranberry & Stuffing, or "Philly Style" Steak].
Manufacturer's Name: Turtle Island Foods, Inc.
Manufacturer's Address: P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031. Phone: 1-888-TOFURKY (863-8759).
Date of Introduction: 2004. June.
Ingredients: Philly Style Steak: Water, wheat protein, tofu (water, organic soybeans, magnesium chloride, calcium chloride), natural vegetarian flavors, non genetically engineered canola oil, non genetically engineered corn starch, white beans, garbanzo beans, spices, lemon juice from concentrate, calcium lactate from beets, autolysed yeast.
Wt/Vol., Packaging, Price: 5.5 oz (156 gm) vacuum pack.
How Stored: Refrigerated.
New Product–Documentation: Glossy color sell sheet for Tofurky Deli Slices sent by Seth Tibbott. 2008. Jan. 1. "New look!" Photos show the front and back panels for six flavors. "Oven Roasted" was introduced in 1998 as "Original." Hickory Smoked was also introduced in 1998.

Letter (e-mail) from Seth Tibbott. 2009. Jan. 25. These three products were first sold commercially in June 2004.

12654. Pulmuone USA, Inc. 2004. Pulmuone USA, Inc. proudly announces their new strategic alliance with Wildwood Natural Foods Inc. (News release). Fullerton, California. 1 p. July 20.
• ***Summary:*** "Pulmuone USA, Inc., the largest tofu company in the world, is proud to announce their strategic alliance with Wildwood Natural Foods, Inc. By joining forces, both companies will collaborate on research, production, marketing, and sales to build an even stronger presence in the United States."

T.J. Song, executive vice president of Pulmuone USA

© Copyright Soyinfo Center 2013

is "proud and very excited to have Wildwood join the Pulmuone family... This alliance will make both companies leaders in the natural foods market."

Pulmuone, Inc., founded in 1981, has worldwide annual revenues of more than $400 million. "With an ever-expanding American market base, Pulmuone South Korea established Pulmuone USA in 1991, to distribute natural food products from South Korea to the American market. The company is the leading manufacturer of tofu, fresh noodles, meatless products, and soy milk-based items.

Pulmuone, with manufacturing facilities in California and New York, makes products under the Pulmuone, Kimbo, Nigari, and Soga brands, with Pulmuone, Kimbo and Nigari catering to the ethnic market and the Soga brand focusing on developing and making quality soy products for the mainstream American market. Address: Fullerton, California.

12655. Wildwood Natural Foods, Inc. 2004. Wildwood Natural Foods enters into a strategic alliance with Pulmuone U.S.A., Inc. (News release). Watsonville, California. 1 p. July 20.
• ***Summary:*** "Wildwood Natural Foods, Inc. ('Wildwood'), formerly known as Wildwood Harvest Foods, Inc., is pleased to announce that it has entered into a strategic alliance with Pulmuone U.S.A., Inc. The relationship provides for significant equity investments into Wildwood as well as a broad collaboration on research, production, marketing, and sales."

Billy Bramblett and Jeremiah Ridenour (founders of Wildwood) and Tom Lacina (COO of Wildwood) express enthusiasm for the alliance. Dan Winegarden, President of the Iowa Agricultural Finance Corporation, supports the alliance. "Separately, Wildwood announces the appointment of Paul S-U Kang as President and CEO. Paul's experience includes brand management at Procter & Gamble Co. in Cincinnati, Ohio, and mergers and private equity at Goldman Sachs & Co. in New York. He received his A.B. from Harvard Univ. in Massachusetts and his M.B.A. from Stanford Univ. in California.

Other investors in Wildwood include the tecTerra Food Equity Fund I, the Iowa Farm Bureau, soybean farmers, and over a dozen physicians interested in the health benefits of soy.

"Wildwood was founded some 25 years ago and has been a pioneer in the natural and organic food category. Pulmuone U.S.A., Inc., with three factories in the U.S., is a subsidiary of the publicly-listed Pulmuone Co., Ltd., with revenues of $250 million. Pulmuone Co. Ltd. is the largest player in the global tofu industry and is a part of the Pulmuone Group with businesses in fresh juices, bottled water, fresh noodles, food supplements, and food services." Address: Watsonville, California.

12656. Gorman, Christine. 2004. How low can you go? New guidelines call for heart patients to cut their cholesterol levels even further. *Time.* July 26.
• ***Summary:*** A sidebar titled "Soy sorry" states that even though a study found that soy-protein powder did not improve "bone density, cognitive function or cholesterol levels" for women 60-75 years old, people should not "give up tofu just yet."

12657. *Consumer Reports.* 2004. Soy: Cutting through the confusion. July. p. 28-31.
• ***Summary:*** An excellent, very helpful article. Growing evidence suggests that soy protein and isoflavones may provide health benefits to most people. However, it is often impossible to tell how much of these are in a given product. *Consumer Reports* analyzed 42 foods for the content per serving of aglycone isoflavones, soy protein, and calories. Cost (per serving), organic or not, non-GMO or not is also indicated. Only 6 of these labeled the isoflavone content, but various definitions of "isoflavones" were used–which is very confusing for consumers. A table shows the results of the analysis with the foods grouped in the following categories: Cereals and snacks. Energy bars. Other drinks. Tofu. Non-dairy desserts (soy ice cream). Cultured soy (yogurt). Veggie burgers. Supplements. Soymilk.

Should you limit your intake of soy? (sidebar): Infants, breast-cancer patients, people on thyroid medication, people with a history of kidney stones, people allergic to soy.

Health benefits: Soy and heart health, soy and menopause, soy and bones, soy and cancer. Behind the labels. How to choose. Photos show many soyfood products.

12658. Shurtleff, William; Aoyagi, Akiko. comps. 2004. Marketing tofu: Labels, ads, posters & other graphics–1922-1985. Lafayette, California: Soyfoods Center. 241 leaves. July. Illust. (some color). No index. 28 cm. Series: Marketing soyfoods.
• ***Summary:*** This book is a collection of 128 color and 113 black-and-white photocopies of materials ranging in date from 1922 to 1985. Only basic tofu graphics are included, not those for second-generation products (i.e., those in which tofu is used an ingredient).

The books in this series, each a unique collection of graphic materials, are designed for a number of purposes: (1) To serve as a source of ideas, ingredients, inspiration, legal specifications, and basic guidelines for companies in the process of developing their own products, designing their own graphic materials, and conceiving their own marketing strategies. (2) To document the tremendous diversity of soyfoods products and the way that each is presented and marketed. (3) By arranging the materials in chronological sequence, to help document the development and history of new product categories and soyfood types, and with them the rise of the soyfoods industry and market in the Western World. Address: Soyfoods Center, P.O. Box 234, Lafayette,

12659. Vitasoy International Holdings Ltd. 2004. Annual report 2003/04. New Territories, Hong Kong. 128 p. July. 30 cm. [Eng; Chi]
• ***Summary:*** "At Vitasoy, promoting consumer well-being is our number one priority. This is achieved through the provision of high-quality, nutritious food and beverages. Vitasoy is an innovative company, a reliable employer, a responsible corporate citizen and is dedicated to creating value for our shareholders" (p. 1).

Turnover (sales) rose 1.8% to HK$2,269 million. Gross profit rose 3.5% to HK$1,288 million. EBITDA (earnings before minority interest, interest expense, income taxes, depreciation, and amortization) fell 6.1% to HK$261 million. Basic earnings per share fell 17.5% to 11.8 Hong Kong cents (p. 4).

Sales analysis by product categories: Soymilk 39%. Tea 25%. Tofu 9%. Lunch boxes and snacks 7%. Water 6%. Milk [dairy] 6%. Juice drinks 4%. Others 4%.

Sales analysis by location of customers: Hong Kong 64%. North America 22%. Mainland China 6%. Australia and New Zealand 5%. Others 3%.

A five-year financial summary (from 2000 to 2004), expressed in Hong Kong dollars, appears on page 127. Address: No. 1, Kin Wong Street, Tuen Mun, New Territories, Hong Kong. Phone: 466 0333.

12660. Kanner, Ellen. 2004. Final verdict is still not in on the benefits of soy. *Contra Costa Times.* Aug. 11. p. G7.
• ***Summary:*** Some of the suggested health benefits of soy include relief of the unpleasant symptoms of menopause and improved bone mass in older women. However, a year-long study published on July 7 in the *Journal of the American Medical Association* found that soy powder did not "increase bone density, lower cholesterol or improve memory in 175 post-menopausal women."

The article suggests that the conditions of the study may not have been optimal; a longer study on younger women might have different results. Additionally, whole soy foods provide a better dose of isoflavones than soy pills or powder. The author seconds Andrew Weil's recommendation of a daily helping of whole soy foods such as tofu, edamame, soy milk, miso, or soy nuts. Even if the isoflavones in soy don't have miraculous health benefits, soy is still an excellent low-fat, affordable source of protein. Soy can also lower cholesterol and thus reduce the risk of heart disease. Address: Knight Ridder Newspapers.

12661. Corliss, Richard; Lemonick, Michael D. 2004. How to live to be 100: New research suggests that a long life is no accident. So what are the secrets of the world's centenarians? *Time.* Aug. 30.
• ***Summary:*** Okinawans live long and healthy lives. Take Seiryu Toguchi, age 103. He wakes at 6 a.m. For breakfast, he enjoys whole-grain rice [brown rice] and miso soup with vegetables. Then he works for 2 hours weeding his fields. For lunch, he has "goya stir-fry with egg and tofu," then naps for an hour or so and spends several hours in the field.

12662. Newman, Jacqueline M. 2004. Food culture in China. Westport, Connecticut: Greenwood Press. xviii + 230 p. Illust. (color). Index. 24 cm. Series: Food Culture Around the World. [80* ref]
• ***Summary:*** Contents: Series foreword. Introduction. Timeline. Historical overview. Major foods and ingredients. Cooking. Regional and provincial foods. Meals. Eating Out Special occasions. Diet and health. Glossary. Bibliography Resource guide.

Dr. Newman was born in 1932. The following soyfoods are mentioned in the Glossary: dadao [sic, dadou]: Soybeans, which she says were domesticated in north China about 3000 B.C.E. doufu. fuyu. hoisin. mapo doufu.

Concerning doufu [tofu]. Its popularity increased during the Tang dynasty (618-907 C.E.), especially among Buddhists and other vegetarians. Yet it had been known before Tang times (p. 17). It is not known when bean curd was first made. One legend has it that Prince Liu An (lived 179 to 122 B.C.E., during the Western Han, invented bean curd). The Chinese word for soy sauce first appeared in print around the Song dynasty (p. 30-32). Fuyu is fermented bean curd (p. 34). Bean sprouts include those grown from the mung bean and the soybean (p. 52). Hakka-style stuffed bean curd is filled with meat (p. 100). "Dried bean curd wishes personal fulfillment" (p. 161).

Concerning soybeans: The *Qimin Yaoshu* describes how to make "black bean mash," which may have been the earliest known soybean-related condiment (p. 16). Soy sauce, its varieties and bean sauces are described in detail (p. 40-43). A "mother sauce" is a soy sauce mixture used and reused from one similar meat to another (p. 59). Boiling in soy sauce is called *chiang;* it is known in English as red cooking (p. 70). The word "wok" is Cantonese (p. 72-73). Soy milk (p. 52, 99). Steamed sea bass with black bean sauce (p. 151). Address: Food historian and scholar, Former prof., Dep. of Home Economics, Queens College of the City Univ. of New York, 65-30 Kissena Blvd., Flushing, NY 11367.

Quality. Customer relations. Animal welfare, environmental protection, health. Sustainability. Very big numbers.

Introduction: "The company Tofutown.com GmbH was founded in 1988 in Cologne under the name Viana Naturkost by a group of experienced food producers, brave tofu makers and young musicians. Since then the company has practised 'Business without Guilt" (e.g. the use of purely vegetable organic raw materials, in part from Fair Trade). Even after 15 years the company sees itself as a dynamic "Veggie Start Up Company." Tofutown.com has grown to become a renowned producer of entirely vegetable foods such as meat alternatives and dairy free milk and cream products within Europe. It is part of the Tofutown.com philosophy to produce using one's one know how and not simply "bring into circulation" (i.e. have others produce), which is commonplace in such marketplace niches as organic foodstuffs.

"More than 60 vegetarian products are made in the middle of the beautiful natural countryside of the Volcanic Eifel region, in the town Wiesbaum, which has earned itself the description 'Tofutown.' Tofutown.com is known for its excellent, tasty 'Viana Real Smoked Tofu,' the vegetable drinks 'SoActiv' and ReisActiv, the meat alternatives 'Velami,' 'Vegetarian Kebab' or '½ Pound Veggie Mince,' the dairy free cheese 'Pizzarella,' and the 'Viana Soya Coffee Creamer.' The exquisitely fine 'Country Mild Smoked' from the product range 'Classic Veggie Carpaccio' won the German Vegetarian Union's Trend Prize 2004. The export share of turnover is about 30%. Tofutown products can be found throughout Europe and even in the Kingdom of Bahrain.

"Brand names and marketing: The company produces some 60 items for the European organic market under the traditional label 'Viana' as well as a soy drink under the quality label 'demeter' (Tofutown.com is a licensed demeter producer).

"In 2003 Tofutown.com was able to introduce a new brand name into German foods retail (supermarkets, warehouses, Cash&Carry, discounters, etc.). This new label is called VeggieLife (slogan: 'happy without meat'), encompasses at present some 15 products and has made its way into 500 supermarkets within just 9 months."

As many as 15,000 users visit the company's websites each week. "We believe in Food Democracy. The Tofutown.com philosophy is that every human should have the opportunity to get an entirely vegetarian product whenever and wherever he or she is hungry or thirsty. If it comes from Tofutown, it's much more delicious and far healthier than something similar containing meat or dairy products. Today's consumers know that they shape their own future with their purchases."

Tofutown.com makes "500,000 tofu burgers and 1,000,000 real vegetarian sausages per year." There are "500,000 faithful and enthusiastic Viana customers... and approximately 35 employees." Address: Wiesbaum, Germany.

12665. Soymilk and tofu: A healthy delight (Leaflet). 2004. New Delhi, India: American Soybean Association (ASA) / United Soybean Board. 2 p. Front and back. 28 cm.
• ***Summary:*** Contents: Introduction. Soymilk. Tofu (soy paneer). Health benefits of using soymilk and tofu. Lactose intolerance. Heart disease. Osteoporosis and menopause. Cancer. Now soymilk and tofu is available in your city. Try this wonderful food and feel the difference.

This leaflet is printed in black ink on glassy green paper. Two color photos show soymilk and tofu. Ten thousand copies were printed in Sept. 2004. An additional 10,000 copies were printed in Hindi in Jan. 2007. Address: American Soybean Assoc., Asia Subcontinent, 149 Jor Bagh, New Delhi–110 003, India. Phone: (91) (11) 2465-1611.

12666. United Soybean Board 2004. Great health, great taste, everyday (Compact disc–CD-ROM). Jefferson City, Missouri. 50 p.
• ***Summary:*** "The United Soybean Board (USB) is pleased to share with you this 52-page meal-planning tool full of recipes ad helpful tips for including soyfoods in your everyday diet. USB is dedicated to helping consumers learn more about the health and nutrition of soyfoods... On this CD-ROM, you'll find an interactive version of USB's *Great Health, Great Taste, Everyday* meal-planning tool."

Contains 21 recipes, most accompanied by a color photo. Includes: Corn and soy muffins. Miso marinade. Layered tofu salad. Oven roasted tofu. Tofu satay. Lemon miso dressing. Lemon tofu cheesecake. Strawberry smoothie. Tofu jalapeno poppers.

12667. United Soybean Board. 2004. Consumer attitudes about nutrition–Insights into nutrition, health & soyfoods: National report 2004-2005. Seattle, Washington. 8 p. Sept.
• ***Summary:*** This 11th annual nationwide survey, commissioned by USB, was conducted in early 2004 by an independent research firm in Seattle, Washington. Random telephone interviews were completed with 1,000 consumers, "providing a sample that is consistent with the total American population. The study's margin of error is ±1.9 to 3.1 percentage points and has a confidence level of 95%."

Contents: Introduction and methodology. Nutritional habits and obesity concerns. Healthy food decisions. Cooking oil impressions. Consumer attitudes about fats. Awareness, usage, and trial of soy products. Soyfoods and health: Perceived healthfulness of soy products (74% say healthy, 19% neutral, 7% unhealthy), awareness of health benefits of soy (heart health 29%, prevent obesity / promote weight loss 17%, menopause relief 16%, cancer prevention 8%, good protein source 6%, reduced risk of osteoporosis 2%). Consumer perceptions of biotech [genetically

© Copyright Soyinfo Center 2013

engineered] food. Soy meets beef? Note: This section replaced the section on Consumer awareness and usage organic products.

Awareness of soyfoods: "Overall consumer awareness of soy products increased this year. Soymilks awareness rating stepped up to 90%, while regular use of soymilk held fairly steady at 16%. "One-quarter [25%] of Americans consume soyfoods or soy beverages once a week or more." However 38% of respondents never consume soy, up 5 points since last year. Among these non-consumers of soy, 37% (down 10 points since last year) report that that nothing in particular prevents them from including soy in their diet, and another 18% say that taste prevents them from incorporating soy in their diet.

Genetically modified foods: The focus of these questions has changed from food to agriculture. 39% "of consumers consider themselves at least somewhat familiar with biotechnology and, of this group, 65% carry a positive perception of its role in agriculture." Awareness is slightly higher among men (66%) than women (64%). Of this group: 34% believe biotech improves the nutritional make-up of crops, 24% don't know enough about biotech to say what role it plays, 13% think that biotech enables farmers to use fewer pesticides, herbicides, and toxins. Other: 29%.

Note: As of Aug. 2008 this full survey is available gratis in PDF format at www.soyconnection.com /health_nutrition / pdf/.

12668. **Product Name:** [Tofu Spread (Horseradish), Soy Sausage].
Foreign Name: Tofu Namaz (Hren), Sojina Kobasica.
Manufacturer's Name: Annapurna.
Manufacturer's Address: Nehajska 42, 10000 Zagreb, Croatia. Phone: 01 3385 533.
Date of Introduction: 2004. October.
Ingredients: Spread: Tofu, water, oil, vinegar, salt, horseradish. Sausage: Soybeans, soy flour, soy sauce, wheat germ, spices, salt, oil, palm fat.
Wt/Vol., Packaging, Price: Spread: 150 gm vacuum packed. Sells for 8kn. Sausage: 130 gm vacuum packed. Sells for 60kn/kg.
How Stored: Refrigerated.
New Product–Documentation: Labels sent by Vlatka Kuzmic. 2005. June 6. She wrote the introduction date and English translation of the product name on the back of each 2½ by 3¼-inch label. Okara is the main ingredient in the Soy Sausage; it does not contain any cooked soybeans.

12669. Boyte, Frances. 2004. Tofu: Tout flamme [Tofu: On fire]. Outrement, Quebec, Canada: Éditions de Trécarré. 94 p. Illust. (color photos). No index. 26 cm. [Fre]
• ***Summary:*** A very attractive book, printed on glossy paper, with many stylish full-page color photos. Many of the recipes in this book were developed by professional restaurant chefs incl. Éric Boutin, Sébastien Leblond, Benoît Paquet, and José Trottier. The name of the recipe creator is given below each recipe.

Contents: Acknowledgments. A word about the author. Tips for cooking with tofu. How to make tofu at home. Entrees, soups, and potages. Main dishes. Desserts. On the rear cover is a color photo and some words about the author. Address: Les Ateliers diététiques de Frances Boyte, 825, avenue Beauregard, Bureau 117, Sainte-Foy (Quebec), Canada G1V 4L7.

12672. **Product Name:** Wildwood Soyogurt Smoothie [Wildly Berry, Mango Apricot Tango, Orange Orange, Kickin' Key Lime, or Vivacious Vanilla].
Manufacturer's Name: Wildwood Harvest Foods, Inc.
Manufacturer's Address: 416 E. Riverside Dr., Watsonville, CA 95076. Phone: 1-800-459-TOFU or 813-728-4448.
Date of Introduction: 2004. October.
Ingredients: 1998: Wildwood Tofu (filtered water, organic soybeans grown in accordance with the California Organic Foods Act of 1990, nigari {magnesium chloride, a natural firming agent}), unsweetened pineapple juice, soy sauce, fruitrim (fruit juice, natural grain dextrins), pineapple juice concentrate, ginger, orange juice concentrate, olive oil, molasses, ginger powder, spices.
How Stored: Refrigerated.
New Product–Documentation: Spot in *Natural Foods Merchandiser.* 2004. Oct. p. 142.

12673. Drosihn, Bernd. 2004. Re: Viana Naturkost GmbH has been renamed Tofutown.com GmbH and has moved to the village of Wiesbaum. Letter to William Shurtleff at Soyfoods Center, Nov. 5. 2 p. Typed, with signature on letterhead.

• ***Summary:*** Tofutown.com is the company's new name; it is not a consumer brand. Wiesbaum, a village too small to appear on most maps of Germany, is located in southwest Germany, south of Bonn, south of Cologne, and west of Koblenz. The major business in town is Vukcan Electronic, and a map and directions can be found on their website www.vulcanelectronic.com. The name "tofutown" was given to Bernd by the village of Wiesbaum. Bernd registered

© Copyright Soyinfo Center 2013

the "Tofutown" name in Europe's and Germany's brand registries–prior to White Wave registering it in the United States,

A major reason for the change of name is that the company's new and very successful mainstream supermarket brand "Veggielife" is becoming more and more important. Viana is still the company's traditional brand for health food stores in Europe; the new name is helpful to consumers in making a clear separation between the company name and brand names. The company also now makes a lot of private labelled products.

Two tofu makers in Eastern Europe are Veto in the Czech Republic and Polsoja in Poland.

Bernd's company now has many websites: www.tofu.de, www.ernaehrung- nahhhaltigkeit.de, www.tofutown.com, www.veggielife.de, and www.viana.com.

Follow-up e-mail from Bernd. 2004. Dec. 17. In 2001 Bernd moved his food factory from Euskirchen-Kuchenheim to Wiesbaum and started making soy products there in the summer of 2001. He moved because the company had grown and they needed a "state of the art building and machinery" to attract new professional customers–who did come. Bernd now lives in Bonn (the capital of Germany, on the Rhine River near Cologne) and enjoys the drive to Wiesbaum which is in very beautiful and rural surroundings. It is a hillside area with pure water and air, near Belgium and Luxembourg.

In the autumn of 2003 Bernd changed his company name from Viana Naturkost GmbH to Tofutown.com. Address: Founder and president, Tofutown.com GmbH, Industrie und Gewerbe Park, D 54578 Tofutown Wiesbaum, Germany. Phone: 06593 9967-0.

12674. Bruni, Frank. 2004. Restaurants: A paean to tofu in a Japanese pub. *New York Times.* Nov. 24. p. F8.
• ***Summary:*** This is a review of En Japanese Brasserie, a restaurant in Greenwich Village, New York City, which features artisanal tofu–as well as "its dynamic cousin yuba, which is the skimmed skin of heated soy milk, omelet-esque in texture. Yuba arguably has more character than plain tofu..." It also serves house-made miso pastes. Address: Japan.

12675. Funk, Linda. 2004. Simply Soy: Recipes celebrating nature's perfect bean. *Iowa Soybean Review* (*Iowa Soybean Association, Urbandale, Iowa*) 16(2):12. Nov.
• ***Summary:*** This article announces The Soyfoods Council's first cookbook titled *Simply Soy: Recipes Celebrating Nature's Perfect Bean,* which "has soyfood product information, numerous scrumptious recipes, and many eye appealing color pictures." "It is one of the first soyfoods cookbooks that demystifies soy and has easy, delectable recipes..." Recipes for Pumpkin Cheesecake (with tofu) and Edamame Walnut Salad are given. Ordered from the Council, the book costs $15.00 plus $4 shipping and handling. Color photos show: (1) Linda Funk. (2) The color of the book. (3) A slice of pumpkin cheesecake on a white plate with a silver fork. Address: Executive Director, The Soyfoods Council.

12676. Lanki, Colleen; Tsuneda, Keiko; Sadakari, Lei. 2004. Moral: A play by Kisaragi Koharu. *Asian Theatre Journal* (*ATJ*) 21(2):119-76. Autumn. See p. 174.
• ***Summary:*** This is a long translation and review of the play *Moral.* Introduction by Colleen Lanki; script translated by Tsuneda Keiko and Colleen Lanki; original director's notes translated by Colleen Lanki and Lei Sadakari. Kisagari Koharu is a Tokyo woman playwright.

In the "Notes" section at the end of the translation, note 14 (p. 174) states: *"Inari-zushi* is a small ball of rice covered by *aburage,* a thin fried tofu skin soaked in a sweet vinegar sauce."

Note: This is the earliest document seen (April 2013) that contains the term "thin fried tofu skin."

12677. Burlison, Susan. 2004. Recollections of W.L. Burlison, her grandfather (Interview). *SoyaScan Notes.* Dec. 7. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** This interview was preceded by an e-mail after Susan read an unpublished book chapter titled "History of Soybeans in Illinois," by Shurtleff and Aoyagi on *The Soy Daily* website. She sent the URL to W.L. Burlison's grandchildren, great-grandchildren, and a great-great nephew. She attached a photo of her grandfather in 1936 eating a piece of soybean cake, from the University of Illinois Archives.

A soybean variety was named after W.L. Burlison. According to Cecil D. Nickell, who retired in 2001 from the University of Illinois: "Burlison was developed in our research program at the University of Illinois and released in 1988. Burlison has multiple race resistance to phytophthora rot and higher seed protein [content] (3.2% higher) can conventional soybean varieties. Therefore, Burlison is being used in the tofu market in Japan. Susan has very warm memories of her grandfather; she was about ten years old when he died. His wife, Flossie Bell Lewis, was a strong woman, but not as warm as W.L. Susan is aware of two things that were on the wall of W.L.'s office: (1) A framed saying: "There is no limit to what you can accomplish as long as you don't care who gets the credit." (2) A picture of Christ.

Susan's father was a man who treated everyone equally, regardless of their race, social class, ethnicity, religion, etc. She imagines that he learned this from his parents.

Susan is a vegetarian, the only one in the family. She has some of his published documents, and quite a few photographs of him. Her cousin, Michael Burlison, is very active in researching the Burlison family genealogy. W.L. appears in a mural in the new ACES Library at the

© Copyright Soyinfo Center 2013

University of Illinois. There is a Burlison Street in Urbana–4 blocks long. W.L. lived in a house on Michigan Ave., where her father grew up. There is an annual grant in his name from the Illinois Crop Improvement Association. Only one of W.L.'s children is living–Ruth, who is advanced in years. Five of his grandchildren are living, including Susan and her sister. Susan has a son, age 31. An uncle, Dr. Lawrence Hannah, has lots of information on W.L.; Susan will contact him. W.L. was buried in Urbana.

Susan is very interested in helping Soyfoods Center to compile a more complete biography of her grandfather; she will send a packet of information within the next few weeks. Address: Desired data & design, Inc., 1425 Broadway, Suite 7, Burlingame, California 94010. Phone: 650-344-5165.

12678. Tofutown.com. 2004. Home page and all four links (Website printout–complete). www.tofutown.com Printed Dec. 14.

• ***Summary:*** Across the bottom of the home page are four numbers, which are links to "Our brand sites." When you click each one, a small box of information at the far right side of the screen pops up. They are: (1) Viana purely vegetarian specialties (in German). (2) Same as #1 but in English. (3) Veggie Life meat alternatives (in German). (4) Listen to your heart (in German).

When Soyfoods Center tried to print each page, the right side (1 cm) was cut off. Although each page contained very little information, two pages printed where one would have been more than enough. Poor website design. Address: Wiesbaum, Germany.

12679. Kuzmic, Vlatka. 2004. Update on Annapurna's work with tofu and seitan in Croatia (Interview). *SoyaScan Notes.* Dec. 16. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** In Dec. 2001 their company, Annapurna, moved in Zagreb from Zumberacka 36 to Nehajska 42, and into a larger plant (100 square meters; formerly 40 square meters). Then in January 2004 they moved again from Nehajska 42, Zagreb, to their present address Klanjec 30a, 1047 Rakitje-Bestovje–about 20 km west of Zagreb. However they kept their shop at Nehajska 42 as a 2nd shop.

Last year they purchased a Takai tofu system and as soon as it arrived, the demand for tofu started to grow dramatically. This year's sales were about 50% higher than last year's. They make tofu only two days a week, so they have plenty of room for growth.

Their tofu and other products are very high in price compared with meat and other typical foods. Their main customers are vegetarians, affluent people, and sick people (such as those with heart disease).

They now have their products in a few supermarkets. However meat and Coca-Cola account for 90% of the sales in supermarkets; they are lucky if they sell 5 cakes of tofu a day. Yet they have gotten a toehold early. They were the third tofu maker in Croatia; now there are six.

Update: Letter (e-mail) from Vlatka. 2006. July 11. Most of their okara they throw away for use as pig feed. In May 2006 they bought a new vacuum packaging machine from Multivac; it can pack with inert gas in 3 bags at the same time. Address: Klanjec 30a, Rakitje, 10437 Bestovje, Croatia. Phone: +385 1-3639-092.

12680. *SoyaScan Notes.* 2004. Chronology of major soy-related events and trends during 2004 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• ***Summary:*** Jan/Feb.–Biodiesel magazine starts publication in the USA. Feb. The excellent European periodical *Soyafoods,* edited by Heather Paine of England, changes its title to Soy & Health, when the American Soybean Association stopped funding. Past and current issues can be downloaded from the Soy Conference website www.soyconference.com.

April–Yamasa Corporation purchases San-J International (Richmond, Virginia).

April–Pulmuone U.S.A. makes a significant financial investment in Wildwood Harvest Foods, Inc. In July the two companies announce their merger. Both tofu companies are based in California.

April–The Food and Drug Administration (FDA) confirms that it is in the process of reviewing a petition for a health claim that suggests the consumption of soy protein-based foods may reduce the risk of certain types of cancer, including breast, prostate, and colon cancer. The Solae Company submitted the petition.

June–"The Whole Soy Story: The Dark Side of America's Favorite Health Food," an article by Kaayla T. Daniel is published in *Mothering* magazine. Her unbalanced approach is to collect, often misinterpret, and publish in one place all the negative information she can find about soy.

July 20–Wildwood Natural Foods, Inc. and Pulmuone U.S.A. announce their merger.

July–Soyfoods Center "publishes" on its Internet website (www.soyfoodscenter.com) the entire (previously unpublished) manuscript of its book *History of Soybeans and Soyfoods,* by William Shurtleff & Akiko Aoyagi (2,500 pages). It is now available worldwide for all to use free of charge. Research and writing of this book began in Oct. 1980.

Nov. 10–USDA's Animal and Plant Health Inspection Service [APHIS] confirms the presence of soybean rust on soybean leaf samples taken from two plots associated with a Louisiana State University research farm.

World Wildlife Fund establishes the Roundtable on Responsible Soy to address the impacts of soy production [as on the Amazon rainforest] and identify solutions.

Trends: (1) The low-carb diet continues its popularity and upward trend in the USA. Soy protein is being used to

© Copyright Soyinfo Center 2013

replace carbohydrates is a wide array of products from taco chips to bread, from healthy soft drinks (Snapple-A-Day) to vegetable juice (V8 Splash Smoothies). Consumption of meat, which is also low in carbohydrates, is now coming back into popularity. Few, if any, nutritionists, think that low-carb diets are healthful. (2) The anti-soy faction continues to have an active and one-sided web presence–an an negative effect on the growing interest in soyfoods. Leaders are Sally Fallon, Kaayla T. Daniel, Richard and Valerie James, and others. (3) Ten million more people were hungry in 2004 than in 2003, according to Bread for the World Institute's 2004 Hunger Report. At the same time the World Food Program announced that food aid has decreased every year since 1999. Hunger is a growing issue. Hunger and poverty are inextricably linked; if there are no resources, there is no food.

12681. **Product Name:** Spicy Braised Tofu, Kung Pao Tofu Salad, Spicy Yuba Strips.
Manufacturer's Name: Basic Soy Beanery (renamed Hodo Soy Beanery in Sept. 2005).
Manufacturer's Address: 1600 S. De Anza Blvd., San Jose, CA 95106. Phone: 408-517-8958.
Date of Introduction: 2004. December.
Ingredients: See below.
Wt/Vol., Packaging, Price: -
How Stored: Refrigerated.
New Product–Documentation: Labels by brought to Soyinfo Center by Minh Tsai on 2009. Sept. 16. Ingredients:

Spicy Braised Tofu: Soybeans, water, calcium sulfate, star anise, teriyaki sauce, vinegar, chili oil.

Kung Pao Tofu Salad: Soybeans, water, calcium sulfate, soy sauce, tea infusion (loaf is smoked over tea leaves), teriyaki sauce, chili oil, vinegar, peanut, cilantro.

Spicy Yuba Strips: Soybeans water, soy sauce, sugar, soybean oil, teriyaki sauce, vinegar, chili oil.

12682. GEM Cultures. 2004. Catalog [Mail order]. 30301 Sherwood Rd., Fort Bragg, CA 95437-4127. 10 p. Undated. [4 ref]
• ***Summary:*** Contents: Greetings from Northern California. Soycrafters section: Powdered tempeh starter, natto starter, koji starters, fresh koji, seed miso, tofu boxes [kit], coagulants. Bread and crepe cultures: Cultured crepes, cool rise natural leaven, rice or rye sourdough. Dairy cultures: Fil mjolk (subs for piima), viili, kefir. Tea fungus–kombucha. Kitchen items: cheesecloth, super sealers. Ordering information. Address: Fort Bragg, California. Phone: 707-964-2922.

12683. Iowa Soybean Promotion Board. 2004. Simply soy: Recipes celebrating nature's perfect bean. Urbandale, Iowa: Iowa Soybean Promotion Board. 151 p. Illust. Index. 23 cm.
• ***Summary:*** A gorgeous book, filled with elegant, mouth-watering full-page color photos of prepared recipes. Contents: Introduction, by Linda Funk, Executive Director, The Soyfoods Council. 1. The magical bean: Soy to the world, soy and health, the soyfoods pantry (glossary incl. soybean oil, soymilk, tofu, tempeh, edamame, soynuts, soy flour, textured soy protein, canned soybeans, miso, soy protein powder {soy protein isolates}, dried soy flakes {MicroSoy}, soy yogurt and smoothies, soy pasta {ADM}). Soyfood nutrient chart. 2. Start it up with soy: Appetizers and nibbles. 3. On the sidelines: Sides and salads. 4. Spoon fed: Comforting soups and stews. 5. Vegetarian anyone? 6. Teamwork: Pork, beef, chicken, seafood and soy. 7. The bread box: Breads and muffins. 8. Desserts: Soy and spice and everything nice. 9. Cooking with kids. Resources (Directory of members of The Soyfoods Council and their soy products; Directory of state and national soybean boards).

A smoothie (p. 133) is made at home by combining 1 cup soymilk (plain or vanilla), ½ medium banana (may be frozen, if desired), and optional nondairy ingredients, such as chocolate syrup, peanut butter, fruit juice concentrate, or frozen fruits (alone or in combinations–pineapple, orange, cranberry, raspberry, etc.). "Many of the soy smoothies and soy yogurts on the market today are probiotic, meaning they contain active, live cultures that are beneficial to intestinal health." Address: 4554 N.W. 114th Street, Urbandale, Iowa 50322-5410. Phone: 866-431-9814.

12684. **Product Name:** Vegan Gourmet Cheese Alternative [Nacho].
Manufacturer's Name: Follow Your Heart (Product Developer-Distributor). Made in Canoga Park by Earth Island.
Manufacturer's Address: Canoga Park, CA 91304. Phone: 818-348-3240.
Date of Introduction: 2004.
Ingredients: Filtered water, expeller-pressed canola oil, jalapeño peppers, soy protein, tofu (soybeans, calcium sulfate), inulin (a natural extract of chicory), pimiento, spices, agar agar, sea salt, carrageenan, brewer's yeast, calcium lactate (vegan), lactic acid (vegan), annatto.
Wt/Vol., Packaging, Price: 10 oz vacuum pack.
How Stored: Refrigerated.
New Product–Documentation: Product with Label brought by Bernd Drosihn. 2004. March 15. Purple, orange, black, white, black, and red on blue and white cloudy sky. 3 inches square front and back. "Dairy free. All natural. It melts." Logo: Non-GMO. Note: This vegan cheese alternative contains no casein. When the various gelling agents (agar, carrageenan) are heated, they melt–sort of.

12685. Kao, T.H.; Lu, Y.F.; Hsieh, H.C.; Chen, B.H. 2004. Stability of isoflavone glucosides during processing of soymilk and tofu. *Food Research International* 37:891-900.

12686. Abrams, Maribeth; Lewis, Carl. 2004. Tofu 1-2-3 (DVD): Taking the mystery out of the "big white blob." Glastonbury, Connecticut: Delicious Adventures LLC. 48 minutes. [2 ref]
• ***Summary:*** "Adding tofu to your diet has never been easier! It's easy to make scrumptious dishes using tofu–if you know how! With great enthusiasm, Maribeth of Delicious Adventures leads you through recipes so easy and tempting that you'll be whipping up new favorites right away. Kid-tested, Family-approved. All recipes are free of cholesterol, dairy, eggs, wheat, gluten and nuts."

"Includes 17 minutes of bonus footage in which Carl Lewis talks about his new career, his family, and his Olympic Games experience.

Note: This is the earliest document seen (May 2006) in DVD format related to soy. Address: 52 Lenti Terrace, Glastonbury, Connecticut 06033.

12687. Atlas, Nava. 2004. The vegetarian family cookbook. New York, NY: Broadway Books. 339 p. Illust. Index. 23 x 21 cm. [15 ref]
• ***Summary:*** Contains 275 vegetarian recipes, many of which are vegan; a vegan option is provided for almost all of the recipes that are vegetarian.

The index contains 47 entries for tofu (incl. silken, soft, firm, extra firm), 13 for seitan, 4 each for tempeh, soy mayonnaise, and soy milk, 3 for soy yogurt, 2 each for edamame and miso, 2 each for soy nut butter, soy allergy, soy products, and 1 each for soy Canadian bacon, soy cheese, soy cream cheese, soy hot dogs, and soy pasta.

About the author: Nava Atlas is the author of eight previous vegetarian cookbooks. Her website, www.vegankitchen.com, is one of the most widely visited culinary websites on the Internet. She lives in the Hudson Valley with her husband of 25 years (Chaim "Rocky" Tabak) and their two sons, Adam and Evan. A photo (p. 339) shows Nava Atlas. Address: Author and illustrator, New Paltz, New York.

12688. Broihier, Kitty; Mayone, Kimberly. 2004. The everyday low-carb slow-cooker cookbook: over 120 delicious low-carb recipes that cook themselves. Da Capo Press / Lifelong Books. A member of the Perseus Books Group. xv + 224 p. Index. 23 cm.
• ***Summary:*** Soy related recipes. Miso-rubbed salmon (p. 133). Miso soup with tofu and scallions (p. 142). Crunchy toppings (incl. "Soy nut topping–7-ounce bag roasted, salted soy nuts," p. 181. The Soy Nut Topping is also great on salads). Sesame-soy dressing for green vegetables (p. 185. This dressing is "also great over pan-fried tofu").

Soy sauce is in ingredient in many recipes. Address: 1. M.S., R.D., president of NutriComm, a food and nutrition communications consulting corp.; 2. Owner of Wow Delicious, a recipe development company.

12689. Elliot, Rose. 2004. New vegetarian cooking: 120 fast, fresh, and fabulous recipes. New York, London, Toronto, Sydney: Simon & Schuster. 192 p. Illust. (color). 28 cm. Index.
• ***Summary:*** Contains many full-page color photos, mostly of dishes prepared from recipes. Chapter 1: Why I'm a vegetarian: Being a healthy vegetarian or vegan, get slim and stay slim, eating for two, nurturing the next generation, look younger, live longer. Chapter 6 is titled "Tofu, tempeh, and seitan" (p. 138-61). Other soy-related recipes and info include: Soy milk (p. 13, 20, 21, 23, 188). Green soybeans [frozen edamame] (with soba, p. 60, 61). Tofu mayonnaise (p. 66). Breakfast smoothie (p. 118, with soy milk, rice milk, or almond milk). Soy yogurt (p. 119, 188). Soy sauce (p. 153, 188). Soy creamer (p. 169, 188). Also discusses: Sea vegetables (arame, hijiki). Quinoa.

12690. Fu, Peimei. 2004. Peimei shi dan: Yong yuan da shi dian shi shi pu. 1 [Pei Mei's T.V. program cook book. Vol. I]. Taipei, Taiwan: Ju zi wen hua shi ye you xian gong si. 119 p. Illust. (color). 22 cm. [Chi]
• ***Summary:*** On the title page, the title of this book is given in both Chinese and English. The rest of the book is entirely in Chinese. At the beginning is a glossary, with 3 large numbered color photos of ingredients and the numbered name of each ingredient below the photo. On the right hand page of every 2-page spread are (typically) 5 recipes. On the left hand page is a color photo of showing the 5 finished dishes, each served on a plate, bowl etc.

Recipes call for the various soy related ingredients, including soy sauce, deep-fried tofu, fermented black soybeans, tofu, etc. Address: Cooking teacher, Taipei, Taiwan.

12691. Grimaldi, Polly. 2004. Quick and easy soy and tofu recipes. Hayward, California: Bristol Publishing Enterprises. (A Nitty Gritty book). iv + 155 p. Illust. Index. 14 x 21 cm.
• ***Summary:*** Contents: 1. An introduction to tofu and soy. 2. Breakfast. 3. Entrees. 4. Side dishes. 5. Salads. 6. Soups. 7. Sauces, spreads, dips and snacks. 8. Breads. 9. Drinks. 10. Desserts. Address: Hayward, California.

12692. Iacobbo, Karen; Iacobbo, Michael. 2004. Vegetarian America: A history. Westport, Connecticut, and London: Praeger Publishers. xvi + 267 p. Illust. Index. 25 cm. [447 ref]
• ***Summary:*** An excellent history of the vegetarian movement in the United States from the late 1700s to the present–extremely well researched, well documented, and original. There have been three major waves of interest in vegetarianism, each beginning about 70 years apart. The first was in the 1830s and 1840s, and included Sylvester Graham

© Copyright Soyinfo Center 2013

and William Alcott. The second was from about 1900 to 1930. And the third and current period began in about 1970.

Contents: 1. Seeds are sown: Native Americans, Benjamin Franklin, Johann Conrad Biessel (1691-1768; founded Seventh-Day Baptists, Ephrata Cloister in Pennsylvania), vegetarian Dunkers, William Dorrell and The Dorrellites (Leyden, Vermont), John Wollman (Quaker) and his journal, Herman Daggett, L. Du Pre, Johnny Appleseed (John Chapman, follower of teachings of 18th century Christian mystic and vegetarian Emmanuel Swedenborg), Joshua Evans. 2. Abstinence from fleshfoods: Christian vegetarians, and the English connection: Percy Bysshe Shelley, George Nicholson, Joseph Ritson, Rev. William Cowherd and the Bible Christian Church of Salford, William Metcalfe comes to the Philadelphia 1817 and establishes the Bible-Christian Church.

3. Sylvester Graham, Grahamism, and the Grahamites: Cholera epidemic, Graham's preventive medicine, why vegetarian?, Jacksonian era dining habits, Graham bread, Jacksonian era medicine, Isaac Jennings, Asenath Hatch Nicholson, Dr. John Burdell, Graham in the press, William Andrus Alcott and *The Moral Reformer,* American Physiological Society (APS) in Boston, founded in 1837, Mary Gove Nichols, *The Graham Journal of Health and Longevity,* the vegetable diet, Dr. Luther V. Bell and his prize-winning essay, Dr. Milo L. North, Asa Mahan and Charles Finney of Oberlin College [Ohio], Dr. Reuben Mussey, Grahamites and anti-Grahamites, J.J. Flournoy, abolitionists and transcendentalists, A. Bronson Alcott (father of Louisa May) of Concord, Massachusetts, nonviolence and Thoreau, James Pierrepont Greaves, Ham Common, Alcott House, William Lambe and the Physiological and Health Association, Fruitlands, abolitionist-vegetarians, Orson S. Murray, Horace Greeley and Mary Youngs Cheney (his wife), Graham's teachings on physiology and anatomy, William Metcalfe's book *Bible Testimony on Abstinence from the Flesh of Animals as Food...* (June 1840), Larkin B. Coles.

4. The American Vegetarian Society (AVS, organized in 1850 by William Metcalfe): First convention on 15 May 1850 in New York City, the society's periodical *The American Vegetarian and Health Journal* (Nov. 1850–Oct. 1854), Joel Shew and water cure / hydropathy, John Grimes and the first Vegetarian Festival in New York City (Christmas, 1851), feminism, Anne Denton, Charles Lane, death of Sylvester Graham, Dr. Russell Trall, Graham's legacy, front-page headlines in 1853 at the Vegetarian Festival (guests incl. Trall, Greeley, James Caleb Jackson, Frances Dana Gage, Lucy Stone, Susan B. Anthony, and Emilia Bloomer), New York Vegetarian Society (est. 1852), decline of AVS, Henry Stephen Clubb, Fowler & Wells, *The Water Cure Journal,* Quaker Jeremiah Hacker, Thomas Low Nichols.

5. The water cures, Seventh-day Adventists, and the Civil War: Henry Clubb, Octagon Settlement in Kansas (1856), Dr. James E. Spencer and the Harmonial Vegetarian Society in Arkansas (1857), James Caleb Jackson, Our Home on the Hillside, Dr. Harriet N. Austin, Seventh-day Adventists, Millerites, Ellen G. White, drugless medicine, Dr. Russell Thacher Trall, end of AVS with the death of Wm. Metcalfe.

6. The Civil War to the end of the century: Dr. Mussey, Rev. Henry Ward Beecher, Henry Clubb keeps vegetarianism alive in America (though its lacks a national organization), John Harvey Kellogg, Isaac and Susan Rumford and Joyful News, California, Victoria Woodhull, Clubb founds the Vegetarian Society of America (VSA) in 1886, the VSA cookbook, and its periodical *Food, Home and Garden,* Chicago Vegetarian Society, Rev. A.T. De Learsey, Annie Besant, the New Thought movement, Charles and Myrtle Fillmore found the Unity School of Christianity in Missouri, Ralph Waldo Trine, Chicago World Exposition of 1892 (Illinois), William Axon is secretary of the Vegetarian Federal Union, vegetarian society formed in Washington, DC, vegetarian lectures at the Chicago World Expo, Alice Stockham, Dr. Susana Way Dodds, Dr. Martin Luther Holbrook, *The Herald of Health* magazine (Trall), vegetarianism and Christianity, J. Howard Moore, Lawrence Grunland, Henry Perky and his New Era Cooking School, 1895 gathering of vegetarians to celebrate Thanksgiving at University of Chicago, the animal question and ethical vegetarianism, antivivisection movement.

7. The Progressive Era and the rise of vegetarianism: It followed the Gilded Age and the Victorian Era, women's suffrage and vegetarianism, refrigeration expands food choices, vegetarian foods developed at the Battle Creek Sanitarium and Sanitas Nut Food Co. (Michigan), peanuts and meat substitutes, Dr. John Harvey Kellogg, Lena Francis Cooper, vegetarianism in the media, George Bernard Shaw, Sarah Bernhardt, General William Booth and the Salvation Army, athletes and showmen, Eustace Miles, Karl Mann, walking and cycling, Bernarr Macfadden and his *Physical Culture,* his chain of vegetarian restaurants in New York City, scientific evidence in favor of vegetarianism, M.E. Jaffa, Dabney, E.V. McCollum, Russell H. Chittenden of Yale, Nicola Tesla, Kellogg's *Good Health* magazine, Upton Sinclair and *The Jungle,* passage of the 1906 Pure Food and Drug Act and the Meat Inspection Act, Hereward Carrington, Ernest H. Crosby, glamorous socialite Mrs. Maude R.L. Hammer Sharpe, the Millennium Guild (1912), M.R.L. Freshel, Benedict Lust and naturopathy, Kellogg battles the meat industry, the *Vegetarian Magazine.*

8. The Depression to the sixties: The lean years: Eat more meat, the soybean, Jethro Kloss, Henry Ford, World War II, Symon Gould, John Maxwell, Dr. Christopher Gian-Cursio, Herbert Shelton and natural hygiene, Dr. Jesse Mercer Gehman, *Recovery of Culture,* by Henry Bailey Stevens, the American Vegetarian Party found in 1948 by Symon Gould, its first presidential candidate was

John Maxwell, Dr. Mervyn G. Hardinge, H. Jay and Freya Dinshah, American Vegan Society.

7. Peace, love, and vegetarianism: The counterculture of the 1960s and 1970s: Socialites Pageen and Ed Fitzgerald, the California scene, Gypsy Boots, drugless doctor Pietro Rotundi, Los Angeles Vegetarian Society, Bianca Leonardo, Woodstock, Hog Farm commune of New Mexico, Wavy Gravy, Lewis B. Marvin, Lisa Laws, Yogi Bhajan, Golden Temple restaurant, Haight-Ashbury, hippies, The Farm and Stephen Gaskin in Tennessee, the soy dairy, *The Book of Tofu,* by Shurtleff & Aoyagi, Helen & Scott Nearing, *Diet for a Small Planet,* Nellie Shriver and Connie Salamone, *Vegetarian Times,* PETA, Isaac Bashevis Singer, North American Vegetarian Society, the press, William Blanchard and *Vegetarian World,* McGovern Report.

10. Vegetarianism has arrived: Animal rights, popular vegetarian cookbooks, vegetarianism and the environment, John Robbins and *Diet for a New America,* new scientific evidence, Dr. Neal Barnard and PCRM, Suzanne Havala, Howard Lyman, the movies and television, new vegetarian foods, the Internet, the Atkins Diet attack.

Photos show: (1) William Metcalfe. (2) Sylvester Graham (illust.). (3) William Alcott. (4) Front page of *Graham Journal of Health and Longevity* (16 Feb. 1839). (5) Reuben Mussey, M.D. (6) A. Bronson Alcott in top hat and cape. (6) Henry S. Clubb. (7) James Caleb Jackson. (8) Ellen G. White. (9) Russell T. Trall. (10) John Harvey Kellogg, M.D., dressed in white, riding a bicycle. (11) Menu cover of The First Vegetarian Restaurant, Carl Rasmussen, proprietor. (12) Battle Creek Sanitarium. (13) Bernarr MacFadden on the cover of *Physical Culture* magazine (Sept. 1902). (13) Cover of *Good Health* magazine (Aug. 1898). (14) M.R.L. Freshel. (15) Cover of *The Vegetarian Magazine* (July 1924). (16) Constantina "Connie" Salamone. (17) Ingrid Newkirk of PETA. (18) PETA poster "Does your food have a face? Go vegetarian." (19) Neal Barnard, M.D. of PCRM. (20) Suzanne Havala Hobbs. (21) Howard Lyman. (22) VivaVegie's Penelo Pea Pod. (23) Two PETA spokeswomen with signs outside Rhode Island State House. (24) Bruce Friedrich of PETA.

Note: This book has several weak points: (1) The authors repeatedly confuse a vegetarian diet with a "plant-based" (vegan) diet. (2) The history focuses too much on the story of individuals and not enough on the great historical forces by which those individuals are shaped. Address: 1. Journalist, researcher, and Adjunct Prof. of English at Johnson and Wales, Univ., Rhode Island; 2. Journalist who has worked for the Associated Press, the Providence Phoenix, and other publications.

12693. Law, Eugene. 2004. Intercontinental's best of China. Beijing, China: Intercontinental Press. 543 p. Illust. Maps. Index. 22 cm.
• ***Summary:*** This is a guidebook to 53 of China's most popular destinations. Each Chinese word, term or phrase is written in both pinyin (with tones included) and Chinese characters (Cc).

The section on "Shaoxing" discusses Chinese wine, spirits, and food at length. Under "Food and restaurants" (p. 343-44) we read: "Shaoxing's preserved tofu (*shaoxing furu* + 4 Cc) takes tofu and preserves it in Shaoxing wine, giving it a mellow flavor... Shaoxing stinky tofu (*shaoxing youzha choudoufu* + 6 Cc) tastes better than it sounds or smells; it's particularly good deep fried."

12694. Lebow, Susan. 2004. Tofu now: A National Organization for Women cookbook. Washington, DC: National Organization for Women. 74 p. Index. 23 cm.
• ***Summary:*** On the cover: 50 quick, easy, delicious everyday Tofu main dishes, For those who want so tofu in their diet and are not and never want to be vegetarian or gourmet.

Contents: A few things to keep in mind. Types of tofu: extra-firm, firm, regular to firm, soft, silken tofu. Purchasing and storage. Freezing ("Only free regular and firm tofu–never soft or silken"). To thaw ("When a recipe calls for frozen tofu–we put it in the microwave as soon as we get home").

Recipes (the quickest recipes begin each of the following categories): Basic everyday tofu. American. Italian. Asian. Mexican. Soups and stews. Address: NOW, 733 15th Street NW, 2nd Floor, Washington, DC 20005.

12695. Petrovna, Tanya. 2004. The Native Foods Restaurant cookbook. Boston, Massachusetts: Shambhala Publications, Inc. xxiv + 328 p. Foreword by Deborah Madison. Illust. by Stephen Brogdon. Index. 23 x 19 cm.
• ***Summary:*** The author is co-owner of this chain of four restaurant in southern California. All the recipes are vegan. The index contains 22 entries for soy, 18 for tofu, 17 for tempeh, 16 for seitan, 7 for cheese–nondairy, 6 for soybeans, 5 each for edamame and soy cream cheese, 4 each for meat alternatives and miso, 2 each for soy milk, soy protein textured, soy sour cream, and textured soy protein, 1 each for milk–soy and soy sauce.

On the color cover is a fine photo of Tanya holding out a shallow basket of vegetables. Address: Co-owner and head chef, four Native Foods Restaurants in southern California (in Los Angeles, Palm Springs, Desert Springs, and Costa Mesa).

• ***Summary:*** A vegan cookbook, with a substantial section on vegan nutrition. Contains 11 tofu recipes and 1 recipe for tempeh sandwich.

12698. Rubin, Jordan. 2004. The Maker's diet. Lake Mary, Florida: Siloam. xiv + 304 p. Illust. Index. 24 cm. [191 endnotes]
• ***Summary:*** The subtitle (on the cover only): "The 40-day health experience that will change your life forever." Another anti-vegetarian, occasionally anti-soy, pro-meat book. He states that soy is "an inferior protein" and calls vegetarian eating "The Hallelujah Diet." Mr. Rubin claims that phytic acid in soy is toxic, and that only fermented forms of soy are safe. He claims that Asians eat tofu mostly in the form of fermented tofu (a preposterous claim) and that this is the only way to consume it, because the phytic acid is toxic and has to be destroyed in the fermentation process. He attacks vegetarians as well as vegans because of an "anemic history of health."

Note: The author lists his credentials on the book's title page and cover as "N.M.D., Ph.D." According to the website "Quackwatch," his NMD (naturopathic medical doctor) is from the School of Natural Medicine at the Peoples University of the Americas (link), a nonaccredited school with no campus. His Ph.D. is from the Academy of Natural Therapies (link), a nonaccredited correspondence school that the State of Hawaii ordered to close last year (link).

In addition, his CNC (Certified Nutritional Consultant) comes from the American Association of Nutritional Consultants, whose only requirement for a "professional member" status has been payment of a $50 or $60 fee. "The CNC requires passage of a test based mainly on the contents of books that promote nutrition quackery. Rubin's book, 'The Maker's Diet,' is number 14 on the *New York Times* list of hardcover advice books." Address: Palm Beach, Florida.

12699. Sammons, Sandra Wallus. 2004. John and William Bartram: Travelers in early America. Flagler Beach, Florida: Ocean Publishing. xx + 117 p. Illust. Index. 21 cm. [80 endnotes]
• ***Summary:*** This excellent book was written for "young readers" at 8th grade reading level. Contents: Foreword, by Joel T. Fry. Preface. 1. Beginnings in a new land. 2. Growing gardens and friendships. 3. "All in a flame." 4. William, "my little botanist." The King's Botanist. 6. Endings and beginnings. 7. Peace–and a revolution. 8. "Pac Puggy." 9. Safe and sound, 10. *Travels.* 11. A fruitful garden.

12706. Herring, Sandy. 2005. The Solae Branded Products program (Interview). *SoyaScan Notes***.** Jan. 5. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** For a product to become part of the Solae Branded Partners program, the manufacturer must agree to two things: (1) To put the Solae logo (of at least a minimum size) on the product. (2) To include a minimum amount of Solae brand isolated soy protein (ISP) in the product. Usually Solae's advertising program ("Protein in Unexpected Places") promotes some of the Branded Partners' products.

© Copyright Soyinfo Center 2013

The makers of some products that do contain Solae might decide not be part of the Branded Partners program because (for example), the package might be too small to include the logo, the amount of protein that gives the maximum acceptability and profitability might be less than Solae requires.

In the past, many products contained ISP for its functional properties, such as being a good binder or emulsifier. The new program is designed to add value to consumer products by making Solae a "characterizing ingredient" and by advertising that the product contains Solae. Before Solae approaches a potential new customer about "a co-branding opportunity," they do a great deal of consumer research and market research about the concept of a product that contains Solae–its acceptability and how the new product or product concept "would resonate with their consumers." Solae presents their ideas of how the ad might look, the packaging might look, etc.

A media release (faxed by Sandy to Soyfoods Center) lists the following 16 branded products: 8th Continent Soymilk (www.8thcontinent.com), Snapple-A-Day Meal Replacement Beverages (www.snappleaday.com), V8 Splash Smoothies (www.v8juice.com), Gardenburger Meat Alternatives (www.gardenburger.com), Mori-Nu Tofu (www.morinu.com), Yves Veggie Cuisine (www.yvesveggie.com), NuGo Bars (www.nugonutrition.com), DelightFull Meal Replacement & Snack Bars (www.affinta.com), DelightFull Smart Snax (www.delight-full.com), Hormel Health Labs Great Shake & Great Shake Plus (www.hormelhealthlabs.com), Perky's 100% Natural Nutty Grains & Soy Cereal (www.pacgrain.com), Natural Harmony Foods SoyLean (www.soylean.com), So Good Soymilk (available in Canada) (www.so-good.com), Linda McCartney Spicy Peanut Pasta with Vegetarian Chicken (www.linda-mccartney.com), Body Choice Premium High Protein Cookies (www.bodychoicenutrition.com), El Burrito Meat Alternatives (www.elburrito.com).

Note: The Solae Company Logo and Solae* are trademarks or registered trademarks of Solae LLC. Address: The Solae Co., P.O. Box 88940, St. Louis, Missouri 63102. Phone: 314-982-2680.

12707. Moskin, Julia. 2005. Artisanal, creamy, sweet tofu? Fresh bean curd is still misunderstood in America. *New York Times.* Jan. 5. p. F1, F5.

• ***Summary:*** A song of praise to fresh tofu! A new generation of New York City restaurants are serving fresh, natural tofu (often made locally or in-house the same day it is served). That old, unappealing term "coagulated bean curd" "doesn't begin to convey the pleasures of silken tofu–tender mouthfuls of freshly made kinugoshi-dofu (in Japanese), sundubu (Korean), or doufu (Chinese)."

And customers are coming to appreciate "the simple virtues of fresh tofu." Some restaurants known for their tofu (addresses and phone numbers are also given) are: Book Chang Dong, Cho Dang Gol, En Japanese Brasserie, Honmura An, Kasadela, Li Hua, Megu, Seoul Garden, Spicy and Tasty, and Temple.

Tofu is made in much the same way as cheese, except from puréed soybeans instead of cow, sheep, or goat milk as its raw material. "Because of its ability to produce so many different forms of nourishment, the soybean has long been called 'the cow of China,' and tofu was first developed there by Buddhist monks about 2,000 years ago" [doubtful; no citation given].

Chinese names for tofu, that indicate the esteem in which it is held, include "meat without bones" and "meat from the fields."

12708. Daniel, Kaayla. 2005. Anti-soy work and The Whole Nutritionist (Interview). *SoyaScan Notes.* Jan. 16. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Personal history: Kaayla grew up on a farm in the Hudson Valley, New York. Her father died in his 40s of a heart attack; their family consumed quite a bit of margarine. She went to college at the University of Rochester, and somewhere got a master's degree in the humanities. She has a PhD in nutrition from the Union Institute of Cincinnati [Ohio], via distance learning. She designed her own program and Ira Fritz (PhD in nutrition) was her advisor, with a committee of 4 PhDs she chose. She now has two adopted kids and lives in Santa Fe, New Mexico.

Her book will be published by Sally Fallon's company, New Trends, in Washington, DC. Mary Enig was her editor and Prof. Irvin Liener (pronounced LAI-nur) read her manuscript.

I (William Shurtleff) made a mistake in saying that Mary Enig was funded by the dairy industry; Kaayla says she was not.

Coconut oil is a good fat. Lard contains about 50% monounsaturated fats and 40% saturated; see Mary Enig's book *Know Your Fats.* The cholesterol theory of heart disease is unproven: Half of all people who die of heart attacks have normal cholesterol levels. Her favorite soy books are the many published by Soyfoods Center she got via interlibrary loan. *The Simple Soybean,* by Messina, is full of errors.

She is a clinician and she sees people who are eating too much soy and of the wrong types. She advises them to cut back. When she goes to pot-lucks she eats small amounts of tofu. She used to be a vegetarian and a macrobiotic and was never healthy. Now that she has started to eat more fresh goat's milk, eggs, and meat she is much healthier. Her vision of the future: Where people return to traditional farming with goats, chickens, and a non-hybrid cow giving raw milk.

About Sally Fallon: She lives in Washington, DC. One of her big things is her raw milk campaign. She gets raw milk from the Amish. The protein is less denatured. The fats

© Copyright Soyinfo Center 2013

are in good shape. Go to her website Westonaprice.org. See campaign for real milk. Address: PhD, CCN, The Whole Nutritionist, 2162 Candelero St., Santa Fe, New Mexico 87505. Phone: 505-984-2093.

Note: Umenohana is apparently a Japanese-style restaurant.

12711. Pulmuone U.S.A. Inc. 2005. Pulmuone USA Inc. (Website printout–part). www.pulmuone-usa.com Printed Feb. 13.
• ***Summary:*** Contents: Home page. 1. Company. 2. Products. 3. Recipes. 4. Food Library. 5. Community. Atop the home page is the Pulmuone logo and the Soga logo. In large letters below the menu bar: "Welcome to Pulmuone. A plate full of nature." Below that in smaller letters: "Pulmuone brings out the nature to your meals: We at Pulmuone believe in bringing the foods as close to nature's way as possible, instead of making foods. To do so, Pulmuone adheres to the following principles; 1. Use only the very best grade raw materials. 2. Never use any artificial ingredients, flavors such as MSG or preservatives. 3. Maintain immaculate, state-of-the-art manufacturing processes." Below that, under the banner "New products," are color photos of the labels of a new line of Soga products in four flavors: Grilled & Marinated Tofu in Tomato Basil, Santa Fe Chili & Lime, Korean Barbecue, and Ginger Miso. Below that: "Pulmuone donates part of its profit to various environment preservation organizations." A window shows four "Pulmuone downloads: Pulmuone Annual Report 2002, Pulmuone IR, Pulmuone Group IR, Daewoo Security Analyst Report.

Under Company is a "Pulmuone History" (actually chronology). 1981 May–Pulmuone Organic Foods opened to sell organic vegetables from its own farm. 1984 May–Pulmuone Foods Co., Ltd. incorporated. 1984 June–Tofu and Bean Sprout Plant: Yangju, east of Seoul. 1986 Nov. Mineral spring water plant: Chungju, South of Seoul. 1987 May–Pulmuone Kimchi Museum, Seoul. 1988 Dec.–Natural House opened (Natural retail chain): Korea. 1989 Jan.–Pulmuone Food Standards Committee (Establish standards for food formula, ingredients and manufacturing process): Korea.

1990 Jan.–Soybean paste plant [jang] opened in Doan, south of Seoul. 1991 Jan.–Pulmuone U.S.A. Inc. founded. 1991 June–Fresh noodle plant: Chuncheon, northeast of Seoul. 1993 Aug.–Ilsongjung Foods Ltd., Korean-Chinese joint venture: China. 1995 June–Tofu Plant #1: South Gate, California, USA. 1995 Sept.–ISO 9002 certificate obtained. 1995 Oct. IPO at KASEC. 2002 March–Tofu Plant #2: Tappan, New York, USA. 2002 Oct.–Soga Soy Foods Center (Research & development of soy foods). 2003 Aug. Tofu Plant #3: Fullerton, California, USA. A photo shows Pulmuone's headquarters in Fullerton, California. Caption: Pulmuone was founded in 1981 with 40 employees. It has grown to become a multinational company of 2,000 employees with annual sales of $450 [sic] million. "The secret to success lies in uncompromising commitment to better foods and better life." Address: 4567 Firestone Blvd., South Gate, California.

12712. Ridenour, Jeremiah. 2005. Pulmuone first invests in Wildwood Natural Foods in April 2004 (Interview). *SoyaScan Notes.* Feb. 13. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Jeremiah met Tom Lacina and his partner / brother-in-law one day when they showed up at the Wildwood plant in Santa Cruz. Jeremiah took them on a tour of the plant, then they went out to lunch. Tom was one of those rare people who was both an attorney and a farmer. He owned a farm and had built a small tofu shop on his land. He was selling about $50,000/year worth of soy products at the most. They said they were struggling in Iowa trying to make their tofu plant work, and they were losing tons of money. Somebody (Shurtleff) told Lacina that if he wanted to be successful, he should model his company after Wildwood. After visiting Wildwood, they visited San Diego Soy Dairy and Luke Lukoskie. He then called Jeremiah and said that if he was ever in the Midwest, he was welcome to stop by for a visit. On a trip to the East, Jeremiah stopped in to see Tom, who introduced him to venture capitalists (VCs) in Des Moines who scouted for companies potentially suited for Iowa state money. The VCs grilled Jeremiah about his business. To get money from the state of Iowa, a company had to have more than $5 million/year in sales. Jeremiah

© Copyright Soyinfo Center 2013

really liked Tom and the Soy Sisters (Tom's wife and sister). Wildwood had run out of capacity, working around the clock 7 days a week, so it was "grow or else." Wildwood and Midwest Harvest Corp. (Tom's company) ended up merging, becoming an Iowa corporation and getting money from the state of Iowa for job creation in Iowa and value-added products made in Iowa from Iowa farm crops. A certain percentage of that money had to be spent in Iowa, but Jeremiah was able to get enough to buy a used meat-packing plant in Watsonville, about 25 miles southeast of Santa Cruz. First the new corporation bought 10 acres of land in Grinnell, Iowa, 1½ miles down the road from Tom Lacina's farm and in 2001 built a state-of-the art plant (22,000 square feet) where only soymilk and cultured foods (such as soy yogurt) were made–the only such plant in the USA. Jeremiah has long had a strong commitment to organic farming and the use of organic ingredients wherever possible in his products. On his 320-acre farm, Tom Lacina grows some of the organic soybeans that Wildwood makes into cultured soyfoods in Iowa. This is the type of vertical integration that Jeremiah had long sought. Jeremiah used to contract with various organic farmers, but he gradually found problems keeping the protein levels of his two select varieties high enough and ensuring the cleanliness of the soybeans he wanted. So 5-6 years ago he started to buy his soybeans through a broker, and giving very clear specifications–such as at least 43% protein in the soybeans to be used in making tofu. That system has proven to be much better.

While building his first factory in Iowa, Jeremiah bought an old meat-packing plant in Watsonville, California and began to renovate it for food processing. Building two plants at once turned out to be a big mistake. The usual cost overruns occurred. After building plans had been approved by the inspectors and the meat-packing plant renovation was almost finished, inspectors came back in and said that about $1 million worth of earthquake retrofitting would have to be done. Jeremiah did the work and finished the plant. But now he needed the last million dollars of marketing money that he had been promised by Iowa. But Iowa refused to pay that money, arguing that it would take more than that amount for the company to reach the break-even point. What Wildwood couldn't see, was that politics was at work behind the scenes; Iowa wanted to get out. The money guys told Jeremiah he would have to find a strategic partner. Jeremiah suddenly found himself short of cash and in a financial crisis.

So he made a short list of potential partners who might invest money. House Foods America Corporation (Los Angeles) showed some interest then backed off. Jeremiah had first met Pulmuone in the spring of 2003 at the Natural Products Expo West in Anaheim; their booths happened to be across the aisle from one another. They had a smoothie product and Wildwood had introduced a smoothie the year before; Jeremiah thought that Pulmuone's wasn't very good. Some people from the Pulmuone booth came over to visit. They said that their CEO was coming from Korea and invited Jeremiah to meet him. But for some reason it never happened. So Jeremiah never thought of putting Pulmuone on his short list of potential partners.

Meanwhile, the Iowa cultured products plant was not doing well. "This discipline required to make cultured soyfoods is like that in an operating room." Jeremiah's basic concept was to make these cultured soy products probiotic, which would give them functional value. At his first meeting with the employees he asked how many people had heard of "probiotics," Nobody. Woops. How many had heard of "antibiotic." Everybody. He knew from that moment he would have marketing problems. Jeremiah and a PhD in microbiology had traveled to the plant, established the sanitation protocols, and trained the workers. But soon after he left, the quality control problems returned. Tom Lacina was more interested in having the paperwork done well than in enforcing the sanitation rules. This led to a loss of business and of money.

There was another factor. Jeremiah has come to believe that many, if not most, Midwesterners see anyone from California as a hippie. Hippies don't know how to run businesses and don't understand most Midwesterners. At one point the VCs put their foot down and told Jeremiah, "Too much travel. We don't want you to come here anymore." At that point things got out of control.

Stonyfield Farms was planning to have their soy yogurt made at Wildwood's Iowa plant–a huge potential account. But the people in Iowa could not produce the quality that was required. They missed a huge opportunity to make the Iowa plant successful. Jeremiah's wishes he had waited until the Iowa plant was making good quality products before bringing in Stonyfield.

Today, the Iowa plant is doing very well in every way; sales grew 400% last year. Pulmuone sent their R&D experts there and turned things around in short order. (8) In April 2004 Wildwood sold a controlling interest to Pulmuone. It was a matter of economic survival. So Wildwood has become an international company, with Korean partners. To celebrate the deal, Jeremiah went on a tour of Pulmuone's facilities in Korea. (9) Origins of Pulmuone in 1955 in Korea as a Christian Farming Cooperative. Their mission is "Love Thy Neighbor" and they are deeply committed to pure foods, organic agriculture, and no artificial ingredients. The saintly Mr. Won. Alex Nam went to college with Mr. Won's son. Pulmuone now has 12 organic food products.

In the early days, the Soyfoods Association was unable to attract any Asian soyfoods companies. Today both Asian companies, huge American food processors (Kellogg, ADM, DuPont, Kraft), and even state soybean boards are members. Address: 412 E. Riverside Drive., Watsonville, California 95076.

12713. Wildwood Natural Foods. 2005. Wildwood Natural

© Copyright Soyinfo Center 2013

Foods (Website printout–part). www.wildwoodnaturalfoods.com Printed Feb. 13.

• ***Summary:*** Contents: Home page. 1. Our products. 2. Wildly healthy! 3. About Wildwood. Atop the home page is a new Wildwood logo: "Organic since 1978." "Our mission is to nourish health & well being through supporting dietary & agricultural change." "Founded in 1978 on the edge of Marin County's wild watershed, Wildwood Natural Foods' first goal was to provide fresh vegetarian food to local communities. Today, Wildwood is famous for producing the best tasting, freshest organic tofu, vegetarian products, and soy milk you can buy. Ask a tofu eater which tofu is best. We're confident that they will say 'Wildwood!' because we've heard that response for over 2 decades.

"In shepherding the products from the farmers' fields to your table, we've discovered a variety of non-GMO higher-protein low-fat soybeans. We contract directly with organic family farmers to grow these beans. Wildwood further ensures the freshness of our products by delivering to your store several times per week. Our commitment is to your health and well-being, while emphasizing great taste, because our reputation is in your next bite."

2. About Wildwood. One page gives 5 Wildwood locations (addresses but no phone numbers or e-mails). Another gives a ½-page company history, starting in 1978. "2001–Focusing on unique products that nourish the body & protect the environment, Wildwood builds two new state-of-the-art certified organic plants–one in Watsonville, California, and one in Grinnell, Iowa. Under Tom Lacina's guidance, the Iowa plant becomes the first dedicated cultured soy plant in the US.

"2004–Wildwood teams up with Pulmuone, a respected leader and innovator in the organic and soy food industry. A fourth team member, Paul Kang, joins Billy, Jeremiah & Tom to continue the wildwood mission born over 25 years earlier; to bring Wildwood's wildly delicious and healthful products to every table in America." Address: 412 E. Riverside Dr., Watsonville, California 95076.

12714. Bernard, Richard L. 2005. New garden-type soybean varieties. Urbana, Illinois. 2 p. Unpublished typescript. Feb. 28 cm.

• ***Summary:*** "Because of their high nutritional value and health benefits there has been considerable recent interest in soyfoods. Most of this attention has focused on soybean products such as tofu, soy milk, soy-protein fortified flour, or meat analogs constructed from extracted soy protein, and it is not generally recognized that soybeans are an excellent vegetable and may be eaten directly much as other beans or peas. The mature dried soybean may be used just as other beans except that to avoid rancidity they should not be pre-soaked but put directly into boiling water for about 40 minutes at which point they are ready to eat. Probably the best way to use vegetable soybeans is to pick the immature pods (after the seeds have reached full size but before any yellowing begins) and boil them for only 4 to 5 minutes (in lightly salted water if your taste prefers) after which the seeds may be easily squeezed out (the shells are inedible) and eaten as a 'finger food' or added to soups, salads, fried rice, or other dishes of your choice. They taste good cold or hot, and the attractive bright green color enhances the appearance of the food. After cooking they may be frozen in or out of the pod for later or out-of-season use. The advantage of eating the immature seeds over the ripe seeds besides the better taste and appearance and much shorter cooking time is that they are more digestible since the complex carbohydrates (oligosaccharides) of the mature seeds have not yet formed.

"While all soybeans are edible, certain soybean varieties with larger seeds and milder taste have been developed for human food usages especially in Japan and Korea. These Asian food varieties have desirable seed traits but are not well adapted to our climate, insects, and diseases. US soybean breeders have crossed some of these large-seeded Asian varieties with adapted US grain varieties and developed some better adapted vegetable types. At the University of Illinois we have made selections from hybrid populations involving these large-seeded soybeans and now have a number of promising vegetable-type lines adapted to Illinois. Thirteen varieties have been released, named with the prefix Gardensoy, ranging from early maturing (maturity group 0) to late (group IV). They have seeds from about 50% larger to twice as large as the common grain types grown in Illinois but yield only about 80 to 60% as well and therefore are not competitive for production for processing.

Any one variety will have an optimum harvest period for green pods of just a few days since all the pods on a soybean plant tend to develop together. The advantage of growing several varieties with different maturity dates is a longer time of harvest. This may also be accomplished by having several planting dates (estimate 3 days delay in planting for one day delay in harvest but this will vary widely). Like all soybeans these varieties are self-pollinating and true-breeding, and therefore you may let a few plants ripen without picking and use these seeds for next year's planting.

"Because of their bigger seed size and better taste the Gardensoy varieties are being offered to home gardeners for small scale production and hand harvest. As harvest machinery and techniques are developed larger scale commercial production may become practical. We will provide 30 to 50-seed packets of these varieties (free of charge) to anyone wishing to try them.

"The table below provides some data based on tests at Urbana in 2000 to 2004 on average yield of ripe seeds, mature seed size (centigrams per seed), date of maturity (plus maturity group), stem type, plant height, and mature seed composition (protein and oil).

"We will be interested in any taste preference,

12715. Harwell, Sophia. 2005. Producer profile: Island Spring Tofu, Vashon Island, Washington. *Sound Consumer* (*PCC, Puget Consumer Cooperative*). Feb.
• ***Summary:*** In late 1975 Luke Lukoskie took his belongings from the Montlake neighborhood commune where he had been living, and moved to Vashon Island, Washington.

In Nov. 1976 Island Spring Inc. started as a collaborative effort between Lukoskie and a friend, Sylvia Nogaki. The first Island Spring tofu was made in 14 by 14 foot utility shed on Nogaki's piece of Vashon land. "Ten days after opening, Nogaki pulled out and Lukoskie continued alone. It wasn't an easy start."

But the small tofu-making company filled a significant void for consumers in the Northwest. It soon became a success. Lukoskie, who had been following a macrobiotic diet for more than 6 years, knew how hard it was to find protein-rich tofu in Seattle–especially tofu produced organically.

As a board member of the PCC, he also realized that demand for quality natural foods was growing explosively.

In 1976 Lukoskie read *The Book of Tofu* by William Shurtleff and Akiko Aoyagi. "'I looked everywhere for an idea of how best to contribute to the world,' Lukoskie said. 'It wasn't until the idea of tofu that I knew what I would invest my life in.'"

As the company's sole employee, "Lukoskie began each workday at 11 p.m. and worked through the night, finally finishing at 5 a.m. 'It was hell,' Lukoskie said. 'You have to be crazy passionate to make your own business work.'"

In 1986 a fire destroyed Island Spring's first tofu factory. "Lukoskie purchased another plot of land and put his tofu production staff to work as carpenters. In a mere 58 days, they built a new 4,000 square foot plant, where Island Spring is housed today."

Presently, 28 years later, the company has 18 employees and makes up to 1 million pounds of tofu a year. Sales are just under $1 annually. Lukoskie, age 58, believes strongly in the healthfulness and goodness of his tofu.

12716. Morinaga Nutritional Foods, Inc. 2005. Changing tofu attitudes. One chocolatey slice at a time (Ad). *Vegetarian Times.* Feb. p. 15.
• ***Summary:*** A full-page color ad. Below the title is a large color photo of a slice of "Chocolate Dream Dessert." Below the photo is the recipe which calls for "2 pkgs. Mori-Nu Silken Lite Extra Firm Tofu." "Mmmm, Chocolate Dream Pie. Quick and easy, cholesterol-free, guilt free. Made rich and creamy with Mori-Nu Silken Tofu... This slice of heaven will change your attitude about heaven." Across the bottom of the ad are photos of each of six types of Mori-Nu Silken Tofu. Address: 2441 W. 205th St., Suite C-102, Torrance, CA 90501.

12717. Pueppke, Steven. 2005. From the director's desk. *NSRL Bulletin* (*National Soybean Research Laboratory, Urbana, Illinois*) 12(1):7. Feb.
• ***Summary:*** Pueppke likes to put plenty of soy milk on his granola. And he loves edamame served in the pods, unshelled. He likes tofu too, all kinds, but especially the textured kind that can be fried and served under a dollop of sauce.

"Through the Illinois Center for Soy Foods, we at NSRL continue to explore the potential of our growers in Illinois to take better advantage of what some think is a real trend–healthy, good-tasty soy in human nutrition." A portrait photo shows Pueppke. Address: Director, NSRL, Univ. of Illinois, Urbana.

12718. Lloyd, Paula. 2005. Tofu tradition: Fujie Robesky makes her tofu in old-fashioned small batches. *Bee* (*Fresno, California*). March 4.
• ***Summary:*** Fujie, age 65, makes 360 lb of fresh nigari tofu one day a week (Wednesday). Because she has a degree in microbiology, she is able to extend the tofu's shelf life–naturally. She sells her fresh tofu at Central Fish Co. (at G and Kern streets) and at R-N Market (at Herndon and Cedar avenues).

Robesky estimates that the company she bought in 1994 (then known as Fresno Tofu Co.) began in 1900, making tofu for Chinese and Japanese immigrants in Fresno's Chinatown. "It was apparently one of the oldest tofu manufacturers in California."

When she bought it in 1994, the factory was at E Street and Fagin Aley in Chinatown, But Robesky (and her husband Bob) moved it to a bigger brick building (that once housed a Japanese laundry) a few blocks away, at F and Mono streets.

12719. Johnson, Kimberly S.; Arellano, Kristi. 2005. White Wave founder departs: Tofu visionary plans to travel, may start a new company upon his return. *Denver Post* (*Colorado*). March 15. p. 1C, 4C.

100% from southwest France. On the back: Since 1998 Soy has created the first line of products in Europe guaranteed to be not genetically engineered. For recipes and more visit www.soy.fr.

Letter (e-mail) from Bernard Storup, founder of Nutrition & Nature (Revel, France). This product was first sold commercially in Sept. 1998.

12724. White Wave, Inc. 2005. Foodservice catalog: America's soyfood company since 1977. Boulder, Colorado. 20 p. 28 cm.

• ***Summary:*** Catalog (glossy color) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 2007. March. Bound with a black comb. ach page is printed, single sided, in color. Each page is devoted to basics and details about one subject or line of products. At the top of each page is the word "Silk" in white on a blue background. On the cover, a photo shows diced baked tofu on a cutting board and in a skillet against a black background. Below the photo is the White Wave logo.

Contents: When it comes to good food, we use our beans! Soyfoods are good for your health (with 6 scientific references). How does organic labeling work? (And: What is the organic status of White Wave products?) What does Kosher mean? (Scroll-K Kosher DE products and Star-K Kosher products). Silk half pints (4 flavors). Silk Soymilk (8.25 oz aseptic, 2 flavors, with straw attached; good for kids K-12). Silk Soymilk single serves (11 oz PET bottles, 5 flavors). Silk Aseptic Soymilk (shelf-stable quarts, 5 flavors). Silk Soymilk Quarts (7 flavors). Silk Soymilk Half Gallons (6 flavors). Silk Bag-in-a-Box (5 gallon capacity, for foodservice or vending machines, 1 flavor). Silk Creamer (3 flavors–1 quart and 3 pints; to smooth out your coffee). Silk Cultured Soy (Just like yogurt, without the dairy; 7 flavors–2 quart and 5 x 6 oz). Silk Live (The drinkable cultured soy smoothie, 4 flavors, 10 oz). TofuTown Tofu Tenders (4 flavors, 9 oz). TofuTown bulk tofu (1 flavor, 5 lb). White Wave block tofu (5 lb or 16 oz). White Wave Baked Tofu (4 flavors, 8 oz). White Wave Seitan and Tempeh (2 seitan in 5-6 lb; 4 tempeh in 5 lb or 8 oz). Nutritional information: Current White Wave products. Address: 1990 N. 57 Court, Boulder, Colorado 80301. Phone: 1-800-488-9283 X-885.

12725. Nutrisoy Pty. Ltd. 2005. Home page and four links (Website printout–part). www.nutrisoy.com.au 9 p. Printed April 12.

• ***Summary:*** Contents: Home (2 p.). About us (1 p.). Product information (1 p.; tofu and tempeh). Nutrisoy products (2 p.). Soyco products. Where to buy. Recipes. Contact us. Privacy policy. email: info@nutrisoy.com.au.

About us: Nutrisoy is a family owned company established in 1984. "In 1992 Nutrisoy attained the standards set down by Biological Farmers of Australia to become a certified processor of organic tofu and tempeh.

"Nutrisoy uses only the finest Australian Grown Soybean (free from genetically engineered soybean) which is a rich source of isoflavones / phytoestrogens, a substance that could offer protection against and help reduce the risk of a wide range of disease in men and women including prostate, breast and skin cancer, osteoporosis, hot flushes, and heart diseases." A large color photo shows Nutrisoy's many products.

Nutrisoy products: The colorful front panel of each of the following is shown: Plain firm tofu. Tofu vegies [sic]. Tofu tempeh (This tofu has chunky tempeh in it and has been marinated in shoyu and ginger). Tofu herbs. Tofu spicy. Tofu teriyaki. Tofu vegies burger. Tofu tempeh burger. Strawberry tofu (dessert in a cup, with real fruit sauce on top). Apricot tofu (dessert in a cup).

Note: Nutrisoy is the inventor of Tofu tempeh, and Tofu tempeh burger. Address: 15 Hannon St., Botany (suburb), Sydney, NSW 2019 Australia. Phone: +61 2 9316 5171.

12726. Chajuss, Daniel. 2005. History of his work with soy in Israel (Interview). *SoyaScan Notes.* April 13. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** ADM made acid-wash soy protein concentrate, which cannot be texturized. Daniel thinks they did this after they bought Central Soya's soy protein isolate plant in Chicago, and brought it to Decatur, Illinois. This inability to texturize was one of the reasons ADM asked for Daniel's assistance in establishing a plant to make aqueous alcohol wash soy protein concentrate.

Central Soya made very good soy products–such as Response [textured soy protein concentrate, launched in July 1975]. Daniel has always had very good personal and business relations with Central Soya.

Hayes Ashdod was sold in 1987 and is now named Solbar. It is still in the same location as before, with much of the equipment. After the sale, Daniel; used to work there almost every day, but he no longer works with that company.

Daniel helped Finnsoypro Oy (Finnsoy) in Finland to start a plant by giving them know-how; however they bought equipment from a company that is the daughter company of Wenger. Finnsoypro is a small factory that makes about 300 kg/hour of textured soy protein concentrate. The owner (who is very smart) is a neighbor and friend of Daniel is Israel.

Daniel really loves his work at Hayes General Technology (HGT), which he still owns; he is the managing director. He works to install new plants around the world based on the unique technology that the and HGT have developed. He sold Hayes Ashdod Ltd. in part so that he could focus more on his work at HGT. He is now working on a plant in Haifa for a company named Soyprotec; it belongs to Shemen Industries, which is also making soy protein concentrate.

Daniel drinks Alpro soymilk. "Now in Israel tofu and soymilk and other soy products are very, very popular."

© Copyright Soyinfo Center 2013

Israel's largest producer of dairy milk, Tnuva, now makes soymilk. They generate a lot of okara, which is transformed into a health food product by another company. It contains about 30% protein, 60% fiber, plus some oil, minerals, etc. Address: Managing Director, Hayes General Technology Company Ltd., Misgav Dov 19, Mobile Post Emek Sorek, 76867 Israel. Phone: (972) 8 592925.

12727. Wondal, Tony. 2005. Major events of Nutrisoy Pty. Ltd. (Chronology). Letter to William Shurtleff at Soyinfo Center, April 26. 1 p. On color letterhead.
• ***Summary:*** 1984 March–Nutrisoy Pty Ltd is incorporated. The address is 225 Forest Road, Arncliffe, NSW 2205, Australia.

1984 Nov.–Starts making and selling tempeh.

1986 Aug.–Starts making and selling flavoured tempeh.

1989 Dec.–Starts making and selling tofu.

1990 June–Starts making and selling pre-cooked tofu.

1992–Attains the standards set down by Biological [Organic] Farmers of Australia to become a certified processor of tofu and tempeh.

1993 Sept.–Starts making and selling tofu dessert.

1994 July–Starts selling tofu and tempeh to supermarket chain stores.

1994 Nov.–Moves to a larger factory (1,000 square meters). The address is 15 Hannon St., Botany NSW 2019, Australia.

1999 Dec.–Starts making and selling tofu dip.

2002 Jan.–Starts making and selling silken tofu.

2003 March.–Starts exporting soyfoods to New Zealand.

2004 July.–Starts exporting soyfoods to New Caledonia.

2005 Feb.–Moves to a larger factory (3,000 square meters). The address is Lot 1, 19a Baker St., Banksmeadow, NSW 2019, Australia. Address: Founder and President, Nutrisoy, New South Wales, Australia. Phone: +61 2 9316 5171.

12728. Jacobi, Dana. 2005. 12 best foods cookbook: Over 200 delicious recipes featuring the 12 healthiest foods. Emmaus, Pennsylvania: Rodale Press. xv + 336 p. April. Illust. (color photos). Index. 23 cm. [2 soy ref]
• ***Summary:*** Among these 12 foods rich in nutrients and phytonutrients, the author considers soy the best of all. 28 of the 200 recipes include soyfoods.

In Chapter 1 is a section on Soy (p. 17-24) which includes: Introduction. Everyday ways ("Soy is the easiest Best Food to enjoy every day..."). Benefits at a glance. Soy protein in selected foods (Tofu, miso, edamame, soybeans, soynuts, tempeh, soymilk, cultured soy yogurt, soynut butter, soy flour, soy pasta, soy protein powder, soy drink mixes). Guide to soy products: Soymilk, soymilk cooking secrets, more soy dairy (soy cream cheese, soy sour cream, soy cheese, frozen dessert), terrific tofu (regular tofu, silken tofu, baked or smoked tofu), tofu cooking secrets, other soyfoods (black and yellow soybeans, edamame, meat analogs, miso, soy flour, soynuts, soynut butter, soy protein powder and soy drink mixes, soy sauce and tamari, tempeh), baking with soy, cooking with soy.

Chapter 8, titled "Eggs, beans, and soy," contains recipes (p. 196-203). for: Black soybean and butternut squash stew. Black soybeans. Braised black beans with red wine. Braised tofu with kohlrabi and pears. Broccoli, black mushrooms, and edamame with black bean sauce. Asparagus, red pepper, and curried tofu.

Other soy-related recipes: Finger lickin' edamame (p. 50-51). Black bean hummus (with tofu, p. 57). Mushroom crostini (with tempeh, p. 61). Black bean soup (with dried black soybeans, p. 79). Mushroom consommé with sake (and tofu, p. 88). Double miso soup (p. 89). Nine a day salad (with soynuts, p. 100). Southwestern three bean salad (with canned black soybeans, p. 107). Curry dressing (with silken tofu, p. 115-16). Pepper ranch dressing (with soft silken or regular tofu, p. 116-17). Creamy herb dressing (with tofu, p. 118-19). Blue cheese dressing (with tofu, p. 118). Cracked mustard dressing (with tofu, p. 119). Citrus miso splash (p. 119). Soy and honey drizzle (with reduced-sodium soy sauce, p. 151). Whole wheat linguine with arugula and edamame (p. 164-65). Dirty rice (with tempeh, p. 194). Tempeh, lettuce, and tomato sandwich on rye (p. 207). Honey soynut butter sandwich (p. 208). Grilled pizza (with tofu, p. 210). Soycotash (with shelled edamame, p. 238-39). BBQ collard greens with edamame (p. 240). Miso mashed potatoes (p. 241). Key lime tartlets (with tofu, p. 250-51). Blueberry-lemon trifle (with lemon soy yogurt and soy cream cheese, p. 252-53). Brown rice crisp treats (with salted, roasted soynuts, p. 282). Wild blueberry trail mix (with salted soynuts, p. 283).

On the rear cover is a photo of the author and a brief bio. "After apprenticing at three-star restaurants in France, Dana Jacobi opened a catering business and marketed her own line of gourmet sauces. She has since authored five cookbooks..." Address: Food writer, New York, NY.

12729. Stewart, Kimberly Lord. 2005. Soy good for you: It could be the perfect plant-based protein. *Better Nutrition* 67(4):24-26. April.
• ***Summary:*** Soy "is perhaps one of nature's most perfect foods." Food and health journalists rarely use the word "perfect"–except with soy.

"Despite the perfect nutrient profile of soy, the one flaw has been taste. Soy used to taste, well, too soy-like, too bean-like. Now, however, farmers are growing new varieties that taste much better than the beans of the past."

A table shows the amount of protein contained in various "soy foods."

Four ounces of firm tofu–13 grams.

One soy "sausage" link–6 grams.

One soy "burger"–10-12 grams.

© Copyright Soyinfo Center 2013

One 8-ounce glass of plain soymilk–10 grams.
One soy protein bar–14 grams.
½ cup of tempeh–19.5 grams
½ cup of roasted soy nuts–19 grams.
½ cup of edamame–10 grams.

12730. Vita-Mix. 2005. Vita-Mix is the easiest way to cook heart healthy (Ad). *Better Nutrition* 67(4):31. April.
• ***Summary:*** Features a recipe titled "Vita-Mix carrot ginger tofu soup" (with "1/3 cup lite silken tofu"). Color photos show: (1) The finished carrot-colored soup in a bowl. (2) A Vita-Mix with the jar loaded with chopped fruits.

12731. Wenger, Greg. 2005. Spring surprise: Healthful and delicious soy dishes. *Better Nutrition* 67(4):28, 30-31. April.
• ***Summary:*** "Soy got a new burst of life in 1999 when the US Food and Drug Administration (FDA) approved a health claim that can be used on labels for soy-based foods."

Recipes include: Corn chowder (with "32 oz. Mori-Nu creamy corn chowder soup"). Edamame spread with browned garlic. Golden sautéed tofu with yogurt dill sauce (with "1 lb extra-firm tofu, 1 cup soy yogurt"). Tofu chocolate chip pine nuts muffins (with "12 oz. silken tofu"). Super smoothie (with "½ cup soymilk" plus apple juice, pomegranate juice, banana, kiwi, frozen mango chunks, and frozen cranberries).

A portrait photo shows Greg Weaver, who is "a Certified Executive Chef with the American Culinary Federation." He "hails from Chicago and is a graduate of the prestigious Culinary Institute of America (CIA) in New York State." Address: Chef, Catalina Island, California.

12732. Wolf, Miriam. 2005. Meatless: Soy basically. *San Francisco Bay Guardian.* May 4-10. Vol. 39, No. 31.
• ***Summary:*** "At the Ferry Plaza and Berkeley Farmers Markets, you'll find Basic Soy, a local company that has been bringing its products to market for about a year. It sells some of the freshest soy milk around, along with toothsome savory tofu and creamy soy custard. All of its foods are made with organic, non-GMO soybeans.

"The soy custard is delicate enough to dissolve on the tongue. It comes in a small container of sweet ginger syrup to drizzle over the top, making for a light-tasting dessert or snack. In the next few weeks Basic Soy will ad a densely delicious chocolate soy custard to the lineup. The spicy tofu is firm and meaty, accented with just the right amount of hot oil and sesame seeds. Braised tofu is good enough to eat on its own or in a sandwich but would be the perfect ingredient to slice up and throw into a stir-fry.

"At $5 to $6 a container (at Ferry Plaza) these products aren't cheap. But the freshness and quality trump the prices–people seem to be eating the stuff up. There's always a buzz around Basic Soy's booth." Basic Soy's "soy layer omelette" features yuba.

"Basic Soy is a young company–all of the people behind it are in their early 30s. It has a hip design sensibility and a mission to bring soy foods to a wider audience." There follows an interview with Minh Tsai, head of Basic Soy. He said that their products are presently sold only at farmers markets. Fresh tofu and soy milk taste better. Go to www.basicsoy.com for more information.

Minh Tsai: "In the United States, soy has been somewhat stigmatized as the 'white block' of tofu that nobody knows what to do with and only a very small segment of the people consume. Basic Soy was formed with the mission of making soy accessible to the public. We wanted to showcase a line of delicious fresh and ready-to-eat soy products that change people's mind about soy." "Most of our recipes are traditional Chinese recipes. The soy custard with ginger syrup, for example..." "Based on our research, the trend of interest in soy is growing." "I believe our customer base is quite mixed [not mostly vegetarians]; we have plenty of carnivores who normally wouldn't touch soy but love our products... We are not vegetarians. But we do eat soy quite a bit."

"Basic Soy is at the San Francisco Ferry Plaza Farmers Market, Embarcadero and Market, Sat., 8 a.m.–2 p.m.; and the Berkeley Farmers Markets: Derby at MLK Jr. Way, Tues., 2-7 p.m.; Shattuck at Rose, Thurs., 3-7 p.m.; and Center at MLK Jr. Way, Sat. 10 a.m.–3 p.m. (beginning mid-May)."

12733. Camps, Lisa. 2005. Re: History of work with soyfoods in Goa, India. Letter (e-mail) to William Shurtleff at Soyfoods Center, May 15. 2 p.
• ***Summary:*** 1984–Lisa came to Goa to nurse a friend back to health; he was a vegetarian. While in India she discovered so many alternative styles of life, so many people from all over the world with a similar consciousness related to healthy body, mind, and spirituality. All "seemed to care about the planet, nature, peace, yoga, natural healing, vegetarianism, etc. India is a whole country of vegetarians, but in Goa, a former Portuguese colony, the inhabitants are mostly Christians who eat meat." That year, Lisa became a vegetarian.

She returned to America, only to yearn to come back to India. So she spent 7-8 years coming and going, whenever finances permitted. When in the USA, she worked with food, in restaurants, hotels, night clubs, made good money, then left again. She took many courses in the health and nutrition at community colleges. She had seen many unhealthy vegetarians and wanted to learn how to be a healthy, vigorous vegetarian. Having helped to deliver 4 children by natural child birth in Goa, she was interested vegetarian diets for children and natural healing.

1982–While in Goa, Lisa met an Australian woman, Diane [Froggatt], who was making her own tofu, because it was not available, and all were tired of Dal (lentils). "I asked

© Copyright Soyinfo Center 2013

her to teach me, and she did... I happily made it for myself to fill the protein gap. Along with Tofu also comes Soy Milk and Okara! A bonus! Made soysausage, soya burgers, etc., but only at home at that time."

1986-87–Lisa attended a Michio Kushi Institute in Switzerland; she learned macrobiotics and shiatsu, which she practiced for about a year, then decided that macrobiotics was "excellent for healing purposes, but not for daily life, simply because any diet so extreme and tasteless is doomed to opposite extremes." She observed that most people who regularly ate a macrobiotic diet "craved massive amounts of Chocolate, or some other form of 'naughtiness.'"

1989-90. Lisa decided to settle in Goa. It had really become her home and it was too expensive to fly back and forth. But how to make money in India? Her many Indian women friends adored lingerie. So she did all the necessary paperwork and started a business named Ooh-La-La-Lingerie Pvt. Ltd., importing undergarments from Europe and traveling all over India to sell them to major department stores. The business went well for 2-3 years until the suppliers and buyers connected–leaving her out.

At the same time, Lisa was selling soya burgers, hummus brown bread, and 4 flavors of soy milk in the Flea market [in Anjuna], where she had a food stall; she made these in her home kitchen. "Then a few people started asking me if I could make them some Tofu! So, I thought why not, since I'm doing it for myself anyway." "All our production started in a small room (in my house), which I converted into a special tofu room, with ventilation above a false ceiling, a sink, stainless steel tables, and extreme hygiene. It was about 3 meters on a side with white tiles. We used (and still use) Aqua Guard water filter systems for all production and packing. So I started by making 2-3 kg at a time, squeezing the milk through a cloth by hand, actually burning my hands on a regular basis, until I decided to build a press. Made some wooden tofu boxes, and did the grinding on a grinding stone. Ouch, too much time and labor! We were selling only to shops and Five-Star hotels.

"As time passed and orders got bigger, my friend and now partner, Richard Chabin, helped me get some machinery, Then, I wanted to learn about Tempeh, and how to make it. There was an American fellow named Joseph Papa who had a book and an interest, so I traded him my shiatsu massages for the method on how to make Tempeh. My interest in Tempeh was the vitamin B's only found in Tempeh. Important if you don't eat beef liver.

"So now I knew many soy foods, and was happily cooking for many friends daily. I enjoy cooking, and they enjoyed eating.

"Then I tried to market the tofu to the local market and restaurants, but as they were not familiar with it, they were afraid, even after I gave them many recipes" and even showed them how to prepare it Indian style–like paneer. "That's when I decided to open a small sandwich shop."

1999–The sandwich shop, named Bean Me Up, Soya Station, Salad Bar, was a "raging success from the beginning." It became too big for the original premises, and there were long lines at peak season. Note: The restaurant name derives from a famous catchphrase from the movie *Star Trek,* "Beam Me Up, Scotty!"

2004 Oct. 31–Lisa took on large premises with 14 rooms to rent and a small health food shop and restaurant. The commercial foods (tofu, tempeh, soymilk, etc.) are made in a separate building (a small factory) on the compound. It opened on Halloween with a costume party. The "real point is the restaurant" (which kept the same name); it is a unit of Ooh-La-La Ling. When people discover that they can get fresh safe salads, Tofu, Tempeh, Seitan, soya ice cream, Tofunaise, etc. after traveling in India, they are so Appreciative. That is a reward in itself! I truly believe that to introduce people to a more healthy diet, and to given up meat, the alternative must taste good, or why would they consider changing? Hence, our theme is 'The Tasty Alternative.' Lisa, now an established businesswoman, has a new source of income from her 14-room hotel!

Two months later, on 24 Dec. 2004 (Christmas eve), a mob of 150 people, escorted by two policemen (for the mob's protection!) went to the Anjuna-Chopra beach belt and rudely demanded that certain restaurants and shops close down. Why? Because their owners were of foreign origin. No matter that Lisa, of American origin with an Indian passport, had lived in Goa for 23 years and had all the legal papers required to run her business. The agitation was probably initiated by indigenous restaurant / shop owners who resented the foreigners' success and had the blessings of local politicians–a familiar theme worldwide. Fortunately, Lisa had some friends with the National Press, *Times of India,* so she and her fellow foreigners showed no fear, followed the procedures, and made a big noise; the actions of the mob were clearly illegal. Her restaurant was never shut down and the problem appears to have gone away.

Lisa is a member of the Vegetarian Society of India, and occasionally they call on her to give seminars for the members.

Note: Diane Frogatt died a few years ago from cancer.

Photos sent by Ratan Sharma in 2010 and taken by him in Jan. 2005 show the entrance to and the inside of this remarkable soy restaurant and salad bar. They serve only soy-based recipes. They also have a branch in Hyderabad. Note: Lisa does not own a SoyaCow. Address: Owner, Bean Me Up, 1629 Deulvaddo, Anjuna / Vagator, Goa, India 403-509. Phone: 0091-(0)832-227349.

12738. *Ontario Soybean Growers Soybean Report.* 2005. CAFTA campaign stresses importance of international markets. June. p. 1.

• ***Summary:*** "OSG Director and Bruce County farmer Jim Gowland is among the six Canadians to be featured with his family in the 'My Future is Global' campaign from the Canadian Agri-Food Trade Alliance (CAFTA).

"The 'My Future is Global' campaign is designed to highlight the importance of international markets to Canada's agriculture and agrifood sector. Canada is the world's third largest exporter of agriculture and food products. More than 90% of Canada's farmers, representing 80% of farm cash receipts, rely on international markets. And more than a million Canadian jobs depend on trade.

"Yet the sector continues to be forced to compete in a market that is severely distorted by subsidies and access barriers."

"'We are really happy to be telling the positive story of trade to Canada's decision makers,' says CAFTA President Liam McCreery. 'We want Canada's decision makers and negotiators to understand how important trade is to the Canadian agriculture and food sector, and how innovative and competitive our industry is. But we also want them to understand that this very vibrant industry is relying on them to negotiate aggressively at the World Trade Organization to remove market distortions. Our future is global, and it's in

their hands.'"

A photo shows Jim Gowland and his family. "Jim's specialty soybeans are found in tofu in Japan. They are also considered special health foods in Europe." Address: Guelph, ONT, Canada.

12739. Brown, Samantha. 2005. Cambodia's first soya milk factory aims to nourish nation's children (News release). Agence France-Presse English Wire via NewsEdge Corporation. 2 p. July 8.
• ***Summary:*** In 1998–the year peace finally arrived in Cambodia–Pierre Tami established Hagar Soya, a micro-enterprise making fresh soy milk in Cambodia. The small business started out selling about 500 liters of soya milk and tofu locally; this gave both work and hope to dozens of poor local women. But Tami, the executive director, wanted to do more. He was successful in raising $1.3 in investment capital from an array of sources, including the World Bank's Mekong Private Sector Development Facility. He used the funds to build a state-of-the art long-life [aseptically packed] soymilk plant in Phnom Penh, Cambodia's capital.

By 2003 the expanded plant began commercial production and today it has a daily production capacity of 12,000 liters (more than 3,000 U.S. gallons). It employs 50 people, mostly poor women, who earn a decent salary. The company's flagship product, So! Soya, is now sold to more than 500 wholesalers and retailers. Plans are for 8 new soymilk products to be introduced next year.

12740. Asociacion Soya de Nicaragua (La). 2005. [Soynica (Website printout–part)]. www.sdnicc.ni/soynica Printed July 12. [Spa]
• ***Summary:*** Home: Inicio (Introduction). Sobre Soynica (About Soynica, incl. a list of commercial products, a history of the company, and a mission statement). Programas (Programs). Boletin (Bulletin). Contacto (Contact information). Enlaces (links).

Soynica is a small company that makes foods derived from soymilk and other sources that it sells under the Nutrem brand. It was established on 16 October 1994.

Nutrem products: 11 fresh, incl. 4 flavors of soymilk and 4 types of tofu; 11 dry, incl. Soyavena and soy flour; and 11 alternative meals–incl. tempeh.

History of Soynica: In Nov. 1979 Dr. Arturo Aldama and his wife, Dulce, representative of the organization Friends of the Earth (*Amigos de la Tierra*) in Mexico, and Luci Morren, a Belgian woman, organized a group of 8 volunteers who arrive in Nicaragua with the only mission of sharing their knowledge of home preparation of soyfoods. They brought with them only 20 kg of soybeans, because they had been told that soybeans were widely grown in Nicaragua.

But it was not so. So the engineer Alexander Fernandez helped to find about 60 quintals of soybeans with a producer in Esteli, and demonstration plots were started. And so it began. Address: Managua, Nicaragua.

• ***Summary:*** About Ota Tofu and Dae Han Tofu, both in Portland. At Ota Tofu in southeast Portland, there are 13 workers on a work floor of just over 900 square feet. "Since 1918, the family business has focused on the local market, never expanding outside Portland." Ota tofu is fresh and unpasteurized, curded with a refined form of nigari.

Ota Tofu doesn't deliver or advertise; it doesn't have to. People and businesses who want Ota Tofu come to the shop to pick it up. Today, the restaurants Sweet Basil, the Farm Café, Old Wives' Tales, Fong Chong, and Curry in a Hurry have all stopped by to pick up buckets or water-filled bags of fresh tofu. All day long, vans and trucks from catering services, Asian markets and other restaurants from as far away as northern Washington drive to the front of Ota to load up on tofu.

A large color photo shows Ota employee Wai Yang as she uses long chopsticks to deep-fry tofu pouches (agé) in a rectangular stainless steel fryer.

Dae Han Tofu, owned by Calvin Chun, started in 1993 and now has four employees. Chun, who moved to Portland from South Korea in 1989, rolls up his sleeves and helps with all parts of the work. Dae Han's work space is a bit larger than Ota's and streamlined for higher volume. In addition to regular types of tofu, the company produces specialty tofus such as teriyaki, hot and spicy, extra firm, and low fat (made from dehulled soybeans).

Contact information: Ota Tofu, 812 S.E. Stark St. Phone: 503-232-8947. Dae Han Tofu, 3340 N.W. Yeon Ave. Phone: 503-223-0044.

12744. Haren, Chuck. 2005. Sustainable community food production: Central American Food Security Initiative (CAFSI). *Plenty Bulletin* (*Summertown, Tennessee*) 21(2):1-2. Summer.

• ***Summary:*** On the cover (p. 1) of this issue are large photos showing people and modern sanitary equipment producing soymilk at four locations in Latin America: (1) ADIBE, Molino Belen, Solola, Guatemala. Agostin Xoquic. (2) UPAVIM, Guatemala City, Guatemala. (3) Huichol Center, Huejuquilla, Mexico. (4) Soynica, Managua, Nicaragua.

Molino Belen is a Mayan village near Solola. "Soynica has become widely known for its work with mothers and children and for promoting use of locally produced soy foods to help address nutrition and economic development issues. During March and April of this year Plenty representatives worked for five weeks helping staff managing Casa Nutrem (Soynica's food processing facility) to purchase, install, and learn to use new cooking, packaging, and refrigeration equipment." A photo (p. 2) shows Elena Xoqic pouring soymilk into a bottle. She and her husband, Agostin, both Cakchiquel Maya, "have been managing the Mayan 'Soyaria' near Solola, Guatemala since Plenty set it up in 1980."

A cover letter from Peter Schweitzer, executive director of Plenty International, notes that Louise Hagler has been working with the Huichol people of Mexico, helping them integrate soy-based foods into their diet. The "Soyaria" near Solola, Guatemala, makes "soymilk, tofu, tempeh and soy ice cream using the very same stainless steel equipment we brought down in an old school bus in 1980! Plenty is helping them renovate the original building and upgrade the equipment. Profits from the Soyaria have been used to fund community development projects such as a new water system and an outdoor basketball court for the school."

Note from Chuck Haren (via Lisa Wartinger, Programs Manager, Plenty International). 2005. Oct. 1. Average weekly sales for the Soyaria at Molino Belen are: Soymilk 400 half-liters. Tofu 260 lb. Tempeh 70 lb. Pinole (dry corn and soy drink mix) 50 lb. Soy ice cream cones 300. Okara 200 lb.

"Plenty has stepped up its technical support to the four CAFSI partner organizations in 2005, and that support will continue in 2006." Address: CAFSI Program Director.

12748. Soyatech.com. 2005. U.S. soyfoods market shows signs of maturity with slow growth in 2004, says new report. http://www.soyatech.com/bluebook/news/viewarticle.ldml?a=20050829-1. 3 p. Posted 29 Aug. 2005. [6 ref]

• ***Summary:*** *Soyfoods: The U.S. market 2005,* a new market study, shows that total sales of soyfoods hit $4.0 billion in 2004, but "showed the slowest year-over-year growth (2.1%) for the industry as a whole since the early 1980s, when the category began its climb."–according to Peter Golbitz, president of Soyatech, Inc. In 2004, 4 of the 5 top soyfoods categories (meat alternatives, tofu, energy bars, and meal replacements) showed decreased sales; only soymilk posted increased–but modest gains. Up and coming categories include snack foods and other dairy replacements.

In recent years, a number of articles and reports have questioned the health benefits of consuming soyfoods and products containing soy ingredients. "If you look at the top 10 companies in the soyfoods market today, virtually all of the original founders and visionaries are gone," observes Golbitz. During the boom years of the late 1990s and early 2000s, they were bought out by bigger food companies, such as Dean Foods, Kraft, Kellogg, General Mills, ConAgra and Hain-Celestial. These are solid companies but are less willing to take risks and are driven more by "market data than by vision."

The report, the 5th in a series by information partners Soyatech, Inc. and SPINS, is sold in parts. The "macro section" [80-page executive summary] costs $2,900. The more specialized sections are available for about $1,500 each. You can download the prospectus at: http://www.soyatech.com/ pdf/soyfoods05.pds. Soyatech was founded in 1985 and SPINS in 1995. Address: Bar Harbor, Maine.

12749. Balk, Ethan; Chung, M.; Chew, P.; Ip, S.; Raman, G.; Kupelnick, B.; Tatsioni, A.; Sun, Y.; Wolk, B.; DeVine, D.; Lau, J. 2005. Effects of Soy on Health Outcomes. Evidence Report / Technology Assessment No. 126. (Prepared by

© Copyright Soyinfo Center 2013

Tufts-New England Medical Center Evidence-based Practice Center under Contract No. 290-02-0022.) AHRQ Publication No. 05-E024-2. Rockville, MD: Agency for Healthcare Research and Quality. xiii + 223 p. Aug. 28 cm. [239 ref]
• ***Summary:*** This report is a review of the scientific literature, limited to human subjects. It basically says that in none of the claims about soy having health benefits is the evidence conclusive.

In the Summary, in the section on "Results" (p. 4-6) conclusions were given concerning the effects of soy supplements (used in about 75% of all trials analyzed) and soy foods on different health outcomes. In this report, soy milk was categorized as a soy supplement. Among the soy supplement trials, 57% used soy protein with isoflavones, 36% used isoflavones alone, and 6% used soy protein without isoflavones. In about one-half of the soy foods trials, textured soy protein was used. Soy flour was used in about one-quarter of the soy foods trials. "Across studies, the total isoflavones ranged from 0 mg to 185 mg per day, and the total protein intake from soy ranged from 0 g to 154 g per day. It is notable that the median soy product dose across studies (36 g soy protein per day) was equivalent to over a pound of tofu daily or about 3 soy protein shakes daily."

The health outcomes investigated were: Cardiovascular endpoints. Menopausal symptoms (21 studies). Endocrine function (50 trials in 47 articles). Cancer and tumor-related biomarkers (24 studies). Bone endpoints (31 studies). Kidney function, neurocognitive function, and glucose metabolism (11 studies). Adverse events. Limitations: "Despite the large number of trials that have been performed, the health effects of soy for many conditions that have been studied remain uncertain. The methodological quality of over half the studies (about 55 percent) evaluated in this report was poor (Grade C). One-third of the poor-quality studies were either uncontrolled single-cohort studies, nonrandomized comparative studies, or comparative studies for which it was unclear whether they were randomized..." Conclusions: "Most of the studies evaluated the effects of soy on various biomarkers or measures, not clinical outcomes, although several of the endpoints, such as blood pressure, LDL, and bone mineral density, do have known meaningful correlations with clinical outcomes." Address: 1. M.D., MPH, Project Leader, Tufts-New England Medical Center Evidence-based Practice Center, Boston, Massachusetts.

12750. **Product Name:** Mori-Nu Enriched Silken (Made with non-GMO Organic Soybeans).
Manufacturer's Name: Morinaga Nutritional Foods, Inc.
Manufacturer's Address: 9960 S.W. Potano, Tualatin, OR 97062. Phone: 503-692-3498.
Date of Introduction: 2005. August.
Wt/Vol., Packaging, Price: 12.0 oz (340 gm) Tetra Brik Aseptic carton. Retails for $1.89.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: New release. 2005. Aug. 15. "Mori-Nu introduces silken tofu with added nutrients: Mori-Nu Enriched Silken Tofu offers key nutrients, including fiber and calcium." A photo shows the front panel of the aseptic package.

12751. Thurman, Judith. 2005. Night kitchens: Where making bean curd is an ancient art. *New Yorker.* Sept. 5. p. 66, 68-70, 73-74.
• ***Summary:*** One of the most insightful articles about tofu ever seen. An American goes in search of the heart of tofu in Japan, and the place of tofu in the Japanese diet and psyche; in the process, she finds the heart and soul of Japan. At Daisen-in, a Zen temple in Kyoto, she discovers "workshops where tofu is handmade by artisans faithful to the old tradition." Tofu was imported to Japan from China and Korea, along with Buddhism; it has been a mainstay of the monastic diet in Japan for about 1,000 years. But it "has never lost the soulful, exalted aura of its provenance."

At Okutan, the oldest tofu restaurant in Japan (established about 400 years ago within the walls of Nanzenji temple) she enjoys tofu at its best. She meets Mr. Ishii, whose tofu kitchens and private museum of beans are housed beneath the restaurant; he gives her a detailed history and gastronomy of the soybean. The shop where Okutan's tofu is made uses only traditional equipment–much of it made of cedar. Nigari is made here, dripped from sea salt. Shima-dofu is made with pure seawater–not with nigari–gathered off the tiny island of Hateruma.

She spends the night at a lovely old traditional Japanese Inn (*ryokan*) named Yoyokaku, near the beach in Karatsu, Saga Prefecture, on the west coast of Kyushu, about 4 hours by train south of Kyoto. Biking to a tiny nearby restaurant named Kyomachi, she finds that "its cuisine consists almost entirely of artisanal tofu made nightly, on the premises, by Yoshimasa Kawashima... whose family has been making tofu in Karatsu for nine generations." Age 58, he has created a unique new product named *zaru-dofu,* curded with nigari and eaten as curds. He also serves the okara as a dish in its own right.

Finally she visits Kashiwajima, an rocky island off the coast of Karatsu, where she experiences–and learns the history of–its legendary *ishiwari-dofu* ("stone-breaking tofu"), which is pressed until it is quite hard. Address: Correspondent, Japan.

12752. Lemonick, Michael. 2005. Daily Rx: soy protein may reduce bone fractures. *Time.* Sept. 12.
• ***Summary:*** "Now, a new study suggests that soy protein, such as the Asian vegetarian staple tofu, may offer an effective alternative hedge against bone loss." See the current issue of the Archives of Internal Medicine.

Foods America Corporation (Brochure). 7351 Orangewood Ave., Garden Grove, California 92841. 12 p. 28 cm. [Eng; Kor; Jap; Chin]

• ***Summary:*** Brochure (glossy color, written in 4 languages on each 2-page spread: English, Korean, Japanese, Chinese) sent by Patricia Smith from Natural Products Expo (Baltimore, Maryland). 2005. Sept. Contents: Introduction. Tofu & tofu products (In 2004 House Foods American Corporation building its second tofu factory in Franklin Township, Somerset County, New Jersey). House Foods products. Restaurant Curry House. Tofu factory (Garden Grove, four photos). Other photos of the company's products are scattered throughout the brochure. Address: Garden Grove, California. Phone: (714) 901-4350.

12754. Nature Soy, Inc. 2005. Healthier living, healthier life (Brochure and Portfolio). 713 North 10th St., Philadelphia, PA 19123. 10 p. + 3 inserts. 28 cm.

• ***Summary:*** Brochure (glossy color; see next page) sent by Patricia Smith from Natural Products Expo East (Baltimore, Maryland). 2005. Sept. Contents: Nature's Soy: Healthy, convenient, Our company. Our facilities (Large and very modern). Our R&D. Our philosophy (We take soy products seriously!). Our products.

"Based in Philadelphia, Pennsylvania, Nature Soy, Inc. is a major supplier of healthy soy and vegetarian products on the East coast. We have been manufacturing fresh soy products since l99l and have well established our brand name among our customers. As one of the largest Chinese-owned and operated soy food companies in the USA, Nature Soy, Inc. was featured in a television documentary about successful overseas Chinese entrepreneurs by a Chinese television station.

"Our Nature's Soy brand of tofu and soymilk products is in almost all major Asian grocery stores and supermarkets from New Jersey to North Carolina, reaching as far south as Georgia and Florida."

This company specializes in soy products. The two basic types are organic and conventional. The two basic types of organic are plain and flavored.

There are four organic plain products: (1) Silken tofu, 20 oz. (2) Soft tofu, 20 oz. (3) Firm tofu, 16 oz. (4) Extra firm tofu, 12 oz. "Using a cheese or deli slicer, this extra firm tofu can be sliced to about 1/16 inch thin slices, yet still maintains its integrity."

There are four organic flavored products: (1) Five spice flavored tofu, 12 oz. (2) 5 minute tofu, 11.5 oz. (3) Tofu-Deli, pre-diced, 12 oz. (4) Tofu-Deli, pre-sliced, 12 oz.

There are four conventional plain products: (1) Silken tofu, 20 oz. (2) Soft tofu, 20 oz. (3) Firm tofu, 16 oz. (4) Extra firm tofu, 10 oz.

There are four conventional flavored products: (1) Flavored tofu, 12 oz. (2) Hot & spicy flavored tofu, 8 oz. (3) Curry flavored tofu, 10 oz. (4) Oriental sauce tofu, 10 oz.

There are 3 types of soymilk: (1) Plain, ½ gallon. (2) Sweetened, 16 oz. (3) Sweetened, ½ gallon.

There are two other products: (1) Soy puffs (deep-fried tofu), 14 pieces per pack of about 4 oz. (2) Fried tofu, 8 oz.

In addition the company makes two gluten-based products (somewhat like seitan) called "Protein Wise Meat Substitutes." They come in Chicken Style and Beef Style, 8 oz per pack.

© Copyright Soyinfo Center 2013

They also make Cantonese rice noodles and rice noodle rolls.

The business card of Fenjin (Gee) He, PhD, is attached to the cut-out space in the portfolio. Mr. He designed this brochure. Address: Philadelphia, Pennsylvania. Phone: 215-.

Note: This company traces its roots back to Soy City Foods, which started making tofu in 1980 in Toronto, Ontario, Canada. See Feb. 2013 letter from and interview with Lorraine Guardino. Address: Norman Ayerst, 5715 Coopers Ave., Unit 1, Mississauga, Ontario, Canada L4 2C7.

12757. Soyatech, Inc. 2005. Soya & Oilseed Bluebook 2006: The annual directory of the world oilseed industry. Bar Harbor, Maine: Soyatech. 416 p. Sept. Comprehensive index. Brand name index. Advertiser index. Statistical conversions. 28 cm.
• ***Summary:*** On the cover is color photo of two cupped hands holding a very small soybean plant rooted in soil–against a greenish black background. On the inside front cover is a color ad from Natural Products Inc. (Grinnell, Iowa) titled "Always unique, always innovative, always natural." Color photos show ready to eat products made with Scotsman's Mill whole egg extender, egg white extender, and enzyme active low fat soy flour, plus roasted soy grits, bakery ingredients, and soymilk powders. On the first page is a full page color ad from Bunge North America (St. Louis, Missouri) titled "The shortest distance from harvest to market." On the rear cover is a full page color ADM ad ADM showing a Chinese teenager eating tofu from a plate, using chopsticks. The text is the same as that of one of ADM's current TV ads: "Somewhere west of Shenyang, a teenager is stopping for dinner... A dinner rich in soy protein. As one of the world's largest soy processors, we like the idea that there will be no stopping him now."

On the title page of the book is a bright green self-adhesive label containing "Your access code," which expires in a year.

In the Foreword, Peter Golbitz of Soyatech compares the world of today with that of 1947, when the *Soybean Bluebook* was first published. The year 1947 marked a dramatic turning point; "it was the last year that China led the world in soybean production... The U.S. produced 183.6 million bushels (5 million metric tons) [of soybeans] that year, around 34% of the world's total. And the price for a bushel of U.S. soybeans averaged $3.34." In 1948, the U.S. passed China to become the world's leading producer of soybeans. Today, it looks like Brazil will soon pass the USA as the world's largest producer of soybeans. Note: In 2005/06 the U.S. produced 78.789 million metric tons of soybeans, followed by Brazil which produced 62.000 million. Address: 1369 State Hwy 102, P.O. Box 84, Bar Harbor, Maine 04609. Phone: 207.288.4969.

• ***Summary:*** This 12th annual nationwide survey, commissioned by USB, was conducted in early 2005 by an independent research firm in Seattle, Washington. Random telephone interviews were completed with 1,000 consumers, "providing a sample that is consistent with the total American population. The study's margin of error is ±1.9 to 3.1 percentage points and has a confidence interval of 95%."

Contents: Introduction and methodology. Nutritional habits and obesity concerns. Healthy food decisions. Cooking oil impressions. Consumer attitudes about fats. Awareness, usage, and trial of soy products. Occasion preferences for consuming soy (Of consumers who use soy products at least once a month: Dinner 40%, breakfast 27%, lunch 23%, other times 10%). Soyfoods and health: Perceived healthfulness of soy products (78% say healthy, 17% neutral, 5% unhealthy), unaided awareness of health benefits of soy (prevent obesity / promote weight loss 17%, heart health 14%, menopause relief 12%, good protein source 11%, cancer prevention 10%, reduced risk of osteoporosis 2%). Biotechnology [genetic engineering] in food and agriculture. Restaurants and soy products.

Perceptions of biotech and food: 46% (up from 39% last year) of consumers consider themselves at least somewhat familiar with biotechnology." Of this group, 62% "report a positive perception of its role in food production."

Perceptions of biotech in agriculture: Of that 46% who are at least somewhat familiar with biotechnology: 33% feel that its role within agriculture is to improve the nutritional make-up of crops, 25% don't know enough about biotech to say what role it plays, 13% think that biotech enables farmers to use fewer pesticides, herbicides, and toxins, 13% have a negative perception, other 4%.

Restaurants and soy: A new question added to the survey this year shows that 20% of consumers would order soy products in restaurants if they were available. Types of soy actually ordered in restaurants: Plain white tofu 37%, veggie burger 28%, soymilk 11%, miso 11%, edamame 10%, other products 19%.

Note 1. As of Aug. 2008 this full survey is available gratis in PDF format at www.soyconnection.com /health_ nutrition /pdf/.

Note 2. This is the earliest English-language document seen (April 2013) that contains the term "Plain white tofu."

12759. Barrett, Walter. 2005. Work with soybeans in Central Asia (Interview). *SoyaScan Notes.* Oct. 4 and 6. Conducted by William Shurtleff of Soyfoods Center. Preceded by letter (e-mail) of Oct. 3.

• ***Summary:*** Walter has worked with soybeans in 4 Central Asian nations: Kazakhstan, Uzbekistan, Turkmenistan, and Tajikistan. Kazakhstan and Georgia have the most history with commercial soybean production, because Soviet planners made it happen there. They designated other Central Asian countries for cotton production, in part because cotton needs less water. Latitude is part of the reason. The climate is also very dry, so that all soybeans (and almost all crops) in these countries must be irrigated, but with river water carried by gravity. Of all the Central Asian countries, Kazakhstan has been the most successful at understanding a market economy and making it work.

Walter has many contacts in these countries. He is willing to help Shurtleff try to get a better history of soybeans in each of these countries. First, Shurtleff will send Walter an e-mail containing a table showing the dates he has for the earliest document seen showing soybeans in each in each country, and soybean cultivation in each country. Then the earliest date seen for soybean cultivation in each country. Walter will forward this e-mail to an intermediary (Winrock International or Mercy Corps), who will then mail or phone or hand deliver the message to the network of indigenous researchers Walter has developed over the years. The message will encourage them to contact other researchers who might be interested; then Walter will wait for replies.

Walter believes that Korean communities in at least four of these countries (Turkmenistan, Uzbekistan, southern Kazakhstan, and Tajikistan) were growing soybeans for their own use at an early date–probably since the early 1900s and using them almost entirely for food–such as tofu, soy sprouts, Korean-style miso and soy sauce, green vegetable soybeans, etc. The Koreans raise chickens, for example, but they forage for food and are not fed soybeans. Walter has no idea when, or, why, or how these many Korean communities came to be established in Central Asia. He has no idea where the soybean varieties they grow came from. These Korean communities are all found within a horizontal oval that cuts across national boundaries, and includes the cities of Almaty [Alma-Ata] (in southwest Kazakhstan), Toshkent [Tashkent] (capital of Kyrgyzstan), Dushanbe (capital of Tajikistan), and Ashgabat (capital of Turkmenistan). In this area are numerous Korean restaurants where Walter has eaten; but he has no idea how many Koreans live in this area. Most individual Korean communities grew only one variety, but each Korean community had its own variety. By contrast, there are not many Chinese communities in these areas.

Walter expects his next trip to Central Asia to be in the spring of 2006–probably Uzbekistan and possibly Turkmenistan or Tajikistan. He is given drivers and interpreters by the NGO sponsoring his trip. One of the ongoing problems he faces is the limited abilities of interpreters; communication is often difficult, and it is hard to pursue agricultural or academic questions with farmers. It is less difficult with educated researchers or academicians (best is Tajikistan, followed by Turkmenistan–who might help find others). The researchers in these countries don't talk much with each other, either within a country or among countries. They have few opportunities to travel, and little access to the Internet or e-mail. This is because of government restrictions, difficulty of getting visas or money,

© Copyright Soyinfo Center 2013

etc. Researchers are lucky if they have a working computer, but most have a telephone and some have a cell-phone.

Of all Central Asian countries, Kazakhstan is the one in which the soybean is the most important as a commercial crop–by far. They probably have at least several thousand hectares planted to soybeans. The soybeans in Kazakhstan are run through an extruder (extrusion cooker) to make soybean oil and meal. These same extruders are also used to process cottonseed. Soybeans are grown in Central Asia largely because of the demand for meal by the local poultry industry for use in chicken feeds. Poultry is the driving force, and Central Asia is a "protein-poor" region. Walter's main reason for being there is because of poultry and (to a lesser extent) livestock; it is to help educate them about the soybean, its value for producing soybean meal and oil, and about the importance of protein. He helps farmers to grow soybeans and to develop markets for their beans. Actually, there is a ready-made market from poultry growers–who now have to pay a lot of freight to import their soybeans from Kazakhstan, Iran, Turkey, or India. The key is for Walter to serve as the bridge–to help bring the poultry growers and the potential soybean farmers together, to discover that they have a common interest, and then to work out agreements.

NGOs do lots of impact studies; they want their volunteers to work on projects that will have economic impact. They believe that increasing poultry production will have a positive impact on the economy and the people. The oil is also appreciated, and refined using modern technology within each country for use as a high-quality edible oil, sold in bottles at retail stores. Kazakhstan is about one-half the size of the United States, and is quite a progressive country with a market economy, fairly advanced education and technology. Soybeans are grown mostly in the very south. They were major crop during Soviet times (Russia was a major market for the oil and meal), but after Kazakhstan became independent in 1990, soybean production fell off to near zero. The economies off Central Asian countries plunged at about the same time (1989-91). They are now slowing getting back to where they once were.

The second most important country for soybeans (a very distant second, with maybe 300-500 hectares planted to soybeans) is the Republic of Georgia, where the western half is quite moist and the eastern half is very dry. They have a long history of growing soybeans. Walter knows of one company there that is processing soybeans using an extrusion cooker (similar to that made by Insta-Pro).

In third place might be Uzbekistan, followed by Turkmenistan, and Tajikistan–but all with only about several hundred hectares in soybeans.

Walter believes that soybeans could become a valuable double crop in Central Asia, planted after the wheat harvest in June. That would earn farmers more income, improve the soil, and break various insect and disease cycles. They need a legume in the rotation. The government does not help. They seem interested only in short term profit, keeping the status quo, and staying in power, not in innovation or long-term thinking.

In Tajikistan, he met a village farmer, Mr. Mahmadullo, who had the ability to build machines. He already had a small business making wheat flour using two motor-powered millstones. He worked with Walter to build a revolving soybean drum roaster; the outside was heated by natural-gas flames. After roasting a batch of about 20-25 kg of soybeans, he ground them into flour.

In Turkmenistan, Dr. Ashraf spent quite a bit of time working with a Korean community in the town of Dashoguz in making tofu. She also worked a lot with Peace Corps Volunteers (PCVs) in that same town; one of the PCVs was a Korean-American. Walter has not heard of any TVP being made in Central Asia; if its is made, it must be in very small quantity. In Uzbekistan, technologically the most developed, soybeans are being grown–often spread by volunteers. Address: 2804 Trent Drive, Fort Wayne, Indiana 46815. Phone: 260-484-7493.

12760. Stein, Joel. 2005. What's next... with the Amish. *Time.* Oct. 17.
• ***Summary:*** Stein panicked when his editor asked him to write a article for the What's New issue. He imagined spending long hours trying to "create a tofu that fails in its attempt to taste like yet another kind of meat."

12761. Hirayama, Tadao. 2005. Shôyu hattatsu shoshi: Sho kara shôyu e [Brief history of shoyu development: From *sho* to shoyu]. Tokyo: Printed by Hokazu Hachibori. 66 p. 26 cm. [47 ref. Jap]
• ***Summary:*** This excellent history, with many illustrations, is available from the Kikkoman International Institute for Food Culture (KIIFC), Noda, Japan.

Contents: Preface I. Chinese jiang: 1. Jiang was called different names by the raw materials which were used to make various types (p. 1). 2. How to make doujiang ("bean jiang") (p. 2). 3. Doujiang might have been a side dish and had a consistency like moromi (p. 4).

II. Japanese sho (hishio?): 1. From the "fish jiang" (*gyosho*) period to the "grain jiang (*kokusho*) period (p. 5). 2. *Sho* and *misho* were differentiated in the very early period (p. 5). 3. *Sho* was used having a consistency like moromi [quite like applesauce]. (p. 7).

III. The birth of shoyu: 1. Various types of *sho* and *misho* as seasonings (p. 9). 2. Characters used to write the word *shoyu* in Chinese documents (p. 10). 3. Kinzanji miso and shoyu (p. 11). 4. Popularization of Zen Buddhism and Tea Ceremony culture (p. 12). 5. *Tare miso* and *To Miso* (p. 13) 6. The birth of shoyu (p. 15).

IV. The path / road to becoming true shoyu: 1. Shoyu and tamari (p. 17). 2. The making of shoyu at Tatsuno: The birth of *sumi shoyu* (p. 18). 3. The process for becoming true

© Copyright Soyinfo Center 2013

shoyu (p. 20). 4. San koji (Scattered means not clustered Koji) and *mochi koji* (p. 21). 5. The birth of the true shoyu after the mid-17th century (p. 22).

V. Shi (kuki) or sho: 1. Shi (kuki) to shoyu (p. 24). 2. Fermentation in solid form and fermentation in liquid form (p. 25). 3. Research in recent years (p. 27 4). From simplicity to complexity; from only one to more varieties (p. 28). 5. Purpose of the production of sho (hishio) (p. 30). 6. Arrival of new technology made sho into Shoyu (p. 31).

VI. Production of shoyu in Edo period: 1. Production methods of shoyu from mid- to late 17th century (p. 33). *Ryori Monogatari* (Cooking Story) (p. 33). *Yoshu Fushi* (p. 34). *Honcho Shokkan* (*Honcho Shokukan*) (p. 34). 2. Things we cannot afford not to have in the kitchen *Wakan Sansai Zukan* (p. 35). 3. The best way is; Prepare (*shikomi*) shoyu in summer (during Doyo) and finish (harvest) in fall Bankin Sangyotai (Mankin sangyo bukuro) (p. 37). 4. Shoyu making at home Koekikokusanko (Translator's guess at meaning: Wide profit domestic products ideas?) (p. 39).

VII. Kudari shoyu and Kanto Jimawari Shoyu: 1. Kudari shoyu (p. 41). 2. Ama's (Nuns') namaage shoyu (p. 43). 3. Favorite flavor of people of Edo (p. 44). 4. Kamigata's (Kyoto Kansai area) Dashi (stock) and Edo's Dashi (stock) (p. 47). 5. Edo's Honkobushi (Honkare bushi? Honkosetsu?) (p. 47). 6. Kanto's jimawari shoyu (p. 48). 7. The method in Shinsen Hochotei (Shinsen Hocho Hashigo) (means Newly Selected Knife Ladder) (p. 51). 8. Making shoyu into a commercial product (p. 53).

VIII. Shoyu production in Kansai area: 1. Shoyu production on Shodoshima Island (p. 55). 2. Shoyu production in Tatsuno (p. 56). 3. Adding amazake to moromi to create Tatsuno shoyu's unique flavor (p. 57). 4. In Tatsuno they strongly believed in using Kohamaen (Kohama salt) (p. 59). 5. To make large production of shoyu, they used Ako's Saen (salt) (p. 61).

Conclusions (Summary). Main sources (Bibliography). Address: Japan.

12762. Ta Ti Hsing Machinery Co., Ltd. 2005. Soyfood processing machinery and equipment (Catalog). No. 8, Alley 13, Lane 183, Yu San St., Taoyuan, Taiwan, R.O.C. 6 panels. 30 cm. [Eng; Chi]

• ***Summary:*** The full color catalog of tofu and soymilk equipment contains 3 panels of photos and name (in English and Chinese) of different production systems. One panels shows an elaborate flow chart for making filled lactone silken tofu, firm / soft / or silken tofu, spiced tofu (tokan), Long life soymilk, and fresh soymilk. The last panel gives a company profile. This company, established by Mr. Cho in 1961, specializes in the development of soybean processing equipment and technology. For details: www.tati.com.tw.

Brief chronology: 1961–Ta Ti Hsing Machinery Co., Ltd. founded by Cong-Qian Cho at No. 27 Chung San North Road, Taoyuan, Taiwan. He develops the No. 1 Grinder and a replacement for traditional hand-turned stone mills. He soon develops the semi-automatic steam boiler, cooker, filter machine, and manual press.

1980–The company moves to No. 8, Alley 13, Lane 183, Yu San St., Taoyuan, Taiwan. Mr. Cho is still the owner, president and general managing.

1990–Mr. Cho retires and his son, Chien-Wang Cho takes his place as president and general manager.

2005–Mr. Cho is starting to research an automatic production line with PLC human touch system to improve equipment for the international market. Since the company has the reputation of being No. 1 in Taiwan, they are going to focus on the international market. Address: Taoyuan, Taiwan. Phone: 866-3-362-1848.

12763. *Daily Post* (*Liverpool, England*). 2005. Premier swallows up another healthy eating company. Nov. 2. Business section.

• ***Summary:*** Premier Foods, owner of Quorn, purchased Cauldron Foods yesterday for £27 million. Cauldron Foods sells its vegetarian sausages, falafel, tofu, and other meatless products from its factory at Portishead, near Bristol. Cauldron employs 215 people, generates 92% of its annual sales of £14.7 million from sales of its own brand, and had pre-tax profits last year of £1.3 million.

With the acquisition, Premier Foods has added to its portfolio of manufacturers of meat-free products and captured a larger share of the growing British market for healthy foods and meals.

In June, Premier Foods paid £172 million to acquire the maker of Quorn, which is now the largest brand in its portfolio that includes Ambrosia custard, Branston Pickle, Cadbury Hot Chocolate, and Sarson's vinegar.

Robert Schofield, Premier's CEO, said Cauldron was attractive because of its focus on the UK market.

12764. Shurtleff, William; Aoyagi, Akiko. 2005. Wei ceng zhi shu [The book of miso]. Taipei, Taiwan: Persimmon Cultural Enterprise Co., Ltd. 280 p. Nov. 14. Illust. by Akiko Aoyagi. No index. 26 cm. [Chi]

• ***Summary:*** A very attractive, complex character, Chinese-language edition of *The Book of Miso*. A slightly revised edition (different color cover) was published in mid-2012. Address: 1. Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

12765. *SoyaScan Notes*. 2005. Chronology of John Bartram (1699-1777), early American botanist of Philadelphia, Pennsylvania. Compiled by William Shurtleff of Soyfoods Center.

• ***Summary:*** John Bartram (1699-1777) was America's first great botanist, naturalist, and plant explorer.

1699 May 23–John Bartram is born into a poor Quaker family in Darby, about 5-6 mile southwest of the center of

© Copyright Soyinfo Center 2013

Philadelphia. He looses his parents at an early age and is raised by his grandparents on a farm in Darby. He receives a good basic education until age 12 at Darby Meeting School. Then he becomes a farmer.

1723 April 25. At age 23, he marries Mary Maris; they have two sons, Richard and Isaac.

1727–His wife, Mary Morris, possibly from complications at childbirth. Their first son, Richard, died soon afterward. At about this time he begins his botanical exploration and collection.

1728–He buys a small stone house and 102 acres of land in the rural township of Kingessing on the banks of the Schuylkill River (pronounced SKU-kul), about 3 miles from Philadelphia. The house had been built in 1684 by Swedish settler Peter Yocum.

1729 Dec.–John, now age 30, marries a second time to Anne Mendenhall and begins a major expansion of his house. In a 5-acre plot between his new house and the river, he begins his famous botanical garden, frequently (though incorrectly) cited as "the first in America." However it certainly was among the first, and quickly surpassed all others in the Philadelphia area. It is also the oldest botanical garden in the USA to have remained intact until the present.

1730-31–John begins the construction of his stone house, incorporating the earlier building as a kitchen on the first floor, and a bedroom on the second. Over the years he added to the house. The outbuildings, all built by the Bartrams out of stone, consist of a seedhouse (1737), a stable and carriage shed (1743), and the barn built by John, Jr. (1775).

1732–Bartram begins to correspond with Peter Collinson (about 5 years older than John), a wealthy London cloth merchant and fellow Quaker with a keen interest in botany. The connection was mutually beneficial. Collinson wanted seeds, bulbs, and cuttings of American plants and was willing to pay for them. He benefited greatly from Bartram's excellent field work. Bartram, in turn, received advice, encouragement, money, and (most important) a steady supply of books about natural history. Although they never met, the 2 men carried on a lively correspondence for more than 36 years until Collinson's death.

1742–Bartram is one of the co-founders of the American Philosophical Society with Benjamin Franklin.

1739 April 20–William Bartram is born to John and Ann, the fifth of nine children. John is almost 40 years old. William later received an excellent formal education, showed an early interest in drawing and natural sciences, and accompanied his father on numerous collecting trips. John called him "Billy, my little botanist."

1765–He is appointed Royal Botanist by George III, with help from Collinson; he held the post until his death. The appointment is accompanied by an annual stipend of 50 pounds sterling; this enables Bartram and his son, William, to make a long-hoped-for collecting expedition to "the Floridas." His specimens were sent to Collinson and to the King of England.

1769 Jan. 16–"Sample of Chinese Vetches [soybeans], six bottles of Soy [sauce] and six pounds of powdered sago presented with a letter from S. Bowen of Georgia" to the American Philosophical Society (APS).

1768 April 11–John Collinson dies in England. He had been the most important man in furthering Bartram's career and botanical business. Dr. John Fothergill, also a Quaker, became John's main contact person in England and Europe.

1769 March 3–At a meeting of the APS, the soybeans sent by Samuel Bowen are distributed to John Bartram and his son, and 7 other farmers. They are asked to report back on their results.

1770 Jan. 11–Benjamin Franklin, now in London, writes a Letter to John Bartram in Philadelphia, describing the enclosed Chinese Garavances / Caravances (soy beans) and how they are used to make tofu.

1773–After several unsuccessful attempts at business and farming, William sets forth on a four-year solitary journey through 8 southern colonies. He makes scores of drawings and takes meticulous notes on the flora, fauna, and native American Indians.

1777 Sept. 22–John Bartram, age 78, dies in Darby near Philadelphia. He had been married twice and fathered 11 children, two of whom had died in infancy. British soldiers are occupying the city during the American Revolution.

1780 Dec. 26–Dr. John Fothergill dies in England.

1789–Ann Bartram dies. With the revolutionary war over, William Bartram helps his brother, Johnny, to re-start the nursery business.

1783–The first printed plant catalog in America is issued for Bartram's Botanical Garden. Over the years, these catalogs continues to grow.

1791–William Bartram's journals are published as *Travels.* The book went into several foreign editions and today is regarded as a classic of American natural history.

Under the leadership of John Bartram's son, John Jr., his granddaughter, Ann, and her husband, Robert Carr, Bartram's Garden becomes a flourishing commercial nursery, which supplied plants for many famous places and people. In their botanic garden and greenhouses, the Bartrams eventually propagated more than 4,000 species of native and exotic plants.

1804–James Mease writes in *The Domestic Encyclopedia:* "The Soy-bean bears the climate of Pennsylvania very well. The bean ought therefore to be cultivated."

1807–The catalog for Bartram's botanical garden is now 33 pages long, includes 1,500 plants, and includes a history of the garden written by William.

1823 July 22–William Bartram, age 84, dies at the family home.

1849–The book *Memorials of John Bartram and*

© Copyright Soyinfo Center 2013

Humphrey Marshall, by William Darlington published (facsimile edition 1967).

1850–Andrew Eastwick buys Bartram's garden to preserve it for posterity. John Bartram's garden, which stretches from the house down to the river, was maintained until 1850; then it was abandoned until 1923, when active restoration was begun. Replanting was strictly confined to the plants grown by John and William Bartram.

1891–The garden becomes part of Philadelphia's public park system.

1893–The descendants of John Bartram form the John Bartram Association to assist the City of Philadelphia with preservation of the site.

1965–The Bartram House is designated a National Historic Landmark.

1999–The John Bartram Association hosts a Tercentennial Celebration to commemorate the 300th anniversary of John Bartram's birth. Today (2005) it is operated as a museum and public garden, centered on Bartram's original house and garden.

12766. Richmond, Akasha. 2005. Hollywood dish: More than 150 delicious, healthy recipes from Hollywood's Chef to the Stars. New York, NY: Avery–A member of the Penguin Group (USA) Inc. xi + 310 p. Illust. Index. 25 x 20 cm. [125 ref]

• ***Summary:*** One of the most original and interesting cookbooks seen in decades. This book, originally titled *Healthy Hollywood,* is much more than just a collection of superb recipes and stories about Hollywood celebrities and glitterati. In carefully researched and well-written sidebars, it documents the history of health foods in Hollywood and southern California. The introduction to each chapter tells the history of that type of food, and every recipe has a long and interesting historical headnote. The acknowledgments show vividly Chef Akasha's high and wide circle of Hollywood friends. The introduction–"The Road to Hollywood" tells the story of how Akasha got interested in and researched this subject. History is woven into every page of this book–in the most palatable way. In short, this is a cookbook with a remarkable tale to tell–one to read and study–as well as one to cook from.

Sidebars and illustrations: (1): "The stars and the Hollywood Diet"–Sue Carol (lovely future wife of Alan Ladd) on the cover of *Motion Picture* magazine, Oct. 1929. (2) Mildred Lager (1908-1960). (3) Harry Chandler (1864-1944). (4) Granola (Layton Gentry, Adelle Davis, Dorothea Van Gundy Jones). (5) Photo of silent film star Anita King eating Sun Maid Raisin Pie, 1916. (6) Adelle Davis (1904-1974). (7) Clarke Irvine, 1892-1975. (8) Photo of Radiant Radish health food store, owned by Beach Boy Brian Wilson, Los Angeles, 1969. (9) Otto Carque, 1867-1935, with a photo of his health wagon, around 1912. (10) Gayelord Hauser (1895-1984). (11) "Nature Boy"–Bill Pester and the 1948 hit song by Eden Ahbez. (12) The Ashram–Hollywood restaurant founded by Anne-Marie Bennstrom. (13) The Hollywood diet, with a photo of page 1 of the "18-Day Diet" from *Motion Picture* magazine, Oct. 1929. The sidebar begins: "The first best-selling diet book in America, *Diet and Health, with a Key to the Calories,* was written by Los Angeles-based Dr. Lulu Hunt Peters in 1918, and sold over 2 million copies. The book introduced the concept of counting calories." (14) Alan Hooker (1902-1993). The grandfather of California cuisine, he opened the Ranch House restaurant in 1956 in Ojai, California. (15) Gloria Swanson–Hollywood's Green Goddess. She "was the highest paid and most popular, influential star of the 1920s." (16) Jim Baker (1922-1975). A pioneering organic restaurateur, he Opened the Aware Inn in 1957, then the Source restaurant in 1969. (17) Raw, raw, raw (Arnold Ehret, Vera and John Richter, and raw foods). (18) Photo of silent film star Mary Pickford drinking orange juice made with Sunkist fruit and juicer. (19) The godfather of fitness–Jack LaLanne. Master chef Danny Kaye (1913-1987). (20) The Farmer's Market in Los Angeles, started in 1934. (21) Paul Bragg (1881-1976), with photo of Rita Hayworth on the cover of his *Health Builder* magazine. (22) Books and cooks–"150 Recipes of the Stars (1928), Helen Evans Brown. (23) Health foods–Dr. John Harvey Kellogg, the rise of health food sections in the late 1800s in L.A. department stores, the rise of health food stores, Sandy Gooch. (24) Mae West (1893-1980). Gypsy Boots (1914-2004). Photo of Boots and Paul Bragg. (25) Food and film. (25) Photo of Donna Reed and Paul Bragg, sometime in the 1950s. (26) Bernarr Macfadden (1868-1955). (27) Celebrity stew and Leo Pearlstein. (28) Vegetables, fruits, and nuts (incl. Frieda Caplan, Albert's Organics). (28) Rancho La Puerta and the Golden Door. Photo of young Burt Lancaster baking bread at La Puerta. (29) Fred Waring (1900-1984), the blender, and smoothies. (30) Hain Pure Foods. "Harold Hain opened his first health food store in downtown Los Angeles on October 17, 1926." (31) Swamis and yogis. Paramahansa Yogananda arrived in L.A. in 1925; he advocated a healthy vegetarian diet, including in his magazine *East West,* first issued in 1926. On 8 April 1951 he opened SRF India Café at his India House compound on Sunset Boulevard. "Yogi Bhajan (1930-2004) came to Los Angeles in 1969, bringing the teachings of Kundalini Yoga and his own unique style of Indian and Ayurvedic cooking. In 1974 his students opened Golden Temple Conscious Cookery in Los Angeles. I [Akasha] was a cook there from 1979 to 1984..."

Soyfoods are used in recipes (and recipe titles) throughout this book: Edamame or fresh green soybeans (used in 2 recipes), miso (1 recipe), soymilk (many, especially in place of milk in desserts, incl. "Chocolate Jack Daniel's soy gelato" and "Soya chocolate" milk), soy flour (1, Bill Baker's bread), soybeans (whole, 1, "Soybean casserole"), tofu (10), and tempeh (4).

Also discusses: Sophie and Harry Cubbison (p. 47), El

© Copyright Soyinfo Center 2013

Molino Mills (p. 106). Early veggie burgers (p. 106). Silk soymilk and Steve Demos (of White Wave, p. 266).

The recipes in this book are largely vegetarian (including 17 vegetarian main dishes), all call for organically grown ingredients, and many are dairy-free (using soymilk instead of cow's milk). However: Beef (used in 2 recipes, incl. "Fillet mignon Japanese"). Pork (used in 1 recipe, "Citrus roasted pork chops with rosemary potatoes"). Chicken (used in 6 recipes, incl. "Endive petals with curried chicken salad"). Turkey and duck (3 recipes). Fish (many recipes as for cod, halibut, salmon, whitefish). Shellfish (crab, scallops, shrimp).

Talk with Akasha Richmond, who calls. 2005. Dec. 7. Her favorite parts of the book are: The smoothie story. Otto Carque. Gloria Swanson. Yogis and Swamis, Granola. She is very happy with everything about the way the book and its promotion turned out ("It looks great")–except she wishes she could have included more photos. Address: Los Angeles, California.

12767. **Product Name:** Soyettes [Teriyaki, Barbecue, Jamaican Jerked].
Manufacturer's Name: Soya Foods.
Manufacturer's Address: 8 Frontenac St., Dorchester, MA 02124-3902. Phone: 617-282-1000.
Date of Introduction: 2005.
Ingredients: Tofu.
New Product–Documentation: Gavin, Robert. 2006. "Meat-like qualities whet the US appetite for tofu: Biologist tackles taste, texture issues." *Boston Globe.* Jan. 2. Xiang F. Kong has developed a new tofu product named Tofettes, in flavors such as teriyaki, barbecue, and Jamaican jerked.

12768. Andoh, Elizabeth. 2005. Washoku: Recipes from the Japanese home kitchen. Berkeley, California: Ten Speed Press. vii + 320 p. Illust. (many color). Index. 25 x 25 cm.
• ***Summary:*** A beautiful book. Contains a section titled "Tofu and eggs" (p. 268-93), plus many recipes that use miso, shoyu, edamame, kinako ("toasted soy flour"), and amazake. Address: Japan.

12769. Bennett, Beverly Lynn; Sammartano, Ray. 2005. The complete idiot's guide to vegan living. New York, NY: Alpha. 360 p.
• ***Summary:*** "It's not a diet–it's a lifestyle." The vegan lifestyle means compassion for all living things. It means eliminating animal foods and animal products from one's diet. True vegans avoid the use of honey, and don't wear animal skin (leather, suede) or fur. Many avoid silk, made by suffocating silkworms inside their cocoons.

Contents: Part 1: Compassion for all. 1. Why be vegan? 2. Vegan 101 (incl. famous vegetarians and vegans, the Vegetarian Society of the UK, the Vegan Society emerges, Donald Watson, coming to America–Dr. Catherine Nimmo and Rubin Abramowitz, Jay Dinshah, ahimsa). 3. Key to good health. 4. Starting your vegan transition. Part 2: Clearing up misconceptions. 5. But you need meat for protein. 6. But you need dairy for calcium. 7. But carbohydrates make you fat. 8. Vegans are all weak and sickly.

Part 3: A vegan survival guide. 9. Nourishing yourself. 10. Seeking supplementation. 11. Raw foodists: Raw and uncut. 12. Oh baby! Bringing up baby. Part 4: Veggin' it; Tips for maintaining a vegan lifestyle. 13. Handling family and friends. 14. Dining, vegan style. 15. Supporting your ideals. 16. Buying your vegan eats.

Part 5: Substitution is the mother of invention. 17. Using protein alternatives (incl. Demistifying soy products: soy sauce, the incredible tofu, tempting with tempeh, playing tricks with TVP). 18. Doing without dairy and cheese. 19. Vegan baking substitutions. Part 6: Vegan food for the soul. 20. Breakfast ideas. 21. Lunch and lighter fare. 22. Main and side dishes. 23. Baked goods and desserts.

Part 7: Vegan lifestyle choices. 24. Body care and personal items. 25. Dressing to impress. 26. Other things to consider. Appendixes: Glossary, resources.

The index contains 17 entries for tofu, 16 for soybeans, 7 for tempeh, 3 for seitan, 2 for TVP, and 1 each for edamame, nondairy milk substitutes, shoyu, soy milk, tahini, tamari, and tofurky.

"This book offers a vegan food pyramid, fifty vegan recipes, tips on finding animal-free products and hints for reading ingredient lists and other labels to find 'hidden' animal ingredients or byproducts" (publisher's statement). Address: 1. Vegan chef and author, Eugene, Oregon; 2. Musician, web developer, and Beverly's life partner.

12770. Brackett, Sylvan; Moore, Sue; Downing, Wendy. eds. 2005. The slow food guide to San Francisco and the Bay Area: Restaurants, markets, and bars. White River Junction, Vermont: Chelsea Green Publishing. x + 335 p. Illust. Maps. Index. 22 cm.
• ***Summary:*** Tainan Restaurant, 218 Barber Court, Milpitas (p. 61) is a Taiwanese street-food cafe that offers "deep-fried 'stinky' tofu."

At Sunset Super (p. 254-55), located in Outer Sunset (2425 Irving Street, between 25th and 26th Avenues in San Francisco. Phone: {415} 682-3738) the aisles are packed with preserved foods of every variety, some identified only by Chinese characters. Among these you will find "jars of preserved tofu [probably fermented tofu] in a whole range of treatments."

The word "tofu" appears on 15 pages in this book: 52 ("cold tofu salads." "Spicy Bean Curd Beef"), 57 ("classic Preserved Egg with Tofu plate"), 58 ("a variety of lamb, beef, seafood, and tofu selections"), 105 ("fried tofu {*aburage*}), 110 ("a delicious tofu soup"), 111 ("bean sprouts, tofu,...". The new glucose revolution: The authoritative guide to the Glycemic Index–The dietary solution for permanent weight loss. Emmaus, Pennsylvania: Rodale Press. xvii + 382 p. Subject index. Recipe index. 24 cm. [32 ref]

• ***Summary:*** Contents: Introduction. Part I: What is the glycemic index? 1. What's wrong with today's diet? 2. Why we all need carbohydrate? 3. All about the glycemic index. 4. Fats: Facts and fallacies. 5. The most frequently asked questions–Answered. Part II: Your guide to low-GI eating. 6. Making the change to a low-GI diet. 7. Cooking the low-GI way. 8. Recipes–Breakfasts, light meals, main meals, desserts, snacks.

Part III: The glycemic index and you. 9. The glycemic index and weight control. 10. The glycemic index and diabetes. 11. The glycemic index and hypoglycemia. 12. The glycemic index and heart health: The insulin resistance syndrome. 13. Children and the glycemic index. 14. The glycemic index and peak sports performance. Part IV: The glycemic index tables. The tables: An introduction and how to use them. Condensed tables. Comprehensive tables. Further reading: Sources and references. Glossary. Acknowledgments. About the authors.

Carbohydrates are digested and absorbed into the bloodstream as glucose, sometimes called blood sugar. When glucose levels rise, the hormone insulin is released into the blood. Insulin helps cells absorb fat and glucose from the blood, allowing the cells to use the nutrients for energy. Some carbohydrates are converted to glucose more gradually than others. The glycemic index (GI) is a measure of how quickly carbohydrates are broken down and absorbed into the blood. A meal with high a GI causes a surge in the release of insulin, which is associated with increased risk for CVD, diabetes, and possible cancer.

"The right kind of carbohydrate can make an important contribution to the quality of your life." That is the essential message of this book, which is about the glycemic index, a physiologically based measure of carbohydrate quality, and the degree to which the carbohydrates in different foods will raise blood glucose levels. The newer idea of glycemic load is also relevant for everyone. The first book about the glycemic index (GI), titled *The Glucose Revolution* (1996) was written by these same authors. Carbohydrates that break down quickly during digestion have high GI values, and they raise blood glucose rapidly to a high level. Carbohydrates that break down slowly, releasing glucose slowly into the blood stream, have low GI values. Glucose is blood sugar. Low fat diets are automatically high in carbohydrate, But not all carbohydrates are the same. Are all starches good for health? Are all sugars bad? We all must look at carbohydrates in a whole new way!

A healthy diet leads to neither too much nor too little blood sugar. Extreme #1: Too much blood sugar. The typical American diet, which is high in refined carbohydrates (such as table sugar and white flour), results in too much blood sugar. This causes your pancreas to flood your body with the hormone insulin and makes it difficult for your body's cells to burn fat.

Extreme #2. Too little blood sugar. Diets low in carbohydrates cause blood sugars to plunge, which also makes your body stop burning fat. Instead it begins burning muscle tissue and converting it into blood sugar. You quickly begin to crave carbohydrates.

Low GI is less than or equal to 55. Moderate GI is 56-69. High GI is 70+.

Prevention says that "high-GI foods" (those with a GI of 70 or above) are bad. "Forget total carbs; its total GI that matters." There are good carbs (low-GI) and bad carbs. A low-GI diet is generally a healthy diet, a weight loss diet, and a diet with low risk of diabetes. A large and growing body of research now reveals that the real issue isn't how much fat or carbohydrate you are eating, but how that food affects your blood sugar. Eating high-GI foods causes sharp spikes in blood sugar. Since blood sugar is a readily available energy source, your body chooses to burn it as fuel, in place of fat. This means you are not burning fat, no matter how hard you exercise.

The Glycemic Index (GI) is a precise scientific ranking of foods based on how much they increase blood sugar levels during a 2-hour period after eating. Current methods of measuring GI use glucose (blood sugar) as the reference food, giving it a GI value of 100 by definition. The GI was first created as an aid to diabetics.

Low-GI foods: Fruits: Apples 40, banana 51, blueberries 40, cherries 22, grapefruit 25, orange 51. Vegetables: Asparagus, beans (all), broccoli, cabbage, lettuce, mushrooms, onions. Breads: Pumpernickel, rye, sourdough, whole wheat. Dairy products. Eggs. Nuts. Seeds.

Soyfoods are not discussed much in this book since they are low in carbohydrates. However: Recommendation 3 (p. 112-13): "Eat more legumes (beans, peas, and lentils) and use nuts (in small amounts) more frequently." Legumes, including soybeans, are inexpensive, low in calories, free of unsaturated fat and cholesterol, filling. "Soybeans are particularly rich in ALA [alpha-linolenic acid, the plant form of polyunsaturated omega-3 fat] (the plant precursor of omega-3s) and also contain genistein–an anti-cancer

© Copyright Soyinfo Center 2013

phytochemical. Tofu (soy bean curd) is an easy way of using soy. It has a mild flavor itself but absorbs the flavors of other foods, making it delicious when its been marinated in soy sauce, ginger and garlic and tossed in a stir-fry."

The section on the GI values of different food types states, under legumes (p. 129): "Soy beans (GI value of 14-20). These have one of the lowest GI values, possibly due to their higher protein and fat content. Their viscous [soluble] fiber, as in other legumes, reduces physical availability of starch to digestive enzymes."

On p. 329 is a table showing the GI value and glucose load per serving of various soy milks and soy yogurts (mostly from Australia). Similar values are given for soy beans (p. 337).

Concerning ALA (p. 115): "Our bodies can convert this plant-based omega-3 fat to EPA [eicosapentanoic acid, an essential omega-3 fatty acid found in fatty fish and shellfish] and DHA [docosahexanoic acid, another essential omega-3 fatty acid found in fatty fish], but it takes about 10 grams of ALA to yield 1 gram of DHA and EPA."

Is this a weight-loss book that does not mention calories? No, although calories and energy are considered less important than GI (see p. 133, 202, 205). Address: PhD, Prof. of Nutrition, Univ. of Sydney, Australia; 2. M.D., PhD, Prof., Dep. of Nutritional Sciences, Univ. of Toronto, Canada.

12772. Broihier, Kitty; Mayone, Kimberly. 2005. The big book of low-carb: 250 simple, delicious, nutritious recipes. San Francisco, California: Chronicle Books, LLC. 368 p. Index. 21 x 21 cm.

• ***Summary:*** In this book, soy is mentioned on 33 pages, soy sauce on 18 pages, edamame on 8 pages, "soy nuts" on 8 pages, tofu on 7 pages, black soybeans on 4 pages, "soy crumbles" (textured defatted soy flour) on 5 pages, tamari on 5 pages, tempeh and miso on 4 pages each, "vanilla soy chiller" on one page (327), and "soy protein" powder on 1 page (60). Neither "soy milk" nor soymilk is mentioned.

For black soybeans: Weeknight pork and soybean chili (p. 124). A "Note" on p. 124 states: "Black soybeans are perfect for low-carb cooking because of their low-carb, high-protein nutritional profile. They're a good stand-in for black beans in any favorite, too." Seasoned black soybeans (p. 285).

Vegetable and bean soup (with "One 15-ounce can white soybeans, rinsed and drained," p. 111). The headnote states: "Vegetable soup is one of Kim's all-time favorites." Feel free to use your favorite seasonal vegetables. "If you haven't tried canned white soybeans yet, seek them out at your natural-foods store; they give the soup added protein, fiber, and texture." Address: 1. M.S., R.D.

12773. Feral, Priscilla; Hall, Lee. 2005. Dining with friends: The art of North American vegan cuisine. Darien, Connecticut: Friends of Animals, Inc. iii + 164 p. Foreword by John Robbins. Illust. (some color). No index. 21 x 23 cm.

• ***Summary:*** The Foreword, by John Robbins, contains this lovely prayer from the Buddhist teacher Thich Nhat Hanh.

"Let us fill our hearts with compassion
"towards ourselves and towards all living beings.
"Let us pray that all living beings realize
"that they are brothers and sisters,
"all nourished from the same source of life.
"Let us pray the we ourselves cease to be
"the cause of suffering to each other.
"Let us plead with ourselves to live in a way
"which will not deprive other beings
"of air, water, food, shelter, or the chance to live.
"With humility,
"with awareness of the existence of life,
"and of the sufferings that are going on around us,
"let us pray for the establishment of peace
"in our hearts and on the earth."

This vegan cookbook contains many soy recipes, for example: Scrambled tofu. Believable bacon (with "8 ounces firm tofu, drained, p. 12). Spinach dip for raw vegetables (with "1 cup Tofutti brand Imitation Sour Cream, p. 19). Veggiessoise (with "1 cup soy creamer {such as White Wave's 'Silk' creamer}," p. 36). Tofu spinach lasagne (p. 60). Tofu hummos with toasted cumin seed (with "12 ounces soft tofu," p. 109). Sweet dessert cream (with "1 package {12.3 ounces} Mori-Nu Silken Firm Tofu," p. 126). Key lime pie (with "1 package {12.3 ounces} Mori-Nu Silken Lite Firm Tofu," p. 130). Soy milk is called for in many recipes.

The Glossary (p. 153-61) includes: Antioxidants (steaming causes minimal loss of antioxidants; microwaving causes much loss). Brown rice syrup. Butter substitutes: See vegan margarine. Cheese (Added casein makes most commercial cheese alternative non-vegan; presently, however, Tofutti, Vegan-Rella, and Soymage Grated Soy Parmesan are vegan). Chocolate ("Both Ecco Bella and Paul Newman's brands offer vegan chocolate"). Cholesterol. Egg replacers (Ener-G Egg Replacer). Fruitarian. Gelatin. Genetically modified organisms ("GMO"); genetic engineering ("GE"). Lightlife. Linolenic acid. Miso. Nama shoyu. Nayonaise. Nutritional yeasts. Organics. Ovo-lacto vegetarian. Pareve (parve). Pesco-vegetarian. Protein. Soy milk. Stevia. Tamari. Tempeh. Tofu. Tofutti. Vegan (VEE-gun). Vegan society (www.vegansociety.com).

The Shopping guide" (p. 161-63) describes companies that make or sell vegan products,

On the rear cover we read: "Friends of Animals is an international, non-profit, animal advocacy organization, incorporated in the State of New York in 1957. We work to cultivate a respectful view of nonhuman animals, free-living and domestic. Our goal is to free animals from cruelty and institutionalized exploitation around the world."

On the inside rear cover are portrait photos and

© Copyright Soyinfo Center 2013

biographical sketches of Priscilla Feral, president of Friends of Animals, and Lee Hall, legal director for Friends of Animals. Address: 1. President; 2. Legal director. Both: Friends of Animals, New York.

12774. Fu, Peimei. 2005. Peimei shi pu. Di er ce [Pei Mei's Chinese cook book. Vol. II]. Taipei, Taiwan: Ju zi wen hua shi ye you xian gong si. 386 p. Illust. (color). No index. 22 cm. [Chi; Eng]

• ***Summary:*** Fu Pei Mei is considered by many Chinese to be one of the best Chinese chefs alive today. This book, which first appeared in July 1974, contains 110 recipes categorized by ingredients under 11 separate headings, such as chicken, duck, pork, beef, fish, shrimp and seafood. The majority of the recipes in this book are based on meat, poultry, fish or eggs (animal products). Contents: Foreword. Introduction. About the Chinese menu. About Chinese condiments and spices: Glossary includes: 1. Soysauce (made from fermented soybeans, comes in light, medium, and dark colors. Kikkoman is a good example of medium). 9. Hot bean paste ("Made from red hot peppers, flour, soybeans, salt, and other condiments"). 11. MSG. 18. Bean curd. 19. Dried bean curd sheets (skin). 20. Bean sprouts (mung or soy). 21. Bean pastes ("Thick brown pastes prepared from soy bean flour and flavorings. Sweet types have sugar added and resemble pureed dates"). 22. Sweet red bean paste ("Made from red [azuki] beans. Almost all Chinese desserts use this for the filling. Mash the cooked beans in a strainer. The paste will come out leaving the skin"). Contents of recipes. Abbreviations, weights & measures. Contents of color photos. Index of recipes Vol. I. English-Chinese list of foodstuffs. About the author. Copyright.

Seating: The guest of honor sits in the seat at the inner side of the room, facing the entrance, while the seats on the serving side are for the host and hostess. The guest of honor always sits facing the host (p. 10).

After the "abbreviations" page are 4 full-page numbered color photos of Chinese tableware, vegetables, special ingredients, and Chinese individual place setting used in this book, and the numbered name of each item, in both Chinese and English, facing the photo. Among the vegetables is: 27. Fresh soybean (*maodou*). Among the special ingredients is: 2. Beancurd sheet (*doufu-pi*). 14. Bean curd threads (*gansi*). 21. Bean curd (doufu). 26. Fermented black [soy] beans [fermented black soybeans].

For every recipe there is a large (often full-page) color photo with the recipe name in Chinese and English, and the page number of the recipe. All the recipe photos come in a block before the recipes themselves. Each Chinese recipe is on the left page of the 2-page spread, and its English counterpart is on the right page. The ingredients for each recipe are in two rows at the top, in exactly the same relative place, to make finding the Chinese characters easy.

Recipes include: Braised soysauce duck (p. 157). Spareribs with fermented black beans (*Shih chih p'ai ku,* p. 177). Shredded pork with bean sauce (*Ching chiang jou szu,* with 2 tablespoons "sweet bean paste," *t'ien mien chiang* [pinyin: *tian mian jiang*], and soysauce, p. 186-87). Diced fish with fermented black beans (*Shih chih yü ch'iu,* p. 216-17). Steamed fish with fermented black beans and hot pepper (*Tou shih la chiao cheng yu,* with 2 tablespoons *dou shih* / fermented dried black beans," p. 226-27).

The chapter titled "Egg and bean curd" (p. 256-75) contains 10 recipes. Examples of the descriptions of bean curd in the ingredients listing are: "6 squares bean curd (3" x 3")." "8 pcs. [pieces] bean curd (1" x 2" x 1")." "4 pcs. tender bean curd (3" x 3"). "10 oz. thin dried bean curd strips" (*gansi*). On p. 276 is a half-page description of bean curd and related products.

More recipes: Assorted vegetarian dish (*Lo han chai,* with "1 bean curd stick," *fu chu / fuzhu* [dried yuba sticks], p. 289). Spinach and bean curd soup (*Po ts'ai tou fu keng,* p. 317). Chicken, ham and shrimp with bean curd shreds soup (*San hsien kan szu t'ang,* p. 319). Yu-T'iau ([crullers] p. 335). Noodles with minced pork and bean sauce (*Pei fan cha chiang mien,* with *maodou* / green beans, p. 339). Fried taro dumplings with sweet bean filling (*Tou sha yü tsao,* with "sweet [azuki] bean paste," p. 349).

A good portrait photo of Miss Fu appears on p. 371. Taiwan's popular T.V. chef, she "is also a producer and director. She has demonstrated over 600 different recipes from 1964 to the present. In 1955 Pei Mei's Chinese Cooking Institute was founded, In 1962 Taiwan's first television station was established. She accepted an offer to teach a demonstration cooking program once a week, starting in 1967. In 1969 she wrote her first volume, *Pei Mei's Chinese Cookbook.* The dishes were divided according to the geographical areas of China–North, East, South, and West. In 1977 Miss Fu began a weekly program on Japanese television.

The copyright page states that this book was published in the 80th year, 9th month of the Chinese calendar. Address: Cooking teacher, Taipei, Taiwan.

12775. Fu, Peimei. 2005. Peimei shi pu. Di san ce [Pei Mei's Chinese cook book. Vol. III]. Taipei, Taiwan: Ju zi wen hua shi ye you xian gong si. 388 p. Illust. (color). 22 cm. [Chi; Eng]

• ***Summary:*** Chinese cooking can be divided clearly into five major schools or branches: Shanghainese, Cantonese, Szechuanese, Peking-style, and Hunanese. These correspond roughly to Eastern, Southern, Western, Northern, and Central China. This 3rd volume, containing 130 recipes, consists of nine complete formal Chinese banquet dinners from different provinces: Kiangche (Shanghai style), Canton, Szuchuan [Szechwan], Peiping, Hunan, Fuk-ien, Taiwan, Vegetarian style, and Buffet dinner.

The number of special ingredients in the numbered color

© Copyright Soyinfo Center 2013

photo has been increased to 47 from 32. Interesting new ingredients include: 29. Sweet red bean paste [azuki]. 31. Green sea weed. 32. Laver [sheets of nori]. 34. Fresh bean curd skin. 35. Dried bean stick [dried yuba sticks, fuzhu]. 36. Bean curd sheets [dried yuba]. 37. Bean curd, dried [doufu-gan]. 39. Wheat gluten. 40. Steamed wheat gluten. 41. Fried gluten puff.

The basic format of this book is quite similar to that of Vol. II, but the color photos of recipes are arranged together in a group of about 12 pages at the beginning of each of the nine sections, and quite a few pages have two recipes per page.

Recipes include: Sauteed black mushrooms with soy sauce (p. 35). Stir-fried crab with bean sauce (*Chiang pao ch'ing shieh,* with 1 tablespoon "sweet soy bean paste" / *t'ien mien chiang / tian mian jiang,* p. 46-47). Stewed beef with hot bean sauce (*Yu hsiang nyu nan,* with 1 tablespoon "hot bean paste," (*la dou ban jiang*), p. 122-23).

The introduction to the section on vegetarian dishes notes: "Centuries ago in China, devout Buddhists and Taoists followed a strictly vegetarian diet, in keeping with their religious sanctions against the killing of sentient beings." The recipes in this section call for: Soy sauce (almost all). Soy bean soup stock (p. 313). Wheat gluten sticks (*su chang*) (each of which is made by rolling up a big sheet of wheat gluten, p. 315). Pieces of steamed wheat gluten and Pressed bean curd (*dou fu gan*) (p. 317). Cooked green vegetable soybeans (*shu mao dou,* p. 323). Sheets of bean curd skin, fresh or dried [yuba] (*toufu p'i / dou fu pi,* p. 323, 325, 331). Shredded dried bean curd (p. 327). Bean curd (p. 328).

More recipes: Braised beef with brown sauce (with 1 tablespoon "hot bean paste" (*la dou ban jiang*) and ½ tablespoon "soybean paste" (*tian mian jiang*), p. 360-61). Sautéed bean curd balls (p. 369). Two good portrait photos of Fu Pei Mei appear on page 296. Address: Cooking teacher, Taipei, Taiwan.

12776. Fujii, Mari. 2005. The enlightened kitchen: fresh vegetable dishes from the temples of Japan. Translated by Richard Jeffrey. Tokyo, New York, London: Kodansha International. 107 p. Illust. (photos by Tae Hamamura). Index. 26 cm.

• ***Summary:*** This is a lovely Japanese vegan (and vegetarian) cookbook filled with the spirit of kindness and of Zen–and with color photos on almost every page. It discusses and describes the ancient tradition of *shojin ryori,* the plant-based diet which originated in Japan's Buddhist temples. The author, who is the wife of a Buddhist monk, has taught temple cuisine for over 20 years. Her husband, Sotetsu, lived as a monk for ten years in various Buddhist temples; he also trained as the tenzo (head cook).

In this book she presents 60 beautiful, delicious, health-giving, and heart-warming recipes, many adapted to Western kitchens but all true to their roots. A majority of the recipes contain soyfoods in one form or another.

The helpful glossary includes descriptions of edamame beans, hijiki, karashi mustard, konbu, Koyadofu ("freeze-dried tofu"), miso, natto, nori seaweed, pickled plum paste, saké, sesame paste, sesame seeds, shiso (perilla), soy sauce, soybeans, sukikonbu, tofu, umeboshi pickled plum, usu-age tofu, wakame seaweed, wasabi, yuba, yuzu.

The index contains 20 entries for miso, 15 for tofu (p. 15, 24, 29, 32, 39, 41, 42, 48, 51, 53, 56, 62, 71, 100, 104), 6 for soymilk (p. 17, 45, 47, 94, 99, 104) 4 for edamame (p. 16, 35, 68, 99), 3 for deep-fried tofu (p. 32, 42, 71, 104), 3 for natto (p. 44, 50, 100), 2 for teriyaki (p. 48, 62), 2 for Koyadofu (p. 48, 100), 2 for usa-age (thin slices of deep-fried tofu; p. 32, 104). 2 for yuba (p. 47, 104). A small color photo on the inside rear dust jacket shows Mari Fujii. Address: Cooking teacher, Kamakura, Japan.

12777. Hellmiss, Margot. 2005. Mit Soja durch die Wechseljahre [Using soy through the menopause years]. Munich, Germany: Suedwest Verlag. 96 p. Illust. (color). Index. 20 x 18 cm. [Ger]

• ***Summary:*** An attractive book, with many fine color photos on glossy paper. Contents: Soybeans–Tradition and history (Healing plant from China): Productive source of protein, tofu–quark with a longer tradition, triumphal procession around the world, great economic significance, soya and genetic engineering. Fundamental changes of the menopause years (What happens during these years?): Hormonal changes, the right attitude helps, the new understanding of women, many hormones influence the body, men also experience menopause, questionable preparations, Hormone Replacement Therapy–Pros and cons. Natural help from soy isoflavones (remarkable phytoestrogens): The active agent of plant hormones, the effectiveness of isoflavones, natural SERMs, safeguard against osteoporosis, estrogen protects the circulatory system, soy hormones as free-radical catchers, the end of hot flashes, strong powers of resistance and smooth skin, isoflavones will take good care of you.

Soyfoods that contain isoflavones (A great variety): Whole dry soybeans, soymilk, tofu, soy oil, soy flour (*Sojamehl*), soy flakes (*Sojaflocken*), soy bran (*Sojakleie*), tempeh, natto, soy granules, soy sauce, shoyu and tamari, miso, lignans. Soybeans: A powerful package for your health (Plant protein as an alternative): Indispensable protein, lecithin, minerals, B vitamins for strong nerves, vitamin E–the fountain of youth. Recipes for enjoying soya (Basic recipes): Hors d'oeuvres and salads, soups, pasta, main dishes, sauces, dips, and bread spreads, mueslis, desserts, and baked goods, beverages.

12778. Hu, Shiu-ying. 2005. Food plants of China. Hong Kong: Chinese University Press. xvi + 844 p. Illust. Index. 26 cm. [350+ ref]

• ***Summary:*** This is a truly remarkable book–the most

© Copyright Soyinfo Center 2013

original and comprehensive book seen to date on the food plants, plant foods, and the economic botany of China. It is the author's supremely valuable life's work.

Contents: Foreword by Richard Evans Schultes (Director, Botanical Museum of Harvard University, Emeritus). Foreword by George W. Staples, III (Bernice P. Bishop Museum, Honolulu, Hawaii). Introduction: Why the book and to whom is it addressed. Illustrations (numbered but on unnumbered pages).

Part I: Cultural aspects of Chinese foods. 1. The sources and nature of information. 2. The production and preparation of Chinese plant food. 3. Selected Chinese food plants with instruction for preparation. 4. Spices and flavoring materials. 5. Health food (*bupin*) and herbal tea (*liangcha*).

Part II: Botanical aspects of Chinese food plants. 6. Nonvascular plants. 7. Vascular plants (incl. spermatophytes {seed-bearing plants} and angiospermae {flowering plants}, incl. monocotyledons and dicotyledons). Bibliography. Latin name index. Chinese name index. English name index.

On the inside front cover and facing right-hand page is a large map of China, with each province shown, and the localities of Shiu-Ying Hu's botanical activities in China clearly show in symbols: white triangle = before and white circle = after 1950. A black triangle or circle = staying 8 or more years. In each triangle or circle is a number, keyed to a list of the names of 65 localities. She did more research in southern China than in northern.

There is no country in the world today "where the value of useful plants is more thoroughly appreciated than in contemporary China" (p. vii, Foreword 1).

Dr. Hu is an expert taxonomist and economic botanist. She "draws on the fields of plant taxonomy, morphology, economic botany, pharmacognosy, and phytochemistry to name a few, yet the text is far from a dry recitation of facts and statistics. What brings the work to life are the numerous anecdotes and personal experiences she shares. Indeed, this latter element gives the book the aspect of a personal memoir." "The major divisions... are taxonomic and within each division the plants are arranged alphabetically by scientific name. Also provided are the names in Chinese characters, the transliteration in English of both the Putonghua and Cantonese pronunciations for the Chinese names, common names in English, and a brief commentary" (p. ix-x, Foreword 2).

"The food plants of an area provide the material basis for the survival of its population" and furnish inspiration for its cultural development. "In China, 1,156 species and 274 varieties and/or cultivars of food plants have been recorded and are used" by the people. The preparation of this work began in 1957 and a compilation was distributed at the Ninth Pacific Science Congress. Born in 1908, the author entered a boarding school in Xuzhou, Mary Stevens Girls' High School, run by Presbyterian missionaries. In like manner she went to Ginling College, a small liberal college of arts and sciences in Nanjing. After college she entered Lingnan University (formerly Canton Christian College) in Guangzhou, from which she graduated with the master of science degree in June 1937–a month before the Marco Polo Bridge Incident on July 7, 1937, when the Sino-Japanese War broke out in Beijing. She fled to Chengdu, Sichuan, where in Jan. 1938 she accepted a teaching position in the Department of Biology, West China Union University–also a missionary college. In the late 1930s and early 1940s, Hu had botanized in western Sichuan at a time when only a few men (notably Armand David, Joseph Rock, and E. Wilson) had explored that region. During summer vacations, she took students to botanize around Muping. At West China Union University, Hu continued her field studies, taught courses in botany, and was elected president of the International Women's Club. The vice president of the club, who was a Radcliffe graduate, applied to Radcliffe for a fellowship for Hu.

She left China on 2 Aug. 1946 for graduate work at Radcliffe College; it was like a metamorphosis–the United States was a completely new world. In 1946 she was offered a graduate fellowship for a doctorate (PhD) program at Radcliffe College under Prof. E.D. Merrill, then Director of the Arnold Arboretum (Harvard Univ.) from 1935-1946. Her doctoral dissertation on the genus *Ilex* (Aquifoliaceae) was carried out at the Arnold Arboretum under the direction of E.D. Merrill. After completing the requirements and finishing the dissertation for a doctorate degree at Harvard, in April 1949, she became the herbarium assistant at the Arnold Arboretum. From 1953 to 1957 she worked on the Flora of China Project at Arnold Arboretum. Among other things, she became famous for her Chinese dinners with staff and students alike. She officially retired from the Arnold Arboretum on 30 June 1976.

Dr. Hu returned to China in July 1975, after 29 years abroad. Since the normalization of diplomatic relations between the USA and China in 1978, she has made many trips to China, and travelled studied extensively (p. xi-xii, 12-14). As of Aug. 2011 Dr. Hu resides in Hong Kong and is closely associated with the Chinese University of Hong Kong.

A photo (Fig. 1) shows the author in 1941 as a young lady in Tibetan attire; she spent summers in the area formerly called "Eastern Tibet."

Fig. 34, an illustration composed of seven superb line drawings (each with a scale) showing the soybean plant, a flowering branch, the front view of a flower, a lateral (side) view of the same, a fruit (pod with 2 seeds) with one side of the pericarp (outer pod) removed–showing the seeds, a soybean seed showing the acentric hilum, the micropyle and the hypocotyl ridge, soybean sprouts from a market showing the smooth fleshy cotyledons, the hypocotyl and the very small plumule.

Fig. 35. Four black and white photos showing: (1) Two

© Copyright Soyinfo Center 2013

round trays of koji, made of cooked soybeans, roasted wheat flour, and fungal spores, in shelves, to be used for making soy sauce. (2) Large earthen jars with convenient hat-like covers, containing the koji, salt and water, placed in the yard of the *jiang-yuan* (2 Cc = Chinese characters given) ("jiang garden"), exposed to the sun during the day and dew at night, covered only when it rains and stirred occasionally. (3) A man stirring hot soymilk in a large shallow cauldron before adding pulverized calcium sulfate for precipitation of the soybean protein, used to make tofu. (4) A wooden frame [curding box], lined with cloth for filtering the coagulated protein and solidifying the mass (under small pressure) to make bean curd.

Soybeans (*Huang-dou*, 2 Cc). Before World War II, the United States was a net importer of soybeans; now she is a net exporter. "Although soybean products have entered American supermarkets, several Chinese uses of soybean can introduce more variety and tastier food into many homes (Figure 35). Included... are: green immature soybean, soybean curd, soybean sheets [pressed tofu sheets], firm bean curd squares [pressed tofu], soybean skin [yuba], and soybean sprouts." With the exception of soybean sheets, all these items are available in Chinese American grocery stores. "The Food Plants Research Institute, Amherst, Massachusetts, is in the process of introducing soybean sheets (3 Cc) to American markets (p. 118-19).

Hordeum vulgare L. var. *vulgare*–Barley *Da-mai* (W.-G. *Ta-mai*) (2 Cc, 'big grain'). "... also ground with sorghum and soybean for a coarse, healthy, fiber bread flour."

Glycine max (L.) Merrill–Soybean. *Da-dou* (W.-G.: *Ta-tou*). (2 Cc) ('giant bean'). *Huang-dou* (W.-G.: *Huang-tou*). (2 Cc) ('yellow bean'). "Seed mixed with *gao-liang* (kaoliang) and barley, ground together for flour, used to be the staple of the rural population in the Yellow River Region; soaked, cooked with salt, served as tidbits in northern China; used as source for all the following forms of Chinese food" (p. 474).

Dou-you (W.-G.: *Tou-yu*). (2 Cc) ('soybean oil'). Cooking oil extracted from the soybean. (p. 474). Address: Botanist, Arnold Arboretum, Harvard Univ.; Honorary Prof. of Chinese Medicine, The Chinese Univ. of Hong Kong.

12779. Hu, Shiu-ying. 2005. Food plants of China (Continued–Document part). Hong Kong: Chinese University Press. xvi + 844 p.

• ***Summary:*** This is a truly remarkable, original and comprehensive book. "Angiosperms (p. 106): Every great civilization has developed its special angiosperms for food. Accounts are given below of the seeds of seven species" including Job's tears (p. 108), lotus seeds, mung bean (p. 111), red bean (Adsuki), soybean, and watermelon seeds."

Note: The great revolution in plants was the appearance of angiosperms. Definition: An angiosperm is a plant that has flowers and produces seeds enclosed within a carpel. There was an explosion of diversity with this new strategy.

Hordeum vulgare L. var. *nudum* J.D. Hooker–Jade Barley [Naked barley?].

Hordeum vulgare L. var. *trifurcatum* (Schlechter) Alefield–Tibetan Barley. (p. 290-91).

Sorghum bicolor (L.) Moench–Sorghum, Kaoliang. Used for its seeds. The tallest crop plant known in China. "Used to be extensively cultivated in northern and northeastern China; today it is replaced by rice or maize in these areas" (p. 296-97).

From *Amorphallus rivieri* Durieu–Devil's tongue, leopard palm, snake palm, is made *Mo-dou-fu* (W.-G. *Mo-tou-fu*) (3 Cc), 'black bean curd' (p. 304).

Arachis hypogaea L.–Peanut, ground nut. *Hua-sheng* (W.-G. *Hua-sheng*) (2 Cc). Seeds are cooked with "dry bean curd" (3 Cc *dou-fu-gan*) or used as a source of vegetable oil (p. 465-66).

Glycine soja Siebold et Zuccarini. *Lao-dou* (W.-G. *Lao-tou*) (2 Cc) ('wild soybean'). *Wu-dou* (W.-G. *Wu-tou*) (2 Cc) ('black bean'). "Seed gathered and used locally." Both are annual climbers. (p. 474).

Also discusses: Algae (sea vegetables). Lablab purpureus (Syn. Dolichos lablab). The hyacinth bean or lablab bean (p. 475-76). *Pueraria lobata* (kudzu). *Ge-gen* is Pueraria root. *Ye-ge* is Wild kudzu. The root is cooked with Chinese dates, and sliced yams for a soup. *Ge-hua* is pueraria flower. *Pueraria montana*. *Ge-ma-mu* (3 Cc) ('mother of kudzu') is starch from the root. *Pueraria thomsonii*. Sweet kudzu, cultivated pueraria. *Gan-ge-teng* (3 Cc) ('sweet kudzu'). Cultivated like a potato (p. 482).

From *Stizolobium capitatum* (Sweet) O. Kuntze (Synonym: Mucuna capitata). *Li-dou* (2 Cc) ('wild cat bean') or *Gou-zhua-dou* (3 Cc) ('dog's paw bean'). "Seeds used for making bean curd; very rare in China. Rarely cultivated" (p. 485).

Buchanania latiflia Roxburgh. *Dou-fu-guo* (W.-G,: *Tou-fu-kuo*) (3 Cc) ('beancurd fruit'). "Seed, ground, used for making beancurd in Yunnan... Native to southeastern Asia, growing in deciduous forests in valleys at altitudes of 750-900 meters in Yunnan, Hainan Island and Guangdong [province] (p. 515).

Coriandrum sativum L. Coriander, Chinese parsley, cilantro (Spanish). *Yuan-sui* (W.-G,: *Yuan-sui*) (2 Cc) ('coriander'). "Young or full-grown plants harvested before flowering, in villages of northern China leaves are washed, chopped small, mixed with cooked and salted soya bean [*dou-chi*] and sprinkled over cooled fish or meat;..." Address: Botanist, Arnold Arboretum, Harvard Univ.; Honorary Prof. of Chinese Medicine, The Chinese Univ. of Hong Kong.

12780. Hu, Shiu-ying. 2005. Fermented soybean foods: Fermented black soybean (Document part). In: Shiu-ying Hu. 2005. Food Plants of China. Hong Kong: Chinese University Press. xvi + 844 p. See p. 35.

© Copyright Soyinfo Center 2013

• ***Summary:*** This is a truly remarkable, original and comprehensive book. The section on "The use of microbes in Chinese plant food" (p. 32+) contains a subsection, titled "Fermented leguminous products" (p. 33+), where we read (p. 35): "To my knowledge, three types of Chinese black soybeans are available in American Chinese stores. The very large and medium-sized beans are used as special health food, primarily for medicinal purposes and sold in one-pound packages."

Note 1. Do black soybeans contain substances that give them medicinal properties? If so, what are these substances and in what amounts are they found?

The small, oblong black soybeans appear only in the form of *dou-chi* (*tou-ch'ih*) (2 Cc = Chinese characters given) ("fermented black bean"); "they are used as a condiment and/or in prescriptions.

"The large and intermediate black soybeans are the seeds of erect plants. The small black soybean is the seed of a semiclimber, which matures one or two weeks later than the erect varieties.

"Dou-chi (2 Cc) ('fermented black soybean') is very popular in the warmer regions of China, used as a seasoning for steamed fish" and many vegetable dishes. In Chinese cookbooks published in America, it is called for as an ingredient in many regional cuisines–Mandarin, Cantonese, Sichuan, etc. In southern China, it is sold in open containers in market-places or grocery stores. *Dou-chi* is imported to the United States in plastic bags or cans. It looks like a small, oval, shriveled, charcoal black bean with a [salty] spicy piquant flavor.

To make *dou-chi* obtain the black seeds of the proper semiclimbing soybean. Clean, then soak the seeds "in a decoction prepared with various herbs, including green mugwort (*Artemesia apiacea* Hance), licorice, mulberry leaves, perilla shoots, and water smartweed." Steam the soaked beans, allow to cool, then place in a container covered with the residue of the boiled herbs and allow to ferment until a layer of yellow mold appears. Mix the beans with salt and dry in the sun. *Dou-chi* keeps well at room temperature.

Note 2. This is one of many different ways used to make *douchi.*

A recipe for "Bitter melon pork" calls for "1½ Tbsp dou-chi" (2 Cc) "People in Guangzhou [Canton] and Hong Kong like bitter melon for its cooling effect and cook it with meat or bean curd, with or without fish" (p. 82.)

A recipe for "Bitter melon bean curd fish" calls for "1 pkg bean curd (cut into 4 by 3 by 1 cm sections)" add "2 Tbsp *dou-chi* (washed, drained, and minced)" (p. 83).

Fungi–Ascomycetes (pronunciation as-ko-my-SEE-teez)–*Aspergillus oryzae* (Ahlburg) Cohn and *A. soyae* (Sakaguchi & Yamada et Yamada). This is a blue mold. Grows on cooked cracked wheat, rice, and soybeans, such as: (1) *Jiang-you* (W.-G. *Chiang-yu*) (2 Cc, soy sauce). Made with yellow soybean and cracked wheat. (2) *Dou-chi* (W.-G. *Tou-ch'ih*) (2 Cc, spiced soybean preserve). Made with black soybean and various herbs. (3) *Dou-ban-jiang* (W.-G. *Tou-pan-chiang*) (3 Cc, fermented soybean). (p. 262).

Dou-chi (W.-G.: *Tou-chi*)*.* (3 Cc) ('fermented and seasoned black soybean'). "A dry and soft product used as spice" (p. 474).

Note 3. This is the earliest English-language document seen (Nov. 2011) that clearly uses the term "fermented black soybean" or the term "spiced soybean preserve" or the term "fermented and seasoned black soybean" to refer to *dou-chi / douchi* (fermented black soybeans). Address: Botanist, Arnold Arboretum, Harvard Univ.; Honorary Prof. of Chinese Medicine, The Chinese Univ. of Hong Kong.

12781. Hu, Shiu-ying. 2005. Nonfermented foods: Bean curd and whole soybeans (Document part). In: Shiu-ying Hu. 2005. Food Plants of China. Hong Kong: Chinese University Press. xvi + 844 p.

• ***Summary:*** This is a truly remarkable, original and comprehensive book. Basic bean curd (dou-fu [tofu]) is mentioned on 21 different pages.

A recipe for "Bean curd with Swatow mustard" calls for "1 pkg (supermarket style) bean curd" (p. 55).

A recipe for "Farmers' mustard salad" calls for "½ cup soybean (cleaned, soaked overnight)" (p. 56).

A recipe for "Huo-guo (Fire pot)" calls for "3 squares bean curd (sliced 5 x 3 by 1 cm..."), "9 Tbsp soy sauce" and "3 Tbsp hot soybean sauce, *la-dou-ban-jiang* (Sichuan style)" (optional) (p. 64-65).

"A recipe for "Buddha disciples' delight (*Luo-han-zai*)*"* calls for "3 pieces of bean curd (sliced into 4 cm square..."), 1 can wheat gluten (cut into 3 cm square by 1 cm pieces), "2 oz Laminaria [kombu] (revived [reconstituted], cut into 4 by 3 cm pieces, washed)," and "1 lb fried bean curd squares (cut lengthwise once)," and "4 oz bean curd bamboo (soaked in cold water to revive it, cut into 4 cm sections." This is a vegetarian dish, often served in Buddhist temples. In the Chinese tradition, it is often said that Buddha had 18 close disciples called *Shi-ba-luo-han,* p. 69).

A recipe for "Hot and sour soup" calls for "1 piece bean curd (sliced into 3 cm x 5 mm x 5 mm shreds)" and "1 Tbsp soy sauce" (p. 71).

A recipe for "Vegetarians' delight (*Su-shi-jin*)*"* calls for "6-8 pieces fried bean curd cubes (diagonally quartered, available in Chinese groceries)" and "four young fruits of luffa" (p. 90).

A recipe for "Bean curd fish (*Dou-fu yu*)*"* (p. 120) calls for "1 box of bean curd" and "3 Tbsp *dou-chi* (fermented black soybean)." This recipe is a modification of a dish called "Earthenware fish-head bean curd (*Sha-guo you-tou dou-fu*)*"* popular at sidewalk cafes and food stalls of Guangzhou [Canton] and Hong Kong. Most Chinese recipes for cooking fish call for frying the fish first, which gives a

© Copyright Soyinfo Center 2013

fish smell throughout the house, more so in an apartment" (p. 120-21).

"Bean curd is solidified protein with hardly any taste of its own. One of the important principles of cooking a good bean curd dish is to cook it for a long time with meat, fish, or poultry. Recently, with the introduction of the Sichuan food, *Ma-po dou-fu* (4 Cc = Chinese characters given) ('pockmarked wife's bean curd'), cooked with very hot pepper and powdered zanthoxylum [Sichuan peppercorns; fagara pepper] (much of both), has become increasingly popular among graduate students, for example, Harvard Biology doctoral candidates. Not all people can tolerate hot dishes" (p. 121).

There follows a recipe for "Soybean sprout soup (*Dou-ya-tang*)" which calls for "2 lbs fresh soybean sprouts" (p. 121-22).

"soybean sprouts and bean curd are the salvation of the Chinese people, as they are the most common and widespread foods for all, particularly for farmers, working people, and young students of boarding schools. In a boarding school at Xuzhou (Map 16) in the 1920s, soybean sprouts alternating with bean curd were the daily main dish during the school year."

There follows a recipe for "Soybean sprouts with bacon (*Dou-ya shao-rou*)" which calls for 5 lbs soybean sprouts (p. 122).

Following that is a recipe for "Bean curd hors d'oeuvre (*dou-fu-gan jiu-yao*)" which calls for "10 pieces of *dou-fu-gan* (firm bean curd squares, available in Chinese stores" and "1 cup soy sauce," p. 122-23).

Note: This is the earliest English-language document seen (Aug. 2011) that contains the term "firm bean curd squares" or the term "spiced bean curd squares (see below), or that uses those terms to refer to Chinese-style pressed tofu.

"Bean curd squares are a more refined product made in small molds and drained under heavy pressure, as compared with bean curd in supermarkets which is prepared in large molds and drained under little pressure. The squares of the former are much firmer. This recipe is a modification is a modification of hors d'oeuvres served in Chinese bars or taverns. In taverns, large numbers of spiced bean curd squares are prepared ready for people with tight purse-strings, who may enjoy their drinks with *dou-fu-gan* (spicy bean curd) and peanuts," while the more affluent customers may savor spicy pork liver and chicken or duck gizzards as hors d'oeuvre.

There follows a recipe for "Bean curd sheet pork (*Qian-zang-pi chao-ru*)" which calls for "3 pieces of *Qian-zang-pi* (3 Cc, 'thousand sheets skin' = bean curd in the form of sheets [pressed tofu sheets]; cut into 5 cm strips and then slice into 3 mm shreds; or use one can of the material, available at American Chinese stores) (p. 123-24).

The next recipe is for "Black soybean oxtail soup" (*Hei dou hui Niu wei*) which calls for "1½ cups black soybeans (the larger the bean, the better)." "This is a special Cantonese dish. Like yellow soybean, the black soybean is rich in protein, CHO [carbohydrates], fats, carotene, vitamins... flavones which become daizin [daidzin] and genisten [genistein] on hydrolyzation, soyasapogenol A, B, C, D, E, choline, and organic acids... The broth is especially good for senior citizens who suffer from dizziness and swollen ankles" (p. 123).

A recipe for "Vegetarians' three treasures" (*Su-san-xian*)" calls for "1 lb firm bean curd (1 box, available in supermarkets)." "Luo-bo [giant white radish; daikon], celery cabbage [Chinese cabbage], and bean curd [tofu] are the most common vegetables of the Chinese people. They have been praised by a leading Chinese Buddhist monk, Tai-xu Fa-shi (4 Cc) as the three treasures that keep the Chinese people alive" (p. 135).

Chapter 4, "Spices and flavoring materials" (p. 147+) begins: "All good food depends on the proper use of spices and flavoring materials... 'Plants and Human Affairs' has always been a popular course in the department of Biology at Harvard University. In the late 1940s, while Professor Paul C. Mangelsdorf was teaching the subject, a classmate asked for my help to complete her required term paper. Her project was on the Chinese invention of using pure plant protein precipitated from the soybean. At the time relatively few Americans knew the term *dou-fu* (2 Cc) ('bean curd')... For the project we went together to Chinatown [in Boston] where I showed her the only production center of dou-fu available at the time. It was a dim one-room area of a basement. There we watched the simple procedure of precipitating solid protein from soaked soybean. She recorded her observations and brought some samples, both *dou-fu* and *dou-fu-zha* (3 Cc) ('bean curd residue'). Returning to the laboratory, I cooked a few dishes with the product and the by-product" (p. 147).

A recipe for "Fire pot with broomrape stock" calls for "2 oz dried laminaria (2 Cc) (*hai-dai*)," "2 boxes bean curd (doufu, 2 Cc); cut lengthwise once, then slice into 1 cm thick pieces of ca. 3-5-cm square," "2 tsp fermented soybean hot sauce (la-dou ban-jiang, optional) with ¼ of the sesame oil placed in a separate dish, for people who like spicy taste" (p. 203-04). *Huang-dou-ya* (W.-G. *Huang-tou-ya*). (3 Cc) ('soybean sprout'). "Soaked, sprouted under cover with daily wash, prepared at home in villages or as a simple industry in cities; available in American Chinese groceries, used as a vegetable or for making soup with bone and onion" (p. 474).

Dou-fu (W.-G. *Tou-fu*). (2 Cc) ('bean curd'). *Dou-jiang* (W.-G. *Tou-chiang*). (2 Cc) ('soybean milk'). *Dou-fu-nao* (W.-G. *Tou-fu-nao*). (3 Cc) ('soft soybean curd' [curds made from soymilk]). *Dou-fu-gan* (W.-G. *Tou-fu-kan*). (3 Cc) ('dry bean curd,' 5 cm firm squares). *Qian-zhang-pi* (W.-G. *Ch'ien-chang-p'i*). (3 Cc) ('thousand sheet' thin sheets of firm bean curd). (p. 474).

• ***Summary:*** This is both a Korean-English and an English-Korean dictionary. Korean characters are given for each word in both parts.

Page 21: *gan-jang* means soy sauce.

Note: This is the earliest English-language document seen (April 2012) that uses the term *gan-jang* to refer to Korean soy sauce.

Page 35: *doen-jang* means soybean paste. *doen-jang jji-gae* means soybean paste stew.

Page 80: *kong-na-mul* means [soy] bean sprouts.

English-Korean–Page 93: The Korean word for "bean" is *kong* and for bean sprout is *kong-na-mul.*

Page 135: The Korean word for "pea" is *kong.*

Page 151: The Korean word "soy sauce" is *gan-jang* and for "soybean" is *kong.*

Page 260: The Korean word for "bean sprout soup" is *kong-na mul-kkuk* and for "boiled tofu" is *du-bu jo-rim.*

Page 263: The Korean word for "red-pepper paste" is *go-chu-jang,* for "soybean paste" is *doen-jang,* and for soy sauce (again) is *gan-jang.*

Also (p. 263): The Korean word for "sesame oil" is *cham-gi-reum* and for "sesame seed" is *kkae-so-geum.*
Address: 1. Lecturer in Korean and supervisor of Korean language courses, Univ. of California at San Diego.

12785. Lowry, Dave. 2005. The connoisseur's guide to sushi: everything you need to know about sushi varieties and accompaniments, etiquette and dining tips and more. Boston, Massachusetts: Harvard Common Press. xxii + 297 p. Index. 27 cm.
• ***Summary:*** The section titled "Inari Sushi" states (p. 20): "Inari; usually pictured as a old man with a pair of sacks and accompanied by a pair of foxes, is the god of rice in Japan. Because pockets of abura-age, or fried tofu, stuffed with *sushi-meshi* look like the rice bags carried by Inari, they're called *inari sushi.* They are also known as *age sushi* (*age* means "fried," referring to tofu pouches), *o-inari sushi* or *o-inaribukuro* (inari stuffed in a sack) or *kitsune sushi* (fox sushi)."

Popular with Japanese children, inari sushi makes a fine snack or light lunch, but it isn't common in sushi-ya [sushi shops]. They are most widely found in prepackaged lunch-box type sushi.

Note 1. This is the earliest English-language document seen (April 2013) that uses the term *age sushi* or the term *kitsune sushi* or the term *o-inari sushi* to refer to inari sushi, made with deep-fried tofu pouches.

Almost all of the sushi terms in this book are presented and used in their original Japanese; they are not translated into English. Thus, this book contains a wealth of real sushi terminology and vocabulary. The writing style mixes both humor and serious admiration. Address: Restaurant critic for *St. Louis* magazine, Missouri.

12786. Lund, JoAnna M.; Alpert, Barbara. 2005. Cooking healthy with soy. New York, NY: Perigee. Published by the Penguin Group. viii + 368 p. Index. 21 cm. Series: A Healthy Exchanges (R) Cookbook.
• ***Summary:*** Contains 220 recipes. On the cover: "No trouble and no tofu." The author admits in the Acknowledgments (p. vii): When I first started this project, almost all my helpers were a bit hesitant. After all, they really hadn't tried soy products before–even though they had lived all their lives here in eastern Iowa (a state where, no matter which direction you look, you'll see soybean fields everywhere). But after our first 'taste-testing lunch, they all agreed that these soy recipes sure tasted good!

This comb-bound book, which is not vegetarian, calls a commercial branded product (usually available nationwide in supermarkets) in every recipe. These are grouped into five categories: Dairy alternatives (milk-, cheese-, sour cream-, margarine-, yogurt- and ice cream- alternatives), meat alternatives, nut alternatives, pasta alternatives, and miscellaneous (such as Eden Organic Black Soy Beans, or GeniSoy Mountain Medley Soy Nut Trail Mix).

For example: Milk alternatives: Silk Light Plain Soymilk. Silk French Vanilla Soymilk Creamer. 8th Continent Light Original Soymilk. 8th Continent Light Chocolate Soymilk.

This unusual approach raises several questions: Did the

© Copyright Soyinfo Center 2013

author request a kickback for promoting these products? Why does one need recipes for soymilk? Or for Tofutti Mozzarella Soy-Cheese Slices? Or Tofutti America Soy-Cheese Slices? Or for Boca Meatless Cheeseburgers? Or Morningstar Farms Veggie Breakfast Bacon Strips? How about all the people who don't shop at supermarkets?

In the first section, titled "Main street American is cooking with soy–because its good for your health," the author states: "If you are a health-food store 'purist,' then this book probably isn't for you. But if you are willing to try new recipes that taste the same as your old favorites but feature soy products, then I think you'll be mighty pleased with the results. I want to 'bring to the table' all those men, women, and children who aren't necessarily vegetarians or already consuming lots of soy foods and food products." Address: Author and speaker, DeWitt, Iowa.

12787. Marcus, Erik. 2005. Meat market: Animals, ethics, and money. Boston, Massachusetts: Brio Press. ix + 273 p. Index. 23 cm. [432* endnotes]

12788. Moriyama, Naomi; Doyle, William. 2005. Japanese women don't get old or fat: Secrets of my mother's Tokyo kitchen. New York, NY: Delacorte Press. 274 p. Illust. Index. 22 cm. [50+ ref]

• ***Summary:*** From the publisher's description: "Japanese-born Moriyama reveals the key to the enduring health and beauty of Japanese women. The Japanese eat one of the most delicious, nutritious, and naturally satisfying cuisines in the world without denial, without guilt, and, yes, without getting fat or looking old. If you think you've eaten Japanese food, you haven't tasted anything yet. Japanese home-style cooking isn't just about sushi and raw fish but good, old-fashioned everyday-Japanese-mom's cooking that's stood the test of time–and waistlines–for decades. Reflected in this are the age-old traditional values of family and the abiding Japanese love of simplicity, nature, and good health. It's the food that millions of Japanese women eat every day to stay healthy, slim, and youthful. Even better, it's fast and easy. If you're tired of counting calories, counting carbs, and counting on diets that don't work and don't satisfy, it's time to discover this."

Traditional Japanese soyfoods are mentioned throughout this book, always in a very positive way and in recipes. Japanese generally eat soyfoods in their more natural and less processed forms such as tofu, miso, natto, and edamame–and rarely in the forms of soy supplements, soy shakes, soy burgers, soy energy bars, etc. that are so popular in the West.

Chapter 5, "The seven pillars of Japanese home cooking," states (p. 122) that they are: "fish, vegetables, rice, soy, noodles, tea and fruit." Soy, "The fourth pillar," is discussed very nicely on pages 181+.

Here is the number of pages on which various foods are mentioned: Tofu 56 (incl. silken tofu {kinugoshi}, cotton tofu {momen, regular}, atsu-age {deep-fried tofu cutlets}, usu-age {deep-fried tofu pouches}, yakidofu or broiled tofu). Miso 50 (incl. p. 91-92. 99-100). Soy sauce 50. Edamame 12. Shoyu 3 (p. 75, 114, 121). Natto 2 (p. 184, 188). Okara 1 (p. 184). Yuba 1 (p. 184). Also many reference to sea vegetables (hijiki, kombu, nori). A photo on the inside rear dust jacket shows the authors; she was born in Tokyo, and he is an American who has written or cowritten five books.

Note: The paperback edition of this book (only) mentions "The Japanese Skincare Revolution: How to Have the Most Beautiful Skin" in connection with tofu. Address: Wife and husband live in New York City.

12789. Moskowitz, Isa Chandra. 2005. Vegan with a vengeance: Over 150 delicious, cheap, animal-free recipes that rock. New York, NY: Marlowe & Co. 258 p. Illust. (color photos). Index. 23 x 18 cm.

• ***Summary:*** The praise for this innovative book is almost as interesting to read as the book itself. The book is great fun to read–a really fine writer. The index contains 1 entry for edamame (in samosas with coconut-mint chutney), 1 entry for miso (Stewed tofu and potatoes in miso gravy), 6 entries for seitan (incl. homemade), 8 entries for tempeh, 22 entries for firm tofu and 7 for silken tofu, and 3 entries for textured vegetable protein (TVP).

The section titled "Get rid of eggs–Veganize it!" (p. 195-97) begins: "Replacing eggs is the most challenging aspect of vegan baking. Those suckers bind, they leaven,

© Copyright Soyinfo Center 2013

and they give structure to our baked goods. However, like a bad boyfriend, they can be replaced, and with pleasing results." The first replacer discussed is flaxseeds. Second is silken tofu. "How to use it. ¼ cup blended silken tofu = 1 egg. Whiz in a blender until completely smooth and creamy, leaving no graininess or chunks. You will want to add other wet ingredients, to this mixture to get it to blend properly. I recommend... extra-firm silken tofu, such as Mori-Nu." Another egg replacer is soy yogurt. ¼ cup soy yogurt = 1 egg. "Soy yogurt works a lot like whizzed tofu as an egg replacer. It makes things moist and yummy."

She uses the creative word "sammiches" instead of "sandwiches." Address: Co-host of The Post Punk Kitchen, New York City.

12790. Tobing, Hayatinufus A.L.; Hadibroto, Cherry; Kartohadiprodjo, Nies. 2005. Tahu & tempe plus susu kedelai [Tofu and tempeh plus soymilk]. Jakarta, Indonesia: Gramedia Pustaka Utama. 97 p. Illust. (color). 24 cm. [Ind]*
• ***Summary:*** A cookbook of practical yet delicious recipes.

12791. Trieu, Thi Choi; Isaak, Marcel. 2005. Authentic recipes from Vietnam. Singapore: Periplus Editions. 112 p. Illust. (photos by Heinz von Holzen). Recipe index. 28 cm. Introduction by Annabel Jackson-Doling.
• ***Summary:*** This book often reads as if it were a written to attract tourists to Vietnam. Contents: Food in Vietnam. The imperial cuisine. The ascending dragon. Homestyle Vietnamese cooking. Cooking methods. Authentic Vietnamese ingredients (incl. tofu {p. 23}, pressed tofu {tau kwa or tou gan}, and firm tofu). Recipes.

Vietnam is in the shape of an "S" with the eastern coastline 1,600 miles long from north to south, yet only 30 miles across at the narrowest point. The country fades from cool in the north to tropical in the south. The two main deltas are the Red River Delta in the north and the Mekong Delta in the south. Vietnam is the 3rd largest rice exporter in the world after Thailand and the USA. About 60% of the arable land is devoted to rice production. Hue, in central Vietnam, was the capital of Vietnam from 1802-1945. Today Ho Chi Minh City (formerly Saigon) is the largest city in Vietnam (p. 5-8).

The section titled "The Imperial cuisine" (p. 11) is about Hue, on the banks of the Perfume River in central Vietnam. Now a rather small and sleepy place, Hue traditionally served as a cultural, educational, and religious center. It "is the site of the country's most important Buddhist monasteries and temples. It was also the political capital of Vietnam under the thirteen emperors of the Nguyen Dynasty." Hue "once inspired the creation of the most sophisticated Vietnamese cuisine [under Tu Doc (1848-1883)] and took vegetarian cuisine to even higher heights than those reached by masterful Chinese chefs."

Soy related recipes include: Yellow bean sauce (Nuoc tuong, with "3/4 cup {4 oz / 120 gm} dried yellow soy beans, boiled and drained," p. 26). Soy sauce dip (Nuoc tuong toi ot, with "¼ cup {60 ml} soy sauce," p. 26). Braised mushrooms with soy sauce (Nam xao nuoc tuong, with "2 tablespoons soy sauce," p. 49). Crab soup with tofu and rice noodles (Bun rieu, with "1 cake pressed tofu {about 7 oz / 200 gm}," p. 57). Fried tofu with lemongrass and five spice (with "4 cakes pressed tofu {about 18 oz / 600 gm in total}, halved and pressed between paper towels to remove moisture," p. 64). Stir fried water spinach with yellow bean sauce (Rau muong xao tuong, with "2 tablespoons Yellow Bean Sauce," p. 67).

The word "soy" is mentioned on pages 3, 13, 20, 26, 36, 39, 49, 72, 75, 81, 82, 88, 99, and 111.

12792. Gavin, Robert. 2006. Meat-like qualities whet the US appetite for tofu: Biologist tackles taste, texture issues. *Boston Globe.* Jan. 2.
• ***Summary:*** Xiang F. Kong has developed a new tofu product named Tofettes, in flavors such as teriyaki, barbecue, and Jamaican jerked. He starts by making tofu. To achieve a meat-like texture, he employs a press that uses "precise heat and pressure," established through a long process of trial and error. The extra firm tofu is then cut into small pieces and fried briefly in vegetable oil. The resulting tofu has a unique texture and ability to take on new flavors. Address: Globe staff.

12793. Low, Dennis. 2006. Re: Tofu in Trinidad and Tobago: History of Pacific Food Co. Letter (e-mail) to William Shurtleff at Soyfoods Center, Jan. 17 and 18. 2 p.
• ***Summary:*** "Stephen Low was born in 1937 in Kwangtung (Guangdong), southern China. His father was an established businessman in Trinidad and Tobago. Stephen remained in China until 1960, when he decided to move to Trinidad to do business with his father. He arrived in Trinidad in 1962. Theresa Low, his wife, was born in 1946 in Hong Kong and arrived in Trinidad in 1965. In 1965 the Stephen Low Watch Company was born.

"After 30 years in the watch business, Stephen and his wife Theresa's business was established and they were looking for new opportunities to explore. They belonged to a local Chinese club and they would gather weekly to socialize, eat, and play majong.

"One day a friend of theirs brought in a traditional Chinese dessert, "Tofu fah [soymilk curds]," better known as silken tofu. Theresa has always enjoyed this dessert growing up and was very impressed with the way her friend had made it. She asked her friend for the recipe and started making it at home almost on a daily basis. Cooking for a family of 5 kids, cooking was one of Theresa's favorite hobbies. One day she decided that she wanted to make tofu at home. She used the same recipe as the silken tofu and began to press it. Using a variety of methods, whether it was to use hot or cold water,

© Copyright Soyinfo Center 2013

how much beans to water ratio, even types of cloth to wrap it in, how much weight to press it with, and how long to press it for. It took them about 1 month of trial and error to perfect the art of making tofu.

"They then told their friends about her success and having a business background naturally started talking about selling it. They talked about great health benefits from tofu, soy milk and knew this would be a great opportunity. After some initial research, they realized that all tofu sold within Trinidad was imported. They felt that she can make tofu at a fraction of the cost of the competitor. This was their opportunity, so they jumped on it. In 1998 the Pacific Food Company was born. Their hobby officially has turned into a career. They bought beans locally, and soaked them. They invested in some grinding machines, pressing equipment, designed their own label and packaging equipment. Now in 2006 Pacific foods tofu is sold everywhere to major supermarkets, restaurants and local merchants. Fresh tofu is now widely accepted across Trinidad. Currently we are doing homework on soy products to expand our business. This year we will be launching firm tofu, flavored tofu and tofu puffs.

"One of our goals this year is to educate more people on what tofu is and what great benefits it has towards your health and feel that this "What is Tofu" pamphlet that we talked about will help dramatically.

"Your book has provided us with a wealth of information and we look forward to working with you to develop more soy products in the near future."

Note: Letter (e-mail) from Dennis Low, Manager, Pacific Trading Co., Uptown Excellent Mall, Corner of Park and Frederick Street, Port of Spain, Trinidad, West Indies. 2006. Jan. 18. Dennis is the son of Stephen and Theresa Low. He interviewed his parents just before writing this story. Their company's only product is "Fresh Tofu." Address: Manager, Pacific Food Co., Uptown Excellent Mall, Corner of Park and Frederick St., Port of Spain, Trinidad and Tobago, West Indies.

12794. Soyfoods Association of North America. 2006. Soyfoods sales and trends (Website printout–all). www.soyfoods.org/press/FAQ_sales.htm 2 p. Printed Jan. 19.
• ***Summary:*** Contents: What are the recent trends in soy consumption in the U.S.? Soy sales by category: Introduction, soy-based energy bars, soymilk sales, meat alternative sales, tofu sales, other soyfoods sales. 2003 Consumer Trends Report. Sources.

"The number of new soy-based products has increased 13.2% per year for the past 3 years. In 2000, approximately 2,295 soy-based SKU's were offered; by 2002 the number hit 3,399. In 2002 there were: 580 soy-based energy bars, with 24.1% of sales [i.e. accounting for 24.1% of sales of soyfoods from all categories]. 366 soy-based meal replacements & powders with 18.5% of sales. 328 soymilk beverages with 16.3% of sales. 318 meat alternatives with 14.5% of sales. 236 tofu products with 6.8% of sales. [Other: 19.8% of total sales].

Soy-based energy bars: Sales reached $880 million in 2002.

"Soymilk sales have grown from $100 million in 1995 to nearly $600 million in 2002. Soymilk has 87.3% of the nondairy beverage sales in mainstream markets. Sales of refrigerated soymilk grew over 100% per year for the past three years.

"Meat alternative sales have grown from $114 million in 1992 to over $530 million in 2002.

"Tofu sales have grown from 108 million in 1992 to $250 million in 2002.

Other soyfoods sales: Soy [fortified] breakfast cereals grew to over $150 million in 2001. Soy yogurt sales grew by 66.9% in 2001 to reach $23.7 million. Soy-based cheese alternatives grew at 11.6% in 2001 to reach $57.6 million. Sales of soy-based frozen desserts rose 39.9% in 2001 to reach $42.2 million. Address: 1001 Connecticut Ave., NW, Suite 1120, Washington, DC 20036. Phone: 202-659-3520.

12797. Bramblett, Billy. 2006. The real history of Wildwood

© Copyright Soyinfo Center 2013

Natural Foods after its merger with Midwest Harvest to become Wildwood Harvest in 2001 (Interview). *SoyaScan Notes.* Feb. 17. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** This history in quite different from the one told by Jeremiah Ridenour in Feb. 2005 when everything looked bright. Both Billy and Jeremiah have left Wildwood / Pulmuone and have each started new businesses–although Billy has a contract to serve as a consultant for 3 years. Jeremiah took severance on 30 June 2006. Billy is working with his wife on a rug company that imports Tibetan-style rugs from Kathmandu, Nepal. Jeremiah has started Wise Decisions and does work with soy diesel.

Pulmuone's founder, Mr. Won [full name: Won Kyung Sun], who had started a farmers' cooperative after the Korean war, has been honored by the United Nations for organic agriculture. He founded Pulmuone on Christian principles: "Love your neighbor" and "Respect the environment." Years later, Mr. Won's son tried to develop a company out of this cooperative. He started by opening some stores, but eventually he fell upon hard times and was about to lose it all. But by great good fortune his roommate was a law student named Seung-Woo Alex Nam. Alex said, "I'll bail you out, but I want control." So Mr. Nam took control of what became Pulmuone and built it into a billion dollar company.

Tom Lacina has a brother named Sam Lacina who is a physician in Grand Rapids, Michigan. They have a third generation soybean farm in Iowa and Tom converted to organic. Tom is a musician (concert pianist) and an attorney. Tom and Sam Lacina bought out Paul Rosenmayr and Paul Orbuch of Wildwood.

Wildwood reincorporated in Iowa, then got money from Iowa through tecTerra (which is managing the fund for the state of Iowa). They put in a lot of money, then Wildwood leveraged that to borrow more money and they built two plants, one in Iowa and in one Watsonville, California. The financial status of the Watsonville plant depends on who you ask. Wildwood thought it was doing quite well since it was generating quite a bit of margin–although not as good as it used to when Wildwood was in Fairfax or Santa Cruz. The overhead now costs much more.

In 2002 Wildwood moved all the value-added production, which had been in both Fairfax and Santa Cruz, to Watsonville. We started making these value-added products in October 2002. Tofu production didn't move until Feb. or March 2003 because Jeremiah built a tofu system that didn't work; it never worked properly although it partially works. That was a big problem for the first year or so. Wildwood had to go back to making tofu by hand. It has computer generated and controlled grinding and cooking. Then there are four 250 gallon vats on a second level that hold the soymilk at a specific temperature. Theoretically the nigari (magnesium chloride) coagulant is injected into these tanks then mixed into the soymilk mechanically; blades inside spin around. That part of the plant all worked pretty well. But getting the curds down to the forming boxes was the problem; they could never figure it out. But Wildwood had to get out of its Santa Cruz plant. So Rick Loncarich, the plant manager in Santa Cruz, finalized the move.

So at this point the soymilk is just pumped down to the curding vats, the coagulant is stirred in and curding is done by hand. Then the curds are run through a conveyorized process. Billy thinks this is the best way. He has watched the Pulmuone style which is all mechanical, with injection of coagulant (mostly calcium sulfate and GDL) and little fingers stirring the mixture. Wildwood has long believed that nigari is the best coagulant because it makes the firmest tofu and you can handle it and reprocess it without any crumbling. It also makes tofu with the best flavor.

But in the end Wildwood ran out of money; always a big problem–long before Pulmuone came along. Basically, tecTerra in Iowa kept Wildwood afloat, but in exchange, tecTerra wanted control of the company and said that Wildwood had to find a buyer. That was a dark day; tecTerra ran Wildwood for over a year, and they really messed things up. They were using taxpayer money and they had been sharply criticized in the newspapers many times. So they were under a lot of pressure to make a success out of something. Their basic approach was to lay off lots of people to stop the financial bleeding; that is sensible from a strictly financial point of view but sort of stupid in terms longer-term thinking about what's going to happen in the future.

Then tecTerra said. "We're not going to put any more money in, and you have to sell the company." Then a Japanese man was CEO of Wildwood Harvest for about 3 months. Jeremiah's main work was helping to run the plant and doing some sales work too. Jeremiah had been CEO when Wildwood failed, so it was felt that he had had his chance.

The major problem was the plant in Iowa, not the plant in Watsonville, California. In Iowa, it took them a year build a new plant and to get quality that was consistent, and they still have problems. Leading the project were Jeremiah Ridenour, Tom Lacina, and Doctor Gandhi (who comes from India, had been making dairy yogurt for years, then sold that and started working with soy. He has a huge facility up north–perhaps Minnesota). Using Gandhi's technology, the three planned to make a cultured soy product. It took them almost 18 months, after the plant was built, to work through all the quality and microbial problems. Wildwood was burning through money faster than they had it to burn. The plant in Watsonville was late and over budget. The plant in Iowa was on time and on budget, but it took them more than a year to get the product going. Tom Lacina kept making tofu at his original tofu shop; the new facility was only for cultured soy products. The new plant is still running, but they have very low volume and very high overhead. The cost of

© Copyright Soyinfo Center 2013

making a product is more than the sale price. The cultured products plant in Iowa is still losing money hand over fist.

Meanwhile, Wildwood had already met Pulmuone U.S.A. (founded in Jan. 1991, a subsidiary of Pulmuone Co., Ltd. of Korea). at expos. Pulmuone began to take an interest in Wildwood, Wildwood told them everything and showed them everything–complete transparency. The first important thing Pulmuone did, in April 2004, as part of a strategic alliance, was to make an equity investment in Wildwood; they purchased shares of stock, but they ended up owning less than 50% of the shares.

At Yansei University Pulmuone has 85 PhDs doing everything you can think of all the time. So they send their people over and those people make reports and complete a very detailed analysis of the situation. Billy thinks they spend way too much time analyzing everything.

To celebrate the Pulmuone's 25th anniversary, Pulmuone took Jeremiah, Tom Lacina and Billy to Korea for 4-5 days first class. Also on the trip were Rachel Stauffer, of Cybus Capital (that ran the tecTerra fund for the state of Iowa) and Paul Kang, who would soon be CEO of the merged company.

Tom Lacina's records show (e-mail of 21 March and 2 April 2013): "April 19, 2004 is the date of acquisition by Pulmuone U.S.A. of controlling interest in Wildwood Natural Foods (there was a name change at that time from Wildwood Harvest to Wildwood Natural Foods).

"We arrived in Seoul the eve of May 10, 2004 and left Seoul on the morning of May 14, 2004. While there we joined in celebrating Pulmuone's 25th Anniversary and toured its largest plant, distribution center, R&D center, and stores. We visited the founder of Pulmuone and met some of the Board of Pulmuone.

"The first meeting of the Board of Directors of Wildwood Natural Foods, Inc., after the acquisition by Pulmuone occurred on May 12, 2004, at Seoul, South Korea.

"Billy stole all the attention because he looked like a rock and roll star!

"The next step was that Wildwood Natural Foods exchanged stock for the assets of Pulmuone U.S.A. in order to have Wildwood Natural Foods serve as the operating entity and Pulmuone U.S.A. serve as the holding company. This was an Asset Purchase Transaction, not a statutory merger. The documentation became messy during this transition at the end of 2004, but a reasonable date to use is December 16, 2004. I reference December 16, 2004, because that is the date when Wildwood Natural Foods resolved to use a fictitious name–PMO Wildwood–which was later adopted as the corporate name on October 6, 2005, and then changed to Pulmuone Wildwood on December 1, 2005. In fact, the process of collecting all the signatures on the asset purchase document took a couple weeks.

"We've re-purposed the tofu facility on my farm into an artist residency–GrinCityCollective.org. I continue to work for Pulmuone, but just as general counsel in the USA."

Returning to Billy's recollections: In Korea (May 2004) Pulmuone showed them everything, treated them with great respect, included them in everything. Billy clearly remembers mandated boilermakers and karaoke performances. Aside from that, Billy, Jeremiah, and Tom thought things looked very promising. "We were very upbeat about it" (Continued). Address: Pulmuone Wildwood.

12798. Bramblett, Billy. 2006. The real history of Wildwood Natural Foods after its merger with Midwest Harvest to become Wildwood Harvest in 2001 (Interview). *SoyaScan Notes.* Feb. 17. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Continued: They had the official first board meeting of the newly merged company at a high-class restaurant owned Pulmuone in Korea; the five board members were Paul Kang, Mr. Seung-Woo Alex Nam, Jeremiah, Tom Lacina, and Billy. Pulmuone also owns a chain of natural food retail stores (like Whole Foods) in Korea, and three tofu factories in Seoul.

It seemed like a good fit. In mid-2004 the decision was made to merge Wildwood Harvest Foods Inc. and Pulmuone U.S.A. On 20 July 2004 each company issued a news release announcing the new merger. The deal was struck by a man named Paul Kang, who was an investment banker, who was a Korean-American, and who speaks English very well and has a good relationship with the Korean company; he had already done some other deals with Pulmuone. Wildwood Harvest Foods, Inc. was renamed Wildwood Natural Foods and Pulmuone U.S.A. was give two seats on Wildwood's board. Pulmuone decided to make Paul Kang the CEO of the new, combined company. He many various changes to the logo.

"Pulmuone's plan was to go public in a few years, and we were all going to be able to cash in our chips." Billy and Jeremiah both owned shares in Wildwood which, over the years through hard work and good management (up to a point) had become a valuable company.

In the USA, Pulmuone was doing very well in the Korean market but they were struggling in the mainstream and natural foods markets. Paul Kang was a very smart person but he had never been a CEO before–especially of a food manufacturing company. Paul Kang went to Korea with Billy, Jeremiah, etc. Then they all went to Natural Products Expo East in the fall of 2004 and to Expo West in the spring of 2005. After about 8 months with him at the helm, Pulmuone realized they had made a mistake, so by June 2005 they sort of demoted him to COO (chief operating officer) of Pulmuone U.S.A. and brought in another person Y.C. Kang; they are not related. Y.C.'s first title was CRO (chief reorganization officer). He tried to reorganize things and put a whole new program into place. It got really crazy. It was a wild year; Mr. Nam would come over every couple

© Copyright Soyinfo Center 2013

of months and have personal meetings with Billy, Jeremiah, and Tom. It is kind of a hit and miss style. After doing all this analysis, they say "OK, let's do this." They try it for some time and if it is not working they say, "OK, let's change everything."

Billy and Wildwood have a deep understanding of their customers and the natural foods market, which has enabled them to stay ahead of the curve all these years.

At the time of the merger: Since Wildwood didn't have any money, they gave Pulmuone stock–so that Pulmuone has almost all the stock. Then they made Jeremiah and Billy into executive sales persons, who would manage different sales in different geographical areas. Jeremiah was in charge of Northern California. Paul Kang took southern California. Tom Lacina took everything out of California. Billy took ingredient, foodservice, and private label. Billy had already been doing this kind of work for a number of years, in part because nobody else was covering that particular channel. The ingredient people would come to Billy and tell him they needed a particular ingredient. He would work with them to develop their products, etc. Trader Joe's had been Billy's account from the beginning; they came onto the scene because Wildwood won the *San Francisco Chronicle* Baba Ganooj tasting contest many years ago. So Wildwood started making soy products (such as baked tofu–teriyaki and Thai–and burgers under the Wildwood label) for them over the years. For a while Wildwood did Soy Sour Cream made in Iowa for Trader Joe's. So in about Feb. 2005 Pulmuone gave all the new salespeople budgets and said, "OK, you make your top line and your contribution margin goals and we're going to promote you and give you money, bonuses, and stuff like that." Paul Kang didn't do very well, so they moved him back to the Korean company to do investment work. Jeremiah didn't do so well so they put him in public relations. Tom Lacina didn't do very well either in the East, although he has a really great guy working for there named Jim Williams. They company is in a lot of Whole Foods and UNFI warehouses east of the Mississippi. But he wasn't making his goals–so that put him in charge of all sales and marketing. Billy did very well–110% of the goals he was given. But they wouldn't give him credit for it (later they ended up giving him the bonus they had committed to). Billy still does not understand why. Then they took the Trader Joe's account away from him–an account where he had long, positive experience and good contacts. "They said they had a guy in southern California who would call on Trader Joe's. OK, whatever. So things got a little scratchy there." All this happened in the fall of 2005. Right now, Billy's share is not worth much. However if Pulmuone is successful in turning Wildwood around, the value will return and Pulmuone has given Billy and Jeremiah even more options. Billy owns shares in the new corporation which is named Pulmuone Wildwood Inc.; that's a U.S. corporation. Originally the corporate name was PMO Wildwood–because so many Americans can't pronounce Pulmuone. That was perceptive. But then Mr. Alex Nam who is really the head honcho of the whole shebang (CEO of Pulmuone Co., Ltd. Korea), as soon as they fired Paul Kang, decided to change the name back to Pulmuone Wildwood. Remember–every time you change a company name you have to change your labels, letterhead, etc. It's a huge job. Bill's told them he thought the best name was "Wild One." Nobody got it. But they did allow Billy to develop a few more products, so that was nice, until he came up with "Sloppy Jofu"–which has been selling very well since 2004. Last year he developed a chili, which they marketing department had trouble launching. Wildwood had been selling tofu to the organic division of Seeds of Change for about 7 years; they have used it in their rice bowls and noodle bowls. They wanted a flavored cube, so he just developed a product for them named "Tofu Barbecubes." He makes the tofu, cuts it into 3/4-inch cubes, marinates the cubes and then bakes them in shallow hotel pans in a conveyorized oven. Wildwood has been baking tofu for 20 years, but never in cubes before this. He just made 8,000 pounds of it for them and sent it to them. They liked it and soon ordered 8,185 pounds more. That was kind of his swan song.

Pulmuone's positive attitude started to decrease about a year ago. Pulmuone offered him a pretty good deal, which he took. But Billy is a consultant for three years; they are paying him about two-thirds of his salary and he doesn't really have to do anything. There is a non-compete clause concerning soyfoods that are the same or similar to those of Pulmuone-Wildwood in form and function; now he has two other clients, one of which is Seth Tibbott of Turtle Island. Billy is going with him to Anaheim in March. Billy is a guitar player. His latest project is with some folks who have a little campaign to get organic foods into school lunch programs in southern California. They call it "The Organic Rebellion." Billy told them he'd write a theme song for them. He just finished it and has recorded the basics. He's now getting kids lined up to do the vocals with him. It starts: "Sign me up for the organic rebellion."

Jeremiah just took a severance pay package; his last day was Jan. 30, 2006. Jeremiah started a new business, Wise Solutions, developing plant-based industrial products. He has several soy-diesel cars and he has been involved in the promotion of soy diesel for a number of years. Address: Pulmuone Wildwood.

12799. Van Gessel, Ike. 2006. Update on work with tempeh in the Netherlands, and sale of company (Interview). *SoyaScan Notes.* Feb. 17. Conducted by William Shurtleff of Soyfoods Center.

12800. **Product Name:** Re: Ethnic Koreans growing soybeans in Tajikistan or Turkmenistan, and her work introducing soyfoods to these countries.
Manufacturer's Address: Letter (e-mail) to William Shurtleff at Soyfoods Center, Feb. 18.
Date of Introduction: 2006. February.
New Product–Documentation: In Tajikistan she met a couple who lived near Dushanbe. The husband, Victor, was planning to grow soybeans. She gave him some seed grade soybeans to grow, although she had the impression that he hadn't grown soybeans before. She sensed that he wanted to grow them because of increased interest in soybeans–for reasons she does not understand. She gave him the seeds that Walter Barrett had given her, because the soybeans she had found in Tajikistan were not of good quality.

Victor led her to a Korean tofu maker, a woman who didn't speak Korean. She supplied tofu to a Chinese restaurant in Dushanbe. She told Helen that she bought her soybeans from Uzbekistan, and said they were expensive. Helen did not ask the woman when she had started to make tofu commercially or what the name of her small business was. Helen does not recall exactly where it was located.

Vera, Victor's wife, sold Korean salads at a green bazaar in Dushanbe. She and other Korean salad vendors at the green markets sold a type of dish made from Chinese TVP, which is white in color and imported from China.

At an import supermarket called Holland Market in Dushanbe, Helen found several Russian-made TVP products and soymilk powder. She also saw soymilk sold in Tetra Pak cartons.

In Ashgabat, Turkmenistan, two Korean men came to talk with Helen at the Winrock office about a soymilk machine.

In the Dashoguz region of Turkmenistan, Helen met two different groups of Koreans (a least 30 people total) who wanted to see her presentation and demonstration of soymilk and tofu production using a SoyJoy machine, along with a display of soy products such as tofu (in a Tetra Pak carton), TVP, soynuts, soy flour, soy protein isolates, energy bars, soy sauce, etc. In some presentations at farms or for women's groups (including the Korean groups), she also prepared soyfoods or Turkmen foods that included whole soybeans.

In Tajikistan, she gave 3 presentations / demonstrations: One at "Salsa Restaurant" in downtown Dushanbe, and two at a cafeteria and at the meat processing lab of the Khujand branch of the Technical College of Tajikistan. She usually ended her presentations with a meal with the participants. Her menu included Pulov [pilaf] (rice with some meat, soybeans, carrots, and onions), soup, salad, and a crepe (using a mixture of wheat flour, soy flour, and some type of local jam).

At the Agricultural University of Tajikistan in Dushanbe, and at the Khujand branch of the Technical College of Tajikistan, she gave technical presentations using an overhead projector with PowerPoint slides showing the nutritional composition of soybeans, and techniques for the preparation of traditional soyfoods and commercial products such as soy oil, soy protein, lecithin, etc.

In Turkmenistan: She gave food preparation presentations: (1) At a farm in the Mary district. (2) At apartment style homes in the cities (Mary district, and Dashoguz). (3) At the Winrock office in Dashoguz for different groups of women. (4) For 2 groups of Peace Corps volunteers in Dashoguz. "Peace Corps was interested in soyfoods because it was suspected that the protein intake of PCVs in that country was not sufficient."

While in Tajikistan and Turkmenistan, Helen did not see any soybeans being cultivated, nor any bundles of soybean plants harvested for green vegetable soybeans.

After her visit: (1) Her soy recipes were translated into the Turkmen language by Winrock staff, but (as far as she knows) they were not printed or reproduced. (2) A 30-page Russian-language brochure on soybeans was created (using desktop publishing) by a group of Peace Corps volunteers in the Dashoguz area. It included planting information and recipes, with colorful pictures and diagrams; about 200 to 300 copies were printed. The produced was funded by the Peace Corps and Helen, however Helen does not have a copy with her in Mexico. (3) Helen prepared a trip report, which is now the property of Winrock International. She did not write much about Koreans in that report.

She includes a Russian-language article on soya from the newspaper *Asia-Plus* (23 Sept. 2004, p. 4).

Note: This document mentions the earliest known commercial soy products in both Tajikistan and Turkmenistan.

12801. Gorman, Christine. 2006. Do calcium pills work? *Time* (*Europe and Asia*). March 20.
• ***Summary:*** Food sources of calcium "(1,000 mg to 1,500 mg needed daily): Atlantic sardines (108 mg per oz. [28 g]), canned salmon (68), low-fat plain yogurt (52), tofu (30), canned white beans (21) and regular skim milk (35 per fl. oz. [30 ml])."

12802. Illinois Center for Soy Foods. 2006. U of I center sponsors events to celebrate Soy Foods Month (News release). Urbana, Illinois. 1 p. March 22.
• ***Summary:*** "The Illinois Center for Soy Foods at the University of Illinois has scheduled several events to help celebrate National Soy Foods Month this April. A free cooking demonstration and taste test to help consumers become familiar with tofu, soy flour, soy milk, and textured vegetable protein (TVP) will be held on Saturday, April 22, from 9 to 11 a.m. in the test kitchen at the National Soybean Research Center [NSCR] in Urbana." Participants "will return home with recipes that they can try in their own

© Copyright Soyinfo Center 2013

kitchens." Space is limited and pre-registration is required.

"The center will also provide free soy-enhanced cookies on campus during the lunch hour each Tuesday in April. The cookies will be available at" 4 convenient locations on campus. The 5 soyfoods cookbooks published by the center will also be on sale for 50% off.

"In addition, the Center will host a soy-tasting event with the theme "Around the World with Soy" on Wednesday, April 19. The tasting will feature international cuisine with a soy twist." Address: Urbana, Illinois.

12803. **Product Name:** Soga All Natural Twin-Pack Tofu [Extra Firm, Firm, Soft].
Manufacturer's Name: Soga Soyfoods [Pulmuone U.S.A.].
Manufacturer's Address: 4585 Firestone Blvd., South Gate, CA 90280. Phone: 866-356-2800.
Date of Introduction: 2006. March.
Ingredients: Feb. 2007: Water, organic soybeans, calcium sulfate, glucono delta lactone, magnesium chloride. Certified by Quality Assurance International.
Wt/Vol., Packaging, Price: 15.5 oz (439 gm) packed in molded plastic tray with heat-sealed, peel-off plastic film lid. Retails for $0.99 (2007/02 Lafayette, California).
How Stored: Refrigerated.
Nutrition: Per 3 oz (85 gm): Calories 80, calories from fat 45, total fat 5 gm (8% daily value; saturated fat 1 gm), cholesterol 0 mg, sodium 5 mg (<1%), total carbohydrate 2 gm (dietary fiber <1 gm [3%], sugars 0 gm), protein 9 gm. Vitamin A 0%, vitamin C 0%, calcium 15%, iron 6%.. Percent daily values are based on a 2,000 calorie diet.
New Product–Documentation: Letter (e-mail) from John Sim, head of sales at Pulmuone. 2007. April 5. These three products were introduced in about March 2006 at the Natural Products Expo West, at Anaheim, California. Their innovative package was first introduced in Oct. 2002 with their Organic Twin Pack.

12804. Soybean, a miracle bean (Leaflet). 2006. New Delhi, India: American Soybean Association (ASA) / United Soybean Board. 2 p. Front and back. 28 cm. [7 ref]
• ***Summary:*** Contents: Soybean a miracle bean. Soybean and health benefits. How to use soy daily: Soybeans ("...can be used like lobia. They can also be added up to 20% in dosas, pesarutta, dahi bhalla and vadas etc. where whole legumes are used... can be added up to 20% in recipes such as chole, rajma and dal makhani"), defatted soy flour (contains 50% protein), wheat-soy flour (1 kg defatted soy flour mixed with 10 kg wheat flour), besan-soy flour ("Add 20% defatted soy flour to besan [chickpea flour] and use to make products such as pakora, chilla, kadhi, etc.") nuggets and granules (soy bari), soymilk, soy paneer (tofu), soy papad, soy nuts (whole soybeans that have been soaked in water and then baked until browned), soybean oil.

Note: Printed in four colors on glossy white paper with a green border. Ten thousand copies were printed in April 2006. A color illustration shows a cute cartoon of a soybean character seated next to a meal tray with "thumbs up." Address: American Soybean Assoc., Asia Subcontinent, 149 Jor Bagh, New Delhi–110 003, India. Phone: (91) (11) 2465-1611.

12805. Nordquist, Ted; Webster, Robin. 2006. New developments making dairylike soyfoods in America (Interview). *SoyaScan Notes.* May 9. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** WholeSoy & Co. is a wholly-owned subsidiary of TAN Industries; Ted now prefers to used the former name instead of the latter. Modesto WholeSoy Co. is its own entity. Ted and his business partner, Henry, now own 85% of the stock.

Silk soymilk was launched in Jan. 1996. Ted was having a lot of problems with the soy base made by Pacific ProSoya in British Columbia. About a year later [probably in about March 1997] Ted installed a soy base plant at Soyfoods of America in Duarte, California. He did this together with Wally Rogers, owner of Bean Machine Inc. (BMI–using a stainless steel grinder / disintegrator made for BMI by Corenco, owned by Chris Cory). Wally took Ted to Chris and together they designed the grinders to be installed at Soyfoods of America. In about Sept. 1997 Ted started producing soy base for Silk soymilk at the plant in Duarte. This soy base was sent in tankers from Duarte to Gustine, where Ted and coworkers formulated the Silk soymilk.

Ted's next product was made together with Gary Stein. Gary (of San Diego) called Ted and said that Trader Joe's wanted a soymilk. Ted said to Gary, "That's fine, but I have a contract with Steve Demos, so I can't do that." So Ted set up Gary. He told Gary that Ann Shaw and Laura Tewnion knew how to formulate soymilk. He and Gary talked a lot about it but he told Gary, "I can't touch it with a ten foot pole, but I'm happy to ship the soy base to you." So Ted shipped the soy base from Duarte to Gustine, then Gary Stein formulated the soymilk for Trader Joe's and sold it to Trader Joe's.

Ted's next product was Certified Organic Soymilk, made for Wildwood Natural Foods and launched in July 1998.

Next, in 1999, Ted and Henry came up with the WholeSoy name. So they had cups designed for WholeSoy but, of course, they had no sales volume, so they sent that idea to Trader Joe's, which agreed for Ted to private label the product for Trader Joe's. So Ted launched both the WholeSoy and the Trader Joe's private label at exactly the same time. They were exactly the same products but in different cups.

In about May 2004 changed the name of his company to WholeSoy & Co. from TAN Industries, and his brand to WholeSoy & Co. from The WholeSoy Co. The words "WholeSoy & Co." first appeared on their Lite Smoothies in September 2004. Ted did a focus group in which he put

© Copyright Soyinfo Center 2013

out packaging from products made by Silk [White Wave], Stonyfield, Wildwood, and TAN Industries. The members of the focus group were asked to describe what they understood by looking at the different packages. "They thought that WholeSoy was a generic name, that companies like Safeway and Albertsons were making. They thought WholeSoy was a really big corporation, and that therefore its products should sell for the lowest price." Ted recalls: "It was unbelievable. I was just speechless. I wanted to go in there and tell them how wrong they were!" They knew the Stonyfield brand and thought that product was worth the money. The Wildwood product attracted them because it had a real good appearance."

In about Jan. 2006 Ted started printing "Soy Yogurt" in large letters on the front of his yogurt cups–which previously said only "Cultured Soy." It happened like this. Ted's soy yogurt is made by SSI (Super Store Industries), which is owned by Raley's and Save Mart (both supermarket chains). Ted was going into new packaging and he asked them: "Do you have any problem using the terms "Soy Yogurt" or "Soy Frozen Yogurt" on the cups? They said they would check. They checked all of their contacts then told Ted that there was no objection to using those terms.

In Jan. 2006 Ted started using the term "Soy Yogurt" in large letter at the top front panel of his yogurt cups. He gradually phased it in to all flavors as new cups had to be printed.

In Sweden, Ted had only one plant in the county of Enkoeping (pronounced en-CHUR-ping) where he made soyfoods. He built (together with Mark Jungstrum of Trensusms Musteri) a soybase plant in the commune and city of Tingsryd near Karlshamn; it produced 3,000 to 3,500 liters/hour of soybase. And he had a test plant at Alfa-Laval in Lund.

WholeSoy's Soy Cream Cheese was introduced in Feb. 2005 in two flavors: Original and Garlic & Herb. It had a 90-day shelf life with 12 packs per case. Both are still on the market but Ted is in the process of discontinuing the product by letting them "sell through" until they are all off the shelves. He got them into all the natural food stores, but the total market for this product category is too small, so sales were too slow.

In about Sept. 2004 Ted also launched a WholeSoy Smoothie Light, but discontinued it in about Nov. 2005. it. It contained very little sugar and used Lo Han fruit concentrate as the natural sweetener. Address: WholeSoy & Co., 49 Stevenson St., Suite 1075, San Francisco, California 94105-2975; 660 Vischer Ct., Sonoma, CA 95476. Phone: 415-495-2870.

12808. Bakhshandeh, Ehsan. 2006. Soya health benefits underlined. *Iran Daily.* May 31.
• ***Summary:*** Tehran, May 30. A man who distributes equipment for making soyfoods stressed their health benefits and the role they can play in the prevention of cancer and in reducing the risk of heart disease.

At the 13th International Food, Drink and Packaging Technology Trade Fair in Tehran, Firouz Zanjani, managing director of Assoy (Middle East Div.) said that in Iran, soybeans are classified as vegetables. From them, using his equipment, soyfoods such as soymilk, tofu, soyyogurt, and soycheese can be made. All have important health benefits. Soymilk, from which the other soy products are made, contains no lactose, cholesterol, or side effects, and therefore can be consumed by people of all ages.

Soybeans have been cultivated in Iran for the past three years. They are grown only in the north, in Gorgan, Golestan province. The climate in other parts of Iran is not suited for soybean cultivation. In 2007, according to Zanjani, 240,000 tons of soybeans will be produced in Iran, "while 130,000 hectares will be brought under soybean cultivation in the next two years."

Zanjani said there is only one large factory in Iran that processes soybeans. It was established 9 years ago, however its products began to be marked only 18 months ago. Yet the high price of these products is the main reason for their low per-capita consumption in Iran. Zanjani further blamed poor dissemination of information about the health benefits of soy products. Despite the publicity campaign, using advertisements in newspapers and on billboards, only 5-10% of Iranians know what soymilk is. He added that two other soyfoods factories equipped with the state-of-the-art technology will be launched in 2007 in Tehran and Mashhad.

A color photo shows Firouz Zanjani.

12809. **Product Name:** Satay Noodle Salad.

Manufacturer's Name: Hodo Soy Beanery.
Manufacturer's Address: 1600 S. De Anza Blvd., San Jose, CA 95106. Phone: 408-517-8958.
Date of Introduction: 2006. May.
Ingredients: Soybeans, filtered water, carrots, wood-ear mushrooms, peanut sauce, sesame paste, sesame oil, sugar, soy sauce, calcium sulfate.
Wt/Vol., Packaging, Price: -
How Stored: Refrigerated.
New Product–Documentation: Labels by brought to Soyinfo Center by Minh Tsai on 2009. Sept. 16.

12810. **Product Name:** Tofu Jerky.
Manufacturer's Name: Hodo Soy Beanery.
Manufacturer's Address: 1600 S. De Anza Blvd., San Jose, CA 95106. Phone: 408-517-8958.
Date of Introduction: 2006. May.
Ingredients: Soybeans, filtered water, soybean oil, soy sauce, sugar, Chinese five-spice powder (fennel, clove, cinnamon, anise, peppercorn), calcium sulfate.
Wt/Vol., Packaging, Price: -
How Stored: Refrigerated.
New Product–Documentation: Labels by brought to Soyinfo Center by Minh Tsai on 2009. Sept. 16.

12811. Mescher, Kelly. 2006. Indonesia: Aquaculture and soyfoods are key selling points. *Iowa Soybean Review* (*Iowa Soybean Association, Urbandale, Iowa*) 17(7):14. Spring.
• ***Summary:*** "In Indonesia, the aquaculture industry is huge and growing. And aquaculture's No. 1 source of protein is soybean meal." In fact, "aquaculture is the fastest growing use of soybean meal right now."

The market for soyfoods in Indonesia is also huge and growing. They consume 2 million tons a year of soybeans. Since they have no soybean crushing plants, the soybeans are imported largely for food use. "Tempeh producers are the biggest customer of whole soybeans in Indonesia." No. 2 is tofu makers. Both tempeh and tofu are basic foods in the Indonesian diet.

Photos show: (1) Directors of the Nebraska Soybean Association observing undersea aquaculture cages. (2) Many cakes of tempeh produced in the backyard of a small mom and pop shop in Indonesia.

12812. Caplan, Jeremy. 2006. A healthier trip to the supermarket. *Time.* June 15.
• ***Summary:*** Phil Lempert, supermarket guru, writes about healthy foods. He says: "Tofu, which has long been popular in Asia, is becoming more common in American supermarkets." Generally sold in the produce section, either in rectangular tubs or vacuum packs, "tofu is healthy, easy to prepare and relatively inexpensive."

12813. Gilbert, Daniel. 2006. Does fatherhood make you happy? *Time.* June 19.
• ***Summary:*** "... when something makes us happy we are willing to pay a lot for it, which is why the worst Belgian chocolate is more expensive than the best Belgian tofu."

12814. Vandemoortele Group 2006. Vandemoortele Group takes over SoFine Foods (News release). Ghent, Belgium. 2 p. June 23.
• ***Summary:*** "The boards of Vandemoortele and Heuschen & Schrouff Foods Group confirm the takeover of SoFine Foods, a subsidiary of Heuschen & Schrouff, by Vandemoortele. SoFine Foods is a leading manufacturer of tofu, a soy-based alternative to meat products.

"Via its Alpro soya division, Vandemoortele is the European market leader in the segment of 100% natural soy products. The Heuschen & Schrouff Foods Group is through its subsidiary, Heuschen & Schrouff Oriental Foods Trading, one of the most important players in Europe in the field of import & export of authentic Asian products." Bernard Deryckere is Managing Director of Alpro. Frits Schrouff is General Director of Heuschen & Schrouff Foods Group.

"SoFine, situated in Landgraaf [Netherlands], has more than 70 employees. Set up in 1963, this organisation was the first in Europe to produce tofu on an industrial scale. Through the ensuing years SoFine Foods has grown to become a leading player in the field of tofu products. Tofu is a 100% vegetable alternative for meat products on the basis of soy and has been part of the usual diet of people in China and Japan for centuries. SoFine Foods is active, with an extensive range of tofu products (Tofu strips, Tofu mince, Tofu Balls, Tofu Burgers), in various European countries, with the focus on Belgium, the Netherlands, France and Germany. Alongside its main brand name, SoFine also owns the brand De Morgenstond, which is mainly distributed in organic food shops in Belgium and the Netherlands.

"About Heuschen & Schrouff Foods Group: The Dutch company Heuschen & Schrouff has specialised for the last 45 years in the import & export of authentic Asian products. More than 2000 articles are imported directly from countries such as Thailand, the Philippines, Singapore, Malaysia, Vietnam, Japan, China, etc. The family-run company has its own bean sprout nursery and until recently a tofu factory. The company markets its assortment in some 10 European countries. With 225 employees the group turnover is in the region of 55 million euro. SoFine realises a turnover of 8.2 million euro."

Note: Ghent, located in the Flemish region of Belgium, is the country's 2nd largest municipality by number of inhabitants.

12816. Sylva, Bob. 2006. Sacramento Tofu Co. soon to celebrate 60th anniversary. *Sacramento Bee.* Aug. 2.
• ***Summary:*** Alvin Kunishi, 62, owner (with his wife Dorothy) of the Sacramento Tofu Co., has been making tofu since he was a boy. Alvin says the company was founded in 1947 by his father, Hiroshi "Tom" Kunishi, a gregarious man, fresh from an internment camp, who knew a little about making tofu. Today the company makes about 6,000 pounds a week.

Azumaya, another early tofu company, was purchased in the early 1990s by Vitasoy, which shut down the Azumaya tofu factory in South San Francisco and moved the operation to Ayer, Massachusetts.

12817. Patterson, Daniel. 2006. The way we eat: I can't believe its tofu. *New York Times Magazine.* Aug. 6. Sunday.
• ***Summary:*** The writer never thought he could love a soy product. He could probably muster admiration, certainly respect, but never infatuation. So he was quite surprised when dining at Kappo Sakamoto in Kyoto, Japan, that he swooned over a dish of yuba. It was served in a handmade box, simmering in water over a piece of glowing charcoal. He lifted the opaque sheets from the bubbling water, dipped them into a sauce (made from soy sauce, dashi, mirin, and fresh wasabi) and wow! A mildly sweet flavor and tender texture he had never experienced before. Here was tofu's "sexy and elegant cousin." He returned to the USA in search of yuba.

By good fortune, Ryuta Sakamoto, the son of Kappo Sakamoto's chef, was a partner in a San Francisco restaurant name "Medicine," that served (among other things) yuba! He explained that "yuba is one of the purest expressions of Kyoto cuisine. It is exquisitely simple, so its magic lies in the quality of the ingredients and the skill with which they are handled." Just as a film forms atop milk when it is heated, so yuba forms atop soymilk. Each batch of soymilk will yield about 7-8 layers of yuba. The first 4-5 are the best quality; the last 2-3 sheets are generally dried. "Yuba is best just after it is made" and will keep for only about 5 days.

Can you make yuba at home? Yes, but not with commercial soymilk. The protein content is too low.

Then Sakamoto directed the writer to Minh Tsai, the owner of Hodo Soy Beanery, a Bay Area company that makes soyfoods using only organic ingredients that are not genetically engineered. Tsai sells his yuba and other soy products at farmer's markets around the Bay Area and will also ship yuba in the U.S. The writer bought some and rushed back to his restaurant to try it. Modest success. But when he deep fried the yuba it was pure bliss.

12818. Kunishi, Alvin. 2006. Early history of Sacramento Tofu Co. (Interview). *SoyaScan Notes.* Aug. 10. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Alvin's mother, Michiko Kunishi, who is still alive and whose husband (Hiroshi "Tom" Kunishi) founded the Sacramento Tofu Co., has always told Alvin that the company was started in 1947 in Sacramento. She helped her husband with the company as much as she was able to while raising a family. Four men founded the company: (1) Hiroshi, Alvin's father. (2) Takeo Hiroshige, a friend of Hiroshi's who is still alive. (3) George Shimada, Alvin's uncle (his mother's brother), and (4) Mr. Tsumura, who taught Hiroshi Kunishi how to make tofu. Alvin thinks that Mr. Tsumura may have owned a tofu company before World War II began. Alvin thinks there were 2-3 tofu manufacturers in Sacramento before the war. All four men worked at the company from day to day for about the first 1-2 years. Takeo Hiroshige told Alvin several times that the company was founded in 1947. Other than this, Alvin has no written or documentary proof of the date the company was founded.

Sacramento State College collects materials on the history of Japanese Americans in Sacramento.

Note: Japanese American Directories show that at least 19 different tofu manufacturers existed in Sacramento from about 1895 to 1941. Address: Owner, Sacramento Tofu Mfg. Co., 8300 Belvedere Ave., Sacramento, California 95826.

12819. Kunishi, Michiko Shimada. 2006. Origin and early history of Sacramento Tofu Co. (Interview). *SoyaScan Notes.* Aug. 10. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Michiko Shimada grew up in Sacramento. Her father owned and ran a grocery store. When Japanese-Americans living on the West Coast of the USA were told to leave home and report for internment camps, he boarded up his grocery store and left. He ended up losing everything during the war. Michiko was sent to the Tule Lake camp,

12820. United Soybean Board (USB). 2006. Consumer attitudes about nutrition: Insights into nutrition, health, and soyfoods. 13th annual national report. Seattle, Washington. 8 p. Oct. 28 cm.

• ***Summary:*** The methodology used in this survey changed significantly in 2006. Previously, random telephone interviews were completed with 1,000 consumers. This year an online self-administered survey was used. "Conducted by an independent research firm [in Seattle, Washington] in February and March 2006, the study includes 1,000 random surveys, providing a sample that is consistent with the total American population. The study's margin of error remains ± 1.9 to 3.1%, with a confidence interval of 95 percent."

Contents: Introduction. Methodology. About USB. Nutritional habits and obesity concerns. Healthy food decisions. Cooking oil impressions. Consumer attitudes about fats. Awareness and usage of soy products. Occasion preferences for consuming soy. Restaurants and soy products. Soyfoods in health.

Awareness and usage: 30% of Americans consume soyfoods or soy beverages once a month or more. A table shows the "Top 20 soy products by awareness." Soymilk 87%. Soybean oil 61%. Soy veggie burger 60%. Plain white tofu 59%. Soy infant formula 44%. Soy nuts 43%. Soy latte 35% (Soymilk in espresso coffee drinks [as at Starbucks]). Soy protein bars 32%. Soy hot dogs 30%. Soy yogurt 29%. Dried or canned soybeans 29%. Soy flour 28%. Soy ice cream / cheese 28%. Cereal bar / Energy bar 28%. Flavored / Marinated tofu 26%. Miso 24%. Soy supplements 23%. Soy breakfast cereal 23%. Textured soy protein. Edamame 17%. All others mentioned 12% or less.

Occasion preferences for consuming soy (in descending order of preference): dinner 40%, breakfast 29%, lunch 22%, mid-morning snack 16%, mid-afternoon snack 16%, etc.

Soy products ordered in restaurants: Soy veggie burger 29%. Tofu 29%. Soymilk 28%. Miso 14%. Edamame 8%. Tofu (prepared) 6%, etc.

"In 2006, 82% of consumers rate soy products as healthy, significantly more than in previous years" (78% in 2005, 74% in 2004, 67% in 1998). Why? Low-fat profile 20%. Protein content 15%. Heart health 15%. Cholesterol-lowering properties 12%. "Being good for you" 10%. "A lactose-free option 10%."

Note: As of Aug. 2008 this full survey is available gratis in PDF format at www.soyconnection.com /health_nutrition / pdf/.

12821. Hymowitz, Ted. 2006. Why did the West (Europe and the Middle East) know so little about China in the 12th and 13th centuries? (Interview). *SoyaScan Notes.* Sept. 1. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Because the Arabs blocked most European travel over the Silk Road / Route from about the 7th century until the 12th or 13th century. The Arab conquest blocked the overland route, in part to control the trade. There were actually two phases in the history of the Silk Road. The first phase ended in about the 6th or 7th century, before the origin of Islam.

Note: Both of these "Silk Roads" was actually a series of interconnected routes that ran from about Xian (Chang'an) in eastern China, along the northern part of China, branching into today's Central Asia, south of the Caspian Sea, through today's Turkmenistan, Iran (formerly Persia), and Iraq, to Damascus (today's Syria) and Antioch (in today's Turkey). The first famous and documented Chinese traveler, Zhang Qian (W.-G. Chang Ch'ien) led two expeditions to the Western Regions in the 2nd century BC, during the Former / Western Han dynasty.

As early as the 1st century AD, there were already some oceanic routes that were part of the "Silk Road." They hugged the coast from central China, around India, into the Persian Gulf and the Red Sea, then on to Italy!

This Arab blockade was one of the reasons for the search for a water route to China. The blockade began to fail as sea routes were developed. For example, in May 1498, Vasco da Gama was the first European to discover a sea route to India.

Another reason it took so long for information about the soybean to reach Europe from China was that the soybean is unlike rice, wheat, and maize / corn, where the product of the crop is associated very closely with what is growing in the field; everyone knows what rice, wheat and corn look like because they are so widely consumed as food. The main products of the soybean, especially those in commerce (such as soy sauce), bear no resemblance to the seed or plant from which they are made. It took a long time before Europeans realized that soy sauce (for example), which was known in

© Copyright Soyinfo Center 2013

Europe by the late 1600s, was made from the soybean–which did not arrive in Europe until the late 1730s. Even in Asia, the various names of the soybean were very different from the names of its major products. For example in China: Soybean is *dadou* or *huangdou,* soy sauce is *jiangyou,* tofu is *doufu,* and soymilk is *dounai* or *doujiang.* In Japan: Soybean is *daizu,* soy sauce is shoyu, tofu is tofu, soymilk is *tonyu,* miso is miso, natto is natto, and green vegetable soybeans are edamamé. In Indonesia, tempé is tempeh. Even in the Western World today, many of these traditional foods and condiments do not have "soy" as part of their name. Moreover, the foods look totally different from the seed / bean from which they are made.

The first European to understand the connection between the soybean and its products was Engelbert Kaempfer; he made this clear in his book *Amoenitatum exoticarum...* vol. 5. Yet most Westerners did not understand this connection until more than a century later, and quite a few even today don't realize that tofu (for example) is made from soybeans.

Ted is convinced that Marco Polo and the various early Western missionaries who traveled to China probably tasted soyfoods over and over again–but they didn't realize they were made from soybeans. A good example is milk. The early Western travelers in China often mentioned that Chinese drank milk; in some cases they were probably drinking soymilk. Address: Prof. of Plant Genetics (retired), Dep. of Crop Sciences, Univ. of Illinois, Urbana, Illinois.

12822. Tisdale, Kevin. 2006. Has Pacific Foods of Oregon, Inc. (Tualatin, Oregon) changed its name to Pacific Natural Foods (Interview). *SoyaScan Notes.* Sept. 18. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** This question arose because, on the company's website, the space at the top of each page where the company name usually appears, bears the prominent name "Pacific Natural Foods: The Delicious Taste of Nature." Only at the very bottom of each page, in very small, almost inconspicuous letters, do we read: Copyright 2006, Pacific Foods of Oregon, Inc.

On the "Contact us" page, is the company's address, phone number and fax number, but no company name above those–as usual.

Under "About us," the page titled "History" begins: "Pacific Natural Foods was founded in 1987. When the co-founders began building the company, their idea was to start by making tofu."

Kevin says that Pacific Foods of Oregon, Inc. is still the company's legal name. The company's main brand used to be "Pacific Foods," but about 1½ years ago that was changed to "Pacific Natural Foods."

The company is doing well. Since it does not have refrigerated distribution, its soymilk line has been hurt by the trend (started by White Wave's Silk) toward refrigerated sales in the dairy case. The company's Almond Milk and Oat Milk now sell almost as well as the soymilk, although there are many more SKU's of soymilk. Address: Pacific Foods of Oregon.

12823. **Product Name:** CrèmSo [Peach, Raspberry, Strawberry, Tropical Fruit].
Manufacturer's Name: Bloom Foods Co.
Manufacturer's Address: 3100 Mill St., Suite 206, Reno, Nevada 89502. Phone: 775-324-2005.
Date of Introduction: 2006. September.
Ingredients: Peach: Peaches, organic soy puree (water, organic USDA #1 soybeans, magnesium chloride), pears, evaporated cane juice, corn starch, natural flavors, inulin, annatto extract (for color), lemon juice, carrageenan, guar gum, vanilla.
Wt/Vol., Packaging, Price: 4 cups per unit, 4 oz per cup.
How Stored: Refrigerated.
New Product–Documentation: Leaflet sent by Patricia Smith from Natural Products Expo East. 1996. Sept. "CrèmSo–All Natural Fruit & Soy Crème." www.cremso.com. An illustration shows the four different packages.

12824. Helen's Kitchen. 2006. Helen's Kitchen: Simple health (Leaflet). Irvine, California. 1 p. Front and back. 28 cm.

• ***Summary:*** Leaflet (glossy color) sent by Patricia Smith from Natural Products Expo East. 2006. Sept. This company sells frozen vegetarian entrees, many of which contain tofu or soybeans. On the front: "Our story: For over 20 years Helen Moore has cooked her famous full-flavored Tofu Steaks for family & friends. After college, Helen's son, Stephen, asked if he could take Helen's Tofu Steaks from her kitchen to the world–creating Helen's Foods Inc." Only organic soybeans.

On the rear are shown 8 meals, with the name ingredients, and product information for each. These include: Mexican meals: Cheese Enchiladas with Tofu Steaks in Spicy Red Sauce. Italian Meals: Farfalle & Basil Pesto with Tofu Steaks. Indian Meals: Indian Curry with Tofu Steaks over Rice. Asian Meals: Thai Yellow Curry with Tofu Steaks & Vegetables over Rice.

Basics: GardenSteak. Basics: Vegetarian Chicken Tofu Steaks. Basics: Italian Parmesan Tofu Meatballs. Basics: Italian Spiced Tofu Meatballs.

12825. **Product Name:** Soyboy Round Ravioli (With Organic Tofu Filling) [Original, Verde, Rosa].
Manufacturer's Name: Northern Soy, Inc.
Manufacturer's Address: 345 Paul Rd., Rochester, NY 14624. Phone: 585-235-8970.
Date of Introduction: 2006. September.
Ingredients: Ravioli Verde: Pasta: Enriched durum flour,

© Copyright Soyinfo Center 2013

filtered water, wheat gluten, spinach. Filling: Organic tofu, tomato paste, fresh onion, tapioca, onion and garlic powder, non-irradiated herbs and spices, vegetable gum, sea salt. honey, sea salt.
Wt/Vol., Packaging, Price: 10 oz package.
How Stored: Frozen.
New Product–Documentation: Leaflet (8½ by 11 inch, front and back, glossy color) sent by Patricia Smith from Natural Products Expo East. 2000. Sept. "SoyBoy artisan round ravioli. Filling made with organic tofu. Non-dairy, No cholesterol. Low fat."

From www.soyboy.com: "Original Tofu Ravioli is made with superior durum flour for a light texture and is filled with a deliciously seasoned organic tofu filling. It's perfect for lactose-intolerant people and a great way to introduce a friend to organic tofu!

"Ravioli Rosa combines the light taste of tomato pasta with a roasted sweet red pepper and organic tofu filling. Enjoy it with a light sauce or a simple vinaigrette dressing.

"Ravioli Verde starts with the subtle taste of spinach pasta and adds to it a garden herb-seasoned organic tofu–great with your favorite veggie sauce!"

12826. **Product Name:** Soyboy Baked and Seasoned Organic Tofu [Italian Tofu, Tofu Lin, Caribbean Tofu, Smoked Tofu].
Manufacturer's Name: Northern Soy, Inc.
Manufacturer's Address: 345 Paul Rd., Rochester, NY 14624. Phone: 585-235-8970.
Date of Introduction: 2006. September.
Ingredients: Caribbean Tofu: Organic Tofu, non-GMO soy sauce, barley malt, onion powder, apple cider vinegar, non-irradiated spices.
Wt/Vol., Packaging, Price: 8 oz package.
How Stored: Refrigerated.
New Product–Documentation: Leaflet (8½ by 11 inch, front and back, glossy color) sent by Patricia Smith from Natural Products Expo East. 2000. Sept. On the front: "Enjoy the goodness of organic tofu in great tasting flavors." Each of the four products is shown on a green tiled background. On the rear is given the ingredients, nutrition facts, and product information for each product.

From www.soyboy.com/baked.htm:

"Tofu Lin is our SoyBoy Organic Tofu marinated with traditional oriental flavorings and baked so it is ready to eat right out of the package. Low in saturated fat and cholesterol free, it is a great substitute for meat in oriental stir-fries and in salads and soups.

"Italian Tofu is SoyBoy Organic Tofu tastefully seasoned with Italian flavorings. Great in salads, pasta dishes, or in any casserole where you choose to add healthful, organic soy in a unique, tasty form.

"Our Caribbean Tofu recipe is SoyBoy Organic Tofu that has been marinated and baked according to a Jamaican family recipe. Combine Caribbean Tofu with other ingredients to add a delicious, exotic zest to your meal, or enjoy it as a snack, straight from the package.

"Smoked Tofu is SoyBoy Organic Tofu that has been baked, seasoned and smoked. Ready to eat right out of the package. It's great in sandwiches, hors d'oeuvres and split pea soup. It also makes a great substitute for smoked cheese."

12827. **Product Name:** Voluptuous veggie delights! Discover six unique meat alternatives from Europe's premier tofu innovator (Sell sheet).
Manufacturer's Name: Viana. Made in Germany by Tofutown.com.
Manufacturer's Address: Wiesbaum, Germany D-54578.
Date of Introduction: 2006. September.
Ingredients: Viana Veggie Turkish Roast: Water, Tofu* (soybeans, water, nigari), wheat protein*, sunflower oil*, roasted onion (onions, palm oil, wheat flour, salt), soy sauce* (water, soybeans*, sea salt, wheat*), spices, sea salt, raw cane sugar, tomato paste, locust bean gum, herbs, yeast. * = Certified USDA Organic.
Wt/Vol., Packaging, Price: 7.05 oz (200 gm).
How Stored: Refrigerated.
New Product–Documentation: The following are "Now available in the U.S." Import and distribution: Ceres Organics, 2121 30th St., Boulder, Colorado 80301. Tel. +1 866 542 1559. www.ceresorganic.com." Viana Cowgirl Veggie Steaks (Holzfäller Hacksteaks), Viana Chicken Fillets, Viana Veggie Gyros, Viana Veggie Turkish Roast, Viana Veggie Cevapcici, Viana Veggie Kebab (Veggie Dönner / Donner Kebab).

All are vegan with 0% lactose and 0% cholesterol. Heart healthy. Very low in saturated fatty acids. Savory and flavorful. Authentic texture in each variety. Ready in five minutes. Made with organic ingredients. High quality sources of protein. GMO free.

On the rear side of this sell sheet are nutrition facts and ingredients for each of the six products.

"Dishes like sesame tofu are nods to Kyoto's Buddhist vegetarian cuisine. At the end comes the spiritual heart of the meal: rice, pickles and the best miso soup around."

12832. Weil, Andrew. 2006. How foods can affect cancer. *Time***.** Nov. 20.
• ***Summary:*** The article begins: "What do steak, tofu and sushi have to do with cancer? Plenty, it seems, if several" new studies are to be believed. One study found a disturbing association between red meat consumption and cancer. A epidemiological study showed that Asian women consuming diets rich in soy have significantly lower rates of breast cancer than Western women have.

The report that interested Dr. Weil most examined the association between breast cancer and "soy-based foods" [soyfoods]. This has become a controversial subject because "soy contains isoflavones;" some of these, in an "isolated form, can stimulate the growth of estrogen-receptor-positive breast-cancer cells. That's why many Western doctors warn women against eating soy." Yet the epidemiological evidence looks promising: Asian women who consume "diets rich in soy have significantly lower rates of breast cancer than Western women have."

Dr. Weil was particularly pleased to see a new study of Asian-American women done by the National Cancer Institute. It studied women who ate a lot of soy-based foods as children, adolescents and adults. "The strongest and most consistent association was among women who ate the most soy-based foods from ages 5 to 11." Their risk of developing hormone-fueled breast cancer was only 58% as much as the women who ate the least soy-based foods. Women who ate a lot of soy as adolescents or adults reduced their risk by 25%. "Regular, moderate consumption of whole-soy foods (such as soynuts, edamame, soymilk, tofu and tempeh) probably affects the development of breast tissue in young females, possibly making it more resistant to carcinogens, including estrogenic agents in the environment."

Dr. Weil believes that women who have a history of breast cancer should be introducing their kids to soy foods at as early an age as possible. "Substituting soy milk for cow's milk is one way to start." He believes the same thing will be shown to hold true for boys; a diet that includes soy foods may reduce their future risk of prostate cancer.

A large color photo shows a white bowl filled with edamamé (green vegetable soybeans in the pods). A sidebar across bottom of article, titled "What we eat," states: (1) In 2004, U.S. per capita consumption of red meat was nearly 120 lbs. (2) In 2005 Americans ate, on average, 5 oz. of soy protein (equivalent to 12 oz. of soybeans), including ½ gallon of soy milk and 7 oz. of tofu. (3) In 2004 the average American ate 16½ lbs. of fish and shellfish.

Note: This is the 2nd earliest known article in *Time* magazine that mentions tempeh. Address: M.D.

12833. Endô, Orie. 2006. A cultural history of Japanese women's language. *Michigan Monograph Series in Japanese Studies***.** No. 57. vii + 129 p. Nov. See p. 38. [415+* ref]
• ***Summary:*** In the section titled "Women's language in the Kamakura [1185-1333] and Muromachi [1336-1573] periods" we learn (p. 37) that *mushi* is the women's word (*nyôbô-kotoba*) for miso; it appears in *Senjimono* (The Decoction).

The word "mame no ko" (meaning *kinako* or "roasted soy flour") appears on page 38–in the very interesting context of women's words created during the Edo period. We read: "Some expressions came into use among the men of the samurai class as well, a fact lamented in *Kagomimi* [a book published during the Edo period, 1600-1867]. 'It is unpleasant to hear samurai, tradesmen, and artisans use words that are women's. Examples such as... *okawa* for *kawamesha,* 'glutinous steamed rice for red beans,' *akanomeshi* for *sekihan,* 'festive red rice, *kinako* for *mame no ko,* 'soybean flour,' are all too frequently used.' There are also examples of men using words such as *murasaki, himojii,* and *okabe* in a collection of popular common stories called *Seisuishô* (1623).

Note: This series is published by the Center for Japanese Studies, University of Michigan, Ann Arbor, Michigan. Address: Dep. of Cultural Linguistics, Koshigaya campus, Bunkyô University, Japan.

12835. Northrup, Christiane. 2006. The wisdom of menopause: Creating physical and emotional health and healing during the change. Revised ed. New York, NY: Bantam Books. xvii + 631 p. Illust. Index. 24 cm. [36 soy ref]
• ***Summary:*** This revised edition contains a very positive and accurate section on the ability of soyfoods to relieve

© Copyright Soyinfo Center 2013

menopausal symptoms. But the benefits are dose-dependent. Discusses: Soy and menopause (p. 188-93; "Each of the following servings contains approximately 35-50 mg of soy isoflavones: 1 cup soy milk, ½ cup tofu, ½ cup tempeh, ½ cup green soybeans (edamame), available fresh or frozen, 3 handfuls roasted soy nuts"). Brain foods: Omega-3 fats [fatty acids], and DHA, soy and Japan (p. 337-38). Beautiful skin and soy (p. 364-66). Bone building and soy (p. 407-08). Eating for breast health and soy; Why soy is safe for breast tissue (p. 450-53). Heart health and soy (p. 524-25). Resources–Soy (incl. Revival Soy, p. 549).

At least 36 scientific studies on soy and women's health are cited, each with a full bibliographic record in the notes, chapter by chapter.

"Is there a soy-thyroid connection?" (p. 189-90). "Here's the bottom line: there is no convincing evidence that soy intake increases the risk of hypothyroidism during perimenopause. However, women often begin increasing their intake of soy during perimenopause, a time when they often get their thyroid function checked for the first time as well. And given that fully 25 percent of perimenopausal women have a thyroid problem, many believe that soy is responsible. If you have any doubt about your thyroid function, get it tested. Make sure you test for TSH (thyroid-stimulating hormone) along with T3 and T4, the two thyroid hormones. Its a simple blood test, and it will put your mind at ease." Address: M.D. (gynecologist), Women to Women, Yarmouth, Maine.

12836. **Product Name:** Organic Pesto Sausage Patties, Curried Potato Patties, Original Breakfast Sausage (Replaces Tofu Sausage Patties, launched Aug. 1982).
Manufacturer's Name: Tofu Shop Specialty Foods Inc.
Manufacturer's Address: 65 Frank Martin Court, Arcata, CA 95521. Phone: 707-822-7401.
Date of Introduction: 2006. November.
Wt/Vol., Packaging, Price: 6.5 oz (184 gm).
How Stored: Refrigerated.
New Product–Documentation: Labels sent by Matthew Schmit. 2009. March 18. 3 by 3 inches. Self adhesive. Multi-colored on white. A stylish water-color illustration shows a tofu shop on stilts by the edge of the sea. All three products are "Certified organic. Seasoned and baked. Perishable–Keep refrigerated." (1) Pesto: "Dice into pasta or add to pizza!"(2) Curried: "Add to falafel, wrap, or toast." (3) Original: "Delicious sausage alternative."

12837. Vitasoy International Holdings Ltd. 2006. Interim report 2006. New Territories, Hong Kong. 40 p. Nov. 30 cm. [Eng; Chi]
• ***Summary:*** For the six months ended 30 Sept. 2006, group turnover (sales) was HK$1,326 million, up 5.1% over the same period last year. Gross profit was HK$779 million, up 5.0% over the same period last year. "In view of the Group's strong balance sheet, the Board of Directors has declared an interim dividend of HK$2.8 cents per share." Sales performance was very encouraging in Mainland China (53.8%) and Australia and New Zealand (12.5%); it was steady in Hong Kong (5.9%), but lacklustre in North America (0.5%).

Market performance in North America: After years of rapid growth, the U.S. soyfoods market overall has begun to shrink. For the first 6 months of fiscal 2006/07 the tofu category decreased by 2.2% and aseptic soymilk by 1.8%. Address: No. 1, Kin Wong Street, Tuen Mun, New Territories, Hong Kong. Phone: 466 0333.

12838. *SoyaScan Notes.* 2006. Soymilk, non-dairy beverages, and cow's milk prices at The Natural Grocery Co., Berkeley, California (Overview). Dec. 14. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** Since Dec. 1983, approximately every other year, Soyfoods Center has conducted a survey of the prices of soymilk and cow's milk in California. Cindy La reports the following retail prices. (Note: oz = fluid ounces; 32 fl oz = 1 quart; 33.8 fl oz = 1 liter. 2 quarts = one half gallon). All soymilk products at Berkeley Natural Grocery Co. are now organic or largely organic = Org. MOS = Made with organic soybeans. NON ORG = Non Organic.

Shelf-stable / Aseptic soymilks: Westsoy Light and Plus all flavors (MOS) $2.39/quart. Westsoy Nonfat (MOS) $1.99/quart. Westsoy original creamy (95% Org) $2.29/quart or $1.79 on special. Westsoy shakes (MOS) $2.49/quart.

Edensoy Original (95% Org) $2.79/liter. Edensoy Enriched (95% Org) $2.89/liter. Eden Blend Rice & Soy (95% Org) $2.65/liter. Edensoy Dream 3-pack (75-95% Org) $2.89/3 x 8 oz.

Vitasoy Original (75-95% Org) $2.65/quart or $2.09 on special. Vitasoy Light (75-95% Org) $2.65/quart or $2.09 on special. Vitasoy Enriched (75-95% Org) $2.65/quart or $2.09 on special. Vitasoy Holiday Drinks (95% Org) $2.99/quart or $2.19 on special.

Soy Dream Regular or Enriched (Hain) (75-95% Org) $2.65/quart. Soy Dream 3-pack (75-95% Org) $3.09/3 x 8 oz. Pacific Foods (95% Org) $2.89. Kikkoman Pearl (75-95% Org) $2.59. White Wave Silk (95% Org) $2.49. Silk 3-pack (75-95% Org) $3.39/3 x 8 oz.

Refrigerated / Fresh soymilks (in gable-top cartons): Wildwood (95% Org) $2.39/quart or $3.99/half gallon. White Wave Silk Plain (95% Org) $1.99/quart or $3.69/half gallon. White Wave Silk Vanilla (75-95% Org) $3.69/half gallon. Soy Dream Enriched (75-95% Org) $3.89/half gallon.

Rice drinks: Rice Dream (75-95% Org) $2.59/quart. Lundberg (75-95% Org) $2.69/quart. Pacific Foods (75-95% Org) $2.19/quart.

Refrigerated cow's milk. Clover Stornetta $1.29/quart. or $2.19/half gallon or $3.99/gallon. Clover Stornetta 100% Organic $1.99/quart. or $3.49/half gallon or $6.39/

© Copyright Soyinfo Center 2013

gallon. Straus 100% Organic in glass bottle $2.49/quart or $3.99/half gallon. Claravale Raw Milk non-organic $3.99/quart. Organic Valley 100% Organic $1.99/quart or $3.99/half gallon. Meyenber Goat Milk non-organic $3.49/quart. Lactaid Milk non-organic $2.19//quart.

12839. Kuzmic, Vlatka. 2006. Update on Annapurna's work in Croatia (Interview). *SoyaScan Notes.* Nov. 29. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Annapurna now has 27-29 products. They are the biggest tempeh maker in Croatia; there is one other maker, which is smaller. Seven people working at Annapurna, plus Vlatka's husband who is the owner. Six of them work in production and one person is in their shop in Nehajska 42, Zagreb, which opened in June 2006. The biggest chain of health food stores in Croatia says that they sell more of Annapurna's products than those of any other Croatian manufacturer, and that Annapurna is among the top 15 suppliers worldwide in terms of sales. All is going well. Address: Klanjec 30a, Rakitje, 10437 Bestovje, Croatia. Phone: +385 1-3639-092.

12840. *SoyaScan Notes.* 2006. Chronology of major soy-related events and trends during 2006 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** Jan. 17–Soyatech (founded and owned by Peter Golbitz) is sold to HighQuest Partners, a management consulting firm headquartered in Boston, Massachusetts.

March 15-17–CERHR expert panel meets in Virginia to discuss soy-based infant formula safety. They issue an important report.

May–The Soy Nutrition Institute is founded. Mark Messina is executive director. The founding members (each of whom paid $10,000 to join) are: ADM, Solae, Cargill, White Wave, Revival, Monsanto, SANA, and the Soyfoods Council (Linda Funk, Iowa).

June 23. Vandemoortele Group, a large oilseed crusher of Ghent and the parent company of Alpro, Belgium, acquires SoFine Foods, a subsidiary of Heuschen & Schrouff and the largest tofu manufacturer in Europe.

July 15–The National Nutritional Foods Association (NNFA) changes its name to the Natural Products Association (NPA); it hopes to attract more members from the natural foods industry which is not represented by a trade association.

Sept.–*The Soya and Oilseed Bluebook*, published by Soyatech, migrates to the Web. Some bound paper copies will still be published. For the first time in decades, copies are sent free of charge to qualified industry members.

Oct.–House Foods (which owns and operates America's largest tofu plant in Garden Grove, California), opens a huge, brand new tofu manufacturing facility in Somerset, New Jersey. This enables them to deliver fresh, high quality, low cost tofu to the East Coast, Midwest, and Southeast markets.

Dec. 11–Hain Celestial Group (Melville, New York) acquires the assets of Haldane Foods Ltd. (Newport Pagnell, Bucks., UK) and its meat-free and non-dairy beverage business from Archer Daniels Midland Co. (ADM).

This year biofuels, including soy biodiesel, get new recognition for the important part that they can play in the U.S. energy economy.

12841. Cwiertka, Katarzyna Joanna. 2006. Modern Japanese cuisine: Food, power and national identity. London: Reaktion Books. 240 p. Illust. Index. 22 cm. [525* ref. Eng]
• ***Summary:*** The author is a recognized expert on the subject of Japanese cuisine and its modern history. This book is the result of more than a decade of research. Since 1950, the popularity of Japanese food in the West has greatly increased, contributing to the continuing diversification of Western eating patterns. This book examines the origins of Japanese cuisine as we know it today, exploring the transformations and developments food culture in Japan has undergone since the late 19th century. "Among the key factors in the shift in Japanese eating habits were the dietary effects of imperialism, reforms in military catering and home cooking, wartime food management and the rise of urban gastronomy. Japan's patchwork of diverse regional cuisines became homogenized over time and was replaced by a set of foods and practices with which the majority of Japanese today ardently identify. This book demonstrates that Japanese cuisine as it is currently understood and valued, in spite of certain inevitable historical influences, is primarily a modern invention concocted in the midst of the turbulent events of the late 19th and the 20th centuries."

Miso, miso soup, tofu, tofu lees [okara] and "simmered thin-sliced deep-fried tofu" are mentioned on pages 104-05–suggestions for dishes to be served in 1915 and July 1920. Address: Researcher, Centre for Japanese and Korean Studies, Leiden Univ.

12842. Mescher, Kelly. 2006. Stuffed Soysilk animals hit market: Response is outstanding. *Iowa Soybean Review* (*Iowa Soybean Association, Urbandale, Iowa*) 18(2):28-29. Dec. Cover story.
• ***Summary:*** "Jonelle Raffino has been designing and selling yarns made of soy for years.

"But she took yarn to the next level when she started exploring plush fabric made from soy for ready-to-wear items. 'The plush fabric was one of our first and most exciting fabrics,' Raffino says.

"Little did she know that she and her team at Southwest Trading Company would soon be expanding into the toy market. 'While I was thinking about coats and blankets, my daughter Sophia immediately grabbed the fabric in her arms and purred, 'Mommy, I want a teddy bear out of this.' Leave it to a child–an idea was born.

"'It was just such an obvious suggestion,' Raffino

© Copyright Soyinfo Center 2013

continues. 'The fiber is so soft and plush. We just knew that there was a lot of magic in what she was saying. We started designing the plush toys and introduced them at the International Play Fair in February. it's an entire trade show for toys.'" The response was outstanding and also led to a lot of private label work. "The Soysilk Pals line includes Tofu Bear, Buzz Cut Tofu Bear, Soynia Bunny, Edamame Bear, and they will be offering a stuffed goat named Soyphia for the holidays."

A sidebar titled "Soysilk Panda makes an international presence" states: "Tai Shan, the panda bear living at the Smithsonian National Zoo in Washington D.C. recently turned one-year old. The Smithsonian National Zoo wanted to celebrate the momentous occasion, so they asked Southwest Trading Company to create stuffed panda bears to sell at the zoo's gift shop.

"'We just created 2,000 stuffed pandas for the National Zoo to celebrate Tai Shan,' Raffino says. 'It's the first panda born in captivity to survive that long. They threw a massive party and more than 30,000 attended. It was really exciting and we're hoping to create more pieces for them."

The cover title: "Soy teddy bears: A cuddly alternative." Several color photos show babies and little children with toys made of Soysilk.

12843. **Product Name:** Trader Joe's High Protein Organic Tofu: Super Firm (Vacuum Packed).
Manufacturer's Name: Trader Joe's (Marketer-Distributor).
Manufacturer's Address: Monrovia, CA 91016.
Date of Introduction: 2006. December.
Ingredients: Filtered water, organic soybeans, nigari (magnesium chloride, a natural firming agent). Certified organic by Quality Assurance International (QAI).
Wt/Vol., Packaging, Price: 16 oz (1 lb) vacuum packed. Retails for $1.99 (2006/12 Lafayette, California).
How Stored: Refrigerated.
Nutrition: Per 85 gm.: Calories 100, calories from fat 35, total fat 4 gm (6% daily value; saturated fat 1 gm), cholesterol 0 mg, sodium 45 mg (2%), total carbohydrate 5 gm (dietary fiber 1 gm [3%], sugars 0 gm), protein 24 gm (28%). Vitamin A 0%, calcium 6%, vitamin C 0%, iron 10%. Percent daily values are based on a 2,000 calorie diet.
New Product–Documentation: Product with Label purchased at Trader Joe's in Lafayette, California. 2006. Dec. 31. Green, black, red, and white. Front panel: "14 grams soy * protein per serving." "* Diets low in saturated fat and cholesterol that include 25 grams of soy protein a day may reduce the risk of heart disease. One serving of Trader Joe's High Protein Organic Tofu provides 14 grams of soy protein per serving." QAI logo. USDA Organic logo. Back panel: "Made in a facility that processes peanuts, wheat, milk & tree nuts."

12844. Qualitäts Initiative am Oberrhein: Lebensmittel ohne Gentechnik 2006. [Quality initiative on the upper Rhine: Foods without genetic engineering (Leaflet)]. Freiburg, Germany. 3 panels each side. Each panel: 23 x 10 cm. Undated. [Ger]
• ***Summary:*** Elisabeth Huber of Taifun writes (1 Dec. 2011): "In the German Bürgerliches Gesetzbuch (BGB [People's Book of Laws]) you find an organizational form called 'Gesellschaft des Bürgerlichen Rechts'–pretty difficult to translate. It means that the organization is obliged to follow the rules of the BGB. There was no contract only some meetings in 2006 of different companies which all had an interest in a GMO-free region [in the upper Rhine valley].

"In February 2007 we sent an 'Entwurf für ein Landesgesetz Baden-Württemberg zur Ausweisung von geschlossenen Anbaugebieten am Oberrhein für bestimmte landwirtschaftliche Kulturen zur Erzeugung von Lebens- und Futtermitteln ohne Gentechnik' via Hans-Peter Schmidt (a lawyer who engages himself in the organic business and works a lot with AlnaturA). Hans-Peter Schmidt was also a member of the meetings and represented AlnaturA.

"The organization no longer exists. AlnaturA started an intiative together with some other companies called: Vielfalt erleben (http://www.vielfalterleben. info/) which lead to a petition in 2010." Address: Freiburg, Germany. Phone: 0761 / 15210-0.

12845. **Product Name:** Woo Fu (Nondairy Frozen Dessert) [Chocolate].
Manufacturer's Name: Woo City Ice Cream Mfg. Co.
Manufacturer's Address: 7630 Freedom Ave., NW, North Canton, OH 44720.
Date of Introduction: 2006.
New Product–Documentation: Interview with David Steele, president, published in The Soy Daily. 2006. Aug. 23. And visit to www.woocity.com. Totally vegan, with no dairy or eggs. Lactose free. Basic ingredient is organic silken tofu. One flavor is chocolate.

12846. Basu, Debashis; Kulirani, B. Francis; Datta-Ray, B. 2006. Agriculture, food security, nutrition and health in North-East India. New Delhi, India: Mittal Publications. xxvi + 422 p. See p. 299-300. 23 cm.
• ***Summary:*** Chapter 28 (p. 295-307) is titled "Opportunities for processing and utilization of soybean to increase nutritional security in north-east India, by R.K.P. Singh and K.K. Satapathy. Contents: Introduction. Nutritional profile of soybean. Soybean cultivation in north-east India. Present status of soybean utilization in north-east. Technologies for the soybean utilization as food uses: Soy milk, soy paneer (tofu), full fat soy flour, soy fortified biscuits. By-product utilization of soybean: Okara, soya pulp. Conclusion.

In India, the area under soybean cultivation has increased from about 32,000 ha in 1970-71 to about 6.00

© Copyright Soyinfo Center 2013

million ha today. During this same time period, soybean production has risen from about 140,000 tonnes to approximately 6,000,000 tonnes, and soybean yield has increased from 438 kg/ha to about 1,000 kg/ha.

Madhya Pradesh is by far India's leading soybean producing state, accounting for 72-80% of total production, followed by Maharashtra, Rajasthan, and Uttar Pradesh.

In India's seven north-eastern states, although soybean area and production are very low, soybean yields are higher than the average for all of India–especially in Arunachal Pradesh, Mizoram and Sikkim. This shows that expansion of soybean production has promise in these states.

In the late 1960s and 1970s, soybean was introduced into India primarily as a source of food protein, but this goal has not been met. Today soybean is used primarily as a source of oil for domestic use and protein for export.

In the north-eastern states, however, soybean is used mainly as a pulse crop and as a source of indigenous fermented foods, such as *tungrymbai* (in Meghalaya; it is consumed mainly in the form of chutney along with rice and vegetable curry) and *kinema* (in Sikkim, eaten with boiled rice). Other soybean food products eaten in north-east India are *hawaijar* (Manipur), *bekang-um* (Mizoram), and *akhoni* [*aakhone, akhuni*] (Nagaland), etc.

These soybean foods are all prepared in approximately the same way. Rinse the soybeans then soak overnight in water. Drain, then cook in excess water in an open vessel until each soybean is soft enough to be crushed when pressed between the thumb and one finger. Wrap the warm soybeans in a lamet leaf, place in a bamboo basket, and set the basket above an earthen oven in the kitchen. Leave the soybeans to ferment for 2-3 days until the resulting product shows long, stringy threads when beans are pulled apart, has a sticky texture and the typical strong flavor. To make *tungrymbai* (for example), add green chili, garlic, sesamum / sesame, ginger and salt, then cook in mustard-seed oil for 15-20 minutes.

In May 1984 the Soybean Processing and Utilization Center was established at Central Institute of Agricultural Engineering, at Bhopal. After steady efforts for the past 17 years, the Center has developed equipment and processes for preparing homemade soymilk, soypaneer (tofu), full fat soy flour, soy fortified biscuits, soy dal, etc. (p. 300-01). A detailed discussion each of these products is then given, including its cultural background in Asia, how to make it at home, its nutritional benefits, and ways of adding it to one's daily meals (p. 301-06). A similar discussion is given for the by-products okara and soya pulp.

On page 307 are 4 interesting references.

12851. Davidson, Alan; Jaine, Tom. 2006. The Oxford companion to food. New York, NY and Oxford, England: Oxford University Press. xxviii + 907 p. Illust. by Soun Vannithone. Index. 29 cm. [1500+* ref]
• ***Summary:*** The first edition of this remarkable book (1999)

© Copyright Soyinfo Center 2013

is already a "classic." "Alan Davidson famously wrote eighty percent of the first edition, which was praised for its wit as well as its wisdom. Tom Jaine, editor of the second edition, worked closely with Jane Davidson and Helen Saberi to ensure that new contributions continue in the same style... The text has been updated where necessary" and there are many new entries. The front matter, which is 10 pages longer, begins with "Alan Davidson: A tribute" (p. vii; he died in 2003) followed by a "Preface to the Second edition" by Tom Jaine. Entries in the 1st edition are generally on a different page in this edition. Tofu, for example, formerly on pages 798-99, is now on pages 801-02; however the information is the same. The marvelous illustrations in both editions are by the same artist. The last page of this edition is page 907 compared with page 902 in the 1st edition. Address: World's End, Chelsea, London, England.

12852. Fromartz, Samuel. 2006. Organic, Inc.: Natural foods and how they grew. New York, NY: Harcourt, Inc. xx + 294 p. No illust. No index. 24 cm. [270 ref]
• ***Summary:*** Contents: Introduction (the case of Arthur Harvey, a small organic blueberry farmer from Maine). 1. Humus worshippers: The origins of organic food. 2. The organic method: Strawberries in two versions. 3. A Local initiative: From farm to market. 4. A spring mix: Growing organic salad. 5. Mythic manufacturing: Health, spirituality, and breakfast (very interesting, largely about Steve Demos, White Wave Silk soymilk and Dean Foods / Suiza, plus Sylvester Graham, Dr. James Caleb Jackson, Dr. John Harvey Kellogg and his brother Will K. Kellogg, Jeremiah Ridenour, Ted Nordquist, *The Book of Tofu* by Shurtleff and Aoyagi, *Diet for a Small Planet* by Frances Moore Lappe). 6. Backlash: The meaning of organic. 7. Consuming organic: Why we buy. Acknowledgments. Notes.

A history (sort of) of the organic food industry in the United States, and how the movement has gone from fringe, to commercial, to mainstream. This is a niche or underdog food culture involving many issues of morality– the relationship of humans to agriculture and nature, and specifically how a principled person or business can thrive in the modern world without compromising ideals.

The author, a business writer, says in the introduction: "I was particularly interested in the people who sought to manifest their values in business... The intersection of idealism and business was not an easy place to stand, since one usually trumped the other."

"Sales of organic food had shot up about 20% per year since 1990, reaching $11 billion by 2003." This industry, which has its roots in utopian ideologies, will surely have an interesting future.

A great deal of the book is devoted to the recent history, and the early history of the organic food industry in the United States is (unfortunately) extremely weak. The book is hurt first by the lack of an index, second by the lack of endnote reference numbers in the text (the 254 endnotes themselves are excellent), and third by the lack of complete references to key books cited in the endnotes (he gives the author and title, but no year of publication or publisher; so one who wishes to cite these books must take the time to look up the missing information). Address: Business writer, Washington, DC.

12853. Golbitz, Peter; Jordan, Joe. 2006. Soyfoods: Market and products. In: Mian A. Riaz, ed. 2006. Soy Applications in Food. Boca Raton, Florida, London, New York: CRC Press (Taylor & Francis Group). [x] + 288 p. See p. 1-21.
• ***Summary:*** Contents: History of soyfoods: Growth and development in the Western world, soybean industry blossoms in the United States, soybeans grow around the world. Soybean production and utilization for food: Soyfoods in Asia, soyfoods in Europe, soyfoods in Africa, soyfoods in the United States: Development of the U.S. soyfoods industry, Americanization of soyfoods. Soybean nutritional components: Soy protein, soy oil, carbohydrates and fiber, vitamins and minerals, isoflavones. Soyfoods and protein ingredients: Whole dry soybeans, tofu, soymilk, tempeh, soymilk yogurt, miso, soy sauce, okara, natto, soynuts, meat alternatives, cheese alternatives, nondairy frozen desserts, green vegetable soybeans (edamame), soy sprouts, full-fat soy flour, defatted soy flour, textured soy flour, soy protein concentrate, soy protein isolate. Conclusions.

Tables: (1) World soybean production by major producers. (2) Annual per capita consumption (2001) of soybeans for direct food. (3) U.S. soyfoods market (1996 to 2005).

This chapter suffers from a lack of references, and contains several basic errors concerning the early history of the soybean. Contrary to what Mr. Golbitz says: (1) The Chinese have not considered the soybean a basic source of nutrition for almost 5000 years (see Hymowitz 1970, "On the domestication of the soybean"). For "a little more than 3000 years" would be much more accurate. (2) The first reference to soybeans in Chinese literature does not date back to 2853 B.C. (see Hymowitz 1970, and Hymowitz and Shurtleff 2005, "Debunking soybean myths and legends in the historical and popular literature"). It dates back to about 1100 B.C. (3) Natto was not developed at least 3000 years ago in Japan (the earliest known document that mentions natto dates from 1450 CE–or about 560 years ago). Address: Soyatech, Inc., Bar Harbor, Maine.

• ***Summary:*** Natto: In 2004 in Japan, total production of natto was about 250,000 metric tons (tonnes), requiring the use of 139,000 tonnes of soybeans. The retail value of this natto was 111.4 billion yen. Address: Japan.

12857. Nguyen, Andrea Quynhgiao. 2006. Into the Vietnamese kitchen: Treasured foodways, modern flavors. Berkeley, California: Ten Speed Press. vii + 344 p. Foreword by Bruce Cost. Illust. (color photos by Leigh Beisch). Index. 25 x 24 cm. [58 ref]

• ***Summary:*** This is a very attractive book, well written and very engaging. Soy related recipes include: Baguette sandwich (with seared or grilled firm tofu, p. 34-35). Mock turtle stew of pork, plantain, and fried tofu (p. 153-55). Panfried stuffed tofu with fresh tomato sauce (Dau hu nhoi thit xot ca, p. 188-90). Deep-fried tofu simmered with scallion (Dau hu chien tam hanh la, p. 191).

In the "Guide to ingredients" chapter are substantial entries for: Hoisin sauce (tuong hoi xin, made from soybeans, p. 329). Soy sauce (nuoc tuong, xi dau, p. 333. "Soy sauces are not all the same. There are many kinds and they all taste different." The author prefers Pearl River Bridge, dark, golden label).

From the publisher's description: "When author Andrea Nguyen's family was airlifted out of Saigon in 1975, one of the few belongings that her mother hurriedly packed for the journey was her small orange notebook of recipes." The family fled together by air in April 1975. Andrea was only six years old. Seven days later Saigon fell to the communist North Vietnamese / Viet Cong. Her father had many connections: he was a former military governor in the administration of President Ngo Dinh Diem (1901-1963; his family name is Ngo), the first president of South Vietnam. They arrived in Camp Pendleton (the Marine Corps base) in southern California and were soon living in San Clemente. Of the 58 recipes, 39 are in English and 19 in Vietnamese. Address: Food writer, Santa Cruz, California.

• ***Summary:*** A vegan cookbook. Gary has eaten a vegan diet for more than 30 years. He owns a juice bar named Gary Null's Uptown Whole Foods in New York City. He advocates eating soybeans and soy products; because of their "extensive and well researched health benefits" and because they come in such a wide variety of forms, from "tofu and tempeh, to nondairy products like milks, cottage cheese, cheese, yogurt and ice creams. No other legume can be used in so many delicious ways" (p. 10, 24-25). One of his 15 "power foods" is soy (p. 13). He likes juicing and raw foods; in the chapter on beverages he sometimes adds 1-2 tablespoons soy protein powder, or a cup or so of soymilk or rice milk, or soy yogurt. For dips, he likes silken tofu. The chapter on "Entrees" (p. 240-88) includes 13 recipes that call for tofu, and 8 that call for tempeh. Edamame, whole soybeans, tamari, and soy cheese are included. His daughter, Shelly Null, is a gourmet chef. The book has no index. Address: Author of more than 70 books, New York City.

12859. Oseland, James. 2006. Cradle of flavor: home cooking from the spice islands of Indonesia, Malaysia, and Singapore. New York and London: W.W. Norton & Co. 384 p. + 16 unnumbered pages of plates. Illust. (some color). Maps. Index. 26 x 21 cm. [41 ref]

• ***Summary:*** Lavishly praised. "James Beard Foundation Book Award Winner: Asian Cooking."

In Chapter 3, "At the market, ingredients" (which has many fine color photos) is a long, interesting entry for "Indonesian sweet soy sauce (*kecap manis,* p. 72). "Sweet soy sauce is hugely popular in the cooking of Indonesia and, to a lesser extent, Malaysia and Singapore. (The word *kecap,* by the way, is derived from the Cantonese *koe-chiap,* or 'sauce,' from which we get the word *ketchup.* It was probably handed over by traders from southern China who long ago traveled extensively to the Indonesian islands.)" Its main use is as a table condiment or dipping sauce, although cooks also use it in marinades and to flavor stews. When Indonesian sweet soy sauce is mixed with sliced red chiles and lime juice, it becomes the widely used *sos kecap rawit.*

© Copyright Soyinfo Center 2013

In the U.S., the two most widely available brands, both imported from Indonesia, are Cap Bango (which the author prefers) and ABC.

There are also entries for "Soy sauce (*kecap,* p. 87. Of the two types, the first is called simply soy sauce, whereas the second "is double-black soy sauce, which has been aged longer and mixed with a small quantity of molasses." It has a more robust flavor than regular soy sauce). Sweet soybean paste (*tauco* or *taucheo,* p. 88-89, a Hokkien word. A "thick, golden brown, misolike condiment made of fermented soybeans, rice flour, sugar, and salt). Tempeh (p. 90-91, "one of Indonesia's great gifts to the culinary world"). Tofu (*tahu,* p. 91-92).

Chapter 13 (p. 318-35), titled: "Tempeh, tofu, eggs," has a long and very interesting introduction about the author's visit to Rahmat, a traditional tempeh maker and his shop in Yogyakarta, Java; he wanted to learn how tempeh is made. Recipes: Garlic-marinated tempeh (*Tempe goreng, Indonesia*). Tempeh sambal with lemon basil (*Sambal tempe, Bali, Indonesia*). Caramelized tempeh with chiles (*Tempe kering, Central Java, Indonesia*). Tofu and summer vegetables in coconut milk (*Sayur lodeh, Malaysia*). Twice cooked tofu with coriander (*Tahu goreng bacem, Central Java, Indonesia*).

Tempeh, tofu, soy sauce, and sweet soy sauce are also discussed in many places throughout the book. Address: Executive editor of *Saveur,* New York City.

12861. Planck, Nina. 2006. Real food: What to eat and why. New York and London: Bloomsbury Publishing. [viii] + 343 p. Index. 22 cm. [30+ ref]

• ***Summary:*** This book is carefully researched and very well, thoughtfully and fairly written; the author has written for *Time* magazine and comes with very good credentials for this book. Born in 1971 in Buffalo, New York. "She was a speechwriter to the U.S. ambassador to Britain when she opened the first farmers' market in London on June 6, 1999. Six months later she quit her job to open ten more markets, write *The Farmers' Market Cookbook,* and host a British television series on local food. In 2003 Nina created the Mount Pleasant Local Food Market in Washington, D.C. In New York City she ran Greenmarket, the largest network of farmers' markets in the United States. Nina's new company, Real Food, runs markets for farmers and purveyors of regional and traditional foods" ("About the author," p. 344).

The author advocates the following: (1) Eat real, traditional foods rather than more modern "industrial foods." These real foods include plenty of meat, fish, poultry, eggs, and dairy products made from whole raw (unpasteurized) milk from cows grazed outdoors on grass (rather than corn and soybeans, which cows were not designed to eat by nature) without synthetic hormones–plus real, organically grown fruits, vegetables, whole grains and legumes (including traditional soy foods), real salt, and dark chocolate.

(2) Eat real fats–including butter, beef fat, coconut oil, lard, and extra-virgin olive oil, including saturated fats and cholesterol. Avoid industrial fats–such as margarine, polyunsaturated vegetable oils (including soybean, corn, and sunflower oil), and shortening. (3) Go beyond and disregard the cholesterol myth; the evidence supporting it is weak. (4) Stop eating a vegetarian diet, and especially a vegan diet (which no traditional society has ever practiced).

To start with the section on soy foods: In the Chapter 8, titled "Other real foods," the section on soy foods is titled "Traditional and industrial soy are different" (p. 225-34). Traditional soy foods are those that have a long history in the diet, and are still made in pretty much the way they used to be. Her information on the early history of the soybean and soy foods (p. 225-26) contains many errors, as well as some interesting observations. Some of the earliest soyfoods were fermented (starting with fermented black soybeans and jiang in China). She lists five health benefits of fermentation. Fermentation (along with cooking) helps to reduce the phytic acid in soybeans. Soy foods do not contain reliable vitamin B-12. The author states several times that soy protein is not complete protein. Most nutritionists for the past 50 years have correctly avoided this "is" vs. "is not" labeling and instead have listed all foods along a continuum from high quality to low quality. By the latest measures of protein quality, soy protein (by itself, without supplementation by cereal grains) has about the same quality as beef, but lower than that of eggs or milk. While noting that about 85% of all soybeans are genetically engineered, she fails to mention that most traditional soyfoods in the USA are made from organic, non-GE soybeans. She discusses the important part that soy plays in the Okinawan diet, where the people have the highest longevity in the world. Yet soy "should be viewed as part of a diverse diet, not as a nutritional silver bullet." We heartily agree. She lists the many traditional soyfoods (p. 231-32), made in basically the traditional way, including: Bean sauce (jiang), miso, natto, soy milk (non-industrial), soy sauce. sufu (fermented tofu, incl. Filipino tahuri), tofuyo (fermented tofu from Okinawa), tamari (liquid left after miso is made), tempeh, tofu, and edamame. She recommends that we avoid modern soy protein products made from defatted soybean meal (typically extracted with hexane solvent), including soy protein isolate, "industrial soy milk," soy based infant formula, and soy sauce which uses defatted soybean meal instead of whole soybeans. But what would

© Copyright Soyinfo Center 2013

she do with all the oil left over after using whole soybeans?

Concerning a diet rich in fish, meat, and poultry. She partly ignores the ethical issues involved in killing billions of those animals each year and the environmental issues involved in raising them. These are both huge issues. Several complex issues that she addresses head-on and in a fair, interesting way: (1) Is milk good for humans (p. 39-86).

One of the basic hopes / agendas behind this book is that people will start to leave cities, buy a piece of land (as the author's own family did when she was age 2), grow their own food and raise their own animals for milk, meat, and eggs. There is a steadily growing number of books advocating this traditional way of life.

The Glossary (p. 306-15) contains many good definitions that most people will be able to understand. The bibliography (p. 316-21) is substantial, and there are also endnotes (p. 290-303) but the book would be better if more of its controversial or historical statements cited authoritative sources. Address: USA.

12867. Chalmers, Elizabeth. 2007. Business history of the Chalmers family: Making soyfoods in New Zealand (Interview). *SoyaScan Notes.* Jan. 16. Conducted by William Shurtleff of Soyinfo Center.
• ***Summary:*** On Easter 1980 Rick & Elizabeth Chalmers, together with Rick's brother Greg (his formal name is "Stephen"), opened Harvest Wholefoods, 403 Richmond Road, Grey Lynn, Auckland. They borrowed the money from Elizabeth's mother, and were all equal owners. It was New Zealand's first wholefoods / natural foods store as well as the country's first macrobiotic foods retail store. They were idealists and purists, refusing to sell any vitamins, or minerals, or dairy products.

They started the store partly as a result of becoming interested in macrobiotics, and partly because Elizabeth and Rick had a 3 year old son (Daniel) who could not tolerate dairy products. As the Chalmers could not get the food they wanted anywhere, they thought that they would open a shop to also provide it to others. Moreover, Greg, who had been overseas in London (where he had worked in a restaurant) and the USA, was a pioneer in bringing macrobiotics to New Zealand. "He brought home miso and some seaweeds–foods we had never seen before."

After about six months, in Oct. 1980, in order to attract customers to the shop, they started to make nigari tofu (for their own store only) in a small room at the back of the store, designated just for that purpose. They made the simple equipment themselves, and they learned the process from *The Book of Tofu,* by Shurtleff and Aoyagi.

After another six months they were inundated with other store owners, and cafe & restaurant owners from all over New Zealand wanting to buy their tofu. "It was just amazing." The tofu was completely unpackaged and they sold it under water in bulk buckets only. So in about April 1981 they started to sell their tofu outside of Harvest Whole Foods. "Sometimes they would pick it up, and sometimes we would deliver it."

Sanitarium Health Food Co. was making many kinds of breakfast cereals and canned nut meats, but no soyfoods. Several Chinese restaurants were making tofu (they called it "bean curd"), but only for use in their own restaurants; they did not sell it elsewhere. One of these was named Sun Sun, located in Khyber Pass, Auckland.

Their daughter, Jesse, was born on 1st October 1981, and by this time it was becoming difficult to manage both the shop and making tofu. So they sold the shop and with the capital gained they brought in special tofu making equipment from Japan, moved to new premises at 1 Wallingford St., Auckland, and started Harvest Soyfoods. Harvest Whole Foods is still at its same original location today; it is going strong and doing well financially.

Harvest Soyfoods' first product was nigari tofu; to this they soon added Tofu Spreads (Feb. 1981) then Tempeh (April 1981). The business grew very rapidly, and during this period Greg also had a child, so they all had very young children and were trying to manage their lives as well as an extremely rapidly increasing business.

Greg's partner decided that she wanted to leave Auckland, and as they could not picture another partner in his place and were feeling very overloaded anyway they decided in 1983 to sell the business to Paul and Trevor Johnston, who renamed it Bean Supreme. The Johnstons paid half the money at the time of sale and the remainder a year later; Elizabeth and Rick Chalmers worked for the Johnstons during that year. This business is also still in existence, although it was bought out by Sanitarium Health Food Co. in about Aug. 1986. Note: Trevor is no longer with the company; Paul sold the company to Sanitarium Health Foods.

From 1983 to 1986 Rick and Elizabeth had a commercial cleaning business, which suited the family structure very well, but was very unsatisfying workwise and environmentally.

In about 1980 or 1981 Austin Holden had started a largely macrobiotic import and wholesale business, Kiaora Naturals, at 374 West Coast Road, Glen Eden, in west Auckland. Holden soon started a very small shop in the corner of his warehouse and called it East West Wholefoods. For the first few years, his only customer was Harvest Wholefoods. "We kept him going."

Then in 1986 Rick and Elizabeth started East West Organics, taking over the building (and business) formerly occupied by Austin Holden and Kiaora Naturals. They knocked out all the walls, resulting in a much larger shop that specialised in organic food, with a big emphasis on fruit and vegetables.

They had no intention of making soyfoods. However there was suddenly an influx of Asian immigrants to New Zealand and Asian Tofu (usually made with calcium sulfate in aluminum pots) became widely available. By this time organics was really growing in New Zealand. Elizabeth and

© Copyright Soyinfo Center 2013

Rick wanted to stock organic tofu in their store, but they couldn't find a source. They talked with Trevor and Paul Johnston about making it for them, but the brothers felt there was no future in it, so they declined to do it.

So in 1996 Elizabeth and Rick started The Organic Soy Company, again in a small food factory out the back of East West Organics. They started making nigari tofu again–for their own store only. For the first time, they started to use organic soybeans, and as many other organic ingredients as they needed and could get. "We were right back where we started. And then exactly the same thing happened again. Once the word got out that organic nigari tofu was available again, people started coming from everywhere to buy it. It was not our intention to get back into the soyfoods business; we'd already sold our company. But we wanted the quality, so we had to make it ourselves." East West Organics is still operating today, although out of new premises (outgrew old one), and has just moved up the road slightly.

Their son Daniel joined them in January 1998, and in October of 1998, they sold East West Organics and moved the Organic Soy Company to their current premises at Unit A, 2 Corban Avenue, Henderson, Auckland.

Elizabeth and Rick separated the same year, but continued on in the family business together. In 2001 their daughter Jesse returned from Europe and also joined us in the business. Later that same year Rick left the business to go to University and currently, Elizabeth, Daniel and Jesse are in joint ownership, with Rick still having a 10% share. They started using the brand names (the first being Tonzu) in 2002.

The business is growing slowly, currently producing tofu, tempeh, soy yoghurt, tofu burgers and teriyaki sauce, all 100% organic. Elizabeth has moved to part time as the younger generation are taking on the responsibility for the business. They currently have 3 full time employees as well as themselves, so are still reasonably small.

"We see a great future for the business and will probably outgrow our current premises within the next few years. We love making traditional soy products, and eventually hope to make miso and tamari, which will be export products as well as for the domestic market."

First sold commercially by the organic soy company: Tofu (1996), Teriyaki Tofu (1999), Tempeh (1999), Tofu Burgers (2001), Teriyaki sauce (2003).

All current labels and packaging are new, and have changed very much from the original. They once made two tofu spreads, one teriyaki and the other curry flavour. However it was hard to get a good enough shelf life out of them to make them viable, so reluctantly they discontinued them. They have also changed their burgers significantly. When they first produced a burger in 2001, they had 3 varieties: Garlic and Cheese, Sundried Tomato, and Feta, and Vegan. They have discontinued them all and now just make one that is actually Vegan, although they do not call it that. The burgers did not sell well; they are not certain why that was, maybe they were too expensive with all the organic ingredients and very labour intensive. So they have simplified and streamlined our current burger making the whole process more viable.

As the population of the whole of New Zealand is around 4 million and only 15% of them are vegetarian, they are playing to quite a small market, this can sometimes be quite a challenge. In the long term it will be sensible to develop products that they can export. Address: Founder and owner, The Organic Soy Company, Ltd., Unit A, 2 Corban Ave., Henderson, Waitakere, Auckland 0612, New Zealand. Phone: +64 9 835 3617.

12868. Tibbott, Seth. comp. 2007. Tofurky brand products overview: Natural foods segment. Hood River, Oregon: Turtle Island Foods, Inc. [36] p. 28 cm. [1 ref]

• ***Summary:*** A full-color booklet bound with a handsome, black ProClick plastic spine. On the front cover: "1980-2006: 26th anniversary Turtle Island Foods, Inc." "Sales data from: SPINscan Natural and SPINscan Conventional. 52 weeks ending December 30, 2006. All statistics are for the total U.S. market.

Contents (unnumbered pages): (1) "Turtle Island Foods honored by Inc. magazine: 2,240th fastest growing small business in the USA (of 6 million total). 159.7% growth rate over last 4 years. 57th fastest growing food and beverage company in the USA. 19th fastest growing food processor.

(2) About Tofurky products: 100% vegan. Based on organic soy products. Use non hexane extracted proteins. VejNews. Winner veggie awards–Best meat substitute.

(3) Natural foods market without Whole Foods (which no longer shares sales info with the industry). Growth of top ten brands ranked by dollar volume. Frozen and refrigerated meat alternatives. 52 weeks ended Feb. 24, 2007. Category: $35.5 million. Growth: 4.7%. Turtle Island is the fastest-growing brand: 16.1%, followed by Quorn, Nates, Amys Kitchen, Morningstar Farms, Gardenburger, and Yves. Lightlife, Boca Foods, and White Wave all have negative growth.

(4) Natural foods market. Frozen and refrigerated meat alternatives. Top ten of 478 items by dollar volume. 52 weeks ending Dec. 30, 2006. #1. Quorn Chicken Style Nuggets. 10.6 oz. $1,507,537. 5.6%. #2. Turtle Island Tofurky Italian Sausage (organic) 14 oz. $1,262,616. 25.7%. #3. Quorn Chicken Style Patties. #4. Lightlife Gimme Lean Sausage. #5. Quorn Veg. Naked Chicken Cutlet. #6. Turtle Island Tofurky Deli Slices, Hickory Smoked. 5.5 oz. $1,131,760. 19.2%. #7. Lightlife Smart Dogs. #8. Boca Original Patties Chicken Natural (4-pack). #9. Amys Burger California Veggie. #10. Quorn Meat Free Chicken Tenders.

(5) Natural foods market. Refrigerated meat alternatives, Top 10 of 260 items by dollar volume. 52 weeks ending Dec. 30, 2006. Turtle Island currently as the #1, #3, #9 and #10 best selling items among the 260. They are: Tofurky Italian

Sausage. Tofurky Deli Slices Hickory Smoked. Tofurky Deli Slices Oven Roasted. Tofurky Kielbasa (sausages).

(6) Tofurky deli slices: Six features, incl. "Organic tofu based." The six types of deli slices are: Oven roasted, Hickory smoked, Peppered, Italian deli, Cranberry & Stuffing, "Philly-style" steak.

(7) Tofurky deli slices. Bar charts of refrigerated meatless deli sales, 2001-2006. For each year are given: Competitor #1. Competitor #2. Turtle Island. Overall category. "While the competition sales have been flat, Turtle Island has grown the subcategory 72 and has become the #1 brand.

(8) Deli slice standings. (9) Tofurky gourmet sausages. (10) Frozen and refrigerated meat alternatives. (11) Tofurky Jurky: 5 features.

(12) Top 10 jerky items (meat and meatless)–SPINscan natural channel. 52 weeks ending Feb. 24, 2007. The category is $8.3 million. There are three vegetarian jerkys among the top 10. Tofurky Jurky Original is the #2 seller and Tofurky Jurky Peppered is #7. The other vegetarian brand (#6 seller) is Primal Strips Seitan Teriyaki.

(13) Tofurky "foot long" veggie dogs: 5 features, incl. organic tofu based. (14) "Open mouth, insert foot."

(15-17) Turtle Island tempeh: Five features.

(18-22) Happy Tofurky Day: Five features.

(23-35) Glossy color sell sheets, printed on both sides, with the following titles: (23-24) Happy Tofurky Day! (25-26) Brave New Tempeh. (27-28) Tofurky Jurkey. (29-30) Frankly speaking Tofurky Franks & Links are the best! (31-32) There's 3 big new dogs in the house. (33-34) Go beyond the bun: Introducing Tofurky 'foot long' veggie dogs. (35-36) Tofurky deli slices: New look. Other Turtle Island glossy color sell sheets. Address: Founder and President, Turtle Island Foods, P.O. Box 176, Hood River, Oregon 97031.

12869. Pulmuone USA Inc. 2007. Soga foods (Website printout–part). www.sogafoods.com Printed Jan. 26.
• ***Summary:*** Contents (across the top): Home: The new tofu family. What's new. Tofu tips. Coupons. Site map. Contact us. (Left nav bar): Our products. Recipe collection. Meet chef Joseph. Soga wellness. Club So Good!! Where to buy. About us (Our history). Press pass.

"Founded in 1991 [sic], Soga Foods, a division of Pulmuone U.S.A. Inc, was established to manufacture superior tofu products for the Asian American market along with developing products for the mainstream American market.

Soga Foods has been built upon the philosophy of Won Kyung Sun, who founded Pulmuone 48 years ago as a quasi-Christian cooperative farm. His ideas held two key principles we still use today: "love thy neighbor" and have "respect for all living beings."

Note: As of 16 Feb. 2013 this URL and website no longer exist. The URL www.pmo.com (which used to lead to Pulmuone Wildwood, Inc.) now takes you to www.wildwoodfoods.com–which has no history of wildwood natural foods. Address: 4567 Firestone Blvd., South Gate, California.

12870. [Soymilk and tofu: A healthy delight (Leaflet)]. 2007. New Delhi, India: American Soybean Association (ASA) / United Soybean Board. 2 p. Front and back. 28 cm.
• ***Summary:*** Contents: Introduction. Soymilk. Tofu (soy paneer). Health benefits of using soymilk and tofu. Lactose intolerance. Heart disease. Osteoporosis and menopause. Cancer. Now soymilk and tofu is available in your city. Try this wonderful food and feel the difference.

This leaflet is printed in black ink on glassy green paper. Two color photos show soymilk and tofu. Ten thousand copies were printed in Jan. 2007. Address: American Soybean Assoc. (ASA-International Marketing), Asia Subcontinent, 149 Jor Bagh, New Delhi–110 003, India. Phone: (91) (11) 2465-1611.

12871. Johnston, Paul. 2007. Re: Bean Supreme–Sale to Sanitarium Foods. Letter (e-mail) to William Shurtleff at Soyinfo Center, Feb. 7. 1 p.
• ***Summary:*** In 1999 Paul sold his very successful soy ice cream, brand-named "LiteLicks" to "Movenpick" in New Zealand.

In Feb. 2006, Paul sold Bean Supreme to "Lisa's Healthy Foods Ltd." (which is owned by the Seventh-day Adventist Church of New Zealand, as is Sanitarium Foods). He remains on a 3-year management contract. The sale has enabled Bean Supreme to pursue a broad new product development plan and to commission a new mid-sized tofu plant from Takai in Japan. "Our intention is to double the sales of vegetarian chilled products in New Zealand and from our year together we are well above target, so some export to Australia will follow in late 2007." Address: New Zealand.

12872. Wiegand, Peter. 2007. Helping to start a new tofu shop in Glasgow, Scotland (Interview). *SoyaScan Notes.* Feb. 12. Conducted by William Shurtleff of Soyinfo Center.
• ***Summary:*** Peter has just returned from a one-week visit (his second) to Glasgow, Scotland, where Craig Tannoch (about age 45-50) owns and runs two very attractive vegetarian restaurants. One has a platform for musicians and live music, one has a CD shop, and both serve very good food. Craig has decided on the location for a third veggie restaurant which he will open this year in the middle of Glasgow, in connection with a very nice performing stage and concert place, and a bar; directly across the small lane he has rented space (formerly a barber shop) for a small, traditional tofu shop, like the Wildwood shop were Peter first made tofu in California. In the front of the tofu shop will be a large window, so everyone can look inside and see the tofu being made. All the tofu served at the veggie restaurant

© Copyright Soyinfo Center 2013

across the street will be as fresh as can be. This will be the first tofu shop in Glasgow and probably the first traditional tofu shop of the Wildwood type in Scotland.

Craig is connected to a lot of artists, who will now start to learn about tofu. Peter is now working on a floor-plan for the shop, including water and drainage, and preparing to order equipment. The next time Peter flies there he plans to stay for 4 weeks, to help the tofu shop get up and running, and to help train the tofu maker, Tom Worthington, who is now working as a theater hand. Michael Pierce, Peter's friend from Wildwood days who now lives in Georgia, said he would to go to Scotland to help establish the new tofu shop. Peter learned how to make tofu from Michael, and Michael was present in Germany when Peter started his own tofu shop (Auenland) there.

Each time Peter goes to Glasgow he also performs as a musician (he is the singer / vocalist) and thus is able to pay his way. He has two bands; one with two other musicians, and the other with six others. Address: Germany.

12873. Yamamura, Koichi. 2007. Soy brothers: John Paino and Bob Bergwall, and the history of Nasoya. Brookline, Massachusetts. 8 p. Unpublished typescript. 28 cm.
• ***Summary:*** A good history written as part of the requirement for an MS degree at Boston University in public relations. The author visited and interviewed both Paino and Bergwall. Today John and Bob still live on the same street in Concord, Massachusetts. Address: 50 Longwood Ave. #1018, Brookline, Massachusetts 02446. Phone: 617-734-2490.

12874. Shurtleff, William. 2007. Re: Fermented tofu: Etymology of related terms. Letter to Oxford University Press, Oxford English Dictionary, Great Clarendon St., Oxford OX2 6DP, United Kingdom, March 8. 2 p. Typed, without signature.
• ***Summary:*** Of all the words and terms for foods or seasonings made from soybeans, this one has taken the longest to become standardized. Forty different names appear in 400+ English-language records in our SoyaScan database from 1902 to the present. Some of these are foreign words, such as tahuri, tahuli, or tajure, from the Philippines. The standard term is now "fermented tofu," however several other terms still appear in the literature. Column 1 shows the number of records in the SoyaScan database that mention this word or term:

122–Fermented tofu. 89–Sufu. 32–Bean cheese. 24–Soybean cheese. 20–Chinese Cheese. 19–Pickled bean curd. 14–Soy cheese. 14–Fermented soybean curd.

The large number of names can be accounted for by four main factors: (1) Fermented tofu is made in many different countries in East- and Southeast Asia, and in each country it has a different name. (2) In China, where this food originated, many different varieties are made in different parts of the country, leading to a surprising proliferation of names and ways of Romanizing those names. (3) Fermented tofu is used more as a seasoning than a food. In Asia, it is typically used as a seasoning placed atop a bowl of rice. Thus, it is not as conspicuous as a typical food, such as tofu. (4) Fermented Tofu has never been widely used as a food (or widely available) in English-speaking countries, so the demand for a standard name (like yogurt) has been weak. Yet most Americans who try this food, like it very much, and some say the various wine-fermented varieties are among the most delicious seasonings they have ever tasted.

Etymology: Fermented tofu first appeared in June 1946, just as the word "tofu" was starting to replace "bean curd" in English.

Definition: There are two basic types of fermented tofu: Molded and unmolded–brined. The former is by far the most popular worldwide. The molded varieties are made using an unusual two-part fermentation, as follows: (1) Firm tofu is drained, dried, diced, inoculated with spores of an Actinomucor or Mucor mold. The cubes are incubated until each cube is covered with a fragrant white mycelium of mold. These molded cubes are called pehtzes. This mold is the source of enzymes for the next part. (2) The pehtzes are placed in glass jars and covered with a brining solution consisting of water plus about 12% table salt (NaCl) and about 10% ethanol (typically from rice wine). Various seasonings are often also mixed into in the brining solution, or covered with sake lees. The jars are sealed and the fermented tofu will be ready to eat in 2-6 weeks. I have chosen only the 12 most widely used English-language terms, but am also including a short list of the other 40. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

12875. Huang, H.T. (Hsing-Tsung). 2007. Re: First and second drawing of soy sauce in China. Name and use of the residue or dregs. Letter (e-mail) to William Shurtleff at Soyinfo Center, March 10. 1 p.
• ***Summary:*** The first batch of soy sauce drawn from the large earthenware jars (where it collected in a finely-woven deep cylindrical bamboo tube or basket and was ladled out) is known as *xianchou* ("early draw"); the first batch drawn from the old mash, after addition of salt water and further incubation, is known as *laochou* ("old draw").

Dr. Huang does not know the Chinese word for the residue or dregs left over after making soy sauce. In China, the latter may be used to marinate tofu and other foods, or may be fed to pigs (or other animals). Address: PhD, Alexandria, Virginia.

12876. McLaughlin, Lisa. 2007. Apparel takes root. *Time.* March 12.
• ***Summary:*** Scientists at the University of Nebraska–Lincoln are creating new ways of using farm leftovers to make textiles. "Beanie Babies Soy textiles are made from

© Copyright Soyinfo Center 2013

the dregs left over from producing soybean oil and tofu"–soybean meal and okara. From those humble origins are made high-end silky tops, dresses and especially soft baby blankets and clothes.

12877. Conklin, Dave. 2007. History of Japanese food in Portland, Oregon until 1941 (Interview). *SoyaScan Notes.* March 23. Conducted by William Shurtleff of Soyinfo Center.

• ***Summary:*** Dave is writing his master's thesis at Portland State University on the social history of Japanese food in Oregon; it looks at the Japanese culture through the lens of food. He has been reading Japanese-language newspapers in Portland and he found an ad that mentioned Ota Tofu (at 86½ N. 5th Street, Portland) on 1 Jan. 1915 in the *Oshû Nippô* (*The Oregon News*). It mentions "Ota Kyodai" (Ota brothers), as if they owned the shop at that time. The newspaper started about 1908 and was published in Portland 6 days a week, usually 6 pages per issue, and he found the 1915 issues on a roll of microfilm from the University of Washington. This special New Year's Day issue was about 30 pages long. He has most issues of the *Oshu Nippo* printed between 1917 and 1928. Using a grant, they were recently put on a CD for the Oregon Nikkei Legacy Center in Portland (NW 2nd St.); they are not digitized. The center is open most weekdays. Becky Patchett is the archivist.

After the Japanese invaded Manchuria and China in the 1930s, there was a great deal of conflict between Japanese and Chinese in Portland. The children would have to walk to school on opposite sides of the street. They weren't allowed to play with each other. However certain Chinese grocers would still sell particular foods, such as bean sprouts, to Japanese customers. The Japanese wouldn't eat at the Chinese restaurants–maybe because they wouldn't be served. So Japanese restaurants started serving Chinese food. In the 1920s *Shina udon* ("China noodles," which we now call "ramen noodles") was common in all the Japanese restaurants–as shown by ads. But by the late 1930s this food was no longer mentioned in ads by Japanese restaurants.

Dave is also interested in how American anti-Japanese racism played out through food. In 1924 Congress passed the National Origins Act (also known as the Immigration Act of 1924, the Asian Exclusion Act, or the Johnson-Reed Act). A sweeping law to keep out "undesirables," it limited the number of immigrants who could be admitted from any country in any given year to 2% of the number of people from that country living in the United States in 1890, according to the 1890 U.S. census. Essentially, it put an end to all immigration from Asia. Moreover, all Asians were forbidden from being naturalized as citizens, and it had the effect of preventing Japanese Americans from legally owning land. From 1924 on anti-Japanese racism rose steadily in the USA even though Japanese were making huge contributions to American life and the economy in areas such as farming. They also paid taxes. The Seattle City Council [in Washington state], for example, passed laws attempting to put Chinese hog farmers out of existence. Other laws made it illegal for Japanese to fish for salmon in the Columbia River, or to obtain hunting licenses. The whole Pacific oyster industry came from Japan; laws shut it down. Dave is not sure why they did this. It could have been resentment that they were successful, or it could have been harassment.

Nobuo Harada is a leading Japanese food scholar, who writes mostly in Japanese; his focus is the mid-Edo period. He has one article in English titled "Culinary Culture and its Transmission in the Late Edo Period," in *Written Texts–Visual Texts: Woodblock-Printed Media in Early Modern Japan,* edited by Susanne Formanek and Sepp Linhart (2005, p. 141-158).

Dave has studied numerous editions of *Zaibei Nippon-jin Kan* (*Directory of Japanese in the USA*), published by Shin Sekai-sha. The 1912 edition is at Waseda University in Tokyo. The 1916, 1928, and 1936 editions are at University of Washington (Seattle). Several other universities (UCLA, Univ. of Oregon) also have the 1936 edition. He has not seen the 1922 ed.

Another interesting source of information are the old guide books for coming to the USA; they were published in Japan, mostly in Japanese but with some English-language ads from hotels, food suppliers and importers, and labor contractors in the USA. Until 1912 the rice consumed in Oregon was grown in either Hawaii or Japan; then in 1912 Japanese-style rice started to be grown in commercial quantities in and around Sacramento, California. Rice had been milled in California since about the 1860s.

Hood River is a city on the Columbia River about 60 miles east of Portland. The Yasui Brothers Store (a general store) existed in Hood River from about 1907 until the internment in 1941. The store was the center of the Japanese community. Masuo Yasui, who owned the store with his brother, never threw any documents away for his entire life. He kept order sheets, cancelled checks, letters, telegrams–everything. These documents are now at the Oregon Historical Society, but they are just starting to be cataloged. Several scholarly books about this Yasui family have been published in English, such as *Stubborn Twig: Three Generations in the Life of a Japanese American Family,* by Lauren Kessler (1993).

Early soyfoods manufacturers in Portland that David has found include: (1) Asahi Tofu, 52 North 3rd St. Source: Oshû Nippo. 1922. May 4. p. 5. (2) Sanyo Co., which advertised miso (from Jan. 1915) and shoyu, and probably made them. (3) Kuge Tofu in the late 1930s and early 1940s until the internment.

Good books on Japanese rice in America are: (1) *A History of the American Rice Industry, 1685-1985* by Henry C. Dethloff (1988). (2) *Rice in California,* by Jack H. Willson (1979). Address: Portland, Oregon.

12878. Chow, Cheryl; Chow, James. 2007. Hypoglycemia for dummies. 2nd ed. Hoboken, New Jersey: John Wiley & Sons. xii + 274 p. Illust. Index. 24 cm.
• ***Summary:*** Hypoglycemia (low blood sugar) is difficult to diagnose and to treat; it may be linked to or confused with other health problems.

Soyfoods are a good source of protein in the diets of those suffering from hypoglycemia (low blood sugar). Soy is mentioned on pages 37 (Soy is one of 8 foods to which people are most often allergic), 38 (if you have a food reaction, try eliminating one of these 8 potential allergens from your diet. Go on an elimination diet for 2 weeks and keep a food journal), 41 (If you think you have candidiasis, try going on a hypoglycemic diet. In addition, avoid fermented foods or those that contain yeast, including soy sauce), 91 (MSG is also called hydrolyzed protein, soy extract, meat tenderizer, Accent, Ajinomoto), 104, 106 (milk substitutes, including soy milk, should not contain added sweetener), 107 (Foods such as tofu {bean curd}, tempeh and natto are good sources of protein, but intake should be limited to 2-3 servings of whole soy foods a day), 196, (unsweetened soy milk is good to drink), 250 (soy products make good meat substitutes), and 258 ("Noshing on nourishment": Vegetables such as edamame make excellent, nutrient-packed snacks).

Concerning natto (p. 250): "These sticky, fermented [soy] beans are a great vegetarian source of protein... In Japan natto is often eaten over rice for breakfast." However natto has a strong odor which takes some time to get used to. Address: 1. Writer and editor; 2. MD, Practicing physician, Director, Nihon Clinic [with branches in Manhattan, New York, Atlanta, Chicago and San Diego].

12879. *Vanity Fair.* 2007. Sex, drugs, and soybeans: And click here for rock 'n' roll. April 5.
• ***Summary:*** In the late 1950s, Stephen Gaskin joined the U.S. Marines; he saw combat in Korea as part of the Fifth Regiment. Then the veteran turned Beatnik and Hippie as he made his way through San Francisco State College, California. on the G.I. Bill and other scholarships. In 1964 he earned a master's degree, then for the next two years taught English, creative writing, and general semantics at his alma mater. In 1967 he started an informal philosophy seminar that would transform itself into "Monday Night Class." His teachings drew on many spiritual traditions from East and West, plus his personal experiences with psychedelics. Up to 1,500 people eventually attended each class.

The American Academy of Religion [founded in 1909, headquartered in Atlanta, Georgia, and today "the world's largest association of academics who research or teach religion or related topics"] sponsored Stephen in 1970 on a speaking tour of churches in 42 states. Some 300 of his acolytes accompanied him in a colorful parade of roughly 80 buses, trucks, and vans. It became a famous, "mystic trip out of San Francisco and into the American heartland." Above the windshield of Gaskin's bush was written: "Out to save the world."

They ended up in Summertown, Tennessee, at a 1,750 acre spread they called The Farm. The 200 people who live there today haven't given up the hippie spirit. But over the past 36 years, the spiritual commune has morphed "into a high-tech eco-think tank." They still meditate, hug one another, eat tofu, drink soy coffee, and sometimes call themselves "Farmies." The Farm is also home to 10 nonprofit organizations and 20 private businesses. And they "haven't given up on the half-forgotten, laughable-seeming notion of making the world a better place."

The farm started, in 1971, as a religious commune and a place where the members worked. To join, you had a sign a vow of poverty, turn over your cash and other possessions to the group, and accept Stephen Gaskin as your teacher. Stephen, now age 72, is married to Ina May Gaskin, author of *Spiritual Midwifery.*

"The long-haired Farmies adhered to vegan diets and worked the land. For protein, they ate soybeans in countless permutations." Between 1971 and the early 1980s the Farm's population grew from 300 to 1,500.

Then 1983, deeply in debt, they held a vote; the communal way of life lost out. Many people left.

Farm residents believe the way the rest of us live now–in an oil-dependent culture of cars, central heating, air conditioning, etc.–"is not only soul-deadening but doomed."

12880. Ross, Julia. 2007. Making tracks. *Time* (*Asia*). April 12.
• ***Summary:*** In Tainan, Taiwan, a "crowd converges on weekends to inhale the aroma of *xiao chi,* or street snacks: fermented tofu, fried wontons, grilled mushrooms and 'coffin cakes,' the local version of pot pies."

12883. Sullivan, Cheryl L.; Nash, Marilyn. 2007. Soy on the menu: Recipes for foodservice. Champaign-Urbana, Illinois: Illinois Center for Soy Foods. 52 p. Illust. No index. 26 cm. Series: Soy in the American Kitchen.
• ***Summary:*** This book has a creative format: (1) An outer color cover folds over the white spiral binding. (2) The pages are spiral bound across the top. (3) The bottom unfolds like a gusset so the book stands up by itself on a table with the pages angled slightly back on a table. (4) A CD-ROM comes with the book. Remarkably, the whole package sells for only $3.00!

Contents: Bringing soy foods to the American table: Soy in foodservice, why choose soy?, soy foods, vegetarian and vegan recipes [in this book], recipe information, nutrient information, acknowledgements. Recipes: Appetizers. Breakfast. Breads. Salads. Soups. Side dishes. Main dishes. Desserts.

The recipes in this book use: Soy flour, soymilk, tofu, textured vegetable protein / TVP [texture soy flour], edamame, black soybeans, soy analogs [meat and dairy analogs].

Sidebars include: Biodiesel (p. 10). Research shows kids like soy in school lunches (p. 11). Uncommon soy foods: Tempeh, miso, okara, natto. Are you soy savvy?: Why is soy flour added to baked goods? (p. 14). U.S. soybean production, yield, exports, and domestic usage (1979 vs. 2004) (p. 16). Industrial uses of soybeans: Soy candles, ink, biodiesel, soy cleaners, waterproofing sealants, soy silk (fabric). Are you soy savvy? Edamame (p. 19). INTSOY (p. 22). NSRL (p. 24). What is the soybean checkoff? (p. 27). WISHH initiative for soy in human health (p. 29, 30). Illinois Soybean Association (p. 34). What is okara? Why should you shake up a carton of soymilk? (p. 39). Make your own tofu (p. 47). Address: 1. M.A., R.D., Research Dietitian; 2. Ph.D., Project coordinator. Both: 170 National Soybean Research Center, 1101 W. Peabody Dr., Urbana, Illinois 61801. Phone: (217) 244-1706 or www.soyfoodsillinois.uiuc.edu.

12884. **Product Name:** Organic BBQ Burgers, Mexi Burgers (Replaces Tofu-Mexi Patties, launched June 1997), Vegie Burgers (Replaces Tofu Veggie Patties, launched 1981), Breakfast Sausage 12-Pack, Marinated Tofu Cutlets 12-Pack, Alder Smoked Tofu 12-Pack, Original Tofu Cutlets (Replaces Tofu Cutlets: Marinated and Baked, launched 1982).
Manufacturer's Name: Tofu Shop Specialty Foods Inc.
Manufacturer's Address: 65 Frank Martin Court, Arcata, CA 95521. Phone: 707-822-7401.
Date of Introduction: 2007. April.
Wt/Vol., Packaging, Price: 6.5 oz (184 gm).
How Stored: Refrigerated.
New Product–Documentation: Labels sent by Matthew Schmit. 2009. March 18. Self adhesive. Products 1-3: 3 inches diameter. Multi-colored on white. A stylish water-color illustration shows a tofu shop on stilts by the edge of the sea. All three products weigh 7.5 oz (211 gm) and are "Organic. Baked tofu. Perishable–Keep refrigerated. Good source of calcium. Rich in vitamin C and iron. Cholesterol free."

Products 4-6. Label is one color on white. 4 by 3 inches. No illustration. Product name, ingredients, nutrition facts (all information) is on front panel. Product 7: 3.5 by 2.5 inches. Multi-colored on white. A stylish water-color illustration shows a tofu shop on stilts by the edge of the sea. 6 oz. Certified organic. Marinated and baked. Enjoy our classic marinade rich with organic soy sauce, garlic, and a hint of lemon. Perfect for sandwiches, salads, stir-fry, and sushi rolls. Perishable–Keep refrigerated.

12885. **Product Name:** Organic Soymilk (Unsweetened, Chocolate, Vanilla, Original), and Organic Nigari Firm Tofu (in Bulk, or Vacuum Packed).
Manufacturer's Name: Vermont Soy LLC.
Manufacturer's Address: 180 Junction Rd. (P.O. Box 401), Hardwick, VT 05843. Phone: (802) 472-8500.
Date of Introduction: 2007. April.
How Stored: Refrigerated.
New Product–Documentation: Talk with (call from) Todd Pinkham, founder and owner of Vermont Soy. 2007. Dec. 10. In April he started to make and sell the four types of soymilk and two types of tofu show above. He uses a ProSoya VS-200 system. Todd used to make tempeh.

Outer package for Vermont Soy Artisan Tofu sent by Sjon Welters. 2008. Dec. 26. 4 by 4.75 by 2 inches. Paperboard box. Light green, dark green, black, white, purple, and red. 14 oz. retails for $3.99. Fresh. "Hand-crafted with Vermont-grown beans." "Sell by 11 31 08." The tofu is vacuum-packed in a plastic pouch inside the box. "Ingredients: Vermont-grown organic non-GMO soybeans, nigari (magnesium chloride), calcium sulphate, pure Vermont water." Phone: 802.472.8500. Note the USDA Organic seal at the lower right.

12886. Golbitz, Peter. 2007. Color photos of the soymilk processing short course held 22 May 2007 at the SoyCow Training Center in Bergville, KwaZulu-Natal, South Africa. Bar Harbor, Maine.
• ***Summary:*** Peter Golbitz took these color photos and wrote the captions. For background see interview with Peter Golbitz on 22 Jan. 2009. The short course workshop on 22 May 2007 took place at the training center located on property owned by Henry Davies adjacent to his Eden Manufacturing plant. This workshop (including the travel and other expenses of the African participants) was paid for mostly by WISHH; other contributors were USAID, Solae, Silk, Soyatech, and others.

(1) Peter Golbitz leading a strategic planning discussion at a meeting of the Soy Southern Africa association, held in

Bergville on May 22.

(2) Ratan Sharma from the American Soybean Association's office in New Delhi, explaining the equipment and processing steps for the SoyCow system. These SoyCows are made in India using the ProSoya process developed and patented by Raj Gupta (Ottawa, Canada).

(3) Henry Davies of Eden Manufacturing and the Eden Social Development Foundation demonstrating the VitaGoat soymilk processor. At this stage, the soymilk and pulp have been pressure cooked with steam and the mixture is being strained before manual pressing to separate the okara from the fresh soymilk.

(4) A participant grinding soaked soybeans on a pedal-powered VitaGoat grinder while a helper feeds fresh beans into the grinder hopper.

(5) Ratan Sharma explaining how to make soymilk yogurt from fresh soymilk produced with the VitaGoat or the SoyCow. (6) Ratan Sharma demonstrating how to make tofu using freshly produced soymilk curds from the VitaGoat. (7) Ratan Sharma cutting freshly pressed tofu for participants at the short course. Onlookers include Henry Davies (right) and Mrs. Mchunu (center in blue), a member of the South African National Government, Inkatha Party, also known as "Mama Soya" for her long time and personal support of the expanded use of soy in Southern Africa.

(8) Participants at the short course taste and evaluate different soymilk and soymilk yogurt formulations using different flavors and levels of sweeteners. Address: Director of International Business Development, SunOpta Grains and Food Group.

12887. Hain Celestial Group, Inc. (The). 2007. The Hain Celestial Group announces an agreement to acquire the tofu and meat-alternative business of WhiteWave Foods (News release). Melville, New York. 2 p. May 30. 28 cm.

• ***Summary:*** "The Hain Celestial Group, Inc. (Nasdaq: HAIN), a leading natural and organic food and personal care products company, today announced an agreement to acquire the tofu and meat-alternative business of WhiteWave Foods Company, a subsidiary of Dean Foods Company (NYSE: DF). These products are sold under the brand names TofuTown (R) and WhiteWave (R) and are currently manufactured in Boulder, Colorado.

"'Adding the tofu and meat-alternative business from WhiteWave Foods complements our existing Yves Veggie Cuisine (R) product line, strengthening and expanding our fresh, meat-free alternative product offerings to further support this sector of the growing natural and organic market,' commented Irwin D. Simon, President and Chief Executive Officer of The Hain Celestial Group. 'Purchasing this business will better position the Company to increase our meat-free alternative product sales in Canada and the United States, as we integrate the sales and marketing into our existing Yves operation,' concluded Irwin Simon.

"The product line includes baked and grilled tofu, seitan, tempeh and other traditional tofu items sold through natural and conventional grocery stores as well as in foodservice outlets. The tofu business generated sales of approximately $8 million in the last fiscal year. The transaction excludes the WhiteWave trademark; however, Hain Celestial will continue to market existing products under the WhiteWave brand for a transitional period under license. Other terms of the acquisition, which is expected to close in June, were not disclosed. The transaction is expected to be accretive to Hain Celestial's earnings during its fiscal year 2008."

Note: The acquisition actually took place on 8 June 2007. Hain Celestial acquired all products sold under the TofuTown or WhiteWave brand under a 12-month license. Address: 58 South Service Road, Melville, New York 11747-2342.

12888. *Soy Connection for the Food Industry* (*Seattle, Washington–United Soybean Board*). 2007. Soybean oil. 1(2):1-8. Spring.

12889. Wexler, Geoffrey. 2007. Re: Documenting the early history of Ota Tofu Co. (Portland, Oregon). Letter to Roy Yotsuuye, 16003 N.E. 25th Ave., Ridgefield, Washington 98642, June 1. 1 p. Typed, on letterhead. [8 ref]

• ***Summary:*** "To answer your first question, the two addresses (226 [sic] Davis Street and 96 N. 5th St.) were not the same location. The [first] major street renaming took place around 1892, when the 'alphabet' streets (A, B, C, etc.) were given the names of Portland pioneers (Ankeny, Burnside, Couch, Davis, etc.). The next major change was between 1931 and 1933, when all the house numbers in the city were changed and many street names were altered too. At that time North Fifth Street became Northwest Fifth Avenue, and Davis Street became Northwest Davis Street.

"As to the founding of the Ota Tofu Company, the city directories do not help with this. I spot checked the directories from 1908 through 1934 and found no listing at all for Ota (or Ohta) Tofu. However, I did find the following:

1910: Charles Ota listed as a "cook" with residence at 352 Oak Street.

S. Ota listed as "baths" with business and residence at 86½ 5th Street North.

1913: E. Ota listed as "cook."

1915: S. Ota listed as "baths," same addresses as 1912.

1921-1922: H. Ohta listed as "baker."

1924: H. Ota listed as "restaurant" with address at 86½ 5th Street North.

1933: Saizo Ohta listed as "wholesale baker" at 86½ 5th Street North.

© Copyright Soyinfo Center 2013

1934: Same as 1933.

"Of course, the directories are not always accurate, especially for the Japanese and Chinese communities in the area that is now called Old Town / Chinatown in downtown Portland (where the above addresses were located).

"There may be more detailed information here at OHS, perhaps in census records or books on the Japanese community. It may be worth a trip here to our research library to conduct further research." Address: Senior Archivist, The Oregon Historical Society, 1200 SW Park Ave., Portland, Oregon 97205. Phone: 503.222.1741.

12890. Okazaki, Noriko Ota. 2007. Re: Ota family history. Letter (e-mail) to Eileen Ota, Ota Tofu, Portland, Oregon, June 3. 1 p.

• ***Summary:*** "Hi Eileen: Hope everything is going well for you and the Tofu shop.

"I've been trying to answer your e-mail regarding the history of the Ota Tofu Shop and this is what I think I know:

"Saizo and Shina's last name was OHTA and whoever reported Matsuno's birth certificate made a mistake on her last name and was recorded as OTA. The Japanese character is the same.

"I don't know how many brothers and sisters Saizo had. At least one brother was here in the United States. I have no idea when he arrived in United States. I know for sure one brother was here because he married Mits' grandmother at one time. (she was married to Okazaki and had a son, Shizuo, in Japan before she was remarried to Saizo's brother).

"Saizo may have had a brother (I guess could be a sister also) in Japan since my mother talked about her cousin (no idea how many). Had tuberculosis and died.

"Like I had told you earlier, I don't know or have not met one single person with a name of Ota in Japan when I was growing up.

"The oldest relative who might know anything would be Matsuno's cousin, Matasuda since she grew up with them but he is at least 10 years younger and the time I saw him last year, he was not in any condition to remember anything.

"I think Grandma Shina was a picture bride and she moved into Ota family in Japan prior to coming U.S. No idea how long or what year. I don't think she had any occupation, just to a training to be a bride.

"Ohta family (I think) lived in Shiraishi, Okayama but no idea of their occupation. I don't think they were any way connected to the Tofu business. (this is my guess)

"There may be sources in Japan to help or the temple Ohta family belong to may help but I have no idea where to start. It is also possible everything was destroyed during the war when Okayama was bombed; no idea how extensive damages were.

"This is all I can think of now. If I get any more information, I will let you know.

"Take care and say hello to everybody, Noriko." Address: Japan.

12891. Walsh, Bryan. 2007. Lamenting the decline of the home-cooked meal in Japan. *Time.* June 6.

• ***Summary:*** About Etsuko Shiobu teaching at her home in Tokyo: "As commuter trains rumble outside the window of Shinobu's crowded kitchen, we prepare tuna sushi cake, tofu, a carrot and radish soup and a vinaigrette salad."

12892. Gupta, Rajendra ("Raj") P. 2007. New developments at ProSoya worldwide (Interview). *SoyaScan Notes.* June 27. Conducted by William Shurtleff of Soyinfo Center.

• ***Summary:*** A very interesting and far-reaching discussion including: (1) Assoy in Russia, Firouz Zanjani and Alexander Podobedov. (2) Soymilk factory in Iran, Andre Ladoucer (he commissioned the plant but is no longer active in the soymilk business), and the ProSoya agent in Iran. (3) People in the Middle East have a palate very similar to that of people living in India; both like soy yogurt. (4) ProSoya's best small machine for making soymilk is the one that makes 2,000 liters/hour and has a vacuum deodorizer. The basic plant without packaging equipment costs $60,000. A chiller costs an additional $15-20,000. Yogurt incubation tanks are extra. (5) ProSoya's continuous curding machine which makes 1,000 kg/hour of tofu; it costs about $135,000. (6) ProSoya's plant in New York is still in operation. It makes 2 tankers a week of soymilk, all of which is sold in Canada. (6) Many taste tests show that ProSoya's SoNice is the best tasting soymilk in the world. The most important thing for soymilk to become a mainstream product is to improve its taste. (7) Raj Gupta has had discussions and negotiations with major companies that sell soymilk: Unilever (Ades, Adez), Coca Cola and Odwalla. All these companies agree that ProSoya's soymilk is the best tasting. It is very frustrating that marketing is of top importance to all, while product quality is much or relatively low importance. (8) The soymilk market in North America is now worth about S1,000 million, with 90% of the sales in the USA and 10% in Canada, where SoyaWorld is the leading player, with about 40% of the market. Address: President and CEO, ProSoya Inc., 2-5350 Canotek Road, Ottawa, ONT, K1J 9N5, Canada. Phone: 613-745-9115.

12894. Gorn, Heather. 2007. William Shurtleff–The soy king. *Vegetarian Journal* (*Baltimore, Maryland*) 26(3):35.
• ***Summary:*** The article begins: "If you've ever eaten soy, William Shurtleff has probably played a role in your life. The soybean has proven to be his life's calling, beginning with his penning of *The Book of Tofu,* the seminal book on soy in this country, more than 30 years ago.

"Shurtleff traces the beginning of his journey toward vegetarianism to 1964, when he taught [sic, worked] with Dr. Albert Schweitzer in Gabon. There was no discussion of vegetarianism nor was Dr. Schweitzer; however at the age of 23 Shurtleff had learned a valuable lesson from Schweitzer's article, 'The Ethics of Reverence for Life,' and decided to live by this philosophy."

"Upon returning to the U.S. to continue his studies at Stanford University [California], Shurtleff moved into the... Peace and Liberation Commune. In 1968, the commune went vegetarian." Address: Undergraduate, Univ. of Pennsylvania and longtime volunteer with the VRG.

12895. **Product Name:** [Savory Herbed Tofu, Sliced and Stir-Fried].
Foreign Name: Tofu roerbakreepjes pittig gekruid.
Manufacturer's Name: Heijn (Albert).
Manufacturer's Address: Netherlands.
Date of Introduction: 2007. June.
Ingredients: Water, soybeans, vegetable oil, salt, herbs and spices, yeast extract...
Wt/Vol., Packaging, Price: 180 gm. paperboard tray.
How Stored: Refrigerated.
New Product–Documentation: Label sent by Sjon Welters from the Netherlands. 2007. June. Reddish brown, purple, blue and white on light pink. A color photo shows the prepared dish in a shallow purple bowl. 6.5 x 5 x 1.5 inches.

12896. Rommelmann, Nancy. 2007. The food chain: The Ota family turns out 6,000 pounds of the Japanese staple a week, selling to the public and stores. *Oregonian* (*The*) (*Portland, Oregon*). July 3. p. FD1, FD5.
• ***Summary:*** A good snapshot of life at Ota Tofu Co. in Portland, Oregon. Koichi Ota is the 3rd generation tofu maker,–"a man short on words and long on skill." He makes soft, medium, and firm tofu (and agé) from a high-protein non-GE soybean variety named Vinton, which is trucked from the Midwest.

Eileen Ota says they no longer run ads, nor does she do deliveries. They sell fresh tofu over the counter like a traditional tofu shop in Japan. Although the retail area is small, she sells 1,000 pounds of tofu a day, six days a week. She says there are a lot of vegetarians in Portland. Non-Asian customers may use soft tofu for salad dressings or smoothies. "Fresh tofu is $1.50 per pound, or $1.25 per pound if you bring your own container. Agé is $1.30 per piece. Soy milk is $2.25 per half gallon."

A large color photo shows Koichi Ota in a steamy tofu shop, holding a nylon sack full of okara. Address: Freelance writer; Special to the Oregonian.

12897. Owens, Daniel. 2007. Inbox: Eating around the world. *Time* (*Europe, Asia*). July 12.
• ***Summary:*** "When I was 18, I became a vegan and tried tofu for the first time, but I was not put off by its strangeness." Address: Paris.

12898. Beech, Hannah. 2007. The mountain is high, and Beijing is far away. *Time.* July 17.
• ***Summary:*** How the writer interviews a Chinese source about a sensitive subject: "Once the interviewee has expounded on a particular kind of tofu, or their son who's now studying international trade, or the prowess of China's table-tennis team, I segue to the real topic at hand." This approach seems to work surprisingly well.

12899. Joe, Peter. 2007. Sale of Sunrise's share of SoyaWorld Inc. and starting a new tofu plant in Toronto, Canada (Interview). *SoyaScan Notes.* July 24. Conducted by William Shurtleff of Soyinfo Center.
• ***Summary:*** In Dec. 2000 Peter Joe sold his 47% share of SoyaWorld to Sanitarium Foods of Australia.

He recently built a new tofu manufacturing plant in Toronto, Ontario. It began production in March 2002. All is well for Peter and Sunrise. The market for tofu in Canada is growing. Address: General Manager, Sunrise Soya Foods, 729 Powell St., Vancouver, BC, V6A 1H5 Canada.

12900. Vitasoy International Holdings Ltd. 2007. Annual report 2006/07. New Territories, Hong Kong. 148 p. July. 30 cm. [Eng; Chi]
• ***Summary:*** Inside front cover: "For over 65 years, Vitasoy has grown and multiplied its success from a little bean–and is still growing strong." A cartoon shows a team of "Beanies" (soybeans) pulling together on a rope in a tug-of-war.

For the fiscal year ended 31 March 2007, group turnover (sales) was HK$2,693 million, up 6.9% over the previous year. Of these sales, 62% came from Hong Kong, 16% from North America, 10% from Australia and New Zealand, 9%

© Copyright Soyinfo Center 2013

from Mainland China, and 3% from the rest of the world.

Gross profit was HK$1,563 million, up 5.5% from the previous year. Basic earnings per share were 17.3 HK cents, up 0.6%. Dividends per share were 15.5 HK cents, the same as the previous year.

At "Chairman's statement," a photo shows Winston Yau-lai LO, age 66. His resume is found on p. 40. He has two sisters, both married, Myrna and Yvonne. Total dividends for the year are 19.5 cents.

During the year the plant in Massachusetts [Nasoya] generated HK$379 million in revenue a decline of 1.8% from last year. "Operating loss increased to HK$49 million due mainly to the costs associated with the new product launches, declining tofu sales, and additional trade expenses to drive aseptic soymilk sales" (p. 24).

A five-year summary (2003 to 2007; p. 147) shows that, during this entire period, sales increased 20.9% and annual profit increased by 45.7%. Address: No. 1, Kin Wong Street, Tuen Mun, New Territories, Hong Kong. Phone: 466 0333.

12901. Yu, Jonathan; Yu, Beth. 2007. Re: History of Cherry Food Industry / APY Food Processing in Quezon City, Philippines. Letter (e-mail) to William Shurtleff at Soyinfo Center, Aug. 24. 1 p.

• ***Summary:*** Cherry Food Industry operated as a soy processing company in 1976. In January 1985 the company was registered as APY Food Processing. APY signifies the initials of Mrs. Adelaida Pua Yu, the owner, who had the first factory running at # 74 Speaker Perez St., Barangay Lourdes, Quezon City with 10 employees. From its initial operations until January 1995, Mrs. Yu successfully maintained the factory. In 1993, Jonathan Yu and wife Beth participated in the family business operations. Since the other siblings of Jonathan were engaged in other concerns, the management and operations of the company was transferred to the youngest Jonathan Pua Yu in 1995.

The company now makes the following soy products: Nippon Tofu. Toho. Tokwa. Taohue. Soymilk. Address: Quezon City, Philippines. Phone: (632) 365-0835.

12902. Pirello, Christina. 2007. Cooking the whole foods way: Your complete, everyday guide to healthy, delicious eating with 500 vegan recipes, menus, techniques, meal planning, buying tips, wit & wisdom. Revised and updated edition. New York, NY: Home Books. xiii + 354 p. Aug. Illust. (by Christina Pirello). Index. 24 cm. [38 ref]

• ***Summary:*** On the cover: "Includes 80 new recipes. Revised and updated–Now 100% vegan." This is basically a macrobiotic cookbook with 500 vegan recipes. One long chapter is titled "Tasty tofu, tempeh and seitan" (p. 115-40). Other soy-related recipes include: Basic miso soup (p. 35). Miso millet stew (p. 64). Minute miso soup (p. 82). Black soybean relish (p. 101; as black soybeans are simmered, they create their own gravy). Baked beans with miso & apple butter (p. 109). Tofu cheese (with miso, p. 118-19). Lemon miso sauce (p. 276). Also contains recipes for amasake, azuki beans, mochi, and sea vegetables.

The recipe for "Tofu cheese" (p. 118-19) is very creative and delicious.

About the author: A brief biography is on the rear cover; a color portrait photo is on the front cover. Address: Emmy Award-winning host of national public television's *Christina Cooks*.

12903. United Soybean Board (USB). 2007. Consumer attitudes about nutrition: Insights into nutrition, health, and soyfoods. 14th annual national report. Seattle, Washington: USB. 12 p. Oct. 28 cm.

• ***Summary:*** Methodology: "This year represents the second year we have adopted an online self-administered survey as our methodology, a significant change from random telephone interviews. The survey, conducted by an independent research firm [in Seattle, Washington] in February and March 2007, includes 1,000 random surveys, providing a sample that is consistent with the total American population. The study's margin of error remains ± 1.9 to 3.1%, with a confidence interval of 95 percent."

Contents: Introduction. Methodology. About USB. Nutritional habits & obesity concerns. Healthy food decisions. Improving overall health. Cooking oil impressions. Consumer attitudes about fats. Awareness and usage of soy products. Occasion preferences for consuming soy. Restaurants and soy products. Soyfoods and health. Special health benefits of soy

Awareness and usage: 33% of Americans consume soyfoods or soy beverages once a month or more. "For the fourth year in a row, consumers reported the most familiarity with soymilk, soybean oil, soy veggie burgers and tofu."

A table shows the "Top 20 soy products by awareness." Soymilk 90%. Soybean oil 66%. Soy veggie burger 63%. Tofu (unspecified) 60%. Soy infant formula 51%. Soy nuts 47%. Soy latte / soymilk in espresso coffee drinks [as at Starbucks] 41%. Soy protein bars 34%. Dried or canned soybeans 34%. Soy yogurt 32%. Soy flour 31%. Soy ice cream / cheese 30%. Soy hot dogs 29%. Flavored / marinated tofu 28%. Miso 28%. Soy supplements 28%. Cereal bar / Energy bar 28%. Edamame 23%. Soy breakfast cereal 21%. Textured soy protein 21%. All others mentioned 14% or less.

Occasion preferences for consuming soy (in descending order of preference): dinner 41%, breakfast 28%, lunch 27%, mid-afternoon snacking 19%, late evening snacking 14%, mid-morning snacking 10%, desserts 6%.

Restaurants and soy products: "Over half of consumers have tried soyfoods in restaurants." Tofu 25%. Soymilk 24%. Veggie burgers 22%. "Over one-third would order soy products in restaurants... if they could find soy on their restaurant's menu."

"In 2007, 85% of consumers rate soy products as

© Copyright Soyinfo Center 2013

healthy, up three percentage points from 2006." A graph (p. 7) shows this increase in awareness (82% in 2006, 78% in 2005, 74% in 2004, 74% in 2003, 74% in 2002, 69% in 2001, 76% in 2000, 71% in 1999, 67% in 1998).

Why? Low-fat profile 18%. Protein content 17%. Heart health function 16%. Cholesterol-lowering properties 11%. "Being good for you" 11%. Potentially providing relief for menopause symptoms 10%.

Note: As of Aug. 2008 this full survey is available gratis in PDF format at www.soyconnection.com /health_nutrition / pdf/.

12904. Berne, Amanda. 2007. Meaty alternatives: The accidental vegetarian. Chefs find winning ways to cook seitan, tempeh and tofu. *San Francisco Chronicle.* Sept. 19. p. F1, F4-F5. Food section.

• ***Summary:*** Many Bay Area restaurants cater to vegetarians and vegans. "It's all about fake meat." While tofu has become well known, chefs are now experimenting with tempeh and seitan. Contains many tempeh and seitan recipes. Address: Chronicle staff writer.

12905. Fitzpatrick, Liam. 2007. Hong Kong's Zuma nights. *Time* (*Asia*). Sept. 20.

• ***Summary:*** Zuma, a large and fancy restaurant in Hong Kong, serves "baby chicken marinated in barley miso and roasted on cedar wood, or fresh cold tofu with grated wasabi and other condiments."

12906. Mahr, Krista. 2007. Why some countries feast and others famine. *Time* (*Asia*). Sept. 27.

• ***Summary:*** In the 1930s Henry Ford used to wear a suit made from soybean fiber. He became extremely interested in the many possible uses of the soybean. He served gala dinners in which all the dishes contained soy, and he made great efforts to incorporate soy products into Ford cars, using it for things such as upholstery fabric and experimental panels. The potential that Ford saw in soybeans has today be come a reality.

In his new book *Stuffed and Starved,* Raj Patel takes a sweeping look at the international food system in which 800 million people are malnourished, while over a billion eat so much that a high percentage become overweight or obese. Patel has a good sense of world food history. He includes a story of how Ellen G. White, long head of the Seventh-Day Adventist church, had a vision showing that a vegetarian diet was the key to longevity. Thus Seventh-day Adventists were "the first white people in the United States to make tofu."

12907. Kingsbury, Kathleen. 2007. The changing face of breast cancer. *Time* (*Asia*). Oct. 4.

• ***Summary:*** As U.S. and European lifestyles spread, so do their unhealthy diets. Last July, scientists released a study that examined the eating habits of 3,000 Chinese women, ranging in age from 25 to 64. Half of the women ate a "meat sweet" Western diet, rich in red meat, shrimp, fish, candy, desserts, bread and milk. The others consumed "more traditional Asian fare of tofu, vegetables, sprouts, beans, fish and soy milk. Postmenopausal women in the meat-sweet group showed a 60% greater risk of developing the most common kind of breast cancer."

12908. Dorff, Erik. 2007. The soybean, agriculture's jack-of-all-trades, is gaining ground across Canada (Web article). http://www.statcan.gc.ca/ pub/ 96-325-x/ 2007000/ article/10369-eng.pdf. 14 p. Oct. 26. Printed 28 Jan. 2010. [7 ref]

• ***Summary:*** An outstanding overview and description of the current status of soybeans in Canada.

Contents: Introduction. Development of the soybean sector in Canada. Growth in soybean area across the country. The soybean–an international super-crop. Soybean dollars make sense to farmers. One crop, many uses. Food for human consumption. Animal feed. Industrial products. Soybean not a "has-bean" crop in Canada. The gift of the bean (a brief early history of the soybean in the USA and Canada).

Figures: (1) Gains in soybean area reflect crop development efforts (1951-2006; 000 hectares). (2) One crop many uses. Diagram showing uses as: Food for human consumption, animal feed, industrial products. (3) Bred in Canada: soybeans of prominence. AC Proteus, Toki (for tofu), Nattawa (for natto), Maple Arrow (expanded soybean range out of southern Ontario), Maple Presto (the fastest maturing soybean). (4) Traditional soy foods: a brief guide (with a description of each). Edamame, miso, natto, soy sauce, soy milk, tempeh, tofu.

Tables: (1) Census of agriculture tracks growth in soybean area. Gives the area planted in Canada, Prince Edward Island, Nova Scotia, New Brunswick, Quebec, Ontario, Manitoba, Saskatchewan, and Alberta in the census years of 1976, 1981, 1986, 1991, 1996, 2001, and 2006. Soybeans were planted in each of these provinces in the three most recent census years. (2) Top 10 soybean producing nations (Average 2000 to 2005): After the USA, Brazil, and Argentina, China is 4th, India 5th, Paraguay 6th, Canada 7th, Bolivia 8th, Indonesia 9th. and Italy 10th. (3) Average soybean composition. Columns: Characteristic, oil, feed and meal beans, soy milk / tofu soybeans. For the latter: 100 seeds should weigh more than 20 gm. Colour very light with clear hilum, oil content 17-19%, protein content 44-47%, soluble sugar content 11-13%, insoluble sugar content 21-25%, minerals 5%. (4) Nutritional comparisons: Tofu and soy milk with ground beef and cow's milk.

Maps: (1) Soybeans in Canada (3 maps on one page). Map A shows that quite a bit of Quebec's soybean acreage lies south of the Saint Lawrence River, in the region named "Southern Quebec" (which includes the Eastern Townships

© Copyright Soyinfo Center 2013

at its southernmost area–its south-western end).

"Until the mid-1970s, soybeans were restricted by climate primarily to southern Ontario. Intensive breeding programs have since opened up more widespread growing possibilities across Canada for this incredibly versatile crop: The 1.2 million hectares of soybeans reported on the Census of Agriculture in 2006 marked a near eightfold increase in area since 1976, the year the ground-breaking varieties that perform well in Canada's shorter growing season were introduced" (p. 1).

"For years, soybeans were being grown in Canada but it wasn't until the Second World War that Statistics Canada began to collect data showing the significance of the soybean crop, with 4,400 hectares being reported in 1941. In fact, one year later the area had jumped nearly fourfold, to 17,000 hectares. In 1943 a program aimed at actively breeding soybeans suitable for southern Ontario was initiated.

"During the Second World War, North American manufacturers used oil from soybeans not only as a food but also to produce a wide number of industrial products including glycerine for the manufacture of nitroglycerine used for explosives and ammunition.

"By 1951, 62,967 hectares had been planted with soybeans (Figure 1), but they were still mostly confined to southern Ontario, the region with the longest and warmest growing season in Canada" (p. 2).

"It wasn't until varieties with earlier maturity and improved tolerance of cooler climates were successfully developed–the 'Maple' series of soybean cultivars–that significant soybean production was pushed beyond southern Ontario. The 1976 release of the Maple Arrow variety in particular is credited with expanding the range of soybean production into eastern Ontario (Table 1)."

The "growth between 2001 and 2006 was particularly notable in the Prairie provinces, with Manitoba's soybean area increasing sevenfold to over 141,869 hectares and its more western neighbours, Saskatchewan and Alberta, beginning to actively pursue soybean production. These gains in area were the payoff from research aimed at finding and breeding soybean varieties suited to the Prairies as well as from crop promotion and market development" (p. 5).

"In the 2006 calendar year, farm cash receipts from soybeans amounted to $680 million in Canada, making it the fifth most valuable field crop, trailing canola ($2.5 billion), wheat ($1.8 billion excluding durum), potatoes ($899 million) and corn ($753 million). In Ontario, where it was also the most planted crop, it was the top crop in terms of farm cash receipts, at $547 million, eclipsing the receipts from corn ($449 million) and wheat ($275 million)" (p. 6).

"International trade contributed to the value of soybean receipts. Preliminary figures place soybean exports at over 40% (1.5 million tonnes) of the soybeans grown in Canada in the 2006 crop year (3.5 million tonnes).

"Of the four top buyers in 2006, Japan led the list, importing $138 million in Canadian soybeans, followed by Malaysia ($52 million), the Netherlands ($49 million) and Iran ($43 million). At the same time, Canada imported about 302,000 tonnes of soybeans valued at approximately $81 million, 99% of which came from the United States" (p. 7). Address: Statistics Canada.

12909. Anbarasu, K.; Vijayalakshmi, G. 2007. Improved shelf life of protein-rich tofu using *Ocimum sanctum* (*tulsi*) to benefit Indian rural population. *J. of Food Science* 72(8):M300-05. Oct. [35 ref]
• ***Summary:*** Tofu, a nonfermented soyfood rich in high-quality protein, B-vitamins, and isoflavones, could be an excellent substitute for meat in Indian recipes. Being rich in protein, tofu has a very short shelf life. Thus, an attempt was made to extend the shelf life using extracts of *tulsi,* which is commonly available in rural areas. Tofu was made using magnesium chloride and magnesium sulfate as coagulants. An aqueous extract of tulsi (commonly available in rural India) was added during the preparation and storage of tofu. This extended the unrefrigerated shelf life of tofu from its usual 3-4 days to 7-8 days. Address: Dep. of Food Microbiology, Central Food Technological Research Inst., Mysore 570020, India.

(3) A large color photo titled Palak Tofu, showing the prepared dish on a colorful background. Cubes of paneer and tofu are in the foreground.

(4) Soy drink is sold in bulk, pouches, plastic & glass bottles and in Tetra Pak cartons. Four color photos show soymilk in different presentations.

(5) Soymilk and tofu. A large color photo shows Shakti soymilk in plastic pouches, glass bottles, plus rounds of tofu on a bed of yellow soybeans. Address: PhD, ASA International Marketing, Spanish Court, 3rd Floor (301A), Block C1, Palam Vihar, Gurgaon–122017, Haryana, India.

12914. Soyatech, Inc. 2007. Soya & Oilseed Bluebook 2008. Bar Harbor, Maine: Soyatech. 446 p. Nov. Comprehensive index. Brand name index. Advertiser index. Statistical conversions. 28 cm.
• ***Summary:*** This is the 2nd year in a row that the *Bluebook* (a $95 value) has been sent free of charge to qualified industry members. On the cover are color photos of seven different crops (mostly growing in fields) covered in this book. The oilseeds covered in this book are (alphabetically): Canola, coconut, corn, cottonseed, flaxseed, hempseed, jatropha, linseed, palm, peanut, rapeseed, safflower, soya, sunflowerseed. Note that hempseed, jatropha, linseed, and safflower have been added this year.

On the inside front cover is a color ad from Natural Products Inc. (Grinnell, Iowa) titled "Technology doesn't have to be complicated to be effective." Photos show applications of some of the company's products: soymilk ingredients, tofu ingredients, bakery ingredients, and egg replacers. On the first page is a full page color ad from Bunge North America (St. Louis, Missouri). On the rear cover is a full page color ADM ad titled "Where does healthy begin?" showing a mother talking with her young daughter in the back of a pickup, on a farm. The tag line is "Meeting today's demands. Envisioning tomorrow's needs."

In the Foreword, Peter Golbitz writes: "We no longer determine the price of oilseeds and grains based solely upon their value as a food or feedstock–we now factor in what their value may be as an alternative source of energy. The rise in commodity prices that we have seen over the past year... has been primarily driven by the use of, or the anticipated use of, agricultural crops for energy. Whether or not we can ever grow enough crops to make a substantial contribution to our energy supply is now being debated..." "The continuing removal of trans-fats from food applications has created a boom market for oils, other than those that are hydrogenated,..."

"Soyatech's role in all of this has been to provide as much information as possible to the players throughout the value chain... Soyatech's seminal reference, the *Soya & Oilseed Bluebook,* will continue to evolve... and provide the best information available on the industry." Address: 1369 State Hwy 102, P.O. Box 84, Bar Harbor, Maine 04609. Phone: 207.288.4969.

12915. Cullen, Lisa Takeuchi. 2007. Find the bad protein; then, fix it. *Time.* Nov. 14.
• ***Summary:*** "Since the mid-1990s, the words mad-cow disease had turned beef eaters around the world to tofu tasters as people began to die of the human variant of the disease."

12916. *SoyaScan Notes.* 2007. Chronology of major soy-related events and trends during 2007 (Overview). Dec. 31. Compiled by William Shurtleff of Soyinfo Center.
• ***Summary:*** Jan. 1–Soyfoods Center changes its name to Soyinfo Center.

Feb.–The Soy Connection for the Food Industry (Vol. 1, No. 1) starts to be published by United Soybean Board as a free e-newsletter. The subject of the first issue is Qualisoy soy oil.

March 6–8 International Soy Utilization conference in Bangkok, Thailand. It is organized by: The Institute of Nutrition, Mahidol University (INMU), ASA International Marketing (ASA IM), and the Soy Food Forum Southeast Asia (SFF).

April 4–Organizations listed in the Soya & Oilseed Bluebook are invited and enabled to update their own listings online. The update listing will appear as soon as the Bluebook editors review it and in the print edition in the fall. The Bluebook will continue to be printed as a bound book. Preferred customers will receive a free copy. Qualified people or organizations in the industry who request a copy pay shipping and handling. Those outside the industry must

© Copyright Soyinfo Center 2013

pay for shipping and handling plus a $95 fee.

June 11–The Hain Celestial Group completes its acquisition of the tofu and meat-alternatives business of WhiteWave Foods Co., a subsidiary of Dean Foods. The product line includes grilled and baked tofu, seitan, tempeh, etc. These products are expected to complement Hain Celestial's existing meat alternatives under the Yves brand in Canada and the United States. The White Wave tofu business generated sales of approximately $8 million in the last financial year.

July 11–Solae announces that it has completed its purchase of Cargill's Prolisse line of isolated soy proteins (ISP; soy protein isolates), including the patented membrane technology for processing ISP.

Aug. 7–SunOpta (incl. SunRich), headquartered in Canada, announces that it has acquired a soymilk plant in Heuvelton, New York, from ProSoya Corporation (Ottawa, Ontario). Allan Routh is president of the SunOpta Grains and Foods Group.

Aug. 16–CPM (Waterloo, Iowa) acquires Crown Iron Works (Minneapolis, Minnesota). CPM is owned by Golbert Global, a private equity group. The acquisition doubles the size of CPM.

Sept. 11–Hain Celestial Group announces it will delay filing its annual report with the U.S. Securities and Exchange Commission (SEC) pending a review of its practices in granting stock options. Thus, the annual report was received by shareholders in April 2008, rather than the typical Nov. 2007.

Nov 5–Symington's, a major U.K. food manufacturer, has acquired the dry-mix products from Hain Celestial (formerly known as Haldane Foods) for an undisclosed sum. In the purchase of Hain Celestial's dry mix operation, Symington will take over the Barrow based production centre from Hain Celestial and will enable the company to increase its stake in the growing health food and vegetarian sector. Main products in the acquisition are couscous, sport nutrition, snack pots and vegetarian meals. Brands acquired include Granose, Realeat, Direct Foods, Organic and Amazing Grains. Granose was owned by Haldane Foods which also owned Direct Foods and Realeat. So you will also find Sosmix and Burgamix have disappeared as well–but they have returned under the Granose brand. We now have the Granose Sausage Mix, Burger Mix and others that have replaced the Realeat and Direct Foods Sosmix and Banger Mix as well as the Burgamix. Popular products like Nut Roast, Cashew Nut Roast and Chicken Style Bake were discontinued following the sale of the Realeat, Granose and Direct Foods brands.

12917. Belleme, John; Belleme, Jan. 2007. Japanese foods that heal: Using traditional ingredients to promote health, longevity, and well-being. Tokyo, Rutland, Vermont, Singapore: Tuttle Publishing. 224 p. Illust. Index. 26 cm.

• ***Summary:*** On the dedication page is a portrait photo of Takamichi Onozaki. Contents: Pronunciation guide. Foreword, by Christina Pirela. Preface, by John and Jan Belleme. Introduction: Food is medicine. 1. Miso: A health secret to savor. 2. Toasted sesame oil: The cooking oil supreme. 3. Shoyu: King of condiments. 4. Tamari: Wheat-free soy sauce. 5. 12918. **Product Name:** Sesame Yuba Strips, Cilantro Tofu Salad.
Manufacturer's Name: Hodo Soy Beanery.
Manufacturer's Address: 1600 S. De Anza Blvd., San Jose, CA 95106. Phone: 408-517-8958.
Date of Introduction: 2007. December.
Ingredients: See below.
Wt/Vol., Packaging, Price: -
How Stored: Refrigerated.
New Product–Documentation: Labels by brought to Soyinfo Center by Minh Tsai on 2009. Sept. 16. Ingredients: Sesame Yuba Strips: Soybeans, filtered water, teriyaki sauce, rice vinegar, sesame paste, soy sauce, sugar, soybean oil, black sesame seeds.

Cilantro Tofu Salad: Soybeans, water, calcium sulfate, rice vinegar, mushroom powder, sesame oil, cilantro, sugar, salt, black pepper.

12919. Life Food GmbH. 2007. Glaubt Ihr wirklich, das wir die Kontrolle ueber die Gentechnik behalten? [Do you really believe that we can control genetically engineered crops? (Brochure)]. Freiburg, Germany. 4 p. 30 cm. and 21 cm. [Ger]
• ***Summary:*** A colorful brochure (in large and small sizes) on glossy paper. Explains the dangers of genetically engineered crops and monoculture. On the back panel: Do you really believe that genetic engineering can deliver us a healthy life? Stop! For more information contact info@taifun- gegen-gentechnik.de. Address: 8 Bebelstrasse, 79108 Freiburg, Germany. Phone: +49 (0)761 / 15210-0.

product. *Romanian J. of Internal Medicine* 45(1):113-21. *
• ***Summary:*** Cultivated for more than 3,000 years, soya is both a drug and a food product, with numerous nutritional and health benefits. These are discussed one by one. Among the most popular soyfoods are soymilk, tofu (soy cheese), and soy meat (pie, salami, textured soy in granule form). Address: Clinic of Diabetes, Nutrition and Metabolic Diseases, Univ. of Medicine and Pharmacy, Craiova, Romania.

12921. Sol Cuisine. 2007. Organic Tofu [Sesame Ginger, or Herb]. Mississauga, Ontario, Canada L4Z 2C7. [Eng; Fre]

• ***Summary:*** Two labels sent by Lorraine Guardino of Sol Cuisine. 2013. March 11. She ads a note that these two products were introduced in 2007 and sold only in Ontario. Address: Mississauga, Ontario, Canada. Phone: 905-502-8500.

12922. Berley, Peter; Singer, Zoe. 2007. The flexitarian table: Inspired, flexible meals for vegetarians, meat lovers, and everyone in between. Boston, Massachusetts: Houghton Mifflin. viii + 342 p. Illust. (color photos by Quentin Bacon). 25 cm.
• ***Summary:*** A "flexitarian" (noun) is: "1. A person who is mainly a vegetarian but who occasionally eats fish or meat. 2. Someone who is not a vegetarian but enjoys meatless meals."

Provides menus and recipes for the "flexitarian," or "flexible vegetarian" family, offering ideas for how to prepare vegetarian and meat versions of entrees simultaneously without extra effort and menus based on seasonally available foods (Publishers blurb).

Contents: Introduction: What's a flexitarian? How to use this book. About the ingredients. Poultry. Meat. Fish and Seafood Vegetables. Tofu, tempeh, and seitan. Dairy. Eggs. Beans. Seeds and nuts. Spices. Cooking with the Seasons: Chapter 1: Spring menus. Chapter 2: Summer menus. Chapter 3: Fall menus. Chapter 4: Winter menus.

Ingredients include miso, tempeh, tofu, sea vegetables, and seitan.

Note: This is the earliest book seen (June 2010) with the word "Flexitarian" in the title. Address: Author and former chef of the all-vegan Angelica Kitchen in New York City.

12923. Bittman, Mark. 2007. How to cook everything vegetarian: simple meatless recipes for great food. Hoboken, New Jersey: John Wiley & Sons, Inc. xii + 996 p. Illust. Index. 24 cm.
• ***Summary:*** The chapter titled "Tofu, vegetable burgers, and other high-protein foods" (p. 637-78) has this contents: Introduction. The umami factor (savory-ness). The basics of tofu: The tofu lexicon (regular tofu, silken tofu, pressed or extra-firm tofu, smoked tofu, fried tofu, baked tofu, fermented or pickled tofu, tofu skins {dried bean stick, yuba, bean curd sheets or skins}). Buying and storing tofu. Preparing tofu (freezing, squeezing, puréeing,...); then come a wealth of recipes.

The index contains 129 entries for tofu, 32 for miso, 26 for tempeh, 25 for soy sauce, 24 for edamame, 23 for seitan, 11 for soybeans, 7 for black beans (fermented [fermented black soybeans]), 4 for teriyaki sauce, 6 for tofu skins (yuba and dried yuba sticks), 3 for milk substitutes, 2 each for meatballs (vegetarian), and 1 each for bean sprouts (soy), black soybeans, meatless meat sauce, soybean oil, soy flour, soy milk, soy nuts, soy pasta, soy protein isolate, textured vegetable protein, tofu noodles, and Worcestershire sauce (hold the anchovies).

There are also recipes for adzuki beans [sic], tahini, vegan cookery–and much more. Address: New York Times food writer.

12924. Bittman, Mark. 2007. Mark Bittman's quick and easy recipes from the New York Times. New York, NY: Broadway Books... An imprint of Random House. x + 340 p. Index. 23 x 20 cm.
• ***Summary:*** This book collects 350 recipes from Bittman's

popular *New York Times* column "The Minimalist," which cleverly caters to the modern gourmet whose expectations are high but whose time is limited.

Soy related recipes: Nearly instant miso soup with tofu (p. 7). Soy vinaigrette (with soy sauce, p. 44). Rice salad with peas and soy (with soy sauce, p. 58). Steamed clams with soy (sauce, p. 65). Soy-dipped shrimp (p. 78-79). Miso-broiled scallops (p. 80). Simplest steamed fish with soy (p. 95). Salmon with soy and black beans (with "1 tablespoon preserved (Chinese) black beans," p. 110-11). Soy duck (p. 142). Soy poached chicken (p. 154-55). Grilled soy-and-ginger boneless lamb leg (p. 193). Pork chops with miso-red wine sauce ("Miso is a superb thickener, adding a rich, creamy consistency," p. 201). Roast asparagus with soy and sesame (p. 217). Grilled asparagus with soy-ginger dressing (p. 218). Curried tofu with soy sauce (p. 243). Simmered tofu with ground pork (Ma-Po tofu, p. 244). Address: New York Times food writer.

12925. Blereau, Jude. 2007. Wholefood: heal–nourish–delight. Philadelphia, Pennsylvania: Running Press. 332 p. Illust. Index. 23 x 19 cm. [8 ref]

• ***Summary:*** This cookbook is not vegetarian. Vegan recipes are so labeled. One chapter, titled "Soy" (p. 92-110) is divided into two parts: Tofu and tempeh The index contains 18 entries for tofu, 14 for tempeh, 3 each for miso and tamari, 2 each for miso soup, soy beans, 2 and soy milk, and 1 each for soy flour, teriyaki marinade, and textured vegetable protein.

"Jude Blereau is a natural foods chef, food coach, and cooking teacher who has been involved with the organic and wholefoods industry for more than 15 years. She first became involved in the natural food industry while living in the U.S. in the late 1980s. In 1997, Jude co-founded The Earth Market, a much loved wholefood store and cafe; in Perth, Western Australia. Her focus is on helping people learn about good food-what it truly is, where to get it, how to use it-and to give them the tools and information to make healthy eating a part of their everyday lives. Blereau lives in Australia." From publisher's description. Address: Natural Foods Chef, Australia.

12926. Compestine, Ying Chang. 2007. Revolution is not a dinner party: A novel. New York, NY: Henry Holt and Co. 248 p. Illust. Map. 21 cm.

• ***Summary:*** An outstanding, extremely well written and interesting book. "Although this is a work of fiction, many of the scenes and characters in the book are based on or inspired by real places, actual events, and people from my childhood" (p. 245).

This first-hand account of the Cultural Revolution in China, starting in 1972 when the author was a girl, age 9, in Wuhan, gives an excellent sense of what it was like to be there in the midst of the conflict. In 1966 Mao Zedong launched the Cultural Revolution for several reasons: First, he hoped to use it to ensure his victory in a power struggle among China's new Communist leaders. Second, he hoped to "re-educate" the anti-Communists who existed in China before the revolution. Third, he hoped it would draw attention away from the economic hardships in China at this time."

On Oct. 1966 Chairman Mao's *Little Red Book* was published. The title of this novel comes from the following quotation by Mao:

"A revolution is not a dinner party, or writing an essay, or painting a picture, or doing embroidery; it cannot be so refined, so leisurely and gentle, so temperate, kind, courteous, restrained and magnanimous. A revolution is an insurrection, an act of violence by which one class overthrows another."

"Mao's power reached its peak during the middle of the Cultural Revolution." "Although it officially ended in 1969 and the worst abuses stopped, the politically charged atmosphere continued until Mao's death on September 9, 1976" (p. 247-48, "Historical Background").

The author, whose name in the novel is "Ling," did not like tofu. "Mother set a small blue bowl and matching soup-spoon in front of me. 'Ling, your hair is as dry as dead grass. Eat your soup.' It was filled with tofu, spinach, and seaweed. I didn't want it but I knew better than to say so. I picked up a bit of tofu, hoping that would be enough. I had already stuffed myself on my favorites: pan-fried dumplings, egg-fried rice, and steamed fish with mother's tasty black bean sauce" (p. 6).

"To celebrate Christmas Eve, Mother made dumplings stuffed with onions and soybeans" (p. 137).

Buying from old women in a village at the edge of the city: "The first time I eagerly filled by basket with rice cakes, tofu, and carrots" (p. 175).

A photo on the cover and facing the title page shows the author as a girl in China.

Note: Modern historians agree with the author's dates; they give the dates of China's Cultural Revolution as 1966-1976, but say that it was in decline from 1969 to 1976 (the year of Mao's death). Address: Author (California).

12927. Esselstyn, Caldwell B., Jr. 2007. Prevent and reverse heart disease: the revolutionary, scientifically proven, nutrition-based cure. New York, NY: Avery. A member of the Penguin Group (USA) Inc. xii + 308 p. Plus 8 unnumbered pages of plates. Foreword by T. Colin Campbell, Ph.D. Illust. (some color). Index. 24 cm. [27 ref]

• ***Summary:*** A remarkable, milestone book! Every person with a heart should read this book. Advocates a plant-based diet with no oil or nuts. On the cover: "Based on the findings of a now 20-year study first published in the *American Journal of Cardiology* [in Dec. 1995]. With more than 150 great-tasting recipes."

© Copyright Soyinfo Center 2013

Contents: Foreword, by T. Colin Campbell. Introduction. Part I: The heart of the matter. 1. Eating to live. 2. "Someday, well have to get smarter." 3. Seeking the cure. 4. A primer on heart disease. 5. Moderation kills. 6. Living, breathing proof. 7. Why didn't anyone tell me? 8. Simple steps. 9. Frequently asked questions. 10. Why can't I have "heart healthy" oils? 11. Kindred spirits. 12. Brave new world. 13. You are in control.

Part II: The joy of eating. 14. Simple strategies. 15. Advice from Ann Crile Esselstyn. 16. Breaking the fast. 17. Feasting on salads. 18. Sauces, dips, dressings and gravies. 19. Vegetables, plain and fancy. 20. Soups, thick and delicious. 21. Sandwiches for all occasions. 22. The main course. 23. Wonderful, easy desserts.

This book is based on a 20 plus year study of coronary artery disease using diet and lifestyle modifications; it reports the results of that study. President Bill Clinton has spoken (in public and on TV) very highly of this book and of Dr. Esselstyn (pronounced ES-sul-stun, not ES-sul-stine); the name is Dutch.

The dietary rules (p. 120-21): 1. Don't eat any meat, chicken or fish. 2. Do not eat *any* dairy products. 3. Do not eat eggs; that includes egg whites and even egg substitutes that include egg whites. 4. Do not consume any oil at all–Not even virgin olive oil or canola oil. 5. Use only whole grain products, including brown rice. That means no white flour products. 6. Do not drink fruit juice–but its fine to eat fruit. 7. Do not eat any nuts. 8. Do not eat avocadoes (or guacamole). 9. Do not eat coconut. 10. "Eat soy products cautiously. Many are highly processed and high in fat. Use 'light' tofu. Avoid soy cheese, which almost always contains oil and casein." 11. Read *The China Study,* by T. Colin Campbell.

After having cautioned the reader to "Eat soy products cautiously," the plant-based recipe section of the book (p. 119-286), by Ann Crile Esselstyn, calls for soyfoods in many recipes. Some of the breakfast cereals call for plantmilk using a standard format: "2 cups oat, multigrain, almond, or nonfat soymilk" (p. 129-32, 162, 231, 276, 283). A comparison of the caloric, fat, sodium, and sugar content of nine plantmilks (six of them containing soy) is given on pages 136-37. "Low-sodium tamari" and Bragg Liquid Aminos (which contain sodium by no salt) are widely used in small amounts for seasoning (p. 128, 158-59, 165-66, 168, 170-72, 177, 179, 184, 251, etc.). White miso is used occasionally as a combination seasoning and sweetener (p. 163, 191). Seitan (made from wheat gluten) is occasionally used as a meat substitute (p. 213, 250-51). Light silken tofu or light extra-firm tofu (often one 12.3-ounce package) is used as a dairy alternative in dessert recipes such as: Chocolate mousse (p. 272-73). Blueberry purple passion (p. 273). Pineapple paradise (p. 274). Lemon whipped topping (p. 275). Pineapple frosting (p. 278). Creamy fudge frosting (p. 279).

Sweeteners are used in moderation and the chapter on "Desserts" begins: "Its best not to eat dessert every night. Make it a rare treat, when there are lots of people around–and no temptation to eat too much." Many fruits are naturally sweet and make good desserts. One format is: "3 tablespoons maple syrup, honey, agar nectar, or sugar."

Acknowledgments (p. 287): "Kindred spirits in the transition to healthier living have my gratitude for their own inspiring work. Among them: Neal Barnard, Colin Campbell, Antonia Demas, Hans Diehl, Joel Fuhrman, Mladen Galubic, Alan Holdhamer, William Harris, Michael Jacobson, Michael Klaper, Robert Kradjian, Doug Lisle, Howard Lyman, John McDougall, Jeff Nelson, Dean Ornish, John Robbins."

"My late father, Caldwell B. Esseltyn, M.D... And long before it became fashionable, he argued that the only way out of the impossible health-care burden that confronts the United States is to teach people how to live healthier lives" (p. 288).

Publisher's summary: "Heart disease remains the leading cause of death in this country for men and women. And while we spend millions of dollars each year developing treatments, traditional procedures fail patients by focusing only on the symptoms of the disease, not the underlying causes. In *Prevent and Reverse Heart Disease,* Dr. Caldwell B. Esselstyn, Jr., a former surgeon, researcher, and clinician at the Cleveland Clinic, challenges conventional cardiology by posing a compelling, revolutionary idea–that we can, in fact, abolish the heart disease epidemic by changing our diets.

"The proof is in the incredible results of the patients who have followed Dr. Esselstyn's ground-breaking program. The men and women in his twenty-year nutritional study–the most comprehensive study of its kind–came to him with advanced coronary disease. Despite the aggressive traditional treatment they received-including bypasses and angioplasties–a number had been told by their cardiologists that they had less than a year to live. Within months of following a plant based, oil free diet, their angina symptoms eased, their cholesterol levels dropped significantly and they experienced a marked improvement in blood flow to the heart. Twenty years later they remain free of symptoms. Drawing on the results of this revolutionary study and his ongoing work with patients all over the country, Dr. Esselstyn convincingly argues that plant based, oil free nutrition can not only prevent and stop the progression of heart disease, but also reverse its effects.

"Furthermore, it can eliminate the need for expensive and invasive surgical intervention except in acute emergencies, no matter how far the disease has progressed. Prevent and Reverse Heart Disease explains the science behind these dramatic results, and offers readers the same, simple plan that has changed the lives of Dr. Esselstyn's patients forever. In addition, the book offers more than 150 delicious recipes developed by Ann Crile Esselstyn, that the Esselstyns and their patients have enjoyed for years.

Clearly written and backed by irrefutable scientific evidence, startling photos of angiograms and inspiring personal stories, this book will empower readers to take charge of their heart health. It is an important call for a paradigm shift in heart disease therapy."

About the author: Caldwell Blakeman Esselstyn Jr., M.D., (born December 12, 1933) is an American physician, author, and former Olympic rowing champion. His color portrait photo appears on the front dust jacket. Esselstyn graduated from Deerfield Academy and in 1956 graduated from Yale University, where he was a member of Skull and Bones. Caldwell Esselstyn competed at the 1956 Summer Olympics in Melbourne, where he won a gold medal in eights with the American team. On 1 May 1961 his engagement to Ann Crile was announced by the *New York Times;* they were married on 18 June 1961. 1961–He received his M.D. from Western Reserve University. 1985–He began his famous study at the Cleveland Clinic of 22 patients who had previously had heart attacks. 1988–He and his family began to move toward a plant-based diet. Dr. Esselstyn and his wife, Ann Crile Esselstyn, have mostly followed a vegan diet since the mid-1980s. He attributes the success of his 12 year trial with heart patients to low mean levels of both total cholesterol (145 mg/dl) and LDL cholesterol (82 mg/dl). In 2010 after cardiac surgery, former U.S. president Bill Clinton mostly adopted the plant-based diet recommended by Caldwell Esselstyn, Dean Ornish and T. Colin Campbell. Source: Wikipedia, at Caldwell Esselstyn. May 2011.

Dr. Esselstyne and Ann Krile were married on 18 June 1961 in Cleveland, Ohio. They have four grown children: Rip (born in 1963), Ted (1964), Jane (1965), and Zeb (1967). Three are married, and Dr. Esselstyn and Ann have six grandchildren (p. 288). In 1988 the Esselstyn family joined together in moving toward eliminating dairy products, meats, and oils from their diet. Their eldest son, Rip, became an all-American swimmer at the University of Texas at Austin; after graduating he was a professional triathlete for 11 years. Today (2011) he is a teacher and writer about diet and health–advocating a "plant-strong diet." Their second son, Ted, set a 200-yard backstroke record at Yale University, and their daughter, Jane, won the Big Ten 200-yard backstroke championship while attending the university of Michigan. Their youngest son, Zeb, as an Ohio high school junior, was the state butterfly swimming champion. And Ann, now in her early seventies, runs for 40 to 70 minutes almost every day. Clearly their plant-based diet provides them with plenty of strength and energy (p. 78-79). Address: M.D., former surgeon, researcher and clinician, Cleveland Clinic, Ohio–for 35+ years.

12928. Esselstyn, Caldwell B., Jr. 2007. Prevent and reverse heart disease: the revolutionary, scientifically proven, nutrition-based cure (Continued, Part II). New York, NY: Avery. A member of the Penguin Group (USA) Inc. xii + 308 p. Plus 8 unnumbered pages of plates. Foreword by T. Colin Campbell, Ph.D. Illust. (some color). Index. 24 cm. [27 ref]
• ***Summary:*** Continued: Basic biography: Caldwell Esselstyn, M.D., received his B.A. from Yale University and his M.D. from Western Reserve University. In 1956 he received a gold medal as a member of the Olympic rowing team. He trained as a surgeon at the Cleveland Clinic and at St. George's Hospital in London. In 1968 as an army surgeon in Vietnam he was awarded the Bronze Star. Dr. Esselstyn has been associated with the Cleveland Clinic since 1968, having served as staff president and on its board of governors. He chaired the Clinic's Breast Cancer Task Force. In 1991 Dr. Esselstyn served as president of the American Association of Endocrine Surgeons, and in the fall of 1991 he organized "The First National Conference on the Elimination of Coronary Artery Disease" in Tucson, Arizona. He invited Dr. T. Colin Campbell to speak at this conference. In 2005 Dr. Esselstyn became the first recipient of the Benjamin Spock award for compassion in medicine. His website is heartattackproof.com.

Heart disease is the leading cause of death of men and women the United States, with more than 500,000 deaths each year. Three times that number suffer a known heart attack and 3 million more have a "silent heart attack." Dr. Esselstyn believes this is all unnecessary. There doesn't have to be any heart disease at all. He calls it a "toothless paper tiger that need never ever exist. And should it exist, it need never ever progress." His views are based on the global epidemiology of this disease and also on his research. When you look globally, there are still cultures on this planet where heart disease is virtually unknown–the rural Chinese, the Papua Highlanders in Papua New Guinea, the people in Central Africa, and the Tarahumara Indians of northern Mexico (known for their long-distance running). This is largely because, by culture, heritage, and tradition, they consume a largely plant-based diet that does not contain any of the "atherosclerotic lynchpins," which are dairy products, meat, and processed oils. By contrast, in the USA, by age 12 our children begin to have thickening of those major carotid arteries which go to our brain. If they live until age 20 and they happen to die in combat, as was known in Korea and Vietnam 40-50 years ago, roughly 80% of these young G.I.s already have gross evidence of coronary artery disease–visible even without a microscope. A more recent study, done in 1999, of those who happened to die of accidents, homicides, and suicides, between the ages of 16 and 34, found that 100% of these people have coronary artery disease. This is the background of why Dr. Esselstyn wanted to do research in this area. His research started in about 1985 and he has concluded that the major cause of coronary artery disease is the standard American diet.

A sampling of the many priceless gems in this book: "Can I change?" It is difficult, but "The key is to remember

© Copyright Soyinfo Center 2013

that the rewards are greater than the frustration... after 12 weeks of eating no animal foods, dairy, or added oils, you lose your craving for fat" (p. 76).

The typical Western diet gets 37% of its calories from fat. This diet recommends about 10% of the calories from fat–which is ideal for good health (both heart disease and cancer). And this diet provides about 50-70 gm of protein a day (p. 77).

"Will I have enough strength and energy?" "The truth is that excessive consumption of animal protein badly weakens our bodies. Among other things, it accelerates the loss of calcium through the kidneys, leading to the brittle, porous bone condition called osteoporosis." "And look at the examples that nature offers." The elephant, the bull, etc. They eat a plant-based diet–as do many great athletes, such as Carl Lewis (1991) and many others.

"What if my cholesterol won't go below 150 mg/dL? A tiny minority of the population, no more than 5% of all Americans, has an inherited cholesterol disorder that makes it impossible for them to reduce total cholesterol below 400 to 500 mg/dL, even with careful nutrition. Such patients need to be monitored by highly qualified cholesterol specialists" (p. 79).

A plant-based diet should contain "large quantities of natural antioxidants, which prevent the body from oxidizing LDL cholesterol into its most dangerous, artery-clogging form."

"Don't my genes predetermine whether or not I'll get heart disease?" The "answer is an emphatic NO. If you maintain a cholesterol level under 150 mg/dL, or LDL under 80 mg/dL, you–and all other relatives who inherited these genes–will be free of heart disease" (p. 80).

"Why can't I have 'heart-healthy oils?" The idea of heart-healthy oils and the Mediterranean Diet was based on the Lyon Diet Heart Study, and was widely praised by the media and in books. But: "By the end of the study, nearly four years after its start, fully 25% of the subjects on the Mediterranean diet–one out of four–had either died or experienced a new cardiovascular event. I feel these are wretched results for a nonmalignant disease. We can do much better." "In fact the medical literature is filled with evidence of the harmful effects of monounsaturated oils" as is Dr. Esselstyn's personal experience (p. 84-86).

"T. Colin Campbell, the Cornell University professor who directed and cowrote *The China Study,* observes that there are 'two worlds' of medicine–two radically different visions of how to approach health. 'One consensus favors drugs as the cure, the other favors food,' he explains; Western medicine, for the most part, has chosen drugs. As I see it, we got it wrong.' I agree."

Chapter 11, "Kindred spirits," summarizes the pioneering work of some mentioned previously in the "Acknowledgments" section of this book: T. Colin Campbell, Nathan Pritikin, Hans Diehl, John McDougall, Dean Ornish (whose program is most similar to Esselstyn's. "Among the wide variety of programs promoting cardiovascular health, his and mine are the only ones I am aware of that are based on peer-reviewed research that demonstrates arrest and reversal of heart disease." Dr. Esselstyn's 12-year study started in 1985; Dr. Ornish's study started in 1986. Dr. Ornish "did not use cholesterol-lowering medication. Like mine, Dr. Ornish's patients had three-vessel coronary heart disease. And Dr. Ornish insisted that, in addition to adopting a plant-based diet, his patients must use relaxation and meditation techniques and participate in a structured exercise program. Finally Dr. Ornish had a control group of patients with similar disease severity, but who followed a traditional program of cardiac care"), Dr. Charles Atwood (a longtime pediatrician with an extremely busy practice, his focus on children was very important [not to be confused with Dr. Robert Atkins of low-carb diet fame]), and Antonia Demas.

"And yet with all the research that demonstrates the wisdom and benefits of plant-based nutrition, its growing ranks of opponents still face a formidable array of opponents from the titans of the animal food industry to the medical establishment itself. My colleague Dean Ornish succinctly sums up the dilemma faced by those of us who believe in this healthy way of eating. 'I don't understand why asking people to eat a well-balanced vegetarian diet is considered drastic, while it is medically conservative to cut people open.' Well said" (p. 93). Address: M.D. former surgeon, researcher and clinician, Cleveland Clinic, Ohio–for 35+ years.

• ***Summary:*** The entry for soy sauce states: "kecap [a sauce] Chin. Cc ke chiap (var. kicap)."

Note 1. Cc refers to the Hokkien Chinese sub-dialect Chiangchiu / Chiang-chiu, Changchow. Two Chinese characters are shown: The first refers to a type of fish; the second means juice, liquid or soup.

Note 2. Today this sub-dialect is romanized in pinyin as "Zhangzhou dialect." It is a Hokkien dialect originating from southern Fujian province (in southeast China), in the area centered around the city of Zhangzhou. Among the Taiwanese who migrated from Fujian province starting in the 17th century, 35.1% were originally from Zhangzhou whereas 44.8% were from Quanzhou. The Zhangzhou dialect has an intelligibility of over 90% with other dialects of Hokkien such as Amoy and Quanzhou. The Zhangzhou dialect is often simply called Hokkien or Minnan (Source: Wikipedia at Zhangzhou dialect, July 2012).

Note 3. The DVD-ROM contains a facsimile edition of: *A Chinese-English dictionary of the vernacular or spoken language of Amoy...,* by Rev. Carstairs Douglas, together with: *Supplement to dictionary of the vernacular or spoken language of Amoy,* by Thomas Barclay. Published in 1899.

• ***Summary:*** Translated from the English by Michel Chevrier. Address: London, England.

12941. Yeager, Selene. 2007. The doctor's book of food remedies: the latest findings on the power of food to treat and prevent health problems–from aging and diabetes to ulcers and yeast infections. Fully revised and updated. [Emmaus, Pennsylvania]: Rodale Inc. Distributed to the trade by Macmillan. xii + 707 p. Index. 24 cm. 1st ed. 1998.

• ***Summary:*** The chapter titled "Soy foods: Help for weight loss" (p. 579-83) explains that in the late 1990s the media strongly promoted soy, made it into a sort of miracle food or cure, and rode the wave up, then after about 2005 when scientists found that soy was not a miracle food, the media decided that "The party's over," and they rode the wave down. In 2005 soy foods faced big setbacks, when a U.S. government panel said there wasn't clear evidence that soy could guard against heart disease, ease menopause, or protect bones from osteoporosis. "In response the National Institutes of Health (NIH) said it would stop paying for new soy studies." That fall, the soyfoods industry withdrew a petition that asked the FDA to permit food labels that claim that soy protein helps prevent cancer.

This chapter explains: "But flash forward to 2006, where one dour headline–'Soyonara–tells the sad tale. Has this promised [by the media] superfood become a has-bean?" Maybe not."

It proceeds to give a fair assessment of what current science says can and cannot be expected of soyfoods. Cannot (by itself): Significantly reduce cholesterol. Protect against breast or prostate cancer. Build bones or reduce osteoporosis. Cool hot flashes or reduce menopause symptoms. This is followed by a long list of its many well-known health benefits. "That's good news because soy seems to be here to stay." It has gone mainstream, and sales of soy foods in the United States rose dramatically from $300 million in 1992 to $3.9 billion by 2004–a 13-fold increase in 13 years.

The section titled "The joy of soy" gives brief definitions of some of the most popular soyfoods: Edamame, soy nuts, meat substitutes [sic, alternatives], soy flour (made from roasted, ground soybeans), soy milk, tempeh, and texturized soy protein.

A sidebar titled "Doctor's top tip" recommends eating soy (such as edamame, tofu, soy nuts, and some soy burgers) in place of foods high in animal fats. The head of the American Heart Association's nutrition committee reminds us: "Heart disease is a major problem–using soy protein instead of animal protein is still a win."

Dr. Mark Messina, a prominent soy researcher, says there are many reasons to add soy to your diet from just a basic nutritional point of view: (1) Soyfoods such as tofu or tempeh are high quality, low-cost, versatile sources of protein. (2) A half cup of tofu, curded with calcium sulfate, can provide more than 25% of the Daily Value (DV), plus a significant amount of iron. (3) Soyfoods contain little of the artery clogging saturated fats found in meat and many dairy products.

© Copyright Soyinfo Center 2013

Contains recipes for: Soy fruit smoothie (with vanilla-flavored soy beverage, p. 583). Mocha Tofu Pudding (with 2 packages {10½ ounces each} silken tofu and 2/3 cop packed light brown sugar).

The index contains 34 entries for soy, 13 for tofu, 4 for tempeh, 3 entries for miso, 2 entries each for edamame and for soy milk, 1 entry each for soy nuts, soy yogurt, and textured soy protein.

Note: This book is not vegetarian.

12942. **Product Name:** [Soy Milanesas].
Foreign Name: Milanesas de Soja.
Manufacturer's Name: Soyana.
Manufacturer's Address: M.T. de Alvear 1754, San Martin, Provincia de Buenos Aires, Argentina.
Date of Introduction: 2007?
Ingredients: Organic soybeans, texturized soy protein, wheat flour, wheat gluten, batter (rebozador; pan rallado), salt, garlic powder, dehydrated parsley, soy sauce, natural flavors.
Wt/Vol., Packaging, Price: 350 gm.
How Stored: Refrigerated.
New Product–Documentation: Visit with Carlos Planes at Soyinfo Center in Lafayette, California. 2012. Feb. 23. Documents related to this tofu product he brought and gave to Soyinfo Center: Label for this soy product. 12 x 16 cm. Red, white and black on green. Carlos says: Milanesas is the single most popular food in Argentina–like burgers in the United States. "Mila" comes from Milan–the city in northern Italy. The traditional main ingredient in Milanesas is beef. Soy Milanesas have been on the market in Argentina since the 1970s. A very big Argentinian food company named Vegelex now makes soy milanesas, and may have been making them since the 1970s. Not long after Carlos launched his product, he switched to making and private labeling it for a company named Molinos Rio de la Plata. It is sold as part of their "Granja del Sol" line of products. Containing defatted soy flour, corn meal and wheat, it is fried. This company is very good at selling this product. Their basic business is making noodles, like Vegelex; so the two companies have competing soy Milansas products. Today there are hundreds of different makers of "Milansas de soja" in Argentina! But many are small companies.

12943. Brown, Lester R. 2008. Feeding eight billion well (Document part). In: Lester R. Brown. 2008. Plan B 3.0: Mobilizing to Save Civilization. New York and London: W.W. Norton & Co. xiv + 400 p. See p. 175-191. Chap. 9. Jan. 16. [65 endnotes]
• ***Summary:*** The section titled "Producing protein more efficiently" (p. 183-89) notes that about 37% of the world's grain harvest is used to produce animal protein. World meat consumption has increased from 44 million tons in 1950 to about 240 million tons in 2005; average yearly consumption per person has more than doubled from 17 kg to 39 kg (86 lb). "In every society where incomes have risen, meat consumption has too, perhaps reflecting a taste that evolved over 4 million years of hunting and gathering."

Fortunately consumers are shifting from beef and pork to poultry and fish, "sources that convert grain into protein more efficiently." Health concerns among more affluent consumers are reinforcing this shift.

The efficiency with various animals convert grain into live weight varies widely. "With cattle in feedlots, it takes roughly 7 kilograms of grain to produce a 1-kilogram gain in live weight." For pork the figure is over 3 kg, and for poultry its just over 2. There are two main types of farmed fish: carnivores (salmon, shrimp) and herbivores (carp, tilapia, catfish, which dominate worldwide aquaculture). For herbivorous farmed fish, the figure is less than 2.

Pork (most of it produced in China) is now the most popular meat worldwide; it passed beef in 1979. In 1995 poultry passed beef worldwide to move into second place behind pork. From 1990 to 2006, pork production worldwide has grown by 2.6% a year, poultry by nearly 5% a year, and aquaculture by more than 9% a year. In aquaculture lies "the great growth potential for efficient animal protein production..." China, the world leader in aquaculture, "accounts for an astounding two-thirds of global fish farm output." "Over time, China has also developed a fish polyculture using four types of carp that feed at different levels of the food chain... These four species thus form a small ecosystem, with each filling a particular niche" (p. 184). China is the first major country where production of fish and shellfish by aquaculture has surpassed poultry production. "China's aquaculture is often integrated with agriculture, enabling farmers to use agricultural wastes, such as pig or duck manure, to fertilize ponds, this stimulating the growth of plankton on which the fish feed."

"When we think of soybeans in our daily diet, it is typically as tofu, veggie burgers, or other meat substitutes. But most of the world's fast-growing soybean harvest is consumed indirectly in the beef, pork, poultry, milk, eggs, and farmed fish that we eat. Although not a visible part of our diets, the incorporation of soybean meal into feed rations has revolutionized the world feed industry, greatly increasing the efficiency with which grain is converted into animal protein.

"In 2007, the world's farmers produced 222 million tons of soybeans–1 ton for every 9 tons of grain produced. Of this, some 20 million tons [9%] were consumed directly as tofu or meat substitutes. The bulk of the remaining 202 million tons [91%], after some was saved for seed, was crushed in order to extract 37 million tons of soybean oil, separating it from the highly valued, high-protein meal."

"The world's three largest meat producers–China, the United States, and Brazil–now all rely heavily on soybean meal as a protein supplement in feed rations." This use of

© Copyright Soyinfo Center 2013

soybean meal in animal feeds "helps explain why the share of the world grain harvest used for feed has not increased over the last 20 years even though production of meat, milk, eggs, and farmed fish has climbed. It also explains why world soybean production has increased nearly 14-fold since 1950" (p. 186).

"Moving down the food chain (p. 188-89):... In every society where incomes rise, people move up the food chain, eating more animal protein as beef, pork, poultry, milk, eggs, and seafood... The shift to more livestock products as purchasing power increases appears to be universal."

We use less energy when we move down the food chain. A "plant-based diet requires roughly one-fourth as much energy as a diet rich in red meat. Shifting from a diet rich in red meat to a plant-based diet cuts greenhouse gas emissions as much as shifting from a [Chevrolet] Suburban SUV to a [Toyota] Prius." Address: President, Earth Policy Inst., 1350 Connecticut Ave., N.W., Suite 403, Washington, DC 20036. Phone: 202-496-9290.

12944. Agranoff, Jonathan. 2008. What has happened to the 'Tempeh Nation'? Special report. *Jakarta Post* (*The*) (*Indonesia*). Jan. 18. p. 21.
• ***Summary:*** It has been a long time since President Soekarno try to rally support among the poor "with his slogan *Kita bangsa Indonesia, jangan mau menjadi bangsa tempe* (We are the nation of Indonesia, don't let us be a tempeh nation), referring to tempeh as the food of the poor.

"However, Soekarno ate it. Soeharto ate it and nearly 200 million people eat it daily."

On Monday the tempeh and tofu makers of Indonesia demonstrated (mainly in Jakarta, but also in parts of Java) then subsequently stopped production. This important demonstration must be taken seriously.

For "a short period canned tempeh was exported to the U.K."

There are two sidebars with this article: (1) "Tempeh facts," includes a brief "History of tempeh" in Indonesia, Europe, the United States, and developing countries. A flow chart shows 8 main steps in the tempeh production process. And a table gives the nutritional composition of tempeh. (2) "Improving nutrition through tempeh" discusses the importance of tempeh to nutrition and health in Indonesia.

A large photo shows a long line of vehicles, carrying and tempeh and tofu their banners, as they demonstrate on Jan. 14. in Jakarta in front of the Presidential Palace against the high price of soybeans in Indonesia. Address: Contributor, Jakarta.

12945. Ness, Carol. 2008. House organic crowned top tofu: Taster's choice. *San Francisco Chronicle.* Jan. 23. p. F2.
• ***Summary:*** For tasting they chose 15 brands of firm tofu, served plain. The ranking was: House organic 79 ($2.49 for 14 oz at Andronico's). House 74 (non-organic, $1.69 for 14 oz). Soy Deli organic 73 ($1.99 for 12 oz). Whole Foods 385 67 ($0.99 for 14 oz), Azumaya 66 ($1.79 for 14 oz). Trader Joe's organic 64. Wo Chong 57. White Wave 55. Soy Fresh 40. Golden Gate 38. Soga (extra firm) 38. Mori Nu (box, silken) 36. Nasoya 21. Wildwood 20. Small Planet 2. Address: Chronicle staff writer.

12946. **Product Name:** Wildwood Tofu-Veggie Burgers (Organic) [Original].
Manufacturer's Name: Pulmuone Wildwood, Inc.
Manufacturer's Address: Fullerton, CA 92833.
Date of Introduction: 2008. January.
Ingredients: Jan. 2008: Tofu* (filtered water, soybeans*, nigari {magnesium chloride, a natural firming agent}), vegetable oil* (sunflower or canola), yellow onion*, carrot*, kale*, tapioca starch*, sea salt, garlic powder*. * = Organic.
Wt/Vol., Packaging, Price: 6.5 oz (184 gm) vacuum packed. Package of two retails for $2.69 (2008/01 Lafayette, California).
How Stored: Refrigerated.
New Product–Documentation: Product with Label purchased at Trader Joe's, Lafayette, California. 2008. Jan. 16. Green, tan, red, orange, and blue. Front panel: "2 ready-to-enjoy burgers. 25% organic vegetables." "100% U.S. grown organic soybeans." USDA Organic logo. Certified organic by Oregon Tilth. www.wildwoodfoods.com. "Dairy free, gluten-free & soy-isolate free, organic, vegan."

12947. **Product Name:** Liquid nigari (Bittern).
Manufacturer's Name: Natural Import Co. (Importer). From Japan.
Manufacturer's Address: 9 Reed Street, Biltmore Village, NC 28803. Phone: 828-277-8870 or 1-800-324-1878.
Date of Introduction: 2008. February.
Ingredients: Seawater.
Wt/Vol., Packaging, Price: 5 oz plastic bottle or ½-gallon container.
How Stored: Shelf stable.
New Product–Documentation: Talk with Bruce Macdonald. 2008. July 1. His company began selling this product in Feb. 2008. They import it from Ishigaki Island, located 430 km southeast of Okinawa, Japan. The entire island, surrounded by pristine coral reefs, is a natural sanctuary and protected from development. It is registered for a "Ramsar Convention on Wetlands"–signed in Ramsar, Iran in 1971 for the conservation and wise use of wetlands. The company started making natural seasalt in 1996 with 5 staff members. They now have a staff of 20 people, all professional salt-masters. They pipe up the sea water in bamboo pipes from 20 meters depth in the midst of the coral reefs. Then they boil it slowly for 3 days until the density is 28%, which Ishigaki Seasalt starts to appear. During the drying process, which is patented, the temperature never exceeds 90ºC (below boiling). No refined salt or chemicals

© Copyright Soyinfo Center 2013

are added. From this the liquid nigari (called bittern) is made–but Bruce is not sure how. They are a environmental activist company. Long ago Bruce visited Robert Salazar, who made Muramoto seasalt; he put natural salt in a sack and let the nigari drip off.

A diagram from the company shows that the following steps are used in making sea salt and nigari: Sea water > filter > concentration > separation > natural sea salt goes off. Check density of liquid > Filter 100 mesh > weighing > packing in bottles. Note: This process could be reverse osmosis or ultrafiltration.

12948. Shurtleff, William; Aoyagi, Akiko. 2008. Le livre du tofu: La source de protéines de l'avenir–dès maintenant! [The book of tofu: Protein source of the future–now! Translated from the English by Nathalie Tremblay]. Varennes, Quebec, Canada: Éditions AdA Inc. 430 p. Illust. by Akiko Aoyagi. Index. Feb. 28 cm. [53 ref. Fre]

• ***Summary:*** Contents: Preface. Acknowledgements. Part I. Tofu: Food for mankind. 1. Protein East and West. 2. Tofu as a food. 3. Getting started. Our favorite tofu recipes (lists about 80 recipe names for each of the different types of tofu, plus soymilk, yuba, whole soybeans, gô, okara, and curds; very favorites that are also quick and easy to prepare are preceded by an asterisk).

Part II. Cooking with tofu: Recipes from East and West (500 recipes). 4. Soybeans: History, cooking with whole dry soybeans, roasted soybeans (*iri-mame*), fresh green soybeans (*edamame*), kinako (roasted full-fat soy flour), soybean sprouts (*daizu no moyashi*), natto (sticky fermented whole soybeans, with "gossamer threads"), tempeh (fermented soybean cakes), Hamanatto and Daitokuji natto (raisin-like natto), modern western soybean foods (natural soy flour [full-fat], soy granules, defatted soy flour and grits, soy protein concentrates, soy protein isolates, spun protein fibers, textured vegetable protein (TVP), soy oil products). 5. Gô (*purée de fèves de soya fraîches;* a thick white puree of well-soaked uncooked soybeans). 6. Okara or Unohana. 7. Curds and whey (*Caillé et petit-lait*). 8. Tofu (includes history, and preparatory techniques: Parboiling, draining, pressing {towel and fridge method, slanting press method, sliced tofu method}, squeezing, scrambling, reshaping, crumbling, grinding).

9. Deep-fried tofu (*Tofu frit*)*:* Thick agé or nama agé (*Agé épais {côtelettes de tofu frit}*), ganmo or ganmodoki (*burgers de tofu frit;* incl. *hiryozu / hirosu*), agé or aburagé (*pochettes de tofu frit;* incl. "Smoked tofu," p. 197). 10. Soymilk (*Lait de soya*). 11. Silken tofu (Kinugoshi ou tofu soyeux) ("*Kinu* means 'silk'; *kosu* means 'to strain'; well named, kinugoshi tofu has a texture so smooth that it seems to have been strained through silk"). 12. Grilled tofu (*Tofu grillé*). 13. Frozen and dried-frozen tofu (*Tofu surgelé et tofu surgelé séche*). 14. Yuba (incl. many meat alternatives such as Yuba mock broiled eels, Buddha's chicken, Buddha's ham, sausage). 15. Tofu and yuba in China, Taiwan, and Korea (incl. Savory tofu {*wu-hsiang kan*}*;* see p. 258 for illustrations of many meat alternatives, incl. Buddha's fish, chicken, drumsticks, and duck, plus vegetarian liver and tripe, molded pig's head, and molded ham). 16. Special tofu (*Tofu particuliers*).

Part III–Japanese farmhouse tofu: Making tofu for more and more people. 17. The quest. 18. Making community tofu. 19. The traditional craftsman. 20. Making tofu in the traditional way. Appendices: A. Tofu restaurants in Japan (many are vegetarian). B. Tofu shops in the West (Directory of 43 shops in the USA, 3 in Europe {Germany, Austria, Belgium, Denmark, Finland, France, Ireland, Italy, Netherlands, Portugal, Spain, Switzerland, UK, Wales}, and 3 in Latin America {Brazil, Colombia, El Salvador, Guatemala, Mexico}). C. People and institutions connected with tofu. D. Table of equivalents. Bibliography. Glossary. Index. About the authors (autobiographical sketches; a photo shows Shurtleff and Aoyagi, and gives their address as New-Age Foods Study Center, 278-28 Higashi Oizumi, Nerima-ku, Tokyo, Japan 177). Sending tofu in the four directions.

Pudding recipes include: Rice pudding with gô and apple (p. 76, incl. 2 cups soymilk). Tofu chawan-mushi (p. 147; Steamed egg-vegetable custard with tofu). Tofu fruit whips (p. 148). Tofu rice pudding (p. 150, incl. 1 cup soymilk). Tofu custard pudding (p. 152). Soymilk custard pudding (p. 208). Brown rice pudding (p. 208, with 2 cups soymilk). Soymilk chawan-mushi (p. 209). Chawan-mushi with yuba (p. 249).

Dessert recipes include: Tofu whipped cream or yogurt (p. 148; resembles a pudding or parfait). Tofu ice cream (p. 149, with chilled tofu, honey, vanilla extract and salt). Banana-tofu milkshake (p. 149). Tofu cream cheese dessert balls (p. 149). Tofu icing (for cake, p. 149). Tofu cheesecake (p. 150). Tofu-pineapple sherbet (p. 151). Also: Soymilk yogurt (cultured, p. 205). Healthy banana milkshake (p. 206). On p. 160 is a recipe for "Mock tuna salad with deep fried tofu." Address: Soyinfo Center, P.O. Box 234, Lafayette, California 94549 USA. Phone: 925-283-2991.

12949. Ishige, Naomichi. 2008. Re: Early history of tataki natto, itohiki natto, and natto-jiro in Edo city, Japan. Letter (e-mail) to William Shurtleff at Soyinfo Center, March 16. 2 p. [Eng]

• ***Summary:*** "Tataki natto is minced itohiki natto, chopped with a cooking knife.

"In about the 1830s, eating granulated [regular] itohiki natto started to become popular in central Edo city (today's Tokyo). When people had granulated itohiki natto, they stirred it and put it on hot rice with soy sauce. Before that period, itohiki natto was commonly eaten as natto-jiru, which was a kind of miso soup with tataki natto, greens, and tofu. Because of this eating style, peddlers started to sell tataki natto with greens and tofu so that people could make their

© Copyright Soyinfo Center 2013

own natto jiru more easily and inexpensively.

Note: This is the earliest English-language document seen (Jan. 2012) that mentions or describes "Tataki natto."

"Natto-jiru was the soup for the winter season. Starting in about the 1830s in Edo city, granulated [regular] itohiki natto began to be sold instead of tataki natto. Once people got familiar with eating granulated itohiki natto with soy sauce, peddlers started to sell itohiki natto even in the summer.

"In the well-known book *Morisada Mankô,* the author, KITAGAWA Morisada, compared the way of life in Edo, Kyoto, and Osaka in the late Edo period. He wrote that natto sellers disappeared from Kyoto and Osaka in the late Edo period. Thus, people who wanted to eat natto in the region needed to make it by themselves. Even now, although natto is popular in Kanto region, which developed around Edo city, people in Kansai region, to which Kyoto and Osaka belong, do not eat natto so much.

"I do not know any record by which the origin of tataki natto can be traced. However, it is thought that tataki natto was made from olden times as one of the basic ways of eating natto.

"Today, natto-jiru is not popular for Japanese, so tataki natto is usually not sold. If you want to have natto-jiru, you need to mince natto by yourself." Address: National Museum of Ethnology, Osaka, Japan.

12950. *SoyaScan Notes.* 2008. Dates of earliest documents seen that mention non-fermented soyfoods used as human food (Overview). March 17. Compiled by William Shurtleff of Soyinfo Center.

• ***Summary:*** Whole dry soybeans, ground or mashed to a paste after boiling, or ground raw with water to a fresh puree or slurry (Including Japanese *gô*)*:* 636 BCE–China.

Whole Dry Soybeans (Boiled): 360 BCE, China.

Soy sprouts: 100 CE (AD) China.

Tofu: 965 CE China.

Green vegetable soybeans or edamame: 1275 Japan.

Roasted soy flour: 1301 China.

Soymilk: 1866 France.

12951. Golbitz, Peter. 2008. Sale of Soyatech, major contributions, future plans. Part II (Interview). *SoyaScan Notes.* March 24. Conducted by William Shurtleff of Soyinfo Center.

• ***Summary:*** Continued: (1b) Soyatech's electronic newsletter is a way for the company to have a presence with its customers every day. The last printed, mailed issue of *Bluebook Update,* Soyatech's quarterly newsletter, appeared in Dec. 2003 (Vol. 10, No. 4). Thereafter the newsletter moved to an electronic online format and was renamed eNews Daily and Weekly.

(1c) Soyfoods conferences: Soyatech did a series of about ten of these jointly with IQPC and IBC. Peter was asked by the organizers to helped design the agenda, made sure the topics were relevant, and help promote the event (make mailing lists etc. available) to ensure satisfactory attendance. It was a contract for services agreement; Soyatech was paid a flat fee and/or a "piece of the gate" (percentage of income from attendance).

(1d) Market studies: These were a way for Soyatech to benchmark where the soy industry was in any particular year, and measure the value being added. For Soyatech it was a great way to promote the company's expertise in a particular area. Soyatech has done about 10 syndicated studies–7 soyfood reports, one on whole soybeans for food use and another on soy protein. They are currently in production with 2 more. (1e) Proprietary consulting: For one customer such as an equipment supplier, a technology provider, a seed supplier, a processor, a food company, etc. It crossed the whole value chain. People who wanted to understand what they had or what the size of the market was. Today Soyatech does 15-20 medium- to large-size projects a year. For example, in April 2006, the sixth report produced by a partnership of Soyatech and SPINS was released. Having a good staff is one key to doing all this.

Peter resigned as president of Soyatech on 17 Jan. 2008 and it became effective on March 7; his role is now "Founder and Senior Advisor." Peter is actively working with the company; he has three projects on which he is consulting with HighQuest Partners, helping to find and provide information. The Soyatech office in Bar Harbor, Maine, is fully staffed and more active than ever. Keri Hayes is now publisher of the Bluebook and Joe Jordan is general manager of content and events. So HighQuest has promoted the people at Soyatech rather than bringing HighQuest people into the Bar Harbor office. Peter believes that this is the best arrangement for both Soyatech and HighQuest. He is extremely happy with the way things have worked out, and he has a tremendous amount of respect for the vision that they had and for their respect for what Soyatech was and is. "They've done a great job. More than anything else, I am grateful." People from Boston come up regularly, and are working very effectively with the Soyatech staff. Soyatech has more of a horizontal / egalitarian management chart than most companies. In short, the merger seems to be working out really well. Peter plans to meet Keri and Joe today to discuss upcoming events and Bluebook layout issues. Peter thinks that it is unlikely that HighQuest will shut down the Bar Harbor office and consolidate it into any of their other offices. The Boston office is also headquarters for a number of other businesses that HighQuest operates. HighQuest has five consultants in their Boston office.

(2) Peter's work with the Soyfoods Association of North America (SANA): When Peter left as president of Soyatech, he resigned his seat on the SANA board, because it is a company board seat. Although he could stay on because he is still an advisor to Soyatech, he decided to let Philippe de

© Copyright Soyinfo Center 2013

Lapérouse take the seat. Another reason for the decision to step down is that, during the past 4-5 months, Peter's work with the World Soy Foundation, has taken quite a bit of his time.

(3) Peter's work with WISHH (the World Initiative for Soy in Human Health). Peter became involved with WISHH in 2003 after Soyatech considering forming its own foundation; Peter realized that it made more sense to work with an established group. WISHH is now a committee of the American Soybean Association (ASA); it no longer has its own board. That is a recent change; for more information contact Jim Hershey, who is executive director of WISHH. Peter works with WISHH as a volunteer and ex officio member. He has been to Africa (South Africa, for 1 week each trip) 3 times so far, in 2005, 2006 and 2007. Soyatech helped to raise the $750,000 needed to establish the "Soy in Southern Africa Alliance"; Sarah Day from Soyatech's office just recently went to Ghana and Nigeria for WISHH as a researcher / consultant.

On the first several trips to South Africa, Peter met with companies to advise them on their soy sourcing, processing, marketing, and to generally help them solve their problems and improve their operations. On the most recent trip, when he visited the SoyaCow and SoyaGoat training center in KwaZulu-Natal, the easternmost province of South Africa, he helped them process soymilk using these two mechanical soymilk making machines, and gave several lectures on soymilk processing, flavorings, the types of technologies available, and to help develop that industry further. WISHH, whose objective is market development for foods and ingredients made from U.S. soybeans, is working to create fertile ground through education of the benefits of soy products in the human diet. The focus is on foods, but soy oil and meal are not excluded. WISHH is trying to get the SoyaGoats into communities such as orphanages, feeding kitchens, etc. and to train people to make soymilk using this technology. There are a number of large soymilk companies in South Africa; they generally sell soymilk in Tetra Pak cartons that is too expensive for most people. By using a SoyCow or VitaGoat the people drink fresh soymilk and omit the packaging, which is more than half of the cost. In 2007 Malnutrition Matters of Ottawa, Canada, (Frank Daller, president) got a grant from the World Bank to place about 16 VitaGoats in India; they hope to feed 4,000 to 5,000 children. Daller developed the VitaGoat using simple, inexpensive parts suited for Third World villages without electricity. "We're still just beginning in developing countries but there is a tremendous amount of interest." WISHH is also working with a Rotary group, and together they are sending SoyCows and soybeans, to Guatemala. In Peter's experience, the people in Africa loved the fresh soymilk made using relatively inexpensive technology. He found there was very little difference in the taste and appearance of the soymilk made by the low-tech bicycle-powered VitaGoat and the electric high-tech cold-water-grind SoyCow. "We just sent Sarah Day, research analyst in the Bar Harbor Office, to Nigeria and Ghana for a week in February." Two years ago Peter helped to raise $250,000 from industry for WISHH; WhiteWave and Solait were the two largest contributors. WISHH added $100,000, and that $350,000 was matched by USAID making a total of $700,000 for the South African project, which including establishing the center and running short courses in soymilk processing and teaching seminars.

A remarkable gentleman named Henry Davies (a white Afrikaner businessman) has set up this training center in Bergville, KwaZulu-Natal. It is dedicated to teaching and training people about soyfoods. There is a full SoyaCow in the tiled processing room, which is really a pilot plant. There is also a meeting and lecture room. There was an extrusion plant that made pet food and textured soy flour.

(4) Peter's work with the World Soy Foundation (WSF): In March 2007 Peter was elected to the board of directors of WSF; he is also chair of their fundraising committee. WISHH could not be a foundation or a nonprofit organization–such as 501(c)(3)–because part of its agenda was market development. So in late 2006 the Internal Revenue Service (IRS) gave ASA and USB permission to create the World Soy Foundation as a 501(c)(3) charitable foundation, which would disperse funds to various kinds of organizations related to U.S. soybeans. Presently WISHH is their primary beneficiary, but WSF can only give to certain types of WISHH projects. So WISHH is expected to get some of its funding through the American Soybean Association (ASA) and some through the World Soy Foundation. ASA, as well as the big state soybean boards such as Illinois, Iowa and Indiana, are all major contributors to WISHH. The board is comprised of soybean farmers, who provide great leadership, and each of whom sits on their state soybean board. Ellen Feeney from White Wave Foods and Peter have provided some soyfoods industry perspective. White Wave has been a great supporter of both WISHH and the World Soy Foundation.

Future plans: Peter is putting the finishing touches on a home office. He is thinking about some travel ideas, book ideas, and writing projects. He's trying to keep his time open. He cannot consult for the next few years with companies outside of Soyatech and HighQuest Partners–being restricted by a non-compete clause in his contract with HighQuest. Looking at the big picture, Peter says: "If there's some way I can do more for promotion of soy in the world–bring it on!"

Peter recently took a trip to visit Nasoya, Lightlife, and South River Miso Co. "It was wonderful. It was really nice to be welcomed with open arms into all those companies." Their original vision is still alive. So is his.

Peter remarried in 2004 to Mary Cline Golbitz, a lawyer, who has also become a certified yoga teacher. They have three sons; two are Peter's stepsons. Peter has two kids in college (one at Middlebury College in Vermont and one at

© Copyright Soyinfo Center 2013

Northeastern in Boston) and a third about to start college, so he can't afford to retire. He needs a source of income to pay for the kids in college. Peter lives on Mount Desert Island, which is several hundred yards off shore and is connected by one road to the mainland. It is the largest island off the coast of Maine (with a permanent population of about 10,000) and the 2nd largest (after Long Island) on the Eastern Seaboard of the USA. Bar Harbor is on the island. Half the island is occupied by Acadia National Park. Address: Founder and Senior Advisor, Soyatech, Bar Harbor, Maine. Phone: (503) 386-7766.

12952. Welters, Sjon. 2008. Re: Soyfoods in western Europe. Letter to William Shurtleff at Soyinfo Center, March 24. 2 p. Handwritten.

• ***Summary:*** Sjon just returned from a trip to Europe (to visit parents and inlaws) where he collected some soyfoods labels. He "noticed a proliferation of soyfoods, especially of tofu products."

Rinatura is a brand he had not seen before. Also: Rinatura.de, and Rila. They sell tofu sterilized in a glass jar for 2.29 euros for 130 gm drained weight.

Some prices: Yakso Tempeh 1.95 euros for 350 gm. Viana Tempeh 3.49 euros for 200 gm. Viana tofu (nigari) 1.99 euros for 300 gm. Demeter tofu (nigari, calcium sulfate) 2.29 euros for 300 gm in Germany or 2.45 euros for 300 gm in the Netherlands. Provamel tofu (nigari, calcium sulfate) 1.99 euros for 400 gm in Germany or 2.20 euros for 400 gm in the Netherlands. These are both packaged 2 x 200 gm in one box. Taifun tofu (nigari) 1.49 euros for 225 gm in Germany. Taifun tofu (calcium sulfate) 1.99 euros for 400 gm in Germany. Taifun silken tofu (*seiden tofu,* nigari only) 2.59 euros for 400 gm in Germany.

Svadesha.de in Munich is another new name, yet apparently the oldest tofumaker in Germany.

Alpro and Provamel are all over with their soymilk.

12953. Johnson, Katherine Quimby. 2008. Fresh and full of beans: Vermont Soy. From the good earth. *Green Edible Mountains* No. 2. Winter. p. 18-21.

• ***Summary:*** About Vermont Soy, which makes four flavors of soy milk and a firm tofu in Hardwick, Vermont. Their products debuted in the summer of 2007 at the Hardwick and Waitsfield farmers markets. The company grew from the desire of co-owner Todd Pinkham to turn the tempeh he made at home into a commercial venture. Todd's partner is Andrew Meyer. With support and technical assistance from the Innovative Agricultural Initiative developed by the University of Vermont (UVM), about 6 farmers around the state (in Alburh, Highgate, Bridport, Orwell, Glover, and Hardwick) have begun growing food-grade soybeans organically. Extra-firm tofu, Vermont Soy's newest product, is curded with nigari. The soy plant in Hardwick is located next to Meyer's other venture, Vermont Natural Coatings; tofu is made there every Thursday. Tofu recipes are given for: Chinese noodle soup. Pumpkin pie.

Color photos show: (1) James Lewinsky, Sophia Smith, Andrew Meyer, and Todd Pinkham holding a Vermont Soy sign. For more: www.vermontsoy.com. (2) Bright yellow soaked soybeans in a large metal bowl. (3) A thermometer held above hot soymilk. (4) Yoshikawa Maruzen nigari, for curding tofu.

12954. Nutrition & Soja. 2008. Soy: Die pflanzliche Alternative. Tofu, seitan, getreide [Soy: The plant-based alternative. Tofu, seitan, cereal grains (Leaflet)]. Revel, France. 3 panels each side. Each panel: 21 x 10 cm. [Ger]

• ***Summary:*** This stylish German-language color leaflet is from an early French soyfoods company. Front panel: For almost 25 years we have offered a complete line of heat and serve or ready to eat products based on tofu and seitan. They use only organic soybeans grown in southwest France.

The three inner panels start with a vertical cartoon showing how soybeans are made into soymilk and then tofu. From the soymilk comes four lines of eleven products: (1) Biosoy soymilk (aseptically packed) in natural, vanilla, and calcium-enriched flavors. (2) Biosoy desserts (Hazelnut, Vanilla, and Chocolate). (3) Biosoy drinks in Chocolate (2 sizes), Tchai, and Moka. (4) Biosoy creme (like cream but with fewer calories).

From the tofu comes two lines of eight products: (1) Tofinelle meatless sausages in Sesame & Curry, and Mushroom flavors. (2) Six types of *Croque Tofu* (Tofu Croquettes / Burgers) in Provencale, Garlic & Fines Herbes, Mushrooms, Sea Vegetables, Chop Suey, Curry and Poppyseed.

Back left panel: Tofu: The highest form of nutrition. Unique plant protein, unsaturated fatty acids, essential fiber and minerals, virtues for good health. Back middle panel: The delicious art of eating vegetables. Croc' Seitan (Indian Style). Cereal Grains: Grinioc Patties in Quinoa-Tomato, Millet-Mushroom, or Rice, Delicate Vegetables & Saffron. www.soy.tm.fr. Address: Chemin de l'Horte, 31250 Revel (near Toulouse), France.

12955. Nutrition & Soja. 2008. 100 recettes au tofou [100 tofu recipes]. Revel, France. 72 p. Illust. 20 x 17 cm. [Ger]

• ***Summary:*** At top of color cover: Soy: The plant-based alternative (*L'alternative végétal*). Below the title is a photo brochette with a cube of tofu, wedge of tomato, etc. Across the bottom: Delectable and easy to prepare throughout the four seasons.

Contents: The plant-based alternative: the soybeans is an ecological plant. Full-page cartoon showing how soymilk, tofu, and second-generation tofu products are made. Ideas for using tofu from day to day. Recipes for spring. For summer. For autumn. For winter. Soy: A complete line of products based on tofu and soymilk. The brand name of all these soy

• ***Summary:*** Soybeans to be used for making tofu should be stored in a cool, dark place. Soybeans stored at high temperatures can produce a drastic loss in tofu yield. Address: Dep. of Biological and Agricultural Engineering, Univ. of California at Davis, Davis, CA 95616.

12958. Winchester, Simon. 2008. The man who loved China: The fantastic story of the eccentric scientist who unlocked the mysteries of the Middle Kingdom. New York, NY: HarperCollins. xii + 316 p. May 6. Illust. Maps. Index. 24 cm. [150 ref]
• ***Summary:*** This biography of Joseph Needham (1900-1995) focuses on his early years, his long-term relationship with his Chinese biochemistry student, Lu Gwei-djen (1904-1991), his years in China during World War II, from 1943 to 1946, and his work there with his secretary H.T. Huang. A British biochemist best known for his magnum opus, *Science and Civilisation in China,* Needham was elected a fellow of both the Royal Society and the British Academy. In China, he is known mainly by his Chinese name Li Yuese (Pinyin: Li Yuesè: Wade-Giles: Li Yüeh-Sê).

Page 159: In late 1945, when Lu returned with Needham to China, she wished that China could import "the right kind of soybean," not the low-fat variety that some foreign companies were trying to sell China.

Appendix I is titled "Chinese inventions and discoveries with dates of first mention (p. 267-77). There are about 260 entries, almost all predating a similar discovery in the Western world. The list includes many important subjects, such as: "Antimalaria drugs" (3rd century BC), "Ball bearings" (2nd century BC), "Beriberi, recognition of" (AD 1330), "Book, printed, first to be dated (AD 868), "Book, scientific, printed (AD 847), "Coal as a fuel" (1st century AD), "Compass, magnetic needle" (AD 1088), etc. The entry for "Bean curd" gives the earliest date as "100 AD." Dr. H.T. Huang (expert on the early history of food in China; personal communication 2008 Feb. 13) says this date is much too early; the earliest reliable evidence comes from the early Song dynasty (AD 960-1279), and specifically from the *Qing Yilu* (AD 965). Of course, tofu was probably made for some time before it was mentioned the literature.

The entry for "Soybean, fermented" is given as "200 BC." This date seems reliable, based on the archaeological finding of fermented black soybeans in Han dynasty tombs, which were sealed in 165 BC.

Contents: Prologue. The barbarian and the celestial. Bringing fuel in snowy weather. The discovering of China. The rewards of restlessness. The making of his masterpiece. Persona non grata: the certain fall from grace. The passage to the gate.

From the publisher's description: "The extraordinary story of Joseph Needham, the brilliant Cambridge scientist who unlocked the most closely held secrets of China–long the world's most technologically advanced country. This married Englishman, a freethinking intellectual, while working at Cambridge University in 1937, fell in love with a visiting Chinese student, with whom he began a lifelong affair. He became fascinated with China, and embarked on a series of extraordinary expeditions to the farthest frontiers of this ancient empire. He searched everywhere for evidence to bolster his conviction that the Chinese were responsible for hundreds of mankind's most familiar innovations–including printing, the compass, explosives, suspension bridges, even toilet paper–often centuries before the rest of the world (see Appendix 1). His dangerous journeys took him across war-torn China to far-flung outposts, consolidating his deep admiration for the Chinese people. After the war, Needham began writing what became a seventeen-volume encyclopedia, Science and Civilisation in China."

A map (the frontispiece) shows the line of the Japanese westward advance in China; Needham stayed far to the west of this advancing line. Address: Author, western Massachusetts.

12959. Sojami (Le). 2008. Le Sojami: Balancing nutrition & flavor (Website printout–part). www.lesojami.com Printed May 13.
• ***Summary:*** This website has both French and English editions; the French one is more complete. Contents: The company. Product range. Nutrition. Points of view. Sojami was founded in 1997 by Jean-James Garreau, who has a PhD degree in biology and is an independent researcher in human ecology at the University of Science at Bordeaux, France. In 1996 Dr. Garreau won the Agropole prize for Innovation in the Food Processing Industry as a result of his development of a lactic fermentation process for soymilk. Soyami's products are made from soybeans grown in the southwest of France; they are 100% organic and of plant origin (vegan). They include: (1) Tartimi (cream cheese alternative) in Basil, Cumin & Tarragon, Chives & Shallot, Garlic & Mixed Herbs flavors. (2) Accompaniment (incl. Marinated Lactofermented

Tofu, Provençale Sauce {with tofu}, Lactofermented Tofu). (3) Sauces (Plain Sojami, Mayomi). (4) Frozen Dessert (made from Lactofermented Soymilk, Rice Milk, or Almond Milk).

Soyami makes all its own soymilk. Address: Agropole–BP 109, Estillac, 47931 Agen (Cedex 9), France. Phone: +33 5 5377 2488.

12960. Liu, KeShun. 2008. Food use of whole soybeans. In: Lawrence A. Johnson et al. eds. 2008. Soybeans: Chemistry, Production, Processing, and Utilization. Urbana, Illinois: AOCS Press. viii + 842 p. See p. 441-481. Chap. 14. [85 ref]
• ***Summary:*** Contents: Introduction. Non-fermented soyfoods: Soymilk (traditional soymilk, modern soymilk {techniques to reduce beany flavors, formulation and fortification, homogenization, thermal processing, and packaging}), tofu (preparation methods, factors involved in tofu-making {soybean varieties, storage and pretreatment, solids concentration, heating, type of coagulants, coagulant concentration, coagulation temperature, coagulation time, process automation, packaging}, varieties of tofu {silken tofu, regular and firm tofus, varieties of tofu products}), green vegetable soybeans, soybean sprouts, yuba, okara, roasted or cooked soybeans. Fermented soyfoods: Terms (Koji {fermentation, koji starter, inoculum}), fermented soy paste (preparation method {preparing rice koji, treating soybeans, mixing and mashing, fermenting, pasteurizing and packaging}, processing principles), soy sauce (preparation method {treating raw materials, koji making, brine fermentation, pressing, refining}, processing principles, chemical soy sauce), Japanese natto (preparation method, processing principles), Indonesia tempeh (processing method, processing principles), fermented soymilk, fermented tofu (preparation method, processing principles), fermented black soybeans (Chinese douchi, Japanese hamanatto). Conclusion.

Figures show: (1) Flowchart of a traditional Chinese method for making soymilk and tofu. (2) Photo of savory tofu dices. (3) Photo of soy sprouts. (4) Photo of yuba (soymilk film). (5) Photo of Chinese jiang and Japanese white and red miso. (6) Flow chart of a common method for making Japanese rice miso. (7) Photo of Japanese natto. (8) Flow chart of a traditional Indonesian method for making tempeh. (9) Photo of Chinese douchi (fermented black soybeans or fermented whole soybeans). Address: Research Chemist, U.S. Dep. of Agriculture, Agricultural Research Service, Grain Chemistry and Utilization Lab., Aberdeen, Idaho 83210.

12961. **Product Name:** Viana Veggie Turkish Roast, Viana Veggie Gyros, Viana Cowgirl Veggie Steaks, Viana Mediterranean Veggie Sausages, (Non-Dairy, Vegan).
Manufacturer's Name: Tofutown North America (Importer / Marketer). Made in Germany by Tofutown.com.
Manufacturer's Address: P.O. Box 1186, Charlottesville, Virginia 22902. Phone: www.viana-usa.com.
Date of Introduction: 2008. May.
Ingredients: Viana Veggie Turkish Roast: Water, Tofu* (soybeans, water, nigari), wheat protein*, sunflower oil*, roasted onion (onions, palm oil, wheat flour, salt), soy sauce* (water, soybeans*, sea salt, wheat*), spices, sea salt, raw cane sugar, tomato paste, locust bean gum, herbs, yeast. * = Certified USDA Organic.
Wt/Vol., Packaging, Price: 7.05 oz (200 gm).
How Stored: Refrigerated.
New Product–Documentation: One sample of each (product with Label) with sales sheet and business card sent by Jon Kessler, Sales and Marketing Director, Tofutown North America. 2012. July 30. Front panel of Veggie Turkish Roast: Color photo of product ready to eat. USDA Organic. "Listen to your heart. 0% cholesterol. GMO free. Kebap style. Gourmet vegan meat alternative. Heat and serve!" Inside each paperboard box is the brown, often amorphous product vacuum-packed in thick plastic film. Letter (e-mail) from Jon Kessler. 2012. Aug. 10. Gives the date each product was first sold commercially. The labels were changed to the present more American and less European labels in April 2012.

12962. Drosihn, Bernd. 2008. Re: Update on Tofutown.com GmbH. Letter to William Shurtleff at Soyinfo Center, June 16. 1 p. Typed, on letterhead.
• ***Summary:*** Bernd just returned from Shanghai, China, where he visited a tofu machine manufacturer as well as two tofu manufacturers. It was a very big adventure.

He encloses some "tofu music," a CD titled "Viana on Mars," a special edition by the Mars Allstars published

© Copyright Soyinfo Center 2013

by Viana. A color brochure, titled "The Sound of Viana, Volume 1," contains (in German and English): List of songs, with credits for music and lyrics. An aerial view of three lakes. Introduction to Viana and to Mars, a vegetarian music commune. Photos of musicians. Photos of inside and outside the Viana tofu factory. A collage of Viana labels. An article and interview with Bernd of Viana from OX fanzine no. 70 (Punk magazine), 2007; includes: How is tofu made. Brief history of Viana (founded just before Xmas 1988 as Viana Naturkost GmbH in Nippes, Cologne. Bernd learned how to make tofu in a lively tofu collective in the early 1980s; its members were vegetarians). Are you vegetarians or vegans? How is tofu made? They use organic GM-free soybeans, mostly from China and Brazil. What is the nutritional value of tofu? What advantages do you see in vegan food? The worldwide trend to vegetarian and healthy food. Business without guilt. Is it easier to sell veggie food as alternatives to meat and dairy products? Bernd went from musician to tofumaker. The importance of good nutrition and delicious food. Bernd's three favorite tofu recipes. Address: Founder and president, Tofutown.com GmbH, Industrie und Gewerbe Park, D 54578 Tofutown Wiesbaum, Germany. Phone: 06593 9967-0.

12963. Heather. 2008. Heading for a tofu-making workshop in Niger, West Africa (Web blog printout). *http://peacecorpsniger.blogspot.com.* June 19.
• ***Summary:*** "Next week, I'm planning on heading to Maradi for a women's tofu-making workshop. As of now, cooking and selling tofu is practiced more in the Eastern (ethnically Hausa) region of the country. I'm very excited at having the opportunity to learn more about the process and share that with my village women. Besides being a good source of protein (in a land where meat is difficult and expensive to get) it's also a really good way for women to generate more household revenue."

12964. Ota, Eileen. 2008. Update on history of Ota Family Tofu in Portland, Oregon (Interview). *SoyaScan Notes.* June 30. Conducted by William Shurtleff of Soyinfo Center.
• ***Summary:*** Koichi "Ko" Ota is still the head tofu maker at Ota Family Tofu. He and Eileen were married in 1976, which is how Eileen got involved with and became an owner of this business, but later divorced. Ko's sister, who goes to Japan fairly often and keeps in touch with her father's part of the family (Isoshima), is interested in the history of Ota Tofu Co. She said that they never kept in contact with half of the family; that was the Ota family. She thought that maybe there was some kind of a stigma attached to them; maybe they had tuberculosis. She recalled to Eileen that after her mother (Matsuno) and father (Sokichi) came to the United States in the early 1950s, she remembers her parents in Japan renting an automobile and driving around to say farewell to everybody. The children got out everywhere except at the Ota residence; the children at that stop were made to stay in the car. She thought it may have been because they had tuberculosis.

Elsewhere Eileen has heard the story about someone connected with Ota Tofu dying or getting sick, one of the brothers went back to Japan.

Matsuno Ota was sent back to Japan for her education; she ended up getting a college education there. She married Sokichi Isoshima, who changed his name to Ota, in order to carry on the family name.

Who were the Ota brothers and when did they start to work at or own the tofu shop? In the *Hokubei Nenkan–North American Yearbook* (1913, p. 43) the names of the Ota brothers, Saizô and Heiji, are written in Japanese characters. No address is given, but the entry says they came from Okayama. A census record shows that Saizô came to the USA in 1905 from Okayama. It is clear from an ad dated 1 Jan. 1915 in *Oshû Nippô* (*The Oregon News*) (Portland, Oregon) that the Ota brothers owned the tofu shop at this time. But Eileen does not know when or why they left. It is also not clear who Saizo's parents were.

At some point Saizô and his wife, Shina, began to own and operate Ota Tofu Co.

Eileen's maiden name was Nishimoto. She was born in Portland after World War II, in 1949. She avoided the internment but her parents and elder brother did not. She finished college at the University of Oregon, majoring in Japanese language. However today she cannot read Japanese.

When Bill Shurtleff first contacted Eileen many years ago, he sent her three genealogy charts to fill out. At that point Eileen went to Ko's sister; they were unable to fill out all three charts, which stopped (going backwards) with Saizo's parents and with the two brothers who either started or owned the Ota Tofu Co.

The two places most interested in the history of Ota Tofu Co. are The Oregon Historical Society and the Oregon Nikkei Legacy Center. The legacy center may have interviewed Ko's mother, Matsuno Ota.

12965. Hogervorst, E.; Sadjimin, T.; Yesufu, A.; Kreager, P.; Rahardjo, T.B. 2008. High tofu intake is associated with worse memory in elderly Indonesian men and women. *Dementia and Geriatric Cognitive Disorders* 26(1):50-57. June. [28 ref]
• ***Summary:*** High consumption of tofu was associated with worse memory, while high consumption of tempeh was independently associated with better memory. Tempeh contains high levels of phytoestrogens, but (due to fermentation) also contains high folate levels which may exert protective effects. But some of the tofu was made using formaldehyde as a preservative. Address: 1. Dep. of Human Sciences, Brockington Building, Loughborough Univ., Loughborough LE11 3TU, UK; 2. Univ. of Respati Health Inst., Yogyakarta, Indonesia; 3. Oxford Inst. of Ageing,

12966. Lauterbach, Christiane. 2008. The joy of soy: The city's first Korean tofu house still sizzles. *Atlanta Magazine.* June. p. 54. *
• ***Summary:*** A rediscovery of 88 Tofu House, which opened in 2000 and has now achieved cult classic status. It is located at 5490 Buford Highway. Phone: 770-457-8811.

"... spicy bowls of kimchi, pickled tofu, daikon, salted fish, sprouts and more–helps focus one's attention."

12967. Conklin, Dave. 2008. Re: More details about Ota Tofu Co. in Portland, Oregon. Letter (e-mail) to William Shurtleff at Soyinfo Center, July 4. Compiled by William Shurtleff of Soyinfo Center.
• ***Summary:*** "I found the names of the Ota brothers Saizou and Heiji on page 43 of the 1913 Hokubei Nenkan–North American Yearbook. Everything was in kanji. There was no address given, but it did say they came from Okayama.

"I have a copy of a 1928 Oregon census of Nikkei that adds a bit of information to that. Heiji is not around anymore, but it gives birthdates and dates of immigration for Saizô and his wife Shina." Note: Shina Masuda (a woman, born 31 Jan. 1895 in Okayama) and Saizo Ota (born 13 April 1881) immigrated separately to Oregon from Okayama, Japan. Saizo arrived in the USA first in March 1905; Shina arrived later, in June 1913.

"I found an ad in the 1916 Hokubei Nenkan for Ota Tofu that lists Heiji as the proprietor, and also says they offer Western baths *furo* and tobacco. There is kanji on the side saying dou/ona(ji) (same), with kanji for rhino (*sai*) and elephant (*zô*) below, apparently referring to Saizô. I think Saizô was in Japan at that time getting married. There are no page numbers in that section of the book." Address: Tokyo, Japan.

12968. Ito, Eiichi. 2008. Re: Looking for the Ota family Portland, Oregon, directories at the Library of Congress. Letter (e-mail) to William Shurtleff at Soyinfo Center, July 11. 1 p.
• ***Summary:*** Shurtleff asked Mr. Ito if he would look for the names Ota, Oha, and Nagoro in the *Japanese American Yearbook* (*Nichibei Nenkan*) and *Japanese American Directory* (*Nichibei Jushoroku*) in the section on Portland, Oregon, residential listings, for the years 1919, 1926, 1932, 1936, and 1941.

Mr. Ito writes that there are residential listings in Portland, Oregon, in all five editions (1919-1941) requested. However he did not find entries for Ota or Nagoro in any of these.

In addition, The Library of Congress' collection of the *Japanese American Yearbook* (*Nichibei Nenkan*) includes 1909-1910, and 1912-1916.

12969. Ota, Eileen. 2008. Re: More history of Ota Family Tofu in Portland, Oregon. Letter (e-mail) to William Shurtleff at Soyinfo Center, July 11. 1 p.
• ***Summary:*** "In answer to the question of the marriage of Saizo and Shina, Noriko Ota Okazaki, seemed quite certain that Saizo and Shina were married in Japan, as she recalled that Shina went to live with the Ohta family in Japan for a period of time. Perhaps Shina was not a "picture bride" as I would define it, but went through the traditional Japanese match-making process. Shina Ota and Saizo Ota are listed on a passenger list sailing from Yokohama, Japan on June 11, 1913. Her name is no longer Masuda, but Ota. From this, I would guess that Saizo may have returned to Japan to marry, and then returned to the US with his bride."

I do not know if the ONLC [Oregon Nikkei Legacy Center, in Portland] has Polk's [Portland directory], but they also sent me a page of the 1928 Census of the Japanese Population in Oregon. Please let me know if you are interested in receiving any of the pages the ONLC sent to me.

Amy Peterson works at the ONLC and is a subscriber to Ancestry.com. Amy, who provided the documents from Ancestry.com, said that Saizo and Shina may or may not have been married at the time of the 1913 ship's listing. According to her, in some cases women changed their names prior to boarding ships to come to the US. Amy also said that it was a common practice for marriages to take place in Seattle. So we are not yet sure where or when the marriage of Saizo and Shina took place.

12970. Messina, Mark J. 2008. Update on research on the health benefits and risks of soy (Interview). *SoyaScan Notes.* July 26. Conducted by William Shurtleff of Soyinfo Center.
• ***Summary:*** Analysis of the strengths and weaknesses of the Harvard study showing an association between isoflavone intake and sperm counts, by Cavarro et al., and of the Indonesian study showing an association between tofu consumption (but not tempeh consumption) and mental function. In the latter study formaldehyde used as a preservative in tofu may have caused the problem.

Different basic types of scientific studies involving humans: Epidemiologic studies, case control, cross sectional, prospective (Framingham), intervention, in vitro, in vivo, food frequency questionnaires. Pilot studies vs. full studies.

Second incarnation of the Harvard study. Biological basis for the Harvard study. Effect more pronounced on overweight people. Four biggest weaknesses in the Harvard study: (1) Only looked at 15 different soyfoods but not at other foods consumed, nor at exercise. (2) Four quartiles based on soy intake did not show a dose response. (3) In the 2nd group soy intake was too low to be significant. (4) Ejaculate volume increased.

© Copyright Soyinfo Center 2013

Another very important study by J.H. Mitchell in 2001 was titled "Effect of a phytoestrogen food supplement on reproductive health in normal males" (Clinical Science (London)). Involved 12 men

Vittorio Unfer has done important research and a case study on use of soy isoflavones to increase sperm count and fertility. A five-year study on endometrial hyperplasia is of long-term concern.

Feminizing effect is a big unknown. What kind of study could be designed. Two cups of Silk contains 50 mg of phytoestrogens.

Mark is organizing a soy symposium in Japan in November. At least 12 of the papers are good enough to be the subject of news coverage.

The scientific health evidence in favor of a vegetarian diet over a prudent diet that contains meat is no longer impressive. The evidence in favor of fruits and vegetables has grown weaker.

The evidence that soy is good for health is stronger now than 5-10 years ago, but in a more modest way. But the industry has gotten so small: ADM, Solait, and Silk ($400 million retail sales). Revival Soy has reformulated many of its products so that they no longer contain soy. Address: PhD, 439 Calhoun St., Port Townsend, Washington 98368. Phone: 360-379-9544.

12971. *Melton Times* (*UK*). 2008. Soy soldiers: A Melton business is fighting a war against junk food and appeared on a new healthy eating TV show. July 27.
• ***Summary:*** "Paul's Tofu, run by Paul Jones, was the UK's first [sic] producer of tofu and the team is nicknamed the Soy Soldiers in their battle to get people eating healthily." He has been in Melton for 30 years. Earlier this month, the company was featured on the BBC cookery programme Chinese Food Made Easy when Ching-He Huang used Paul's tofu to make cheap, healthy food. In addition to soy products, Paul also sells bread (which he bakes), fresh organic fruit, vegetables.

Note: Melton Mowbray is northeast of Birmingham, in northern England.

12972. Law, Bridget Murray. 2008. More joy for soy. *Diabetes Forecast* 61(7):19. July.
• ***Summary:*** Describes how tofu, edamame, and soy burgers are not only "trendy good-for-you foods" but also beneficial to those with type 2 diabetes, as they are good for the heart and kidneys.

12973. Vitasoy International Holdings Ltd. 2008. Annual report 2007/08. New Territories, Hong Kong. 164 p. July. 30 cm. [Eng; Chi]
• ***Summary:*** This is a year of discontinuity of sales and gross profit figures, for complex reasons explained on page 7. We will use the new, adjusted numbers below. For the fiscal year ended 31 March 2008, adjusted group turnover (sales) was HK$2,416 million, up 15% over the previous year. Of these sales, 52% came from Hong Kong, 17% from North America, 15% from Mainland China, 12% from Australia and New Zealand, and 4% from the rest of the world.

Gross profit was HK$1,131 million, up 16% from the previous year. Basic earnings per share were 20.9 HK cents, up 21%. Dividends per share were 21.5 HK cents, up 10%.

At "Chairman's statement," a photo shows Winston Yau-lai LO, age 67. His resume is on p. 46. Total dividends for the year are 21.5 cents per share.

In North America, Vitasoy USA grew by 8%, reversing the negative growth trend since 2002/03. Although Vitasoy USA still lost money, this loss was 53% less than in the previous year.

A five-year summary (2004 to 2008; p. 163) shows that, during this entire period, sales increased 26.5% and annual profit more than doubled, increasing by 115%. Address: No. 1, Kin Wong Street, Tuen Mun, New Territories, Hong Kong. Phone: 466 0333.

12974. Yoshihara, Susan-Marie ["Lulu"]; Yoshihara, Yasuo ["Yoshi"]. 2008. Re: History of Shin-Mei-Do Miso Company. Letter to William Shurtleff at Soyinfo Center, Aug. 12. 3 p. Typed, with signature.
• ***Summary:*** "Dear Bill, In 1977 I met you and Akiko in Tokyo. Our miso making journey began a year before when I found "The Book of Miso" in Uwajima-ya department store in Seattle [Washington]. Your book, "The Book of Tofu," was already my favourite cookbook and I was looking forward to new culinary adventures. It may sound trite but what I found in the "The Book of Miso" literally changed my life.

"Inside the book was not only a wealth of miso lore and recipes, complete and detailed instructions for making miso at home and on a commercial scale were there in the back of the book, too. With this information I knew that our family could set up our own miso business.

"In 1976 we had just moved to rural Denman Island but still had no idea of how we would make our living. My husband, Yoshi, was from a Japanese farm family and he remembered how his family had made miso at home every fall. But he was only a child then and knew only some of the details involved. Nevertheless, we were interested and in the fall of 1977, accompanied by our 4 year old son, I went to Japan.

"Thanks to an amazing bit of luck I received an introduction to Yaeko Nakata, sister of the president of Maruman Miso Company in Nagano prefecture. Ms. Nakata was in charge of the hand-made division of the company. She and miso maker Chisato Kobayashi allowed me to observe and participate in the koji making process. Because I was able to experience the making of koji, so crucial to the making of good miso, I felt that Yoshi and I would be able to succeed in miso making.

© Copyright Soyinfo Center 2013

Note: Susan-Marie arrived in Japan in Oct. 1977 and was there until the end of February 1978–about 5 months. Thus, she was the first Caucasian and the first Westerner to travel to Japan with the specific goal of making miso commercially in the North America or Europe. She got very little support from anyone in the beginning. The trip was funded in part by money she had earned from planting trees for two weeks on Vancouver Island. "Most folks in Japan and Canada probably thought I was out of my mind to try to make miso in Canada." Yet without her struggle and her hands-on experience, the miso business in Canada could never have existed. On this trip she was accompanied by the now famous Japanese photographer, Mr. Ryuji Miyamoto.

"With very little capital but with youth and enthusiasm on our side we started work. It was 1979 and we had a 5 year old and a new baby boy. We made our first few batches in a woodshed. Our beans and grains were steamed in ½ whiskey barrels over a wood fire in a maple syrup cooker that we found in an antiques store. The upper part of our 10 acre property had been clear-cut some years before we bought it, so Yoshi used the logging slash to stoke the fires.

"That summer we built a new building. About once a month Yoshi drove our little red Datsun pickup truck to Vancouver where he bought sea salt and organically grown rice and soybeans. He also bought large oak barrels from Sweeney Cooperage in Vancouver. Two of the barrels could just squeeze into the back of the pickup and the bags of salt and grains and soybeans fit inside the barrels.

"We had no machines–no grinder, no mixer. Using a ½ barrel and a special pair of clean new gum boots, Yoshi and I took turns smashing cooked soybeans while the other poured in the salted koji and turned the miso-to-be with an extra large rice paddle that Yoshi carved from Douglas fir. Often one of us was carrying the baby on our back. Our elder son played in the shop while we worked. Over about 3 years we made 22 tons of miso that way.

"Did I tell you that Yoshi's first carpentry project ever was to build the koji incubation room in the woodshed? Our neighbours made the koji boxes from red alder wood and those boxes are still in good condition, nearly 30 years later.

"It is amazing what you can do when you are young, healthy, idealistic and ignorant! Even so, we realized soon enough that we'd have to have mechanical help to make a living. In 1982 we built an addition to the building and added 8 large wooden tanks from Arrow Tank Company of Buffalo, New York. By that time Sweeney Cooperage had already been torn down for Expo 86 in Vancouver. We also imported a miso mixing machine from Japan and bought a used grinder. A neighbour helped us set up a low pressure steam boiler by adapting a wood-fired house furnace. Used stainless steel steam kettles completed the production equipment.

"Every summer Yoshi bucked, split and stacked firewood for the boiler. He made an extra long wooden spoon to harvest the finished miso from the large tanks. He packed the miso by hand no matter how hot or cold the weather was. Only the koji incubation room was heated, yet even in mid-winter Yoshi stood there at the packaging table for hours in the freezing cold. Yoshi is very strong and fit for a man his age.

"In September of 2006 Yoshi broke his collarbone in a bicycle accident. It never healed properly. In the meantime the cost of doing business had gone up incredibly. Ferry fares to the islands more than doubled. In 2008 we decided to retire and shut down our business after producing 220 tons of miso in nearly 30 years of business.

"If you would like to know more about how we made miso please don't hesitate to contact us. We are enclosing newspaper articles, 9 photographs and captions that explain them. Please keep these copies as we have backup copies of them.

"Sincerely,..."

Corps, Nigeria) is a chef who has worked at Greens and Millennium in San Francisco. Now he creates tofu desserts such as Tofu Mousse, Tofu Cheeseless Cheesecake, fried ToVegie Balls, etc.

12976. *SoyaScan Notes.* 2008. Brief biography of Dr. Frank McCoy of Los Angeles, California (Overview). Aug. 24. Compiled by William Shurtleff of Soyinfo Center.
• ***Summary:*** 1923–*The Fast Way to Health,* by Dr. Frank McCoy is published in Los Angeles by Times-Mirror Press. It contains 333 pages and a portrait of Dr. McCoy, but has no biographical information. It recommends fasting as the quickest and best way to restore health.

1924 April 20–Health Food Products Co. (946 W. 7th St., above Figueroa, Los Angeles), announces in an ad in the *Los Angeles Times* that Dr. Frank McCoy, in a return engagement, will continue his Wednesday evening lectures at 8 o'clock P.M. Subject: Diet.

1924 Nov. 20-22–McCoy speaks at the Twenty-Eighth Annual Convention of the American Naturopathic Association. Los Angeles, California.

1925 May 25–Health Food Products Co. announces in another ad in the *Los Angeles Times* another free lecture Dr. McCoy, who will "deliver his famous lecture that has started thousands on the road to regained health and happiness."

1926 Aug. 23–Rudolph Valentino's estate (on this date) included at least three pieces of property. One of these was unimproved acreage on Beverly Terrace, consisting of approximately 6.8 acres of scenic hill-top property, beautifully situated, overlooking Beverly Hills, located in Los Angeles County, adjacent to the estates of Francis Marion and Fred Niblo. It was sold to Dr. Frank McCoy of Hollywood for $21,000.

1927 July 4–Dr. Frank McCoy's first column titled "Health and Diet Advice" appears in the *Los Angeles Times.* The subject: "A new kind of health service." A small photo showing his head and shoulders is at the top of each column. His column of July 17, titled "Ice cream: It's what's for dinner," argued that ice cream "should at all times be considered a real food and not a delicacy." Was he caught in a bootlegging scandal the previous week? In his column dated 1928 Aug. 8, in the section "Cheese without pie," he discusses tofu. Another column dated 1928 Nov. 29 contains a recipe for "Soy bean muffins with peanut butter." His column of 1930 May 9 contained a recipe for "Muffins made of soy bean flour." Another column of 1931 April 7 gave a detailed discussion of the many foods made from soybeans in Japan.

In 1932 Dr. Frank McCoy had a radio program in Los Angeles.

Dr. Frank McCoy has a health institute in Los Angeles (see 1938, below).

1938 May 27–An article in the *Evening Telegram* (Superior, Wisconsin; p. 4) explains that Mildred Lager was once a student of Dr. McCoy and that he had an institute, which she attended. It states "As a result of intensive study of foods and their value to health, she became a demonstrator for Dr. Frank McCoy, noted health specialist whose health talks appear daily in *The Evening Telegram* [Wisconsin] in the column, 'How to keep well.'

"Four years ago, Miss Lager left the McCoy institute to go into business for herself, opening a health food store [named The House of Better Living, on 25 Oct. 1933] in Los Angeles, the largest of its kind in the United States. Note: Therefore Lager must have left McCoy's institute in 1933.

1948 Aug. 1–Dr. Frank McCoy's business ("McCoy Health System") is now owned and run by Dr. R.L. McMaster at 1151 West 6th St. in L.A.

1954 Jan. 2–Last mention of "Dr. Frank McCoy" in the *L.A. Times.* His business is now owned and run by Dr. R.J. Simon at 1233 W. 6th St. in L.A.

12977. Heather. 2008. Tofu training workshop in Niger, West Africa (Web blog printout). *http://peacecorpsniger.blogspot.com.* Aug. 26.
• ***Summary:*** "In my June post, I wrote about going to Maradi for a tofu training workshop. I returned from it at the beginning of July and am happy to report it was a great success! A group of volunteers from all regions of the country (Tillaberi, Tahoua, Maradi, Dosso, Zinder) gathered in Maradi with their "counterparts" (Nigerian co-workers) to learn about growing soy, making tofu, and marketing and selling it. Although most of the training was done in Hausa, some of the volunteers from Hausaland were very helpful in translating for the Zarma speakers and we were able to learn a lot.

"Since rainy season planting has ended and the harvest is about to begin in a couple months, it is too late to implement the soy planting techniques we learned at the training in our local villages. However, a group of Zarma volunteers (myself included) are in the process of planning another tofu training for Zarma speaking volunteers and their counterparts in the Falmey sub-region this coming Cold Season (Oct.–Dec.)."

12978. **Product Name:** Humboldt Organic–Vegan Sloppy Joe.
Manufacturer's Name: Tofu Shop Specialty Foods Inc.
Manufacturer's Address: 65 Frank Martin Court, Arcata, CA 95521. Phone: 707-822-7401.
Date of Introduction: 2008. August.
Wt/Vol., Packaging, Price: 12 oz (339 gm).
How Stored: Refrigerated.
New Product–Documentation: Label sent by Matthew Schmit. 2009. March 18. Self adhesive. 3.5 inches diameter. Red, yellow, blue, and black. An illustration (black on blue) at top of label shows a small tofu shop, with an Oriental-style roof, on stilts atop a small island, with a wind-blown tree

• ***Summary:*** Contents: Introduction. The soul of Korean cuisine. The industrialization of *Chang* manufacture. Conclusion–*Chang* and Korean identity. Notes.

Photos show: (1) One of the Starbucks outlets in Korea's capital. (2) Industrially produced soybean paste and hot red pepper paste on shelves in a modern retail store. (3) A traditional home in the Hahoe Folk Village near Andong. Meju [soybean koji] is hanging under the eaves and sauce pots stand in the courtyard. Liquid soy sauce is *kanjang.* Korean miso is *toenjang* or *doen jang.* Hot red pepper miso is *koch'ujang,* which was first mentioned in the 2nd half of the 17th century.

Although foreign foods are widely consumed in Korea today, soybeans and soyfoods remain a fundamental part of the Korean diet, and appear in a wide range for forms. Whole soybeans are boiled with other beans, rice, and other cereals to make *k'ongbap* [*kongbap*]. Whole soybeans are also mashed or ground into a creamy soup called *k'ongguksu* [*kongguksu*] which is served in the summer with noodles, soymilk, and julienned cucumber. Soybean sprouts (*k'ongnamul*), long a favorite in Korea, are used as an ingredient in a variety of soups, stews, and stir-fried. Seasoned soy sprouts (*k'ongnamul much'im* [*kongnamul muchim*]), a popular dish at many Korean meals, is made with blanched soybean sprouts seasoned with green onions, garlic, salt (or sometimes soy sauce), sesame oil, and crushed sesame seeds. Several kinds of tofu (*tubu*) are used in Korean cooking; they can be fried, braised, or simmered. To make Tofu kimchi (*tubu kimch'i*), cut fresh tofu into squares and arrange with pieces of kimchi; it serves as a popular snack with alcoholic beverages. Minced or mashed tofu mixed with minced meat can be used as a filling for dumplings called *mandu* [like Japanese manju], which are then fried or steamed. Roasted soybeans (*pokkun k'ong*) and roasted soybean flour (*k'ongaru*) are indispensable ingredients in many traditional desserts such as *kwaja* and *ttok.* During the last two decades, soymilk has become a popular product in Korea.

Footnote 16 describes the four basic types of Korean soy sauce: *ch'ong kanjan, chung kanjan, chin kanjang,* and *chin kanjang* (written with a different ideogram than no. 3). There is also *honhap kanjang* (a mixture of Japanese soy sauce and its chemical counterpart) and *choson kanjang* (a product manufactured on the basis of traditional Korean methods) (p. 172-73). Address: 1. Leiden Univ., Netherlands, lecturer at the Centre for Japanese and Korean Studies.

• ***Summary:*** Contents: The origins of tofu in Vietnam: Oral history and direct documentary evidence, evidence for the earlier diffusion of tofu. The role of tofu in Vietnamese life. Tofu in Vietnamese cuisine. Other soybean uses. A photo shows a man making tofu in Hanoi, Vietnam.

Tofu is a popular daily food throughout Vietnam. It would be difficult to find anyone who eats rice but never eats tofu. "Most Vietnamese consider tofu a traditional, cheap, and well-liked dish."

In Vietnam, certain villages have long specialized in tofu

© Copyright Soyinfo Center 2013

production. "Elderly informants told us that it is a hereditary trade, handed down from generation to generation for a long time." But these elders do not know when or how this skill came to Vietnam.

In Vietnam, it is hard to find early documents that mention tofu or soybeans, for after so many decades of war, many of the old scripts and documents have been lost. For example, the *Dai Viet Su Ky Toan Thu* (*Complete Set of Dai Viet History*) is thought to be the most reliable history of Vietnam. The introductory chapter of the 1983 edition states that it was written by Le Van Huu (lived AD 1230-1322), finished in 1272, and consisted of thirty volumes. But no original is known to exist today, and some scholars doubt that there ever were 30 volumes. The original of the 1983 version was edited and printed in 1697 by historians who lived some 400 years after the original edition was first printed.

Two early Vietnamese books that mention soybeans and tofu have been found. Both are available in modern editions: (1) *Van Dai Loai Ngu,* by Le Quy Don (lived AD 1723-1783); modern edition published 1962. In his discussion of grains, he mentions soybean (*dai dau*). (2) *Nu Cong Thank Lam,* by Le Huu Trac (lived AD 1720-1791); modern edition 1971. He stated that the soybean (*dau nanh*) has a sweet and warm nature, and "is good for recovery after an injury, for the beauty of women, for bone marrow, for vitality, and as an antidote for ingested toxins. He noted the tofu contains nourishing substances (known today as amino acids and vitamins)." He described two methods of separating liquid soymilk from the solid residue and then of curding the soymilk to make tofu, and he gave eight vegetarian dishes made with tofu–including: Tofu soaked in soy sauce; Wine fermented tofu. Grilled vegetarian tofu chao.

Le Quy Don and Le Hu Trac are two famous 18th century Vietnamese polymaths. Since both men were born in the early 1700s, it seems quite likely that tofu existed in Vietnam during the 1600s.

However, some scholars believe that tofu arrived in Vietnam much earlier, in the 10th to 11th centuries. These scholars given four reasons for their belief–all based on circumstantial evidence.

(1) Early relations and mass migrations: China and Vietnam have had relations for more than 2,000 years. Chinese imperial envoys imparted cultural information to small groups of Vietnamese leaders. Moreover, there were many wars between China and Vietnam throughout their ancient history. The migration of thousands of people during these times also spread cultural knowledge–such as (perhaps) how to make tofu.

(2) Migrations of Chinese and Vietnamese Buddhists: Because Buddhists have traditionally been vegetarians, they have long been interested in soybeans and soyfoods. A book titled *Thien Uyen Tap Anh,* considered to have first appeared in the 13th to 14th centuries AD, states that "the Buddhist master Vo Ngon Thong (?-AD 826) came from Quang Dong (Guangdong [Canton]), China... In December 1820 he came to Kien So temple (now in Gia Lam district, Hanoi) to meditate and founded the 'Vo Ngon Thong' sect in Vietnam" (Vietnam Buddhist Church 1990). Elsewhere the book describes how two other Chinese Buddhist masters came to Vietnam during the periods 1054-1071 and 1091-1170. In addition, the monks who were students of these masters went to China during this period to meditate. The Vietnamese may well have learned how to make and use tofu during this time either in Vietnam or in China.

(3) Exchanges between the imperial governments of China and Vietnam: There were frequent high-level exchanges. The *Complete Set of Dai Viet History* mentions that in the year 1007 the Vietnamese emperor sent two envoys to Song dynasty China; they returned in 1009. In the year 1020 another envoy went to China and returned. These envoys may have eaten tofu while in China, and they may have asked for training in how to make it.

(4) Vietnamese folk songs and sayings: "These suggest an ancient origin for tofu in Vietnam." The words to one song say: "If you want to enjoy tofu with traditional Chinese soy sauce, sharpen your knife and scissors, shave your head, and become a monk." This suggests that tofu first appeared in Vietnam in Buddhist temples–during the Northern Song dynasty in China, and the Ly and Tran dynasties in Vietnam. Nevertheless, these are only theories.

Since ancient times, Vietnamese have eaten "vegetarian dishes every day, including tofu, in accord with their beliefs that vegetarian food is clean and promotes tranquility."

In Vietnam today, various types of tofu are sold including: Firm tofu, grilled tofu, deep-fried tofu, fermented tofu, and soft tofu. It is used in four basic categories of dishes: vegetarian, nonvegetarian, vegetarian soups, and nonvegetarian soups. The two most popular dishes cooked in Vietnamese homes are: Boiled tofu with sauce (*dau phu luoc*). Tofu cooked with tomatoes and ginger (*dau phu sot ca chua*).

Other foods made from soybeans: (1) Soymilk, served sweetened with sugar. Before carbonated beverages / soft drinks became popular, during the hot summer months, soymilk was the favorite drink in Vietnam. Today some families still make soymilk at home. (2) Soy sauce (dau tuong). (3) Sweet silken tofu, curded with calcium sulfate (*tao pho*). (4) Meat alternatives made from tofu. Address: National Academy of Social Sciences and Humanities, Hanoi, Vietnam, researcher at Chinese Studies Institute.

soybeans in Africa. Soybeans as food. Soybeans for *Daddawa.* Bean curd. Soybeans and bean curd in Niger. Other local uses. Conclusion. Notes.

A table (p. 277) shows the earliest documentation of soyfoods in West African countries. For each country is given the year first noted and the source. The countries (listed alphabetically) are: Benin, Burkina Faso (former Upper Volta), Cameroon, Côte d'Ivoire, Gambia, Ghana, Guinea, Guinea-Bissau, Liberia, Mali, Niger, Nigeria, Senegal, Sierra Leone, and Togo. Note: Most of these dates and sources are identical to those published earlier in: Shurtleff, W.; Aoyagi, A. 1997. *Soy in Africa: Bibliography and Sourcebook, 1857-1997.* Lafayette, California. Soyfoods Center.

The section on "daddawa" is very interesting and well annotated. "One relatively early and by now fairly common adaptation of soybeans to local foodways in West Africa has been its use as a substitute for seeds of the *nèrè,* or African locust bean tree (*Parkia biglobosa*)*."* The resulting condiment is known as daddawa (or dawa-dawa) in Hausa, *sumbala* in the Mande languages, and *iru* in Yoruba. The physical form of daddawa may appear as a small ball, a patty, or a cluster of ripened beans, "but it is always black in color and has a very pungent odor." The product is traded widely from the areas of production. For example, some of the daddawa sold in markets in Niger was made in Nigeria. Making daddawa is traditionally a woman's work; it is relatively labor intensive and consumes significant amounts firewood [which in many areas is increasingly scarce].

The section titled "Bean curd" notes that a milestone in the effort to introduce tofu to West Africa took place when Osamu Nakayama, a soyfoods expert, was brought to Nigeria by the Japanese International Cooperation Agency (JICA) in 1989-91 to work with IITA in Ibadan. Working with local people, he saw the potential for making *wagashi* (also called *wara* in Yoruba [or *warangashi* in northern Benin]) the West African name of a soft unripened dairy cheese, from soybeans, curded with the traditional coagulant–the sap of the giant milkweed or Sodom apple tree (*Calotropis procera*). It took Nakayama six months of research to figure out how best to use the traditional African coagulant with soymilk. The resulting product is said to resemble the West African dairy cheese more than Asian tofu, yet it readily found its place as a substitute for the former. "It compared well with the cheese in flavor and texture, but had the important advantage of being much less expensive to produce."

In the decade that followed, the making of African-style tofu spread largely on its own through the north of Nigeria and across the border into Niger, becoming an important new source of income for many women. As it spread, new soymilk coagulants "were identified by local producers, notably water in which tamarind fruit had been left to soak and water from rinsing pounded pearl millet, left overnight" to sour.

The section titled "Soybeans and bean curd in Niger" begins: "Soybeans have been subject to a limited amount of agronomic research in Niger and are not produced in any significant amount." Note: This implies that soybeans have been cultivated in Niger, although in small amounts. Endnote 14 states that there have been some ongoing soybean trials in the southern part of the Dosso region.

According to American Peace Corps volunteers, tofu started to be made in about the year 2000 in the southern parts of the Zinder and Maradi regions. Since that time, tofu has been made and marketed in Niger using soybeans brought in from Nigeria, in many villages, towns, and markets, mainly in the Hausa-speaking north-central part of Niger. In 2001 it was possible to find tofu in the weekly markets of local villages in these areas, fried and sold with hot red pepper spice. "By 2002 it was more ready available in the cities of Zinder and Maradi and was produced in Birnin'Konni in the Tahoua region. By 2003 it was available in Gaya, and by midyear it was also available in Dosso town in the Dosso region."

Like the soybean used, tofu making clearly spread along the Hausa networks that cross the border. It seems significant that the Hausa names for tofu differ between Zinder and Maradi [in south central Niger] on the one hand, where a loanword from Yoruba–*awara*–is used, and Birnin'Konni [in southwestern Niger] on the other hand, where the term used is *kwai-da-kwai,* suggesting a comparison with the texture of eggs. This suggests that different networks within the larger Hausaphone area were involved the transmitting the process for making tofu.

In Niger, making tofu is a small home-scale activity. The women who make it usually do so to coincide with weekly rural markets or, if in larger towns, several times a week or even daily to fill the demand. Three curding agents are used. Four photos show tofu being made by an African woman in the village Guiddan Iddar, Niger, West Africa. Address: Former assoc. director for agriculture with the Peace Corps in Niger.

• ***Summary:*** Contents: Introduction. Historical background. Production and marketing of tofu. Consumption–tofu and Chinese foodways. Tofu's symbolic associations. Conclusion.

Tofu and related foods consumed in China include: (1) Tofu. It is called *doufu* in Standard Chinese or Mandarin (*Putonghua*), *dauh-fu* in Cantonese, and *tauhu* in Minnahua or Hokkien (2) *Doufujiang,* more commonly known as *doujiang,* which is soymilk. (3) *Doufu hua* (soybean custard), or more commonly *douhua.* (3) *Doufu pi* (tofu skin [yuba]). (4) *Zhizhu* [*fuzhu;* dried yuba sticks].

(5) *Doufu pao* (small blocks of deep-fried tofu puff). (6) *Dong doufu* (frozen tofu). (7) *Doufugan* or *dougan*–fresh tofu that has been firmly pressed to partly dehydrate it, and then is air dried. Chinese-style pressed tofu can be further processed to make... (8) *Xun doufu* (smoked tofu).

(9) *Wuxiang doufu* [also called *wuxiang doufugan*] (five-spiced tofu). (10) Pressed tofu can be soaked in brine and fermented to make *chou doufu,* which is usually referred to as "smelly tofu" but which Hsu and Hsu (1977, p. 301) translate as "molded beancurd." (11) Tofu can also be fermented to make *doufuru,* or simply *furu.* (12) Okara is described (p. 106) as "leavings" or "soybean dregs," or "tofu lees."

Note: This is the earliest English-language document seen (April 2013) that contains the term "smelly tofu" or the term *Doufu pao.*

Photos show: (1) Person making tofu in a Yongchun village, Fujian–filtering. (2) Grinding unripe soybeans (*maodou*) for sale at a morning market in Kunming, Yunnan. (3) Soybean plants in between rice plots in a village in Ganluo Country, Sichuan. (4) Selling bean curd custard in Chengdu, Sichuan. Address: Chinese Univ. of Hong Kong, chair of the Dep. of Anthropology.

12986. Burros, Marian. 2008. Uniting around food to save an ailing town. *New York Times.* Oct. 8. p. D1, D2 (Natl).
• ***Summary:*** In January, Vermont Soy, in Hardwick, Vermont, owned by Andrew Meyers, was selling tofu from locally grown soybeans to five customers; today he has 350.

12987. McMullen, Michelle. 2008. Needed: Consistent non-GM soybean supply from Canada. *Ontario Soybean Growers' Update.* Oct. p. 1.
• ***Summary:*** "The Canadian Soybean Council's (CSC) 2008 incoming mission of Japanese buyers emphasized the importance of Canada's continued commitment to producing quality non-GM soybeans. Tsuento Sasaki, Trade Commissioner from the Canadian Embassy in Tokyo, joined the mission. Japan is Canada's largest market for food-grade soybeans.

"The group unanimously said that Japan's consumers will continue to demand non-GM food products. This presents a tremendous opportunity for Canada to increase its share of the Japanese market, as other non-GM soybean producing countries are unable to meet the demand.

"'The Japanese market is confident in Canada's ability to produce a quality, segregated non-GM soybean product,' says Jim Gowland, CSC Chair. 'Japanese soyfood manufacturers are now looking to Canada to be a consistent supplier of non-GM soybeans.'

"Japan continues to be Canada's largest importer of IP (identity preserved) non-GM soybeans. Nearly 100% of Canada's exports are non-GM for the food market. In 2007, Japan's total soybean imports totaled 4.16 million tonnes (metric tons), and Canada accounted for 7% of that amount. Of that 2007 total, approximately 1 million tonnes were for food uses.

"'Companies from across Japan are concerned about their ability to source non-GM soybeans in the future and are offering attractive premiums to producers for the extra work associated with growing IP soybeans,' says Gowland. 'Skilled, innovative Canadian soybean producers are needed to help meet the demand of markets such as Japan.'"

A photo shows a team of about five Japanese soy food manufacturers examining Ontario soybeans growing on a farm in September. "Ontario soybeans are the basis for Japan's highest quality tofu and miso products." Address: Canadian Soybean Council Manager.

12988. *Organic and Non-GMO Report* (*The*) (*Fairfield, Iowa*). 2008. Japanese company to triple non-GMO soy production in Canada: Market news. 8(9):9. Oct.
• ***Summary:*** In a few years, Kanematsu Corporation (Japan) plans to triple planting of non-GMO (not genetically engineered) soybeans for food use on 50,000 acres on Prince Edward Island, Canada.

Next year, PEI's soybean production is expected to be 15,000 metric tons grown on 15,000 acres–all for shipment to Japan. PEI farmers are shifting to growing organic soybeans from potatoes, which require high pesticide use and are less profitable due to falling demand.

Japanese makers of tofu, soy sauce, and other food processors use about 1 million tons a year of non-GE soybeans from overseas in addition to domestic organic soybeans. Kanematsu provides about 10% of those non-GE imports.

12989. *Restaurant Hospitality.* 2008. Serving up soy. 92(10):62. Oct.
• ***Summary:*** Describes a survey conducted by the United Soybean Board in which veggie burgers, tofu, soymilk, and edamame were the top soyfoods preferred by consumers and one in five consumers said they would order soyfoods from restaurant menus. To "demonstrate the versatility of soy," contains recipes for Edamame-tofu croquettes and Tofu gratin.

12990. Associated Press 2008. As prices for U.S. soybeans rise, so does hunger in Indonesia: The country relies on imports to produce staples such as tempeh and tofu. But with costs soaring, producers and vendors are cutting back or going out of business. *Los Angeles Times.* Nov. 2.
• ***Summary:*** Many of Indonesia's poor have long relied on tempeh and tofu and tasty, nutritious, low-cost sources of protein and basic food. But now the cost of the two foods has doubled, driven by the soaring price of soybeans imported from the United States.

The same problem is found in countries worldwide. During the past 10 years, Indonesia–a nation of 220 million people–went from growing more than half its soybeans, to importing 70% of its needs from the USA. This is the negative side of globalization. Address: Los Angeles Times.

12991. Kim, Vitali. 2008. Yuba in Russia (Interview). *SoyaScan Notes.* Nov. 11. Conducted by William Shurtleff of Soyinfo Center.
• ***Summary:*** Quite a bit of dried yuba (fu-ju; dried bean curd sticks) is now consumed in Russia, especially in salads. Most of it is imported from China and Vietnam. The Russian people eat yuba because they like the flavor. The price of dried yuba (fu-ju) is now about 190 rubles ($7.00) per kg.

Vitali has purchased equipment for making tofu and called (and e-mailed) to ask about "technology for fu-ju production."

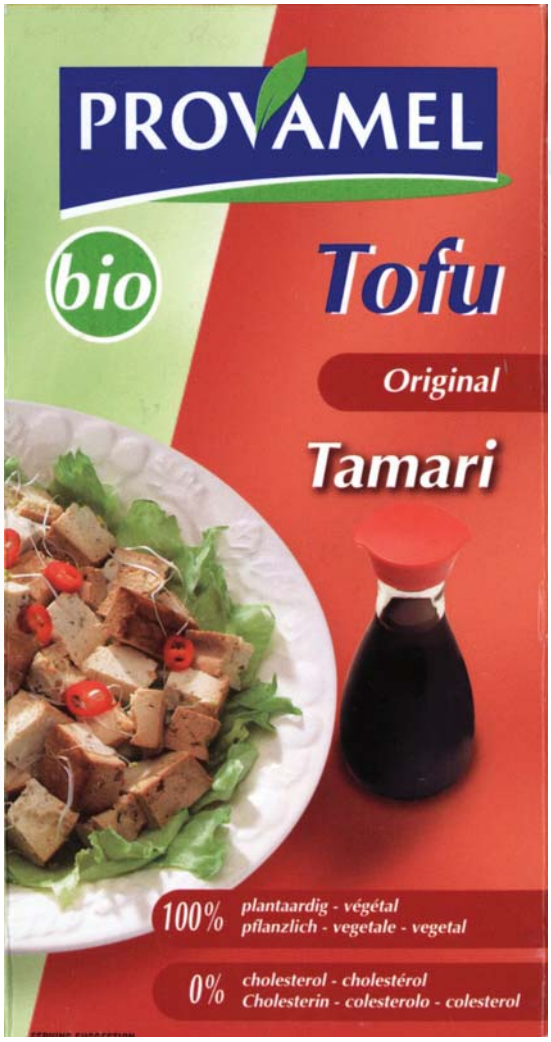
• ***Summary:*** Harovinton, a soybean variety widely used to make tofu, and 11 derived null soybean genotypes lacking specific glycinin (11S) and beta-conglycinin (7S) protein subunits were investigated to determine whether changes in protein composition affected the protein recovery in soymilk and its soluble fractions after various centrifugation steps. Address: Dep. of Food Science, Univ. of Guelph, Guelph, ONT, Canada.

12993. **Product Name:** [Provamel Tofu (Natural, Organic)].
Foreign Name: Provamel Tofu.
Manufacturer's Name: Alpro NV.
Manufacturer's Address: Vlamingstraat 28, B-8560 Wevelgem, Belgium.
Date of Introduction: 2008. November.
Ingredients: Water, organic soya beans* (35%), coagulants–calcium sulfate and calcium chloride. + = Organically grown. Certified by CERTISYS-BE-1.
Wt/Vol., Packaging, Price: 2 x 200 gm = 400 gm in paperboard sleeve. Price: 2.19 euros.
How Stored: Refrigerated.



New Product–Documentation: Label sent by Sjon Welters from the Netherlands. 2008. Nov. 15. Front panel: Color photo of tofu cubes in a salad. Also: A few scattered dry soybeans against a blue background. Text: Duopack. Bio organic. Pasteurized. Paperboard sleeve is 8 by 15 by 7.4 cm. Blue, green, white and red. www.provamel.com. Left side: Preparation guidelines, storage instructions, and ingredients are given in English, Spanish, Italian, Portuguese, Danish, Dutch, French, and German (Funny!). A recipe for Tofu and avocado spread is given in four languages inside (after you cut it open) the paperboard sleeve. No other way to do it all in 4-7 languages!

12994. Golbitz, Peter. 2008. Color photos of the soymilk processing short course held Nov. 2008 at the SoyCow

Training Center in Bergville, KwaZulu-Natal, South Africa. Bar Harbor, Maine.
• ***Summary:*** Peter Golbitz took these color photos and wrote the captions. For background see interview with Peter Golbitz on 22 Jan. 2009. This short course workshop in Nov. 2008 took place at the SoyCow Training Center which was now located a short distance from the site of the May 2007 workshop on the personal property of Henry Davies on the edge of the town of Bergville.

(1) William "Rocky" Fenske, VP of R&D for the SunOpta Grains & Foods Group and Peter Golbitz, SunOpta's Director of International Business Development, at the Sandford Park Country Hotel in Bergville, KwaZulu-Natal, near the Drakensburg mountain range, on a visit to the SoyCow Training Center in November, 2008.

(2) Henry Davies with some fresh tofu made using the VitaGoat processor along with Rocky Fenske from SunOpta, at the SoyCow Training Center in Bergville, November, 2008.

(3) The Soy Shake line produced by Good Hope International Beverages in Cape Town, South Africa.

(4) A display of soymilk products on the shelf at a supermarket in Johannesburg, South Africa in November, 2008. Products include Simply Soy, So Good and Nutri-Bev, made with isolated soy proteins, as well as Good Hope's Soymilk and Shakes processed from whole soybeans. In addition, there are some imported products from Alpro and a line of powdered soymilk drinks, So Fresh. At this time, over 95% of the soymilk sold in South Africa is aseptically packaged. Address: Director of International Business Development, SunOpta Grains and Food Group.

12995. **Product Name:** [Taifun Demeter Tofu Fillets (Japanese-style)].
Foreign Name: Taifun Demeter Tofu-filets (Japans Aard).
Manufacturer's Name: Life Food GmbH.
Manufacturer's Address: D-79108 Freiburg, Germany. Phone: (+49) 761-15210-0.
Date of Introduction: 2008. November.
Ingredients: Tofu 97% (water, *soybeans, coagulants: nigari {magnesium chloride}, calcium sulfate), *vegetable bouillon (sea salt, yeast extract, potato flour, *leek, *carrots, *sunflower seed oil, *mace (from nutmeg), *parsley, *celery), lemon juice, * sunflower seed oil.
Wt/Vol., Packaging, Price: 160 gm vacuum pack with 2 pockets.
How Stored: Refrigerated.
New Product–Documentation: Label sent by Sjon Welter from the Netherlands. 2008. Nov. 15. Orange, green and black on beige. Full color photo of two tofu filets [cutlets] in a skillet with veggies. 100% from plants. Preparation tip.

12996. **Product Name:** [Healthy Planet Knacks–Hearty Smoked Sausages].
Foreign Name: Healthy Planet Knacks.
Manufacturer's Name: Udea BV.
Manufacturer's Address: Postbus 244, 5460 AE Veghel, Netherlands.
Date of Introduction: 2008. November.
Ingredients: Tofu* (water, soybeans*, nigari) (38%), water, wheat protein* (22%), sunflower oil*, spices*, sea salt, raw cane sugar*, thickener, carob powder, celeriac. * = organically grown.
Wt/Vol., Packaging, Price: 7 pieces. Price: 3.35 euros.
New Product–Documentation: Label sent by Sjon Welter from the Netherlands. 2008. Nov. 15. Front panel: Color photo of a long "hot dog" in a hot dog bun, with lettuce, mustard, pickles, etc. on a white plate: Text: "The world of tasty convenience products." Paperboard sleeve is 10 by 18 by 3.5 cm. Red, black, orange, and white. www.udea.com.

Manufacturer's Address: D-54578 TofuTown Wiesbaum, Germany. Phone: +496593 9967-0. Fax: 6593 9967-225.
Date of Introduction: 2008. November.
Ingredients: Tofu (water, soy beans*, nigari) (20%), water, wheat protein* (15%), chick peas* (14%), carrots*, spanish onions*, sunflower oil*. sea salt, spices*, rolled oats*, yeast extract, rice flour*, palm butter*. * = organically grown. flour*, cane sugar* (0.4%), herbs*. * = Organically grown.
Wt/Vol., Packaging, Price: 200 gm vacuum pack in paperboard sleeve. Retails for 2.39 euros (Nov. 2008).
How Stored: Refrigerated.
New Product–Documentation: Label sent by Sjon Welter from the Netherlands. 2008. Nov. 15. Paperboard sleeve is 9 by 13.5 by 1.75 cm. Red, black, orange, and blue on beige. Front panel: A full-color photo shows the tofu burger between buns. "2 burgers. 2 minutes. 100% vegetal. 0% cholesterol. Bio soya power / Bio organic. Try it cold too." Rear panel: "Tofuism No. 17. Earth to mankind: Take global warming seriously. Stop eating animals... Made with pure volcanic Eifel water. Good source of soy protein. Suitable for vegetarians and vegans. www.viana.com."

12998. Vitasoy International Holdings Ltd. 2008. Interim report 2008. Where healthy life begins. New Territories, Hong Kong. 48 p. Nov. 30 cm. [Eng; Chi]
• ***Summary:*** For the six months ended 30 Sept. 2008, group turnover (sales) was HK$1,425 million, up 20% over the same period last year. Gross profit was HK$637 million, up 12% over the same period last year. "In view of the Group's strong financial position and satisfactory operating performance, the Board of Directors has declared an interim dividend of HK$2.8 cents per ordinary share." Sales performance was very encouraging in Mainland China (60%) and in Australia and New Zealand (23%); it was healthy in

© Copyright Soyinfo Center 2013

Hong Kong (5%) and in North America (5%).

North America production efficiency: During the 1st half of fiscal 2008/09 the Group's production plant in Ayers, Massachusetts [Nasoya] had sales of HK$175 million, an increase of 11% over the same period last year. "Operating loss narrowed to HK$9 million, versus HK$10 million for the corresponding period in fiscal 2007/08" (p. 12).

North America market performance: In 2007, retail sales of soyfoods grew by only 1%. Tofu sales decreased by 2% whereas soymilk sales grew by 3%, of which refrigerated soymilk was up 6% and ambient [Aseptic] soymilk was down 8%. "Total tofu sales grew by a healthy 12% while pasta sales were up by an even more impressive 34%. However soymilk and imported products were down by 16% and 33% respectively" (p. 12-13).

In April 2008 the Vitasoy Group acquired the entire equity of Unicurd Food Co., (Private) Ltd. ("Unicurd"), which is a leading manufacturer and marketer of soyfoods in Singapore. "This acquisition is aimed at expanding the Group's market presence in the Asia Pacific Region." The Unicurd production plant "at Senoko South Road, Singapore, supports the Singaporean market and exports to Europe, New Zealand, South Africa, Dubai and other parts of Asia. In the six months to 30 Sept. 2008 Unicurd recorded total sales revenue of HK$31 million..." (p. 13).

In Hong Kong, Vitasoy has a new logo and package design (p. 15). Address: No. 1, Kin Wong Street, Tuen Mun, New Territories, Hong Kong. Phone: 466 0333.

12999. Welters, Sjon. 2008. Re: History of work with amazake. Letter (e-mail) to William Shurtleff at Soyinfo Center, Dec. 17–in reply to specific questions. 4 p. 28 cm.
• ***Summary:*** "When I started to study macrobiotics in 1973 in The Netherlands I became aware of a product called amazake. It was not for sale at the time in The Netherlands. I learned how to make it, using koji, from cooking classes at the [macrobiotic] East West Center in Amsterdam. We always used Cold Mountain Koji, made and sold by Miyako Oriental Foods (owned by Mutual Trading Co.) in Los Angeles. We made a few gallons of amazake a week initially. I did not do much with it, aside from teaching how to make it during cooking classes I gave all over the Netherlands from 1977-1983. When I went to the USA in 1980 I saw the Mitoku pouch pack amazake from Japan."

Q: When and where and why did you start making and selling amazake? Ans: "In Alkmaar [a city in The Netherlands in the province of Noord Holland] we had a natural food store and restaurant between 1977 and 1983, and made amazake from koji imported from Japan. We made desserts with it and experimented with making our own sake and miso with the koji. It was just a fascinating sweetener and food that I loved from the first day I tasted it.

"In late 1982 I started to experiment with making my own domestic kind of amazake. But I did not use koji because it was expensive, foreign, and hard to get. So I used sprouted wheat and barley at first, but did not like the aftertaste the hulls of the grains gave. I then started to work with pure enzymes that I got from a European enzyme company; bacterial and fungal amylase and other enzymes, that worked well. I continued to make it off and on, with koji or enzymes, for home use but did not sell the koji-made amazake commercially until many years later.

"I took this knowledge and the enzymes to the USA when we emigrated to Fayetteville, Arkansas, in October of 1983, where I continued to experiment using enzymes from American companies. I told Joel Wollner, an old friend of mine and the reason we ended up in Arkansas, about my work with amazake and enzymes. During the winter of 1983-84 we came up with a plan to start a company that would produce (among other things) seitan, of which we would use its by-product, the starch, as the raw ingredient for an amazake-like product. Bob Kennedy, owner of the Chico-San rice cake company, who's company was also making rice syrup using enzymes at the time, was approached as a possible financier. He came to Fayetteville to talk and I eventually ended up at his rice syrup plant looking at ways to improve the process and see if we could work together. Nothing came of this however, as Chico-San got sold to Heinz shortly thereafter and I moved to Massachusetts and became a partner in Nasoya [a company that made tofu].

"(Note on the side: Joel took Bob to a facility of the University of Arkansas where they were shown UA's work on a "pounded sweet glutinous rice food," they, according to Joel, being totally oblivious to the fact that such a product already existed in Japan.)

"However, during our time in Arkansas, the founders of Rice Dream (Robert Nissenbaum and Ken Becker) were running experiments while they were living at an intentional community [Moniteau Farm] north of us in Jamestown, Missouri, trying to figure out how to make amazake ice cream. They were stuck with koji as being an ineffective and expensive way of turning this big kettle full of cooked brown rice into a sweet base for their rice ice cream. Joel and I visited them there and saw what they were doing. Afterward Joel continued his contact with Chico-San and spoke to Peter Milbury (who after Chico-San's sale, started to to work for Lundberg Farms) there about my experiments with enzymes. The word was out and no sooner Robert and Ken started to experiment with enzymes, too. They eventually developed what we now know as Rice Dream, the non dairy ice cream, and Rice Dream the drink, both amazake-inspired products widely available in the US.

"In about 1993, while working in Aveline Kushi's sushi restaurant in Stockbridge, Massachusetts, I learned that Mutual Trading Company had a branch in New York, and that they sold Cold Mountain koji–although I think it was still made in California.

"In 1997 we started our restaurant in the back of State

© Copyright Soyinfo Center 2013

Street Market at 20 State Street, Montpelier, Vermont. It was named 'The Wrap' until April 2002, when the name was changed to 'Rhapsody,' the present name. We started making and selling amazake at the same time we opened the restaurant. Although this amazake was unflavored it was naturally fortified with kombu–just like Eden soymilk. It was sold in 12 fl. oz. plastic bottles in the natural food store cooler, without a label on the bottle; the label or sign was on the shelf just below the bottles.

On 3 May 2002 we expanded into our own restaurant at 28 Main Street in Montpelier, and changed our name to "Rhapsody" from "The Wrap." In early 2003 we introduced three flavors of amazake in larger (16 fl. oz.) plastic bottles and discontinued the original amazake fortified with kombu. These had nice color labels and were sold in our cooler.

"Currently one of our people at Rhapsody makes about 80 pints per week in our restaurant kitchen, but the demand is much higher. We are just not set up yet to produce more. We cook the amazake and bottle it hot and freeze it to give it its shelf life of one year (at least). Refrigerated it lasts about 3 weeks. Hopefully somewhere in 2009 we will be able to produce at least enough for the New England market.

"Our restaurant, Rhapsody, is self-serve. Therefore, our amazake is not on our menu (we have no menu) and we do not serve it (hot or cold) in cups to people as they are dining. Rather, we sell it as a drink from our beverage cooler (three flavors: I will send you the labels) for $3.50 per pint, and to stores in Central Vermont. Recently Associated Buyers of Barrington, New Hampshire, has started to distribute the products, too. It is a special, yet exclusive product that deserves wider acceptance, which will come over time as people will start to embrace a more natural diet. I'd be happy to assist the regional development of amazake production.

"The Bridge of Connecticut sells their original amazake in Whole Foods in the Boston area. Charlie Kendall stopped making it as far as I know quite a while ago."

Note: Sjon has never learned how to make koji starter, so he has always had to buy ready-made koji for his amazake. Address: Founder and owner, Rhapsody, 28 Main St., Montpelier, Vermont 05062. Phone: 802-229-6112.

13000. Hurd, Frank J.; Hurd, Rosalie. 2008. A good cook–Ten talents. New updated, expanded pictorial ed. Grants Pass, Oregon: Published by the authors. Printed by The College Press, Collegedale, Tennessee 37315. 668 p. Illust. Color plates. No index. 22 x 15 cm. Spiral bound. [1 ref]
• ***Summary:*** A feast for the eyes, the mind, and the palate. Filled with more than 1,300 beautiful color photos; many of them accompany over 1,000 healthful, natural recipes, but others show the great variety of natural foods, from colorful fruits to basic whole grains. Brimming with sound advice on diet, lifestyle, and health.

This is the new edition of a very important, pioneering, indeed classic American vegan cookbook. On the front and back covers is an idyllic painting of the Garden of Eden. Author Rosalie Hurd is seated under The Tree, reading the Bible–Genesis 1:29, which describes God's original diet for men and women. The book uses no animal products (except in one chapter at the end titled "Recipes Using Milk and Eggs," "for those who are in the transitional period. However, we encourage all those who still cling to milk and eggs to become acquainted with the facts concerning their use, and become weaned through this process"). Some recipes also use honey.

Contains even more innovative soy recipes than the original 1968 edition. A minor point: some of the soy terminology is inconsistent and/or outdated. Address: 1. D.C. [Doctor of Chiropractic], M.D.; 2. B.S. Both: P.O. Box 5209, Grants Pass, Oregon 97527. Phone: 541-472-1113.

13001. Marzini, Devita Ivone. 2008. Tofu and tempeh recipes. Australia. *

13002. Atlas, Nava. 2008. Vegan express. New York, NY: Broadway Books. viii + 247 p. + 8 unnumbered pages of plates. Foreword by Neil Barnard, M.D. Illust. (some color). Index. 23 x 20 cm.
• ***Summary:*** On the cover: "Featuring 160 recipes for quick, delicious and healthy meals." Chapter 2 is titled: "The protein trio: tofu, tempeh, seitan." This book contains: About 37 recipes using tofu (she says, for example, "Cut each block of tofu into six slabs"). 10 recipes using seitan. 9 recipes using vegan cheese. 9 recipes using tempeh. 5 recipes using Tofurky sausage. 4 recipes using miso. 3 recipes using edamame. Address: Hudson Valley, New York.

13003. Bennett, Beverly Lynn; Sammartano, Ray. 2008. The complete idiot's guide to vegan cooking. New York, NY: Alpha Books. Published by the Penguin Group. xix + 328 p. Illust. Index. 23 x 19 cm.
• ***Summary:*** Dedicated: "To those who are guided by the open heart and open mind of compassion."

Being vegan is "not about being on some trendy new diet; it is a lifestyle" (p. 85).

The index contains 48 entries for tofu, 37 for tamari, 30 for soymilk, 8 for tempeh, 6 for TVP, 4 each for miso, soy yogurt, tofu cream cheese, and seitan, 2 for silken tofu and Soyrizo, and 1 each for edamame, soynut butter, and Soyatoo (natural nondairy whipped topping).

"There are so many reasons to go vegan-health and nutrition, weight loss, green and sustainable living, and prevention of cruelty to animals. With over 200 mouth-watering recipes and tips for converting meat- and dairybased dishes into vegan ones, The Complete Idiot's Guide to Vegan Cooking will help readers enjoy a healthy vegan diet without sacrificing taste" (publisher's description). Address: 1. Vegan chef, author, and host of veganchef.com since 1999; 2. Long-time vegan cook and

"foodie".

13004. Chiang, Cecilia; Weiss, Lisa. 2008. Seventh daughter: My culinary journey from Beijing to San Francisco. Berkeley, California: Ten Speed Press. x + 246 p. Foreword by Alice Waters. Introduction by Lisa Weiss. Illust. (mostly color photos). Index. 24 x 20 cm. [1 ref]

• ***Summary:*** Cecilia (Sun Yun) was born on 18 September 1920 in Wuxi, near Shanghai, China–when her mother was age 38 and 17 years after the birth of her oldest sister. Cecilia was the 7th daughter in a family of ten children. In China, everyone considers themselves a year older on New Year's day. Her mother, Sun Shueh Yun Hui, gave birth to twelve children–nine girls and three boys–over the course of 24 years, but two did not survive. Her father, Sun Long Guang ("unofficial" or familiar name Yung Xiao), born in 1878, was a gentle, progressive, scholarly man who had been schooled in France in the early 20th century, after the overthrow of the Qing Dynasty in 1911. Like many intellectuals in his generation, he worked to bring Western liberal ideas and modernization to China. He retired from his engineering job with the railway at age 50 so he could tend the gardens he loved, listen to music, and read. He was unusual in having no concubines, and all in his family were proud of him for that.

Her mother (whom she called "Um-ma") had tiny, four-inch-long bound feet, which were very painful to her. Between ages 5 and 7, when her foot bones were still fairly sift and malleable, they were broken. "The toes were folded down under the ball of the and the arch folded in half, then the whole food was wrapped tightly in gauze bandages so that it would essentially stop growing. The smaller the foot, the more desirable the woman, and thus the more marriageable she would be. It was an unbelievably lengthy and painful process, and often girls died from the resulting infection" (p. 49). Cecilia's father absolutely forbade the binding of his daughters' feet. So they grew up being able to run, dance, play tennis and ice skate. Cecelia rode her bicycle daily to the Fu-Jen Catholic University. Cecilia's mother tottered around the family home, overseeing the servants, nannies, and cooks. By the late 1930s in China, "in all but the most rural areas, the custom of foot binding became a thing of the past" (p. 50).

When Cecilia was age 4, the whole family moved from Wuxi to Beijing, the capital of China. In those days it was very unusual for a family to move such a long distance, from one province to another. However, her parents were "drawn to the capital because of its intellectual and cultural offerings." They moved into a huge walled compound with enormous red gates. It was "an actual palace that took up an entire city block and had been built in the 16th century for a minister to one of the last emperors of the Ming dynasty. It had 52 rooms and six bathrooms in seven parallel buildings" (p. 50). The dining room was the most important room in their home that was where their family life took place. Her "mother was so short, she needed to stand on a stool to see into the pots on the stove." Yet she ran the kitchen with absolute authority. "Like all upper-class Chinese women of her time, she did not actually cook." "She instructed her chefs as to how she wanted things done." This included "making her own soy sauce, a few bottles of which contained shrimp roe–though those are the ones she brought out only for special occasions" (p. 51). Her mother was a perfectionist.

They were served breakfast, typically rice congee–a kind of rice porridge–with assorted condiments including sausage, dried fish, thousand-year eggs, vegetables pickled in jiang, and fermented bean curd [stinky tofu; *chou doufu*].

In 1937 the Japanese finally arrived at Beijing; the city had been bracing for their arrival since 1931 when they had invaded Manchuria. Almost overnight, food (including soy sauce and fresh dofu / tofu) became scarce and life became difficult. In 1940 the Japanese moved in and occupied their home, but let them stay in a small part of the building. Soon Cecilia and Teresa (sister #5, Qin) began to think about leaving Beijing for Chongqing (W.-G. Chungking, in Sichuan province), where Chiang Kai-shek had moved the nationalist government headquarters after the fall of Nanjing, his previous capital. In Jan. 1942 they fled in disguise for Free China, calling their adventure "The Long Walk." After many amazing adventures, they arrived in Chongqing in June 1942. Soon she was seriously dating two men. She decided to marry the businessman, Chiang Liang. They were married in May 1945 in Chongqing. China was still divided by war. In China, the groom's family pays for the wedding. A few days after the Japanese surrender to the Allies on 15 Aug. 1945, her husband announced that he wanted them to move to Shanghai, so they took the scenic 1,500 mile trip down the Yangtze from Chongqing to Shanghai; it took them 2 weeks.

1946 June–Their first child, a daughter named May, was born in Shanghai. At about this time, Chiang Kai-Shek moved the Nationalist capital back to Nanjing, which is close to Shanghai. The civil war with the Communists resumed.

1949 Jan.–Communist forces capture Beijing.

1949 May 25–Communist forces capture Shanghai, shortly after Cecilia, her husband, and the eldest of their two children have flown to Tokyo (April 29), where they stayed at the Chinese Mission. But Cecilia was soon homesick for Chinese food.

1951 fall–She (with a small group of Chinese friends) opens a large (400-seat) Chinese restaurant in Tokyo named The Forbidden City; it was a huge success from the very beginning.

1960–Cecilia moves to San Francisco from Tokyo and opens The Mandarin (for details see Chapter 1). 1961–Her husband comes to check out her restaurant, then dismisses The Mandarin as insignificant; he had expected something much grander. She realized right then their marriage was over.

© Copyright Soyinfo Center 2013

1962–Her two children, Philip and May, come to live with her in San Francisco. The restaurant prospers and grows.

1968–She moves The Mandarin to larger quarters at Ghirardelli Square; to do so she takes out a $750,000 personal loan. It opens in June 1968 with "special little round cruets for soy sauce that looked like perfume bottles" (p. 22).

1974–Cecilia open The Mandarin in Beverly Hills.

1975 July–Cecilia travels to Beijing to visit her ailing father; it is their last visit.

Cecilia's Pantry (p. 5-7); soy-related items. "Bean sauce–Made from ground, salted, and fermented yellow soybeans mixed with seasonings." "Black bean sauce: A prepared sauce sold in a jar and made from salted black [soy] beans mixed with soy [sauce], salt, sugar,..." "Hoisin sauce–This thick, sweet-spicy sauce, made from ground soybeans mixed with sugar, flour, and vinegar,..." Soy sauce: Cecilia likes the Lee Kum Kee brand, but also uses Pearl River Bridge mushroom soy sauce. "which has a nice, rich, earthy flavor." Tofu–Also called dofu or bean curd. Of the various kinds, pressed tofu is often called "seasoned." If you are unable to buy seasoned tofu [also called five-spice pressed tofu, *wu-xiang doufu-gan*], it's easy to make your own at home; a recipe is given (p. 7).

Soy-related recipes: Hot and sour soup (with firm tofu, *suan la tang,* p. 43). Tofu and spinach soup (*bo cai dou fu tang,* p. 58-59). Mapo dofu (p. 142). California congee with condiments (inc. fermented tofu; *xi fan he xiao cai,* p. 160-61). Clams in black bean sauce (*dou chi chao xian,* p. 210-11). Shrimp with edamame (*mao dou chao xia ren,* p. 235). Spinach with bean curd (*bo cai ban dou fu,* p. 237).

13005. Chin, Woon Ping. 2008. Hakka soul: memories, migrations, and meals. Singapore: NUS Press (National University of Singapore); Hawaii: University of Hawaii Press. x + 199 p. Illust. No index. 22 cm. [12 ref]

• ***Summary:*** In China, the Hakkas are known as the "Guest People." They speak Hokkien and their cuisine is highly praised.

The first chapter, titled "Sugar water," begins (p. 3): "When Ah Por awoke from the stupors of her deathbed and asked for food, everyone thought she had recovered. 'I want to eat *fu jook tong sui,'* she croaked, her thin white hair streaming down her chest, her face sagging and sad. Sitting up in her four-poster bed with its mosquito net gathered behind her, she looked like a haggard ghost." When the bowl of fragrant soup was brought to Grandmother, she sat up and ate, delicately at first, then with gusto.

At the end of the chapter (p. 9) is a recipe for "Sugar water with dried tofu strips [dried yuba sticks] (*Fu jook tong sui*)*."* It says: "Add five or six strips of dried tofu [yuba] that have been soaked in warm water and drained... Boil for another 15 minutes, uncovered."

The 2nd chapter, titled "Stuffed tofu," is about her parents and grandparents. Her mother, had been given away as a young girl (no more than 4 or 5 years old) to another family as a little daughter-in-law, to be raised as a bride for their young son. There was no dowry, only a token bride-price, and no wedding feast. The girl was raised, according to Hakka custom, by her mother-in-law along with her "husband." She hated being away from her real mother and family, so at age 10 she ran away to her true home. Her mother turned out to be a an excellent cook. "Without doubt, the most sought after of mother's dishes was *nyong teo fu,* stuffed tofu and vegetables." At the end of the chapter (p. 21-22) is the recipe, which calls for "ten squares of hard tofu."

The author was born in Malaysia. She now lives in Vermont. Address: Teacher of English and Women's and Gender Studies, Dartmouth College, Hanover, New Hampshire.

13006. Chung, Taekyung; Samuels, Debra. 2008. The Korean table: from barbecue to bibimbap. 100 easy-to-prepare recipes. North Clarendon, Vermont: Tuttle Publishing. 159 p. Illust. (color photos by Heath Robbins). Index. 27 x 24 cm. [4 ref]

• ***Summary:*** This stylish book is printed in Singapore entirely on glossy paper with many large color photos. The section titled "The ingredients: Stocking your Korean pantry." includes information about: Miso (Korean miso is doenjang). Seaweed (*Miyeok*). Sesame paste (*Chamkkae anggeum*). Sesame seeds (*Chamkkae anggeum*). Soy sauce (*Ganjang*). Soybean sprouts and mung bean sprouts (*Kongnamul and Sookjoo namul*). Tofu (*Dubu or tubu*).

© Copyright Soyinfo Center 2013

In Chapter 1, "Starters and snacks," we find Sweet and salty glazed soybeans (with edamame) (*Kong jorim*) (p. 45).

Chapter 6 (p. 121-29) titled "Vegetables & tofu," includes: Braised tofu (*Dubu jorim*). Pan-fried tofu with mushrooms (*Dubu jeon*). Vegetable and miso porridge (*Kongnamul sigeumchi doenjang jook*). Another tofu recipe is a dessert: Crusty tofu sherbet (with soymilk) (*Yooja dubu sherbet*).

Many recipes call for soy-based sauces such as: Soy dipping sauce (*Cho ganjang*) (p. 30). Sweet soy sauce base (*Jomi Ganjang*) (p. 31) The main ingredient is soy sauce, to which is added water, garlic, sliced fresh gingerroot, crushed black peppercorns, light brown sugar, and wine. Soy scallion dipping sauce (*Yangnyum ganjang*) (p. 32). Spicy miso dip (*Ssam jang*) (p. 33).

13007. Fiore, Toni. 2008. Totally vegetarian: easy, fast, comforting food for every kind of vegetarian. Philadelphia, Pennsylvania: Da Capo / Life Long. xi + 273 p. + 16 pages of unnumbered plates. Illust. (some color). Index. 24 cm.
• ***Summary:*** A mostly vegan cookbook; each recipe that calls for milk as an ingredient gives soy milk as an alternative. Rarely, if ever, have we seen such a dazzling and delicious variety of vegetarian soy recipes and information in one book. One purpose of this book is to demystify the world of vegetarian cookery and vegetarianism–especially for non-vegetarians.

The Introduction tells the story of the author's gradual transition from typical meat eater (living in Europe), to animal rights activist in Maine, to vegetarian. She advises: Buy locally, eat seasonally, buy organic, use your intuition (and imagination).

The chapter "Stocking the pantry" contains basic information (p. 39-42, 45-46) about sea vegetables, seitan, and soy products, including edamame, miso, tempeh, textured vegetable protein (TVP), tofu, and soy sauce (Light Chinese soy sauce, shoyu, and tamari), and Worcestershire sauce (vegetarian; without anchovies)

Soy related: Golden tofu bites (with one 14-ounce package firm tofu, frozen, then thawed... p. 50). Red pepper tofu dip (p. 67). Vegetarian Caesar salad (with "silken soft tofu, p. 76). Edamame and apple salad (p. 81; kids love edamame). Boiled edamame pods. Curried lima bean and rice salad with tempeh (p. 92). Tofu lime dressing (with silken tofu, p. 102). Spinach and tofu soup (p. 108). Miso soup. Hot and sour soup (with firm tofu, p. 109). Roasted pumpkin bisque (with soy milk, p. 114). Corn bread (with soy milk, p. 130).

One chapter is titled "Tofu" (p. 145-53): Seared tofu. Tofu sour cream. Baked tofu meatballs. Tofu with parsley sauce. Tofu kebabs with tamari-ginger sauce. Tofu pot pie.

The next chapter is "Tempeh and seitan" (p. 155-69): Best braised tempeh (with sweet and spicy marinade, p. 197). Tamari tempeh. Barbequed tempeh. Jamaican jerk tempeh. Malaysian curried tempeh. Greek stuffed cabbage (with lemon cream sauce and tempeh). Tempeh and cabbage. Moroccan stew. Tempeh cacciatore. Tempeh fajitas. Tempeh marsala. Homemade seitan (from bulk vital wheat gluten). Penne with onions and vegetarian bacon (p. 175). Spaghetti tofunese (p. 176). Tofu ravioli with butter and sage (p. 181-82). Bechamel (with soy milk, p. 184). Tofu lasagna (p. 185-86). Vegetable lasagna (with tofu filling, p. 187). No-egg salad sandwiches (with tofu). Mock fish salad sandwiches (with tempeh). Mock Maryland crab cakes (with tofu, p. 196). Tempeh club sandwiches (p. 197). Cornhusker's reubens (with tempeh, p. 198). New York hot dogs and onions (with vegetarian hot dogs, p. 199). Soysage-pepper sandwiches (with Italian-style vegetarian sausage links, p. 200). Eggplant meatballs (with tofu, p. 214). Stuffed sugar pumpkins (with tempeh, p. 215). Fluffy mashed potatoes (with soy milk, p. 219). Spinach tortillas with potatoes (and seitan, p. 228). Pfannkuchen (with soy milk, p. 239). Rye bread French toast (with soy milk, p. 240). Loaded bagel (with tofu cream cheese, p. 243). Tofu cannoli (p. 250). Tofu coconut cream pie (p. 251). Basmati rice pudding (with soy milk, p. 252). Banana chocolate chip cake (with soy milk, p. 256).

About the author: "A vegetarian for over 20 years, Fiore is a self-taught chef who first embraced Mediterranean culinary techniques and philosophy while growing up in Italy." But she spent the first six years of her life in Germany. Address: Portland, Maine. Host of the national public television show Delicious TV's Totally Vegetarian.

13008. Gower, Eric. 2008. The breakaway cook: recipes that break away from the ordinary. New York, NY: William Morrow. xii + 224 p. Illust. (color). Index. 24 cm.
• ***Summary:*** One chapter (p. 88-109) titled "Eggs & tofu" contains five tofu recipes. Gower observes that eggs and tofu "are blank canvases that take on what ever flavors you choose... With eggs and tofu in my fridge at all times, I know a quick tasty meal is just minutes away." The index also contains 5 entries for miso, 2 for edamame, and 1 for soy sauce.

An interesting innovation is the use of flavored salts, including "macca [matcha] salt which is "Powdered green tea plus salt."

This book, printed entirely on glossy paper, contains many full-page color photos.

About the author (inside rear dust jacket): "Eric Gower lived in Japan for fifteen years, working for the prime minister's office as an editor and writer on political economy before turning his interest to food. Currently a private chef and author of two previous cookbooks, *Eric's Kitchen* and *The Breakaway Japanese Kitchen,* he lives and works in San Francisco." A color portrait photo shows Eric Gower. Address: San Francisco.

13009. Kim, Emily. 2008. Cooking Korean food with Maangchi. Scotts Valley, California: CreateSpace. 50 p. See p. 83. Illust. (color). 20 cm. *
• ***Summary:*** Page 25: A recipe for "Doenjangjjigae (bean paste vegetable stew)" calls for "100–150 grams of tofu. Soybean paste ("doen jang")..."

13010. Newman, Jacqueline M. 2008. Cooking from China's Fujian province: One of China's eight great cuisines. New York, NY: Hippocrene Books. 258 p. Illust. (color). Index. 24 cm. [16 ref]
• ***Summary:*** Fujian province, in southeastern China, enjoys a distinct culinary tradition with a thousand year old recorded history–yet it is barely known in the Western world. In addition to carefully researched cultural and historical notes, this book features a collection of 200 authentic recipes.

Dr. Newman was born in 1932. She lives on Long Island, New York.

Bean curd [tofu] appears in the index 24 times, bean curd sheets / skins [yuba and dried yuba sticks] 6 times, fuyu (Fermented bean curd [fermented tofu]) 5 times, black bean sauce / fermented black beans [fermented black soybeans] 3 times.

\ In the Glossary, the section titled "Milk and nondairy milk products" (p. 229-30) states: "Soy milk is the most common nondairy milk used;" it is made into many doufu / tofu products. Nut milks are also popular. Bean curd and pastes are also known in English as Doufu or Tofu. Some of the varieties are: Brown bean curd. Bean curd cheese–correctly called fuyu. Doufu–Called tofu in Japanese. Fermented bean curd–see Fuyu below. Fuyu–the common Chinese name for "fermented bean curd squares." They are mostly widely used as a seasoning. Some fuyu is seasoned with leeks or chili peppers or both. Bean curd skin. Also called bean curd sheet. It is dried. Doufu: See Bean curd and pastes. Tofu: See Bean curd and pastes. Soymilk is called "Bean curd milk" (p. 230). Address: Food historian and scholar, Former prof., Dep. of Home Economics, Queens College of the City Univ. of New York, 65-30 Kissena Blvd., Flushing, NY 11367.

13011. Packaged Facts. 2008. Soy foods and beverages in the U.S. Rockville, Maryland: Packaged Facts. ix + 210 p. Digital PDF file. *
• ***Summary:*** Contents: Market overview. Two classifications: foods and beverages. Market size and composition. Snack bars and soymilk post solid gains in 2007. Soy mainstreams from natural channel. Market outlook. Consumer awareness of soy's health benefits on the ups. Soy / meat combination maximizes potential. Soy allergies a growing U.S. concern. Supermarketing soy. Teaming up with other functional foods. Kids and soy. Soy prices on the rise? The global picture. Competitive overview. Marketer and brand shares. Clif Bar takes the lead in nutrition bars. Kellogg the clear frontrunner in frozen meat substitutes. Turtle Mountain is tops in frozen treats. Silk leads in yogurt category. GeniSoy dominates faltering salted snacks category. Loma Linda leads shelf-stable meat substitutes. Marketing and advertising trends. New product trends. Natural / organic introductions abound. Also coming on the strong: Omega-3 fatty acids. snack bars cover all bases. Meat substitutes going over for real meat flavor. All-in-one meals a convenient choice. Cereals start the day with soy. Baked goods add soy goodness. Soy chips / crackers make for familiar snacking. Edamame becoming more mainstream. Frozen treats: new kid-tested flavors spell success. Soy and chocolate: a healthy combination. Competitor profile: Amy's Kitchen. Competitor profile: Kellogg's Company. Competitor profile: Kraft Foods. Competitor profile: Physicians Laboratories / Revival Soy. Soy beverage marketing and competitive trends. Soymilk types. Competitive overview. Competition from traditional dairy. Marketer and brand shares. Marketing and advertising trends. New product trends. Soymilk: making healthy even healthier with other functional ingredients. Soy smoothies mix fruit and soy. Nutritional and weight-control beverages. Soy chai tea and coffee. Competitor profile: Dean Foods. Competitor profile: The Hain Celestial Group. Consumer trends. IFIC data on attitudes toward health foods and soy. Meat alternatives and soymilk are top categories. Alternative America style vs. classic tofu. Minority and regional patterns. Socio-economic diverse demographics.

13012. Pettid, Michael J. 2008. Korean cuisine: An illustrated history. London: Reaktion Books. 223 p. Illust. (color). Maps. Index. 23 cm. [118 + 110 endnotes]
• ***Summary:*** This is the best book seen to date on this subject. "Korean words are transliterated into English using the McCune-Reischauer system and Chinese words by the Pinyin system." The book uses Korean words liberally, which we find very helpful. The many color photos on glossy paper also help to clarify the text. Contents: Daily foods. Ritual and seasonal foods. Regional specialties. Drinks. Foods of the royal palace. The kitchen space and utensils. Food in contemporary Korea.

Page 36: Rice mixed with beans (*k'ong pap*) was another way to stretch the rice supply; today it is common in many homes and restaurants. Black [soy] beans were generally used to make this dish. They were soaked overnight before being cooked with the rice. However, on the Harvest Festival (*Ch'usok*), the 15th day of the 8th lunar month, beans that are not quite fully ripened are added to the rice and cooked as is–to make the special holiday dish named *ch'ongdae k'ong pap.*

Pages 38-39, 101: The popular rice dish, Pipim pap [Bibim pap], probably developed from foods eaten by farmers when cooked rice (or other grains) was mixed with whatever vegetables were at hand. Nowadays, soybean sprouts (*k'ong namul*) are an essential ingredient.

© Copyright Soyinfo Center 2013

Page 107, 109: In Pyongyang Province of today's North Korea, one of the most famous foods is *mandu* dumplings; in this area they are stuffed with beef, pork, kimch'i, [soy] bean sprouts, and the like.

Page 109: In Hamgyong Province, which occupies the northernmost reaches of the Korean Peninsula, the climate is harsh and the winter are long and cold. Rice is rarely grown here, but dry-field crops such as soybeans, millet and potatoes are grown in abundance.

The foods of northern Korea tend to be less spicy than those grown in the south. "Perhaps most important to the flavour of Korean foods are the seasonings made from soybeans: toenjang (soybean paste) and kanjang (soy sauce). Sprouts from soybeans (*k'ong namul*) are eaten as a side-dish or added to soups and stews..." (p. 40).

Note: We find it interesting that in this detailed book on Korean cuisine, no mention is made of *chungkukjang / chongkukjang* (Korean natto). This is probably an indication that this food is no longer of much importance in Korean culture. Address: Asst. Prof. of Korean, Dep. of German, Russian, and East Asian Languages, Binghampton Univ., England.

13013. Pettid, Michael J. 2008. Korean cuisine: An illustrated history. Tofu (Document part). London: Reaktion Books. 223 p. [118 + 110 endnotes]

• ***Summary:*** This is the best book seen to date on this subject. Tofu is mentioned as follows:

Pages 41-42: Tofu (Korean: *tubu*) arrived relatively late in Korea, first becoming widely used during the early part of the Choson dynasty (1392-1897, i.e. late 1300s or early 1400s). The earliest Korean document seen that mentions tofu is the literary collection of Yi Saek, who lived 1328-1396.

Endnote 16 (p. 202): This collection is titled *Mogun-jip* [*Collected Writings of Mogun*] after his pen name, Mogun. "Yi was one of the leading Confucian literati of the late Koryo period and is appraised as one of the exemplary literary talents of the Koryo dynasty."

In Korea's dynastic records, an entry from 1434 states that an emperor from China's Ming dynasty (1368-1644) sent some serving women to the Choson court to prepare various foods; one of these was tofu. "The account states that all the dishes were harmonious and served beautifully and the means of preparing the tofu was even more exquisite."

Endnote 17 (p. 202): *Sejong Sillok* (*Veritable Records of King Sejong*), p. 66, 27b-28a (1434-12-24).

Note: This document contains the earliest date seen (1434) for tofu in Korea.

Of the many foods that the women brought to the Choson court from the Ming court, only tofu was singled out for praise in this particular entry. After this time, it is thought that dishes featuring tofu became common at the palace and then were disseminated throughout Korean society.

Pages 57-58: Korean soups can be classified into four broad categories. Stews, known as *tchigae* are thicker than regular soups, and are a common part of Korean meals. They are generally served as a shared side dish, rather than in individual bowls as soups typically are. "In general, *tchigae* are cooked and served in the same vessel, a glazed earthenware pot (*ttukpaegi*)." This earthenware pot, compared to a regular metal cooking pot, retains heat much better and enables the stew to continue cooking after it has been removed from the heat source.

One of the most popular Korean stews, *Toenjang tchigae,* is made with Korean miso (*toenjang*). Historically, there have been many different ways of preparing this stew throughout Korea and it remains a staple in Korean homes today. Basically, *toenjang* is added to water and boiled with one's choice of seasonal vegetables, seafoods, and often tofu, resulting in a thick, hearty stew that nicely complements rice and side dishes.

Page 107: In the chapter on "Regional specialties," under Pyongyang province (in North Korea) we read that special foods include a type of sausage named *sundae,* which "is made with pork entrails, clotted cattle blood, tofu, glutinous rice, and various seasonings." The contents are put into a casing, which is "tied at both ends before it is boiled. The sausage is then sliced and eaten with a seasoning of salt, chilli pepper, and black pepper."

Pages 113-14, 122, 124: The chapter on "Drinks" describes unfiltered rice wine (*makkolli* [like Japanese *doboroku*]) which was milky white, simple to make, and hence the drink of farmers and the common people. It was by far the most representative alcoholic drink of Korea, and was enjoyed by all classes at various times. Moreover, it goes well with warmed tofu topped with kimch'i [kimchi] and sesame seeds (*tubu kimch'i*)–a color photo of which is shown on p. 124.

Pages 130-31: The chapter on "Foods of the royal palace" states that great attention was given to foods and their preparation at the royal places of Choson (1392-1897) and Koryo (918-1392). There were many official boards and related positions. "For example, attached to the Board of Personnel (*Ijo*) were positions charged with the procurement of rice and the preparation of meals for the royal family." In addition, beyond the official posts, there were hundreds of palace women and slaves who actually prepared and served food to the royals. Indeed there were positions responsible for very specific tasks such as the preparation of tofu, liquor, tea and *ttok* (rice cakes [like mochi]; see photo of pounding rice, p. 36).

Page 171: The section on "Food in Korea today" discusses *pudae tchigae,* or military camp stew, which originated during the period after the Korean War. A color photo shows this hodge-podge of ingredients, which may include Spam, hot dogs, ramen noodles, tofu, rice cakes (*ttok*), vegetables and noodles in a spicy broth.

© Copyright Soyinfo Center 2013

The "Recipes" section includes recipes for *Tubu chorim* (Spicy braised tofu, with "210 gm firm tofu {extra firm is even better}, sliced into pieces about 1 cm thick") and *Tubu kimch'i* (Tofu with kimchi, with 420 gm firm {or extra firm} tofu {1 block}, sliced into pieces about 1 cm thick, p. 196-97). Address: Asst. Prof. of Korean, Dep. of German, Russian, and East Asian Languages, Binghampton Univ., England.

• ***Summary:*** An elegant book, with more than 800 color photos on glossy paper–plus 150 authentic recipes.

Doenjang (soya bean paste, p. 21, 38-41, 97, 174, 181, 213). Soy sauce (includes both dark and light, p. 21, 38, 41). Wheat noodles in soya bean soup (with "1 cup [whole] soya beans," p. 100). Soyabean sprouts (p. 53, 99, 126, 142, 194, 225). Soya bean paste (see *doenjang*).

One chapter is titled "Vegetables, salads & tofu" (p. 201+). Tofu (p. 53, 201). Tofu recipes: Tofu and stir-fried kimchi (p. 75). Pan-fried kimchi fritters (with "2 oz. firm tofu," p. 79). Steamed tofu and chive dumplings (p. 80). Braised tofu (with "1 block firm tofu, diced," p. 211). Spicy soft tofu stew (with "1 block soft tofu," p. 212). Soya bean paste stew (with ½ block firm tofu, p. 213). Vegetable and tofu cake with mustard dip (p. 214-15). Blanched tofu with soy dressing (p. 216). Stuffed pan-fried tofu (p. 217). Address: Owner of several Korean restaurants in Asia.

13017. Golbitz, Peter. 2009. Update on work with soyfoods in Africa (Interview). *SoyaScan Notes.* Jan. 28. Conducted by William Shurtleff of Soyinfo Center.
• ***Summary:*** Peter finds his new work with SunOpta to be very interesting and exciting. He has long had a great deal of respect for Allan Routh, who is a superb entrepreneur. This work has enabled him to travel worldwide–South Africa, Bangkok [Thailand], Paris, etc. SunOpta sales continue to grow–one billion dollars last year–despite the economic downturn. New developments related to soymilk expansion (in the USA and worldwide) will be announced in a few months.

Henry Davies, an white Afrikaner, is with the SoyCow Center in Bergville, KwaZulu-Natal, South Africa. Henry is a wonderful, amazing man, who has a passion for this work that is rare. He is married to Stella. He has stories of people who work on his farm who have reversed their low metric count for HIV by consuming soyfoods. He is a strong believer of the importance of soy in the diet, particularly in South Africa. He is sometimes hard to reach by e-mail, so he might be easier to reach on his mobile phone. He has been working with soy for about 4-7 years. He was part of the Soy in Southern Africa Alliance. He was with a company named Eden Manufacturing Pty. He had an extrusion plant that made pet food and feed. He now manufactures a high-protein, flavored porridge drink named Redi that is a combination of ground maize and soybeans. For details see his website www.edenman.co.za. Now he is importing and rebuilding VitaGoats from India and installing them with the WISHH program and some other programs around southern Africa. The VitaGoats produce soymilk (and a little tofu) using a bicycle-powered grinder and a simple cooker. The soymilk and tofu are being enjoyed by hundreds of kids every day. Henry also runs the Eden Manufacturing Pty Ltd. Training Centre for VitaGoat and SoyCow Food Processing Systems, with Malnutrition Matters (Frank Daller) and WISHH as sponsors. The first training centre was established by WISHH in Pretoria at the Council for Science and Industrial Research (CSIR) in Pretoria. After a few months the CSIR realized they didn't have the resources to do this. So Henry took it over and established the center on his farm; at that time Peter thinks he was director of the Soyfoods Association of South Africa. The first pictures in Peter's color photo album show the old SoyCow training center, which was adjacent to his old manufacturing facility. The more recent photos at the end of the slide show are in his new (still under construction) training center on his property. WISHH helped to fund the costs of constructing the new center. Henry started running short courses on making soymilk and tofu, which WISHH funded. Peter taught several classes at these short courses–as did other people from Europe, India, Solait, Ted Nordquist, etc. Short courses typically last 2-5 days, and 50-60 people attend each course. There have been Zulu chiefs, people from Parliament–its really happening!

Henry has been traveling on behalf of WISHH, installing SoyCows and VitaGoats in various countries in southern Africa, including Mozambique and South Africa.

© Copyright Soyinfo Center 2013

Recently Paul Lang cleaned, donated and sent Henry two oil expellers–which can be seen in Peter's photo album. Henry also has a solar dryer, a prototype set up by Malnutrition Matters (Frank Daller's group).

Much of this story can be found on the WISHH website. WISHH has more than one mission. The basic one is market development worldwide for U.S. soy edible protein products such as textured soy flour, soy protein isolates and concentrates to improve human health. WISHH does not promote specific products or particular companies; its work is more generic. However WISHH can ask a U.S. company such as ADM or Bunge or Cargill to donate a certain amount of a particular product to a specific WISHH project–such as a school feeding program in Guatemala that needs a container of TVP. ADM typically makes the donation to create goodwill and perhaps in hopes of a long-term business relationship, but it is ADM's responsibility to follow up. Peter has come to realize that he (Peter) has his agenda (to teach people about soy) and Jim Hershey (the executive director of WISHH) has his agenda. Jim's agenda is to take U.S. soy protein ingredients and soyfoods to the Third World. Even though SoyCows and VitaGoats do not lead to the sale of any U.S. soy protein products, this is no problem for Jim Hershey. Jim and his wife are great people. ASA is so lucky to have someone like Jim, because he is so deeply committed to his work and he works so hard, long hours, traveling a lot, and he has put so many great relationships together. He has done an incredible job. He deserves a Medal of Honor. He is a hard to reach but once he's on the phone he is very generous with his time.

Peter is now working with the World Soy Foundation (WSF), whose work is not limited to U.S. soy protein products. This enables him to help develop soybean production in South Africa–which could become self sufficient in soybeans because there is so much wonderful land and water resources, plus a First World agricultural infrastructure and food processing plants. South Africa is pretty much self-sufficient on corn, and they could be growing corn and soybeans in rotation. The country is in transition. Many white farmers are leaving for a variety of reasons that are more covert than in Zimbabwe. When black farmers move onto the vacated land, the productivity of the land often drops–due to lack of experience. People suffer and the land is not used to its full capacity. But Peter thinks the country will recover. An opposition party is finally forming to counter and balance the ANC's policies. Democracy is coming alive; the parties will have competing agendas. For white Afrikaners it may look like shambles, and there is presently a high degree of unemployment, but for Peter (who has been there 6-8 times) the long term view looks very promising.

Peter has a color photo album and slide show (of digital photos he took) that shows some of the workshops and the whole process for making soymilk and tofu using VitaGoats and Soy Cows, with Henry Davies shown (in a red shirt) in many of the slides; he will send Soyinfo Center (SC) the whole show by e-mail, and SC is free to use a few of the slides if proper credit is given to Peter. If SC lets Peter know which ones we want, he will provide the captions. It is a wonderful story. Peter is also considering putting this slide show on the Web (on an appropriate website such as WISHH or Malnutrition Matters), so anyone can see it.

Peter recommends that Shurtleff talk with Jim Hershey; Peter feels that he and Jim share a common view. Peter often talks with Jim, who has just left Guatemala and is on his way to Haiti. Jim is working on getting SoyCows (the small ProSoya systems made in India that produce several hundred liters per hour of soymilk) installed in Guatemala, sponsored by the Rotary. WISHH would not provide money to have SoyCows installed, but they would supply the beans. Before Jim went to work for ASA, he had spent a lot of time in Africa, in Cote d'Ivoire, working for the Rice Board, so he had experience in international commodity market development work. Then he went to work for ASA International Marketing, before WISHH was created.

Peter has found his work with the World Soy Foundation to be extremely gratifying. Jim and Peter put together the Soy in Southern Africa Alliance (SISA) 2-3 years ago and they raised $275,000 in about a month. From that they got matching funds from USAID and ended up with a $750,000 project. That is how a lot of the activity in South Africa got elevated to a much more productive level. Address: Director of International Business Development, SunOpta Grains and Food Group. Phone: (507) 573-5276.

13018. Fish, Peter. 2009. Tofu: The staple of hippie cuisine goes mainstream. Sunset new essential No. 5. *Sunset* (*Menlo Park, California*). Jan. p. 108.

• ***Summary:*** Many will remember their first encounter with tofu, "a tremulous white cube doused in soy sauce." Your mother probably said it was good for you.

"Cut to 2009, and the low-calorie, high-protein soybean curd is as mainstream here as the Quarter Pounder"–for tofu is deeply Western. Tofu was being made in San Francisco as early as 1878. Today, House Foods of Garden Grove, California, makes 150,000 packages of tofu each day. "And tofu has vaulted from health food to haute cuisine... Like mom, we always know a good thing (eventually) when we see one."

A large color photo shows four pieces of tofu, each a different size and shape.

13019. UPAVIM. 2009. UPA-SOYA–UPAVIM soy food marketing program, processing and nutrition education program (2006) (Website printout–part). www.upavim.pursuantgroup.net/english/upasoya.htm Printed Feb. 5.

• ***Summary:*** The work of UPAVIM, a woman's cooperative in Guatemala City, Guatemala, is available at various places

© Copyright Soyinfo Center 2013

on the Web. UPAVIM's homepage begins: "We are a group of approximately 66 women who live in the marginalized communities of La Esperanza, El Mezquital and Villa Lobos I and II, in Zone 12 of Guatemala City. We are all mothers and homemakers. Some of us are widows, abandoned by our husbands or we confront alcoholism in our families. Many of us are the sole providers of economic support for our families." The group started in 1988 with the Healthy Baby Program in the parish of La Esperanza.

The idea for a soy program began in 1999, when "the women of UPAVIM began talking with longtime friend and advisor Barbara Lorraine about how they could expand UPAVIM in order to create more job opportunities and build long term sustainability for their community service programs." "Barbara and UPAVIM established a partnership with Plenty International, an international NGO specializing in soy foods for assistance in designing the space and acquiring the necessary equipment." "In April 2005, UPAVIM initiated production and chose the name UPA-SOYA for their young business enterprise."

As of 2006: "Five women at UPAVIM have completed 40 hours of soy food processing and quality control education activities during 2005. These women are now making soy milk and cheese [tofu] twice each week, and including the remaining soy masa [soy pulp, okara] in bread that is made at their bakery."

Talk with Lisa Wartinger of Plenty International. 2009. Feb. 5. Among the many Plenty volunteers who contributed to the soy project, Louise Hagler helped with technical support and Chuck Haren helped to provide the equipment. Much (if not all) of the soymilk produced has been used to feed kids in daycare. The tofu they make is quite soft; some of it may have been sold.

Letter (e-mail) from Jorge Gonzales. 209. Feb. 13. He worked in the soy dairy for two years making soymilk and tofu. His salary was paid by Plenty International. The soymilk came in strawberry, chocolate, and vanilla flavors. Jorge has not worked for Upa-Soya for 2½ years, since Aug. 2006, when he had surgery on his leg. He writes that Upa-soya stopped making soymilk at the end of November, 2008, mainly because the children got out of school; the soy dairy sells their soymilk to the school twice a week. Another reason that Upa-Soya closed is because sales of soyfoods had been low in the area. Besides soymilk, the ladies at the soy dairy have been making different flavors of soy yogurt, granola, and soft tofu. Their main task now is to focus on finishing three buildings that are being constructed now.

Photos (undated) show:

(1) UPA-SOYA's soy dairy, with modern stainless steel equipment, including a steam jacketed cooker, making soymilk or tofu.

(2) A well designed pouch of UPA-SOYA strawberry soymilk. The front panel text reads: "Fresa UPA-SOYA Leche de Soya. Ingredientes: Extracto de soya (50%), agua purificada, azucar, saborizante artificial de fresa. Agitar antes de tomar. Consérvese en refrigeración bajo 4ºC. Cont. Neto 450 ml." [UPA-SOYA Strawberry Soymilk. Ingredients: Extract of soya (50%), purified water, sugar, artificial strawberry flavoring. Shake before using. Keep refrigerated below 4ºC. 450 ml net]. Address: Calle Principal, Sector D-1, Colonia La Esperanza, Zona 12, 01012, Guatemala.

13020. Viavant, Suzi Jenkins. 2009. Re: Introducing soyfoods to the highlands of Guatemala. I. Letter to William Shurtleff at Soyinfo Center, Feb. 5. 6 p. 28 cm.
• ***Summary:*** A cry for help on the ham radio: On February 4, 1976, a devastating earthquake hit Guatemala at 3:01 a.m. local time, while most people were asleep, taking at least 23,000 lives. Approximately 76,000 were injured, and many thousands left homeless. Some areas went without electricity and communication for days, but a desperate cry for help on the ham radio managed to reach "The Farm," a self-sufficient spiritual community in Summertown, Tennessee, founded by Stephen Gaskin. In response, Plenty, The Farm's community outreach program, chose three carpenters to help with the reconstruction efforts. Dennis Martin, Pedro Grey and Melvyn Stiriss were soon flying to Guatemala armed with only their skills, a backpack full of tools and a desire to help rebuild.

Reconstruction Project: Dennis Martin, a natural at networking, was quick to forge strong connections with members of the Canadian Embassy, Clive Carruthers, acting as the Canadian Chargé d'Affaires, and Rick Bronson, administrator of funds for the Canadian International Development Agencies (CIDA). Martin soon discovered that CIDA had a shipment of prefab housing materials and funds on the way for the reconstruction of Guatemalan towns that had been destroyed in the earthquake. Martin pledged to CIDA that if they were to grant him funds and these materials, Plenty would aid in the reconstruction of the town of San Andres Itzapa, in the municipality of Chimaltenango, and build thirteen schools. CIDA agreed, and thus began Plenty's Guatemalan Project.

The Clinic Program: With a few months, many carpenters from The Farm had volunteered for the reconstruction effort, and the Project was quickly underway. However, as they began clearing debris and rubble, a new crisis emerged. They were horrified to find infants, many orphaned, in dire need of medical attention. The Project urgently requested volunteers with medical knowledge to come and provide assistance. Mary Louise Perkins and her medical and public health crew from The Farm answered that call and soon set up a medical clinic in the Plenty camp, which at that time was no more than one kitchen structure, a few platformed tents surrounded by a coffee plantation and corn field. The clinic was later joined by Thomas Wartinger acting as site physician.

The Orphanage: The number of infants and children

© Copyright Soyinfo Center 2013

orphaned by the earthquake had reached a critical point. The Farm sent out request to its members for single female volunteers to help establish an orphanage. In June 10, 1977, I volunteered along with five other women to go to Guatemala and help set up the orphanage. We became known as the Angel Crew. Our responsibilities involved one-on-one parenting of a single infant, collectively caring for 37 children, and preparing three meals a day for around 90 people consisting of orphans, patients at the clinic, and volunteers involved in the Project. Along with the orphans, many locals joined our team, including several teenagers who had been living on the streets of Guatemala, who we helped recover from drug addictions. My baby was Maria Cruz who was severely malnourished. After several months of nursing her back to health using primarily diluted soy formula she regained her health and was later adopted by Alan and Jane Graf, one of the Plenty couples.

At that time the infant mortality rate was around 50%. Some of the infants came to us extremely malnourished and underweight–at an age of eight months some weighed a mere eight pounds (the weight of most infants at birth!). We fed these babies diluted soy formula through an eyedropper, but in some cases it was simply too late. The only thing that made the heart-breaking experience of losing a child bearable was that we were able to save others. Some returned home if they had one, and others were adopted. However, many of the children we treated went home only to return to us again in a short time, again malnourished. Most of the children in Guatemala were given only tortillas to eat, and it became increasingly clear to me that many Guatemalan mothers needed to be educated about how to provide for their children's basic nutritional needs.

Soy Agriculture & Demonstration Program: Aware of the undernourishment of the people of Itzapa and the high nutritional benefits of soybeans and soy products, we forged a plan to introduce soybeans as a new crop to the local farmers. Our goal was to supplement the diet of the local villagers with high-quality protein while also providing a source of income to the farmers. Soybeans seemed like a viable solution since the farmers had only small plots of land and soybeans can yield high amounts of protein per acre.

In October of 1978, Darryl Jordan, a member of the Plenty team who specialized in agriculture, initiated the soy program. He contacted INTSOY at the University of Illinois and asked if he could conduct one of their international soybean variety trials; he was sent 20 soybean varieties, written procedures to follow, and forms showing results to fill out and return to INTSOY. Itzapa sits at an elevation of 5,860 feet, which at that time, was the highest growing elevation ever tested. Darryl was joined later by Craig Bialick, another team member, who planted and tested the different varieties of which Cobb, Bosier & Davis proved to yield well. As the interest in the new crop increased among the passing farmers, they wanted to know about the new bean and how could they grow it. Since I had a background in producing tempeh for The Farm, Darryl approached me with the idea of teaching the locals about soy products and how to prepare them.

I began by writing a proposal which I submitted to UNICEF Guatemala requesting $6,000.00 to fund in-home soy cooking classes in the area of Itzapa. They gave me the funds I requested along with a two-gallon stainless steel pot and The Soy Demo Project was born. The first classes were held with the wives of the farmers that were involved in growing the soybeans which had proven to grow well at the 5,860 ft. elevation. I taught them using the same utensils that they used themselves, such as a rock grinding stone and cooking on a wood fire; this way every woman who took the class would be able to use the same methods in her own home.

The class size averaged 6-8 neighborhood women along with about 15 children. I would teach the class in Spanish (which I learned informally after arriving in Guatemala), and Maria Sal, a local Indian mother of five who joined our team, would translate in Cakchiquel (a Mayan dialect). The children loved eating the soyfoods and news traveled fast; at the end of each class I would find myself surrounded by 20-30 children, all waiting eagerly for a sample. Interest among the women grew quickly as well. Word spread throughout the area and the requests for classes became overwhelming. I was soon teaching soy demo classes not only in Itzapa, but in many of the neighboring villages as well. By June 1979 approximately 200 women were taught.

The Soy Promoters Program: In one of Itzapa's neighboring villages, San Jose Poaquil, a Guatemalan agency named World Neighbors had set-up a cooperative that held classes in agriculture. While performing a class there, I met a Latino Guatemalan named Amado del Valle, who was the director of the program. (Note: In this context, "Latino," refers to one whose ancestry is largely Spanish rather than indigenous Mayan; for centuries there has been both conflict and intermarriage between these two groups). With his background in agriculture he was very interested in what the soybean had to offer for Guatemala's protein crisis. I realized I needed help spreading the word, so he offered 8 women from his cooperative to become teachers.

In August 1979, we wrote a proposal requesting funding from CIDA to provide the equipment, supplies and training for the cooperative promoters, who would in turn train others in the preparation of soyfoods. I donated my salary as a volunteer and UNICEF donated several thousand dollars towards the project, the total amount of which would then be matched by CIDA. Previously CIDA was able to contribute matching funds through Plenty USA. However at this time, to continue their funding, Plenty needed to obtain a Canadian NGO nonprofit status; we did this through our sister Farm in Canada and we received $11,000.00 for the program. There was good acceptance in Poaquil, especially in the low parts

© Copyright Soyinfo Center 2013

of the municipality. Each promoter had about five groups, some of them walked 15 miles and approximately four hours to get to their groups. We trained them at their cooperative and later went with them to their villages to observe one class. We left them with soybeans, supplies, and funding to continue teaching on their own, visiting them occasionally checking in on their books, and charts, which they kept on all classes. Continued. Address: Salt Lake City, Utah.

13021. Viavant, Suzi Jenkins. 2009. Re: Introducing soyfoods to the highlands of Guatemala. II. Continued. Letter to William Shurtleff at Soyinfo Center, Feb. 5. 6 p. 28 cm.

• ***Summary:*** Continued: In September 1979 the immediate food and housing crisis in the area had been solved, so we began to focus on long-term developments in agriculture and nutrition. As we moved from that area of Guatemala we began to realize the town had grown accustomed to our medical assistance and were growing dependent upon our charity. It became apparent that we needed to develop a means to allow the indigenous community to help themselves. We moved our camp from Itzapa to Solola, where we had built a Mayan municipality building and several schools. Darryl and his wife Leslie returned to the Farm with their adopted baby named Irma, one of the recovered babies that had been abandoned. Since our project focus changed, as we moved to Solola most of the medical crew returned to the USA after adopting (and taking with them) most of the rest of the 7-10 children in our orphanage; most of these children grew up in the USA and never returned to Guatemala to stay.

The Soy Dairy Project: Although the soyfoods were very popular and classes were available, many women in Guatemala did not consistently have time to make their own soy products at home. To address this need, Plenty wrote another proposal to CIDA for $31,000.00 to build a soy dairy that would operate as a cottage industry. Building the dairy would enable us to produce soyfoods on a large scale, create job opportunities, and make soy products available for purchase to the people of Guatemala. Soy ice cream seemed to be a good product choice to focus on. Its production required less education and ice cream was very popular throughout Guatemala.

We decided to build the dairy in the community of San Bartolo, Solola, where we had moved our camp. We had established a good rapport with the community's reconstruction committee. We had already built a school and installed a water system for them which featured a water spigot in every home. The water system had improved the quality of life immensely in San Bartolo, as before they had to carry water for several miles to their homes. My knowledge of large scale soymilk production was limited so Plenty approached Laurie Praskin, the soyfoods expert who for years was in charge of producing soy milk and tofu on a large scale for The Farm community in Tennessee. Laurie accepted and I returned to the United States to help her purchase the equipment needed. We traveled across the country educating people about our cause. We were able to get some of the equipment donated and purchased the rest with the funding we had received–including two 50 gallon stainless steel pots that Laurie acquired from the Boy Scouts of America.

In the summer of 1979 we shipped the equipment to Guatemala along with seven tons of soybeans, and I returned to Guatemala with Laurie as my partner. Laurie's husband, Alan Praskin, was also an agriculture specialist who joined with Craig Bialick to continue doing more soybean variety trials at different altitudes. They did one trial with 16 different varieties in San Martin Jilotepecque, where they partnered with Amado del Valle, the director of the World Neighbors Cooperative where we trained the eight soy promoters. They also did a trial in the Solola area which at 7,200 ft. was the highest elevation ever tested at that time using INTSOY varieties.

On February 19, 1980 the facility was finished, and the Soy Dairy was inaugurated. Our long-term plan was to turn over full operation of the dairy to the people of San Bartolo so our first task was to choose and train a local to oversee the project. We chose Agustin Xoquic. He had been head of the reconstruction committee in San Bartolo at the time we had installed the water system, and we had developed a very strong bond with him and his family. We lived in the Mayan community, training Agustin and his wife Elena to oversee the dairy. The Soy Demo Promoter's project continued while also operating the soy factory project.

As of August 31, 1980, there had been 117 promoter classes and 1,013 men and women were taught how to make soymilk and tofu in their homes through the Soy Promoter program. Small women's groups had collectively grown their own plot of soybeans. This program was similarly implemented in San Martin Jilotepecque, Chimaltenango, with another World Neighbors Cooperative. Eight women were approved as soy promoters and taught 307 men and women. Over 100 people in San Martin planted soybeans that year. Between all the cooperatives, they harvested approximately 8,000 pounds of soybeans for their own needs and the remaining amount was sold to the *Fabrica de Soya* (Soy Dairy) in Solola.

In Solola, Laurie and I held cooking classes in the town, teaching Latino women, how to prepare fancier dishes such as lasagna, blended tofu dishes, fried and scrambled tofu. These ladies had electric blenders, ovens, and tofu, which was now available in the local market produced by the Fabrica de Soya in Solola. We also continued our classes with the Indigenous people in the surrounding villages of Solola.

We also began working with Berhorst Hospital in Chimaltenango, where we had often taken some of our

© Copyright Soyinfo Center 2013

patients. They were very enthusiastic about soy technology and asked us if we could get them enough soybeans to supply soymilk and tofu for their patient's daily consumption. They also asked us if we could get them an ice cream machine for making soy ice cream for sales to their patients. The current practice is for the patients to go to the local store and get junk food without much nutritional value. They wanted a high quality protein product such as soy ice cream, to be available for their patients. We began holding demonstrations at the hospital with 35 volunteer promoters from the surrounding villages of Chimaltenango.

After eight months of training the employees at the soy factory, the political climate in Guatemala became violent. People we worked with on our water projects were put on "hit lists," and since we did not want to jeopardize anyone's safety we were forced to prematurely leave the soy factory project in the hands of people in San Bartolo.

On September 22, 1980 we returned to the U.S. Since Darryl Jordan returned earlier he had published an article about the soy project in a development newsletter titled *League for Food Education* (*L.I.F.E.*). We received responses from fifty different countries requesting advice on how to set up similar projects. We then published the *Plenty Agricultural Program: Guatemala* booklet (1980, 46 p.) and the *Plenty Integrated Soy Program, Guatemala* (1982, 48 p.) booklet to help educate the many people from whom we had received inquiries, along with those from other interested organizations.

After we left Guatemala, Amado Del Valle worked with Food for the Hungry in efforts to set up two more soy dairies in Zacapa, but the political violence from Guatemala's civil war made it too dangerous to complete. It had also become too dangerous for the Soy Factory in Solola to operate, so it closed as well.

On May 27, 1981, Amado left Guatemala and arrived at The Farm in Tennessee, to study large scale production of soyfoods; he later went on to the Canada Farm. In September of 1985, he returned to Guatemala with funding from Plenty Canada at which time he helped Agustin reopen the soy factory and become the Director for three years. It was reborn as Alimentos San Bartolo, community owned and managed, although Agustin and Elena were still in charge of production, and remain so to this day.

On March 7, 1991 the soy project land was officially turned over to the committee of San Bartolo. Chuck Haren and other members of Plenty periodically traveled to Guatemala to help with funding and equipment upgrades.

In June of 1995 with help from Plenty USA and funding from Food for the Hungry, I returned to Guatemala to do a marketing upgrade which I completed in three months. I wrote a Spanish-language booklet with local recipes titled *Recetas de Soya* (*Soyfoods Recipes*), had 1,000 copies printed, and used it at soyfoods classes, some of which were held at local restaurants.

In August of 2006, each household in San Bartolo was bought out for an amount of money equal to their share of the project. The project was restructured from a community owned business to an association named *Asociacion de Desarrollo Integral Belen* (*ADIBE*), but it is still directed by the committee of San Bartolo, which is elected every 4 years by the community. Address: Salt Lake City, Utah.

13022. Viavant, Suzi Jenkins. 2009. Re: Introducing soyfoods to the highlands of Guatemala. III. Continued. Letter to William Shurtleff at Soyinfo Center, Feb. 5. 6 p. 28 cm.

• ***Summary:*** Continued: In July of 2008 the members of ADIBE traveled to Guatemala City to compete and present all of their products at a National Rural Development contest; they were recognized as one of ten winners and were awarded 46,000 quetzals.

The project has become a model project worldwide. The soy dairy has operated as a self-sufficient business for twenty-nine years. It employs seven members of the Mayan community full-time and perhaps most importantly, continues to supplement the protein intake of the Mayan children.

As of August 21, 2008: The current items produced and sold weekly are: 40 gallons of soymilk, 110 pounds of tofu, 15 gallons of soy ice cream, 20 pounds of tempeh, and 20 pounds of soy flour.

In October of 2007, Amado del Valle developed several new products which the soy factory now produces; shampoo, face cream and hand soap (all made from tofu whey, which was previously discarded).

As it is becoming increasingly more popular to be "green," we, the people of this planet, should harness this global consciousness and set up more projects of this kind, which has proven to make the most of our world's resources and provide quality nutrition and education to people who would otherwise not have them. With more funding, education and organization of the planet's resources, there would be plenty of protein to go around, and malnutrition could be a thing of the past–this is my dream. My experience has taught me that small donations, desire, grass roots commitment and organization can change and save lives.

Note: This article is written from the memory of my experience setting up the Soy Demonstration Programs in Guatemala. However I would like to acknowledge that the success of the soy program involved many Plenty volunteers and Farm members, who have contributed or supported the project directly or indirectly over many years. I apologize if I missed mentioning anybody.

Even though I am no longer a member of Plenty, I have still consistently returned to Guatemala to check-up on the project and bring them supplies.

13023. Fiala, Nathan. 2009. The greenhouse hamburger: Producing beef for the table has a surprising environmental cost; it releases prodigious amounts of heat-trapping greenhouse gases. *Scientific American* 300(2):72-75. Feb. [3 ref]
• ***Summary:*** A very interesting article. The writer's research focuses on the environmental impacts of dietary habits. Our dietary choices have an important impact on the health of our environment. A vegetarian diet, using local foods in season, has a much smaller negative impact than the standard American diet, and beef is particularly harmful to the environment. A half-page map of the world is titled "Burgers or tofu?" Address: Doctoral candidate in economics, Univ. of California, Irvine, California.

13024. Alpro. 2009. History of Alpro (Website printout–part). corporate.alpro.com/en/organic-food-production-belgium/history.html Printed March 3. [Eng]
• ***Summary:*** "Back in 1934, the founder of the Vandemoortele Group, Constant Vandemoortele, was already aware of the benefits of soya. 40 years later, his grandson Philippe Vandemoortele was so convinced of the soya bean's nutritious power that he perfected a unique and natural process for making soya milk.

"Philippe had a vision to tackle the nutrition problem in the Third World. An early project saw the construction of a soya plant on the island of Madagascar in 1980. Unfortunately, for logistical reasons, the project had to be discontinued.

"But increased awareness of food issues and concerns meant that creating a soya-based business in Europe was a very real possibility.

"To this end, the Vandemoortele Group set up a separate division specialising in natural soya-based food and in 1980 Alpro was born.

"In 1989 Alpro built Europe's largest and most modern production unit for soya food based on the UHT process, situated in Wevelgem, Belgium.

"In 1996, Alpro took over Sojinal and thereby acquired an extra soya milk production unit in Issenheim, France.

"In 2000 Alpro built a brand new soya milk factory in Kettering, UK.

In 2006, to complete Alpro's range of soya products, we took over the Tofu producer SoFine Foods (Landgraaf, The Netherlands).

"To this day Alpro continues to grow as a European market leader and as a fair food partner." Address: Wevelgem, Belgium.

13025. Schmit, Matthew. 2009. New developments at The Tofu Shop (Interview). *SoyaScan Notes.* March 6. Conducted by William Shurtleff of Soyinfo Center.
• ***Summary:*** On 1 Jan. 2002 Matthew opened for business again after moving The Tofu Shop out of the food incubator (at 100 Ericson Ct., Suite 150, Arcata, California 95521) into the first building he had ever owned at 65 Frank Martin Court, Arcata 95521.

The people who used to make Tofu Turkey stopped the fall of 2008; they were splitting up and the restaurant got caught up in the legal battle. In the fall of 2008, The Tofu Shop made a fledgling effort to start making these product again, but they made the decision so late that they were unable to refine the recipe as they had wished so they could really market the product. The Tofu Shop made several dozen Tofu Turkeys, sold some to old friends, and provided other for the community dinner. It was not really a commercial product in fall 2008, but is now definitely at the top of Matthew's list for 2009.

Matthew is still very much involved in his business on a daily basis. He is not currently involved in the actual production; he helps his local delivery driver prepare shipments to be sure they arrive fresh and in good condition. He helps to supervise and coordinates the preparation schedules. About 80% of the company's sales are in Humboldt County; most of the rest are to the south. As a specialty foods company, they have quite a complex production process. They make 18 batches, of 60 lbs. of tofu each. About 1/3 of those batches are made into regular 1-lb. blocks of tofu. All the rest and treated differently. Some are pressed with greater pressure for a longer time to give extra-firm tofu for certain customers. For others, seasonings and spices are stirred into the curds before they are pressed to make International Spice Tofu. Matthew will send dated labels for the four new products launched since 2002, and he relabeled and slightly changed the names of three earlier products.

The food incubator (25,000 square feet) attracted economic development groups and celebrities from all over the world. The basic concept was very interesting, and Matthew invested 12 years of hard work into the project, but in the end it did not work out as originally conceived–a vehicle to help small food manufacturers get into an equity ownership position in their own facilities; that was combined with the older business incubator concept, which would provide basic services and facilitate the growth of each business. Each business was to own its part of the incubator–quite like a condominium. Cindy Copple, executive director of AEDC, put the two ideas together to create the new idea of a non-graduating incubator. It had a large central warehouse, common restrooms and a development kitchen, water, electricity, drainage, etc. At the last minute, the "equity" language was excluded from the written agreements, but with the verbal understanding that nothing had changed. The ten companies all moved in during the same week;

© Copyright Soyinfo Center 2013

very exciting. But instead of the vision, the AEDC just became landlords and each business was a "tenant." All progress toward owning in the facility died–immediately. The original vision was lost. Matthew eventually organized the ten tenant companies to fight the landlord; they won a monetary settlement. At that moment, Matthew decided to leave the food incubator as soon as possible. Address: Tofu Shop Specialty Foods Inc., 65 Frank Martin Court, Arcata, California 95521. Phone: 707-822-7401.

13026. Sunrise Soya Foods (Website printout–part). 2009. www.sunrise-soya.com/ Printed March 7.
• ***Summary:*** "Sunrise Soya Foods humbly began in 1956 when founder Leslie Joe and his wife Susan, newly immigrated from China, realized that there was a demand for tofu in the Chinese community of Vancouver. Leslie began by making small batches of creamy tofu at the back of his grocery store, Sunrise Market, now a well-known Vancouver landmark with its masses of fresh produce and bustling market enticing shoppers from around the city.

"The tofu making operation continued to grow in size throughout the 1960s and the 1970s, as demand increased and consumer awareness of the importance of a healthy diet grew. Sunrise tofu quickly developed a loyal following in the community. 1983–The current Sunrise Soya manufacturing plant is purchased.

"1985–Sunrise ships their first packaged tofu out of British Columbia to outlets in Alberta, Ontario and Washington."

1994–Sunrise acquires Mandarin Soya Foods. Mandarin offers a complementary line of soy products.

By 1995 Sunrise tofu is available in more than 1,000 stores across Canada.

Sunrise produces its first organic tofu with the introduction of the Soyganic brand.

In 1999, Sunrise responds to consumer demand by restating its commitment to the use of non-GMO soy beans in all its products.

That same year, the Union of Orthodox Jewish Congregations of America grants Sunrise kosher certification, including permission to use the Circle-U symbol on all packaging.

In April 2002, expanding markets in Eastern Canada prompt Sunrise to open a 65,000 square foot manufacturing and warehousing facility in Toronto, from which the company will service the Ontario, Quebec, and eastern United States markets.

May 2002 sees Sunrise's newest brand, Pete's Tofu, launched. Pete's Tofu is aimed at tofu novices and experts alike. 'Taking the guesswork out of tofu,' Pete's line-up includes convenient, ready-to-eat products such as savory tofu triangles and tofu desserts.

Sunrise launches Coconut and Banana flavours in twin packs.

Presenting sponsor of the 2006 season of CityCooks, a popular TV show. sunrise Soya Foods will be featured through on set product displays, 30 second promos and a special tofu week.

Feb. 2006 Sunrise releases its Vancouver Chefs Take on Tofu Cookbook, featuring 21 different Vancouver restaurants and 42 wonderful tofu recipes. Half of all sales go to the Canadian Diabetes Association.

"Sunrise Soya Foods celebrates its 50th Anniversary in May 2006!" Address: 729 Powell St., Vancouver, BC V6A 1H5, Canada.

13027. Davies, Henry. 2009. Re: Forthcoming trip to Democratic Republic of the Congo (DRC, formerly Zaire). Letter (e-mail) to William Shurtleff at Soyinfo Center, March 23. 1 p.
• ***Summary:*** "I will be travelling to the DRC [Congo] in 3 weeks time to install and train a group of UMCOR [United Methodist Committee on Relief] on VitaGoat food processing equipment. They have attended a previous workshop and has by far proven to be the best and most attentive group ever. I look forward to meeting up with them again."

Concerning commercial soy products in South Africa: Soy Mince has been around for at least 30-40 years. Most of the products available contain soy protein isolate as their protein source. Eden Manufacturing has been the first company in South Africa to use the whole soybean to manufacture soy products (i.e., soymilk, yoghurt, tofu etc).

Concerning the Humana VitaGoat project in Zimbabwe: "The constant availability of soybeans at this project is the core of its success. We are looking into the establishment of a NGO [non-governmental organization] that will assist with funding of new VitaGoat and SoyCow projects incorporating both equipment, training and sufficient raw material to keep the project going until such time that they have generated an income to either plant their own soybeans or purchase proper soybeans." Address: P.O. Box 206, Bergville 3350, KwaZulu-Natal, South Africa. Phone: +27 36 448-1605.

13029. Soyatech.com. 2009. Soyfoods sales reach all-time high, says new report. But what is the next growth strategy? http: //www.soyatech.com /sponsor.php?id=283. 1 p. [6 ref]

© Copyright Soyinfo Center 2013

• ***Summary:*** *"Soyfoods: The U.S. Market 2009,* a newly released report by Soyatech, LLC and SPINS, Inc., retail sales of soyfoods products have surpassed $4 billion for the first time in history. The report, which examines soyfoods sales and industry trends during 2008, points out that the market for soyfoods in the U.S. has continued to develop despite the overall economic downturn. The study's authors note that consumer awareness of the health benefits associated with soy and its expanded presence in multiple distribution channels are leading factors in soyfoods' continued success.

"Interestingly, the sales growth of soy is highest in a channel other than conventional supermarkets or natural retailers, according to the report. Sales growth of 1.8% in supermarkets and natural food stores was outpaced by the 'other channels' category of retail outlets for soyfoods including Wal-Mart, club stores and foodservice operations where sales grew by 3%.

"Leading categories driving this growth include soymilk, meat alternatives, tofu and snack bars. Refrigerated soy-based entrees and sushi, tracked for the first time this year, also fared well and debuted in the top 25 largest soyfoods categories, with $11.5 million in sales.

"Soyfoods: The U.S. Market 2009 is the eighth report produced by Soyatech and SPINS, and it provides detailed information on the U.S. market by category, sub-category, brand and distribution channel.

"The report covers such topics as:

"Opportunities for further growth in this healthful food sector. Major players impacting the marketplace and driving growth. Future developments in soyfoods.

"'With soyfoods now a $4 billion industry, Soyatech and SPINS anticipate that opportunities for innovation will enable the industry to continue to grow,' said Philippe de Lapérouse, director of Soyatech's Global Food and Agribusiness Practice.

"For more information or to order the report, please contact Laiza Martinez at lmartinez@spins.com or 847.902.1200 ext. 1254." Address: Bar Harbor, Maine.

13030. Tofu Shop Specialty Foods, Inc. 2009. Tofu Shop: Made in Humboldt (T-shirt). Arcata, California.
• ***Summary:*** This dark-blue T-shirt (extra-large size), made by Anvil Knitwear, Inc. under the registered trademark Anvil Organic, is 100% organic cotton. On the front left, in 2 inch high yellow letters, is printed "Tofu Shop. Below that in smaller yellow letters is "Made in Humboldt" and an illustration (also in yellow) of a tofu shop on stilts, with an Oriental roof, on a cliff by the ocean.

On the back, printed all in yellow: "Tofu Shop: Certified organic. Made in Humboldt. www.TofuShop.com." Below the illustration of the tofu shop on stilts on the cliff by the ocean: "Nourishing the neighborhood since 1980." Address: 65 Frank Martin Ct., Arcata, California 95521. Phone: 707-822-7401.

13031. *Travelin' Light* (*Lightlife Foods, Greenfield, Massachusetts*). 2009. Looking back: Lightlife veggie goodness hits its stride at 30. Spring/Summer. p. 1-2.
• ***Summary:*** This is a brief but insightful 30th anniversary history of the Lightlife Foods / Tempehworks. It begins: "Veggie meals are cool. It's official. Stop by any one of a million suburban dinner tables and you'll see everything from Smart Pretzel Dogs to pan-fried tofu drizzled with olive oil.

"So why have veggie meals evolved from trendy tidbits–impossible to find except in natural food specialty stores–into a mainstream phenomenon as popular with suburban moms as they are with LA hipsters?

"News has been one driving force, from traditional reporting to social networking and the blogosphere. But this is only the tip of the soybean. The ascent of the veggie meal isn't entirely the work of CNN or celebrity word of mouth. A good portion of the credit can be traced to the year 1979 and a car wash in western Massachusetts turned tempeh capital of the U.S.

1979: It was a *veggie* good year: His name is Michael Cohen. He's an original partner of the New England Soy Dairy in Greenfield, MA, and an early pioneer in the popularization of tofu in America. Michael, a man with a ponytail and a mission, sensed an opportunity in the mass production of tempeh that he could build into his own veggie domain. The humble soybean was about to change from being an Indonesian novelty to an increasingly popular entrée on the American dinner plate.

"Within a year, Michael had partnered with Chia Collins and launched Tempeh Works at a start-up facility that had been a car wash in its previous incarnation. From the beginning, both were committed to promoting people's health and well-being, as well as the overall health of the planet.

"At the time, their goal had all the markings of a pipe dream. Fried bologna was a middle-America mainstay from Maine to Modesto, and 'veggie protein' had yet to enter the dietary lexicon. Then innovation, ironically in the form of a healthier good old American hot dog, stepped in.

"In 1985, the company was transformed into Lightlife Foods, Tofu Pups were launched, and the veggie revolution began–spreading to grocery stores throughout the land.

"Smart rules the day: Today, as healthy eating plays a significant role in the American lifestyle, Lightlife's breadth of all-veggie products is enabling more people than ever to realize the benefits of high-protein, cholesterol-free, veggie meals."

Color photos show: (1) Founders Michael Cohen, Chia Collins and their daughter Chiana. (2) Our humble beginnings in a building that was once a car wash.

On the top half of page 5 is a list of all Lightlife's products, divided into Refrigerated and Frozen.

Refrigerated: New Tempehtations Classic BBQ. New Tempehtations Zesty Lemon. New Tempehtations Ginger Teriyaki. Smart Dogs. Tofu Pups. Smart Dog Jumbos. Smart Links Breakfast. Smart Bacon. Light Burgers. Smart Deli Pepperoni. Smart Deli Turkey. Smart Deli Ham. Smart Deli Bologna. Gimme Lean Sausage. Gimme Lean Beef. Smart Ground Original. Smart Ground Mexican. Smart Strips Chick'n. Smart Strips Steak. Organic Fakin' Bacon. Organic Soy Tempeh. Organic Three Grain Tempeh. Organic Flax Tempeh. Organic Wild Rice Tempeh. Garden Veggie Tempeh. Smart BBQ. Smart Tex Mex. Smart Chili. Smart Sausage Italian. Smart Sausage Chorizo. Smart Tenders Lemon Chick'n. Smart Tenders Savory Chick'n. Veggie Burgers. Mushroom Burgers.

Frozen: New Smart Stuffers Chick'n Parm. New Smart Cutlet Chick'n Fillet. Smart Pretzel Dog. Smart Stuffers Chick'n Cordon Melt. Smart Stuffers Chick' Broccoli Melt. Smart Stuffers Turk'y w/ Cranberry Stuffing.

13032. Lam, Alex. 2009. Update on The Soy Shop, Atlanta, Georgia (Interview). *SoyaScan Notes.* April 14. Conducted by William Shurtleff of Soyinfo Center.

• ***Summary:*** His father, Kich Lam bought The Soy Shop (which started in July 1979) from Steve and Sarah Yurman in April 1985; he bought it mostly for the equipment. But before he bought the company, he had been making tofu in the basement of his home in Decatur, near Atlanta.

The Yurmans left the keys to the shop with their employees; one reason the Yurmans sold their company was because of employee theft. The employees came in in the middle of the night and made tofu, then delivered it the next morning. But the quality was not very good. After the Lams bought the company, Alex's mom scared the employees away and the Lams began to make better quality tofu. But in the mid-1980s, there were not many Asians in the southeastern USA–so it was pretty tough times. And there was competition from Calco and Jimmy Wang, both of whom were better capitalized and were ahead of the Lams. But the Lams worked harder and harder, then eventually took the whole market from them. Alex's father passed away in the year 2000. Up that time, his father had been the tofu maker and Alex had handled the business side of things–billing, logistics, etc. In Jan. 2008 the company moved from Decatur to Atlanta. The company has had great growth for the past 10 years. Today, Alex thinks, The Soy Shop is the biggest tofu manufacturer in the southeastern USA (Florida, Georgia, North Carolina, South Carolina, Tennessee, and Alabama).

Today the company makes only two products: firm and soft tofu. Ten years ago he used to make tempeh, soysage, and soymilk. But tofu, the company's bread and butter, grew so fast that he had to discontinue the other soyfood products.

Now growth has begun to slow, because of the economic downturn and new competition. This has been his company's slowest year in the last ten years. In Oct. 2006 House Foods opened a brand new tofu factory in Somerset, New Jersey. They are now flooding the market with low-cost tofu. Alex is slowly seeing the products come into his market. Address: 5289 McCall Dr., Atlanta, GA 30367. Phone: 770-458-7808.

13033. House Foods America Corporation (HFAC). 2009. House Foods America Corporation (Website printout–part). www.house-foods.com Printed April 15.

• ***Summary:*** Contents: Welcome to House Foods America (dynamic banner): We are engaged in three operations: Curry & More, Tofu & More, Curry Restaurant. If you click tofu: Dynamic page & video of products–Taste & Comfort. Contents: About us. All about tofu. Products. Recipes. Production process. FAQ. What's new.

At "About us" is a brief corporate chronology / history: 1981–House Foods, Japan opens a sales office in Los Angeles. 1983–Acquires a fifty percent stake in the Hinode Tofu manufacturing company, one of the most respected brands in the country and enters into the Tofu business. 1983–The first Curry House restaurant opens in Little Tokyo (Los Angeles), introducing local Californians to Japanese cuisine with a contemporary atmosphere. 1997–A new state-of-the-art Tofu manufacturing facility opens in Garden Grove, California. All HFAC operations are consolidated at the facility. 2000–To expand business on the East Coast, HFAC opens New York office. 2006–HFAC opens its second plant, a new state-of-the-art tofu manufacturing facility in Franklin Township, Somerset, New Jersey. 2007-2008–With two major plants servicing the country, House Foods America Corporation becomes nationwide. Address: Garden City, California.

13034. Tibbott, Seth. 2009. Recent trip to The Netherlands to study tempeh. Tempeh in the USA (Interview). *SoyaScan Notes.* April 24. Conducted by William Shurtleff of Soyinfo Center.

• ***Summary:*** In April Seth traveled to The Netherlands to study tempeh. By good fortune he met Angelo Croci (an Italian), who owns The Soybean Company in Kerkrade. Angelo speaks Italian and Dutch but very little English. Second in command there is Keyes Van Puten. Seth's driver translated from Dutch to English. Angelo took Seth through his tempeh plant. Seth thinks he did this because he would like to visit Seth's plant in Oregon. Seth also showed Angelo his new Tempeh 2.0, regular and marinated. Seth thinks that Angelo is making about 15,000 lb/week of tempeh–about

© Copyright Soyinfo Center 2013

the same as Seth is–but of only soy tempeh, no other styles or second generation products. One 400 gm cake sells for 2 euros and has an 18-day refrigerated shelf life.

Lots of tempeh is sold at Indonesian and Surinamese restaurants throughout Amsterdam, which Seth found to be one of world's truly great cities. A week before Seth was there, Sinta Santoso, founder and co-owner of Primasoy (Victoria, Australia), had visited Angelo's company.

The plant is of medium size and has no large machines. Angelo soaks his soybeans for 2 days [perhaps to acidify the soak water] rather than the typical one and incubates his tempeh for 3 days–relatively long. The most interesting thing is the tempeh culture, which does not produce black spores. Seth believes that this is a variety of *Rhizopus oryzae* rather than *Rhizopus oligosporus.* Seth brought some of this tempeh home and it still had not sporulated black.

But even though the tempeh does stay white, it requires a two-day incubation process and the resulting tempeh is not as flavorful as Seth's current product. So Turtle Island still buys its tempeh starter from the Tempeh Lab on The Farm (Summertown, Tennessee).

As far as Seth knows, no patents have been issued to this starter or the process for making from it. Seth thinks that a company selling tempeh starter on the Web as "Shining White Tempeh Starter" (http://tempehonline. com/products. htm) may be selling this same starter.

Note: According to Ike Van Gessel, this tempeh company used to be owned by Robert Van Dappern. Its name was Tempé Produkten B.V. Robert sold it to Mr. J. Singh. a Sikh, who bought the Belgian tofu business in 1986 and the Netherlands tempeh business in 1990. The address is unchanged.

Seth saw products from three tempeh makers in Europe: (1) The Soybean Company in Kerkrade, Netherlands. (2) FZ Organic Food (Yakso brand) in Wolvega, Netherlands. (3) De Hobbit in Maldegem, Belgium. He sent all 3 labels to Shurtleff at Soyinfo Center.

While in the Netherlands Seth met Bernard Faber, on introduction from Sjon Welters; they had a beer together. Bernard has a macrobiotic background, used to be involved in food, and is now a journalist.

In the United States sales of tempeh have recently been increasing–unexpectedly. Seth buys market statistics from SPINS (Natural) and others, for tempeh, Tofurky, and related products; he thinks that Lightlife is now the largest tempeh manufacturer in the USA. Seth thinks that tempeh has saved Lightlife and Conagra; their products made with soy protein isolates and other modern soy proteins are not doing very well. Seth demoed his tempeh 2.0 at several Natural Products trade shows, and it was even blogged about on the web before Seth officially launched it. Shortly afterward Lightlife introduced very similar products. In fact, Lightlife may be the biggest tempeh maker in the world.

Frankly, Seth is glad that Lightlife is taking part of this new market because he doubts that he could meet the demand alone. Even the supermarkets are looking at his marinated tempeh strips. Either a Turtle Island or a Lightlife line of these products may well show up in Safeway before long. Seth already has his in Raley's and other similar chains. Its not easy for him to expand tempeh production because of the incubator. Seth is also starting to use more tempeh starter culture than is available. He continues to grow out the spores on rice, but does keep it going generation after generation. He is looking for an industrial culture lab to make the basic starter culture for him. Address: President and Founder, Turtle Island Foods, Inc., P.O. Box 176, Hood River, Oregon 97031. Phone: (503) 386-7766.

13035. Yan, Lin; Spitznagel, Edward L. 2009. Soy consumption and prostate cancer risk in men: a revisit of a meta-analysis. *American J. of Clinical Nutrition* 89(4):1155-63. April. [53 ref]

• ***Summary:*** The researchers found a 26% reduction in risk of prostate cancer for men with the highest soy food intake, compared to those with the lowest soy food intake. This was increased to a 30% reduction when the reported intake was of non fermented soy products (e.g. tofu, soymilk). However, intake of fermented soy products (e.g., natto) were not associated with reduced risk. The authors concluded that consumption of soy foods is associated with a reduction in prostate cancer risk in men. This protection may be associated with the type and quantity of soy foods consumed. Address: 1. Grand Forks Human Nutrition Research Center, Agricultural Research Service, USDA, Grand Forks, North Dakota; 2. Dep. of Mathematics, Washington Univ., St Louis, Missouri.

13036. Andrews, Roger. 2009. Re: History of Spinning Kitchen (early tofu shop in Boulder, Colorado). Letter (e-mail) to William Shurtleff at Soyinfo Center, May 9. 3 p.

• ***Summary:*** "This is the account of my Spinning Kitchen enterprise, with the erstwhile partner, Beverly Migliori, from 1977-79. In preparing the outline and draft, I began to pass through memories that, though vivid, I would rather leave unvisited. I have one good instance from that time and I keep it dearly. My recollection of that time (Corn Mother, Spinning Kitchen) is not unlike the story of The Frog and the Scorpion. Lesson taken, no desire to repeat.

"I had eaten tofu in Japanese restaurants before coming to the Carnival Café. I was intrigued by the ways that tofu was used there in a vegetarian conversion style- tofu 'egg salad', etc. As the interest in tofu for an important vegetarian nutrient source was peaking, it seemed that deliveries of tofu to the restaurant might have been becoming more sporadic. We needed to know more about this wonderful substance.

"Three of us took an early spring ('75?) field trip to 'Denver Tofu' in hopes of cultivating greater interest with our supplier. The cursory tour lasted about 20 minutes.

© Copyright Soyinfo Center 2013

We were shown some of the equipment but none of the processes.

"Some months later, myself, Gene Casternovia & Ann Ford left the 'Carnival Café' to start the 'Corn Mother Restaurant' in an older house where Boulder People's Food Co-op was also located. We each gave time and effort to the planning, development and acquisition for that venture. Service was the buzzword and I was 'in for a pound' on that theme. I did not feel like a third wheel in the business though time proved that was indeed the case. A sad condition became ever more apparent when I asked for some measure as they were taking and none came forth.

"I had met my partner, Beverly, while I was working at the Carnival Café, in Boulder. After my time at the Corn Mother, we were both suddenly unemployed and sought to begin a joint venture. We had The Book of Tofu and a related commercial production manual. With these and the 'mother of invention', we formulated a business outline and set to work. In my mind, I could again hear the admonition that "anything worth doing is worth doing well".

"We took three small loans with Beverly's delightful landlady, once for the beginning expenses, once to import a Japanese tofu grinder and two stainless steel tofu forms, and again for a used telephone company truck as the delivery van. These loans had a great effect on Beverly, as each time that we would borrow money, she would disappear for a few days. All monies were gratefully paid back.

"We used some of the crocks from my childhood, one smaller for the 1st stage of the nigari solution and another larger to soak the two to three daily batches of soy beans. The various stainless steel vessels were found at local restaurant supply stores.

"The Cumberland General Store carried an impressive inventory of cast-iron ware as might have been found in common use in a 19th century farmstead. I asked about larger vessels and they said that the foundry would occasionally cast larger kettles for rendering and so forth. It was a few long months until a 17½ gallon kettle was ready. It was delivered by truck. It took some time to prepare it for our use, chasing the roughcast, cleaning it and seasoning with several runs of beans that were then respectfully disposed. A corn/feed grinder was crudely adapted to make the *go* [fresh soybean puree]. It was later replaced with a proper machine.

"I fashioned a stock-pot heater from some steel channel and the burner from a large water heater. Such heaters were not so easily found then as now and there was more ingenuity than cash. Tested outdoors first, it was then placed in a fireboard installation beneath a vent in the ceiling. I still have the fire extinguisher that was purchased for the room.

"The Honduran man, Albert, who had been the juice maker for the restaurant had upgraded to a more modern press for his operation and we bought the heavy wood and iron screw press. I fashioned a stainless steel sieve and collar that fit it to the purpose.

"The chemistry and oceanography classes at university came in handy to make good sense of the specific gravity of the saline solutions and ratios for the sizes and optimal temperature of the batches. A woodworker from Arvada, Colorado made the cedar barrels and redwood forms to my specifications. A sheer voile fabric was used for the liners in the tofu forms.

"A local farmer heard of our enterprise and offered to plow virgin soil to plant a few acres of soybeans. He stored the beans there and we would fly them out a ton at a time. He generously tried several varieties until we found one that was best in flavor, texture and tofu yield. Our research had shown us the variables for fine and soft tofu or the more firm varieties. We fixed the process to produce a tofu that was just slightly on the softer side of firm, to include the smooth texture with the firmness to withstand transport. Within a year, the ratio was of a consistent quality at about a 4.25:1 yield, tofu to soaked beans, with the Westbrae nigari. Pushing the chemistry or methods beyond that and the tofu would not stand properly.

"For a short time, we had the good help of very modestly paid assistants. Properly cleaning the equipment was nearly half the day's work. Upon instruction from the local health department, we used boiling water to clean the wooden vessels, a practice that would not likely pass these many years later.

"Beverly and I paid ourselves after business costs to cover our personal expenses. Hopes were to one day expand into something more viable. We sold our products locally in Boulder and Denver and by air to Aspen and Rapid City.

"We also made soymilk in the quart size, vanilla and carob flavors. Beverly printed a brochure with some of her tested recipes using our soymilk and tofu. A graphic artist, somewhat in the style of R. Crumb, nicely drew up our labels and signs.

"After almost two years, Beverly suddenly abandoned our project and I continued for a couple of months solo. The already early, long and hard work became too much and I was forced to close up shop. (This put our dear farmer at a great disadvantage. Hoping to help recoup his losses, I steered him to the new venture in town, White Wave.) She then absconded with the truck, all of the equipment and one other item. I have not seen or heard of her since.

"Steve Demos and White Wave had no influence on the Spinning Kitchen; he was doing good factory production and we did traditional hand-made style. No conflict. (I have read that White Wave was sold for some millions. I miss the tofu.)

"Gene Casternovia seemed to enjoy having a tofu shop above his restaurant as if it were part in parcel. Annie seemed increasingly annoyed with our activity upstairs.

"About a year after the demise of The Spinning Kitchen, I received a call from a couple in Safford, Arizona who were putting together a lovely vegetarian restaurant called

© Copyright Soyinfo Center 2013

Desert Gardens. I gave a shopping list over the phone. When I arrived, in fact not a thing had been done. We drove around southern Arizona and northern Mexico for a few days looking for a masa grinder or something that might be made to work and other kitchen implements. I left after a week or so with little having been accomplished. They had my production notes and later I heard that they had indeed gotten something going.

"Further levels of detail and I might have a book of my own. I am very recently aware that there are other varying accounts of this time and activity." Address: P.O. Box 21128, Cheyenne, Wyoming 82003. Phone: 307-214-9510.

13037. Kastel, Mark. 2009. Cornucopia Institute provides further clarification on Silk importation of soybeans from China. http://www.organicconsumers.org/articles/article_18064.cfm#. 2 p.

• ***Summary:*** "1. Silk, a pioneering brand [of soymilk] in the organic marketplace, used 100% organic soybeans in their products prior to their acquisition by Dean Foods.

"2. Dean Foods is an $11 billion agribusiness giant and the largest milk processor in the United States. They own over 50 milk labels around the country, including Horizon Organic, a brand that heavily depends on factory farms each milking thousands of cows.

"3. According to reports by farmers and farmer-owned cooperatives, after Dean Foods purchased the company, they discontinued buying some or all of their organic soybeans from domestic organic producers and told the farmers that their decision was based on price–a price that American farmers could not match.

"4. Dean Foods gradually started introducing additional varieties and flavors [of Silk], many made with 'natural' soybeans. These are conventional soybeans. The percentage of their products manufactured with organic soybeans declined steadily over the years, and recently plummeted.

"5. Dean Foods' statement about buying all North American soybeans was recently put up, presumably, since we had announced the imminent release of our report. We have no way of verifying whether the information is accurate. Unlike their two competitors in the refrigerated dairy case (Organic Valley and Wildwood), Dean Foods refused to transparently participate in Cornucopia's study–depriving their customers of an independently verified review of their practices.

"6. In terms of Dean Foods buying a 'small portion' of their soybeans from China in the past, that seems to contradict the reports from organic growers in the United States, and the company has never released any hard data on their purchases.

"7. Recently, Dean Foods reformulated their Silk product line changing almost all their products over to 'natural' (conventional) soybeans. They did this, quietly, without telling retailers or changing the UPC code numbers on the products. Many retailers reported that they didn't find out until their customers noticed and complained.

"8. To add insult to injury, not only did the price of Silk products not go down when they converted to cheaper conventional soybeans, but they now reintroduced three products with organic soybeans and raised the price on those. Greedy profiteering plain and simple.

"On a recent visit to Whole Foods in Milwaukee (May, 2009) the store was offering 25 different Silk soy milk products, in different sizes and flavors, including creamers, of which only one (1) was organic. So much for Dean Foods and their WhiteWave division's commitment to the environment, consumer health and the hard-working family farmers that produce certified organic soybeans in this country." Address: The Cornucopia Institute, P.O. Box 126, Cornucopia, Wisconsin 54827.

13038. *Iowa Soybean Review* (*Iowa Soybean Association, Urbandale, Iowa*). 2009. Farmer vision credited for soyfoods industry growth. 20(7):10-11. Spring.

• ***Summary:*** "The soyfoods industry experienced considerable growth in the past two decades. It started with just a few small companies selling tofu or soymilk to a small, niche market. Today, soy protein is included in thousands of food products, and soyfoods can be found in nearly every grocery store.

"Soybean farmers in Iowa and Illinois can be credited for the advancement of the soyfoods industry. It was their vision to use checkoff dollars to fund soyfoods research, education and promotions, which resulted in much of the industry success we see today.

"Started in the 1990s: In the mid-1990s, the former Iowa Soybean Promotion Board (ISPB) funded an industry study that showed the market potential for soyfoods. From there, the board allocated funds to help promote and grow the market.

"One of their first programs included educating women on the West Coast about soyfoods by using Iowa soybean farmer Yvonne Wente, of Waverly, as a spokesperson.

"'To support the rollout a new soyfoods beverage in southern California, we created a supporting ad and public relations program for ISPB using Wente as the spokesperson,' says Dee Munson, a nationally recognized food expert and veteran food marketer who worked on several of the early projects for ISPB.

"'A print ad promoting soyfoods ran in *Sunset, San Diego Magazine, Los Angeles Time,* along with radio commercials in L.A. and San Diego,' says Munson, who currently owns The Food Professionals based in Seattle, Washington. 'We also conducted numerous media interviews with Yvonne Wente as the spokesperson in the area.

"'The ads and interviews offered a booklet of information about the benefits of soyfoods for women,' Munson continues. 'More than 10,000 were requested, and

© Copyright Soyinfo Center 2013

the promotion board had to open an additional 800-number to handle the requests. A very special extension of the program was sponsorship of Dr. Andrew Weil as a speaker for a fundraiser of the Wellness Group, a cancer service organization.

"'It was ISPB's vision to fund this program and raise awareness about soyfoods, and it really got the Iowa soyfoods program jump-started,' Munson says."

"The Soyfoods Council: To show its commitment to this industry, ISPB created The Soyfoods Council in 2000 and hired food industry expert Linda Funk to head the organization as executive director."

"Under Funk's direction, The Soyfoods Council has published a cookbook called *Simply Soy,* implemented promotional programs, educated chefs throughout the United States about using soyfoods, increased the use of soyfoods in the food service industry, worked with editors from national food publications and created soy recipe contests with adults and kids.

"'We continue to educate food service personnel, chefs and consumers about ways to increase soyfoods in their diets and dishes,' Funk says. 'It's been great to see such huge advancements in the use of soy on restaurant menus.'"

For more, go to www.thesoyfoodscouncil.com.

Note: This might be generously described as an "alternative" view of what caused the growth and development of the soyfoods industry.

13039. *Soyfoods Canada Newsletter.* 2009. Canadian soybeans–a sustainable crop. Spring. p. 4.
• ***Summary:*** "Canada accounts for almost 2% of the world's soybean production. In 2007, approximately 2,700,000 tonnes [metric tons] were produced in Canada, on 2,870,657 acres (1,161,755 hectares). Soybeans are grown in three provinces: 215,006 acres in Manitoba, 434,715 acres in Quebec, and 2,224,936 acres in Ontario.

"Canadian soybean producers are known for innovative and sustainable production practices... Canada's soybean industry is known for its superior ability to segregate and trace soybean crops from seed through to end user, referred to as Identity Preservation (IP).

"Over 40%, or about 1.7 million tonnes of Canadian-grown soybeans are exported to markets such as Japan, Malaysia, Singapore, Hong Kong and Taiwan. They are used to make Asian food staples such as tofu, miso, natto, and soymilk. Japan only produces about 12% of its own country's food grade soybean requirements, and their consumers demand non-genetically modified product. Japanese buyers value Canadian soybeans because of our industry's IP ability.

"Growing soybeans leaves a relatively small carbon footprint. As a legume, the soybean plant's ability to 'fix' its own nitrogen virtually eliminates the need for petroleum-based nitrogen fertilizer. The wide canopy of leaves formed by soybean plants helps to minimize the need for herbicide sprays."

• ***Summary:*** "Speakers: R.K. Sharma, American Soybean Association International Marketing.

Dr. Ratan Sharma has a Ph.D. in soymilk and tofu technology from Banaras Hindu University, Varanasi, India. He is an international expert in soymilk and tofu production technology. He is credited with transferring the soymilk machine (SoyaCow) technology from Canada to India on behalf of the Child Haven International and ProSoya Inc. Dr. Sharma has been duly trained in Canada and USA on the soymilk production and utilization. He has the privilege to train the soymilk and the tofu course trainees from all over the world at the University of Illinois, USA. Dr. Sharma has been to Canada, USA, Egypt, Singapore, Uganda, Tanzania, Sri Lanka, South Africa, Nepal and Bangladesh to help the soymilk programs in these countries. Dr. Sharma has more than 15 years experience into the soymilk and tofu commercialization. The efforts of Dr. Sharma for transferring this SoyaCow technology are really remarkable as it has created lots of employment opportunities and low cost nutrition in India and in many other countries. Dr. Sharma has established more than 375 soy food manufacturers in India and many other countries and is helping them on a regular basis in product development, marketing etc.

"The overall objective of ASA-International Marketing's (ASA-IM) activities is to increase soybean consumption in the SAARC countries and, thereby, to create larger markets for U.S. soybeans and soybean products." Address: NSRL, Univ. of Illinois at Urbana-Champaign, Room 170 NSRC, 1101 W. Peabody Dr., Urbana, Illinois.

• ***Summary:*** Production of tempeh has long been the domain of cottage or home industries. At one kampung (village; or neighborhood, or district in a city) in Tegal Parang, South Jakarta, you can see how tempeh is made at home. About 90% of the 300-plus inhabitants of Tegal Parang ("city of soy") make tempeh and/or tofu for a living. For more than 30 years, Muhammad Bintoro, age 56, has been living in this kampung and making tempeh. His tempeh shop is in his kitchen plus living room inside his home of 20 square meters that he has called home for the past 15 years.

Each day Muhammad buys 40 kg of soybeans, which his son washes and soaks overnight. The next morning Muhammad pours the softened soybeans into a machine that he built himself. He used to tread the soaked beans underfoot to remove the hulls, but now he simply runs them through this machine. The process for making tempeh is then described. Tempeh that is started on Thursday will be ready to sell on Sunday.

A color photo shows soaked soybeans being poured (with their soak water) into a square wooden box atop a soybean dehuller. Address: Staff writer, Japan.

13044. **Product Name:** Hijiki Tofu Salad.
Manufacturer's Name: Basic Soy Beanery (renamed Hodo Soy Beanery in Sept. 2005).
Manufacturer's Address: 1600 S. De Anza Blvd., San Jose, CA 95106. Phone: 408-517-8958.
Date of Introduction: 2009. July.
Ingredients: Soybeans, water, calcium sulfate, hijiki, shiitake mushrooms, cilantro, miso, soy sauce, sesame oil, brown rice syrup, sesame seeds.
Wt/Vol., Packaging, Price: -
How Stored: Refrigerated.
New Product–Documentation: Labels by brought to Soyinfo Center by Minh Tsai on 2009. Sept. 16.

13045. Vitasoy International Holdings Ltd. 2009. Annual report 2008/09: Where healthy life begins. New Territories, Hong Kong. 184 p. July. 30 cm. [Eng; Chi]
• ***Summary:*** For the fiscal year ended 31 March 2009, adjusted group turnover (sales) was HK$2,783 million, up 14.3% over the previous year. Of these sales, 53% came from Hong Kong and Macau, 20% from Mainland China, 15% from North America, 10% from Australia and New Zealand, and 2% from Singapore.

Gross profit was HK$1,279 million, up 13.1% from the previous year. Sales analysis by product categories: Soymilk 44%, tea 20%, tofu 10%, lunch boxes and snacks 8%, dairy milk 5%, etc.

At "Chairman's statement," a large color photo shows Winston Yau-lai LO, age 68. His resume is on p. 49. The resume of Ms. Yvonne Mo-ling LO, aged 61 (who is on the board of directors), is on page 51. Total dividends for the year are 21.5 cents per share.

In North America, Vitasoy USA lost money but, "in terms of profit from operation, it continued to achieve improvement by narrowing its operating loss further to HK$6 million, versus HK$11 million for the fiscal year 2007/2008. Tofu sales in North America grew by 11% "and pasta / wrap sales by an even stronger 29%. However, the sales of soymilk and imported products were down by 18% and 20% respectively." "In the last quarter of 2008, it was decided that Vitasoy USA should exit the loss-making aseptic soymilk business and concentrate on the tofu and Asian market businesses which were making positive contributions to the Group" (p. 33-34).

Singapore: "In early April 2008 we acquired the entire equity of Unicurd–a leading soyfood manufacturer and marketer in Singapore." Details on Unicurd's sales are given as are color photos of 8 of its products.

A five-year summary (2005 to 2009; p. 4) shows that, during this entire period, sales (turnover) increased 50.5% and annual profit increased 52.8%. Address: No. 1, Kin Wong Street, Tuen Mun, New Territories, Hong Kong. Phone: (852) 2466 0333.

13046. Bibliothèque municipale de Lyon. 2009. Le mouvement travail-études [The work-study movement (Website printout–all)]. fr.wikipedia.org/wiki/Mouvement_Travail-%C3%89tudes Printed Aug. 17. [Fre]
• ***Summary:*** The 3rd photo from the top on the first page shows the outside of the building housing La Caséo-Sojaine. A large sign atop the near end of the building displays the

company's name. Six people (who appear very small) are standing in front of the huge building. The photo is taken from *Lü Ou jiaoyu yundong* (The Movement for Education in Europe) (published in Tours, France, in 1916).

The text (in French) states: The work-study movement (*Qingong jianxue yundong*) takes its direct place in the history of the movement for education abroad that involved several thousand young Chinese, starting at the end of the 19th century. Studies abroad had, as their first goal, the creation of an intelligentsia necessary to enable China to gain access into modernity. These students of a new mold first went to study in Japan, then in the United States and in Europe.

The approximately two thousand students who took part in the work-study in France are alive at a crucial moment in the history of China. The passage between the end of the Manchu dynasty and a start of the Republican era generates confusion and instability; it is followed by combats among the war lords and their exactions. To these disorders and to great uncertainty, is added the enormous difficulty of building a new country paralyzed by a disastrous economic situation.

The core idea of the work-study movement is conceived by Li Shizeng (1881-1973) who knows France well, having completed his studies there as early as 1902, first at the *Ecole Pratique d'Agriculture,* on the outskirts of Paris at Montargis, then in the Paris capital, at the Pasteur Institute. The influence of anarchist ideals well disseminated in France at the time and his deep admiration for the French culture, next to the vast network of relationship that he created among important representatives of the political, cultural, economic and diplomatic circles, can easily explain that he was able to bring to fruition his plan to enable a large number of his compatriots to achieve studying in France all the while working to pay for their studies.

In 1908 in La Garenne Colombes (in the Paris suburbs), Li started a factory for processing soybeans into tofu and other soyfoods; this factory provided work to about thirty persons from his village of origin in China. In 1909 Li returned to China to plead his cause with the General Governor of the province of Zhili. Indeed the experience of the factory at La Garene illustrates well the principle of *qingong jianxue*–a school is opened not far from the factory for the benefit of the workers where Li Shizeng and Wu Zhihui (1864-1953; this movement's other founder) teach courses in Chinese, French and scientific subjects.

In a very frugal framework, there is also a very strict moral code (with, among others, the following prohibitions): no alcohol, no tobacco, no gambling, no prostitutes, etc. This framework provides rhythm to the life of the student-workers who share their daily life between laborious work and applied studies during their free time. According to the vision of the founding members of this movement, such a principle thus divided between work and study would permit the building of a new man: a citizen devoted to work and of an irreproachable moral rectitude. Similarly, this formula would have enabled to release, in the social life of each person, values of mutual help, cooperation and equality among men–which recalls the values advocated by certain anarchists.

At the fall of the Manchu dynasty, Li Shizeng creates in France in 1912 the Association for Work-Study (*Liu Fa jianxuehui*) with the support of Cai Yuanpei (1868-1940), at the time Minister of Education, and Wang Jingwei (1883-1944). A preparatory school is opened in Peking, where students, paying a very small enrollment fee, receive courses in French and general culture for six months with the goal in mind to continue their studies in France thanks to the arrangements made by Li so that they would be received in the schools and lycees of Montargis, Paris and Fontainebleau. Within two years, about 140 Chinese students will have come to France.

13047. Pasteur Institute, France. 2009. Repères chronologiques Li Yu Ying (Li Shizeng) 1881-1973 [Chronological milestones for Li Yu-ying (Li Shizeng) 1881-1973 (Website printout–all)]. www.pasteur.fr/infosci/archives/liy0.html Printed Aug. 17. [Fre]

• ***Summary:*** In the upper left corner is a small portrait of Li Yu-ying. We are not told when or where it was taken. The text reads:

1881 May 29–Chinese agronomist and pedagogue born on this date at Goayang (in China). His father was a dignitary at the Imperial Court of Manchuria [Manchu dynasty].

Li studies in China in a milieu open to Western / Occidental culture.

1903–Accompanies the Chinese Empire Ambassador to France.

1903-1906–Abandons his intention of becoming a Mandarin in order to undertake studies in agronomy at the Chesnoy School of Practical Agriculture (*Ecole pratique d'agriculture du Chesnoy*) at Montargis, located about 60 miles southwest of Paris. Drawing inspiration from the thought of Kropotkin and Proudhon, he creates the "Society for Moral Advancement" and takes part at the publication of the journal 'Xin Shiji" (The New Century).

1906-1910–Leaves Montargis for Paris where he enrolls in courses in chemistry and biology at the Sorbonne and works as an intern in the laboratory of Gabriel Bertrand at the Pasteur Institute.

1907–Joins the Tongmenghui, a clandestine resistance movement founded by Sun Yat Sen that aims at "giving back China to the Chinese (people), establishing a Republic and equally redistributing the land."

1908–Creates at La-Garenne-Colombes the "Caséo-Sojaine," a soya processing factory, thinking that soya could indeed help China meet its dietary needs. He will provide there work for about thirty worker-students that he brings from China to whom he provides additional intellectual

© Copyright Soyinfo Center 2013

training by setting up evening classes.

1909–Welcomes his friend Sun Yat Sen, on a visit to Paris, to his "Caseo-Sojaine" factory at La-Garenne-Colombes.

1911–Returns to China as the revolution puts an end to the Qing dynasty

1912–Publishes with L. Grandvoinnet: "Soya–Its Cultivation, Dietary, Therapeutic, Agricultural and Industrial uses."

1912–With the support of the Minister of Education, Cai Yuanpei, creates the Association for Work-Study in France. And thus, through 1914, one hundred and forty young Chinese, having undergone an introduction to the French language in a preparatory school in Peking will travel to France to study there.

1914–Opens the first Chinese restaurant in Paris.

1915–Creates in China the Society for Diligent Work and Frugal Studies.

1916–Creates in Paris, in collaboration with Yuanpei, the Franco-Chinese Society for Education in order to promote cultural exchanges between France and China.

1920–Takes part in the creation of the Franco-Chinese University in Peking.

1921–Takes part in the creation of the Franco-Chinese University in Lyon, France.

1922–On the occasion of Louis Pasteur centenary, Li favors the idea of a Pasteur Institute in Shanghai. The project is postponed for lack of funds. L. Boëz / Boez will take up the idea again in 1929 and the project will finally see the light of day in 1937.

1925–Becomes the first President of the administrative council for the Peking Imperial Palace Museum.

1929–Creates the Peking National Academy.

1932–In Peking meets Paul Langevin, entrusted by the League of Nations with a mission to reorganize public schooling in China.

1933–Under his (Li Yu-Ying's), as well as Zhihui's and Cai Yuanpei's initiative, a permanent Chinese delegation to the international organizations for intellectual cooperation sees the light of day as well as the Sino-International Library installed in Geneva, Switzerland.

1937-1944–Travels back and forth between China and Europe to aid in the fight against totalitarian powers and promote cultural exchanges.

1948–Travels for the last time to Peking to organize the 19th anniversary of the Peking National Academy.

1949–Leaves China to settle in Uruguay, where he lives until 1955.

1954–Creates and manages the International Chinese Library of Montevideo.

1956–Settles in Taiwan where he becomes the first General Manager for the National Palace Museum.

1966–Travels to France to try to restart again the Franco-Chinese Institute of Lyon. 1973–Li dies in Taiwan.

• ***Summary:*** Minh was born on 10 Jan. 1971 in Saigon, the capital of South Vietnam (later renamed Ho Chi Minh City). His name at birth was Minh Thai and he was the first child in the family. A younger brother was born later, followed by a sister. His parents and grandparents were all of Chinese ancestry. At the time of his birth, his parents were both teachers. His father taught history and music at a private high school and elementary school. His mother taught 1st grade at a private elementary school.

© Copyright Soyinfo Center 2013

The Vietnamese war, which had started in Aug. 1964 was raging and Richard M. Nixon was president in the USA.

His formal education began when he attended first grade at the school taught by his mother. She was a strict teacher–especially with her own son.

1975 April 30–The Vietnam war comes to an end as the Vietnamese National Liberation Front takes control of Saigon and the Saigon regime surrenders. The day before a helicopter had lifted the last fleeing people off the roof of the U.S. embassy in Saigon. North Vietnamese now begin transforming South Vietnam along Communist lines.

In 1977 he was pulled out of school by his parents, who stopped teaching at about the same time–before they were branded intellectuals and forced to stop. His parents took odd jobs to try and earn a living. Minh was sent to a tutoring system, but he escaped and thoroughly enjoyed himself from 1977 to 1980 doing what he wanted to and becoming a little entrepreneur to help the family earn money. He has fond memories shopping for food in the neighborhood with his grandparents.

In 1980 his family of five became one of the boat people who fled Vietnam. Their boat landed in Malaysia, where they lived on an island in a refugee camp run by the United Nations. They began to seek political asylum, which was finally granted to them by the U.S. government. They were put on an airplane and flown to the United States.

On 16 July 1981 the family of five landed at San Francisco International Airport. At immigration, the family surname was changed from Thai to Tsai (their correct Chinese surname). Minh was age 11 and spoke no English. They settled in San Francisco and were placed on the general welfare system of food stamps, etc. Minh entered 5th grade at the E.R. Taylor Elementary School, a public school near their home. With the help of an ESL (English as a Second Language) program, he was fluent in English within a year.

In 1985, after graduating from elementary school, he entered a private high school in San Francisco–University High School in Pacific Heights. Taking college preparatory courses, he graduated in June 1989.

In the fall of 1989 he enrolled in Columbia University with a scholarship. Studying economics and Asian studies, he graduated in 1993 with a BA in economics.

He then entered graduate school at Columbia Univ. in School of International and Public Affairs (SIPA). He graduated in 1994 in an accelerated course with an MA degree.

He went to Hong Kong and went to work for J.P. Morgan as an investment banker. There, in 1995, he met the young lady (Jean Ku) who would later become his wife. Hong Kong was not transferred by the British to Chinese control until 1 July 1997.

In 1996 he left J.P. Morgan to live in Costa Rica for 3 months; he worked as a chef in a vegetarian restaurant, read and wrote. Then he returned to San Francisco where he worked for the management consulting firm of Arthur D. Little.

In 1998 he left the world of high finance and worked for one year for a small Web software company named Phoenix Pop. He was paid well in both real money and stock options.

In 1999 he returned to the world of finance, starting work at Charles Schwab Corp., the brokerage firm. Both his parents were still living. Also in 1999 he reconnected with his wife-to-be when she enrolled in the University of California at Berkeley as a graduate student. They began dating and soon became close.

In 2002 he left Schwab and decided to take some time off; he worked part time as an independent contractor / consultant for Wells Fargo.

In 2003 Minh decided to drop out. He and his girlfriend enjoyed fine food and traveled the world, to Vietnam, China, Burma, France, Italy, etc.

After a year or so, he and his girlfriend returned to San Francisco. With four cousins on her side (all entrepreneurs and all very interested in food) they decided to meet once a week or so to cook and enjoy the meal together. Right from the beginning they began talk about how it would be interesting for them to start a food business. Their first idea was a high end / upscale Asian supermarket, but they concluded it was an idea ahead of its time.

They also chose a theme for each meal–Chinese, Italian,... and tofu. But they had a problem finding good, fresh tofu. So they decided to try making fresh tofu themselves. They found a place in San Jose (Sogo Tofu, 1600 S. De Anza Blvd., San Jose, CA 95106) that would let them use its facilities on weekends. Since everyone but Minh worked during the week, the six met there on weekends and learned to make tofu.

In the fall of 2003 they were ready to go. They called their company "Basic Soy Beanery." They began to sell their unique line of tofu and related products (all made from soymilk) that fall at a farmers' market in Palo Alto on Saturdays. Their first day, sales were $120. So for the next few months they met Friday evening to make their soyfood products at Sogo Tofu, sold the food on Saturday at the same farmers' market, then met in San Francisco each Sunday to have a meal and "debrief."

The Palo Alto farmers' market closed for the winter in December 2003. By now they felt they had tested and proved their concept, so they were ready to start a real company. In the spring of 2004 they all formed Basic Soy LLC; today the company traces its origin back to May 2004.

Before May 2004 the company sold the following products: Soy Milk. Silken Tofu. Medium Tofu. Braised Tofu (firm, grilled). Yuba. Soy Omelette (with yuba). Soy Croquettes (meatless meatballs). Poached Yuba Loaf.

The cousins returned to selling their fresh soy products at farmers markets.

But by the fall of 2004 it had ceased to be fun for many.

© Copyright Soyinfo Center 2013

There may have been some viability in the business, but no one but Minh wanted to continue. The others told him to do what he wanted with the idea; there was no talk of ownership, a buyout, or anything like that.

So Minh and Sogo employees started to make tofu and related soy products once a week. Minh would sell the products at a farmers market, expanding to the one in San Francisco and then the one in Berkeley. The first article about Minh's enterprise appeared in the *San Francisco Bay Guardian* (May 4-10, 2005). He did that solo for one year. His girlfriend (Jean Y. Ku) had a good job and she paid his way–proof to him that she was a solid, reliable person.

They were married on 15 Oct. 2005 at the Brazilian Room in Tilden Park.

That same fall, he decided that the time had arrived to look for financing to grow the business. It was already breaking even. He called the cousins together and told them they each owned one sixth of the company–but only if they were willing to invest in it would they be paid dividends. None of them wanted to invest and since none of them had done any work for the past year or ever before claimed any ownership, he felt that he owned them nothing. But now they decided to insist on owning one-sixth. And since they were close relatives, in the name of family harmony, he said he was willing to buy them out. They hired a lawyer and the negotiations went on for two months in the summer of 2005.

Now Minh would have to go looking for outside investors. But that's not how things worked out. A local man named John Notz had read the article in the Bay Guardian, phoned Minh and offered to invest money. Minh turned him down, in part because John was not interested in selling tofu at the farmers' markets. A few months later John called Minh again and said he would like to meet Minh at his space at the Berkeley farmers' market on Thursday. They got along well and soon John was selling the soyfoods at farmers markets, first with Minh and then by himself. Before long they hired a lawyer and formed a corporation.

On 7 Sept. 2005 the name of the business was officially changed to Hodo Soy Beanery. In Cantonese Ho means "good" and "do" (actually dow or dou) means "bean." Address: Founder, Hodo Soy Beanery, 2923 Adeline Street, Oakland, California 94608. Phone: 510-735-4587.

13051. Clark, Marler. 2009. Quong Hop & Co. ordered to pay $90,000 for violating food-safety laws (Web article). http://www.uslaw.com/ law_blogs/?item=654241. 1 p. Printed 2 Oct. 2010.

• ***Summary:*** "Quong Hop & Co. failed to maintain its Airport Boulevard plant in a sanitary condition, didn't stop pests from entering food-processing areas and didn't ensure that food was protected from contamination, said John Wilson, a San Mateo County deputy district attorney." However there is no evidence that anyone got sick from the long-time tofu maker's products.

13052. Lee, Henry K. 2009. $90K food-safety fine for South S.F. tofu maker. *San Francisco Chronicle.* Oct. 17.

• ***Summary:*** Quong Hop & Co., a tofu maker on Airport Blvd. in south San Francisco, has been fined $90,000 for violating food-safety laws. According to John Wilson, a San Mateo County deputy district attorney, the company failed to maintain its plant in "sanitary condition, didn't stop pests from entering food-processing areas, and didn't ensure that food was protected from contamination.

However there was no evidence that anyone got sick from eating the products made by Quong Hop, whose brands include Soy Deli, Soy Fresh, and Raquel's.

In 2007 Quong Hop recalled a number of tofu products after detecting a bacterium, *Listeria monocytogenes,* in them. This bacterium "can cause serious, sometimes fatal infections, in young children, frail or elderly people," and those with weakened immune systems. Address: Chronicle staff writer.

Side view of whole mill, assembled.

Side view showing upper and lower grooved surfaces.

13054. Sharma, Ratan. 2009. Bio-Data [Resumé]. India. 2 p. Oct.

• ***Summary:*** Note: Ratan Sharma, PhD, is a humble man, dedicated to helping others. He prepared this in Oct. 2009 at the request of one of the Members of Parliament in India, who used it in recommending Dr. Sharma for a high level award. Soyinfo Center had to make a special request to include it here.

"Name: Ratan Sharma. Date of birth: 1 March 1961.

© Copyright Soyinfo Center 2013

© Copyright Soyinfo Center 2013

Place of birth: Ram Nagar, Allahabad [in the north Indian state of Uttar Pradesh (UP)]. Native address: V&PO [Village and Post Office]: Ram Nagar (Sirsa), Distt. Allahabad (UP). Present address: KH-177, Kavi Nagar, Ghaziabad–201 002 (UP).

"Qualification: Ph.D. from Banaras Hindu University in Soya Technology.

"Additional qualification: Short term courses on Soya food processing and Nutrition from the University of Illinois, and Texas A&M University, USA.

"Special achievements: Transferred a patented soymilk processing technology from Canada to India and helped the entrepreneurs to start the soy food business very successfully. Initiated and developed approx. 364 such entrepreneurs in India. This created a substantial employment opportunity and low cost affordable quality nutrition in general.

"Countries visited: Upon the success of this technology in India I was invited by many other countries to implement such technology in those countries for the better nutrition and employment generation especially in the African countries. With the help of this technology I worked to improve the nutritional status of the people who are suffering from HIV and AIDS. In this connection I visited Canada, Egypt, Singapore, Uganda, Tanzania, South Africa, Thailand, Nepal, Bangladesh, Sri Lanka and USA for training, demonstration and delivering lectures.

"Special Features: Since my childhood I had the compassion of doing some thing for the people of my country. I realized that a large number of our population is suffering from the malnutrition problem, and the regular protein sources are almost unaffordable for most of the people. This situation forced me to develop some low cost protein source which any one can afford. After completing my masters from the Banaras Hindu University I decided to do my Ph.D. for developing low cost nutrition through soybean. Also, I was influenced by Mahatma Gandhi who realized soybeans as a low cost nutritional source for this country. He tried a lot to introduce soy in the Indian diet in the year 1935 but because the processing technologies and systems were not very good during those days so Soya products could not get acceptance in the Indian diet at that time. I completed my Ph.D. on developing the low cost Soya products and started working to find some suitable processing system to process the soybeans into the soymilk and its derivatives on a cottage industry level at a very low cost. In the mean time I came to know about such technology developed by a Canadian company in Canada. I contacted them and with the help of another Canadian NGO (Child Haven International) I started working on the process of the technology transfer. I coordinated between all three organizations and finally transferred this Patented Canadian Technology successfully to an Indian company (SSP Pvt. Ltd) in the year 1995. I helped SSP Pvt. Ltd. to develop the Indian soymilk processing system based on that Canadian technology and helped hundreds of the unemployed people to use these machines as a cottage scale business for their employment and to produce a better quality low cost nutrition for the people of India. I worked very closely with the entrepreneurs using this technology and helped them to develop as a very successful entrepreneur. This technology was so successful that many govt. organizations and universities installed this processing system to promote this technology with the same objective. ICAR [Indian Council of Agricultural Research], CSIR, Indian army, Army Rehabilitation Centers, National Research Development Corporation (NRDC), Khadi and Village Industry Commission (KVIC), Ministry of Small and Medium Entrepreneurs (MSME), marketing corporations of a few state, industry departments of the Government of India (GOI) promoted and supported this processing technology for the same purpose of employment generation and promoting the low cost nutrition as well. Government of India included this machine under the Prime Minister's Employment Scheme and providing subsidized loan to the unemployed people interested to buy this system. I transferred this technology when there were no such low cost soymilk producing technology available in India and rarely in the world.

"This technology got its way to many developing countries under human feeding programs all over the world. In this connection I visited many countries and implemented this technology in those countries also for promoting the low cost high quality protein through this technology. Also, I got chances to train the group of people from all over the world on this technology under such training programs in USA and Canada.

"While working with US and Canadian organizations in India I got enough opportunity to migrate to USA or Canada but I decided to live and work in India only to work for my fellow Indians who need me and my expertise most.

"Although I did not publish any research papers in the scientific journals but established more than three hundred and fifty such soymilk processing units based on this technology. All of these machines are running successfully and employed a large number of people in their business and selling low cost nutritional soy products to the Indian population.

"India is facing a high incidence of protein calorie malnutrition problem. Through this successful development I am trying to improve the nutritional status of the country by providing low cost affordable and quality nutrition to all my fellow Indians. My overall goal is to eliminate the malnutrition problem from India by developing low cost nutritious products which every one can afford. I am continuously and diligently working on this.

"Ratan Sharma, Ph.D."

Note: The number 350 soymilk processing machines is a conservative number; it is the number of machines that Dr. Sharma introduced to India that were in operation at the time

© Copyright Soyinfo Center 2013

this document as written. This number includes about 325 SoyaCows (SC20 model), four SoyaCow plants with 200 liters per hour capacity, some non-SoyaCow plants made in India, and the rest VitaGoat plants from Malnutrition Matters (MM) in Canada. Ratan says that MM has not had significant commercial success in India. VitaGoat is used mostly by NGOs with very little production.

The total number of soymilk and tofu machines that Dr. Sharma has sold up to Oct. 2010 is actually close to 500. In the beginning, many small soy businesses failed, and sold their machines to someone else.

Quite often ProSoya orders larger capacity soymilk plants from SSP but not the complete plant. They source the other parts elsewhere, either in India or near the place where they are going to supply the plant.

SSP still manufactures the 100 liter/hour and 200 liter/hour capacity soymilk plant. They decided it almost a year back. After they transferred the SoyaCow business to Pristine Plants (PPI) on 9 Sept. 2006, they didn't manufacture any SoyaCows. SSP is a very big and technically sound company. They improved the SoyaCow somewhat from its original model. Address: PhD, Manager, the SoyaCow Centre, KH-177 Kavi Nagar, Ghaziabad 201 002 UP, India.

13055. Yollin, Patricia. 2009. New factory to help unravel mystery that's tofu. *San Francisco Chronicle.* Nov. 12. p. E-1.

• ***Summary:*** When the subject is tofu, some people say things like: "Too bland. Too rubbery. Too spongy. Too puzzling." Minh Tsai, age 38 and a resident of Albany, has heard it all; he makes tofu and sells it directly to shoppers at 10 Bay Area farmers' markets., and to top restaurants such as Greens, Coi, and the Slanted Door. His goal is to educate people about tofu and demystify it.

In mid-October his soy company, Hodo Soy Beanery, began making tofu and yuba at a 12,000-square-foot state-of-the-art factory in West Oakland–almost five times the size of the old plant in San Jose. Next month, he hopes to start public tours and tastings.

Minh Tsai grew up in Vietnam and arrived in the United States at age 11. Dean Ku is Hodo co-founder and John Notz is the company's co-founder. Address: Special to the Chronicle.

• ***Summary:*** The term used for "grilled tofu" in the *Mengliang Lu* of 1275 is (Chinese characters) which is: (a) pinyin: Jian dou fu, (b) W.-G.: Chien dou fu, (c) Cantonese: Jian dao fu.

In my experience "grilled toufu" is usually prepared in a restaurant or at home and used to make a dish for immediate consumption. Address: PhD, Alexandria, Virginia.

13057. Shu, Xiao Ou; Zheng, Ying; Cai, Hui; et al. 2009. Soy food intake and breast cancer survival. *J. of the American Medical Association* 302(22):2437-43. Dec. 9. [37 ref]

• ***Summary:*** Soyfoods improve breast cancer survival rates, in part because they are rich in phytoestrogens which resemble the human hormone, estrogen. Since estrogen appears to play a role in breast cancer development and progression, is it safe for women with breast cancer to consume soy? A recent large study examined soy food intake in women in China with breast cancer and evaluated the association of soyfoods with cancer recurrence and with death. More than 5,000 women who had been diagnosed with breast cancer were studied for an average of four years after diagnosis. Women who ate the most soy foods had almost a 30 percent lower risk of death during the period studied and were significantly less likely to have a recurrence of breast cancer compared to women eating the lowest amount (5 grams of soy protein or less per day) of soyfoods. These results were similar for both estrogen-receptor positive and estrogen-receptor negative cancer. The use of a common breast cancer drug, Tamoxifen, did not change results. Intakes of more than 11 grams of soy protein, or more than 40 milligrams of soy isoflavones, did not appear to offer additional protection. Women in this study mainly ate traditional soyfoods, such as tofu, miso, soybeans, and soymilk, rather than using soy supplements, fake meats, or isoflavone supplements. In other words, it looks as if a moderate intake of traditional soyfoods is both safe and beneficial for women with breast cancer. "Conclusion: Among women with breast cancer, soy food consumption was significantly associated with decreased risk of death and recurrence."

"Soy food intake, as measured by either soy protein or soy isoflavone intake, was inversely associated with mortality and recurrence."

13059. Moncrieff, Scott. 2009. What the Sam's Chicken? The true story of the man behind the meat. *Focus* (*The Andrews University Magazine*) 45(4):20-23. Fall.
• ***Summary:*** "You go through the serving line at Dining Services, picking up mashed potatoes and gravy, salad, and a drink. Oh, and you add a portion of Sam's Chicken, along with two tablespoons of tartar sauce. It's pricey, at $3.79 a serving–and 25 cents for the tartar sauce–but it has been an irresistible favorite at Andrews University for 40 years. As you work through your five ounces of wheat gluten, soybean oil, soy flour, yeast extract, sea salt and top secret spices, you have no idea of the history of Sam's Chicken, or who Sam is, if indeed there is such a person. But as those 400 calories hurtle past your taste buds and into your bloodstream, sit back and maintain consciousness. I'm going to tell you.

"Our story starts about 6,000 miles away from Berrien Springs, Michigan, near the city of Obihiro, on the island of Hokkaido, in Japan. That is where Michihisa Yoshimura was born on March 4, 1915. His father, a well-to-do businessman, owned a coal mine and raced horses for fun. In some ways, Michihisa was a lot like your average American kid of the Post World War I era. He liked to snow ski, ice skate and play baseball (catcher and left field). As Michihisa got into his teens his mother, a Christian (his father was an atheist), wanted her son to attend a Christian school, so she sent him way down south to Saniku Gakuin, the Adventist college about 50 miles east of Tokyo on the other side of Tokyo Bay.

"There Michihisa providentially–for purposes of our story and title product–worked in the food department, helping manufacture peanut butter, grape juice and bakery products. During summer vacations he worked with his grandfather's flax company, further extending his knowledge of food production. When Michihisa turned 18, in 1933, he was required by law to apply to join the federal army. However, he was rejected because of flat feet–Japan was not yet in a large-scale war and its military was selective. This rejection prepared the way for him to gain permission to leave Japan to attend Madison College, just outside Nashville, Tenn., where he began further studies in 1937. He had been encouraged to go to Madison by Perry Webber (Emmanuel Missionary College class of 1911), a PhD in chemistry who had a special interest in soyfoods, and had spent much time at Madison College as well as in Japan. As Michihisa set off for Madison, Webber suggested he adopt the name 'Sam,' after the biblical Samuel. Thus Webber unwittingly saved us from 40 years of 'Michihisa's Chicken.' Incidentally, Sam's younger brother Zenzaburo, who remained in Japan, trained as a kamikaze pilot, and had given away his clothes preparatory to his final mission–and then, mercifully, the war ended.

"In entering Madison College, Sam had come to the school most suited to enhance his work as a food technologist with soy products. In 1904, E.A. Sutherland, having resigned as president of Emmanuel Missionary College, embarked with his colaborer Percy Magan to open a new school in the South. This institution, originally the Nashville Agricultural and Normal Institute, became Madison College (in 1937), and Sutherland served as president there for over 50 years. This school, like Andrews and Saniku Gakuin, focused on the harmonious development of body, mind and spirit. As part of the plan, students were to work off half or more of their expenses each year. Among the industries which developed on campus was a food factory which, in 1918, became Madison Foods. By the time Sam arrived in 1937, Madison Foods was a leading–probably the leading–developer of soy-based products in the United States, including soymilk, soy meat substitutes and tofu products.

However, times were hard and wages were pennies per hour. Sam's classmate Shirou Kunihira worked in the soymilk production plant, while Sam worked at the bakery, where his duties included running the bread loaves through the slicer. Shirou would get an allotment of soymilk at the end of his shift and Sam would collect the crumbs from the pan under the slicer. With these ingredients the friends would share a humble evening meal. For Japanese and Japanese-American students, there was the added challenge of the United States being at war with Japan. Despite these challenges, Sam graduated from Madison College in 1941 and worked an additional two years for Madison Foods, but now his passion for soy was balanced with a new passion for she.

Sumiko Yano, a.k.a. Sumi, was born in Japan, but grew up in Southern California. At the time the U.S. declared war on Japan, in December of 1941, her family was living in El Centro, California. Her father made his livelihood by arranging for cantaloupes and other valley produce to be shipped to market. In 1942, her family was given a one-month notice that they would be placed in a 'War Relocation Camp' in Poston, Arizona. (After relocation started, Sam and the other Japanese or Japanese-Americans at Madison would hide in the cornfields whenever immigration officials came looking for Japanese persons.) For approximately one year Sumi lived with her parents in an army barracks at the camp, eating in the communal dining area, using a latrine, and working every day in the agriculture department as a secretary, for $19 per month. One day, Sumi received a box of home-baked peanut-butter cookies from someone named Sam. Sam had sent the cookies as part of a thank you to Sumi's family, who had helped Sam's family with a financial transaction at a time when Japanese bank assets were frozen. Sumi wrote back asking for more cookies. Sam, in turn, helped arrange for Sumi to get early release from camp, in order to attend Emmanuel Missionary College, through the auspices of A.N. Nelson, then dean at EMC, but formerly president of Saniku Gakuin when Sam was a student there. Sumi, in turn, decided to pass through Madison on her train

© Copyright Soyinfo Center 2013

trip to EMC, to meet Sam. They met and got acquainted in the home of Perry Webber, and that fall of 1943 found Sam as well as Sumi enrolled for classes at EMC. Sumi worked as a reader in the home economics area for Mrs. Holquist, while Sam worked at the farm and the greenhouse.

The young couple was married on June 12, 1944, at a friend's house in Chicago, and lived in an apartment until Sam's graduation on August 1, 1945, with a BS in agriculture. Their first child, Steve, was born in June of that year. Sumi remembers that a friend drove her to Watervliet, Michigan, where the doctor, sympathizing with her state as a poor student, delivered her baby for free. Sam returned to Japan in 1947 (Sumi and infant Steve followed six months later), and spent ten years helping build up the food factory at Saniku Gakuin. The Yoshimuras returned to Tennessee in 1957, where Sam became production manager at Madison Foods. Continued. Address: M.A., Prof. of English, Andrews Univ., Berrien Springs, Michigan 49104.

13060. Moncrieff, Scott. 2009. What the Sam's Chicken? The true story of the man behind the meat. Part II. *Focus* (*The Andrews University Magazine*) 45(4):20-23. Fall.
• ***Summary:*** Continued: "Near the end of the time he worked there, he began developing Sam's Chicken '1.0,' a canned product. In 1963, Sam resigned from Madison Foods and began work as an independent consultant for Madison Hospital. He also did independent research using the hospital's facilities at night, working on, among other things, improving Sam's Chicken. As far as Sam knows, it was the first product to mix wheat gluten with soy or tofu. Sam says the product was made 'by blending tofu, wheat gluten, and other ingredients; the mixture was whipped, shaped into a loaf, baked briefly to sterilize it, torn into chunks, dipped into batter, then deep-fried to yield a delectable "meatless chicken"' (soyinfo.com).

"Sumi, who had gone on to get her BS in dietetics from Loma Linda University, was working as director of the Madison Hospital cafeteria, and used Sam's Chicken in the cafeteria with great success. What couldn't be consumed by the hospital was sent on to local self-supporting schools like Little Creek and Fountain Head.

"Around 1966, Sam went to work at Harding Hospital for Worthington Foods. While there, he developed Sam's Chicken as a frozen product, and further tinkered with the recipe, which included soaking it in a buttermilk and egg batter overnight, prior to dipping it in a bread-crumb and spice mixture and deep-fat frying it. It was shortly after this time, probably 1969 or 1970, when the Andrews cafeteria, under the leadership of Clinton Wall, began using Sam's Chicken, according to Ruth Roberts, who worked with Wall.

"Of his many accomplishments in the food technology industry, however, Sam himself was especially pleased to be loaned by Worthington Foods to help the country of Uganda with improving its food supplies for school children and women. Over a six-month period in 1969, he and his team, along with workers from UNICEF, developed porridge, roasted soybeans, and soyflour-enhanced bread for more nutritious school lunches.

"Sam and Sumi, now long retired, live in a suburb of Sacramento, California. And it appears that the ever-popular Sam's Chicken will tantalize the taste buds of new generations of Andrews students. As you wash down your last morsel with some grape juice, here are two last bits of the story to chew on. First, 'Sam's Chicken' has always been an unofficial name. The official Worthington product from which it is made is called 'Chic-ketts.' Second, Sam depended heavily on Sumi to give him feedback on the 'meaty' taste of his product. She ate real chicken, while the only meat occasionally eaten by Sam, the Sultan of Soy and illustrious innovator in a long line of meatless meat products, was fish."

13061. Soyatech, LLC. 2009. Soya & Oilseed Bluebook 2010: The annual directory of the world oilseed industry. Bar Harbor, Maine: Soyatech. 356 p. Dec. Comprehensive index. Advertiser index. Statistical conversions. 28 cm.

© Copyright Soyinfo Center 2013

© Copyright Soyinfo Center 2013

• ***Summary:*** This is the 4th year in a row that the *Bluebook* (a $95 value) has been sent free of charge to qualified industry members. On the cover are six color photos, including a heavily loaded tanker moving through a blue sea, and a farmer standing in a field of soybeans, bending over to examine one of the plants.

Soyatech has moved to a new part of Maine during the past year. This edition of the *Bluebook* contains 74 fewer pages than it did last year. The oilseeds covered in this book are (alphabetically): Canola, coconut, corn, cottonseed, flaxseed, hempseed, jatropha, linseed, palm, peanut, rapeseed, safflower, soya, sunflowerseed–the same as last year.

On the inside front cover is a color ad from Natural Products Inc. (Grinnell, Iowa), makers of innovative ingredients for bakery, soymilk and tofu. On the first page is a full page color ad from Louis Dreyfus Commodities; on the next page a full page color ad from desmet ballestra–which supplies healthy technologies for oils containing zero trans fat. SunOpta has a full-page color ad on page 4.

On the rear cover is a full page color ad from ADM titled "Trailblazing" showing a man on a mountain bike riding through muddy water. The text: "ADM constantly finds new paths for functional foods with NutriSoy soy isolates."

Chris Erickson is CEO. Keri Hayes is publisher and events director. In the Foreword, Joe Jordan (General manager and *Bluebook* content director) writes about the now popular word "sustainability" and its various definitions. He asks many questions about sustainability. Address: P.O. Box 1307, 19 Clark Point Rd., Suite 112, Southwest Harbor, Maine 04679. Phone: 207.244.9544.

13062. Wiley, Mary. 2009. Soy for life: The soy food industry is poised for growth. *Ontario Grain Farmer* 1(3):10-11. Dec.
• ***Summary:*** "Soy for Life" is the name of a new communications campaign launched by Soyfoods Canada (a trade association composed of Canada's leading soy food and beverage manufacturers) to help boost sales. "Their products represent a $340 million business in Canada," making soy foods and beverages part of Canada's grocery mainstream.

"This mainstream presence came as a result of... a 1999 US government labeling claim for soy, but sales have slowed somewhat in the past couple of years."

Peter Joe, President of Sunrise Soya Foods and head of Soyfoods Canada's board of directors says that his association has been "focusing on encouraging a labeling health claim for Canadian soy food and beverage products similar to the one that exists in the US." But recently the association "has shifted its attention back to marketing and communications activities targeted to consumers and consumer influencers." The campaign is designed to re-introduce Canadians of all ages to the benefits of soy.

"Dr. Brian Wansink of Cornell University's Food and Brand Lab was the keynote speaker at Soyfoods Canada's Soy Symposium, held recently [Oct. 5] in Toronto. He advised the gathering of marketers, retailers, distributors, and other soy industry stakeholders to target young women in the 18 to 35 age group, using an incremental usage approach." Dr. Wansink sees a bright future for soyfoods in Canada.

"Results of an Angus Reid September 2009 online survey of 1,000 Canadians about soy foods... showed that consumption of soy food products is highest among young Canadians, higher income households and women. It also showed that women in the 18 to 34 age group, who tend to be more frequent soy consumers, are particularly attuned to messaging about soy, both positively and negatively.

"Nutritional benefits: Dr. Allison Duncan, Canada's leading soy nutrition researcher, provided a thorough update at the symposium. Duncan and her human nutrition team at the University of Guelph recently released results of a study showing soy protein helps lower cholesterol and reduces the risk of heart disease in adults with type 2 diabetes."

"Market leaders in the tofu and soy beverage categories are using identity preserved [IP] non-GMO and organic soybeans in response to consumer demand."

A photo shows the Soyfoods Canada booth at The Journey to Your Good Health area of the Royal Agricultural Winter Fair. Some 150,000 visitors attended the fair.

13063. Astuti, Susi. 2009. Hidangan special tahu tempe [Special tofu and tempeh dishes]. Depok, Indonesia: Kriya Pustaka. iii + 72 p. [Ind]*
• ***Summary:*** Contains many tofu and tempeh recipes.

13064. Blatner, Dawn Jackson. 2009. The flexitarian diet–The mostly vegetarian way to lose weight, be healthier, prevent disease, and add years to your life. New York, NY: McGraw-Hill. xvii + 285 p. 24 cm. [116* ref]
• ***Summary:*** The author says she tries not to use the word "tofu"–even though she likes and recommends it. Instead she uses a longer term she coined–"veggie white meat." Tofu contains the taste "umami" also found in meat.

Soy is mentioned throughout this book, including (see index): Edamame, tofu, tempeh, vegetarian meats, vegetarian white meat. For definitions and a 'tofu tutorial" see p. 24-29.

The author, Dawn Jackson Blatner, RD, LDN, is a registered and licensed dietitian and a national spokesperson for the American Dietetic Association. She is the online nutritionist for Lifetime Television's MyLifetime.com; writes a food and nutrition blog for USA Today; teaches cooking classes; and appears regularly in print and television outlets such as CNN and RED magazine. Address: RD, LDN.

• ***Summary:*** A unique and pioneering book with 150 recipes! Terry is an African-American man with many distinctions and awards. Accompanying each recipe is the name of a musical soundtrack the author likes and would like to share. Each recipe also has headnotes.

Soy-related: Cajun Creole-spiced tempeh pieces with creamy grits (p. 10-11). Open-faced BBQ tempeh sandwich with carrot cayenne coleslaw (p. 12-13, incl. a brief introduction to tempeh). Pan-fried coconut tempeh cubes with creamy celeriac sauce (p. 50). Spice mafé tempeh (p. 95-96). Tempeh, shiitake mushroom and cornmeal dumpling stew (p. 97-98).

One chapter (p. 139-53) is titled: "Protein routine: beans, tofu, tempeh, seitan." Red beans [azuki] and brown rice with red wine-simmered seitan. Rosemary toasted tofu cubes. Blackened tofu slabs with succotash salsa (with a brief introduction to tofu. "Think of tofu as a blank canvas on which you can creatively arrange colors to make a beautiful work of art"). Tempeh-stuffed bell peppers. Good green tempeh packet. Whole-grain mustard and cornmeal crusted seitan. Smothered seitan medallions in mixed mushroom gravy.

On the front cover is a photo of the author cooking. For one page about the author, see p. 217 or www.bryant-terry.com. Address: Eco-chef, food justice activist, and author, Oakland, California.

13067. Esselstyn, Rip. 2009. The Engine 2 diet: the Texas firefighter's 28-day save-your-life plan that lowers cholesterol and burns away the pounds. New York, NY: Wellness Central. xiii + 273 p. Foreword by T. Colin Campbell, PhD. Illust. Index. 24 cm.

• ***Summary:*** A very interesting, readable, and innovative book that advocates a sound, healthy diet that can last a lifetime. "Rip managed to convert a firehouse full of committed firefighters to a plant-based diet. Rip (born in 1963) is the eldest son of Caldwell B. Esselstyn, Jr., M.D., who has become famous for his ground-breaking book *How to Prevent and Reverse Heart Disease.* This book is both similar and different. It is similar in that the basic whole foods, plant-based diets advocated by father and son are 98% the same (and please focus on practicing that 98% and not squabbling about the 2%). It is different in that Rip is from a younger generation, is not a physician but an athlete and firefighter, and is trying to help people who want help in lowering their high cholesterol levels and their weight. He is not primarily trying to help people who have had at least one heart attack, are a death's door, and are (generally) willing to do almost anything to save their lives.

In Chapter 2, "My story," we read that while in school, Rip was an outstanding athlete. He set many high school swimming records (he still holds a national record in the 200 meter medley relay); he was a top player in his high school tennis team and co-captain of the water polo team.

At the University of Texas at Austin, he was a three-time All American swimmer and an Olympic trials qualifier in the 100- and 200-meter backstroke and freestyle events. In 1986 he graduated from the University of Texas and within six months he was competing as a professional triathlete–which required a 1-mile swim, a 24.9 mile bike ride, and a 6.2 mile run. In the Hawaii Ironman Triathlon he competed against six-time Ironman Champion Dave Scott, who was powered by a plant-based diet–Rip lost. So in 1987, because of the influence of his father and of Dave Scott, Rip changed to a healthy, whole foods, plant-based diet. In 1997 he decided to become a fire fighter in Austin, Texas. He continued to compete and won many events and set many records. For example, in May 2008 he set the National Record at the U.S. Masters Swimming Championship in the 200 yard backstroke (1:56:55). Rip is married to Jill Kolasinski, and they have a son, Kole.

Rip's commitment to a healthy plant-based diet has resulted in many people asking him to help them with their diets. So in 2007, he devised the six-week Engine 2 Pilot Study in which 62 people agreed to eat a plant-strong diet; he put them through a gauntlet of tests before and after study to quantify the results–which were spectacular. Then in May 2008 he initiated a similar 4-week (28 day) study in which 15 people participated, 13 Engine 2 firefighters and two civilians. Again careful before and after records were kept. The average participant saw his total cholesterol drop 62 points (from 197 to 135), his average LDL (bad) cholesterol fall 50 points (from 125 to 74), and his weight drop 14 pounds (from 203 to 189). And all this in only 4 weeks! This book is based on the latter plan.

Rip makes much more use of soyfoods in his plant-based diet than does his father. The index contains 16 entries for tofu, 4 for tempeh, 4 for seitan, 2 for milk substitutes ("soy, rice, almond, and oat milk, for example"), 1 each tofu sour cream (p. 239), soy milk, soy yogurt (Silk or WholeSoy).

Soy related recipes include: Migas especiales (with 1 lb firm tofu, p. 154). Breakfast tacos (with "½ tube vegetarian breakfast sausage {we like Gimme Lean}}," or use scrambled tofu (p. 155). E2 omelet (with "12 ounces Silken Lite Firm Tofu," p. 156). Lemon cornmeal pancakes (with "2 cups soy milk" and "½ cup soy yogurt, p. 157). Tofu steaks and mushrooms with mashed potatoes and green peas (with "1 pound extra-firm tofu," p. 180).

Linguine and creamy alfredo sauce (with "1 package Silken Lite firm tofu" and "2 cups unsweetened soy milk," p. 195). Lynn's meatloaf (with "10 ounces firm tofu," p. 204).

© Copyright Soyinfo Center 2013

Vegetable stir-fry with brown rice (with "1 pound seitan" and "two tablespoons low-sodium tamari," p. 208). Tempeh-mushroom stir-fry and soba noodles (with "1 package tempeh," and "3 tablespoons low-sodium tamari," p. 209). Red vegetable curry and brown rice (with "1 pound extra-firm tofu," p. 210).

Pad Thai (with "1 pound broiled tofu cubes {see p. 210}," p. 211). The great wooden bowl salad (with "1 pound extra-firm tofu," p. 214-15). Tofu vegetable spread (with "½ pound extra-firm tofu," p. 238). E2 sour cream (with "1 package Silken Lite firm tofu," p. 239). Asian marinade (with "3 tablespoons soy sauce, p. 241). Island marinade (with "4 tablespoons soy sauce," p. 241). Add tofu and allow to marinate refrigerated for 30 minutes to 4 hours (p. 241). Rip's favorite snacks include "4. Soy yogurt: I'm particularly fond of the Westsoy... cherry" (p. 243). E2 Basics chocolate pudding (with "1 package Silken Lite tofu," p. 245). Fruit bowl with soy drizzle (with "4-6 ounce container of soy yogurt," p. 249). Fruit mousse (with "1 package extra-firm Silken Lite tofu," p. 255). Maple sour cream dream (with "1 vanilla soy yogurt," p. 256).

Many recipes call for "Bragg Liquid Aminos" which are simply HVP (hydrolyzed vegetable protein) made by a quick and unnatural / artificial process; soybeans, wheat, and/or corn are immersed in hydrochloric acid until, after 1-3 days, the acid has broken down the protein into its constituent amino acids. Fermentation (as of soy sauce) can do the same thing naturally in 4-6 months. HVP is a source of flavor without salt, but that flavor is generally considered to not nearly as good as the flavor of soy sauce.

Rip has an exercise component to his "Engine 2" 28 day plan.

And Rip gives people a choice as they start the 28 day plan; one can be a Fire Cadet or a Firefighter (p. 22). The "Fire Cadet option is for those who prefer a more gradual approach." In week 1 Cadets must stop eating dairy products and processed / refined foods (such as refined sugar, white flour, etc.). In week 2 Cadets must stop eating meat, poultry, fish and eggs. In week 3 Cadets must do without added or extracted oils–even vegetable oils such as olive oil. In week 4 Cadets and Firefighters eat the total E2 diet, a healthy, whole-foods, plant-based diet. A Firefighter (the plan Rip recommends) requires that a give up all of these unhealthy foods from the start of the program. "Americans consume a staggering 50 percent of their calories from refined and processed foods."

Cholesterol-lowering drugs (such as statins: Rip, who is not a physician, does not use them).

Salt and sodium: Rip advocates a low-sodium diet.

Support groups after the 4-week program: Optional. People who wish to can create or find one themselves (p. 92).

Meditation and relaxation to reduce stress: Not part of the program.

Sugar and sweets. Avoid refined sugars, high fructose corn syrups, and things such as sodas, candy to which they are added. Instead choose natural sugars such as those in whole naturally-sweet fruits (p. 114-15, 134). In desserts, Rip often calls for up to 3-4 tablespoons maple syrup or agave nectar, yet a recipe for Brownies (p. 247) calls for "½ cup light brown sugar, packed" and "½ cup raw sugar." And a recipe for "Oatmeal raisin cookies" (p. 253) calls for even more refined sugar. Rip admits he has a sweet tooth. Some of his desserts violate the basic principles of the Engine 2 diet; they contain large amounts of refined sugars–unlike the recipes (developed by his mother) in his father's book. Moreover, his mother strongly suggests that desserts be saved for special occasions.

This is a sound, healthy diet and anyone who stays on it for 28 days will see dramatic improvements in their overall health and weight.

The Engine 2 diet is a good, practical diet for the rest of your life. But go easy on the desserts and try to avoid the ones with refined sugar. Address: Austin, Texas.

13068. Lewis, Lynn. ed. 2009. The food of Asia: a journey for food lovers through China, India, Japan & Thailand. Sydney, Australia: Murdoch Books Pty Ltd. 504 p. Illust. (color). Index. 30 cm.

• ***Summary:*** A gorgeous, artistically designed book, printed on glossy paper, with spectacular color photos on every page.

Contents: The food of Asia: China, India, Japan, Thailand. Snacks. Starters and salads. Soups. Seafood. Poultry. Meat. Tofu, legumes & vegetables. Noodles & rice. Accompaniments & side dishes. Desserts. Breads, rice & basics. Glossary.

"China has one of the great cuisines of the world." Japan: "... combines delicate, subtle tastes ands textures, always prepared with a light hand and sublimely presented to appeal to the eye as well as the tastebuds."

Soy-related: Inari sushi (p. 22-23). Tofu rolls (from China, with firm tofu and tofu skins [yuba], p. 76-77). Chilled tofu with ginger and spring onion (from Japan, with "600 gm block silken firm tofu," p. 78-79). Tofu dengaku (from Japan, with "700 gm firm {cotton} tofu" and "100 gm red or white miso paste," p. 94-95). Tofu and spinach soup (from China, with "120 gm soft tofu, drained," p. 100-01). Stuffed tofu soup with prawns (from Thailand, p. 102-03). Ramen noodles with soy broth (from Japan, p. 104-05). Agedashi tofu (from Japan, p. 110-11). Fragrant tofu and tomato soup (from Thailand, p. 124-25). Ten-treasure soup (from China, with 450 gm firm tofu, p, 126-27). Salmon and tofu balls (from Japan, p. 150-51). Steamed mussels with black bean sauce (from China, with "1 tablespoon salted, fermented black beans, rinsed and mashed," p. 178-79). Clams in yellow bean sauce (from China, with "2 tablespoons yellow bean sauce," p, 178-79). Soy chicken (from China, with dark soy sauce and light soy sauce, p. 214-15). Shanghai soy duck (with light and dark soy sauce,

© Copyright Soyinfo Center 2013

p. 236-37). Shabu shabu (from Japan, with "150 gm firm {cotton} tofu," p. 258-59).

Tofu, legumes & vegetables: Ma Po tofu (from China, "A quintessential Sichuan dish... Soft tofu is traditionally used," p. 298-99). Braised tofu with Chinese mushrooms (from China, p. 304-05). Fermented tofu with Asian greens (from China, with "3 tablespoons fermented white tofu," p. 304-05). Mushrooms with tofu (from Thailand, p. 308-09). Miso tofu sticks with cucumber and wakame salad (from Japan, with "500 gm silken firm tofu, well drained" and "3 tablespoons white miso paste," p. 310-11). Stuffed tofu (from China, p. 314-15). Stir-fried tofu in yellow bean sauce (from China, p. 314-15). Buddha's delight (from China, with "50 gm tofu puffs {deep-fried cubes of tofu}," p. 322-23). Soft tofu with chilli and spring onion (from China, p. 328-29). Braised tofu (from China, p. 328-29). Mock duck (from China, with homemade wheat gluten, p. 338-39). Beans with sesame miso dressing (from Japan, p. 392-93). Shiitake simmered in soy [sauce] (from Japan, p. 408-09). Three ways with sauces (from Japan, Ponzu, Sesame seed sauce, and Tempura dipping sauce, with soy sauce, p. 484-85). Three sauces (from China, Soy and vinegar dipping sauce, Soy, vinegar and chilli dipping sauce, Soy, chilli and sesame dipping sauce, with soy sauce, p. 487-88).

Glossary of Asian food and cooking (p. 492+): Aburage, dal (dhal), edamame, fermented tofu ("It is sometimes called preserved tofu or tofu cheese and is used as a condiment or flavouring"), hoisin sauce, inari abura-age (used to make inarizushi), Japanese mustard, Japanese soy sauce (shoyu), ketchap manis ([kecap manis] "A thick, sweet soy sauce used as a flavouring"), kuzu, mirin, miso, nori, paneer, ponzu, red bean paste ("Made from crushed adzuki beans and sugar..."), salted, fermented black beans (soya beans), sesame paste, sesame seeds, Shaoxing rice wine, soya beans, tofu, wakame, yellow bean sauce.

13069. Moskowitz, Isa Chandra. 2009. Vegan brunch: homestyle recipes worth waking up for–from asparagus omelets to pumpkin pancakes. Cambridge, Massachusetts: Da Capo Life Long. xiv + 240 p. Illust. (color photos). Index. 23 x 18 cm.
• ***Summary:*** What a great writer! Another fine book; her middle name, Chandra, is Indian, and her last name, Moskowitz is Russian Jewish. "Dedicated to vegan hash slingers everywhere. Scrambled tofu saves lives!"

The index contains 30 entries for tofu, 8 for tempeh, 5 for seitan, and 1 each for miso and soy. Address: Brooklyn, New York.

13070. Nguyen, Andrea Quynhgiao. 2009. Asian dumplings: Mastering gyôza, spring rolls, samosas, and more. Berkeley, California: Ten Speed Press. 234 p. Illust. (color photos by Penny De Los Santos). Index. 28 x 19 cm. [38 ref]
• ***Summary:*** Another very attractive book and well-written book by Andrea Nguyen. In the Introduction, the section titled "Ingredients" (p. 8+) discusses soy sauce (p. 16) and tofu (p. 16-17).

Soy related recipes include: Steamed vegetable dumplings [vegetarian] (Zhengjiao, Chinese, with 3 oz. brown pressed tofu filling, and light (regular) soy sauce, p. 35-36). Kimchi dumplings (Kimchi mandu, Korean, with 10 oz firm tofu, p. 44-45). Korean meat and vegetable dumplings (Gun mandu, with 6 oz firm tofu, p. 46-47). Steamed filled buns (Zheng bao, Chinese, with Vegetable and tofu bun filling {p. 101}, p. 95-96). Baked filled buns (Ju bao, or Guk bao in Cantonese, Chinese, with Vegetable and tofu bun filling {p. 101}, p. 97-99). Vegetable and tofu bun filling (Cai bao, Chinese, p. 101).

Chapter 9, "Sauces, Seasonings,..." contains several soy dipping sauces: Tangy soy dipping sauce (great with Chinese jiaozi or Japanese gyôza, p. 215). Korean dipping sauce (for Korean Mandu, p. 215). Sweet soy sauce (good with Cantonese steamed rice rolls {p. 156-60}, p. 217). Address: Food writer, Santa Cruz, California.

13071. Ronnen, Tal. 2009. The conscious cook: delicious meatless recipes that will change the way you eat. New York, NY: William Morrow, an imprint of HarperCollins Publishers. 239 p. Illust. (Color). Index. 26 x 20 cm.
• ***Summary:*** A full-color vegan cookbook. The index contains 21 entries for tofu (including tofu ricotta, p. 82-83), 15 for Gardein, 11 for tempeh, 5 for soy milk, 3 for seitan, 2 each for miso and for soy cheese, and 1 each for soy creamer and soy yogurt. Includes interviews with: Yves Potvin, maker of Gardein (p. 157-59). Seth Tibbott, founder and president of Turtle Island Foods (p. 192-93). Address: Vegan chef, lives in Los Angeles and Vancouver, BC.

13072. Russell, Ching Yeung. 2009. Tofu quilt. New York, NY: Lee & Low Books. 125 p. 21 cm.
• ***Summary:*** The title of this book is puzzling. The dedication page includes: "to the memory of my father, whose tofu quilt gave me inspiration."

One poem (p. 35-37) titled "Tofu quilt," describes how her father, when he had free time from is work as a tailor, would cut scraps of leftover fabric into pieces as big as her palm "and as square as chunks of tofu." Then he would sew them, one by one, into a big quilt, with different colors and textures. She called it a "tofu quilt."

Tofu is rarely mentioned in these free-verse poems for the author's childhood and there is no index to see where else it might be mentioned. In the glossary, "Tofu" (p. 125) is defined as a "soft cheeselike food made from soybean milk."

"Growing up in 1960s Hong Kong, a young girl dreams of becoming a writer in spite of conventional limits placed on her by society and family" (Publisher's summary).

The "Author's note" (p. 113) explains: "This free verse poetry collection reflects my writer's journey. It is based on

© Copyright Soyinfo Center 2013

my childhood in mainland China and Hong Kong in the late 1950s through the 1960s." She married an American in Hong Kong and now lives in South Carolina. They have two grown sons. Address: Writer, South Carolina.

13073. Silverstone, Alicia. 2009. The kind diet: a simple guide to feeling great, losing weight, and saving the planet. Emmaus, Pennsylvania: Rodale Press. Distributed to the trade by Macmillan. xi + 308 p. Foreword by Neal Barnard. Illust. (color photos by Victoria Pearson). Index. 24 cm. [17 + 71 endnotes*]

• ***Summary:*** On the cover: "New York Times Bestseller." A powerful, very popular book about a plant-based (vegan) lifestyle and diet, which calls for only "real food," with some nice macrobiotic flavor–A whole grain dish should be at the center of every meal, use of seasonal foods organically grown, azuki beans, daikon, kuzu, kabocha, miso, mochi, nori, sea vegetables, seitan, shoyu, no white or cane sugar (a "crazy making" food), tamari, umeboshi, etc.

By a well known actress who first became widely known for the film *Clueless,* a 1995 American comedy film loosely based on Jane Austen's 1815 novel, Emma.

She dedicates the book to Sampson, a stray dog she picked up on the streets of Los Angeles, to all animals who suffer needlessly, and to all "who do their best to tread lightly on the earth."

The index contains 16 entries for tofu, 14 for miso, 11 for seitan, 4 for soybeans (whole dry), 3 for soy milk, 2 each for edamame and tempeh, 1 each for butter substitute (soy-based margarine, p. 142-43), cheesecake–tofu, cheese–vegan (p. 143), shoyu (p. 142), sour cream–soy (p. 143), soy candles (p. 134), and tamari (p. 142).

Some good quotations from a fine writer: "And what about your health?... What if I told you that, by eating a plant-based diet, you will strengthen your immune system, beautify your skin, increase your energy, and reduce your risk (significantly) of cancer, heart disease, diabetes, arthritis, osteoporosis, allergies, asthma, and almost every other disease? What if I said that I feel myself getting younger, more powerful, and more beautiful as I age simply because of *what I eat?...* If you want to lose weight, you've come to the right place (p. 1).

"Eating a plant-based diet is the most ecologically friendly thing you can do... Every time you purchase organic plant-based food, you are protecting the quality of the soil and participating in a more equitable distribution of resources. Conversely, every time you buy a mass-produced steak–packaged in Styrofoam and plastic–you are feeding a huge, unsustainable, toxic death machine. This may sound harsh, but its the truth! There's a whole world of consequences behind every decision we make" (p. 131).

A large color photo on the cover shows lovely Alicia Silverstone, seated, with a bowl of food in one hand. The book contains many fine color photos on glossy paper. Address: Actress, activist, and committed conservationist, Los Angeles, California.

13074. Vallaeys, Charlote; Kastel, Mark; Fantle, Will; Christianson, Lynn; Hannah, Margaret. 2009. Behind the bean: The heroes and charlatans of the natural and organic soy foods industry. The social, environmental, and health impacts of soy. Cornucopia, Wisconsin: The Cornucopia Institute. 54 p. Illust. Index. 28 cm. Available free of charge at www.cornucopia.org/ soysurvey/ OrganicSoyReport/ behindthebean_color_final.pdf. [109 ref]

• ***Summary:*** Contents: Executive summary. Introduction. Part I: The organic soy scorecard. Commitment to organics. Commitment to transparency and openness. Commitment to stakeholders, in addition to shareholders. Commitment to avoiding genetically engineered organism contamination. Commitment to supporting North American organic family farmers. Company ratings in the organic soy scorecard. Private labels.

Part II: Unmasking the natural" soy industry. Isolating nutrients: Soy protein. Hexane: The processing of "natural" soy with a neurotoxic pollutant.

Conclusion. Appendix A: Scorecard ratings. Endnotes.

Pacific Foods [Oregon]: "On their packages, they have a "Certified to the Source" (TM) seal, and their web site explains that this program is "an ambitious endeavor to want to trace the origin of every single ingredient we use in our foods..." On the web page for its organic soymilk, Pacific Natural Foods writes that "We are very picky about our soybeans." "Cornucopia's research indicates that Pacific Natural Foods purchased close to half a million kilograms of organic soybeans from China in the past year. When asked simply to name the organic certifier of the farms where their Chinese organic soybeans are grown, Pacific Natural Foods did not respond. When asked if Pacific Natural Foods would share with us the name of the third-party certifier for their 'Certified to the Source' program, they were silent. This raises the question of whether this program is in fact third-party certified, or simply a marketing gimmick" (p. 26-27).

Vitasoy, USA: "Our research indicates that they purchase organic soybeans directly from American organic farmers in the Midwest, but they also purchased approximately 200,000 kilograms of organic soybeans and 100,000 kilograms of organic tofu from China" (p. 27).

"Another brand of soymilk that chose not to participate in our scorecard project was the industry's largest producer of soymilk, in addition to other soy products, Silk. WhiteWave, which markets Silk soymilk, is a subsidiary of Dean Foods. Dean Foods is the largest processor and distributor of dairy products in the United States, with $11 billion in sales in 2007."

"Since Dean Foods acquired WhiteWave, its founder, Steve Demos, has left the company [he was fired], along with almost all of the pioneering management–those who believed

© Copyright Soyinfo Center 2013

in 'green' values. According to Demos, the company is now all about 'green, with the dead presidents on it.'

"In January 2009, the familiar Silk soymilk cartons lost the green 'USDA Organic' seal and now state 'natural' where they once said 'organic.' The carton's design is the same, and many loyal Silk customers who associate the brand with organics may not be aware that they are now buying a nonorganic product. Silk's organic soymilk is now in a newly designed carton. Most Silk products are no longer certified organic or 'made with organic soybeans.' It also appears that Dean Foods / White Wave raised the price of their few new organic soymilk offerings, a very small percentage of their product line. They kept the same pricing for the majority of their product line, even though they switched to cheaper conventional soybeans and introduced their new organic offerings at a higher price point–a radical departure from the origins of the company. Before Dean Foods acquired White Wave and Silk, they were considered one of the true pioneers in the organic foods industry" (p. 27-28).

Hexane residues in food: "The FDA does not set a maximum residue level in soy foods for hexane, and does not require that food manufacturers test for hexane residues. Very little research has been conducted concerning the potential effects of consuming hexane residues in edible oils and other processed foods that contain soy protein, such as infant formula, energy bars, protein powders, and meat analogs. Food processors that use hexane tend to assume that nearly all hexane residues evaporate before reaching the consumer, but this may not be the case."

"Moreover, residue testing has tended to focus on the oil, but the protein and fiber that are left after extraction have also come in contact with hexane. To test for the possibility of hexane residues on these other soy components and products, The Cornucopia Institute sent a sample of hexane-extracted soy oil, soy meal, and soy grits to an independent analytical laboratory (registered with the FDA and USDA). While there was less than 10 ppm hexane residue in the oil, both the soy meal and soy grits contained higher levels of hexane residues. The soy meal contained 21 ppm hexane and the grits contained 14 ppm. These tests raise important questions regarding the presence of hexane residues in everyday foods."

"The Cornucopia Institute is petitioning the FDA to examine the effects of hexane in foods. First, Cornucopia is asking the FDA to test commonly consumed soy derivatives, such as soy protein isolate, for hexane residues. Second, if residues are indeed found to be common in foods, the FDA should provide information to consumers regarding the effects of these chemical residues on consumers, including infants and children.

"We believe that this research is especially important given the fact that most soy-based infant formulas contain ingredients that have been hexane extracted. In fact, nearly every major ingredient in conventional soy-based infant formula is hexane extracted. Infants consume much greater quantities of food compared to their body weight than adults, and formula-fed infants consume the same foods day after day, for many months. If hexane residues are present in conventional soy-based infant formula, their effects on infants should be investigated" (p. 36). Address: 1. Farm and Food Policy Analyst, principal author; 2. Senior Farm and Food Policy Analyst; 3. Research Director; 4. Research Assistant; 5. Board President, Scientific Editor. All: The Cornucopia Institute, P.O. Box 126, Cornucopia, Wisconsin 54827.

13075. Walters, Terry. 2009. Clean food: a seasonal guide to eating close to the source, with more than 200 recipes for a healthy and sustainable you. New York, NY: Sterling. 290 p. Illust. (Color). Index. 24 cm.
• ***Summary:*** This vegan cookbook, with a strong macrobiotic flavor and 223 recipes (arranged by season), shows you how to eat seasonal, unprocessed, and locally-grown foods that are good for people and the environment.

On pages 17-18 is a section titled "Soy" in which the author describes her belief that "there is so much information about whether soy is healthy or not." We have rarely seen a short section on soy containing so many clearly false or misleading statements as this one–too many to list. Clearly she gets her information about the nutritional value of soy from the Web rather than from scientific journals. Nevertheless she recommends and uses miso, tempeh, tamari / shoyu, and tofu.

The glossary of foods likewise contains many errors. For example: Aduki beans: Misspelled. Fermented black beans: She fails to mention that these are soybeans. Gomasio: Misspelled. Tempeh: "Made from pressed and fermented soybeans." Tofu: "Made from soybean curd."

The index contains 23 recipes for tofu, 9 each for miso, and tempeh, 3 for shoyu, and 4 for tamari. Address: Connecticut.

13076. Yagihashi, Takashi; Salat, Harris. 2009. Takashi's noodles. Berkeley, California: Ten Speed Press. An imprint of Crown Publishing Group, a division of Random House. vii + 168 p. Illust. (photos by Tyllie Barbosa). Index. 25 cm.
• ***Summary:*** A very original, beautifully designed book. "A collection of 75 recipes from James Beard Award-winning chef Takashi Yagihashi for both traditional and inventive hot and cold Japanese noodle dishes" (from the publisher).

Contents: Acknowledgments. Introduction. 1. Ramen. 2. Soba. 3. Udon. 4, Somen. 5. Asian noodles. 6. Pasta. 7. Appetizers. Ingredients glossary.

The cover photo shows a photo of "Natto soba." The headnotes to the recipe for "Natto soba" (p. 46-47) state: "My hometown of Mito is known throughout Japan as 'Natto City' in recognition of our devotion to these fermented soybeans. Natto has a wonderful nutty flavor and aroma,

© Copyright Soyinfo Center 2013

and I've loved it since I was a kid. Serving it with soba is a terrific introduction to this nutritious and ancient naturally preserved ingredient. When you open a packet of natto, the beans will be sticky and thready, but don't let that put you off. This dish makes a beautiful presentation when it's served. Just make sure you mix together all the ingredients very well before you eat to combine the flavors." On the facing page is a full-page color photo of the dish with cold soba broth being poured over the top.

The brief Glossary (p. 161-63) includes: Abura-age, goma paste, hoisin sauce, kombu, mirin, miso (red, white, or brown), natto, nori, soy sauce, sunchang kochujang, tobanjan, tofu, umeboshi, wakame, wasabi, yamaimo, and yuzu.

The word "soy" appears on 51 pages in this book, "soy sauce" on 43 pages, "Japanese soy sauce" on 39 pages, "miso" on 15 pages, "tofu" on 14 pages, "abura-age" on 7 pages, "natto" on 6 pages, "soybeans" on 2 pages, and "soybean" on 1 page. "Japanese soy sauce" is called for in dashi, in all other noodle broths, and in most recipes. Meat, poultry, fish, shellfish, and eggs are used throughout the book.

Several portrait photos show youthful, handsome Takashi. Harris Salat writes about food and culture. Address: USA.

13077. Cooper, Kim. 2010. Main developments leading to Grain Farmers of Ontario (GFO) (Interview). *SoyaScan Notes.* Jan. 6. Conducted by William Shurtleff of Soyinfo Center.

• ***Summary:*** Of the three organizations that recently merged to form Grain Farmers of Ontario, the Ontario Soybean Growers (OSG) was clearly the strongest financially and generally otherwise. The corn growers had spent a lot of money on legal costs arguing before the World Trade Organization (WTO) that U.S. corn was being dumped into Canada. It was partially for this reason that, about three years ago, OSG suddenly backed out of the merger negotiations for a while. Kim attended a meeting in Chatham on the subject. The soybean growers were getting a little antsy because the other two groups didn't have much money; the soybean growers were concerned that they would be paying more than their share of the expenses in the new organization.

But the three groups talked some more and did more political maneuvering and before long resumed the negotiations. Farmers were not at these merger negotiations; rather, they were represented by about 2 top executives for each of the three organizations at any given time. But over the years many of the negotiators changed–which caused even more problems as far as continuity. The meetings were not open to the public and not a lot of information came out–although a sincere effort was made to keep the soybean growers informed. So growers were informed, but there wasn't a lot to tell them, because the talks were going slowly and the content was not yet for public knowledge. Thus, the growers were not aware of the details of the negotiations. There was no attempt to conceal anything from the growers.

Remember that the farmers were a major reason for the original idea that the three organizations should merge–to avoid paying duplicate checkoff fees and duplicating activities. They could see that each of the three groups were doing many of the same things. So things started out based on good ideas, but (as often happens) politics gets mixed in and things start to go off track.

Finally each of the three groups of growers voted on the merger plan. To pass, the vote had to be favored by a certain percentage of the growers and of the production. Some soybean growers still think that the results of that vote were not accurate, that "the numbers just don't add up," but that the Ontario minister okayed them anyway. One of the objectors to the results was a former director of OSG, Dave McClary (District 5–Middlesex). He was quite upset. He wrote a number of letters to the farm newspapers detailing his objections. He went to the Ontario Farm Marketing Products group, which oversees the whole process, and again explained his objections.

Kim has been concerned for a number of years that all the soybean growers hear about is asking the government for more money. When OSG was planning its move from Chatham to Guelph, Kim was offered a position at Guelph. He turned down the offer (in April 2004) for various reasons. One reason was that he thought the leadership was getting too political while moving away from the grass-roots level. Instead of focusing on how growers could make more profit from growing soybeans, there was a huge push toward trying to get more money from the government. "I just didn't agree with where they were heading."

OSG was the last of the three groups to move to Guelph, into the same big building with the wheat and corn growers. Much politics surrounded the decision to move into that building.

From 1989 to Dec. 2003 OSG had published a very interesting and content-rich 8-page monthly periodical, *Ontario Soybean Growers Newsletter.* All of a sudden it disappeared. In its place, a 1-page monthly color insert was placed in the *Ontario Farmer.* Kim thought it was basically a way to cut costs. "It was a huge change. It also went overseas to all of our customers"–such as tofu and miso makers in Asia. "I think it was another shift away from meeting the needs of your customers, which included the growers and overseas customers, and putting more focus on lobbying. That's my reading on things. The thrust and focus of OSG has changed dramatically over the past 10 years. I addressed the board of directors before I left. I said: "I think you're moving away from serving the needs of your growers. You are becoming a little bureaucracy of your own, moving to Guelph.' The feeling was: All the other agri organizations are in Guelph, so we'd better be there too. A lot of politics were

© Copyright Soyinfo Center 2013

involved, a lot of back-room maneuvering.

OSG originally chose to locate in Chatham because the location was central to Essex, Kent, and Lambton, the main three soybean growing areas. Guelph is not the center of soybean growing in Ontario, but it is the center of Ontario ag organizations. The capital of Ontario is Toronto." Guelph is between Chatham and Toronto, about 85% of the way to Toronto, and far to the northeast of Chatham.

Kim thinks the main reason for the big changes in OSG was a change in the leadership. At the annual meeting, the directors are elected by the soybean growers in each district, and an executive is elected from within the directors. Kim believes that the leadership has deteriorated greatly over the last 5-8 years. Their top priority has shifted to politics and lobbying–rather than the farmers.

One of the "buzz words" or basic ideas during this time has been that Ontario soybean growers were not on a level playing field with their competitors, and especially with farmers in the USA who were given big federal subsidies in the farm bills. Canadian farmers came to expect the same subsidies per capita that U.S. farmers were given by their government–even though they knew it wasn't going to happen, in part because Canada's government was trying to reduce its spending and deficits, be fiscally responsible and balance its books. "So the farmers are still asking for more money, even though they realize the government is giving out less money in subsidies to agriculture." Kim is a city guy and all year he hears the criticism from non-farmers: "Farmers are always whining for more money." That's a real knock against Ontario's farmers.

The growers launched a big campaign: "Farmers feed cities." It started out as a good idea, to make the public more aware of the importance of farmers in their daily lives. But it soon became political, and the idea was implied, "Therefore we need your subsidies." It was a way to get the public to pressure the government to give farmers more money. "It was never going to happen and the growers knew it as never going to happen."

Kim agrees with this basic idea that the playing field was not level. American farmers are much better represented in their federal government than Ontario or Canadian farmers. And federal subsidies to U.S. farmers makes it hard for Canadian farmers to complete with their American counterparts.

When Kim was at OSG, there was great focus on breeding soybeans which were as close as possible to what Asian soyfood makers said they wanted, then shipping them identity preserved (IP) overseas. There were both incoming and outgoing missions to serve these soyfood makers. The key group became the Canadian Soybean Export Association (CSEA) which did these trips. In recent years the executives of OSG felt that CSEA was not performing as well as they could. So they formed their own organization named the Canadian Soybean Council (CSC), which in the beginning was a farmer-to-farmer group working on various research projects such as disease resistance. Originally it was not designed to compete with CSEA, but it evolved into that and now there is conflict between CSC and CSEA and quite a bit of duplication of effort. "Now two groups going to Asia and our soybean customers there asking 'What's going on here?' They are confused and the grass-root soybean growers are not aware of what is happening in this area. "With OSG's main focus on lobbying, this sort of thing gets shuffled to the sidelines or back pages. Yet it is a real issue; the overlap doesn't help Ontario soybean farmers and it doesn't help our customers overseas. People have stood before the OSG board and explained this problem, and they are still doing it. Representatives from CSEA have also met with representatives of CSC.

Victory Soya Mills didn't really shut down and disappear; it was basically moved to Hamilton, Ontario. Ontario now has two soybean crushers, but it used to have three. There were many reasons that Victory Soya Mills was shut down and demolished–from environmental issues (it stunk), to high taxes, to terrible traffic jams when trucks filled with soybeans tried to go to and from the plant, to the rising value of the property for condominiums.

Fred Brandenburg is fine. He now works full-time for Agriculture and Agrifood Canada in Guelph. Kim keeps in touch with him. He was the perfect man for the job while he was at OSG and a great man to work for.

Does Kim think the new organization, Grain Farmers of Ontario, will work? Yes, he thinks it will work because the farmers want it to work. Obviously, as with any new organization, they will have to go through some bumps and obstacles.

Dale Petrie is an import to the soybean industry; his background was in seed corn. Kim worked for him when he worked at King Grain.

None of what Kim has said above is confidential; he has said it before and people know his position. Kim's grandfather was part of OSG in the early days. Address: Agricultural Coordinator, Economic Development Services, Municipality of Catham-Kent, Chatham, Ontario, Canada.

13078. Nordquist, Ted. 2010. Re: Early work with health foods, sour dough bread, and tofu in Sweden. Letter (e-mail) to William Shurtleff at Soyinfo Center, Jan. 6. 1 p.

• ***Summary:*** "You may not know this, but while studying for my PhD I worked part time at the Mental Hospital and also at Sweden's largest and first Health Food Store in Uppsala, founded and run by Birgitta Åkerheden and her husband. I introduced to this store a sandwich / soup café section and introduced sour dough whole grain bread by bringing sour dough starter from San Francisco and working with the local Skuttunge Bagari to manufacture the sour dough bread for the sandwiches. I then introduced to the store 'alfalfa sprouts' showing them how to grow these and sell them in

© Copyright Soyinfo Center 2013

the store.

"When I then tried to introduce tofu at the store the owner asked me why I did not start my own tofu factory. It was a good question. You know the rest.

"I actually made about 12 different foods from tofu and invited the investment banks to this store to get start up money. Birgitta and I worked all day and had a huge demo ready for the bankers at closing time 6:00 PM. Of the 5 banks invited, none of them showed up!

"I was able to borrow $10,000 from my mother and $10,000 from my Korean neighbor, Professor Ki Yong Kim, head of Seoul University Computer Department. Eleven years later I paid Kim back at 18% interest (We continue to share Christmas cards). (Like most children, I never paid my Mother back, but I have 'loaned' a lot more than that amount to my children, so I think my Mom is OK with the final result)." Address: TAN Industries, Inc., 351 California St., Suite 1330, San Francisco, California 94104; 660 Vischer Ct., Sonoma, CA 95476.

13079. Roseboro, Ken. 2010. The 2010 non-GMO sourcebook: A buyers guide to global suppliers of non-GMO and organic seeds, grains, ingredients, and foods. Fairfield, Iowa: Evergreen Publishing, Inc. 106 p. Illust. (both color, and blue and white photos). Index. 28 cm.
• ***Summary:*** Contents: Editor's introduction (by Ken Roseboro, publisher and editor). Suppliers of non-GMO products: United States, Canada, Europe, Africa / Middle East, Asia / Australia, Latin / South America. The Non-GMO Project special section (includes comments by Michael Potter and Nature's Path {in Canada}). Related products, services, and organizations. rBGH-free dairy processors in the US. Index of non-GMO suppliers by product category: Seeds (corn, soybeans), canola / rapeseed, processed canola / rapeseed products, corn / maize, processed corn / maize products, soybeans (identity preserved, specialty, organic), processed soy products (flakes, flour, germ concentrate, grits, lecithin, meal, nuts, oil, low linolenic oil, phytosterols, protein, textured protein, soymilk, soymilk powder, soy sauce, tofu, vitamin E / tocopherols), other grains / oilseeds and processed products (alfalfa / hay, barley, cotton,...), other ingredients and processing aids (citric acid, dairy ingredients...), sweeteners, food products, food supplements, animal feed. Index of related products, services and organizations. Complete index of listings. Index of advertisers.

Note 1. In the Suppliers section, many company entries have the Non-GMO Project logo (with an orange and black butterfly on a green leaf) next to their company name (e.g., Eden Foods, p. 17; WholeSoy & Company, p. 42).

This comprehensive book gives the single best picture of the growing industry, worldwide, opposed to genetic engineering. Address: Editor / Publisher, P.O. Box 436, Fairfield, Iowa 52556. Phone: 1-800-854-0586.

13080. Spoelstra, Johanna. 2010. Re: Notice to Dakini Foods clients. Letter to all clients in India, Feb. 1. 1 p. Typewritten.
• ***Summary:*** "Thank you for the privilege and honor of working with you all these years.

"Note that we are forced to close our business as now the Indian government is without explanations denying us our business Visas.

"Our managing director since 14 years, after more then 3 years of waiting for a visa extension approval. got a leave India notice! He traveled with all company documents to Delhi to inquire and ask for the reason for that notice. The section officer at the Ministry of Home Affairs in charge of his visa extension after running him from table to table for 5 hours and misbehaving with him, finally demanded a big / fat / obscene large bribe ("special tax") in order to even look at the files. Mr. Shapira, our MD [managing director] pulled out the company check book and offered to write him by check and pay this "tax" at once visibly enraged and annoyed the officer said "you just go to your country." By the time Mr. Shapira returned to Pune he was detained by DCP [Deputy Commissioner of Police] Sengaonkar, harassed in appalling conditions for more then two weeks for being detrimental to India's National security!

"Its seems all it takes these days in India is one disgruntled middle level desk officer at the MHA [Ministry of Home Affairs] Delhi, irritated for not getting his bribes on time and some collaborating local corrupt police officers, to overrule all these approvals!!! And also harass and extort and break the law With impunity.

"Senior Lawyer Mr. Ram Jethmalani who got disgusted with the kind of treatment and perverted practices, personally went and met Home minister Mr. Chidambaram to bring to his attention the situation. The Home Minister has promised Mr. Ram Jethmalani to look into the case and get back to him in a day or two. This was in September and nothing was heard from him as yet. Apparently Mr. Chidambaram rather breaks his promise to Mr. Ram Jethmalani than tackles the rot in his own Ministry. My own 5 years visa extension which already got approved has now been revoked and I was asked to leave India, no reason given.

"Thank you for Dakini Health Foods Pvt. Ltd." Address: Director (Administration), Pune, India.

13081. Shurtleff, William. 2010. Thoughts about George Ohsawa. *SoyaScan Notes.* Feb. 5. Compiled by William Shurtleff of Soyinfo Center.
• ***Summary:*** There are six things I greatly admire about George Ohsawa: (1) He had a tremendous sense of gratitude for life itself and for all things. (2) He emphasized the oneness of all things (nonduality) and showed that the pairs of opposites are more deeply one. (3) He had a marvelous love of life and sense of humor. People remember him as a deeply happy and charismatic man. (4) He had a very

© Copyright Soyinfo Center 2013

original and creative mind–especially for a Japanese man of his time. (5) He introduced many fine Japanese foods into Western diets that Caucasians now actually eat on a regular basis–miso, tofu, shoyu / tamari, umeboshi, kuzu, sea vegetables, seitan, natto, and many more–and in doing so played a major role in starting the natural foods movement in America. (6) He played a leading role in introducing brown rice into American food culture, starting in the 1960s. Address: Founder and owner, Soyinfo Center, Lafayette, California. Phone: 925-283-2991.

13082. Malnutrition Matters. 2010. Improved, sustainable nutrition and community development: With the VitaGoat & SoyCow systems and other technologies. Ottawa, Ontario, Canada. 18 p. Printed 27 Oct. 2010.
• ***Summary:*** The company's tagline is "Food Technology Solutions." This PowerPoint presentation, consisting of 18 graphics / frames, was presented in about Jan. or Feb. 2010. Contents: 1. Title page. 2. MM: Sustainable nutrition & community development. 3. Why are soyfoods ideal for development? 4. Today (number of units installed in different nations worldwide). 5. Site status–December 2009 (map of Africa and Asia shows number of installations {142} + committed {40} in specific nations worldwide. Includes 17 in India). 6. The VitaGoat system (shows the six different pieces of equipment: Hydraulic pump, boiler with chimney, cooker, above filter press, cycle grinder, tofu box). 7. Why the VitaGoat? Manual (non-electric) operation to enable rural micro-enterprise [small business]. Wood, coal, gas or other fuel options. Lower cost and more versatile. 8. The VitaGoat–Food production chart (soymilk, tofu, okara). 9. Why a SoyCow? Electric processing of soy foods. Two models (hybrid and fully electric). 10. Comparison of systems: SoyCow E, SoyCow M, VitaGoat. 11. The VitaGoat / SoyCow: Applications & economics. 12. Orissa project: Achieve a positive health outcome for over 5,000 students. 13. Strategy and priorities. 14-15. Innovations: VitaGoat canning module, SolarFlex fruit and vegetable dryer. 16. SolarFlex Dryer–Small farm model. 17. PedalPro–cycle innovation. 18. Thanks to our sponsors: Africare, Alpro, Child Haven, First Steps, Rotary, WISHH, World Bank.

There is a color photo or illustration on most pages. Address: 48 Rivershore Crescent, Ottawa, ON K1J 7Y7, Canada. Phone: 1-613-742-6888.

13083. Wartinger, Lisa; Haren, Chuck. 2010. Plenty in Guatemala. *Plenty Bulletin* (*Summertown, Tennessee*) 25(4):1-2. Winter.
• ***Summary:*** "In early November several Plenty representatives visited our long time CAFSI (Central American Food Security Initiative) project partners in the rural Mayan community of Molino Belen, Guatemala, and the women's association Unidas Para Vivir Mejor (UPAVIM) in Guatemala City.

"Out first destination was Barrio San Bartolo and the Mayan community of Molinio Belen, home to about 1200 people. This community overlooks world-renowned Lake Atitlan, a timeless source of food, water, and spiritual significance for the Mayan people.

"How good it was...to visit the Asociacion de Desarollo Integral Belen (ADIBE), to see how they are addressing these issues.

"ADIBE is a non-profit association dedicated to improving the lives of people living in Molino Belen. ADIBE manages the soy dairy (Soy Center) that was established by the community and Plenty in 1979. The community elects their board of directors every two years. meeting with the current "directiva," we were impressed by their earnest efforts to benefit the residents of Molino Belen. Edyn (Eddy) Chalcu, at the age of 21, is ADIBE's current administrator. The Soy Center produces plain and flavored soymilk, tofu, soy ice cream, and flour and sells these products in Guatemala City and several large towns, as it has done for 30 years. In July 2008 ADIBE participated in a national competition for small rural producers. Out of 180 groups, they were one of the final 12 selected, and received an award of 45,000 quetzales or about $6,000. Using the award as an impetus, in November 2008, they made a formal request to the Agricultural Technical Mission of China (Taiwan) in Guatemala for help to expand their production, sales, and markets. In January 2009 the Taiwanese agreed to provide two years of consistent technical support, which has been a real boost to ADIBE. It has enabled them to expand their product line to include toasted soy flour, soy coffee, and even shampoo and moisturizing cream made from the whey remaining from the tofu making process (very nice products, as we tested while in the field!).

"The UPA-SOYA project: After our visit to ADIBE, we spent a few days with members of the Unidas Para Vivir Mejor (UPAVIM), an association of eighty-four women in urban Zona 12, La Esperanza, Guatemala City. In late 2003 UPAVIM requested help from Plenty to design a floor plan and set up a small-scale soy food-processing kitchen next to their small bakery. With Plenty's assistance, the equipment was installed and, by the end of 2008, more than twenty women had received instruction in commercial food preparation and handling, sanitation procedures, and adapting soy foods to traditional meals. Soymilk and other foods were sold in the neighborhood, as well as distributed to children attending UPAVIM's pre and primary school.

"The years 2008 and 2009 have been very difficult for UPAVIM. Sales of their artisan items, income that sustains their social service activities, have fallen with the downturn of the world economy, and UPAVIM was not able to keep up with the costs of operating the soy processing room. The women decided to stop soy production, and then restart UPA-SOYA when they could secure the resources needed to make a sustainable venture."

© Copyright Soyinfo Center 2013

Photos show: (1) ADIBE staff and Board representatives with Plenty representatives. (2) Inside view of the soy processing room showing its equipment and visitors. (3) Amado del Valle demonstrates how to use the new soymilk press donated by Plenty. (4) UPAVIM staff and volunteers pose with Plenty representatives. Address: Plenty representatives.

13084. Culture Codec. 2010. Pune health-food company Dakini Foods forced to leave (Web article). http://www.culturecodec.com/post/440492747/dakini-foods-pune-closed. March 11. Posted.
• ***Summary:*** "It is a sad day here in Pune, as I have received word from our favorite health-food producers in town that they have been forced to leave for bogus visa reasons.

"Dakini Foods produced the best natural food products we could find in town–including all natural and fresh peanut butter, tofu, tempeh, and rice cakes. Ah, what a sad, sad day.

"What is more, it seems that corruption and abuse of power were the rule in the government's under-handed dealings with Hillel Shapira, the proprietor of Dakini Foods, even to the extent of imprisoning him and making him pay bribes to use the bathroom.

"We clearly live in uncertain times when the emerging leaders of the 'free' world act indiscriminately with impunity.

"We wish Hillel and the others the best, and hope they find prosperity in their next ventures. Good bye, Dakini!"

Note: Three links are given to newspaper articles; two of these are to the *Times of India.* Address: Pune, India.

13085. **Product Name:** Amy's Teriyaki Wrap (With Organic Tofu, Brown Rice & Vegetables).
Manufacturer's Name: Amy's Kitchen Inc.
Manufacturer's Address: P.O. Box 449, Petaluma, CA 94953. Phone: 707-762-6194.
Date of Introduction: 2010. March.
Ingredients: (Vegan): Organic brown rice, filtered water, organic wheat and whole wheat flour, organic tofu (filtered water, organic soybeans, nigari {magnesium chloride, a natural firming agent}), organic broccoli, pineapple juice, organic tamari...
Wt/Vol., Packaging, Price: 5.5 oz (156 gm) in plastic bag. Retails for $3.29.
How Stored: Frozen.
New Product–Documentation: Product with Label purchased at Diablo Foods in Lafayette. 2010. March 7 by 3 inch plastic bag. Dark blue, green, white and red. On front panel: "Non-dairy. Keep frozen. Non GMOs."

13088. *SoyaScan Notes.* 2010. The life and work of Minami Satoh, natto maker in Sebastopol, California (Overview). April 11. Compiled by William Shurtleff of Soyinfo Center. • ***Summary:*** 1957 April 2–Minami Satoh was born in Japan to father Fumio Satoh and mother Hisae Okazaki. Fumio Satoh, was founder and President of Satoh Steel Pipe Co. Ltd, a wholesaler of steel pipes and tubes.

1981 March–Minami graduated from Keio University, Law department in Tokyo, Japan, with a Bachelor of Arts degree. Minami had an interest in becoming an international business person. So in late March, 1981, while awaiting admission to American Graduate School of International Management, (Thunderbird), in Glendale, Arizona, he arrived in the USA and began to attended the Economic Institute in Boulder, Colorado; he took English classes, which helped to prepare him to study business.

1981 Sept.–Minami officially began studies at Thunderbird.

1983 Jan.–He graduated from Thunderbird. Minami lived in the U.S. for one and a half years earning his degree, Master's International Management.

1983-1988–Minami worked for DuPont in Japan, as a marketing representative, marketing Corian (artificial marble).

1989-2006–He worked for his father's company Satoh Steel Pipe Co., Ltd. wholesaling steel pipes and tubes. While successful, this work was not of much interest to him, thus he pursued diversifying the company.

2003–during this research phase, he met a Japanese American who was planning to import natto snacks to the U.S. at a trade show in Tokyo, Japan. Minami had interest in a business that had multi-cultural dynamics. However this particular project did not succeed financially.

2005–Minami then had the opportunity to purchase majority shares of a small natto-making company named Yaguchi Natto Manufacturing Company, now Yaguchi Foods Co., Ltd. in Japan. Shortly after this time, the owner died; and his relatives sold the company to Minami.

The company address is 1-30-29 Numakage, Nimai-ku, Saitama City, Saitama prefecture, Japan. Yaguchi Foods makes only natto, however they sell other soybean related foods such as tofu. The company has 35 people on the payroll including part-time employees.

Minami believed fresh and hand-made natto would have the opportunity to sell in the U.S. with its milder aroma and taste compared to frozen imported natto–and that it could become popular like other soyfoods such as tofu, edamame, miso, soy sauce, soymilk and tempeh.

2005–Minami came to the United States to meet Malcolm Clark (The great grandson of Dr. William Smith Clark {graduated Amherst College, 1848}, who was the first chairman of the agricultural college in Hokkaido, Japan, and is still quite famous.)

Malcolm Clark, founder of Gourmet Mushrooms, Inc. has since retired. While studying in Japan, he was chosen to be one of two principal students of Dr. T. Yoshii, the innovator of the use of sawdust as a substrate for growing mushrooms. With this knowledge, Malcolm returned to North America and collaborated with a group of Japanese-Canadians to start the cultivation of shiitake mushrooms. During this period, he met David Law and in 1976 the idea of Gourmet Mushrooms, Inc. was hatched.

In 1977, he and David (now CEO) founded Gourmet Mushrooms Inc. and began building their dream of commercial cultivation of exotic mushrooms in Sebastopol, Sonoma County, California.

Malcolm Clark now lives in Occidental, California.

Minami hoped that Malcolm Clark would give him some good advice about how to market natto in the USA. When he met Mr. Clark, the latter was thinking of retiring.

Minami chose to buy some shares of Gourmet Mushrooms, to share resources and create synergies between his Natto company and Gourmet Mushrooms.

2006 Feb. 24–Minami founded Japan Traditional Foods, as a corporation in Sebastopol, California for the production and sale of foods, namely natto.

2008 June–Minami moves to the United States from Tokyo, Japan to manage Japan Traditional Foods. The company presently has two employees, Minami Satoh and

© Copyright Soyinfo Center 2013

Dallas Akimoto. In the beginning Shun Takahashi, joined him from his natto company in Japan. Shun made the natto and Minami was in charge of running the company and marketing the natto until 2009, November.

2008 Nov.–Japan Traditional Foods starts selling its first natto product, Tezukuri Natto (Tezukuri means "hand made" in Japanese), through a Japanese distributor in Los Angeles. The first important retail outlet was Nijiya Japanese Grocery Market.

2008 Nov. 15–Natto Preview Party held at Deloache Vineyard in Santa Rosa.

2009 June 27-28–Tezukuri Natto Demonstration at Mitsuwa Market Place in San Jose, California.

2009 Aug. 8-9–Tezukuri Natto Demonstration at Mitsuwa Market Place in Costa Mesa, California.

2009 May 12–Seth Roberts, in his Wellsphere blog, writes a good history of Minami Satoh's work to date.

2010 Jan. 18–Japan Traditional Foods introduces organic Megumi Natto at Fancy Food Show in San Francisco, California.

2010 April 20–Launch celebration event for organic Megumi Natto at Ozumo Restaurant in San Francisco, California.

Note: Mr. Satoh lives in Santa Rosa, California, with his wife and daughter and travels regularly to Japan. As owner of Yaguchi Foods, he continues to oversee production and sales of natto in Japan.

13089. Kimura, Takuji "Tak." 2010. Visit to event promoting the launch of Megumi Natto in San Francisco (Interview). *SoyaScan Notes.* April 21. Conducted by William Shurtleff of Soyinfo Center.

• ***Summary:*** Tak and his wife arrived a little late last night at the stylish, upscale Japanese restaurant "Ozumo" in San Francisco where the Megumi Natto promotion was already underway. The place was jam packed with more than 50 media reporters, about half being Japanese and half Caucasian. Tak thinks there were no consumers–only mass media people. All the action was at a small bar (where alcoholic beverages are usually served) in the restaurant, where Mr. Minami Sato, founder and president of Japan Traditional Foods, rented the space.

Four natto dishes were served, each brought around on trays by waitresses. These five included: (1) Cooked egg (*dashimaki tamago*) topped with natto. (2) Nori-wrapped sushi with natto plus a dab of *umeboshi* (salt-pickled plum) on top. (3) Fried tofu stuffed with natto. (4) Cucumber and asparagus sushi roll (large) topped with diced (*hikiwari*) natto. Tak could hardly hear anything that was said, the noise was so loud. The bar was small and no microphones were used. However the response was very, very good. Everyone seemed to be enjoying the prepared natto dishes.

After the sampling Tak and his wife went to the sushi bar in Ozumo and enjoyed six pieces of sushi each–for $100. A very, very expensive restaurant.

At the event, Tak purchased one case (12 x 3 oz cups) for $32.28. On refrigerated products, wholesalers usually take a 30% margin and retailers usually take a 30-40% margin. Address: 3616 Delancey Lane, Concord, California 94519-2357. Phone: (925) 687-2422.

13090. Nguyen, Andrea. 2010. Re: Types of tofu and yuba in Vietnam. Letter (e-mail) to William Shurtleff at Soyinfo Center, May 1. 1 p.

• ***Summary:*** If you go to a Lo Dau Hu (Viet tofu shop) in the United States, the most common types of tofu you'd find are: (1) Dau hu / dau phu: block / regular tofu (2) Dau hu chien: fried regular tofu (in pieces). (3) Fried tofu with stuff suspended in it (e.g., wood ear mushroom and glass noodles) that's similar to the Japanese approach to making gomoku dofu. (4) Che dau hu: Soft tofu to be served with sugar and ginger syrup.

Yuba (tofu skin): At Vietnamese restaurants, you sometimes get a side dish of tofu skin rolls made from Tau hu ky [pronounced tau hu kay; dried yuba sticks], the Vietnamese name of yuba.

In Vietnam, fermented tofu is named "chao."

Note: One popular Vietnamese yuba recipe is Com tam tau hu ky suon bi (Broken rice with yuba wrapped shrimp, pork chop, and pork skin). A detailed recipe can be found on the Web under its Vietnamese name. "Even though this dish originally arose from a culture of poverty–the Vietnamese rice farmers couldn't sell the broken grains of rice so they kept them for their own use. Today, you can find this dish served in almost every Vietnamese restaurant due to the simplicity as well as the variety of toppings available,..."

Other Vietnamese yuba recipes on the Web include: (1) Tom tau hu ky (Vietnamese shrimp paste wrapped in yuba). Fresh yuba is wrapped around a spoonful of shrimp paste, then the packet is deep fried. (2) Com tam suong nuong tau hu ky (Broken rice with pork and shrimp cake wrapped in yuba). Address: vietworldkitchen.com, California.

13091. Nguyen, Hoang Quoc. 2010. Re: Soyfoods and soybeans in Vietnam. Letters (e-mails) to William Shurtleff at Soyinfo Center, May 4-12. 1 p. each.

• ***Summary:*** Mr. Nguyen is the father of Andrea Nguyen, author of *Into the Vietnamese Kitchen* (2006, Ten Speed Press) and was kindly introduced to Soyinfo Center by Andrea, who is now writing a book about tofu in Asia.

Mr. Nguyen was born and raised in Vietnam, and lived there with his wife and family until April 1975 when he fled to the USA just before the fall of Saigon and the American defeat in what Vietnamese call the "American War."

He was governor and military sector commander of two provinces in the Mekong Delta of Vietnam (Vinh Binh {now called Tra Vinh} from 1956, and Kien Phong {now called Dong Thap Muoi} from 1956-1960), and of Binh Thuan, in

© Copyright Soyinfo Center 2013

the south of central Vietnam, from 1960-1963. While he is not a specialist in Vietnamese food, he knows as much about it (or more) as the typical person born and raised in that country.

Question: Do Vietnamese eat soybeans as a green vegetable (green vegetable soybeans, edamamé)? Ans: No, and there is no specific name for them.

Question: Please tell me about soymilk in Vietnam. Ans: Its name in Vietnamese is *sua dau nanh* (with diacritical marks). It was very popular, but mostly in the cities (as we were in Viet Nam before 1975). Don't know exactly at the present time. Use it at breakfast or at any time during the day as a beverage. It is sold in a plastic container, at tofu shops or at marketplaces. Nobody made it at home at our time in Viet Nam (before 1975). But soybean milk machines are now on the market at non-expensive prices. Probably some people are making it at home for freshness. It is typically served sweetened or plain; not salty. It has a fairly long history. Its popularity is increasing with the propagation of the soybean's benefits.

Question: Please tell me about yuba (the film that forms atop soymilk when it is heated) in Vietnam. It is often called beancurd skin or (when dried) beancurd sticks in Vietnamese cookbooks. Ans: It is called *phu chuc* (dried rolled yuba; dried yuba sticks) in north Viet Nam, and *tau hu ky* in south Viet Nam. [Called Fuchu or fuzhu in Chinese]. Fresh dry yuba is *tau hu ky tuoi* (it needs to be frozen or refrigerated and thawed before using) and regular dry yuba is *tau hu ky kho.*

All Vietnamese (north, center, and south) use only one language but there are differences in tone and accent in pronunciation, and also in the naming of some things and objects. The phonetic adaptation from Chinese or French words are also different, it may be the reason of Tau Hu Ky for Fu Pi and Phu Chuc for Fu Zu.

Yuba is very popular, used in households, market stalls, and restaurants–especially in place of meat in vegetarian dishes and diets (influenced by Buddhism). It is sold in dry form, either unfried or fried, in a package at any market place. It is made only by special factories of Chinese origin. It is served as a wrapper for shrimp or meat, then fried. Also in soup–fried and served with broken steamed rice, and many other dishes at home and restaurants from selected to street corners. It is especially useful in the preparation of vegetarian dishes as a substitute for real meat. In one popular dish (called *Chan Thien Ky*), *tau hu ky* [yuba] is wrapped around minced shrimp to make a little packet, which is deep-fried; it is somewhat like the Cantonese dim sum item of shrimp in "tofu skin" but Viet people commonly serve it as a side dish on rice plates. Another popular yuba recipe in Vietnam is *Com Tam Tau Hu Ky Suon Bi* (Broken rice with yuba wrapped around shrimp, pork chop, and pork skin). Note: A Google search for "tau hu ky" will bring up many other recipes, images, and videos in Vietnamese and English. Yuba has a long history in Viet Nam, being introduced along with Chinese cuisine. Today its use is increasing along with the demand for new recipes and awareness of the benefits of consuming foods made from soybeans. Yet it is still not an item in everyday meals, but is reserved for special occasions, whether at home, in a restaurant, or at parties.

Question: When the French divided today's Vietnam into Tonkin (north), Annam (middle) and Cochinchina (south), were there any cultural or language differences between the three? Were the divisions based on these cultural and language differences or not? Ans: No major difference in culture or language existed between the three regions at that time. The French made the division just for more efficiency and convenience in their colonization of Viet Nam. The French split Viet Nam up into many areas with different administrative systems so as to maintain the division, in order to make their occupation more efficient [and to try to prevent or limit the growth of nationalist or resistance movements].

Question: Please tell me about soybean cultivation in Vietnam. Ans: At this present time, because of the huge demand of soybean for edible oil and meal or cake for animal feeds, milk for human consumption, large areas in the South (east and west parts) are being used for cultivation of soybean. Production in the North and Central regions, due to limitation of available lands, may be sufficient only for regional production of Tuong and Tofu. Five different kinds of seeds are being introduced and tested and yield/ha are much better. Areas in the south-west (Mekong delta) will produce 3 crops per year.

For centuries soybeans have been cultivated in Viet Nam. Before the vegetable oil from soybean was introduced, each region produced what people need for daily consumption. This has been changed completely because of the demand for soybean oil, milk, sub-products for animal feeds.

Soybeans are cultivated along the hillsides or high level areas not submerged by water, or in between the rice crops seasons. In the south western region (Mekong delta) where the field is submerged under the water every year for 4 months, farmers can now plant soybean after the rice crop harvest. They burn the hay, make holes and put the seeds down, cover with hay, let it grow, fertilize (chemical), use pesticides and herbicides. After 75-82 days they can harvest (still by hand), or use a machine to pull out the beans, then dry them. Viet Nam is presently divided into 62 provinces and towns; soybean is planted in 43 of them. At the present time, no information is available about large size farms using complete machinery like in the USA, but an area like the Mekong Delta may open up and introduce this kind of large farming process. The highlands in Viet Nam offer tremendous opportunities for development of modern farming (mechanized) but require enormous investments in knowledge, experience, and quick flexibility of action

© Copyright Soyinfo Center 2013

and funds. A state economy system cannot afford to let that happen, I would say.

Viet Nam still has to import 400,000 to 500,000 tons of soybean every year from China, Kampuchea [Cambodia], Thailand, Canada and the USA.

Today, soybeans are most widely used as a food in the south of Vietnam. My estimate of the amount of soybeans used in traditional foods (in descending order of popularity) is: Tofu, soy milk, tuong (a thick fermented soy sauce), chao (fermented tofu), soy sauce (liquid), tau hu ky (yuba).

Additional remarks: Tuong should be considered in this study, as tuong is a sauce made and used only in Viet Nam. It is made from rice and soybean, plus salt, in a very delicate way, serving as sauce for eating and cooking. Long ago the northern Viet term for soybeans was "dou," as in Chinese. But soybeans were also called "dou tuong" because they were so widely used in Vietnam to produce the popular fermented sauce "tuong." That's why today the Vietnamese term for soy sauce is either "nuoc tuong" [sauce + tuong; a lingering reference] or "xi dau," from the Cantonese phonetic.

All the Vietnamese (old generation, of north and center origin) living in the US, miss "tuong" very much as the Tuong Cu Da being sold in the market places here is not the real thing–in terms of composition, taste and flavor. The three best kinds of Tuong are: (1) Tuong Cu Da. (2) Tuong Ban, in north Viet Nam, and (3) Tuong Nam Dan, in Nghe An (central Viet Nam).

Note: Andrea adds: "These are really cool tuong sauces!" Address: San Clemente, California.

13092. Peters, Erica J. 2010. Re: The long view of Vietnamese history, language, and culture. Letters (e-mails) to William Shurtleff at Soyinfo Center, May 4-8–in reply to specific questions. 1 p.

• ***Summary:*** "The long view of Vietnamese history represents a conquest of the southern regions by ethnic Viet people coming from the Red River valley in the north. The Viet effort to control these regions was long, messy, and uneven, from about the tenth century CE until the twentieth century. From at least around 1800, Vietnam existed as a country that covered roughly the area we now think of as Vietnam.

"In the 1860s, the French conquered the far-south, what they called Lower-Cochinchina. The French gradually expanded their control eastward, until they controlled all of what they called Cochinchina. Wanting access to China, in the 1880s the French took over the northern and central regions as well, the regions they called Tonkin and Annam. Tonkin, Annam and Cochinchina were treated as three separate regions by the French, but less for linguistic or cultural reasons than for administrative convenience and to defuse any emerging Vietnamese nationalism.

"During the Vietnam War, the country was divided in two at the 17th parallel (then known as the DMZ, the Demilitarized Zone). Since reunification in 1976, the country has been administered again as three regions, where the division between North & Central is roughly the 19th parallel north, and the division between Central & South is roughly the 11th parallel. Historically and up to the present day, the northern part of the country has had a higher concentration of ethnic Viet than the southern part, although the Viet, who are also called Kinh, are the majority ethnic group throughout the country.

"In Vietnam, the ethnic Viet people all speak dialects of Vietnamese. There are differences between the Vietnamese dialects spoken in the north and in the south, but it is the same language. There are, however, many other languages spoken in Vietnam. The various minorities living in Vietnam have historically spoken their own languages, often in addition to Vietnamese or Chinese.

"Modern Vietnamese is written in romanized letters. Tofu is primarily 'dau phu' in Vietnamese (with diacritical marks: -dâ.u ph.u). Historically one also sees the use of dau-hu (-dâ.u hu~) and tau-hu (tàu hu~), sometimes alongside dau phu. The terms may have referred to slightly different textures, or simply marked a difference of pronunciation. A large Chinese minority community lived in southern Vietnam, so Cantonese may also have influenced the pronunciation of the word for tofu in Vietnamese."

About the author: Ph.D. thesis: Peters, Erica J. 2000. "Negotiating Power Through Everyday Practices in French Vietnam, 1880-1924." University of Chicago dissertation, 373 pages, Accepted in December, 2000.

Academic Credentials: Ph.D. in Modern European History, University of Chicago, December 2000.

M.A. in Modern European History, University of Chicago, August 1994.

A.B. magna cum laude in French History and Literature, Harvard University, June 1991.

Academic Experience:

Stanford University Lecturer: Winter 1998, Spring 2003, Spring 2005.

University of Maryland University College Adjunct Assistant Professor: 2001-2004

Portland State University Lecturer: Spring 2004.

Santa Clara University Lecturer: Winter 2004.

San Francisco State University Lecturer: Fall 2001.

Experience living and studying in Vietnam:

"I traveled to Hanoi, Vietnam for three weeks in March 1997. In January 2006 I spent another three weeks traveling across Vietnam from Ho Chi Minh City to the Mekong Delta, up to Dalat and then to Hanoi and Ha Long Bay. I spent a year (1996-1997) doing dissertation research in France, based primarily in Aix-en-Provence where the archives from colonial Indochina (Vietnam) now reside. I learned basic Vietnamese at the SEASSI program in Madison, Wisconsin, in the summer of 1994.

© Copyright Soyinfo Center 2013

Food history experience:

"Research in Paris and at Stanford University has provided more information about Vietnamese food. Together with the research I did for my dissertation, this enabled me to write my manuscript. This manuscript, entitled 'Food and Drink, Appetites and Aspirations in Nineteenth-Century Vietnam,' is currently under consideration by University of California Press. As Director of the Culinary Historians of Northern California I have welcomed many speakers on various topics in food history around the world." Address: Ph.D., Director of the Culinary Historians of Northern California, ejpeters@chonc.com.

13093. *SoyaScan Notes.* 2010. The Jakarta Post: The best source of current English-language information on soybeans and soyfoods in Indonesia (Overview). May 16. Compiled by William Shurtleff of Soyinfo Center.

• ***Summary:*** Indonesia is the largest producer and user of soybeans in Southeast Asia. *The Jakarta Post* has digital archives of its daily issues going back to 1999. A search for soybeans or soybean gets hundreds of hits, as do searches for tempe, tempeh, tahu, tofu, kecap, soy sauce, kecap manis, etc.

The Jakarta Post, an English-language daily, is Indonesia's largest English-circulation, with an average circulation of about 50,000 copies. Launched on 25 April 1983, its head office is in Jakarta. The Jakarta Post is a small but influential newspaper oriented towards local English-speaking expatriates and the diplomatic community. In many ways, it acts as an unofficial mouthpiece of the Indonesian government into the international community. Go to: www.thejakartapost.com.

13094. Messina, Mark J. 2010. The war has been lost: Update on research on the health benefits and risks of soy (Interview). *SoyaScan Notes.* May 31. Conducted by William Shurtleff of Soyinfo Center.

• ***Summary:*** The image of the safety or healthfulness of soyfoods, primarily on the Web, in large part due to the Weston A. Price Foundation, is getting worse and worse. Mark fears that the future of soy as a human food looks bleak, and that sales of soyfoods and ingredients will decline over the next 20 years–even though the nutritional science is making soy look better and better.

For example, the research on the safety of soy for people with thyroid problems is now solid. Soy does not cause thyroid problems in humans. Soy does cause thyroid problems in rats but rats are a bad model to use for studying this problem. Even for people living in a goiter belt–a place with iodine depleted soil–consuming soy is not a problem.

The research on the safety of soy for women with breast cancer is becoming more solid. The paper by Shu et al. is the most important development although the Guha paper is also basically supportive of safety. The paper by Messina and Wood discusses the clinical work. Add to this the fact that there is another paper albeit smaller in size that will be published soon that supports the paper by Shu and that it is now known that the animal studies aren't very relevant to humans because the amount of biologically active genistein in circulation is much higher in mice than in humans makes a pretty strong case. The editorial by Messina, Abrams and Hardy that makes the case succinctly.

It is quite clear that if a young girl has one serving of soymilk a day for life, that will reduce her risk of breast cancer. Likewise for women with breast cancer. However, nothing is clear when it comes to chronic disease and diet. The hypothesis is quite intriguing and has epidemiologic and animal data in support of it. However, without clinical data it will remain speculative. Nevertheless, because the potential benefit is so great, the amount of soy need for protection so small (one serving) and that in my view there is no disadvantage to consuming soy, it seems like a no brainer to make a recommendation for girls to consume one serving per day.

The area where we have the fewest good studies and the biggest knowledge gap is in safety of soy for young children. Seventh-day Adventist children have been consuming soymilk for more than 60 years with no reported problems, yet this needs to be studied scientifically. A good two-year study has been designed but has yet to be funded.

There has been a big decrease is sales of soy infant formulae over the past ten years due to uncertainty in this area.

The main are of concern today is with isoflavones / phytoestrogens (such as genistein), which are classified as endocrine disruptors. The anti-soy faction likes to talk about "estrogens in soy" as being risky and about feminization.

The Weston A. Price Foundation (WAPF) recently had their 10th annual conference / meeting in Chicago; 1,000 people attended. Their focus was not anti-soy, although a few such comments were made.

Note: According to Wikipedia, the organization was founded in 1999 by Sally Fallon and Mary G. Enig, PhD. Headquartered in Washington, DC, it is a "501(c)(3) non-profit organization dedicated to 'restoring nutrient-dense foods to the American diet through education, research and activism.' Its goals include disseminating the research and dietary advice of dentist and nutritional researcher Weston A. Price, who studied the foods and health of isolated non-industrialized peoples around the world, and supporting the scientific validation of traditional diets." Their anti-soy program is named "Soy Alert!" and they repeatedly refer to soy as "toxic." "In 2010 its membership numbered 13,000 and was growing at an annual rate of 10%, according to The Washington Post (6 Aug. 2008). It has more than 450 community-driven chapters across the United States, and international chapters in Australia, Canada, Finland, Germany, Pakistan, New Zealand, the United Kingdom and

© Copyright Soyinfo Center 2013

various other countries."

Mark regrets that he agreed to debate Sally Fallon. She made a number of false claims, such as Illinois prison inmates were being fed 100 gm of soy protein a day.

Alpro Soya recently released an excellent cartoon video commercial titled "Great Ideas Often Take a Long Time to Sink in" as part of its "Join the movement now" campaign. It encourages people to change their diet by replacing meat and dairy by an alternative just once a week.

White Wave [Dean Foods] is no longer funding scientific studies on soy–as they were a year ago. They have turned all their soy activities over to a PR firm. Mark finds this very disappointing. However the Silk Soy Nutrition Center has a good website (soynutrition.com) which focuses on the health benefits of soy.

The next soy conference will be in October. Kaayla Daniel is writing a new book of anecdotes about how she has helped people who had nutritional problems with soy.

What evidence does Mark have that people are concerned about the safety of soyfoods? (1) The United Soybean Board (USB) has sponsored a booth at the annual meeting of the American Dietetic Association each year for at least the last 15 years. The booth is organized by Publicis, the USB's PR agency. The purpose is to provide information about soy oil and soyfoods. Materials are provided and usually a soy-related product served or handed out. It could be edamame or soynuts or chap stick made with soy oil. The ADA show attracts about 10,000 dietitians. Mark has staffed the booth every year (except one when he was unavailable) to answer questions about soy nutrition. He answers about 50 questions during the 3-day meeting. Most of the questions are about soyfoods (rather than soy oil). He has watched the nature of these questions change over the years. Initially they were about ways to incorporate more soy into the diet. Now they are about the safety of soyfoods and soy formula, and about isoflavones.

(2) He is often contacted by non-scientific journalists who want to interview him for radio, TV, or the Web / blogs. Here again he is now hearing the same safety concerns. (3) Mark gives many talks about soy nutrition each year. After a typical talk, he opens it up for questions. Here, also, he gets mostly questions about the safety of soy. (4) Mark's wife, Ginny, does a great deal of work promoting vegetarian and vegan diets. She says that support for soy is weakening among vegetarians. (5) On the Web, the number of negative stories about soy nutrition is growing. Almost all are based on hearsay rather than on science. (6) Mark increasingly hears negative comments about soy at random. In short, the climate has changed dramatically since 1990, when the trend was "straight up," to today when things are looking down. Mark has no reason to believe that this downward trend will not continue.

Twenty years ago they soy industry should have developed a long-term strategy, with adequate funding, to respond to the anti-soy faction disinformation campaign with science-based facts. But the industry was unwilling to do this. They thought it would go away, that it was just a passing fad, or that it was not important and would not have any significant effect on the market, which was growing rapidly at the time. Mark did everything he could to try to convince the soy industry that this was a real concern and that they should take action. There is still no interest in a long-term strategy, but now it is probably too late. Address: PhD, 429 Calhoun St., Port Townsend, Washington 98368. Phone: 360-379-9544.

13095. Funk, Linda. 2010. The start of grilling season. *Iowa Soybean Review* (*Iowa Soybean Association, Urbandale, Iowa*) 21(7):7. Spring.

• ***Summary:*** Contains recipes for: Cauliflower salad (with soft silken tofu). Crisp edamame, corn and tomato salad. Marinated four-bean salad (with 2 cups frozen shelled edamame). A color portrait photo shows Linda Funk dressed in blue. Address: Executive Director, The Soyfoods Council, Iowa.

13096. Cober, Elroy. 2010. How important have day-neutral

© Copyright Soyinfo Center 2013

/ photoperiod insensitive soybean varieties been in the movement of soybeans northward in Ontario? (Interview). *SoyaScan Notes.* June 11. Conducted by William Shurtleff of Soyinfo Center.
• ***Summary:*** Day-neutral (also called photoperiod insensitive) varieties and their genes have played a supporting role but not the leading role in helping soybeans to move northward. The leading role has been played by earliness traits and genes. Actually, the two are interconnected.

There is a series of 8-15 maturity genes in soybean; at each one of those maturity genes you can have a late version or an early version. It's like two-way switch that is switched to either late or early. As you accumulate genes that have early versions, you get earlier and earlier. The day-neutral genes are a subset of the maturity genes. Some of these genes we recognize because they provide day neutrality. It's different language but it refers to the same thing. Day neutral is early. We talk about "day neutral" because it is something that we can see, and it is dramatic. It was talked about before we had a clear understanding of the individual genes. We breeders still talk about it some because it's easy to characterize. We grow the soybean plants in a place where they receive 20-hours a day of sunlight. If they flower and mature normally, we call them "day neutral" or "photoperiod insensitive." Twenty hours is a recognized cut-off point because it is so extreme. That concept of 20 hours started to be used in the early 1980s. Harvey Voldeng and Richard Buzzell (at the Harrow Research Station) did work on that. There are two genes that are important for the trait of day neutrality, and both must be switched to early. It gets complicated. Examples of important soybean varieties that are day neutral in Ontario are Maple Presto (the first such variety released) and Maple Ridge. Maple Presto and Maple Ridge are now grandparents of the varieties widely grown today. The leading soybean varieties today are recognized for their earliness and not so much for their day neutrality. Today "day neutrality" is sort of trick that breeders use to get an easy handle on earliness. If a soybean variety has day neutrality, then its offspring are going to have a better chance of maturing early.

Most farmers have switched over to Roundup-Ready soybeans from publicly-bred soybeans so it's hard for Dr. Cober to know what is going on in the genetics of these privately bred soybeans. The Roundup Ready traits have nothing to do with earliness. In Canada today, privately bred Roundup Ready soybeans have about 50% of the market and publicly bred soybeans have the other 50%. Roland is publicly bred and adapted for Manitoba but it does not play such an important role because Manitoba farmers grow mostly Roundup Ready soybeans rather than "conventional soybeans." Two of Dr. Cober's new natto varieties that are very early and well adapted to Mannitoba are also daylength insensitive. He breeds these natto soybeans to give farmers in the north the option of participating in that premium market in Japan.

Dr. Cober's focus as a soybean breeder in Ottawa is on specialty type soybeans–meaning natto, high protein, and tofu. They have a tofu lab in Ottawa that tests their tofu soybeans. The grain quality person at Ottawa, Judith Frégeau-Reid, contacted Soyinfo Center recently to ask questions about evaluating tofu quality.

Dr. Harvey Voldeng, former soybean breeder at Ottawa adds (June 11): Of the old varieties, either Portage (from B. Stefansson in Manitoba) or the variety Acme (from Ottawa) were probably photoperiod insensitive. This was not known at the time the varieties were released; but when they were tested later, they were found to be insensitive. Address: Soybean Breeder, Agriculture Canada, Central Experimental Farm (CEF), Building #110, Ottawa, ONT K1A 0C6, Canada. Phone: 613-759-1610.

13097. Hodo Soy Beanery. 2010. Hodo Soy Beanery names John Scharffenberger chief executive officer (News release). Oakland, California. 1 p. June 14.
• ***Summary:*** "Oakland, Calif.–Hodo Soy Beanery, the Bay Area's only maker of artisan organic soymilk, tofu, yuba, and ready-to-eat soy products, announced today that food and wine entrepreneur John Scharffenberger has joined the company as its CEO. Scharffenberger brings extensive knowledge and experience in launching and building successful gourmet food and wine companies to this new position, where he will oversee Hodo's growth, build the sales team and distribution network, drive strategic planning, and raise awareness of the distinctive soy products coming from the company's state of the art facility.

"Scharffenberger discovered Hodo Soy Beanery at the Berkeley Farmers' Market, and he subsequently joined as an advisor and board director. John Notz, CFO of Hodo, comments, 'As John got more involved as an investor and Hodo board member, we realized that he would be a great fit for CEO. Ironically, when we were first crafting our vision for the company, we talked about Hodo as the "Scharffenberger of Soy." We are very lucky to have him.'

"Scharffenberger admits that he didn't particularly love tofu, 'but Minh Tsai, Hodo's founder and tofu master, had me hooked with the first bite. I'm definitely looking forward to joining the team and expanding awareness of how amazing and innovative Hodo's tofu products are. This new appointment also frees up Minh to focus on his passion for making great tofu and sharing his enthusiasm for the tofumaking process.'

"Throughout his career, Scharffenberger has energized under-appreciated food and wine categories such as sparkling wine and gourmet chocolate with the successful launches of Scharffenberger Cellars and Scharffen Berger Chocolate Maker. More recently, he has traveled the world as a chocolate expert and served as consultant to the farming

© Copyright Soyinfo Center 2013

and food production industry, helping private for-profit and nonprofit producers analyze, develop and achieve sustainably higher returns. According to Scharffenberger, 'Hodo Soy Beanery is ready to move to the next level. The creative work of Minh and his crew is converting tofu skeptics with their fresh, locally made products. Our factory tours and production transparency reminds me of when Scharffen Berger was at the same stage.'

"Scharffenberger begins work at Hodo Soy Beanery on June 14th, 2010.

"Hodo Soy Beanery is an organic bean-to-block tofu and yuba maker in Oakland, California. Their products are made fresh daily with whole organic, non-GMO soybeans sourced from a Midwest farmers' cooperative. Hodo Soy Beanery's products are available at Bay Area farmers' markets, specialty grocers like Whole Foods and on the menus of notable restaurants, including The Slanted Door and COI. For more information or to reserve a tour, please visit http://www. hodosoy.com."

Note: In Aug. 2005 Scharffen Berger Chocolate Maker was purchased by The Hershey Co. Hershey purchased Scharffen Berger for about two times the company's annual revenue, which was approximately $10 million a year at the time of the 2005 acquisition (Source: Wikipedia).

Previously, John founded Scharffenberger Cellars, an ultra-premium sparkling wine producer, which he sold to LVMH in 1995.

13098. Demetriou, Danielle. 2010. Grain of wisdom: Madonna's former personal chef (Web article). *http://www.thenational.ae/lifestyle/house-home/grain-of-wisdom-madonnas-former-personal-chef.* June 16.

• ***Summary:*** Mayumi Nishimura of Tokyo (age 53), a world-famous practitioner of macrobiotic cookery, was Madonna's personal chef for 7 years, cooking for the singer and her family, as well as providing most meals during four of Madonna's world tours. Madonna (who is not a vegetarian) also avoids dairy products, enjoys tofu, miso and soymilk, is adept at using chopsticks, and speaks pretty good Japanese.

While in high school, Mayumi began to see clearly the connection between her diet and her health and spiritual wellbeing. She changed her diet and became a vegetarian and began to eat brown rice. At age 21 Mayumi was introduced to the writings of George Ohsawa. So she packed her bags and went to study at the Kushi Institute in Boston, Massachusetts. It worked very well for her and she ended up running a branch of the Kushi Institute in Beckett, Massachusetts.

Then 9 years ago she was asked if she wanted to try out as Madonna's personal chef. She got the job and became part of Madonna's extended family. Madonna later wrote her in the book *Mayumi's Kitchen:* "Not only are you the best chef in the world, you are part of our family... In the seven years you lived with us and cooked for us, your amazing food helped me to be a happier, healthier person, balanced in body and mind. I feel better than I did 20 years ago. I am very grateful to you for this."

Note: As of April 2011, Madonna lives in New York City, in the fashionable Upper East Side at 152 East 81st St. She lives in a gated community, said to be worth $32 million.

13099. **Product Name:** Tofu (Soymilk Paneer).
Manufacturer's Name: Rainbow Foods.
Manufacturer's Address: Pune, India.
Date of Introduction: 2010. June.
Ingredients: Whole soy-bean, water, natural coagulant [calcium chloride].

New Product–Documentation: Letter (e-mail) from Hillel Shapira. 2012. Feb. He and Kairava gave part of Dakini Foods to Wahid. Photos show: Rainbow Foods' original tofu Label. (2) Wahid standing in the Dakini Foods plant.

13100. Facial Care Guide. 2010. Skin problems and soy: Facts and myths (Web article). http://facialcareguide.com/skin-problems-and-soyfacts-and-myths. 2 p. Printed July 19.

• ***Summary:*** "Posted by admin June 21st, 2010.

"The commonest skin disorder in the us is acne. A massive 85% of most teens will discover themselves coping with acne in the course of their young life, and 20% of adults will keep having active acne.

"There exists a studied link between the foodstuffs we consume and acne. Refined carbohydrates and sugar both cause a surge in insulin; this, in turn, contributes to an increase in hormone levels. This will then cause a surplus in sebum or oil production within the glands. Another culprit is caffeine, that may increase stress hormones and, subsequently, increase sebum and bacteria growth.

"However, one of the most compelling evidence regarding diet and skin problems, and more specifically,

© Copyright Soyinfo Center 2013

acne, is the consumption of dairy and red meats. Have you ever heard the old saying, 'you are what you eat?' Well, the disorder of the skin can ultimately be determined by the problem of your internal organs. Studies have shown that among the easiest ways for your body to relieve itself of harmful substances is with the skin. It's the body's technique of saying, 'Yuck!' Harmful animal proteins and fats which have been tough to digest are basically discarded over the body's defense mechanism resulting in acne.

"Soybeans and soy products are foods that are healthy and contain no cholesterol and very little fat. The plant proteins in soy foods are very digestible and have been proven to actually aid the body in digestion, rather than prohibit it. Many people may experience a soy reaction when they first start eating soy foods and as a result sometimes acne or skin rashes may occur. This is a natural reaction in people's bodies and must not be confused with soy actually causing acne; just the contrary. When soy is taken for the first time, the body will activate its immune system and antibodies will be formed. Therefore, the next time you eat soy, you will most likely not experience skin irritation.

"In old Chinese folklore it was said that the women workers in the tofu industries always had the most beautiful skin, shiny and radiant, giving them their porcelain glow. Even in the 'Traditional Chinese Medicine Encyclopedia,' a naturalistic book of healing that is used in many countries; soybeans' therapeutic benefits include smooth and healthy skin appearance.

"Today, many cosmetic companies use soybean proteins, soybean oils, and soy lecithin in their skin care products. These soybean compounds have been proven to condition the skin. Studies show that the proteins and isoflavones found in soybeans help in inhibiting milanosome transfer, which is a direct cause of pigment reduction.

"The health properties of the soybean seem to be boundless. Whether you choose to eat soy foods for their healthy benefits or use a skin care line with soy proteins for the added glow, most evidence does support the fact that soy products are great for long-term health, and even your skin."

13101. *San Jose Mercury News.* 2010. San Francisco company recalls hummus products. July 26.
• ***Summary:*** Quong Hop & Co. of South San Francisco is recalling its Raquel's brand hummus products after an inspection by the state Department of Public Health found bacteria (*Listeria monocytogenes*) in them that could make people sick. No illnesses have been reported in connection with this problem.

On about Sept. 8, Quong Hop was reprimanded once again by the U.S. Food and Drug Administration (FDA) for failing to appropriately sanitize its manufacturing facility.

Note: on 22 Sept. 2010 Quong Hop & Co. filed a voluntary petition for Chapter 7 bankruptcy. Chapter 7 is a complete liquidation, and is relatively rare. Since the petition for Chapter 7 was filed voluntarily it means the present owners have no hope of continuing operations. Chapter 11 (by contrast) is a reorganization, and is more common.

13102. Heck, Wolfgang Rainer. 2010. Re: Brief history of Life Food GmbH–Taifun Tofurei. Letter (e-mail) to William Shurtleff at Soyinfo Center, Aug. 14. Updated on 18 Nov. 2011. 2 p.
• ***Summary:*** I have looked again at the early documents which show that Life Food was officially started on 10 April 1985. At that time the company only made sprouts. As you know, Klaus Kempff (who was born in 1935) started the first steps in producing Tofu in a cellar. At this time he grew sprouts and he sold a small range of sprout varieties at the big cathedral-market in Freiburg. He named his business Life Food.

In 1986 he first began experiments making tofu and after getting good results (your book helped him) he produced a few kilos of tofu and sold it to his sprout clients. He produced it together with the members of his "patchwork-family."

I first met Klaus in the summer of 1986 at a [drumming] workshop in Greece. After this workshop we went together to the Netherlands to have a look at a bigger soyfood production operation initiated by sanyassins [Disciples of Sri Rajneesh / Osho]; they made burgers and rolls with tofu and vegetables. When we came home he had trouble with the official bureau for hygiene in Freiburg. They did not allow production of food in a cellar.

Klaus was really shocked by this information and he had two options–to cancel everything or to move to a new location. At this time I found an empty store and proposed to Klaus that we use it together as the new production place. He invited me to go to work with him and his growing tofu business. Together with the people of his family we renovated the old store by ourselves. So we became partners. Now the tofu became legal and we could develop our equipment and process / technology.

In the beginning of 1987 I founded the enterprise Taifun (that was the exact name) as a personal company. I rented a small place in a market-hall in Freiburg, and sold tofu made by Klaus at the new production place. He delivered it to me every morning. I sold part of it as fresh tofu (stored in fresh, cold water in an aquarium), and I prepared salads and meals using the rest. For two years everyday I cooked a fresh tofu meal for about 50 people.

Note: When people tasted plain, unseasoned tofu they didn't like it at all. But when they tasted pan-fried tofu, seasoned with a little shoyu / soy sauce, almost all of them liked it very much.

Klaus and his crew produced the tofu for me and for other gastronomic businesses. He developed the smoked- and the sprouted soy-tofu. The big idea was to bring Life Food and Taifun together some day as a GmbH (this is typical

© Copyright Soyinfo Center 2013

German and maybe similar to a corporation).

In 1989 the space for the production became too small and we had some trouble with the neighbours. The smell of the tofu and the fried tofu products was very intense. So we decided to relocate again; we rented a new production-hall in the industrial area of Freiburg. Now we had a good place and we were able to process 111 kg (244 lb; 4.5 sacks) of soybeans a day. This means about 190-200 kg tofu a day. So we produced 1,000 kg a week. I quit my job in the market hall. We tried to produce for the organic shops in our region. Taifun became the brand name and Life Food the name of the organization. On 29 December 1989 we [Wolfgang, Klaus Kempff, and Silvia Notbohm-Kempff] integrated the brand name Taifun into our organisation name–as a result we created the corporation Life Food GmbH / Taifun-Tofuprodukte.

At this time we had 400 square meters of floor space and we developed a big range of different tofu specialties. There was also a change in the crew. Klaus' "family people" [including Silvia Notbohm-Kempff] stopped working for the company and in Feb. 1990 Günter Klein joined Life Food.

Now we started to work more professionally and we built up an efficient organisation for all the departments.

In 1991 at age 56, Klaus Kempff told us that he also wanted to realize other things in his life, in part because the speed of development in Life Food was very fast. He worked on the development of his own awareness and of healing methods. He soon focused on healing work.

On 9 Dec. 1991 Klaus quit has job as managing director of the corporation (*Geschäftsführer*). At this time Günter Klein and I became equal full partners (*Gesellschafter*); we made a contract with Klaus and bought his shares of the corporation. Klaus went on to do some social projects with older people.

At the end of 1994 we moved into Bebelstrasse 8, which is our present location–in Freiburg's Hochdorf Industrial Estate. Here we found a big production place with more than 2,600 square meters of floor space. First we rented it and 4 years later we had the chance to buy the land. We started in the Bebelstrasse making about 1,200 kg per day of tofu.

In January 1995 Alfons Graf entered the company.

In 2004 Günter Klein asked for a sabbatical year and went for this time to the Amazon to experience shamanism. One year later, he came back with new ideas.

In 2007 we invested in a Logistic Center for our cool products 400 meters from the production place. Our own shuttle bus is running there 10 times a day with the products and other things.

In October 2009 Günter Klein left the company; he decided to follow his interests related to shamanism totally.

2010 Aug. 14–We now make about 14,400 kg/day of tofu–about have 12 times more than we made in 1994. Günter Klein is the plant manager–in charge of production and equipment. I develop the organisation and products, and manage the sales activities.

This year Klaus Kempff visited us two or three times. He is really proud of the present situation, because his former vision of less meat and more vegetable protein has became much more a reality. Klaus is now 74 years old and always engaged in social action and very active against genetically engineered plants and animals–GMO.

Update: 18 Nov. 2011–Until November 2011 I worked together with 3 heads of the business units. Each one of them is responsible for some departments. In early November 2011 we arranged the first step of changing the organisation once more. Since 1 November 2011 Alfons Graf has worked together with me as co-managing director (Geschäftsführung). Meanwhile we have about more than 160 employers with 35 different Tofu-specialities. We need about 2000-2200 metric tons of soybeans a year and we produce about 70 tons of tofu a week and 40 different tofu specialty products. This year we had 1,400 tons of soybeans from Germany, France and Austria. We are expanding this time and next year is the 25th birthday of the brand Taifun.

I hope this information will help you to answer your questions. Thank you for the Rilke words. By the way: I like Rainer Maria Rilke very much and maybe you can understand the words which are written down in my office: \... *es handelt sich darum, alles zu leben.*

Wenn man die Fragen lebt,
lebt man sich allmählich,
ohne es zu merken, eines fremden Tages
in die Antwort hinein. Address: Managing Director, Life Food GmbH.

13103. Pristine Plants India Pvt. Limited (Website printout–part). 2010. www.ppi.co.in Printed Aug. 29.

• ***Summary:*** Contents: Home page. About ourself. Connect us @. Soymilk system -> Contact us. Moving words at top of each page: "It's a matter of taste." Moving words below company name near top of each page: "Perfection–Performance–Innovation."

Address of works: 16, Gurukul Industrial Area, 12/6, Mathura Road, Faridabad, Haryana (India)–121 003. Tel. / Fax +91 129 413 6901-05 (Five numbers). Email: info@ppi.co.in.

The section titled "Soymilk system" states: "This is a tabletop plant for producing soy milk / soy paneer. 'Soya Cow' SC-20 is a Table-top machine that makes high quality soy milk at the cottage industry level using a break-through Canadian technology.

"An SC-20 produces 14 liters of soymilk every half an hour (using 2 kg of soybeans). This milk could be converted into 2.5-3 Kg of tofu (Soy Paneer). The machine includes accessories for making Tofu also.

"The machine requires 5-10 sq.m [square metres] area with domestic power supply for its installation (1 HP single phase 220 V).

© Copyright Soyinfo Center 2013

"This machine is equipped with the deodorizer which removes the off flavour from the soymilk."

Note: Letter (e-mail) from Raj Gupta of ProSoya Inc., Ottawa, Ontario, Canada. 2010. Aug. 29. SSP started building small soymilk machines in 1994-95 under license from us. In about 2006 this manufacturing was then transferred by SSP to Pristine Plants (<http://www.ppi.co.in/>). SSP's Managing Director transferred the technology to his brother-in-law, who created Pristine just to focus on the SoyaCow and nothing else. Ask Dr. Ratan Sharma for details. They have sold several hundred SC20 machines in India and abroad. An SC20 is a Soya Cow made in a 20 litre vessel; the soymilk capacity is 15 litres per batch, 2 to 3 batches per hour depending on the boiler capacity. This soymilk and tofu equipment is based on the designs of Raj Gupta and ProSoya Inc. of Canada. Address: Registered office: 124-B, Pocket-A, Mayur Vihar Ph-II, Delhi, India 110 091. • ***Summary:*** Contents: Tofu is coming: In 1980 tofu was sold in about 100 Reform Houses, Bioläden, and vegetarian restaurants in Germany. In 2010 it is sold at more than 40,000 locations in a great variety of forms. Tofutown is there: Making it easy for people to eat and drink without going through the detour of animals.

After 30 years of making tofu in Germany, all is well. Photos show and earlier and present view of the company's plant.

Brands: Viana: Listen to your heart. Veggie life. Demeter (First soya sprout drink). Soyatoo whipped soy cream. Private labels. Tofu Musick.

Marketing. To youth. Quality. Customer relations.

Protecting animals and the environment, health. We believe in food democracy. Tofuismus No. 6. "In a Tofu Body lives a Tofu Spirit."

Tofu Fact No. 4. Four photos inside and outside the company's headquarters.

Nine website URLs and four photos. Very big numbers. Awards and prizes.

Milestones in the company's history / chronology: 1981/82–Founding of the tofu collective Soyastern, at the time the 3rd so-called "Tofurei" in Germany. In the 1970s and 1980s many small tofu projects were based on vegetarianism.

1988–Founding of Viana Naturkost GmbH on Cologne.

1990–Move to a larger building in Cologne.

1992.–Move to a former dairy in Euskirchen Kuchenheim.

1995. Expansion. 1997 Expansion.

1999–Move into a new building in Wiesbaum / Vulkaneifel.

2001. Detour to Wiesbaum.

2002–Develop the "Veggie Life" brand.

2003–Rename the company Tofutown GmbH.

2004–Development of the "Soyatoo!" brand.

2005–Major expansion of the cold storage area and the final packing area.

2007–Expansion of production.

2008–Start-up a Spaceshuttle Tofu- and Soymilk plant.

2009–Establish Tofutown North America LLC in San Francisco, California, for marketing the company's products in North America and Canada.

Note: During the years 2008 (*Inbetriebname*) and 2010 (Take over a modern production facility formerly owned by De-Vau-Ge Gesundkostwerk in Lueneberg) the story gets very complex, so Shurtleff writes Drosihn to please explain what it means. He kindly explains the 2010 entry in an e-mail dated 1 Nov. 2010: "I'll try to answer your questions. It is a little Gordian [knot] and complex: De-Vau-Ge in Lüneburg is a 'big city' and we did take over a 'small garage' (a small but separate building including about 60 employees)

© Copyright Soyinfo Center 2013

where the home of the 'vegetarian production' has been situated for years. The present owners of the 'De-Vau-Ge Dailycer Group' (50% is owned by 'One Private Equity' a Chase Manhattan Bank PE Company and 50% is owned by the Seventh-day Adventist Foundation 'MSP') focused the company strictly to the core business 'breakfast cereals' and carved out everything else to spin off. (Vegetarian Products) to Tofutown, Baby Food (to Sunval Company) and so on.

Already in 2007 all the health food businesses (brands for so called 'Reform Häuser' and natural food stores and supermarkets) owned by De-Vau-Ge has been carved out to a daughter company named 'Prima Vita' and moved to 'Heimertingen' in the South of Germany. So they did concentrate on the health food brands (most important one is 'Granovita,' the other ones are 'Eden,' 'Linusit,' 'Granovital' and also the smaller ones 'Martin Evers' and 'Bruno Fischer,' in total maybe 10 to 15 health food brands). Nowadays also the other European businesses are consolidated into the newly developed 'Bio Herba Group' which is beside the 'Prima Vita' in Heimertingen also Granovita UK and Granovita Spain. This health food business in total is, compared to the De-Vau-Ge Dailycer Group, of almost no economic importance and is still owned by Seventh-day Adventist money. The De-Vau-Ge Dailycer Group is a competitor of the Kellogg Co. and Nestlé in breakfast cereals and makes about 500 billion Euro turnover [sales] per year. They have several locations in Europe (France, Netherlands, UK, Switzerland).

"Tofutown is still very small compared to this big business; it has two production locations in Germany (Wiesbaum and Lüneburg) and a small bureau in San Francisco.

"A complex story and this is only the short version. Good to hear that you are well and still interested in companies and soy foods and the developments on the market.

Follow-up e-mail (Nov. 2): "There is a SoyaCow (made by ProSoya) grazing and giving milk in Tofutown. Frank Daller and Raj Gupta are both very credible people in the soy market.

"Yes, you are right with the mad accountants and also with mad consultants.

"I do use Google Books and Wikipedia as you do. In my Tofugraphy there is a scene where I tried to register a 'Tofu company' at the city hall somewhere in the beginning of the nineties and the two guys in the line before me tried to register a 'search engine.' Both were completely unknown and therefore nearly impossible to register. Now we have Tofu in every supermarket and we have Google on every computer." Address: Founder and president, Tofutown.com GmbH, Industrie und Gewerbe Park, D 54578 Tofutown Wiesbaum, Germany. Phone: 06593 9967-0.

13106. United Soybean Board (USB). 2010. Consumer attitudes about nutrition: Insights into nutrition, health, and soyfoods. 17th annual national report. Seattle, Washington: USB. 12 p. Oct. 28 cm.

• ***Summary:*** Methodology: "This year represents the fifth year we have adopted an online self-administered survey as our methodology, a significant change from random telephone interviews. The survey, conducted by an independent research firm [in Seattle, Washington] in February 2010, includes 1,000 random surveys, providing a sample that is consistent with the total U.S. population. The study's margin of error remains ± 1.9 to 3.1%, with a confidence interval of 95 percent."

Contents: Introduction. Methodology. About USB. General nutritional attitudes and concerns. Examining the nutritional facts panel. Obesity concerns. Strategies for improving overall health. Soyfoods and health perceptions. Health reasons for seeking soy. Cooking and salad oil impressions. Soy in the media. FDA-approved health claim. Opinions on biotechnology. Spotlight on biotechnology. Trans fat awareness and opinion. Awareness and usage of soy products. Restaurants and soy products. Occasion preferences for consuming soy.

Awareness and usage: "37% percent of Americans consume soyfoods or soy beverages once a month or more, approximately five percentage points higher than during the period between 2006 and 2008. Conversely, 35% indicate that they never consume soy, which has decreased steadily since 2006 (then at 43%). For the seventh year in a row, consumers reported the most familiarity with soymilk, soybean oil, tofu and soy veggie burgers.

"Soymilk continues to be the most regularly consumed soy product, with nearly one-quarter of Americans reporting that they drink it regularly. For comparison, in 1999, 18% of consumers reported that they had tried soymilk. By 2010, the number of consumers who have tried soymilk has more than doubled to 45% of all consumers.

Edamame holds the number two spot and has surpassed veggie burgers among the top three most consumed soyfoods for the past two years. In fact, it has more than tripled in popularity since 2005 (then at 4% and now at 13%). Plain white tofu follows in third place, on par with 2009 at 9%."

A table shows the "Top 20 soy products by awareness." Soymilk 90%. Soybean oil 56%. Plain white tofu 56%. Soy veggie burger 54%. Soynuts 40%. Soy protein bars 37%. Soy infant formula 36%. Soy latte / soymilk in espresso coffee drinks [as at Starbucks] 36%. Edamame 34%. Dried or canned soybeans 33%. Cereal bar / energy bar 32%. Miso 29%. Soy ice cream / cheese 28%. Soy yogurt 27%. Soy hot dogs 26%. Flavored / marinated tofu 24%. Soy supplements 21%. Soy flour 21%. Soy breakfast cereal 18%. Textured soy protein 16%. All others mentioned 14% or less.

Occasion preferences for consuming soy (in descending order of preference): dinner 39%, breakfast 30%, lunch 22%, mid-afternoon snacking 19%, late evening snacking 13%,

© Copyright Soyinfo Center 2013

mid-morning snacking 9%, desserts 5%.

"In 2010, 84% of consumers rate soy products as healthy, down one percentage points from 2009." A graph (p. 6) shows this increase in awareness (82% in 2006, 78% in 2005, 74% in 2004, 74% in 2003, 74% in 2002, 69% in 2001, 76% in 2000, 71% in 1999, 67% in 1998).

Note: As of Oct. 2010 this full survey is available gratis in PDF format at www.soyconnection.com /health_nutrition / pdf/.

13107. Sharma, Ratan. 2010. Re: Work with soymilk and tofu in India and worldwide. Letter (e-mail) to William Shurtleff at Soyinfo Center, Sept. 21. 2 p.

• ***Summary:*** "After completing my Ph.D. on soymilk and tofu in 1993 at Banares Hindu University in India, I started working for a Canadian non-governmental organization (NGO) named Child Haven International (CHI). Please see www.childhaven.ca. I was introduced to them by Dr. Raj Gupta of ProSoya. ProSoya had developed the SoyaCow technology and through CHI they wanted to introduce this technology to benefit the people of India and other developing countries. I started working for CHI in India after receiving intensive training in Canada on the SoyaCow technology (which was in the developing stage at that time), project formulation and other related subjects. CHI was supported by some funding from the Canadian International Development Agency (CIDA) for this project. The main objective of this project was to create employment opportunities and to provide low cost nutrition to the Indian masses. In 1994, on behalf of CHI and ProSoya, I transferred this technology to SSP Private Ltd., Faridabad, India. SSP is based near Delhi.

"It is important to mention here that in the latter part of the 1980s a few companies had tried introducing soymilk in the Indian market through large scale production (Tetra Pak, poly pack, etc.) but failed for many different reasons, so they stopped their operations. I worked hard to establish this technology in India, helping SSP in manufacturing quality machines and helping the users of this machine in product development, packaging, shelf life, marketing etc. I helped them in developing the products suited Indian tastes. Because of the previous failure of soymilk in the Indian market, I had to work very hard to introduce this product again in the Indian market and I tried to do it successfully.

"All the organisations involved in the promotion and establishment of this technology, considering its usefulness and the need for it in India and other developing countries, had no intention of making money. This was just for a noble cause and was done very successfully. We approached the Indian government and this machine was included under the Prime Minister's Employment Scheme where one can apply for a subsidised bank loan. In the meantime this machine was upgraded by ProSoya and SSP. I was involved from both the ends, coordinating between CHI, SSP and ProSoya. In the meantime SSP sold many machines to Russia and later Russians developed their own machine similar to this.

"It took time but this technology grew in many folds and Indian entrepreneurs started earning handsome money. Through this technology I promoted the small-scale soy food business in India and now close to four hundred such small factories are operating in India, producing soymilk, tofu, soy nuts, re-packaging defatted soy flour, making soy based noodles and other products. I am helping all of them. Based on the success of these small entrepreneurs a few companies started producing and selling the soymilk in Tetra Pack in India. From India these machines were sold to Nepal, Bangladesh, Pakistan, Sri Lanka and many other neighbouring countries.

"Besides this I promoted this small scale soymilk and tofu business in Uganda, Tanzania, Kenya, South Africa, Egypt and in some other African countries with the help of Malnutrition Matters, CHI, WISHH etc. Also, I helped Dr. Steven Kwon in getting the soymilk machines from India and using them in Afghanistan. Now there are many such machines working in Afghanistan successfully.

"On average, Indian entrepreneurs are making tofu in a range of 100 to 500 kg per day. Some are making 50-100 kg per day. Large scale soymilk business is also growing in India."

Ratan visited Spicer Memorial College in Pune in about 1999 to learn about and perhaps help with their soymilk production. He recalls that they were making very sweet bottled soymilk in various flavors, as well as tofu (which was certainly not canned in a tin). They sold these products at a canteen inside the college and they had two outlets in the city of Pune; he visited one of these which was on a narrow street and was not fancy.

Ratan remembers a company that started making tofu and soymilk in Ghaziabad using a large new plant from Takai (of Japan); he does not remember the company name, but it was not Amrit Protein Foods. When he arrived in Ghaziabad, he lived with the owners of this company for a month. They had recently closed the plant and did not take him there. Later all of their equipment was sold at auction by the bank as they were not able to repay their loan. They had a very nice tofu tray packing system and were selling the tofu in water-filled tray packing only. The owner of the company was a chartered accountant by qualification.

Ratan also remembers a company in Allahabad (both he and Rajendra Gupta of ProSoya are natives of Allahabad) that purchased a large plant from Takai through an agent based in Hyderabad. This plant was purchased by a cigarette manufacturing company named Shyam Bidi. The owner of the company was a politician, who had earned lot of money from his tobacco business. They had just launched the product, which they continued for less than a month, then closed down the business before the product had a chance to become known. This company may possibly have been

© Copyright Soyinfo Center 2013

related to Mishra Soya Food Products, which definitely had a Takai system and which either introduced or was about to introduce "soyabean based paneer" [tofu] in the Bombay market. Address: PhD, Manager, the SoyaCow Centre, KH-177 Kavi Nagar, Ghaziabad 201 002 UP, India.

13108. Sharma, Ratan. 2010. Re: Work with the American Soybean Association (International Marketing), soymilk and tofu in India and worldwide. Letter (e-mail) to William Shurtleff at Soyinfo Center, Sept. 22. 2 p.

• ***Summary:*** "I joined the American Soybean Association (ASA) in 1997 as a soymilk and tofu expert and since then I have been in touch with the ASA's International Marketing (ASA-IM) activities worldwide. Soybean and soy meal utilization in the animal sector is the first priority of ASA-IM as it consumes most of the soybean and soybean meal (utilised in poultry, animals, aquaculture, etc). But they also have a full-fledged food program in almost all their international offices and they have a substantial budget for this. I know these soy food promotion and utilization programs in India, Japan, China, Mexico, Middle East, etc. And we have these programs in Sri Lanka, Pakistan and Bangladesh through our India office.

"ASA-IM sends teams of potential and prospective entrepreneurs to the US and other countries for advance training on the soy food production and utilization. I have lead such teams to attend the advance courses on the soymilk, tofu, TVP and other products at INTSOY, Texas A&M and Kansas State University courses separately. These courses were attended by Pakistan, Bangladesh and Sri Lanka based soy entrepreneurs also. ASA-IM paid all their hefty course fee, hotel stay, as well as meals and other incidental expenses. The participants paid only for their international air fare. I also visited Bangladesh, Sri Lanka, Nepal and Pakistan so many times to help the soymilk and other soy food manufacturers in these countries.

"ASA-IM spends lot of money on the promotion of soy for the food uses all over the world. I may try to send you some pictures of these activities. These help in creating the market for the small, medium and large scale soy food producers. We do it for the soymilk, tofu, soy nuts, soy flour, TVP and all other soy food products manufactured and sold by the Indian soy food manufacturers.

"ASA-IM promotes the soy food business through the trade fairs, industry visits, helping them in attending government training programs etc. The Indian Government also helps in promoting the soy food business and products. Once they provided huge funds for the generic campaign of the soy food products in India and the advertisement program ran on the popular TV channels, radio, print media etc. for a few months. We coordinate the entrepreneur development programs through the government departments and they have run exclusive training programs on the soy food business in which hundreds of prospective and existing soy entrepreneurs participated.

"Soy fortified products are also popular in India. One of the Indian states, Gujarat, recently introduced wheat flour fortified with soy flour for public distribution system (a subsidised ration for the poor people). All this is run by government programs. The Government of India (GOI) feeds approximately 250 million children, women and men under various feeding programs and soy is the main protein source in most of these. They use other protein options also based on the price and the availability but soy is preferred by the government in these programs. We help them in the product formulation, recipe development etc.

"I introduced the soymilk, tofu and other small scale soy food production business to the Indian army, also for their soldiers who retire at an early age and go for low profile business. I gave them the option of the soy food business on a small scale after their retirement from the army. At one of the army rehabilitation centres they have installed soymilk, tofu and other soy food processing units to train their retiring soldiers. I go there from time to time and impart training to them also when the new lot of soldiers come for this program.

India has made an excellent progress in the soy food business on small, medium and large sale production and there continues to be tremendous growth in this field, especially the soymilk, tofu, soy flour, TVP, soy protein based products etc.; you can see a lot of these products in the super stores. One thing that is remarkable here is that besides selling there products in the rural and urban areas, the soymilk and other soy product manufacturers sell a substantial quantity of their product through the super stores and other organised marketing channels. I help them in making the good quality packaging with the proper shelf life, giving all the nutritional and commercial information on labels, following the rules and regulatory norms framed by the GOI, getting a bar code, taxation, industry licensing, etc.

More later, Ratan. Address: PhD, Manager, the SoyaCow Centre, KH-177 Kavi Nagar, Ghaziabad 201 002 UP, India.

13109. Sharma, Ratan. 2010. Re: Work with soymilk and tofu in India and worldwide. Letter (e-mail) to William Shurtleff at Soyinfo Center, Sept. 26. 2 p.

• ***Summary:*** "There are close to 400 soymilk machines that I established in India after transferring the SoyaCow technology to SSP Ltd. in Faridabad.

"The first SoyaCow machine was sold in 1995 to a rural entrepreneur who ran this machine in an engineering college's canteen in Karnal (Haryana state). I kept track on his business for some time but then I lost touch when he moved to a new location. His son contacted me for some help after four years but since then I have no record of them. I don't think they are still in this business. Anyway, that was the first machine and I could recall that person sitting in front

© Copyright Soyinfo Center 2013

of the machine at SSP's floor and observing the trial of the machine before this was dispatched to him. He was amazed to see a machine producing milk.

"A few points for your information:

"In 1996 SSP Pvt. Ltd. (India) started to make SoyaCow machines.

"Punjab state has the highest number of soymilk machines and are number one in the soymilk and tofu production India.

"About 65% of the total soymilk produced in India is converted into tofu.

"Some of the soymilk producers prepare soy ice-cream, yogurt, mayonnaise, shrikhand (a local yogurt based sweet), rasogolla (a heat desiccation based Bengali sweet).

"On the small scale about 70% of the entrepreneurs make tofu and 30% sell their soymilk as flavoured soymilk.

"Flavoured soymilk is sold in Poly packs [sealed plastic bags], sterilised in the glass bottles, and also in cans which are distributed to schools for consumption at lunch.

"What kind of people and organizations use SoyaCows to make soymilk and tofu: Commercial entrepreneurs approximately 85%. Non-governmental organizations (NGOs) 5%. Homes for destitute children and women 4%. Schools 5%. Cafeterias and business foodservice where they serve the soymilk on a subsidised price to their factory employees, hospitals 2%. These commercial entrepreneurs serve all the above sectors separately.

"Please let me know if you have any questions about the above. I am attaching the list of some successful entrepreneurs. The actual list is long, so I have sent just a few."

Ratan attaches a 4-page table, titled "A few successful soymilk and tofu entrepreneurs," showing: (1) Company name. (2) Contact person, address, and phone number. (3) Products and quantity made per day. For example, for Rubal Soya in Punjab (which owns 3 SoyaCows)–the largest soymilk manufacturer shown: Flavoured soymilk 1,200 L (liters) per day. Tofu 200 kg. Soy nuts 25 kg.

Auroville Soya is run by Mr. Frederic Cordonnier and his wife, Catia. Samara Soy Products in Ludhiana, Punjab, makes 1,400 L of flavoured soymilk. Address: PhD, Manager, the SoyaCow Centre, KH-177 Kavi Nagar, Ghaziabad 201 002 UP, India.

13110. Sharma, Ratan. 2010. Re: Work with soymilk and tofu in India and worldwide. Letter (e-mail) to William Shurtleff at Soyinfo Center, Sept. 26. 2 p.

• ***Summary:*** "The present price of the SoyaCow in India is as follows (Indian Rupees):

"SC20 without deodoriser–Rs. 175,000 (you really don't need a deodoriser if just planning to produce tofu only) but deodoriser is really effective for the flavoured soymilk business.

"SC20 with deodoriser–275,000.

"Tax: 4% on the total value.

"I have worked with the government and have had very good success in introducing soymilk, tofu and other soy products in the government-run residential / boarding schools (600 schools all over India). Although not all of them are using the soy products (for many different reasons), they all have the advice from their headquarters to use soy in their school menus.

"The Government of India (GOI) feeds approximately 120 million school going children by providing them lunch and at most of the schools they include soy products depending on its availability, price suitability, product quality etc. This program is called Mid Day Meal (MDM).

"Simultaneously GOI feeds approx. 130 million women and children by proving them the nutritious diet which is mostly soy based. This is called Integrated Child Development Services (ICDS). In both these programs they have certain norms of protein and calorific requirements.

"SSP manufactured and promoted the soymilk machine (SoyaCow). They did it for so many years without any monetary interest. After everything was established they transferred this business [on 9 Sept. 2006] to one of their fellow associates, Pristine Plants (PPI). SSP is a big Indian Food and pharmaceutical equipment manufacturing company. This was a very small business for them and at later stage they realised that because they were not earning anything from this machine through their Indian business so the interest of the company in after sales service was not up to the mark and they thought that this was not justified, so they transferred this business to Pristine Plants (PPI), which is a full-fledged company involved only this business including manufacturing, marketing, after sales service etc. SSP supplied so many machines to Russia and all over the world through ProSoya. SSP is still into this business and they manufacture and sell soymilk processing plants above 100 litres per hour capacity. Also, they manufacture and sell evaporators and driers for making the soymilk powder. They have good collaboration with the ProSoya. Evaporators and driers are their core competence." Address: PhD, Manager, the SoyaCow Centre, KH-177 Kavi Nagar, Ghaziabad 201 002 UP, India.

13111. Child Haven International (Website printout–part). 2010. www.childhaven.ca Printed Sept. 28.

• ***Summary:*** Contents: Who we are (Our story, Gandhian ideals, directors, Fred & Bonnie, Patrons, Financial. The first ten years. The Cappuccinos. View video about Child Haven). What we do (Our Child Haven homes–India: Delhi, Gandhinagar, Hyderabad, Kaliyampoondi, Savarsai. Bangladesh: Chittagong. Nepal: Kathmandu. Tibet: Lhasa. A map of the Indian Subcontinent shows the location of each home. SoyaCow project. Literacy. Women's program). How you can help (Donating. Volunteering. Sponsorship. Support groups. Corporate support. Supplies. Wall of honour). Intern

© Copyright Soyinfo Center 2013

(Since 1985 about 1,000 interns have volunteered for 3+ months in India or Nepal).

"Inspired by the ideals and philosophy of Mahatma Gandhi, Child Haven International is a registered charity founded in 1985. We assist children and women in developing countries, who are in need of food, education, health care, shelter and clothing, emotional and moral support."

Gandhian ideals: 1. No recognition of caste. 2. Equality of the sexes. 3. Non-violence (toward both humans and animals). 4. Vegetarian meals (The meals are rice and lentils and vegetables, with some soya milk and yoghurt from our SoyaCow machines, which were invented by Raj and Rashmi Gupta of Ottawa, Canada). 5. Respect for religious background. 6. Simple living (Each child has a little metal suitcase. All their worldly goods have to fit inside, and they do–very nicely).

Child Haven's SoyaCow project: "The SoyaCow machine is capable of making three gallons of soya milk in 30 minutes from 1.7 kg. of raw soybeans. The technology was developed by ProSoya Foods Ltd., a group of Ottawa scientists and entrepreneurs. The SoyaCow machine is used in Child Haven homes to produce Soya milk and Soya products for the children. It's also sold to economically disadvantaged women for their use as a cottage industry.

"In 1988 a SoyaCow Support Group was formed and by 1992 Child Haven International had purchased six SoyaCow machines. Child Haven received funding for this environmentally friendly project from The Canadian International Development Agency (CIDA). There are now 400 SoyaCow machines in India and it is being promoted in Africa. Charitable donations and fundraising events provided Child Haven's contribution to the promotion of the SoyaCow.

"SoyaCow technology produces a palatable, highly nutritious, cereal or almond flavoured milk without cholesterol. The milk and okara mash can then be used to produce other soya products such as yogurt, tofu and vada. One machine can produce sixteen-three gallon batches in an eight hour day–equivalent of a herd of 16 cows in India.

"SoyaCow machines are used in Child Haven homes in Kathmandu, Bangladesh, Hyderabad and Kaliyampoondi because soy milk is a low cost, high protein product which is cheaper to produce than cow's milk. From a given acreage, ten times as much soy milk can be produced at one third to one half the price of cow's milk. Soy milk made on the premises of schools and homes is safe from contamination by dilution with water. It is also free from the danger of transmitting tuberculosis or other diseases from infected cows.

"In addition to the health benefits of soya milk, Child Haven's SoyaCow Project has generated employment for women. These women are trained to operate the SoyaCow machines and sell the soya milk products, thereby achieving some economic self sufficiency and generating revenue which can be used for the benefit of their children." Address: Farmhouse, Maxwell, Ontario, Canada.

13112. Sharma, Ratan. 2010. Re: Work with soymilk and tofu in India and worldwide. Letter (e-mail) to William Shurtleff at Soyinfo Center, Sept. 28. 2 p.

• ***Summary:*** Under what name is tofu sold in India? About 35% is sold under the name of "tofu," 40% is "Tofu (soya paneer)" and 25% is sold as "Soya paneer." Because of regulatory issues in India, people are switching over to the name "Tofu" only.

How is tofu packaged when it is sold? About 50% is sold fresh and loose, 20% is sold in poly packs, and 30% is sold vacuum packed through the super stores. Poly packed tofu is also available in the super stores. Tofu is available in water filled pouches also but the percentage is very small. Fresh tofu is sold in local markets, vegetable markets and in stores that sell house hold supplies.

After the success of SoyaCow in India a few local companies also started producing these machines. This is quite unorganised in comparison to the PPI or SSP who have technically sound teams and are very professional for such business, are professionally marketing the machine and providing excellent after sales service. PPI sells approx. 60 machines in a year, twenty machines are sold by other companies and approximately 10-12 machines are imported from China and Taiwan. There are dealers of imported machines also. On an average 100 machines are sold every year in the Indian market. Not all users of these machine make it to a successful business and 30-35% of them close down their business within a year.

"The most popular soymilk flavours are vanilla, mango, rose flavour, pineapple, almond, and banana. In south India rose flavoured soymilk is very popular. Choice of flavours varies from place to place but the above flavours are standard and popular. Keshar-pista (blend) is also popular. At some parts of the country like Tami Nadu, Punjab, Haryana, etc., people like very sweet soymilk.

"Tofu is cooked in various ways like Indian Paneer, i.e., Matar Paneer, Palak Paneer, Kofta, Oofu Tikka Masala, etc. Tofu Bhurji (scrambled tofu) is also prepared and popular. In the Punjab area many people use spicy tofu as a salad with their alcoholic drinks. Tofu is used as filler material in the Indian snacks like Samosa, patties etc.

Work in Africa: I have visited South Africa five times and tried to establish cottage scale soy food businesses in that country as well. I have worked with Eden Manufacturing and many other companies in South Africa and imparted training also to interested people at Eden Manufacturing at Berg Village and Pretoria with CSIR (Council of Scientific and Industrial Research). Address: PhD, Manager, the SoyaCow Centre, KH-177 Kavi Nagar, Ghaziabad 201 002 UP, India.

13113. Drosihn, Bernd. 2010. Tofu–Vom skurrilen Kampf um ein unscheinbares Weltnahrungsmittel [Tofu–From a ludicrous struggle to an unpretentious world-class food]. Mainz, Germany: Ventil Verlag, KG. 158 p. Illust. (many black and white photos). No index. 20 cm. [Ger]

• ***Summary:*** A very nice, informative book written in a very creative, humorous, light and playful tone. But lightly serious throughout about the importance of vegetarianism and of not eating animals.

One example of this creative playfulness is the numbered "Tufuismus" ("Tofuisms" = tofu sayings) which appear, in random numerical order, throughout the book. Here is a sampling–from the many that are in English: "On the 8th day God created Tofu." "Earth to Mankind: Take global warming seriously–stop eating animals." "Tofu is a doorway to the sunny side of life." "Tofu is a love letter to your body." "Tofu gives you choices you never thought you had before." "Tofu loves you." "Take tofu–because how we eat is how we manage planet Earth." "Tofu talks to your body and mind." "Your Body is a Cathedral–don't litter it." "Tofu is easy on the only world we have." "Tofu helps you stay young and hot." "Tofu simplifies your life." "Tofu is Al Gore's best friend." "Share Tofu's vision of friendliness toward the environment and the animals on our planet." "Legalize Tofu!" "Tofu hurts NoBody." "Less meat–More Plants–More Planet." "Tofu gives rhythm to the sound of your life." "Tofu is meat 2.0."

The book also contains many numbered "tofu fact" boxes, a few with titles such "Fidel Castro Tofu Fact"

Happily, the book contains only a few pages of recipes using tofu, smoked tofu, and soymilk (p. 142-157)–as many as anyone needs.

The section titled "Addresses" (p. 158-59) contains names, addresses, and websites of "beloved tofumakers from the first generation" in Germany and the USA. A photo shows Bernd Drosihn, founder and president of Tofutown.com GmbH. Address: Founder and president, Tofutown.com GmbH, Industrie und Gewerbe Park, D 54578 Tofutown Wiesbaum, Germany. Phone: 06593 9967-0.

13114. Sharma, Ratan. 2010. Re: Color photos of soymilk, tofu, and SoyaCows in India. Letter (e-mail) to William Shurtleff at Soyinfo Center, Oct. 1. 4 p.

• ***Summary:*** Photos (see next page) taken by Ratan Sharma 2003-2007 show: (1) (6) A SoyaCow SC20 with each of the 7 main pieces of equipment labeled. The first SoyaCow was developed for Child Haven International (CHI) in India and shipped in 1992. Although, the Canadian International Development Agency (CIDA) helped with funding in the beginning, they later stopped funding and CHI carried it forward through its own funding. Today SoyaCows are installed at all Child Haven homes in India, Bangladesh, Nepal and Tibet.

(2) This 200 liter per hour plant was made by SSP in India and supplied to a company in Chennai (formerly known as Madras, in southeast India) through ProSoya. Dr. Ratan Sharma standing in blue shirt.

(3) This soy restaurant named AIWO (meaning unknown) was started in 2003 by the Fresh and Honest Café (a coffee company selling the coffee beans, powder and leasing the coffee vending machines). They were using a big SoyaCow by in India by SSP (model VS200; capacity 200 liters per hour). The restaurant served more than 20 kinds of soy food dishes, each at a fixed price. The dishes were served on a conveyer belt that ran around to each of the tables. It was developed by a big group called Sterling Group. They offered some discount to their employees. Some Singapore based company prepared this restaurant and developed the modalities.

(4) Bottled soymilk (in crates ready to be loaded in the truck) was produced by Fresh and Honest Café. Their brand name was Soyfresh. They sold the soymilk and tofu through super stores (supermarkets). Soymilk was sold in glass bottles (sterilised) and poly bags. Tofu was sold only vacuum packed. I helped all these companies from the procurement of the soymilk machines, product development, packaging, shelf life, marketing, etc.

(5) Uncut tofu in India. These SoyaCow users, after making the tofu, put it in water for cooling before cutting it into pieces and packing. Each block of tofu weighs about 3 kg (6.6 lb).

(6) A herd of six SoyaCows, each with a tall stainless-steel deodoriser to improve the taste of soymilk, is ready for dispatch at the SSP factory. Ratan Sharma inspected each machine before it was shipped.

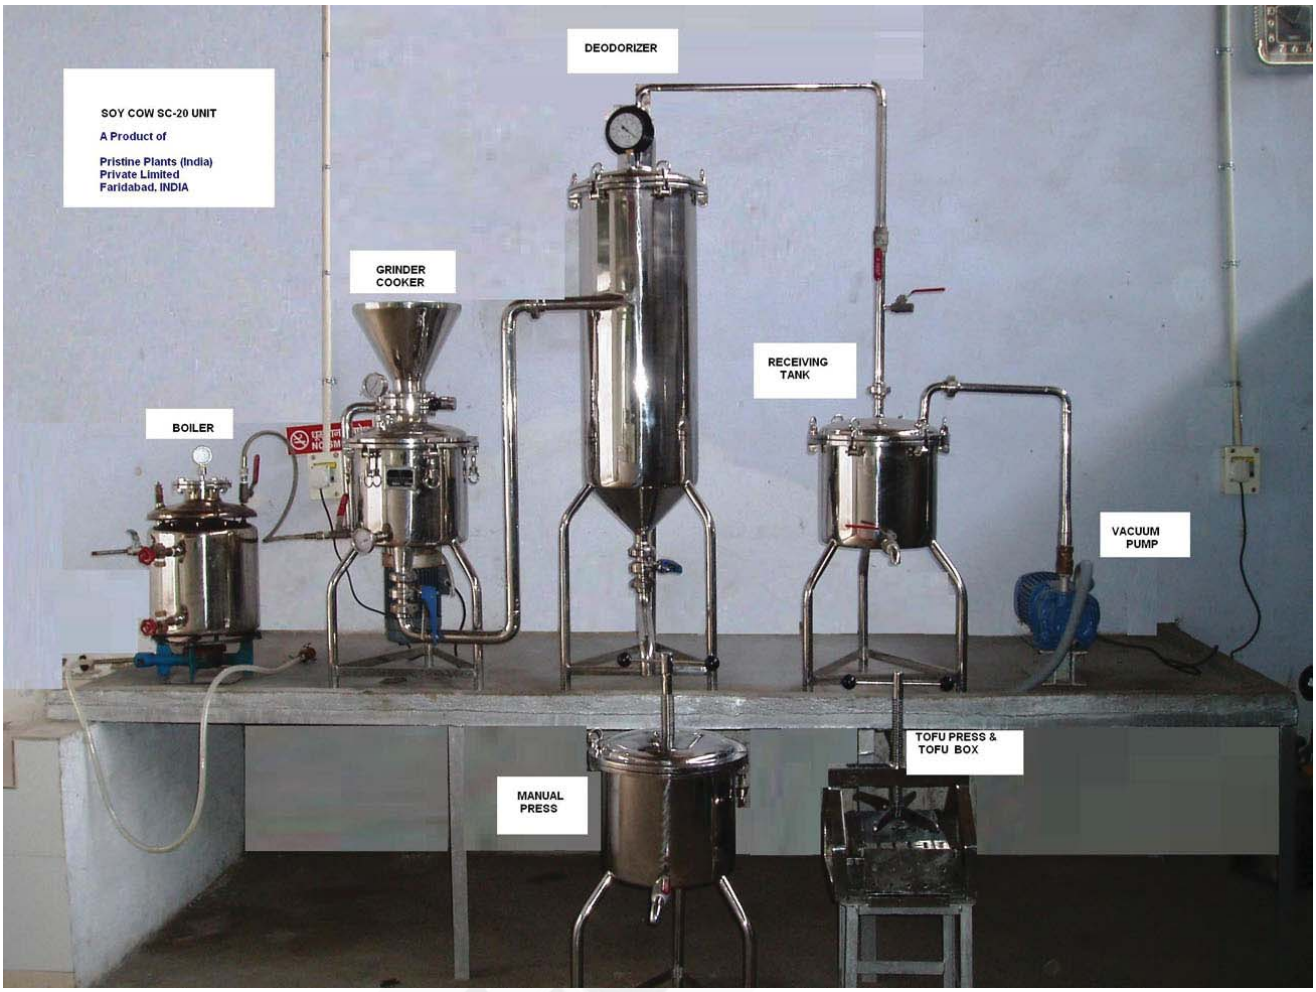
(7) Vakratund Pharmaceuticals (VF) which, despite its name, made only soymilk and tofu at Udaipur, in the state of Rajasthan in western India. (8) They purchased a 200 soymilk plant with a capacity of 200 liters per hour made by SSP. Because of the huge initial investment this company wasn't able to survive. Their product quality was excellent and they were supplying it to many states. They eventually sold their machinery to other company.

(9) A mobile soy kitchen selling soymilk and tofu.

(10) The advertisement used by the mobile soy kitchen.

(11-13) Various soy products on the shelves of Dorab Ji, a very famous super store (supermarket) in Pune (formerly Poona). The same products are in other area super stores: Food World in Pune, Spencer's in Bombay, etc. Chetran Foods in Pune is well known. Note Silk brand soymilk from the USA along with the Indian Sofit and Staeta in Tetra Pak cartons, made in India by ProSoya, headquartered in Ottawa, Canada. At the bottom of the shelf is sterilised soymilk in 200ml, 500 and 1,000 ml glass bottles. These soy products are in the soft drink cooler, so soy products have been accepted in the leading super stores and are as visible as Coca-Cola. Pepsi, etc. (14) Two brands of tofu

© Copyright Soyinfo Center 2013



© Copyright Soyinfo Center 2013

© Copyright Soyinfo Center 2013

in the dairy section (refrigerated) of a super store: Soyace Soya Paneer and Soyfit Soya Paneer (Tofu). The Sofit tofu is made by Wega Industries in Bombay; they have their own large-capacity tofu factory. Fifty percent of tofu and soymilk manufacturers sell their products on their own; the rest sell them through super stores or malls or exclusive restaurants. In the Punjab soyfood makers have developed some special soy retail outlets. A few manufacturers use bicycle rickshaws–somewhat like traditional tofu makers in Japan who carry their wares on a bicycle and sell directly to people in their homes.

(15) Women's employment: Making tofu at a soymilk site in a remote area of Hyderabad.

(16) A SoyaCow SC20 with tall stainless steel deodoriser (for better soymilk flavor) in the center.

(17-18) Training entrepreneurs to make soymilk on a SoyaCow SC20.

(19) Ratan Sharma cutting tofu at a soymilk and tofu training program in the tribal areas of Orissa state.

(20) School children waiting for or drinking soymilk at the same training program.

(21-22) The VitaGoat from Malnutrition Matters (MM) of Canada requires no electricity. The soaked soybeans are ground with a bicycle powered grinder. The soymilk is heated using a very efficient wood-fired boiler. Here is a VitaGoat training program in the tribal areas of Orissa. Malnutrition Matters is associated with Child Haven International (CHI). "Frank Daller is a volunteer of CHI and is one who was involved in the SoyaCow technology transfer from Canada to India in coordination with me. He was working for ProSoya at that time. We have very good relations. I helped MM also in transferring their VitaGoat (VG) technology to GD Machines (a subsidiary of SSP which later merged with SSP) almost two years ago. I help MM also. Their machines are manufactured by GD and sold in India and other countries. These machines are marketed by MM only. Off course, I help their clients in the way I help the SoyaCow users."

(23) Fresh soymilk is prepared by an NGO and served fresh to children at a school in Orissa, which has no electricity or refrigeration.

(24-25) At some of the army rehabilitation centers soymilk and tofu processing systems (SoyaCow) have been installed to impart training to retiring solders (who retire before age 30) so that they could choose soy foods business as a career option after retirement rather than entering low-profile jobs such as guards, drivers, electricians, etc. Address: PhD, Manager, the SoyaCow Centre, KH-177 Kavi Nagar, Ghaziabad 201 002 UP, India.

13115. Sharma, Ratan. 2010. Re: Color photos of soya flour, soya nuts, and soya oil made in India. Letter (e-mail) to William Shurtleff at Soyinfo Center, Oct. 1. 2 p.

• ***Summary:*** Photos taken by Ratan Sharma 2003-2007 show: (1) Soya Shakti soya flour in a super store (supermarket). (2) On the top shelf is Chetran's Soya Aata. Two other brands of soya flour are in the photo.

(3) Salt roasting of soynuts for a commercial scale production; the soybeans and salt are roasted together in the hot metal pan. This product is excellent in taste. This company Bansal Nuts based in Punjab feels that their products are better than the mechanically roasted soynuts.

In English, we say "roasted peanuts" or "roasted soybeans," but in Hindi all roasted legumes and/or grains are simply called "roasteds" (*bhuna*).

In stores, roasted soybeans are usually sold labeled (in English or Hindi or both) in plastic bags–unmixed with other roasted grains or legumes. However a small percentage of products sold in stores or markets contain a roasted mixture of soybeans, wheat, rice, and/or chickpeas (garbanzo beans).

In India, roasted soynuts are usually sold through the direct outlets of the manufacturer and through super stores. Roasted soynuts are sold all over India. At some places they are also included in the school lunch program, which is paid for by the Indian Government.

In India, soyabean is mostly dry roasted. Many small scale soymilk and tofu manufacturers make soy nuts by roasting whole dry soybeans in sand. In India ground nuts (peanuts) and chick peas (garbanzo beans), rice and other grains are roasted in the sand. This job has been done by some communities from centuries. They charge some money, or a little portion of the material to be roasted, and do it for any one. These roasted legumes and grains used for the snacks in the rural and urban areas from centuries. Street vendors in the cities near the courts, hospitals, schools, bus stops, etc. roast and sell these grains or a multigrain mixture. It is not common to roast soybeans (except indigenous black soybeans called *bhatt*) for home consumption. Roasted soybeans are usually sold in super stores in plastic bags. The Hindi name for soybeans dry roasted in sand is *bhuna,* but most people just call it "roasted" (in English). The name for dry roasted soybeans sold in plastic bags in stores is "Packet" or *thaila* (in Hindi).

Some small soymilk and tofu makers sell fried soy nuts as well but percentage of these is very low compared to the dry roasted soy nuts. The soybeans are first soaked in water about 2 hours; then they are roasted in salt. After the sand is removed (by a sieve), a small amount of oil, salt, and some spices are applied to the soybeans. Very little oil is used so that salt and spices could stick on the roasted beans. Soybeans prepared with oil, salt, and spices are called *masaledar.* But in general in India, whole soybeans are not fried.

In Jammu and Kashmir (J&K, the northernmost state of India) and some other places soy nuts are sold by the street vendors also in the way they sell other roasted grains. In hilly areas also they grow black soybean called *Bhat / Bhatt* (in Hindi) and roast it for their consumption especially in the

© Copyright Soyinfo Center 2013

winter. This indigenous black soybean is grown mostly in the Himalayan range, especially in the Kumau and Garwal regions.

In the villages they use dry leaves to fire their hearths for roasting. They store these dry leaves during the fall / autumn and use them year round for the roasting of the legumes and grains brought by the farmers and other villagers.

(4) Soy-fortified pasta, which is made by small entrepreneurs.

(5) Roasted soybeans coated with jaggery–traditional unrefined sugar. It is a concentrated product of cane juice without separation of the molasses and crystals, brown in color.

(6) A few companies in India use expellers (a mechanical process) to crush soybeans, yielding soy oil and low-fat soy meal. The meal is ground finely to make soy flour. Both are sold at premium prices compared to the oil and flour from solvent extraction (a chemical process, using hexane solvent, a volatile petroleum fraction). Here are bags of the flour.

(7) And the oil. Note the word "Natural" on the label. Note: Even though the manufacturer of this oil and flour is named "S.P. Solvent (Pvt.) Ltd." (which sounds big and modern) they use only expellers and mechanical processing.

(8) A small, single serving packet of soya nuts (soynuts), nicely packaged. Anjali Mukherjee is a diet therapist and well known food and health writer for *Times of India.*

(9) Allegro Soya Nuts from Taj Majal.

(10) Coca-Cola and soyfoods get equal billing in India.

(11) Soya Nuts packaged in plastic bags. Address: PhD, Manager, the SoyaCow Centre, KH-177 Kavi Nagar, Ghaziabad 201 002 UP, India.

13116. Sharma, Ratan. 2010. Re: Color photos of soymilk, tofu, and SoyaCows in India. Letter (e-mail) to William Shurtleff at Soyinfo Center, Oct. 1. 4 p.

• ***Summary:*** Photos (see next page) taken by Ratan Sharma 2003-2007 show: (1) Training of the prospective soymilk and tofu entrepreneurs (men's group).

(2) In the training program: By using a curding agent / coagulant, soymilk is curded to make soft white curds floating in yellow whey. In India, the most widely used curding agent is citric acid, followed by calcium sulphate, then magnesium chloride. (3) The curds are now ready for pressing to make tofu. This group is part of the Soy Entrepreneur Development Program (EDP). This program was conducted in coordination with the American Soybean Association–International Marketing (ASA-IM) and the Government of India (GOI).

(4) A collage showing the labels of well-known soyfood products made in India. Note Ruchi's Nutrela (chunks of textured soy flour) along the top. Soya Sakthi in the lower right, Sofit soy milk in the lower left. Soyfoods now have a good, healthy image in India–as they do throughout Asia.

(5) SoyCow 'M' developed by Malnutrition Matters in Canada; the five main pieces of equipment are labeled: Electric grinder, water pump, multi-fuel boiler, pressure cooker, and filter press. A simpler unit, called the VitaGoat, comes with a bicycle powered grinder (which requires no electricity). Address: PhD, Manager, the SoyaCow Centre, KH-177 Kavi Nagar, Ghaziabad 201 002 UP, India.

13117. Sharma, Ratan; Shurtleff, William. 2010. How soymilk came to India after 1970; fragments of a long and interesting story. Part II (Overview). *SoyaScan Notes.* Oct. 7. Compiled by William Shurtleff of Soyinfo Center.

• ***Summary:*** Ratan notes: These larger plants do not compete with similar plants that ProSoya Inc. of Canada would like to sell to some larger customers in India. SSP and ProSoya Inc. have a very good understanding. Some times there is a conflict of interest but they sort it out. Occasionally SSP makes a plant for ProSoya on their demand. They have very good business and personal relations and I try to equilibrate between them to avoid any such problems which could create any hurdle in this business. Fortunately SSP and ProSoya are run by the people with very high ethical and moral values.

As the demand for soymilk and tofu has increased in India, people thought of going for the bigger capacity plants and PPI made slightly larger plants. The earlier plants were 30 L (litres) per hour capacity but they recently made 50 L per hour capacity also. The most popular model is SC20 which produces 30 L of soymilk in an hour. The larger versions of the SoyaCow are not sold much.

Approximately how many SoyaCows has Ratan sold each year in India? Here is a sampling of statistics he has kept: 1995–approximately 12 units. 1996–approx. 20. 1997-1999–approx. 27 each year. 2000–approx. 35. 2001-2003–Approx. 18 per year. 2004–approx. 40. 2005–approx. 43. 2006–approx. 45. 2007–approx. 38. 2008–approx. 45. 2009–approx. 65. 2010–approx. 65 as of Oct. 1. If you plot these numbers on a graph, the result is, on average, fairly rapid, linear growth, with the curve rising rapidly starting in 2009.

As of Oct. 2010, there are two brands of soymilk are made in India and sold in Tetra Pak cartons: Staeta and Sofit. Both are made in the same plant, owned by Godrej, at Mandideep, near Bhopal, Madhya Pradesh, in central India. Godrej (now named Godrej Hershey) is the biggest food and consumer goods company in India.

Total UHT (Tetra Pak) soymilk production (for Godrej and ProSoya) is about 4 to 4.5 million liters annually. Godrej has about 60% of the market and ProSoya about 40%. The product quality is almost the same but Godrej sells more because of its well-established network of retail stores to which they distribute a wide variety of consumer products.

"The SC20 comes with the electrical grinder only whereas the VitaGoat developed by Malnutrition Matters (MM), Canada runs without electricity. They have the option of the electrical and gas fired boiler also. This machine was being manufactured by GD Machines in India. GD is a subsidiary unit of SSP and two years back they merged with SSP so now these machines are being made through SSP. Here I would like to mention that these VitaGoats are mainly sold through the MM in India and other countries. I am helping MM also in their VitaGoat business development and helping the users of their machines in product development, marketing etc. These machines have been sold to big NGOS also who run these machines through the shelf help groups (SHGs) and supply the soymilk in schools. One such big project was supported by World Bank in a tribal area of Orissa. I was also involved in that program.

"SSP manufactured and sold VS-200 plants also in India. These could produce 200 L of soymilk in a hour. They just sold 5-6 such machines in India. Also, SSP manufactured and sold so many such systems for ProSoya in other countries; they even produced 500 L and 1,000 L per hour soymilk processing plants for ProSoya along with the evaporators and driers. Some of these were installed in Russia also.

The three companies that make low-quality 'rip-off' soymilk equipment have, on average, sold a total of about 15-20 machines a year during each of the past two years. They are quite unorganised in comparison to PPI or SSP who have technically sound teams and are very professional in this business of making and marketing the machines and providing excellent after sales service. PPI sells approximately 60 machines per year, twenty machines are sold by other companies and approximately 10-12 machines are imported from China and Taiwan. There are dealers of imported machines also. On an average 100 machines are sold every year in the Indian market. Not all users of these machine make it to a successful business and 30-35% of them close down their business within a year.

"The most popular soymilk flavours are vanilla, mango, rose flavour, pineapple, almond, and banana. In south India rose flavoured soymilk is very popular. Choice of flavours varies from place to place but the above flavours are standard and popular. Keshar-pista (blend) is also popular. At some parts of the country like Tami Nadu, Punjab, Haryana, etc., people like very sweet soymilk." Address: 1. PhD, Manager, the SoyaCow Centre, KH-177 Kavi Nagar, Ghaziabad 201 002 UP, India.

13118. Sharma, Ratan. 2010. Re: Development of soy foods in India. Letter (e-mail) to William Shurtleff at Soyinfo Center, Oct. 10. 2 p.

• ***Summary:*** "We worked to develop specific soy food recipes to make these products popular across the country.

"Sometime in the 1980s there was a semi-larger capacity of soymilk plant was installed at G.B. Pant University of Agriculture and Technology, Pant Nagar, Nainital in India. This was a donation from USAID and was based on the old Illinois technology. The okara was not separated from the soymilk. This university use to sell the flavoured soymilk during the farmer fairs and to their teaching staff. There was no commercial development through this machine in India.

"There are few government organisations promoting the soy products and the soy food based entrepreneurship in India: 1. Indian Council of Agricultural Research: They run all the agricultural universities and institutes where they run some soybean farming and soy food promotion kind of work in addition to varietal development of the soybeans and their work on the other agricultural products. It's a huge establishment of the Government of India under the Ministry of Agriculture.

"2. Central Institute of Agricultural Engineering, Bhopal (MP): They have a Soybean Processing and Utilisation Centre where they have an old version of the SoyaCow and train the prospective entrepreneurs on this. Also, they provide training in the preparation of other soy food products. This institute runs week-long courses on the soy food products.

"3. National Soybean Research Centre, Indore: This is mainly to develop the soybean varieties. They also do some training and extension work on soy food promotion.

"4. The Government of India (GOI) did a generic campaign for the soy food promotion in India about 4-5 years ago. Many government organisations in India are involved in promoting soy foods and businesses.

"5. The Ministry of Women and Child Development, Food and Nutrition Board recommends using soy food products in various feeding programs. GOI feeds more than 240 million of women and children in various feeing programs under Integrated Child Development Services (ICDS) and Mid-Day Meal programs.

"6. Many non-governmental organisations (NGOs) and religious organisations use tofu to feed the people of their targeted area, their devotees, employees, etc." Address: PhD, Manager, the SoyaCow Centre, KH-177 Kavi Nagar, Ghaziabad 201 002 UP, India.

13119. Sharma, Ratan. 2010. Re: Work with soy foods in India and Africa. Letter (e-mail) to William Shurtleff at Soyinfo Center, Oct. 12. 2 p.

• ***Summary:*** "I really feel blessed and fortunate having the opportunity to be associated with Soy which is a wonderful food for the people of my country and all over the world. After my masters [degree] I thought to go for a Ph.D. in soymilk and tofu technology. Soy was not a lucrative topic for a Ph.D. those days. My friends asked me to choose some other topic but I had finally decided and determined for this. When doing a Ph.D., the students want to choose some topic on which they can get enough reference and information on the subject they have chosen. We had a very little information on soy products in our library (everything was on its animal utilization side) but I was determined to go for Soy only.

"What inspired me to go for Soy: I am basically from a village. We have had one retired and old school principal (named Shri Janardan Prasad Sharma) in our neighbouring village. He used to be the school principal of my father and his elder brother and quite often use to visit my family. He was a very simple and great person. During his youth he was associated with Mahatma Gandhi, Vinoba Bhave and others. After his retirement he started educating people on the inner development, simplicity and Karma, and choosing a suitable Guru who could help you develop your inside. All the people in my area had high regards for him.

"He was very vigilant on my studies. Those days very few people go for the higher studies. Once he told me that Mahatma Gandhi tried to introduce soymilk and some soy based products but couldn't make it acceptable to the people. Somehow he was also associated in Mahatma Gandhi's soy program. He was always curious to know if something is happening or some technological advancement to make this product acceptable for the Indians. I thought I should try to work on soymilk and tofu and to develop the techniques to make a better and more acceptable product. That's what brought me into the soy and later my association with Child Haven International and ProSoya was a predetermined thing by God to help me into this noble venture.

"After my Ph.D. and commercial association with soy I became very busy in its promotion and helping the soy food entrepreneurs in many ways. Many things developed in the soy food industry and soymilk, tofu and other soy food product's business. I was excitedly and carelessly so busy that I couldn't show the packaged soy food products, bottled soymilk, vacuum packed tofu to our well respected old school principal who had been lying on bed after breaking his back. Although I kept on talking about these developments which made him very pleased especially the wide acceptability of the soymilk and other soy food products and the technological developments to make the soy food products acceptable in the general masses. I couldn't show him the products and he passed away after a long illness at a very old age.

"Also, my grandfather (named Shri Harihar Prasad Singh) who was a farmer and very brilliant horticulturist was a real fan of soy. He had a book which was published by the G.B. Pant University of Agriculture and Technology, Pant Nagar more than 32 years ago. In that book, lots of soy recipes were given. My grandfather use to try those. That's how I was exposed to soy; otherwise soy was not a common word known to many people.

"My grandfather and that school principal were not in favour of me pursuing a job in the U.S. or Canada but to live in India and to develop some soy based low cost nutrition and to serve the country. This really influenced me and I determined to work on soy and stay in India. When I see many families growing through this soy food business I feel a little satisfaction of my work which is helping the people in many ways.

"When one of these people working with soy calls on the phone to ask for help, I usually know who it is just by the sound of their voice.

"I really feel blessed that I got this opportunity to serve mankind this way. During my travels to Africa I trained many of the groups/NGOs etc. in the soymilk and tofu production and utilization and delivered lecture on the soy nutrition. These were the programs to help people suffering from HIV/AIDS to get better nutrition through soy. I could still recall those large gatherings of the people suffering with HIV/AIDS at the community centres in Uganda, Tanzania, Kenya, etc. God helped me to develop some products of their interest with the soymilk which they liked." Address: PhD, Manager, the SoyaCow Centre, KH-177 Kavi Nagar, Ghaziabad 201 002 UP, India.

13120. Gupta, Rajendra ("Raj") P. 2010. Overview and current status of soymilk in India. Part I (Interview). *SoyaScan Notes.* Oct. 13. Conducted by William Shurtleff of Soyinfo Center.

• ***Summary:*** Soymilk in India: ProSoya never received any royalties from the sale of SoyaCows in India because ProSoya donated all those royalties to Child Haven International (CHI, a charity), that purchased many of ProSoya's earliest machines with significant funding from the Canadian International Development Agency (CIDA).

Some of ProSoya's potential customers for small equipment didn't want to buy that equipment from India because of quality issues. So, for a while, ProSoya in Canada imported small SoyaCows made in India to Ontario, upgraded certain parts (such as motors), then exported them to countries worldwide. ProSoya paid a royalty to Child Haven on those machines. Later ProSoya found that this business in small SoyaCows was taking too much of the company's time and energy, and it was actually unprofitable. So they discontinued that service. But later, because of continued demand (especially from Europe),

© Copyright Soyinfo Center 2013

they built a slightly larger SoyaCow, SC50, which has many new features, such as a cooking vessel with insulation on the outside. All SoyaCows, even those made in India and Russia, are now 100% stainless steel. The only machines that contained aluminum were made by ProSoya at the very beginning, before SSP started making SoyaCows.

One problem is that these small SoyaCows in India do not make very good tasting soymilk–compared to the flavor of soymilk sold in Tetra Pak. The latter "is a very outstanding product; everybody loves it. We developed that taste especially for India, because in India they sometimes drink it hot, sometimes drink it cold. We developed a soymilk that is good whether it is hot or cold. We sell plain soymilk (made from soybeans and water, widely sold to diabetic people), original soymilk (with just a hint of cooked dairy milk flavor purchased from a flavor house), and flavored soymilks (made by using the original soymilk as the base). The best-seller of types three is saffron & pistachio, followed by plain. One key point is that freshly made tasty soymilk does not taste as good as soymilk that has been aged for 2-4 days in the package. The flavors "marry"–as they say in French. However beany flavored soymilk tastes worse and worse, the longer it is aged. In India, law requires Tetra Pak products to be quarantined in the plant for 7 days before they can go to market. The consumer buys it about 15 days after it was made, but it has a shelf life of 6-12 months.

There are only two companies in India that make and sell soymilk in Tetra Pak cartons. They both make their soymilk in the same plant at Mandideep, near Bhopal, Madhya Pradesh. They are Godrej (Sofit brand) and ProSoya India (owned by SoyaWorld, brand name Staeta, pronounced STET-uh). This market is growing by about 8-10% a year, but it would grow much faster if the product were less expensive. The retail price in an aseptic pouch would be about 50-60% as much but the shelf life would be the same.

There are many manufacturers of aseptic pouches. ProSoya owns one in Canada for demonstration and experimental purposes. In about 18 months, when his non-compete agreement with SoyaWorld expires, Raj hopes to start making soymilk using his large SoyaCows in a location unrelated to Godrej, packaging it in aseptic pouches. Rather than competing with Godrej and ProSoya India (who make soymilk for the elite), he will complement them, and may simply expand the market without taking any market from them–by reaching out to the sub-elite.

There may be a potential in India for extending dairy milk with soymilk as long as it is done with full, open disclosure–with no sense that the milk has been adulterated. It would bring down the price and expand the supply. Most of the milk in India is buffalo milk, which is also much whiter than cow's milk due to its higher fat content.

ProSoya has developed new technology for a new generation of better tasting soymilk; it is incorporated into all ProSoya except the smallest machine.

Although there are 350-400 small soymilk companies in India and two large companies selling soymilk in Tetra Pak cartons, the volume of soymilk produced is very small. "I think Indians still do not like any of the soya products." Raj has been working intimately with his nephew (his sister's son) in one of the smaller cities in India who owns and operates a company making tofu and soymilk. He knows, day to day, what problems he faces. Raj believes that soya paneer would be perfect for India, but the problem is that people are still "soyaphobic." The most promising project in Raj's mind is to sell good-tasting soymilk in inexpensive aseptic pouches–the kind that are very popular in Latin America. The retail products are priced at about half or just over half of Tetra Pak. You cannot see the soymilk in an aseptic pouch; it is an opaque film with an oxygen barrier liner. Such a pouch would greatly increases soymilk sales in India because many more people could afford the product. Total sales of aseptic Tetra Pak soymilk is about $3-5 million and maybe 10 million liters, with only two brands competing: Staeta (ProSoya of India, Inc.) and Sofit (Godrej). America Soybean Association says soymilk sales are much larger, but Raj does not know where they get their numbers from. Both companies make their Tetra Pak soymilk in the same plant at Mandideep, an industrial area just south of Bhopal, in Madhya Pradesh. Raj is still bound by a 5-year non-compete agreement with SoyaWorld at that scale.

Concerning Godrej and the factory at Mandideep: ProSoya India asked Godrej to distribute their Staeta soymilk. "We thought they were not interested in soymilk any more [after the failure of Great Shake, launched in 1987]. When our man asked them to distribute the product, they started thinking 'Why not make our own, instead of distributing Staeta?' So ProSoya ended up distributing its own product; SoyaWorld has continued that–because in India they don't have good distribution channels. We did try partnering with H.J. Heinz Co. for about 1½ years and they spoiled our market completely–not that they wanted to but the corporate culture didn't exist. The top management was very interested in working with ProSoya, but the middle and lower management thought of it as an external product and made no effort to promote it. By contrast, Godrej has the best distribution system in India for foods and basic consumer goods; and they distribute to stores they own. That's the reason their sales are so much more than ours. They distribute even to smaller cities. But in the cities or shops where ProSoya's Staeta is present, Sofit (which is always on discount) hardly sells at all–even though Staeta's price is slightly higher. Consumers strongly prefer Staeta's flavor. Godrej makes ProSoya's soymilk, you might say, so how can we compete with their Sofit on price? We compete on quality. It is very unusual for two competitors to make the same product in the same plant." Continued. Address: President and CEO, ProSoya Inc., 2-5350 Canotek Road, Ottawa, ONT, K1J 9N5, Canada. Phone: 613-745-9115.

13121. Gupta, Rajendra ("Raj") P. 2010. Overview and current status of soyfoods in India (Interview). *SoyaScan Notes.* Oct. 13. Conducted by William Shurtleff of Soyinfo Center.

• ***Summary:*** Raj's nephew (his sister's son) earned a degree in physics in India, then a master's degree from a university in Boston in semiconductors, but never finished his PhD degree from Boston University. Then he worked in the semiconductor industry in Scottsdale, Arizona, for many years. Then he moved to Ottawa, Canada, for 10 years. Finally (in 2004, at about age 35) he decided to return to his native India, to do something to help the people of India. When Raj started his original tofu plant in Kanpur in 1985, his nephew had worked at the plant for one summer as a student. He wanted to start a similar plant in Allahabad, a city in the north Indian state of Uttar Pradesh. In about 2007 he bought the smallest SoyaCow system, the SC20, and started a business making soymilk and tofu. He learned how to make these products from a book, *Tofu and Soymilk Production.* He did a lot of innovative research. His business is doing well, but he has not yet reached the break-even point. The volume is pretty low and local people do not really like either soymilk or tofu (soya paneer). He is making only about 5-6 batches per day, which is 200 to 400 liters of soymilk per day. But he located his business in a more challenging part of India. If you go to the western part of India, people are more affluent and more inclined to eat foods which improve their health. The same is true in south India. But in Allahabad and points east, it is somewhat more challenging to try to introduce soyfoods. So his location is part of his problem, but he wants to work where there are challenges rather than where things are easier.

Indians are still not very excited about tofu as a high-quality, low cost alternative to paneer (fresh dairy cheese). Part of the problem is that tofu makers in India try to sell tofu as imitation paneer, rather than as a healthier alternative. So he calls his product "tofu." In Kanpur, where Raj started his work with tofu, he never called it "soya paneer." But the problem is that even if you call it tofu, Indian consumers still think of it generically as "soya paneer"–probably because paneer is so popular and it looks so much like paneer.

In Kanpur, way back in 1985-86, we realized that India requires very small machines (smaller than a small Takai system) that will make soyafoods where needed when needed, decentralized to avoid distribution. Machines that can be used in institutions or very small shops. In many places, this is the way it is done today and they have been successful. "We demonstrated in various schools that this is a concept which will work."

But today per capita consumption of soyfoods is still extremely small. "We expected that it would double every year or more, but its growing at the rate of 8-10% and from a very small base."

Of the various soyafoods in India, by far the most popular is textured soy flour / flakes (such as Ruchi's Nutrela in chunks, nuggets and granules). Ruchi is the market leader, but many local companies use extruders to make similar products from very inexpensive defatted soybean meal or flakes. Number 2 is probably soymilk, with tofu a distant third.

India is a very milk oriented country; it is the largest producer of dairy milk in the world–especially since the cooperative "white revolution." Indians have always loved milk. Despite the fact that 70% of Indians are lactose intolerant, they consume it anyway in one form or another–such as paneer, yogurt, lassi (a popular and traditional Punjabi yogurt-based drink). In the northwestern states of India (such as Punjab), there is no lactose intolerance, so they can drink dairy milk without problems. This may be because of a long history of dairying and / or because they are descended from Aryans who name from further northwest. Many of them drink it hot. In the south of India there is a high incidence of lactose intolerance. This is the main cause of their "soyaphobia."

If Raj had to make a prediction 25 years into the future, he would definitely predict that soyfoods in India will definitely be more important and a bigger part of the diet than they are today. One reason for this is the declining per capita consumption of pulses, a major source of protein, especially for the poor. This is due to rising prices and static production over the past several decades. Soy is replacing pulses in one form or another–and will continue to do so. In terms of the soy beverage market, they key is to find a good tasting product sold in inexpensive packaging and retailing at the right price point. Do get the price low, you need large volume, fast turnover, good distribution, and lower retail margins. Today soymilk margins in India are 30-35% compared with about 5% for dairy milk–because the volumes are huge.

The traditional Chinese and Japanese model of the consumer buying directly from the tofu or soymilk maker (to ensure freshness, no packaging, lower price to the consumer, higher price to the manufacturer, no middleman) is starting to happen in India among SoyaCow owners. Raj has seen this working nicely in Russia. To support such a model, you need a high density of consumers. Some SoyaCow owners have tried successfully to sell their products using bicycles.

Raj estimates that the market for soymilk in Tetra Pak is $2-3 million ex-factory. Multiply by 2.5 to get the retail value = $5 to $7.5 million retail. The retail price of Tetra Pak soymilk is about $1.50 per liter. That works out to about 3-5 million liters per year. Looking at the whole soymilk market in India, what percentage is sold by the small soymilk makers using SoyaCow SC20 machines (which have a capacity of 60 litres per hour)? This estimate is very hard to make. If we estimate 400 machines in India and each is selling on average 500 liters a day of soymilk, that is 200,000

© Copyright Soyinfo Center 2013

liters a day times 300 days per year = 60 million liters per year. This is 12 to 20 times as much as is sold in Tetra Pak. Therefore the small makers control 92-95% of the market–a very interesting conclusion–even if the small makers have an output of only 10 to 30 million liters a year. Raj thinks the growth potential for small soymilk machines is bigger than for large Tetra Pak machines.

There are many reasons to believe that food prices will rise faster in the coming decades than during the past few decades, and the price of most animal products will rise faster than soybean prices, so people will consume what they can afford, which means increasing consumption of soy in many developing countries. Address: President and CEO, ProSoya Inc., 2-5350 Canotek Road, Ottawa, ONT, K1J 9N5, Canada. Phone: 613-745-9115.

13122. Gupta, Rajendra ("Raj") P. 2010. Biography and early work with soymilk and tofu in India and Canada Part I (1942-May 1985) (Interview). *SoyaScan Notes.* Oct. 14. Conducted by William Shurtleff of Soyinfo Center.

• ***Summary:*** Raj was born on 8 Oct. 1942 in Saharanpur, a city in the northwest corner of the state of Uttar Pradesh, India, the son of Meena Gupta [her maiden name] and Shiva Prasad Gupta. His father was in government service in the food department. He was the 1st son and 2nd child of four children. He had two brothers and one sister. Raj received all of his education in India. He graduated from high school at Government Inter College (Allahabad, Uttar Pradesh). He graduated from college at the University of Allahabad, with a major in physics, then went on to earn his PhD degree in physics in 1966 from this same university, focusing on lattice dynamics of solids / solid-state physics.

He first traveled to Canada in 1967 to do post-doctoral work. First he was a research associate, then he worked at the National Research Council of Canada in Ottawa, earning a permanent position in 1978. During these years he went back and forth between Canada and India. He was not sure whether he wanted to live in Canada, USA, or India. This happens to a lot of people. He initially spent two years in Canada, then went back to India for three years, then began coming to Canada every summer for 2-3 years. He finally decided to live in Canada.

Raj met his wife, Rashmi, in 1975 in India, on a trip back to India from Canada. She was working toward her PhD degree in physics from Banaras Hindu University (BHU) in Varanasi, India; they were married in 1975. Back in Canada, Raj did research and taught some classes at the University of Winnipeg (Manitoba) and the University of Western Ontario (London, Ontario). He and his wife lived near the university in both places.

Raj's early interest in soy was more like a hobby. He and his wife knew that there was widespread malnutrition in India and in many developing countries. And they realized that soyabean is the best source of high-quality low-cost nutrition. In about 1977-78 they met some Chinese friends (at the University of Western Ontario, in London, Ontario) who introduced the Guptas to soymilk. They had heard about soymilk but never had tasted it. They did not like the taste. They said: "Perhaps we can get used to the taste by drinking it every day, for several weeks. But after drinking it religiously for some time, we still did not get used to the taste." The soymilk, which had a beany flavor, was made at a local Chinese shop in Canada. "We realized we couldn't hack it, even though we knew it was nutritious. So we gave it up."

In 1978 they arrived in Ottawa, Canada, where Raj had earned a position as an associate research officer at the National Research Council (NRC)–the top government laboratory / campus in Canada. NRC, where both basic and applied research is conducted, is similar to the U.S. laboratories (such as the Lawrence Livermore National Laboratory) that are part of the Federally Funded Research and Development Center (FFRDC) network. His wife also leveraged her PhD degree into a job at the National Research Council, but in the information technology (IT) sector.

From 1983-1995 Raj was adjunct professor at McGill University in electrical engineering, and a visiting professor there during 1986-1987.

In about 1981-82 Raj and Rashmi came across some soymilk products in Tetra Pak made by Vitasoy; it was sold in Chinese grocery stores. They liked the taste and knew it was a good source of protein, so they began drinking it every day. Raj and his wife do not have any lactose intolerance, so they did not drink it for that reason.

In about 1983, when they went to India, they took a case of Vitasoy Tetra Pak soymilk with them; it was nice to be able to have something to drink while traveling. Then (in December 1983) they met Mr. T.N. Agarwal in Kanpur. He was professor at an engineering college there. He and Raj had been friends before Raj got married. He tasted the Vitasoy, liked it, and asked why it could not be made in India. He was in business, doing some electronic and semiconductor business. Agarwal is also a more generic name, describing a group of related people who have a long history of being outstanding entrepreneurs. The Guptas, to which Raj's family belongs, is in the same group or class in India. So after the interesting question from Prof. Agarwal, in early 1984 Raj began to explore and do research to find out what could be done. In Jan/Feb. 1984 he first phoned William Shurtleff at Soyfoods Center in California to discuss the problem. Shurtleff recommended that Raj order the book *Tofu & Soymilk Production,* which he did–and he read it from cover to cover. This book discussed the principles of soymilk production and various methods that had been used to eliminate the beany flavor. This book's bibliography introduced Raj to the large body of literature on the subject. As he studied the basic principles of the subject, he realized that one approach to eliminating the beany flavor had not been tried–eliminating oxygen. He and his wife discussed the

© Copyright Soyinfo Center 2013

problem repeatedly and she also read some of the literature–but not to the extent that Raj did. Before long, they began doing experiments at home and she became very involved. Their work with soymilk was still a hobby; their main work continued to be at the National Research Council. But behind their hobby was a long-term vision. "It originated from the fact that, if we could produce the kind of milk we tasted, at very low cost, we might be able to take it to the masses of India. This would be very helpful. So it was mainly a philanthropic and humanitarian interest to begin with. As a hobby, that's what we wanted to do. But later, when the invention was issued, we realised our discovery was very significant and could be the basis of a business."

In 1984 Raj and Rashmi coined the name for their new business: ProSoya. The word "SoyaCow" was coined in 1985 or 1986, before they met Child Haven (see below).

In March 1985 Raj and his wife, the co-inventors, applied for a Canadian patent on a "Process for making soymilk with no beany flavor." It was soon issued. In 1986 they submitted a PCT International Patent Application for "Food processing in oxygen-free environment" [Soymilk]. This too was issued, and was followed by similar patents in the USA.

They were now ready to use their discovery as the basis for a business. It would be in Kanpur, India, run by T.N. Agarwal, making tofu for the poor. Initially, they hoped to raise start-up capital by taking the company public to set up a Tetra Pak type line there. They were ready to start a fairly large operation, but then they learned (from Tetra Pak) that Godrej was about to launch a soymilk product in Tetra Pak. Raj said: "If Godrej is already going to do this, then we don't have to do it. Let them do it at their level, since they have more resources. Why should we try to do the same thing. So we backed off. By the way, Godrej's intention was also similar to ours–to make a nutritional product for the masses. Of course, they knew that to do that it also had to succeed as a business."

On 23 May 1985 Soy Food Centre. A Unit of Networks Pvt. Ltd., started making Boon Tofu using a system imported from Takai in Japan. T.N. Agarwal did the bulk of the work. Raj provided most of the financing for the project, but Raj never moved to India. He and his wife would go to Kanpur for 15-30 days at a time, then return to their jobs in Ottawa, Ontario, Canada. The company lasted for less than two years, and Raj learned many hard lessons about introducing a new food to India, and especially a new food intended to help the poor. Continued. Address: President and CEO, ProSoya Inc., 2-5350 Canotek Road, Ottawa, ONT, K1J 9N5, Canada. Phone: 613-745-9115.

13123. Gupta, Rajendra ("Raj") P. 2010. Biography and early work with soymilk and tofu in India and Canada Part II (Interview). *SoyaScan Notes.* Oct. 14. Conducted by William Shurtleff of Soyinfo Center.

• ***Summary:*** Continued: "We learned the key lesson the hard way: If you try to promote any product as being good for the poor, the poor don't want to buy it. In Kanpur, we wanted to sell it very very cheap. We did that and it failed in less than 18 months. We couldn't make any money since our margins were so small. The people who bought the product were from the health-conscious middle class." There were also problems with packaging, distribution, and spoilage. "We realized that India requires very small machines (smaller than a small Takai system) that will make soyafoods where needed, when needed, decentralized to avoid distribution. So we began to think about how to make very inexpensive, very small machines, that could be used to make soymilk where needed, when needed, so that packaging and distribution would not be required." Raj and his wife both kept thinking about how to solve this problem and actually design and build the first machines. They contacted a lot of fabricators in India and some initial machines were even fabricated in Mumbai (formerly Bombay) India, but they were too cumbersome and not really very good. But at NRC I met Grant Wood, one of my colleagues who worked as a mechanical technician and draftsman. We were working on the same NRC project and I found that he was very good at designing. So I started discussing this concept and problem with him. I told him it was still just a hobby, so Grant Wood decided to get involved. He designed some small soymilk manufacturing machines according to my directions. He had a small machine shop in the basement of his home, and he and I built the very first machines there. Initially, a lot of prototypes were made but they were not good enough to sell."

The first big breakthrough came when Raj learned about a new organization named Child Haven International (CHI) of Maxville, Ontario, Canada. "They didn't come to us, we went to them." In about Oct. 1986 Raj met them in Ottawa when they were talking about their activities in India and elsewhere on the Indian Subcontinent. He explained that he and his co-workers had been doing something which might be useful to them. They were looking for something like what Raj was doing. They knew that the Canadian International Development Agency (CIDA) usually helps NGOs with funding for this type of venture. CHI thought that this could be a good project for them to get funding from CIDA as well as financial support from their own donors. CHI got the money from CIDA, then in about 1990 asked ProSoya to produce one trial machine for them to make soymilk in India.

On 19 June 1991 an article by Marion Kane appeared in the *Toronto Star* (p. D2) titled "Nifty Canadian invention a boon to the Third World." It explained that the Soya Cow [SoyaCow], invented by Raj Gupta, is a machine that makes palatable, low-cost, high-protein soymilk. One was in operation in Hyderabad, India, at one of the homes for poor children run by Child Haven International.

© Copyright Soyinfo Center 2013

Another similar article appeared on 24 Nov. 1991 in the *Ottawa Citizen.*

ProSoya contracted with various local machine shops to fabricate the various parts, then these parts were assembled into a working SoyaCow in Raj's basement at 9 Veery Lane. Initially they operated their new business out of their home. The next 6-10 SoyaCows were also assembled in Raj's basement. By March 1992 Child Haven had sent six SoyaCows, made by ProSoya in Ontario, to India–with financial aid from CIDA.

Question: "Is there any religious dimension to this work for you? Is this part of your religious life as well? Ans: "No. Nothing to do with religion. Of course it is spiritually very satisfying to do something like this. But it is more selfish, too. You don't really do it for others; you do it for yourself. You think you are helping others, but really you are helping yourself. It is also an intellectual challenge with many very interesting problems to be solved–almost every day."

Raj has had an interest in being a businessman and running his own business since his earliest days. "I came from that kind of family. A lot of my relatives on both sides of the family were in business." Raj comes from a culture that has a long history of entrepreneurship. "But, I'm not totally for business. If something doesn't have an intellectual component, I'm not interested. It has to be something novel, something new. Even now I spend a lot of time with physics; that's my first passion."

In April 1992 ProSoya published the first issue of *The SoyaCow Newsletter,* which appeared quarterly, from 9 Veery Lane, Ottawa, Canada. Even though it was initially only 2 pages long (filling the front and back of one sheet) it contains excellent, detailed information about the early history of the new company, plus some good photographs in each issue. The first article in the first issue is titled "Child Haven Sends Six SoyaCows to India with CIDA's Help." A photo shows Child Haven's directors, Fred and Bonnie Cappuccino, as they take delivery of six SoyaCows from ProSoya's president, Rashmi Gupta [Raj Gupta's wife]. We also learn that a SoyaCow system has been operating for over six months [i.e., since about mid-1991] at the Candlestick restaurant in Alexandria, Ontario.

In Aug. 1995 Raj stopped working for the National Research Council, so he could devote more of his time to his former hobby, that was rapidly becoming a full-time business. However he was allowed to keep his original office at NRC and he did research there, when he had time, in an honorary capacity, for the next five years. At the time he left NRC, has wife had already left to work as a consultant in private industry, for Anderson Consulting.

Raj and his wife have one child, a son, who is now about age 32. He graduated from college, earned an MBA degree in France, and was recently married. He lives in Chicago and works as a business consultant.

In 2002 Raj (the Renaissance man) entered a feature film (90 minutes) titled *A Passage to Ottawa* in the famous Cannes Film Festival. Directed by Guarav Seth and written by Jameel Khaja, it was produced by Raj and his wife, Rashmi.

Rashmi is Director of Marketing at ProSoya. Her involvement lately has been on product development and marketing rather than on technology. For her work, Indo Canada Chamber of Commerce gave her the "Business Woman of the Year" award in 2006 which she got from the hands of the prime minister of Canada, Steven Harper. Address: President and CEO, ProSoya Inc., 2-5350 Canotek Road, Ottawa, ONT, K1J 9N5, Canada. Phone: 613-745-9115.

13124. Sharma, Ratan. 2010. Re: Statistics on production of soymilk in India in 2008. Letter (e-mail) to William Shurtleff at Soyinfo Center, Oct. 15. 2 p.

• ***Summary:*** As an attachment to an e-mail, Ratan sends an Excel spreadsheet titled "Soya milk production in India," which he developed in Sept. 2008. The purpose was to estimate the amount of soymilk produced in India at that time. Most of the companies are small, independent commercial producers, however at least 6 Child Haven International (CHI) centers and several university and governmental research centers have been included. Moreover, 4 of the producers are in Nepal (an independent country just north of India), and the last entry under "Companies" is "Other soymilk producers." This figure for soymilk includes soymilk that is transformed into tofu or soy yogurt.

The spreadsheet has the following columns: (1) Company name and city. (2-4) Number of batches per day, month and year. (5-7) Soya milk production (in liters) per day, month, and year. (8-10) Soyabean utilization per day and month (in kg) and per year (in 1,000 metric tons).

A total of 167 specific companies are listed, including two large companies (ProSoya Foods, and Godrej Foods) that sell their soymilk in aseptic Terabrik cartons.

The estimated total soymilk production in India (and Nepal) is 63,767 liters per day, 1.91 million liters per month, and 22.95 million liters per year.

Of this total, ProSoya Foods makes 4.789 million liters per year, and Godrej Foods makes 5.086 million liters per year. Together, these two large Tetra Pak companies make 9.875 million liters or 42.6% of the total.

The "Other soymilk producers" make a total of 810,000 liters per year, which is 3.5% of the grand total.

The total estimated soybean utilization is 255,060 kg (255 metric tons) per month, and 3.060 million metric tons per year. The single largest non-Tetra Pak soymilk maker on this table is Dr. Pathak (in Meerut, Uttar Pradesh, in northern India). His company uses 5 SoyaCows to make 255 batches of soymilk per day. That works out to 3,825 liters per day, and 1.377 million liters per year.

© Copyright Soyinfo Center 2013

The #2 largest non-Tetra Pak soymilk maker on this table is Rubal Soya (in Distt. Sangroor, Ludhiana, Punjab); contact person Kuldeep Singh Cheema. They use 3 SoyaCows to make 125 batches per day. That works out to 1,875 liters per day (of flavored soymilk), and 675,000 liters per year. Plus 200 kg of tofu, and 25 kg of soy nuts.

Letter (e-mail) from Ratan Sharma. 2010. Oct. 27. He didn't mention many of the machines whose production he was not very sure about at that time. Also, at the end, under "Other soymilk producers," he estimated and summarised their production of most of the rest, but this gives lower number for the total number of soymilk producers. Also: soymilk that is made into tofu is included in this chart as only as soymilk. Ratan would estimate that about 50% of the total soymilk manufactured is immediately transformed into tofu. The volume used to make soy yogurt, soy ice cream ice, and soy sweets is minimal and insignificant. Address: PhD, Manager, the SoyaCow Centre, KH-177 Kavi Nagar, Ghaziabad 201 002 UP, India.

13125. Duggan, Tara. 2010. Tofu breaks a big barrier: Artisans craft better soybean product to share table with chicken and beef. *San Francisco Chronicle.* Oct. 24. p. K1, K4.

• ***Summary:*** Tofu's image as a bland source of protein that's good for you is quickly changing. Some Bay Area chefs are making their own tofu and local companies are starting to make it in the traditional Asian way–for daily consumption, rather than packed floating in water or vacuum packed for consumption days or weeks later.

Tofu companies include Hodo Soy, founded by Minh Tsai (Oakland). Tofu-yu, founded by Kevin Strong (Berkeley). Restaurants: Cyrus (Healdsburg). Morimoto (Napa). Plum (Oakland). Hodo Soy also makes Yuba.

Soyatech says the period of greatest growth for soyfoods was 1999 to 2004, when overall sales increased by 12%.

A detailed description is given of how tofu and yuba are made at Hodo Soy's 12,000 square foot Oakland facility.

Three recipes are given. A large color photo shows Jeffrey Lunak, executive chef at Morimoto Napa, adding nigari to hot soymilk as he prepares the restaurant's fresh tofu. Address: Special to the Chronicle, Chronicle columnist, San Francisco.

13126. Boswell, April. 2010. Re: Work at the Erewhon retail store on Newbury Street in Boston. Letter (e-mail) to William Shurtleff at Soyinfo Center, Oct. 13 and 24. 1 p.

• ***Summary:*** "On a whim yesterday I googled Erewhon, the natural foods store on Ellery St. in Boston for whom I worked a few months in early 1971. As I scanned through what came across, memories began slipping back. So I thought I'd send on to you what I remember although you probably have plenty of information, and my memories are not very clear. Nevertheless...

"As a 20 year-old (my name was April Deborah Van Outrive in those days) I moved from California to Cambridge, Massachusetts in January 1971, and into a third-floor walk-up apartment with my boyfriend at the time Rory Ingalls (he might have been working at Tao Books), and two other roommates, a South American fellow, Manuel Manga (who was obsessed with geodesic domes) and Fern Weiner. They were all eating and living macrobiotically and I was learning from them. Fern did all the cooking for the house. She taught me how to make an authentic Japanese futon and some basics of macrobiotic cooking.

"After only a month or so for reasons I don't recall, we moved again into a lovely old macrobiotic house on Ellery St., around the corner from the Orson Wells theater and down the street from Harvard Square. There were eighteen to twenty people living in this house which was run by Bruce and Melinda Gardner. Melinda was pregnant and subsequently had her baby, David, that spring or summer. The house was three stories and had been built in the early eighteen hundreds. I remember Melinda making tofu from scratch in the big kitchen there with a number of us women. My memories of Bruce and Melinda are that they were both calm, gentle people. Melinda called their baby 'Davie-cha.'

"I went to work for Erewhon on Newbury St. and rode the bus from Cambridge, past MIT and over the bridge into Boston. Russell Desmarais (spelling?) was managing the store as I recall. We had large open barrels of grains, seeds and nuts as well as nut butter grinders, and I recall estimating amounts when helping customers with their grains. One time the famous singer Odetta came in and I waited on her. I didn't know who she was at the time. I also recall a young man who worked at Erewhon, he played the flute and would sit outside the back door on a ledge or a stairway during his breaks; I was charmed by his haunting tunes.

"Some of us Erewhon employees took a bus one weekend up to Vermont, to donate our time to work on a farm there. We worked in the fields digging stones out of the soil. The stones were as numerous as potatoes in the ground but less satisfying to unearth. I recall wondering if they just continued to rise to the surface over time. Another memory of that weekend is that along the way there, we stopped and swam in the bend of a clear cold river. The idyllic nature of that swim and that time remains with me today.

"On another occasion there was a big party at what may have been the Kushi's house that we all attended. I recall it as being a gracious home. It might have been Aveline or Michio Kushi's birthday celebration.

"We attended lectures given by Michio Kushi in Boston, I think this was downtown at a church, close to the Boston Commons.

"Bruce and Melinda were offered the opportunity to run a big house and farm in the countryside outside of Boston, where we had also visited as a group. I think they did leave the Ellery St. house to do that.

© Copyright Soyinfo Center 2013

"In June or July of 1971, I decided to catch a ride back home and put up a sign to that effect on the bulletin board at Erewhon. A girl name Dulcie answered my ad; she was heading to California in her little VW and could use a traveling companion. She arrived bright and early one fine summer day, I packed my things in her car and off we went. Life made its usual twists and turns and I did not return to Boston.

"I was the girl on the cover one month of the little publication put out by Erewhon, might have been the East-West Journal. I think I was holding a big basket of fresh produce.

"So that's my little story! Thanks for allowing me to reminisce." Address: Clayton, California.

13127. Cappuccino, Bonnie; Cappuccino, Fred. 2010. Child Haven International, a herd of SoyaCows, and soymilk on the Indian Subcontinent (Interview). *SoyaScan Notes.* Oct. 25. Conducted by William Shurtleff of Soyinfo Center.
• ***Summary:*** "Our story: Inspired by the ideals and philosophy of Mahatma Gandhi, Child Haven International is a registered charity founded in 1985. We assist children and women in four countries, who are in need of food, education, health care, shelter and clothing, emotional and moral support.

"Child Haven has five homes in India, one in Nepal, one in Tibet and one in Bangladesh. Our homes accept children who are disabled, parentless, or from socially disadvantaged situations–and who are destitute, i.e. do not receive even one good meal a day" (from the Child Haven website).

One evening [in about Oct. 1986], as Fred was giving a talk about Gandhi to a small group at a Hindu temple in Ottawa, he mentioned that Child Haven was totally vegetarian. Fred also explained that he had been in Selma, Alabama, in March 1965, for five days with Martin Luther King and with a minister colleague who was killed there. That day converted President Johnson. He knew he would lose the South if he went ahead with the voting rights bill; but he did it anyway. The march for the right to vote by black people in Selma was a purely Gandhian demonstration; the marchers were completely nonviolent in the spirit of Gandhian nonviolence.

After his talk at the temple, Raj Gupta and his wife, Rashmi, from ProSoya came up and told Fred and Bonnie about a small machine for making soymilk that they had developed and that was now in use in their home kitchen. Raj said he hoped to use something like that in India, but hadn't had any luck so far. He asked if Child Haven might like to collaborate with him. Fred and Bonnie had always been interested in soya–primarily because Fred spent 3 years in Japan (1948-1951) as a Methodist missionary before he met Bonnie (so he was very familiar with tofu), and because of books about soyfoods by Shurtleff and Aoyagi they had read. And they had both become vegetarians in 1985. Raj said his machine made soymilk with no rancid flavor but with some beany flavor. There was sincere interest from both sides. Bonnie thinks that Raj had the idea before CHI did of applying to CIDA. Raj could not get money from CIDA unless he went through a charity–such as CHI. Bonnie and Fred had heard about CIDA but Raj knew in a more specific way what the possibilities were. So CHI decided to go to CIDA as an NGO to apply for funds. First they put together a committee of Child Haven people and people recommended by Raj who had some technical experience and interest. The committee wrote a grant funding proposal. The main person was Hart Jansson, who was one of CHI's supporters. The initial proposal was submitted in about 1989.

One early document shows that the soymilk project was originally proposed to CIDA in 1988 as a 2-year endeavour with a total budgetary requirement of under $20,000 Canadian.

It was a complicated process and the money didn't come right away. The CHI committee had to tweak their proposal, adding some things and removing others. Eventually they got about $100,000 for the SoyaCow program (CIDA does not fund orphanages) but only as a matching grant; CHI had to raise about 37.5% of CIDA's amount (in cash or kind) before they could get the money from CIDA. This was very difficult because CHI, a very small organization, is always struggling to raise enough money. Fred recalls that there were subsequently at least three more phases to the grant application process, and for each one they had do a great deal of committee work and planning to make the submission. Raj and his technical people had to come up with a prototype machine, which was a big challenge for Raj and a big opportunity–to make the first real SoyaCow for Child Haven. The first prototype he made was too labor intensive, so he had to change parts of his design.

In about Nov. 1990 the first SoyaCow, made in Bombay, India, arrived at the Child Haven home in Hyderabad. Fred describes it as a "big monster." Child Haven had thought the project was so important that they ordered the first machine from India (with Raj Gupta's approval and designs) before they had secured funding from CIDA. Raj made many trips to India, before and after the first SoyaCow was built, to be sure that all the work would be and had been well done. He met with the proposed manufacturer, examined their fabrication facilities, discussed technical details of the design, etc. Also in Nov. 1990, CIDA approved in principle the first matching grant.

After the first SoyaCow arrived, Raj Gupta traveled to India to see it in action. He spent a lot of time studying how it was being used and how it worked. Some of the older kids at Child Haven were helping out to make soymilk with the SoyaCow. Fred and Bonnie got the feeling that was not appropriate; it was too dangerous, since it utilized steam. "You need mature people, not kids, to run such a machine. However now the machine is much safer and in some of the

© Copyright Soyinfo Center 2013

homes the older children are helping."

Raj made many design changes and improvements on the first few SoyaCow machines that were made in India, and decided that the first few Indian manufacturers were not adequately equipped to do the very fine tuning that the SoyaCow required. This eventually led him to SSP, which was a very experienced and competent equipment manufacturer. Pristine (PPI), the present manufacturer of the SoyaCows, is doing very good work.

Child Haven has never used any of the non-electrical machines made by Frank Daller and Hart Jansson of Malnutrition Matters; he and Frank run the company together, and they are both still strong supporters of Child Haven.

From the outset, there was one basic problem between CHI and CIDA. CIDA was interested helping to develop cottage industries that women could take advantage of. CHI was very interested in teaching women how to use the SoyaCow as well, but in reality it was hard for a woman to make soymilk using that SoyaCow, with the steam, all those pipes and the complexity. That became a problem for CIDA. The number of kids in any Child Haven home has always been about half boys and half girls. But it was the staff that was the problem. There are a lot more women on the staff because CHI needed caregivers, but it was difficult to try to get a woman who was a caregiver to try to get into the mode of making soymilk with an unfamiliar machine; it was a big jump for them.

It is not clear where the 2nd SoyaCow to be used in India was made; it may well have been made by ProSoya in Canada.

One organization in Ghaziabad clamored for a SoyaCow until they finally got one. They then stated in their publicity that they had gotten a SoyaCow from CIDA (which looked good) but they never actually used it. So Child Haven eventually went to them and repossessed the machine.

It took a while before SoyaCows were accepted in the two Child Haven homes. Making soymilk using a SoyaCow was hard work, so sometimes Fred and Bonnie found that the machine wasn't being used for 2-3 days. Perhaps the gasket broke and nobody took the time to find another gasket. It was an uphill struggle with some of the staff people who worked with the machines. It is less that way now; Bonnie thinks the staff women now have much more appreciation for the value of the nutrition from the soymilk. The children generally liked the soymilk, especially the small ones. "The staff, basically, didn't like the soymilk and we have had trouble getting them to use the okara. I think they're doing the best job using the okara in Bangladesh, where they are working hard to develop new recipes to use the okara, as well as the tofu and soymilk."

At the two CHI homes that had SoyaCows, not much tofu was made in the early days and years because they had trouble getting the coagulant–so they made mostly soymilk. They liked tofu (soya paneer); certainly they are using it much, much more now. Its a good source of protein for the children, so new the staff is required to make tofu three times a week. At some of the homes the staff makes soymilk twice a day and at others they make it once a day. There is a problem because of the erratic supply of electricity required to run the SoyaCows; its a big problem in Nepal. When serving soymilk, they all add some sweetener–sugar. In some of the homes they always use some flavoring. They usually serve each child 1 cup (8-oz. tumbler) of hot soymilk, early in the morning, often before breakfast. In the homes where they make soymilk twice a day, one cup each is usually served in the mid-afternoon, after they get home from school. If there is any extra, some of the children will come back for a second and third cup. It's an uphill battle to get the staff to drink soymilk; they are kind of set in their ways. At the Kaliyampoondi home, near Madras, are about six "senior orphans"–elderly people who have no children to care for them in their old age. They wanted to have a few dairy cows to make milk for their tea. Bonnie and Fred have a commitment to the soymilk. Continued. Address: Founders, Child Haven International.

13128. Cappuccino, Bonnie; Cappuccino, Fred. 2010. Child Haven International, a herd of SoyaCows, and soymilk on the Indian Subcontinent. Part II (Interview). *SoyaScan Notes.* Oct. 25. Conducted by William Shurtleff of Soyinfo Center. • ***Summary:*** Continued: Child Haven has a number of volunteers, Westerners who go for 6-12 months to help at one of the homes in Asia. Before going, they are given a 1-2 day orientation in Ontario. Fred notes: "One of things we tell them is that anything they can do to encourage the use of the SoyaCow machines would be beneficial–such as praising and encouraging the staff who are making the soymilk. Most of the Westerners really do like the SoyaCow program and most of them enjoy that hot cup of soymilk early in the morning." Bonnie adds: "I really enjoy and appreciate that hot morning soymilk. For me, it has a better flavor than cold soymilk. I guess its just what you get used to." Because of the dark-skinned children Bonnie adopted, Fred was kicked out of one Methodist church and invited to another, where he served for four years. "During the time we were there the congregation changed from almost totally white to almost totally black." Then they moved out to the country where Fred served as minister to three churches; 9:00, 10:00, and 11:00–Fred made the circuit every Sunday. "It was fun. After that we were able to make the transfer to a Unitarian congregation." Fred has always been a Unitarian at heart.

Frank Daller was living in Toronto, in what he called "the rat race," when he heard about Child Haven and about Bonnie and Fred. He learned that Bonnie had adopted a lot of kids and that Fred was an anxious spectator. Frank was in the music business, but he was not a musician. He might have been a promoter or a manager. On the wall of

© Copyright Soyinfo Center 2013

his office in Toronto he had a "Juno Award." These are presented annually to Canadian musical artists and bands to acknowledge their artistic and technical achievements. Frank wanted to get out of that "rat race" life, so he and his wife moved from Toronto to be near where Fred and Bonnie lived in Maxville. Frank had skills as a carpenter, so he earned his living doing carpentry and he also worked at ProSoya. Frank and his wife had one child born to them; they then adopted a kid from Mexico.

In early 1993 CHI ordered six more SoyaCows. One of these went to their largest home, in Kaliyampoondi (near Madras, in Tamil Nadu state of southwestern India). The others went elsewhere in India–perhaps to early SoyaCow entrepreneurs.

Importing anything into India at this time was a huge hassle and extremely difficult. Getting those six SoyaCows through customs was fraught with problems–mostly bureaucratic. They didn't assume Child Haven was a charity; they took it to be a money making venture. How would they monitor how much money was made from these six machines, and are the taxes properly paid, etc.

In 1993 CIDA sent a man [Dan Thakur, PhD] to India to evaluate the SoyaCow project. This was the first program he had evaluated a program for CIDA. CIDA does not give funding for children's homes, so CIDA had no interest and no involvement in the main program of Child Haven–the children's homes. His evaluation of the SoyaCow program was totally negative. For example, CHI had hired a woman named Sandiya Rani to be in charge of the SoyaCow program. She was never a caregiver. They hired a woman because CIDA wanted to help women gain employment. She didn't work out very well. She did not know how to fix equipment that was not working properly and she was prohibited (as an unmarried woman, probably by her family) from traveling unless accompanied by a male relative or chaperone–as to other SoyaCow sites. This lack over supervision was an example of a criticism. The main criticism was that Child Haven was not able, at that time, to get the SoyaCow out into the Indian community with people who wanted to use it to make a living. The 53-page report was submitted on 24 Sept. 1993, after CHI owned at least six SoyaCows. After this evaluation, Child Haven received no more funding from CIDA (except for on-site funding for a school building in Nepal). Child Haven had to raise all future funds for the soya program–almost entirely from donors in Canada.

At about the same time as the negative CIDA report was issued Child Haven hired Dr. Ratan Sharma (his PhD is in soy and dairy paneer) full time to be in charge of the SoyaCow program (replacing the woman) and to monitor the roughly six SoyaCows. He was paid a fixed annual salary, to promote soyfoods and SoyaCows, teach new potential entrepreneurs how to use the SoyaCow and start a business with it, and to maintain existing SoyaCows if they develop problems. Child Haven found Ratan through Raj Gupta and they think Ratan is an outstanding person who is doing a very good job.

Shortly after hiring Dr. Sharma, Child Haven opened the SoyaCow Centre. Here Child Haven also pays the rent on his home and office. At Centre there is no SoyaCow and no space for training people. Ratan has to go to an existing site to train people.

Dr. Sharma is still employed full time by Child Haven, which is not able to pay him as much as he could earn elsewhere with his PhD degree. But he also is paid for part-time consulting with the American Soybean Association, with ProSoya, with Malnutrition Matters, and with some Indian government programs.

At least once or twice, Frank Daller traveled to India with Bonnie. On a trip in early 1995, Daller went to India to see if the herd of SoyaCows were being used properly. When he found that many were not, basic changes in the program were made.

"Part of our reason for developing the SoyaCow was not just for our children's homes but the idea of getting across the whole possibility of low-cost, high-protein food for a society that is basically vegetarian and is gradually losing one important traditional source of protein–dal. But it takes a long time to introduce a new food to a traditional culture, unless you start with the children. The SoyaCow is going out to new places in India and I think Ratan is largely responsible for that. He is still an employee of Child Haven, paid from money that is donated to Child Haven.

After Child Haven got paid staff at the office of its headquarters in Maxville, they became much better about keeping and organizing all important documents so they could be quickly and easily located. Two people presently work at the office in Maxville.

"For Child Haven, over the years, The SoyaCow program has meant much better health for the children and better teeth. Occasionally doctors from other countries offer to come in and do a dental clinic or health check. They usually say that our children have much better health and much better teeth than other children in that area or than children at other children's homes that don't have a SoyaCow. Also the whole idea of trying to spread the concept of this basically very good food for a society that needs a good source of protein because they are largely vegetarian. The SoyaCow provides a good-tasting soymilk. Using soybeans in the form of soymilk or tofu is much better than trying to use them as dal. Ratan has done good work in India, Bangladesh and Nepal to help small entrepreneurs start a new business based on soymilk and tofu made by the SoyaCow. Child Haven has a SoyaCow at its home in Nepal (where electricity is a problem) and at Chittagong, the 2nd largest city in Bangladesh.

"Raj Gupta has been a good supporter over the years of the basic program at Child Haven. Certainly the whole idea

© Copyright Soyinfo Center 2013

of this Soya Cow would never have started without him. Its a mutual admiration society between Raj and Rashmi and the two of us. We admire him and his wife so much for what they have been doing. We saw them often during the early years of the SoyaCow program and the committee that worked to get funding from CIDA. We still see them 2-4 times a year and they have helped us with the Indian High Commissioner to Canada (like an ambassador who lives in Canada) to get visas for our volunteers going to India from Canada. They come to our annual fundraising dinners in Ottawa. We have annual fundraising dinners across Canada at about 18 different places. Child Haven's annual budget from donors in Canada (plus a little from the U.S.) is about $1.5 million.

Question: How would you describe what you have done since you started Child Haven? Ans: "I don't know. I don't try to analyse it. We just do what seems to make sense and hope it works. I calculated one time that 75% of what Bonnie and I have tried to do in terms of new projects, etc. was a total flop. And then something clicks. Child Haven is one thing that clicked. I don't know that it means that we have any special talents or skills."

Fred adds: "When I was in Japan I had the Methodist missionary mindset. But instead of converting people, I accidentally got converted, and came to feel that the Japanese are all right the way they are. That's pretty much my story. I'm a Unitarian minister now. We don't convert people. I tell the congregation that I was 36% Buddhist, until I heard the Dalai Lama. Then I became 48% Buddhist. I'm 81% Unitarian. There's overlapping there" [Laughter]. Address: Founders, Child Haven International.

13129. Cappuccino, Bonnie; Cappuccino, Fred. 2010. Child Haven International, a herd of SoyaCows, and soymilk on the Indian Subcontinent. Part III (Interview). *SoyaScan Notes.* Oct. 25. Conducted by William Shurtleff of Soyinfo Center.

• ***Summary:*** Continued: Fred has had an idea about a new way of using and marketing soymilk in India. He has talked about this with Ratan Sharma, but (so far as Fred knows) nothing has been done to implement it. "I was suggesting to Ratan that he look into utilizing the small clay pots to sell fresh curds made from soymilk." Buffalo milk curd (called *dahi* in Hindi) is sold mostly in small clay pots in India; it is a popular fermented food resembling yogurt. "In India they make small clay pots which are disposable. After each use, they crush them and they may re-use them. It seemed to me that this would be a new way to promote the use of soymilk. Such curds (made from dairy milk) are already part of Indian food culture and the sales could be a dependable, growing product for entrepreneurs who own a SoyaCow. The small clay pots are readily available and very, very inexpensive. We also haven't been very successful in promoting the idea of making curds. For some reason that has not caught on or been popularized–not even at the Child Haven homes, with the exception of Bangladesh. Indians generally prefer curds from Buffalo or cow's milk–but of course many people cannot afford them.

Fred adds with a chuckle: "Ratan has not yet caught this fantastic vision of mine."

Another problem is to get more of the okara used in Child Haven homes. They are now using it in some of the curries at Child Haven in Bangladesh. There are so many ways to use it, the quality of the protein is higher than that in tofu or soymilk, and it is a valuable source of bulk and dietary fiber.

Hart Jansson is a person Shurtleff should talk with (Fred gives contact information). He lives in Oakville, near Toronto. "He is retired. He and his wife also adopted a child, in addition to one born to them. We were and are very close to that family. His wife, Daniella, is the main person who organizes the annual Oakville Child Haven fundraising dinner. He now works with Frank Daller at Malnutrition Matters. Their VitaGoat has the big advantage that it doesn't need electricity." Hart was the main person who wrote the CIDA grant application.

One of the eight Child Haven homes is the Maitreya Foundation in Delhi. All of the 21 refugee children are Tibetan and they have a SoyaCow. The founder and person in charge is a Dakpa Rinpoche, but he is busy and travels a lot. Bonnie goes to visit them. Child Haven provides all the funding. He is also the hereditary head of some 17 monasteries in Tibet, but has never been there having been born in India. He is trying to obtain a visa to visit Tibet. A photo of Rinpoche and the Tibetan children is on the Child Haven website. Address: Founders, Child Haven International.

13130. Gupta, Rashmi Rekha. 2010. Re: Paneer in India. Letter (e-mail) to William Shurtleff at Soyinfo Center, Oct. 27. 1 p.

• ***Summary:*** William Shurtleff wrote Rashmi questions and she replied to each. Rashmi was born and raised in India and has a PhD degree from an Indian university. But she starts by noting that she has "very limited knowledge on this subject."

Q1. In which states and parts of India is dairy paneer made and eaten most, and in which parts is it made and eaten least–in terms of per capita (per person) consumption?

Ans: "Today paneer is made and consumed all over India. Minimum consumption would be in South India. Maximum use of paneer in olden days was in Northern India and Bengal. Most of the desserts (*mithai*) from Bengal are made with paneer."

Q2. Was it traditionally always made at home? If yes, when (approximately) did it start being made in shops or factories and sold in stores?

Ans: "Traditionally it was made at home but was also sold in bulk in shops called Halvai. Halvai shops specialized

© Copyright Soyinfo Center 2013

in desserts (*mithai*), snacks and yogurt."

Q3. What are the three most common ways of using dairy paneer in the areas where it is consumed most. Please give recipe name in Hindi and English.

Ans: "(1) Desserts, i.e. Rasogulla [Rasgulla], Saundesh; (2) Hot dishes such as Sahi Paneer and Palak Paneer; (3) Snacks such as Paneer Tikka and paneer stuffed bread or pastries like Samosa and Kachori, Pakodi."

Q4. Do you have any idea of the total amount of dairy paneer consumed in India?

Ans: "Not really. I remember reading somewhere that about 100,000 tons of chhena per year is consumed in India. Chhena is a softer form of paneer which is mainly used to make desserts i.e. Rasogullas and Sandesh etc. Then there is a significant consumption of the hard form of paneer in making curries and snacks etc."

Q5. In what other neighboring countries (such as Sri Lanka, Nepal, Pakistan, Bangladesh) is paneer consumed most–in terms of per capita consumption. Please tell me the top 3 in descending order.

Ans: "I can only guess–Bangladesh, Nepal, Pakistan."

Reply to follow-up question: Both chhenna and paneer are made by boiling milk and separating the curd from the whey [by coagulation with an acid, such as lemon juice]. In Bengal [and Orissa], where the softer form is used (mostly to make desserts), it is called chhena [or chhana]. In the rest of India and Pakistan, where the firmer type is used, it is called paneer. Address: Director Marketing, ProSoya Inc., 2-5310 Canotek Road, Ottawa, ONT, K1J 9N5, Canada. Phone: 613-745-9115.

13131. Jansson, Hart. 2010. The work of Malnutrition Matters in India (Interview). *SoyaScan Notes*. Oct. 28. Conducted by William Shurtleff of Soyinfo Center.

• ***Summary:*** Hart first got involved with Malnutrition Matters (MM) in 2002; he started working for them part-time. Early in the year 2000 he finished his career as a full-time salaried person in the telecom (telecommunications) software industry in. Then he did some consulting stints and several other things for a couple of years before he started with Malnutrition Matters, while he was still living in Ottawa. He left the telecom job in part because he had enough money that he had the leisure to not be so concerned about money. Hart is paid for his work at Malnutrition Matters. It's much less than he could earn in the private sector, but no complaints. He now lives Oakville, a suburb of Toronto, Ontario.

Malnutrition Matters was founded in the year 2000. When Hart started working at Malnutrition Matters, Brian Harrigan was still there. Their office was in Ottawa, very close to the National Research Council offices where Raj Gupta worked and lived nearby. The office was in a small rented house near where Frank Daller lived. Frank and Brian worked full time and Hart worked part time on partnership development and writing grant proposals. Hart and Frank had kept in close contact since they first met in 1987. They had gone to Nepal together (in about 1998-99) on a trip unrelated to work with soy. Frank invited Hart to work with Malnutrition Matters and Hart was quite eager to give it a try.

Malnutrition Matters is presently very active with soy in India. They have 20 VitaGoats in India. Ten are in the state of Orissa, and almost all of those are part of a school feeding project that for which Malnutrition Matters got funding from the Word Bank. The machines are located in small buildings in various villages, run by women's cooperatives supervised by a local NGO named Biswa. It's working OK, and there is no problem with the children accepting soymilk, but there is some resistance from women to using the pedal-powered grinder (they should call it a spinning class). Most important, it could have been a bigger project. The big hurdle was government approvals. They know about rice, wheat, lentils, but soy is a new thing so it is a years-long process in India to get approval for soymilk in a school lunch program. So its a very limited pilot project. Its an inevitable and rather painful part of introducing soyfoods to a traditional culture. Multiple levels of government have to be convinced, and there is some corruption. "Everybody knows how to say 'no.'"

Hart had noticed a huge change in India's government and economic policies, especially since about 1996. "It's like night and day. Really amazing in terms of modernization–even going through customs is much easier. Even though the buzzword today in India is 'entrepreneur,' if you look in the rural areas, there are more malnourished people than in all of Africa–according to the World Health Organization. India made progress reducing malnutrition through the 1990s, but basically during the past decade that progress has stalled, and even begun to slide back. Its really inexcusable given their overall economic progress. Even India's prime minister, in an address to parliament, has admitted that people in the rural areas are suffering from malnutrition and have been left behind. He has stressed the need to solve these huge problems but it is not happening. In a good number of African countries you see really substantial progress. In some of the Indian states, such as Karnataka and Kerala (which has a Communist government) the rural population is doing well.

The other ten VitaGoats are scattered all over India from Deli to rural Maharashtra, Rajasthan, Punjab, Bihar, etc.

How does Malnutrition Matters monitor that each of these 20 machines is being used as intended? "We basically do that indirectly through the NGO partners we work with, such as Biswa, and some really small grass-roots organizations. We don't have staff in India, and only three of us at the headquarters in Ottawa. Malnutrition Matters now has 170 VitaGoats and SoyCows operating around the world. Burma and Belize are our latest countries.

"Malnutrition Matters has had three projects funded largely by the Donner Canadian Foundation–in amounts

© Copyright Soyinfo Center 2013

under $100,000. They have provided funds to Child Haven, which has enabled us to do projects under the auspices of Child Haven in India, which is the implementing organization. The machines do not go into Child Haven homes.

"Ratan Sharma presently works only as a subcontractor for Malnutrition Matters, as when we have training or other such work for him to do. We pay him on a per diem basis." The VitaGoats are made by an affiliate of SSP in India, but not by Pristine (PPI). "We have found that it is less expensive and more reliable (with less maintenance and repair) to have the grinder 'off board'–as a separate component. Pristine does good work, but the machines they make are more expensive and more complex than ours. If you're a small guy in a village just trying to make tofu for same-day sales, you would look at a less expensive VitaGoat or SoyCow from us."

Any VitaGoat system has the option of using either a multifuel boiler (which operates with firewood, coal, or other types of biomass, and has an all stainless steel core) or an electric steam boiler (which has a soft steel core–not stainless). The electric boilers are purchased from Reimers Electra Steam, Inc. in Clear Brook, Virginia, USA.

As far a Hart knows, Pristine makes only SoyaCows–of the next to latest generation. Pristine also buys its electric boilers from Reimers in the USA. Address: Oakville, Ontario, Canada.

13132. **Product Name:** Wildwood Probiotic Soyogurt [Unsweetened Plain].
Manufacturer's Name: Pulmuone Wildwood, Inc.
Manufacturer's Address: Grinnell, IA 50112.
Date of Introduction: 2010. October.
Ingredients: Soymilk* (filtered water, soybeans*), water, rice starch*, chicory fiber (inulin). Contains 2% or less of each of: Flaxseed oil*, calcium carbonate, tricalcium phosphate, choline, dextrose*, tapioca starch*, guar gum*, sodium citrate, agar, non-dairy active live cultures (S. thermophilus, L. bulgaricus, L. acidophilus, L. casei, L. rhamnosus, B. bifidum, L. lactis). * = Organic. Contains soy.
Wt/Vol., Packaging, Price: 24 oz (680 gm) in plastic cup.
How Stored: Refrigerated.
New Product–Documentation: Product with Label purchased at Whole Foods in Lafayette, California. 2010. Oct.

13133. Sharma, Ratan. 2010. Re: Paneer and channa [chhana, chhena] in India. Letter (e-mail) to William Shurtleff at Soyinfo Center, Nov. 1. 1 p.
• ***Summary:*** William Shurtleff wrote Ratan questions and he replied to each. Ratan was born and raised in India and has a PhD degree from an Indian university in soya and dairy paneer–so he knows a great deal about this subject.

Q1. In which states and parts of India is dairy paneer made and eaten most, and in which parts is it made and eaten least–in terms of per capita (per person) consumption?

Ans: Paneer is mostly used across north India (where it is very popular), much less in the south, and very little in the northern east part of the country. In my view, West Bengal consumes very little paneer because of their fish-eating habits; it is almost the same in Orissa. In my childhood [in northern India] paneer was a rarely available, but now it is very commonly used because of an increase in the disposable income, an increase in the milk production and supply, and the increased availability of paneer.

Q2. Was it traditionally always made at home? If yes, when (approximately) did it start being made in shops or factories and sold in stores?

Ans: Channa and paneer are well established and highly commercialised products in India. It is so common and popular that sometimes during Indian festivals some synthetic and adulterated product also comes into the market despite great care from the food and drug authorities.

Q2A. What is the difference between channa [chhana, chhena] and paneer?

Ans: "Channa is a traditional Indian milk product, obtained by acid coagulation of hot milk. It is mainly used as a base / filler material for the preparation of large variety of Indian sweets. Channa is made from cow milk only (with 4% fat). Sometimes cow and buffalo milk are mixed to make channa. India's total production of channa is estimated to be 200,000 tonnes per annum (Ghosh 2009). After the milk is coagulated the curds are hung in a cheesecloth.

I consider channa and paneer to be two different textures of the same food (like firm tofu and soft tofu), but some people consider them to be two different foods. There are five main differences between channa and paneer. (1) Water content and form: Channa is softer than paneer (not as firm) and it has no form; therefore it cannot be cut into cubes or slices. (2) Process: For paneer, after coagulation, the whey is drained from the curd and it is pressed (just like tofu is pressed) to give it shape and to further lower its water content. Channa can't be used without kneading. To make rasogolla, the channa balls are boiled in two combinations of sugar syrup. (3) Basic raw material and nutritional composition: Channa is made from cow's milk (4% fat) whereas paneer is made from buffalo milk (5% fat). (4) Curding / coagulating agent: Channa is made with the lactic acid whereas paneer is made mostly with the citric or tartaric acid–and from naturally acidified whey. (5) Geographical area of manufacture and use: Channa is made all over India. The largest amount of channa in any Indian state (in tonnes per year) is made in Uttar Pradesh, but the per capita consumption of channa is highest in West Bengal. The largest amount of paneer in any Indian state is also made in Uttar Pradesh, but the per capita consumption is highest in Punjab. (6) Food use: Channa is used as the base material for Bengali sweets, such as rasogolla [rasgulla, rasagolla,

© Copyright Soyinfo Center 2013

roshogolla], rasmalai, sandesh, chamcham, rajbhog, channa murki, channa podo, etc., whereas paneer is not much used in sweets; it is used more to make vegetables dishes, often with gravy. In the remote areas of the West Bengal they have developed special recipes for sandesh which is really a wonderful sweet. It has been estimated that annual production of sandesh in West Bengal alone is 30,000 tonnes (Bandopadhya 2006). Rasogolla is the most popular channa-based sweet. I have very good contact with the family whose great grandfather invented rasogolla; the inventor's name was K.C. Naveen Chandra Das, and he invented this sweet in the year 1860, accidentally, in frustration. You will still find special channa trains in West Bengal coming from its remote areas to the main city of Calcutta.

Paneer is made from buffalo milk containing 5% fat. The coagulation and other preparation process are similar to tofu. The interesting thing is that the *halwai* (*halvai,* the name of a sweet maker in Hindi) don't use acids for coagulation again and again; they just use the acidified whey again and again.

Q3. What are the most common ways of using dairy paneer in the areas where it is consumed most. Please give recipe name in Hindi and English.

Ans: The main paneer dishes in India are mutar paneer (pea paneer), palak paneer (spinach paneer), shahi paneer (royal dish of paneer), paneer kofta (paneer balls cooked with gravy), paneer bhurgy (scrambled paneer) etc. Besides, this paneer is used to make paneer pakora (paneer pieces coated with the batter of chick pea flour and fried). Paneer paratha (a kind of chapati in layers, stuffed with paneer and oiled with ghee or butter) is very popular in north India.

Q4. Do you have any idea of the total amount of dairy paneer consumed in India?

Ans: The total milk production in India in the year 2000 was approximately 110 million metric tons (tonnes). Approximately 5% of this milk (thus 5.5 million tonnes, or 5,500 million kg) was converted into paneer (Indian Council of Medical Research 2000). From 1 kg of milk you can make approximately 210 grams of paneer (or 245 grams of channa). If the population of India in the year 2000 was 1,001 million, then the per capita consumption of paneer that year in all of India was about 1.03 kg or 1,030 grams.

Q5. In what other neighboring countries (such as Sri Lanka, Nepal, Pakistan, Bangladesh) is paneer or channa consumed most–in terms of per capita consumption. Please tell me the top 3 in descending order.

Ans: Bangladesh (because of the influence of Bengali culture), Nepal, and Pakistan. Sri Lanka produces and uses very little paneer or channa. Address: PhD, Manager, the SoyaCow Centre, KH-177 Kavi Nagar, Ghaziabad 201 002 UP, India.

13134. *Tibetan Nuns Project* (*Dist. Kangra, Himchal Pradesh, India*). 2010. Sustainable nunneries. Fall. p. 3.

• ***Summary:*** "Dolma Ling Nunnery was constructed by the Tibetan Nuns Project with sustainability in mind. There is a solar powered bathhouse with nine shower units. "Solar panels have been placed above the kitchen, making hot water available for cooking.

"Alongside a commitment to the environment, Dolma Ling is also devoted to providing a healthy lifestyle for the nuns. The kitchen prepares wholesome vegetarian meals on a daily basis, and some nuns make tofu. They often take orders for their tofu from neighbouring businesses."

A photo shows a nun making tofu in a small but modern shop.

Note: "Established in 1987, the Tibetan Nuns Project provides education and support to more than 700 nuns in northern India."

13135. *SoyaScan Notes.* 2010. Did the Chinese or Japanese or Koreans traditionally feed soymilk to infants or to recently-weaned children? No! (Overview). Compiled by William Shurtleff of Soyinfo Center.

• ***Summary:*** A personal view by William Shurtleff:

I have lived in Japan with a Japanese family for 6½ years, spoke fluent Japanese, traveled all over China, and read huge amounts of literature about soy in China and Japan.

I would say that the Japanese and Chinese do NOT feed soymilk to infants or even to weaned infants. Rather they DO feed tofu as one of the earliest weaning foods. They mash it with rice gruel, so both are very soft. Remember that traditional Asian soymilk causes infants intestinal gas which tofu generally does not, or at least much, much less.

Of course it depends partly on what age you mean by "infants." At what age does an infant cease to be an infant? Wikipedia says of "infant": "It is typically applied to children between the ages of 1 month and 12 months; however, definitions vary between birth and 3 years of age."

I have never seen or heard of soymilk used as an infant food or a weaning food, except in a few early French-language articles such as: Labbé 1911, and Beltzer 1911–and maybe a few other articles.

The statements in these two articles that soymilk is fed to infants are rare exceptions. I imagine that Beltzer learned it from Labbé and that Labbe did not know much about the subject.

Read the writings of Dr. Harry Miller (M.D., on our website, www. soyinfocenter.com) who established the first soy dairy in China in 1936, who lived in China as a missionary in China for many decades, and who introduced soymilk for infants (Soyalac) to the United States. He wrote a great deal and has a biography written about him yet I do not recall that he ever said that Chinese feed soymilk to infants. Address: Soyinfo Center.

13136. Nordquist, Ted. 2010. Making concentrated soymilk

© Copyright Soyinfo Center 2013

or soybase–with a high solids content (Interview). *SoyaScan Notes.* Dec. 6. Conducted by William Shurtleff of Soyinfo Center.

• ***Summary:*** It is not difficult or expensive to make soymilk with a high solids content; that is exactly what traditional Japanese tofu makers did when they made the soymilk to be used for making silken tofu (*kinugoshi*). To make soybase, you simply add less water than when making a more dilute product. There are no special tricks.

Note: Concentrated soymilk was also used traditionally to make yuba in China and Japan.

Ever since he was in Sweden in the 1980s, Ted has used the word "soybase" to refer to this concentrated soymilk. He first developed soybase in Sweden for use in making soy ice cream–which is typically made from cream and thus requires a high solids content (11½% solids). Later he continued to make it as the base for other products because it cost less to ship (as in a milk tanker) or store. Today his typical soybase contains 12½% solids–which is the concentration that has the highest yield of solids from the soybean in the soybase. From one gallon of soybase one can get about 2½ gallons of soymilk (containing 5½% solids). For soy yogurt it is diluted down to about 8½% solids.

SunOpta makes a soybase that contains 13½ to 14% solids. But if one wanted to make a soybase with an even higher protein content (16-18% solids), there are only two ways: Using ultrafiltration (UF) or reverse osmosis (RO). Both of these ways are very expensive (they require a large initial investment) and the process can only be run for about a short period of time (6-8 hours) before the equipment must be cleaned–at great expense for chemicals and time (10-12 hours of cleaning time). Ted will produce soybase for 50-60 hours before he stops to clean the equipment. Ted has never heard of using a vacuum to reduce the water content of soymilk. And there is another problem–called "the curve." As you reduce the water, and your soybase solids get higher and higher, but the protein and oil in your okara also get higher and higher, so you are losing / wasting a lot of nutrients. You soon begin losing money because your water-soluble protein and oil, at a certain point, start going down, even though you are adding more soybeans and less water. Address: WholeSoy & Co., 49 Stevenson St., Suite 1075, San Francisco, California 94105-2975; 660 Vischer Ct., Sonoma, CA 95476. Phone: 415-495-2870.

13137. Shurtleff, William. 2010. Re: Work of the American Soybean Association to support or promote soyfoods or soy protein ingredients. Letter (e-mail) to Hervé Berbille, Paris, France, Dec. 6. 1 p.

• ***Summary:*** "In the early days, certain high-up people in the ASA told me that they strongly disliked what I was writing, and doing, and saying. They even did a few things to try to hinder my work. That was in the mid-1970s. But over the years that has changed quite a bit, largely because of women who hold high positions in ASA's state soybean boards, who are interested in food, cooking, soyfoods and the potential of soy to do more to relieve hunger and malnutrition.

"The big change came in 1999 when the U.S. Food and Drug Administration issued a health claim for soy protein. This created huge interest in soyfoods in the USA and many new products, by both very large and very small companies. ASA proudly joined the crowd and really began to support soyfoods as one of its 'new' products.

"Another major change came in early 2001 when ASA created WISHH–the World Initiative for Soy in Human Health. This organization, and its outstanding, deeply-devoted head, Jim Hershey, are now taking soyfoods to the four corners of the world, promoting soymilk, tofu, cottage industries–as well as TVP, isolates and concentrates. I applaud their work.

"I could give you many examples of the things that ASA is now doing that are very favorable and helpful for soyfoods. They sponsor conferences, publish newsletters, conduct market surveys on attitudes towards soy, sponsor fairs and cooking contests, etc.

"Today, I cannot think of a single person in ASA with whom I have a bad or negative or uncomfortable relationship. They either respect my work and my position and simply disagree with it, or they positively like what I am doing and have been doing without stop since Oct. 1972 when I began devoting all my working time to teaching people worldwide about soyfoods.

"ASA is basically in the business of selling vegetable oil and meat. Developing countries (such as India and China) desire more of these two commodities, but in the developed countries they are steadily becoming less popular. Increasingly people want to reduce their consumption of all fats and of meat. So ASA finds itself with a somewhat unclear mission. Nevertheless, in both India and China, ASA is very actively promoting soyfoods and domestic utilization of soy protein.

"This is my analysis of the situation as it now stands. I think ASA is doing a great deal to help the cause of soyfoods. They must flow with the great tides of history–or be left behind. Fortunately they are the keepers of a truly remarkably crop with an ancient, illustrious history–the soybean!" Address: Founder and Director, Soyinfo Center, P.O. Box 234, Lafayette, California 94549. Phone: 925-283-2991.

13138. Gorell, Wallace. 2010. Re: Brief memoir–Interest in and involvement with macrobiotics (Continued–Part III). Letter (e-mail) to William Shurtleff at Soyinfo Center, 27 Dec. 2010 and 6 March 2011. 5 p.

• ***Summary:*** "Michio and Aveline Kushi saw business, saw Erewhon, as a way of advancing the macrobiotic campaign (and/or their own ends). They asked us, the troops in that campaign, to help make Erewhon successful. We tried,

© Copyright Soyinfo Center 2013

telling ourselves we were creating a new business paradigm, although, week after week, the discord Paul created made it harder to swallow that line. Would Erewhon have been peachy without Paul? It seemed so to me at the time, but perhaps that was more youthful naiveté. Bill Tara, Jean Allison, Beverly Sky, Roger Hillyard, Judy Coates, Nancy Lesourd and I–others too, perhaps even Paul–were artists who, trying to change ourselves, trying to change the world, found our way to Boston to study a new technique. We were counter-culturists, mostly strangers to the world of business. The way things were at Erewhon, it was a very uncomfortable world to spend time in. Ill at ease there, disenchanted, some of us migrated away from the scene–although not necessarily away from macrobiotics–trying to find a personal path, to further a personal vision, to walk peacefully forward. Some have been kind of successful, some–not so much. But no doubt all, like me, have found it an interesting passage."

Note: After reading an earlier draft of this memoir, Shurtleff asked Gorell several specific questions, whose answers are given below. Please excuse any of this information that is now repetitive.

Although the Grateful Dead and The Quicksilver Messenger Service never played at The Firehouse, Wally assumes they did play at the dance his group organized at California Hall.

Wally says he hardly knew Paul Hawken in San Francisco. When asked: "How did Paul, Jean, Bill Tara, etc. support themselves for 2-3 years in San Francisco? How did they pay for food, rent, psychedelics, etc." Wally replies: "I have no recollection. I worked at the post office for a while and then after the Firehouse / Calliope Company folded I worked as an actor with the New Shakespeare Company which has become today's Shakespeare in the Park."

"I don't believe I ever knew Erewhon to have a head other than Paul Hawken when I was in Boston. I was there for three different stays. Searching back through my journals I find that... I first arrived in Boston in mid-September of 1967. I remained there for the academic year, studying with Michio and Aveline, co-editing 'The Order of the Universe' and cooking for the University Road study house. In June of 1968 I returned to San Francisco to share what I had learned.

"In late summer of 1968, I went back to Boston to continue my studies with Michio and Aveline, to continue to work with Jim Ledbetter on editing 'The Order of the Universe' and to try to rationalize the yin-yang classification system for foodstuffs, and again I cooked for our study house on University Road.

"In August of 1969 I traveled to Japan for the first time. I expected I would have enough trouble getting along there without the problems created by having long hair at that time, so I cut it off short before I left.

"I returned to the USA in early 1971, worked for my father in Pennsylvania for about nine months, and then was offered the position of Director of Imports with Erewhon. To be perfectly frank, I can't recall ever having performed any of the duties that title would suggest, although I suppose I must have. I developed recipes for our packaged line of foods, designed the labels, illustrated (I think) and hand-lettered them. In my free time, I edited some of the recipes for a cookbook Aveline was producing, I painted the signs for Sanae restaurant."

"I first studied cooking with Aveline and helped her when I could, particularly after returning from Japan when I was living on Gardner Road. In Japan I studied with Lima Ohsawa a few times and took regular weekly classes from Darbin Yamaguchi during the latter part of 1969. I also learned a lot from teaching cooking classes which I began to do in 1968 and continued for some time as a way of repaying the obligation I felt toward my teachers.

"Names [of people studying macrobiotics in Boston during Wally's first year]: Connie Frank, Beverly Sewerski, Nahum Stiskin, Paul Hawken, Martin Russell (ran the retail store), Rebecca Dubowsky, Anne Harkless, Georgeanne Coffee, Richard Sandler, Bill Tara, Renée Gremore (that's her name now, can't recall her name then), Jean Allison, Evan Root, Jim Ledbetter, Joe Leis, Nancy Lesourd, Judy Coates, Dora Coates, Peggy __ (she became a Druid nun)...

"I'm afraid I can't tell you who came first and who came later. Just don't remember except for Jimmy and Susan Silver who I believe came in my second year."

When asked if he remembered an early tofu "cheesecake" developed in the macrobiotic community in Boston: "There was a lot of experimentation attempting to make foods that people missed–tofu 'cheesecake,' seitan 'chicken,' etc. I was never much interested in those efforts. I liked food that could be appreciated for what it was and cuisine that presented that food as simply and honestly as possible. But then I didn't have wild cravings for 'forbidden' foods the way many of my fellow macros did. Brown rice was (and continues to be) one of my favorite foods. There were times in those days when I seemed to be the only person I knew–including Michio–who was actually *following* a sensible macrobiotic diet. Everyone else seemed to lurch between bingeing and making penance. This tendency was, I felt, instigated by Ohsawa's extremism. Japanese macrobiotic adherents paid little or no attention to his edicts about drinking as little as possible, avoiding yin foods entirely, never picking up your child except for feeding, etc.; while many of his American adherents, to their detriment, strictly followed his advice."

When asked when and where he learned to write formal Japanese (*keigo*)*:* "After all three stints in Boston, and not really knowing what I was getting myself into, I decided to go back to school to study Japanese formally. (I had done a seven week crash course at Harvard before going to Japan for the first time, but had not, otherwise, done any formal coursework.) I didn't want to study in a big city so The

© Copyright Soyinfo Center 2013

Monterey Institute of Foreign Studies (as it was then called) was the only place to go. I spent a year there, then transferred to U.C. Berkeley where I completed my B.A. degree. I then went off to study for a year at the Inter-University Center for Japanese Language Studies in Tokyo, where they put us through a *lot* of *keigo* paces. And then I did three more years of graduate study in the rhetoric department at UCB, working on rhetorical analyses of Japanese language materials, mostly the poems of a 20th century symbolist poet by the name of Nishiwaki Junzaburo–six years of formal study in all.

"Sad to say, my reading skills are now back to the level of decoding and my writing skills are next to non-existent, but I can still carry on everyday conversation fairly well and I understand most of what it is said at my tea ceremony lessons."

Martin ran the Erewhon retail store most of the time Wally was around. He was a "key figure who, as I recall, ran the retail store pretty much by himself for some years. He had a limp from childhood malady and always seemed to feel a bit one down because of it, but was a really good man and quite capable." Address: Berkeley, California, and Flinders Island, Tasmania.

13139. *SoyaScan Notes.* 2010. Chronology of major soy-related events and trends during 2010 (Overview). Dec. 31. Compiled by William Shurtleff of Soyinfo Center.
• ***Summary:*** Jan. 21–Alpro releases an excellent cartoon video commercial titled "Great Ideas Often Take a Long Time to Sink in" as part of its "Join the movement now" campaign. It encourages people to change their diet by replacing meat and dairy by an alternative just once a week. If everyone in Europe did this, it would reduce global carbon emissions by 40 million tonnes (metric tons). That is more than the carbon emissions produced by a line of cars going around the world. Soy is not mentioned in the voiceover, but on the last panel we read that this video (lasting less than 2 minutes) was sponsored by the World Wildlife Fund and Alpro Soya. Note: Alpro Soya is now owned by Dean Foods.

Sept. 22–Quong Hop & Co. files voluntarily for Chapter 7 bankruptcy. The last U.S. maker of wine-fermented tofu no longer exists–opening up a business opportunity. Quong Hop's president at the time of bankruptcy is James Stephens.

Oct. 24–South River Miso Co. stops sending their 4-page quarterly printed newsletter; invites people to sign up for e-newsletter.

13140. Andoh, Elizabeth. 2010. Kansha: Celebrating Japan's vegan and vegetarian traditions. Berkeley, California: Ten Speed Press. vii + 296 p. Illust. (color photos by Leigh Beisch). Index. 25 x 25 cm.
• ***Summary:*** A beautiful book, and a major contribution toward understanding Japanese cuisine, culture, and the pervasive spirit of gratitude / appreciation. In Japanese, *kansha* means appreciation or gratitude. Contents: Acknowledgments. Introduction: A historical perspective on kansha (*shojin ryori* is vegan), recent developments, putting theory into practice, practicing kansha, meal planning, some final thoughts, a note about language. Rice. Noodles. Stocks and soups. Fresh from the market. The well-stocked pantry. Mostly soy. Tuskémono [pickles]. Desserts. A guide to the kansha kitchen. A catalog of tools and techniques. A catalog of ingredients [glossary]–with entries that include the following: daikon, edamame, flours (kinako), kudzu, herbs, spices and seasonings (ao nori, sansho, shiso, togarashi, wasabi), kabocha, dried beans (adzuki [sic], daizu {dried soybeans–the most important legumes in the Japanese pantry}), dried soy foods [sic] (hoshi yuba {dried yuba}, koya-dofu / kori-dofu). Dried vegetables from the land (dried shiitake mushrooms). Dried vegetables from the sea (arame, hijiki, kanten, kombu [konbu]). Dried wheat gluten. Kasu (sake dregs). Konnyaku and shirataki. Matcha. Miso (red miso, white miso, genmai miso). Mushrooms. Natto. Nigari. Nuka. Okara. Pickles. Rice. Roots and tubers. Saké. Salt. Sesame (seeds, sesame paste, sesame oil). Soy milk. Soy sauce. Sweeteners (ama-zaké, kuro-zato, mirin, mizu amé). Tofu (firm tofu, silken tofu, grilled tofu, thin fried tofu {abura agé}, thick fried tofu {atsu agé}).

Tsukemono (pickles). Umeboshi (pickled plums). Vinegar. Yuzu. Yuba.

Note: This is the earliest English-language document seen (April 2013) that uses the term "thick fried tofu" to refer to atsu agé / deep-fried tofu cutlets.

Contains many recipes that use tofu, miso, soy sauce, edamame, natto, etc. Address: Japan.

13141. *Iowa Soybean Review* (*Iowa Soybean Association, Urbandale, Iowa*). 2010. Outstanding contributions in promoting soyfoods. 22(5):18. Dec.
• ***Summary:*** In the section about investing soybean checkoff dollars we read: "Food enthusiasts who enjoy edamame, tofu or soymilk may have Linda Funk to thank. As executive director of the Soyfoods Council, Funk has been successfully promoting the flavor, nutrition benefits and healthful aspects of soyfoods for over 10 years." The Soyfoods Council is headquartered in the office of the Iowa Soybean Association.

A large color photo shows Linda Funk accepting an award "For Outstanding Contributions in Promoting Awareness of the Nutritional and Health Aspects of Soyfoods" from Mark Messina, PhD at the 9th International Symposium on the Role of Soy in Health Promotion and Chronic Disease Prevention and Treatment, held Oct. 16-19 in Washington, DC.

13142. Soyatech, LLC. 2010. Soya & Oilseed Bluebook 2011: The annual directory of the world oilseed industry. Bar Harbor, Maine: Soyatech. 348 p. Dec. Comprehensive index. Advertiser index. Statistical conversions. 28 cm.

© Copyright Soyinfo Center 2013

• ***Summary:*** This is the 5th year in a row that the *Bluebook* (a $95 value) has been sent free of charge to qualified industry members. On the cover are six color photos, and a black and white photo of a farmer leaning against a huge rubber tire that is almost as tall as he is.

This edition of the *Bluebook* contains 4 fewer pages than it did last year. The oilseeds covered in this book are (alphabetically): Canola, coconut, corn, cottonseed, flaxseed, hempseed, jatropha, linseed, palm, peanut, rapeseed, safflower, soya, sunflowerseed–the same as last year.

On the inside front cover is a color ad from Natural Products Inc. (Grinnell, Iowa), makers of innovative ingredients for bakery, soymilk and tofu. On the first page is a full page color ad from SunOpta, processors of identity preserved, natural and organic soy products, including whole soybeans, soymilk, soy flours, edamame, oils and more.

On the rear cover is a full page color ad from ADM titled "We see potential" which shows a growing soybean plant with pods and leaves. A table shows the many products that can be made from soybeans.

Chris Erickson is CEO. Mark Dineen is president. Keri Hayes is publisher and operations director. In the Foreword, Joe Jordan (General manager and content director) leads with a question: "What could possibly have increased sales by 1274% between 2008 and 2010? The e-Book." He appears to be talking about the entire e-book industry in the USA or perhaps even worldwide. He then writes about Amazon's Kindle and hints that the printed and bound *Bluebook* may soon be available in digital form only. "Sure the Bluebook is changing. It always has." Address: P.O. Box 1307, 19 Clark Point Rd., Suite 112, Southwest Harbor, Maine 04679. Phone: 207.244.9544.

13143. Life Food GmbH. 2010. [Tofu assortment (Brochure)]. Freiburg, West Germany. 6 p. 30 cm. [Ger]
• ***Summary:*** This colorful brochure on glossy paper, with many photos, shows all of Life Foods' food products, grouped by category. Natural tofu: Natural tofu, Demeter tofu, silken tofu. Japanese tofu: Nigari tofu, kinugoshi tofu. Tofu terrine: Tofu terrine: Graffiti." Tofu cutlets: Spelt-sunflower cutlets [spelt is an ancient species of wheat], greenspelt-hazelnut cutlets, tofu-rice cutlets with corn-pepper.

Smoked tofu: Smoked tofu, smoked tofu with almonds and sesame seeds, Demeter smoked tofu with herbs and sunflower seeds. Mediterranean: Tofu rosso, Tofu basil, Tofu olive. Tofu snacks: Japanese tofu filets, pizza-pizza tofu filets, wild garlic tofu filets.

Sausages for cooking (vegan): Tofu wiener, Puszta wiener (Hungarian style), Tofu cocktail sausages. Sausages for frying (vegan): Tofu grillsausages, Tofu grill herb sausages, Sombreros (hot tofu sausage for drying and grilling), Tofu-herb grill sausage. Falafel: Falafel traditional, Falafel curry-kokos ["cocos" refers to the coconut], Falafel paprika-harissa ["Harissa" is a Tunisian hot chili sauce commonly eaten in North Africa]. Chilled spreads: Paté "Verdi," Paté Rossini." Cold cuts: Papillon, Rondo.

Taifun bestsellers for 2010: 1. Tofu-wiener. 2. Smoked tofu with almonds and sesame seeds. 3. Natural tofu 200 gm. 4. Basil tofu. 5. Grillsausages. 6. Tofu rosso. 7. Grill help sausages. 8. Tofu filets wild garlic. 9. Spelt sunflower cutlets. 10. Tofu filets Japanese style.

Note 1. "Rosso" is the Italian word for "red." The Taifun website says of its Tofu Rosso (which is part of its "Mediterranean Tofu" line): "This little Italian, with olives, tomatoes and pepperoni has conquered the hearts of tofu fans everywhere, and was awarded the "Bestseller of the Year" prize at the 2005 BioFach trade fair in Nuremberg.

"Fresh fruity taste, ideal for Mediterranean cuisine. Cold with bread, in salads or steeped in olive oil. Sautéed with pasta, rice and potatoes."

Note 2. Demeter is a certification for biodynamic agriculture–as originally developed by Rudolf Steiner (lived 1861-1925). Demeter certification is the oldest traditional organic certification in Europe and is regarded by many as the highest grade of organic farming in the world. Certification is difficult to come by and must be renewed annually. Demeter's "biodynamic" certification requires biodiversity and ecosystem preservation, soil husbandry, livestock integration, prohibition of genetically engineered organisms and viewing the farm as a living "holistic organism" (Source: Wikipedia). Address: Bebelstrasse 8, D-79108 Freiburg, Germany. Phone: +49 761 / 15210-0.

13144. Buell, Paul D.; Anderson, Eugene N. trans. and ed. 2010. A soup for the Qan: Chinese dietary medicine of the Mongol era as seen in Hu Sihui's *Yinshan Zhengyao.* 2nd ed., revised and expanded. Leiden: Brill. xiv + 661 p. Appendix by Charles Perry. 25 cm. Series: Sir Henry Wellcome Asian series, 1570-1484, v. 9 [Eng]*
• ***Summary:*** The book of which this is a translation, published in 1330, is about the food and medicine of the Yuan (Mongol) dynasty (A.D. 1279-1368) court in Peking. During this dynasty, China was ruled by Mongols who had invaded China from the north. Contains a good introduction plus one reference to soybeans and tofu, and many references to jiang (though none of them are indexed under chiang, jiang, or sauce)–some of which were probably soybean jiang (for example, see p. 423; Bream gruel with sauce).

Section 3 (p. 515-17) states: "Soybeans are sweetish in flavor and neutral and lack poison. They decrease demon *qi,* control pain, and drive out water. They expel heat of the stomach, bring down blood stasis, and counteract the poisons of various drugs. They are made into tofu. Tofu is cooling and moves the *qi."* Address: 1. Seattle, Washington; 2. Dep. of Anthropology, Univ. of California, Riverside, CA 92521-0418.

13145. Chappell, Mary Margaret. ed. 2010. Vegetarian Times everything vegan. Hoboken, New Jersey: John Wiley & Sons. 352 p. Foreword by Neal Bernard, M.D. Illust. (full-page color photos). Index. 24 cm.
• ***Summary:*** Recipes from *Vegetarian Times* magazine. Chapter 7 (p. 131-64) is titled "Tofu, tempeh, and seitan." The index to the book contains 36 entries for tofu (divided into different types such as extra firm, firm, flavored and processed, silken; plus lots of basic information), 17 for seitan, 15 for tempeh, 7 for miso, 5 for soy crumbles and textured soy protein, 4 for meat alternatives, 4 for edamame, 2 for smoothies, and 1 for soymilk–although many recipes call for soymilk.

This book frequently includes alcoholic beverages with recipes and in photos.

13146. Compestine, Ying Chang. 2010. A banquet for hungry ghosts: a collection of deliciously frightening tales. New York, NY: Christy Ottaviano Books / Henry Holt and Co. xi + 180 p. Illust. 22 cm.
• ***Summary:*** This is a book of ghost stories. One chapter (p. 72+) is titled "Tofu with chili-garlic sauce." It is a chilling tale in which a neurosurgeon (brain surgeon) saws off the top of the head of a live monkey, immobilized, his head only sticking up through a hole in the center of the restaurant table–terrified. Slightly nauseated, the man then eats the live monkey's brains.

An essay follows about mental illness and eating live animals in modern China. At the end is a recipe for Tofu with chili-garlic sauce (with "1 package (18 ounces) water-packed soft or silken tofu," p. 104-05).

A photo of the author and a brief biography is on the inside rear dust jacket. She grew up in China and now lives in California with her husband and son. Address: Author (California).

13147. Finlayson, Judith. 2010. The vegetarian slow cooker: over 200 delicious recipes. Toronto, Ontario, Canada: Robert Rose Inc. 304 p. Illust. (color). Index. 27 cm.
• ***Summary:*** A "slow cooker" is an electric (100 watt) kitchen appliance. One chapter (p. 187-239) is titled "Beans, lentils, tempeh and tofu." The index contains 11 entries for tofu, 5 for miso, and 4 for tempeh. Recipes are prominently marked as "Vegan friendly" when appropriate. Address: Food writer, journalist and author.

13148. Hackett, Jolinda; Bull, Lorena Novak. 2010. The everything vegan cookbook: 300 recipes for any occasion! Avon, Massachusetts: Adams Media. x + 294 p. Index. 24 x 21 cm.
• ***Summary:*** The book begins: "Dear Reader: When I decided to give up eggs and dairy, I asked every vegan I knew for their advice. One sentiment always stood out: 'Learn to cook.'"

Chapter 11, titled "Tofu" (p. 219-42) contains 26 tofu recipes of great variety and creativity. Chapter 12, "Seitan, TVP, and tempeh" (p. 243-65) contains 23 recipes, including homemade seitan.

Other soy related recipes: Vegan mayonnaise (with "1 12-ounce block silken tofu," p. 23). Vegan "pigs" in a blanket (with vegan hot dogs, p. 24). Vegan tzatziki (with soy yogurt, p. 30). Chili masala tofu scramble (p. 38). Quick tofu breakfast burrito (p. 42). Strawberry protein smoothie (with silken tofu, p. 43). Granola breakfast parfait (with soy yogurt, p. 46). Baked "sausage" and mushroom frittata (with vegetarian sausage or "beef" crumbles, p. 53). Creamy miso sesame dressing (p. 61). Tempeh dill "chicken" salad (p. 64). Edamame salad (p. 73). Winter seitan stew (p. 88). Saucy Chinese vegetables with seitan or tempeh (p. 105). Barley pilaf with edamame and roasted red peppers (p. 185). Cheesy macaroni and "hamburger" casserole (with veggie burgers, p. 210). TVP taco "meat" (taco filling, p. 250). Homemade baked seitan (p. 251).

Many other recipes call for soy milk or soy cream. Jolinda Hackett has been a vegetarian for nearly 20 years and a "plant-based vegan" for nearly ten. Address: 1. Santa Barbara, California; 2. RD [Registered Dietitian], Riverside, California.

13149. Hughes, Holly. ed. 2010. Best food writing 2010. Cambridge, Massachusetts: Da Capo; London: Perseus Running (Distributor). xii + 352 p. Recipe index. 21 cm.
• ***Summary:*** One story (p. 76-80) is titled "Kyoto's tofu obsession," by Adam Sachs–from *Bon Appetit* magazine. The writer strives to understand the heart of fresh tofu. Did he use *The Book of Tofu* as his guide?

Fresh tofu restaurants in New York City: EN Japanese Brasserie. In Kyoto: Kinki. Tousuiro (also serves okara, yuba, oboro-dofu, and soy-milk ice cream). Okutan. Kichisen (*yu-dofu*). A tofu maker is Morioka. A yuba maker is Yuba-han.

13150. Miyamoto, Tsuneichi. 2010. The forgotten Japanese: Encounters with rural life and folklore. Translated by Jeffrey Irish. Berkeley, California: Stone Bridge Press. 315 p. Illust. Maps. 23 cm.
• ***Summary:*** "Described by translator Jeffrey S. Irish as a man of 'rare energy and practical insight,' Miyamoto Tsuneichi [1907-1981] was a leading Japanese folklorist of the mid-twentieth century. In this lifetime he walked 100,000 miles along the backroads and throughout the hill and island villages of Japan, conducting interviews, taking photographs, and capturing a vanishing way of life. Miyamoto's descriptions of these meetings are presented here–in the villagers' own words, in narratives, and in vignettes. The collection is as revealing as it is poignant (from the publisher).

Page 167: "Many in Takihata had learned to make Kôya

© Copyright Soyinfo Center 2013

tofu at Mt. Koya, and a lot of these people were originally from Tajima." "When I got well, because my family was also making Kôya tofu, I went to Awa to buy soybeans, from which tofu is made."

"Meanwhile, people said there was no profit to be made in Kôya tofu and they left" (p. 176).

Concerning the village of Kawame, Aomori prefecture (p. 248): Millet was planted in the first year of a 3-year crop rotation, soybeans in the second year, and daikon radish in the third. "Millet was the staple food, soybeans were used to make miso, and daikon radish was pickled."

Miso is mentioned on pages 50, 65, 66, 187, 248, and 315.

Soy sauce is mentioned on pages 43, 65, and 315. Address: Ethnologist, Japan.

13151. Nishimura, Mayumi. 2010. Mayumi's kitchen: Macrobiotic cooking for body and soul. Tokyo, New York: Kodansha International. 157 p. Illust. (mainly color). Index. 26 cm. [15 ref]

• ***Summary:*** This is Mayumi's first English-language book. Madonna (of worldwide musical fame) wrote her a letter that appears in this book (p. 7): "Dear Mayumi, Congratulations on your fabulous book!... Not only are you the best chef in the world, you are part of our family, and we thank you for your love and warmth.

"In the seven years you lived with us and cooked for us, your amazing food helped me to be a happier, healthier person, balanced in body and mind. I feel better than I did 20 years ago. I am very grateful to you for this."

The index of this stylish book contains 24 entries for tofu (some in the chapter titled "Protein dishes"–p. 97-104), 20 for miso, 14 for seitan, and 11 for tempeh. How nice to find a Japanese cookbook that calls for the use of brown rice (basic recipe, p. 67).

The centerpiece of Mayumi's book is her 10-day detox diet.

Also contains specific recipes for: Nabe (with "2 pieces abura-age {deep-fried tofu skins}, halved or cut open on one side to form pouches," p. 67). Soybean and millet croquettes with beet sauce (with "15 oz {425 gm} canned soybeans, drained," p. 84). Seitan pot stickers (with seitan and tofu, p. 113). Smoked tofu salad (with "7 oz {200 gm} firm tofu," p. 104). Black soybean tea (p. 113).

The Glossary (p. 140-49) includes entries for: abura-age, adzuki beans, brown rice, brown rice mochi, edamame, hijiki, kombu, koyadofu, kuzu, mirin, miso, nori, rice milk, rice syrup, seitan, sesame oil, shiso, shoyu (incl. soy sauce and tamari), soba, soy meat nuggets (TVP), soymilk, tahini, tempeh, tofu, umeboshi plum, umeboshi plum paste, wakame, wasabi, whole-wheat flour.

About the author (inside rear dust jacket): "Mayumi Nishimura was born on the small island of Shinojima in Aichi Prefecture [in Mikawa Bay Quasi-National Park]. In 1982 she moved to the U.S. and began studying macrobiotics under Michio Kushi–the leading authority in the field–at the Kushi Institute. Later she worked at the school as head cooking instructor. In 2001 Mayumi became Madonna's private macrobiotic chef, joining her on her Drowned World Tour. Between 2001 and 2008 she cooked for the superstar full-time. Currently Mayumi travels between Japan, where she writes and lectures on macrobiotics, and the U.S." She has written four books published in Japanese. A large color photo of Mayumi appears on the front dust jacket.

The book is dedicated to Mayumi's children, Lisa and Norihiko, to her parents, and to Michio Kushi and his wife, Midori.

13152. Qiu, Xiaolong. 2010. Years of red dust: stories of Shanghai. New York, NY: St. Martin's Press. 227 p. No index. 22 cm. [Eng]

• ***Summary:*** "These stories trace the changes in modern China over fifty years–from the early days of the Communist revolution in 1949 to the modernization movement of the late nineties [1990s]–all from the perspective of one small street in Shanghai, Red Dust Lane. From the early optimism of the end of the Chinese Civil War, through the brutality and upheaval of the Cultural Revolution, to the death of Mao, the pro-democracy movement and the riots in Tiananmen Square–through the bulletins posted and the lives lived in this one lane, this one corner of Shanghai" (from the publisher).

One short chapter "(Tofu) Worker Poet Bao I (1958)" tells how, in the mid-1950s, Bao Hong moved into Red Dust Lane from Ningbo, where he had apprenticed to a tofu maker. He intended to pursue his craft in Shanghai. However in 1958, after Chairman Mao called for major development in the steel industry as part of "the Great Leap Forward," Bao end up working in Shanghai No. 3 Steel Plant instead.

That same year there was a call for peasants and workers to come to the forefront as writers and artists. A chance encounter while he complained about the tofu he had bought led Bao to be proclaimed a great writer. A poem, only partially his was printed with his name on the front page of the *Liberation Daily.* He was selected to be a worker poet and given a special room and nice pay.

The second half of this story, titled "(Tofu) Worker Poet Bao II (1996)" tells how he built a little tofu shop near Red Dust Lane. At his shop, Bao made and displayed a colorful array of soybean products–"white tofu, soft and hard tofu, frozen tofu for hot pot, golden tofu skin [yuba], gray tofu dredges [okara?], milky soybean drink [soymilk?], brown vegetable chicken, yellow fried gluten–all of which were far more delicious than those sold at the state-run market. In the afternoon Bao also started selling stinking tofu, which was fried in a wok over a tiny stove." Most who came to his shop did so to buy his delicious products. But some came out of curiosity to see how a famous worker poet had become a tofu

maker. "It was a metamorphosis beyond their imagining." Address: Raised in Shanghai, he is now a poet, professor and author who lives with his family in St. Louis, Missouri.

13153. Quinlivan, Rachel. 2010. Cooking light: Way to cook vegetarian. Birmingham, Alabama: Oxmoor House. 424 p. Illust. (color). 24 cm.
• ***Summary:*** An excellent, gorgeous vegetarian cookbook, printed entirely on semi-gloss paper with many color photos.

One very creative chapter (p. 206-43) is titled "Tofu & tempeh." The contents (not including recipes): Tofu (description). Tofu varieties: Silken tofu, water-packed tofu, flavored tofu. Tempeh. Tempeh varieties (with a good color photo of each): Wild rice, soy, flax, garden vegetable, multigrain, original. How to press tofu. How to bread and pan-fry tofu. How to fry in a healthier way. How to saute tofu. How to marinate tofu. How to broil tofu. How to prepare lemongrass. How to peel and grate gingerroot.

The index contains 18 entries for tofu, 9 for tempeh, 2 for edamame, 2 for soy and 1 each for soy sauce (low-sodium tamari), black bean garlic sauce (such as Lee Kum Kee) and seitan. Address: R.D., editor.

13154. Reinfeld, Mark; Murray, Jennifer. 2010. The 30 minute vegan's taste of the East: 150 Asian-inspired recipes–from soba noodles to summer rolls. Cambridge, Massachusetts: Da Capo Press. xix + 266 p. Plus 16 unnumbered pages of color plates. Illust. (color photos). Index. 24 x 18 cm. [28 ref]
• ***Summary:*** The index contains 22 entries for tofu, 8 each for tempeh and for seitan, 3 for miso, 2 for edamame, and 1 each for tamari and for soy sauce (Noodles with sweet soybean sauce, pad siew).

Includes a good glossary with entries for miso, nama shoyu, seitan, shoyu, soy milk, soy sauce, tamari, tempeh, tofu. Address: 1. Founding chef, Blossoming Lotus Restaurant, and author; 2. Author and teacher. Both: Kaua'i, Hawaii.

13155. Richmond, Simon. 2010. Lonely Planet Korea. 8th ed. Footscray, Victoria, Australia; Oakland, California: Lonely Planet. 440 p. See p. 188. Illust. (some color). Maps (some color). Index. 20 cm.
• ***Summary:*** This is a guidebook to Korea. including North Korea. 110 maps. Korean characters are given for the names of most places and foods–which we find very helpful. "In the year 2000 the Korean government adopted a new method of romaising the Korean language. Most of the old romanisation system was retained. The new system is used throughout this book (p. 411)

Ganjang (soy sauce) is mentioned on pages 68, 69, 70, 75, 178 and 188.

Page 188: In Gangwon-do, "Gangneung's prized specialty is *sundubu* (3 Kc = Korean characters given), soft or uncurdled tofu [soymilk curds] made with sea water in Chodang, the 'tofu village.' At its plainest, *sundubu* is served warm in a bowl, with *ganjang* (soy sauce) on the side. It can also be prepared in *jjigae* (5 Kc; stew) or *jeongol* (5 Kc; casserole)."

In Chodang, there are about 20 restaurants, one of the best-known of which is Chodang Halmeoni.

Sundubu (soymilk curds or soft uncurdled tofu) is mentioned on pages 72, 78, 186, 188 and 189.

Doenjang (fermented soybean paste) is mentioned on pages 56, 68, 70, 78, 134, 188, 246, 257 (spelled *twenjang*) and 346.

Doenjang jjigae (soybean paste stew) is mentioned on pages 78, 134, 188, and 246.

Tofu (*dubu*) is mentioned on pages 70-74, 78, 127, 134, 136, 179, 188, 294, and 388.

Soft tofu is mentioned on pages 204, 257, 299.

13158. Life Food GmbH. 2011. History (Leaflet). Freiburg, West Germany. 1 p. Front and back. 30 cm. [Ger; Eng]

• ***Summary:*** "1985–It all started back in 1985 with the cultivation of shoots and seedlings, and a weekly tofu production of 4 kilograms under the company name Life Food. The tofu was hand produced using simple equipment in rented cellar space and sold fresh at the weekly market in Freiburg. Note: The company was started by Klaus Kempff, who started making tofu in July 1985.

"1987–Tofu production has now reached 80 kilograms a Week. Using the Taifun brand name, a stall is rented in the newly opened Freiburg 'Markthalle' (Market Hall) offering a changing daily menu of tofu dishes. A photo shows Wolfgang Hess in the Freiburg "Markthalle."

"1990–Fresh tofu production has gradually increased to include the first vacuum-packed tofu products. Life Food is now able to introduce Taifun tofu products into the specialist natural food retail market. Weekly production has now reached 700 kilos. A photo shows the headquarters of Life Food GmbH in the early 1990s at Robert Bunsen Strasse in Freiburg's Industrial Estate North.

"1995–The company now has 20 employees, and the weekly tofu production has risen to five tons. The new, 2,500 square metre production area provides the basis for further expansion. Note: In 1995 Life Food GmbH moved into Freiburg's Hochdorf Industrial Estate.

"1996–Organic cultivation of soybeans is initiated in the southern Upper Rhine region to ensure a source of supply free of genetically modified soybeans. What started as a pilot project is now not just an enrichment of their agricultural range of products for almost 40 organic farmers, but also a

© Copyright Soyinfo Center 2013

© Copyright Soyinfo Center 2013

sensible addition of the crop rotation.

"1997–40 employees now produce 13 tons of tofu a week. For the first time it is now possible to set up an apprenticeship. As the first tofu manufacturer in Europe, Taifun becomes a member of the Demeter Association. Note: In 1997, Life Food GmbH is the first Freiburg company certified on the basis of an organic audit.

"2001–Weekly production has now grown to 30 tons. A European sales network now enables customers to buy over thirty different tofu specialities. The constantly increasing demand for Taifun tofu products leads to the decision to further expand the site. This secures around 70 jobs and more jobs will be created in the coming years.

"2002–Life Food's Taifun tofu products are honoured as the company is declared one of the 100 most innovative medium-sized businesses in Germany. Soy cultivation in South Baden reaches record levels. Life Food builds new cold rooms and dispatch rooms to create more capacity.

"2003–The year of consolidation. By increasing the existing building by 500 square metres it was possible to extend the social and office areas. We decided to change our energy supplier for one that is heedful of both resources and the environment.

"2005–The year of awards. At the February 2005 Biofach trade fair in Nuremberg, Life Food was awarded the 'Fast Seller of 2005' for its Tofu Rosso product. In October, Life Food received the 'Innovation Prize 2005–1st Prize in the medium-sized business category' at the Anuga trade fair in Cologne. Domestic soy cultivation brings in a new record harvest of 600 tons.

"2006–... and once again we will be increasing our capacity with two building projects currently in planning. There is still a great demand for Taifun tofu products. A topic still dear to our hearts and which we still focus on is ensuring that our products remain free of genetically modified raw materials. We see how important it is to create standards that will enable subsequent generations to develop and grow. We are open for new challenges and look forward to any changes associated therewith.

"2007–Our 20th anniversary year!!!

"2008–2011–acquisition of a new area and construction of our Taifun logistic center. Creation of our new Taifun Gastro line. 170 employees are working at Taifun right now." Address: Bebelstrasse, 79108 Freiburg, West Germany. Phone: 0761 / 15210-0.

13159. Wells, Ron. 2011. A brief history of Footprint Foods, dba Green Cuisine (Interview). *SoyaScan Notes.* Jan. 3. Conducted by William Shurtleff of Soyinfo Center.

• ***Summary:*** "We are Footprint Foods. We purchased the manufacturing part of Green Cuisine brand from Andy Cunningham in May 2008. We are in our third year now as owners of Footprint Foods. Andy still owns Green Cuisine." In June 2008 Rony reintroduced two brands of tofu and 5 brands of tempeh (fresh and frozen).

His product line is: 95% and above organic ingredients. Certification by PACD. Tofu (medium and extra firm), Tempeh, frozen (soybean, herb 7 grain) and fresh Tempeh (Indonesian, Original burger, BBQ burger, Marinated, Smoked, Simply Soybean), Mochi (brown rice, raisin cinnamon, sesame), Wheat Cutlets (plain, Ginger and Garlic), and Amasake (Plain, Hazelnut, Almond, Banana Mango).

Ron has five distributors in Canada, but none in the

© Copyright Soyinfo Center 2013

USA. The big chains in Canada are squeezing him and he doubts he will be in business in one year. Ron's e-mail: ron.footprintfoods@shaw.ca. Address: 712 Discovery St., Victoria, BC, V8T 1H2, Canada. Phone: 250 381 8638.

13160. Tibbott, Seth. 2011. Update on tempeh, Tofurky and Turtle Island (Interview). *SoyaScan Notes.* Jan. 19. Conducted by William Shurtleff of Soyinfo Center.
• ***Summary:*** Tempeh sales constituted about 10.7% of Turtle Island's total sales last year; the remaining 89.3% was Tofurky products. "The various types of Tofurky have steadily become our dominant products by far. Yet sales of all our tempeh products increased 39.8% during calendar year 2010. The increase was in two areas: In March 2009 we launched tempeh strips [Marinated Tempeh] in 3 flavors (Lemon Pepper, Coconut Curry, and Sesame Garlic), and packaged each in a nice box. In June 2010 we added a fourth flavor–Smoky Maple Bacon." The 39.8% sales increase figure refers to sales of these tempeh strips (4 SKUs, in a 12-pack to the natural food market and a 6-pack to the mass market) and sales of cake tempeh and tempeh strips to the mass market. Last year, Seth sold 27,000 cases of tempeh strips and 29,000 cases of tempeh cakes (of various types) in the natural foods market. Seth has been selling tempeh in cakes for about 30 years, but in strips for less than 2 years. So the strips (which weigh 7 oz per individual package) have caught on very rapidly and are almost at the level of the cakes (which weigh 8 oz per individual). In short, natural foods customers like flavored, heat-and-serve, 2nd generation tempeh products. But here's the kicker; sales of the strips are growing fastest in the mass market (supermarkets), where Seth sells about 10 times as many cases of strips as he does cakes. And its just getting started. In places like North Carolina and South Carolina they just can't get enough of these 6-pack cases of marinated strips.

Turtle Island was already in mass supermarkets in the southeastern United States, but by mid-2011 the tempeh products were added as line extensions in those accounts–especially in Florida, North Carolina, South Carolina, and Georgia, in that order. The Sesame Garlic and the Smoky Maple flavors are the best sellers in the line.

There are a growing number of voices in America talking about the health and flavor benefits of fermented foods.

Seth's tempeh sales (all cakes) (all types) were $472,000 in calendar year 2002, rising to $1.3 million in 2009. So sales of tempeh cakes are way up compared with 10 years ago.

The biggest tempeh maker in the USA by far is Lightlife Foods (in Massachusetts); they make about 10 times as much tempeh (Fakin' Bacon and cake tempeh) as Turtle Island. No. 2 is Turtle Island, followed by Hain ("Where good brands go to die"–which now makes Westsoy Tempeh, which was originally made by Steve Demos of White Wave and is probably still made at the former White Wave plant in Boulder, Colorado), then (in the natural foods market) Surata Soyfoods (Oregon), Northern Soy / Soy Boy (Rochester, New York), Rhapsody (Vermont), Wildwood Natural Foods (Pulmuone, southern California, made by Turtle Island), Bountiful Bean (Madison, Wisconsin), Central Soyfoods (Lawrence, Kansas), 21st Century Foods (Jamaica Plain, Massachusetts), Sweet Earth (Birmingham, Alabama), M Café, and Hearty Vegan (Texas).

In the SPINS data there is no category for tempeh alone; rather the category is "Tempeh and Seitan." That category was $6.1 million in 2006, increasing to $6.5 million in 2009–but those numbers are inaccurate because Whole Foods recently stopped selling its data to SPINS.

How long will Seth continue to be in charge of his business? Good question. His stepson, Jaime Athos, who is extremely bright, has a PhD in neurobiology from the University of Washington (Seattle), is a vegetarian, and has good business sense, is "chomping at the bit" to take over the business from Seth. Seth wants to continue working there, but perhaps in an emeritus position and as chairman of the board. Seth's 60th birthday is coming up on April 20, 2011, so he has to start thinking about succession and what else he wants to do. He is considering starting a foundation.

Yet his basic financial situation is "rags to better rags; it's not rags to riches." Seth does not have a big attraction to money. "It's never been about money for me. In 1980 when I was first starting Turtle Island on my 2,500 bucks, I had never taken a class in business, but there were these free classes from the SBA [Small Business Administration] on how to start and run a business. So I figured, well, its free and I don't have any money, so I'd better go there and learn about business. So I go the first class and this guy stands up there and his first question to this room-full of entrepreneurs is: 'How many of you people are out there to save the world?' And my hand shot up. I looked around and no one else's hand was up. And I go, 'Oh god. Its a rhetorical question. I just flunked my first business exam.' And then he goes, 'How many of you are out there to make money?' Every hand shot up. The place went wild. I was embarrassed–but... I see myself as the cosmic goof–the least likely person to succeed in business. Anyone with a good work ethic, little luck, a good product–so long has she doesn't take herself too seriously–can succeed in business.

"When I was younger, I was always this humorous guy. But when I started a business making tempeh I suddenly transformed into this serious guy. The conventional wisdom was–you don't want to make this funny; just play it straight. You don't wanna upset the middle class with a joke. And I lost tons of money. It was only when I came out with this wacky Tofurky product, that people thought was a joke, did I start making money. Humor started creeping into the way Turtle Island presented itself at that time. The subject lent itself naturally to humor. "I could feel I was letting my true self come through in the business."

© Copyright Soyinfo Center 2013

One important development: Pasteurizing tempeh by using vacuum sealing for longer refrigerated shelf life. This has been taking place since the mid-1990s, but it has been steadily improved. Refrigerated tempeh has a better texture and flavor than frozen, and requires much less energy use.

Also: People are increasingly becoming aware of the many important benefits of fermented foods and fermented soyfoods.

There has been a shakeup at Lightlife Foods. Top management has been asked to leave Turner Falls and move to Conagra Headquarters in Omaha, Nebraska. At least one top manager has quit.

In June 2010 Turtle Island launched a new product which has, so far, been extremely successful–Tofurky Pizza (vegan), in 3 SKUs. The cheese they use is the remarkable new tapioca-based Daiya Vegan Cheese, made by Daiya Foods, a relatively small start-up company in Vancouver, Canada (www.daiyafoods.com) that was founded in mid-2007 by Andre Kroecher and Greg Blake. They have taken the cheese-alternative category by storm. You can find shredded pieces of Daiya at any Whole Foods Market in the non-dairy cheese section.

Seth asks:

"Have you heard the joke about the fire in the vegetarian cheese factory? Everything melted except the cheese!" This non-dairy cheese really melts and stretches, is gooey and tastes great. Amy's owns the natural foods pizza category but Seth's 3 vegan pizzas are moving up fast on the charts. They started to be sold commercially in June 2010.

Sales of the three Tofurky products (Roast & Gravy, Feast, and Roast) reached 353,250 units in calendar year 2010. Sales have increased every year since Turtle Island started making the product in about 1995. The number sold has increased every year as follows (numbers prior to 2002 were rounded off to the nearest thousand): 1995–500. 1996–1,500. 1997–18,000. 1998–45,000. 2000–84,000. 2002–118,000. 2004–152,070. 2006–201,108 (one millionth Tofurky roast sold!). 2008–308,436. 2009–339,996 (two millionth Tofurky roast sold!). 2010–353,250. Total: 2,360,734.

Tofurky Feast (3.5 lbs): First sold in November 1995. Gone through several incarnations of size and product offerings. Current pack holds: two pound Tofurky Stuffed Roast, 14 oz Savory Tofurky Gravy, 11 oz Amy's Vegan Chocolate Cake, one set of Tofurky Jurky Wishstixs, Happy Tofurky Day card, coupons for Tofurky products. Sold Frozen, mainly in Natural Foods stores like Whole Foods, Berkley Bowl, etc.

The Tofurky Roast has always had tofu in it; the first two years it was all tofu, no wheat gluten. In 1997 wheat gluten was added to give more turkey-like texture and to aid in freeze/thaw process. Tempeh Drumettes were part of the original Tofurky Feast but were replaced with Cranberry Apple Potato Dumplings in 2003, which were in turn replaced with Amy's Vegan Chocolate Cake in 2010.

Tofurky Roast (26 oz): First sold in October 2002. Only the Tofurky Stuffed Roast. Sold Frozen, mainly in Natural Foods market.

Tofurky Roast and Gravy (2.5 lbs): First sold in October 2005. Includes one 26 oz Tofurky Stuffed Roast and 14 oz of Savory Tofurky Gravy. Sold Refrigerated in Mass Market accounts like Trader Joes, Publix, Safeway, etc. Address: President and Founder, Turtle Island Foods, Inc., P.O. Box 176, Hood River, Oregon 97031. Phone: (503) 386-7766.

13161. Amador-Toro, Diana. 2011. Re: Warning letter. Insanitary conditions. Letter to Mr. Shoji Ihara, Acting Vice President, Global Protein Foods, Inc., 170 Avenue L. Newark, New Jersey 07105-3831, Feb. 10. 2 p. Typed, on letterhead.

• ***Summary:*** Some of the more blatant findings include: "Floor drains throughout the facility were clogged with product such as soybeans and soybean sprouts. Water was pooling in the clogged drains near wooden water tanks in the soybean sprouting area, and in the soybean sprout production area. Pooling water with organic matter fosters the growth of pathogens which may be transferred through splashing onto food or food contact surfaces."

"You must take effective measures to exclude pests from the processing areas and protect against the contamination of food on the premises by pests, as required by 21 CFR 110.35(c). However, our investigator observed the following:

"A dead mouse on the floor near an unused fryer unit stored in the tofu fryer room.

"Live flies, too numerous to count throughout the facility, including in production areas. The flies were landing on equipment and packaging materials.

"Live roach-like insects, too numerous to count, in an unused damaged vacuum sealer stored next to the label packaging table, which is near the sprout and tofu packaging tables.

"Rodent excreta-like pellets, too numerous to count, in the walk-in refrigerator next to finished tofu product, in the receiving area where soybeans used for tofu and soymilk are washed, behind pallets of bags of soybean seeds along the walls in the warehouse area, near stored unused pallets in the receiving area, on and next to bags of citric acid in the refrigerator room, and on the floor near the hand-washing sink in the production area.

"Spider webs were throughout the facility, including in the receiving area on the overhead pipes, and a web containing a live spider was directly above the tofu production line." Address: District Director, New Jersey District. Phone: (973) 331.4900.

(3) The word "tempeh" in the title of the document: 971 hits.

(4) The word "tempeh" anywhere in the document and the word "soy" in the title of the document: 846 hits (results). (5) The word "tempeh" anywhere in the document and the word "soybean" or "soybeans" in the title of the document: 39 hits (results). (6) The word "tempeh" anywhere in the document and the word "soyfood" or "soyfoods" in the title of the document: 17 hits (results).

(7) The words "tempeh" and "tofu" in the document: 22,000 hits.

(8) The words "tempeh" and "miso" in the document: 9,760 hits.

(9) The words "tempeh" and "seitan" in the document: 3,590 hits.

(10) The word "tempeh" in the document every five years: 1970-1974 = 567 hits. 1975-1979 = 999 hits. 1980-1984 = 1,760 hits. 1985-1989 = 2,670 hits. 1990-1994 = 2,740 hits. 1995-1999 = 5,390 hits. 2000-2004 = 8,520 hits. 2005-2009 = 10,700 hits. Address: Soyinfo Center, P.O. Box 234, Lafayette, California 94549.

13164. Nabozny, James. 2011. Tofuyo, Okinawan fermented tofu (Interview). *SoyaScan Notes.* April 13. Conducted by William Shurtleff of Soyinfo Center.
• ***Summary:*** James lived on Okinawa Island for a total of 14 years as a U.S. Marine. Tofuyo is made on many of the Okinawa Islands and the Ryukyu Islands of Japan. He has tasted several different varieties of tofuyo on the island of Ishikawa, a tiny inhabited island south of Okinawa in the archipelago, which almost no outsiders visit. The people and culture there are very traditional–as from a bygone era. The tofu there is curded using seawater and is very delicious–as is the unique tofuyo. Address: Tucson, Arizona.

13165. *SoyaScan Notes.* 2011. Chronology of Vitasoy, worldwide (Overview). April 13. Compiled by William Shurtleff of Soyinfo Center.
• ***Summary:*** 1940–Establishment of Hong Kong Soya Bean Products Co. Ltd. in Hong Kong. Launch of healthy Vitasoy soymilk in Hong Kong (a color photo in the 2009/10 annual report shows the original glass bottle).

1975 The Group introduces the first Tetra Brik Aseptic packaging for beverage products in Hong Kong.

1976–Launch of new VITA line of juice drinks in Hong Kong.

1979–Launch of VITA Lemon Tea. It was the world's first ready-to-drink lemon tea.

1984–Launch of the world's first 375 ml paper-pack drink.

1987–Official opening of the new HK$100 million headquarters and plant building in Tuen Mun, Hong Kong.

1990–Acquisition of a tofu plant on the East Coast of the US.

1994–The Group is listed on the Stock Exchange of Hong Kong. Official opening of Shenzhen plant in Mainland China.

1998–Official opening of a wholly-owned plant in Shanghai, Mainland China. Official opening of the new Nasoya Foods plant in Ayer, Massachusetts in the USA.

2001–Official opening of the Company's first plant in Australia–at Wodonga. 2002–Vitasoy International Holdings Ltd. receives the Caring Company logo from the Hong Kong Council of Social Services for the first time, which demonstrated the Company's efforts in giving to the community.

2006–Selected VITA tea and juice products are launched in Mainland China–imported from Hong Kong under the Closer Economic Partnership Arrangement (CEPA).

2007–San Sui [literally "mountain water"] tofu series is launched in Hong Kong.

2008–Acquisition of Unicurd Food in Singapore.

13166. *SoyaScan Notes.* 2011. Updated USDA database on the isoflavone levels in foods, commercial ingredients, soybeans and soyfoods (Overview). April 23. Compiled by William Shurtleff of Soyinfo Center. [1 ref]
• ***Summary:*** The link is now http://www.ars. usda.gov/

© Copyright Soyinfo Center 2013

SP2UserFiles/ Place/12354500/ Data/isoflav/ Isoflav_ R2.pdf. "Legumes and legume products" starts on p. 16. Start by going to page 24, which is where the soy section begins. Then you can do a PDF search for fermented soyfoods such as: Tempeh, miso, soy sauce, natto, or Sufu (fermented tofu)–and you will see that they are NOT lower in total (or specific isoflavones) than nonfermented soyfoods such as: Tofu, soymilk, soybeans (immature), soybeans (mature), etc.

13167. *SoyaScan Notes.* 2011. What ever happened to the LA Tofu Festival, held from 1996 to 2007 in Los Angeles, sponsored as a fundraiser for the Little Tokyo Service Center? (Overview). May 4. Compiled by William Shurtleff of Soyinfo Center.
• ***Summary:*** In 2008 the Tofu Festival was replaced by "La Vida Sake," a sake and food tasting event held at the Petersen Automotive Museum in Los Angeles, California, on May 22.

13168. Timberlake, Sean. 2011. SFoodies 92: No. 10. Oboro Tofu at Eiji (Web article). http://blogs.sfweekly.com/foodie/2011/05/eiji_oboro_tofu_ sfoodies_92_favorite_dishes_2011.php. May 4.
• ***Summary:*** This blog is: "SFoodie's countdown of our 92 favorite things to eat and drink in San Francisco, 2011 edition." A large color photo shows Oboro tofu in a ceramic bowl (with garnishes on top); $9.25 for two. The blog describes the experience of being served. The curds are apparently made by stirring nigari (a coagulant) into hot soymilk at the table. "The texture is otherworldly." The garnishes, in a second bowl, are: sesame seeds, sliced scallions, fresh and pickled ginger, shaved bonito flakes, a chiffonade of shiso leaf. But as she spoons a wedge of the tofu into your bowl, she suggests you try it first–plain. A little real tamari (made without wheat) is also served.

On the table is a quote (titled "Home made tofu") about oboro from *The Book of Tofu,* by Shurtleff and Aoyagi. "Like the clouds it resembles in so many other ways, *oboro* is transient; in a few moments it will be gone, only to reappear as tofu. But before it vanishes or changes form, it may be tasted. As soft as the most delicate custard, warm fresh curds have the richness of cream and a wonderful subtle sweetness."

Eiji is at 317 Sanchez (at 16th St.), San Francisco. Phone: 415-558-8149. They have been serving oboro since at least Jan. 2007. On 13 May 2008 the *San Francisco Bay Guardian* did an online video a story titled "Heavenly oboro: SFBG goes to Eiji." The restaurant opened in mid-June 2006. Address: San Francisco blogger.

• ***Summary:*** About organic farming vs. large scale monoculture. Address: Special to the Chronicle, Chronicle columnist, San Francisco.

13170. Williams, Bruce. 2011. Background information on Li Yü-ying (Li Shizeng) (Interview). *SoyaScan Notes.* May 28. Conducted by William Shurtleff of Soyinfo Center.
• ***Summary:*** In China a child gets his or her "original" name at the naming ceremony when the child is one month old.

When does a person get their "Courtesy name"? Traditionally there used to be a thing called a "capping ceremony," which was a coming-of-age rite. It generally happened when the young man of a literate family of means reached the age of adulthood / majority (around 18-20 years of age). The person did not have to be famous, and in the early 1900s only about 1-2% of all young men in China went through such a ceremony. The parents usually give the young man his name; only rarely did he choose it for himself.

A "courtesy name" should be used by ones peer or those who are younger. A person can decide when they wish to use which name. Note: Li Yü-ying chose to use only that name in all of his writings about soy.

The situation with Li Yü-ying (who is generally known to the world by his "courtesy name" or "style," *Zi*), Li Shizeng, is a little tricky because he was born and first educated in the old educational system.

If Li was born in 1881, then he turned 20 in 1901, which was before the educational reform edict was officially announced in 1906–and before the Republican revolution of 1911-12. The reform basically disenfranchised an entire generation of people who were preparing for the exams and careers as government officials.

Note: In China's educational reform, the ancient system of literary examinations was completely abolished and replaced by a more modern and more Western system based on universities, libraries and museums. Previously there had been no school system in China, with the exception of Buddhist schools (from about 900 A.D. to the present) and Christian schools and colleges (more recently). Families of means had their own libraries and tutors for their children. China made literary attainment a condition of office holding.

After 1906, prominent families who had libraries but no longer needed them for their children, were often forced by circumstances those libraries. Western Libraries (e.g., Harvard, Yale, Princeton, Colombia, Chicago, Berkeley) picked up huge numbers of valuable old books, at very low prices, to add to their libraries. Why didn't Chinese Libraries buy these books? The concept of building libraries took time to develop; they just didn't have the concept. But also, as the Boxer Indemnity money came in (it could only be used for cultural and educational projects), starting in the 1910s, the Chinese used this money to build libraries, museums, and universities.

The fact that Li was considered one of the "four elder statesmen of the Kuomintang" is of pivotal importance. That

© Copyright Soyinfo Center 2013

is how most Chinese know him; they don't generally know of his involvement with tofu (*doufu*) or soy. These four elder statesmen were Wu Zhihui (Wu Chih-hui), Cai Yuanpei (Ts'ai Yuan-p'ei), Zhang Renjie (Chang Jen-chieh), and Li Shizeng (Li Shih-tseng).

Li was not an unproblematic person–in part because he had power. Given the modern state of the debates, a lot of the stuff he did was very incorrect–politically. So they don't want to talk about this side of him.

Understanding Li is essential for understanding early Kuomintang (pinyin: Guomindang) and Communist politics in the 1910s and 1920s, which is where most Taiwanese and mainland Chinese historians don't go; its too sensitive. They don't want to deal with that 10-15 year period where a lot of the most important issues really take shape. They start their research in the mid- to late-1920s. Both sides were involved in a lot of skullduggery (underhanded dealing) back in the good old days.

Bruce's wife has done some work on Li because he was the major strategist for the Kuomintang in the early days. He's the one who made the decision to have Puyi (the last Emperor of China) kicked out of the Imperial Palace, and negotiated the deal to get the inventory / treasures out of the Imperial Palace / City. People suspect that he is largely responsible for allowing it to be looted of its treasures, and the allowing the money to be used to finance the Kuomintang. Its very likely that a significant proportion of China's treasures actually went through antique dealers in Paris, London, etc. Many good duplicates / forgeries of originals were made, and it is now unclear which of the two great national museums in Taipei and Beijing, if any, has legitimate treasures. Neither side wants to raise the debate because the public documentation on this is rather appalling.

Li developed the Work-Study Program in France, but many people accused the program of being a sham. Many students, after arriving in France, had to work as "slave labor" in the French labor market; he didn't have a support network for them. Not all the Chinese who participated in this program came out of it with good experiences.

However Li met many high French officials, and in fact when the Boxer Indemnity money started to be returned to China he was the funnel through which all of the French-speaking (French and Belgian) money went. That was probably his major basis for power; he never gave that up–at least not until World War II. So when China consolidated a lot of the indemnity funds under the ministry of education in the 1930s, he was not part of that. He eventually got pushed aside. One of the big debates is whether Li used any of this money for his own projects, and if so, how much. Among officials, it's always okay (it's "official corruption" but its a standard form of corruption, even today) to use public money for private purposes–such as setting up your own businesses. If it makes money, you take the money; if it loses money, you write it off to the government.

Note: Hu Shi maintained control over the British and American Boxer Indemnity money all the way through World War II.

Because of his political background, and his scholarly tendency to collect documents, and the Sino-International library that he owned, he had a lot of really sensitive political documents. Very shortly after he died there was a very suspicious fire in his office. The debate is: Were the documents actually burned or were they taken by the Kuomintang and deposited in some archive. Li had access to a lot of the old state secrets and he knew where all the skeletons were buried. They were concerned that if these documents ever got out, the early history of the Kuomintang would have to be totally rewritten.

Li was an entrepreneur; he just thought like one. He was a risk taker. Because he came from a wealthy family, he had the resources, for example, to set up a tofu factory near Paris while he was still young. Address: PhD, Librarian, East Asian Library, Univ. of California, Berkeley. Phone: (510) 642-2556.

13171. Lukoskie, W.M. Luke. 2011. Re: Update on Island Spring in Vashon, Washington. Letter (e-mail) to William Shurtleff at Soyinfo Center, May 30. 1 p.
• ***Summary:*** "I work mostly from home these days, dealing by phone and email with the management team at Island Spring which as of last year became Island Spring Organics.

"A year ago last February [i.e., in Feb. 2010] Small Planet Organics moved their entire operation into our plant. We, Phil Spiegel and I, are working together while we maintain the separate identities of our brands. Phil is now the operations manager of Island Spring."

Luke now works with Lois Schwennensen managing the business of her business (multi party environmental mediation). They both seem to be working full time. Address: P.O. Box 747, Vashon, Washington 98070. Phone: (206) 622-6448.

13172. Re: Names of soyfoods around the world: Korean. 2011. Form filled out and returned to William Shurtleff at Soyfoods Center, May. 1 p. Handwritten. [Eng; kor]
• ***Summary:*** Soybean: me ju kong. Soymilk: duyu, du-u, or du yu. Tofu: dubu or du bu. Soymilk curds (uncurded / uncurdled tofu): sundubu.

13173. *SoyaScan Notes.* 2011. History of early Japanese tofu shops in the United States (Overview). June 1. Compiled by William Shurtleff of Soyinfo Center.
• ***Summary:*** In 1905 there were 6 Japanese tofu shops in the United States; 2 in Los Angeles, and 1 each in San Francisco, Sacramento, San Jose, and Isleton–all in California.

By 1910 at least 61 Japanese tofu shops had been established in the USA, by 1920 at least 166, by 1930 at least 293, by 1940 at least 392, and by 1950 at least 425.

© Copyright Soyinfo Center 2013

The first Japanese tofu shop in Washington state was in operation by 1906 (in Seattle); in Utah by 1907 (Ogden); in Nevada by 1908 (Reno); in New York by 1911 (Brooklyn, NYC), and in Idaho by 1913 (Sugar City). Thus, almost all of the earliest known tofu shops in the United States were started by people of Japanese ancestry–most of them in small communities in California, Oregon and Washington.

How do we know all this? Largely because of two remarkable public directories published in San Francisco by the *Nichibei Shinbun-sha* (*Japanese American News Inc.*). The first, published from 1905 to 1916, was titled *Zaibei Nihonjin Nenkan,* retitled *Nichi-Bei Nenkan* in 1909 (*Japanese-American Yearbook*). The second, published from 1919 to 1941, was titled *Nichibei Jûshoroku* (The Japanese American Directory).

There is, unfortunately, no known corresponding directory listing Chinese businesses in the United States. Address: Founder & Director, Soyinfo Center, P.O. Box 234, Lafayette, California 94549.

13174. Spiegel, Phil. 2011. Update on Small Planet Soyfoods (Interview). *SoyaScan Notes.* June 1. Conducted by William Shurtleff of Soyinfo Center.

• ***Summary:*** The official, legal name of the company is still Small Planet Soyfoods. The company began making tofu, part time, in 1992. In 1993 it began doing business as Small Planet Tofu. Then in 1998 as Small Planet Organic Tofu, and finally in 2010 as Small Planet Organics.

In Oct. 2007 the company had a major "bacterial event," which forced Phil to pull all of his tofu products from every store where they were sold until the problem was solved. After consulting with various experts, over many months, he found that one short length of rubber hose had a crack on the inside which was harboring spoilage bacteria and which was not being cleaned regularly on schedule. He replaced the former hosing with stainless steel and the problem quickly disappeared. By June 2008 a U.S. Army testing lab gave his tofu a clean bill of health. However Sept. 2008 was the beginning of the "great recession" in the United States and Phil experienced great difficulty in getting his high quality, organic tofu products back into the stores that had previously carried them. He quickly realized that he had to either find a creative solution or perish.

After unsuccessful negotiations with Lighthouse Foods (a big maker of salad dressings that was very interested in his tofu dips), he got a call from Luke Lukoskie, founder and owner of Island Spring (a competitor, located about 300 miles to the west on Vashon Island, Washington) who said they might be able to work together. Luke visited Phil's tofu plant and was impressed. He invited Phil to make his tofu in Luke's plant. From Dec. 2009 to Jan. 2010 Phil made the move (including all his tofu-making equipment) from his scenically beautiful location to Vashon. On 15 Feb. 2010 he stopped making tofu at his previous location and on 22 Feb. 2010 he began to make tofu in Luke's tofu plant. Phil makes only nigari tofu whereas Luke makes a mixture of nigari and calcium sulfate; and Luke also makes GDL silken tofu. So they use the same soymilk, made from organic soybeans, but after that their processes diverge. Things seem to be working out well. Basically Phil contracts with Island Spring to make his tofu, which allows Phil to focus more on marketing.

Luke is now the oldest existing Caucasian tofu maker in the United States. Address: P.O. Box 773, Vashon, Washington 98070.

13175. Jones, Paul. 2011. Re: Early history of Paul's work with tofu. Letter (e-mail) to William Shurtleff at Soyinfo Center, June 6. 1 p.

• ***Summary:*** Q1. On what date did you make your first commercial tofu?

Ans: It must have been 1977/78–I was already in production when we came to 'Soyfoods Comes West' in 1979. Peter Bradford might remember for it was he who gave us the Chinese stone grinder to make the 'Go.'

Q2. Was the address at that time you started commercial production: 155 Archway Rd., Highgate, London, N6 4NA, England? Ans: Yes.

Q3. Do you remember the date when you left that address and moved to St. Albans, Hertfordshire, England? Ans: 1980/81? We moved to the old brewery, Wheathampstead House, Wheathampstead, Herts.

Note: Current website: www.soyfoods.co.uk. Paul Jones now works with Peter 'Tempeh' Efemey. On the website is a nice video (6:50 minutes) of Paul making tofu on BBC Two "Chinese Food Made Easy" for Ching-He Huang, who uses that fresh tofu to make a Chinese dish. In his baking, Paul is pleased to use flours milled by Miller Nigel Moon, who helps fly the flag for sustainability and the local food economy by restoring Whissendine Windmill to its original power source. The final pair of sails were fitted on 7th September, 2006 with major funding from English Heritage. The grain is locally grown and organic.

Note: As of March 2013 the official, registered name of Paul's company is "Soyfoods Ltd." The address is given above. "Soyfoods Ltd. trades as Pauls; Paul's; Paul's Tofu; Paul's Organics and Paul's Bakery." Address: Founder, Soyfoods Ltd., 66 Snow Hill, Melton Mowbray, Leics., LE13 1PD. Phone: 01664 560572.

13176. *Nichi Bei Weekly.* 2011. Northern California Soy & Tofu Festival: Come discover the joy of soy. June 2-8. p. 5-7. Cover story.

• ***Summary:*** This issue announces the first Northern California Soy & Tofu Festival to be held on June 11, in San Francisco Japantown, Peace Plaza, 11 am–4 pm. It is sponsored by the Nichi Bei Foundation and many large corporate sponsors. Gold sponsor: Pacific Gas and Electric Company. Silver sponsors: Kikkoman, Union Bank.

The main article on page 6 is titled "Soy to the world: Small businesses explore varied tastes, textures," by Akiko Minaga (Nichi Bei Weekly Contributor). It discusses Megumi Natto, Hodo Soy Beanery, San Jose Tofu, and Sacramento Tofu.

A second article by her (on the same page) titled "Soy, the magic bean: The many benefits of soy" discusses tofu, soymilk, beauty treatments, soy clothing, soy ink, etc.

A sidebar is titled "Tofu: A brief 2,000 year history," by William Shurtleff of Soyinfo Center.

Photos show: (1) Chester Nozaki and his wife, Amy, owners of San Jose Tofu. (2) Alvin and Dorothy Kunishi, owners of Sacramento Tofu. (3) Minh Tsai, owner of Hodo Soy Beanery. Address: P.O. Box 15693, San Francisco, California 94115. Phone: (415) 673-1009.

13177. *SoyaScan Notes.* 2011. Chronology of early U.S. commercial soymilk products with the word "soy milk" or "soymilk" in the product name. June 10. Compiled by William Shurtleff of Soyinfo Center.

• ***Summary:*** As of today, our SoyaScan database contains 434 records for commercial soymilk products launched in the USA from 1917 to the present. Most have fanciful brand names such as VitaSoy, Soy Lac, Soya-Lac, Kreme-O-Soy, etc.

Here are the early commercial products with soymilk or soy milk in the product name as it appears on the label. Most were sold in interstate commerce. Date, product name, company name, location, number of clear documents describing product.

1929–La Sierra Soy Milk, La Sierra Industries, Arlington, California, 3 documents.

1931–Madison Soy Milk, Madison Foods, Madison, Tennessee, 5 documents.

1934–Loma Linda Soy Milk (canned), Loma Linda, California, 3 documents.

1936–Soy Milk (Canned), Battle Creek Food Co., Battle Creek, Michigan, 4 documents.

1936–Soy Milk, Soybean Health Products Co., Oakland, California, 1 document.

1937–Radcliffe's Soya Milk, Radcliffe Soya Products, San Francisco, Calif., 3 documents,... etc.

1975–Soymilk, Welcome Home Bakery and Tofu Shop, Corvallis, Oregon, 2 documents.

1975–Soymilk, American Food Co., Alhambra, California, 2 documents. incl. label.

1976–Carob Soymilk, Farm Food Co., San Rafael, Calif., 1 document (label).

1977–Laughing Grasshopper Soymilk, Laughing Grasshopper Tofu Shop, Millers Falls, Mass., 2 documents including poster.

1977–Soymilk [Honey & Vanilla, or Plain], The Soy Plant, Ann Arbor, Michigan, 4 documents including label.

1977–Fresh Joy o' Soy Soymilk, The Tofu Shop, Telluride, Colorado, 2 documents including label.

1978–Island Spring Plain Soymilk, Island Spring, Inc., Vashon, Washington, 3 documents incl. label, etc.

13178. Taguma, Kenji G. 2011. Re: The First Northern California Soy and Tofu Festival: Discover the Joy of Soy. Letter (e-mail) to William Shurtleff at Soyinfo Center, June 21. 1 p.

• ***Summary:*** In reply to an e-mail asking about the Festival, which was held Saturday, June 11, from 11 a.m. to 4 p.m. in San Francisco Japantown's Peace Plaza, Post and Buchanan streets.

"The festival was a huge success. While we were expecting maybe 1,000 to 2,000 people, we estimate that we had some 3,500 people in and out of the Peace Plaza during the Festival. There was much positive feedback–for the food, our two mascots Tofu Ninja and Tofu Panda, the emcees, the entertainment, the audience participation games and the Tofu Dessert Competition–that encourages us to do it again next year. The trick is to maximize our fundraising efforts. However, we put this together in only two months, so with more lead time, I'm sure we can get more sponsors."

"Thanks again for all of your help. There certainly is the potential to make this festival grow in the years to come, and some definite excitement for it." Address: President, Nichi Bei Foundation, 1832 Buchanan St., Suite 207, San Francisco, California 94115. Phone: (415) 573-1009.

13179. *Nichi Bei Weekly.* 2011. For the joy of soy: Highlights from the festival. June 23-29. p. 6-7. Cover story.

• ***Summary:*** The title above appears on the cover. The title on page 6 is "Northern California Soy & Tofu Festival." It contains: (1) Twenty color photos from the festival–with a caption for each. (2) "A culinary tour of the Soy and Tofu Festival," by Pauline Fujita. (3) Winning recipes. (4) List of all sponsors with thanks. (5) Organizing committee of the festival. (5) Special thanks to raffle prize donors. Address: P.O. Box 15693, San Francisco, California 94115. Phone: (415) 673-1009.

13180. **Product Name:** Tofurky Slices [Pepperoni].
Manufacturer's Name: Turtle Island Foods, Inc.
Manufacturer's Address: P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031.
Date of Introduction: 2011. June.
Ingredients: Vital wheat gluten, water, organic tofu (filtered water, organic whole soybeans, magnesium chloride, calcium chloride), expeller pressed non-genetically engineered canola oil, organic brown rice, soy sauce (water, non-genetically engineered soybeans, wheat, salt, culture), non-GMO corn starch, annatto, garbanzo bean flour, white bean flour, lemon juice concentrate, salt, vegan natural flavor, yeast extract, liquid smoke, garlic, fennel seed, red pepper flakes, black pepper, lycopene from tomatoes, calcium lactate from beets,

© Copyright Soyinfo Center 2013

purple carrot juice, vegetable glycerin. Contains: Wheat and soy.
Wt/Vol., Packaging, Price: 4 oz (113 gm) vacuum pack.
How Stored: Refrigerated.
New Product–Documentation: Label sent by Seth Tibbott, founder of Turtle Island, 2011. July. 5 by 5.5 inches. Paperboard box. White, green, gold and black on red. Color photo shows a slice of the pizza. Front panel: "Family owned and independent since 1980." "Meatless, Gourmet and Delicious. Vegan. KSA Parve." On the rear panel is a serving suggestions. And: www.Tofurky.com.

Letter (e-mail) from Seth. 2012. Nov. 13. "Pepperoni Deli Slices first shipped June 1, 2011 according to my records."

13181. Shurtleff, William. 2011. Comparison of the macrobiotic diet and Dr. Caldwell Esselstyn's whole foods, plant-based diet (Editorial). *SoyaScan Notes.* July 2.
• ***Summary:*** Meat: Macrobiotic diets allow consumption of fish, shellfish, and other seafoods, whereas the Esselstyn diet (which is designed to prevent and reverse coronary artery disease / heart disease) allows no animal products.

Dairy: The Esselstyn diet prohibits consumption of dairy products; the macrobiotic diet discourages their consumption. Note: Actually nothing is prohibited by macrobiotic diets; as taught by George Ohsawa, they are broad, flexible, and nondogmatic.

Refined carbohydrates, such as white sugar, white rice, and white flour. Both diets discourage their use except that the Esselstyn diet uses white sugar (in large amounts) in a small percentage of desserts. For example, in the book *Prevent and Reverse Heart Disease* (2007), the recipe for Birthday Cake (p. 276) calls for "1 cup (or less) sugar." Chocolate Red Devil Cake (p. 278) calls for "1 cup sugar." Luscious Lemon Cake (p. 280) calls for "3/4 cup (or less) brown sugar plus granulated sugar sprinkled over the cake."

Salt: The salt content of the macrobiotic diet (like the traditional Japanese diet) is high, provided by such condiments as miso, soy sauce (tamari), and gomashio, whereas the Esselstyn diet aims to use as little salt as possible–since many of the patients have both cardiovascular disease and hypertension. "If you *still* miss salt, try adding a little Bragg Liquid Aminos" (a salt alternative) or small amounts of "South River Sweet White Miso or low-sodium tamari. Try to limit sodium consumption to 2,000 mg a day." A table shows the amount of sodium in salt and four condiments (p. 122).

Soyfoods: Macrobiotic diets uses soyfoods abundantly; in addition to miso and tamari, they enjoy tempeh, natto, and small amounts of tofu. The Esselstyn diet advises: "Eat soy products cautiously. Many are highly processed and high in fat" (p. 121).

Fruits: Macrobiotic diets use fruits sparingly, since most are classified as very "yin." However apples (the most yang fruit) are used quite freely. The Esselstyn diet encourages the use of all fresh, whole fruits except avocadoes (which are high in fat).

Grain vs. vegetables. The macrobiotic diet is based on the central idea of a primary food (such as brown rice or other whole grains) and secondary foods (such as cooked vegetables). The Esselstyn diet encourages the use of all fresh, whole vegetables. One might say that the center of the Esselstyn diet is fresh fruits and vegetables.

Macrobiotic diets strongly discourages consumption of foods which are members of the nightshade family–potatoes, tomatoes, and eggplants. The Esselstyn diet encourages the consumption of whole (unpeeled) potatoes and tomatoes.

Macrobiotic diets resembles a Japanese diet, whereas the Esselstyn diet resembles an American diet.

Use of local, seasonal foods: Macrobiotic diets emphasizes this somewhat more than the Esselstyn diet.

Use of added oil: The Esselstyn diet strongly discourages this, whereas the macrobiotic diet focuses more on the quality of the oil, but while still advising moderation in quantity, includes recipes for deep-fried foods (such as tempura).

The term "macrobiotic diets" is short, whereas the term "whole-foods, plant based diet" is descriptive but too long, and in need of a shorter name. Address: Founder and owner, Soyfoods Center, Lafayette, California. Phone: 925-283-2991.

13182. Shurtleff, William; Aoyagi, Akiko. comps. 2011. How Japanese and Japanese-Americans brought soyfoods to the United States and the Hawaiian Islands–A history (1851-2011): Extensively annotated bibliography and sourcebook. Lafayette, California: Soyinfo Center. 328 p. Subject/geographical index. Printed 12 July 2011. 28 cm. [1259 ref]
• ***Summary:*** Begins with a chronology of how Japanese and Japanese-Americans brought soyfoods to the United States and the Hawaiian Islands. Contains 110 historical photos and illustrations (some in color), graphs, and tables. http://www.soyinfocenter. com/books/146. Address: Soyinfo Center, P.O. Box 234, Lafayette, California 94549. Phone: 925-283-2991.

13183. Shurtleff, William. 2011. A band named The Mountain Goats made a CD titled "Protein Source of the Future... Now!" with Akiko Aoyagi's illustration of a tofu maker on the cover (Editorial). *SoyaScan Notes.* July 17.
• ***Summary:*** This CD, released on 25 Sept. 2007, is a compilation 23 of their singles which were previously recorded, including "Going to Tennessee," and "3 Beads of Sweat" (2002). The illustration was taken, without permission, from page 299 of *The Book of Tofu: Protein Source of the Future... Now!* by Shurtleff and Aoyagi. But it was changed slightly so as (hopefully) not to violate copyright laws. "Imitation is the highest form of flattery" (Barbara Yechton, 1900, in "A Lovable Crank"). Address:

© Copyright Soyinfo Center 2013

Founder and owner, Soyfoods Center, Lafayette, California. Phone: 925-283-2991.

13184. Salen, Patricia; de Lorgeril, Michel. 2011. The Okinawan diet: A modern view of an ancestral healthy lifestyle. *World Review of Nutrition and Dietetics* 102:114-23. Epub 2011 Aug. 5. In: A.P. Simopoulos, ed. 2011. Healthy Agriculture, Healthy Nutrition, Healthy People. [53 ref]

• ***Summary:*** Contents: Introduction. Social interconnections in Okinawa ("everyone must share and help each other"). The traditional Okinawan diet. Caloric restriction. High carbohydrate intake associated with low fat and low protein intake. A rather low sodium intake (as compared with Japan). High consumption of plant foods. Low to moderate consumption of sea foods. Traditional herbs and spices. Okinawa beverages (the people drink a lot of tea–green and jasmine–which is very rich in flavonoids). The main source of alcohol in Okinawa used to be *awamori,* a distilled sake made from rice, which typically contains 30-43% alcohol compared with less than 10% for sake.

In the section on "High carbohydrate intake..." are three paragraphs (p. 118) on the place of soyfoods in the Okinawan diet. Okinawans consume soy mostly in the form of tofu and miso. Their longevity has been attributed in part to their high intake of soyfoods (Willcox, Willcox & Suzuki 2001; Willcox, Willcox, Todoriki & Suzuki 2009).

Soy is a rich source of polyphenols (isoflavonoids). Okinawan tofu (the most widely eaten type being called *shimadofu*) contains less water / moisture than typical Japanese tofu and more healthy polyphenols, fat and protein. Tofu is often made at home in Okinawa and used in many different recipes.

The high intake of soy isoflavones has been associated with the very low rates of breast and prostate cancers in Okinawa (references 36-38), whereas the low rate of dementia, including Alzheimer's disease, in Okinawa may be related to the high consumption of natto, a traditional Japanese fermented food that is typically eaten on rice at breakfast. Address: Laboratoire Cour & Nutrition, TIMC-IMAG CNRS 5525, Université Joseph Fourier, Faculté de Médecine, Grenoble, France..

13185. Weng, Jun. 2011. Re: Brief history of Shanghai Wangxin Bean Products Equipment Co., Ltd. Letter (e-mail) to William Shurtleff at Soyinfo Center, Aug. 5. 1 p.

• ***Summary:*** Our company was first founded in 1994 in Pudong New Area, a district of Shanghai and a New Open Economic Development Zone, which has emerged as China's financial and commercial hub. Our company's original name was Shanghai Wangde Food Packing Machine Factory; it specialized in manufacturing food packing machine. However in the year 2000 our company changed its name to Shanghai Wangxin Bean Products Equipment Co., Ltd.; now it mainly produces a series of mechanical and electrical equipment for making [soy] bean products. It is a starting unit of all-China federation of industry and commerce, an executive member of China Bean Products Council of China food industry council, a permanent member of Shanghai Bean Products Council and passed ISO9001: 2008 in 2009, meanwhile we got the honors of "Shanghai High Technology Company," "National Bean Action Plan model unit."

In total, we have gotten "76 patented equipments until 2011. Our company has more than 200 employees, including 12 engineers, 5 senior engineers and 42 machinists. We mainly produce series of bean products equipments, assembly lines to produce lactone bean curd, soft bean curd, firm tofu, soybean milk, bean curd sheets (thousand sheets), dried bean curd, soft bean curd and so on. On the basis of the management strategy of "Quality, Service, Management, Credibility," and along with the expert devise, high quality products and perfect service after sale, we have enjoyed a high reputation at home and abroad. Our equipments have been sold well all over the China and exported to America, Canada, Japan, Vietnam and other countries.

Mr. Weng sends digital color photos of the following machines stainless steel made by his company: (1) Machine for vacuuming beans (to move 1,000 to 2,000 dried beans from one place to another). (2) Soybean fixed amount distributor (rolls on wheels on a track, for example, over grinder hoppers or cookers). (3) Grinder, 5.5 kw, output: 300 kg soybean per hour. (4) Grinder, 1.5 kw, output: 400 kg soybean per hour. (5) Grinder, 15 kw, output: 600 kg soybean per hour. (6) Centrifugal machine. Power: 5.5 kw. Output: 600 kg soybean/hour. (7) Automatic continuous soymilk cooking machine with 8 pots. Weight: 1,000 kg. Output: 7 tons of boiled soymilk per hour. (8) Automatic intelligent continuous soymilk cooking machine. Weight: 670 kg. Output: 5 to 6 tons boiled soymilk/hour. (9) Boiled soybean milk griddle. Output: 500 kg soymilk per hour. Address: Foreign Trade Manager, No. 4633 Sansan Road, Shuyuan Town, PuDong New District, Shanghai, China.

13186. Sharp, Carolyn Heidenry. 2011. Re: Gung Ho!: Aveline Kushi and macrobiotics. (Continued–Part II). Letter to William Shurtleff at Soyinfo Center, Aug. 15. 11 p.

• ***Summary:*** Continued. Perspective: As to the why of Aveline's unbalanced diet, again as with Michio, I think there were many reasons that contributed to her unusual way of eating. Thinking back to when she first arrived in this country, around 1951, at her destination, New York City, one can easily imagine some of what she experienced. Gone from her life were all the little shops she had frequented in Japan, filled with what she was used to cooking, and had grown up eating. The many varieties of vegetables, the extremely fresh fish on display everywhere, the noodle shops, different types of delicious pickles, various kinds of mochi and gelatins that girls and young women ate so frequently in little shops,

© Copyright Soyinfo Center 2013

tofu dishes, roasted sweet potatoes and chestnuts, and all the other little niceties to which she had been accustomed. In their place was an alien world with an alien cuisine-steaks and ham, hot dogs and donuts, pizza and hamburgers. Small vegetable selections, unlike now, that didn't include much of what she was used to cooking, and that also lacked the sea vegetables she liked so much.

"Many of the foods that she would have enjoyed and that would have contributed to a more balanced diet simply weren't available. This was long before Erewhon, Infinity, Chico-San, Eden, Ohsawa, Great Eastern Sun, Natural Import Co., and all the other high quality natural food wholesalers and retailers that developed in later years. And though New York had a Chinatown, I doubt whether it had the variety and abundance available there now, and what there was was not all of good quality. In addition, Michio and Aveline had no car for a long time, and it's unlikely that Aveline would have lugged groceries home on the subway from Chinatown more than just occasionally. Not with an infant in one arm, and then later an infant in one arm and a toddler in tow. Then two toddlers, then three. Even with a car this would have been a difficult expedition. She probably shopped as locally in her neighborhood as she possibly could. And that meant many limitations.

"She was also away from all the support she would have had at home in Japan, not only culinary, but also the support of and interaction with friends, family members, neighbors, and teachers (another kind of "food"–for the soul and heart) especially Lima Ohsawa who would have continued to be a very good influence on her. Then, too, she was away from all the charm and graciousness and quaint little ways and ancient traditions of her native land, which would have been still another form of nourishment. Away from the musical language that would have surrounded her daily. Away from the wonderful calligraphy on display in the shops and streets. So though she was now living in an interesting and powerful city, there were many things missing from her life to which she had been accustomed.

"She had to have been a rather headstrong person to live without all that and then, as well, to eat in a way that was so completely different from the way the people in her new country did, a way that was also, to a significant degree, somewhat inaccessible to her given the few stores where she could buy the relatively inferior products with which she was at least familiar. Had she come here as part of a large family, probably it would have been somewhat easier. But she came alone, and joined one man. So for the first 20 to 30 years there weren't all the hundreds of natural, organic, quality products we now take for granted. It made a macrobiotic diet quite limited. Still, she made very good meals, but it was quite different and less varied than it is now.

"Homesick: She once told me that when living in New York in the early years, she happened to eat some fruit one day, and then started weeping because she was so homesick for Japan. After that she avoided eating fruit for a long time, not wanting to feel that sadness and longing for Japan which she thought had been induced by the fruit she had eaten. It was a lesson in how food affects psychology, but it also ultimately led to a too-yang condition. However, she wanted to stay yang, so she would be strong, and not pining away for Japan. There was not a trace of self pity in her when she spoke of this. Rather, she was kind of laughing about it. She knew she had chosen to come here, and that in some ways she had had a very good life. But apparently there was an undercurrent sometimes when memories tugged at her heart. It gradually faded over the years, I think, the longing for, though not the memories of, Japan. The trips back and forth to Japan in later years probably helped.

"It wasn't until the mid-to-late sixties that the first developments in the natural food industry (as we know it today) came about, all very well detailed in Bill Shurtleff's "History of Erewhon" which covers so much more than just Erewhon. But for a long time, for years and years, Aveline was somewhat isolated from all that she knew and remembered about food, and was usually without many of the products she would have enjoyed and used in Japan. Michio, too. How much he would have enjoyed all the neighborhood sushi restaurants and noodle shops if he wanted to go out, as Japanese men so often do with each other, had he and Aveline returned to, or never left, Japan. All he had here and all he could usually afford were coffee shops, which had very different menu selections, to say the least.

"So Aveline had a somewhat imbalanced and impoverished diet right from the start in America, as did Michio, and for a very long time after that. Instead of living in a country, city and neighborhood enriched by a wide variety of wonderful vegetable, grain and fish dishes, she made do with a lot less for a long time. I think this was a very big factor in contributing to her imbalanced diet and condition.

"Another factor was that she had done so much cooking for so many years, first for the family when the children were younger, then for so many parties and special occasions for the students, as well as making lunches for employees when Erewhon first started up in Los Angeles, and also all the cooking classes–so many over the years in so many countries. On top of all that there were the dinners for a crowd every night when the students began staying with them. And so, eventually, she delegated the preparation of daily meals at home to others, to student cooks, though she continued to give many cooking classes, both in Boston and wherever she and Michio travelled. After so much intense cooking for so many years, she understandably wanted a change.

"Too yang: Having first learned from George Ohsawa, Aveline leaned towards a rather restricted version of a macrobiotic diet, like her teacher. I think most people who

© Copyright Soyinfo Center 2013

have used the macrobiotic eating plan for any length of time, however much they might appreciate Ohsawa's insights, life and wisdom, feel nevertheless that his dietary approach was too restrictive to be healthful and balanced in the long run. While his recommendations might be helpful as a cleansing diet for certain people for short periods of time, they can produce a tight mental state and even nutritional deficiencies over time. George Ohsawa was an extraordinary man and an extraordinary teacher, and it would be challenging to encapsulate all that he contributed to our understanding of the impact of food on individuals and societies. However, his approach was lacking in sufficient vegetables, variety and sweets, at least for the average American accustomed to a diet heavy in meat, dairy foods, and sugar. Yet something in Aveline responded to his overly yang style and recommendations, (perhaps that was simply all she knew) and though having children loosened and broadened her views, there was still this tendency towards an overly restrictive approach to her own diet for a long time.

"Aveline was not really a student and teacher of macrobiotic principles in the way Michio was. But she had a strong interest in sharing the traditional cooking and food customs of her native land, and she balanced Michio's theoretical teachings with the daily practicalities of feeding her family and teaching her students. She also enjoyed teaching the traditional ways of caring for infants, and sharing the happy sounds and sights of her childhood and adolescence, some of which are included in her books." Continued. Address: P.O. Box 125, Hinsdale, Massachusetts 01235.

13187. **Product Name:** Trader Joe's Organic Soyonaise Salad Dressing [Thousand Island].
Manufacturer's Name: Trader Joe's (Marketer-Distributor).
Manufacturer's Address: Monrovia, CA 91016.
Date of Introduction: 2011. August.
Ingredients: Water, organic soybean oil*, organic sugar*, organic white wine vinegar, organic tofu powder*, organic tomato paste*, salt, miso paste (organic fermented soybeans, salt), organic dehydrated bell peppers", guar gum, organic onion powder*, xanthan gum, organic garlic powder, natural tomato flavor, organic dehydrated garlic, spice. * = Organically grown and processed according to the California Organic Foods Act of 1990.
Wt/Vol., Packaging, Price: 12 fl oz (354 ml) glass bottle. Retails for $1.99 at Trader Joe's (2011/08, Lafayette, California).
How Stored: Refrigerate after opening.
New Product–Documentation: Product with Label purchased at Trader Joe's in Lafayette, California. 2011. Aug. 29 Bottle is 8 inches high with a black neck wrapper. Product is tan in color. Label is light green, black, and white on beige. "Contains no eggs, dairy, or preservatives. " "Best by 26 July 01."

13188. *SoyaScan Notes.* 2011. What ever happened to Global Protein Foods of Valley Cottage, New York, then Newark, New Jersey? (Overview). Sept. 12. Compiled by William Shurtleff of Soyinfo Center.
• ***Summary:*** Talk with Sam Weinreb, founder of Local Tofu, West Nyack, New York. 2011. Aug. 31. Global Protein Foods had been a competitor of his, so he kept track of what they were doing. They were in Newark, New Jersey and they were shut down about 6 months ago for some violations of water and/or health codes. They never went back into business, in part (Sam thinks) because of the earthquake and tsunami in Japan on March 11, 2001. Sam has a daughter who lived in Japan, where she learned how to make kimonos.

Letter (e-mail) from Katie Karkheck, history librarian, Valley Cottage Library, New York. 2011. Sept. 12. "Your question was forwarded to me from the reference desk since I have been keeping the records of local happenings. I first searched our local history clipping files, but found nothing about this company. I did find one OSHA citation from 2001, which can be found here:

http://www.osha.gov/ pls/oshaweb/ owadisp.show_ document? p_table= NEWS_RELEASES&p_id=238.

"It seems that Global Protein Foods' factory moved to Newark, NJ in 2002 or 2003. There seems to be a plethora of citations and an FDA warning letter from Feb. 10, 2011 citing them for lots of health code violations, including dead rodents and droppings near foods. After reading this letter, I have a feeling that this many violations would shut down any food producing company, though I have found nothing confirming this. Here is the link to that 2011 letter: http:// www.fda.gov/ICECI/ EnforcementActions/ WarningLetters/ ucm243397.htm.

"Unfortunately, I have not found a single article stating what happened, and the warning letter was the only thing I found that was recent. It seems that their closing was very quiet. They were not included in the search of over 100 newspapers and journals, nor were they in any of our business directories. I'm sorry I couldn't come up with more info than that."

Note: On 30 Sept. 2011 Katie did find a local newspaper (*Journal News*) article titled "Global Protein may be shut down," dated 25 Oct. 1998. She kindly scanned it and sent it to Soy Infocenter. See separate 1998 record.

13189. Astuti, Mary. 2011. Re: Yayasan Tempe Indonesia (Indonesian Tempe Foundation). Researching a book on black soybeans. Letter (e-mail) to William Shurtleff at Soyinfo Center, Sept. 19. [Eng]
• ***Summary:*** "Yayasan Tempe Indonesia (Indonesian Tempe Foundation) was established at Jakarta on April 11, 1995 and the book of 'Bunga Rampai Tempe' [Anthology of Indonesian tempeh]. was published in 1996 in Indonesian.

© Copyright Soyinfo Center 2013

Indonesian Tempe Foundation was supported by Indonesia's Ministry of Food. I am sorry to tell you that the Indonesian Tempe Foundation is no longer active because (1) there is no support from the government and (2) Dr. Sapuan, the head of this foundation, has retired.

"Through the support of the American Soybean Association (ASA) there is Forum Tempe Indonesia (Indonesian Tempe Forum). I have been involved in Yayasan Tempe Indonesia and Tempe Forum Indonesia.

"I am in the process of researching and writing a book about black soybeans, including the black soybean products such as sweet soysauce, tempe, tofu and crackers. I hope it will be finished by the end of this year." Address: Indonesia.

13190. *Oxygen magazine* (*Shanghai*). 2011. [The work of William Shurtleff and Soyinfo Center with tofu]. Sept. p. 38-41. [1 ref. Chi]

• ***Summary:*** Cover story. This issues contains many articles about tofu. This particular article contains many illustrations by Akiko Aoyagi. A round photo shows Shurtleff and Aoyagi.

13191. Lukoskie, W.M. Luke. 2011. Re: A 2nd update this year on Island Spring in Vashon, Washington. Letter (e-mail) to William Shurtleff at Soyinfo Center, Oct. 10. 1 p.

• ***Summary:*** "All is super here. Lois and I are buying a small farm on Vashon to feed into Island Spring Organics. Plan to start a marketing org to market Vashon Island produce under the Island Spring Organics label. Another long row to hoe but a fun direction.

"We are bringing a third tofu operation under our roof, Sunrice. She takes our flash fried cubes and simmers them in her sauces and markets them to the retail outlets as well as ready to eat meals with tofu cubes and brown rice, chop chae, and kim bop. Started her move in three weeks ago and will be done in December.

"Spent almost a month this year on the crew building and then taking down the airport at Burning Man, my fifth year on that crew." Address: P.O. Box 747, Vashon, Washington 98070. Phone: (206) 622-6448.

13192. Bramblett, Billy. 2011. Re: Work with Seth Tibbott of Turtle Island. Wildwood tofu and soymilk. Letter (e-mail) to William Shurtleff at Soyinfo Center, Nov. 22. 1 p.

• ***Summary:*** Shurtleff suggests that Billy create a version of his song "Tofunction" for "Tofurky." He asks if Billy knows Seth Tibbott, founder and owner of Turtle Island Foods, Inc.

Reply: "Seth is one of my best friends. I first met him back in the early 1990's when we shared a booth at Natural Products Expo West the 1st time Wildwood exhibited there.

"After I departed Wildwood, I worked as a consultant for Seth and helped conceptualize and develop a few products (marinated tempeh strips). I worked at the Turtle Island booth at both Expo West and Expo East for several years, where we won Best New Product of Show three of five years at the West show.

"And, I have also been 'grillmeister' at the Oregon Country Fair's Soyworld Booth (which Seth started 25 years ago) for the past five years.

"Anyway, I will consider a Tofurky song, by the way, do you know why the Tofurky crossed the road? "To prove he wasn't Chicken!! ha ha."

"Yes, brother Seth is an amazing dude, and I visit him in Trout Lake every year or so. We also make sure to play golf, along with his brother, Bob, on the Monday after Expo West each year.

"On the old label issue... You are probably talking about the one that says, "UFO TOFU," yes? Boy, I would love to have a mint condition copy of that as well. As you may remember I am a palindrome freak and named our tofu "UFO TOFU." (and our soymilk was called "YO SOY").

"I still have a Michael Pierce designed t-shirt somewhere that has a whole depiction of our original tofu set up, including the grinder, cauldron, paddle, press and curding tank along with cubes of tofu floating about, and says "UFOTOFU" with the old Wildwood logo at the bottom. I will make a copy and send it to you unless you already have one."

"Its great trading soy stories with you.–B-Love." Address: Marin County, California.

13193. Heck, Wolfgang Rainer. 2011. The organic tofu industry and market in Germany (Interview). *SoyaScan Notes.* Nov. 25. Conducted by William Shurtleff of Soyinfo Center.

• ***Summary:*** On 25 Nov. 2011 four of the leaders of Life Food GmbH visited Soyinfo Center to discuss tofu. They were: (1) Wolfgang Rainer Heck, managing director and shareholder. (2) Alfons Graf, co-managing director. (3) Stefan Hauck, General Manager Research & Development (4) Lukas Heck, son of Wolfgang; he works part-time for the company and has just passed his Abitur in Germany. He plans to continue his studies.

Biovista is the organization in Germany that gathers and sells statistics on the general organic market.

The organic soyfoods industry is the one that Life Food GmbH is in and the one that Wolfgang knows best; it does not include all tofu makers in Germany, such as Firma Berief (in Bochum). The largest firms in the industry, in descending order of number of tonnes of tofu made per year, are: (1) Life Food GmbH (Freiburg). (2) Tofutown.com / Viana. (3) Firma Kato (Kassler Tofu, in Kassler. They sell to 60 big supermarkets; a brand of Annatura). (4) Albert's Tofu Haus. (5) Sojafarm (Lothar Stassen; also makes for Christian Nagel). (6) Lots of Tofu (located near Freiburg; they coagulate their tofu with the Kombucha, a culture which contains a symbiosis of Acetobacter (acetic acid bacteria) and one or more yeasts.

© Copyright Soyinfo Center 2013

All the companies in the organic tofu market make about 6,000 metric tons (tonnes) of plain tofu. Life Food GmbH (Taifun brand) makes about 70% of this tofu. They buy about 2,000 tonnes of organic soybeans that are not genetically engineered and from this make about 4,200 tons of plain tofu. 25% of this tofu is sold as plain tofu and 75% is sold as specialty tofu products (*Tofu specialitaeten; weiter verarbeitet*) [prepared soyfood products]. Where is their tofu sold? 48-52% is sold in Germany, followed by 14-15% in France, 12% in Italy, 10% in the U.K., 4-5% in Switzerland, and 6% in 11 other countries. They started to sell their tofu outside of Germany in about 1996, starting in France followed by the U.K.; now they sell their tofu to 11 countries outside of Germany.

Life Food's turnover (sales) has been growing at the rate of 10-12% a year for the past 15 years (i.e. since 1996). After the BSE [mad-cow syndrome] crisis, the demand for their tofu was so high they could not fill it.

On 25 Nov. 2011 Wolfgang R. Heck, Stefan, Alfonse, and Wolfgang's son Lukas, who has just completed his Abitur), visited Soyinfo Center from 9 a.m. to 4 p.m. Address: Managing Director, Life Food GmbH.

13194. *SoyaScan Notes.* 2011. Chronology of Soyfoods Center's summer intern and employment program, with photos (Overview). Nov. 29. Compiled by William Shurtleff of Soyinfo Center.

• ***Summary:*** * = Workers but not college summer interns.

1. 1984 Irene Yen $4.50/hr. She called to ask if we had any job openings. We said "no," having never considered the idea. After we met her and saw such a fine person and extraordinary talent, we changed our minds. She began work on June 21. Two color photos writing at desks in Aug. 1984. (a) Upstairs plywood desk with curtains drawn to show back hillside and 8 file-card boxes (each 5½ by 12 by 4 inches deep) filled with 3 by 5 inch lined white file cards. (b) In downstairs guest rooms editing chapters and checking bibliographic references in *History of Soybeans and Soyfoods* book. Later photo, Oct. 1990, cooking at stove in Atlanta, Georgia.

2. 1985 Tony Jenkins $6.00 + incentives up to $11.50. Two color photos: (a) Typing on keyboard with computer at Bill's main desk; turning around to look at camera. (b) Standing with his younger brother at their home; Tony wearing a Stanford, brother wearing a Cal T-shirt.

3. 1985-86 Sarah Chang (fall & winter) $5/hr. *Claire Wickens, 1985-87, 1989. Color photos show: (a) 1990 June 21. Sitting at desk with electric typewriter in Office #2; file cabinets and scale in background. (b) 1991 April 19. With kids Tina and Tim Wickens; birthday cake on table. (c) 1991 April 26. Standing with Kazuko Aoyagi in kitchen of Shurtleff home, each holding a glass, with fridge and hallway bookshelf in background. (d) 1994 Dec. Black and white photo of Claire and husband Jim with backpacks in New Zealand. They backpacked around the world.

4. 1986 Laurie Wilmore $5/hr.

5. 1987 Alice Whealey $5/hr.

6. 1988 Simon Beaven $6/hr. Two color photos. (a) Portrait photo in 1987 wearing tuxedo at Northgate High School in Walnut Creek. (b) 1993 Sept. 5 in living room in living room of Shurtleff home in Lafayette with Joey Shurtleff leaning on Simon's knee and Matthew Rowley in foreground.

7. 1989 *Elinor McCoy (Jan-April, $12.00). *Pat McKelvey (April 24, $12.00).

8. 1990 Ron Perry $9.50. Color photo of summer 1990 dressed in tuxedo.

9. 1991 Walter Lin $9.50. One color photo of 16 Nov. 1989, dressed in v-neck sweater, white shirt and tie, leaning against tree. Two color photos of 30 Aug. 1991 showing Walter and Bill Shurtleff standing in front of white Dodge van in Soyfoods Center's driveway.

10. 1992 *Dana Scott Jan-July. Ron Perry, June (prep for NAL trip). Two color photos of June 1992 showing Bill and Ron Perry seated on bench in back yard of Soyfoods Center having lunch together, with wall and ivy-covered hill in background. *Alex Lerman Oct. 1992.

11. 1993 Jeremy Longinotti.

12. 1994 John Edelen (May-Aug). Color portrait photo (1994) of John in coat and tie. Christmas photo of John's parents, brothers and sister, and 2 grandparents. Page from 1994 California Water Polo brochure with photo and description of John–a great athlete.

13. 1995 John Edelen (Jan-Oct).

14. 1996 Lydia Lam $9->$10. *Gretchen Muller.

15. 1997 Joyce Mao $9->$10. *Luna Oxenberg $9.50 (Oct. 1 to Dec. 31, Krishna). *Joelle Bouchard.

16. 1998 Justine Lam. Hurdler. Freshman at Cal. Start May 26. $9.50 -> $12.00. Works 4 days/week, Mon. off. 9 to 4:30. 30 min lunch. She accomplished a lot and taught me a lot. Main project: Creating a keyword for each soybean variety (SBV) introduced before 1924, then designing a keyword check, running it, finding the earliest record containing that keyword, and filling in a form for each variety. We now have 109 SBV- keywords. The earliest is 1891. Justine is the first Soyfoods Center intern who looks first to the Internet/Web for the information she desires. She is very skilled at using it, and does some nice projects for SC at her home.

16A. Cheryl Ishida (mother), Christopher, and Catherine do volunteer work at Soyfoods Center and Cal Library from time to time. Two color photos (May 1998) show the three standing by trunk of liquid amber tree near Soyfoods Center driveway.

17. 1999 Justin Hildebrandt. Cal. Start June 1. $10.50.

18. 2000 Michelle Chun. Start June 21. $13.00. Worked 3 hours/week since Sept. 30, 1999. Excellent typist. Summer: Started June 1 at two days/week. From Aug. 1, after DVC

© Copyright Soyinfo Center 2013

class, 3 days, Tues., Wed., and Thurs.

19. 2000/09. Alison Fruman. Last day 2001 Jan. 18. Checking all books in SC bookshelves–only.

20. 2000/10. Olga Kochan. Campolinda. A wonderful person. Start Oct. 7. One day/week (Sun.) for 3 hours, 11-2:00. During summer 2001 works Sat. and Sun. 3 hours each. 2001 Jan. 1, rate increase to: $10.50. 2001 Sept. 1. Rate increase to $12.00. After 2001 Sept. 11 attack I am unable to find her replacement, so she very kindly continues on for 9 more months, until 26 May 2002, start of summer.

21. 2001/01. Michelle Leung. Takes Alison's place checking SC books.

22. 2001/05 Ryan Browne, Freshman at Harvard Univ. Works one day/week. Extremely talented and nice. $12/hour. Earns most money teaching tennis each day. Mom is Lydia.

22a. 2001/09 to 2002/05. Olga Kochan–see above. Then from May 2002 to Aug. 2003 she helps SC greatly and generously to find early Russian-language documents and to translate them into English. Then she enters college as a freshman at U.C. Berkeley (Cal).

23. 2002/05. Loren Clive. Speaks good French. Works one day a week, 3 hours a day. Then first summer with no intern.

24. 2002/09. Marina Li. She called to volunteer the very day I was about to send out Help Wanted ads. Works one day a week. Last day 2003 May 23. Very creative, fine values. Has difficulty with computer work. For rest of 2003 helps from time to time with sorting, then have lunch together. Color photos: (a) On Mills College brochure (Oct. 2001) of Marina and 4 other students in Institute for Civic Leadership. (b) With Bill Shurtleff (April 2003), with Soyfoods Center in background. (c) With coworkers in Berkeley gardening project.

25. 2003/10. Loren Clive. One day a week for 7 hours/day. $13/hour. First 90 min is clearing Bill's soy in-box. Rest of time is for entering records and abstracts from *Vegetarian Messenger,* Jan. 1887-March 1889.

26. Rowyn McDonald, a Stanford student. 2004 June 15 to Sept. 3. Rowyn transformed our business. She was instrumental in our starting to publish books on the Web and in starting to learn Adobe PageMaker. She reformatted all the chapters in our History of Soybeans and Soyfoods book and sent them to Paul and Gail King, who put them on the Web. Her work this summer has been outstanding. She has an extraordinary intellect, is a fast learner, has excellent focus and concentration, is a fast typist, accomplishes a great deal each day, makes few mistakes, and has become very skilled at asking questions and receiving the answers in a selfless, clear way. She was a gift from God, the perfect match for the job. Also, I learned more from her about using computers (esp. the Web and WinWord) than I have from any other intern.

27. Casey Brodsky. 2007 Oct. 26 to 2008 June 6. Sophomore at Campolinda. Four main projects: (1) Make a record for every article in *Time* magazine that mentions tofu. I notice how *Time* has mostly negative things to say about this new, healthy food; protecting the status quo. (2) Add the exact date (to the nearest day) to thousands of records of various types. Upgrading the YR field is the main reason we changed a record number of BIBLIO records (22,159) this year. (3) Add info to the Abstract field for about an hour each Friday. (4) Complete the AD field for hundreds of letters in our library; e.g., "Typed, with signature on letterhead." She also found that many letters have been misplaced.

28. Hanna Woodman. 2008 June 17 to July 16. Sophomore at Acalanes. She is a fast and accurate typist, and likes typing projects, so (1) She typed in many abstracts and contents. (2) Completed the AD field for hundreds of letters in our library; e.g., "Typed, with signature on letterhead." She also found that many letters have been misplaced. (3) Entered every chapter with heads for the AOCS monograph on the soybean. (4) Added missing exact dates in the AD field. (5) Sorted documents in boxes for WRS to file. (6) Highlighted reference sheets in preparation for Bill's trips to Cal libraries.

29. Elizabeth Hawkins. 2008 July 22 to Aug. 21. Senior at Campolinda. Main projects–to enter: (1) Natto book bibliography by Hesseltine and Kato. (2) Lots of abstracts and quotations. (3) Soybean in Asia proceedings + A and B level heads. (4) All unentered articles from *Bluebook Update* (Golbitz). (5) Mian Riaz book on soy. (5) Oak Smith's letters. When I am gone she always works on my computer.

30. Michelle So. 2008 Oct. 9.

31. Talat Mirmalek 2009 Jan/Feb. Sorting. "Talat" in Farsi means "rays of the sun." Being a young Muslim lady, she was not allowed to work here unless her sister (Taliah) or father were in the same room with her.

32. Molly Howland. 2009 June 15 to July 31. Senior at Campo.

33. Jacqueline Tao. 2009 Aug. 3-25. Biosciences library at Cal. Then Sept. 10 to Oct. 14. Boudewijn Aasman 2009 Oct. 28 to 30 Dec. Unfit for the job.

33. Jacqueline Tao. 2010 Jan. 21 to June 10.

34. Jessie Kathan 2010 June 14-Aug. 24. Biosciences libe. Campo.

35. Jacqueline Tao. 2011 Jan. 2 to June 3.

36. Lynn Hsu, 2011 June 11 to July 20.

33. Jacqueline Tao. 2011 Sept. 9-15.

37. Brooke Vittimberga 2012 Feb. 19 to present.

13195. Gong, Sasha; Seligman, Scott D. 2011. The Cultural Revolution cookbook: simple, healthy recipes from China's countryside. Hong Kong: Earnshaw Books. 157 p. Illust. Photos (by Charles Cohan Fischl). Portraits. 25 cm.
• ***Summary:*** China's "Great Proletarian Cultural Revolution" started on 16 May 1966 when Mao Zedong urged students to rebel against a "repressive" educational system. The true targets, however, were so-called "capitalist-roaders" in the

© Copyright Soyinfo Center 2013

Communist Party such as Liu Shaoqi and Deng Xiaoping, whom Mao believed still harbored capitalist ideas.

"In 1969, millions of Chinese teenagers were forced from their homes in the city in order to live and work in the countryside as part of China's Cultural Revolution [1966-1976]. The work was backbreaking and rations were tight, but Sasha Gong has fond memories of learning to make simple, delicious country cooking" (from the publisher).

This colorful book is packed with authentic colorful illustrations (each titled and dated) created during the Cultural Revolution and sidebar stories (usually with a photo) about events that happened during this time. It is also an honest retrospective about one of the most disastrous chapters in China's post-1949 history.

Contents: "A revolution is not a dinner party" (overview of the Revolution and the book). A personal story (about Sasha's memories of the Cultural Revolution; a biography). The Cultural Revolution: A culinary history (there was almost never enough food to go around). A chronology of the Cultural Revolution (1966-1978). Some utensils you'll need. On portions, menus and table settings. Chapters of recipes– starting with "Vegetables and tofu" (p. 18-41).

On pages 39-40 is a recipe for "Old pockmarked granny's tofu" (Mapo Doufu) with the story in a sidebar of a Beijing restaurant by that name.

On page 40-41 is the story of Mao's beloved [stinky fermented] tofu with this story: "In 1958 Mao returned to his native Hunan province and visited Huongongdian, a famous restaurant in the city of Changsha. He ordered an infamous bean curd dish he had enjoyed there as a young man, discovered that it was as tasty as ever, and happily proclaimed it so. The staff recognized a good opportunity when they saw it. After Mao's visit they painted his quote on the wall. The strong-smelling bean curd at Huongongdian smells foul, but tastes delicious." Address: Washington, D.C.

13196. Iino, Maki. 2011. O-tofuya-san [A tofu maker / shop]. *Kagaku no Tomo.* Nov. 28 p. [Jap]

• ***Summary:*** This monthly magazine, titled "Friend of Science," is published for Japanese school children. This delightful November issue, written and illustrated by Maki Iino, follows a mother and her son as they visit the neighborhood tofu shop early in the morning and see the fresh tofu products in the window where the wife is selling them. The tofu maker kindly shows the boy every step in the process of making soymilk, then tofu, and preparing deep-fried tofu pouches (aburagé), cutlets (atsuagé) and tofu burgers (ganmodoki). The text is written entirely in hiragana (no Chinese characters) so young students can read along as they look at the large, charming color illustrations.

A smaller 8-page insert gives additional details. Address: Japan. Phone: 05 62 18 72 78. E-mail: info@soy.fr.

13197. Nordquist, Ted. 2011. Re: Trip to Mchinji, Malawi, to learn and teach about making tofu and soymilk. Letter (e-mail) to William Shurtleff at Soyinfo Center, Dec. 7. 1 p.

• ***Summary:*** "From November 12-26 Anne-Marie [Ted's wife] and I volunteered to visit a 'soy plant' in Mchinji, Malawi that used a soy cow to produce soymilk. We instructed them in the proper way of cleaning and soaking the soybeans, the time to cook, sterilizing the bottles and hot filling to extend the shelf life of the soymilk (which was going bad the day after production). We also showed them how to make tofu, mix the tofu with the okara, vegetables and spices and then deep fry 'tofu balls' in cooking oil for sale the same day.

"Unfortunately I had only 500 grams of calcium sulfate with me from California and this was used in the demonstrations. Now we are looking for a good source of calcium sulfate and or magnesium chloride in Africa, hopefully South Africa that they can buy. Even if they make one batch of tofu per day they will only need about 12 to 15 kg of coagulant per year. So one 25 kg bag will last them a long time.

If you have a contact for buying calcium sulfate or magnesium chloride in Africa, please send this information to:

Lauren Day, Southern Africa Program Coordinator, Farmer to Farmer Program.

13198. *SoyaScan Notes.* 2011. Why seitan has not become as popular as tofu as a source of plant protein in the USA (Overview). Dec. 21. Compiled by William Shurtleff of Soyinfo Center.

• ***Summary:*** 1. Historical: Tofu has been a basic food in all countries of East Asia for at least 1,000 years. This includes China, Japan, Korea, Vietnam, and Indonesia. So wherever people with ancestry from these countries live, tofu is made. It has no class affiliation and is inexpensive, so it is eaten by people of all classes and income levels from these countries. And it appears in virtually all cookbooks for these cultures. So there has long been a large demand for tofu in the USA.

2. Tofu manufacturers in the USA: Since 1900 there have been plenty of tofu shops to supply the demand. Between 1905 and 1975 at least 528 different Japanese-owned tofu manufacturers were established in the USA. Probably at least that many Chinese-owned tofu makers also started.

3. Seitan historical: It was invented in about 1962 by George Ohsawa, the macrobiotic teacher, together with Mr. Kiyoshi Mokutani, the owner of a small soy sauce company (Marushima shoyu) in Japan. So it has a very short history. And originally (starting in 1969) it was all imported from Japan.

4. Macrobiotics: Seitan has been limited mostly to macrobiotic community. Wikipedia says incorrectly that seitan is another name for wheat gluten. Not true. Seitan is a product made from wheat gluten just like tofu burgers are made from tofu.

5. Evolution of the meaning of the word: Seitan was originally a salty seasoning, not a protein source. But over the years the meaning of the word gradually changed; it came to refer to any wheat gluten seasoned with soy sauce.

6. Not widely made in the USA since not much demand.

7. Very expensive compared with tofu, in part because not widely available so had to be sent by UPS or mail.

8. Wasteful process. It is made from wheat by discarding all but about 14% of the original wheat and using only the protein. Or, if you start with "vital wheat gluten" (a powder) the quality of the seitan is not nearly as good as if you start with whole wheat flour.

9. Process causes pollution: Dumping all of that starch into any sewage system pollutes the system and usually leads to either a fixed fee or a fine on the manufacturer.

10. Few books about seitan, and no much press coverage or information. Only 3 books about seitan (with "seitan" in the title) have ever been published in English: Jacobs 1987, Wingate 1988, and Bates 1993. Just the opposite with tofu.

13199. *SoyaScan Notes.* 2011. Chronology of major soy-related events and trends during 2011 (Overview). Dec. 31. Compiled by William Shurtleff of Soyinfo Center.

• ***Summary:*** June 27–William R. Shurtleff, founder and director of the Soyinfo Center (Lafayette, Calif.), is selected as the 2011 recipient of the Association of College and Research Libraries (ACRL) Science and Technology Section (STS) Oberly Award for Bibliography in the Agricultural or Natural Sciences for his bibliography "History of Soybeans and Soyfoods in Africa (1857-2009): Extensively Annotated Bibliography and Sourcebook."

July–Sprouted tofu starts to become more popular. Sprouting soybeans, among other things, before grinding them to make tofu, inactivates phytic acid.

Note. This is the earliest English-language document seen (Jan. 2013) that mentions sprouted tofu.

Almonds milks become increasingly in both supermarkets and natural- and health food stores.

Aug. 1–Lightlife Foods (owned by ConAgra Foods, Inc.; Omaha, Nebraska) fires all of its brokers. A week later they fire the sales people who managed these brokers. This is consistent with their moves over the past 3 years to consolidate management of the brand in Omaha.

The budget of the Weston A. Price Foundation (run by Sally Fallon) has increased 10-fold over the past decade. This gives them more power to criticize soy and to promote their agenda which includes raising and eating animals. All this information and their funding sources are on the website.

13200. Nutrition & Nature. 2011. Faire le choix du végétal. Pour chacun, pour demain [Choose plant-based nutrition. For each one, for tomorrow]. Revel, France. 16 p. Illust. 18 x 18 cm. [Fre]

• ***Summary:*** One the cover is a lovely young lady, looking upwards, with her eyes closed. Behind here are rows of trees growing in green grass. In 2008 Soy acquired Céréalpes [Cerealpes]. In 2011 they both became Nutrition & Nature. Websites: www.soy.fr. www.cerealpes.fr. Contents: More of plant-based, more of life. Eat better and live better. Good for people, good for the planet. A table shows: To produce 1 kg of protein. (1) Tofu compared to beef. 5 times less water. 15 times less agricultural surface. 10 times less carbon dioxide emissions. (2) Soymilk compared with cow's milk: 3 times less water, 7 times less agricultural surface, 5 times less carbon dioxide emissions. Source: ENSA [European Natural Soyfoods Association].

To grow soybeans in southwest France is not the end of the world. Our "Tofu in Africa" project. With Céréalpes, organic takes the accent of Provence (accent provençal). A path without a trace toward quality. To be engaged for the environment on all levels. Address: Chemin de l'Horte, 31250 Revel (near Toulouse), France. Phone: 05 62 18 72 78. E-mail: info@soy.fr.

13201. Giblin, Karen; Seibel, Mache. 2011. Eat to defeat menopause: The essential nutrition guide for a healthy midlife–with more than 130 recipes. Cambridge, Massachusetts: Da Capo Press. xviii + 237 p. Foreword by Dean Ornish, M.D. Illust. Index. 23 cm. [26 ref]
• ***Summary:*** An excellent book for the lay reader by a woman and a man with top credentials in the field. Includes 130 recipes. On page 3 is an "Ode to Soy and Hot Flashes," by Mache Seibel, M.D.; it says that soyfoods reduce hot flashes and allow women to sleep at night.

Chapter 4 (p. 23-28) is "Understanding soy foods: The perfect food for menopause." Its contents: Introduction. Soybeans and foods made directly from them (gives a basic description of each): Soybeans (incl. edamame, dry soybeans, canned soybeans), soy flour, soy powder (very similar to soy flour except the soybeans are cooked before they are ground), soy protein isolates, textured vegetable protein (TVP), soy grits, soy sprouts. Soy milk and products made from it: Soy milk, okara, yuba, soy cheese. soy yogurt, tofu. Fermented forms of soy: Tempeh, natto, miso, soy sauce.

Most of these soyfoods are used in the recipes in this book. Tofu is used the most frequently.

Dr. Ornish's remarkable Foreword begins: "Many people tend to think of breakthroughs in medicine as a new drug, laser, or high-tech surgical procedure. They often have a hard time believing that the simple choices we make in our lifestyle–what we eat, how we respond to stress, whether or not we smoke, how much exercise we get, and the quality of our relationships and social support–can be as powerful as drugs and surgery, but they often are. Often, even better.

"For more than thirty years, I have directed a series of studies showing what a powerful difference changes in diet and lifestyle can make. My colleagues and I at the nonprofit Preventive Medicine Research Institute showed, for the first time, that many diseases, including heart disease, prostate cancer, diabetes, and hypertension, are often reversible, and thus largely preventable.

"We used high-tech, state-of-the-art measures to prove the power of simple, low-tech, and low-cost interventions. We showed that integrative medicine approaches may stop or even reverse the progression of coronary heart disease, diabetes, hypertension, obesity, hypercholesterolemia, and other chronic conditions. We also published the first randomized controlled trial showing that these lifestyle changes may slow, stop, or even reverse the progression of prostate cancer, and may affect breast cancer as well.

"Our latest research shows that changing lifestyle changes our genes in only three months–turning on hundreds of genes that prevent disease and turning off genes and oncogenes associated with breast cancer and prostate cancer, as well as genes that cause heart disease, oxidative stress, and inflammation. We also found that these lifestyle changes increase telomerase, the enzyme that lengthens telomeres, the ends of our chromosomes that control how long we live. Even drugs have not been shown to do this." Address: 1. President and founder of the Red Hot Mamas, Bridgewater, New Jersey; 2. M.D., Prof. of Obstetrics and Gynecology and Director of the Complicated Menopause Program, Univ. of Massachusetts Medical School. He lives in Boston, MA.

13202. Hester, Kathy. 2011. The vegan slow cooker: simply set it and go with 150 recipes for intensely flavorful, fuss-free fare everyone (vegan or not!) will devour. Beverly, Massachusetts: Fair Winds. 224 p. Illust. (color photos). Index. 24 cm.
• ***Summary:*** The index contains 24 entries for tofu, 9 for tempeh, two for seitan (p. 21-22, using homemade seitan), and one each for Soy chorizo black beans stew (with "½ package {6 ounces, or 170 gm} soy chorizo, p. 62), and for soy or coconut creamer (nondairy creamer and milk, p. 15).

A "slow cooker" is exactly the same as a "Crock Pot"–but the latter is a brand name. For many recipes, below the recipe name is printed "Soy-free. Gluten-free." Address: Durham, North Carolina.

13203. Hever, Julieanna. 2011. The complete idiot's guide to plant-based nutrition. New York, NY: Alpha. A member of Penguin Group (USA) Inc. xiv + 338 p. Index. 24 cm. [35 ref]
• ***Summary:*** This is a book about "eating a whole-food, plant-based diet." This diet is described and compared with a vegan diet, vegetarian diet, and plant-based diet (p. 4-5). The author concludes this section with this interesting observation: "When you think about it, although veganism and vegetarianism are plant-based diets for the most part, they're defined on what they *exclude* from your diet. Part of what makes the plant-based diet unique is that it defines the composition of what *is* included instead of what *isn't."*

The author discusses soy in Chapter 7, "Controversy clarified" in several sections (p. 93-95): "Soy confusing," "Is soy safe?" and "Are genetically modified organisms okay?" She lists the various soyfoods and then gives the following advice: "Soy can be part of a plant-based diet. For safe soy consumption:

"1. Consume soy from whole-food or minimally processed sources–soybeans, tofu, tempeh, miso, soybean sprouts, and soy milk.

"2. Use soy in moderation–less than 3 servings pr day, where a serving is 1 cup soy milk or ½ cup soybeans, tofu, or tempeh.

"3. Avoid processed soy products, like soy protein isolates (found in protein drinks and bars, meat analogues, cereals, meat replacement products, and other processed items).

"Consume only organic" soy products or those that have not been genetically engineered.

© Copyright Soyinfo Center 2013

We agree.

Plenty of basic information about soyfoods is given in Chapter 18, "The plant-based kitchen"–especially in the section "Plant-based substitutions" (p. 226-32) which includes subsections about: "Egg replacements," "plant milks," "Mock meats" (many are highly processed), "Tofu, tempeh, seitan" (good, nutritionally rich, alternatives), "Un-cheeses" (most are highly processed), miso (a versatile source of meaty flavors, but use in moderation since it has a high salt content).

The word "tofu" appears on 33 pages in this book, "miso" on 20 pages, "soybeans" on 19 pages, "tempeh" on 18 pages, "soy milk" on 11 pages, "edamame" on 5 pages. "soybean sprouts" on 1 page.

Examples of tofu recipes: Plant-based sour cream (with "14 oz. silken tofu." p. 241). Veggie tofu scramble (with "1 {12-oz} pkg. firm or extra-firm tofu, drained and crumbled," p. 248). Marinara corn cakes (with "3 oz. extra-firm tofu, thinly sliced," p. 275). Sweet cream dip (p. 280).

The book contains a good Glossary (p. 291-301) which includes definitions of miso, phytoestrogens, plant-based milks, prebiotics, protein combining, tamari, tempeh, tofu, umami, vegan, vegetarians, whole grains, whole-food, plant-based diet. Address: M.S., R.D., C.P.T. [Certified Personal Trainer], Los Angeles, California.

13204. Jamieson, Alexandra. 2011. Vegan cooking for dummies. Hoboken, New Jersey: Wiley Publishing, Inc. xx + 364 p. Illust. (some color). Index. 24 cm.

• ***Summary:*** A fun, well written, and very informative book. Contains more than 160 healthy vegan recipes. The index contains 22 entries for tofu, 14 for tempeh, 11 for soy foods, 5 for seitan, 3 for edamame, 2 each for milk replacements (soy milk), miso, soy sauce, soy yogurt, and 1 for TVP (textured vegetable protein).

Also mentions macrobiotics, mochi, raw foods diet, sea vegetables, sesame oil, sesame seeds, etc. Address: Professionally trained vegan chef and board certified holistic health counselor (CHHC), and member American Assoc. of Drugless Practitioners (AADP), New York City.

13205. Mangels, Reed; Messina, Virginia; Messina, Mark. 2011. The dietitian's guide to vegetarian diets: Issues and applications. 3rd ed. Sudbury, Massachusetts: Jones & Bartlett Learning. xi + 596 p. Illust. Index. 23 cm. 1st ed. 1996. 2nd ed. 2004. [342 soy ref]

• ***Summary:*** Chapter 9, "Soyfoods" (p. 249-89) is excellent. Its contents: Introduction. Isoflavones: Isoflavone content of soyfoods, isoflavone absorption and metabolism. physiologic properties of isoflavones. Asian soy intake. Nutritional composition of soybeans and soyfoods: Protein, fat, carbohydrate, vitamins, minerals (iron, zinc, calcium). Chronic disease prevention and treatment: Coronary heart disease (cholesterol reduction, lipid-independent effects), cancer (breast cancer, prostate cancer), osteoporosis, alleviation of menopausal symptoms, renal function. Controversies: Soy infant formula, cognitive function, thyroid function, fertility and feminization, breast cancer patients, allergy. Intake recommendations.

Table 9-1 (p. 251-52), "Chemical and common names and molecular weights (MW) of the 12 isoflavone isomers found in soybeans" includes the following foods and USDA IDN: Tofu: Firm, firm #2, regular, silken firm, extra firm, extra firm #2. Natto. Soymilk, Miso, Tempeh. Soybeans, raw, US food grade. Soybeans, cooked. Soybeans, raw, Japan. Soybeans, raw, Korea. Soybeans, raw, Taiwan. Soybeans, green, cooked. Soybean curd, fermented. Soymilk skin (foo jook / yuba, cooked). Soymilk skin (foo jook / yuba, raw). Isolated soy protein. Soy protein concentrate: Water washed, alcohol washed. Soyflour: Full fat, defatted.

The Glossary of vegetarian foods (p. 447+) includes: Soyfoods: Edamame, soybeans, soy flour, soymilk, soy nuts, tempeh, textured vegetable protein (TVP, a brand name), tofu. Meat analogs: Commercial meat substitutes, seitan. Milks and dairy analogs: Nondairy cheese, nondairy frozen desserts, nondairy milks, sour cream substitute, yogurt. Address: 1. PhD, RD, LDN, The Vegetarian Resource Group, Maryland; Univ. of Massachusetts, Amherst, Mass.; 2-3. Nutrition Matters, Port Townsend, Washington; Loma Linda University, Loma Linda, California.

13206. Norris, Jack; Messina, Virginia. 2011. Vegan for life: everything you need to know to be healthy and fit on a plant-based diet. Cambridge, Massachusetts: Da Capo Press. xix + 283 p. 23 cm. Index. [219 ref]

• ***Summary:*** Perhaps the single best book on the subject. Very well written by two experts in the field, concise, and carefully documented.

"The practical companion to Eating Animals: a definitive nutrition guide for vegans, including everything from guidelines for making a healthy transition to a vegan diet to kickstart plans, nutrient-dense menus and essential information hot-button issues like soy, protein, and B vitamins"- Provided by publisher.

Contents: Introduction: Going vegan for life. 1. Understanding vegan nutrient needs. 2. Protein from plants. 3. Vitamin B-12: The gorilla in the room. 4. Calcium, vitamin D, and bone health. 5. Fats: Making the best choices. 6. Iron, zinc, iodine, and vitamin A: Maximizing vegan sources. 7. The vegan food guide. 8. Making the transition to a vegan diet. 9. A healthy start: Vegan diets in pregnancy and breast-feeding. 10. Raising vegan children and teens. 11. Vegan diets for people over fifty. 12. Plant food advantages: Health benefits of a vegan diet. 13. Managing weight, heart disease, and diabetes. 14. Sports nutrition. 15. Is it safe to eat soy?: Introduction, soy nutrition, soy isoflavones, soy and health (heart disease, soy and bone health, hot flashes, breast cancer, prostate cancer, cognitive function, thyroid function,

© Copyright Soyinfo Center 2013

reproductive health and feminization), how much and what kind of soy to eat. Table: Isoflavone, protein, and calorie content of soyfoods. 26. Why vegan? Vegan resources. A quick guide to cooking grains, beans, and vegetables. Metric conversion chart. Acknowledgments.

In Chapter 8, "Making the transition to a vegan diet," a section titled "Soyfoods primer" has the following contents: Introduction, soybeans, edamame, soynuts, soymilk, tofu, okara. Fermented soyfoods: Tempeh, miso, natto. Western soyfoods: Textured vegetable protein (TVP (R), made from defatted soy flour), isolated soy protein.

Concerning soyfoods throughout the book: The word tofu is mentioned on 52 pages in this book, soymilk on 47 pages, soyfoods on 45 pages, tempeh on 33 pages, soybeans on 25 pages, isoflavones on 11 pages, miso, soynuts, and soy sauce on 10 pages each, soy flour and textured vegetable protein on 7 pages each, isolated soy protein on 4 pages, edamame, natto and TVP on 3 pages each, okara on 2 pages, and soy protein concentrate on 1 page. Address: 1. RD, cofounder and president, Vegan Outreach, San Francisco Bay Area, California; 2. MPH, RD, Port Townsend, Washington.

13207. Soyana. 2011. Elegí diariamente una vida sana [Daily guide to a healthy life (Leaflet)]. Buenos Aires, Argentina. 2 p. 20 cm. [Spa]

• ***Summary:*** Printed front and back with a color laser printer. Contains many color photos. On the front is a photo of the company's three products sold under the Soyana brand: Tofu, deep-fried tofu cutlets, and Strawberry soy yogurt. Discusses: What is tofu? Organic products. How to store tofu. Plus several tofu recipes.

Company e-mail: info@soyanaalimentos.com.ar. Company website: www.soyanaalimentos.com.ar. Address: Av. Libertador 2690 8ºB, Olivos 1636, Buenos Aires, Argentina.

13208. Vos, Heidemarie. 2011. Passions of a foodie: An international kitchen companion, A to Z. Durham, Connecticut: Eloquent Books. An imprint of Strategic Book Group. 598 p. 26 cm.

• ***Summary:*** Best-selling author Heidemarie Vos recounts a fascinating story and her journey of putting together the world's first cross-referenced book regarding food-using more than five languages. This cookbook [which contains no recipes] will become an invaluable resource for your kitchen (from the publisher).

The Introduction states: "There are 7922 entries, 300,017 words... based on my own travels to 6 continents and over 40 countries." Note: This is somewhere between a dictionary (in 5+ languages) or brief encyclopedia of food names. It immediately sets the language and cultural context for each word, and ends with broader or narrower terms. For example: "Aburage: Japanese cooking = A fried bean curd... Also see Bean Curd." It contains more than its share of errors and outdated terminology and spellings. It is a "print on demand" book.

It includes: Aburage. Adzuki beans [sic], Agé. Aji Nomoto [sic], see monosodium glutamate. Aka miso–red bean paste. See Miso. Almond milk. Almond oil. Arachide / Arachis. See Peanut. Arachide oil. See Peanut oil. Bean cake, fermented: Chinese cooking, "fu yu" [fermented tofu]. Bean curd, pickled: Chinese cooking. [What is it?]. Bean curd cheese, red: Chinese cooking, "nam yu" or "nan yu" [red fermented tofu]. Bean curd: Oriental cooking. Known as "tofu" in Japanese or "dow fu" in Chinese. Pressed bean curd is "dow fu kon" [doufu-gan, pressed tofu].

"Bean curd, dried [yuba]: Chinese cooking = Known as 'tiem jook' [sweet yuba] / 'fu jook pei', other dialects are 't'ien ch'u' and 'fu pi chi'. It is soybean milk residue, which comes in a thin rectangular sheet or is curled into round sticks. They are usually tan- or cream-coloured with a shiny, glossy smooth texture."

Bean paste, red: Chinese cooking. "Made from soybeans and sugar mashed together then fried and dried out until it resembles sand." Used to fill Chinese moon cakes. Bean sauce, Chinese: Chinese and Asian cookery. Many types including "min see jiong" or "do bahn jiang." Incl. "Black bean sauce." Beans, black: Chinese cooking. "A pulse [sic] known as 'wu dow' / 'wu do' [Black soybeans].

"Beans, black salted fermented: Chinese cooking = Known as 'dow si / dou shih,' used as a vegetable or spice. Known as 'wu dow' dried and salted. They are dull, wrinkled, moist and tender and have an appetising fragrance, yet are pungent with a tangy salty flavor. Used as a flavor enhancer in dark sauces." Keep covered so they do not dry out... "Must be rinsed prior to use to avoid over-salting. Store in a closed jar in the refrigerator after opening."

Bean sprouts: Asian cooking [small green are mung bean sprouts, large yellow soybean sprouts]. Benne seeds: Sesame seeds are used to make sesame oil and tahini (sesame paste). Black beans, Chinese. Also known as 'salted black beans' or 'fermented black beans' and as 'dow si' (Chinese). China beans: See Soya / soy bean. Earth nut: See Peanut. Edamame: Japanese cooking. "Fresh soybean in or out of the pod." Firm tofu. Fried tofu puffs. Ground nut: See peanut. Hard tofu. Hydrogenated fats. See fats. Miso. Naahm yu: Chinese term. "A cheesy-looking bright red bean curd sauce" [Red fermented tofu]. Nam yu / Nan yu: See Bean curd cheese, red. Shoyu: Japanese cooking. Japanese soy sauce. Soy bean / Soya bean. *Glycine soja,* also known as "'China beans,' 'Butter Beans' and 'Haricot de Java' (French)." Soy bean jam / condiment. See Main see. Silken tofu. Silken firm tofu. Soya oil. Soya sauce. Soy sauce. Tamari soy sauce. Tofu. Tofu tempeh [sic].

Not listed: Amazake. Lecithin. Daitokuji natto. Fermented black beans. Hamanatto. Kudzu. Kuzu. Meat alternatives. Meat substitutes. Milk alternatives or substitutes. Milk, nondairy. Milk, soy. Natto. Seitan. Soy

© Copyright Soyinfo Center 2013

milk. Soy protein concentrate. Soy protein isolate. Soy protein, textured. Tempeh. Teriyaki sauce. Yuba.

Errors: Arame is not also known as "Hijiki." Address: Port Elizabeth, South Africa.

13209. Shapira, Hillel. 2012. Re: Update on work with soyfoods. Letter to William Shurtleff at Soyinfo Center, Jan. 5. 1 p. Typed, with signature.

• ***Summary:*** "Greetings from the Beautiful Mantiqueira mountains, S.E. Brazil. It's been maybe 12 years since I wrote you from Pune.

"We are now busy setting up our new company, Sabias Comidas Comércio e Industria Ltda. We are planning to soon start production of Tempeh, Tofu and rice cakes."

In 2009-2010 we experienced our own private tsunami of sorts. Our flourishing, fast-growing business in Pune, India is now abandoned, run over by an utterly head to toe corrupt government and administration, I have been thrown out of India, 'black-listed' and am unable to return (detrimental to national security!) and Kairava had to leave soon afterward as well while trying to sell our property–now grabbed by some real estate goon with political support.

"We managed to sell (at a "fire sale") most of our equipment and gifted some of our smaller production systems to Wahid, our loyal production supervisor who dared to take on the challenge and now proudly produces on a smaller scale Tofu and Tempeh and salted vegetable pickles sold under the name of Rainbow-Foods (the Dakini brand has been stolen by some north India based business group).

"It seems arrogance is the rule in India these days–and despite being officially invited in the 1990s to start our business in India. It seems the Indian government is now hoping to attract bigger businesses, and are busying brushing out (by denying visas) by the back door the smaller investors. My own government, whose ambassador to India had promised to help, refused eventually... There was a billion dollar weapons deal about to be signed.

"So we ended up penniless refugees. After two months in Bangkok's Chinatown [Thailand], I managed to walk across the India-Nepal border, to get secretly to Pune to sell some equipment, find new homes for the cats and dogs, and ship out 500 kg of books and personal stuff. We were hoping to ship out a container of equipment but under the circumstances that was not possible! I have been told we could write a book about it all, but we prefer to practice our food production arts. So here we are starting from near scratch again, waiting (for 8 months) for the Brazilian customs to release some small scale equipment we imported from China and Korea. We've already got our Brazilian visa's in order!

"We made a down-payment on a long-abandoned property on the edge of Itamonte town, right on the federal road BR-354. We fixed up a semi-ruined house, and renovated the 110 square meter structure (it was a bar before) at one corner of our compound to be ready as a production hall. It now has a well insulated incubation room (1.80 meters tall x 280 meters square) and tiles all around.

"30 minutes ago we received a 500 kg consignment of very good looking, vegetable type organic soybeans from the south of Brazil. We still have a long way to go to furnish our new place–prices for equipment here are stupidly expensive and we are out of funds by now. But the views are fantastic, the air clean and peoples friendly. And we've got a good organic garden coming up in our large back yard.

"We observed the incredible meat / dairy / sugar diet in Brazil and we are sensing that many people are looking for alternative. Good Tofu is available in the Japanese centers in Sao Paulo but nowhere else. We are located 3 hours from both Rio and Sao Paulo and are hoping to send there Tempeh and Rice cakes while Tofu, being perishable, we will market only in the towns nearby.

Update: Feb. 21. "We are having hard time finding magnesium chloride in Brazil–with its 7000+ km coast line and numerous salt producers. Most of them just pump the bittern back to sea. There is one producer in the State of Bahia who supplies in 40% concentration tanker loads for industrial purpose. We are not sure about the grade of his product and are not set to store large tanks. Based on our research to date and to our surprise, we have not been able to locate any solid / flaked producers in Brazil and I suspect all of the (very expensive) magnesium chloride that is available here is imported from China. The cheapest magnesium chloride we managed to find to date from a supplier to the veterinary and dairy industries (they sell good soaps and disinfectants too); it is selling at (wholesale) about r$14 (US$8.00) for half a kg pack. We now have a good stock of clean food-grade calcium chloride to get us started until we sort out the magnesium chloride supply. We may one day need to import it.

"Here in Brazil we are waiting for our equipment still laying in customs–mills and small customized steam injected 50 litters cookers system, stainless steel and pressurized! from China and rice waffle machines from Korea. Maybe after carnival, they say. Also our industrial electric connection is still due.

"We still paint and paint and clean and fix, at the very end of our bank balance we just do it mostly our selves. We are a bit cut of from the world so to speak–learning Portuguese slowly.

"We make two batches a week of nice magnesium chloride coagulated Tofu, 1.1 kg Soya, small blender two 5 liter pots for cooking and one 10 liter pot for collecting the milk and coagulating, cold filtration of the pulp–some of which goes into our gluten-free breads and cakes and the rest for garden fertilizing. 2 to 2.3 kg Tofu and two large cups soya milk for our two workers (us) all in 2-3 hours–cleaning included. Good and down-to-earth experience for us who got accustomed to 100 kg an hour production by a well trained

© Copyright Soyinfo Center 2013

crew. And these two pots are Zen masters in disguise–just waiting for the mind to drift... and then (ZEN) they boil over! Only full attention works here."

"Yours always, Seemo ++ Greetings from Kairava."

A photo shows the front of the Dakini Foods compound in Pune, India. On this spot, in April 1997, commercial tempeh production was first introduced to India. Address: RD BR-354, Coqueiros (CX Postal 13), Itamonte, MG C.E.P. 37466000 Brazil.

13210. Barber, Linda. 2012. Re: Work with tofu and natto in Japan. Letter (e-mail) to William Shurtleff at Soyinfo Center, Jan. 9. 3 p.

• ***Summary:*** Introduction: Linda Barber Pike was born and raised in Milwaukee, Wisconsin. She graduated from the University of Wisconsin-Stout with a bachelor of science degree in Home Economics Education, specializing in urban education (1971). After teaching for 6 years in Milwaukee, she accepted a position at Kobe College teaching Oral English and Home Management. It was during this time that she became interested in Japanese cuisine and indigenous foods, especially tofu, and natto. After returning to the United States in 1982, Ms. Pike earned a Master of Science degree in Vocational Education from the University of Wisconsin-Stout. Her thesis, "Development, presentation, and evaluation of an instruction package on tofu for high school students" provided a model for introducing tofu to teenagers in a family consumer class setting.

Linda started a family with Marvin Pike in 1985 and moved to Indianapolis, Indiana. She returned to teaching in 1991 as a preschool teacher where her son, Dallis, was attending. In 1996 she accepted a position at Carmel High School, Carmel, Indiana in the Family and Consumer Science Department. She enjoyed teaching Foods and Nutrition, Foreign Foods, Child Development, and directed the on-site preschool that offered high school seniors the opportunity to teach 3 and 4 year olds. From 2005-07, Linda also enjoyed being an adjunct instructor for Ivy Tech Community College, Indianapolis, teaching child care licensure classes. Ms. Pike retired from all teaching in 2010, except for mentoring Dallis while he is earning a PhD in educational studies. Linda still enjoys reading books on tofu, sampling soy foods at Trader Joes, and serving her friends healthy snacks that contain tofu hidden in some form.

For most foreigners living in Japan, an English-Japanese dictionary was the most used book and carried everywhere. For me, it was *The Book of Tofu.* It wasn't long after I arrived in Kobe in 1977 to teach home management skills to the young women of Kobe College, that I discovered tofu. A low teacher's salary, and lack of western food stuff prompted me to shop in neighborhood markets. Tofu was always there. And it was always cheap. But, I had no idea how to prepare

© Copyright Soyinfo Center 2013

it. I needed a book in English that would help me use this food stuff.

Lucky for me, I discovered *The Book of Tofu.* I was drawn to the illustrations and recipes that used just a few ingredients. But what really sold me was the recipe for Tofu Ice Cream. A Wisconsin girl had to have her ice cream, but in Japan, it was expensive and not readily available.

My Japanese students and friends were amazed when I put tofu in a blender and added sugar and cocoa. They were amazed when I pulled it out of the freezer and scooped it into bowls. The were delighted with the taste. For me, it was the beginning of a soy food journey that continues to this day.

My students and I had faculty teas with tofu cookies, cheesecake and quiche. Soon these parties became news and I was asked to do short cooking segments at various T.V. networks. Making western-style recipes from a Japanese food such as tofu or natto was considered an oddity. I traveled all over Japan making T.V. appearances. For a tofu and natto company I developed recipes for their products and starred in their commercials to promote these products. I designed food layouts and recipes for their company's brochure. Various printed media companies were also expressing interest in recipes and ideas that used tofu and natto in western ways. I began giving magazine interviews about western ways to use Japanese soy foods. It was after I learned how to make tofu in my kitchen, that the Kobe YWCA asked that I teach classes to their Japanese members. My adult Japanese students did not know how to do this, as they purchased their tofu from supermarkets and small markets, much like Americans would buy bread from the grocery store and not know how to make bread from scratch.

I had fun creating western style recipes for tofu and natto and found it easy because of my background in food science. I simply used tofu in recipes where a protein like eggs was included. Because natto tasted like aged Wisconsin cheese to me, I included natto in dishes that used cheddar. One of my last projects included co-authoring a cook book, *The Tofu Gourmet* (in English), published in Japan. It is still available all over the world.

Besides recipes, *The Book of Tofu* became a travel guide for me. I wanted to visit the places, restaurants, and shops that were highlighted in the book. Mentioning *The Book of Tofu* and its author, Bill Shurtleff, I was welcomed in these shops and allowed to photograph how the foods were made. When asked to develop recipes for a company, I asked for a tour of the company and documented the manufacturing process. The photos of the natto factory are examples of such a tour.

I enjoyed meeting other Americans who were discovering the joys of tofu and natto. During one of these visits, Richard Leviton from Soy food magazine asked me to write an article for the journal. *Natto: The Taste of Japan* was written and printed in 1982. Natto was everywhere in Japan, but because of it's unusual texture was not liked by many Westerners. There was a lack of ideas on how to use it in recipes that might appeal to Americans. The article was my attempt to inspire Americans to incorporate natto in their meals.

I learned about the tofu making process by working alongside a tofu master in a small neighborhood tofu shop in Kyoto. This experience was arranged by the soy food trade newspaper, *Toyo Shinpo.* During my short apprenticeship I was intrigued by the meditative experience of making tofu. I carried that feeling of being present in my daily chores. Washing dishes were never the same for me. Seeing the craftsman's tools, many handed down from father to son, were honored and cared for. Today, my mother's well worn wooden spoon looks different to me. It is not just an old spoon, but something that holds a family spirit and it imparts that spirit into everything I stir.

I left Japan in 1982 to go back to school. I wrote my master's thesis on introducing tofu to high school students. Tofu ice cream and tofu spice cookies were the first ways my students experienced tofu.

When I taught preschool in the 1990s, I put my tofu making tools in the home making center, and served tofu carrot cake at snack time. The little ones learned how to say "Ohiyo" [Ohayô = "Good morning" in Japanese] and how to use chopsticks. They folded origami, and made fish kites. They dressed up in mama-san aprons and walked in tabi socks.

I returned to the high school classroom, this time in Carmel, Indiana, to teach foods classes. It was fun to expose young people to new tastes, culture and soy foods. For a special experience, the Japanese language teacher and I divided our classes. She taught my cooking class some Japanese phrases, and I taught her students how to prepare something with tofu.

The "way of tofu" changed my life, career, and my student's lives. Tofu not only nourished my body, but it nourished my spirit and experiences. And yes, *The Book of Tofu* is still on my bookshelf, complete with scribbles, and stains, right next to the not so worn English-Japanese dictionary. Address: 10868 North Cornell St., Indianapolis, Indiana 46280.

applications, June 3-8: A unique opportunity to gain hands-on experience & practical knowledge about soybeans (Leaflet). Urbana, Illinois. 8 leaves. 28 cm.
• ***Summary:*** Announces a 5-day course ($1,500 of 1 attendee). The program now has 26 corporate sponsors (listed alphabetically): ADM, Clarkson Grain, Clextral Group, Crown, Devansoy, French, General Mills, Harvest Innovations, House Foods America Corporation, Illinois Soybean Association, Insta-Pro, NEI–Natural Enrichment Industries, NPI = Natural Products, Inc. ProSoya. SavInd (formerly Bar N.A.). Silk. The Solae Co., Soyatech, Soyfoods Association of North America. Soyjoy. SunOpta. USB. USSEC. Wenger. WISHH. World Soy Foundation. Course highlights. Who should attend? Course schedule (preliminary agenda). Sponsors. Address: National Soybean Research Lab. (NSRL), 1101 W. Peabody Dr., Urbana, Illinois 61801. Phone: (217) 244-1706.

13213. Soyatech, LLC. 2012. Soya & Oilseed Bluebook 2012: The annual directory of the world oilseed industry, online at www.soyatech.com. Bar Harbor, Maine: Soyatech. 332 p. Jan. Comprehensive index. Advertiser index. Statistical conversions. 28 cm.
• ***Summary:*** This is the 6th year in a row that the *Bluebook* (a $95 value) has been sent free of charge to qualified industry members. On the cover is a large color photo of two cupped Caucasian hands holding yellow soybeans against background of rows of green soybean plants. Above this main large photo are six small color photos related to various other oilseeds such as sunflowers and palm oil kernels.

This edition of the *Bluebook* contains 16 fewer pages than it did last year. The oilseeds covered in this book are (alphabetically): Canola, coconut, corn, cottonseed, flaxseed, hemp seed, jatropha, linseed, palm, peanut, rapeseed, safflower, soya, sunflowerseed–the same as last year.

On the inside front cover is a color ad from Omega-9 Oils. On the first page is a full page color ad from SunOpta with this title: "Can you tell the difference between a bean that's best for soymilk versus a bean that's best for miso? We can." Other full-page color ads in the front are from Intertek, Loders Croklaan North America, Anderson Internal Corp. (expeller press), AOCS, French Oil Mill Machinery Co. and Insta-Pro International.

On the rear cover is a full page color ad from Natural Products Inc. (NPI, Grinnell, Iowa), makers of innovative ingredients for soymilk and tofu to cakes and cookies. They are the makers of Scotsman's Mill ingredients.

Chris Erickson is CEO. Mark Dineen is president. Keri Hayes is publisher and events director. In the Foreword, Joe Jordan (General manager and *Bluebook* content director) writes about how work began this year to expand the Panama Canal–"the most critical 48 miles in international trade." Its freight-carrying capacity is scheduled to be doubled by the year 2014. Address: P.O. Box 1307, 19 Clark Point Rd., Suite 112, Southwest Harbor, Maine 04679. Phone: 207.244.9544.

13214. Shapira, Hillel. 2012. Re: Hello from Brazil. Wet dehulling of soybeans for tempeh. Letter (e-mail) to William Shurtleff at Soyinfo Center, Feb. 8. 1 p.
• ***Summary:*** "Yes, Kairava is here in Itamonte. Actually she is now making the tofu spread for the breakfast–with fresh cilantro, mustard, olive oil and miso. Decent miso is available in Brazil and we are getting it whole sale from a company called 'Sakura,' both Shiro miso and Aka miso.

"We still make Tofu twice a week with our little 'Electrolux' blender, survival situation!! We hope to get our Chinese mills out of customs soon. I like the book [*History of Soy in South Asia / Indian Subcontinent*] very much. I read pages 13-14 last night. Note that indeed in the first few months of our Tempeh production [in Pune, India] we used to dry hull the Soya but soon after we shifted to the wet hulling method that was producing nicer and easier to digest Tempeh. We will do wet hulling here in Brazil as well. We will keep you posted.

Shurtleff asked in a previous e-mail if Hillel understood his question about what Hillel and the Dalai Lama had in common–"like two milkweed seeds blown by the high Gulf-stream winds, to land in a far-off country." Hillel replies:

"And yes, I did understand your question about the Dalai Lama, only that I did not have an answer. My injustices are rather small in comparison. And yes, I was born on the very year he was forced to leave Tibet. Last 2 year we were experiencing injustice and betrayal and were facing our fears, rage, sadness and loss–moving within, practicing all the observation power that we could manage we can see that so many millions of peoples (and even animals too) suffer too and worse. So we took the opportunity and all this energy to try and go beyond our limits, not fall back on a predictable pattern and settle for security. And here we are, in spite of all our doubts and fears. It has not always been easy and there are the rough times too, yet we always found the way and been provided and guided. The mystery of life and–we feel great gratitude. in Indian mythology the god of destruction Shiva is destroying the old to make way for the new creation."

"Yours always, Seemo." Photos show: (1) A dinner celebrating one year in Brazil. Hillel is the man on the left and Kairava is the woman in the middle. Address: RD BR-354, Coqueiros (CX Postal 13), Itamonte, MG C.E.P. 37466000 Brazil.

13215. Planes, Carlos. 2012. Re: History of Soyana, June 1987-2011 (Part I). Letter (e-mail) to William Shurtleff at Soyinfo Center, Feb. 17. 4 p. [Spa]
• ***Summary:*** This is a chronology and history of Carlos' work with tofu in Argentina. Carlos was born in 1955.

June 1987: First production of tofu at home for family consumption. Carlos' wife gave birth to their first child, a

© Copyright Soyinfo Center 2013

daughter named Vata, in 1987. They went to the countryside (outskirts of Buenos Aires) so they could have a natural childbirth. At that time he first started to make tofu for his wife and himself. He tried to buy tofu in this part of Argentina but he couldn't find any.

Carlos has no idea how many companies made tofu in Argentina before he did, but there have been Japanese communities in Argentina for a long time, there have been Chinese communities for the last 20 years, there are lots of Chinese restaurants in Buenos Aires and they serve tofu.

August 1987: Construction of the first production system in Tortugitas, a suburb of Buenos Aires (40 miles from downtown Buenos Aires), Argentina. The equipment included an adapted manual rice mill, a pot, a colander with cotton cloth and a small wooden forming box.

As a coagulant, I tried lemon juice, magnesium sulphate or magnesium chloride. I began to offer the tofu to some friends and a few natural health stores, mainly specialized in macrobiotic foods. I made from 10 to 20 units of 300 g per week.

Note: Carlos first got interested in macrobiotics in about 1984. In 1983 he had been in San Francisco and Oregon, where he visited a lot of organic farms and even one tofu shop–Sunbow Farms, in Corvallis, Oregon, owned and run by Mia Posner and Harry McCormick. He was an economist by training and several friends with whom he traveled were ecologists. Carlos got interested in tofu through macrobiotics and through the influence of Tomio Kikuchi, a Japanese macrobiotic teacher from Sao Paulo, Brazil. When Mr. Kikuchi was in Argentina there was a big lunch and Carlos' tofu was served for lunch. For these original tofu products, Carlos didn't even have labels; he sold the tofu in bulk in a pail filled with chilled water. He would deliver it to the store, which would put up a sign that said "Tofu (Queso de Soja)."

January-March 1988: I made the decision to devote full time to this activity, which meant leaving my previous profession. I associated myself with a colleague who was already making rice bread. We designed and built a bakery and tofu system on his property facilities. The manufacturing technique remained the same, only it had a slightly larger scale: we built a hand press for filtration and a larger forming box, adapted an engine to the grain mill and purchased an aluminum pot of 50 liters.

June 1989: We started the legal part of the venture, almost a Kafkian story. When the settlement was approved for food production, I started the approval of tofu as a food, which at this time (and still today) was not included in the Argentine Food Code.

In the nearly three years of work, sales reached 200 units per week, which were marketed in health food stores in Buenos Aires. In those days the word "tofu" was quite exotic. Many store's owners learned of their existence when we got to offer. The only widely known soy product was (and still is) 'milanesas de soja,' a vegetable version of the most popular meal in Argentina.

We try to market it in the chain Carrefour, which allows us to offer and do a tasting at one of its stores. Silvia, my wife, along with a renowned chef who was teaching a few courses in the store, made a great tasting. But we could not sell our products.

We tried a 'tofu pate' (tofu, oil, soy sauce and spices). He had some acceptance, but its weakness was that it stayed fresh only a week, and it became very difficult to sell because of the little time. Mainly it was sold to individual customers who came to the factory.

In those years I could access some literature on the subject, among which was a photocopy of *Tofu & Soymilk Production,* which became my bedside book, and consulting book for years. All these readings substantially changed my perspective on the potential of soy products.

Note: 30 July 1990–Carlos received certificate from the Ministry of Health of Buenos Aires. The product was "Pasta de soja" [Tofu]. The brand was "Soyal" (a brand which Carlos never used). The address was Libertad 4576, Florida, Vicente Lopez (a suburb of Buenos Aires).

December 1990: I made the decision to transform the expreiment I was doing into a venture, and work toward the creation of a company. Because society does not work properly, rent a deposit on my own dedicated exclusively to the production of tofu.

The first goal was to change the production system. All the literature, along my little experience, convinced me that the most appropriate system was a continuous process, at least to obtain soy milk, hot grinding and avoid soaking the soybeans.

"I intended for a second stage vacuum packed tofu. Along with the necessary equipment, I added the replacement of aluminum pots, plastic pipes and wooden forms for stainless steel fittings.

First drawings of the system included two colloid mills in tandem, a small horizontal decanter centrifuge, and a stainless steel pot for cooking.

I got a family loan that allowed me to rent a warehouse and build the necessary equipment.

1991/1994: By March 1991 most of the equipment that I had designed was incomplete or inadequate. The stark reality was that the money was gone, and I decided to restart production in conditions very similar to the previous period.

I remember this stage as full of difficulties and challenges: without financial resources, with long working hours and with a very low level of sales that were not enough to sustain the venture, most decisions were made with the view of the minor damage.

I can rescue from this period significant progress:

* Finally it was accepted the request for approval of tofu, which must be marketed as "Soybean Paste". (Nelly, my mother, chemistry profession and at that time worked at the National Institute of Industrial Technology, presented

© Copyright Soyinfo Center 2013

a paper with all the historical and nutritional background of tofu (much information was taken from your book) to get accepted into the Food Code. The request was never considered.) Years later, the formation of Mercosur led to the creation of a regional food code, where the tofu is listed.

* The actual registration of the mark "Soyana".

* It is made the first work on tofu in the Association of Nutritionists, concluding that its main virtue is to be a functional food.

In an attempt to improve sales, I developed 'Tofu en escabeche' (fried tofu, carrots, onions, vinegar, oil, salt and spices) packed in glass jars. Sales were very low and could not sustain the effort of processing, so finally stop elaborate.

I continued with the construction of equipment and early 1994 came into operation two colloid mills and a continuous mill, so the system can be operated as a successive batch process.

It was also a period in which, by trial and error, I learned some skills especially the coagulation of milk (start to use calcium chloride) and how to manage the consistency of the final product.

In mid-1994 I can buy a small vacuum packer. I had to adjust the consistency of tofu for stability in the packaging, but in late 1994 I was selling vacuum-packed tofu. The sales, that were stable in these years, begin to slowly improve.
1995/1996: I changed manual for pneumatic presses, plastic forming boxes for stainless steel.

I made the first purchase of certified organic soybeans. Unfortunately I was rarely able to find the most appropriate varieties, particularly in protein content, which brought many difficulties in coagulation, yield and clogging the fabric.

As the number of customers grew, I could gradually delegate the distribution of the products. I worked on several new product alternatives and finally decided to launch 'Milanesas de soja,' with the expectation of reaching new markets. Continued. Address: Av. Libertador 2690 8ºB, Olivos 1636, Buenos Aires, Argentina.

13216. Planes, Carlos. 2012. Re: History of Soyana, June 1987-2011 (Continued–Document part II). Letter (e-mail) to William Shurtleff at Soyinfo Center, Feb. 17. 4 p. [Spa]
• ***Summary:*** Continued: I designed some basic equipment and did some legal procedures.

1997/1998: I hired the first employee. We worked 3 days a week on tofu and the remaining 2 making Milanesas, most of it private labeled under another brand.

1999/2002: These years were difficult for the country as well as personal, which I do not remember much change. Those were times of survival. The company for which we produce Milanesas stopped marketing his product. Therefore, we interrupted the production of Milanesas.

Only made a 350 gm tofu pack and another 2.2 kg tofu pack for some restaurants.

We started making Tofu Fileteado (spicy fried tofu sheets, marinated in soy sauce).

2002/2004: I was able to incorporate some important advances in equipment, so we started working using a continuous process. Some improvements in the mills allowed the crushing of the soybeans without soaking; this improved the taste of our tofu.

I hired a second employee.

With the support of local universities that made the analysis of okara and whey, we confirmed that the process properly removed trypsin inhibitors.

We started selling two new products: Breaded tofu (sliced breaded tofu) and a okara pudding. Both were on the market only for a short time, because of the same problem: short shelf life.

We built a website (www.soyanaalimentos.com.ar)

2005: A fresh pasta maker was seeking to develop a ravioli filling with tofu and seaweed, with organic certification for export. To provide the raw material we got organic certification of the factory and tofu. The project failed and they could send only one container, but since then I have continued under organic certification.

Our sales now have an upward trend, which has been maintained with some fluctuations to the present. We incorporated new customers (some restaurants, health food stores outside Buenos Aires, stores in Chinatown).

I hired a third employee.

2006/2008: During these years new equipment was incorporated that changed the way we produce:

* A special boiler injected direct steam, so that the cooking was done in stainless steel pots.

* An automatic coagulation system, which standardized times, temperatures and coagulant dosing enabled us to get a more standardized product.

I started developing a yogurt based on soy milk, including legal proceedings. But still I did not feel confident to market the yogurt.

* Our company started participating in some exhibitions and events, generally related to the organic world.

* We began to be suppliers to Wal-Mart.

* We exchanged our packaging machine for a larger one.

2009: I hired our fourth employee.

The soybean harvest of 2008 was very bad, and the very poor quality soybeans brought us big problems in production and shelf life. We began to develop a product with a high protein soybean, non-GMO. We decided to discontinue it when the following year we got acceptable quality organic soybeans.

2010/2011: Vata, my daughter who was born in 1987, began working in our office.

In mid-2011 we closed a contract with a local supplier of organic soybeans, especially made for soy milk and tofu factories worldwide. For the first time since the beginning we had the right raw material.

We started working toward production of soy yogurt:

© Copyright Soyinfo Center 2013

We constructed a minimal equipment, including a cup filling and sealing machine, we increased floor space, an incubation chamber and began small batches of strawberry soymilk yogurt in late 2011. The product was released in November 2011.

My son Benjamin, born in 1991, created a Facebook page to get better communication with consumers.

Note: On 23 Feb. 2012 Carlos visited Soyinfo Center for about four hours. He brought with him a scrapbook full of labels, articles, photos, and other graphics which he gave to the Center. He asked questions about soyfoods in America and William Shurtleff asked him questions about each product, photo, and article shown in the scrapbook. Near the rear are the following large (5 by 7 inches) color photos: (1) Many packages of Soyana Tofu in a plastic delivery container. (2) Many containers of Soyana Strawberry Yogurt in a plastic delivery container. (3) Two large and modern pieces of stainless steel equipment for making soymilk, including a vibrating screen for separating okara from soymilk and a holding tank for soymilk. (4) The soymilk cooker with many pipes. (5) The front of three packages of tofu (regular, firm, and extra firm) made by Sanfu S.A. in a supermarket in Chinatown, Buenos Aires. Taken Feb. 2012. (6) The front of three more (and different) types of tofu made by Sanfu S.A. at the same Chinatown in Buenos Aires. One is named "Tokan" [Pressed Tofu]. Address: Av. Libertador 2690 8ºB, Olivos 1636, Buenos Aires, Argentina.

13217. Shurtleff, William. 2012. Madonna and her macrobiotic diet (Editorial). *SoyaScan Notes.* Feb. 17.
• ***Summary:*** Madonna, the famous singer, has followed a macrobiotic diet for at least the past 7 years. Address: Founder and owner, Soyfoods Center, Lafayette, California. Phone: 925-283-2991.

13218. Shapira, Hillel. 2012. Re: About Wahid Bhandhari and Rainbow Foods in Pune, India. Letter (e-mail) to William Shurtleff at Soyinfo Center, Feb. 21. 1 p.
• ***Summary:*** When Dakini Foods was forced to shut down and Seemo was forced to leave India, he and Kairava gave some of their smaller production systems to Wahid, their loyal production supervisor.

"Wahid started making Tofu (first) and then Tempeh at his new shop (Rainbow Foods) in June 2010. His full name is Wahid Bhandahri and he came to our factory as the daily wage helper of the electrician who was wiring our tempeh incubation room. He was maybe 17 at the time, dropped out of school yet displayed good intelligence, natural curiosity and willingness to learn. It took him time to adjust to our way of working, but he got to really love the work and its challenges. Eventually he was (as you say) my 'right hand' on the production floors.

"I talked with him by phone last Sunday; his wife gave birth to her first child, a baby girl, and he is was very happy. His production is growing slowly and his tempeh is selling real well. He also manages very well tempeh starter production. And he is very proud of his Tofu yields. He does the deliveries mostly himself on his motorbike.

"For his exact production figures I will inquire. I can estimate it at maybe 1,000 kg tofu, 150 kg tempeh and 200 kg salted vegetable pickles a month–not much yet but sufficient to decently maintain him and his family and still keep some savings.

"His address: Rainbow Foods, S.N. 32 Lonkar Vasti, 1st floor, Mundwa Manjri Road, Keshavnagar, Pune 411036 India.

"Is he an experienced businessman? Not at all–but he is fast catching on and his wife is more educated than he so they make a good team.

"What will keep corrupt bribe-seekers from going after him? The corruption in India now runs deep and wide. The system by now is 100% corrupt and he is surely having his share of troubles with all kind of sale taxes and weird health officials; I guess he pays some of them and others he just ignores." Address: RD BR-354, Coqueiros (CX Postal 13), Itamonte, MG C.E.P. 37466000 Brazil.

13219. Shapira, Hillel. 2012. Re: Dakini Health Foods' retail outlet in Pune, in operation from March 2004 to April 2005. Letter to William Shurtleff at Soyinfo Center, Feb. 21. 1 p. Typed, with signature.
• ***Summary:*** A business card from the time shows: The retail outlet was named Dakini's Soymilk Bar & Foods (Sapphire Apartment shop no. 1, Cosmos Bank Lane, Off North Koregaon Park Road, Pune 411 001 India). A venture by Dakini Health Foods Pvt. Ltd. Open from 10 am to 7 pm. Thursday–closed!

"We rented the space near Koregaon Park (Pune) in 2003 and after 8 month preparations we opened around March 2004. We closed for a month holiday in April 2005 (we literally physically collapsed). Not finding the right management for it and electrical and water supply problems getting worse, we decided not to continue, sold the furniture and focused our full attention on the factory. Sales were growing rapidly by then and it was a good decision. But we did miss feeding so many people directly. We felt we gained so much insight from our year in operation that, afterward, business was never the same again–in the best sense!

"The place had a table and 4 chairs inside and 24 seats in the front open space. The place was totally vegan except for one type of very good organic cheese made by a friend in the Himalayas. All milk drinks were soy milk and all yogurt preparations (lassi) were made from soy yogurt. We were producing soya-milk on our pressure cooker system in the factory, but not having a plate heat exchanger, we were cooling it to room temperature in a special jacketed stainless steel tank, then packed it in polyethylene bags which then were put on ice for fast chilling. This worked well and we

managed to get a long shelf life. For yogurt production we were inoculating soymilk at room temperature and then incubating it at 45C. The year we were running the shop we were producing 60-80 kg soy yogurt a week, 200-300 liters of soymilk a week, and about 50 kg tempeh. Tofu production at the time was about 600-800 kg a week and these figures include the supply to all the regular clients except soya milk and soyogurt which were for produced for our retail shop use only.

I attach the regular menu. Beside this menu we had a good changing daily menu on the board. The retail shop had about 300-350 square feet inside and 400 square feet of outside area.

"Opening the place (with bank loans) and running it was very challenging yet we got to meet so many people that we got many very good insights. Indians love soyfoods and the place become kind of a cult meeting place with families driving from Bombay and other cities for lunch at Dakini. The place was run as self-service and takeout.

"The most popular drink was the banana date milkshake and second was the papaya lassi; most popular sandwich was the Tofu Sandwich followed by Tempeh Sandwich. Most popular plate was the Falafel Plate followed by the Humus Plate and Tofu Plate. Soya milk Chai was selling real well at all times and the soy-milk ice coffee was a big favorite on hot afternoons. There was no refined sugar on the premises and sweetening was done with tasty organic liquid cane molasses.

13220. Long, Cynthia. 2012. Re: Crediting tofu and soy yogurt products. Memo Code: SP 16–2012. Letter (e-mail) to (1) Regional Directors, Special Nutrition Programs, All Regions; (2) State Directors, Child Nutrition Programs, All States, Feb. 22. 3 p.

• ***Summary:*** "The *Nutrition Standards in the National School Lunch and School Breakfast Programs* final rule was published on January 26, 2012. The final rule gives schools the option to offer commercially prepared tofu as a meat alternate in the National School Lunch Program (NSLP) and School Breakfast Program (SBP). This provision, which is codified under 7 C.F.R. 2l0.l0(c)(2)(i)(D) of the regulatory text for the NSLP and 220.8(c)(2)(i)(D) for the SBP, allows schools to further diversify the sources of meat alternates available to students and better meet the dietary needs of vegetarians and culturally diverse groups in schools. The provision is effective July 1, 2012.

This memorandum informs State agencies how to credit tofu and soy yogurt products as a meat / meat alternate component in meal planning.
