• ***Summary:*** A rare insight into the European tofu market. The largest tofu manufacturers in Germany, with estimated production statistics, are Soyastern (4,000 kg/week), Yamato Tofuhaus GmbH (3,500), TKW GmbH (3,500), KMK (2,500; a dairy company in Kassel that makes the Hensel brand for Schoenenberger Pflanzensaefte GmbH*), Svadesha (1,500), Tofu Manufaktur Hamburg (1,000), Tiefental Tofuhaus (1,000), Byodo Naturkost GmbH (400), Morgenland Tofu (200), and Atlantis Tofu (200). All of these companies are run by native Germans, none by Asian Germans. The largest tofu company in Europe by far is Heuschen-Schrouff in the Netherlands (40,000). They make tofu, tofu with herbs, and smoked tofu. They are also a major food importer and European-wide distributor, and perhaps the world's largest manufacturer of mung bean sprouts.

Another larger manufacturer in the Netherlands is Linn (Lin) Oriental Products (10,000 kg/week). The big tofu makers in Switzerland are Galactina (3,000; Dr. Peter Speck) and Soyana (3,000; Walter Daenzer). In England: Dragon & Phoenix, Cauldron Foods, Regular Tofu Co., and Paul's Tofu. In France: Société Soy, Sojadoc, and Sojalpe.

Note 1. This is the earliest document seen (Feb. 2013) that mentions Sojalpe, which later became part of Innoval.

Note 2. Schoenenberger is the mother company of Hensel; they do not make soyfoods. Address: Soyastern Naturkost GmbH, Osteratherstr. 26, 5000 Cologne/Koeln 60, West Germany.

8241. Praskin, Laurie. 1987. Recent developments with soyfoods in Guatemala (Interview). *SoyaScan Notes.* Nov. 30. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** El Centro de Soya, the soy dairy at Solola, is up and running as a commercial enterprise. They are making tofu, most of which is sold to Seventh-day Adventist vegetarian restaurants that cater to tourists in Panajachel, Guatemala City and Antigua (a big tourist center and the former capital of Guatemala). In the community of Solola, they spend a lot of time teaching people how to cook with the products, which they offer at a discount to community members. This has spurred a big increase in sales of tofu and soymilk to the community. A new product in 1987 is Paletas de Soya (Soy Sticks or soymilk popsicles) made with their own popsicle machine. The only flavor is chocolate. Two employees and one independent broker with carts sell them. Agostine Xoquic is manager of the dairy. Amado Del Valle is project coordinator of the whole program, including the agricultural parts, the demos, and the dairy. They make soymilk but only for those who bring a container to the dairy.

Amado and his partner Felipe are making tempeh, which is sold to restaurants. The business is still subsidized; Plenty pays the salaries of Amado and Augustine, and also buys new equipment. But profit from the sale of soy products pays dairy employees' salaries and operating expenses. And they do make a little "profit." They are also now running a soyfoods training center/demo program. In Quiche they have

© Copyright Soyinfo Center 2013

a home demo program, and women grow soybeans and make soymilk and tofu at home. The main thing is adding ground soybeans to corn to make tortillas.

After Plenty had to leave Guatemala in 1980, the Soy Dairy continued making tofu and soy ice cream, without outside funding, until 1983. Larry McDermott visited in April 1985 and production started again in mid-1985. Address: 17969 Oak Dr., Los Gatos, California 95030. Phone: 408-353-2649.

8242. Barrett, Mariclare. 1987. Soyfoods almanac. *Vegetarian Times.* Nov. p. 35-38, 40. [3 ref]
• ***Summary:*** An overview and introduction to tofu, tempeh, miso, soy sauce, etc. with summary of some new developments. Photos show Betsey Shipley & Gunter Pfaff, Jan Belleme, Henry Ford wielding axe against trunk of car made of soybeans.

8243. Beverly Soon Tofu restaurant. 1987. November. New soyfoods restaurant or deli. 4653½ W. Beverly Blvd., Los Angeles, California.
• ***Summary:*** Los Angeles Times. Nov. 29. "One of the best Korean meals I've had in Los Angeles. The tofu, so fresh it was like creamy clouds..." The owner is Monica Yi. Address: Los Angeles, California. Phone: 213-856-0368.

8244. **Product Name:** Tofu, Tofu Burgers.
Manufacturer's Name: Diane Froggatt Tofu.
Manufacturer's Address: Post Restante, Anjuna, Bardez, Goa 403 509, India.
Date of Introduction: 1987. November.
New Product–Documentation: Letter from Om Shanti, c/o Lambert, Los Angeles. 1992. Nov. 16. A friend of Om Shanti's named Diane Froggatt [of Australian origin] runs a tofu shop in Goa, India. "For the last 5 years she has been making tofu and tofu burgers out of her home, and selling them to an international community at the flea market, and as a private business... She started to make tofu publicly because of its high demand and its unavailability. It is a small-scale business. She started by using *The Book of Tofu* (1975, Autumn Press)."

Letter (e-mail) from Lisa Camps of Goa. 2005. May 17. In 1982, while in Goa, Lisa met an Australian woman, Diane [Froggatt], who was making her own tofu, because it was not available, and all were tired of Dal (lentils). "I asked her to teach me, and she did... I happily made it for myself..." Diane's story is very sad. She was sick for about 18 months before she died, leaving twin boys (age 8), and another son (age 14) behind. She passed through Goa in the last stages of her illness on her way to Australia, where she died. The boys were looked after by friends and relatives. Diane's tofu shop, which she ran for about 2 years, is still there, run by a local family, making tofu, buying their tofu from us, and open for lunch.

Note: Goa is a former Portuguese possession on the west coast of India about 250 miles south of Bombay. It was annexed by India in 1962, and became a state of India in 1987. The capital is Panaji. It is a small state (1,404 square miles) with a population of about 650,000.

8245. Eden Foods, Inc. 1987. Product description: Eden Foods quality natural foods. 701 Tecumseh Rd., Clinton, MI 49236. 21 p. Plus 6 pages of inserts. Catalog.
• ***Summary:*** The catalog lists the following soyfoods: Edensoy (Original, Vanilla, Carob; shown on page 1. "Edensoy is the best tasting, best selling, best made natural soymilk on the market"), black soybeans (they "have a hearty yet sweet taste. In Japan, black soybeans are always prepared for the New Year's celebration as they are a symbol of health."), organically grown soybeans (usually Corsoy or Amsoy), Eden tekka ("a hearty, nutritious condiment made from hacho miso, carrots, burdock, ginger root, and unrefined sesame oil; 2.8 oz), dried tofu (actually dried-frozen; 5.8 oz), barley (mugi) miso, brown rice (genmai) miso, buckwheat (soba) miso, light (shiro) miso, rice (kome) miso, hacho (100% soybean) miso, natto miso "Kinzanji," shoyu, organic shoyu, low-sodium shoyu, wheat-free tamari, tamari-roasted nuts and seeds wheat free (pumpkin seeds, sunnies [sunflower seeds], almonds, cashews, mixed nuts), and Lima Tempeh.

Some interesting non-soy foods listed in the catalog include quinoa (16.2% protein), kudzu-kiri, kudzu root starch, adzuki beans, mochi (100% brown rice, with mugwort, or with millet), sea vegetables, organic amazake, barley malt syrup, and Lima seitan.

In the spring of 1986, Eden Foods became General Agent for North America for the Lima Company of Belgium. Lima soyfood products include Lima Tempeh. Note: This catalog was still in use in Jan. 1989. Address: Clinton, Michigan. Phone: 517/456-7424 or 800/248-0301.

8246. **Product Name:** Tofu Classics: Mandarin Chow Mein, Creamy Stroganoff, or Shells 'n Curry (Pasta and Sauce Mixes).
Manufacturer's Name: Fantastic Foods.
Manufacturer's Address: 106 Galli Dr., Novato, CA 94949. Phone: 415-883-7718.
Date of Introduction: 1987. November.
Ingredients: Mandarin Chow Mein: Whole wheat Oriental noodles, dehydrated vegetables (onions, carrots, peas, red pepper, green onions, garlic, parsley), corn oil, powdered yellow miso (soybeans, rice, salt), hydrolyzed vegetable protein, whole wheat flour, dried yeast (molasses grown), toasted sesame oil, powdered soy sauce (soybeans, wheat, salt), spices, rice syrup powder, vinegar powder.
Wt/Vol., Packaging, Price: 4 oz (113 gm) paperboard box. Retails for $1.65 (5/90, California).
How Stored: Shelf stable.

© Copyright Soyinfo Center 2013

New Product–Documentation: Note: This product does not contain any tofu; it must be added. Ad in Natural Foods Merchandiser. 1987. Nov. p. 50. "Introducing... Tofu Classics. One pot cooking. Ready in less than 20 minutes." Dec. p. 16. "New Tofu Classics Take You Out of the Kitchen and Around the World." Also run in 1988. Jan. p. 40. Ad in Vegetarian Times. 1988. May. p. 11.

Label sent by Claire Wickens. 1990. May 30. 4.5 by 6.5 by 1.25 paperboard box. Tan, green, orange and red on beige. On the front panel is a photo of a a white plate containing the finished tofu and pasta, plus a small insert photo of a package of water-packed tofu. "Add ½ pound firm tofu. All vegetarian. All natural." On the back is a pastel drawing of a Chinese person carrying two baskets on a shoulder pole by a lake. "One pot cooking. Ready in 7 minutes. Fantastic Foods' *Tofu Classics* are adaptations of favorite dishes from around the world, designed to enhance tofu cookery. We provide wholegrain pasta and a delicious sauce–you add tofu." Inside is a poly bag with short lengths of pasta and dried peas, diced carrots, etc.

Tofu Classics product with Label purchased at Open Sesame in Lafayette, California. 1998. Jan. 10. Mandarin Chow Mein, design copyright 1994. Price: $1.89. Shells 'n Curry, design copyright 1994. Price: $1.89.

8247. Gleason, Jane; Weliwita, S.M.A. 1987. Home and village level soyabean utilization training in Sri Lanka: Accomplishments, constraints and potential. INTSOY/DARP/SFRC, Sri Lanka. 14 p. Unpublished manuscript.
• ***Summary:*** A detailed analysis with many summary statistics. This paper argues that because of the large amount of time and fuel required, and general difficulties of making foods at home from whole soybeans, they will not be widely made there. From 1978 to Nov. 1987 SFRC trainers have directly trained over 30,000 people in soya utilization. Of these, almost 27,000 were trained at outstation demonstrations, while over 4,000 were trained at SFRC.

However, because of processing difficulties and time requirements, it questions the premise that widespread home level utilization of whole soyabean will occur.

The instructors were asked what types of soyafoods are most likely to be integrated into Sri Lankan diets. Soya-fortified kola kenda, a traditional drink made from coconut, rice flour, and leaves of a variety of herbs was most often mentioned as 21 of 48 respondents placed kola kenda in their top three choices. After kenda, the instructors ranked soya-fortified pittu (18), roti (13), snacks (13), waddhi (12), and curry (11) as foods most apt to be part of Sri Lankan diets. Ten respondents stated that soymilk could easily become popular.

The responses of the instructors show that soya will most likely be integrated into local diets through fortification of already popular foods. Many commented that soya flour should be made available for this purpose. Traditional soyafoods from other parts of Asia, for example, tofu in East Asia and tempeh in Indonesia, were not highly ranked as foods easily accepted by Sri Lankans. Only four respondents thought that tofu and none of the respondents thought that tempeh could become important in Sri Lanka.

Table 6 indicates "What characteristic makes soya appropriate for villagers'–Nutrition, 42 respondents; Low cost, 20 respondents; Taste, 5 respondents. Table 7 indicates "Price per unit protein of common foods in Sri Lanka"–Soyabean, 0.04; Chicken, 0.21; Dried fish (fat poor), 0.11; TVP, 0.16. Table 7 also indicates "What constrains soya consumption"–Unreliable supply of soya, 23 respondents; Odd flavour, 22 respondents; Lack of preparation knowledge, 18 respondents; Difficult to prepare, 14 respondents.

Interpretation of the evidence–Three important points can be gleaned from the information provided by the extension workers and the villagers: 1. Thousands of Sri Lankans are aware of the benefits of soya. For the average consumer, the most important consideration when purchasing food is taste, not nutrition. 2. Therefore, soya will most likely be consumed in a form that is already familiar to villagers. 3. It is significant that more instructors consumed TVP than all other types of soya products. Conclusion–The best method of making soya products available to consumers is to work towards greater commercial application of soya utilization technologies.

Training should, therefore, emphasize extension to entrepreneurs. Address: Sri Lanka.

8248. Goldbeck, Nikki; Goldbeck, David. 1987. The Goldbeck's guide to good food. New York, NY: New American Library. xi + 563 p. Illust. Index. 24 cm.
• ***Summary:*** The all-new version of their *Supermarket Handbook*, which originally sold 850,000 copies. Chapter 12 (p. 143-51), titled "Soyfoods: World Class Protein," discusses tofu, frozen tofu, tempeh, soy flour and grits, high-tech soy (soy concentrates and isolates), textured soy protein products. There is also considerable information on soyfoods in other chapters throughout the book: Soy flour (p. 79). Soy nuts (p. 159, 163). Soy milk (p. 184-85). Soy yogurt (p. 190-91, 195). Soy cheese (212, 217-18). Soy protein concentrates or isolates (p. 233, 451, 483, 527). Soy oil (p. 144, 264, 288, 292-93). Meatless burgers and soy sausages (p. 394). Soy ice cream (p. 452-53, 455). Soy sauce (510-11, 515). Miso (p. 511-12, 515). Worcestershire sauce (p. 512).

The section titled "Soy Yogurt" gives a nutritional analysis of cultured Soygurt, made by Cream of the Bean; per 8 oz. it contains 255 calories, 6.7 gm protein, 45.2 gm carbohydrates, 5.3 gm fat, no cholesterol, 20 mg sodium, and 7% of the US RDA for calcium. The text reads: "Those who must avoid milk will be interested in nondairy soy yogurt. A new arrival in natural food stores, this yogurt is made from soymilk and bacterial cultures. Gelatin is added to some brands to maintain the typical yogurt consistency. There is

© Copyright Soyinfo Center 2013

no need, however, for the quality to be compromised by the addition of high fructose corn syrup, isolated soy protein, salt, and several thickening agents, as has been done in at least one brand we have encountered."

The section titled "Soy Cheese" states: "Cheese based on soy milk has recently added a new category of cheese products to the market. In terms of calories, protein, and overall fat content soy cheese competes quite favorably with animal cheeses... It is both lactose- and cholesterol-free and the sodium content is about average for cheese. Note, however, that soy cheese is held together with vegetable gums and will contain either the milk derivative calcium caseinate (in which case it is not dairy free) or isolated soy protein." Page 218 gives a nutritional analysis of Soya Kaas (soy cheese). Per 1 oz. it contains 78 calories, 6.7 gm protein, 5.6 gm fat, no cholesterol, and 168 mg sodium. Address: R.D. 1, Box 495, Woodstock, New York 12498 914-679-8561.

8249. Hasegawa, Kiyozo; Mukai, K.; Gotoh, M.; Honjo, S.; Matoba, T. 1987. Determination of the lysinoalanine content in commercial foods by gas chromatography-selected ion monitoring. *Agricultural and Biological Chemistry* 51(11):2889-94. Nov. [21 ref]

• ***Summary:*** Table 1 (p. 2892), titled "Lysinoalanine content in foods," includes values for various soybean products: The lysinoalanine (LAL) content (in mg per 16 gm of nitrogen) was measured by two methods: GC-SIM (gas chromatography–selected ion monitoring) and HPLC (high performance liquid chromatography). The two values for the soy products are: Soy milk A (0/0), soy milk B (6/14), soy milk C (6/18), wet soybean film (fresh / nama yuba) A (0/0), fresh yuba B (13/16), dry yuba (18/11), fried soybean curd (abura-age = tofu pouches) A (8/6), fried soybean curd B (9/trace).

Note: This is the earliest English-language document seen (Oct. 2012) that uses the term "soybean film" or the term "wet soybean film" to refer to yuba.

Of the samples analyzed, the lysinoalanine content was highest in pidan (fermented egg). Wheat flour-based products (Chinese noodles, pretzels and crackers) and milk products (condensed milk and lactic acid beverages) also contained a significant amount of LAL. Cow's milk, soy milk, soy protein isolate and meat products (ham and Hamburg steak) contained a low amount of LAL. Results confirmed that the low-level LAL formation was possible in foods cooked at home without any alkaline treatment.

Note: The three types of soymilk were purchased from retail stores in Nara, Japan. Address: Dep. of Food Science & Nutrition, Nara Women's Univ., Nara 630, Japan.

8250. **Product Name:** Island Spring Tofu Dressing [Bleu Cheese, Fruit, and Ranch].
Manufacturer's Name: Island Spring, Inc.
Manufacturer's Address: P.O. Box 747, Vashon, WA 98070. Phone: 206-622-6448.
Date of Introduction: 1987. November.
Ingredients: Bleu Cheese: Soybean oil, water, tofu, bleu cheese, distilled vinegar, fructose, salt, modified whey solids, spices, xanthan gum, garlic.
Wt/Vol., Packaging, Price: 12 oz (355 ml) glass jar.
How Stored: Refrigerated.
Nutrition: Per 1 tablespoon: Calories 60, protein 1 gm, carbohydrates 2 gm, fat 5 gm, sodium 120 mg, lactose 140 mg.
New Product–Documentation: Packaging magazine. 1988. April. Labels (all 3). 1987. 9 by 3.5 inches. Synthetic paper. Earth colors on a tan background. Some of the most artistically designed labels seen up to this time. Beautiful! The flavor is written in large 7/8 inch letters at top of label. Below that is "Island (Logo) Spring Tofu Bleu Cheese Dressing. Cholesterol Free. Low Sodium. All Natural. Try something new–Island Spring Bleu Cheese Dressing as sauce on pasta or cooked vegetables; as a party dip for vegetable snacks or chips; as a topping for baked potatoes; as a sauce for fish or poultry; as a sandwich spread. Its great on cold

© Copyright Soyinfo Center 2013

chicken or turkey sandwiches. For free recipes send a self-addressed, stamped envelope to Island Spring Inc." Talk with Luke Lukoskie. 1988. June 3. This is a reformulation and repackaging of their earlier tofu dressing, launched in March 1986.

8251. **Product Name:** Island Spring Organic Silken Soft Tofu.
Manufacturer's Name: Island Spring, Inc.
Manufacturer's Address: P.O. Box 747, Vashon, WA 98070.
Date of Introduction: 1987. November.
Ingredients: Water; Soybeans organically grown and processed in accordance with Section 26569.11 of the California Health and Safety Code; calcium sulfate, a natural mineral; glucono-delta-lactone.
Wt/Vol., Packaging, Price: 16 oz.
How Stored: Refrigerated.
Nutrition: Per 4 oz.: Calories 82, protein 8.9 gm, carbohydrates 2.6 gm, fat 5 gm, calcium 166 mg, phosphorus 120 mg, iron 1.9 mg, thiamine 0,02 mg, riboflavin 0.02 mg, sodium 6.8 mg, potassium 34.4 mg.
New Product–Documentation: Label. 1987. 5.25 by 4 inches. Blue, purple, white, and black. Moon rising over mountains and water, with two herons. "Cholesterol free. Sodium free. High protein. Lactose free. Nutritional and recipe information on back of label."

8252. Johnson, Fred. 1987. Aseptic potentials: A number of products aseptically packaged in other countries could offer sound Canadian opportunities. *Food in Canada* 46(10):24-25. Nov.
• ***Summary:*** Morinaga Nutritional Foods Inc. of Los Angeles, California, reports skyrocketing sales of its tofu products in Tetra Brik cartons. From October 1984 to September 1985 it sold 1.9 million packages. From October 1985 to September 1986, sales almost tripled. Aseptic packaging of soups, sauces, puddings, vegetable oils and dressings, soybean milk, and tofu is detailed. Address: Toronto.

8253. Legume, Inc. 1987. Quarterly report.
• ***Summary:*** Gross sales for the quarter were $370,000 and net income was minus $69,000. The same quarter last year, sales were $397,000, with a net loss of $267,000. Thus sales have dropped 7%, but losses have been cut dramatically, by about 75%. Sales "decline is attributable to the reduction in promotional activities during the period in New York supermarkets due to the lack of profitability associated therewith. During the 3 months ended Sept. 30, 1987 the company focused its efforts on introducing its new tofu chocolate bars to the specialty food trade and on reducing overhead and selling expenses. The company curtailed its extensive R&D activities..." Current liabilities decreased this quarter from $342,000 to $202,000, but they are still large. Address: New Jersey.

8254. **Product Name:** Mori-Nu Silken Firm Tofu: Soybean Curd.
Manufacturer's Name: Morinaga Nutritional Foods, Inc. (Importer). Made in Japan by Morinaga Milk Co. Ltd.
Manufacturer's Address: 5800 South Eastern Ave., Suite 270, Los Angeles, CA 90040.
Date of Introduction: 1987. November.
Ingredients: Water, soybeans, isolated soy protein, gluconolactone, calcium chloride.
Wt/Vol., Packaging, Price: 10.5 oz (297 gm) Tetra Brik Aseptic carton.
How Stored: Shelf stable.
Nutrition: Per ½ package: Calories 90, protein 10 gm, carbohydrate 4 gm, fat 4 gm, sodium 50 mg. Protein is 15% of USRDA.
New Product–Documentation: New Label. 1987. Shows a sun in clouds with three white squares. Colors are blue, green, and red on white. Recipe: Dill Cucumber Dip. "Our Guarantee. If you are not completely satisfied with Mori-Nu Tofu, we will replace the product. Send the empty carton, store name, location, your name and address to Morinaga... For tofu recipes: Send self-addressed stamped envelope to the above address."

• ***Summary:*** Domestic Japanese soybeans were analyzed for their suitability for making "packed silken tofu," crude protein solubility and yield of acid-precipitated protein from defatted soy flour and reactability with calcium.

The protein content was high in Akishirome and Fukuyutaka varieties. The fat content was high in Tamahomare, Akishirome, and Akiyoshi varieties. And the total sugar content was high in Tsukuizairai, Tamahomare and Akiyoshi varieties.

"For packed silken tofu coagulated with glucono delta lactone, hard gels were obtained with the Fukuyutaka, Okushirome, Akishirome, and Toyosuzu varieties." Crude protein content in soy milk was highly correlated with the hardness of the resulting tofu. Address: 1. Nippon Beans Co., Ltd. Research Lab., 4-18 Shinmachi-1, Hoya-shi, Tokyo 202, Japan; 2. National Food Research Inst.

8258. *Plenty Bulletin* (*Summertown, Tennessee*). 1987. Belize nutrition education. 3(4):3. Nov.
• ***Summary:*** Over the summer Majeedah Rahman, project director, trained representatives from every district of the country in basic nutrition and techniques for preparing tasty, high-protein soyfoods, including tofu and soymilk.

8259. Tofu Shop (The). 1987. This holiday season, make it Tofu Turkey (Leaflet). Arcata, California. 1 p. 28 cm. Single sided.
• ***Summary:*** Handwritten, with four illustrations: (1) The Tofu Shop, on pillars and with a tree growing overhead, at the edge of the ocean (lower left). (2) A clip-art illustration of a large turkey with tail fanned and near-side wing extended (upper left). (3) Corn plants growing in a field (upper right). (4) Santa Claus in traditional costume.

"- mmm delicious. * Stuffed, basted, baked. * Ready to eat or reheat. * Great leftovers.

"That's right folks! This year you can save the bird and eat it too! No bones about it. Special order one of our

8261. **Product Name:** "Old Fashioned" Tofutti Rugalach (Non-Dairy Bite-Sized Cinnamon-Raisin Pastry Rolls).
Manufacturer's Name: Tofutti Brands Inc. (Marketer).
Manufacturer's Address: 1098 Randolph Ave., Rahway, NJ 07065. Phone: 800-225-0332.
Date of Introduction: 1987. November.
Wt/Vol., Packaging, Price: $19.95 plus shipping for over 1 lb.
How Stored: Frozen.
New Product–Documentation: Joan Michel. 1987. New York Jewish Week. Nov. 20. "Traditional Jewish touches add zest to Thanksgiving banquet." Pronounced RUG-uh-luh, this is a fantastic bite-size dessert. "These cholesterol-free, lactose free, butterfat-free wonders are sensational melt-in-your mouth pastry rolls, a perfect finale for this Thanksgiving meal." Brian Winzeworth. 1987. Canarsie Courier (Brooklyn, NY). Nov. 19. "Quest for the perfect dessert." "Soy beans also constitute an important ingredient in Rugelach, a new kind of mini-sandwich..." Made with the company's newly developed tofu cream cheese, it is pareve and contains no dairy products. Long Island Jewish World. Nov. 26. Spelled "rugalach."

8262. *Vegetarian Times.* 1987. Brother Ron's friendly foods. Nov. p. 42-44, 46, 48-50, 52. [1 ref]
• ***Summary:*** Brother Ron Pickarski, a Franciscan friar and a world class vegetarian chef, won bronze medals in both the 1980 and 1984 Culinary Olympics. Now he is testing recipes to enter in the 1988 Olympics, and writing his first cookbook titled "Brother Ron's Friendly Foods." Brother Ron is believed to be the only vegan who is also a certified executive chef, a title shared by 1,400 other American chefs. Most of his favorite recipes included in this article feature soyfoods: Alsatian onion pie (with soymilk and tofu). Primavera of vegetables (with tofu). Tofu bonne femme (with soymilk). Sweet & sour tempeh. Color photos show Brother Ron and several of his preparations.

8263. *Whole Foods.* 1987. Tofu used in Everest climb. Nov. p. 24.
• ***Summary:*** A 14-member team, attempting to put the first woman on top of Mt. Everest, is using Mori-Nu Tofu (aseptically packed) as a protein source during the expedition.

8264. *Whole Foods.* 1987. Sensational soyfoods. Nov. p. 62. [5 ref]
• ***Summary:*** This basic introduction is designed to be photocopied by natural food retailers for distribution to their customers.

8265. *Toyo Shinpo* (*Soyfoods News*). 1987. Seidai ni Pari de kenkô shokuhin ten. Oshu de nobiru tônyû [Successful health food exposition in Paris helps to introduce Europe to soymilk]. Dec. 1. p. 1. [Jap; eng+]
• ***Summary:*** Soymilk, tempeh, and tofu are becoming more popular in Europe thanks to a recent soyfoods exposition in Paris. There were soymilk desserts, vanilla and chocolate, and Cacoja's soymilk, Soja, received a lot of attention at the event.

8266. *Toyo Shinpo* (*Soyfoods News*). 1987. Ooshû demo

tôfu buumu. Pari no kenkô shokuhin ten o mite [After a health foods exposition in Paris, will there be a tofu boom in Europe?]. Dec. 1. p. 5. [Jap; eng+]
• ***Summary:*** The expo was held in Paris from Nov. 7-9. Tofu and second generation tofu products were creating a lot of interest among people who came to the expo. Two French companies producing soymilk are Cacoja and Lima Foods. Their products are labelled Soja and Soya, respectively. Both companies plan to start marketing soymilk ice creams before summer, 1988. Lima Foods is making an effort to produce other soyfoods besides their soymilk such as soy hamburgers, desserts, salads, paté, and terine.

8267. UNI. 1987. Cheap soya is protein-rich. *Times of India* (*The*) (*Bombay*). Dec. 2. p. 19.
• ***Summary:*** For centuries soyabean has been used as an important source of protein in China and Japan. Many noted agronomists now agree that India, and other third world countries, can help to solve their food problems by taking up production of soyabeans in a big way.

Mr. Singhal, technical director of the American Soybean Association in New Delhi says that because of heavy population pressure, India cannot expect to get more than a small fraction of its total requirements from animal sources, such as fish, meat, eggs, or milk. He believes that the only answer is the soyabean, which is the best, least expensive source of proteins and fats, with a huge array of uses.

The soyabean, first domesticated in China about 3,000 years ago, "can be indigenously transformed into many protein-rich foods such as soya milk, soya paneer or 'tofu,' soya flour, soya snacks, soya dal analogues, soya meat analogues and soya sauce." Not to mention soy "ice cream."

8268. Mio, Art. 1987. Mori-Nu tofu doing well (Interview). *SoyaScan Notes.* Dec. 7. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** More-Nu sales are good. The former package reminded too many people of a bar of soap. The new package is now out and widely advertised. Mori-Nu is now ready to enter the health foods market. The package no longer lists monoglycerides, which are still used but not required since they are a processing aid.

8269. Jacobsen, Ces. 1987. Low in calories [Tofu]. *Lahontan Valley News* (*Fallon, Nevada*). Dec. 9. p. 7. [2 ref]
• ***Summary:*** Suddenly she has been hearing a lot about tofu–serendipity. In *Women of China* she read about a book their staff had compiled titled *200 Recipes for the Tofu Devotee.* She wrote these women and they sent her a copy.

When she returned home from Japan and Korea last July, she read a long article about soybean foods titled "The Prodigious Soybean" in *National Geographic.*

When she returned from Israel, where the Kosher Chinese restaurants use tofu extensively, in her mail was a set of tofu recipes from Azumaya, Inc. She presents one of these–"Tofu with vegetables and sauce."

8270. Wilks, Andy. 1987. New developments at Walker & Wilks (Interview). *SoyaScan Notes.* Dec. 10. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Walker & Wilks is selling off stocks of the company's three entrees and hoping to start a new company by raising capital and going public. They may keep the old company name. He thinks the reasons for the failure of Legume's frozen entrees was, in order of importance, flavor, business management, and price. The price was mid-range, about like Stauffer's.

Note: Talk with David Sands, a reporter with the Washington Times. 1990. Feb. 2. This company has changed its name to Light Trends. They have a new president and CEO who was head of the National Assoc. of Food Distributors. Address: Silver Spring, Maryland.

8271. Tremblay, Yvon; Milon, Richard. 1987. Pioneering tofu in Quebec (Interview). Conducted by William Shurtleff of Soyfoods Center, Dec. 11. 3 p. transcript.
• ***Summary:*** Tremblay, who became a vegetarian in 1974, first learned of tofu in 1975, when a macrobiotic man from Boston taught him how to make it in Quebec. He soon began to make tofu at home in Quebec 2-3 times a week, and served it to large groups for whom he was cooking. In July 1977 he opened his first restaurant, L'Envolee, a natural food and vegetarian restaurant in Quebec City. He made tofu by hand in the restaurant and used it in a number of recipes. In 1981 he was accepted into the prestigious Society of Chefs and Pastry Chefs of Quebec. That November he and Richard Milon started a company named Les Aliments Soyabec, Inc. making tofu and baked tofu, from tofu imported from Swan Gardens in Miami, Florida. To promote these products, Tremblay wrote a recipe book in French titled *The Magic of Tofu.* In 1986 his second book on tofu, titled *Tofu,* was published. By now his first book had sold 35,000 copies. Address: 1. 5387, Fabre St., Montreal, QUE, H2J 3W6 Canada; 2. Cuisine Naturelle Johnathan, 12080 Pasteur, Montreal, H3M 2P9, Canada.

8272. Whitford, Harry M., III.; Karas, Thomas. 1987. Re: Soyastern Naturkost GmbH. Letter to William Shurtleff at Soyfoods Center, Dec. 14. 1 p. Typed, with signature on letterhead. [Eng]
• ***Summary:*** The company has two equal owners: Bernd Drosihn handles buying, packaging, distribution to the natural foods market, and personnel. Thomas Karas handles marketing, distribution to the supermarket and commercial kitchen (foodservice) sectors, and production system development. Thomas's wife, Yin Yin, is the bookkeeper, and his sister, Sabine, is the secretary. They have 8 full time employees, and 23 employees in all. Harry Whitford, a

© Copyright Soyinfo Center 2013

third member of the management staff is in charge of R&D, sanitation, and foreign correspondence. The company got buried under an avalanche of orders after the last Anuga food show. Harry Whitford continues: "We make four kinds of tofu–natural, smoked, smoked with bell peppers and spices, and with herbs de provence. All four are coagulated with cleaned nigari, and we use exclusively controlled organic soybeans. Then we have our fresh products–tofu burgers, lentil croquettes (with tofu), spring rolls, and tofu cutlets filled with sauerkraut. My new products are mayo-type eggless tofu dressing, and tomato dressing. They both have only 23% soy oil, so they're much lighter than Nasoya's. We have several new things underway; I'll tell you about them later.

"I'm enclosing the labels you requested, and an article from the natural foods magazine *Schrot und Korn* which gives you a brief history of Soyastern." Address: Osterrather Strasse 26, 5000 Koeln 60, West Germany. Phone: 0221-170-1581 (or 2097).

8273. Whitford, Harry M., III. 1987. Re: The European tofu market. Letter to William Shurtleff at Soyfoods Center, Dec. 14. 2 p. Typed, with signature on letterhead. [Eng]

• ***Summary:*** "Holland [Netherlands]: Holland is by far the largest market and largest producer on the continent. What was once the country with the most producers is now dominated by one company–Heuschen-Schrouff. Only the company Morgenstond still produces tofu themselves. All others have concentrated on tofu based products, buying their raw materials from H-S. We estimate the total production of H-S to be at the very least 20 metric tons per week. It could run as high as 50 mt/wk. They sell huge amounts at 'dumping' prices on the Asian-shop market, and claim to make organic tofu for the bio-shops, but seeing as they refuse any control [certification] organisation to check their records on bean purchases, nobody believes that their tofu is organic.

"Great Britain: We don't have any current news about the British market.

"France: There are a couple of companies in Franca making organic tofu. Societe Soy makes tofu and soymilk products–my feeling is that they have lots of capital but not so many good ideas–I wasn't impressed by their products–mostly because their professional packaging awakens professional expectations. We don't have much information about their production amounts, and as far as I know, they distribute through natural- and healthfood channels. Then there is Sojalpe (Saint Quentin sur Isere, 38210 Tullins. France); they make 900 kg/week of soft nigari tofu using French organic soybeans (nature & progress). They're working on a line of commercial kitchen products. In contrast to Societe Soy, they are high on ideas but low on francs; and yet, they make canned tofu entrees that I found much better than similar Dutch products. Other than these, they're distribution is through natural food stores.

"Switzerland: Situation similar to Holland–the cheese has been divided up between Soyana, Galactina, Migros and Co-op. No small producers here, but instead, the greatest infiltration of conventional distribution channels (supermarkets). In contrast to the Dutch products, excellent quality and hygiene. No lack of ideas here and certainly not of franken [money] either. You probably have more information than we do–we couldn't begin to estimate the amounts produced–but it's a lot–especially considering the small population.

"Austria. Italy, Spain and Portugal: Nothing happening here. Maybe soon.

"Germany: At the time being probably the most diversified market in Europe. There is every type of tofu shop imaginable here, from tiny one man hip-handicraft traditional shops with local distribution to middle-sized factories with distribution both domestically and abroad. Nearly all of what is sold here is sold through the natural- and healthfood stores (in German: *Naturkostläden und Reformhäuser*). A fair amount is also sold to restaurants and commercial kitchens, and a few supermarkets are beginning to introduce tofu. In approximate descending order:

"Soyastern: organic nigari tofu, 7-8 metric tons (mt)/week.

"Yamato Tofuhaus GmbH, Mössingerstr. 41 7406 Mössingen-Belsen, organic calcium sulfate tofu, ca. 3-3.5 mt/week.

"Henselwerk GmbH. Mühlenstr. 5-7, Pf. 1120, 7037 Magstadt, non-organic calcium sulfate / chloride tofu. Estimate ca. 2-2.5 mt/week.

"Svadesha (Rüdinger Urban). Ostpreussen 22, 8000 München 81 organic nigari tofu, 1.2 mt/week.

"Albert Hess, Tofuhaus Tiefental [Tiefenthal], Hauptstr. 130, 6719 Lautersheim, organic nigari tofu, approx. 1 mt/week.

"Christian Nagel, Hamburger Tofumanufaktur, Oesdorfer Landstr. 4, 2000 Hamburg 52, organic nigari tofu, 900 kg/week.

"Byodo Naturkost GmbH, Hirshbergstr. 9, 8000 München 19, organic nigari tofu, 400-500 kg/week.

"Atlantis, J.J. Lilienthal, 6450 Bruckköbel, organic nigari tofu, 300-400 kg/week.

"Thomas Jakobi, Fürstenbergstr. 87, 7750 Konstanz, organic nigari tofu. ca. 200 kg/wk.

"So, that's a look at things here... It would be quite interesting to hear what you know about Heuschen-Schrouff." Address: Osterrather Strasse 26, 5000 Koeln 60, West Germany. Phone: 0221-170-1581 (or 2097).

8274. Santa Cruz, Diego. 1987. Soyfoods in Chile (Interview). *SoyaScan Notes*. Dec. 16. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Diego just returned from 1 month in Chile. The only activity he saw related to soyfoods was by Dr. Eduardo

© Copyright Soyinfo Center 2013

Barriga at Chanalfonso outside Santiago. He is making tofu and donating some of it to the "Ollas Communes," or common pots for the poor. He is also trying to introduce tempeh. Diego is considering starting production of soyfoods in Chile. Address: San Rafael, California. Phone: 415-465-1045.

8275. United Press International (UPI). 1987. Almonds work wonders with tofu (News release). *National Wire.* Dec. 16.
• ***Summary:*** Gives a recipe for Crisp Almond Tofu with Fragrant Dipping Sauce, which calls for ¼ cup whole blanched almonds and ½ cup coarsely ground almonds.

8276. *Times of India* (*The*) (*Bombay*). 1987. Company news: Amit International. Dec. 28. p. 11.
• ***Summary:*** Amit International is introducing soyabean based paneer [tofu] in the Bombay market. This food product, which is rich in protein and free of cholesterol, is made with the help of Japanese equipment and knowhow [know-how]. The digestion rate, claimed to be 95%, is comparable with that of egg, milk-paneer, meat, fish, and dairy products.

The product, which is manufactured by Mishra Soya Food Products, sells for less than paneer made from milk. Mishra's plant, located at Vasai, Bombay, is capable of producing about 3 tonnes of paneer per day; this can be doubled as the market expands. The company expects a demand of about 8 tonnes per day in Bombay alone, including the demand from hotels. The tofu equipment, which cost Rs. 70 lakh, was imported from and set up on the site by Takai Tofu Mfg. Company of Japan, which commands about 80% [sic] of the world market for soy paneer equipment. The first year's turnover [sales] is expected to be about Rs 90 lakhs [Rs. 9,000,000].

Note: It appears that the product has not yet been launched / introduced commercially. In India at this time it was quite common to announce, with great fanfare, products that were about to be launched or were being launched.

8277. *Los Angeles Daily Journal.* 1987. Tofu manufacturer settles lawsuit. Dec. 29.
• ***Summary:*** Tan Tan Tofu, a tofu manufacturer in San Diego (4010 54th St. Phone: 619-265-2055), last week agreed to pay $2,000 in costs and penalties and comply with state sanitary laws. The San Diego City Attorney, through the Consumer Fraud Unit, sued the company for allegedly violating the state's sanitary manufacturing procedures, and for failing to list as ingredients all artificial flavorings, coloring, or chemical preservatives, and for failure to keep the manufacturing facility in clean, healthy, and sanitary condition. The company has agreed to clean up its act.

8278. Rose, Richard. 1987. The U.S. soyfoods industry and market: Where we are and where we're going (Interview). Conducted by William Shurtleff of Soyfoods Center, Dec. 29. 4 p. transcript.
• ***Summary:*** Major developments: The growth and marketing of Jofu, inability of soy yogurts to take hold, continued domestic growth in production of soymilk, decline of Tofutti, increase and proliferation of soy cheeses, increased legitimization of soyfoods in the mass market. The future: Growth in use of aseptic tofu like Morinaga's, increased use and recommendation of soyfoods in special diets, use of tofu in new products such as baked goods, Big Foods getting into soyfoods, more use of tofu in foodservice. Then discussion of what he would do if he was hired by a major American food company and given a $50 million budget and a research staff. Address: President, Rose International, P.O. Box 2687, Petaluma, California 94953-2687. Phone: 707-778-7721.

8279. Weinreb, Sam; Martin, Shelly. 1987. Tofu in New York City (Interview). *SoyaScan Notes.* Dec. 29. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Sam: Tofu has become a lost leader in New York City health food stores, sold at a small markup. He makes 1,800 lb/week of tofu including round tofu. He is supported by the co-ops, and is surviving out of sheer stubbornness and because he thinks what he is doing is important.

Shelly: The New York City health food industry is being taken over by the Koreans. They keep their stores open 24 hours a day and pay low or no wages (as to family). They are hard for a manufacturer to do business with. Soy Source has its soy sauce specially made by Wajashan. Address: 1. Local Tofu, West Nyack, New York 10994; 2. Appropriate Foods / Soy Source.

8280. Amit International. 1987. Display ad: Tofu-Paneer: Introducing for the first time in Bombay. *Times of India* (*The*) (*Bombay*). Dec. 30. p. 18.
• ***Summary:*** The top one-third of this ad is white lettering and graphics on a black background. A cartoon character, with a soybean-shaped head (smiling), a chef's hat on top, plus arms and legs, stands next to a sort of white menu. The six lines read: "Protein rich. Easily digestible. Low-calorie. Cholesterol-free. Made for delicious cooking. Veg-wonder."

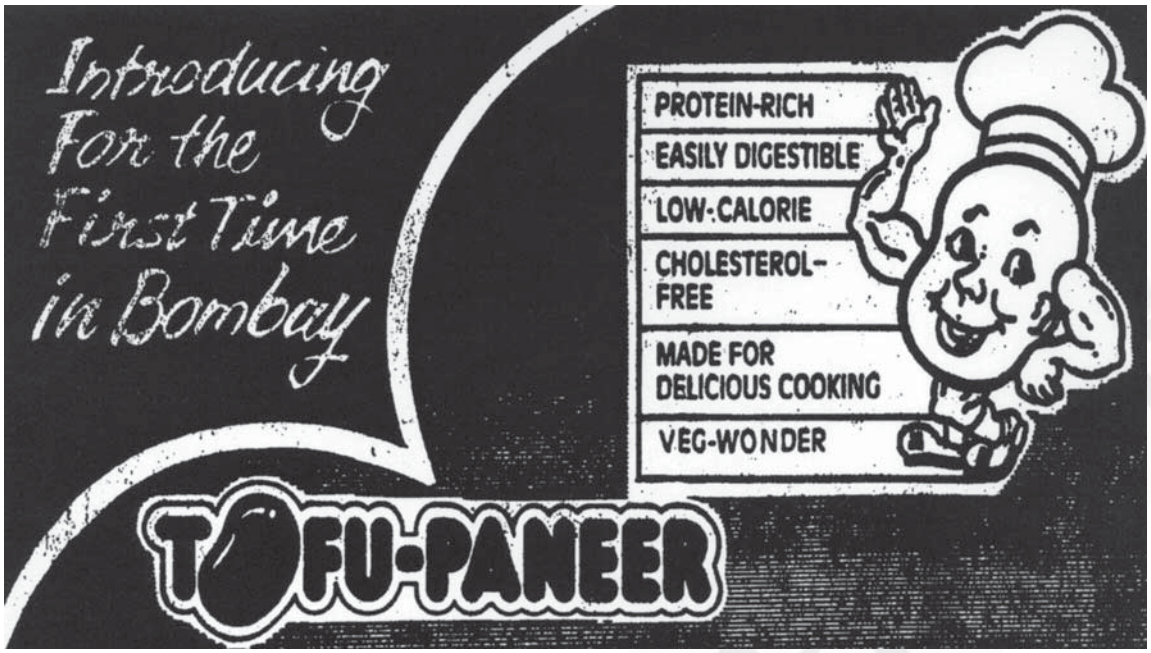
The body of the ad reads: "You have always been reserving paneer for special occasions because of its inhibitive [high] price.

Now make everyday a special protein-filled day for everyone at home as new Tofu-Paneer, a low-priced, pure vegetarian, cholesterol-free substitute is here in your city, set to take the paneer market and your dining table by storm."

A large table gives a (sort of) 7-point nutritional comparison of Tofu-Paneer and "conventional animal milk paneer." Cholesterol: Free vs. high. Allergy: Absent vs. occasional. Price per kg. Rs. 25/- vs. Rs. 40/-.

"Made with Japanese equipment and technology.

© Copyright Soyinfo Center 2013



"Available in 200 gms. pack at all the Retail Shops / Stores at Rs. 5/- per pack (inclusive of all taxes)."

Note: This is the earliest ad for tofu seen in the *Times of India*. Address: Sole distributors for Bombay, 384-M, Dabholkarwadi First Floor, Kalbadevi, Bombay–400 002. Phone: 312694, 294302, 295594.

8281. *SoyaScan Notes.* 1987. Chronology of soybeans, soyfoods and natural foods in the United States 1987 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• ***Summary:*** Jan. Westbrae moves the production of Malteds to California from Japan.

Jan. The Soy Plant, a tofu cooperative in Ann Arbor, Michigan, files for Chapter 7 bankruptcy. It is soon purchased by Bruce Rose of Rosewood Products, Inc.

Feb. *Soya Newsletter*, a 12-page, bimonthly publication costing $96/year, is launched by Soyatech of Bar Harbor, Maine. Publishers are Peter Golbitz and Sharyn Kingma, former owners of Island Tofu Works. The publication quickly proves itself to be the world's best English-language publication on soyfoods. By October, paid circulation tops 900 in 20 countries.

Feb. American Soybean Association petitions the U.S. Food and Drug Administration to require food manufacturers to be more specific in labeling food products that contain highly saturated imported tropical fats (palm, palm kernel, and coconut oils). The petition includes results of a supermarket survey of 1,555 foods containing vegetable oils. 43% of the labels list multiple choice or generic vegetable oil ingredients which hides from the consumer the fact that the products contain highly saturated tropical fats. Imported tropical fats displace the equivalent of oil derived from 171 million bushels of soybeans. Herewith begin the great "Fat Wars" of 1987-88.

Feb. Lite Lite Tofutti introduced by Tofutti Brands, Inc. This non-dairy frozen dessert contains only 90 calories per 4-ounce serving. It soon becomes a big hit.

Feb. Ah Soy in Tetra Brik cartons launched by great Eastern Sun.

Feb. Options trading on futures for soybean oil and meal opened on Chicago Board of Trade.

March 4. The Federal Grain Inspection Service rules that soybean oil may be used to control grain dust in elevators. This voids the Barnham patent and opens up a large potential new market for soy oil, which is in surplus.

March. Great Shake soymilk launched by Noble Soya in India. Sold in Tetra Brik cartons in mango, strawberry, and chocolate favors, it is the country's most heavily promoted soymilk to date, but gets off to a slow start.

March 16-18. First International Congress on Vegetarian Nutrition held in Washington, D.C., sponsored by eight Seventh-day Adventist universities and health care organizations, and three SDA food companies, plus S.E. Rykoff/Sexton.

March. *Vitasoy Vitabrations*, a newsletter, starts being published by Vitasoy USA.

March 31. Hong Kong Soya Bean Products Co. Ltd., makers of Vitasoy, move into a large new plant (370,000 square feet costing $20 million) in the New Territories. Sales of Vitasoy in 1987 is projected to be 126 million packs.

April 1. Tempehworks, Inc., America's first major tempeh producer from Greenfield, Massachusetts, changes its name to Lightlife Foods, Inc. In recent years, Tofu Pups have become the company's bestselling product.

April. Stir Fruity, a non-dairy, nonfermented, soy-based

© Copyright Soyinfo Center 2013

yogurt, is introduced by Azumaya Inc. of San Francisco. Shelf life problems cause the product to be withdrawn, causing Azumaya to set aside plans for an $800,000 radio ad campaign in northern California. The product is soon back on the market, but in limited distribution and with little promotion. Yet during this year, Azumaya probably passed House Foods & Yamauchi to become America's largest tofu producer.

April. *Healthy Times,* a bimonthly newsletter, starts being published by Morinaga Nutritional Foods of Los Angeles, makers of Mori-Nu long-life silken tofu, for members of the Mori-Nu Health for Life Club. By Aug. 1988 circulation is up to 10,000; A subscription costs $3 a year.

May 26. Tofutti Brands Inc. and Coca-Cola launch Cheater's Delite, a major joint promotion featuring a 90-calorie scoop of Lite Lite Tofutti and a 1-calorie glass of Diet Coke, special labeling and couponing on 3 million bottles of Diet Coke, 5 weeks of heavy advertising in New York, New Jersey and Connecticut, and a Caribbean cruise sweepstakes.

June. Dr. Jane Gleason of the University of Illinois goes to Sri Lanka to spend a year studying its soybean and soyfoods industries.

July 1. Ralston Purina Co. of St. Louis, Missouri, establishes Protein Technologies International as a wholly-owned subsidiary to focus on sales of soy protein for food uses. The company's sales of soy protein products were $139.8 million in 1986.

July. Victor Food Products in Toronto, Canada's largest tofu manufacturer, declares bankruptcy. The main cause: Overexpansion, trying to grow too fast.

Aug. The Barat Bar, an upscale chocolate bar containing spray-dried tofu instead of dairy products, is launched by Legume Inc. and extensively promoted. It soon becomes a big hit.

Aug. Brightsong Foods of Petaluma, California, ceases operations. Richard and Sharon Rose resign to found a new company, Rose International, which will be a tofu development, marketing, and consulting company, rather than a manufacturer.

Sept. 24. San-J International of Richmond, Virginia, dedicates the first tamari brewery ever built outside of Japan. The 40,000 square foot facility with a capacity of 1 million gallons a year is located in Varina, Virginia. San-J tamari was first imported to America in 1979.

Sept. 28. Plenty Soya Centre, run by Plenty Canada, opens in Kandy, Sri Lanka. They will sell as many soyfood products as possible at a reasonable cost.

Oct. 6. Anti-cholesterol campaign starts. The U.S. Federal Government and more than 20 health organizations issue the nation's first detailed guidelines for identifying and treating people whose blood cholesterol levels are more than 200 mg per deciliter. The guidelines signal the beginning of a nationwide health promotion campaign designed to reduce blood cholesterol to safer levels. This signals exciting new opportunities to market cholesterol-free soy-based alternatives to meat.

Nov. *Kikkoman Taste,* a stylish full-color "quarterly intercultural forum for the exchange of ideas on food," published by Kikkoman Corp. in Tokyo. Its focus is on shoyu in international cuisine.

* During this year of the great vegetable oil wars, the ASA launched an all-out no-holds-barred campaign to educate Americans of the health dangers of tropical fats (palm and coconut oil; which succeeded) and to require such products to be clearly labeled (which failed).

* This year the world's population passed 5 billion. It is increasing by a record 80 million people a year, so that every 3 years the equivalent of one United States' full of people is added to the population of planet Earth. Continued.

8282. *SoyaScan Notes.* 1987. Chronology of soybeans, soyfoods and natural foods in the United States 1987 (Continued) (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• ***Summary:*** Continued. 1987 New Trends:

Rapid Rise in the Number of New Products in America. During 1987 more than 735 new soyfood products were launched worldwide, including at least 380 in the USA. Many of the most successful products are all-American and fun to eat: Ice creams, burgers, hot dogs, salad dressings, chocolate bars. This is part of the larger trend of the Americanization of soyfoods. Most of the growth has been in the traditional low-tech sector, including tofu, tempeh, soymilk, miso, soy sauce, soynuts, plus modern dairylike products such as soy ice creams, yogurts, and cheeses, all developed by the soyfoods movement. A growing percentage of these products are second generation products, which could also be called convenience prepared or value added products.

Growth of Consumer Awareness of Soyfoods in America. Ten years ago, perhaps 1% of Americans had heard of tofu, soymilk, tempeh, or miso. Today, probably 50% of Americans are aware of these foods. In 1987, for example, the Soyfoods Assoc. clipping service received a total of 1,587 clips on soyfoods. That is 132 articles a month, way up from 5 years ago.

Increasingly Positive Image of Soyfoods in the Western World. Generally speaking, from about 1945 through the 1960s, soy had a negative image in foods. The became neutral during the early 1970s. During the late 1970s and early 1980s, with the rise of the soyfoods movement and the growing sophistication of modern soy protein products (isolates, concentrates) soyfoods gradually developed a positive image. The Gallup Poll of 1977 was an early indicator of this. By the mid-1980s tofu had become a "hot ingredient." Companies deliberately added it to a product (or at least to the label) to help sell the product. Yet the Roper

© Copyright Soyinfo Center 2013

poll of late 1986, which found tofu to be America's most hated food, may indicate a tarnishing of this image.

Growing Interest of Larger Food Companies in Soyfoods. One indication of this trend is that *Soya Newsletter,* targeted at these companies and selling for $96/year, has over 900 paid subscribers.

Continued Decline of Red Meat. This year consumption of poultry in America passed that of beef for the first time in history. Beef had been king for 3 decades. Before that, pork was king. A pound of chicken has one-fourth as much saturated fat as beef and takes much less grain, water, and energy to produce.

INTSOY Becomes a Major Force Worldwide Developing and Promoting Soyfoods. Working with other international (IITA, AVRDC) and national soybean programs, and doing pioneering research on fresh green soybeans, extrusion cooking, and use of expellers for small-scale oil expression etc., INTSOY has become as effective in its new role (since 1985) of focusing on soybean utilization as it was before that when its major emphasis was on variety development and production.

The Competitive Position of the U.S. Soybean Industry is Slipping. Farmers in Brazil and Argentina can now produce soybeans at much lower cost than their American counterparts. This plus extensive subsidies have led to a dramatic drop in U.S. exports of soybeans and products since their peak in 1981. A major part of the problem is linked to the Latin American debt crisis, which surfaced in the early 1980s and forced debtor nations to export at all costs. This debt crisis (especially by Brazil, Argentina, Mexico, and Venezuela) is now being called the most serious problem facing U.S. agriculture.

Soybean Research Increasingly Shifts from Production to Utilization. Traditionally research focused on increasing production and yields. New efforts are designed to develop new markets instead of larger surpluses.

Big Increase in Breeding Soybeans for Food Uses. This is part of a larger trend toward value added products and toward finding new market niches for American soybeans, especially for foods in Japan.

Revival of Interest in Industrial Uses of Soybeans. The main interest is in new ways to use soy oil, of which there is a large surplus that depresses soybean prices. Promising applications include soy oil for printing inks, dust suppressants, and diesel fuels. The largest interest in industrial uses occurred during 1932-42, when the Chemurgic movement and Henry Ford sought to find industrial uses for all farm crops. Hence, there is a rebirth of interest in Henry Ford's work with soy.

Major Growth of Interest in Soybeans and Soyfoods in Africa. Excellent work by IITA in Nigeria and various national soybean programs (as in Egypt, Zimbabwe, and Zambia) have allowed this relatively new crop to reach the takeoff stage. Decreasing per capita food supplies and growing understanding of the nutritional benefits of soyfoods are sparking new interest.

Continued Rise of Soybean Production in Europe. The largest producer, Italy, which produced almost no soybeans as recently as 1983, harvested a record 1.3 million tons in 1987. France is second largest. All production is heavily subsidized.

Omega-3 Fatty Acids Hit the Headlines. Soy oil is a rich vegetable source of these fatty acids which are thought to have a beneficial effect on the cardiovascular system.

Nutritional Spotlight Increasingly Shifted onto Fats, Away from Proteins. During the past few years fats (and especially cholesterol and saturated fats) have come to be seen as the leading problem nutrient, the bad guy, in the American diet. There is a new respect for complex carbohydrates (especially whole grains), which used to be called "starches" and were considered fattening.

New, More Complex View of Oils and Fats Becomes Popular. High cholesterol levels are considered more dangerous than ever, but equally important are the various cholesterol-carrying proteins in the blood. Two kinds (low and very low density lipoproteins) promote cholesterol deposits in the blood, while high density lipoproteins (HDLs) cleanse the blood vessels of fatty deposits. Moreover, saturated fats are considered at least as much of a problem as cholesterol.

So-Called Antinutritional Factors in Soybeans are Increasingly Seen as Having Benefits as Well. Trypsin has been shown to help prevent cancer. Saponins help reduce serum cholesterol. Isoflavones have antioxidant activity that may suppress breast cancer. This indicates that we may need a new term to categorize these substances that offer both benefits and disadvantages.

The Link Between Diet and Health Continues to Grow Stronger, among both scientists and the general public.

Interest in Exercise and Health Still Strong. Several years ago some experts saw this trend waning, but it now seems to be rebounding. For example, there were 21,244 finishers in the New York Marathon (including 3,689 women). Compare this with 12,512 finishers (1,621 women) in 1980 and 55 finishers (no women) in 1970.

Books on Tofu. Since 1974, at least 60 books on tofu (having the term "tofu" in the title) have been published in North America and Europe. Peak publication years were 1981 and 1982. By language, 46 of the books were in English, 7 in French, 4 in German, and 1 each in Italian, Portuguese, and Swedish.

Inactivity of the Soyfoods Association of America now becoming a major constraint on growth of soyfoods in the USA, at a time when interest is at an all-time high. Leadership is needed.

Rise of Canola (Rapeseed) Oil. It looks as if soy oil may have another serious competitor (in addition to palm oil) in future years. Canola contains less saturated fat than any other

© Copyright Soyinfo Center 2013

popular vegetable oil. Only 6%, versus 9% for safflower oil and 15% for soy oil. Lard has 41%, palm oil 51%, and butterfat 66%.

8283. **Product Name:** Birchwood Original Tofu [Plain, Herb, Garlic, Natural Smoke].
Manufacturer's Name: Birchwood Health Products.
Manufacturer's Address: Unit 1D, Alyn Industrial Estate, Llay Hall, Wrexham, Clwyd, Wales, UK. Phone: (0978) 761833.
Date of Introduction: 1987. December.
Ingredients: Garlic: Water, whole soya beans.
Wt/Vol., Packaging, Price: 250 gm paperboard box. Vacuum packed and pasteurized.
How Stored: Refrigerated.
Nutrition: 72 kcal per 100 gm.
New Product–Documentation: Label. Best before 24 Dec. 1987. Paperboard box. 5.5 x 4.25 by 1.25 inches. Blue, red, green, and tan on beige. Color illustration shows pieces of tofu on and by Chinese ceramics with garlic, mushrooms, and tomatoes. "High Protein Soya-Bean Curd." Recipes on back for deep-fried delights, marinades, and desserts. Ad in The Vegan. 1988. Spring. p. 21. "TrueHealth Soya Products... No animal contents. High in protein. Low in carbohydrates. All essential amino acids." Ad shows Labels. Letter from D. Horbury. 1988. "This company was formed upon the demise of the Bean Machine, so the tofu is exactly the same..."

Letter from Neil Robinson. 1989. Aug. 7. The three major tofu products in Britain, as far as I know, are (1) Tofeata Tofu by Haldane Foods (Hera), Leicester, England; (2) Cauldron Foods, Bristol, England; (3) Truehealth Tofu by Birchwood Foods, Wrexham, Wales.

8284. Boughton, Noelle. 1987. Tai Foods tries for tofu converts. *Small Business* (*Canada*). Dec. p. 12, 14.
• ***Summary:*** Nancy Tai, Taiwanese by birth, started making tofu in her own kitchen in 1982 for her husband who was allergic to dairy products. In 1985 the Tais moved to Winnipeg and in June 1985 incorporated Tai Foods Inc. Her startup costs were $200,000. In April 1986 she began production of tofu and Tofu Treat (a non-dairy frozen dessert) in 3 flavors. She uses 1,250 kg of soybeans a month. In 1986 Tai Foods had gross sales of $100,000 with 4 employees. This is expected to rise to $150,000 in 1987. Address: Winnipeg, MAN.

8285. Brown, Judy. 1987. Tempeh sales plateau in natural foods market. Marketers looking at new varieties and product areas for growth. *Soya Newsletter* (*Bar Harbor, Maine*). Nov/Dec. p. 1, 8-9. [2 ref]
• ***Summary:*** White Wave (Boulder, Colorado), which projects sales of $2 million for all products in 1987, produces 15-20,000 lb/week of tempeh, making the company America's largest tempeh producer. Tempeh products under the White Wave label include Soy, Soy-Rice, 5 Grain, Quinoa, Amaranth, Lemon Broil, Tempeh Burgers (two styles) and Sea Vegetable Tempeh. The Soyfoods Unlimited line includes Soy, 3 Grain, 5 Grain, Burgers, and Cutlets. Lightlife Foods (Greenfield, Massachusetts) is the second largest, producing 7,690 lb/week [up 40% over Jan. 1984]. The company's line has diversified from standard Soy Tempeh and 3-Grain Tempeh to Soy with Caraway, Quinoa, Sesame, Garden Vegetable, Macro Power, Fakin' Bacon, and Tempeh Burgers. Lightlife's sales of all products was $800,000 for 1987, projected to rise to $1.2 million for 1988. The decision to diversify from tempeh only products was made after the company's tempeh sales plateaued in 1983. Competition became severe and supply outgrew demand.

Appropriate Foods (Brooklyn, New York) notes that "sales surged between 1980 and 1984, but have since flattened out." Brown estimates that "approximately 2 million lb of tempeh will be produced in the U.S. in 1987, with manufacturers' sales pegged at $2.7 million and retail sales at around $5 million." These sales and production figures show no growth in the industry since Soyfoods Center did its survey of manufacturers in early 1984. Average retail prices for an 8-oz package of plain soy tempeh ranged from $1.00 to $1.30; for multi-grain varieties from $1.10 to $1.40; and for burgers and newer exotic products from $1.30 to $1.70... The top two tempeh producers are confident of the marketplace and believe strongly in the potential of tempeh.

8286. *Dairy Foods.* 1987. Something new from the soybean: Tofu maker [Azumaya] hopes Stir Fruity will be the 'yogurt of the future.' 88(13):27. Dec.
• ***Summary:*** Stir Fruity, a "tofu-based yogurt-like product," is made from a soymilk base in a proprietary process that Azumaya spent 4 years and $500,000 perfecting, explained marketing director Jill Mizono. Azumaya introduced Stir Fruity in February 1987 and quickly gained distribution in Safeway and Lucky supermarkets in northern California. Soon after introduction, however, shelflife problems forced Azumaya to pull the product from both chains. The problem was traced to Azumaya's recently installed clean room, and fixed. The product now is back to a 40-day shelflife. Production was never completely discontinued.

Azumaya is now selling Stir Fruity to foodservice operators in and outside of California and test marketing it at grocery stores throughout the USA. Customers give Stir Fruity high marks for its custard-like texture and non-beany taste; 75% of San Francisco area consumers who sampled Stir Fruity said they would buy it. Most soy-based yogurts, except Stir Fruity and Jofu, are targeted to the health-food market. Photos show Stir Fruity in packages (cups) and a parfait glass, surrounded by fruits. Address: Chicago, Illinois.

8287. deMan, L.; deMan, J.M.; Buzzell, R.I. 1987. Composition and properties of soymilk and tofu made from Ontario light hilum soybeans. *Canadian Institute of Food Science and Technology Journal* 20(5):363-67. Dec. [16 ref. Eng; fre]
• ***Summary:*** Soymilks made from 17 soybean cultivars grown in Ontario were analyzed for protein, oil, fiber, sugars and mineral content. Bean curd (tofu) was made from the soymilk using calcium sulfate as a coagulant. Hardness of the beans, soaked beans and tofu was measured by use of an Instron Universal Testing machine. All soybeans produced tofu of good texture. Address: 1. DeMan Food Technology Services Inc., Guelph, ONT, N1H 6B5, Canada; 2. Dep. of Food Science, Univ. of Guelph, Guelph, ONT, N1G 2W1; 3. Agriculture Canada, Research Station, Harrow, ONT, N0R 1G0, Canada.

8288. *Food Protection Report.* 1987. Refrigeration is a problem with water-packed tofu. Dec. p. 5. [3 ref]
• ***Summary:*** USDA researchers have identified four pathogens, including salmonella, that will grow in water-packed tofu unless it is refrigerated at 41ºF (5ºC) or below. An aseptically packaged type of tofu is available [Mori-Nu]. For technical information contact Dr. H.L. Wang at USDA or Morinaga Nutritional Foods in Los Angeles.

8289. Fragrant Vegetable (The). 1987. December. New soyfoods restaurant or deli. 11859 Wilshire Blvd., West Los Angeles, CA 90025.
• ***Summary:*** Wayne Potter. 1988. May 5. Good Life (Santa Monica, California). "Fragrant Vegetable: Even if you don't like tofu, you'll love this place." Located in West Los Angeles for the past 6 months, it is run by partners S.T. Cheung and Julie Hau, and features gourmet Chinese vegetarian cooking. It started originally in Monterey Park. "In the hands of chefs Cheung and Michael Choe, the humble tofu is transmogrified into dishes of princely quality, and suddenly I found myself gobbling with gusto what I would ordinarily ignore." Address: Los Angeles, California. Phone: 213-312-1442.

8290. Golbitz, Peter. 1987. 1987 new product count: At least 217 new soyfood products for retail sale. *Soya Newsletter* (*Bar Harbor, Maine*). Nov/Dec. p. 3.
• ***Summary:*** Of the 217 new products, the leaders in the 8 product categories were Nondairy Frozen Desserts (50), Entrees (44), Beverages (35), Snacks/Desserts (35), Cheese Alternatives (19), Frozen Entrees (17), and Condiments (16). The leaders among the 8 primary soy ingredients were tofu (133), soymilk (32), textured soy protein (19), isolated soy protein (12), soynuts (10), tempeh (6) and miso (1). Tofu was the only primary soy ingredient used to make at least one product in all categories. A complete listing of these products broken down by primary soy ingredient and by category, and which also lists flavors, company name, city, and state, is available from Soya Newsletter for $25 (or $35 in Canada). Address: Soyatech, Bar Harbor, Maine.

8291. Golbitz, Peter. 1987. Soya interview: Bill Shurtleff, noted soyfoods author, speaks on the trends and future of soyfoods. *Soya Newsletter* (*Bar Harbor, Maine*). Nov/Dec. p. 4-5.
• ***Summary:*** Shurtleff sees seven positive trends showing that the soyfoods industry is in a healthy growth pattern: 1. The remarkable growth in the number of new soyfoods products, 273 to date in 1987. 2. The increasing quality of these products and the sophistication with which they are marketed. 3. The growing consumer interest in soyfoods as reflected in the steady increase in media coverage. The SAA clipping service has received 1,145 clips on soyfoods so far this year. 4. The increasingly positive image of soyfoods in the Western world (though a Roper poll in mid-1986 found tofu to be America's "most hated" food). 5. The growing scientific and consumer awareness of the health dangers of the standard American meat-centered diet. 6. The increasing interest in natural foods, in vegetarianism, and in reducing consumption of red meat. 7. The historically unprecedented extensive and positive coverage given to dairylike soyfoods by dairy magazines. He also discusses the probable effects of a large food company, such as Kraft, starting to make and market tofu aggressively. Address: Soyatech, Bar Harbor, Maine.

8292. **Product Name:** Living Foods Tofu Dressings [Cool Italian, Hearty Herb, Spicy Mexican, or Tofunaise].
Manufacturer's Name: Living Foods (Importer). Made in The Netherlands by Witte Wonder.
Manufacturer's Address: P.O. Box 66, Chichester, W. Sussex, England.
Date of Introduction: 1987. December.
New Product–Documentation: The Vegan. 1987. Winter. p. 14. "Shoparound: Lis Howlett surveys the latest vegan products." "Make way for a new range of really delicious tofu dressings from Living Foods."

8293. Miskovsky, Anna; Stone, Martha B. 1987. Effects of processing on curd yield and nutrient composition of rapid hydration hydrothermal cooking and traditionally processed soymilk and soybean curd. *J. of Food Science* 52(6):1542-44. Nov/Dec. [20 ref]
• ***Summary:*** Soymilk processed by a modified "rapid hydration hydrothermal cooking" (RHHTC) method (developed by J.J. Hung, 1984) had higher thiamin and protein concentration than traditionally extracted soymilk. Traditional tofu had higher protein and fat and lower carbohydrate and ash concentration than RHHTC curd. Variation in amino acid composition occurred in soymilk and tofu varieties. RHHTC tofu had lower yields than traditional

© Copyright Soyinfo Center 2013

tofu. Address: 1. Henningsen Foods Inc., Omaha, Nebraska 68144; 2. Dep. of Foods & Nutrition, Kansas State Univ., Manhattan, Kansas 66506.

8294. Miskovsky, Anna; Stone, Martha B. 1987. Effects of chemical preservatives on storage and nutrient composition of soybean curd. *J. of Food Science* 52(6):1535-37. Nov/Dec. [11 ref]
• ***Summary:*** Tofu was immersed in acetic acid and potassium sorbate + acetic acid solutions, which served as chemical preservatives, but had little effect on its nutritional quality during storage at 4-7ºC for 21 days. The vitamins thiamin and riboflavin decreased during storage, as they leached into the solution. After 14 days, tofu protein decreased and carbohydrate increased. Decreases in proline and arginine occurred after 14 days storage but no losses were found in tofu's other amino acids. Address: 1. Henningsen Foods Inc., Omaha, Nebraska 68144; 2. Dep. of Foods & Nutrition, Kansas State Univ., Manhattan, Kansas 66506.

8295. Morinaga Nutritional Foods, Inc. 1987. Mori-Nu Tofu recipe cards. 5800 South Eastern Ave., Suite 270, Los Angeles, California 90040.
• ***Summary:*** Morinaga has four cards, each 3 by 5 inches, each with one recipe on the front and another on the back. They are printed in a color ink on a pastel background, and were found displayed in a small plastic rack near the Yves meat alternatives at Safeway supermarket in Lafayette, California.

The recipes are: BBQ burger kebabs. Mushroom caps. Mexican burritos. Shepherd's pie. Veggie lasagna. Veggie sloppy joes. Address: Los Angeles, California.

8296. **Product Name:** Organic Tofu [Plain, or Smoked], Tofuburger, and Organic Tempeh.
Manufacturer's Name: Oasis Wholefoods.
Manufacturer's Address: Unit 3C, Dart Units, Steamer Quay Rd., Totnes, South Devon TQ9 5AL, England. Phone: 0803 863167.
Date of Introduction: 1987. December.
New Product–Documentation: Note from Simon Bailey. 1988. Oct. 10. Formerly Lifestream Wholefoods, owned by Francis Checkley, this business was sold in Dec. 1987 to Mr. I.J. Mohammed.

Letter from I.J. Mohammed. 1991. Sept. 9. He makes tofu, tofu burgers, tempeh, miso, breads and cakes on a community scale. He has been making these foods for the last 5 years, all by hand.

8297. **Product Name:** Tofunaise, and Tofu Dressings [Mexican-Style, Herb, or Italian].
Manufacturer's Name: Organic Trading Co. (Importer). Made in The Netherlands by Witte Wonder.
Manufacturer's Address: 10a St. George's Place, Brighton, E. Sussex, BN1 4GB, England. Phone: 273-571772.
Date of Introduction: 1987. December.
Wt/Vol., Packaging, Price: 300 gm glass jar retails in England for £1.29.
How Stored: Shelf stable, 12 month shelf life. Refrigerate after opening.
New Product–Documentation: Simon Bailey. 1988. Natural Choice. Aug. 15. "Soya-Based Products." A photo shows the Label. CSP form filled out by Simon Bailey. 1988. Sept. 28.

8298. **Product Name:** Tofu Kit.
Manufacturer's Name: Pressing.
Manufacturer's Address: Box 72, Vermontville, NY 12989.
Date of Introduction: 1987. December.
New Product–Documentation: Leaflet. The 9.5 by 7.25 x 7 inch pine wood press costs $24.50. Soybeans and nigari are extra.

8299. Shurtleff, William. 1987. Breeding and marketing soybeans for food uses: The basic approach. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549. 4 p. April. Unpublished manuscript. [1 ref]
• ***Summary:*** There are four key components in developing a program to become a leading supplier of soybeans to the soyfoods industry: Information, specifications, research & development, and education. Details of a computer data entry screen and suggestions for four computer-generated graphs are given. Includes notes on a talk with Jon Cloud of Soy City Foods in Toronto concerning his long-term work in developing soybean varieties for food uses, and with the Organic Crop Improvement Association. Address: Soyfoods Center, Lafayette, California.

8300. *Soya Newsletter* (*Bar Harbor, Maine*). 1987. SAA committee developing Seal of Approval for soyfoods. Nov/Dec. p. 10. Also in Natural Foods Merchandiser. 1988. Jan. p. 4.
• ***Summary:*** The Soyfoods Association of America's Seal of Approval Committee, formed in March 1987, met in October in Philadelphia. Present were Steve Snyder of Vitasoy (Chair), Peter Golbitz of Soyatech, John Paino of Nasoya Foods, and Judy Walker, SAA executive director. The seal will be available for manufacturers and marketers of soyfoods to use on labels and promotional materials.

8301. *Soyanews* (*Sri Lanka*). 1987. Plenty Soya centre opens in Kandy. 9(2):1-2. Dec.
• ***Summary:*** "One of the main objectives of the project is to have the Soya Centre act as a central point from which all of the soya products available in Sri Lanka can be obtained at a reasonable cost and in consistent supply. Another major objective is to assist community groups and small

© Copyright Soyinfo Center 2013

businessmen to set up their own small scale soya processing operations." The opening took place on 28 September 1987. Mr. Ian Taylor of Plenty Canada is the director.

"This is the first stage of a five year soya promotion project funded by the Canadian International Development Agency (CIDA) and implemented by Plenty Canada in collaboration with the Soybean Food Research Centre (SFRC) at Gannoruwa and various local non-governmental agencies." The Soya Food Centre is equipped to manufacture a wide range of soya based products including ice cream, stuffed rotis, soya watalappam, fresh as well as dried tempeh and cutlets. One of the main objectives of the project is to have the Soya Centre act as a central point from which all of the soya products available in Sri Lanka can be obtained at a reasonable cost and consistent supply.

The Plenty Soya Food Centre is open from Monday to Saturday and is located on the main floor of the Y.M.C.A. at No. 88A, Kotagodella Vidiya, Kandy. The project is a result of a collaboration with Plenty's Field Director, Mr. Ian Taylor in November, 1986.

8302. *SoyaScan Notes.* 1987. New Trend: Growing legitimate concern over contaminated cow's milk and chicken. Salmonella and Listeria bacteria have caused food poisoning and many deaths (Overview). Dec. Compiled by William Shurtleff of Soyfoods Center.

• ***Summary:*** A database search conducted by Richard Rose on the contamination of milk and milk products reveals how widespread this problem is, and suggests how it could potentially have a major effect on the storage of fresh and pasteurized tofu. The following abbreviated bibliographies, first for Salmonella then for Listeria, lists title or title paraphrase, serial name, date, and pages for major publications

Salmonellosis caused by Salmonella bacteria. Science. 1984. Aug. 24. p. 833.

Animal to man transmission of antimicrobial-resistant Salmonella: investigations of U.S. outbreaks, 1971-1983. Time. 1984. Sept. 24. p. 77.

Linking drugs to the dinner table. Farm animals fed antibiotics may effect human meat consumers. Supermarket News. 1985. April 22. p. 12.

First death is tied directly to milk case (Salmonella in Jewel Food Stores dairy operation). American Medical News. 1985. June 7.

Families file suit over Salmonella outbreak; class action suit against Jewel Food Stores (Hillfarm Dairy) milk a possibility. Food Processing. 1985. June. p. 22.

The salmonella puzzle; largest food processing episode in U.S. history attributed to milk. Includes related articles on the salmonella bacterium and a proposed solution to contamination. FDA Consumer. 1986. Feb. p. 18.

Of microbes and milk; Probing America's worst salmonella outbreak. Science. 1986. Nov. 21. p. 964.

Drug resistant Salmonella in the United States: an epidemiologic perspective. U.S. News & World Report. 1987. March 9. p. 60.

Serving up Salmonella for dinner (increase of food poisoning). Wall Street Journal. 1987. July 20. p. 23 (West).

Chicken growers face leaner earnings as salmonella publicity takes its toll. Wall Street Journal. 1987. Sept. 17. p. 33 (West).

Stubborn bug: bid to rid chicken of salmonella proves daunting. FDA Consumer. 1987. Nov. p. 2.

Raw milk banned (for transmitting disease-causing bacteria such as Salmonella).

Listeriosis caused by the *Listeria monocytogenes* bacterium. Newsweek. 1985. June 24. p. 37.

California: a case of deadly cheese. Listeria contamination. Food Processing. 1985. Aug. p. 2. Food poisoning outbreak kills over 40 persons from listeriosis; listeria cases spotlight new hazards in dairy, deli and other refrigerated foods.

8303. Takahashi, Akira. ed. 1987. Shun no tôfu zukushi [Tofu cookery throughout the four seasons: Encyclopedia of tofu]. Tokyo: CBS Sony. 144 p. Illust. Index. 26 cm. [Jap]*

• ***Summary:*** The author is the president of the Misuzu restaurant in Kawasaki City, Japan. Toyo Shinpo (1 May 1988, p. 4) described this as one of the most artistically done cookbooks ever seen. There are many Japanese tofu recipes and some western style. A true work of art in full color!

In part I, 4-5 recipes are given for each of the four seasons. Address: Ogawa-cho 3-3, Kawasaki-ku, Kawasaki-shi, Kanagawa-ken, Japan. Phone: 044-244-6845.

8304. **Product Name:** No Chicken Salad (With Tempeh in a Pita Pocket), Tofu Salad (in a Pita Pocket), and Nori Rolls (With Tofu Filling).
Manufacturer's Name: Terra's Specialty Foods.
Manufacturer's Address: R.D. 1, Box 317, Vernon, VT 05354. Phone: 802-254-5242.
Date of Introduction: 1987. December.
New Product–Documentation: Talk with Bari Madwin. June 29 and Aug. 28. Susan Quinn sells tofu and tempeh sandwiches in Brattleboro. She bought an existing company in 1988. She uses about 12 lb/week of tofu.

Talk with Susan Quinn. 1988. Aug. 30. She bought this company from Martha Brown in Aug. 1987. It was named Martha's Sandwiches, but she renamed it Terra's Specialty Foods in Feb. 1988. At the time, Martha had a line of sandwiches, including Eggless Tofu Salad (in a sandwich, 8 oz) and BLT with Fakin' Bacon (made from tempeh). Susan introduced her three products in December 1987. The tofu salad in a pita pocket weighs 4 oz. The tofu in the nori rolls is marinated, broiled, then put in with the veggies. She buys her tofu from the food co-op. It is a part-time business.

8305. *Tetra Pak Age.* 1987. Mori-Nu gives tofu a new look. Thanks to Morinaga Nutritional Foods Inc., American consumers are taking a second look at tofu. 5(3):6. Fall/Winter.
• ***Summary:*** In October 1985 Mori-Nu tofu was introduced in the Tetra Brik Aseptic carton; it is easy to include in the convenience oriented American diet. A large color photo shows Mori-Nu silken firm and silken soft tofu on a wood table in front of fruits and vegetables. Address: Tetra Pak Inc., 889 Bridgeport Ave., Shelton, Connecticut 06484. Phone: 203-929-3200.

8306. **Product Name:** Tofutti Better Than Cream Cheese: Imitation Cream Cheese (Non-Dairy) [French Onion, Plain, Herbs & Chives].
Manufacturer's Name: Tofutti Brands Inc. (Marketer).
Manufacturer's Address: 1098 Randolph Ave., Rahway, NJ 07065.
Date of Introduction: 1987. December.
Ingredients: Water, partially hydrogenated soybean oil, tofu, isolated soy protein, corn oil, corn sweeteners, salt, guar seed gum, carob bean gum, mono and diglycerides, carrageenan, natural flavor, potassium sorbate (added as a preservative).
Wt/Vol., Packaging, Price: 8 oz plastic tub. Retails for $2.39 (3/95, California).
How Stored: Refrigerated.
Nutrition: Per 1 oz. 8 servings per container: Calories 80, protein 1 gm, carbohydrate 1 gm, fat 8 gm, sodium 200 mg, cholesterol 0 mg.
New Product–Documentation: News Release. 1987. Dec. 9. Tofutti products include a "creamless cream cheese." For more info contact P.R. person Debbie Klein in New York. 212-489-6900. Or John Gage at Tofutti Brands. Leaflet. 1988. Has 20% fewer calories than cream cheese and no cholesterol. Spot in Food Processing Newsletter. 1988. June 13. Spot in Jewish Press. 1989. March 9. "New Tofutti Brands."

Spot in Vegetarian Times. 1992. Aug. p. 83. The product, found in a bagel shop in Brookline, Massachusetts, comes in three flavors. For more information, call 908-272-2400.

Leaflet (color, 8½ by 11 inches) sent by Tofutti Brands. 1993. March 29. Shows the package and label for 2 flavors, and gives complete details about the product, including ingredients.

Product (Herbs & Chives) with Label purchased at Open Sesame in Lafayette, California. 1995. March 11. 4½ inches diameter. Green, gold, and red on white. "No dairy. No cholesterol. No lactose. No butterfat." Soyfoods Center product evaluation: Flavor: Excellent. Texture: Too dry and crumbly, hard to use as a spread or dip. Price: Expensive, at $2.39 for 8 oz.

Product (French Onion) with Label purchased at Noah's New York Bagels in Lafayette, California. 1995. Aug. 24. 4½ inches diameter. Orange, red, and brown on white. "No dairy. No cholesterol. No lactose. No butterfat." Soyfoods Center product evaluation: Flavor: Excellent. Texture: Excellent. Price: Expensive, at $2.95 for 8 oz. Natural-food detractors of this product note that it is not hard to make a product like this taste good if you are willing to use hydrogenated oils plus mono- and di-glycerides.

8307. Tomsun Foods International, Inc. 1987. Form 10-Q, Quarterly Report, Securities and Exchange Commission (SEC). Greenfield, MA 01301. 9 p. Dec.
• ***Summary:*** Current Liabilities: Trade accounts payable = $1,292,002

Total Current Liabilities = $1,646,828

Net Loss: 40 Week Period Ended October 10, 1987 = $2,255,949;

Net Loss: 40 Week Period Ended October 4, 1986 = $889,821.

Net sales in the 3rd quarter of 1987 were $1,182,000, representing an increase of $258,000 as compared with the 3rd quarter of 1986, a 28% increase. This increase was primarily in Jofu sales. In the Boston market Jofu held a 1.6% share of the yogurt dollar volume for the four weeks ending Oct. 10, 1987 according to Nielsen Marketing Research, a reduction of only 25% from the spring despite greatly reduced marketing efforts. During this period sales of the Company's new product (Jofu) increased 144%, from $257,000 in the 3rd quarter of 1986 to $627,000 in the 3rd quarter of 1987.

The net loss for the 3rd quarter of 1987 was $752,000, compared with a loss of $540,000 for the 3rd quarter of 1986, and a loss of $960,000 for the 2nd quarter of 1987. Jofu has maintained a sales level of 7,000 cases/week since June, with only minimal promotional support and no advertising media support. Jofu will be reformulated to improve the freshness of its taste and to simplify the manufacturing process. Thomas Timmins is Chairman of the Board and Treasurer of Tomsun Foods International, Inc. Address: Massachusetts.

8308. **Product Name:** [Soymilk with Okara Mixed In, Tofu with Okara Mixed In].
Foreign Name: Okara o mazete tônyû, Maiyuki.
Manufacturer's Name: World Foods. Affiliate of Chujitsu-ya.
Manufacturer's Address: Kabuki-cho 2-1-11, Shinjuku-ku, Tokyo, Japan. Phone: 03-209-2121.
Date of Introduction: 1987. December.
New Product–Documentation: Toyo Shinpo (Soyfoods News). Nov. 1. p. 1. Okara o mazeta tonyu [Soymilk with okara mixed in. World Foods, the affiliate company of Chujitsuya, received a patent for their production method in making health foods from raw materials]. Mr. Kichitomo Tagaki is president of Chujitsuya, and Mr. Hatsuo Suki is

© Copyright Soyinfo Center 2013

president of World Foods, Hamura-cho, Tokyo, Japan. The patent is called "Shokubutsu seni shoka tonyu no seizo-ho" (Vegetable fiber enriched soymilk production method). The process works by creating high pressure (400-1000 kg per square cm) to break the soybeans into 50 micron diameter granules. They boil the soybean granules (karyu) to make soymilk. Then 100,000 volts of electricity is used force the protein in the soybeans to coagulate and to whiten the soymilk. Using this process, the manufacturer can get a milder tasting and more stable soymilk. This company already has a product, Maiyuki, which has okara in the tofu.

Manufacturer's Address: 223 Wai Yip St., Kwun Tong, Kowloon, Hong Kong.
Date of Introduction: 1987.
New Product–Documentation: Soya Bluebook. 1987. p. 96.

8312. Barman, Genevieve; Dulioust, Nicole. 1987. Un groupe oublié: Les étudiantes-ouvrières chinoises en France [A forgotten group: The Chinese student-workers in France]. *Etudes Chinoises: Bulletin de l'Association Française d'Études Chinoises* 6(2):9-46.
• ***Summary:*** The article begins: For some years now, articles dedicated to the movement of overseas Chinese in France (*qingong jianxue yundong*) largely due to the French branch of the PCC and its leaders, have been increasing, largely because of the French branch of the PCC [perhaps *Parti Communiste Chinois*].

In 1912, when Li Yuying, Wu Zhihui, and Cai Yuanpei founded in Peking the *liuFa jianxuehui,* of the Society for Rational French Education, with the intent of preparing the young people for low-cost studies in France, one important goal was the education of young women. The same year a more specific society was established, the Society of Frugal Studies (*liuFa nüzi jianxuehui*). Resolute innovators, its goal was to promote not only the education of women, but also the reform of the family and social equality (p. 10; see also endnote 1).

The first four student workers, Fan Xinshun, Fan Xinqun, Li Zhixin and Xiong Shubin, all from Hunan province, embarked from Shanghai in November 1919 with 70 young people, including Nie Rongzhen and Yan Changxi (Endnote 25). Upon their arrival in France, the cousins Fan were admitted as workers at the tofu factory Caséo-sojaine at Garenne-Colombes. The entrance of two young ladies, both from good families, one of whom was the daughter of the director of the customs house at Changsha, in this sacred hall of the anarchist utopia of Li Yuying, is heralded by the Chinese press as an event without precedent in the history of Chinese women (p. 17 and p. 20; endnote 26). See article in *Shenbao* of 10 Dec. 1919. Also FFQG (*FuFa qingong jianxue yundong shiliao*) [Documents on the Diligent Work-Frugal Study Movement in France. Beijing: Chubanshe, 1980. 3 vols.].

Senator Hugues Le Roux [lived 1860-1925; a French journalist, he was a senator during the Third Republic from 1920 until his death on 14 Nov. 1925] came from a line of Norman shipowners [ship-owners] who had long had good dealings with China. Having himself spent some time in Peking, he was interested from the outset in the Franco-Chinese education projects organized by Li Yuying and his friends (p. 20; see endnote 32).

Fan Xinqun, one of the two workers from Li Yuying's tofu factory (*de l'usine Caséo-sojaine*), in 1924 won a silver medal in the painting competition at the School of Fine Arts in Lyon (*l'École de Beaux-Arts de Lyon*) (p. 29).

8313. **Product Name:** TrueHealth Tofunnaise (Tofu Mayonnaise).
Manufacturer's Name: Birchwood Health Products.
Manufacturer's Address: Unit 1D, Alyn Industrial Estate, Llay Hall, Wrexham, Clwyd, Wales, UK.
Date of Introduction: 1987.
Wt/Vol., Packaging, Price: Jar.
New Product–Documentation: Ad in The Vegan. 1988. Spring. p. 21. "TrueHealth Soya Products... No animal contents. High in protein. Low in carbohydrates. All essential amino acids." Ad shows Label on jar. "Egg-free."

8314. **Product Name:** Tofu Carob Delite, and Tofu Chocolate Delite (Blended Puddings).
Manufacturer's Name: Bountiful Bean Plant.

© Copyright Soyinfo Center 2013

Manufacturer's Address: 2049 1/2 Atwood Ave., Madison, WI 53704. Phone: 608-241-8700.
Date of Introduction: 1987.
Ingredients: Tofu, honey, soymilk, carob, water, vanilla, oil, lecithin, agar.
Wt/Vol., Packaging, Price: 5 oz.
How Stored: Refrigerated.
New Product–Documentation: Label. 1985. 2.75 by 1.5 inches. Self adhesive. Blue on white. "Low calorie. Non-Dairy."

Letter from Deborah Bachmann. 1991. Dec. 17. This product, a blended pudding, was made by Bountiful Bean and introduced in about 1986-87.

8315. Carter, Thomas E., Jr. 1987. Genetic alteration of seed size: Breeding strategies and market potential. In: Dolores Wilkinson, ed. 1987. Proceedings of the 17th Soybean Seed Research Conference 1987. See p. 33-45. [21 ref]
• ***Summary:*** Contents: Introduction. Soyfood market size. Soyfood market trends–short and long range. Premiums and acreage, the breeder's perspective. Breeding special varieties. Future breeding goals. Conclusions.

"The expanding soyfood markets in Japan and the U.S. have generated considerable interest among American soybean producers in recent years. More than 60% of the soybeans used in these markets are grown in the U.S."

"In survey results, 39 of 43 public breeders and 44 or 67 private breeders responded to questions regarding the breeding of specialty varieties. Twenty-four breeders reported that they are maintaining 36 separate projects for large- and small-seeded varieties (Table 3). Public and private breeders are represented equally in this effort with the majority of these projects underway in the Midwest. Eight public and eight private programs are developing varieties specifically for tofu while 13 public and 7 private programs are developing varieties for natto. One public breeder was interested in soy milk varieties but considered varieties for tofu and soymilk as the same. One private and two public breeders are interested in large-seeded garden types for the fresh market in urban areas with large oriental populations. One public and one private breeder expressed interest in small-seeded varieties for sprouts. Soybean sprouts are primarily a Korean soyfood; and, Koreans buy U.S. soybeans for making sprouts in some years." Address: Research Geneticist, USDA-ARS, North Carolina State Univ., Raleigh, NC. Phone: 919-737-2734.

• ***Summary:*** The section titled "About tofu" (p. 72) describes how to freeze tofu at home: "Fresh tofu, in any form. can be frozen. Once frozen, fresh tofu changes from white to pale yellow. Thawed, it has a sponge-like texture.

"To freeze tofu: Drain, place in a freezer bag. Label, date and freeze. Allow to freeze at least 24 hours before using. Frozen tofu will keep up to 6 months.

"To thaw frozen tofu: Thaw in the refrigerator or place frozen tofu in a heat-proof container, cover with boiling water. Let stand until thawed, 15 or more minutes depending on the thickness of the frozen tofu. Gently press out the excess water. Use as directed in recipes."

Asian markets sell deep fried tofu, also known as tofu puffs, abura-age or atsu-age. Golden brown in color, they come in various shapes and weights, but are generally very light in weight.

Deep fried tofu is fresh tofu that has been deep fried. During deep-frying, most of the water in the fresh tofu evaporates and the interior become somewhat hollow and porous. Describes how to make deep fried tofu at home.

8317. **Product Name:** [Seasoned Tofu].
Foreign Name: Tofu Mix.
Manufacturer's Name: Conserves Estavayer S.A. Sold at Migros supermarkets.
Manufacturer's Address: Case Postale 29, CH-1470 Estavayer le Lac, Switzerland. Phone: 037 63 91 11.
Date of Introduction: 1987.
Ingredients: Tofu, water, starch, garlic, sea salt, spices, herbs, vegetable oil, binders, flavor intensifiers.
Wt/Vol., Packaging, Price: 250 gm.
How Stored: Refrigerated.
Nutrition: Per 100 gm: protein 11 gm, fat 7 gm, carbohydrates 4 gm, calories 124.
New Product–Documentation: Letter from P. Jaccard and A. Dillier of Conserves Estavayer. 1988. June 27. Label. 1988. 3 by 3.75 inches. Self adhesive. Black and green on yellow. Drawing of soybeans and leaves. This is an ingenious, sophisticated label, unlike any we have ever seen in the USA. Between the label surface and its self-adhesive backing is a "built-in" recipe leaflet with 3 color photos and 9 recipes in German, French, and Italian. At the lower edge of the label is a small drawing of scissors and the words "open here." Note that this product contains tofu as the main ingredient. In America most products named "Tofu Mix" contain no tofu; they are mixtures of seasonings meant to be stirred into tofu."But it is not necessary to mix this product with other ingredients. You can unwrap it and fry it in oil or butter."

8318. **Product Name:** [Soyanaise].
Manufacturer's Name: De Hobbit.
Manufacturer's Address: Waterstraat 4, B-9980 St. Laureins, Belgium.
Date of Introduction: 1987.
New Product–Documentation: Soya Bluebook. 1987. p. 98.

© Copyright Soyinfo Center 2013

8319. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Die Tofurei.
Manufacturer's Address: Hueetlinstr. 10, D-7750 Constanz, West Germany. Phone: 07531-21897.
Date of Introduction: 1987.
New Product–Documentation: Letter from Thomas Karas of Soyastern. 1989. April 21. List of members of new Organic Soyfoods Assoc. The owners are Robert Mestel and Kurt Mueller.

Die Geschäftsidee. 1989. Dec. p. 32. Kurt Mueller has made tofu in Konstanz since 1987. In Aug. 1989 he moved into a bakery. He makes 800 kg/week of tofu.

Letter from Bernd Drosihn of Viana Naturkost. 1990. April 8. Around the Bodensee in the south of Germany there are several little tofu manufacturers. All of them supply fresh tofu in water, in the best Japanese tradition. The biggest and oldest one is Die Tofurei, Hueetlinstr. 10, D-7750 Konstanz.

8320. **Product Name:** Tofu Spinach Dill Dip.
Manufacturer's Name: Fresh Tofu Inc.
Manufacturer's Address: 900 Line St. (P.O. Box 1125), Easton, PA 18042. Phone: 215-258-0883.
Date of Introduction: 1987.
New Product–Documentation: Talk with Gary Abramowitz. 1989. Aug. 21. This dip was introduced some time in 1987.

8321. **Product Name:** Tofu (Japanese Style), Firm Tofu (Chinese-Style), Atsu-Agé (Tofu Cutlets), Agé (Tofu Puffs), Soymilk, Tofu Pudding (Sweet).
Manufacturer's Name: Fuji Fresh Tofu Co.
Manufacturer's Address: 248 Jackson St., San Jose, CA 95112. Phone: 408-297-1666.
Date of Introduction: 1987.
How Stored: Refrigerated.
New Product–Documentation: Talk with Linda Lam, owner of Fuji Fresh Tofu. 1994. April 8. She purchased this company in about Oct. 1987. From the outset, she and her husband made the products shown above.

8322. **Product Name:** [Takaramame Soy Flour, Fujinik Ace, Fujipur SP, Apex {Simulated Meat Products}, Ganmo {Wild Goose Meat Analog}, and New Soyees {3 Textured Soy Flours}].
Manufacturer's Name: Fuji Oil Co. Ltd.
Manufacturer's Address: Nissei Midosuji Hachimancho Building, 6-1 Hachimancho, Minami-ku, Osaka 542, Japan.
Date of Introduction: 1987.
New Product–Documentation: Soya Bluebook. 1987. p. 74, 78.

8323. **Product Name:** [Usuage (Fried, Frozen & Sliced Tofu)].
Manufacturer's Name: Fuji Oil Co. Ltd.
Manufacturer's Address: Nihonseimei Midosuji Hachiman-cho Building, 6-1 Hachiman-cho, Minami-ku, Osaka 542, Japan.
Date of Introduction: 1987.
New Product–Documentation: Soya Bluebook. 1987. p. 96.

8324. **Product Name:** Firm Tofu, Regular Tofu, Smoked Tofu, Fermented Tofu.
Manufacturer's Name: Full of Beans Soyfoods.
Manufacturer's Address: Castle Precincts, Castle Ditch Lane, Lewes, East Sussex, BN7 1XH, England.
Date of Introduction: 1987.
New Product–Documentation: Soya Bluebook. 1987. p. 96.

8325. **Product Name:** [Tofu Spread (Like a Liver Pâté, or Spiced)].
Foreign Name: Tofunette-Kraeuter Pâté.
Manufacturer's Name: Galactina Ltd.
Manufacturer's Address: Birkenwej 1-6, CH-3123 Belp, Switzerland. Phone: 031-81-1111.
Date of Introduction: 1987.
New Product–Documentation: Letter from Peter Speck. 1988. March 11. "In 1987 we introduced a tofu spread, which is probably worldwide the spread with the lowest fat content. It was quite a challenge to develop a spread with less than 10% fat content without losing good spreadability."

Talk with Peter Speck. 1990. May 23. Peter thinks that the tofu spread is Galactina's best product. One flavor is like a liver pâté and the other is spiced with herbs.

8326. **Product Name:** Medium Hard Tofu (Curded with Calcium Sulfate).
Manufacturer's Name: Giant Tofu.
Manufacturer's Address: 300 Morse St., Washington, DC 20002. Phone: 202-546-0333.
Date of Introduction: 1987.
How Stored: Refrigerated.
New Product–Documentation: Talk with George Chong, owner. 1998. Feb. 10. This was their second product, introduced in about 1987.

8327. **Product Name:** [Windmill Tofu, Smoked Tofu, Tofu Burgers, Satem Tofu {Packed in Foil}].
Manufacturer's Name: Heuschen-Schrouff B.V.
Manufacturer's Address: Reeweg 137, 6381 BW Ubach over Worms, Netherlands.
Date of Introduction: 1987.
New Product–Documentation: Soya Bluebook. 1987. p. 96. This company is the largest tofu manufacturer in Europe. Letter from Harry Whitford of Soyastern. 1987. Dec. 14.

© Copyright Soyinfo Center 2013

Holland, once the company with the most tofu producers, is now dominated by this one company. Only the company Morgenstond still produces tofu themselves. All others have concentrated on tofu based products, buying their raw materials from H-S. We estimate the latter's total production to be at the very least 20,000 kg/week. It could run as high as 50,000 kg/week. They sell huge amounts at dumping prices on the Asian-shop market, and claim to make organic tofu for the bio-shops, but seeing that they refuse to allow any control organization to check their records on bean purchases, nobody believes that their tofu is organic.

8328. **Product Name:** Hinoichi Soy Drink [Natural (Dairylike), Mocha, or Chocolate].
Manufacturer's Name: House Foods & Yamauchi, Inc.
Manufacturer's Address: 526 Stanford Ave., Los Angeles, CA 90013. Phone: 213-624-3615.
Date of Introduction: 1987.
Ingredients: Water, whole soybeans, barley malt, pearl barley, kombu (seaweed), sea salt.
Wt/Vol., Packaging, Price: 6 fluid oz (180 ml) foil retort pouch.
How Stored: Shelf stable; refrigerate after opening.
Nutrition: Per 6 fl. oz. Natural: Calories 120, protein 6 gm, carbohydrates 10 gm, fat 6 gm, sodium 100 mg, cholesterol 0. Percentages of U.S. RDA: Protein 10%, calcium 6%, iron 6%.
New Product–Documentation: Label. 1988. 4 inches by 6.25 inches. Foil pouch. Natural is blue, red, green, and white. Mocha and chocolate are brown, red, green, and white. Front panel shows a glass full of the product with a straw in it set in a bed of ice with a few green leaves behind.

8329. **Product Name:** Soft (Silken) Tofu.
Manufacturer's Name: Louie Foods International.
Manufacturer's Address: 471 S. Teilman Ave., Fresno, CA 93706. Phone: 209-264-2745.
Date of Introduction: 1987.
New Product–Documentation: Talk with Jay Louie. 1988. April 4. He calls this product "soft tofu."

8330. Luczycki, Dorothy. 1987. Study on the acceptability of tofu among college students. MSc thesis, Southern Illinois University at Carbondale, Carbondale, Illinois. 57 p. [67 ref]*
Address: Trinity Medical Center, Carrollton, Texas 75006.

8331. **Product Name:** Tofu Ice Kream Mix (Dry Mix for Frozen Dessert).
Manufacturer's Name: Magic Mill. A Div. of CI. Made in the USA by Great American Foods.
Manufacturer's Address: 1911 South 3850 East, Salt Lake City, Utah. Phone: 801-972-0707.
Date of Introduction: 1987.
Ingredients: Crystalline fructose, cereal solids (from corn), soy oil, dehydrated tofu, dutch cocoa, natural flavor, sea salt, soy lecithin, guar gum, gelatin.
Wt/Vol., Packaging, Price: 470.4 gm (16.6 oz) can. Retails for $4.95 (7/90, California).
How Stored: Shelf stable.
Nutrition: Per 4 oz (39.2 gm): Calories 200, protein 1 gm, carbohydrate 31 gm, fat 8 gm, cholesterol 0 mg, sodium 50 mg.
New Product–Documentation: Product with Label purchased at Adventist Book Center, Pleasant Hill, California. 1990. July 8.

Talk with Magic Mill. 1990. July 11. Magic Mill was founded in about 1986. The company's best-selling products are the Magic Mill Grain Grinders/Mills. Steve Storey was with the company but he no longer is. Jim Harrison was the founder and present president. Great American Foods makes the product, and Magic Mill markets it. The parent company is named Constellation Incorporated. It was started before 1986 by Jim Harrison. Its divisions are Magic Mill International and Great American Foods. All three companies are located in the same building.

Talk with Craig Klatt, Manager of Adventist Book Center. 1990. July 18. The ice cream mix is made by Mormons and is part of a multi-level marketing program.

8332. **Product Name:** [Marusan Tofu].
Manufacturer's Name: Marusan-Ai Co., Ltd.
Manufacturer's Address: 1 Arashita Niki-cho, P.O. Box 444-21, Okazaki city, Aichi prefecture 444-21, Japan.
Date of Introduction: 1987.
New Product–Documentation: Soya Bluebook. 1987. p. 96.

8333. **Product Name:** Noble Bean Tofu Cutlets.
Manufacturer's Name: North Coast Tempeh Co. Tofu made by Cleveland Tofu Co.
Manufacturer's Address: 1088 Ivanhoe Rd., Cleveland, OH 44121.
Date of Introduction: 1987.
Ingredients: Tofu (soybeans, water, naturally occurring calcium sulfate), tahini, barley miso, spring water, corn oil, rice vinegar, spices.
Wt/Vol., Packaging, Price: 12 oz.
How Stored: Frozen.
New Product–Documentation: Label. 1987. 4.25 inches diameter, self adhesive. Red, green, yellow, and blue on white, with logo of Jack and the Beanstalk. "Pan Fry, Bake, Steam, or Grill. No Cholesterol." Jeff Narten. 1987. "History of North Coast Tempeh and its Products." 4 p. Dec. 7. Plus new current label.

8334. **Product Name:** The Soy Deli Gourmet Fresh Tofu Salads/Dips/Spreads [No Tuna Salad, Curry Salad, Dilly

© Copyright Soyinfo Center 2013

Salad, Garlic Salad / Dip, Mild Jalapeno Sesame Spread / Dip, Salada Sin Carne, Curry Savory Salad].
Manufacturer's Name: Quong Hop & Co.
Manufacturer's Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.
Date of Introduction: 1987.
Ingredients: No Tuna Salad: Organic tofu (water, organic* soybeans, nigari), safflower oil, sunflower seeds, shoyu (water, whole soybeans, whole wheat, sea salt), water chestnuts and/or jicama, cider vinegar, scallions, sesame oil, spices. * Grown in accordance with Calif. Health & Safety Code 26569.11.
New Product–Documentation: Talk with Ben Lee. 1988. Sept. 30. Introduced in 1987, this was a local line of fresh products. Not a lot is happening with this line, just a small local market. He is revamping a lot of the labels. Labels. 1987. 3.5 inch diameter. One color plus black on white. "Master Tofu-Makers Since 1906."

8335. **Product Name:** The Soy Deli Gourmet Fresh No Tuna Salad San (Tofu Sandwich).
Manufacturer's Name: Quong Hop & Co.
Manufacturer's Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.
Date of Introduction: 1987.
Ingredients: Organic tofu (water, organic* soybeans, nigari), safflower oil, sunflower seeds, shoyu (water, whole soybeans, whole wheat, sea salt), water chestnuts and/or jicama and/or celery, cider vinegar, scallions, sesame oil, spices, whole wheat bread, (and/or lettuce, sprouts, bell peppers). * Grown in accordance with Calif. Health & Safety Code 26569.11.
New Product–Documentation: Talk with Ben Lee. 1988. Sept. 30. Introduced in 1987, this was a local line of fresh products. Label. 1987. 3.5 inch diameter. Black and blue on white. "The original."

Manufacturer's Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.
Date of Introduction: 1987.
Ingredients: Organic tofu (water, organic* soybeans, nigari), fresh carrots and onions, sesame seeds, sunflower seeds, currants, safflower oil, sea salt and spices, sesame whole wheat bun, (and or bell peppers, avocado, lettuce, parsley, squash, sprouts), BBQ sauce, mild jalapeno, sesame tofu spread. * Grown in accordance with Calif. Health & Safety Code 26569.11.
Nutrition: Per 3.5 oz.: Calories 212, protein 17 gm, carbohydrate 8 gm, fat 13 gm.
New Product–Documentation: Label. 1987. 3.5 inch diameter. Red and black on white. "The Original. Master Tofu-Makers Since 1906."

8337. **Product Name:** The Soy Deli Gourmet Fresh Almond Veggie-Nut Butter (Tempeh-Based).
Manufacturer's Name: Quong Hop & Co.
Manufacturer's Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.
Date of Introduction: 1987.
Ingredients: Organic tempeh (water, organic* soybeans, Rhizopus oligosporus), apple cider, carrots, pinto beans, water, raw almonds, corn oil. * Grown in accordance with Calif. Health & Safety Code 26569.11.
How Stored: Refrigerated.
New Product–Documentation: Labels. 1987. 3.5 inch diameter. Salmon tan and black on white. "Master Tofu-Makers Since 1906."

8338. **Product Name:** [Low Fat Delicatessen Seafood and Tofu Pies (Low Fat Pastry)].
Manufacturer's Name: Sojadoc. Affiliate of Cooperative Occitane.
Manufacturer's Address: Zone Industrielle La Viscose, 81000 Albi, France.
Date of Introduction: 1987.
New Product–Documentation: Soya Bluebook. 1987. p. 100.

8339. **Product Name:** [Tofu].
Manufacturer's Name: Sojafarm.
Manufacturer's Address: Im Paradis, D-6531 Trechtingshausen, West Germany. Phone: 06721-6470.
Date of Introduction: 1987.
New Product–Documentation: Letter from Thomas Karas of Soyastern. 1989. April 21. List of members of new Organic Soyfoods Assoc. The owner is Lothar Stassen.

Die Geschäftsidee. 1989. Dec. p. 33. He began to make tofu in early 1987 with a partner. He became the sole owner when the partner left for Australia. He now makes 1,000 kg/week of tofu.

Letter from Bernd Drosihn of Viana. 1995. April 19. Sojafarm's address is unchanged except for the postal code, which is now 55413 Trechtingshausen. Phone: 06721 6470. Fax: 06721 6298.

Talk with (call from) Waltrand Stassen, Lothar's wife, who speaks good English. 1997. Dec. 9. They are considering making tofu noodles using a noodle machine. Talk (call from) with Waltrand Stassen. 2000. March 10. They are still in business and active. She sends a company catalog, brochure, and labels of 9 tofu products they make.

8340. **Product Name:** [Soft Nigari Tofu].
Manufacturer's Name: Sojalpe.
Manufacturer's Address: Saint Quentin sur Isère, 38210 Tullins, France. Phone: 76.93.60.21.

© Copyright Soyinfo Center 2013

Date of Introduction: 1987.
New Product–Documentation: Letter from Harry M. Whitford of Soyastern. 1987. Dec. 14. Located in SE France, they make 900 kg/week of soft nigari tofu using French organic soybeans (Nature et Progres logo). They are working on a line of commercial kitchen (institutional foodservice) products. They are high on ideas but low on francs. Most of their distribution is through natural food stores.

8341. **Product Name:** [Canned Tofu Entrees {Like Quenelles, Midway Between a Sausage and a Souffle}].
Foreign Name: Royales au Tofu.
Manufacturer's Name: Sojalpe.
Manufacturer's Address: Saint Quentin sur Isère, 38210 Tullins, France. Phone: 76.93.60.21.
Date of Introduction: 1987.
Ingredients: 67% tofu*, whole egg*, palm oil (not hydrogenated), flour (mehl)*, salt*, vegetables. * = Guaranteed organically grown.
Wt/Vol., Packaging, Price: Can.
New Product–Documentation: Letter from Harry M. Whitford of Soyastern. 1987. Dec. 14. "I found these entrees much better than similar Dutch products."

Manufacturer's brochure. 1987? In German. "Die Royales: Das Know-how der Kuechenchefs." The joy of eating... without putting on weight. We have developed Tofu-Royales with the aid of traditional recipes from Prosper Montagné (Chef: New Gastronomique Larousse) with constant care to present an excellent dietetic dish. Preparation: Bake Royales for 10 minutes in an oven with sauce, mushrooms, and green olives. Recipes for the following sauces are given: Tomato sauce, mushroom sauce, or fish or shellfish sauce. The company logo is a steepled building with 5 soy-shaped leaves growing out of the steeple, set in front of towering mountains. A photo on the front shows the Royales to be about the size and shape of small potatoes. Two dishes in sauces are shown. At the top is an illustration (line drawing) of a laughing male chef in a white top hat.

Alfa-Laval. 1988, June. Soyfoods: Old traditions with new potentials. p. 9. Shows a color photo of the front of the can. In the center of the label is a laughing male chef with a white top hat. Tan, yellow, white, red, and dark green.

8342. **Product Name:** [Tofu Burgers].
Foreign Name: Palets au Tofu.
Manufacturer's Name: Sojalpe.
Manufacturer's Address: Saint Quentin sur Isère, 38210 Tullins, France. Phone: 76.93.60.21.
Date of Introduction: 1987.
New Product–Documentation: Letter from Bernard Storup. 1989. March 3. Martial Gonin also marketed "palets au tofu," a kind of tofuburgers.

8343. **Product Name:** [Tempeh, and Tofu].
Foreign Name: Tempeh, Tofu.
Manufacturer's Name: Soleil de Lalise.
Manufacturer's Address: Domaine de Galise, 32260 Tachares, France. Phone: 62.65.35.63.
Date of Introduction: 1987.
New Product–Documentation: Letter from Jean-Luc Alonso of Gaia in Graulhet, France. 1994. May 16. In 1987, a company named Soleil de Lalise (meaning "the sun of Lalise"), located near Agen, also began to make tempeh and tofu. These products are still sold by this firm. Their address is: Domaine de Galise, 32260 Tachares, France. Phone: 62.65.35.63.

8344. **Product Name:** [Tofu Spreads, Preserves, and Tofunaise].
Manufacturer's Name: Solnuts B.V. (Witte Wonder).
Manufacturer's Address: Swaardvenstraat 41, P.O. Box 5066, 5048EB Tilburg, Netherlands.
Date of Introduction: 1987.
New Product–Documentation: Soya Bluebook. 1987. p. 96. Note that Solnuts now owns Witte Wonder, but the two companies have different addresses.

8345. **Product Name:** Soy Devine Cajun Barbeque Style (Frozen Tofu Entree) [As is, or on a Nine Grain Bun].
Manufacturer's Name: Soy Devine.
Manufacturer's Address: Box 668, Miranda, CA 95553.
Date of Introduction: 1987.
Ingredients: Processed organic tofu [frozen], tomato sauce, onions, honey, mustard, cider vinegar, safflower oil, tamari (Westbrae), peanut butter, garlic, miso, spices (incl. paprika, cayenne, allspice).
Wt/Vol., Packaging, Price: In a tub.
New Product–Documentation: Talk with Mara Devine. 1988. April 7. She used to make the Village Soyburger. This may be America's first second-generation product made with frozen tofu. She buys the tofu from Quong Hop. It is not shaped like a burger. She freezes the tofu, slices it, marinates it in a sauce, then bakes it, pours on the sauce and bakes it a little more. It is akin to Sloppy Joes. She also sells it in a bun. Its very chewy. She has a whole book on frozen tofu. Label. 1988. As is, 4.5 inches diameter. Black, red and green on a white lid. Logo of an angel with a soybean plant in both hands. "No additives or preservatives. Tasty hot or cold. Made with organic tofu and homemade barbecue sauce. All vegetable protein. Excellent texture. On tub: Serving suggestions. Great as a burger, in sloppy joes, in spaghetti sauce, as burrito or enchilada filling, over rice, pasta, or baked potato." Label for burger. 1988. 3 inch diameter. Black and yellow, with same logo.

Talk with Mara Devine. 1995. June 1. In 1995 Cajun Barbecue Style was renamed and divided into two products: Vegan Cajun Burger, and Cajun Tofu Sloppy Joe. She moved

© Copyright Soyinfo Center 2013

from Miranda to Arcata, California, in June 1993.

8346. **Product Name:** Thick Soya Milk, Soybean Residue, Soya Cutlets (Made from Residue), Soya Curry.
Manufacturer's Name: Soya House (U.N. Gunesekara and Co.).
Manufacturer's Address: 128, Kitulwatte Road, Off Elvitigala Mawatham Colombo 8, Sri Lanka. Phone: 597759.
Date of Introduction: 1987.
Ingredients: See below.
New Product–Documentation: Form filled out by Jane Gleason. 1988. She visited the shop in Colombo on 14 March 1988. These products are sold only on by special order. Thick Soy Milk retails for Rs. 15/kg to Colombo hospital. Residue (okara) for Rs. 5/kg. Soya Cutlets (made from okara) for Rs. 2/50 each. Soya Curry for Rs. 50/- per package contains 500 gm tofu, vegetables, oil, and spices.

8347. **Product Name:** [Soyana Soyani Tofu Sausage].
Foreign Name: Soyana Soyani.
Manufacturer's Name: Soyana.
Manufacturer's Address: Friedensgasse 3, Postfach 8039, CH-8002 Zurich, Switzerland. Phone: 01-202-8997.
Date of Introduction: 1987.
New Product–Documentation: Talk with Walter Dänzer of Soyana. 1990. May 30. Tofu sausages were launched in about 1987. Letter (fax) from Verena Krieger. 1990. May 31. Soyoni (Tofu Sausage) is one of Soyana's best-selling products.

Label sent by Verena Krieger. 1990. July 5. Biona certification symbol.

8348. **Product Name:** [Lentil Croquettes].
Foreign Name: Linzen Krokette.
Manufacturer's Name: Soyastern Naturkost GmbH.
Manufacturer's Address: Osteratherstr. 26, 5000 Koeln 60, West Germany.
Date of Introduction: 1987.
New Product–Documentation: Interview with Bernd Drosihn of Soyastern. 1987. Nov. 30. He is business manager at Soyastern. This is the company's #3 best seller among its ready to eat "Frischeprodukte." The dough is made with wheat flour and lentils. The filling is tofu.

8349. **Product Name:** [Tofu Pocket (Fried Tofu Stuffed with Sauerkraut)].
Foreign Name: Tofu Tasche.
Manufacturer's Name: Soyastern Naturkost GmbH.
Manufacturer's Address: Osteratherstr. 26, 5000 Koeln 60, West Germany.
Date of Introduction: 1987.
New Product–Documentation: Interview with Bernd Drosihn of Soyastern. 1987. Nov. 30. He is business manager at Soyastern.

8350. **Product Name:** [Soyastern Tofu Dressing].
Foreign Name: Soyastern Tofu Dressing.
Manufacturer's Name: Soyastern Naturkost GmbH.
Manufacturer's Address: Osteratherstr. 26, 5000 Koeln 60, West Germany.
Date of Introduction: 1987.
Ingredients: Tofu (Water, soybeans*), soy oil, apple vinegar*, honey+, sea salt, mustard*, yeast flakes, food starch (*Speisestaerke*), spices (*Gewuerze*). * = Organically grown (*aus kontrolliertem biologischen Anbau*). + = Cold strained/extracted (*kaltgeschleudert*).
Wt/Vol., Packaging, Price: 280 ml glass jar.
How Stored: Shelf stable, 6 month shelf life.
New Product–Documentation: Interview with Bernd Drosihn of Soyastern. 1987. Nov. 30. He is business manager at Soyastern. Packed cold in a glass jar and not retorted, this product is shelf stable (6 months) because of its low pH (4). Label. 1987. 8 by 1.5 inches. Yellow, red, and green on white. "Nur 23% Oel. Cremig unpasteurisiert."

8351. **Product Name:** [Soyastern Tofu Tomato Dressing].
Foreign Name: Soyastern Tofu Dressing Tomate.
Manufacturer's Name: Soyastern Naturkost GmbH.
Manufacturer's Address: Osteratherstr. 26, 5000 Koeln 60, West Germany.
Date of Introduction: 1987.
Ingredients: Tofu (Water, soybeans [*Soyabohnen*]*), soy oil (*Soyaoel*), apple vinegar*, honey+, tomato sauce, sea salt, mustard*, yeast flakes, food starch, spices (*Gewuerze*). * = Organically grown (*aus kontrolliertem biologischen Anbau*). + = cold strained/extracted (*kaltgeschleudert*).
Wt/Vol., Packaging, Price: 280 ml glass jar.
How Stored: Shelf stable, 6 month shelf life.
New Product–Documentation: Interview with Bernd Drosihn of Soyastern. 1987. Nov. 30. He is business manager at Soyastern. Packed cold in a glass jar and not retorted, this product is shelf stable (6 months) because of its low pH (4). Label. 1987. 8 by 1.5 inches. Yellow, red, and green on white. "Nur 23% Oel. Cremig unpasteurisiert."

8352. **Product Name:** Duchesse Sandwich Spread.
Manufacturer's Name: St. Giles Foods Ltd.
Manufacturer's Address: St. Giles House, Sandhurst Rd., Sidcup, Kent, DA15 7HL, England.
Date of Introduction: 1987.
Ingredients: Sunflower oil, soya bean curd (tofu), cider vinegar, cucumber pickle (cucumber, vinegar, dill, sea salt), onion, vegetable oil, maize starch, concentrated apple juice, paprika, sea salt, natural gums as stabilisers (xanthan and guar), dill weed, mustard, garlic, turmeric, spices.
Wt/Vol., Packaging, Price: 170 ml wide-mouth jar with gold screw cap.

© Copyright Soyinfo Center 2013

How Stored: Shelf stable; refrigerate after opening.
Nutrition: Per 100 ml: Calories 315, oil 30%, protein 1.5%, carbohydrate 6%, fibre 2%, cholesterol 0.005%, polyunsaturates in oil 50%.
New Product–Documentation: Photo of jar and label. 1987, undated. 2 by 6 inches. White and gold on black. "All-Natural. With Dill Pickle in Low Cholesterol Dressing." Letter from Simon Bailey. 1988. Oct. Full address. Gives company name as St. Giles Foods Ltd.

8353. Sun Youth Machinery Co., Ltd. 1987. Equipments for soymilk, bean curd, and dried bean curd. Factory: No. 6, Lane 229, Hwa Chen Rd., Hsin Juang Taipei Hsien, Taiwan. 15 p. Manufacturer's catalog. Undated. [Eng; Chi]
• ***Summary:*** The many pieces of modern equipment look quite similar to those made by Takai in Japan. This "dried bean curd" is probably the Chinese "doufugan," a very firm tofu which is not dried. Address: Taipei, Taiwan. Phone: 02-9931-1826-8.

8354. **Product Name:** Lolita's Lovlies [Tofu Salads, or Sandwiches].
Manufacturer's Name: Surrey International.
Manufacturer's Address: North New Jersey.
Date of Introduction: 1987.
New Product–Documentation: Interview with Robert Werz of Appropriate Foods. 1987 Oct. 16. They are still making the pie.

8355. Takao, S.; Nakashima, H.S.; Tokumoto, M.; Saitoh, M.; Watanabe, M. Assignors to Terumo Corp. 1987. Treated soybean with reduced phosphorus and potassium levels, process for preparing the same, and processed soybean foods obtained therewith. *European Patent Application* 0,234,998 A1. Corresponds to Japanese Patent 86-13681. [Eng]*
• ***Summary:*** Soybean products with reduced levels of phosphorus and potassium. Suitable for use in the treatment of renal disease are described. They include soymilk, puffed foods, tofu and cake mix. The phosphorus and potassium components of the soybeans are reduced by soaking the beans in a solution at pH 3.0-6.5, and then washing them at pH 5.0-9.0. Address: Terumo, Tokyo 151, Japan.

8356. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Thomas Jakobi.
Manufacturer's Address: Fuerstenbergstr. 87, 7750 Konstanz, West Germany.
Date of Introduction: 1987.
New Product–Documentation: Interview with Bernd Drosihn of Soyastern. 1987. Nov. 30. He says they make about 200 kg/week of organic nigari tofu.

Talk with Harry Whitford of West Germany. 1990. May 20. Thomas and some woman were sharing this company at one time. He thinks they both stopped at about the same time. Kurt Mueller may know the details.

8357. **Product Name:** [Tofu in Sauces (Bolognese Sauce, Curry Sauce, Paprika-Cream Sauce)].
Foreign Name: Tofu in Bolognese-Sosse, in Curry Sosse, in Paprika-Rahmsosse (im Becher).
Manufacturer's Name: Tofukost-Werk TKW GmbH.
Manufacturer's Address: Siemensweg 1, D-4724 Wadersloh-Diestedde, West Germany. Phone: 02520-1300.
Date of Introduction: 1987.
Ingredients: Paprika-Cream: Tofu, water, flour, soymilk, onions, vegetable oil, seasonings, corn, cucumbers.
Wt/Vol., Packaging, Price: 250 gm transparent plastic tubs with aluminum foil lid (about 150 gm tofu and 100 gm sauce). 12 tubs per 3 kg case.
How Stored: Refrigerated, 42 day shelf life at 8ºC.
Nutrition: Paprika-Cream: Protein 6.9%, water 82.8%, fat 4.8%, pH 5.4, ash 1.9%, carbohydrate 2.6%, energy 81.8 calories/100 gm.
New Product–Documentation: TKW color catalog. 1988. April. Color photo of products shows each Label. Red, black, yellow, and white.

8358. **Product Name:** [Tofu Patty with Dehulled Wheat and Rye].
Foreign Name: Tofulaib. mit gekeim. Weizen und Roggen.
Manufacturer's Name: Tofurei Wels. Renamed Schoen Tofurei in 1987.
Manufacturer's Address: Prinz Eugen Strasse 1, A-4600 Wels, Austria. Phone: 07242/834222, 78073.
Date of Introduction: 1987.
Wt/Vol., Packaging, Price: 160 gm for 21 currency units.
New Product–Documentation: Price List sent by Walter Schoen. 1988. With dates products were introduced.

8359. **Product Name:** Sunoya (Soya Paneer) [Dairylike Plain, Rich & Creamy, Firm Browning].
Manufacturer's Name: Vega Industries.
Manufacturer's Address: 34A Florida Apartments, 33 Mount Mary Rd., Bandra (W), Bombay, 400050, India. Phone: 642-1863.
Date of Introduction: 1987.
New Product–Documentation: Owner: Arvind Chandra. He sells this mostly to the institutional market, with only a few retail outlets. Paneer sells for 45-50 rupiah/kg. He sells this for half the price, 25 rupiah/kg in Bombay.

Food Supply." 1983. [33 ref]
• ***Summary:*** Contents: Introduction. Traditional uses of whole soybeans as food. Hydration of whole soybeans. Tofu. Tempeh. This article focus mostly on to tofu and tempeh, which are made by two simple processes for converting soybeans into interesting and attractive foods.

Table 8.1 lists 6 Oriental nonfermented soybean foods, and Table 8.2 lists 6 Oriental fermented soybean foods. Address: NRRC, Peoria, Illinois.

8361. **Product Name:** Westico Tofu.
Manufacturer's Name: Westico Foods.
Manufacturer's Address: West Indies College, Mandeville, Jamaica.
Date of Introduction: 1987.
New Product–Documentation: Form filled out by Westico. 1990. June 28.

8362. **Product Name:** Traditional Nama Agé. Renamed Pineapple Teriyaki Tofu Cutlets.
Manufacturer's Name: Wildwood Natural Foods of Santa Cruz, Inc.
Manufacturer's Address: 1560 Mansfield Ave., Suite D, Santa Cruz, CA 95062. Phone: 408-476-4448.
Date of Introduction: 1987.
Ingredients: 1998: Wildwood Tofu (filtered water, organic soybeans grown in accordance with the California Organic Foods Act of 1990, nigari {magnesium chloride, a natural firming agent}), hi oleic acid safflower oil, unsweetened pineapple juice, soy sauce, pineapple concentrate, ginger, garlic powder, ginger powder, onion powder.
Wt/Vol., Packaging, Price: 6.5 oz vacuum pack.
How Stored: Refrigerated.
New Product–Documentation: Label sent by Billy Bramblett. 1998. July. He says this product was introduced in 1987, originally called Traditional Nama Agé, and made at Wildwood's plant in Santa Cruz.

8363. **Product Name:** Mid-East Hummus.
Manufacturer's Name: Wildwood Natural Foods.
Manufacturer's Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1987.
Ingredients: Organic garbanzo beans (grown in accordance with the California Organic Foods Act of 1990), sesame tahini, lemon juice, olive oil, filtered water, garlic, salt, citric acid.
Wt/Vol., Packaging, Price: 12 oz (340 gm) plastic tub.
How Stored: Refrigerated.
New Product–Documentation: Label sent by Billy Bramblett. 1998. July. He says this product was introduced in 1987, and made at Wildwood's plant in Fairfax. On the front label (black and dark green on beige) is a silhouette of a wild wood of trees, plus a few flying birds, against the sky. On the back label are ingredients, nutrition facts and the company's two addresses in Santa Cruz and Fairfax, California.

8364. **Product Name:** [Salad Dressing].
Foreign Name: Slasaus.
Manufacturer's Name: Witte Wonder Natural Products B.V.
Manufacturer's Address: Gelreweg 4b, 3843 AN Harderwyk, Netherlands.
Date of Introduction: 1987.
Ingredients: Tofu, water, sunflower oil, corn syrup, vinegar, mustard, sea salt, guar gum (as a thickener), saffron.
Wt/Vol., Packaging, Price: 300 ml tall glass jar.
How Stored: Shelf stable.
Nutrition: Protein 4.3%, fat 23.3%, carbohydrates 6.0%, calories per 100 gm = 496.
New Product–Documentation: Leaflet. 1989. "Slasaus, tofunaise citroen, tofunaise naturel. Romige Smaakmakers op Tofubasis." Creamy Taste-makers based on tofu. Slasaus contains only 23% oil. Shows label with sliced fresh vegetables on front. The product is "deliciously creamy." Address given as Slachthuiskade 10–2685 LN Poeldijk, which is a new plant. Letter from Sjon Welters. 1989. Aug. 9. Says product was introduced in 1987. Previously listed as 1986, April but no documentation.

8365. **Product Name:** Yves Tofu Chili Dogs (Meatless Hot Dogs Made with Tofu).
Manufacturer's Name: Yves Natural Foods.
Manufacturer's Address: 1138 East Georgia St., Vancouver, BC, V6A 2A8, Canada. Phone: 604-251-1345.
Date of Introduction: 1987.
Wt/Vol., Packaging, Price: 12 oz per package of 9. Vacuum packed.
How Stored: Refrigerated, 38 day shelf life.
New Product–Documentation: Talk with Michael Weiner. 1987. Dec. 16. "Made from a special blend of authentic Mexican Style spices and seasonings," they come 8 to a pack and can be refrigerated for up to 35 days. Leaflet. 1988. April. "Introducing Yves Tofu Chili Dogs."

Spot in SoyaFoods. 1990. Dec. Yves' tofu delicatessen line is now available in the UK. The meatless products include tofu wieners, Mexican style tofu chili dogs, and tofu deli slices.

• ***Summary:*** Chapter 14, titled "Tofu and Tempeh," begins: "I make tofu once a week and the result of half an hour of work is four tofu meals and at least as many tempeh made from soy pulp." A description of the process using a blender is given. Tofu recipes include Celestial Chicken (meatless), Tofu Fish (meatless), Sweet & Sour tofu. Okara tempeh recipes are for Spaghetti Tempeh (the favorite), and Tempeh Tacos. Address: Tools for Inner Growth, Box 520, Chiloquin, Oregon 97624.

8368. Ballentine, Rudolph. 1987. Transition to vegetarianism: An evolutionary step. Honesdale, Pennsylvania: Himalayan International Institute of Yoga Science nd Philosophy of the U.S.A. 314 p. Illust. Index. 23 cm. [601* footnotes]
• ***Summary:*** Contents: Foreword by Dr. Patrick C. Pietroni. Preface. Acknowledgments. Why vegetarian... and how: The vegetarian diet and health, beyond health–strength, endurance, and clarity of consciousness, the transition plan, getting started. Phase 1: Red meat. Phase 2: Poultry. Phase 3: Fish. Now that you're a vegetarian: Milk and eggs: Cleansing and dietary fiber, milk products–pros and cons, choosing a cooking medium–butter versus oil (discusses polyunsaturated oils and free radicals), translating principles into practice. The vegetarian diet in perspective: An overview. Notes. About the author (autobiographical, with a photo).

This is a carefully researched, well-conceived and well-written book with many footnotes and additional commentarial notes. It advocates phasing out red meat, then poultry, then fish to arrive at a lacto-vegetarian diet. Vegetarians should watch out for deficiencies of zinc, iron, and/or vitamin D.

On pages 96-97 the author discusses "The role of soy–and of 'ordinary beans." The amino acid content of soybeans is closer to ideal than that of most beans and peas because "they are less deficient in their limiting amino acids (methionine and cystine) than other legumes. This means that soy protein can stand alone as a source of protein in the diet better than can the proteins of other legumes, such as lentils, mung beans, or garbanzos... For this reason, soy products might be thought of as similar to milk. Both of them can function in the same way we saw milk helping wheat, to provide partial complementation, boosting the quality of protein in the grain, but benefiting little themselves. Or they can function in a different way by simply adding extra protein."

"Hence, a little cheese or tofu, for example, can be added to any meal whenever it is convenient, available, and needed to bolster overall protein intake. Soy products such as tofu are, therefore, excellent 'protein boosters,' and are preferably used that way rather than being used to replace other legumes that should be regularly served along with grains as a sort of inviolable marriage."

Soybeans and soyfoods should not be allowed to replace other legumes since they are relatively high in fat. As shown in the table on page 105, they derive about 41-55% of their calories from fat.

Page 184 notes: "The origin of the term 'vegetarian' can be traced to the Latin *vegetare,* which means 'to enliven.' This is related to *vegere* and *vigere,* which means 'to arouse' and 'to flourish.' From the latter also come 'vigorous' and 'vigil,' which connotes wakeful or alert. The most ancient root word is *wag,* to be lively or strong. The basis of the term 'vegetarian,' then, is a sense of liveliness, vigor, and alertness, rather than merely an indication of a diet of vegetables." Address: Himalayan Insternational Inst., R.R. 1, Box 400, Honesdale, Pennsylvania 18431. Phone: 717-253-5551.

8369. Bartholomai, Alfred. ed. 1987. Food factories: Processes, equipment, costs. Weinheim, West Germany: VCH Verlagsgesellschaft mbH. xv + 289 p. 24 cm. [Eng]
• ***Summary:*** Includes chapters on tofu plant by Takai Tofu & Soymilk Equipment Co. (Japan) (p. 157-59, Chap 22), surimi plant by K.L. Holmes and C. Riley (p. 207-14), protein recovery plant by J. Lyle (p. 223-27), soybean oil extraction plant by K. Weber (p. 231-35), and soymilk plant by Takai Tofu & Soymilk Equipment Co. (Japan) (p. 279-81, Chap. 41).

Within each chapter are the following sections: Introduction, economic considerations, social impact, plant design basis (capacity), plant layout and floor plan, process description. Takai has recently supplied/sold the following plants: (1) Tofu plants to Natural Inc. (Maryland, USA 30 kg/hour), Tempe Production BV (Netherlands, 30 kg/hour), and Castle Trading (Australia, 60 kg/hour). (2) Soymilk plants to Namyang Company (Korea, 2,000 liters/hour), Seoju Industrial Company (Korea, 1,000 liters/hour), Guilin Sweets and Food Factory (China, 1,000 liters/hour), Jinan Soymilk Factory (China, 1,000 liters/hour). Address: 570 Stanhope Rd., Sparta, New Jersey, 07871.

8370. Bates, Dorothy R. 1987. Kids can cook: Vegetarian recipes kitchen-tested by kids for kids. Summertown, Tennessee: The Book Publishing Co. 120 p. Illust. Index. 23 cm. Spiral bound.
• ***Summary:*** The index of this vegetarian cookbook contains

© Copyright Soyinfo Center 2013

listings for 4 tofu recipes and 1 miso recipe, plus definitions at the Ingredients sections of tofu, TVP (Texturized Vegetable Protein), tempeh, and miso. Dorothy Bates is the mother of Albert Bates, a lawyer at The Farm, and a patron of The Book Publishing Co. Address: Tennessee.

8371. Bernd Lehmann International Consultants. 1987. Food consultants offer world-wide services. Bernd Lehmann International's know-how leads to new products, systems, technologies (Leaflet). Hamburg, West Germany. 1 p. [1 ref]
• ***Summary:*** Every two years, Germany hosts ANUGA, the world's biggest food show. More than 5,000 suppliers from over 80 countries are represented. Bernd Lehmann International Consultants was founded in Hamburg in 1981. The company is now an international organization claiming more than 200 employees and associates worldwide. Last September the company held the first European Tofu Seminar in Munich, featuring a soya-based tofu delicatessen buffet. Address: Postfach 10 41 07, D-2000 Hamburg 1, West Germany. Phone: 040-33 70 90.

8372. Burum, Linda. 1987. Frozen delights. New York, NY: Charles Scribner's Sons. xii + 225 p. Index. 23 cm.
• ***Summary:*** "Including more than 300 inspired recipes for ice cream, sorbets, cakes, pies, and other frozen creations." The chapter titled "Lighter, Healthier Delights" (p. 176) contains a slew of tofu-based frozen desserts called Tofulato, all made with fruits: Fruit and berry tofulato. Lemonade tofulato. Orange juice tofulato. Concord grape tofulato. Boysenberry tofulato. Honey-banana tofulato (Variations: Honey-banana-nut tofulato, and Honey-banana-chocolate chip tofulato). Fresh pineapple tofulato. Mocha-almond tofulato. Maple-walnut tofulato.

Each recipes calls for the use of 10 ounces soft tofu or silken tofu, drained, plus 2-2½ teaspoons unflavored gelatin. In the introduction to the chapter, the author writes: "The tofulatos, great for people with cholesterol or dairy problems, offered a challenge. I wanted something with a delectable taste and texture, but I didn't want to add butterfat. However, frozen tofu does need something to smooth it out, and a little safflower oil and unflavored gelatin lends a creamy smoothness. The high-protein mixture is enhanced by the addition of concentrated fruit juices." Address: Santa Monica, California.

8373. Centro Tecnologico de Soya. 1987. Tofu o queso de soya. Super alimento natural [Tofu or soy cheese. Super natural food]. Barrio San Bartolo, Molino Belen, Solola, Solola, Guatemala. 19 p. [Spa]
• ***Summary:*** Contains 25 recipes, plus brief information on tofu nutrition and storage. Address: Solola, Guatemala.

8374. **Product Name:** Tofu.
Manufacturer's Name: Chang Shing Tofu, Inc.
Manufacturer's Address: 24 Lake St., Somerville, MA 02143. Phone: 617-628-2224.
Date of Introduction: 1987. January.
New Product–Documentation: 1995 Asian American Yellow Pages–New England Edition. Talk with Cathy Huynh. 1997. Feb. 11. She and her husband Albert started this company in 1987. The correct address is 24 Lake St., not 28.

8375. Diamond, Harvey; Diamond, Marilyn. 1987. Fit for life II: Living health. New York, NY: Warner Books. 490 p. [423* ref]
• ***Summary:*** The authors of the best-selling *Fit for Life* "America's #1 Diet Book," write more about their program based on the traditional Natural Hygiene philosophy. They encourage people to eat more raw foods and to cut down on animal products, especially on meat and dairy products. Chapter 18 is titled "Questions frequently asked." One of these (p. 323) is "*What about tofu?* This ancient food which originated in China over one thousand years ago has recently attracted our attention. It is an easily digestible protein which can play an important role in your diet as you begin to decrease your intake of animal protein. Tofu is made from soy milk, the liquid resulting when soaked and ground soy beans have been gently boiled for a short time. In high quality tofu preparation, the milk is then solidified with nigari (concentrate remaining when sea salt is extracted from sea water) or calcium sulfate (from gypsum). Tofu is rich in amino acids and calcium, containing more calcium by weight than dairy milk. It is also rich in iron, magnesium, phosphorous, potassium and sodium, essential B vitamins, choline and vitamin E. Unlike other proteins, it is alkaline, rather than acid. Because of this alkalinity and because it contains no crude soybean fiber, tofu combines well with starches, especially brown rice and other grains and whole grain breads. Watch for lots of new tofu recipes in the upcoming cookbook, *The Fit for Life Kitchen.*

The last major section of the book, titled "The Living Health Cookbook," contains recipes. Under "Soups, Sandwiches, and Rolled-Up Yummies," is a recipe for "Miso and Vegetables" (p. 405-06), a thick soup. The introduction to the recipe reads: "Miso is a soybean paste that is used in Japanese and macrobiotic cooking as a base for soups. It is also made from brown rice or barley, but these are not as common. I used to buy miso only in health food stores, but now I find it in the Asian food section of my supermarkets. In soup it has a mellow flavor and does not require the addition of any other flavorings, especially since it already has a slightly salty quality."

These are the only two references to soyfoods in the book.

8376. Dinshah, Freya. 1987. The vegan kitchen. 11th ed. Malaga, New Jersey: The American Vegan Society. 64 p.

© Copyright Soyinfo Center 2013

Illust. Recipe index. 28 cm. Spiral bound.
• ***Summary:*** The rear cover notes of this 11th edition: "Greatly enlarged and newly illustrated: Over 200 delightful recipes... all animal free! No flesh, fish, fowl, animal milk or dairy products, eggs, honey, gelatin, or other food of animal origin; no sugar or white flour." With this edition, an out-of-print cookbook by Freya titled *More Vegan Recipes* was inserted as an appendix in the back. This increased the size of the book by about one-third. The books advocates a raw food diet and food combining (following natural hygiene and Dr. Shelton). Contains many black and white photos.

In part I of this 11th edition, soy-related recipes are the same and on the same pages as in the 9th edition. Address: The American Vegan Society, 501 Old Harding Highway, Malaga, New Jersey. Phone: 609-694-2887.

8377. Downes, John. 1987. Soy source: A practical guide to cooking with soy foods. Chatswood, NSW, Australia: Nature and Health Books. Co-published in 1987 by Prism Press, 2 South Street, Bridport, Dorset DT6 3NQ, England. Distributed in the USA by Avery Publishing Group. 127 p. No index. 22 cm. [21 ref]
• ***Summary:*** Contents: Introduction, Nutrition & Soyfoods, Ingredients & Techniques, Glossary, Appetizers & Dips, Marinades & Accompaniments, Soups, Soup Noodles, Main Courses, Salads & Dressings, Desserts, Bibliography. A cookbook containing very little information about soyfoods in Australia. The author was born in 1949. Address: Australia.

8378. Editors of Sunset Books and Sunset Magazine. 1987. Light desserts: 175 fresh ways to end a meal. Menlo Park, California: Lane Publishing Co. 96 p. Illust. Index. 28 cm.
• ***Summary:*** See recipes for Tofu Banana-Pineapple Cheesecake (p. 15), and Vanilla Tofulato (ice cream made with 1 lb soft tofu, 1½ cups buttermilk, and 1/3 cup whipping cream, p. 71; includes 10 additional flavorings: Nondairy vanilla, banana, ginger or ginger-banana, malt or malt-banana, chocolate malt, carob, chilly chile, hazelnut praline, fresh berry). Subtitle on cover: 175 fresh ways to end a meal. Address: Menlo Park, California.

8379. Gentle World, Inc. 1987. The cookbook for people who love animals. 4th ed. P.O. Box 1418, Umatilla, FL 32784. 192 p. Introduction by Michael A. Klaper, M.D. Index. 26 cm. The first edition was copyrighted in 1981. The fifth edition (192 p.) was copyrighted in 1989.
• ***Summary:*** A good collection of over 300 vegan recipes, which are straightforward, appetizing, and nutritious. Special section includes recipes for cat and dog food. Contains 15 tofu recipes (including a non-fermented tofu yogurt, p. 13), plus several each using miso, soymilk, whole dry soybeans, and okara. The book contains many nice quotes about vegetarianism and veganism.

The cover of the 1986 ed. and of the fifth edition (copyrighted 1989) is red, orange, and green on yellow. The top of the cover states: "Over 300 totally vegetarian recipes, from beginner to gourmet. No meat–No eggs–No dairy–No sugar or honey–No cholesterol." At the bottom is a field of red and yellow flowers.

Page 12 contains a recipe for Nut Milk using ¼ cup nut butter (peanut butter, cashew butter, almond butter, sesame tahini butter, or sunflower seed butter) and 1 cup water. Address: Umatilla, Florida.

8380. Hong, Guangzhu. 1987. Zhongguo doufu [Chinese tofu]. Beijing, China: Commerce Publishers. [Chi]*
• ***Summary:*** Wade-Giles citation: Hung, Kuang-chu. 1987. *Chung-Kuo Tou Fu.* This is the most comprehensive work on the history and traditional technology of tofu in China. The famous poem by Lu Yu (lived A.D. 1125-1210) is quoted on page 13.

On p. 46 is a comparison of the hot-extraction and cold-extraction processes. Cold extraction is the traditional method in China, but both are used in China today. Address: China.

8381. INTSOY. 1987. Home and village soyfood preparation (Leaflet). Champaign, Illinois. 3 panels each side. Each panel: 22 x 9 cm.
• ***Summary:*** Contents: Overcoming protein deficiencies. INTSOY basic processing concepts. A practical approach. Products and processes: Soy flour, tofu, tempeh, soy milk, roasted and fried soybeans [soynuts], curries, sweets. Record of achievement (in Sri Lanka, incl. training more than 20,000 people). Address: International Soybean Program, Univ. of Illinois at Urbana, 113 Mumford Hall, 1301 W. Gregory Dr., Urbana, Illinois 61801. Phone: 217-333-6422.

8382. Khadka, Bed B. 1987. Coarse grains and pulses in Nepal: Role and prospects. *CGPRT* No. 6. 35 p. [47 ref]
• ***Summary:*** Production and yield of major grain legumes in Nepal in 1983 was: Grasspea (18,700 tonnes; 380 kg/ha), lentil (17,000; 382), chickpea (13,100; 381); soybean (10,100; 548), horsegram (7,900; 381). Note that soybean is by far the highest yielding.

"Soybean cultivation, formerly limited to the mid-hills, is now extending to inner and outer tarai. In the hills and valleys soybean is cultivated in association with or intercropped with maize. Mono-cropped soybean is grown only in small areas, and sometimes it is grown on paddy bunds. Soybean is a popular leguminous food in the hills, where roasted soybean is taken along with puffed maize as a morning or midday snack. Green pods are boiled and the seeds are eaten as such, or fried or made into curry. Some soybean is used for its oil, and the cakes are then used in feeds. In recent years, small industries have been set up to convert soybean into soymilk, soybean curd [tofu], and other

products." Research has been carried out in collaboration with INTSOY, IITA, AVRDC and other agencies. Address: Nepal.

8383. Kolster, Uwe. 1987. Kochen mit Tofu: Die gesunde Alternative [Cooking with tofu: The healthy alternative]. Neidernhause im Taunus, Hesse, Germany: Falken Verlag GmbH. 79 p. Illust. (color). Index. 21 cm. [Ger]
• ***Summary:*** A book of tofu recipes. Contents: Foreword. Magical tofu (*zauberhaft*). How tofu is made. Drinks and desserts from soya and tofu. Spreads from tofu, sweet to hearty. Hearty soups and one pots. Soufflés and casseroles. Cold sauces and salad dressings. Raw food. Delicate salads. Two tofu specialties. Delicious warm sauces. Main dishes. Afterword. Address: Head of a vegetarian restaurant, Germany.

8384. Kuramochi, Toshiyuki. 1987. The tofu maker. In: Saga, Junichi. 1987. Memories of Silk and Straw: A Self-Portrait of Small-Town Japan. Tokyo, New York: Kodansha International. 258 p. See p. 121-23. Illust. (some color). May. 22 cm.
• ***Summary:*** This chapter appears in section 3, "Shopkeepers and tradesmen." "We kept early hours in my father's day. Now almost everything's done by machine, so even if you don't get up till after five you've still plenty of time to make tofu, but back then we used to get up before two in the morning–more in the middle of the nigh really!

"Let me see if I can remember how ours was made... First we used a treadmill to grind the two sackfuls of soybeans that had been left to [soak and] cool the night before. This job was always done by my uncle, and if he started just before two o'clock, it usually took him until five to grind them up completely. The thick mash that resulted was known as *go*.

"This was tipped into a large cauldron of water, thoroughly boiled, and then poured into the special double bag, four feet long by two feet wide, used for squeezing the soymilk from the bean solids. The double bag full of boiling *go* was extremely hot and heavy, so heavy in fact that the women could barely even lift it off the ground. You heaved this bag up on top of a tub and started wringing it–we didn't have any mechanical presses or anything, it was all done by hand. Several pine boards, tied together with straw rope, were fixed over the tub that was going to catch the liquid. The wringing bag was folded in two and you pressed down hard on it with a heavy wooden pole, about five inches thick and six feet long: one end of the pole was stuck into a hole in a wooden pillar, the middle of it rested on the bag, and you sat on the other end and squeezed the bag down using your whole body weight. But if you just sat on it without moving, the stuff wouldn't be pressed hard enough, so you had to jiggle up and down as vigorously as possible. The liquid would drip down into the tub and the bag would gradually empty. You then had to fold it in four and start squeezing again; eventually all that was left in the sack was the lees.

"When the bag had been completely squeezed out, you added bittern to the milk in the tub to make it set. Nowadays they use calcium sulphate, but back then we went along regularly to the pickle shop and got the water left at the bottom of barrels of brine-pickled vegetables.

"When the soy milk had set, it was scooped out of the tub with a special ladle known as a *bozu* ["a Buddhist priest"] and put into wooden molds; the molds were made of cypress wood, I remember. From one you could get ten slices of tofu. But you could only make two molds, twenty pieces, at a time. Mind you, the slices used to be much bigger than they are now–they were so big in fact you couldn't have held one on the flat of your hand–about seven and a half inches long and at least three inches deep. And to turn the two sacks of soybeans into tofu, we had to complete the same process again seventeen or eighteen times. But once we'd got started and had the water on the boil, everything went smoothly, with everyone doing their particular jobs, and we'd get all of it done by just after five.

"Once we'd finished making the stuff, we had some breakfast and then went out selling it from two wooden buckets attached to a pole balanced on your shoulder. Each bucket held fifteen pieces so, with a total of thirty, plus a certain amount of water, the pole bent right down on either side with the weight. We also put a box of various types of fried tofu on top of each bucket; it took a fair bit of skill and strength to balance that lot. The buckets weren't round but slightly oval shaped, three feet wide at the longest point and two foot six at the shortest, and maybe about seven inches deep.

"In those days, tofu sellers didn't blow a horn to tell customers they'd arrived as they do now; they walked around ringing a little bell. You had to take the strain of the pole with one hand and ring the bell with the other. What's more, if we'd sold the tofu only in the town we'd never have made much of a profit, so we used to go all the way out to Manabe, and then on to the area around Hojo. Well, people back then had good strong legs–we thought nothing of going as far as Oda or Hojo. I can't see anyone doing that nowadays, eh?

"There used to be tofu shops dotted about all over town and in the surrounding villages. There was a sort of unwritten rule that you couldn't sell your stock in front of, or seven houses either side of, another tofu shop, but you could sell anywhere else.

"Fried tofu cost one sen for as much as a woman could hold in one hand; plain tofu was two and a half sen in 1915, but by the 1920s it had gone up to five sen a piece.

"The men got back at about two or three in the afternoon–dog tired–after carrying their loads twenty-five miles or more with nothing but straw sandals on their feet. My father and the others had a bath as soon as they got in, with a meal straight afterward. And, God, did they eat: one

© Copyright Soyinfo Center 2013

man could easily get through four or five large bowls of rice. There were ten people working in the shop in one day–for breakfast, lunch, and dinner–they put away a good sixty pounds of rice between them."

A small illustration shows a "tofu seller," from the rear, with a pole on his shoulder.

Note: A splendid book, the winner of both awards and high praise. The compiler (Saga) was born in 1941 and the writer (Kuramochi) was born in 1929. A map (p. 8) shows that the small town is Tsuchiura, in Ibaraki prefecture, just northeast of Tokyo. Address: PhD, Japan.

8386. Lin, Bi-Fong; Miyawaki, O.; Torikata, Y.; Yano, T. 1987. Energy saving in the extraction-denaturation stage of kori-tofu production and its optimization. *J. of Food Engineering* (*UK*) 6(5):333-44. [11 ref]
• ***Summary:*** "Production of kori-tofu (freeze-denatured soybean gel) involves 13 unit operations and is highly energy intensive. The previous energy analysis of a kori-tofu manufacturing process (Iibuchi et al. 1982) disclosed that the extraction-denaturation stage of this process consumed twice as much thermal energy as the succeeding drying stage. The key to energy saving in the extraction-denaturation stage was to reduce the amount of water to be heated without reducing the extraction yield. Four methods were investigated for their feasibility as alternatives... The double extraction was the most effective method so far for saving energy." Address: Dep. of Agricultural Chemistry, Faculty of Agriculture, The Univ. of Tokyo, Bunkyo-ku, Tokyo 113, Japan.

8391. Passmore, Jacki. 1987. Asia: The beautiful cookbook. Los Angeles, California: Knapp Press. 256 p. Illust. (color). Index. 37 cm.
• ***Summary:*** This is a stunningly beautiful, oversized book–a feast for the eyes, filled with elegant color photos (many full page), authentic recipes and many insights about Asian cookery. Each recipe is accompanied by one or more photos, Contents: Japan: Simplicity and elegance. Korea: Warm and sustaining. China: From the beginning of time. Philippines: East meets West. Thailand: Titillating, tantalizing. Laos and Kampuchea: Unforgettable foods. Vietnam: Herbaceous overtones. Singapore and Malaysia: A blending of cultures. India: Southern fire, northern serenity. Burma: Exotic offerings. Indonesia: Symphony of flavors. Sri Lanka: Gems from an enchanted isle. Glossary. Acknowledgments.

Japan: Yudofu (Simmered bean curd, with 3 cakes tofu {bean curd}, p. 31). Tofu dengaku (Grilled bean curd on skewers, with 2 lb {1 kg} momen tofu and white miso, p. 31). Ton-negu no teriyaki (Teriyaki pork rolls, p. 38). Miso-shiru (Miso-flavored soup with bean curd).

Singapore and Malaysia: Popiah (with ¼ cup (about 2 oz / 60 gm) compressed bean curd cake, shredded, p. 155, 148-49). Tempe lemak (Tempe in coconut milk, p. 166). Hokkien mie (Hokkien style noodles, with 2 cakes compressed bean curd, p. 168). Laksa ayam (Chicken with laksa noodles in coconut sauce, with 2 squares / cakes compressed bean curd,

© Copyright Soyinfo Center 2013

p. 169).

Indonesia: Kecap manis is a sweetish soy and chili sauce (p. 218). Babi kecap (Pork in sweet soy sauce, p. 227).

Glossary (p. 252-54) includes short definitions of: Azuki beans. Bean curd. Bean pastes and sauces. Kecap manis ("based on dark soy sauce, sugar and spices"). Kombu. Nori. Paneer (India). Sesam. Wakame.

8392. Popham, Peter. 1987. The insider's guide to [south] Korea. Edison, New Jersey: Hunter Publishing. 199 p. See p. 60. Illust. (color photos by Alain Evrard). Maps. Index. 23 cm. [9* ref]

• ***Summary:*** The 1988 Summer Olympics in Seoul introduced Korea to the modern world in a big, new way. This book was written for that event.

The chapter titled "Korean cuisine" (p. 58+) explains that it is the least known of the culinary traditions of Asia, and offers strong evidence of the nation's distinctiveness, which shows clear Mongol influence. Like the Chinese and Japanese, the Koreans also eat "soy beans and bean curd" [tofu], and bean sprouts [soy sprouts are more popular than mung bean sprouts]. The undisputed mark of Korean cuisine is kimch'i [kimchi], most of which is still made by fermentation at home of a vegetable (such as cabbage), always with chili and garlic; there are many different types of kimch'i, the most popular of which are cabbage stuffed with oysters, sliced cucumbers with radish and ginger, diced daikon radish with scallions, and white radish sticks floating in brine. Other favorite Korean seasonings, besides garlic and chili, are scallions, ginger, sesame oil, sesame seeds, and soy sauce.

Pages 60-62: "There is also a whole range of fermented pastes and sauces for dipping, called *chang.* Every home and restaurant has its own recipe for *chang,* and each batch comes out differently. Based on a fermented mash of soybeans, the three most common varieties are *"kan chang,* a dark liquid, like soy sauce, *daen chang,* a thick, pungent paste, and *kochu chang,* a fiery version laced with chilies."

Note: This is the earliest English-language document seen (April 2012) that uses the term *kan jang* to refer to Korean soy sauce.

Side dishes, known as *panch'an,* accompany the main dish, rice, and add variety to the basic Korean meal. They include: *Tubu:* Soybean curd, tofu. *Manul changah-chee:* Green garlic pickled in soy sauce. *Don chun:* Beef and bean curd patties spiced with ginger.

Koreas love to make rich, thick stews, especially in winter. "*Chigae* is a special thick stew simmered in heavy clay crocks." Favorite Korean soups (*tang*) and stews include: *Maeun tang:* Rich soup of meat, fish, bean curd, zucchini and scallions. *Ten chang chigae:* Thick stew of meat, fish, bean curd, squash and chilies.

Simple "one-bowl" meals, especially popular as summer lunches, include: *Kong kookso:* Wheat noodles in fresh soy milk. *Udong* [Jap. udon]: Broad wheat noodles with onions, bean curd, egg and chili. *Kongnamul pap:* [Soy] bean sprouts, beef and cabbage served over rice.

A photo (p. 63) shows a man grinding food using a hand-turned stone mill (quern).

8393. Roozen, Jac. P.; Groot, Jolan de. 1987. Analysis of low levels of trypsin inhibitor activity in food. *Lebensmittel-Wissenschaft + Technologie* (*Zurich*) 20(6):305-08. [14 ref. Eng]

• ***Summary:*** A method which utilizes affinity chromatography was developed and applied to the following soy products: Soybeans (dry, soaked or steamed), tempeh (fermented for 24 or 48 hours), soy flakes (defatted or heated), dry soy meat (textured vegetable protein), dry isolated soy protein, and tofu. Results are detailed. The specific trypsin inhibitor activity varied widely in the soy products but was always less than 1900 trypsin inhibitor units/mg protein. Address: Dep. of Food Science, Agricultural Univ., De Dreijen 12, 6703 BC Wageningen, Netherlands.

8394. Shannon, Sara. 1987. Diet for the atomic age. Wayne, New Jersey: Avery Publishing Group Inc. xviii + 316 p. Introduction by Ernest J. Sternglass, PhD. Index. 23 cm. [400+* ref]

• ***Summary:*** The subtitle on the cover reads: "How to protect yourself from low-level radiation." This book, written from a macrobiotic viewpoint, contends that various foods, including miso and sea vegetables, can protect people from radioactivity. Chapter 6, "Diet for the Atomic Age," discusses miso, tofu, tempeh, and sea vegetables at length as foods that can protect us from radiation (p. 130, 145-55). The story of how miso protected Dr. Akizuki and his staff from the radiation of the atomic bomb dropped on Hiroshima is told on pages 77, 116, 148-49.

Chapter 8, "Recipes" (p. 193-234) includes many macrobiotic-style soy-related recipes and a special section titled "Tofu and Tempeh." The chapter contains 13 tofu recipes, 7 miso recipes, and 4 tempeh recipes. The author received her degree in nutrition from the State University of New York. Address: Practicing nutritionist and health counselor, New York City.

8396. Sonntag, Linda. 1987. The little tofu book. London: Judy Piatkus (Publishers) Ltd. 60 p. Illust. by Trevor Newton and Hanife Hassan. No index. 16 cm.
• ***Summary:*** Contents: What is tofu? Storing tofu. What to do with tofu. Tofu recipes. Dips and spreads. Tofu, the wonder health food. The food for the future. Tofu slimmers. Making your own tofu. The bonuses of making tofu: Go, okara, soya bean milk, yuba, whey. Tofu in Japan. Tofu in Indonesia. Tofu in China. Miso. Other titles in the series. Note: This book draws heavily on *The Book of Tofu* by Shurtleff and Aoyagi. Address: England.

8397. Toyo Plant. 1987. Tôfurui jidô seizô sôchi [Automatic production system of tofu (bean curd) products]. Toyo Plant Co. Ltd., 4-27-6 Matsue, Edogawa-ku, Tokyo 132, Japan. 4 p. English. 6 p. Japanese. Manufacturer's catalog. [Jap; Eng]
• ***Summary:*** The company was founded in 1967. This manufacturer's catalog describes the production systems for soy milk, momen tofu, abura age, filled silken tofu, silken cut tofu, and egg tofu. Address: Tokyo, Japan. Phone: 03-655-0111.

8398. Watanabe, Tokuji. 1987. Chemistry and technology of tofu and its derived products. In: Fujiharu Yanagida, ed. 1987. Traditional Foods and Their Processing in Asia. Tokyo: NODAI Research Institute, Tokyo Univ. of Agriculture. vii + 235 p. See p. 110-21. [8 ref]
• ***Summary:*** Contents: Introduction. Fresh tofu and its production: Process of tofu making, equipment, kinugoshi tofu, new raw materials for making tofu, new types of tofu. Aburage and other deep-fried tofu. Kori-tofu and its production: Process of making kori-tofu, large-scale production, equipment, distributing the product, utilization of by-products. Local varieties of tofu: Rokujo tofu, tsuto-dofu, tofuyo [fermented tofu]. Conclusion. Address: Faculty of Home Economics, Kyoritsu Women's Univ.

8399. Weber, Marlis. 1987. The single vegetarian: Healthy recipes for one. Translated from the German by Linda Sonntag. Hammersmith, London, England: Thorsons–An imprint of HarperCollins Publishers. 144 p. Illust. by Juliet Breese. Index. 21 cm.
• ***Summary:*** This attractively illustrated and designed lacto-ovo-vegetarian wholefoods cookbook (first published in Germany in 1985 as *Vollwertkueche für 1 Person*) opens with a nice section on soya beans and tofu (p. 17). Contains more than 50 line drawings, used mostly to fill spaces that would otherwise be empty. Soy-related recipes include: Chicory and beansprouts in curried cream (with soya bean sprouts, p. 56). Soya bean hotpot (with cooked soya beans, p. 76). In the chapter titled "Milk, Quark and Tofu" (p. 121-24) we find recipes for: Tofu dessert. Savoury Tofu. and Tofu Burgers.

8400. Wynne, Dave; Javaheri, Fereidoon. comp. and ed. 1987. Soyabean cooking in Zambia. Republic of Zambia, Dept. of Agriculture. 48 p. 22 cm. 1st ed. 1985.
• ***Summary:*** Contents: Acknowledgements. Foreword. Nutritional information. 1. Basic recipes. 2. General use. 3. Urban use. 4. Specialty recipes. Publication of this book was fully by the Lint Company of Zambia (LINTCO). The Mennonite Central Committee and ZAMARE gave support. Many recipes were developed by Mrs. Barbara Wynne, Mr. Lee Holland, or Miss Mabuya; most of the rest came from the *More-with-Less Cookbook*, by Doris Janzen Longacre, and Favorite Recipes by the American Women's Club in Lusaka. Surveys carried out by the National Food and Nutrition Commission (NFNC) and published in Dec. 1980 found a high incidence of malnutrition in Zambia, particularly in children aged 0-4 years. Soybeans can help greatly to alleviate this problem.

Talk with Hea-Ran Lee Ashraf. Dave Wynne was a Mennonite Missionary, and Fred Javaheri was also a missionary but working for the Zambian government. Fred, an Iranian with Canadian citizenship, has a deep, long-term dedication to soybeans with great energy, enthusiasm, and a sound knowledge of his resources. Hea-Ran believes that without these two men, the soybean program in Zambia would not exist today. Their group now also publishes a quarterly periodical titled *Soybean Newsletter.* Address: 2. Soyabean Coordinator, Mt. Makulu Central Research Station, Chilanga, Zambia.

8401. Yang, Kailing. 1987. Min guo Li Shizeng xian sheng Yuying nian pu. Er ban [A chronicle of Li Shizeng's life. Revised ed.]. Taipei, Taiwan: Taiwan shang wu yin shu guan. 8 + 210 p. + [2] leaves of plates. Illust. [Cht]*
• ***Summary:*** Note: Li Yu-ying, a soyfoods pioneer in Paris, France, lived 29 May 1881 to 3 Sept. 1973. This revised 1987 edition contains 10 pages more than were in the original 1980 edition.

8402. Yntema, Sharon K. 1987. Vegetarian children: A supportive guide for parents. Ithaca, New York: McBooks Press. 169 p. Index. 22 cm. [188 ref]
• ***Summary:*** Though not a cookbook, this book work is especially useful for parents who need help in making a vegetarian transition for their children. Contains health and nutrition answers for vegetarian children of all ages–from feeding your baby to school lunches. Discusses tofu (p. 62-63, 98, 147-48) and tempeh (93, 148). Excellent bibliography.

"The author received an M.A. in Early Childhood Special Education from George Washington University. Before her son was born in 1978, Ms. Yntema worked as a child development specialist at the Day Care and Child Development Council of Tompkins County in Ithaca, New

York." Address: Ithaca, New York.

8403. Yu, Youtai. 1987. Agricultural history over seven thousand years [in China]. In: Sylvan Wittwer, Yu Youtai, Sun Han, and Wang Lianzheng, eds. 1987. Feeding a Billion: Frontiers of Chinese Agriculture. East Lansing, Michigan: Michigan State University Press. 462 p. See p. 19-33. Chap. 2. [9 ref]

• ***Summary:*** Chinese agriculture originated in the primitive society of the early and middle New Stone Age (5000-2100 B.C.). Farming villages established in the Wei and Yellow River valleys of northeast China cultivated millet, wheat, beans, rice, hemp, cabbage, and melon. The Slave Society period went from 2100-476 B.C. The description of the "five grains" (millet, glutinous millet, soybeans, wheat, and rice) first occurred during the Spring and Autumn period (770-476 B.C.). Feudal Society went from 475 B.C. to A.D. 1840.

The earliest Chinese characters, inscribed on bones and tortoise (land-loving turtle) shells date from around the 14th century B.C. These were first excavated in Anyang County of Henan Province at the end of the 19th century. The earliest book which systematically recorded Chinese agricultural activities was *Xia Xiao Zheng.* It was the calendar of the Zia Dynasty, estimated to have been written around the 16th century B.C. and comprising about 400 words. The main crops were broom millet, grain millet, wheat, rice, bean, hemp, vegetables and melons. Nearly 400 books on ancient Chinese agriculture were published prior to the middle of the 19th century and before the end of the Chinese Feudal Society. The 11th Century B.C. saw the progressive expansion of Chinese agriculture.

In Western Europe, land was inherited by only one son of the noble landlord and was not allowed to be sold. This permitted centralized planning and utilization of land resources. By contrast, during the Feudal Society of China, land was inherited by many sons.

Discusses intensive cultivation which began in Chinese agriculture as far back as the 3rd century B.C.

The first priority in Chinese agriculture has been the production of the food crops known as the "Five Grains." Second is the production of livestock known as "Six Animals." The "six animals" are horses, cattle, sheep, chickens, dogs and pigs. The expression of "five grains" first appeared in the Chinese literature of the eight-fifth centuries B.C. The grains were millet, glutinous millet, soybean, wheat and rice. They were first defined as the 5 basic food crops cultivated in the reaches of the Yellow River.

"Shu" is broomcorn millet (*Panicum miliaceum*)*;* "Ji" is a variety of "Shu." The main difference is that "Ji" is not as glutinous when cooked as is "Shu." In the most ancient Chinese characters inscribed on bones and tortoise shells, these 2 words appeared most frequently of all the grain crops.

In ancient times, farmers would grow some soybeans as a part of their food production program each year. Equal importance was given to millet and the soybean as substitutes for "Shu" and "Ji." Food processing technologies were developed after China entered the Feudal Society. Then fermented and salted soybeans [fermented black soybeans], thick soybean sauce, bean curd, bean sprouts and many other products became commonplace. The soybean then moved from a main food crop to the category of a nonstaple food and an oil crop. Wheat increased, as the soybean declined as a major food crop.

Note: This is the earliest English-language document seen (Nov. 2011) that uses the term "fermented and salted soybeans" (or "fermented and salted soybean") to refer to fermented black soybeans.

8404. Zimmerman, Maureen Williams. 1987. Sunset vegetarian favorites. Menlo Park, California: Lane Publishing Co. 96 p. Originally published in 1983 as International Vegetarian Cooking.

• ***Summary:*** Written and compiled by the editors of Sunset Books and Sunset Magazine, this lacto-ovo vegetarian cookbook is different from a Sunset book by the same title published in 1981. It contains many recipes plus full-page color photos, and illustrations (line drawings) by H. Tom Kamifuji of various vegetables. The subtitle on the cover only reads: "Delicious recipes from around the world."

Chapter 1, titled "Vegetarian ways around the world," gives a good introduction to the subject.

Soy-related recipes include: Miso grilled mushrooms (Japan, p. 14-15). How long to simmer soybeans (p. 49). Homemade pasta–whole wheat & soy (p. 52). Golden tofu-cauliflower soup (Thailand, p. 34-35). Greens & tofu in peanut sauce (Thailand, p. 48). Stir fried tofu & vegetables (Vietnam, p. 50). Mandarin pancakes with spicy tofu filling (China, p. 70). Cornmeal soy crepes (p. 72-73). Address: Menlo Park, California. Phone: 415-321-3600.

8405. **Product Name:** Baked Tofu.
Manufacturer's Name: Clearway Kitchen.
Manufacturer's Address: 1037 17th Ave., Santa Cruz, CA 95062. Phone: 408-476-6390.
Date of Introduction: 1987?
New Product–Documentation: Talk with Buddy Hamel of Clearway Kitchens/Sweet Angel. 1993. Aug. 20. He first made and sold Baked Tofu 6-7 years ago. He made several different styles of it and he still has some of the original labels. He changed the name of his company from Clearway Soyfoods to Clearway Kitchen about 6 years ago. His company has made two moves since it was at 1037 17th Ave. in Santa Cruz. In about 1983, he first moved to 2022 Soquel Ave. in Soquel, California. Then he moved to his present address.

8406. Galactina AG. 1987? Der Tofu bekommt Geschmack!

© Copyright Soyinfo Center 2013

[Tofu gets flavor! (Leaflet)]. Belp, Switzerland. 2 panels each side. Each panel: 28.6 x 21 cm. Undated.

• ***Summary:*** Leaflet (glossy color). Undated. Sent by Peter Speck of Galactina. 1990. On the front panel: The new tofu generation from Galactina wins over even the most die-hard skeptics. A photo shows a handsome, seasoned Tofu Gourmet sausage lying on a wooden table, surrounded by cubed tofu and vegetables.

A photo (panel 2) shows the new packaging for large-scale users (*Grossverbraucher-Packung*). The five flavors (each sausage-shaped package weighs 1 kg) are: (1) Tofu Gourmet (with soy sauce, natural aromas, and a special mixture of spices). (2) Tofu Jardinière (with carrots, leeks, celery, sea salt and spices). (3) Tofu Provençale (with herbs from Provence, soy sauce, plus spices and salt to make it a bit piquant). (4) Tofu Gastro (Nature) (let your fantasy wander from use in sweet to piquant dishes). (5) Tofu Burger (with vegetables, onions, spices, herbs and sea salt).

Panel 3 begins: Tofu belongs in the new, light and healthy cuisine of hotels, hospitals, restaurants, and hostels. We are glad to support you with tofu recipes, tofu menu-cards or with a personal, obligation-free consultation with our tofu specialist. A photo shows the cover of a book titled "Tofu–The new food culture" (*Tofu–die neue Esskultur*).

On the rear panel is the same classy photo as on panel 2. Address: 3123 Belp, Switzerland.

8407. **Product Name:** [Seasoned Tofu (Gourmet Diced) [Natural and Gastro].
Foreign Name: Tofu Nature, Tofu Gastro.
Manufacturer's Name: Galactina Ltd.
Manufacturer's Address: Birkenwej 1-6, CH-3123 Belp, Switzerland.
Date of Introduction: 1987?
Ingredients: Provencale: Herbs from Provence, soysauce, seasonings, and salt.
Wt/Vol., Packaging, Price: 250 gm (8.8 oz) packed in water in molded plastic tray with heat-seal film top and full-

color front panel photo. In 1987, 1 kg package for catering.
How Stored: Refrigerated, 6 week shelf life.
Nutrition: Provencale: Protein 11.5%, 6.5% fat, 2.5% carbohydrate. 114 calories/100 gm.
New Product–Documentation: Labels and leaflet sent by Peter Speck of Galactina. 1988. March 11.

8408. Schmit, Matthew. 1987? A report on the Telluride Tofu Shop, Telluride, Colorado: September 1977 to August 1979. Arcata, California. 3 p. 28 cm. Undated.
• ***Summary:*** "The Telluride Tofu Shop, a cooperatively owned and managed wholesale foods company and associated restaurant, was born in mid-September, 1977, high in the San Juan mountains of Colorado, and was operated until mid-August, 1979, when the business was sold. Original founders were Timothy Mecke and myself, Matthew Schmit. The Tofu Shop was initially conceived of as a community oriented business and as a support system for the local food co-op store (a non-profit organization).

"Operating out of a 250 square foot shop space adjacent to the food co-op, we acquired used equipment, built counters and tables, and fashioned the kitchen we would need to begin sprout and tofu production. Initial capital was $1,000. After one month our original emphasis on wholesale production for resale to area markets was forced to change, for the Shop was deluged with requests for direct customer service and examples of how to prepare tofu. Hence began the transformation of the small shop into a full-time restaurant and food production company.

"After two years of steady business the Tofu Shop had quadrupled in size to become a restaurant seating thirty with waitresses serving lunch and dinner Monday through Saturday, and a wholesale business which had produced over 12,000 pounds of tofu and 15,000 pounds of sprouts, distributing these items to markets throughout the Western slope of Colorado.

"The amazing success of the Tofu Shop can be attributed to several factors. The miracle of truly fresh tofu and the soyfoods revolution which swept the country in 1976 picked up the Telluride shop and carried it along, making it an early member of a growing association of soy businesses around the country. Also, the community of Telluride helped by consuming above average amounts of tofu and sprouts for those two years. Lastly, hard work with little pay by dozens of dedicated individuals made it possible for the shop to continually recapitalize. This group, known as the Tofools, deserve special recognition.

"The following pages will provide more detail about the Telluride Tofu Shop experience, with special attention given to: the community of Telluride; Shop ownership models and worker organization; financial philosophy and information; the restaurant; the tofu business; the sprout business; other products produced; extra activities; and the sale of the business."

Note: This report was never completed.

Page 2 is a floor plan of the businesses in the Spectrum Shop under the Sheridan Opera House off Oak Street. On the left side of the central hallway are three shops: Tofu Shop Restaurant, started ca. 1978. The Tofu Shop, started mid-Sept., 1977, Tofu Shop sprout room, started ca. 1978. On the right side of the central hallway are two shops: Winterstash Food Co-op started here in 1975. Winterstash expanded to here in 1977.

Page 3 contains two floor plans: (1) Of the Telluride Tofu Shop–a community tofu shop–wholesale / retail. (2) Of a steam jacketed cooker tofu factory. Address: Arcata, California.

8409. **Product Name:** [Tofu Slices].
Foreign Name: Die Tofu-Scheiben.
Manufacturer's Name: Sojalpe.
Manufacturer's Address: Saint Quentin sur Isère, 38210 Tullins, France. Phone: 76.93.60.21.
Date of Introduction: 1987?
Ingredients: Tofu, carrots, onions, rolled oats, salt, soy sauce.
Wt/Vol., Packaging, Price: 200 gm, precooked.
How Stored: Refrigerated at 4-6ºC (39-43ºF).
New Product–Documentation: Manufacturer's brochure. 1987? In German. "Tofu Slices. Dishes of the fine kitchen. The joy of eating... without putting on weight." Tofu: Holding high a tradition. Sojalpe tofu is handmade in Dauphiné, following the traditional slow way of cooking, which was commonly used in Asia. It is made from organically grown soybeans, and without preservatives or colorings. Nigari is the coagulant. The slices can be either pan fried or baked. Serve with a sauce, or as an accompaniment to salads, grains, or vegetables.

The company logo is a steepled building with 5 soy-shaped leaves growing out of the steeple, set in front of towering mountains. A photo on the front shows a tofu slice (about 1/8 inch thick by 4 inches wide by 6.5 inches long) on a plate, topped with a sauce. At the top is an illustration (line drawing) of a laughing male chef in a white top hat.

8410. Takano Foods Co. 1987? Shôhin annai [Catalog of soyfood products]. Ibaragi-ken, Japan. 6 panels. Undated. 30 cm. [Jap]
• ***Summary:*** Takano Fuuzu K.K. makes 43 soyfood products, mostly natto, but also some tofu. On the cover, two black lacquered chopsticks hold a single yellow soybean over a red tray on a red table. Address: Ibaraki-ken, Japan. Phone: 02995-8-232.

8411. Takano Foods Co. 1987? Healthy wave [Healthy wave]. Ibaragi-ken, Japan. 16 p. Undated. 30 cm. Catalog. [Jap]
• ***Summary:*** This catalog introduces Takano Fuuzu K.K. and

© Copyright Soyinfo Center 2013

its soyfood products, mostly Okame natto, but also some tofu. Address: Ibaraki-ken, Japan. Phone: 02995-8-232.

8412. **Product Name:** Bulk Vacuum Packed Tofu.
Manufacturer's Name: White Wave, Inc.
Manufacturer's Address: 1990 North 57th Court, Boulder, CO 80301.
Date of Introduction: 1987?
Wt/Vol., Packaging, Price: 10 lb vacuum packed.
New Product–Documentation: Talk with Marty Roth. 1989. Aug. 16. White Wave sells a vacuum packed tofu in bulk to Tree of Life. Talk with Lon Stromnes. 1989. Aug. 23. This product was introduced in about 1987. It comes in a 10-pound vacuum pack.

8413. Brunthaler, Norbert. 1988. Re: Soyfoods made and sold by Sojvita. Letter to William Shurtleff at Soyfoods Center, Jan. 4. 1 p. Typed, with signature on letterhead. [Eng]
• ***Summary:*** "Thank you for your letter of Dec. 10." He gives the year and month that his company started to make and sell the following products: Tofu, Tofu marinated and baked, Tempeh, Sojanaise, Tofuburger, Tempeh vacuum packed and stable, Tofu spread (4 kinds), Sojella (enriched soymilk), Soyoghurt with fruits, Natto.

"These are only our soy-products which we sell by ourselves or through distributors in Austria. (Furthermore we produce rice-wafers, seitan, gomasio {sic, gomashio, sesame salt}, mochi.) We cannot say, which company is the largest in Austria, but we have the most different kinds of soyproducts. Our next competitor is: Sojarei in Baden and a smaller one is Tofurei in Wels. Furthermore there is only one Tempeh-producer in Vienna who sells tempeh and different cookies. These are all soy-producers in Austria. We hope we could help you with this information. With best regards. N.S.: Red miso and barley miso is in development since 1984." Address: Sojvita Produktions GmbH, Hauptplatz 1, Lichtenwoerth, Austria. Phone: 02622 / 75494.

8414. Quigley, Brian. 1988. Bremer Foods Corp. and soy yogurt in Quebec (Interview). *SoyaScan Notes.* Jan. 4. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Brian has done extensive research on a fermented soy yogurt by renting space at the St. Hyacinthe Food Research Center, which is owned by the federal government. He expects to launch a soy yogurt in Sept. 1988, and will also make tofu. He will start with whole soybeans (not isolates) and has purchased some equipment. His process is unique. He did not like Jofu, and he feels his product is vastly superior. It is 60% as acidic as typical dairy yogurt, is almost as white, and is sweetened with only honey rather than sugar. It is targeted at new yogurt eaters, those who dislike the high acidity of dairy yogurt. Tomsun is the only tofu in Quebec supermarkets. So he feels Tomsun will be his main competition in yogurt and tofu. He will be able to undersell Tomsun. Quebec has the highest per capita yogurt consumption of any province or state in North America; it has doubled in the past 6 years and is growing at 15-20% a year. Note that on 29 Oct. 1987 Martin DeLint of Montreal called to discuss this product. Address: Bremer Foods Corp., 3600 Casavant West, St. Hyacinthe, QUE, J2S 8E3, Canada. Phone: 514-773-1105.

8415. Tanikawa, Harry. 1988. Recent developments at House Foods and Yamauchi Inc. (Interview). *SoyaScan Notes.* Jan. 5. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** HF&Y has never made tempeh. The listing in Soya Bluebook was incorrect. Fuji is a separate company owned by Mr. Shoan Yamauchi. It specializes in sprouts (mung, alfalfa, and "spice" sprouts). Fuji bought Unicorn Village (Arizona), which was mostly an alfalfa sprout producer. Mr. Yamauchi is half owner of HF&Y, which is a partnership. They have had a hard time recently. First, at the end of 1985 and in early 1986 there was a lot of dumping of imported tofu by Morinaga, which had a "buy one, get one free" offer. The FDA made them change their labeling and gave them 3-4 months to deplete their old stocks. This problem is no longer serious. Second, they are now in the 6th week of a strike. The Hispanic workers are the most discontent. The local Chinese tofu makers sell at a pretty low price. HF&Y no longer even tries to compete with them in the Asian-American market; since 1981 they have become a company that sells primarily to supermarkets.

They are unionized and offer their employees a fair wage and benefit package; many smaller competitors are not unionized. HF&Y was unionized in 1981, before House Foods entered in 1983. That led to a big loss of ability to compete. That is why they have had to take such a strong stance during the current strike; what the union was asking for would have priced the company out of the market. House Foods has definitely not taken profits from the company, which raised prices; it all went to labor. Still House is very happy with its partnership. Azumaya may have passed HF&Y as America's largest tofu maker. They have taken a more aggressive attitude (especially outside California), and less red tape. He is not aware of any agreement between Azumaya and HF&Y not to compete in out-of-state markets. For decades, they have not competed inside the state. Address: Sales Manager, House Foods & Yamauchi, Inc., Los Angeles.

8416. Rose, Richard. 1988. The U.S. soyfoods industry and market today and tomorrow (Interview). Conducted by William Shurtleff of Soyfoods Center, Jan. 6. 4 p.
• ***Summary:*** "President of Rose International in Petaluma, California (and formerly of Brightsong Light Foods), Richard Rose began making tofu and soymilk products in 1978. His forte is product development and marketing, which is the focus of his present company. He has been responsible

© Copyright Soyinfo Center 2013

for the development of over 75 commercial soyfood products.

"Shurtleff: What do you see a the most important events and trends in the soyfoods market during 1987?

"Rose: First, the growth and marketing of Jofu, then the subsequent apparent leveling off or decline of sales or profits, although I am not sure of that. One source says that they have more demand for the product than they can handle. My understanding is that they were going to do a natural food Jofu and introduce it at the Natural Foods Expo at Philadelphia in October. Apparently it never happened; Tomsun didn't even have a booth at the Expo.

"That ties into the inability that I see of soy yogurts to take hold in both the mass market and the natural foods market. I think there are good reasons for that. The difference between ice creams and non-dairy frozen desserts is substantial. There's a large benefit for the consumer of non-dairy products. But that same range of difference does not exist between dairy and non-dairy yogurts. In fact, dairy yogurt is seen as a healthful food, low in cholesterol, fat, and often calories. So there is not as much benefit from eating the non-dairy product.

"Second, the continued domestication of production of aseptic soymilks by Westbrae, Great Eastern Sun, and Vitasoy.

"Third, the decline of sales and fortunes of Tofutti, linked to the decline in sales of non-dairy soy frozen desserts in general. I think Bob Tepper leaving Farm Foods was important. He'd been with them for a long time and has had a lot to do with the great progress they have made over the past eight years. That is quite a story. Farm Foods did things right and they had good luck as well. I'm really happy for them.

"Fourth, the increase and proliferation of soy cheeses. Last year Cemac and Galaxy got into the market in a big way. Soymage was the first truly non-dairy soy-based cheese containing no casein. I think what is more significant is large companies that have no other interest in soyfoods or natural foods are entering the industry. Galaxy went public in about August of 1987. I think their stock started at 5 and last I saw it was 1O.25. They are very good at hype. They are to cheeses what Tofutti is to ice cream. I was watching some late night show on TV and their spokesperson Don King came out and began hyping Galaxy products (he had samples with him) against the insistence of the host! These larger companies see a new market and they go after it. But they really have no interest in or history with natural food or soyfoods. Its a problem for the industry and a potentially dangerous trend. If people are going to make money in this industry we need to make sure they do it fairly, without consumer deception, etc.

"Fifth, the increased legitimization of soyfoods in the mass market and in general. There is definitely growing interest. A few years tofu was snickered upon whereas now it's more likely to stimulate enquiry and interest. That probably has a lot to do with Tofutti and tofu being recognized for special diets. Likewise, a similar growth of interest in soyfoods internationally, especially in Europe and Australia.

"Shurtleff: What do you think when you read that in a poll of the most hated foods in the USA, tofu was at the top of the list.

"Rose: I suspect they are right. I think that 95% of the Caucasian population does not buy tofu even occasionally.

"Shurtleff: Which products launched during 1987 did you feel were the best quality?

"Rose: The Barat Bar is very good. In fact, I buy those, even though they are so darned expensive. You don't get a sugar rush, there is no dairy, and they taste good.

"The ToChip, those corn chips, were good but I don't think much has happened with it.

"There are more salad dressings out and they are getting better, and have better shelf life and packaging. Golden Soy and Nasoya come to mind first.

"Of the soy cheeses, I think they are all about the same in quality. I frankly consider them all a wash. I think the Soyco and the Cemac product are slightly better than the Soya Kaas. They all have casein. Our product FREE has no casein.

"Shurtleff: What major changes have taken place in our industry and market during the past ten years?

"Rose: I think we have begun to develop our own individual identity, separate from the earlier Asian influence. That includes American equipment, American products, supplies, and suppliers. Instead of silken tofu, doufu-gan, and age, we have developed non-dairy frozen desserts, puddings, and salads. There is a great breadth of uniquely American products. In fact, an Americanization of all aspects of the industry.

"Development of domestic processing equipment, such as Bean Machines has done, is an important trend.

"Shurtleff: What predictions would you make for the future.

"Rose: Growth in the use of aseptic tofu by consumers. Morinaga has a U.S. patent on the process of making tofu aseptically.

"More and better U.S. equipment, and the development of better processing methods.

"The use and recommendation of soyfoods in special diets by traditional groups like the AMA, dietitians, and perhaps even the government. I think eventually soyfoods (other than TVP) will be able to be used in government programs, such as school lunch programs. But that may take a while.

"I still see a breadth and depth of new products. In breadth, I think we'll see it in baked goods (brownies, cookies, muffins, breads) and confections (candies). Also refinement of current products. Many of the products that

© Copyright Soyinfo Center 2013

have been out for a while aren't that great; they still need more improvement. But because they have been around for a while, people are less likely to improve them. But I think we will see, because of competition, improvement in current products. New products will tend to be more fully developed.

"Big Food will be getting into soyfoods more, probably to use tofu's functionality. For example, replacing ricotta with tofu for nutrition and cost reasons. But up until now, I think its been too weird for them, and they are not sure how it relates to them and their mission. They are conservative and slow by nature. The market for tofu (not including second generation products) in 1987 is probably only $70-90 million, which is still pretty small. They would probably want to see it 4-6 times that size before they make a big move. They are reluctant to do 'missionary marketing.' Then there is the perishability aspect of the product. I think Big Food will enter the industry with a product where perishability is less of a problem.

"At some point I think it will make a lot of sense to give tofu a national marketing identity, with regional manufacturers getting together and marketing the same brand and jointly funding national marketing efforts. The dairy companies do that with co-ops and with regional licensing, such as for making Popsicles or bottling soft drinks.

"I also think we'll see an influx of new types of people into the industry, bringing with them sharp new ideas. Technical people and marketing people. Perhaps some great new processes or patents. Marketing ideas and product development.

"I think we'll see a lot more use of soyfoods, such as tofu, in foodservice applications. That is really a great, untapped, fertile ground for soyfoods. The problem is, most of the people just don't know what to do with it.

"Shurtleff: Imagine that you have just been hired by a major American food company and given a $50 million budget and a research staff. They ask you to develop and market a line of at least three products. What would you do?

"Rose; I would probably do a line of salad dressings, a line of creamy soups, and a line of frozen entrees (such as lasagna), each using tofu and having no cholesterol. The tofu curds would replace ricotta or cheese. I might also do a line of baked goods (such as brownies and muffins), using tofu to replace eggs and milk. I'd also look seriously at a line of cholesterol-free foodservice items, something they could pop into a steam table or microwave and serve without any other preparations. Perhaps some nouvelle cuisine, or an Italian or Mexican dish, or a tofu-based imitation cheese or tofu sour cream or cream cheese. Anything that could replace a product that is currently high in fats and cholesterol so that the tofu product provided a clear alternative." Address: President, Rose International, P.O. Box 2687, Petaluma, California 94953-2687. Phone: 707-778-7721.

8417. *City Newspaper* (*Rochester, New York*). 1988. Tofu on the move. Jan. 7.
• ***Summary:*** 10-year-old Soyboy Company [Northern Soy] on Somerton St. wants to move to a new location at 545-547 West Ave. in the 19th Ward. The building formerly housed a tool and die company. Norman Holland and Andrew Schecter, who are partners in the company, employ nine people.

8418. Margulis, Marlyn L. 1988. Specialty of the house: Tempting palates with tempeh and tofu. *Courier-Post* (*Camden, New Jersey*). Jan. 10.
• ***Summary:*** Richard's Natural Foods Restaurant in Voorhees (NJ) caters to the tastes of vegetarians and people on macrobiotic diets in South Jersey, says owner Richard Wessel. Tempeh burgers and stir-fried tofu are two of the nutritious items he sells.

8419. Shurtleff, William. 1988. New soyfood product introductions skyrocket during 1980s. Tofu, tempeh, soymilk, soy ice creams are most popular (News release). Soyfoods Center, P.O. Box 234. Lafayette, CA 94549. 4 p. Jan. 11.
• ***Summary:*** "The 'lighter eating' revolution has catapulted soyfoods into one of America's fastest growing food categories. A record number 330 new soyfood products were introduced in the United States during 1987, an increase of over 635% since 1977... These latest figures, part of a 30-year-long food industry trend, are tracked by SoyaScan, the Center's computerized database. It lists more than 4,630 soyfood products from 1546 A.D. to the present.

"During the 1950s, an average of 11 new soyfood products were launched each year in the U.S. This number increased to 16 during the 1960s, and 26 during the period 1970-75. Most of these new introductions were based on modern, high-tech soy protein products, such as soy protein isolates and concentrates, or textured soy flour.

"Then in the late 1970s the number of new products began to rise rapidly with the advent of the soyfoods movement. It reached 78 in 1976, 162 in 1979, 224 in 1982, 296 in 1985, and an all-time high of 330 in 1987." A graph shows "Number of New Soyfood Products Introduced, 1950-1987."

8420. Kharrazi, Nourollah M. 1988. Yogurt food product resembling cheese. *U.S. Patent* 4,719,113. Jan. 12. 4 p. Application filed 27 May 1986. [4 ref]
• ***Summary:*** An aqueous mixture of (for example, to make a Cheddar-type product) dehydrated yogurt powder (20%), casein (15%), tofu (10.5%), vegetable fat (10%), nonfat dry milk (10%), and whey (8%) is heated to about 180ºF, cooled, mixed with a viscous mixture of yogurt, then partially dehydrated to obtain a solid, firm mass. The product is not fermented. Address: P.O. Box 3336, Santa Barbara, California 93130.

8421. Simonds, Nina. 1988. A scholar guides China's food policy. *New York Times.* Jan. 13. p. 15-16.
• ***Summary:*** Wang Qing is the 37-year old director of the Beijing Food Research Institute, China's principal food-policy organization. In 1967, after her family was arrested during the Cultural Revolution, she was sent to a farm in Shandong Province. Just a high school graduate, she was given the job of making soy sauce and tofu. She was taught a method of making soy sauce that originated at the time of the building of the Great Wall [220 B.C.?] All the utensils were made of wood and the process was ancient, but it was very sophisticated. After 6 years she returned to her family in Beijing, worked briefly assisting writers at the Beijing Food Research Inst., then went to Hunter College in New York City, where she completed undergraduate and master's degrees in 3½ years. Then she went to Columbia University for a doctorate in nutrition education; she expects to receive her PhD this year. At age 37 she returned to Beijing to become director of the institute, which publishes China's first food magazine, China Food. It has a paid circulation of over 400,000 and claims a readership of millions.

"Miss Wang has already begun to influence China's food policy. Last year she successfully redirected the Chinese from developing their dairy industry and toward the rebuilding of the soybean-milk industry." In 1984 the United Nations had given money to China to develop cow's milk. But 90% of the Chinese population is lactose intolerant and "it is simply too costly for us to raise cattle. They would have to compete with humans for the land." As part of her work on her dissertation, Miss Wang found that there had been a huge decline in China in soybean culture and the manufacture of its by-products. She is now working to recover what was lost. Accordingly, her Institute has developed liquid soymilk in plastic pouches to be test marketed for mass consumption starting next month. 160,000 pouches/day are to be distributed in Beijing.

8422. Pritchard, Roxanne. 1988. New developments with Azumaya's Stir Fruity non-dairy yogurt (Interview). *SoyaScan Notes.* Jan. 20. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The initial problems were shelf life and wheying off. Now both have been solved. The product has a creamier consistency; it is not chunky when stirred. During the initial launch, the product was sold in the dairy section of supermarkets. But that would have required a long-term commitment to a very expensive advertising program. Now they sell it in the produce section and do in-store demos to promote it. In many cases it is stored in a closed cabinet, which has a lower temperature. Azumaya makes all the tofu they use in their Stir Fruity. Jill Mizono is now sales manager. Address: Azumaya, S. San Francisco, California.

8423. Ebata, Junko. 1988. Tenpe wa hatsugan busshitsu ni kiku. Osaka-shi Dai Ebata Jokyôju ga jikken. Prof. Ebata of Osaka City University]. *Toyo Shinpo* (*Soyfoods News*). Jan. 21. p. 3. [Jap]
• ***Summary:*** Experiments showed that tempeh controlled the mutagenic activities of AF2, a powerful carcinogen, used during the 1970s in Japan as a tofu preservative. Address: Prof., Faculty of Science of Living, Osaka City Univ. Sugimoto 3-3-138, Sumiyoshi-ku, Osaka 558, Japan. Phone: 06-605-2811.

8424. *USA Today.* 1988. Penn gives prowler a dressing down. Jan. 21.
• ***Summary:*** Madonna, Penn's shapely vegetarian wife and famous singer, uses tofu salad dressing. Sean Penn hit a prowler on the head with a bottle of it at midnight at their Malibu home.

8425. *City Newspaper* (*Rochester, New York*). 1988. Tofu company's variance approved. Jan. 28.
• ***Summary:*** Northern Soy, Inc., a local frozen tofu manufacturer, received the zoning variance it requested from the Zoning Board for a new location at 545-547 West Avenue. The company wants to buy the westside building, which formerly housed a tool and die company, so that it can expand. Now all that is left is to finalize the financing to complete the sale.

8426. **Product Name:** Firm Tofu.
Manufacturer's Name: 21st Century Foods Inc.
Manufacturer's Address: 30A Germania St., Jamaica Plain, MA 02130. Phone: 617-522-7595.
Date of Introduction: 1988. January.
Wt/Vol., Packaging, Price: Vacuum packed or bulk.
New Product–Documentation: Talk with Rudy Canale. 1988. Sept. 13. In January 1988 they started making their own tofu. Previously they had purchased it from Nasoya.

© Copyright Soyinfo Center 2013

It is firm, and mostly used in house for their own products, but some is sold vacuum packed or in bulk. They now make about 500 lb/week.

8427. **Product Name:** Authentic Semolina Pastas: Jumbo Ravioli (With Tofu Filling).
Manufacturer's Name: American Chef Mfg. Co. (Distributor).
Manufacturer's Address: 7051 N. Kilbourn, Lincolnwood (near Chicago), IL 60646.
Date of Introduction: 1988. January.
Ingredients: Pasta Dough: Whole wheat semolina, water, semolina. Filling: Tofu (organic soybeans, water, nigari), spices, parsley, pepper, sea salt.
Wt/Vol., Packaging, Price: 12 oz (Four 3-oz ravioli).
How Stored: Frozen.
New Product–Documentation: Talk with Maurice Dyan. 1988. Feb. 15. The product was introduced in January 1988. It is the main product in his filled closed pasta line. He also owns American Soy Dairy Co., which makes Soy-Joy imitation cheese. Label. 1988. 5.5 x 4.25 inches. Black on light blue. "Authentic 100% semolina recipe–No eggs or yeast. A great source of protein and food energy." Can be boiled or baked.

8428. Barrett, Mariclare. 1988. Substitutes: Cooking without dairy products and eggs. *Vegetarian Times.* Jan. p. 40.
• ***Summary:*** Topics include: Replacing milk, yogurt, cheese, butter, sour cream, and eggs.

8429. **Product Name:** Tofu Teriyaki (Flavored Tofu).
Manufacturer's Name: Bud, Inc.
Manufacturer's Address: 1100 Wicomico St., Baltimore, MD 21230.
Date of Introduction: 1988. January.
Ingredients: Organic nigari tofu, soy sauce, honey & malt, spices.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Refrigerated.
New Product–Documentation: Label. 1988, Jan. (dated). 3.5 by 3 inches. Card stock. Brown and tan on white. Under English product name is the Chinese name: Wu hsiang doufu gan. "Keep refrigerated. Serving suggestions: Serve as is, cube or slice, mix with salad, stir-dry with vegetable."

8430. *Health Foods Business* (*Elizabeth, New Jersey*). 1988. Potential for pathogens in water-packed tofu. Jan. p. 28.
• ***Summary:*** "The USDA recently identified four pathogens–including those causing botulism and Salmonella–that have the potential to contaminate water-packed tofu if it is improperly refrigerated, said a press release by Morinaga Nutritional Foods.

"Because pasteurization occurs after packaging, heat-resistant, spore-forming bacteria may remain viable, said the USDA. These bacteria can grow if the tofu is not properly refrigerated or if it remains on the shelf too long.

"During aseptic packaging, however, noted the release, the tofu is treated to extremely high heat for a short amount of time before packaging. This is said to kill all bacteria including the heat-resistant spores. The package is then hermetically sealed to ensure product safety and extend shelf life.

"According to Art Mio, national sales director for the company, 'In addition to monitoring expiration dates on water-packed tofu, retailers can identify possible unsafe packages by watching for discolored water or taking note of consumers who complain of sour taste, an indication of bacteria growth.'

"Recommended storage temperature for water-packed tofu is not higher than 41 degrees Fahrenheit, stated the release.

"'It's just a matter of what tofu is and how it needs to be handled,' remarked Mio."

8431. **Product Name:** [Tofu (Fresh, or Canned)].
Foreign Name: Tofu (proteina vegetal).
Manufacturer's Name: La Sojeria, S.C.
Manufacturer's Address: Carretera de Vic Km. 30, 08180 Moia (near Barcelona), Spain. Phone: (93) 830 1123.
Date of Introduction: 1988. January.
Ingredients: Organic white soybeans (*Soja blanca biólogica*), spring water, nigari.
Wt/Vol., Packaging, Price: Vacuum packed or canned.
How Stored: Refrigerated.

New Product–Documentation: Letter from Javier Arocena of Zuaitzo, Spain. 1992. Dec. 14. He knows of three other soyfoods manufacturers in Spain: Natur-Soy, Vegetalia, and La Sojeria, all near Barcelona.

Form filled out by Laura Cami and Mario Rimoldi of La Sojeria. 1993. Feb. 13. Their company introduced these products in Jan. 1988. The tofu is sold vacuum packed and pasteurized. They now make about 960 lb/month.

Label sent by Cami & Rimoldi. 1993. 4 by 2 inches. Self

adhesive. Green on pink.

8432. Nash, Jonell. 1988. Fix food fast. *Essence* 18(9):72. Jan.
• ***Summary:*** Contains recipes for Spicy Barbecued Tofu, and Tofu-Vegetable Casserole. This appears to be a magazine for African-Americans.

8433. **Product Name:** Nasoya Nayonaise (Tofu Mayonnaise).
Manufacturer's Name: Nasoya Foods, Ltd.
Manufacturer's Address: 23 Jytek Park (P.O. Box 841), Leominster, MA 01453. Phone: 617-537-0713.
Date of Introduction: 1988. January.
Ingredients: Nasoya tofu (well water, organic soybeans, natural nigari), pressed sunflower oil, rice syrup, wood aged apple cider vinegar, prepared mustard (vinegar, water, mustard, salt, turmeric, spices, natural flavor), sea-salt, natural vegetable gum.
Wt/Vol., Packaging, Price: 14 fluid oz (414 ml) glass jar.
How Stored: Shelf stable.
Nutrition: Per 1 tablespoon: Calories 40, protein 1 gm, carbohydrates 1 gm, fat 4 gm, sodium 45 mg (320 mg/100 gm).
New Product–Documentation: Label. 1987, undated. 2.75 by 9.75 inches. Blue, green, red, and yellow on white. "Half the calories of mayonnaise without cholesterol. 100% natural. Made with fresh tofu. No sugar, low sodium, great taste." Talk with John Paino. 1988. Feb. 15. This product was not commercially available until Jan. 1988. The new design is from Saleme Design in Boston. They changed the name to Nayonaise from Nasoyanaise "to make it easier for consumers to recognize the product usage." Ad in Vegetarian Times. 1988. May. p. 51. Full page, color. "Award winning taste without cholesterol. Naturally good from Nasoya." Also in East West. 1988. Nov. p. 98. Also in East West. 1989. Nov. p. 27. Letter from John Paino. 1989. Nov. 12. This is the same product as Nasoyanaise with a new name. Trademark registration says the trademark was first used in commerce on 19 Oct. 1987.

8436. **Product Name:** Shiitake Tofu.
Manufacturer's Name: Wildwood Natural Foods of Santa Cruz, Inc.
Manufacturer's Address: 1560 Mansfield Ave., Suite D, Santa Cruz, CA 95062.
Date of Introduction: 1988. January.
Ingredients: Organic soybeans grown in accordance with Section 26569.11 of the California Health and Safety Code, filtered water, nigari, fresh shiitake mushrooms.
Wt/Vol., Packaging, Price: 10 oz.
New Product–Documentation: Talk with Jeremiah Ridenour. 1988. Aug. 26. The company started production in Jan. 1988. The shiitake mushrooms are shredded and layered with the curds in the forming boxes. It is a delicious product but has been discontinued because of a high spoilage rate. Label. 1987. 2.5 inches diameter. Black on metallic silver. Logo of birds flying over a forest silhouette. "Fresh. Slice & saute, serve hot for best flavor."

• ***Summary:*** Contains 6 recipes. "We definitely have an image problem," says Judy Walker of Soyfoods Association. Address: DC.

8440. Demos, Steve. 1988. New developments at White Wave (Interview). *SoyaScan Notes.* Feb. 4. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** "We are in the process of doubling the capacity of our tempeh operation on a single shift. We are rebuilding the entire plant: tempeh, tofu, ice cream. We plan to stay in this plant and are shooting for a building of our own by the mid-1990s. We gave up on acquiring the dairy and a meat company nearby. We're growing so fast, I can't tell you how big we're going to be. Right now we have 20,000 square feet; by the end of this year it will not be enough.

"We will soon have a semi-automatic tempeh process. We have effectively automated the filling of the containers and made the rest of the process much easier. We took the grunt out of it. But we still use rolling racks in an incubation room. A conveyorized incubation system is still a ways off. Recently Peter Golbitz asked me how much tempeh we were making. I told him I did not want to say any more than that it was in the tens of thousands of pounds per week. He told me he wanted to say "15-20,000 lb/week" and I said that he had no basis for those figures." Address: Boulder, Colorado.

8441. Hess, Albert. 1988. [Re: History of Tofuhaus Tiefenthal]. Letter to William Shurtleff at Soyfoods Center, Feb. 9. 1 p. [Ger; eng+]
• ***Summary:*** "I began tofu production in June 1983 in Rittersheim as a one-man operation. There was much demand for my products, so that by Sept. 1985 I ran out of room and the work was over my head. In Oct. 1985 I founded Tofuhaus Tiefenthal with a partner named Roland Hochstetter in Tiefenthal. Our 3-person operation made and marketed 2,500 kg/month of tofu. In Aug. 1987 we moved to Lautersheim, where have had 5-6 people (workers/employees)."

Letter from Bernd Drosihn. 1990. May 10. This company, still run by Albert Hess, is now named Das Tofuhaus and is located at Hauptstrasse 13 in Lautersheim. Address: Tofuhaus Tiefenthal, Hauptstrasse 13, D-6719 Lautersheim, West Germany. Phone: 06351-43718.

8442. Bailey, Jane. 1988. Tofu: Eating the high-protein, low-fat way. *Recorder* (*Greenfield, Massachusetts*). Feb. 10. p. 33-34.
• ***Summary:*** Contains 16 tofu recipes.

8443. Steiner, Ann; Williamson, CiCi. 1988. Tofu, or soybean curd, high in protein and low in fat. *Beacon Journal* (*Akron, Ohio*). Feb. 10. Widely syndicated.
• ***Summary:*** On a recent Jeopardy! television show, one of the answers was, "Of yogurt, liver, and tofu, the one Americans dislike the most." The correct question (answer): Tofu.

8444. Albert, Lawrence. 1988. Global Foods tries to save Royal American Food Co. (Interview). *SoyaScan Notes.* Feb. 17. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Royal American filed for Chapter 11 reorganization / bankruptcy in May 1987. They had debts of $1.4 million. Global Foods, the original manufacturer of many Royal American textured soy flour products, is now running the company out of its plant. Albert was appointed by the court to try to make the company work. They have stopped losing money and have paid back $15,000 of the $50,000 post debt. He wishes he had just let the company die and had pushed in Global products in place of the Royal American. He wanted the many people in their sales network. The future of his efforts to save Royal American does not look too promising. The bills are too high, unless the court will let him pay $0.25 on the dollar. Their tofu failed because it was not a quality product. He is now shipping Globalite Tofu, which is a better product. It jells better, less soy flavor. He still has the mousses and was the original manufacturer. They were just a multi-level marketing company, not a manufacturer. He thinks they could have succeeded with better management. His company needs sales badly. His best sellers are his meals, which he sells in America. They are not exported. He founded Global Foods on 3 Jan. 1983. First product was Globalite meals that contain textured soy flour.

Note: Global Foods is located near ADM in Decatur, Illinois. Are they related? Address: Global Foods, 2881

8445. Bernardini, Lorenzo (Bern). 1988. Tasty treats at Wildwood Natural Foods Deli. *News* (*San Rafael, California*). Feb. 17-23.
• ***Summary:*** This article is in the section titled "Dining Out in Marin." A dietary genius named Bill Bramblett along with partners Paul Orbuch and Frank Rosenmayr have created a huge success story at Wildwood (A fourth partner, Jeremiah Ridenour, operates a tofu factory in Santa Cruz). Wildwood makes or distributes 90 different products. In addition to Wildwood Natural Foods Deli in Fairfax, the company conducts a thriving wholesale business in nine Bay Area counties, with additional outlets from Eureka to Los Angeles. For the past eight years Wildwood has experienced a 30 to 50% annual growth. The company distributes fifty thousand products weekly. Wildwood has nine delivery vehicles on the road.

A photo shows Chef Narayana, owner Bill Bramblett and maitre d' Daniel Spear; they not only serve vegetarian fare on the premises but also operate a brisk take-out business. The following products are mentioned: Tempeh Fiesta, Tabouli, Japanese Noodles, Tofu Dill Salad, Spinach Seitan Salad (Wildwood makes the seitan), Cream of Potato-Dill Soup (dairyless), Enchilada con Salsa. Address: Restaurant features.

8446. Schecter, Andy. 1988. New developments at Northern Soy (Interview). *SoyaScan Notes.* Feb. 17. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** This spring the company will be buying and moving into a 16,000 square foot building at 545 West Ave. in Rochester. They now have 3,000 square feet and are very crowded. The payments will be considerably larger than their present rent payments. They decided to drop the idea of making soymilk on a large scale that they were investigating last year. Four years ago they introduced a new line of packaged tofu under the Harvest Light brand. Before that they sold only fresh unpackaged tofu in bulk. Address: 30 Somerton St., Rochester, New York.

8447. *Herald-Journal* (*Clarinda, Iowa*). 1988. Iowa completes Japanese soybean market. Feb. 18. Also in Herald-Patriot (Chariton, IA). Feb. 25. "Goal is Soybean Japanese Prefer."
• ***Summary:*** Iowa farmers are trying to be more competitive in producing special soybeans for the Japanese. The Vinton and Pride soybeans, special varieties used in tofu, are large-seed, high protein. They have a yellow seed coat and a clear hilum. Other types of soybeans known as Prize and Iowasoy L5301 are used in preparing miso. In Iowa, out of 7,000 soybean farmers, only 100 farmers grow the special soybeans. There are no more than 100,000 acres in Iowa for producing special soybeans, which is a small amount. A farmer takes some gamble because these special varieties of soybeans don't yield as much as regular soybeans. However, a farmer receives a premium for high quality special soybeans. The market is changing, becoming more specialized. To sell the special soybeans a farmer has to contract with one of the eight soybean exporters in Iowa. During the 1960s Japan received it's food soybeans from the IOM, which stands for Indiana, Ohio, and Michigan.

8448. *Recorder* (*Greenfield, Massachusetts*). 1988. ABC films Greenfield firm [Lightlife Foods]. Feb. 18.
• ***Summary:*** Lightlife makes tempeh and tofu hot dogs, using tofu bought from nearby Tomsun Foods. The company will appear on ABC's "World News Tonight" with Peter Jennings, featured in a series "Health Food of the Future." Michael Cohen will be shown making tempeh dishes.

8449. Erb, Gene. 1988. Soybean research sprouts products. *Des Moines Register* (*Iowa*). Feb. 21.
• ***Summary:*** Lawrence Johnson is the professor in charge of the Food Crops Processing Research Center at Iowa State University. By the 1930's and 1940's, scientists were earnestly working to find new products and ways to use the soybean. "Utilization research" flourished during those decades. Johnson said, "In this country, we have not aggressively sought export markets for value-added products. We have concentrated on exporting low-value commodities. The major utilization research projects from the 1930's and 1940's ceased in the 1950's because we thought we were headed toward a world food crisis. We shifted to production research and away from utilization. We have to go back to some of the old ideas that have been neglected since the late 1940's. Current research projects at ISU's Food Crops Processing Research Center are directed at improving food and feed processing operations and profitability,"

Several projects are aiming at finding faster, cheaper ways to extract oil from soybeans. The university's Vinton bean is preferred by the Japanese for the production of tofu. Researchers Walter Fehr and Earl Hammond have developed a soybean low in linolenic acid. A small-seeded soybean developed at ISU should be ideal for making soybean sprouts for use in salads. The goal is to develop specialty strains for unique uses.

8450. Lovell, Susan. 1988. Taste and texture: An all-new world in tofu. *Telegram* (*Portland, Maine*). Feb. 21.
• ***Summary:*** Peter Golbitz and his wife, Sharyn Kingma, own Soyatech, a market research and development company. He is president and director of market research; she is vice president and director of product development. Golbitz and Kingma learned about tofu the hard way–by manufacturing it. From 1980 to 1984 they owned and ran Island Tofu Works in Bar Harbor. Eventually they were marketing 2,000 pounds a week. After an abrupt lack of financing blocked their plans

© Copyright Soyinfo Center 2013

for a larger plant in 1985, Golbitz and Kingma decided to think small. "We took one product we'd developed to a large food corporation and they were interested–and that's how we began consulting and doing product development," said Golbitz.

8451. Milbury, Peter. 1988. Chico-San, amazake, and rice syrup (Interview). *SoyaScan Notes.* Feb. 23. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Peter believes that the earliest recipe for amazake in a U.S. cookbook was in Cornellia Aihara's *The Chico-San Cookbook.* This was later reprinted as *The Macrobiotic Kitchen* by Japan Publications. The original book was a labor of love by Cornellia for Chico-San, edited by Peter Milbury and Dave Schleiger. Cornellia has always taught using amazake as a sweetener, and she prefers it to rice syrup. She has a wonderful cake, sweetened with amazake and with an amazake frosting. She was a pioneer in introducing amazake to America.

Junsei Yamazaki is now selling his own miso. He is at Route 1, Box 1333, Orland, CA 95963. Phone: 916-865-5979. The product name is Junsei Amazake Miso.

Concerning the future of amazake: "I thinks it's hot. It's just got nowhere to go but explode. It's such a wonderful product, with so many variations. All the beverages are now dessert drinks. Someone should make an amazake counterpart to soymilk, sold in larger quantities, with a smoother consistency, less solids, and less sweetness. Chico-San is now working on an amazake powder with California Natural Products (CNP); mix with warm water and serve as a drink. Rice syrup also has great potential as a sweetener. Chico San's Yinnies, a malted sweetener, were the first product of their type in America. Sjon Welters of Nasoya is at least thinking about using amazake as a sweetener for soymilk. Sjon spent a week in the Chico-San rice syrup operation before it was shut down and moved to CNP. The amazake used for Rice Dream is much sweeter than a typical amazake. "I think Rice Dream is one of the most fantastic products I've ever tasted. Originally Chico-San was going to make the product for him. Then we shifted down to CNP. One company that might have interest in amazake is JGR Resources, Inc. Dr. Adam Lambert is Technical Director. P.O. Box 97, Haskell, New Jersey 07420. Phone: 201-835-7644. Their product is Koji-Converted Rice-O-Sweet Brown Rice Syrup. They are a wholly owned minority corporation, that took over a brewery.

The first attempt Peter ever heard of to package amazake in Tetra Pak was in Jan. 1985, just after Heinz took over Chico-San. Bob Kennedy and he set up a run with Real Fresh in Visalia. Real Fresh botched the homogenization. By this time Chico-San had a lock-tight exclusive contract with CNP to make rice syrup and amazake just for them, using their rice. Chico-San set up CNP in the rice syrup and amazake business and spent enormous amounts of time showing them how to do it. Before that, starting in 1972, Chico-San made its own rice syrup in Chico using not koji but a combination of malted brewer's barley and commercial enzymes from Miles Laboratories. At that time CNP would make the amazake for Robert Nissenbaum, but Chico-San would do the billing. This changed after Heinz took over and couldn't meet their commitment to the contract with CNP. So CNP got out of the contract and dealt directly with Nissenbaum.

Milbury and Belleme say Macromuse (Peggy Rosoff; 301-656-4313, Bethesda, Maryland Circ. 12,000) is much better for long in-depth articles than East West. Address: Lundberg Farm, Box 369, Richvale, California 95974. Phone: 916-882-4551.

8452. Roller, Ron. 1988. Edensoy and the U.S. soymilk market (Interview). *SoyaScan Notes.* Feb. 23. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Ron estimates the size of the U.S. soymilk market to be about 2.1 million gallons a year (not including infant formulas, or small fresh local manufacturers). The largest companies, in descending order of size, are: American Soy Products (Eden Foods; 55-65% market share), Vitasoy, Sunsoy, Westbrae, and Great Eastern Sun. The trend is definitely up. Vitasoy's aggressiveness in the marketplace from early 1987 slowed down Edensoy's progress. Then Vitasoy had big programs and in the last 4 months they seem to have cooled out quite a bit. A Dun & Bradstreet report shows that they lost $700,000 last year selling soymilk.

All is going very well in the joint venture with the various Japanese companies. The relationships are generally harmonious, and they are on target in terms of their volume goals and expectations. They hope to increase volume to cut down overhead expenses. The plant can make 65-70,000 cases/month. During the last 2 months there have been 15 enquiries for export, some of which will soon be signed agreements with France, New Zealand, Australia, etc. They have approval for 190 Kroger stores and are cautiously optimistic on this. Mr. Iwazuki from Marusan runs the ASP plant. They now have 6 soymilk products which are Eden Foods' top six best-sellers: three flavors (carob, vanilla, original) in two sizes (liter and 250 ml). By volume, the liter outsells the 250 ml by more than 3 to 1. Next: an organic soymilk (They now use non-organic Beeson soybeans. The organic market now seems to be growing rapidly), some new flavors, and some totally new soy products, such as tofu. Eden no longer imports soymilk. Soymilk is pretty price sensitive; whenever they put it on sale, it moves. They just started a case-stack program that Sunsoy has had for years. When they started the plant they stopped wholesaling, and dropped over $1 million of wholesale business. But they made that up this past year, plus some.

Concerning oil in soymilk: The label on their Japanese imported product was not correct. Oil was added in Japan but Eden was not told. It was not listed on the label. When their

© Copyright Soyinfo Center 2013

U.S. product was launched, it contained less than 1% added oil. Eden got so many complaints about this small amount that they now no longer add oil, except to the carob, and that will be discontinued as soon as their present labels are reprinted.

Concerning other grains, they are importing Job's tears, which is now recommended by macro teachers for cancer patients. They brought the price from $8.50 down to $2.00/lb and sell lots. Also involved with quinoa, they used to be the master distributor for Quinoa Corp. but are now importing lots from Andean countries; expect to reduce the retail price by 40%. They are thinking of using quinoa in soymilk. Their present sweetener is "malted cereal sweetener" which is made by mixing sprouted barley with corn grits, the adjunct. Rice is too expensive. You can get a higher sugar content with corn than with barley. Rice is still higher in sugar. Corn converts the fastest; rice is slow. It is specially made by a malting house, and they use almost a tanker load every 10 days. They helped develop the product and intend to come out with a line of malted grain sweeteners using malted barley plus different grains. "There is a lot of funny business in the malting arena." They did not like the use of commercial enzymes by California Natural Products. He thinks most people do not realize how their rice syrup is made. Address: Director of Purchasing, Eden Foods, Clinton, Michigan.

8453. Muendel, H.-H. 1988. Soybeans: Current status and potential. *Agriculture Canada Research Station, Lethbridge, Weekly Letter* No. 2819. Feb. 24. 1 p.
• ***Summary:*** "Over the past decade a number of southern Alberta growers have tried growing small areas of soybean. Yields have been variable, depending on variety, time and depth of seeding, weed control, and harvesting equipment. In excess of 2 tonnes per hectare (30 bushels per acre) were achieved commercially. The major problem encountered was the lack of ready markets at sustained attractive prices.

"Several early maturing varieties suitable for production under irrigation in southern Alberta have been released in recent years: Maple Ridge and Maple Amber from the Agriculture Canada Research Station at Ottawa and KG20 by King Grain Limited.

"Research by Agriculture Canada at the Lethbridge Research Station and Vauxhall Substation and by Alberta Agriculture at Brooks and Bow Island has determined some of the agronomic requirements and characteristics of soybean.

"A number of commercial enterprises are now showing interest in Alberta-grown soybean. Recent developments of test processing and whole bean extrusion for animal feed are encouraging and other commercial processing interests as well as marketing into the tofu-tempeh human food markets are being explored. Whereas farmers in southern Alberta had no ready market for their soybeans in the past, this major obstacle to local production may soon cease to exist."

Note: As of April 1991, Dr. Hans-Henning Muendel was on official leave with an assignment to the organization of BARD project (Barani [Rainfed] Agricultural R&D) in Pakistan, administered by Agriculture Canada. He is at G.P.O. Box 1785, Islamabad, Pakistan. Address: Plant Breeder, Lethbridge, ALB, Canada. Phone: 403-327-4561.

8454. *E. Bridgewater Star* (*Bridgewater, Massachusetts*). 1988. Be creative: Make it a tofu day! Feb. 25.
• ***Summary:*** Robert Bergwall, vice president of Nasoya Foods said, "Today, in the United States, tofu is recognized as a nutritional and tasty alternative to protein foods, but contains absolutely no cholesterol and is low in saturated fat, sodium, and calories, and is high in calcium. At Nasoya, we produce between 90,000 and 100,000 pounds of tofu a week." For tofu and tempeh recipes, contact the Dept. of Food and Agriculture, 100 Cambridge St., Boston, Massachusetts 02202.

8455. *Los Angeles Times.* 1988. Runners to receive Mori-Nu Tofu. Feb. 25.
• ***Summary:*** An anticipated 15,000 Los Angeles Marathon runners will get something different in their pre-race "goodie bags" this year–tofu.

Samples of recipes made with tofu will be offered to the public as well during the marathon's four day Health and Fitness Expo and race-day Finish Line Festival.

8456. Newhouse, Sonia. 1988. Vegetarian Feasts, Direct Foods, soy ice cream, and the tofu industry in England (Interview). *SoyaScan Notes*. Feb. 25 and March 13. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** In 1974 she was crippled with osteo-arthritis and was told by her doctor she would be in a wheel chair in a few years and spend the rest of her life there. She was a hearty meat eater. She visited Dr. Gordon Latto, a specialist in nutrition and president of the Vegetarian Society (now in his 70s and living at 4 Darby Rd., Caversham, Berkshire). He put her on a vegetarian diet, with no refined foods, stimulants, or additives, plus cold showers each morning. "After about 3 days I began to feel better. And amazingly after about 10 days I was able to stand up straight without pain or stiffness in my joints." She sold her guesthouse and started a firm in London named Vegetarian Feasts Ltd. specializing in vegetarian frozen meals without additives. The first products went on the market in March 1984. The media took up her story in a big way. In September 1984 she introduced two entrees with TVP as the major ingredient: Chile Sin Carne and Stroganoff. "We stole so much freezer space that all the big boys decided to jump into the vegetarian field, but they didn't do it with whole foods." Her pioneering products did so well in supermarkets that many health food shops in their "frozen food cabinets" first began

© Copyright Soyinfo Center 2013

to carry them. By June 1986 (see Financial Guardian, June 20; Family Circle, UK ed., Jan. 1986) she had an annual turnover in excess of £500,000 and a staff of 25, producing 6,000 microwaveable units a day and selling in major food chains (Safeways, Co-op supermarkets, Holland & Barrett health food stores, Europe, etc.).

It is well known that 30% of British university students are vegetarian, so the catering side of the vegetarian industry in enormous. But in 1986 about 75% of her products were sold through retail outlets. The majority were sold in supermarkets rather than health food shops. Realeat came out with a set of meals after hers, but they were discontinued in the supermarkets. It is not clear whether or not they contained soy protein.

In February 1986 she sold the company to British Arkady (owned by ADM), which wanted to get into the frozen foods business; about a year before they had purchased Direct Foods (in Petersfield, Hampshire), which made all dry foods, including some soy products. Direct Foods was started by a husband and wife who were farmers and who didn't like selling their animals to slaughter. They bought TVP from a manufacturer and sold it direct to health food shops. One of their products was Sosmix; you add water and make a sort of spaghetti sauce.

About 20 years ago Sonia developed a tofu ice cream (no isolates) for her daughter who was allergic to cow's milk protein. She still feels this product has commercial potential.

She thinks the four largest tofu manufacturers in England, in descending order of size, are Paul's Tofu, Dragon & Phoenix, Regular Tofu Co., and Cauldron Foods. Cauldron might be biggest; they put out the most finished products. Dragon and Phoenix, serves mostly the Chinese quarter of London. Sonia has been in their plant. They breed fish in tanks in their tofu plant, which is walled with red tile.

Update: Letter from Sonia Newhouse. 1989. April 3. She is now at the Ultimate Life Center, Inc., 3760 Sports Arena Boulevard, Suite 10, San Diego, California 92110. Phone (619) 224-0608. She and her friend, Rosemary Feldd, are in the process of opening "a metaphysical / new age bookstore here." "Long term we both have the same plans to open a residential holistic center where alternative therapies will be available." Address: 27 Carlton Rd., East Sheen, London SW14 7RJ. Phone: 01-392-1852.

8457. Elliott, James G. 1988. Consumer attitudes regarding soy products. In: L. McCann, ed. 1988. Soybean Utilization Alternatives. St. Paul, MN: Univ. of Minnesota Center for Alternative Crops and Products. vi + 429 p. See p. 381-91. [3 ref]

• ***Summary:*** Discusses: Consumer awareness of soy foods. Consumers' awareness of manufacturers' use of soy protein. Consumer willingness to purchase meat products containing soy protein. People were asked, when you think of foods which are made from soybeans, what products come to mind? Unaided awareness of soyfoods among consumers was low, only 4 in 10 were able to name a specific soyfood on a top-of-the-mind basis. However, aided awareness was significantly higher. Soy sauce and soybean oil had the highest levels of aided awareness among consumers at 94% and 77% respectively. Tofu, soymilk, margarine, and soy nuts registered moderate levels of aided awareness at 45%, 38%, 38%, and 31% respectively. Tofutti came in next at 21% and miso came in last at 10%.

When asked if they had "ever tried" these products, of the eight soyfoods mentioned, soy sauce demonstrated the highest trial level at 75%. All other products "ever tried" were 20% or less. Respondents who had not tried a particular food product made from soybeans were asked if they would be willing to do so. Expressed willingness to try was in the 60% to 70% range. It was the highest for soybean oil, soy nuts, margarine, tofu and Tofutti.

65% of those surveyed responded positively when asked, "have you heard of soy protein being included in certain food products?" 35% were unaware. Among consumers who were aware that manufacturers use soy protein, 60% said that they were definitely using foods that contain soy protein, or believed that they were; 29% said they were not using them; and 11% didn't know. When asked, "Does the fact that a food manufacturer uses soy protein in its products change your feeling about the company?," 80% stated no difference; 8% stated that they felt better; and 12% said that they felt worse. Address: Manager of scientific communications, Protein Technologies International, St. Louis, Missouri.

8458. Golbitz, Peter. 1988. Soy cheese market: From nonexistence to boom in three years. Popular new products offer health benefits over traditional counterparts. *Soya Newsletter* (*Bar Harbor, Maine*). Jan/Feb. p. 1, 6-7, 10, 12. [1 ref]

• ***Summary:*** Born under a bad sign: The category was created in early 1985 when the first supposedly "non-dairy" cheese appeared. Marketed as Soyarella, and distributed by Neshaminy Valley Natural Foods of Huntingdon Valley, Pennsylvania, the product label read; soy milk, water, soy oil, vegetable gum, vegetable renin, and salt. The label also stated that the product was "non-dairy". However, there was immediate suspicion from different parts of the industry as to what Soyarella really contained. Even with all the controversy surrounding the product, Soyarella was a big hit, but it disappeared from the market early in 1986.

The hard cheeses: The first product to hit the stores after Soyarella was Soya Kaas–Mozzarella Style, marketed by American Natural Snacks, St. Augustine, Florida, a subsidiary of Tree of Life. It was first released during the spring of 1986 in seven pound blocks. Casey Van Rysdam, president of American Natural Snacks admits that his company is certainly the market leader now. Galaxy Cheese

© Copyright Soyinfo Center 2013

had already been marketing a line of reduced cholesterol, substitute cheese products under the Formagg name since 1977. A Galaxy subsidiary, Soyco Foods, came out with Soyco, a soy/casein blend cheese and Soymage, a casein-free product. NuTofu, made by Cemac Foods, came out in late 1986. American Chef released their soy/casein blend cheese under the Soy Joy label in 1987.

The soft ones: Soyalite is a soft tofu cheese made by Simply Natural of Norma, New Jersey. Better Than Cream Cheese is produced by Tofutti Brands, Rahway, NJ. Tofutti Brands will have this cheese available by mid-March, in plain, salmon, onion, and vegetable flavors. Better Than Cream Cheese is now being used as an ingredient in Tofutti Brands' Better Than Cheesecake and rugalach pastries. The product will also be used as a stuffing in a line of pasta products scheduled for release later this year. As an ingredient, Pizsoy and Old Chicago are soy-based mozzarella products which fit nicely as ingredients for frozen pizzas. Light Foods of St. Louis, Missouri, released New Tofu Links Special–with "natural imitation" cheddar soy cheese stuffed inside.

Health benefits of soy-based cheese products include the lack of cholesterol and lactose. Soy-based cheeses are just one part of a larger category of products–substitute and imitation cheese products–and between 1982 and 1985, shipments of these products grew by one third in dollar value to $325 million, according to the U.S. Commerce Department. Frost & Sullivan, in a recent study, stated that both substitute and imitation cheeses held a 5% market share in 1982, and projected that the category would grow to 15% of the cheese market by 1987. According to New York-based Selling Areas Marketing, Inc. (SAMI) and Frost & Sullivan, retail sales of natural and process cheese totalled over $4,500 million during 1985 and is one of the stars of the dairy industry with sales increases of over 5% a year projected for the future. Address: P.O. Box 84, Bar Harbor, Maine 04609. Phone: 207-288-4969.

8459. Golbitz, Peter. 1988. Soya interview: Legume's frozen sales warm up with hot chocolate [Gary Barat]. *Soya Newsletter* (*Bar Harbor, Maine*). Jan/Feb. p. 4-5, 14-15.
• ***Summary:*** Legume turned from a small enterprise into one of the first publicly held soyfoods companies in America. They succeeded in raising $400,000 in 1983 and developed a line of frozen entrees and with the support of another $1.2 million raised in their first public offering in 1984. In 1986 they raised another $2.5 million with another stock offering. Legume had total sales of $1.5 million in fiscal 1987 and had sold nearly $5 million worth of tofu products in its short history. Gary Barat became interested in tofu, "while recovering from surgery in 1977. I had been a vegetarian since 1968. There was a small tofu shop in Florida with just one kettle and two gentlemen making tofu."

After getting started in the business, Barat says, "We moved to New Jersey to a larger bakery–we had run out of space in our Crown Heights, Brooklyn location. We ended up right next to Celentano [an all-natural frozen entree manufacturer that was part of Legume's successful growth]. We thought, my God, this is incredible. There are enormous slotting costs involved in getting into the freezer case in major supermarkets. They can run as high as $30,000 per item". Peter Golbitz asks, "Where did the idea for the tofu chocolate bars come from?" Barat replies, "Several years ago our meditation teacher told us laughingly to 'make tofu candy'. In developing a pie, we stumbled upon the idea of tofu chocolate. But we had trouble. The sales of chocolates are approaching the sales of our frozen [products], which have been out for six years–and I think they will be passing them in sales very soon." Address: Soyatech, Bar Harbor, Maine.

8460. Golbitz, Peter. 1988. Whole bean soy products. In: L. McCann, ed. 1988. Soybean Utilization Alternatives. St. Paul, MN: Univ. of Minnesota Center for Alternative Crops and Products. vi + 429 p. See p. 325-31.

Note: This menu seems to differ slightly from the original 1934 menu in that it omits one dish (Soy Bean Biscuit with Soy Bean Butter) and replaces it with another (Soy Bean Macaroons). Address: Dearborn, Michigan.

8463. **Product Name:** Homestyle Cottage Tofu Salad: A Cottage Cheese Substitute.
Manufacturer's Name: Homestyle Foods (Formerly

© Copyright Soyinfo Center 2013

Sonoma Specialty Foods).
Manufacturer's Address: 2317 Bluebell Dr., Santa Rosa, CA 95403. Phone: 707-525-8822.
Date of Introduction: 1988. February.
Ingredients: Tofu (organic soybeans*, water, nigari), soy oil, soy milk, vinegar, chives, dill, parsley, scallions, natural spices, sea salt, and honey. * Grown in accordance with CA H&S Code 26569.11.
Wt/Vol., Packaging, Price: 8 oz or 15 oz plastic tub.
How Stored: Refrigerated.
Nutrition: Per 2.66 oz.: Calories 137, protein 7.5 gm, carbohydrates 4.4 gm, fat 10 gm, fiber 1.5 gm, sodium 0.21 gm, cholesterol 0.
New Product–Documentation: Label. 1987 and 1988. 4.5 inches diameter. Black, green and blue on white plastic lid. "Improved! Non-Dairy. Cholesterol Free. Ready to Eat on Sandwiches, as a Dip & in Salads. Natural. No Preservatives. Nutritious. Delicious. Kosher."

8464. Jeng, Chii-Yeng; Ockerman, H.W.; Cahill, V.R.; Peng, A.C. 1988. Influence of substituting two levels of tofu for fat in a cooked comminuted meat-type product. *J. of Food Science* 53(1):97-101. Jan/Feb. [19 ref]
• ***Summary:*** Two levels (15.5% and 31.6%) of tofu were substituted primarily for fat (12 and 28% fat and 3.5% lean) and these treatments were compared with a meat batter containing soy protein concentrate (SPC, 3.5%) and an all-meat (control) bologna for raw and cooked product analysis. Tofu has the potential of being a satisfactory meat additive that can significantly reduce the fat and calorie level if substituted for fat in a meat emulsion product. Address: Animal Science Dep., Ohio State Univ., Columbus, OH 43210; The Ohio Agricultural Research & Development Center, Wooster, OH 44691.

• ***Summary:*** At the top of the cover: "Wholefoods recipes with soya, the giver of super protein. 132 recipes with tofu, okara, tempeh, soybeans, and soybean grits." Plus 16 color photos of prepared dishes. Tofu is used in many of these German-style recipes. Contains instructions for making tofu, okara, and tempeh at home.

8466. McGowan, Christina. 1988. An analysis of the market for soya-based products. Dublin, Ireland: Centre for Marketing Studies, University College Dublin. 37 p. Feb. 28. Unpublished typescript. 30 cm.
• ***Summary:*** This is the earliest survey seen of the soyfoods market in Ireland. It is full of interesting statistics. The summary states that the market for soya-based products in the Dublin area is miniscule [minuscule]. These products account for only 1-5% of total health food sales. Annual sales of such products are roughly £200,000–£240,000 according to Kelkin, Ireland's leading wholesaler. However if general trends in the health food industry can be relied on, there will be a steady increase in demand for soya products. The two main types of consumers are those suffering from lactose intolerance, and vegetarians. The most popular product is soya milk due to increased publicity and frequent references by doctors. Possible new products would be soy cheese, ice cream, or yogurt. A total of 23 retailers were interviewed and only 23 stock soya products.

A survey was conducted on 103 respondents outside health food stores. Of those who had tasted soya-based products (only 15% of the total): 71% buy for health reasons. 81% buy in health stores. 94% buy for themselves.

51% of the respondents became aware of soya products through word of mouth, 23% through in-store displays, and 23% through magazines/print. The most popular product quoted by respondents was soya milk (62.5% indicated they purchased it). Approximately 50% said they bought soy-based desserts, 20.2% bought tofu, 11.5% purchased soy cheese, 5.4% purchased tempeh, and 2.7% bought soy yogurts.

Companies involved with soya are Sunrise (under license here), Spiral Foods of Cork (Tempeh), and Irish Sea Greens (Tempeh). Some people are making tofu in the Swords area and an Asian man was making tofu locally. Wholesalers that handle soya foods are Wholefood Wholesale (import 20 tonnes a year of soya milk worth £15,000 [Irish pounds] wholesale value), LifeForce (import £30,000 to £40,000 of soya milk), Paragon Distributors (imports 3-4 tons of soya foods worth £10,000), Perrans (sells £12,000 worth of soya milk per year), and Kelkin Naturproducts (sells £150,000/year of soya milk and £50,000 desserts/year). Address: Dublin, Ireland.

Lessons in Tofu.

Not all tofu are created equal.

Mori-Nu Tofu is different. It's the only tofu that's actually made right inside an aseptic package. While most other tofu are made first, then packed in water, losing freshness daily, Mori-Nu's exclusive package locks in the delicious flavor of just-made tofu with every box and protects it until you open it. Guaranteed. No preservatives, no irradiation. Just silken-smooth tofu in a convenient revolutionary package.

Eat everything your heart desires.

Mori-Nu is a cholesterol-free, low-calorie protein source. It is also low in sodium and adapts easily to your favorite recipes, often letting you eliminate milk and eggs entirely. Make everything from drinks, dips and dressings to hearty main courses and desserts. Scramble it, broil it, bake it—even fry it. Or slice it into soups and salads. Just about any meal you prepare can benefit from this simple, natural, healthy and versatile food.

Mori-Nu makes delicious fun.

Blend the sweetness of strawberries into beautiful nutrition. Here's an easy, elegant dessert that everyone will love.

Strawberry Pudding Fluff

1 envelope unflavored gelatin.
1/4 cup boiling water.
1-10.5 oz. package **Mori-Nu Tofu (Silken/Soft),** drained, at room temperature.
3 Tbsp. honey, light color.*
2 cups whole fresh strawberries, if frozen use unsweetened, thaw, and drain.
1/2 cup additional strawberries.

1. Dissolve gelatin in boiling water. Stir until crystals disappear. Allow to cool.
2. In a blender or food processor, combine tofu, honey and gelatin mixture. Add 2 cups strawberries, a cup at a time. Blend on low. Allow some berries to remain in chunks.
3. Place the remaining berries in bottom of each serving glass. Add strawberry tofu mixture. Chill until set and serve cold.

*To sweeten, add more honey as desired.

Makes 4 servings of 6 oz. each. Per serving 126 calories, 5.8g protein, 2.8g fat, 23g carbohydrates, 8mg sodium, 0mg cholesterol.

Healthy Times focuses on today's heart-healthy lifestyles. Meet interesting people, learn about nutrition, and discover exciting, original tofu recipes.

Join the Mori-Nu Health for Life Club.

Learn more about this miracle food. Receive bi-monthly mailings of the **Healthy Times**, Mori-Nu's own newsletter, 15¢ coupons (2 per mailing) and full color tofu recipe series. For a one-year membership, send $2 check or money order to: Morinaga Nutritional Foods, Inc., Box 50, Dept. B 388, Pico Rivera, CA 90665.

Look for Mori-Nu's miracle package.

You'll find Mori-Nu in the Produce, Deli or Oriental food section of your store. Ask for it by name.

Always tastes just made. MORI-NU

8470. Poneros, Angela G.; Erdman, J.W., Jr. 1988. Bioavailability of calcium from tofu, tortillas, nonfat dry milk and Mozzarella cheese in rats: Effect of supplemental ascorbic acid. *J. of Food Science* 53(1):208-10, 230. Jan/Feb. Summarized in Science News 133:174 and elaborated on in Soya Newsletter. 1988. March/April. p. 1, 14. [32 ref]
• ***Summary:*** The calcium in tofu coagulated with calcium sulfate is 12.6% more bioavailable than that in nonfat milk. Tofu coagulated with calcium sulfate provides roughly 128 mg of calcium per 100 gm of tofu, whereas that coagulated with magnesium chloride (nigari) provides only about a tenth as much calcium. Ranked by bioavailability, calcium sulfate precipitated tofu was 107%, mozzarella cheese was 105%, calcium carbonate was 105%, nonfat dry milk was 95%, and tortillas were 93%. A follow-up study showed sesame seeds to be 65% and spinach 47%.

The experiments were conducted on rats, which appear to be a good model for calcium bioavailability humans. Erdman notes: "Tofu manufacturers should be encouraged to move to calcium sulfate as a coagulant if they are not already using it. Mixed blends of nigari and calcium sulfate would be a good choice as well." Address: Dep. of Food Science, Univ. of Illinois, 580 Bevier Hall, 905 S. Goodwin Ave., Urbana, IL 61801.

8472. *Soya Newsletter* (*Bar Harbor, Maine*). 1988. New process and equipment for making non-beany soymilk unveiled. Cold-grind method suitable for small and large plant applications. Jan/Feb. p. 13.
• ***Summary:*** The key to the process is grinding the beans in unheated water under a vacuum to eliminate oxygen. ProSoya Foods International Inc., Ottawa, Canada recently announced that patents for a new process and equipment are pending in several countries and that a patent has recently been allowed in the U.S. for equipment to produce a non-beany tasting soymilk. To reduce oxygen to a few parts per million, a special air/water tight vessel was designed with a small hammermill grinder built into the bottom. The new cold-grind method produces soymilk and tofu as wholesome as the traditional cold-grind method, but without the beany flavor. Crown Iron Works Corp. of Minneapolis, Minnesota, in association with ProSoya, is developing equipment which will use the new process to produce non-beany tasting soy flakes.

For more information contact Raj Gupta, ProSoya Foods International Inc., 627 Gaines Dr., Ottawa, ONT, K1J 7W7, Canada. Phone: 612-745-9115.

8473. *Soybean Digest.* 1988. Soy milk solves dairy shortage. Feb. p. 44.
• ***Summary:*** Professionals from Mexico's dairy industry and government food and nutrition programs attended a 10-hour seminar in Mexico City on how soy can help alleviate Mexico's shortage of dairy products. Two U.S. technicians, Emil Huang of Land O'Lakes and Allan Routh of St. Peter's Creamery, were among the seminar speakers. A program highlight was Huang's demonstration on tofu and soy milk manufacturing.

Note: This is the earliest document seen (Jan. 2010) concerning Allan Routh–later of SunRich.

8474. **Product Name:** Trader Joe's Tofurrito!
Manufacturer's Name: Trader Joe's (Product Developer-Distributor).
Manufacturer's Address: 538 Mission St., South Pasadena, CA 91030. Phone: 818-441-1177.
Date of Introduction: 1988. February.
Ingredients: Peanut butter, tofu, wheat chapati, russet potato, alfalfa sprouts, iceberg lettuce, carrots, spices, salt.
Wt/Vol., Packaging, Price: 10 oz. Retails for $2.29 (8/89, California).
How Stored: Refrigerated.
New Product–Documentation: Talk with Paul Duchesne. 1989. July 31. This company, a discount food chain, has retail stores up and down the coast of California. One of the principals came from Westbrae Natural Foods. It is wrapped up in a whole wheat chapati. Label sent by Paul Duchesne. 1989. Aug. 11. 3 by 2 inches. Black and red on white. "No heating necessary." Illustration of a man leading a mule train. Talk with Richard Baltierra, head of the Fresh Program at Trader Joe's. 1989. Aug. 23. This was their first tofu product, introduced in Feb. 1988; it is no longer on the market. All of their tofu products are made fresh daily by other food manufacturers in Southern California, this delivered to

© Copyright Soyinfo Center 2013

their stores within 24 hours. The chain, with outlets only in California, is about 15 years old. He is not aware of anyone from Westbrae being involved in the company.

8475. Wilson, L.A.; Resurreccion, A.P.; Hauck, C.C.; Murphy, P.M. 1988. Influence of variety and environment on the texture of tofu. In: L. McCann, ed. 1988. Soybean Utilization Alternatives. St. Paul, MN: Univ. of Minnesota Center for Alternative Crops and Products. vi + 429 p. See p. 425-27. [6 ref]
• ***Summary:*** The objectives of this study were to verify the relationship of glycinin and B-conglycinin in the soybean to the finished tofu texture made under standardized conditions, determine the influence of variety and environmental factors on tofu texture, and to determine if the glycinin and Beta-conglycinin content of raw soybeans can be used to aid soybean breeders and processors to select soybean varieties of consistently high quality.

Tofus made from soybean varieties Prize, Vinton, and Weber grown under environmentally identical conditions in 1982 and 1984 were found to consistently give statistically significant textural correlations with soybean glycinin content. Hardness, brittleness, and gumminess of the tofus were significantly correlated (> 0.9) to glycinin content in 1982, 1984 and combined 1982/1984. These results are largely in agreement with findings that 11S contributed to the hardness, gumminess, and chewiness of tofu.

Glycinin content (percentage of total protein) within these varieties (1982-1985) varied 26.9% to 45.6% while Beta-conglycinin content showed less variation (13.1% to 19.9%). Beta-conglycinin did not correlate well with textural characteristics (best case Vinton, Prize, Weber r=0.788 for chewiness) under identical environmental conditions. Environmental conditions had a major influence on the textural quality of the tofu across all four crop years. Address: Dep. of Food Technology, Food Crops Processing Research Center, Iowa State Univ., Ames, IA 50011.

• ***Summary:*** About Maurice Rochet (whose photo is shown) and his work with soyfoods, Cacoja, and C.A.C.

8479. Kanai, Noritoshi. 1988. Miyako Oriental Foods, Mutual Trading Co., Rice Koji, Amazake, Natto, and Miso (Interview). *SoyaScan Notes.* March 4 and 10. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Mr. Kanai recalls that the brochure describing how to make miso and amazake using Cold Mountain Koji was printed in 1976, the same year the Miyako factory began. They immediately started to sell the koji, using the brochure. Miyako is owned 60% by Mutual Trading Co. and 40% by Yamajirushi Miso Co., a joint venture.

Mutual Trading Co. started to import Amazake from Japan to American in about 1968. He thinks they were the first company to do so. If that is correct, this would have been the first amazake sold commercially in the USA. The product was imported frozen in non-aseptic polyethylene bags. At the same time they imported frozen natto, and non-frozen miso and Hamanatto. Mutual Trading presently imports amazake in 6.3 oz (180 ml) cans. It is ready to drink. His amazake is made in Japan by Morinaga, the confectionery company, not the milk company. It is a real amazake, not a sake kasu type. Nishimoto also imports amazake in 6.3 oz tins; the brand is Imuraya. North American Food in San Francisco, a sister company (not a subsidiary) of Mutual Trading Co. Tokiwa in Los Angeles, Hosoda Brothers in San Francisco, and Central Boeki in Long Island, New York, probably do not import amazake. He thinks that total imports are about 1,000 cases a year. Mutual Trading imports about 200 cases a year (48 x 6.3 oz cans/case).

Miyako has recently reached its full capacity for making koji. So they are planning to expand by installing an automatic koji making machine. The machine has already been ordered from Nagata (preferred over their competitor Fujiwara) in Japan. The machine should be in Los Angeles in late April or early May, and start operation by June. He is thinking of adding barley miso and a new variety of rice

© Copyright Soyinfo Center 2013

miso. Now they use only half of the building's floor space, so there is plenty of room for expansion. They plan to expand upward one level. Address: Los Angeles, California.

8480. Westbrae Natural Foods. 1988. Westbrae Soy-O, Vestro Foods (new owner), and Eastern Gates Native Soy Products in Hong Kong (Interview). *SoyaScan Notes.* March 4. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Soy-O was a soymilk with "no oils added" that was sort of debuted in Nov. 1986 in 20 white unprinted Tetra Brik cartons in 3 flavors, with a flyer, but was never really launched. That was just when they decided to switch their manufacturing out of Japan and wanted to focus on WestSoy and malted. Also things did not go well with the manufacturer. Lehmann wrote in Nov. 1986: "Westbrae O-Soy. The Honorable Soy Drink. Pliable foil packs. 6 oz. Organic soybeans, no oil added. Plain, carob, and vanilla flavors."

In February 1988 Westbrae merged with Vestro Foods, a company in southern California which is not in the natural foods industry. A publicly held company traded over the counter (NASDAQ symbol: VEST), Vestro is bigger than Westbrae; though they do not have a lot of employees they do have a lot of money and marketing experience. The company that never sold out just sold out. Gordon is still president. They have specialized in finding niche food companies and helping them develop in their marketing. Westbrae will be looking for more growth by acquiring other natural foods companies or products that meet their quality standards, and by launching some new products of their own. Everyone is very pleased.

Their WestSoy soymilk in Tetra Brik cartons is made in Hong Kong [by Hong Kong Soya Bean Products Co. Ltd., makers of Vitasoy] and selling very well. Sales of liters especially are up. Westbrae gets their soymilk through Eastern Gates Native Soy Products; Westbrae is not sure if they are the manufacturer or distributor. The Malteds are made domestically. The source is a secret. Sales are picking up after a recent price drop. Address: Emeryville, California.

8481. Chollet, Laurence. 1988. Magic beans: Soy foods multiplying. *Record* (*Hackensack, New Jersey*). March 7. p. B-3, B-4.
• ***Summary:*** This story is based on a news release from Soyfoods Center showing the number of new soyfoods products introduced each year. According to Bill Shurtleff, who compiled the report: "In 1976, 78 new products were introduced; last year, 330 products were introduced, making it by far the biggest year for soy food products,..."

Bonnie Liebman, director of nutrition for the Center for Science in the Public Interest, says that "all fats have been implicated in breast and colon cancer." Soy foods are free of cholesterol and generally low in saturated fats, but they are often high in unsaturated fats.

"Soy foods tend to be a little more expensive than their meat and dairy counterparts"–whether hot dogs, entrees, ice cream, or cheesecake. Mentions: Tofu Entrees from Legume, Inc, Lite Lite Tofutti, Tofutti's Better than Cheesecake. A large photo shows packages of Tomsun Tofu, Jofu, Ice Bean, Legume Classic Lasagne, and five Worthington meatless products: Luncheon Slices, Prosage Links, Vegetarian Pie, Wham (meatless ham), and Meatless Chicken.

8482. *Post* (*Paradise, California*). 1988. Good Food–Good Health: Tofu–you'll never know until you try. March 8.
• ***Summary:*** This article appeared in more than 100 newspapers nationwide during Feb., March, and April 1988. It gives a recipe for Tofu Ranchero. Many of the recipes featured in the column "Good Food/Good Health" come from the American Institute for Cancer Research's 4-volume cookbook series, "An Ounce of Prevention". The AICR is located in Washington, DC 20069.

8483. Shapiro, Margaret. 1988. Japanese outpace the world in life expectancy: Experts credit their low-meat diet. *Washington Post.* March 8. p. HE11.
• ***Summary:*** A table shows that a baby born today in Japan will live 80.9 years (for women) or 75.2 years (for men). In the United States these figures are 77.6 years for women (3.3 years less) and 70.1 years for men (5.1 years less). These Japanese numbers "represent one of the most dramatic increases in life expectancy of any nation since the end of World War II,..." Since the 1970s, the Japanese have been living longer than the Americans, but only in the 1980s did they pass the Swedes. The main reasons for Japan's postwar gains in life expectancy are: (1) Elimination of many deadly diseases, including dysentery and tuberculosis. (2) Major advances in medical care, including a universal system of medical coverage. (3) The lowest infant death rate in the world. (4) A healthy diet that is low in fat and cholesterol, low in total caloric intake, and high in fiber, soybean curd, seaweed, and vegetables. "As a result, the Japanese have one of the lowest levels of cholesterol and heart disease in the world." But Japanese a very high salt intake, which has resulted in one of the world's highest death rates from strokes–blood vessel hemorrhages in the brain. Address: Washington Post Foreign Service.

8484. Abersold, Vance. 1988. New developments in soymilk, Stephen Story, and Great American Foods in Salt Lake City (Interview). *SoyaScan Notes.* March 10. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** His soymilk was launched in Feb. 1987. It is selling very well to the people who are allergic to dairy products and to vegetarians. Its features are the best taste (because of a new process, and the lowest price, since it is sold dry primarily by direct mail). He got interested in 1981 when he was involved with Roy Brogue at the company

© Copyright Soyinfo Center 2013

Meadowfresh Farms (no longer in existence) in Salt Lake City, Utah, developing whey-based milks. The company was Mormon and the products used in food storage programs because they last far longer than powdered milk. But he grew interested in soymilks because whey-based milks are high in lactose and because of a big breakthrough in tofu and soymilk development made by Steven Story, a student of Dr. Clayton Huber at Brigham Young University, Dept. of Food Science and Nutrition. Huber was the head food nutritionist on the NASA Space Program. Huber fought the dairy industry when Meadowfresh was launched, and prevailed in every suit in every state. Story also made breakthroughs on whey-based milks. He is a genius at food development, and is now a consultant in Salt Lake City (Tel. 801-298-0188) doing developmental work for food companies. Vance got into this because of long-time undiagnosed serious allergies to milk products.

Story was a one-third owner of Great American Foods which started in about 1986 in Salt Lake City, as a division of Magic Mill (which makes stone mills), which is in turn a part of the SSI corporation. They produce the product (plus many other products, such as whey-based diet drinks/liquid meals), and presently sell it to Abersold and to Sovex. Sovex retails it for about twice as much as Abersold under the brand "Better than Milk." Magic Mill also sells its own Magic Mill Soy Milk. Steve is presently dissolving his partnership. He does not know of anything that Story has published. His product Sno-e contains a small amount (about 1%) of sodium caseinate, but in the extraction process all of the allergens are removed so it can be called "non-dairy." One of his goals is to develop a second product that does not contain any sodium caseinate. Yet the sodium caseinate in the present product is a key to the flavor. Address: 2730 Morley Way, Sacramento, California 95864.

8485. Speck, Peter. 1988. Re: History of soymilk and tofu products at Galactina Ltd. Letter to William Shurtleff at Soyfoods Center, March 11. 1 p. Typed, with initials on letterhead.
• ***Summary:*** Galactina S.A. makes dietetical and pharmaceutical products. Their first soy product, Naga Sonda, was launched in 1969 [actually in 1964 by Nago, Naehrmittel AG] in dry form. In 1981 the same product was introduced in liquid form in Tetra Pak. These were followed by Biodelis, Biodelis Plus, Vita Drink, and Vita Drink Plus.

The company introduced 4 tofu varieties in early 1985. Others followed. Address: Galactina Ltd., CH-3123, Belp, Switzerland. Phone: (031) 81 11 11.

8486. Little, Sybil. 1988. Soybeans: A food for our times. *Oakland Press* (*Pontiac, Michigan*). March 16. See also p. D-3. "Soybeans bring variety and good health to the table."
• ***Summary:*** Recently, a soybean buffet was held, re-creating the soybean menu served at the Ford Exhibit of the Century of Progress on Aug. 17, 1934. It was part of a celebration of the 125th anniversary of Henry Ford's birth. Included on the menu were soybean products–cheese, crackers, croquettes, buttered green soybeans, pineapple ring with soybean cheese and dressing; bread, biscuits, soybean butter, soybean crust on an apple pie, soybean milk, soybean coffee, assorted cookies and cakes and candy. Ford's personal baker, Jan Willemse, now in his 80s, supervised the affair.

Ford had an intense interest in agriculture; some say he did more for agriculture than he did for the automobile business. his roots were in farming and his unwritten mission was to ease the burden of the farmer's life. His Fordson tractor revolutionized agriculture as the Model T had done for transportation. In 1932, Ford issued orders to concentrate on soybean research. George Washington Carver began studying the soybean in 1904 at the Tuskegee Institute in Tuskegee, Alabama.

8487. Schweitzer, Jay. 1988. Tofu maker top businessman. *Alaska J. of Commerce* (*Anchorage*). March 21.
• ***Summary:*** "Eight years ago, Bernard Soupawavang [correctly spelled Souphanavong] opened Northern Soy Products in Alaska. Today, Soupawavang has six employees (including himself) and nine different products, and is making five tons of soy and sprout products each week. His closest competitors are in Seattle, Washington. In 1985, Northern Soy Products was named minority small business of the year. Souphawavang was named small businessman of 1988, and will be awarded this title in May 1988 by the U.S. Small Business Administration."

8488. *Toyo Shinpo* (*Soyfoods News*). 1988. Takai seisakusho honsha, kôjô o kensetsu [Takai is going to rebuild their main offices and production plant]. March 21. p. 1. [Jap; eng+]
• ***Summary:*** The total construction is going to cost ¥300,000,000. They are going to start building at the end of April, 1988. The first floor of the new headquarters will have a laboratory for testing the chemistry of foods. The second floor will be management, and the third floor will be the planning or design area. The company is planning to finish building in the end of July and start moving in at the beginning of August. Address: Tokyo, Japan.

8489. Sugisawa, Ko; Matsumura, Y.; Sengoku, K.; Nagatome, Y. Assignors to House Food Industrial Company Ltd. (Higashi-Osaka, Japan). 1988. Process for preparing tofu charged into a container. *U.S. Patent* 4,732,774. March 22. 5 p. Application filed 3 Feb. 1987. Application also filed in Japan on 4 July 1984. [7 ref]
• ***Summary:*** Soymilk (containing 10-13% solids by weight) is combined and mixed with a polyphosphate and casein or a casein salt, then homogenized under high pressure. "The combination of the addition of said polyphosphate and caseins with said homogenizing treatment synergistically

© Copyright Soyinfo Center 2013

heightens the delayed coagulation effect and results in the production of tofu of excellent quality." The coagulant used in this invention can be of any type including the delayed acting type (GDL) and the rapid acting type (magnesium chloride or calcium sulfate, used alone or with GDL). A fast-acting type should be added to cooled soymilk. The mixture is charged into a package and coagulated by heating after the package is sealed. Thus, this the tofu is made in the container.

Example 1. 2 kg of soybean milk having a dry solids concentration of 11% is prepared. "0.5% of sodium caseinate (relative to the weight of soybean milk; hereinafter the same) was added to the soybean milk after 0.084% of anhydrous sodium pyrophosphate, 0.058% of sodium tripolyphosphate and 0.058% of sodium hexametaphosphate had been added thereto, whereafter, the mixture was mixed and solubilized using high-speed mixer. Said mixture was homogenized under a pressure of 150 kg/square cm by a homogenizer and then cooled below 10ºC, whereafter 0.5% of magnesium chloride was added to and mixed therewith. Thereafter, the mixture was charged into heat-resistant plastic containers in amounts of 300 gm each and sealed. The mixture was then coagulated by heating in hot water at a temperature of 85ºC for 60 minutes, whereby tofu charged into containers was obtained." See also Japanese Patent 84-138,480 (July 1984), and a 1987 patent with the same title by the same company. Address: Nara, Japan.

8490. Evans, Karen. 1988. James Beard cooks with carob and tofu in the hereafter. *San Francisco Examiner.* March 23.
• ***Summary:*** "People magazine reports that a New York City psychic named Christina Whited is cooking according to the instructions of James Beard. According to Whited, James beard is now cooking with carob and tofu." Address: California.

8491. DeBona, Don. 1988. Developments at American Miso Co. since 1985 (Interview). *SoyaScan Notes.* March 25. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Don left his job as general manager at Great Eastern Sun and began to work at American Miso Co. (AMC) in February 1985. He took over management of the company in December 1985 after John Belleme left. It was a difficult transition, as Belleme and Barry Evans (an absentee owner) did not get along well. Since then, production of miso has roughly doubled, from 9 to 20 large miso vats. His miso teacher, Akinori Takei, stayed until October 1986. Since then Don has run the company. Not much of their miso is used any more in second generation products; they used to sell some mellow white and red miso to Nasoya and Simply Natural. Now 95-98% is sold for kitchen use in plastic tubs. The tubs replaced plastic bags 2 years ago. He also sells in bulk: 35 or 50 lb. He has always used all natural, organic ingredients, which makes his miso about twice as expensive as Cold Mountain. So they lost all their sales to food processors. But total volume has increased due to good sales work. His best-sellers are mellow white miso and traditional country (long-term) barley miso, followed by mellow barley, traditional red rice miso, and sweet white miso. He has ordered his koji starter through Mitoku for the last few years. Now he hopes to buy direct from Kojiya Sansanaemon in Aichi-ken. Don has studied macrobiotics for 12 years. AMC originally had 6 owners; Barry Evans now owns about 95%. Barry originally paid for John Belleme to study miso in Japan. Address: Route 3, Box 541, Rutherfordton, North Carolina 28139. Phone: 704-287-2940.

8492. Davis, Bob. 1988. Light Foods and the tofu hot dog market in America (Interview). *SoyaScan Notes.* March 26. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** There are three major companies making tofu hot dogs for the U.S. market (not including Loma Linda and Worthington, which use isolates rather than tofu): Light Foods, Bob's company which originated the idea, has about 40% of the market, especially the West Coast. Lightlife Foods (formerly Tempehworks) has about 40%, especially East Coast, and Yves (from Canada) has about 20% nationwide.

Bob still has bad feelings about the way Lightlife Foods took away his East Coast market. Originally, Tempehworks was Light Foods' master distributor for tofu hot dogs on the East Coast. Then for about 6 months Tempehworks stopped paying for the product they were receiving. (They eventually paid later). Suddenly they dropped the Light Foods tofu hot dogs and came out with a competing product of their own, named Tofu Pups. It was quite similar except that it was free of egg whites. Tempehworks told many distributors and retailers that Light Foods was going or had gone out of business, as a way of getting them to switch products. Davis received letters from 35-40 stores and many customers asking why he went out of business or why he started making Tofu Pups. Shortly thereafter Tempehworks changed its company name to Lightlife Foods, not much different from Light Foods. This combination of events destroyed the market for Light Foods' tofu hot dogs on the East Coast. They had no East Coast distribution for 6 months. Light Foods considered litigation, but didn't have the money. Now Light Foods is coming out with a new meatless hot dog containing no egg whites. Address: 12125 East Brookview Dr., Grass Valley, California 95945. Phone: 916-273-2218.

8493. Nordquist, Ted. 1988. New developments with tofu and soymilk in Sweden (Interview). *SoyaScan Notes.* March 26. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Ted is working with three of Sweden's largest food companies: (1) Semper AB, the country's largest milk company, used to be an independent milk research company. Semper now makes an infant formula, and two flavors of

© Copyright Soyinfo Center 2013

soy drink for adults, both from soy protein isolates. The later is poor tasting. Semper is now wholly owned by Arla, the Swedish milk company. (2) Karlshamn Oliefabrik, Sweden's largest oils and fats company, that is also the largest manufacturer of ice cream and margarine. They used to be a soybean crusher, but now they import their oil. Karlshamn has the Swedish franchise for Ralston Purina. They have a newsletter The Soybean Magazine that they use to market Ralston's products. They import isolates, which Semper buys for use in their infant formula (Soja Semp) and adult soymilks. (3) Trensums Musteri, a juice company owned by Mark Jungstrum, who owns the only 3 Combibloc machines in Sweden. He packages Knorr soups in them. The resources are unlimited. The present focus is on developing a natural soy base free of beany flavor and evaluation the economics of the product. From this base they will make a line of products, including dairylike products and non-beany tofu. Ted has a contract with Trensums to receive a 2% commission on all soy products made in the new plant, since he basically developed the plant, which is inside the Trensums Musteri juice factory located in the south of Sweden, near Karlshamn. He also has a contract with Semper. Semper supplies Karlshamn with all their milk products. Roughly 12 million crowns ($2-3 million) has already been invested in soy equipment and R&D at this plant in Tingsryd, which produces about 4,000 liters/hour of soymilk.

This project began in 1983, when Luke Lukoskie came to Ted with a proposal to cooperate with Alfa-Laval, since Ted was the only tofu maker in Sweden, where Alfa-Laval is located (in Lund). Luke had a contract with Alfa-Laval to develop tofu and other soy products. He wanted a continuous tofu making process. Alfa-Laval had a plant installed in his former factory, which burned down. At one point Lukoskie was considering a lawsuit against Alfa-Laval. In 1984 Alfa-Laval began moving the soy development operations from Lund to Singapore. At the time they had sold one plant to China, with plans to sell 2 more if the first proved successful.

Ted met with the people from Talmo Gordon, who were planning to build a soymilk plant in Ludvika, funded with government money, but dropped the idea after Semper and Ted showed them that their concept was not feasible. The owner of the plant in Tingsryd is an expert at product development, including foods such as mushroom soups in German Combibloc that cannot be done in Tetra Pak. So Ted left his cooperation with Alfa-Laval and started developing with him in Tingsryd. They signed a contract. Ted goes there for 3 days a week. The sales of Aros grew 70% last year, in part because of new labels. All products are doing well. He makes an average of 2,000 kg (4,400 lb) of tofu per week. By vacuum packing his tofu then pasteurizing it at 95ºC for 45 minutes, then quick cooling it in water at 4-6ºC, he gets a shelf life of 85 days at 4ºC under ideal conditions vs. 30 days shelf life if it is not vacuum packed. None of Sweden's three big supermarket distributors carry his tofu, so he distributes to supers himself. The three distributors that serve the country's 65 health food stores do not have refrigeration. There are no tofu companies yet in Norway, Denmark, or Finland. Of all of Aros sales, 55% is regular tofu, followed by marinated tofu (*Tofu Marinerad*) 15%, then three other products. Nutana makes a canned tofu (made entirely from isolates) in cubes in a sauce. Lima Foods sells a bottled tofu. There are 8 million people in Sweden.

Tomsun is trying to register the trademark Jofu (their nonfermented soy yogurt) in Sweden. This may upstage Ted's attempt to trademark Sofu for soymilk and wipe out his trademark on the term "Tofu."

Semper is interested in having the new soy base be low in oligosaccharides so that their infant formula does not cause flatulence. The following oligosaccharide levels have been found in European soymilks: Alfa-Laval's plant in Colmar, France, that uses ultrafiltration 0.02 gm/liter; Alpro in Belgium 0.28 gm/liter; Alfa-Laval's pilot plant in Sweden 0.43 gm/liter; the STS plant built for DE-VAU-GE in Germany 0.58 gm/liter. By using ultrafiltration to make tofu you can both remove the oligosaccharides and reduce the water content. Address: President, Aros Sojaprodukter, Bergsvagen 1, S-190 63 Orsundsbro, Sweden. Phone: 0171-604 56.

8494. Nordquist, Ted. 1988. New developments with tofu and soymilk in Sweden. Alfa-Laval in China (Interview). *SoyaScan Notes.* March 26. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** One of Ted's next major projects is a Tetra Pak tofu; Morinaga does not have a patent in Europe. Also, Ted skips two of steps in Morinaga's patent. He intends to flood Europe with an aseptic tofu. His firm tofu will use ultrafiltration instead of isolates to get the firm texture. No that isolates can also be made using ultrafiltration, without hexane solvent. He has used calcium sulfate, which gives a better flavor, but it is difficult because it is not water soluble. This is where the Combibloc carton comes in. He can made Jofu-style soy yogurt with whole berries in it in an aseptic Combibloc carton.

Alfa-Laval is talking with the Chinese about selling them a plant to make continuous process tofu using ultrafiltration. A man who works for Alfa-Laval and works with Ted at Trensums has told him this, in confidence. He was in China for 6 months setting up Alfa-Laval's first plant there. The idea was that when this plant was proved successful, two additional plants would be installed. Ted does not think the latter two have been installed yet. He told Ted about all of the problems that Alfa-Laval has been having there in scaling up pilot plants. This is very confidential. If it is true, it could be grounds for a lawsuit.

Ted's idea for using ultrafiltration to make an aseptic tofu is partially Luke's idea. But it also an idea that is tied

© Copyright Soyinfo Center 2013

in with using a bland soy base. For the last 5 years 90% of Ted's research energy has gone into getting a bland soy base. When that is ready he will make an aseptic tofu. Ted could possibly have an aseptic tofu packaged in Combibloc on the market by mid-1989 that would use a combination of GDL and calcium sulfate coagulants, and use ultrafiltration to concentrate it. Address: President, Aros Sojaprodukter, Bergsvagen 1, S-190 63 Orsundsbro, Sweden. Phone: 0171-604 56.

8495. Cooperman, Alan. 1988. Yum Buns graduate to larger quarters. *Berkshire Eagle* (*Pittsfield, Massachusetts*). March 27.
• ***Summary:*** Pittsfield "Special T's Bakery, home of the Yum Bun, has moved from 194 Fenn St. to larger quarters in the Oasis Plaza at 95 West Housatonic St."

"The bakery's most unusual and best-known produce is still the Yum Bun, a vegetable sandwich described by the Theriault sisters (Louise Theriault Blake and Linda A. Theriault) as 'tamari-seasoned vegetables stuffed into a whole wheat crust with almonds and tofu.'"

8496. Nordquist, Ted. 1988. Comparing Tetra Pak and Combibloc as aseptic packaging systems. The Morinaga aseptic tofu patent (Interview). *SoyaScan Notes.* March 27. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** In the Tetra Pak system, the laminated packaging film that comes on a roll, is run through hydrogen peroxide to sterilize the surface then folded into the shape of a tube around a stainless steel tube filled with UHT sterilized soymilk, inside a sterile chamber. The packaging material is seamed longitudinally. The packaging tube, which is always filled with soymilk, is crimped, sealed and cut below the soymilk level, so that they contain no air.

In the Combibloc system, the laminated packaging material comes in the form of individual flattened sections of a tube. These are fed into an chamber made aseptic by either nitrogen or steam, containing no air. The flat sheets are fed in two at a time and the bottom of each is sealed to form a box. These are then filled with food material, which may contain particles or chunks, such as diced vegetables; Tetra Pak cannot handle such pieces which interfere with sealing of the tube. Finally the top is sealed; some nitrogen gas remains atop the food. A Combibloc machine can be 4 times the size of a Tetra Pak machine, but it can handle various length cartons having the same bottom size (200-500 ml, or 1 liter), whereas Tetra Pak needs one machine for each package size. The Combibloc unit can seal at a much higher temperature than Tetra Pak.

A sterile/aseptic filter, which is very expensive, is used to feed in things (such as volatile flavors) which are heat sensitive and thus should not be run through the UHT unit. The filter eliminates bacteria. Morinaga's 4-step process (1) sterilizes the soymilk with a UHT unit, (2) cools it to 20-25ºC, (3) introduces GDL and calcium chloride coagulants through an aseptic filter, then runs the mixture into Tetra Pak cartons, which are sealed and (4) reheated by immersion in a hot water bath to cause coagulation, which is finally cooled. Morinaga does not have a patent on their Tetra Pak tofu process in Europe. Address: President, Aros Sojaprodukter, Bergsvagen 1, S-190 63 Orsundsbro, Sweden. Phone: 0171-604 56.

8497. Mio, Art. 1988. Update on Morinaga (Interview). *SoyaScan Notes.* March 30. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Morinaga not only has a patent on their aseptic tofu process, they also have proprietary rights to the film. This special film was developed jointly by Morinaga (Japan) and Tetra Pak, and the latter cannot sell it to any other company. This may not be mentioned in the patent.

Concerning promotion in the USA, for the first few years Morinaga targeted their sales to Asian-American consumers. They got little results. Then Art Mio heard that supermarkets were having problems with spoilage, so he changed his focus to supers. Stage 3 has been the recent targeting of the natural and health foods industries. The new package design and absence of monoglycerides on the label have helped sales in this market. Sales could increase 50-100% this year. Headquarters may have decided to build a plant in America. The Japan plant may only be running one shift. Susan Bucher's company (Buchér & Russell, 3801 Wilshire Blvd., Suite 1403, Los Angeles, California 90010. Phone: 213-738-5300; Susan is Japanese-American) has done the recent set of ads.

Tree of life private label tofu sold 5,000 units a week in 1986. Art does not know who makes it. Address: Morinaga Nutritional Foods, Inc., 5800 South Eastern Ave., Suite 270, Los Angeles, California 90040. Phone: 213-728-4325.

8498. *Los Angeles Times.* 1988. Senior runner among devotees of tofu. March 31.
• ***Summary:*** Mavis Lindgren ran her first marathon, the 20-mile Avenue of the Giants, in 1980, when she was 70 years old. Today, 80-year-old Lindgren has logged 48 additional marathons. A lifelong vegetarian, Lindgren has made tofu a staple in her daily meals.

8499. Best, Daniel. 1988. Low-cholesterol foods present healthy opportunities [Galaxy Cheese Co.]. *Prepared Foods* 157(3):124-26. March.
• ***Summary:*** Founded in 1974, Galaxy Cheese Company (New Castle, Pennsylvania) really began developing its cheese substitute technology in 1968 when Angelo Morini [Galaxy Cheese Co. President], then a marketing executive at Pillsbury, began devoting his spare time toward developing the Formagg technology. Formagg products contain no cholesterol or lactose, are lower in sodium and calories

© Copyright Soyinfo Center 2013

than conventional cheeses, derive less than 30% of their calories from fat, and have a saturated/unsaturated fat profile designed for conformance to American Heart Assoc. guidelines. A sister product line of cheese analogs, called Soymage, is manufactured without casein. Galaxy Cheese posted over $14 million in sales in 1987.

It is important to distinguish between dairy ingredients and products such as caseinates and whey protein concentrates. Also discusses tofu-based salad dressings and ice cream substitutes.

Simplesse, a fat substitute recently released by the NutraSweet Co. [owned by Monsanto], uses finely ground protein micro-particles from milk or egg whites to simulate fatty mouthfeels. It will be a competitor to soy oil.

8500. Demi-Tasse. 1988. March. New soyfoods restaurant or deli. Mishiki-cho 6-7, Okayama-shi, Okayama-ken, Japan.
• ***Summary:*** Toyo Shinpo. 1988. March 11. p. 9. "Restaurant serves tofu dishes with a homestyle feel." The restaurant, Demitasse serves original Japanese and Western tofu dishes–even tofu steak and ice cream!! They are closed on Tuesdays, and open every other day of the week from 11:00 a.m. to 8:00 p.m.

8501. *Essen und Trinken* (*Hamburg, W. Germany*). 1988. Tofu-Diaet [Tofu diet]. 3:112-14, 116, 118, 120, 122, 124, 126, 128-30, 132. March. [Ger]
• ***Summary:*** A spectacular article preceded by a 1-page praiseful editorial on tofu titled "The Frog Becomes a Prince: Tofu Reveals Charm," by Angelika Jahr, the head editor of "Eating and Drinking." The first two-thirds of the article is in color, consisting mostly for large color photos of tofu dishes, with calorie counts; the last third is the recipes. There are also brief descriptions of miso, shoyu, and gomasio [gomashio] as typical Asian seasonings. Address: Postfach 30 20 40, 2000 Hamburg 36. Phone: 040 41 18(1).

8502. FDA Center for Food Safety and Applied Nutrition. 1988. Food protection unicode. Washington, DC 20204. 104 p. Draft of 10 March 1988. No index. Each chapter paginated separately. 28 cm.
• ***Summary:*** "In April 1987, the Food and Drug Administration announced a project to update the provisions of the existing model food codes... into a new model Food Protection Unicode." This is a draft of the proposed unicode, circulated for review and comment. The introduction is by Arthur L. Banks, Director, Retail Food Protection Branch, FDA Center for Food Safety and Applied Nutrition.

This book consists of 10 chapters. In chapter 1, titled Purpose and definitions, at 1-102.48 is a current definition of a "potentially hazardous food" and a list of foods which are excluded. Tofu and other soy protein foods are not specifically mentioned.

"The history of the model sanitation code development by the U.S. Public Health Service (PHS) goes back over 60 years to the early 1920s. Work on the first model ordinance relating to food protection and sanitation in food service establishments was initiated in 1934." The first model ordinance was published in tentative form in 1935. It was expanded in 1938 and revised in 1943 and again in 1962.

In 1968, FDA assumed PHS responsibility for the retail food protection program and the development of model codes. FDA updated the *Food Service Sanitation Code* of 1976. In 1982 FDA and the Association of Food and Drug Officials (AFDO) jointly published a model *Retail Food Store Sanitation Code*, culminating an 8-year cooperative effort. "37 states, 4 national, and 160 local jurisdictions have adopted the 1976 edition of the model food service code. May other state and local jurisdictions have adopted earlier editions. About half of the states and some local jurisdictions have adopted the provisions of the model food vending code. 14 states, 1 national, and 9 local jurisdictions have adopted the model retail food store code." Address: Washington, DC.

8503. **Product Name:** [Tofu Burgers (Provençale, and Indian Style)].
Foreign Name: Tofou burger (à la provençale, à l'indienne).
Manufacturer's Name: Ferme de Jas.
Manufacturer's Address: Eourres, 26560 Séderon, France. Phone: 92-65-10-95.
Date of Introduction: 1988. March.
Ingredients: Provencale: Tofu, carrots, flaked oats, olives, palm oil, salt, herbes provençales, garlic.
Wt/Vol., Packaging, Price: 90 gm vacuum pack, 2 burgers per pack.
How Stored: Refrigerated.
New Product–Documentation: Letter from Jean-Marie Braun and Joël Pichon of Eourres, 26560 Sederon, France. 1988. Jan. 2. They are members of an intentional international community in Provence, France and are creating a "tofou burger" business as one of their new activities. They have begun participating in Whole Life Expos and Health Food fairs to get their product known.

Letter and Labels from Anthony Marrese. 1989. June 7. The company launched these products in March 1988 and presently makes 125 packs/week, 2 burgers per pack, of each of the two flavors. Label. 2.75 inches diameter. Self adhesive. Black on orange and purple on white, respectively. Illustration of a sun rising over a farm, and 3 soybean leaves. "Préparation alimentaire à base de soja."

8504. **Product Name:** [Tofu–Organic (Medium Firm, with Nigari)].
Foreign Name: Tofou–Bio.
Manufacturer's Name: Ferme de Jas.
Manufacturer's Address: Eourres, 26560 Séderon, France. Phone: 92-65-10-95.
Date of Introduction: 1988. March.

© Copyright Soyinfo Center 2013

Ingredients: Soja, water, nigari.
Wt/Vol., Packaging, Price: 300 gm vacuum pack.
How Stored: Refrigerated.
New Product–Documentation: Letter and Labels sent by Anthony Marrese. 1989. May and June 7. "Joel Pichon has been familiar with making tofu on a personal basis since 1985. In 1987 he and his wife, Mary Jo, moved to Eourres as associate members of Terre Nouvelle Community and started producing tofu for the community and selling to the small surrounding village to raise funds for the local Steiner School (at which Mary Jo taught). Production was on a small basis and the tofu was produced in a kitchen using kitchen utensils.

"From late 1987 to March 1988 plans were made to purchase equipment and start larger production... Used equipment was purchased from Sojalpe of Valence, France, and they also purchased a new German, Komet, vacuum packer. Production began in March 1988 as a joint venture with Jean-Marie Braun representing Terre Nouvelle."

The company presently makes 50 kg/week of tofu. They plan to introduce okara tempeh and soy tempeh in 1989. Marrese will be actively involved with the tempeh.

Label. 2.75 inches diameter. Self adhesive. Black on yellow. Illustration of a sun rising over a farm, and 3 soybean leaves. "Préparation alimentaire à base de soja."

8505. **Product Name:** [Tofu, Tempeh, Natto, Okara Croquettes].
Foreign Name: Tofu, Tempeh, Natto, Croquettes d'Okara.
Manufacturer's Name: Gaïa Enterprise. Officially registered in Jan. 1992.
Manufacturer's Address: Rue Principale, 66130 Corbere, France. Phone: 68.84.86.28.
Date of Introduction: 1988. March.
New Product–Documentation: Form filled out for Anthony Marrese. 1989. Nov. These three products were introduced in March 1988 by Odile Corbel & Dan Ludington. The following amounts are presently produced: Tofu 3 kg/week (sold fresh), tempeh 3 kg/week (non-pasteurized), natto 2 kg/month, and okara croquettes 2 kg/month. Odile started making her own tofu for 2 people each week, then for friends. A friend (Pauline Schaft) supplied her with tempeh, natto, and koji for amazake. In 1986 she went to the Kushi Institute in the USA. She returned to France at the end of 1987 with Dan and began her own small production daily.

Letter from Daniel S. Ludington. 1992. Feb. 7. He has been making tofu, tempeh, and miso for sale for 3½ years. He learned to make them using books by Shurtleff and Aoyagi. Now he would like to order their books *Miso Production*, and *Tofu & Soymilk Production.*

Letter from Dan Ludington. 1992. March 3. "Gaïa Enterprise was officially registered with the Chambre de Metiers of the Pyrenees Orientales in Jan. 1992. (She had been unofficially in existence using the same name for nearly four years)." Dan's father was a 20-year career cook in the U.S. submarine service. He died instantly of a heart attack at age 54. Dan is the oldest of 4 boys. He received a degree in chemical engineering from MIT in 1977, then worked for Intel Corp. in their factory making silicon chips for 5 years, then for Toshiba USA for another year. When his father died, he kept a 10-year promise to himself to hitch-hike around America. In or about about Loveland, Iowa, his chemical engineer's eyes saw how chlorinated hydrocarbons enter the food chain; he decided to stop eating meat. About 6 months later he was introduced to macrobiotics. 2½ years later he went to the Kushi Institute in Boston, Massachusetts, to see if he could find a better balance in his diet. There he met Odile Corbel, a French woman with a 12 year-old son named Xavier and 10 years of macrobiotic experience. They were married, and returned to France. 18 months later Dan got a Green Card. While Odile was in the USA, Pauline Schaft had stopped making tempeh, and a weekly, organically grown products market had started in Perpignan. So he and Odile started making tofu, tempeh, and macrobiotic British pasties and selling them at this market. The business has grown until today sales are $400/week. He and Odile are still married with 2 children of their own. Pauline Schaft now goes by her maiden name of Van Marle; she is now more involved with her yoga practice than with making food. The company now sells 12-15 kg/week of tofu, 3-5 kg/week of tempeh, and 4 kg/week of miso, all direct and without the use of labels, marketing, or distribution.

8506. Hara, Kazuo. 1988. Arugin-san geru [Utilization of the properties of stabilizers. Alginic acid gels (used in tofu)]. *Shokuhin Kogyo* (*Food Industry*) 31(6):76-85. March. Tokushû: Zônen anteizai no seishitsu to riyô. [8 ref. Jap]
• ***Summary:*** Alginic acid gels are used in tofu, meat products, fish gels, bread, and fabricated foods.

8509. **Product Name:** Homestyle Ravioli [Tempeh Marinara, Tofu with Spinach, or Cheese Italiano].
Manufacturer's Name: Homestyle Foods (Formerly Sonoma Specialty Foods).
Manufacturer's Address: 2317 Bluebell Dr., Santa Rosa, CA 95401. Phone: 707-525-8822.
Date of Introduction: 1988. March.
Ingredients: Tempeh: Whole wheat durum and semolina flours, water, tempeh, tomatoes, onion, soy oil, garlic, miso, honey, natural herbs and spices. Tofu: Whole wheat durum and semolina flours, water, Homestyle Tofu Cottage Salad, Spinach, whole wheat bread crumbs, herbs, garlic and spices.
Wt/Vol., Packaging, Price: 14 oz 48 ravioli.
How Stored: Frozen.
New Product–Documentation: Interview with Dennis Hughes. 1988. Feb. 15. This product will be out shortly. Sales to local stores of all products are about $165,000, which is about half of the company's total sales. Of the $165,000 roughly 1/3 is products made by Homestyle; 2/3 is complementary products (mostly soyfoods) made by other companies. Roughly 3/4 of their total products are soyfoods. The company started distributing other manufacturer's soyfoods in about August 1985. Before that (7 years ago) they started to distribute a local pasta and gourmet sauce.

Label. 1988. March. Paperboard box. 10.5 by 7.5 by 3/4 inches. Red, green, and black on white. Front panel has a red, black, and green drawing of a plate of ravioli with a wine glass and salad. "No eggs. All natural. No artificial ingredients or preservatives. Non-dairy. Cholesterol free."

Leaflet from World Vegetarian Day in San Francisco. 1990. Oct. 6. Cheese Italiano is a new flavor in the ravioli line. It contains cheese but no eggs.

Talk with David Burns of Homestyle. 1990. Oct. 9. This product was introduced in about May or June of 1988. The name of the manufacturing side of the company changed from Sonoma Specialty Foods to Homestyle Foods in Oct. 1987.

8510. **Product Name:** Homestyle Tofu Dessert (Pudding) [Vanilla Supreme].
Manufacturer's Name: Homestyle Foods (Formerly Sonoma Specialty Foods).
Manufacturer's Address: 2317 Bluebell Dr., Santa Rosa, CA 95403. Phone: 707-525-8822.
Date of Introduction: 1988. March.
Ingredients: Tofu (organic soybeans*, water, calcium sulfate), honey, soy oil, almond butter, pure vanilla, tapioca, maple extract, lecithin, annatto. * Grown in accordance with CA H&S Code 26569.11.
Wt/Vol., Packaging, Price: 4.5 oz in plastic cup.

© Copyright Soyinfo Center 2013

How Stored: Refrigerated.
Nutrition: Per 2.25 oz.: Calories 82, protein 3.2 gm, carbohydrates 9.5 gm, fat 2.8 gm, fiber 0.4 gm, sodium 0.3 gm, cholesterol 0.
New Product–Documentation: Label. 1987. 3 inches diameter. Red and black on white lid. "Cholesterol & Lactose Free." Soy Power. 1987. Catalog. 4.5 oz. Interview with Benjamin Hills. 1987. Sept. 7. Vanilla will be out in early 1988. Talk with Homestyle. 1988. Aug. 10. It came out in mid-March. New Label is black and blue on white. "Non-Dairy. Cholesterol free. Nutritious. Natural. Kosher. Ready to eat."

8511. Homestyle Foods. 1988. 1988 Catalog. 2317 Bluebell Dr., Santa Rosa, CA 95403. 20 p.
• ***Summary:*** This company also distributes soyfoods made by several other companies, including Quong Hop and White Wave tempeh products. Address: Santa Rosa, California.

8512. Jangtoh Soontofu Restaurant. 1988. March. New soyfoods restaurant or deli. 4451 Beverly Blvd., Los Angeles, California (in the Beverly Hobart Plaza).
• ***Summary:*** This restaurant, which opened in March 1988, is geared for Koreans. Signs outside are written in Hangul, the Korean alphabet. "The restaurant serves only two dishes–*soontofu* and *kongbiji*, both of them soups. *Soontofu* is made with tofu, *kongbiji* with ground soybeans. That may sound like an extremely limited menu, but there are variations."

"Jangtoh makes its own tofu, producing several batches a day. If you've never tasked warm, soft, fresh tofu, don't miss the opportunity to try it here. A small bowl of this cloud-like substance comes with each meal. The kitchen garnishes it with a bit of chopped green onion, dried seaweed and sesame seeds. Then you spoon on a wonderful sesame-soy sauce-garlic condiment from a jar on the table."

Jangtoh, owned by Bu-A and Brian Chung, opened in March 1988.

Jangtoh Soontofu Restaurant, 4451 Beverly Blvd., Los Angeles; (213) 665-8664. Address: Los Angeles, California. Phone: 213-665-8664.

8513. **Product Name:** [Tofu with Lentils].
Foreign Name: Tofuline met Linzen; aux Lentilles; mit Linsen.
Manufacturer's Name: Jonathan P.V.B.A.
Manufacturer's Address: Antwerpsesteenweg 336, B-2080 Kapellen, Belgium. Phone: 03/664 58 48.
Date of Introduction: 1988. March.
Ingredients: Lentils*, smoked tofu (soy-proteins)*, peppers, leek*, carrots*, onions*, carob-flour, vegetable extract, sea-salt, herbs. * = Organically grown.
Wt/Vol., Packaging, Price: 300 gm.
Nutrition: Minerals 0.97%, protein 6.7%, fat 2.24%, carbohydrates 10.4%. 88.6 calories (Kcal) per 100 gm.
New Product–Documentation: Label. Received 1988. 6.25 by 5.25 inches. Card stock. Color photo of tofu cubes resting on lentils with item name in white on orange. "Vegetable product." Form filled out by Jos van de Ponseele. 1989. Jan. 11. This product was introduced in March 1988.

8514. **Product Name:** [Tofu with Cheese-Sauce].
Foreign Name: Tofulette met Kaassaus; Sauce Fromage; Kaesesosse.
Manufacturer's Name: Jonathan P.V.B.A.
Manufacturer's Address: Antwerpsesteenweg 336, B-2080 Kapellen, Belgium. Phone: 03/664 58 48.
Date of Introduction: 1988. March.
Ingredients: Tofu (soy-proteins)*, peppers, onions*, sesame seeds, sea-salt, vegetable extract, herbs. Sauce: Cheese*, soymilk*, sunflower oil*, wheat flour*, sea-salt, vegetable extract, spices. * = Organically grown.
Wt/Vol., Packaging, Price: 300 gm.
Nutrition: Minerals 1.97%, protein 13.4%, fat 13.9%, carbohydrates 7.13%. 207 calories (Kcal) per 100 gm.
New Product–Documentation: Label. Received 1988. 6.25 by 5.25 inches. Card stock. Color photo of two tofu patties in sauce with item name in white on orange. "Vegetable product." Form filled out by Jos van de Ponseele. 1989. Jan. 11. This product was introduced in March 1988.

8515. Leneman, Leah. 1988. Leaders of the soya revolution. *Vegan* (*The*) (*England*). Spring. p. 20-21. [7 ref]
• ***Summary:*** The author, "herself an established authority on culinary applications of the soya bean, looks at the work of William Shurtleff and Akiko Aoyagi, the unsung heroes of the soya revolution." "It is possible that the books they have written which are not known to the general public may have had an ever greater influence than those which are–books like Tofu & Soymilk Production... Their books have provided the wherewithal for eager young entrepreneurs to move confidently into soya foods production, and the growth rate in this industry has been quite phenomenal, not only in the USA but on the continent and in Great Britain as well." Address: 19 Leamington Terrace, Edinburgh EH10 4JP, Scotland.

8516. Lepetit-de la Bigne, Ghislaine. 1988. Un produit venu d'ailleurs: Le tofu [A product that has come from far away: Tofu]. *Produits et Boissons.* March. p. 2-3, 5-6. Supplement to the Revue Équip Hôtel. [Fre]
• ***Summary:*** "Solid but strongly accommodating, supple and light, rich in nutrients but not in calories, tofu comes to us from the Orient. Thanks to the tenacity of young french manufacturers, it is ready to offer its numerous qualities to the agro-food complex of our country." Two young companies have most of the market share: Sojadoc and Société Soy. Much of the article compares these two, their activities, objectives, and products. A very positive article.

Address: France.

8517. Lubbe, James. comp. 1988. Abbreviated history of the Bountiful Bean Plant, Madison, Wisconsin. Bountiful Bean, 2049½ Atwood Ave., Madison, WI 53704. 23 p. Unpublished manuscript. [4 ref]
• ***Summary:*** The company was founded in 1978. 1. History table by year showing accounts, products, equipment, number of people, wages, other. 2. Newsletter and newspaper ads and articles. 3. Brochures, product announcements & job application descriptions. 4. Product labels.

Ad. circa 1983-84. Bountiful Bean Soyfood Deli. Macrobiotic dietary principles. Offers: fresh tofu, tofu pies, tabooli, toasted tofu, nori rolls, 4 soymilk flavors, 4 varieties of bulk miso, millet / tofu pudding, nutburger sandwiches, tempeh books, mini-tours of plant, spicy tofu, more! And: lowest soyfood prices in town, free samples and recipe sheets, managed by the workers. low-cost carry-out foods. 903 Williamson St. 251-0595. from: 7-6 Sun-Fri.; 7-4 Mon.; 10-4 Sat.

Update talk with Deborah Bachmann and Elizabeth Hanson. 1991. Nov. 1 and 11. In March 1990 Bountiful Bean Soyfoods moved from Madison, Wisconsin, to 620 Main St., Ridgeway, Wisconsin. Richard Kraemer and Elizabeth Hanson began to produce soyfoods during the last week in June, renting from the cooperative, then they purchased the business on 21 Aug. 1991. Richard and Elizabeth are married with a son, are in their late 40s, and come from Oseola, Wisconsin; he is a carpenter (and was a pastor) and she a nutritionist. They are both very enthusiastic about tofu and the business. The co-op has now been changed to a private business. They work full time and they have three employees–1 full time and 2 part time. They are thinking of re-launching tempeh and soy yogurt. The cooperative got what they felt was a good price for the business. People who worked more than 6,000 hours (Chris Burant [8 years], Deborah [almost 10 years], and a woman named Solie) each got a large chunk. Another 11 people who had worked in the past were also given part of the money. The smallest amount of money distributed was $250.00. Deborah and James Lubbe are no longer with the company. Bountiful Bean Soyfoods now makes tofu, Herb Tofu, plain or vanilla soy milk, Tasty Tofu, Hummus with Tofu (and garbanzo beans), and Taboolie with Tofu (salad, which also contains bulgar). They have discontinued tempeh and soy yogurt.

Update: Talk with Roger Bindl. 1993. April 15. Richard Kraemer would like to sell Bountiful Bean in Ridgeway and Roger is considering buying it. 85% of the company's sales are in Madison, Wisconsin. Address: Madison, Wisconsin.

8518. **Product Name:** [Matcha Tofu (Containing Powdered Green Tea)].
Foreign Name: Matcha Tôfu.
Manufacturer's Name: Matsui Shoten Ltd.
Manufacturer's Address: Myoraku 49, Uji-shi, Kyoto, Japan. Phone: 0774-21-2412.
Date of Introduction: 1988. March.
Ingredients: Incl. Tofu, powdered green tea (matcha).
Wt/Vol., Packaging, Price: A cake sells for 200 yen.
How Stored: Refrigerated.
New Product–Documentation: Toyo Shinpo. 1988. Sept. 1. p. 4. Match Tofu kido ni noru. Koko nara dewa... no kanban-zukuri [Matcha Tofu is launched. Trying to make something special in this town]. Matsui SHIN's father died 2 years ago and he took over the family tofu shop. Age 28, he developed green tea (*matcha*) silken tofu and started to sell it in March 1988. Costing 200 yen a cake, it doesn't sell fast. But it has a very smooth texture and a mild green tea flavor. He wants to make this a gift item in this tourist town. There are photos of the tofu label and of Mr. Shin.

8519. **Product Name:** Revolutionary tofu (Ad).
Manufacturer's Name: Morinaga Nutritional Foods.
Date of Introduction: 1988. March.
New Product–Documentation: A full-page ad (8 by 11 inches, color). "Long-life aseptic package adds convenience to guaranteed quality and consistent taste." The color photo in the top third of the ad shows two packs of Mori-Nu silken tofu next to an ordinary water-pack: "Made first, then packed in water (Ordinary). Mori-Nu Tofu is actually made right inside our bright new package."

8520. **Product Name:** Freeze-Dried Tofu [Plain, or Flavored].
Manufacturer's Name: Nasoya Foods, Ltd.
Manufacturer's Address: 23 Jytek Park (P.O. Box 841), Leominster, MA 01453. Phone: 617-537-0713.
Date of Introduction: 1988. March.
Wt/Vol., Packaging, Price: Bulk.
How Stored: Shelf stable.
New Product–Documentation: Ad in Soya Newsletter. 1988. Feb. p. 5. Talk with Sjon Welters. 1988. March 10. This new product is sold as plain or flavored cubes. They are sampling it now. For the flavored they are using their French Country Herb Tofu. It is really freeze-dried, which makes it more tender, less chewy than the dried-frozen tofu made in Japan. But it is more expensive, similar to freeze-dried vegetables. They plan to use it in dry mixes, especially for soups.

8521. Nasoya Foods, Ltd. 1988. What do you think of when you hear the word "tofu"? (Color videotape). 23 Jytek Drive, Leominster, MA 01453. 6 minutes. Produced by Midgaard Audio-Video, 230 Adams St., Newton, Massachusetts 02158, at a cost of $5,000. Released March 1989.
• ***Summary:*** Introduces Nasoya Foods Ltd. and its tofu products. 1. Starts by showing typical people on the street telling what they think of when they hear the word "tofu."

© Copyright Soyinfo Center 2013

Tetra Brik Aseptic™ carton (Revolutionary)

Made first, then packed in water (Ordinary)

Revolutionary Tofu.

Long-life aseptic package adds convenience to guaranteed quality and consistent taste.

Mori-Nu Tofu is actually made right inside our bright new package. This exclusive aseptic package does more than lock in the nutritious goodness of just-made tofu. Small, neat and sturdy, Mori-Nu Tofu also saves on shelf space and reduces mess and waste.

It's even guaranteed to keep for months without preservatives or irradiation and needs no refrigeration until it's opened. So, for the first time, tofu is ready to use anytime, anywhere your customer desires.

Mori-Nu Tofu is being supported by full page, color ads in **Delicious, Vegetarian Times, EastWest Journal, Bestways,** and more! Point of sale material is available free, and our "Health For Life Club" program sends newsletters, coupons, and exciting recipes directly to the consumer showing them new ways to enjoy the healthful benefits of eating tofu.

You can...case stack displays, sell by the case, and have multiple package sales.

Which all lead to...satisfied customers, more tofu sales, and higher profits.

Don't let the tofu revolution pass you by! Contact your distributor now. Or call Arthur Z. Mio, national sales manager at 213/728-4325.

MORI-NU

MEMBER SOYFOODS ASSOCIATION OF AMERICA

© 1988 MORINAGA NUTRITIONAL FOODS, INC. 5800 S. EASTERN AVE. #270 LOS ANGELES, CA 90040

© Copyright Soyinfo Center 2013

Gives an overview of the market. "U.S. tofu manufacturing has grown to become a $60 million industry. Domestic tofu sales have tripled since 1978... Nasoya's customer list now includes some of the largest chains in the United States (Stop and Shop, Safeway, Purity)."

2. What is tofu? It can be used in stir fries, tofu quiche, tofu cheesecake, salads, etc. A table compares tofu, Cheddar cheese, and hamburger for their protein, cholesterol, and fat content.

3. What is tofu made from? President John Paino describes the process while the film shows each step at the modern, automated Nasoya plant. The cakes are cooled in water then pasteurized, which doubles their shelf life. The 22,000 square foot plant contains more than $1 million in specialized tofu making equipment. The company was founded in 1978. Each of its products is shown, then the quality control lab.

4. How do you serve tofu? Consumers describe their favorite ways and why they like it. Nasoya is a company built on a philosophy: "To provide the best quality, natural soyfoods to people in order to promote health and happiness."

Talk with John Paino. 1990. Jan. 23. This video was made by an extremely talented black filmmaker named Roberto Mighty. He is a friend of John's and made the film at a price lower than the $6-$7,000 that it would typically have cost. Address: Leominster, Massachusetts. Phone: 508-537-0713.

8522. Sakai, Sonoko. 1988. Tofu: Meat of the fields. *Bestways.* March. p. 18, 21, 24, 54, 64. Reprinted from Palate Pleasers of Japan. 1986. Spring/Summer. p. 59-61. [2 ref]

• ***Summary:*** An overview, based largely on material from the works of Shurtleff and Aoyagi. Today the tofu man with his bicycle is an increasingly rare sight in Japan, but Americans do not have the luxury of walking out on the street to buy tofu.

8523. Scott, Jack Denton. 1988. The bean of a thousand guises. As pervasive as sunshine and almost as beneficial, the amazing soybean is the best-kept secret in the supermarket. *Reader's Digest.* March. p. 93-96.

• ***Summary:*** "Today some 5.5 million gallons of tofu and soy-milk-based, nondairy frozen desserts are sold annually under 30 brand names... As our No. 2 cash crop and leading farm-commodity export, soybeans contributed over $6,500 million to our balance of payments in 1986-87... Indeed, when one considers the versatility of the bean of a thousand guises, it is not hard to imagine that it was the soybean that Jack planted to produce his magic beanstalk."

8524. *SoyaScan Notes.* 1988. New Trend: "Big Food" enters the U.S. tofu market, but in an unexpected way–Via Japan (Overview). March. Compiled by William Shurtleff of Soyfoods Center.

• ***Summary:*** For the past 5 years or so, U.S. tofu companies and industry watchers have been speculating as to when "Big Food" would jump into the U.S. tofu market. They had in mind big U.S. food companies such as General Foods, Kraft, etc. But at the start of this year, 1988, Morinaga, Japan's third largest manufacturer of dairy products (FY 1982 sales were $1,171 million dollars) began the largest promotional campaign for tofu ever conducted in America, with attractive, full-page color adds for at least 3 months in a row in major natural foods magazines. The product is now showing up in many natural food stores and sales are skyrocketing. And Kikkoman, the world's largest maker of soy sauce and one of Japan's biggest food companies, is now also aggressively selling tofu. Both companies make their tofu in Japan. The big question now is when they will establish U.S. plants.

8525. *Taste* (*Kikkoman, Japan*). 1988. New frontiers in Hokkaido [Kikkoman's new shoyu plant in Chitose]. 2(1):8. March.

• ***Summary:*** The Kikkoman's third, and newest, domestic soy sauce factory is in Hokkaido. The new plant was finished in early 1987, over half a century after the construction of the second Takasago plant near Osaka. Just as Kikkoman's first plant near Noda City was located amid wheat and soybean fields, the choice of this plant near Chitose was partly influenced by the ready supplies of wheat nearby. (The soybeans are imported from the U.S.) The factory is 27,300-square meters with four stories. Only fifty employees are on hand to man two large control rooms. They have also applied high technology to microorganisms used in the fermentation. The Chitose plant was singled out for a national award by the Nihon Keizai Shinbun last October. Kikkoman, one of Japan's leaders in biotechnology, demonstrated the results of its latest research on bioreactors, designed to reduce the time needed to produce soy sauce. Other companies promoted the versatility of their soybean-related food products, such as cheese-flavored tofu and tofu ice cream.

8526. *Taste* (*Kikkoman, Japan*). 1988. Secrets of sukiyaki. 2(1):6-7. March.

• ***Summary:*** Historically, meat eating in Japan tended to fluctuate with the religious climate of the times. Before the introduction of Buddhism into the country (in A.D. 676) mountain-dwellers hunted for their food just as fishermen relied on fish for their meals. However, the arrival of the new faith soon banished meat from the daily diet. (The nobility, however, continued to consume meat under the guise of medicine.) Today, sukiyaki is prepared in two distinct regional styles; in Kanto (Toko-Yokohama) and in Kansai (Osaka-Kyoto). In Kansai, the ritualistic order of the meal is

© Copyright Soyinfo Center 2013

emphasized.

8527. *Whole Foods.* 1988. Morinaga joins Soyfoods Association. March. p. 54.
• ***Summary:*** "... to help lead the drive toward increased growth and awareness of soyfoods among consumers."

8528. Nordquist, Ted. 1988. Island Spring, Alfa-Laval, and continuous tofu production using ultrafiltration (Interview). *SoyaScan Notes.* April 2. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** In 1983-84 Alfa-Laval lost huge amounts of money as the dairy industry in Europe continued its steady downhill slide. They had to cut back on expenses and increase income. So they dropped many long-term research projects and required that those which were not dropped become profitable. They have always charged high prices for equipment and high labor rates for repair and maintenance. They had a little soymilk plant in Lund which they used to show to anyone who was interested. Now they started to charge for tours and demos. At that point Ted discontinued his work with Alfa-Laval and went to work with a juice company. Within a year Alfa-Laval had turned things around. A little later they moved John Wilson and their soymilk operations to Singapore.

Island Spring's work with Alfa-Laval started out well. They installed an ultrafiltration unit at Luke's plant so that he could do R&D work on continuous processing of tofu, and they sent many high-level people over to work with him. But when the crunch came, they dropped him. The ultrafiltration unit may have burned in his fire. Then Luke began to work with STS.

Luke has a contract with Alfa-Laval stating that continuous process production of tofu using ultrafiltration is his idea. He has a right to 6% of the sale value of all equipment that Alfa-Laval sells using ultrafiltration to make tofu. Ted is not aware that Alfa has sold any such equipment so far, but for some reason Luke is not happy with his relationship with Alfa and may be considering a lawsuit. Address: President, Aros Sojaprodukter, Bergsvagen 1, S-190 63 Orsundsbro, Sweden. Phone: 0171-604 56.

8529. *Daily Camera* (*Boulder, Colorado*). 1988. Soy sensation: White Wave introduces new products for 1988. April 5.
• ***Summary:*** Coming this year from White Wave are sesame-peanut tempeh, teriyaki tempeh burger, sloppy joe tempeh, and a soy-based hot dog. Last year, White Wave reached $2 million in revenue.

8530. Vansickle, Janice. 1988. Soys take root in organic market. *Windsor Star* (*Essex County, Ontario, Canada*). April 9.
• ***Summary:*** Jon Cloud is a transplanted "dirt farmer" from mountainous Vermont and now the production manager for Soy City Foods. Their products include soymilk, tofu, tempeh, falafels, burgers, and granola. Cloud became a [Vietnam] war protestor while in college, and opted into being a 60's back-to-the-land disciple after burning out in the urban jungle. The Organic Crop Improvement Association in Ontario has attracted 300 members during its five years of existence and 50 now have their farms certified as organic. A photo shows Jon Cloud with company products such as Soyettes, Grain Tempeh, and Falafels. Address: Star Agricultural Reporter, Ontario, Canada.

8531. Rose, Richard. 1988. Re: Personal observations on soyfoods at Natural Foods Expo West in Anaheim. Letter to William Shurtleff at Soyfoods Center, April 12. 1 p. Typed, with signature on letterhead.
• ***Summary:*** "Enclosed is all the information on soyfoods and amazake I could find at the 1988 Expo West natural foods show.

"Notable trends:

"(1) Only 1 soy frozen dessert present, Ice Bean.

"(2) Rice Dream has expanded into frozen, coated bananas.

"(3) The Soyfoods Pavilion was not delineated in any way. The banner was not present, nor were signs. No sufficient answer as to why this was so was available.

"(4) Only 2 tempehs present, Tempehworks and White Wave.

"(5) Only 1 tofu present, White Wave.

"(6) Kawanishi and Airtight had a double-wide booth to show tofu making equipment and supplies.

"(7) Only 2 soymilks present, Vitasoy and Westbrae.

"(8) Soya Kaas was not displayed in the Tree of Life booth.

"(9) As many soyfoods companies were out of the Pavilion as in it. It looks like they did not sell out all the space in the Pavilion.

"(11) Gary Barat has gone off the deep end. Ask me how on the phone.

"(12) Mori-Nu had a disorganized booth that was obviously conceived by someone who thought this would be what natural fooders would want to see. It was dumb... a walking Mori-Nu Tofu box?

"Depending on who you talk to, the S.A. [Soyfoods Association] meetings were either incredibly wonderful or absolutely disgusting. I was not present at them.

"Notable events: Gary Barat is only a board member, Gordon Bennett is Pres., Yvonne is Treasurer, and Peter Golbitz is VP. Danielle [of Morinaga] and Jack Mizono [of Azumaya] were elected to the board. The single big program for the S.A. is Soyfoods Month in April 1989. Budget is $200/month to keep the lights on. Gary was talking about stiffing Smith Bucklin and Steve McNamara. There was no discussion with me or at the meetings about my proposal.

© Copyright Soyinfo Center 2013

Danielle threw a snit to get on the board, as did Yvonne.– Richard."

The Rose International letterhead states: EasyLink Mailbox 62978515. Telex 990027 (Rose Intl UQ). Address: President, Rose International, P.O. Box 2687, Petaluma, California 94953-2687. Phone: 707-778-7721.

8532. Gillard, Colleen. 1988. McDonald's calls McDharma's bad karma. *San Francisco Chronicle.* April 15.
• ***Summary:*** McDonald's is taking on a pair of tofu-peddling restaurant owners in Santa Cruz who call their vegetarian, fast-food eatery McDharma's. Bernard Shapiro owns McDharma's with his partner, Daniel Prather. Fourteen months ago, McDharma's agreed in an out-of-court settlement to drop the "Mc" prefix. They make 'chicken burgers' from tofu, and a special, soy Brahma Burger.

8533. Layton, Lyndsey. 1988. Tomsun Foods goes bankrupt. *Recorder* (*Greenfield, Massachusetts*). April 16.
• ***Summary:*** Tomsun Foods filed for Chapter 11 bankruptcy last week. This will give the company 'breathing room'. Tomsun was hard hit by the October stock market crash, which dashed plans to acquire additional finances. Tomsun has recently been challenged in its Northeast tofu market by two tofu makers from outside the region. Tomsun has 50% of that market now but the competition is getting stiff. Tomsun sold more than $3 million in tofu-related products in 1986. During the initial development phase of Jofu, company reports indicated it operated at a loss of more than a half million dollars. The reports also indicate the firm expected continued losses on the product through March 1987.

The company is meeting its obligations to its 35-to-40 employees, as well as customers and shareholders, Tom Timmins, Tomsun chairman, stressed. Tomsun's debt is estimated at more than $1 million. In order to break even, Tomsun needs to produce 6,000 to 7,000 cases of Jofu a week. The company is short of that goal by about 15%, Timmins said.

8534. Hiestand, Michael. 1988. From hot dogs to pasta, tofu enters mainstream. *Adweek's Marketing Week.* April 18.
• ***Summary:*** Based in part on a January news release by Soyfoods Center and interviews with Legume, Soyfoods Center, and Lumen Food Corp. Address: New York.

8535. Ragovin, Helene. 1988. An Olympian task: Preparing for competitions keeps Disney chefs cooking. *News-Journal* (*Daytona Beach, Florida*). April 21.
• ***Summary:*** The Disney chefs are preparing for this year's Culinary Olympics in Frankfurt, West Germany. For a side dish, the team created a vegetable "sausage" that combined apples and braised red cabbage. They bound the apples and cabbage with tofu and stuffed it in sausage casing.

8536. *Rocky Mountain News* (*Denver, Colorado*). 1988. Tofu company gets blessing [Denver To-Fu Co.]. April 23.
• ***Summary:*** "The Denver To-Fu Co., in honor of moving from Adams County to new offices in Denver, flew in three Shinto priests from Tokyo for 'blessing of the company' ceremonies yesterday afternoon. The company, owned by Haruhisa Yamamoto, a Tokyo native, manufactures tofu sold in Denver-area grocery stores. To-Fu, now at 3825 Blake St., employs 10 people. Mayor Peña also attended the ceremonies."

8537. Layton, Lyndsey. 1988. County's health food industry is still strong... despite some producer setbacks. *Recorder* (*Greenfield, Massachusetts*). April 29.
• ***Summary:*** Tempeh Works attempts to borrow $500,000 for future expansion of the company's plant. The tempeh company is just pulling out of a three-year slump period of heavy losses to enjoy a 40% annual growth rate. It would like to double the size of its Fairview Street plant from 6,000 square feet to 12,000 square feet. But the company's recent shaky past, combined with the Tomsun/Country Dairy experiences, have made it tough to win confidence from lenders. Tomsun will stay in operation despite the fact the 11-year-old company filed for protection earlier this month under Chapter 11 of the U.S. bankruptcy code. Last week, Tomsun secured a $150,000 loan from the Springfield based Bank of Western Massachusetts to pay some of its debts and keep the operation going. Tomsun executives blame the company's troubles on recent challenges in its northeast tofu market by two tofu makers from outside the region. Currently, Tomsun has 50% of that market.

Tofu has become a commodity where the person who can turn out large amounts can sell it the cheapest. In 1982, Tomsun was the 3rd largest tofu maker in the nation; it has now dropped to 4th place. South River Miso Co. produces about 300,000 lb of miso each year in 5 to 8 different varieties. Annual sales hover around $40,000. Tempeh Works has only one serious national competitor that is based in Boulder, Colorado.

8538. Green, Rand. 1988. Packaging keeps Mori-Nu tofu fresher. *Produce News* (*Fort Lee, New Jersey*). April 30.
• ***Summary:*** According to Art Mio, national sales manager for Morinaga Nutritional Foods, there are two basic reasons people are turned off by tofu. First, they don't know what to do with it and may not even by quite sure what it is. The solution is education. Second, many people who have tried it don't like the sour taste. The U.S. Food & Drug Administration recommends that tofu core temperatures be kept below 45 degrees, while the USDA "strongly recommends no higher than 41 degrees." Tom McReynolds is the newly appointed marketing manager at Morinaga Nutritional Foods. Mio mentioned 2 diet books that have been published recently with tofu recipes that specifically

© Copyright Soyinfo Center 2013

recommend Mori-Nu Tofu. *The Calcium Connection* (1988), by Dr. Cedric Garland and Dr. Frank Garland is one such book. *Diet Recipes from Doris' Kitchen*, by Doris Cross is the other.

8539. McDonald, Country Joe. 1988. Tofu bashing. *San Francisco Chronicle*. April 30.
• ***Summary:*** "Tofu bashing, like smoking crack, is only good for a short high. Coming down you realize that you have spent all your money on meat or dope and hurt your health also. I don't believe that Al Martinez, the author of 'Living Off the Thin of the Land' (Sunday Punch, April 17) ever ate tofu in his life. It is delicious and nutritious.

"Asking the rhetorical question 'Is life really worth living on Tofu Burgers?' in a hungry, unhealthy America is not cute, it is irresponsible. And suggesting that drinking yourself to death on vodka is a good alternative to a diet of tofu is... well, you get my drift.

"In the future, please 'just say no' to dumb articles from the Los Angeles Times. Tofu loving..." Address: Berkeley, California.

8540. **Product Name:** Amy's Organic Vegetable Pot Pie (With Tofu).
Manufacturer's Name: Amy's Kitchen Inc.
Manufacturer's Address: P.O. Box 690, Petaluma, CA 94953. Phone: 707-762-6194.
Date of Introduction: 1988. April.
Ingredients: *Organic whole wheat flour, water, *organic potatoes, *organic carrots, peas (*organic when available), *organic tofu, grade AA unsalted butter, mochi rice flour, *organic oat flour, soy extract, hydrolyzed vegetable protein, whey powder, onion salt, natural xanthan gum, herbs and spices. * = Organically grown and processed in accordance with section 26569.11 of the California Health and Safety Code.
Wt/Vol., Packaging, Price: 9 oz (255 gm) box.
How Stored: Frozen.
New Product–Documentation: Talk with Andy Berliner. 1988. March 7. Amy's Original Vegetable Pot Pie is scheduled for April, 1988, made by Old Chicago Foods; Package from Lonnie Stromnes of White Wave. 1988. Sept. The product uses White Wave tofu. The manufacturer is now listed as Amy's Kitchen Inc., P.O. Box 449, Petaluma. Label is 5 by 5 by 2 inches. Full color with photo of pot pie, one-fourth open on a white dish on a blue and white tablecloth. Chunks of tofu are prominent. "Whole wheat crust." A convenience product with instructions for conventional or microwave ovens.

8541. **Product Name:** Tofu Burger, Tofu Sandwiches, and Tofu Pocket.
Manufacturer's Name: Cactus Flower Foods.
Manufacturer's Address: Tucson, Arizona. Phone: 602-742-3392.
Date of Introduction: 1988. April.
New Product–Documentation: Janet Wooddancer. 1988. April 1. Territorial (Oro Valley, Arizona). "Cactus Flower Foods distributes tasty tidbits of nutrition." This small wholesale health food distributorship, run by Elsa Mesko and her daughter, makes about 300 sandwiches a week.

8542. **Product Name:** NuTofu (Soy Cheese with Casein) [Monterey Jack].
Manufacturer's Name: Cemac Foods Corp.
Manufacturer's Address: 90 West St., New York, NY 10006. Phone: 212-964-8740.
Date of Introduction: 1988. April.
Ingredients: Tofu, soybean oil, casein (protein), sea salt, citric acid, soy lecithin, guar gum.
Wt/Vol., Packaging, Price: 8 oz, 5 lb. or 20 lb.
How Stored: Refrigerated.
New Product–Documentation: Soya Newsletter. 1988. March/April. p. 8. "Made from 100% organic soymilk and natural ingredients."

Product with Label purchased in California. 1989. June. 5 by 3¼ inches. Green, red, blue, and white on yellow. "Cholesterol free. Lactose free. 100% natural. Organic."

8543. DiStasio, Daniel. 1988. Spotlight on David Mintz. *Spotlight on Rockland/Bergen* (*Mamaroneck, New York*). April. p. 72-73.
• ***Summary:*** The quest for the perfect dessert began in 1972. Mintz's career in the food industry had begun in the Catskills with a small business called Mintz's Knishes. He attracted help with a sign which read, "Grandmothers Wanted." Thus began the catering business that finally brought him to Manhattan. "I was reading a health food magazine," Mr. Mintz recalls, "when I read that tofu looks like cheese but is not." From 1972 until 1981, Mr. Mintz was like a man possessed. In May 1982, he hand-delivered five gallons of Tofutti ice cream to a Manhattan health-food store.

Even the strict USSR State Committee for Inventions and Discoveries allowed Tofutti to be registered, a coup of sorts in that the Russians usually eschew any "frilly products." The Japanese went crazy: Every month, 100,000 gallons are delivered there, that's 3.2 million four-ounce servings. "Some people call me a kosher ham," quips Mintz. Though his enthusiasm for the spotlight takes up much of his time, workaholic Mintz enjoys his home in Alpine, New Jersey. He is also a talented painter. What's next on the list? Burgers, sausages, hot dogs, more main course foods.

8544. **Product Name:** Baked Tofu, Tofu Jalapeño Dip, Baked Stuffed Tofu.
Manufacturer's Name: Fresh Tofu Inc.
Manufacturer's Address: 900 Line St. (P.O. Box 1125), Easton, PA 18042. Phone: 215-258-0883.

© Copyright Soyinfo Center 2013

Date of Introduction: 1988. April.
New Product–Documentation: Talk with Sam Weinreb. 1989. Aug. 16. Fresh tofu makes a great baked marinated tofu stuffed with brown rice. Talk with Gary Abramowitz. 1989. Aug. 21. The baked tofu (now one of their most popular products) was introduced in about April 1988, the Tofu Jalapeno Dip in about June, and the Baked Stuffed Tofu (marinated tofu stuffed with rice and herbs) in Sept. 1988.

Talk with Gary Abramowitz. 1991. June 19. Fresh Tofu now makes about 8,000 lb/week of tofu and sales of regular tofu have recently been rising fast. His focus is now much more on second-generation tofu products. The two best-sellers are Baked Marinated Tofu, and Baked Stuffed Tofu.

8545. Golbitz, Peter. 1988. Tofu packaging: To water pack or vacuum pack–That is the question. *Soya Newsletter* (*Bar Harbor, Maine*). March/April. p. 1, 3, 6-7, 13.
• ***Summary:*** In traditional countries like Japan, where tofu is consumed daily by a large portion of the population, packaging is used more for the conveyance of the product than it is to preserve it. By far the most popular method in modern times is the water-packed tub, heat sealed with a multi-laminant plastic film. The other popular method is vacuum-packing–placing the tofu in a multi-laminant plastic bag, or in a form-fill-seal machine which makes its own package from the roll stock, drawing off air in the package and heat sealing it.

Water-filled tubs are made of high density polyethylene (HDPE). The sides are fluted to add rigidity. The lidding stock is usually a multi-laminant film composed of a combination of Mylar, Saran, polypropylene or other appropriate material, with at least one layer of polyethylene on the bottom. There are three companies that supply tofu trays to the industry in the U.S. These are: Airtight Container, Inc., Los Angeles, California; Fabri-Kal Corp., Kalamazoo, Michigan; and Gage Containers, Lake Oswego, Oregon. Prices run from around 3.5 cents to 7.0 cents each.

Kawanishi-Shoko, Los Angeles, CA, Bean Machines, San Francisco, CA, and T.R.I. Systems, Rancho Cordova, CA are three leading suppliers of this type of tofu packaging machinery in the U.S. All of these companies import their packaging equipment from Japan.

Most vacuum packing of tofu is done with bags, where the tofu is put in a multi-laminant bag, placed in a vacuum chamber, the lid is closed and the air drawn out. A good operator can pack 720 packages per hour. Vacuum bags can cost from 4 cents to 12 cents per package. Roll stock vacuum machines can run as high as 50 to 200 packages per minute. Popular chamber models are the SuperVac line, sold by Smith Equipment Co. in Clifton, New Jersey, and the Turbovac line sold by Hantover Inc. in Kansas City, Missouri. Roll stock vacuum machines are also available through these companies.

There is a question as to whether or not vacuum packaging can extend the shelf-life of freshly produced tofu. Steve Demos of White Wave, Boulder, CO, reports that "we get a longer shelf-life with our vacuum-packed tofu than we do with our water-packed tofu." White Wave sells vacuum-packed tofu, packaged on a roll stock vacuum machine, both with and without an outer box. "The outer box adds to the cost of the product, but the box can become a vehicle for recipes, cross merchandising, couponing and solicitation for special sales," states Demos.

Ben Lee, company spokesperson for Quong Hop [San Francisco, CA] reports that they get a longer shelf-life with their vacuum-packed tofu as well. Lee said, "One of the major advantages of vacuum packing for us, is the ability to ship the product less expensively. A typical case of water-packed tofu can weigh up to 50% more than a comparable case of vacuum-packed tofu." However, water packing is much quicker and easier.

Swan Gardens, Decatur, Georgia, is a company which uses vacuum packing exclusively. Swan Gardens puts some of their vacuum-packed tofu in a box, similar to White Wave. Swan Garden's tofu is pasteurized and has a 4 to 6 week shelf-life.

Nasoya Foods, Leominster, Massachusetts, uses water packaging exclusively. At one time, the company used a roll stock vacuum machine for packing, but gave it up after years of problems. "On a scale of 1 to 10 for difficulty," says company vice president Bob Bergwall, "vacuum packing was a 10, and water packing is a 1." Nasoya achieves a shelf-life of better than 8 weeks.

Package of the future. Right now, only silken tofu can be packaged aseptically. The biggest improvement in tofu packaging in the near future will not be the result of a new package per se, but rather the result of better attention to in-house sanitation, pasteurization, and the temperature that tofu is being stored and sold at. Address: Soyatech, Bar Harbor, Maine.

8546. Golbitz, Peter. 1988. Long life tofu: Wave of the future? *Soya Newsletter* (*Bar Harbor, Maine*). March/April. p. 7, 12.
• ***Summary:*** Morinaga Nutritional Foods, Inc., Los Angeles, California, and Kikkoman International Inc. of San Francisco, California, are both marketing long-life tofu, produced in Japan exclusively for export to the U.S. and other countries. (A Japanese governmental agency has forbidden the companies to market these products in Japan for fear that they threaten the existence of the fresh tofu industry, which consists of at least 30,000, small and localized, tofu shops.)

Kikkoman's product, Kikkoman Tofu, is also produced using a patented, though different process, packed in a foil retort pack. The product is produced by Kikkoman Corporation, at their Noda, Japan plant. The principle behind both products is really very simple. Cooled liquid soymilk

© Copyright Soyinfo Center 2013

is mixed with a heat reactive coagulant, packaged in a container, heated to activate the coagulant and then cooled. The major difference between Kikkoman's and Morinaga's product is when and where the sterilization of the package and product occurs.

Morinaga's process consists of: sterilizing the soymilk with UHT processing, cooling, adding coagulants glucono delta-lactone (GDL) and calcium chloride, filling into a sterile Tetra Pak, sealing, heating the package with water just hot enough to activate the GDL, and then cooling.

With the Kikkoman Tofu, the sterilization of the product is achieved after packaging. Coagulants GDL and calcium chloride are added. It is then filled into a retort pack, sealed, and heated at temperatures high enough to activate the coagulant and sterilize the finished product. Both the Kikkoman and the Morinaga tofus tend to be slightly more expensive than regular tofu. Silken (unpressed) tofu is unfamiliar in the U.S., and no company has yet come out with a pressed tofu that doesn't require any refrigeration.

Sales of Mori-Nu are up between 40 and 50% over last year, and unit sales of the product put Morinaga among the top five tofu companies in the U.S. Kikkoman's product has been on the market for more than a year and is also reportedly making healthy sales gains. Morinaga's product is currently being shipped to 36 countries world-wide, with the U.S. being the largest consumer by far. Kikkoman also reports that they are shipping their product to Europe, Australia and Canada, but again, the biggest volume is in the U.S. Address: Soyatech, Bar Harbor, Maine.

8547. *Health Foods Business* (*Elizabeth, New Jersey*). 1988. Mori-Nu distributes tofu to L.A. marathon runners. April. Also in Packer (Shawnee Mission, KS). Feb. 27.
• ***Summary:*** "More than 15,000 runners in this year's L. A. marathon had Mori-Nu Tofu included in their pre-race 'goodie bags'. Tofu and recipes were provided to each of the racers. Additionally, the 1,000 seniors who took part in the marathon's 3-mile Senior Walk had the opportunity to sample tofu prior to the walk, and examples of recipes were distributed to the public during the marathon's four-day Health and Fitness Expo (March 2-5) and at the Finish Line Festival on the day of the race."

8548. LaBell, Fran. 1988. Tofu technology yields whole egg substitute, dairy replacers: Cheesecakes are low-fat, cholesterol-free. *Food Processing* (*Chicago*) 49(4):68-69. April.
• ***Summary:*** An in-depth look at Tofutti Brands' two new products: Egg Watchers Whole Egg Substitute, and Better than Cream Cheese.

Heart disease is estimated to affect 63 million Americans, according to the American Heart Association.

Egg Watchers Whole Egg Substitute–"The whole egg substitute is sold as a frozen liquid in paperboard, gable-top cartons. About two days are required to defrost the frozen cartons under refrigeration, and refrigerated shelf life is one week."

"In an omelet, the whole egg substitute is practically indistinguishable from a natural whole egg omelet. It has the same texture and appearance as an egg omelet..."

Egg whites make up a large proportion of the whole egg substitute's composition–about 95%. It is fortified with vitamins and minerals to make it close to or the same nutrient content as eggs.

Better Than Cream Cheese–"Cream cheese replacer looks like cream cheese, tastes like cream cheese, and functions like cream cheese." Products are supplied in 30-lb blocks.

"The Cream cheese replacer has 85 calories per oz, while cream cheese has 105. It contains 2 grams of protein per oz, and cream cheese has 3. It has 8 grams of fat and 56 mg of sodium per oz, while cream cheese has 11 g fat and 85 g sodium. Of greatest significance is that it contains no cholesterol compared to a normal 34 mg/oz in natural cream cheese." Address: Chicago, Illinois.

8549. Lang, Kerri-Sue. 1988. A growth market for organic foods. *Country Guide* (*Winnipeg*). April. p. 20-22.
• ***Summary:*** In 1980, the USDA defined organic farming as "a production system that avoids, or largely excludes, the use of synthetically compounded fertilizers, pesticides, growth regulators and livestock feed additives to the maximum extent feasible. Organic farming systems rely upon crop rotations, animal manures, legumes, green manures, off-farm organic wastes, mechanical cultivation, mineral bearing rocks, and aspects of biological pest control to maintain soil productivity and tilth, to supply plant nutrients, and to control insects, weeds and other pests. The Organic Foods Production Association of North America (OFPANA) was founded in 1985. About 25 farmers contract organically-grown soybeans with Toronto-based Soy City Foods.

Organic food producers feel strongly that organic foods are healthier and more nutritious than conventionally grown foods, but scientific data does not yet support this claim. Ontario farmers requesting organic certification must have abstained from using prohibited fertilizers for at least one year and pesticides for 3 years. Prohibited fertilizers include anhydrous ammonia, ammonium nitrate, diammonium phosphate, most sewage sludge, triple superphosphate, muriate of potash, and potassium chloride. Prohibited soil additives include quick lime and slaked or hydrated lime.

Certified organic growers are inspected annually at their own expense ($150). They also sign a licensing agreement and pay a fee to use the Ontario association's logo. The logo fee is based on gross sales. Organic soybean yields last year were about 20% below the normal provincial average. Jon Cloud, part-owner of Soy City Foods in Toronto, says most of his contract growers experience a 25% yield reduction

© Copyright Soyinfo Center 2013

in their first 3 years of organic production. But a premium for the beans, along with reduced input costs, brings net returns to at least the level that could be expected under conventional crop management.

Last year, about 25 farmers grew organic soybeans on about 320 acres under contract with Soy City Foods. Highest yield was 45 bushels per acre; average was 32 bushels. Right now, says Cloud, the company could use 2,000 acres of organically-grown soybeans. Premium prices for organic beans are $8.50 a bushel. The firm produces several soy-based foods for human consumption. These include soy burgers, falafel (spicy patties traditional in some parts of the Middle East), a base for soy pate, tempeh, tofu, and soy milk. Contract growers are supplied with seed because Soy City wants beans with high protein and low oil content. Organic farmers don't spend $40 an acre on herbicides. Nor do they put tonnes of commercial fertilizer on their fields. And they sell their crops at a 15% to 20% premium. Weeds, he adds, are controlled by non-chemical procedures such as crop rotation and cultivation, which cost little.

Hugh Martin, a soils and crops specialist with the Ontario Ministry of Agriculture and Food says organic farming will be a significant part of agriculture in the future. Most organic growers he works with have an ingrained stewardship ethic and are concerned about soil conservation. He says, "After about 5 years of organic farming, the organic matter content of soil increases. Improved porosity allows water to penetrate quickly. There's less runoff."

Color photos show the storefront of Soy City Foods "Soy Food Information Centre" and 3 of the company's products: Soyettes, Tempeh, and Falafels. Address: Winnipeg, Manitoba, Canada.

8550. **Product Name:** Barat Bits (Non-Dairy Gourmet Chocolates) [Tofu Chocolate Dipped Peanuts, Tofu Chocolate Smothered Raisins, Tofu Chocolate Pastilles, and Tofu Chocolate Mints].
Manufacturer's Name: Legume, Inc.
Manufacturer's Address: 170 Change Bridge Road A-4, Montville, NJ 07045. Phone: 201-882-3889.
Date of Introduction: 1988. April.
Ingredients: Tofu Chocolate Covered Peanuts: Granulated cane juice, cocoa butter, tofu powder, unsweetened chocolate, soya lecithin, pure vanilla.
Wt/Vol., Packaging, Price: 1.5 oz box.
How Stored: Shelf stable.
New Product–Documentation: New Product News and Product Alert. 1988. April. The raisins are in 1.75 oz boxes; the rest are 1.5 oz. The Tofu Chocolate Mints contain Tofu Chocolate and pure peppermint oil. Candy Marketer (Cleveland, Ohio). 1988. June. "Legume adds tofu chocolate bits." The 1.5 ounce boxes have a suggested retail price of $1.19 to $1.49. Better Nutrition. 1989. Jan. "Barat Tofu Chocolate." Note the new name; Barat Bits is not mentioned.

8551. **Product Name:** New Tofu Light Links (Meatless Hot Dogs). Renamed in 1988 Vegan Tofu Light Links.
Manufacturer's Name: Light Foods Inc.
Manufacturer's Address: 613 C Broadmoor, St. Louis, MO 63017. Phone: 314-878-8915.
Date of Introduction: 1988. April.
Ingredients: Water, Real Tofu, isolated soy protein, non-hydrogenated vegetable oil, rice syrup, natural spices, salt, beet powder, tamari (natural soy sauce), barley flour, locust bean gum, natural flavors, onion powder, garlic powder, natural spice oils.
New Product–Documentation: Poster. 1987. March. "Tofu Light Links. Now with absolutely no animal products. Made with Real Tofu and non hydrogenated vegetable oil." Note: This name was later changed to New Tofu Light Links than Vegan Tofu Light Links. Leaflet. 1987. Contains no animal ingredients. Uses non-hydrogenated vegetable oil. Sweetened with rice syrup. Talk with Bob Davis, president of Light Foods. 1988. March 26. These tofu hot dogs are not yet out. Unlike the original Light Links, they will contain no egg whites. Talk with Lauraine Davis. 1988. Aug. 28. This new product was launched in April 1988. They still have the original Light Links containing egg whites. These will eventually be labeled Vegan Tofu Light Links. Leaflet. 1988. April. 8½ by 11 inches. Black on light blue. "On the rise... Now you want a link with no animal ingredients, non-hydrogenated oil, less fat, maybe a rice syrup sweetener instead of honey, and an even better flavor. Introducing the New Tofu Light Links, and New Tofu Light Link Specials, with natural imitation soy cheddar cheese." Leaflet. 1988. April. 8½ by 11 inches. Blue and red on beige. "Higher still..." Gives ingredients for New Tofu Light Links, and New Tofu Light Link Specials.

8552. Lightlife Foods, Inc. 1988. Product list. Greenfield, Massachusetts. 2 p. 28 cm.
• ***Summary:*** "These delicious products are available from Lightlife Foods: Lightlife Tofu Pups. Lightlife Party Pups. Fakin' Bacon. T4empeh Burgers. Organic Soy Tempeh. Caraway Soy Tempeh. 3-Grain & Soy Tempeh. Quinoa Sesame Tempeh. Macro Power Tempeh. Garden Vegetable Tempeh.

"All Lightlife Foods / Tempehworks products are 100% natural, 100% vegetable, and cholesterol free. All of our products have a 45-day refrigerated shelf life or may be frozen."

A description of each product is given. Address: P.O. Box 870, Greenfield, Massachusetts 01302. Phone: (413) 772-0991.

8553. **Product Name:** Vegi-dip (Tofu Based) [French Onion, Creamy Dill, Eggless Salad, or Garlic & Herb].
Manufacturer's Name: Nasoya Foods, Ltd.

© Copyright Soyinfo Center 2013

Manufacturer's Address: 23 Jytek Park (P.O. Box 841), Leominster, MA 01453. Phone: 508-537-0713.
Date of Introduction: 1988. April.
Ingredients: Creamy Dill (7/92): Well water, organically grown soybeans, pressed canola oil, brown rice syrup, grain vinegar, citric acid, garlic, herbs, spices, seasalt, vegetable gums. Eggless Salad (7/92): Well water, organically grown soybeans, pressed canola oil, brown rice syrup, grain vinegar, mustard, citric acid, onion, garlic, herbs, spices, seasalt, vegetable gums.
Wt/Vol., Packaging, Price: 8 oz shallow plastic tubs (like Kraft dips), with tamper-proof foil seals. Retails for $1.39 (7/92, Maryland).
How Stored: Refrigerated.
Nutrition: Creamy Dill. Per 1 oz.: Calories 100, protein 1 gm, carbohydrates 4 gm, fat 9 gm, cholesterol 0 mg, sodium 135 mg, potassium 40 mg.
New Product–Documentation: Note: This is the third reincarnation of this product concept, first introduced in Dec. 1979 as a line of five spreads and salads, then repositioned in Dec. 1982 as a line of seven Tofu Vegi Dips. Note that the product name no longer contains tofu. Soya Newsletter. 1988. Jan/Feb. p. 8. Talk with Sjon Welters. 1988. March 10. These will not be available until April. New Product News. 1988. April 4. "They are sold in health food store refrigerated cases nationally." Talk with John Paino. 1988. July. These are being test marketed locally at Bread & Circus. Leaflet. 1988. Nov. "Great tasting dips without cholesterol." Shows the lids of the 4 products "Naturally good from Nasoya." Natural Foods Merchandiser. 1989. Feb. p. 14. Nasoya's four new tofu dips are packaged in 8-oz. tubs with tamper-proof seals (tamper-evident shrink neck bands over the caps/closures).

Products (Creamy Dill, Eggless Salad) with Labels purchased at Fresh Fields, Rockville Pike, Maryland. 1992. July 20. Tub lid is 4 inches diameter. Creamy Dill is green and red on white. On lid: "100% cholesterol free." On tub: "Naturally good from Nasoya. Keep refrigerated. May be used until date stamped."

8554. *Packaging.* 1988. Synthetic-paper is colorful, waterproof. April. p. 73.
• ***Summary:*** Labels made with Kimberley-Clark's Kimdura synthetic paper combine moisture resistant durability with fine four-color reproduction. Island Spring has used this to package their new line of tofu dressings, introduced in the fall of 1987. "We felt four-color rendering of fresh herbs would help differentiate our product," said Island Spring president W.M. Lukoskie.

8555. Phillippy, B.Q.; Johnston, M.R.; Tsao, S.-H.; Fox, M.R.S. 1988. Inositol phosphates in processed foods. *J. of Food Science* 53(2):496-99. March/April. [35 ref]
• ***Summary:*** Myo-inositol bis-, tris-, tetrakis-, pentakis- and hexakisphosphates (IP2-6) were quantified in 9 thermally processed or fermented food products (including bran, canned [mung] bean sprouts, canned kidney beans, fried soy burger, infant formula concentrate and powder, soy isolate, tofu and white bread). Total inositol phosphate content (millimoles/kg dry weight) ranged from 1.35 in white bread to 23.26 in tofu and 26.05 in soy isolate. In all foods analyzed, inositol hexakisphosphate (phytic acid) accounted for greater than 40% of the total inositol phosphates on a molar basis.

Note: Supro 610K soy isolate was obtained from Ralston Purina Co. (St. Louis, Missouri). Address: 1-2. Div. of Food Chemistry and Technology; 3-4. Div. of Nutrition. All: Food and Drug Administration (FDA), Washington, DC 20204. Phillippy's present address: Southern Regional Research Center, USDA, New Orleans, Louisiana 70124.

8556. Quong Hop & Co. 1988. The Soy Deli. Quality & support (Ad). *Whole Foods.* April. p. 86.
• ***Summary:*** "We educate your customers about tofu! Soy Deli has the largest variety, and best dealer support of any tofu company in America." Also in Whole Foods. 1989. Feb. p. 62. Address: South San Francisco, California. Phone: 415-761-2022.

8557. **Product Name:** Tofu Pasta [Mixed Rotini, Whole Wheat Fettucine, Whole Wheat Spinach Fettuccine, Whole Wheat Herb Fettucine, Linguini, Buckwheat Linguini].
Manufacturer's Name: Sooke Soy Foods Ltd.
Manufacturer's Address: 2625 Otter Point Rd., R.R. 2, Sooke, Vancouver Island, BC, V0S 1N0, Canada. Phone: 642-3263.
Date of Introduction: 1988. April.
Ingredients: Herb Fettucini: Organic 100% whole wheat durum, organic tofu (organic soybeans, water, nigari [magnesium chloride–an extract of sea water]), herbs.
Wt/Vol., Packaging, Price: 320 gm / 11.3 oz.
How Stored: Refrigerated.
New Product–Documentation: Labels. 1988. 5.5 by 4 inches. Self adhesive. Blue, green, and yellow on white. "Quick 'n Easy. Cook in boiling salted water 3-4 minutes. Serve with favorite sauce and garden fresh vegetables." Introduced April 1988.

8558. **Product Name:** Herb Tofu.
Manufacturer's Name: Sooke Soy Foods Ltd.
Manufacturer's Address: 2625 Otter Point Rd., R.R. 2, Sooke, Vancouver Island, BC, V0S 1N0, Canada. Phone: 642-3263.
Date of Introduction: 1988. April.
New Product–Documentation: Letter from Wayne Fatt. 1988. Sept. 29. The product was introduced in April 1988.

8559. *Soya Newsletter* (*Bar Harbor, Maine*). 1988. Soyfoods Association of America holds annual meeting. March/April.

© Copyright Soyinfo Center 2013

p. 14.
• ***Summary:*** SAA holds annual meeting. Elected to serve one year terms as officers were Gordon Bennett, president; Peter Golbitz, vice president; and Yvonne Lo, treasurer. Also appointed to serve on the board to fill three vacancies were Steve Myers, Farm Foods; Jack Mizono, Azumaya; and Danielle Lin, Morinaga Nutritional Foods. At the recent SAA meeting it was decided to expand this activity [getting more soyfoods companies involved in the SAA]. In fact, it was decided that besides the Soyfoods Pavilions at the Natural Foods Expos, this would be all the SAA would do for this year–plan and coordinate next year's joint promotional activities.

8560. *Soya Newsletter* (*Bar Harbor, Maine*). 1988. Japan Tofu Expo held. March/April. p. 10.
• ***Summary:*** Japan Tofu Expo Held. The all-Japan tofu & fried tofu equipment Expo '88 was held at the International Expo Center in Harumi, Tokyo, Japan, March 26 and 27. Attendance at the show was approximately 7-8,000 people, with 56 companies exhibiting tofu equipment. There were 2 new systems for making 100% nigari silken tofu. One involved the use of microwaves to heat the soymilk in the forming tray to coagulate the tofu.

8561. *Soya Newsletter* (*Bar Harbor, Maine*). 1988. Soyfoods Pavilion major attraction at NFE '88 West. March/April. p. 10.
• ***Summary:*** At the recent Natural Foods Expo '88 West, sponsored by Natural Foods Merchandiser, and held at the Anaheim Convention Center, Anaheim, California, April 8-10, the major food attractions were all in one place–the Soyfoods Pavilion.

This year's participants were Galaxy Cheese/Soyco, Golden Soy Foods, Book Publishing, Farm Foods, Legume, Morinaga Nutritional Foods, Tempehworks, Vitasoy USA, and Westbrae Natural Foods. Steve Meyers of Farm Foods remarked, "this is the major eating area of the show." Steve Meyers, Farm Foods/Barricini at 800/431-5030.

8562. **Product Name:** Soyco Mozzarella Style Shreds, Cheddar Style Shreds, or American Style Slices (With Casein).
Manufacturer's Name: Soyco Foods. Div. of Galaxy Cheese Co.
Manufacturer's Address: P.O. Box 5181, New Castle, PA 16105. Phone: 800-441-9419.
Date of Introduction: 1988. April.
Ingredients: Tofu, soy oil, casein, sea salt, citric acid, soy lecithin, guar gum, natural flavors, natural colors.
Wt/Vol., Packaging, Price: 4 oz packs.
How Stored: Refrigerated.
New Product–Documentation: Ad in Whole Foods. 1988. April. p. 73. "New Soyco Shreds & Slices. Soyco is the all-natural cheese alternative that has great taste without the risks. No cholesterol. No lactose. No butterfat. No artificial ingredients." Poster. 1988. April. Black on purple. "Soyco shreds & slices."

Leaflet obtained 1988. April. Black on purple.

8563. Soyfoods Association of America. 1988. May is Soyfoods Month (Ad). *Vegetarian Times*. April. p. 60.
• ***Summary:*** "Discover the convenience and value of soyfoods. Watch for the special soyfoods insert in the May issue of Vegetarian Times and East West Journal." Sponsored by Farm Foods, Legume, Mori-Nu, Nasoya, Simply Natural, Vitasoy, and Westbrae Natural, and the Soyfoods Association.

8564. Wollner, Joel. 1988. Soy-based cheeses–Concerns for the consumer. Can a traditional product be patented. *Soya Newsletter* (*Bar Harbor, Maine*). March/April. p. 2.
• ***Summary:*** In this letter to the editor, the writer is concerned about two issues raised in the article titled "Soy Cheese Market" (Soya Newsletter, Jan/Feb. 1988). He wonders to what extent the present success of soy cheese in the natural foods marketplace is based on consumers' lack of awareness that casein is a dairy product. His own informal survey, conducted shortly after Soya Kaas was first introduced and already finding widespread acceptance, found very few consumers who knew that casein is derived from milk. "In fact, over 90% thought Soya Kaas was strictly vegetarian, containing no milk-derived ingredients."

He is also shocked that Simply Natural has patented a product (named Soyalite) made by fermenting fresh tofu in miso and discovered by accident. This process "is well known and practiced by thousands of people all over the United States, and has been since the late 1970's. I first learned of 'miso-pickled tofu' (as we called it) in 1978, while manager at Erewhon Natural Foods retail store in Boston [Massachusetts]. One of our employees had learned the process while studying with Noburo Muramoto, a teacher of Oriental food-crafting in Escondido, California. Her miso-pickled tofu was a big hit among the Erewhon staff, and we began selling it ready-to-eat in the store and published the recipe in our weekly consumer newsletter. Soon after, miso-pickled tofu became a favorite dish among Boston's diverse natural foods community, and found a place in the menus of local natural foods restaurants." Address: Director, Mitoku USA Inc., New York.

8565. *Toyo Shinpo* (*Soyfoods News*). 1988. Ima Taiwan no tôfugyôkai wa? Daizu shohiryô wa nihon no 3 bai nimo [What's happening with the tofu industry in Taiwan? Soybean consumption is 3 times as large as Japan]. May 1. p. 1. [Jap; eng+]
• ***Summary:*** Taiwan's total exports were much larger than her imports this last year. Since the population is small, the

© Copyright Soyinfo Center 2013

per capita ratio of income is high. They produce a lot of second generation tofu products, and some say that Taiwan is producing more tofu products than mainland China. The demand for these foods is always steady. They produce 10,000 tons of soybeans and import 2,000,000 tons of U.S. soybeans. Their per capita consumption of soybeans is 3 times that of Japan.

8566. Knoll, Adrienne. 1988. Brooklyn caterer who invented Tofutti to lecture May 1. *Canarsie Digest* (*Brooklyn, New York*). May 2.
• ***Summary:*** In 1972, while searching for a milk substitute for desserts, pastries, pies, and sauces, Mintz discovered the soy bean product tofu.

8567. Huang, Tim. 1988. The Continuous Cooker sold by Bean Machines, Inc. (Interview). *SoyaScan Notes.* May 3. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Starting 2 years ago Tim helped develop and ran the smaller prototype of this cooker at the University of California at Davis. He had it at Grainaissance while he worked there briefly. Tomsun Foods in Massachusetts ordered the first full-scale model. They never hooked it up and never paid for it. So Bean Machines got it back and Soyfoods of America got it from BMI. It is basically a very simple machine; just a pump and steam injection. It cooks at 250-275ºF. Soyfoods of America makes a private label soymilk for Mrs. Gooch's. Hopes to introduce a non-beany soymilk kefir and yogurt. Address: Soyfoods of America, Duarte, California.

8568. Lehr, John. 1988. Mark your calendars: There's a day for everything [Imaginary National Tofu Month]. *Antelope Valley Press* (*Palmdale, California*). May 6.
• ***Summary:*** A spoof on tofu. "For example, National Tofu Month could be recognized, if indeed someone felt enough affection for the goop to support such a cause. The proclamation might read something like this: 'Whereas tofu is a very strange food and deserves recognition for its nutritional value and bizarre consistency... Whereas young urban professionals are devouring the bean paste with more zeal than Shiite Muslims hijacking an aircraft... Let it hereunto be known that June 1 to June 30 is National Tofu Month in the city of Lancaster.' Mark those calendars now. Newspapers are inundated with press releases from groups planning activities to mark their day, week or month."

8569. Paino, John. 1988. Recent developments at Nasoya: Simply Natural and Tomsun (Interview). *SoyaScan Notes.* May 10. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The Soyfoods Month advertorial was published by *East West* and *Vegetarian Times.* Lenny Jacobs helped a great deal in coordinating it. It was also sent by VT to about 100 major media in hopes that they would do a story. Tree of Life private label tofu is made by Swan Gardens in Georgia.

The Simply Natural company is going to be merged with Nasoya. Nasoya will take charge of the management, will go 50-50 on marketing, and will make all of their tofu and do the billing. Previously Simply Natural has purchased their tofu from a small manufacturer in New Jersey.

Tomsun Foods has actually filed for a Chapter 11 under the bankruptcy laws. They want to sell off their tofu manufacturing business and keep the Jofu. They once offered Nasoya the right to co-pack the tofu. John said no, because he would then be producing a tofu line that competed with his own. Above all, Tomsun wants Nasoya to buy their brand and accounts. But this is difficult for Nasoya because he has no guarantee that the accounts will not switch to, for example, Azumaya. He is torn every day between making an offer and doing nothing except continuing to compete with them.

Nasoya will reintroduce their Veggie Dips in about 3 weeks. They will have a foil seal top and a 3 month shelf life. Note: By September 1988 Nasoya is said to be producing 100,000 lb/week of tofu with a 6-8 week shelf life. They are expanding into the Midwest and have taken over many Tomsun accounts. Business is booming.

Nasoya was first incorporated in Dec. 1984, then in Dec. 1987 the company changed from a corporation to a limited partnership, i.e. from Nasoya Foods, Inc. to Nasoya Foods, Ltd. Address: Nasoya Foods, Leominster, Massachusetts.

8570. Pirello, Christina Hayes. 1988. Brief history of Simply Natural, Inc. (Interview). *SoyaScan Notes.* May 11 and June 6. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** In December 1984 Robert Pirello started Simply Natural, a natural foods vegetarian catering company. In 1984 Christina had sold her design company in Florida and moved to Philadelphia, where she worked as a freelance designer. Her mother had died recently and she had been diagnosed as having cancer. She was a vegetarian when she met Robert, a macro, who introduced her to the macrobiotic diet. Christina joined Robert's company while recovering from cancer. She left the advertising field completely to concentrate on getting well and running Simply Natural.

One of the catering company's first products was tofu cheese, made by wrapping a firm cake of tofu in cheesecloth, embedding it in sweet white miso, and allowing it to ferment at a controlled temperature for several days. This product was made using the traditional Japanese process for *Tofu no Misozuké* (Tofu Pickled in Miso), which they learned from *The Book of Tofu* (page 110) by Shurtleff and Aoyagi. These firm little bricks, served as a cheese with crackers, became their showcase item. (Note: A similar product, called Tofurin, had been developed by Nov. 1983 by Manna in the Netherlands). But they also made many other tofu dishes such as various types of stuffed agé (tofu pouches), tofu dips,

© Copyright Soyinfo Center 2013

quiches, stuffed loaves, pates. You name it, they did it. They purchased their tofu from a company named Fresh Tofu in Easton, Pennsylvania.

In December 1984 a group for whom they were planning to cater a Christmas party requested a non-dairy cream cheese dip. Robert tried pureeing their tofu cheese in a blender and discovered a revolutionary new product–A non-dairy tofu-based cream cheese. To this they could add flavors, such as garlic powder, onions & chives, or herbs. This soft tofu cheese, served as a non-dairy party dip, became their second showcase product. In the spring of 1985, Cynthia Schwartz, a friend who owned Center Foods, a leading natural/health food store in Philadelphia, asked if she could try to sell their soft tofu cheese. Bearing the label Simply Natural Soft Tofu Cheese, their first commercial product sold very well. Soon they were selling it in several stores, delivering it out of the back of the car. Within 4 months, they had distributors in Pennsylvania competing with one another to sell the product. Finally in October 1985 they signed an 6-months exclusive distribution agreement with Jerry Schwartz and Earthy Organics, a Delaware Valley natural foods distributor. Sales grew rapidly and by year's end other major East Coast distributors were clamoring for the product. Jerry kindly let go of his exclusive and Soft Tofu Cheese was soon being carried by Cornucopia (Rhode Island, from Dec. 1985), Stow Mills (Vermont, Dec. 1985), and Tree of Life (Florida, Jan. 1986). In January 1986 Jerry Schwartz introduced them to their first West Coast Broker, Roberta Fleischer, of California. Distribution began there in March. Now sales began to skyrocket. Robert and Christina soon realized that they were in the wrong business. In May 1986 they dropped the catering business and transformed it into a tofu product development and marketing company. But problems also began to grow. As the warm weather of spring came, the Soft Tofu Cheese, made by people with a limited knowledge of microbiology and plant sanitation and now sold throughout the East Coast, began to spoil. Sales plummeted. By hiring food specialists took and obtaining help from Dr. H.L. Wang of the USDA Northern Regional Research Center at Peoria, Illinois, they were able, largely by trial and error to finally get the problem under control.

In August 1986 they moved from their plant in Philadelphia into a larger facility in Norma, New Jersey. The plant's owner, Bill Schroeder, wanted to buy into their company. So they incorporated, he let them use the plant rent free, and he invested a little capital, which they used the funds to pay off past debts incurred because of the spoilage problems. The next challenge was to develop and manufacture a line of second-generation tofu products using their Soft Tofu Cheese. Continuing to buy their tofu from Fresh Tofu, they launched Antonio's Simply Natural Tofu Pasta (Oct. 1986, fresh pasta products stuffed with their Soft Tofu Cheese) and a line of Creamy Miso Dressings (Dec. 1986, made with the sweet white miso in which the tofu had been ripened). In October 1986 they started advertising the new line in Vegetarian Times. In October 1987 they were granted a patent on the process for their Soft Tofu Cheese, and in April 1988 a second patent on the end product. Also in October they repositioned and repackaged their product line to cross over into mainstream markets. Soft Tofu Cheese was renamed Soft Soyalite and Antonio's Pasta was renamed Pasta Lite. Christina and Robert were married on 31 December 1987.

In mid-1988 Nasoya Foods in Leominster, Massachusetts, began tests on making and pasteurizing Simply Natural's Soft Soyalite. In early 1987 they had discussed the possibility of a merger with Nasoya, but they were not as interested in this as Nasoya was, in part because Nasoya could not solve key pasteurization and product flow problems. They are now negotiating their first real outside financing with Leo Blank, who would like to buy Bill Schroeder's stock, and give them substantial capital. They will soon be closing their plant in Norma, New Jersey. Christina and Robert will be out of manufacturing, able to focus their full attention on marketing and product development. Their pasta products are now made at Mays Landing, south New Jersey and their miso dressings by Alpha-Pak in San Pedro, California (using both Cold Mountain Miso and miso recycled from the Soyalite). The future looks very bright.

Richard Rose. 1988. May 13. Adds: He was told by Wally Rogers and Tim Huang that in the late 1970s The Soy Plant in Ann Arbor, Michigan, developed a "Tofu Cream Cheese," similar to Simply Natural's original firm Tofu Cheese (unblended, in a block) and sold it in their deli. A guy from West Virginia showed them how to make it. Christina confirms this: A tall, thin bearded man [not Steve Fiering] tasted their Soyalite at Anaheim in April 1988. He said that he or someone he knew had sold a similar product in a firm brick form. But he was never able to develop a good flavor and the product never sold well [See 1988 interview with Steve Fiering]. July 28 update: Nasoya appears to have solved the pasteurization and hot-pack problem. Christina enjoys working with Nasoya, a company with very similar principles and beliefs about food.

Update: 1998 Sept. 20. Christina Pirello now has a cooking and food show on PBS-TV. Her latest book is titled "Cooking the Whole Foods Way." Address: P.O. Box 295 (Evelyn & Gershel Aves.), Norma, New Jersey 08347. Phone: 609-691-5866.

8571. Gleason, Jane E. 1988. Re: Update on developments with soyfoods in Sri Lanka. Letter to William Shurtleff at Soyfoods Center, May 13. 2 p. Typed, with signature.
• ***Summary:*** "I received your letter and packet of material this week. I have asked Hedda Schuurman of Plenty, Canada to look at the questions you have regarding their products." Michael Hope-Simpson, Hedda's husband, conducted the

© Copyright Soyinfo Center 2013

survey and received payment from both INTSOY and Plenty, Canada.

"Enclosed is the last group of survey forms that Michael finished before he left. This should be the last batch and some of your questions, particularly those about MacSoy, may be addressed. Michael did a nice job. He can be contacted c/o Hedda Schuurman, Plenty, Canada Soya Utilization Project, Box 95, Kandy, Sri Lanka."

"About Plenty, Canada: Plenty, Canada is doing what SFRC should have done years ago, that is, putting into operation the soya processing techniques which were developed at SFRC and have been found to fit well into local diets. Here in Sri Lanka, there is a tremendous gap between research and extension, and Plenty, Canada is filling that gap in the area of soya processing. The store in Kandy is highly successful in terms of revenue generation and amount of soyafoods sold. Plenty, Canada is preparing to open another store in Colombo this summer. Ian Taylor, project manager, was considering purchase of an extruder to make instant soya dhal and snack foods. He even went to INTSOY to discuss the possibility (it is a major breakthrough that a Plenty person went to INTSOY). As I was leaving the U.S. just at that time, I do not know whether he chose to buy one.

"Plenty, Canada also has a rural training program geared towards low income groups. I am not too familiar with this, but I invite you to correspond with Hedda Schuurman. She is in charge of that aspect of Plenty's project.

"I have also enclosed the 'End-of-Tour Report' from my ten months of work here in Sri Lanka. It was submitted to USAID/Sri Lanka to fulfill our contract with them. Since then, I have edited it for an INTSOY series book. It should be done by the end of the year."

Color photos show: (1) The inside of the Soya Foods Research Centre with at least 8 people at work in 1988.

(2) A Sri Lankan man making tofu with Plenty Canada at Kandy, 1988.

(3) Some of the soyfoods developed by Plenty and the Soya Foods Research Centre, Kandy, Sri Lanka, 1988.

There are 3 pages of typewritten attachments: (1) Dear Soya Food Producer, from Jane Gleason and Michael Hope-Simpson. Explains the purpose of the survey and how they information collected will be used. (2) Participants in the survey of commercial soya food products in Sri Lanka. Gives the name and address of each manufacturer. Those for which no product name or date of introduction are available are: Maliban Biscuits, 389 Galle Rd., Ratmalana. New Edinborough Products, 19A 5t Lane, Nawala Rd., Rajagiriya. Regal Bakery, Matara. R.M.R. Manufacturers, 14/1 Aponso Ave., Dehiwala.

(3) Soya products produced in Sri Lanka. Lists only the names of the products by product category, but not the manufacturer, address, or date of introduction. Address: c/o V.K. Selleck, 62/12 Halloluwa Road, Kandy, Sri Lanka.

8572. Lyen, Donald. 1988. Brief history of Dragon & Phoenix Ltd. (Interview). *SoyaScan Notes.* May 13. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Donald came to England from Hong Kong during the 1950s to study electronics. He founded Dragon & Phoenix Ltd. in London about 22 years ago (in about 1965-66), in order to make tofu, because he liked it and yearned for it. The original location was at ?? Balse Street, Kings Cross, London N1. Later (when??) it was moved to 172 Pentonville Rd., London N1. He also made mung bean sprouts. In both cases, he developed equipment to mechanize the process. He used a liquidizer/blender instead of the traditional stone mill, and a centrifuge to separate the soymilk. He was a pioneer in this area, before Japanese companies did the same thing. At the time there were no other commercial tofu makers in England. However during the mid- to late 1950s there was a small Chinese-run operation in Liverpool (it had no name, and wasn't really a company) that made and sold very small amounts of very hard tofu, probably coagulated with a nigari-type coagulant, not calcium sulfate. It was very expensive, more than 2 shillings sixpence, so it didn't take off. In about 1978 Dragon & Phoenix began making soymilk and selling it mostly to Chinese

© Copyright Soyinfo Center 2013

restaurants. He notes that there is still not much of a market for it, perhaps because the weather in England is not warm enough for it to be served as a refreshing soft drink.

Today, he is sure that Dragon & Phoenix is still the largest tofu manufacturer in England. Yet the market is very small, and he does not advertise or promote his products. He sells only to Chinese restaurants and food stores, not to the health food trade. One reason for the small demand, he feels, is that tofu has so little flavor of its own; you have to know how to cook it to make it tasty. Dragon & Phoenix is only one of Donald Lyen's many businesses. He is still involved with electronics and is the sole agent for a Chinese word processor in the U.K. He is working to convert his tofu plant from a mechanized to an automated one. He was a founder and is presently a member of the European Soyfoods Association. He feels strongly that tofu should not be promoted as a health food but as a basic food for everyone. "Once you classify it as a health food, then you limit your market." Address: 15-18 White Lyon St., London N1 9PD, London, England. Phone: 01-837-0146.

8573. Rose, Richard. 1988. History of the last years of Brightsong Light Foods (Interview). *SoyaScan Notes.* May 13. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** In June 1980, Richard and Sharon Rose bought Brightsong Tofu from David Patton. A few months later they changed the changed name to Redwood Valley Soyfoods Unlimited

In June 1982 they changed it back to Brightsong Light Foods, when they left Redwood Valley. The tofu was always called Brightsong Tofu.

In 1984 a wealthy Hong Kong industrialist (bottling industry) in his '70s named John Tung, after seeing an article praising Brightsong in Venture magazine, decided to buy into the company. He invested first $333,000, then finally $500,000, buying 80% of the company. The first funds arrived on 31 Dec. 1984. Richard Rose decided to develop a number of new products but to focus his efforts on Le Tofu, a tofu-based non-dairy frozen dessert. Brightsong would manufacture the tofu.

In the fall of 1985 the company dropped its flying bird logo in favor of a bolder blue and orange triangle and shortened its name from Brightsong Light Foods to Brightsong Foods. At the same time it launched its tofu vacuum packed in a red and orange box. During the next year Brightsong received unprecedented media coverage from a barrage of news releases that Richard Rose developed and sent out, some over PR Newswire. This and the many new and innovate products being developed led Food & Beverage Marketing magazine (Dec. 1986) to place Brightsong at the top of its list of the ten leading food innovators of 1986. But as time went on, money flowed out fast. The company got behind on its product development schedule and the non-dairy frozen dessert market changed and soon essentially disappeared. Some of the money went into equipment (assets), but most went into advertising/ marketing and product development, especially for Le Tofu. A major problem was that in the original agreement a U.S. partner of Tung's, who was a Bay Area CPA, was supposed to help Brightsong with finance and accounting expertise; he never did. Midway thru the process, Rose realized and proposed to Tung that he should stop being a manufacturer and focus all of his efforts on product development and marketing. Tung, an industrialist, disagreed. In late 1986 Mr. Tung died. After discussing the matter with the heirs, it was decided in early 1987 that Rose should liquidate everything and send them the cash. By this time he was pretty tired and frustrated anyway.

On 1 June 1987 Brightsong Foods ceased to exist. The Roses resigned, turned the company over to a liquidator to sell off the rest of the equipment, and started a new company named Rose International. They got nothing from the liquidation, and also lost wages and their initial capital investment. Left with virtually nothing, they got unemployment benefits for a while and started brokering NuTofu (a non-dairy soy cheese made by Cemac Foods Corp. of New York, for which they earned $6,200 in commissions–that have never been paid). Rose sued Nu-Tofu. Times were hard. Rose International was to be a product development and marketing company. Their main brand was Sharon's Finest. In 1987 Richard applied to be director of the Soyfoods Association of America, but was not accepted. The future looks good. Address: President, Rose International, P.O. Box 2687, Petaluma, California 94953-2687. Phone: 707-778-7721.

8574. Rose, Richard. 1988. Early history of Brightsong Tofu, Redwood Valley Soyfoods Unlimited, and Brightsong Light Foods (1978-1982) (Interview). *SoyaScan Notes.* May 13. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Joel Brightbill and Bob Heartsong started making tofu at Brightsong Tofu in June 1978, in Redwood Valley, California. Their last names were used to make the company name. Heartsong left after a short time and David Patton came in, taking his place; it was an equity partnership with no employees. The partners did all the work. Then Brightbill sold his interest to Patton.

Richard and Sharon Rose bought the company from Patton in June 1980 and renamed it Redwood Valley Soyfoods Unlimited. In June mid-1982 the Rose's lease ended in Redwood Valley and the landlord planned not to renew it. So the Roses decided to move the business to Petaluma. Patton and Brightbill did not want the Roses to move out of the county; they felt their note was in jeopardy and that the business was a county resource. The day before the Roses were to move, Brightbill, Patton, and a bunch of others entered the shop in the middle of the night, removed all the equipment, and stored it without a perfected security

© Copyright Soyinfo Center 2013

interest. This was illegal, so lawyers came in, negotiated, and the Roses finally got their equipment back and moved to Petaluma. At that time, in June 1982, they renamed the company Brightsong Light Foods. The address was 100-A Poultry St., P.O. Box 2536. Phone: 707-778-8638.

About 6 months later Brightbill started Sweet Whey, essentially in the 10 x 10 foot garage on his ranch. Finally the county shut him down. He had tofu spoilage problems. In Petaluma the Roses business began to grow and prosper. Address: Petaluma, California. Phone: 707-778-7721.

8575. Damien, John. 1988. Soybean dessert product cuts out middleman [cow]. *Sun* (*Jamestown, North Dakota*). May 16.
• ***Summary:*** At the North Dakota Newspaper Convention, samples of Tofulicious, a soybean-based, non-dairy frozen dessert were passed around for taste testing. The North Dakota Soybean Council likes that label and is trying to open a market for Tofulicious in the state. It went over extremely well. The North Dakota Dep. of Agriculture will be helping the soybean council to assess the marketability of Tofulicious, according to Kaye Quanbeck, NDDA marketing specialist. Quanbeck plans to visit the Eastern Foods Corp. manufacturing plant in Minneapolis, Minn., where the dessert is made. If manufacturing officials indicate an interest in developing sales in North Dakota, Quanbeck said she could tap the agriculture department's list of grocery store owners and managers to spread the word. The soybean council would also work with the agriculture department in setting up sample booths at grocery stores in major cities.

In North Dakota, soybean is steadily gaining popularity. Last year, North Dakota farmers grew 490,000 acres of soybeans. Ten years ago there were only 173,000 acres of soybeans. Soybeans are less popular than such major crops as sunflower and wheat.

Note: Talk with Jim Skiff of Minneapolis. 1992. July. Prof. William Breene at the University of Minnesota in St. Paul told him that Eastern Foods no longer makes tofu.

8576. *Beachcomber* (*Vashon, Washington*). 1988. Island Spring Inc. springs back in '88. May 19.
• ***Summary:*** Dollar volume of sales is up 30% since December (for Island Spring Inc.). Plans were upset last fall when a major source of expansion capital withdrew its commitment. It took Lukoskie (company president) and his two dozen employees six months to recover from that blow. Part of the growth strategy now is new products. Part is expanding sales territory. Part is selling stock to augment the investment of 30% stockholders. He attributes much of the increase in sales to Jerry Long, who took over as sales manager. He has first refusal on the huge empty building in front of his 4,000 square foot production plant.

New products and new distribution approaches include trying to get institutional buyers to substitute tofu for up to one third of the hamburger they use. Another growth strategy is to sell combination meat and tofu dinner link-sausages. Soy bean milk yogurt is a third product coming along. About 60% of the company's dollar income is from tofu. Address: Washington.

8577. Burgeson, Travis. 1988. Recent developments at Azumaya: Stir Fruity and tofu (Interview). *SoyaScan Notes.* May 19. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** In making Stir Fruity, the hot ingredients are homogenized then run into the filler. The product sets up in the cup, but it is basically gelled by gelatin upon cooling; there are small amounts of a calcium coagulant but it plays a secondary role. Travis is upset by the way they treat their employees. They basically fired Travis. He and Ron Ishida left because they saw no future in the company for themselves. Bill brought them in to reorganize the management of the company, i.e. to get Jack under control or to get him to step down as president. Travis was in charge of quality control. Jack was unaware of this and he did not want to step down. Jack was in charge of production, but as president he had final say, largely because he was the older brother. He had little appreciation for marketing, which was Bill's forte. Bill saved the company at the time they expanded into their current building by developing contacts with top Safeway produce people. The key is who you know.

Jack stepped down in late 1985 or early 1986. His son, Bruce, became production manager. Bill's daughter, Jill, is in sales and marketing. Bill would be president and Ron CEO. Travis was production manager for the next 6 months, and he installed quality control measures that increased shelf life. But then Bill's wife, Dorothy, the bookkeeper, threatened to leave him if he let the reorganization go through. She was paranoid. This showdown was in Nov-Dec. 1986. The restructuring–reorganization never happened. At that point the top consultant left. Bill brought in a top level consultant and he initiated discussions with Kraft about Kraft's licensing Stir Fruity, but it fell through. All agreed to withdraw Stir Fruity, but they kept making it for the Air Force commissary in Travis Air Force Base and a few other local places. Bill had freaked and gone to Hawaii. They had to cut back. They considered it Travis' fault. So he left in late May or early June 1987, and shortly thereafter Ron Ishida left. That year they didn't lose money, despite Stir Fruity. The ad guy who developed the ads ate $10,000 of production expenses and never got paid for his time. Now they sell quite a bit of Stir Fruity in Hawaii and Massachusetts. They put preservatives in all Stir Fruity now. They may not be listed on the label. Azumaya's biggest accounts are Safeway, Lucky, Kroger, Stop & Shop, and Gemco.

Travis has never heard of cash payoffs to produce people. It may be more subtle, such as gift giving, entry to Olympic Club to play golf, wine and dine them, gifts of wine, entertainment. Azumaya was very scared of Morinaga,

© Copyright Soyinfo Center 2013

since Morinaga was the first company to make inroads into Safeway; their broker sold tofu very cheaply. Connections are everything for brokers. You buy your way onto the shelf; slotting allowances, paid above board to the company. Having a good product is not nearly enough. Bill had such high level contacts that he could get Stir Fruity into the dairy case without paying any slotting allowances. You may be able to do it if you have a very strong advertising and promotional allowance.

Azumaya has never made much money. Maybe 2-3% of sales is profit. They have thought seriously about setting up an East Coast tofu plant, but the company is very short on business/management skills.

Most of the time Travis was there, Hinode (Hinoichi) had higher tofu production volume. Then Hinode started losing lots of business to small Chinese companies. The four Azumaya brothers: George is the oldest. Jack is #2, but he got out some time ago. John is #3. He doesn't do much, makes fresh konnyaku. Bill is the youngest. Dorothy feels that Shurtleff came into the company, learned a lot, then published it in his books. He ripped us off for all this information. Dorothy harbors a grudge. Bill Mizono will always be polite. He will never say something unpleasant directly to a person. Address: Central Health Network. Phone: 415-763-9785 (HM) or 548-6769 (OF).

8578. Layton, Lyndsey. 1988. Pass the mustard: Meatless franks spice of life for Greenfield firm. *Recorder* (*Greenfield, Massachusetts*). May 20. p. 21, 25.
• ***Summary:*** Introduced in 1985, Tofu Pups are meatless frankfurters made from tofu without nitrates, preservatives or cholesterol. Owners of Lightlife Foods Inc., formerly known as Tempeh Works, believe the soybean creation is on the verge of becoming a national hit. "It's an alternative to red meat that is low-calorie, low-sodium, has no cholesterol or preservatives, which is what more and more people in this country are looking for," says Michael Cohen, founder of Tempeh Works. Lightlife's sales figures confirm Cohen's optimism. The first year on the market, sales of Tofu Pups were $230,000. The next year, sales jumped to $405,000–a 76% increase. Executives expect 1988 to be the first year combined tofu and tempeh sales top $1 million, at an annual growth rate of about 40%. To keep pace with an expanding market, Lightlife wants to double the size of its 6000-square-foot Fairview Street factory in an ambitious $730,000 expansion plan.

In 1983, the operation moved from an old gas station on French King Highway to its current Fairview Street plant. To finance this transition and buy some new machinery, the company borrowed heavily from Shawmut Bank and fell into the red for the next three years. "We went from having $3000 in interest payments to $35,000," says Cohen. In the Northeast the tofu franks are also sold in supermarket chains such as Stop & Shop, Purity Supreme, Finast and Big Y. The firm now has 15 full-time employees.

At present Lightlife produces the flavoring, which Cohen calls the Tofu Pups "soul". The other food processor blends the flavoring with tofu and stuffs it into casings. If things go as planned, Lightlife will make its own Tofu Pups from scratch once the company expands its plant. But the Tofu Pups cost more than their traditional counterparts–$2.49 to $2.99 for a 16-ounce package of 10 tofu franks. Meat wieners typically cost $1.49 to $2.39. A photo shows Chia Collins and Michael Cohen of Lightlife.

Tomsun International recently declared bankruptcy. They tried to grow too quickly and couldn't keep up with demand for Jofu [a yogurt alternative made from tofu]. Address: Recorder staff.

8579. *Graphic* (*Brooklyn, New York*). 1988. The "scoop" on David Mintz, the father of Tofutti. May 25.
• ***Summary:*** David Mintz, a successful kosher caterer from Brooklyn, never believed tofu could change his life, but it has. In 1972, while searching for a milk substitute for kosher desserts, pastries, pies and sauces, he discovered tofu. In 1981, he introduced Tofutti ice cream to the world. More than 38,000 outlets in all 50 states–including supermarkets, health food stores, groceries, gourmet shops and department stores–carry the product. Tofutti is also available in Canada, Japan, Australia, Korea, Hong Kong, and the U.S. Virgin Islands.

8580. Hattori, Terumitsu. 1988. Status and future plans for Kikkoman's new tofu (Interview). *SoyaScan Notes.* May 25. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Kikkoman's aseptic tofu was relaunched in a new package, in firm and soft textures, in August 1987. It is made in and imported from Japan, and is being distributed in America by Azumaya. It is selling so fast that Kikkoman can't import enough to keep up with demand. The person in charge of the product is in Japan; there is no such person in America. If and when sales reach a certain level, Kikkoman will begin to study the possibility of a new plant in the USA. Address: Kikkoman Marketing & Planning Inc., 50 California St., Suite 3600, San Francisco, CA 94111. Phone: 415-956-7750.

8581. Brandel, Amy Jo. 1988. Minnesota soybeans go to Japan for tofu: Growers eye permanent market for production. *Agri News* (*Rochester, Minnesota*). May 26.
• ***Summary:*** Southwest Trading, Ltd. and other members of the Worthington-based, non-profit agricultural product marketing group are filling Japanese tofu manufacturers needs with a locally grown soybean variety. Last week, 25,000 bushels of southwestern Minnesota and northeastern Iowa soybeans headed for Japan. Farmers received 37½ cents a bushel over May 2 local prices for a total of $6.89 cents a bushel, said Jim Wychor of Southwest Trading, Ltd.

© Copyright Soyinfo Center 2013

The soybeans are imperfect hilums. That means the tiny black dot where seeds and pods attach is nonexistent. The variety also has a high protein content. Once in Japan, the soybeans go to many small tofu manufacturers. Each firm uses only about 300 pounds weekly, but there are over 7,000 such facilities in Tokyo alone. Address: Minnesota.

8582. Arocena, Javier. 1988. [Re: Brief history of soyfoods manufacturing company Zuaitzo]. Letter to William Shurtleff at Soyfoods Center, May 27. 2 p. Typed, with signature on letterhead. [Spa; eng+]

• ***Summary:*** "In 1982, we started working on a family production level and in 1984 on an industrial one. We started selling tofu and seitan in March of 1984 and tempeh in Nov. of 1987. We also produced tofu and Seitan Burgers and tempeh pâté, both in Nov. of 1987, though not as much was sold. A brief history: We opened a store in Vitoria-Gasteiz and manufactured a great variety of products, including tofu and seitan. I learned how to make tofu in France with Dominique Lagadec and how to make seitan in Barcelona. A key moment in my story was in beginning to use vacuum packaging, as before products were sealed in sanitary, plastic water containers, 15 cm wide, 30 cm long, and 20 cm tall. With the vacuum packaging and further pasteurization, I was able to respond to the challenge of increasing the life of the product and expand the radius of my commercial activities.

"It is important to point out, looking ahead, that manufacturers with an investment of 250,000 pesetas can compete in the market with the advantage that you work unhampered by bank charges. You make a pan of 180 liters with a 2 meter by 1 meter stainless steel plate, fired with domestic butane gas and heat diffusers, a second hand deep sink, and as a mill, one used for cereal groats to which you adapt a motor using a washing machine pulley. Last and most expensive, a second hand vacuum machine from the many companies who reject them in exchange for newer technologies.

"Since I have always worked alone with my wife and daughter, I set the price of tofu and seitan at 860 pesetas per kilogram in the beginning. Later on, with more sales and no competition in all of Spain, I lowered the price to 700 pesetas per kilogram–its current price–offering paid freight in next day deliveries, gathering and crediting any old material (month and a half old or spoiled by any other cause). The successful introduction of the products was due to the fact that the work was done in the same location from which it was sold. But above all, it has been a success with those who are ill; one local doctor here in Vitoria is prescribing it! I have also given cooking classes over the past several years. At the same time, I personally do all the deliveries in the city and its surroundings. In other big cities, I have distributors who carry other products besides mine. In the long run I have been successful and today I ask myself if I should lower the prices, especially with the tofu. Tempeh had a better price from the beginning; everything going very smoothly. I set the price at 220 pesetas for a 275 gm jar of tempeh.

"Nonetheless, the social commitment is large and with the profits I have purchased a shop that carries chemical-free products. My cooking classes are free and I am encouraging soy agriculture in the region."

Note: The original of this letter is typewritten in Spanish with Javier's signature. Someone has done a three page handwritten translation, which is included. Address: Zuaitzo, Correria, 39–01001 Vitoria-Gasteiz, Spain. Phone: 945/28 86 30.

8583. Creces, Henry. 1988. History of Panda Sprouts Inc. and new developments (Interview). *SoyaScan Notes.* May 27 and Aug. 29. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Henry's brother, Eddy, bought the company from Hal Siegel in Oct. 1987. In May 1988 Panda Sprouts was making 15,000 lb/week of tofu. It had been in Woodside, New York, but Hal moved it to 1321 Oakpoint Ave., The Bronx, NY 10474. He is now in the process of moving the company to larger quarters in Goshen, New York. The company used to be named Panda Foods but Hal renamed it Panda Sprouts Inc. They make alfalfa sprouts and tofu, just as Hal did. Whatever Hal produced he sold to Coosemans, his only customer. They sold all his products. Finally he went bankrupt and Henry's brother bought him out. Henry comes from Belgium, where he worked for Coosemans Inc., a wholesale import-export company. They began operations in the USA in Los Angeles in 1982 and he came to this country in 1983, when he started to work for Coosemans LA. In February he started to run Panda Sprouts. He is now a partner.

In about May or June, Panda Sprouts started to make the packaged and bulk tofu for Tomsun Foods, but not for Jofu. Henry thinks that Tomsun sold Jofu to a dairy company in Vermont, or is having it made there. Tomsun had been in trouble for quite a while and had lost a lot of customers before they contacted Panda. Panda took over a lot of their equipment, which was in bad shape–and still is. Now they are struggling to get those customers back. Nasoya picked up many of them. Henry's goal is to be the top tofu manufacturer on the East Coast. Coosemans Specialties (in New York) sells much of his tofu but not all; Henry sells most of the bulk tofu. Address: 168 Pulaski Hwy., Goshen, New York 10924. Phone: 914-651-4490.

8584. Hoesl, Cornelia. 1988. Am Tofu finden viele Geschmack: Klaus Kempff und seine Mitarbeiter produzieren im Monat eine Tonne Sojabohnenpaste. Ein exotischer Eiweissbrei wird populaer [Many like the taste of tofu: Klaus Kempff and his co-workers make one metric ton of this soybean paste each month. An exotic protein source becomes popular]. *Stadtmagazin* (*Freiburg, Germany*). May

27. No. 121. Friday. [Ger]

• ***Summary:*** Healthy foods are now the trend–including at the University of Freiburg. Tofu, which is made from soybeans, is said to be easy to digest, free of cholesterol, low in calories and rich in protein. So it is no surprise that this quark-like food, which was largely unknown a few years ago, is now found in the dining rooms of large hotels and in foodservice locations.

Klaus Kempff is the sole owner / proprietor of a Tofu shop ("Tofurei") in Freiburg; he guesses that there are a total of 7-8 tofu shops in all of Germany. Three times a week Klaus Kempff and his two trusty co-workers make tofu. The work starts at 6:00 in the morning. On the previous evening they started soaking the golden-yellow soybeans. The first step in the morning is to drain the beans and then grind them to a fine paste with fresh water. Then begins a strenuous process. With beads of sweat on his forehead, Klaus stands in front of a large caldron stirring the puree as it comes to a boil. Steam rises and it is hot. From time to time he takes a bucket, scoops the cooked puree into a sack and presses it. Out comes a milky liquid, which flows down into the curding vat. When he adds a salt; the milky substance separates into curds and whey. He scoops the curds into a forming box and presses them to make tofu. Half an hour later in gently empties the block of tofu, which is about 10 cm thick, into a basin of cool water. Then he cuts it into 1 km cakes, and when it is well cooled he delivers it.

Klaus Kempff learned how to make tofu in the United States. In Japan there are as many tofu shops as there are butcher shops in Germany. After returning to Germany, Klaus Kempff began to experiment with tofu, first in a cellar, then for the last two years in a shop on Stühlinger Strasse (Stuehlinger Street). [Note: The exact address is Stühlinger Strasse 9, D-7800 Freiburg, West Germany] He recalls that he began by making 5 kg of tofu a day; he now makes 1,000 kg per month. Shortly, when his shop outgrows its space on Stühlinger street, he hopes to move into an industrial park. In addition to tofu, he also makes sprouts.

A large photo shows Klaus Kempff, dressed in white, making tofu. In front of him is a white tile wall, to which is attached a hand-turned press. Various tools for making tofu (ladle, dipper, stirring paddle) also hang on the wall. In front of him is a curding barrel.

8585. Menie, Tom. 1988. Eastern Foods Corp. and Mr. Lee R. Lee's resignation in April (Interview). *SoyaScan Notes.* May 27. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Mr. Lee resigned as the head of the company at the end of April and is now probably involved in his new venture of importing natural foods from Korea. He still owns stock in the company and is still on the board. The company was in bad financial shape at the time. The corporation is owned by its stockholders. He and his brother in law owned a controlling interest, but with some options on the company's last stock offering, some other people ended up controlling the company. Now, Tom is handling the sales and marketing duties and Warren Thunstrom is handling

© Copyright Soyinfo Center 2013

production. The company is planning a stock offering in the near future and has many innovative food ideas on the drawing boards.

Tom says he heard from someone and read in some publication a figure of $50 million projected for retail sales of Kikkoman's tofu in 1988. William Shurtleff believes that this figure at least 5 times too high. Address: Sales and Marketing Manager, Eastern Foods Corp., 3225 Hennepin Ave., Minneapolis, Minnesota 55413. Phone: 612-331-3353.

8586. *Los Angeles Times.* 1988. Healthy option: Seniors try Mori-Nu tofu at expo. May 28.
• ***Summary:*** Along with the longer life expectancy for Americans–experts predict that in just 12 years half the U.S. will be over age 50–has come a larger emphasis on good health for seniors. Thousands of health-conscious citizens learned how to incorporate tofu–one of the most versatile, cholesterol-free, low-fat foods available to them today–into everyday recipes recently at the Los Angeles Time of Your Life Expo, which attracted more than 44,000 people. Seniors sampled a tasty, protein-rich, strawberry shake made from strawberries and tofu. Mori-Nu also presented a series of cooking demonstrations–"The Art of Cooking With Tofu"–that gave 450 seniors a chance to learn to create pies, fruit shakes and sweet spreads for toast during the 3-day expo. "Tofu is the miracle food for the over-50 population," said Danielle Lin, marketing consultant for Mori-Nu Tofu and host of the first cooking demonstration. Danielle, hostess of a Los Angeles radio talk show, has been promoting soyfoods for nearly a decade. Address: California.

8587. *Spectator* (*Carmi, Illinois*). 1988. Californian would like to buy local soybeans. May 28.
• ***Summary:*** Jerry Ridenour, a Californian who wants White County to think about producing soybeans without chemical fertilizers or pesticides so that he can purchase the organically-grown beans for his natural foods business. While visiting Crossville, Illinois, he intends to talk with some farmers about the proposal. Ridenour's company, "Wildwood Natural Foods," makes meat-like products from tofu, soymilk, and wheat gluten, such as tofuburgers, meatless meatballs, and lactose-free soymilk. Other items made from tofu include tofu hot dogs, tofu jerky, soymilk yogurt, lactose-free tofu chocolate, etc. The business currently uses about 48-50,000 pounds of soybeans per month.

8588. Bramson, Constance Y. 1988. It looks like chocolate, tastes like chocolate but it isn't; it's healthier. *Patriot-News* (*Harrisburg, Pennsylvania*). May 29.
• ***Summary:*** "If chocolate is your passion, then Chandri and Gary Barat want it to be a healthy passion." Discusses the development of Barat Tofu Chocolate. "Our products are for the healthy gourmet; you can eat them without guilt."

8589. **Product Name:** [Tofu Patties (Carrot, Mushroom, Tomato, and Garlic & Fines Herbes)].
Foreign Name: Médaillon de Soja (Aux Carottes, Aux Champignons, Aux Tomates, à l'Ail et aux Fines Herbes).
Manufacturer's Name: Cacoja. Affiliate of Coopérative Agricole de Colmar (CAC) (Marketer).
Manufacturer's Address: 8 rue Merxheim, 68500 Issenheim, France.
Date of Introduction: 1988. May.
Wt/Vol., Packaging, Price: 2 x 125 gm vacuum pack.
How Stored: Refrigerated.
New Product–Documentation: Tjomb. 1990. Revue des Industries Agro-Alimentaires. 14 May to June 5.

Letter from Sylvain Stievenard of Sojinal (named Cacoja prior to Aug. 1990). 1990. Sept. 24. "Médaillon de soja" was introduced in May 1988.

8590. **Product Name:** [Tofu Egg Rolls].
Manufacturer's Name: Jerusalem Tofu.
Manufacturer's Address: Moshav Orah, Jerusalem 90880, Israel. Phone: 02-413-809.
Date of Introduction: 1988. May.
New Product–Documentation: Talk with Susan Ergas. 1989. May 1. These were launched in April or May of 1988, after Passover.

8591. Kotzsch, Ronald E. 1988. Soyfoods; A growing industry is revolutionizing the way Americans eat (Special Advertising Supplement). *East West.* May. p. 1A-11A. Also in Vegetarian Times. May. p. 49-59.
• ***Summary:*** A well-done "advertorial" as part of America's first Soyfoods Month. Sponsored by Nasoya, Morinaga, Legume, Simply Natural, Vitasoy USA, Westbrae Natural, and Farm Foods. Each company also ran an ad in this section. Henry Ford played a key role in introducing Americans to soyfoods as with his 16-course meal at the 1934 World's Fair. Interest remained strong through World War II, then dissipated quickly. By the time Ford died in 1947, soyfoods were all but forgotten. Interest was revived and advanced from the mid-1970s on by Shurtleff and Aoyagi of the Soyfoods Center in California. Today through the efforts of many growing companies, the industry is booming.

8592. Leneman, Leah. 1988. Top marks for tofu. *Health Today* (*UK*). April/May. p. 2.
• ***Summary:*** Contains six recipes, some using Morinaga Silken Tofu. Address: 19 Leamington Terrace, Edinburgh EH10 4JP, Scotland.

8593. Morinaga Nutritional Foods, Inc. 1988. Shake off cholesterol: With the prefect blend of Mori-Nu and your favorite fruit (Tear-off recipe pad). 2050 W. 190th St., Suite

110, Torrance, California 90504.
• ***Summary:*** This color tear-off recipe pad (6½ by 4 inches), developed by Susan Bucher of Bucher & Russell in Los Angeles, was introduced in May 1988. On the front is a color photo of a strawberry shake and a package of Mori-Nu Silken Soft Tofu, surrounded by strawberries, a cut pineapple and other fresh fruit. On the back are 2 recipes (Mori-Nu's Wake-Up Shake, Tangy Orange Cinnamon Custard) and "Mori-Nu Tofu Facts." Address: Torrance, California. Phone: 1-800-669-8638.

8594. Murata, Katsumi; Kusakabe, I.; Kobayashi, H.; Kiuchi, H.; Murakami, K. 1988. Functional properties of three soymilk curds prepared with an enzyme, calcium salt and acid. *Agricultural and Biological Chemistry* 52(5):1135-39. May. [15 ref. Eng]
• ***Summary:*** Soybean curds prepared with an enzyme showed high emulsion stability over a wide range of pH (2-10) and temperature (20-80ºC) whereas calcium–and acid curds were stable only at pH 4-6, and temperature greater than 40ºC. Though foam stability of each curd was low, the enzyme-curd had higher values than others over wide pH and temperature range. Lyophilised enzyme-curd showed higher solubility in water than others, although its water-holding capacity was lower than the others. No gelation was observed in any of the soymilk curds. These results indicate the high potential enzyme-curd has over the others in application to various kinds of food products. Address: 1&4. Research Development Section, Kibun Food Chemifa Co. Ltd., 2-5 Shinbashi 3-chome, Minato-ku, Tokyo 105; 2,3&5. Inst. of Applied Biochemistry, Univ. of Tsukuba, Tennohdai 1-chome, Tsukuba-shi, Ibakari 305. All: Japan.

8595. **Product Name:** Nasoya Vegi Dressing [Sesame Garlic, Creamy Dill, Garden Herb, or Italian].
Manufacturer's Name: Nasoya Foods, Ltd.
Manufacturer's Address: 23 Jytek Park (P.O. Box 841), Leominster, MA 01453. Phone: 617-537-0713.
Date of Introduction: 1988. May.
Wt/Vol., Packaging, Price: Glass jar.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: Talk with Sjon Welters. 1988. March 10. This is a repositioning of their former Creamy Tofu Dressings with the focus on "100% cholesterol free." Should be out by May. Talk with John Paino. 1988. July. Nasoya hopes to go national with their dressings by October.

Spot in Whole Foods. 1990. Jan. p. 70. "Get dressed." A photo shows the bottles with 4 flavors. All have a 9-month shelf life.

Secy.), Federation of Japan Natto Manufacturers Cooperative Society (Mr. Ohse), Takano Foods Co. Ltd. (E. Takano, president, uses 7,000 to 8,000 tonnes of soybeans annually to make natto), Home Foods Co. Ltd (Home Shokuhin, Y. Murai. managing director, has 160 employees and 3 tofu factories that use 300 tonnes of soybeans/month; owned by Wako Shokuryo, the #1 wholesaler of soybeans in Japan), Japan Oilseed Processors Assoc. (JOPA; H. Higashimori, managing director). Japan Oil and Fat Importers & Exporters Assoc. (JOFIEA; I. Shimizu, exec. director), Canadian Embassy, Tokyo.

Hong Kong. Soybean imports. Visits: The Hong Kong Soya-Bean Products Co. Ltd. (makers of Vitasoy soymilk), Amoy Industries (International) Ltd.

Malaysia. Soybean imports 1984, 1985, 1986. Visits: Ace Canning (owned by Lam Soon). Yeo Hiap Seng (Malaysia) Berhad (soymilk), Cheong Chuan (Hup Kee) Sdn. Bhd. (traditional fermented soysauce), Sin Yong Huat Enterprises Sdn. Bhd. (soybean importers), Syarikat Perniagaan Cheon Fatt (tofu manufacturer).

Singapore. Soybean imports (1983-1986). Visits: Sin Seng Lee Trading Co. (Pte.) Ltd. (claims to import 60% of soybeans to Singapore). Conclusions for each country. Recommendations for future action. Future export development missions. Accomplishments. Competition.

In Japan, 842,000 tonnes soybeans are used to make foods, as follows (in tonnes, p. 1): Tofu 456,000, miso 180,000, natto 90,000, dried-frozen tofu 30,000, boiled soybeans 23,000, soybean powder [probably kinako] 10,000, soymilk, 7,000, soysauce 5,000, other 41,000. The suppliers of these edible soybeans are (in tonnes): USA 400,000, China 280,000, Japanese domestic 280,000, Canada 24,000. Total Japanese soybean imports: 5,000,000 tonnes. Of this 4,036,000 tonnes (81%) are used for crushing, 842,000 tonnes for food, and 70,000 tonnes for feed (not crushed). The Japanese market for soybeans is very large for both crushing and food use, but is not growing. The beans for crushing come mostly from the USA and South America.

Preferred characteristics of soybeans for each type of soyfood are given. For example, for miso: Low oil, high protein, high sugar, white hilum. For tofu: High sugars (glucose, sucrose), moisture content 10-12.5%, new crop preferred to old, protein 40%, oil 19-20%, hilum color is not very important but white is preferred, varietal consistency; preferred varieties are Beeson, Amsoy, Corsoy. Natto: Most important is small size, 5.5 mm or less, clean beans free of foreign material, high sugar content (saccharose, stachyose, which bacillus needs to work), less oil, must absorb water well. Soymilk: Good flavor, low moisture (10%), low percentage of splits (too high can cause rancidity), low oil, high protein.

In Japan, vegetable oil consumption has increased 2.5 times in the past 20 years to 45.17 gm/capita/day in 1986. Soyoil and canola oil together account for 85% of production. Canola is replacing soybean oil. If the oil market is strong, the 30 Japanese crushers crush more canola, but if protein is strong they crush more soybeans. U.S. soybeans have too much foreign material; new contracts have a penalty for > 2% FM.

In Hong Kong, 6,000,000 cases of Vitasoy brand soymilk are produced annually. The company uses 2,500 tonnes/year of soybeans, 80% of which are grown in Canada. It uses 100 to 200 tonnes of organic soybeans for Vitasoy exported to U.S. health food stores. Using 15 Tetra Pak machines, production takes place 24 hours/day (3 shifts), 6 days a week. Contacts: Patrick Cheung (marketing manager), and Raymond Yuen (commercial manager).

Amoy Industries, the largest maker of soy sauce in this part of the world, produces 6,000 tonnes/year. The company was established 80 years ago in Amoy, eastern China, moved to Hong Kong in 1949; 50% was purchased by Pillsbury in 1983. Uses 2 containers of soybeans/week, 100% from Ontario for the past 5 years.

Malaysia soybean imports rose from 174,400 tonnes in 1984 to 255,200 tonnes in 1986. The main suppliers in 1986 were China (56.2% of total), Vietnam (15.8%), and Argentina (14.3%). Ace Canning uses ton tonnes/month of soybeans (presently all from China) to make soymilk. They have 7 Tetra Pak machines. Yeo Hiap Seng (Malaysia) is the largest soymilk producer in Malaysia, making 25,000 liters/year using 9 Tetra Pak machines. They use 1,250 tonnes of soybeans (80 containers) per year, all Canadian.

In Singapore, soybean imports rose from 28,287 tonnes in 1983 to 41,571 tonnes in 1986. In 1986, some 66% came from Canada, 16.6% from China, and the rest from others.

The major competition for food quality soybeans in these four countries at present comes from China. The Chinese have improved their soybean quality and appear to be actively seeking to increase their market share. In the long run, however, China may choose to reduce its soybean exports in order to increase meat consumption in China. This could lead to new market opportunities for Canada in these four countries. Address: P.O. Box 1199, Chatham, ONT N7M 5L8, Canada. Phone: 519-352-7730.

8597. *Orenji peiji* (*Orange Page*). 1988. Tôfu no okazu. Tegaru de herushii [Recipes for tofu side dishes. Quick and healthy]. May. p. 8-14. [Jap]

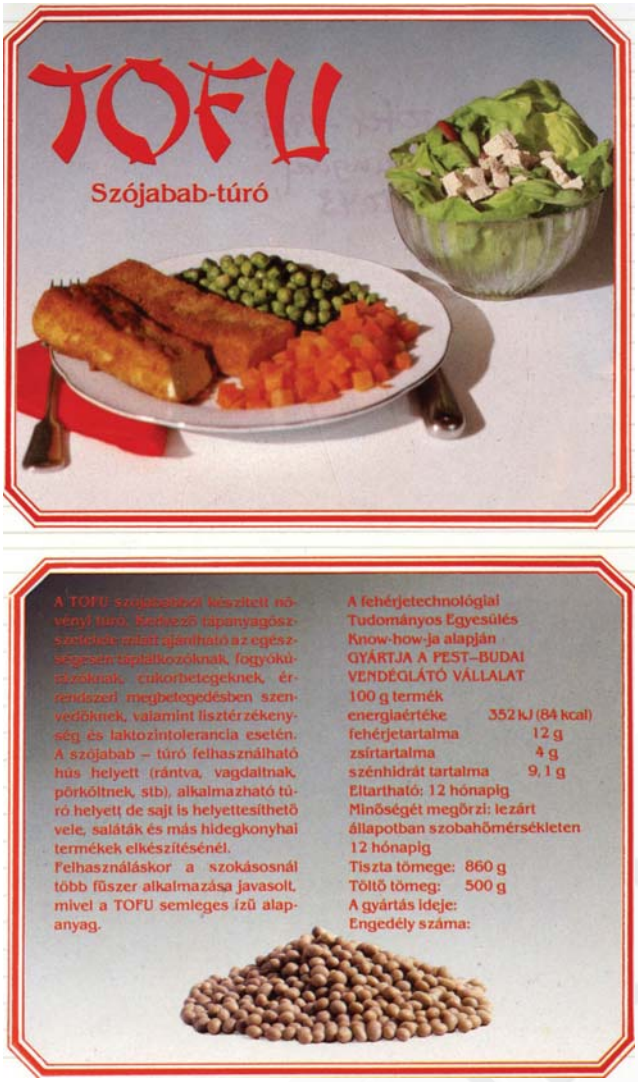
8598. **Product Name:** [Tofu].
Foreign Name: Tofu: Szojabab-turo.
Manufacturer's Name: Pest-Budai Vendeglato-Ipari Vallalat. Renamed Interprotein Ltd. by Feb. 1992.
Manufacturer's Address: Fortuna u. 4, H-1014 Budapest,

© Copyright Soyinfo Center 2013



Hungary. Phone: 155-52-02.
Date of Introduction: 1988. May.
Wt/Vol., Packaging, Price: 300 gm vacuum pack.
New Product–Documentation: Doborjan and Goenczi. 1989. Eteleink szojaval [Our soy foods]. A full-page ad on page 47 notes: "The food unit of the Pest-Budai Catering Service offers you tofu, a soybean curd."

Letter from Dr. Laszlo Bodis, Director of Feherjetechnologiai Tudomanyos Termelesi Egyesules in Budapest, Hungary. 1989. Dec. 13.

Letter from Dr. Laszlo Bodis. 1990. April 2. This tofu, introduced in May 1988, was developed by FTTE, which is an "engineering, research, and development enterprise rather than a manufacturing one. Technologies worked out by our technicians for producing feed and food products are then tried and used by companies producing food or feeds. Thus in the introduction and spread of tofu, we did all the initial work (conceiving the idea, drawing up the technology, sizing up demand, 'digging out' consumption, etc.) except for direct manufacturing. That is done by Pest-Budai."

Letter from Kinga Doborján, head of project. 1992. Feb. 2. The name and address of the company have changed to: Interprotein Ltd., Pf. [P.O. Box] 340, XII. Goldmark Károly utca 3, 1536 Budapest, Hungary. Phone: 155-1619. On the letterhead, beside the company name is written: fehérje és biotechnológiai kft. Prior to Jan. 1992 the company was an engineering, research, and development firm; they did not do any direct manufacturing. In 1991 they purchased a W30A tofu production line from Takai in Japan. They are now making tofu, with the first goal of making 150 kg/day, eventually increasing to 300 kg/day. They are now producing firm tofu, but they want to introduce a flavored tofu, seasoned with typical Hungarian spices. They sell to vegetarians, and are hoping to reach hospitals and school catering services as well. Eventually they hope to export tofu. Presently the 300 gm vacuum packed cakes contain 4 tofu recipes behind the label. "We think that now we may consider ourselves as the pioneers in producing tofu in Hungary in a larger amount."

During 1993-94 Mrs. Szuzsanna Rak of this company purchased modern tofu production equipment from Takai in Japan; the address is given as Interprotein fehérje és biotechnológiai kft., 1095 Budapest, Soroksari ut 58, Hungary.

8599. **Product Name:** Tofu Made Simple [Tofu Kit].
Manufacturer's Name: Pine Tree Cottage Industries.
Manufacturer's Address: Hayfork, California. Phone: 916-628-4303.
Date of Introduction: 1988. May.
New Product–Documentation: Call from Nicola Walker, P.O. Box 1285, Hayfork, California 96041. 1998. May 30. She and her husband, Randall, who were vegetarians and have been married for 20 years, were looking for a new source of income. Nicola came up with the idea for a tofu kit, her husband improved on some existing designs, they made the kits at home together, and sold the first one on 1 May 1988. Their kit is larger than some; it will hold the tofu from 2½ cups of soybeans. The kit contains an 8-page booklet (copyright 1988) titled "Tofu Made Simple: A New Method of Making Fresh Tofu Quickly and Easily at Home." Booklet, photos of kit, and letter sent by Nicola Walker. 1998. June 2. They would like to sell their tofu kit on the Internet–for $32.00 plus $4.50 postage. It includes a pressing cloth, forming cloth, and 3 oz of nigari.

8600. *Plenty Canada News* (*Lanark, Ontario, Canada*). 1988. Caribbean conference [held by Plenty Canada on soyfoods]. Spring. p. 5.
• ***Summary:*** Plenty Canada's Soybean, Agricultural & Soy Processing Conference was held in the Commonwealth of Dominica from Oct. 27 to 30, 1987. The workshop/seminar had three major objectives: 1. To identify the major areas of success and problems in implementing Agriculture and

© Copyright Soyinfo Center 2013

Soy processing programmes in the Caribbean region and Guatemala. 2. To seek solutions for these problems. 3. To foster more direct and continuing communication among the participants and their colleagues in the four different countries. The St. Lucian Soy Technician demonstrated the use of sea water as a curding agent [for tofu] instead of calcium sulphate or magnesium sulphate which has to be imported. The conference was attended by at least 11 delegates from Plenty Canada's projects in St. Lucia, Jamaica and Guatemala. A photo shows the 11 attendees. Address: R.R. 3, Lanark, ONT, Canada KOG 1KO.

8601. Quong Hop & Co. 1988. The Soy Deli. Nutrition, value, and variety make soy deli a great buy (Ad). *Vegetarian Times.* May. p. 73.
• ***Summary:*** Includes a photo of products.

This ad also appeared in the July issue (p. 18) and in the October issue (p. 36). Address: 161 Beacon St., South San Francisco, California 94080. Phone: 415-761-2022.

8602. *Seikatsu Benri, Orenji Peji* (*Convenient Life, Orange Page*). 1988. Tôfu no okazu [Tofu side dishes]. May. [Jap]*
• ***Summary:*** According to Toyo Shinpo (1 May 1988, p. 4), the entire May issue (¥200) was devoted to easy and healthy tofu cooking, including both Western and Chinese-style recipes. The magazine is published by Orange Page, Inc.

8603. **Product Name:** [Tofinelle Tofu Sausages {Soya Mousseline with Capers} (Boletus Mushrooms, Paprika, Emmenthal, Smoked Salmon)].
Foreign Name: Tofinelle: Saucisses/Quenelles au Tofou (Cèpes, Paprika, Emmenthal, Saumon).
Manufacturer's Name: SOY (Société Soy).
Manufacturer's Address: 1 rue du Crêt de la Perdrix, 42400 Saint-Chamond, France. Phone: 77.31.24.42.
Date of Introduction: 1988. May.
Ingredients: Smoked salmon: Tofu (water, soybeans*) 72%, smoked salmon 15%, sunflowerseed oil, egg white, wheat flour, spices, salt. * = Organically grown.
Wt/Vol., Packaging, Price: 2 x 100 gm in vacuum pack.
How Stored: Refrigerated.
Nutrition: Per 100 gm.: Protein 14.4 gm, fat 11.7 gm, carbohydrates 3.6 gm, calories 100.
New Product–Documentation: Leaflet. 1988. Front and back. 6 panels. "These savory and light Tofinelles have a texture like and are eaten like "quenelles," reheated in the frying pan or oven, accompanied by a sauce of your choice."

Note: Cassell's French-English Dictionary defines quenelle as "forcemeat or fish ball." Letter from Bernard Storup. 1989. March 3. These products were all launched in 1988, the Boletus mushrooms in May, the Paprika and Emmenthal in July, and the Salmon in Dec. Two other flavors were launched in early 1989.

Labels sent by Bernard. 1989. April. Smoked Salmon. 3.75 by 7.75 inches. Blue, red, green, and gold on white. Background illustration of a jumping blue salmon. "Remove the protective film at the level of the clip. Reheat the Tofinelle for 7-8 minutes in a skillet or oven. Serve with or without a sauce, accompanied by vegetables and whole grains for a delicious meal." Nature et Progres logo.

8604. **Product Name:** Virginia Soyworks Tofu, and Tofu Spread.
Manufacturer's Name: Virginia Soyworks.
Manufacturer's Address: Route 1, Box 193, Faber, VA 22938. Phone: 804-293-9244.
Date of Introduction: 1988. May.
Ingredients: Spread: Tofu (water, soybeans, magnesium chloride), soybean pomace [okara], mustard (vinegar, mustard seed, salt, turmeric, spices), celery, soysauce (water, soybeans, wheat, salt), green peppers, onion, garlic, spices.
Wt/Vol., Packaging, Price: Tofu: 16 oz. Spread: 8 oz.
How Stored: Refrigerated.
New Product–Documentation: Note: This company, founded in about May 1978, was originally named Redbud Creek Tofu Co., at Route 2, Box 505, Crozet (pronounced kro-ZAY), VA 22932. On 2 April 1987, owner Shag Kiefer sold the company to Robert Graham. In the spring of 1988, with Shag's help, Graham moved the company to its present location, Route 1, Faber, Virginia.

Talk with Ken Scotton, owner of Virginia Soyworks. 1990. Sept. 2. He bought this tofu company in March 1989 from Robert Graham. He still makes only two soy products, Tofu and Tofu Spread (plus very little soymilk sold unlabeled directly from the shop), but he also makes two non-soy bean dips and a burrito with a black bean filling. He lives at the shop and is burned out from working 60 hours/week. He hopes to sell the shop to the Twin Oaks Community (Route 4, Box 169, Louisa, VA 23093), located 70 miles away, where he lived before he bought the shop. If the community buys the shop, they will move it onto the community land. Ken's biggest market is Charlottesville, where the University of Virginia is located.

Ken Scotton. 1990. Virginia Soyworks. 3 p. unpublished manuscript.

Labels sent by Ken Scotton. 1990. Sept. 3 by 2 inches. Tofu: Blue on white. Spread: Green on white. Tofu ingredients: Certified organic soybeans, pure well water, & bitterns from seawater.

Letter from Jon Kessler. 1990. Oct. 20. He and friends have decided to buy Virginia Soyworks. They are planning to build a shop at Twin Oaks Community (Route 4, Box 169, Louisa, VA) and hope to move the business in by 1 Jan. 1991.

8605. *White Wave News.* 1988--. Serial/periodical. Boulder, Colorado: White Wave, Inc. Vol. 1, No. 1. April/May 1988. Bimonthly.

© Copyright Soyinfo Center 2013

• ***Summary:*** Issue No. 1. shows the new White Wave Soyfoods logo. It describes the change in packaging and brands in phasing out the Soyfoods Unlimited brand and replacing it by the White Wave brand. There is an in-store deli recipe for Tempeh Mock Chicken Salad and a consumer recipe for Tofu Sandwich Steaks. There is a brief discussion of tempeh, which is called "The Cultured Vegetarian." Address: 1990 N. 57th Ct., Boulder, Colorado 80301. Phone: 303-443-3470.

8606. *Toyo Shinpo* (*Soyfoods News*). 1988. Hyakkaten deno tôfu jitsuen hanbai hajimaru [Tofu is being made and sold in a department store in Korea]. June 1. p. 11. [Jap; eng+]
• ***Summary:*** In Seoul, Korea, there is a newly built department store, "Lotte World." In it there is a traditional tofu shop which uses a stone grinder to crush their soybeans. They had to get special permission to use a stone grinder, as they are generally considered unsanitary. Their shop is arranged so that shoppers can get a good look at how the tofu is being made, unlike the equivalent store in the Ikebukuro department store in Japan. There is also a counter where customers can eat their tofu. The store does not put the tofu in a water tank. The tofu is very firm.

8607. Lukoskie, Luke. 1988. Recent developments at Island Spring, Inc (Interview). Conducted by William Shurtleff of Soyfoods Center, June 2. 3 p. transcript.
• ***Summary:*** In Nov. 1986 Edward Lynch Co. (ELCO) had contracted to invest $7 million in Island Spring. They had seen how french fries took off and they felt that tofu could follow the same pattern, so they wanted to be in on the ground floor. They actually paid in $4 million. Then in 1987 the relationship broke up. An agreement was reached whereby ELCO obtained possession of the STS soymilk plant. It went to their subsidiary Pacific Foods of Oregon, located in Tualatin near Portland. ELCO also owns Pacific Foods, formerly Sunny Jim, which is an established manufacturer of fruit preserves, juices, peanut butter, etc., and Crescent Foods. Pacific Foods plans to make soymilk but no one in the company knows how nor do they know the natural foods market, which is already extremely competitive. Moreover they have a 2-year non-compete agreement with Island Spring. Luke thinks it will cost them $10 million to put a soymilk product on the market.

Luke went to Sweden to buy a soymilk system from Alfa-Laval the summer after ELCO came in but the plant was too expensive. So he ended up buying a similar system from STS (Soya Technology Systems), the one that Pacific Foods now has. Luke has a lot of confidence in the future of ultrafiltration for making tofu. He was the first to develop a process for metering calcium sulfate into an aseptic tofu. Today the company's sales are up 50% over 1987. The best sellers are Traditional Firm Tofu (water pack), Delicious Steamed Tofu, Tofu Dressings, Tofu Burgers, and Extra Firm Tofu (vacuum packed). In the works are a yogurt and a tofu to be added to sausages by Oscar Meyer. Jerry Long, sales manager, has been a boon to the company. Address: P.O. Box 747, Vashon, Washington 98070. Phone: 206-622-6448.

8608. Schimberg, Ed. 1988. Tofu no kung fu; tofu ancient food. *Benton County Democrat* (*Bentonville, Arkansas*). June 5.
• ***Summary:*** One of the earliest makers of tofu in the U.S. was Summercorn Natural Foods Bakery and Soyfoods, located in Fayetteville. David Druding and his wife, Annie, started the company in a small room on West Street near Ozark Food Co-op in 1974. The Drudings have built Summercorn into a $100,000 gross natural foods business, located at 401 Watson St. Beginning with an investment under $20,000, the Drudings expanded their operation into soy products in 1979.

8609. Mann, Oscar. 1988. Soybeans in Kenya (Interview). *SoyaScan Notes.* June 6. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** His father, Dr. Igo Mann, who died in 1987, did considerable work for the United Nations to introduce soybeans and protein foods to Central and East Africa. Igo's main lifelong interest was livestock. Oscar, who worked as a cook with soyfoods in the community of Bhagwan Rajneesh in Antelope, Oregon, plans to return to Kenya to start a soyfoods (mainly tofu) company there. Address: P.O. Box 20360, Nairobi, Kenya. Phone: 720-399.

8610. Reynaud, A. 1988. Re: Brief history of Innoval / Sojalpe, an affiliate of Coopérative Agricole Silos de Valence. Letter to William Shurtleff at Soyfoods Center, June 6–in reply to letter of March 1988. 1 p. Typed, with signature on letterhead. [Eng]
• ***Summary:*** "Dear Sir, Sorry not to have answered sooner your letter of March 1988 sent to Sojalpe.

"At this time Sojalpe has been bought by Silos de Valence (cooperative enterprise). We are working to raise up production and sales. Sojalpe's new address is: les Auréats, 26014 Valence cédex.

"Now Sojalpe is specializing in organic and diet soyfoods which are selling in natural food stores.

"In November 1987, we made a new enterprise, Innoval, whose aim is to sell soyfoods not nature but diet in supermarkets.

"Answers to your questions:

"1. Soja started in December 1986.

"2. One label for each of our products is enclosed in this letter. "3. New soyfoods will first sell commercially this summer [of 1988] (drinks, desserts, etc.).

Ten leaflets (very attractive and professional) are enclosed. Each is glossy color, printed on both sides, 29.5 x 21 cm. Six of the leaflets were created by Sojalpe, have the

© Copyright Soyinfo Center 2013

attractive Sojalpe logo at the bottom of the front panel over a green stripe, and have an illustration of a laughing chef in a tall white chef's hat (toque) against a broad green stripe (8 cm tall). Centered against this strip (but behind the chef's hat) is written: "Les plaisirs de la table–Sans les kilos! [The pleasures of the table–without the kilos of weight gain!] in bold red capital letters against a horizontal yellow band, 1 cm tall. Below that is the name of the product in bold black letters against a whit stripe and below that a large photo of a prepared dish, ready to eat. On every photo is the word "Bio" written in bold red letters against a yellow background. On the back of each sheet (in black ink on glossy white paper) are descriptions of soya, of tofu, and of the specific product. At the bottom of the page is the Sojalpe logo and address. The address has been crossed out with blank ink (it is illegible) and its place is written: "Les Auréats 26014 Valence. None of the leaflets is dated. The various products are: (1) Les Royales: le savoir-faire des grandes chefs. (2) Les Sorbets: la gourmandise–sans la péché! [Sorbet–without the sin]. (3) Le Soja-Milk: un milk végétal léger, léger, léger [Soya Milk: A vegetal milk that is light, light, light]. The photo shows the milk in a bowl of cereal. (4) Le Tofu Nature: tous les goûts sont dans la nature [Natural Tofu: all the taste is in nature]. The photo shows many thin squares of tofu in hors d'oeuvres or in a salad. (5) Les Palets au Tofu: des plats (finement) cuisines. [Thin sheets of deep-fried tofu]. (6) Le Tofu Burger: le steak de soja–gastronomique. The photo shows two tofu burgers on a plate with a sauce.

The other four leaflets are the same size, glossy color, but have a somewhat different format. Across the top is a light blue and light green band, the two colors separated by thin wave of white. To the left is standing an all-white lovely French woman in a scanty bathing suit. Across the blue band is written (in this red letters): Cuisine saveur Cuisine minceur [Tasty slimming cuisine]. Across the green band is written the name of the product in bold red letters, above a sub-title in black. The color photos are the same size and quality as before, but in place of the word "Bio" is the word "Soja." The "logo" at the bottom, written in black on a yellow oval is: Four stars. Degustation. Basses calories (God taste but low in calories). The products are: (1) Tofu cube: menu a la carte. (2) Royales au tofu: pour varier les plaisirs. (3) Palets au Tofu: gastronomie et dietetique. (4) Tofu Burger: Pour les connaisseurs.

One more Sojalpe leaflet is enclosed (green and red on white, 3 panels each side, each panel 21 x 10 cm). On the front panel is the same chef with his tall hat described above. The word "Tofu" is written 5 times in little clouds. On the inner three panels are descriptions of the benefits of tofu and recipe suggestions. On the back panel is the word "Sojalpe" and the address: "Saint Quentin sur Isère, 38210 Tullins. Tél. 76.93.60.21." Address: Allée Joule, ZI des Auréats, BP 1418, 26014 Valence Cedex, France.

8611. Yu, Stephen. 1988. Victor Food Products, Ltd. (Toronto, ONT), Canada's largest tofu manufacturer, is bankrupt (Interview). *SoyaScan Notes.* June 6. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** The company went bankrupt in July 1987. The equipment will be auctioned off on 21 June 1988. The causes of the bankruptcy: Overexpansion. He was trying to grow too fast. He had arrangements and contracts with a client, who did not fulfill his commitment. He overexpanded because of that contract.

He was an early tofu company in Canada but not the first one. He does not know if he will go back onto the soyfoods field. He is now working at the business of one of his brother in laws. He must sell the company to pay off large company and personal debts. It was a tremendous personal disaster, touching him more than the company. Address: Kitchener, Canada. Phone: 519-741-0922.

8612. *Farmers' Advance* (*Camden, Michigan*). 1988. Indiana seeks tofu connection. June 8.

• ***Summary:*** Special soybean varieties for processing Japanese tofu will be developed through a $14,050 value added research grant to the Purdue University Agronomy Department, Lt. Governor John Mutz has announced. "We're also working to develop a special state certification program for exported food soybeans in order to ensure quality and identity," Mutz said. The research project will evaluate production characteristics of seven Japanese soybean varieties.

8613. Lean, Elizabeth. 1988. Health problems close tofu factory. *Leader* (*Laurel, Maryland*). June 9.

• ***Summary:*** In a series of inspections begun last November, state health officials found that the Eastern Food Products plant, at 9157 Whiskey Bottom Road, Laurel, Maryland, was infested with roaches, lacked proper refrigeration and ventilation, did not label its products properly, and was physically deteriorating. Eastern Food Products is owned by Grace Santiago, of Laurel.

8614. Fiering, Steve. 1988. Early history of The Soy Plant and The Soy Deli in Ann Arbor, Michigan (Interview). *SoyaScan Notes.* June 10. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** "I was a coordinator at the 4th Avenue Food Co-op in Ann Arbor. Three of us from the Co-op began making tofu next door in the Wildflour Community Bakery (which is still there), starting in about April or May of 1977, but perhaps as early as January. Sue Kalen, Christopher Coon, and myself (plus a few others from time to time) would get up very early on Sunday mornings and make our tofu. Soon we also started making soymilk. Whatever we could make was sold immediately in the 4th Avenue Co-op next door. We had no real business name at that time. They called us "The

© Copyright Soyinfo Center 2013

Tofu Co-op." There was a guy named Al Dynak who worked as a baker at a deli and restaurant called Eden's in Ann Arbor. Eden's was owned by or associated with Eden Foods, the natural foods/macrobiotic distributing company. He was also interested in developing a tofu company. We had a meeting. He was much more experienced than we were, especially in baking, food processing, and the restaurant business. He pretty well pushed us for the first 6 months.

"He got us a little room in the basement of Eden's at 330 Maynard St.; in August 1977 we turned it into a tofu shop. At that point we registered our business as The Soy Plant. We were there for about 4 months. When he saw that we were interested in running the business as a co-op rather than to make money, he bailed out. He was interested in making money. Yet without Al, we might never have made the jump out of the original co-op location. No new products were introduced while we were at Eden's.

"Then, in about January 1978, we moved to 211 East Ann St., Ann Arbor. At that time, Tim Huang of Yellow Bean began to distribute our products. Our deli opened on 1 May 1978.

"In July of 1978 we hosted the first national Soycrafters Conference, at which the Soycrafters Association of North America was founded. Seventy people from across America attended. Sue Kalen, Christopher Coon and myself generated the idea for the conference together. We were co-opers and, as such, we were interested in conferences, networking as they say. We knew there were other people out there doing what we were doing and we felt that everyone would benefit it we could all get together and share experience. We knew about New England Soy Dairy (in Greenfield, Massachusetts), The Farm (Summertown, Tennessee), and maybe Northern Soy (Rochester, New York) and Pat Aylward's Joy of Soy (Minneapolis, Minnesota). We compiled a list [Shurtleff sent in many names from Japan] and sent out letters to see how much interest there was. People were interested, so we decided to host it and set a date.

"In 1980, the production part of the business moved to 771 Airport Blvd., Suite 1 in Ann Arbor. They had lots of problems with waste water disposal and may not have started production until 1981. That was when I left, feeling completely frustrated with the co-op structure.

"Most of the workers still liked the co-op. My own personal analysis of the situation is that co-ops work well when there are about 6 people or less and everyone can make decisions, or when there are more than 25-30 people so that you set up a management structure to make decisions. We got caught in the middle with 12-15 people and everyone trying to make decisions. It didn't work. For years I was working to put a manager in the Soy Plant." Address: 30 Newell Rd., Apt. 19, Palo Alto, California 94303. Phone: 415-326-7123.

8615. *Toyo Shinpo* (*Soyfoods News*). 1988. Tôfu ga eizu ni kiku! Eizu nimo kôka ga aru tônyû no naka no saponin, Okubo Ichiro hakase ga happyô [Tofu works against AIDS! Dr. Ichiro Okubo's publication shows saponin in soymilk is even effective in treating AIDS]. June 11. p. 11. [1 ref. Jap; eng+]

• ***Summary:*** Dr. Okubo, assistant professor at Tohoku University in Japan, published an article in *Asahi Graph* (3 June 1988) stating that tofu and soymilk work against AIDS. This created a sensation in Japan. There are many types of saponins, but they can be divided into 2 types, A and B. Group, B can control growth of the HIV virus, which is also a cause of leukemia and breast cancer. Group A, which only exists in the soybean hypocotyl (sprout/germ, *haijuku*), is a cause of the soybean's bitter flavor. Thus, removing the hulls and germ from soybeans gives better tasting soymilk and tofu. Address: Asst. Prof., Tohoku Univ., Japan.

8616. Bland, Aura. 1988. County agrees to lobby for Tofu Pup loan. *Recorder* (*Greenfield, Massachusetts*). June 15. p. 2.

• ***Summary:*** Franklin County Commissioners agreed Tuesday to help the founders of Tofu Pups–a hot dog alternative–secure a state loan to expand their business. Lightlife Foods Inc. on Fairview Street needs $730,000 in loans and refinancing to nearly double the size of its 6,000-square-foot factory. Cohen asked commissioners to express support for a $180,000 loan from the state's Economic Development Set Aside program. Lightlife employs 15 full-time and part-time employees. He also hopes the expansion will enable the company to develop new products–such as sausages and burgers–in the Tofu Pup line. Lightlife ended its budget year with just more than $1 million in sales. In the past two years, Lightlife has increased sales 40%. Lightlife is seeking $40,000 from Franklin County Community Development Corp.; $272,000 from Shawmut Bank; and $238,000 from the Massachusetts Business Development Corp.

8617. *Farmer's Exchange* (*New Paris, Indiana*). 1988. Research to start on soybeans for tofu. June 17.

• ***Summary:*** Special soybean varieties for processing Japanese tofu will be developed through a $14,050 value-added research grant to the Purdue University agronomy department. This project is a key step in our effort to help Hoosier farmers access premium food soybean markets in the Far East. The research project will evaluate production characteristics of seven Japanese soybean varieties and their adaptability to Indiana's climatic conditions and management techniques.

8618. Lamron Sales. 1988. Public auction: Dairy and food processing equipment (Ad). *Toronto Star* (*Ontario, Canada*). June 20. p. B4.

© Copyright Soyinfo Center 2013

• ***Summary:*** "We have been instructed by Laventhol and Horwath Limited Receiver-Manager to liquidate the assets of Victor Food Products Limited and Tofu Masters Inc. In detailed lots. Tuesday, June 21, 1988, 10:00 a.m. 102 Hymus Road, Scarborough, Ontario."

Gives the name of each piece of equipment.

8619. *Tribune* (*Levittown, New York*). 1988. Ex-Levittowner is queen of tofu. June 24.
• ***Summary:*** Chandri Barat, attended Syracuse University when she was in an honors program and then did post-graduate work in Europe. After that she studied in India for a year at a meditation retreat near Bombay. She met her husband, Gary, in the summer of 1979 in South Fallsburg, New York. He quickly hired her to help him with a research project involving tofu. Through a series of events, they became acquainted with a major and successful frozen foods manufacturer and their company, Legume, was on its way. They now have a new product line called Barat Tofu Chocolate–The Healthy Passion.

8620. Penikis, Maija. 1988. Tofu: Made in Stockbridge. Big-city dweller finds joy in rural enterprise. *Post-Crescent* (*Appleton, Wisconsin*). June 26.
• ***Summary:*** Before the day is through, the Bean Time Tofu company has 100-150 pounds of white tofu, cut, wrapped, and refrigerated. Includes three photos of Glenny Whitcomb and her husband, Jerry Franzen.

8621. Jaccard, Michel; Dillier, Alexandre. 1988. Re: History of production and marketing of tofu by Conserves Estavayer S.A. (a Migros company in Switzerland). Letter to William Shurtleff at Soyfoods Center, June 27. 3 p. Typed, with signature on letterhead.
• ***Summary:*** Conserves Estavayer, one of Migros' firms, also makes dairy products and canned goods. They began in November 1982 to do tests on production of soymilk and tofu, based on the results of Japanese research. By June 1983 they were making good progress in technical details. They built their own machines initially. The first commercial tofu products were launched in mid-1984. These included regular tofu products (Tofu Nature, Tofu Mix) and seasoned products (Tofu a la Provencale in a tube, Tofu Bolognaise, Tofu Snack, and Tofu Emince). The latter 3 products were canned. Of the three fresh products Conserves Estavayer has introduced to date, all three are still on the market. But of the ten seasoned products, only one (Tofu a la Provencale) is still available. Sold in a 190 gm tube, it is suitable for canapes, hors d'oeuvres, etc. Address: Sales Dep., Conserves Estavayer, Case Postal 29, CH-1470 Estavayer-le-Lac, Switzerland. Phone: 037-63 91 11.

8622. Madwin, Bari F. 1988. Re: Tomsun Foods' future plans. Letter to and talks with William Shurtleff at Soyfoods Center, June 29, July 5, and Aug. 2. 1 p. Typed, with signature.
• ***Summary:*** Tomsun will auction off all its office and plant equipment except the actual tofu-making equipment on June 30. Tom Timmins is planning to have Panda Foods (Henry Creces) in New York manufacture about 20,000 lb/week of tofu for Tomsun. He still owns the recipes for Jofu and Tofu Pups and will continue to promote and organize their production. He is also involved with another company (Stow Mills) that produces Chesoya. His interests clearly remain in this industry and he seems optimistic about promoting other second generation products.

He has sold the old tofu plant building to a car renovation company, and plans to run the company out of an office nearby. NOte: The letter is dated July 5. Address: RD3, Box 212, Putney, Vermont 05346. Phone: 802-387-5788.

8623. Alfa-Laval Food Engineering AB. Soy Application Group. 1988. Soyfoods: Old traditions with new potentials. P.O. Box 64, S-221 00 Lund, Sweden. 12 p. [Eng]
• ***Summary:*** Contents: Soy–The miracle plant. Soy–The nutritious plant. Soy products yesterday and today. Soy processing yesterday and today: Traditional, hot grinding, blanching, the Soyal process. Soy processing with Soyal: Gives a diagram of the equipment and describes the 7 main steps in the process, starting with bean cleaning and ending with soybase, from which can be made the products described in the next section. Soy products today and tomorrow: Soy beverage, tofu, soy yoghurt, frozen desserts (ice cream)–Imagination sets the limit. On the facing right-hand page is a superb color photo showing 32 modern commercial soyfood products in colorful packages, most based on soymilk and tofu. Alfa-Laval R&D Centres at your service. Alfa-Laval in soy processing: Discusses the Guangdong Cannery in Guangzhou (Canton), China, the first company to install a complete soy beverage plant based on Soyal technology (it now runs 2 shifts to produce 20,000 liters/day of plain and flavored soy beverage), and the CAC Soyal plant in France which makes the Bioforme line. "Founded more than a century ago, Alfa-Laval has a current workforce of 16,000 and is represented in 130 countries through subsidiaries and agents. The group comprises 160 companies worldwide with 45 manufacturing plants."

Processing: Traditionally soybeans were soaked in cold water then ground in cold water, filtered, and cooked to make soymilk with a beany flavor. "Hot grinding: The undesirable taste and smell stem from ketones and aldehydes produced by the enzyme lipoxygenase which is activated by the traditional process and acts as a catalyst to oxidize fatty acids. Modern research showed that grinding in hot water instead of cold water eliminates the enzyme activation and improves the taste considerably.

"Blanching: It was subsequently found that blanching instead of pre-soaking improves the taste even further. The

© Copyright Soyinfo Center 2013

beans, often dehulled, are blanched and ground together with an alkali solution.

"Unfortunately, this process can affect the protein yield. Due to the harsh treatment, the protein tends to agglomerate instead of remaining in solution. In the separation stage these protein bodies will disappear with the fibrous residue [okara], reducing the protein content of the extract.

"The SOYAL process: All of these findings are advantageously combined in Alfa-Laval's processing line SOYAL. The process has been optimized to produce a soybase with a high protein content and a high nutritional value. The soybase produced has a widely acceptable flavour and mouthfeel with no trace whatsoever of the original unpleasant taste and smell." Address: Lund, Sweden.

8624. **Product Name:** Tofu Cream Pie (Tofu Cheesecake) [Blueberry, Cherry], and Tofu Pumpkin Pie.
Manufacturer's Name: Ambrosia Soy Co.
Manufacturer's Address: 199 Saltonstall Parkway, East Haven, CT 06512. Phone: 203-467-8821.
Date of Introduction: 1988. June.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Frozen.
New Product–Documentation: Talk with Liz Appel. 1989. Nov. 9. She now makes mostly Tofu Pumpkin Pie at Thanksgiving and Christmas. They are very popular. They make the graham crackers for the crust. They sell around New England and also through Stow Mills. They used to make blueberry and cherry, and she may re-start cherry seasonally in February only. They seem to sell better if made seasonally.

8625. **Product Name:** Tofu [Bulk].
Manufacturer's Name: Ambrosia Soy Co.
Manufacturer's Address: 199 Saltonstall Parkway, East Haven, CT 06512. Phone: 203-467-8821.
Date of Introduction: 1988. June.
New Product–Documentation: Talk with Liz Appel. 1989. Nov. 9. She started making tofu about a year after she started the company in June 1987. She sold it only in bulk and mostly to vegetarian caterers. They never pushed the product much. Now they use that tofu as an ingredient in their tofu products.

8626. **Product Name:** Tofu Pudding [Chocolate, Carob, or Butterscotch].
Manufacturer's Name: Ambrosia Soy Co.
Manufacturer's Address: 199 Saltonstall Parkway, East Haven, CT 06512. Phone: 203-467-8821.
Date of Introduction: 1988. June.
Wt/Vol., Packaging, Price: 3.5 oz plastic cup.
How Stored: Refrigerated or frozen.
New Product–Documentation: Talk with Liz Appel. 1989. Nov. 9. She started making tofu puddings about a year after she started the company in June 1987, using tofu made by the company. They plan to introduce a vanilla very soon. The butterscotch has been discontinued.

8627. **Product Name:** Tofu.
Manufacturer's Name: Bean Time Tofu.
Manufacturer's Address: Stockbridge, Wisconsin.
Date of Introduction: 1988. June.
Ingredients: Incl. organically grown soybeans.
How Stored: Refrigerated.
New Product–Documentation: Maija Penikis. 1988. *Post-Crescent* (Appleton, Wisconsin). June 26. "Tofu: Made in Stockbridge. Big-city dweller finds joy in rural enterprise." Before the day is through, the Bean Time Tofu company has 100-150 pounds of white tofu, cut, wrapped, and refrigerated. Includes three photos of Glenny Whitcomb and her husband, Jerry Franzen.

E.G. Castleman. 1992. *Herald-Times-Reporter* (Manitowoc, Wisconsin). Sept. 2. "Tofu can be nutritious, simple part of diet." The company, located between Chilton and Stockbridge, Wisconsin, is now named Bean Time Soyfoods. The owners are Glenny and Jerry Franzen. Note: As of 12 Dec. 1992 neither this company nor the Franzens are listed in the telephone directory of that area.

8628. Connelly, Ellen. 1988. Try tofu! *Good Housekeeping* 206:136. June.
• ***Summary:*** If you don't know how to cook with this still-exotic food, here are some delicious (easy ideas). Includes headings on buying, storing, and handling tofu, as well as tasty ways with tofu.

8629. **Product Name:** [Tofu Ravioli with Sauce (Canned)].
Foreign Name: Tofu Ravioli al Sugo.
Manufacturer's Name: Conserves Estavayer S.A.
Manufacturer's Address: Case Postale 29, CH-1470 Estavayer le Lac, Switzerland. Phone: 037 63 91 11.
Date of Introduction: 1988. June.
Wt/Vol., Packaging, Price: Can.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: Alfa-Laval. 1988, June. Soyfoods: Old traditions with new potentials. p. 9. A color photo of the front of the can shows the label with a reddish bowl of ravioli against a tan background. There are two red strips around the top of the can.

8630. Cooper, Jack. 1988. Miso: The mother's touch. *Palate Pleasers of Japan* (*Los Angeles, Calif.*) 6:31-37. June.
• ***Summary:*** The "mountain made" miso commercial turned a small, local miso manufacturer in the Japan Alps, Miyasaka Jozo Co., Ltd., into the second largest miso producer in all of Japan. To Japanese everywhere, the "chop, chop, chop" sounds of mom dicing tofu and scallions in the kitchen, mixed with the savory, pungent fragrance of hot miso broth

© Copyright Soyinfo Center 2013

and the clean, sweet smell of steaming rice are as much a symbol of the dawning of the day as the aroma of fresh coffee and the sizzling sounds of bacon and eggs are to Americans. William Shurtleff and Akiko Aoyagi explain [the bewildering 'vintages' of miso] in their massive volume, *The Book of Miso*. All traditional miso contains salt and soybeans to which a mold culture, or "friendly agent," usually *Aspergillus oryzae*, has been added.

A 1965 study conducted by Dr. Takeshi Hirayama at Japan's prestigious National Cancer Center, people who eat miso soup daily are 32% less likely to develop cancer than those who never eat miso soup. Undiluted, miso contains on average about 12% salt, six times the salt content of cheddar cheese. Most miso sold in America is imported and sold under Japanese brand names like Maruman, Marukome, Shinshu-ichi, Yamabuki, Hanamaruki, etc. One reason for this may be Japan's stringent new laws requiring producers to list all ingredients and additives (mainly MSG, artificial coloring and preservatives), making the natural products more attractive to America's health-conscious consumers.

The Japanese National Miso Association estimates that there are over 2500 miso manufacturers in Japan, many of which are small, family-owned operations. Color photos show: (1) Miko-chan, the little kneeling girl who is the Miyazaka Jozo logo. (2) Three types and colors of miso in white bowls, next to an iris. (3) The historic old Shinshu Ichi miso and shoyu plant. (4) A bowl of white miso soup with crab and tofu. (5) An assortment of traditional miso dishes. (6) The ultra-modern computerized control panel, motorized conveyors, and the modern packaging facility at the Miyazaka Jozo factory (3 small photos). (7) A shop in Japan retailing Japanese miso in traditional small wooden kegs. (8) Five views of the South River Miso Co., Conway, Massachusetts (including an exterior view of the home and miso shop, Christian Elwell at work in the temperature-controlled koji room).

Note: According to *The Book of Miso*, by Shurtleff & Aoyagi (1976, p. 257; based on 1974 statistics) *Mayasaka Jozo* (*Shinshu Ichi*) is Japan's largest miso factory. The company's Tokyo factory produces about 15,000 tons/year; the Nagano and Yamanashi plants produce 9,300 tons and 3,300 tons respectively. All make Shinshu-type light-yellow miso. As of 1983, the Tokyo factory also made freeze-dried miso. Address: Editor, Palate Pleasers.

8631. **Product Name:** [Tofu with Toasted Nori, Tofu with Toasted Sesame, Tofu Bars {With Millet}, Seitan in Soy Sauce].
Foreign Name: Tofu mit geroesteter Nori-Alge, Tofu mit geroesteter Sesam, Tofu Stange (mit Hirse), Seitan in Sojasauce.
Manufacturer's Name: Geestland.
Manufacturer's Address: Friedrichstrasse 19, D-2850 Bremerhaven, West Germany. Phone: (0471) 2 60 20.
Date of Introduction: 1988. June.
How Stored: Refrigerated.
New Product–Documentation: Talk with founder and present owner of Geestland, Paul E. Bremer. 1990. April 25. About 2 years ago the company moved to: Friedrichstrasse 19, D-2850 Bremerhaven and in June 1988 Tofu with roasted nori, and with roasted sesame were introduced.

8632. **Product Name:** [Fast Food Program: Deep-fried tofu Treasure Balls, Tofu Mixed with Rice & Herbs, Tofu Slices Cooked with Soy Sauce, Ginger & Konbu].
Foreign Name: Tofu Baellchen, Tofu Willi, Tofu Schnitte.
Manufacturer's Name: Geestland.
Manufacturer's Address: Friedrichstrasse 19, D-2850 Bremerhaven, West Germany.
Date of Introduction: 1988. June.
How Stored: Refrigerated.
New Product–Documentation: Talk with founder and present owner of Geestland, Paul E. Bremer. 1990. April 25. These products were introduced in mid-1988. The little balls are "fritiert." Fritiert means deep-fried in lots of oil. Gebraten means fried in a pan with only a little oil.

8633. Golbitz, Peter. 1988. "Prince Mintz of Tofu": Interview with David Mintz. *Soya Newsletter* (*Bar Harbor, Maine*). May/June. p. 4-6.
• ***Summary:*** On December 8, 1983, Tofu Time, Inc. became a publicly held company and raised $2.875 million by successfully selling 500,000 shares of its stock. During the next year, Tofutti's sales increased over seven-fold to $2.4 million. During 1985, the company's sales increased seven-fold one more time to an astounding $17.1 million with a profit of $2 million, making it the fastest growing soyfoods company in the history of America. For the next two years the company saw a slowdown in total sales as revenues dropped to $11.8 million in 1986, and then to $7.7 million in 1987. To bolster sales and return the company to profitability, Tofutti Brands has continued to expand its line of nondairy frozen desserts with new flavors and novelty items and a new lower calorie version of Tofutti, Lite Lite Tofutti.

The company has also recently launched four new lines of tofu-based and cholesterol-free products: Better Than Cheesecake, Tofu Tortellini, Egg Watchers, and, Better Than Cream Cheese. During the first quarter of fiscal 1988, Tofutti Brands reported that sales for the period were $2.414 million, up 11% from the comparable quarter last year, and that its net income was $32,000 compared to a net loss of $19,000 for the same period last year. Mintz comments on his products, "We don't call them substitutes, we call them replacements. What I think is even bigger than 'low calorie' now is the concern about cholesterol."

It has been said by many that Tofutti has probably contributed more to tofu's awareness by the masses than any other single food product in the modern history of soyfoods.

© Copyright Soyinfo Center 2013

Mintz says, "We're not just a one line company. Today we have at least 2 dozen projects on the fire. There has been a lot of talk about companies growing too rapidly and how that can hurt a company. If there is excessively rapid growth, it isn't healthy for anything. You can't deal with it. This is where we had gotten a little bit shook up initially. We are growing, but we're growing at a rate that we can handle." Address: Soyatech, Bar Harbor, Maine.

8634. Golbitz, Peter. 1988. Soybean prices rise sharply. *Soya Newsletter* (*Bar Harbor, Maine*). May/June. p. 1, 12-13.
• ***Summary:*** Amid the possibly the worst drought to hit America since the Dust Bowl years, prices for soybeans have risen from $5.30 per bushel last November to just under $10.00 per bushel now, with prices have reached a high of nearly $11.00 in June. The recent price increases are attributable directly to the drought; and, a greatly reduced soybean supply, which resulted from increased exports due to a cheaper dollar overseas. History has shown that soybean prices don't have much of an impact on food prices in general. "In 1983, when soybean prices increased 37% from the prior year, food price inflation increased about 1%. Beef prices were up a mere 0.8% and pork prices actually decreased by 1.3%. The fact is, most of the costs food manufacturers incur are related to marketing. Farm products represent only 20% of the total price of food."

Archer Daniels Midland, Cargill, and Central Soya have all raised prices for their soy flour and soy concentrate products by 20% to 30% over the past few months. Of all the food categories affected, the rising price of soybeans may have a more pronounced effect on soyfood products than any other. The effect of rising prices will be felt the greatest in the Oriental markets, where tofu prices have traditionally run 40% to 50% lower than in the supermarkets due to greater competition. Address: Soyatech, Bar Harbor, Maine.

8635. **Product Name:** [Soymilk Ice Cream].
Foreign Name: Tônyû Sofuto Kuriimu.
Manufacturer's Name: Iimura Shoji.
Manufacturer's Address: Ebisu Nishi 2-12-13, Shibuya-ku, Tokyo, Japan. Phone: 03-463-1896.
Date of Introduction: 1988. June.
How Stored: Frozen.
New Product–Documentation: Toyo Shinpo. 1988. June 1. p. 6. "Hit product of the summer is the soft-serve soymilk ice cream machine from Iimura Shoji." Iimura Shoji, a company which sells materials for the tofu industry, is trying hard to make this product popular. Ten companies have already bought the soft-serve ice cream machine, and Iimura Shoji anticipates that it will have sold 100 machines by the end of the year. The company has been promoting the product on T.V. just in time for the summer heat. The ice cream comes in two flavors–vanilla and custard. The company is also trying to sell the ice cream machines to local tofu shops.

8636. Kay, Theodore; Kimura, M.; Nishing, K.; Itokawa, Y. 1988. Soyabean, goitre, and prevention. *J. of Tropical Pediatrics* 34(3):110-113. June. [Eng]
• ***Summary:*** Contents: Introduction. Nutritional value of soya bean Nigerian foods prepared with soya bean paste: Soya bean paste (soaked, ground soybeans without the "husk" removed), kosei (akara ball), panke (puff-puff). Nigerian foods prepared with soya bean milk: how to make the basic milk, wara (milk curd), and alele (moin-moin, made with soya milk residue [okara]). Note: "The above five recipes have been fully accepted in many parts of Nigeria. The taste and the preparation procedure of these traditional Nigerian foods made from soya beans worked out to be almost the same or very similar to the foods traditionally made from cow peas (white beans) for kosei and alele, wheat flour only for panke, and cow milk for wara."

Nigerian foods made with soya bean flour (pre-cooked): How to make the basic flour, protein enriched pap (with akamu), and protein-enriched fu-fu (with gari or cassava flour). Discussion.

"Soya bean is being successfully established in Nigeria, but it has been very difficult to cook in a traditional West African way so it has never become popular in this country. Most soya bean produced in Nigeria has been exported as cash crop except a little for animal consumption."

Kosai, alele, panke, and awara are traditional foods in Northern Nigeria, while akara ball, moin-moin and puff-puff are traditional foods in Southern Nigeria. Discussion: "Why do we need soya bean in Nigeria?" Five reasons are given. The first two are: "(1) It has higher protein content and net protein utilisation (NPU) than cowpeas, groundnut and other legumes. Moreover, soya bean is much cheaper than other legumes in Nigeria. (2) Soya bean flour and soya bean milk have little taste and can therefore be incorporated into traditional foods such as pap and fu-fu without changing the appearance, taste and texture." Address: Dep. of Hygiene, Faculty of Medicine, Kyoto Univ., Kyoto 606, Japan.

8637. Kemp, Mark. 1988. Invasion of the bean curd: While chickens continue to lay eggs chock-full of cholesterol, one man roosts at his New Jersey tofu plant, brooding over ways to outsmart nature. *Discover* (*New York, NY*) 9:42-43. June.
• ***Summary:*** David Mintz sits in his office at Tofutti Brands' headquarters in Rahway, New Jersey, 100 volumes on ethics written in Hebrew on a nearby bookshelf. He speaks with a native Brooklyn accent, and atop his head, slightly askew, is a small yarmulke. He is thinking of ways to get cholesterol out of American diets once and for all with a tofu based egg. Al Kniper, head of the company's 3000-square-foot research and development laboratory talks about what goes into this soybean-based egg.

Tofutti Brands' Egg Watchers, he says, is much like other simulated-egg products such as Egg Beaters, Egg

© Copyright Soyinfo Center 2013

Scramblers, and the various powdered substitutes. All blend together egg whites, certain gums, vegetable oils, emulsifiers, stabilizers, and coloring to try to reproduce the perfect egg consistency. But Egg Watchers is the first–and so far the only–substitute in the protein food tofu has been incorporated.

But researchers still differ over whether dietary cholesterol significantly affects blood levels of cholesterol. In 1945 Americans ate an average of 402 eggs per capita annually. Today that number has dropped to only 262. Mintz said, "You know, my dream is to make a hot dog out of tofu."

8638. Kingma, Sharyn. 1988. New study released on consumer attitudes about soy proteins. *Soya Newsletter* (*Bar Harbor, Maine*). May/June. p. 3, 14-15.
• ***Summary:*** Protein Technologies International, a subsidiary of Ralston Purina, St. Louis, Missouri, has recently released the results of a new study which evaluates current consumer attitudes related to soy protein, nutrition, dietary habits, and knowledge of dietary fiber. The 1988 Consumer Attitudes Monitor was undertaken to determine if there had been any significant changes in consumer attitudes since their first study was done in 1985.

One of the major differences between the earlier study (see Ralston Purina 1985 and Elliott 1988) and the current one is that the 1985 study contained specific questions related to soyfoods. But the 1988 survey also probed some interesting areas. For details, see the study itself.

Copies of the 1988 Consumer Attitudes Monitor are available through Jean Kuster, Protein Technologies International, Checkerboard Square, St. Louis, Missouri, 63164 or call 800-325-7108.

8639. Morinaga Nutritional Foods, Inc. 1988. Revolutionary tofu (Ad). *Palate Pleasers of Japan* (*Los Angeles, Calif.*) 6:61. June.
• ***Summary:*** This full-page color ad (see next page) begins: "Let Mori-Nu technology solve the problem of tofu freshness." "To find out more... Join the Mori-Nu Health For Life Club. Receive newsletters, coupons, and recipes..." A half-page color photo shows aseptic packages of silken firm and soft Mori-Nu tofu on a wooden table in front of fruits and vegetables.

An "advertising supplement" on pages 76-77 of this issue is titled "The miracle food in a miracle package." It contains two recipes: Chinese unchicken salad, and Pumpkin pie (with tofu). Color photos show each of the two recipes, plus the front page of an issue of *Mori-Nu Healthy Times* newsletter (edited by Susan Buchér), and the front of a color recipe pad titled "Light & Easy Mori-Nu-Recipes." Address: 5800 South Eastern Ave., Suite 270, Los Angeles, California 90040. Phone: 213-728-4325.

8640. **Product Name:** Mrs. Leepers Whole Wheat Tofu Spin Ribbons, and Whole Wheat Tofu Ribbons.
Manufacturer's Name: Mrs. Leepers.
Manufacturer's Address: 9091 Kenamar Dr., San Diego, CA 92121. Phone: 619-586-1994.
Date of Introduction: 1988. June.
Ingredients: Inc. tofu and whole wheat flour.
Wt/Vol., Packaging, Price: 12 oz plastic package.
New Product–Documentation: Soya Newsletter. 1988. May/June. p. 8. Contact Ed. Muscat. Available at health food stores nationally.

8641. Peluso, Michael R. 1988. The nutritional value of soy. *Health World* (*Burlingame, California*) 2(4):26-28. May/June.
• ***Summary:*** This introductory article discusses whole soybeans, soy flour, soy protein products (isolates, spun fibers, TVP), soy milk, soy cheese (tofu), tempeh, miso, and soy sauce. Table I shows the composition of most of these is given. The author is especially interested in soy oil as a good source of vitamin E and of the essential fatty acids, linoleic and alpha linolenic acids. He is critical of the hydrogenation process. Table II gives a nutritive comparison of soy oil and selected food fats. Table III gives a nutritive comparison of soy foods and selected animal foods. Address: P.O. Box 606, Occidental, California 95465.

8642. Shurtleff, William; Aoyagi, Akiko. 1988. Das Tofu-Buch: Herstellung, Verwendung, Ernaehrungswert, Rezepte [The book of tofu: Preparation, uses, nutritional value, recipes]. Munich, West Germany: Goldmann Verlag. 384 p. Illust. by Akiko Aoyagi Shurtleff. Index. 18 cm. [Ger]

8643. Shurtleff, William. 1988. Thoughts on the Soyfoods Association of America and why it has not been more effective (Editorial). *SoyaScan Notes.* June.
• ***Summary:*** 1. Lack of leadership and general ineptness, especially by Gary Barat but also by the board of directors.

2. Choosing Smith, Bucklin to manage the association instead of finding a skilled executive director who was interested in soyfoods. Smith, Bucklin took little initiative, drained off most dues income into overhead (their "management fee"), and accomplished little. SAA paid Smith, Bucklin a "management fee" of $15,000 to $20,000 a year to do almost nothing; Judy Walker's part-time salary plus a phone and mailing address.

3. The Soyfoods Association became de-facto the Tofu Association. Few non-tofu companies joined. It should have been an umbrella organization with active councils, such as the Soymilk Council, Soy Sauce Council, etc.

4. Dues structure. The $250 flat fee kept out small

• ***Summary:*** Recipes: Bean Curd (Frozen) Curry, Soya Mash Cutlets [okara], Soya Mash Pittu, and Soya Mash Rotti. The ad is for soya bean curd, soya paste (substitute for coconut milk), and soya mash (okara). Soya House is a private company that manufactures tofu and soymilk. Address: Kitulwatte Gardens, 128 Kitulwatte Rd., Off Elwitigala, Mawatha, Colombo 8, Sri Lanka. Phone: 597759.

8645. *Soya Newsletter* (*Bar Harbor, Maine*). 1988. Tomsun Foods files for chapter 11. May/June. p. 1, 7.
• ***Summary:*** On April 8, 1988, Tomsun Foods International filed for protection under Chapter 11 of the Federal Bankruptcy Act. They did so to recover from a loss of approximately $2 million last year on overall sales of $3.6 million. Tomsun, just a year and a half ago, had successfully netted $3.46 million from its first public stock offering. Armed with a new product line, Jofu, a silken tofu and fruit, yogurt-like product, the company had high hopes of doing for tofu what Dannon had done for yogurt–popularize it by adding fruit and making it a convenient, ready-to-eat snack. The company expanded too fast reports Tom Timmins, company founder. "We went from 3,000 cases a week to 20,000, but could only produce 12,000. It was too much, too soon for a small plant. By the time we got it under control, it was too late–we had run out of money."

The new vision is that Tomsun will use its strength in distribution to become a marketing company. The company will be having their tofu made in a new plant in the New York City area, their Jofu made in a yogurt plant in Vermont, and their tofu burgers produced in upstate New York. Timmins also reports that the company will reorient its focus back on to the natural foods and other specialty foods markets. Timmins hopes the company will be out of Chapter 11 by this fall. "Essentially what happened was that the cost of financing necessary to reduce our costs was not available to us."

8646. *Soya Newsletter* (*Bar Harbor, Maine*). 1988. Tofu acceptability among college students. May/June. p. 3.
• ***Summary:*** A study on the acceptability of tofu among college students was done in 1986 by the department of Animal Science/Food and Nutrition, Southern Illinois University, Carbondale, Illinois, under the direction of Helen L. Ashraf, Ph.D. and D. Luczycki, M.S. Seventy-five college students, with an average age of 23, were randomly selected to participate twice a week for six weeks and evaluate on a scale of one to seven, sixteen recipes prepared with tofu in different food categories. They determined what factors influenced the acceptability of tofu, such as: (a) food category, (b) appearance, (c) methods of preparation used, (d) serving style, (e) amount of tofu in the dish, and, (f) students previous experience with eating tofu.

The most important factor in determining the acceptance of tofu in a food product was the familiarity of the recipe. The recipes which received the highest scores were those that people were familiar with, such as coconut cream pie and carob pudding. The amount of tofu in the recipe did not influence the acceptance. Dr. Helen Ashraf plans to do studies with tofu and preschoolers and the elderly in the near future. For more detailed information contact: Dr. Helen Ashraf, Southern University of Illinois, Carbondale, IL 62901 or call 618-536-2157.

• ***Summary:*** A new process to culture tofu into a yogurt-type food is available for sale or licensing by Steve Rowat of Yofu Development (Canada). The process, which has a Canadian patent and a patent pending in Japan, is titled, "Process Permitting the Culturing of Tofu with Yogurt-Forming Bacteria". Contact: Steve Rowat, Yofu Development (Canada), Box 93, Merricksville, ONT, Canada K0G 1N0. Telephone: 613-269-4483. Address: Yofu Development (Canada), Box 93, Merrickville, ONT, K0G 1N0. Phone: 613-269-4483.

8648. *Soya Newsletter* (*Bar Harbor, Maine*). 1988. Morinaga extends consumer education campaign. May/June. p. 9.
• ***Summary:*** Morinaga Nutritional Foods, Inc., recently announced a multifaceted consumer education program designed to answer the questions "What is tofu?" and "What do you do with it?"

Coordinated by Danielle Lin, talk show host for KFOX Radio, Los Angeles, California, "the campaign will use a variety of mediums, including in-store promotions and media advertising.

"These new consumer education activities are an extension of Morinaga's marketing activities which include their *Health for Life* club and the *Healthy Times* newsletter."

8649. **Product Name:** CheSoya (Soy Cheese with Sodium Caseinate) [Cheddar, Mozzarella, or Jalapeño].
Manufacturer's Name: Stow Mills (Distributor).
Manufacturer's Address: P.O. Box 816, Brattleboro, VT 05301.

© Copyright Soyinfo Center 2013

Date of Introduction: 1988. June.
Ingredients: Incl. organic tofu, soy oil, calcium caseinate, natural flavor, sea salt, citric acid, lecithin, guar gum, natural coloring.
Wt/Vol., Packaging, Price: 10 oz.
New Product–Documentation: Soya Newsletter. 1988. May/June. p. 8. These cheese alternatives are free of cholesterol and lactose, and are 100% natural.

8650. SunShine Tofu House. 1988. June. New soyfoods restaurant or deli. 5091-C Buford Highway, Atlanta, GA 30340.
• ***Summary:*** Atlanta Daily World. 1988. June 21. "New Tofu Restaurant Opens." Mayor Andrew Young joined other dignitaries (incl. Japanese Consul General Takayuki Kimura) and supporters at the formal opening in northeast Atlanta. The proprietor is Seiho Tajiri, a prominent local Japanese businessman. "The restaurant, the first of its kind in the Southeast, will not only provide a full menu of tofu dishes, but also manufactures the tofu and soymilk in the restaurant." Address: Atlanta, Georgia. Phone: 404-451-2054.

8651. **Product Name:** Tofu, and Soymilk.
Manufacturer's Name: SunShine Tofu House.
Manufacturer's Address: 5091-C Buford Highway, Atlanta, GA 30340. Phone: 404-451-2054.
Date of Introduction: 1988. June.
New Product–Documentation: Atlanta Daily World. 1988. June 21. "New Tofu Restaurant Opens." The restaurant will produce its own tofu and soymilk.

8652. **Product Name:** Tofutti Egg Watchers (Mainly Egg Whites plus a little Tofu).
Manufacturer's Name: Tofutti Brands Inc. (Marketer).
Manufacturer's Address: 1098 Randolph Ave., Rahway, NJ 07065. Phone: 201-499-8500.
Date of Introduction: 1988. June.
Ingredients: Egg whites (98% of total ingredients), tofu, corn oil, lecithin, acetylated monoglyceride, guar seed gum, ferric orthophosphate (iron source), vitamin A palmitate, vitamin D-2 and alphatocopherol acetate (fat soluble vitamins), zinc sulfate, calcium pantothenate, vitamin B-12, thiamine mononitrate (vitamin B-1), pyridoxine hydrochloride (vitamin B-6), riboflavin (vitamin B-2), folic acid (water soluble vitamins), beta carotene (for color).
Wt/Vol., Packaging, Price: 32 oz (2 lb) quarts, 5 lb. containers, 8 oz. and 3 oz Pure-Pak carton.
How Stored: Frozen.
Nutrition: Per 2 oz.: Calories 50, protein 7 gm, carbohydrate 2 gm, fat 1.5 gm, cholesterol 0 mg (vs. 260 for a 2 oz. egg), sodium 100 mg (vs 70 mg for an egg).
New Product–Documentation: Delaney. 1987. Adweek East. April 27. "Also set for launch this summer is Tofutti Egg Watchers, a tofu-based line of egg substitutes that has no cholesterol, no yolk and is lower in calories than natural eggs." Dagnoli. 1987. Advertising Age. Oct. 19. This cholesterol free product will compete with RJR Nabisco's Fleischmann's Egg Beaters. Soya Newsletter. 1987. Nov/Dec. Made with tofu and pareve. A cholesterol free replacement for whole eggs that provides the same nutritional value, function, texture, and flavor as whole eggs. Color leaflet. 1988. Tofutti Egg Watchers. "Real egg product. Cholesterol free. Whole egg replacement. Finally... The farm fresh taste of whole eggs without cholesterol. Three convenient frozen products specially designed for institutional foodservice applications." Talk with Tofutti Brands. 1988. Sept. 28. This product was launched at a press conference in June 1988.

Florida Grocer. 1989. March. "Watching cholesterol. Watch for Egg Watchers from Tofutti Brands." This cholesterol-free replacement for whole eggs contains 40% fewer calories and 67% less fat than a whole egg. "Finally consumers can have their eggs and eat them too... One medium egg has 274 mg of cholesterol. The American Heart Association recommends that Americans consume no more than 100 mg of cholesterol a day for every 1,000 calories taken in, and no more than a total of 320 mg a day... An estimated 63 million Americans suffer from cardiovascular disease and 96 million need to lower their blood cholesterol level."

One sample of this product with Label generously sent frozen by David Mintz via FedEx priority overnight. 1996. June 4. Two 8 oz Pure-Pak cartons in a paperboard sleeve. Red, blue, and black on egg-yolk yellow. "Fat free. Cholesterol free. Real egg product. Pasteurized. Homogenized." One 8 oz packet = 4 large eggs. A table on the sleeve compares 1 serving of Egg Watchers with 1 large egg: Fat: 0 vs. 4.5 gm. Cholesterol: 0 vs, 215 mg. Calories 30 vs. 70. On the back of the sleeve are cooking tips, and recipes for: Scrambled eggs and omelets. Oat bran muffins. Broccoli, tomato and basil frittata. Soyfoods Center product evaluation. 1996, July: Package: Excellent. Cheese omelet made with the product: Excellent.

8653. Udesky, James. 1988. The book of soba. Tokyo and New York: Kodansha International. 166 p. Foreword by William Shurtleff. Illust. Index. 27 cm. [50* ref]
• ***Summary:*** Contents. Foreword. Introduction. I. Making soba. Homemade soba noodles. Broth. Noodle dishes. Country cooking. Groat cooking. Variations and desserts. Ingredients. II. About soba. Nutrition. Buckwheat: From seed to table. History. III. Appendices. The soba dining experience. Selected soba restaurants in Japan. Oriental, natural, and specialty food stores in the United States and Canada. Bibliography.

Soy-related recipes include: Cold soba noodles with natto and sesame (with "2/3 oz natto," p. 59). "Fox Soba"

© Copyright Soyinfo Center 2013

(*Kitsune soba*, with "4 pieces thin deep-fried tofu {*abura-age* or *usu-age*}, p. 63). Soba noodles in miso stew (*Kenchin soba*, Ibaragi prefecture, with "4-5 tablespoons miso," p. 70). Soy-Soba noodles (with "4 oz soybeans" [whole dry soybeans], p. 71). Broiled soba dumpling with miso sauce (with "3-4 tablespoons sweet white miso," p. 81-82). Soba pasty (with "1½ oz natto, p. 85). Soy sauce is used in many recipes.

The excellent "Ingredients" section (p. 91-98), gives definitions of several soyfoods, including miso, natto, okara, soy sauce, tofu, and tofu–thin deep-fried (abura-age, usu-age).

The definition of "natto" is especially good: "Natto: This rich soybean product with a cheeselike flavor is still underestimated, unappreciated, and misunderstood, mainly because the sticky 'threads' resulting from its special fermentation process are strong and stubborn, making it pretty tricky for beginners to eat. Natto can be made easily at home with soy beans, 'natto spore' (now available at major health-food dealers on both coasts), a pot, and a box... If allowed to sit too long on store shelves, the beans become overripe. Although you cannot check the quality until you open up the package at home, the best natto should have a light, tannish color and still be moist and a little puffy. Too dark a color indicates overripening and a correspondingly bitter taste. To remedy this situation somewhat, stir the beans together with chopsticks or a spoon and combine with chopped onions, wasabi horseradish, and soy sauce. Since this food is the result of bacterial action, no preservative can be used. Thus, natto should be eaten as soon as possible."

Mr. Udesky had a chance to prepare homemade soy sauce while living with Mr. Noboru Muramoto (author of *Healing Ourselves*) from 1971 to 1975. In the Appendix titled "Oriental, natural, and specialty food stores" is an entry (p. 153, col. 3.8) for: "Foods for Life, 504 E. Broadway, Glendale, California, 91025." Note: This pioneering natural and organic food store is still in business in 1988.

For a complementary review, see Jean Pearce. 1991. Nov. 10. *Japan Times.*

Letter from James Udesky. 1997. April 21. The hardcover edition of *The Book of Soba* has now sold 12,000 copies in Japan and abroad, and 3,000 copies of a new soft-cover pocketbook edition (246 p.; 18.2 cm) were published by Kodansha International in Dec. 1995. An article on soba titled "The Art of Noodles," by Udesky appeared in *Japan Quarterly* (April-June 1997, p. 32-42; it contains a large color photo of him rolling out soba dough). Udesky is living in Tokyo, has lived in Japan (except for a 3-month break in 1988) since 1988, married a Japanese woman in 1990, for the last 2 years has worked for a medical equipment importer and taught English part-time at Dentsu Inc. to survive financially, has established a company named Udesky Communications, and continues his practice of making traditional Japanese soba. He has plans for a new book titled "Basic Techniques of Udon Making. " Address: Heim R1 #103, Meguro Honcho 6-18-3, Meguro-ku, Tokyo 152, Japan. Or: The Soba Center, P.O. Box 72, Winnetka, Illinois 60093-0072.

8654. **Product Name:** Tofu Dressing [Mexican, Italian, or Garden Herb].
Manufacturer's Name: White Wonder Natural Products (Importer). Made in the Netherlands by Witte Wonder.
Manufacturer's Address: 709 7th St., Hudson, IA 50643. Phone: 319-988-3811.
Date of Introduction: 1988. June.
Ingredients: Filtered water, fresh tofu* (made from soya beans and filtered water, coagulated with nigari), sunflower oil* (pressed cold), dried vegetables and herbs, barley malt syrup*, malt vinegar, seasalt, guar (vegetable binder). * = Organically grown.
Wt/Vol., Packaging, Price: Bottle.
How Stored: Shelf stable; refrigerate after opening.
Nutrition: Per 1 tablespoon (14 gm): Calories 25, protein 0.4 gm, carbohydrates 0.5 gm, fat 2.5 gm, sodium 40 mg (320 mg/100 gm).
New Product–Documentation: Talk with Ruth Young. 1988. Sept. 15. The product was first sold in America in June 1988. It is imported from Witte Wonder in the Netherlands. Leaflet (glossy color, 2 panels each side, each panel 19.6 x 13.2 cm) sent by White Wonder Natural products, Hudson, Iowa. 1988. Sept. 22. "Garden Herb. Italian. Mexican. Tofu Dressing."

Leaflet. 1988. Nov. "Tofu dressing."

8655. Huang, H.T. (Hsing-Tsung). 1988. History of fermentations, food, and nutritional sciences in China (Interview). *SoyaScan Notes.* July 1. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Dr. Huang, a biochemist by training, has written the chapter titled "Plants and Insects in Man's Service" in Joseph Needham's *Science and Civilisation in China* (1986, VI:1); it concerns natural plant pesticides and biological pest control. Parasitic wasps (Tricogama) have been the most successful example of biological control in China. Also *Bacillus thuriengensis*, a bacterium that attacks a caterpillar that later becomes a destructive moth. It is to toxic to mammals. Since 1983 he has been researching an entire volume in this series to be titled "Nutritional Sciences and Fermentation Technology (VI:6)." After this, he plans to write a "History of Zoology in China." There is a Needham Research Institute Newsletter. No. 4 is June 1988. Needham's thesis is that China was the world leader in science until the start of the Renaissance, but had been passed by the West by the 16th century. The question is: Why did China not develop modern science? Dr. Needham is now age 87. He is working on Volume VII, the 4-volume summation. He was in China for 2-3 years in 1983-86.

© Copyright Soyinfo Center 2013

Dr. Huang is quite sure that tofu had another name before A.D. 950. Address: Work: Biochemistry Program, National Science Foundaton, Washington, DC 20550. Phone: 202-357-7945.

8656. *Toyo Shinpo* (*Soyfoods News*). 1988. Kibu, tezukuri tôfu setto. "Kangaeru Kai" to teikei, hatsubai [The Kibun company is producing a kit to make tofu at home in conjunction with Kangaeru Kai ("Thinking Society")]. July 1. p. 3. [Jap; eng+]
• ***Summary:*** The Kibun company, which makes the soymilk for the kit, is located at Ginza 7-14-13, Chuo-ku, Tokyo-to, Japan. The soymilk comes in special long-life, 1 liter bottles that has a 60-day shelf life at room temperature. They use special, domestic Hokkaido beans and water to make this soymilk. They also put natural nigari in the kit. One liter of the soymilk can produce 3 regular size kinugoshi (silken) tofu cakes. The kit, Tofu No Moto, contains 6 liters of the soymilk and costs 8100 yen.

8657. *Times of India* (*The*) (*Bombay*). 1988. From Thai with a tang: Bombay's top three hotels have simultaneously launched their Thai food festivals. July 2. p. 19.
• ***Summary:*** In this article, Hormuz Mama visits the Thai food festival at the Oberoi Hotel and comments on the Thai exotica. The recent Thai food festival in Bombay was "the first major Thai food festival of any significance in India."

"A most outstanding Asian vegetable is the humble soya bean." Weight for weight it is said to contain twice as much protein as lean beef, making it a rare combination of excellent nutrient content and low cost. "Bean curd, prepared from it, is a very popular ingredient of Thai cuisine"–yet it looks very much like Indian paneer. "In nutritional value it is far superior. Bean Curd Curry is a great favorite with the Thais."

8658. Cauchon, Dennis. 1988. Drought wilts soybeans: This year's 'miracle crop' is in danger. *USA Today.* July 6. p. 01.B. Final edition.
• ***Summary:*** In 1970, at the peak of its world domination of soybean production, the USA produced 80% [sic, 76.1%] of the world's soybeans. Last year, its share fell to 55%, largely because of competition from Brazil, Argentina, and China.

8659. Cauchon, Dennis. 1988. Drought wilts soybeans: This year's 'miracle crop' is in danger. *USA Today.* July 6. p. 01.B. Final edition.

8660. Spain, Julianne. 1988. Tofu or not tofu? *Christian Science Monitor.* July 6. p. 21.
• ***Summary:*** According to Peter Golbitz, editor of Soya Newsletter for Soyatech Inc., sales of tofu grew 20 to 30% per year in the late 1970s and early 1980s. The sales rate has since maintained a steady 5 to 10% growth per year, probably due to over 200 new retail soy-based products that came out in 1987. Included are the author's favorite tofu recipes: Zucchini Tofu Lasagna, Sweet and Sour Tofu, and Spinach Tofu Casserole.

8661. Bulkley, Kate. 1988. Soy products' new flavor spices Denver Tofu. *Denver Business Journal.* July 11.
• ***Summary:*** Denver Tofu Inc. started business in 1925, and by 1973, they were making 150 pieces (one-pound each) a day. "Now," says Denver Tofu Inc. owner and president, Haru Yamamoto, "we make 2,000 to 3,000 pieces a day." In fact, the company's sales doubled annually from 1982 to 1987. The King Soopers grocery store reports that in the 1970s they had tofu in the produce section, but nobody knew what it was. In the early 1980s, they moved it into the dairy case and they "sold an awful lot of it". Denver Tofu makes five different kinds, ranging from extra hard to kinugoshi, or soft, silken tofu. The company also deep-fries some tofu into something called age (pronounced ah-gay). The softer tofu has always been the best seller at the Asian markets. The harder tofu has generally been a better seller in the supermarkets.

Denver Tofu employs 11 people. In the summer, the plant churns out an average of 2,000 pounds of tofu a day. In the winter, production increases to an average 3,000 pounds a day to meet demand. The company also produces 70 gallons of soy milk for sale, as well as many pounds of agé. The production room is filled with about $300,000 worth of big, steel tofu-making machines, all of which are manufactured in Japan. Yamamoto, 49, came to Denver in 1970 from Japan where he had worked in the sales and accounting branch of Dainippon Food Co. He purchased Denver Tofu Inc. in 1973 from its previous owners for an undisclosed amount. In April, 1988, the company doubled its production space to 8,500 square feet when it moved to 3825 Blake St. form its former site on Federal Boulevard. The firm had sales of about $500,000 last year, and Yamamoto projected sales to rise to $750,000 this year. Address: Colorado. Phone: 303-295-6848.

8662. Rudolph, Barbara. 1988. The drought's food-chain reaction. *Time.* July 11.
• ***Summary:*** Prices are rising. "Should the drought persist through the summer, the same will hold true for soybean-based foods, which range from trendy tofu to salad dressing."

8663. Green, Rand. 1988. Mori-Nu takes to the health and fitness circuit. *Produce News* (*Fort Lee, New Jersey*). July 16.
• ***Summary:*** When you have a product that is enthusiastically endorsed by body builders and cardiologists alike, participating in health and fitness events is a sound, sensible way to get the word out. And that is the approach being used by Morinaga. Thomas McReynolds was recently name

© Copyright Soyinfo Center 2013

marketing consultant for Mori-Nu. Tofu is a cholesterol-free protein source, low in sodium, high in calcium, free of saturated fats, and is "darn close to a perfect food," McReynolds stated. People are, for example, participating in the Mr. and Ms. California bodybuilding finals in July and in "all of the health and fitness expos". There is the "Heart Healthy Golf Classic" in Westlake Village, California in September which is being co-sponsored exclusively by Mori-Nu for heart patients who want to lead active lives in spite of their heart disease. And there is a new publication called Heartcorps. McReynolds said that the company is working with the American Heart Association in the development of a brochure called "Holidays a la Heart," which provides heart-healthy recipes.

8664. Paino, John. 1988. Recent developments at Nasoya: Simply Natural and Tomsun (Interview). *SoyaScan Notes.* July 19. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The proposed merger with Simply Natural is stalled, and it is not clear how it will end up. The main problem seems to be that Nasoya has been unable to work out the technical details of the process for making Simply Natural's soft tofu cheese. Nasoya supplies them with some fresh and spray dried tofu, off and on, but they also buy from a local supplier. He has been supplying them with tofu for 1½ to 2 years. The new vegi-dips are being test marketed locally, and will be formally launched in Sept. or Oct. nationwide.

Nasoya made an offer to Tomsun at the creditors committee and Tomsun did not accept it. Tomsun chose to go with Panda Foods instead, probably because they wanted to stay independent. Tomsun uses silken tofu in their Jofu and Panda may be making that tofu for them. Panda also makes their regular tofu, which competes with Nasoya. Nasoya's sales recently have gone way up as they pick up customers that Tomsun may have difficulty keeping in stock during the transition. This may be only a temporary increase. But Azumaya is now actively promoting their tofu in the area. It is not clear what will happen with Tomsun. A main question is where Tomsun will get additional financing. Jofu was the demise of Tomsun. They tried to grow too fast, and the product was not really ready. Nasoya tofu is built on quality, made from well water and organically grown soybeans. Azumaya does not emphasize quality in this way. Address: Nasoya Foods, Leominster, Massachusetts.

8665. Johnson, Lawrence. 1988. The Center for Crops Utilization Research at Iowa State University, and AOCS symposium on industrial uses of soybeans (Interview). *SoyaScan Notes.* July 21. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** This Center was founded by a $6.4 million grant in the federal budget in 1987. It will complement the work of the Northern Regional Research Center in Illinois, and try to coordinate their research. They are putting together a pilot plant and technology transfer components, a heavy emphasis on marketing. All of his money initially must go into building and equipment, with none left over for research, which was not what they had asked for. He is now trying to get additional funds from the state of Iowa. Only in the last few years has the emphasis in Iowa shifted from soybean production to utilization. Profs. Sweeny and Arnold did pioneering work on industrial utilization during the 1930s. But after they retired, it died. Lester Wilson and Pat Murphy are now working on soyfoods. Dr. Walter Fehr's work in breeding soybeans for food uses (such as tofu) will also contribute to the program. The national center is made up of 2 sub-centers; he is head of one and the other focuses on meat export research. Tied to the national center is a center on trade information, with a strong export orientation. They are trying to build an integrated system: Marketing, market niche identification, technology and technology transfer to entrepreneurs, mostly in the USA. The impact must benefit Midwestern farmers. They are looking for ways to export value added soybean products to the Pacific Rim.

There will be a symposium on industrial uses of soybeans in Cincinnati, Ohio, this fall in conjunction with the AOCS meeting. protein and co-products section. Address: Director, Center for Crops Utilization Research, Iowa State Univ., Dairy Industry Building, Ames, IA 50011.

8666. *Toyo Shinpo* (*Soyfoods News*). 1988. [A study of the amount of money spent on tofu, aburaage, and natto]. July 21. p. 3. [Jap; eng+]
• ***Summary:*** From Jan. to April 1988, a total of 25.99 cakes/household were sold, which is 98.8% of last year's figure over the same amount of time. During the same period, however, natto consumption rose, 8% in January (over last year at the same time), and 15.8% in April. Aburaage consumption was slightly down, only 95.1% of last year's total in January, and 94.3% in April.

8667. *Toyo Shinpo* (*Soyfoods News*). 1988. Okara peesuto de shokupan. Kôso shori de seihin o kaihatsu [The National Vegetable Protein Association is making bread with an okara paste, developed from a specially-treated enzyme]. July 21. p. 3. [Jap; eng+]
• ***Summary:*** Mr. Ryoji Sekiguchi is president of Zenkoku Shokubutsu Tanpaku Kyodo Kumiai located at Sendagi-2-48-8, Bunkyo-ku, Tokyo, Japan. For the past ten years, the National Vegetable Protein Association has been conducting research with okara and has developed an okara paste made by treating regular okara with a special enzyme. This paste can be used in noodles, mayonnaise, miso, ketchup, croquettes, hamburgers, confectionery, tofu, ice cream, etc. One of the products that can be made from this paste is bread. It has 2% less water than a regular loaf and contains 20% okara paste. It stays fresh for twice as long

© Copyright Soyinfo Center 2013

as a regular loaf of bread. The okara paste has the following characteristics: It has no taste or smell, it is low in calories and has some protein, it has an improved texture over plain okara because of the action of the enzyme, it has vegetable fiber, and it is a health food.

8668. *Toyo Shinpo* (*Soyfoods News*). 1988. Tôfu aburaage gyôshasû, zenkoku de 559 ken heru 62 nendo kôseishô shirabe [1987 Public Welfare study shows that there are 559 less tofu and aburaage manufacturers in Japan]. July 21. p. 2. [Jap; eng+]
• ***Summary:*** However, the rate of decrease has slowed a little. In December, 1987, there was a total of 24,262 tofu and aburaage makers. Only Tokyo and Osaka have over 1,000 tofu shops. The rate of decrease has been about 2% a year. The reasons for this steady decline include the fact that it is difficult to find someone to carry on the business and because the price of land is getting so expensive.

8669. Texier, Michel. 1988. Les silos de Valence vont produire du tofu [The Silos of Valence cooperative is going to produce tofu]. *Tribune de l'Expansion* (*La*). July 25. [Fre]
• ***Summary:*** "The Silos of Valence (Drôme) is going to launch a vast industrial project for the production of tofu, a food product based on soya, used for the production of fish, entrees, and desserts. The market for tofu, which is one of the products upon which East Asian cuisine is based, is presently in full expansion in Europe, thanks to the development of foods which offer alternatives to animal proteins.

"The Valentian cooperative, one of the largest in the Rhone-Alpes region (with a turnover of 100 million French francs, and 1.9 million francs net last year), is therefore going to create an affiliate, Innoval (with capital of 4.8 million francs), which is going to invest 21 million francs in a highly automated factory. Its production should reach 2,500 tonnes next year to make Innoval the leading French tofu manufacturer.

"A financier pool, regrouping as an affiliate of Crédit Lyonnais (Lyon Expansion PME), the FDR de Sud-Est, and the fund Idianova, are going to participate in the financing of this project at the level of 3 million francs, under the form of actions and convertible options."

Note: This is the earliest document seen (Feb. 2003) that mentions Innoval. Address: France.

8670. *Tri-State Livestock News* (*Sturgis, South Dakota*). 1988. Ag news in brief. July 30.
• ***Summary:*** The North Dakota Soybean Growers Association has been named July's "Agri-Marketer of the Month" by the state agriculture department. The Soybean Growers Association was selected because of its efforts to market a soybean-based ice cream called "Tofulicious" in the state.

8671. Ali, Nawab; Gandhi, A.P.; Ojha, T.P. eds. 1988. Soybean processing and utilization in India: Proceedings of the national seminar on Soybean Processing and Utilization in India, 22-23 November, 1986. Bhopal, India: Soybean Processing and Utilization Project, Central Institute of Agricultural Engineering. v + 431 p. Illust. Authors index. 26 cm. [50+ ref]
• ***Summary:*** Organized by the Soybean Processing and Utilization Project, India. Contents: 1. Address by General Director, Dr. N.S. Randhawa. Session I: Opening session: 2. Soybeans as economic protein source, by Prof. A.C. Pandya. 3. Present status of soybean in India: Constraints and future strategies to increase its production and productivity, by Dr. P.S. Bhatnagar. 4. Present status of soybean processing and utilization in India, by Dr. Nawab Ali and Dr. A.P. Gandhi.

Session II: Harvesting, drying and storage (papers 5-16).

Session III: Physico-chemical and nutritional aspects (papers 16-21). Including: 17. Physical and cooking characters of soybeans, by T.S. Gourmama, D. Vijayalakshmi and Dr. M.P. Vaidehi. 20. Varietal variability on soypaneer preparation, by Dr. A.P. Gandhi and Dr. Nawab Ali. Note: Soyapaneer is tofu.

Section IV: Processing and oil extraction (papers 22-32). Including: 25. A simple soyapaneer pressing device for rural people, by Dr. A.P. Gandhi and Dr. Nawab Ali. 26. Soyflaking–A low-cost technology at rural level, by R.T. Patil, Dr. B.D. Shukla and Dr. A.P. Gandhi. 27. Simple technologies for making some soybased products–by Dr. A.P. Gandhi and Dr. Nawab Ali. 28. Full-fat soyflour-processing technology, storage and utilization, by H.N. Mishra and Dr. R.K. Mukherjee. 29. Preparation of soyblend snacks at domestic level, by K.M. Sahay and Dr. R.P. Kachru. 31. Extrusion process with special reference to soybean, by Dr. Nawab Ali and R.T. Patil. 32. Development of a mini-mill and its performance evaluation for soybean blended wheat flour, by B.S. Bisht.

Session V: Utilization as food and feed (papers 33-47). Most of these papers are cited separately.

8672. **Product Name:** Soya Frys, and Tofu Balls.
Manufacturer's Name: Birchwood Health Products.
Manufacturer's Address: Unit 1D, Alyn Industrial Estate, Llay Hall, Wrexham, Clwyd, Wales, UK. Phone: (0978) 761833.
Date of Introduction: 1988. July.
New Product–Documentation: Letter from D. Horbury. 1988. July 15.

8673. Bubny, Paul. 1988. Venerable soybean sprouts new uses. *Health Foods Business* 34(7):72, 74, 76, 108. July.
• ***Summary:*** Lonnie Stromnes, national sales manager of White Wave Soyfoods in Boulder, Colorado, reports that White Wave recently "upscaled" the packaging on its tempeh products; the new graphics depict tempeh in use, so that customers do not have to bring a thorough knowledge of the food into the store with them. Mitoku-USA, based in Albany, New York, imports some 20 varieties of miso. At least one manufacturer, the Asheville, North Carolina-based Great Eastern Sun, saw its miso sales increase by 20% last year. Bruce Sturgeon, the company's vice president, said Great Eastern Sun's volume on miso alone was $400,000 in 1987. Shoyu and tamari are frequently aimed at the gourmet market as well as the natural foods / specialty foods market. Owner Dale Kamibayshi of Alfalfa's Market in Boulder, Colorado said, "I think many people are still intimidated by (soyfood's) preparation." To help overcome the intimidation factor, Alfalfa's has scheduled a soyfood tasting fair for July 16; the first such fair which the store has devoted to soy.

Gary Barat, chairman of Legume, Inc. said, "I see the natural foods and gourmet markets coming together," said Barat. "And the smart marketers are realizing that." People who shop specialty stores have both eyes turned toward quality. Soy companies are increasingly making use of organically grown soybeans. There is also a trend toward using specific soybeans for specific products, a sign of a maturing industry. The trend is more prevalent in the U.S. than in Far East Asia. Westbrae, for example, uses Vinton beans for its Westsoy soy beverage. As the currency in Japan remains strong against the dollar, you're going to see more and more (soy) products produced in America. Also there will be greater growth in so-called "second-generation" soy products–dairy analogs with soymilk, soy cheese, soy ice cream and soy yogurt. Address: Associate Editor.

8674. Desikachar, H.S.R. 1988. Utilization of soybean for food uses in India. In: Nawab Ali, A.P. Gandhi, and T.P. Ojha, eds. 1988. Soybean Processing & Utilization in India. Bhopal, India: Central Institute of Agricultural Engineering (CIAE). v + 431 p. See p. 289-98. Held 22-23 Nov. 1986 at CIAE, Bhopal, India.
• ***Summary:*** Discusses the development in India of soybean foods such as soymilk, soyflour, soypaneer [tofu] and soyoil–and the possibility of replacing other pulses by soybean in common Indian foods. The need for simple, low cost processing techniques with a minimum of sophistication is emphasized.

Recently texturised soy products, paneer [tofu] made from soy milk and weaning foods made using soyflour have been on the market. Solvent extracted soybean oil and imported soy oil are used in making Vanaspathi [Vanaspati]. Almost all extracted meal is being exported.

Table 1 compares the proximate composition of black soybean (Kalitur) and pigeonpea (on a dry basis). The soybean contains 44.00% protein compared with 25.2% for the pigeonpea. The soybean contains 21.5% fat [vegetable oil] compared with 1.8% for the pigeonpea.

Table 2 compares the "Sugar content of black soybean (Kalitur) and pigeonpea (percentage)."

Another point that needs to be emphasized is that soybean or soybean meal will be most widely accepted when used for making indigenous food preparations used by most Indians in their daily diet instead of soya milk, tofu, meat analogs, etc. in which for it is likely to be used by relatively few people. With this end in view, work was initiated at CFTRI, Mysore, a few years ago to process soybean for use in making common Indian foods. "Soybean was first made into dal by removing the husk. In fact, it is much easier to make dal from soybeans than from other Indian pulses. A method and machine for making dal by a dry process was standardized at CFTRI.

"The bitterish beany taste of soybean was also found to be modified by fermentation as normally practiced for *idli* and *dosa.* In fact, soybean batter was found to ferment faster and more easily than the blackgram, because of its higher sugar content (Fig. 1). It could replace blackgram by 50% in *idlis* and fully in *dosa"* (p. 291).

Table 3, "Comparative flatus [intestinal gas] production with raw, cooked and germinated pulses" (p. 293) gives values for seven raw, cooked, germinated, and cooked & germinated Indian pulses. Black soybean produced the most flatus (5.20) followed by bengalgram [chickpeas, garbanzo beans, *Cicer arietinum*] (5.18), blackgram (4.76), cowpea (4.03), pigeonpea (3.81), horsegram (2.66) and greengram (2.26).

Because of its flatus production when used in whole or split form, soybean is more difficult to digest. "The flatus effects could be minimised by addition of clove and/or cinnamon (Fig. 2) which are normally used in preparation of North Indian type dals. Germination and fermentation as normally practiced for *idli* considerably reduce galacto oligosaccharides and reduce the flatus producing properties of soybean and other pulses as well (p. 293; See Tables 4 and 5, Figs. 3, 4 and 5).

Table 4, "In vivo gas production on isolated carbohydrate fractions from black soybeans and pigeonpeas," shows that per 10 gm coming from soybeans in the diet, oligosaccharides produce the most intestinal gas (4.80),

© Copyright Soyinfo Center 2013

followed by hemicelluloses (1.58) and pectin (0.70).

Fig. 3 shows that germination of 7 common Indian legumes reduces the content of the raffinose family of sugars, and reduces intestinal gas. Address: Deputy Director (Retired), Central Food Technological Research Institute, Mysore. Currently Consultant, Paddy Processing Research Centre (Tamil Nadu) Society, Tiruvarur [Southeast India].

8675. DeSilver, Drew. 1988. Japanese eat better, but there's a catch. *Vegetarian Times*. July. p. 8-9.
• ***Summary:*** Japanese people have the greatest longevity on the planet. A Japanese boy born in 1987 can expect to live more than 75 years, and a Japanese girl more than 80; the American figures are 70.1 and 77.6, respectively. The traditional Japanese diet–based on rice, tofu, seaweed, vegetables and fish–is assumed to be the reason Japan has one of the lowest levels of cholesterol and heart disease. But with the westernization of the Japanese diet, the average Japanese man's blood cholesterol level has risen from 180 mg% in 1973 to almost 200 mg% today. The Japanese have drastically cut their daily salt consumption–13 grams vs. 10 grams (10 grams of salt = about 2 teaspoons).

Bhopal, India: Central Institute of Agricultural Engineering (CIAE). v + 431 p. See p. 191-94. Held 22-23 Nov. 1986 at CIAE, Bhopal, India. [1 ref]
• ***Summary:*** Among nine soybean varieties used for making soypaneer [tofu], JS 7244 gives the highest tofu yield (2 kg of tofu per kg of soybeans). There is no correlation between protein, oil, and hydration capacity of the seed with the soypaneer formation.

In India, people like regular paneer with about 70% moisture content.

Note. This is the 2nd earliest English-language document seen (April 2013) that contains the word "soypaneer" or with the word "soypaneer" in the title. Address: 1. Biochemist; 2. Project Director. Both: Soybean Processing and Utilization Project, Central Inst. of Agricultural Engineering (ICAR), Nabi Bagh, Berasia Road, Bhopal-462 018, India.

8678. Gandhi, A.P.; Ali, Nawab. 1988. A simple soyapaneer pressing device for rural people. In: Nawab Ali, A.P. Gandhi, and T.P. Ojha, eds. 1988. Soybean Processing & Utilization in India. Bhopal, India: Central Institute of Agricultural Engineering (CIAE). v + 431 p. See p. 220-21. Held 22-23 Nov. 1986 at CIAE, Bhopal, India. [1 ref]
• ***Summary:*** This device is based on a screw system over a paneer forming box, which has holes on all sides and is chrome plated. Each box holds 2 kg of soypaneer at a time. With the help of the screw, the desired pressure can be applied and soypaneer of the desired texture can be obtained. A photo shows the device. Address: 1. Biochemist; 2. Project Director. Both: Soybean Processing and Utilization Project, Central Inst. of Agricultural Engineering (ICAR), Nabi Bagh, Berasia Road, Bhopal-462 018, India.

8679. Gandhi, A.P.; Ali, Nawab. 1988. Simple technologies for making some soybased products. In: Nawab Ali, A.P. Gandhi, and T.P. Ojha, eds. 1988. Soybean Processing & Utilization in India. Bhopal, India: Central Institute of Agricultural Engineering (CIAE). v + 431 p. See p. 233-40. Held 22-23 Nov. 1986 at CIAE, Bhopal, India.
• ***Summary:*** Summary: A number of soyproducts are available on the Indian market, including extruded full fat or defatted soy flours, soy-oil, etc. These products have great potential in combating protein energy malnutrition in rural India. However, they are very expensive and beyond the reach of the common man. Therefore, some simple, low technology soyproducts such as full fat soy flour, ready to eat soydal, soypaneer and soyflakes were developed at CIAE, Bhopal. These technologies can easily be adopted by farmers and villagers with the assets available to them.

For each of these four soyproducts is given: 1. Process. 2. Quality of product. 3. Organoleptic evaluation. 4. Storage studies. 5. Promotion (The technology developed is being taken to a number of villages, where training programmes are organized in preparation of the various soyproducts).

From 10 kg of soybeans about 7.5 kg of fullfat soyflour was obtained. Fullfat soy flour was incorporated at a level of 10-20% into various indigenous food and evaluated. These foods include *chapati*, *puri*, *pakodeva*, *sev*, *bread pakoda*, *soypeanut crisp*, *burfi*, *mysore pak*, and *halwa* [*halva*]. At this level, all of the products containing soyflour were as acceptable as their nonsoy counterparts.

Soydal normally takes a very long time (about 5 hours) to complete tenderization. However when pressure cooked with 4 parts water at 1.05 kg per square cm, together with turmeric, salt, other spices and starches, the cooking time

© Copyright Soyinfo Center 2013

was reduced to 30-45 min.

Soypaneer or tofu costs about Rs. 5 per kg compared with Rs. 30-35 pr kg for milk paneer. Thus it has great potential as a substitute for milk paneer. Every week it is sold at the Institute's sales counter. Address: 1. PhD, Biochemist; 2. PhD, Project Director. Both: Soybean Processing and Utilization Project, Central Inst. of Agricultural Engineering (ICAR), Nabi Bagh, Berasia Road, Bhopal-462 018, India.

8680. *Health Foods Business.* 1988. Tofu: The proteus of soyfoods. 34(7):78, 108-09. July.
• ***Summary:*** Tofu is like a real-life shmoo, one of the characters in the comic strip *Li'l Abner.* Shmoos were lovable, obliging little creatures that turned themselves into whatever kind of meal anyone desired. Tofu can be served up as almost anything–burgers, ice cream, pasta, you name it.

Tofu was the only soyfood to be included as a primary ingredient in every category of soy-based products introduced in 1987, according to the Bar Harbor, Maine based research company Soyatech, and it is tofu that may be readily found in many mainstream supermarkets. A key reason for tofu's popularity is its versatility. But it was not until the introduction of "second-generation" tofu products in the 1980s that the American public began to catch on.

Note: Proteus was an ancient sea god of Greek mythology, capable of assuming different forms. He herded flocks of sea creatures for Poseidon (the Greek god of the sea, and counterpart of Neptune, the Roman god of the sea). Possessed of the gift of prophecy, Proteus was constantly hounded by those seeking his knowledge; he eluded them by assuming a variety of shapes. Whether used by scientists or nonspecialist writers, *protean* typically suggests adaptability or mutability.

8681. **Product Name:** [Dessert Tofu (Yogurt-like Product in a Yogurt Cup)].
Manufacturer's Name: Izumi Shokuhin.
Manufacturer's Address: Akimoto Building, Minamidai 5-27-32, Nakano-ku, Tokyo, Japan. Phone: 03-384-6991.
Date of Introduction: 1988. July.
New Product–Documentation: Toyo Shinpo. 1988. July 21. p. 12. "Izumi Shokuhin Inc. (Tokyo) has a new product, a dessert tofu which is refreshingly sweet." Mr. Aoyama is the president of the firm. His company is selling a yogurt-like tofu dessert in a yogurt cup. It is not a dairy product and it is easy to digest. The name, "Dessert Tofu" is designed to cause no confusion about what the product really is. Everyone will know exactly what it is and what it can be used for.

8682. Lieb, Mary Ellen. 1988. Is Tofutti back on track? Company hopes to pick up more steam with new product rollouts. *Dairy Foods* 89(7):28. July.
• ***Summary:*** David Mintz of Tofutti Brands, Inc. predicts, "Better Than Cheesecake will revolutionize the dessert industry. It is an answer for those who must avoid cholesterol, but who still desire the great taste and premium quality." Tofutti Brands' cholesterol-free cheesecake alternative does taste very much like the real thing. Better Than Cheesecake comes in a 20-ounce size for supermarket retailers and in a 3.5-pound size for foodservice operators. Tofutti Brands' short history has been marked by dramatic ups and downs. Mintz established the company in 1981 under the name Tofu Time and took it public in 1983. Tofutti frozen dessert was a quick hit, and the company's sales shot up from $2 million in 1984 to $17 million in 1985.

By the next year, however, sales had plummeted to $12 million, and they continued downward to $7.7 million in 1987. Several factors contributed to Tofutti's nosedive. Increasing competition in the frozen dessert category was one. Mintz's decision to terminate a master distributor agreement with the Haagen-Dazs Co. was another. This spring, however, Tofutti Brands completed its first profitable quarter in the past seven. Perhaps much of the company's resurgence can be attributed to its new distribution network. Thirty-five distributors have been added in the past year, and Tofutti has made a comeback in supermarket freezer cases. The company also has reduced Tofutti's suggested retail price by about 20% to an average of $2.09, which makes it more competitive with superpremium ice cream.

Tofutti Brands can't yet afford the expense of consumer advertising. For now, the company is concentrating its marketing efforts on the grocery trade, offering retailers quarterly promotions. Tofutti also relies heavily upon in-store sampling to introduce consumers to its tofu-based treats.

8683. Mital, B.K. 1988. Utilization of defatted soy flour for food. In: Nawab Ali, A.P. Gandhi, and T.P. Ojha, eds. 1988. Soybean Processing & Utilization in India. Bhopal, India: Central Institute of Agricultural Engineering (CIAE). v + 431 p. See p. 310-21. Held 22-23 Nov. 1986 at CIAE, Bhopal, India. [15 ref]
• ***Summary:*** Abstract: "This paper briefly describes the manufacture of soyprotein products and their food applications. The major products are defatted grits / flours, protein concentrates and protein isolates. The soybean protein products are used in food formulations as a dietary protein and also for their functional properties." Soy protein has "wide application in cereal foods such as chapati fortification, baked food, *idli, dosa*, and *dhokla.* Fermented and coagulated products such as soymilk, soyyogurt, soy paneer [tofu] and ice-creams are very popular. Texturised products could also be made from soybean."

Since the potential of soybean meal for feed or food has not been fully exploited in India, a major portion of the meal is exported. Soybean meal contains about 50-52% protein whose quality is close to that of milk protein. It is ironic that this protein-rich material which could be used effectively to combat malnutrition in India "is exported to affluent

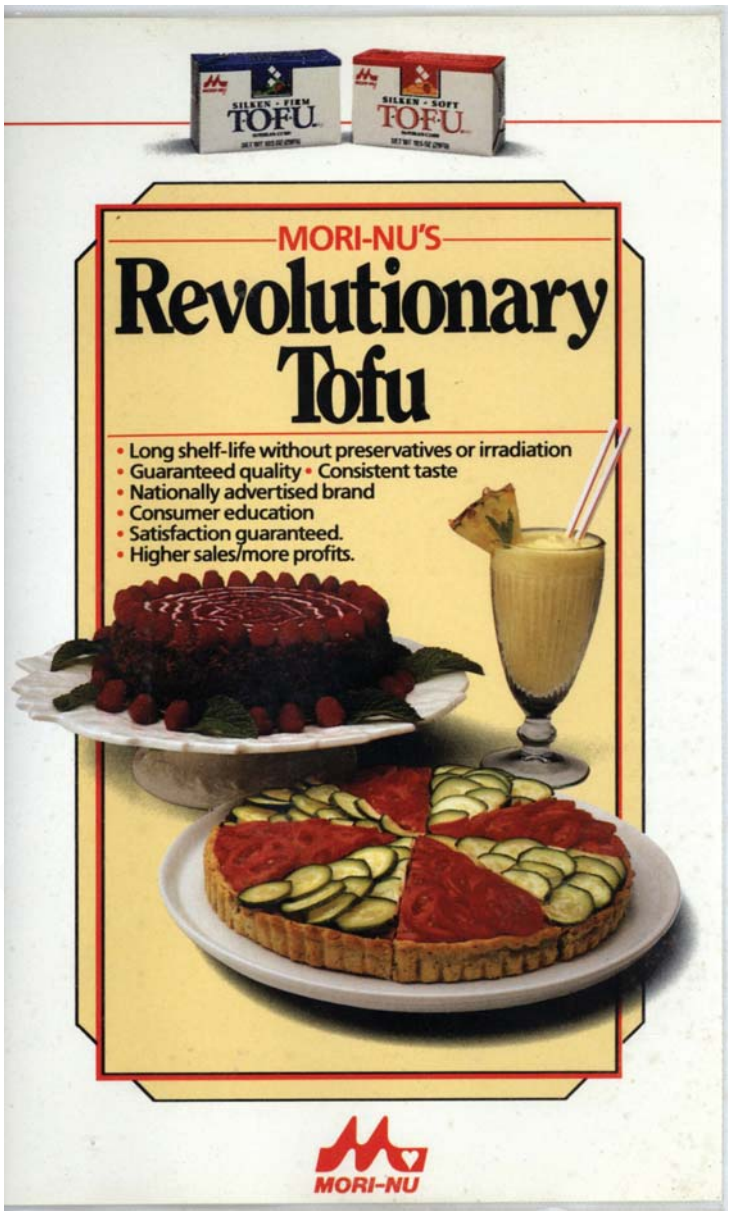
© Copyright Soyinfo Center 2013

countries, where it is used as cattle feed."

4.1.3 "Idli, dosa, and dhokla" (p. 316): "Blackgram can be partly (50-75%) substituted with soybeans in the preparation of Indian products such as dosa. Idli and dosa mixes can be developed incorporating defatted soy flour. It will substantially enhance the nutritive value of such products." Address: PhD, Prof. & Head, Dep. of Food Science & Technology, G.B. Pant Univ. of Agriculture & Technology, Pantnagar, India.

8684. Morinaga Nutritional Foods Inc. 1988. Mori-Nu's revolutionary tofu (Color videotape). 5800 South Eastern Ave., Suite 270, Los Angeles, California 90040. 5 minutes. VHS. July.

• ***Summary:*** This video, targeted at the employees of food stores who buy food, introduces and promotes Mori-Nu Tofu.



The presentation is extremely professional, informative, colorful, and 100% American. American tastes have changed to lighter foods. "The tastes of America are changing. Where the foods we desired were once rich and creamy, now they are low in cholesterol, low in saturated fat. Counting calories has become a national pastime. In our quest for better health and a slimmer waistline, must we now say good-bye to flavor? Good-bye to scrumptious? Good-bye to mouth-watering? Not on your life! America, say hello to every delicious dish you see here. Say hello to Mori-Nu Tofu. Who says you can't have it all? A new revolutionary packaging process developed by Morinaga Foods, one of Japan's largest food and dairy concerns, has enabled tofu to become widely accessible, and more compatible with American tastes. Rich in protein, no cholesterol, low in calories, saturated fats and sodium, tofu is a mainstay of the Oriental diet. However it has yet to enjoy a similar popularity in America. There are several reasons for this. It is often not fresh when sold. And the hygienic standards of many tofu manufacturers are questionable at best. Tofu's moist, protein-rich makeup is a perfect medium for rapid bacterial growth, leading to quick deterioration and spoilage. Its traditional packaging of a gelatinous white curd cake floating in water is unappealing to the average American consumer. The subtle taste of tofu is just plain tasteless for American palates used to burgers, pizzas, and Coke. And because it's such a healthy, nutritious food, tofu has wrongly become associated with trendy fad foods fit only for health nuts. But with one revolutionary process, Morinaga Foods has solved all these problems. Using ultra-hygienic state of the art technology, Morinaga has developed a process where soymilk, the prime ingredient of tofu, is pasteurized then immediately put into an aseptic package and hermetically sealed. The soymilk transforms into tofu right in the package. And because that package has locked out all microorganisms, light, and oxygen, there is no deterioration and spoilage. Without refrigeration, without preservatives, without irradiation, Mori-Nu is guaranteed to be first-day fresh for up to 10 months. Because of Mori-Nu, tofu is finally ready for the American market, and the American market, hungry for the perfect high-protein low-calorie food, is more than ready for Mori-Nu. Realizing this, Morinaga Foods is creating a major push to present Mori-Nu properly to Americans."

The modern Morinaga tofu plant in Japan, the production process, and the aseptic packaging are described. The two styles of Mori-Nu Tofu are shown, and their use in many colorful dishes and drinks. Morinaga has published numerous recipes and created the Health for Life Club.

The end shows an address and phone number for buyers to contact in order to order Mori-Nu Tofu.

Note: Talk with Art Mio. 1990. Feb. 16. Although it typically costs $1,000 per minute of final video to produce a good quality video, this one and its 5-minute counterpart, produced by a Salt Lake City, Utah, company, cost more than $50,000 to make. It is a good idea to finish all the basics (scripting, recipe development, etc.) before scheduling the production time. Address: Los Angeles, California. Phone: 213-728-4325.

8685. Morinaga Nutritional Foods Inc. 1988. Mori-Nu's tofu magic (Color videotape). 5800 South Eastern Ave., Suite 270, Los Angeles, California 90040. 30 minutes. VHS. July. Price: $9.95.
• ***Summary:*** Step by step advice on cooking with Mori-Nu Tofu. Julia Weinberg and Jonelle Goddard show how to prepare 6 recipes using "the miracle food of our modern times." As each recipe is introduced, the ingredients and instructions are shown in clear white letters against an blue background, accompanied by music. The emphasis is on recipes that are healthful, quick and easy to prepare, stylish and colorful, and free of or low in cholesterol and calories.

The recipes are: (1) Honey Lemon Un-Cheesecake (dairy free) contains no cholesterol and only 260 calories per slice versus 460 for a typical dairy-based cheesecake. Topped with a little Mori-Nu Tofu whipped from a pastry tube, Jonelle concludes: "That is wonderful. You've got to try it." (2) Thick & Creamy Tarragon Salad Dressing. Free of cholesterol and low in calories, it is made with fresh herbs. Place in the fridge for 1 hour to let the herbs and flavors blend. After a description of Mori-Nu Tofu itself, the varieties, packaging, and shelf life we have... (3) Herb Pinwheel Quiche. It uses less eggs and cheese (Swiss and Parmesan) than a regular quiche, replacing them with Mori-Nu Tofu, yet with no sacrifice in taste. After baking for 35 minutes, it is decorates with sliced veggies and rebaked for 10 minutes. (4) Eggless Egg Salad. With no cholesterol and turmeric for color, it is rolled up in a chapati with lettuce and tomato. (5) Creamy Banana Date Shake. Dairy- and cholesterol free, it uses 1 package of soft Mori-Nu Tofu with 1 cup apple juice, 4 dates, and a ripe medium banana–all whipped together. (6) Crunchy Peanut Butter Pops. Tofu, peanut butter, honey, etc. are blended and poured into ice cube trays or popsicle molds. Dip in graham cracker crumbs or chopped peanuts. Kids love 'em.

The cooks conclude that they have barely scratched surface of the possibilities. One could also make pastas, enchiladas, blintzes, burgers, ice creams, etc. The recipes are given in Julia's new Mori-Nu cookbook titled *Tofu Magic.* Viewers are also invited to join the Health for Life Club, to receive 6 issues of the newsletter per year, with 6 series of recipes and coupons.

The executive producer of the video is Morinaga. Director: John B. Carter. Writer/Director: Michael Bockman. Beautifully done! Address: Los Angeles, California. Phone: 213-728-4325.

8686. Mukherjee, R.K. 1988. Soybean as food. In: Nawab Ali, A.P. Gandhi, and T.P. Ojha, eds. 1988. Soybean Processing & Utilization in India. Bhopal, India: Central Institute of Agricultural Engineering (CIAE). v + 431 p. See p. 299-309. Held 22-23 Nov. 1986 at CIAE, Bhopal, India. [8 ref]
• ***Summary:*** Soybean foods sold commercially in India include paneer, meat analogues (Nutrinugget, Nutrella, etc.), cereal-based items (biscuits, breads, chapatis, kinako), weaning foods (Protein Plus, Paustic Ahar, Nutri Ahar), and Others (Soy nuts, Protesnac, candies, shortenings, margarines, oil) (p. 300).

It would appear that protein fortification of cereals would result in better and more nutritious foods at relatively less cost. Traditional Indian foods such as *chapatis, parathas, puris, dosa, bada, idli* etc. can be made into highly nutritious foods by the incorporation of soy flour.

Studies conducted by Mishra and Mukherjee (1986) at the Post Harvest Technology Centre of the Indian Institute of Technology at Kharagpur have shown that wheat flour can be successfully fortified with full fat soy flour up to a level of 25% for chapati making without affecting adversely the flavour or overall acceptability of the chapatis. Bread, biscuits and other bakery products fortified with soy flour were found to have good consumer acceptance. Another important use of soybean would be soy dal which is a traditional" food in India. Yet it is not yet widely used because of the long cooking time (about 130-140 minutes) and the residual beany flavour. This small problem can be overcome by appropriate heat processing. 'Several other products such as soy milk, curd [tofu], 'srikhand' [sweet flavoured yogurt dessert] etc. may also be made using soybean."

Soy protein concentrates and isolates are also commercially available. "The evolution of soybean and soybean products is very timely in that more and more people are now turning to nonanimal protein" (p. 308). Address: PhD, Post Harvest Technology Centre, Indian Inst. of Technology (IIT), Kharagpur 721 302, India.

8688. Rajor, R.B.; Cheryan, Munir. 1988. Khoa like product from soybean and milk solids. In: Nawab Ali, A.P. Gandhi, and T.P. Ojha, eds. 1988. Soybean Processing & Utilization in India. Bhopal, India: Central Institute of Agricultural Engineering (CIAE). v + 431 p. See p. 364-66. Held 22-23 Nov. 1986 at CIAE, Bhopal, India.
• ***Summary:*** A simple technology for making a product resembling khoa from soybean and milk solids was developed. The product contains 13.37% protein and 14.3% fat. Sugar was added to the soybean and milk solids and water in a steam kettle to make burfi [barfi, burfee, borfee]. These products were very much liked by the consumers.

A flow sheet shows the process for making a khoa like product and a barfi like product from soybean. Table 1 gives the composition of the khoa like product.

Note: Khoa (also khoo-wah) is a milk food widely used in the Indian cuisine, made of either dried whole milk or milk thickened by heating in an open iron pan.

"It is similar to ricotta cheese, but lower in moisture and made from whole milk instead of whey.

"There are three types of khoya [khoa]–batti, chickna, and daanedaar. Batti, meaning 'rock,' has 50% moisture by weight and is the hardest of the three types; it can be grated like cheese. It can be aged for up to a year, during which it develops a unique aroma and a mouldy outer surface. Chickna ('slippery' or 'squishy') khoya has 80% moisture. For daanedaar, the milk is coagulated with an acid during the simmering; it has a moderate moisture content. Different types of khoya are used for different preparations.

"Khoa is used as the base for a wide variety of Indian sweets. About 600,000 metric tons are produced annually in India. Khoa is made from both cow and water buffalo milk" (Source: Wikipedia, at Khoa, Oct. 2012). Address: 1. PhD, Div. of Dairy Technology, National Dairy Research Institute, Karnal, India; 2. Dep. of Food Science, Univ. of Illinois, Urbana, Illinois 61801.

8689. Schmit, Matthew. 1988. Brief history of the Tofu Shop (Arcata, California). 768 18th St., P.O. Box 4716, Arcata, CA 95521. 2 p. Unpublished manuscript. Handwritten.
• ***Summary:*** The Tofu Shop Specialty Foods Company, a member of the Soyfoods Association of America, was born in the Colorado Rockies in 1977 and relocated in Northern California [Arcata] in 1980. The deli opened in Dec. 1980. From the beginning, the emphasis of the business has been to serve the freshest tofu possible. In doing so, the company has attempted to both emulate and preserve for our western culture the unique experience of the traditional Asian neighborhood tofu shop. Keeping this as the guidepost for the business, today the company operates both a retail delicatessen and a manufacturing-wholesale operation from its facility in Arcata, California. The retail deli operates as a showplace for the company's products, and is a blending of the traditional Asian tofu shop with the classic deli of western culture, where customers can purchase just-made tofu and other delicacies right over the counter.

The deli also fulfills the functions of research-development and education for the company. The manufacturing-wholesale part of the company consists of a tofu-production operation and secondary-foods kitchens. Small batches, open-cauldron cooking, hand-pressing of soymilk and gravity flow all combine to produce our unique tofu. Our product line now consists of 18 products. It's exciting now for the company (7-10 employees) to begin distribution to a larger area thanks to the fine folks at Wholefood Express. Address: Arcata, California.

8692. Spence, Cathie Slater. 1988. Tennessee's ghost farm: A personal odyssey back to a pioneering alternative community. *East West.* July. p. 46-53.
• ***Summary:*** The best report seen to date of changes at The Farm following "the changeover" in the Farm's economy in 1983 away from a communal form. The change required that everyone pay their way. A $200,000 debt was paid off and the land was owned free and clear but less than a third of the population stayed thru the changeover. Many who had invested a decade of their lives left with nothing–but bitterness, feeling betrayed. Stephen Gaskin feels betrayed and angry. Roberta Kachinsky is preparing to market her tofu cheesecake nationally. Address: Cambridge, Massachusetts.

8693. Vaidehi, M.P. 1988. Home level processing and utilization of soy based food products for rural and urban people. In: Nawab Ali, A.P. Gandhi, and T.P. Ojha, eds. 1988. Soybean Processing & Utilization in India. Bhopal, India: Central Institute of Agricultural Engineering (CIAE). v + 431 p. See p. 336-54. Held 22-23 Nov. 1986 at CIAE, Bhopal, India.
• ***Summary:*** "This paper presents some of the research work in soybean processing and utilization carried out at University of Agricultural Sciences, Bangalore."

Contents: Abstract. Introduction. Physico-chemical characteristics. Varietal effects and processing application of soy products: Green soybean variety Hardee is a nutritious palatable vegetable, Davis variety of soybean is superior to Hill variety in its nutritive components, cooking and sensory quality of soybean varieties, physical characteristics (10 varieties), cooking quality of soybeans (9 varieties), fat and protein contents of soybean varieties (10 varieties), cooking quality of soydal, acceptability of soy products, varietal effect on soymilk yield and organoleptic characteristics (19 varieties), use of black soybean (LBS-11) in comparison with Hardee and pigeonpea.

Use of soy in traditional foods: Nutritional value of Indian tandoori naans, rotis and bread blended with pulses and oilseeds, home and hosteliers use of soybean products. Use of soy in fermented foods: Preparation of tempeh culture for commercialization, nutritional and sensory evaluation of tempeh products made with soybean, groundnut and sunflowerseed combinations (with flow sheet), acceptability of soybean incorporated rice *idlis.* Use of soy in baked products: High protein biscuits made with ragi flour and oilseed flour blends (16 types of flour were prepared with all purpose flour {maida}), cookies from malted cereals and oilseed flours.

Use of soy in beverage production for milk products and weaning foods: Protein and energy content of acceptable beverages prepared with blends of soy, skim milk, sesame, coconut and malts from wheat, ragi and green gram (blended malt beverages, chemical analysis), evaluation of tofu and its products prepared from soymilk in combination with sunflower seed milk and skim milk (with flow sheet for tofu). Consumer reactions to soy products: Consumer evaluation of tofu, tempeh, curd and Meal Maker in rural and urban areas, consumer evaluation of soy products in rural areas, consumer choice of fast foods from soybeans, supplementary foods (soy nuts for snacking), short term training program (3-day) for soy use in daily diet, community participation.

Table 4 "Ranking of different soy products by a panel of judges" shows (p. 341) which soybean varieties produce the highest quality recipes in which soy products are used to make dishes common to South India. For each food we will give only the top-ranking soybean variety, even though the table gives the top four. Cooked dal (KHSB-3). Mashed dal (PK-7392). Vadai (PK-7392). Idli (DS-7427). Dosai (Hardee).

Page 344: Costly chickpea or blackgram dal flour is replaced by hosteliers in part by soy flour–with good acceptance–in traditional Indian preparations like *dosa, pakodas, vade, bajjie,* and *bondas.* "The same could go to home level use by way of ready mixes with 30% soyflour incorporation." In outer coatings and batter preparations the substitution of soyflours is easily accepted by all. "Meatless meats (TVPs) and blends of soyflours in defatted form can be used in the preparation of mutton soup, cutlets, koftas, and meat loaves at 15% level substitution without any change in acceptability by consumers."

There follows a long discussion of tempeh.

Page 351: "Consumer evaluation of soy products in rural areas. One hundred rural housewives were served with several soy incorporated beverages and snacks for their evaluation. It was found that 80% of the rural people were unaware of soy bean and its uses."

Table 10 shows the pooled percentage of rural families who scored very good or good for soy dishes (in descending order of overall acceptability, which is shown in parentheses): Soy kheer (100). Soy idli (98). Tofu burfi [barfi, burfee, borfee; a sweet confection] (97). Soy butter milk (94). Soy sambar (87). Soy pakoda (76). Tofu curry (75). Tofu pakoda (67). Soymilk curds (66). Oriental flavoured milk (59). Flavoured soymilk (57). Soy chutney (52). Soymilk (41).

Conclusion: "For home level soybean use, easy availability of soy processed products is very important. Low prices, accessibility and proper education to bring awareness and importance of soy in daily diet would undoubtedly boost the use of soy products at home level." Address: PhD, Assoc. Prof. and Head, Univ. of Agricultural Sciences, Hebbal, Bangalore–560 024, India.

8694. *Vegan* (*The*) (*England*). 1988. Pass it on! Haldane Foods. Summer. p. 17.
• ***Summary:*** "Haldane Foods' Tofeata Tofu–one of the best around in my opinion–is currently being sold with an excellent free recipe leaflet. With the exception of honey in

a few cases, all 20 recipes are vegan. If you're a regular user of this brand, keep any spare copies and pass them on to friends.

"The same company has a new range of ready-to-mix meals called 'Easy Cuisine' comprising: Vegetable Curry & Brown Rice Mix, Vegetable Goulash & Potato Mix, Spaghetti Vegetable Bolognese Mix, Vegetable Ragout & Dumpling Mix, Vegetable Cottage Pie Mix, and Vegetable Burger & Couscous Mix. All are quick and easy to prepare and very useful to have in the larder. They provide enough for one generous serving, but by using some of the recipe ideas on the back of the packets would easily stretch to two."

Note: A new Vegetable & Tofu Burger from Cauldron Foods is also mentioned.

8695. *Whole Foods.* 1988. Morinaga retains new broker. July. p. 36.
• ***Summary:*** Morinaga Nutritional Foods Inc. has retained CBB Integrated Sales and Marketing as its new western region broker.

8696. **Product Name:** Tofu.
Manufacturer's Name: Woodstock Tofu Co., Inc.
Manufacturer's Address: 344-A Glasco Turnpike, Woodstock, NY 12498.
Date of Introduction: 1988. July.
New Product–Documentation: Talk with Joel Schuman. 1989. Sept. 5. This company, which is no longer in business, was owned by Bob Whitcomb, who now owns Sunflower Natural Foods, located in the Bradley Meadows Shopping Center, in Woodstock. In about 1987 Bob bought the business from Joe Jaffer, who had started it in about 1981 as Greenleaf Farms in Pennsylvania. Bob wanted to run the business as a side line. But due mostly to management and business problems, they couldn't make it, so the business and/or equipment is for sale. They were making only 1,500 lb/week of tofu. Note: Bob also owns Woodstock Electric. Phone: 914-679-5933 or 34. Talk with Joseph Jaffer. 1989. Sept. 16. Bob Whitcomb bought Joe's tofu business in June 1987, but didn't start making tofu until July 1988. He had a partnership with 3 other people that he met in an EST group. He had partnership problems almost from the beginning. And the operation was not well organized. The quality declined and was inconsistent. He had problems getting and keeping workers. Unlike Joe, they did not have their own water and they had to pay rent on the building, so their break-even volume was twice his. Toward the end they were losing lots of money.

8697. **Product Name:** [Tofusan Tofu Spreads (Natural, Dill, Green, Shallot, Pommodore, With Hot Sauce)].
Foreign Name: Tofusan (Natura, Dill, Verde, Sjalot, Pommodore, Salsa).
Manufacturer's Name: Yakso.
Manufacturer's Address: Zoutstraat 17, Groningen, Netherlands.
Date of Introduction: 1988. July.
Wt/Vol., Packaging, Price: 170 gm jar.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: Fertilia price list. 1988. July. p. 34. Letter from Anthony Marrese. 1990. March 22.

8698. **Product Name:** [Tofume Smoked Tofu (Mushroom, Celery, Paprika)].
Foreign Name: Tofume (Champignon, Sellerie, Paprika).
Manufacturer's Name: Yakso.
Manufacturer's Address: Zoutstraat 17, Groningen, Netherlands.
Date of Introduction: 1988. July.
Wt/Vol., Packaging, Price: 170 gm.
New Product–Documentation: Fertilia price list. 1988. July. p. 34.

8699. Hymowitz, Ted. 1988. Early Swedish work with soy sauce in Canton, China (Interview). *SoyaScan Notes.* Aug. 1. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Ted learned that there was a Swedish colony in Canton in the period 1750 to 1760. Perhaps they knew something about the Bowen-Flint [Samuel Bowen and James Flint] affair, so he examined early Swedish literature, though he can't read Swedish. He found a document on methods of preparing Chinese soy by M. de Groupens. Berkeley or Harvard might have this document. The earliest Europeans to refer to the soybean were Carletti (1597), Saris (1613), and Fernández Navarrete (1665); Ted discovered all of these early references. There must be many other early references in travel logs, but it takes so much time to read them. He will cite this in a forthcoming article on new crops.

Ted will send me an article from *The Philosophical Magazine* (1804) by M. de Grubbens titled "Method of preparing Chinese soy." He also has on one of his note cards the story of a man visiting Peking in 1655; the man mentions miso and tofu. Address: Dep. of Agronomy, Univ. of Illinois, Urbana, IL.

8700. Vercesi, Patrick. 1988. Rhône-Alpes: Mise en service d'une nouvelle usine de traitement du soja à Valence [Rhône-Alpes: A new factory for treatment of soya to start operation at Valence]. *Les Echos.* Aug. 2. [Fre]
• ***Summary:*** The Innoval company, an affiliate of the Silos of Valence (a cooperative for the collection and commercialization of cereals, containing 5,000 producers), is going to have constructed a 2,500 square meter factory specializing in the transformation of soya for human foods. Installed in the industrial zone of Valence, this unit, which will be totally operational in September, represents an investment of nearly 20 million French francs. Lion Expansion PME, the SDR du Sud-Est, and Idianova

© Copyright Soyinfo Center 2013

have decided to participate in this project in the form of convertible actions and obligations. The company should have 25 salaried employees, compared with 90 salaried employees from the Silos of Valence Group and a turnover of 222 million francs. The primary raw material, soybeans, is readily available, with 100,000 ha cultivated in l'Hexagone and 18,400 in Rhône Alpes, mainly in l'Ain, as well as in Drôme, where production is expected to grow to 2,000 ha in 1988 from 1,000 ha in 1987.

8701. Houston, Maureen. 1988. Soy products trim grease from your diet. *News-Democrat* (*Belleville, Illinois*). Aug. 3. p. 1C, 8C.
• ***Summary:*** Eileen Greco, who lives in New Athens, Illinois, is a soybean booster, representing the Illinois Soybean Program Operating Board. To show the versatility of the soybean, she prepared a number of dishes, from hors d'oeuvres to desserts. There was a dip with tofu, a dressing with tofu and an Hawaiian stir fry that she makes with tofu. Greco even tried to talk a New Athens grocer into carrying tofu ice cream. A couple weeks ago, she took 170 soybean paper place mats to a New Athens restaurant to hand out. The place mat lists the many uses of the soybean, under the title "Miracle Crop of Many Uses." Greco likes soy flour the best.

8702. Caspers-Simmet, Jean. 1988. Iowa firm makes tasty soybean products. *Agri News* (*Rochester, Minnesota*). Aug. 4.
• ***Summary:*** Solnuts Inc., formerly Edible Soy Products was purchased by Solnuts of Tilburg, the Netherlands, in December 1986. The company sells its product to manufacturers all over the U.S. The best known are Zero candy bars and Almond Windmill cookies. The Hudson plant also is distributor in the western half of the world for tofu-based products made in Holland by a sister company of the Tilburg firm. If American marketing efforts prove that demand exists, the company may build a plant in Hudson, Iowa. The Soynut plant currently employs nine people. With existing equipment, it is capable of producing 1 million pounds of dry roasted soynuts a month. Small photos show Linda Weigel (sales manager) and Ruth Young (office manager). Address: Minnesota.

8703. Brush, Christopher. 1988. Tofu gaining popularity in West. Program presented to planning council. *News* (*Wapakoneta, Ohio*). Aug. 6.
• ***Summary:*** Dr. Lun-Shin Wei, who came to the U.S. in 1953 and is now a professor at the University of Illinois, and Dr. Takeichi Kusaka of Shikoku, Japan, presented a special program on tofu prior to Thursday's meeting of the Mid-Western Ohio Joint Planning Council. MWOJPC, for some time, has been selling an ice cream made form tofu at various fairs. Kusaka, a graduate of the Osaka University, Japan, is regarded as "the master tofu manufacturer worldwide." He has devoted the last 42 years to research on improving processes to manufacture tofu from soybeans.

8704. *United Press International Financial Wire.* 1988. Three agricultural projects qualify for new loan program. Aug. 9.
• ***Summary:*** Energy Sprouts of San Antonio has obtained a $192,000 loan through Groos Bank of San Antonio to expand its alfalfa and [mung] bean sprout business to include tofu production, said Texas Agriculture Commissioner Jim Hightower.

8705. Stoetzer-Taylor, Nancy. 1988. The all American tofu burger. *Capital-Journal* (*Topeka, Kansas*). Aug. 11. p. 1C-2C.
• ***Summary:*** Jim Cooley is the owner of Central Soyfoods, a Lawrence-based company that has been making tofu for 10 years. In an attempt to increase the number of people who try it, Cooley has organized a tofu cooking contest the last two years in conjunction with the Douglas County Fair. Includes 7 tofu recipes.

8706. Middleton, Tom. 1988. Sewage plant gains respite [after Tomsun Foods closed in June]. *Recorder* (*Greenfield, Massachusetts*). Aug. 12. p. 1.
• ***Summary:*** Tomsun overloaded the town of Greenfield's sewage treatment plant. While the tofu plant was in full operation, the daily amount of solid waste suspended in solution averaged about 5,600 pounds–about 400 pounds more than the plant's designed limit.

Every pound of leftover soybean translates into 60 pounds of biological oxygen demand.

Tomsun Foods International, which began manufacturing at Wells Street in 1977, filed for bankruptcy in April and was forced to close the plant in part because it needed expensive renovations, including sewage treatment equipment.

The 24,000-square-foot tofu factory once employed 75 people, but in its final days only had eight.

About 120,000 gallons of waste water a day–containing unused parts of soybeans–were flushed down the drain at the factory.

8707. Bailey, Simon. 1988. Soya-based products. *Natural Choice.* Aug. 15.
• ***Summary:*** "The food of the future. The soya bean is a protein-packed food which is increasingly used as a dairy or food substitute in today's search for a healthier diet." Discusses soya milk, dairy free desserts, tofu, tofu-based foods, soya flour, soya sprouts, tempeh, soya sauce, miso, and high-tech soya foods including TVP and soya protein isolates. Address: 138 Randolph Ave., London W9 1PG, England. Phone: 01-289-7364.

8708. Rosebrock, Bob. 1988. Brief history of Rosebrock's

© Copyright Soyinfo Center 2013

Tofu Burger Cafe (Interview). *SoyaScan Notes.* Aug. 22. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Bob first tasted soy (not tofu) burgers in 1973 in Hawaii. He opened his first restaurant selling tofu burgers in Malibu, California, in December 1984. It was called Rosebrock's Garden Cafe. In early 1987 he changed the name to Rosebrock's Tofuburger Cafe. The store sold an average of 50-70 tofu burgers a day, hitting 100 on some weekends. Many stars were among his clients. He buys his burgers from a manufacturer, marinates them in a garlic & dill sauce, heats them, then dresses them up by brushing on one of several special sauces, such as garlic-herb, pesto, etc. A menu shows that the burgers are sold on whole wheat buns with various combinations of trimmings: Classic Tofuburger California Style (mayonnaise, lettuce, sprouts, tomatoes, onion, dill pickle), Pestoburger (with zesty pesto sauce), Maliburger (with garlic herb sauce), Ultraburger (with both pesto and garlic-herb sauces), Avocado Burgers (avocado sauce), and Veggie Burger (fresh from the garden). He also sells a Chicken Burger. Prices average $3.75. A leaflet for Rosebrock's Tofuburger Cafe announces: Specialty tofuburgers, salads and sandwiches, buckwheat waffles, high energy protein shakes, blueberry bran muffins, fresh fruit smoothies, fresh juices, and wheatgrass juice.

His Malibu store was closed to make way for a shopping mall. He now has one store in Venice. Eventually he hopes to have stores in Brentwood, Pacific Palisades, and Malibu. The Malibu one may be a drive-thru. Competition is the Garden Burger (no soy and well marketed), and Jeremiah Ridenour's tofu burger, which is sort of generic. He hopes to start making his own burgers pretty soon. Address: Venice, California.

8709. Tachihata, Chieko. 1988. Re: Early tofu making in Hawaii. Letter to William Shurtleff at Soyfoods Center, Aug. 22. 1 p.
• ***Summary:*** "In the 'old days' tofu was made locally for just one 'village' or sugar plantation. I know of at least one plantation where a woman made enough for one plantation on a daily basis, and sold the tofu from her home location for the consumption of the Japanese community." Address: Librarian, Special Collections, Thomas Hale Hamilton Library, 255o The Mall, Univ. of Hawaii at Manoa, Honolulu, Hawaii 96822.

8710. Pirello, Robert J. 1988. Tofu cheese product and process of preparation. *U.S. Patent* 4,765,995. Aug. 23. 4 p. Application filed 16 Sept. 1987. [9 ref]
• ***Summary:*** Soybean curd is manufactured from a firm, relatively non-porous tofu brick by coating the brick with a thin mellow white miso coating, fermenting the coated brick, removing the miso, steaming, and whipping. The low-fat, low-cholesterol end product has a soft, creamy, water-separation resistant, spreadable texture. Address: 620 Christian St., Apt. 2C, Philadelphia, Pennsylvania 19147.

8711. Lee, Ken. 1988. New developments with yuba, soymilk, and tofu at Soyfoods of America (Interview). *SoyaScan Notes.* Aug. 29. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Soyfoods of America started production in Nov. 1981, making yuba, soymilk, and tofu. Of the yuba, 90% is fresh frozen sheets and 10% is dry sticks. This company is the only maker of fresh yuba in America and he ships it nationwide, to Houston, Dallas, Seattle, Chicago, etc. It is sold mostly to the Oriental market but also to a few health foods restaurants such as Healthys in Hawaii, and Orean. All imported yuba is dried. It takes 3 months to get here and usually contains preservatives, bleach, and dyes. His prices is 4 times the imported product but he still can't keep up with demand. He now has 4 workers, working 2 shifts. They make 240 cases/week with 200 sheets/case = 48,000 sheets/week. It is all hand-made now but he may automate. Of the company's total sales, 50% is soymilk, 30% is tofu, and 20% is yuba. The soymilk is sold mostly to Chinese, Vietnamese and other Asian-Americans. They are going to make a soymilk without beany flavor. They sell 150 cases/week of half-gallon bottles of soymilk to Price Club. Spicy Tofu and Tofu Noodles were introduced in Jan. 1984. The brand "Furama" means "fortune" as in "good fortune." Address: 1091 E. Hamilton Rd., Duarte, California 91010. Phone: 213-681-5393.

8712. Chen, Edwin. 1988. Criminal charges filed over 'grossly filthy' tofu plant [K.Y. Foods]. *Los Angeles Times.* Aug. 30. p. 3. Metro section.
• ***Summary:*** The plant, at 4607 S. Main St., has been the subject of two previous criminal prosecutions, in 1979 and 1982, when it was owned by D.Y. Imports, which was acquired a year ago by K.Y. Foods.

Named in Monday's complaint were K.Y. Foods Inc.'s general manager, Taek Kwan Oh of Monterey Park, and president Kyu Yong Kim of Alhambra. Address: California.

8713. Hill-Holtzman, Nancy. 1988. Korean foodmaker charged with allowing fecal bacteria in its tofu. *Los Angeles Herald-Examiner.* Aug. 30.
• ***Summary:*** A Korean-style food manufacturer with a history of health violations was charged yesterday with 31 misdemeanors after inspectors found high levels of fecal bacteria in the firm's tofu products and decaying rodents in its warehouse. K.Y. Foods, under its former ownership of D.Y. Imports, was hit with criminal charges in 1979 and 1982 for health violations, Hahn said. In 1985, the company destroyed $30,000 worth of contaminated tofu during inspections.

The company's food products are sold under the brand names CR Brand, DY Brand and KY Foods.

© Copyright Soyinfo Center 2013

KY Foods General Manager Taek Kwan Oh, 25 of Monterey Park and its president, Kyu Yong Kim, 53, of Alhambra, were named in the complaint. Address: California.

8714. Braine, Theresa. 1988. Area woman's home business based on tofu. *Register Citizen¼* (*Torrington, Connecticut*). Aug. 31. p. 6.
• ***Summary:*** Cipah Shapiro creates nutritious, low-calorie, cream-cheese style spreads from tofu, a food derived from soybeans–plus some cream cheese. She changes her spreads with the season, depending on which vegetables, herbs and spices are growing and fresh in her 2,400 square foot organic garden, with raised beds, out back. Last week she introduced a new line containing no dairy product at all–one does notice its absence. She sells the spreads to local stores and to individuals. "Her tofumania began in the fall of 1983," when she began developing the spreads for herself and her husband. But the idea of turning it into a business came in about 1986.

A photo shows Cipah Shapiro standing in her lush organic garden behind a sign on the gate that reads: "Blue Twine Farm." Address: Staff.

8715. Ridenour, Jeremiah. 1988. Monterey Bay Soyfoods, Western Soy Complements, and Wildwood Natural Foods (Interview). *SoyaScan Notes.* Aug. 31. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Jeremiah got interested in soyfoods in June 1977 because of his interest in vegetarianism and because his parents grew soybeans on their farm. In July 1979 he established Monterey Bay Soyfoods, a sole proprietorship, in Santa Cruz, California. Initially it was a company that allowed him to do research. Then he began to making tempeh, which was first sold commercially in February 1980. But for about 9 months he produced tempeh out of his garage and sold it out of the house in ½ and 1 pound quantities without a label or a brand name. This was the first commercial tempeh made in Santa Cruz.

At about this time (late 1979 or early 1980) Buddy Hamel started a company named Clearway Soyfoods on 17th Ave. in Santa Cruz, making tofu. In Feb. 1981, Jeremiah wrote an article on transforming a dead refrigerator into a tempeh incubator, and in July 1981 another article about using a honey extractor for dewatering soybeans for tempeh; both were published in Soyfoods magazine.

In April 1981 a new company was formed named Western Soy Complements (WSC). A corporation with four stockholders, including Jeremiah, it was located in Jeremiah's garage at 335 Pennsylvania Ave. and made tempeh brand-named Santa Cruz Tempeh. "We grew the best tempeh ever in my garage. It has never been quite as good." Then in Nov. 1981 WSC moved into the back of the Well Bean Deli, where they cooked and incubated the tempeh. Tempeh of the Sea (with nori) was launched in about 1982. After about 18 months, in June 1984, WSC was moved to 1560 Mansfield Dr., Suite D in Santa Cruz. Then marinated tempeh burgers came in about 1985. In March 1987 they brought out the Tempeh Temptations (fried and marinated) and Three Seed Tempeh, and in June Curried Rice Salad with Tempeh (and carrots), which in September started to be private labeled for Wildwood. WSC has always made only tempeh.

In Sept. 1985 Jeremiah began a joint venture in Santa Cruz with Wildwood Natural Foods. Monterey Bay Soyfoods sort of became part of Wildwood. Wildwood had distributed WSC's tempeh in northern California. Buddy Hamel and Clearway, a tofu manufacturer, had just gone out of business. Wildwood wanted to make tofu in Santa Cruz. The first product (tofu) was sold in June 1986. Jeremiah now owns some of the stock in Wildwood Natural Foods of Santa Cruz. Wildwood has outgrown its space, so they are planning to find a new location for WSC (maybe one building away) and let Wildwood fill its space. Jeremiah is working on adding vitamin B-12 to his tempeh. Address: Santa Cruz, California. Phone: 408-476-4448.

8716. Brown, Judy. 1988. Soy-based yogurt and yogurt-like products–Where are they today? *Soya Newsletter* (*Bar Harbor, Maine*). July/Aug. p. 1, 12-13. [1 ref]
• ***Summary:*** During 1987 no fewer than seven soyfood companies were in the market with soy yogurt or yogurt-like products: Tomsun Foods International (Jofu), Azumaya (Stir-Fruity), Cream of the Bean, Brow Cow West (Soy-O), Bud, Inc., Natural, Inc. (Soy yogo), and Marjon Specialty Foods (Marjon Tofu Yogurt). Address: Maryland.

8717. **Product Name:** [Tofu].
Manufacturer's Name: Die Benjamine?
Manufacturer's Address: Kreuzberg, Berlin, West Germany.
Date of Introduction: 1988. August.
New Product–Documentation: Die Geschaeftsidee. 1989. Dec. p. 33. This company was started in Aug. 1988 by four friends who liked tofu making: Detlef Dorrow [Dorow], Ralf Hoffmann, Shi-Jong Chen, and Michael [Misha?] Wolff. They built a residence behind their tofu shop. They now make 1,000 kg/week of tofu. Note: This company apparently later became Berliner Tofurei, then (by Jan. 1992) Die Tofurei.

8718. Goulder, Lois; Lutwak, Leo. 1988. The strong bones diet: The high calcium low calorie way to prevent osteoporosis. Gainesville, Florida: Triad Publishing Co. 223 p. No index. 24 cm. See p. 85-87, 108-09. [10 ref]
• ***Summary:*** Page 86 states that tofu made with calcium sulfate contains three and a half times as much calcium as that coagulated with nigari. The authors recommend that

© Copyright Soyinfo Center 2013

men ages 18-45 and women ages 18 to menopause consume 1,000 to 1,200 mg of calcium a day (100-120% of the U.S. RDA), but that post-menopausal women not taking estrogen consume 1,500 to 2,000 mg/day (150-200% of the U.S. RDA). The U.S. RDA is set by the U.S. Food and Drug Administration (FDA), whereas the RDA (Recommended Daily Allowances) are set by the Food and Nutrition Board of the National Research Council of the National Academy of Sciences in Washington, DC. The RDA for calcium for adults is 800 mg.

Soy-related recipes in Chapter 10 (p. 119-168) include: Salmon tofu spread (p. 120). Hawaiian carrot salad (with tofu, p. 127). Oriental tofu dressing (p. 130). Broccoli yogurt-tofu bake (p. 139). Tofu Nuggets Napoli (p. 143). Tofu Oriental rice (p. 144). Address: 1. 2963 Falmouth Rd., Shaker Heights, Ohio 44122.

8719. **Product Name:** Organic Nigari Tofu, Organic Smoked Tofu, Tofu Mayonnaise, Tofu Burger.
Manufacturer's Name: Kaiora Natural Ltd.
Manufacturer's Address: CPO Box 3007 (180 Victoria St. West), Auckland 1, New Zealand. Phone: (09) 370 454.
Date of Introduction: 1988. August.
New Product–Documentation: Letter from Austin Holden. 1988. Dec. This August they began to produce a wider range of soy products. They use locally grown organically certified soybeans ("Biogro" certified by IFOAM), Japanese nigari, Artesian well water. The organic smoked tofu is solidified with calcium sulfate. The standard block is sliced in two in the horizontal plane and then woodsmoked with Manuka, a variety of native tree wood. This is the wood traditionally used to smoke fish in New Zealand.

Tofu Mayonnaise contains unrefined rapeseed (Canola) oil, organic tofu, organic rice malt, organic lemon juice, organic brown rice vinegar, sea salt, spices, and vegetable gums. It is packed in glass. Tofu is sold in bulk and vacuum packed trays. Smoked tofu is vacuum packed. Burgers are sold only through the company's retail store at present.

8720. Kiri Bue Ro. 1988. August. New soyfoods restaurant or deli. Sonezaki 2-B-4, Kita-ku, Osaka-shi, Japan.
• ***Summary:*** Toyo Shinpo. 1988. Aug. 1. p. 6. "Kiri Bue Ro restaurant captures the romantic theme of the floating Meiji period, serving 30 new and traditional tofu dishes". Mr. Okamoto is the manager of the Kiri Bue Ro restaurant. They are open from 5-12 p.m. every night. They use 100% nigari tofu made from Japanese soybeans. They also play background music by the Beatles.

8721. Klaper, Michael. 1988. Vegan nutrition: Pure and simple. 2nd ed. P.O. Box 959, Felton, CA 95018-0959. Or 8563 Empire Grade, Santa Cruz, CA 95060. iii + 72 p. Illust. 27 cm. [137* ref]
• ***Summary:*** An excellent, highly readable introduction to the subject by a physician. The Acknowledgments page (p. 69) reads like a "Who's Who" of vegetarianism in the USA in 1988. Dr. Klaper gives special thanks to "Cynthia Pararo Klaper, for her indispensable editing suggestions, tireless efforts, and loving support." Soyfoods (especially tofu, soymilk, and tempeh) are mentioned and discussed throughout this book. Soy-related recipes include: Tofu yogurt. Bran muffins (with soymilk). Tofu omelette. Tofu tahini dressing. Blond miso dressing. Tofu eggless salad. Miso soup. Hot miso dressing. Tofu cutlets. Tofu loaf.

Note: Dr. Klaper is a graduate of the Univ. of Illinois College of Medicine, with post-graduate training and experience in surgery, anesthesia, obstetrics, and general practice. Since 1972 his emphasis has been on applied nutrition. Until recently his practice was in central Florida. Address: Felton, California. Phone: 408-423-6643.

8722. **Product Name:** Barat Passionettes, After Dinner Mints, and Sweet Angels (Non-Dairy Gourmet Chocolates with Tofu).
Manufacturer's Name: Legume, Inc.
Manufacturer's Address: 116 Fairfield Rd., Fairfield, NJ 07006. Phone: 201-882-9190.
Date of Introduction: 1988. August.
Ingredients: Sucanat (granulated cane juice), unsweetened chocolate (chocolate liquor), cocoa butter, tofu powder, soya lecithin, pure vanilla.
How Stored: Shelf stable.
New Product–Documentation: *Soya Newsletter.* 1988. July/Aug. p. 8. Passionettes, individually wrapped truffles with a smooth hazelnut praline filling, are available in four and ten count, pyramid shaped boxes, or a 38 count dispenser.

After Dinner Mints, solid tofu chocolate squares with mint, come in boxes of 24. Sweet Angels are tofu chocolates in the form of twin cherubs (5 oz.). Color ad in natural Foods Merchandiser. 1988. Nov. p. 90. "Introducing the new collection. Barat Tofu Chocolate. The healthy passion! Bars, Bits, After Dinner Mints, Sweet Angels, and Passionettes (Truffles). Non-dairy. No white sugar. No cholesterol." Address: 116 Fairfield Rd., Fairfield, NJ 07006.

Ad in Gourmet Retailer. 1988. Aug. p. 87. Also in Whole Foods. 1988. Sept. p. 41. "Barat Tofu Chocolate." This semi X-rated full-page color ad (see next page) has three panels. In each is a man and woman embracing. The woman has a low-cut blouse on and the man in pajamas is naked from the waist up. Below each is the slogan "The healthy passion!" and an illustration of Barat Bars & Bits, Passionettes, and Sweet Angels.

Spot in *Shape* magazine. 1988. Dec. p. 54. "Chocolate with a Twist." "Barat Tofu Chocolate is sweetened with cane juice. But don't mistake it for diet candy. it contains 160 calories per ounces and 62% calories from fat."

Ad (5 inch square, full color) in Natural Foods Merchandiser. 1989. March. p. 78. "The new Barat

collection. Tofu chocolate. The healthy passion!"

8723. Mandoe, Bonnie. 1988. Soyfoods: The perfect pair [Tofu and miso]. *Bestways*. Aug. p. 12-13.
• ***Summary:*** Contains 7 recipes, each using tofu and miso. Address: Hawaii.

8724. McSweeney, Daniel. 1988. Consumer survey 1988. *Whole Foods*. Aug. p. 27-28, 30, 32, 34.
• ***Summary:*** Natural/organic food purchases. Percentage of respondents who purchased a type of product during the past year: 1988 all/1987 all (1988 women / 1988 men). NA means "Not Available." The following are ranked in descending order of the percentage of consumers buying the product in 1988: Tofu: 63.5/83.4% (55.6/63.5%); Tamari 55.6% / NA (57.8/50.0%); Soy sauce 47.6%/NA (46.7%/50%); Miso 41.8/69.7% (42.2/38.9%); Tempeh 30.2/NA (35.6/16.7%); Soymilk 28.6%/54.5% (31.1/22.2%). Note the sharp declines between 1987 and 1988 for soymilk -47.6%, miso -40%, tofu -24%. All soyfood products for which there are statistics for both years declined, a serious trend.

Note: The "1986 and 1987 surveys statistics were generated through a reader questionnaire in East West magazine. The 1988 Consumer Survey was handed out to shoppers at 13 different retail stores throughout the country. Due to this variance in the survey base, some statistical discrepancies may have resulted."

8725. *Mori-Nu Healthy Times* (*Los Angeles*). 1988. Mori-Nu and muscles: A championship combo. 2(4):1-2. Aug.
• ***Summary:*** Mori-Nu Tofu is putting the muscle back into the healthy diets–especially for the natural bodybuilders at Jack O'Bleness' Monster Maker Gym in Inglewood, California. "I see a big place for tofu in this sport," said O'Bleness. There is twice-daily use of Mori-Nu Tofu in the trainee's diets. Ken Lawler of the Monster Maker Gym holds the title of Mr. All-America. Like all other Monster Makers, Ken's diet consists of twice-daily use of Mori-Nu Tofu. Address: Los Angeles, California.

8726. Morinaga Nutritional Foods, Inc. 1988. Shake up profits! (Ad). *Natural Foods Merchandiser.* Aug. p. 65.
• ***Summary:*** This attractive full-page color ad begins: "Interested in building a healthier profit? As one of the fines and most sought-after tofu products on the market today, Mori-Nu delivers a powerful blend of quality products and trade support. A simple recipe to whip up sales. Why is Mori-Nu capturing an increasing share of the tofu market? Stimulates cross-promotional opportunities. Guaranteed quality and taste. Convenient FDA approved long-life package. No preservatives, no irradiation. National advertising program. Consumer education and support. Complete in-store demo program. Free and exciting color P.O.P. [point of purchase materials].

A large color photo shows a pink strawberry tofu & fruit shake in tall glass with two straws, surrounded by a pineapple sliced lengthwise into halves, plus bananas, apricots, a peach and an orange. Small color photos show two packages of Mori-Nu tofu (soft and firm), plus two recipe pads ("Mori-Nu's Tempting Tofu Desserts," "Exotic! Chinese Unchicken Salad"), coupons (15 cents off Mori-Nu Tofu), a video ("Revolutionary Tofu"), and the front page of two issues of "Mori-Nu Healthy Times" newsletter. "Order now. Call Danielle Lin, National Sales Manager, Natural Foods Division at (213) 728-4325."

This ad also appeared in: Natural Foods Merchandiser (Sept. p. 94; 1989. Feb. p. 15), and Whole Foods (Sept. p. 13, Oct. p. 41). Address: 5800 South Eastern Ave., Suite 270, Los Angeles, California 90040. Phone: 213-728-4325.

8727. Morinaga Nutritional Foods, Inc. 1988. Shake up your day with Mori-Nu! (Brochure). Los Angeles, California. 4 p. Undated. 28 cm.
• ***Summary:*** On the front page of this four-page color brochure is a blender with pink tofu-strawberry shake sloshing out the top. On the two-page centerfold are three tofu-fruit shakes, with whole and cut fruits and a package of Mori-Nu silken soft tofu. The headline reads: "Whip up delicious nutrition with cholesterol-free Mori-Nu Tofu and your favorite fruit." On the back page is the full-page color ad "Lessons in Tofu" (first published in Feb. 1988). Address: 5800 South Eastern Ave., Suite 270, Los Angeles, California 90040. Phone: 213-728-4325.

8728. *Natur* (*W. Germany*). 1988. [Tofu market explodes in Germany]. Aug. [Ger]*
• ***Summary:*** During the last two years the tofu market in West Germany has exploded. A doubling of production within 12 months is not yet the rule, but it is not unusual for large companies.

8729. *Nutrition News* (*Riverside, California*). 1988. Soy: King of the mountain. 11(8):1-4. Aug. [1 ref]
• ***Summary:*** An overview and introduction to soyfoods nutrition, tofu, tempeh, miso, shoyu and tamari, and soymilk. Note: This magazine was formerly located in Pomona, California.

8730. Schnell, Hannelore. 1988. Kleine Bohne, ganz gross [Small bean, very big]. *Natur* (*Munich, West Germany*). Aug. p. 75-83. [3 ref. Ger]
• ***Summary:*** Discusses soymilk, tofu, soy sauce, miso, tempeh, Soyastern, Svadesha Tofurei, Alpro, and DE-VAU-GE. Concludes with a detailed discussion of newly recognized potential dangers with HVP products. Vegetable seasonings made by companies such as Maggi may contain carcinogenic chloropropanols, such as dichloro propanol. Maximum limits on these are now being established.

8731. **Product Name:** [Herb Tofu].
Foreign Name: Kraeuter-Tofu.
Manufacturer's Name: Sojatopf. Renamed Soto in April 1989.
Manufacturer's Address: Friedrich-Ebert-Str. 40, D-8323 Trostberg, West Germany. Phone: 08621-62538.
Date of Introduction: 1988. August.
Wt/Vol., Packaging, Price: 250 gm.
New Product–Documentation: Letter (fax) from Harry Whitford. 1990. May 30. Gives full details on product based on interview with Gerhard (Oskar) Schramm. On 1 Jan. 1990 the company moved to Wolfbergerstr. 47, D-8211 Breitbrunn am Chiemsee, West Germany.

8732. **Product Name:** [Smoked Tofu, Fried with Mushrooms].
Foreign Name: Raeucher-Champignon-Tofu.
Manufacturer's Name: Sojatopf. Renamed Soto in April 1989.
Manufacturer's Address: Friedrich-Ebert-Str. 40, D-8323 Trostberg, West Germany. Phone: 08621-62538.
Date of Introduction: 1988. August.
Wt/Vol., Packaging, Price: 250 gm.
New Product–Documentation: Letter (fax) from Harry Whitford. 1990. May 30. Gives full details on product based on interview with Gerhard (Oskar) Schramm. Mushrooms are pressed into the tofu, which is then fried in cakes, smoked, and finally cut into pieces. On 1 Jan. 1990 the company moved to Wolfbergerstr. 47, D-8211 Breitbrunn am Chiemsee, West Germany.

8733. *Soya Newsletter* (*Bar Harbor, Maine*). 1988. U.S. soyfoods production to use 62 million pounds of soybeans in 1988. July/Aug. p. 10.
• ***Summary:*** This figure was the result of a recently soyfoods industry survey conducted by Soyatech, Inc. The soyfoods included in this projection are tofu, soymilk, tempeh, soy sauce, miso, and soynuts. When asked how they expected their demand for soybeans to grow over the next 5 years, 4.8% of soyfoods manufacturers surveyed expected it to remain the same, 52.4% expected it to grow slowly, 42.9% expected it to grow considerably, and none expected it to decrease.

8734. Liao, San. 1988. Tofu in favor for 2000 years. *China Daily.* Sept. 3.
• ***Summary:*** Contains several quotes from The Book of Tofu by Shurtleff & Aoyagi.

From the Western Zhou (1100-770 BC) to the Han Dynasty (206 BC-AD 220), soya beans were mainly cultivated in the areas along the yellow River. But by the late Han Dynasty, cultivation had extended to other areas of North China as a result of emigration. After the Han Dynasty, people developed the art of making soya been curd (tofu), oil and sprouts.

One interesting way of preparing tofu is having it frozen. This method was first discovered in the cold mountainous regions of northern China about 1,500 years ago.

8735. *Mecklenburg Gazette* (*Davidson, North Carolina*). 1988. High fat and sodium content give hot dogs a bad name. Sept. 7.
• ***Summary:*** Hot dogs are preserved with nitrates or nitrites, cancer-causing substances that give hot dogs their characteristic pinkish color. The lowest fat hot dogs around contain no meat at all and have considerably more protein, less sodium and much less fat than regular hot dogs. One of the most popular varieties of these meatless hot dogs is Tofu Pups, with its primary ingredient being tofu. At 53% fat they still do not qualify as a particularly healthy food, but they contain no saturated fat, no cholesterol and no nitrates and they are better nutritionally than "the real thing."

8736. Bernardino, Minnie. 1988. Tofu: A bland, high protein staple of Far Eastern diets, tofu in various forms, including soft, firm and even powdered and frozen, is beginning to find a place on Western tables. *Los Angeles Times.* Sept. 8. Part VIII. p. 1, 23-24. [1 ref]
• ***Summary:*** With nine gourmet recipes. Address: California.

8737. Leonard, Sue. 1988. Researchers finding new uses for soybeans. Newspaper ink is one of the newest ideas. *Times-Press* (*Streator, Illinois*). Sept. 9.
• ***Summary:*** Soybean oil goes in a lot of foods like Tofulicious ice cream, a non-dairy product desert. Soybean oil is being used "as dust control in hog houses," according to Larry Tombaugh, a soybean farmer who works with the statewide soybean boosters organization, under the Soybean Operating Board. It is also one of the big products used for dust control in large grain elevators. A good source for soybean information is the Illinois Soybean Program Operating Board, located in Bloomington. Amy Little, public relations/program assistance, said that the Champaign News-Gazette has converted to 100% to soy oil ink. She said, "One thing we've been working on at Central Soya in Fort Wayne, Indiana, is development of new products. We've taken the majority of fat out of polish sausages and sausage links; replacing fat with isolated soy protein, which acts as a binding agent."

8738. Nagata, Zenji. Assignor to Sanyo Shokuhin Kabushiki Kaisha (Nara, Japan). 1988. Coagulating box for use in making bean curd [from soy milk]. *U.S. Patent* 4,770,319. Sept. 13. 4 p. Application filed 1 April 1987. 5 drawings. Application also filed in Japan on 8 July 1986. [5 ref]
• ***Summary:*** See also U.S. Patent 4,771,681, and Japanese Patent JP 86-104629 (July 1986). Address: Yamatotakada,

Japan.

8739. Lin, Danielle. 1988. New developments at Morinaga (Interview). *SoyaScan Notes.* Sept. 14. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** In the last 6 months, Morinaga has gone from having 3 natural food distributors to having 31 now. They now sell tofu in 36 countries.

Danielle entered the natural foods industry in 1981. She started a company named Laughing Moon, making veggie turnovers containing tofu. She has played an important role in getting Morinaga to enter the natural foods market. She has a natural-foods talk show in Los Angeles. Address: c/o Morinaga Nutritional Foods, 5800 South Eastern Ave. #270, Los Angeles, California 90040. Phone: 213-728-4325.

8740. *Washington Post.* 1988. First, define terms, then start cooking. Sept. 14. p. E4.
• ***Summary:*** *"Ong chai* (water spinach, empty heart): Distinguished by its crunchy hollow stems and soft pointy leaves, it tastes like mild spinach and is often served Cantonese-style stir-fried with garlic (and sometimes fermented bean curd)."

Recipes include: Madhur Jaffrey's bean curd with Chinese parsley (which calls for "½ pound medium-firm bean curd, cut into 3/4-inch cubes" and "1 tablespoon Chinese thin soy sauce").

8741. Nagata, Zenji; Takada, Yamato. Assignor to Sanyo Shokuhin Kabushiki Kaisha (Nara, Japan). 1988. Automatic bean curd manufacturing apparatus. *U.S. Patent* 4,771,681. Sept. 20. 10 p. Application filed 2 July 1987. 6 drawings. Application also filed in Japan on 30 Aug. 1986. [6 ref]
• ***Summary:*** Describes an apparatus for automatically manufacturing bean curd, wherein a hot water tank and a means of water supply keep a coagulated soybean milk continuously covered with hot water to maintain its integrity and to prevent introduction of germs. Address: Japan.

8742. Stromnes, Lonnie. 1988. New developments with tempeh and tofu at White Wave (Interview). *SoyaScan Notes.* Sept. 20. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Tempeh sales are up 30-35% over last year because of new products and expanded distribution into new markets. White Wave tofu will be coming into California starting in October. Lucky supermarkets will have a 12-foot organic produce section starting this month or next. Address: White Wave, Inc., 14670 Doolittle Dr., San Leandro, California 94577. Phone: 415-352-1320.

8743. Stromnes, Lonnie. 1988. New developments with tempeh and tofu at White Wave (Interview). *SoyaScan Notes.* Sept. 20. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** White Wave hopes to start fortifying their tempeh with vitamin B-12 producing cultures. They have gotten patented formulas from ATTC: Arthrobacter species #31263; Propionic bacteria #13673; and Streptomyces bacteria #11009.

White Wave is now actively trying to sell their tempeh and tofu to companies that produce other foods: Their tofu is used in Amy's Pot Pie and their tempeh in the Co-op line of Spaghetti sauces. Address: White Wave, Inc., 14670 Doolittle Dr., San Leandro, California 94577. Phone: 415-352-1320.

8744. Cross, Kevin. 1988. Brief history of Soy Power Company, Inc. of Santa Monica (Interview). *SoyaScan Notes.* Sept. 22. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The company started business in Santa Monica, California, in April 1981, with Tom Binder and Kevin Cross as partners. They distributed tofu and soymilk made by Wy Ky in Los Angeles. They first started distributing other people's products in about July 1982, starting with Vegetable Jerky from Maple Meadows. When Edensoy was launched in 1983, it started to hurt their sales so they decided to get in on the action. They soon became America's leading seller of Edensoy. In April 1986 they moved the company to Marina del Rey, then in September 1988 back to Santa Monica. Today they market and distribute about 11 soyfoods products under their own brand (all made by other companies), and they distribute another 350 products from other companies. Address: 1602 Stanford St., Santa Monica, California 90404. Phone: 213-829-2331.

8745. Paino, John. 1988. Recent developments at Nasoya (Interview). *SoyaScan Notes.* Sept. 23. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Nasoya's tofu production topped 100,000 lb/week in June 1988. They are expanding their volume in previous accounts lost by Tomsun, picking up new accounts in their region, and moving into new regions such as the Midwest. The realistically now get 50 days shelf life at 50ºF. Their Veggie Dips, a reformulation of an old product, should be out in early 1989. Nayonaise and the dressings are selling extremely well: 10,000 cases a week. Talks are still going on with Simply Natural.

Jofu is still on the shelves, 4-5 varieties, with good distribution. It is made by a dairy company in Vermont.

Note: In June 1989 Danielle Lin in Los Angeles says that within the past 6 months she recalls being told by Nasoya that the company was producing 150,000 lb/week of tofu. Address: President, Nasoya Foods, 23 Jytek Park (P.O. Box 841), Leominster, Massachusetts 01453. Phone: 617-537-0713.

8746. Hauber, Nancy. 1988. Golden Soy (Interview).

© Copyright Soyinfo Center 2013

SoyaScan Notes. Sept. 24. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Nancy has sold her equipment and moved to a packer in Dayton, Ohio. Willy's in San Francisco has much too high a minimum volume. The dressings are packed by hot pack, not retorting. Gets a 1 year shelf life but a low pH is necessary. Golden Soy Foods Inc. is a corporation, with a board of directors, and a non-interest $120,000 loan out from board members. Sales have dropped recently. She is trying to decide if she should give up or try to raise $70,000 more. She is working with Ohio Univ. in Athens.

Legume buys their tofu from Nasoya. One of her big problems is always being #2 behind Nasoya with the dressings and mayo. Address: Athens, Ohio 45701.

8747. Martin-Smith, Debi A. 1988. Nasoya Foods extols the benefits of tofu. *Produce News* (*Fort Lee, New Jersey*). Sept. 24.
• ***Summary:*** Bob Bergwall is vice president of Nasoya Foods. The name Nasoya was chosen because it is a combination of natural and soy. In 1978, when the business first began, the biggest challenge for the two men was finding a place with really good well water. Depending on its firmness, tofu is 75-90% water. Nasoya had its own well dug, It is tested every two weeks for any kind of bacteria. The Nasoya Foods plant is 22,500 square feet of space with 6 loading docks. For 7 years, operations were done in a 5,000 square foot dairy farm and the staff has grown from 2 to more than 20.

8748. Knepper, Mary. 1988. Leominster is home to Nasoya tofu company. *Public Spirit* (*Ayer, Massachusetts*). Sept. 27.
• ***Summary:*** Nasoya, co-owned by John Paino (president) and Bob Bergwall (senior vice president), started out in 1978 as a very small operation in an old dairy. The name Nasoya was coined as a combination of the words "natural" and "soy," but ended up sounding rather Japanese. The company moved to new facilities in Jytek Park in 1985. [Note: The offices were moved in Dec. 1984, the plant in March 1985.] They currently package 100,000 pounds of tofu a week and employ about 50 people.

8749. Cook, Anne. 1988. Visiting journalists say Italians shunning pasta for soy products. *News-Gazette* (*Champaign, Illinois*). Sept. 28.
• ***Summary:*** Italian consumers are shunning pasta and olive oil and eating salads with soybean sprouts and dressing made from low cholesterol soybean oil, say some touring Italian journalists. "It used to be people only knew soy as soy sauce on Chinese food," said Ghigo Roggero, spokesman for the group visiting the United States to learn more about the product. "Now we cook with soy oil and eat soy sprouts and tofu," Rogerro said. Roger Leysen who works with the American Soybean Association in Brussels, Belgium, said the trip was planned to familiarize participants "with the U.S. Soybean world from the farmer to the ship at New Orleans. About half the oil sold in Italy is made from olives grown there, and it sells primarily in gourmet 'extra virgin' form," Leysen said. Soybean oil has captured about half of the remaining blended and pure oil market. Address: Staff.

8750. Rowe, Trent. 1988. Business sprouts from humble bean: Marjon foods come with recipes for how to use them. *Ledger* (*Lakeland, Florida*). Sept. 29. p. 1E, 12E.
• ***Summary:*** Marjon Specialty Foods, started by Marcia and John Miller in 1972 in their basement, is now the largest producer of sprouts in the Southeast. They have 70 employees and 7 trucks in their business based in Plant City, between Tampa and Lakewood. John is a vegetarian. Marcia is a devoted cook and amateur nutritionist. They have been making tofu for 10 years. They learned how by hiring some Vietnamese immigrants who had made tofu in East Asia to show them. Their tofu is sold in a box. Their product list, which is pages long, includes all sorts of weird and exotic wonderful foods: horseradish from Illinois, endive, ginger, plantains. One of their goals is to make unfamiliar foods familiar. Includes recipes for Tofu Chili, Tofu Nuggets, and Tofu Peanut Butter Oatmeal Cookies.

Contains a large color photo of the Millers and their products.

Also published in the *Daily News* (Palatka, Florida). 1988. Oct. 5.

8751. *Atencion San Miguel* (*San Miguel de Allende, Gto., Mexico*). 1988. Tofu comes to town. Sept. 30. p. 6. [Eng]
• ***Summary:*** Nicole Black has built a factory which will soon make this inexpensive and nutritious food–tofu–available to all. Already soy "chorizo" (a spicy sausage) is successfully being turned out, made from the fibrous part of the bean. Outside of a small tofu factory in Mexico City which supplies Japanese restaurants and a few special markets, the San Miguel factory is the first in Mexico. Mrs. Black's book containing more than 200 recipes for tofu, many of them designed for the Mexican taste, is soon to be published.

8752. Yancey, Kitty Bean. 1988. To the timid: try it, you'll like it. *USA Today.* Sept. 30. p. 12.E. Final edition.

8753. Bailey, Paul. 1988. The Chinese work-study movement in France. *China Quarterly* 115:441-61. Sept. [93 ref]
• ***Summary:*** By 1920 Chinese overseas students could be divided into two broad groups: (1) Those studying in the USA, having been influenced by the philosophy of "worshipping money" (*baijin zhuyi*) wanted to build China on the American capitalist model when they returned. These students received government scholarships and enjoyed material comforts.

(2) In France, however, the work-study students were

© Copyright Soyinfo Center 2013

concerned with practical training and participating in the world of labour. They lived frugally, spending their time "sweating and working in factories."

Between 1919 and 1921, more than 1,500 Chinese students went to France on a work-study program. Among these were many future Chinese Communist and government leaders incl. Zhou Enlai, Deng Xiaoping, Chen Yi, etc.

While in Paris many Chinese students first became acquainted with Marxism, and in 1922 the Chinese Communist Youth Party was founded in Paris. Also while in France, many Chinese students first participated in organized demonstrations against western encroachment in China.

"Origins of the movement: The founder of the work-study movement was Li Shizeng [Li Yuying] (1881-1973), the son of Li Hongcao, a Grand Councillor and one-time tutor of the Tongzhi Emperor." In 1902 was given the opportunity to study abroad when he accompanied Sun Baoqi, the newly-appointed Chinese minister to France, as an "embassy student" (*suiyuan xuesheng*). With Li went two young men who later rose to high positions in France. Later, through important contacts as these, Li was able to promote his work-study program.

"While in France Li enrolled at the Ecole Pratique d'Agriculture in Montargis, just south of Paris; upon graduating in 1905 he studied chemistry and biology at the Institut Pasteur in Paris." During this time Li became interested in the philosophy of anarchism, and particularly in the thought of Elisée Reclus (1830-1905) with whose nephew he was personally acquainted. "Li was especially impressed with Reclus's confident prediction that science and education would bring about an equal society in which the ideas of 'mutual assistance' (*huzghu*) and 'cooperation' (*hezuo*) would be realized.

"At the same time Li became an enthusiastic Francophile and his admiration for French culture and ideals never wavered through his life." In contrast, he saw German culture as autocratic, utilitarian, and militaristic. During the years that followed, Li built up a wide network of contacts among French intellectuals and politicians, which was to be of considerable benefit when he established the work-study program.

In 1906 Li Shizeng, with two young Chinese colleagues, began to publish *Xin Shiji* (*New Century*), a periodical which served as a forum for their anarchist philosophy. The same year, all three joined Sun Yet-sen's revolutionary anti-Manchu organization. In 1908, in addition to his publishing activities, Li opened a bean curd [tofu] factory (*Usine Caseo-Sojaine*) at Colombes, just outside of Paris, "and recruited 30 Chinese workers from his native village in Zhili. Li, who became a strict vegetarian, was confident that France would appreciate the nutritional value of bean-curd." In 1909 Li returned to China. Taking advantage of his father's acquaintance with the governor of Zhili, Yang Lianpu, Li was able to arrange a personal interview with Yang, who became enthusiastic about the project and contributed funds.

"It was among the Chinese workers at the bean-curd factory that Li first promoted "diligent work and frugal study" (*qingong jianxue*). A workers' school was opened near the factory in which Li and Wu Zhihui taught Chinese, French, and general scientific knowledge. A strict regimen was imposed on the workers–no smoking, gambling, or alcohol was permitted–and they were expected to devote their spare time to study. For Li, work-study was to have a moral as well as an educational function. In addition to making workers more knowledgeable, work-study would eliminate their 'decadent habits' and transform them into morally upright and hard-working citizens.

"Li was, in fact, echoing a concern prevalent among Chinese reformers since the end of the 19th century." These are summarized. "Finally, work-study also accorded with Li's belief in the unity of intellectual and manual work as the means to bring about mutual assistance, co-operation and equality in society.

Frugal study in France: In 1912 Li organized the Association for Frugal Study in France (*Liufa Jianxue Hui*) to reduce expenses in order to expand overseas study, and by labor and a simple life, to cultivate habits of diligence and hard work.

"Li was supported in his venture by Cai Yuanpei (1868-1940), who had studied in Germany before 1911 and was now education minister, and Wang Jingwei (1883-1944), a prominent member of the Tongmenghui and a close associate of Sun Yat-sen. Like Li Shizeng, Cai and Wang were both fervent admirers of France, describing it as a model republic free from the corrupting influences of monarchism and religion.

"A preparatory school, financed by the founders of the Association, was opened in Beijing in which students were taught French and other general subjects for six months in preparation for their sojourn in France... Between 1912 and 1913 approximately 100 'frugal study' students went to France, most of them going to Montargis College, the principal of which was a personal acquaintance of Li's."

Note: Author Paul Bailey is currently completing a book on popular education in early 20th century China. Address: Lecturer in Chinese and Japanese History, Univ. of Edinburgh, Scotland.

8754. CDS, PAN, MINSA (Ministry of Health, and Ministry of Agriculture). 1988. Cuaderno de nuestra olla [Soya cookbook]. Managua, Nicaragua. 24 p. 28 x 19 cm. [Spa]
• ***Summary:*** This Spanish-language health comic booklet, whose title means literally "Notebook of our stewpot," is the first book on soya in Nicaragua. From a talk with Annie Souter we learn that: CDS is the Comité de Defense Salud, a health education group from the Ministry of Health found on many barrios. PAN (which also means "bread") is a department within the Ministry of Agriculture. And MINSA

© Copyright Soyinfo Center 2013

is the Ministry of Health (Salud). Before this edition, the book existed as small photocopied leaflets provided by the Ministry of Health. Annie Souter had 1,000 copies printed by Ross Newport in Santa Cruz, California, and sent down to Nicaragua for use on her soy project.

This is an introduction to cooking with soya in Nicaragua, filled with cartoons and the message often in comic-book style captions. The little soybean is, itself, a cartoon character. The introduction explains that, in these times of hardship during the Contra war and after the great hurricane, soy is an excellent supplement to corn and rice (used in the ratio of 1:4 soy to corn), and a good replacement for eggs, meat, and milk. Illustrated instructions show and tell how to make basic soyfoods: Soymilk, soya-meat or payana (okara), tofu (cuajada y queso de soya) coagulated with lemon juice and often seasoned with garlic, soy-fortified tortillas, whole soybeans cooked with regular beans, and soy flour. The recipe section contains 38 Nicaraguan-style recipes including soy mayonnaise, tofu guacamole, and tofu with tomatoes. The book concludes with 1 page each on kitchen sanitation, growing soybeans in Nicaragua, their potential uses as oil and fodder, and a reminder: "Combining soybeans with other popular foods will give better nutrition for all the people. And our children will grow healthy and strong. Remember that they are the future of our country. 'Let's eat better without spending any more!'" Address: Managua, Nicaragua.

8755. **Product Name:** Earth Dance Vegetarian Jerki (Made with Tofu) [Original, or Hot-n-Spicy].
Manufacturer's Name: Earth Dance Vegetarian Foods.
Manufacturer's Address: 209 Commerce Drive #2 (or 305 West Magnolia #133), Fort Collins, CO 80524. Phone: 303-482-9213.
Date of Introduction: 1988. September.
Ingredients: Both: Organic soybeans, soy sauce (water, wheat, soybeans, salt), vinegar, liquid smoke, nigari (magnesium chloride from seawater) and spices.
Wt/Vol., Packaging, Price: 4 oz Ziploc plastic bag. Retails for about $4.35 (7/89, Colorado). Bulk: $0.27 per 0.38-oz piece.
How Stored: Shelf stable.
New Product–Documentation: Letter and leaflet (copyright 1988) from Jerry Manning, Sales/Marketing Director. 1989. June 20. Letter, Labels, articles, and samples from Jerry Manning. 1989. July 7. Label is 5 by 4.5 inches. Blue-green and orange on beige. Stylized illustration, based on an Australian rock painting, of 3 dancers in front of the sun on the horizon. "All vegetable. Made in Colorado. Created in the spirit of a love for life and respect for all of nature's creatures, Vegetarian Jerki is a spicy, chewy and nutritious all vegetable snack which contains no residual drugs or chemicals. Preserved naturally, Vegetarian Jerki has no cholesterol. Convenient food for conscientious people." Articles (with no year, date, or page) about the product from *The Coloradoan* (by Sally Norman), *Denver Post*, and *Rocky Mountain News.* It was created by Fran Rikhoff, age 31, a part-time housecleaner and full-time vegetarian. Soyfoods Center product evaluation. 1989. July 15. Delicious! Chewy texture and smoke-cured taste.

8756. Elliot, Rose. 1988. The complete vegetarian cuisine. New York, NY: Pantheon Books. 352 p. First American edition. With many lovely full-page color photos. Index. 28 cm.
• ***Summary:*** Visually, this is a beautiful book. The author makes minimal use of soybeans or soyfoods in her vegetarian cookbooks. She has apparently not learned that very few cultures that use soya as a traditional part of their diet use either soybeans as such or soy flour. In "Learning to love the soybean" (p. 16) she notes: "Soybeans and soy flour are rich sources of nutrients, but, in my opinion, so difficult to make palatable! However sprouted soybeans are delicious and make an excellent crunchy addition to salads, stir-fries, and sandwiches... Creamy soy milk (p. 106) and tofu (p. 108), which can both be made at home, are other palatable ways to eat soy."

Pages 38-39 contain a marvelous 2-page spread color photo of 30 different leguminous seeds (including soybean and soy flour), each with a brief description, followed by a longer description on pages 40-41. The section titled "Soybean *Glycine max"* states: "Soybeans have a strong flavor and need powerful condiments, such as curry, tomato and garlic, to make them taste good. I think they're nicest when sprouted (p. 207) and added to salads and stir-fries.

"Many products, such as miso, soy sauce, tempeh, soy milk and tofu, are made from soybeans and are described in other sections of this book.

"Soy flour is high in protein and low in starch, so it cannot be used to make a normal white sauce, although it can be stirred into savory sauces and gravies to add bulk and nutrients and is sometimes added to flour as a dough improver, in the proportion 8 parts flour to 1 part soy flour."

Pages 104-05 contain another 2-page spread color photo of dairy and nondairy ingredients, with a brief description of each, including tempeh, seitan, dried deep-fried tofu, aromatic dried tofu [probably five-spice pressed tofu = *wu-hsiang toufukan*], smoked tofu, firm tofu, soft tofu, textured vegetable protein (chunks or chopped), soy milk, and soy cream. A longer explanation is given on pages 106-06. The author does not like the strong soybean flavor or stodgy texture of tempeh. Page 108 gives a brief description of how to make tofu, and has a sidebar titled "Ideas for using tofu and vegetarian protein foods." A good but brief description of soy sauce is given on p. 184, and a poor description of "How to make soy milk" (with added vanilla, honey, and oil) is given on page 280.

Soy-related recipes include: Miso soup with bean curd

© Copyright Soyinfo Center 2013

(p. 133; a variation includes wakame). Vegan ice cream (uses soy milk instead of dairy milk, p. 280). Thus, only 1 recipe in the 352-page book uses tofu and none use tempeh.

Originally published in Great Britain as *Rose Elliot's Vegetarian Cookery* by William Collins Sons & Co. Ltd., London and Glasgow. "Rose Elliot, a vegetarian since the age of three, is one of England's most popular cookbook authors. Her many best-selling books include *Vegetarian Cooking from Around the World*, *The Festive Vegetarian*, and *The Vegetarian Mother and Baby*. An active food consultant, she has appeared often on television and radio in Britain. She lives in Hampshire, England." She was born and educated in England. Address: Hampshire, England.

8757. **Product Name:** [Tofu Cubes].
Foreign Name: Tofu Cube: Cubes de Tofu Nature.
Manufacturer's Name: Innoval. Affiliate of Coopérative Agricole Silos de Valence.
Manufacturer's Address: 441 bis Avenue Victor Hugo, 26000 Valence, France. Phone: 75.44.01.61.
Date of Introduction: 1988. September.
How Stored: Refrigerated.
Nutrition: Per 100 gm: Protein 12.5%, lipids 5.4%, carbohydrates 2.3%, calories 108.
New Product–Documentation: Note: This same product was previously made by Sojalpe. Manufacturer's brochure. 1988. In French. Tofu Cubes. Menu a la carte. Natural. Cuisine tasty and lean (Cuisine saveur. Cuisine minceur). Low in Calories. The cover shows color photos of tofu cubes used in four recipes: a salad, with a sauce, a soup, and as hors d'oeuveres.

The back discusses: The new gastronomy. The modern cuisine. Soya. Tofu. Tofu Cubes. With natural tofu cubes, one can make everything. When friends arrive unexpectedly, here is an apéritif full of fantasy to serve with cocktail snacks. If they stay for dinner, use tofu cubes in a country salad, or added to a sauce. With tofu cubes, let your imagination play. Suggestions for varying your pleasures: Like meat: with steak, in the frying pan, skewered, breaded (coated with bread crumbs then fried), in fondue, as a garnish. In salads: Fresh or cooked. In soups. In sauces: Vinaigrette, lemon sauce, mayonnaise, persillade, aioli. In main dishes (plats cuisinés): with legumes or cereal grains, pan fried to golden brown, in a casserole or gratin.

Innoval: l'alimentation intelligente. The address given in the brochure is: C.C.V., BP 49–Quartier Grangeneuve–26800 Portes-Lès Valence. Phone: 75.57.33.99.

Letter from Monica Kjellker Gimre of Alfa-Laval. 1990. May 30. Alfa-Laval sold a complete soybase plant to Innoval in France. It had a capacity of 1,500 liters/hour and began operation in 1988.

8758. Koo, Linda C. 1988. Dietary habits and lung cancer risk among Chinese females in Hong Kong who never smoked. *Nutrition and Cancer* 11(3):155-72. July/Sept. [33 ref]
• ***Summary:*** In Hong Kong, this retrospective study found a significant inverse association for tofu/soy intake and lung cancer risk among 88 nonsmoking cases compared with 137 controls, after adjustment for age, number of live births, and schooling. However this protective effect was apparent only for adenocarcinomas and large cell tumors.

Note: Vegetarian Times (March 1995, p. 85) defines a retrospective study as "A type of epidemiological study that looks at events and behaviors that have already taken place. Suggests connections but can't prove them or their relationship." Address: Dep. of Community Medicine, Univ. of Hong Kong, Hong Kong.

8759. **Product Name:** [Tofu Filaments].
Foreign Name: Filaments du Tofu.
Manufacturer's Name: Les Aliments Horium Foods Inc.
Manufacturer's Address: 1050 rue Lacasse Street, C1-18, Montreal, QUE, H4C 2Z3, Canada. Phone: 514-933-4605.
Date of Introduction: 1988. September.
Ingredients: Organic soybeans, natural salt or sea salt, purified water.
How Stored: Refrigerated.
New Product–Documentation: Form filled out by Mr. Chong-Hong Ho, owner. 1988. Nov. 11. The product was launched several months ago.

8760. Lordez, Marie-Française. 1988. Du soja dans notre assiette? [Some soya in our plate?]. *Revue Laitiere Francaise* No. 477. p. 52-53. Sept. [Fre]
• ***Summary:*** Soyfoods discussed include tofu, soymilk, and miso. Manufacturers include Cacoja, Société Soy (Soyeux brand), Lima Foods, Sojadoc, Innoval (Sojalpe brand), Maho (Tofu Kiss), Celia group, Triballat (Sojasun brand). A photo shows many soymilk products, the majority bearing the Provamel brand, made by Alpro in Belgium. Address: Ingénieur en Agriculture, IGIA, France.

8761. Morinaga Nutritional Foods, Inc. 1988. Shake off cholesterol (Ad). *Vegetarian Times.* Sept. p. 3.
• ***Summary:*** This full-page color ad shows a strawberry shake in front of various fruits (sliced pineapple, strawberries, apricots, bananas, peach, orange) and next to a pack of Mori-Nu Silken Soft Tofu. Contains a general recipe for "Mori-Nu's wake-up shake." Slogan at bottom right: "Tofu for the American taste."

This classy ad also appeared in this magazine as late as 1992. Address: 5800 South Eastern Ave., Suite 270, Los Angeles, California 90040. Phone: 213-728-4325.

8762. Ohsawa America. 1988. Macrobiotic foods catalog [Mail order]. P.O. Box 3608, Chico, CA 95927. 36 p. Sept.
• ***Summary:*** Includes imported (from Japan) soy sauce,

© Copyright Soyinfo Center 2013

miso, miso condiments, koji, and nigari [a tofu coagulant]. Address: Chico, California. Phone: 800-647-2929.

8763. **Product Name:** [Little Baden Grilling Sausage].
Foreign Name: Badener Grillwuerstchen.
Manufacturer's Name: Sojarei Ebner-Prosl.
Manufacturer's Address: Augasse 2, A-2500 Baden bei Wien, Austria. Phone: 02252/85101.
Date of Introduction: 1988. September.
Ingredients: Tofu, wheat gluten, cornstarch, yeast flakes, green rye (Gruenkern), vegetable fats and oils, salts, spices.
Wt/Vol., Packaging, Price: 150 gm.
How Stored: Refrigerated.
New Product–Documentation: Label, received 1989. Oct. Red, black, green, and white on yellowish orange. 3.5 by 3 inches. Self adhesive. Logo is a green soybean plant against a white circular background. "Fry or grill until crisp in a little oil. Before use, remove the skin! Free of cholesterol. No flesh. Pure and from plants."

Note: Also in Sept. 1988, the company introduced a Badener Bratwuerstchen (Baden Bratwurst type meatless sausage). It has similar ingredients, except that the main ingredient is wheat gluten and it contains no tofu or other soy products. The two labels are almost identical.

8764. **Product Name:** [Tof'in Tofu Burgers {Not Fried} (Italian-Style, Chinese-Style, au Gratin, Provençale with Tomato & Onions, or Forest Mushrooms)].
Foreign Name: Tof'in (Italienne, Chinoise, Gratinée).
Manufacturer's Name: SOY (Société Soy).
Manufacturer's Address: 1 rue du Crêt de la Perdrix, 42400 Saint-Chamond, France. Phone: 77.31.24.42.
Date of Introduction: 1988. September.
Wt/Vol., Packaging, Price: 2 x 100 gm in vacuum pack.
How Stored: Refrigerated.
Nutrition: Per 100 gm.: Protein 11.6 gm, fat 8.8 gm, carbohydrates 8.1 gm, calories 158.
New Product–Documentation: Letter from Bernard Storup. 1989. March 3. Tof'in (low fat tofu burgers, cooked without fat) in 3 flavors (Garlic & Fines Herbes, Provençale, and Forestiere) were introduced in April 1986 and discontinued in March 1988. Three other flavors (Italienne, Chinoise, and Gratinée) were introduced in Sept. 1988.

Letter from Bernard Storup of Société Soy. 1990. June 6. Tof'in was introduced first (in 1986) and Croque Tofu (deep-fried burgers) came second (Feb. 1987). They are the same product but the packaging for each was different.

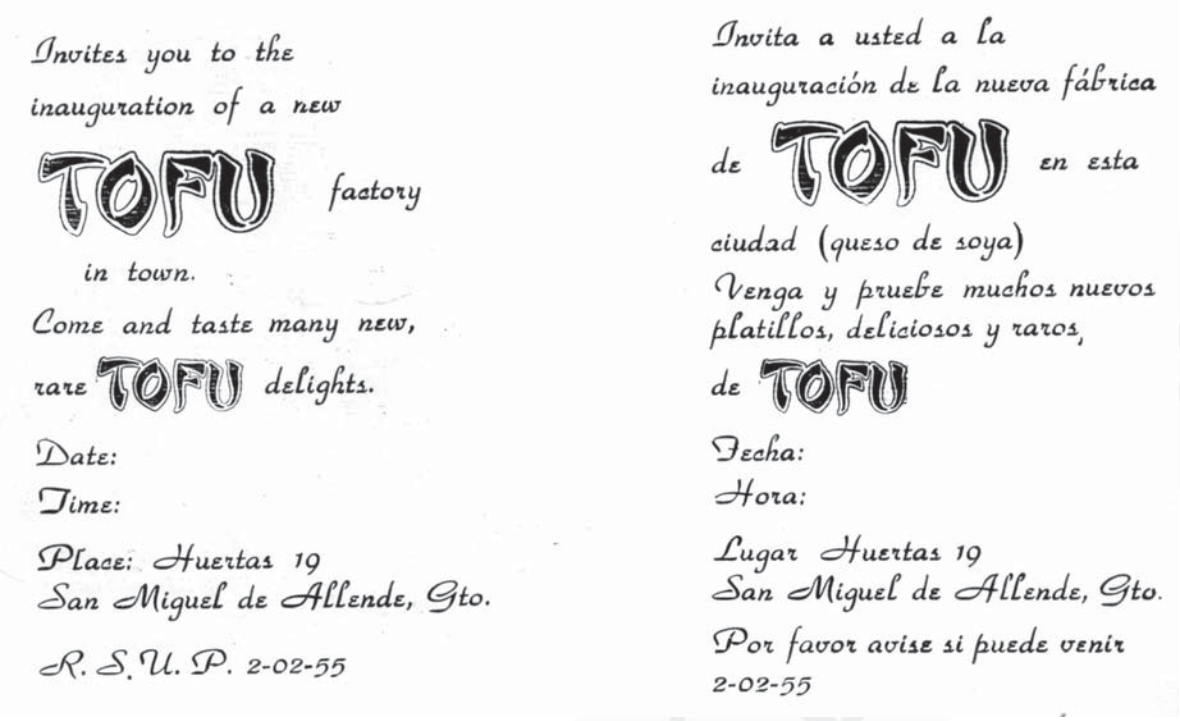
Talk with Bernard Storup. 1990. June 13. Tof'in (pronounced toe-FEEN) was packaged for supermarkets. It was the same as Croque Tofou (both were deep-fried), but not the same as Croque Tofou Léger (which was not deep-fried, and which came in Italienne, Chinoise, and Gratinée flavors). Tof'in was discontinued about 2 years ago. Then 18 months later the company launched, for supermarkets, a product named Doré de Soja, which is the same as Tof'in (i.e. deep-fried).

8765. **Product Name:** [Sr. Soya Tofu].
Foreign Name: Sra. (Señora) Soya Tofu.
Manufacturer's Name: Sra. Soya.
Manufacturer's Address: Huertas 17, San Miguel de Allende, Guanajuato 37700, Mexico. Phone: 465-20255.
Date of Introduction: 1988. September.
Ingredients: Water, soybeans, calcium chloride.
Wt/Vol., Packaging, Price: 300 gm or 450 gm.
How Stored: Refrigerated.

New Product–Documentation: Letter from Nicole Black. 1988. Sept. 18. The tofu plant has been converted from two horse stalls on their property. Her husband has had many horses and an equestrian school in town for many years. Nicole also sent a card announcing the plant opening. Sra. [Señora] Soya Tofu. Recetas y informes (Recipe and information). 1988. Oct. 6 panels. In Spanish.

Talk with Nicole Black who calls from Seattle. 1992. Oct. 5. After marrying an American who had lived in Mexico for about 25 years, she was divorced 3 years ago and lost everything. At the time she left, the tofu business was not doing well. It was very difficult for her as a foreigner to introduce this completely new food into a traditional Mexican diet. She worked with hospitals and with the DIF, an organization of the Mexican government that does some work educating poor people about soy and nutrition. In her town of San Miguel de Allende there lived an American

© Copyright Soyinfo Center 2013



woman, Peggy Zava, who was a vegetarian and also head of the local DIF. Her husband was the mayor of the town and she convinced him to buy Nicole's tofu factory. They took it out of her house and moved to a different part of town.

Now she is planning to make second generation tofu products for institutions in Seattle.

Call from Nicole Graboi who calls from Oregon. 2012. June 6. Even though Peggy bought all of Nicole's tofu equipment, she was never able to re-start the tofu shop, in part because she was divorced from the mayor.

8766. Zemel, Michael B. 1988. Calcium utilization: Effect of varying level and source of dietary protein. *American J. of Clinical Nutrition* 48(3S):880-83. Supplement. Sept. Proceedings of the First International Congress on Vegetarian Nutrition. Held 16-18 March 1987 at Washington, DC. [26 ref]

• ***Summary:*** "Dietary protein exerts a significant calciuretic effect. A twofold increase in protein at constant levels of calcium and phosphorus intakes causes a 50% increase in urinary calcium. The protein-induced hypercalciuria results primarily from decreased fractional renal tubular reabsorption of calcium..." Dietary phosphorus increases renal tubular reabsorption of calcium and thereby exerts a hypocalciuric effect. "Consequently a soy-based diet was able to maintain calcium balance at a calcium intake of 457 mg/day in spite of a protein intake of 90 gm, presumably due to the lower level of sulfur amino acids in the soy diet and to the 1,450 mg of phosphorus which accompanied the soy protein." In other words, when soyfoods (soymilk or tofu) were the primary sources of protein in the diet, calcium equilibrium was maintained, even when calcium intake was low and protein intake relatively high. Address: Dep. of Nutrition and Food Science, and the Div. of Endocrinology and Hypertension, Wayne State Univ., Detroit, Michigan 48202.

8767. Lutze, Gerry. 1988. Sensible food can be tasty! *Observer* (*Ormond Beach, Florida*). Oct. 5.

• ***Summary:*** Carol Opper and Beverly Young of The Diet Center are actively promoting tofu. One brand they recommend is Mori-Nu Tofu. The article contains 7 tofu recipes.

8768. Orbuch, Paul. 1988. Brief history of Wildwood Natural Foods (Interview). *SoyaScan Notes.* Oct. 7. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** The roots of Wildwood go back to the late 1970s. Paul Duchesne started making a Tofu & Brown Rice Sandwich in sort of an underground way, not really running an official business and doing it out of the kitchen of the Sleeping Lady Cafe, founded by Bill Bramblett (also a rock musician) in Fairfax, Marin County. Duchesne probably bought his tofu at the nearby Good Earth Natural Food Store. At one point Duchesne left to study macrobiotics at the Kushi Institute in Boston; he turned the business (which still had no name) over to a fellow named Chris Smith, who came up with the name "Wildwood." Duchesne started a similar business in Boston. Later Duchesne returned from Boston and Chris decided to go to Boston so they swapped the two businesses this time.

In 1980 Bill Bramblett and Duchesne decided to join

© Copyright Soyinfo Center 2013

forces, make their own tofu, and find partners to raise capital. So they approached Paul Orbuch (a successful professional photographer) and Frank Rosenmayr (a contractor and real estate broker), who decided to become partners. Duchesne contributed as his share only the very successful concept and recipe for the Brown Rice and Tofu Sandwich. The other three put in capital and planned to remain silent partners, with Duchesne running the business. In 1980 the four established a corporation named Wildwood Natural Foods Inc. In about 1981 [actually April 1983] Duchesne and all his rights and assets were bought out by the other 3 partners. Duchesne went on to establish another business, which failed shortly thereafter. Bramblett is excellent as an historian.

Note: Paul was in charge of Wildwood's labels during the early years, and he also collected early soyfoods labels from other companies. Address: Wildwood Natural Foods, 135 Bolinas Rd., Fairfax, California 94930. Phone: 415-459-3919.

8769. Duchesne, Paul. 1988. Development of the Brown Rice & Tofu Sandwich, and early history of Wildwood Natural Foods (Interview). *SoyaScan Notes.* Oct. 8 and Aug. 16, 1989. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Paul Duchesne developed the world's first "Fried Rice & Tofu Sandwich" in Fairfax, California. Duchesne's sandwich was one of America's early second generation tofu products. He deliberately called it a sandwich, even though it was made in a chapati, to make it sound more American. Today there are a surprisingly large number of U.S. companies making a Brown Rice & Tofu Sandwich. Duchesne started 3 of these companies and gave the basic recipe and production methods to the people who started most of the others. All descendants of the original BRTS have also been made in a chapati.

In late October or early November 1977, Duchesne sold the first 200 of them to participants at a macrobiotic seminar led by Michio Kushi in Marin County. Donna Gayle helped him make them. They were very popular; the key secret ingredient was a miso-sesame butter spread which Paul had learned of from George Ohsawa's book *Zen Cookery* (Miso Spread #203).

In Jan. 1978 he started making these sandwiches at the Sleeping Lady Cafe (a co-op started in about 1975 in Fairfax, Marin County) and selling them at the Good Earth Natural Food Store in Fairfax. He bought his tofu, made by Quong Hop & Co. off the shelf at the Good Earth. In Feb. 1978 he began to distribute them to many natural food stores throughout Marin County. Note: Billy Bramblett says (July 1998) that Paul was not licensed to make or sell food and had no business name.

While in California in 1978 Duchesne gave his recipe and production techniques to Roy Steevensz in Los Angeles. Roy was making Fried Rice & Tofu Sandwiches by May 1978 on a big table in his living room. He continued until about 1984. Roy is now claiming that he created the idea. Paul and others were bringing Roy to the Bay Area as a macrobiotic teacher in 1977. Originally Roy was making seitan in Los Angeles.

In September 1978 Paul went to Boston to study macrobiotics, so he gave his Fairfax sandwich business (which still had no name) to Chris Smith. A month later, in October 1978, Chris stopped frying the brown rice and renamed the product, coining the now-famous name "Brown Rice & Tofu Sandwich." At the same time he named his business Wildwood Natural Foods. In late 1978 Chris Smith taught Joe Nixdorff, who started the company City Samurai in Berkeley and made the Samurai Hero from 1978-1982. In Boston, Duchesne lived in The Garvey House, a macrobiotic study house. There he started to make his brown rice and tofu sandwiches. The operation soon grew into a business, which he named Rice House. He also taught his process to Marty Roth and Barbara Svenning Garvey Roth, who lived in the Garvey house; several years later Marty and Barbara moved to Santa Fe, New Mexico, where they started a business making the BRTS. Later Barbara made it near Asheville, North Carolina. Marty and Barbara in turn taught the sandwich to Jeff Fairhall, who started Essential Foods in Seattle and built it into a thriving business.

In May 1979 Duchesne and Chris Smith traded places and companies. Thus Chris took over Rice House in Boston, making the transition without missing a day of production and delivery to Brookline, Cambridge, and Boston. He renamed the product Brown Rice & Tofu Sandwich. Chris ran the company until 1981, when he sold it. It is still in operation and named Rice House. Paul left Boston for California, and took over the company he had started originally (now named Wildwood Natural Foods) in Fairfax.

In Oct. 1979 Bill Bramblett (a monied rock musician and part owner of the Sleeping Lady co-op) approached Duchesne and proposed that he invest in the company and expand the sandwich business, including distribution to Sacramento. The company was making only about 100 sandwiches a day at the time. Duchesne declined, saying he wanted to build a traditional, cauldron-style tofu shop around the sandwich operation–an idea that he had conceived while in Boston. Bill said he couldn't afford that so Paul found two more people with money to invest. In May 1980 Duchesne, a sole proprietor, incorporated Wildwood. He gifted shares to Bill Bramblett, Paul Orbuch, and Frank Rosenmayr. Then they invested money so that of the 4 people so that ended up owning 25% of the stock. In Sept. 1980 the company moved out of The Sleeping Lady and down the road to 139 Bolinas Rd. They set up a tofu shop and started to make their own tofu. Duchesne's business plan showed that the operation would open in July. Instead opening was delayed until September 1980, which was the slower rainy season.

In late 1980 Richard Leviton visited Duchesne and

© Copyright Soyinfo Center 2013

Wildwood. In the Winter (Feb.) 1981 issue of *Soyfoods* magazine, in an article titled "Putting tofu in the lunch boxes of America" (p. 61), Leviton gave a detailed description of the shop: "which appears to fulfill the dreams of many soyfoods proprietors by combining both light tofu manufacture with light sandwich production in a clean, efficient, and industrious little shop. Mr. Duchesne designed his shop as a tofu showcase with broad wall-to-wall front windows so that passers-by may glimpse tofu production during the days. Wildwood produces a line of eight packaged vegetarian sandwiches including Brown Rice and Tofu Sandwich (with vegetables in a whole wheat bun), Tofu Vegetable Salad,..."

In late 1980 the business was operating in the red. Bramblett, Orbuch, and Rosenmayr attributed the delay to poor management and in Dec. they, controlling the board of directors, demoted Duchesne (who was working long hours) from general manager to president and sales manager, with a salary cut. There were bad feelings. The board then acted as general manager and met each Tuesday night. There were frequent conflicts between Duchesne and the other three. They wanted to expand faster than did Duchesne. By Feb. 1981 the business was operating at a profit. In Dec. 1981 Duchesne proposed that Wildwood start a distribution company (which he would head) to distribute products made by Wildwood and others. The other three disliked the idea, so a week later Duchesne quit (but kept all his Wildwood stock), bought a big new refrigerated truck, and in January 1982 started his own natural foods distribution company named Cauldron Express; it distributed products made by companies other than Wildwood–such as Brightsong Tofu, Pacific Tempeh, and Grain Dance Seitan. The Wildwood owners felt that Duchesne was competing with them so they repeatedly made life difficult for him, and they were a major factor in his bankruptcy 9 months later in September. (Later, Wildwood got into the business of distributing products made by other companies–with a fervor.) In April 1983 in bankruptcy court, Duchesne signed a covenant not to compete with Wildwood for 5 years and sold all his stock and rights to the other three; he ended up getting $5,000.

In about 1981, at the heyday of the brown rice and tofu sandwich, there were 5 companies in the San Francisco Bay area making 1,000 of them each day. Then the California Health Department began to wake up. When they realized that tofu was a perishable protein food that should be refrigerated, they decreed that all BRTSs be taken off the front counter of stores and sold out of the refrigerator. Sales dropped.

In Oct. 1988, after 5 long years, Duchesne returned to the soyfoods business making a BRTS and doing business as Bert's Place (Best Ever Rice & Tofu Sandwich). Wildwood challenged him for breach of the non-compete clause. The earlier agreement was not clearly written and The judge basically favored Duchesne in the arbitration. He had to rename his company to Paul's Place, which ended up in March 1989 as Paul's Organic Food Works. In early 1989 Duchesne developed a chronology of events relating to Wildwood's history, a chart showing the progeny of the original Fried Rice & Tofu Sandwich, and a collection of labels for these progeny.

Articles on Wildwood have been published in the *Pacific Sun* (16-22 Jan. 1981, Food & Drink Section by Linda Xiques, pronounced Zirksus), *Independent Journal* (San Rafael; about 1985-87), *The Fax* (Fairfax, Jan. or Feb. 1986, written by Lisa Alpine, who wrote an earlier article about Wildwood in about 1983-84). Duchesne has been married for 24 years to a nurse; they have 2 children. Address: Fairfax, California. Phone: 415-453-2360.

8770. Bailey, Simon. 1988. Re: New developments with soyfoods in the UK: British Arkady, Haldane, Realeat, and The Regular Tofu Co. Letter to William Shurtleff at Soyfoods Center, Oct. 10. 2 p.

• ***Summary:*** In Feb. 1988 Haldane was acquired by British Arkady's Health Food Division. Brian Welsby and Peter Fitch are joint managing directors. Haldane brings in the Hera, Realeat, and Direct Foods lines. Brian Welsby is the key man at Haldane.

The Realeat Company, maker of the VegeBurger and Vegebanger, formerly owned by Gregory Sams, no longer exists. In the summer of 1988 Haldane acquired the Realeat brand. Greg Sams retains interest in the company, but purely as a consultant, without controlling interest. The Regular Tofu Co. is now also part of Haldane Foods. John Holt, the founder of RTC, is no longer involved. Address: 138 Randolph Ave., London W9 1PG, England. Phone: 01-289-7364.

8771. Schecter, Andy. 1988. History of Northern Soy (Interview). *SoyaScan Notes.* Oct. 10. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** In August 1975 Jay Thompson, who was on the kitchen staff at the Rochester Zen Center, read a notice on tofu that William Shurtleff had written to *East West Journal.* He wrote Shurtleff in Japan requesting instructions for making tofu. Shurtleff sent him a basic recipe. In September, having had good results, he wrote back asking for a larger scale recipe. Shurtleff sent him a chapter of a book he was writing on *Tofu & Soymilk Production.* Soon members of the kitchen staff (Thompson, Martha Gifford, Debbie Lebeaux, and Andy Schecter) were making tofu on the large kitchen stove (using a Corona Mill) for members of the community.

Several months later, when they had showed that the process was practical and wanted to expand, they set up a small tofu shop in the basement of Zen Center, cooking over a candy stove. At that time several volunteers, Greg Weaver and Greg Mello, who were members of the Center but not of the kitchen staff, also began making tofu in the new

© Copyright Soyinfo Center 2013

basement shop. This tofu was used only by members of the Center, and was not sold commercially.

Then Weaver and Mello decided to start a commercial tofu shop, so they formed a partnership and rented space at 277 N. Goodman St. in Rochester. Greg Weaver got some checks printed on which the business name was given as Flying Cloud Tofu. When Greg Mello saw that name he was so upset that they had a big fight and decided they didn't want to work together. Greg Weaver went off to work in landscaping, and Greg Mello asked Andy Schecter to come in as a partner. After several months (when the checks were used up), the business name was changed to The Tofu Shop.

In about October 1977 Greg Mello decided to leave. Greg Weaver took his place as Andy's partner. Norman Holland came in the following year, in 1978.

In Nov. 1977 Earl Lepper started making tempeh in his home in Rochester and having a rough time. He would take it out of the incubator and walk it over to the Genesee Co-op, where it was sold. He decided to drop the business and leave town, so Northern Soy decided to make him a generous offer for basically his technique and equipment–he didn't have much of a business. Shortly he returned to Rochester and went to work for Northern Soy making their tempeh.

In 1978 The Tofu Shop decided to open a soy deli in Rochester. They transferred to it the name The Tofu Shop and changed the name of the manufacturing company to Northern Soy. Greg Weaver ran the deli operation, which opened in Nov. 1978.

In the summer of 1979 the company moved to 30 Somerton St. which had 3,000 square feet (plant plus office space). On 1 Sept. 1985 the company changed from a 50:50 partnership between Schecter and Holland to a corporation in which the two each owned 50% of the stock. In July 1988 the company moved to its present address, 545 West Ave., where they have 16,000 square feet total (plant plus office plus storage). This now seems like too much space, so they plan to expand their soyfood product line. Tofu prices are now lower than anyone would like, and the company is having a hard time paying the interest on their loans. Address: 545 West Ave., Rochester, New York 14611. Phone: 716-235-8970.

8772. *SoyaScan Notes.* 1988. Microbiological specifications for tofu, powdered soymilk, and soy protein isolates (Overview). Oct. 10. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** According to the 8th draft of the tofu standards (Oct. 1985): None of the following should be present in fresh tofu: *Staphylococcus aureus, Salmonella, enteropathogenic Escherichia coli, Vibrio parahemolyticus, Yersinia enterocolitica.* At the plant on the day of production: Coliforms < 5/gm, Standard Plate Count (SPC) < 100, pH < 7.0. At the time the tofu is sold: Coliforms < 500, SPC < 1 million, pH 6.0 to 7.0

For St. Peter Creamery spray dried soymilk: Coliforms < 10, E. coli negative, Salmonella negative, Standard Plate Count 30,000 units/gram (Most Probable Number). For Ralston Purina isolated soy protein, ditto except that Standard Plate Count is < 10,000 units/gram.

8773. Rosenberger, Keith. 1988. Re: Method used to make raw slightly-fermented soy "cheese" from soy sprouts by Ann Wigmore and Viktoras Kulvinskas. Letter to William Shurtleff at Soyfoods Center, Oct. 17. 2 p.
Address: 157 North Fourth St., Souderton, Pennsylvania 18964.

8774. Tofu House, Inc. 1988. New trademarks: Better than chicken. *Official Gazette Trademarks* (*Washington, DC*). Oct. 18.
• ***Summary:*** Filed 5-6-1988. For soybean-based chicken substitute (U.S. Cl. 46). First use 9-1-1986. In commerce 9-1-1986. Address: Huntington Station, New York.

8775. Eveno, Régine. 1988. La poussée du soja; SIAL [The soy push: SIAL]. *Usine Nouvelle* (*L'*) No. 42. p. 44. Oct. 20. [Fre]
• ***Summary:*** "Products derived from soya, rich in protein and low in fats, are seducing consumers more and more. The big dairy companies are taking an interest and starting to occupy the terrain in a face-off with the cereal grain companies." Triballat, a well known 1,200 million French franc cheese company, now markets Sojasun, which is quite similar to yogurt. To tell the truth, soyfoods (especially tofu and soymilk) are all in vogue at SIAL this year. Cacoja (under the direction of Maurice Rochet), the subsidiary of a cereal company in Alsace, is also marketing soyfoods. With its new plant constructed at Noyal-sur-Vilaine (for an undisclosed amount), Triballat can produce in its first year 4,000 tonnes of finished products. Cacoja, with a plant at Issenheim (Bas-Rhin), constructed a year ago, will be able to produce 3.5 million liters of "soy juice" (*jus de soja*) in 1988-89, at a cost of 11 millions francs. Another plant is being constructed on the same site to make soy flour for use in biscuits, sausages, etc.

8776. Holzapfel, Robert. 1988. The Farm in Tennessee and The Book Publishing Company (Interview). *SoyaScan Notes.* Oct. 22. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The Yellow Sun Co-op in Amherst, Massachusetts, opened in about 1970. Tom Timmins, who was not one of the founders, applied to be the manager and was hired in about 1971. Robert worked with him.

There are now about 250 people living on The Farm, including 100-125 adults. Only about one-fifth of the men have long hair. All Farm members own the 1,700 acres of land together, and none pay rents on houses they live in. All houses are now single family dwellings. The Farm was

© Copyright Soyinfo Center 2013

about $600,000 in debt in October 1983, the time of the reorganization, when they changed from a collective to a cooperative. This was greater than the assets. Most Farm members are still vegetarians. Stephen no longer gives any Sunday morning raps/sermons. Granted that some Farm members had worked for years to build The Farm and left empty handed, but they also left behind this $600,000 debt.

Books that have sold well for The Book Publishing Company: *Big Dummy's Guide to CB Radio* (1.5 million copies sold to date), *Tofu Cookery* (150,000 to 200,000; 25,000 a year now), *Tempeh Cookery* (25,000 total), *Tofu Quick & Easy* (13,000 a year now). There are no records on sales of *The Farm Vegetarian Cookbook,* but it has sold very well since 1975, when it was published (maybe 170,000 copies). Annual sales in 1988 are expected to be 10,000 to 15,000 copies worth $300,000. The company almost went under in 1984. Dorothy R. Bates (the mother of Farm Lawyer Albert Bates) has been instrumental in the company's comeback. Address: President, The Book Publishing Co., P.O. Box 99, 156 Drakes Lane, Summertown, Tennessee 38483. Phone: 615-964-3571.

8777. Yamauchi, Shoan. 1988. The Los Angeles tofu market (Interview). *SoyaScan Notes.* Oct. 23. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The Los Angeles tofu market has become extremely competitive in recent years. There are at least 9 tofu manufacturers in the greater Los Angeles area, all run by Asian-Americans. The Japanese-American companies, ranked in descending order of size are: House Foods & Yamauchi Inc., Aloha Products (Culver City), and Meiji Tofu. The Chinese-American companies, ranked by size, are American Food Co. (Mr. Jackson Wu), Mighty Soy, Soyfoods of America (Ken Lee), Wy Ky, and Visoy. The only Korean company is Obok in Orange County. Address: House Foods & Yamauchi Inc., 526 S. Stanford Ave., Los Angeles, California 90013. Phone: 213-624-3615.

8778. Yamauchi, Shoan. 1988. The origins of packaging tofu in America and Japan (Interview). *SoyaScan Notes.* Oct. 23. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Mr. Yamauchi believes that he was the first person to package tofu in America or Japan... perhaps in the world. In 1958, while his Matsuda Hinode Tofu Co. was located at 4th and Towne Streets, he conceived of the idea of putting individual cakes of tofu each in a plastic bag with water, sealing the bag with a heat sealer, placing the bag in a stiff paper deli carton with a wire handle, then folding over the top. The process was labor intensive. This happened at about the same time that a letter from journalist George Yoshinaga (see Yoshinaga 1986) had led the city to pass a new regulation requiring tofu to be packaged in individual containers.

Shortly after this innovation, later in 1958, Mr. Yamauchi began to sell his packaged tofu at the Boys Market supermarket chain (which had about 12 stores at the time) in Los Angeles. He believes that this was the first time tofu was ever sold in a U.S. supermarket.

In about 1961-62 Mr. Yamauchi became the first to package his tofu in plastic trays/tubs, the type so widely used today. He went to the company that made Sealright trays and asked them to make a waterproof tray for his tofu; none of their trays were waterproof at the time. He gave Sealright the money to make the molds and he retained exclusive rights to buy all trays made from those molds. Sealright was a huge company and this line of plastic trays represented a very small item for them. In about 1969 Yamauchi first met Jack Mizono of Azumaya and helped him to mechanize his tofu plant and package his tofu in Sealright trays. They soon became good friends. In July 1975 Yamauchi, Jack Mizono, Milton Taise, and Chuck Garbor each invested one-fourth to start Airtight Container Inc. (in Los Angeles), which tried to make high density plastic tofu packaging trays (similar to the ones they had formerly bought from Sealright). This was not successful because they had the wrong piece of equipment, so they met Ken Merrill of Merrill's Packaging in Burlingame, and he began to make the trays for Airtight. He also became a shareholder in Airtight.

In Japan, Mr. Yukio Sato developed the first tofu packaging in plastic trays. He had lost his parents when he was very young, but he worked his way through business school, and his first business after he graduated was making simple packaging machines for tofu in plastic trays, starting in 1962 or 1963. Address: Part owner, House Foods & Yamauchi Inc., 526 S. Stanford Ave., Los Angeles, California 90013. Phone: 213-624-3615.

8779. Black, Nicole. 1988. Re: Developments with soyfoods in Mexico. Letter to William Shurtleff at Soyfoods Center, Oct. 24. 2 p. Typed, with signature on letterhead.
• ***Summary:*** The only other producer of tofu which we know of in the country currently is a Japanese man in Mexico City who is selling to a few places in Mexico City. The DIF (Desarrollo Integral de la Familia, or Family Development Institute) is an arm of the government which teaches people about nutrition, etc. The D.I.F. has introduced soybeans to the people in several cities. "I have discovered that only about two forms of soy products exist here currently–one is the dehydrated soy milk in different flavors and the other is the dehydrated chunks of soya which also comes in several flavors imitating meat or chicken or pork, etc... It is not an easy task to introduce tofu here. But with my free recipe brochures... and lots of determination, I plan to make a go of it." Quite a few of the hospitals around seem interested in incorporating tofu into their menus. "The next time I go to Mexico City, I will hunt down a health food store and see if they really do have any other soy products than the ones I have mentioned. Frankly, I doubt it. I called several of them,

© Copyright Soyinfo Center 2013

whose names are SoyaMundo, SuperSoya etc. and they have almost no soy products at all. What a joke!" Address: Huertas 17, Apdo 185, San Miguel de Allende, Gto., Mexico 37700. Phone: 465-20255.

8780. Merrill, Ken. 1988. Early packaging of tofu and Merrill's Packaging (Interview). *SoyaScan Notes.* Oct. 25. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** In mid-1976 Ken Merrill met Mr. Yamauchi who, with Jack Mizono (of Azumaya), Milton Taise, and Chuck Garbor already had a company named Airtight Container Inc. Airtight was using its own machine (which it had purchased from the Midwest) at the Airtight plant in Los Angeles to make tofu packaging trays from plastic roll stock. But the operation was not successful because they had the wrong machine for that job. They had purchased it in about mid-1975. So Airtight asked Ken Merrill if his company, which was in the thermo-forming business making plastic containers and trays, could make their tofu trays. In August 1976 Merrill ordered tooling to make the trays on his equipment at Merrill's Packaging in Burlingame, and then became a shareholder in Airtight. He made the trays and sold them to Airtight, which became a marketing and distribution company.

Airtight Container was soon selling tofu trays to tofu manufacturers across America, in competition with Sealright. This took away most of Sealright's business for that line of waterproof containers, so in about 1981-82 Sealright retired it. Their equipment was put up for a closed bid and Airtight bought all of it for two reasons: (1) To get the used extrusion equipment (which ran from pallets of resin, eliminating the need to buy roll stock), and (2) so another company would not buy it and become a competitor. Airtight kept the extruder in Merrill's plant, and cut up the rest and disposed of it.

Merrill thinks Airtight was founded in about 1974, but check with Caroline Taise at Airtight in Los Angeles to be sure [Caroline said mid-1975]. Sealright in Los Angeles agreed to make high-density poly trays. They had long made trays from waterproof materials but the fact that they held in the water in which the tofu was immersed stems from the method that Mr. Yamauchi developed to seal the trays, using a lid stock of a similar material that is heat sealed to the flange of the tray. This was an original idea, in part because few American foods are sold floating in water. Address: President, Merrill's Packaging, 1353 Marston Rd., Burlingame, California 94010. Phone: 415-348-7658.

8781. Peifer, Ray. 1988. Early tofu packaging and Sealright Company Inc. (Interview). *SoyaScan Notes.* Oct. 25. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Ray, who was with Sealright when Mr. Yamauchi first came to them, believes that Sealright started to make trays for packaging tofu in about 1966, and almost certainly between 1965 and 1967. Mr. Yamauchi created three early innovations with tray packaging. First, a very deep tray. Sealright made shallow plastic trays at the time, but they had never made a tray nearly as deep a tray as the one Mr. Yamauchi wanted to hold 26-28 ounces. Second, a method for heat sealing a plastic film to the flange of a tray which had cold water flooding over the flange. A faucet in his plant ran cold water directly into each tray. Other companies had heat sealed a film to a tray for a product with liquid inside, but it was never overflowing. Third, he spent a great deal of money (perhaps $45-50,000) to develop and have built high-speed sealing machines to pack and seal the tofu in his plant. Many in the packaging industry "thought he was kind of goofy, but his idea, though radical in its time, turned out to be a pretty good one."

Sealright made Mr. Yamauchi's containers for about 10 years. But they are a volume producer and Mr. Yamauchi was the only user of that sort of package, and he required a relatively small volume of about 20 different custom sizes. So Sealright sold him the tray forming machinery in the mid-1970s. Sealright did co-op ads/stories in trade magazines and newspapers for him nationwide, which led to his first widespread tofu distribution (Buffalo, New York or Charleston, South Carolina). He also sold small quantities (2-3 facings) of tofu in other Caucasian food markets in Los Angeles, such as the Hughes chain and maybe even Dale's. Address: Manager of Sales Administration, Sealright Company Inc., 4209 Noakes St., Los Angeles, California 90023. Phone: 213-269-0151.

8782. Taise, Caroline. 1988. Early tofu packaging and Airtight Container Inc. (Interview). *SoyaScan Notes.* Oct. 25. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Her records show that Airtight Container Inc. started in July 1975. The owners were Shoan Yamauchi, Jack Mizono, Milton Taise, and Varnich Nimsrisakkul (a Thai man). Ken Merrill of Merrill's Packaging in Burlingame joined later. On 22 Nov. 1989 Caroline recalled that Chuck Garbor was also involved. Address: Airtight Container Inc., 519 Gladys Ave., Los Angeles, California 90013. Phone: 2131-624-4349.

8783. Yoshinaga, George. 1988. Early history of tofu packaging in Los Angeles (Interview). *SoyaScan Notes.* Oct. 27. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** As a newspaper editor, he wrote a letter in *Kashu Mainichi* in about 1953 arguing that it was unsanitary to sell tofu in bulk immersed in water. In about 1956-57 a law was passed by the City of Los Angeles prohibiting this means of sale, and requiring individual packaging for all tofu. George got a lot of flack from the local tofu makers, since the new law increased their cost of making tofu. He believes there were only two tofu makers in Los Angeles at that time (he does not recall their names), and he heard

© Copyright Soyinfo Center 2013

from both of them, but he did not hear from Mr. Yamauchi. He thinks Mr. Yamauchi was not making tofu at that time. His newspaper is not indexed, but all back issues do exist. Address: Kashu Mainichi, 915 E. First St., Los Angeles, California 90012-4083. Phone: 213-628-4686.

8784. Barat, Chandri. 1988. Recent developments at Legume, Inc. (Interview). *SoyaScan Notes.* Oct. 28. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Chandri has just returned from SIAL (the international food exposition held on alternate years with ANUGA) in France, where they showed their Barat tofu chocolate line in the American Pavilion. The response was tremendous. They set up distribution all over the world. There were a lot of soyfoods companies at the expo, including Cacoja and a French tempeh producer. They spoke to thousands of people at the expo and were surprised to find that a good 50% knew what tofu was, and their attitude toward tofu was generally very positive. There were few with negative attitudes.

Products they now sell in addition to the chocolate line include the Tofu Lasagna, Manicotti (they changed the name of Cannelloni Florentine to Manicotti Florentine since many people thought Manicotti meant meat), Stuffed Shells Provençale. These are sold mostly to the natural food trade with some crossover into the kosher market. Now in California they have a kosher distributor who gets them into major supermarket chains; he puts the product on the shelves himself; there is no slotting allowance and the product is not in the store's computer. Kosher has proved to be a key attribute of the products.

During the last year which ended in June 1988, sales rose 20% and the loss went down from $1.3 million to $500,000. They withdrew from most frozen supermarket distribution (it never became profitable due to constant large costs to stay in). They stayed only with profitable frozen distribution, mostly health food or kosher chains, with sales presently about $1.1 million/year. They also dramatically cut overhead. They have a shot at making a profit this quarter and will definitely do so the January quarter. The future looks good.

Several years ago, in about Oct. 1986 at the ashram in South Fallsburg, New York, Gurumayi Chidvilasananda, Muktananda's successor, told them several times jokingly (she calls them the "tofu people") to make tofu candy. That idea led to the launch of the Barat Bar, a non-dairy chocolate bar, about 10 months later. Though the salad dressing didn't make it, the tofu chocolate was designed as a product that could be distributed through much broader channels... drug stores, etc. Concerning other products copying the Barat Bar, they have a lead on the market and they have a license with Sucanat; Sucanat will not sell their sweetener to a similar product. Also, The Barat Bar was the first product containing Sucanat to be launched, and Legume has done a lot of publicity for Sucanat. So a loyalty and friendship has developed. Address: 170 Change Bridge Rd., 2nd Floor, Montville, New Jersey 07045. Phone: 201-882-9190.

8785. **Product Name:** Nigari Tofu.
Manufacturer's Name: Aloha Products.
Manufacturer's Address: 4515 Centinela Ave., Los Angeles, CA 90066. Phone: 213-822-2939.
Date of Introduction: 1988. October.
How Stored: Refrigerated.
New Product–Documentation: Talk with Tom Uyehara. 1988. Oct. 24. The product is now being test marketed in a few stores.

8786. Ashraf, Hea-Ran Lee; Bwembya, P.A. 1988. Supplementation of the traditional Zambian diet with soybean products. *Nutrition Reports International* 38(4):719-27. Oct. [12 ref]
• ***Summary:*** Two traditional Zambian corn based cereal dishes, porridge and Nshima (an indigenous name for cooked corn meal), were supplemented with dried soybean curd (DSC), in order to improve the quality and quantity of proteins. In porridge products, the protein content increased 3.5 fold when DSC was added at 50% of the dry ingredients. In Nshima products, formulations were accepted only at 10% supplementation. Neither soymilk nor soymilk-papaya blend were accepted by the sensory panel.

Soybean has been recognized in Zambia as an important alternative protein source since the National Council for Scientific Research in conjunction with Zambia University Teaching Hospital and the National Food and Nutrition Commission formulated Nutrifex, a mixture of corn, soy flour and skim milk, in 1980. The product was tested on malnourished children in the University Teaching Hospital. Its satisfactory results encouraged the National Council for Scientific Research to develop a weaning food based on this formula. Bread and cookies using soy flour are also available on the market and a soybean cookbook has been recently published.

Note 1. The cookbook is titled *Soyabean cooking in Zambia,* by Dave Wynne and Fereidoon Javaheri (1987; 48 p.). Note 2. None of these products was commercialized. Address: Dep. of Animal Science, Food & Nutrition, Southern Illinois Univ., Carbondale, IL 62901.

8787. **Product Name:** Paul's New and Original Brown Rice Tofu Sandwich [Basic, Raw Onion & Radish, or Half Size with Arame].
Manufacturer's Name: Bert's Place. Renamed Paul's Place. Renamed Paul's Organic Food Works in March 1989.
Manufacturer's Address: P.O. Box 431, Fairfax, CA 94930. Phone: 415-453-2360.
Date of Introduction: 1988. October.
Ingredients: Basic: Short grain brown rice*, spring water,

© Copyright Soyinfo Center 2013

nigari tofu*, sprouted wheat tortilla*, toasted tahini, barley miso*, green onions* or leeks*, carrots*, seasonal green*, lettuce*, clover sprouts*, shoyu*, sesame oil*, garlic*, ginger*, apple cider vinegar, unrefined sea salt, spices. * = Organically grown per Cal. Health Code Sec. 26569.11.
Wt/Vol., Packaging, Price: 12 oz. The basic and onion retail for $3.75, the half size retails for $2.10 (8/89, northern California).
How Stored: Refrigerated.
New Product–Documentation: Label sent by Paul Duchesne. 1989 Aug. 11. 5.5 by 2 inches. Black on pink, red, or blue paper. "12 happy ounces (6 ounces for arame). For the best taste, remove from refrigeration one hour before eating. To eat: Open bag–Tilt sandwich in bag–fold bag down." Illustration of animated product, with smiling face on tortilla, arms, and legs. On the back of each is a statement, which is changed every 2 weeks. For example: "Smile. Its great exercise for both of us." "The means are the ends. Sonia Johnson." "Mind is body is mind is body. Blumlein." Talk with Paul Duchesne. 1989. Aug. 16. The basic was his first new product introduced in Oct. 1988, the Raw Onion & Radish (the radish used to be daikon) in November, and the half size in Dec. 1988. They were developed with the help of Barbara Svenning Garvey. The new and original is now different: The tofu is marinated and a seasonal green (usually kale or collards) is added. The rice is cooked in spring water. These changes are voluntary. Paul is now making and selling about 360 brown rice and tofu sandwiches a week.

8788. *East West.* 1988. East West presents: Best & worst awards. 3rd annual. 100% natural. Oct. p. 65-72.
• ***Summary:*** Best Natural Soy Sauce: Lima Nama Shoyu from Ohsawa-Japan, imported by Ohsawa America of Chico, California. Twice brewed, lower in salt, and aged four years. "It is unique among shoyus, with exceptional smoothness and flavor."

Better Than It Sounds Award:" Tofu chocolate? Yes, Barat Bars by Legume Inc. of Montville, New Jersey, use tofu instead of dairy and no hydrogenated or fractionated palm kernel oil. Carob candies move over!"

Best Tasting Flavored Soy Drinks: "The Westbrae Malteds won this contest going away. Creamy, thick, and delicious, they are more of a dessert than a drink. Some devotees eat them frozen."

Least Healthful Line of Soy Drinks: "The Westbrae Malteds. The flip side of their great taste is their almost 400 calories and 15 grams of fat per 8 ounces."

Most Healthful Line of Soy Drinks: Edensoy. They are the only producers making a totally oil-free drink.

Worst Tasting Flavored Soy Drinks: "Vitasoys from San Francisco, Calif., seem to have few fans and finished last in our blind taste test."

Most Questionable Beverage Label Claim: "3 grams of fat per 6 ounces of Carob and Chocolate Ah Soy, by Great Eastern Sun of Enka, North Carolina. These soymilks are rich and creamy, yet 3 grams is a lower fat content than even Edensoys, made without oil. How is that possible guys?"

That's Progress? Award: "Mori-Nu Tofu by Morinaga Nutritional Foods of Los Angeles. Aseptic Tetrapacked tofu that has indefinite shelf life and can be shipped anywhere. Good for backpackers maybe but can't compare to fresh and local."

Best Fake Hot Dog: SoyBoy Tofu Not Dogs by Northern Soy of Rochester, N.Y. "Nice smoky flavor and smooth texture, almost as good as the real thing."

Worst Fake Hot Dog: Tofu Pups of Lightlife Foods of Greenfield, Massachusetts. "Dry and crumbly on the inside, with a lack of distinctive flavor. Won't fool anybody at the neighborhood cookout."

Best Tamari: San-J Traditionally Brewed Tamari from San-J International of Colonial Heights, Virginia. "No one else even came close. Question: Will they be able to retain their appeal when the first U.S.-brewed batch hits the shelves?"

8789. **Product Name:** Rice & Vegetable Sandwich (In a Chapati with Tofu).
Manufacturer's Name: Essential Foods.
Manufacturer's Address: 6411 Latona Ave., N.E., Seattle, WA 98115.
Date of Introduction: 1988. October.
Ingredients: Organically grown brown rice, tofu, scallion, cabbage, carrot, corn oil, shoyu, salt, whole wheat chapati.
Wt/Vol., Packaging, Price: 7.5 oz.
New Product–Documentation: Talk with Paul Duchesne. 1989. July 31. Marty Roth learned how to make this sandwich from Paul. Marty told or taught Jeff Fairhall how to make these sandwiches. Jeff started making them in about the fall of 1988. He now makes 1,000 sandwiches a week and sells them fresh at multiple outlets, including 7-11 type stores. Jeff has 5 employees and is serving 45 products. Label sent by Paul Duchesne. 1989. Aug. 11. Black on tan. "Best served at room temperature or slightly warmed." Illustration of a rice plant.

8790. *INTSOY Newsletter* (*Urbana, Illinois*). 1988. INTSOY hosts visiting scientists from India. No. 40. p. 2-3. Oct.
• ***Summary:*** INTSOY recently hosted 6 Indian scientists. The researchers from G.B. Pant University in Pantnagar were Brij K. Mital, Yogesh C. Aggarwal, Surendra K. Mittal, and Ashok Tikkoo. B.K. Mital serves as professor and head of the Department of Food Science and Technology. His special interest is developing soy yogurt and fermented soyfoods.

Birendra S. Bisht and Sitaram D. Kulkarni are the 2 researchers from the Central Institute of Agricultural Engineering in Bhophal. Bisht is mainly interested in developing pilot plants for the manufacture of soy-flour tofu, soy snacks, extracted soy products, and soy-blended baked

© Copyright Soyinfo Center 2013

goods. During their 3 to 4 month stays, the scientists worked on INTSOY's extrusion/expelling and baking projects and on various projects in the Departments of Agricultural Engineering and Food Science. The scientists completed collaborative research at INTSOY.

8791. *INTSOY Newsletter* (*Urbana, Illinois*). 1988. India returning to focus on soybeans as human food. No. 40. p. 3. Oct.

• ***Summary:*** "Today India spends the equivalent of almost $1,000 million per year to import edible oils. At the same time, oilseed production in India has been stagnating at about 13 million tonnes per year. Local production of edible oil is about 3.5 million tonnes per year. Annual imports amount to about 1.2 million to 1.4 million tonnes...

"The bulk of the edible oil comes from major oilseed crops, such as peanut, mustard, linseed, and coconut...

"Today approximately 98% of the soybean crop, amounting to about one million tonnes yearly, is used for oil extraction. This yields about 160,000 to 180,000 tonnes of oil and 700,000 to 800,000 tonnes of soybean meal.

"Virtually all the oil is sold locally as edible oil, whereas almost all the meal is exported... Recently, however, India has faced increasing problems in disposing of the meal because of competition from other countries...

"As a result, new efforts currently are under way to develop processes for manufacturing a wide variety of soy-based foods that fit Indian dietary patterns.

"Although there is an emphasis on using defatted soybean meal, work is also moving ahead on whole soybean utilization for such products as soymilk, dairy analogs, and soy paneer...

"M/S Pantnagar Soy Products in New Delhi is currently producing about 100,000 packets of soymilk per day. Each packet contains about 200 milliliters of soymilk...

"Recently Brittania (India) has started marketing edible-grade defatted soy flour to be used as a supplement in chapati, puri, paratha, and other traditional foods...

"According to the Indian scientists, soybean utilization for food is now on a firm basis in India."

8792. *INTSOY Newsletter* (*Urbana, Illinois*). 1988. Soybean markets in Bangladesh prime for future expansion. No. 40. p. 2. Oct.

• ***Summary:*** "The market for soybeans in Bangladesh is now at a critical stage where implementation of small- and medium-scale processing technologies could have a major impact, according to Jane Gleason, INTSOY agricultural economist. Gleason recently spent 12 days in Bangladesh visiting soybean processing facilities and meeting with officials from the government, private volunteer organizations, and local businesses.

"She reports that the Mennonite Central Committee (MCC) has been especially active in promoting increased soybean utilization. Working with local biscuit manufacturers, MCC has helped introduce the concept of fortifying wheat flour with full-fat soy flour. Two biscuit makers are already using soy flour, and at least three others are testing the product. Most of the biscuits are made from raw soybean flour. The trypsin inhibitor is largely destroyed by heat during baking.

"Initially, MCC produced the flour at its processing laboratory in Maijdi. The flour was then sold to the manufacturers through MCC's wholesale outlet. More recently, the biscuit companies have been directly purchasing whole soybeans for processing in their own facilities. One of these companies already produces more than one metric ton of soy-fortified biscuits per day.

"Other organizations, such as Biman and a Baptist Church group, are experimenting with soybeans as animal feed, especially for poultry. In addition, at least two entrepreneurs are interested in producing a soymilk that would be marketed in competition with soft drinks. The two companies are expected to require at least 550 metric tons of soybeans per year."

"The Source, which is MCC's local outlet, also sells processed soy flour at retail and about 400 to 500 kilograms of soybeans per month on the wholesale market. Most of these soybeans are purchased by the local Chinese community to manufacture tofu.

"Promoting rural development with soybeans: Another important component of the soybean program in Bangladesh is the Food Products Development Centre (FFDC). The major objectives of FFDC are to develop low-cost food processing technologies that are accessable to the rural unemployed and to increase use of soybeans and other crops that can improve nutrition in the rural areas. As part of its effort to create new jobs, FPDC plans to promote small-scale commercial processing of soybeans for manufacture of the local snack food, chanachur.

"During 1987, Ellen Jayawardena, training coordinator for the Soybean Foods Research Centre in Sri Lanka, conducted several classes for FPDC personnel on home and village soybean preparation. These people, in turn, are to serve as local trainers. MCC also has several soybean cooking demonstrators in the Moakhali and Chuadanga districts and the Dhaka area. In addition, MCC personnel have sold soybeans door-to-door in a number of villages where that commodity is in short supply.

"Gleason reports that both extrusion cooking and soymilk processing have significant potential for expanding soybean markets in Bangladesh. She further concludes that the extrusion / expelling process developed by INTSOY could play an important role in providing a new source of high-quality soy oil for Bangladesh."

8793. Karta, Susani K. 1988. Market trends in the development of traditional soyfood. Paper presented at

© Copyright Soyinfo Center 2013

the ASEAN Food Conference '88: Food Science and Technology in Industrial Development. 18 p. Held 24-26 Oct. 1988 at Bangkok, Thailand.
• ***Summary:*** Contents: Introduction. Traditional soyfood. Market situation and trends. Indonesia. Singapore. Malaysia. Thailand. Constraints in the market development of soyfood (in each of the above 4 nations). Major trends in the development of traditional soyfoods. Marketing strategy of soyfood. Tables: 1. Traditional non-fermented soyfood products. 2. Nutritional composition of traditional non-fermented soyfoods. 3. Description and uses of traditional fermented soyfood products. 4. Nutritional composition of traditional fermented soyfoods.

5. 1987 estimated consumption of soybeans as foods in the Far East [total and per capita in East Asia]. China, 1,062 million population, 7,325,000 tonnes, 6.9 kg/capita. Japan, 122 million population, 1,141,000 tonnes, 9.3 kg/capita. South Korea, 42.1 million population, 330,000 tonnes, 7.8 kg/capita. Taiwan, 19.6 million population, 260,000 tonnes, 13.3 kg/capita.

6. Southeast Asia soybean consumption for food. From 1983 to 1989 the increase in 1,000 metric tons was: Indonesia 927 to 1,600. Singapore 14 to 26. Malaysia 32 to 70. Thailand 40 to 150. Philippines 9 to 24. Total 1,022 to 1,870 (increase of 82.9% in 7 years).

7. Per capita soybean consumption for food in Southeast Asia. From 1983 to 1989 the increase in kg/person was: Indonesia 6.0 to 8.8. Singapore 5.6 to 10.5. Malaysia 2.1 to 3.7. Thailand 0.8 to 2.6. Philippines 0.2 to 0.5. Average total: 3.8 to 5.9 (increase of 55.3% in 7 years).

8. 1987 estimated consumption of soybeans as foods in Southeast Asia [total and per capita]. Indonesia, 175 million population, 1,575,000 tonnes, 9.0 kg/capita. Thailand, 53.6 million population, 118,000 tonnes, 2.2 kg/capita. Malaysia, 16.1 million population, 55,000 tonnes, 3.4 kg/capita. Singapore, 2.6 million population, 20,000 tonnes, 7.7 kg/capita. Philippines, 61.5 million population, 18,000 tonnes, 0.3 kg/capita.

9. Indonesian soybean production, imports, and consumption as food (in tonnes). From 1983 to 1989, production rose from 536,000 to 1,250,000, imports decreased from 391,000 to 350,000, and the amount consumed as food increased from 927,000 to 1,600,000. About 50% of the soybeans used for foods in Indonesia go to make tempeh, and 40% are used to make tofu.

10. Singapore soybean consumption as food. From 1983 to 1989 the amount increased from 14,000 tonnes to 26,000 tonnes. Most of these soybeans are used to make tofu and soymilk. 11. Malaysia soybean imports and consumption as food (in tonnes). From 1983 to 1989, production rose from 182,000 to 440,000, and the amount consumed as food increased from 32,000 to 70,000. 12. Thailand soybean production, and consumption as food (in tonnes). From 1983 to 1989, production rose from 113,000 to 490,000, and the amount consumed as food increased from 40,000 to 150,000. Only in 1988 were soybeans imported–40,000 tonnes. This growth of soyfood consumption is due partially to the Government of Thailand's interest in promoting the awareness and utilization of soyfood products. The Thailand Agricultural Extension Service program and other institutions have been actively advocating of soyfoods into the food industry and the human diet, especially in rural areas. The government controls soybean imports by issuing licenses.

In summary: The soybeans with the highest per capita soybean consumption for soyfoods are: Taiwan 13.3 kg, Japan 9.3 kg, Indonesia 9.0 kg, Singapore 7.7 kg, South Korea 7.3 kg, and China 6.9 kg. The greatest potential for growth lies in China, where it is very common to find markets running out of soyfoods early in the morning. There is also great potential for growth in Malaysia, Thailand, and the Philippines. Address: American Soybean Assoc., 541 Orchard Rd., #11-03 Liat Towers, Singapore 0923, Republic of Singapore.

8794. Katzen, Mollie. 1988. Still life with menu: Fifty new meatless menus with original art. Berkeley, California: Ten Speed Press. 350 p. Illust. (some color). Index. 29 cm.
• ***Summary:*** Contains 17 tofu and 7 miso recipes; no tempeh. Tofu-kan (firm tofu; *doufu-gan*) is in a recipe on p. 261. Also sesame oil, sesame seeds, tahini. Many color illustrations throughout.

8795. Krizmanic, Judy. 1988. Fit to be tofu: When technology brought changes to this traditional product, the question arose, "Is tofu still the real thing." *Vegetarian Times.* Oct. p. 21-23.
• ***Summary:*** Discusses some of the issues and controversies involved with the development of tofu standards by the Soyfoods Association of America. The tofu liberals wanted a broad definition of the product, allowing it to contain soy protein isolates, if that was clearly stated. The tofu traditionalists felt that a product containing isolates should not be allowed to be called tofu.

8796. Liebman, Bonnie. 1988. Vegieburgers: Stalking the perfect VLT. *Nutrition Action Healthletter.* Oct. p. 10-11.
• ***Summary:*** A rating of meatless burgers based on taste and fat content. A table shows product, maker, serving size, calories, fat (% calories, uncooked), sodium, and taste. "If the first ingredient is tofu, the fat content is high–probably around 55% of calories (compared with 58-66% for beef)... None of the burgers made with tempeh as a major ingredient supplied nutrition information. But tempeh gets only 35% of its calories from fat–an advantage, at least nutritionally. But palate pleasers they're not. Our testers quickly learned to identify the tempeh burgers by their 'sour' or 'glutenous' taste, and invariably tossed them into the 'bad' category.

© Copyright Soyinfo Center 2013

They come across as poor imitations of the imitation meat-burgers.

The five best rated products were: 1. Gardenburger (Wholesome & Hearty Foods, Portland, Oregon). 2. Nature's Burger, Original (Fantastic Foods, Novato, California). 3. Nature's Burger, Pizza (Fantastic Foods). 4. Nature's Burger, Barbecue (FF). 5. Tofu Burger (FF; the cook supplies the tofu). Soy products by White Wave, Quong Hop, Natural, Inc. and Bud, Inc. are listed in the table.

8797. Moon, Susan Ichi Su. 1988. The life and letters of Tofu Roshi. Shambhala Publications, Horticultural Hall, 300 Massachusetts Ave., Boston, MA 02115. xii + 157 p. Illust. No index. 21 cm. Foreword by Gahan Wilson.
• ***Summary:*** Tofu, seen as embodying the highest of the Zen teachings, answers questions from searching students. His themes include: How to give up the quest for self improvement. The miracle of mediocrity. Gahan notes in the foreword: "Many teachers, in their pride, boast that they know nothing, but it is Tofu alone, who has truly succeeded in achieving total ignorance." Includes a Glossary and a photo of Susan Moon. Address: Berkeley Zendo, Berkeley, California.

8798. **Product Name:** [Tofu Dressing (Plain, Thousand Onion Flavor, and Thousand Tomato Flavor)].
Foreign Name: Otofu Doresshing (Pureen, Sauzan Onion Fûmi, Sauzan Tomato Fûmi).
Manufacturer's Name: Nihon Beans.
Manufacturer's Address: Nakamachi 2-4-5, Musashino-shi, Tokyo, Japan. Phone: 0422-54-4030.
Date of Introduction: 1988. October.
Wt/Vol., Packaging, Price: 160 ml plastic bottle retails for 160 yen.
New Product–Documentation: Toyo Shinpo. 1988. Nov. 11. p. 4. Otofu doresshingu wakai josei no ninki dokusen: Nihon Biinzu [Tofu dressings capture young women's favor: Nihon Beans]. Tofu-based dressings are becoming very popular in Japan. Nihon Beans (president Tetsuya KOFUSE) started to sell 3 varieties in Oct. 1988. Their target is the women's market. They developed their products and design by studying many women's groups. They decided that a product containing 40% and 40% tofu has the best flavor. With more tofu, the flavor is too plain, although the product would be healthier.

8799. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Nutrisoya, Inc.
Manufacturer's Address: 4050 Pinard, St.-Hyacinthe, QUE, J2S 8K4, Canada. Phone: 514-796-4261.
Date of Introduction: 1988. October.
New Product–Documentation: Talk with Giles Goulet of Nutrisoya. 1990. Oct. 19. This company started making soyfoods in Oct. 1988, when they introduced tofu.

Update: 1995 May. Giles Goulet left in Sept. 1994 and no longer owns shares in the company. They now make three types of tofu: Herbs & Spices, Pimento & Onion, and Natural.

Note 1. This is the earliest known commercial soy product made or sold by Nutrisoya. It is also the earliest record seen (Oct. 2001) concerning Nutrisoya.

Note 2. As of Sept. 2001 this company's name is Nutrisoya Foods, Inc. The address has not changed. Phone: 450-796-4261. Contact: Nick Feldman, President. They make soymilk, tofu, and tofu products.

8800. **Product Name:** [Toscana: Fine Tofu & Vegetable Pie].
Foreign Name: Toscana: Feine Tofupastete.
Manufacturer's Name: Sojarei Ebner-Prosl.
Manufacturer's Address: Augasse 2, A-2500 Baden bei Wien, Austria. Phone: 02252/85101.
Date of Introduction: 1988. October.
Ingredients: Zucchini, tofu, yeast flakes, salt, herbs, spices, agar.
Wt/Vol., Packaging, Price: 125 gm.
How Stored: Refrigerated.
New Product–Documentation: Label, received 1989. Oct. Red, black, green, and white on yellowish orange. 3.5 by 3 inches. Self adhesive. Logo is a green soybean plant against a white circular background. "Free of cholesterol. No flesh. Made purely from plants." In the company's Jan. 1989 catalog this product, called Tofu-Pastete "Toscana," is described as a fresh vegetarian pastry/pie with fresh zucchini. It sells retail in 125 gm, or 650 gm, weights.

8801. **Product Name:** [Marinated Smoked Tofu].
Foreign Name: Raeuchertofu natur.
Manufacturer's Name: Sojatopf. Renamed Soto in April 1989.
Manufacturer's Address: Friedrich-Ebert-Str. 40, D-8323 Trostberg, West Germany. Phone: 08621-62538.
Date of Introduction: 1988. October.
Wt/Vol., Packaging, Price: 250 gm.
New Product–Documentation: Letter (fax) from Harry Whitford. 1990. May 30. Gives full details on product based on interview with Gerhard (Oskar) Schramm. The tofu is marinated, then smoked. On 1 Jan. 1990 the company moved to Wolfbergerstr. 47, D-8211 Breitbrunn am Chiemsee, West Germany.

8802. **Product Name:** Tofu (Organic 10 oz. Water Pack) [Hard, or Soft Style].
Manufacturer's Name: White Wave, Inc.
Manufacturer's Address: 1990 North 57th Court, Boulder, CO 80301. Phone: 303-443-3470.
Date of Introduction: 1988. October.

© Copyright Soyinfo Center 2013

Ingredients: Water, organic soybeans, gypsum, nigari (magnesium chloride).
Wt/Vol., Packaging, Price: 10 oz packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid. 6 to a case.
How Stored: Refrigerated.
New Product–Documentation: White Wave News. 1988. Oct/Nov. This is a new, smaller, more convenient size. "Like all White Wave products, this new tofu is certified Kosher–Pareve by Rabbi Mordecai Twerski of the Talmudic Research Inst. in Denver. The new 10 oz. package uses our unique heat treatment process, which provides a 50 day shelf life from the date of manufacture. Coagulants: Nigari and calcium. Made with Rocky Mountain glacier melt water."

Label sent by White Wave. 1988. Red, yellow, blue, and green on clear plastic film. A huge wave is breaking from the left.

White Wave Tofu Fact Sheet. 1988. Sent by White Wave. In vacuum pack, White Wave has Hard Style and Soft Style tofu, each 1 lb. None is totally organic. Shelf life: 30 days. In water pack (totally organic) has Hard Style and Soft Style, each 10 oz. The shelf life is 50 days. All types are made with "Rocky Mountain glacier melt water."

8803. Dervin, Marie-Anne. 1988. Innovations agro-alimentaire: 2,500 t/an de produits à base de soja [Agro-food innovations: 2,500 tonnes/year of soy products]. *Industries et Techniques.* Nov. 1. p. 94. [Fre]
• ***Summary:*** At Valence, Innoval has established an industrial unit for the transformation of soya into drinks, main dishes (*plats cuisinés*), desserts, etc. The Silos of Valence, an agricultural cooperative in Drôme, is looking to diversify in the agro-food sector. It has joined forces with Sojalpe to create Innoval S.A. This September the company launched the above-mentioned products into large-scale distribution supermarkets.

The project, which has cost 20 million French francs, has benefited from the financial support of several banks. In 1989 Innoval SA is planning to come out with a complete line of long-lasting fresh products. The company also hopes to reach collectives and to export to other European countries that consume large amounts of tofu (UK, West Germany, or Switzerland). Address: France.

8804. Morinaga Nutritional Foods. 1988. Mori-Nu Tofu promotes healthy eating through November (News release). 5800 South Eastern Ave., Suite 270, Los Angeles, CA 90040. 2 p. Nov. 4.
• ***Summary:*** This month, Mori-Nu Tofu will participate in 3 special health-related events to educate individuals on the latest advances in healthy eating: (1) The International Dance-Exercise Assoc. (IDEA) Educational Conference Nov. 6-8 in Washington, DC. IDEA consists of 18,000 dance exercise professionals from 50 states and 38 countries. Mori-Nu will distribute recipes and brochures to members of IDWA and serve fresh Mori-Nu strawberry fruit shakes to the expected 1,500 conference attendees. (2) Danielle Lin will serve all-natural strawberry fruit shakes at the Soyfoods Pavilion, Nov. 4-7, at the Natural Foods Expo in Baltimore. (3). Lin will provide delicious low-fat, low-cholesterol, and low-sodium cooking ideas using Mori-Nu Tofu at the First National Cholesterol Conference (sponsored by the National Heart, Lung and Blood Inst.), Nov. 9-11, Crystal City, Virginia. Address: Los Angeles, California. Phone: 213-728-4325.

8805. Phipps, Bob. 1988. Importing tofu equipment from Sun Youth in Taiwan (Interview). *SoyaScan Notes.* Nov. 7. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** A letter from Eva M.L. Wang dated 6 Oct. 1988 states that Sun Youth Machinery Co. Ltd. has been making bean sprout equipment in Taiwan since 1973, and selling tofu equipment since 1979. Ms. Wang is sales manager. Bob has just received a new stainless-steel system from them and it looks great. Even the frame is stainless steel. The landed price is 30-40% below Takai's price. It is very easy to import an item such as this if you use C.F. Ocean Services (C.F. stands for Consolidated Freightways). No need to go thru a special agent or broker. Bob had to make only 2 phone calls. C.F. does most of the work, fills out the forms, takes the goods thru customs, and delivers them to your plant at a predetermined price. If the equipment is listed as "Farm Equipment" there are no import duties. Address: Energy Sprouts, 3602 High Point, San Antonio, Texas. Phone: 512-654-3963.

8806. Stromnes, Lonnie. 1988. White Wave to launch soy cheeses, meat analogs. Will hold private offering (Interview). *SoyaScan Notes.* Nov. 9. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The line of soy cheeses, introduced last week at the Baltimore Natural Foods Expo but without labels, are called Soy A Melt, in Monterey Jack, Mozzarella, and Jalapeno flavors. Made by one of the three large manufacturers (not by Soya Kaas), they contain casein. By April 1989 White Wave plans to have a line of tofu-based meat analogs (hot dogs, sliced bologna, and sausages), and later in 1989 a soy yogurt. Roughly $300-400,000 is coming into the company from a private offering soon. White Wave does some private labeling other than ice cream.

At the Baltimore show, Soya Kaas and Soyco each launched a cream cheese and sour cream. Address: San Leandro, California.

8807. Berief, Hermann. 1988. [Re: Work with tofu at TKW]. Letter to William Shurtleff at Soyfoods Center, Nov. 11. 1 p. Typed, with signature on letterhead. [Ger]
• ***Summary:*** We began production of soyfoods in Oct. 1985.

© Copyright Soyinfo Center 2013

Our address then was the same as it now. Röstlinge are like croquettes. This term comes from the Swiss and refers to a fried or roasted (*gebratenes*) product, with or without crust. We make / pack tofu for institutional kitchens in 2.5 kg vacuum packs, 4 packs in a carton. We also pack tofu in 250 gm vacuum packs, inside a 4-color folded box. I am enclosing a copy of our tofu recipe book. Address: TKW GmbH Tofukost-Werk, Siemensweg 1 (Postfach 32 12), D-4724 Wadersloh 3, West Germany. Phone: 0 25 20/13 00.

8808. Morinaga Nutritional Foods. 1988. Mori-Nu Tofu promotes drug-free bodybuilding at the 1988 Annual Mr./Mrs. International (News release). 5800 South Eastern Ave., Suite 270, Los Angeles, CA 90040. 2 p. Nov. 14.
• ***Summary:*** "Mori-Nu Tofu will co-sponsor the 1988 Annual Natural Drug-Free Bodybuilding Contest on Nov. 20 in Redondo Beach, California. Bodybuilders from all over the world will compete for the title of Mr./Ms. Natural, which is only open to men and women who have passed a drug test one week prior to the event.

"Participants are tested by the American Bodybuilders Coordination Committee (A.B.C.C.), the oldest and most widely recognized drug-free association in the country, which utilizes the standard urine test as well as a lie-detector test to determine previous or present use of steroids or other muscle-building drugs...

"Mori-Nu Tofu, which began sponsoring natural bodybuilding contests earlier this year, offers bodybuilders a low-calorie, high-protein addition to their diets." Address: Los Angeles, California.

8809. Heyes, John. 1988. Food writer bows to Fruited Tofu Curry crowd. *Gazette* (*Haverhill, Massachusetts*). Nov. 16.
• ***Summary:*** A humorous account of a supposedly violent reaction by the Tofu Liberation to a piece he published ridiculing tofu. Thugs from the militant Front kidnapped him to the Arctic Circle and forced him to publish a recipe for Fruited Tofu Curry before he could return–which he did in this article.

8810. Harris, Ron. 1988. A history of Grain Dance, one of America's earliest seitan manufacturers (Interview). *SoyaScan Notes.* Nov. 17. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Ron arrived in San Francisco in about 1975, having studied macrobiotics previously in Ohio from 1974. As far as he knows, he was the first person to make seitan commercially as a real business in America. Before he started, a woman in Marin made seitan at home and sold it at 1-2 stores for a few months. She had no business name. She had learned how to make seitan from Roy Steevensz, a macrobiotic teacher in Los Angeles who also made and sold tempeh. Lima Foods in Belgium started to import a small bottled seitan product long after Ron started. He never had any competition from other seitan makers on the West Coast. When he began, no one had ever heard of seitan. The Kushis and the Aiharas both made and taught others how to make seitan on a home scale.

Ron first learned about and tasted seitan in Key West, Florida, in 1975. A woman named Martha, who was a macrobiotic (originally from Los Gatos, California) was giving a cooking class. His ex-wife Shiwa took the class, then Ron tasted the seitan from the bottom of the pot. He loved it. Shiwa then taught Ron the basic process for making seitan, then he ended up developing some variations on that process and recipe. Shiwa had a small business making pastries (such as date bars) out of her home in San Francisco and selling them at Rising Sun, a macrobiotic food store on Judah St. in San Francisco, owned by Mr. Noboru Muramoto. She suggested that Ron start making seitan to expand the family's line of foods. Ron first began to make seitan out of their home at 187 Downey St. (in the upper Haight-Ashbury district), San Francisco. He sold the first product in bulk at Rising Sun. It was in small dark brown chunks (about 6 pieces/chunks per pound), stored refrigerated in a 5-gallon plastic bucket or earthenware crock. On the bulk container was written the word "seitan" followed by the ingredients. After about a year he started to sell it in individual packages. To the label he added the pronunciation "SAY-tahn" and the phrase "A high-protein food made from wheat." He always sold only one product in one flavor. The ingredients were organic hard red winter whole wheat (always freshly ground), spring water, tamari (actually shoyu), ginger, and onions. He was one of the few seitan makers to use whole wheat; most others used unbleached white flour, which gave a higher seitan yield. Initially he ground the wheat by hand using a French Samap mill that he bought from Jacques DeLangre's son, Tom. Later he bought his wheat from Joe Schwinn of Deaf Smith–Vital Vittles, who milled his own wheat fresh each day.

Originally Ron's seitan company had no name. He coined the company name "Grain Dance" at about the time he began packaging in individual containers–round plastic deli containers with a snap-on lid. First he sold it by the pound, then in 8 oz packs. Later the name was expanded to Grain Dance Natural Foods. The company was never incorporated. From his first address, Ron moved to another home-based kitchen, then in about 1980 he subleted his first legal commercial space mornings in the kitchen of the Real Good Karma Cafe on Dolores St. in the Mission district. Finally in about 1982 he moved into a commercial space at 422 Haight St. between Fillmore and Webster in the lower Haight Ashbury. By 1987 he was selling seitan to about 100 stores in the greater San Francisco Bay Area. They made seitan 3 or 4 days a week, making 80 pounds of finished seitan each day. Grain Dance introduced seitan to thousands of Californians who were looking for an alternative to meat. At fairs he served deep-fried seitan; it was dipped in a spiced

© Copyright Soyinfo Center 2013

wheat-flour batter and breaded with cornmeal. People loved its meaty texture and savory flavor. Ron's personal favorite was freshly cooked seitan, right out of the pot in his unique broth.

Initially Ron distributed the product himself, then Paul Duchesne distributed it after he was pushed out of Wildwood and started his own distribution company, then when he went out of business, Wildwood distributed it; Wildwood also used seitan in some of their sandwiches. Later David "Devo" Knepler came is as a partner (Devo now works with Wildwood Natural Foods). They had one employee.

For ten years Ron made seitan by hand. He really enjoyed the hand kneading, putting handmade energy into the food, and focusing on quality. By 1987 the business was growing, rents in San Francisco were skyrocketing, and he would have to mechanize the shop in order to expand. The business never made much money. "It was a labor of love, and it really enjoyed making seitan and turning people on to good food and helping them in any way I could." So in 1987 Ron began to phase out the business. He started doing attorney service work (which he is still doing) several days a week, then made seitan on several other days. Initially Wildwood wanted to continue it, so Ron went there and taught a few people how to make seitan. They did it for a while, but found it too labor intensive, and gave it up. There has never been another seitan maker on the West Coast. Address: San Mateo, California. Phone: 415-347-1378.

8811. Morinaga Nutritional Foods. 1988. Mori-Nu Tofu educates seniors on reducing cholesterol (News release). 5800 South Eastern Ave., Suite 270, Los Angeles, CA 90040. 2 p. Nov. 18.
• ***Summary:*** Nov. 18, 1988. "Recently, Mori-Nu participated in the Golden Times Senior Citizen Show in Anaheim, California... Seniors attending the Show received information on the health and nutritional benefits of eating tofu as well as tips on creating delicious recipes using tofu. In addition, seniors got a chance to taste Mori-Nu in all-natural fruit shakes made fresh using strawberries, bananas and Mori-Nu Tofu." Address: Los Angeles, California. Phone: 213-728-4325.

8812. *Packer* (*The*). 1988. Tofu earns Good Housekeeping Seal of Approval. Nov. 19.
• ***Summary:*** Mori-Nu Tofu is the first and only tofu manufacturer in the United States to receive the Good Housekeeping Seal of Approval, according to Tom McReynolds, marketing manager for Morinaga. Based on a news release dated 11 Nov. 1988 and titled "Mori-Nu Tofu receives the Good Housekeeping Seal of Approval." Also in Whole Foods. 1989. Feb. p. 19. Address: Kansas.

8813. Amrit Protein Foods Ltd. 1988. Display ad: An investment in Amrit–an investment in prosperity. *Times of India* (*The*) (*Bombay*). Nov. 21. p. 11.
• ***Summary:*** Amrit Protein Foods Limited, "An exciting new venture," is promoted by Amrit Banaspati Co. Ltd. Amrit Protein equity issue opens 12 Dec. 1988.

"A complete line of fitness foods: Health and fitness are making big headlines these days. And to meet the growing demand for a new generation of fitness foods, Amrit Protein will manufacture a wide range of products–Soya Milk, Soya Milk Beverages, Soya Dessert, and High Quality Soya Paneer."

"Proven technology from world leaders:" Amrit has purchased its soymilk making system from STS–Soya Technology Systems–a division of the world renowned Danish Turnkey Dairies.

"Big success in the West! Products based on this technology have been a phenomenal success in the West. In fact, a plant set up as recently as 1985 near Hamburg has substantially increased its capacity [DE-VAU-GU, Lueneburg, West Germany].

"Products backed by extensive research:" The products are a result of extensive market research; they have been thoroughly tested in consumer taste trials.

"The market is ready and waiting:... Amrit Protein will open up a whole new dimension in the Indian consumer market.

"And you have an opportunity to share our bright future: To meet a part of the finance required for the project, Amrit Protein is making a public issue of 24,70,000 Equity Shares of Rs. 10 each for cash at par." The names and logos of the three Indian companies managing the issue are given.

The bottom half of this horizontal ad is a cartoon illustration with many stylized adults and children admiring the various uses of soy protein products such as tofu cubes on a dish and a dessert in a tall-stemmed glass. Address: Amrit Nagar, G.T. Road, Ghaziabad 201 009 (U.P.) [Uttar Pradesh].

8814. Nordquist, Ted. 1988. Brief early history of Aros Sojaprodukter in Sweden (Interview). *SoyaScan Notes.* Nov. 22-24. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Ted Nordquist, the foremost soyfoods and tofu pioneer in Sweden and in Scandinavia, founded Aros Sojaprodukter and started making tofu there in Feb. 1981. Born on 10 Dec. 1945 in Oakland and raised in California, he attended college at Cal Poly in San Luis Obispo. During his sophomore year he won a scholarship from the California State International Programs to spend his sophomore year at the University of Uppsala in Sweden, where he arrived in September 1965. Returning to Cal Poly he graduated in Aug. 1968 with a BSc degree in Industrial Arts. He was then accepted for international graduate school at Stockholm University, where he arrived in Sept. 1968. After 1 year of study he entered a PhD program at Uppsala University in Sept. 1969, doing research on problems of developing

© Copyright Soyinfo Center 2013

countries and working in a mental hospital.

On 9 Jan. 1971 he was married in Golden Gate Park, California to Anne-Marie Karlson, a Swedish woman he had met in 1969. The marriage ceremony was performed by Dr. Haridas Chaudhuri, President of the Cultural Integration Fellowship and California Institute of Asian Studies (in San Francisco).

In the summer of 1971 he completed his oral examinations for the political science degree, but still had to write his thesis. Then the U.S. government tried to draft him into the military to go to Vietnam. The American Friends' Service Committee (Quaker) helped him to obtain Conscientious Objector status. He did his alternative service at the California Institute of Asian Studies in San Francisco under Dr. Haridas Chaudhuri, as director of research. While at the Institute, Ted also took many courses for credit. In Oct. 1975 Ted and Janet Fehring met Bill Shurtleff, Akiko, and Bobbie Shurtleff (Bill's mother) at Ananda Cooperative Village, where Bill and Akiko had been invited to do a program on tofu. Afterwards the five went hiking at Echo Lake, Desolation Valley, and Lake Tahoe. Then Ted started making and selling a tofu kit in Alameda. On 14 Jan. 1976 Ted and Janet attended a lecture on tofu that Bill and Akiko presented at the Berkeley Co-op, and helped prepare a tofu dip. Ted's father, Leo, had become very ill with cancer and Ted was making him fresh tofu, one of the few foods he could digest, every morning. In Jan. 1976 Ted's father died in Alameda. In June 1978 Ted got his PhD degree at the Univ. of Uppsala with his thesis on the history of Ananda Cooperative Village. In 1979 Ted visited Traditional Tofu Co. in Oakland, and first saw tofu made on a commercial scale. In Feb. 1980 Ted founded Aros Sojamjolkprodukter in Uppsala, then from June to Dec. Ted and his wife Anne-Marie's father renovated a soft drink factory in Örsundsbro to make it a tofu plant. That December Ted installed Japanese tofu equipment in plant. In Feb. 1981 Ted and Tim Ohlund started tofu production, water packed. At about the same time their Book of Tofu was published in Swedish. By fall, they started vacuum packing with in shallow plastic trays. Address: Orsundsbro, Sweden. Phone: 0171-604 56.

8815. *Times of India* (*The*) (*Bombay*). 1988. City notes: Amrit Protein. Nov. 22. p. 11.
• ***Summary:*** "Amrit Protein Foods, a company promoted by Amrit Banaspati, will enter the capital market on December 12, with a public issue of 24.70 lakh [2,470,000] equity shares of Rs 10 each at par to finance its Rs 14.50 crores project being set up at Ghaziabad, Uttar Pradesh to manufacture soyamilk,..."

The company will make 19,800 kilolitres of soyamilk, soyamilk beverages, soya dessert, and high quality soya paneer per annum.

The project is expected to start commercial production by April 1989 according to Mr. N.K. Bajaj, chairman.

8816. McIntyre, Richard. 1988. Brief early history of Swan Gardens, Inc. (Interview). *SoyaScan Notes.* Nov. 23. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Swan Gardens started making tofu in January 1976. [But note that in 1981 the McIntyres reported that the company started making tofu in 1978]. The company was originally an organic vegetable truck farm in St. Ignatius, a small town in the Swan Valley outside of Missoula, in western Montana. Richard's wife, Jocelyn, was the one who originally learned to make the tofu at a time when very few Caucasian Americans knew how to do so. She had talked to various people, read books, and generally learned from necessity since she had a medical condition that doctors didn't know how to treat. Richard learned how to make tofu from Jocelyn.

The company's first product was tofu. Later [by 1979] they introduced tofu cheesecakes, and had two locations in Montana. From the beginning to the present Jocelyn has been actively involved in the company. She is presently Vice President in charge of Research and Development. From Montana, the company moved to Florida and there they discovered that another company with a similar name (Swan Foods) had been an early tofu maker but had gone out of business with many bad debts. From Florida the company moved to Georgia, settling in Decatur, a suburb of Atlanta.

During December 1985 and Jan. 1986 Swan Gardens launched Soya Kaas, a soy and casein based meltable cheese. They developed and manufacture the product in Georgia. Shortly after the product was launched they established Soya Kaas, Inc. as a subsidiary of Swan Gardens Inc. Address: 6029 La Grange Blvd., Atlanta, Georgia 30336. Phone: 404-346-1712.

8817. Cheater, Mark. 1988. Health food keeps firm thriving in Middletown [The Bridge]. *Courant* (*Hartford, Connecticut*). Nov. 28. p. C1, C2.
• ***Summary:*** The Bridge, founded 8 years ago on a shoestring budget by 5 local natural foods enthusiasts, makes tofu, amazake, and seitan. One founder is Bill Spear. Stephen Lapenta is general manager. By the spring of 1981 The Bridge had made and sold its first batch of tofu. Today the products are still made by hand. Product quality and freshness is the key to their success. They are looking to expand.

8818. Barrier, Michael. 1988. Making it: "I love to feed people." *Nation's Business* 76:76, 78. Nov.
• ***Summary:*** David Mintz, 56, developed Tofutti when he was a kosher caterer in Manhattan. Under Jewish dietary laws, dairy products and meat cannot be served at the same meal. Mintz is an Orthodox Jew. In 1981, after nine years of experimenting, Tofutti was the result. Mintz's company spread itself thin. Tofutti was sold in soft-serve form through

© Copyright Soyinfo Center 2013

thousands of convenience stores and other retail outlets, but it was also sold to grocery stores in hard-frozen form, so that Tofutti competed with itself. Mintz also began to push franchising of "Tofutti Shops." Sales in fiscal 1986 dropped to $11.6 million. An agreement with the Haagen-Dazs unit of Pillsbury Company for national distribution to grocery stores turned sour that year, and Tofutti has had to build its own distribution network. Soft-serve sales have been going down because stores would rather sell packaged products, says Mintz. Only one franchised Tofutti shop ever opened in New Jersey, and Tofutti Brands bought it from the franchisee a few months later. Tofutti sales was soon drowning in red ink. Sales fell to $7.7 million last year and the company lost more than $2 million. This year, however, a turnaround is on the way. Tofutti has picked up new distributors, and more importantly, Mintz is now giving the company the sharp focus it lacked before. He is concentrating on sales to supermarkets. "That's where the profits are, that's where the volume is."

The new products first went into stores in Atlanta, New York, Seattle and Dallas. The company plans to spread them across half of the country by early 1989. Sales have risen 11% in the first quarter, compared with the same quarter in 1987. Tofutti Brands actually shows a small profit. In the second quarter, profit was again thin–but sales were up 17% over the previous year, to more than $2.8 million.

8819. **Product Name:** [Marinated Tofu].
Foreign Name: Tofu Mariniert.
Manufacturer's Name: Das Tofuhaus.
Manufacturer's Address: Hauptstrasse 13, D-6719 Lautersheim, West Germany. Phone: 06351-43718.
Date of Introduction: 1988. November.
Ingredients: Tofu, soy sauce, garlic, ginger.
Wt/Vol., Packaging, Price: 250 gm.
How Stored: Refrigerated.
New Product–Documentation: Form filled out by Albert Hess. 1988. Dec. 1. This product was introduced in Nov. 1988. Label. 1988. 2.5 by 3.5 inches. Black on yellow.

8820. **Product Name:** [Grilled Tofu].
Foreign Name: Grill Tofu.
Manufacturer's Name: Das Tofuhaus.
Manufacturer's Address: Hauptstrasse 13, D-6719 Lautersheim, West Germany. Phone: 06351-43718.
Date of Introduction: 1988. November.
Ingredients: Tofu, olives, herbs.
Wt/Vol., Packaging, Price: 250 gm.
How Stored: Refrigerated.
New Product–Documentation: Form filled out by Albert Hess. 1988. Dec. 1. This product was introduced in Nov. 1988. Label. 1988. 2.5 by 3.5 inches. Black on red.

8821. **Product Name:** Soyfoods Tofu.
Manufacturer's Name: Great Australian Tofu Pty. Ltd.
Manufacturer's Address: Factories 12-1, 2 Paton Place, Manly Vale, NSW 2093, Australia. Phone: (613) 580-8688.
Date of Introduction: 1988. November.
New Product–Documentation: Form filled out by Lindsay Kotzman, owner. 1989. Jan. He purchased the business in Nov. 1988. Monthly production of this tofu is 5,000.

Note: This company was originally founded in Dec. 1978 as The Soy Bean Factory in Sydney by Michael De Campo, Yoshiko Wright, and Marcea Weber.

8822. Hagler, Louise; Bates, Dorothy R. eds. 1988. The new Farm vegetarian cookbook. Summertown, Tennessee: The Book Publishing Co. 223 p. Illust. Index. 23 cm.
• ***Summary:*** A slightly revised edition of the 1978 Farm Vegetarian Cookbook, this vegan cookbook contains a wealth of soyfoods recipes, and no recipes calling for eggs or dairy products. Address: Summertown, Tennessee.

8823. Krizmanic, Judy. 1988. Natural foods forecast. *Vegetarian Times.* Nov. p. 32-33, 36-39.
• ***Summary:*** Organics: Organic products will soon become the fastest growing category in natural foods. Even progressive mainstream supermarkets will add organic produce to their inventory or, if they can afford it, will test for pesticide levels on produce that may not be organic. The California and Nevada-based Raley's Superstore chain already has done both.

Legume's Gary Barat has plans to expand his selection of tofu chocolate with a chocolate-covered rice cake (made with Lundberg Farms rice cakes). "Plans are brewing for tofu chocolate chips, fudge sauce, and just about any chocolate product imaginable... Dairy-Free Replacements of Dairy Classics... Expect egg replacers, tofu cheesecake and tofu cream cheese," and, hopefully, tofu sour cream.

"Soymilk. Within this next year, look for soymilk in your supermarket's dairy case... Imagine a soymilk creation: a creamy, malty drink–made from a mixture of soymilk and amasake."

8824. Morinaga Nutritional Foods, Inc. 1988. A healthy market (Ad). *Whole Foods* (*Berkeley, California*). Nov. p. 45.
• ***Summary:*** This full-page color ad states: "Mori-Nu offers you higher profits and increased sales with: Beautiful, full-color advertising in the following magazines: Prevention (regional), Health (regional), 50 Plus (regional), Heart Corps, California Senior Citizens, Delicious (national), Weight Watchers (regional), Vegetarian Times (national), Southern California Senior Life, and more..." Also discusses: Guaranteed quality and taste. Convenient FDA approved long-life packaging. Strong market support (6 items).

May be sold frozen for one year after date on package." Copyright 1991.

8829. Powis, Beth. 1988. Tofu–High quality nutrition. *Muscle & Fitness.* Nov. p. 35, 181-82.
• ***Summary:*** Jack O'Blennis, owner of Inglewood, California's Monster Maker gym, uses tofu in a special diet when training body builders for drug-free competition. Bodybuilder Greg Parras says he lost more than 15 pounds in a month on O'Blennis' diet, without losing mass. The following are several recipes that come from Mori-Nu Tofu: Salmon Loaf & Salad; Herb spiced Meat Balls; Tofu Enchiladas; and Manicotti Shells. Address: Woodland Hills, California.

8830. **Product Name:** Simply Better Tofu, Tofu Burgers, Marinated Tofu Pouches, Tofu Paté, Tofu Cottage Cheese, Tofu Dressing [Curry, or Garlic & Dill], Tofu Mayonnaise.
Manufacturer's Name: Progressive Foods Pty. Ltd.
Manufacturer's Address: 24-B Braeside Dr., Braeside, VIC 3195, Australia. Phone: 613-580-8688.
Date of Introduction: 1988. November.
New Product–Documentation: Form filled out by Lindsay Kotzman, owner. 1989. Jan. She purchased the business in Nov. 1988. Monthly production is as follows: Tofu (375 gm and 750 gm): 7,000 kg. Tofu burgers: 1,000 kg. Marinated tofu pouches: 1,000 kg. Tofu cottage cheese: 100 kg. Tofu paté: 80 kg. Tofu dressings: 30 kg each flavor. Tofu mayonnaise: 30 kg.

8831. **Product Name:** [Tofu Burgers {Deep-Fried} (Garlic and Fines Herbes, Provencale with Tomato & Onions, or Forest Mushrooms)].

© Copyright Soyinfo Center 2013

Foreign Name: Doré de Soja (Ail/Fines Herbes, Provençale, Forestière).
Manufacturer's Name: SOY (Société Soy).
Manufacturer's Address: 1 rue du Crêt de la Perdrix, 42400 Saint-Chamond, France. Phone: 77.31.24.42.
Date of Introduction: 1988. November.
Wt/Vol., Packaging, Price: 2 x 100 gm in vacuum pack.
How Stored: Refrigerated.
New Product–Documentation: Talk with Bernard Storup. 1990. June 13. Tof'in is the same as Croque Tofou, but not the same as Croque Tofou Léger. Tof'in was discontinued about 2 years ago. Then 18 months later the company launched, for supermarkets, a product named Doré de Soja, which are the same as Tof'in. The packaging is very nice.

Letter from Bernard Storup. 1990. Dec. 26. "All the confusion between deep-fried and not deep-fried Croque Tofou comes from the fact that our first labels all said "Léger," even for the deep-fried products. Croque Tofou Leger (not deep-fried) was the continuation of our former Tof'in (not deep-fried). Since Jan. 1990 we have stopped using the term "Léger" on our deep-fried products. Our Croque Tofou Leger have new labels since Jan. 1990. They are now called Doré de Soja, with 2 in each package."

8832. **Product Name:** Soft Cream Cheese Style Soyco, and Soyco Parmesan Style (With Casein) [Shreds, or Grated in Shaker Canister].
Manufacturer's Name: Soyco Foods. Div. of Galaxy Cheese Co.
Manufacturer's Address: P.O. Box 5181 or 5204, New Castle, PA 16105. Phone: 800-441-9419 or 412-656-1102.
Date of Introduction: 1988. November.
Ingredients: Incl. tofu, casein, and soy oil.
Wt/Vol., Packaging, Price: 1. 8 oz tub retails for $2.49. 2. 3.5 oz shaker retails for $2.34.
How Stored: Refrigerated.
New Product–Documentation: Spot in Cheese Market News. 1988. Nov. 11. "Soyco foods offers new cheese alternatives." The two new cheese alternatives will be introduced to health food stores nationwide in the next few weeks. The Parmesan style products have 35% fewer calories and 40% less fat than conventional Parmesan. Soya Newsletter. 1988. Sept/Dec.

Leaflet sent by Patricia Smith from Natural Products Expo East. 1992. Sept. 11-13. Lite 'n' Less Grated Parmesan comes in 3.5 oz shakers. The company is now at 2441 Viscount Row, Orlando, Florida 32809.

8833. Tofu Shop Deli and Specialty Foods Co. 1988. This holiday season, make it Tofu Turkey (Leaflet). Arcata, California. 1 p. Front and back. 22 x 14 cm.
• ***Summary:*** Typeset, black ink on yellow paper, with four illustrations: (1) The Tofu Shop, on pillars and with a tree growing overhead, at the edge of the ocean (lower left). (2) A clip-art illustration of a large turkey with tail fanned and near-side wing extended (upper left). (3) Corn plants growing in a field (upper right). (4) Santa Claus in traditional costume, holding a large white box.

"- mmm delicious. * Stuffed, basted, baked. * Ready to eat or reheat. * Great leftovers.

"That's right folks! This year you can save the bird and eat it too! No bones about it. Special order one of our delicious Tofu Turkeys. They're made 100% from our own traditional-style tofu, stuffed with our own secret family stuffing. And basted and baked to a golden brown. M'good!

"This year special order a Tofu Turkey from The Tofu Shop or stop by our deli for a 'hot slice' with all the fixin's!"

"Order information: Order your Tofu-Turkey and all the fixins from the: Tofu Shop–768 18th St., Arcata, California 95521. (707) 822-7409. All orders must be prepaid." Gives sizes, servings, and prices for Tofu Turkeys, Tofu-Turkey Stuffing, and Fresh Baked Pumpkin Tofu Pies. Order deadlines for Thanksgiving and Christmas. "Let's talk organic turkey."

On the back are "Tofu-Turkey directions." Ingredients for tofu, stuffing, and basting. Serving instructions. Wholewheat gravy. Homemade cranberry sauce. Address: 768 18th St., Arcata, California. Phone: 822-7409.

8834. **Product Name:** [Organic Tofu].
Foreign Name: Bio Tofu.
Manufacturer's Name: Tofurei Jutta Schoenemann.
Manufacturer's Address: Doerflaser Weg 22, D-8521 Aurachtal, West Germany. Phone: (09132) 60143.
Date of Introduction: 1988. November.
Ingredients: Water, organically grown soybeans (biologische Sojabohnen), nigari (orig. jap. Gerinnungsmittel Nigari).
Wt/Vol., Packaging, Price: 500 gm.
How Stored: Refrigerated.
Nutrition: Per 100 gm: Protein 11 gm, fat 5 gm, carbohydrate 1.5 gm, calories 87.

oregano, garlic, salt.
Wt/Vol., Packaging, Price: 12 oz. Retails for $2.29 (8/89, Concord, California).
How Stored: Refrigerated.
New Product–Documentation: Label. 1989. 4 by 2.75 inches. Black and orange-red on white. Illustration of a Japanese woman and her child. "No preservatives." In a cartoon caption the child is saying, "Mama-san! With tofu, it IS the whole enchilada!" Soyfoods Center product evaluation. 1989. Aug. 15. Delicious. The degree of spiciness is just right for us. Talk with Richard Baltierra, head of the Fresh Program at Trader Joe's. 1989. Aug. 23. This product was introduced in Nov. 1988.

Trader Joe's Fearless Flyer. 1990. Feb. p. 13. Soy cheese is now used to replace the former dairy cheese. "This newly reformulated product is not only cholesterol-free, it is also lactose-free and lower in saturated fats and calories than when it was made with dairy cheese. The tofu blends with and carries the flavor of the soy cheeses, giving the enchilada rich, smooth flavor. Black olives and a sprinkling of green olives add extra flavor. It's wrapped in a corn tortilla and covered with traditional spicy Mexican red sauce."

8836. *Vegetarian Times.* 1988. The main event [Recipe contest winners]. Nov. p. 40-42, 80-83.
• ***Summary:*** "More than 300 of you responded to our call for favorite recipes... First Place Vegan Winner was an Olive Patè and Tofu Quiche. Honorable Mention went to Tofu Croquettes. Third Place was Savory Tofu Pie. Honorable Mention went to Tofu 'Ham' and Cheese Bake."

8837. Morinaga Nutritional Foods. 1988. Mori-Nu Tofu is honored by the American Heart Association (News release). 5800 South Eastern Ave., Suite 270, Los Angeles, CA 90040. 1 p. Dec. 1.
• ***Summary:*** "Mori-Nu has worked with the American Heart Association on a number of projects over the past year and will continue to promote the healthy heart in years to come." The company was presented with a commemorative medallion in celebration of its philanthropy.

Published in Whole Foods. 1989. Feb. p. 14. And in Health Foods Business. 1989. Feb. Address: Los Angeles, California. Phone: 213-728-4325.

8838. Golbitz, Peter. 1988. Soyfoods Association: New developments (Interview). *SoyaScan Notes.* Dec. 2. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The Natural Foods Expo in Anaheim, 14-17 April 1989, will have a panel on marketing soyfoods aimed at retailers; 75 minutes for 4 speakers.

Concerning the tofu standards, the standards committee approved them unanimously, but when the board of directors voted on them, Barricini and Ralston Purina refused to approve.

The Association is planning to petition the USDA to allow tofu to be used as a meat alternative in school lunches and have it qualify for reimbursement.

Gordon Bennett will be president of SAA until April 1989. The Board has paid all past debts to Steve McNamara and has budgeted $5,000 for a part time administrator to work in the Soyatech office. The person will do 5-10 hours/week of SAA work such as news releases, soliciting dues, etc.

SAA voted to drop the Clip Service on 31 Dec. 1988. Golbitz gets about 50 magazines, which he clips and there was not enough in the clip service for him to make it worth $400 a year. Plus there was a big filing problem.

Golbitz is very happy that he bought the *Soya Bluebook.* In Jan. 1989 Soyatech will hire its second employee. So with Peter and Sharyn that makes 4 workers. During the Bluebook crunch in summer they will hire an extra person. Address: Bar Harbor, Maine. Phone: 207-288-4969.

8839. Chen, Edwin. 1988. Tofu maker closed for 2 years for filthy plant. *Los Angeles Times.* Dec. 6. p. 1, 8.
• ***Summary:*** K.Y. Foods, a major West Coast producer and supplier of tofu and other Asian-style fare, on Monday was banned from operating for two years and ordered to pay more than $20,000 in fines and other penalties as a result of grossly unsanitary conditions at its Los Angeles plant. In exchange for a no-contest plea, charges against two K.Y. executive–General Manager Taek Kwan Oh, 25 of Monterey Park, and President Kyu Yong Kim, 53, of Alhambra–were dropped by the Los Angeles city attorney's office.

The plant at 4607 S. Main St., had been the subject of two previous criminal prosecutions in 1979 and 1982 when it was owned by D.Y. Imports which was acquired in July 1987 by K.Y. Foods. K.Y. products were sold in Los Angeles, San Francisco and in parts of Colorado and Nevada under the brand names of CR Brand, DY Brand and KY Foods. In 1979 the D.Y. Imports plant pleaded no contest to five counts of health violations and paid a $3,150 fine. In 1982, it pleaded no contest to another six health code violations and paid a $3,400 fine. Similar conditions in 1985 prompted health officials to issue a recall of tofu made at the plant.

8844. Wang, Wei. 1988. Re: Use of corn starch in Chinese-style silken tofu. Letter to William Shurtleff at Soyfoods Center, Dec. 19. 3 p.
• ***Summary:*** "Are you aware that Chinese use corn starch with calcium sulfate to make the coagulant for silken tofu. They use: 2 teaspoons calcium sulfate, 6 tablespoons corn starch, and 1 cup water. The corn starch seems to give silken tofu a smoother texture.

"I am thinking of helping Chinese people in this country (whose native language is Chinese) to make tofu and soybean products at home. I am trying to find out if there is any government funding for such a program." Address: P.O. Box J, Alviso, California 95002. Phone: 408-263-0296.

8845. Skaria, George. 1988. So ya' keep trying: Undeterred by unhappy examples, Amrit Protein Foods wants to shake up the soya-based foods market. *BusinessWorld* (*India*). Dec. 7-20. p. 17.
• ***Summary:*** Amrit Protein Foods, owned by Ghaziabad-based Amrit Banaspati Co. (ABC for short), is scheduled to start soymilk production in April 1989. "The new venture is just a logical extension of our existing activities and we should do well," says N.K. Bajaj, Chairman of the Amrit group (1987-88 annualised turnover: Rs 200 crores). The flagship company ABC's range of successful consumer products includes Gagan vanaspati, Ginni refined oil and Alfa washing soap. The group also claims to have successfully launched potato chips under the brand name Uncle Chipps.

The new outfit, Amrit Proteins, plans to introduce soya beverages and paneer. Soya beverages have not been popular in India. At least one earlier attempt (Noble Soya's Great Shake soya milk beverage) did not do well. The Indian consumer is not enamoured of soya's after-taste. Amrit Soya's beverages will have a neutral taste to make them more appealing to the Indian palate. Bajaj admits "All of us have apprehensions about soya products. They have not found acceptance so far." One strategy for success is to position soya milk as a health product. It is felt Noble Soya's Great Shake was a failure because it was advertised as a fun drink although the taste wasn't fun.

Test marketing of sample products in selected areas seems to have yielded positive results with consumers findings the taste acceptable. Additionally, the company can push for success by relying on the proven marketing strengths of the group–which has a network of 800 dealers and over 1 lakh retail outlets. Amrit's Rs 14.5 crore plant, coming up in Ghaziabad on the outskirts of Delhi, is expected to reach 55% capacity utilisation in its first full year of operations, using up 3,500 tonnes of soyabean. The

© Copyright Soyinfo Center 2013

company expects a turnover of Rs 15 crores.

8846. Levey, Robert. 1988. Two storefront surprises. *Boston Globe.* Dec. 22. p. 4.
Address: Globe Staff.

8847. *Tri-State Neighbor* (*Sioux Falls, South Dakota*). 1988. Supporting the super soybean. Dec. 23.
• ***Summary:*** "Promoting new uses and the health aspects of soybeans is the goal of the newly-organized South Dakota Bean Boosters." The core group is made up of about 10 women throughout the state. They discuss the benefits of soy oil and tofu.

"'Tofu–It's soy good' is a program describing what tofu is, how it is used, and what its health benefits are. Tofu recipes are also presented." Betty Hansen, executive director of the South Dakota Soybean Program, said the Bean Boosters will be putting together a soybean cookbook.

8848. *SoyaScan Notes.* 1988. Soyfoods Clipping Service receives 1,766 clips in 1988, up from 1,587 clips in 1987 and 1,586 clips in 1986 (Overview). Dec. 29. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** This represents an 11% increase over 1987 and 1986, and shows the strong interest in soyfoods, especially tofu, by the U.S. media. The clips are sent to Soyfoods Center by Luce Press Clippings, America's first clipping service. Luce clips 13,000 publications and has over 3,000 clients. The other major U.S. clipping service, Burrelle's in Livingston, New Jersey, is about the same size and is also highly recommended. In both, readers read the articles and key all nouns into a computer. The computer then selects the articles.

8851. **Product Name:** Smoked Tofu, Teriyaki Tofu, Homestyle Tofu Balls, Gourmet [Nigari] Firm Tofu, Fiber Tofu, BBQ Tofu.
Manufacturer's Name: Dae Han, Inc.
Manufacturer's Address: 737 S.E. Alder St., Portland, OR 97214. Phone: 503-233-8638.
Date of Introduction: 1988. December.
Ingredients: No ingredients given on labels.
How Stored: Refrigerated.
New Product–Documentation: Talk with Paul Moss, who has worked with Dae Han for 7 years. The company name is now Dae Han, Inc., 737 S.E. Alder St., Portland, Oregon 97214. Phone: 503-233-8638. They now make tofu, smoked (& baked) tofu (7.5 oz), regular and cajun-style tofu burgers, homestyle tofu balls (5.25 oz), soymilk, teriyaki tofu (7.5 oz), fiber tofu (10 oz), BBQ (barbecue) tofu (7.5 oz), and kimchi. All the products listed above were introduced in Dec. 1988. Paul plans to use their plant to make tempeh.

Labels for each of these products sent by Paul Moss. 1990. May 10. 4 by 2.5 inches. Self adhesive. Colorful. On each label is written "High protein. Low calorie. Cholesterol free. No preservatives. (Keep Refrigerated)." The Gourmet firm tofu is certified kosher by Rabbi Yonah H. Geller.

Leaflet from Dae Han, Inc. 1991. July. Quality and unique. A photo shows all of the products, and their names are listed.

8852. **Product Name:** Tofu Burger [BBQ Style, or Cajun Style].
Manufacturer's Name: Dae Han, Inc.
Manufacturer's Address: 737 S.E. Alder St., Portland, OR 97214. Phone: 503-233-8638.
Date of Introduction: 1988. December.
Ingredients: No ingredients given on labels.
Wt/Vol., Packaging, Price: 7 oz.
How Stored: Refrigerated.
New Product–Documentation: Talk with Paul Moss, who has worked with Dae Han for 7 years. 1990. March 28. The company now makes these 2 burgers, which were introduced in Dec. 1988.

Labels sent by Paul Moss. 1990. May 10. 4.5 by 3 inches, oval. Self adhesive. Dark brown, light brown, red, black, and white. On each label is written "High protein. Low calorie. Cholesterol free. No preservatives. (Keep Refrigerated)."

Leaflet from Dae Han, Inc. 1991. July. Quality and unique. A photo shows all of the products, and their names are listed. The company also makes kim chee (mild or spicy).

8853. Golbitz, Peter. 1988. Soyfoods sales projected to reach $750 million by 1990. *Soya Newsletter* (*Bar Harbor, Maine*). Sept/Dec. p. 1, 6.
• ***Summary:*** The estimated retail value of soyfoods in the USA in 1988 was $682 million. The various soyfoods had the following market shares: soy sauce 67.3% (est. $460 million retail store valuation), tofu 11.3% (est. $77 million), second generation products 9.5%, soymilk 5.3%, miso 4.1%, soynuts 1.7%, tempeh 0.8%.

All of the 1980 figures used in this study for

comparisons and growth rates were taken, without permission, from *Soyfoods Industry & Market: Directory and Databook* by Shurtleff & Aoyagi. Address: Soyatech, Bar Harbor, Maine.

8854. **Product Name:** Tofu.
Manufacturer's Name: Kempadoo Tofu Co.
Manufacturer's Address: c/o Patricia Kempadoo, P.O. Box 3376, Marval, Trinidad and Tobago. Phone: 809-676-7785.
Date of Introduction: 1988. December.
New Product–Documentation: Talk with her husband. 1989. Jan. 30. Her husband's father is Peter Kempadoo, who used to make tofu in Guyana but who is now in England.

8855. Kingma, Sharyn. 1988. Soya interview: Tofu and the law [Steve McNamara and Frank Sasinowski of Hyman, Phelps & McNamara law firm in Washington, DC]. *Soya Newsletter* (*Bar Harbor, Maine*). Sept/Dec. p. 4-5, 18.
• ***Summary:*** Discusses the tofu standards, how the Food and Drug Administration defines and sets standards of identity for particular food products, and how the existing policies of the USDA influence tofu's acceptance into the school lunch program.

8856. Kloss, Jethro. 1988. Back to Eden: A human interest story of health and restoration to be found in herb, root, and bark. Revised and expanded second edition. Back to Eden Publishing Co., P.O. Box 1439, Loma Linda, CA 92354. xxviii + 1007 + 20 p. Illust. Index. 21 cm. Kloss Family Heirloom Edition. Index.
• ***Summary:*** One of the most creative and original sources of early soyfoods recipes, which include "Soybean Cream" and "Soybean Ice Cream." This revised edition contains all essential material from the original text of this classic work on healing herbs, home remedies, diet, and health, but it has been reorganized, re-typeset and re-indexed to make it easier to use and more contemporary. Three hundred pages of natural health information have been added. Old terms have been explained and updated. There are also 16 pages of photographs and 16 pages of new of family recollections by Jethro Kloss' daughter, son, and granddaughter. One interesting illustration in the photo section that has not appeared in earlier editions of this work shows an aerial view of the Nashville Sanitarium-Food Factory with a train and 3 sets of train tracks in front. The book has been published continuously by the Kloss family since 1946.

Contents: Section I: Natural health. 1. Personal experiences. 2. Soil preparation and farming. Section II: Herbs for healthful living. 1. History of herbal medicine. 2. Herbs. 3. General directions for preparation and use of herbs. 4. Tonic herbs. 5. Herbs used to treat disease. 6. Medicinal trees. 7. Specific herbs for various medical problems. Section III: Treating diseases with herbs. Treating diseases with herbs. Special notice. Section IV: Your body and its needs. The digestive section. 1. The importance of good nutrition. 2. Carbohydrates. 3. Fats. 4. Protein. 5. Mineral elements in the body. 6. Vitamins. 7. Water. 8. Fresh air, exercise, and sleep. Section V: Your foods. 1. Fruits. 2. Vegetables. 3. Fiber (to "help keep you regular"). 4. Oatmeal. 5. Nuts. 6. Breads and refined flour. 7. Meat and vegetarianism. 8. Milk. 9. Salt. 10. Garlic. 11. Healthful diets. 12. Obesity. 13. Fasting and healthful eating. Section VI: Food preparation. 1. Useful hints to preserve vitamins. 2. Kloss's favorite health recipes. 3. Cooking under steam pressure. 4. Aluminum cooking utensils. 5. Baking and breads. 6. Preparing wholesome desserts and beverages. Section VII: Effects of polluted and adulterated foods on the body. 1. Adulteration of food. 2. Health-destroying foods. 3. Dangers from disease in animals. Section VIII: Water and good health. 1. History of water cure. 2. Using water to preserve health. 3. Water's effects and use in treatment. 4. Water's effects on sickness. 5. Baths and water treatments. 6. Compresses and fomentations. Section IX: Skills in caring for the sick. 1. Nursing. 2. Massage. 3. High enemas. 4. The value of charcoal. Appendix: Glossary of old-fashioned medical terms. Glossary of medical properties of herbs. General tables.

A press release accompanying the new revised, 2nd edition notes: Back to Eden was written by Jethro Kloss during the 1920s and 1930s, with help from Promise and Eden, his daughter and son. It was first published in 1939, when the author was 76 years old. It has since sold more than 3 million copies. Kloss died in 1946 after retiring to Tennessee. Message Press, a small business in a rural community not far from Chattanooga, continued to publish Back to Eden for more than 25 years after his death, under the direction of Promise, his daughter. Unfortunately in 1967 the copyright expired during the confusion attendant to the illness and death of the book's country publisher. Promise's attempt to renew the copyright in Jan. 1968 was too late. In 1971 other publishers pirated Back to Eden. Address: Loma Linda, California.

8857. Lamont, Heather. 1988. The gourmet vegan. London: Victor Gollancz Ltd. 153 p. Index. 20 cm.
• ***Summary:*** This unillustrated vegan cookbook makes relatively little use of soyfoods, although it does use tofu (4 recipes), miso (3), and soya milk (in Soya Pudding). The author, a nurse by profession, has won three recipe competitions. Address: Quorn, Leicestershire, England.

8858. Langley, Gill. 1988. Vegan nutrition: A survey of research. The Vegan Society Ltd., 33-35 George St., Oxford 0X1 2AY, England. x + 121 p. Dec. Index. 21 cm. [255* ref]
• ***Summary:*** Contents: Foreword by Dr. Barrie M. Margetts. Introduction. Guidelines on vegan diets. Symbols & abbreviations. Tables. Vegan nutrition: 1. Protein and energy. 2. Carbohydrates. 3. Fats. 4. Vitamins: Vitamin A (retinol and beta-carotene), the B Group vitamins–Vitamin B-1

© Copyright Soyinfo Center 2013

(thiamin), vitamin B-2 (riboflavin), niacin (nicotinic acid and nicotinamide), vitamin B-6 (pyridoxine), folic acid (folate, known as folacin in the USA), pantothenic acid and biotin, vitamin B-12 (cobalamins), daily requirement of B-12–a controversy, vegan sources of B-12, vitamin B-12–the vegan experience, occasional B-12 deficiency, vitamin C (ascorbic acid), vitamin D (ergocalciferol D-2, cholecalciferol D-3), vitamin D deficiency, vitamin E (tocopherols), vitamin K, summary of vitamins.

5. Minerals: The major minerals–Calcium (meat, protein, and calcium balance, calcium balance and other nutrients, calcium and vegan diets, osteoporosis), iron (iron balance and other nutrients, iron and vegan diets), magnesium, phosphorus, sodium and chloride, potassium, sulphur. The trace elements–Zinc, selenium, iodine, copper, cobalt, chromium, manganese, fluorine, summary of minerals. 6. Milk and health. 7. The general health of vegans. 8. Vegan diets as therapy. 9. Conclusions. Further reading.

This book brings together in a concise, carefully researched, and well documented manner all that is currently known about vegan nutrition. It is the "most comprehensive survey ever undertaken of scientific research on vegan diets. *Vegan Nutrition* shows that a vegan diet can provide all the essential nutrients for health and fitness at any age, without the need to take supplements, as long as a few elementary rules are observed. This proviso is particularly relevant to infants and young children."

Table 12 shows portions of selected vegan foods that provide 100 mg of calcium: Spinach 17 gm, tofu 20 gm (4 times as much calcium as in the same weight of whole cow's milk), molasses 20 gm, parsley 30 gm, figs (dried) 36 gm, almonds 40 gm, soy flour 44 gm, and watercress 45 gm. Calcium is the most abundant mineral in the body. About 99% of it is in the bones and teeth in the form of calcium phosphates. The 5-10 gm of calcium not in the bones and teeth are required for muscle contraction, for the functioning of the nerves, for the activity of several enzymes, and for blood clotting. The British RDAs for calcium are 600-700 mg a day for children and teenagers, and 500 mg for adults (vs. 800 mg in the USA)–rising to 1,200 mg in pregnancy and during lactation. "There have been no reports of calcium deficiency in vegans; the exclusion of meat and the slightly lower amounts of protein in their diets may protect against this."

Concerning vitamin K: This vitamin is fat soluble, and is widespread in plant foods such as spinach, cabbage, cauliflower, peas, and grains. It is provided in roughly equal proportions by diet and from bacterial activity in the gut. Vitamin K is needed for normal clotting of the blood. Vegans are unlikely to suffer a dietary deficiency. Note: The author, whose first name is pronounced Jill, is a woman. Address: Hitchin, Hertfordshire, England.

8859. *Mori-Nu Healthy Times* (*Los Angeles*). 1988. Mori-Nu travels to Mt. Everest... Again! 2(6):1-2. Dec.
• ***Summary:*** Portland climber Stacy Allison, age 29, became the first American woman to reach the summit of Mt. Everest this fall. A 1987 photo, taken during her first attempt on Everest, shows her eating Mori-Nu Tofu of the box with Mt. Everest in the background. Address: California.

8860. Morinaga Nutritional Foods, Inc. 1988. Mori-Nu Tofu recipe cards. 5800 South Eastern Ave., Suite 270, Los Angeles, California 90040.
• ***Summary:*** These recipes, developed by Julia Weinberg & Co., were sent free of charge to members of the Mori-Nu Health for Life Club during 1988. Each recipe card is 3 by 5 inches, accordion folded, with five cards printed front and back. The first panel contains a full color recipe photo; on the other nine panels are recipes.

Series 6: Mori-Nu's International Flavors (Feb.). Series 7: Mori-Nu Meal Makers (April). Series 8: Mori-Nu Mornings (June). Series 9: Quick and Cool Recipes from Mori-Nu (Aug.). Series 10: Mori-Nu for Every Reason (Oct.). Series 11: Mori-Nu Holidays (Dec.). Address: Los Angeles, California.

• ***Summary:*** Morinaga recently sponsored a golf tournament and health fair to assist heart patients and their families. It was called the "Heart Healthy Golf Classic and Health Fair." Address: 5800 South Eastern Ave., Suite 270, Los Angeles, California 90040. Phone: 213-728-4325.

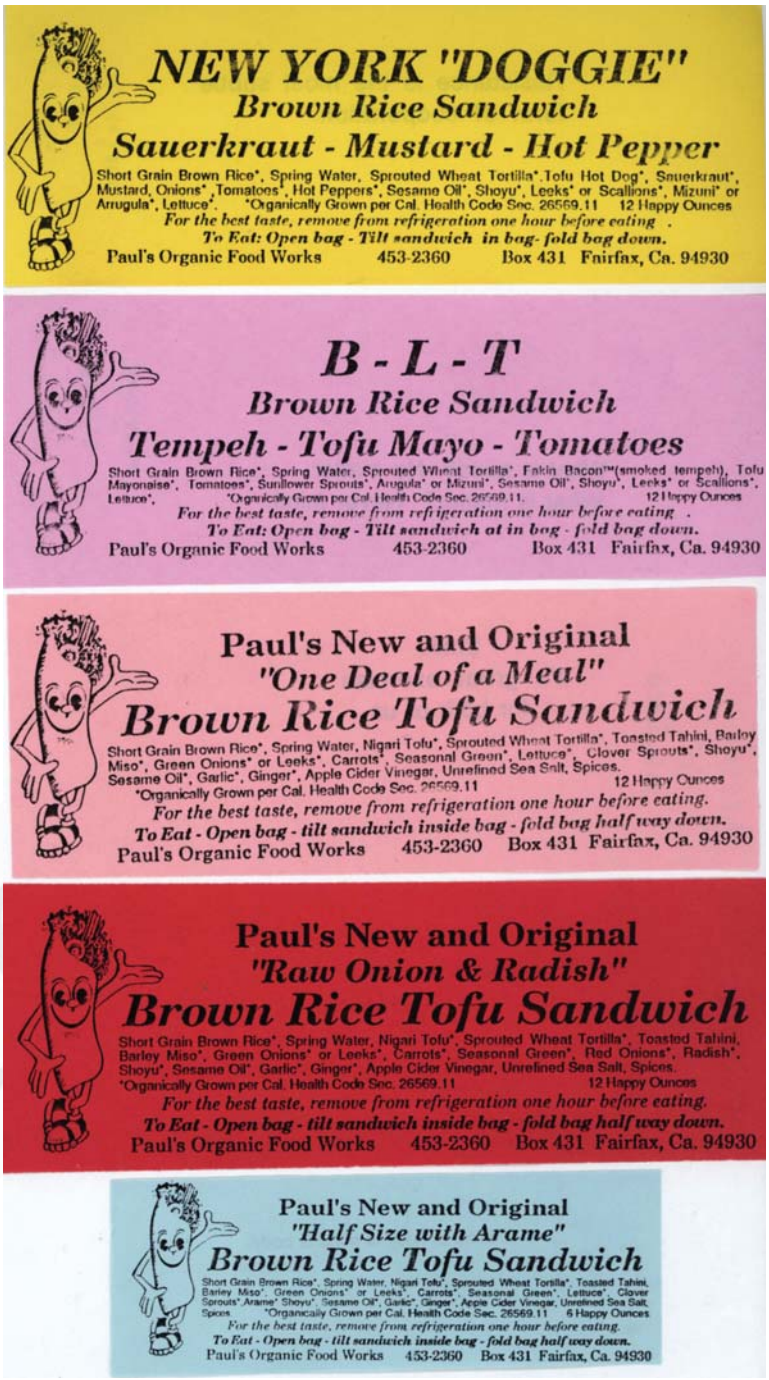
8862. **Product Name:** Tofu Kit.
Manufacturer's Name: Nancy L. Wilsand Co.
Manufacturer's Address: 1721 Clemson Dr. #5, Colorado Springs, CO 80909.
Date of Introduction: 1988. December.
New Product–Documentation: Letter from Nancy Wilsand. 1989. Jan. 9. Kit sells for $18.95 plus shipping. Order kit. Size (inside dimensions) is 6.25 inches by 3.75 inches by 3.375 inches deep. Separate top and bottom. Wood, glued with wooden pegs. Sloppy craftsmanship. Cloths must be washed before use. 2 pages of instructions and recipes taken from *The Book of Tofu* (Ballantine ed.) by Shurtleff and Aoyagi without permission or acknowledgment.

8863. **Product Name:** New York "Doggie" (Tofu Hot Dog & Brown Rice Rolled in a Tortilla).
Manufacturer's Name: Paul's Organic Food Works.
Manufacturer's Address: P.O. Box 431, Fairfax, CA 94930. Phone: 415-453-2360.
Date of Introduction: 1988. December.
Ingredients: Short grain brown rice*, spring water, sprouted wheat tortilla*, tofu hot dog*, sauerkraut*, mustard, onions*,

© Copyright Soyinfo Center 2013

tomatoes*, hot peppers*, sesame oil*, shoyu*, leeks* or scallions*, mizuni* or arugula*, lettuce*. * = Organically grown per Cal. Health Code Sec. 26569.11.
Wt/Vol., Packaging, Price: 12 oz. Retails for $4.25 (8/89, northern California).
How Stored: Refrigerated.
New Product–Documentation: Label sent by Paul Duchesne. 1989 Aug. 11. 5.5 by 2 inches. Black on yellow paper. “Brown rice sandwich. Sauerkraut–Mustard–Hot Pepper. 12 happy ounces. For the best taste, remove from refrigeration one hour before eating. To eat: Open bag–Tilt sandwich in bag–fold bag down.” Illustration of animated product, with smiling face on tortilla, arms, and legs. On the back is the statement, “Resistance is the most subtle form of cooperation.” The statement is changed weekly. The tofu hot dog is made by Light Foods.

Note: Arugula or arrugula (pronounced uh-RUE-guh-luh, an Italian term), an ingredient in this product, is a plant of the mustard family resembling a fancy, slightly bitter lettuce grown in Salinas, California. It is expensive and can be replaced with parsley. It is also called “rocket” or “garden rocket” after the French word *roquette.* Mizuni (pronounced mi-ZU-ni) is a mustard green, which is grown in California. It is not listed in any Webster’s Dictionary.



8864. **Product Name:** B-L-T Brown Rice Sandwich (With Tempeh, Tofu Mayo & Tomatoes).
Manufacturer’s Name: Paul’s Organic Food Works.
Manufacturer’s Address: P.O. Box 431, Fairfax, CA 94930. Phone: 415-453-2360.
Date of Introduction: 1988. December.
Ingredients: Short grain brown rice*, spring water, sprouted wheat tortilla*, Fakin’ Bacon (smoked tempeh), Tofu Mayonnaise, tomatoes*, sunflower sprouts*, arugula* or mizuni*, sesame oil*, shoyu*, leeks* or scallions*, lettuce*. * = Organically grown per Cal. Health Code Sec. 26569.11.
Wt/Vol., Packaging, Price: 12 oz. Retails for $4.25 (8/89, northern California).
How Stored: Refrigerated.
New Product–Documentation: Label sent by Paul Duchesne. 1989 Aug. 11. 5.5 by 2 inches. Black on purple paper. “12 happy ounces. For the best taste, remove from refrigeration one hour before eating. To eat: Open bag–Tilt sandwich in bag–fold bag down.” Illustration of animated product, with smiling face on tortilla, arms, and legs. On the back is the statement, “What is mind? No matter. What is matter? Never mind.” The statement is changed weekly. Note: Arugula or arrugula, (pronounced uh-RUE-guh-luh, an Italian term), an ingredient in this product, is a plant of the mustard family resembling a fancy, slightly bitter lettuce grown in Salinas, California. It is expensive and can be replaced with parsley. It is also called “rocket” or “garden rocket” after the French word *roquette.* Mizuni (pronounced mi-ZU-ni) is a mustard green, which is grown in California. It is not listed in any Webster’s Dictionary.

8868. **Product Name:** Soya Kaas Cream Cheese Style (Spreadable–With Casein) [Plain, Garlic & Herb, or Garden Vegetable].
Manufacturer's Name: Soya Kaas, Inc. A subsidiary of Swan Gardens, Inc. Distributed by American Natural Snacks.
Manufacturer's Address: Manufacturer: 218 Laredo Dr., Decatur, Georgia 30030. Distributor: P.O. Box 1067, St. Augustine, FL 32085. Phone: 904-825-2057.
Date of Introduction: 1988. December.
Ingredients: Garden vegetable (July 1992): Silken tofu (purified water, organically* grown soybeans, calcium sulphate–a natural earth mineral), soy oil, caseinate, vegetables (non-sulfited green onion, red pepper, carrot, celery), onion powder, celery seed, parsley, vegetable gums, lecithin, salt, natural flavor. * = In accordance with Sec. 26569.11 of the California Health & Safety Code.
Wt/Vol., Packaging, Price: 8 oz plastic tub. Retails for $3.55 (7/92, Maryland).
How Stored: Refrigerated.
Nutrition: Garden Vegetable: Per 1 oz. Calories 90, protein 3 gm, carbohydrate 1 gm, fat 8 gm, sodium 60 mg.
New Product–Documentation: Ad (half-page, color) in Natural Foods Merchandiser. 1988. Dec. p. 40. "Spreadable Cream Cheese Style Soya Kaas... Made with fresh organic silken tofu (not powders or isolates)."

Ad (5.5 by 8 inches, black and white) in Natural Foods Merchandiser. 1989. Jan. p. 22. "Garden vegetable cream cheese style Soya Kaas. No cholesterol, lactose free, low in sodium. Delicious as a sandwich spread, stuffed in vegetables, in soups and sauces, and more. Try it on bagels, rice cakes, and snack crackers. You'll love its rich, creamy flavor." Note: The latter flavor may have been launched in 1990.

Products (Garden Vegetable, and Garlic & Herb) with Labels purchased at Fresh Fields, Rockville Pike, Maryland. 1992. July 20. 4.5 inch diameter, 1.75 inch high tub. Red, green, and yellow on white. Illustration of silhouette of windmill with low trees nearby. "No cholesterol. Lactose free. Made with fresh, organic silken tofu. Naturally delicious."

Photocopy of Labels for Garlic & Herb, and Plain, sent by Casey Van Rysdam, President of American Natural Snacks. 1994. April 27. The ingredients for the Plain flavor now read: "Tofu (organic* soy milk, calcium sulfate), soy oil, caseinate (a milk protein), lactic acid, citric acid, vegetable gums (carob, carrageenan), lecithin, natural flavors, sea salt. * Organic ingredients are grown and processed in accordance with the California Organic Foods Act of 1990."

8869. *Soya Newsletter* (*Bar Harbor, Maine*). 1988. Pacific Foods opens modern soymilk plant in Oregon: First integrated facility in U.S. for producing soymilk, concentrated soymilk, and tofu. Sept/Dec. p. 17.
• ***Summary:*** In Oct. 1988 Pacific Foods of Oregon commissioned this $8 million plant located at Tualatin, Oregon, just a few miles south of Portland. The 23,000 square foot facility is currently designed to produce 3,000 liters per hour of soymilk base. The plant was designed to make soymilk and tofu for food processors (rather than retail customers) who wanted to use these products as ingredients in other foods. The plant's storage silos can hold up to 200,000 pounds of soybeans. Soymilk can be packaged in bulk or concentrated using ultrafiltration. The company plans to install an aseptic packaging system in the near future.

Pacific Foods is currently making and selling only one product, Naturally Northwest Soy Beverage in a 1-quart Tetra Brik Aseptic carton, packaged at another facility. It is America's first aseptically packaged soymilk that contains only soybeans and water. The company may add flavored soymilk products to its line in the near future. For more information contact Pacific Foods, 19480 S.W. 97th Ave., Tualatin, Oregon. Phone: 503-692-9666. Attn: Pat Carey, Vice President of Sales.

8870. **Product Name:** Rikemal Super.
Manufacturer's Name: Takeda U.S.A. (Importer). Made in Japan.
Manufacturer's Address: Orangeburg, New York.

© Copyright Soyinfo Center 2013

Date of Introduction: 1988. December.
New Product–Documentation: Food Engineering. 1988. Dec. This is a "new emulsifier, designed as a defoaming agent and quality improver for tofu. It should be added to soaked soybeans during or just prior to grinding, and has a suggested usage level of 0.5 to 0.8% of total dry soybean weight.

"Rikemal Super is a highly concentrated, blended monoglyceride in a free-flowing powder form." Other benefits are listed as: improves protein extraction efficiency, making it easier to separate soymilk from waste materials, and increasing the yield of soymilk. Because it disperses the coagulant homogeneously, loss of soluble protein is minimized and tofu yield increases by 6 to 20%.

"Rikemal Super also aids in increasing shelf life by preventing pore formation on the tofu surface (even when steamed) which prohibits development of bacteria."

8871. Weinberg, Julia. 1988. Tofu magic: Rich 'n' easy cooking with zero cholesterol Mori-Nu Tofu. Cookwrite Publishing, 1015 Gayley Ave., Suite 210, Westwood, California 90024. 68 p. Dec. Illust. No index. 22 cm. Spiral bound.
• ***Summary:*** Contents: Introduction to Mori-Nu. Cooking hints. Recipes–Dips, dressings, sauces, and toppings. Soups, salads, sides. Main dishes. Desserts and drinks. Light gourmet. Table: Nutrients per serving. The front and rear covers and the tabbed divider starting each section are graced quality with a full-page color photo of recipes. All paper is glossy. A very stylish presentation. Below each recipe is a listing of the calories, sodium, and cholesterol. Each recipe calls for Mori-Nu Tofu by name. Some of the recipes contain flesh (Corn 'n' Chicken Chili; Tofu Tuna Burgers; Turkey or Beef Stroganoff).

A Morinaga news release dated 10 Jan. 1989 and titled "Mori-Nu introduces 'Tofu Magic:' New dishes from an ancient food," states that this is a "low-cholesterol gourmet cookbook designed especially for the health conscious... and written by best-selling author Julia Weinberg." A color videotape about cooking with tofu, also titled "Tofu Magic," is also available from Mori-Nu. Address: c/o Morinaga Nutritional Foods, 5800 South Eastern Ave. #270, Los Angeles, California 90040. Phone: 213-728-4325.

8872. Zee, John A.; Boudreau, A.; Bourgeois, M.; Breton, R. 1988. Chemical composition and nutritional quality of faba bean (Vicia faba L. Minor) based tofu. *J. of Food Science* 53(6):1772-74, 1781. Nov/Dec. [36 ref]
• ***Summary:*** Tofu was made from both soybeans and faba beans (coagulated with magnesium chloride), then its chemical composition and antinutritional factors were analyzed. On a dry basis, both types of tofu had higher protein contents (55.7% and 82.0% for soy and faba bean tofu respectively). On a dry basis, faba bean tofu contained only 1.5% lipids compared with 34.4% for soybean tofu. Antinutritional and flatulence factors were much lower in faba bean tofu. Both types of tofu are comparable in terms of digestibility and amino acid availability.

Aside from favism, the faba bean contains fewer antinutritional and flatulence factors than soybeans, about one-fifth as much trypsin inhibitor, and considerably less raffinose and stachyose–which cause flatulence. Address: 1,3-4. Département de Nutrition Humaine et de Consommation; 2. Dep. de Sciences et Technologie des Aliments. All: Univ. Laval, Quebec, G1K 7P4 Canada.

8873. **Product Name:** Tofu Burger Mix (Sold Together with Tofu).
Manufacturer's Name: American Pride Soyfoods Inc.
Manufacturer's Address: 612 W. Kirkwood, Fairfield, IA 52556.
Date of Introduction: 1988.
New Product–Documentation: Talk with Alex Green. 1988. Sept. 9. This product is just now being introduced to counter Nasoya's thrust into the Midwest, which has hurt American Pride's market. During demos, 25% of those who sampled the product, purchased it on the spot, and 50% of these had either never tasted tofu before or did not like tofu.

Talk with Rick Desmond, partner in American Pride. 1990. Aug. 2. This product never made it past the test market phase. It was never really launched.

8874. Andersen, O.; Bojgaard, S.E. Assignors to Pasilac-Danish Turnkey Dairies A/S. 1988. A cheese-like product, and process of its preparation, and the use thereof. *European Patent Application* 261,586 A2. [Eng]*
• ***Summary:*** A cheeselike product which is sliceable and grateable, is produced by ultrafiltration of a high-protein vegetable milk, soymilk being preferred. It is claimed that the alpha-galactoside and trypsin inhibitor content of the cheese-like products are small. Address: DK-8100 Aarhus C, Denmark.

8875. Beddows, C.G. 1988. The old fashioned way with soya. *Food Science & Technology Today* 2(1):12-15. [6 ref]*
• ***Summary:*** The following soybean products are described briefly: soymilk, bean curd, tofu, tempeh, natto, sufu, miso, shoyu, and yuba. Protein yields are given for a range of plant crops versus milk and beef, e.g. soybeans 3500 kg/ha/annum versus 75 kg/ha/annum for beef. Recipes are included for miso cream cheese dip and deep fried tofu and miso soup. The marked rise in consumption of soybean products in the USA in recent years is noted. Address: Dep. of Applied Sciences, Leeds Polytechnic, Leeds LS1 3HE, England.

8876. **Product Name:** [Formoja Tofu Ravioli].
Foreign Name: Formoja Ravioli au tofu.
Manufacturer's Name: Cacoja. Affiliate of Coopérative

© Copyright Soyinfo Center 2013

Agricole de Colmar (CAC) (Marketer).
Manufacturer's Address: 8 rue Merxheim, 68500 Issenheim, France.
Date of Introduction: 1988.
Ingredients: Incl. tofu, tomato sauce.
Wt/Vol., Packaging, Price: 300 gm tins (cans).
How Stored: Shelf stable; refrigerate after opening.
Nutrition: Per 100 gm.: Calories 207, protein 3 gm, fat 1 gm, carbohydrate 12 gm.
New Product–Documentation: Cacoja leaflet. 1990. April. "Cacoja has a line of alternative, organic soybean-based, pre-cooked dishes. There are less than 300 calories in an individual serving... An original ravioli dish in which the meat filling is replaced by deliciously prepared and seasoned tofu. This dish is rich in protein and is free of cholesterol and animal fat. It is accompanied by a tomato sauce. Tofu is curdled soybean juice."

Letter and Label sent by Sylvain Stievenard of Sojinal (named Cacoja prior to Aug. 1990). 1990. Sept. 24. This product was introduced in 1988.

8877. **Product Name:** Marinated Tofu: Soya Bean Curd Marinated in Soy Sauce and Ginger.
Manufacturer's Name: Cauldron Foods Ltd.
Manufacturer's Address: 149 South Liberty Lane, Ashton Vale Trading Estate, Bedminster, Bristol, Avon, BS3 2TL, England. Phone: 0272 632835.
Date of Introduction: 1988.
Ingredients: Tofu (soybeans, calcium sulphate–natural coagulant). Marinade (soy sauce, fructose, citric acid, spices).
Wt/Vol., Packaging, Price: 180 gm vacuum packed in outside box. Retails for 79p (1/89).
How Stored: Refrigerated.
Nutrition: Per 100 gm.: Protein 11.5 gm, fat 5.25 gm, carbohydrate 2.10 gm, calories 102 kCal.
New Product–Documentation: Label. 1989, received. 5 by 4 by 1 inch paper box. Brown, orange, green, black, and red on white. Color drawing of tofu on a cutting board with a Chinese spoon, bowl, and chopsticks. Has a handwritten list of 20 recipes (mostly Chinese style) in which it can be used. Front panel also bears the green V Vegetarian logo in a box "Suitable for Vegetarians." On the back are three recipes: Hot & Sour Soup, Chinese Salad, and Marinated Tofu Stir Fry. "The versatile food ingredient. A complete vegetable protein. Keep chilled at 4ºC."

8878. **Product Name:** Vegetable Burgers with Tofu.
Manufacturer's Name: Cauldron Foods Ltd.
Manufacturer's Address: 149 South Liberty Lane, Ashton Vale Trading Estate, Bedminster, Bristol, Avon, BS3 2TL, England. Phone: (0272) 632835.
Date of Introduction: 1988.
Ingredients: Reconstituted mixed vegetables (peas, carrots, onion, potato, leek, green and red peppers), tofu (water, soya beans, calcium sulphate), ground soya beans, oats, textured soya flour, soy sauce (water, soya beans, wheat, salt), yeast, hydrolised vegetable protein, salt, yeast extract.
Wt/Vol., Packaging, Price: 300 gm paperboard box.
How Stored: Refrigerated.
Nutrition: Per 100 gm.: calories 187, protein 12.92 gm, fat 10.45 gm, carbohydrate 11.15 gm.
New Product–Documentation: Label. 1989, sent by Philip Marshall. Paperboard box. Green, red and black on white. Color photo of oval burger-like product on front. Contains 4 burgers. "Just heat to eat. Contains no artificial flavourings or colourings. Keep chilled at 4ºC." Package bears the green "V" symbol "Suitable for vegetarians."

Letter (fax) from Philip Marshall. 1990. July 9. This product was introduced in 1988.

8879. **Product Name:** [GranoVita Organic Tofu Vegetable Patties {Meatless}].
Foreign Name: GranoVita Bio-Tofu Gemuese Bratling.
Manufacturer's Name: DE-VAU-GE Gesundkostwerk GmbH.
Manufacturer's Address: Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany.
Date of Introduction: 1988.
Ingredients: Organic tofu (water, organically grown soybeans, calcium chloride), whole soybean product, vegetable oils and fats in changing amounts, fine bread crumbs (*Paniermehl*), mushrooms, paprika, carrots, leeks, wheat protein [gluten], sunflowerseeds, wheat grits, oat flakes, soy sauce, onions, egg protein, herbs, seasonings (*Wuerzmittel*), spices (*Gewuerze*).
Wt/Vol., Packaging, Price: 125 gm vacuum pack poly bag, 3 pieces per bag. Retails for DM 2.98.
How Stored: Refrigerated.
Nutrition: Per 100 gm.: Protein 13.1 gm, fat 10.2 gm, usable carbohydrates 19.5 gm, calories 222. 1 BE (Broteinheit, or diabetic exchange) = 61.5 gm.
New Product–Documentation: Label sent by Anthony Marrese. 2.75 by 5 inches. Red, green, white, and black on yellow. "Contains no flesh. Simply fry on both sides in a pan." A photo shows three ready-to-eat patties on a plate with green peas, potatoes, a tomato, and parsley. Exklusiv Neuform certification symbol.

Label sent by DE-VAU-GE. 1990. June 11. Date for GranoVita Tofu-Gemuesebratling given as 1988.

8880. **Product Name:** [GranoVita Organic Tofu Sausage (Seasoned, or with Vegetables)].
Foreign Name: GranoVita Bio-Tofu (Gewuerzrolle, or Gemueserolle).
Manufacturer's Name: DE-VAU-GE Gesundkostwerk GmbH.
Manufacturer's Address: Luener Rennbahn 18, Postfach

© Copyright Soyinfo Center 2013

1660, D-2120 Lueneburg (near Hamburg), West Germany.
Date of Introduction: 1988.
Ingredients: Seasoned: Organic tofu (water, organically grown soybeans, calcium chloride), water, vegetable oil, egg protein, paprika, seasonings, spices.
Wt/Vol., Packaging, Price: 200 gm poly sausage chub, inside a cellophane bag.
How Stored: Refrigerated.
Nutrition: Per 100 gm.: Protein 10.1 gm, fat 5.8 gm, usable carbohydrates 20.3 gm, calories 173. 1 BE (Broteinheit, or diabetic exchange) = ca. 60 gm.
New Product–Documentation: Manufacturer's brochure. 1989? "Bio-Tofu for the High Quality Kitchen." p. 4-5. A color photo shows the Labels of both flavors. Form filled out and Labels sent by DE-VAU-GE. 1990. June 11. These products were introduced in 1988. Labels. 2 by 4.75 inches. Self adhesive. Red, green, yellow, black, and peach (or greenish yellow) on white. Each contains an illustration of a pagoda on the front. "Practically cholesterol free. Gluten free. Contains no flesh. To prepare, pan fry or grill." Neuform certification symbol.

8881. **Product Name:** Kinugoshi Tofu (Silken Tofu).
Manufacturer's Name: Denver Tofu Co.
Manufacturer's Address: 6150 N. Federal Blvd., Westminster (N. Denver), CO 80221. Phone: 808-538-1305.
Date of Introduction: 1988.
New Product–Documentation: Talk with Haru Yamamoto. 1988. Aug. 25. The product was launched in 1988.

8882. **Product Name:** [Tofu (Water Packed, or Vacuum Packed), Tofu Burgers, Marinated Tofu, Dried Tofu, Smoked Tofu].
Foreign Name: Natur-Tofu (Lose, oder Vakuumverpackt), Tofu-Burger, Marinierter Tofu, Getrockneter Tofu, Raeucher-Tofu.
Manufacturer's Name: Detlef Dorow–Erster Berliner Tofurei. Later renamed Berliner Tofurei.
Manufacturer's Address: Luebbenerstr. 4, D-1000 Berlin 30, West Germany. Phone: 030/612-7931.
Date of Introduction: 1988.
New Product–Documentation: Letter from Bernd Drosihn of Viana Naturkost. 1990. April 8. This new soyfoods company, run by Detlef Dorow, makes fresh tofu in water, tofu in vacuum packs, burgers, etc. Maybe the most successful new company.

8883. **Product Name:** [Tofu].
Manufacturer's Name: Eugénio Silva.
Manufacturer's Address: Ruo Augusto Gil 9, 3ºDto., 1000 Lisboa, Portugal. Phone: -.
Date of Introduction: 1988.
New Product–Documentation: Letter from Miguel Azguime, owner of Miso Producoes. 1989. Nov. 30. This company started making soyfoods in Portugal in 1988 and is currently in operation. The phone number is unknown.

8884. **Product Name:** Ganmo (Deep-fried Tofu Patties).
Manufacturer's Name: Fresno Tofu Co.
Manufacturer's Address: 943 E Street, Fresno, CA 93706. Phone: 209-268-1717.
Date of Introduction: 1988.
New Product–Documentation: Talk with Brad Kubota, owner. 1990. Nov. 28. He introduced this product in 1988.

8885. **Product Name:** [Tofu Burger].
Foreign Name: Tofu Burger.
Manufacturer's Name: Galactina Ltd.
Manufacturer's Address: Birkenwej 1-6, CH-3123 Belp, Switzerland. Phone: 031-81-1111.
Date of Introduction: 1988.
New Product–Documentation: Letter from Peter Speck. 1988. March 11. "In 1988 we will launch tofu burger with a very low fat content, and low calorie tofu salads. Further

© Copyright Soyinfo Center 2013

products are planned."

Talk with Conrad Seewer of Galactina. 1990. May 21. These products are now on the market.

Label sent by Verena Krieger. 1990. July 5.

8886. **Product Name:** [Galactina / Weight Watchers Tofunette Tofu Pâté (With Vegetables, Exotic, Gourmet)].
Foreign Name: Galactina / Weight Watchers Tofunette (Primavera, Exotique, Traiteur).
Manufacturer's Name: Galactina Ltd.
Manufacturer's Address: Birkenwej 1-6, CH-3123 Belp, Switzerland. Phone: 031-81-1111.
Date of Introduction: 1988.
Ingredients: Tofu, water, yeast, vegetable oil, seasonings (Wuerzstoffe), salt, soy protein, binder, natural aromas coloring (E 150).
Wt/Vol., Packaging, Price: 2 x 50 gm cups with peel-off foil lids in a paperboard sleeve.
Nutrition: Per 100 gm.: Protein 10.8 gm, fat 9.4 gm, carbohydrates 6.4 gm, calories 154.
New Product–Documentation: Letter from Peter Speck. 1988. March 11. "In 1988 we will launch tofu burger with a very low fat content, and low calorie tofu salads. Further products are planned."

Talk with Conrad Seewer of Galactina. 1990. May 21. These products are now on the market.

Label sent by Verena Krieger from Switzerland. 1990. July 5. 5.5 by 2.5 by 1 inch sleeve. Black, yellow, blue, and green on white. Color photo of a cracker topped with Tofunette pâté, a piece of lettuce, and a wedge of tomato. "Reduced-calorie pâté with tofu. Ideal for hors d'oeuvres, as a spread for bread, etc. Vegetarian pâté. Only 77 calories per cup/serving." "Weight Watchers" is written in large letters atop the front panel; "Galactina" is written in smaller letters along the lower edge. On the side of the sleeve: "Use Tofunette directly/alone or mix with quark, nonfat or low-fat cream cheese (*fromage blanc battu*), cottage cheese, etc. For Weight Watchers members, 50 gm = ½ protein portion/ exchange and 42 calories of options."

Note: In French, the term "traiteur" traditionally refers to a seller of prepared foods; it can be either a retail shop or a caterer, and it carries the connotation of gourmet, high class, and expensive. The term "primavera" refers to something with vegetables in it, such as either specks of diced carrots giving a confetti effect or ground vegetables to gave a colored pâté.

8887. **Product Name:** Tofu.
Manufacturer's Name: Green Dragon Tofu.
Manufacturer's Address: 19 the Crescent, Hipperholm, Halifax, W. Yorkshire, England. Phone: 0422 201686.
Date of Introduction: 1988.
New Product–Documentation: Owner: Deb Szumowski. Letter from Simon Bailey. 1988. Oct. 10. No longer a commercial business. Makes tofu only for domestic use.

8888. Jain, Manoj. 1988. Educating health workers and villagers on the dietary uses of soy foods in Madhya Pradesh,

© Copyright Soyinfo Center 2013

India. *Food and Nutrition Bulletin* (*United Nations Univ.*) 10(4):41-44. [9 ref]

• ***Summary:*** "Research has shown soy foods to be easily preparable, highly nutritious, and inexpensive. Common soy foods are soy milk, tofu, soy flour, soy yogurt, and miso, which can easily be prepared at home with conventional utensils." A brief description is given of how to make soy milk and tofu at home.

"The training program was developed in conjunction with the Mahatma Gandhi Memorial College in Indore, Madhya Pradesh, and a non-profit voluntary agency, Bharatiya Grahmeen Mahila Sangh (BGMS).

"In a two-day training programme, health workers were taught soy-foods preparation, soy nutrition, and how to conduct demonstrations in villages. Health workers and BGMS workers in groups of four prepared soy milk, tofu (soy paneer), soy yogurt, and other indigenous recipes such as soy bugiya (soaked blended soybeans mixed with gram flour and spices) and halwa (a sweet).

"After completing the training, the workers conducted demonstrations in eleven selected villages."

"Results: Thirty-five extension workers from BGMS and 15 government health workers from Indore District were trained for two days on the uses of soybeans. Over a two-month period, each worker gave an average of nine demonstrations. Each demonstration as attended on average by 23 women.

"The initial response of the villagers to soy foods was one of surprise. A typical comment was: 'We grow the crop and store it in our homes, yet did not know that it could be used for food.' They were amazed to see the many foods that could be prepared from soybeans."

"The most readily acceptable items were those that resembled indigenous foods and were easy to prepare, such as roasted and fried soybean, soy halwa, soy chutney, and vegetables stuffed with okra and tofu. Soy milk was not well accepted because of its beany flavour. When a mixture of 50% soy milk and 50% cow's milk was made and fennel seeds were added, it was more acceptable. The taste of soy yogurt (with 50% or 100% soy milk) was much more acceptable than that of soy milk. In making soy milk, tofu, and soy yogurt, a major problem was grinding the soaked soybeans on a grinding stone; the soybeans are slippery and grinding is time-consuming."

There are 4 tables. Table 3 shows "Nutritional content and cost of various indigenous foods prepared with and without soybeans." The seven foods are: Chappati [chapati], salad, cutlets, weaning food, chikki (sweet), papad, and badi. Address: Medical student, Boston Univ. School of Medicine, Boston, Massachusetts; Also work on his master's degree at the Univ.'s School of Public Health.

Manufacturer's Name: Jonathan-France.
Manufacturer's Address: La Gare, 24260 Le Bugue, France. Phone: 53 07 11 04.
Date of Introduction: 1988.
New Product–Documentation: DietExpo '89 Catalog (Paris). 1989. Oct. p. 72.

8892. **Product Name:** Buddhist Delight (Lo Han Chai), Vegetable Treat, Won Ton Dinners, and Vegetable Fried Rice.
Manufacturer's Name: Ming International Inc.
Manufacturer's Address: 112 Old Warwick Ave., Warwick, RI 02889. Phone: 401-738-4353.
Date of Introduction: 1988.
Ingredients: Includes tofu.
Wt/Vol., Packaging, Price: 16 oz.
How Stored: Frozen.
New Product–Documentation: Soya Newsletter. 1988. July/Aug. p. 8. Contact: Robert Tow.

Note: This is the earliest known commercial soy product made in Rhode Island; tofu is an ingredient.

8893. Ohara, T.; Ohhinata, H.; Muramatsu, N.; Ohike, T. 1988. [Studies on tofu and kori-tofu. IX. Improved sensory and chemical quality of the tofu]. *Research Report of the Nagano State Laboratory of Food and Technology* No. 16. p. 50-58. [9 ref. Jap]*
Address: Nagano State Lab. of Food Technology, Kurita, Nagano-shi, Japan.

8894. **Product Name:** Soyanaise (Non-Dairy Tofu-Based Mayonnaise).
Manufacturer's Name: Rayner Burges Ltd.
Manufacturer's Address: Bull Lane, London N18 1TQ, England. Phone: 01-807-3080.
Date of Introduction: 1988.
Ingredients: Incl. Tofu.
New Product–Documentation: Letter from Simon Bailey. 1988. Sept. 29. "Rayner Burges Ltd. is producing a Soyanaise in conjunction with Cauldron Foods, of which company they are the new owners. This company holds the legal rights to the name Soyanaise in Great Britain."

Letter (fax) from Philip Marshall. 1990. July 9. This product was introduced by Cauldron Foods in 1984. It did not sell well and was "delisted" (discontinued) within a year after it was launched. It was too expensive to make. When Rayners (Rayner Burgess Ltd.) acquired Cauldron Foods in Sept. 1987 they also acquired the trademark to this product name. Rayner Burgess, being a manufacturer of mayonnaises, now makes Soyanaise containing tofu made by Cauldron Foods Ltd., but it is not a Cauldron Foods product. No label is presently available. Bull Lane is the complete address; they take up the whole lane. Rayner Burgess, generally a maker of condiments, also makes salad creams, a lot of private-label products, essences, colorings, cherries and olives for cocktails, anchovy sauces and pastes, etc. They have a plethora of small and unusual brands.

8895. **Product Name:** Ta Brook Dried Beancurd.
Manufacturer's Name: SFC International (Importer). Made in Taiwan.
Manufacturer's Address: 2206 Lee Ave. #A, South El Monte, CA 91733.
Date of Introduction: 1988.
Ingredients: Beans, seasoning, sugar, refined salt, black soy sauce.
Wt/Vol., Packaging, Price: 3.5 oz plastic pouch. Retails for $0.75 (10/88 in Los Angeles).
How Stored: Shelf stable, 120 day shelf life.
New Product–Documentation: Label. 1987. 5.5 by 9 inches clear plastic pouch. Light and dark reddish brown black, and white. "Beef Lu Taio." Product looks like strips of moist beef jerky.

8896. **Product Name:** Eggless Egg Salad.
Manufacturer's Name: Simple Soyman.
Manufacturer's Address: 4877 North Green Bay, Milwaukee, WI 53209. Phone: 414-264-4133.
Date of Introduction: 1988.
New Product–Documentation: Dave Lawder. 1989. Milwaukee Business Journal. Jan. 15. p. 1, 21.

8897. **Product Name:** Tofu Turkey.
Manufacturer's Name: Simple Soyman.
Manufacturer's Address: 4877 North Green Bay, Milwaukee, WI 53209. Phone: 414-264-4133.
Date of Introduction: 1988.
New Product–Documentation: Dave Lawder. 1989. Milwaukee Business Journal. Jan. 15. p. 1, 21.

8898. Simply Natural, Inc. 1988. Simply Natural history. With resumes for Robert Pirello and Christina Hayes. Norma, NJ 08347. 4 p. Unpublished manuscript.
• ***Summary:*** Two pages of history. The founding date (May 1983) is incorrect and few dates are given. See SoyaScan Notes interview for details. Robert Pirello began his marketing career in 1971 as Vice President of Marketing for State Capitol Savings and Loan Assoc. (PA). In 1978 he was promoted to president of Pro-Com, a marketing subsidiary of the bank.

Christina Hayes graduated from the Univ. of Miami with an MFA [master of fine arts] degree in graphic design. She began her advertising career in 1979 as a junior art director at Mike Sloan Advertising in Miami. She was soon promoted to art director. In 1982 she founded Graphics Moderne, a full service design studio based in Coconut grove. In 1984 she sold her business and moved to Philadelphia, where she worked as a freelance designer until she met Robert.

8899. Sojarei Ebner-Prosl. 1988. Tofu aus der Sojarei [Tofu from the Sojarei (Leaflet)]. Baden bei Wien, Austria. 3 panels each side. Each panel: 21 x 10 cm. [Ger]
• ***Summary:*** This full-color orange and red leaflet explains that the company makes and sells many fresh soy products, mostly tofu and tofu products, but also tempeh and soy sprouts. They sell tamari, shoyu, miso, gomashio (sesame salt), many types of vegetables, flakes, and legumes. They also have a soya recipe brochure and a tofu cookbook.

This young family-run business, founded in 1984, focuses on fresh soyfoods of the best quality–pure and natural. Sojarei tofu is described as the culinary wonder child in unpretentious clothes, but with many talents. Tofu is sold in slices, diced, or in strips. It can be pressed or pureed. Color photos show: (1) The two owners and their wives. (2) A cake of their tofu. (3-7) Five small prepared tofu dishes. Address: Augasse 2, A-2500 Baden bei Wien (near Vienna), Austria. Phone: 02252/85101.

8900. **Product Name:** [Tofu Teriyaki].
Foreign Name: Tofu Teriyaki.
Manufacturer's Name: Sunrise Market Ltd.
Manufacturer's Address: 729 Powell St., Vancouver, BC, V6A 1H5, Canada. Phone: 604-254-0701.
Date of Introduction: 1988.
Ingredients: Tofu (water, soybeans, calcium sulphate, magnesium chloride, vegetable oil). Sauce: Water, soy sauce, sugar, cornstarch, ginger, garlic, sesame oil, spices.
Wt/Vol., Packaging, Price: 10 oz (300 gm).
How Stored: Refrigerated.
New Product–Documentation: Label. 5.5 by 3.5 inches. With color photo in middle of tofu teriyaki on pasta. "Pasteurized. No preservative." Product name also written in Chinese. Form filled out by Peter Joe. 1988. May 20. Gives date.

8901. **Product Name:** [Tofu Sweet N' Sour].
Foreign Name: Tofu Aigre-Doux.
Manufacturer's Name: Sunrise Market Ltd.
Manufacturer's Address: 729 Powell St., Vancouver, BC, V6A 1H5, Canada. Phone: 604-254-0701.
Date of Introduction: 1988.
Ingredients: Tofu (water, soybeans, calcium sulphate, magnesium chloride, vegetable oil). Sauce: Water, sugar, vinegar, tomato paste, soy sauce, cornstarch (modified), salt, citric acid.
Wt/Vol., Packaging, Price: 10 oz (300 gm).
How Stored: Refrigerated.
New Product–Documentation: Label. 5.5 by 3.5 inches. With color photo in middle. "Pasteurized. No preservative." Product name also written in Chinese. Form filled out by Peter Joe. 1988. May 20. Gives date.

8902. **Product Name:** Tofutti Tortellini (Filled with a Special Tofu Blend).
Manufacturer's Name: Tofutti Brands Inc. (Marketer).
Manufacturer's Address: 1098 Randolph Ave., Rahway, NJ 07065. Phone: 1-800-225-0332.
Date of Introduction: 1988.
Ingredients: Pasta: Durum wheat flour, egg whites, corn oil. Filling: Tofu, partially hydrogenated soybean oil, corn oil, water corn sweeteners, guar seed gum, carob bean gum, mono and di-glycerides, carrageenan, salt, fine cracker meal, spices, natural flavor.
Wt/Vol., Packaging, Price: 15 oz plastic bags.
How Stored: Frozen.
Nutrition: Per 2 oz.: Calories 210, protein 12 gm, carbohydrate 32 gm, fat 4 gm, sodium 158 mg, cholesterol 0 mg.
New Product–Documentation: Leaflet. 1988. "Cholesterol free. Lactose free." Gives ingredients and nutritional information. Spot in Jewish Press. 1989. March 9. "New Tofutti Brands." This product is called "Tofutti Tortellini Pasta."

8903. **Product Name:** Mexican Tofu-Vegie Burgers: 25% Fresh Vegetables.
Manufacturer's Name: Wildwood Natural Foods of Santa Cruz, Inc.
Manufacturer's Address: 1560 Mansfield Ave., Suite D, Santa Cruz, CA 95062. Phone: 408-476-4448.
Date of Introduction: 1988.
Ingredients: 1996: Wildwood Tofu (filtered water, organic soybeans grown in accordance with the California Organic Foods Act of 1990, nigari {magnesium chloride} or calcium sulfate {natural firming agents}), onions, carrots, kale, potato or rice flour, sea salt, herbs and spices, garlic crushed chilies, hi oleic safflower oil.
Wt/Vol., Packaging, Price: 6.5 oz vacuum pack.
How Stored: Refrigerated.
New Product–Documentation: Label sent by Billy Bramblett. 1998. July. He says this product was introduced in 1988, and made at Wildwood's plant in Santa Cruz.

8904. **Product Name:** Pesto Sauce.
Manufacturer's Name: Wildwood Natural Foods.
Manufacturer's Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1988.
Ingredients: Fresh basil, olive oil, parmesan and romano cheeses, pine nuts, parsley, lemon juice, garlic, salt, pepper.
Wt/Vol., Packaging, Price: 6.5 oz plastic tub.
How Stored: Refrigerated.
New Product–Documentation: Label sent by Billy Bramblett. 1998. July. He says this product was introduced in

1988, and made at Wildwood's plant in Fairfax. On the front label (green and red on white) is a silhouette of a wild wood of trees, plus a few flying birds, against the sky. On the back label are ingredients, nutrition facts and the company's two addresses in Santa Cruz and Fairfax, California.

8905. Anderson, Eugene N. 1988. The food of China. New Haven, Connecticut: Yale University Press. xvi + 313 p. Index. 24 cm. [380 ref]

• ***Summary:*** Contents: Preface. Acknowledgments. Chronology of food and agriculture in China. 1. The natural environment. 2. Prehistory and the dawn of civilization. 3. The crucial millennium: Chou through Han. 4. Food from the West: Medieval China. 5. Definitive shaping of the food system: Sung and the conquest dynasties. 6. Involution: Late imperial China. 7. The climax of traditional agriculture. 8. Chinese foodstuffs today. 9. Some basic cooking strategies. 10. Regions and locales. 11. Traditional medicinal values of food. 12. Food in Society. Appendix: Dinner at the Ngs.

Soybeans and soyfoods are mentioned as follows: North China is the native home of the soybean (p. 3). Soybeans seem to have been introduced to China in about 1000 B.C., but they were not popularized until the early Eastern Chou period (Ho 1975). Called, *shu*, they "seem to have come from the Jung people, northern and northeastern neighbors of the Chinese, who may have been Tungusic or Altaic, and were perhaps related to or descended from the Hungshan." Domesticated soybeans are descended from wild soybeans (p. 29).

Fan Sheng-chih wrote an agricultural manual in the first century B.C.; it survives in extensive fragments quoted in later agricultural works. This manual mentions the "Nine Staples": wheat, barley, millet, glutinous millet, spiked millet, soybeans, rice, hemp, and small beans (*Vigna* spp.) (p. 50).

The art of fermenting soybeans was perfected sometime in the late Chou period, or perhaps even as late as the very early Han. Thereafter, Han texts devote much space to salt-preserved soybeans [fermented black soybeans], called *tou shih* (*or shih*), the *tausi* of modern Cantonese cooking. *Chiang*, fermented sauce, was made from beans, but also from meat and elm products (p. 51).

During the late Southern Sung, Wu Tzu-mu coined the famous phrase: "the things that people cannot do without every day are firewood, rice, oil, salt, soybean sauce, vinegar, and tea" (Freeman 1977, p. 151). By the Sung, *chiang* had come to refer unequivocally to soy sauce; as late as the T'ang, it would probably have been understood, at least in literary contexts, to refer to a variety of fermented foods (p. 82).

Bean curd or *tou fu* (Japanese tofu) was first mentioned in the early Sung; its invention was attributed to Liu An of the Han Dynasty, "but this is preposterous." In fact, tofu "was invented in the late T'ang or early Sung–possibly by Taoists and/or people from the Huainan region, who then ascribed it, out of a sort of respect, to Liu An, the Taoist prince of Huainan (B.W.-C. Young, pers comm). Buddhists quickly took over the food as a good substitute for meat and for dairy foods..."

Soybean curd is also fermented; the firm tofu cubes are packed in brine and sold. "They constitute the Chinese equivalent of a cheese and are apt to be overpowering, reminiscent of strong German hand cheese [*Handkäse*, a German regional sour milk cheese]. They are graphically known as *ch'ou tou fu* (stinking bean curd). Only the very stoutest of heart eat them and then only in small quantities."

Also discusses: Vegetarian cooking (p. 66, 86, 118, 150, 196, 204, 249). Vegetarianism came to China with Buddhism

© Copyright Soyinfo Center 2013

during the T'ang dynasty. Fish farming (p. 103, 129). Note: Eugene Newton Anderson was born in 1941. Address: Dep. of Anthropology, Univ. of California, Riverside, CA 92521.

8906. Barnard, R. James; Pritikin, Robert; Rosenthal, M.B.; Inkeles, S. 1988. Pritikin approach to cardiac rehabilitation. In: Joseph Goodgold, ed. 1988. Rehabilitation Medicine. St. Louis, Washington, DC, Toronto: The C.V. Mosby Co. xv + 988 p. See p. 267-84. [42 ref]

• ***Summary:*** There are two Pritikin eating plans: "the Pritikin Lifetime Eating Plan and the therapeutic modification. In both eating plans less than 10% of total calories is derived from fat (the ratio of polyunsaturated to saturated is 2:4), 10% to 15% from protein, and the remainder from carbohydrate (90% unrefined). The plans provide 35 to 40 gm of dietary fiber per 1000 kcal and only 4 g of sodium chloride. The difference between the two plans is the amount of cholesterol. The therapeutic modification recommends cholesterol consumption of 25 mg or less per day, whereas the Lifetime Eating Plan recommends up to 100 mg per day.

"The eating plans consist primarily of whole grains, beans, peas, other vegetables, and fresh fruits."

Page 268 notes that "Cooked soybeans and tofu (up to 55% calories from fat)" are now recommended on the Pritikin Lifetime Eating Plan.

8907. Cost, Bruce. 1988. Asian ingredients: Buying and cooking the staple foods of China, Japan and Southwest Asia. New York, NY: William Morrow & Co. 333 p. Illust. Index. 27 cm. [39 ref]

• ***Summary:*** Soy related: Soybean sprouts and recipe (p. 86). Beans, incl. soybeans (p. 146-50). Asian "dairy" (p. 186-87): The soybean and the coconut (incl. bean curd, doufu-nao, fermented bean curd / fu-ru, molded bean curd / chou dou-fu, dried bean curd / dou-fu gan, and bean curd skin [yuba]. Soybean milk.

Soybean sauces, condiments and pastes (p. 195-211): Salted and fermented black beans with recipes for "Roast chicken with black beans stuffed under the skin," and "Soft-shell crabs with ginger, lemon, and black beans" ("Fermented black beans, often flavored with bits of ginger and sometimes orange peel, are usually sold in 8-ounce plastic bags." Acceptable brands: Mee Chun or Koon Chun Sauce Factory. "Earthier and probably more classic are the Yang Jiang Preserved Beans (with ginger) from Kwangtung, China), bean sauce (other names: Yellow bean sauce, brown beans sauce, bean paste, jiang; two types are with the beans whole or ground), hot bean sauce / paste with recipe, hoisin sauce, sweet bean sauce (made with soybeans [probably tian mian jiang, p. 202], Taiwan), soy sauce (Chinese, Japanese, tamari; Highly recommended light soy sauce: Pearl River Bridge. Highly recommended dark: Pearl River Bridge Mushroom Soy, flavored with straw mushrooms), Java's ketjap and other soy sauces miso with recipe, yellow miso (*Shinshu miso*), white miso (*shiro miso, Kyoto shiro miso*, sweet white miso), red miso (*aka miso*), Hatcho miso [soybean miso], barley miso (*mugi miso*), fermented bean curd (white or red; also called preserved bean curd, wet bean curd, bean cheese, dou-fu ru or fu-ru {Mandarin}, fu yu {Cantonese}) with two recipes).

"Red fermented bean curd" is described on pages 210 (also called "red bean cheese"), 211, and 283 (together with "red rice").

Concerning ketjap (p. 206): Tomato ketchup, although it may seem to be of Asian origin, may or may not come from a family of Asian pickled products. But the word "ketchup" is clearly of Asian origin. [Note: The modern Indonesian word for soy sauce is *kecap / ketjap / kechap*.] "It comes from the Malay *kechap*, which apparently derives from the *kôe-chiap* of a southern Chinese dialect (Amoy); both of these refer to the kind of briny liquid preserves that include fish and soy sauces." Throughout most of Southeast Asia, fish sauces are the standard condiment, in Indonesia (incl. Java) soy sauce is more widely used. Sweet Indonesian soy sauce (*ketjap manis*), which is very widely used, is traditionally sweetened with palm syrup and seasoned with garlic, star anise, salam leaves, and galangal.

Also discusses: Seaweed (p. 165-70): Kelp (Laminaria), laver (Porphyra), wakame, dashi, hair vegetable / black moss / hairlike vegetable (China; Gracilaria verrucosa), agar-agar. Monosodium glutamate (p. 247)

Bruce Cost was born in 1945. A photo and brief biography appears on the inside rear dust jacket. Address: [San Francisco, California].

8908. Das Tofuhaus. 1988. Tofu, das rein pflanzliche und vielseitige Produkt fuer eine natuerliche und gesunde Ernaehrung [Tofu, the pure plant-based and many-sided product for a natural and healthy diet (Leaflet)]. Lautersheim, West Germany. 2 panels each side. Each panel: 21 x 15 cm. [Ger]

• ***Summary:*** Page 1 discusses the nutritional benefits of tofu, explains that the company was started in 1983, has had 5 employees since 1985, and makes its tofu from ingredients grown organically in Germany and nigari. A cartoon shows a little Chinese man pulling a large cake of tofu in rickshaw. Three black-and-white photos (p. 2) shows the company's tofu-making equipment, and one large photo (p. 3) shows the company's products; these include Tofu ravioli, Tofu tortellini, Tofu bratlinge, Tofu bratschnitten, and Tofu spreads for bread (with garlic, spices {*Gewuerzen*}, horseradish, or herbs). On the rear cover are four recipes for using tofu and 4 color photos. Address: Hauptstrasse 13, D-6719 Lautersheim, West Germany. Phone: 06351-43718.

8909. Gandhi, A.P.; Bourne, M.C. 1988. Effect of pressure and storage time on texture profile parameters of soybean curd (tofu). *J. of Texture Studies* 19(2):137-42. [4 ref]

© Copyright Soyinfo Center 2013

• ***Summary:*** The pressure applied to soybean curd during processing into tofu has a profound effect on the moisture content, yield and some textural parameters of tofu. As the pressure increased from 0.186P to 0.744P the moisture content decreased from 82% to 60% and yield decreased from 2.0 kg to 1.2 kg per kg whole dry soybeans. Hardness-1, hardness-2, chewiness and gumminess increased linearly with increasing pressure. Springiness, cohesiveness, adhesiveness and stringiness were hardly affected by increasing pressure. During storage in water at 2-3ºC for 3 weeks, hardness, gumminess, and adhesiveness increased moderately; springiness decreased moderately and the other texture parameters were almost unchanged. • ***Summary:*** Describes examples of successful transfer of new technology, especially with Oriental fermented foods, such as tempeh, miso, and sufu. Address: 5407 Isabell, Peoria, Illinois 61614.

8913. Hinman, Bobbie; Snyder, Millie. 1988. More lean and luscious: Volume II in the lean and luscious series. Prima Publishing & Communications, P.O. Box 1260, Rocklin, CA 95677. 461 p. Illust. by Vonnie Crist. Two forewords by medical doctors. Index. 22 cm.
• ***Summary:*** "By popular demand! Over 400 additional recipes for today's low-fat, low-cholesterol, high-fiber lifestyle. Easy to prepare and delicious. Each recipe includes at-a-glance nutritional breakdown." The original *Lean and Luscious*, with over 400 recipes, is said to be "one of the best-selling low-calorie, low-fat cookbooks ever." Though many recipes call for the use of red meat, poultry, fish, seafood, eggs, and dairy products, the spiral-bound book also has an entire chapter featuring tofu (p. 217-36) with per-serving calorie counts and the content of protein, fat, carbohydrate, sodium, and cholesterol in each recipe. It including the following: Hints for tofu. Tofu macaroni and cheese (200 calories/serving). Chili con tofu (180 calories). Tofu double cheese patties (263 calories). Sweet and spicy tofu and vegetables (198 calories). Tofu-tuna Florentine. Oriental rice patties with sweet and sour sauce. Tofu and spinach casserole. Tofu-broccoli patties. Italian tofu squares. Tofu creole. Tofu 'stuffing." Tofu raisin and rice patties. Tofu stuffed potatoes. Tofu cinnamon cheese pudding. Tofu raspberry mousse. Tropical tofu fritters.

At "Hints for Tofu, the authors begin: "Tofu. The name sounds strange, almost mysterious. Many people have seen tofu in supermarkets or health food stores, but are afraid to try it because they don't know what to do with it. Following are some interesting facts about this unusual food, along with some cooking hints that will help you to discover the wonderful versatility of tofu." They proceed to describe its many benefits.

Tofu is also featured in four desserts: Tofu chocolate spice brownies (p. 386). Best carrot cake (p. 387). Miracle lemon tofu pie (p. 399). Tofu almond creme pie (p. 400).

The book also contains 4 soybean recipes: Soybean and spinach bake (p. 211). Soybean croquettes (p. 212). Tender-moist bean cake (p. 389). "Beanana" creme pie (p. 401).

• ***Summary:*** The copyright (but not the title page) page says that this is a 3rd edition, however the ISBN is unchanged from the 1984 edition. Address: West Germany.

8919. Larcher, Jacques; Volper, S.; Aubin, J.P. 1988. Le soja en régions tropicales: une synthèse des recherches de l'IRAT [The soybean in tropical regions: A summary of research conducted by IRAT]. *Memoires & Travaux de l'IRAT* (*France*) No. 15. 185 p. [91 ref. Fre]
• ***Summary:*** IRAT stands for *Institut de Recherches Agronomiques Tropicales* (Tropical Institute of Agronomic Research). Contents: Varietal improvement: Introduction of varieties, screening varieties, creating new varieties. Cultural practices: Preparing the soil, water needs of the soybean, planting, harvest, production and storage of seeds. Cultural systems: Crop rotations, companion crops, times of working. Fertilizers: Mobilization minerals, diagnosis based on foliage, nitrogen fertilizers, phosphate fertilizers, potassium fertilizers, organic manure, preformulated manure. Inoculation: Effects of inoculation on the nodulation and the yield of soybeans, methods of inoculation, selection of stocks of *Rhizobium japonicum*, determination of the dose of inoculum suited to the field, production of inoculum, survival of *Rhizobium japonicum* in tropical soils. Crop protection: Bacterial diseases, fungal diseases, viral diseases, nematodes, insects, chemical defoliation, herbicides. Technology: Senegal, Cameroon.

Appendixes: 1. List of varieties. 2. List of the main soybean varieties introduced to Benin, Burkina Faso, Cameroon, Comoro Islands, Côte d'Ivoire, Ethiopia, French Guiana, Madagascar, Mali, Niger, Polynesia, Central African Republic, Reunion and Martinique, Senegal, Togo. 3. Norms of observation and methods employed by IRAT. 4. Improvement of the components of soybean yield. Technical guide for growing soybeans in Senegal, Côte d'Ivoire, and French Guyana.

The section titled "Introduction of Varieties" (p. 9) notes that between the first and second world wars, the French peasantry introduced the soybean to Madagascar and cultivated it in the regions of Ambatolampy, Antsirabé, and Ankazomiriotra. It is interesting to note that it was in the latter locality that the first attempts were made to transform soybeans into milk and cheese [soymilk and tofu] in Madagascar. In Cameroon, eleven varieties, which originated in the USA and East Asia, were introduced between 1924 and 1945.

In 1965 IRAT introduced the soybean into its research programs and began, as a first step, by establishing soybean varietal collections in the different countries where IRAT was working: 1966 in Senegal, Madagascar, and Cameroon. 1967 in the Central African Republic and Mali. 1968 in the Côte d'Ivoire. 1969 in Benin. 1971 in the Comoro Islands. 1972 in Ethiopia. 1974 in Togo and Niger. 1975 in Burkina Faso, Réunion, French Guiana, Martinique, and Polynesia. The first collections, established in 1966 from soybean varieties originating in Rwanda, the USA, Rhodesia, and Tanzania, were progressively disseminated to the other countries.

Subsequent participation of IRAT researchers in the international variety trials conducted by INTSOY (USA) and by IITA (Ibadan, Nigeria) enabled IRAT to diversify its genetic resources and to test, mainly through the INTSOY trials, the varieties that it had developed.

Varietal selection (p. 10-22): Senegal: From 1966 to 1970, 120 soybean varieties received were tested by CNRA Centre National de Recherche Agronomique (French) of Bambey (Baol), then at Nioro du Rip (Sine-Saloum), where the best yields, of about 1,500 to 2,000 kg/ha were obtained with the variety Geduld. Starting in 1970 Bambey was abandoned and trials were continued at Séfa (Sefa, Casamance) and Synthiou Malème (in eastern Senegal), where the ecology was more favorable for soybean cultivation. Breeding of new varieties started in about 1972 in Senegal (see p. 22-33)

Central African Republic: In 1967, at the request of the Ministry of Rural Development, via FAO, 80 soybean varieties of very diverse origins were introduced and tested at the Grimari station. The variety Avoyelles yielded 1,218 kg/ha.

Mali: The varieties G15 and G115 (Jupiter) from Burkina were introduced to Mali in 1967. Then in 1969 IRAT introduced 26 new varieties, of which 11 originated in

© Copyright Soyinfo Center 2013

the Central African Republic and 15 in Senegal.

Côte d'Ivoire: From 1968 to 1977 IRAT introduced 171 soybean varieties to the Côte d'Ivoire.

Togo and Benin: These two contiguous countries have comparable ecologies. IRAT's with soybeans in Benin began in 1969. In 1970 IRAT introduced to Niaouli, Benin, 45 varieties originating in Taiwan, Central African Republic, Madagascar, and Senegal. This collection was continued from 1970 to 1974, because two crops a year were possible, at the stations of Niaouli and Ina in Benin, and 3 stations in Togo. In 1975 IRAT-Togo cooperated with INTSOY in the first soybean trials in Togo. The first seeds were planted at Davié in southern Togo on May 2, at Amoutchou in central Togo on May 7, and in Kitangbao in northern Togo on July 8. Togo. Table 12 shows the average yields from 1970 to 1974 from the varieties Columbia, Mandarin, Clark 63, and E 73. These yields were low due to the absence of any use of fertilizers or inoculants, and the poor germination of the seeds. [Note: From Whigham and Judy (1975) and Dumont (1981) we have learned the exact dates that soybeans were planted in Benin and Togo]. Comoro Islands: 63 soybean varieties from the Madagascar collection were introduced in 1971 and tested on Grand Comoro (*Comore*) and at Anjouan (800 meters altitude). At Anjouan the best variety was Biloxi, which had an average yield of 2,000 kg/ha. On Grand Comoro the yields were lower, about 1,500 kg/ha. Having little future, soybean research was stopped in 1976. Note: This document contains the earliest date seen for soybeans in the Comoro Islands, or the cultivation of soybeans in the Comoro Islands (1971) (one of two documents). The source of these soybeans was Madagascar.

Niger: In 1974 IRAT introduced from Senegal 17 varieties of various origins; the results were mediocre (in part from absence of inoculation): ICA Toroa 662 kg/ha, ICA Lili 312 kg/ha, Improved Pelican 335 kg/ha, Mandarin 300 kg/ha. Two INTSOY trials took place in 1975 at Maradi and Gaya. This time the yields were very encouraging; at Maradi the variety Forrest yielded 3,500 kg/ha.

Note: This document contains the earliest date seen for soybeans in Niger, or the cultivation of soybeans in Niger (1974). The first 17 varieties introduced originated in various countries.

Burkina Faso: The soybean was introduced to this remote country in 1960. At that time IRHO (*Institut de Recherches pour les Huiles et Oléagineux*) was in charge of experiments on this plant. In 1975 IRAT participated in an INTSOY trial at Farako-Ba; Jupiter gave the best yield, 2,405 kg/ha.

Réunion: Four varieties from the USA were tested in 1974, at the station of Mon Caprice, during two seasons. The best yield during the cool season was from Chippewa (1,780 kg/ha), and during the warm season it was from Amsoy (2,070 kg/ha).

Martinique: IRAT-Martinique participated in the 1975 INTSOY trials. Only one variety, Improved Pelican, with a yield of 2,150 kg/ha [sic, 2,154 kg/ha, planted 10 April 1975] seemed interesting, but since soybean cultivation was believed to have no future in the agriculture of the island, the experimentation was abandoned.

French Guiana: The first soybean trials began in 1975 with the introduction of 4 varieties: Jupiter, Acadian, and Improved Pelican from the USA, and Vada, which originated in Java [Indonesia]. From 1976 to 1983 IRAT-Guyane participated in INTSOY trials. In 1976 Jupiter gave the top yield of 3,440 kg/ha.

French Polynesia: From 1976 to 1979 the INTSOY trials continued during the two rainy seasons. The variety Davis gave the best overall average yields (4,260 kg/ha over 5 seasons), with a top yield of 5,286 kg/ha in 1976-77. Address: France.

8920. Lautensach, Hermann; Dege, Katherine; Dege, Eckhart. 1988. Korea: A geography based on the author's travels and literature. Translated from the German. Supplemented with a thoroughly revised and expanded index. And edited by Katherine and Eckhart Dege. Berlin, Heidelberg, New York, London, Paris, Tokyo: Springer-Verlag. xvii + 598 p. See p. 20, 160, 174, 180-81, 201, 203, 229, 420-21, 452, 476, 482, 488. Illust. Maps (some color). 26 cm. [936* ref]

• ***Summary:*** "With 42 photographs, 95 diagrams, 46 tables and a [larger color] map." This classic was first published 40 years ago (a few months before the end of World War II) and the field work was done 50 years ago, when Japan still ruled Korea and all place names were Japanese; these names have all been updated.

Vavilov classes soybeans among the plants that originated in the East Asian grain gene pool, and he includes Korea in the gene pool. Thus it is "quite possible" that soybeans were domesticated in Korea itself. Hulbert (1902) includes among the non-Chinese crops black soybeans, two of the three kinds of kaoliang, wild sesame (Perilla), and buckwheat (p. 20).

On page 21 is a very interesting "Chronological table of Korean history. Comparison with Chinese and Japanese history. A major change took place in 680 AD when the Three Hans [Three kingdoms] (Tribal Leagues; Koguryo [Gouryeo, in the north], Paekche [Baekje, in the southwest], and Shilla [Silla, in the central and south east]) merged into one, named Silla. In 918-925 it became Koryô [Kingdom of Goryeo; Wang Dynasty], which in July 1392 became Chosôn [Joseon Dynasty; Yi Dynasty], that lasted until August 1910 when the Japan-Korea Annexation Treaty was enforced by the Empire of Japan.

Chapter 6, titled "The anthropogeographical character of ancient Korea" (p. 149+) contains extensive information about agriculture and food. Page 160: In wealthier sites, the farm buildings enclose a courtyard, to which an entrance

© Copyright Soyinfo Center 2013

gate gives access (Fig. 37c, p. 158). Some enclosures are so complete that a square courtyard results. “In some corner or other of the courtyard stand the huge brown earthenware jars, in which soy sauce (Jap. *shoyu*, Kor. *kanjang*) is prepared and stored.”

Nature and traditional culture: Plants found between the subtropical zone and the temperate zone include soybeans, foxtail millet, maize, and hemp. Since ancient times, rice has been Korea’s most important cereal crop. The great majority of it is grown in irrigated paddies. Paddy rice (an aquatic plant) has a different name in Korea from upland rice. Hubert (1902, p. 108) mentioned eight varieties of rice grown in traditional Korea, including glutinous rice, whose flour is made into rice cakes by mixing it with water and spicy herbs, then beating the cold mass for a long time with wooden hammers (p. 174).

Page 180: In East Asia, after cereal grains, pulses / legumes are the next most important crop. In Korea, by far the most important is the soybean (Kor. *k’ong*), which makes few demands on the soil. Korea’s climate is ideal for soybeans (Tanaka 1931, p. 18); it is even better than Manchuria’s climate, because of the large amount of precipitation during the summer. Today, soybeans are an indispensable part of the various dry-field crop rotations. After planting of the paddies has finished, soybeans are planted on the ridges too; there they grow extremely well without being fertilized. Soybeans are grown throughout Korea, but least in the Kaema upland because of the warmth they require. In northern Korea, on dry fields, they are planted between the end of March and beginning of May. Toward the south, planting is delayed until the end of June. They are generally harvested in October, except in Chejudo, where they are not harvested until early November. Soybeans are the crop that is left standing the longest, and they are not harvested until their leaves have turned brown and started to fall.

Soybeans are used as a very nutritious food for both humans and horses. Also, cooked soybeans are used as a fertilizer for the rice paddies. “Above all, though, the hot brown soy sauce, which is never lacking on any Korean or Japanese table, is made of them, using salt and pepper and a process of fermentation. Bean curd (Kor. *tubu*, Jap. *tofu*) and soybean paste (Kor. *toenjang*, Jap. *miso*) are also made of them.”

Adzuki beans, cotton and hemp are discussed on p. 181.

The Korean regions: On the forest slopes, which were deforested but the Japanese are energetically reforesting, one can find various lianas [climbing vines] such as *Pueraria hirsuta* [Jap. kudzu]. In the northern part of the coastal fringe, soybeans are grown on the ridges between paddies (p. 200-01).

Namyang is a link in the shortest connection between Tokyo and Harbin, which includes the ship passage between Tsuruga or Niigata and Ch’ongjin. “For this reason, this section has been operated by the South Manchurian Railway since 1 October 1933.” The northernmost bays and harbors, especially Unggi, Najin, and Ch’ongjin, and their cities, are developing at an usually rapid rate. “They have become the export harbors for central Manchuria, particularly for soybeans” (p. 203).

In the Kaema upland we find “fire-field farming” and soybean fields in the valley bottoms or basins. “The most important fire-field crops at lower elevations are foxtail and barnyard millet, barley, soybeans, kidney beans, hemp and sesame.” “The Japanese forestry commission has taken over management of the remaining forests. In the natural forests, wood is cut selectively and only as much as grows back” (p. 229).

Korea as a Japanese possession [colony]: “In southern Korea, barley has replaced rice as the principal staple food under the influence of Japanese economic policy.” A large portion of the rice is sold to Japan.

Table 37 (p. 420), titled “Cultivated area, harvested amounts and yields per acre of the most important crops, 1935,” includes: Soybeans: 785,000 ha. 7.9 hectoliters of weight. Worth: 60.2 million yen. Yield: 10.1 hectoliters per ha. Adzuki beans: 235,000 ha. 1.7 hectoliters of weight. Worth: 14.3 million yen. Yield: 7.3 hectoliters per ha. The table also includes paddy rice, upland rice, barley, naked barley, wheat, foxtail millet, barnyard millet, broomcorn millet, kaoliang, maize, oats, buckwheat, potatoes, sweet potatoes, mung beans, etc.

“The soybean vies with foxtail for the third place in the order of crops, by cultivated area. Its is a very profitable, undemanding crop that does not fail even in meteorologically abnormal years. Therefore its harvest curve does not have the ups and downs that are characteristic of many other crops, particularly paddy rice (Fig. 84). Acreage and yield per hectare have not increased nearly as much during the Japanese period, however, as for many other crops. Nevertheless, soybeans are the third most important item of agricultural export today, and the quality is supervised by the state. Approximately one-fourth of the harvest is exported. The most important export markets are Unggi, Ch’ongjin, Songjin, Wonsan, Shinuiju, P’yong-yang, Kumch’on and Ch’olsan (T. Tanaka 1931). They are located without exception in the northern half of the country” (p. 421). Note: Since 1948, the northern half of Korea has been a separate nation, North Korea.

“The Korean adzuki bean, particularly that from the northeastern coast, is highly priced in the Japanese market because of its high quality.” By acreage it is the sixth most important crop in Korea (p. 421).

The soybean mills that process Manchurian soybeans in to oil and meal lie on the Japan Sea coast of Hamgyongbuk-do (p. 452).

Table 43 (p. 476), titled “Korea’s most important import and export goods, 1939,” shows that “Beans” were the No.

© Copyright Soyinfo Center 2013

7 export item to Japan, worth 23 million yen. The leading export was rice (149 million yen) followed by fertilizer (53), copper (52), fish etc. (32). "Of the beans exported to Japan... soybean take first place. Soybean exports to Japan had a weight of 1.3 to 1.9 million q" [1 quintal = 100 kg] in the ears 1934-1938. "In contrast, from the northeastern ports Manchurian beans were shipped to Germany and England." In addition, large amounts of soybeans were imported by Korea itself from Manchuria (0.29 to 1.02 million q). Large amounts of soybean products made in Korea were also shipped to Japan (incl. soybean oil as much as 11.500 q, bean curd [tofu] up to 1.2 million q). Moreover soybean oil (up to 3,210 q) and bean curd (as much as 1.3 million q) were imported from Manchuria (p. 476).

Considerable amounts of dried seaweed and laver [nori] were also exported to Japan (p. 477).

Pages 482-83 try to characterize Korea's significance in 1938 for the economy of Greater Japan (pan-Japan) in general and Japan proper in particular. Pan-Japanese production included that of Korea, Manchuria, and Formosa. "The Korean rice crop in 1938 (44.8 million q) amounted to 23.4% of the pan-Japanese crop and 36.6% of that of Japan proper; 63.2% of Japan's rice imports came from Korea. The soybean crop in 1938 amounted to 6.4% of the pan-Japanese crop, 68.7% of the crop of Japan proper; 17.8% of the soybean imports of Japan proper came from Korea. The relationship was that of a master country to a dominated colony. For example, the Japanese forced the Koreans to eat barley so that the Japanese could import and enjoy the rice grown in Korea.

Soybean production on steep slopes and at high altitudes is mentioned (p. 488).

Hermann Lautensach lived 1886-1971. This book was first published in 1945 in German. Address: Prof., Dr.

8921. Leneman, Leah. 1988. Soya foods cookery. London and New York: Routledge & Kegan Paul. ix + 145 p. Illust. Index. 20 cm.
• ***Summary:*** Contents: Introduction. Recipes–1. Soya milk: Soya milk, soya yogurt, soft cheese [made from soya yogurt], and mayonnaise, soya milk skin (yuba). 2. Tofu: Tofu, frozen and dried-frozen tofu, smoked tofu. 3. Tempeh. 4. Miso. 5. Combi-dishes: Tofu and miso, tempeh and tofu.

An introduction to the subject, with more than 100 recipes. Almost half the book is devoted to tofu and tofu recipes. The author, born in the USA, has lived in Britain for more than 20 years. She was once assistant editor of *The Vegetarian*, and also worked at Cranks Restaurant (on Marshall St. in London W1). Address: 19 Leamington Terrace, Edinburgh EH10 4JP, Scotland.

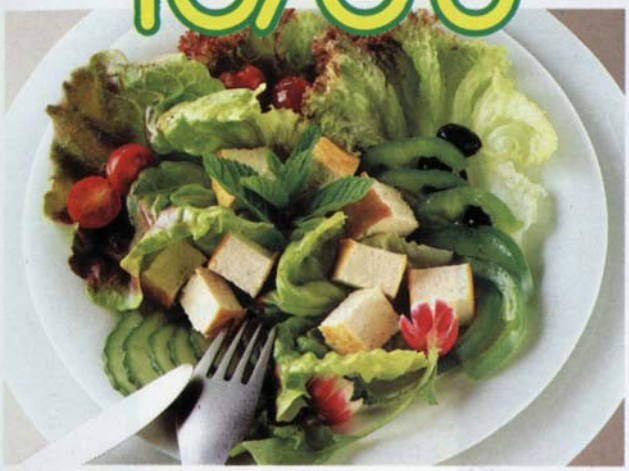
tofou



SOYA - EASY TO COOK WITH

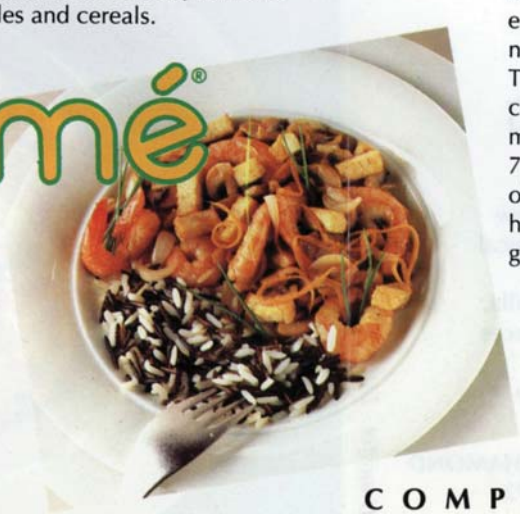
This is a traditonal soja based product from biological agriculture. It has amazing dietetic qualities, rich in proteins of vegetables origin (13 per cent minimum), low in fats and calories (less than 100 kcal/100g). It blends very well with your every day recipes, as a salad or accompaniment to vegetables and cereals.

Croque TOFOU

FRESH TOFU BURGERS

Elaborately prepared Tofou, ready-to-eat in the form of a snack or accompanying a salad, cereals or vegetables. The CROQUE-TOFOU constitute a considerable portion of protein in your meal.
7 varieties are available :
olive, Emmenthal, garlic and fine herbs, provencale, basquaise, leek with ginger.

tofumé®



All the Tofou quality with a delicious flavour of spices and that smoked taste. There are thousands of ways of associating it with your every day dishes and it will represent a high quality biological protein.

SOY

COMPLETE BALANCE

© Copyright Soyinfo Center 2013

a color photo and description of each. They are: Tofou, Tofumé (smoked tofu), Croque Tofou (Fresh tofu burgers), Grinioc (Fresh wholemeal burgers), Tofast Soya Paste (Spread), Tofinelle (Soya mousseline with capers, eaten like quenelles), and Soyeux (dessert). "The whole range of SOY products come from biologically grown soya!" Address: Saint-Chamond, France. Phone: 77 31 23 66.

8933. Thompson, Patricia J.; Jax, Judy Annette. 1988. Teens in action. St. Paul, Minnesota: Changing Times Education Service / EMC Publishing. 311 + 91 p. 25 cm. Copyright 1989.
• ***Summary:*** This home economics textbook, which comes in both a students' and a teachers' edition, includes tofu in the curriculum–a first. Information and recipes (Golden Goddess Parfait, Tofu Smoothie, and Chocolate Pudding) were supplied by Linda Barber Pike. Tofu is listed as a protein source. A tofu burger is included as an example in a lunch menu. Address: 1. Assoc. Prof., Program Coordinator, Family and Consumer Studies, Herbert H. Lehman College, The City Univ. of New York; 2. Prof. and Administrator, Dep. of Human Development, Family Living, and Community Educational Services, Univ. of Wisconsin–Stout, Menomonie.

8934. Walton, L.R.; Walton, J.E.; Scharffenberg, J.A. 1988. How you can live six extra years. Santa Barbara, California: Woodbridge Press Publishing Co. 121 p. No index. 22 cm. [93 endnotes]
• ***Summary:*** Health and longevity secrets enjoyed by the Seventh-day Adventists for a century could add six to twelve years or more to your own life. Based on university research. You can use these health practices to reduce your risk from killer diseases. Contains recipes and tables.

This is an unusual book, in that Chapter 1 (for example) contains page after page of statistics about the superiority of the diet and lifestyle of Seventh-day Adventists without citing the sources for these statistics. Moreover the contents of the 1988 edition appears to be the same as that of the 1981 edition.

Figure 2 is titled "Coronary death rate for Adventist men with various dietary habits compared with the general population." Total vegetarian Adventists (vegans) have only 14% the general coronary death rate, lacto-ovo vegetarians have 39% the general rate, and Adventists who eat meat have 56% the general rate."

Table 1 shows that Adventist men have a life expectancy of 77 years versus 71 years for California men. Adventist women have a life expectancy of 80 years versus 77 years for California women. Table 24 summarizes the Adventist lifestyle: No tobacco or alcohol. Vegetarian diet (which may include milk and eggs). No pork or pork products. Avoid caffeine, spices and spicy foods, hot condiments. Emphasize: Whole grains, fruits, nuts, vegetables, as fresh and naturally served as possible. Fresh air. Exercise. Enjoyment of nature. Trust in divine power.

Recipes include Scrambled tofu (p. 97). Chicken-style Soyameat with gravy sauce (p. 97). Soyannaise (with Soyagen powder, 107). Tofu salad dressing (p. 112). Address: 1. Attorney at Law, Bakersfield, California; 3. Bakersfield, California–M.D., Assoc. Prof. of Applied Nutrition, Loma Linda Univ., Loma Linda, California.

8935. Wood, Rebecca T. 1988. The whole foods encyclopedia: A shopper's guide. New York, NY: Prentice Hall Press (Simon & Schuster). xv + 218 p. Foreword by Michio Kushi. Illust. 28 cm. [200* ref]
• ***Summary:*** This book is mistitled. It should be titled "Rebecca Wood's Macrobiotic Views on Natural Foods." The parts on quinoa, teff, amaranth, and many "macrobiotic foods" provide good information. There is extensive information on soyfoods, all from a macrobiotic viewpoint, but with many errors or undocumented controversial assertions never seen before in the literature, such as the following: "Cold Tofu. Foods that are cooling, like tofu, tend to reduce the fire in the lower organs. This explains why tofu was eaten by Buddhist monks to abate their sexual desires. This is not a prescription against tofu. Well-cooked tofu is less cooling. For optimum health, we need a balance of warming as well as cooling foods. However, if you are feeling cold, or if it is a cold day, or if you have strenuous activities planned, then you may opt for salmon over tofu."

Foods discussed are: Cheese (imitation soy), ice cream and frozen desserts (soy or tofu ice cream), miso, natto, nigari, soybeans (black, yellow, and "just harvested green soy"), soy flour, soy protein isolate, soy milk, soy nut ("Those oversalted, beggarly little crunches found in everything from trail mix to salads are soynuts,..."), soy oil, soy sauce ("Also known as *Shoyu* and *Tamari*), and soy yogurt, tempeh, tofu, and TVP (texturized vegetable protein {textured soy flour}).

Note: This is the earliest English-language document seen (Feb. 2005) that contains the term "cooling food." Address: P.O. Box 30, Crestone, Colorado 81131. Phone: 303 (or 719) -256-4939.

8936. **Product Name:** [Tofu Press, or Tofu Kit].
Foreign Name: Tofu-Presse, Tofu-Set.
Manufacturer's Name: Farm Gemeinschaft.
Manufacturer's Address: 8821 Dornhausen No. 29, Munich, West Germany.
Date of Introduction: 1988?
Ingredients: The stainless steel press, which makes 5 lb of tofu, comes with instructions and recipes for DM 35. The kit includes, in addition, a pressing sack, 100 gm nigari, and 500 gm organically grown soybeans for DM 45.
New Product–Documentation: Ad in Vegetarische Feinkost / Svadesha Urban. p. 11. Contains an illustration of

the press. Note: This community also sells tempeh starter.

8937. Feinberg, Seth. 1988? Police uncover another illegal tofu den (Cartoon postcard). Undated.
• ***Summary:*** This 7 x 5 inch postcard shows four policemen kicking down the door that leads into a room; one has a bill club, one a pistol, and one is showing his badge. In the room are four crazy looking young people (two men, two women) at a table. One woman is standing, holding a skillet containing cubes of tofu in a dark sauce; the other is seated eating cubes of tofu off a plate with a fork. Both men are seated. One, wearing a beret, is eating cubes of tofu from a bowl, using chopsticks; the other is biting into one end of a large cake of tofu, which he holds firmly in both hands.

8938. **Product Name:** [Tofucreme with Vegetables].
Foreign Name: Tofucreme met Groenten, aux Légumes, mit Gemuese.
Manufacturer's Name: Jonathan P.V.B.A.
Manufacturer's Address: Antwerpsesteenweg 336, B-2080 Kapellen, Belgium. Phone: 03/664 58 48.
Date of Introduction: 1988?
Ingredients: Tofu (soya proteins)*, carrots*, sunflower oil*, arrowroot, parsley*, vegetable extract, spices, well-water, sea-salt. * = Organically grown.
Wt/Vol., Packaging, Price: 100 gm.
New Product–Documentation: Label. Received 1988. 3 by 2 inches. Self adhesive. Green, orange, and black on a seaside background with sea gull. "Vegetable."

8939. **Product Name:** Tofu, Marinated Tofu, Banana Tofu Dessert.
Manufacturer's Name: Nexus Foods.
Manufacturer's Address: Unit 1/10, St. Mary's Workshops, Henderson St., Leith, Edinburgh EH6 6DD, Scotland. Phone: 031-533 6850.
Date of Introduction: 1988?
New Product–Documentation: Letter from Simon Bailey. 1988. Sept. 29. They make tofu and some tofu products.

8940. **Product Name:** [Nutana Tofu with Chili Beans].
Foreign Name: Nutana Tofu Chili Boennegryde.
Manufacturer's Name: Nutana Helsekost.
Manufacturer's Address: Ringstedvej 531, DK-4632 Bjaeverskov, Denmark.
Date of Introduction: 1988?
Wt/Vol., Packaging, Price: Can.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: Alfa-Laval. 1988, June. Soyfoods: Old traditions with new potentials. p. 9. Shows a color photo of the front of the can. Yellow and white on a red background.

8941. **Product Name:** [Nutana Tofu Stew].
Foreign Name: Nutana Kinesisk Tofugryde.
Manufacturer's Name: Nutana Helsekost.
Manufacturer's Address: Ringstedvej 531, DK-4632 Bjaeverskov, Denmark.
Date of Introduction: 1988?
Wt/Vol., Packaging, Price: Can.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: Alfa-Laval. 1988, June. Soyfoods: Old traditions with new potentials. p. 9. Shows a color photo of the front of the can. Yellow and white on a red background.

8942. Tofu Shop Deli and Specialty Foods Co. (The). 1988? Its like having a natural foods deli right in your own store (Leaflet). Arcata, California. 1 p. Front and back. 28 cm. Undated.
• ***Summary:*** This marketing flyer, printed with greenish-blue ink on off-white, was created primarily for customers of "Wholefood Express," a natural foods distributor owned by North Coast Co-op (Arcata and Eureka; since 1973), servicing northern California and Oregon.

Side 1: An illustration of the Tofu Shop Specialty Grocery and Deli at top of sheet. Contents: Fresh, refrigerated deli salads, delicious desserts, cold cuts, and handcrafted tofu and soymilk. All cholesterol and lactose free and made with ingredients you can trust. Deli news. Ordering tips. Selling guide: Refrigerate, reduce (price of items whose sell-by date is about to expire), rotate, display ("Use our shelf talkers to create a colorful deli corner in your own cooler...").

Side 2: "Product ingredients." A list of all products with the ingredients in each. "Makers of freshly-prepared natural foods since 1977." Address: 768 18th St., Arcata, California 95521. Phone: (707) 822 7409.

8943. Tofu Shop Specialty Foods Co. (The). 1988? Traditional tofu by the sea (Leaflet). Arcata, California. 1 p. Single sided. 19 x 12 cm. Undated.
• ***Summary:*** This marketing flyer is printed with black ink on white paper. A photo shows two people making tofu by the sea, one cooking in an iron cauldron, the other pouring nigari into a wooden barrel.

The text below the photo: "Traditional tofu by the sea. Distributed exclusively on the North Coast [of California]. The following is written in one of four equal-sized rectangular boxes (2 rows of two each): (1) Handmade tofu & soymilk. Traditional method–sweet, delicate taste. Tofu: Firm nigari, 14 oz tub or 20 lb bucket. Joy of Soy soymilk. Original, unflavored, pint, quart, ½ gallon. (2) Baked tofu cold-cuts: Ready to eat or reheat. Veggie patty tray. Marinated cutlet tray. Tofu sausage tray. (3) Delicious tofu desserts: Pumpkin pie with whole wheat crust. Cocoa carob mousse. Maple almond charlotte. (4) Light tofu salads: Old fashioned potato salad, eggless salad, tahini.

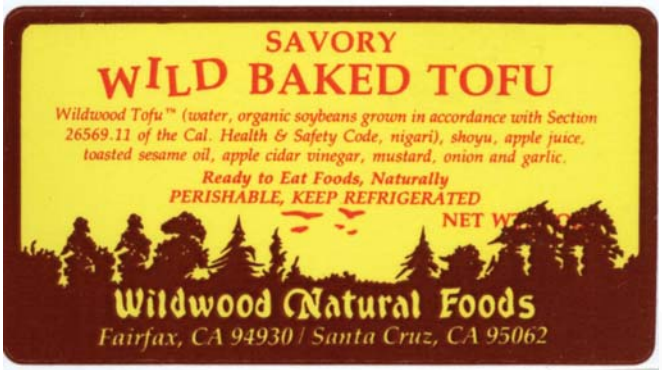
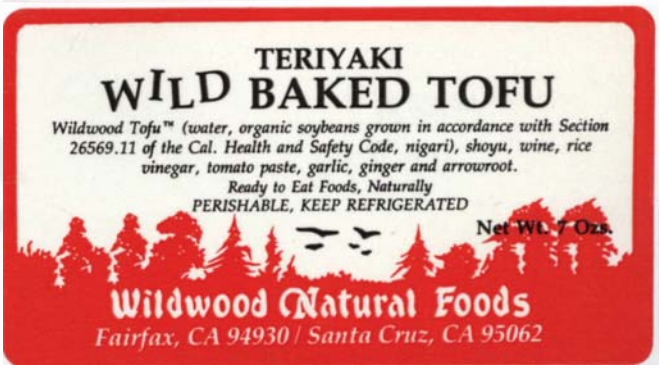
• ***Summary:*** Contents: The protein content is the measure for nutrition. Can soybeans also be grown in West Germany? The alternative: Tofu (describes briefly how it is made). What are tofu's benefits? Comparing tofu with meat. Summary, bibliography, and sources of information (Sojaquelle). 15 Tofu Recipes (each accompanied by a half-page color photo). How to make tofu at home. How to use okara and soymilk. Address: Munich, West Germany. Phone: 089 / 448 30 98.

8945. **Product Name:** Dairyless Rice Pudding (With Soymilk).
Manufacturer's Name: Wildwood Natural Foods.
Manufacturer's Address: 31 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1988?
New Product–Documentation: On sale in Berkeley. 1988. Aug. 30.

8946. **Product Name:** Avo-Jack Sandwich, and Avo-Cheddar Sandwich (With Tofu Dressing).
Manufacturer's Name: Wildwood Natural Foods.
Manufacturer's Address: 31 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1988?
New Product–Documentation: On sale in Berkeley. 1988. Aug. 30.

8947. **Product Name:** Wild Baked Tofu (Teriyaki, Savory, Mexican, and Veggie?).
Manufacturer's Name: Wildwood Natural Foods.
Manufacturer's Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1988?
New Product–Documentation: On sale in Berkeley. 1988. Aug. 30. Labels (attached to Wildwood letterhead) sent by Bally Bramblett of Wildwood. 1990. Each is 3.12 x 3 inches and printed in three colors. Across the bottom of each is an illustration of birds flying over wild woods.





8948. Dupuy. Pierre. 1989. Un phénomène récent: l'emploi du soja comme matière première des industries de l'alimentation humaine [Soya bean: A new product for the food industry in Europe]. *Comptes Rendus de l'Academie d'Agriculture de France* 75(4):51-58. [7 ref. Fre]
• ***Summary:*** In the EEC (mostly in Italy and France), production of soybeans has reached 1,300,000 metric tons. In addition to the traditional uses as vegetable oil and animal feed, there is a new interest in using soybeans to make human foods, such as soymilk and tofu. Even the dairy industry has started to process soybeans to make dairy alternatives.

Note: Hervé Berbille of France observes the following: "If you read between the lines, this document shows how the French government is trying to stop soyfoods from catching on at a very early date (in the 1980s, while these foods were still not widely known and still in their infancy) by trying to change their regulatory framework in E.U.

"So, for me, I believe this document is very important because it indicates clearly the almost official hostility of the French governmental authorities against soyfoods."

8949. *Toyo Shinpo* (*Soyfoods News*). 1989. Zenkoku heikin 102.6 en, tôfu icho no kourine [Japanese national average retail price of a cake of tofu (average weight: 425.8 gm) is

© Copyright Soyinfo Center 2013

102.6 yen]. Jan. 1. p. 21. [Jap; eng+]
• ***Summary:*** The average wholesale price is 79.2 yen/cake. The average national retail price is 0.238 yen/gram, and the corresponding wholesale price is 0.184 yen/gram. At this time there are about 140 yen/U.S. dollar. So the average price of tofu in Japan is about $0.78/lb. The highest price per gram is in Saitama prefecture. The lowest price is in Tokushima, Toyama, and Mie prefectures.

8950. Willner, Ken. 1989. Hakuhodo is Morinaga's marketing and advertising agency in California and Japan (Interview). *SoyaScan Notes.* Jan. 5. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Hakuhodo has been the agency in Japan for many years. They started with Morinaga in California a little more than 2 years ago. During 1989 they plan to focus on the West Coast market, as with local radio and newspapers. Less national. Address: Los Angeles.

8951. *Valley Advocate* (*Springfield, Massachusetts*). 1989. Bankrupt tofu maker plans buyout [Tomsun Foods]. Jan. 9.
• ***Summary:*** "Tomsun Foods, Inc. of Greenfield, once New England's largest producer of tofu, will move out of Western Massachusetts, according to a Chapter 11 reorganization plan filed late last month. The firm, which once had 70 employees and $3 million in sales, is to be purchased by New York businessman William Holmes, a former Beatrice Foods executive who also managed Dannon's introduction of frozen yogurt.

"Under the new plan, scheduled to be ruled on January 30, the company's production of tofu, egg rolls and other products would relocate to New York. Operations for Jofu, a tofu- and fruit-based food the company launched in 1986, would move to a Vermont location. About 200 unsecured creditors, and a similar number of stockholders, would receive 20% of a new stock issuance if they approve the plan; Holmes would hold the rest.

"Some analysts blame the company's demise on the failure of Jofu, on which Tomsun spent $1.5 million in advertising to capture the New York City market in spring 1987. Holmes is expected to spend $500,000 on research and development, and marketing for a revised Jofu."

8952. Lawder, Dave. 1989. Tofu-maker keeps local vegetarians well fed: Simple Soyman products appeal to the healthy set. *Business Journal* (*Milwaukee, Wisconsin*). Jan. 15. p. 1, 21.
• ***Summary:*** R. Jay Gruenwald (age 35) and his wife Barbara established The Simple Soyman in 1985. It is located at 4877 N. Green Bay Ave. They buy fresh tofu from Mu Tofu Shop in Chicago, Illinois, and use it to make a variety of products such as Saucy Jo (a kind of sloppy joe mixture of spices and tomato sauce with tofu and brown rice substituted for ground beef), herb pate cracker spread, "eggless" egg salad, tofu turkey, and tofu pumpkin pie. They do many supermarket taste test promotions. Sales are expected to top $85,000 for 1988, up from about $66,000 in 1987. Milwaukee's other tofu business, the Magic Bean, an employee-owned firm (co-op) went out of business in 1985 after running into cash-flow problems. Mary Zdroik, former manager of The Magic Bean, said the firm's failure was due mainly to poor management and lack of capital to invest in new equipment.

8953. Bechman, Tom. 1989. Tapping the Japanese food market with specialty soybeans. *Indiana Prairie Farmer* (*Lombard, Illinois*). Jan. 17. p. 14-15.
• ***Summary:*** Purdue University agronomist Marvin Swearingin believes the time has come to produce specialized soybeans for the Japanese tofu market, which consumes 37,000,000 bushels a year. Do do this America must: 1. Develop a specialized product which provides traits the Japanese can't get from bulk shipments. 2. Find a company that can ship to the tofu maker in Japan. 3. Find an economical way to ship the beans from elevators to rail shipping points and thence to ports–perhaps using the Japanese freight cars that bring auto parts to the Midwest and return empty to the ports. 4. Find elevators with suitable facilities receive, size, condition to specifications, and bad the specialized soybeans. 5. Get a third party, such as the Indiana Crop Improvement Assoc., to inspect the fields and certify that the beans are what they are supposed to be. 6. Have farmers to grow the beans under contract.

At Indiana, Jim Wilcox and Swearingin are screening varieties and lines to uncover the traits that the Japanese need to produce premium tofu. Funds for the project were provided through the Value-Added Center established by the Indiana legislature in 1988. Generally the Japanese prefer large-seeded (1,500 to 1,700 seeds/lb) varieties with a clear hylum for tofu production.

Also at Purdue, Niels Nielsen, a USDA researcher, heads up a team of researchers who have tried for years to develop soybeans that don't contain lipoxygenase enzymes. They have succeeded in producing soy beans free of the lipoxygenase-2 isozyme.

8954. Theses on soybeans and soyfoods: Dissertation Abstracts (Database search report). 1989. 234 p. Jan. 20. 28 cm. Unpublished manuscript. [1106 ref]
• ***Summary:*** The Dissertation Abstracts database contains virtually every American PhD dissertation accepted at an accredited institution since 1861. A search yielded 1,106 theses on soybeans and soyfoods not including records with the terms pathogen*, Disease*, weeds, or insect* in the title or abstract. * = truncated term.

It contained the following number of theses on soyfoods: Soymilk 9-14, tofu 6, tempeh 6, miso 4, soy sauce 3, and natto 2.

The most valuable records for us are in the subject

© Copyright Soyinfo Center 2013

categories Food Science & Technology; Health Sciences, Nutrition; and Economics, Agricultural. Other subject categories include: Agriculture (Agronomy, Animal Culture & Nutrition, General, Plant Culture, Plant Physiology); Biochemistry; Botany; Chemistry (Agricultural and Biological, Analytical); Engineering, Chemical; Entomology.

A count of the records in which we were interested by state where the thesis was written shows the following: Illinois 128, Iowa 68, Indiana 37, New York 30, Missouri 28, Michigan 26, Minnesota 25, and Ohio 17.

8955. Tofutti Brands Inc. 1989. New trademarks: Better than sour cream. *Official Gazette Trademarks* (*Washington, DC*). Jan. 24.
• ***Summary:*** Filed P.R. 8-27-1987. For nondairy sour cream substitute (U.S. Cl. 46). First use 8-6-1987. In commerce 8-6-1987. Note: This product was launched in late 1991 under the name "Sour Supreme." Address: Rahway, New Jersey.

8956. Pirello, Robert; Pirello, Christina. 1989. New developments at Robert Werz's Appropriate Foods and at Simply Natural (Interview). *SoyaScan Notes.* Jan. 25. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Robert Werz closed Appropriate Foods (he did not sell it) within the last year and got a divorce from Shelly at about the same time. He owed a lot of money to many people, and left most of the bills unpaid. He remarried to Christie Pagget and they now have a child. He is presently in semi-hiding. Note: The company was out of business by Nov. 1988.

Simply Natural is having problems with partners/investors, but the situation looks pretty good. The company's big mistake was going with these two partners in 1985, about 18 months after the business started. They own 50% of the company's stock. Now they want out, and they want a lot of money to let Robert and Christina keep the company name Simply Natural, on which the company obtained a primary trademark (using a big Philadelphia law firm) about 8 months ago. If the 2 investors get out and Robert and Christina let go of the company name, it will cost the investors about $70,000, which is not a lot for them since one of them is worth about $40 million. This is because they co-signed a bank note for that amount with Christina and she has not assets.

The Soft Tofu Cheese is off the market, but all other products are still on. The cheese may be co-packed by Swan Gardens in Georgia. Robert and Christina have started a new company named Cyntina Natural Snacks Inc. Its first line (no soy) is Asteroids: "The Natural Snack That's Out of This World." Asteroids are round and come in 4 flavors. They are based on nut butters, granola, and rice syrup. Address: P.O. Box 295, Norma, New Jersey.

8957. Cauldron Foods Ltd. 1989. Cooking with tofu. 149 South Liberty Lane, Bedminster, Bristol BS3 2TL, England.
• ***Summary:*** This accordion-folded booklet of tofu recipes, 3.25 x 4.5 inches, with 12 panels, contains 16 recipes, with a pastel color illustration accompanying many of them. They are divided into starters, main course, and desserts. All call for the use of Cauldron Tofu. One panel explains: What is tofu? Why eat tofu? The Cauldron Foods range: Fresh tofu, original and smoked. Tofu burgers: savoury, peanut, chili, and vegetable with tofu. Vegetarian Pâtés: Vegetable, Mushroom, Tomato and red pepper, and savoury vegetable. Address: Bristol, England. Phone: 0272 632835.

8958. Duchesne, Paul. 1989. Chronological history: Paul's New and Original–Brown Rice Tofu Sandwich (Nov. 1977–Jan. 1989). Fairfax, California. 6 p. Jan. Unpublished manuscript.
• ***Summary:*** A detailed chronology of Wildwood Natural Foods and Duchesne's eventual conflict with the owners of the company he started, and his subsequent work with soyfoods. Discusses: Chris Smith, Joe Nixdorff, Bill Bramblett, Paul Orbuch, Frank Rosenmayr, Cauldron Express, Bert's Place, and Paul's Place. Address: Fairfax, California.

8959. **Product Name:** Tofu (Chinese-Style Water Packed), Tofu-kan (Very Firm Tofu), and Fried Tofu Cubes.
Manufacturer's Name: Dynasty Foods (Marketer-Distributor).
Manufacturer's Address: 343 Airport Rd., Oceanside, CA 92054. Phone: 619-722-8727.
Date of Introduction: 1989. January.
New Product–Documentation: Talk with Sam Ong of Dynasty Foods. 1992. Sept. 11. He buys these products, which he introduced in Jan. 1989, private labeled from Wy Ky Food Products in Los Angeles. Born in the Philippines, he is an American citizen; his father was Chinese and his surname is the Fukien [Fujian] pronunciation of the Chinese Mandarin name Wang. His company's main products are noodles.

8960. **Product Name:** Tofu, Tempeh, and Soymilk.
Manufacturer's Name: Gabriella Benjis Soyfoods.
Manufacturer's Address: Johannesburg, South Africa.
Date of Introduction: 1989. January.
New Product–Documentation: Talk with Paul Cohen, her friend. 1989. Oct. 27. Gabriella has been making these 3 products at home since about Jan. 1989. She also works at a natural food store, where she sells them, and distributes them through the Organic Soil Association. There is a Chinese tofu manufacturer in South Africa, but Paul does not known the company name, address, or year started.

8961. *Health Foods Business* (*Elizabeth, New Jersey*). 1989.

8965. Sojarei Ebner-Prosl. 1989. Preisliste [Price list]. Augasse 2, A-2500 Baden bei Wien, Austria. 10 p. Manufacturer's catalog. [Ger]
• ***Summary:*** The company has two catalog/price lists: one (green) for food processors and one (yellow) for retail stores. Products made by the company have been marked by the author with an "S." In the front of each catalog is an organic certificate. The retail catalog contains 20 fresh products, 3 books, and 30 non-fresh products. Fresh products made by the company include Tofu Natur, Tofu Mariniert, Tofu Geräuchert, Tofu Pastete Siddhartha, Tofu Pastete Toscana, Tofu-Burger, Soja-Getreide-Laibchen, Gruenkern Laibchen, Dinkel Laibchen, Reis-Laibchen, Weizengluten Laibchen, Weizengluten, Badener Bratwuerstchen, Badener Grillwuerstchen, Brotaufstrich "Rusticana", Brotaufstrich "Holzknecht." Fresh products sold but not made by the company include soy tempeh, marinated tempeh, and soy sprouts. The company sells 3 recipe books: (1) Their own recipe book *Wichtig für Ernährungsbewusste* (Important for understanding of nutrition); (2) *Tofu: Essen mit Zukunft* (Tofu: Eating with the future) by Brigitte Vogenreiter and Clemens Kuby, and (3) *Schlank mit Tofu* (Slim with tofu; 117 recipes) by A.W. Dänzer.

The company also sells many non-fresh products including yellow soybeans (organically grown), soya flakes (*Sojaflocken*, not defatted), whole soy flour, tamari, shoyu, barley miso, Hatcho miso, brown rice miso, soba (buckwheat) miso, nigari, Bonsoy soyadrink (natural and cacao), Pinoccio Soybean coffee, and soynuts.

In the catalog for food processors, for example, the regular tofu, marinated tofu, and smoked tofu are each sold in 1 kg, 30 kg, 60 kg, 100 kg, and 200 kg amounts. Address: Baden (near Vienna), Austria.

8966. **Product Name:** [Tofinelle Tofu Sausages {Soya Mousseline with Capers} (Carrot, or Celery)].
Foreign Name: Tofinelle: Saucisses/Quenelles au Tofou (Carrottes, Céleri).
Manufacturer's Name: SOY (Société Soy).
Manufacturer's Address: 1 rue du Crêt de la Perdrix, 42400 Saint-Chamond, France. Phone: 77.31.24.42.
Date of Introduction: 1989. January.
Ingredients: Carrot: Tofu (water, soya*) 75%, carrot (10%), sunflowerseed oil, egg white, wheat flour, spices, parsley, aromatics, salt. * = Organically grown.
Wt/Vol., Packaging, Price: 2 x 100 gm = 200 gm poly bag.
How Stored: Refrigerated.
Nutrition: Per 100 gm.: Calories 176, protein 14.3 gm, carbohydrate 3.7 gm, fat 11.7 gm.
New Product–Documentation: Leaflet. 1988. Front and back. 6 panels. "These savory and light Tofinelles are eaten like "quenelles," reheated in the frying pan or oven, accompanied by a sauce of your choice." Cassell's French-English Dictionary defines quenelle as "forcemeat or fish ball." Letter from Bernard Storup. 1989. March 3. These products were all launched in Jan. 1989.

Label. 1989. In French and Dutch. 3.75 by 7.5 inches.

Green, red, and yellow on white. Large background illustration of a carrot. Shows Nature et Progres logo for organically grown.

8967. **Product Name:** Vitam Tofu Seasoning [Mild (Herbal), or Spicy (Saffron)].
Manufacturer's Name: Vitam Hefe Produkt GmbH.
Manufacturer's Address: Walter-von-Selve Str. 2, 31789 Hameln, Germany. Phone: (40) 5151/95-400.
Date of Introduction: 1989. January.
Ingredients: Mild: Sesame, nutritionally grown yeast extract, soybean powder [soy flour], wheat bran, tomato extract, sea salt, oregano, natural spices. Spicy (Saffron): Sesame, nutritional yeast extract, soybean powder, wheat bran, garlic, sea salt, natural spices, pepper, soy sauce.
Wt/Vol., Packaging, Price: 1.75 oz glass jar.
How Stored: Shelf stable.
New Product–Documentation: Letter from Elke Heitmeyer of Scenario International in response to enquiry from William Shurtleff of Soyfoods Center. 1994. Jan. 11. The tofu seasonings were first sold in Germany under the brand name Vitam in Jan. 1989. They were first sold in the U.S. under The Organic Gourmet brand in March 1991.

8968. **Product Name:** Soy A Melt (Soy Cheese With Casein) [Cheddar style, Monterey Jack style, Mozzarella style, Jalapeno Jack style, Shredded Mozzarella style].
Manufacturer's Name: White Wave, Inc.
Manufacturer's Address: 1990 North 57th Court, Boulder, CO 80301. Phone: 303-443-3470.
Date of Introduction: 1989. January.
Ingredients: Tofu, soy oil, casein (non-fat dairy protein), sea salt, citric acid, lecithin, natural flavor, guar gum, annatto (vegetable color).
Wt/Vol., Packaging, Price: 8 oz vacuum pack retails for $2.89. Or 6 lb foodservice loaves.
How Stored: Refrigerated.
Nutrition: Per 1 oz.: Calories 80, protein 8 gm, carbohydrates 1 gm, fat 4 gm, sodium 120 mg, cholesterol 0.
New Product–Documentation: Talk with Lon Stromnes. 1988. Nov. 9. The line of soy cheeses, introduced last week at the Baltimore Natural Foods Expo but without labels, are called Soy A Melt, in Monterey Jack, Mozzarella, and Jalapeno flavors. Made by one of the three large manufacturers (not by Soya Kaas), they contain casein.

White Wave News. 1989. Vol. 2, No. 1. Shows Label. "Soycheese. No Cholesterol. Imitation Cheese." Note: These cheeses are identical to TofuRella, and are private labeled for White Wave by Rose International. Spot in Natural Foods Merchandiser. 1989. April. p. 54. Leaflet. 1989. April. Profit from new Soy a Melt Cheese in Five Delicious Varieties. Cholesterol & lactose free. Low fat. High protein. All natural, no preservatives.

New (6/91) Label sent by Lon Stromnes. 1991. July 30. The product name is now written "soy-a melt." 4 inches square. Self adhesive. The Mozzarella is white and pink on dark green. Organic tofu is now used. Soyfoods Center taste test. 1990. April 25. Very nice, melted on crackers.

Note: These cheeses are made at a cheese plant on the East Coast of the USA. White Wave still pays Richard Rose (now doing business as Sharon's Finest) a commission, but the rate has been substantially reduced "because the contract ran down and some new things developed."

Leaflet (black and white, glossy, single sided, 28 cm) sent by White Wave. 1993. June 22. "Grate stuff. The moos is out. Now your customers can say cheese without cholesterol or lactose. Cheddar Style. Mozzarella Style. Jalapeno Jack Style, Monterey Jack Style. Garlic Herb Style. All natural. Made from organically-grown soybeans. Try our guaranteed sales program." The "White Wave Soyfoods" logo is in the upper right corner. A large photo of the Soy-A Melt: Cheddar Flavored Soy Product label is in the lower half of the leaflet.

Leaflet (black and white, single sided, 28 cm) sent by White Wave. 1993. June 22. "Cholesterol Free Pizza. Why lose 10-15% of our sales because of the failure to meet the needs of customers who are either vegetarian or concerned about cholesterol. A local pizzeria in Boulder makes 30% of its sales with White Wave Soy A Melt cheese. Just substitute White Wave Soy A Melt cheese for traditional cheese. Soy A Melt cheese is completely cholesterol-free and 99.98% lactose-free. It offers the taste and texture of dairy cheese without the cholesterol... For further information or assistance please contact Chef Leonardo [Laudisio], White Way Soy Products. (303) 443-3470. Fax (303) 443-3952.

Leaflet (black and white, single sided, 28 cm) sent by White Wave. 1993. June 22. "White Wave Soya A Melt fact sheet." "Highlights: Over 99.98% lactose free. No cholesterol. Low fat. Made from organically-grown soybeans. High protein. High calcium." Nutritional information per 1 oz serving." For 5 flavors of Soy A Melt, 2 flavors of Fat Free, and 2 flavors of Soy Singles. Ingredients for these same 9 SKUs; the top two ingredients in each are organic tofu and casein.

Talk with Richard Rose of Sharon's Finest. 1996. March 5. White Wave no longer buys cheese from Richard, and Richard is suing White Wave for breach of contract. Instead, White Wave now buys Soya Kaas and repackages it.

8970. Delcuratolo, Raymond. 1989. Société Soy–France's largest tofu manufacturer–thinking of starting operations in America (Interview). *SoyaScan Notes.* Feb. 5. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Societe Soy, located in St.-Chamond, is thinking of starting a branch in America, perhaps in the Los Angeles area. Their main products might be: 1. Tofu Burgers (*Croque Tofu*) sold in 4 flavors and eaten in France with a sauce, not between buns like a typical U.S. burger. 2. Tofu Sausages (*Roulades de Tofu, Tofinelle*) with Sauce and mushrooms or smoked salmon. These sausages, larger than a U.S. hot dog, are sold 2 in a package with the sauce. 3. Soy yogurt-like or parfait-like dessert (Soyeux), sold in 6 flavors. They now market these products (plus Tofast Soya Paste, Tofumé smoked tofu, and Granioc (wholegrain & tofu meatless burgers)) in England, and have a nice brochure to advertise them.

Raymond hopes to run the company in America, with Jean commuting. He is paying for this exploratory trip out of his own funds.

Note: Letter from Bernard Storup, president of Société Soy. 1989. March 3. "I was rather surprised that Raymond met with you in Lafayette. He has been a friend of Jean Preneuf's for years and has just sold his–well–business. He is thinking of doing something with us, surely in the U.S. We talked together of the opportunity to start a new tofu business over there, but I must say I'm not convinced that it is really a good idea. There is a French expression that says, 'You cannot run after two rabbits at the same time.'"

Note: As of Jan. 1995 this project has never happened. Address: France.

8971. Ester, Donald W. 1989. Re: Tibetan monks making tofu in Dharamsala, India. Letter to William Shurtleff at Soyfoods Center, Feb. 5. 2 p. Handwritten, with signature.
• ***Summary:*** "I've just returned from a stint of teaching at the Buddhist Institute of Dialectic Studies in McLeod Ganj near Dharamsala (Dharmsala), India, where the monks have been producing tofu for several years to help support the Institute. The principal tofu maker is named Kalsang. Their work conditions are primitive and mostly unsanitary but they manage to turn out about 30 kilos/week of reasonably acceptable tofu. From my own observations I suspect the market in the town could absorb three times the amount they produce and thus benefit themselves and the community. They have both of your books and know how to increase their capacity but do not have the funds for equipment which is more modern and for space to expand.

"I have promised to help them and am looking for sources of funds in the United States." Address: 1044 Webster St., Palo Alto, California 94301. Phone: 415-326-0559.

8972. Boeddeker, Ralph. 1989. Mit Tofu 100 Millionen Mark Umsatz: Das Reinheitsgebot fuer Deutsche Wurst ist gefallen–Naturkost-Hersteller rechnen mit Zuwachs [With tofu, sales of 100 million German marks: The standard of purity for German sausage has fallen–Natural-foods producers count on growth]. *Welt am Sontag* No. 7. p. 33. Feb. 12. Sunday. [Ger]
• ***Summary:*** Describes the very successful soymilk plant sold by Soya Technology Systems (DTD) to DE-VAU-GE in Lueneburg, West Germany. Michael Makowski, healthy looking, in his 50s, and managing director of the company, introduces a meatless banquet and explains that he has been a vegetarian for 30 years. The future for this producer of vegetarian foods looks very bright. Meatless sausages or those extended with soy are seen as becoming increasingly popular. The company is now approaching the 100 million mark sales level and employs 350 men and women. It is in the top 10 of the 70 manufacturers of natural foods in Germany, with a market share of about 10%. Each year it ships about 15,000 tons of natural foods from Lueneburg to the country's roughly 2,700 Reformhaeuser (natural/health food retail stores). The company makes an assortment of 300 vegetarian food products, mostly from cereal grains and soybeans. The latter, grown in the USA, Brazil, and China, offer many possibilities. They can be fashioned into spread for bread, milk, or tofu.

Makowski sees the market for tofu, which resembles Quark, as especially promising. It can be nicely seasoned with spices such as paprika, curry, soy sauce, and/or herbs, and made into meatless sausages. The Reformhaeuser pioneered in introducing non-dairy margarine, whole-grain bread, and Muesli to Europe. Makowski sees the next wave as being tofu boom products. A photo shows the company's 3-level soymilk plant that produces 20 million liters a year in 500 ml and 1 liter containers.

Note added by Anders Lindner, head of STS: Up to now the plant has produced soymilk and desserts. Soon they will also start to produce tofu sausages, yogurt, and pâtés.

Mr. Makowski, eyeing the big potential market for tofu products, is a bit worried that the big food heavyweights such as Unilever, Nestlé, Kraft, etc. might enter this market. When the sale of tofu products begins, DVG's sales are expected to exceed DM 100 million. Address: Lueneburg, West Germany.

8973. *Sun* (*North Vernon, Indiana*). 1989. Tofu plant good venture. Feb. 7.
• ***Summary:*** "According to research by Purdue University scientist Philip E. Nelson, the Great Lakes region is well-suited for a tofu production plant... Nelson, a researcher and head of Purdue's Food Science Department, concluded that a tofu production plant would be good for investors, farmers and the Midwest economy. His research is part of an ongoing study of proposed value-added investments in Indiana."

8974. Terault, Michael. 1989. Tomsun emerges from bankruptcy, town to be paid. *Recorder* (*Greenfield, Massachusetts*). Feb. 9. p. 1, 12.
• ***Summary:*** "Tomsun Foods International emerged from bankruptcy Wednesday after a federal judge approved the tofu company's reorganization plan. The plan allows Tomsun to settle its debts with some 200 unsecured creditors and continue operation under new ownership. The company had filed for protection from its creditors under Chapter 11 of the U.S. Bankruptcy Code last spring. Under the reorganization, the company's soybean-based products will no longer be made in Greenfield, but in New York and Vermont by contracted suppliers." The former Tomsun building was sold recently. Tomsun will open a local sales office, with a staff of 5, at 247 Wells St. Sales and marketing operations will also be conducted in Boston and New York. William Holmes of Port Washington, New York, bailed out the company when he agreed to buy it. "Holmes has 35 years experience in the dairy food industry and has managed $1 billion worth of Beatrice Foods' business. He pioneered the introduction of Dannon frozen yogurt to consumers...

"The creditors agreed to relinquish their claims on the company in return for 12 percent of Tomsun's new stock. Another eight percent of the new stock will be distributed to existing stockholders. Holmes will get the remaining 80 percent... Some 445,000 shares of the company's stock had been issued at $10 each in December 1986. Trading of the stock had been suspended last spring."

Production of Jofu will now take place in Hardwick, Vermont. Tomsun's other food products will be made in New York. Address: Staff reporter.

8975. Breathed, Berke. 1989. Bloom County (Cartoon). *Washington Post Writers Group–Syndicated.* Feb. 12.
• ***Summary:*** This 6-part cartoon begins with C. Everett Koop (former Surgeon General of the USA and advocate of healthy living), dressed in a military uniform, walking up behind Opus (the cartoon's penguin or "flightless waterfowl") who is smelling a flower in the great outdoors. Koop: "I wouldn't sniff that dandelion, son."

Opus turns around in astonishment. Koop: "Causes brain warts. And avoid picking your nose–leads to the heartbreak of tongue psoriasis. And no smokin'. No drinkin'. No sex. No motorcyclin'. No fats. No nitrates. No bacon. No sugar. No salt. No eggs.

"And no red meat" (said emphatically).

All of a sudden as huge block of tofu falls out of the sky, directly on top of Dr. Koop. It makes the huge sound "Foomp!!" as it squashes him–leaving only his hands, feet, and hat visible. Beans sprouts flutter down afterward. Opus jumps back in surprise.

Opus walks around the giant block of tofu, as a few more bean sprouts flutter down.

In the last frame he says: "Ironically enough, C. Everett Koop was done in by tofu and bean sprouts!!" i.e. by healthy foods.

8976. Lisseck, Paul. 1989. Re: Making tofu at Auroville, India. Letter to William Shurtleff at Soyfoods Center, Feb. 15. 2 p. Handwritten, with signature.
• ***Summary:*** Paul would like to start a tofu shop at Auroville, an international spiritual community at Kottakuppam, Tamil Nadu, southern India. A shop was started there in about 1976 and was still in operation in Jan. 1982, making 432 pieces of tofu a week. Paul writes: "I was able to contact someone who just returned from Auroville. I was told that, to the best of her knowledge, the original soy shop is no longer operating. It also appears that no tofu was ever sold (or distributed) outside Auroville itself. It would seem that this is a ripe time to get involved–perhaps both in Auroville and in India itself." Address: 507 W. Seneca St., Ithaca, New York 14850. Phone: 607-273-7601.

8977. Sundstrom, Jill. 1989. Soybeans part of nutritional shift. *Plain Talk* (*Vermillion, South Dakota*). Feb. 16.
• ***Summary:*** Ray Schulz of rural Vermillion is a farmer interested in promoting his crops–one of which is soybeans. Ray is chairman of the South Dakota Soybean Research and Promotion Council. He notes that the use of soybeans "in food products is nothing new. Soybeans have been used in making salad dressing and mayonnaise... Tofu is a cheese-type food made from soybean milk. Jofu, which also contains soymilk, is a relatively new yogurt-like dessert."

8978. Ritterband, Vicki. 1989. Lightlife Foods receives loan for expansion projects. *Recorder* (*Greenfield, Massachusetts*). Feb. 20. p. 2.
• ***Summary:*** The $756,000 loan package, which came from four sources (including the state and a local bank) will be used to double the size of Lightlife Foods' 6,000-square-foot plant, expand its product line and buy new equipment. The 10-year-old Fairview Street company, best known for its "Tofu Pups," has grown 35% annually for the past two years. The expansion will allow the company to make Tofu Pups in Greenfield.

8979. Stanus, Joan C. 1989. Tofu a tasty surprise to students. *Virginian Pilot* (*Norfolk, Virginia*). Feb. 23. p. 10-11.
• ***Summary:*** "Ann Wols admits it. Like millions of other Americans, she had her doubts about tofu at first. It looked pale and slimy, tasted bland and was of little importance except as a filler in Oriental stir-fried dishes...

"'I used to be a tofu cynic,' Wols explained... Then I read a cookbook my mother brought home and decided to try some things in it. We made Swiss steak from tofu and it was really good. So I've changed my mind about it.'

"'About a year ago, I became a vegetarian and found

© Copyright Soyinfo Center 2013

tofu is a good way to get your protein,' added her mother, Glenna Wols, who is also taking the class [at Tarrallton Community Center]. 'We found out that it's delicious because it's so versatile. It picks up the taste of whatever you put with it.'"

8980. Steinkraus, Keith H. 1989. Re: Producing and distributing a vacuum packed tofu without danger from botulism. Letter to Andrew Schecter, Northern Soy Inc., 545 West Ave., Rochester, New York, Feb. 27. 1 p. Typed, with signature.

• ***Summary:*** Dr. Steinkraus is a world-famous microbiologist who has conducted and supervised considerable research on the microbiology of tofu. After discussing good manufacturing practices for tofu, he concludes: "In my opinion, you can produce and distribute a vacuum packed tofu without danger from botulism." Address: Ph.D., Prof.of Microbiology emeritus, Cornell Univ., New York.

8981. Ali, Nawab. 1989. Soybean utilization in India as food source–rationale, status and progress. In: A.J. Pascale, ed. 1989. World Soybean Research Conference IV. Buenos Aires: Continuing Committee. xxviii + 2152 p. See p. 1767-72. [7 ref]

• ***Summary:*** Contents: Abstract. Introduction. Rational of using soybean as food source. Status of soybean production and utilization. Progress made under SPU Project (Soybean Processing and Utilization Project): Fullfat soyflour, soypaneer, soydal, soyflakes (not defatted; used in rice-based fermented products such as Idli and Dosa), soysnack, soy-badi, partially defatted soyflour, equipment for home / cottage level operation, pilot plants. Conclusions. Acknowledgements.

"Soybean has tremendous potential for alleviating protein-calorie malnutrition in cereal-based Indian diets. About one million tonnes of soybean produced annually is mainly used for augmenting edible oil resources. Soymeal is exported leaving a small fraction used in making costly texturized soy-proteins and soy-beverages which are beyond the economic reach of the majority of the Indian population.

"Under the Soybean Processing and Utilization Project sponsored by the United States Agency for International Development and the Indian Council of Agricultural Research, laboratory scale processes for making fullfat soyflour, soypaneer [tofu], soydal, soyflakes, soysnack, soybadi and partially defatted soyflour have been adapted / developed."

"Soysnack: Cereal based snack foods are quite popular in India. Addition of soybean improves the nutritional value. A process developed for making soy-based snack food consists of cleaning of cereals and treated soybean splits, grinding of the soy-cereal mixture into flour of IS:35 mesh, making dough, extrusion of the dough through a forming extruder at about 100ºC, semi-drying the extrudate, flaking, drying of flakes to 8% moisture and packaging. The flakes thus prepared from soy-wheat/sorghum/maize (30:70) have approximately 20% protein, 7% oil, 55% carbohydrates. Organoleptic test of deep fried snacks indicated that people like soy-maize and soy-wheat snack more than that of soy-sorghum.

"Soy-badi: It is a dehydrated and spherical shaped pulse based vegetable prepared in villages for house-hold consumption. Cottage level industries have also come-up to make BADI and sell it to urban population. It is generally made using greengram pulse along with other ingredients such as spices, salt, etc. The cost of one kg BADI is 20-25 Rs./kg (US $2.0/kg). BADI made from soybean can also meet the vegetable requirement at a very low cost with more and better protein. The process of soy-badi making consists of cleaning of soybean, dehulling and splitting, soaking of soysplits in water containing 1% NaHCO3 for 4 hours in bean-water ratio of 1:3, grinding of soaked soydal to make paste, addition of salt, spices, etc. as per taste, cooking for about 30 minutes, forming BADIS and then drying to 6-8% moisture. The soy-badi thus made has about 43% protein, 19% oil, and negligible trypsin inhibitor which is further eliminated during cooking of the BADI. Storage is done in polyethylene bags or metallic containers and up to 6-months there was no effect on quality of soy-badi."

Note. This is the earliest English-language document seen (Oct. 2012) that contains the word "soysnack." Address: Soybean Processing and Utilization Project, Central Inst. of Agricultural Engineering, T.T. Nagar, Bhopal–462 003, India.

8982. Dalodom, A.; Chainuvati, C.; Charnnarongkul, S. 1989. Rapid expansion of soybean production in Thailand. In: A.J. Pascale, ed. 1989. World Soybean Research Conference IV. Buenos Aires: Continuing Committee. xxviii + 2152 p. See p. 650-57. [9 ref]

• ***Summary:*** Soybean is an important field crop in Thailand. Production has increased from about 100,000 tonnes in 1980 to 366,400 tonnes in 1986, the peak year. Yields in the same period rose from 793 to 1,238 kg/ha. There are three seasons for soybean cultivation: early rainy season, late rainy season, and dry season.

Soybeans produced in Thailand are used in food products in two ways: First, the medium scale food industry produces soy milk and soy starch for local food mixtures. The other is family-scale food industry that produces fermented soybean chip for food ingredients, bean sprout, custard, curd [tofu], local soymilk and Tao si, etc. The main industries for soybean grain are oil and meal. Soybean oil annually produces about 40,000–45,000 tonnes. It can be categorized into 2 groups: 1. Sea food product canning that demands 15,000 tonnes of soybean oil a year. 2. Cooking oil, resin for light color paint and other canning uses which demand about 25,000–30,000 tonnes a year. Address: Dep. of

8983. **Product Name:** Super Soy Soymilk (Plain, Vanilla, or Chocolate), and Tofu.
Manufacturer's Name: IndoVita Soya Ltd.
Manufacturer's Address: Ghaziabad, India.
Date of Introduction: 1989. February.
Wt/Vol., Packaging, Price: 200 ml pillow pack plastic pouch.
How Stored: Shelf stable, 10-14 day shelf life. Refrigerate after opening.
New Product–Documentation: Talk with Mahesh Khaitan. 1989. Aug. 6. This soymilk was introduced in Ghaziabad in Feb. 1989. The company is a very small one; they bought a small plant from Japan. They also make a little tofu, sold in a 200 gm plastic pouch surrounded by water.

Letter from A.K. Bajaj, Managing Director of Amrit Protein Foods Ltd. 1991. June 26. This company is no longer in business. Formerly they were marketing their soyamilk and tofu under the brand name of Super Soy.

8984. Medoff, Marc. 1989. Rockland tofu lover making mark on local soy scene. *Whole Life.* Jan/Feb. p. 85.
• ***Summary:*** Ex-Brooklynite the loveable and feisty former graphic artist "Soy Man" Sam Weinreb is the 62 years young founder of Local Tofu of West Nyack, New York. Nearly 8 years ago he started making tofu commercially in Haverstraw, and about 4 years ago he moved to 307 Route 59, West Nyack. The company now makes more than 1,500 lb/week of bulk tofu as well as hundreds of pounds of fresh soymilk, tofu salad, and soysage, distributed to health foods stores over a 50 mile radius. Organic soybeans are used in all products.

A large photo shows Sam, wearing a baseball cap and holding a paddle in his left hand, as he finishes making a fresh batch of tofu at Local Tofu in West Nyack, New York.

8985. **Product Name:** Whey-To: Protein Supplement (Whey-based Diet Powder).
Manufacturer's Name: ModernMeditech International.
Manufacturer's Address: Las Vegas, Nevada 89109.
Date of Introduction: 1989. February.
Ingredients: Pro-tech (whey protein concentrate, dried tofu powder, sodium caseinate), fructose, partially hydrogenated soybean oil/M.C.T. blend, natural flavors, potassium chloride, lecithin, magnesium oxide, manganese oxide, Vitamin A Palmitate/Beta Carotene blend, d-calcium pantothenate, pyridoxine HCl, riboflavin, thiamin hydrochloride, cobalamin concentrate (B-12), Vitamin D, folic acid, biotin, iodine (kelp), tricalcium phosphate, GTF chromium, and selenium.
Wt/Vol., Packaging, Price: 24 oz (681 gm).
How Stored: Shelf stable.
Nutrition: Per 30 gm.: Calories 130, protein 12 gm, carbohydrate 16 gm, fat 2 gm.
New Product–Documentation: Label. 1989. 5.25 diameter. Plastic tub. Lid is solid white (without writing, illustration). Side of container is orange and brown on white. Illustration: Bird with sun; slender woman silhouette within larger figure. "Whey-to is unique among protein supplementation. Whey-to features a neutral flavor which can be blended with fruits, flavors and other food extracts to make this a versatile food for direct consumption or as an additive to casseroles, soups, and other foods. Whey-to is an excellent source of balanced proteins with the highest available Protein Efficiency Ratio (PER) and is useful for the elderly, growing children, and active adults.

"Suggested use: As a protein supplement, add 2 tablespoons of Whey-to to 8 oz of water, juice or milk and stir. For best results, mix in blender with the liquid of your choice and 2-3 ice cubes.

"Important notice: This product should not be consumed as a sole source of nutrition: Consume at least one well balanced meal per day. Follow the accompanying dietary recommendation."

8986. *Mori-Nu Healthy Life* (*Los Angeles*). 1989--. Serial/periodical. Morinaga Nutritional Foods, Inc., 5800 S. Eastern Ave. #270, Los Angeles, CA 90040. Bimonthly. Susan Bucher, editor. Vol. 1, No. 1. Jan/Feb. 1989. Published for the members of the Mori-Nu "Health for Life" Club.
• ***Summary:*** Formerly titled *Healthy Times.* Each issue, typically 6 pages, discusses the merits of tofu and Mori-Nu silken tofu. Recipes and coupons are now included in the magazine. "Published for members of the Mori-Nu 'Health for Life' Club." Address: Los Angeles, California.

8987. *Natural Foods Merchandiser.* 1989. Soy inspirations: With plenty of new products on the horizon, retailers should begin to plan now for a sizzling Soyfoods Month in April. Feb. p. 12-13.
• ***Summary:*** Sales of soyfoods (tofu, soymilk, soy sauce, miso, other such as entrees, cheese, ice creams, meat analogs, etc.) are estimated to be $638 million for 1987 and $682 million for 1988, and projected at $754 million for 1990. Discusses Corporate Culinary Carnival soyfoods promotions by Judy Brown, and a soyfoods cooking contest by Mike Shields of Food For Thought in Long Island, New York. Winners received their weight in tofu. The unique idea made it into the pages of *USA Today.* Among the 30 entrants, winners were selected in 3 categories: entree, dessert, and beverage.

8988. **Product Name:** New World Tofu Burger.
Manufacturer's Name: New World Natural Foods.
Manufacturer's Address: 157 Sutherland Rd., Brookline, MA 02146. Phone: 617-232-5973.
Date of Introduction: 1989. February.

© Copyright Soyinfo Center 2013

New Product–Documentation: Talk with Emily Merghart. 1989. Aug. 18. This product was introduced in Feb. 1989. The tofu burger itself is made for her by 21st Century Foods.

8989. Packaged Facts. Subsidiary of FIND/SVP. 1989. The Oriental foods market. 625 Avenue of the Americas, New York, NY 10011. 225 p. Feb. [1 ref]
• ***Summary:*** Contents (main divisions): I. Introduction. II. The overall market, including a brief history in America. The market leaders, in descending order, are La Choy, Stouffer, Chun King, Nissin, Kikkoman, Budget Gourmet, JFC. III. The frozen segment. IV. The canned/packaged segment: Sauce sales now over $100 million and soy sauce nearly 3/4 of all sauce sales. V. The tofu segment (detailed below). VI. The dry soup segment: Nissin number one. Appendix: Company profiles: BCI Holdings Corp., Nestlé S.A., Nissin Foods Co., Kikkoman International (in American since 1956). ConAgra, Sanwa Foods, Others (Kraft, Benihana, JFC International).

Section V is "The Tofu Segment" (p. 153-178). Contents: I. The products: Brief history. A protein staple in the Orient. The Miracle food. Tofu high in protein. Calcium content can be high. How it is made. Raw tofu the most common form. Other forms found in specialty stores. How tofu is used.

II. The market: Tofu sales reach $71 million in 1988 (Gives dollar volume in millions from 1984 [$57] to 1988 [$71]. Source: Packaged Facts). III. Factors in future growth: Popularity of Oriental cuisine. Tofu adopted by dieters and health conscious. Consumers attracted by low price. Dinners and entrees being introduced. Tofu helpers (Betty Crocker's Oriental Classics Dinners [General Mills] call for the addition of tofu, chicken, or meat). Tofu substitutes are proliferating (value-added tofu based ice creams, puddings, burgers, cheese, hot dogs, salad dressings, etc.). Interest by corporate giants (Pillsbury and Carnation). Tofu used in U.S. National School Lunch Program (it is estimated that 50 million lb of soy proteins are used each year in school lunches). IV. Projected sales: $119 million market by 1995 (7-8% dollar increase annually). V. Market composition: Raw tofu over half of sales. Supermarkets account for 60% of sales. V. The Marketers: Field narrowed to 150 or fewer marketers. Four major marketers (Hinoichi, Azumaya, Morinaga, Nasoya; produce 100,000+ weekly). The second echelon (Northern Soy, Quong Hop, White Wave, Island Spring; produce 15,000–30,000 lb/week). VI. The competitive situation: Precise market shares unavailable. Hinoichi, Azumaya, Nasoya, and Morinaga lead. Tomsun, failing with Jofu [tofu yogurt], files for Chapter 11. Watch out for Kikkoman. VII. Advertising and promotion: No measurable expenditures (except by Tofutti). VIII. Packaging: Plastic and foil. IX. Distribution and retail: Distribution. 60% of raw tofu sold in supermarkets. Pricing includes higher margins. Assortment. Most tofu shelved with produce. Pricing data at the retail level: In its *Key Price Book,* Marketing Services Corporation publishes detailed information on tofu products sold in California supermarkets. This includes data on package sizes, case sizes, competitive pricing, margins, and promotional discounts. Figures for Kikkoman Kinugoshi, and two textures of Morinaga were compiled on 1 Feb. 1989. X. The consumer: Size of user base unknown. Roper poll reveals a dislike of tofu. Those most likely to use. Address: New York. Phone: 212-645-4500.

8990. **Product Name:** Paul's New and Original Brown Rice Tofu Sandwich [Less Spread, More Veg].
Manufacturer's Name: Paul's Organic Food Works.
Manufacturer's Address: P.O. Box 431, Fairfax, CA 94930. Phone: 415-453-2360.
Date of Introduction: 1989. February.
Ingredients: Short grain brown rice*, spring water, nigari tofu*, sprouted wheat tortilla*, toasted tahini, barley miso*, green onions* or leeks*, carrots*, seasonal green*, cabbage, lettuce*, clover sprouts*, shoyu*, sesame oil*, garlic*, ginger*, apple cider vinegar, unrefined sea salt, spices. * = Organically grown per Cal. Health Code Sec. 26569.11.
Wt/Vol., Packaging, Price: 12 oz.
How Stored: Refrigerated.
New Product–Documentation: Label sent by Paul Duchesne. 1989 Aug. 11. 5.5 by 2 inches. Black on green paper. "12 happy ounces. For the best taste, remove from refrigeration one hour before eating. To eat: Open bag–Tilt sandwich in bag–fold bag down." Illustration of animated product, with smiling face on tortilla, arms, and legs. On the back of each is a statement: "Concentrate on the issues, not the individuals..." The statement is changed weekly. Talk with Paul Duchesne. 1989. Aug. 16. Introduced in Feb. 1989.

8993. Rose, Richard. 1989. Tofu-Rella, NuTofu, and Cemac: Soy cheeses in America (Interview). *SoyaScan Notes*. Feb. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** When Rose International's Tofu-Rella was launched, it tended to displace Cemac's NuTofu, which had previously been the lowest-priced soy cheese. Tofu-Rella is now the lowest priced brand of tofu-based cheese. The market has segmented by price into low price (Tofu-Rella), medium price, and high price (Soya Kaas). Tofu-Rella sells for about half the price of Soya Kaas.

Cemac is a division of Trugman-Nash which imports and exports at least $20 million a year of casein, dry milk, whey, and the other such powders. They had a plant in Philadelphia that made imitation cheeses and was operating at only a fraction of their capacity. Just as they were considering closing it, Bob Savar went to them and convinced them to make a tofu-based cheese. They did it mainly to keep from having to close the plant. Savar worked as a broker for them. Richard Rose started to serve as a broker for Cemac in June 1987 and continued until Jan. 1988. Both Rose and Savar stopped working as brokers when they felt they were not being paid properly. Address: P.O. Box 5020, Santa Rosa, California, 95402-5020. Phone: 707-576-7050.

8994. Shurtleff, William; Aoyagi, Akiko. comps. 1989. Marketing soyfoods–Labels, ads, posters, and other graphics: Tofu second generation products, varieties, and okara products (1986-1988). Lafayette, California: Soyfoods Center. 266 leaves. Feb. 25. Illust. No index. 28 cm. Series: Marketing soyfoods.
• ***Summary:*** This book is a collection of black-and-white photocopies of materials ranging in date from 1986 to 1988. The books in this series, each a unique collection of graphic materials, are designed for a number of purposes: (1) To serve as a source of ideas, ingredients, inspiration, legal specifications, and basic guidelines for companies in the process of developing their own products, designing their own graphic materials, and conceiving their own marketing strategies. (2) To document the tremendous diversity of soyfoods products and the way that each is presented and marketed. (3) By arranging the materials in chronological sequence, to help document the development and history of new product categories and soyfood types, and with them the rise of the soyfoods industry and market in the Western World. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

8995. **Product Name:** Naturally Tofu Ice Cream (Frozen Dessert Mix) [Vanilla, or Carob].
Manufacturer's Name: Sovex Natural Foods, Inc.
Manufacturer's Address: 9104 Apison Pike, Box 310, Collegedale, TN 37315. Phone: 800-227-2320 or 615-396-3145.
Date of Introduction: 1989. February.
Ingredients: Vanilla: Crystalline fructose, soy oil, maltodextrin, corn syrup solids, tofu, sodium caseinate, natural vanilla and vanilla bean, sea salt, soy lecithin, cellulose, guar, xanthan and carrageenan gums.
Wt/Vol., Packaging, Price: 16.7 oz can. Retails for $4.99 (4/89).
How Stored: Shelf stable.
New Product–Documentation: Talk with Sovex. 1989. Feb. 28. The product was first sold commercially in mid-Feb. 1989. The name is Naturally Tofu Ice Cream. There are 2 flavors. Leaflet. 1989. April. "Sovex–The granola people. New items introduction: Naturally Tofu Ice Cream." Lists the ingredients for both flavors.

Products with Labels (Vanilla, and Carob) and leaflet sent by Sovex. 1993. Oct. 12.

8996. **Product Name:** [Smoked Tofu, and Tofu Burger].
Manufacturer's Name: Tofurei Jutta Schoenemann.
Manufacturer's Address: Doerflaser Weg 22, D-8521 Aurachtal, West Germany. Phone: (09132) 60143.
Date of Introduction: 1989. February.
New Product–Documentation: Form filled out by Jutta Schoenemann, owner. 1989. Feb. 1. The smoked tofu was launched in Jan. 1989 and the tofu burger in Feb. 1989.

8997. Wilson, J.C. 1989. The commercial utilization of soybeans, soymilk and soymilk derivatives. In: A.J. Pascale, ed. 1989. World Soybean Research Conference IV. Buenos Aires: Continuing Committee. xxviii + 2152 p. See p. 1750-61.
• ***Summary:*** Abstract. Introduction. Philosophy of preparing soybase: The enzyme lipoxygenase acts as a catalyst, inducing the oxidation of fats to create aldehydes and ketones–"beany" flavour and aroma. The enzyme lipoxygenase can be inactivated in hot water by exposure to temperatures exceeding 80ºC and destroyed by a temperature of 85ºC for two minutes. Excessive heat causes protein insolubility. Ancient method for processing of soymilk.

Dehulling. Cornell hot grind method to control bean flavor: this is the "landmark development of the modern soymilk industry." Blanching (University of Illinois method; steaming dehulled cotyledons before grinding, with no removal of fibre / okara). Problem of "chalky mouth feel [and throat-drying effect]. Removal of fiber (The "Japanese soymilk industry has followed the Illinois method but solved the chalkiness problem by a fibre removal step"). But 2 new problems: protein insolubility and protein instability in aseptically filled UHT soymilk. From 1978 to 1983 the Japanese soymilk market grew at about 85% a year, however the price of soymilk exceeded that of cow's milk.

Alfa Laval's soybase extraction line Soyal. Alfa-Laval

© Copyright Soyinfo Center 2013

does no dehulling and double grinding in hot water in an air-free environment. One goal is to inactivate 85% of the trypsin inhibitor (see Fig. 5). Market trends. Future expectations: Soybeans without lipoxygenase, growing acceptance of soymilk and products made from soymilk, strong growth of tofu (especially of aseptically packed tofu with spices), realisation of the importance of quality soy foods in school lunch programs. Address: Alfa-Laval Food & Dairy International AB, Postbox 72, 221 00 Lund, Sweden.

8998. Messinger, Lisa. 1989. Food of the future has rich past. *Antelope Valley Press* (*Palmdale, California*). March 1.
• ***Summary:*** A brief history of tofu. The author is now writing "The Tofu Book" for Avery Publishing Group due out in November. Address: Health/Nutrition Staff Writer.

8999. Tanasychuk, John. 1989. Student project: Make tofu taste good. *Detroit Free Press.* March 1.
• ***Summary:*** Sixth-grade science students at Larson Middle School in Troy, Michigan, were recently asked to evaluate their classmates' tofu recipes. "As part of science teacher Gail Ziegler's unit on protein alternatives, more than 60 students in three classes were asked to come up with original recipes using four ounces of an ingredient many of them couldn't stomach. Some of them still can't.

"Even though Dragana Bjelobrk, 11, was lucky enough to walk away with a mechanical pencil and a Nancy Drew mystery for her Tofu Italian Meatballs, the white stuff will always be what she calls 'yucky.'

'I thought it was disgusting,' says Bjelobrk, who had the help of her parents in dreaming up her recipe. 'It looks like some kind of cheese and it doesn't really have any kind of taste.'...

"Jason Chan, who won a prize for his Tofu Turkey Taters, figures his familiarity with bean curd may have given him the edge... Tisha Hausmann, who still doesn't like tofu, didn't win a prize with her Hamburger Pie. 'I thought it was gross looking,' she says." Address: Free Press Food Writer, Michigan.

9000. Pedrick, Ed. 1989. Clofine spray dried tofu (Interview). *SoyaScan Notes.* March 2. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Ed has been with Clofine since 1982. He is age 36, a vegetarian, and has *The Book of Tofu.* In 1983 he heard that Tofutti was having trouble making their soy ice cream. He began to work with them to develop a spray dried tofu. Clofine's specialty is drying dairy milk and whey powder; they move 50-60 million pounds of these a year. By late 1983 Clofine was having made and selling a spray dried tofu to Tofu Time, Inc. Tofutti wanted to keep the arrangement secret, but this is no longer a problem for them. Growth of sales was very rapid at the beginning, then it slowed and now it is again rapid, more than doubling each year. In the past 5 months Clofine has sold more product than they sold in the previous year.

Clofine has soybeans dehulled and ground to a fine flour, which is taken to the Armour Foods plant in Springfield, Kentucky. Under license from Clofine, they use the flour to make soymilk, coagulate the milk with calcium sulfate, then slurry the curds and spray dry the slurry for as little as $0.18 to $0.20/lb. The maximum solids content in the slurry is 26%. They could (but do not) add a small amount of polysorbates to lower the viscosity. They keep costs down by running large batches. Pareve (pronounced par-VAY) products require the plant to be shut down for 24 hours before a run, then a rabbi must come, inspect, and stay during the run. Cleanup afterward takes 4 hours. Clofine's spray dried tofu sells for about $1.50/lb. and their spray dried soymilk for $0.70 to $0.85.

Clofine has been working for the past 2 years with Raj Gupta and his ProSoya process, which seems to give better flavor and functionality than their current process. Address: Clofine Dairy & Food Products, Technical Director, P.O. Box 335, Linwood, New Jersey 08221. Phone: 800-441-1001.

9001. Storup, Bernard. 1989. Re: History of Société Soy–France's largest tofu manufacturer. Letter to William Shurtleff at Soyfoods Center, March 3. 3 p. See p. 1-3. [Eng]
• ***Summary:*** Soy (also called Société Soy or Soy S.A.R.L.) was founded in Feb. 1982 by Bernard Storup and Jean de Preneuf. (Note that "Société" means simply "company" and S.A.R.L. means "Société a Responsabilite Limitée," like GmbH in German). S.A.R.L. is the legal type of company, and it is compulsory to have this term on all official papers in France. Bernard came from a family of dairy product manufacturers. In the minds of customers and other companies this company's name is "Soy," a term which in French has no particular connection with soybeans.

Bernard and his wife Françoise came to America in Nov. 1980 to study tofu and soymilk around the country; they stayed until July 1981, attending the Soycrafters' Conference at Colorado State University. Jean de Preneuf did the same thing from Sept. 1980 to July 1981. Most U.S. tofu companies were still small and inexperienced at the time, but those which Bernard and Jean found most interesting were Island Spring, Nasoya, New England Soy Dairy, White Wave, and Swan Gardens (Miami, Florida). Jean and Françoise also visited with William and Akiko Shurtleff in California.

Upon returning to France, Bernard and Jean set up a soy dairy (600 square meters) in Cerny, a small village located (35 km or 22 miles) due south of Paris, near places named La-Ferté-Alais and Torfu. They started to make tofu commercially in June 1982. By 1983-84 they were making 2,500 kg/week (5,500 lb/week) of tofu.

In December 1986 the company stopped production at Cerny and moved to a larger (1,400 square meters) and

© Copyright Soyinfo Center 2013

more rationally designed plant located 500 km (310 miles) south of Paris in the foothills (elevation 600 meters) in St.-Chamond, near St.-Etienne, a little southwest of Lyon. Situated on the border of the Pilat Natural Regional Park (Parc Naturel Regional du Pilat, 65,000 ha or 161,000 acres) they had a nice view of the mountains. They moved to this location for two main reasons: (1) Because it has some of the best French water (of the same phreatic groundwater origin as most French mineral water such as Badoit, Evian, Vittel, etc.); (2) Because of the geographic location, being at the center of France, only 2 hours by road from Switzerland and Italy, 4 hours from Germany, less than 4 hours from Paris, and 5 hours from Spain. Production at Saint-Chamond began in Jan. 1987.

"Throughout the years we have developed our own technology and equipment, and have now a rather good quality soymilk and tofu. At present, we carry different families of products on 3 different markets.

"(1) The health-food market. Up to now it has been our main market, and we are now distributing to nearly all health-food stores equipped with a cooler (about 1,500 out of a total of 2,500 in France). The distribution itself is all done through specialized distributors in this field in France (about 20). We are the leader in this market (being practically alone), but this field is nearly saturated for our products. We should see a maximum increase of 20–30% in the next 3 years, as these traditional health-food stores are getting more and more competition from supermarkets. We are presently in the same type of market in Switzerland through a distributor, and directly in Germany and Belgium.

"(2) The food industry. They are looking for a 'soy-base' to lower fats in cooked pork meats (sausages, pâtés, etc.), or to use in prepared cooked foods ('plats cuisinés', or to fill pastas, etc.). We sell them bulk vacuum-packed tofu pieces of 3–4 kg each. In terms of volume, this market should be the more important in the future, but not in terms of sales, as prices are of course rather low. We began (January 1989) to sell soymilk in bulk (by 25,000 liters tank) to distributors interested in having their own brand-names, and dealing with supermarkets or the health-food market. This soymilk is packaged in Tetra-Brick cartons by another company. Up to now we haven't carried our own brand. There will be such competition (in price) with soymilk in Europe in the forthcoming months that it may be better to stay as a simple supplier. Anyway our position can change rapidly. We should produce about 2 million liters of soymilk this year, having contracts already for more than 1 million, on a market estimated at 7 to 10 million liters in France in 1988. The soymilk market is estimated to increase at 20 to 30% a year for the coming years, and most supermarkets are now considering having their own brands. Prices to final consumers have been rather high up to now (9 to 12 French francs [FF] per liter), and should drop clearly in the future. The leader in Europe, Vandemoortele (with Provamel, etc., brands), lowered his prices twice last year in France. Anyway, these figures are and will remain extremely weak compared to the traditional milk market (plus the dairy lobby takes a strong position against these substitutes in the E.C.C.).

"(3) The super and hypermarkets. These represent actually 54-55% of total food sales in France (1.5% for health-food stores, 5% for co-ops and direct from factory sales, the rest for traditional grocery stores). We will introduce 4 complete lines of products with complete new packaging in April 1989, on a new brand, 'Jean de Preneuf' (remember 'pre' means field, and 'neuf' new), 'SOY' being our brand-name for health-food markets. We do actually 2 or 3% of our total sales in this market, and hope to be at 35% at the end of 1989.

"Last year we sold about 550 tonnes of tofu, most of it under a prepared form (burgers, sausages, desserts, etc); sales of plain tofu represent about 23% in tonnage, but only 10% in turnover. We had a total sales in 1988 of about 13,000,000 FF, and nearly no profit (35,000 FF). This can be explained by the fact that we had very heavy investments, mainly to automate the production, and because we have a policy of very reasonable prices (all those who tried to enter the health-food market became aware of this). For 1989, we should have total sales of 18 to 19,000,000 FF (introduction in supermarkets, soymilk sales, sales development in Germany, etc.). This should represent 750-800 tonnes of tofu plus about 2,000 tonnes = 2,000,000 liters of soymilk. We actually use only organic French soybeans, and have the 'Nature et Progres' organic certification symbol/slogan for all of our products, which is the best one you can have for organic products.

"There are 27 people working in the company, half of them being technicians with a strong professional background (from the dairy industry, agricultural engineers, automaticians, etc). Jean and I have 90% of the shares, 10% belonging to people working in the company."

The company presently has about $2 million (12 million francs) annual sales. Bernard is the owner and head; Jean is in PR and sales. Their main products are: 1. Tofu Burgers (Croque Tofu) sold in 4 flavors and eaten in France with a sauce, not between buns like a typical U.S. burger. 2. Tofu Sausages (Roulades de Tofu, Tofinelle) with Sauce and mushrooms or smoked salmon. These sausages, larger than a U.S. hot dog, are sold 2 in a package with the sauce. 3. Soy yogurt-like or parfait-like dessert (Soyeux), sold in 6 flavors. They now market these products plus Tofast Soya Paste, Tofumé smoked tofu, and Granioc (wholegrain & tofu meatless burgers) in England, and have a nice brochure to advertise them.

In April 1989 the company changed its legal status from Soy S.A.R.L. to Soy S.A. (Société Anonyme), and added 400 square meters of extra cooler and storage space.

In a form filled out for Anthony Marrese in Nov. 1989,

© Copyright Soyinfo Center 2013

Bernard noted the following production figures: Tofu & Tofu Fumé 3 tonnes/week. Tofu Burgers (Croque Tofou) 2 tonnes/week. Soy dessert (Soyeux [pudding]) 2 tonnes/week. Tofinelle sausage 2 tonnes/week. Soymilk 30,000 liters/day (Maximum capacity 3,000 liters/hour). Société Soy is under a confidentiality agreement with APV of England and Alfa-Laval of Sweden, both of whom are supplying equipment to them. Anthony notes that all Société Soy products are professionally done and very good.

Update 1990 March 10. In Oct. 1989 a new syndicate of 7 large French soyfoods manufacturers was formed. Société Soy is one of the members. In Nov. 1989 a new partner and investor came into the company. He now owns 20% of the stock. He is the brother-in-law of the leader of the most powerful food group in France. Société Soy now employs about 30 people, an excellent team. Address: Founder and Owner, Société Soy, 1 rue du Crêt de la Perdrix, 42400 Saint-Chamond, France. Phone: 77.31.23.66.

9002. Storup, Bernard. 1989. Re: The soyfoods and tofu markets in Europe and France. Letter to William Shurtleff at Soyfoods Center, March 3. 2 p. Typed, with signature on letterhead. [Eng]

• ***Summary:*** "The coming competition in the soyfoods market in Europe will be quite different from what happened in the U.S. There will soon be no room for small companies. The competition in the complex market with its high population density leads most food industry companies to have a necessary minimum critical size, and this will be more true than ever starting in 1992 with the complete opening of national boundaries within the EEC. From now on we should not see the opening of small-scale tofu manufacturers in Europe–at least not viable ones that are larger than community scale.

In France, the soyfoods market should evolve rapidly in two main directions in terms of products. In nearly all cases, tofu will be used as an ingredient, and not presented as plain tofu or soya. One major new area is dairylike products ("produits apparentés laitiers" in French). Most big dairy companies are now working on soy-based yogurts. The first major company to put such a product (Sojasun, major launch in Oct. 1988) in supermarkets is Laiterie Triballat (rue Julien Neveu, 35530 Noyal-sur-Vilaine, France. Phone: 99.00.51.01). They are mainly cheese makers and have nationwide distribution. They also own Bonneterre S.A., the leader in France for fresh products on the health food market. Triballat plans to sell about 40 million x 100 gm yogurt cups (4,000 tonnes) the first year, for a total sales of about 70 million French francs (FF). The product is relatively good but rather sugary. Last October, Triballat had a national TV ad campaign to launch its products for 2 weeks on our 5 networks, costing about 10 million FF; another will appear in the spring. Within a year, 1 or 2 other major dairy companies should be on the market with similar products.

But actually the market will be much bigger for "mixed cheeses" (made from a mixture of cow's milk and soymilk). Most major cheese makers are working on such products, but nothing should be launched before at least 1 year. We already tasted "mixed cheeses"; its hard to tell any difference from regular cheese. The interest for dairy companies lies in a different set of facts. It will be increasingly difficult and expensive in the coming years to find cow's milk in Europe, especially after the EEC programs cutting milk production to reduce milk and butter surpluses. The only growing cheese market is for low-fat cheese (growing at least 20% a year). There is also the difference in price between cow's milk and soymilk. And there is such competition for cheese that a good part of the production does not generate adequate profit. So everybody is looking for a market niche, and they know there is money to be made by the first new products on the market in each new niche.

Major players in the soyfoods industry in France are Sojadoc in Albi (Started Dec. 1981; Make tofu and soymilk), Cacoja in Issenheim (an affiliate of Coopérative Agricole de Colmar, or CAC; Started April 1986; Make soymilk and soy desserts), Sojalpe (Started 1986 or 1987, but bought out in early 1988 by a large agricultural cooperative, Coopérative Agricole Silos de Valence; This co-op created a company named Innoval at the end of 1987; Make tofu and yoghurt-like Innovy). Address: Founder and Owner, Société Soy, 1 rue du Crêt de la Perdrix, 42400 Saint-Chamond, France. Phone: 77.31.23.66.

9003. Storup, Bernard. 1989. Re: Brief history of Sojadoc. Letter to William Shurtleff at Soyfoods Center, March 3. 1 p. See p. 5. [Eng]

• ***Summary:*** In Dec. 1981 Olivier Attié began to make tofu on his farm in a small village named Penne-d'Agenais, 47140 in southwest France. With 3 friends, he decided to start a small company to sell tofu in shops and market places, so they founded Sojadoc S.A.R.L. The group split up rapidly, and only 2 of them, Alain Lacombe and Jacques Isnard, went on with the business, which began operation at the end of 1983. In 1985 they had financial problems–they were making only plain tofu and distributing it locally. The company started again at the end of 1985 with three new partners: (1) Coopérative Agricole de Lavaur, one of the biggest agricultural cooperatives in France, with about 5,000 ha (12,350 acres) of soybeans cultivated under contracts with farmers in southwest France; (2) Charbonnages de France, a coal mining company that paid for part of the new factory in a region where they had to close coal mines; and (3) Sanofi, an affiliate of the oil group Elf-Aquitaine, which is very interested in biotechnology.

Sojadoc S.A. built a new factory (1,350 square meters) at Zone Industrielle de la Viscose, 81000 Albi, France (Phone: 63.45.46.45). They intended to sell a "soy-base" (tofu, and a thick soymilk they called "tonyu") mainly to

© Copyright Soyinfo Center 2013

the food industry, and for 2 years they had a rather efficient program for promoting soyfoods among industrialists. They began to get some contracts with the industry for what we call "plats cuisinés" (things like quenelles, quiches, and pizzas), and for ice cream making, but these didn't last since the quality was very irregular, with major bacteriological problems. In 1987 they began to sell soymilk packed using the Doypack system. Sold mainly to Spain, it was very poor in quality with a strong beany taste. They had so much sales, that they were obliged to go out of business in mid-1988. At the end of 1988 the company was purchased by a big dairy cooperative group named Coopérative Laitière de Riches Monts (65 Boulevard Berthelot, 63000 Clermond-Ferrand, France) located in the center of France. Production had stopped completely by the autumn of 1988, and all equipment is going to be transferred to the new location. The aim of the new operation is to make and sell soymilk in the near future. Address: Founder and Owner, Société Soy, 1 rue du Crêt de la Perdrix, 42400 St.-Chamond, France. Phone: 77.31.23.66.

9004. Storup, Bernard. 1989. Re: Brief history of Cacoja, an affiliate of Coopérative Agricole de Céréales, Colmar (CAC). Letter to William Shurtleff at Soyfoods Center, March 3. 1 p. See p. 6. [Eng]

• ***Summary:*** In April 1986 CAC decided to create an affiliate to produce value-added products from the soybean cultivation they were promoting in Alsace (in southeastern France). They bought an Alfa-Laval soymilk system (5 million French francs plus 6 million francs for the building and grounds). In Jan. 1987 they produced their first soymilk and soy desserts, using very good quality soymilk, under the brand name Bioforme, and packed in Tetra Brik cartons by a neighboring dairy, La Calas. They have also prepared a line of products made by other companies, from "soy-nuts" (made by Benenuts) to tofu sauces and "plats cuisinés." These products are targeted mainly to supermarkets and the food industry, to whom they market the concept of a soy-base obtained by ultrafiltration.

In Sept. 1988 they launched their own tofu (coagulated ultrafiltered soymilk), marketed as a fresh product, but they are blocked by two facts: (1) they cannot distribute it in the health food market, since Société Soy is there; (2) the large scale distribution supermarkets are not ready for such a product. They intend to market their product line to supermarkets this coming spring, as well as a line of low-fat pork meat products. They have been obliged to change their brand name from Bioforme/Bioforce to Formoja by the end of 1988, having been prosecuted by another company named Bioforce.

This is an intelligent team, with good financial backing from CAC, efficiently run by Mr. Rochet, but they may be lacking a real marketing policy.

It is hard to say how much they produced last year. They planned to produce 1 million liters in 1987 and 2.5 million in 1988, but it seems unlikely that they have been able to produce such large amounts. They will never reveal their actual production figures.

Note: A form filled out for Anthony Marrese in Nov. 1989 stated that they make Mayonnaises, Sauce Vinaigrette, Chocolat, Desserts, and Aperitifs. They suggested that Anthony phone Dr. Cuatron at 89.74.17.07.

Update by Bernard Storup. 1990. March 26. This company has had constant problems with having to change its name. In Sept. or Oct. 1989 that had to change from Cacoja to Biosoja, and now they will have to change the latter again. They are presently the largest soymilk maker in France. They also had to change their original brand, Bioforme, to Cacoja, and now that will have to be changed again to Formoja.

Update by Bernard Storup. 1990. June 13. The company is presently named Cacoja (pronounced KA-ko-jah), but the name Cacoja belongs to another group–a health food group named Aida, which distributes health food products in France. So only the brand name has changed. Address: Founder and Owner, Société Soy, 1 rue du Crêt de la Perdrix, 42400 St.-Chamond, France.

9005. Storup, Bernard. 1989. Re: Brief history of Innoval / Sojalpe, an affiliate of Coopérative Agricole Silos de Valence. Letter to William Shurtleff at Soyfoods Center, March 3. 1 p. See p. 6. [Eng]

• ***Summary:*** Sojalpe was started as a traditional tofu shop by a very dynamic and inventive guy named Martial Gonin in about 1986 or 1987 [sic, Dec. 1986]. He was definitely in business by late 1987 and located at Saint Quentin sur Isere, 38210 Tullins (near Valence), France. This is in southeast France. he first made and sold plain tofu, then his "Royales au Tofu," which were kind of quenelles (specialties of that part of France, between a sausage and a souffle, usually prepared with a sauce, and made from wheat flour and animal fat). In these he used tofu instead of the fat, and packed the product in cans with a shelf life of at least 1 year. He also made and sold "Palets au Tofu," which were kind of tofuburgers.

In early 1988 he made a big deal with an agricultural cooperative named Coopérative Agricole Silos de Valence (441 bis Avenue Victor Hugo, 26000 Valence, France. Phone: 75.44.01.61). This co-op created a company named Innoval at the end of 1987. Innoval purchased 50% of the Sojalpe shares of stock, then dismissed Martial Gonin from the company by the end of 1988. Innoval had a brand new factory built, and equipped with an Alfa-Laval system (to be installed in early 1989), plus a 5 million French franc Buhler-Miag cleaning and dehulling system; all this for an total investment of nearly 20 million French francs. Sojalpe was the only way that they could enter the health food market, so they kept that as their brand for this market. Sojalpe

© Copyright Soyinfo Center 2013

presently sells their products directly to shops and co-ops in France, as no distributors want to work with them (the distributors are already distributing Société Soy products). As Sojalpe has low prices and large transportation expenses, with low sales, it is quite certain that they are losing money. They make an estimated 300 to 400 kg/week of tofu. Innoval also carries a line of yogurt-like products named Innovy.

In fact it is to early to know exactly what this company intends to do, and it seems that they themselves don't known exactly–which is not so rare among co-ops.

Update from Bernard: 1990 March 10. "Innoval does not seem to be doing very well, but I don't have details. They seem to sell only some soymilk in health food stores. It is very expensive but one of the best I've ever tasted. I have never seen even 1 pack of their Innoval tofu." Address: Founder and Owner, Société Soy, 1 rue du Crêt de la Perdrix, 42400 St.-Chamond, France.

9006. Storup, Bernard. 1989. Re: Société Soy and the soyfoods market in France. Letter to William Shurtleff at Soyfoods Center, March 3. 8 p. Typed, with signature on letterhead. [Eng]
• ***Summary:*** Contains brief histories of Société Soy, Laiterie Triballat, Sojadoc, Sojagral, Cacoja/CAC, Sojalpe, and Daizou. Each of these are cited separately, in detail, in this (SoyaScan) database. Address: Founder and Owner, Société Soy, 1 rue du Crêt de la Perdrix, 42400 Saint-Chamond, France. Phone: 77.31.23.66.

9007. *Food Business* (*Chicago*). 1989. Lowly tofu winning new respect: Once popular only with the counterculture, tofu has potential with the mass market. March 6.
• ***Summary:*** Peter Golbitz gives statistics for the growth of the tofu market from 1980 to 1988. In the latter year he says that 69.9 million pounds of tofu were produced with a value of $76.9 million. These figures refer only to tofu sold as tofu, not to second generation tofu products.

Researchers at Purdue University in Indiana, headed by Philip E. Nelson, are planning to establish a tofu center to explore uses and markets for the product, and to develop soybean varieties suited for tofu production. Nelson feels that tofu is a product that's "just in its infancy."

"John M. Connor, associate professor in the department of agricultural economics at Purdue, echoes that sentiment. 'There's no doubt it's a fast-growing industry,' he says...

"'I expect that manufacturers will discover that adapting tofu to American tastes [by adding] smoke or meat extracts will be the way it will go,' says Connor...

"He also sees use of tofu as an extender in the institutional and foodservice channels, where labeling isn't required, as the first areas to see large tofu inroads. 'Householders in the grocery stores will be the last to accept it,' he says." Address: Illinois.

9008. Hughes, Beth. 1989. Tofu gets a toehold in U.S. diet: Its in hot dogs, ice cream, chocolate–but disguised. *San Francisco Examiner.* March 15. p. D1, D9. Business section. [1 ref]
• ***Summary:*** A discussion of the work of the Soyfoods Center and of William and Akiko Shurtleff, with a photo of them holding books they have written. Contains industry statistics, first published in the last issue of Soya Newsletter, provided by Soyatech.

This article was published in the *Press Democrat* (Marin County, California) on 1 April 1989, as "Mainstream U.S. takes to tofu: Wiggly white stuff becoming big business." Address: Staff writer.

9009. Mallia, Joseph. 1989. 'Tofu pups' project clears another hurdle. *Recorder* (*Greenfield, Massachusetts*). March 15.
• ***Summary:*** "The town's acceptance of a preliminary environmental report means Lightlife Foods Inc. is another step closer to manufacturing its vegetarian frankfurters–'tofu pups'–in Greenfield... The 10-year-old company will more than double its 6,000-square-foot plant to begin making its soybean curd hot dogs and to add new products, said company President Michael Cohen...

"In January, Lightlife Foods received a $756,000 loan package from four sources, including the state, the federal government and Heritage Bank."

9010. Cook, Anne. 1989. Indian scientist hopes soy is protein answer. *News-Gazette* (*Champaign, Illinois*). March 19.
• ***Summary:*** Nawab Ali spent last week at the Univ. of Illinois studying new ways to turn soybeans into flour, oil, and other foods. Indians do not eat beef or pork. Most of India's soybean meal is sold to the Middle East at cut-rate prices. "'In India we have two problems,' Ali said. 'We don't have enough oil or enough protein in the diet. Soybeans can solve both problems because they're 40% protein and 20% oil. The government is promoting their use.' Ali, soybean project director at Bhopal's Central Institute of Agricultural Engineering, believes small-scale processing is the answer...

"When he's mastered the technology, Ali intends to set up processing demonstration sites at strategic locations to teach people how to turn beans into a soy flour that can be mixed with wheat flour, a coarser product to grind with wheat and a tofu-like curd.

"Nine scientists and 30 technicians are working on the project at the Bhopal laboratory. Ali hopes to set up at least three demonstration plants, each capable of processing 100 to 150 kg of beans an hour...

"The U.S. Agency for International Development is contributing 65% of the $2 million project cost and the Indian government is underwriting the rest."

Washington Post Co.–Syndicated. March 21.
• ***Summary:*** This 4-part cartoon begins with Opus (the cartoon's penguin) watching a kid who is struggling to push a lawn mower. Opus: "Oliver said that 'the Big Crunch' is coming.

The kids stops and faces Opus, who continues: "He said the universe will fall back in on itself someday. Stars... planets... tofu hot dogs... Everything will squash together."

In big, bold letters: "And then explode again in fiery cataclysmic destruction."

In the last frame, the kid walks up to his dad who is sitting in an easy chair with a newspaper on his lap. Kid: "*#@* The lawn pop."

9012. Karas, Thomas; Whitford, Harry M. 1989. Bundesarbeitsgemeinschaft biologische Sojaprodukte [Re: Founding of the German Organic Soyfoods Association]. Letters to William Shurtleff at Soyfoods Center, March 28, April 21, and May 9. 3 p. total. Typed, with signature on letterhead. [Ger; eng+]
• ***Summary:*** In August 1988 a German "Organic Soyfoods Association" was founded; its members include all the major manufacturers. Due to the fact that the tofu and soyfoods which are produced in Germany are almost always organic quality, the Association of manufacturers is one of the branches of the National Organization of Manufacturers of Natural Foods. This organization is one of the branches of the Head Association Ecology and Quality (*Dachverband Oekologie und Qualität*) under which are three divisions of Bundesverband der Naturkost- und Naturwaren: Retailers (*Einzelhändler*), wholesalers / distributors (*Grosshändler*), and manufacturers (*Hersteller*).

The tofu makers are therefore interested in establishing quality standards and guidelines. It would make sense to comply with any existing standards for organic tofu which you and/or others have established. This would support and contribute to the development of an international standard. Please send any information you have about such guidelines.

The following ten companies, mostly German tofu manufacturers, are members of the new Association: Byodo Naturkost GmbH (Bernd Steyer, Munich), Morgenland (Alexander Nabben, Göttingen), Sojafarm (Lothar Stassen, Trechtingshausen), SoTo (Prabudda/Rolf Barthof and Prembudda/G. Schramm, Trostberg), Soyastern Naturkost GmbH (Thomas Karas, Cologne), Tofuhaus Tiefenthal (Albert Hess, Lautersheim), Tofumanufaktur (Christian Nagel, Hamburg), Tofurei (Robert Mestel and Kurt Mueller, Konstanz), Tofurei Svadesha (Svadesh/Ruediger Urban, Munich), Yamato Tofuhaus GmbH (Klaus Gaiser and Wolfgang Haberger, Tuebingen).

"Soyastern is now extremely busy expanding our production and distribution. Our annual growth rate is about 60%!."

Follow-up form filled out by Thomas Karas for William Shurtleff. The German Organic Soyfoods Association (*Bundesarbeitsgemeinschaft biologische Sojaprodukte*) was founded on 6 Aug. 1988. Person in charge: Kurt Mueller. Address: Huetlinstr. 10, 7750 Konstanz, Germany. All present members of the association are tofu manufacturers, but membership is not limited to tofu manufacturers. All present members are from West Germany, but membership is not limited to those from West Germany. They may start to publish a periodical next year. Thomas' address is now given as: BioVera, Naturkost Handelsgesellschaft mbh, Kaiser-Wilhelm-Ring 10, 5000 Köln (Cologne) 1. Phone: 02 21 / 12 46 53. Address: Soyastern Naturkost GmbH, Osterrather Strasse 26, 5000 Koeln 60, West Germany. Phone: 0221-1701581.

9013. Rowat, Steve. 1989. Process for production of a cultured tofu and product produced therefrom. *U.S. Patent* 4,816,266. March 28. 4 p. Application filed 19 June 1987. [6 ref]
• ***Summary:*** Tofu is mixed with a bacterial starter commonly used in making yogurt then blended/pureed (as with a VCM). The result is a smooth puree which, when incubated, yields a product with increased shelf life, and improved flavor, digestibility, and nutritional value. Yofu is a Canadian trade mark.

The author gives his address in correspondence as: Yofu Development, Box 93, Merrickville, ONT, K0G 1N0, Canada. Also granted as Canadian Patent 1,243,238. Address: 62 Renfrew Ave., Ottawa, ONT, K1S 1Z5, Canada. Phone: 613-269-4483.

9014. Texas Department of Agriculture (Austin). 1989. Tofu makes move to mainstream: Texas Tofu takes on role in traditional recipes. *Daily Register* (*Gainesville, Texas*). March 29.
• ***Summary:*** "Jane Phipps of Energy Sprouts Inc., San Antonio, recently joined the growing lot of tofu manufacturers. Using a low-interest loan obtained through the state-authorized Linked Deposit Program, she and her husband Bob began their tofu operation early this year. Conceived by the Texas Department of Agriculture, Linked Deposit promotes diversification into alternative crops and food products. It was authorized by voters in November 1987...

"Leftover tofu that will not be eaten in that time [7-10 days] can be frozen. 'Just wrap it in plastic wrap and freeze it,' said Phipps. 'Tofu that has been frozen becomes porous and chewy.'" Contains a recipe for Tofu Lasagna.

catalog. Address: Almere, Netherlands. Phone: 03240-20800.

9016. **Product Name:** Baccio Tofino Gourmet Ravioli (Tofu Ravioli).
Manufacturer's Name: Baccio Ravioli and Pasta Company.
Manufacturer's Address: 179 E. 19th St., Chico, CA 95928. Phone: 916-893-8324.
Date of Introduction: 1989. March.
Ingredients: Pasta: Organic whole wheat flour*, semolina, tomato powder, purified filtered water. Filling: Tofu (made from organic soybeans*, water, nigari), potatoes, onions, carrots, bread crumbs, tomato paste, tamari, vinegar, garlic, herbs & spices, olive oil, sea salt. * = Organically grown and processed in accordance with Section 26569.11 of the California Health and Safety Code.
Wt/Vol., Packaging, Price: 16 oz poly bag.
How Stored: Frozen.
New Product–Documentation: Talk with (call from) Amanda Leveroni. 1990. March 5. The product was introduced in about March 1989.

Label sent by Amanda. 1990. March 13. 4.75 by 8.5 inches. Thick paper; its slips into the bag. Red, green, and black on white. Illustration of a red lipstick print, all against a background grid of fine green lines in 3/8 inch squares. "Egg free. Dairy free. Cholesterol free! Introducing the all new Tofino! We've taken out the eggs and cheese to bring you a robust tasting ravioli with zero cholesterol! Our zesty blend of ingredients includes organic tofu and organic whole wheat flour! Enjoy this unique delicious ravioli plain or with Baccio's new pesto sauce! Baccio Ravioli. The ultimate meal in minutes [Boil for 4-5 minutes]. Let a Baccio kiss your tastebuds tonight." UPC indicia.

9017. Colbin, Annemarie. 1989. The natural gourmet: Delicious recipes for healthy, balanced eating. New York, NY: Ballantine Books. x + 325 p. March. Illust. by Laura Hartman Maestro. Index. 24 cm. [16 ref]
• ***Summary:*** Pat McNees of *The Washington Post* has called Annemarie "The Julia Child of natural foods cooking." Her photo, in color, graces the cover. The book incorporates "The Five Phases of Food" theory from China, based on a book by John W. (Jack) Garvey (1983), as an aid to meal balancing. Below each recipe name is given the major phase and minor phase that it represents. Soybeans, tofu, tempeh (as well as brown or white rice and mochi) are metal (declining state), while black soybeans are water (maximum rest before growth).

Page 27 notes: "You will not find any recipes in this book with whole soybeans; I find their taste too unpleasant, and tend to believe some research that indicates they may contain oxalates and other elements that prevent nutrient absorption. Soybean products such as miso, shoyu (the natural soy sauce made with wheat), tamari (a wheat-free natural soy sauce), tofu, and tempeh, on the other hand, are delicious; tofu and tempeh are good protein sources when combined with the grains. You will also find the condiments miso and shoyu or tamari used in many of the recipes."

Soy-related recipes include: Black and white aioli dip (with tofu, p. 49; Note: "Aioli" is derived from the French words for "garlic" + "oil." Aioli sauce is made from crushed garlic, egg yolks, olive oil, and lemon juice). Tofu and spinach turnovers (Spanakopitas, p. 66-67). Bean-of-the Orient miso soup (p. 74-75). Shoyu consommé with enoki mushrooms (p. 77). Collard miso soup (p. 78-79). Carrot-beet soup with tofu sour cream (p. 83-84). Tofu sour cream (p. 84-85). Baked [kidney] beans with miso and apple butter (p. 136). Vegetable-tofu sauté (p. 154-55). Tofu mushroom stroganoff with bulgur (p. 155). Tofu sour cream (p. 156). Broccoli-tofu quiche with wild mushrooms (p. 157-58). Open herbed tofu sandwiches (p. 158-59). Tempeh with shallots and white wine (p. 160-61). Tempeh in sweet and sour sauce (p. 161-62). Tempeh with creamy horseradish sauce (p. 163). Stir-fried bak choy with marinated tofu (p. 169-71). Green peppers with miso (p. 182-83). Spinach-nori rolls with tofu and wild mushrooms (p. 186-87). Green salad with miso-coriander dressing (p. 203). Red and white cabbage salad with miso-onion dressing (p. 208). Radish-watercress salad with soy-sesame dressing (p. 209; with ½ tablespoon black sesame seeds and ¼ cup toasted sesame oil). Salad of wilted collard greens with yellow peppers and white miso dressing (p. 210). Spiced glazed pears with tofu cream (p. 271-72). White miso and orange dressing (p. 285).

Note: This is not a vegetarian cookbook. There is a chapter of fish recipes, and other recipes for the use of alcoholic beverages/seasonings (wine, mirin). Address: Founder and director, Natural Gourmet Cookery School / Inst. for Food and Health, 365 West End Ave., New York City, NY 10024.

9018. GEM Cultures. 1989. Catalog [Mail order]. 30301 Sherwood Rd., Fort Bragg, CA 95437. 4 p. March. [4 ref]
• ***Summary:*** Contents: 1. Powdered cultures for soycrafters: Powdered starter cultures for tempeh, miso, amazake, shoyu, and tamari. In home and commercial sizes. Rice koji. 2. Cookbooks with culture (lists 4 books). 3. Coagulants for curding tofu: Natural nigari or Terra Alba calcium sulfate in 1 lb or 5 lb bags. 3. Self renewing cultures: Viili, sourdough, kefir, miso. 4. Sea vegetables from the Mendocino Sea Vegetable Co. 5. Recyclables: Cheesecloth, super sealers (lids).

"We at GEM Cultures are a husband and wife team, Gordon & Betty, with between us 37 years of professional experience in culturing microorganisms and teaching people about them. In 1980 we set up GEM cultures with the goal of providing dependable, low cost cultures and related items for the growing number of people who wish to have a hand in creating a healthier diet through cultured foods." Nachfrage nach imitationsprodukten fuer Milch und Milcherzeugnisse in der EG-9: Analyse und Prognose unter besonderer Beruecksichtigung der Aufhebung von Imitationsverboten [Demand for imitation products for milk and milk products in the EG-9: Analysis and prognosis with special consideration for the suspension/cancellation of forbidden imitation products]. *Agrarwirtschaft* 38(3):74-83. [35 ref. Ger]

• ***Summary:*** This study, originally published as a report in 1987, indicates that use of tofu in West Germany was only 800 tonnes in 1986 but is expected to reach 4,000 tonnes/year by 1992. In the entire EG (European community), the use of tofu in 1986 was about 5,000 tonnes/year, expected to climb to 12,500 tonnes by 1992.

Soymilk (Sojamilch) consumption in the EG-9 in 1986 was about 16,000 tonnes, expected to grow to 28,500 tonnes by 1992.

9020. *Natural Foods Merchandiser.* 1989. Soyfoods Association of America. March. p. 78.

• ***Summary:*** The association was founded in 1983. Membership is currently at 35. This spring they will be approaching the FDA and USDA with suggestions on how to incorporate tofu into school lunch programs. A photo shows vice president Peter Golbitz.

9021. **Product Name:** [Chinese-Style Tofu Burger].
Foreign Name: Chinaburger.
Manufacturer's Name: Sojatopf. Renamed Soto in April 1989.
Manufacturer's Address: Friedrich-Ebert-Str. 40, D-8323 Trostberg, West Germany. Phone: 08621-62538.
Date of Introduction: 1989. March.
Ingredients: Incl. tofu, seaweed, mung bean sprouts, and Chinese spices.
Wt/Vol., Packaging, Price: 100 gm.
New Product–Documentation: Letter (fax) from Harry Whitford. 1990. May 30. Gives full details on product based on interview with Gerhard (Oskar) Schramm. On 1 Jan. 1990 the company moved to Wolfbergerstr. 47, D-8211 Breitbrunn am Chiemsee, West Germany.

9022. **Product Name:** Better Than Milk? (Liquid Soymilk Made with Spray Dried Tofu and Casein) [Natural, Chocolate, Carob, Natural Light].
Manufacturer's Name: Sovex Natural Foods, Inc.
Manufacturer's Address: 9104 Apison Pike, Box 310, Collegedale, TN 37315. Phone: 800-227-2320.
Date of Introduction: 1989. March.
Ingredients: Spring water, soy oil, cereal solids (from corn), spray dried tofu, calcium carbonate, sodium caseinate, sea salt, carrageenan, vitamin B-12 (cyanocobalamin), natural flavor.
Wt/Vol., Packaging, Price: 8 oz or quart Tetra Brik Aseptic cartons, 27 or 12 to a case.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: Talk with Sovex. 1989. Feb. 28. The company plans to launch this product in late March 1989.

Letter to *Veggie Life* by Genevieve Gowman. 1993. Nov. p. 6. "Unfortunately I didn't realize how deceitful the term 'non-dairy could be. This drink contains casein, which is a milk protein... Please inform your readers of this." The magazine answers: "According to FDA guidelines, a product can contain up to 2 percent casein and still be labeled 'non-dairy.'" The Natural flavor contains only 0.37% casein; the Chocolate, Carob, and Natural Light flavors do not contain casein.

9023. Stube, Christine. 1989. A better way to advertise: Dairy processors discover the effectiveness of touting their products against the next guy's. *Dairy Foods.* March. p. 33, 37.

• ***Summary:*** Comparison advertising ("my product is better than yours") is the preferred method for Soyco Foods, maker of Soymage natural cheese alternative. "Soyco developed its 'sour-cream-style' Soymage and its 'soft-cream-cheese-style' Soyco for the health-conscious who have stopped eating dairy products, says Al Morini, vice president of sales. Although the Soyco products are 100% dairy-free (made with tofu, soy protein isolate and soy oil) they are compared directly with dairy products... Morini stresses that Soyco does not cannibalize dairy sales. 'We're not here to replace the dairy business. We're picking up the consumers who stopped eating dairy foods... Our research shows that one in every six people has a [health] problem with dairy products,' he adds."

9024. **Product Name:** Cleveland Tofu.
Manufacturer's Name: VitaLite Foods.
Manufacturer's Address: P.O. Box 10, Waynesfield, OH 45896. Phone: 419-568-8638 (TOFU).
Date of Introduction: 1989. March.
How Stored: Refrigerated.
New Product–Documentation: Talk with Charles Meeker of VitaLite Foods. 1992. Feb. 27. This company is owned by Brenda Kitchem, who is actively involved in its daily operations. This product was launched in March 1989. At the time they purchased the product name from Brooks Jones of Cleveland Tofu Co. VitaLite still makes this brand.

9025. Severson, Richard K.; Nomura, A.M.Y.; Grove, J.S.; Stemmermann, G.N. 1989. A prospective study of demographics, diet, and prostate cancer among men of Japanese ancestry in Hawaii. *Cancer Research* 49(7):1857-60. April 1. [34 ref]
• ***Summary:*** This study of 7,999 Japanese Hawaiians, followed for 18-21 years, found that tofu consumption lowered the risk of prostate cancer more than any other dietary factor studied. Men who consumed tofu five or more times per week were 65% less likely to develop prostate cancer compared to men who consumed tofu once per week or less.

Note: This is the earliest document seen indicating that consumption of tofu lowers the risk of prostate cancer. Address: Japan-Hawaii Cancer Study, Kuakini Medical Center, Honolulu, Hawaii 96817.

9026. Spitzler, Andrew C. 1989. Tasty tofu tailored to tempt trier's tongues: Silver Spring pair test market new dishes for national campaign. *Washington Business Jouranl* (*McLean, Virginia*). April 3. p. 1, 33.
• ***Summary:*** Edward H. Walker and Andrew J. Wilks (shown in a photo) of Tofoods hope to make tofu into a household and institutional dietary staple. "Tofu is often ridiculed as being rubbery, tasteless and just plain unappetizing...

"Tofoods is seeking about $2 million in venture capital to market its products to retailers and institutions such as hospitals and elderly service organizations. So far, the two partners have commitments for $500,000... The idea for Tofoods came to Walker and Wilks while they were co-managing a restaurant at a health resort in the Catskills...

"The pair raised $300,000 from friends, family and themselves, relocated to Silver Spring and formed Tofoods in 1986. During 1986 and 1987 they test-marketed the frozen dinners they had developed. People responded well to such frozen entrees as sweet and sour tofu, tofu teriyaki and barbecued tofu. Tofoods sold $100,000 of their products in 44 states, mostly in kosher and natural food markets." One company watching Tofoods progress is 50-year old Worthington Foods Inc. of Worthington, Ohio, the largest manufacturer and distributor of soyfoods in the USA, with $50 million is sales last year.

• ***Summary:*** Monofilament proteinaceous or polysaccharide fibers are dispersed in an aqueous vegetable protein extract from which is coprecipitated a fibrous tofu curd. Address: 1-2. Worthington, Ohio; 3. Powell, Ohio.

9029. Beamonte, Ignacio. 1989. Proteinas de Noroeste plans for soymilk and tofu in northern Mexico (Interview). *SoyaScan Notes.* April. 10. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Ignacio presently runs two businesses (Si Products harvests and sells sea vegetables; Alimacro sells macrobiotic foods) and plans to start a third, Proteinas de Noroeste, in Ensenada, Mexico just south of the California border. He recently purchased a soymilk system from Gary Stein of San Diego Soy Dairy. He plans to sell his soymilk mostly in Mexico (half gallon containers, with seaweed and barley, get a 15-day shelf life) and also to import Tetra Pak soymilk from the USA. He also plans to make tofu and tofu products.

We talk again on 1 May 1990. He hopes to have his first soyfood products on the market by the end of this year. Soymilk will be his main product, followed by tofu and some okara products. Address: Apdo Postal 1073, Ensenada, Baja California Norte, Mexico. Or P.O. Box 1740, San Ysidro, CA 92073.

9030. Thompson, Jay. 1989. Early work with tofu at Rochester Zen Center (Interview). *SoyaScan Notes.* April 11. Conducted by William Shurtleff of Soyfoods Center. [1 ref]
• ***Summary:*** "The Zen Center of Rochester was founded by Kapleau roshi in 1966. In about 1974 we started by importing tofu from Toronto. I would go to a Korean [Chinese?] shop named Yet Sing at #11 Baldwin Street. It looked like a normal residential home near a popular dress store named Morningstar. But when you descended to the basement it looked like a scene out of Dante's inferno. Everybody had hip boots on. There was ankle deep water, steam everywhere, and you could just see these laboring bodies through the mist. It seemed like there were 20-30 people in the basement working very hard. You had to clamber over huge bags of soybeans on pallets. No one

© Copyright Soyinfo Center 2013

spoke English. You used fingers with the front man to say how much you wanted. They only had one product as far as I could tell. I carried the tofu away in about eight number 10 cans filled with water. I would take the bus back across the Canadian border and many a time I was given a hard time by the customs officials. I hauled tofu down from Toronto once or twice a month for several years. When Zen students from Toronto came down for sesshin, we always asked them to bring tofu. One reason we wanted to start making our own tofu was that this trip was so difficult."

Jay first got in touch with William Shurtleff when he read a small letter Shurtleff had written to the *East West Journal* (15 June 1975, p. 3). In about August 1975 he wrote Shurtleff in Japan and got back a typed sheet describing how to make tofu on a home scale. In a second letter he requested instructions for making tofu on a larger scale.

"We made tofu in the kitchen a few times, realized we couldn't make enough at that scale, then used the instructions to build a small shop in the basement of Zen Center. We got a beam with a weight on it for pressing, installed a candy stove and a big pot. Greg Mello built the shop. Being in charge of the kitchen, and since this was a kitchen project, I was actively involved. Mello and Greg Weaver eventually took that small shop to a larger shop on North Goodman Street. The basement shop existed for several years. Once the commercial shop began, our kitchen bought tofu from them rather than making it ourselves. Mello left the Zen Center staff when the tofu shop went commercial. Andy Schecter and Norman Holland soon joined the shop.

"There were two favorite ways of serving tofu at the Zen Center: Tofu with Tahini Sauce, and Tofu Sticks, which were somewhat like fish sticks, make by baking breaded tofu, then serving it with tartare sauce." Address: Rochester, New York. Phone: 716-275-6779 Office.

9031. Thompson, Martha Gifford. 1989. Early work with tofu at Rochester Zen Center (Interview). *SoyaScan Notes.* April 11. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** The staff of 30-50 people in the Zen Center kitchen prepared strictly vegetarian meals. Kapleau roshi at that point had a dairy allergy, so very few dairy products were used in the meals. The diet was almost a vegan one. The Toronto Zen Center, was an affiliate group nearby in Canada. In Toronto, which has a large Asian population, were at least three tofu shops: one very small family-run Korean shop on Baldwin Street (which is no longer there), one on Avenue Road (perhaps Chinese run), and a third on Dundas Road. A member of the kitchen staff would make the 2½ hour trip to Toronto, go the shop on Baldwin Street (which had no name) to buy tofu. "The first room was stacked to the ceiling with soybeans. Down in the basement were many people slogging around making tofu. It was quite a scene, and nobody spoke any English. At that point we realized that we could make tofu ourselves. The trip to Toronto was always a hassle. You always got stopped at the border; they always thought you were smuggling something. Jay Thompson took the lead in setting up tofu making facilities. Kapleau roshi was very excited about and supportive of the project, in part because he had practiced for so long in Japan, and in part because he likes projects, right livelihood, and soyfoods. Once the shop was set up in the basement, we also made a lot of soymilk, yuba, and soy yogurt, and served spicy curds; we tried everything! The tofu shop of course never received any financial support from Zen Center." Address: Rochester, New York. Phone: 716-461-5388 Home.

9032. Griffin, Jasmine. 1989. Grammy Award winners launch new business venture in Orlando. *Times* (*Orlando, Florida*). April 12.

• ***Summary:*** "Grammy Award winners William Guest and Edward Patten unveiled a new frozen dessert. NJOY, a non-dairy alternative to ice cream, is the premiere product of American Tofu, a Michigan-based company. Guest and Patten of Gladys Knight and the Pips, along with Aubrey Bell of Minneapolis, Minnesota, are principal owners.

"The surprisingly good-tasting treat will be available in five flavors; vanilla, chocolate, berry, banana/strawberry, and peanut butter/chocolate fudge... Borden's Dairy Division will be handling the production and distribution of NJOY locally.

"The average ice cream lover will be hard-pressed to distinguish NJOY from quality ice cream. The tofu-based dessert is lactose-free, cholesterol-free, low in sodium, and vitamin enriched.

"NJOY was created out of a personal need, said Aubrey Bell, product developer and one of the founders of American Tofu. 'I can't tolerate milk or milk products.'...

"With the help of the Stroh's Brewery, American Tofu test-marketed NJOY in the Detroit area...

"After gauging the success of the ice cream, American Tofu will introduce other non-dairy desserts including cheese cake, yogurt and pies. A soft-serve version of NJOY is already available at the Orlando International Airport...

"American Tofu is preparing to establish offices in the Orlando area within a matter of weeks."

9033. Harrison, Gilford R. 1989. Why haven't soyfoods caught on Latin America? (Interview). *SoyaScan Notes.* April 17. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** There have not been any really successful commercial soy products in Mexico. Everyone has been very disappointed in the lack of success of soy protein products. Its extremely bad. The food companies in this field have not changed much since 1975, except that some of the pioneers are no longer in business. Still in business since 1978 are Maisoy (Pedro Bleyer) in Bolivia, Industrias Almenticias Noel in Colombia, Alimentos S.A. in Guatemala, and

© Copyright Soyinfo Center 2013

Proteinal in Venezuela. Grasas S.A. in Buga, Colombia no longer makes soyfoods. They invested heavily in a Wenger X-200, the biggest extrusion cooker they make. They suffered heavy losses making a textured soy flour hamburger extender. Actually they are still in existence and still using the Wenger, but they are using it to make animal feeds and pet foods like dog food. In Mexico, NUTRIMEX, which belongs to ALBAMEX (the animal feed company), makes textured soy flour, but they are not doing well.

The main problems seem to be with consumer retail products; these are image problems and regulations which prohibit the use of soy extenders in meat, except in institutions. The greatest successes have been with institutions. The most successful company in Mexico has been Industrial de Alimentos in Mexico City, started by Felipe Suberbie Sr. and now run by his son, Felipe Jr. They had the first soy flour plant in Latin America, started in about 1970, with a Wenger X-25. They developed the famous malted full-fat soy flour, based on soybeans which are sprouted for 3-4 days, then cooked and dried. They just barely survived for the first 10 years, but when young Felipe came in and they shifted from retail to institutional products, they first started to make money. Now they have gotten out of the retail business entirely and has finally registered (with the Mexico Health Dept.) a textured soy protein product named Don Chano. He sells it in bulk to institutions as a meat extender or replacer. The company is now doing very well.

The American Soybean Association Human Nutrition Center has been renamed Technical Assistance Center; they will try to improve the image of soy. There are hundreds of little "soya stores" all over Mexico, as in the metro stations. They use soya to attract people but they sell everything but soy! If you're lucky they may have a little lecithin, whole soybeans, and textured soy flour which is purchased in bulk and repackaged in cellophane bags. The health authorities refuse to allow anyone to *advertise* soy products as a substitute for regular food, such as meat. They are afraid to open the gates to unscrupulous people who would use large amounts of low-cost soy to extend expensive meats, but mislabel and misadvertise the products. It is too difficult to test the level of soy protein in other foods. Things haven't really changed much since 1981. The key is to create a new image and start using soyfoods as foods in their own right, rather than as extenders or replacers. ASA spent years trying to get tofu accepted in Mexico, but only Japanese restaurants were interested. The big CARE project in Costa Rica (run by Justin R. Jackson), which was making 14 different products using Brady extruders, has just closed. It was not cost effective and demand for their products had been disappointing. Carla Weaver has set up a company in San Jose, Costa Rica, named ExiTex that imports soy products to Central America. She represents American manufacturers that are exporting those products. Address: American Soybean Assoc., Division manager, Latin America, St. Louis, Missouri.

9034. Rose, Richard. 1989. Re: Personal observations on soyfoods at Natural Foods Expo in Anaheim, California. Letter to William Shurtleff at Soyfoods Center, April 19. 1 p. Typed, with signature on letterhead.

• ***Summary:*** "Nothing was especially noteworthy this year. Mandarin Soyfoods and Turtle Island had booths for the first time and were moderately well-received. Luke Lukoskie of Island Spring shared a booth with Kathryn Bennett and her Mexican food. White Wave had 2 booths and an expanded product line, including dressings, hot dogs, and cheese.

"Did you know that Yves tofu hot dogs are being served this year at Candlestick Park! Health Valley is the U.S. distributor of the hot dogs.

"Golden Soy Foods, Nasoya, Quong Hop and Sonoma Specialty Foods had no booth this year. Tomsun Foods shared a booth with their Los Angeles distributor. Jofu is back, but still needs improvement.

"Soymage sour cream was shown. It has no casein but does have soy protein isolates along with tofu. It was mediocre. However, Soya Kaas cream cheese with casein was absolutely awful, with poor flavor and mouthfeel. Cholesterol and organic was very big at the show. The Soyfoods Pavilion was indistinguishable, with only a banner up high at one end. Within the 'pavilion' was The Book Publishing Co. and Kashi (no soy), and about 1 or 2 other non-soy exhibitors.

"Gordon Bennett said the SAA board hired a part-time secretary to handle its affairs. She has an office next door to Golbitz. SAA will have more money this year and more programs. Ask the new secretary for a copy of the minutes." Address: President, Rose International, P.O. Box 2687, Petaluma, California 94953-2687. Phone: 707-778-7721.

9035. **Product Name:** High Quality Soya Paneer.
Manufacturer's Name: Amrit Protein Foods.
Manufacturer's Address: Ghaziabad, Uttar Pradesh, India.
Date of Introduction: 1989. April.
Ingredients: Soybeans, water, coagulant.
New Product–Documentation: Article in *Times of India* (The). 1988. Nov. 22. "City notes: Amrit Protein." p. 11. Amrit Protein Foods is a company promoted by Amrit Banaspati. The company has purchased its soymilk manufacturing system from STS–Soya Technology Systems–a division Danish Turnkey Dairies.

The project is expected to start commercial production by April 1989 according to Mr. N.K. Bajaj, chairman.

9036. Asano, Mitsuo; Okubo, K.; Yamauchi, F. 1989. Tônyû no hinshitsu ni oyobosu nama shibori ondo no eikyô [Effects of squeezing temperature on the quality of soymilk]. *Nippon Shokuhin Kogyo Gakkaishi* (*J. of the Japanese Society of*

© Copyright Soyinfo Center 2013

Food Science and Technology) 36(4):318-24. April. [16 ref. Jap; eng]
• ***Summary:*** Traditionally soymilk was pressed from the ground soybean slurry at a low temperature, but today this step is usually eliminated when making tofu. Yet tofu prepared in this traditional way was thought to be preferable to that made in the modern way. "In order to make optimum temperature clear, the effects of squeezing temperature on yield, viscosity, glycoside content, lipoxygenase activity and n-hexanal level of soymilk from the cotyledon and the whole bean were examined. A yield as solid was maximum in soymilk squeezed over 30ºC from the cotyledon and at 60ºC from the whole bean. Viscosity of soymilk significantly decreased with increasing temperature and showed a minimum value at 60ºC. A glycoside content as solid increased in soymilk squeezed above 50ºC and was approximately 2.6 times higher in soymilk at 95ºC than at 20ºC. The lipoxygenase activity, which is the major cause of undesirable flavor of soymilk, decreased in soymilk squeezed over 70ºC. n-Hexanal, which was produced by lipoxygenase, was about half in soymilk squeezed at 60ºC as compared with 20ºC. Accordingly, optimum squeezing temperature on soymilk and tofu processing was recommended in range of 50-60ºC." Address: Faculty of Agriculture, Tohoku Univ., Amamiya-machi, Tsutsumi-dori, Sendai-shi, Miyagi 980, Japan.

9037. Baer, S. 1989. Erfahrungen mit Sojaprodukten in der Schweitz [Experiences with soy products in Switzerland]. *Deutsche Milchwirtschaft.* April. p. 114-15. [Ger]
• ***Summary:*** This article is about fresh soy products in Switzerland. In 1985 Migros and Coop entered a market which had previously seemed very limited, occupied only by small, counterculture tofu shops. In 1986 tofu was successfully launched under the Weight Watchers trademark. During that year tofu got extensive coverage in the Swiss press and many new second-generation products were launched. Many people tried tofu products for the first time, and a tofu boom resulted in a bright outlook. Address: Baer Weichkaeserei AG, Bahnhofstrasse, CH-6403 Kuessnacht, Switzerland. Phone: 041-81-4444.

9038. **Product Name:** Tofulite Bars (Non-Dairy Soy Ice Cream Novelty) [Vanilla Dipped in Dark Chocolate with Almonds].
Manufacturer's Name: Barricini Foods Inc.
Manufacturer's Address: 48 Old Bloomfield Ave., Mountain Lakes, NJ 07046. Phone: 800-431-5030.
Date of Introduction: 1989. April.
How Stored: Frozen.
New Product–Documentation: Press release. 1989. April. 3. "Loft's Tofulite announces the addition of a Vanilla Tofulite Bar." Barricini now has 4 bar flavors. "Tofulite is distributed through the Haagen-Dazs Co., Inc. and a nationwide network of distributors and sub-distributors."

9039. Brown, Judy; Bates, Dorothy R. 1989. Judy Brown's guide to natural foods cooking. Summertown, Tennessee: The Book Publishing Co. 160 p. Index. With 8 pages of color photos. 23 cm.
• ***Summary:*** This natural foods, vegan cookbook, which does not require the use of dairy products or eggs, includes more than 200 recipes, many of which contain soyfoods. In the chapter titled "The Natural Foods Pantry" is a sub-chapter titled "Soy Foods," which gives brief introductions to tofu, tempeh, miso, soy milk, soy cheeses, soy yogurt, soy flour, and soy pulp or okara. There are also sub-chapters on sea vegetables, sprouts (including soy sprouts), organic foods, macrobiotics (which is "heavily emphasized in this book"), more natural foods ingredients (which, under soy sauce, discusses the differences between shoyu and tamari).

The number of recipes featuring various soyfoods are: Tofu (15), tempeh (5), miso (4), soymilk (1), shoyu (1), and okara (1; soysage).

The author, a specialist in consumer education, presently organizes culinary carnivals and natural foods tasting fairs. She has written extensively on natural foods and holds a Master's degree in Consumer Economics from the Univ. of Maryland. She is president of Judy Brown Enterprises, a public relations company for natural foods products. Address: 9 Dovetree Court, Indian Head, Maryland 20640. Phone: 301-753-6548.

9040. Brown, Judy. 1989. Spreading the word about selling tofu dips and dressings–Health concerns are key. *Soya Newsletter* (*Bar Harbor, Maine*). Jan/April. p. 8-9, 18-19.
• ***Summary:*** Discusses the four major manufacturers of these products (Nasoya Foods, Golden Soyfoods, Island Spring, and White Wonder), and each of the products themselves. Most companies downplay the presence of tofu in the products. Nasoya changed the name of their product from Nasoyanaise to Nayonaise to take the word "soy" off the label. Selling nutritional benefits (little or no cholesterol, reduced calories and sodium and fat), not tofu, and good packaging are two keys to success. Address: Maryland.

9041. **Product Name:** Texas Tofu (Vacuum Packed in a Box).
Manufacturer's Name: Energy Sprouts.
Manufacturer's Address: 3602 High Point, San Antonio, TX 78217. Phone: 512-654-3963.
Date of Introduction: 1989. April.
Ingredients: Soybeans, water, calcium sulfate (a natural mineral).
Wt/Vol., Packaging, Price: 16 oz vacuum pack inside a 4-color box.
How Stored: Refrigerated.
Nutrition: Per 2 oz.: Calories 41, cholesterol 0, calcium 71

© Copyright Soyinfo Center 2013

mg, carbohydrates 1.3 gm, potassium 24 mg, protein 4.5 gm, fat 2.3 gm, iron 1.1 mg, sodium 4 mg.
New Product–Documentation: Talk with Bob Phipps. 1988. Sept. 22. In August he received a $192,000 loan to expand his sprout business to include tofu production. He plans to have these three products on the market by November (Thanksgiving), 1988. Previously he has distributed tofu made by Banyan, but he feels their quality is declining. He will probably get his tofu and soymilk system from Sun Youth Machinery Co. in Taiwan via Bean Machines. They have a 4-color tofu equipment catalog featuring stainless steel equipment. They say they are a subcontractor for Takai and they make excellent bean sprout equipment. The population of San Antonio is mostly Hispanics; its hard to sell healthy foods.

Talk with Bob Phipps. 1989. Feb. 27. Most of his tofu customers will be Vietnamese. They like a firmer tofu. He had problems earlier with his tofu not coagulating. The cause: His thermometer was off by 10ºC, so he was cooking his milk at much too high a temperature. Talk with followed by letter and labels from Tracy McFadden, marketing specialist at Energy Sprouts. 1989. July 20. Their tofu was launched as Texas Tofu in about April 1989. It is sold in a box with a cartoon on it. The company has not yet started to work on the soymilk or tofu burgers. But they do send out a recipe booklet, have a videotape on how to prepare lasagna with Texas Tofu that they rotate to stores (where it doubles sales to 8 from 4 cases/week average), and their tofu was certified organic on 23 June 1989 by the Texas Dep. of Agriculture. Label. 1989. 6 by 4.25 by 2 inch high box. Full color outer stiff paper box. On the front panel a cartoon cowboy asks "What the heck is tofu?" Slogans: Delicious recipes–quickly prepared. No cholesterol. Sodium free Low calorie. No preservatives. On the back and one side panel the cartoon cowboy asks, "How the heck do I fix tofu?" Under the title "Delicious 20-minute recipes for Texas Tofu" are Lazy Day Lasagna, Easy Enchiladas, Texas Rice Pudding, and Wake-up Drink (with frozen banana and orange juice). One another side the cowboy asks, "How the heck do I store tofu?" (refrigerated or frozen). On one end panel he asks, "Why the heck should I eat tofu?" Nutritional composition is given.

Talk with Bob Phipps. He is now making a firm, vacuum-packed tofu and sales are excellent. He sells 2,400 boxes (each 1 lb) a week plus another 600 lb/week in bulk to restaurants. An estimated 75% of the box buyers are Caucasian Americans. Asian Americans want a water pack product so he also distributes such a product made by Banyan. He is happy with the quality and price of his all-stainless steel tofu system from Sun Youth in Taiwan but their written materials are useless, terrible. They don't seem to know anything about making tofu. Their specialty is bean sprouts. Talk with Bob Phipps. 1989. Sept. 20. He is very glad that he went with vacuum packaging; no problems with the Multi-Vac $12,0000 double-chamber machine that he bought through Cryovac. Almost no leakers. One man can package 6 cakes/minute. The main advantage of vacuum packaging is that first-time tofu users are not turned off by a cake tofu floating in a pale yellow liquid. Vacuum packing make tofu look rather like cheese. He dates his tofu for a 21-day shelf life.

9042. Flinders, Carol. 1989. Tofu and tempeh: Back to basics. *Vegetarian Times.* April. p. 76, 78-79.
• ***Summary:*** An introduction with six recipes. Address: Petaluma, California 94952.

9043. Golbitz, Peter. 1989. Soyfood releases down 37% from 1987: 1988 new product count. *Soya Newsletter* (*Bar Harbor, Maine*). Jan/April. p. 3.
• ***Summary:*** According to Soya Newsletter's figures, only 137 new soyfood products were released in the USA in 1988, compared with 217 in 1987. 70 new products (51%) contained tofu as the main soyfood ingredient. Soy sauce was the next most popular ingredient, used in 24 new items or 18% of the total. A bar chart is shown comparing 9 product categories in 1988 and 1987.

According to similar figures gathered by the Soyfoods Center, 220 new products were released in the USA in 1988, compared with 418 in 1987, a 47% drop. Address: Soyatech, Bar Harbor, Maine.

9044. **Product Name:** Mandarin Soyfoods Tofu Patties, Tofu Patties with Cheese, or Garden Patties.
Manufacturer's Name: Mandarin Enterprises Ltd.
Manufacturer's Address: 11031 Bridgeport Rd. #107, Richmond, BC, V6X 3A2, Canada.
Date of Introduction: 1989. April.
Ingredients: Garden Patties: Tofu (organically grown soybeans, water, magnesium chloride [purified nigari]), soybean fibre [probably okara], soy grits, fresh onions, fresh carrots, fresh celery, fresh green peppers, whole wheat flour, sunflower oil, crushed tomatoes, sesame seeds, hydrolysed plant protein, seasoning, sea salt, spices.
Wt/Vol., Packaging, Price: 2 patties. 170 gm (6 oz). Pinched ends box.
How Stored: Refrigerated or frozen.
Nutrition: Garden Patties: Per 100 gm.: Calories 173, protein 22.5 gm, carbohydrates 17.6 gm, fat 2.2 gm, dietary fiber 3 gm, sodium 650 mg, potassium 300 mg.
New Product–Documentation: Leaflet. 1989. April. "New. Introducing... Mandarin patties. Three savory varieties. Prepared with tofu and garden-fresh vegetables, Mandarin Patties are ready to eat in just 5 minutes. So easy to prepare: bake, broil or fry, pop in a pita, bagel, burrito, baste or bar-b-que... Mandarin Enterprises has been making quality soyfoods in Canada since 1976." Shows color illustrations of a patty in burger buns, and each of the three packages. Each

© Copyright Soyinfo Center 2013

package contains 2 patties and has the name in French along the bottom.

Soya Newsletter. 1989. May/June. p. 8.

Leaflet (8½ by 11 inch, glossy color, front and back) sent by Richard Rose from Natural Products Expo East. 1989. Sept. "Introducing Mandarin Patties Three savory varieties: Tofu Patties. Tofu Patties with Cheese. Garden Patties." A color illustration shows the front panel of each package.

Labels for all 3 products sent by Gerry Blanchard. 1992. Jan. 22. 7 by 5.5 inches. Paperboard sleeve. Illustration of a tofu burger with trimmings between buns, surrounded by a tomato, green pepper, celery stalk, and sliced onion. "Ready in 5 minutes. Prepared with tofu, savoury herbs & vegetables. Cholesterol free. Microwaveable. Heat and serve." Called "Pâtés Jardinières" in French.

Two leaflets for all 6 Mandarin patties also sent. One shows a huge illustration of a burger with the 6 packages below it. The other shows the six packages lined up in a typical produce case.

9045. Morinaga Nutritional Foods Inc. 1989. The importance of packaging (Ad). *Produce News* (*Fort Lee*, *New Jersey*). April. Insert.

• ***Summary:*** This full-page color ad shows a well-built (well packaged), lovely smiling woman, Marcia Levine, dressed in a chartreuse, two-piece knit workout suit with an open midriff. Her left hand is behind her head, holding her hair, and her right hand is holding a carton of Mori-Nu tofu next to her right temple. The pose and angle emphasize that she has large breasts. Marcia is featured in Gold's Gym Personal Trainer Workout videos, one of which is shown beside her photo with a carton of Mori-Nu tofu. "And now Mori-Nu is proud to sponsor a new two-tape video package for the world famous Gold's Gym. These exercise tapes will give health-conscious people everywhere first-hand instruction on how tofu blends deliciously into a total fitness program.

"Stock up on the tofu that combines trade support, national advertising, consumer education and guaranteed

© Copyright Soyinfo Center 2013

customer satisfaction into one profitable package. Call 1-800-NOW-TOFU for Mori-Nu today."

On the back of this ad is a trade produce ad titled "How does your tofu stack up?" It shows cartons of each of the three types of Mori-Nu Tofu stacked one atop the other. The "stack up" was intended to have 2 meanings. First, can you stack up water packed tofu this neatly. Second, how does it stack up or compare on a number of key points.

According to Art Mio (1990 March 9), the two appeared as an insert in Produce News, and made a big hit. Art notes: "I love the ad myself. We got produce buyers all over the country with the ads tacked up on their bulletin boards." Danielle Lin needed an insert for several of her health food distributors. But when she sent them this back-to-back ad they would not insert it into their monthly flyer–creating a minor scandal. This ad may have also appeared as an insert in *The Packer.* Address: 5800 South Eastern Ave., Suite 270, Los Angeles, California 90040. Phone: 213-728-4325.

9046. **Product Name:** Rosewood Farms Tofu-Rella (Soy Cheese with Casein) [Monterey Jack Style].
Manufacturer's Name: Rosewood Products Inc.
Manufacturer's Address: 738 Airport Blvd., Suite 6, Ann Arbor, MI 48108. Phone: 313-665-2222.
Date of Introduction: 1989. April.
Ingredients: 51% real tofu, soy oil, casein*, sea salt, citric acid, lecithin, natural flavor, guar gum.
Wt/Vol., Packaging, Price: 12 oz.
How Stored: Refrigerated.
New Product–Documentation: Photocopy of Label. 1989. April. "The cheese alternative. No cholesterol. All natural. *Casein is the protein in nonfat milk. It is free of cholesterol and rennet and is what allows this product to be so similar to cheese."

9047. Shurtleff, William; Aoyagi, Akiko. comps. 1989. Bibliography of soya in Canada: 633 references from 1855 to 1989. Lafayette, California: Soyfoods Center. 112 p. Subject/geographical index. Author/company index. Partially annotated. Printed April 22. 28 cm. [633 ref]
• ***Summary:*** This is the most comprehensive bibliography ever published on soybeans and soyfoods in Canada. One of more than 40 bibliographies on soybeans and soyfoods published by the Soyfoods Center, it lists all known documents (both published and unpublished) and commercial products in chronological order, making it a powerful tool for understanding the subject from an historical point of view from its earliest beginnings. 67% of all records (and most of the current records) contain a summary. An analysis of the composition of this bibliography (by language, document type, year, leading countries, states, and organizations) and details on how to use the bibliography are also included. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

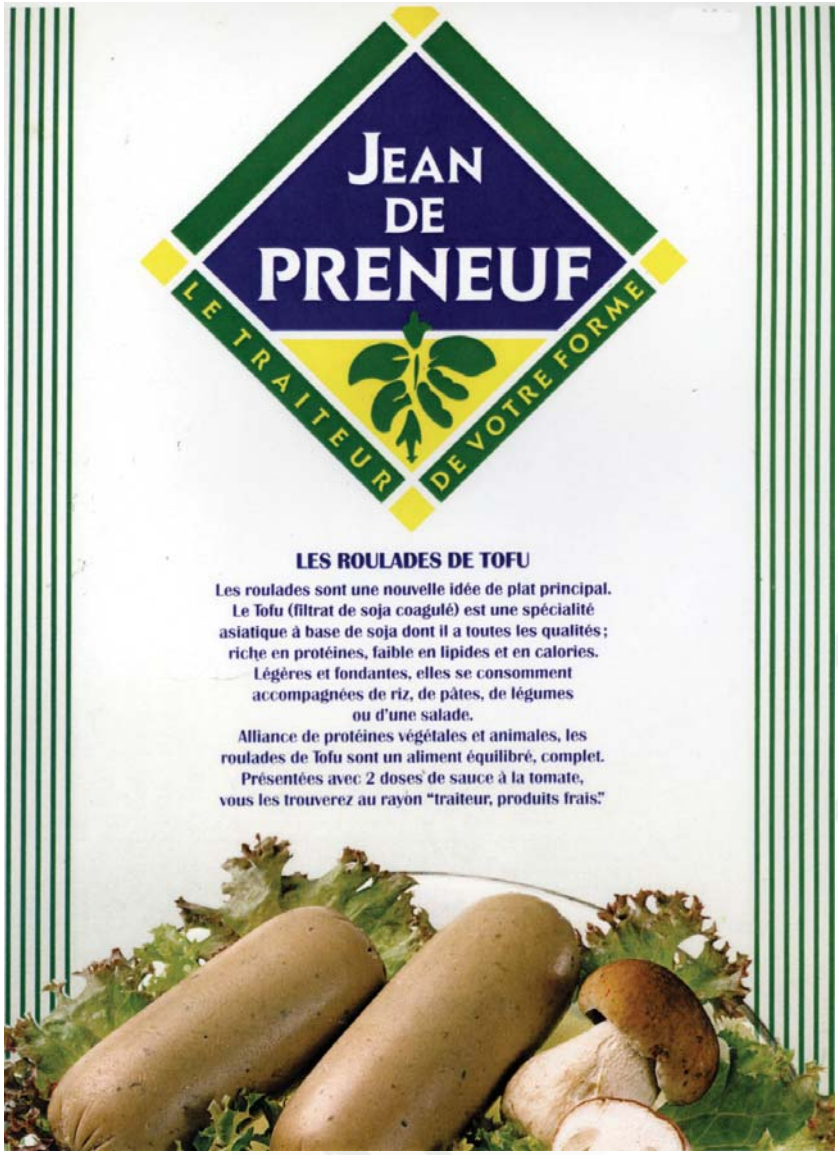
9048. **Product Name:** [Jean de Preneuf Tofu Sausages (With Boletus Mushrooms, Comté Cheese, Smoked Salmon)].
Foreign Name: Jean de Preneuf Roulades de Tofu (Aux Cèpes, Au Compté, Saumon).
Manufacturer's Name: SOY (Société Soy).
Manufacturer's Address: 1 rue du Crêt de la Perdrix, 42400 Saint-Chamond, France. Phone: 77.31.24.42.
Date of Introduction: 1989. April.
Ingredients: Mushroom: Fresh tofu (water, soybeans*), boletus mushrooms (3%), sunflowerseed oil, egg white, wheat flour, spices, aromatics, salt. * = Organically grown (Issu de l'agriculture biologique). Sauce: Tomato juice, rapeseed oil, carrots, onions, white wine, spices and aromatics, vinegar, starch, salt.
Wt/Vol., Packaging, Price: 225 gm packet containing 4 sausages plus two 12-gm sachets of sauce.
How Stored: Refrigerated, 28 day shelf life.
Nutrition: Mushroom: Per 100 gm.: Protein 13.5%, lipids 10%, carbohydrates 2.8%, calories 648 Kj.
New Product–Documentation: Leaflet. 1988. Front and back. 4 color with photo of mushroom sausage on front. This line of 9 sausage products contains 3 groups: those containing vegetables (13.5% protein), cheese (14% protein), or seafoods (fruits de mer; 15% protein). Label. 1988, undated. 2.5 by 8 inches long by 2 inches deep. Glossy card stock, with 4-color printing. Photos on front and back of the sausages with mushrooms or salmon. "New. With 2 packets of sauce. Gourmet foods for your fitness (Le traiteur de votre forme)." A very innovative concept with excellent packaging and promotion. Letter from Bernard Storup. 1989. March 3. These products are the same as Tofinelle but under a different name for a different market. There are only three varieties, and they will be launched in April 1989, at the same time as three other lines (same products with other names and packaging to come).

Note: In French, the term "traiteur" combines the English terms "caterer" and "delicatessen," but with more of a gourmet, high class, and expensive feeling. It is very prestigious to be a "traiteur." However in this case there is also the allusion to the French verb "traiter," which means "to treat or take care of." The company is thus trying to say, "We will take good care of your fitness with gourmet food."

Spot in SoyaFoods. 1991. Spring. p. 5. "Tofu Roulades." They are packed in a barrier package that can "breathe" to ensure natural preservation of the product. The company name is given as "Jean de Preneuf."

9049. **Product Name:** [Pasta with Tofu (Ravioli)].
Foreign Name: Pasta al Tofu (Ravioli).
Manufacturer's Name: SOY (Société Soy).
Manufacturer's Address: 1 rue du Crêt de la Perdrix, 42400 Saint-Chamond, France. Phone: 77.31.24.42.

© Copyright Soyinfo Center 2013



Date of Introduction: 1989. April.
Ingredients: Pasta: Whole hard wheat* semolina. Filling: Tofu (water, soya*), whole hard wheat* semolina, Parmesan cheese, tomato pulp*, fried onions, unrefined palm oil, spices and aromatics, sea salt. * = Organically grown.
Wt/Vol., Packaging, Price: 250 gm.
How Stored: Refrigerated.
Nutrition: Per 100 gm.: Calories 258, protein 13 gm, carbohydrate 38 gm, fat 6 gm.
New Product–Documentation: Form filled out by Bernard Storup for Anthony Marrese. 1989. Nov. "This product was launched in April 1989. The ravioli are made by another company (a pasta company), but filled with our tofu."Label. 1989. 3 by 5.5 inches. Green, red, brown, blue, and yellow on white. Self adhesive. Illustration of an Italian villa. "Add to 1.5 liters salted boiling water and cook for 15 minutes." The Nature et Progres logo is shown.

9050. **Product Name:** [Thai Spring Rolls {With Tofu}].
Foreign Name: Thailande Soynem.
Manufacturer's Name: SOY (Société Soy).
Manufacturer's Address: 1 rue du Crêt de la Perdrix, 42400 Saint-Chamond, France. Phone: 77.31.24.42.
Date of Introduction: 1989. April.
Ingredients: Rice cakes, sunflowerseed oil. Filling: Tofu (water, soya* 20%), carrot, onion, black Chinese mushrooms, rice vermicelli, soy sauce. * = Organically grown.
Wt/Vol., Packaging, Price: 160 gm.
How Stored: Refrigerated.
New Product–Documentation: Form filled out for Anthony Marrese by Bernard Storup. 1989. Nov. The product was launched in April 1989.

Label. 1989. 3 by 5.35 inches. Red, green, black, orange, yellow, and blue on white. Illustration of a Thai-like wooden sailing vessel in front of a large sun and palm trees. "The soya epicure/gourmand." *Nem* is the Vietnamese word for "Spring Roll."

9051. Soyco Foods. 1989. Soyco: The soy cheese with great taste (Leaflet). New Castle, Pennsylvania. 3 panels each side. Each panel: 22 x 9 cm.
• ***Summary:*** Describes the product (it contains no cholesterol or lactose), its ingredients, and flavors. Five color photos show dishes prepared with the product. Compares nutritional composition with American processed cheese. Soyco has 70 calories, 8 gm or protein and 140 mg of sodium per ounce compared with 12, 6 and 410 respectively for processed cheese. Address: P.O. Box 5204, New Castle, Pennsylvania 16105. Phone: 800-441-9419 or 412-656-1102.

9052. *Sunset* (*Menlo Park, California*). 1989. In Sichuan, mild tofu meets aggressive seasoning. 182:202. April. *
• ***Summary:*** Contains recipes.

9053. Toriano, Peter. 1989. Japanese food firms cook up new strategies for U.S. consumers. *Economic World.* April. p. 22-26.
• ***Summary:*** "Riding the success of tasty, low-priced food products, the Japanese eye a bigger helping of the U.S. grocery mart." Two of the most popular Japanese food products have been soy sauce, ramen noodles, and tofu. "Nissin sold more Cup O'Noodles in the United States last

© Copyright Soyinfo Center 2013

year than McDonald's sold hamburgers nationally... Japanese food companies and food products are slipping under America's door unnoticed... The Japanese start selling their food products in the U.S. to a small, very concentrated ethnic market... While Kikkoman can trace exports of soy sauce to the U.S. as far back as 1869, most Japanese food companies did not export to or manufacture products in the United States in significant quantities until the 1970s...

"American food product companies focus on their competitors, whereas the Japanese tend to focus on what the customer wants...

"Kikkoman, one of Japan's largest food-related companies, is involved with wines and liquors, pharmaceuticals, health foods and a chain of restaurants. In addition to its other products, Kikkoman has introduced a shelf-stable tofu, instant miso soup and a rice wine for use in cooking.

"Kenzaburo Mogi, planning manager of Kikkoman's foreign operations department, says tofu could become as big a market as soy sauce for Kikkoman in the U.S. in the years to come. In the U.S., Kikkoman also owns 80% share of JFC (Japan Food Corp.), a major distributor of oriental food products... Consumption of Kikkoman's soy sauce has increased fivefold since 1972... On average, each Japanese consumes about 2.5 gallons of soy sauce every year; the average American consumes less than 10 oz...

"Almost a quarter of Kikkoman's total business now is outside Japan: two-thirds in the U.S. and most of the rest in Southeast Asia. The company also is targeting production in Europe, Australia and China...

"Ajinomoto Co, Japan's largest food processor, has been selling abroad since 1909, when its first overseas office opened in New York... Until the 1960s, Ajinomoto's main product was MSG (monosodium glutamate). Today, it has a more diversified line-up, with about 41% of sales coming from processed foods, and 26% from seasonings... The predominant products the firm manufactures in the U.S. are amino acids for pharmaceutical use...

"Kibun Products International Inc., a subsidiary of Kibun Company Ltd. Japan, is a major manufacturer of surimi in the U.S... Kibun is a multi-billion-dollar, 50-year-old food products company with worldwide operations totalling $2,000 million annually...

"Morinaga Nutritional Foods Inc., a subsidiary of Morinaga Milk Industry Co. Ltd., the Borden of Japan, is selling its tofu in air-tight containers that prolong freshness, eliminate water changes and is bacteria-free...

"'This could be the food of the future, replacing dairy and meat as major sources of nutrition," says Kent Cooper, spokesman for Hakuhodo Advertising America Inc. in Los Angeles, which handles Morinaga's account...

"Faith Popcorn, chairman of BrainReserve Inc., a marketing consulting company to Fortune 500 companies says America is eating healthier and is more and more concerned with where food products originate and what that does to the Earth, known as the graining/greening of America. 'Vegetarianism is growing like crazy. Americans are changing from flesh food to health food.'"

9054. Wood, Rebecca. 1989. Quinoa the supergrain: Ancient food for today. New York, NY: Japan Publications Inc. Distributed by Kodansha International USA/Ltd. 202 p. April. Illust. Index. 26 cm. [51 ref]
• ***Summary:*** Quinoa (pronounced KEEN-wa; scientific name *Chenopodium quinoa* Willd.) originated in the *altiplano,* the high plains of the Andes in Peru and Bolivia. It was called the "mother grain" by the ancient Incas. The protein content of quinoa seeds ranges from 7.5% to 22.1%. The two men most responsible for creating a quinoa market in the USA are Stephen Gorad and Don McKinley of the Quinoa Corporation in Boulder, Colorado.

Note: *Webster's Dictionary* defines quinoa (derived from Spanish, via the Quechua *quinua;* the term was first used in 1625) as "a pigweed (*Chenopodium quinoa*) of the high Andes whose seeds are ground and widely used as food in Peru."

Chapter 8, "All about cooking quinoa," contains many recipes. A number of these use soyfoods, including natural soy sauce or tamari (p. 65): Star canapés with tofu-caper topping (p. 88-89). Noodle salad with fresh soy mayonnaise (with soymilk, p. 110). Tofu, quinoa, and dulse salad (p. 114-15). Sweet and sour quinoa tempeh (p. 129-30). Address: Crestone, Colorado.

9055. Cloud, Jon. 1989. Tofu shops in Ontario (Interview). *SoyaScan Notes.* May 3. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Soy City Foods is the only Caucasian-run tofu manufacturer of the 13 tofu companies in Ontario. The earliest tofu manufacturer he knows was Yet Sing on Baldwin Street, which probably started in the 1960s. They are still in business, but they don't talk much to Caucasians. Pyung Wa is on Baldwin Street.

Some years ago Stephen Yu of Victor Food Products wanted to expand his company. So he sold half of his interest in the company to members of the Rajneesh spiritual community. During the next few years the company didn't make money, so a guy named something like Bodhi-dharma moved in and put pressure on Stephen. Things began to go down hill. A number of his best workers left and started competing companies. T'ang, his foreman, left and started a company in Toronto (John doesn't know the name) that sells only to the Chinese market. Eventually Victor Foods declared bankruptcy. Address: Soy City Foods, Toronto, ONT, Canada.

9056. Ridenour, Jeremiah. 1989. Recent developments at Wildwood Natural Foods (Interview). *SoyaScan Notes.* May

© Copyright Soyinfo Center 2013

4 and 7. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Wildwood is now a distributor, carrying 80 products including about 30 of their own products based on soy, plus amazake, mochi, salsa, rocket cheese, and juices, etc. They claim to be the only full-service distributor in the Bay Area. With their 11 trucks (from Wildwood North) they deliver their own products directly to northern California stores–including Safeway supermarkets–rather than going through the central Safeway warehouse. They stock the shelves, set their own retail prices, have a vendor number in Safeway's computer, have bar codes on some products, yet do all this without paying any slotting allowances. Service and quality are considered to be the keys to success. A number of these products are now in 30 California Safeway supermarkets; the salsa played a key role in getting them in. The company got into its first supermarket about 18 months ago. At the Safeway in Lafayette, California, 9 products are sold in the dairy case, between the yogurt and cottage cheese, and the bacon. In some stores they have 8 feet of shelf space.

"We go in with confidence. We just say 'either we get this or we don't come in. We know your customers want no-cholesterol, low-fat foods, don't they?' And the buyers are forced to agree with us, but they don't even know what we are selling. We tell them 'This is it. This is the best on the market. Its the freshest. We'll deliver. What more can you ask for?' At the Mission Safeway in Santa Cruz, we do about $800 to $900 a week. They have let us put in our own refrigerated case, titled Wildwood Natural Foods, as have two other stores, in premium spots such as right next to the dairy case or end of aisles. We started by getting in anywhere, even in the produce section. Then after we were in, we'd explain that we didn't want to be in produce since it was too warm and was a risk to both parties and consumers. So we asked for 2 feet in the dairy case. When sales were good there we went back and told them, 'Look, we've got this whole line of products.' Some agreed to let us try it; others didn't."

Wildwood can no longer produce all the tofu they need for second generation products, so they buy some tofu from Gary Stein at San Diego Soy Dairy. Wildwood Santa Cruz, Wildwood Fairfax, and Monterey Bay Soyfoods (the tempeh company) are three separate companies. All three use about 350 acres x 30 bu/acre x 60 lb/bu = 630,000 lb/year of Vinton soybeans. They get about 1.6 to 1.8 lb of firm tofu from 1 lb of these soybeans, thus about 20,000 lb/week of tofu. They make only nigari tofu, none with calcium sulfate. Their main problem in making tofu is the curding step. The main variable affecting curding is the soybean variety. Wildwood Santa Cruz has 40 employees, which are the equivalent of 20 full-time employees. A major problem is rapid growth, which they now control by raising prices. There is lots of duplication of managers, equipment, etc. between Wildwood north and south.

Note: Soyfoods Center has heard from a source that asked not to be mentioned that Wildwood's gross sales are presently estimated to be $5 million a year. Two-thirds of that is estimated to come from products the company sells but does not make, such as Mrs. Wiggly's juices, Rademacher's sandwiches, solar tacos, salsa, etc. They try very hard to get an exclusive on everything they distribute. Address: Santa Cruz, California. Phone: 408-476-4448.

9057. Doi, Shuji; Ishige, K.; Ishida, N.; Irie, E.; Matsumoto, Y.; Hatabe, Y.; Takahashi, A.; Inoue, N.; Deguchi, N.; Ozaki, H. Assignors to Meiji Seika Kaisha, Ltd. (Tokyo); Kyushu Nyugyo Company, Ltd. (Ohita); Izumi Food Machinery Company, Ltd. (Osaka). 1989. Process for the manufacture of packaged aseptic soybean curd. *U.S. Patent* 4,828,869. May 9. 13 p. Application filed 8 May 1987. 4 drawings. Application also filed in Japan on 27 Sept. 1986. [8 ref]
• ***Summary:*** A packaged aseptic tofu is prepared by sterilizing dehulled and hypocotyl-removed soybeans with superheated steam, grinding the soybeans in the presence of heated water to prepare a green slurry, filtering the slurry to separate out the soy milk, heating the soy milk to sterilize it and denature the protein content, aseptically adding a coagulant, filling and sealing in an aseptic container, and then heating to effect coagulation in the container. Address: 1-2. Kawasaki; 3-4. Tokyo; 5-8. Ohita; 9-10. Hyogo. All: Japan.

9058. Demos, Steve. 1989. New developments at White Wave, Inc. (Interview). *SoyaScan Notes.* May 13. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** White Wave has just purchased a meat packing house with 23,000 square feet of processing space, fully refrigerated and built for food production, on 2.2 acres on the eastern outskirts of Boulder, on 61st Street, 7 blocks from their present plant. They are paying only $600,000 for the plant plus land; the land alone is valued at $500,000. They will take possession on May 15 and the deal is expected to close in June. They will retain their current 10,000 square foot plant for making ice cream and some new products. So they will be manufacturing in 2 places. Most offices will be at the new facility. In July, they will install an automated tofu system. During Steve's last 2 trips to Japan he has put it together, mainly from Kawanishi Shoko, which is acting as the broker but with a Masuko cooker and processing system (which do not have a heavy dependence on electronics) and Takai roller extractors. The high cost of Japanese yen prevents importation of a turnkey Japanese plant. Within the last 3 months White Wave built its own conveyorized pasteurizer and is now pasteurizing tofu sent long distance.

White Wave's sales for 1988 were up close to 30% over 1987. After-tax profits were down a little due to extensive product development and expansion. On May 15 White Wave will close on a 504 limited placement equity stock offering for $500,000, which will be used solely for new

© Copyright Soyinfo Center 2013

product introduction and development. The banks loaned an additional $500,000 for equipment and also financed the land and building ($600,000).

The company's new soy cheeses (private labeled TofuRella) are well accepted but have had quality control problems; the shelf life is not good. They are made by another company. White Wave's many new products and the upcoming Meatless Healthy Franks and Links are deluging buyers. White Wave products are also being distributed by Wildwood in California. Steve believes Wildwood will come to a point fairly soon where they will have to choose between being a distributor and a multi-product manufacturer. Its too complex and expensive to try to do both.

White Wave is doing well but the stress is enormous on everyone. Their business strategy is to focus on the mass market in their area, with saturation of in-store demos. They will go through the King Soopers warehouse, with no slotting allowance. He will not pay those. "Its cheaper to get your product pulled onto the market by consumer demand from a big PR campaign, than to pay slotting allowances. I have an ethical problem paying $10,000 per facing of slotting allowances. If the product doesn't move within 60 days you've lost all that money." Address: White Wave, Boulder, Colorado.

9059. Camire, Dennis. 1989. U.S., Japan join hands to put tofu on the table. *Detroit News.* May 21. p. A-7, col. 1.
• ***Summary:*** West Lafayette, Indiana. Purdue University's School of Agriculture, Mitsubishi International Corp. and the USDA are working together to create a soybean variety that will make better tofu. Mitsubishi donated about $350,000 for the study. Niels Nielsen, an agricultural geneticist at Purdue, has worked 12 years to develop a soybean whose protein does not have the characteristic off-flavor. It will be crossed with other varieties to come up with the best taste, texture, and color for tofu production. The new soybean is being developed for the Japanese market–not for Americans. This year, Indiana farmers will grow about 5,000 acres of the experimental variety.

In addition, a small tofu manufacturing plant is being established at Purdue, where production is expected to begin next month. The resulting tofu will be taste-tested by Asian students at school and by Japanese managers from a nearby Subaru-Isuzu auto plant. Address: Gannett News Service.

9060. Rickman, Phyllis C. 1989. Tokyo Rose just wants to have fun. *Washington Post.* May 21. p. M35.
• ***Summary:*** This is a review of the restaurant Tokyo Rose (2427 18th St., NW, Washington, DC). This popular Adams-Morgan Japanese restaurant, a place to have fun, "serves four tofu appetizers, one of them *hasamiage*, which two different waiters said 'tastes scary.'" The reviewer accepted the challenge and was broad-minded enough to like it, although it looked like "blintzes in a tofu wrapper."

"Cold tofu, mashed with avocado and raw quail egg, and grilled tofu with natto turned out to be only weird rather than frightening. Tofu almond fry (which seems to be broiled, rather than fried, almond-crusted bean-curd triangles) is, I'm relieved to say, delicious."

Grilled clams or oysters were served with a "sweetened soy glaze." And "sea trout or seafood brochettes are brushed with sweetened soy and caramelized under the grill so the flesh is moist and crunchy."

9061. Berief, Hermann. 1989. [Re: More about tofu at TKW]. Letter to William Shurtleff at Soyfoods Center, May 31. 1 p. Typed, with signature on letterhead. [Ger]
• ***Summary:*** We have been in contact with one another before. Today we have a special request. The undersigned Hermann Berief is a member (*Gesellschafter*) of this firm, and his son Markus (age 22, a student) would like to do work-study program during the summer vacation.

Can you recommend any place where he could both learn how to make tofu and run a business. We would be very pleased to get an affirmative reply from you. With friendly greetings. Address: TKW GmbH Tofukost-Werk, Siemensweg 1 (Postfach 32 12), D-4724 Wadersloh 3, West Germany. Phone: 0 25 20/13 00.

9062. Bajaj, Naresh Kumar. 1989. Welcome address. Paper presented at opening of Amrit Protein Foods soymilk plant in Ghaziabad, 18 May 1989. 8 p. 21 x 14 cm. [Eng]
• ***Summary:*** Shri Jagdish Tytler, the Honorable Minister of Food Processing Industries, was present at the opening, along with many invited guests. "Protein energy malnutrition is wide-spread amongst almost all segments of the population in India... The abnormal infant mortality rate in our country is 100 per 1,000 births... This problem cannot be tackled by conventional means and therefore there is a need to find non-conventional sources. Since in our country a large number of population is accustomed to a vegetarian diet, one of the means to solve malnutrition problem is in a simple little protein packed wonder i.e. soyabean... The daily requirement of the essential amino acids (the tissue building materials) of a 5 year old child can be covered by consumption of ½ liter of soyamilk alone."

"With so much goodness of soyamilk I am tempted to say (and this I do with due apologies to our friends in the medical profession who are present here)–'Drink a pint of soyamilk a day & keep your doctor friend away.'"

"There are some areas–Sir–where the Government policy needs to be liberalized so as to promote nutritional benefits of soyamilk. A few to mention are: (a) Extension of dairy milk by addition of 25% of soya milk. (b) All weaning foods for babies to be based, as far as possible, on soya milk, because of its obvious advantages. (c) Encourage & promote the use of soya milk in products like ice cream, kulfi, paneer, khoya, etc., which are basically non-essential and where

© Copyright Soyinfo Center 2013

the usage of milk is rather high–up to 50%. Such a step will certainly help to improve the availability of dairy milk to children for drinking. In short, wherever possible, normal milk should be extended by soya milk."

"The main soya milk plant has been supplied to us by Danish Turnkey Dairies of Denmark. The packaging machinery have been supplied by Prepac of France." Address: G.T. Road, Ghaziabad, Uttar Pradesh, India.

9063. Library of Congress, Subject Cataloging Div., Processing Services. 1989. Library of Congress subject headings. 12th edition. Washington, DC: Cataloging Distribution Service, Library of Congress. 3 volumes.
• ***Summary:*** This 12th edition (LCSH 12) contains approximately 173,000 headings established by the Library through Sept. 1988. The book was available on 3 May 1989. Approximately 10,000 headings were added since the 11th edition in 1988. Among these headings are 139,000 topical subject headings, 22,000 geographic subject headings, 10,000 personal names (incl. 9,000 family names), 2,600 corporate headings. This book should be used with the Subject Cataloging Manual (1989. 3rd ed.).

These subject headings have been accumulated by LC since 1898 and the first edition of LCSH was printed between 1909 and 1914. Subject headings are listed in boldface type. Approximately 40% of headings are followed by LC class numbers, which are added only when there is a close correspondence between the subject heading and the provisions of the LC classification schedules.

References show the relationship between terms: (1) The equivalence relationship: Use of UF (Use for) references. (2) The hierarchical relationship: Broader terms (BT) and narrower terms (NT). BT and NT function as reciprocals. A term appearing as a BT must be matched by the reversed relationship as an NT (e.g., Motor Vehicles. BT Vehicles. NT Trucks). (3) The associative relationship: Related terms (RT. Ornithology. RT Birds). May Subd Geog (MSG) = May subdivide geographically. Soy related subject headings, listed alphabetically, are:

9064. **Product Name:** [Taifun Sprout Tofu {With Mung Bean Sprouts}].
Foreign Name: Taifun Sprossen-Tofu.
Manufacturer's Name: Life Food.
Manufacturer's Address: Stuehlinger Strasse 9, D-7800 Freiburg, West Germany. Phone: 0761/50 61 55.
Date of Introduction: 1989. May.
Ingredients: Tofu (Made from organically-grown soybeans), organically grown mung beans, herb salt, parsley.
Wt/Vol., Packaging, Price: 250 gm poly bag. Retails for DM 3.60.
How Stored: Refrigerated.
New Product–Documentation: Label sent by Anthony Marrese. 1989. Nov. 4 by 2.5 inches. Green, black, and red on light green. Refrigerate at 2-7ºC. The now make 50 kg/week. Marrese notes that the sprouts are mung bean sprouts, lightly cooked, with spices.

Letter from Klaus Kempff of Life Food. 1990. June. The company does not sprout real soybeans. This address is correct.

9065. **Product Name:** Tofu Crumbles (Vegetarian Hamburger).
Manufacturer's Name: Marjon Specialty Foods.
Manufacturer's Address: 3508 Sydney Rd., Plant City, FL 33566. Phone: 813-752-3482.
Date of Introduction: 1989. May.
Ingredients: Tofu, seasoning, carmel coloring, potassium sorbate and lactic acid to maintain freshness.
Wt/Vol., Packaging, Price: 10 oz. paperboard box.
How Stored: Refrigerated.
Nutrition: Per 4 oz.: Calories 82, protein 9 gm, carbohydrate less than 1, fat 5 gm, cholesterol 0 mg, sodium 8 mg, calcium 145 mg.
New Product–Documentation: Sarah V. Cherin. 1992. *Produce Business.* June. p. 50. "Tofu Takes on Produce Flavors." "Marjon Specialty Foods carries a product called Tofu Crumbles that is a vegetarian substitute for meat." It is merchandised in the produce department and sometimes demonstrated as Tofu Crumbles tacos, and tofu chili. There are 6 recipes on the box.

Talk with Marcia Miller of Marjon. 1993. April 28. This product was introduced on 16 May 1989. It is made entirely at their plant and sold in boxed form. Today they got a patty maker and are planning to make the crumbles into a vegetarian burger.

Label sent by Marcia Miller. 1993. April 28. Paperboard box is 3¼ by 4½ by 2¼ inches. Dark brown, green, and red on yellow. "Seasoned. Ready to use. Pre-cooked. Textured. Easy time saving lite recipes on sides. Cholesterol free. Very low sodium." Recipes are given for: Tofu chili. Tofu sloppy joes. Tofu spaghetti. Tofu stuffed green peppers. Tofu tacos and burritos. Tofu pizza. A color photo of each prepared dish appears on the back of the box.

9066. *Radar fuer Trends* (*W. Germany*). 1989. [Breakthrough for tofu in sausages]. May. [Ger]*
• ***Summary:*** The level of purity of German sausages has been raised by the courts, but it falls when tofu is added.

9067. **Product Name:** Tempeh Lasagna, and Herbal Garden Tofu (With 6 Herbs & Spices in the Curds).
Manufacturer's Name: San Diego Soy Dairy.
Manufacturer's Address: 1330 Hill St., Suite B., El Cajon, CA 92020. Phone: 619-447-8638.
Date of Introduction: 1989. May.
New Product–Documentation: Talk with Gary Stein. 1989. Feb. 17. He expects that these products will be launched

in about Aug. 1989. Talk with Gary Stein. 1989. Oct. 25. Tempeh Lasagna was introduced in May, 1989. It contains Pizsoy soy cheese ($1.60/lb). He also distributes the cheese. He also does a private labelled version for Heart & Soul, as well as own label. Herbal Tofu is expected out by the end of November, 1989. He will soon be putting out an iced herbal tea (non-soy).

9068. **Product Name:** Trader Joe's Cottage Style Tofu Salad with Herbs (Non-Dairy Cottage Cheese).
Manufacturer's Name: Trader Joe's (Product Developer-Distributor).
Manufacturer's Address: 538 Mission St., South Pasadena, CA 91030. Phone: 818-441-1177.
Date of Introduction: 1989. May.
Ingredients: Tofu, apple cider vinegar, dried onions, sea salt, dried chives, spices.
Wt/Vol., Packaging, Price: 6 oz. Retails for $1.39 (8/89, Concord, California).
How Stored: Refrigerated.
New Product–Documentation: Label. 1989. 4 by 2.75 inches. Green on yellow. Self adhesive. "No cholesterol. No dairy. No preservatives." Illustration of a Japanese woman and her child. Soyfoods Center taste. 1989. Aug. 14. Nice flavor. Dry, like cottage cheese. Good as a spread on crackers. Talk with Richard Baltierra, head of the Fresh Program at Trader Joe's. 1989. Aug. 23. This product, made fresh daily in southern California, was introduced in May 1989. "The two tofu salads have taken off like gangbusters."

9069. **Product Name:** Trader Joe's Eggless Egg Salad: Made with Tofu.
Manufacturer's Name: Trader Joe's (Product Developer-Distributor).
Manufacturer's Address: 538 Mission St., South Pasadena, CA 91030. Phone: 818-441-1177.
Date of Introduction: 1989. May.
Ingredients: Tofu, celery, eggless mayonnaise, dill, granulated garlic, chives, sea salt, vinegar, onion powder, chopped onions, turmeric.
Wt/Vol., Packaging, Price: 6 oz clear plastic tray. Retails for $1.39 (9/89 Concord, California).
How Stored: Refrigerated.
New Product–Documentation: Label. 1989. 4 by 2.75 inches. Green and orange on white. Self adhesive. "No eggs. No cholesterol. No preservatives." Illustration of a Japanese woman and her child. Talk with Richard Baltierra, head of the Fresh Program at Trader Joe's. 1989. Aug. 23. This product, made fresh daily in southern California, was introduced in May 1989. "The two tofu salads have taken off like gangbusters." This product is still sold in 1997.

Product with new Label purchased at Trader Joe's in Lafayette, California. 2000. Aug. 15. 4½ inch diameter plastic tub. Red, white, and green on blue background. 6

oz. Retails for $1.39–Price hasn't changed in 11 years. "No eggs. No cholesterol. No preservatives. Perishable. Keep Refrigerated." Illustration of a bamboo plant with green leaves. SKU #001133. as of 2004. March 12. Retail price in Lafayette, California: $1.69.

9070. Westbrae Natural Foods. 1989. Distributor catalog: FOB West pricing. Spring 1989. P.O. Box 91-1181, Commerce, CA 90091. [6] + 19 p. 22 x 28 cm.
• ***Summary:*** Has a black on yellow cover. Address: Commerce, California. Phone: (213) 722-1692.

9071. Mann, Oscar. 1989. Re: Problems in trying to introduce tofu to Kenya. Letter to William Shurtleff at Soyfoods Center, June 7. 2 p. Typed, with signature on letterhead.
• ***Summary:*** "I was making my own tofu for a while, then supplying friends and now a main deli/grocery in town. It's little known here but sales are steadily growing and are now at around 20 kg/week. I'm also producing soysage and have just begun okara Tempeh."

The main problems are: 1. Very strict government health regulations; all products must undergo strict government testing. 2. Poor quality soybeans and concern with aflatoxins on soybeans. "I have one person whose job it is to sit and sort soaked beans–particularly any that look moldy or infected in any way. We actually discard 20-30% of our raw stock... For some reason Kenya is having a hard time producing soy beans. The market has been low but their main problem is that the beans rot as soon as they are ready, necessitating 2 or even 3 pickings per day! Beans on the market currently come from Uganda or Tanzania and are old. I buy what I can (at around $0.50/lb) and there are never two loads the same which makes control and scientific

© Copyright Soyinfo Center 2013

methodology difficult." 3. Local coagulants are expensive. Lab grade calcium sulfate, the least expensive, costs $1.66/lb. So the cost of producing tofu is about $0.95/lb (with labor costing only $0.50/hour); it wholesales for $1.25 and retails for $1.66/lb. 4. Tofu and other soyfoods are not well known.

"I am holding a tofu-making class this coming week end and will have samples of tempeh and soysage to try. Next is a tofu cooking class, a small recipe book and a soya festival with one of the largest restaurants."

"My analysis of the situation soy-wise here is that probably the most accepted products will be flavored soy milk in tetra bricks, burgers, soysage, and dried frozen tofu for the various hunger and famine-relief projects. (I actually thought I had invented this stuff before finding it in your books. I use it as my main staple on safari and have given samples to trekking companies.) I would like to see a full-scale soy dairy in operation." Address: Kenya Natural Products Development Co., P.O. Box 20360, Nairobi, Kenya. Phone: 60099.

9072. Thornbury, Barbara E. 1989. A feast of tofu in Tokyo and Kyoto. *New York Times.* June 11. p. XX6, XX37. Late edition (East Coast).
• ***Summary:*** Describes three Japanese restaurants that feature tofu, one of the key ingredients in Japanese cooking: (1) Sasanoyuki in Tokyo has a history of more than 300 years. Its name means "snow on bamboo leaves." (2) Goemon in Tokyo. (3) Okutan–best known for its simmering pots of yu-dofu–in Kyoto.

Note: These restaurants are also described in *The Book of Tofu*, by Shurtleff and Aoyagi, however the present description has updated prices. Address: Princeton, New Jersey.

9073. Rose, Frederick. 1989. California Babel: The city of the future is a troubling prospect if it's to be Los Angeles. To cultural stew add crime, poverty, pollution, traffic, film fantasies and tofu. Economic base: Cheap labor. *Wall Street Journal.* June 12. p. A1, A6.
• ***Summary:*** This article is part of a series titled "The second century," on future issues and trends. Los Angeles is becoming, not a "melting pot" but a mix of discrete cultures and economies–a kind of international city of cities, a great metropolis of Third World peoples. California cuisine, which is described as "sprout and tofu intensive," is a fun way to eat healthy. Address: Staff reporter.

9074. Brenner, Peg Powers. 1989. Proposal to start a tofu shop at Seramey Monastery in India (Interview). *SoyaScan Notes.* June 19. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Michael Roach, who lives in New Jersey, is writing a grant proposal to Oxfam for a soybean irrigation project and tofu shop/soy dairy at this Tibetan Buddhist monastery inhabited by 400-600 monks. It is located at P.O. Bylakuppe 571104, Karnataka State, South India, about 4 hours by bus south of Bangalore. Peg took the Island Spring Soycrafters Apprenticeship Program in 1981. Michael knows of a Chinese soy noodle named P'ing, but does not know how to make it. They have a good soybean agronomist contact, Dr. Rajappa, at GKVK in Bangalore. Address: Silver Spring, Maryland. Phone: 301-585-4575.

9075. Hartz (Jacob) Seed Company, Inc. 1989. [Xiaowei Sun joins Hartz Seed Co. to work on "Breeding Soybeans for Soyfoods" project] (News release). P.O. Box 946, Stuttgart, AR 72160-0946. 1 p. June 19.
• ***Summary:*** "Jacob Hartz Seed Co., Inc. is pleased to announce that Ms. Xiaowei Sun will join our company as of August 1, 1989. Ms. Sun, in the position of Food Scientist, will direct her efforts toward the characterization, testing, and evaluation of Hartz varieties and experimental lines in the area of soyfoods.

"She has recently graduated from the University of Georgia with her M.S. degree in Food Science and Technology, having done her Masters thesis on 'Texture Profile Analysis and Sensory Evaluation of Tofu Products.' Ms. Sun's background includes a B.S. and over 40 hours of Chemistry from Zhong-Shan University, Guangzhou, Peoples Republic of China. From 1984 to 1987 she was an instructor in the Food Science and Technology Department of Beijing Agricultural Engineering University in Beijing.

"Dr. Edward A. Brown, Soyfood Project Leader, will coordinate the program of combining classical soybean breeding, and chemical and sensory evaluation, in order to better understand the nature of soybeans and their relationship with soyfood products. We consider this area to be of major importance to our company and our customers." Address: Stuttgart, Arkansas. Phone: 501-673-8565.

9076. Hills, Benjamin. 1989. Homestyle Foods (Sonoma Specialty Foods) (Interview). *SoyaScan Notes.* June 25. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The company seems to be on the verge of bankruptcy and owes money to many suppliers. Things have been going downhill since January of this year, at which time sales were a little less than $500,000/year and they had 13-14 employees. They will probably try to sell off product lines before going under. David Burns stands to lose the most. Why the failure? Hills thinks because they were always looking at the short-term picture.

Update: 1990. Oct. 6. The company is still active and has a booth with many products at World Vegetarian Day in San Francisco. Robert Dolgin is still involved with the company; he comes into the office for a least several hours a day. The main competition is Wildwood Natural Foods. Address: Sonoma Specialty Foods, 2317 Bluebell Dr., Santa Rosa, California 95401. Phone: 707-527-7716; Bus. 707-

525-8822.

9077. *SoyaScan Notes.* 1989. What are soybean saponins? Can they reduce human blood cholesterol levels? (Overview). June 28. Compiled by William Shurtleff of Soyfoods Center.

• ***Summary:*** *Webster's Dictionary* (1983) defines saponin (derived from the French *saponine,* which is from the Latin *sapon-, sapo* = soap, and first used in 1831) as "any of various mostly toxic glucosides that occur in plants (as soapwort or soapbark) and are characterized by the property of producing a soapy lather; esp: a hygroscopic amorphous saponin mixture used esp. as a foaming and emulsifying agent and detergent."

Thus it may be the saponins (carbohydrates, water soluble sugars) in the whey which is a by-product of the tofu-making process that causes that whey to foam.

Webster's Dictionary defines glucoside (a term first used in 1857) as a glycoside that yields glucose on hydrolysis. A glycoside (first used in 1930) is defined as "any of numerous sugar derivatives that contain a nonsugar group attached through an oxygen or nitrogen bond and that on hydrolysis yield a sugar (as glucose)."

Birk and Peri (1980, p. 161) state: "The saponins are glycosides that occur in a wide variety of plants. They are generally characterized by their bitter taste, foaming in aqueous solutions, and their ability to hemolyze [break down] red blood cells."

The earliest document seen (Jan. 2005) that mentions soybean saponins was published in 1931 by E. Walz in German. In early 1979 a team of Australian researchers (led by Potter, Topping, and Oakenfull) at the CSIRO Division of Human Nutrition in Adelaide found that the cholesterol-lowering effect of soybean products was attributable to the presence of saponins rather than proteins or amino acids. Subsequent research by this group and others seemed to verify this hypothesis. Note that saponins impart an unpleasant, bitter taste to most soyfoods (e.g. tofu or soymilk) in which they are present.

In 1990 Japanese scientists from the Department of Food Chemistry at Tohoku University found that soybean saponins could control reproduction of the HIV virus which is associated with Acquired Immune Deficiency Syndrome or AIDS. These saponins showed inhibitory effects against HIV infection in vitro.

9078. Akwarius Almere. 1989. Akwarius prijs en bestelboek: Natuurvoedingsprodukten [Catalog and price list. April-June]. P.O. Box 50070, 1305 AL Almere, The Netherlands. 77 p. [Dut]

• ***Summary:*** Akwarius is a larger importer and distributor of natural food products. They have worked in this field since 1971, and have a strong interest in macrobiotic and anthroposophical foods. Contents (p. 2). Philosophy and function (p. 3). Beverages (p. 7): Sojamelk naturel and Bonsoy, Provamel Sojadrink (4 flavors in 500 ml and 4 flavors in 1 liter sizes), Provamel Soja dessert (puddings; 5 flavors in 125 gm and 1 flavor in 1050 gm).

Manna sweeteners (p. 12): Amasake drink in 350 and 700 gm sizes, and rice koji. Note that Akwarius imports and distributes large line of Manna-brand macrobiotic products from Muso in Japan. Manna vegetable protein products (p. 21): Dried tofu (non-organic). Bonsoy soymilk, Seitan, and three types of dried wheat gluten (fu). Manna Soy Sauces (Sojasausen, p. 21): shoyu (B = biological or organically grown, and NB = not biological, i.e. non-organic), and tamari (non-organic).

Witte Wonder (p. 22): Seitan, Tofu Spread (in paprika, garlic, celery, dill, mushroom, and pepper flavors, 220 gm sizes, all organic), Tofu in Sauces (peanut, curry-pineapple, and tomato flavors, 340 gm, organic), Tofunaise (plain and lemon flavors), Tofu Dressing (Italian, garden herbs, Mexican, and plain flavors).

Yakso (p. 23): Seitan, Tempeh Spreads (in Indonesian poesta and doeloe flavors), Temmo (round tempeh burger, deep fried then marinated, ¼ inch thick, sold 5 in a glass jar), Soyaroma (tempeh spread like butter), Sweet Indonesian-style soy sauce (Ketjap manis), Tofu Spreads (cream cheese consistency, in salsa, dill, green, shallot, and pommodore [apple?] flavors), Tofu Mayonnaise (Sojanaise), Smoked tofu (paprika, mushroom, and celery flavors in 170 gm wide mouth glass jars).

Akwarius soybeans and soybean meal/flour (p. 27-28, 35, organic). Manna Pasta (p. 28): Soya macaroni. Manna black soybeans from Hokkaido (p. 35; 350 gm, non-organic). Manna Tekka Condiment (p. 44), Manna soynuts (*Sojanootjes,* p. 45, 3 flavors). Lima soyadrink (p. 47).

Manna Miso (Sojapasta; p. 48): Brown rice miso (organic and non-organic), young rice miso (non-organic), barley miso (organic and non-organic), natto miso (non-organic), soybean miso (non-organic), instant miso soup (with and without fish, non-organic), instant miso soup with tofu. Manna sea vegetables (p. 49).

Note: This is the earliest Dutch-language document seen that mentions soynuts, which it calls *Sojanootjes.* Address: Almere, Netherlands. Phone: 03240-20800.

9079. Brown, Peter J. 1989. Organic soybeans: Filling a farmer's need and a market demand. *Soya Newsletter* (*Bar Harbor, Maine*). May/June. p. 1, 3-6.

• ***Summary:*** A Soyatech survey indicates that nearly 11,000 acres of organic soybeans were planted last year, yielding 415,200 bu (24.9 million lb), or 38 bu/acre, and worth nearly $4 million. Some organic farmers feel these figures are too low. They estimate 30,000 acres, with yields averaging 50 bu/acre and a total value of $10-$15 million a year. No official statistics are available from USDA's Low Input/ Sustainable Agriculture (LISA) research and education

© Copyright Soyinfo Center 2013

program, according to director Neill Schaller, largely because the market is so small. A summary of LISA's work and results is given. The states producing the largest amounts of organic soybeans are Iowa, Nebraska, Illinois, Indiana, and Minnesota. Most of these beans end up in tofu or soymilk. Soyatech estimates that 17.5% of the 74.8 million lb of soybeans used to make popular low-tech soyfoods for consumption in the USA in 1989 were organically grown, and that 53% of this organic crop will end up in soyfoods. Many brokers could sell more if they had more. Dan Burke of Pacific Soybean and Grain in San Francisco notes that in the mid-1980s interest in organic soybeans began to decline, but it has risen during the past 18 months, and especially during the past 6 months. Minnesota has led the way in setting organic standards, which include a 3-year chemical-free requirement.

9080. **Product Name:** Baked Tofu Sandwich.
Manufacturer's Name: Fresh Tofu Inc.
Manufacturer's Address: 900 Line St. (P.O. Box 1125), Easton, PA 18042. Phone: 215-258-0883.
Date of Introduction: 1989. June.
New Product–Documentation: Talk with Gary Abramowitz. 1989. Aug. 21. This is their most recent product, introduced in June 1989.

9081. *IITA Research Briefs*. 1989. Osamu Nakayama has joined the Soybean Utilization Unit of the Grain Legume Improvement Program as a food technologist. 9(2):8. June.
• ***Summary:*** Dr. Nakayama has been a food researcher in both the public and private sectors in Japan for some 30 years. Note: During the 1960s, he worked with Dr. Tokuji Watanabe and colleagues on pioneering research on commercial tofu production in Japan. Address: Ibadan, Nigeria.

9082. Ishak, Soleha; Abdullah, Aminah. 1989. The use of soy milk in the preparation of corn starch pudding. *Malaysian Applied Biology* 18(1):53-58. June. [16 ref. Eng; mal]
• ***Summary:*** Tofu is the most widely consumed food in Malaysia. The four "most popular types of tofu in Malaysia are hard tofu (*tow kwa*), soft tofu (*tow foo*), fried tofu (*tow foo pok*), and sweet tofu (*tow foo fah*). Of these, only sweet tofu is served as a dessert. Calcium sulphate is traditionally used as a gelling agent [curding agent] in tofu." Yuba is known as *fucuk*. Address: Jabatan Sains Makanan dan Pemakanan, Fakulti Sains Hayat, Universiti Kebangsaan Malaysia, 43600 Bangi, Selangor, Malaysia.

9083. Life Food. 1989. Taifun Produkte: Preisliste fuer die Gastronomie. Preisliste fuer Wiederverkaeufer [Taifun Products: Price list for restaurants, and for retail food stores]. Robert-Bunsen-Strasse 6, D-7800 Freiburg, West Germany. 4 p. [Ger]
• ***Summary:*** One price list is valid until 15 June 1989, and the other until 1 July 1989. On the earlier one for restaurants, Anthony Marrese has written in the year and month each product was introduced, and the amount presently produced per month. Prices are printed for each product: 1 DM equals about $0.50. Address: Freiburg, West Germany. Phone: 0761/50 61 55.

9084. **Product Name:** Pizsoy Soy Cheese (With Casein) [Cheddar-Style, Mozzarella-Style].
Manufacturer's Name: Robert H. Savar & Associates (Marketer).
Manufacturer's Address: P.O. Box 1314, Cherry Hill, NJ 08034. Phone: 609-983-2560.
Date of Introduction: 1989. June.
Ingredients: Tofu, non-hydrogenated soy oil, casein (a natural derivative of non-fat milk), sea salt, citric acid, natural flavor, soy lecithin, guar gum, natural color.
Wt/Vol., Packaging, Price: 8 oz bags or 5 lb blocks.
How Stored: Refrigerated.
New Product–Documentation: Soya Newsletter. 1989. May/June. p. 8. The product is free of cholesterol and lactose.

9085. Thomas, R.; deMan, J.M.; deMan, L. 1989. Soymilk and tofu properties as influenced by soybean storage conditions. *J. of the American Oil Chemists' Society* 66(6):777-82. June. [14 ref]
• ***Summary:*** After soybeans have been stored for 8 months, the amount of protein extracted into soymilk decreases by about 14% compared with the initial extractability, whether the soybeans are stored at 20º or 30ºC, at relative humidities of 65% or 85%. Tofu made from soybean that were stored at 85% relative humidity became less uniform in microstructure near the end of the storage period. The volume of whey resulting as a by-product of the tofu increased with soybean storage time. Address: Dep. of Food Science, Univ. of Guelph, Guelph, ONT, Canada N1G 2W1.

9086. Welters, Sjon. 1989. Soyfoods in Europe: Influenced by a colonial past. *Soya Newsletter* (*Bar Harbor, Maine*). May/June. p. 1, 12-15. [1 ref]
• ***Summary:*** This is a historical overview of the introduction of soyfoods to Europe since 1945. The Indonesians who immigrated to the Netherlands after World War II played a major role in introducing soyfoods (especially tofu, tempeh, and a sweet soy sauce called ketjap) to that country and to Europe. Ketjap was the most popular soyfood in Indonesia. Asian immigrants started small manufacturing companies, restaurants, and importing companies (such as Conimex and Heuschen Schrouff). The macrobiotic movement also played a key role in introducing soyfoods, especially soy sauce, miso, and tofu. In Belgium, the Gevaert family founded Lima and began to make miso on a large scale, but a fire and

© Copyright Soyinfo Center 2013

other financial problems soon forced them to close the plant. Only recently have they started to make miso again.

During the 1970s, especially in Belgium and the Netherlands, inspired by the macrobiotic movement and with information from books by Shurtleff and Aoyagi, a new generation of non-Asian tofu makers emerged. "The first tofu shop in Europe owned and operated by non-Orientals was Manna Natuurvoeding. Opened in Amsterdam in 1977, Manna was a macrobiotic manufacturer, distributor, and retailer run by a non-profit foundation. Soon after opening, Manna was visited by entrepreneurs from Germany, England, Portugal, Denmark, France, Sweden, Austria, and Italy, hoping to learn about making tofu."

During the early 1980s, tempeh was rediscovered. "Yakso Farms in the Netherlands was one of the first non-Oriental companies to produce tempeh, made from organic soybeans, and to process it into spreads, paté, sauces, and marinated products."

In the mid-1980s the focus shifted from production to marketing and to second-generation soyfoods. Most European soyfoods are made with organic soybeans. Address: President, Craft International Consultants, 21 Wetherbee St., Acton, Massachusetts 01720. Phone: 617-264-9511.

9087. **Product Name:** Organic Tofu Salad Dressing [Ranch, and Bleu].
Manufacturer's Name: White Wave, Inc. (Marketer-Distributor). Made in Vashon, Washington, by Island Sping.
Manufacturer's Address: 6123 E. Arapahoe Rd., Boulder, CO 80303. Phone: 303-443-3470.
Date of Introduction: 1989. June.
Ingredients: Bleu: Soybean oil, water, organic tofu (Water, soybeans, calcium sulfate, glucono delta lactone), bleu cheese, vinegar, grape juice, salt, modified whey solids, spices, xanthan gum (a natural food fiber), garlic powder. No more, No less.
Wt/Vol., Packaging, Price: 12 fluid oz (355 ml).
How Stored: Refrigerated.
Nutrition: Per 1 tablespoon: Calories 60, protein 1 gm, carbohydrates 2 gm, fat 5 gm, sodium 120 mg.
New Product–Documentation: Talk with Lon Stromnes. 1989. May 15. These are due out June 1. Labels sent by Lon. 1989, Nov. 8.75 by 3.5 inches. Full-color illustration of uncut vegetables against a pastel background. "Cholesterol free. Nothing artificial. Keep refrigerated."

9088. **Product Name:** Meatless Healthy Franks (Tofu Hot Dogs).
Manufacturer's Name: White Wave, Inc.
Manufacturer's Address: 1990 North 57th Court, Boulder, CO 80301. Phone: 303-443-3470.
Date of Introduction: 1989. June.
Ingredients: Organic tofu (water, organic soybeans, calcium sulfate and nigari [magnesium chloride]), soy oil, wheat gluten, egg white, tapioca starch, wheat germ, soy sauce (water, soybeans, whole wheat, salt), dried yeast, natural liquid hickory smoke, garlic powder, spices, natural flavor, beet powder, oleoresin paprika for color.
Wt/Vol., Packaging, Price: 12 oz package, 12 per case, retails for about $3.09 (7/89).
How Stored: Refrigerated, 60 day shelf life.

New Product–Documentation: Talk with Steve Demos. 1989. May 13. This product will be officially launched in June, but they have been in interstate sales to protect their trademark. The use of the word "franks" was approved in writing by the FDA. They have enormous advanced sales, and they have done a lot of test marketing and sold a little to health food stores. Leaflet. 1989. April. "Introducing: Meatless Healthy Franks." Shows label. Both retail and food-service packs are available. Shelf life is 60 days at 38-40ºF.

White Wave News. 1990. 3(3):1. June. "Healthy Frank meets nefarious Mr. Puppette." A humorous portrayal of the product and its competition. Healthy Franks are packaged in state-of-the-art six color packaging. "Special Note: White Wave will not use Carmine, a coloring agent used to achieve a heat-stable red hot dog. Carmine appears on labels as 'Natural Color' and is made from cochineal (a small red insect similar to a mealybug). Don't be misled by the red. Challenge any suppliers of heat- stable-red hot dogs about their coloring."

Talk with Lon Stromnes. 1993. April 14. This product is coming out in an improved formulation with much better texture.

9089. Perez Baez, Oswaldo. 1989. Re: New developments with soyfoods in Venezuela. Letter to William Shurtleff at Soyfoods Center, July 10. 3 p. Typed, with signature on letterhead. [Eng]

© Copyright Soyinfo Center 2013

• ***Summary:*** "In my last visit to Caracas I contacted: Prof. Makie Kodaira and Prof. Amaury Martinez of the 'Instituto de Ciencia y Tecnología de Alimentos, Facultad de Ciencias, U.C.V.' (Universidad Central de Venezuela) who are very interested in offering a theoretical and practical course about soyfoods, using their pilot plant (the second of importance in Venezuela). Prof. Kodaira studied in Hiroshima, Japan in 1977 and she is a specialist on seafoods. They would like the 'Centro de Alimentos de soya de Venezuela' to organize this course.

"I think this is the time to offer in Venezuela a complete course about soyfoods and I have thought to invite you to come to Venezuela. I am thinking about 2 courses:

"(a) One oriented to Institutional level (Instituto Nacional de Nutrición, Fundación Polar, CIEPE, Universidades, Industry, etc.) for professional people. This course could be in Caracas, Instituto de Ciencia y Tecnología de Alimentos, U.C.V.

"(b) Another one oriented to the general public (not necessarily professional level). This course could be here in La Azulita which is a rural and beautiful place, epicenter of the Venezuelan movement for alternative lifestyles.

"I have thought of the following content for these courses: (1) Soymilk. (2) Tofu. (3) Tofu and soy milk ice cream. (4) Miso. (5) Tempeh. (6) Shoyu.

"I am working on a book about soyfoods, and am enclosing an outline of the contents: I. Introduction. II. Agronomic aspects. III. Soya and food security. IV. The most important soyfoods. V. Industrial potential of the soybean. VI. Bibliography. VII. Index." Address: Ing., Centro de Alimentos de Soya de Venezuela, Granja Tierra Nueva, Aldea San Luis, La Azulita, Estado Merida, C.P. 5102, Venezuela.

9090. Morinaga Nutritional Foods. 1989. Mori-Nu Tofu: The therapeutic health food (News release). 5800 South Eastern Ave., Suite 270, Los Angeles, CA 90040. 3 p. July 12.
• ***Summary:*** "Tofu, most often considered a 'weird' California health food, is becoming a 'therapeutic' form of nutrition for cancer and AIDS patients across the country, according to Marsha Brook, clinical dietitian and food service director at Ventura Estates Retirement Home in Agoura Hills, Calif.

"According to Brook, many cancer and AIDS patients are unable to tolerate the foods and prepared supplements they are being served, because of nausea and/or digestion problems. The result is patients aren't getting the proper nutrients they need to become stronger and more healthy. To counteract this problem, Brook, along with many other registered dietitians, has begun incorporating Mori-Nu Tofu into her meal plans.

"She now uses tofu in creamed soups, quiche, enchiladas, lasagna, and other dishes... The patients like tofu because it tastes good, and it's very easy to digest...

"High-protein and low-price, however, are not the only reasons Brook serves tofu to the elderly. She has learned, through her studies, that animal protein high in cholesterol will wear down the kidneys over time. 'Tofu, which is a vegetable protein with zero cholesterol, can help extend the use of the kidney, plus it's very gentle on the system,' says Brook.

"According to Carol Kirshenbaum, registered dietitian and manager of clinical nutrition at St. Johns Hospital in Los Angeles, they too are now including tofu dishes on their hospital and cafeteria menus. 'We have found that tofu is particularly good for people that have high-cholesterol and are lactose intolerant,' said Kirshenbaum." Address: Los Angeles, California.

9091. Zodiac Consultants. 1989. Display ad: Project reports: Newly prepared, computer processed. *Times of India* (*The*) (*Bombay*). July 15. p. 18.
• ***Summary:*** "... based on the latest data with the help of In-House Computers." In this tall, 2-column ad, the reports, which are listed alphabetically, include: "Solar Cells.

"Soya Milk & Paneer."

9092. Mio, Art. 1989. Update on Morinaga (Interview). *SoyaScan Notes.* July 19. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Morinaga sales, in terms of number of units sold, increased 30% last year. Presently sales are 60% to Caucasian Americans and 40% to Asian Americans. The main outlet is supermarkets, but about 10% is sold through natural foods stores and Diet Center outlets also sell a lot. In Feb. of 1989 Lucky Stores finally started buying Mori-Nu Tofu, and they have even promoted it with a color ad and $0.79/package price. Safeway started carrying Mori-Nu Tofu about 2 years ago, then they dropped it for a while, but started carrying it again in the fall of 1988. Address: Morinaga Nutritional Foods Inc., 5800 South Eastern Ave., Suite 270, Los Angeles, California 90040. Phone: 213-728-4325.

9093. Welters, Sjon. 1989. Re: Brief history of Manna Natural Foods. Letter to William Shurtleff at Soyfoods Center, July 24. 1 p. With follow-up talk on 2 Dec. 1989.
• ***Summary:*** This company was founded in about 1973 by Adelbert Nelissen and his wife Wieke Nelissen, plus Hugo van Seenus, among others. Adelbert is Sjon's brother in law (his wife's brother). Manna got started in the Rozenstraat in Amsterdam, in an abandoned house that was taken over by so-called "krakers" (counter-culture or hippie squatters). The store called "de Rozemaryn" (Rosemarin) was the first of a chain of stores which, at its peak, contained ten stores total. Hugo now owns and operates Hugo's Market in Washington, DC.

Manna was originally a foundation named Stichting

© Copyright Soyinfo Center 2013

Natuurvoeding Amsterdam. It kept this name until 1982. Manna started the first tofu shop in Europe that was owned and operated by non-Orientals. Opened in Amsterdam in 1977, Manna was a macrobiotic manufacturer, distributor, and retailer run by a non-profit foundation. Soon after opening, Manna was visited by entrepreneurs from Germany, England, Portugal, Denmark, France, Sweden, Austria, and Italy, hoping to learn about making tofu.

In 1975 Manna started importing miso and shoyu from Japan, initially via Muso Foods, and later also via Mitoku. But Muso was always their main supplier.

Manna filed for Chapter 11 bankruptcy or reorganization 2 or 3 times. The first time was a bankruptcy in March 1982. All their property was sold at an auction, but was bought back by a new foundation owned by basically the same people and the same foundation at one-third the value. It was probably at this time that Manna's name was changed from Stichting Natuurvoeding Amsterdam to Manna Natuurvoeding B.V. The company was back on its feet by 1983 but then things didn't work out again. At the last moment before declaring bankruptcy, they got financing. But this time the bank took the Foundation out of the picture, so that the foundation was not giving the collateral for loans. The person behind the foundation, Adelbert Nelissen, became the director/president of the holding company. He probably did not have majority ownership. But at this time (May 1983) Sjon and most of the management left.

In about late 1983 or early 1984 Manna moved all operations from Meeuwenlaan in Amsterdam to Zwanenburg. The former section of Amsterdam was torn down by the city. The third time was in 1987, when the company was disbanded. At that time Adelbert became inactive. The government-appointed curator tried to get as much as possible for the assets. The macrobiotic Manna brand name and the inventory of imported Japanese foods was purchased by Akwarius, which was located in Almere in a building constructed along anthroposophic guidelines (before about 1986 they had been located in the province of Utrecht). The production facility at Zwanenburg and its equipment was purchased (mainly for the bakery) by a conglomerate of 3 natural food companies, including Akwarius and Loverendale (the largest baker of natural yeasted breads in the Netherlands). They made Manna tofu for a year or two, then facing stiff competition, sold off the tofu equipment piecemeal. They ran the Manna sourdough bakery there until 1988, then moved it to Loverendale headquarters, and closed down the Zwanenburg production facility.

Akwarius is a company based on the anthroposophical philosophy of Rudolf Steiner. They were founded in about 1974. In Holland there were 4 types or philosophies of natural foods distributors: (1) Anthroposophical (Akwarius); (2) Macrobiotic and natural foods (Manna); (3) Ecological (Kleine Aarde [Small Earth; inspired by E.F. Schumacher's book *Small is Beautiful*] and De Nieuwe Lelie [The New Lily]); and (4) Reform movement/vegetarian (VNR: Vereniging van Nederlandse Reformhuizen = Union of Dutch Reform Houses, and Scholten [which was also the exclusive importer of Lima products from Belgium]).

Talk with Sjon Welters. 1994. April 4. Manna and Lima sold only vegetarian foods; they did not sell any fish, poultry, or meat. All these early Dutch natural foods companies were this way because no natural food store would sell fish or other flesh products; they were just not acceptable. Some years after they started they used eggs in a few products but they were always vegetarian. The only people who ever got involved in flesh foods in the early stages were the Anthroposophic / Biodynamic people because its part of their philosophy, but even in the beginning they didn't sell meat to the stores because customers didn't want it. Address: Craft International Consultants, 21 Wetherbee St., Acton, Massachusetts 01720. Phone: 508-264-4011.

9094. Welters, Sjon. 1989. Re: A brief history of Yakso in the Netherlands. Letter to William Shurtleff at Soyfoods Center, July 24. 1 p.

• ***Summary:*** "Yakso Farms (originally named Jakso Farms) in the Netherlands was founded by Tomas Nelissen in about 1980; he was joined by Peter Dekker in 1982. The organization was basically a farm with several hundred acres of land, upon which was a food processing plant. Yakso was one of the first non-Oriental companies to produce tempeh, starting in early 1982. It was made from organic soybeans

Their fried and marinated tempeh products were introduced in early 1983 and their tempeh spreads in the fall of 1983. The farm part of Yakso was sold and its name and products were taken over by Kees Middelwert, who runs the company now. Initially he ran it from another facility in the province of Groningen, but now is in the process of moving it into a new and much larger facility in Wolvega. He is not the sole owner any more–if he ever was. Frans Andringa, who owns an organic cheese company, invested substantially in the company.

"On 2 July 1989 De Morgenstond, the tofu making company, moved into the same building as Yakso, expanding its production capacity and switching to a Takai high pressure cooker system. De Morgenstond is now owned by Frits Steunenbeg and Mank DenBok."

Sjon adds in March 1990: Yakso is now one of the leading soyfoods companies in the Netherlands. They make a lot of Indonesian-style soyfood products. Tomas Nelissen is now living in Vienna, Austria, making his living by shiatsu. Address: Craft International Consultants, 21 Wetherbee St., Acton, Massachusetts 01720. Phone: 508-264-4011.

• ***Summary:*** John and Marcia Miller, self-described former hippies, started Marjon Specialty Foods in 1972. John, 49 is president, and Marcia, 46, is vice president of the company (located in Plant City, Florida), which produces [mung] bean sprouts, alfalfa sprouts, ginger root, all-natural salad dressing, and tofu. The tofu is sold in water-packed and vacuum-packed blocks. They have also developed Tofu Crumbles–which resembles ground beef or hamburger.

Don Young is owner of the 11-year-old Lecanto Tofu Shop in Lake Butler, Florida. He sells tofu and soymilk.

Color photos show: (1) John and Marcia Miller. (2) Don Young feeding his goats with okara. (3) Don Young standing beside his Lecanto Tofu delivery truck.

9096. Mio, Art. 1989. New Morinaga "Water Hazard" ad campaign will criticize water-pack tofu (Interview). *SoyaScan Notes.* July 29. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Morinaga is about to launch a major color ad campaign in trade (not consumer) magazines. It will criticize water-packed tofu. Above a package of water packed tofu is written "Water hazard." Above the Mori-Nu pack is written "Life preserver." In the natural/health foods trade the ad will run in Natural Foods Merchandiser, Whole Foods, and Health Foods Business, starting in about Aug. or Sept. 1989. It will also run in several supermarket produce newspapers such as Supermarket News. Danielle Lin, who is sales rep to health food channels, likes this ad concept as does Mr. Kumoda. They want to "go after water pack directly, to get market share." Art Mio feels uncomfortable with it.

Shurtleff asks: What would happen if, in response to Morinaga's new ad campaign, Hinoichi and Azumaya ran counter ads in the same format but over the water-pack carton they wrote "Fresh!" Made in America." Over the Mori-Nu packet they wrote: "1. Made in Japan, where it is outlawed. 2. 2-5 months old when you get it. 3. Processed with hydrogen peroxide, which was outlawed by the FDA until 1981. 4. Contains mono- and di-glycerides, which are not listed on the label. 5. 30-40% higher in price by weight than fresh tofu." This would start a war, which would certainly hurt the tofu industry and market as a whole.

Most supermarkets in America, including some Safeway stores and divisions, still sell their tofu in the produce section, where the core temperature frequently rises above 45ºF. The two biggest problems with tofu in America are spoilage (from the sellers point of view) and sour taste (from the consumer's). These problems are caused by storing tofu in the relatively warm produce section. Health inspectors on the East Coast are now checking tofu temperatures and water quality more frequently. FDA's number one priority is now microbiological food safety and they say that tofu and yogurt are the two biggest offenders. FDA says the core temperature of tofu should not rise above 45ºF. If FDA inspectors find violations of these guidelines or puffy tofu packages, they can cite a retailer for negligence.

Mori-Nu sales nationwide increased 30-40% last year but they have been flat for the past 4 months and flat in the Los Angeles market for the past 2 years, as have those of Hinoichi.

Talk with Mr. Kumoda. 1989. Sept. 27. Mori-Nu stopped running their controversial ad 2 weeks ago. Address: Morinaga Nutritional Foods Inc., 5800 South Eastern Ave., Suite 270, Los Angeles, California 90040. Phone: 213-728-4325.

9097. Appel, Liz. 1989. A culture issue (Letter to the editor). *Vegetarian Times.* July. p. 7.

• ***Summary:*** "In your article 'Taking stock in Natural Food Companies' (Mar. VT), you have some incorrect information. You say that Jofu, a tofu product made by Tomsun, is a soy yogurt. It is not a yogurt at all. Jofu contains tofu, flavor and sweeteners but no active cultures.

"Also, you should be fair to the company. Tomsun did not go bankrupt due to poor product sales. The opposite is true. Most business people agree that the company's demise was due to an overaggressive marketing campaign that left little cash to meet the sudden demand for their product. In fact, even though Jofu has not been advertised in months, it continues to sell very well in supermarkets on the East Coast." Address: President, Ambrosia Soy Co., East Haven, Connecticut.

• ***Summary:*** Section 6 of this report is titled "The Market for Soyfoods" (24 pages). It projects 6.2% growth for the soyfoods industry, and contains the following (much of it provided by Soyatech, Inc. and Soyfoods Center): Analysis and summary. Manufacturers' sales of soyfoods. Manufacturers' sales of soyfoods to major outlets. Manufacturers' sales of soyfoods, by type of outlet. The top six soymilk producers in the U.S. U.S. per capita consumption of soymilk. Retail sales of soyfoods. Retail sales of soyfoods at major outlets. Retail sales of soyfoods, by type of outlet. Graph: Product mix of U.S. soyfood sales. Estimated mix of distribution channels used to market various soyfoods. U.S. soybean production. Characteristics of women's use of soy sauce. Quick Tamari tips. Selected 1988/89 new product introductions: Soyfoods.

Under "Report Highlights and Special Features" we read: "Soyfoods continue to gain popularity with mainstream consumers, as sales are expected to top the $380 million mark, at the wholesale level, by year-end. At the retail level, sales of tofu alone are currently pegged at $77 million, with supermarkets capturing close to 60% of dollar volume."

Overall report Contents: 1. Executive summary. 2.

© Copyright Soyinfo Center 2013

The overall market for health and natural foods (including Soyfoods 1979-1988, with forecast to 1998). 3. The market for health and natural dairy foods. 4. The market for health and natural grocery products. 5. The market for health and natural snack food products. 6. The market for soyfoods. 7. The market for health and natural grains and cereals. 8. The market for health and natural frozen foods. 9. The market for herbal products. 10. Distribution channels. 11. Factors affecting demand. 12. Trends in organic farming. 13. Competitor profiles: Alta-Dena Certified Dairy, Arrowhead Mills, Barbara's Bakery, Celestial Seasonings, Golden Temple, San-J International, Thompson Kitchens. Tivall U.S.A./Garden Gourmet, U.S. Mills (partial list). 14. Directory of more than 200 health and natural food producers. Address: Commack, New York. Phone: 516-462-2410.

9099. **Product Name:** [Tofu Burger with Sea Vegetables].
Foreign Name: Galette de Tofou aux Algues Marines.
Manufacturer's Name: Ferme de Jas.
Manufacturer's Address: Eourres, 26560 Séderon, France. Phone: 92.65.10.95.
Date of Introduction: 1989. July.
Ingredients: Tofu, rice, sea vegetables, shoyu, sunflowerseed oil, spices, salt, flour.
Wt/Vol., Packaging, Price: 90 gm vacuum pack.
How Stored: Refrigerated.
New Product–Documentation: Letter and Labels from Anthony Marrese. 1989. June 7. This product was introduced in July 1989. Label. 2.75 inches diameter. Paper. Black on blue. Illustration of a sun rising over a farm, and 3 soybean leaves. "Préparation alimentaire à base de soja. Nature et Progres logo. 50% tofu and 40% rice." Organically grown (Produits de culture biologique).

9100. **Product Name:** Grilled Tofu in Peanut Sauce, or Grilled Tofu in Black Bean Sauce.
Manufacturer's Name: Jaclyn's Food Products, Inc.
Manufacturer's Address: P.O. Box 1314, Cherry Hill, NJ 08034. Phone: 609-983-2560.
Date of Introduction: 1989. July.
Ingredients: Peanut Sauce: Organically grown brown rice, tofu (organically grown soybeans, purified water, nigari, calcium sulfate), peanuts, green beans, carrots, corn, onions, peanut oil (non-hydrogenated), tamari, garlic, rice syrup, sea salt, sesame seed oil (lightly roasted), natural herbs and spices. Ingredients for the second recipe are identical except that Black Beans are used in place of peanuts.
Wt/Vol., Packaging, Price: 10.75 oz box, 6 per case. Retails for about $3.09–$3.66 each.
How Stored: Frozen.
Nutrition: Per 10.75 oz. serving: Calories 270, protein 19 gm, carbohydrate 44 gm, fat 9 gm, cholesterol 0 mg, sodium 145 mg.
New Product–Documentation: Leaflet. 1989. April. "Jaclyn's microwaveable frozen dinners." Shows both packages and lists all ingredients. "Jaclyn's Food Products, Inc. was begun about one year ago [4/88?] to develop and market natural foods products for health and natural foods stores. They are sold exclusively through health food distributors.

Soya Newsletter. 1989. May/June. p. 8. Contact Robert Savar. Microwaveable. Tardosky. 1989. Whole Foods. Nov. p. 50. They are natural TV dinners. Both come with a side order of organic brown rice and a vegetable medley. The dinners were developed by a five star chef says company president Robert Savar.

Label. 1989. 7.5 by 6 by 1.25 inch deep paperboard box. Brown, black, light blue and dark blue on pinkish tan. Front panel has a color photo of the meal. "All natural. Cholesterol free. Dairy free. High fiber. Reduced calories. Reduced sodium. Heat and serve in your oven or microwave." Soyfoods Center product evaluation. 1990. Feb. 12-13. Both entrees contain frozen tofu with a chewy texture. The black bean sauce is nice. The peanut sauce could be much better.

• ***Summary:*** Contents: Abstract. Introduction. Variables in manufacturing tofu: Soybean variable, processing variable, maceration and extraction (soaking and grinding) stages, filtration and heating stages, coagulation stages, types and concentration of coagulants used in tofu manufacturing. Tofu products.

Tables: (1) Chinese nonfermented soy food products. Five columns show: Food items, Chinese names, organisms used, description, uses. The soy foods are: Fresh green soybeans (*mao-tou*). Toasted soy powder (*tou-fen*) (Description: "Ground toasted dry soybeans, nutty flavor"). Soy sprouts (*huang-tou-ya*). Soy milk (*tou-chiang*). Soy milk film / yuba (*tou-fu-pi*). Soybean curd (*tou-fu*).

(2) Chinese fermented soy food products. Five columns (same as table 1) The soy foods are: Fermented whole soybeans (*tou-shih*). Soy sauce (*chiang-yu*). Soy paste (*chiang*). Fermented tofu (*so-fu* [*sic*]). Actinomucor or Mucor molds are used. Description: Creamy cheese, mild flavor, salty. Uses: Relish, also cooked with meat or vegetable.

(3) 1987 consumption of soybeans as foods in Asian countries. The results are presented here in descending order of per capita consumption: Per capita soybean consumption, country (population), total soybean consumption in 1,000 tonnes. 13.3 kg/capita, Taiwan (19.6 million), 260,000 tonnes. 9.3 kg/capita, Japan (122.2 million), 1,141,000 tonnes. 9.0 kg/capita, Indonesia (175 million), 1,575,000

© Copyright Soyinfo Center 2013

tonnes. 7.8 kg/capita, South Korea (42.1 million), 330,000 tonnes. 7.7 kg/capita, Singapore (2.6 million), 20,000 tonnes. 6.9 kg/capita, China (1,062 million), 7,325,000 tonnes. 3.4 kg/capita, Malaysia (55 million), 55,000 tonnes. 2.2 kg/capita, Thailand (53.6 million), 118,000 tonnes. 0.3 kg/capita, Philippines (61.5 million), 18,000 tonnes. (4) Nutritional composition of traditional nonfermented foods: Fresh green soybeans, toasted soy powder, soy sprouts–raw, soy milk, soy milk film / yuba, tofu (Source: *Food Composition Table for Use in East Asia*, 1978). (5) Nutritional composition of traditional fermented foods: Fermented soybeans [tou-shih], soy sauce, soy paste [doujiang], fermented tofu (Source *Food Composition Table for Use in East Asia,* 1978).

In China, fried tofu is called Tou-Pok. Address: American Soybean Assoc., 541 Orchard Rd., #11-03 Liat Towers, Singapore 0923, Republic of Singapore.

9102. Kim, Seung Ho; Kwon, Tai-Wan. 1989. Vegetable protein foods in Korea. In: T.H. Applewhite, ed. 1989. Proceedings of the World Congress on Vegetable Protein Utilization in Human Foods and Animal Feedstuffs. Champaign, IL: American Oil Chemists' Society. xii + 575 p. See p. 439-42.

• ***Summary:*** Contents: Abstract. Introduction. Situation of traditional protein foods. Situation of vegetable proteins. Traditional protein foods in Korea: Soy sauce (*kan jang*), hot soy paste (*ko chu jang*), *chung kuk jang* (a kind of soy paste made by mixing natto [*naap doo*] with seasonings [salt, red pepper, and garlic], and grinding then aging the mixture), soybean sprouts (*kong na mool*).

Note: This is the earliest English-language document seen (March 2009) that uses the term "ko chu jang" to refer to Korean-style red pepper and soybean paste (miso).

Note 2. This is the earliest English-language document seen (Jan. 2012) that uses the term "chung kuk jang" to refer to Korean-style natto.

Tables: (1) Domestic Korean production and import of soybeans from 1982 to 1987. Domestic production rose to 250,000 tonnes from 233,000 tonnes. Imports for food uses rose to 144,000 tonnes from 104,000 tonnes. Imports for feed uses rose to 936,000 tonnes from 479,000 tonnes. Total supply rose to 1,330 tonnes from 816 tonnes, up 63% in 5 years.

(2) Consumption of soybeans in traditional Korean foods, in 1,000 metric tons, from 1982 to 1987 (1982/1987). Figures in parentheses are for home production. Soy sauce (*kan jang*) 69(50)/70(51). Soy paste (*doen jang* [Korean soybean miso]) 51(41)/50(40). Hot soy paste (*ko chu jang*) 5(4)/5(4). Soybean curd (*doo bu*) 60/114. Soy milk (*doo yoo*) 7/14. Others: Homemade soybean curd and soy milk, *chung kuk jang, choon jang* (kinds of soy paste), soybean sprouts (*kong na mool*), and whole soybeans 145/141. Total 337/394, or an increase of 19.9% in 5 years.

Note: This is the earliest English-language document seen (March 2009) that uses the term "choon jang" to refer to Korean-style soybean paste (miso).

(3) Domestic production and import of soybeans in Korea (Estimated for 1987, in metric tons): Soy protein–Textured vegetable protein (domestically made) 4,500. Soy protein isolate (import) 1,800. Soy protein concentrate (import) 150. Wheat protein–Textured vegetable protein (domestic) 900. Vital gluten (domestic) 150. Gluten (wet & dry) (import) 409. Total 7,909.

(4) Nutritional composition of soybeans and soybeans sprouts (per 100 gm).

Figures show: (1) Manufacturing method for rice hot soy paste (*ko chu jang*) (flow sheet). Numbers represent typical ratio of ingredients in volume. (2) Manufacturing method for chunk kuk jang (a type of soy paste) (flow sheet). Numbers represent typical ratio of ingredients in volume.

A photo shows one of the authors. Address: Korea Food Research Inst., P.O. Box 131, Chongryang, Seoul, South Korea.

9103. Kumoda, Yasuo. 1989. Re: Tofu as a potentially hazardous food. Mori-Nu Tofu does not require refrigeration. Letter to Mr. Maurice Guerrette, New York State Dept., Division of Food Inspection Services, One Winners Circle, Albany, NY 12235. 2 p. [1 ref]

• ***Summary:*** This is one of the first letters sent by Morinaga to the department of health in each of the continental 48 states as a result of health inspectors in upstate New York wrongly removing Mori-Nu Tofu from several stores. "We have been informed of recent efforts on the part of health department officials to impact and cite stores that are not conforming to the FDA Model Food Sanitation Code regarding water-packed tofu (soybean curd). We commend this action but seek your advice on the following:

"* The Retail Food Protection Information Manual Interpretations on 'Soy Protein Products Considered to be Potentially Hazardous Food' clearly state that any soy protein products, including tofu, are to be considered potentially hazardous foods and must be maintained at safe food temperatures of at least 45ºF or below.

"* We know of some instances where water-packed tofu was ordered relocated to dairy or deli cases due to the inability of produce department refrigeration units to maintain temperatures within the FDA guidelines."

The letter then explains that aseptically packaged Mori-Nu tofu does not need to be refrigerated, yet that some inspectors, unaware of this, have erroneously ordered it to be moved out of the produce section and into refrigerated dairy or deli cases. It asks if the state would be willing to issue a memorandum concerning Mori-Nu's exemption, or provide Morinaga with a list of local food inspection offices so that Morinaga might contact them directly. Address: General Manager, Morinaga Nutritional Foods, Inc., 5800 South

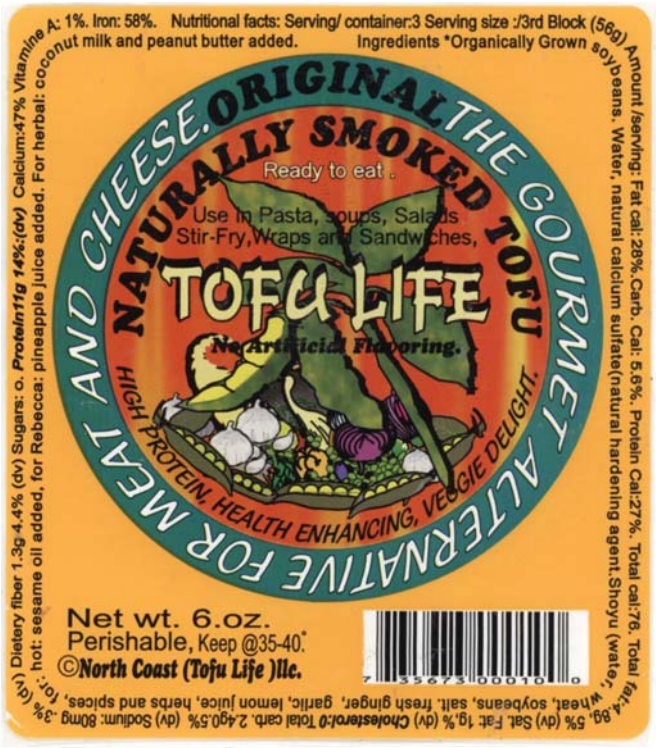
9108. **Product Name:** [Vetara Indonesian-Style Tofu (With Herbs, Napolitana, With Rice, Bali, Rames)].
Foreign Name: Vetara Tofu (Gekruid, Napolitana, With Rice, Bali, Rames).
Manufacturer's Name: Natufood B.V.
Manufacturer's Address: Fahrenheitstraat 18, 3840 BN Harderwijk, Netherlands.
Date of Introduction: 1989. July.
Wt/Vol., Packaging, Price: 325 gm.
New Product–Documentation: Natufood Catalog. 1989. July/Sept. p. 38.

9109. **Product Name:** [Vetara Vegetarian Refrigerated Products: Vetara Smoked Tofu, Natural Tofu (organic EKO mark, or non-organic), Saté Tofu, Vetaburgers (Plain, With Pineapple, With Cheese & Onion), Natuburgers, Frankfurter Sausages, Wiener Sausages, Saté (Without Sauce), and Schnitzel].
Foreign Name: Vetara Vegetarische Koelprodukten: Vetara Tofu Gerookt, Tofu Naturel (EKO mark, or non-organic), Saté Tofu, Vetaburgers (Plain, Ananas, Kaas-Ui), Natuburgers, Frankfurter Worstjes, Wiener Worstjes, Saté (Zonder Saus), Schnitzel.
Manufacturer's Name: Natufood B.V.
Manufacturer's Address: Fahrenheitstraat 18, 3840 BN Harderwijk, Netherlands.
Date of Introduction: 1989. July.
How Stored: Refrigerated.
New Product–Documentation: Natufood Catalog. 1989. July/Sept. p. 42.

9110. **Product Name:** Tofu Life Naturally Smoked Tofu. Renamed Tofu Life Original in about 1994.
Manufacturer's Name: North Coast Finest Inc. Renamed North Coast Distributors in July 1993.
Manufacturer's Address: Soquel, California.
Date of Introduction: 1989. July.
Ingredients: Organic tofu, shoyu (a soy sauce), fresh ginger, garlic, herbs and spices.
Wt/Vol., Packaging, Price: Vacuum packed. Retails for $1.66 for 0.30 lb (5/92 Lafayette, California).
How Stored: Refrigerated.
New Product–Documentation: Product with Label purchased at Open Sesame in Lafayette, California. 1992. May 1. 2.5 by 1.5 inches. Blue letters on white. Self adhesive. "Naturally smoked. No artificial ingredients, no colorings, no liquid smoke flavoring." Packed on April 30. Sell by June 9. Tried to phone company on 4 May 1992 but two phones numbers were no longer in service: 408-462-1634, and 408-763-1441.

Talk with Hanan Onn. 1992. Dec. 10. His company started making smoked tofu in Soquel in about July 1989. He purchased his tofu from Buddy Hamel of Clearway.



In Oct. 1991 he moved the company to 381-P Pine St. in Watsonville, California. Then in June 1992 he moved to his present location at 2655 Cloverdale, Concord, California. Phone: 510-798-4393 or 510-944-0599. His name is Israeli and he belongs to a Kibbutz in Israel. The Kibbutz, which now makes fruit juices, is looking to diversify into new food products and may consider soyfoods.

Call from Onn. 1993. April 13. He is planning to relocate his business making smoked tofu in Benicia.

Call from Onn. 1994. July 14. About a year ago he changed the company name to North Coast Distributors. He is now located at 1717 Solano Way, Concord, CA 94520. Phone: 510-798-4393. He is disappointed that Buddy Hamel of Clearway started making smoked tofu like his last year. He started making his own tofu 1 month ago. He hopes to introduce a new Tofu Pâté soon.

Product with Label purchased at Diablo Foods in Lafayette, California. 1997. May 28. New label: 3.5 x 5 inches. Red, brown, green, and black on white. One illustration on the front panel shows a cornucopia at the base of a vertical sheaf of grain. Another shows three soybean leaves and two pods. The border is bamboo. "No artificial ingredients. The gourmet alternative for meat and cheese. Firm." 6 oz vacuum pack retails for $2.99. Label copyright by NCD 1995. Chof-K kosher pending. Note: The company is now located in Benicia but the label says Concord.

Product with new label, leaflet, and sandwich brought to Soyfoods Center by Hanan Onn. 2006. Feb. 14. Ingredients: Organically grown soybeans, water, natural calcium sulfate (natural hardening agent), shoyu (water, wheat, soybeans,

© Copyright Soyinfo Center 2013

salt), fresh ginger, garlic, lemon juice, herbs and spices. Contains 15-18 gm of protein per 100 gm of tofu. 50-55 days shelf life unopened and refrigerated. Soyfoods Center taste test: Flavor, texture, aroma: All 10. Among the smoked tofu types, the best sellers are: (1) Original. (2) Lemon-Garlic. (3) Hot Teriyaki. All are now priced at $2.99 at Whole Foods.

9111. **Product Name:** Sweet Indulgence Cakes (Frozen, European-style layer cakes): Lemon Almond Mousse Cake, Carob Walnut Torte, Carob Apricot Torte, Zesty Orange Cream Cake, Carrot Cream Cake, Carob Walnut Torte, Carob Mousse Cake. Breakfast Cakes: Fruitty Pound Cake, and Carrot Spice Cake.
Manufacturer's Name: Now & Zen.
Manufacturer's Address: Office: 1838 Golden Gate Ave., San Francisco, CA 94115. Bakery: 15th Ave. Baking Co., 1401 Irving St., San Francisco, CA 94122. Phone: 415-563-5099 OF. 415-753-6208 Bakery.
Date of Introduction: 1989. July.
How Stored: Frozen.
New Product–Documentation: Carol Harvey. 1990. City Sports. June. p. 66, 68. Talk with Miyoko Nishimoto. 1990. June 4. Miyoko grew up in America and majored in philosophy at St. John's College in Annapolis, Maryland. She started her business in San Francisco in July 1989. She makes the products at a bakery and sells them all herself. She has a line of 6 European-style layer cakes, and a line of two loaf-type cakes. The former are made from both tofu and okara, while the latter contain no tofu, only okara used as a flour substitute. She buys her tofu from Quong Hop; she used to buy from Wildwood. The tofu is firm nigari tofu made with organically grown soybeans. She uses a Cuisinart to puree the tofu and it takes much too long. The cake layers are all make from okara, and the creams, fillings, and frostings are made from tofu. She has a brochure describing the products. She has gotten a lot of media coverage, incl. San Francisco Focus (March 1990). Some of the cakes are sold at the bakery where she makes them. Most of the ingredients are organically grown. She uses only a little whole wheat flour.

She is now writing a cookbook which may be titled *Not for Vegetarians Only* that will be published by The Book Publishing Co. at The Farm in Tennessee. It will be a vegan cookbook that has mainstream appeal, with some French

© Copyright Soyinfo Center 2013

cooking techniques. She is now 6 months pregnant and wondering what will happen to her business. She wants to find a baker.

Manufacturer's brochure (full color, 11 by 8.5 inches). 1989. "Now and Zen: An enlightened bakery. Indulgence is good for you, but only Now & Zen." A lovely color photo shows 5 delectable looking round cakes and 3 rectangular loaf cakes.

Leaflet. 1990. "Now & Zen: An Enlightened Bakery. 2 pages. Dessert for a main course? Okay, but only Now and Zen!"

9112. **Product Name:** Soy Deli Tofu Burgers [Barbecue Style, Cajun Spice, Curry Spice, Garden Style, Italian Spice, Original, Taco Spice, Tofu-Tempeh, or Teriyaki].
Manufacturer's Name: Quong Hop & Co.
Manufacturer's Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.
Date of Introduction: 1989. July.
Wt/Vol., Packaging, Price: 6.1 oz.
How Stored: Refrigerated.
New Product–Documentation: Ad, quarter page black-and-white, in Whole Foods. 1989. Sept. p. 132. "Make a healthy choice. New! From Soy Deli. The original organic tofu burger. Nine organic meals in a minute. Strengthen your health food line with the nine new international flavors of Soy Deli organic tofu burgers. All natural ingredients, no preservatives, made from the finest nigari tofu. Pre-cooked with a delicious blend of natural spices. Simply heat and serve, or add to your favorite recipes in place of meat. Good shelf life. High protein, low sodium, no cholesterol, meat or dairy products. Refrigerated or frozen." A photo shows the label. Note: Quong Hop & Co. first introduced a tofu burger in Jan. 1979.

Talk with Ben Lee of Quong Hop. 1989. Sept. 1. These products were launched in July 1979. The full-color label is printed using a 6-color process. The company hopes the new product will make the transition to the typical deli case in delis; they are not shooting for the deli case in supermarkets. Soyfoods Center product evaluation. 1989. Sept. 9. So-so. Quite dry and crumbly, not juicy. Poor cohesiveness. No instructions for cooking in microwave oven. Flavors are okay, but what is the need for so many? It is not clear whether or not the product is fried.

Spot in Whole Foods. 1989. Nov. p. 83. Available in 9 international flavors. "The burgers are pre-cooked in high-oleic safflower [oil]... contain no meat or dairy products." Ad (5 by 7 inches, black and white) in Whole Foods. 1990. Feb. p. 36. "Make a healthy choice. New! From Soy Deli. Nine organic meals in a minute." Lists the 9 flavors.

9113. Sun, Xiaowei. 1989. Development and evaluation of tofu type products using whole soybean and defatted soy flour. MSc thesis, University of Georgia. vii + 66 p. 28 cm. [68 ref]
• ***Summary:*** The author received her BSc degree from Zhong-shan Univ., China, in 1984. Contents: Acknowledgments. List of tables. List of figures. Section I. Literature review. Section II. Chemical, texture profile and sensory analyses on tofu made from whole soybean and defatted soy flour. Abstract. Introduction. Materials and methods. Results and discussion. Conclusion. References. Address: Dep. of Food Science & Technology, Univ. of Georgia.

9114. Timmins, Thomas P. 1989. Timmins Group. 105 Beacon St., Greenfield, MA 01301. 10 p.
• ***Summary:*** Timmins, founder and president of Tomsun Foods International, has started a new company, a consulting firm named Timmins Group. He has 17 years management experience in the food industry and 12 years with Tomsun. This packet of information consists of a cover letter, a description of five areas in which the Timmins Group will offer consultation, and a resume of Timmins past experience.

He graduated in 1967 from the University of Notre Dame in Indiana with a BA degree, magna cum laude. 1972-73 he worked for Wadco Foods, Inc. in Estherville, Iowa, as supervisor of shipping and receiving. 1973-75 he was manager of Yellow Sun Natural Foods Cooperative in Amherst, Massachusetts. This food co-op had 500 member families and was a pioneer in the organic farming movement in New England. 1975-77 he was sales manager at Llama, Toucan, and Crow, a natural foods distributor in Brattleboro, Vermont. In 1977 he was a co-founder of Tomsun Foods International, Inc., an early tofu manufacturer in Greenfield, Massachusetts. In 1982 Tomsun was named to the INC., Magazine 500, a group of the fastest growing small companies in the country. In Dec. 1986 the company conducted an initial public stock offering to support the launch of Jofu, a refrigerated tofu and fruit snack.

Note: Timmins is no longer involved with Tomsun Foods or Jofu. By Oct. 1991 he had developed a vegetarian ham (using soy protein isolates made by Protein Technologies International) and shipped 60,000 lb to Taiwan. Address: Greenfield, Massachusetts. Phone: 413-772-0035.

9115. **Product Name:** White Wave Tofu Cottage Salad (Non-Dairy Cottage Cheese).
Manufacturer's Name: White Wave, Inc.
Manufacturer's Address: 1990 North 57th Court, Boulder, CO 80301. Phone: 303-443-3470.
Date of Introduction: 1989. July.
Ingredients: Tofu (water, soybeans, calcium sulfate and magnesium chloride), soy oil, dehydrated onion and dill weed, citric acid, sorbic acid, salt.
Wt/Vol., Packaging, Price: 8 oz tub, 12 per case, retails for about $1.65.
How Stored: Refrigerated, 28 day shelf life.

New Product–Documentation: Soya Newsletter. 1989. May/June. p. 8.

9116. Reeder, John. 1989. U.S. import/export statistics on soy products (Interview). *SoyaScan Notes.* Aug. 3. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** John's specialty is tracking statistics on fats, oils, and oilseeds, plus natural gums and resins. The main publication carrying soy-related import statistics is titled "U.S. Imports for Consumption: U.S. Census Bureau Publication IM146." It is published by the Foreign Trade Div. of the U.S. Census Bureau and is available in a monthly published paper version, or on microfiche, or in electronic database form. With soy, it covers soybeans (Heading/subheading 1201.00), soy flour (1208.10), and soy sauce (2103.10). Miso and tofu statistics are lumped in with hundreds of other minor products in the catch-all basket category "Edible Preparations."

In the tariff part of the report, for each item there is an article description, units of quantity (e.g. kg), and rates of duty (general, special, or 2). For example, soy sauce has a general duty rate of 3%, which is granted to all "most favored nations." The "Special" column shows that it is imported duty free from countries with the codes A (Generalized System of Preferences, applied to many developing countries), E (CBERA or Caribbean Basin Economic Recovery Act), or IL (Israel). CA = Canada gets a reduced rate of 2.7%, which will be reduced to zero over the next 5-10 years under the recent Canadian Free Trade Agreement. Column 2, indicates that a 35% import duty applies to most Communist countries, except those (such as China) with "Most Favored Nation" status, when get the General rate.

In the imports part of the report, under each product (e.g. soy sauce, thin = soy sauce) there is a listing of countries, sorted by region from which the USA imports. After each country there may be the codes GSP (the amount of product imported under the lower General System of Preferences rate, because it has been shown to be as domestic product of that country), and OGN (the amount of product imported under the General rate because it has not been proved to be a domestic product), plus a total for the two. Then statistics for the current month and cumulative from January to date, of the quantity imported (which may be reported in two sets of units, Qty-1 and Qty-2, such as pounds and gallons), the customs value (the Free on Board or FOB value declared by the importer at the foreign port of export), and the calculated duty received by the U.S. based on the customs value.

The report is also available at federal depository libraries, such as Univ. of California at Berkeley. On 1 Jan. 1989 the way of reporting data was changed to the "Harmonized Tariff Schedule of the United States" from the old "Tariff Schedule of the United States" (TSUS) system. This changes some nomenclature and makes the U.S. reporting more similar to that of may other countries, which facilitates determining tariffs and quotas on given items.

Corresponding export statistics are given in another report titled "Schedule B: U.S. Exports of Domestic Merchandise, FT410" published monthly by the U.S. Census Bureau. Each product has the same product code (e.g., soy sauce is 2103.10).

Another publication is the Directory of International Trade Analysts: Commodity Agreements.

Good databases for searching soy-related data are Disclosure, and Nexus (business news). Address: U.S. International Trade Commission, Agricultural Div., Washington, DC 20436. Phone: 202-252-1319.

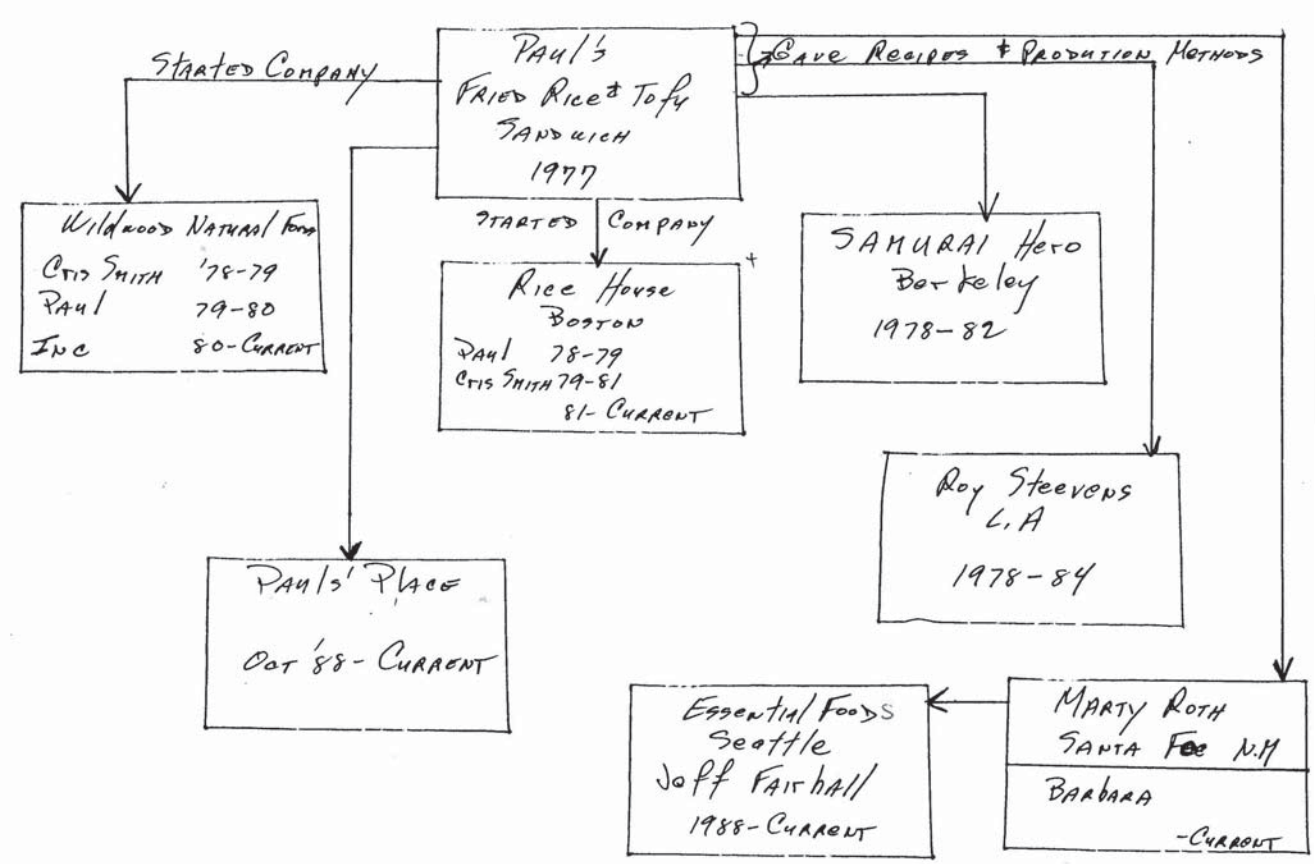
9117. Duchesne, Paul. 1989. Re: Enclosing labels and a chart. Letter to William Shurtleff at Soyfoods Center, Aug. 11. 1 p. Handwritten, with signature.
• ***Summary:*** "Bill, Enclosed are copies of the labels that feature brown rice and tofu as main ingredients, a chart (see next page) showing the spinoff companies from our original creation in 1977, and an invoice... Good luck with your project and as we still say in Fairfax, have a nice day,..." Address: Fairfax, California.

9118. *Toyo Shinpo* (*Soyfoods News*). 1989. Tôfu no kakei shôhi was teichô: Natsu no hiyayakko juyô ni kitai [Tofu's domestic consumption is low: Expecting the demand for chilled tofu in summer]. Aug. 11. p. 7. [Jap]
• ***Summary:*** In 1988 Jan. to April, per household national average tofu consumption, ¥2008 (97.5% of the same period in 1987). 24.75 cakes (95.2% of 1987).

Number of cakes of tofu per year per household:
1979 87.02.
1980 86.89. 1981 86.91. 1982 87.54. 1983 90.43. 1984 89.16. 1985 88.48.
1986 85.40. 1987 86.43. 1988 85.07.

9119. *SoyaScan Notes.* 1989. Brief history of Witte Wonder in the Netherlands (Overview). Aug. 12. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** The main sources of this information are letters from and interviews with Sjon Welters and Richard Leviton. In 1979 a non-profit natural foods foundation called Stichting Natuurvoeding den Haag was started by Cees van Rest as the framework within which to start a store that sold natural and macrobiotic foods. Many of the early Dutch natural food companies were set up as non-profit foundations based on the idea and model started by Manna (Stichting Natuurvoeding Amsterdam). The foundation was governed by a board of directors, in which van Rest and his father and wife played key roles. The store was located at Piet Heinstraat 80, 2518 CK Den Haag (The Hague). The foundation soon decided to expand its activities from retailing to include food manufacturing. So it established Witte Wonder Products

© Copyright Soyinfo Center 2013



as its food manufacturing division and registered Witte Wonder as its brand. For a logo, they used an illustration of a traditional tofu master taken from *The Book of Tofu* by Shurtleff and Aoyagi. In April 1981 they began to make 100 kg/week of tofu and tempeh, plus seitan, in the back of the retail store. In Nov. 1983 Nico van Hagen and his wife Loes Witteman were the principal tofu makers. They made 900-1,200 kg/week of tofu, plus 500 kg/week of seitan.

At one point, they changed the store into a restaurant with a space to give classes, but kept making soyfoods there. Then they started to make tofu dips at another shop. Finally they sold the restaurant and consolidated the two soyfood production operations. By Oct. 1984 they were making 2,000 lb/day of tofu.

In about 1985 Witte Wonder moved into a new plant at Gelreweg 4b, 3843 AN Harderwyk, Netherlands. They needed more money to make the move successful, so they invited Solnuts B.V. to join Witte Wonder as a source of capital. But the capital needs increased and Solnuts agreed to provide the additional capital in exchange for a controlling interest in Witte Wonder. This put the van Reests in a difficult position, but without much choice. So on 1 April 1986 Witte Wonder was acquired in an unfriendly silent acquisition by Solnuts B.V. Cees van Rest and his father owned 50% of the company's stock plus one majority vote. Solnuts owned the other 50%. The majority vote changed hands at the moment Solnuts made a new investment in Witte Wonder. With this the van Rests lost the controlling interest. Cees van Rest resigned as a director, becoming unemployed.

In late March 1990 Solnuts B.V. was just completing an agreement to sell the company back to Wim Bakker, who had been running it for them since 1986. Solnuts considered Witte Wonder to be too far away from their core activities.

9120. Morinaga Nutritional Foods. 1989. Mori-Nu Tofu sponsors internationally-famous Gold's Gym personal workout video (News release). 5800 South Eastern Ave., Suite 270, Los Angeles, CA 90040. 2 p. Aug. 14.
• ***Summary:*** "Morinaga Nutritional Foods... has announced that it will officially sponsor the first-ever personal workout video series from the internationally-famous Gold's Gym.

"The Gold's Gym Personal Trainer Series includes one 46-minute beginners exercise video and a 55-minute intermediate tape. The two-tape package features Gold's Gym personal fitness instructors Marcia Levine and Christian Duffy as well as a variety of drop-in guest celebrities, top athletes and physique stars...

"'We thought getting behind Gold's was a natural because fitness without nutrition is self-defeating,' said Arthur Mio, national sales manager for Mori-Nu Tofu. Mori-Nu will feature an instructional commercial spot starring Levine introducing the Mori-Nu Tofu Shake...

© Copyright Soyinfo Center 2013

"Scheduled for release in early October, the Gold's Gym Personal Trainer Series will be available at a variety of consumer retail outlets nationwide. Suggested retail price is $24.95 including a free two-week membership to Gold's Gym, worth approximately $50." Address: Los Angeles, California. Phone: 213-728-4325.

9121. Welters, Sjon. 1989. Early involvement with soyfoods and Manna in the Netherlands (Interview). *SoyaScan Notes.* Aug. 15. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Sjon was born in 1955. He completed high school plus one year at the National Academy of Fine Arts. Then he dropped out to pursue his interest in the natural foods movement. He got involved with soyfoods when he became a vegetarian in 1973. In Sept. 1975 he started to work for Manna. During 1975-76 he did a lot of experimentation with soyfoods production while working at Manna, and he was involved in selling the shoyu and miso that Manna had been importing from Muso in Japan since 1975. In Sept. 1977 Sjon left Manna and started his non-profit natural foods foundation (Stichting Natuurvoeding Alkmaar) and his own natural foods store, both at Alkmaar (pronounced AL-ek-mayr), the Netherlands, based on the model established by Manna. During 1980-81 Sjon's foundation merged with Manna's foundation and Sjon started to work as director of operations at Manna, and he first became involved with the production of tofu and seitan. During the early 1980s Sjon was an editor of the *Manna Bulletin.* Address: Craft International Consultants, 21 Wetherbee St., Acton, Massachusetts 01720. Phone: 508-264-4011.

9122. Morinaga Nutritional Foods. 1989. Mori-Nu Tofu introduces new in-store display stand (News release). 5800 South Eastern Ave., Suite 270, Los Angeles, CA 90040. 2 p. Aug. 17.
• ***Summary:*** "Morinaga Nutritional Foods has introduced a new in-store display unit, which will enable Mori-Nu Tofu to be merchandised in the refrigerated or non-refrigerated section of health food stores nationwide.

"The new stand will allow aseptically packaged Mori-Nu Tofu to be positioned in either the deli or produce section in contrast to water-packed tofu, which must be refrigerated." Address: Los Angeles, California. Phone: 213-728-4325.

9123. Mejia, John. 1989. Move tofu to dairy, deli cases for proper cooling: Inspectors. *Supermarket News.* Aug. 21. p. 29.
• ***Summary:*** "A mixup over where and how tofu should be merchandised has turned into a sticky mess in recent weeks for several retailers.

"That's because local health inspectors nationwide have cracked down on sanitation violations in produce departments, directing retailers to move tofu to deli and dairy cases, and in some cases citing them for not properly refrigerating the soybean product often merchandised next to oriental vegetables on produce wet racks. Tofu, if water-packed as it usually is, can spoil unless properly refrigerated at temperatures below at least 45ºF."

"The problem is that many retailers either sell tofu in produce cases or not at all, contending that tofu can't compete in a dairy or deli case against high-margin, high-turnover items such as milk, cheese or yogurt. Moreover, many retailers say they won't carry it in deli or dairy cases because consumers won't think to look for it anywhere but in the produce department."

"Joe Ferrara, assistant director of New York's Division of Food Inspection Services, confirmed that health inspectors are indeed taking a closer look at tofu. 'Produce cases are not a place to display tofu.'"

"While tofu makers want their products sold in colder temperatures to guarantee product integrity, some retailers have balked. 'Tofu gets lost in deli and dairy cases,' said Tim Markowski, a produce buyer for Kohl's Food Stores, Milwaukee. 'There are no tie-in items such as oriental vegetables, and people don't always know where to find it unless it's in the produce department where they're used to seeing it.'"

9124. Vigoda, Arlene. 1989. Tofu is spreading to bacon, chocolate. *USA Today.* Aug. 21. p. 4D. Final Edition.
• ***Summary:*** Legume Inc. of Montvale, New Jersey, has introduced Barat Tofu Chocolates–sweetened with Sucanat, organic granulated cane juice with vitamins and minerals.

Nasoya Foods Inc. of Leominster, Massachusetts, has introduced four creamy salad dressings, tofu vegetable dips, and a tofu-based eggless mayonnaise named Soyannaise.

Bill Shurtleff of Soyfoods Center (Lafayette, California), says that tofu has "gone from a counterculture food to a mainstream food."

9125. Roach, Michael. 1989. Work with tofu among Tibetan refugees in southern India (Interview). *SoyaScan Notes.* Aug. 22. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Michael is helping 50,000 Tibetan refugees in south India, and especially 1,500 monks, originally from the Sera monastery in Tibet, who now live at Bylakuppe, near Mysore city, in Karnataka. The nearest airport is Bangalore. These people fled Tibet in 1959, and were in prison in northern India for a decade; many got tuberculosis and died. Finally in 1970 they were released and allowed to start a monastery in south India.

Michael is in the diamond business and he has set up enterprises there including diamond cutting and entering ancient Tibetan spiritual texts into computers. Tibetans love tofu, and he wants to start a tofu shop in the community. He is looking for an organization or semi-volunteers to help with

© Copyright Soyinfo Center 2013

the project. Soyfoods Center recommends that he talk with Plenty Canada, which is doing similar work in nearby Sri Lanka.

Concerning the work with tofu at Dharamsala in north India, Michael understands that much of this tofu is sold in bulk to local restaurants where it is served to foreigners who come to see the Tibetan community. The 100 or so monks at the School of Buddhist Dialects have a lot of studying to do and are not able to devote a lot of time to work, such as food production. Address: Andin International, 7 West 45th St. New York, NY 10036. Phone: 212-921-1022. Fax 212-391-0818.

9126. Duchesne, Paul. 1989. History of Wildwood Tofu (Germany), Auenland Tofu, Peter Wiegand, and Wildwood Natural Foods (California) (Interview). *SoyaScan Notes.* Aug. 25. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** According to Soyfoods Center records, Peter Wiegand started one of the earliest known tofu manufacturing companies in West Germany. Duchesne recalls that Wiegand came to America in the spring of 1981 to learn about tofu. He had heard about Wildwood Natural Foods in Fairfax, so he went there and he and Duchesne quickly became good friends. Duchesne showed him the whole operation and spent a great deal of time teaching him how to make tofu and tofu products. After six months of work and study, in the fall of 1981, Peter and his family returned to Germany. Before Peter left, Duchesne encouraged him to make secondary tofu products, such as tofu sausages. After returning to Germany, Wiegand started his company in a small dairy barn. That winter (early 1982) Michael Pierce, who was once Wildwood's best tofu maker and art designer in Fairfax and who now lives in Georgia (Phone: 912-752-8070), went to Germany and lived and worked with Wiegand. There he made tofu and designed the colorful Auenland label showing a sunrise over a rural village.

Wiegand's first company failed; it was too small and too labor intensive. So he raised a lot of money and built a larger company and plant. Wiegand returned to America and asked Duchesne (who had just left Wildwood Natural Foods) to return with him to Germany to help get the new Auenland started. Duchesne declined (since funds were too limited) but his son, Paul Jr., went and worked there for 6 months. In 1983 Auenland introduced a line of second generation tofu products: Pizza, cake, tofunafish salad, mayonnaise, and burgers, many of which were inspired by Wildwood products. Most of his products were sold in Munich, and some in Austria–where Peter was born. In the end, a sausage maker who worked for Wiegand started a tofu sausage business, bought his tofu from Auenland, and ended making most of the money. Wiegand was not a good businessman, not a very practical person. His father in law was putting a lot of money into the company but in the end Wiegand lost most if not all of it... and the shop. Address: Fairfax, California. Phone: 415-453-2360.

9127. Ebine, Hideo. 1989. Re: Retirement dates of soyfoods researchers from the National Foods Research Institute, Japan. Letter to William Shurtleff at Soyfoods Center, Aug. 28. 1 p. [Eng]

• ***Summary:*** Masahiro Nakano retired in 1967, Watanabe Tokuji in 1977, and Hideo Ebine in 1982. The National Food Research Institute moved from Tokyo to Tsukuba in Feb. 1989. Address: Central Miso Research Inst., Shinkawa 1-24-19, Chuo-ku, Tokyo 104, Japan. Phone: 03-551-7161.

9128. Morinaga Nutritional Foods, Inc. 1989. Water hazard. Life preserver (Ad). *Supermarket News.* Aug. 28. p. 24.

• ***Summary:*** This controversial ad, the first one in which one tofu manufacturer publicly (but only in trade publications) criticized typical water-packed tofu, infuriated most larger tofu makers in America. It also appeared in *Produce Business* (Aug. p. 16-17) and in *Natural Foods Merchandiser* (Sept. p. 74-75), but by October it was withdrawn.

Color photos show two packages of tofu. On one side, by a typical container of water-packed tofu is the bold text "Water Hazard. Old-style water packed tofu can leak all over and create a mess. Then there's the shrink, with a shelf life of mere days. And once your customer gets it home, the water must be changed daily." Next to a package of Mori-Nu is the bold text "Life Preserver. Mori-Nu Tofu, on the other hand, is aseptically packaged. Airtight. Bacteria tight. And water tight. With a shelf life of 10 months without refrigeration or preservatives. Very safe. Very convenient."

On 8 Sept. 1989 William S. Freeman of the law firm Cooley Godward Castro Huddleson & Tatum in San Francisco wrote a 3-page letter to Morinaga on behalf of their client, Azumaya, citing what they considered to be four malicious and untrue statements in the ad and demanding that Mori-Nu immediately cease running the ads. Freeman argued that (1) not all water pack tofu presents a potential health hazard, (2) water pack tofu that is pasteurized does not have "a shelf life of mere days," (3) water pack tofu is no more likely than Mori-Nu's to "leak all over and create a mess," and (4) the water in water pack tofu does not need to be changed daily while it is refrigerated. Morinaga's legal counsel, Jorge Arciniega of Whitman & Ransom in Los Angeles, responded with a 4-page letter to Freeman on Sept. 22. Address: 5800 South Eastern Ave., Suite 270, Los Angeles, California 90040. Phone: 213-728-4325.

9129. Brown, Peter J. 1989. From bean to bun: The saga of the soy dog. *Soya Newsletter* (*Bar Harbor, Maine*). July/Aug. p. 1, 12-15.

• ***Summary:*** A look at the tofu hot dog market in America–but with no statistics on the market size or individual

© Copyright Soyinfo Center 2013

products. The major players are Light Foods Inc., White wave Inc., Lightlife Foods Inc., and Northern Soy. An estimated $2 billion worth of meat- or poultry-based hot dogs (1.5 billion lb in 1987) are sold in America. America's first tofu hot dog, Tofu Light Links, was introduced in 1983 by Robert Davis of Light Foods in St. Louis, Missouri. White Wave, which sells Healthy Franks made by a co-packer and aimed at the mainstream market, has just moved into a 24,000 [actually 23,000] square foot plant with almost 50 employees. Company sales are expected to top $3 million in 1989. Lightlife sells to the kosher/pareve market. Last fall East West Journal picked Northern Soy's Not Dog as the best meatless hot dog in America. The keys to success are flavoring, use of vegetable gums, retention of juiciness, and pricing.

Worthington Foods, with more than 350 employees and $75 million is sales, has been marketing meatless meatlike products for decades. They now have 120 such products and the basic goal is to be a close as possible to the real thing. Earlier this summer the *New Bedford Standard-Times* conducted a taste test among young children at a summer camp. The soy hot dog was the second most expensive of the entrants and the kids disliked it, describing it with terms such as "sooooo gross." Address: Contributing editor.

9130. *Frozen Food Age.* 1989. Litetrends / Tofoods taps Haywood president, CEO; Plans tofu dinners. 38(1):76. Aug.
• ***Summary:*** "Charles F. Haywood, former president and chief executive of the National Food Brokers Association, Washington, D.C., has been elected president and chief executive officer of Litetrends / Tofoods Co. Inc., Silver Spring, Maryland." A photo shows Haywood with the large front panel of a new frozen dinner offering which uses tofu as a meat alternative.

9131. Golbitz, Peter. 1989. State of Maine bans aseptic packaging: Law will prohibit sales of aseptic soymilk. *Soya Newsletter* (*Bar Harbor, Maine*). July/Aug. p. 1-3. [1 ref]
• ***Summary:*** Maine's new landmark solid waste bill, L.D. 1431, which goes into effect on 1 Sept. 1990, prohibits the sale of all aseptically packaged beverages and of any other beverage container that cannot be recycled. In section 8. MRSA 1868 titled "Prohibition on certain types of containers and holders, the bill states, 'No beverage may be sold or offered for sale to consumers in this State... In a container composed of aseptic packaging composed of aluminum, paper, and plastic in combination, where those materials are for practical reasons inseparable and commonly referred to as a 'brick-pack.'" Exempted from this legislation are "milk and dairy-derived products," whose containers need not be recyclable nor carry a deposit. The bill hopes to reduce Maine's solid waste by 50% by 1994. Many health food stores in Maine reported that aseptically packaged soymilk is one of their ten best-selling products. The only soymilk presently available in the state is aseptically packaged. It is estimated that far less than 1% of all Tetra Pak cartons sold in Maine contain soymilk. Many other states are now in the process of drafting similar bills for reducing solid wastes. If they follow Maine's policies on aseptic packaging, it could be a major blow for soymilk (and Mori-Nu Tofu) in America. "As Maine goes, so goes the nation." Address: Soyatech, Bar Harbor, Maine.

9132. Golbitz, Peter. 1989. Soya interview: Tom Timmins, soyfoods visionary. *Soya Newsletter* (*Bar Harbor, Maine*). July/Aug. p. 4-6.
• ***Summary:*** Timmins was one of the founders of Tomsun Foods 12 years ago. In 1982 the company was named to the INC. Magazine 500, as one of the fastest-growing small businesses in America. "During 1985 the company launched Jofu, a revolutionary tofu and fruit product, and rang up total sales of over $2.5 million." In April 1989 the company filed for bankruptcy under Chapter 11. It is now being managed by a very skilled and experienced new team and has just re-released Jofu to a receptive market. Recently Timmins, "sensing that the time was right for him to make a move personally, decided to step away from Tomsun and form the Timmins Group, a consulting firm..." that focuses on helping small food companies with strategic planning, financing, staffing, marketing, and joint ventures. Timmins is still a major stock holder in Tomsun.

Looking back, if he could do things differently, Timmins would stretch the launch of Jofu over a 2-year period. Entering the huge New York market as they did stressed the company to the extreme. "We went from 3,000 cases a week to 20,000 cases, within 6 weeks... We were never able to completely fill all our orders. And when we did fill the orders, we were not able to fill them with an adequate profit margin." The stock market crash made subsequent raising of capital difficult.

Advice to soyfoods companies in the 1990s: Make sure that your cash pool is adequate. Find a profitable, regional niche and build on it. Concentrate on product quality. The greatest potential lies in second generation products. In the future, companies should think seriously about international markets in East Asia, Europe, and Latin America.

During the past decade, growth of the soyfoods industry has been hampered by lack of invested capital. The ratio of sales to capital investment is not very favorable. But there was great mass marketing, as with Tofutti.

For the 1990s, Timmins foresees some large companies acquiring existing soyfoods companies, injecting capital, doing more advertising, and putting the products in major distribution channels. Address: Timmins Group, 105 Beacon St., Greenfield, Massachusetts 01301. Phone: 413-772-0035.

9133. **Product Name:** [Tofu Terrine ("Graffity", or "Rainbow")].

© Copyright Soyinfo Center 2013

Foreign Name: Tofu Terrine ("Graffity", or "Regenbogen").
Manufacturer's Name: Life Food.
Manufacturer's Address: Robert-Bunsen-Strasse 6, D-7800 Freiburg, West Germany. Phone: 0761/50 61 55.
Date of Introduction: 1989. August.
Ingredients: Graffity: Tofu, vegetables, sea vegetables, seasonings. * Preponderantly organically grown.
Wt/Vol., Packaging, Price: 200 gm poly bag. Retails for DM 4.00.
How Stored: Refrigerated.
New Product–Documentation: Labels. Sent by Anthony Marrese. 1989. Nov. 3.5 by 1.5 inches. Dot matrix printed on a white self-adhesive label. Refrigerate at 4ºC or below. Ingredients for the "Rainbow" are: Tofu, smoked tofu, spinach, carrots, sesame, and vegetables. These are likewise predominantly organically grown. These products were launched in Aug. 1989 and the company now makes about 40 kg/week.

9134. **Product Name:** [Sesam Tofu Balls].
Foreign Name: "Sesam" Tofu-Kloesse.
Manufacturer's Name: Life Food.
Manufacturer's Address: Robert-Bunsen-Strasse 6, D-7800 Freiburg, West Germany. Phone: 0761/50 61 55.
Date of Introduction: 1989. August.
Ingredients: Tofu, sesame seeds, herbs, spices. Ingredients predominantly organically grown.
Wt/Vol., Packaging, Price: 60 gm each.
How Stored: Refrigerated.
New Product–Documentation: Label and price list sent by Anthony Marrese. 1990. March. They currently make 30 kg/week.

9135. **Product Name:** Lightlife Foney Baloney.
Manufacturer's Name: Lightlife Foods, Inc.
Manufacturer's Address: 74 Fairview St., Greenfield, MA 01301. Phone: 413-774-6001.
Date of Introduction: 1989. August.
Ingredients: 7/92: Tofu (soybeans, water, calcium sulfate), water, isolated soy protein, soy oil, spices, sea salt, beet powder, oleoresin of paprika, vegetable gums.
Wt/Vol., Packaging, Price: 10 oz (238 gm) vacuum pack. Retails for $2.79 (6/90, California). 6 oz (170 gm) vacuum pack retails for $1.99 (7/92, Maryland).
How Stored: Refrigerated.
Nutrition: 7/92: Per 2 oz.: Calories 59, protein 5.9 gm, carbohydrates 74 gm, fat 3.5 gm, cholesterol 0 mg.
New Product–Documentation: Leaflet (8½ by 11 inches, single sided) sent by Richard Rose from Natural Products Expo East at Philadelphia. 1989. Sept. On the top two-thirds of this leaflet is a cartoon in which three boys are talking. "I don't take any baloney from my mom." "Me neither! My mom gives me Foney Baloney. It's the best." The text reads: "Foney Baloney tastes just like traditional baloney but has 75% less fat, half the sodium, and no cholesterol or nitrates. Foney Baloney's number one ingredient is organic tofu." A photo shows the Label (red and white on blue).

Talk with Richard McKelvey, sales manager of Lightlife Foods. 1990. June 20. This tofu-based product was launched in Aug. 1989. It contains no cholesterol or nitrates.

Talk with Michael Cohen. 1991. Sept. 17. The name of this product was created to appeal to children. But now the name is getting in the way of a product with good unrealized potential for adults, so that may rename it.

Product with Label purchased at Fresh Fields, Rockville Pike, Maryland. 1992. July. 20. Label is 3.75 inches in diameter. Self adhesive. Red, white, and yellow on dark blue. "Kids love it! Zero cholesterol. 100% vegetarian. Zero nitrates. Meatless. For a real treat, try it grilled. A delicious, healthful alternative to cold cuts."

9136. Mohamed, S.; Johan, Z.; Bakar, J. 1989. Chickpea, mungbean, cowpea and peanuts as substitutes for soybean curds. *International J. of Food Science and Technology* 24(4):385-94. Aug. [15 ref]
• ***Summary:*** Acceptable tofu could not be formed from chickpea, mungbean, cowpea, or peanuts, when using the standard procedure for making tofu. The firmness (rigidity) of the curd was proportional to the protein content, inversely proportional to the square of the starch content, and negatively correlated with the square of the fat content. "Satisfactory curds could be formed from legume sources other than soybean only after the partial removal of starch (in chickpea, mungbean and cowpea) or oil (in peanuts)." Calcium sulfate was the best coagulant. Address: Faculty of Food Science and Biotechnology, Univ. Pertanian Malaysia, 43400 UPM, Serdang, Selangor, Malaysia.

9137. Newman, Jacqueline M. 1989. Tofu comes of age. *Foodtalk* 12(2):7-8.
• ***Summary:*** A brief history of tofu worldwide. Tofu is a culinary chameleon. The early mentions of tofu by John Saris (1613), Friar Domingo [Fernández] Navarrete (1665), and Benjamin Franklin (1779), each referred to Japanese (rather than Chinese) tofu. "In the United States, commercially tofu was first manufactured by the Chinese in 1915 [sic, in 1878 or before]. It was made by the Quong Hop Company, located in San Francisco. This company, founded in 1906, still exists today."

"While bean curd may not be in the culinary mainstream, there is an amazing increase in its use among non-Asians. Its popularity, which recognizes the nutritional qualities of tofu, may be credited in large part to William Shurtleff and his wife, Akiko Aoyagi. Together they helped make the Western world appreciate tofu, thus increasing the use of this inexpensive and versatile protein food. They are the authors of *The Book of Tofu* detailing its history and background and giving several hundred recipes for its use."

© Copyright Soyinfo Center 2013

After noting the growing popularity of Tofutti and other soy ice creams, Newman reflects: "The idea of freezing bean curd, however, is not new. Iced Bean Curd is one of Yuan Mei's recipes from the *Xi Yuan Cookery Book* written near the end of the 18th century. This book by a poet, government official and author, is a very comprehensive volume of over 300 recipes; only some are about tofu. One difference is that the Iced Bean Curd recipe is meant to be served hot, the doufu in it is first frozen then prepared for use." Address: Prof. at Queens College, New York.

9138. **Product Name:** Nu-Links (Pork-Tofu-Okara Sausage) [Breakfast, Italian-Style, or Hot].
Manufacturer's Name: VitaLite Foods.
Manufacturer's Address: P.O. Box 10, Waynesfield, OH 45896. Phone: 419-568-8638.
Date of Introduction: 1989. August.
Ingredients: Pork, tofu (water, soybeans, calcium sulfate, nigari), Okhara (registered trademark), flavorings.
New Product–Documentation: Talk with Charles Meeker of VitaLite Foods. 1992. Feb. 27. This company is owned by Brenda Kitchem, who is actively involved in its daily operations. This product was launched in August 1989. It took him 8-10 months to get USDA approval to sell this product in interstate commerce since it contains meat–which could spoil. The product contains 65% by weight of lean trim meat and 35% by weight of tofu + okara. They process and flavor the tofu (made with organic soybeans) using a special process. The flavorings are all natural, and no colorings are used. The product is then flash-frozen for shelf life. It looks and tastes just like pure meat and after cooking it tastes like old-fashioned meat that has been butchered and ground immediately. The shelf life of this product far exceeds the shelf life of its all-meat counterpart. The USDA required him to state, immediately beneath the product name, "A pork, tofu and okara product."

The company is growing by leaps and bounds. They now ship 50 cases a day of their 3 products using only 2 employees.

9139. *SoyaScan Notes.* 1989. Herpes and soyfoods: The ratio of lysine to arginine (Overview). Sept. 5. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** A person suffering from herpes (a severe inflammatory virus disease of the skin) should get their protein from foods that have a high ratio lysine to arginine. The foods with the highest ratio are meat, fish, milk and some legumes (but not soybeans, soyfoods, or peas). Foods with a low ratio are nuts, soybeans, soyfoods, wheat, peas, and oats. Per 100 gm edible portion, regular tofu (raw) contains 0.532 gm lysine and 0.538 gm arginine for a ratio of 0.99. Whole boiled soybeans contain 1.108 gm lysine and 1.291 gm arginine for a ratio of 0.86. Pinto beans have a ratio of 1.11.

Note: HPV is the human papilloma virus which, in women, can cause cervical cancer. A papilloma is a benign tumor (as a wart) due to overgrowth of epithelial tissue on papillae of vascular connective tissue (as of the skin).

9140. *Sun* (*La Grange, Illinois*). 1989. New tofu packaging technique makes tofu palatable for American tastes. Sept. 6.
• ***Summary:*** "In survey after survey, tofu tops the list of foods Americans dislike most. This is unfortunate because tofu is one of the most healthy and nutritious foods available... Why then does tofu have such a bad reputation in health-conscious America?

"The answer lies in the traditional methods of making and packaging soybean curd. Most supermarkets today sell tofu which is made first and then packed in water-filled plastic tubs. Also, most other protein-rich foods, like milk and yogurt, are sold in refrigerated dairy cases. Tofu, however, is usually sold in the produce department, where temperatures may not conform to U.S.D.A. recommendations of 41ºF. or lower. This inadequate refrigeration may lead to premature spoilage and sour-tasting tofu. Hence the "bad taste" image.

"In contrast to standard water-packed tofu, Mori-Nu's Silken Tofu is aseptically packaged. Mori-Nu's sterilized liquid ingredients are hermetically sealed in the airtight container, blocking out light, micro-organisms and other factors which could lead to spoilage. The result is fresh tofu made right inside the package. Unless opened, Mori-Nu will remain fresh and bacteria-free without preservatives or refrigeration, for ten months." Readers are invited to write for a free recipe booklet.

Note: Articles similar to this one, based on a Morinaga news release to the popular media, appeared in many newspapers nationwide.

9141. Phipps, Bob. 1989. Sun Youth and Calco: Tofu and bean sprout equipment from Taiwan (Interview). *SoyaScan Notes.* Sept. 7. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Sun Youth Machinery Co. Ltd. has been making bean sprout equipment in Taiwan since 1973, and selling tofu equipment since 1979. Bob has been using their all-stainless steel tofu system for about 6 months and it is excellent. The price was 30-40% below Takai's price and their roller extractor was especially low priced. But their support is terrible. The manual that comes with the system is worthless. When he faxed them asking for details on the tofu making process, their response seemed to indicate that they didn't know much about the tofu-making process. Bob could write a 6-page manual on the problems he had getting started. The main one was their thermometer was off by 20ºC, which caused him to burn his soymilk for 2 weeks and it refused to coagulate.

Sun Youth is a very large maker of bean sprout

© Copyright Soyinfo Center 2013

equipment. They have many sprout systems installed in the USA. Bob does not know of any other tofu systems of theirs installed in the USA.

About 10 years ago there was a falling out among makers of bean sprout equipment in Taiwan. At that time the head salesman for Sun Youth, C.P. Wu, left and started Calco, which means "California Company." Kent Wang is head of Calco in the USA and in Houston. He started making bean sprouts in Houston about 10 years ago. He calls *The Book of Tofu* "The Bible." Calco is a large Taiwanese company that makes bean sprout equipment and is in direct competition with Sun Youth. Calco has about 50 installations all over the USA and they are growing fast. Originally they all made bean sprouts. They often sell bean sprouts at one-third the going price. But they have found that tofu is a good product to sell with bean sprouts so now many (10-12) also make tofu. Kent Wang (Phone 713-699-4420) would know these companies but he tends to be secretive about everything. Kent owns and represents a continuous tofu system from Kosan Shoji Co., Ltd. in Japan. It is quite expensive and quite automated. Kosan Shoji has an attractive catalog but it is all in Japanese. Address: Energy Sprouts, 3602 High Point, San Antonio, Texas. Phone: 512-654-3963.

9142. Phipps, Bob. 1989. Using a videotape increases tofu sales ten-fold in Texas (Interview). *SoyaScan Notes.* Sept. 7. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Energy Sprouts has produced a 3-minute color videotape to help sell their Texas Tofu. They play it in grocery stores and supermarkets. They have 3 TV video units that they rotate among 300 stores. They play the video all day for a week right next to their tofu. They do this at any given store about once every 3 months. On average, tofu sales increase ten-fold during the week that the video is playing, then fall off but to a higher level than before. The video is fun and humorous in tone. It starts out with a very brief nutritional message emphasizing "no cholesterol" then shows how to make tofu lasagna. Bob feels that a video is much better than a person doing in-store demos because it is non-threatening. Many people fear that going up to a person will obligate them to buy something. Address: Energy Sprouts, 3602 High Point, San Antonio, Texas. Phone: 512-654-3963.

9143. Souter, Anne. 1989. Recent developments with soybeans and soyfoods in Nicaragua (Interview). *SoyaScan Notes.* Sept. 9. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Anne has been working closely with Manuel Tiqueras (who speaks good Spanish, can read some English, and has been working with soy since 1984) to introduce soybeans and soyfoods to Nicaragua. They have distributed 3,000 lb of soybeans to interested people, and conducted 30-40 demonstrations which trained 500-600 people in how to grow and cook with soybeans. The most popular recipes are: 1. Soymilk, with a little sugar and vanilla, which is very important for the children, who love it. The adults ferment it to make a cider or hot toddy. 2. Choriso, made of mashed cooked soybeans, onions, green peppers, and garlic, with shaped into little patties and fried. 3. Queso or Guajada de soya, which is like tofu but the soymilk is curded with the juice of a lemon-like citrus fruit (*naranja arde*), it is flavored with garlic juice, and pressed in cheesecloth into oval loaves, then sliced. It is much less expensive than typical guajada (made from dairy milk), which is a part of most Nicaraguan meals. 4. Fried okara & mashed banana patties called guiso.

Anne helped to develop and have printed (in late 1988) a soybean recipe booklet titled *Cuaderno de Nuestra Olla.* A Peruvian guy and his Swedish girlfriend also helped with the book. It was distributed by her and the Ministry of Agriculture. The book has made a big difference in introducing soy and has helped people to learn to read. They lost everything in the hurricane. Their biggest problems have been getting soybean varieties suited to Nicaragua, getting viable inoculum to Nicaragua, getting the soybeans to grow well, and postharvest losses (to rats or loss of viability from the heat and humidity). They started with a variety called Richardson, which was probably brought to Nicaragua by a man named Richardson in his pocket. The Comité de Defense Salud on some barrios are interested in growing soybeans. There is a mother's organization that is setting up a soyfoods restaurant in Matagalpa, with the help of some Danish or Swedish women. She also uses mashed cooked soybeans to fortify corn tortillas (half and half) and has color side shows showing Nicaraguans preparing soyfoods. She has been in touch by phone with many soybean experts in this country, including Dr. Hartwig in Mississippi and someone at the Univ. of Illinois. A German guy at Ciudad Sandino is working with Nicaraguans selling soy ice cream. Soyfoods Center suggests she try to get soy volunteers from Plenty Canada; perhaps they could come over from the Caribbean. Anne works for UNAG, the private farmer's and cattlemen's union. She has been there 3½ years and raises all her own funds. Marcos Castro was the UNAG organizer and promoter for her area, Abisinia. Devoted to public service, he was a wonderful man, and a friend of hers. Last week the Contras took him, unarmed, away from his wife off a truck, they broke his hands and feet, they cut out his eyes and tongue, then they castrated him. She was devastated. The Sacramento Bee wasn't interested in covering the story. Address: Davis, California.

9144. *SoyaScan Notes.* 1989. Checklist for making and selling premium quality, fresh (unpasteurized) tofu in America (Overview). Sept. 15. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** Premium tofu has two basic components: Flavor and freshness. It must be based on a comprehensive

© Copyright Soyinfo Center 2013

"quality first" program company and generally retails for a higher price than tofu which is produced on a large scale and distributed over a wide area, and which is usually pasteurized.

A. To get best flavor: 1. Use the best ingredients: Quality water (ideally spring or well water with a low bacterial count rather than municipal tap water), a variety of soybeans carefully tested against at least 10-20 others to give both the best tofu flavor and yield, organically grown soybeans, and a nigari-type coagulant (ideally one such as calcium chloride nigari that adds substantial calcium to the tofu). 2. Follow strict sanitation procedures in the plant to produce a bacteriologically clean tofu with a low plate count and a long shelf life. Set bacterial standards for your tofu at the time it reaches your walk-in cooler and have a program of regular plate-count sampling: For example, standard plate count less than 100, pH greater than 7.0, coliforms per gram less than 5. Have an in-house lab (or work closely with a nearby food testing lab which typically charges $12 for a plate count) to monitor bacterial levels. 3. Chill your tofu rapidly (in a water-filled stainless steel tank with a recycling standpipe overflow) in water below 35ºF (2ºC) as soon as it comes out of the forming trays to draw the core temperature of the tofu down to the water temperature as fast as possible. Use a powerful refrigeration system with a large plate heat exchanger (containing food grade glycol), a condenser, a strong pump, two coarse filters for tofu particles, and a two fine bacterial filters, pressure gauges on both sides of each filter to tell when clogged filters should be changed. 4. Package the tofu as soon as it is chilled to the core to avoid prolonged contact with water, which slowly leeches out the tofu's subtle nigari flavor and sweetness. If possible, vacuum pack, which has numerous advantages other than preserving good flavor: it presents tofu in the same type of familiar container used for cheeses, extends shelf life, and saves space and weight in shipping. Chamber-bag batch-type vacuum packagers are relatively easy to operate and free of problems, but high-volume continuous rollstock machines are extremely complex, tricky and unpredictable. Do not pasteurize the tofu; some people feel this process subtly harms the flavor and makes the texture slightly rubbery. 5. Rush the packaged tofu into a powerful walk-in cooler below 35ºF; 34ºF is ideal. Fans, air circulation and recycling, and proper stacking should help pull any remaining heat out of the tofu. 6. Date each package with a clear and realistic "Use By" date based on bacteriological tests under typical circumstances. Some price guns put a price and date on one sticker.

B. For optimum freshness after the tofu leaves the plant: 1. Own your own fleet of delivery trucks, each with a powerful and fairly large refrigeration unit that will keep the tofu below 40ºF in the summer. 2. Try to deliver fresh to each retail store at least 3-4 days a week, early in the day. 3. Train your driver/salesmen on how to monitor tofu temperature at key points (each should carry a top-quality pocket thermometer) and to avoid temperature abuse. 4. Do NOT allow your tofu to be sold in the produce section of a store (where the temperature is typically about 50-60ºF). Insist on an space (as in the dairy department) where the ambient temperature is below 40ºF, ideally below 35ºF. 5. Have your drivers remove from the store shelves any tofu that is past the pull date, puffed up or blown up on shelf, mashed, or returned by a customer. 6. In close connection with this, have each driver fill out a "Product Loss and Temperature Report" which is a checklist that tells why products are coming back. Aim for a return rate of less than 1%. Have your driver tell the store manager about any in-store tofu temperature problems. 4. Limit your distribution to a certain region, ideally having a radius of about 75-100 miles from your plant.

U.S. tofu companies that position themselves as makers of premium tofu include Wildwood Natural Foods (Fairfax, California), Northern Soy (Rochester, New York), The Tofu Shop (Arcata, California), and many others.

The above information is based, in part on talks with Jeremiah Ridenour, President of Wildwood Natural Foods of Santa Cruz, Inc., a leading maker of premium fresh tofu. Wildwood has a unique system that includes distributing a wide line of natural food products together with their tofu and offering full-service to stores. The latter includes free direct store delivery (which, in bypassing warehouses, gets fresh product on the shelves faster than a chain can), no labor costs for the store (but the store now makes 25-28% on a product rather than 35%), free shelf stocking, pricing, code dating, rotating, and fronting up shelves. This system has allowed Wildwood to get their line into the dairy case of many Northern California supermarkets. They invite buyers to taste test their braised tofu, baked tofu, or tofu burgers.

9145. *SoyaScan Notes.* 1989. Sixty-five books on tofu have been published in the Western World since 1970 (Overview). Sept. 17. Compiled by William Shurtleff of Soyfoods Center. • ***Summary:*** Definition: The work must be more than 48 pages long, must have the word "tofu" or its equivalent in the title, and must be written in a non-Asian language. It may be either a popular or a professional/technical work.

By country of publication, 40 of these books (61% of the total) have been published in the USA, 6 in Canada, 5 in Switzerland, 5 in Japan (but written in English for sale primarily outside of Japan), 3 in West Germany, 3 in France (but 2 of these were published simultaneously and primarily in Quebec, Canada), 2 in England, and 1 each in Italy, Sweden, and Brazil. By region of publication: North America 46 (71% of the total), Europe 15, East Asia 5, and Latin America 1.

By language, 49 of these books (75%) have been published in English, 7 in French, 6 in German, and 1 each in Italian, Portuguese, and Swedish.

© Copyright Soyinfo Center 2013

By year of publication, the first of these books was published in 1974; eleven (17% of the total) were published from 1974 to 1979, forty (62%) from 1980 to 1984, and fourteen (22%) from 1985 to 1989. The peak years of publication were 1981 and 1982, when 12 books on tofu were published each year.

The best sellers among these books have been *The Book of Tofu* by Shurtleff & Aoyagi (1975, Ballantine Books, Autumn Press, and Ten Speed Press, about 450,000 copies sold in English editions and 9,000 in foreign editions), *Tofu Cookery* by Louis Hagler (1982, The Book Publishing Co., about 175,000 copies sold), *The Tofu Cookbook* by Cathy Bauer and Juel Andersen (1979, Rodale Press, 105,500 copies sold, still in print), *Cook with Tofu* by Christina Clarke (1981, Avon Books, 57,500 copies printed; still in print), and *Tofu, Tempeh, & Other Soy Delights* by Camille Cusumano (1984, Rodale Press, 25,688 copies sold; out of print). These best-sellers have sold a combined total of 822,700 copies, and all tofu books have probably sold over 1 million copies.

9146. Ridenour, Jeremiah. 1989. How Wildwood markets its premium quality, fresh (unpasteurized) tofu (Interview). *SoyaScan Notes.* Sept. 18. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Wildwood follows strict sanitation procedures in the plant to produce a bacteriologically clean tofu with a low plate count and a long shelf life. The tofu is chilled rapidly in water below 35ºF as soon as it comes out of the forming trays. The tofu is vacuum packed as soon as it is chilled to the core to avoid prolonged contact with water, which slowly leeches out the tofu's subtle nigari flavor and sweetness. Wildwood prefers not to pasteurize, believing that fresh (unpasteurized) tofu has the best flavor and texture. They then rush the packaged tofu into a powerful walk-in cooler below 35ºF; 34ºF is ideal. Fans, air circulation and recycling, and proper stacking should help pull any remaining heat out of the tofu. Each package is dated with a clear and realistic "Use By" date based on bacteriological tests under typical circumstances. Some price guns put a price and date on one sticker.

To ensure optimum freshness after the tofu leaves the plant, Wildwood has its own fleet of delivery trucks, each with a powerful and fairly large refrigeration unit that will keep the tofu below 40ºF in the summer. They try to deliver fresh to each retail store at least 3-4 days a week, early in the day. They train each driver/salesmen how to monitor tofu temperature at key points (each should carry a top-quality pocket thermometer) and to avoid temperature abuse. They do NOT allow their tofu to be sold in the produce section of a store (where the temperature is typically about 50-60ºF), but insist on an space (as in the dairy department) where the ambient temperature is below 40ºF, ideally below 35ºF. In many Safeway stores, Wildwood has opened up a 24-inch wide soyfoods section between the yogurt and the sliced deli meats–a perfect location for both dairylike and meatlike products. Their drivers remove from the store shelves any tofu that is past the pull date, puffed up or blown up on shelf, mashed, or returned by a customer. In close connection with this, they have each driver fill out a "Product Loss and Temperature Report" which is a checklist that tells why products are coming back. They aim for a return rate of less than 1%, and have their drivers tell the store manager about any in-store tofu temperature problems. They limit their distribution to a certain region, ideally having a radius of about 75-100 miles from their plant.

Wildwood positions its product as premium fresh tofu. The company has a unique system that includes distributing a wide line of natural food products together with their tofu and offering full-service to stores. The latter includes free direct store delivery (which, in bypassing warehouses, gets fresh product on the shelves faster than a chain can), no labor costs for the store (but the store now makes 25-28% on a product rather than 35%), free shelf stocking, pricing, code dating, rotating, and fronting up shelves. This system has allowed Wildwood to get their line into the dairy case of many Northern California supermarkets. They invite buyers to taste test their braised tofu, baked tofu, or tofu burgers. Address: President, Wildwood Natural Foods of Santa Cruz, Inc., 1560 Mansfield Dr., Suite D, Santa Cruz, California 95062. Phone: 408-476-4448.

9147. *SoyaScan Notes.* 1989. Update on Tomsun Foods International, Inc. (Interview). Sept. 18. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** The company was in Chapter 11 bankruptcy and William Holmes, the new president, purchased it on 9 Feb. 1989. Holmes now owns 80% of the outstanding stock. The corporation moved to this new address from Greenfield, Massachusetts, 3 weeks ago. It is now basically just a marketing company. Tom Timmins is no longer associated with the company and no longer owns any stock in it. Jofu is now being made in Boston by a dairy. It is in honey and sugar flavored lines. The product is doing well. Tomsun also still sells tofu burgers and soy sauce. They no longer sell regular Tomsun Tofu, but they are looking for another company to make it for them. They were not happy with the company in New York that made it for them. They do not have a catalog of products. Address: 44 South Bayles Ave. Suite #200, Port Washington, New York 11050. Phone: 516-883-4900.

9148. *SoyaScan Notes.* 1989. Pioneers in vacuum packaging tofu. Its pros and cons (Overview). Sept. 19. Compiled by William Shurtleff of Soyfoods Center.

• ***Summary:*** In late 1977 Redwood Natural Foods Inc. in Santa Rosa, California, became the world's first company to vacuum package tofu. The pioneer there was Greg Hartman (whose photo appears in the Sept. 1983 issue of

© Copyright Soyinfo Center 2013

Health Foods Business, p. 80). Redwood used tofu made by Quong Hop & Co. and distributed and sold the organic tofu under their own brand. An illustration of the machine and description of the process is given in *Tofu & Soymilk Production* by Shurtleff & Aoyagi (1984, pp. 23 & 72; In about 1978 Shurtleff & Aoyagi visited Hartman at Redwood Natural Foods and observed his packaging process).

Since that time, many companies have switched to vacuum packaging their tofu. Pioneers in the USA included: Quong Hop & Co. Jan. 1979, Summercorn Foods Sept. 1979, Nasoya Foods 1981, Zakhi Soyfoods 1981, Pacific Trading Co. 1981, Lecanto Tofu 1981, Swan Gardens 1982, White Wave 1983, Farm Soy Dairy 1985, Island Spring 1985.

Pioneers in Europe included: Aros Sojaprodukter in Sweden 1982, Manna Natuurvoeding in the Netherlands 1982, Auenland Tofu in West Germany 1983, Tofuhaus Tiefenthal in West Germany 1983, and Haldane Foods in England 1985.

A few companies (such as Nasoya) have even dropped vacuum packing and switched back to water pack. Companies using relatively small chamber-bag batch-type machines seem happiest with the technology and have had few problems. Companies using larger, continuous process roll-stock machines have often had ongoing, serious problems.

Advantages of vacuum packaging, in approximate order of importance, are: (1) The package is familiar to consumers and it makes tofu look quite similar to cheese, a related and popular food product; first-time tofu users are not turned off by a cake tofu floating in a pale yellow liquid (which reminds some consumers of a fetus floating in formaldehyde in a biology lab). No other food in the western world besides tofu is sold floating in water. Yet the water that surrounds the tofu inside the vacuum pack detracts from its appearance. Some have even said that the resulting package reminds them of a used condom! (2) Because the tofu is packaged without water, it is much lighter and less bulky, which cuts shipping costs and can expand market areas; (3) Nigari-type tofu retains most of its natural sweetness, which is leeched off in water-pack tofu; (4) Vacuum packaging is generally thought to give the product a longer shelf life than water pack. Typical companies date their tofu for an 18-21 day shelf life; (5) The cost of the package itself is less for vacuum packing, BUT the additional labor required for packaging and labeling with a batch-type machine may make the total packaging cost more than for water pack.

Disadvantages of vacuum packaging, in approximate order of importance, are: (1) Most Asian-Americans, especially first generation Asian-Americans, strongly prefer water pack, to which they are accustomed; (2) Vacuum packed tofu is much more susceptible to damage than water-packed tofu in a rigid plastic tub, unless the vacuum pack is surrounded by a fairly rigid box; (3) It is difficult to vacuum pack soft tofu, which is the texture preferred by many Japanese; (4) Unless the tofu is immersed in chilled water for 6-12 hours before vacuum packing, the yellow whey in the tofu may leech out and collect inside the package, giving the tofu a unappealing yellow hue.

One example of a company that has had problems is White Wave Inc. in Boulder, Colorado, which in May 1983 bought a used Tiromat vacuum packager. Thereafter everything went wrong, so much so that that one machine "almost broke the company's back." President Steve Demos later called it "the curse of the Devil," and his production manager would sometimes ask, only half in jest, "Do you think we are sitting in vacuum packaging hell?" Demos notes: "Tofu is a very difficult product to vacuum pack, though firm tofu is easier than soft. In our case, about 30% of the problems have been caused by the machine, 30% by the product, 30% by the operator, and the rest is absolute bad karma. The process was unforgiving, as was the Tiromat's maker, which gave White Wave almost no help." But by Oct. 1989 White Wave had worked the bugs out of their vacuum packing system and now prefers it to water pack.

9149. Martino, Vic. 1989. Problems with selling tofu in the produce case (Interview). *SoyaScan Notes.* Sept. 20. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Vic is writing an article for *Food People* on this subject. The FDA publishes a "Model Code for Retail Food Stores," available from Art Banks, Director, Retail Food Protection Branch, FDA. Phone: 202-485-0140. It discusses how to treat all foods. Tofu was included in the 1982 edition, and in May 1986 was classified as a "potentially hazardous food," which the FDA feels should be stored at 45ºF or below. Otherwise, it has the potential for microbiological/bacterial contamination. In 1982 and 1986 the FDA sent its interpretation of the Model Code to all state and local health departments. The states, because of "states rights," are free to deviate from these federal guidelines, but few if any do. The states (and in some states the localities), not FDA, are responsible for the inspecting individual stores. New York state, which has a more centralized food inspection process, has recently been the most active in cracking down on stores that sell tofu in the produce case, which is not cold enough. Joe Ferrara, the assistant director in New York, has been a leader in the crackdown on "tofu mistreatment." He initially (out of a misunderstanding) also said that Mori-Nu should not be in the produce case, but last week he sent out a letter to stores correcting his mistake. New York state's Division of Food Inspection Services told a number of food chains in that state to take tofu out of the produce case because it was above 45ºF. All complied, so there were no fines. At one chain, Tops Market in New York, the dairy and deli case managers said they had no room for tofu, so Tops got rid of all fresh tofu and kept only Mori-Nu in their produce case. There has been some of this same type of crackdown in Illinois and Wisconsin. Vic thinks the average temperature

© Copyright Soyinfo Center 2013

in the produce department is about 50ºF, but some newer produce cases can keep products below 40ºF. Retailers are confused by conflicting messages from FDA, tofu manufacturers, and retailers. For example, Frieda's Finest in Los Angeles, which distributes tofu with their produce, advises on each box that the tofu be stored below 40ºF. Yet they know it is stored in produce cases which cannot be kept that low.

Vic interviewed Peter Golbitz of the Soyfoods Association of America. According to Vic, Golbitz told him that "Mori-Nu does not taste as good as fresh tofu." Golbitz was "definitely pro water pack" even though Morinaga is a member of the Association.

Concerning pasteurized versus unpasteurized tofu: Almost all milk in the USA is pasteurized, yet FDA takes the position that it must be sold at below 45ºF to give an added margin of safety. They feel the same way about tofu and thus do not distinguish between pasteurized and unpasteurized tofu. Moreover, the processes used for pasteurizing tofu and milk are quite different. Note: The minimal pasteurization required in the U.S. for cow's milk is 145ºF for 30 minutes or 161ºF for 15 seconds. Address: Food People, 1699 Lawton St., San Francisco, California 94122. Phone: 415-731-1283.

9150. Morinaga Nutritional Foods. 1989. Morinaga Nutritional Foods to sponsor the 1989 World Cup of Natural Bodybuilding (News release). 5800 South Eastern Ave., Suite 270, Los Angeles, CA 90040. 2 p. Sept. 20.
• ***Summary:*** "Morinaga Nutritional Foods will present the first Mori-Nu Tofu World Cup of Natural Bodybuilding on Nov. 19 at 6 p.m. at Aviation Auditorium, 1935 Manhattan Beach Blvd., Redondo Beach. Top male and female natural athletes from all over the world who have tested steroid-free for one year, will compete for possession of the World Cup.

"The invitational meet... requires participants to take a lie-detector test prior to competing to determine previous or present use of steroids or other muscle-building drugs. The day of the event random urine testing of participants will also take place.

"'Drug-free bodybuilding has been popular for about ten years now,' according to Pete Samra, former Mr. Natural U.S.A. and the promoter of the competition." Address: Los Angeles, California.

9151. Mizono, Bill. 1989. Selling pasteurized tofu in the produce case versus the dairy case (Interview). *SoyaScan Notes.* Sept. 21. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Bill strongly prefers to have Azumaya tofu sold in the produce case as long as the temperature is okay, which it usually is (42-48ºF). Even dairy cases sometimes rise above 45ºF, as on their defrost cycle. Sales are much better in produce. Tofu is an impulse item and there is more impulse buying in the produce section than in the dairy section. It gets lost among the dairy products. Also there is more space and space flexibility of produce, as caused by seasonal vegetables. Produce is a commodity area. A lot of Safeway stores are switching tofu back to the produce case from dairy, since it sells better in produce. But in stores that moved tofu to dairy, it took a year for sales to rebound to their pre-move level. During that time, many customers started going to Lucky supermarkets for their tofu. Lucky sells tofu only in the produce case. Some divisions of Safeway have never moved tofu out of produce. Each store decides its own location. Most produce departments at Safeway sell the Azumaya tofu in a vertical "juice case" which is cooler. They buy it directly from the Richmond produce warehouse.

The FDA is incorrect in saying that tofu is a "hazardous product." That is not true for pasteurized tofu. Azumaya had tests done in 1983 after *Yersinia* was found in tofu in Illinois and the state clamped down on tofu. Azumaya had a laboratory inoculate tofu with the four potentially toxic microorganisms (*Yersinia, Staphylococcus, Salmonella,* and *Clostridium Botulinum*) then pasteurize it like Azumaya does. They found that these organisms start growing only after 6 weeks at 69ºF, and by that time the tofu was too sour and smelled too bad to eat, and the water was very cloudy. These tests showed that *pasteurized* tofu is not potentially hazardous. But the FDA does not distinguish between pasteurized and non-pasteurized tofu.

If health inspectors required all tofu to be moved out of the produce case, the produce buying division of each chain would decide where to relocate it. There are many considerations, and the main one to the produce division accounting department is that they get tofu sales credited to them no matter where it is sold. They have spent more than a decade to build the sales of this product and they are not about to give that up to the dairy department. They will put tofu into a refrigerated case where the temperature is at 45ºF or below. Even when tofu is sold in the dairy case at Safeway, it still has a produce department label on it! Other than the produce case, Bill would like to see the tofu sold right next to the produce case, in a metal juice case. The produce department likes tofu with the vegetables because they feel that when people buy tofu they also tend to buy vegetables; so tofu sells vegetables. So the produce department does not like tofu to be sold in the dairy case. Another problem with an isolated glass case is that the tofu does not get as much attention as it should, and may be allowed to go out of date. But Bill feels it doesn't matter that much where the tofu case is located, as long as the consumer knows where it is. Moreover, Azumaya sells Kikkoman tofu, which can be sold in the produce case.

Azumaya dates their tofu for a 30-day shelf life, but that is very conservative to allow for mishandling. Under typical good conditions it will stay fresh for up to 50 days. But he feels it would be a mistake to date the tofu for 50 days and to use that as a selling tool, as Nasoya does. Azumaya has

© Copyright Soyinfo Center 2013

almost no problems with spoilage, puffing or souring. If there is a problem, the company investigates it. It is generally caused by a refrigeration problem, or letting the product stand for a long time in the back room, unrefrigerated, because people are too busy to get to it. Safeway now sells Azumaya tofu in Hawaii, at far below Hawaii tofu prices. On the East Coast Azumaya undersells Nasoya. Bill is too busy with Stir Fruity (tofu yogurt) to start a tofu plant on the East Coast.

The new Mori-Nu ad about water disaster and life preserver is incorrect in saying that water-pack tofu has a shelf life of "mere days."

Azumaya distributes Kikkoman aseptically packed tofu. He strongly prefers the flavor of his own product. Conclusion: FDA should have different temperature standards and "potentially hazardous" definitions for pasteurized and unpasteurized tofu. Azumaya and the Soyfoods Association should take the lead in educating FDA on these points. Address: President, Azumaya Inc., 1575 Burke Ave., San Francisco, California 94124. Phone: 415-285-8500.

9152. Mizono, Bill. 1989. The comeback of Stir Fruity soy yogurt (Interview). *SoyaScan Notes.* Sept. 21. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Bill is too busy with Stir Fruity to start a tofu plant on the East Coast of the USA. First Azumaya did a direct store delivery with Stir Fruity to prove that it was a good product. Lucky stores have just started this week ordering it through their warehouse. It will be in the Safeway system in several weeks. At Safeway it started in the produce section, but now dairy wants it back. Azumaya has their own trucks, which can also take tofu if a store wants it. They get more volume if they go direct, but they cannot service the product in the store because they are not a union shop. Jofu is now in Safeway, but (as Soyfoods Center taste tests also noticed) it is watery, because after it comes off refrigeration and rises above the temperature where it starts to break down, it will not re-set because of the gelatin solidifier it contains. Stir Fruity will re-set. Stir Fruity is dated for a 40-day shelf life, but under typical conditions it will stay fresh for 60 days. It contains potassium sorbate as a preservative. Its future looks very promising. Address: President, Azumaya Inc., 1575 Burke Ave., San Francisco, California 94124. Phone: 415-285-8500.

9153. Paino, John. 1989. Selling tofu in the produce case (Interview). *SoyaScan Notes.* Sept. 21. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** "If our tofu was moved out of the produce case to the dairy case, Nasoya would go out of business! Health conscious people are now shopping in the produce section. The temperature in most produce cases is 45-50ºF. Nasoya tofu is pasteurized at 180ºF for 75 minutes to give it a 50 day shelf life at 50ºF. So our tofu is different from fresh, unpasteurized tofu. It can and should sell in produce. This subject has now become a very big controversy, begun by Art Mio. He is creating this problem that is not a problem. He feels that his product is the only one that should be sold in produce. Nasoya tofu is sold to every chain in New York and to almost every chain on the East Coast. We sell 1,000 cases a week and I haven't had one complaint from any of them. Art is writing letters to health inspectors urging them to take all tofu but his out of produce. Have you seen the new Mori-Nu ad about the life preserver?"

Right now Nasoya is doing inoculation studies that prove that you can inject 1 million units of *Yersinia*, *Staphylococcus*, and all other potentially hazardous bacteria into our tofu, they will be killed by our pasteurization. Botulism bacteria requires a temperature above 50ºF to grow.

How much spoilage and souring does Nasoya have from their water packed tofu sold in produce cases? First, it is a small problem. The problem is worse during the summer than at other times, especially during very hot summers, and at stores that are far from the plant. Recently Nasoya spent $40,000 to install 40 tons of water-cooled refrigeration equipment. If a cake of tofu in a store puffs or spoils, the produce man would throw it away. If this happened too much, Nasoya would get a call from the chain headquarters requesting credit for lost product. This happened occasionally in the summer before they got their new refrigeration system. Nasoya sells only in 6-packs, which further helps prevent this problem. Nasoya's retail sales people visit each store and would fill out a report if there are spoilage problems. Nasoya guarantees that if any tofu puffs or spoils before the 50-day pull date, Nasoya will pay for it if the labels are returned. John thinks that Tomsun used to guarantee tofu sales; no matter how much tofu a store ordered, Tomsun would buy back any that did not sell before the pull date. That was one reason they went out of business. Nasoya does NOT do that; they guarantee quality. If there is a problem, Nasoya first checks to see if the product is properly refrigerated. If not, they withdraw their guarantee. Address: President, Nasoya Foods, Leominster, Massachusetts. Phone: 508-537-0713.

9154. Gaec de La Lix: United Macrobiotic Company. 1989. Re: Work with soyfoods and seitan in France. Letter from Ben of Gaex to Anthony Marrese, Sept. 25. 1 p. Typed, with signature on letterhead. [Fre]

• ***Summary:*** "Since October 1985 we have been building up our project. We are 20 adults and meanwhile three children. Four years ago we bought a very nice farm in the beautiful landscape of the Pre-Pyrenees 80 kilometers southwest of Toulouse. Today we work on more than 90 hectares of land.

"At the beginning we started by establishing a common macrobiotic kitchen. We worked mainly in the garden and in the fields, trying ideas of permaculture and those

© Copyright Soyinfo Center 2013

of Masanobu Fukuoka. In this behalf we were assisted by Thomas Nelissen, who lived for some time at Fukuoka's farm in Japan, and Declan Kennedy, the most important teacher of permaculture in Europe...

"This is our fourth year growing soybeans. We have a garden of one and a half hectares, mostly for self-sufficiency.

"With a status as 'transformateurs' we set up a stand on the organic market ("marche bio") at Toulouse, shortly after we started to make tofu for ourselves. In time we began to make tempeh, natto... certain types of soyaburgers, sushis and vegetable rolls. Today we deliver our products to more than 40 biological [organic] health stores in the surrounding 100 kilometers...

"We teach the making of tofu and seitan, amasake, mochi and tempeh as well as giving macrobiotic cooking classes and agricultural seminars."

A 1989 leaflet titled "What are Tofu, Tempeh, Seitan, Kombu?" in French (4 panels) is included with the letter. A color slide showing five people from the company waving is taped to the letter. Address: 32260 Tachoires–Seissan, France. Phone: 62.65.35.04.

9155. Housman, Bob. 1989. Eastern Foods Corp. becomes Mainland Express (Interview). *SoyaScan Notes.* Sept. 25. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Eastern Foods Corp., founded by Mr. Lee R. Lee, a Korean, was a leading U.S. manufacturer of tofu and soy ice cream (Tofulicious). Lee's company declared bankruptcy, then it was foreclosed on by a venture capital group. On March 3 Bob's group, Goods, Inc., bought the assets and inventory (but not the accounts payable or accounts receivable) and created a new subsidiary named Mainland Express. The new principals are Bob and Scott Housman. They moved the plant and started making tofu again in late April or early May of 1989. They never stopped production. They made an extra's week's inventory, moved the equipment to Goods, Inc.'s location at Spring Park, and were back in operation within a week.

The company has 5 other food manufacturing businesses in Spring Park. They grow and sell alfalfa sprouts, make pickled and flavored mushrooms, grow 5 million pounds/year of fresh mushrooms, make Kennedy label salad dressings, and pack portion-pack juices and novelty bottles for amusement parks. He bought Eastern Foods in part because he was already selling products to most EF's customers. So it was a good tie-in; now he is selling more to those same customers. And tofu can go national with the pickled and flavored mushrooms. Mainland Express now makes 3 types of tofu (soft, firm, and extra firm), plus Tofulicious. Even in Minnesota, a dairy state, there is a lot of interest in tofu. Bob has no idea where Mr. Lee is. A lot of investors are looking for him. Some people say he took off with some of the money. Eastern Foods had a poor accounting system and poor cost control. Address: P.O. Box 405, Spring Park, Minnesota 55384. Phone: 612-471-8034.

9156. Schuman, Joel. 1989. Highlights of the NFM Natural Foods Expo East (Interview). *SoyaScan Notes.* Sept. 25. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The Expo was very professional, one might say "slick." The Soyfoods Pavilion was stuck way off in one corner. White Wave was not there. Nasoya looked like the strongest soyfoods company. Northern Soy was not part of the Soy Pavilion. Not sure of Ithaca Soy. The Pirellos were there but not related to soy. McNamara's speech was excellent.

The two people he found most interesting to talk with were Richard Rose and Peter Golbitz.

Question: What percent of Wildwood's products are made by Wildwood vs. made by other companies? Address: Computer Software Consultant, Empty Wagon Software, 21 Old Wagon Rd., Woodstock, New York 12498.

9157. Paino, John. 1989. Vacuum packaging tofu (Interview). *SoyaScan Notes.* Sept. 26. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** For the first month after Nasoya started making tofu, they packaged it in pails in bulk. Then they switched to water packing in tubs, starting with a small Monkey Packer with a foot pedal that packed once cake at a time. Under ideal conditions, this tofu had a 2-week shelf life. For the next 4 years they sold only water packed tofu. Then Tomsun, their main competitor, started pasteurizing their water packed tofu, which gave it a longer shelf life, and gave them a competitive advantage in supermarkets. Nasoya did not have enough space in their plant to install a pasteurization unit (the plant's maximum output was 5,000 to 6,000 lb/day of tofu), nor the inclination to pasteurize. So they made a bold move, and in 1981 started vacuum packaging, using a $55,000 Tiromat film machine. Their first tofu was vacuum packed in a clear film package, but within a month everyone told them to either change the film or take the product out of the produce case, because it looked terrible; it got beat up very badly. So they changed to a bottom film that was opaque white and a top film that was printed. Now you couldn't see the product at all. They continued with this package for 5 years. But their were constant problems of every time with the machine, especially maintenance problems. There were forming problems and sealing problems. The machine was not designed to suck water through the vacuum pump, which it had to do. The vacuum squeezed the tofu, so that a 16 oz. cake was reduced to 15 oz. This was the biggest problem. The 1 oz shrinkage ate up all the company's profit and led to many fines from underweight products in stores. Food inspectors would drain off the water and weigh only the tofu. Other disadvantages: You can't make a soft tofu with vacuum packing. The lack of a rigid package to protect the product led to extensive

© Copyright Soyinfo Center 2013

damage during shipping. The shelf life (95% got 3 weeks if packaged cold) was not as long as Tiromat had said it would. The yellow whey gradually leeches out around the tofu and makes it look like a used condom (as produce buyers used to like to joke). If you make a lot of tofu, there is no time or space to soak the tofu overnight in water to preempt this yellow whey problem. If vacuum packaged tofu spoils or sours, it does not necessarily puff or swell like water pack (the spoilage bacteria are different), so there is no easy way to tell it is spoiled. The vacuum packing worked better on the marinated broiled tofu and tofu burgers, but there were still problems with sealing. Nasoya ended up buying the machine and they still have it–and would be glad to sell it.

When Nasoya installed its large, new Sato system from Japan (Feb. 1986), it also stopped vacuum packing and returned entirely to water packing. They still have the Tiromat machine and would be glad to sell it. Even if all of the technical problems of vacuum packaging were solved, John would still definitely prefer to sell water-packed tofu, for the reasons cited above. Address: President, Nasoya Foods, Leominster, Massachusetts. Phone: 508-537-0713.

9158. Rose, Richard. 1989. Re: Impressions of Natural Products Expo East at Philadelphia. Letter to William Shurtleff at Soyfoods Center, Sept. 27. 1 p. Typed, with signature.

• ***Summary:*** "Dear Bill: Enclosed are the things I got from the [Natural Products] Expo East show in Philadelphia [held 23-24 Sept. 1989]. Finally the industry is awakening to soyfoods, more so than at previous shows. There were many more soyfoods there, and many more soyfoods companies, including some smaller ones (Ithaca, Spring Creek, SoyBoy). Jofu had a booth, but Galaxy Cheese and Tofutti did not.

"There were several interesting new soy products, and from talking to manufacturers I believe there will be many more in the next year.

"The Soyfoods Pavilion was at the rear of the hall, on one small part of a row in the corner, and sold only about 8 or 10 booths. K.S. Lo was at Vitasoy's booth on Sunday. I did not go to the SAA meeting (which was open to the public) or the Standards seminar. Apparently there were only about 25 people attending the seminar, and there is some disagreement within the SAA about the standards.

"I met and talked with Joel Schumann and his partner Lynn at the show.

"Peter Golbitz, his wife, Leslie Harlow, the Pirellos, John Paino, Dan Burke, Joel, Lynn, and I went to dinner Saturday night, then (except Dan) to a classic neighborhood bar / restaurant that had a trio with a mean age of 70 playing rock and roll and standards. It was very funny.

"Harlow is the Executive Director of SAA. She seems fairly competent, but has no industry experience. Her last business was a restaurant that ended in bankruptcy. She asked me to go to the SAA meeting and to 'not alienate [myself] from the SAA.'

"Mori-Nu introduced an 'extra firm' tofu, actually about 8% protein, I think. Pacific Soyfoods' soymilk tasted beany and not very pleasant. A small Chinese company (Sun Foods Inc, 87 Pelham Avenue, Toronto ONT M6N lA5 Canada, phone 416-658-6668, Harry H.K. Ha is President) displayed a very interesting product. It had the texture and consistency of an egg product, such as fritatta, but was free of eggs, and is mung bean-based. It also contains soybeans and is called SunPatty (Mung Bean Patties), just sold as pancakes about 7 inches diameter. I am excited about this development. Lee Soynuts had a booth. Tony [Plotkin of Grainaissance] had his aseptic amasake there and I feel it is better tasting than the fresh product.

Sincerely, Richard. Address: Rose International, P.O. Box 5020, Santa Rosa, CA 95402-5020.

9159. Weagant, Stephen. 1989. FDA concern with tofu as a "potentially hazardous food" (Interview). *SoyaScan Notes.* Sept. 28. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Stephen was listed as the Technical Contact in the May 1984 FDA "Interpretation" titled "Are tofu and other moist soy protein foods considered to be 'potentially hazardous foods"? He believes that the organism of greatest concern to the FDA is *Yersinia*, which can grow rapidly in water at 50ºF. Another bacterium of concern (though it has never been reported in tofu) is *Lysteria*, which is found in raw vegetables, especially in root vegetables, and may be in or on soybeans. He believes that the average temperature of produce cases is 50ºF. Address: Microbiologist, U.S. Food and Drug Administration (FDA), 2201 23rd Drive S.E., Bothell, Washington 98021-4421. Phone: 206-486-8788.

9160. Schwarz, Tom. 1989. The FDA position on tofu as a potentially hazardous food, which should be stored at 45ºF or below (Interview). *SoyaScan Notes.* Sept. 29. Conducted by William Shurtleff of Soyfoods Center. [2 ref]

• ***Summary:*** On 23 May 1984 a major regulatory event concerning tofu took place, of which the U.S. tofu industry is still largely unaware. The U.S. Food and Drug Administration (FDA) Center for Food Safety and Applied Nutrition, Retail Food Protection Branch published and distributed a document which answered the question, "Are tofu and other moist soy protein products considered to be 'potentially hazardous foods'?" Drafted by Tom Schwarz, this document became part of FDA's Retail Food Protection Program Information Manual, and was sent out as an advisory document to all state and local health departments (regulatory organizations rather than food retailers). Note that the FDA is part of the Department of Health and Human Services' Public Health Service; it is not part of the U.S. Department of Agriculture.

The most important thing to understand about this

© Copyright Soyinfo Center 2013

subject is that the FDA groups all foods into two categories: those which are potentially hazardous, and those which are not. Any potentially hazardous food (PHF) must be kept refrigerated at 45ºF (7.2ºC) or below, according to FDA Food Protection Branch codes which apply to food stores, restaurants, and vending operations, and which are advisory in nature. In March 1988 the FDA released the draft of a new code (The Food Protection Unicode) in which they suggested that the 45ºF temperature for PHF be reduced to 40ºF (4.4ºC) because of *Listeria* and some other low-temperature pathogens, but that has not yet been adopted, largely because of strong opposition from the food retail industry.

The definition of a "potentially hazardous food" in the model food sanitation codes (Section 1-102(q) of the Food Store Code (FST) of 1982) included "any food that consists in whole or part of milk or milk products, eggs, meat, poultry, fish, shellfish, crustacea, or other ingredients, including synthetic ingredients, in a form capable of supporting rapid and progressive growth of infectious or toxigenic microorganisms." Note that most potentially hazardous foods are rich in protein and have a high natural water activity.

On 9 May 1986, in its Food Retail Protection Program Information Manual, FDA issued a redefinition: "'Potentially hazardous food' means any food or food ingredient, natural or synthetic, in a *form* capable of supporting (1) the rapid and progressive growth of toxigenic microorganisms or (2) the slower growth of *Clostridium botulinum.*"

FDA's concern with tofu began in January 1982, when an outbreak of tofu-related yersiniosis caused 24 cases of illness in the state of Washington. FDA began to receive many questions from health departments asking about how tofu, a relatively new and unknown product, should be handled and stored. It was clear from numerous studies on moist soy protein foods (including tofu) and from the outbreak of yersiniosis that tofu was a PHF. Tofu was first officially designated as a PHF in May 1984 in the above-mentioned FDA publication.

In designating tofu as a PHF, FDA did not distinguish between pasteurized and unpasteurized tofu. FDA considers that to be an irrelevant issue, since harmful organisms could enter the product after pasteurization, or pasteurization could be faulty. Only properly canned or aseptically packaged tofu products (such as Mori-Nu tofu) are exempt from the PHF designation and may therefore be sold at room temperature.

According to the FDA Retail Food Protection Program Information Manual, Part 3–Introduction. Chapter 1. Subject: Purpose and Scope of the Retail Food Protection Program: "The FDA's role in providing assistance to state and local government is derived from the Public Health Service Act (PL 78-410). Section 311 [42 USC 243] states in part: "The Secretary shall assist states and their political subdivisions in the prevention and suppression of communicable diseases, shall cooperate with and aid state and local authorities in the enforcement of their health regulations, and shall advise the several states on matters relating to the preservation and improvement of public health."

"The Retail Food Protection Program, administered by the FDA, is a cooperative federal-state program concerned with the safety of food at the retail level. The program covers the food service, food vending and food store industries.

"More than 2,700 state and local regulatory agencies assume primary responsibility for monitoring retail food operations, and assuring that industry is adequately protecting the consumer in the marketplace. FDA assists and supports these regulatory agencies..." About 40 states have adopted FDA food codes as their state laws. In retail areas, each state is free to set its own laws, but in the manufacture of foods, FDA makes the laws.

In most U.S. states, it is the law that potentially hazardous foods must be held refrigerated at 45ºF or below. Most of the tofu in the USA is sold in the produce case, where the temperature averages 50ºF. Thus the sale of tofu in such cases is in direct violation of most state laws! State and local inspectors should be measuring the temperature of the tofu and, telling stores to stop selling tofu (except aseptically packaged or canned tofu) being held at abuse temperatures. Out-of-temperature tofu may be subject to "hold orders" or other condemnation actions; the retail permit holder may also be subject to various penalties. A PHF not meeting temperature requirements is a 5-point violation on FDA's current scoresheet. An operator must correct 5-point items (major violations) within 10 days or risk further legal sanctions.

Schwarz does not know why state and local inspectors are not enforcing the law with respect to storage of tofu (or bean sprouts, the only whole vegetable considered to be a PHF). One possible reason is that they have only 2-3 hours to do an inspection of a large food store and they have hundreds of things to look for; tofu may be low on their list of priorities. Some may not be aware that tofu is considered potentially hazardous. And perhaps some produce cases keep tofu at 45º or below.

Schwarz thinks there is a good chance that within the next year or two there will be a crackdown, and that all fresh and pasteurized tofu will be moved out of the produce case. One reason for this is Morinaga's persistent efforts to get the FDA to enforce the law, and to allow their Mori-Nu Tofu to stay in the produce case. Schwarz is now in the process of drafting a letter to send out to all state and local food regulating agencies stating that, unlike most other types of tofu, Mori-Nu tofu does not need refrigeration.

The microorganisms of greatest concern in tofu are the psychrotrophic bacteria such as *Yersinia* or *Listeria* that tend to grow at 50ºF. *Salmonella* and others that tend to grow at higher temperatures are less likely to be a problem. It would be a waste of time for tofu manufactures to run tests showing that their pasteurization process kills pathogenic bacteria,

© Copyright Soyinfo Center 2013

and then submit those test results to the FDA in hopes of getting an exemption from the 45ºF storage temperature regulation. That approach totally misses the main point. The only viable options are to change tofu into a non PHF (as by lowering its pH through acidification, or by reducing its water activity through drying) or to refrigerate it at 45ºF or below. Address: Asst. Director for Program Development, FDA Center for Food Safety and Applied Nutrition, Retail Food Protection Branch, 200 C St., S.W., HFF-342, Washington, DC 20204. Phone: 202-485-0140.

9161. *SoyaScan Notes.* 1989. Prices and amount of tofu at Safeway supermarket in Lafayette, California (Overview). June 27. Compiled by William Shurtleff of Soyinfo Center.
• ***Summary:*** The tofu is on the top shelf in the produce department; 5 linear feet.

Mori-Nu, 2 types, 10.5 oz, $0.49.
Azumaya, regular, 16 oz, $0.89.
Azumaya, soft / kinugoshi, 16 oz, $0.89.
Azumaya, Chinese-style / firm, 14 oz, $0.89.
Azumaya, fried tofu / Namaage, 6 oz, $0.79.
Azumaya, tofu puffs / Age, 1.5 oz, No price listed

9162. **Product Name:** [Tofu Line Chili Con Tofu].
Foreign Name: Tofu Line Chili Con Tofu.
Manufacturer's Name: Aros Sojaprodukter KB. Distributed in Sweden exclusively by Nutana.
Manufacturer's Address: Bergsvagen 1, 190 63 Orsundsbro, Sweden. Phone: 0171-604-56.
Date of Introduction: 1989. September.
Ingredients: Incl. tofu & chili.
Wt/Vol., Packaging, Price: 500 gm.
How Stored: Frozen.
New Product–Documentation: Talk with Ted Nordquist of Aros in Sweden. 1990. May 18. This product was introduced in Sept. 1990. Starting about 2 years ago, all the company's products are sold under the "Tofu Line" brand.

Manufacturer's leaflet. 1990. At gott och må bra (Eat well and feel good). Shows color photos of the labels of the company's 5 main entrees (including this new one) plus natural tofu.

9163. Channel 26. 1989. Tofu in Thailand. Television broadcast. Sept. 9. California.
• ***Summary:*** This Japanese documentary on Thailand shows a tribe in northern Thailand coagulating soymilk by simmering a plant or herb (named *yaukane* in the Japanese katakana transliteration) in water then using the resulting liquid as the coagulant. The curds are eaten as such rather than being pressed to make tofu.

Address: Nutritional Sciences, Biostatistics, and Epidemiology Divisions, School of Public Health, UCLA, Los Angeles, California 90024; Food & Drug Administration, San Francisco, California.

9166. **Product Name:** [Royal Tofu Entrees {Like Quenelles, Midway Between a Sausage and a Souffle; Canned} (Plain, with Mushroom Sauce, or with Shrimp Sauce)].
Foreign Name: Royales au Tofu (Nature, Sauce Champignos, Sauce Crevettes).
Manufacturer's Name: Innoval. Affiliate of Coopérative Agricole Silos de Valence.
Manufacturer's Address: 441 bis Avenue Victor Hugo, 26000 Valence, France. Phone: 75.44.01.61.
Date of Introduction: 1989. September.
Ingredients: Plain: 67% tofu*, whole egg*, palm oil (not hydrogenated), flour (mehl)*, salt*, vegetables. * = Guaranteed organically grown.
Wt/Vol., Packaging, Price: 250 gm can.
How Stored: Shelf stable; refrigerate after opening.
Nutrition: Plain: Per 100 gm.: Calories 153, protein 8.1 gm, carbohydrate 5.8 gm, fat 10.4 gm.
New Product–Documentation: Note: This same product was previously made by Sojalpe. Manufacturer's brochure (full color). 1989. "Royales au Tofu. To vary your pleasures. Natural. Cuisine tasty and lean (Cuisine saveur. Cuisine minceur). Low in Calories. Discusses: The new gastronomy. The modern cuisine. Soya. Tofu. Les Royales au Tofu. These go nicely with tomato sauce, mushroom sauce, or with a sauce for fish or shellfish. Innoval: l'alimentation intelligente. The address given in the brochure is: C.C.V., BP 49–Quartier Grangeneuve–26800 Portes-Lès Valence. Phone: 75.57.33.99. A color photo on the front shows 4 objects about the size and shape of small, yellowish potatoes, in a plate with an orange sauce, shrimp, and mushrooms.

Form filled out by Gilles Charriere of Innoval. 1989. Nov. Says that this product was launched by Innoval in Sept. 1989. His address is Innoval S.A., Allée Joule, Zone Industrial (Z.I.) des Auréats, B.P. 1418, 26014 Valence Cédex, France. Phone: 75.41.41.50. He notes that in Sept. 1987 the enterprise Innoval S.A. was created. In Sept. 1988 the personnel were installed at the location. In March 1989 they finished installing the machines for making soymilk and tofu. In Sept. 1989 they launched their first products.

9172. **Product Name:** Mori-Nu Silken Tofu: Soybean Curd [Extra Firm].
Manufacturer’s Name: Morinaga Nutritional Foods, Inc. (Importer). Made in Japan by Morinaga Milk Co. Ltd.

© Copyright Soyinfo Center 2013

Manufacturer's Address: 5800 South Eastern Ave., Suite 270, Los Angeles, CA 90040.
Date of Introduction: 1989. September.
Ingredients: Water, soybeans, isolated soy protein, gluconolactone [GDL], calcium chloride.
Wt/Vol., Packaging, Price: 10.5 oz Tetra Brik Aseptic carton.
How Stored: Shelf stable; refrigerate after opening.
Nutrition: Per ½ package (5.25 oz): Calories 90, protein 12 gm, carbohydrate 4 gm, fat* 3 gm, cholesterol* 0 mg, sodium 95 mg. Percentage of U.S. Recommended Daily Allowances (U.S. RDA): Protein 15, thaimine 8, riboflavin 2, calcium 4, iron 8.
New Product–Documentation: Label. 1989. Oct. Light green, dark green, red, and orange-yellow on white. 4 by 2.5 by 1.75 inches. Tetra Brik package. A stylized illustration shows 3 white cubes of tofu descending into a salad in a bowl. Red snipe in low right corner reads: "New! For stir fry." On one side of the package is a recipe for Vegetable Stir Fry. The other side states: "Mori-Nu's revolutionary package locks out light, oxygen, and microorganisms which lead to early spoilage. Mori-Nu always tastes just made–never sour. Guaranteed quality. Consistent taste. No preservatives. No irradiation. Rich in protein. No cholesterol. Low sodium. Ready to use. Also try Mori-Nu Silken Soft and Silken Firm." One end states "Refrigerate unused portions in an air-tight container and use within two days. Keep in a cool place–Do not freeze." On the other end is an illustration (line drawing) showing how to open the package using scissors, and "Best used by Jul 04 90." The back panel lists nutritional information and ingredients: "Information on fat and cholesterol content is provided for individuals who, on the advice of a physician, are modifying their dietary intake of fat and cholesterol." Top of back panel: "Our Guarantee: If you are not completely satisfied with Mori-Nu Tofu, we will replace the product. Send the empty carton, store name, location, your name and address to: Morinaga Nutritional Foods Inc. 5800 So. Eastern Avenue, Suite 270, Los Angeles, California 90040. For Tofu Recipes: Send self-addressed, stamped envelope to the above address."

News release. 1989. Oct. 9. "Morinaga Nutritional Foods Inc. introduces new extra firm tofu for stir fry." "The product can also be molded into tofu burgers and used as a meat substitute in lasagna, tacos, and other meatless dishes." Mori-Nu prides itself in the creaminess of their tofu.

Talk with Art Mio. 1989. Nov. 6. This extra firm tofu is more expensive to produce, so it is being priced at 10% more than the other two textures.

Ad in Produce News. 1990. Jan. "Produce legal." Shows each of the three types of Mori-Nu Tofu stacked one atop the other. "Mori-Nu Tofu's FDA-approved aseptic package meets all USDA temperature requirements. Now you can safely case stack your tofu in the produce section or anywhere in the store, because Mori-Nu needs no refrigeration... Mori-Nu: Tofu for the American taste."

Ad in Natural Foods Merchandiser. 1990. Jan. p. 25. "Our new extra-firm tofu creates quite a stir." A color photo shows stir-fried tofu and vegetables in a wok.

• ***Summary:*** In Venezuela, soya is seen as a huge potential protein source, poorly utilized. Argues for direct use of soybeans (in forms such as tofu) as a protein source. Address: Granja Tierra Nueva, Aldea San Luis, La Azulita, C.P. 5102, Estado Merida, Venezuela.

9175. Shurtleff, William; Aoyagi, Akiko. comps. 1989. Bibliography of soya in the Indian Subcontinent (South Asia): 1,118 references from 1679 to 1989, partially annotated. Lafayette, California: Soyfoods Center. 180 p. Subject/geographical index. Author/company index. Printed Sept. 2. 28 cm. [1118 ref]
• ***Summary:*** The soybean has a surprisingly long history in South Asia. The earliest known reference dates from the year 1679 when the Englishman John Locke noted that soy sauce (saio) was imported to England from the East Indies (probably India). There were 3 references to soybeans or soyfoods prior to 1700, 12 during the 1700s, and 53 during the 1800s. Many of these references were to soy sauce or to soybean plants (by botanists) grown in the northern hills. In the period 1908-12 the British tried to grow soybeans in India without much success. During the 1930s Mahatma Gandhi took a serious interest in growing soybeans and using them as a food.

The earliest known commercial soy product on the Subcontinent was Golden Label Soya Bean Sauce, introduced in 1949 by Yung Hwa & Co. in Sri Lanka. The earliest such product in India was Nutri Nugget, a textured soy flour meatlike product, introduced in 1970 by the Soya Production and Research Association in Bareilly.

The rise of the soybean as a commercial crop in India can be dated from the mid-1960s, when University of Illinois soybean specialists, working with Indian counterparts, showed that high soybean yields could be obtained using proper varieties and a package of practices. In 1967 the All-

© Copyright Soyinfo Center 2013

India Coordinated Program on Soybeans was founded at Pantnagar in the state of Madhya Pradesh, where the great majority of India's soybean came to be grown. In April 1968 the first Workshop on Soybean was held in New Delhi by the Indian Council of Agricultural Research, and in 1971 India's first soyfoods development project started at G.B. Pant University. But when the U.S. sided with Pakistan during a small war between India and Pakistan, the government of India asked that most U.S. technical assistance programs be discontinued by Sept. 1972. In 1973, out of the success of this work, INTSOY (the International Soybean Program) was founded at the University of Illinois.

Total soybean production in India increased from a mere 18,000 tonnes in 1971 (production was negligible in 1970) to 450,000 tonnes in 1980, an astonishing 25-fold increase in ten years, and a growth rate greater than that of Latin America.

This is the most comprehensive bibliography ever published on soya in the Indian Subcontinent (South Asia). It is also the single most current and useful source of information on this subject available today, since 48% of all references (and most of the current ones) contain a summary/abstract averaging 102 words in length.

One of more than 40 bibliographies on soybeans and soyfoods being published by the Soyfoods Center, it is based on historical principles, listing all known documents and commercial products in chronological order. Containing 37 different document types (both published and unpublished, including many original interviews and partial translations of Japanese and European works), it is a powerful tool for understanding the development of this subject and related products from its earliest beginnings to the present, worldwide.

Compiled one record at a time over a period of 15 years, each reference in this bibliography features (in addition to the typical author, date, title, volume and pages information) the author's address, number of references cited, original title of all non-English publications together with an English translation, month and issue of publication, and the first author's first name (if given).

It also includes details on 109 commercial soy products, including the product name, date of introduction, manufacturer's name, address and phone number, and (in many cases) ingredients, weight, packaging and price, storage requirements, nutritional composition, and a description of the label. Sources of additional information on each product (such as references to and summaries of advertisements, articles, patents, etc.) are also given.

Details on how to use the bibliography, a complete subject and geographical index, an author/company index, and a bibliometric analysis of the composition of the book (by language, document type, year, leading countries, states, and related subjects) are also included. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

9176. Smith, Keith J. 1989. World production, availability and variety differences of soybeans. In: E.W. Lusas, D.R. Erickson, and Wai-Kit Nip, eds. 1989. Food Uses of Whole Oil and Protein Seeds. Champaign-Urbana, IL: American Oil Chemists' Society. vii + 401 p. See p. 1-11. Chap. 1. Proceedings of the Short Course on Food Uses of Whole Oil and Protein Seeds held at Makaha, Hawaii, May 11-14, 1986. [11 ref]

• ***Summary:*** Contents: Introduction. Composition. Required characteristics: For soy milk, tofu, miso, natto, soy sprouts. Conclusions.

The most desired characteristics of soybeans for food processing include: Large seed size, high protein content, high quality, reasonable price. The characteristics desired for each of the soyfoods mentioned above are given.

Table 1.1 shows world production of the eight major oilseeds in million metric tons from 1981-82 to 1985-86. Over this 5-year period, total production of the eight oilseeds has grown by 14.6%, from 169.4 to 194.2. In descending order of production, the eight are: Soybean 96.0. Cottonseed 34.1. Peanut 19.7. Sunflowerseed 18.6. Rapeseed 18.6. Copra (dried coconut meat, 5.0). Flaxseed 2.6. Palm kernel 2.3. Source: Foreign Agricultural Service, USDA. Address: American Soybean Assoc., P.O. Box 27300, St. Louis, Missouri 63141.

9177. Sofer, Tamar. 1989. All natural does not mean all Kosher. *Kashrus* (*Brooklyn, New York*). Sept. p. 26. *

• ***Summary:*** "The following foods are a few examples of natural products that require supervision according to Kashrus authorities. Tofu: A soybean cake known for its high protein value. It is sold in all health food stores and some supermarkets. Tofu is made with anti-defoaming agents during the processing, usually glycerine. The label often does not list any animal products."

Note 1. According to *Tofu & Soymilk Production* by Shurtleff & Aoyagi (p. 103-04), the defoamers most widely used are silicone defoamers, and monoglycerides derived from hydrolyzed oils. Note 2. On 14 Feb. 1991 Carol Wiley of *Vegetarian Times* contacted three of America's largest Caucasian-run tofu manufacturers to ask whether or not they used a defoamer and, if so, whether it contained animal products. Steve Demos of White Wave stated that his company did not use a defoamer but that he knew of some companies that did. Defoaming can be easily done by spraying cold water or a little oil on top of it. Yvonne Kuperberg of Island Spring said that her company did not use any defoamer but that most tofu makers do. At Nasoya, a woman who did not wish to give her name said that "everybody in the business uses defoamers. They are very widely used." She said that Nasoya also uses a defoamer but she would not reveal what type was used. She assured Carol

that it did not contain animal products.

9178. **Product Name:** Spring Creek Tofu Salads [Onion, Missing Egg].
Manufacturer's Name: Spring Creek Natural Foods.
Manufacturer's Address: 212-C East Main St., Spencer, WV 25726. Phone: 304-927-1815.
Date of Introduction: 1989. September.
Ingredients: Missing Egg Salad (1990): Organic tofu, safflower oil, shoyu tamari, apple cider vinegar, onion flakes, celery, parsley, garlic powder, celery seed powder, curry, turmeric, ground mustard.
Wt/Vol., Packaging, Price: 7 oz.
How Stored: Refrigerated.
New Product–Documentation: Leaflet sent by Richard Rose from Natural Products Expo East at Philadelphia. 1989. Sept. Single sided, blue on beige.

Label sent by Tenley Weaver. 1990. Aug. 20. 3 inch diameter. Green, blue, beige, and red on white.

9179. **Product Name:** Spring Creek Baked Tofu [Barbeque, Teriyaki, Cajun].
Manufacturer's Name: Spring Creek Natural Foods.
Manufacturer's Address: 212-C East Main St., Spencer, WV 25726. Phone: 304-927-1815.
Date of Introduction: 1989. September.
How Stored: Refrigerated.
New Product–Documentation: Leaflet sent by Richard Rose from Natural Products Expo East at Philadelphia. 1989. Sept. Single sided, blue on beige.

9180. **Product Name:** Trader Joe's Soy Cheese Pizza with Organic Whole Wheat Crust.
Manufacturer's Name: Trader Joe's (Product Developer-Distributor).
Manufacturer's Address: 538 Mission St., South Pasadena, CA 91030. Phone: 818-441-1177.
Date of Introduction: 1989. September.
New Product–Documentation: Talk with Richard Baltierra, head of the Fresh Program at Trader Joe's. 1989. Aug. 23. This product is scheduled to be introduced in Sept. 1989.

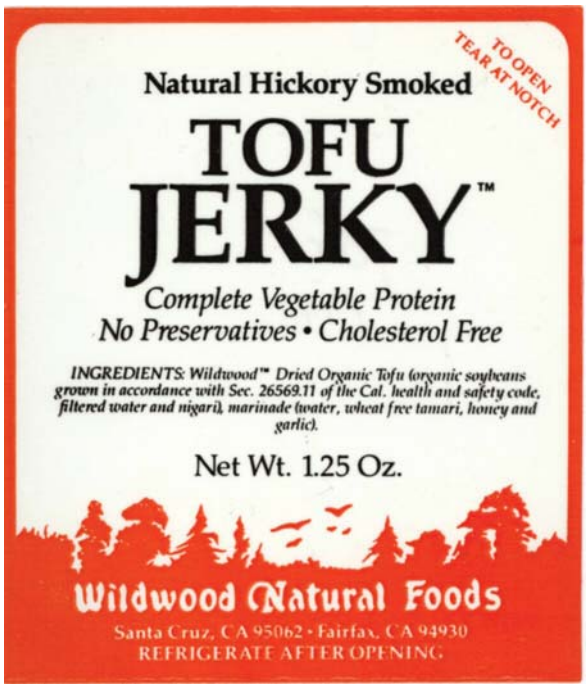
9181. **Product Name:** Tofu (Soft, Hard, and Fried).
Manufacturer's Name: Wa Heng Dou-Fu.
Manufacturer's Address: 5063 24th St., Sacramento, CA 95822. Phone: 916-737-0545.
Date of Introduction: 1989. September.
Ingredients: Fried tofu: Soy bean, water, natural calcium sulfate, vegetable oil.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Refrigerated.
New Product–Documentation: Talk with Mr. Peng-Xiang (Martin) Lin, Owner. 1990. Jan. 19. He started this company in Sept. 1989. Before that, he made soyfoods out of his home.

Label sent by Martin Lin. 1991. Nov. 20. 6 by 7.5 inches. "Keep Fit. Fried Tofu. No preservatives added." Most of the label text is written in Chinese. Talk with Martin Lin. 1997. Aug. 6. His company name is "Wa Heng Dou-Fu Soy Sauce." He bought the company from his parents in 1996. Three years ago he started to make soy sauce and sold it to several restaurants because Kikkoman is too expensive. He no longer makes soy sauce but plans to make it again after doing more research.

9182. **Product Name:** Soy Jello (Tofu Curds; Doufu-fa).
Manufacturer's Name: Wa Heng Dou-Fu.
Manufacturer's Address: 5063 24th St., Sacramento, CA 95822. Phone: 916-737-0545.
Date of Introduction: 1989. September.
Ingredients: Soy bean, water, natural calcium sulfate.
How Stored: Refrigerated.
New Product–Documentation: Talk with Mr. Peng-Xiang (Martin) Lin, Owner. 1990. Jan. 19. He started this company in Sept. 1989. Before that, he made soyfoods out of his home.

Label sent by Martin Lin. 1991. Nov. 20. 2 by 3 inches. Green on chartreuse yellow. Most of the label text is written in Chinese. It states that no preservatives are added.

9183. **Product Name:** Tofu Jerky: Natural Hickory Smoked.
Manufacturer's Name: Wildwood Natural Foods of Santa Cruz, Inc.
Manufacturer's Address: 1560 Mansfield Ave., Suite D, Santa Cruz, CA 95062. Phone: 408-476-4448.
Date of Introduction: 1989. September.



© Copyright Soyinfo Center 2013

Ingredients: Wildwood Dried Organic Tofu (organic soybeans grown in accordance with Section 26569.11 of the California Health and Safety Code, filtered water and nigari), marinade (water, wheat-free tamari, honey and garlic)
Wt/Vol., Packaging, Price: 1.25 oz.
New Product–Documentation: Talk with Jeremiah Ridenour. 1989. Sept. 18. The product was introduced this month and is now in 3 stores. Label sent by Billy Bramblett of Wildwood. 1990. 3 by 3.5 inches. Orange and black on white. "Complete vegetable protein. No preservatives. Cholesterol free."

9184. Riggins, Judith. 1989. The common or usual name of tofu (Interview). *SoyaScan Notes.* Oct. 2. Conducted by William Shurtleff of Soyfoods Center. [1 ref]
• ***Summary:*** "Tofu is a fanciful name but is not sufficiently descriptive for the American consumer. So the FDA has said that it should be accompanied by a descriptive term, 'soybean curd,' so that the identity is clear to most consumers. However if you wish to have the FDA establish a common or usual name by regulation (which is probably a good idea for your industry if this is an industry-wide concern), then you should submit a Citizen's Petition. The required format is given in Section 10.30 of Title 21 of the *Code of Federal Regulations.* I will send you a copy. It should be self explanatory, but if you have any questions, feel free to call us.

"A Consumer Survey is one means of demonstrating the common or usual name of a product, but it is not the only way. It would be supporting data. If you have any questions on how to conduct a consumer survey, contact the FDA Division of Consumer Studies, Dr. Raymond Stokes, also at the Center for Food Safety and Applied Nutrition. Phone: 202-245-1457. This Division does a lot of studies concerning identity statements to determine consumer understanding of terms on labels." Address: Consumer Safety Officer, U.S. FDA, CFSAN, Div. of Regulatory Guidance, 200 C Street, S.W., HFF-314, Washington, DC 20204. Phone: 202-485-0236.

9185. *SoyaScan Notes.* 1989. The statement of identity on tofu labels: Regulations and guidance on tofu versus soybean curd by the FDA and attorney Stephen H. McNamara (Overview). Oct. 2. Compiled by William Shurtleff of Soyfoods Center. [2 ref]
• ***Summary:*** Part I of this summary is based on 2 phone interviews with Judith Riggins and one other senior staff person at the FDA Division of Regulatory Guidance in Washington, DC. Concerning the statement of identity (e.g. 'soybean curd') on the principal panel of the label, the regulation concerning this is 21 CFR 101.3(D) (Title 21 of the Code of Federal Regulations, Section 101.3, Paragraph D). This in turn is part of a law, Section 403i of the Federal Food, Drug, and Cosmetic Act. The regulation, promulgated under the law/statute, reads: "This statement of identity shall be presented in bold type on the principal display panel [PDP]. Shall be in a size reasonably related to the most prominent printed matter on such label. And shall be in lines generally parallel to the base on which the package rests as it is designed to be displayed."

The law also provides for the regulations to interpret the law, which is the guidance. The FDA general guidance/interpretation is that the statement of identity should be in a lettering not less than half the size of the largest type used on the PDP.

The FDA uses this as an internal measure when looking at a product label to determine whether the statement of identity is "reasonably related" to the "most prominently printed matter" on the PDP. When reviewing a product label, they might comment on a descriptive phrase that was less than half the size of the largest type on the PDP, but by itself, in the absence of other violations, it would not warrant regulatory action.

Part II is based on a phone interview with Steve McNamara, a food and drug regulatory specialist and attorney in Washington, DC. "The law states, 'A food is deemed to be misbranded unless it bears its common or usual name, if there is one.' At that point you go to a second document, a regulation, which says, in effect, 'A food shall be deemed to be misbranded if it does not bear a statement of identity' on the principal display panel. A statement of identity is defined in a series of descending priorities. First, if FDA has a regulation to define a name, you must use that. If there in no regulation, you must use the common or usual name, if any there be. If there is not one, then you must use an appropriately descriptive phrase. The fourth fall-back is, if there is no such phrase, you can use a fanciful name. On a tofu label, which has the word tofu written large as the main product name and the phrase 'soybean curd' written in small letters below it, the FDA would probably view the 'soybean curd' as the 'appropriately descriptive phrase,' which satisfies the need for a 'statement of identity.' They would probably not object to the use of the word 'tofu' if the industry wished to use it."

Concerning the size of the descriptive phrase, the FDA articulates orally that it should be one-half the size of the largest type used, but it is not blessed in any official regulation. In any food stores you can find numerous examples of widely used products where the official statement of identity or common or usual name is much, much smaller than the largest type used on the PDP. Most breakfast cereals are that way: "Wheaties" is in giant print and "cereal" is in very small print, maybe one-tenth or one-fifteenth the size.

If our industry admits that tofu is not a common or usual name, then we immediately trigger the need put "soybean curd" on the label. McNamara feels that it would a very worthwhile use of our industry's time and money to

© Copyright Soyinfo Center 2013

try to prove that tofu has a common or usual name, which is "tofu." The results of a survey would only be one piece of information that would be considered along with other lines of argument. The keys to success are the quality of our argument, and the willingness of the person or group who listens to listen with an open mind. This is the only way to bypass the requirement for putting "soybean curd" on the front panel of products. The final arbiter of the issue is always a judge and a jury. "As long as you propose for the common or usual name a term that is widely used and recognized by the kinds of people who are buying and selling and consuming the product, and if the term is widely used in dictionaries, cookbooks, and popular articles, that should be sufficient. And I think that a court would ultimately agree that it is sufficient. Let's say you are an FDA person who has issued a notice of adverse findings, and you get back a report prepared and signed by Soyfoods Center, which provides a convincing case, that person is going to think twice about spending a lot of money to go to court over that issue, where he might well lose. And the more other issues that the affected soyfoods company gives in on, the less likely the FDA is to go to court over a disputable issue which is backed by a convincing case. The choice here is (1) to leave the term 'soybean curd' off the PDP, argue that tofu is the common or usual name, and include 'soybeans' in the ingredient listing; or (2) to run "soybean curd" but as inconspicuously as possible. The term 'soybean curd' sounds incongruous to the consumer of a candy bar; it is 'negative nomenclature with a pejorative connotation.' The FDA did not allow the surimi industry to use their preferred descriptive phrase 'blend of Pacific fish and snow crab meat' but required the phrase 'imitation crab meat.' Ironically, last year 'imitation crab meat' (surimi) outsold real crab meat in the USA." Address: 1. Div. of Regulatory Guidance, U.S. Food and Drug Administration (FDA), Center for Food Safety and Applied Nutrition, 200 C Street, S.W., Room 5001, HFF-314, Washington, DC 20204; 2. Hyman, Phelps & McNamara, 1120 G St., N.W., Washington, DC 20005. Phone: 1. 202-485-0236; 2. 202-737-5600.

9186. Schwarz, Thomas L. 1989. Memorandum: Mori-Nu brand tofu is not a potentially hazardous food. Letter to Dennis L. Eastin, Regional Food Specialist, HFR-SW16, Oct. 4. 2 p. Typed, with signature on letterhead. [1 ref]
• ***Summary:*** "Your memo of September 27, 1989 sought clarification of FDA's position regarding the storage temperature of Mori-Nu brand tofu." In the model code interpretations for "potentially hazardous food... five exceptions were delineated including: 'Foods that have been adequately commercially processed and remain in their unopened hermetically sealed container.' Mori-Nu brand tofu–soft, regular, and firm–are packaged using the Tetra Pak TBA-3 aseptic packaging system...

"A food Canning Establishment (FCE) number of 07905 has been assigned to the Morinaga Milk Industry Co., Ltd., 33-1, 5 Chome Shiba, Minato-Ku, Tokyo 108, Japan, which produces these products. Intact packages of Mori-Nu brand tofu, like other shelf-stable foods in hermetically sealed containers, are not potentially hazardous and do not require temperature control for safety. We know of no other tofu manufacturer currently using this technology and no other canned food process filing forms have been submitted for moist soy protein products." Address: Asst. Director for Program Development, FDA Center for Food Safety and Applied Nutrition, Retail Food Protection Branch, 200 C St., S.W., HFF-342, Washington, DC 20204. Phone: 202-485-0140.

9187. *SoyaScan Notes.* 1989. Occurrences of the terms "tofu," "bean curd," and "soybean curd" in current American dictionaries (Overview). Oct. 4. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** At a large bookstore in California, all American dictionaries copyrighted since 1980 were examined. Each is listed here in descending order of copyright year, which is the first number on the line preceding the dictionary title. Thus, the most recent editions are listed first.

Note that the word "tofu" is the main entry in all four of the most recently copyrighted dictionaries, and in 6 of the 9 dictionaries copyrighted since 1980. Every dictionary examined listed the term "tofu" as either the main or secondary entry. Not one single dictionary listed the term "soybean curd." Only 5 of the 9 dictionaries listed the term "bean curd."

1988. *The Random House College Dictionary,* revised ed. (New York, NY; 173,000 entries, hardcover). Main entry: "tofu–a soft, bland, white cheese-like food made from curdled soybean milk, high in protein content, used originally in Oriental cookery but now in a wide variety of soups and main dishes." Secondary entry: "bean curd–tofu."

1988. *Thorndike Barnhart Student Dictionary* (Glenview, Illinois; hardcover). Main entry: "tofu–a cheeselike food consisting of curds coagulated from milk made from powdered soybeans, often pressed into squares." Secondary entry: bean curd is not listed.

1987. *Random House Dictionary of the English Language*, 2nd ed. (New York, NY; over 315,000 entries in 2,500 pages, hardcover). Main entry: "tofu–a soft, bland, white cheese-like food made from curdled soybean milk, high in protein content, used originally in Oriental cookery but now in a wide variety of soups and main dishes. Also called 'bean curd' (1875-80; Japan tôfu < Mod Chinese equiv to Chinese dófu (dou = bean + fu = turn sour, ferment))." Secondary entry: "bean curd–tofu."

1981. *Webster's Handy College Dictionary* (New American Library, div. of Penguin Books, USA, New York, NY). Main entry: "tofu–bean curd." Secondary entry: bean curd is not listed.

© Copyright Soyinfo Center 2013

1985. *Webster's Ninth New Collegiate Dictionary* (Merriam-Webster Inc., Springfield, Massachusetts). Main entry: "bean curd (ca. 1909)–a soft vegetable cheese prepared by treating soybean milk with coagulants (as magnesium chloride or dilute acids)–also called tofu." Secondary entry: "tofu [Jap. tôfu] (1880)–bean curd."

1984. *Webster's New World Dictionary* (Publ. in different formats by Simon & Schuster and Warner Books, New York, NY; over 59,000 entries) Main entry: "tofu–a Japanese custard-like food made from soybeans." Secondary entry: bean curd is not listed.

1983. *The American Heritage Dictionary* Based on the New Second College Ed., (Dell Publ., The Bantam, Doubleday, Dell Publ. Group, New York, NY). Main entry: "bean curd–a soft cheeselike food made from pureed soybeans." Secondary entry: "tofu–bean curd."

1980. *Oxford American Dictionary* (Avon Books. Div. of The Hearst Corporation, New York, NY). Main entry: "tofu–bean curd." Secondary entry: bean curd is not listed.

1980. *The Random House Dictionary*, concise ed. (New York, NY). Main entry: "bean curd–a creamy, white cake made from soybean flour, used in Oriental cooking." Secondary entry: "tofu–see bean curd."

9188. Morinaga Nutritional Foods. 1989. Tofu manufacturer contacts health departments nationwide to clarify aseptic packaging dilemma (News release). 5800 South Eastern Ave., Suite 270, Los Angeles, CA 90040. 2 p. Oct. 6.
• ***Summary:*** "In an effort to keep supermarkets from inappropriately moving its product from the produce department, Morinaga Nutritional Foods Inc... has released an official statement to all U.S. health departments clarifying the difference between aseptic and water-packed tofu...

"'Most tofu in America is sold in produce 'wet racks' where oftentimes the temperature does not conform with the FDA requirements,' said Art Mio, national sales manager for Mori-Nu. 'We commend the action on the part of the state health department officials for cracking down on inadequately refrigerated water-pack tofu.'...

"Developed by Morinaga Nutritional Foods Inc. in 1972, the aseptic packaging technology of tofu is designed to combat spoilage and eliminate bacterial growth. Coincidentally, the concept of aseptic packaging was voted the top food/science innovation of the past 50 years by the Institute of Food Technology in 1989... According to Mio, Morinaga decided to inform all state health departments about the confusion between storage of aseptically packaged Mori-Nu and water-packed tofu after its product was removed from the produce section of Bell's supermarkets in Rochester, New York." Address: Los Angeles, California. Phone: 213-728-4325.

9189. Takai, Wataru. 1989. Re: Kyoto Tanpaku, a large Japanese tofu manufacturer from Osaka, will build a tofu plant in Indiana. Letter to William Shurtleff at Soyfoods Center, Oct. 9. 1 p.
• ***Summary:*** The company will use Takai equipment in the plant. The man in charge at the company is Mr. Hachijin.

Note: Luke Lukoskie has heard that this plant will cost $4.5 million to construct. Address: Takai Tofu & Soymilk Equipment Co., 1-1 Inari, Nonoichi-machi, Ishikawa-ken 921, Japan. Phone: 011-81-0762-48-1355.

9190. Ebner, Guenter. 1989. Re: Brief history of Sojarei Ebner-Prosl. Letter to William Shurtleff at Soyfoods Center, Oct. 17. Followed by two talks in May 1990. 1 p. Typed, with signature on letterhead. [Eng]
• ***Summary:*** "Our company was founded in 1984 in Baden and we started with 6 kinds of products. I had my first contact with tofu in Germany, where I learned the basic work in 1978 from a person named Axel in Frankfurt. The second contact was in Japan during 2 months of Zen training, and then a lot during the years before starting the company by trying all kinds of Tofu-products following your books and ideas.

"We now process 30 tonnes (metric tons) of soybeans (Austrian grown) each year. That is ten times more than we used during our first year, and we plan to increase 5-10 times during the next years... If you are in Austria, we invite you to visit us."

Accompanying this letter was a packet of information about the company including all labels (each with the month and year of introduction), color ads run in two Austrian magazines (Das Gruene Haus, and Natur und Gesundheit No. 8; the slogan reads: "Sojarei Ebner-Prosl, your specialist in fresh soyfoods, brings you fresh tofu daily"), and two catalog/price lists (one for food processors and one for retail stores) for Jan. 1989; products made by the company have been marked by the author with an "S." The retail catalog contains 20 fresh products, 3 books, and 30 non-fresh products. Details of the catalogs are given in a separate record. Address: Augasse 2, A-2500 Baden bei Wien (near Vienna), Austria. Phone: 02252/85101, 45505.

9191. Golbitz, Peter. 1989. Moving tofu to the dairy case. New soyfood products in Europe (Interview). *SoyaScan Notes.* Oct. 23. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Peter is interested in the question: If the FDA says that tofu should be sold in the dairy case, how do tofu manufacturers feel about it. He has the impression that most tofu manufacturers would prefer to have it sold in the dairy case. Northern Soy and White Wave both prefer the dairy case.

During a recent trip to Europe to sell ads in *Soya Bluebook*, he saw some fantastic products and took some photos. One of the most impressive products was a cultured soymilk, packaged by a French dairy group, sold in little

© Copyright Soyinfo Center 2013

3-ounce glass bottles like creme fraiche, 2 in a cardboard sleeve with beautiful graphics. Also Alpro/Vandemoortele has an aseptically packaged fermented soymilk called Soya Yofu, which they produce for someone else [Note: actually its their own Provamel brand]. One had an exotic fruit flavor (a fragrant pineapple, kiwi & banana mixture). The consistency was good and it had no beany flavor. "It was better than anything I've tasted in this country."

From Germany there were some vacuum packaged products sort of like very thin, square, overlapping luncheon meats, which looked like the tofu was coagulated in the package. One had broccoli in it, one peppers. He may start a section for international soyfood products in the *Soya Newsletter* starting next January. Address: Soyatech, Bar Harbor, Maine.

9192. Marrese, Anthony. 1989. Re: Soyfoods in France. Letter to William Shurtleff at Soyfoods Center, Oct. 28. 2 p. Handwritten. [Eng]

• ***Summary:*** The author conducted a soyfoods market study in France for William Shurtleff of Soyfoods Center, sending out forms which were filled out by 12 companies, visiting or interviewing 9 companies, and visiting 5 companies at the Diet Expo '89 held 21-23 Oct. 1989 in Paris. It seems like there are four types of companies working with soya in France:

1. Independents, both large and small, mainly in primary soymilk, tofu, or tempeh production, or in second generation burgers, smoked products, or desserts production, with either organic (biological) or non-organically grown products. Examples: Le Ferme du Jas, Innoval/Sojalpe, Société Soy, Le Bol en Bois / Tama / Daizou, La Maison du Tofu, Les 7 Marches, Boulangerie Artisinale des Maures, Odile Corbel & Dan Ludington [named Gaia Enterprises by Feb. 1992], Communauté de la Lix (United Macrobiotic Company), Tofu Kuehn.

2. Non-Independents owned by large companies or agricultural co-ops: Gerblé, Bonneterre / Triballat, Sojadoc, Cacoja (C.A.C.), Renaitre.

3. Bean or cereal (agricultural) companies: Celnat.

4. Specialty manufacturers for the Asian-European (Japanese, Chinese, Korean, etc.) markets: Yamato.

"I had some very good talks with Bernard Storup of Société Soy, the Bol en Bois people, Celnat, Bonneterre, Gerblé and others. In general the market and usage seem to be going nowhere but up and it is still in the very early stages of 'real consumer' type foods, not just health store specialties. Some French soybeans are used but a lot are imported... Real quantity information is not available since it is changing so fast (mainly in an upward direction and mostly with secondary processed products which use tofu or soya in them)." Address: c/o Terre Nouvelle, Eourres, 26560 Séderon, France. Phone: 92.65.10.95.

9193. Pierce, Michael. 1989. Re: Early work with tofu: Wildwood in America and Auenland in West Germany. Letter to William Shurtleff at Soyfoods Center, Oct. 30. 4 p. Typed, with signature.

• ***Summary:*** Pierce got involved with tofu while he was in Georgia. He learned to make tofu from a guy in Macon named Pat Powell, who had just gone up to The Farm in Tennessee and learned from Lewis Headrick, who now lives in Northern California. In about Sept. 1980 Pierce went to California and the day he arrived he met Paul Duchesne, who told him his dream of starting a tofu shop. Pierce explained that he already knew how to make tofu, so Duchesne asked Pierce to be the first tofu maker. Pierce moved into the building that is now occupied by Wildwood; it was his apartment. For about the next year, Pierce made tofu sandwiches with Duchesne, until the Wildwood Natural Foods tofu kitchen opened in Sept. 1980, at which time he became Wildwood's first tofu maker. David Patton came down and showed them how to use larger scale equipment than their original 60 quart pot.

"I met Peter and Elgard Wiegand in the summer of 1981 in California. They expressed great interest in returning to Europe and starting a small tofu shop like Wildwood. Peter started working with us at Wildwood, then a few months later, they left for Germany to piece things together.

Around Nov. 1981, Elgard wrote saying they needed me to come soon. A purchased a Mini Might disintegrator from Bean Machines Inc., took two old pressing bags from Wildwood, some recipes and *The Book of Tofu,* and landed in Germany on 1 Feb. 1982. It was snowing a cold. This was the most exciting time of my life. I was the Ambassador of Goodwill and Tofu. Instantly, the Bean King from San Francisco. I was treated with great respect."

There follows a description of the original equipment. "The water came from very deep in the ground. It was cold year round and made the best tofu. The first batch of tofu was magical. We had 40-50 people from all over Germany one night for dinner and a slide show by Wolfgang Furth-Kuby. This batch of tofu was probably the best I ever made. It radiated. That was the fun time. Everyone was charged and everyone wanted tofu. We started selling in bulk... but soon Peter purchased a vacuum pack machine. Then we had a good clean product. It was easier to deal with, people liked it more, and it lasted longer. We made soya milk, but more as a special order. We also made tofu cakes, pizzas, sandwiches, and salads... Peter, myself, and usually some lady with good taste and a talent for cooking would do demonstrations at restaurants, yoga centers, and once at a private sanitarium. We had a lot of fun."

But then things got harder for Peter. There were many expenses but not as much income. Pierce went to India in Feb. 1983 and made some tofu there. When he returned in June Peter had begun building his new kitchen. He had 3-4 large cookers, a new grinder, and a big vacuum packager.

© Copyright Soyinfo Center 2013

But still the financial picture was bad and eventually the company went under. Pierce taught two guys how to make tofu and both bought bits and pieces of Peter's equipment and started their own small tofu operations. "Rolf put together something in Trostberg, West Germany. Herbert, the other guy, went north.

"I know that Peter became very unstable. He lost everything, including his wife and kids. He is now working odd jobs painting houses, trying to keep his head up and pay off his debts. He really worked hard but he lost his spirit. Peter had a very hard life. Pleas give Peter and Elgard a lot of credit for helping tofu get started in Europe. They worked so hard and got nothing to show for it. They are truly beautiful, caring people. I love them both dearly. Their vision was pure. We just didn't have much on the business end."

Peter's address is presently Kampenwandstr. 25, 8213 Aschau, W. Germany. Phone: 08052-2967. Note: In Nov. 1989 Peter Wiegand reviewed all information on his work and stated, in a touching letter, that it was all correctly reported. "The whiteness and pureness of tofu brought out one of my darkest sides that I really didn't know before."

Update: Talk with Michael Pierce. 1993. Dec. 8. Rolf Barthof's (Prabuddha) tofu company in Breitbrunn is doing very well. Peter Wiegand is a rock musician in Germany. Address: Graphic designer, 408 2nd St., Macon, Georgia 31201. Phone: 912-752-8083.

9194. Lukoskie, Luke. 1989. Where is the best place to sell tofu in supermarkets? (Interview). *SoyaScan Notes.* Oct. 31. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Luke thinks that the best place to sell tofu in supermarkets is in the meat case, next to the hamburger (and tofu-hamburger blend), near the red meat–not in the deli/dairy case. Why? 1. Tofu needs human communication. The butcher is in much closer contact with the average customer than the head of the dairy or deli sections. The only comparable department is produce. 2. Red meat sales are falling. The department is in competition with other departments (dairy, produce, grocery), so they need new healthful products to help pick up sales. 3. The temperatures are the lowest in the store. 4. The people in the meat department are the most sensitive to the need for shelf rotation, good sanitation, etc. 5. One of the easiest ways to tell Americans how to use tofu is simply to mix some with hamburger.

None of Luke's tofu is sold in any meat case. They once tried to get tofu burgers in there but they were not successful, but that may have had to do with the particular small chain where the experiment was tried. Island Spring got permission from Safeway to test market a hamburger-tofu blend in 5-pound chubs in the meat case, but they have not yet put the product together. Sausages made with a blend of meat (pork and/or beef) and tofu taste very good–much better than the meatless hot dogs which he strongly dislikes. He developed some premium products with organically grown beef and pork, lower cholesterol and sodium and saturated fats, no nitrates or nitrites. But the price was in the $3-4/lb range, more than twice the typical price.

Most of Island Spring tofu is now sold in the produce section. If it were moved out, the result would definitely be negative for the company, at least in the short term. If that happened, Luke would work to have his tofu sold in the meat section. Safeway is the only chain in the northwest that sells tofu only in the dairy/deli case, near yogurt. Sales of Island Spring tofu at Safeway are now roughly one-fourth of what they were in the produce case 5 years ago, before the yersinia contamination incident. Dr. George Pigott [pronounced PAI-gut] wrote a letter to Safeway warning them that they faced serious health contamination problems of they left tofu in the produce department. Luke feels the main cause of the drop was the change of location to deli/dairy. Address: P.O. Box 747, Vashon, Washington 98070. Phone: 206-622-6448.

9195. Mizono, George; Mizono, Jack; Mizono, Bill; Mizono, George. 1989. History of Azumaya, America's largest tofu manufacturer (Interview). *SoyaScan Notes.* Oct. 31. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Details on the date and place of Azumaya's founding are unclear. Nor is it known who coined the company name. The earliest known owner, in the 1920s or early 1930s in San Francisco, was a Mr. Teranishi. Jack Mizono, in talks with the wife of Mr. Teranishi's son, recalls her saying that Mr. Teranishi started Azumaya in the 1920s (probably in the early 1920s) in the San Francisco Bay Area. Then Mr. Teranishi moved the company to Stockton for a while, then his son took over and brought it back to San Francisco, probably in the early 1930s, to 1636 Post St. (between Buchanan and Laguna). (Note: There is no listing for Azumaya in any San Francisco or Stockton city directory prior to 1957). Mr. Teranishi then sold Azumaya to a Mr. Francis Sakamaki, who owned an import-export business and who bought it for a friend who had trouble finding a job. But the friend quit in 1936 because he couldn't take the long hours of hard work, so Mr. Sakamaki was stuck with the business, and put it up for sale.

George Mizono, the eldest of 4 Mizono brothers, had graduated from high school that year and had been working at a fish market for 6 months. In the midst of the Great Depression wages were low and jobs were scarce. George worked 12 hours a day and was paid $35 a month, with only one Sunday off each month. His father, Saichi Mizono, who was retired and had a little money, advised: "If you're going to work that hard, you might as well work for yourself." So in Feb. 1937 his father bought Azumaya for $2,500 on the condition that George would work hard at the business. According to George, his father gave the business to him and never meddled, although his parents did help with the daily work. Yet it was a family business, run to support the family.

© Copyright Soyinfo Center 2013

In Jan. 1937 George, now age 19, worked at Azumaya to learn his business then he actually took over ownership in February, and Mr. Sakamaki left. At that time there was one other Japanese tofu shop in San Francisco. Named Umino Tofu Co., it was located at 1613 Buchanan St. Jack Mizono, who was still in high school, helped before school and after school, and on weekends and holidays. Jack went to work for Azumaya when he graduated in June 1937, and George gave him a half interest in the business ownership.

During the first year Azumaya made about 150-200 cakes/day of tofu (each 20-24 oz.) in the 20 by 40 foot space. These were sold in bulk in cans for about $0.05 per cake, delivered to Japanese grocery stores and restaurants. In the early days Azumaya guaranteed sale of their tofu within 24 hours. Any tofu that was left unsold at a store the next day, they would take back and make it into grilled tofu (yaki-dofu). In addition the tofu, the company also made agé (deep-fried tofu puffs), ganmodoki (fried tofu patties), konnyaku, ito konnyaku, and fresh udon noodles. The company was never a bakery (as San Francisco City Directories from 1957 say it was); at New Years the company did make green noodles.

In 1940 or 1941 the company moved into a rental building to 1606A Geary St. In 1942 Azumaya was forced to close since the entire family (both parents, 4 brothers, and 2 sisters, like most West Coast Japanese) was sent to an internment / detention camp during World War II. The Mizonos stored their tofu-making equipment in a government storage warehouse then went to the camp at Topaz, Utah, for 3 years. Other Japanese set up a tofu plant inside the camp; the Mizonos served as advisors. During the war, Jack K., John S. and Bill were drafted into the U.S. Army; George was rejected because of a heart defect. After being released in 1945, the Mizonos did not re-start Azumaya immediately. Most Japanese in the camps were afraid to leave the camps and to return to the Bay Area, so Azumaya had too few customers to sustain operations. George went to work for the phone company and as a welder. Jack got out of the army in Oct. 1946 and the company re-opened at their former location on Geary St. in early 1947. They had very little business, but they had to support the family. Jack had to hold a second job to support his family. George invented a hydraulic press to separate the soymilk from the okara; it was based on a hay press. Azumaya's first inroads into the Caucasian market was through the Berkeley Co-op system during the 1950s. Jack had a good friend, Mike Yoshimine, who worked for the co-op. He picked up the bulk tofu in oyster pails and took it to the co-op in his car.

In about 1957-60 Azumaya was forced to relocate because of the city's redevelopment plan of Japan Center. So they moved (without any relocation funds from the city) to 855 Golden Gate Ave., between Octavia and Goff, near City Hall. They bought the lot (25 by 125 feet) for about $6,000, and built the first tofu plant that they owned. Bill Mizono, the youngest of the 4 Mizono brothers, and John, joined the company in about 1962; prior to that the company was too small and not busy enough to take him in and the Mizonos worked 14-16 hours a day. The company ownership was divided so that George and Jack each owned one-third, and the remaining one-third was split between Bill and John as an outright gift to them. A little after this time the company was incorporated for tax purposes. There was no issuance of stock. In the late 1960s, while still at Golden Gate (according to Jack's clear recollection) the company began packaging its tofu in individual containers. They were the first tofu company in northern California to do so (though Matsuda & Hinode had started packaging earlier in Los Angeles) and it proved to be the key to their subsequent growth. Jack bought an American-made packaging machine, a 4-flight conveyor, that cost about $10,000 and did not work very well. It was very slow and labor intensive. 4 trays (containing tofu and water) were put into a jig then covered with one sheet of plastic and put into the machine, which sealed on the plastic. The 4 packages were then cut apart manually and put into cardboard boxes. Most consumers, including the Berkeley Co-op, did not like the switch to packaged tofu, but store owners like it because it reduced handling (many retail store used to package their tofu in little deli cartons and affix a label and weight), raised profits, and was more sanitary.

While at Golden Gate, in about 1969, after they were packaging in the 4 trays, the Mizonos met Mr. Yamauchi, owner of Matsuda & Hinode Tofu Co in Los Angeles. While they were closed at New Year's they took a week vacation to Disneyland then stopped by to see Mr. Yamauchi's plant (which was much bigger than Azumaya) on the way back. With this visit, a long and mutually beneficial relationship began.

In the late 1960s the city changed the zoning at Golden Gate from industrial to residential. So Azumaya was again forced to move, but they were glad to get out of their cramped quarters into a much larger space. They purchased a lot (about 200 by 80 feet, partly hillside) at 95 Boutwell Street, using $30,000 in city relocation funds. Then they borrowed $100,000 and built a large, modern tofu plant (about 9,000 square feet). In 1969, when they moved in, annual gross sales were $600,000. Jack went to Japan and bought modern tofu making equipment, which played a key role in Azumaya's growth. As a result of this advanced equipment, working time dropped to only 6 hours a day. So needing some new products to fill up their idle time and to help pay for the equipment, they added nama-agé (which Jack had first seen in Japan) and kinugoshi (silken tofu).

With key help from Mr. Yamauchi of Hinode Tofu Co. in Los Angeles, they also installed a modern tofu packaging system (developed by Mr. Yamauchi) using plastic trays made by Sealright in Los Angeles (Mr. Yamauchi had agreed to share his exclusive right to buy these trays with Azumaya)

© Copyright Soyinfo Center 2013

and Fabrikal in Kalamazoo, Michigan.

Azumaya also started to make Chinese-style noodles, wonton skins and eggroll skins, and reintroduced their udon (Japanese style noodles) which they had discontinued at Golden Gate Ave. due to limited demand. Other local companies made these Oriental foods but Azumaya was the first to package them, and packaging was the key to getting them into supermarkets. Now Azumaya had 2 lines of packaged products, and the pasta products and tofu both helped each other to gain entrance to supermarkets. Azumaya also started to make Chinese-style tofu (Cathay Tofu) to try to capture that market.

In 1973 there was a big meat shortage; meat prices skyrocketed between March and August. Azumaya set up a complete sales program–which Quong Hop & Co. quickly copied and then went after Azumaya's supermarket accounts. Bill Mizono stepped in to try to regain lost accounts. He developed new point of purchase materials using Azumaya's first professionals: a marketing person, ad agency, and home economist. The result was that in 1973 Azumaya published recipes for using tofu to extend meat–Tofu Meat Loaf, Pork Tofu, Sukiyaki, and Sweet 'n Sour Tofu. Below each recipe name was the slogan: "Tofu- from the bean that thinks it's meat!" Matsuda & Hinode in Los Angeles co-sponsored the recipes. Then several weeks before Thanksgiving in 1973 Bill held a press luncheon at San Francisco's famous Bush Garden Restaurant. Forty media people attended, including people from TV channels 4, 5, and 7. Tofu immediately began to get extensive, positive media coverage as a good, inexpensive protein source and supplement to meat. Azumaya's tofu sales skyrocketed.

After the move to Boutwell, Japan Foods Corp. (JFC) was the first real distributor to Azumaya tofu. They took it mostly to smaller stores, but within about 6 months they got Azumaya into local Safeway stores–a huge break. Azumaya then got the Safeway Richmond warehouse account with 200 stores, then Lucky, then many different chains started to carry Azumaya tofu. JFC was cut out as a middleman in sales to supermarkets, though JFC still distributes Azumaya tofu to the Asian-American market. This Azumaya tofu was packed with water in plastic trays (made by Sealright), sealed with a printed film lid.

Packaging still remained a problem. In July 1975 Mr. Yamauchi (of Matsuda and Hinode) and Jack Mizono became partners in starting Airtight Container Inc. in Los Angeles. After about a year of unsuccessfully trying to make their own plastic trays (since supply from Sealright was unreliable, and Azumaya was required to order by the truckload far in advance), they got Merrill's Packaging in Burlingame, California, to start making these high density polyethylene trays in late 1976. Now Azumaya's packaging was matched to their production equipment.

In about 1977-79 George retired; he sold his ownership to the other 3 brothers. In 1977 annual gross sales reached $1 million. During the 1980s the American concern with cholesterol and better diets further expanded Azumaya sales. Francisco on 2.5 acres of land. In about 1976-80 the company began to sell tofu outside of California, first in Oregon and Washington, then back to the East Coast. In Oct. 1979 Azumaya moved into a much larger, new plant (about 44,000 square feet or 5 times as big) at 1575 Burke Ave. in San Francisco. Tofu production rose from 110,000 lb/week in 1982, to 122,000 lb/week in 1984, and 150,000 lb/week in 1987.

What are the main factors that transformed Azumaya from a tiny Japanese tofu shop into the largest tofu manufacturer in the Western world? The location in California. The early start. The early move to individual packaging. The 1973 meat shortage which gave tofu new publicity. The early entrance into supermarket chains. The rise of health/cholesterol consciousness in the USA. Address: 1&3. San Francisco, California (retired); 2. President, Azumaya Inc., 1575 Burke Ave., San Francisco, California 94124. Phone: 1. 415-343-8100; 2. 415-221-4470; 3. 415-285-8500.

9196. AFISA (Association Française des Industriels du Soja Aliment). 1989. Membres de l'Association, présentation de l'action et programme [Members of the Association, plan of action, and program]. AFISA, 5 Boulevard de la Méditerranée, 31400 Toulouse, France. 2 p. Unpublished manuscript. [Fre]

• ***Summary:*** The seven members of the association are Celia (located in the city of St. Denis l'Hotel; Mr. Vasseneix), Cacoja (Issenheim; Mr. Rochet), Innoval (Valence; Mr. Balitrand), Prolait (Niort; Mr. Helie), Société Soy (St. Chamond; Mr. de Preneuf), Sojadoc (Clermond Ferrand; Mr. Monraisse), Triballat (Noyal-sur-Vilaine; Mr. Clanchin). The consultant is Pierre Maitre (of Aix en Provence; General Manager of Maho, an affiliate of Aixagri in 1987). In charge of promotion is E. Prudon at ONIDOL, in Toulouse.

These member companies are all large soyfoods manufacturers. Their program includes: 1. Studies: A. Scientific, medical, and nutritional. B. On raw materials and the definition of products (norms, standards, legislation). C. Genetics, specific varietal selection. 2. Promotion. A. Documentation. B. Promotion animation and generic promotion of soyfoods. 3. ONIDOL will send periodic "flashes" to members. 4. Coordinated actions during the next 5 years. A. What are we talking about; definition of products. B. What are our trump cards? Nutritional, economic, and technical arguments. C. What dissemination and publicity. The part played by promotion will be more important during the 2nd year, when we have established a base from our studies.

Note that this association is composed entirely of large manufacturers of tofu and soymilk; modern soy protein products (such as isolates and concentrates) are not included.

9197. **Product Name:** Ambrosia: Soy Yogurt [Plain, Blueberry, Raspberry, Strawberry].
Manufacturer's Name: Ambrosia Soy Co.
Manufacturer's Address: 199 Saltonstall Parkway, East Haven, CT 06512. Phone: 203-467-8821.
Date of Introduction: 1989. October.
Ingredients: Incl. soymilk, spray-dried tofu, fruits, stabilizer.
New Product–Documentation: Talk with Liz Appel. 1989. Nov. 9. This product was introduced 1 month ago. The name is now Ambrosia, with "Soy Yogurt" as a subtitle in smaller letters. But she may have to change the name because there is a company in the area named Ambrosia Yogurt that makes soft-serve frozen yogurt. The product is extremely popular, they can't keep up with demand. Sales have doubled in several weeks. Present flavors are plain, blueberry, raspberry, and strawberry; they will probably introduce an apricot-mango in 1-2 months. It is a kosher cultured soymilk, but is not Pareve. There really is no such thing as a Pareve culture, despite what Cream of the Bean says. To prepare: Put fruit on the bottom of the cup, run in the soymilk-yogurt mixture, seal, incubate until set. They plan to use a stabilizer since they do not add any soy [milk] powder. In July she was flown to Milwaukee, Wisconsin, by Aurotech, a culture company in nearby Menomonee Falls that owned half of Cream of the Bean. They wined and dined her, put her up in a hotel, made yogurt for her, wanted her to make soy yogurt with them and they wanted ownership in return for their expertise, but after a lot of investigation, she feels they do not have the expertise they claim to because their product itself was never very good. They kept going over the numbers, and wanted to put in the product she disagreed with. So she decided not to work with them. Their game is to look for little companies that need capital or expertise, and offer to show them how to make a good product in exchange for part ownership. The soy yogurt is a very hard product to make, but they are getting better. She does not see her product as competing with Jofu, which is a non-cultured product with added tofu powder. Hers is marketed as a lactose-free yogurt, and most people don't realize that Jofu is a non-dairy yogurt. She prefers to sell to health food stores rather than supermarkets. She has been in Waldbaum's Foodmart, a major supermarket chain, since Feb. 1989 and its tough, with much lower profits. Her aim for the company is to be a full-fledged soy dairy, with 5-6 trucks, and making sour cream, non-dairy creamer, etc. "When people think of soy, they think of us. We'll have a whole new look and set of labels in several months." She is now looking for capital to get a new facility. She has been in touch with Woody Yeh.

Talk with Richard McKelvey, who formerly worked with Tomsun and Jofu. 1990. Dec. 11. "Ambrosia Soy is terrible. Its really a very low grade product. It doesn't even touch what Jofu offered."

9198. Belleme, John. 1989. Snow-dried tofu: The original convenience food offers flavor an nutrition. *East West.* Oct. p. 30-32.
• ***Summary:*** Each winter, high in the mountains of central Japan, Aki Takagi's small family is busy making snow-dried tofu [dried frozen tofu] for the world's natural foods stores.

Note. This is the earliest English-language document seen (April 2013) that uses the term "snow-dried tofu" to refer to traditionally-made dried-frozen tofu. Address: P.O. Box 457, Saluda, North Carolina 28773. Phone: 704-749-9537.

9199. Bonneterre. 1989. Bonneterre c'est tout naturel: Tarif détaillant 20/10/89 [Bonneterre is all natural: Distributor's catalog and price list. (Includes Lima catalog)]. 1 place des Planteurs, 94538 Rungis cedex, France. 28 p. 30 cm. Includes a catalog for Lima Foods. [Fre]
• ***Summary:*** This catalog, in an outside folder accompanied by various leaflets, lists all products distributed by Bonneterre, with their prices. On pages 19-20 is a section on soyfoods (Produits a base de soja), with two subcategories: Milks and desserts (brands from Bonneterre and Société Soy), and Soy preparations (only from Société Soy).

Bound into the back of the catalog is a 9-page catalog for Lima in Sint-Martens-Latem, Belgium. Address: Rungis cedex, France. Phone: 46.87.26.34.

9200. **Product Name:** China Rose Tofu (Curded with Calcium Sulfate).
Manufacturer's Name: China Rose Inc.
Manufacturer's Address: 738 Airport Blvd., Suite 6, Ann Arbor, MI 48108. Phone: 313-665-2222.
Date of Introduction: 1989. October.
New Product–Documentation: Talk with Bruce Rose, president of Rosewood Products Inc. 1989. Dec. 13. In Oct. 1989 the brand on their nigari tofu was changed to China Rose and that on their calcium sulfate tofu was changed to Rosewood. The use of the word China is interesting. Recently Bruce visited a large tofu manufacturer in Zhenjiang (Chen-Chiang, in Kiangsu province). The company has two large plants, 500 hard-working employees, and no money. They make many interesting and tasty tofu products, including pressed tofu sheets and tofu in various tasty sauces. Their soymilk is extracted cold. They signed a letter of intent to do a 50:50 joint venture making tofu in Michigan.

Bruce also notes that he likes his reliable Bean Machines continuous cooker. It is a complex machine, with quite a number of feedback devices.

9201. Committee on Dietary Allowances, Food and Nutrition Board, National Research Council. 1989. Recommended

© Copyright Soyinfo Center 2013

Dietary Allowances, 10th revised ed. Washington, DC: National Academy of Sciences. x + 285 p. Oct. Index, 24 cm. 7th ed. was 1968. 8th ed. was 1974. 9th ed. was 1980. [200* ref]

• ***Summary:*** Recommended Dietary Allowances (RDAs) have been prepared by the Food and Nutrition Board since 1941. The first edition was published in 1943 to provide "standards to serve as a goal for good nutrition."

This book expands the role of calcium in the diet: For young adults (age 19-24) it has been increased to 1200 mg/day, from 800 mg/day. Those with the maximum RDA of 1200 mg/day for calcium are males age 11-14, females age 11-24, and pregnant and lactating women. Males and females from age 25 and up, and children from age 1-10, still have an RDA of 800 mg/day.

The RDA for iron has been lowered for women of reproductive age to 15 mg/day from 18 mg/day. Iron is a constituent of hemoglobin, myoglobin, and a number of enzymes and is therefore an essential nutrient for humans. Heme and nonheme forms of iron are absorbed by different mechanisms. Heme iron, which is highly absorbable, is found only in animal tissues. "The proportion of heme iron in animal tissues varies, but it averages about averages about 40% of the total iron in all animal tissues, including meat, liver, poultry, and fish. The remaining 60% of the iron in animal tissues and all iron in vegetable products is present as nonheme compounds... The two most well-defined enhancers of nonheme iron are some organic acids (especially ascorbic acid [vitamin C]) and the animal tissues present in each meal. On the other hand, some dietary and medicinal substances such as calcium phosphate, phytates, bran, polyphenols in tea, and antacids may decrease nonheme iron absorption substantially."

The RDA for vitamin B-12 has been lowered from 3 to 2 mcg/day; World Health Organization recommends only 1 mcg/day. Selenium and vitamin K have now been given RDA status. It is recommended that smokers consume almost twice as much vitamin C as non-smokers. Other major revisions appear in the RDAs for zinc, folate, and vitamin B-6.

In the chapter on minerals, section on Calcium (p. 174-84), has the following headings: Introduction, calcium absorption, dietary sources and usual intakes (calcium-precipitated tofu is listed as a good source), bone formation and retention, relationship to phosphorus and protein intakes, other potential functions, recommended allowances (adults and adolescents, pregnancy and lactation, infants and children), excessive intakes and toxicity.

The average American consumed 743 mg/day of calcium in 1977-78. Intake was generally higher in males than in females. Dairy products contribute more than 55% of calcium intake of the U.S. population (Block et al., 1985). "An increase in protein intake reduces fractional tubular reabsorption and results in an increase in urinary calcium excretion. In contrast, an increase in phosphorus intake increases fractional reabsorption and causes urinary calcium to decrease." But some studies (Spencer et al., 1988) have failed to demonstrate effects of dietary phosphorus intake on calcium balance at adequate levels of calcium intake.

For details on vitamin K, see p. 107-14. Vitamin K (fat-soluble) is the name of a group of compounds. "Compounds with vitamin K activity are essential for the formation of prothrombin and at least five other factors (factors VII, IX, and X, and proteins C and S) involved in the regulation of blood clotting... Defective coagulation of the blood is the only major sign of vitamin K deficiency." "The vitamin K content of commonly consumed foods is not known with precision and therefore is not given in food composition tables... Green leafy vegetables, which provide 50 to 800 micrograms [mcg] of vitamin K per 100 gm of food, are clearly the best dietary sources. Small but significant amounts of vitamin K (1 to 50 mcg/100 gm) are also present in milk and dairy products, meats, eggs, cereals, fruits, and vegetables... A normal mixed diet consumed daily by a healthy adult in the United States has been estimated to contain an average of 400 to 500 mcg of vitamin K." Address: Washington, DC.

9202. Fédération Nationale des Syndicats de la Diététique. 1989. DietExpo '89: 10e salon international des produits de diététique, de nutrition et d'hygiène [DietExpo '89: 10th international exhibition of dietetic, nutritional, and hygienic products]. Paris, France. 138 p. Held 21-23 Oct. 1989 at Paris, France (Parc des Expositions, Porte de Versailles). Illust. Index. 21 cm. [Fre]

• ***Summary:*** This book contains ads, an index then alphabetical listing of exhibitors, and a list of brands. The following soy-related companies are listed: Bonneterre (distributor, full-page color ad, inside front cover), Lima France (via Bonneterre; full-page color ad, p. 8), Laboratoires Heuprophax (full-page ad, p. 18; Sojacithine), Alré (full-page ad, p. 21; Soja Cao, Soja Fruits, Sojacao Gluten, Soja-Vita. This company, in business since 1934, is a division of Heuprophax Laboratories in Nanterre, France), Aliments de Regime & Alre (p. 30), Bioforce (p. 34-35), Bonneterre (p. 36), Celnat (full-page ad, p. 41-42), Creation (p. 44, Soyalet and Soyavit brands of soyfoods), Diétetique et Santé (p. 50, Gerblé), Heuprophax Laboratoires (p. 64), Innoval (p. 68), Jonathan-France (p. 72), Naturavit (p. 73), Laboratoires Marins (p. 76, Soyal soy lecithin), Lima-France (p. 80), Nature et Progres (p. 88, organic certifiers, their logo looks like a round yin-yang (*t'ai chi*) symbol with one white circle in it), Provamel (p. 98, Izegem, Belgium; 4-page color insert shows products), Société Soy (half-page ad, p. 99; tofu specialists), Pur Aliment (p. 100, Pural brand; Seventh-day Adventist broker of many soyfood products), Soy (Société Soy, p. 112). Address: Paris, France.

9203. **Product Name:** Heart & Soul Quiche Me Not Tofu Vegetable Pies [Spinach, or Broccoli].
Manufacturer's Name: Gourmet Naturally (Manufacturer). Common Objective Co. (Marketer-Distributor).
Manufacturer's Address: 1. 5890 Black Welder St., Culver City, CA 90232; 2. P.O. Box 261, Hermosa Beach, CA 90254. Phone: 213-373-5826.
Date of Introduction: 1989. October.
How Stored: Fresh. Later frozen.
New Product–Documentation: Listed on labels purchased from Berkeley Natural Grocery Co., California. 1991. Nov. 24.

Talk with Andrew Harrison, President, Heart & Soul, Common Objective Inc. 1991. Nov. 27. This product was introduced in Oct. 1989. The products used to be sold fresh, but now they are sold frozen in a box. He owns a company, Gourmet Naturally, which manufactures only Heart & Soul Products, including this product. Legally this company is separate from Heart & Soul, but the two will soon be merging.

9204. **Product Name:** Jaclyn's Non-Dairy Alfredo Sauce, and No Tomato Pasta Sauce [Each Seasoned with Miso].
Manufacturer's Name: Jaclyn's Food Products, Inc.
Manufacturer's Address: P.O. Box 1314, Cherry Hill, NJ 08034. Phone: 609-983-2560.
Date of Introduction: 1989. October.
Ingredients: Alfredo: Tofu, organic white miso, water, organic brown rice flour, garlic, imported olive oil, sea salt, natural herbs and spices. Pasta Sauce: Fresh organic carrots, squash, water, onion, green pepper, garlic, imported olive oil, organic red miso, red wine vinegar, sea salt, natural herbs and spices.
Wt/Vol., Packaging, Price: 16 oz jar.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: Leaflet. 1989. April. "The Alfredo sauce can be used in your favorite Fettuccine Alfredo recipe. Try it over noodles, whole grains, or steamed vegetables."

Tardosky. 1989. Whole Foods. Nov. p. 50. Talk with Robert Savar. 1989. Nov. 13. The non-dairy alfredo sauce is made with tofu and mellow white miso. The tomato sauce is made with organic carrots, squash, and red miso. Label for each sauce sent by Jaclyn's. 1989.

9205. **Product Name:** Tofu Burgers, Teriyaki Burgers, Miso Burgers, Tofu Nuggets [Plain, or Barbeque].
Manufacturer's Name: La Soyarie.
Manufacturer's Address: 25 rue St. Etienee, Hull, QUE, J8X 1H5, Canada. Phone: 613-235-5356.
Date of Introduction: 1989. October.
Ingredients: Incl. tofu, soy sauce.
How Stored: Refrigerated.
New Product–Documentation: Soya Bluebook. 1989. p. 102-03. Contact: Koichi Watanabe, President.

SoyaCow Newsletter. 1994. July/Sept. Mr. Koichi Watanabe is president of La Soyarie in Hull, Quebec.

9206. Leatherhead Food Research Assoc. 1989. Vegetarianism and the consumer: Implications for the UK food industry. Leatherhead Food Research Assoc., Randalls Rd., Leatherhead, Surrey, England. vi + 118 p. Oct. No index. 30 cm. Price: £2,700. [2 ref]
• ***Summary:*** Contents: Foreword. List of 27 tables. List of 16 figures. Management summary. 1. Introduction: Scope of the research, aims, objectives, research method. 2. Profile of consumers reducing/excluding meat/meat and fish from their diet: Definitions, levels of reduction/exclusion of meat/meat and fish consumption, demographic profile, length of time following current eating pattern. 3. Reasons for reduction/exclusion of meat consumption: Summary of reasons for change amongst adults, reasons for change by demographic profile of adult consumers, summary of reasons for change amongst children, reasons for change by eating pattern of consumers. 4. Future potential of vegetarianism and reduced meat consumption: Consumer intentions, reasons for change. 5. Implications for food consumption habits of the exclusion of/reduction in meat and fish consumption: Changes made to in-home consumption patterns by consumers avoiding meat completely, changes made to in-home consumption patterns by consumers reducing consumption of meat, changes made to out-of-home food consumption patterns by consumers avoiding meat, changes made to out-of-home food consumption patterns by consumers who had reduced meat consumption. 6. Trends in consumption of meat and fish: Introduction, meat, fish. 7. Trends in consumption of meat and fish alternatives: Introduction, vegetables, salad and fruit, alternative protein sources, animal-derivative-free products, overview of vegetarian product introductions to the UK, development of vegetarian products within the catering market, development of novel vegetarian products worldwide. 8. Consumer purchasing criteria for vegetarian food: Introduction, distinctiveness of product, retailer and manufacturer preferences, level of healthy eating concern, level of reaction to food 'scares', level of environmental concern. 9. Conclusions.

In the section on "Alternative protein sources" the subsection on "Meat imitations" states that Realeat Vegebangers, Cauldron Foods Tofu Burgers, Granose Soya Franks and Spicy Links, Protoveg Sosmix, Direct Foods Smokey Snaps, Marks & Spencer Vegetable Cutlets are all on the market (p. 72). Realeat was the pioneer in introducing vegetable burgers (Vegeburgers) and frozen burgers to the health-food trade; they were introduced to supermarkets in about 1986/87. The Vegeburger brand, now owned by Haldane Foods, includes Cheese Vegeburger, Vegebangers, and ready meals. Companies that have introduced vegetable burgers in the last four years include Direct Foods,

© Copyright Soyinfo Center 2013

Vegetarian Feasts, Granose Foods, Tivall, Cauldron Foods, Booker Health Foods, Brewhurst, The Dietburger Company, Realeat, Birds Eye Walls, and supermarket brands. In 1987 Cauldron Foods launched a range of three varieties of tofu burger in vacuum packs; cheeseburgers were launched by both Realeat and The Dietburger Company. In April 1988 Birds Eye Walls launched its Steakhouse vegetable burger and Granose Foods launched four varieties of frozen burgers, incl. Soya & Mushroom, and Nut & Sesame varieties. Tesco introduced a vegetarian burger under its own brand; it was made by Tivall from soya and wheat. In 1989 Realeat (Haldane Foods) introduced a microwaveable Quarter Pounder Burger. In 1985 Granose Foods launched Soya Franks, a meatless sausage. Realeat launched Vegebanger, which includes soya. In 1986 Direct Foods launched a soya-based Sausage Slice and Tivall introduced vegetable protein sausages. In 1987 The Dietburger Company launched an all-vegetable frozen dietbanger and Granose Foods launched Vegetarian Spicy Links. In 1988 Goodlife Whole Foods launched Herb Bean Bangers and Spicy Bean Bangers; Buss Foods introduced a vegetarian sausage, Realeat introduced a frozen Vegebanger, and Granose Foods added a vegetarian sausage to its Wholefoods Kitchen range (p. 76). Address: Leatherhead, Surrey, England.

9207. Lima N.V. 1989. Lima: Tarif détaillant [Lima Foods catalog and price list]. Edgar Gevaertdreef 10, B-9830 Sint-Martens-Latem, Belgium. 9 p. [Fre]
• ***Summary:*** This macrobiotic food catalog was bound into the back of the Bonneterre catalog at a 1989 food expo in Paris. Lima sells the following soyfoods, each proceeded by its product category: Fresh products: Skewered seitan/tofu, Presto natural tofu, Presto tofu legumes/vegetables, Presto tofu cheese. Legumes: Yellow soybeans. Sprouts: Green soy/mung (500 gm or 5 kg). Flours: Roasted soy flour. Vegetarian preparations: Lima soy sauce (500 ml or 1 liter), tofu, natural tempeh, tempeh with shoyu. Dressings: Salad dressing with soy and tomato, Salad dressing with soya herb. Specialties: Organic miso (1 month), Hatcho miso, Barley miso (organic or regular), Rice miso (organic or regular), Heiwa brand Instant miso soup (regular or red, From Japan), Tamari (250 ml, 1 liter, 18 liters), Mansan Tamari from Japan, Shoyu (250 ml, 1 liter, 18 liters), Sakai shoyu from Japan. They also carry one book titled "Tofu dans le Cuisine Macrobiotique" (Eddie Hara, 1982).

Accompanying the catalog is a packet of individual full-color sheets with of photos of products in a folder titled Lima: Quality is our passion." There are sheets titled "Vegetable products rich in protein," "Tamari and shoyu," "Japanese specialties (incl. Heiwa brand shoyu and tamari), and a brochure titled "Lima: 30 years as a producer of organically grown (biological) foods." It describes the life and work of Edgar Gevaert (poet, artist-painter, ecologist, and a leader of the European peace movement). Address: Sint-Martens-Latem, Belgium.

9208. Martino, Vic. 1989. Tofu, tofu, where do we put the tofu? *Food People* 9(9):1, 14.
• ***Summary:*** Tofu, which the FDA classifies as a "potentially hazardous food," must be sold at 45ºF or below. For this reason, health inspectors have told a number of retailers recently to move water-pack tofu from the produce department wet rack to dairy or deli cases. Aseptically packed Mori-Nu tofu is allowed to be sold at any temperature. Address: Food People, 1699 Lawton St., San Francisco, California 94122. Phone: 415-731-1283.

9209. Nakamura, Hiroshi; Takasawa, M.; Kashara, S.; et al. 1989. Effects of acute protein loads of different sources on renal function of patients with diabetic nephropathy. *Tohoku J. of Experimental Medicine* 159(2):153-62. Oct. [27 ref]
• ***Summary:*** Discusses glomerular filtration rate (GFR), albumin excretion rate (AER), and concentrations of plasma amino acids. "In diabetes with macroalbuminuria, GFR decreased after ingestion of tuna fish meal and did not significantly change after intake of bean curd. In both normal subjects and diabetic patients, urinary AER did not increase after each kind of protein loading. Plasma concentrations of alanine, glycine, and arginine, known to induce glomerular hyperfiltration, increased to a greater degree after ingestion of tuna fish meal than after administration of bean curd." Address: First Dep. of Internal Medicine, Niigata Univ. School of Medicine, Japan.

9210. **Product Name:** Nature's Patties [Original, or B.B.Q.].
Manufacturer's Name: Nature's Path Foods Inc.
Manufacturer's Address: 170-2540 Simpson Rd., Richmond, BC, V6X 2P9, Canada. Phone: 604-278-2923.
Date of Introduction: 1989. October.
New Product–Documentation: Soya Bluebook. 1989. p. 103. Contact: Arran Stephens, President [formerly founder and president of Lifestream, a natural foods distributor in Canada].

9211. New Hope Communications. 1989. The natural products market: A wellspring of consumer trends. Boulder, Colorado: New Hope Communications. 164 p. Price: $975.00.
• ***Summary:*** Contents: Acknowledgements. 1. Introduction: The roots [history] of the natural products industry. 2. Coming to terms: Definitions of basic concepts. 3. The industry matures: From rebellion to leadership. 4. The impact of legislation and regulation by Peter J. Semper. 5. The role of science: Research, development, and credibility. 6. Product category sales trends (Soyfoods is not listed as a category). 7. Retailing: The interface with the consumer (Health food chains: General Nutrition Centers, Great Earth

Vitamins, Nature Food Centres, Fred Meyer Nutrition, Nutrition World). 8. Manufacturing: A multitude of market shares. 9. Distribution: Consolidation, stability, and efficiency. 10. Regions. 11. Factors for the future. Appendix 1. Organic farming labeling legislation. Appendix 2. Examples of advertising.

Gross retail sales for this industry exceeded $3.5 billion in 1988. This study gives a good look at the structure of the market, and contains a brief historical overview of the industry. It contains many tables, graphs, and maps. None of these relate to soyfoods. A graph of "Natural Products Industry Sales" shows total retail sales to have grown from about $250 million in 1970 to $3,550 million in 1988, a 14-fold increase in 18 years. Of the 1988 total, $2,390 million (67%) is sold by independents (natural and health food stores), $679 million (19%) by the mass market (supermarkets), and $477 million (13%) by non-supermarket chains (such as General Nutrition Centers). The major natural products in the mass market (with sales in 1988) are yogurt $1,200 million, bottled water $800 million, granola bars $200 million, and herbal teas $70 million. "These 4 product categories add up to more than $2,200 million, which is more than double the sales we tracked for all grocery products sold through the natural products industry."

History: The notion of natural or health food products has been around for almost as long as the United States. Two of the early pioneers were Sylvester Graham and John Harvey Kellogg. Graham, who admonished Americans to stop eating meat, "gained both fame an notoriety in the early 1800s in claiming that 'a single pound of rice absolutely contains more nutritious matter than 2½ pounds of the best butcher's meat.' Graham died in 1851, at the ripe old age of 57. A year later, John Harvey Kellogg was born. He lived to be 91, and attributed much of his longevity to his [vegetarian] diet based on fruits, nuts and whole grains. From his Battle Creek Sanitarium, Kellogg concocted whole wheat meals, which found their way into the mass market. And subsequently, became more refined and less healthy."

The natural foods industry is based on two basic beliefs, both expressed by Graham and Kellogg. "The first is that certain foods or nutrients can be used medicinally. That is, the right foods can be used to help cure disease or to enhance vitality or performance... The second maxim dear to the natural foods industry is that food is better and intrinsically healthier when eaten most closely to its original state in nature. The ideal food is that which is unprocessed, unrefined, and even uncooked in some instances."

"The industry matures: From rebellion to leadership. Since World War II, food production in America can be explained by the concept of the Hegelian dialectic. One concept or practice (a thesis) inevitably evokes its opposite (an antithesis), and the two interact to form a new concept (synthesis), which in turn becomes a new thesis. "Throughout the 1950s and 1960s, food became ever more mass produced, processed, homogenized and inexpensive... as the power of the food conglomerates reached their peak some 20 years ago, the antithesis was being articulated by such visionaries as Adelle Davis, Gayelord Hauser, and Linus Pauling. "It's probably no accident that this antithesis caught on and became a movement in the late 1960s and early 1970s, when a significant segment of the Baby Boom generation was protesting everything else.

"Through the 1980s, a synthesis has been evolving. The food giants have become more aware of health issues and the natural foods industry has adopted and adapted technologies to allow greater production of food, while retaining its intrinsic values."

During the 1960s and 1970s this industry was divided into two camps, often at odds with each other. One sold "health foods" and the other "natural foods." The health food industry, which had started in the 1930s and focused on the first maximum that food can be used as medicine, focused most of its attention on vitamins, herbs, and some traditional health foods such as wheat germ and brewer's yeast. "In the late 1960s the natural foods faction emerged. Its followers were primarily concerned about food [rather than vitamins or supplements] and its purity... Products were defined essentially by what they did not contain: chemical pesticides, preservatives, food colorings, refined sugars and flours and, frequently, any animal products. Vegetarianism was an important part of the natural foods movement."

During the 1970s the industry was nurtured more by idealism than business acumen. When Natural Foods Merchandiser began surveying industry retailers in 1979, "nearly a quarter of them could not tell us their gross profit margin and a significant number did not even accurately know their gross sales. A high percentage didn't care...

"A decade later, the only thing that remains constant is the idealism, but today it is frequently blended with sound management and creative marketing...

"How did the industry accomplish this transformation? It happened in several evolutionary stages. First and foremost, the impetus for growth came from consumers. Economists use the term *demand pull* when describing conditions in which consumption dictates sales growth and pricing. In this case, the entire natural products industry was virtually dragged kicking and screaming into the mainstream by consumers. They demanded the natural products, and then they began demanding that these products be marketed properly.

"Then between 1975 and 1982 a new wave of retailers entered the scene. They ran better, cleaner businesses and broadened the market. "Health" and "natural" principles were integrated. Industry sales grew remarkably during the 1970s, from about $250 million in 1970 to $1,850 in 1980, averaging about 20% a year for the decade. The number of outlets quadrupled. "At the same time, the supermarkets started setting up health food sections. On the west coast,

© Copyright Soyinfo Center 2013

two regional chains–Raley's in northern California and Fred Meyer in Oregon–had successfully introduced health foods as early as 1971. Their continued success, along with heightened media attention, prompted Safeway to begin a program in 1980 (another motivation was that Raley's was generally leading Safeway in market share wherever the two chains competed). Since Safeway at that time was the nation's largest grocery chain, its leadership encouraged other supermarkets to follow suit. Drug stores and discount stores, such as K-Mart, also entered the field.

"Meanwhile, there was strong expansion from the existing health food retail organizations, primarily the major chains such as General Nutrition Centers (GNC), Great Earth International and Nature Food Centres."

By the end of 1982, this expansion had peaked. There was a 4-year shakeout which lasted from early 1983 until late 1986. The industry lost a net of 1,500 health and natural food stores, and the vast majority of these were small health food stores. "The number of segregated natural foods sections declined from a high of 2,700 in 1985 to approximately 1,400 today."

Surviving retailers emerged stronger. A resurgence began in 1987. In the fall of that year Surgeon General C. Everett Koop issued a report stating that cholesterol levels exceeding 200 were associated with a high risk of heart disease. This was considerably lower than the previous acceptable cholesterol limits and immediately plunged a quarter of the American people into a risk group. Consumers began visiting natural foods stores to buy low-fat, low-cholesterol foods, some based on tofu and other soyfoods. Also, foods such as oat bran, canola oil, and niacin were shown to actually lower serum cholesterol levels.

"Probably the biggest boost the industry has ever received... came in March of this year, when CBS '60 Minutes' ran a segment on the potential dangers of apples treated with Alar (daminozide) to young children. Retailers reported being overwhelmed by consumers clamoring for organically-grown foods of all types.

"In many ways, the industry is 20 years old. Many of the leading companies in the industry were formed within the past 20 years, including Tree of Life, Nature's Way, Twin Lab, Celestial Seasonings, R.W. Knudsen & Sons, Mrs. Gooch's, Bread & Circus and Whole Foods Markets." Address: Boulder, Colorado. Phone: 206-642-3586.

9212. **Product Name:** Rosewood Tofu (Curded with Calcium Sulfate).
Manufacturer's Name: Rosewood Products Inc.
Manufacturer's Address: 738 Airport Blvd., Suite 6, Ann Arbor, MI 48108. Phone: 313-665-2222.
Date of Introduction: 1989. October.
New Product–Documentation: Talk with Bruce Rose, president of Rosewood Products Inc. 1989. Dec. 13. In Oct. 1989 the brand on their nigari tofu was changed to China Rose and that on their calcium sulfate tofu was changed to Rosewood.

9213. Shurtleff, William. 1989. Re: The common or usual name for tofu or "bean curd." Letter to the Division of Regulatory Guidance, FDA, Washington, DC 20204, Oct. 3 p. Plus 12 pages of backup documentation. [150 ref]
• ***Summary:*** The FDA's position is that tofu has no common or usual name, and that therefore an "appropriately descriptive phrase" such as "soybean curd." The author presents 5 lines of argument in an attempt to demonstrate that the common or usual name of tofu is tofu. These are: 1. Change in Library of Congress subject catalog heading in June 1985 from bean curd to tofu. 2. Occurrences of the terms "tofu," "bean curd," and "soybean curd" in current American dictionaries. 3. Analysis of 45 American books about tofu. 4. Analysis of American publications about tofu. 5. Analysis of American tofu and tofu product labels. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

9214. **Product Name:** Tofu.
Manufacturer's Name: Tofu Shop Ltd.
Manufacturer's Address: 89 Dominion Rd., Mt. Eden, Auckland, New Zealand.
Date of Introduction: 1989. October.
New Product–Documentation: Call from Ron Hoyfong, owner, from New Zealand. 1993. June 2. He is a Chinese New Zealander. The company started in about Oct. 1988 or 1989. He began by selling to Asian restaurants and retail stores then about 2½-3 years ago began to sell to typical retail customers. The Tofu Shop now makes about 6,000 kg/week of tofu. He also makes the tofu for Bean Supreme using his workers and making it in their factory. He and Bean Supreme have a non-compete agreement, which began 6 months ago. A major problem is the many Asian immigrants to New Zealand, a few of whom start tofu shops in their back yards, without proper sanitation, and sell it at very low prices so the owners can survive financially.

9215. Wang, H.L.; Cavins, J.F. 1989. Yield and amino acid composition of fractions obtained during tofu production. *Cereal Chemistry* 66(5):359-61. Sept/Oct. [18 ref]
• ***Summary:*** Five fractions were isolated during processing of whole soybeans into tofu: soak water, water-insoluble residue [okara], soymilk, tofu, and whey. Into the soak water or whey went 14% of the soybean solids, 4.7% of the soybean protein, and a small amount of oil. Into the okara went 30, 20, and 11%, and into the soymilk went 63, 79, and 82% respectively. Finally, 52% of the soybean solids, 71% of the protein, and 82% of the oil were recovered in the finished tofu. Address: NRRC, Agricultural Research Service, USDA, 1815 N. Univ. Street, Peoria, Illinois 61604.

9216. Demos, Steve. 1989. White Wave's strategy for marketing soyfoods in America as cholesterol-free protein foods (Interview). *SoyaScan Notes.* Nov. 1. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** "White Wave welcomes the movement of tofu, a potentially hazardous food, out of the produce case. I think we are positioned and prepared as well as we possibly could be for this kind of change. This is what we've been waiting for! Years ago, White Wave designed its boxed, vacuum-packed tofu with a 60 day shelf life to sell in the dairy case. The disruption of an existing habit pattern opens up to opportunities for innovative companies." Demos does not see, even in the short term, any major loss of sales. At least 2/3 of White Wave's tofu is already out of the produce case and into either the dairy case or temperature controlled cases. He feels the best place to sell tofu is next to yogurt, ideally between yogurt and the deli meats in the dairy/deli case. White Wave conceives of itself as selling a new category of foods, "cholesterol free protein foods." This category should be well defined unto itself. Eventually Demos would like to see this heart/smart concept evolve into the "soyfoods section." Since signs identifying sections are generally not allowed in supermarket cases, the section/category might be partitioned off with plastic dividers at each end, like the Pillsbury Doughboy category. King Soopers has already pioneered this idea, starting in about 1983, putting tofu between the yogurt and the milk (with no plastic dividers), on the basis of the demographics, then building the concept by adding other soyfoods and soymilk. But tempeh, a slow mover, is now in the frozen foods case, and the meatlike products (such as hot dogs) are next to Armour in the deli meats.

Safeway seems to have made a top level decision to aggressively promote soyfoods. This year they called White Wave and said, "We don't know what you make, but give us everything. Then in August, in their two largest new classy "Safeway Marketplaces" in Boulder (and maybe in a few newer or college-oriented stores in Denver), entirely on their own initiative, they installed temperature controlled end-aisle cases at the end of the produce section facing the cash registers. The location is very prominent–an impulse location. Each case has the word "Tofu" in large letters on it. Many different types of soyfoods (and nothing but soyfoods) are sold in these cases–tofu, tofu dressings, tofu hot dogs, soy cheeses, Stir Fruity (soy-based yogurt), etc. All White Wave soyfood products in these 2 stores are sold in the Tofu case. Demos feels that "Tofu" this is the best title for the case. Also the "Approved by Healthmark" with the Healthmark logo on each display case identifies these as healthy foods. Only foods that are low in cholesterol, fat, and sodium get the Healthmark. Each case, constructed like an open dairy case, 5 feet wide by 6 feet high, has a temperature range of about 35-40º. Demos would definitely prefer to have his products sold in these cases rather than any other location in the store. White Wave's main strategy is to "identify a category," and to group foods in that category together. Again, the current category definition is cholesterol-free protein foods, but the long term goal is to have the category defined as "soyfoods." It is too early to say how the new isolated cases are affecting sales, but preliminary signs all look very positive.

White Wave started pasteurizing its tofu in Dec. 1988. Since then they have not had a single complaint of spoilage or sourness. Pasteurization does effect the tofu texture, making it firmer, but it also makes tofu much more profitable. White Wave makes both a 16 ounce vacuum packed and a 10-ounce single serve water-pack tofu. He prefers the vacuum pack and has worked the bugs out of his Tiromat so that it is no longer a significant source of problems. Tree of Life on the East Coast sells un-boxed vacuum-packed White Wave tofu very successfully, but Demos strongly prefers to box it. He has a whole new tofu plant at his new facility with automatic cooking and curding, conveyorized press tables and pasteurization.

Concerning the competition: Demos compliments Morinaga on a brilliant strategy. The net result is to help in the Americanization of tofu by identifying it clearly as a protein food and therefore forcing it out of the produce case. The irony is that when the dust settles, Mori-Nu Tofu may be the only brand left in what becomes an outdated, foreign location–with the oriental vegetables instead of with the protein foods. Azumaya and Hinode are rooted in the produce distribution network. Getting kicked out of the produce section will be very hard on them and their reaction will probably be to fight it rather than use it to their advantage. Address: President, White Wave Inc., 1990 North 57th Court, Boulder, Colorado 80301. Phone: 303-443-3485.

9217. Robinson, Dick. 1989. Japanese firm seeking site for food plant. *Tribune-Star* (*Terre Haute, Indiana*) 7(173):1. Nov. 4.

• ***Summary:*** Representatives of a specialty food firm (Kyoto Foods, whose name is not mentioned in the article), will be in Terre Haute next week "to start what could be the final negotiations for a new manufacturing plant for Vigo County, a source close to the situation said.

"The company is seeking a site to manufacture tofu, a creamy white food made from soybean flour [sic] and used in Oriental cooking...

"The source said the upcoming negotiations could finalize more than five years of planning that have gone into getting the project to its current status. It has been five years of ups and downs, 'a real roller coaster,' the source said.

"The major principals in the company are Japanese from the area of Tajimi and Kyoto. The relationship between Terre Haute citizens and that part of Japan date back 25 years to the time when the city and Tajimi became sister cities...

"The ties are especially strong between William and

© Copyright Soyinfo Center 2013

Toni Roach of West Terre Haute and Juichi Iida and his wife. Iida is a Japanese businessman.

"When Iida's son came here to study at Indiana University, the Roach family looked after the youth...

"If Vigo County is selected as the plant site, it would become the center for a sales area with a 300-mile radius. The marketing area would include cities such as St. Louis [Missouri], Louisville [Kentucky], Indianapolis [Indiana], Columbus, Ohio, and Chicago [Illinois]."

9218. Reed, M.H. 1989. Sushi and starters featured in Harrison. *New York Times.* Nov. 5. p. WC41.
• ***Summary:*** This is a review of the Japanese restaurant Momiji (261 Halstead Ave., south of the railroad station, Harrison, Westchester County, New York).

Dishes included: "Agedashi-tofu, golden cubes of bean curd moistened by a thin, somewhat sweet dipping sauce sprinkled with green onion.

"Skillfully made, firm tofu-dengaku brought small bars of grilled bean curd on sticks; the intense miso (fermented bean paste) toppings slathered on the bean curd gave the dish the seasoning it needed, but we found the concentrated miso somewhat salty."

9219. Morinaga Nutritional Foods. 1989. Morinaga Nutritional Foods appoints World Variety Produce as its chief distributor for Mori-Nu Tofu (News release). 5800 South Eastern Ave., Suite 270, Los Angeles, CA 90040. 2 p. Nov. 8.
• ***Summary:*** "Morinaga Nutritional Foods, makers of the only aseptically packaged tofu, has appointed Los Angeles-based World Variety Produce Inc. to coordinate its national distribution.

"World Variety Produce, one of the largest wholesalers of exotic and unusual produce items, are experts in the area of specialty fruits and vegetables...

"'Due to recent health inspector scrutiny of improper refrigeration temperatures for water-pack tofu in produce departments, Mori-Nu has become the tofu of choice for many produce buyers who prefer its convenience and guaranteed quality,' said Joe Hernandez, president of World Variety." Address: Los Angeles, California.

9220. Agriculture Canada Research Station, Horrow. 1989. Description of variety: Harovinton. Harrow, Ontario, Canada. 2 p. Nov. 9. Unpublished typescript.
• ***Summary:*** Harovinton is a "Large-seeded tofu-type soybean. Registration date: May 24, 1989. Registration No.: 3118... Harovinton, tested as OX733, was developed by the Agriculture Canada Research Station, Harrow. This variety was derived from the cross Vinton x Vinton 81, made in 1982." Vinton is susceptible to Phytophthora (a fungus) and tolerant of metribuzin (an herbicide) applied at recommended rates. Growth habit: indeterminate.

"Seed characteristics: Shape: spherical flattened. Size: large; 23 grams per 100 seeds. Seed coat: dull yellow. Hilum colour: yellow. Oil content: lower than Corsoy (18.6% vs. 20.1%). Protein content: higher than Corsoy 79 (44.9% vs. 40.9%). Seed coat peroxidase activity: high.

Maturity: 3100 heat units (Ontario). Performance and adaptation: In yield trials conducted in 1986, 1987 and 1988 at Harrow, Malden and Woodslee, Harovinton yielded about 6% less than Corsoy 79. Harovinton is shorter, more lodging tolerant, and earlier maturing than Corsoy 79... The yield of soymilk and tofu per kilogram of Harovinton beans was 4% and 11% greater, respectively, than for Corsoy 79." Maintenance of breeder seed: Agriculture Canada, Research Station, Harrow, Ontario. Canadian distributor: Canada Packers.

Note 1. This is the earliest document seen (Jan. 2010) that mentions the soybean variety Harovinton.

Note 2. The letterhead reads: "Agriculture Canada, Food Production and Inspection Branch, Seed Division." No address is given. Address: Harrow, Ontario, Canada.

9221. Harovinton: New Canadian domestic soybean variety. Large-seeded and/or vegetable-type soybean. 1989. Seed color: Yellow (dull), hilum yellow.
• ***Summary:*** Sources: Agriculture Canada Research Station, Harrow. 1989. "Description of variety: Harovinton." Harrow, Ontario, Canada. 2 p. Unpublished typescript. Nov. 9. Harovinton is a "Large-seeded tofu-type soybean. Registration date: May 24, 1989. Registration No.: 3118."

Ontario Ministry of Agriculture and Food. 1990. *Soybean Buyers Mission from New Markets, July 1-7, 1990.* Tokyo, Japan: Ontario Ministry of Agriculture and Food. 61 p. See p. 40. Appendix 5, titled "Development of soybean varieties," states: "Researchers at the Agriculture Canada Research Station in Harrow have focused on the development of varieties for the manufacture of tofu. With help from the OSGMB, a new variety named Harovinton, was recently released from this breeding program. This variety was higher than average protein content, white hilum and large seed size to better suit the needs of the tofu and soymilk manufacturers.

"To secure the best marketing and promotion of this variety to overseas buyers, exclusive marketing rights were given to the International Trade Division of Canada Packers Inc. and Wheatley Elevators Ltd. Both companies have extensive soybean export trading experience."

Bernard, Richard L. 1999. "Historical list of publicly developed North American specialty soybean cultivars to 1989: Large seeded." Year released: 1989. Developed by: Ontario, Harrow. Cultivar: Harovinton. Maturity group: I. Parentage: *Hm Rpsl-c* from Vinton x Vinton 81.

Note: Harovinton was the first food-grade soybean variety developed in Canada for the Japanese tofu industry, and helped pave the way in establishing Canadian food-grade soybeans as a premium quality product in Asia. Address:

9222. Frey, Harry. 1989. Kyoto Food Corporation, U.S.A. (News release). Administrative Asst., City of Terre Haute, 103 City Hall, 17 Harding Ave., Terre Haute, IN 47807. 1 p. Nov. 10.
• ***Summary:*** This news release was issued by the city of Terre Haute. See published story in Nov. 11 *Star-Tribune* (Terre Haute, Indiana). Address: Terre Haute, Indiana.

9223. Mio, Art. 1989. Recent developments at Morinaga (Interview). *SoyaScan Notes.* Nov. 11. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Zurkoff, a Morinaga food broker in the Milwaukee area, was in communication with the State of Wisconsin Dep. of Agriculture, Trade & Consumer Protection as early as May 1986 concerning the bacterial condition and handling of tofu. Art thinks that there are very few stores in the state of Wisconsin that still carry water-packed tofu in the produce section, but that might have happened 2 years ago. Wisconsin was one of the earlier states to take action on this point, as was Illinois.

Morinaga's "Water Hazard" ad did run for 1-2 months in natural/health food trade magazines starting in about Oct. 1989. It probably ran in *Natural Foods Merchandiser,* and others. Now they have dropped that ad for various reasons: (1) They want to announce their new extra firm tofu; (2) They got a lot of "flack" and ill will from others in the tofu industry, and they didn't want to ruffle any more feathers; (3) Azumaya threatened a lawsuit. Morinaga feels they would win such a suit if it should ever got to court, based on "generalities rather than specifics." Address: Morinaga Nutritional Foods Inc., 5800 South Eastern Ave., Suite 270, Los Angeles, California 90040. Phone: 213-728-4325.

9224. Robinson, Dick. 1989. Japanese firm announces plans for local food plant. *Tribune-Star* (*Terre Haute, Indiana*) 7(180):1. Nov. 11.
• ***Summary:*** "Kyoto Food Corp. USA announced plans Friday to build a production plant in Terre Haute for tofu, a food product made from soybeans. Construction on the $4.5 million plant is slated to begin early in 1990.

"Kyoto Food's five primary investors, Kiyoyaki Hirono, Yoshamasa [Yoshimasa] Yamashita, Yasuo Hatchijin [Hachijin, of Kyoto Tanpaku in Fushimi-ku, Kyoto, Japan] and Wataru Takai of Kyoto, Japan, and Juichi Iida of Tajimi, Japan, announced the planned project at a news conference in the Vigo County Annex and Security Center.

"The 25,000-square-foot plant will be on a 25-acre tract along Johnson Avenue between U.S. 41 and Indiana 63, south of the city. The company will buy the land from Morgan's Honey Creek Commercial Properties.

"The plant, which will be able to produce 2.5 tons of tofu daily, is expected to start with 30 to 50 employees and increase to 100 during the first year.

"The plan is to produce the product in 1-pound packages. The firm's marketing area will be in a 300-mile radius of Terre Haute...

"Plans for the tofu plant are an outgrowth of the 25-year-old sister-city relationship between Terre Haute and Tajimi, said Mayor P. Pete Chalos.

"The company will be an Indiana corporation and not a subsidiary of any other firm. The other four investors are reported to be presidents of medium-size companies in Japan.

"Yamashita will serve as president of the company and move to Terre Haute... After the plant is operating, Yamashita may be the only Japanese employee at the plant. When production begins, the operation is expected to have practically all American personnel...

"The plant is expected each day to use a ton of soybeans provided by area farmers... Tofu is reported to be the world's No. 1 health food."

Note: This is the earliest document seen (March 2013) concerning Kyoto Food Corp. in the USA.

9225. Dickinson, Donald W. 1989. Re: A company named Azumaya cannot be located in San Francisco from 1920 to 1937. Questions answered on Soyfoods Center letterhead (dated 10 Nov. 1989) and returned to SC, Nov. 20. 1 p. Stamped with signature.
• ***Summary:*** On 10 Nov. 1989, after a preliminary call, William Shurtleff wrote the County Clerk requesting that he search San Francisco's fictitious names records for businesses, and the business license records for the years 1920-1923 to try to locate a company named Azumaya, probably owned by a Mr. Teranishi. Shurtleff enclosed the required $18.50 in fees. The clerk searched the indexes of the records from 1920 to 1937 wrote back that he could find no mention of Azumaya.

Attached are: (1) Stamped envelope from County Clerk. (2) Receipt. Address: County Clerk, Superior Court, 400 Van Ness Ave., Room 317, San Francisco, California 94102.

9226. Fitch, Peter. 1989. Re: Haldane Foods Group Ltd. Letter to William Shurtleff at Soyfoods Center, Nov. 27. 1 p. Typed, with signature on letterhead.
• ***Summary:*** The Haldane Foods Group consists of Direct Foods Ltd., Haldane Foods Ltd., Realeat Foods Ltd., Regular Tofu Co. Ltd., Vegetarian Cuisine Ltd., and Vegetarian Feasts Ltd. Haldane became part of the British Arkady Group in January 1988. Brian Welsby has left the company. Fitch gives a phone number for Michael Cole in the UK. He also encloses a catalog (and price list) titled Haldane Foods Group, which lists and contains color photos of all products made by the six member companies. The catalog subtitle is "Europe's leading healthier food group." Address: Managing Director, Hadane Foods Group Ltd., 25 Hayhill, Sileby

• ***Summary:*** The first issue of this new journal includes this monograph, which contains articles on various soya products, products for infants, prevention of cardiovascular disease, homemade and traditional tofu manufacture, and the use of soya in cooking. Address: Italy.

9228. **Product Name:** Soydance Pizza.
Manufacturer's Name: Amberwave Foods.
Manufacturer's Address: 201 Ann St., Oakmont, PA 15139.
Date of Introduction: 1989. November.
Ingredients: Divided into Crust, Sauce, and Topping. Topping ingredients: Tofu made from organic soybeans, water, casein, soybean oil, unrefined corn and sesame oils, yeast cultures, sea salt, citric acid, beta carotene, spices.
New Product–Documentation: Leaflet (8½ by 11 inch, front and back, typewritten) sent by Richard Rose from Natural Products Expo East. 1989. Sept. "We've finally developed the best Lactose Free, Cholesterol Free, whole wheat pizza–with our own Tofu Mozzarella! We make it all."

Spot in Whole Foods. 1989. Nov. p. 84. Based on the recipe for Graindance Pizza, it is topped with tofu mozzarella, organic tofu, unrefined oil blends, and spices.

9229. Bennett, Kathryn O. 1989. Col. Sanchez traditional foods cookbook. Col. Sanchez Foods, P.O. Box 5015, Santa Monica, CA 90405. 124 p. Index. 24 x 23 cm.
• ***Summary:*** Contains numerous tofu recipes: Patti's blended tofu salad dressing (p. 47). Tofu bran muffins #1 and #2 (p. 76-77). Meat loaf (with tofu, p. 97). Curried tofu (p. 98). Judy Tarbet's buckwheat tofu burgers (p. 100). Tofu cheesecake cookies (p. 107). Rice pudding (with tofu, p. 108). Tofu nut cookies (p. 109). Soy whipped cream (p. 110). Tofu cheesecake (p. 115).

Kathryn Bennett was born in Texas and raised in New Mexico. While in New Mexico, she developed a deep interest in the Indian people. She obtained a Naturopathic degree and is involved in wholistic counseling. She has operated a natural food business in Los Angeles for the past 10 years. Address: Santa Monica, California. Phone: 213-204-1137.

9230. **Product Name:** Tofu Salad.
Manufacturer's Name: Cedar Lake Foods.
Manufacturer's Address: P.O. Box 65, Cedar Lake, MI 48812. Phone: 517-427-5143.
Date of Introduction: 1989. November.
New Product–Documentation: Cathy Tardosky. 1989. Whole Foods. Nov. p. 49.

9231. Haldane Foods Group Ltd. 1989. Haldane Foods Group. 25 Hayhill, Sileby Rd., Barrow upon Soar, Leicestershire LE12 8LD, England. 6 p. Mnaufacturer's catalog. Full color.
• ***Summary:*** The Haldane Foods Group consists of Direct Foods Ltd., Haldane Foods Ltd., Realeat Foods Ltd., Regular Tofu Co. Ltd., Vegetarian Cuisine Ltd., and Vegetarian Feasts Ltd. The catalog, subtitled "Europe's leading healthier food group," lists and contains color photos of all products made by the six member companies. A UK trade price list (effective 2 Oct. 1989), attached separately, gives product size, case size, and trade and retail prices in British pounds. Address: Leicestershire, England. Phone: 050981-6611. Fax 050981-6381.

9232. Kikkoman Oriental cooking. 1989. Publications International Ltd., 7373 North Cicero Ave., Lincolnwood, IL 60646. 96 p. Illust. Index. 28 cm.
• ***Summary:*** This full-color cookbook features 125 recipes using Kikkoman's full line of Oriental sauces. The book was published in two formats. The first was a small magazine format published in Jan. 1989, for sale at supermarkets during Chinese New Year. The second, published in Nov. 1989, was a larger size (28 cm tall), spiral bound on glossy paper with many color photos, for sale at bookstores. Both were 96 pages. Kikkoman supplied all the recipes.

Contents: Kikkoman brings the Orient home. Appetizers. Beef. Pork. Poultry. Seafood. Side dishes.

A color photo shows the following products, and they are used with their brand names in the recipes: Kikkoman Soy Sauce, Lite Soy Sauce, Teriyaki Sauce, Teriyaki Baste & Glaze, Stir-Fry Sauce, and Sweet & Sour Sauce. Tofu is used in one recipe (p. 46).

9233. Kolpan, Gerald. 1989. Tofu on trial: A *Health & You* taste party passes judgment on the bean curd Americans hate to love. *Health & You.* Fall. p. 7-10.
• ***Summary:*** Of the six people on the taste panel, five had never tasted tofu before. They were served Stir fried tofu and Tofu lasagna. "As the party broke up, it was generally agreed that tofu was better than our guinea pigs thought it would be."

9234. McCarty, Meredith. 1989. Fresh from a vegetarian kitchen. Turning Point Publications, 1122 M Street, Eureka, CA 95501-2442. ii + 263 p. Illust. by Bernice Kagan. Index. 28 cm.
• ***Summary:*** A macrobiotic cookbook containing over 450 recipes, many using tofu (at least 20, including many innovative sauces and dressings), tempeh, miso, amazake, soy sauce, soymilk, and amazake. A section titled "Soyfoods: Tofu and tempeh" (p. 151-55) contains 6 recipes and several variations. On page 202 is a recipe titled "Amazake-

Soymilk" in which 3/4 cup soymilk is mixes with ¼ cup plain amazake. The author has co-directed this natural health center in northern California since 1977. Address: Eureka, California.

9235. McDougall, John A. 1989. Healthy by choice: Natural gas from natural foods. *Vegetarian Times.* Nov. p. 81. [1 ref]
• ***Summary:*** "Question: Help! After eating tofu my husband has flatulence beyond belief What should I do? S.P. Ojai, California."

Ans: "Your husband should stop eating tofu. This answer may sound simple, but avoidance of gas-producing foods is a key solution for people with severe flatulence. Your husband obviously has a sensitivity tofu, which is made from soybeans... Flatulence is not at all uncommon on a whole-food vegetarian diet." Address: Santa Rosa, California.

9236. **Product Name:** [Amisoya Soya Tondella {Firm Non-Dairy Cheeses} (Natural, Black Pepper, Small Red Peppers, Aromatic Herbs, Mushroom, Truffle, or Mustard)].
Foreign Name: Amisoya Soya Tondella (Nature, Al Pepe Nero, Al Peperoncino Rosso, Alle Erbe Aromatiche, con Funghi, Ai Tartufi, Alla Senape).
Manufacturer's Name: Medical Soy S.p.A.
Manufacturer's Address: Via Matteotti 55, 20068 Peschiera Borromeo (Milan), Italy. Phone: 02.547.54.56.
Date of Introduction: 1989. November.
Ingredients: Con "Funghi" (Mushroom): Ultrafiltrated soy tofu, water, milk protein, boletus mushrooms (funghi porcini) 2%, corrector of acidity, citric acid, salt, natural aromas.
Wt/Vol., Packaging, Price: 400 gm round cylinders.
How Stored: Refrigerated.
Nutrition: At least 380 calories per 100 gm.
New Product–Documentation: Talk with then letter (fax) from Xavier Karis in Italy. 1990. June 13 and 18. Medical Soy makes two types of non-dairy cheese. Soya Tondella is a firm type of cheese, which you can cut, while Soya Filante is softer and can also be used on pizza. Mr. Bolleti is the contact person. Their fax number is 02-553-00-754. The company that distributes Medical Soy products is named La Moderna Distribuzione in Bergamo, Italy. Fax: 035-231-876.

Medical Soy leaflet. 1990. *"Linea Amisoya: L'alt(r) a Gastronomia. Prodotti a base di soya del tutto privi grassi animali. Prodotti di Soya freschi. Nutrirsi meglio per rimanere giovani"* [The Amisoya Line: The high/alternative gastronomy. Soyfoods containing no animal fats. Fresh soy products. Eat better to stay young]. Lists seven flavors. "Use like your daily regular cheese."

Label sent by Xavier Karis. 1990. June 27. 3.5 inch diameter. Orange, black, white, and red on brown. Illustration shows orange and yellow soybeans (which look like peaches) on a blackish-green small plant. "Food preparation based on soy protein (51% of the total protein)." Made in the establishment of Ponte Buggianese (PT), Via del Porrione, 84, Milan.

9237. **Product Name:** [Amisoya Soya Filante {Soft Non-Dairy Cheeses} (With Tomato, Salmon, Anchovies, Olives, Capers, Walnuts, Natural)].
Foreign Name: Amisoya Soya Filante (Al Pomodoro, con Salmone, Alle Acciughe, Alle Olive, Ai Capperi, Alle Noci, Nature).
Manufacturer's Name: Medical Soy S.p.A.

9239. Shurtleff, William; Aoyagi, Akiko. 1989. Tofu as a potentially hazardous food: Crisis or opportunity? Lafayette, California: Soyfoods Center. 67 p. Nov. 16. Index. 28 cm. [54 ref]

• ***Summary:*** Introduction and historical perspective. Major changes loom on the horizon for the tofu industry throughout the Western world. Consider the following facts:

* The U.S. Food and Drug Administration has classified tofu (both fresh and pasteurized tofu) as a "Potentially Hazardous Food."

* Every "Potentially Hazardous Food" must be kept refrigerated at 45ºF (7.2ºC) or below in food stores, restaurants, and vending operations.

* Roughly 90% of the tofu in America is sold in the produce section, where FDA estimates the average temperature to be about 50ºF (10ºC).

* Therefore most of the tofu in America is now sold in violation of federal and state laws governing potentially hazardous foods.

* Attempts to demonstrate to FDA that pasteurized tofu is a safe product with a long shelf life completely miss the point and would be a waste of time and money, according to FDA.

* The FDA person who drafted the original document classifying tofu as a potentially hazardous food thinks "there is a good chance within the next year or two that there will be a crackdown, and that most or all fresh and pasteurized tofu will be moved out of the produce case.

Question 1. Should the removal of tofu from the produce case to a colder location be viewed by the tofu industry as a setback or an opportunity? Question 2. Will the tofu industry be smart enough to turn a short term setback into a long-term gain? Question 3. All things considered, where is the best place for tofu to be sold? (1) In the dairy/deli case between the yogurts and cheeses, and the sliced meats? (2) In a special refrigerated case, built like a dairy case but marked "Tofu" or "Cholesterol-Free Protein Foods"? (3) In a special refrigerated enclosed glass case with other natural foods such as juices? (4) In the meat case next to the hamburger (and perhaps the hamburger / tofu blends, and the meat & tofu hot dogs and sausages)?

Since its invention more than 1,000 years ago, tofu, a moist protein food, has always offered an excellent substrate for multiplication of bacteria.

The earliest document seen (Jan. 2002) reflecting this concern, titled "Ptomaine poisoning from tofu," dates from 1892 in Japan. In 1953 in Japan the first general microbiological study was published, with counts of coli bacteria in winter and summer. And in 1958 the first book on tofu sanitation was published, also in Japan.

In the Western world, the first scientific study on the microbiological quality of tofu was published in 1977 at the University of Hawaii. It showed that as tofu spoiled and soured, the optical density (cloudiness) of the surrounding water increased.

Prior to January 1982, all this was of minor interest to the U.S. Food and Drug Administration (FDA), and tofu was still a relatively unknown product. But in that month there was an outbreak of yersiniosis (caused by the bacterium *Yersinia enterocolitica* in tofu) in the state of Washington. About 24 people were affected with diarrhea and severe stomach cramps; half were hospitalized. This was the earliest known outbreak of tofu-caused illness in the USA.

The Seattle branch of the FDA did a careful study of this increasingly popular moist protein foods and on 23 May 1984 classified it (like milk, meat, poultry, fish, etc.) as a "potentially hazardous food" which must be stored at 45ºF or below.

But only a few state health departments or supermarket chains paid much attention, and moved tofu out of the produce case to a colder location. Exceptions were some Safeway divisions on the West Coast, and the states of Wisconsin, Illinois, and eventually New York.

Meanwhile, other scientific studies of the microbiological quality of tofu (e.g. Hankin & Hanna 1983; Rehberger, Wilson & Glatz 1984; van Kooij & de Boer 1985) all showed many brands to have unacceptably high bacterial counts. Some of these (such as Hankin & Hanna, published in Connecticut in March 1983) got widespread negative media coverage, forcing tofu makers to become much more conscious of sanitation. It is interesting that the issue of tofu as a "potentially hazardous food" was not raised in these studies or the ensuing media coverage. In part because of that, most tofu continued to be sold in the produce section; some larger manufacturers responded by starting to pasteurize their tofu. But basically, business continued as usual.

Then in early 1987, health inspectors in Wisconsin pulled Mori-Nu Tofu out of several stores there, saying that it had to be stored at 45ºF or below. In February, Morinaga Nutritional Foods in Los Angeles, the importer and marketer of this aseptically packed tofu, responded with documents showing that their product, because it was aseptically packaged and had an FCE (Food Canning Establishment) number, was exempt from this temperature requirement. During the ensuing exchange of letters with the FDA in Washington, DC, Morinaga first learned (on 3 March 1987) that the FDA had classified tofu as a "potentially hazardous food" which had to be refrigerated at 45ºF or below. The documents show that Morinaga's only concern at that time was to get their product back into the stores. But Morinaga began to realize that, quite by accident, they had stumbled upon a powerful tool for expanding their market share–one of which most of the tofu industry was completely unaware. Yet they decided not to use it for awhile.

During 1988 Morinaga conducted a two-pronged

© Copyright Soyinfo Center 2013

marketing program. On the one hand, they ran the most extensive, positive advertising campaign ever conducted for tofu in America Full-page color ads such as "Lessons in tofu," "Shake up profits!," and "A healthy market" ran all year in numerous national magazines. On the other they began to confront water-packed tofu, promoting their product as having a longer shelf life and less spoilage.

In mid-1989 health inspectors in New York erroneously began to remove Mori-Nu Tofu from produce cases. To try to prevent that from happening nationwide, Morinaga began a campaign in mid-July to write a letter to the health departments in each of the 48 continental states reminding them that tofu had been classified by the FDA as a "potentially hazardous food," and that all water-packed tofu therefore had to be refrigerated at 45ºF or below. Aseptically packaged Mori-Nu Tofu did not require such refrigeration. This part was preemptive. But now Morinaga took the offensive: "We have been informed of recent efforts on the part of the health department officials to inspect and cite stores that are not conforming to the FDA Model Food Sanitation Code regarding water-packed tofu (soybean curd). We commend this action... We know of some instances where water-packed tofu was ordered relocated to dairy or deli cases due to the inability of produce department refrigeration units to maintain temperatures with the FDA guidelines."

Morinaga's campaign of letter writing and phone calls prompted the FDA, and state and local health officials to start enforcing federal and state regulations concerning tofu as a potentially hazardous food, which was required by law to be stored at 45ºF or below.

At the same time, Morinaga appealed to supermarkets and natural/health food stores (using their strongly worded "Water Hazard" ad in trade publications, plus their sales representatives) to carry their aseptic tofu, which could be legally stored in the produce section and which (being pre-dated with a "best used by" date of 10 months) would not cause any problems with souring or spoilage, with returns or "shrink," or with leakage.

A separate campaign of news releases to the popular media attributed the sour, bad-taste image of water-packed tofu to the traditional way of making and packaging it, plus the fact that it was usually stored, inadequately refrigerated, in produce departments.

By late 1989 Morinaga's campaign seemed to be working. In Wisconsin, most (if not all) water packed tofu had been moved out of the produce case; Mori-Nu Tofu had taken its place there. A number of chains nationwide were also relocating their tofu. But where would they put it?

And how should the tofu manufacturers whose tofu was being relocated respond? Should they welcome the change or try to fight it?

This book attempts to study and answer these difficult questions, which are crucial ones for the survival and growth of the tofu industry. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

9240. Tardosky, Cathy C. 1989. Soyfoods entrees: Nutrition for the '90s. *Whole Foods.* Nov. p. 48-53.
• ***Summary:*** Lists (with photos) many second generation soyfood products. Retailers say that demand for soyfoods is on the rise. Many store owners are quoted, speaking very positively of the category. Worthington Foods is now in its 50th year of vegetarian food production, with a total of 45 different entrees under the Worthington and Natural Touch labels. "The Natural Touch line was developed in the early 1980s as the interest in products went more toward the natural segment of the market."

• ***Summary:*** Typeset, green on tan, with four illustrations. Identical to the 1988 leaflet / sell sheet, except for the colors. Address: 768 18th St., Arcata, California.

9242. *Geschaeftsidee* (*Die*). 1989. Tofu-Herstellung: Unternehmenskonzept Nr. 164 [Tofu production: Enterprise idea no. 164]. 14(6):4, 25-54. Dec. 5. [4 ref. Ger]
• ***Summary:*** An in-depth look at the German tofu industry and the economics of tofu production, encouraging entrepreneurs to start their own tofu shops. According to a study by Dr. Ulrich Hamm from the University of Stuttgart-Hohenheim, use of tofu in West Germany is expected to reach 4,000 tonnes/year by 1992. In 1986 it was only 800 tons. The industry has grown greatly in the past 4 years. There are presently 25 manufacturers (often called Tofureien) in the country and they make 200 to 4,000 kg/week of the healthful food, which they sell for 5-18 DM/kg at natural food stores (Naturkostläden), Reform Houses (*Reformhäuser* and *Bioläden*), vegetarian- and even popular restaurants. Larger business have gross monthly income of 90,000 DM of which 40% may be profit. Minimum startup capital is 2,000 DM, and average is 50,000 DM. A history is given of Ruediger Urban, who started W. Germany's first tofu shop in 1979, cooking with firewood. He now runs a much larger tofu shop in Denning, a suburb of Munich, near the airport.

Klaus Gaiser (with photo and interview), a former student of Sinology and Japanology, started Yamato Tofuhaus in 1983 in Tuebingen, making about 150 kg/week. He learned to make tofu in Japan, where he lived for a year. He now makes 3.5 tonnes/week of tofu (up 35% during the past year) and is West Germany's most successful company.

Albert Hess began to make tofu in 1983, starting with a DM 2,000 investment. He now makes 1.5 tonnes/week of tofu. A brief sketch of numerous other companies, their histories and owners, and their present tofu output is given.

9243. Marshall, Philip. 1989. Re: Tofu as a potentially hazardous food. Letter to William Shurtleff at Soyfoods Center, Dec. 5. 2 p. Typed, with signature on letterhead. [1 ref]

• ***Summary:*** Cauldron Foods has always recommended that their products not be transported or stored above +4ºC (39.2ºF) even though all of their products are receive in-pack pasteurization. "We consider that there is a significant risk from spore forming pathogens, particularly *Bacillus cereus.* It seems likely that UK legislation will require even lower storage temperatures (+2ºC, or 35.6ºC) in the future, since certain organisms have demonstrated the ability to grow at less than +4ºC."

Page 2 is "Specification for original tofu," which includes physical and microbiological properties. Address: Owner, Cauldron Foods Ltd., 149 South Liberty Lane, Ashton Vale Trading Estate, Bedminster, Bristol BS3 2TL, England. Phone: (0272) 632835.

9244. Oka, Seizo. 1989. Early history of Azumaya (Interview). *SoyaScan Notes.* Dec. 5. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** According to: Shin Sekai-sha. 1922. *Zaibei Nippon-jin Kan* (*Directory of Japanese in the USA.* p. 50-51; also called the *New World Directory*) a company named Azumaya Shoten was located at 1636 Post Street in San Francisco. They made Japanese-style pickles, and also sold vegetables and other foodstuffs.

Mr. Oka notes that "Azuma" (written with a different character??) is the old Japanese name for the Kanto area of eastern Japan. According to a legend, the warrior?? Yamato Takero no Mikoto went to conquer this wild area. But after a while he got homesick and longed for his wife saying "A tsuma" (Oh, my wife). From this expression the area became known as Azuma.

Mr. Oka and William Shurtleff talked with Mrs. Kazue Teranishi who lives in Hinode Tower, San Francisco (phone: 567-8636). She came to America in 1932 and that same year she married Kôichi Teranishi in 1932. Right after the marriage he took over ownership of Azumaya, a company which had been run by his father, Eijiro Teranishi, and which she believes Eijiro founded in Stockton 5-6 years prior to the marriage, i.e. in about 1926-27. She thinks that Eijiro first made tofu at this company in Stockton, then decided to move the company to San Francisco. She had never heard about Azumaya or Eijiro being located in Oakland–but she is not sure about anything that happened before 1932.

Mr. Oka, whose lifelong work is writing a history of Japanese in America, has not been able to find any reference to Azumaya in Stockton. According to the 1922 Shin Sekai Directory of Japanese in the USA (p. 409) there were two tofu companies in Stockton, Eto Tofu-ten and Yonekura Tofu-ten.

Mr. Teranishi sold Azumaya to Mr. Francis Sueji Sakamaki. Francis was born in Matsumoto-shi, Nagano prefecture, Japan. His name at birth was Sueji Kusama. Just before coming to the USA, Sueji was baptized as a Catholic and given his Christian name, Francis. He was adopted by Kôsa Sakamaki, who was from Tsu-shi, Mie prefecture, Japan. Kôsa had arrived in the USA before 1900 and was well known as the "Alaska Boss," since he recruited Japanese to work in the Alaska salmon cannery. Francis had 4 children: Joseph Koji Sakamaki, Marie Sakamaki, Stephen Motoji Sakamaki, and Timothy Masaji Sakamaki. Francis later took over his father's recruiting business. But since the Alaska salmon canning business was strongly seasonal, Francis wanted another side business. So he bought Azumaya from Kôichi Teranishi in about 1935. However he found that tofu making was tough work so he sold the business in about 1936 or 1937 to Saichi Mizono, who bought it for his son, George.

The 1922 Shin Sekai-sha directory (p. 19??) shows that Mr. Saichi Mizono was a native of Kannon Mura, Saeki-gun, Hiroshima-ken, Japan. He arrived in the USA in 1896. For 5 years he ran a farm. Where?? In 1912 (Taisho 1) he started a cleaning and dying company?? (sensen-sho) in San Francisco?? How long continue?? He returned to Japan temporarily, then came back to the USA in 1915. In 1922 his family consisted of his wife, Matsuyo, his first son Akira (George), his second son Kiyoshi (Jack), and his first daughter Shizuko. Address: Head and Founder, History Room, Japanese Cultural and Community Center, 1840 Sutter St. #206, San Francisco, California 94115. Phone: 415-921-1485.

9245. Oka, Seizo. 1989. Early Japanese tofu production in America (Interview). *SoyaScan Notes.* Dec. 5. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** In the early 1900s, most of the tofu in America was made by the Chinese. The Japanese bought it from them. However when the Japanese started communities in rural areas where there were no Chinese, they started their own tofu companies. Those who did make tofu usually did it as a side business. Thus many early Japanese tofu manufacturers may not have had a company name associated with their activity. The Hayashi and Oye tofu making operations may not have had company names when they started.

It is the Japanese way to refine things, making them more delicate. They did this with Chinese chopsticks and with tofu, making it softer. Some of America's early tofu was probably made by Japanese restaurants. Address: Head and Founder, History Room, Japanese Cultural and Community

9246. Morinaga Nutritional Foods. 1989. Mori-Nu Tofu successfully sponsors the first-ever World Cup of Natural Bodybuilding (News release). 5800 South Eastern Ave., Suite 270, Los Angeles, CA 90040. 2 p. Dec. 6.
• ***Summary:*** "Top male and female bodybuilders from across the country recently competed in the first-ever Mori-Nu Tofu World Cup of Natural Bodybuilding, a steroid-free invitational meet held in Redondo Beach, California...

"'These athletes are dedicated to bodybuilding without using anything artificial,' said Art Mio, national sales manager for Mori-Nu Tofu... Mori-Nu Tofu provided free all-natural fruit shakes made with strawberries, bananas and tofu to the event's spectators and participants. According to Mio, tofu is very popular with bodybuilders because it is a rich source of protein, which is very low in saturated fats, sodium and calories with zero cholesterol. He added that tofu is an excellent addition for anyone wanting to eat healthy." Address: Los Angeles, California. Phone: 213-728-4325.

9247. O'Bannon, Kathleen. 1989. The last years of Victor Food Products in Canada (Interview). *SoyaScan Notes.* Dec. 7, and 6 March 1990. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The problems started in three areas. First was the growing competition from small Chinese tofu companies. There were 6-10 little Asian-Canadian tofu makers, some making tofu in a bathtub in their basements, and selling it for cut-rate prices. One even attempted to get into Stephen's plant, disguised as a food inspector, to spy on/study his equipment. Stephen wanted to get out of the "Chinese tofu wars." The second cause was the two gay followers of the Indian guru Rajneesh. One day they came seeking employment, saying that they had made tofu in Poona for years. George Harris (Bodhi-dharma) was the good guy; Kathleen hired him after a careful background check. But when he left to live on the Rajneesh commune in Oregon (where he ended up staying for nearly a year), his partner, Kirti (Joe Lewis) took his place. Joe Lewis turned out to be a malicious character–at times pure evil. The Rajneesh commune in Oregon would not let him live there, which angered him. He became the bookkeeper and office manager. He made life so difficult for Kathleen and ruined the good friendship that she had had with Stephen Yu (he deliberately connived to turn each against the other), that she finally felt compelled to leave the company in 1984. Joe Lewis falsified the company books, making it look like the company had more accounts receivable that was the case; this led local banks to refuse key loans to the company and to distrust Stephen. Joe Lewis charged the company for more time than he was working, messed up the office, then finally got into a big fight with Stephen. The Rajneesh guys were talking about suing Stephen. Finally Stephen fired them both.

The third cause was Bing, who was one of Stephen's long-time key production employees. He was very chummy with the Rajneesh guys. Bing left and told everything he knew to somebody else down-town, found somebody with money, set up a business in Chinatown and competed fiercely with Stephen.

After Kathleen left the first time but before Joe Lewis was fired, someone approached Stephen Yu about a joint venture making soymilk ice cream with a company named Tofu Parlor (formally Tofu Restaurant and Ice Cream Parlors, 304 Victoria Ave. East, Regina, SASK, S4N 0N7, Canada [near Saskatoon]. Owner: Wayne Knipple), which was already making soymilk ice cream. Stephen found one or two investors. One was John van Kessel, a 55-year-old chain-smoking accountant and computer expert, who was part of Tofu Parlor, invested money in Victor Food Products (VFP), liked to tell dirty jokes. The other was Larry Ginsberg. Stephen did a great deal of original research, using custom-designed equipment, to develop a new process for making excellent quality soymilk and ice cream from that soymilk. He worked with Guelph University researchers (such as Dr. Leni DeMann, a woman) to eliminate the gas and chalky flavor from soymilk. Kathleen and others thought this ice cream tasted better than Haagen-Dazs, and many people felt that the soymilk and the ice cream had great potential. But the Chinese on the Board of Directors VFP wanted Stephen to behave like a Chinese and just make tofu. They were opposed to the ice cream venture and they tied his hands.

In order to get around this limitation, in late 1985 or early 1986 Stephen decided to start a new corporation (at the same address as VFP–102 Hymus Road, Scarborough, Ontario, Canada M1L 2C9) named Tofu Master Inc. Van Kessel and Ginsberg owned part of it. The Chinese on the board of VFP had nothing to do with the new company. VFP would focus its marketing on the Asian-Canadian market and Tofu Master would aim for the Caucasian market. Stephen could now do more R&D. Stephen then brought in some new people to do the soymilk production. Tofu Master launched a firm and a soft tofu Tofu Master brand, and Entice (the soy ice cream) under the Tofu Parlor brand. The ice cream was made in a small, independent dairy in Toronto, and certified kosher. It came in individual small (100 ml) cups in chocolate, strawberry, and vanilla flavors. Stephen had the rights to sell to foodservice institutions and hospitals; Tofu Parlor in Saskatchewan had rights to the retail market. Saskatchewan also made a Tofu Parlor Bar (ice cream on a stick). Stephen also developed a remarkable vacuum packed Tofu Master Gourmet Tofu (in Barbecue, Herb & Green Onion, Cheese, and Bacon flavors). When he vacuum packed this tofu (either sliced or in whole cakes) in a remarkable machine he had, the process sucked the flavors into the tofu. But the banks wouldn't loan him the money to market the

© Copyright Soyinfo Center 2013

products because of what Joe Lewis had done, so it never was launched. By this time Stephen had lost so much face with the Chinese that they didn't want him to do anything that was not Chinese. He had to fight this attitude the whole way. Tofu Master was apparently the cause of the company's bankruptcy, for the project was never completed.

After Stephen fired Joe Lewis, Kathleen came in for 7 months. She ran the plant, did the recipes and promotion and marketing, and straightened up the office after Joe Lewis had messed things up. She helped promote the new ice cream. After that she got in an accident when she tripped on something and fell. She injured her neck, her lungs collapsed, and her back and neck were out for a year. She was very ill and had to have surgery. She left in Sept. 1987 and moved to Santa Fe, New Mexico, where she is now living. The company was still very much alive at that time. The company sold the equipment from the bankruptcy in April 1988. When she returned in November 1988 to do a health foods trade show in Toronto she was very surprised to hear that Victor Food Products had gone under. She can only assume that the people who were calling the shots had made big mistakes. Kathleen was very close to Stephen and felt very badly about what happened to him. Apparently after the bankruptcy he went to work with his brother-in-law who ran a Gold Chin fast food Chinese restaurant franchise.

Kathleen first made tofu in the early 1970s in her barn. She has followed the Sikh philosophy, was a yoga teacher for 8 years. He company in Toronto was named Natural Light Publications. She wrote a cookbook titled "Tofu: How to do it book," which was scheduled to be published in the winter of 1983 and to be sold with a stainless steel tofu kit that Stephen Yu was developing, to be produced in China. The kit turned out to be too expensive to make, so neither the kit nor the book was ever sold. Kathleen is now writing a book on "Nutrition and the Bible" and doing 6 home videos on cooking with natural foods. She wants to lecture on health and nutrition. Udo Erasmus has written a good book titled *Fats and Oils* published by Alive Press. It argues that butter is a safer product than margarine. Heating oils causes the free radicals to break off. They circulate in the body, causing many diseases and problems. Address: 227 Ojo de la Vaca, Santa Fe, New Mexico 87505. Phone: 505-983-5961.

9248. *SoyaScan Notes.* 1989. Influence of Japanese and Japan on soyfoods in America (Overview). Dec. 7. Compiled by William Shurtleff of Soyfoods Center.

• ***Summary:*** The Soyfood Center's SoyaScan database presently contains 30,790 publications and commercial products related to soya. Of these, 876 (2.9%) concern the influence of Asian-Americans (Japanese, Chinese, Koreans, or Indonesians) or their home countries on soyfoods. Of these 876 records, 638 (73%) concern Japanese influence, compared with 178 (20%) that concern Chinese influence–including Chinese from Taiwan, Hong Kong, Singapore, etc. Thus Japanese influence on soyfoods in America is much greater than that of any other Asian cultural group. We can identify at least seven major areas of influence:

1. Soyfoods Terminology. It is interesting to note that many of the most popular soyfoods in America are most widely known by their Japanese names. We say tofu (not doufu or bean curd), miso (not jiang or soybean paste), natto, okara (not soy pulp), yuba (not doufu-p'i or soybean skin). Even "soy" (as in soy sauce) is derived from the Japanese word "shoyu." Increasingly Americans interested in natural foods also use the terms shoyu and tamari to distinguish them from HVP soy sauce.

2. Kikkoman. By far the most influential Japanese soyfoods company in America today is Kikkoman, just as soy sauce is by far the most important soyfood product. Kikkoman was also the first Japanese company to introduce soyfoods to America. In 1868 the first Japanese immigrants to Hawaii took kegs of Kikkoman brand shoyu with them. In 1879 Kikkoman brand shoyu was registered in California, where it was exported to Japanese immigrants. Exports rose steadily, until between 1949 and 1954 exports of Kikkoman shoyu to the U.S. ranged from 213,000 to 305,000 gallons a year. Kikkoman's first real attempt to reach any foreign market dates from 1956 when, during the U.S. presidential elections, Kikkoman ran television ads to promote its product to mainstream American audiences as a seasoning for meat, fish, and poultry. In 1957 Kikkoman International Inc., a new sales company was established in San Francisco. Sales skyrocketed. In 1973 Kikkoman opened a huge modern shoyu plant at Walworth, Wisconsin. In 1976 Kikkoman passed La Choy to become America's best-selling soy sauce.

3. Introducing Soyfoods to Hawaii. The first Japanese who arrived in Hawaii in 1868 brought shoyu and miso with them. The earliest known soyfoods company there was a shoyu brewery started in 1891 in Honolulu by Jihachi Shimada. This was also the earliest known soyfoods company started by a Japanese anywhere in the Western world. Hawaii became part of the USA in 1898 by annexation. Hawaii and California were the first two areas in the U.S. where soyfoods became widely available. During the 20th century, Japanese started roughly 183 companies in Hawaii making shoyu, miso, and tofu–far more than Chinese (6) or Koreans (2). They developed innovative new products–such as sweet Hawaiian-style shoyu and miso. These products profoundly influenced the food life of Hawaii.

4. Soyfood Manufacturers in the USA. The earliest known soyfoods manufacturer in the Continental USA was a company (the name is unknown) run by the wife of Chieko Hirata that started making tofu in Sacramento in about 1895. The second earliest was Yamamori Jozo-sho, which started making shoyu in San Jose, California, in 1897. Many of the earliest soyfoods companies in America were run by Japanese Americans. By 1942 at least 158 soyfoods

© Copyright Soyinfo Center 2013

manufacturing companies had been started in America by Asian Americans; of these, 143 (91%) were run by Japanese Americans. When *The Book of Tofu* was published in 1975, it listed 55 tofu companies in America, all run by Asian-Americans; 39 were Japanese- and 16 were Chinese-run. Today America's two largest tofu companies are both run by Japanese Americans: Azumaya Co. in San Francisco, and House Foods & Yamauchi Inc. in Los Angeles. Hawaii's three largest tofu companies are also run by Japanese Americans: Aloha Tofu Co., Kanai Tofu Factory, and Hawaii Tofu. Morinaga Nutritional Foods in Los Angeles and Kikkoman Foods in San Francisco both import large amounts of aseptically packaged long-life silken tofu from Japan.

Another major manufacturer is San-Jirushi Corp. of Kuwana, Mie-ken. In the late 1970s San Jirushi started exporting tamari and soybean miso to America. They set up an office in the early 1980s and began to promote their product as "real" tamari to industrial food processors and the natural foods market. In Sept. 1987 the company opened a state-of-the art tamari plant in Richmond, Virginia, with a capacity of 1 million gallons a year. The company now has 75% of the industrial soy sauce market in America.

In Oct. 1986 a major new joint stock company named American Soy Products began producing Edensoy soymilk in Clinton, Michigan. It was a joint venture between Eden Foods and 4 Japanese companies: Marusan Ai, Kawatetsu Shoji, Muso Shokuhin, and Seikensha. Edensoy has since become America's best-selling soymilk. Prior to 1986 much of the soymilk sold in America was made in Japan.

Finally, three of America's 4 largest miso manufacturers are run by Japanese-Americans. The largest is Miyako Oriental Foods in Los Angeles. The other two are located in Hawaii.

5. Soyfoods Imports from Japan. The first importers of shoyu and miso were Japanese distributors such as Japan Foods Corp., Mutual Trading Co. and Nishimoto. But starting in 1962 American macrobiotic and natural foods companies started to import large amounts of shoyu and miso. Pioneers were Chico-San, Erewhon, Eden Foods, Westbrae, Edward & Sons, Tree of Life, and Great Eastern Sun. U.S. imports of soy sauce from Japan jumped from 1.7 million lb (174,400 gallons, worth $317,000) in 1949, to 18.6 million lb (1,897,000 gallons, worth $3,116,000) in 1972, an 11-fold increase in quantity during only 23 years.

6. Teachers and Information. Many Americans first learned about soyfoods from Japanese teachers, especially macrobiotic teachers, such as George and Lima Ohsawa, Michio and Aveline Kushi, Herman and Cornellia Aihara, and Noboru Muramoto. All have written many influential books and lectured and taught extensively since the 1960s. In addition, many young Americans learned how to *make* soyfoods from these macrobiotic teachers. Moreover, Japan is Asia's best source of information about soyfoods. For example, the Soyfoods Center's SoyaScan database contains 5,095 publications and products about soya and Japan, compared with 1,867 on soya and China or Taiwan.

7. Tofu Equipment Manufacturers. Hundreds of tofu companies have started in America since the mid-1970s. The majority of these are run by Caucasian Americans and most use specialized tofu equipment made in Japan by Takai Tofu & Soymilk Equipment Co., or by Sato Shoji.

9249. Bhatnagar, P.S. 1989. Re: New developments with soybeans and soyfoods in India. Letter to William Shurtleff at Soyfoods Center, Dec. 8. 2 p. Typed, with signature on letterhead.

• ***Summary:*** "I have been extremely busy in Establishing the National Research Centre for Soybean, which is one of its own kind, at least in India, if not in Asia. This institution is working solely on soybean... In addition to research on all aspects of soybean production, I am continuing work on utilization of product process development with special reference to screening varieties suitable for soy-food products. Our preliminary work has indicated that soybean varieties Punjab-1, PK-472 and Hardee are most suitable for the production of soy-dairy products particularly Tofu. With slight modification in the process of Tofu making, we are able to develop a product which is a very low priced substitute of pressed cottage cheese commonly known as 'paneer' in India. A food dish having ingredient of 'paneer' is considered to be a priced item and is invariably found in all parties of status.

"While milk paneer (pressed cottage cheese) is sold on an average for Rs. 30 to 40 a kg, soy-paneer 'Tofu' can be made available for Rs. 10/ per kg. This includes packing and marginal profit as well. In contrast to the tofu yield mentioned in your publications, we are able to get a little less than 2 kg soy-paneer from 1 kg dry beans by following modified method. I am very optimistic for the future of the product in the country."

The Dr. Bhatnagar adds on 24 March 1990: "The soybean has occupied an important place in the agricultural and oil economy of India. However, it is yet to be fully exploited as the most efficient low priced source of high quality protein. The urgent need is to develop domestic demand for defatted soyflour." Address: Director, National Research Centre for Soybean, Khandwa Road, Indore 452 011, India.

9250. *Tribune-Star* (*Terre Haute, Indiana*). 1989. Morgans sell land for tofu facility. Dec. 10.

• ***Summary:*** "Fred and Jo Ellen Morgan on Wednesday signed a deed transferring ownership of Morgan's Honey Creek Commercial Park, along Johnson Avenue, to Kyoto Food Group of Japan. Kyoto has announced it will construct a tofu manufacturing facility on the property. The company acquired 25 of the 27 acres in the tract, once a commercial

© Copyright Soyinfo Center 2013

tree farm, located between U.S. 41 and Indiana 63, Morgan said. The buyers originally only wanted four acres, but after seeing the great number of trees on the tract the decision was made to purchase all the available land, he said.

"Kyoto did not purchase the two acres belonging to Tim Morgan, which is the site of his feed business. The feed business will continue its operation, Morgan said. The Morgans spent 18 months developing the area for commercial use... The property has numerous evergreens, oak and white birch trees."

9251. J.-P.V. 1989. Innoval croit au soja [Innoval believes in soya]. *Le Figaro–Lyon* (*France*). Dec. 11. [Fre]
• ***Summary:*** Innoval presently has a soymilk capacity of 2,000 liters/hour and a piece of [ultrafiltration] equipment that can produce 500 kg/hour of liquid soy concentrate. The total represents an investment of 20 million French francs. Expected turnover in 1990 is 25 million francs. "Our objectives are to capture 25-30% of the French market, and to gain a significant part of the European market," explains Jean-Marie Gorce, president of the cooperative and general counsel for Innoval.

Innoval now has a line consisting of four products: Innofun soy beverages (vanilla, strawberry, or chocolate); Royales (a type of tofu quenelles); Creamy Concentrate, and Soymilk (*jus de soja;* natural, non-sweetened). And, Innoval has announced that it will introduce sorbets, sauces, desserts, and a pâté à tartiner.

9252. Rogers, Wally. 1989. The Continuous Cooking System sold by Bean Machines, Inc. (Interview). *SoyaScan Notes.* Dec. 11. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Larry Needleman began to develop this cooker in about 1983. It is a continuous, pressurized system. The first one was purchased by Silver Sprout in San Francisco in 1984 for about $17,000. They were never able to make it work, and eventually they junked it. On 1 Aug. 1984 Wally Rogers moved to California and soon he and Steve Fiering bought Bean Machines from Larry Needleman. Wally and Tim Huang did a lot of work on the cooker at the University of California at Davis. The second one was ordered by Tomsun Foods, but they never installed or paid for it. That one is now used by China Rose (formerly Rosewood Foods and The Soy Plant) in Ann Arbor, Michigan. Purchased by them in Dec. 1988, it has a capacity of 300 gallons/hour. Two other systems have been sold: One in Sept. 1989 to Unisoya in Montreal, Canada (600 gallons/hour), and one in Nov. 1989 to Soyfoods of America (800 gallons/hour; Tim Huang now works there). Mr. Eng Lim of Mandarin Enterprises in Richmond (near Vancouver), BC, Canada, is also thinking of buying one. The current price of a 300 gallon/hour system with a cooking time of 2 minutes is $28,500 FOB Hayward, California. The corresponding price of a 600 gallons/hour system is $34,500. The system's modular design allows for simple and inexpensive expansion. The system meets all dairy standards, operates at 230ºF and is CIP.

Note: After the interview, Rogers sent two product description sheets and a color photo of the system.

Update: Talk with Wally Rogers. 1991. Nov. 4. Wally has now installed 6 continuous cookers. The latest showcase system, installed at cost, is at Wildwood Natural Foods in Santa Cruz. It reduced the number of workers by two and saved 2 cents/pound on the cost of making tofu. Wally sold a system to a dairy in Peru. They plant to blend soymilk with cow's milk to reduce the cost; the soymilk will cost 18 cents/liter. They will also sell soymilk in plastic bags. Wally now offers a soymilk system that can produce soymilk whose flavor is as good as that from an Alfa-Laval or an APV/DTD system but whose equipment cost is only 10-15% as much–with a continuous cooker. Tim Huang has left Soyfoods of America for a new career in medicine in Chicago, Illinois. Wally likes the Nichii Microsoy flakes.

Update: Talk with Wally Rogers. 1994. Aug. 22. Other companies that have purchased his Continuous Cooking System are: Wildwood Natural Foods (California; 300 gallons/hour capacity), Les Aliments Alfa (Bolivia, South America; 600 gallons/hour), Northern Soy (Rochester, New York; 500 gallons/hour), Mandarin Enterprises (Vancouver, BC, Canada; 300 gallons/hour). White Wave (Boulder, Colorado).

He now also sells a centrifuge for soymilk extraction, priced at $19,500 FOB San Francisco. It is made in China and has no expensive screens to replace. The capacity is approximately 150 to 200 kg of dry soybeans per hour, with a 3 horsepower motor.

Talk with an owner of a Bean Machines cooker. 1998. Aug. 25. The slurry is cooked in a long tube, under pressure, at various temperatures starting at 212ºF, reaching a peak of 230ºF, and falling to 200ºF at the exit end. Address: President, Bean Machines Inc., 390 Liberty St. #2, San Francisco, California 94114. Phone: 415-285-9411.

9253. Bodis, Laszlo. 1989. Re: Developments with tofu in Hungary. Letter to William Shurtleff at Soyfoods Center, Dec. 13. 2 p. Typed, with signature on letterhead. [Eng]
• ***Summary:*** This is a short account of the company's endeavors to produce and commercialize tofu in Hungary. At the beginning of 1989 tofu first appeared in the type of shops in Hungary (called "reform bolt") that largely correspond to the health shops in Western Europe. There are not many of these shops and the normal grocery stores are not yet willing to take the risk of pioneering tofu. The price of tofu is Ft. 130/kg, not much below pork at Ft. 170. The company has recently issued a booklet on soy-based foods which includes some tofu recipes. They hope the time will come when a booklet on tofu-based food will be justified. They are now translating *The Book of Tofu* into Hungarian, and eventually hope to find a publisher. Address: Director,

9264. *Ag Biotechnology News.* 1989. Better soybean planned at new tofu center. Dec.
• ***Summary:*** "Scientists at a new research center at Purdue University are trying to breed a better quality and better tasting soybean in making tofu for the Orient and to make no-cholesterol tofu more palatable for U.S. consumers.

"Researchers will work directly with the Japanese sponsor of the center, Mitsubishi International Corp. Geneticist Niels Nielsen said removal of the beany taste may promote better acceptance of tofu in the U.S. and of U.S. soybeans in the Orient.

"The Purdue Research Foundation holds a patent on a less-beany tasting experimental variety developed by Nielsen. About 5,000 acres of the new bean are being grown this year by Indiana growers under contract with Central Soya Inc." Address: Cedar Falls, Iowa.

9265. Brown, Peter J. 1989. Keeping tofu cooler becomes hotter issue. *Soya Newsletter* (*Bar Harbor, Maine*). Sept/Dec. p. 1, 14-16, 18-19. [2 ref]
• ***Summary:*** Discusses the FDA position that tofu is a "potentially hazardous food" and must therefore be refrigerated at food temperatures of 45ºF or less. Address: Contributing editor.

9266. **Product Name:** Really... it's not Cream Cheese. NuTofu (With Casein) [Plain, or Garlic 'n Herbs].
Manufacturer's Name: Cemac Foods Corp.
Manufacturer's Address: Philadelphia, PA 19124. Phone: 215-288-7440.
Date of Introduction: 1989. December.
Ingredients: Plain: Organic tofu, calcium caseinate ([milk] protein), canola oil, natural flavors, sea salt, citric acid, vegetable gum, lecithin.
Wt/Vol., Packaging, Price: 9 oz (225 gm) rectangular plastic tub. Retails for $2.55 (3/90).
How Stored: Refrigerated.
Nutrition: Per 1 oz.: Calories 50, protein 4 gm, carbohydrate 1 gm, fat 4 gm, calcium 65 mg, sodium 45 mg, cholesterol 0 mg, lactose 0 mg.
New Product–Documentation: Ad in Natural Foods Merchandiser. 1990. Jan. p. 58. "NuTofu: The product you use like cheese. New soft spreads. Made with organic tofu and canola oil. Really... its not cream cheese! It's the cream cheese alternative. Low in saturated fat. Cholesterol free. Low in sodium. Lactose free. Low calorie. 100% natural."

Product with Label purchased 1989. March. Lid label. 4 by 2.5 inches. A color photo shows alpine snow-capped mountains. "It's the cream cheese alternative." Side sleeve. Has the same photo. "Cholesterol free. 100% natural. Lactose free. Low sodium. Low in saturated fat. Low calorie. Made with organic tofu and canola oil. Bottom: Medical authorities now recommend reducing cholesterol levels and limiting saturated fat to lower the risk of heart disease. NuTofu is free of cholesterol, free of lactose, low in sodium, and low in saturated fat because we use pure, premium Canola oil." UPC indicia.

A product packaged in almost the same way bears the product name "NuTofu Really... it's not cheddar cheese!" And the text reads, "It's the cheddar alternative."

Soyfoods Center product evaluations. 1990. March 8. (1) Pretty good. It is considerably firmer than dairy cream cheese and a little less white (more beige) in color. The lower fat content makes it taste less rich and creamy. The description of calcium caseinate as "protein" rather than "milk protein" in the ingredient listing seems misleading or deceptive. (2) Claire Wickens: "Standing alone it is disappointing. On or with things (especially salty crackers, but not celery) I think it is a great alternative."

9267. **Product Name:** Really... it's not Cheddar Cheese. NuTofu: Its the Cheddar Alternative (With Casein).

9268. **Product Name:** [Tofu with Herbs].
Foreign Name: Tofu Kräuter.
Manufacturer's Name: Christian Nagel Tofumanufaktur.
Manufacturer's Address: Osdorfer Landstrasse 4, D-2000 Hamburg 52, West Germany. Phone: 040/89 49 37.
Date of Introduction: 1989. December.
Ingredients: Tofu aus kontr. biolg. Anbau, Meersalz, Buchenrauch [beech smoke].
Wt/Vol., Packaging, Price: 250 gm.
How Stored: Refrigerated.
Nutrition: Per 100 gm: Calories 72, protein 8.5 gm, fat 4.5 gm, carbohydrate 1.5 gm.
New Product–Documentation: Label sent by Anthony Marrese after visit to Christian Nagel in Hamburg. 1989. Dec. Named *Tofu–Geräuchert.* Nicely printed self-adhesive label. 7 x 8.5 cm. Black, blue, green and beige on white. 250 gm.

9269. **Product Name:** Soy Supreme Tofu Bits.
Manufacturer's Name: Davisco International, Inc.
Manufacturer's Address: 119 W. Broadway, St. Peter, MN 56082. Phone: 507-931-3160.
Date of Introduction: 1989. December.
Wt/Vol., Packaging, Price: 50 lb bags.
New Product–Documentation: Soya Newsletter. 1989. Sept/Dec. p. 11. This product is formed from spray-dried tofu and flavored to impart a nutty flavor. These nuggets can be used as an ingredient for dessert toppings, confectionery, baked goods, cereals, etc. Contact Michael Morrison.

9270. Friedrich, Corrine. 1989. Cacoja recentre son activité: Filière soja [Cacoja refocuses its activity]. *Process* (*France*) No. 1046. p. 26-29. [Fre]
• ***Summary:*** "In the heart of Alsace, the soy adventure continues. At Issenheim, 20 km from Colmar, Cacoja, an affiliate of the CAC (Coopérative Agricole de Colmar), has worked for several years to master the transformation of soybeans into human foods, using its automated plant. The company's dynamism allowed it to obtain at the last SIAL the prize for development by an affiliate for its entire line of products. Today Cacoja is refocusing its activities on the production of products, both basic/unrefined, and semi-processed (soy milk and soy concentrate, tofu, powder, flour), leaving to industrial food processors the cares of producing finished products."

Recall that in 1985 CAC began to reflect on the possibilities of diversification. They asked: "What will be the foods of the year 2000?" The response from M. Rochet (present director of Cacoja) was that healthfulness would be the key concept. In 1986 they did a market study, then built a factory (investing 16 million French francs and buying a completely automated Alfa-Laval soymilk system), which began operation at the end of 1986.

The semi-continental climate of Haut-Rhin is favorable to the culture of soybeans; 3,500 ha are now grown on the plains of Colmar and Mulhouse. Studies are now underway to reach a compromise between high yield and high protein content. The latter can vary from 32 to 44%. In this region, soybeans are gradually taking the place of cereal grains. 15% of the harvest is processed by Cacoja. A third of the soybeans bear the valued CINAB organic mark.

M. Rochet estimates that the soyfoods market is growing at 40% a year. In 1985 it was the equivalent of 1-2 million liters of soymilk; in 1989 it was 5-7 million liters. Each year Cacoja produces several million liters (figures are confidential) giving it a turnover of 18 million French francs for 1988-89 (July to July). So far, the products have been sold to specialty stores. Since Jan. 1989 Cacoja has exported to Germany, Italy, and the Netherlands the equivalent of 15% of its annual sales. The company plans to increase exports and double production. Cacoja is at the head of the French market and second in Europe.

Since 1987 Cacoja has sold basic materials to food processors under the Formoja brand, but this has led to Cacoja competing with itself. Starting in Jan. 1990 will begin to phase out its finished products and focus on making products for its industrial clients, and supporting these with R&D. A sidebar discusses the Cacoja/Alfa-Laval soymilk and tofu processes. Ultrafiltration is used, and Cacoja also makes powdered tofu and soy flour.

In the journal IESIEL, Mr. Rochet recently emphasized the complementarity between vegetable and animal proteins; they should not be seen as competitors. He predicted that mixed products (soy-dairy, or soy-flesh blends) would soon become popular. The finished products will be commercialized by the affiliate Bio-Soja, which started last July.

There are regulations for all food products, but nothing specifically concerning soy. Thus, in Oct. 1989 AFISA (l'Association française des industriels du soja alimentaire), the French Soyfoods Manufacturer's Association, was created. There are 7 member companies. It goals: To establish product standards with respect to regulation and fraud. To better study the soybean as a new food (nutritional and organoleptic) and technology. To propose studies on this subject. To promote soyfoods. To help interest the public in soyfoods by means of the press.

9271. Golbitz, Peter. 1989. Soyfoods under attack: Editorial. *Soya Newsletter* (*Bar Harbor, Maine*). Sept/Dec. p. 2.

• ***Summary:*** The FDA has written "'regulatory' letters to a number of tofu companies asking them to change their labels, and call tofu 'soybean curd.' It is their opinion that American consumers aren't familiar with the word 'tofu,' but are with the term 'soybean curd.'" They are also asking retail stores to refrigerate their tofu at 45ºF or below. Address: Soyatech, Bar Harbor, Maine.

9272. Kuntjoro, Sri Utami; Kusnadi, N.; Sayogyo, -. 1989. Demand for corn, cassava and soybean in human consumption: A case study in Java, Indonesia. *CGPRT Working Paper* No. 2. xvii + 116 p. Dec. 25 cm. [19 ref]
• ***Summary:*** Contains much original, detailed information and statistics on consumption, demand, and demand elasticity for secondary food crops (*palawija*) in Indonesia. The main secondary food crops are soybeans (including the soybean products *tahu* {tofu}, *tempe* {tempeh}, *kecap* {soysauce}, and *tauco* {Indonesian-style miso}), corn, cassava, and peanuts. "Pulses, soybean in particular, represent (after cereals) the most important source of vegetable protein for the people of Indonesia. On the whole, soybeans are consumed in the form of tahu (bean curd), tempe (fermented soybean) and kecap (soysauce). Among low-income households, tahu and tempe, which are relatively cheap in price, are (after cereals) a major source of vegetable protein. According to Sayogyo (1985), tempe is also popular among people in the high income groups.

The National Socio-Economic Survey (Susenas), conducted by the Central Bureau of Statistics, collects socio-economic data from a large number of households throughout Indonesia. The use of chemical fertilizer on soybeans has increased from 5.19 kg/ha in 1973 to 80.39 kg/ha in 1982. Per capita consumption of soybeans has risen from 3.28 kg/year in 1968 to 4.45 kg/year in 1983. In the peak year, 1979, it was 5.33 kg/year.

Table 4.2 shows protein consumption from secondary food crops in 5 Javanese provinces in 1981. The amount of protein contributed daily per capita to the Indonesian diet by soyfoods (in the forms of tempeh, tofu, soybeans, soy sauce [kecap], and miso [tauco]) is greatest in Yogyakarta (22.57 gm; 61.1% of total protein consumption), followed by Central Java (14.57 gm; 37.4% of total), Greater Jakarta (13.78 gm; 33.3% of total), East Java (12.96 gm; 32.8% of total), and West Java (6.44 gm; 14.9% of total). As people's income rises, they tend to consume more soyfoods. Soyfoods provide Tempeh makes the greatest contribution to protein intake in every province, followed by tofu, soybeans, soy sauce (kecap), and tauco (Indonesian miso). Tempeh makes the greatest contribution in Yogyakarta, where it provides 17.86 gm/capita/day of protein, or 60% of the protein supplied by secondary crops, and more than any other single source. The amount of daily protein per capita contributed by tempeh is next most important in Central Java (11.48 gm/day), followed by East Java (9.28), Greater Jakarta (8.98), and West Java (4.16). Tofu makes its greatest protein contribution in Greater Jakarta (4.54 gm/day), followed by Yogyakarta (3.57), East Java (3.49), Central Java (2.80), and West Java (1.99). Address: Agricultural economists, Bogor Univ. of Agriculture.

9273. **Product Name:** [Soy and Vegetable Burgers, Tofu and Millet Burgers].
Manufacturer's Name: La Sojeria, S.C.
Manufacturer's Address: Carretera de Vic Km. 30, 08180 Moia (near Barcelona), Spain. Phone: (93) 830 1123.
Date of Introduction: 1989. December.
Wt/Vol., Packaging, Price: Vacuum packed in plastic bags.
New Product–Documentation: Letter from Javier Arocena of Zuaitzo, Spain. 1992. Dec. 14. He knows of three other soyfoods manufacturers in Spain: Natur-Soy, Vegetalia, and La Sojeria, all near Barcelona.

Form filled out by Laura Cami and Mario Rimoldi of La Sojeria. 1993. Feb. 13. Their company introduced these products in Dec. 1989. The burgers are sold in vacuum-packed plastic bags.

9274. Marrese, Anthony. 1989. Re: Visit to Tofu Manufaktur Christian Nagel GmbH in Hamburg, Germany. Letter to William Shurtleff at Soyfoods Center, Dec. 2 p. plus many attachments. Handwritten. [Eng]
• ***Summary:*** Company name and address: Tofu Manufaktur Christian Nagel GmbH, Osdorfer Landstrasse 4, 2000 Hamburg 52, Germany. Phone: (040) 89 49 37.

"Founder and owner: Christian Nagel.

"History: Christian started making tofu in a small garden in a community kitchen in Holland about 7 years ago. When he needed money to support his family, the decision was made to move to Hamburg & he had a strong 'impression' he must make tofu. He contacted a man who was listed as a tofu maker, in order to work for him. The man had purchased all the equipment but never started. So Christian bought the equipment from the man and started making tofu 5½ years ago. The company grew slowly for a couple of year and then began to expand. Christian attributed this expansion to the Chernobyl nuclear disaster in the Ukraine (26 April 1986). And the people's desire for safe food. Christian is again searching for more space in which to make tofu. He has 7 full-time and 4 part-time employees. The people are macrobiotic and have long associations–about 10 years.

Products not purchased (a label for each is enclosed): 1. Tofu-Brotaufstrich (Spread for bread, in a jar; 180 gm; in 3 flavors: Paprika, Räucher [Smoked], Kräuter [Herbs]). 2. Tofu: Plain, with Herbs, Smoked. 3. Burgers, rolls. 4. Tempeh. 5. Seitan.

Marrese encloses a progression of four tofu labels, over 5½ years; the oldest on the top left and the current one on the lower right.

Products purchased (#59) Tofu-Alge. Very good; the

© Copyright Soyinfo Center 2013

way I like it.

Product literature: 1. *Tofu Werkstatt* (leaflet, black ink on yellow, 2 panels each side, mentions *The Book of Tofu*). 2. Tofu Nagel (leaflet, black ink on gray, 2 panels each side). 3. Tofu postcard, 10.5 x 15 cm, single sided.

Notes: (1) The Soja plant symbol used on the above literature is the basic symbol on their product labels. (2) Similar company to Taifun (No. 31). (3) Christian sent information to the Soyfoods Center about 1-2 years ago but I have some of the new "stuff." (4) Christian is quite active in the ten or so member "Tofu Section" of the *Naturkost* ("Natural Food") committees and professional work.

Products and production: Tofu (Plain, Smoked, Herbs, with Seaweed), 5½ years. Total production: 1,500 to 2,000 kg per week.

Burgers (*Happen*), 5½ years. Tofu, Grünkern-Tofu Total production: about 3,000 per week.

Kroketten (Croquettes), 2 years. Production small: 100s per week.

Spring Rolls, production small.

Tempeh 5½ years. Production small, 50 kg per week.

Spread for Bread (*Tofu-Brotaufstrich*). Purchased from Tofurei Albert Hess and their label is applied. This is in order to have the product available because of competition and the friendly relationship between Christian and Albert. New product.

Equipment notes: Meat grinder for grinding soaked soybeans. Converted butter churn to separate milk and okara. Milk pasteurizer to cook milk (At present after milk and okara separation) which is causing relatively low yields of 1.7 kg tofu per kg of soybeans. 70 kg tofu tubs which are divided into five x 12 kg pressed slabs. Automatic press for burgers (capacity up to 3,000 per day). Smoke oven.

Okara: Is given away to farmers.

Whey: Is used to warm the water to grind the soybeans. Other products: Seitan. Address: Germany.

9275. Morinaga Nutritional Foods. 1989. Yasuo Kumoda, vice president, general manager (News release). 5800 South Eastern Ave., Suite 270, Los Angeles, CA 90040. 1 p. Undated.

• ***Summary:*** "Kumoda supervised the opening Morinaga Nutritional Foods Inc. in Los Angeles in October, 1985, for the marketing and distribution of Mori-Nu Tofu. Prior to 1985, Mori-Nu Tofu was distributed by Mutual Trading Co. of Los Angeles with sales targeted to the Asian market. After the opening of Morinaga Nutritional Foods, sales of Mori-Nu Tofu increased from 60,000 to 400,000 cases in less than four years...

"Kumoda has been instrumental in the implementation of Mori-Nu's 10,000 member Health For Life Club as well as Mori-Nu's 'Healthy Life' newsletter."

Note: Talk with Art Mio. 1990. Feb. 6. It now looks like sales of Mori-Nu Tofu for fiscal year 1989-90, which ends in March 1990, will be about 375,000 cases. Each case contains 25 x 10.5 ounce packs of tofu. This represents 5,906,250 lb/year of tofu, or 113,582 lb/week of tofu. This makes Morinaga one of the top four tofu sellers in the USA, along with House Foods and Yamauchi, Azumaya, and Nasoya Foods. Address: Los Angeles, California. Phone: 213-728-4325.

9276. **Product Name:** Organic Tofu.
Manufacturer's Name: Nutrisoy Pty. Ltd.
Manufacturer's Address: 255 Forest Road, Arncliffe 2205, NSW, Australia.
Date of Introduction: 1989. December.
Ingredients: Certified organic soybean (non genetically modified), filtered water, natural nigari (magnesium chloride).
Wt/Vol., Packaging, Price: 350 gm and 750 gm.
How Stored: Refrigerated.
New Product–Documentation: Labels with dates sent by Tony Wondal of Nutrisoy. 2005. April 26. He started making and selling these products in Dec. 1989. Orange, white, black and green on red.

9277. **Product Name:** Tofu (Fresh).
Manufacturer's Name: Nutrisoy Pty. Ltd.
Manufacturer's Address: 255 Forest Road, Arncliffe 2205, NSW, Australia.
Date of Introduction: 1989. December.
Ingredients: Soybeans, natural nigari (magnesium chloride).
Wt/Vol., Packaging, Price: 500 gm.
How Stored: Refrigerated.
New Product–Documentation: Label with date sent by Tony Wondal of Nutrisoy. 2005. April 26. He started making and selling this product in Dec. 1989. Red, blue, green, yellow and light blue on white. This product is targeted to the Chinese market. On the front panel in large white letters on a red background is written Doufu-gan. Fresh.

9278. Sakai, Miyoko; Abe, Motoko. 1989. Quick & easy Japanese cooking for everyone. Tokyo: The Japan Times. xvii + 128 p. Illust. (line drawings, photos). No index. 18 cm.

• ***Summary:*** "The purpose of this book is to introduce foreign residents in Japan to the pleasures of Japanese home cooking." Contains 77 typical Japanese recipes, with an English translation of the recipe name plus the Romanized Japanese name and that same name written in Japanese characters.

One chapter (p. 65-77) is titled "Egg and tofu." Soy related recipes include: Miso soup (p. 6). Pork miso soup (*Ton-jiru*, p. 7). Vinegared rice wrapped in thin fried tofu (*Inari-zushi*, p. 11).

Note: This is the earliest English-language document seen (April 2013) that contains the term "thin fried tofu." It

© Copyright Soyinfo Center 2013

refers to deep-fried tofu pouches.

Broiled pork with miso (p. 43). Fresh tofu (Hiya-yakko, p. 72). Tofu salad (p. 73). Tofu with vegetables (p. 74). Tofu steak (p. 76). Fried tofu (Agedashi-dofu, p. 77).

Other soy related recipes: Eggplant with miso (*Nasu no dengaku miso ae*, p. 88). Eggplant and green pepper with miso (*Nasu to piiman no miso itame*, p. 89). Soybeans with vegetables (*Gomoku mame*, p. 92-93). Sukiyaki (with "1 block broiled tofu {*yakidofu*}," p. 96). Address: 1. Teaches Japanese cuisines for foreigners and That dishes for Japanese in Tokyo, Japan.

9279. *Soya Newsletter* (*Bar Harbor, Maine*). 1989. Soy powder plant to be built in Minnesota. Sept/Dec. p. 8.
• ***Summary:*** "The Upper Minnesota Valley Regional Development Commission (UMVRDC) along with PdT, a Minnesota-based specialty soybean supplier, has announced that they will soon be signing an agreement that will result in the building of a soy powder plant sometime in the Spring of 1990. The plant, being built in conjunction with Showa Boeki of Osaka, Japan, will produce Neo Soya Powder (NSP), made through a proprietary dry process. The Minnesota group plans to buy, dismantle and install Showa Boeki's soy powder system in Madison, Minnesota. Showa Boeki will have a five year agreement with the group to buy their NSP. The powder will be shipped to Japan and used in producing tofu and other products."

9280. *SoyaScan Notes.* 1989. Major soy-related company acquisitions and mergers worldwide 1970-1989 (Overview). Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** 1970 March–Miles Laboratories of Elkhart, Indiana (most famous as the maker of Alka-Seltzer) acquires Worthington Foods of Worthington, Ohio (most famous for its Morningstar Farms line of meat alternatives), making it a wholly owned subsidiary.

1973 Jan. 15–ADM acquires 50% of British Arkady Holdings Ltd. and its subsidiary British Arkady Co. Ltd. of Old Trafford, Manchester, England.

1977 (late)–Bayer A.G. of Germany (makers of Aspirin) acquires Miles Laboratories of Elkhart, Indiana; as part of the deal they Worthington Foods, a subsidiary of Miles.

1979–Bunge Corp. acquires Lauhoff Grain Co. of Danville, Illinois.

1982 Oct. 15–Worthington Foods is repurchased from Miles Laboratories by a group of three Seventh-day Adventist investors in a leveraged buyout. During the 12 years under Miles, sales increased five-fold. Sales volume in 1983 was an all-time high. The company employed 250 people.

1983 April 21–Hybritech Seed International, Inc., a wholly-owned subsidiary of Monsanto Company, purchases the Jacob Hartz Seed Co. of Stuttgart, Arkansas.

1983–House Food Industrial Co., Ltd. of Japan purchases 50% ownership in Yamauchi Enterprises (formerly Hinode Tofu Co., owned by Mr. Shoan Yamauchi) in Los Angeles. The company is renamed House Foods & Yamauchi, Inc.

1985 May 31–Barricini Foods Inc. acquires Farm Foods (makers of Ice Bean soy ice cream) of Summertown, Tennessee.

1985 March–British Arkady acquires Direct Foods Ltd.

1986 Feb.–British Arkady acquires Vegetarian Feasts Ltd.

1986 Dec. 1–White Wave acquires Soyfoods Unlimited, Inc. of San Leandro, California. It is White Wave's first acquisition.

1987 Aug.–British Arkady acquires Haldane Foods Ltd. and Regular Tofu Co. Ltd. It also acquires Vegetarian Cuisine Ltd. in 1987.

1987 Oct.–The Ferruzzi Group in Ravenna, Italy, acquires Central Soya Co. in Ft. Wayne, Indiana.

1987 Dec. 31–ADM acquires the rest of British Arkady Holdings Ltd. so that it now owned 100%.

1988 Jan.–The British Arkady Group acquires Haldane Foods.

1988 Feb.–Westbrae Natural Foods (of Berkeley, California, maker of soymilk) is merged with and becomes a wholly-owned subsidiary of Vestro Foods, a publicly traded company in City of Commerce, Southern California. Most of Westbrae's top management decides not to stay with the company.

1988 Sept.–Haldane Foods Group acquires Realeat Foods Ltd.

1989 Feb.–Haldane Foods Group acquires Saucemasters Ltd. It also acquires Genice Foods Ltd. in March 1989.

1989 Feb. 16–Edward Lowe of Michigan, the inventor of Kitty Litter, purchases the majority of shares in INARI Ltd. from Len and Irene Stuttman; but they. kept a minority ownership in the company.

1989 April–Huegli Naehrmittel A.G. acquires Yamato Tofuhaus Sojaprodukte of Tuebingen, Hirschau, West Germany. Note: This is the earliest record seen (Feb. 2013) that mentions Huegli in connection with soy.

1989 April 22–Lima Foods of Belgium acquires Jonathan P.V.B.A. of Belgium.

1989 Sept.–Lima Foods of Belgium is purchased from Vibec by Euronature (pronounced as in French, YU-ro na-TYUR), a large international food company headquartered in Paris, France.

9281. Tofu-Manufaktur Christian Nagel GmbH. 1989. Nagel's Tofu [Nagel's Tofu (Leaflet)]. Hamburg, Germany. 2 panels each side. Each panel: 21 x 14.8 cm. Undated. [Ger]
• ***Summary:*** Printed black on bluish-gray paper. At top of front panel, back soybean plant and "Nagel's Tofu." Plus the company address and phone number.

Contents: Introduction. The many benefits of

tofu: Rich in high-quality protein, excellent for protein complementarity, low in calories, free of cholesterol, rich in vitamins and minerals, easily digestible, extremely versatile in the kitchen.

A table shows the nutritional composition of tofu, soymilk, fried tofu, grilled tofu, okara, and vegetable tofu (*ganmodoki*). Ideas for cooking with tofu (recipe ideas). Use of tofu as a medicine (tofu plaster). Tofu as a possible solution to the world food problem; the protein yield of different foods and animals from 1 hectare of land. Soybeans are #1 and meat gives the lowest yield. References (2).

Note: An earlier edition of this leaflet was printed (black on yellow) in about 1984 or 1985. Address: Osdorfer Landstrasse 4, 2000 Hamburg 52, Germany. Phone: 89 49 37.

9282. **Product Name:** [Tofu Spread for Bread (Paprika, Smoked, or with Herbs)].
Foreign Name: Tofu-Brotaufstrich (Paprika, Räucher, Kräuter).
Manufacturer's Name: Tofu-Manufaktur Christian Nagel
Manufacturer's Address: Osdorfer Landstrasse 4, D-2000 Hamburg 52, West Germany. Phone: 040/89 49 37.
Date of Introduction: 1989. December.
Ingredients: Tofu*, brown rice*, safflower oil*, paprika, tomato pulp*, vegetable broth / stock (*Gemüsebrühe*), Sea salt (*Meersalz*), herbs. * = Aus kontrolliert biolgischem Anbau.
Wt/Vol., Packaging, Price: 180 gm.
How Stored: Refrigerated.
Nutrition: Per 100 gm: Calories 158, protein 8.9 gm, fat 11.3 gm, carbohydrate 5.2 gm.
New Product–Documentation: Label sent by Anthony Marrese after visit to Christian Nagel in Hamburg. 1989. Dec. Name: *Tofu–Brotaufstrich* Nicely printed on self-adhesive label. 13 x 4 cm. Black, blue, red and green on white. 180 gm.

9283. **Product Name:** Meatless Healthy Links (Tofu Breakfast Sausages).
Manufacturer's Name: White Wave, Inc.
Manufacturer's Address: 1990 North 57th Court, Boulder, CO 80301.
Date of Introduction: 1989. December.
New Product–Documentation: Talk with Steve Demos. 1989. May 13. This product will be officially launched in Sept. Talk with Steve Demos. 1989. Nov. 1. The term Links need not be approved by the FDA. Anyone can use the term. The product is not yet out, nor has it been in any interstate sales yet. It is made in Denver. It should be out soon, probably by mid-December.

9284. Altemeier, Klaus; Bottema, J.W.T.; Adinugroho, B.; Daris, N. 1989. Quality and price determinants of secondary crops in Indonesia. *CGPRT Working Paper* No. 1. 57 p. * • ***Summary:*** This paper reports on extensive research conducted in East and West Java covering grain quality and implicit prices of maize, soybean and groundnut. Government quality standards are compared to traders practices and the quality checks run by animal feed and Tahu and Tempe industries. It is concluded that domestic quality of maize, soybean and groundnut falls below quality of imported grains. Floor prices are indicated to be of theoretical value only, because domestic prices never move below floor prices. It is suggested a policy on nutritional standards be considered, which could have a beneficial effect for all participants in the market system.

9285. **Product Name:** [Tofu, Smoked Tofu, Grilled Tofu, Deep-Fried Tofu, and Tofu Spread, Seitan].
Foreign Name: Tofu, Diljeni tofu, Grill tofu, Tofu przen u dubokom ulju, Tofu namaz, Seitan.
Manufacturer's Name: Anyo.
Manufacturer's Address: Akolska Ulica 43A, 51215 Kastav (near Rijeka), Croatia, Yugoslavia.
Date of Introduction: 1989.
New Product–Documentation: Talk with Bill Spear. 1991. Sept. 7. There are two commercial soyfoods manufacturers in former Yugoslavia. The best contact is Ivan Jugovac (about 40 years old), owner of Anyo located at Skolska Ulica 43A, 51215 Kastav (near Rijeka), Croatia, Yugoslavia. Anyo, which started about 2-3 years ago, makes 250-300 kg/week of tofu (100 kg/day in 4 or 5 batches) and 150-200 kg/week of seitan. From the tofu they also make smoked tofu, grilled tofu, deep-fried tofu, and tofu spread (with okara). The tofu is made in a 100-liter steam jacketed kettle and the nigari is imported from Japan. Their soybeans (which are not organically grown) come from Becej (pronounced BECH-ay) in Serbia, Yugoslavia. The business is doing well.

Letter from Anka Bagic Sayre and Paul Sayre. 1996. June 13. They have just returned from a year in Croatia, and now live in San Francisco, California. They met Ivan Jugovac and sold him one copy each of *The Book of Tempeh* and *Tofu & Soymilk Production.*

Talk with Zlatko Pejic of BioVega in Zagreb, Croatia. 1998. March 17. In 1987 Ivan attended courses in macrobiotics and small-scale production of soyfoods and seitan, over a period of several years, at the Society for the Improvement of Quality of Life (MacroNova Center) in Zagreb. He also experimented at home; he is a mechanical engineer, so he invented a lot of machinery and adopted other food processing equipment to tofu production. He started Anyo in 1989, and named the company after his sweetheart.

Note: This is the earliest known commercial soy product made in Croatia. It is also the earliest known commercial tofu made in Croatia.

9287. **Product Name:** [Formoja Tofu Lasagna].
Foreign Name: Formoja Lasagne au tofu.
Manufacturer's Name: Cacoja. Affiliate of Coopérative Agricole de Colmar (CAC) (Marketer).
Manufacturer's Address: 8 rue Merxheim, 68500 Issenheim, France.
Date of Introduction: 1989.
Wt/Vol., Packaging, Price: 300 gm tins (cans).
How Stored: Shelf stable; refrigerate after opening.
Nutrition: Per 100 gm.: Calories 97.5, protein 5 gm, fat 1.5 gm, carbohydrate 16 gm.
New Product–Documentation: Paul Tjomb. 1990. RIA (Revue des Industries Agro-Alimentaires) No. 443. 14 May to 5 June. "Le pâté nouveau est arrivé: Ingredients, soja." A large part of its activity is devoted to developing convenience prepared foods (plats cuisinés) which contain an average of 20% soya. The company also offers quenelles (like sausages), ravioli, and lasagne which are distributed fresh with a shelf life of 3 weeks.

Letter and Label sent by Sylvain Stievenard of Sojinal (named Cacoja prior to Aug. 1990). 1990. Sept. 24. This product was introduced in 1989.

9288. **Product Name:** Crispy Tofu Grills (Farmhouse Style, Italian Style, or Tandoori Style).
Manufacturer's Name: Cauldron Foods Ltd.
Manufacturer's Address: 149 South Liberty Lane, Ashton Vale Trading Estate, Bedminster, Bristol, Avon, BS3 2TL, England. Phone: (0272) 632835.
Date of Introduction: 1989.
Ingredients: Farmhouse Style: Original and smoked tofu (water, soya beans, calcium sulphate), brown rice, textured soya flour, cabbage, onion, potato, tomato, mushrooms, peas, potato powder, pea fibre, apple juice, lemon juice, herbs & spices, vegetable oil, vegetable stock.
Wt/Vol., Packaging, Price: 150 gm paperboard box.
How Stored: Refrigerated.
Nutrition: Per 100 gm.: calories 185, protein 10.7 gm, fat 9.5 gm, carbohydrate 14.9 gm.
New Product–Documentation: Label. 1989, sent by Philip Marshall. Paperboard box. Brown, green, red and black on white. Color photo of oval burger-like product on front. Hole in back of package allows consumer to see product. "Just heat to eat. Contains no meat, dairy products, or artificial additives." Package bears the green "V" symbol "Suitable for vegetarians."

SoyaFoods (ASA, Europe). 1990. 1(1):3. A photo shows the label.

9289. **Product Name:** Tofuloni (Meatless Sliced Tofu Sausage) [Country, or Spicy].
Manufacturer's Name: Cauldron Foods Ltd.
Manufacturer's Address: 149 South Liberty Lane, Ashton Vale Trading Estate, Bedminster, Bristol, Avon, BS3 2TL, England. Phone: (0272) 632835.
Date of Introduction: 1989.
Wt/Vol., Packaging, Price: 100 gm.
How Stored: Refrigerated.
New Product–Documentation: Label. 1989, sent by Philip Marshall. Green, red and black on white. Color photo of five slices on a plate. "Five slices ready to eat. A unique combination of spiced tofu, mixed grains, sunflower seeds and fine vegetables, cooked and sliced.

"Tofuloni makes a delicious vegetarian starter, or an exciting addition to salads and sandwiches." Package bears the green "V" symbol "Suitable for vegetarians."

SoyaFoods (ASA, Europe). 1990. 1(1):3. A photo shows the label.

Letter (fax) from Philip Marshall. 1990. July 9. This product was introduced in 1989.

9290. **Product Name:** [Tofu with Nori].
Foreign Name: Tofu–Alge.
Manufacturer's Name: Christian Nagel Tofu-Manufaktur.
Manufacturer's Address: Osdorfer Landstrasse 4, D-2000 Hamburg 52, West Germany. Phone: 040/89 49 37.
Date of Introduction: 1989.
Ingredients: Water, soybeans*, nori (algae), spices, magnesium chloride (nigari). * = Organically grown (*aus kontrolliert-biologischem Anbau*).
Wt/Vol., Packaging, Price: 300 gm poly bag. Retails for DM 1.90.
How Stored: Refrigerated.
New Product–Documentation: Label sent by Anthony Marrese. 1990. Jan. 2.75 by 3.25 inches. Red and blue on white. A protein preparation from soybeans. Cholesterol free. After opening, store in cool water that is refreshed/changed daily. This package is friendly to the environment (*umweltfreundlich*). It has the approval of the Ministry of Health.

Talk with Christian Nagel. 1990. May 4. This product was introduced in 1989.

9291. Combemale, Isabelle. 1989. Un nouvel outil de production du tofu en continu: Reportage soja [A new tool for the continuous production of tofu: Reporting on soya]. *Technique Laitiere* [*Process, Rennes*] No. 1038. p. 51-54. [Fre]
• ***Summary:*** A description of the installations at the cooperative "The Silos de Valence" used for automated, continuous tofu production. Describes processing conditions

© Copyright Soyinfo Center 2013

and the principal outlets for the products obtained: Miso, soymilk (flavored desserts), and by-products (okara).

Les Silos de Valance, a cooperative that produces soybeans in the south of France, first considered processing soybeans for human consumption while looking for new markets and more profitable high value-added products. In 1988, after market surveys and feasibility studies had confirmed the choice, they established a new company named Innoval. The new production plant in Valence is similar to the one built by Alfa-Laval for Cacoja at Issenheim in 1987. Soymilk base is continually processed up to the point where it is coagulated into tofu.

The new and innovative part of the plant is the concentration of the soymilk base using ultrafiltration (developed by Tech-Sep) [also a DTD patent!] and continuous dosing of the calcium sulfate coagulum, developed and patented by S.E.R.E.A. and equipment built by Steachma.

Simultaneously with coagulation, spices, herbs, vegetables, etc. are added. The total production is sold to the diary industry, which markets and distributes the products.

The article ends by noting that large companies like Alfa-Laval and Nestle are interested in soybean utilization and many soymilk products are currently marketed by Celia, Triballat, and Est Lait dairy groups in France.

Black-and-white photos show: (1-4) Equipment inside the Innoval plant. (5) Several Innoval products, incl. Inno Fun. (6) An exterior view of the Innoval plant, with details about two companies: (1) Innoval–Address: Allée Joule, Les Auréats, 26014 Valence cedex. Director: M. Pastonnier. Asst. Director: Mr. Reynaud. Capital: 4.8 million francs, of which 70% is Silos de Valence and 28% is financial establishments. Personnel: 10. Expected transformation in 1989: 700 tonnes of grains. (2) Les Silos de Valence–Cooperative of cereal grain producers with capital in 1987 of more than 100 million francs. *Remise d'adherents:* 5,300. *Producteurs outils:* 1,130. Personnel: 21. 9296. **Product Name:** [Gerblé Soya-Chocolate Bars].
Foreign Name: Gerblé Barres Soja-Chocolat.
Manufacturer's Name: Gerblé. Div. of Diététique & Santé.
Manufacturer's Address: B.P. 106, 31250, Revel, France.
Date of Introduction: 1989.
Ingredients: Milk chocolate, milk proteins, soybeans (grain de soja; 10%), saccharose, vegetable oil, invert sugar, glucose syrup, wheat germ (3.3%), calcium, sorbitol, natural aroma, apricot, gelatin, soy lecithin.
Wt/Vol., Packaging, Price: 115 gm paperboard box contains 5 bars.
How Stored: Shelf stable.
Nutrition: Per 100 gm.: Calories 472, protein 14.4 gm, carbohydrate 53.0 gm, fat 22.6 gm, calcium 1305 mg.
New Product–Documentation: Form filled out and label sent by Anthony Marrese. 1989. Nov. This product was launched in 1989. The contact person is Mr. Villac in International Marketing. Gerblé, the division that supplies the health food stores, started using soya in 1988. Diététique & Santé has a wider market and at present all soya use is through the Gerblé division. A lot of their market is just opening up and forming. This company's products are very professionally packed and produced. They taste very good. Tofu is added to enhance the nutrition, taste, and texture of the bars. [But note that the ingredients listing does not mention tofu.] Label. 1989. 4.5 by 4.75 by 1.5 inch paperboard box. Orange, dark brown, and gold on white and tan. A photo shows a bar half out of its wrapper, a bar cut crosswise into halves, some soybeans, and an ear of wheat. "Dietetic bars rich in calcium. Rich in minerals." Bars are individually wrapped in 23 gm sizes. A 6-panel; leaflet in the box talks mostly about human calcium needs.

9297. **Product Name:** Tofu.
Manufacturer's Name: Han Yang Oriental Food Manufacturing.
Manufacturer's Address: 3819 94th St., S.W., Tacoma, WA 98499. Phone: 206-588-7303.
Date of Introduction: 1989.
New Product–Documentation: Talk with Ed Elkin. 1991. Feb. 8. About 12-15 months ago Boo Han changed hands; it is now named Hang Yang, owned by Mr. Choy, a Korean-American, who does not speak English–although his brother does. Hang Yang is very aggressive and doing well; he just upgraded to a new tofu system. The company is at the same location it was when he purchased it from Boo Han. He makes tofu, rice cakes, and kimchi. In Feb. 1991, the phone directory has a listing for Han Yang Oriental Food Manufacturing, 3819 94th St. S.W., Tacoma, Washington 98499. Phone: 206-588-7303.

Form filled out and faxed by John Choi, owner. 1998. July. Han Yang Oriental Food Mfg., 3819 94th St. S.W., Tacoma, WA 98499. Phone: 253-588-7303. Company began making and selling tofu on 1 March 1989.

9298. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Kornblumenhof.
Manufacturer's Address: Graz, Austria.
Date of Introduction: 1989.
New Product–Documentation: Talk with Heribert Lecker, who calls from Austria. 1999. Jan. 14. This company began making tofu in 1989–which was before Heribert joined it. They now make 200-400 kg/week, using soybeans grown organically in Austria. He used to grow his own organic soybeans in Austria, but he stopped so he could focus on making foods. The company has two competitors in the tofu market: Sojvita and Sojarei, both located in or near Vienna. They also make a variety of other foods from corn, bread, etc. They have two books by Shurtleff & Aoyagi: *Tofu & Soymilk Production* and *Das Tofu Buch.*

9299. **Product Name:** Barat Tofu Chocolate Rice Round [Unsalted, or Salted].
Manufacturer's Name: Legume, Inc.
Manufacturer's Address: 116 Fairfield Rd., Fairfield, NJ 07006. Phone: 201-263-1013.
Date of Introduction: 1989.
Ingredients: Barat Tofu Chocolate Coating: Organic granulated sugar cane juice (Sucanat), unsweetened chocolate cocoa butter, tofu powder, soya lecithin (a natural emulsifier), pure vanilla. Rice cake: Organically grown brown rice and rice.
Wt/Vol., Packaging, Price: 1-1/3 oz (39 gm).
How Stored: Shelf stable.
Nutrition: Serving size: 1 rice round. Calories 180, protein 3 gm, carbohydrates 25 gm, fat 9 gm, cholesterol 0 mg, sodium 5 mg, potassium 170 mg.
New Product–Documentation: Label. 1989. 6.25 by 4.5 inches. Red and gold on purple. "Non-dairy. No white sugar. No cholesterol. With Lundberg family farms organic rice cake. World class Barat Tofu Chocolate internationally renowned Lundberg Family Farms Rice Cakes are teamed together in a delicious new healthy snack. The deep rich taste of tofu chocolate surrounds the crispy goodness of whole grain rice with all its bran and fiber intact. Barat Tofu Chocolate Rice Rounds–a deliciously satisfying and healthy snack for only 180 calories." Purple photo of Chandri & Gary Barat.

Letter from Chandri Barat. 1989. "This brand new product is doing exceedingly well. It's just right for the new 'Healthy Snack' category. We have just moved our offices from 116 Fairfield Road. Our new address is P.O. Box 426, Schoolhouse Park, 112 Main Road, Montville, New Jersey 07045. Phone: 201-263-1013."

9300. **Product Name:** Tofu, Soy Milk, Tempeh, Soy Ice Cream, Soy Punch.
Manufacturer's Name: Natural Cafe. Expanded to include La Soyarie by June 1994.
Manufacturer's Address: Mailing address: 73 Chaussee Rd., Castries, St. Lucia, West Indies. Plant: Union Hilltop Choc, Castries. Phone: 809-452-6421.
Date of Introduction: 1989.
New Product–Documentation: Plenty International. 1994. Jan. A Guide to Growing and Using Soybeans for Food. p. 30. This company makes fresh soyfoods.

Form filled out by Johnson Clarke, Manager. 1994. May 25. The plant is now located at Union Hilltop Choc, Castries, and the phone number is 809-450-2570. The company was founded in 1989. The founders were Johnson Clarke, Maya Clarke, and Ignatius Longville. The original purpose was to work as a group to produce high-quality foods at an affordable price and to educate the populace about soybeans. There have been no changes in the company address or ownership. Milestones: (1) When Johnson built a proper structure of concrete for processing; and (2) When CIDA (Canadian International Development Agency) gave the group a grant to purchase some equipment in 1991. Reasons for success: "I am the only person on the island that is processing [soybeans] on a commercial scale, and I take pride and joy in what I'm doing." The company makes tofu, soy milk, and tempeh, and it buys and markets Vitasoy soymilk, miso, soy oil, Mori-Nu tofu, and soy powder. They make about 100 lb/week of tofu, and they use about 7 gallons of soy milk to make soy ice cream and soy punch. The company's three best-selling products (in descending order of dollar value) are tofu, soy punch, and soy ice cream. The company now employs 6 people. Their factory is 14 x 30 feet. Offices are in a separate building. Net sales last year were "not much" and the net worth of the business is "not much." "We are a small group of six and just making ends meet. We still have a long way to go in making the population of St. Lucia realize the true potential of soybeans. I don't know if we can continue since were are poorly equipped for processing the beans and packaging the products to sell at supermarkets and shops. We are presently selling only at one small outlet we own. We could sell at hotels, supermarkets, and shops if we had proper packaging equipment such as a vacuum packer." Note: This is the earliest known commercial soy product made in St. Lucia.

9301. **Product Name:** [Nutana Tofu–Oriental-Style].
Foreign Name: Nutana Tofu Oriëntaal.
Manufacturer's Name: Nutana Helsekost.
Manufacturer's Address: Ringstedvej 531, DK-4632 Bjaeverskov, Denmark.
Date of Introduction: 1989.
Wt/Vol., Packaging, Price: Can.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: Black-and-white photo of the can and label sent by Eric Fehlberg. 1990. May 24. A photo on the front panel shows cubes of tofu in a sauce with

© Copyright Soyinfo Center 2013

mushrooms and other vegetables.

9302. **Product Name:** [Tofu].
Foreign Name: Tofu: Kotimanien–Inhemsk Soijavalmiste Sojaprodukt.
Manufacturer's Name: Oy Soya Ab.
Manufacturer's Address: Asgatan 5, 10600 Ekenäs, Finland.
Date of Introduction: 1989.
New Product–Documentation: Letter from Thomas Andersen of Urten's Tofu in Denmark. 1990. June. He has just returned from Finland where he has helped this tofu shop to get started. They are now in business.

Letter from Wataru Takai of Takai Tofu & Soymilk Company of Ishikawa-ken, Japan. 1994. Feb. 2. He sold this company tofu equipment, FM50(S), in Jan. 1990. Address: P.B. 86, SF-10601 Ekenas, Finland.

Letter and Label sent by Stig Westerlund of Oy Soya Ab. 1994. April 22. The company began making tofu (their first soyfood product) in 1989. They are now making about 4,000 lb/month. Their address is now Backagatan 36, SF-10940 Hango, Finland. Label: 5 by 3.5 inches. Black and white on clear plastic. 270 gm.

9303. Poole, C. 1989. A case-control study of diet and colon cancer. Thesis, Harvard School of Public Health, Boston, Massachusetts. *
• ***Summary:*** Consuming soyfoods appeared to reduce the risks of colon cancer by about half. Specifically, the author noted a relative risk of 0.53 (CI = 0.11-2.66) for colon cancer for people eating tofu/soybeans more (vs. less) than once a month–although the number of people with high soy intake was small.

9304. **Product Name:** Soya Nova Marinated Tofu Slices [Spicy, Curry, or Barbecue].
Manufacturer's Name: Soya Nova Tofu Shop.
Manufacturer's Address: R.R. #2 Rourke Road, C-28, Ganges, Saltspring Island, BC, V0S 1E0, Canada. Phone: 604-537-9651.
Date of Introduction: 1989.
Ingredients: Tofu: Organically grown soybeans, nigari, well water. Marinade: Water, tamari soy sauce, unrefined oil (safflower and toasted sesame oil), herbs, spices, fresh onion, garlic.
How Stored: Refrigerated.
New Product–Documentation: Letter from Greg Lundh of Silverking Soya Foods in Nelson, BC, Canada. 1990. Dec. 14. Soya Nova Tofu Shop introduced this product in 1989.

9305. **Product Name:** [Tofu, Tempeh].
Manufacturer's Name: SoyaLab.
Manufacturer's Address: Zagreb, Croatia.
Date of Introduction: 1989.
New Product–Documentation: Talk with Zlatko Pejic of BioVega in Zagreb, Croatia. 1998. March 17. This company, which was started by Nad Miljenko (pronounced Nadj Milyenko), makes tofu and tempeh.

9306. **Product Name:** [Soyana Tofu Hors d'Oeuvres].
Foreign Name: Soyana Tofu Pastete.
Manufacturer's Name: Soyana.
Manufacturer's Address: Friedensgasse 3, Postfach 8039, CH-8002 Zurich, Switzerland. Phone: 01-202-8997.
Date of Introduction: 1989.
New Product–Documentation: Talk with Walter Dänzer of Soyana. 1990. May 30. Tofu pastete were launched in 1989.

9307. **Product Name:** [Soyaquell Tofu Sausage (With Herbs, Cereal Grains, Pepperoni, Mushrooms, Mace, Head Waiter/Butler, Morel Mushrooms)].
Foreign Name: Soyaquell-Tofuwurst (Kraeuter/aux Herbes, Getreide/Céréales, Peperoni/Poivrons, Champignons, Muskat/Muscade, Maître d'Hôtel, Morcheln/Morilles).
Manufacturer's Name: Soyaquell [Soyana].
Manufacturer's Address: Friedensgasse 3, CH-8039 Zurich, Switzerland.
Date of Introduction: 1989.
Wt/Vol., Packaging, Price: Weight varies.
New Product–Documentation: Labels sent by Verena Krieger of Switzerland. 1990. July 5. Note: The company name on the label is given as Soyaquell; Soyana is not mentioned. The Soyaquell line was introduced by Soyana in 1985 for the mainstream market.

9308. **Product Name:** [McSoyana Tofu-Burger (No. 1: Gruyère Cheese, No. 2: Vegetables, No. 3: Brown Rice & Sesame, No. 4: Paprika)].
Foreign Name: McSoyana Tofu-Burger (Nr. 1: Greyerzer Kaese/Gruyère, Nr. 2: Gemuese/Légumes, Nr. 3: Vollreis-Sesam/Riz complet-sésame, Nr. 4: Paprika).
Manufacturer's Name: Soyaquell [Soyana].
Manufacturer's Address: Friedensgasse 3, CH-8039 Zurich, Switzerland. Phone: 01-202-8997.
Date of Introduction: 1989.
Wt/Vol., Packaging, Price: Weight varies.
New Product–Documentation: Letter (fax) from Verena Krieger. 1990. May 31. The Tofuburger is one of Soyana's best-selling products. Labels sent by Verena Krieger of Switzerland. 1990. July 5. Biona certification symbol.

9309. **Product Name:** Soymage Sour Cream Style (Casein-Free Non-Dairy Sour Cream). Renamed Soymage Sour Cream Alternative by Nov. 1995.
Manufacturer's Name: Soyco Foods. Div. of Galaxy Cheese Co.
Manufacturer's Address: R.D. #3 North Gate Industrial Park, P.O. Box 5204, New Castle, PA 16105.

© Copyright Soyinfo Center 2013

Date of Introduction: 1989.
New Product–Documentation: Dairy Foods. 1989. March. p. 33. Note: It is not clear whether or not this product is the same as regular Soymage. Talk with Whole Foods Market on Telegraph Ave. in Berkeley. 1995. Nov. 3. They sell Soymage Sour Cream Alternative; $1.99 for 8 oz.

9310. **Product Name:** [Tofu, Tofu (in Jars), and Tofu & Miso Paté Spread].
Foreign Name: Tofu, Tofu Tres Delicias, Paté -de Tofu y Miso.
Manufacturer's Name: Vegetalia / Productos Naturales.
Manufacturer's Address: Sant Andreu, s/n, Castellcir, Barcelona, Spain. Phone: 93/866-8298.
Date of Introduction: 1989.
New Product–Documentation: Letter from Bernd Drosihn of Viana Naturkost. 1990. April 8. A tofu company in Spain, owned by Salvador Sala, now sells tofu in jars, and tofu spreads.

Letter from Javier Arocena Aramburu of Zuaitzo in Spain. 1992. Dec. 14. Vegetalia is one of four soyfoods manufacturers (including his own company) that he is aware of in Spain. It is run by Salvador. The address is now given as: Plaza de la Era s/n, Castellcir (Barcelona), Spain.

Booklet titled *Recetario* sent by Penelope Stewart of Fair Oaks, California. 1993. July 19. It gives the company address and phone as "Castellcir, Tel. 93-866 61 61." The introduction states that Vegetalia was formed in April 1986 by Salvador Sala, Carmen and Tomás. As of 1992, the company is 6 years old.

Letter from Joaquim Castillo. 1998. May 22. Vegetalia is one of three pioneering soyfoods companies in and around Barcelona.

9311. **Product Name:** [Green Rye Burger (with Tofu)].
Foreign Name: Gruenkernburger.
Manufacturer's Name: Viana Naturkost GmbH.
Manufacturer's Address: Neusserstr. 199, D-5000 Cologne 60, West Germany. Phone: (02233) 41323.
Date of Introduction: 1989.
Ingredients: Tofu*, green rye (*Grünkern*)*, whole wheat flour (Weizenvollkornmehl)*, rolled oats*, leeks*, vegetable oil, spices (*Gewürze*), sea salt. * = Organically grown.
Wt/Vol., Packaging, Price: 200 gm.
How Stored: Refrigerated.
New Product–Documentation: Labels brought by Bernd Drosihn of Viana. 1995. March 11. 3.25 x 4.75 inches. Red, white, and black on green. Self adhesive. Patties made purely from plants (*Rein pflanzliche Bratlinge*).

9312. **Product Name:** [Millet Croquettes (with Tofu)].
Foreign Name: Hirse Kroketten.
Manufacturer's Name: Viana Naturkost GmbH.
Manufacturer's Address: Neusserstr. 199, D-5000 Cologne 60, West Germany. Phone: (02233) 41323.
Date of Introduction: 1989.
Ingredients: Tofu*, millet (*Hirse*)*, carrots (*Möhren*)*, leeks*, sunflower seeds*, rolled oats*, vegetable oil, spices (*Gewürze*)*, sea salt. * = Organically grown.
Wt/Vol., Packaging, Price: 160 gm.
How Stored: Refrigerated.
New Product–Documentation: Labels brought by Bernd Drosihn of Viana. 1995. March 11. 3.25 x 4.75 inches. Dark red, white, and black on yellow. Self adhesive. Made purely from plants (*Rein pflanzliche*).

9313. **Product Name:** [Robinson: Classic Tofuburger].
Foreign Name: Robinson: Tofuburger Classic.
Manufacturer's Name: Viana Naturkost GmbH.
Manufacturer's Address: Neusserstr. 199, D-5000 Cologne 60, West Germany. Phone: (02233) 41323.
Date of Introduction: 1989.
Ingredients: Tofu*, rice (*Reis*)*, carrots (*Möhren*)*, leeks*, sunflower seeds*, rolled oats*, vegetable oil, spices (*Gewürze*)*, sea salt. * = Organically grown.
Wt/Vol., Packaging, Price: 200 gm or 100 gm.
How Stored: Refrigerated.
New Product–Documentation: Labels brought by Bernd Drosihn of Viana. 1995. March 11. 3.25 x 4.75 inches. Red, white, and black on dark red. Self adhesive. Patties made purely from plants (*Rein pflanzliche Bratlinge*).

Note: Also in 1989 Viana introduced Chickpea Spread (*Kichererbsen Pastete*) in which soy sauce was the only soy ingredient.

9314. **Product Name:** [Spring Rolls: Piquant, Oriental! (with Smoked Tofu)].
Foreign Name: Fruelingsrolle: Pikant Orientalisch!.
Manufacturer's Name: Viana Naturkost GmbH.
Manufacturer's Address: Neusserstr. 199, D-5000 Cologne 60, West Germany. Phone: (02233) 41323.
Date of Introduction: 1989.
Ingredients: Filling: Smoked tofu (*Räuchertofu*)*, white cabbage (*Weisskohl*)*. carrots (*Möhren*)*, leeks*, vegetable oil, spices (*Gewürze*)*, sea salt. Dough: Water, wheat, salt. * = Organically grown.
Wt/Vol., Packaging, Price: 100 gm.
How Stored: Refrigerated.
New Product–Documentation: Labels brought by Bernd Drosihn of Viana. 1995. March 11. 3.25 x 4.75 inches. Red, white, and black on dark red. Self adhesive.

9315. **Product Name:** [Grabowski: Tofu & Amaranth Burger (Gluten-Free, Nutty!)].
Foreign Name: Grabowski: Tofu-Amaranth Burger (Glutenfrei, nussig!).
Manufacturer's Name: Viana Naturkost GmbH.
Manufacturer's Address: Neusserstr. 199, D-5000 Cologne

© Copyright Soyinfo Center 2013

60, West Germany. Phone: (02233) 41323.
Date of Introduction: 1989.
Ingredients: Tofu*, amaranth*, carrots (*Möhren*)*, amaranth flour (*Amaranthmehl*)*, hazelnuts*, vegetable oil, spices (*Gewürze*)*, sea salt. * = Organically grown (*kontrolliert biologischer Anbau*).
Wt/Vol., Packaging, Price: 80 gm.
How Stored: Refrigerated.
New Product–Documentation: Labels brought by Bernd Drosihn of Viana. 1995. March 11. 3.25 x 4.75 inches. Red, white, and black on orange. Paperboard. 3.5 x 2.5 inches x 2. Folded over. Stapled on top of plastic bag.

9316. **Product Name:** Mexican Braised Tofu.
Manufacturer's Name: Wildwood Natural Foods.
Manufacturer's Address: 31 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1989.
Ingredients: As of 1998: Wildwood tofu (filtered water, soybeans organically grown in accordance with the California Organic Foods Act of 1990, nigari/magnesium chloride, a natural firming agent), marinade (soy sauce, water, brown rice syrup, rice wine, honey, ginger powder), water, green bell peppers, soy sauce, corn, onions, honey, tomato paste, lemon juice, sesame oil, cilantro, cider vinegar, garlic, jalapeño peppers, herbs, and spices.
How Stored: Refrigerated.
New Product–Documentation: Label sent by Billy Bramblett. 1998. July. He says this product was introduced in 1989, and made at Wildwood's plant in Fairfax.

9317. **Product Name:** Savory Baked Tofu (Organic).
Manufacturer's Name: Wildwood Natural Foods.
Manufacturer's Address: 31 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1989.
Ingredients: 1998: Wildwood Tofu (filtered water, organic soybeans grown in accordance with the California Organic Foods Act of 1990, nigari {magnesium chloride, a natural firming agent}), soy sauce, unsweetened apple juice, apple cider vinegar, mustard, onion powder, sesame oil, garlic powder.
How Stored: Refrigerated.
New Product–Documentation: Original Label sent by Billy Bramblett. 1998. July. He says this product was introduced in 1989 at Fairfax.

9318. **Product Name:** [Spring Rolls].
Foreign Name: Fruehlingsrollen.
Manufacturer's Name: Yakso.
Manufacturer's Address: Zoutstraat 17, Groningen, Netherlands.
Date of Introduction: 1989.
New Product–Documentation: Letter from Anthony Marrese. 1990. March 22.

9319. **Product Name:** [Sojanaise (Soy Mayonnaise)].
Foreign Name: Sojanaise.
Manufacturer's Name: Yakso.
Manufacturer's Address: Zoutstraat 17, Groningen, Netherlands.
Date of Introduction: 1989.
Wt/Vol., Packaging, Price: Sojanaise: 330 gm jar. Retails for DM 5.55.
New Product–Documentation: Letter from Anthony Marrese. 1990. March 22.

9320. Acuff, Steve; Acuff, Karen. 1989. Das makrobiotische Gesundheitsbuch [The macrobiotic health book. 1st ed.]. Munich, West Germany: Goldmann Verlag. 256 p. Recipes by Karen Acuff. 22 cm. [Ger]
• ***Summary:*** This book of macrobiotic philosophy and cookery contains 5 tempeh recipes, and also mentions miso, tofu and tamari. Flora Yap (4/92) notes that the author travels from town to town, lecturing and selling his book. Certain groups are inviting him to speak, renting a place for him to lecture and doing the publicity (paid admission). Address: Idaho, USA.

9321. Allen, Carolyn; Straw, Nelda. 1989. Best little diet cookbook around. Printed by Lake Press, De Pue, Illinois 61322. 176 p. Spiral bound.
• ***Summary:*** Carolyn Allen LPN has been a Diet Center Counselor and Owner of two Diet Center Franchises since 1984. In the fall of 1987 she enlisted the help of Nelda Straw to help develop new recipes. Mori-Nu Tofu is featured in the book at "Product Choices: Tofu. I highly recommend Mori-Nu Tofu because of its aseptic packaging, it requires no refrigeration until opened and it always has a smooth and creamy texture. Mori-Nu's consistent quality is achieved without the use of preservatives or irradiation." Address: Rock Falls, Illinois.

9322. Blackman, Jackson F. 1989. Working chef's cookbook for natural whole foods. Morrisville, Vermont: Central Vermont Publishers. vi + 344 p. Illust. Recipe index by category. Alphabetical recipe index. 28 cm. [20 ref]
• ***Summary:*** This large-format book fills a gap in the world of natural foods. Contents: Foreword. Introduction. Part I: Information, philosophy, technique. 1. Healthy and unhealthy foods. 2. Getting started. 3. Meal design. 4. Directed diets for special occasions. 5. Philosophy, practice and tradition. 6. Charts and lists. 7. Ingredients description. At the end of Part I (p. 95) is a "Suggested reading" list of 20 references.

Part II: Recipes (each on 4x6 inch cards, with 2 cards per page).

The section on "Miscellaneous food description" includes brief descriptions of barley malt, Chinese white

© Copyright Soyinfo Center 2013

cheese (fermented tofu), daikon, gomashio, kuzu, mirin, miso, rice syrup, seitan, shoyu, soy milk (American style vs. Oriental style), soy cheese (American), tahini or tahinah (sesame butter), tamari, tempeh, and tofu. This section, and the book shows the influence of macrobiotics.

Page 74: "Chinese white cheese: (Chin.) Tofu marinated and fermented in rice wine; taste and texture of Camembert cheese. Used as flavoring for noodles or vegetables, or served as a condiment."

The word "tamari" appears on 100 pages in this book, tofu on 92 pages, miso on 57 pages, brown rice on 48 pages, "sea vegetables" on 16 pages, nori on 13 pages, tempeh on 7 pages, kombu on 6 pages, shoyu and soybean on 5 pages each, adzuki beans and wakame on 4 pages each, and soybeans, soy cheese, and soy milk on 2 pages each.

About the author: "Jackson F. Blackman has lived and traveled extensively in Mexico, Belize, Guatemala, Europe, China, Egypt, Saudi Arabia, Libya, Lebanon, Jordan, and Syria. During his travels he studied local eating habits and their relationship to social customs, and the methodology of preparing natural whole foods. He was a sous-chef in a Houston [Texas] restaurant, and operated his own coffee shop in Houston. He then moved to Vermont, where he made and sold health food products to health food stores and co-ops. He is now a food service consultant and lecturer" (Rear cover).

He favors plant foods over animal foods, but does include fish in his recipes. Address: Vermont.

9323. Boeckenhoff, E.; Hamm, U.; Mueller, A.; Tschmarke, A. 1989. Nachfrageveraenderungen bei Milch durch Imitationsprodukte [Changes in the demand for milk caused by imitation products]. *Schriftenreihe des Bundesministers fuer Enaehrung, Landwirtschaft und Forsten "Angewandte Wissenschaft"* No. 317. 173 p. (Muenster-Hiltrup). [Ger]*
• ***Summary:*** This is the publication of a 1987 report on this subject.

9324. Cituk, Kathy; Finnegan, John. 1989. Natural foods and good cooking. Elysian Arts, 20 Sunnyside Ave. Suite A161, Mill Valley, CA 94941. 122 p. No index. 22 cm. [64 ref]
• ***Summary:*** This non-vegetarian cookbook contains considerable introductory information about and recipes using amazake (p. 16, 41, 56, 91, 98-99, 103), miso (p. 43), soymilk (p. 43), mochi (p. 44, 54), tamari soy sauce (p. 46), tofu (p. 46, 51, 80, 88, 96), tempeh (p. 46). Numerous references are made to a book by John Finnegan (1989) titled "Amazake Rice Nectar." Address: Mill Valley, California.

9325. Clergeaud, Chantal; Clergeaud, Lionel. 1989. La cuisine au tofu et lait de soja [Tofu and soymilk cuisine]. Paris: Equilibre aujord'hui. 95 p. Illust. 20 cm. Series: Cuisine et santé. [Fre]*
Address: Naturopathes–Ostéopathes, France.

9326. Echols, John M.; Shadily, Hassan. 1989. An Indonesian-English dictionary. Third ed. Ithaca, New York, and London: Cornell University Press. xix + 618 p. 24 cm. [Ind; Eng]
• ***Summary:*** Soy-related words include: (1) bijan (sesame; also wijen or bijen). (2) bungkil kedelai (soybean meal). (3) kacang (pea, bean, peanut), including kacang asin (salted peanuts), kacang atom or kacang ganéfo (peanuts fried in batter), kacang goréng (peanuts fried crisp), kacang hijau or kacang ijo (mung bean), kacang kedelai (soybean), kacang tanah (peanut). (4) kécap (soy sauce; kecap ayam {chicken prepared with soy sauce}). Note 1. kecap manis is not mentioned here or at "manis." (5) kecipir (four-sided bean eaten as a vegetable [winged bean; *Psophocarpus tetragonolobus*]). (6) kedelai, kedelé (soybean). (7) oncom (fermented cake made from soybean sediment). (8) ragi (yeast, fermentation agent). (9) tahu (tofu, soybean curd), including tahu goréng (fried tofu), tahu isi (tofu filled with meat), tahu kuning (firm yellow tofu), tahu pong (deep-fried puffy tofu), tahu témpé (tofu and tempeh).

Note 3. This is the earliest English-language document seen (April 2013) that contains the term "deep-fried puffy tofu."

(10) tahua (a by-product of tofu similar to yogurt in consistency). (11) takoa, takoah (see takua). (12) takua (firm spiced tofu). (13) taosi (see tauci [fermented black soybeans]). (14) tapai, tapé (sweet cake made of slightly fermented rice or tubers). (15) tauci, tauco, taucyo (fermented bean paste [like miso] used as a condiment).

Note 4. This is the earliest (and only) English-language document seen (Feb. 2009) that uses the word "taucyo" to refer to Indonesian-style miso. "Taoci" probably refers to fermented black soybeans, not to miso.

(16) taugé (bean sprouts). (17) témpé (fermented soybean cake, tempeh; something trivial and unimportant or low grade in quality; *Dlm jaman penjajahan org Indo témpé pribumi* = "During the colonial times the Eurasians considered the natives to be no better than tempeh"). Address: 1. Ithaca, New York; 2. Jakarta, Indonesia.

9327. Food & Agriculture Organization (FAO). 1989. Utilization of tropical foods: Tropical oil-seeds. Rome, Italy: Food & Agriculture Organization of the United Nations (FAO). xiv + 82 p. 21 cm. Series: FAO Food and Nutrition Paper 47/5. *
• ***Summary:*** The 1st chapter, titled "Leguminous oil-seed crops, has these contents: Soybean (p. 1-35): The golden bean from China, varieties and production, soybeans in the tropics. Hydrolysis of soybeans using microbial enzymes. Nutritional and acceptability aspects of soybeans: Cooking characteristics, soybean flavour, digestibility of soybeans. Soybean processing in eastern Asia: Fermentation of soybeans. Fermentation inoculants: Koji and ragi, angkak

© Copyright Soyinfo Center 2013

and masam [a green fermentation starter from Nepal, made from wheat and selected moulds], preparation of koji. Preparation of soy sauce: Traditional Japanese shoyu, other types of soy sauce. Fermented soybean pastes: Types of miso, preparation of miso koji, preparation of mame miso, preparation of hamanatto. Other fermented soybean products: Natto and thua nao. Indonesian tempe: Preparation of tempe ragi, production of tempe kedele, other types of tempe, domestic use and nutritional content of tempe. Foods fermented by molds: Role of moulds in food processing, food safety aspects. Non-fermented soybean products: Production of soy milk, improving soymilk flavour. Soybean protein products: Preparation of tofu, preparation of yuba. Soybean cheese products: Preparation of sufu ("The Chinese prepare a fermented soy curd called *sufu*, which resembles a moulded, soft-texture cheese." Red sufu is made using "red rice koji" (angkak)). Use of soy milk and tofu residues: Preparation of oncom tahu, preparation of meitauza. Use of soybean sprouts. Soybeans as a cash crop. Soybean as an oil-seed: Problems of small-scale extraction. Solvent extraction of soybean oil: Economic aspects, extraction process, refining operations. Nutritional and organoleptic aspects of soybean oil. Commercial production of vegetable fats and oils: Solid shortenings, effects of hydrogenation, hardness of fats. Margarine production: Composition of margarine, manufacture of margarine. Production of soybean grits and flour. Commercial production of soybean protein products: Protein concentrates, protein isolates, economic aspects. Introduction of soyfoods at the village level: Snack foods, vegetable relish, pastes and flour. Preparation of soybeans at the village level: Reducing bitter flavours, preparation of soybean flour. Prospects for soybean products in the tropics.

Concerning the preparation of sufu (p. 21): "... the cubes [of tofu] are drained and heated for about 15 minutes at 100ºC to sterilize them. The sterilized cubes are cooled, placed on trays, and inoculated with one of the following fungi: *Actinomucor elegans, Mucor lienialis,* or *Rhizopus chinensis* var. *chungyen,* depending on the type of 'cheese' to be produced. They are then incubated at 12-20ºC for three to seven days. At that stage, the cubes become covered with a white mycelium and are known as *pehtzu* [*pehtze*].

"In the final stages, the cubes of *pehtzu* are transferred to ageing tanks, where they are immersed in a mixture of rice wine and salt, 2-5% sodium chloride, for forty to sixty days. The alcohol content of this 'dip' (approximately 10 percent) is much higher than that normally obtained by anaerobic fermentation using osmophyllic [osmophilic] yeasts. The final product, after completing the ageing period, is soft and pale yellow, with a pleasant taste and aroma. It is often served with sesame oil. More pungent cheeses are prepared by related processes, by adding other components to the final brine solution. These may include red rice koji, fermented rice mash, anise or pepper. An outline of a preparation from Thailand, using red rice koji to give a red sufu is shown in Figure 3" (a flow sheet, p. 22; Source: Narudom Boon-Long. 1983. "Traditional fermented food products." United Nations University (UNU) Workshop Paper, CFTRI, Mysore, India).

The peanut from Peru (p. 36+).

9328. Grundy, Scott; Winston, Mary. 1989. The American Heart Assoc. low-fat, low-calorie cookbook. New York, NY: Times Books. Div. of Random House. 340 p.
• ***Summary:*** Contains information about tofu and recipes for its use in tofu deviled eggs, tofu mayonnaise, tofu and pork in a stir-fry, tofu quiche, and tofu salad sandwich. Address: 1. Director, Center for Human Nutrition, Univ. of Texas Southwestern Medical Center, Dallas, TX.

9329. Hoshijo, Kathy. 1989. Kathy cooks: Vegetarian, low cholesterol. New York, NY: Simon & Schuster (A Fireside Book). 728 p. Illust. Index. 24 cm.
• ***Summary:*** Previously published as *The Art of Dieting Without Dieting* (1986). A whopper of a cookbook, with 350 easy-to-prepare vegetarian recipes from the star of the PBS television series "Kathy's Kitchen"–which airs in 180 cities nationwide. Each recipe contains a detailed (full-page!) nutritional analysis.

This book contains a wealth recipes using tofu, tempeh, soymilk, miso, and whole soybeans.

9330. Kadam, S.S.; Adsule, R.N.; Salunkhe, D.K. 1989. Utilization. In: D.K. Salunkhe and S.S. Kadam, eds. 1989. CRC Handbook of World Food Legumes: Nutritional Chemistry, Processing Technology, and Utilization. Vol. III. Boca Raton, Florida: CRC Press, Inc. 323 p. See p. 271-310. [188 ref]
• ***Summary:*** Contents: Introduction. Whole beans: Whole beans as a food, milk and milk products (incl. soymilk, tofu, kori-tofu, soyogurt, tairu [fermented soymilk in Malaysia], fermented soy cheese), microorganisms, nutritive value, fermented soy cheese, beverage, yogurt, other products, fermented foods, microorganisms, physicochemical changes, nutritional composition and quality, toxicological aspects, preparation, microorganisms, chemical composition, nutritional value. Cotyledons: Traditional products, soups, fermented foods, confectionery products. Flours: Composite flours (incl. soy flour), papad, pasta, traditional products.

Note: According to the author's definition: "A papad is a thin, wafer-like product, usually circular in shape, rolled from a legume-based dough and other farinaceous materials, with added salt, spices, and condiments. In India it is either toasted or deep-fat fried to a crispness which produces a crackle when *papad* is eaten. Papads are also known as "appalam" in south India... Black gram flour is the most indispensable constituent of *papad* dough because of the mucilaginous substance it contains." Address: 1-2. 9331. Leneman, Leah. 1989. The single vegan: Simple, convenient and appetizing meals for one. Wellingborough, Northamptonshire, England: Thorsons Publishing Group. 127 p. Illust. Index. 21 cm.
• ***Summary:*** Vegan recipes for one, grouped seasonally, and within each season by day of the week, with weekly shopping lists and staples to be kept on hand. Soy-related recipes include: Smoked tofu à la king (with smoked tofu and soymilk, p. 21). Strawberry cheese (with plain soy yogurt, p. 29). Spaghetti stir-fry (with tofu, p. 34). Mediterranean-style potato salad with yogurt dressing (with soy yogurt, p. 37). Savoury mushroom bake (with tofu, soy yogurt, and miso, p. 38). Tofu and green pepper savoury (p. 44). Bean and potato salad (with soy yogurt and vegan mayonnaise, p. 47). Courgette (zucchini) and tomato flan (with tofu, p. 48). Tofu and vegetable stew (p. 51). Tofu pot pie (p. 53). Scalloped tofu au gratin (incl. soymilk, p. 58). Nasi goreng (with tofu, p. 63). Chilled cream of tomato soup (with soy yogurt, p. 65). Cream of cauliflower soup (with soymilk, p. 69). Scrambled tofu and leek (p. 79). Irish stew with frozen tofu (p. 84). Tempeh and sweetcorn roast with tahini/mushroom sauce (p. 92-93). Tempeh and mushroom stew on a mashed potato base (p. 98). Sweet tofu 'omelette' (incl. soymilk, p. 105). Curried tofu (p. 107). Mushroom miso gravy (p. 115; shows a pack of Sunwheel brown-rice miso). Tropical blancmange (with soymilk, p 116).

Note: Soymilk and soy sauce are used in small amounts in many other recipes. This book is distributed in the USA by Sterling Publishing Co. Address: 19 Leamington Terrace, Edinburgh EH10 4JP, Scotland.

9332. Leneman, Leah. 1989. Slimming the vegetarian way. Revised and reset ed. Wellingborough, Northamptonshire, England: Thorsons Publishers Ltd. 144 p. Index. 20 cm. 1st. ed. 1980.
• ***Summary:*** The menus in this natural-foods, vegan cookbook are designed for 1 person and the daily calories intake is kept at about 1,000 calories. The book takes a positive attitude toward dieting by focusing on those foods you can eat, rather than those you should avoid. Each "menu" consists of breakfast, lunch, and dinner for 1 day. For each meal there is one column for Imperial (Metric) measurements, one for American measurements, and one for calories, with a calories for each meal and for the day. There are menus for each of the four seasons plus chapters on crash diets, desserts, and a vegetarian wholefood calorie chart.

The preface to the new edition notes: "The greatest change which has occurred since the first edition of this book appeared has been the phenomenal proliferation of soya foods (soyfoods in American parlance). Tofu is arguably the best friend a slimmer ever had, for no other food so low in calories and high in protein is as versatile as tofu. Tempeh is another fine soya food for slimmers, though as it is not as readily available as tofu, I have confined its use to only one recipe. Since soya milk and yogurt are now so easy to obtain, I have given them as alternatives to the dairy versions, so that vegans, and others trying to cut down on dairy produce, will be able to use the book in the same way as lacto-vegetarians."

Soy-related recipes include: Pineapple tofu salad (p. 36). Tofu celery loaf (p. 39). Tofu-stuffed aubergine (eggplant, p. 66). Scrambled egg or tofu, sausalata and tomato (p. 89, 118). Tofu slices on toast with creamy gravy (p. 98). Miso soup with tofu (p. 102). Spaghetti with tempeh and mushroom sauce (p. 127). Vegetable charlotte with smoked tofu (p. 129). Soya milk and soya yogurt are always listed as alternatives to skim milk or yogurt from cows. TVP is used as an ingredient in many recipes, and "Tamari (soy sauce)" is widely used as a seasoning. Address: 19 Leamington Terrace, Edinburgh EH10 4JP, Scotland.

9333. **Product Name:** [Taifun Organic Tofu].
Foreign Name: Taifun biologisch Tofu.
Manufacturer's Name: Life Food.
Manufacturer's Address: Stühlinerstrasse 9, D-7800 Freiburg, West Germany. Phone: 0761/27 2272.
Date of Introduction: 1989. January.
Ingredients: Water, soybeans (organically grown), calcium sulfate.
How Stored: Refrigerated.
New Product–Documentation: Color photocopy of label brought to Soyinfo Center by Wolfgang R. Heck. 2011. Nov. 25. The top half of the label is black, green and yellow on white with a yellow sun in the upper right, a black grid over the entire top half, and the word "Taifun" in green. The bottom left half of the label reads: Hersteller: Life Food. Inh. Klaus Kempff, followed by the address and phone number. The bottom right half of the label reads: Ingredients: Water, soybeans (organic = aus kontr. biol. Anbau), Nigari Ko (Calcium sulfate [deceptive use of word "Nigari]). Store at +2ºC to +7ºC. Beside the label the approximate date of introduction is given in Wolfgang's handwriting as 1988-1989. By about 1990, a new label shows that: (1) The company name is now Life Foods GmbH. (2) The company has moved to Robert Bunsen-Str. 6, 7800 Freiburg. (3) The phone number has changed to: 07 61 / 50 6155.

Note: This label was used until 1992, but in 1993 the logo was changed so that the irregular yellow sun had a red center, and the word "Taifun" was written in stylish, bold black letters.

Color photocopy of 1999 label brought by Wolfgang Heck. Product name: Tofu- traditionell hergestellt [Tofu–traditionally made]. 200 gm. Nutritional information. Ingredients: Water, soybeans (organic) * = Kontrolliert Oekologischer Anbau (Agreco). Below the bar code is a recipe for pan-fried tofu. Phone: 0761 / 15210-0.

9334. Meetings with remarkable men and women: Interviews with leading thinkers on health, medicine, ecology, culture, society, and spirit. 1989. Brookline, Massachusetts: East West Health Books. xiv + 296 p. Illust. No index. 26 cm. Introduction by Tom Monte.
• ***Summary:*** This book consists of excerpts of 87 interviews previously published in *East West Journal.* One of these is an interview (published Jan. 1977) with Bill Shurtleff about soybeans and soyfoods, including soymilk, Vitasoy, and tofu (p. 58-60). Address: Brookline, Massachusetts.

9335. Metcalfe de Plata, Edith. 1989. Mexican vegetarian cooking. Rochester, Vermont: Healing Arts Press, a division of Inner Traditions International, Ltd. 128 p. Illust. by Clive Birch. Index. 22 cm.
• ***Summary:*** Chapter 7, titled "Soybeans" begins: "Soybeans are full of vitamins A, E, K, B-1, B-2, potassium and lecithin." They are processed into many forms: "grits, meal, powder, flour, nuts, tofu, pastas, and are also made-up to resemble different types of meat (Tvp)."

Soy related recipes include: Boiled soybeans (with "½ pound {1 cup} dry soybeans, p. 101). Soybean patties (*Empanadas de frijoles soyas,* with "2 cups soybeans, cooked and mashed," p. 102). Dry-roasted soybeans (*Frijoles soyas asadas,* with "cooked soybeans," p. 103). Fried soybeans (*Frijoles soyas fritas,* with "2 cups soybeans, cooked," p. 104). Soybean casserole (*Cazuela de frijoles soyas,* with "2½ cups soybeans, cooked," p. 105).

Note: This 1989 edition is the same, page for page, as the 1984 edition. Address: Manager of a vegetarian restaurant, Guadalajara, Mexico.

9336. Morinaga Nutritional Foods. 1989. Morinaga Milk Industry (News release). 5800 South Eastern Ave., Suite 270, Los Angeles, CA 90040. 3 p. Undated.
• ***Summary:*** "Morinaga Milk Industry, the parent company of Morinaga Nutritional Foods, is one of the world's largest food manufacturers." It was founded in 1917. Milk products have been the mainstay of Morinaga in Japan. "A significant product for Morinaga has been its infant formula, with a nutritional level equivalent to mother's milk." Other products marketed by Morinaga include tofu, orange juice, tea and baby food.

"In order to diversify its interests, Morinaga has developed affiliations with such international companies as Unilever, Kraft, Beech-Nut, Lipton and Sunkist, thereby bringing many foods from around the world to the Japanese market." Morinaga has also become involved in the pharmaceutical field with the research of anti-tumor agents. Morinaga Nutritional Foods Inc. was established in 1985 in Los Angeles. "The first long-life tofu was exported from Japan to the United States in 1978 and in the following year, Morinaga received the Minister of Science and Technology Agency Prize for its outstanding aseptic manufacturing technology." Address: Los Angeles, California. Phone: 213-728-4325.

9337. Nichii Co. Ltd. 1989. Annual report 1989. Awajimachi 2-2-9, Chuo-ku, Osaka 541, Japan. 42 p. [Eng]
• ***Summary:*** Nichii is a major Japanese retailer. In 1989 the company, including its 35 consolidated subsidiaries, had revenues of 1.039 trillion yen (1,039,968 million yen; US$8,200 million), and net income of 13,500 million yen (US$106 million). Headquartered in Osaka, it is Japan's fifth largest publicly held retailing group. The company's gross profit margin in 1989 was 29.3%. One of Nichii's most important retailing strategies is targeting young and "young minded" consumers. In fiscal 1989, Nichii and its subsidiaries became the MYCAL Group. MYCAL is derived from Nichii's "Young-Minded Casual Amenity Life" concept, which reflects the lifestyle that the group helps furnish to its customers. A new concept is the "urban resort," exemplified by the MYCAL Honmoku, which opened in Yokohama in April 1989 and about which a TV program was aired on 19 May 1990, in California on Channel 26 at 9:30 P.M. Mr. Toshimine Kobayashi is President of Nichii. Mr. Shinozaki is President of International Operations, and therefore oversees the soyflake operation in the USA; he is Terry Tanaka's boss. This annual report is beautifully designed. Note: The company is planning to start a plant in Iowa to make soy flakes for use in making tofu.

Update: Talk with Terry Tanaka of Nichii Company of America, Inc. 1992. Nov. 24. In Japan the Nichii name has been used for about 30 years in connection with a supermarket chain. Now the company is trying to phase it out in favor of names like Vivre and Saty. The umbrella group for all of these companies is the MYCAL Group. After Nichii becomes MYCAL Corp., Terry's company will become MYCAL Corp. of America. Address: Osaka, Japan.

9338. Pearce, Anna. 1989. Simply living: the story of Compassion and the wonderbox. Saffron Walden, Essex, England: Box Publications in association with the Self Publishing Association. 239 p. Illust. 23 cm.
• ***Summary:*** This is a remarkable book about small things, real people, ideas, successes and failures. It is about the Kingdom of Heaven–and a case study of community development in South Africa.

Compassion is an organization through which people help those in need. A Wonderbox is a box out of which come wonderful things, somewhat like a hat produces wonderful things for a magician or conjurer.

Chapter 12, "Soya beans," begins: "It was appropriate that our most creative period could be traced back to a visit to Cape Town by Peter and Eileen Caddy in April 1977. They were the two people who had founded Findhorn in Scotland in 1962. They had been led to the Findhorn Caravan Park by

© Copyright Soyinfo Center 2013

guidance that Eileen received while meditating." The Caddys talk about the guiding light within that will guide anyone who is able to quiet their thoughts sufficiently to hear what it has to say. He had hardly finished speaking when a soft-spoken women came up to the author and said, shyly, "'I hope you don't mind but I feel there is something I have to pass on to you.'

"We introduced ourselves. She was Dorothy Beaumont, who had been living in Rhodesia. Her husband, who had recently died, had been a farmer. Five years ago they had started growing soya beans on their farm. Two years ago, Dorothy told me, she had been in a wheel chair, crippled with arthritis. A naturopath had advised her to give up all animal products and to get her protein from beans and pulses instead. A friend taught her how to make soya milk, not only for herself but for their African laborers as well. She felt she had to pass on the way of making soya milk and using the residue [okara], which she did–in the kitchen of St. Margaret's Church at Fish Hoek. "I did not realize at that stage how extraordinary it was that she picked me out of several hundred other people that she might have approached." Various members of Compassion also attended. The process is described. As Dorothy was making the soya milk she explained how the Chinese also make tofu out of soya milk, and how they can slice and fry it for use instead of meat. She said that soyabeans had been exported from Rhodesia to China and to Holland. Then Holland had exported dried soya milk to South Africa. Yet "when the Chinese were building the Tanzanian railway line went through Southern Africa, barrels of Tofu were off-loaded at the docks for the Chinese to eat. Dorothy explained that soya milk was "very suitable for giving to babies with 'runny tummies,' as these were often caused by a shortage of protein. In addition it contained no lactose which, for some people, was difficult to digest." After making the soymilk, Dorothy used the residue [okara] "to make delicious soya pancakes that won us all over to soya–as it was with people to whom we demonstrated in the following years."

Jill Fletcher, who worked for a radio station outside South Africa, interviewed Dorothy on her programme, "The Voice of the Gospel."

Jill and her husband Tony Fletcher, who was first class puppeteers, used a tape recording of this program to introduce people to soya and to show them how to make soya milk.

"One of the big advantages of soya beans was their incredible cheapness, once we had found somewhere to buy them." Soon the author and co-workers were experimenting with soya recipes; they made "cakes and puddings, milk shakes, yoghurt, cream-cheese and coffee. The first time she managed to fool her husband "was when he drank a mid-morning cup of coffee without realizing it was soya." She fooled him again with soya rissoles, but he was pleased and said she could give them to him every day of she wished. "It was quite comforting to find that nearly all husbands were like mine as far as soya beans were concerned."

But South African women were not so willing to try soya recipes. A large photo (p. 61) shows Mrs. Mbatani making soya milk for one of her grandsons.

The term "soya coffee" appears on pages 70 and 77. On page 70 we read: "We were amazed to hear that soya coffee was being given to babies in Illingi instead of what we had considered other near-perfect baby food or 'milk' that could be made from the beans." A Quaker doctor, who was always able to get expert opinions, said that it should be all right."

Chapter 16 is titled "Kay Simmons." Page 77 states: "The last to come out [of the Wonderbox], and perhaps the most impressive course, was Christmas pudding with soya custard. This was followed by coffee with soya milk for those prepared to try it. We thought we would be taking things too far if we offered them soya coffee with soya milk!

"The Christmas pudding, made with soya beans, was our own original recipe and it became a lasting favorite for demonstrations."

The ten appendixes include (p. 225-36): 1. Advantages of a Wonderbox. 2. Cooking with a Wonderbox. 3. Making a Wonderbox. 4. Cooking soya beans. 5. Making soya milk. 6. Soya for babies.

9339. Pedrotti, W. 1989. Il libro della soia [The book of soya]. Italy: Mediterranee. [Ita]*

9340. Quong Hop & Co. 1989. The Soy Deli: Good food for healthy living (Leaflet). South San Francisco, California. 1 p. 28 cm.
• ***Summary:*** This black on beige leaflet shows the front panel of ten soy products made by Quong Hop & Co., including tofu burgers, tempeh burgers, baked five-spice tofu, baked savory tofu, and hickory smoke flavored baked tofu. Address: 161 Beacon St., South San Francisco, California 94080. Phone: 415-761-2022.

9341. Rakosky, Joseph, Jr. 1989. Protein additives in foodservice preparations. New York, NY: Van Nostrand Reinhold. An AVI Book. xiv + 258 p. Illust. Index. 24 cm. [187 ref]
• ***Summary:*** Contents: 1. Protein additives: Use and regulations. 2. Proteins, amino acids, and derivatives. 3. Nutritional considerations. 4. Functional properties and economics. 5. Bakery products. 6. Pasta products. 7. Processed meats. 8. Dairy-type applications: Introduction, regulatory aspects (filled milk, casein and caseinates), dairy products: modified and/or simulated, beverages (filled milk, soymilk, soymilk preparations), coffee whiteners, whipped toppings, frozen desserts, cheese analogs, tofu. 9. Dietary and miscellaneous uses. This book discusses both animal and vegetable proteins. Among the vegetable proteins, it focuses mostly on modern soy protein products–soy flour, soy

© Copyright Soyinfo Center 2013

protein isolates, concentrates, textured soy protein products–and gluten, however information is also given on tofu (p. 187, 211, 225-27) and soymilk (p. 187, 192-95), especially in chapter 8, "Dairy-type applications."

Concerning regulation of casein and caseinates, p. 190 notes: "Almost all casein produced until the later 1940s was for industrial application, such as glue and paper coating (Reed 1974). Most persons accepted casein as an industrial product rather than an edible dairy product; it was generally considered a chemical derivative. Later, as Reed (1974) pointed out, improved processing and developments changed this. Today, an estimated 60 to 70 percent of the casein produced is for edible use in the form of casein or caseinates.

"Since caseinates were designated chemical products, formulations using caseinates were considered nondairy-hence, the appearance of 'non-dairy creamers' and 'non-dairy toppings.' Many feel that this is misleading because many people want to know whether a milk protein is present for religious and/or medical reasons. Present FDA policy still allows the use of caseinate in nondairy creamers, but they recommend that the ingredient statement show, in parentheses, that the caseinate is derived from milk (Sheeler/Sheeles 1985, personal communication)."

Concerning whipped toppings (p. 200-203): "Whipped toppings are formulated to simulate whipped dairy cream. Their widespread use in foodservice began when certain benefits were realized: convenience, eye appeal, stable structure, good shelf life, wide acceptance, and low cost. There is also an appeal for those people who prefer nondairy products for one reason or another.

"The typical topping formulation is composed of fat, protein, sugar, sweetener, stabilizer, emulsifier, buffering salts, and, in some cases, artificial color and flavor. The formulation is very much like the formulation for a coffee whitener except that toppings have more fat. There are also minor differences in proportions of the other ingredients. As with coffee whiteners, each ingredient has a specific requirement placed on it." The requirements for each ingredient are then discussed in detail. Concerning protein: "Protein serves two emulsification functions in toppings: as an emulsifier of fat and as an emulsifier of air. As with coffee whiteners, protein also contributes to body and taste. Any number of protein products can be used. In the early days of development, the two most used protein products were caseinates and nonfat dry milk (NFDM)." NFDM was generally found to give the best results. However since soy processors "learned how to obtain more desirable products for this use, they are now more competitive with dairy-derived additives. This is especially so as the price of dairy products rises. or this reason, more functional nondairy protein products are being produced and utilized in dairy simulated products." Address: Food Industry Consultant, J. Rakosky Services, Morton Grove, Illinois.

9342. Riet, W.B. van der; Wight, A.W.; Cilliers, J.J.L.; Datel, J.M. 1989. Food chemical investigation of tofu and its byproduct okara. *Food Chemistry* 34(3):193-202. [31 ref]
• ***Summary:*** Tofu was produced from Edgar, Hutton, and Prima variety soybeans "according to a modified method which included the addition of a coagulant mixture consisting of calcium chloride dihydrate and calcium sulphate dihydrate at levels which not only resulted in good tofu yields, but also elevated the calcium levels in such a manner as to make the product comparable to cheese as regards the wet weight concentration of this essential dietary mineral." Address: Div. of Food Science & Technology, CSIR, P.O. Box 395, Pretoria, Republic of South Africa.

9343. Routhier, Nicole. 1989. The foods of Vietnam. New York, NY: Stewart, Tabori & Chang. 239 p. Foreword by Craig Claiborne. Illust. (Photos by Martin Jacobs, mostly color). Index. 29 cm.
• ***Summary:*** An excellent and graphically beautiful book, with more than 150 authentic, traditional Vietnamese recipes. The book is dedicated to the fond memory of her mother, Tran-Thi-Cuc. Vietnam's cooking has been influenced by the various nations that have occupied or conquered the country over the Centuries–and especially the Chinese and French. Yet the Vietnamese have been able to assimilate each of these imports to create their own unique cuisine.

Introduction (by the author): Vietnam "is shaped like an elongated letter *S*, with two wide river deltas, the Red River delta in the north and the Mekong River delta in the south, separated from each other by a long, narrow stretch of mountainous coastal land." The deltas are the country's most fertile, agriculturally productive, and populous regions. The Monsoons (seasonal winds) produce a dry winter season and a wet summer. The north has a temperate climate and a cold winter, whereas the south is tropical.

Vietnam's land area is slightly smaller than that of Japan, and about three fourth's the size of California.

Vietnamese food and cookery owes much to the French colonialists, who ruled the country for almost a century (1859-1954). "In the old trading port of Cholon, the French built a new city as the central market for all of Indochina, and Saigon (now Ho Chi Minh City) was dubbed 'the Paris of the Orient'" (p. 8-9).

"The Vietnamese are quick to point out that their cuisine, like their country, is divided into three regions, each with a distinct culinary tradition." Yet these regional differences are not an important as they are in China. "In the north, the influence of China is most evident." One popular northern dish is stuffed bean curd (Dau Hu Nhoi). The main city in Central Vietnam is Hue, where cookery has been brought to a high level of sophistication. The cookery of the tropical south is simpler than that of the north and center, but also spicier, and the food consists of a wealth of tropical fruits, vegetables, herbs and spices. The French influence is

© Copyright Soyinfo Center 2013

best seen here.

Soy related recipes: Color photo of crisp fried bean curd in tomato sauce (p. 15). Color photo of Bean curd and Chinese chive buds soup (Canh dau phu he, with 6 ounces soft bean curd {tofu}, p. 50; recipe p. 55).

The chapter titled "Vegetarian recipes" (p. 167-89) contains many tofu recipes. Vegetarian stir fry (La han chay, with 2 squares {8 ounces} semisoft bean curd {tofu}, p. 168). Crisp-fried bean curd in tomato sauce (Dau phu soy ca chua, with 1 pound firm bean curd {tofu}, p. 171). Braised bean curd (Dau phu kho, with 1 pound firm bean curd {tofu}, p. 172). Stir-fried bean curd with lemon grass on crisp cellophane noodles (Dau phu xao xa ot chay, with 2 pounds firm bean curd, p. 179). Stuffed bean curd (Dau phu nhoi, with 2 pounds firm bean curd {tofu}, p. 185. Note: "This centuries-old recipe is a Vietnamese adaptation of a well-known Hakka dish; there was a mass migration to northern Vietnam by both Cantonese and Hakkas [from southern China] in the 17th century).

Desserts: Jellied bean curd with ginger syrup (Dau hu nuoc duong, with ½ cup dried soybeans, ¼ cup rice flour, and 1 teaspoon gypsum {see p. 232; this calcined calcium sulfate is sold at Chinese pharmacies} dissolved in 1 teaspoon cold water in a small water to curd / coagulate the hot soymilk, p. 201).

Sauces: Sweet and sour dipping sauce (Soy chua ngot, with 2 tablespoons soy sauce and 2 tablespoons nuoc mam {Vietnamese fish sauce}, p. 214). Soybean and ginger sauce (Nuoc *tuong*, with ¼ cup *tuong* {fermented soy bean sauce, see p. 234} and 1 tablespoons nuoc mam {Vietnamese fish sauce}, p. 215).

Appendix (p. 228-36) includes a glossary of basic Vietnamese foods. Items marked with an asterisk are essential ingredients: Bean curd / tofu (dau hu. "You can do absolutely anything with bean curd,..." The three types are pressed, firm, and semi-soft). Chile paste (*tuong ot tuoi.* "A fiery hot mixture of mashed fresh red chilies, garlic, salt and soybean oil. Do not confuse this product with the Chinese hot bean paste). Fish sauce (nuoc mam. It is like Thai nam pla but stronger). Gypsum (*thach-cao*)*:* "Chemically known as calcined calcium sulfate,..." Hoisin sauce (A "sweet, piquant brown paste made from soybeans, red beans, sugar, garlic, vinegar, chile, sesame oil and flour").

Oyster sauce (Made from oyster extract, soy sauce, sugar and vinegar). Soybeans, dried (Dau nanh. Sold in oriental groceries). Soybean sauce (*tuong.* This traditional fermented Vietnamese sauce is made from ground soybeans, water, roasted rice flour, and salt. "It is sold, bottled, only in Vietnamese groceries." Do not confuse *tuong* "with the saltier, thicker Chinese ground bean paste." Vietnamese vegetarians commonly use *tuong* in place of fish or shrimp sauces). Soy sauce (*si dau.* Where soy sauce is called for in this cookbook, use Japanese Kikkoman or "light" soy sauce. Regular Chinese soy sauce "is dark and stains food black").

Concerning "red beans," Andrea Nguyen, food writer from Vietnam says (March 2012): Red beans are "more like Chinese *xiao dou* [than Japanese azuki beans]–and are called *dau do.* Typically seen in sweet soups. They're not as important as mung beans (*dau xanh* / green beans)."

About the author: Nicole "was born in Saigon to a Vietnamese mother and French father. At a very early age she developed a great interest in cooking from her mother, who owned a [small, French-Vietnamese] restaurant in Laos. As a teenager, Ms. Routhier lived in France and Belgium, where she became versed in European styles of food preparation" (with portrait photo, inside rear dust jacket). Although she had a formal French education, she spoke only Vietnamese with her mother and nanny at home. She learned about cooking from her nanny, a native of Hue, and her mother, from Haiphong, both home cooks of the first order. In Laos, when the chef let her help in the kitchen of her mother's restaurant, she knew what her true calling would be. She grew up during the Vietnam war, and experienced hard times, especially after her father left home. "During the war, food was scarce and we ate what we could. Sometimes we had to hide in the village bomb shelter for days if not weeks on end, and rice was often the only food available... I was hungry and terrified at the idea of lacking food. That childhood fear never abandoned me." Later she knew better times, traveling with her family in Europe and Asia, and learning about food. "In Vietnamese tradition (as in most of Southeast Asia), recipes are never written but simply taught to the children by letting them help in the family kitchen" (from the Preface, p. 5). In the mid-1980s she had the good fortune to meet Craig Claiborne. When they first met, she was a student at the Culinary Institute of America in Hyde Park. She subsequently became a professional chef and cooking teacher (from the Foreword, by Craig Claiborne, written May 1989, p. 4) She is married to Anthony Laudin, and now teaches cooking in Manhattan, New York City. Address: Professional Chef and Culinary Teacher in New York City.

9344. Simpson, J.A.; Weiner, E.S.C. 1989. The Oxford English dictionary. 2nd ed.: Tofu. Oxford, England: Clarendon Press. [6 ref]

• ***Summary:*** Etymology: From the Japanese word *tôfu,* which is derived from the Chinese word doufu, from dou = beans + fû = rotten. "A curd made in Japan and China from mashed soya beans; bean curd."

The first entry is: Kinch, Edward. 1880. "Contributions to the agricultural chemistry of Japan." *Transactions of the Asiatic Society of Japan* 8(Part 3):369-415. Oct. See p. 399. There are 5 subsequent entries from 1905 to 1981.

Note: No other entries for words meaning "tofu" but with variant spellings (such as dowfu, tahoo, tahu, etc.) appear in this 1989 edition. Address: England.

9345. Simpson, J.A.; Weiner, E.S.C. 1989. The Oxford

© Copyright Soyinfo Center 2013

English dictionary. 2nd ed.: Bean curd. Oxford, England: Clarendon Press.
• ***Summary:*** Under the word "bean," at "special combinations" we read: "Bean curd, paste: A thick jelly or paste made from beans eaten in North China and adjacent countries." No reference or date is given. Address: England.

9346. *SoyaScan Notes.* 1989. Terms related to soyfoods, soybeans, and the soybean industry: Library of Congress subject headings and call numbers (Overview). Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** Two different types of call numbers are used by American libraries for cataloging their books. Most larger libraries use the Library of Congress call numbers (LC numbers, which start with two letters) and many smaller libraries use the Dewey Decimal System (Dewey numbers, which contain only numbers).

The following are from the Library of Congress Subject Headings (12th ed. 1989) and the Library of Congress Classification Schedules. The first edition of Class S (Agriculture), for example, was published in 1911, and the 4th edition in 1982. BT = Broader terms. NT = Narrower terms. UF = Use for. May Subd Geog = May subdivide geographically, e.g., Soy sauce industry-Japan.

Class H is Social sciences and economics. Class Q is science. Class S is agriculture (SB is plant culture. SB205 is field crops, legumes). Class T is technology (TX includes nutrition). Class Z is bibliography and library science.

9347. The legacy of the Japanese in Hawaii: cuisine. 1989. [Honolulu, Hawaii]: Japanese Cultural Center of Hawaii. 248 p. Illust. (some color). Index. 26 cm.
• ***Summary:*** A spiral bound book. "The simple elegance of Japanese cuisine sets it apart from other ethnic foods of Hawaii." It is a "culinary art."

"The first group of Japanese, the Gannen-Mono, came to Hawaii as laborers in 1868. The S.S. City of Tokio brought a group of 944 contracted laborers, Kanyaku Imin, on February 8, 1885; and by 1924, 220,000 workers had arrived to become residents of these islands. Thus began the legacy of Japanese in Hawaii" (p. 21).

One chapter, titled "Tofu ryori (Bean curd dishes)" (p. 177-92) contains the following recipes: *Hiya yakko* (Cold tofu, with "2 blocks 'kinu' tofu). *Arare tofu* (Fried tofu cubes). *Agedashi tofu* (Deep fried tofu). *Takigawa tofu* (Jellied tofu strips). *Soba dofu* (Buckwheat soybean curd). *Ken chu / Ken cho* (Meatless or shojin food). *Iri dofu* (Sauteed tofu). *Papaya chanpuru* (Tofu stir-fry with vegetables). *Moyashi chanpuru* (Tofu with bean sprouts). *Gan modoki / Hiryozu* (Deep fried tofu balls). Tofu loaf. Tofu patties. *Okara / Unohana iri* (Seasoned soybean lees [okara]). *Shira ae* (Vegetables with tofu dressing). *Yudofu* (Simmered soybean curd).

For kinako (roasted whole soy flour) see: Rice ball with kinako (variation of Ohagi, p. 230). *Kinako mochi* (variation of mochi, p. 232).

Other soy related recipes *Tori dango no teriyaki* (Teriyaki chicken dumpling, with shoyu, p. 41). *Ika no su-miso* (Squid with miso dip. p. 42). *Satsuma jiru* (Miso soup with pork and vegetables, p. 68-69). *Miso shiru* (Basic soybean paste soup, p. 70). *Sushi no gu* (Ingredients for sushi, incl. Koya-dofu {Dried bean curd} preparation, p. 93). *Inari zushi* (Cone sushi, with "12 aburage {deep fried tofu or bean curd}," p. 98). *Aburage mochi* (Fried bean curd with mochi, p. 115). *Oden* (Vegetables, seaweed & fishcake simmered in fish broth, with "3 aburage," p. 116). *Sukiyaki* (Meat & vegetables cooked in sauce, with "1 block tofu, cut in 1-inch cubes," p. 117). *Basic teriyaki sauce No. 1 & 2* (p. 127). *Niku no teriyaki* (Meat teriyaki, p. 127). *Shibi no misoyaki* (Tuna broiled with soy bean sauce, p. 132). *Tako no teriyaki* (Barbecue octopus, p. 134). *Tori no misoyaki* (Chicken with soybean paste, p. 137). *Stuffed miniature aburage* (Fried bean curd, p. 147). *Miso no ankake* (Soybean

© Copyright Soyinfo Center 2013

paste sauces, p. 149). *Kuromame* (Black soybeans, p. 151). *Hijiki to aburage no irini* (Stir-fried seaweed & fried bean curd, p. 153). *Butaniku miso ni* (Pork with miso, p. 154). *Aburage namasu* (Fried bean curd salad, p. 201). *Ingen no miso ae* (String beans with miso dressing, p. 202). *Fudanso no shira ae* (Tofu & swiss chard salad, p. 202). *Kyuri no sumiso ae* (Cucumber with vinegar-miso sauce, p. 204). *Tofu salada* (Soybean curd salad, p. 205). *Misozuke* (Vegetables pickled in miso, p. 212). Address: Honolulu, Hawaii.

9348. Vegan Restaurant (The). 1989. January. New soyfoods restaurant or deli. 115 Baldwin Ave., Paia, Maui, Hawaii 96779.
• ***Summary:*** Talk with Michael Klaper. 1990. Feb. Gentle World has recently opened this vegan restaurant on Maui. Menu sent by Jeanie Greenbaum of Gentle World in Alachua, Florida. 1991. March 13. The restaurant is now open for dinner only. Soyfoods on the menu include: Tofu eggless salad. Tofu eggless salad sandwich. The vegan burger (with seitan and tempeh). 9349. **Product Name:** [CookDo Mabo-dofu Sauce Dry Mix].
Foreign Name: Mabô-dôfu no Moto.
Manufacturer's Name: Ajinomoto Co. Inc.
Manufacturer's Address: Kyobashi 1-5-8, Chuo-ku, Tokyo 104, Japan.
Date of Introduction: 1989?
Wt/Vol., Packaging, Price: Sealed foil pack.
How Stored: Shelf stable.
New Product–Documentation: Television Ad. 1989. Saturday, Sept. 16. 7:10 P.M. California. Channel 26. 30 seconds. Color. Japanese and French language. An intelligent and healthful looking young French couple are talking in Paris at Rue de La Vie, 18eme, apparently a high class part of the city. The wife is holding a cake of tofu in a glass bowl, and explaining in French that she likes tofu, it is not expensive, and she loves Mabo-dofu (a Chinese-style dish with cubed tofu, red pepper sauce, and usually ground pork or beef). She shows how she dices the tofu. The ad notes that "These two are a little particular about Mabo-dofu. They only make the real thing." It closes with a close-up of the colorful package.

9350. **Product Name:** [Marinated Tofu].
Foreign Name: Marinierter Tofu.
Manufacturer's Name: Byodo Naturkost GmbH.
Manufacturer's Address: Hirschbergstr. 9, D-8000 Munich 19, West Germany. Phone: (089) 16 85 70.
Date of Introduction: 1989?
Ingredients: Water, organically grown soybeans, tamari and spices, apple vinegar, beet sugar syrup, nigari (Traditional Japanese).
Wt/Vol., Packaging, Price: 200 gm plastic bag.
How Stored: Refrigerated.

• ***Summary:*** One color photocopy of each of 6 leaflets stapled together brought to Soyinfo Center by Wolfgang R. Heck. 2011. Nov. 25. These foods were intend to be served to foodservice outlets, both business cafeterias [*kantina*] and university dining halls [*mensa*]. Each item has its own leaflet, with the Taifun logo on top, a large photo of the ready dish on a plate in the center, a brief description of the product below that, a list of ingredients, had instructions for preparation. Address: Freiburg, West Germany. Phone: 0761/ 50 6155.

9368. **Product Name:** [Seitan/Tofu Shish Kebab, Presto Tofu with Vegetables].
Foreign Name: Brochette Seitan/Tofou, Presto Tofu Légumes.
Manufacturer's Name: Lima Foods.
Manufacturer's Address: Edgar Gevaertdreef 10, B-9830 Sint-Martens-Latem, Belgium.
Date of Introduction: 1989?
Wt/Vol., Packaging, Price: 2 x 75 gm.
New Product–Documentation: Lima catalogue and price list. 1989.

9369. **Product Name:** [Presto Natural Fresh Tofu].
Foreign Name: Presto Tofu Nature.
Manufacturer's Name: Lima Foods.
Manufacturer's Address: Edgar Gevaertdreef 10, B-9830 Sint-Martens-Latem, Belgium.
Date of Introduction: 1989?
Wt/Vol., Packaging, Price: 250 gm.
New Product–Documentation: Lima catalogue and price list. 1989.

9370. **Product Name:** [Presto Tofu Cheese].
Foreign Name: Presto Tofu Fromage.
Manufacturer's Name: Lima Foods.
Manufacturer's Address: Edgar Gevaertdreef 10, B-9830 Sint-Martens-Latem, Belgium.
Date of Introduction: 1989?
Wt/Vol., Packaging, Price: 2 x 75 gm.
New Product–Documentation: Lima catalogue and price list. 1989.

9371. **Product Name:** [Neuco Tofunaise Salad Dressing (Like Mayonnaise)].
Foreign Name: Neuco Tofunaise Salatcreme.
Manufacturer's Name: Neukoellner Reformwaren GmbH (Subsidiary of Huegli) (Marketer).
Manufacturer's Address: 7660 Radolfzell, West Germany.
Date of Introduction: 1989?
Ingredients: Tofu* (Soybeans, water, calcium sulfate coagulant), cold-pressed soy oil*, corn starch syrup, apple vinegar, mustard, sea salt, thickener (guar seed flour), saffron. * = Organically grown.
Wt/Vol., Packaging, Price: 350 ml jar. Retails for DM 4.50.
How Stored: Shelf stable; refrigerate after opening.
Nutrition: Per 100 gm.: Calories 308, protein 7 gm, carbohydrate 7 gm, fat 28 gm.
New Product–Documentation: Label sent by Anthony Marrese. 1989. 5 by 7.5 by 2.5 inches. Self adhesive. Red, black, yellow, and blue on white. Color illustration shows a large cube of tofu and many small cubes on a plate surrounded by a pitcher of orange juice, an onion, and a bowl of dressing. Neuform certification symbol.

Letter from Bernd Drosihn. 1990. May 10. This company just markets tofu products, they do not make any. Their mother company is Huegli.

9372. **Product Name:** [Neuco Tofu Salad (French-Style, or Peasant Style)].
Foreign Name: Neuco Tofu Salat (Frazoesische Art, Bauerliche Art).
Manufacturer's Name: Neukoellner Reformwaren GmbH (Subsidiary of Huegli) (Marketer).
Manufacturer's Address: 7660 Radolfzell, West Germany.
Date of Introduction: 1989?
Wt/Vol., Packaging, Price: 290 gm jar.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: Letter from Anthony Marrese. 1990. March 22.

Letter from Bernd Drosihn. 1990. May 10. This company just markets tofu products, they do not make any. Their mother company is Huegli.

9373. **Product Name:** [Neuco Tofu Dressing (Herb, Mexican, For All Salads, Italian)].

© Copyright Soyinfo Center 2013

Foreign Name: Neuco Tofu Dressing (Kraeutern, Mexican, Fuer Alle Salate, Italian).
Manufacturer's Name: Neukoellner Reformwaren GmbH (Subsidiary of Huegli) (Marketer).
Manufacturer's Address: 7660 Radolfzell, West Germany.
Date of Introduction: 1989?
Wt/Vol., Packaging, Price: 300 ml jar.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: Letter from Anthony Marrese. 1990. March 22.

Letter from Bernd Drosihn. 1990. May 10. This company just markets tofu products, they do not make any. Their mother company is Huegli.

9374. **Product Name:** [Huegli Tofu Pâté].
Foreign Name: Huegli Tofu Pastete.
Manufacturer's Name: Neukoellner Reformwaren GmbH (Subsidiary of Huegli) (Marketer).
Manufacturer's Address: 7660 Radolfzell, West Germany.
Date of Introduction: 1989?
Ingredients: Incl. tofu.
New Product–Documentation: Letter from Verena Krieger. 1990. July 5. Huegli makes a Tofu Pâté named Tofu Pastete. It is sold only to hotels and restaurants.

9375. **Product Name:** [Nuxo Tofu Salad Dressings or Spreads (Swedish with Beets-Cucumbers-Apples, Hearty with Cucumbers & Onions, Leek-Apple with Bananas & Curry, and Devilish with Spicy Tomatoes and Mushrooms)].
Foreign Name: Nuxo Tofusalat (Schweden, Rustikal, Lauch Apfel, Teuflischer).
Manufacturer's Name: Nuxo-Werke Rothfritz + Co. KG. (Marketer).
Manufacturer's Address: D-2000 Hamburg 54, West Germany.
Date of Introduction: 1989?
Ingredients: Swedish: Vegetable oil, tofu*, red beets, water, onions, aromatic cucumbers, apples, vinegar, sugar, thickeners (carob bean flour and guar seed flour), egg yolk, mustard, mixture of seasonings, sea salt. * = Organically grown.
Wt/Vol., Packaging, Price: 200 gm jar. Retails for DM 3.75.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: Label sent by Anthony Marrese. 1989. Nov. 2.5 inch diameter with two "arms" protruding, 3/4 by 2 inches. White, red, and green on blue. A color photo shows tofu cubes containing bits of vegetables, with sliced beets, apples, onions, and greens.

Leaflet. 1989. Nuxo Tofu Salads. Full-valued food for gourmets/epicures. Healthful and delicious. A color photo on the cover of this elegant and artistic, full-color brochure shows slices of seasoned tofu next to a decorative sprig of sliced fruits and greens, against a blue-green background. The inside shows 4 different jars of the tofu dressing or spread, each with lovely, clever labels.

Talk with Thomas Karas of Soyastern. 1990. March 14. This is presently Nuxo's only tofu product. Their tofu is probably made by Heuschen-Schrouff in the Netherlands or by Linn.

Letter from Anthony Marrese. 1990. March 22. In a phone interview on 18 Dec. 1989 with Mr. Beck, the company's tofu manager, he learned that they do not make any tofu or soymilk. They buy it all from other manufacturers. From Christian Nagel he heard that Nuxo is owned by Vitaquelle, a company with turnover of DM 25 million per year.

Letter from Bernd Drosihn. 1990. May 10. This company just markets tofu and soymilk products, they do not make any.

9376. **Product Name:** [Tofu Spread (Mushroom)].
Foreign Name: Tofu Austrich (Champignon).
Manufacturer's Name: Origina. Made in The Netherlands by Witte Wonder Natural Products B.V.
Manufacturer's Address: Postfach 273, 1900 AG Castricum, Netherlands.
Date of Introduction: 1989?
Ingredients: Tofu*, sunflowerseed oil, apple vinegar, apple concentrate*, pear concentrate*, barley malt syrup*, yeast extract, mushrooms, herbs, sea salt, guar binder. * = Organically grown.
Wt/Vol., Packaging, Price: 200 gm jar. Retails for DM 3.90.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: Label sent by Anthony Marrese. 1989. Nov. 6 by 1.4 inches. Dark green and light green on white. The Witte Wonder logo is an illustration (line drawing) of a tofu maker with hands on hips; another illustration shows three mushrooms. "Uses: Tasty on bread, toast, rice crackers, and in sauces. Refrigerate after opening."

Talk with Sjon Welters. 1990. March 3. This product is made by Witte Wonder and exported by Origina/Terra Foods.

Note: Also sold under the Origina Luna brand are a Fruitcake and a Carob Biscuit, each containing a small amount of Roasted soy flour (Sojakernmehl / farine d'amandes de soja).

9377. **Product Name:** [Tofu Powder].
Foreign Name: Tofû-Pulver.
Manufacturer's Name: Pro Natura.
Manufacturer's Address: Waldstrasse 9, 6120 Mi-Vielbrunn, West Germany. Phone: 0 60 66/1479.
Date of Introduction: 1989?
How Stored: Shelf stable.
New Product–Documentation: Ad in German newspaper. Late 1989. "Pro Natura: *Naturkost aus dem Odenwald.* Homemade tofu, in 30 minutes on the plate, with Pro Natura

© Copyright Soyinfo Center 2013

Tofu Powder. 100% vegetable (*vegetabil*). Also try our Spicy Salt (*Gewuerzsalz*), with sea salt and lots of vegetables. Spreads for breads, salad dressings, tofu salads! Write for our price list."

9378. **Product Name:** [Tofu Salad Dressing (Carrot)].
Foreign Name: Tofu Salat Dressing (Karotten).
Manufacturer's Name: Pro Natura.
Manufacturer's Address: Elisabetenstr. 10, D-6074 Roedermark, West Germany. Phone: 06074-97437.
Date of Introduction: 1989?
Ingredients: Tofu*, water, rice*, vegetable oil, carrots*, apples*, celery*, onions*, lemon juice, herb vinegar, honey, herb salt, yogurt, milk protein, garlic*, seasonings. * = Organically grown [aus kontrolliert biologischem Anbau].
Wt/Vol., Packaging, Price: 220 gm.
How Stored: Refrigerated.
New Product–Documentation: Label sent by Anthony Marrese. 1990. Jan. 7.5 by 2 inches. Purple and red on gray. Logo of the world with tofu written large around the equator. "We recommend Tofu Dressing on baked Tempeh Sticks, Tofu Schnitzel or patties (Bratlingen). For souffles, soups, or sauces. It is especially suited for cold buffets, delicatessen salads, potatoes, noodles, or rice salads. Also great on uncooked or vegetarian salads. Shake before using."

9379. **Product Name:** Free (Dairy-Free Tofu-Based Cheese Alternative) [Jalapeno Jack, Garlic Jack, Cheddar, or Spice].
Manufacturer's Name: Sharon's Finest. Div. of Rose International (Product Developer-Marketer).
Manufacturer's Address: P.O. Box 2687, Petaluma, CA 94953-2687. Phone: 707-778-7721.
Date of Introduction: 1989?
Ingredients: Organic tofu, soy oil, tapioca, irish moss, nutritional yeast, agar-agar, guar gum, sea salt, miso, carob bean gum, kuzu, aloe vera, lecithin, citric acid.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Refrigerated.
Nutrition: Per 1 oz.: Calories 90, protein 2 gm, carbohydrate 6 gm, fat 6 gm, sodium 110 mg, calcium 95 mg.
New Product–Documentation: Letter from Richard Rose. 1987. Sept. 17. This product should be on the market by Oct. 1987. A U.S. patent is pending. Spot in Food Processing. 1987. Oct. Contains added vitamin B-12. For additional information contact Sharon's Finest Div. of Rose International, Petaluma, California. This product is FREE of casein. It "tastes, looks, and melts like real cheese." Spot in Food Distributors Magazine. 1987. Oct.

Medoff. 1987. Whole Life. Sept/Oct. p. 79, 82. "New Soy Cheese Best Yet to Hit Market." Sharon's Finest brand FREE, a new non-dairy cheese made from Rose International, contains no casein. "They've managed to create a soy cheese that is about as close to real dairy cheese as any we've seen to date... Indeed its similarity to real cheese is startling." A U.S. patent is pending on the product's formulation and process. The product's cheese-like qualities result from the interaction of ingredients, rather than from any one in particular. It contains 70% organic tofu, far more than any other soy cheese on the market. It will be marketed as tofu that is like cheese, rather than a soy cheese per se. Article includes Label. "The first Tofu that melts and tastes like real Cheese!"

Spot in Health Foods Business. 1987. Dec. "Rose International has introduced a tofu cheese and nog." The cheese, named Free, "tastes, looks, and melts like real cheese." Contact "Rose International, P.O. Box 2687, Petaluma, CA 94953-2687."

Talk with Richard Rose. 1988 Feb. 15, and 1990 March 1. This product has not yet been put on the market. It is hard to find a company to make an unconventional soy cheese. But he is working and it will eventually be launched.

Talk with Sharon Rose of Sharon's Finest. 1992. Feb. 10. This product is still in limbo, on the back burner. They have developed a good formula, but Richard is still working on minor improvements.

Letter (fax) from Richard Rose. 1994. April 21. This product was never sold commercially, and Richard was never wholly satisfied with it. It was the precursor to VeganRella [first sold commercially in April 1994] "Plus Kraft beat us to the name, legally." It was the precursor to VeganRella. "Although far better than Soymage [the only casein-free soy cheese sold at the time], we felt it should, could, and would be even better with more work."

Note: This cheese, under this name, was never sold commercially.

9380. Svadesha Tofurei. 1989? Svadesha Tofurei [Svadesha Tofu Shop (Brochure)]. Ostpreussenstr. 22, D-8000 Munich 81, West Germany. 4 p. Undated. Illust. 30 cm. [Ger]
• ***Summary:*** The cover shows people's silhouettes in 9 boxes. The inner 2 pages, titled "Our Vegetarian Specialties," list 13 products made by the company. Most contain tofu as the basic ingredient, but seitan, sprouts, and antipasto are also included. On the back are 9 photos showing each of the steps in the shop's tofu making process. Address: Munich, West Germany. Phone: 089 / 93 90 05.

9381. **Product Name:** High-Fiber Tofu.
Manufacturer's Name: Teruya Tofu Factory.
Manufacturer's Address: 1830 Mill St., Wailuku, Maui 96793. Phone: 808-244-5313.
Date of Introduction: 1989?
New Product–Documentation: Talk with Roger Krehl of Paradise Fruit Maui. 1990. July 4. Roger has a fruit stand and fast-food restaurant (not sit down) at 1913 Kihei Rd., Kihei, Maui, Hawaii 96753. It focuses on freshness and health. He has known Walter Teruya for the 12 years that he (Roger)

© Copyright Soyinfo Center 2013

has been in business. He buys tofu from Walter Teruya, who makes a regular and a high-fiber tofu, plus soy beverages. He wholesales only in bulk (5 gallon buckets with water and blocks of tofu in them), plus plastic bags that he supplies. Roger retails the tofu, and also makes it into a number of recipes. Walter is the son of the founder and a very nice guy, with lots of good ideas. He starts work at 2:00 A.M. and is done by noon, then goes to bed. They live right above their shop. The company used to be named Valley Isle Foods Inc. at the same address. Directory Assistance: Walter Teruya's phone: 808-242-7324.

9382. **Product Name:** [Tofu Patties {125 gm} (Tomato-Onion, Sauerkraut-Apple, Mushroom-Leek, Pineapple, Broccoli, Dried Fruit-Muesli)].
Foreign Name: Tofu Roestling (Tofu-Tomaten-Zwiebel, Sauerkraut-Aepfel, Champignon-Lauch, Ananas, Broccoli, Backobst-Muesli).
Manufacturer's Name: Tofukost-Werk TKW GmbH.
Manufacturer's Address: Siemensweg 1, D-4724 Wadersloh-Diestedde, West Germany. Phone: 02520-1300.
Date of Introduction: 1989?
Ingredients: Tofu-Tomato-Onion: Tofu, tomato, onion, whole rolled oats, starch, vegetable mixture, bread crumbs, vegetable protein product, parsley, diced leeks, sea salt.
Wt/Vol., Packaging, Price: 125 gm, frozen patties.
How Stored: Frozen.
New Product–Documentation: Leaflet sent by Anthony Marrese. 1990 March 22. 8.25 by 11.5 inches. Side 1 contains a color photo of each of the 6 patties accompanied by the name and ingredients. Side 2 contains serving suggestions for each. Sold in the frozen food section of stores or distributed to foodservice organizations.

9383. **Product Name:** [Tofu Spice (Mild)].
Foreign Name: Tofuwuerzung (Mild).
Manufacturer's Name: Vitam GmbH.
Manufacturer's Address: Hameln, West Germany.
Date of Introduction: 1989?
Ingredients: Yeast extract, sesame seeds, wheat grits, sea salt, fennel, oregano, tofu powder (Tofupulver).
Wt/Vol., Packaging, Price: 50 gm. Retails for DM 2.15.
New Product–Documentation: This product, which contains a little powdered tofu, is meant to be used as a seasoning for tofu. Label. 1989? 3.25 by 1.5 inches. White on green. "For after-seasoning of fried or grilled tofu. For marinating, dissolve about 15 gm in 1/8 liter water, and use to marinate tofu slices before frying/broiling. Mix with mashed tofu, then fry (braten)." Neuform certification symbol.

9384. Howard, Clare. 1990. Soybean growers target tofu: Farmers see market sprouting for soy-based foods. *Journal Star* (*Peoria, Illinois*). Jan. 2. [1 ref]
• ***Summary:*** The article opens with a photo of the produce manager at a supermarket in East Peoria, Illinois, holding up 2 packs of Mori-Nu Tofu. "Soybeans could achieve a $1 billion niche in the food industry by the mid-1990s, and Illinois farmers stand to make additional inroads in the Asian tofu market." Jim Shearl, manager of the Illinois Crop Improvement Assoc., worked with a team of agricultural researchers at the Univ. of Illinois to develop "Illinois Tofu No. 1," a new soybean variety with all the characteristics ideal for making tofu. These soybeans, which should earn a premium of $0.10 or more per bushel, must be stored and shipped separate from other soybeans. Neither Argentina nor Brazil nor other U.S. states have developed such a bean. Lowell Hill, agricultural economist at the Univ. of Illinois, noted "This is a significant steppingstone. Traditionally farmers produce and then find a market. We've turned that around and determined what the market wants and then set out to produce a soybean to meet that need." Hill said the Koreans import about 300,000 tons of soybeans for tofu manufacturing, representing a $61.7 million market.

9385. *Tribune-Star* (*Terre Haute, Indiana*). 1990. Kyoto [Food Corp. U.S.A.] seeks lot approval. Jan. 3.
• ***Summary:*** "Kyoto Food Corp. U.S.A. is seeking approval of a one-lot commercial subdivision for the $4.5 million tofu plant it plans to build along Johnson Avenue between U.S. 41 and Indiana 63." The company bought 25 acres and wants to subdivide 2.5 acres of that for the production plant. "Negotiations are now under way to get other food-related plants to build on the rest of the 25 acres... The 25,000 square-foot plant, which will be able to produce 2.5 tons of tofu daily, is expected to start with 30 to 50 employees and increase to 100 during the first year. Tofu is a food product made from soybeans. Plans for the new plant were announced in November."

9386. *SoyaScan Notes.* 1990. A plan for realizing tofu's unrealized potential in America (Overview). Jan. 6. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** As we enter the 1990s, the one soyfood in America with the greatest unrealized potential is tofu. Tofu faces five major interrelated problems, each of which has a solution.

1. Tofu has a split image. In mid-1986 a Roper poll asked 2,000 adults nationwide to name "those foods, if any, which you personally hate to eat in any form because you dislike them." Some 35% of the respondents mentioned tofu, making it "America's most hated food," ahead of liver (34%), yogurt (29%), and Brussels sprouts (28%). Yet millions of consumers consider tofu "the perfect protein" and many companies have found that its presence on the label of a product helps sell the product. Solutions: (A) The Soyfoods Association should conduct an in-depth consumer survey to find out who buys tofu, who doesn't, and why some people

© Copyright Soyinfo Center 2013

hate tofu while others love it. (B) Stop negative advertising about tofu.

2. An estimated 80-90% of tofu, which has been classified by the FDA as a potentially hazardous food, is sold at temperatures above 45ºF, in violation of federal guidelines, and many state and local laws. Sour tofu and bacteriologically contaminated tofu remain major problems, contributing to tofu's bad image. Solution: The Soyfoods Association and individual tofu companies should acknowledge that FDA guidelines make good sense for both consumers and industry, and take the initiative in solving these problems. Another outbreak of food poisoning from tofu could devastate the entire industry.

3. According to the U.S. Food and Drug Administration, the common or usual name for tofu is "Soybean Curd." FDA labeling laws state that this term must appear on the front panel of all tofu products. Most U.S. tofu products are presently labeled in violation of this law. The Soyfoods Association should work to have "tofu" recognized as the common or usual name for tofu.

4. Tofu could greatly help the estimated two-thirds of Americans who have high cholesterol levels and/or are overweight, yet many are unaware of it. Solution: The Soyfoods Association should develop a comprehensive, low-cost program to promote tofu generically to mainstream America using news releases, and working with allies such as the American Heart Assoc. and Weight Watchers.

5. Tofu is the only food in America sold floating in water. This is a major constraint in reaching the mainstream market. Solution: Develop and improve alternative forms of packaging.

6. The tofu industry presently lacks the organization, long-term planning, and funding required solve its problems and realize its potential. Solution: Build a strong trade association with broad-based support. Resume the tradition of biannual international conferences. Start annual 1-day regional or state conferences to discuss common problems/needs.

9387. Bhatnagar, P.S. 1990. Re: New developments with soybeans and soyfoods in India. Letter to William Shurtleff at Soyfoods Center, Jan. 15. 2 p. Typed, with signature on letterhead.

• ***Summary:*** National Research Centre for Soybean came into being in Jan. 1987. The entire funding for the institution is from the Government of India through the Indian Council of Agricultural Research. The total sanctioned staff of the institution is 55. However presently only about 37 are employed on the regular staff. They are actively seeking to hire more scientific staff.

The growth rate of soybean are in India has been very high recently, among the highest in the world, along with Argentina and Brazil. However soybean yields in India have remained very low. So the main thrust of the Center's R&D efforts is to increase yields. During the last two years the average nationwide yield has increased by 200 kg/ha to 900 kg/ha. Address: Director, National Research Centre for Soybean, Khandwa Road, Indore 452 011, India. Phone: 65653.

9388. Broom, Maria. 1990. Serulada Spiritual Foundation in Uganda, and soybeans (Interview). *SoyaScan Notes.* Jan. 21. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** This foundation is a spiritual, vegetarian community of about 200+ people who live on the land at Sseesamirimbe, near Masaka, Uganda. They grow a lot of soybeans and eat them as such; they do not do any processing, but are interested in making tofu, soymilk, and tempeh. Maria gave them three Soyfoods Center books on these subjects. She has visited the community twice, for 1 month each time. They have been together for about 15 years, have an African spiritual master named Bambi Baaba, but their spiritual practice resembles East Asian practices. They have a city address too: P.O. Box 5374, Kampala, Uganda.

Maria visited Dr. D. Warren Harrison of Africa Basic Foods. He hopes to contact the community and teach them more about soyfoods. Address: 1728 Linden Ave., Baltimore, Maryland 21217. Phone: 301-462-5370.

9389. Porter, Kelly. 1990. A taste of tofu: Samplers find food different, but delicious. *Tribune-Star* (*Terre Haute, Indiana*). Jan. 21.

• ***Summary:*** "I have to admit I was apprehensive from the start. Curious, but apprehensive. 'You are cordially invited to attend a tofu luncheon.'... The invitation was signed by Mayor P. Pete Chalos. I figured it he was the one doing the asking, the stuff couldn't be all that bad. I was right. Actually, some of the food prepared was downright delicious. Different, but delicious.

"Last week's luncheon was at the Royal Mandarin Restaurant... courtesy of the Alliance for Growth and Progress. Arrangements for the meal at the southside Chinese eatery were made by the Terre Haute Department of Redevelopment...

"'Family Tofu' was my favorite–it was marinated chunks of deep-fried tofu served with rice and all kinds of Chinese vegetables. Tofu tastes a lot like the foods with which it's prepared, but its consistency is difficult to describe. It's a food that's chewy, yet it melts in your mouth at the same time. It's also kind of creamy, but then again it's not.

"The best way to find out is to try it. Kyoto Food Corp. officials are probably hoping you will."

9390. Chikaarashi, Shigeru. Assignor to Nichii Company, Ltd., Osaka, Japan. 1990. Method for manufacturing a foodstuff suitable for soybean milk production. *U.S. Patent*

© Copyright Soyinfo Center 2013

4,895,730. Jan. 23. 4 p. Application filed 28 Oct. 1988. [2 ref]
• ***Summary:*** "The apparatus includes a brushing machine for removing earth matter and earth-born germs deposited on soybean material, a band dryer for adjusting the water content of the soybean material so as to facilitate separation of the material into skin and flesh portions, a skin remover for separating the skin portion from the flesh portion and for dividing the flesh portion of each piece of soybean into four to eight parts, and flat pressing rollers for converting the resulting powdery masses into uniformly distributed flaky masses."

Note: The resulting soy flakes are used by Nichii to make tofu in Japan. The compact tofu plants are located in supermarkets or department stores. Address: Sapporo, Japan.

9391. *Journal of Commerce & Commercial* (*New York, NY*). 1990. Japan's Nichii plans to build U.S. soy plant. Jan. 23.
• ***Summary:*** "Nichii Co., a major supermarket chain operator, plans to build a 500-million-yen soybean-processing plant in the U.S. to produce flaked soybean, starting in October, company officials said Monday. The project is designed to ensure a stable supply of the flakes, the raw materials for 'tofu' and soybean milk, they said. Nichii is now considering a site for the plant, possibly somewhere in Iowa. The company plans to import [to Japan] half the plant's product for the production of tofu and for direct sale at its stores, the officials said."

9392. Morinaga Nutritional Foods. 1990. Morinaga challenges Soyfoods Association to take stand on FDA temperature requirements for tofu products (News release). 5800 South Eastern Ave., Suite 270, Los Angeles, CA 90040. 2 p. Jan. 23. [1 ref]
• ***Summary:*** Morinaga has informed the Association that "it will cancel its membership if this important subject is not addressed. The two-page document, addressed to Gordon Bennett, president of the Soyfoods Association, asks that the organization respond to the May 1984 FDA classification of tofu as 'Potentially Hazardous' food. The FDA's Retail Food Protection Program Information Manual states that all potentially hazardous foods must be maintained at temperatures of 45ºF or below, (or over 140ºF). A copy of the letter to Bennett is attached." Address: Los Angeles, California.

9393. Paino, John. 1990. Microbiological quality of tofu (Interview). *SoyaScan Notes.* Jan. 23. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Nasoya tofu was dropped from one chain only, and the two parties are now negotiating to get it back in. Nasoya refuses to let the chain sell their fresh tofu in the dairy case. Most chains where Nasoya tofu is sold keep their produce cases at 45ºF or below. This chain wants to save energy, so they keep their produce cases at 50-55ºF. Nasoya is trying to convince them to turn down the temperature of their produce case. John feels that most produce cases (except very old ones) had be turned down to 45ºF or below; stores which keep theirs at higher temperatures do so in order to save energy and therefore money. This is the only chain where Nasoya has had a problem from the Potentially Hazardous Food issue.

When tofu sours, the pH drops and this retards bacterial growth. It self-protects. Nasoya's pasteurization (at 180ºF or 82ºC for 75 minutes) kills living bacteria, but some spores survive and, if incubated, the tofu sours. Nasoya has found these to be *Lactobacillus thermophilus,* which are heat resistant sporeformers. Nasoya is now conducting tests with a PhD at the University of Massachusetts (who also sits on the board of the FDA) to present to the FDA in hopes of having pasteurized tofu reclassified as a non-hazardous food which should not be required to be stored at 45ºF or below. Address: President, Nasoya Foods Ltd., Leominster, Massachusetts. Phone: 508-537-0713.

9394. Furusawa, Yôko; Okumura, -; Fujii, Sotetsu. 1990. I. *Tôfu Hyakuchin* saigen. II. Tôzai tôfu ryôri-ten shôyû [I. A new look at the *Tofu Hyakuchin.* II. In praise of tofu restaurants East and West]. *Asahi Gurafu.* Jan. 26. p. 36-49. [Jap]
• ***Summary:*** The first author introduces and prepares a number of recipes from the *Tofu Hyakuchin,* a famous Japanese cookbook written in 1782 and containing one hundred favorite Japanese tofu recipes. Contains many large color photos of tofu in recipes. A different author wrote each section of the article. Address: Japan.

9395. Orbuch, Paul. 1990. Where Wildwood prefers to sell their tofu in a store (Interview). *SoyaScan Notes.* Jan. 30. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Wildwood first had to deal with this question in 1981 when they sold their tofu & miso sandwiches on the counter of natural food stores. Wildwood felt there was no danger of tofu spoilage because of the miso. They battled hard against the state health department. They tested tofu with and without miso around it at the state's labs. The results showed that tofu was clearly a potentially hazardous food. From then on Wildwood insisted that all of their tofu and tofu sandwiches be refrigerated below 45ºF. Paul's experience is that the average temperature in the produce case wet rack is 50ºF.

About 3 years ago Wildwood was at a crossroads. They had three vendor numbers: One of produce, one for grocery/dairy, and one for deli. The buyer explained that this was a mishmash, and asked Paul to choose one. He chose grocery/dairy. Today, in many supermarkets, Wildwood has 18-24 linear feet of space in the dairy case of high-volume supermarkets. In Lafayette, Walnut Creek, and Orinda

© Copyright Soyinfo Center 2013

supermarkets they have only 2 feet. Paul usually goes in and says, "I won't take less than 8 feet." The goal is one facing per product. Paul is aware of the ongoing turf wars between supermarket departments. But note that any product that comes in under produce will have a produce label on it. Wildwood now has a few of its own refrigerated stand-up display cases that contain only Wildwood products, similar to those pioneered by Quong Hop & Co. The cases are located between the produce and dairy departments in the store. The name of the case is "Wildwood Natural Foods" with the company logo. It is not limited to soyfoods, but to natural vegetarian foods–whatever they distribute. But a soy yogurt would probably go next to dairy yogurts in the dairy case. Woody Yeh is still waiting for his cups. Paul thinks Woody's soy yogurt product is excellent. Azumaya sells its Stir Fruity in the produce case because the company's historical relationship is with the produce buyer.

Wildwood is still wrestling with the use of calcium in tofu, and may start to use it, alone or with nigari. Address: Wildwood Natural Foods, 135 Bolinas Rd., Fairfax, California 94930. Phone: 415-459-3919.

9396. Hicks, Russel. 1990. History of Sweet Earth Natural Foods (Interview). *SoyaScan Notes.* Jan. 31. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** This company was founded by Russel Hicks and Valerie Dallas. They started making and selling foods in 1978 in Pacific Grove. Their first product was named "Vegeburger by Sweet Earth," a soybean based burger introduced in 1978. In the early days, they also had a bakery named Sweet Earth Bakery (P.O. Box 22543 in Carmel). They did all kinds of things. After a year Russel and his wife left for 3 years, then they returned. The company's second product, launched in about 1983, was called "Tofu Rice Burger by Sweet Earth." Both products had round labels, so the product name was arched across the top and "Sweet Earth" was arched across the bottom.

In about 1983-84 Sweet Earth started to get serious about selling foods. In 1985 they introduced their fresh "Deli Line," consisting of perishable, healthy fast and natural foods–especially sandwiches, salads, and soups. (The burgers were vacuum packed with a 3-month shelf life.) Included in this line were various foods in which soy was a major ingredient: Lunch Rush Burrito (with tofu and rice, 1985), Tofummus Sandwich (1985; tofu + hummus), Miso-Vegetable-Barley Soup (1985), Oriental Rice Burrito (1987), Oriental Rice & Tofu Salad (made sporadically, 1987) TMT Spread (with tofu, miso, and tahini, 1989; no longer on the market due to short shelf life). and Tofetti Sandwich (1990). They distribute these perishable foods themselves in the Monterey area, then they have independent distributors that carry their deli line to Santa Cruz, the Bay Area, etc. Veggie Paté Sandwich (with Miso; 1990). They also use a lot of soy sauce and tamari as a seasoning. They buy their tofu from Jack in the Beanstalk in Salinas. They are Wildwood's biggest competitor in the Monterey area. "Tofu is definitely the food of the future. It's probably going to take a couple of more years. We've been watching this slow change. Ten years from now tofu will be everywhere and in everything. All kinds of foods will be made from it. We raise our children on tofu and they eat it right out of the carton. To them its second nature. I really like the whole soy end of life. It really feels good. I like developing foods with tofu. The biggest problem with tofu is trying to get a long shelf life in products that use it." Address: 597 Lighthouse Ave., Pacific Grove, California 93950. Phone: 408-375-8673.

9397. Korsak, David de. 1990. Work at Daizou SARL and Le Bol en Bois in France, and at Paul's in England (Interview). *SoyaScan Notes.* Jan. 31. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** David, a Frenchman who speaks excellent English, has a degree in Food Technology. He is now taking a 1-year course to earn a Certificate in Business Studies at Cal State, Hayward. From Aug. to Sept. 1987 he worked on weekends for Daizou, located in an industrial zone just southeast of Paris, France. It was his first experience with tofu, but he did not make tofu himself. He did an internship with them, setting up a computer system. The manager was Takatoshi Hirayama. Daizou had about 8 employees total: 2 full-time tofu makers, 2 men frying tofu, 1 manager, 2 drivers who deliver products, and 1 secretary. The tofu company was formerly in the basement of Le Bol en Bois in Paris. They moved when they outgrew that space. They sell mostly to Japanese (in water pack tubs), and their main outlet is at Le Bol en Bois. They use 100-125 kg/day of soybeans to make about 300-375 kg of tofu. They also sell some vacuum packed tofu, made with organically grown soybeans, to 1-2 health food shops in Paris. One of the company's big problems is employee turnover.

After working at Daizou, from Oct. to Dec. 1987, David worked at Paul's Tofu in England. Paul's had recently won a contest that allowed them to move into a small industrial part in Melton Mobray (a city that was looking for employers), Leicestershire, for several years without paying rent. He renamed the company Soyfoods Ltd. The company made tofu only 3 days a week. He was one of the tofu makers. The company used about 5 x 60 lb bags of soybeans a day to make about 2,400 lb/week of tofu. The other days they made second generation products. This company also had big problems with employee turnover, and was unable to grow.

In the future, he wants to work with tofu in France. He will work as an intern at Wildwood Natural Foods in California from Sept-Dec. 1990, then with Société Soy in France selling their products in England. Address: Hayward State Univ., Hayward, California. Phone: 415-886-0867.

9400. Morinaga Nutritional Foods, Inc. 1990. Our new extra-firm tofu creates quite a stir (Ad). *Natural Foods Merchandiser.* Jan. p. 25.
• ***Summary:*** A full-page color ad shows stir-fried tofu and vegetables in a wok. At the lower right is a color photo of a box of Mori-Nu Extra-Firm Silken Tofu. "Mori-Nu: Tofu for the American taste." Address: 5800 South Eastern Ave., Suite 270, Los Angeles, CA 90040. Phone: 1-800-NOW-TOFU or 310-787-0200.

9401. *Nasoya Newsletter.* 1990. The year of the horse. Jan. p. 1.
• ***Summary:*** This year Nasoya will celebrate the "festive Chinese holiday in its usual traditional manner. Colorful displays, calendars, and recipes will be displayed in supermarket produce sections. Nasoya promotions will be going on in most supermarkets from Maine to Atlanta and as far west as Chicago and St. Louis. Many of the promotions will include tie-ins with other major brands across the country." Address: Leominster, Massachusetts.

9402. *Nasoya Newsletter.* 1990. Nasoya goes recyclable! Jan. p. 3.
• ***Summary:*** "The following information was given to me by The Council for Solid Solutions... * Plastic beverage containers have the second highest 'scrap value' of recyclable materials in packaging–next to aluminum. * Plastic products have already contributed substantially to source reduction in the waste stream by replacing heavier thicker material previously used in packaging and through engineered reductions in the amount of plastic used in containers such as soft drink bottles. * More than 20% of all plastic soft drink containers, over 100 million pounds, are already being recycled into new consumer products and the demand for recycled plastic is growing. 55 million pounds of plastic used in milk containers were recycled in 1987.

Nasoya tofu trays are 100% recyclable. They are made of H.D.P.E. (High Density Polyethylene). The new logo on our package will look like 3 arrows in a triangle with a 2 in the middle, below which is written "HPDE Recyclable Tray." In the future we hope to see recycling drop-off points for plastic in every community, just as there are now for glass and aluminum. For more information contact: The Council for Solid Waste, 125 K Street Suite 400, Washington, DC 20005. Address: Leominster, Massachusetts.

9403. *Natural Foods Merchandiser.* 1990. Soyfoods industry faces changes. Jan. p. 6, 10.
• ***Summary:*** Lawmakers in Maine are being asked by the Soyfoods Assoc. of America (SAA) to exempt soymilk from a ban on non-recyclable aseptic packaging scheduled to take effect on 1 Sept. 1990. SAA feels that soymilk should have the same exemption provided to "milk and dairy-derived products." Less than 1% of all aseptic packages sold in Maine are for soymilk. But some lawmakers reportedly prefer an extension to an exemption in order to encourage manufacturers to create alternative packaging.

Also discusses briefly FDA's classification of tofu as a potentially hazardous food.

9404. **Product Name:** Redwood TofûCheese (With Casein) [Garlic & Parsley, Mexican Pepper (Jalapeno), Mild Red Cheddar, Mild White Cheddar, Mozzarella].
Manufacturer's Name: Redwood Company (The). Div. of J.R.J. Trading Co. (Importer-Marketer-Distributor). Made in America.
Manufacturer's Address: P.O. Box 1298, London N20 0YT, England. Or: 243 The Broadway, Muswell Hill, London, N10, England. Phone: 01-444 7717.
Date of Introduction: 1990. January.
Ingredients: Mild Cheddar: Tofu (Soya curd), soya oil, casein (non fat milk protein), sea salt, citric acid, emulsifier–lecithin, natural flavour, thickener–guar gum, colour–annatto seed.
Wt/Vol., Packaging, Price: 227 gm (8 oz) blocks, vacuum packed. Retails for £1.39 per 8 oz (2/90).
How Stored: Refrigerated.
Nutrition: Per 100 gm.: Calories 290, protein 28 gm, carbohydrate 4 gm, fat 18 gm, cholesterol 0 mg, sodium 0.6 gm, calcium 0.494 gm.
New Product–Documentation: Article published about Feb. 1990. Source unknown. "TofuCheese is launched in UK." "The first ever range of tofu cheeses to be available in the UK has been launched by The Redwood Company, a division of JRJ Trading.

"These healthy cholesterol-free alternatives to dairy cheeses are produced by America's leading manufacturer. They are low in calories (only 282 per 100 gm) and are suitable for those on a vegetarian diet.

Mozzarella is available only in bulk packs.

Talk with exporter, who wishes to remain anonymous. 1990. July 12. The product is now exported, refrigerated, from America.

Label sent by David Greenslade. 1990. July 13. 2.5 inches square. Red, blue, and black on white. "The nutritious low saturate alternative to Mozzarella cheese. A blend of tofu (soya curd), soya oil, and non fat milk protein. Vegetarian. No animal fats. Low in saturates. Lactose free. Rich in calcium."

Spot in SoyaFoods. 1991. Spring. p. 4. "Tofu Cheese." This product is imported to the UK by J.R.J. Trading Co., P.O. Box 1298, London N20 OYT, England. Phone: (071)

© Copyright Soyinfo Center 2013

368 9664. “Tofu Cheese is manufactured by the Redwood Company in the U.S. and is now distributed exclusively by The J.R.J. Trading Company in the UK. An alternative to standard dairy cheese, Tofu Cheese is based on tofu with added soya oil and casein powder. It claims to be very low in saturated fats and high in calcium with 30% less calories and 15% less sodium than standard cheddar cheese. It is lactose and cholesterol free and comes in 227 gm packs. There are 4 flavours...”

Talk with Richard Rose. 1992. May 5. This product is no longer being sold in Europe. The people who were marketing it were Sicilian.

9405. **Product Name:** [Jean de Preneuf Tofu Burgers {Not Fried} (Garlic and Fines Herbes, Tomato and Basil, or With Three Cheeses)].
Foreign Name: Jean de Preneuf Dorés de Soja (Ail et Fines Herbes, Tomate et Basilic, Aux Trois Fromages).
Manufacturer’s Name: SOY (Société Soy).
Manufacturer’s Address: 1 rue du Crêt de la Perdrix, 42400 Saint-Chamond, France. Phone: 77.31.24.42.
Date of Introduction: 1990. January.
Ingredients: With Three Cheeses: Tofu (water, soybeans* 51%), Emmenthaler (Swiss) cheese (8%), Comté cheese (2%), Cheddar cheese (2%), soy sauce*, rolled oats*, sea salt, spices and aromatics. * = Organically grown (issu de l’agriculture biologique).
Wt/Vol., Packaging, Price: 2 x 100 gm round patties vacuum packed in a paperboard box.
How Stored: Refrigerated.
Nutrition: Per 100 gm.: Protein 12.4 gm, fats (lipids) 13.0 gm, total carbohydrates (glucides totaux) 9.6 gm, calories (Kcal) 205 (857 kJoules).
New Product–Documentation: Labels sent by Bernard Storup. 1990. Dec. 26. 3.25 by 4 by 2 inches from front to back. Paperboard box. With three cheeses: Blue, green, orange-brown, and yellow on white. Color photo of 2/3 of a patty on front panel. “Light and balanced. Keep your vitality with Tofu Burgers. For additional information write: Jean de Preneuf, 42 L’Orangerie, 42580 Letrat, France. Store at +4ºC. To use: Remove the protective film with the peel-off tab. Re-heat, either: In a skillet over low heat for 5 minutes. In an oven for 7-10 min. In a microwave oven for 2 minutes. Or steam.”

“Soya, with exceptional natural qualities, rich in protein and free of cholesterol, is finally cultivated in France. We transform tofu, a traditional food that originated in China, so that all of the vitality of soya is protected. Ground with water, cooked, then filtered, the soya is transformed into ‘milk.’ Its coagulation gives us tofu. Easy and quick to prepare, tofu burgers are delicious culinary preparations for serving as a main dish, rich in vegetable proteins (riches en protéines végétales).”

Spot in SoyaFoods. 1991. Spring. p. 5. “Dorés de Soja.” The company name is given as “Jean de Preneuf.”

9406. **Product Name:** [Tofu Dressing (Natural, Dill, Tomato)].
Foreign Name: Tofu Dressing (Natur, Dill, Tomaten).
Manufacturer’s Name: Soyastern Naturkost GmbH.
Manufacturer’s Address: Bochumerstr. 92-104, D-4270 Dorsten, West Germany. Phone: 2362-26801.
Date of Introduction: 1990. January.
New Product–Documentation: Talk with Thomas Karas. 1990. March 14. This line started to be test marketed in Jan. 1990.

9407. **Product Name:** Soyjoy Tofu.
Manufacturer’s Name: Soyfoods Australia Pty. Ltd.
Manufacturer’s Address: 14/2 Paton Place, Manly Vale, NSW 2093, Australia. Phone: (02) 949 7314.
Date of Introduction: 1990. January.
Ingredients: Soybeans, nigari (a natural seawater extract), water.
Wt/Vol., Packaging, Price: 300 gm, with plastic film lid. Retails for $1.60 (12/90).
How Stored: Refrigerated.
New Product–Documentation: Label sent by Tony Cooper. 1991. Jan. 25. 4 by 5 inches. Blue and red on clear plastic film. Logo of 4 soybeans in a circle showing hilums. “Organic. Product of Australia. No cholesterol. No preservatives. Low kilojoules. Low sodium. High quality vegetable protein. Keep refrigerated. After opening, cover with water. Change water every 2nd day.”

Form filled out by Jennifer Young. 1991. March. She bought this business on 1-7-1990 (probably 1 July 1990). The company is Great Australian Tofu Pty Ltd., trading as Soyfoods Pty. Ltd. Phone: 612-949-7314. Fax: 612-588-1502. She does not know if this company was ever related to another tofu manufacturer named Soyfoods Australia, located in Leichhardt, NSW, of which Marcea Newman was once an owner.

Letter from Marcea Newman Weber. 1995. Feb. 12. “I started Soyfoods Australia first and then we changed owners and decided to change names and locations. Soyfoods Australia only made tofu, and now that company is probably The Great Australian Tofu Pty. Ltd., trading as Soyfoods Pty. Ltd.”

9408. Wang, Guangjian; Kuan, S.S.; Francis, O.J.; Ware, G.M.; Carman, A.S. 1990. A simplified HPLC method for the determination of phytoestrogens in soybean and its processed products. *J. of Agricultural and Food Chemistry* 38(1):185-90. Jan. [14 ref]
• ***Summary:*** Discusses the phytoestrogen content of soybeans, defatted soy meal, hard tofu, soft tofu, dry spiced tofu, soy milk skin (p. 189) / soy milk film (p. 188) [yuba], soy milk, soy sauce, hot soy paste, sweet soy paste [miso?],

fermented tofu, soy sprouts (homemade), soy sprouts (grocery), daidzein, genistein, formononetin, coumestrol. Address: Natural Toxins Research Center, Food and Drug Administration, 4298 Elysian Fields Ave., New Orleans, Louisiana 70122.

9409. Jennings, Richard. 1990. Making tofu curds with a chewy, hamburger-like texture (Interview). *SoyaScan Notes.* Feb. 5. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Make tofu in a steam jacketed kettle, break up the curds (either coarse or fine), then boil the curds in the whey. Cook, cool, and you end up with hard, chewy curds. Vacuum tumble the curds (in a cylinder with a vacuum) to make the curds better able to absorb flavors.

Richard wants to get foundation money to find research on this, then license the idea to McDonald's and/or maybe to a chain in Japan. On 1 Aug. 1990 he says that he has been working on this hamburger concept for the past 6 months. He is in the process of having the process patented. "We've got the texture down, so we're working on the color and the flavor now." Address: The Food Plant Inc. & Southwest Soyfoods, 2889 Trades West Rd., Santa Fe, New Mexico 87501. Phone: 505-471-8979.

9410. Gerner, Bob. 1990. Island Spring and White Wave (Interview). *SoyaScan Notes.* Feb. 7. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Island Spring products are no longer available in this area. Rock Island dropped them and took on White Wave instead. White Wave tofu now has a 60-day shelf life. Address: Owner, Berkeley Natural Grocery Co., 1336 Gilman St., Berkeley, California 94706. Phone: 415-526-2456.

9411. Nielsen, Niels C. 1990. The Tofu Center at Purdue University and research on food uses of soybeans (Interview). *SoyaScan Notes.* Feb. 8. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Dr. Nielsen, a member of the USDA Agricultural Research Service, is more a molecular biologist than a soybean breeder. He did post-doctoral research and taught in the biochemistry department at the University of California at Davis. The Tofu Center, established in about Feb. 1989, is a corner of the pilot plant in the Food Science Department at Purdue. They have accumulated the equipment they need to make tofu, and they have had people from Taishi Foods (Taishi Shokuhin Kogyo K.K.) a large tofu manufacturer in Aomori prefecture, Japan come to help them make tofu that meets Japanese quality standards. Funding for the Tofu Center and his closely related Soybean Protein Improvement Project comes from Central Soya, Taishi Foods, Mitsubishi, and state grants to support value added research (about $15,000)–plus his USDA/ARS funds. Total funding is still small.

The purpose of the Center is to ask 2 kinds of questions: (1) What is the effect of the way soybeans are stored while being shipped to Japan on the quality for the final tofu? (2) What kind of very small scale tofu preparation techniques can be used in conjunction with soybean breeding programs designed to incorporate into American soybeans traits that will make them more suited for food uses in the USA and abroad. Nothing has been published by the Tofu Center about its goals and activities except for 1-2 news releases from the Purdue Information Office, plus a little video on that was shown at halftime during a recent Purdue basketball game. Suzanne Nielsen (no relation), a food chemist, is also active in the program. The lipoxygenase program is only a very small part of his lab. The major thrust of the whole program is to try to convert the soybean into an edible food, and to make it more acceptable. This will open a whole new market in the West. Most of the effort is aimed at changing the quality characteristics of soy protein by genetic engineering. The major problems they are looking at now are flavor, protein quality, sedimentation value ratios, and flatulence. Concerning flavor, they have made major advances by removing lipoxygenase. Nielsen believes that this is their most important advance to date and that it may have a major effect in improving the acceptability of soybeans for food use. They used backcrossing into Century soybeans (a good-yielding, maturity group 2, field type soybean) to get near isogenic lines. Soybeans missing the L-2 and L-3 lipoxygenase isozymes make a very bland tofu and soymilk, which is much more acceptable to American taste panels. The absence of L-2 alone gives somewhat less bland products. L-1, which has a high pH optimum, plays little role in generating off flavors. Last year about 4,500 acres of soybeans missing the L-2 isozyme were grown in Indiana. The lines lacking lipoxygenase yield the same as Century, but Century no longer yields nearly as well as the best-yielding varieties today. A lot of private and public soybean breeders are now using this germplasm. Concerning protein quality, they have learned how to change the sulfur amino acid content (to increase methionine) and now they are working to get it into a soybean variety.

Being able to change the ratio of 7S to 11S protein sedimentation values (the S stands for Svedberg, who was an early Swedish researcher on the subject) will be important in adjusting the hardness or softness of tofu. But Japanese tofu makers have no clear idea of what ratio they want. Concerning elimination of flatulence factors, that work is just starting.

The Japanese have learned to like soyfoods made from large-seeded vegetable-type (LSVT) soybeans, but American's have not yet learned that. Tofu makers are most concerned about taste and tofu yield, and they prefer LSVT soybeans for their flavor. But they prefer American soybeans for their swelling characteristics during soaking, and this gives a more uniform product. Many Japanese tofu

© Copyright Soyinfo Center 2013

makers plan to have LSVT soybeans grown in America under special contract, but they cannot do that economically due to (1) their poor yield due to problems of shattering during mechanical harvesting, and (2) their thin seedcoat, which leads to more damage during mechanical harvesting. The way the Japanese have traditionally harvested their soybeans, cutting the plants early by hand and hanging them upside down on racks, shattering is an advantage, allowing the beans to be manually threshed from the pods with a minimum of effort. The thin seedcoat, which does not effect shattering, does aid uniform swelling during soaking. Yet he has heard that new-crop LSVT soybeans do not swell as well as year-old ones. Nielsen feels it may not be necessary to start with a vegetable-type soybean to produce the characteristics that they want.

Nielsen believes that the program on food uses of soybeans at Purdue will expand in the coming years. Soybean breeders will be working much more closely than ever before with food scientists. Other key people are Phil Nelson (the department head in the food science department) and Marv Phillips (the department head in agronomy). There have already been 9-10 PhD theses in his soybean protein improvement program. A few of his graduates now doing important work in the area are Nilgen Tumer (from Turkey) at Monsanto (working with cross protection by putting the proteins of a virus into a plant to immunize it against infection) and Paul Staswick at Univ. of Nebraska (working with vegetative storage proteins).

Keith Smith of the American Soybean Assoc. has been very supportive of Nielsen's work. The early work on preparing the low-lipoxygenase lines and modifying the nutritional quality of the soy protein was all funded by ASA. In Dec. 1989, at a meeting at ASA in St. Louis, he first heard expressed concern with the quantity of protein in soybeans, for the crushing industry. This seems like a major change of attitude. They are not yet very concerned with the various components of the seed and how those effect quality. At the ASA board meeting, he pointed out that in the coming years, especially because of the development of biotechnology, we will be seeing the developing of niche markets. That will fragment the soybean industry as a commodity crop. A value-added market will emerge, and this will be a major change in the market. So ASA needs to establish better quality standards. He is already working with Central Soya toward component pricing. Indiana has a value-added program with grants to specific projects; it does not have a Center as exists in Iowa and Illinois.

Nielsen's father was a plant breeder at the Univ. of Wisconsin. He was personally more interested in biochemistry and chemistry. So it was very apparent to him due to the environment in which he was raised that there was not enough of a connection between the basic sciences and the applied sciences. The problem was to learn how to establish those bridges. He, who does cutting and splicing of DNA, now has developed close ties with the food science department. The real question will turn out to be whether or not we can find new places to put the improved soy proteins, for example as extenders. Central Soya thinks that these new soybeans will increase the use of isolates and concentrates in foods. Gary Felger (Phone: 219-425-5403) is Nielsen's contact at Central Soya. David Swanson, the CEO, is also very interested in this work. Address: Purdue Univ., West Lafayette, Indiana 47907. Phone: 317-494-8057.

9412. Down to Earth Natural Products Ltd. 1990. Some companies start out really small and then... they grow! (Leaflet). Penrose, Auckland, New Zealand. 1 p. Front and back. 30 cm.

• ***Summary:*** "Which is why we've changed our name from Bean Supreme to Down to Earth–to make room for things to come.

Bean Supreme will remain as the brand name for our existing and expanding range of traditional soy products–Tofu and Tempeh.

"Our new company name Down to Earth Natural Products Ltd reflects our intended diversification into new areas of product development and marketing. We believe the name will speak directly to our core group of consumers, those with increasingly convergent interests in health and the environment.

"Our first product launch [soymilk] under our new name is imminent. In fact we'll send you some in the post! Until then–goodbye from Bean Supreme. More to follow from Down to Earth.

"From the directors–Paul and Trevor Johnston and all of the team, best wishes for 1990."

Brands: Bean Supreme, Nice 'n' Healthy, Lite Licks, Bio Farm, Spiral Foods. Address: Box 12082, 140 Hugo Johnson Dr., Penrose, Auckland, New Zealand. Phone: (09) 590 592.

9413. Klaper, Michael. 1990. Personal history, present work, and views (Interview). *VegeScan Notes.* Feb. 12. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Born on 19 July 1947, Dr. Klaper grew up on a dairy farm in Wisconsin. He graduated from the University of Illinois College of Medicine in 1972, was married, then did a 1 year internship followed by 5 years of general practice in British Columbia, Canada. After 3 years of residency retraining in Vancouver he worked for 3 years on an Indian Reservation in Humboldt County, California. Then did 1 year of anaesthesia residency at the Univ. of British Columbia Cardiovascular Service. He worked with surgeons who would ream cholesterol out of patients' arteries. It was basically plumbing problems. How long can you continue to pour bacon grease down the kitchen sink until it clogs the pipes? One day in 1981 an incident changed his life. A Mr. Phillips came in for open heart surgery. The serum in a blood sample Dr. Klaper drew was cloudy like glue–the man

© Copyright Soyinfo Center 2013

had just eaten a hamburger and a milk shake. During the operation, the surgeon pulled long tubes of cholesterol out of the man's arteries, then sewed him up. Michael realized that he was eating the same diet as Mr. Phillips. After the operation the overweight surgeon and staff went to the cafeteria and had that same diet. While Mr. Phillips was in the hospital, no one talked to him about changing his diet. They just asked him to come back for a checkup. Michael felt like he was in a Fellini movie. He decided that instead of putting people to sleep, it was time for him to start waking them up. So in June 1981 he resigned his lucrative position as an anesthesiologist, bought a vegan cookbook (from Gentle World) and followed a vegan diet. His blood pressure fell and he lost a 15-pound inner tube of fat around his waist that he had worn for years. He felt much better. In Oct. 1981, he moved to Gentle World in Florida, opened a clinic in nearby Orlando, and practiced "nutritional medicine" for the next 6 years. He was married a second time. At the clinic he especially liked to see fat patients. A change to a vegan diet worked miracles. Now they were putting "the right fuel in the tank." But he also noticed that in many arthritics, the inflammations in their joints got better, and that the asthma in many asthmatics decreased or disappeared. In the late 1980s he moved to Felton near Santa Cruz, California, and worked with Earthsave Foundation and John Robbins. In early 1990 he moved to Los Angeles to continue this work. He also wrote several books on vegan nutrition.

Today his main work is lecturing about diet and the environment, how America's meat-centered diet is destroying both the earth's ecosystems and our bodies. He advocates changing to a vegan diet and wants people to understand "the true cost of a meat-centered diet." Most of his income now comes from speaking honoraria and sales of his book, none from medicine. He is living with friends in Los Angeles. His favorite periodicals on diet are: McDougall Newsletter, Vegetarian Times, Vegedine, and The Vegan. On ecology: E, and Buzzworm.

Concerning his personal diet: he gets about 600 mg/day of calcium which he thinks is sufficient because his protein intake is also low. For breakfast he has sliced fruit and raisins with apple or orange juice poured over the top. Whole wheat bread with almond butter (and sometimes a fruit puree). Sometimes a scrambled tofu omelet. For lunch: Green salad with yellow or red veggies and tahini dressing (with water and nutritional yeast), vegetable soup, and a sandwich with nut butter or tofu spread (with tahini and shoyu) and/or sprouts. For dinner: Potato or pasta or cooked whole grains (like brown rice), yellow steamed veggies, miso broth often with diced tofu. For snacks he likes almonds and/or raisins. His favorite sweet is Rice Dream [frozen dessert] or fruit. He admires the work of Dr. John McDougall but strongly disagrees with the way he strictly applies the concept of "percentage of calories from fat" in foods, using it to criticize foods such as tofu which actually have very little fat per typical serving.

As of Feb. 1990 Gentle World, a community of 20 people, is selling their land in Florida and moving to Maui. Contact them at Gentle World, P.O. Box U, Paia, Maui, Hawaii 96779. Phone: 808-579-9144. Mr. Waldbaum (Light) is a distant cousin of the Waldbaum family of supermarket fame. They have opened a restaurant named "The Vegan" on Maui and are using lots of soyfoods.

Update: In April 1992 Dr. Klaper announced the foundation of a newly accredited program called the Institute for the Advancement of Nutrition Education and Research, which aims to further physicians' knowledge about nutrition and health. He made the announcement at Natural Products Expo West, during his seminar called Soyfoods and Vegetarianism. As of Jan. 1993 the Institute has conducted two 4-day seminars, mostly for physicians who received Continuing Medical Education (CME) credits. Address: 8843 Pennfield Ave., Northridge, California 91324. Phone: 818-341-0652.

9414. *New York Times.* 1990. Afternoon [Television schedule]. Feb. 13. p. C19.
• ***Summary:*** At 1:30 on Channel 21, the program "Yan Can Cook" features two recipes: (1) Spinach salad with tofu dressing. (2) Braised bean curd.

9415. Smith, Keith J. 1990. American Soybean Association: Recent developments (Interview). *SoyaScan Notes.* Feb. 14. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Dr. Kenneth Bader became ASA's chief executive on 1 Oct. 1976. He worked in Hudson, Iowa, for about 2 years, then he supervised ASA's move to St. Louis from Hudson, Iowa, in Dec. 1978.

ASA now has a research references program. From a database search via Washington University, they obtain and supply to certain researchers and coworkers about 200-250 research references every 3 months, mostly on soybean production.

ASA presently uses these following four terms interchangeably: soybean oil, soy oil, soya oil, and soyoil. Smith thinks that "soy oil" will eventually become the standard; the term "bean" is a negative when used with foods. However "soybean meal" will probably be used in preference to soymeal, primarily because there are soybean meal standards used by the feed trade and NSPA. However, if they eventually propose soybean meal with higher protein content they may call it "soymeal," to distinguish it from 44% meal, since protein is where they have the real advantage.

Concerning component pricing, Smith has spent about a third of his time on this subject during the past year. It is very frustrating. ASA encourages and funds soybean breeders to increase protein and oil levels, and it is almost certain that breeders will be paying increased attention to composition.

© Copyright Soyinfo Center 2013

But whether farmers will ever be officially paid on the basis of protein and oil is highly questionable. Many farmers in the north and northwest will be discounted on the basis of composition today, so they are really being paid on the basis of average component pricing. Smith anticipates that nothing will be done to change soybean trading and marketing rules, but there will be continued pressure on soybean breeders to at least consider composition as they release new varieties. Foreign matter is a major problem in the export markets. USDA's Federal Grain Inspection Service (FGIS) has proposed changing foreign matter requirements over the last several years but U.S. exporters and crushers have effectively opposed this (as well as blending of soybeans), and also oppose component pricing. The Japanese indicate that they are going to start purchasing based on component pricing; this may be a force accelerating pricing. FGIS only has to give information on oil and protein levels if the exporter requests it. In the original proposed ruling it was supposed to go from optional to mandatory in 1991, but the latter provision was deleted. ASA has repeatedly supported component pricing, so that soybeans are traded on their inherent quality characteristics, which is their true value. U.S. soybean crushers go out in early fall and analyze the composition of soybeans from counties in many geographical areas. They buy based on this data, and therefore are already doing a form of component pricing, on the average rather than by the individual load. They may not feel it is worth the extra price of getting the data on each load.

There is a lot of interest in value-added products in Washington, DC, nowadays. But ASA's main market is for soybean meal that becomes meat, milk, and eggs. Every state now has a program on breeding specialty soybeans (as for natto or tofu), and most are very optimistic that the program will benefit their state, but the market will soon get saturated. ASA promotes niche markets and encourages breeders to breed soybeans for those markets. The future of low-lipoxygenase soybeans looks good. The main reason ASA has not done much with the soyfoods market is because it is so small. ASA will support the use of soy proteins as meat extenders (a niche market) as long as the red meat industry doesn't complain too much. In the future, this market could be much more important.

A number of state soybean associations such as Minnesota, North Carolina, South Dakota, and Illinois are promoting soyfoods such as soy ice cream and soynuts within the state in order to get growers involved and increase membership. They have found that in order to sell memberships and develop leadership, farmers have to do something. Farmers like to dip ice cream. ASA is supportive of anything that will increase membership and leadership in the states.

Concerning areas of potential cooperation between ASA and the U.S. soyfoods industry / association, ASA is concerned about the perception of soyfoods and would be interested in cooperating in any way possible to give soyfoods a more positive image, and to put them in the mainstream of consumer attitudes and foods. Talk to Gunnar Lynum, who is in domestic promotion.

ASA probably could put together graphs of membership and funding. He suggests that Soyfoods Center write a letter to Ken Bader, Steve Drake, and Marlyn Jorgensen (ASA President) offering to work with ASA in developing a history of ASA. ASA has a history of ASA that was partially done (by Kent Pellett) while they were still in Hudson. It has been dormant for the past 10 years. It is a low priority and will probably never be published, unless I volunteer to write it.

The next World Soybean Research Conference (WSRC) will probably be held in China (PRC), or Brazil (less likely). In recent years there has been a decrease in the number of people working on soybean utilization. So there is not much new to report at the world conferences. The people on the WSRC continuing committee are mostly soybean production people and breeders. Maybe the soyfoods industry and ASA (Gunnar Lynum, who is mainly into soy oil and industrial uses) could cooperative to have the soyfoods industry better represented in these conference speeches.

ASA will put Soyfoods Center on its news release list. Address: Staff Vice President, Research and Utilization, American Soybean Assoc., P.O. Box 27300, St. Louis, Missouri 63141. Phone: 314-432-1600.

9416. Stromnes, Lonnie. 1990. New developments at White Wave (Interview). *SoyaScan Notes.* Feb. 14. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** It now looks like the White Wave line may get into west coast Safeway supermarkets. Safeway will start them off in the hot regions like Berkeley, San Francisco, Marin, and Santa Cruz–and let them try to prove themselves. In a year or two, there will be more distribution. In late Dec. 1989 White Wave decided to stop having Wildwood Natural Foods distribute their line of tofu and tempeh products; there were too many conflicts of interests. Rock Island, a major California natural foods distributor, picked up the White Wave line on Jan. 5 and distributes it to 120 Safeway stores, as well as to most natural foods stores. When Rock Island took on the White Wave line, Rock Island also dropped the Island Spring and Quong Hop lines (Lonnie had nothing to do with this), and asked White Wave (as part of the deal) to drop 3 other smaller distributors, including Wildwood. With this move, White Wave became Rock Island's leading line of soyfoods products. Lonnie thinks that Island Spring was a headache to Rock Island, the numbers were not there, and maybe some products were late. Rock Island was always very upset with Quong Hop because the latter cherry picked the best accounts in Northern California and delivered everything with their own trucks. Rock Island doesn't like to play second fiddle and pick up the fringe markets. Safeway in California now sells Wildwood, Quong Hop,

© Copyright Soyinfo Center 2013

and Azumaya. White Wave is now on a roll–they are the hot soyfoods company, and they are shooting for the big time. White Wave hopes to at least double sales in 1990 compared with 1989.

Steve Demos is now on the Board of Directors of the Soyfoods Assoc. Address: White Wave, Inc., 14670 Doolittle Dr., San Leandro, California 94577.

9417. Hokanson, J.D. 1990. Inventions with soymilk and tofu (Interview). *SoyaScan Notes.* Feb. 15. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** This 60-year-old man applied for three patents in Nov. 1989; they should be issued by July 1990. 1. For soymilk which has a better taste and takes less time to prepare. The key lies in adding 2-3 tablespoons of Gold Label Brewer's Malt Extract (sold in a 3-4 lb can at many food stores and used by home beer brewers) per cup of dry soybeans to the soymilk at the start of cooking. 2. For an extra firm tofu product named Solein, that is sold with any of five American-style herb-based sauces, and which tastes like steak. 3. For a tofu box, built on the principles of a botanical press, to press the extra firm tofu. Address: 1950 East Cairo, Springfield, Missouri 65802. Phone: 417-864-6074 (8/90) or 800-526-3309 (2/90).

9418. Lukoskie, Luke. 1990. Recent developments at Island Spring, Inc. (Interview). *SoyaScan Notes.* Feb. 17. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Following the split-up with ELCO, Island Spring endured severe financial hardships. "We'd been bleeding profusely from October 1987 until June 1988, at which time we had been able to turn things around. From that time until now we have been in a holding pattern, because we were in such serious debt to ELCO that we had no opportunity for expansion. At the time of the separation (when ELCO unexpectedly demand total control of Island Spring, and Luke refused them), ELCO had demanded that they get all the assets and then Island Spring lease or rent them back. Island Spring had no choice but to accept their terms. To do battle with them would have required Island Spring to declare immediate bankruptcy. So in Oct. 1987 Island Spring began to make $11,000/month payments to ELCO for rent/lease of equipment and as repayment of loans that they had made to Island Spring. Each month the amount of the payment decreases and they will essentially be finished at the end of 1990. Island Spring has retrenched, let go of all of its marketing and sales people (some of whom earned $60,000/year), and is running on a skeleton crew. Luke is doing the tofu curding. "Frankly, I'm having the best time in this business that I've had for 15 years. I'm thoroughly enjoying being in the plant, working with the crew. There's a lot of spirit in there. I'm having fun with the struggle that historically tofu makers have faced to make a good batch every time. We have been able to make enough profit to pay off ELCO because of two things: (1) The employees have agreed to forego wage increases; (2). Yvonne, Suni, and I have worked without wages for 15-16 months."

Island Spring has been able to keep all its major distributors in the Pacific Northwest. Rock Island in California dropped Island Spring and took on White Wave. That did not hurt much because it was a very, very small percentage of Island Spring's business, but it did hurt expansion into the Bay Area. Some Island Spring products are sold in Los Angeles, an even more important market that looks secure. Island Spring has lost its ability to spend money for marketing. But the company has always consciously set its prices above the competition. This has not hurt sales and has helped profits. Some people prefer to buy the high priced product, assuming it is the best quality. They are the premier tofu brand in the Pacific Northwest. Island Spring sales for 1989 were about the same as 1988. One new product is on the drawing boards: A natural foods TV dinner (ready to eat, frozen entree, microwaveable), somewhat like what Legume Inc. did but better tasting. "That is the single category that distributors say they can move all the product we can make. We'd start in the natural foods industry and, as funds are available, expand into supermarkets. This one entree (not a line), which has been ready for years, may be on the market by early fall of 1990. The yogurt, and the tofu in Oscar Meyer sausages are not being actively pursued, though Luke would like eventually to make tofu in Eastern Europe for use in sausages there. He has done some exploratory work in this area. He wonders how much interest there is in Eastern Europe in natural and vegetarian foods. Luke no longer has the drive to be a huge company with $50-100 million a year sales. He is much happier to be a smaller company with a good life now.

As of Nov. 1989 the law changed making it now possible to trademark a name before the product is on the market. This brings U.S. patent and trademark law in accord with most such foreign laws. However the product must be launched within a year or two or the trademark is lost.

Luke has heard that a Japanese trading company [Kyoto Food Corp. USA] is building a $4.5 million tofu plant in Indiana [Terre Haute].

Luke has a video "of extruding tofu out of a 6-inch tube–and its just keeps coming. We could feed soybeans in one end and extrude soybeans out the other. You could obviously put knives on it and cut it into any shapes you want. We could sell tofu in a slightly less solid form in large bulk quantities, even in tank car quantities. But it only makes sense with large scale production, since it is capital intensive and requires a highly trained person to run it."

Update: Dec. 1991. Luke and Suni now have 3 children. He manages Island Spring, sells real estate for Keywest Realty part-time, keeps his five rentals running and rented, services the Island Spring Water Co. customers, keeps his two cars and an old pick-up truck running, tends the

© Copyright Soyinfo Center 2013

vegetable garden, sits on the Community Council and two Island-wide water study committees, spends time with his family, coaches his daughter Sulu's 8th grade basketball team, and spends plenty of time alone in the woods. He is "addicted to Compuserve." Address: P.O. Box 747, Vashon, Washington 98070. Phone: 206-622-6448.

9419. Lukoskie, Luke. 1990. Thoughts on Pacific Foods of Oregon and their soymilk (Interview). *SoyaScan Notes.* Feb. 17. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** One of ELCO's companies is called Pacific Foods of Oregon, which owns the soyfoods plant and warehouse in Tualatin, Oregon. The equipment in that company came from the Island Spring breakup. Naturally Northwest was a label that was owned by a company named Sunny Jim in Seattle, which was purchased by ELCO. It has folded. The "Naturally Northwest" brand was going to be on the label of the Sunny Jim line for the natural foods industry. I was then absorbed as the label for the natural foods industry by Pacific Foods of Oregon. They recently have tended to blend the name and call it Pacific Foods / Naturally Northwest. He has heard that there is a soymilk with a Pacific Foods brand. They do have a 1-quart plain soymilk that is sold in the Pacific Northwest, distributed by NutriSource. It is sold in most natural food stores, and it tastes good. But they "practically gave it away to get distribution. And it appeared that sales quickly leveled off."

Luke has reports indicating that they are trying to sell their concentrated soybase to small tofu makers. The tofu made from the base was found to have a poor flavor. They have tried to sell their soybase to various friends of Luke's who make second generation soyfoods around the USA. Their sales people talk as if they are just an arm of Island Spring with 15 years of history. Not only do they misrepresent themselves, they are not being successful in selling to small companies. "There aren't really many big people to approach who are interested." Luke has heard that Pacific Foods has a soy cheese product (with casein) out but he hasn't seen it. They have also announced (at least to a tofu maker in Takoma) that they are planning to launch an organic tofu product in 6 months. It will probably not be aseptically packaged.

Earlier joint efforts to sell tofu to 20 major food corporations (including to Gerber for use in baby foods) were not successful. There was little interest and the demand was too small. These companies would rather talk to ADM or Ralston Purina. Alfa-Laval has an "Achilles" aseptic packaging system that allows packaging in pallet-size containers.

There was a rented ultrafiltration unit at Pacific Foods of Oregon, but Luke does not know if they have ever hooked it up.

Luke does not think Pacific Foods could be selling enough soyfoods to pay their bills and interest. Luke's debt payments may be their biggest source of income! He thinks there is a very strong likelihood that Pacific Foods soyfoods venture will fail and they will then sell their STS/DTD system on the open market at a low price. Luke would be interested in buying back his equipment at $0.10 on the dollar. Address: P.O. Box 747, Vashon, Washington 98070.

9420. *Yomiuri Shinbun* (*Yomiuri Daily News, Tokyo, English ed.*). 1990. Zambian learns of tricks of tofu trade. Feb. 19. [Eng]
• ***Summary:*** A Zambian man, Stanislas Chisembe, a 38-year-old veterinarian is studying tofu production at a tofu shop owned by Yasuo Tominari in Matsumoto city, Nagano prefecture. He wants to teach the process to his countrymen. In Zambia, where farmers have recently begun to cultivate soybeans, most are exported as cooking oil and feed. He thinks tofu can be mixed with traditional Zambian food, based on cassava and corn, to help relieve protein deficiencies and infant mortality. Chisembe first learned of tofu when he visited Japan 2 years ago. This is the second in a series of articles on an international cultural exchange program called "30 Days in Japan."

"Now he has returned as one of 15 foreigners on a 30-day program in which participants pursue individual projects in Japan. He plans to use his new knowledge about the protein-rich soybean to alleviate malnutrition in Zambia.

"When he returns home, Chisembe will rely on television and other methods to teach tofu-making. The Japan International Cooperation Agency, based in Tokyo, has promised to help him encourage the continued cultivation of soybeans in Zambia...

"At an agricultural center in Toyoshina-machi, Nagano-ken, housewives helped him perfect his technique for making tofu and miso by hand." Address: Tokyo, Japan.

9421. Hom, Ken. 1990. Homecoming: Culinary fireworks go off when the author visits his ancestral village. *New York Times.* Feb. 25. p. SM45.
• ***Summary:*** When he was a small boy in Chicago, Illinois, the writer's mother began what became a repeated chant: we must return one day to the village of our ancestors (*gu xiang*).

In 1978 he set off with his mother to the village of Kaiping in the Foshan region of Guangdong Province. When they arrived, they were greeted by a large crowd of villagers and a banquet of 11 courses. "Most of the food was home-grown, and all of the relatives–20 members of the extended family–had helped in the preparation. Chinese water spinach, freshly plucked from the garden was cooked with fermented bean curd."

Recipes include: Hongshao doufu (Red-cooked bean curd family style; with "1 pound firm bean curd," 2 tablespoons hoisin sauce, 1 tablespoon light soy sauce, and 1 tablespoon dark soy sauce").

© Copyright Soyinfo Center 2013

Chaodoya (Stir-fried soybean sprouts with pork; with "1½ pounds soybean sprouts or mungbean sprouts").

9422. Ershow, A.G.; Gao, Y.I.; Zheng, W.; Blot, W.J. 1990. Diet effects on lung cancer risk of Chinese men and women (Abstract). *FASEB Journal* 4(4):A1041 (Abst. #4501). Feb. 28.
• ***Summary:*** In a case-control study in China that included 1,387 cases and 1,494 controls, the authors reported reverse associations of legumes, fruit, staple, grains, and animal protein with lung cancer risk.

Note: Not stated in the author's abstract, but mentioned in a personal communication (M. Messina, V. Persky, et al., 1994, p. 124) was a significant protective effect of tofu in both men and women. Address: National Cancer Inst., Bethesda, Maryland 20892 and Shanghai Cancer Inst., Shanghai, China.

9423. Achter-Theiss, Elke. 1990. Speise statt Futter [Food instead fodder]. *Oeko-Test Magazin* (*Frankfurt, West Germany*). Feb. p. 57-59. [Ger]
• ***Summary:*** Discusses whole dry soybeans, soybean meal, soy sauce, soymilk, tofu and silken tofu, tempeh, and miso.

9424. *AGE-Bulletin* (*Zurich, Switzerland*). 1990. Missbrauchte Sojabohne [The misused soybean]. Feb. p. 8-11. [Ger]
• ***Summary:*** AGE stands for Aktion gesuender essen (Action for Healthy Eating). Discusses many good food uses, including tofu (made by Tofurei Engel). Is critical of Yasoja, an unfermented soy cheese made by Baer using soy protein isolates.

9425. **Product Name:** [Sofit Tofu Burger (Regular, With Cauliflower, With Red Beets, With Cucumbers, With Beans)].
Foreign Name: Sofit Tofu-Burger (Regular, mit Blumenkohl, mit Rote Bete, mit Gurke, Tofu-Beans-Burger).
Manufacturer's Name: Avo Feinkost GmbH.
Manufacturer's Address: Postfach 1167, D-4500 Osnabrueck, West Germany. Phone: 05406/5080.
Date of Introduction: 1990. February.
Ingredients: Regular: Tofu (water, soybeans), vegetable oil, onions, egg whites (albumen), spice mixture, herbs, sea salt, yeast extract, vegetable thickener.
Wt/Vol., Packaging, Price: 1,000 gm sterile vacuum pack (Sterildarm).
How Stored: Shelf stable; refrigerate after opening.
Nutrition: Per 100 gm.: Protein 9.9 gm, fat 28.0 gm, usable carbohydrates 1.7 gm, calories 299.
New Product–Documentation: Avo catalog. 1990. Feb. "Sofit: Tofu–Vollwertköstlichkeiten: Leicht, gesund–mit viel Geschmack" [Sofit: Tofu High-Quality Delicacies: Light, healthful, and with lots of taste].

9426. Avo Feinkost GmbH. 1990. Sofit: Tofu–Vollwertkoestlichkeiten: Leicht, gesund–mit viel Geschmack [Sofit: Tofu High-Quality Delicacies: Light, healthful, and with lots of taste]. Postfach 1167, D-4500 Osnabrueck, West Germany. Catalog. [Ger]
• ***Summary:*** The first 7 pages of this attractive brochure describe what tofu is, how it is made, and its many benefits. A photo on the cover shows 7 meatlike products in the Sofit line. Tofu is free of cholesterol, lactose, milk protein (casein), gluten, and sugar. Tofu is rich in protein, minerals and vitamins, unsaturated fatty acids, linoleic acid (Linolsäure), and natural lecithin. The last 6 pages list, then describe in detail (giving all ingredients and a nutritional analysis) 21 tofu products made by Avo, divided into the following categories: For the cheese counter (2 types of fresh seasoned tofu), Roasted/fried foods (2 tofu bratwurst sausages and 5 tofu burgers), Wurst spreads (4), Pastete-type cold cuts (4), and for the salad bar (4 tofu salads). "The soybeans, which are used in making our products, are organically grown."

Note: Soyfoods Center received a phone call from a relative of Avo on 6 June 1988, stating that Avo is a spice company that wants to import organic soybeans from America for their tofu based meat analogs. They will be launched soon.

Letter from Xavier Karis in Italy. 1990. June 15. "I am enclosing a catalog for a line named Sofit. They started out in Germany about 1-2 months ago. They managed to get their products sold in a supermarket chain called Tengelmann." Address: Osnabrueck, West Germany. Phone: 05406/5080.

9427. **Product Name:** [Sofit Tofu Salad (El Paso-Style, Singapore-Style, With Peas and Carrots)].
Foreign Name: Sofit Tofu-Salat (El Paso, Singapur, Erbsen + Karotten).
Manufacturer's Name: Avo Feinkost GmbH.
Manufacturer's Address: Postfach 1167, D-4500 Osnabrueck, West Germany. Phone: 05406/5080.
Date of Introduction: 1990. February.
Ingredients: El Paso: Tofu (water, soybeans), vegetable oil, corn, paprika, kidney beans, leek, apple juice concentrate, apple vinegar, prepared mustard, sea salt, egg white (albumen), orange juice, spice mixture, yeast extract, smoke.
Wt/Vol., Packaging, Price: 1,000 gm foil shell (Folienschale).
How Stored: Shelf stable; refrigerate after opening.
Nutrition: Per 100 gm.: Protein 6.3 gm, fat 18.3 gm, usable carbohydrates 11.3 gm, calories 236.
New Product–Documentation: Avo catalog. 1990. Feb. "Sofit: Tofu–Vollwertköstlichkeiten: Leicht, gesund–mit viel Geschmack" [Sofit: Tofu High-Quality Delicacies: Light, healthful, and with lots of taste].

for increasing soybean production in India. *NRCS Technical Bulletin* (*Indore, India*) No. 1. 54 p. Feb. Illust. 25 cm.
• ***Summary:*** Contents: Foreword I, by M.V. Rao. Foreword II, by R.S. Paroda. Preface, by P.S. Bhatnagar. 1. Introduction, by P.S. Bhatnagar. 2. Production and productivity constraint analysis, by P.S. Bhatnagar and S.P. Tiwari. 3. Augmenting soybean production, by P.S. Bhatnagar and S.P. Tiwari. 4. Production technology, by S.P. Tiwari and P.S. Bhatnagar. 5. Soybean seed production, by P.S. Bhatnagar. 6. Major diseases of soybean, by A.K. Shukla. 7. Insect-pests of soybean, by A.N. Sharma. 8. Soybean utilization, by Nawab Ali and P.S. Bhatnagar. 9. Improved agricultural implements for soybean cultivation, by N.S.L. Srivastava.

The chapter on soybean utilization discusses soypaneer (tofu, with a description of how to make tofu at home), defatted soyflour, fullfat soyflour, and how to fortify wheat flour with soya in villages by mixing 10% clean soybeans with the wheat before it is ground into flour by a burr mill. Address: National Research Centre for Soybean (NRCS, ICAR), Khandawa Rd., Indore 452 001, Madhya Pradesh, India.

9434. **Product Name:** [Tofu with Okara].
Foreign Name: Okara-Tofu.
Manufacturer's Name: Geestland.
Manufacturer's Address: Bremerhaven am Fischbeinhof 1, D-2850 Bremerhaven, West Germany. Phone: (0471) 2 60 20.
Date of Introduction: 1990. February.
How Stored: Refrigerated.
New Product–Documentation: Talk with founder and present owner of Geestland, Paul E. Bremer. 1990. April 25. Okara Tofu was introduced in Feb. 1990.

9435. Karta, Susani K. 1990. The market prospective for tempe in the year 2000. In: Hermana, Mien K.M.S. Mahmud, and Darwin Karyadi, eds. 1990. Second Asian Symposium on Non-Salted Soybean Fermentation. Bogor, Indonesia: Nutrition Research and Development Centre. vii + 116 p. See p. 94-104. Held 13-15 Feb. 1990 in Jakarta, Indonesia. 23 cm. [11 ref. Eng]
• ***Summary:*** A very interesting paper. Contents: Introduction. Market situation for tempe in Indonesia. Health and nutritional significance of tempe. Tempe for weaning food. Constraints and trends in the market development of tempe. Recommended guidelines and strategies. Ideas for the diversification of tempe utilization (Tempe as a food ingredient, new tempe food opportunities).

Tempe "is a key protein source in the rice-diet of the people of Indonesia. It is consumed by millions of people of various ages and socio-economic status. It has gained popularity in the Netherlands, Japan, Malaysia, Singapore and other areas where Indonesians have settled. It has also slowly been making its way into the American diet, particularly, in the vegetarian, cholesterol-free and low-fat food product markets."

"Indonesia with a population of 177 million people (in 1988) and an annual population growth rate of 2%, is the largest tempe producer in the world and has the largest soyfood market in the region. In 1983, Indonesians consumed about 0.9 million MT [metric tons] of soybeans as food, which increased to about 1.5 million MT in 1988 (Table 1). About 50 percent of the total soybeans consumed was in the form of tempe, 40% as tofu and the remaining 10% was used for making soy sauce and tauco (a fermented whole soybean condiment). In 1988, the estimated soybean consumption for tempe was around 764,000 MT which amounted to an average per capita consumption of 6.45 kg of tempe (equivalent to 4.3 kg soybeans). In the past five years the consumption of soyfood has increased by an average of 10% annually."

"Acute diarrheal disease is one of the leading causes of childhood mortality and morbidity in developing countries and is a major contributor of malnutrition. Approximately 25% of the growth differential between children in selected developing countries can be explained by diarrhea. The mortality and morbidity data from a total of 193 surveys carried out in 49 countries since 1981 by WHO (1986) indicate that, on average, a child under 5 years of age suffer 3.5 episodes of diarrhea per year and that about one-third of deaths in this age group are diarrhea associated.

"Investigations worldwide have found diarrhea incidence peaking between the ages of 6 months to 3 years."

Tables: (1) Indonesian soybean production, imports, and consumption as food, 1983-1988. Soybean production increased from 536,000 tonnes (metric tons) in 1983 to 1,179,000 tonnes in 1988–more than double. Soybean imports, which were 391,000 tonnes in 1983, rose to a peak of 400,000 tonnes in 1984, then decreased to 350,000 tonnes in 1988. Consumption of soybeans as food increased from 927,000 tonnes in 1983 to 1,528,000 tonnes in 1988. Per-capita consumption figures are not given. Source: ASA estimates and BULOG statistics. (2) Nutritional composition of tempe (100 gm edible portion). (3) The essential amino-acid composition of tempe compared with the FAO/WHO reference pattern (expressed in milligrams per gram of nitrogen). (4) Fatty acids in soy tempe. (5) Global and regional population in 1980 and estimated number (millions) and distribution of diarrheal diseases. (6) Household Health Survey illness data by different age groups in Indonesia. (7) Potential demand for tempe flour in weaning food in the year 2000, Indonesia. (8) Demographic estimates for Asian developing countries. (9) Estimated number (millions) of children under age 5 in Asian developing countries. (10) Projected potential use of tempe flour in weaning food in Asian developing countries in the year 2010. Address: American Soybean Assoc., Singapore.

9436. **Product Name:** Herb Tofu.
Manufacturer's Name: Kaslo Soyfoods. Renamed Silverking Soyafoods in Oct. 1990.
Manufacturer's Address: Box 933, Kaslo, BC, V0G 1M0, Canada. Phone: 604-353-7726.
Date of Introduction: 1990. February.
Ingredients: Soymilk, coagulant, garlic, basil, dill, chives, parsley, sometimes a little tarragon (fresh or dried).
Wt/Vol., Packaging, Price: Bulk.
How Stored: Refrigerated.
New Product–Documentation: Talk with Greg Lundh, owner. 1990. Oct. 20. He started making this product in Feb. 1990. The company name at that time was Kaslo Soyfoods. In Oct. 1990 he changed the company name to Silverking Soyafoods and moved to Silverking Group, Box #20, Nelson, BC V1L 1C9, Canada. He uses Corsoy or Vinton soybeans, usually certified organic. He buys some of his soybeans from Sunrise; brokers will not deal with his company because it is too small. The herbs listed above are added to the soymilk before coagulation. The only organic soybeans grown in Canada are grown in Ontario and they are all bought up by a big tofu maker in Toronto. He has no labels for any of his products. They are all sold bulk, to avoid packaging. 50% of all his products are sold door to door in homes, and 50% are sold in bulk pails to stores.

9437. Kelley, Bill. 1990. Little big men: Good things often come from small packaged good companies. *Food & Beverage Marketing.* Feb. p. 12-13.
• ***Summary:*** This major cover story, with a photo of Morinaga's national sales manager Art Mio against a background of 76 packs of Mori-Nu Tofu, starts its profile of four smaller but successful food companies with a section titled "Bean curd for the masses."

"Art Mio doesn't have an easy job. He has to convince Americans to try tofu. 'It has a tremendous negative image,' says the national sales manager for Morinaga Nutritional Foods, marketer of Mori-Nu tofu. 'People who haven't even tried it think they don't like it.'"... Morinaga does roughly $7 million in sales, says Mio. "Like other tofu marketers, Mori-Nu positions its product as a health food... The only problem is its taste. When fresh, it doesn't have much of one. But, says Mio, it is often bought spoiled and tastes sour. 'Consumers get inconsistent quality. They eat some, it's bad, and they run to the sink and spit it out.' Tofu often spoils because it is improperly refrigerated... While most consumers know tofu as the white, blobby stuff floating in a milky liquid in the supermarket's deli section, Mori-Nu has elevated the oriental bean curd to packaged good status in attractive boxes and displays. Along with offering a longer shelf life, each package contains a recipe for the product. 'Few people eat tofu plain,' says Mio. 'We position it as a healthy ingredient'...

"The package also invites customers to join the company's 'Healthy Life' club... So far, 10,000 people have taken Mori-Nu up on the offer... 'Our strategy is to get people to use tofu as many ways as they can...

"Recently, the company began marketing its tofu through the Diet Center, a chain of weight-loss centers with more than 2,400 stores across the country. 'That has been doing particularly well,' he says. In addition, the company's tofu was mentioned in 40 recipes in a cookbook sold through the centers."

Note: In Sept. 1990, Art Mio told the *Los Angeles Times* that Mori-Nu's sales for last year were $5 million.

9438. Morinaga Milk Industry Co., Ltd. 1990. [Human health research for the 21st century]. Tokyo, Japan. 12 p. [Jap; eng]
• ***Summary:*** This attractive booklet, written in both Japanese and English (but with no Japanese title), and containing many color photos, describes Morinaga's new state-of-the-art Research and Information and Research Center, opened in late 1989 on the outskirts of Tokyo. It evens contains a gym and tennis courts. The center contains the following sections, each of which is described: Food research and development laboratory, Nutritional science laboratory, Biochemical research laboratory, Analytical research laboratory, Product evaluation center, Management information systems department. In Feb. 1990 Morinaga Nutritional Foods in Los Angeles issued a news release about the new facility. "Mori-Nu Tofu's safety, convenience, and consistent quality are backed by years of Morinaga's food science know-how, and not just words. No other tofu company comes close."

Note: Art Mio (2/90) thinks that it cost about $10 million to build this lab. Address: Tokyo, Japan.

9439. Nomura, Abraham; Grove, J.S.; Stemmermann, G.N.; Severson, R.K. 1990. A prospective study of stomach cancer and its relation to diet, cigarettes, and alcohol consumption. *Cancer Research* 50(3):627-31. Feb. [45 ref]
• ***Summary:*** In this cohort study, the authors did not find a significant association between consumption of miso soup or tofu and gastric cancer risk among 7,990 American men of Japanese ancestry in Hawaii, although a trend toward a protective effect of tofu was present. Address: Japan-Hawaii Cancer Study, Kuakini Medical Center, Honolulu, Hawaii 96817.

9440. **Product Name:** Sharon's Finest Tofu-Rella (Tofu-Based Cheese Alternative with Casein) [Mozzarella Style, Garlic-Herb Style, and Cheddar Style].
Manufacturer's Name: Sharon's Finest. Div. of Rose International (Product Developer-Marketer).
Manufacturer's Address: P.O. Box 5020, Santa Rosa, CA 95402-5020. Phone: 707-576-7050.
Date of Introduction: 1990. February.

© Copyright Soyinfo Center 2013

Ingredients: Garlic-Herb style: Organic tofu (water, organically-grown soybeans+, calcium sulfate coagulant), soy oil, casein*, salt, garlic, citric acid, herbs, lecithin, natural flavor, guar gum. *Casein is the protein found in nonfat milk. It is a high-quality protein free of cholesterol and rennet, and is what allows this tofu product to be so similar to cheese. + Organic in accordance with Cal. H&S Code 26569.11. Diabetic exchange: 1 medium-fat meat. Conforms to the reducing and maintenance diet. Contains 0.02% lactose.
Wt/Vol., Packaging, Price: 8 oz blocks, plastic wrapped.
How Stored: Refrigerated or frozen.
Nutrition: Per 1 oz.: Calories 80, protein 8 gm, carbohydrates 1 gm, fat 5 gm, sodium 170 mg, calcium 140 mg, cholesterol 0 mg.
New Product–Documentation: Labels sent by Sharon's Finest. 1990. March 1. 4 inches square. Self adhesive. One label each for front and back of package. Black and one other color on white. Illustration of two bamboo stalks with leaves. The feeling of the label is one of elegant simplicity. The front panel states: "Made with organic tofu. No cholesterol. Low in saturated fat." The back panel reads: "Thank you for buying Tofu-Rella, the delicious natural cheese alternative! Years ago I developed Tofu-Rella for my friends who wanted to cut down on calories, saturated fat, and cholesterol to improve their health and well-being, but still missed eating cheese.

"Since it's made for my friends, I use only the finest ingredients available, including Organic Tofu, and back it with a satisfaction guarantee [see below]. Also, we happily contribute 5% of the profits from Tofu-Rella to groups committed to saving the world's rainforests. So every purchase you make brings us all a step closer to healing our planet.

"I'm sure you will find Tofu-Rella great in any recipe calling for cheese. If you have any questions, I invite you to call or write me. We want to know what you think! If you want free recipes and health information, please send a #10 SASE." Warmly Yours, Sharon."

"Your satisfaction is guaranteed! If for any reason you are dissatisfied with Tofu-Rella, please send us the plastic package and a note explaining the problem. We'll gladly refund your money."

A table shows that compared with Cheddar cheese, Tofu-Rella contains only 71% as many calories, 56% as much fat, 13% as much saturated fat, and no cholesterol compared to 30 mg per ounce.

Talk with Richard Rose. 1990. March 1. The first of these new products was introduced in Feb. 1990. The product still uses spray-dried tofu, but now it is made from organically grown soybeans. It is ironic that Richard Rose is allergic to casein and so is unable to taste his most successful soy product.

9441. **Product Name:** [Tofu, and Tempeh].
Foreign Name: Tofu, Tempeh.
Manufacturer's Name: Soy & Rice.
Manufacturer's Address: Via A. Canale 8/c, 10078 Venaria Reale (TO), Italy. Phone: 011-402-0380.
Date of Introduction: 1990. February.
Ingredients: Tempeh: Soya, water, Rhizopus oligosporus.
How Stored: Refrigerated.
New Product–Documentation: Letter and Label for Tempeh sent by Bosco Franca and Garafola Carmelo of Soy & Rice. 1992. Feb. 2.75 by 4 inches. Black on white. Self adhesive. The logo is that developed by Mitoku which states in Japanese characters *"I Shoku Dô Gen"* (Medicine and food come from the same source, or Your food is your best medicine). Store at 4ºC [39.2ºF]. The company began to make these products in about Feb. 1990. They now make 40 kg/week of tempeh.

9442. **Product Name:** Soyco America Style Singles, or Swiss Style Singles.
Manufacturer's Name: Soyco Foods. Div. of Galaxy Cheese Co.
Manufacturer's Address: P.O. Box 5181, New Castle, PA 16105. Phone: 800-441-9419.
Date of Introduction: 1990. February.
Wt/Vol., Packaging, Price: 8 single slices, 6 oz.
How Stored: Refrigerated.
Nutrition: Per 3/4 oz slice: Caloris 60, protein 5 gm, carbohydrates < 1 gm, fats 4 gm, sodium 210 mg.
New Product–Documentation: Ad in Natural Foods Merchandiser. 1990. Feb. p. 64. Ad shows Labels. America Style is Orange, green, and black on white. Swiss Style is Blue, green, and black on white. "No cholesterol. No preservatives. 100% natural."

9443. Soyco Foods. 1990. Introducing Soyco Slices: The number 1 brand introduces the number 1 seller in the cheese category (Ad). *Natural Foods Merchandiser.* Feb. p. 64.
• ***Summary:*** Photos in this full-page color ad show a head-on view of Soyco American Style Singles and Swiss Style Singles, with two halves of a grilled cheese sandwich. "Finally–singles. Soyco Foods, the leader in soy cheese technology, announces the introduction of the only individually wrapped slice available to the health food industry." New Soyco Singles are made with organic tofu, individually wrapped slices, featuring new labeling. Address: P.O. Box 5181, New Castle, Pennsylvania 16105. Phone: 800-441-9419.

9444. **Product Name:** VitaLite Tofu.
Manufacturer's Name: VitaLite Foods.
Manufacturer's Address: P.O. Box 10, Waynesfield, OH 45896. Phone: 419-568-8638.
Date of Introduction: 1990. February.

© Copyright Soyinfo Center 2013

How Stored: Refrigerated.
New Product–Documentation: Talk with Charles Meeker of VitaLite Foods. 1992. Feb. 27. This company is owned by Brenda Kitchem, who is actively involved in its daily operations. This product was launched in Feb. 1990. At the time they also made Cleveland Tofu, the name of which they purchased from Brooks Jones of Cleveland Tofu Co.

9445. **Product Name:** Pattie Perfect (Beef-Tofu-Okara Pattie).
Manufacturer's Name: VitaLite Foods.
Manufacturer's Address: P.O. Box 10, Waynesfield, OH 45896. Phone: 419-568-8638.
Date of Introduction: 1990. February.
Ingredients: Incl. beef, tofu, and okara.
New Product–Documentation: Talk with Charles Meeker of VitaLite Foods. 1992. Feb. 27. This company is owned by Brenda Kitchem, who is actively involved in its daily operations. This product was launched in Feb. 1990. It took him 8-10 months to get USDA approval to sell this product in interstate commerce since it contains meat–which could spoil. The product contains 65% by weight of lean trim meat and 35% by weight of tofu + okara. They process and flavor the tofu (made with organic soybeans) using a special process. The flavorings are all natural, and no colorings are used. The product is then flash-frozen for shelf life. It looks and tastes just like pure meat and after cooking it tastes like old-fashioned meat that has been butchered and ground immediately. The shelf life of this product far exceeds the shelf life of its all-meat counterpart. The USDA required him to state, immediately beneath the product name, "A beef, tofu and okhara product." The company is growing by leaps and bounds. They now ship 50 cases a day of their 3 products using only 2 employees.

9446. **Product Name:** [Sprouted Tofu].
Foreign Name: Sprossentofu.
Manufacturer's Name: Life Food.
Manufacturer's Address: Robert Bunsen-Strasse 6, D-7800 Freiburg, West Germany. Phone: 0761/50 61 55.
Date of Introduction: 1990. March.
Ingredients: Soybean sprouts, water, coagulant.
Wt/Vol., Packaging, Price: 250 gm. vacuum pack.
How Stored: Refrigerated.
New Product–Documentation: Taifun Produkte: Preisliste fuer Wiederverkaeufer [Taifun Products: Price list for retail food stores]. This new price list takes effect on 1 March 1990. Products include: (*Sprossentofu;* 250 gm vacuum pack). Prices are given for each product: 1 DM equals about $0.50.

The company now presents itself as Life Food–Freiburg's Tofu Shop. Natural Foods (*Life Food–Freiburgs Tofurei. natuerliche Lebensmittel*).

Note: This is the world's earliest known tofu made from soy sprouts.

9447. Life Food. 1990. Taifun Produkte: Preisliste fuer Wiederverkaeufer [Taifun Products: Price list for retail food stores (Leaflet)]. Robert Bunsen-Strasse 6, D-7800 Freiburg, West Germany. 1 p. Single sided. 30 cm. [Ger]
• ***Summary:*** This new price list (printed with black ink on tan paper) takes effect on 1 July 1989. Products are: Tofu (400 gm or 250 gm vacuum pack). Tofu (1 kg pack for those buying fresh). Smoked tofu (200 gm). Sprouted tofu (*Sprossentofu;* 250 gm vacuum pack), Hijiki tofu (200 gm vacuum pack), Tofu sausages (*Grill-Knacker;* Tofu Huerstchen; 250 gm vacuum pack of four). Soya Patty (Soja Bratling; 6 or 12 pack). Tofu Cheese Patty (6 or 12 pack). Black Forest Patty (Schwartzwälder Bratling; 6 or 12 pack). Tempeh Patty (Tempeh-Taler; 125 gm vacuum packed). Tofu Terrine (Graffiti or Rainbow; 200 gm, 500 gm, or 1 kg vacuum pack). Tofu Balls (Tofu-Klösse; 4 in a 250 gm vacuum pack). Vegetable pouches (Gemuesetaschen; open, fresh). Spread for bread (Brotaufstrich; Tempeh 200 gm, Chickpeas 200 gm).

By request, we deliver various sprouts, tempeh, seitan, salad specialties, soy sauce [but no weights or prices are given for these "by request" items]. For feasts and celebrations, we recommend Taifun's vegetarian party service.

Prices are given for each product: 1 DM equals about $0.50.

The company now presents itself as Life Food–Freiburg's Tofu Shop. Natural Foods (*Life Food–Freiburgs Tofurei. natuerliche Lebensmittel*). Address: Freiburg, West Germany. Phone: 0761/50 61 55.

9448. *Toyo Shinpo* (*Soyfoods News*). 1990. Chinpin gojutten sorou: Zenkoku tôfu kakô shokuhinten-kai [Fifty second generation tofu products from the Japanese National Processed Tofu Exhibit in Aichi prefecture]. March 1. p. 5-6. No. 1016. [Jap]
Address: Japan.

9449. Welters, Sjon. 1990. Origina, Terra Foods, FVO, OCIF, and Mercantile Development (Interview). *SoyaScan Notes.* March 3. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** In about 1983 Rob Jansen, a friend of Sjon's, left Manna and founded Terra Foods in Castricum, Netherlands, as an import / export company in Holland. Terra Foods, formerly a commodity company and owned by a holding company named Centaur, created a new entity/dba/company named Origina (pronounced or-uh-GEE-nuh) through which it could enter the retail food consumer market, exporting foods (from companies such as Witte Wonder) to West Germany, the USA, etc., and importing foods from the USA (as from Mercantile Development). Origina is also

© Copyright Soyinfo Center 2013

sometimes used as a brand name. Note that the name Witte Wonder does not appear on exported products. One brand is Luna.

Mercantile Development, an American company in Bridgeport, Connecticut, founded by Michael Marcolla (an American) and Robert Shapiro. Mercantile started the FVO (Farm Verified Organic) program in Europe about 10 years ago when he found that he was exporting a lot of American commodities to Europe. Because a certifying agency cannot be connected to a commodities trader, FVO was made separate from Mercantile. FVO now has a very extensive program in America, as well as a newsletter. The owner of Mercantile went to school at a Waldorf school and is very interested in the anthroposophic and biodynamic methods of farming. FVO and OCIF are certification programs used mostly for commodities that are accepted in Europe as being really organic. European standards used to be tighter than those of the USA but the U.S. is now catching up. All U.S. products in Europe must have a seal of certification. Many European soyfoods (especially tofu) manufacturers use certified organic soybeans grown in the USA. In fact, soybeans were one of the first certified organic commodities to be imported to Europe from the USA on a large scale. FVO started its program in large part because of soybeans. Address: Craft International Consultants, 21 Wetherbee St., Acton, Massachusetts 01720. Phone: 508-264-4011.

9450. Bennett, Gordon. 1990. Re: Reply to letter from Art Mio (11 Jan. 1990) concerning the Soyfoods Association of America's actions relation to tofu contamination and storage. Letter to Art Mio at Morinaga Nutritional Foods, Inc., March 5. 5 p. Typed, with signature on letterhead.

• ***Summary:*** Gordon writes: We do not consider tofu to be "the very real threat to consumer safety" that you assert it is. "In fact, since 1982, at least 500 million pounds of tofu has been sold in this country, without a single outbreak of food-related illness. Can the dairy, poultry, egg or meat industry say the same? Certainly not. Are you aware that 19 people died last year from *Salmonella* poisoning attributable to eggs? Are you aware that the USDA publicly recognizes that up to 50% of the chicken sold today is contaminated with *Salmonella* and should be washed before handling and cooked thoroughly before eating?" The tofu standards adopted in Oct. 1986 recommend that tofu be stored at 34-45ºF; this falls within FDA guidelines. "Data available to us from the largest tofu manufacturer in the northeast USA [Nasoya], one who conducts regular temperature surveys of all the stores that their product is sold in, indicates that over 90% of the tofu sold in produce cases in New England is sold at 45ºF or below.

"And, the SAA, in order to determine just how tofu is being handled by processors and retailers alike, is conducting a survey of manufacturers, in conjunction with the Food Science Department of the University of Maine at Orono. Among other areas that will be investigated, the survey will attempt to clarify just how much tofu, if any, is sold in violation of federal or state guidelines. We expect to have it completed within six months.

"While our industry is new and fairly small when compared to others, we believe that we have a pretty good record. It's ironic that the bulk of the negative publicity about our industry appears to be coming from within it–specifically from your company. It's quite likely that somewhere in America, fresh-packed tofu is being stored above 45ºF, just as somewhere, some milk, is being improperly stored. Whether this situation for tofu is widespread or isolated is presently unknown and is the subject of our study. What is clear, is that compared to other protein sources such as meat and poultry, tofu has presented a much lower incidence of contamination, regardless of its normal storage temperature practices...

"The SAA believes there is a place for both canned milk and fresh milk. Producers of canned milk do not try to sell their product by inflaming consumers' fears about contamination of fresh milk." Address: President, Board of Directors, Soyfoods Assoc. of America, 318 Main St., Bar Harbor, Maine 04609. Phone: 207-288-9419.

9451. Yu, Stephen. 1990. New developments with tofu in Toronto (Interview). *SoyaScan Notes.* March 5. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Stephen is again working with soyfoods after the bankruptcy of Victor Food Products in about June 1988. He is now working as a consultant, and his main project is to "consolidate all of the tofu makers in the area and help them to go into the market as one team." He is also trying to act as a communicator between the Soybean Marketing Board/ Agricultural Canada and the tofu makers. He also has a family, with children aged 3 and 6, to support. In the last few days he has visited 6-7 tofu companies in Toronto; they all welcomed him with open arms and gave him the information he requested–although he does not know how true it is. He would like to work as a researcher for Soyfoods Center in Canada ($50/hour), and to trade information. He will send a list of what he wants to know. He is interested in knowing the amounts of various soyfoods (such as Vitasoy soymilk, Kikkoman soy sauce and tofu, etc.) imported to Canada.

He started to make soyfoods in Canada in Feb. 1978. His first three products were tofu, tofu pudding (daufu-fa), and soymilk.

He knows a man in Canada who is doing a market study of the low-tech soyfoods industry in that country. He is an independent person who is working for the Soybean Marketing Board. The study concerns the overall picture of soybean use in Canada. The most interest is in tofu, and Stephen is doing the tofu and soymilk section of the report. Stephen can put us in touch. Stephen personally lost $750,000 when Victor Food Products went Bankrupt.

© Copyright Soyinfo Center 2013

Update: Talk with Stephen Yu on 8 July 1990. The report cost about $70,000 to produce. He is not sure if it will be published. He is not busy nowadays, but does not feel like working on a history of his company. Address: 525 Highland Road West, Kitchener, ONT, N2M 5K1, Canada. Phone: 519-741-0922.

9452. Fehlberg, Eric C. 1990. Seventh-day Adventist health food companies in Europe (Interview). *SoyaScan Notes*. March 7. Conducted by William Shurtleff of Soyfoods Center. Followed by a letter dated 24 May 1990 clarifying details.

• ***Summary:*** There are three major Seventh-day Adventist (SDA) food factories in Europe, each owned by the church: DE-VAU-GE in West Germany, Nutana in Denmark, and Granose in England. There are smaller factories in Spain, and Switzerland. All these companies are owned by the SDA church. The leading Adventist food companies, ranked in descending order of annual sales, are: 1. DE-VAU-GE, established 1899 in West Germany. They are by far the biggest in Europe. They manufacture a total of 257 products. DE-VAU-GE began making its own tofu in Jan. 1986; before that it purchased tofu from a Belgian soymilk company [Note: actually from Heuschen-Schrouff in the Netherlands]. When Michael Makowski took over as managing director in about 1972-73, company sales were about US$3-4 million. By 1983 sales were about $18 million. Since then growth has been fantastic. 1989 turnover was DM 84 million (US$49 million). This is due to both excellent management and the German interest in natural, health, and vegetarian foods. 2. Nutana, est. 1898 in Denmark. They are about half the size of DE-VAU-GE. Under the management of Bent Nielsen, who was there until 3 years ago, the company grew rapidly. Since 1987 growth has flattened, but there is great potential for future growth. 3. Nutana in Norway (Nutana Norge), formerly Dagens Kost, est. 1970. They were established as a marketing company for Nutana, Denmark, and they sell all the soyfoods made by Nutana, Denmark. They also manufacture 55 products, but they import and wholesale 321 products. All of the imports come from European Adventist companies. 4. Granose Foods, est. 1899 in England. They manufacture 39 products and distribute 98 more (mostly from Nutana or DE-VAU-GE). They have been a manufacturer since 1899, and they built a new food plant in 1989. Their business is now growing rapidly. 5. Nutana in Sweden (AB Svenska Nutana) was renamed in 1987. It was formerly named Edakost Food Company, Sweden, est. 1970. 6. Nutana in Finland, formerly Finn-Nutana, est. 1979. 7. Pur-Aliment, est. 1928 in France. They are not a food manufacturer; purely marketing. 8. PHAG Food Factory (Fabrique de Produits Dietetiques), est. 1895 in Switzerland. The small factory produces 40-50 tons of food a month. 9. Granovita Spain, was founded and began manufacturing in about Aug. 1985 in Valencia, Spain. They do not produce any soyfoods at all, but they market soy products made by DE-VAU-GE in West Germany and by Nutana in Denmark. 10. Nutana in the Netherlands, founded in 1986. They are presently selling all the products produced by Nutana of Denmark as well as 5 other products: Vitanex (Sandwich cream), Rondolettes (Chickenlike or beeflike flavor), Snackers (Soy sausages), Boulettes (Dinner balls).

The Austrian Food Company, founded in 1976, was a restaurant rather than a food manufacturer; it was closed in 1987.

Granose and DE-VAU-GE were both importing foods from Loma Linda in the USA. But now that Loma Linda has been sold to Worthington Foods, it is not clear what will happen to these imports. Today, the various Nutana companies are independent, but there is much talk of bringing Nutana in Norway and Holland together with Denmark. Nutana has always been behind the expansion of SDA food work in the Scandinavian countries. Using the common name Nutana greatly facilitates marketing.

The European food companies have grown at different rates, largely dependent on the effectiveness of each company's management. The trend has been generally up. The highest growth rates in the past 5 years have been shown by Granose in England (though it started from a smaller base), followed by DE-VAU-GE in West Germany. Pur-Aliment and Nutana have had a bit of a struggle.

All of these companies pay a portion of their profits back to the church. They are encouraged to pay about 20% of profits back to the church, but some pay almost 50%. This is similar to the dividends paid by secular companies. Fehlberg believes that tofu will be the growth food of the future; it has great growth potential that has not yet begun to be realized. Address: Director, International Health Food Assoc., Seventh-day Adventist General Conference, 12501 Old Columbia Pike, Silver Spring, Maryland 20904. Phone: 301-680-6674.

9453. Mio, Art. 1990. Hinoichi tofu is of excellent quality because it is refrigerated properly (Interview). *SoyaScan Notes.* March 9. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Hinoichi tofu is good quality because it is stored under dairy refrigeration temperatures from the time it is made until it is sold. Southern California is the only area in America that merchandises tofu properly, in the dairy case–even though most people think it sells better in produce. Mr. Yamauchi of Hinoichi insists that any tofu of his sold in Los Angeles be sold in the dairy case. When Hinoichi makes tofu, as for Frieda's Finest, they pack it in a wax coated case and put ice on top of it, so when it gets on the truck going out across America it is in good shape. Address: National Sales Manager, Morinaga Nutritional Foods. Phone: 213-728-4325.

• ***Summary:*** Describes the proposed ground breaking for the company's new tofu plant at Terre Haute.

9457. Gaiser, Klaus. 1990. Recent developments at Soyastern (Interview). *SoyaScan Notes.* March 12. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Note: Soyfoods Center attempted to fax then call Soyastern in Cologne, only to be notified that their phone had been disconnected in Nov. 1989. So they called Yamato to find out what had happened to Soyastern.

Bernd Drosihn (pron. dro-ZEEN) left the company in anger in the fall of 1988. Harry Whitford did likewise in the fall of 1989. Thomas Karas was planning a big leap forward. Drosihn thought it was too big a leap and that the funds were not available to finance it. Thomas bought a big factory that had formerly been a chicken slaughterhouse. It is located in Dorsten, 100 KM north of Cologne, on or near the Rhine River. He kept an office in Cologne but Klaus does not know what he did with his former factory in Cologne. At one point Karas had 4 businesses. (1) Soyastern in Cologne. (2) Something at Ziegenhain. (3) The chicken slaughterhouse in Dorsten, and (4) Bio-Vera ("Truly Organic"), started in about 1988 to sell his tofu to supermarkets. The natural food stores (Naturkostlaeden) would probably have boycotted his products if Soyastern had tried to sell direct to supermarkets. Soyastern now has huge expenses and many problems. They may not survive.

Note: There are a number of errors in this hearsay account. For a firsthand account, see Karas 1990, March 14. Address: President, Yamato Yofuhaus GmbH, Rittweg 11/1, D-7400 Tuebingen–Hirschau, West Germany. Phone: 7071-71094 or 95.

9458. Gaiser, Klaus. 1990. Huegli acquires majority ownership in Yamato Tofuhaus GmbH and in Heirler (Interview). *SoyaScan Notes.* March 12. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Huegli Naehrmittel A.G. is a Swiss company, but they have a German branch. The head of the German branch approached Gaiser and asked him if Yamato would like to work together with Huegli. Until the spring of 1989 Klaus had a business partner (Wolfgang Haberger, who had joined the company in early 1984) but he was not very happy with him, so he bought him out. At the time of the buyout, Huegli approached Gaiser, who was now suffering from undercapitalization. Gaiser found Huegli to be fair, trustworthy, and competent. Huegli bought more than 50% of Yamato in April 1989. Before that, Thomas Karas had tried to sell his company to Huegli.

In Jan. or Feb. 1990, Huegli purchased Horst Heirler, the biggest distributor of fresh health foods in West Germany. Heirler's packaging is very attractive. To the best of Klaus' knowledge, there is definitely no relationship between Huegli and Nestlé. Yamato has not yet announced its relationship with Huegli to the general public, so nothing has been published. Tofu production has not yet expanded enough to fill the needs of potential Huegli customers. Yamato is now selling tofu on one of Huegli's tracks–to hospitals and factories (institutions; Grossverpflegung); other tracks are (2) Reform Houses, and (3) industry and supermarket chains. Presently Klaus is working most on track 1. To reach tracks 2 and 3 Yamato would have to develop new packaging and products suited to their very special needs. "At the moment Yamato and Huegli are not yet working so closely or effectively. Their new capital comes one step at a time for specific goals/projects.

Yamato presently makes 8 tofu products: Tofu (250 gm and 400 gm), Tofu Enriched with Mung Bean Sprouts, Smoked Tofu, (the best in Germany), three types of deep-fried tofu (Sour Marinated Tofu, *Hirschauer Laible* [Hirschau is a small village near Tuebingen]; *Laible* = little loaf or loaflet; the tofu is first marinated in soy sauce and spices, then deep fried), and Tofu Burgers with Sprouts (*Sprossen Tofuletten;* made with mung bean, sunflower, radish, alfalfa, and mustard seed sprouts {no soy sprouts}, these burgers were deep fried), 2 tofu pâtés in glasses (a little like sausages), and soymilk sterilized in bottles. He presently developing some new products.

Note: Huegli Naehrmittel A.G. (P.O. Box, CH-9323 Steinach-Arbon, Switzerland. Phone: 71.46.92.92) was founded in 1935. They currently have about 600 employees and capital of 100,000 Swiss francs. They are a well-known

© Copyright Soyinfo Center 2013

company in Switzerland. Address: President, Yamato Tofuhaus GmbH, Rittweg 11/1, D-7400 Tuebingen–Hirschau, West Germany. Phone: 7071-71094 or 95.

9459. Gaiser, Klaus. 1990. West Germany's four largest tofu manufacturers (Interview). *SoyaScan Notes.* March 12. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Klaus would guess that they are ranked as follows. 1. TKW (pronounced Tay-Kah-Vay). 2. Hensel, which produces most of the tofu for Heirler. They could be third or fourth. Klaus thinks that Hensel bought a tofu plant (he does not know whose) in France, imported it to Germany, then had it set up in inside of a plant in Kassel owned by a large dairy processing company named either Milchwerk Kassel or something like Milchwerke Hessen [actually, KMK; Kurhessische Molkerei Kassel]. The dairy products Heiler distributes are made in the same plant. Klaus will probably soon understand this complex relationship because Heirler is now a brother company of his. 3. Soyastern. They are producing every week (maybe not every day), but Klaus and his competitors think that they are near bankruptcy, and within the next few weeks they will have to sell out or find a big investor. 4. Yamato Tofuhaus GmbH. Address: President, Yamato Tofuhaus GmbH, Rittweg 11/1, D-7400 Tuebingen–Hirschau, West Germany. Phone: 7071-71094 or 95.

9460. *SoyaScan Notes.* 1990. Trends in the soyfoods market in Western Europe, and comparison with the USA (Overview). March 13. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** 1. Since 1988, many more large food companies have become soyfoods manufacturers in Europe than is the case in the USA. A great deal of new money is pouring into the soyfoods industry, especially from dairy and agricultural co-ops, and from large food companies. There have been many acquisitions and mergers involving dynamic small companies with large established companies. Products receiving the greatest attention are soymilk, dairylike soymilk products (such as non-dairy yogurts), tofu, and second-generation tofu products. Many industry leaders feel that the latter type of products have the greatest potential for the future.

2. There is much more use of and interest in organically grown soybeans and other ingredients in Europe. Organic certification marks (such as Nature et Progres, or CINAB) appear on the front panel of many products.

3. There is no U.S. equivalent of the huge and powerful Reformhaus health food chain, found in German-speaking countries. This chain helps to market soyfoods and set standards. It requires that all manufacturers put its Neuform certification symbol on all products sold by the chain.

4. Restrictive anti-soy labeling laws are more prevalent in Europe than in the USA. This is because of the very powerful dairy lobbies in most European countries. However these will be weakened after 1992.

5. Laws governing the way soy ingredients are listed on the label generally allow a more vague listing in Europe. In Germany, for example, a company can say simply "soy protein preparation," without specifying whether they are using a soy protein isolate, concentrate, textured isolate, textured soy flour, etc.

6. There are no good publications or information centers that focus on soyfoods in Europe, either for individual countries or for the continent as a whole.

7. The European market is much more fragmented and diverse. Much of the fragmentation comes from the fact that each country has its own food culture, language, and labeling laws. Exporting products, in an attempt to expand one's market, often requires duplicate or complex labeling, plus dealing with tariffs, etc. This will become less of a problem after 1992.

8. In most countries soyfoods are marketed primarily to the health foods trade, but in France there is much more focus on the mainstream mass market.

9461. Karas, Thomas. 1990. History of Soyastern Naturkost GmbH (Interview). *SoyaScan Notes.* March 14. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** This company started making tofu in Siegburg (at Roonstr. 38, D-5200 Siegburg, West Germany) in 1 Nov. 1982. His business registration bears this date; he actually began to prepare foods on a small scale before that. The original name of the company was Thomas Karas und Ingeborg Taschen. The original brand was Soyastern. Ingeborg Taschen was a woman. Thomas' residence and the business office during this time was at Hauptstrasse 1, D-5232 Ziegenhain, near Siegburg. While in Siegburg, they had three products: Regular tofu, Herb Tofu (Tofu Provence), and Tofu Burgers (written just like this in German and still sold today). On 1 Jan. 1984 three important events took place: (1) Two investor-workers joined the company, Mr. Gyoergy Debreceni (a Hungarian name) and Mr. Bernd Drosihn (pronounced dro-ZEEN); (2) Inge Taschen left the company; and (3) The company changed its name to Debrecini-Drosihn-Karas.

In mid-1985 (about June or July) the company moved to Cologne (*Koeln*). On 19 Dec. 1985 Mr. Debrecini left the company and Drosihn and Karas changed the company name to Soyastern Naturkost GmbH. Both were directors and each owned 50% of the stock.

Harry Whitford, formerly with Byodo in Munich, began advising Soyastern 'unofficially' in Jan. 1987. In July 1987 he moved to Cologne and began working for the company.

In Aug. 1987 Thomas founded a company named Bio-Vera, whose function was to market Soyastern's products to supermarkets under the Bio-Vera brand. Originally he and Drosihn owned 45% each and Charlotte Szamaitat (pronounced Shuh-MAI-tat) owned 10%.

© Copyright Soyinfo Center 2013

The tofu business in Cologne grew explosively, until the company outgrew its space. Moreover, the Cologne plant was not suited for tofu production, and health inspectors want to close the plant for sanitation reasons. So the owners spent years looking for better, larger buildings but nothing could be found in Cologne. Finally they found a huge building (4,000 square meters, or 43,000 square feet) in Dorsten; it had previously been a chicken slaughterhouse.

On 18 May 1988 Thomas founded Dorstener Tofu Produktions GmbH. Thomas owned most of the shares. Minority shareholders in that company were Harry Whitford, Wilhelm Hansen, and Charlotte Szamaitat. It was necessary to establish this new company both to raise capital for the tofu plant building, and because the new company could get quite a lot of money from the local government in Dorsten. The new company would take charge of production, and Soyastern would focus on marketing.

Dorstener Tofu Produktions GmbH then rented the huge building in Dorsten. In June 1988 the company began installing tofu making equipment in the new building and tofu production began there in November 1988. The company used only one-third to one-half of the total floor space. At the same time, tofu burgers were still being made at the plant in Cologne, until April 1989, when the company moved out of Cologne. In April 1989 Thomas Karas purchased this building, then rented it to Dorstener Tofu Produktions GmbH (DTP).

On 12 June 1989 Bernd Drosihn left the company, selling all of his stock in various companies to Thomas. He left mainly for personal reasons, but in retrospect he says he felt they tried to make too big a jump too fast. In Sept. 1989 Harry Whitford stopped working and in Jan. 1990 he left the company, selling all of his stock in various companies to Thomas. Harry liked the idea of making a great leap forward but there were personal problems between him and Thomas. Thomas now owns all of Bio-Vera and all of DTP. The general name for Thomas' group of companies is "Soyastern," and he plans to unify them under a "roof" company with that name.

Thomas needed large amounts of capital to buy out all of his former partners and to buy the factory in Dorsten. He services his debt on the loan used to buy the building from the rent paid to him by DTP. The financing would have been adequate if everything had gone 100% smoothly. But the company ran into technical problems with their machinery. This left them short of capital.

Today Dorstener Tofu is making about 7,000 kg/week of tofu, slightly less than the 7,500 kg/week they were making in Nov. 1987. Thomas thinks Soyastern/DTP is still the largest tofu manufacturer in West Germany, but he is not sure. In the natural foods trade, the other big competitor is Yamato; DTP definitely produces more tofu than Yamato, and probably more than TKW.

As to Thomas' present financial situation, he is not desperate, but he realizes that he must soon get one or more investors/partners. He is optimistic that he will be able to get the money that he needs in time. He intends to stay active in the company, and to own a part of the company, but he is willing to sell 50% or more since his main personal interest lies not accumulating capital but in tofu production and marketing. In a very rapidly growing market such as this, the key point is having lots of capital at each stage of growth. He is not as interested in the financial side of the business as in the marketing and production.

Soyastern's only new products in the last few years have been a line of fresh (not sterilized) tofu dressings. Launched in test market in Jan. 1990, they come in 3 flavors: Natural, Dill, and Tomato. Address: Bochumerstr. 92-104, D-4270 Dorsten, West Germany. Phone: 2362-26801.

9462. Karas, Thomas. 1990. The tofu industry and market in West Germany (Interview). *SoyaScan Notes.* March 14. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Soyastern/Dorstener Tofu Produktions (DTP) makes about 7,000 kg/week of tofu. Thomas thinks DTP is still the largest tofu manufacturer in West Germany, but he is not sure. In the natural foods trade, the other big competitor is Yamato; DTP is definitely larger than Yamato. He is quite sure that DTP produces more tofu than TKW. TKW has a big tofu plant and large scale equipment (they are a machine manufacturer) but they don't seem to sell much because they don't use organically grown soybeans, which are absolutely necessary to sell tofu.

He thinks DTP is also bigger than Hensel, but he is not sure. Heirler does not make regular (firm) tofu. Instead, they make special soy products, especially soy yogurt and silken tofu, plus some Tofu Pastete. Heirler is mainly a distributor of dairy products, and the biggest distributor of fresh natural foods in West Germany. He distributes the whole fresh program, including produce/vegetables, and soy products exclusively to the Reform Houses. He does not distribute to natural food stores (Naturkostlaeden, Biokostlaeden). The company does about DM 50 million in sales/turnover a year in West Germany, and about DM 10 million in other countries. Heirler's tofu is made by a dairy company named KMK (Kurhessische Molkerei Kassel) in Kassel. The dairy products he distributes are made in the same plant. The brand name is Soja Soft. KMK also makes tofu for Hensel, but KMK does not sell its own tofu. Heirler and Hensel work together. Heirler distributes the Hensel tofu. Originally Hensel tofu was made by Yamato, then Auenland, then Soyastern, and now KMK. Heirler has always wanted Hensel to expand their line of tofu products. But Hensel is very conservative and slow to act, so Heirler introduced its own line. Hensel is an old soyfoods manufacturer.

So the big 4 tofu makers in West Germany, in descending order of size, are probably Soyastern, Yamato, Heirler, and Hensel. But this will soon change because of

© Copyright Soyinfo Center 2013

DE-VAU-GE (DVG), and Huegli-Heirler-Yamato. DVG does not yet make their own tofu. They buy it all from Heuschen-Schrouff in the Netherlands. Soyastern has sold them tofu in the past. However in about June 1990 they will start to make their own, and they will probably become a big force in the market because they sell a lot of tofu now and they have excellent distribution to the Reform Houses. About 89% of their products are sold to Reform Houses. Martin Evers is the only distributor of DVG products to natural foods stores. DVG is a very big company and is very slow in making decisions.

When Huegli bought Heirler and Yamato, Heirler put half of the money he got from the sale back into Heirler and half into Huegli in the form of stock. Mr. Heirler is now on the board of directors of Huegli. Thomas talked with Mr. Heirler at length in Dec. 1989. His thinking is very much oriented toward the open market in Europe after 1992. Huegli is basically a producer for the Reform House market. His two brands are Neuco and Cenovis. The tofu used in the Neuco tofu salads is not yet made by Yamato; it is probably made by Witte Wonder in the Netherlands.

So West Germany's two biggest tofu company's will probably soon be DVG and Yamato-Heirler-Huegli. With the opening of Europe in 1992, some companies will decentralize/regionalize their business for reasons of ecology and freshness. Soyastern is too big for this. The other is the path that Huegli-Heirler-Yamato are taking, by merging and trying to distribute and sell products throughout Europe. Heirler is the perfect company for expanding distribution outside of Germany. They may be the best in Europe for refrigerated distribution; they also have a little frozen distribution. They now distribute some to Switzerland, Belgium, Austria, and East Germany. After 1992 this distribution will grow rapidly. Address: Bochumerstr. 92-104, D-4270 Dorsten, West Germany. Phone: 2362-26801.

9463. Karas, Thomas. 1990. The Reform House market and the natural foods market in West Germany. The German Soyfoods Association (Interview). *SoyaScan Notes.* March 14. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** There is a clear distinction and a big difference between these two segments of the natural/health foods market in West Germany. The Reform House movement is much older and the stores are like U.S. health food stores. There are about 2,000 to 3,000 Reform Houses (Reformhaeuser) that have annual sales of DM 1,000 million. There are 1,500 to 2,000 natural foods stores (Naturkostlaeden) with annual sales of about DM 700 million, or about 41% of the total natural foods market. Before a product can be sold at the Reform Houses, it must have the "Neuform" Reform House logo. It is difficult to get this because Mr. Heirler and others keep out products that will compete with theirs. On the other hand, the natural foods stores have much higher quality standards. Most important, all raw materials must be organic if possible. The Reform Houses have not traditionally been interested in organic ingredients. But now they are moving toward organic.

Another problem is labeling. To sell in natural food stores, a company's products need to meet a higher standard, and they need to be inspected. When a company has the Neuform (Reform House) logo on their products, they must make another label for each product without the Neuform label before they can sell those products in the natural food stores. So to sell in both of these 2 markets requires two sets of labels, which is expensive. Thomas is working to bring these two segments closer together. Now, when a food company starts, they must basically decide whether they want to sell in the Reform House or the natural foods market. Very few companies try to sell in both.

In about 1984 in West Germany a natural foods association named Bundesverband Naturkost (BN) was started. Its members included natural food manufacturers, distributors, and retailers. This structure did not work well, since large companies tended to dominate it and the different segments had different interests. So from 1987 to 1989 a new natural foods association named BNN (Bundesverband der Naturkost und Naturwaren) was established. BNN has its own new logo, and only 3 members, each of which is an association. The first is a food manufacturer association (BNNH, Hersteller; about 35 members. Karas is on the board of directors), the second is a food wholesaler association (BNNG, Grosshaendler; about 35 members), and the third is a food retailer association (BNNE, Einzelhaendler; 700-800 members). Within the manufacturers' association (BNNH), an association only for manufacturers of organic soyfoods, named BAG Soya (Bundesarbeitsgemeinschaft biologische Sojaprodukte) was founded in early 1989. The soyfoods association also develops marketing materials for its own use. The headquarters of BAG Soya are at Huetlin Str., Konstanz, West Germany. Kurt Miller, a small tofu maker at Bodensee is Director.

BNN certifies many certification associations (MDI, OCAA, which must be members of IFOM) or farmers and food producers to a very high quality standard. Manufacturers are inspected once a year by an inspector from BNNH.

The Reform Houses are in some ways similar to America's health food stores but there are basic differences. Reform Houses are less oriented to food supplements/pills (vitamins, minerals, protein powders) and more oriented to natural food medicine and medicinal herbs. But nowadays in Germany the two sides are coming closer together, and modern Reform Houses have a good selection of natural foods. Address: Bochumerstr. 92-104, D-4270 Dorsten, West Germany. Phone: 2362-26801.

9464. Kempff, Klaus. 1990. Brief history of Life Food GmbH–Taifun Tofurei (Interview). *SoyaScan Notes.* March

© Copyright Soyinfo Center 2013

14. Conducted by Anthony Marrese in Germany.
• ***Summary:*** Klaus, known as Dhanya, lived in Miami, Florida, for 5 years and has an American wife, although they are separated. His interest in soyfoods began in America. After returning to Germany, in 1985, Klaus bought a little sprout business in a basement / cellar at Wallstrasse 3 in Freiburg. When he bought it, it had no name and was run by a commune of Bhagwan Rajneesh devotees as a Sannyas business.

Since April 1985 the commune had been making various sprouts (not including soy sprouts). Klaus named the business Life Food, and in July 1985 he and several others started producing tofu. In the spring of 1986, in Germany, he got a copy of *The Book of Tofu* by Shurtleff and Aoyagi which helped his work. He sold the tofu along with various sprouts (mung, alfalfa, radish, chick peas, wheat) at the market place. Looking for a way to use his okara, Klaus developed a Soy Burger and started selling it in about Nov. 1985.

Then health officials told them to move out of the basement or be shut down. While struggling with the decision, a new place (a little grocery store at Stuehlinger Strasse 9, D-7800 Freiburg) became available and an order for one hundred 400 gm packs/week of tofu came along, so in Dec. 1985 they decided to go for it and start making tofu on a larger scale. The business grew steadily and in May 1989 they moved into their present location, a larger, new and modern facility that was previously occupied by a catering service. They purchased a new pressure cooker for making the soymilk for their tofu.

Klaus had a friend named Wolfgang Heck (not a follower of Rajneesh), who was an organizer (*Veranstalter*) of international events. The two began to work together in late 1986. In May 1987 Wolfgang started a business named Taifun that cooked Life Food's tofu for the people in the nearby Market Hall for gourmet foods. Taifun had a small walk-up tofu lunch bar at an indoor market. Here they sold their products and tried out new second generation products.

Klaus and Wolfgang decided to merge their two companies. So on 1 Jan. 1990 Life Food GmbH was formed, with 5 shareholders, including Klaus and Wolfgang. Life Food GmbH bought Taifun (the brand name and equipment) and discontinued operation of the Taifun in the market hall. Taifun became the brand name for many of Life Food's products. But some confusion between Life Food and Taifun still remains. For example, today outside the tofu plant there is a big sign that says "Taifun Tofurei" in big letters and under it in small letters the name of the company, Life Food GmbH.

Life Food GmbH now employs 15 people. Present products they make are tofu burgers (3 types, each 90 gm, 1,250/week), tofu (500 kg/week, started Dec. 1985), tempeh (10-20 kg/week, started July 1987), Tofu Terrine Sausage (just starting; they are terrific). They made samples of white miso is March 1989 and are in the process of bringing it into production. Although most of their okara goes to farmers, some is used in their tofu burgers and the Hop Sing Bratlinge (burger dough for restaurants). Life Food is the only tofu producer in Freiburg, where they control the whole market. They have a 60 kg/hour Takai pressure cooker, a Takai hand okara press, and a meat-type grinder for the soybeans. They make tofu in 10-12 kg batches. They also import and sell a little miso and shoyu.

Follow-up interview by William Shurtleff. 1990. May 9. The company presently makes 800-1,000 kg/week of tofu and 10-15 kg/week of tempeh. They are hoping for a big standing order of 500 kg/week from the student dining hall at Freiburg Univ. The dining hall has already been buying tofu and tofu products for a long time. Their best selling product is tofu, followed by Smoked Tofu, then the Tofu Terrine (made by pressing tofu, mixing it with vegetables, and baking it in a baking pan; it resembles a goose liver pâté).

Update. 1990. May. Bernd Drosihn says Klaus Kempff is no longer in charge; Guenter Klein and Wolfgang Heck have taken over. Address: Founder, owner and manager, Life Food GmbH, Robert-Bunsen Strasse 6, D-7800 Freiburg, West Germany. Phone: (0761) 50 61 55.

9465. Urban, Gyandeva. 1990. Recent developments at Svadesha–Vegetarische Feinkost (Interview). *SoyaScan Notes.* March 14. Conducted by Anthony Marrese in Germany.
• ***Summary:*** Svadesha (Ruediger Urban) is manager/owner of the company, and Gyandeva (his son) is manager of soya products (secondary). Svadesha is presently in the hospital. He rarely comes to the plant any more. Svadesha and Gyandeva are both followers of Rajneesh. Svadesha began making tofu in 1979. Then he took a 6-month trip to India, entrusting the company to another person while he was gone. The company fell apart during this time, but it was re-started in 1980 and has grown since then. The company moved to Munich in 1984. Recently the name was changed to Feinkost from Svadesha Tofurei, and now sells as Vegetarische Feinkost using a logo of a sun behind a breaking wave.

They presently have 7 full-time and 5 part-time employees who produce 10 batches (each 250 kg) per day, or 1,250 kg per week–more in winter, less in summer. They are closed in August. Their second generation products include tofu burgers in mushroom or seaweed flavors, and a wine and herb spread. They also make tempeh burgers, buying the tempeh from Byodo in Munich. Address: Ostpreussen 22, D-8000 Munich 81, West Germany. Phone: 089-939005.

9466. Roquette, Harald. 1990. History of Henselwerk GmbH (Interview). *SoyaScan Notes.* March 15. Conducted by Anthony Marrese in Germany.
• ***Summary:*** This company's parent company is Walther Schoenenberger, which has 5 divisions. Henselwerk is the

© Copyright Soyinfo Center 2013

division that handles the soya products and other products. The tofu is made by Ulrich Sabrarth K.G., a wholly owned subsidiary of Henselwerk located in Hage near Hamburg. The Henselwerk division is 40-50 years old. It has been using soya in the form of tofu for more than 5 years, but in other forms (such as dry, in vitamins, and as a food additive) for many more years [since at least 1963]. Henselwerk does use Soyakraft as a product name, but does not use Sojabasan. Mr. Roquette has been with Henselwerk for 3 years. Address: Export manager, Henselwerk GmbH, Muehlstrasse 5-7, Postfach 1120, D-7037 Magstadt, West Germany. Phone: 07159-4906.

9467. Horowitz, Janice M. 1990. Bye-bye, tofu; hello, truffles! Organic cuisine is making an upscale comeback. *Time* 135(12):60. March 19.

9468. Steyer, Bernd. 1990. History of Byodo Naturkost (Interview). *SoyaScan Notes.* March 21. Conducted by Anthony Marrese in Germany.
• ***Summary:*** The company was founded in about 1983-85 by Harry Whitford (an American) with Herman Conran [Hermann Konrad], and Michael Mossbacher. Whitford left to go to Soyastern (he later left Soyastern also). Mossbacher is now in charge of the company's wholesale distribution. The company's first products were burgers made from purchased tofu and tempeh. In 1984 they started to make their own tempeh. Steyer, now tempeh production manager, built the company's first tempeh incubator. In 1984 they began to make their own tempeh. Production is now 50 kg/week plus 500 burgers/week.

Bernd is very much working for world food transformation and has invited Marrese for a visit. He will send a set of labels.

Interview with Bernd Drosihn. 1990. April 7. Byodo was founded by Lukas Kelterborn. Harry Whitford came a little after it was founded.

Talk with Klaus Gaiser of Yamato. 1990. May 8. Byodo was bought by a butcher, Rottmueller Naturkost, several weeks ago. The butcher, which now owns 55% of the company, runs a "Naturland" company–a grower's association like Demeter, Bioland, etc.

See also Harry Whitford's 1990 early history of Byodo. It is probably the most accurate on the early history.

Note: On 9 Aug. 1990 Soyfoods Center received an enquiry from Tofurei Rotmueller at Hirschbergstr. 9, D-8000 Munich 19, West Germany. Address: Hirschbergstr. 9, 8000 Munich 19, West Germany. Phone: (089) 168570.

9469. Fitch, Peter. 1990. Re: The Haldane Foods Group. Letter (fax) to William Shurtleff at Soyfoods Center, March 26. 3 p.
• ***Summary:*** The Haldane Foods Group is composed of Direct Foods Ltd. (founded 1980, acquired by the Group in March 1985), Vegetarian Feasts Ltd. (founded 1984, acquired Feb. 1986), Haldane Foods Ltd. (founded 1983, acquired Aug. 1987), Regular Tofu Co. Ltd. (founded 1983, acquired Aug. 1987 since it was owned by Haldane), Vegetarian Cuisine Ltd. (founded 1985, acquired ?? 1987), Realeat Foods Ltd. (founded 1984, acquired Sept. 1988), Saucemasters Ltd. (founded 1988, acquired Feb. 1989), and Genice Foods Ltd. (founded 1988, acquired March 1989).

Genice (pronounced gen-AIS) makes non-dairy frozen desserts (ice creams). Saucemasters makes a vegetarian mayonnaise, free of eggs and dairy products.

"Between them, the companies encompass a wide range of 'Healthy Foods' including chilled, frozen, dry, sauces, desserts and non-dairy ices.

"Although the individual companies have separate identities and sites, they share a common sales and marketing team and enjoy business in all market sectors including health food stores, supermarkets and catering.

"The group is very active in new product development, believing that the life blood of the health food market lies in innovation.

"Customer and market requirements are constantly changing and a great deal of effort is put into keeping pace with these changes in demand."

Note: At Helfex 90 in April 1990 in England the Haldane Foods Group launched of 21 new products. This was NOT in celebration of its 21st birthday. Address: Managing Director, Haldane Foods Group Ltd., 25 Hayhill, Sileby Rd., Barrow upon Soar, Leicestershire LE12 8LD, England. Phone: 050981 6611.

9470. Storup, Bernard. 1990. The tofu industry and market in France (Interview). *SoyaScan Notes.* March 26. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The largest tofu manufacturers in France are: (1) Société Soy makes 12,500 kg/week (12.5 tonnes/week) of their basic tofu, much of which is made into second generation products. In fact, regular tofu counts for only about 15% of their tofu sales, whereas Tofu Burgers (*Croque Tofu*) account for 45% and Tofu Sausages (*Tofinelle*) account for 20%. These figures do not include their soymilk, which is more but which is sold as soymilk. They sell to the mainstream market. Société Soy's market for tofu and tofu product has been growing at the rate of about 40% a year over the past few years.

(2) Daizou SARL (related to Le Bol en Bois, in Champigny sur Marne) makes an estimated 500-600 kg/week. They sell tofu from the shop and deliver to several Japanese retail outlets. Their customers are mostly Japanese. Their production seems to have remained static during the past 2-4 years. There are 2-3 small companies that make about 200 kg/week. Innoval (pronounced EEN-oh-val) no longer makes tofu in France. Cacoja (pronounced KA-ko-jah) in the east of France makes what they call their "soy

© Copyright Soyinfo Center 2013

base," to be mixed with meats. It is ultrafiltered, concentrated soymilk with a high solids content but it is quite different from regular tofu. Presently, they may not be selling any tofu in France, and their program to sell the soy base seems weak.

Thus the total size of the tofu market in France is about 14,000 kg/week or 728,000 kg/year. It is growing at about 35% a year.

Update: 12 July 1990. Société Soy has been planning a major export program to the UK. Now they have decided to drop that and export instead to Italy. Address: Founder and Owner, Société Soy, 1 rue du Crêt de la Perdrix, 42400 St.-Chamond, France. Phone: 77.31.23.66 OF.

9471. Friend, Tim. 1990. Soybeans may help fight cancer. *USA Today.* March 27. [1 ref]
• ***Summary:*** "Daytona Beach, Florida–New research presented here Monday at an American Cancer Society meeting shows rats fed a soybean-rich diet, then injected with a carcinogen, have 50% fewer breast cancers than rats given another source of protein.

"The link is not proven in people yet, but the findings may explain why Asian countries, which rely heavily on soybeans in the diet, have breast cancer rates that are five times lower than rates in the USA, says Stephen Barnes, University of Alabama.

"When Asians move to the USA, their daughters have the same breast cancer risk as U.S. women, he says.

"Barnes also showed soybeans and the drug Tamoxifen, which stops recurrences of hormone-dependent breast cancer, are chemically similar. That means a lifelong diet of soybeans may block estrogen from breast cells that use it to grow tumors.

"Dr. Samuel Broder, National Cancer Institute, finds the study 'fascinating, but you must keep it in perspective.' He says many factors could be involved, such as lower-fat diets in Asian countries and the higher breast cancer risk among U.S. women due to bearing children at later ages.

"Barnes says processed soybeans added to food do not contain anti-estrogen compounds that may prevent cancer. Foods that do, include tofu, soy milk and unprocessed soy flour."

This story was also broadcast on national radio news (incl. KCBS in San Francisco) the same day.

9472. Hansen, Asger Somer. 1990. The soymilk market in Europe (Interview). *SoyaScan Notes.* March 27. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** There are no statistics published on soymilk in Europe. The soymilk that is made can be used in either of two ways: (1) Aseptically packaged (typically in Tetra Brik cartons) for consumer use as a beverage or pudding-like dessert; (2) Soymilk base is used as an ingredient in other foods or to make "processed tofu," which is made by ultrafiltration rather than by coagulation. Alpro is definitely the largest manufacturer with output estimated at 18-24 million liters/year. DE-VAU-GE is second biggest with about 12 million liters/year in the form of long-life packs (beverages and desserts). DE-VAU-GE will soon start to make tofu, which will be used mostly as an ingredient in their foods (sausages, etc.). In Asger's opinion these are very good products. Finally there is Cacoja, Triballat, and some smaller companies making a total of about 5 million liters/year. This gives a rough estimate of 35-40 million liters/year of soymilk made in Europe.

The growth rate of this market during the past 2 years has been slow, maybe 5-10%. "The real growth area has been in processed foods with tofu as a main ingredient. That's where I see the growth happening, in foods like dressings, egg-free mayonnaise, sausages, etc."

Cacoja sells "soymilk base," which is sold from the factory in tankers. Last time he talked with customers, they were not satisfied with the quality of the product. The capacity is only 1,500 liters/hour. The Adventists are considering a soymilk plant in the USSR.

Anders Linder left DTD on 1 Nov. 1989. He was asked to leave because the company was not making enough money, and because the company has new management under APV. He is now living at Domsten, Helsingborg, in Sweden. DTD's name is now APV-DTD, part of APV-Pasilac. Asger is in charge of the Soya Technology Div. Two other people are employed by this division with him (Elizabeth Gibson). John Davies is in Hong Kong. Address: Technical Manager, Danish Turnkey Dairies Ltd., Soya Technology Div., 2 Europaplads (P.O. Box 146), DK-8100 Aarhus C, Denmark. Phone: (86) 12 4155.

9473. Marshall, Philip. 1990. Update on history of Cauldron Foods Ltd. (Interview). *SoyaScan Notes.* March 29. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Cauldron Foods Ltd. was founded in 1980 and began to produce tofu in late 1981 in Bristol. This was a pioneer tofu company in England, and they have grown the business and the market by hard work. At Chapel Lane, Bristol, their original address, they made tofu and tofu burgers. In late 1983 they moved to 4 Conduit Place, St. Paul's, Bristol. Then in Aug. 1986 the company moved to 149A South Liberty Lane, Ashton Vale, Bristol, Avon. In Sept. 1987 Philip and his partner, Peter Fagan, sold their entire ownership in the company to Rayner Burgess Ltd. Thus Cauldron Foods Ltd. is a wholly owned subsidiary of Rayner Burgess Ltd. (not a division). Then Fagan left the company in about April 1989; he is now doing frozen ready meals. Generally things are going exceedingly well, thanks to the team that is working with the company. Philip is officially Operations Manager, but unofficially his responsibilities are much wider than that. The company does not present itself as a subsidiary of Rayner Burgess Ltd., even though the latter owns 100% of the stock. Address:

© Copyright Soyinfo Center 2013

Owner, Cauldron Foods Ltd., 149 South Liberty Lane, Ashton Vale Trading Estate, Bedminster, Bristol BS3 2TL, England. Phone: (0272) 632835.

9474. Marshall, Philip. 1990. The tofu industry and market in the UK (Interview). *SoyaScan Notes.* March 29. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The largest tofu manufacturer in the UK is probably Dragon & Phoenix in London. They do not reveal anything about their production or sales statistics. In 1984 they were producing an estimated 10,000 kg/week. Now they may be producing roughly 20,000. Second largest is Cauldron Foods, which now produces about 15,000 kg/week, working long shifts and using a completely continuous process that includes a Takai roller extractor (Philip does not like Takai's equipment, and will soon replace it; he feels that it is poorly built, low-quality parts and materials, stainless steel is magnetic, cast iron pumps, etc. He had to completely take their machine apart and rebuild it).

A distant third is Regular Tofu Co., now owned by the Haldane Foods Group. They use a Takai hydraulic press. As a very rough guess, they might be making 4,000 kg/week. Paul's Tofu is probably the fourth largest tofu maker in the U.K. Paul is an old, good friend of Philip's. His product is excellent, and he supplies the organic, natural nigari market. He might make 3,500 kg/week. Dragonfly is a small company at Totnes, Devon, that probably makes less than 1 tonne/week of organic tofu. In addition there are probably a number of Chinese tofu companies that are largely invisible except to the Asian community. There are also some in Birmingham, England. Birchwood Health Products (Clwyd, Wales) is no longer in business. Philip does not know when they stopped. They never really surfaced.

The total market size is probably about 45,000 to 50,000 kg/week.

The future looks good and the market is growing, but only due to hard work. Cauldron Foods is spending quite a lot of money on PR, marketing, education, and new product development. Cauldron's production and sales have more than doubled during the past year. About half of his sales come from his 3 types of basic tofu, and half from second generation products, especially burgers. The vegetarian market is an increasingly important one in the UK, and many non-vegetarians are reducing their consumption of meat, becoming more adventurous eaters, and looking to try new products. There is a general heightening of awareness of food and the variety of food. Cauldron is launching a line of frozen "ready meals." Address: Owner, Cauldron Foods Ltd., 149 South Liberty Lane, Ashton Vale Trading Estate, Bedminster, Bristol BS3 2TL, England. Phone: (0272) 632835.

9475. Westra, Marianne. 1990. Early history and current work of Vanka-Kawat B.V. (Interview). *SoyaScan Notes.* March 29. Conducted by William Shurtleff of Soyfoods Center. Followed by letters on 1 June and 2 July 1990.
• ***Summary:*** This company was founded in 1958, and has been in business for 33 years. They began as both an importer and a manufacturer. The original products they made were tofu (tahoe) and soy sauce (both sweet and salty varieties). In 1958 they began to make the following types of soy sauce: Ketchap Kaki Tiga, Ketjap A, Ketjap Benteng Manis, Ketjap Benteng Asin, Yellow Label Soy, and Tiger Brand Soy. They were still making all of these varieties in 1990.

At the time they started the business, they think there were other manufacturers of soy products in the Netherlands, but they don't remember the names of any companies of individuals. There were small, local Chinese companies that made tofu before they did, and at least one company that made soy sauce before they did. Their mailing address and head office address have not changed since 1958. The mailing address is: Dr. Augustijnlaan 40, 2283 CH Rijswijk, Netherlands (near The Hague). In 1984 Vanka-Kawat was thought to be the second largest tofu maker in Europe and in the Netherlands (after Heuschen-Schrouff), producing 10,500 kg/week. They discontinued tofu production in March 1985 after coming to an agreement with Heuschen-Schrouff, because it was more economical for Vanka-Kawat to let Heuschen-Schrouff (which had all the equipment and knowledge) produce the tofu which Vanka-Kawat sold. They now buy their tofu from Heuschen-Schrouff. They also make sambals, and other foods. They have never made taotjo or miso, but they do import it. And they have never made tempe/tempeh, but they do buy it from the "first Dutch Tempeh factory" and then sell it.

They are not related to Linn Oriental Products (also called Soy-Lin or Lin Tahoe) in Westbroek, but they think that company started in about 1970. The company still exists; the owner is Chinese, but they do not know if it is Mr. Lin. Mr. G.L. Van Kasteren is the best man to talk to about soyfoods. He speaks good English.

This company, which is run by Indonesian-Dutch, imports foods from throughout Asia, though they started with Indonesia, and exports to West Germany, Belgium, France, England, and the USA.

Note: Anneke de Weerd says (April 1991) that the two most popular types of soy sauce in the Netherlands are ketjap manis and ketjap benteng; ketjap asin is not well known. Address: Head Office: 3e van de Kunstraat 18, 2521 BB Den Haag (The Hague), Netherlands. Phone: 70-388-8804.

9476. Bundesfachverband Deutscher Reformhaeuser. 1990. [Re: Overview of the Reform House (Reformhaus, including Neuform) movement in Europe]. Questions answered on Soyfoods Center letterhead (dated 22 March 1990) and returned to SC on 30 March 1990. 5 p. [Ger]
• ***Summary:*** The first Reformhaus was started in Berlin,

© Copyright Soyinfo Center 2013

Germany, in 1877 by Karl Braun as a health center (*Gesundheitszentrale*). Today there are 2,800 Reform Houses in West Germany, 400 in Switzerland, and 50 in East Germany. Each house is owned by an independent merchant who is a member of the cooperative.

Concerning the Neuform part of the Reform Houses (as of 31 Dec. 1988), there are 1,325 members, a total of 2,804 sales places of which 1,902 are Reform Houses. There are 902 storehouses / warehouses (Depots). Annual sales (Umsatz, EVP) are 1,050,000 million.

A breakdown by type of goods sold is: Foods 56.1%, natural medicines / pharmaceuticals 19.6%, body care products & cosmetics 13.3%, dietetic foods 9.6%, diverse minor products 1.4%.

There are about 4,500 Neuform products made by 73 contractors / producers. Employees: About 10,000.

Sales by Neuform-Reform Houses and Depots has grown from DM 700 million in 1988 to 1,050 million 1988. In 1988 of the 2,804 Neuform locations, 67.8% were Reform Houses and 32.2% were Depots. In 1980 of the 2,638 Neuform locations, 64.2% were Reform Houses and 35.8% were Depots. Address: Waldstrasse 6, Postfach 4110, D-6370 Oberursel 4, West Germany.

9477. *SoyaScan Notes.* 1990. Great need for a soyfoods newsletter or magazine published in Europe (Overview). March 30. Compiled by William Shurtleff of Soyfoods Center.

• ***Summary:*** With the soyfoods industry and market expanding rapidly in Europe, there is a great need for a European-based publication to cover the subject in depth. It should be written only in English and cover all of Europe, including Eastern Europe. One person who is interested in this project is Bernard Faber (pronounced FAH-bur, rhymes with "clobber"). A close friend of Sjon Welters, he started the tofu shop at Manna, and is presently in charge of importing the Muso products for Akwarius Almere in the Netherlands. He wants to start his own business, in the information and publishing field, and is considering doing a soyfoods publication. He speaks good English, plus French. He also has the advantage of being Dutch and therefore flexible and not wanting to insist on using his own language.

Contact: Bernard Faber, Craft International Consultants, Zeepziederstraat 7, 1835 GK Alkmaar, Netherlands. Phone: +31 (072) 622.281. Fax: (072) 622.281

Letter (fax) from Sjon Welters. 1990. April 29. "I discussed the possibility of the 'European Soyfoods Newsletter' further with Bernard Faber. He too feels the time is right to start an international publication in this format and committed himself as publisher and editor of a soyfoods quarterly. Until enough funds are available to buy a computer, I will be responsible for the production part of it, except for the actual printing and mailing which will occur in Holland. This publication will be a joint venture between Bernard and me. The most likely first date of publication will be somewhere in June 1990.

"Would you be willing to support this new undertaking by supplying a list of potential subscribers? We could pay you back by making our mailing list available to you for instance."

Note: In May 1990, less than 2 months after the above was written, *SoyaFoods,* edited in England by Heather Paine, started to be published again after 4 years of inactivity, with the support of the American Soybean Assoc. in Belgium.

9478. Welters, Sjon. 1990. The tofu industry and market in the Netherlands (Interview). *SoyaScan Notes.* March 30. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** The largest tofu manufacturer in Europe and the Netherlands is Heuschen-Schrouff (pronounced HEW-shun Shroof; "HEW" is pronounced like "who" and "Schrouff" rhymes with "roof"). They make an estimated 35,000 to 40,000 kg/week (75-90,000 lb/week) of tofu.

De Morgenstond is Holland's second largest tofu producer. They are a "new-age" type company that started making tofu in about 1980 or 1981. They make vacuum pack tofu and various tofu products such as Saté. They make about 2,250 kg/week of tofu. Sjon helped them move into their now plant in March 1989. The original owner was Wout (rhymes with "laut") Gerritsma. The present owners are partners Frits Steunenberg and Mauk Den Bok.

Lin Tahoe (Soy Lin) is a traditional Indonesian tofu company that makes an estimated 1,000 kg/week of calcium chloride tofu.

Manna is now a brand of Akwarius Almere, which buys about 1,000 to 1,400 kg/week of tofu (formerly probably from Yakso, now perhaps De Morgenstond). There are probably 3-4 other similar regional Indonesian tofu companies that supply the Toko (supermarket or grocery store) with tofu, and are about the same size as Lin.

There are two companies that make large amounts of second-generation tofu products using tofu that they buy from original manufacturers. The larger of these two in volume is Witte Wonder (pronounced Vitte Vander; "Vander" rhymes with "Ponder"), which made tofu until recently but now focuses on making tofu dressings, etc. They buy their tofu from Heuschen-Schrouff. Note: Solnuts is now selling the company to the management, Wim Bakker. Originally, Witte Wonder was a foundation (Stichting); they had one company making tofu, another making seitan, plus a natural foods store and a restaurant. The tofu company started to expand so fast that they made it into a separate corporation named Witte Wonder, owned by Cees (pronounced "case") Van Rest and his father. As the company grew even more and needed a new plant, Solnuts came in as an investor. When even more money was needed, Cees sold the majority ownership to Solnuts. Solnuts put in a manager that Cees couldn't work with, so Cees left and Wim Bakker, the current

© Copyright Soyinfo Center 2013

president, took over.

The other company, Yakso, has a more diverse product line. Yakso is owned by a big Dutch cheese company named Frans Andriga (the same as the name of the man who owns it); the company is a cheese importer-exporter. Yakso's managing director is Cees Mideelweert, who took over from Yakso Farm. Yakso occupies the same building as De Morgenstond (De Oppers 58, 8471 ZM Wolvega). When they moved into this building, they stopped making the basic tofu (which they now buy from De Morgenstond) and focused on second-generation tofu products.

Companies that no longer produce tofu are Hwergelmir Foundation, Michel Horemaus (he used to be the tofu maker at Manna), Stichting Oost-West Centrum (they used to make tofu for their restaurant next door), Tempeh Productions Inc. (they used to sell tofu made by Heuschen-Schrouff), Terra Natural Foods (started by Rob Jansen) is now owned by Centaur, which also owns Macrobio (a distributor, importer-exporter); it is said that Centaur is largely owned or supported by Saudi Arabians. Terra now imports and exports soybeans. Sjon thinks they never made tofu.

Sjon estimates the total amount of tofu produced in Holland be about 45,000 kg/week of tofu, the growth rate of production to be about 8% per year, and the total consumption to be about 34,000 kg/week. Remember that Heuschen-Schrouff exports quite a lot of this tofu, so total Dutch tofu consumption will be less than production. The tofu is sold at the country's 800 natural food stores, all Indonesian food stores, and many mainstream Dutch supermarkets. Address: Craft International Consultants, 21 Wetherbee St., Acton, Massachusetts 01720. Phone: 508-264-9511.

9479. Welters, Sjon. 1990. Heuschen-Schrouff, the largest tofu and tempeh company in Europe and the Netherlands (Interview). *SoyaScan Notes.* March 30. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** The largest tofu manufacturer in Europe and the Netherlands is Heuschen-Schrouff (pronounced HEW-shun Shroof; "HEW" rhymes with "who" and "Schrouff" rhymes with "roof"). They make an estimated 35,000 to 40,000 kg/week (75-90,000 lb/week) of tofu. The company's production manager or director of operations, Han van der Hayden, visited Sjon in 1989 (Sjon took him through Nasoya's plant in Massachusetts and spent quite some time with him) and told him these figures. At the time, Heuschen-Schrouff wanted to upgrade their tofu production line from one they built themselves to a Takai or a Sato system. Sjon recommended Sato. They have not yet bought the new system.

Mr. Schrouff is the company's owner. In the early 1960s, Mr. Heuschen had a tofu company and Mr. Schrouff had a tempeh company (or perhaps vice versa). Sjon thinks they merged, then split up, then Mr. Schrouff bought Mr. Heuschen's business. Mr. Heuschen is no longer an owner, but he became the tofu production manager. Later Han became his supervisor.

Prior to the mid-1980s, Heuschen-Schrouff concentrated almost solely on the Indonesian market. After that time they started to make tofu for natural foods companies. They make tofu for Natufood, which is one of the largest distributors of natural foods in Holland. Natufood then created a separate division named Vetara which makes and sells a line of vegetarian protein products, such as TVP, Soy Schnitzels, mixes containing TVP used to make meat analogs–plus their Vetara Tofu. Natufood has a little newsletter, which they are expanding into a magazine for natural foods retailers in Holland. It is a good source of information on soyfoods.

In late 1989 Heuschen-Schrouff hired a new president and also bought another large tempeh company, perhaps Van Dappern's Tempeh Production Inc. So now Heuschen-Schrouff is Europe's largest manufacturer of both tofu and tempeh. Heuschen-Schrouff does a lot of private labeling for other companies; their tofu is sold under ten different brand names. They also export a lot of tofu from the Netherlands. Their biggest market is West Germany, followed by Belgium. Heuschen-Schrouff does not yet make second-generation tofu products; they may make some in the future or they may focus on making basic tofu. The next time Sjon goes to the Netherlands, he will probably be able to see the inside of the company. Address: Craft International Consultants, 21 Wetherbee St., Acton, Massachusetts 01720. Phone: 508-264-9511.

9480. Welters, Sjon. 1990. The tofu industry and market in Belgium (Interview). *SoyaScan Notes.* March 30. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Sjon does not know as much about this market as he does about the Dutch market. One good source of information is *Netelblad*, a macrobiotic magazine published by De Brandnetel. Belgium is a small country, with only about 10 million population. It shares a border with the Netherlands on the north, West Germany on the east, Luxembourg on the southeast, and France on the southwest.

Jonathan PVBA is the biggest tofu maker in Belgium. They make an estimated 4,500 kg/week of tofu plus many tofu products. Jonathan was recently acquired by Lima Foods, probably in 1989. Lima Foods was also recently sold by Pierre Gevaert. Sjon does not know who the buyer was. Lima sells tofu products (and soymilk), but does not make tofu; they buy it from Jonathan. Both Jonathan and Lima seem to be doing well. Lima had a new president but he was killed recently in a car accident. Pierre Gevaert must be in his 70s by now.

Seven Arrows Tofu, a "new-age" tofu shop, may still be producing. De Brandnetel no longer makes tofu; they are mainly focused on being a distributor.

Much of the tofu consumed in Belgium is imported.

© Copyright Soyinfo Center 2013

Heuschen-Schrouff supplies a lot from the Netherlands, and some is imported from West Germany and France.

Thus tofu production in Belgium might be 5,000 kg/week and consumption might be twice that much or more. Address: Craft International Consultants, 21 Wetherbee St., Acton, Massachusetts 01720. Phone: 508-264-9511.

9482. Carantino, Sabine. 1990. Le soja perd son amertume [Soya loses his bitterness]. *Management et Technologies Alimentaires* No. 2. March. p. 65-66. [Fre]
• ***Summary:*** Last Oct. 7 companies that process soybeans joined to create AFISA (Association Francaise des Industriel du Soja), the French soyfoods association (5 Blvd. de la Mediterranée, 31400, Toulouse, France). This article uses the term "soyfoods" and discusses soymilk, tofu, tofu products (desserts, prepared foods). ONIDOL is involved, as is GEPV (*Groupement d'Études sur les Protéines Végétales,* 10-A rue de la Paix, 75002, Paris, France; founded in 1975). It has been decided to finance a market study (which will be completed this year) of 4 European countries: Belgium, France, Great Britain, and West Germany. They may develop a "French Soya" logo. At the same time, ONIDOL is organizing an Interprofessional Committee for Soy Proteins Destined for Human Consumption. It will coordinate scientific studies, communication, and information on vegetable proteins and "soyfoods."

In Europe, the degree of advancement of use of soy protein in human foods differs considerably from one country to the next. The UK and Germany started earlier than France. In Germany, soyfoods are positioned on the "battlements of the dietetic market" whereas in France they are more oriented toward the mass market. In France, the high consumption of dairy products has not favored soymilk. 3-5 million liters of soymilk were produced in 1988, and the amount had roughly doubled by 1989. The new technologies allow production of soymilk with almost no bitter (beany) flavor, and it can be used to make good yogurts and desserts.

The first soy beverages and flavored desserts were launched only 5 years ago by Alpro (a division of Vandemoortele). The movement was then expanded with the creation of new brands, Celia (Laiterie Saint-Hubert-de-l'Hôtel) and Cacoja (Coopérative agricole de Colmar). Triballat created Soja Sun, a line of soy desserts. In 1988 the cooperative of Valence launched the Innoval line. Others include [Société] Soy, Sojadoc (Richemont) and Sojal. Many of the leaders are dairy companies, but they position their products very differently from dairy milk. Also in the French market are Lima from Belgium (with tempeh and tamari). Tonidoc makes soynuts sold as an aperitif. The French company Bunge, a third party, and Sofiproteol (Sofiprotéol) have created Sogip, which produces soy protein concentrates for use as both calf milk replacers and in human foods.

Concerning regulations, the definitions and uses of soy protein are set forth in a circular of 27 Aug. 1975, which related to another document of 12 Oct. 1972 for terminology. Finally a new circular of 1986 replaced the earlier ones. The Codex Alimentarius will finish its work on these areas in 1991.

A sidebar describes Innoval and its goals. Address: France.

9483. Diamond, Marilyn. 1990. The American vegetarian cookbook: From the Fit for Life kitchen. New York, NY: Warner Books. xx + 422 p. Index. 29 x 22 cm. [74* ref]
• ***Summary:*** This is a beautifully presented vegan cookbook, with many creative and delicious recipes. Soy-related recipes and entries include: Description of unpasteurized misos (p. 42). Soy products (p. 43; see also How to replace animal products, p. 93). Red miso tea (p. 71).

Chapter 6, titled "How to replace animal products" (p. 93-119), is devoted largely to soyfoods, especially tofu. At one time the Diamonds were not fans of tofu, but now Marilyn hails it as an "extraordinarily healthful" food. She uses it in what she calls "'stedda" foods–such as tofu salad "instead of" chicken salad. In this chapter you will find: Nondairy milk and cream: Soymilk (p. 94-95; the author finds nut and seed milks, almond and sesame, to be more flavorful). Enriched almonnaise (non-dairy mayonnaise with almonds and soymilk, p. 98). Instead of meat (p. 100): Exactly what is tofu? Culinary utopia: A dream come true. Buying and storing tofu. Wrapping tofu. Freezing tofu. Marinating tofu. Mixing tofu with other foods. How to proceed. "Stedda" sour cream. "Stedda" sour cream and onion dip. Cottage tofu or "stedda" feta. "Stedda" ricotta. Tofu "cheese" and olive spread. "Stedda" eggs: Rancheros (with tofu, p. 107). Scramblers (with tofu). Scrambled tofu (another way). Scramblers with fresh shiitake mushrooms. "Stedda Matzo brie (with soymilk and tofu). Burgers and other sandwiches (p. 110): "Stedda" egg salad (with tofu). Happy "chicken" burgers (with tofu). "Stedda" fish fillets (with tofu). "Stedda" meat marinades (* = with low-sodium soy sauce): All-purpose marinade I*. "Chicken" flavoring*. "Beefy" marinade*. Sweet and sour*. "Stedda" chicken fillets (with tofu). Mixed grill platter (with tofu). Kebobs! (with tofu). Tofu meunière. Lemon "stedda" chicken (with tofu). "Stedda" Chinese chicken salad.

"Sour cream" garlic dressing (with tofu, p. 128). "Cheesy" dijon dressing (with tofu, p. 130). French green salad with cottage tofu (p. 141). "Stedda" beef salad (with

© Copyright Soyinfo Center 2013

tofu, p. 155). "Stedda" mozzarella salad (with tofu, p. 159). Tofu salad (p. 169). "I used to love a fried egg" sandwich (with tofu, p. 181). Spicy tofu tacos (p. 186). Seasonings for soups (miso, p. 189). Basic cream soup (with light miso, p. 191). Miso soup with ginger and green vegetables (p. 193). Easy miso soup with vegetables and tofu (p. 194). Asparagus with tofu (p. 222-23). Vegetable lasagna with tofu ricotta (p. 278). Meatless bolognese spaghetti sauce (with frozen tofu, p. 280). Dairy-free "cheese" sauce for any pasta (with soymilk and light miso, p. 282). Tamale pie (with tofu, p. 311). Mushroom-leek crepes (with miso, p. 316). Winter squash blintzes (with tofu, p. 317). Spinach quiche (with tofu and light miso, p. 317). Asparagus quiche (with tofu and light miso, p. 318). Country pot pie (with tofu). Spanokopita with "stedda" ricotta (with tofu, p. 320). Superb vegetable sushi (with tofu, p. 322). Baking ingredients (soy flour, p. 331, and soymilk, p. 333-34). Carrot-cake cookies (with soy flour, p. 346). "Cheesecake" bars (with tofu, p. 346). Easy banana bread (with tofu, p. 348). "Cheese" strudel (with tofu, p. 349). Mocha parfait (with tofu, p. 350). Baked Indian pudding (with soymilk, p. 350). Applesauce cake (with tofu, p. 352). "Chocolate" carrot cake (with tofu, p. 353). Holiday pumpkin pie (with tofu, p. 355).

Talk with Marilyn Diamond. 1991. Sept. 18. The book is in its 9th printing now and the publisher just allowed her to do a revision, correcting typos and improving recipes. The publisher is not even planning the paperback edition yet because the hardcover edition is selling so well. They now have a 10-year contract with Doubleday (with a 10-year option to renew), and she and Harvey are working on a book together titled "How to Save Your Husband's Life While Saving Your Own." It stresses the need to re-affirm the female energies, which are the earth energies. The Diamonds have established a foundation to support the environment and ecological projects. This last year they contributed funds from it to support tree planting through the National Arbor Day Foundation. Address: Bradenton, Florida 34209.

9484. DTD Soya Technology Div. 1990. APV soymilk technology (Leaflet). Europaplads 2, P.O. Box 146, DK-8100 Aarhus C, Denmark. 3 panels each side. Each panel: 30 x 21 cm. March.

• ***Summary:*** This glossy, full-color leaflet, Anders Lindner's last project before leaving DTD/STS, describes: "Our products and services: Hardware, software, turnkey plus, some products made from soymilk base (yogurts, ice creams, tofu products, etc.). Our business is soymilk plants: About ourselves (APV DTD belongs to the APV-Pasilac Group), about soymilk." A color photo shows 4 flavors of Big Sipp soymilk. Soymilk processes and products. Progress of a typical project (2 flowcharts). On the back panel, 9 small color photos show commercial products made from soymilk, including Nasoya creamy tofu dressings, Nayonaise, GranoVita Bio-Tofu-Pastete (spread), and Tofuletten (liked sliced luncheon meats). Address: Aarhus, Denmark. Phone: +45 86 12 41 55.

9485. **Product Name:** [Fast Food Program: Tofu Mussel (Imitation Shell-Fish), With Vegetables Baked in Dough, Tofu Pillow, UFO Sweet Snack with Apple & Vanilla].
Foreign Name: Tofu Muschel (im Teig Gebaken), Tofu Kissen, UFO.
Manufacturer's Name: Geestland.
Manufacturer's Address: Bremerhaven am Fischbeinhof 1, D-2850 Bremerhaven, West Germany. Phone: (0471) 2 60 20.
Date of Introduction: 1990. March.
How Stored: Refrigerated.
New Product–Documentation: Talk with founder and present owner of Geestland, Paul E. Bremer. 1990. April 25. These products were introduced in March 1990. The UFO (Unidentified Flying Object) looks like a flying saucer.

9486. **Product Name:** Okara Burgers, and Tofu.
Manufacturer's Name: Noel Purvis Tofu.
Manufacturer's Address: 37 Sandy Hill Gardens, Ballymun, Dublin 11, Ireland. Phone: 01-8424891.
Date of Introduction: 1990. March.
New Product–Documentation: Letter concerning an interview with Noel Purvis conducted by Anthony Marrese. 1992. Sept. 7. Noel has been familiar with soy products since 1979 when he read Jane O'Brien's book *The Magic of Tofu.* He started making tofu for himself at about that time and sent for books on tofu by Shurtleff and Aoyagi, and by The Farm in Summertown, Tennessee. Noel also met people from The Farm who visited to Ireland and tried to get soyfood production started. They did leave a small influence and some people in the south of Ireland still make tofu as a result of their visit.

In 1988, in preparation for starting his own business, Neil (who was in the Ballymun Community Enterprise Training Program) received a grant to have a study conducted by Christina McGowan of the Centre for Marketing Studies, University College Dublin. Finished in Feb. 1988 it was titled "An Analysis of the Market for Soya-Based Products" (37 pages). The results were not promising, so he received no further funds to help start the business on a large scale.

In about March 1990 Noel started commercial production and sale of soyfoods. His business started by selling okara burgers; his family and friends used the tofu. In mid-1990, due to the success of the Okara Burgers, Neil started making more tofu and selling it too. He now sells these two soy products once a fortnight (every two weeks) at the local organic food co-op. He makes 10 kg of tofu per batch once a fortnight. He uses his home address for business and is looking for a new location for production and possible expansion. The burgers, which are tasty, are sold in plain

© Copyright Soyinfo Center 2013

white burger bags.

"Noel gave me two other names of small producers in Ireland and said that many have come and gone over the years."

9487. Ontario Soybean Growers' Marketing Board. 1990. A profile of the Canadian soyfoods market–Characteristics and potential. Box 1199, Chatham, ONT N7M 5L8, Canada. vi + 40 p. March. 28 cm. Spiral bound.

• ***Summary:*** Contents: 1. Introduction: Background, study objectives. 2. Research procedures: Data limitations, data collection (data sources). 3. The soyfood market: Soyfood production and utilization, domestic production, imports and exports (introduction, whole soybeans, soy flours and meals, soy oil, soy sauce, protein substances, cream and other substances, bran & soy hulls, soy meal oil cake), balance, conclusions regarding opportunities.

4. Soybeans for food purposes: Natto beans (background, market characteristics, market potential), whole bean soyfoods (introduction, soynuts, full fatted soy flours, soymilk, tofu, soy sprouts, tempeh, miso, natto, soy sauce), foods from soy ingredients (introduction, defatted soy flakes, soy protein concentrate, soy protein isolates, textured soy protein, consumption and imports). 5. Organic soyfoods: Introduction, organizations (major players, labelling requirements, certification), organic soybeans, organic soyfoods, market opportunities, recommendations.

6. Market estimates: Introduction, conversion rates, market characteristics (introduction, ethnic characteristics, immigration trends, implications), soyfood consumption (production). 7. Soyfood products: Introduction, new products (whole bean products, products from soy components), existing products (products with potential for growth). 8. Marketing strategy: Introduction, respondent requests (background), market opportunities (traditional soyfoods, new products), systems development (system information needs, human resources, production research), institutional needs.

This study was commissioned by the Ontario Soybean Growers' Marketing Board to provide a description of the Ontario soyfood industry. "Production and utilization: In the 1988 crop year, approximately 1.12 million tonnes of soybeans were produced on 1.28 million acres in Ontario. Approximately 86% of the soybeans were sold through the Board, with the remainder being fed or retained on the farms where they were grown. In 1988, 860 thousand tonnes of soybeans were crushed in Canada to produce soybean meal and soy oil, and 272 thousand tonnes were exported.

"Imports and Exports: Canada had a negative balance, a deficit, of almost $190 million in the value of soybeans and soy products traded. This is just over half a million dollars per day. Our largest single area of exports is whole soybeans for human foods. The percentage of these beans going to the major markets in 1988 were: USA, 37%; Pacific Rim Countries, 34%; and Europe and other 29%. Our greatest imbalance in exports and imports is in soybean meal or oil cake. Canadian crushers are unable to maximize their sales of oil cake because of difficulties in selling surplus soybean oil in the US. Soy oil being sold into the US presently faces a tariff of 18% which is decreasing at the rate of 2.25% per year as per the Canada United States Trade Agreement...

"Institutional development: We suggest the Board initiate the establishment of a Soyfood Development Association similar in structure and function to the Canola Council of Canada... There is a need to begin to bring all industry stakeholders together to systematically identify problems, information and research needs; develop data bases; and cooperatively promote the soyfood industry."

Soybeans for food purposes: The total volume of soybeans consumed as soyfoods in Vancouver (BC), Toronto (Ontario), and Montreal (Quebec) was estimated at about 6,000 tonnes, and imports were estimated to be equivalent to 8,000 tonnes of soyfoods.

Miso: One large Vancouver producer and one Toronto producer estimated that the volume of soybeans used to make miso in Canada is only about 35 tonnes/year.

Modern Soy Protein Products: Soy flour, concentrates, isolates, and textured soy protein products. Roughly 2,400 tonnes of soybeans are used in Canada for the production of these products, and 5,600 tonnes of soybeans are used to make the imported products (only bakery flour and extruded flour are made in Canada). Almost 1,000 tonnes of soy protein concentrates and isolates, and 400 texture soy proteins were imported, 83% from the USA. Total exports were 800 tonnes, of which 578 tonnes went to the USA. Soy flour (full-fat): The term "flour" generally signifies that the material has been ground finely enough to pass through a 100-mesh screen. Only relatively small volumes of full-fat soy flours are used directly as human foods. Some are used in bread, crackers, and pastry products. 5 companies in Canada make 1,538 tonnes of soy flour worth $495,000.

Natto: Canadians sell roughly 8 to 10 thousand tonnes of natto beans in Japan each year. Natto-type beans are "created by screening out the small beans from among regular food grade soybeans which have white hilums" (p. 15). In Japan about 100,000 tons/year of soybeans are used to make natto. Recently, Canada (via 3 companies–First Line Seeds, W.G. Thompson, and King Grain) has supplied about 10% of this market. Ontario produces about 8,000 to 10,000 tonnes of natto beans. Competition is expected to increase from U.S. seed breeders.

Soymilk: There are presently no large Canadian soymilk manufacturers. A plant is being built by an international trading company near Vancouver (YHS Pacific Fruit Concentrates Ltd., owned by Yeo Hiap Seng). It will supply both the local market and the Western U.S. market when it goes on stream later this year. A high proportion of imported soymilk is organic. Two brands account for 3/4 of

© Copyright Soyinfo Center 2013

all imports: Edensoy and Vitasoy. A high proportion of all soymilk imports are certified organic. This emphasis makes it difficult for Canadian producers to compete because of the shortage of organic soybeans in Canada. Consumption of soymilk is increasing at about 10% a year. Prices range from $1.50 to $2.75 per liter, with the organic product commanding the higher prices. Just under 100 tonnes of soybeans are used to produce soymilk in Canada: Vancouver 42 tonnes, Toronto 30 tonnes, Montreal 25 tonnes, plus imports 240 tonnes. 1 kg of soybeans produces 16.5 kg of soymilk.

Soynuts: The volume of soynuts made in Canada is quite small. One Toronto company [Grove Country Foods Canada, Inc.; they were in business 1-2 years, but were out of business by Jan. 1991], which began operation in Nov. 1988, sells a line of roasted nuts, which are roasted in the USA and chocolate-dipped in Ontario. Production was only a few tonnes in 1989 and is estimated to be about 10 tonnes in 1990.

Soy sauce: In 1986, according to Statistics Canada data, 2,503 tonnes of soy sauce were produced by 6 firms. The value was $2,161 per tonne for a total of $5,411,000. In 1988 Canada imported 5,680 tonnes of soy sauce valued at $4 million, primarily from China, the United States, Hong Kong, and Japan. Exports were 58 tonnes valued at $65,000. The major Canadian producers are China Lily and Sun Fresh in Toronto, Wong Wing and VH in Montreal, and Golden Dragon in Vancouver. The value of Toronto production is currently estimated to be about $5 million.

Soy sprouts: One Toronto manufacturer uses 20-25 tonnes of soybeans per year.

Tofu: About 3,300 tonnes of soybeans are used to produce tofu in Canada, more than any other soyfood. The volume of soybeans used is estimated at 1,400 tonnes in Toronto, 1,200 tonnes in Quebec (when a relatively large operation in Hull [La Soyarie, Inc.], near Ottawa, which exports to Ontario is included), 625-700 tonnes in Vancouver, and 125 tonnes for imported tofu. 1 kg of soybeans produces 2.4 kg of tofu.

Tempeh: Only about 33 tonnes of soybeans are used to make tempeh in Canada, and an estimated 15-20 tonnes in Ontario. Imports are relatively small. 1 kg of soybeans produces 1.6 kg of tempeh. Very few firms produce tempeh in Canada. One producer claims to have over half the Ontario market. A major distributor suggested they sold 4-5 times as much tofu as tempeh.

Soybean crushing: Since 1986 the number of firms crushing soybeans and producing soy oil has decreased from 3 to 2 [Central Soya owns two plants; in 1990 they bought the Canadian Vegetable Oil Processing (CVOP) plant in Hamilton, Ontario, formerly owned by Canada Packers Inc. They purchased Victory Soya Mills in Toronto in early 1985. So now 2 firms own 3 plants]. In 1986 the three plants made 95,108 tonnes of crude soy oil worth $57,271,000. Two firms made deodorized soy oil, but the volume and value were confidential. Less than $2 million of any type of soy oil is imported.

Consumption of soyfoods in Canada is strongly linked to Asian-Canadians. A table (p. 32) shows that according to the 1986 census, there were about 444,000 people of East- and Southeast Asian origin living in three major Canadian cities: Vancouver (155,105 people comprised 11.2% of the city's population), Toronto (234,325 people comprised 6.8%), and Montreal (55,585 people comprised 2.4%). Thus Toronto was by far the largest market, but Vancouver had the highest density of Asian-Canadians. A similar table (p. 33) updates the previous table to 1988. Immigration has increased sharply since then.

Note: This is the earliest document seen (Feb. 2002) that uses the term "food grade" (or "food-grade") in connection with Canadian soybeans (see p. 15). Address: Chatham, ONT, Canada.

Board–(soya fortified rice flour). (3) Spices and Essence (Ceylon) Ltd.–(soya products including TVP). (4) Kundasale Cereal Products Factory–(soya flour, soya flakes). (5) Soya Food Research Centre, Gannoruwa–(flour, dhal and wide range of products).

9490. Bodis, Laszlo. 1990. Re: The work of FTTE with tofu, soymilk, and soy protein products in Hungary. Letter to William Shurtleff at Soyfoods Center, April 2–in reply to inquiry of Jan. 25. 2 p. Typed, with signature on letterhead. [Eng]

• ***Summary:*** "FTTE is an engineering, research, and development enterprise rather than a manufacturing one. Technologies worked out by our technicians for producing feed and food products are then tried and used by companies producing food or feeds. Thus in the introduction and spread of tofu, we did all the initial work (conceiving the idea, drawing up the technology, sizing up demand, 'digging out' consumption, etc.) except for direct manufacturing... At present the manufacturer of the tofu developed by FTTE is Pest-Budai Vendeglato-Ipari Vallalat. We are talking with other companies about scaling up production.

Besides tofu, we cooperate in the production of a soymilk and sour cherry beverage mixture, soybean flakes, soy-cubes, TVP, soy-meal, lecithin, and UNIPRO–a feed made from whole (non-defatted) soybeans.

An undated 4-page color leaflet accompanying this letter, titled "FTTE–a bridge between research and application," notes that FTTE stands for "The Association for Protein Research Technology and Production." It was founded by OMFB (the National Technical Development Board) in 1983.

Also accompanying the letter are photocopies of pages from a publication: Unipro–a high-energy feed made from whole cooked soybean. Vetomag–a new variety of soybean. OMFB advisory service for growing pulses. Feherje (Protein) a quarterly magazine published in Budapest by 3 organizations. The chief editor is Kralovansky U. Pal. Dr. Laszlo Bodis is on the editorial board. It covers all aspects of proteins. Pronutti, soy-based products for food from Proteinvest. Szoja feldolgozas soybean processing. Takarmanygyar feed mixing plant. Szolnok Megyei (a company that produces and distributes soybean meal). KEKI (Kozponti Elelmiszeripari Kutato Intezet; the Central Institute for Food Research in Budapest) provides expertise for developing soybean applications. Address: Director, Feherjetechnologiai Tudomanyos Termelesi Egyesules, Budapest XII., Goldmark K. u. 3. Budapest Pf: 340 1536, Hungary. Phone: 155-5202.

9491. Lindner, Anders. 1990. Re: The soymilk market in Europe. Letter (fax) to William Shurtleff at Soyfoods Center, April 4 and April 26. 3 p. [Eng]

• ***Summary:*** The following figures contain many guesstimates. The only countries in western and eastern Europe where significant amounts of soymilk are produced are Belgium, West Germany, France, England, and Switzerland. The following are the seven largest soymilk manufacturers in Europe, ranked in descending order of size:

1. Alpro/Vandemoortele, Belgium. Capacity: 35 million liters/year. Present output: 25 million liters/year. Growth: Believe so, but don't know how much.

2. DE-VAU-GE (DVG), West Germany. Capacity: 20 million liters/year. They are running their plant at full capacity, but as Adventists I think they don't work on Friday afternoon or Saturday, they close down during the summer, and they send one road tanker of soymilk each week to Granose in England, where it is made into soy yogurt. So they probably end up making about 12 million liters a year of soymilk in long life packs. Soon some of their soymilk will be made into tofu. Growth: Would if they could, but they can't with the line they have, which they bought from DTD/STS for DM 4 million. DVG is making an excellent profit on their soymilk products, that's for sure. This is in part because they have the Neuform chain at their disposal.

3. Cacoja, France. Capacity: 11 million liters/year. Believed to be running at full capacity. Growth: Planning a new line but no decision yet as far as I know. I think that Cacoja produces more than 1 million liters/year. They visited DTD/STS a year ago to discuss a second line. The first one had a capacity of 2,000 liters/hour or approximately 5 million liters/year.

4. Soya Health Foods Ltd., Manchester, England (Sunrise Soya Milk). Capacity estimated at 8 million liters/year. Actual production not known.

5. Soyana, Switzerland. Capacity and production not known. Soyana has consistently refused to allow us to visit them. Even our Indian client who wanted to discuss purchase of their Dahi dessert recipe was given the cold shoulder. I think that they have their own soymilk plant, but I'm not sure. Why shouldn't they, when they have plenty of products in Swiss shops.

6. Galactina, Switzerland. Capacity estimated at 6 million liters/year. Most is used for products other than liquid soymilk. They sell limited amounts of soymilk, definitely less than 1 million liters/year packed in Tetra Brik Aseptic at the Thun Dairy in Switzerland.

7. Schoeller in Nuremberg, West Germany. Capacity not known. Soymilk used in ice cream production. There are also soymilk producers in Italy [Crivellaro], and Spain [Proti].

"Total size of European soymilk market in 1989 estimated at 50 million liters. Some is in the form of dairy analog products. Alpro and DE-VAU-GE have about 70% of the market, including bulk distributed product. Growth rate over the past few years 10–15%.

"General observations of the European soymilk industry and market: The dairy industry in France was the first to go into soymilk to offer alternatives to consumers who prefer

© Copyright Soyinfo Center 2013

'non-dairy dairy type products'. The soymilk-based ice cream of West Germany's Schoeller may start a trend for the rest of the European ice cream industry. There has been no equivalent to the U.S. Tofutti boom in Europe so far. Major liquid food companies do not at present see soymilk as a significant product for Europe but follow the trends and do some development, just in case.

"The future? It is necessary to make a distinction between Eastern and Western Europe. Western Europe has a surplus food production in general and surplus dairy milk production in particular. The health aspect alone, i.e. soymilk without improved palatability, will not significantly increase soymilk sales in Western Europe. The removal of dairy production subsidies in the EEC in the years to come, especially after 1992, may give an incentive to the big names in the food industry to develop soymilk into mainstream market products. There is EEC legislation on imitation dairy products and soymilk is mentioned as an example, but currently different member countries use their own laws.

"Many Eastern European countries have food shortages but lack money and entrepreneurship to venture into an unknown product like soymilk on their own. Furthermore, in these difficult markets, western companies with soymilk technology do not seem to find it worth the effort to first educate on the advantages and uses of soymilk and then to promote and arrange financing before they can hope to sell a soymilk processing plant. The new Eastern Europe with market economies now evolving gives hope for the future in general, but I couldn't make any guesses about soymilk.

"It is the aim of EEC to dismantle the agricultural subsidies. This will effect dairy production and new cheaper protein sources will be sought by the food industry. Soymilk definitely has a chance of 'growing up' when this happens.

"STS-Soya Technology Systems Limited no longer exists. It was the decision of APV's CEO to close it down as an independent company when the big APV reorganization took place. When we moved to Denmark we became DTD-Soya Technology Division. Now Danish Turnkey Dairies has itself become a division of the APV Pasilac Ltd and the official name is DTD-APV Pasilac Ltd (the result of mergers and takeovers!). Asger Somer Hansen now handles soymilk activities within the APV group and works in DTD-APV Pasilac Ltd.

"John Wilson still works at Alfa-Laval in Lund as far as I know–at least he did 2 years ago. Alfa-Laval also has another soymilk person, a young woman.

Note: Lindner, the managing director of Soya Technology Systems from May 1982 until Nov. 1989, has a good grasp of the world soymilk market. Address: P.O. Box 19002, S-250 09 Helsingborg, Sweden. Phone: 42-92776.

9492. Krohn, Joni. 1990. Standard Industrial Classification (SIC) Codes: SIC classification ended in about 1984; SITC (Standard International Trade Classification) is now in use (Interview). *SoyaScan Notes*. April 5. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** *The Standard Industrial Classification Manual* is published by the Office of Management and Budget (OMB), which also publishes the SIC codes. Another related publication is *The Numerical List of Manufactured and Mineral Products*, and its *Alphabetic Index*, both published by the Census Bureau (within the Department of Commerce); these documents expand the basic 4-digit SIC codes to 7-digits to give more detail: Our industry is most aptly characterized by 2075A = Soybean products.

0116 = Soybean farms. Any industry that starts with zero is agricultural.

2024-071 = Mellorine and similar frozen desserts, incl. those made with tofu.

2026-717 = Products which substitute for fluid milk products [probably includes soymilk].

2026-718 = Other perishable dairy product substitutes [probably includes soy yogurts & cheeses].

2035 = Pickled fruits and vegetables.

2035-234 = Other finished pickles and pickled products [incl. mixes, relishes, peppers, onions, and mushrooms; probably includes miso].

2035-351 = Other sauces, incl. Worcestershire, soy sauce, horseradish, meat, vegetable, etc.

2075 = Soybean flour, grits, meal, cake, and soy oil (unrefined).

2079 = Soybean cooking and salad oil.

2084 = Soybean fibers.

2099-955 = Tofu (Bean curd).

2099-998 = Other perishable prepared foods, sold in bulk or packages, not frozen [probably includes tempeh].

Note: in May 1984 the "Primary SIC" code assigned to tofu manufacturers by Dun & Bradstreet was either 2075 (Soybean Oil Mills), or 2099 (Food Preparation Nec.).

Examples of SITC numbers: Soya bean flour and other protein substances, textured 098.09. Soya bean flour, defatted (excl. protein concentrates) 081.31. Soya bean flour, non-defatted 223.9. Bean curd 098.09... Soya sauce 098.04. Soybean–see soya bean 098.04. Address: Dep. of Commerce, Bureau of the Census, Economic Surveys Div., Industry & Commodity Classification Branch, FOB-3, Room 2744, Washington, DC 20233;. Phone: 301-763-1935.

9493. Drosihn, Bernd. 1990. The founding and history of Viana Naturkost GmbH in Cologne (Interview). *SoyaScan Notes*. April 7. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Bernd started to make tempeh in Cologne in about Aug. 1989 after leaving Soyastern. He moved the company to his present address in Huerth, and started making soyfoods there in Jan. 1990. He makes 3 types of tempeh, 2 tempeh burgers, and 2 tempeh spreads (introduced in 1990). The burgers and spreads are selling well, but

© Copyright Soyinfo Center 2013

the basic tempeh is going more slowly since it is a little unknown to the German consumer–not as well known as tofu. The only other tempeh company in Germany is Byodo in Munich–they also make tofu. Both Bernd's company and Byodo make about 200 kg/week of tempeh. They each make their own tempeh starter. Recently Bernd wrote a little tempeh cookbook titled *Tempeh: A traditional food with a future* (1989, Viana).

The founder of Byodo was Lukas Kelterborn. Harry Whitford came a little after it was founded. Whitford left Soyastern about 6 months ago and since then has been unemployed, living in Dorsten (100 km away; Alleestr. 13a, D-4270 Dorsten 1, West Germany. Phone: 02362-43493), where he runs a Zen Center.

Bernd feels that the future looks bright for his company, in part because he is also making second generation tofu products, including 2 tofu spreads, and 1 tofu sweet cream dessert, all launched in 1990. He buys the tofu from Tofuhaus Tiefenthal because the quality is excellent, better than from Soyastern although the price is higher than that from Soyastern.

He is now also making two short-term misos (a rice miso and chick-pea miso), fermented for 3-4 months, plus a miso spread. He started to sell these 6 weeks ago and they are selling well. His company address used to be Neusserstrasse 199, D-5000 Cologne 60, but he has recently moved. Address: Founder and president, Viana Naturkost GmbH, Schmittenstr. 106, D-5030 Huerth 6 (Fischenich), West Germany. Phone: (02233) 41323.

9494. Drosihn, Bernd. 1990. Observations on the breakup of Soyastern, now in Dorsten (Interview). *SoyaScan Notes.* April 7. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Bernd and Thomas Karas ended their 50:50 partnership at the end of 1988. Karas wanted to increase the size of the company dramatically in order to make large amounts of low-cost tofu and distribute it all over Germany. He wanted to become the largest maker of organic tofu in Europe, and to sell basic tofu to many other companies. Bernd felt that this ambitious plan was not financially feasible or possible. Karas bought a 4,000 square meter chicken slaughter house. But he now has very big problems. His organization and production fell apart. He has been trying for 6 month to find a big company to take over his company, but so far he has not been successful. The main problem is that he has a debt of about DM 800,000 whereas his annual sales are only about DM 2,000,000. He needs a partner desperately, and unless he finds one quickly, he will probably have to declare bankruptcy. He presently makes about 4 tonnes/week of tofu, and is still the largest in West Germany. Address: Founder and president, Viana Naturkost GmbH, Cologne, West Germany. Phone: (02233) 41323 or 221-121175.

9495. Drosihn, Bernd. 1990. The tofu industry and market in West Germany (Interview). *SoyaScan Notes.* April 7. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The largest company is Dorstener Tofu / Soyastern, which presently makes about 4-5 tonnes/week of tofu. But it is having major financial problems due to attempts to grow too rapidly. Second largest is a relatively new company, Geestland (in Bremerhaven), which started to make tofu about 2 years ago. They make about 3-3.5 tonnes/week. Third is Yamato at 3 tonnes/week. Yamato is now 75% owned by the Swiss food company Huegli AG. Fourth is Christian Nagel Tofumanufaktur in Hamburg, quite a ways down at about 1.5 tonnes/week. Fifth is Tofuhaus Tiefenthal (in Lautersheim/Tiefenthal), also at about 1.5 tonnes/week.

KMK Kassel (Hensel), TKW, and Svadesha in Munich each make about 1 tonne/week. As for TKW, they tried to break into the natural foods market, but they didn't succeed. They also tried to get into supermarket chains, but without success. They are selling a little tofu to foodservice organizations and kitchens, but it is not much. They probably make less than 1.5 tonnes/week.

Finally, Life Food (Taifun, in Freiburg) and Berliner Tofurei each make about 0.7 tonnes/week. During the last two years, many new tofu companies have been started to serve the natural foods market. These include companies in Muenster and Constance (Konstanz). Some are now making 700-800 kg/week of tofu and they have a strong regional market. There are now about 15 tofu manufacturers in Germany. Address: Founder and president, Viana Naturkost GmbH, Cologne, West Germany. Phone: (02233) 41323 or 221-121175.

9496. Paino, John. 1990. Update on Nasoya and John's new life and work after retiring from Nasoya (Interview). *SoyaScan Notes.* April 7. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** John has kept ownership of the building in Leominster in which Nasoya's tofu plant operates. Other than this, he has no financial involvement with Nasoya or Vitasoy. "When Vitasoy first went public, only the family bought the stock." John and his partner, Bob Bergwall, were not able to buy any at that time. Nasoya is growing rapidly, and is expanding into a huge new building formerly owned by the New England Shrimp Co.–which had an FDA shutdown. "Their loss was our gain." Much of the success of Nasoya is due to increased sales to the Chinese-American market–thanks to Vitasoy's extensive connections. John has heard that "Azumaya was not a good acquisition for Vitasoy. In the beginning there were many personnel problems, with both Bill and Jack Mizono leaving." John believes that Vitasoy is presently managed very well, with much of the credit going to Winston Lo. John has only fond memories of both Winston and his father, K.S. Lo. "When we met, we all took a real liking to each other. He took us over to his house.

© Copyright Soyinfo Center 2013

I actually spent some time with him in Hong Kong. He was an amazing man. He had a brightness around him."

When K.S. Lo died, he was married to his third wife, who was about 38-40 years old.

John currently has a business marketing super blue-green algae from Celltech in Klamath Lake, Oregon. He has a double-diamond rating in the multi-level marketing scheme. He is also co-chairman of the research and development committee. He now does the same sales volume in algae that Nasoya did in tofu when he left the company. He has heard hundreds of stories from his customers and others who have had dramatic improvements in their health and energy level after taking this product for 3-6 months. Address: Concord, Massachusetts.

9497. Drosihn, Bernd. 1990. Re: New soyfoods companies in Germany, and the German tofu industry. Letter to William Shurtleff at Soyfoods Center, April 8. 2 p. Typed, with signature on letterhead. [Eng]

• ***Summary:*** Gives the addresses of 4 new tofu companies and 2 miso companies, plus an estimate of the weekly production of ten German tofu companies. Address: Founder and owner, Viana Naturkost GmbH, Schmittenstr. 106, D-5030 Huerth 6 (Fischenich), West Germany. Phone: (02233) 41323 or 221-121175.

9498. Nichols, David. 1990. Re: Asia Protein Co. and their soy flakes. Letter to William Shurtleff at Soyfoods Center, April 8–in reply to inquiry. 2 p. Typed, without signature on letterhead. [1 ref. Eng]

• ***Summary:*** Asia Protein Company was established in 1977, and they began soy flake production in 1980. Their process and product is based on Japanese patent 1,378,742. The average annual output is 2,500 is 2,500 metric tons per year. The company's three main customers for the flakes are Tengu (the largest), Sanyo Shokuhin, and Marufuku Shokuhin manufacturing. Each is a large tofu manufacturer and each uses about 30% of the total production. These companies sell their tofu to large chains such as Daiei and Ito Yokado. Another large customer is the Kuge shops started about 4 years ago inside Nichii department stores, as part of the "Shop within a Shop" retailing concept. Kuge uses 4 tonnes/month of flakes, and will add plans to add 7 new shops during 1990. A total of about 50 companies in Japan have switched from using whole soybeans to using soy flakes.

The main reasons these tofu manufacturers have switched to soy flakes are: It takes less time to make tofu using the flakes, and this saves labor costs. The flakes are a high quality product. A company does not need to soak beans overnight and thus can adjust the amount of tofu made during the day with no lead time.

A company named Suehiro makes a push-button tofu making machine that costs about $23,000 and uses the soy flakes. It was designed by Mr. Chikaarashi. Address: Nichii Company of America, Inc., 23440 Hawthorne Blvd., Skypark 2, Suite 140, Torrance, California 90505. Phone: 213-791-0010.

9499. Caplan, Frieda. 1990. Selling tofu at Frieda's Finest, and maintaining good, fresh quality (Interview). *SoyaScan Notes.* April 17. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Frieda founded this company in 1962. She used to be president but Karen Caplan, her daughter (age 35) is now president. The original company name was Frieda's Specialties Inc. They added Frieda's Finest to the name in about 1976-77. The company carries "The highest quality selection of exotic produce and the most incredible edibles." She started selling tofu under the manufacturer's label in Jan. 1977 for a Chinese New Year promotion to see if the product would sell (she does not recall who the manufacturer was). Bill Mizono of Azumaya introduced her to Hinode Tofu Co. and Mr. Yamauchi. On 26 June 1977 she began to sell firm tofu under the Frieda's Finest label. It was made by Hinoichi in Los Angeles. "Hinoichi is the most wonderful company to work with. They have great integrity. We are their only account where they pay for all the film and all the packaging. I think we're now their biggest customer." In 1983 the brand was changed from Frieda's Finest to Frieda of California. Since 1979 tofu has been one of Frieda's best-selling products, and has been in the top 6 since 1982.

As part of Frieda's Consumer Program, there are recipes on each package, and the consumer is invited to write in for more recipes and information. The firm tofu has different recipes from the soft. The latter was just introduced this week. Bess Petlak is the consumer relations specialist. They get a great many letters about tofu, with a surprising percentage coming from first-time users. About 90% of these are requesting more recipes and compliments. The company has two product lines that contain tofu: The Slim Line (low calorie) and the Foods of the Oriental Line. There is a recipe brochure for each product line. The Slim Line Vegetable Guide (1987) defines tofu but does not give a recipe.

Frieda's has a program to keep tofu stored at low temperatures. First, the tofu is pasteurized and quickly cooled by the manufacturer, then all of it is packed in crushed ice in waxed cardboard boxes. On each case carton is written "Tofu. Pasteurized–Perishable. 12/19 oz. tubs. This side up. Keep at 32º-35ºF. Do not freeze. Keep refrigerated."

Hinoichi delivers daily within 30 minutes after the tofu is made and they are located right around the corner. In hot weather, Frieda adds more ice. Frieda ships all tofu in refrigerated trucks, and retailers are advised to keep it as cold as possible without freezing it. "Much of our tofu is sold on a bed of ice. They ice all the cut melons. There isn't a department that doesn't have an icing machine. Since Jan. 1977 we have never issued one credit in all these years on quality" (i.e. has had no problems with poor tofu quality)

© Copyright Soyinfo Center 2013

"except for one air shipment to Hawaii when 3 of the film lids came off. Each individual package lid says, 'Change water daily. Keep refrigerated.'

"I am so mad at Morinaga for the negative publicity for tofu they are putting out. This is the most destructive thing that has ever happened to the tofu industry. For me, it was totally shameful. I've never seen anything like this in the produce business in all these years–never! Its very demeaning and insulting. Like one lettuce grower criticizing another who uses pesticides. You build an industry by positives, not by negatives. If everybody does well, they'll do well. I've confronted Art Mio on these statements he's making. In addition he feels that the Maine ban on aseptic cartons only applies to milk, not to his tofu. But industry people disagree with him." The rise of Mori-Nu aseptic tofu has not cut into her market for fresh tofu at all, but it has created a new market for aseptic soft tofu. To respond to this, Frieda is launching a fresh soft tofu this week.

In 1978 tofu was #40 on the company's list of the top 40 best-sellers. It rose to #12 in 1979, #8 in 1980, #7 in 1981, #4 in 1982, #2 in 1984, #4 in 1986, #3 in 1987, and #4 in 1988 (kiwi fruit, pearl onions, and egg rolls beat it out). Every year, without exception, tofu volume has increased, and it has increased more rapidly in recent years. Frieda's now sells over 300 products.

In 1982 Frieda addressed the Food Writers of America at the FMI and *Better Homes and Gardens*, when Doris Edie was editor, came out with a special diet and exercise edition of the magazine. In the preface it highlighted tofu and told them to buy it in their produce department. Frieda only sells her products in the produce department. Though her tofu is much more expensive than Nasoya's, it sells very well in competition on the Eastern Seaboard, Toronto, etc. People buy for quality not for price, and they buy the Frieda Line and the program–with the guaranteed refund for any returns. Address: Founder, Frieda's Finest / Produce Specialties Inc., P.O. Box 58488, Los Angeles, California 90058. Phone: 213-627-2981.

9500. Dorow, Detlef. 1990. A brief history of Berliner Tofurei (Interview). *SoyaScan Notes.* April 17. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The company started making tofu products in Aug. 1988. They started making 4 products: Natural tofu, herb tofu, spice tofu, and tofu with shoyu sauce. They now also make 4 other tofu products, and sell tofu snacks. They produce 1,000 kg/week of tofu, but they have the capacity to produce 7,000 kg/week if they worked 3 shifts. The company has 3 owners and 4-5 employees. Detlef started the company with two. He was the official owner. Now the other owners are his friend, Ralf Hoffmann, and a Taiwanese man [probably Shi-Jong Chen]. Address: Luebennerstr. 4, D-1000 Berlin 36, West Germany. Phone: 030/612-7931.

9501. Marshall, Philip. 1990. The soymilk industry and market in the UK (Interview). *SoyaScan Notes.* April 17. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The two brands of soymilk with the largest shares of the UK soymilk market are both imported: Provamel, the best-seller, is imported from Alpro in Belgium. Granose Soya Milk is imported from DE-VAU-GE in West Germany.

There are four soymilk manufacturers in the UK. The largest is probably Unisoy Milk 'n' By-Products Co. in Stockport (Cheshire County near Manchester). Their quality is excellent, almost as good as Alpro's. The people who founded Unisoy were formerly involved with Soya Health Foods Ltd. The founder, who had the money, died before production started. [Note: Neil Rabheru (see interview, 1990 July 2), founder of Unisoy, says the previous 2 statements are not true.] Unisoy started making soymilk about 4 years ago, and today their biggest product is own-label soymilk, packed in Tetra Brik by a contract packer, and sold to Sainsbury, a large chain/multiple retailer in the UK. Unisoy does not and will not make tofu. The company is not very strong. The person in charge is Neil Rabheru, of Indian extraction, a very nice man. He recently sold the company for a relatively small sum.

Second largest soymilk manufacturer is Soya Health Foods in Trafford (Sunrise brand, founded by Michael Cole and Mr. Arora, a Sikh / Indian). It was the Indian connection that resulted in the formation of Unisoy some years ago. Third may be the Regular Tofu Co., a division of Haldane Foods (Arkady/ADM), which produces Sojal Soya Milk. The Sojal brand was the property of another company in France, which originally produced the product for them using a soymilk powder made in Sao Paulo, Brazil (by Norsul, Agro-Nippo Productos, or ITAL?). Haldane no longer has the product produced in France but they still use the Sojal brand, and still has the product produced by another company (in what country is not known) and it is probably now made from whole soybeans rather than soymilk powder. [Note: The only soymilk listed in Haldane's Oct. 1989 catalog is So Good Soya Milk (organic or non-organic); Sanitarium Foods in Australia makes a product by the same name].

Fourth is Plamil, which contracts with some other company to have its soymilk made from soy protein isolates. They are quite a small company, ethically based, into vegan foods and marketing strategies from the 1960s and 1970s. Fifth is Itona (pronounced ai-TOW-nuh), which makes a soya milk of some description, but they are not really in the mainstream of the soymilk market. They probably make their soymilk from soy protein isolates and it is sold in cans–every other brand is in Tetra Pak or Combibloc. Address: Owner, Cauldron Foods Ltd., 149 South Liberty Lane, Ashton Vale Trading Estate, Bedminster, Bristol BS3 2TL, England. Phone: (0272) 632835.

9502. Mio, Art. 1990. In defense of Mori-Nu's negative publicity about tofu, and praise for Hinoichi (Interview). *SoyaScan Notes.* April 17. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** (1) The industry had the problem of sour tofu, and tofu had developed a bad image long before Morinaga ever began making an issue about it. How many clippings have you read that say, "Tofu needs a good PR agent." (2). Except for rare, accidental slips, the negative publicity and advertising generated by Mori-Nu has been directed only to the food trade (such as supermarket produce and natural foods business publications) and not to consumers. The matte release is the only thing that was voluntarily sent to consumer publications.

It is too bad more tofu manufacturers are not as careful with sanitation as House Foods & Yamauchi, Inc. (Hinoichi). "When I was working at JFK, Hinoichi was packing ice in the case with their tofu. I believe that Hinoichi has the best quality tofu in America. I have confidence in the cleanliness of their manufacturing operation, their refrigeration systems are all state of the art, they ship the tofu to the refrigerated deli warehouse. It goes out on a refrigerated deli truck, and it is sold in Los Angeles stores in the dairy case, which is kept below 45ºF. In Los Angeles, he refuses to let his product be sold anywhere except the dairy or deli cases. He won't sell it in the produce case in Los Angeles." Mr. Yamauchi would like Mori-Nu to private label their tofu for Hinoichi; this would ensure freshness in outlying areas over which he has little control of the storage conditions. Address: Morinaga Nutritional Foods Inc., 5800 South Eastern Ave., Suite 270, Los Angeles, California 90040. Phone: 213-728-4325.

9503. *China Daily.* 1990. Bean curd making machine exhibited at 1990 Guangzhou Export Commodities Fair. April 18. p. 2g. *

9504. Versaille, Magda. 1990. Recent developments at Jonathan PVBA (Interview). *SoyaScan Notes.* April 18. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Magda, a French woman, is the wife of Jos Van de Ponseele, the founder and former manager of Jonathan. Jos no longer works at Jonathan. He sold the company to Lima Foods in Belgium on 1 April 1989, and stopped working there at about that time. The present managing director of Jonathan is Mr. Ludo Peters, who does not speak good English. Lima Foods was subsequently purchased by a French company, whose name Magda does not know. Magda still works at Jonathan. They now live near Kapellen; their private home number is 91-31-6464. The only other company in Belgium that makes tofu is Seven Arrows. Jonathan is located in Kapellen, 20 km north of Antwerp in the direction of the Dutch border. The postal code is B-2080, not 2070. The B-2070 was a misprint.

All products launched in 1988 were developed when Jonathan hired/engaged a famous cook, with whom he worked he closely. Jonathan also did the biological and biochemical laboratory analyses. Address: Antwerpesteenweg 336, B-2080 Kapellen, Belgium. Phone: 3/664.58.48.

9505. Morinaga Nutritional Foods. 1990. Mori-Nu's "Tofu Magic" cookbook is now available nationwide through Baker & Taylor distributors (News release). 5800 South Eastern Ave., Suite 270, Los Angeles, CA 90040. 2 p. April 20. Plus photo.
• ***Summary:*** This "low-cholesterol, gourmet cookbook featuring easy-to-make recipes and color photography, is now available through Baker & Taylor... one of the largest book distributors in the United States... This year, Mori-Nu plans to add a new chapter featuring recipes for their new extra firm tofu.

"Julia Weinberg, author of 'Tofu Magic,' is also the best-selling author of two prior cookbooks, 'Gourmet Bouquet' and 'The Big Beautiful Book of Hors d'oeuvres.' Weinberg is a national food stylist based in Los Angeles, where she is director of her own food styling and recipe development company. All recipes in 'Tofu Magic' were developed by Weinberg.

"'Tofu is a miracle food, but the world just doesn't know it yet,' said Weinberg. 'With 'Tofu Magic,' we hope to show people that cooking with tofu is easy and limitless." Address: Los Angeles, California. Phone: 213-728-4325.

9506. *Jefferson Bee* (*Jefferson, Iowa*). 1990. Nichii Company will build plant in Jefferson [Iowa]. April 24. p. 1-2.
• ***Summary:*** "Nichii Company of America Inc. will construct a $2 million soyflake processing plant in Jefferson adjacent to the West Central Cooperative (WCC) elevator facility. Governor Terry Branstad made the announcement at his morning press conference at the state capitol in Des Moines...

"The plant will begin production this fall with an output of 1,000 tons of soyflakes per month. The company's plans call for the eventual production of 3,000 tons per month, with three shifts in operation on a round-the-clock basis.

"Employment initially will be about seven people, with the work force expected to rise to more than 15 when all three shifts go into production. When round-the-clock operation is achieved, the Nichii plant will process soybeans at the level of 1.5 million bushels per year...

"Mr. Toshimine Kobayashi, president of Nichii Co. Ltd. of Osaka, Japan, plans to come to Iowa in November to open officially the new plant.

"Mr. Kobayashi explained, 'Due to its topographical characteristics, proximity to a suitable soybean supplier, rail and road access, and the economic incentives offered by the city of Jefferson, this site was judged to best suit Nichii's needs. Representatives of Nichii Co. Ltd. also appreciated

© Copyright Soyinfo Center 2013

the civic spirit and friendliness of the citizens of Jefferson which seems to be characteristic of all Iowans.

"Nichii Company hopes to procure eventually for the Jefferson plant 'organically grown or chemical residue free soybeans, which are going to be in larger demand as our society is increasingly concerned with health and a cleaner environment.'

"The new plant in Jefferson will process a flake which allows tofu makers to prepare the product within a few minutes of its purchase, therefore actually making the tofu product in the store. Nichii Company is currently using that process in several of its stores in Japan."

A large photo shows four Nichii executives, incl. Itaru (Terry) Tanaka, David Nichols, Shigetaka Hamai, and Shigeru Chikaarashi.

9507. Bremer, Paul E. 1990. History of Geestland (Interview). *SoyaScan Notes*. April 25. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Paul founded this tofu manufacturing company, whose name is simply Geestland. Located inside a natural food shop (*Bioladen*) at Burgermeisterschmidt Str. 212, D-2850 Bremerhaven, Geestland began to make tofu in Feb. 1985. From the beginning, the company made four tofu products: Natural tofu, Tofu with herbs, Smoked tofu, and Dried-frozen tofu. Only the latter has been discontinued. In about April 1988 the company moved into a larger location at Friedrichstrasse 19 in Bremerhaven. In June 1988 they launched Tofu with roasted nori, and Tofu with roasted sesame. They also started a fast food program. Concerning fast foods, Germans say: "Aufreissen, rein Beissen," or "Just open your mouth wide, and take a bite." These foods simply require brief baking. In Jan. 1990 the company moved again to Bremerhaven am Fischbein 1, D-2850 Bremerhaven.

Paul is the only owner and he employs 10 workers. Geestland now makes 3,000–3,500 kg/week of tofu. Of tofu makers in West Germany, he thinks Soyastern is the largest, Tofumanufaktur Christian Nagel in Hamburg may be number 2, and Geestland may be the third largest. Address: Bremerhaven, Am Fischbanhof 1, D-2850 Bremerhaven, West Germany. Phone: +49 471 76340.

9508. Amante, Agathe. 1990. La petite graine qui monte [The little grain that is rising]. *Revue Techniques des Hotels et Restaurants*. April. p. P&B 6-9. [Fre]
• ***Summary:*** Discusses soy flour, soy protein concentrates and isolates, soymilk, and tofu, plus their nutritional benefits. To develop new products, Cacoja is working with the hotel school of Strasbourg–creams, desserts, sauces, and entrees, not to mention tofu raviolis, quenelles, sauces and dressings without cholesterol, etc. Triballat makes a type of yogurt that contains no milk or cholesterol. Soyfoods fit perfectly with the now fashionable "slender cuisine" (cuisine minceur). 2% of soy proteins can be added to meats without changing the labeling. A photo shows 3 jars of Cacoja's Formoja-brand soymilk dressings: Sauce salad, Sauce Mexicaine, and Sauc'annaise. Each has "No Cholesterol" written prominently below the product name. Soyfoods can help attract people to restaurants, they are an excellent ingredient for the restaurateur, and they can play a major role in the emerging light new French "Nouvelle Cuisine." Gives a recipe for Tofu Red & Green Mousse. Address: France.

9509. Bates, Jonathan. 1990. West Coast tofu industry: Soybean market outlook for Malheur County, Oregon. Oregon State University, Corvallis, Oregon. 33 p. [12 ref]
• ***Summary:*** Contents: Introduction. Soybean market: World and domestic. The low technology soyfoods industry. Processor requirements. Assessment of producing soybeans in Malheur County. Conclusion. West Coast tofu and soyfood processors: California, Oregon, Washington. Bean warehouses and cleaners. Selected soybean brokerages and growers. Other information. Literature.

"There is interest in Malheur County, Oregon in introducing soybeans as an alternative rotation crop in place of wheat." Research is being done at the Malheur Experiment Station. These would be food grade soybeans destined for the West Coast soyfood processing industry. "The purpose of this report is to investigate the west coast food grade soybean market. Particular emphasis is placed on the tofu market in Portland and western Oregon, Seattle (Washington), and San Francisco (California). The main objectives of the study are: 1. To determine the requirements and/or preferences of soyfoods processors in regards to soybean quality, bean variety, growing regimes (organic or regular), packaging and delivery, and method of purchase. 2. To determine the economic feasibility of using soybeans as a rotational crop in the county in place of wheat. 3. To consider the competitive advantages, if any, of growing soybeans in Malheur county as opposed to the more traditional growing areas of the Midwestern and Southeastern United States.

Information on soybean consumption is given for the following tofu and soyfoods manufacturers, ranked here in descending order of soybean usage. All produce tofu and/or soymilk unless otherwise noted.:

Pacific Foods Inc., Tualatin, Oregon (57,700–77,000 lb/week [expressed as 3-4 million lb/year] of nonorganic and organic soybeans from midwest brokers, bulk and bagged, for soymilk. "Growth is expected to slow unless soymilk can be marketed to the general public").

Azumaya Inc., San Francisco, CA (48,000–60,000 lb/week of Vinton and Corsoy purchased from broker. Market growing at 3-4% annually).

House Foods & Yamauchi, Los Angeles, CA (54,000 lb/week of nonorganic Corsoy and Vinton purchased from broker-grower association. Steady growth. Expanded capacity in 1987).

Mighty Soy, Los Angeles, CA (11,000–12,400 lb/week

© Copyright Soyinfo Center 2013

of mainly Corsoy and Vinton, half organic and half not, purchased from brokers or growers associations).

Wy Ky, Los Angeles, CA (7,800–9,000 lb/week of nonorganic Corsoy, purchased from growers. 5% annual growth).

Island Spring and Soy Resources Inc., Vashon, WA (5,400–6,000 lb/week of organic Corsoy, purchased broker. 3-5% annual growth).

Surata Soyfoods, Eugene, Oregon (3,000–4,200 lb/week of organic Vinton and Corsoy purchased from broker-grower).

Silver Sprout, San Francisco, CA (3,000–3,600 lb/week of nonorganic Corsoy and Vinton purchased from broker, bagged or bulk).

Dae Han & Co., Portland, Oregon (2,400–3,000 lb/week of organic Vinton purchased from Midwest grower association. Steady growth).

Turtle Island Soy Dairy, Husum, WA (2,100–2,400 lb/week of organic Corsoy and Vinton purchased from Iowa broker for tempeh. 5% annual growth).

Arcata Soyfoods, Arcata, CA (1,200 lb/week of organic Corsoy purchased from grower).

Fuji Tofu Co., San Jose, CA (1,200 lb/week of organic varieties purchased from broker).

Ashland Soy Works, Ashland, Oregon (1,800 lb/week of organic Vinton and Corsoy, purchased from growers. Steady growth).

Hoven Foods Co., Seattle, WA (1,655 lb/week of Lee 74 purchased from Jacob Hartz Seed Co. 5% annual growth).

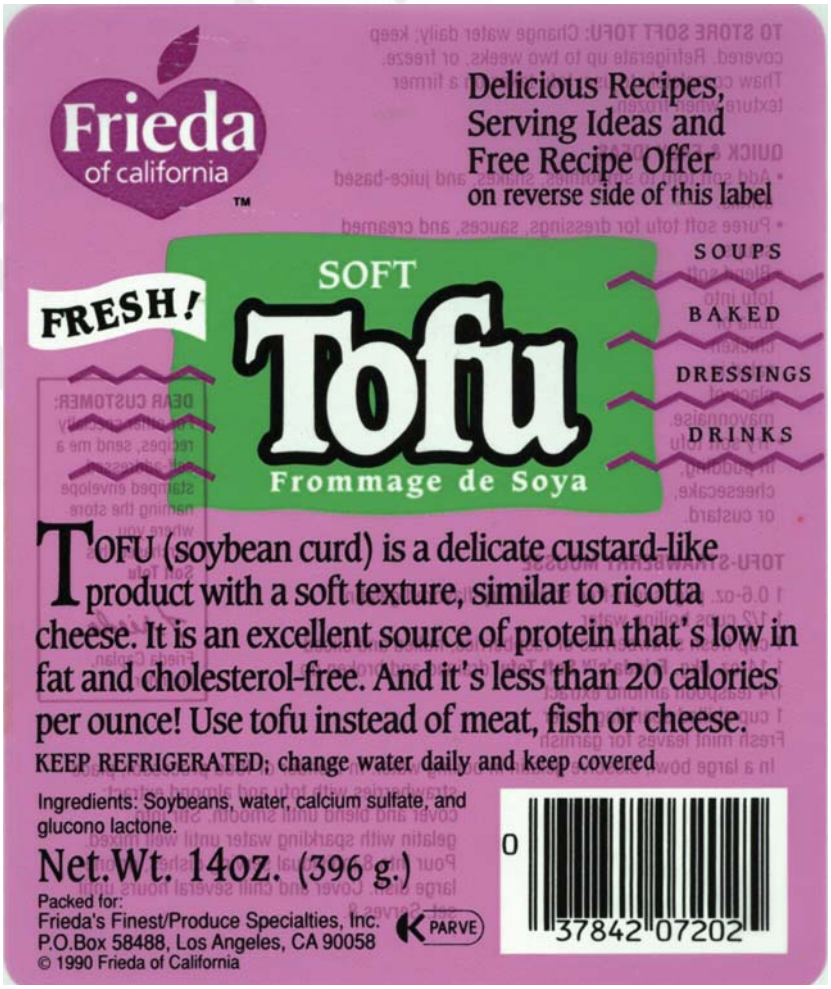
Tacoma Soyfoods, Tacoma, WA (1,200 lb/week of Vinton, Corsoy, Davis, Lee, and Holland, organic and inorganic, purchased from Midwest Soy International [grower assoc.]. 5% growth last year).

Kobayashi's Soybean Products, Ontario, Oregon (420–540 lb/week of Corsoy purchased from Midwest growers). Address: Graduate research asst., Oregon State Univ., Corvallis, Oregon.

9510. Cacoja. Affiliate of Coopérative Agricole de Colmar (CAC) (Marketer). 1990. [Soy products made by Cacoja]. 8 rue Merxheim, 68500 Issenheim, France. 5 p. Catalog. [Eng; Ger]

• ***Summary:*** This photocopied black-on-white brochure, with pages stapled together, written in only English and German, attempts to describes the Cacoja/Formoja lines of soy products: The Soj'aperitif line (soynuts), the soybean sauce line (a soy mayonnaise, a sauce, and a salad dressing), chocolate tablets (2 types of soy chocolates), Formoja beverage and dessert line, and soybean delight and tofu ravioli line. Lacking a title, and filled with errors and poorly chosen words, this document is very poorly done–almost comical. Address: Issenheim, France.

9511. **Product Name:** Frieda of California Soft Tofu: Frommage de Soya.
Manufacturer's Name: Frieda's Finest / Produce Specialties Inc. Made in Los Angeles by House Foods & Yamauchi, Inc.
Manufacturer's Address: P.O. Box 58488, Los Angeles, CA 90058. Phone: 213-627-2981.
Date of Introduction: 1990. April.
Ingredients: Soybeans, water, calcium sulfate, and glucono lactone.
Wt/Vol., Packaging, Price: 14 oz (396 gm) packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.
How Stored: Refrigerated.
New Product–Documentation: Talk with Frieda Caplan. 1990. April 17. This product was launched this week. It is private labeled for her. Grand Union, a chain on the East Coast that carried Nasoya's tofu, came to her and asked her



© Copyright Soyinfo Center 2013

to please add a soft tofu (not silken).

Label sent by Frieda. 1990. April 21. Copyrighted with date. 4.5 by 5.25 inches. Light purple, dark purple, green, black, and white on clear film. "Delicious recipes, serving ideas, and free recipe offer on reverse side of this label. Fresh! Soups. Baked. Dressings. Drinks. Tofu (soybean curd) is a delicate custard-like product with a soft texture, similar to ricotta cheese. It is an excellent source of protein that's low in fat and cholesterol-free. And it's less than 20 calories per ounce! Use tofu instead of meat, fish or cheese. Keep refrigerated; change water daily and keep covered. UPC indicia. On Reverse side: Recipe is for Tofu-strawberry mousse. Dear customer: For other specialty recipes, send me a self-addressed, stamped envelope naming the store where you purchased this Soft Tofu. Frieda Caplan, Founder." "To store soft tofu, change water daily; keep covered. Refrigerate up to two weeks, or freeze. Thaw completely to use; tofu takes on a firmer texture when frozen. Quick and easy ideas: * Add soft tofu to smoothies, shakes, and juice-based drinks. * Puree soft tofu for dressings, sauces, and creamed soups. * Blend soft tofu into tuna or chicken salad in place of mayonnaise. * Try soft tofu in pudding, cheesecake, or custard."

9512. **Product Name:** Smoked Tofu Satay.
Manufacturer's Name: Goodlife Foods. Ltd.
Manufacturer's Address: Unit E, 32/34 Gordonhouse Road, Parliament Hill Fields, London, NW5 1LP, England. Phone: 01 485 6583.
Date of Introduction: 1990. April.
New Product–Documentation: SoyaFoods (ASA, Europe). 1990. 1(1):3.

Leaflet published by Goodlife Foods Ltd. and Adams Marketing. 1990. April. "Goodlife Foods: New in Frozen Foods!" A photo shows the boxes/labels of both products. Note: As of mid-1992, the company is located at: 34 Tatton Court, Kingsland Grange, Warrington, Cheshire, England.

9513. **Product Name:** So Good Strawberry Bombes (Non-Dairy Frozen Dessert Confections).
Manufacturer's Name: Haldane Foods Ltd. (Marketer). Made in Clwyd, Wales, by Genice Foods Ltd.
Manufacturer's Address: 25 Hayhill, Sileby Road, Barrow upon Soar, Leicestershire LE12 8LD, England. Phone: 050981-6611.
Date of Introduction: 1990. April.
Ingredients: Incl. tofu.
Wt/Vol., Packaging, Price: 110 ml each, 4 per pack. Retails for £1.99.
How Stored: Frozen.
New Product–Documentation: SoyaFoods (ASA, Europe). 1990. 1(1):3. "Helfex '90." The Haldane Foods Group celebrated its 21st birthday with the launch of 21 new products at the Helfex show in Birmingham. England.

Haldane Foods Group. 1990. "Twenty-one Today. Twenty-new and exciting products launched at Helfex alone." At least 12 of these are soyfood products. "Iced soya dessert with a centre of strawberry sauce enrobed in carob coating."

Talk with Ray Pierce of Genice Foods Ltd. 1994. Feb. 4 and 8. Following the acquisition of Genice by the Haldane Group, a small soya milk plant was installed at Genice with the ability to produce limited quantities of tofu also. With the new availability of tofu, two new non-dairy frozen products were launched, including So Good Strawberry Bombes for the Haldane Group, a 100 ml vanilla flavored base with a strawberry puree center, coated with carob couverture, and sold in retail packs of four.

9514. **Product Name:** So Good Tofu Dessert (Ice Cream Style) [Tofu and Wild Blackberry, or Tofu and Strawberry & Vanilla].
Manufacturer's Name: Haldane Foods Ltd. (Marketer). Made in Clwyd, Wales, by Genice Foods Ltd.
Manufacturer's Address: 25 Hayhill, Sileby Road, Barrow upon Soar, Leicestershire LE12 8LD, England. Phone: 050981-6611.
Date of Introduction: 1990. April.
Ingredients: Incl. tofu.
Wt/Vol., Packaging, Price: 750 ml (3/4 liter) round paperboard tub. Retails for £1.59 incl. V.A.T. (Value added tax).
How Stored: Frozen.
New Product–Documentation: SoyaFoods (ASA, Europe). 1990. 1(1):3. "Helfex '90." The Haldane Foods Group celebrated its 21st birthday with the launch of 21 new products at the Helfex show in Birmingham. England.

Haldane Foods Group. 1990. "Twenty-one Today. Twenty-new and exciting products launched at Helfex alone." At least 12 of these are soyfood products. Made from tofu.

Talk with Philip Marshall of Cauldron Foods. 1990. July 9. The Haldane Foods Group owns about 50% of Genice [pronounced jen-AIS]. Up until now, Genice has been almost the sole manufacturer of non-dairy ice creams for companies in the UK (including Sunrise and Unisoy). They were probably the first manufacturer of soymilk in the UK. Cauldron Foods does not have his made by them because he thinks there are better sources and because they are a competitor.

Comment from a recent visitor to the UK on the flavor of So Good Ice Cream Style. 1990. July 16. "I find it to be a bit like eating beany tasting water."

Talk with Neil Rabheru of Unisoy. 1991. Sept. 16. This product is made by Genice, which has a pilot plant to make soya milk and tofu (for Direct Foods). Now the soya milk is made by Unisoy. The Haldane Foods Group has about 99% of the soy ice cream market in the UK. The Sunrise

© Copyright Soyinfo Center 2013

Ice Dream is now actually made by Genice Foods, in the Haldane Foods Group. Sunrise has never made its own ice cream.

Health Food Business (UK). 1992. May. p. 33. "Frozen Desserts. Haldane Foods Group. So Good range of non dairy soya ice products from Haldane, with no lactose or animal fats to worry about. Smartly packaged, the So Good range is available as Tofu Desserts in Vanilla & Strawberry and Wild Blackberry, Tofu Delight Bars (choc ice equivalents) and Strawberry Bombes Soya Carob Dessert."

Talk with Ray Pierce of Genice Foods Ltd. 1994. Feb. 4 and 8. Following the acquisition of Genice by the Haldane Group, a small soya milk plant was installed at Genice with the ability to produce limited quantities of tofu also. With the new availability of tofu, two new non-dairy frozen products were launched, including So Good Tofu Dessert for the Haldane Group, a 3/4 litre pack in a round cardboard tub flavored as a strawberry/vanilla split, or as wild blackberry.

9515. Inforesults Ltd. 1990. Canadian soyfood directory. Brampton, Ontario, Canada. 22 p. April 6. 28 cm.
• ***Summary:*** This directory, prepared for the Ontario Soybean Growers' Marketing Board (P.O. Box 1199, Chatham, Ontario, Canada N7M 5L8), lists individuals and organizations involved in the production of soybeans and soyfoods in Canada. The majority of listings are for commercial firms. The directory includes the name of the firm or individual, address, postal code, phone number, contact person, activities (any of 10 types, such as manufacturer, exporter, importer), products (any of 18 types, including soymilk, tofu, soybeans, or services), and whether or not the products are claimed to be organic. The various listings are sorted by province, and within province by company name. Address: Information Research Consultants, Suite 204, The Mill, 60 Queen St., East Brampton, ONT L6V 1A9 Canada. Phone: (416) 453-1174.

9516. Leigh, Roberta. 1990. Soyfoods: Why their popularity is growing. Special advertising section. *New Age Journal* (*Boston, Massachusetts*) 7(2):100-. March/April.
• ***Summary:*** Since the 1920s, Americans have been taught that they need at least two servings of meat and two glasses of milk each day to get enough protein. Many people switching to vegetarian diets or reducing their meat consumption feel most comfortable if they continue to plan at least some of their meals around a high-protein food.

"Consequently, the popularity of soyfoods has boomed during the past two decades... They can also be prepared in a number of ways, such as tofu and tempeh, that mimic 'meatiness' in terms of eating satisfaction.

"Shoyu and tamari, both fermented soy sauces, and miso, a fermented soy paste, are often used as bases for soups, gravies, and sauces; many people feel they impart a rich flavor to meat stock. Soy milk and soy cheese are popular with people who want to minimize or eliminate dairy products from their diets. There are even smokey-flavored imitation bacon products made from soy.

"Tofu is a cheese-like product containing the protein, oil, and soluble carbohydrates from whole soybeans that have been crushed and cooked...–Roberta Leigh."

9517. Moran, Victoria. 1990. Weight training for vegetarians: Pumping iron on plant power. *Vegetarian Times.* April. p. 34-39. [3 ref]
• ***Summary:*** About vegetarian body builders. Spice Williams is a vegan who likes tofu and tempeh. She played a female Klingon in *Star Trek V.* Two photos show Williams, one as a Klingon. Also features Bill Pearl, Andreas Cahling (each with a photo), and Ron Weston.

9518. Muso Co. Ltd. 1990. Muso product manual: Foods from Japan. Tanimachi 2-5-5, Chuo-ku, Osaka 540, Japan. 62 p. Catalog. April. 30 cm. [Eng]
• ***Summary:*** This English-language catalog describes Muso's natural-food macrobiotic products that are exported to the West. There are 8 pages of color photos at the front, and many flowcharts and recipes in the body of the catalog. Interesting color photos include: Shoyu fermentation room. Spreading moromi before pressing to make shoyu. Hatcho miso aging room. Drying kombu and cultivating nori on nets. Umeboshi and brown-rice vinegar. Shiitake mushrooms growing on logs and huge kudzu roots.

Contents: Shoyu (organic, low salt), tamari (wheat-free soy sauce), miso (Hatcho, barley, rice, white miso, brown-rice miso, awase miso [mixed miso], buckwheat miso, unpasteurized miso [nama miso]), seaweeds, Japanese pasta, wheat free pasta (incl. kudzu noodles), Japanese tea, other beverages, soymilk, amazake, ume/plum products (incl. umeboshi), Japanese pickles, dried foods (incl. kudzu root starch, shiitake mushrooms, koya tofu, fu [gluten cake]), condiments (incl. tekka miso, *nori no tsukudani*, natto miso [miso condiment]), seasonings, instant foods (incl. brown rice mochi, yomogi mochi, kibi mochi, yaki mochi, abekawa mochi with kinako, cooked brown rice, ramen [Chinese style noodles], instant miso soup), crackers and chips, barley malt syrup and rice malt syrup, food supplements (plum balls, kombu balls), adzuki beans, black soybeans, nigari. Address: Osaka, Japan. Phone: 06-942-0343.

9519. **Product Name:** [Soy Cream, Soy Cottage Cheese].
Foreign Name: Crema de Soya, Requesón.
Manufacturer's Name: Productos Alimenticios Soyavyn.
Manufacturer's Address: Planta Soyavyn, 2a Calle Poniente No. 2-4, Lourdes, Colón, Depto. La Libertad, El Salvador. Phone: 51-0705 or 23-3554.
Date of Introduction: 1990. April.
Nutrition: Per 100 gm.: Protein 9.7 gm, fat 5.6 gm, minerals 0.4 gm, carbohydrate 3.1 gm.

© Copyright Soyinfo Center 2013

New Product–Documentation: Letter and Label sent by Kris Duville of Productos Alimenticios Soyavyn. 1992. June 2. These two products were introduced in May 1990. These fresh dairy analogs are prepared from soymilk coagulated with calcium chloride. They are prepared from soymilk curds mixed with milk, vegetable oil, and other ingredients.

Letter from Chris Duville. 1992. Dec. 13. Crema de Soya and Requesón are sold in white blank pouches, only identified by a small label giving the name and maker (Soyavyn). The volume is too small to order specially printed labels.

9520. **Product Name:** [Soy Cheese].
Foreign Name: Queso de Soya.
Manufacturer's Name: Productos Alimenticios Soyavyn.
Manufacturer's Address: Planta Soyavyn, 2a Calle Poniente No. 2-4, Lourdes, Colón, Depto. La Libertad, El Salvador. Phone: 51-0705 or 23-3554.
Date of Introduction: 1990. April.
Ingredients: Soya, salt, green vegetables.
Wt/Vol., Packaging, Price: 1¼ lb in a folded semi-waterproof paperboard box in a plastic bag.
How Stored: Refrigerated.
New Product–Documentation: Letter from Kris Duville of Productos Alimenticios Soyavyn. 1992. June 2. This fresh cheese was introduced in April 1990. It is a dairy analog prepared from soymilk coagulated with calcium chloride. The "cheese" is strained and kneaded, then finely cut vegetables are mixed in. "We don't use molds to form the cheese, which isn't firm or solid, but semi-plastic in its rheological properties."

Label. 6 by 4.5 inches. Red and blue on white. "Soya, vida, y nutricion. Suggestions for use: With French bread and frijoles. As a substitute for or mixed with cheese of animal origin, with pupusas, etc." Note: Pupusas are the national pride of the Salvadorians; a popular, inexpensive food served in numerous small shops. They consist of a rather thick tortilla stuffed with a filling of cheese, mashed beans, and lard, often mixed.

9521. **Product Name:** Tofu Burgers (Tandoori, Tikka, and Teriyaki).
Manufacturer's Name: Regular Tofu Co. Div. of Haldane Foods Group.
Manufacturer's Address: 25 Hayhill, Sileby Road, Barrow upon Soar, Leicestershire LE12 8LD, England. Phone: 050981-6611.
Date of Introduction: 1990. April.
Wt/Vol., Packaging, Price: Two x 3 oz burgers per unit. 12 units per case. Wholesales for £6.75. Retails for £0.75 per unit.
How Stored: Refrigerated or frozen.
New Product–Documentation: SoyaFoods (ASA, Europe). 1990. 1(1):3.

Haldane Foods Group. 1990. "Twenty-one Today. Twenty-new and exciting products launched at Helfex alone." At least 12 of these are soyfood products.

9522. **Product Name:** Silken Tofu.
Manufacturer's Name: Regular Tofu Co. Ltd. Div. of Haldane Foods Group.
Manufacturer's Address: Hayhill Industrial Estate, Unit 25, Barrow-Upon-Soar, Leicester, Leicestershire, England.
Date of Introduction: 1990. April.
Wt/Vol., Packaging, Price: 135 gm. Retails for £0.39.
How Stored: Refrigerated.
New Product–Documentation: Haldane Foods Group. 1990. "Twenty-one Today. Twenty-new and exciting products launched at Helfex alone." At least 12 of these are soyfood products. SoyaFoods. 1990. 1(2):5. Dec. "Silken Tofu." The Haldane Foods Group has launched the first British made silken tofu. It contains organic soya milk and Welsh mountain water, and is sold in 135g pots at £0.39 recommended retail price.

9523. **Product Name:** [Tofu].
Manufacturer's Name: Rusch.
Manufacturer's Address: Alameda 430, Zacatecas, Zacatecas 9800, Mexico. Phone: No phone.
Date of Introduction: 1990. April.
New Product–Documentation: Talk with Paul Lucas, founder and owner. 1995. April 11. He started making and selling tofu in April 1990, using *The Book of Tofu* (by Shurtleff & Aoyagi). The product was on the market for 2-3 years, then was discontinued for lack of demand in this small town. His company now makes many foods containing textured soy protein, such as: Soy loaf, Soy Patties, Soy Medallions in vegetarian sandwiches with whole-grain breads. They all sell a lot of gluten and gluten products.

9524. **Product Name:** [Spring Rolls].
Foreign Name: Fruehlingsrollen.
Manufacturer's Name: Soto. Named Sojatopf prior to April 1989.
Manufacturer's Address: Wolfsbergerstr. 47, D-8211 Breitbrunn am Chiemsee, West Germany. Phone: 08621-62538.
Date of Introduction: 1990. April.
Ingredients: Tofu, vegetables, mung bean sprouts, glass noodles, sesame seeds.
Wt/Vol., Packaging, Price: 150 gm.
New Product–Documentation: Letter (fax) from Harry Whitford. 1990. May 30. Gives full details on product based on interview with Gerhard (Oskar) Schramm. On 1 Jan. 1990 the company moved to Wolfbergerstr. 47, D-8211 Breitbrunn am Chiemsee, West Germany.

9525. **Product Name:** Toby's Tofu Paté [Original, Spicy

© Copyright Soyinfo Center 2013

Jalapeño, Eggless, or Eggless Tomato].
Manufacturer's Name: Tofu Palace Products.
Manufacturer's Address: 2075 Madison St., Eugene, OR 97405. Phone: 503-345-4407.
Date of Introduction: 1990. April.
Ingredients: Jalapeño: Tofu (organic soybeans, water, nigari), celery, mayonnaise (soy oil, lemon juice, eggs), jalapeño peppers, sweet red peppers, nutritional yeast, mustard, onions, parsley, spices, sea salt.
Wt/Vol., Packaging, Price: 8 and 16 oz package. Retails for $1.65 and $2.99, respectively.
How Stored: Refrigerated.
Nutrition: Per 4 oz.: Calories 140, protein 8 gm, carbohydrates 4 gm, fat 8 gm, sodium 305 mg, cholesterol 6 mg.
New Product–Documentation: Soya International. 1990. April/June. p. 24. Contact: Toby Alves. Label brought from Oregon by Tim Wickens. 1990. Dec. 27. 8 oz plastic tub. Turquoise blue, orange, and beige on white. Illustration of bamboo on lid and of flying birds on side of tub. UPC indicia. "No preservatives. Toby's Jalapeño Paté is a spicy way to try tofu. Dip it with chips or vegetables to add a south of the border zip. Spread it on a bagel or crackers to liven up any snacks or a light meal."

Talk with Toby Alves. 1992. April 14. The main product her company makes is Toby's Tofu Paté. She has on the market 4 tofu pates, which are like a flavored tofu salad.

9526. *USA Today* (*magazine*). 1990. Cooking up a tastier soybean. 118(2539):10-11. April. Special newsletter edition.
• ***Summary:*** Philip E. Nelson at Purdue University's Department of Food Science says: "We hope to improve the taste and quality of soybeans. And we want to increase the domestic and international demand for tofu–a versatile, zero-cholesterol food." Through plant breeding, Purdue has created and patented an experimental soybean in which the beany taste has been reduced greatly. This soybean variety is being used to make better tofu at Purdue University's tofu center.

9527. **Product Name:** [Tofu Burger].
Foreign Name: Tofuburger.
Manufacturer's Name: Viana Naturkost GmbH.
Manufacturer's Address: Schmittenstr. 106, D-5030 Huerth 6, West Germany. Phone: (02233) 41323.
Date of Introduction: 1990. April.
New Product–Documentation: Letter from Bernd Drosihn, founder of Viana. 1990. May 10. This fresh product, which has no label, was introduced in April 1990.

9528. Wolff, David. 1990. The Manchurian soya bean and the development of Northeast Asia, 1899-1922. *Asiatic Society of Japan, Bulletin* (*Tokyo*) No. 4. p. 2-4. April.
• ***Summary:*** The soybean was introduced into Manchuria at the end of the 1800s and by 1899 constituted 79% of the region's total exports. The resulting prosperity made the area a theater of conflict between China, Russia and Japan. "By 1922, almost all bean shipments had been diverted from Vladivostok to Japanese-controlled Dairen, making such 'typically Japanese' foodstuffs as tofu and shoyu generally affordable for the first time... Thus the soya bean played an integral part in the history of Manchuria, bringing first wealth, then strife, and ultimately subjugation." Address: PhD candidate in Russian and Chinese history at the Univ. of California at Berkeley.

9529. Nagel, Christian. 1990. Early history and recent developments at Tofumanufaktur Christian Nagel GmbH (Interview). *SoyaScan Notes*. May 4. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The company name was Christian Nagel Tofumanufaktur from the time it began in 1984 until 1 Jan. 1989, when it was changed to Tofumanufaktur Christian Nagel GmbH. The original address was Oelkersallee 14a, D-2000 Hamburg 50, West Germany. He moved to his present address (formerly an old bakery) on 1 Aug. 1986.

His company is now making about 2,000 kg/week of tofu. He has 7 full-time people (including himself) and 5 part-time. He has not launched any new products within the last 12 months. Many people want his tofu but he does nothing to promote it. They come to him to get it. He has too much to do, and lacks the space and money to produce more. He also needs better organization inside his company.

Christian thinks the four largest tofu makers in West Germany, in descending order of size, are Soyastern, Yamato, Geestland, and Tofumanufaktur Christian Nagel. He thinks that Soyastern will not be able to survive; he has big problems and has had for about 1 year. Geestland, which makes about 4,000 kg/week, has been growing rapidly during the past 2 years; they now sell tofu nationwide. They want to be big. Tofu looks like it has a very bright future in Germany. This weekend there is a meeting of the German Tofu Assoc. in Hamburg. Address: Hamburg, West Germany. Phone: 040 89 49 37.

9530. Igo, Becky. 1990. Kyoto owners, officials agree tofu positive for all. *Tribune-Star* (*Terre Haute, Indiana*). May 6.
• ***Summary:*** Describes the groundbreaking ceremony for Kyoto Food Corp. USA's new tofu plant in Terre Haute. The chairman of the board of Kyoto Food is Kumaharu Shimobo, the president is Yoshimasa Yamashita, and the vice president is Bill Roach. Mr. Roach's wife, Toni, convinced Kyoto Foods to buy the land. Construction of the plant will start in May and full production is expected by November. "Roach said that although Kyoto has purchased 25 acres, the actual plant will sit on only 2.5 acres. The company, he revealed, is looking for other firms to locate at that property." The company hopes to begin by making tofu and later expand

© Copyright Soyinfo Center 2013

into other Japanese health-related food products.

9531. Gaiser, Klaus. 1990. Early history of Tofuhaus Belsen and Yamato Tofuhaus GmbH (Interview). *SoyaScan Notes.* May 8. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The name of his first company was Tofuhaus Belsen, started as a "single man's company" in the village of Belsen near the small town of Moessingen. He started to make tofu commercially in the summer of 1982 (June or July). The company's main product was tofu (called Traditionelle Tofu, and coagulated with calcium sulfate), but it also made a lot of sprouts as a side business–from mung beans, azuki beans, lentils, and alfalfa seeds. It changed into Yamato Tofuhaus GmbH on 1 Jan. 1984 at the same address. The company moved from Belsen to Hirschau near Tuebingen in March 1987. Address: President, Yamato Tofuhaus GmbH, Rittweg 11/1, D-7400 Tuebingen–Hirschau, West Germany. Phone: 7071-71094 or 95.

9532. Gaiser, Klaus. 1990. Impressions of the German Soyfoods Association meeting in Hamburg, and of the outlook for Soyastern (Interview). *SoyaScan Notes.* May 8. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The association was originally founded so that tofu companies could join together to make a "positive profile" and give consumers the confidence that when they buy tofu from a member of the association, they are buying a "traditional, honest product, and there are no foreign or undesirable ingredients used in it." There are unsubstantiated rumors that some large European tofu makers use undesirable ingredients.

The main issues that emerged were small versus large tofu companies, and traditional handcrafted versus modern industrial tofu products. Klaus and Thomas Karas (of Soyastern) turned out to be the main speakers. At the previous meeting of the association, they were both absent, accidentally. The smaller companies realized that they were afraid of the power of Yamato and Soyastern. This time they tried to find common needs and a basis for marketing their products. In the end Klaus and many others felt they had very little in common. The small companies were still afraid of Soyastern and Yamato, and all were afraid of bigger companies like Heuschen- Schrouff. Yet many smaller companies (as in Munich, Berlin, Hamburg, and in the Ruhr area around Cologne) are making good profits making second-generation products and using direct delivery. But the others did not want to make common promotional efforts with Yamato and Soyastern. There was much discussion over use of the terms "traditional" and "handcrafted" in the names of tofu products made by larger scale industrial equipment. There was much checking to see that all members produce according to the association's rules. There will be another meeting of the association in about 2 weeks to decide whether or not they will continue the association.

Klaus feels that the question of whether or not Soyastern will be able to survive depends a lot on what Huegli does with Yamato. Thomas told Klaus that Soyastern's situation is looking a lot better because he took a lot of measures to survive and make his production more rational. But he still hasn't found the money or investor(s) that he needs. Up until now Yamato and Soyastern have been bitter enemies and fierce competitors, but since they joined the association they "stopped the war." Of course they still compete but now the feeling is much better. If the association disbands, Klaus would like to continue it with Thomas to try to expand the tofu market.

Thomas Karas is probably the best informed on the tofu industry in West Germany. He is one of the few people who really understands the need to create a strong tofu association and to get as many members as possible to join–since non-members will also benefit from all association promotional activities.

There are two tofu companies named Byodo Naturkost. They must have separated one day. One is a wholesaler and the other makes tofu in Munich. The one that makes tofu was sold several weeks ago to a butcher (whose name Klaus does not recall). Tomas Jakobi went out of business a year or so ago; a woman bought his company, maybe Jutta Schoenemann. Auenland, thanks to God, no longer exists. Morgenland still exists. For a year or so Alexander Nabben has been trying to get the poor company back on its feet but he is having a hard time. Atlantis still exists but is very small and wants to stay small. You never hear anything about them. Address: President, Yamato Tofuhaus GmbH, Rittweg 11/1, D-7400 Tuebingen–Hirschau, West Germany. Phone: 7071-71094 or 95.

9533. *SoyaScan Notes.* 1990. New Trend: Large European food companies, and agricultural- and dairy cooperatives now launching and actively promoting innovative new tofu and soymilk products: Mostly dairylike and meatlike products (Overview). May 8. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** In Jan. 1980 Vandemoortele N.V., one of Europe's largest oilseed crushers, located at Izegem, Belgium, began to make its first commercial soymilk product (GranoVita Soja Drink in plain and carob flavors, packed in 500 ml Tetra Brik cartons) which was private labeled (co-packed) for DE-VAU-GE, a large Seventh-day Adventist health food manufacturer in West Germany. This was Alpro's first customer. In June 1980 Vandemoortele created Alpro N.V. to take over this production. The company quickly became Europe's leading soymilk producer and by 1990 had about 70% of the European soymilk market. Their new soymilk plant, costing about US$15 million and having a capacity of 45 million liters a year, opened in Wevelgem in June 1990.

In June 1984 Migros, Switzerland's leading retail food

© Copyright Soyinfo Center 2013

chain, launched 5 tofu products: Natural Tofu, Tofu Snack with Spices, Spicy Tofu Spread, Diced Tofu with Cream, and Tofu Bolognaise. In 1985 they introduced Tofu with Mushrooms and Gravy, followed in 1986 by Canned Tofu Kashmir (with Curry and Fruits), Tofu Spread with Cheese (in a Tube), Tofu Chocolate Crème, and Tofunaise (in a Tube), then in 1987 by Seasoned Tofu. In 1986 Migros, a 61 year old cooperative with 1.4 million members, had net sales of 3,166 million Swiss francs. The tofu was made by a Migros company named Conserves Estavayer in Estavayer-le-Lac, near Zurich.

Galactina is a well established Swiss company (located in Belp) that has made a soymilk named Naga Sonda for enteral tube feeding since 1980. In 1981 they launched the product in liquid Tetra Pack. They entered the tofu market in 1984 with Galactina Tofu, then in 1985 added three types of Seasoned Tofu (Gourmet Diced with Soy Sauce & Spices, Provencale with Herbs, and Jardiniere with Vegetables), followed in 1987 with Tofu Spread and 1988 with Tofu Burger and Tofu Salads. All were marketed very attractively.

In Aug. 1985 DE-VAU-GE, one of Europe's oldest and largest producers of vegetarian health foods, began operation of its new soymilk plant (purchased from STS/DTD) in Lueneburg, West Germany. By 1990 they were Europe's second largest soymilk manufacturer, with 15-20% of the market. They also sold many tofu products and were planning to produce tofu in the near future.

In 1985 Laiteries Triballat, a large French dairy products company (mostly cheese, located at Noyal-sur-Vilaine, Brittany) introduced Sojasun, an innovative cultured soymilk yogurt in 4 flavors, two with bits of fruit and two with fruit puree. In Oct. 1988 and early 1989 they promoted the product extensively on French television and in German print media. Sales in several western European countries were said to be good.

In 1986 Parmalat, the Italian dairy giant, introduced a soymilk named Soialat. By 1989 they had created a subsidiary named Parma Soia, which sold three lines of more than 20 soy products. The Campi di Soia line (containing soymilk, soy pasta, sauce, and sprouts) was sold at supermarkets. The Nature Soy line was imported, and the Erboristeria line was for the health food market.

In Jan. 1987 Cacoja, a newly-formed affiliate of the Coopérative Agricole de Colmar (CAC), began production of soymilk and soy desserts at its new, fully-automated plant (with an ultrafiltration system) at Issenheim, France. Purchased from Alfa-Laval, the plant cost 11 million French francs and had a capacity of 1,500 liters/hour of soymilk containing 4% protein. By 1990 Cacoja was Europe's third largest soymilk producer.

In Sept. 1987 Rayner Burgess Ltd., a large British Food company that specializes in an array of unique condiments, purchased Cauldron Foods Ltd., Britain's second largest tofu manufacturer, and the largest marketing its products to the Caucasian and health-food trades.

In Jan. 1988 British Arkady, a large British food conglomerate owned by Archer Daniels Midland Co. (Decatur, Illinois) acquired the Haldane Foods Group, and made it part of British Arkady's Health Foods Div. The Haldane Foods Group was put together by acquisition of Direct Foods Ltd. (founded 1980, acquired by the Group in 1985), Vegetarian Feasts Ltd. (founded 1984, acquired 1986), Haldane Foods Ltd. (founded 1983, acquired Aug. 1987), Vegetarian Cuisine Ltd. (founded 1985, acquired 1987), Regular Tofu Co. Ltd. (founded 1983, acquired Aug. 1987), Realeat Foods Ltd. (founded 1984, acquired Sept. 1988), Saucemasters Ltd. (founded 1988, acquired Feb. 1989), and Genice Foods Ltd. (founded 1988, acquired March 1989). Self-proclaimed as "Europe's leading healthier food group, most of these companies make tofu or soyfood products.

In April 1989 Huegli AG, a leading Swiss food company, purchased 75% ownership in Yamato Tofuhaus GmbH, one of West Germany's leading tofu manufacturers. At about the same time, Huegli purchased Horst Heirler, the country's leading distributor of fresh products.

Also in April 1989 Lima N.V. of Belgium, one of Europe's earliest natural foods companies, purchased Jonathan PVBA, Belgium's leading tofu manufacturer.

In Sept. 1989 Innoval (formerly Sojalpe), an acquired affiliate of Les Silos de Valence (a large 5,000-member cereal cooperative in Rhone Alpes, France), began to produce tofu, soymilk, and liquid soy concentrate (with an ultrafiltration unit) at a modern new plant, with a capacity of 2,000 liters/hour, purchased from Alfa-Laval at a cost of 20-21 million French francs.

In Feb. 1990 Euro-Nature, a French investment fund, purchased 97% Lima N.V. of Belgium.

In early 1990 Avo Feinkost GmbH, a large West German spice from Osnabrueck, launched the Sofit line of soy products, including various meatlike products, dressings, and salads.

9534. Drosihn, Bernd. 1990. Re: New German Soyfoods Association. The Asian-German soyfoods market. Letter to William Shurtleff at Soyfoods Center, May 10. 4 p. [Eng]
• ***Summary:*** I have just come from a meeting of Soyfood companies in Hamburg. We all plan to found a soyfood association of Germany at the end of this month.

In Germany, the soyfoods market for Asiatic shops and tokos [Indonesian food markets] is completely separate from the other market. There are 4 or 5 tofu Asian-German tofu companies. The biggest one is Soja Food, D-4000 Dusseldorf 30, West Germany. The biggest one in the south of Germany is Hanyang Sojaprodukte GmbH, Hermannstr. 31, D-6078 Neu Isenburg, West Germany. Phone: 06102/21956. Address: Founder and owner, Viana Naturkost GmbH, Schmittenstr. 106, D-5030 Huerth 6 (Fischenich), West Germany. Phone: 02233/41323.

© Copyright Soyinfo Center 2013

9535. Karas, Thomas. 1990. Current developments with soyfoods in Europe (Interview). *SoyaScan Notes.* May 10. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Thomas feels that the time has come to re-activate the European Soyfoods Association, since most of the major upcoming problems with relate to Europe as a whole. He, Klaus Gaiser of Yamato, and Jean Preneuf of Société Soy are all interested in this. He would like information about the Soyfoods Association of America, its objectives, activities, accomplishments etc. He foresees the national soyfoods associations being smaller and focusing more on quality issues, such as organic. As far as standards go, the key concept is declaration of ingredients and attributes rather than regulation. In the post-1992 European Community (Gemeinschaft) this will be a big problem, because the EC's standards of declaration will be very low/minimal, whereas those in Germany are very high/demanding. Now Cacoja in France is making a product they call tofu that is made using ultrafiltration but is not coagulated. Thomas tried the tofu and that allayed his fears– it was not very good, tasting like tofu made from isolates.

On May 19 there will be another meeting of the German Tofu Assoc. near Frankfurt hosted by Tofuhaus Tiefenthal (Albert Hess). Thomas asks Shurtleff to write a letter/greeting (Gruesswort, Vorbild) to the attendees explaining what has been learned by the Soyfoods Assoc. in America. Explain to the small tofu makers ("the soy freaks") how important it is to stick together. Klaus and Thomas want to try again to make the German association work.

Thomas has always understood that Linn (Linn Tahu, or Linn Oriental Products, or Soy Linn) and Vanka-Kawat were the same.

Schoeller, a very big manufacturer of ice cream and frozen foods in Nuremberg, makes Soja Stangen, soy ice cream bars. It is a very new product. Thomas has an article about the product in a dairy journal. The product manager from Schoeller, who now works for Huegli, told Thomas that there is a very small amount of soy in this ice cream. Thomas also heard that Schoeller tried to sell the "Soy Bars" in the company's line of soy ice cream shops.

Dr. Upgar is one of the biggest food producers in Germany. They make almost every kind of food, including frozen foods, baked goods, convenience foods, etc. The product manager from Dr. Upgar called Thomas, asked him some questions about tofu, and told him that they are now experimenting with tofu in desserts. He was not sure how far they will go with this.

Thomas has no idea how much tofu Heuschen-Schrouff is now making, but their tofu is losing its popularity. Many former customers are not satisfied, and are now coming to Soyastern to buy their more expensive tofu. Heuschen-Schrouff has too many other things to do. But Heuschen tofu is by far the cheapest in West Germany, costing only DM 2.50/kg compared with Soyastern's price of DM 4/kg or lower to wholesalers or food processors, and DM 6/kg to retailers. "We wonder why Heuschen tofu is extremely sour even when it is fresh. Several years Mr. Puik visited Soyastern and brought fresh tofu. The pH was 4.5. The shelf life is very long, 6-8 weeks. I heard from a guy who toured the plant that they put some acids in the cooling tank water."

Thomas' situation looks better; tofu production is now up to 8,000 kg/week. Address: Bochumerstr. 92-104, D-4270 Dorsten, West Germany. Phone: 2362-26801.

9536. Karas, Thomas. 1990. Soyastern and Yamato (Interview). *SoyaScan Notes.* May 10. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Soyastern is hoping to merge with Yamato/Huegli. Yamato has a very small plant and is now operating at full capacity, so they can't expand. But they want to increase their institutional sales. Huegli has a very large market in these canteens [Ger: Kantine = canteen, or mess hall] and institutional kitchens, with 60 salesmen just in this area. Now they are making a big marketing campaign in this area. Thomas has talked extensively with Huegli, and people from Huegli have visited his plant in Dorsten. The decision will take about 1 month. Thomas would really like to do it, for it would solve two of his biggest problems at once: paying off large debts, and eliminating his largest competitor. Heirler is very interested in distribution because he has the potential for European-wide distribution.

Note 1. Huegli acquired Soyastern in April 1991. Note 2. *Webster's Dictionary* defines canteen (derived from the Italian wine cellar and first used in 1744) as "2b: a general store at a military post: See Exchange. 2c: An establishment that serves as an informal social club (as for soldiers or a community's teenagers). 2d: a small cafeteria or snack bar." Address: Bochumerstr. 92-104, D-4270 Dorsten, West Germany. Phone: 2362-26801.

9537. Shurtleff, William. 1990. Re: On soyfoods associations in Europe. Letter to the German Tofu Association, May 10. 2 p. Typed, without signature.
• ***Summary:*** Anyone who is interested in the development and growth of new industries will notice that behind every powerful industry, in every country of the world, is a powerful trade association. The dairy and meat industries in Europe and America are excellent examples of this. The earlier that a new industry discovers this key fact and begins to build a strong trade association, the faster that industry is likely to grow. Wise people in an industry realize that competing companies have much more in common than they have differences. And a trade association can be just as beneficial to small companies as it is to large ones.

Every industry arrives at times of crisis. If a strong trade association does not exist at these times to defend the industry, the entire industry can be severely hurt or even

© Copyright Soyinfo Center 2013

destroyed.

In Europe there is a great need for one strong European Soyfoods Association, and for strong soyfoods associations within each country. It is important to get as many companies as possible to join, since those who do not join will still benefit (free of charge) from the activities of the paying members. There is also a great need for one or more publications about the many exciting developments with soyfoods in Europe and in each country.

The main objectives of a soyfoods association might be: 1. Expanding the size of the market, or "market development." This is the key activity. Most consumers in the western world are still not aware, for example, of tofu, of its many nutritional benefits, and the many delicious ways that it can be served. An effective association can get a great deal of free advertising for its members by use of generic news releases, media interviews, etc. 2. Developing product standards. 3. Conducting legislative activities to prevent adverse legislation against one's products and the encourage favorable legislation. This is closely related to development of product standards. 4. Providing information for and educating the general public and the media. 5. Providing information to the industry concerning what is happening to and within the industry. This may include publishing a newsletter, collecting of statistics about the industry, developing a library of publications relating to the industry, and holding industry conferences and workshops for educating industry members and debating key industry issues.

Dues in an association should be directly proportional to each company's sales. There should be an upper limit to allow very large companies to join, but there should be no other fixed (just as a joining fee) fees, which would hurt small companies disproportionately. One major danger to an association is a split into small and large companies. A good association serves all companies equally, and all pay proportionally.

An association needs an effective, paid managing director (part-time or full-time) who knows the industry, personally likes its products, and wholly agrees with its goals. The association also needs an address, phone number, and board of directors.

Concerning product standards: As soon as a product becomes successful, some companies will try to make imitation products, which can hurt manufacturers of the real product. The soyfoods association in America has spent many years developing tofu standards and dealing with the complex philosophical and practical issues that they raise. Several key principles seem to be: Study existing standards. Invite input and comments from as many people as possible inside and outside the industry. Hire a good food regulatory specialist as a consultant. Design standards that are broad enough to allow product innovation in the future but not so broad as to allow imitations. Non-typical products (such as a tofu made from soy protein isolates) must be required to declare the nature of the product on the principal display panel so that consumers know what they are buying. The attempt to define in standards what is "traditional, natural, or pure" and what is not is hopeless. Can "traditional natural" tofu be made with an electric grinder, gas burners, and chlorinated water? Who cares? Each company should be allowed to market its products in any non-deceptive way it wants. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

9538. Whitford, Harry M., III. 1990. Re: Early history of Byodo Naturkost GmbH. Letters (faxes) to William Shurtleff at Soyfoods Center, May 11 and June 8. 2 p.

• ***Summary:*** "Byodo Naturkost was founded in the summer of 1984 by Lukas Kelterborn (whose idea it was), Hermann Konrad, and myself. I contributed the name–Byodo is the Japanese Buddhist term meaning "eternity," or with extended vowels (Byôdô) "equality" as implied in the perfection of indifference. The full original name was "Byodo Naturkost, Lukas Kelterborn, Hermann Konrad & Harry Whitford." It's legal status was a "GbR" ("Gesselschaft buergerlichen Rechts"–a "Personen Gesellschaft"), that is, a company made up of individuals who carry full personal responsibility for the debts and assets of the company. In Germany, such a company must include the names of all owners in the company name. Hermann and I were both cooking at Keyno Vegetarian Restaurant, where I was in charge of soyfoods production and quality. We made our own tofu and tempeh at the restaurant.

"Byodo started as a tempeh company. The first product was Frisches Tempeh (Fresh Tempeh, in English). Production started in about Sept. 1984. Originally we were in the Thalkirchenerstr. in Munich in a former bakery together with the Italian Aikido-teacher and Tofu maker Georgio Sapia. I don't remember the exact address. Lukas left a few months after we started in about Oct. 1984 to take over a health food store (Reformhaus). We started making a Tempeh Burger (Tempehburger) later that fall after we realized we couldn't keep the company going only on tempeh.

"A Tofu Burger (Tofuburger) followed shortly afterwards that fall and Lukas' last service to the company was to establish the tie to Soyastern, which was unable to fry burgers due to complaints by the neighbors. We started buying tofu from Soyastern in Cologne to make burgers for them–at a distance of 400 miles!

"On 2 July 1985 Byodo Naturkost was transformed into a new company with a new structure, Byodo Naturkost GmbH. GmbH stands for "Gesellschaft mit beschraenkter Haftung" ("Company with limited liability"), which is comparable to a "Co. Ltd." in the USA. Michael Mossbacher entered the company at that time, and the base capital was used to move to Hirschbergstr. 9.

"In the fall of 1985 we started making tofu after a

© Copyright Soyinfo Center 2013

scandal: We had been buying tofu from Sapia to make our burgers for the Munich market. But he bought conventionally grown beans and sold the tofu as bio [organic]!

"In early 1986 (winter) we made tofu spreads (Tofu Brotaufstrich). There were 3 kinds: Paprika, horseradish & green pepper (Paprika, Meerrettich & Gruenerpfeffer). We also started making Vegetable Tofu (Gemuese-Tofu), which is tofu with chopped veggies pressed into it–ready to fry. Somewhere along the way we started to make tofu to sell also. I don't know when.

"I left Byodo in September 1986 after unsolvable differences became ridiculous and intolerable. Another reason I left was that none of the others at Byodo had ever had anything to do with spiritual practice.

"I worked part time at Svadesha making tofu until I could clear up my debts enough to be able to accept Soyastern's offer and make the move to Cologne. I started advising Soyastern 'unofficially' in Jan. 1987. The move and work permit finally came together on July 15, 1987.

"Soyastern is now basically bankrupt, with debts of DM300,000 (US$150,000), whereas the German legal limit is DM50,000." Address: Eurosoy consulting, Alleestr. 13a, D-4270 Dorsten 1, West Germany. Phone: 02362/43493.

9539. Boodram, Ramlakhan. 1990. Supplying small-scale screw presses and extrusion/expelling systems to Third World countries (Interview). *SoyaScan Notes.* May 15. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Mr. Boodram, a native of Trinidad who started BAR Export/Import Inc. in 1980, makes small-scale screw presses and sells systems containing them to developing countries. His presses are those that have been used by INTSOY. At IITA in Ibadan, Nigeria, he has an extruder/expeller system. The extruder is made by Insta-Pro, for which he is an agent. For any seed other than soy, the screw press would be adequate, but with soy, in order to get a high-quality oil that requires no further processing (such as caustic refining, deodorization, etc.) you must first run the soybeans through an extruder, then press the hot extrudate. The resulting crude oil is of high quality and has the same chemical characteristics as once-deodorized soy oil. BAR Exports also supplied IITA with a soymilk and tofu plant containing a Bean Machines 150 mill, a Kawanishi hydraulic press, and a small tofu press. No commercial products are produced.

A system at Ken Soya in Nairobi, Kenya, is used to make low-cost extruded soy products, including flour and oil. The company, which to extrude animal feeds, is doing well. Tests started in Dec. 1989 and the soy flour is just now entering the market.

He is now shipping an extrusion/expelling pilot plant system to Sokoine (pronounced so-ku-AY-ne) Univ. of Agriculture in Morogoro, Tanzania. It will be used as a training system to disseminate the technology throughout the country. Using a scale and mixer, the low-fat flour will be mixed with a carbohydrate source, then run back through the extruder to make a cereal-soy blend that can be used for anything from a weaning food to animal feeds. The full system, which requires no boiler or compressor, fits in a space 20 by 50 feet and costs about $110,000, not including the building.

BAR also has an extruder-expeller system at Grove Country Foods in Ohio. He and Carl Hastings, who runs the company, are long-time personal friends. BAR has another system at B and B International in Trinidad. They sell the oil for food and use the meal/flour in animal feeds. BAR tries to reduce marketing costs by placing their systems in international or regional centers, then let them disseminate the technology. They have also been working with CARIRI (the Caribbean Industrial Research Inst.) at the Univ. of the West Indies, with CARDI in Belize, with Eat Soy in Dominique, and Nature Treats in Jamaica. The woman who owns Nature Treats also makes tofu. Address: BAR Export Inc., P.O. Box 190, Seymour, Illinois 61875. Phone: 217-687-4810.

9540. Seewer, Conrad. 1990. Recent developments at Galactina Ltd. in Switzerland (Interview). *SoyaScan Notes.* May 17 and 21. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Galactina bought the Naga line of products from Lindt & Spruengli in 1979 and started selling the products in 1980. At that time the line consisted of clinical beverages for oral and enteral feeding (Naga-di and Naga Sonda), and a baby food (Bebe Nago). In Nov. 1984 the company introduced its first tofu product.

Seewer joined Galactina Ltd. 20 years ago. Dr. Peter Speck left Galactina about 2 months ago. He went to work at a nearby company. Ulrich Bringold left several years ago to work with a yeast company. Neither Speck nor Bringold is involved with soya any longer.

Galactina now makes three types of soy products: (1) Beverages/liquids for clinical use, both for oral and enteral and tube feeding; (2) The tofu line; and (3) The Mamina Soya baby food line. They have both a milk and ready-to-feed meals. The meals, which contain soy [powdered soymilk] plus fruit or vegetables, were introduced recently. Galactina does not make any soymilk for regular, healthy adults. Address: Marketing Manager, Galactina Ltd., Birkenweg 1-6, CH-3123 Belp, Switzerland. Phone: +41 31 811 111.

9541. Seewer, Conrad. 1990. The tofu market in Switzerland (Interview). *SoyaScan Notes.* May 17 and 21. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Galactina was the first company in Switzerland to sell tofu in supermarkets. In about 1984 their tofu was sold in a test market in the Bern area at Co-op supermarkets

© Copyright Soyinfo Center 2013

under the Galactina brand. After a while Co-op introduced their own tofu product, made for them with the Co-op brand by PLL in Lausanne from soy protein isolates. Galactina does not consider that product or the Yasoya made by Baer to be a types of tofu. Tofu must be made from soymilk by the traditional process. Co-op still labels its product as tofu, but they may not be able to continue since the regulations are now getting stricter. Co-ops isolate tofu replaced most (but not all) of Galactina's tofu in Co-op supermarkets, which hurt Galactina's sales a lot. Co-op then introduced a yogurt-type product made by PLL, which they called Soya Dessert, but it is no longer on the market. Co-op also now carries Baer's Yasoya, which is like a tofu made from isolates and with 2-3% lactose added. It is different in consistency from the isolate tofu made by PLL, and it is marketed completely differently and is not private labeled for Co-op. Now Galactina tofu is sold in all department stores that have a food department, and most of the stores that sell milk (The "White Chain" controlled by milk distributors). Starting in 1989 Galactina started to sell its tofu (1 tofu, 2 bread spreads, and 2 salads) in Switzerland's 500 Reform Houses under the brand name Galaform with the Biona certification symbol (like the Neuform in Germany); 90-95% of the Swiss Reform Houses are Biona stores with the Biona label. Products with the Biona label can only be sold in Biona Reform House stores and must meet certain quality and production specifications. In 1-2 months Galactina will come out with new labels that look even fresher and tastier.

Seewer thinks (though he has no market statistics) that Migros/Conserves-Estavayer is the biggest tofu maker in Switzerland (but they only have 2 products), followed by Galactina, then Soyana, and PLL/Co-op. He is not sure which of the last 2 is largest. There is a smaller tofu company in Bern [Berner Tofurei] selling regionally; he also owns a health food store.

A rough estimate of the total size of the tofu market in Switzerland would be 500,000 kg/year. The growth rate has been uneven. In the beginning in 1984 and 1985 there was a boom. A number of products were introduced at that time that were not properly developed and of low quality. Then consumers got frustrated because many felt that tofu didn't taste good and was difficult to cook, etc. In 1986 the market dropped; Co-op and Migros reduced their lines. Now tofu is catching on again. Galactina has introduced "third-generation" products that taste good, but it takes a lot of marketing work to re-establish tofu and tofu products on the market. Over the past year, Galactina sales have grown about 10%. The first generation is plain tofu. The second generation is tofu with taste, as with 50% diced vegetables or some flavors mixed in. Third generation would be a burger or sausage, ready to heat and serve, or a bread spread that contains less than 10% fat. Address: Marketing Manager, Galactina Ltd., Birkenweg 1-6, CH-3123 Belp, Switzerland. Phone: +41 31 811 111.

9542. Nordquist, Ted. 1990. The tofu market in Scandinavia (Interview). *SoyaScan Notes.* May 18. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** There are three tofu manufacturers in Sweden. Aros in Sweden is the biggest. Aros started making commercial tofu in Feb. 1981. By 1983 production had grown to 500 kg/week and they began vacuum packaging. By 1984 they were making 800 kg/week, and by Jan. 1985 tofu production had grown to 1,750 kg/week. In early 1987 they introduced the Tofu Line brand for all of their soy products, and they emphasize this brand in their marketing. Now they use about 900 kg/week of soybeans (with a yield of 2.2 or 2.3) to make about 2,000 kg/week of tofu. Much of this tofu is used in second generation products. Sales are growing in the regular chain stores, but sales to health food stores have been dropping over the past few years. Many health food stores are going out of business. There was a lot of negative publicity about their high markups on some products, some questionable products (such as shark's liver oil touted as a cure for cancer), and the fact that the largest chains were owned by pharmaceutical companies that were making big profits. Aros produces 90-95% of all tofu sold in Sweden, Norway, and Finland. The rest consists of imports: a little bottled tofu from Lima in Belgium and canned tofu from Nutana in Denmark. Growth of the tofu market over the past few years has been slow. The main growth has been in second generation products. Over the past 6 years, 99% of Ted's energy has gone into the soy-base project and this has prevented him from working on tofu.

But now many exciting things are starting to happen with tofu in Sweden that make its future look bright. Hans Klimming is the chief cook for the largest conference center in Gothenburg (Göteborg), which serves 1,500-2,000 lunches or dinners at a time, is now serving lots of tofu– and promoting it strongly. He employs a Thai cook who is developing the dishes using Aros' tofu. Klimming has gone to Dagab, Sweden's largest wholesaler for restaurants and hospitals, and urged them to sell tofu throughout Sweden. Ted is now working with Klimming to develop a cookbook containing bulk tofu recipes. Klimming has also gone to Sweden's strongest supermarket chain, ICA (each store is a franchise, 99% owned by the owner), and asked them to publish and carry this cookbook in 1½ to 2 years. Presently Aros' regular tofu is sold only in a few ICA and Konsum stores in Aros' own distribution area–where they deliver themselves.

The second tofu maker in Scandinavia, Urten's Tofu in Soeborg, Denmark, is a fairly small company that supplies Nutana in Denmark with their tofu. Nutana in Denmark is a huge industrial plant that makes mainly frozen foods but sells them primarily in Scandinavia, especially Sweden. They have 2 canned tofu products and last year they introduced a frozen dish containing tofu cubes. Urten's Tofu also sells

© Copyright Soyinfo Center 2013

tofu as such on a fairly small scale. Nutana does not sell any tofu as such. Urtekraemmeren in Copenhagen, which owns Urten's Tofu, is mainly an importer of biodynamic products. Making tofu is a small side business for them.

Aros sales are continuing to grow, even though Ted is spending most of his time away from the business with Trensums. Address: Aros Sojaprodukter, Bergsvagen 1, S-19063 Orsundsbro, Sweden. Phone: 0171-604 56.

9543. Whitford, Harry M., III. 1990. Recent developments with soyfoods in Europe (Interview). *SoyaScan Notes.* May 18 and 31. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Harry is an American. He was an AFS student in Germany. He left California in Oct. 1980 and has lived in West Germany since then. He is now married to a German lady. His new consulting company will try to help European soyfoods companies develop products for mainstream markets. In Europe the diet is generally more diverse and healthier, with less meat and more cereal grains than the USA. Thus there is less motivation for consumers to use soyfoods and (except in the UK) less interest in vegetarian diets. So marketing is the key to selling soyfoods; they must be developed and marketed to sell primarily because they are good tasting and only secondly because they are healthful.

Thomas Karas is saying that Soyastern is trying to merge with Yamato but actually Soyastern is totally bankrupt and Karas is trying to convince Huegli to buy it.

DE-VAU-GE buys about 5,000 kg/week of tofu from Heuschen-Schrouff. The latter uses a secret coagulant which they claim is natural. The tofu has a 6-month shelf life and a pH of 4.0. It is hard like rubber. Harry thinks that after the tofu is pressed and cut, it is soaked in a lactic acid solution (Takai told him this) then pasteurized. Heuschen-Schrouff controls the Chinese food supplies, and that is where they make most of their money. In Chinese markets, their tofu is sold in open buckets. All of their tofu is sold very inexpensively at a very small markup. He thinks they make 50,000 kg/week.

From a producers viewpoint, the German tofu market is the most saturated in Europe, except perhaps for the Netherlands; there are too many producers. There is almost no water-packed tofu in Europe, except that made by one small company in Dusseldorf, and a little sold in bulk floating in water in buckets; the rest is all vacuum packed. The typical tofu company gives its tofu a 5-6 week shelf life because that is what consumers expect–but it rarely stays fresh that long, and is often sour. The only company in Europe Harry knows of that pasteurizes is Heuschen-Schrouff. DE-VAU-GE is now making its own tofu–a colleague of his saw it. They copied a Takai carousel curding machine. They use it only in their second-generation products–they do not sell any as plain tofu. Address: Eurosoy consulting, Alleestr. 13a, D-4270 Dorsten 1, West Germany. Phone: 02362/43493.

9544. Demos, Steve. 1990. Pasteurization, packaging, and freezing of tempeh (Interview). *SoyaScan Notes.* May 20. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** White Wave, America's largest tempeh manufacturer, pasteurizes all of their tempeh using a steam blanch. The details of the process are a trade secret, however it is not at all difficult for any company to figure out a good method, which extends the refrigerated shelf life to 16 days from less than 5 days, and which results in only a very slight lowering (almost negligible, except for connoisseurs) of the product's quality.

The basic idea is to take the tempeh as soon as it comes out of the incubator (at White Wave it is in individual perforated plastic bags) and put it on racks in a sealed chamber. This might be a large metal box that fits down over the rolling rack or an oven-like box. Live steam is run into the chamber for a certain typical of time (say 15 minutes) and temperature for pasteurization until the core of the tempeh is pasteurized. Steam quickly transmits its heat to the tempeh core.

Steve feels strongly that tempeh should not be vacuum packed, a process which he feels compacts the tempeh into a mush, greatly lowering its quality and appearance. However Lightlife Foods run by Michael Cohen, America's second largest tempeh maker, vacuum packs it, as does Northern Soy. Pacific Tempeh also vacuum packed. Vacuum packing a clean, pasteurized tempeh will probably give a shelf life of least 30-45 days. And if the tempeh is blanched in a vacuum package, the shelf life would be much more than 45 days. The potential from botulism under these conditions is extremely small due to competing organisms in the tempeh. White Wave is experimenting with a number of other ways other than blanching to extend shelf life under refrigeration.

All White Wave tempeh is shipped frozen from the factory. Some White Wave tempeh is now sent to the East Coast and exported to Europe. Freezing does decrease quality a little but it also greatly extends shelf life if the tempeh is shipped over a long distance. Steve feels that the main determinants of tempeh quality precede pasteurization–sanitation, starter, cooking, incubation, etc. White Wave recommends that retailers sell their tempeh out of the refrigerator, where it sell much faster and at lower cost than it does out of the freezer. In each case is a "merchandising slip" that tells the retailer to place the tempeh in his refrigerated case next to the yogurt in between the tofu, and to expect it to last at least 16 days. Address: President, White Wave Inc., 1990 North 57th Court, Boulder, Colorado 80301. Phone: 303-443-3485.

9545. *Toyo Shinpo* (*Soyfoods News*). 1990. 89 nen shinkoku shotoku rankingu [1989 ranking of tofu, natto, and konnyaku companies in Japan, based on reported income to the tax

© Copyright Soyinfo Center 2013

bureau]. May 21. p. 1. [Jap]

• ***Summary:*** Rank–Company name (Food type)–Prefecture–Reported income in million yen, ranking among all Japanese industries. For food types: T = Tofu, DFT = Dried-frozen Tofu, A = Aburagé (deep-fried tofu pouches), N = Natto, K = Konnyaku:

1. Asahimatsu Shokuhin (DFT, A)–Nagano–843–5,504
2. Takano Foods (N)–Tochigi–445–10,464
3. Asahi Kôgyô (T + other foods)–Tokyo–444–10,490
4. San Shokuhin (T)–Kagoshima–417–11,204
5. Okay Shokuhin Kôgyô (A)–Fukuoka–362–12,867
6. Tajimaya Shokuhin (T, N, A)–Hyôgo–322–14,419
7. Azuma Shokuhin (T)–Tochigi–320–14,516
8. Misuzu Tôfu (DFT, A)–Nagano–307–15,128
9. Fujita Shokuhin (T)–Hyôgo–243–19,082
10. Sekigoe Bussan (K)–Tokyo–189–24,470
11. Tochigi-ken Natto Seisan (N)–Tochigi–174–26,477
12. Santeiri (T)–Aichi–140–32,840
13. Sankô Shokuhin (T, Cow's milk)–Yamagata–136–33,679
14. Saga Tôfu Morika (T)–Kyoto–121–37,484
15. Tengu (T, N, A)–Ibaraki–119–38,342
16. Fuji Kiyo Konnyaku (K)–Kyôto–113–40,160
17. Nihon Tanpaku Kôgyô (T, A)–Tokyo–110–41,156
18. Yashima Shokuhin (T, A)–Kanagawa–107–42,410
19. Yama Shoku (T)–Nara–95–47,272
20. Nagai Sôgo Shokuhin (T, A)–Hyôgo–83–53,659
21. Asahiya Shokuhin (T)–Kanagawa–78–56,956
22. Tsujikane Shokuhin Kôgyô (K, A)–Gifu–77–57,789
23. Marukawa Shokuhin (T)–Hokkaidô–76–58,061
24. Kyôto Tanpaku (T)–Kyôto–71–61,805
25. Niihama Seitô (T)–Ehime–58–73,954
26. Kakumitsu Kudô Shokuhin (T)–Aomori–55–78,339
27. Matsuyama Tanpaku (T)–Ehime–50–84,444
28. Tôkô Shokuhin (T, N)–Tokyo–46–91,698
29. Tokyo Minato (T)–Ibaraki–41–99,618
30. Ebara Shokuhin (T)–Tokyo–40–101,982

Explanation: Number 1, Asahimatsu Shokuhin, makes dried-frozen tofu and aburagé. In 1989 the company reported its income to be 843 million yen. It was the 5,504th largest company in Japan. Note: A number of large manufacturers of dried-frozen tofu, perhaps because of slow sales, are now diversifying into deep-fried tofu pouches.

9546. Speck, Peter. 1990. The tofu market in Switzerland (Interview). *SoyaScan Notes*. May 23. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** The market has been stable and without much change for the last few years, but now there seems to be a slight upturn. However some new second-generation products will soon be launched. Galactina has a tofu burger and Migros will launch one in the next few months. Galactina and Migros are the main companies selling tofu in supermarkets; both are doing a good job marketing. Co-op is selling a tofu made by PLL with soy protein isolates under their own brand. During the last year a number of publications showed that this tofu was made with isolates and that gave Co-op a very bad reputation. This adverse publicity did not hurt other types of tofu. Co-op announced on television that they are considering changing the product name from tofu to something like "soy product" or "soy curd." They do not have the equipment to make tofu from whole soybeans. Soyana is still on the market but mainly in health food shops. Not much has happened with Soyana in the last year; a few years ago they were much stronger. Baer makes one soft tofu in one bland and 3 spiced flavors; all are made from isolates with dairy protein, cereals, and vegetables added. They have promoted these with a very large marketing budget (Peter heard 4 million Swiss francs, but that figure may be too high). Baer introduced this product because the market for dairy products in Switzerland was not growing. It is sold at Co-op supermarkets, dairy shops, and many other types of stores (except Migros) all over Switzerland. Note: Dairy shops (Molkerei / Laiterie) are retail outlets that sell mostly milk and cheese, but since turnover is slow they usually also sell bread, vegetables, canned goods, etc. plus Galactina and Yasoya soy products. They never sell Migros or Co-op products.

Peter estimates that the five largest tofu manufacturers in Switzerland, in descending order of size, are Migros, Galactina, Baer, Soyana, and PLL/Co-op. If we include tofu made from isolates, Peter estimates that 500 tonnes/year of tofu are sold in Switzerland. The percentage growth rate is now very low. The market grew very rapidly during the early years (1985-86), but during the past 2 years tofu has gotten a bad reputation because people didn't know how to prepare regular tofu. By the time that companies had realized that consumers needed second generation tofu products, the consumers didn't want to try tofu any more. Even though they gave cooking classes and distributed a gourmet tofu cookbook, it was too late. In retrospect, second-generation tofu products should be introduced with cooking classes before basic tofu. One market sector that is now growing well is the institutional/catering [foodservice] market that sells to university and company dining halls (canteens), big hotels, or hospitals. In some cases the tofu dishes are prepared outside the institution and in other cases inside. Tofu use is also growing in restaurants, especially vegetarian and hotel chain restaurants; the latter cater to many vegetarian travelers. But tofu is not sold in regular Swiss restaurants. This institutional sector is responsible for the slight growth in the total market. Soyana was the first company to sell to this institutional market, but now Galactina is offering successful cooking classes for hospital cooks. About half of all Galactina tofu is now sold to the institutional market. Now Galactina and Migros are trying to rejuvenate the tofu market with new products. Both companies have a deep belief in the potential and future of

© Copyright Soyinfo Center 2013

tofu. But it will be hard, because tofu has a bad image, like liver or spinach. Peter feels that yogurt-like soy products will never do will in Switzerland because the country has a long history of dairy yogurt and soy products are found to be of lower quality by comparison. One of the main groups buying soy products in Switzerland are the "Green People." They often buy at Reform Houses, where Soyana is the main supplier. Most of Soyana's sales are from Reform Houses. 4-5 months ago Galactina launched tofu spreads, salads, and burgers under the Galaform brand in the Reform Houses. Over the past few years, flavored tofu products and tofu spreads (Tofunette) have been most successful for Galactina. They have found that it is important to add new flavors from time to time, just like with ice cream. Of Galactina's 3 product lines, tofu products are probably the best sellers, followed by the baby foods, then the clinical feeding products, but they are all about the same size. Migros' most successful products have been their regular tofu, spiced tofu, tofu spread, and Tofunaise. They are planning to launch a tofu burger in the next month or two.

Speck once heard that Unilever developed a whole range of tofu and soy products. He does not know when or where they did this or what they plan to do with the products, but he thinks they were for the German market.

Huegli has an annual turnover of about 150 million Swiss francs. They are in the dry soup and dry product business. He has a pamphlet describing the company. Address: Home: Muenzingen, Switzerland. Work: Haco Co. in Gumlingen. Formerly with Galactina, Ltd. Phone: 031-52-1631.

9547. Speck, Peter. 1990. How Galactina got involved with tofu in Switzerland (Interview). *SoyaScan Notes.* May 23. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Galactina bought the Naga product line from Lindt & Spruengli in 1979 and began selling the products in 1980. When Speck arrived at Galactina, the only soy products made by the company were Naga-di and Naga Sonda, both sold only in dried form. Then in 1981 they started to produce them in a liquid form in Tetra Pak. Speck's first job at Galactina was to develop the liquid form of Naga Sonda in Tetra Pak. Then they began to look for ways to use their extra soymilk production capacity. So he read the literature and learned about tofu, a product widely made in East Asia. He made tofu once and found it promising. The company decided they wanted to be a pioneer in introducing tofu to Switzerland. So they began to develop a regular tofu. During the development, Speck met Verena Krieger and asked her if she could show him how her company produced tofu. In 1984 Verena came to Galactina and made an excellent presentation, for which she was paid. She explained what tofu was and what could be done with it. Initially Galactina decided to buy their tofu from Sojalade (the company of which Krieger was one owner), since they had no idea whether or not the product would be successful. At first Sojalade agreed to supply the tofu to Galactina, then two months before the test market they changed their mind saying that they did not want to supply an industrial producer. So Galactina had to develop their own whole process in 2 months.

In Nov. 1984 Galactina launched their regular tofu in test market in Bern at Co-op supermarkets. The launch was successful and Co-op became the leading outlet for Galactina tofu. Co-op kept Galactina tofu even after they launched their own brand of tofu in Aug. 1985, made and private labeled for them by PLL. But they kicked out Galactina in 1988 when they took on Baer's Yasoya, because Baer, which has an excellent cheese distribution system, was able to deliver its own product to each individual Co-op supermarket and service the product, removing any that were not fresh. Galactina could not provide such a service. Address: Home: Muenzingen, Switzerland. Work: Haco Co. in Gumlingen. Formerly with Galactina, Ltd. Phone: 031-52-1631.

9548. Andersen, Thomas. 1990. History of pioneering work with tempeh and tofu in Denmark (Interview). *SoyaScan Notes.* May 24. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Thomas, a native of Denmark who speaks flawless British English (in part because of his extensive travels), got interested in macrobiotics in about 1982-83 and, looking for work, traveled to London to study at the Community Health Foundation (founded in 1976 to teach macrobiotics). There from Simon Brown (the expert on soyfoods, who taught classes on how to make tofu and tempeh), Jon Sandifer, Roger Green (presently in Australia), and Andrew Leech, he learned how to make tempeh. There was a small commercial tempeh shop in the kitchen of the Community Health Centre; it started after the kitchen's closing time. He returned to Denmark and in 1985 he started the country's first tempeh shop, named Thomas Tempeh, located on Tagens Vej in Copenhagen. He had two problems. First, since many of his customers were interested in macrobiotics, they did not want the tempeh frozen, and it had a shelf life of only 8 days fresh. Second, the market was very small. So Thomas realized that if he wanted to survive working with soyfoods, he would have to make tofu as well as tempeh.

The two earliest tofu companies in Denmark were Dansk Tofu (owned by Ted Goldberg and some other guys) and Soy Joy in the Valby district of Copenhagen. [Note: Tofu Denmark in Valby was started in March 1982 by Per Fruergaard from Christiania]. The owners of Soy Joy were very idealistic. They never got a packaging machine for their tofu; they just delivered it in bulk in water, which the Danish health authorities, who are very strict, did not like. They were only in business for about 3-6 months. In late 1985 Thomas bought most of the tofu equipment owned by Dansk

© Copyright Soyinfo Center 2013

Tofu, which had been in business for about 1 year. The company was owned by Ted Goldberg, and they had stopped making tofu about 6 months earlier. At this time, Dansk Tofu simply disappeared. And now Thomas started making tofu and marinated tofu, still at Tagens Vej. On 1 Jan. 1986 he moved the business to Soendergade in the city of Toelloese, Denmark. The business was still named Thomas Tempeh. He quickly expanded his product line to include Tofu Pâtés and Smoked Tofu. All of his products were always made with organically grown soybeans. Then he ran into problems with the health inspectors. They did not like the fact that he was making tofu and tempeh in the same place, that he was smoking the tofu himself, and that there were problems with the tofu pasteurization. Moreover, Thomas was overworked (18 hours a day) and undercapitalized. He and one employee were making 500 kg/week of soy products. So in September or October 1986 he sold his business to Urtekraemmeren (pronounced ur-te-KRAH-mer-en), which had previously imported soyfoods from Japan but had never manufactured any.

Then Thomas went to Switzerland to help out with a tofu factory named Berner Tofurei, located in Bern and owned by Infinity, a macrobiotic group. In about Dec. 1986 Urtekraemmeren moved their newly acquired tempeh and tofu company to its present location in Soeborg, Denmark, and renamed it Urten's Tofu, and stopped making tempeh since the health inspectors didn't want tofu and tempeh to be made in the same room. Tempeh was selling, but not enough to justify buying a separate room and equipment for it. In April 1988 Thomas returned to Denmark and began to work as a tofu maker for Urtekraemmeren at Urten's Tofu, the company he had founded. The company was in bad shape: there were constant problems with the health inspectors, the equipment was old and bad, a long pressing time led to bacterial contamination, etc. In late 1988 or early 1989 Urten's Tofu started selling their tofu to Nutana, a large manufacturer of vegetarian foods owned by the Seventh-day Adventist church. This was a turning point in the history of the business. In about May 1989 Thomas told Urtekraemmeren that if they invested in new equipment he could make the company successful. They liked the idea so Thomas went to the SIAL food fair in Paris, met Takai, and bought their largest pressure cooker (220 liters), new pressing tables, a pasteurizing tank, etc. The next big development came in Sept. 1989 when Urten's Tofu got their tofu into the Irma supermarket chain in Denmark. Then tofu began to sell better on the health foods market as well. Thomas, Tom Kristoffersen, and one other man now make the tofu at Urten's. But it is hard work and wages are low. There are no tofu books in Danish.

Today Urten's Tofu is the only tofu company in Denmark. They make, on average, 750 kg/week of tofu (range: 500 to 1,500 kg/week). Their three products are tofu, marinated tofu, and tofu pâté. Production is growing nicely but varies widely from week to week.

A new tofu company named Oy Soya Ab is now being starting in Ekenäs, Finland, by people there who import macrobiotic foods from Japan. One of the people is named Elizabeth. Thomas will work as a consultant for this new company. Address: Urten's Tofu, Hoeje Gladsaxe Torv 2, DK-2860 Soeborg, Denmark. Phone: 31 67 41 90.

9549. Andersen, Thomas. 1990. Urtekraemmeren and Urtekram in Denmark (Interview). *SoyaScan Notes.* May 24. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** These two companies were originally one. Urtekram means "herb" in Danish. The original company started in the 1960s, inspired by macrobiotics and natural foods, then it split into two in the 1970s. Both companies now import foods (including soyfoods) from Japan and distribute them in Denmark. Urtekram, located in Mareager, Jutland, is larger and doing a lot better financially than Urtekraemmeren. Urtekraemmeren owns Urten's Tofu and its distribution of imported macrobiotic products is limited mostly to Copenhagen. Address: Urten's Tofu, Hoeje Gladsaxe Torv 2, DK-2860 Soeborg, Denmark. Phone: 31 67 41 90.

9550. Fehlberg, Eric C. 1990. Re: List and activities of Seventh-day Adventist health food companies worldwide. Letter to William Shurtleff at Soyfoods Center, May 24. 6 p. Typed, with signature on letterhead.
• ***Summary:*** For each for the following companies is given the date of founding, date manufacturing started, and the soy products presently manufactured: Granovita, Spain. Nutana, Holland. Nutana, Norway. Nutana name changes. Austrian Food Company. DE-VAU-GE, West Germany. Sahm Yook Foods, Korea. Sanitarium Health Food Company, Australia (3 pages).

Lists (with addresses) the following companies: Sanitarium Health Food Company in Wahroonga, NSW, Australia; DE-VAU-GE Gesundkostwerk GmbH in Lueneburg, West Germany; San-iku Foods in Sodegaura-machi, Kimitsu-gun, Chiba-ken, Japan; Korean Food Factory (Sahm Yook Foods) in Choongchungnam-do, South Korea; Alimentos Integronaturales y Panificadora la Carlota in Montemorelos, N.L., Mexico; Produtos Alimenticios Superbom Industria e Comercio Ltda. in Sao Paulo, Brazil; Alimentos Granix in Florida, Buenos Aires, Argentina; Nutana Health Food Company in Bjaeverskov, Denmark; AB Svenska Nutana in Rimbo, Sweden; Granose Foods Ltd. in Newport Pagnell, Bucks, England; Pur-Aliment Food Factory in Clichy–Cedex, France; PHAG Food Factory in Gland, Switzerland (Note: PHAG is an acronym for Produits Hygièniques Alimentaires Gland); Egypt Food Factory in Heliopolis, Cairo, Egypt; Glaxo India Limited in Bombay, India; Westico Foods Ltd. in Mandeville, Jamaica; Industrias Covac S.A. in Alajuela, Costa Rica; South China Island

Union Mission in Hong Kong (3 pages). Address: Director, International Health Food Assoc., Seventh-day Adventist General Conference, 12501 Old Columbia Pike, Silver Spring, Maryland 20904. Phone: 301-680-6674.

9551. Ebner, Guenter. 1990. The tofu industry and market in Austria (Interview). *SoyaScan Notes.* May 28. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** There are three large tofu manufacturers in Austria: Sojarei Ebner-Prosl in Baden bei Wien (Vienna) makes 4,000 kg/month. SoyVita in Lichtenwoerth makes about 2,500 to 3,000 kg/month, and Schoen Tofurei (Tofurei Wels) in Wels makes about 1,000 to 1,500 kg/month. There is also a small tofu shop (name unknown) operated by one person on a farm in Graz; he sells only to two retail shops. Thus the size of the tofu market in Austria is about 8,000 to 9,000 kg/month or 1,840 to 2,071 kg/week.

This market is growing rapidly. Tofu production at Sojarei Ebner-Prosl has increased 20-30% a year during the last few years and Guenter thinks the entire market is growing at about the same rate. Tofu is now changing from an unknown product to one that is a little better known–just as happened in America 10 years ago.

Austrian standards for organically grown foods are quite strict and diverse; certification is required. There are three classifications: (1) Organisch-Biologisch: His soybeans are of this type and this standard is stricter than American "organic" standards; (2) Biologisch-Dynamisch (Demeter); (3) Biodyn.

The generic name for these certified organic crops is "Austrian Certified Alternative Culture/Cultivation" (Oesterreich Anerkannte Alternative Anbau). Address: Sojarei Ebner-Prosl / Tofu Austria, Augasse 2, A-2500 Baden bei Wien (near Vienna), Austria. Phone: 02252-85101.

9552. Daenzer, Walter. 1990. The tofu and soymilk markets in Switzerland (Interview). *SoyaScan Notes.* May 30. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Soyana introduced its Soyaquell brand in about 1985 for the mainstream market. The Soyana brand is reserved for the Reform market. Many (but not all) Soyana products are now sold under the Soyaquell brand–such as tofu, soymilk, etc. New products include Tofu Pastete (cake-shaped hors d'oeuvres, 1989) and some new Tofu Burgers.

Competition in the soyfoods market is terrible in Switzerland–its the most competitive market in Europe. The market is small and people have very high quality expectations. Galactina is trying to get into all the Reform stores. They are doing everything they can to market their products there. Some years ago the regular food industry got interested in soya, but their standards allowed them to make tofu and related products using soy protein isolates. Baer Weichkaeserei had a big campaign which resulted in Galactina tofu products being kicked out of all Co-op supermarkets. Also Galactina products had many problems selling in the supermarkets. So Galactina has decided to sell their products in the Reform stores. And now Soyana has lots of competition from Galactina. The Swiss Biona Association used to sell only Swiss soyfoods. Nothing else was imported until about 2 years ago. At that time, they got offers to sell soymilk made in France and Germany. "Then Biona did something terrible; they gave the Biona sign to all foreign suppliers. So now Société Soy is coming in from France, Heirler with a big range of products from Germany, etc. Products from all over Europe are now being imported to Switzerland and sold at Reform stores."

Soyana invested a great deal of money as a pioneer in the Swiss soyfoods market. Just when it looked like they were about to recover their losses, the terrible new competition began. And the competitors are using every trick in the book, including unfair means and deceptive advertising. They have no sense of purity of product; for example they say they are using nigari but they use calcium sulfate with 10% nigari. Soyana does not pasteurize its tofu but the competition does. So now Soyana has to educate its former customers about the advantages of not pasteurizing. Now Soyana has to become a quality pioneer and an advertising pioneer. Reaching and convincing all these people costs lots of money, but Soyana is doing it. Soyfoods have changed from being an alternative food to being a big money maker, so the big food companies jump in with the goal of making more money by selling lower priced, lower quality foods. Their advertising is often dishonest.

"The whole soy thing has proved to be an alternative for people who really need it. And that is a stable market, but it is not booming. In America it seems that the big food producers have slept while the soyfoods market has grown, but in Switzerland the situation is different. Many big Swiss companies jumped in when they got the idea that soya is healthy, but many of them didn't know anything about the products. So now Soyana is looking for alternate things to do to avoid this terrible situation."

If Soyana tries to export its products from Switzerland, it has to pay 20% customs duty, and Swiss wages are high. But companies that import foods to Switzerland have to pay a much smaller tax, and the process is easier. This will not change with the opening of trade in 1992 because Switzerland is not part of the EEC! Swiss has always cherished its separateness, independence, and neutrality.

Concerning the term Broteinheit ("Bread Unit," it is not Broteinhalt) relating to diabetic exchanges, the term is not well defined or agreed upon by professionals, so it is a big problem.

Soyana used to be the only soymilk manufacturer in Switzerland. Then a Swiss-French company with a French name started making soymilk. Their prices were low, but they couldn't reach the big consumer chains. Address: Soyana, Postfach 8039, Zurich, Switzerland. Phone: 01/202

9553. Kjellker Gimre, Monica. 1990. Re: Complete soymilk or soybase plants installed by Alfa-Laval worldwide from 1979–1989. Letters to William Shurtleff at Soyfoods Center, May 30 and Aug. 24–in reply to inquiry. 2 p. Typed, with signature on letterhead.
• ***Summary:*** The following plants are listed chronologically by year of start-up, and within each year, alphabetically by country. Start-up–Country–Company–Product–Capacity (liters/hour)

1979–Malaysia–Lam Soon–soymilk–5,000
1980–Thailand–Kickapoo–soymilk–4,000
All plants made from 1984 on use Alfa-Laval's new Soyal design.
1985–West Germany–Ice cream maker [Schoeller]–soybase–3,000
1985–Switzerland–Soyana–soybase–1,000
1986–China–Guangzhou Cannery [Guangdong]–soymilk–2,500, 2 dec.*
1986–France–Cacoja–soybase–1,500
1987–China–Jin Jiang Foodstuffs Factory–soymilk–2,500
1987–India- Noble Soya–soymilk–4,000, 2 dec.*
1988–Argentina–Alimentos de soja–soymilk–4,500
1988–China–Jiangmen Foodstuff Factory–soymilk–2,500, 2 dec.*
1988–China–Wuhan Guan Sheng Yuan Foodstuff Factory–soymilk–2,500, 2 dec.*
1988–France–Innoval–soybase–1,500
1988–Nepal–Indreni–soymilk–2,500
1988–Nigeria–Sona Dairies–soymilk–4,500
1989–Australia–Sanitarium Foods–soybase–500
1990–France–Dairy Co-op**–soybase–500

* = 2 decanter centrifuges per system to boost the protein yield. The systems made before 1984 were for more traditional soymilk. Those made afterwards no longer require that the soybeans be soaked, and the "new" soyabase line in designed primarily for producing a non-beany soymilk, but it can be easily adjusted to give a traditional soymilk. "Soybase" is the product that comes out of the Soyal soyabase line after grinding, separation in one or more decanters, and deactivation of enzymes like trypsin inhibitors. This base is more concentrated than soymilk (9-12% solids/dry matter) and is what is used as the raw material for any soy-based product. "Soymilk" is a blended drink, often containing sugar, and standardized to a protein level required by the market. Soybase would only be run through an ultrafiltration unit to (1) remove phytic acid and oligosaccharides, or (2) to remove moisture and increase the percentage solids, as to make tofu. ** The plant owned by the Dairy Co-op in France is secret, but the base it produces will be used mostly for research on calf milk replacers and on replacing cow's milk in certain dairy products. This dairy does not have any products on the market. Address: R&D manager, Alfa-Laval East Asia Pte. Ltd., 11 Joo Koon Circle, Singapore 2262. Phone: 86 22 711.

9554. Krieger, Verena. 1990. Re: The tofu market in Switzerland. Letter (fax) to William Shurtleff at Soyfoods Center, May 31. 5 p. Typed, with signature on letterhead.
• ***Summary:*** Switzerland's largest tofu manufacturers are:

Migros/Conserves Estavayer makes 4,650 kg/week of tofu. They are introducing a silken tofu.

Galactina Ltd. in Belp makes 1,500–2,000 kg/week of tofu.

Baer makes Yasoya, an isolate-based tofu-like product. Production figures are not available. They are taking a large share of the market with an inferior product and aggressive advertising.

Soyana in Geneva makes tofu. Production figures are confidential.

PLL Produits Laitiers Lausanne SA in Lausanne makes 1,000 kg/week of tofu [using soy protein isolates].

Tofushop Centanin SA in Carouge (Geneva) makes 750 kg/week of tofu. This company was formerly named Osoja: La Maison du Tofu.

Genossenschaftstofurei in Ottenbach makes 600–700 kg/week. They also produce and sell tofu kits.

Berner Tofurei in Frutigen makes 400 kg/week of tofu. They also make 100 kg/week of tempeh.

Tofurei Pfannenstiel in Maennedorf makes 160 kg/week of tofu.

Krieger estimates the total market size to be about 10,000 kg/week or 500,000 kg/year. [Note: If we estimate Baer's production to be 1,500 kg/week and Soyana's to be 1,250 kg/week (see 1990 estimates by Peter Speck), the weekly total becomes 12,110 kg/week of tofu and at 50 weeks/year, the annual total becomes 605,500 kg/year.] The market is stagnant. Best-selling products include Soyana Tofuburgers and Galactina Tofu Salads.

The following tofu companies are no longer in business: Gauthier Loeffler Tofu, Joya, Le Grain d'Or, Soy Joy, Tangram Tofurei, Thieus Soja Spezialitaet. Address: Bruchmattstr. 24, CH-6003 Lucerne, Switzerland. Phone: 041-22 50 34.

9555. **Product Name:** Ken & Robert's Veggie Pockets {With Tofu-Rella Soy Cheese} [Greek Style (with Spinach & Cheese), Pizza Style, Tex-Mex Style].
Manufacturer's Name: Imagine Foods, Inc. (Marketer/Distributor).
Manufacturer's Address: 299 California Ave. #305, Palo Alto, CA 94306. Phone: 415-327-1444.
Date of Introduction: 1990. May.
Ingredients: Greek: Crust: Organic whole wheat flour, organic wheat flour, water, expeller pressed oleic safflower oil, brown rice syrup, yeast, sea salt. Filling: Spinach, tofu

© Copyright Soyinfo Center 2013

mozzarella & jack (tofu, non-hydrogenated soy oil, casein [a natural derivative of non-fat milk], sea salt, citric acid, natural flavors, soy lecithin, guar gum, natural color), onions, mushrooms, rice starch, garlic, herbs, spices, sea salt. Organically grown and processed in accordance with section 26569.11 of the California Health and Safety Code. Reg. Penna. Dept. Agr.
Wt/Vol., Packaging, Price: 5 oz (141 gm) in plastic bag. Retails for $1.89 (7/92, California).
How Stored: Frozen.
New Product–Documentation: Talk with Robert Nissenbaum. 1990. March 14. This new line of products was launched in Oct. 1989 at the East Coast Natural Foods Expo (NFM) show, and will be available in stores in April or May 1990. Tofu-Rella has a good price. The product resembles frozen "Hot Pockets." It is totally enclosed dough shaped like a jelly doughnut, a hold-in-your hand quick meal. Talk with Robert Nissenbaum. 1990. June 21. The product was in the stores in May.

Ad in Vegetarian Times. 1990. July. p. 5. "Pockets for people with their hands full." "Ken & Robert's Veggie Pockets present a new alternative for health conscious people in a hurry. Each pocket is a delicious handful of the best fast food on the market, with tasty fillings like tofu mozzarella, tangy tomato sauce, organic pinto beans, spinach and seasonings. Ken and Robert don't compromise when it comes to quality. Baked, not fried, Ken & Robert's Veggie Pockets contain no cholesterol and they're lactose free. Just three minutes in a microwave or thirty in a conventional oven unlocks the flavor of these steaming, nutritious pockets packed with taste." The Pizza Pocket contains tofu mozzarella and the Greek Pocket contains tofu mozzarella and tofu jack cheese.

Leaflet received 1990. July. "Truly amazing. Pockets for people with their hands full."

Product (Greek Style) with Label purchased at Open Sesame in Lafayette, California. 1992. July. 8 by 3.75 inches. Orange, green, black, white, and tan on blue. "Truly amazing. A delicious baked organic wheat crust. Filled with spinach and Tofu Mozzarella. Pockets for people with their hands full. No cholesterol. Lactose free. Ken & Robert's Veggie Pockets are the most delicious mouthful of fast food going." Other varieties in 1991 include Indian.

Labels for Pizza Style and Tex-Mex Style sent by Robert Nissenbaum of Imagine Foods. 1990. July 5.

9556. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Janet Stubbs Soyfoods.
Manufacturer's Address: Avenida de los Picos, Bucerias, Nayarit, Mexico. Phone: 322-80306.
Date of Introduction: 1990. May.
Wt/Vol., Packaging, Price: Bulk. 5,000 pesos/kg = $0.97/lb.
New Product–Documentation: Talk with Janet at Soyfoods Center. 1990. July 14. She started making tofu in her kitchen in May 1990. She sells 20 kg/week to local restaurants, vegetarians, and health food stores.

9557. Macfarlane, Bruce J.; Riet, W.B. van der; Bothwell, T.H.; et al. 1990. Effect of traditional oriental soy products on iron absorption. *American J. of Clinical Nutrition* 51(5):873-80. May. [28 ref]
• ***Summary:*** Various soy products (silken tofu, tofu, tempeh, natto, different types of miso, sufu, and soy flour) were fed to 242 women. Blood levels of iron were then compared. Silken tofu, tempeh, natto, and the misos showed better iron absorption than tofu and sufu. The authors speculated that because tofu is higher in calcium, it might be this calcium that is inhibiting iron absorption. Silken tofu, coagulated with GDL, has a much lower calcium content than silken tofu. Address: MRC Iron and Red Cell Metabolism Unit, Dep. of Medicine, Univ. of Witatersrand, Johannesburg; Div. of Food Science and Technology, CSIR, Pretoria; and the Dep. of Medicine, Univ. of Natal, Durban, South Africa.

9558. **Product Name:** Nasoya Stuffed Pastas [Manicotti, Ravioli, Tortellini, or Stuffed Shells].
Manufacturer's Name: Nasoya Foods, Ltd.
Manufacturer's Address: 23 Jytek Park (P.O. Box 841), Leominster, MA 01453. Phone: 508-537-0713.
Date of Introduction: 1990. May.
Ingredients: Pasta (organically grown whole wheat flour, 100% durum semolina flour and water), filled with tofu (well water, organic soybeans, calcium sulfate, magnesium chloride [nigari]), imported olive oil, herbs, spices, sea salt, natural flavor.
Wt/Vol., Packaging, Price: 16 oz box. Retails for $2.89 to $2.99 (7/90).
How Stored: Frozen.
New Product–Documentation: Soya International. 1990. April/June. p. 22. Contact: Pam Clark. Talk with John Paino. 1990. Sept. 9. These 4 non-dairy frozen pasta products were launched in May 1990 after 2 years of product development. All use tofu as a filling. They are already one of the Nasoya's best products. John is Italian, and has been using tofu in lasagna and other pasta products at home for 12 years. Nasoya recently installed $100,000 worth of equipment to make the filling. The result tastes just like ricotta cheese. The final pasta product is made by an outside contractor.

Note: The ancestry of these products can be clearly traced to a similar line of products, with very similar names, introduced by Simply Natural Inc. of New Jersey in Sept. 1986. Nasoya supplied Simply Natural with some of the latter's tofu during 1987 and 1988. In mid-1988 Nasoya began tests on making Simply Natural's Soft Soyalite, a tofu-based cheese-like product and filling, and eventually worked out the difficult pasteurization, product flow, and hot-pack

© Copyright Soyinfo Center 2013

problems. By mid-1988 Nasoya and Simply Natural were seriously considering a merger. Simply Natural has since gone out of the soyfoods business because of legal problems with financial partners.

9559. Shurtleff, William; Aoyagi, Akiko. 1990. The tofu market in Europe. Lafayette, California: Soyfoods Center. 137 p. 28 cm. [600+ ref]
• ***Summary:*** Contents: Introduction and overview: Production of tofu in Europe–Totals by country, Europe's largest tofu manufacturers, trends in the tofu market in Western Europe (9 p.). The tofu market in the United Kingdom (Ranking of companies, production statistics, details on individual companies 10 p.). The tofu market in the Netherlands (10 p.). The tofu market in the West Germany (21 p.). The tofu market in the France (19 p.). The tofu market in the Belgium (10 p.). The tofu market in the other European countries (16 p.). Index. List of tofu manufacturers in Europe (sorted by country, and within each country by company name, 9 p.). Update on the tofu market in Europe. April 1991 (28 p.).

Production of tofu in Europe–Totals by country: United Kingdom 47,500 kg/week, started 1966, 35% share of five leading countries. Growth rate: 10%. Netherlands 44,500 kg/week, started 1964, 33% share of five leading countries. Growth rate: 8%. West Germany 24,650 kg/week, started 1981, 18% share of five leading countries. Growth rate: 10%. France 14,750 kg/week, started 1982, 11% share of five leading countries. Growth rate: 35%. Belgium 5,000 kg/week, started 1977, 4% share of five leading countries. Growth rate: unknown.

Europe's largest tofu manufacturers: 1. Heuschen-Schrouff, Netherlands, started 1964, makes 37,500 kg/week. 2. Dragon & Phoenix, UK, started 1966, makes 20,000 kg/week. 3. Cauldron Foods, UK, started 1981, makes 15,000 kg/week. 4. Société Soy, France, started 1982, makes 12,500 kg/week. 5. Soyastern / Dorstener Tofu, West Germany, started 1982, makes 7,000 kg/week. 6. Jonathan PVBA (Div. of Lima Foods), Belgium, started 1977, makes 4,500 kg/week. 7. Regular Tofu Co. (Haldane Foods), UK, started 1981, makes 4,000 kg/week. 8. Paul's Tofu, UK, started 1981, makes 3,500 kg/week. 9. Geestland, West Germany, started 1985, makes 3,250 kg/week. 10. Yamato/Huegli, West Germany, started 1982, makes 3,000 kg/week. 11. Galactina, Switzerland, started 1984, makes 3,000 kg/week. 12. Galactina, Switzerland, started 1984, makes 3,000 kg/week. 13. Soyana, Switzerland, started 1982, makes 3,000 kg/week. Total: 116,250 kg/week. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

9560. *Sprouter's Journal* (*International Sprout Growers Association*). 1990. "Huge success" for first sprout convention. 2(1):1. Spring.
• ***Summary:*** "Over 70 sprout growers and members of the sprout industry gathered in San Antonio, Texas for the First Annual International Sprout Growers Association Convention. 'I've never seen so many sprouters in the same place at the same time,' declared newly elect ISGA President Bob Phipps.

"The convention swung into action with the Sprouters Open Golf Tournament at San Antonio's Woodlake Country Club. The 12 hardy linksters enjoyed warm Texas weather and a challenging course.

"Peak Performers Institute President Dr. George Shenk kicked-off the first full day of convention activities with a talk on the value of cooperation and teamwork. He illustrated how lack of cooperation can handcuff individuals, businesses and organizations, preventing them from achieving their goals and reaching their full potential.

"Bob Blomquist, Vice President of Marketing for advertising giant DDB Needham, then spoke to the convention participants on elements of an advertising and promotion program. Throughout his discussion, the need to know the customer was emphasized. He stressed that advertising and promotion had to address customer benefits rather than product. Blomquist, who has headed a number of national advertising campaigns for Hills Brothers Coffee, Proctor and Gamble, and California Kiwifruit, told the audience that effective advertising involves an identifiable image and a consistent message aimed at a target market.

"The opening day luncheon speaker and workshop leader was produce merchandiser Teresa Nolan. President of the Nolan Network, a nationwide independent produce merchandising firm, Teresa described the strategies for working with wholesale and retail produce buyers. She described how merchandisers work with stores to promote products using point-of-sale materials, strategically located displays and newspaper feature advertising.

"Highlight of the convention was a tour of San Antonio's Energy Sprouts, one of the largest and most modern sprout producers in the United States. Owners Bob and Jane Phipps conducted tours of both greenleaf and mung bean sprouting operations and shared some ideas on packaging, advertising and promotion. A former news anchorwoman, Jane Phipps used her experience to produce videos for in-store promotion of sprouts. The 30,000 square foot operation also produces Tofu and cut vegetables for the greater San Antonio area.

"Day two of the First Annual ISGA Convention began with a general session entitled 'Introduction to ISGA.' During the first ever general membership meeting of the seven month old association, steering committee shared their thoughts with the members..."

According to California sprout grower and authority on organic growing, Peter Henderson, organically produced seed is the main issue facing the industry. Federal and state laws vary considerably on the definition of 'organic' with some states like California requiring the use of organic seed to be an organic product. Henderson said the debate is far

© Copyright Soyinfo Center 2013

from over at both the state and federal levels.

"The final workshop was a technical session on determining the cost of sprout production. New England sprout growers Barbara Sanderson and Bob Carter shared a system for calculating the true cost of operating a sprout business and provided materials and forms which growers could use in their own business.

"'This first annual ISGA Convention exceeded our wildest expectations in terms of content and attendance,' said Phipps. "We sprout growers from all over the United States and Canada and even a member from New Zealand, consider this inaugural convention a huge success.'

"According to Phipps, 'The greatest thing about this first ISGA convention is that so many sprout growers got together to talk about our industry. Sprouters have traditionally been pretty close to the vest about their businesses and reluctant to share ideas. In San Antonio, growers really opened up and exchanged thoughts and information. We've needed to do this for a long time.'

"The Second Annual ISGA Convention has tentatively been scheduled for late April or early May, 1991 in eastern Canada." Address: 7300 Lincolnshire Dr., Suite 200, Sacramento, California 95823.

9561. Vanka-Kawat B.V. 1990. Topmerken in de Aziatische levensmiddelen: Prijslist [The top brands in Asiatic foods: Price list]. 3e v.d. Kunstraat 18, 2521 BB Den Haag, Netherlands. 22 p. [Dut]

• ***Summary:*** The subtitle is "Import-Export Asian Food Specialties." Imported items are listed by country of origin. Non-imported are listed by product type: China: Pearl River mushroom soy, soy superior, and superior soy. Philippines: Silver Swan soy sauce. Hong Kong: Best black soy, Best light soy, Best soy light, Best soy sauce, Black soy, Black soy yellow label, Hoi sin sauce Meechung, Taotjo bean sauce. Japan: Akamiso, Kikkoman menmi, Kikkoman shoyu, Kikkoman steak sauce, Kikkoman teriyaki sauce, Marukin soy sauce, Morinaga silken tofu, Nagatani-en aka-miso, shiro-miso, Teriyaki sauce. Ketjap: Ketjap kaki tiga, Ketjap A, Ketjap 'A' manis, Ketjap benteng asin, Ketjap benteng manis, Ketjap vital, Superior soy, Tiger brand soy, Yellow label. Singapore: Salted soy beans sin sin, Taotjo bean sauce, Taotjo flower brand, Taotjo taksan. Taiwan: Black beans fermented [fermented black soybeans], Soy sauce ve wong, Tahoe amigo, Tauge [bean sprouts]. Fresh products: Vacuum packet fresh tofu. Fresh tempeh.

Note. This is the earliest Dutch-language document seen (April 2013) that mentions silken tofu, which it refers to as "silken tofu." Address: The Hague, Netherlands. Phone: 070-388- 88 04.

9562. Urban, Svadesha Ruediger. 1990. The history of Tofurei Svadesha, West Germany's first tofu manufacturer (Interview). *SoyaScan Notes*. June 13. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Ruediger Urban was born in about 1940. After 3-4 years of studying photography, in about 1969, he began working in a restaurant named Hotel Brauneberg that had been started by his brother in the city of Traben-Trarbach on Mosel (Moselle) River. At the restaurant he came across a large, high quality cookbook (covered in white silk) by Werner Fischer [or perhaps Alfred Walterspiel] titled *Meine Kuenst in Kueche und Restaurant* (My Art, Kitchen, and Restaurant) that contained 2-3 pages of information in German about how to make tofu. He started to buy the ingredients, but he was so overworked that he had no time to really start experimenting with tofu.

Then he went to work in a "Macro-Shop" in Deggendorf, in the Bavarian Forest, but he did not do anything with tofu there. Meanwhile he sold arts and crafts at marketplaces for several years to support himself and his two sons.

Then, in about 1979, he started on the side to make tofu in a little farmhouse at Winterlehen 1½, Einweging, in the Bavarian Forest (Bayerischer Wald). He ordered a copy of *The Farm Vegetarian Cookbook*, from which he learned more about tofu. He made only one product, tofu, using organically grown soybeans and nigari coagulant. Initially he tried making the tofu without removing the okara, but he soon filtered the milk to removed the okara. He made the tofu using a gas stove, which he sometimes used in the kitchen and sometimes moved out into the garden. The tofu was sold under his name Svadesha (he was a disciple of Bhagavan Sri Rajneesh) but he had no officially registered business. On weekends his two sons, Premdeva (the elder) and Gyandeva, helped with the tofu business. Twice a week he produced about 30-40 kg of tofu, which he packed in small plastic tubs, loaded into his car? and drove more than 200 km (120 miles) into Munich. There he personally delivered it to a handful of the new generation of natural food stores (*Biolaeden*) that sold all of his tofu. These pioneer natural foods shops included Erdgarten (the first), and Macro-Shop on Amalienstrasse. While still in Einweging he introduced his second product, Kraeuter Tofu (Herb Tofu), made by mixing and mashing herbs into finished pressed tofu to make a sort of seasoned tofu cottage cheese.

After about a year making tofu at this location, he decided to go to India for 6 months, so he entrusted his small business to another person while he was gone. The company fell apart during this time. Upon his return from India, Svadesha moved the business to Aeussere Koetzingerstr. 52a, D-8492 Fuerth im Wald, very near the Czechoslovakian border, and farther away (about 200 km or 120 miles) from Munich. He knew a woman friend there where he could work and stay. This new tofu shop began operation on 1 March 1981 and, because of pressure from retailers who needed official invoices, he registered the company under the name Svadesha Pflanzen-Feinkost. By mid-1982 was using

© Copyright Soyinfo Center 2013

20 lb of soybeans each time to make tofu 3 times a week. In Furth im Wald he introduced a new product, Tofu Pflanzarl, a special kind of Bavarian meatless meatballs or "Bolleten." Soon he was getting more and more orders.

So in 1983 Svadesha moved his company into Munich, his main market, and set up shop in Das Werkhaus at Leonrodstr. 19. Alexander Nabben's tofu shop was in the same building, but Alexander kindly offered to stop making tofu at that time. Svadesha changed his company's name to Tofurei Svadesha Naturkost Produkte. During this period, at meetings of Germany's various German tofu makers, the question arose as to which company had started first. It was clearly decided and agreed that Svadesha had been the first. Other early companies were Alexander's Tofu Shop (an underground business founded by Alexander Nabben at the Werkhaus on Leonrodstr. in Munich; started tofu production by Jan. 1981), and Auenland Tofu und Soja Produkte (founded by Peter Wiegand at Prien-Chiemsee; started tofu production in March 1982). Svadesha thinks (but is not sure) that Biogarten sold tofu made by other companies (including Svadesha's) but never made their own. Note that all of West Germany's early tofu companies started in southeastern Germany in the area around Munich.

In Munich, Svadesha kept making improved versions of his regular tofu, herb tofu, and tofu meatless meatballs. He also launched a new Tofu Pastete (Tofu Spread), and Raeucher Tofu (Smoked Tofu, in 3 flavors).

In 1985 Svadesha moved again, this time to a suburb east of Munich near Denning, into a former butcher shop (at Ospreussenstr. 22, D-8000 Munich 81), the company's present location. There the company really started to earn money. They introduced a new type of Tofu Pflanzarl, new Tofu Pastete (one with herbs, and one with tempeh), Tofu Burgers, Spice Tofu, Tofu Spring Rolls, and Tofu Schnitten (Tofu Slices) marinated in shoyu then fried, and Sauerkraut Schnitten (Tofu slices filled with sauerkraut). He also started selling tempeh, which was made by Byodo Naturkost.

On 1 June 1990 Svadesha sold his company for a good price to Robert Mayer and Erhardt Schwartz. He had learned 1 year before that he had cancer of the cheeks. At that time the company acquired a new structure and the name became Tofurei Svadesha Naturkost Produkte GmbH. The new owners agree with Svadesha's philosophy and have solid business experience, so the future looks promising. The company's best selling products are now, in descending order of popularity: Plain Tofu, Tofu Pflanzarl, Smoked Tofu, Tofu Schnitten (marinated, deep-fried slices), and Tofu Spring Rolls.

Aside from being the first tofu company in Germany, Svadesha feels that his other major innovations were being the first to make smoked tofu, Tofu Pflanzarl (tofu meatless meat balls), Herb Tofu, Tofu Schnitten, and Sauerkraut Schnitten. Address: Home: Waldstr. 4, D-8015 Ottenhofen, West Germany.

9563. Sakaguchi, Noboru. 1990. Early history of making tofu at Le Bol en Bois (Interview). *SoyaScan Notes.* June 14. Conducted by David de Korsak in France.

• ***Summary:*** In 1969 Mr. Sakaguchi made his first trip to Paris from his homeland, Japan. He returned to Paris in March 1974, and became aware of the possibility of buying a macrobiotic restaurant from a friend who at the time was a cook in that restaurant. From April-Aug. 1974 he returned to Japan to finalize a deal with Japanese investors and to study tofu making. While he was in Paris touring vegetarian restaurants, Mr. Sakaguchi had been struck by the lack of protein in the foods he saw. Tofu naturally came to his mind as the food that would ideally supplement (and complement) that vegetarian cuisine. "Tofu was missing... I thought of this as my mission."

On 2 Sept. 1974 Mr. Sakaguchi opened Le Bol en Bois. He had expanded it to include a natural foods retail store located directly across the street. In the last quarter of 1975 he began trials making tofu using calcium sulfate as a coagulant. In about Nov. or Dec. 1975 he began commercial production of tofu, using real nigari as a coagulant. He sold this tofu only at Le Bol en Bois natural foods store and served it in his restaurant. An invoice dated 26 Dec. 1975 from Mitoku Company Ltd. in Japan shows that he imported 40 kg of nigari ($17.34), 50 x 150 gm packets of nigari ($33.27), a grinder for making tofu ($562), other pieces of tofu making equipment ($450.35), as well as 1,800 liters of Sakae Tamari-Shoyu, 900 liters of Johsen Tamari-Shoyu, and 200 kg of brown rice miso. Production remained limited (two days a week, 40 cakes per day) until the end of 1976. Mr. Sakaguchi made the tofu himself, helped by some Japanese students. One evening in the winter of 1976 an unusually large number of people came to the store to buy tofu. This corresponded to the end of a conference held by Michio Kushi in Paris. The store became the focus of a lot of interest and activity. Production jumped to roughly 240 cakes per day, two days a week. By the end of 1976 Mr. Sakaguchi had hired his first employee to help him make tofu.

In 1985 the tofu production activity was set up as a separate company named Daizou, located outside of Paris at Champigny sur Marne. At that time production was about 300 cakes per day, two days a week. Mr. Sakaguchi now began to make tofu more than twice a week and to sell this tofu at other retail outlets in addition to his own. Address: 883 Rue de Bernau–Z.I., 94500 Champigny Sur Marne, France. Phone: 48 82 39 90 or 47.06.33.71.

9564. Sakaguchi, Noboru. 1990. Early history of making tofu at Alimentation Japonais and Etablissements Takanami (Interview). *SoyaScan Notes.* June 14. Conducted by David de Korsak in France.

• ***Summary:*** Mr. Mikiyo Yamanaka, a Japanese who came to Paris as a tourist guide, started making tofu at the end of

© Copyright Soyinfo Center 2013

1968. He made it alone, and not as part of any business, in his bathroom at night using calcium sulfate as a coagulant. He sold the tofu to Japanese embassy personnel. In about 1971-72 he established Alimentation Japonais Osaka, a Japanese restaurant in Paris. He moved his tofu shop into the basement of his restaurant, where it stayed until the end of 1985, when production stopped. A key tofu maker in the early days was Mr. Suzuki, who now owns Ramen Tei Restaurant in Paris (Phone: 1-42 60 64 29). Mr. Yamanaka made quite a bit of money in his business, but he failed to declare it and pay taxes. Instead of facing a lawsuit for this, he decided to return to Japan. His company, now a chain of Japanese restaurants, is presently run by Mr. Nakajima.

Mr. ? Takanami founded Etablissements Takanami in Belgium. But before he set up his company in Belgium, he spent 6-12 months in Paris and during that time he made some tofu, although it is not clear whether or not he did so on a commercial basis. He is now in Brussels (Phone: 2 522 8192). Address: 883 Rue de Bernau–Z.I., 94500 Champigny Sur Marne, France. Phone: 48 82 39 90 or 47.06.33.71.

9565. Kumoda, Yasuo. 1990. Recent developments at Morinaga (Interview). *SoyaScan Notes.* June 19. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The minimum print run for one Tetra Brik product is 300,000 cartons. There are now 15 companies in America that want Morinaga to private label aseptic tofu for them. Mr. Ono in Japan is opposed to private labeling. he wants to build the Mori-Nu brand. Mori-Nu tofu is in 13% of the supermarkets in America but has reached a plateau.

These are the main problems/questions now: 1. Should Morinaga develop a joint venture with Pacific Foods of Oregon to make Mori-Nu Tofu in their low-beany-flavor STS plant, or build their own plant? 2. Should Mori-Nu private label their aseptic tofu for other companies. 3. Should they develop a seasoned/flavored tofu or work on second generation tofu products? 4. Should Morinaga start to make water-packed tofu. 5. What will they do if Tetra Brik cartons are outlawed in many U.S. states and no new acceptable carton is developed by Tetra Pak International? Address: 5800 South Eastern Ave., Suite 270, Los Angeles, California 90040. Phone: 213-728-4325.

9566. Nath, Sureth (born Giampiero Spadafora). 1990. Re: Work with soyfoods and seitan by Bilkis S.c.r.l. in Pioppo (near Palermo), Italy. Letter to William Shurtleff at Soyfoods Center, June 19. 2 p. Typed, with signature. [Eng]
• ***Summary:*** Sureth and his co-workers have been making tofu for their small restaurant near Palermo since 1982. Now they want to expand their operation.

"We started our small tofu activity in 1982, just for our 'familiar' needs and as a novelty for our small vegetarian restaurant. But little by little tofu has assumed a great importance in our diet and in that of those who have tried it, so we were obliged to improve our machinery and increase our production. Now we produce about 40-50 kg/week of tofu, and we make it all in one morning, just to cover the requests of our customers, of several vegetarian restaurants in town, and our own needs.

"We could surely sell much more tofu, but up to now we've worked in a small and unfit laboratory, our kitchen, so we don't have the right requirements to apply for a license to start a real business.

"A few months ago we created a co-operative society; in Italy banks help and finance these kind of societies... tofu making is a part of a very charged schedule and we are obliged to reduce the work's time to four hours, therefore we actually need the most efficient and useful plant.

"We are a community of 14 people, living together with the mutual interest on yoga and spiritual evolution. We live 20 km far from Palermo, on a hard, quiet mountain, and there we make tofu, bread, seitan, sprouts, cakes, tempeh, etc. on a small scale, and sell them in our Centre in town, the 'Centro di Cultura Rishi' which hosts the health food store of the co-operative, and a vegetarian restaurant as means to help all those who wish to improve their diet and don't know what or how to cook... the core of this Centre are the yoga lessons held by our master, Aruna Nath Giri." Address: Bilkis S.c.r.l., S.S. 186 Ponte Catena, 90040 Pioppo (Palermo), Italy.

9567. McKelvey, Richard. 1990. New developments at Lightlife Foods in Greenfield, Massachusetts (Interview). *SoyaScan Notes.* June 20. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Richard was the sales manager at Tomsun Foods while the company was growing rapidly and at the time it went bankrupt. New products at Lightlife Foods include Foney Baloney (Aug. 1989), Lemon Grill (Tempeh Burgers) (Nov. 1989), and Lean Links (April 1990). Lightlife now buys its tofu from Nasoya. About half the company's sales come from tempeh and tempeh products, and about half from tofu products. The best-selling products are (1) Tofu Pups, (2) Lightlife Tempehworks Soy Tempeh, and (3) Fakin' Bacon. The company is trying to get away from the pure Tempehworks products and to include Lightlife on every label. The new soy tempeh labels will read as shown above. He feels the Grills and the Lean Links have the greatest potential. The Lean Links are very close in concept to their meat counterparts. Address: Sales Manager, Lightlife Foods Inc., 74 Fairview St., Greenfield, MA 01301. Phone: 413-774-6001.

9568. *SoyaScan Notes.* 1990. Co-packing and private labeling (Overview). June 20. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** From the point of view of a company who wants another to co-pack/private label products for them. Examples Tofutti Brands has a ice cream maker make its

© Copyright Soyinfo Center 2013

soy ice cream. White Wave has a sausage company make its Healthy Links. Advantages: No need to buy new equipment, space, insurance, or hire new workers, which saves money and time. The co-packer has the experience and equipment needed to produce the products. Product development time is usually reduced. Disadvantages: Logistics may be more complicated, especially if the company is not located nearby. A big company may not be very interested in giving you the specialized help and service you need at the beginning or in emergencies. Watch out: Be sure to get a non-compete clause so that company can't steal your product, drop you, and start to compete with you. Get a contract with a long duration, and lots of specifics.

From the point of a company who has a product that other soyfoods companies want to have packed and sold under their label. Examples: Hinoichi Tofu, and Alpro soymilk and soy desserts. Advantages: Co-packing greatly expands your sales. It allows you to use your plant at higher percentage capacity, which lowers per-unit costs. Disadvantages: The co-packed products usually end up competing with yours, thus lowering sales and profit margins of the in-house brand.

9569. McKelvey, Richard. 1990. Tomsun Foods and Jofu: The rise and fall, recovery under William Holmes, then current demise (Interview). *SoyaScan Notes.* June 21. Conducted by William Shurtleff of Soyfoods Center. Followed by written chronology, 28 Nov. 1990.

• ***Summary:*** Richard worked for Tomsun from June 1984 until Jan. 1990. He started working part time doing taste testing and consumer research on Jofu while attending the Univ. of Massachusetts Business School. In June 1985 he was hired full time as sales manager for Tomsun's tofu and Oriental products. Dave Scarbo, formerly with Dannon, was sales manager for Jofu.

In 1979 Juan Metzger of Dannon had contacted Tom Timmins of New England Soy Dairy (NESD), and in 1982 he joined NESD as chairman of the board. Also in 1982 the company's name was changed to Tomsun Foods, Inc. But it was not until 1983 that the idea of Jofu was born. That year NESD had sales of $1.8 million (up from $700,000 in 1980) and 34 employees. In Dec. 1983 *Inc.* magazine named Tomsun one of the fastest growing private companies in America. By mid-1985 the Jofu package design and formula were ready. In Dec. 1985 Jofu was launched in New England test market. From Jan. to March 1986 Jofu was distributed into western Massachusetts supermarkets and Wegmans supermarkets in Rochester, New York. Tomsun began a media campaign with 10 weeks of radio and free standing inserts (FSIs) featuring the slogan "It's time to go beyond yogurt." In May 1986 Jofu was introduced into health food distribution. At that time, Jofu was sweetened with high fructose corn syrup. About 6 months later, the corn syrup was discontinued; honey was used as a sweetener for the health food market and sugar for the mass market. Also in May 1986 Tomsun launched a massive public relations campaign. Articles appeared in highly visible such as the *Wall Street Journal* and *Advertising Age.* Richard is not sure when the sugar sweetened and when the honey sweetened flavors were introduced. In Dec. 1986 Tomsun's first public stock offering [which netted $3.46 million] raised the necessary funds to promote the product. During 1986, Tomsun had sales of $2.5 million and 65 employees. Shortly after the stock offering, Tomsun's sales force was restructured to have 3 regional managers instead of product managers. The managers were much more interested in Jofu than in tofu. Richard became regional manager for New England.

In the spring of 1987 Jofu was introduced, at great expense, to metropolitan New York and New Jersey. During 1987 Tomsun spent nearly $1 million on a radio, newspaper, and public relations campaign (including slotting allowances and some coupons in papers) in the New York metropolitan, New England, and Albany (NY) markets. The goal was to get Jofu into supermarkets. The promotional program was well executed and cost effective; orders flowed in. Though sales rose in 1987 to $3.6 million, the company lost more than $2 million that year. Big problems had started. Tomsun began to receive many more orders than it was able to fill. There were ongoing product shortages and problems with product quality and consistency–which hurt. Shelf life was not a big problem. It started at 40 days and now is about 90 days.

With so much attention focused on Jofu, Tomsun did not give enough attention to its traditional money making lines, especially tofu and pasta. Nasoya seized the opportunity and began to offer heavy competition to Tomsun's tofu products. Nasoya came in with lower prices and aggressive marketing. Nasoya's pitch was that Tomsun doesn't care about tofu any more; they are "beyond tofu" into this new dairylike product for the dairy case. Produce buyers began to lose confidence in Tomsun, which was slow to react. Nasoya's tofu was soon replacing Tomsun's in many large accounts where Tomsun had been the first and only brand for years. So one of Tomsun's major sources of income began to drop rapidly. At the same time the tofu machinery was getting run down, which led to quality problems and made it easier for Nasoya to compete.

There were several major causes of the company's downfall. The first was overexpansion too quickly. The company took big risks. It went down to New York and New Jersey, spent big money on Jofu slotting allowances and PR, opened an office in New York City and hired a full sales team there. But it was too big a market for the company to bite off too quickly. They were not yet solid enough in New England. Richard feels the company should have built a solid base with honey-sweetened Jofu in the natural foods market and then expanded from there into the supermarkets with sugar-sweetened Jofu. The only competition was Soygurt.

© Copyright Soyinfo Center 2013

Many natural food consumers were looking for a product like Jofu and Tomsun was not getting it to them. The main thing that typical consumers don't like about dairy yogurt is its sour taste. Jofu tried to go "beyond yogurt" with a sweet product; some felt it was too sweet. The management was extremely optimistic about the product's future and pursued rapid growth. Metzger's past success and the success of the public stock offerings fueled this optimism. People liked the product and there were repeat orders. But as Richard had learned in business school, "nothing fails like success." Too rapid growth can destroy a company. You've got to remember where you were and what got you there.

The second cause of the downfall was the stock market crash of October 1988, just when the management was planning to go after the additional funds needed to support the rapid expansion. Without the unexpected crash, the game plan would probably have continued successfully on course. The third cause was the loss of the steady income which tofu sales used to generate. Even with the crash, this income, had it continued, could have kept the company afloat. Within a period of about 2 years, Nasoya was able to take away about 60% of Tomsun's tofu sales, and about 80% by the time of the crash.

After the crash, Tomsun had big cash flow problems. The bills and coupons poured in. The company looked for new ways to raise funds and cut expenses. Many top managers stopped getting paid and others took pay cuts. Tomsun offered to sell Nasoya something related to Tomsun's tofu line. David Kirsch, Juan Metzger, and Tom Timmins met at a house in Greenfield about 3 days a week to manage Tomsun. Finally, just as Tomsun was about to secure a bank loan using the tofu plant as collateral, two creditors put a lien on the plant. That triggered the company's declaration of Chapter 11 bankruptcy on 8 April 1988. They trimmed way down and ran for a while under Chapter 11. In June 1988 the Tomsun plant in Greenfield was closed. Jofu began to be co-packed by a small company named Lavida Foods in Hardwick, Vermont. At this time, fresh soymilk, formerly made by Tomsun, as discontinued as the product's main ingredient; Soy Supreme, a spray-dried tofu made by St. Peter Creamery in Minnesota, was used in its place. Tomsun's regular tofu was made for a very short time by Henry Creces of Panda Foods in New York, but his quality and supply was inadequate. So there were consistent shortages; local ordinances prevented Lavida from expanding. There were also problems with control over the long distance, and high transportation costs.

In Aug. 1988 David Allen Kirsch resigned as president of Tomsun Foods and stopped his active work with the company, but kept his stock. Timmins left shortly thereafter; he felt it was time for a change now that the company was in good hands. Timmins is now working on a number of projects that look quite promising.

Finally in late 1988 Metzger contacted his friend, William Holmes, who had made a huge success out of the Pollio Corporation, a large string cheese company which he had recently sold to Kraft. Holmes was looking to do something new, so Metzger invited him to buy Tomsun out of Chapter 11. In Feb. 1989, Holmes bought 80% Tomsun's stock, injecting badly needed new capital, and took Tomsun out of Chapter 11. Metzger, Kirsch, and Timmins kept their ownership of most of the rest of the company's stock. Holmes became the CEO, Metzger the head of marketing, and Timmins the president.

The two big needs were to find a co-packer that could provide reliable, consistent quality and volume. In April 1989 West Lynn Creamery, a large manufacturer of dairy products located in West Lynn, Massachusetts, outside of Boston, began to co-pack Jofu as a result of lack of anticipated capacity at Lavida Foods, as well as closer proximity to the market. (About 6 months later, Lavida Foods went bankrupt.) But Tomsun was small peanuts for West Lynn, and the latter was not willing to meet Tomsun's special and often urgent needs. And there were serious quality problems. In June 1989 the company headquarters was moved from Greenfield, Massachusetts, to Port Washington, New York, where Holmes lived.

In late 1989 Holmes relaunched Jofu with radio and newspaper ads in Boston and New York. In Jan. 1990 Richard left Tomsun Foods International. In Feb. 1990 Tomsun dropped West Lynn Creamery due to perceived quality problems and had Friendship Dairies in Friendship, New York, co-pack Jofu. That arrangement was working well in June 1990 when Richard summarized the current situation: The company is now very lean, with little overhead. They are focusing more the health food market, while keeping stable in supermarkets. Product quality is now good. He feels that Jofu is the best soy yogurt on the East Coast. Stir Fruity (made by Azumaya in California) has been on the East Coast market for several years, in the produce section of Stop & Shop and Purity Supreme, but its use of preservatives, gelatin, and sugar is a problem for some consumers. The only other brand is made by Ambrosia. The future looks like a slow, steady growth scenario. Holmes, who manages the company from day to day, is in his mid-50s. He is a fighter, with good experience, enough capital, and a good product. Metzger is still involved in a limited way. Jofu is now a good product, with all natural ingredients, no preservatives, and high tech pasteurization in the cup giving a 90-day shelf life. But there are some inconsistencies in quality and bringing back customers who were lost because of poor product quality or short supplies will take time. In retrospect, the company did a very good job given its small size and limited resources.

In Jan. 1990 Richard left the company; his last project was gathering information for William Holmes for a lawsuit concerning Jofu quality problems. Then in about Aug. 1990 Jofu was taken off the market due to quality problems. At

© Copyright Soyinfo Center 2013

about the same time Holmes and Tomsun Foods filed a lawsuit against West Lynn Creamery related to these alleged quality problems. Jofu will probably not be available until this lawsuit is resolved.

Richard doubts that Jofu will ever be back on the market under the name Jofu in its old form. It might be able to be revived if another company that could package the product aseptically entered the picture. Holmes, who comes from a supermarket background, always envisioned Jofu being sold in the produce case, but recent awareness of tofu as a "potentially hazardous food" which must be stored at 45ºF or below makes that difficult. Distributors, retailers, and consumers are all tired of the problems and delays they have had to endure with Jofu. Ambrosia Soy is a weak competitor. Address: Sales Manager, Lightlife Foods Inc., 74 Fairview St., Greenfield, Massachusetts 01301. Phone: 413-774-6001.

9570. Barat, Gary. 1990. Recent developments at Legume, Inc. (Interview). *SoyaScan Notes.* June 23. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Barat Chocolate Bars and other products containing tofu in the non-dairy line are now being sold to 4 countries in Europe. In all except Switzerland they are sold under the same label used in the USA, but in Switzerland they are sold under the Morga label.

In the U.S. the chocolate line is doing okay. The main problem for consumers is that, while they like the fat that the bars are cholesterol free, they do not like the high fat content. To call a product chocolate in the USA the fat must be cocoa butter, and the product must contain a minimum level of this fat. Otherwise it cannot be called "real chocolate" and must be labeled as a "chocolate mixture."

Legume's best-selling products are the bars and the rice cakes. They are now working on a new product called Barat Rice Goodies: Crispy Cakes, which are expected to be out in October. They bite-sized pieces are made of extruded (not puffed) rice covered with Barat chocolate. In America most real chocolate is not sold during the summer, since it melts and weeps. Reese's Peanut Butter Cups are made with a chocolate compound. They contain a hardened (hydrogenated) vegetable oil instead of cocoa butter. Address: P.O. Box 426, Schoolhouse Park, 112 Main Road, Montville, New Jersey 07045. Phone: 201-263-1013.

9571. Barat, Gary. 1990. Caribbean Organics–Growing organic tropical fruits in Puerto Rico (Interview). *SoyaScan Notes.* June 23. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Gary and Dan Burke have established a partnership named Caribbean Organics in Puerto Rico. It will attempt to grow tropical fruits organically and sell them in bulk to Europe and the USA. The Puerto Rican government has offered to aid in funding the project. A test farm will be ready in 6 months. They will be contracting with existing farmers to grow the crops. Gary and Chandri have recently purchased 1 acre of land by the ocean in Puerto Rico for their family use. Address: P.O. Box 426, Schoolhouse Park, 112 Main Road, Montville, New Jersey 07045. Phone: 201-263-1013.

9572. Davies, Joy. 1990. Rice bowl rituals: Japanese cooking. *Guardian* (*England*). June 23. p. A19. Illustrated by Nicola Heindl.
• ***Summary:*** The writer, with Atsuko, a private interpreter and guide, sets off into the Tokyo suburbs for a culinary adventure. Their first stop was a "tofu shop where snowy white cakes of fresh bean curd were fished out of a large stainless steel tank [filled with cold water]. Atsuko explained the difference between cotton or 'momen' tofu where the curds are drained on a piece of cotton cloth and *kinu-goshi* or silk tofu, which is not drained and so has a far more delicate custard texture... We also bought two flat honey-gold pouches of fried tofu."

9573. Trevor Johnston. 1990. Some companies start out really small and then they grow. Sometimes they change their name. Very rarely they change it back again (Leaflet). Penrose, Auckland, New Zealand. 1 p. Front and back. 30 cm. June 23.
• ***Summary:*** "Yes Bean Supreme is back. We've changed to avoid ongoing confusion between our company and the Reckitt and Coleman 'Down to Earth' brand of household cleansers. No legal conflict exists between our two companies, however for marketing purposes we don't want this name association to continue."

"Bean Supreme–we think you'll like it."

In the upper left corner is the Bean Supreme logo + "Brings happiness." Address: Marketing Director, Bean Supreme Ltd., Box 12082, 140 Hugo Johnson Dr., Penrose, Auckland, New Zealand. Phone: (09) 590 592.

9574. Karis, Xavier. 1990. Medical Soy, Parma Soia, and Soyfoods in Italy (Interview). *SoyaScan Notes.* June 25. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Of the two companies, Karis thinks that Medical Soy was founded about 3-4 years ago, before Parma Soia. For details ask Medical Soy introduced their line of soy products first, but only lately have they put much effort into promoting the line, especially after the introduction of their Fresh Amisoya line. They apparently make all or most of these products themselves, since on the products is written "Product of Italy," and he is not aware of any other company that could make these products for them. Parma Soia apparently does not make any of their own products. They have a large and very impressive brochure describing their Amisoya line and attempting to find stores to sell the line. These products are now fairly widely sold in big supermarkets, including in Bologna, Milano, Torino, etc. It

© Copyright Soyinfo Center 2013

is surprising that they do not package their soymilk in Tetra Brik cartons.

Karis hasn't seen any Parma Soia products in stores. Parma Soia (a subsidiary of Parmalat, the giant Italian dairy company) has 3 lines of products. The "Campi di Soya" line is probably meant to be sold through supermarkets. They also have an "Erboristeria" line for health food stores and places resembling Reform Houses. The root of the word is "erborista" = botanist or herbalist. The products in the first and second lines seem the same except for the packaging. The Nature Soy line is imported tofu, soy curd, and soymilk. "Parma Soia" does not appear prominently on the label and the product was not on display at the fair where he obtained the brochures. Address: Export/Marketing Dep., Gio. Buton & Co. S.p.a., Viale Angelo Masini, 24, 40126 Bologna, Italy. Phone: 051-506368.

9575. Gaiser, Klaus. 1990. The second German Soyfoods Association meeting, and new developments (Interview). *SoyaScan Notes.* June 29. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Shurtleff wrote a letter to the German Soyfoods Association. Gaiser translated it into German and read it to those assembled at the second meeting. But the letter did not impress them very much; the smaller tofu manufacturers are still afraid of the bigger ones. They are all struggling with their daily problems of cash flow, etc. and do not seem very interested in long-term planning. Now Klaus and Thomas Karas are interested in working to reactivate the European Soyfoods Assoc. and/or found a new association in Germany. Klaus is not so busy now during the summer, when people in Germany eat less tofu than during the cold months.

Concerning Auenland, Klaus feels that this company was a very unfair competitor in terms of spreading misinformation about Klaus. In Germany there is a law that magnesium salts cannot generally be used as an "ingredient" in foods (incl. magnesium chloride in tofu), unless it is considered as a "processing aid" (*Hilfstoff*) if very little ends up in the final product. This last area is a gray area. Yamato has always taken the safer path and used calcium sulfate as a coagulant. But tofu was introduced to Germany mainly by followers of macrobiotics, who favor use of nigari (unrefined magnesium chloride). So Peter Wiegand repeatedly went to Yamato's most important wholesaler and complained: "Can you imagine it. Yamato is using 'Plaster of Paris' in their tofu. Its just like making concrete out of soybeans. For God's sake. How can you sell such a product to your retailers?" Yet Wiegand knew that this was a good, natural coagulant that had been used in China (where it is named *shu-gao*) since ancient times to make tofu.

Concerning Avo Feinkost and their Sofit line of second generation tofu products–it is a complex situation. Klaus is not sure whether or not Avo makes any tofu, since the company does not sell any tofu as such. Klaus is not sure but he thinks that Avo does not buy tofu, but rather makes tofu out of soy protein isolates. The products are quite good imitations of sausage products. The man who runs the tofu operation is a butcher by trade. The biggest German Reform House foods distributor is Heirler, which like Yamato, is partly owned by Huegli. Heirler sells basic tofu that is mainly from Hensel, and second generation tofu products which (as far as Klaus knows, up until now) exclusively from Avo but under the Heirler brand. Heirler does not yet sell any Yamato products, but in the long run Heirler will since Yamato is a sister firm. Things seem to be moving very slowly, however.

Concerning Wolfgang Haberger, Thomas started the company officially in 1982 and Wolfgang joined in Jan. 1984 because he had capital to found the GmbH (Company Ltd.). He left officially in June 1989, but in fact he left earlier. Klaus and Wolfgang did not fit and work together well. Address: President, Yamato Tofuhaus GmbH, Rittweg 11/1, D-7400 Tuebingen–Hirschau, West Germany. Phone: 7071-71094 or 95.

9576. Johnson, Dick. 1990. Early work with imitation cheeses and tofu at Anderson Clayton Foods in Texas (Interview). *SoyaScan Notes.* June 30. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** In Oct. 1972 Dick was hired by Ralph Sand to work at Anderson Clayton Foods on a developing imitation cheeses. The original goal was to make an imitation cheese without any dairy products. He and Ralph spent a number of years trying to put together a formula for a product that would melt and could be sliced, like a Kraft America cheese. Natural American or cheddar cheese contains about 37% water, 25% protein, 32% fat, and 2% carbohydrate. They used soy protein isolates to replace casein (milk protein), slightly hydrogenated vegetable fats to replace butterfat, low-DE (30-40, low sweetness value) dextrose compounds from corn syrup to replace lactose as the carbohydrate source, carrageenan and alginates as part of the setting agent, and imitation cheese flavors from various flavor houses. It was believed that eventually there would not be enough casein to supply world demand.

They were never able to develop an acceptable truly no-dairy commercial cheese with no casein. The company's first imitation cheese, launched in 1973, contained no soy. It used imported casein and its main benefit was lower cost. It did not require a long storage period (typically 6 months) to age the cheese, which reduced the cost. Later they used both soy protein isolates and casein, plus lactose, to make a commercial imitation cheese that was sold, along with the company's other imitation cheeses, under the "Unique Loaf" line and brand. Only the American flavor was produced, no mozzarella, though lots of research was done on mozzarella. It was sliced but the individual slices were not wrapped. One of the features was that the slices would not stick to one

© Copyright Soyinfo Center 2013

another, even if warm. It was launched in about 1982-83 and may still be on the market. The product was manufactured at Humboldt, Tennessee, about 70 miles outside of Memphis. The main market was restaurants, which used it in grilled cheese sandwiches and hamburgers. The product sold well, about 20,000 lb/week. The company was still making it when he left in 1986.

He and Ralph Sand made a little bit of tofu and there was some interest by Anderson Clayton in about 1975-77. They experimented with using calcium compounds to make tofu firmer. The broader research had to do with making cheeses with soy protein. Tofu was considered by some as a kind of cheese, so they did a little work to see what that cheese was like.

Anderson Clayton Co., which was originally a cotton broker, was the umbrella for a number of divisions, one of which was Anderson Clayton Foods. They also had an insurance division. Address: Cross Lake, Minnesota. Phone: 218-692-2775.

9577. Sand, Ralph. 1990. Early work with tofu and imitation cheeses at Anderson Clayton Foods in Texas (Interview). *SoyaScan Notes.* June 30. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** In 1972 Ralph started to work as a researcher for Anderson Clayton Foods at the William Clayton Research Center in Richardson, Texas (just northwest of Dallas). Shortly thereafter he hired an assistant, Dick Johnson (who now lives in Cross Lake, Minnesota). Ralph worked on imitation cheeses for about 12 years. In 1973 Anderson Clayton introduced a casein-based Mozzarella-flavored imitation cheese under the Unique Loaf brand. It was made at the company plant in Humboldt, Tennessee, which made only imitation cheeses. Some of these products are still on the market. These were the first successful imitation cheeses in the USA.

The goal of Ralph's research was to develop imitation American (process) and mozzarella cheeses (with some interest in imitation a cultured cheese such as Cheddar) that used soy protein isolates instead of casein. There were various problems: 1. Casein tends to develop a barn-like odor when it stands around a while. 2. Getting a true cheese flavor from a flavor house, or by hydrolysis of natural cheeses to a get a very strong cheese flavor. 3. Casein contains a little cholesterol bound to it, so a casein-based cheese cannot be advertised as cholesterol free. 4. Casein has to be imported. The best quality comes mainly from Ireland, Australia, or New Zealand, where more milk is produced than consumed. Casein from the USA would be too expensive. Soy protein is widely made domestically.

Their research showed that the casein (protein) in dairy cheese does not actually melt; the fat melts but the protein dissolves in the water contained in the cheese. The main problem with soy-based casein-free cheeses was that they could not be made to melt. There was some success in making a cheese that combined soy protein with casein; this product was marketed. They found that a mixture of polyphosphates (especially tripolyphosphates) was very helpful in making soy proteins dissolve in cheeses. Soy protein is extremely difficult to work with in cheeses, especially because it lacks the solubility characteristics of casein. Enzymes (rennin and *Mucor miehei* [a bacterial enzyme that works line rennin]) were applied to the soy proteins with some success.

Marvin Thompson and Dorothy Brower at the Eastern Regional Research Lab. in Philadelphia, Pennsylvania, did considerable work trying to substitute soy protein for casein in cheeses, then fermenting it. They had a modicum of success.

In about 1975-76 Anderson Clayton got interested in producing tofu as a consumer retail product, either in the USA, Mexico, or Brazil. They already sold margarine and salad dressings. This tofu work was independent of the cheese research. Ralph's group of 3-4 researchers made an engineering study of tofu, studying the protein and oil recoveries, doing nutritional and cost analyses, etc. The director of research at the time was Mr. Harold Keesee (who now lives in the Dallas area). The person who keeps in touch with all former Anderson Clayton employees is Jess Covey (phone: 214-423-5517). On 6 Jan. 1977 Ralph attended a lecture on tofu given by William Shurtleff in Dallas, Texas. Afterwards they discussed the subject. After about a year of research, the tofu project fizzled out; the company probably figured there was not enough money to be made in tofu.

One of the company's junior directors, A.H. Tony Chen (who now lives at 4113 Midnight Dr., Plano, TX 75093), was pushing soy protein in tofu or a product like tofu for sale in China. He formed a company, hired a number of ex-Anderson Clayton employees, and they were making the product in Texas. He was having great success until some economic problem in China put a damper on his work.

Ralph was taken away from research on imitation cheeses in about 1984 to do other research. He was replaced by a person named Pete. Dick Johnson continued in the cheese work until about 1987. In about 1984 an imitation cheese containing some soy protein was introduced commercially. Note: Dick Johnson recalls that Tony Chen exported lots of food manufacturing equipment (made by other U.S. companies) to China but he was not aware that Tony did any work with foods. He is now a consultant in Plano, Texas. Address: 182 Moonlight Dr., Plano, TX 75094. Phone: 214-423-0050.

9578. **Product Name:** Soydance Soycheese [Mozzarella, Dill, Toasted Sesame, Garlic, Cheddar, or Jalapeño].
Manufacturer's Name: Amberwave Foods.
Manufacturer's Address: 201 Ann Street, Oakmont, PA 15139. Phone: 412-828-3040.

© Copyright Soyinfo Center 2013

Date of Introduction: 1990. June.
Ingredients: Organic tofu, blend of unrefined oils, fresh herbs, spices.
Wt/Vol., Packaging, Price: 8 oz package. Retails for $2.25.
How Stored: Refrigerated.
New Product–Documentation: Soya International. 1990. April/June. p. 24. Contact: Tom Mulvey.

9579. Ashraf, Hea-Ran Lee; Luczycki, Dorothy. 1990. Acceptability of tofu-containing foods among college students. *J. of Nutrition Education* 22(3):137-40. May/June. [13 ref]
• ***Summary:*** The researchers tested the acceptability of tofu among college students eating in a cafeteria. In twelve recipes the main protein source was completely replaced by tofu. The nutrient content of all the modified recipes was improved. When tofu replaced meat, eggs or dairy, the product was reduced in calories, protein, fat, cholesterol and sodium.

Ten of the twelve recipes were well accepted by the students. The two that were not well accepted were tofu nuggets, which had an unacceptable texture, and chocolate mint pie. For the latter, subjects objected to the mint flavoring in the pie rather than the tofu. Address: 1. Dep. of Animal Science, Food & Nutrition, Southern Illinois Univ. at Carbondale, Carbondale, Illinois 62901; 2. Trinity Medical Center, Carrollton, Texas 75006.

9580. Barnard, Neal D. 1990. The power of your plate: A plan for better health. Summertown, Tennessee: The Book Publishing Co. 240 p. Index. June. 23 cm. [65* ref]
• ***Summary:*** In this book 17 experts, including such eminent medical professionals as Michael DeBakey, William Castelli, and C. Wayne Callaway, meet on common ground with the author concerning the benefits of a low-fat, low-cholesterol, high-fiber diet–that is, a food program that is largely free of meat. The subtitle on the title page reads: Eating well for better health–17 experts tell you how!

Contents: Introduction. Part I. 1. Cholesterol, food, and your heart. 2. Dr. Michael DeBakey: An interview. 3. Tackling cancer. 4. New strategies in weight control. 5. Uninvited guests: Food-borne illness. 6. Other common health problems. 7. Foods and the mind. 8. The evolution of the human diet. Part II. 9. Recommendations. 10. Beyond willpower. 11. Food ideas and recipes. References.

Soy-related recipes include: Scrambled tofu (to replace scrambled eggs, p. 215). Miso soup with wakame (p. 216-17). Tofu salad (like eggless egg salad, p. 219). Tofu sour cream (p. 231).

Dr. William Castelli of the Framingham Heart Study notes: "We've never had a heart attack in Framingham in 35 years in anyone who had a cholesterol under 150." Address: M.D., Physicians Committee for Responsible Medicine, Washington, DC.

9581. Cardenas, Danilo C. 1990. Status of the Philippine soyfood industry. Paper presented at the International Conference on Soybean Processing and Utilization. Held 25-29 June 1990 at the Jilin Academy of Agricultural Sciences, Gongzhuling, China. *
Address: Supervising Science Research Specialist, Philippine Council for Agriculture, Forestry, and Natural Resources Research and Development (PCARRD), Los Baños, Laguna 3720, Philippines.

9582. **Product Name:** Soypreme Pizza [Soy Cheese, or Garden Patch with Soy Cheese].
Manufacturer's Name: Cedarlane Foods.
Manufacturer's Address: 1864 E. 22nd Street, Los Angeles, CA 90058. Phone: 213-745-4255.
Date of Introduction: 1990. June.
Ingredients: Soy Cheese: Tofu mozzarella (organic tofu, soy oil, casein, sea salt, citric acid, natural flavor, soy lecithin, guar gum). Crust: 100% organic whole wheat flour, filtered water, vital wheat gluten, soy oil, olive oil, honey, sea salt, fresh yeast. Sauce: Tomatoes, olive oil, garlic, sea salt, herbs, spices.
Wt/Vol., Packaging, Price: Soy Cheese: 11 or 17 oz package. Garden Patch: 13 oz package.
New Product–Documentation: Soya International. 1990. April/June. p. 23. Contact: Terry Mayo. Ingredients for the Garden Patch: Same as above, plus bell peppers, red onion, mushrooms.

Whole Foods. 1992. Feb. p. 70. These two pizzas with soy cheese are vegetarian, lactose free, cholesterol, and partially organic.

9583. **Product Name:** Soypreme Stuff'N'Spuds [Cheddar Cheese Style or Sour Cream Style].
Manufacturer's Name: Cedarlane Foods.
Manufacturer's Address: 1864 E. 22nd Street, Los Angeles, CA 90058. Phone: 213-745-4255.
Date of Introduction: 1990. June.
Ingredients: Cheddar Cheese Style: Organic russet potato, tofu cheddar cheese (soymilk, organic soybeans, soy oil, calcium caseinate, tofu, natural flavor, salt, lecithin, natural vegetable gum, annatto), soymilk, corn oil, sea salt, chives, pepper.
New Product–Documentation: Soya International. 1990. April/June. p. 23. Contact: Terry Mayo. Ingredients for the Garden Patch: Same as above, plus bell peppers, red onion, mushrooms.

9584. **Product Name:** Soypreme Tofu Dinners [Tofu Marinara, Tofu Luau, or Tofu Stroganoff].
Manufacturer's Name: Cedarlane Foods.
Manufacturer's Address: 1864 E. 22nd Street, Los Angeles, CA 90058. Phone: 213-745-4255.

© Copyright Soyinfo Center 2013

Date of Introduction: 1990. June.
Ingredients: Organic whole wheat (Kamut) pasta, tofu (organic soybeans, filtered water, nigari), green beans, carrots, corn, tomato puree, tomato juice, soy sauce, corn oil, garlic, olive oil, honey, sea salt, herbs, spices.
Wt/Vol., Packaging, Price: 11 oz package.
New Product–Documentation: Soya International. 1990. April/June. p. 23. Contact: Terry Mayo. Ingredients for the Stroganoff are: Organic whole wheat (Kamut) pasta, tofu, green beans, carrots, corn, water, soy sauce, corn oil, mushrooms, onions, organic whole wheat pastry flour, cooking wine, arrowroot powder, garlic, pepper, hydrolyzed soy protein, sea salt, parsley, kelp, dulse, papaya enzyme.

Ad in Whole Foods. 1991. July. p. 76. "Soypreme. Substituting without sacrificing."

9585. Golbitz, Peter. 1990. Lite soyfoods making their way to market: Shape of things to come? *Soya International* (*Bar Harbor, Maine*). April/June. p. 16-17.
• ***Summary:*** New low-fat soyfood products include Westsoy Lite (made by Westbrae Natural Foods, and containing only 1% fat and 18% of calories from fat), fat-free versions of Soyco cheese (made by Galaxy Cheese Co. in Cheddar Chunk and Mozzarella Chunk styles), Lean Links (made by Lightlife Foods and containing only 12% of calories from fat). Address: Soyatech, Bar Harbor, Maine.

9586. Harvey, Carol. 1990. Zenfully delicious: Dessert entrepreneur [Miyoko Nishimoto of Now & Zen]. *City Sports* (*San Francisco, California*). June. p. 66, 68.
• ***Summary:*** The 32-year old woman entrepreneur spends 3 days a week making tofu pound cake. The Now & Zen concept started in Japan in the early 1980s when she had returned from America after attending high school in Mill Valley and majoring in philosophy at a small college in Maryland. In Tokyo she started Madame Miyoko's Bakery making 2 flavors of healthy tofu pound cake. Their placement in the health food section of department stores was virtually a death sentence. She worked at it for 5 years, and turned her energy to running, bodybuilding, and performing as a jazz vocalist. In 1988 she moved back to the Bay Area, and in late 1989 she started Now & Zen. Tofu is a key ingredient in her nutritionally balanced Lemon Almond Mousse Cake, Carob Walnut Torte, and Zesty Orange Cream Cake. "The less-than-glamorous image of tofu is one stumbling block... Sounds like a perfect item for a gourmet vegetarian restaurant, but according to Miyoko, some won't touch the cakes because of the tofu–'they're afraid people will be turned off by it.'"

9587. **Product Name:** Egg Rolls [Vegetarian, Pizza Tofu, or Spinach Tofu].
Manufacturer's Name: Health Is Wealth, Inc.
Manufacturer's Address: Sykes Lane, Williamstown, NJ 08094. Phone: 609-228-1150.
Date of Introduction: 1990. June.
Ingredients: Tofu Pizza: Stone-ground whole wheat flour, tomatoes, mozzarella cheese alternative (organic tofu, canola oil, casein, sea salt, citric acid, soy lecithin, guar gum), olive oil, soybean oil, natural spices.
Wt/Vol., Packaging, Price: 3 egg rolls per 9 oz package. Retails for $2.49 (7/90).
How Stored: Frozen.
New Product–Documentation: Soya International. 1990. April/June. p. 22. The only soy ingredient in the Vegetarian Egg Rolls is soy sauce. Spinach Tofu ingredients are the same as Pizza Tofu but with spinach instead of tomatoes. Contact: Robert Giacoboni.

Ad (color) in Natural Foods Merchandiser. 1990. Nov. p. 22. "The great taste of cheese without the cheese." Shows 3 types of Egg Rolls, 2 of which bear the word "tofu" prominently atop the front panel. "Health is Wealth has replaced the cheese in our ever popular egg rolls with tofu mozzarella."

Product (Egg Rolls [Pizza Tofu]) with Label purchased at Open Sesame in Lafayette, California. 1992. Feb. 13. 5 by 4.75 by 1.75 inches. Paperboard box. Red, white, and blue on black. Color photo of the prepared sticks. "The great taste of tomatoes & cheese without the cheese! Handrolled with Tofu Mozzarella, tomatoes, & stone-ground whole wheat. All natural. Cholesterol free. No MSG. No preservatives. Lactose free. Made with the cheese NûTofû alternative." 3 egg rolls (9 oz.) retail for $3.99. The phone number is now 609-728-1998.

Soyfoods Center Product Evaluation. 1992. Feb. 13. Package design: Excellent, however the text on the front panel of the Spinach Tofu Egg Rolls that states "The great taste of spinach and cheese without the cheese!" seems deceptive, since the cheese in this product is made from cow's milk. The ingredients listing is likewise deceptive since it lists "casein (protein)" rather than "casein (milk protein)." Flavor: We liked the Spinach Tofu Eggs Rolls best–by far.

9588. **Product Name:** Mozzarella Sticks [Veggie Tofu, Pizza Tofu, or Spinach Tofu].
Manufacturer's Name: Health Is Wealth, Inc.
Manufacturer's Address: Sykes Lane, Williamstown, NJ 08094. Phone: 609-228-1150.
Date of Introduction: 1990. June.
Ingredients: Batter (for all 3 products): Corn flour, sea salt, spices. Breading (for all 3 products): Stone-ground whole wheat flour, yeast, wheat gluten, sea salt. Pizza Tofu: Mozzarella cheese alternative (organic tofu, canola oil, casein, sea salt, citric acid, soy lecithin, guar gum), stone-ground whole wheat flour, potato flour, vegetable gum, sea salt, natural honey, onion powder, garlic powder, tomato powder, natural spices, paprika.

Wt/Vol., Packaging, Price: 8 oz package. Retails for $2.49 (7/90).
New Product–Documentation: Soya International. 1990. April/June. p. 22. Veggie Tofu ingredients are: Broccoli, carrots, mozzarella cheese alternative (organic tofu, canola oil, casein, sea salt, citric acid, soy lecithin, guar gum), stone-ground whole wheat flour, potato flour, vegetable gum, natural flavor, pepper, onion powder, garlic powder, celery seed, tomato powder, lemon oil. Spinach Tofu ingredients are the same as Pizza Tofu but with spinach and lemon oil added. Contact: Robert Giacoboni.

Ad (color) in Natural Foods Merchandiser. 1990. Nov. p. 22. "The great taste of cheese without the cheese." Shows 3 types of Mozzarella Sticks, all of which bear the word "tofu" prominently atop the front panel. "Health is Wealth has replaced the cheese in our ever popular egg rolls with tofu mozzarella."

Product (Mozzarella Sticks [Pizza Tofu]) with Label purchased at Open Sesame in Lafayette, California. 1992. Feb. 13. 5 by 4.75 by 1.75 inches. Paperboard box. Red, white, and blue on black. Color photo of the prepared sticks. "The great taste of cheese without the cheese. Made with Tofu Mozzarella breaded with stone-ground whole wheat. Cholesterol free. Lactose free. Made with the cheese NûTofû alternative." 8 oz. retails for $3.69. The phone number is now 609-728-1998.

9589. Lark, Susan M. 1990. The menopause self help book: A woman's guide to feeling wonderful for the second half of her life. Berkeley, California: Celestial Arts. 239 p. 22 x 22 cm. [228* ref]
• ***Summary:*** The title page states: "The first completely practical all-natural master plan to relieve and prevent every symptom of menopause."

Soy is mentioned as follows: Dairy products: There are many negative health aspects of using dairy products. Soybeans are a good source of calcium. Soy milks and nut milks can be used as alternatives to dairy milk (p. 46). Breakfast–beverages: Stop using coffee, which contain caffeine. Grain-based coffee substitutes such as Postum, Pero, or Caffix are both nutritious and satisfying. Other good breakfast beverages include nondairy milk, such as soy, nut, or grain milks. Soy milk is now easy to find in health food stores (p. 52-53). Spreads: Peanut butter (without added salt), sesame butter (which is rich in calcium), and soy spreads are good (p. 55). Soups: For women who can't eat soup unseasoned with salt, try adding one teaspoon of miso per cup of soup. Miso, a fermented soy product from Japan, is widely available at Oriental markets and health food stores. It contains less salt than regular table salt. How to substitute for dairy products: Tofu can be used in some recipes to replace cheese. Use soy milk, nut milks, or grain milks in place of dairy milks (p. 70). Substitutes for common high-stress ingredients: In place of 1 cup milk, use 1 cup soy milk, nut milks, or grain milks. In place of ½ teaspoon salt, use 1 tablespoon miso or ½ teaspoon Bragg's liquid amino acids, or ½ teaspoon sea vegetables–dulse, kelp (p. 72-73).

Chapter 8, titled "Menopause self help cookbook," contains many recipes: A "Fruit smoothie" (p. 75) contains only fruits, no dairy products or soy. For recipes for sesame milk and almond milk, see p. 76. Tofu and sesame-butter spread (p. 79). One dish meals: Almond tofu (Tofu with almonds), and Tofu with snow peas (p. 94). Tofu-wild rice salad (p. 95). Tofu & brown rice (p. 96). Apple-tofu custard (p. 97).

In chapter 10, titled "Herbs for menopause," is a section on "Herbs for your menopausal symptoms." The subsection titled "Heavy irregular menstrual bleeding" notes that bioflavonoids, flavonoids from plants, help to strengthen capillaries and prevent heavy bleeding. The section titled "Hot flashes" states: "Many plants are good sources of estrogen, the hormone that helps to control hot flashes. Besides controlling heavy menstrual bleeding, bioflavonoids also have weak estrogenic activity (1/50,000 the strength of estrogen). They are very effective in controlling such common menopause symptoms as hot flashes, anxiety, and irritability... Plants also form the basis for the production of medical hormones. Many common plants such as soy beans and yams contain a preformed steroidal nucleus. Estrogen and progesterone can be synthesized from plants in relatively few steps and have allowed sex hormones to become available commercially at a reasonable cost" (p. 127-28).

Susan M. Lark, M.D., born in 1945, "is a noted authority on women's health care and preventive medicine. She is the Director of the PMS and Menopause Self Help Center in Los Altos, California. She also sees women patients in her private practice. Dr. Lark has been on the clinical faculty of Stanford University Medical School, Department of Family and Preventive Medicine. She is also an associate member of the Department of Family Medicine, El Camino Hospital in Mountain View, California. Dr. Lark lectures widely on women's health care issues and is a sought-after speaker."

On the inside rear cover is a mail order form for Dr. Lark's Menopause Self Help Book, plus 3-month supplies of Menopause Vitaminerals, Herbal Formula, and Essential Oil, to be sent to Self Help Options for Women, Carson City, Nevada. On the rear cover is a portrait photo of Dr. Lark. Address: Director, The PMS and Menopause Self Help Center, 101 First St., Suite 441, Los Altos, California 94022. Phone: (415) 964-7268.

9590. Morinaga Nutritional Foods, Inc. 1990. Chocolate Pie, au natural! Dairy-free, low-fat pie made with Mori-Nu Lite Tofu (Tear-off recipe pad). 2050 W. 190th St., Suite 110, Torrance, California 90504.
• ***Summary:*** This color tear-off recipe pad (6½ by 4 inches), developed by Susan Bucher of Bucher & Russell in Los Angeles, was introduced in June 1990. On the front is a color

photo of a chocolate pie topped with sliced banana rounds. To the upper left are whole bananas, to the upper right is a package of Mori-Nu Lite extra-firm silken tofu (only 1% fat), and to the right is a bowl of almonds.

On the back are recipes for Chocolate Dream Pie/ Pudding, and Fast Lane Low-Fat Tofu Brownies, plus nutritional analyses and an offer for additional Mori-Nu free recipes.

A hole through the pad in the top center, and a horizontal adhesive strip on the back, aids in hanging the recipes in a store. Address: Torrance, California. Phone: 1-800-669-8638.

9591. **Product Name:** Tofu Spicy, Tofu Teriyaki.
Manufacturer's Name: Nutrisoy Pty. Ltd.
Manufacturer's Address: 255 Forest Road, Arncliffe 2205, NSW, Australia.
Date of Introduction: 1990. June.
Ingredients: Spicy: Organic soybeans, water, soy sauce, sunflower oil, spices, herbs, natural nigari (magnesium chloride).
Wt/Vol., Packaging, Price: 200 gm.
How Stored: Refrigerated.
New Product–Documentation: Labels with dates sent by Tony Wondal of Nutrisoy. 2005. April 26. He started making and selling these products in June 1990. Spicy: Yellow, red, black and white on green. On the front are four small Chinese characters.

9592. **Product Name:** Marinated Tofu, Herb Tofu, and Smoked Tofu.
Manufacturer's Name: Pureland Soy Products.
Manufacturer's Address: 23 Depot St., Maroochydore, QLD 4558, Australia. Phone: 071-43-4254.
Date of Introduction: 1990. June.
New Product–Documentation: Letter and leaflet sent by Jennie Finnigan and Ricciardo Ferrari. 1992. June 17. In June 1992 the company moved to a new address with a new phone number: Lot 47 Page Street, Kunda Park, QLD 4556. Phone: (074) 45 6077. The letter states that the company also makes Herb Tofu, Smoked Tofu, Hummus, and a Vegetarian Paté.

Talk with Jennie Finnigan. 1992. June 28. Another man started this business 3-4 years ago, doing a marinated tofu, a smoked tofu, and an herb tofu. She and Ricciardo made and sold him the tofu for these three products. Then he decided to give up that business so she and Ricciardo took it over.

9593. **Product Name:** [Tofu Pizza].
Foreign Name: Tofupizza.
Manufacturer's Name: Soto. Named Sojatopf prior to April 1989.
Manufacturer's Address: Wolfsbergerstr. 47, D-8211 Breitbrunn am Chiemsee, West Germany. Phone: 08621-62538.
Date of Introduction: 1990. June.
Ingredients: Organic whole wheat crust with tofu and vegetable topping.
Wt/Vol., Packaging, Price: 300 gm per piece.
New Product–Documentation: Letter (fax) from Harry Whitford. 1990. May 30. Gives full details on product based on interview with Gerhard (Oskar) Schramm. On 1 Jan. 1990 the company moved to Wolfbergerstr. 47, D-8211 Breitbrunn am Chiemsee, West Germany.

9594. *Soya International* (*Bar Harbor, Maine*). 1990. Yves Tofu Wieners up to bat at Candlestick Park. April/June. p. 3.
• ***Summary:*** This product, made by Yves Fine Foods of Vancouver, BC, Canada, will be served at San Francisco Giants baseball games in Candlestick Park, San Francisco, this year, in a new eggless variety and a larger ballpark size. This will be the second year that meatless tofu hot dogs have been available along with meat hot dogs at concession stands in the stadium.

9595. *Soya International* (*Bar Harbor, Maine*). 1990. White Wave takes tofu to India. April/June. p. 3.
• ***Summary:*** White Wave Inc. of Boulder, Colorado, has been awarded a technical consulting contract to start a low technology tofu plant in Bhopal, India. Company founder Steve Demos will travel to India later this year to set up the factory and train personnel in tofu production. It is hoped that eventually the training program will lead to the establishment of numerous cottage industry tofu factories throughout India, bringing relief to the chronic protein shortages among many of the country's 833 million inhabitants. The project is funded by the USAID Agricultural Research Project and the Indian Council for Agricultural Research.

9596. **Product Name:** Vegie Kaas (Non-Dairy Spread) [Regular, or Smoked].
Manufacturer's Name: Soya Kaas, Inc. A subsidiary of Swan Gardens, Inc. Distributed by American Natural Snacks.
Manufacturer's Address: Manufacturer: 6029 Lagrange Blvd., Atlanta, GA 30336. Distributor: P.O. Box 1067, St. Augustine, FL 32085. Phone: 904-825-2057.
Date of Introduction: 1990. June.
Ingredients: Regular: Tofu (Organic* soy milk, calcium sulfate), natural flavors, tapioca, lactic acid, carob bean gum, xanthan gum, sea salt, annatto (natural color).
Wt/Vol., Packaging, Price: 8 oz plastic tub.
How Stored: Refrigerated.
New Product–Documentation: Talk with Richard Rose. 1994. April 25. Vegie Kaas is made without casein. It is more like a dip or spread than a cream cheese. Talk with Vicki at American Natural Snacks. 1994. April 26. She checked the company's records which show that this product was introduced in June 1990.

© Copyright Soyinfo Center 2013

Leaflet sent by Casey Van Rysdam of ANS. 1994. April 27. "Soya Kaas." "No cholesterol. Lactose free. Made with fresh organic soy milk and tofu." Product with Label sent by Casey Van Rysdam of Soya Kaas. 1994. May 15. 4.75 inches diameter by 1.75 inches high. Red and green on beige. "100% dairy free. Alternative to cheese. No cholesterol. Lactose free. No milk protein. No oil added. Made with organic soybeans. Keep refrigerated." Soyfoods Center taste test. 1994. May 17. Nice flavor, texture, and color. Good as a dip for crackers or a filling for celery.

9597. Tjomb, Paul. 1990. Le pâté nouveau est arrivé: Ingrédients, soja [The new pâté has arrived: Ingredients, soya]. *RIA–Revue des Industries Agro-Alimentaires* No. 443. 14 May to 5 June. [Fre]
• ***Summary:*** For some years, Cacoja has specialized in soyfoods (food products based on the soybean; les produits alimentaires à base de soja) made from organically grown soybeans. This company is finishing studies on the formulation of a new line of products, soya pâtés, which will be commercialized about a month. Cacoja is an affiliate of the Est-Lait ["East Milk] group. The company presently markets an important line of products consisting of desserts, of confections with 20% soya, of beverages, and of mayonnaises. A large part of its activity is devoted to developing convenience prepared foods (*plats cuisinés*) which contain an average of 20% soya. The company also offers quenelles (like sausages), ravioli, and lasagne which are distributed fresh with a shelf life of 3 weeks. One of this company's flagship products is the soya medallions (médaillion de soja). These are two round meatless patties (gallettes, 125 gm each, about 3/8 inch thick), rich in protein. They are vacuum packed in plastic film with a shelf life of 21 days. The medallions come in 4 flavors: carrot, mushroom, tomato, and garlic and fines herbes. Mme. Chanterau is director of product development." Address: France.

9598. *Vegetarians of Alberta.* 1990--. Serial/periodical. Edmonton, Alberta, Canada: Vegetarians of Alberta Association. Frequency: Quarterly.
• ***Summary:*** Form filled out by David J. Parker. 1992. July. The first issue was published in May/June 1990 (7 p.). The publisher, Vegetarians of Alberta, was founded in July 1989. The founder and first editors were Margaret Marean, Glen McLean, and David J. Parker. A copy of all back issues still exists at the Society. The present title is Vegetarians of Alberta Quarterly, published by the same organization at the same address. It is still published quarterly. Circulation is now about 200.

"The organization was started by Father Evaski-Mclean who deals in soya products. Picnics in the park were our first endeavour and & still are although we go indoors over winter. We sell tofu wieners at Earth Day and other events to get money to operate although our budget is small. Please find back issues of our journal" enclosed. Also enclosed is a leaflet (3 panels each side) titled "Vegetarians of Alberta." Address: c/o 10257–95 Street, Edmonton, Alb T5H 2B3, Canada. Phone: 469-1448 or 429-3679.

9599. **Product Name:** Tofu Garden Patties [With Garden Vegetables or With Mushrooms and Soya Cheddar Cheese].
Manufacturer's Name: Yves Fine Foods Inc.
Manufacturer's Address: 1138 East Georgia Street, Vancouver V6A 2A8, B.C., Canada. Phone: 604-251-1345.
Date of Introduction: 1990. June.
Ingredients: With Garden Vegetables: Tofu, (water, organic soybeans, magnesium chloride), stone ground whole wheat flour, gluten, fresh carrots, green peppers, celery, onions, crushed tomato, soy grits, garlic powder, seasonings, rice syrup solids.
Wt/Vol., Packaging, Price: 6 oz package. Retails for $1.99 (7/90).
New Product–Documentation: Soya International. 1990. April/June. p. 22. The ingredients for Tofu Garden Patties with Mushrooms and Soya Cheddar Cheese are: Tofu, soya cheese (tofu, soy oil, casein, salt, citric acid, lecithin, natural flavor, guar gum, annatto seed), stone ground whole wheat flour, gluten, mushrooms, soy grits, garlic powder, seasonings, rice syrup solids. Contact: Yves Potvin.

Spot in Health Foods Business. 1991. Jan. p. 76. "The burgers are made with either fresh vegetables and spices, or with mushrooms and soya cheddar cheese."

9600. **Product Name:** Yves Veggie Tofu Wieners.
Manufacturer's Name: Yves Fine Foods Inc.
Manufacturer's Address: 1138 East Georgia Street, Vancouver V6A 2A8, B.C., Canada. Phone: 604-251-1345.
Date of Introduction: 1990. June.
Ingredients: Tofu (water, organic soybeans, magnesium chloride), soy protein, canola oil, wheat gluten, unmodified wheat starch, natural smoke flavors, beet powder (coloring), paprika (coloring), tamari sauce, spices, guar gum.
Wt/Vol., Packaging, Price: 10 oz package. Retails for $2.19 (7/90). 12 oz vacuum pack retails for $3.29 (6/92, California).
New Product–Documentation: Soya International. 1990. April/June. p. 22. Contact: Yves Potvin. Spot in Health Foods Business. 1991. Jan. p. 76. Shows a small black-and-white photo of the package.

Ad (color, 2/3 page) in *Natural Foods Merchandiser.* 1992. April. p. 94. "Yves Veggie Cuisine." Shows packages of Veggie Wieners and Burger Burgers.

Product with Label purchased at Open Sesame in Lafayette, California. 1992. June. 3.5 by 10 inches. Vacuum pack. Red, yellow, blue-green, and black on white. Color photo of a wiener with trimmings in a bun. "Contains no meat. Cholesterol free. Made with 100% organic soybeans. No preservatives. Low in saturated fat. Since 1985 we have

been committed to providing you with the highest quality in healthy, easy to prepare entrées. Always cholesterol and preservative free...” The company name is now Yves Veggie Cuisine Inc. The president is Yves Potvin.

9601. Tabuchi, Ichiro. 1990. [Re: History of Soyalac soymilk production by San-iku Foods in Japan]. Letter to William Shurtleff at Soyfoods Center, July 4. 1 p. Handwritten, with signature on letterhead. [Jap; eng+]

• ***Summary:*** In 1948 Mr. Tabuchi visited Dr. Harry W. Miller and studied at his soymilk plant in Mt. Vernon, Ohio. During this period, Dr. Miller visited Nihon San-iku Gakuin (located at Chiba prefecture, Sodegaura-cho) almost every year and earnestly advised the people there to make soymilk. In about 1957-58 they started to make soymilk at a tofu plant that was owned by Mr. Ueda. They bottled it in 180 ml dairy milk bottles, which they sold with their tofu. It was a small scale operation and it didn’t last long.

In 1959 at the Food Department of Nihon San-iku Gakuin, they set up a tofu manufacturing plant and started to make soymilk in 180 ml milk bottles for the school’s lunch program. Several years later they started to make canned soymilk for general consumers. In order to help introduce the soymilk to the school, Dr. Miller lived on the school campus for 2 months. He taught and gave orientation to the students.

In 1970 San-iku Foods became independent from the San-iku Gakuin Food Department and started to make and sell infant formula. Address: San-iku Foods, Japan.

9602. Marshall, Philip. 1990. Brief history of the Regular Tofu Co. (Interview). *SoyaScan Notes.* July 9. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** This company was started by John Holt. [It began production in Dec. 1981.] Holt learned how to make tofu, in about 2 days, from Philip Marshall of Cauldron Foods Ltd. [which started tofu production in Sept. 1981], and Paul Jones of Paul’s Tofu & Tempeh [which started tofu production Jan. 1981]. Before that he was involved in a spiritual practice, perhaps with Divine Light Mission. He and a girl, who was into the same spiritual tradition, got together and started the company. It was a very small, kitchen-based operation. It went through various growing pains, and eventually Holt ended up owning the company himself. He got into some financial difficulty and in about 1983-84 he got refinancing when a fairly large percentage of his shares were purchased by an entrepreneur, who formerly had owned a medium-sized tailoring business. He then got involved with Haldane when they bought the company. They either asked him to leave or he left on his own. Philip has no idea where he is now.

Regular Tofu Co. now may be nothing but a name. There is a plant, a very early/antique Takai plant, where Haldane has their tofu made. They have a 50% holding in an ice cream company and the product is actually made at that factory. The address of Regular Tofu Co. is now the same as Haldane. Address: Owner, Cauldron Foods Ltd., 149 South Liberty Lane, Ashton Vale Trading Estate, Bedminster, Bristol BS3 2TL, England. Phone: (0272) 632835.

9603. Marshall, Philip. 1990. Early work with soyfoods in the UK: Direct Foods, Whole Earth, Harmony Foods Ltd., and Haldane (Interview). *SoyaScan Notes.* July 9. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Brian Welsby founded Haldane Foods in 1983. But he was active with health foods long before 1980. He used to do the product mixing for a company named Direct Foods Ltd. (in Petersfield, Hampshire), which was owned by Peter and Anna Roberts, a very nice, committed pair of vegans. They were among the first people to market dried soya products, particularly TVP, in the UK. And they were certainly the first people to develop the market for composite dry soya products–like burger mixes. Philip has no idea when Direct Foods started, but it may have been in the late 1960s. [Note: It started in Aug. 1969.] They were one of the pioneers of vegetarianism and veganism in England.

Greg and Craig Sams are brothers, both American. Both

© Copyright Soyinfo Center 2013

are very talented guys, excellent at marketing. Greg is in a wheelchair. In the early days, both were the key figures/ principals at Whole Earth with the early events at Portobello Road. Whole Earth, which started as a bakery, became Harmony Foods, a large health food wholesaling company. [Note: In 1980 Harmony Foods Ltd. was at 12 Orpheus St., Camberwell, London S.E., England.] Harmony had some of its own Harmony Foods brands and was one of the first companies in the UK to import Japanese miso, shoyu, etc. At some point, Whole Earth was sold off as a health food wholesaler, and its still going with such popular brands as Whole Earth jams, sauce, etc.

Peter Fitch was responsible for putting together the Haldane Foods Group, which incorporates Direct Foods, Haldane Foods, and Realeat. Address: Owner, Cauldron Foods Ltd., 149 South Liberty Lane, Ashton Vale Trading Estate, Bedminster, Bristol BS3 2TL, England. Phone: (0272) 632835.

9604. Preneuf, Jean de. 1990. Current status of soyfoods in Italy (Interview). *SoyaScan Notes.* July 12. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** The biggest and best tofu company in Italy is Fonte della Vita, located near Turin. They also make some other soyfoods and have a nice brochure. The only real tofu manufacturer in Italy, they also make seitan. They come out of the natural foods, macrobiotic, and herbal traditions. Amisoya is said to be owned by or related to Ferruzzi/ Central Soya. Their products are generally made from soy protein isolates. Jean has tasted all their yogurts, and they are "just terrible." Soyalat, the soymilk sold by Parma Soia, is said to be made by Alpro in Belgium. Parma Soia, he thinks, is not a soyfoods producers, and their line is not so successful. Société Soy will increasingly expand sales of their line of soyfoods into Italy. This will be a major company focus in the future. This is little competition for good tofu products and tofu is very well suited to Italian style dishes. Jean has returned from a study trip to Italy, and collected many labels and brochures. "Italy is a wonderful country." He will be back from Spain in 1 week. He plans to attend the Natural Foods Expo in Philadelphia, Pennsylvania, this fall. Address: Société Soy, 1 rue du Crêt de la Perdrix, 42400 St.-Chamond, France. Phone: 77.31.23.66 OF.

9605. Michael, Brenger. 1990. History of La Fonte della Vita S.r.L., Italy's largest manufacturer of tofu and seitan (Interview). *SoyaScan Notes.* July 18. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** This company was founded in Feb. 1985 by Mr. Demontis and his wife, Ms. Borello, on Via Matteotti?, in Fossano, about 35 miles south of Torino (Turin). He joined the company in the fall of 1985 and became a partial owner. He learned to make tofu from *The Book of Tofu* by Shurtleff & Aoyagi. Today the company is owned by 5 people, with the DeMontis owning the largest share; Mr. Mario Cozio joined later. Originally the company made only nigari tofu, but by autumn they had introduced 4 tofu spreads (tofu pâté), and soymilk. In April 1986 the company moved about 15 miles further south to Via Circonvallazione 87, 12049 Trinita (Cuneo), Italy. They are still at the same location but the street was renamed in about 1987? so that their present address is Via Monviso 18, 12049 Trinita (Cuneo). After the move, they introduced two types of seitan (plain and fried), fried tofu, tofu with herbs, then two tofu burgers (one with sea vegetables, and one with seitan). They used to make soymilk but after it grew to a certain level they stopped making it and began buying it from a company in Belgium [probably Alpro], so that they could focus on expanding tofu production. In June 1990 they began making tempeh.

Today they are the largest among 5 tofu manufacturer in Italy. They make about 2,500 kg/week of tofu and have 23 employees. The company's best-selling product is fried seitan, followed by natural seitan and regular tofu (about equal), tofu burgers, and tofu spreads. During the last year sales have grown about 30%, due in part to an aggressive program to introduce 2-3 new products a year. New products are tempeh and seitan burgers. Address: Via Monviso 18, 12049 Trinita (Cuneo), Italy. Phone: (0172) 66 397.

9606. Michael, Brenger. 1990. The tofu market in Italy (Interview). *SoyaScan Notes.* July 18. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Mr. Demontis, head of Fonte della Vita, knows the Italian tofu market better than Michael Brenger, since Brenger is tofu production manager. But Brenger speaks English better than Mr. Demontis. There are five tofu manufacturers in Italy. The largest is La Fonte della Vita (in Trinita, near Cuneo, about 50 miles south of Turin), which makes about 2,500 kg/week of tofu. Second largest is probably Terra e Pane (Chinzena? near Ravenna [actually S. Arcangelo di Romagna near Forlì]; they also make soymilk, tofu spreads, and seitan), followed by Soyalab near Firenze (Florence; they are about ¼ to 1/5 the size of Fonte Della Vita), Arc-en-Ciel srl (a cooperative at Loc. Molino 4, 10070 Ceres, 20 km from Torino/Turin; they make more seitan than tofu), and Sunsoy Food (Bologna; very local and small). Total production of the five is estimated at 5,000 kg/week of tofu, or about 250,000 kg/year. All these companies make tofu from whole soybeans and sell the tofu at natural and health food stores. Recently Parma Soia and Medical Soy started selling soy products, including some tofu products, but they sell to the mainstream market through supermarkets rather than to the alternative market. Their tofu products use tofu only as an ingredient; they do not sell tofu as such. They make a vegetable cheese and add about 20% tofu. He does not know from whom they buy their tofu. The first tofu maker in Italy was Gilberto Bianchini of Centro Macrobiotico Tofu (Via Cuoco 9, 47037 Rimini, Italy), but

© Copyright Soyinfo Center 2013

he stopped in about 1986 and moved to Belgium. Ferro Ledvinka at Fondazione Est-Ouest only makes tofu for their own macrobiotic restaurant; they buy some of their tofu from Fonte della Vita and Soyalab, and they also do health counseling. Address: Production Manager, La Fonte Della Vita, Via Monviso 18, 12049 Trinita (Cuneo), Italy. Phone: (0172) 66 397.

9607. *SoyaScan Notes.* 1990. The meaning of the symbol "e" appearing on European food labels (Overview). July 19. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** This is a European Economic Community mark, usually written just to the right of a product's weight (e.g. 250 g e), signifying that the product has been packaged under the average weight system as covered by the United Kingdom's weights and measures act of 1985.

9608. Glynn, Mike. 1990. Mori-Nu wages battle against tofu industry: Mio wants conventional tofu out of produce department. *Packer* (*The*). July 21. p. 16A.
• ***Summary:*** Discusses the response of the Soyfoods Association and Morinaga to the classification of tofu as a "potentially hazardous food" and to the practice of storing tofu in the produce department. Art Mio of Morinaga feels that the Soyfoods Association is dragging its feet and failing to assume the role of a responsible industry leader, insisting that its members follow FDA's regulations.

9609. *SoyaScan Notes.* 1990. Update on Kyoto Food Corp. USA in Terre Haute, Indiana (Interviews with various people). July 26. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Kyoto Foods is planning to open a big tofu plant in Terre Haute, Indiana. Ground breaking for the plant was on 3 May 1990. Mr. Yamashita is the person in charge and on July 24 he talked about the plant starting with 15-20 employees. They have 30,000 tsubo of land. Note: 1 tsubo is 6 shaku (1 shaku = 0.995 feet, so 6 shaku = 5.97 feet) on a side or 35.64 square feet. One acre is 43,560 square feet, so there are about 1,222 tsubo/acre. Thus 30,000 tsubo is about 25 acres.

Kyoto Foods plans to make only tofu initially, and they apparently would like to knock off Hinoichi on the East Coast and Midwest. They have support from Marubeni, which makes them potentially very powerful. John Morrell & Co. has done some research using tofu or concentrated soymilk. Kyoto Foods is considering getting this from Pacific Foods of Oregon, then shipping it to Cincinnati, Ohio.

The opening ceremony for the new plant was held on 24 Oct. 1990 in Terre Haute. Local television station covered the event but the print media showed little interest. Wataru Takai came from Japan to attend the ceremony. As of 15 Nov. 1990 the company plans to make water pack firm tofu (not aseptic tofu), but production has not yet begun. They plan to play down the fact that they have a parent company in Japan. They are billing themselves as "the largest tofu company in America." Production is expected to begin in November. The Asian-American population in the Midwest is much larger than most people realize. Some of the tofu will be sold to institutions. Supermarkets seem to be anxiously awaiting the product.

9610. Gerner, Bob. 1990. Best-selling soyfoods at Berkeley Natural Grocery Co. in Berkeley, California (Interview). *SoyaScan Notes.* July 28. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** By far the best selling soyfood product type at Bob's store is soymilk, accounting for 50-65% of total soyfoods sales. The best selling brands, in descending order of sales volume, are Vitasoy (about 40% of soymilk sales, and rising; his store promotes it more in part because he sees sales reps longer and in part because the Vanilla Vitasoy is his favorite soymilk product), Edensoy (30-35% and falling; it used to be the best seller), Westsoy and Westbrae Malteds (20% and rising), Pacific Soy (from Tree of Life), and Other (Wildwood Yosoy, Quong Hop, Soy Moo, AhSoy, 5%).

The next best selling soyfood type is tofu (accounting for about 20% of total soyfoods sales, and rising), followed by soy sauce & tamari (10%, stable), soy cheeses (4%, rising), tempeh (2%, falling), soy ice cream (1%, stable or falling), and miso (1%, falling).

Total per capita purchases of soyfoods have risen steadily since the mid-1970s. There have been no plateaus or declines.

Bob dislikes (but understands) the way soymilk manufacturers discount their products, basically forcing him to buy very large quantities–typically 60 cases at a time. This policy favors large retailers, ties up a lot of his capital up-front, and takes up a lot of space in his warehouse. So 95% of the time he buys Vitasoy and Edensoy soymilk when they are on sale at discount prices, then he sells these at discount/sale prices–a practice that he does not like since it seems to contradict the idea of a "sale." Customers won't buy soymilk any more at "regular" prices. Bob would rather buy what he needs from week to week, then sell all products at a regular price most of the time, then have promotions once in a while. Vitasoy has played a lot of games with distributors to try to get them to buy more at one time, and Bob has heard that this is hurting the distributors and that they don't like it. They can't make money selling at an 8% margin, which they often must do. Edensoy's discount is constant whereas Vitasoy has on and off discounts–which makes buying harder for Bob. Westbrae/Vestro has a more typical discount policy and Bob sells Westbrae products at a regular price most of the time. Address: Owner, Berkeley Natural Grocery Co., 1336 Gilman St., Berkeley, California 94706. Phone: 415-526-2456.

© Copyright Soyinfo Center 2013

9611. *SoyaScan Notes.* 1990. The Food and Agribusiness Management Program in Illinois (Overview). July 30. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** This program was started in June 1989. It is looking, among other things, at "alternative marketing channels" and "specialty markets" including "specialty export markets" for major crops, such as tofu beans for Japan. James Dunn has a specialty export company. Most farmers think there is a big risk associated with growing specialty soybeans but actually the contract virtually eliminates that risk. One student is studying alternative contracts for specialty crops. Address: Univ. if Illinois.

9612. Yoshikawa, Koichi. 1990. [Re: Yoshikawa's sales of nigari]. Letter to William Shurtleff at Soyfoods Center, July 30. 1 p. Handwritten, with signature on letterhead. [Jap; eng+]
• ***Summary:*** Yoshikawa's current sales of nigari are about 7,000 tonnes (metric tons) per year. Of this, about 3,000 tonnes is used by tofu makers. The latter amount has not changed much during the last 3 years. A small amount of this nigari for tofu use is sold overseas.

The letterhead states that Yoshikawa is the oldest maker of nigari in Japan, established 100 years ago. Brands include Thruzen and Maruzen. The company's factory is on the seashore at Kurashiki, Okayama, Japan. Address: President, Yoshikawa Shoji K.K., Honmachi Wako Bldg. Kita Kyuhoji-cho 2-1-7, Osaka, Higashi-ku, Japan. Phone: 06-261-6767.

9613. **Product Name:** [Seitan, and Tofu].
Manufacturer's Name: Arc-en-Ciel srl.
Manufacturer's Address: Loc. Molino, 4, 10070 Ceres, TO Italy.
Date of Introduction: 1990. July.
New Product–Documentation: Talk with Michael Brenger, production manager at Fonte della Vita. 1990. July 18. Arc e Ciel is a cooperative located 20 km from Torino/Turin; they make more seitan than tofu.

Letter from Gianni Viglino of Savona, Italy. 1991. Dec. 20. "I have contacted this company and they will send you a report directly concerning their products."

9614. **Product Name:** Believe (Soy Ice Cream with Tofu; Hard-pack) [Vanilla, Chocolate, Strawberry].
Manufacturer's Name: Believe Inc.
Manufacturer's Address: Marketing: 320 Walnut St., Highland, IL 62249; Corporate Hdqtrs.: 6173 Cultus Bay Road, Clinton, WA 98236. Phone: 1-800-777-0424 or 206-221-8739.
Date of Introduction: 1990. July.
Ingredients: Organic rice syrup, acacia honey, organic rice, organic tofu powder.
Wt/Vol., Packaging, Price: Hardpack pints, Retails for $2.89 to $2.99 (7/90).
How Stored: Frozen.
New Product–Documentation: Ad (8.5 by 11 inches, color photo) in East West Journal. 1990. Aug. Inside rear cover. "Something wonderful is going to happen. Believe. The gourmet non-dairy dessert. Free of cholesterol, refined sugars, dairy and lactose, artificial flavors, colors, and preservatives. So rich and creamy you may never want 'ice cream' again. For more information and the store nearest you call 1-800-777-0424. 10% of corporate profit goes to the Global Goodwill Fund." Photo shows a huge scoop of vanilla ice cream. An inset shows a view of outer space with a spiral nebula, shooting star, and crescent moon above, and the curve of the earth below. Definitely bears the "sign of the unicorn."

Talk with Richard Rose of Rose International. 1990. July 30. "Believe, Bob Davis' new soy-and-rice ice cream, was the best product at the recent NNFA show on the East Coast. He has made a big, bold move and I think it is going to succeed. This unique product is a cross between Ice Bean and Rice Dream, the first product to provide complementary soy and grain. It is sweetened with organic rice syrup and it contains organic tofu. Realistically, Rice Dream is made from essentially rice syrup–a very highly refined amazake. He has pulled together an organization of good people. The product is just now getting on the shelves. At the show, the company had a custom-designed, elegant tent-style booth. He is using a pull strategy, developing demand from consumers and retailers to get distribution, which means heavy advertising in consumer publications. The theme in his ad is carried through to their aprons, point of purchase materials, everywhere. The product is high fat, maybe 17%, like a superpremium ice cream, and the price is also high at $2.89 to $2.99 retail, with about 50% overrun. Flavors were chocolate-toffee, vanilla with chocolate marble, blueberry, and raspberry. One evening the company had a hospitality suite where they served ice cream sodas, floats, and sundaes with a classical guitarist playing in the corner. It was an ice cream feast with 50-100 people in attendance." Richard is working with him to try to get some export business.

Talk with Rachel Walk, Marketing Mgr. at of Believe Inc. in Illinois. 1990. Aug. 3. This company is separate from Light Foods, but the corporate headquarters is at the same address as Light Foods in Washington. The first 3 flavors should hit the shelves in mid-August. The organic tofu in the product is spray dried. Potential new flavors are Chocolate Toffee, Vanilla Fudge, and Blueberry; they might be out in 3 months. Production is "up north" but they warehouse at U.S. Growers in Los Angeles.

Ad in Vegetarian Times. 1990. Dec. p. 81. Gives a nice history of the company, and of Robert Davis' work with soyfoods.

9615. **Product Name:** Cauldron Foods Tofu Kitchen {Frozen Ready Meals} (Indonesian: Vegetables & tofu in

© Copyright Soyinfo Center 2013

spicy satay sauce, Cantonese: Stir fry vegetables with tofu in black bean sauce, Shanghai: Sweet & sour vegetables with tofu, or Punjabi: Vegetable briani with tofu).
Manufacturer's Name: Cauldron Foods Ltd.
Manufacturer's Address: 149 South Liberty Lane, Ashton Vale Trading Estate, Bedminster, Bristol, Avon, BS3 2TL, England. Phone: (0272) 632835.
Date of Introduction: 1990. July.
Ingredients: Indonesian: Spicy satay sauce (water, sieved tomatoes, onions, peanut butter, creamed coconut, soy sauce, tomato puree, spices and seasonings, modified starch, vegetable oil, salt), Marinated Tofu (tofu–water soya beans, calcium sulphate, marinade–water, shoyu sauce, sugar, salt, garlic, ginger, citric acid), baby sweetcorn, sugar, snap peas, red peppers, vegetable oil. Fried rice: Cooked white and brown rices, sweet-corn, vegetable oil, onions, chives.
Wt/Vol., Packaging, Price: 400 gm box.
How Stored: Frozen.
Nutrition: Per 100 gm.: Protein 5.9 gm, fat 5.9 gm, carbohydrates 13.9 gm, calories 147.
New Product–Documentation: Letter (fax) from Philip Marshall. 1990. July 9. This product, in 4 varieties, was introduced in 1990. Labels (4) sent by Philip Marshall of Cauldron Foods. 1990. July 9. 9 by 7 by 1.25 inches. Multi-color. A large color photo of the ready-to-serve dish (accompanied by chopsticks or fork) is in the upper left hand corner of the front panel; behind it is a pastel blue, green, yellow, and black map of that part the world from which the dish originates. Below the product name is a brief description of the dish. "Microwave or oven cook. A complete vegetable meal." Suitable for vegetarians: Circled green V certification symbol. Serves 1. The back panel gives information about tofu and detailed cooking instructions.

9616. Fleming, Diana J. ed. 1990. Country Life vegetarian cookbook: Delicious recipes from the kitchen of the Country Life vegetarian restaurants. Family Health Publications, 13062 Musgrove Highway, Sunfield, MI 48890. 190 p. Index. 23 cm.
• ***Summary:*** This book contains the most popular vegan recipes from Country Life vegetarian restaurants. In 1966 the first Country Life Restaurant opened its doors in Grand Rapids, Michigan. Today the 15 Country Life Restaurants, though all independently owned and staffed by Seventh-day Adventists, "share a common commitment to serve delicious, wholesome, 100 percent vegetarian food. They are also dedicated to furnishing educational programs, to ministering to the needs of the community, and to providing a relaxed, Christian atmosphere as a refuge for customers from the stresses of the work-a-day world." A list of the addresses and phone numbers of the 15 County Life restaurants (10 in the USA, 3 in Europe, and 2 in East Asia) is given on page 4.

"Soy or nut milk" is called for in many recipes throughout this book. Soy-related recipes include: Soy-oat waffles or pancakes (p. 20). Carob-banana tofu topping (p. 25). Tofu-pineapple "cottage cheese" (p. 28). Soy raisin puffs (with cooked whole soybeans, p. 35). Fluffy soy-corn muffins (p. 36). Scrambled tofu (p. 38). Chipped tofu (p. 39). Tofu cheese rarebit (p. 40). Tofu potato latkes (p. 41). Soy whipped cream (#1-#3, p. 60-61). Tofu whipped cream (p. 61). Tofu orange whipped cream. Tofu cheesecake (p. 66). Carob tofu cheesecake. Tofu loaf (p. 73). Kidney bean and tofu pie (p. 83). Pasty (filled with frozen tofu, p. 84). Soybean creole (p. 88). Tofu balls (p. 93). Lasagne (with crumbled tofu, p. 94). Stuffed shells (with tofu, and soy mayonnaise or soy sour cream). Eggplant Parmesan (with tofu). Tofu cacciatore (p. 96).

Stir fry vegetables (with tofu, p. 103). Tofu foo young (p. 105). Oriental medley (with tofu, p. 106). Walnut cheese spread (with tofu, p. 108). Gluten and broth. Teriyaki sauce (with soy sauce, p. 111). BBQ sauce (p. 112). Tofu "egg" salad (p. 118). Thousand island dressing (with soy mayonnaise, p. 120). Olive dressing (with soy base, or Soyagen, p. 121). Soy mayonnaise (#1 with soy milk, #2 with soy base, #3 with Soyagen, p. 123-24). Tofu mayonnaise (p. 125). Aioli or garlic mayonnaise #1 (with soy milk). Soy sour cream (p. 126). Soy margarine (#1 and #2). Tofu cottage cheese. Tofu tomato stars (p. 135). Sour cream potatoes (with soy sour cream or mayonnaise, p. 139). Tofu gumbo soup (p. 146).

Soy milk (#1 from soy beans, #2 from soy base, p. 149). Soy base (from soy flour, p. 150). Basic nut milk (with cashews, walnuts, filberts, or Brazil nuts, and honey or dates, p. 151). Cashew-pear milk (p. 152). Half and half (with cashews and almonds). Almond milk supreme... plus many other nut and fruit milks.

One innovative ingredient in many recipes is "Lecithin-oil slicker: This is a replacement for products such as Pam, a food release spray. Pour 6 parts oil, not olive, peanut or sunflower, into a jar with 1 part liquid lecithin. Cover tightly and shake well. Keep at room temperature. Do not use lecithin granules. Measure oil first then use the same utensil to measure lecithin to help prevent sticking of lecithin on utensil."

At the end of the book are several very interesting chapters: "The protein myth: When too much of a good thing is a bad thing," by M.G. Hardinge and W.C. Andress. One very interesting table (taken largely from G. Bunge 1902) shows that the longer it takes for a baby animal to double its birth weight, the lower the protein content of the mother's milk. Humans, with 1.4% protein in the milk, take 180 days (the longest). Cats, with 9.5% protein in the milk, take only 7 days (the shortest). A second chapter is titled "Dietary fat–good or bad?," by Bernell E. Baldwin. Address: Michigan.

9617. **Product Name:** [Tofu Dices, Freeze Dried].
Manufacturer's Name: Freeze-Dry Foods GmbH.
Manufacturer's Address: Am Eggenkamp 8-10, D-402

© Copyright Soyinfo Center 2013

Greven 1, Germany. Phone: (02571) 507-0.
Date of Introduction: 1990. July.
Wt/Vol., Packaging, Price: 15 kg in a double poly bag in an outer carton.
How Stored: Shelf stable, 6 month shelf life.
New Product–Documentation: Company leaflet sent by Heather Paine of London. 1991. April 23. Dated July 1990. In English. Produced from deep-frozen tofu, diced and freeze-dried. Size: Cubes, 10 mm on each side. Moisture: Max. 3%. Shelf life: Minimum 6 months in unopened original cartons, stored in a cool and dry place. Packaging: 15 kg in a double poly bag in an outer carton. Opened bags should be tightly closed after usage.

Spot in SoyaFoods. 1991. Spring. p. 5. "Freeze Dried Tofu." The company has offices in Germany, London, and the USA.

• ***Summary:*** In Taiwan, soybeans are imported primarily from the USA. During the days of the Soybean Importers Joint Committee (SIJC) other countries producing soybeans complained that the Taiwanese market was, in effect, closed. However since soybean import liberalization on 1 July 1988, the SIJC was abandoned, yet almost all soybeans are still imported from the USA.

While SIJC was active, each importer declared his requirement based on import volume the preceding year plus or minus 10%. Then the Committee reported to the Government Authority, which invited tenders from suppliers. Because soyfood manufacturers had to rely on soybean oil millers for their supply, the quality was greatly restricted. Hence Taiwanese consumers did not enjoy the high quality of tofu and soymilk found in other countries.

Although soybean imports are bound by the "Sino-America Grains Agreement," which requires that Taiwan purchase at least 1.2 million tonnes/year of soybeans from the USA, the importers now have more flexibility in dealing with the suppliers. Thus the market is now more price-oriented. But food soybeans are still imported in the same way. Hence, soyfood manufacturers still complain about their poor quality.

Preliminary research has shown that the yield of tofu from Ontario special quality white hilum soybeans is 15% higher than from U.S. #2 soybeans. In Taiwan, most food soybeans are sold in 50 kg bags in small lots of 10-25 tonnes/lot. The author advises Ontario suppliers to promote their soybeans on the basis of yield and quality, and to try to build these factors into their price structure. In conclusion, in Taiwan the market for food soybeans is undeveloped. The time is ripe for Canadian soybean exporters to penetrate this market. "Initially you may find that price is a major factor. Do not be discouraged."

Addendum: The following documents are available from the Ontario Soybean Growers' Marketing Board: 1. Sino-America Grains Procurement Agreement. 2. Bulk Carrier Charter Agreement. 3. Soybean Importers Joint Committee Tender Invitation. 4. Chronology of 1988 Soybean Shipments to Taiwan. 5. Sales Agreement of Paraguayan Soybeans. Address: Vice President, Sun Ford Conglomerate Corp., 21 Lin 1 Street, Taipei, Taiwan. Phone: (02) 321-1005.

9619. Karta, Susani K. 1990. The market prospective for tempeh in the year 2000. In: Ontario Ministry of Agriculture and Food, ed. 1990. Soybean Buyers Mission from New Markets, July 1-7, 1990. Tokyo, Japan: Ontario Ministry of Agriculture and Food. 61 p. July. See p. 19-33.
• ***Summary:*** Contents: Introduction. Market situation for tempeh in Indonesia. Health and nutritional significance of tempeh. Tempeh for weaning food. Constraints and trends in the market development of tempeh. Recommended guidelines and strategies. Ideas for the diversification of tempeh utilization: Tempeh as a food ingredient, new tempeh food opportunities.

Tempeh flour (dried, ground tempeh) used in weaning foods could dramatically reduce the diarrheal diseases among children in Indonesia and other countries. The author estimates the potential demand for tempeh flour in weaning foods used for this purpose in the year 2000 to be 27,720 tonnes in Indonesia and 470,880 tonnes in all Asian developing countries. This assumes average tempeh flour consumption of 10 gm/day per child or 3.6 kg/year per child.

In 1983 Indonesians consumed about 927,000 tonnes of soybean as food, increasing to 1,528,000 tonnes in 1958. About 50% of these soybeans were used to make tempeh, and 40% to make tofu; the remaining 10% were used to make soy sauce and "tauco" (a fermented whole soybean condiment [Indonesian miso]). In 1988 the average Indonesian consumed 6.45 kg/year of tempeh (equivalent to 4.3 kg of soybeans). In the past 5 years, consumption of soyfoods in Indonesia has increased by an average of 10% annually.

According to a 1988 report from the Indonesian Ministry of Agriculture, the average daily per capita consumption of calories is still below the recommended Indonesian guidelines. In 1988, calorie consumption was only 1,794 calories/capita/day, or about 28% below the recommended 2,500 calories. Protein intake was about 43.3 grams/capita/day, or about 21% below the recommended 55 gm. "Consumption levels of traditional soyfood such as tempeh will continue to grow as the population attempts to meet its protein needs. Moreover, in view of the purchasing power of the average Indonesian consumer, we can expect a continuing increase in the demand for tempeh as it is widely available at a much more affordable price than animal

• ***Summary:*** It has been almost 20 years since the first container load of soybeans grown in Ontario was shipped to Japan. By the end of 1989, Ontario was exporting more than $25 million worth of soybeans to Japan, Hong Kong, Malaysia, and Singapore. Now the new markets for Ontario soybeans are Korea, Taiwan, the Philippines, and Indonesia.

In Korea, trade restrictions have eased on soybeans and other agricultural products. With hefty trade surpluses, Korea is under pressure to balance trade. Korea soybean imports jumped from only 428,000 tons in 1979 to 1,100,000 tons in 1989. About 120,000 tons of the imported soybeans are for food use, as follows: Tofu 100,000 tons (83% of the total), soymilk 17,000 tons, and soy sprouts 2,000 tons. Nearly all of Korea's soybean imports come from the USA.

Taiwan ranks second, after Japan, in terms of best prospects for agricultural exports. The strong Taiwanese currency has made exports less expensive. Burgeoning trade surpluses have led to increasing pressures from trading partners, like the USA, to balance trade. So Taiwan has liberalized imports by lowering tariffs and eliminating non-tariff barriers. "U.S. soybean exporters took advantage of their dominant market position in Taiwan to expand sales. Backed by aggressive trade negotiators, the American soybean industry has enhanced its competitive position by securing a 5-year supply agreement contract with the Government of Taiwan. The agreement calls for the purchase of 5.7 million tons of U.S. soybeans over a five-year period from July 1, 1986 to June 30, 1991. As a result the United States has over 75% of the market share. Taiwan's annual requirements of food soybeans are estimated at 250,000–300,000 tons. With recent market opening measures announced by the Taiwanese government, direct sales of food soybeans to end-users are now permitted."

Philippines: In Feb. 1987 Michael led a mission to the Philippines, and contacted a buyer. Ontario soybeans were first shipped to that country later in 1987. The Philippines import about 10,000 to 15,000 tons/year of soybeans for food use, and this is expected to increase in the near future. Filipro, Inc., which is the Philippines' licensee for Nestle S.A., reported increasing market acceptance of its re-launched powdered soya milk product Vita (chocolate flavor), and a soy-based baby cereal named Ceresoy.

Indonesia: Ontario soybeans (worth $4.2 million) were first sold to Indonesia in 1980 after Canada's first mission there that year. 90% of the 1.7 to 2.0 million tons of soybeans required by Indonesia are used for food. Tempeh is a delicious Indonesian food and Indonesia requires over 750,000 tons/year of soybeans to make tempeh. Address: Senior Representative, Asia/Pacific Region, Ontario Ministry of Agriculture and Food (OMAF), Tokyo, Japan.

by Laurence Hsiao of Sun Ford Conglomerate Corp. Soybean market in Indonesia, by A. Saifullah of BULOG, Indonesia. The market prospective for tempeh in the year 2000, by Ms. Susani K. Karta, manager, P.T. Indofood Interna Corp. (Indonesia). Appendix: 1. Ontario soybean suppliers (directory of 15 exporters). 2. Useful contacts. 3. Ontario soybean oil crushers (ADM, Victory Soya Mills, Central Soya of Canada). 4. Role of the Ontario Soybean Growers' Marketing Board. 5. Development of soybean varieties (incl. Harovinton for tofu; Canatto, Nattawa, and Nattosan for natto). 6. Market trends in the development of traditional soyfood, by Susani K. Karta (ASA, Singapore; Originally presented at the ASEAN Food Conference, Oct. 1988, Bangkok, Thailand). 7. Reference materials for doing business in Asia/Pacific.

"Natto soybean variety development at Agriculture Canada in Ottawa has also received considerable support from the OSGMB. Ottawa's Dr. Harvey Voldeng has been extremely successful at breeding Canada's top natto varieties (Canatto, Nattawa, and Nattosan) as well as incorporating higher protein levels into other early maturing varieties."

"Soybean breeders are selecting for high protein and white hilum whenever possible" (p. 40). Address: Tokyo, Japan.

9624. Saifullah, Agus. 1990. Soybean market in Indonesia. In: Ontario Ministry of Agriculture and Food, ed. 1990. Soybean Buyers Mission from New Markets, July 1-7, 1990. Tokyo, Japan: Ontario Ministry of Agriculture and Food. 61 p. July. See p. 16-18. [Eng]

• ***Summary:*** Contents: Market size. Major soybean products. Sources of imports. Domestic prices. Addendum: BULOG's objective and functions.

The size of the Indonesian soybean market is about 1.7 to 2.0 million tonnes. From 1985 to 1989 soybean production in Indonesia grew from 870,000 tonnes to 1,275,000 tonnes (about 11.6% per year), imports grew from 330,000 tonnes to 384,000 tonnes (with a peak of 475,000 tonnes in 1988), and soybean consumption grew by 7.8% per year. About 90% of total soybean consumption is used for food, and the remaining 10% is crushed for oil or used for feed. Of the soybeans used for food, about 90% are used for tempeh and tofu.

Since 1986 China has been the major source of soybeans imported to Indonesia, followed by the USA and Vietnam. Soybeans can only be imported by BULOG (the National Logistics Agency) to protect Indonesian soybean producers from low world market prices. Imports are used only to make up for shortfalls in domestic production–not to lower prices.

In 1986 and 1987 the price of soybeans imported from China was lower than the price of soybeans imported from the USA; but from 1988 to 1990 the price from the USA was lower than that from China. In 1990/91 the average import price of soybeans (in US dollars per metric ton, C&F) from various countries was: China $277.70, USA $253.00, and Vietnam $294.20.

To stimulate domestic soybean production, the Indonesian Government sets floor prices for soybeans. In 1990 the price is Rp.400 per kg or about $220 per ton. However the producer price has been well above the floor price for many years. In the central producing area in East Java, the producer prices is presently about Rp.800 per kg (US$440 per tonne), while the wholesale price in the Jakarta market was Rp.950,000 per tonne (US$527.8 per tonne) in early June, 1990.

BULOG's main objectives are to reduce price instability and to stimulate domestic production of rice, sugar, wheat, and secondary crops including soybeans. The Agency maintains a national reserve or buffer stock. Address: Market & Price Analysis Bureau, BULOG, Badan Urusan Logistik, Jl. Jend, Gatot Subroto 49, Jakarta, Indonesia. Phone: 489-5499.

9625. **Product Name:** Spring Creek Tofu Taco Dip.
Manufacturer's Name: Spring Creek Natural Foods.
Manufacturer's Address: 212-C East Main St., Spencer, WV 25726. Phone: 304-927-1815.
Date of Introduction: 1990. July.
Ingredients: Organic tofu, organic soy drink, safflower oil, onion flakes, parsley, hot sauce (cayenne peppers, vinegar, salt), sea salt, red chilies, garlic, onion, paprika, cumin, oregano, celery seed, dried red and green bell peppers, cayenne, bay.
Wt/Vol., Packaging, Price: 7 oz or 10 oz. The latter retails for $1.30–$1.70.
How Stored: Refrigerated.
New Product–Documentation: Label sent by Tenley Weaver. 1990. Aug. 20. 3 inch diameter. Red, brown, green, yellow, blue, and tan on white. The Mexican Taco Dip was introduced in July 1990.

9626. Demos, Steve. 1990. Forthcoming work with tofu in India (Interview). *SoyaScan Notes.* Aug. 12. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Steve will leave for India on Aug. 16 and plans to stay for 1 month setting up a small tofu plant in Bhopal (they already have a small Takai pressure cooker plant) and training Indians how to make tofu. His contact has been Dr. Ali but he has been unable to get specifics on what he is expected to do. In India, tofu is called Soya Paneer. His 11-year old son, Emmet, will go on the trip, and write a report at the end. Steve will also write a report for Winrock International and send Soyfoods Center a copy. Address: President, White Wave Inc., 1990 North 57th Court, Boulder, Colorado 80301. Phone: 303-443-3485.

9627. Vitasoy (USA) Inc. 1990. Vitasoy acquires Nasoya Foods Ltd. (News release). 99 Park Lane, Brisbane, CA

94005. 2 p. Aug. 31.
• ***Summary:*** A 12-year-old-company owned by John Paino and Bob Bergwall, Nasoya has annual sales of $7.0 million and is one of America's leading tofu manufacturers. "Nasoya brand tofu products command over 90% market share on the East Coast... Recently Nasoya has introduced a line of non-dairy frozen pasta products... The company produces over 6 million lbs. of tofu per year and packages pasteurized fresh tofu with an extended shelf life." Paino and Bergwall will continue in their present roles as President and Vice President of Production at Nasoya. Vitasoy was founded by K.S. Lo 50 years ago. The company is now the second largest beverage manufacturer in Hong Kong. Its daily production registers over 1.5 million packs of soy and non-soy beverages with annual gross sales in excess of US$100 million. Address: Brisbane, California. Phone: 415-467-8888.

9628. Ashraf, Hea-Ran L.; Schoeppel, C.; Nelson, J.A. 1990. Use of tofu in preschool meals. *J. of the American Dietetic Association* 90(8):1114-16. Aug. [11 ref]
• ***Summary:*** "Nine recipes were modified through partial substitution of tofu for traditional protein ingredients. Nutritional analysis revealed that the nutritional quality of all the recipes was improved and conformed more closely to the Dietary Guidelines when tofu was substituted for the cheese, eggs, beef, or chicken in the original recipes. The researchers concluded that tofu was well accepted by the preschoolers. In several of the dishes, including macaroni and cheese, lasagna, tuna casserole, and quiche, the children showed a clear preference for the tofu-substituted versions." Address: 1. Dep. of Animal Science, Food and Nutrition; 2. Dep. of Health Education; 3. Dep. of Curriculum and Instruction. All: Southern Illinois Univ., Carbondale, Illinois 62901.

9629. Chen, Wenhua. 1990. Recent observations on the origin of doufu (Abstract). Paper presented at the Sixth International Conference on the History of Science in China. 3 p. abstract. Held 2-6 Aug. 1990 at Robinson College, Cambridge, England. [8 ref. Eng]
• ***Summary:*** "The origin of doufu [tofu] is one of the key issues in the history of food science and nutrition in China. During the Sung dynasty [A.D. 960-1127], the famous philosopher Zhu Xi (Chu Hsi) stated that it was invented by the Prince of Huainan, Liu An, of the Western Han. Since then this view has been accepted by most scholars, including the eminent naturalist, Li Shizhen [Li Shih-chen, compiler of the *Pen-ts'ao kang-mu,* 1596], of the Ming dynasty.

"It was not until the second half of the present century that doubts were raised about the validity of this view. In the 1950s the Chinese historian of chemistry, Yuan Hanqing (Yüan Han-ch'ing), made a thorough examination of the literature and found no mention of doufu in any of the pre-Tang works [The T'ang dynasty was A.D. 618-906]. Indeed the earliest written record on doufu was in the pharmacopoeia *Bencao Yanyi* (Pên Ts'ao Yen I) of Kou Zongshi (K'ou Tsung-shih; ca. +1116) of the Sung dynasty. He therefore concluded that doufu was first made during the Five-Dynasties period [907-960]. In the 1960s the Japanese historian of food science, Shinoda Osamu, did find a reference to doufu in the *Qing Yilu* of Tao Gu [*Ch'ing i lu* "Anecdotes, Simple and Exotic," by T'ao Ku], a Five-Dynasties work, and so he declared that doufu was invented during the middle of the Tang era. As a result, the traditional view that doufu was made during the Han dynasty lost favour among most scholars in China and abroad in the last two decades.

"Yet, the issue is by no means resolved. Recently, a most interesting kitchen scene was discovered on a mural incised on a stone slab in Han Tomb No. 1, at Da-hu-ting, Mixian, Henan province (W.-G. Ta-hu-t'ing, Mi-hsien, Honan province). An illustration shows this mural, which depicts five steps:

(1) Two persons standing behind a waist high vat with convex sides. Each person in this and other parts of mural appears to be wearing a cap and robes. Note: Soybeans might well be soaking in water in this vat.

(2) One person with a ladle in his right hand, moving it toward a hand-turned stone mill mounted atop a second vat with vertical sides. The ladle surely contains soaked soybeans and perhaps a little water.

(3) Two men are bending over a third vat having sides that taper in toward the bottom. Each is holding one side of a filtering cloth. A small ladle rests on the near top edge of the vat. A mysterious third person stands to the left, with his left hand outstretched toward the vat. Between him and the vat is upright stand of no known function.

(4) A person appears to be stirring the contents of a smaller vat. Behind this vat, on the floor, is a vessel in the shape of a kerosene lamp glass. It may contain the tofu coagulant. (5) A large forming box on legs has its top being pressed down by a lever press weighted by an object at the far end. A liquid (whey) is flowing out into an upright vessel on the floor.

Note: For a photograph of the actual mural and a detailed discussion of the problems presented by this mural, see H.T. Huang 2000, p. 304-09.

Part of the scene clearly depicts the preparation of doufu, suggesting that it was already a common food article during the Eastern Han [also called Later Han dynasty, A.D. 25-220], and that the traditional view of its having been invented in the Western Han period [or Former Han, 206 B.C. to 8 A.D.] may well be correct."

Note 1. Henan [Honan in Wade-Giles transliteration] Province is in north China. The Yellow River runs through its northern part. Just south of the river is the city of Luoyang. In early China it was successively the capital of the Eastern/ Later Han, Chin, Northern Wei, and Sui dynasties. It was

© Copyright Soyinfo Center 2013

also the east capital under the T'ang dynasty and the west capital under the Sung dynasty. Also in Honan Province, about 120 miles east of Luoyang, is the city of K'ai-feng, one of the most historical cities of China, and capital of the empire during the Five-Dynasties period.

Note 2. Letter from then talk with H.T. Huang, PhD, expert on the history of Chinese food and agriculture. 1991. Jan. 25. The tomb in which the mural appears is located at the village of Ta-hu-t'ing, 6 km (3.7 miles) east of the county seat Mi-hsien, which lies about 40 km southwest of Zhengzhou (Chengchou), the capital of Honan. It is not far from Luoyang. A report on the excavation of this tomb (including several illustrations {line drawings} the murals) was published by Ang Ching-huai and Wang Yü-kang in *Wen Wu* 10:49-62 (1972), but the scene of tofu making is not mentioned.

The traditional Chinese tofu process involves six steps: 1. Soaking the soybeans. 2. Grinding the beans in water. 3. Filtering the slurry to separate the soymilk from the soy fiber residue (okara). 4. Cooking the soymilk. 5. Coagulating the soymilk. 6. Pressing the curds. The tomb mural clearly depicts 5 of these steps, but omits step 4, cooking the soymilk. Chen thinks the reason it was omitted is because it was such a common operation that the artist did not think it necessary to depict it. This is also the usual argument given to explain why the old Food Canons of China never bothered to give a recipe for cooking rice.

Dr. Huang continues: "But I wonder whether the real reason might simply be that when tofu was first prepared in the Han dynasty, step 4, cooking the soymilk, was not part of the process. The culinary attendants may not have known that cooking the soymilk before coagulation would have enhanced the consistency of the process and the quality of the product. Without step 4, the milk would have taken a long time to coagulate and the product would have retained much of the beany flavor resident in the raw milk. As a result, neither the process nor the product would have gained wide acceptance through the ensuing centuries. Toufu remained a culinary curiosity until the late T'ang dynasty (A.D. 618-906) when someone discovered that toufu of superior quality could be made easily and consistently by first cooking the soymilk before coagulation. Thus it becomes critical to know whether one can actually make toufu without first cooking the soymilk, and if one can, whether the product is of acceptable quality."

Concerning the mural: There are two tracings of this mural showing tofu making. The first was made shortly after the tomb was discovered, but it was never published. The second is said to be of better quality than the first. Chen Wenhua has some photographs of the mural which are, however, marred by the presence of a wire screen erected by the authorities to protect the surface from damage by visitors.

Note 1. Accompanying this English abstract is the complete 11-page text of the article in Chinese, with a line drawing of the mural at the end. Preceding the 3-page English abstract was a shorter 1-page abstract on the same subject titled "The origin of doufu–When was it first made?" Note 2. Letter from H.T. Huang. 1996. Sept. 29. The paper cited above was later published in *Nongye Kaogu* (*Agricultural Archaeology*) 1991, No. 1, p. 245-48. Address: Jiangxi Provincial Academy of Social Sciences, 69 Nanjing Road West, Nanchang, Jiangxi, China.

9630. *East* (*The–Higashi*). 1990. The history of tofu. 26(2):25-31. July/Aug.
• ***Summary:*** This article appears is the section of the magazine titled "The Taste of Japan." Contents: Introduction. The transformation to tofu, The birth of tofu. The popularization of tofu. Transformation of tofu [by further processing]. Tofu dressed up. Tofu coming to Japan from overseas.

Fermented tofu is common in China, but rare in Japan. "Fermented tofu, *furu* in Chinese, can be regarded as a cheese made from tofu." In Japan, fermented tofu is found only "in Okinawa prefecture, which because of its proximity to China, developed a unique culture under Chinese influence. "The Japanese word for fermented tofu is 'tôfuyo' [tofuyo].

Some dishes are made from the byproducts of tofu manufacture. "One byproduct from which dishes are made is okara, the dregs extracted from tônyû" [soymilk].

9631. GEM Cultures. 1990. Catalog [Mail order]. 30301 Sherwood Rd., Fort Bragg, CA 95437. 9 p. Aug. [4 ref]
• ***Summary:*** This catalog celebrates the company's tenth anniversary. Contents: 1. Powdered cultures for soycrafters: Powdered tempeh starter, PTS (11 gm [$2.25, makes 5+ lb of tempeh], 35 gm, 500 gm, 1000 gm). Starter cultures for miso, amazake, shoyu, and tamari. Introductory koji kits. Commercial spore packets for miso or shoyu. Powdered natto starter. Rice koji (cultured rice) for light misos, amazake, pickles. Most in home or commercial sizes. 2. Cookbooks with culture (lists 4 books). 3. Natural salts for curding tofu: Natural nigari or Terra Alba calcium sulfate in 1 lb or 5 lb bags. 3. Self renewing cultures: Fresh viili culture, fresh kefir curds, fresh sourdough culture, seed miso. 4. Sea vegetables from the Mendocino Sea Vegetable Co. 5. Handy reusable items: Super sealers (lids for canning), cheesecloth (grade 60), gauze drawstring bags (for spices in mulled cider, whole herbs, etc.). Address: Fort Bragg, California. Phone: 707-964-2922.

Honey Baked Organic Beans with Tofu Wieners, Organic Black Beans with Tofu Wieners, or Organic Lentils with Tofu Wieners.
Manufacturer's Name: Health Valley Foods, Inc. (Product Developer-Distributor).
Manufacturer's Address: 16100 Foothill Blvd., Irwindale, CA 91706-7811.
Date of Introduction: 1990. August.
Ingredients: Organic small white beans, water, tofu wieners (tofu [organic soybeans, nigari, water], canola oil, wheat gluten, wheat germ, nutritional yeast, natural spices, tamari soy sauce [water, soybeans, wheat salt], natural hickory smoked flavor, paprika, beet powder, sea salt, guar gum), honey, tomatoes, onions, tomato paste, organic potato flakes, unsulfured molasses, concentrated organic apple juice, carrot powder, olive oil, apple cider vinegar, sea salt, paprika, natural herbs and spices, onion powder, garlic powder, organic oregano, organic sage, organic thyme.
Wt/Vol., Packaging, Price: 15 oz (425 gm) can. Retails for $1.89 (1/91, California).
How Stored: Shelf stable; refrigerate after opening.
Nutrition: Per 7½ oz.: Calories 140, protein 11 gm, carbohydrate 15 gm, fat 3 gm, cholesterol 0 mg, sodium 14 mg, potassium 260 mg.
New Product–Documentation: Label (Honey Baked) obtained at World Vegetarian Day in San Francisco. 1990. Oct. 6. 9 by 4 inches. Paper can label. Reddish brown, yellow, black, brown, green, and white on yellow. Full color photo of crock of beans with tofu wieners and a spoon dipping in. "3-minute main dish." Date of 8/90 written encoded on label.

Products with Labels (all 3) purchased at Open Sesame in Lafayette, California. 1991. Jan. 31. $1.89 each. "Lead free can from Health Valley. This can is enamel coated for your protection."

9634. **Product Name:** This is Tofu? (Tofu-based Dips, Sauces, Dressings) [Cilantro Chili, Pesto Alfredo].
Manufacturer's Name: Juli's.
Manufacturer's Address: 34119 South Pacific Coast Hwy., Suite 177, Laguna Niguel, CA 92629. Phone: 714-831-4885.
Date of Introduction: 1990. August.
Wt/Vol., Packaging, Price: 7 oz.
How Stored: Refrigerated.
New Product–Documentation: Talk with Dave Erickson. 1991. May 29. His wife, Juli, developed products similar to these while working at a natural food store in southern California; she sold them in bulk at that one store. The current products were first launched commercially on 3 Aug. 1990. They are fresh, dairy free, and contain only 110 calories per 7 oz.

9635. Lim, B.T.; deMan, J.M.; deMan, L.; Buzzell, R.I. 1990. Yield and quality of tofu as affected by soybean and soymilk characteristics. Calcium sulfate coagulant. *J. of Food Science* 55(4):1088-92, 1111. July/Aug. 4 tables. [31 ref]
• ***Summary:*** New varieties of soybeans are compared. Variations in the coagulation of tofu and the quality of soymilk are studied as a function of the soybean composition. Two models are proposed for predicting the tofu yield. Address: 1-2. Dep. of Food Science, Univ. of Guelph, Guelph, Ontario N1G 2W1; 3. DeMan Food Technology Services Inc., Guelph, Ontario N1H 6B5; 4. Agriculture Canada Research Station, Harrow, Ontario N0R 1G0. All: Canada.

9636. Morinaga Nutritional Foods, Inc. 1990. We look great on paper... but wait 'til you taste Mori-Nu Tofu (Ad). *J. of the American Dietetic Association* 90(8):1149. Aug.
• ***Summary:*** A table at the top of the ad compares 6 different protein sources, with each portion containing 90 calories. They are: Mori-Nu Extra Firm tofu, cottage cheese, chicken, beef (lean ground), cheddar cheese, and whole milk. Compared with the tofu, all contain a higher percentage of calories from far, more grams of fat, saturated fat, and cholesterol–and less grams of protein.

"Everyone knows tofu is healthy. But too few know about the fresh taste of Mori-Nu Tofu.

"Nutrition: Mori-Nu tofu is much lower in fat and cholesterol than other protein foods. It is also lactose-free and one of the highest sources of vegetable protein.

"Food safety: Mori-Nu's aseptic package locks in fresh flavor and healthy nutrients and also protects against premature spoilage and possible bacterial contamination.

"Easy: With a guaranteed 10-month shelf-life, Mori-Nu is readily available at your fingertips. No special daily rinsing or draining necessary. Easy to blend, cook and serve. Call 1-800 NOWTOFU (669-8638) for more information. Mori-Nu tofu. You never knew nutrition could taste so good." Address: 5800 South Eastern Ave., Suite 270, Los Angeles, California 90040. Phone: 213-728-4325.

9637. **Product Name:** [Smoked Deli Tofu].
Foreign Name: Delikatess-Tofu.
Manufacturer's Name: Soyana.
Manufacturer's Address: Friedensgasse 3, Postfach 8039, CH-8002 Zurich, Switzerland. Phone: 01-202-8997.
Date of Introduction: 1990. August.
Ingredients: Tofu*, yeast extract, sea salt, spices, natural plant aromas. * = Organically grown.
Wt/Vol., Packaging, Price: 205 gm vacuum pack. Retails for 4.05 Swiss francs.
How Stored: Refrigerated.
Nutrition: Per 100 gm.: Protein 13 gm, fat 4 gm, carbohydrates 0.1 gm, calories 90 (376 kJoules).
New Product–Documentation: Label sent by Verena Krieger. 1991. Jan. 10. 3 by 2.5 inches. Red, blue, black, and

white. “Delicately smoked. Naturally free of cholesterol. From organically grown ingredients. Ready to eat, cold or warm.” Biona certification symbol. Use by 17 Aug. 1990. Sold in Swiss health food stores.

9638. **Product Name:** Spring Creek Tofu Onion Dip.
Manufacturer’s Name: Spring Creek Natural Foods.
Manufacturer’s Address: 212-C East Main St., Spencer, WV 25726. Phone: 304-927-1815.
Date of Introduction: 1990. August.
Ingredients: Organic tofu, organic soy drink, safflower oil, apple cider vinegar, onion granules, onion flakes, sea salt, parsley.
Wt/Vol., Packaging, Price: 7 oz.
How Stored: Refrigerated.
New Product–Documentation: Label sent by Tenley Weaver. 1990. Aug. 20. 3 inch diameter. Green, blue, and yellow, on white.

9639. Takai Seisaku-sho. 1990. [Takai 1991 systems catalog]. 1-1 Inari, Nonoichi-machi, Ishikawa-ken 921, Japan. 62 p. 30 cm. [Jap]
• ***Summary:*** Photos show the company’s many pieces of equipment and systems for manufacturing tofu and soymilk. The catalog is divided into 6 sections: 1. Transportation and soaking systems. 2. Soymilk production systems. 3. Curding and forming systems; Poached tofu systems. 4. Cooling systems; Hot-pack systems. 5. Curding & forming systems. 6. Deep-frying systems.

Letter (fax) from Wataru Takai. 1990. Sept. 29. Two years ago the company rebuilt its factory and installed CAD (Computer Assisted Design) systems. This year they acquired two computer networks: IBM AS/4000 and IBM 5550. Address: Ishikawa-ken, Japan. Phone: 0762-48-1355.

9640. Torii, Yasuko. 1990. [Re: New developments with tempeh and natto in Japan]. Letters to William Shurtleff at Soyfoods Center, Sept. 2 and 23. 2 p. Handwritten and typed, with signature. [Jap; eng+]
• ***Summary:*** In Japan, tempeh has not become popular. Marusan-Ai has stopped making tempeh. What a shame that Mr. Kanasugi, who was so enthusiastic about tempeh, has just passed away. The Tempeh Study Group (Kenkyukai) is still meeting 2-3 times a year and trying to popularize tempeh.

On the other hand, natto is becoming very popular and production is increasing rapidly. Natto groups are sponsoring various events to help popularize natto outside Japan.

Mrs. Torii traveled to Budapest, Hungary in early September to attend an IFOAM Conference on organic farming, which is spreading in Eastern Europe. There she enjoyed tasty chilled tofu (*Hiya-yakko*) and met a person who knows a lot about tofu. At an international agricultural fair, she found that soyfoods were becoming popular. The booths offering roasted soybean snacks and soya burgers were crowded. She saw an attractive soy cookbook containing color photos, and met a man who is translating *The Book of Tofu* into Hungarian. The Kombinat was doing a lot to develop and popularize soyfoods.

In Feb. she went to Indonesia with other members of the Tempeh Study Group to attend a symposium on soybean fermentation. It was very interesting. Address: Kamitsuchidana 324, Ayase-shi, Kanagawa-ken 252, Japan. Phone: 0467-76-0811.

9641. Eberenz, Walter. 1990. Das BBZ Gespraech mit Klaus Kempff [The BBZ spoke with Klaus Kempff]. *Badische Bauern Zeitung* (*BBZ, Germany*). Sept. 8. p. 4. [Ger]
• ***Summary:*** Klaus Kempff is managing director (*Geschaeftsfuehrer*) of Life Food GmbH, of Freiburg. We spoke about the food uses of Soya.

BBZ: Mr. Kempff, you manage a company that makes soyfoods. To what extent and from where do you get your soybeans?

Kempff: Five years ago we began to make soya products for human food, and above all tofu, but also smoked tofu, sausages, balls, and pastes (*Würstschen, Klösse, Pasteten*). We presently buy our soybeans from the USA where they are grown organically (*Sie stammen aus kontrolliert biologischem Anbau*). We presently use about 1.5 to 2 metric tons a month [or 18-24 tons a year]. The demand for our products has steadily increased.

BBZ: What guarantees do you have that the American soybeans are really grown the way they are said to be grown?

Kempff: We buy our soybeans from Arche, a wholesaler, whose owner we know personally. He has been to the USA several times to inspect the soybean he imports. And a guarantee is attached to every sack.

BBZ: Can you imagine ever buying soybeans that are grown in Bavaria–so near to where you work?

Kempff: When we can be sure to get organic quality (*biologische Qualität*), I can imagine buying from Bioland or Demeter, or also contracting for our own soybeans.

BBZ: How much do you pay for organic U.S. soybeans?

Kempff: We presently pay about 1.30 German marks per kg.

A portrait photo shows Klaus Kempff.

9642. Paino, John. 1990. The acquisition of Nasoya Foods by Vitasoy (USA) Ltd. Reflections and new developments (Interview). *SoyaScan Notes.* Sept. 9. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Vitasoy’s acquisition of Nasoya Foods, Ltd. was finalized on 3 Aug. 1990 in Boston, Massachusetts. Nasoya is now a wholly owned subsidiary of Vitasoy (USA) Inc. and has become a corporation (Nasoya Foods, Inc.) of Massachusetts. Yvonne Lo and John have been on the board of directors of the Soyfoods Association of America for 4

© Copyright Soyinfo Center 2013

years, and they have often discussed possible cooperation. John first met K.S. Lo in late January 1985 at the Natural Foods Expo, and soyfoods association meeting in Anaheim, California. He was impressed by his presence and recalls thinking that he and Yvonne had strong constitutions and good energy. John knew that Vitasoy was looking for a U.S. soymilk manufacturing facility. Vitasoy wants to start making soymilk in America one of these days. Now they are shipping organic soybeans from America to Hong Kong, then shipping back the soymilk. In June 1989 Winston Lo (Managing director of Hong Kong Soya Bean Products Co. Ltd. in Hong Kong) was in Boston visiting his daughters who went to Choate and Phillips Andover. He visited Nasoya and got very excited about the company. That evening at dinner serious talks began about the two companies doing something together. In Oct. 1989, when Bob Bergwall was going to Japan to look at the Sato automatic tofu cutting-packing system (which they just purchased), John suggested that he visit the Vitasoy in Hong Kong. John wanted to be sure that the two companies had the same philosophies–which he feels is the most important thing. Bob went and came back very excited and impressed, convinced that the two companies should work together in the emerging world economy. Both companies were built on a philosophy, and the same philosophy of making good foods/soyfoods available to people for health reasons. Both are family-run businesses. He was very impressed with Vitasoy's management style. Bob brought back a fantastic English-language video titled "The Vitasoy Story," similar to the book, and telling the Vitasoy story. While Bob was in Hong Kong, John met K.S. Lo in Philadelphia at the NNFA health food show. Mr. Lo came by the Nasoya booth. John was very impressed with what a wonderful, cultured gentleman and K.S. Lo was and the class with which he and his daughter, Yvonne, conducted their lives and their businesses. At dinner, for 3 hours they discussed the mechanics of the joint venture. In March 1990 John and his wife Sarah went to Hong Kong for Vitasoy's 50th Anniversary celebration. They visited K.S. Lo's home. The details of the deal were worked out by Winston and Yvonne. A letter of intent was written in April 1990.

John feels that the main benefits to Nasoya of the new relationship will be financial backing, technical, management, and marketing expertise, but most important the synergy between the two companies.

The main benefits to Vitasoy will be Nasoya's expertise in manufacturing and marketing soyfoods, the ability to eventually run and manage Vitasoy's USA soymilk plant, and Nasoya's capabilities for getting Vitasoy into East Coast supermarkets. Only 30-35% of Nasoya's business is in the natural/health food market; the rest is in supermarkets–which Vitasoy has had difficulty penetrating. Vitasoy looked at many other U.S. companies but chose Nasoya as a company with good management in place, one that could take it to the next level, with the most growth potential and market share in their area, one that was marketing driven, diversified, and innovative. In Nasoya they have a company that can be the base for their future expansions in America. If and when Vitasoy does build a plant in America, it will probably be under the same roof as Nasoya but in a new and larger nearby location. The Midwest would not be a good location because it is a poor marketing area for a perishable product. There are no specific plans to try to develop an aseptic tofu.

The acquisition was made by Vitasoy (USA) Inc. purchasing Nasoya for cash. The amount of the transaction is confidential. No stock was transferred. The Paino family has been very successful over the years in real estate. Nasoya was established with the spinoff as some of that income. There were certain tax advantages to Paino Associates, and certain financial advantages to Nasoya Foods, Ltd. They were the limited partner, and Nasoya Foods Inc. was the general partner of the limited partnership. It was very complicated but for tax reasons it worked out very well. In effect, John, his father, and Bob Bergwall each owned a certain percentage of Nasoya, and when it was sold, they divided the cash income according to the percentage ownership. All were very pleased. John's wife, Sarah, an acupuncturist, got pregnant after 10 years of marriage just 4-5 days after John sold the business. "You can see how much of my energy went into Nasoya."

Nasoya now sells their soy mayonnaise (Nayonaise) and dressings nationwide. Their new line of frozen tofu-filled pasta products will also go nationwide.

Nasoya still uses well water. They have two wells on their property. The first one discovered gives 20 gallons/minute. The second one, which John and Bob discovered by dousing after they bought their large Sato tofu making system, gives 100 gallons/minute from 400-foot deep aquifer.

Concerning competition on the East Coast, Azumaya and Morinaga both have some distribution and are about equal as competitors; Hinoichi does not compete. Nasoya fresh tofu sells much faster than Mori-Nu Brik-Pak. Azumaya sits side by side in the produce case with Nasoya but is not serious competition. Northern Soy is the main competitor in natural/health hood stores. Sam Sung is strong to the south but they sell mostly to the Asian-American market.

Basic tofu still accounts for roughly 70% of Nasoya's sales. Second-generation tofu products account for most of the rest, with egg-roll wrappers and wonton skins being a very small percentage. Address: President, Nasoya Foods Inc., Leominster, Massachusetts. Phone: 508-537-0713.

9643. Sand, Avraham. 1990. Pioneering soyfoods and natural foods in Israel (Interview). *SoyaScan Notes.* Sept. 9. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Avraham first went to Israel in 1975 and

© Copyright Soyinfo Center 2013

stayed for about a year. During this time he and Avraham Leider and one other person founded Israel's first natural foods company, named Amud Ha Shachar (Pillar of Dawn) and located in Jerusalem. The first product they made was granola, followed by whole wheat flour, bulgur wheat, brown rice (which they packaged), and date bars. With this company established, a number of Americans and other westerners who had recently immigrated to Israel and were connected with the company approached the Sachnut, the Jewish government agency which helps finance Jewish cooperative settlements. They asked to be given a moshav. A moshav is like a kibbutz (a cooperative agrarian, rural settlement) except that the families have their own homes and land, and the children live at home. In 1976 the Sachnut gave the group a piece of land, infested with scorpions, upon which nine other groups had tried and failed since 1948 to establish a successful community. The Sachnut also financed a small natural foods factory and bakery on the moshav, complete with an oven and a packaging machine. The moshav was named Moshav Me'or Modi'im, located at Doar Na Hamercaz, in the Judean Hills between Jerusalem an Tel Aviv, Israel.

Avraham returned to North America for several years. While living in a community of 5-6 people in Nova Scotia, Canada, he was introduced to tofu by people who made tofu for the community, but he did not make tofu there himself.

Between 1975 and 1990 Avraham has spent a total of 8 years in Israel. The rest of the time he was in the USA or Canada or travelling. Avraham returned to the moshav in 1978 and that year he established Israel's earliest known tofu shop as part of Pillar of Dawn. The tofu was made in the same bakery room as the granola, especially in the evenings when the granola wasn't being made. Originally the community scale shop was established solely to make tofu for the 25 or so families living on the Moshav. Tofu production was small, averaging 50 lb/day of tofu one day a week, using a Corona mill grinder powered by a washing machine motor. The tofu was curded using bittern (nigari) from a salt factory on the Dead Sea. The Moshav owned the tofu company collectively and financed it. Avraham was the motivating force that got the operation started with temporary help initially from Yaacov Sack and Moshe Reuben. About 3-6 months after tofu production began, they started to make tempeh. Then Ben Zion Solomon joined Avraham 6-12 months after the company started and they worked together like equal partners for several years as the tofu and tempeh makers. Solomon was also making quite a bit of miso on the moshav (with a little help from Sand). They also introduced soymilk. At some point, they began to sell their tofu and miso at a few health food stores in Jerusalem. As far as Avraham knows, his was the first company to make tofu, tempeh, miso, or soymilk in Israel. They developed a 1-page informational pamphlet, written in Hebrew on one side and English on the other, explaining what tofu was and how it was made, plus some recipes. At that time Israelis, other than recent immigrants from America, didn't know what tofu was.

They reached the point where they decided to buy large scale equipment (from Takai) and set up a real commercial shop on the moshav that could produce 500 to 1,000 lb/day of tofu. The Sachnut indicated that they would be willing to help set up this new business. So in about 1979 or 1980 Avraham traveled to the USA and did a lot of study to learn about tofu equipment, products, and processes in small to medium sized shops. He visited about 20 tofu shops nationwide (most were very open and helpful) and collected information in a notebook. He worked at the Soy Plant in Ann Arbor, Michigan, for approximately a year in about 1980. From time to time he shared information with his father, Ralph Sand, who was doing research on non-dairy cheese and tofu at Anderson Clayton at the time. At the last minute the Sachnut pulled out and decided not to finance the project, so the expansion never took place. They continued to make tofu on a small scale. But the moshav was suffering economically so in about 1981 Avraham and his wife, unable to make a living there, left and returned to the USA. The little soyfoods plant dissolved but shortly thereafter a commercial operation (probably Golden Jerusalem Tofu) started in Jerusalem and the people on the moshav bought their tofu from Jerusalem.

During the time that Avraham made soyfoods in Israel (1978-81) there was a lot happening with soya. There was a man called the "Soya King" ("Hamelech Soya," probably Eliahu Navot) who was famous in Israel as the country's soybean pioneer. Avraham thinks he lived in Herzlia/Herzliyya, just north of Tel Aviv, but he died in about 1979 or 1980 several months before Avraham was able to meet him. Avraham went to his home town and met his widow, who told him a little about her husband's work with soya.

The most popular food use of soybeans in the late 1970s was in textured soy flour (like TVP). These products were made in Israel by 1 or 2 big companies and sold in supermarkets in very stylish packages indicating that the manufacturers were well established. There were several flavors and large amounts were sold. He does not know the name or address of the manufacturer, but he got the feeling that Eliahu Navot had at least helped inspire these products; he may have helped to develop them.

In America, Avraham set up a soy deli named Sand-Munches in Madison, Wisconsin. They bought tofu from Bountiful Bean in Madison and made and sold tofu sandwiches, nori rolls, tofu salad, tempeh salad, various tofu spreads. They sold to health food stores and had a sandwich cart on the campus.

Avraham was in on the soyfoods wave at the very beginning, but after it became more established and mainstream he felt that his work had been done in that area, so he moved into the field of aroma therapy, inhaling

© Copyright Soyinfo Center 2013

aromatic essential oils from herbs, where he has been working for the last 8-9 years. It is a very powerful form of herbal medicine. He has developed several product lines under the Tiferet brand (a term taken from the Tree of Life in the Cabala) which he markets in health food stores in the USA and overseas. Address: 210 Crest Dr., Eugene, Oregon 97405. Phone: 503-344-7019.

9644. Lo, Yvonne. 1990. Recent developments with Vitasoy in Hong Kong and America (Interview). *SoyaScan Notes.* Sept. 10. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Nasoya Foods, Inc. is now a subsidiary (not a division) of Vitasoy (USA) Ltd. Note that Nasoya has changed from a limited partnership to a corporation. The parent company in Hong Kong will soon change its name from Hong Kong Soya Bean Products Co. Ltd. to Vitasoy International Holdings Ltd. They had a hard time choosing between "Vitasoy International" and "Vita International." Choice of the former name may indicate that "there will be a whole new look at the company philosophy." Presently the company produces many non-soy beverages. The labels of all of the company's products made in Hong Kong will have to be reprinted.

Building a soymilk manufacturing plant in America may soon make sense for Vitasoy (USA) Ltd. "It was something we had in mind when we decided to acquire Nasoya."

The parent company has produced a 14-minute color video, The Vitasoy Story, for its 50th anniversary. Part of the company sales kit, it is available in two versions, one narrated in English and one in Chinese. The film portion of the two is identical.

K.S. Lo's collection of Yixing Chinese teapots is now touring the USA, and he will soon be lecturing on the subject in San Francisco on Sept. 22 at the Chinese Culture Center.

Note: Concerning ownership of Vitasoy (USA) Ltd., This company was originally established by Yvonne and Irene Lo, daughters of K.S. Lo, in San Francisco in Jan. 1989 as The Soya Bean Products Co., N.A. Inc. They immediately began to import Vitasoy from Hong Kong, and to distribute it first in Canada, then after Feb. 1981 to the USA. By mid-1982 they were selling some 3.2 million cartons of Vitasoy in the USA. The venture was so successful that in April 1982, to raise capital and facilitate long-term operations with Hong Kong Soya Bean Products Co. Ltd., Yvonne and Irene sold their company to HKSBPC, which renamed the affiliate Vitasoy USA, Inc. The parent company now began to take a serious interest in the U.S. market. In 1983 U.S. sales of Vitasoy rose 60% to 5 million cartons (328,125 gallons). Address: President, Vitasoy (USA) Ltd., 99 Park Lane, Brisbane, California 94005. Phone: 415-467-8888.

9645. *China Daily.* 1990. Bean curd festival in Beijing and Taibei, national soybean statistics. Sept. 16. p. 1b. *

9646. Applegate, Jane. 1990. Tokyo tofu firm's 'bacteria free' sales pitch irks U.S. companies. *Los Angeles Times.* Sept. 17. p. D3. [1 ref]

• ***Summary:*** "The aggressive approach taken by Tokyo-based Morinaga Milk Industry Ltd., one of Japan's largest dairy companies, has angered many U.S. tofu makers...

"'They are hurting the whole industry with their ads,' said Bill Mizono, president of Azumaya, a San Francisco maker. 'There is room for Mori-Nu's product side by side with water-packed tofu...'

"Mori-Nu... offers $5 memberships in its 'Health for Life' club. Members receive a quarterly newsletter featuring recipes, coupons and nutritional information. So far, about 10,000 people have signed up...

"Hinoichi Tofu, a manufacturer in downtown Los Angeles, is working with Jackie Olden, a radio and television personality, to help take some of the mystery out of cooking with tofu.

"Hinoichi's goal is to gain greater trial and repeat purchase of tofu among mainstream American consumers."

9647. Fost, Dan. 1990. Wildwood's tofu empire sprouts in Fairfax. *Marin Independent Journal* (*Novato, California*). Sept. 22.

• ***Summary:*** "Wildwood Foods... has sprouted into a privately held corporation selling $5 to $10 million worth of food a year, president Paul Orbuch says...

"Wildwood employs 100 people in Fairfax and Santa Cruz, cranking out a total of about 25,000 pounds of tofu a week. They also make an ever-growing list of salads, sandwiches and other products, but tofu is their bread and butter.

"Their tofu can be bought everywhere from Monterey to Medocino to Sacramento.

"Wildwood also owns exclusive distribution rights to Sonoma Salsa, Mrs. Wiggles Rocket Juice and other products on the local good-and-good-for-you scene...

"Orbuch, 39, was a photographer when he was drawn into the tofu business in 1980, forming Wildwood with Bill Bramblett, a musician and the founder of the old Sleeping Lady Cafe; Frank Rosenmayr, a building contractor, and Paul Duchesne...

"The Fairfax operation produces 10 100-pound batches [of tofu] a day; Santa Cruz makes five times as much.

"Orbuch says the firm starts with one pound of beans and ends with two pounds of tofu...

"Orbuch explains why he loves having the storefront right on the street. 'We really wanted a community tofu shop,' Orbuch said. The picture window recalls 'a bakery in France,' he said." A photo shows Greg Whalen, who is nearly hidden by steam as he pours soy milk into kettles while making tofu at Wildwood. Address: Marin, California.

9648. Stievenard, Sylvain. 1990. Re: Cacoja changes its name to Sojinal. Letter to William Shurtleff at Soyfoods Center, Sept. 24. 2 p. Typed, with signature on letterhead. [Eng]

• ***Summary:*** On 8 Aug. 1990 Soyfoods Center received a letter (fax) from A. Kirschner of Sojinal, located at the same address as Cacoja in Issenheim, France. A letter from Soyfoods Center asking what had happened to Cacoja was answered on Sept. 24 by Sylvain Stievenard, who reported that the company name was changed from Cacoja to Sojinal on 1 Aug. 1990. No answer was given to the question as to why the company name was changed. The phone number was changed on 15 Dec. 1989 to 89.74.53.53 from 89.74.17.07. Mr. Maurice Rochet is still director. Three labels, each bearing the Formoja brand, were enclosed, implying that these products are made currently: Delicacy with basmati rice and curry sauce, Lasagna with Tofu, and Ravioli with tofu. The address on each label is Cacoja, 10, rue Lavoisier, 68000 Colmar, France. Address: Factory: 8, route de Merxheim, Issenheim 68500 Guebwiller, France. Phone: 89.74.53.53.

9649. McReynolds, Thomas. 1990. Morinaga decides to introduce private labeling and a Fresh Fruit Shakemate (Interview). *SoyaScan Notes.* Sept. 25. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Morinaga will aggressively offer to provide their aseptic tofu, on a private label basis, to other companies in the soy and natural foods industries. To print the package directly, the buyer must commit to ordering at least 500,000 cartons/year, but with affixed pressure-sensitive labels, they can get the minimum down to 25,000 to 50,000 pieces. They will make all three textures available (red = soft, blue = firm, yellow = extra firm). Projected price is about $10/case. Some potential clients are Vitasoy/Nasoya, Frieda's, Eden Foods, Tree of Life.

Next summer, Morinaga will be introducing their first second generation product, called (and trademarked) Fresh Fruit Shakemate. It will be like their soft tofu but with a lower bean profile and perhaps with vanilla added. They will sell/position it in the fruit section of food stores. It will be packaged in a 3-pack, with no printing on individual packages in order to (1) get a bigger face, (2) Put brochures in the back. The theme: Shake up your day 8 days a week. Tom wants to do more second generation products.

There are rumors that Nasoya has secured aseptic packaging equipment from Tetra-Pak (an AB-3 machine for the purpose of manufacturing a 250 ml aseptic tofu) and that Vitasoy in Hong Kong is, or in the near future will be producing an aseptic pack tofu. They may be using a 3-layer laminate to get around the Morinaga 5-layer process with the polyurethane lining. Tom held some kind of an aseptic tofu package in Hong Kong about 18 months ago, but he is not sure who made it. When he talked with Yvonne Lo recently, she hinted that they were developing such a product. But Morinaga has no solid evidence.

Update: Nov. 5. Morinaga will initially offer the private label to only 1 company in each of 3 market categories: Eden in the natural foods market, Vitasoy in the ethnic market, and Frieda's Finest in the national produce market. Address: Marketing Consultant, Morinaga Nutritional Foods, Los Angeles, California 90040. Phone: 213-728-4325.

9650. Archer Daniels Midland Co. 1990. Annual report. P.O. Box 1470, Decatur, IL 62525. 33 p.

• ***Summary:*** Net sales for 1990 were $7,751 million, down 2.3% from 1989. Earnings for 1990 were $483.5 million, up 13.9% from 1989. Shareholders' equity (net worth) is $3,573 million, up 17.8% from 1989. "This fifth straight year of record earnings showed good contributions from the Company's core businesses of oilseed, corn, and wheat processing and was aided by initial contributions from some of the new value-added operations... The company operates 121 processing plants in the U.S. and owns, or has an ownership interest in, 25 foreign plants...

"The protein specialties division expanded both in terms of output and facilities this year. The production of edible soy protein isolates more than doubled this year due to greater market penetration in both domestic and export markets. The production of soy protein concentrates also increased as this product demonstrated its adaptability in food and animal feed products.

"A new facility for the production of industrial soy protein isolates was brought on line in February. These products are used in a variety of markets worldwide, including the paper coating industry. ADM is the only company which produces a complete line of value-added soy proteins.

"ADM has introduced its veggie burger, an all-vegetable protein food product based on soy protein concentrate. This innovative, cholesterol-free, reduced calorie product also contains dietary fiber and appeals to the vegetarian market. Early indications of good acceptance in the U.S. and U.S.S.R. suggest that this product has global potential...

"ADM Ross & Rowe expanded its facilities this year with the completion of a new lecithin production plant in Decatur, Illinois. The division is now capable of producing modified, enzyme hydrolized, complexed and microbiologically pure lecithins" (p. 4-5).

From page 8 to page 15 are four 2-page color photo spreads, each concerning ADM's new Vege Burgers. The text of each reads: London: "Due to the trend toward healthier eating, many restaurants in Great Britain, including the Hard Rock Cafe in London, offer Vege Burgers as a popular menu choice." Moscow: "Cafe Vege Burger opened in Moscow in early spring and sales have far exceeded expectations." Great Britain: "Vege Burgers are sold in a variety of flavors in many retail grocery and health food stores throughout

Great Britain." Decatur, Illinois: "In the Decatur area, several grocery stores and employee cafeterias are now selling veggie burgers to the growing number of health-conscious consumers looking for nutritious, good-tasting food."

"Haldane Food Group has benefitted from the ongoing trend toward a healthier and more varied diet. A recent Gallup poll which indicates a 150% increase in vegetarians since 1984 helps to explain the emergence of Vege Burger and other TVP products as market leaders. Over 60 million servings of Vege Burgers were sold by Arkady Group companies last year. Production capacity at the Coventry frozen food factory has been supplemented with off-site storage and additional burger manufacturing machinery. Kwality Foods, now renamed Saucemasters Ltd., has enjoyed increased sales in a potential growth market, especially with private label businesses. The company's manufacturing capacity has been expanded with the addition of bottle and jar fillers, labellers, and more off-site storage. Genice Ltd. has introduced an extended range of non-dairy ice creams based on soya isolate, soya milk, or tofu. Yogurt-based ice creams are now being marketed." Address: Decatur, Illinois.
