"While tofu does not currently have a Federal standard of identity, the current Dietary Guidelines for Americans (DGA) encourage plant-based sources of protein such as tofu. According to the DGA, consumption of a balanced variety of protein foods can contribute to improved nutrient intake and health benefits. Tofu must be commercially prepared and meet the following definition, established in 7 CFR 210.2 for purposes of the school meal programs as 'a soybean-derived food... basic ingredients [in tofu] are whole soybeans, one or more food-grade coagulants (typically a salt or an acid), and water.' Noncommercial tofu and soy products are not creditable.

"In the school meal programs, 2.2 ounces (¼ cup) of commercially prepared tofu, containing at least 5 grams of protein, is creditable as 1.0 ounce equivalent meat alternate. This is consistent with the DGA recommended serving size for tofu, and provides protein and nutrients of concern at levels similar to other Child Nutrition (CN)-credited meat alternate foods.

"Additionally, ½ cup (4.0 fluid ounces) of soy yogurt is creditable as 1.0 ounce equivalent meat alternate. This is consistent with the crediting of dairy yogurt while allowing schools to provide a non-dairy alternative.

"Since school meals are an opportunity for children to learn to eat healthy and balanced meals, foods served should be easily recognized by children as part of a food group that contributes to a healthy meal. Tofu is widely recognized as a meat substitute and can easily be included in the school meal. We recognize that tofu is being used to produce other meat substitute products such as links and sausages made from tofu, which are easily recognizable as meat substitutes and can be credited as such. However, products made with tofu that are not easily recognized as meat substitutes, would not contribute to any component of the reimbursable meal and do not meet the customary and usual function of the meat / meat alternate component. Soft tofu for example, blended into a recipe so that it is not recognizable (i.e. in a soup) or does not represent a meat substitute (i.e. tofu noodles) does not qualify as a meat alternate.

"When considering processed tofu products such as links and sausages made from tofu as meat alternates for the reimbursable meal, the tofu ingredient must contain the required 5 grams of protein, which is not shown on a nutrition facts panel. Therefore, the most appropriate way to ensure that the product meets Food and Nutrition Service (FNS) requirements is to request that the product be manufactured under the CN Labeling Program following a Federally approved quality control program.

"Until the Food Buying Guide for Child Nutrition Programs is updated, the following yield information can be used for purchasing and crediting (table attached):

"l pound of tofu with 37 grams of protein will have 7.28 quarter-cup servings per pound and provide 7.25 ounces of equivalent meat alternate for Food-based Menu Planning requirements.

© Copyright Soyinfo Center 2013

"State agencies should direct any questions concerning this guidance to the appropriate FNS Regional Office. Regional Offices with questions should contact the Child Nutrition Division."

The attached table, titled "Food Buying Guide Specifications for Tofu and Soy Yogurt" contains six columns: (1) Food as purchased. (2) Purchase unit. (3) Servings per purchase unit. (4) Serving size per meal contribution. (4) Purchase units for 100 servings. (5) Additional information. Address: Director, Child Nutrition Div., USDA Food and Nutrition Service, 3101 Park Center Drive, Alexandria, Virginia 22302-1500.

13221. Gay, Jason. 2012. Manny Pacquiao vs. the vegan. *Wall Street Journal.* Feb. 27. p. B10. Sports.
• ***Summary:*** In Las Vegas, Nevada, on June 9, after months of training on a strict vegan diet, the undefeated African-American boxer Timothy Bradley Jr., age 28, will try to defeat the world-renowned boxing champion Manny Pacquiao–now a Congressman from the Philippines.

The challenger enjoys the spinach, the tofu, and the $7.95 organic smoothie that bears his name–which is not yet a household word.

Bradley, whose nickname is "Desert Storm," who lives and trains in Palm Springs, first exeprimented with a vegan diet in 2008. He stuck by the diet as he became junior welterweight champion and compiled an unblemished record of 28-0. During the 3 months leading up to the fight, he will eat a vegan diet, with no exceptions.

Others who have successfully tried a vegan diet during training are Tony Gonzales (NFL tight end), David Zabriskie (cyclist who raced in the Tour de France; he supplemented his near-vegan diet with small amounts of fish), and Mike Tyson (ex-boxing champion).

13222. Seemo (Hillel Shapira). 2012. Re: First two batches of tofu made in Brazil. Letter (e-mail) to William Shurtleff at Soyinfo Center, March 31. 1 p.
• ***Summary:*** "Some impressions of the first 2 batches [of tofu] this morning. 4 kg [soy] beans each, been stretching the cooker capacity a bit. We plan to reduce batch size to 3.5 kg for more comfortable handling and better yield. The mini boiler can easy do 2 batches per hour and we've got another one in standby.

"We get some more equipment next week, cooling tanks and work tables and sealing, machines start then to go out and do some sales. No labels yet. Yours always,..."

Four photos show Seemo and Kairava making tofu at their plant near Pune / Puna, India (see next page).

Address: RD BR-354, Coqueiros (CX Postal 13), Itamonte, MG C.E.P. 37466000 Brazil.

13223. Cui, Xuebo. 2012. Hokkien Chinese borrowings on cookery in Tagalog. *Theory and Practice in Language Studies* 2(3):566-71. March. [19 ref]
• ***Summary:*** "This paper attempts to examine the Tagalog loanwords of Hokkien origin in the domain of cookery through the semantic analyses."

The word *angkak,* which means "red-colored grains of rice used as coloring for food," is originally a Hokkien word that has been borrowed (more correctly, copied) into Tagalog.

A major category of words borrowed from Hokkien into Tagalog is soybeans and soy products. Here are some pairs of Hokkien original words followed by the present word in Tagalog:

tauhu (soy bean curd that is uncooked)–taho (soybean curd that is cooked and is eaten with brown syrup).
tahuri (fermented salted soybean curd) -
tau-koa (soybean curd)–tokwa.
tau-iu (soy sauce)–toyo.
tausi (fermented black soybeans)–tausi.
tokuwa (tofu)–tokwa.

About the author: Xuebo Cui was born in Yanji, China in 1974. She received her PhD degree in Applied Linguistics from De La Salle University, the Philippines in 2007. Dr. Cui currently heads the Department of English at Yanbian University, Yanji, China. Address: Head, Dep. of English, Yanbian Univ., Yanji, China.

13224. Nguyen, Andrea Quynhgiao. 2012. Asian tofu: Discover the best, make your own, and cook it at home. Berkeley, California: Ten Speed Press. [viii] + 232 p. Illust. (color photos by Maren Caruso). Index. 24 x 24 cm. [21 ref]
• ***Summary:*** Another very attractive book and well-written book by Andrea Nguyen. In researching this book, Andrea traveled to many countries in East- and Southeast Asia. The color photos and the book design are both superb.

© Copyright Soyinfo Center 2013

Contents: Introduction: East Asian stronghold (China, Japan, Korea), wavering Southeast Asia (Vietnam, Thailand, Cambodia, Laos, Singapore, Malaysia, Indonesia, Philippines, Myanmar / Burma), South Asian newcomer (India), tofu in America (Samuel Bowen, Benjamin Franklin, Commodore Matthew Perry, Civil War soldiers, Piper & Morse, George Washington Carver, Mildred Lager, World War II), alternative to mainstream (Boys Market in Los Angeles, *Diet for a Small Planet, The Book of Tofu,* Jeremiah Ridenour, Los Angeles Tofu Festival), tofu today (United Soybean Board Survey, Hodo Soy, Dong Phuong Tofu [Westminster, Orange County, California]).

Tofu buying guide: Tofu types (tofu blocks {silken, medium, medium firm, firm, extra firm, super firm}, pressed tofu, tofu noodles, tofu skin [yuba; an unfortunate term since yuba has nothing to do with tofu] {fresh tofu skin packets = dou fu bao, tofu skin rounds = dou fu pi or fu pi, dried tofu sticks [dried yuba sticks] = fu zhu or "tofu bamboo"}, fried tofu {fried tofu slices}, tofu pudding, fermented tofu {red or white}, soy milk).

Note: This is the earliest English-language document seen (Oct. 2012) that uses the term "fresh tofu skin packets" or the term *dou fu bao* in connection with yuba.

Tofu cooking tips: Cutting, draining, frying.

Homemade tofu tutorial (incl. homemade soy milk, soy milk lees, homemade silken tofu, homemade tofu pudding, block tofu, confetti tofu, oboro tofu, zaru tofu, seasoned pressed tofu, tea-smoked pressed tofu, white fermented tofu, frozen tofu, fresh tofu skin, soy-simmered fried tofu).

Recipes–Fresh and satisfying: Snacks and starters. Soothing and soft: Soups and hot pots. Homey and wholesome: Main dishes. Versatile and delicious: Salads and sides. Religion and artistry: Mock meats. Building on traditions: Buns, dumplings, crepes, noodles and rice. Amazing transformations: Sweets and desserts. Basics. Ingredients (glossary). Acknowledgments. Measurement conversion charts.

Note 1. This book contains many recipes that use meat, poultry, or fish as ingredients.

Note 2. The Vietnamese term for tofu is *dau phu.*
Address: Food writer, Santa Cruz, California.

13225. United Soybean Board (USB). 2012. Consumer attitudes about nutrition: Insights into nutrition, health, and soyfoods. 18th annual. 2011 edition. Seattle, Washington: USB. [12] p. March. 28 cm.

• ***Summary:*** Methodology: "This year represents the sixth year we have adopted an online self-administered survey as our methodology, a significant change from random telephone interviews. The survey, conducted by an independent research firm [in Seattle, Washington] in January 2011, includes 1,000 random surveys, providing a sample that is consistent with the total U.S. population. The study's margin of error remains ± 1.9 to 3.1%, with a confidence interval of 95 percent."

Note about the methodology of this survey from Mark Messina, PhD, who asked one of the survey's designers. 2012. May 29. "The participants in the consumer survey represent US demographics. The only difference with this survey compared to previous ones is that rather than interviewing the consumers by phone, once contacted, the consumers are directed to a web site where they fill out the survey."

Contents: Introduction. Methodology. About USB. Consumers aim to choose healthier foods. Consumers examine the good and bad of nutrition facts. Effective strategies in improving overall health [about choice of amounts and types of fats; does not mention exercise]. Who is to blame for obesity? (Individuals 28%, the fast-food industry 18%). Soyfoods receive healthy rating (In 2011 81% of consumers rated soy products as healthy, with only 5% rating them as unhealthy. A graph shows "Awareness of soy as healthy" from 1998 (67%), to a peek of 85% in 2007 and 2008, falling to 81% in 2011). General nutritional attitudes and concerns. Examining the nutritional facts panel. Obesity concerns. Strategies for improving overall health. Soyfoods and health perceptions. Health reasons for seeking soy. Cooking and salad oil impressions. Soy in the media. FDA-approved health claim. Opinions on biotechnology. Spotlight on biotechnology. Trans fat awareness and opinion. Awareness and usage of soy products. Restaurants and soy products. Occasion preferences for consuming soy.

Awareness and usage: "37% percent of Americans consume soyfoods or soy beverages once a month or more, approximately five percentage points higher than during the period between 2006 and 2008. Conversely, 35% indicate that they never consume soy, which has decreased steadily since 2006 (then at 43%). For the seventh year in a row, consumers reported the most familiarity with soymilk, soybean oil, tofu and soy veggie burgers.

"Soymilk continues to be the most regularly consumed soy product, with nearly one-quarter of Americans reporting that they drink it regularly. For comparison, in 1999, 18% of consumers reported that they had tried soymilk. By 2010, the number of consumers who have tried soymilk has more than doubled to 45% of all consumers.

Edamame holds the number two spot and has surpassed veggie burgers among the top three most consumed soyfoods for the past two years. In fact, it has more than tripled in popularity since 2005 (then at 4% and now at 13%). "Plain white tofu" follows in third place, on par with 2009 at 9%."

A table shows the "Top 20 soy products by awareness." Soymilk 90%. Soybean oil 56%. Plain white tofu 56%. Soy veggie burger 54%. Soynuts 40%. Soy protein bars 37%. Soy infant formula 36%. Soy latte / soymilk in espresso coffee drinks [as at Starbucks] 36%. Edamame 34%. Dried or canned soybeans 33%. Cereal bar / energy bar 32%. Miso 29%. Soy ice cream / cheese 28%. Soy yogurt 27%. Soy hot

© Copyright Soyinfo Center 2013

dogs 26%. Flavored / marinated tofu 24%. Soy supplements 21%. Soy flour 21%. Soy breakfast cereal 18%. Textured soy protein 16%. All others mentioned 14% or less.

Occasion preferences for consuming soy (in descending order of preference): dinner 39%, breakfast 30%, lunch 22%, mid-afternoon snacking 19%, late evening snacking 13%, mid-morning snacking 9%, desserts 5%.

"In 2010, 84% of consumers rate soy products as healthy, down one percentage points from 2009." A graph (p. 6) shows this increase in awareness (82% in 2006, 78% in 2005, 74% in 2004, 74% in 2003, 74% in 2002, 69% in 2001, 76% in 2000, 71% in 1999, 67% in 1998).

Note 1. As of March 2012 this full survey is available gratis in PDF format at www.soyconnection.com /health_ nutrition /pdf/.

Note 2. This survey is hard to cite and to use because it has no page numbers. It is hard to read when printed since much of the type is too light / pale. We appreciate the correct spelling (as one word) of the words soyfoods and soymilk.

13226. Seemo (Hillel Shapira). 2012. Re: Company name. Life in Brazil. Letter (e-mail) to William Shurtleff at Soyinfo Center, April 1. 1 p.

• ***Summary:*** "Its always my pleasure writing to you and I will do my best to answer your questions. Wise Foods, Sábias Comidas is the trade name of our private limited company–in full Sábias Comidas Comércio e Industria Ltda, now owned by Kairava and me. We had to choose the limited company format in order to process our immigration papers to Brazil. We chose the name while doing our first step learning this great language (in which we are still utter beginners) and we were playing with words trying to combine conscious, well being, natural etc. and foods and after some trail and error we zoomed on this name and it proves to be very catching. We were lucky in India too with the name choosing [Dakini Health Foods].

"I didn't have to deal with corruption directly but we've been 'cleaned' by a rotten system that is very corrupt. I will narrate parts of the story so you can 'get the Picture.'

"Our equipment has been stopped at the gates for nearly a year while the official was running us in circles for US$5,000 worth of machines for tofu production. We ended up with US$17,000 in parking fees, and another US$8,000 in other fees–and these guys know what they are doing.

"So Oooops goes all the money meant to equip the production halls, make nice packaging, etc.–as well as our living reserves.

"For our Korean rice equipment–similar games. For example as these machines operate in high stress, there were some spare iron nuts and bolts put in by the manufacturer which he entered in the invoice as free. But here they said 'free' is not allowed so a new invoice valuing the bolts at $20 had to be currier-ed in from Seoul but the signature was done in other than the permitted blue pen. So another invoice sent. Then after sixty days deliberations (while very high storage fee ticks on!) they asked for the technical specifications for the machines which we gave in detail. 45 days later they want some clarification on this and that. We comply. Then they asked for catalog's–which don't exist. So I made one on the computer...! then 60 days later they came back to the iron bolts. What the specs, because specifying them as iron bolts is not enough information. I told them they can keep the bolts... on and on. Friday: at last our agent managed to get the clearances and in few days time we will get them. We had to use the money put aside for the second half payment for our property. Luckily the sellers of this property was their father's place are negotiating the courts' maze to get the required stamps–and if before we were hoping they will get it ready fast... we are now praying for a slow bureaucratic procedure which as we hear is the case in inheritance cases in Brazil. Meanwhile we have undisputed possession on the place. It is looking good now after 6 month renovation work.

"We plan to start and make Tofu available for sale by the second week of April. Our packaging is going to be very very basic, polyethylene bags with the date and weight–Hot-Stamp only. We plan to reach to hotel resorts and a few small towns around. No long-haul distribution. We have some spare equipment and we are open to franchise a small regional Tofu shop format under the Sabias Comidas name in due time. Could be a good solution to the vast distances of Brazil and a good self employment option. But first we have to float again financially and get a bit more rooted.

"We both love this patch of heaven we been thrown into and enjoying our life in Brazil.

"I appreciate my life more and more these days, just the simple beauty around me–fresh air, tasty water. The mountains and the southern sky and the periods of utter silence. Bliss.

"I have not much 'spiritual' practice these days. Some days when I wake up at 3 or 4 in the morning, I like to sneak out of bed and go sit for a bit of vipasana–kind of sit in meditation doing nothing, in the small room. I find it very refreshing. Some days when there has been lots going on, I like to do it before going to bed just to digest and to distance my self from it all before sleep." Address: RD BR-354, Coqueiros (CX Postal 13), Itamonte, MG C.E.P. 37466000 Brazil.

13227. Seemo (Hillel Shapira). 2012. Re: Our first commercial tofu in Brazil. Skewered barbecued tofu. Letter (e-mail) to William Shurtleff at Soyinfo Center, April 1. 1 p.

• ***Summary:*** "Greetings from beautiful Brazil. We are now shifting into commercial production [of tofu]; yesterday we did the first sale (2 kg) to a local pousada, (hotel) and tommorow we produce again some 16-18 kg, 2 batches. Got the stainless-steel sinks and a table now, and it is time to get some income again. Its a long way to go until the business will float well and yet we like this journey very much.

© Copyright Soyinfo Center 2013

© Copyright Soyinfo Center 2013

"Last Tuesday we received our rice cake machines. It will be few weeks before we are ready with labels and packaging, yet today we popped a few kg organic rice for our friends and us. The evening we celebrated the Brazilian way with a nice BBQ [barbecue]–Tofu, vegetables, Brazilian pine nuts, salads and more. Tofu price we now fixed at 8 reais per kilo (organic). Some pictures attached."

Photos show: (1) Seemo working at machine with Kairava kneeling at back right. (2) Skewered, barbecued tofu. (3) Table filled with colorful dishes, including tofu. Address: RD BR-354, Coqueiros (CX Postal 13), Itamonte, MG C.E.P. 37466000 Brazil.

13228. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Sábias Comidas Comércio e Industria Ltda.
Manufacturer's Address: RD BR-354, Coqueiros (CX Postal 13), Itamonte, MG C.E.P. 37466000 Brazil.
Date of Introduction: 2012. April.
Ingredients: Organically grown soybeans, water, calcium chloride coagulant.
Wt/Vol., Packaging, Price: 2 kg in polyethylene bag. 8 reais per kg.
How Stored: Refrigerated.
New Product–Documentation: Letter (e-mail) from Seemo. 2012. April 15. Yesterday we did the first sale (2 kg) [of our tofu] to a local Pousada (hotel) and tomorrow we will produce again some 16-18 kg–two batches.

April 16: "At the moment we do not have any label and we are selling the tofu in polyethylene bags with water–both the bulk and the retail. We will decide the type of label after meeting some packaging suppliers–Printed polyethylene bags or stick-on labels. I am also checking around for suitable tubs but that will take time.

"We got the message from the hotel that they need tofu, that we should open them an account page, and that we can send the tofu with the masseuse who was going there. The tofu was packed with water in a polyethylene bag and put in a Styrofoam box, which was returned to us. We relaying on freshness and strict cold chain."

13229. **Product Name:** Viana Smoked Veggie Frankfurters, Viana Veggie Bratwurst.
Manufacturer's Name: Tofutown North America (Importer / Marketer). Made in Germany by Tofutown.com.
Manufacturer's Address: P.O. Box 1186, Charlottesville, Virginia 22902. Phone: www.viana-usa.com.
Date of Introduction: 2012. April.
Ingredients: Viana Smoked Veggie Frankfurters: Tofu* (soybeans*, water, nigari), water, wheat protein*, sunflower oil*, tomato paste, spices, sea salt, raw cane sugar, garlic, yeast, locust bean gum, almond flour, celeriac, onion, mustard * = Certified USDA Organic. Contains almonds, soy and wheat.
Wt/Vol., Packaging, Price: 9.7 oz (275 gm).
How Stored: Refrigerated.
New Product–Documentation: One sample of each (product with Label) with sales sheet and business card sent by Jon Kessler, Sales and Marketing Director, Tofutown North America. 2012. July 30. Front panel of Smoked Veggie Frankfurters: Color photo of product ready to eat in a bun with mustard and all the traditional garnishes / trimmings. USDA Organic. "Kids love it. Listen to your heart. 0% cholesterol. GMO free. Traditional German smokehouse. Gourmet vegan meat alternative. Heat and serve!" Inside each paperboard box is the brown, product vacuum-packed in thick plastic film. Letter (e-mail) from Jon Kessler. 2012. Aug. 10. Gives the date each product was first sold commercially.

13230. **Product Name:** Tofurky Hot Dogs, Tofurky Jumbo Hot Dogs.
Manufacturer's Name: Turtle Island Foods, Inc.
Manufacturer's Address: P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031.
Date of Introduction: 2012. April.
Ingredients: Jumbo: Water, vital wheat gluten, expeller pressed non-GMO canola oil, pea protein, organic tofu (water, organic soybeans, magnesium chloride, calcium chloride), spices, sea salt, onion powder, organic cane sugar, natural vegetarian flavors, oat fiber, carrageenan, konjac flour, natural smoke flavor, granulated garlic, wheat starch, paprika, and annatto. Contains wheat and soy.
Wt/Vol., Packaging, Price: 12 oz (340 gm) vacuum pack.
How Stored: Refrigerated.
New Product–Documentation: Both labels sent by Seth Tibbott, founder of Turtle Island, 2012. Nov. 19. Seth says these two products were both first shipped in April 2012.

13231. Tibbott, Seth. 2012. Re: Getting out the word about use of hexane (Interview). Letter (e-mail) to William Shurtleff at Soyinfo Center, May 9. 1 p.
• ***Summary:*** Seth sent Soyinfo Center the rough draft of a 2012 sell sheet in PDF format. It is promoting Tofurky Hot Dogs and Tofurky Jumbo Hot Dogs. The front panel is titled "Everybody loves a good dog."

On the back across the top we read: "New Tofurky hot dogs. Gourmet, meatless and delicious. Organic tofu based. Non GMO. No hexane extracted soy."

On the back left is a list of bulleted points: "Independent & family owned. 100% vegan. Kosher certified (KSA Parve). Hexane free organic soy. Non-GMO ingredients." Address: President and Founder, Turtle Island Foods, Inc., P.O. Box 176, Hood River, Oregon 97031. Phone: (503) 386-7766.

13232. Zaineddin, Aida Karina; Buck, Katharina; Vrieling, Alina; et al. 2012. The association between dietary

© Copyright Soyinfo Center 2013

lignans, phytoestrogen-rich foods, and fiber intake and postmenopausal breast cancer risk: A German case-control study. *Nutrition and Cancer* DOI:10.1080/01635581.2012.683227. 14 p. Available online 16 May 2012. [46 ref]

• ***Summary:*** "Phytoestrogens are structurally similar to estrogens and may affect breast cancer risk by mimicking estrogenic / antiestrogenic properties." Phytoestrogens, which are found only in plants, are able to bind to mammalian estrogen receptors. There are several mechanisms that have been proposed to explain how phytoestrogens reduce breast cancer risk: (1) Their weak inhibitory effect on aromatase may lower the amount of circulating estrogen; as a result, breast tumor proliferation may be decreased. (2) Inhibition of tumor growth. (3) Angiogenesis. (4) Stimulation of apoptosis.

In Western societies, whole grains, soybeans, and traditional soy foods are rich sources of phytoestrogens.

The three main classes of phytoestrogens are isoflavones, lignans, and coumestans. Isoflavones, which are found in high levels in soybeans and many soyfoods, have received the most scientific attention because of their possible effects on human health, including the prevention of cancers.

"Meta-analyses have shown that isoflavones may slightly reduce the risk of breast cancer, and that this inverse association was somewhat stronger among premenopausal women than among postmenopausal women. However, associations were only significant in high soy-consuming Asian populations, and no significant associations were found in low soy-consuming Western populations."

The results of this study provide evidence for a reduced menopausal breast cancer risk associated with increased consumption of soybeans and soyfoods, sunflower and pumpkin seeds.

Table 6, titled "Adjusted odds ratios and 95% confidence intervals for the association of phytoestrogen-rich foods with postmenopausal breast cancer risk by estrogen receptor (ER) status," contains data concerning soy milk, soybeans, tofu, soy spread, sunflower / pumpkin seeds, sesame / flax seeds, etc. Address: 1-2. Unit of Genetic Epidemiology, Div. of Cancer Epidemiology, German Cancer Research Center, Heidelberg, Germany.

13233. Soyfoods Council (The). 2012. Soyfood myths: Get the facts. *Iowa Soybean Review* (*Iowa Soybean Association, Urbandale, Iowa*) 23(7):7. Spring.

• ***Summary:*** "Myth #1: Anybody who has had breast cancer should avoid traditional soyfoods such as tofu and soymilk.

"Actuality: The American Cancer Society says breast cancer patients can safely consume up to three servings of traditional soyfoods per day.

"Myth #2: People in Japan and other Asian countries consume only small amounts of soyfoods and use them primarily as condiments.

"Actuality: The results from large surveys indicate, on average, Japanese and Shanghai adults consume 1 1/2 servings of soyfoods per day.

"Myth #3: Soyfoods cause mineral deficiencies or imbalances.

"Actuality: Evidence unequivocally shows calcium absorption from soymilk and cow's milk are similar.

"Myth #4: Soyfoods contain estrogen and men who eat them may experience feminization or even impairment of their fertility

"Actuality: Soyfoods do not contain estrogen and evidence indicates soyfoods do not feminize men. Soy doesn't lower testosterone levels or sperm concentration.

"Myth #5: Soyfoods should be avoided because they are harmful to the thyroid.

"Actuality: More than 20 clinical studies have shown neither eating soyfoods nor using soybean extracts cause thyroid problems."

13234. Shurtleff, William. 2012. The global value chain for soybeans (Editorial). *SoyaScan Notes.* June 12.

• ***Summary:*** "The value chain is a concept from business management that was first described and popularized by Michael Porter in his 1985 best-seller, *Competitive Advantage: Creating and Sustaining Superior Performance"* The value chain concept can be applied to at various levels of activity, such as a worldwide level, an industry-wide level in a particular country, or at the level of a particular company operating in a specific industry. The key links in a value chain are those points at which value is added to products. Quantitative data are necessary to analyze the amount of value added (Source: Wikipedia at value chain, June 2012).

In the global soybean chain we have identified four major links or points: (1) Soybean production: This is highly fragmented, with hundreds of thousands of farmers, both large and small, growing soybeans. However some of those farmers are organized into groups, often cooperatives (such as AGP in the United States).

(2) Crushing and other soybean processing. Crushing soybeans to make crude soy oil and defatted soybean meal is main way that soybeans are processed. However in East Asia, whole soybeans are also processed into human foods, such as tofu, miso, soymilk, tempeh, etc. Large soybean crushers which operate worldwide include Cargill, ADM, Bunge, AGP, Sanbra (Brazil) etc. Defatted soybean meal is further processed to make animal feeds, soy sauce, etc. Crude soy oil is further refined to make edible vegetable oil biodiesel, etc.

(3) Transportation / distribution of soybeans and/or soybean products. Major firms (which are vertically integrated) include Cargill, ADM, Bunge, Dreyfus, the Noble Group of Hong Kong, etc.

(4) End use / retail: The main end uses for soybeans are: From whole soybeans–human foods, often divided into four

© Copyright Soyinfo Center 2013

types: (a) Traditional East Asian fermented soyfoods, such as miso, tempeh, natto and its relatives. The largest makers are miso makers and natto makers in Japan. (b) Traditional East Asian non-fermented soyfoods, such as tofu, soymilk, edamame, roasted soy flour, yuba. The largest makers are tofu makers and soymilk makers in Japan, Hong Kong, and USA. From defatted soybean meal: animal feeds, soy sauce, modern Western soy protein ingredients: textured soy flour / textured vegetable protein (TVP in ad ADM trademark), soy protein concentrates, textured soy protein concentrates, soy protein isolates, and textured soy protein isolates. The largest makers of animal feeds are the same as the major soybean crushers: Cargill, ADM, Bunge, etc. From crude soybean oil: Refined soybean oil and biodiesel. The largest refiners of soybean oil are the major soybean crushers. From refined soybean oil: Edible vegetable oil, salad dressings, margarine, etc. Address: Founder and owner, Soyfoods Center, Lafayette, California. Phone: 925-283-2991.

13235. Shurtleff, William. 2012. Thoughts about tofu and sexual desire (Editorial). *SoyaScan Notes.* June 20.
• ***Summary:*** This line of though began with an e-mail (on June 19) from Mark Messina:

"Have you ever come across in your reading of original texts anything that makes reference to the kinds of statements below that are very prevalent on the net? The source on the net is the Weston A. Price Foundation, yet there are no citations to the original source documents.

"In fact, a popular tradition in Japan is for wives to feed their husbands tofu when they want to prevent pregnancy! Buddhist monks traditionally eat tofu to lower their libido."

"It is widely known throughout Asia that when a woman does not want to have sexual relations with her husband any more, she feeds him more and more tofu! Monks in monasteries needing to be celibate are urged to eat more tofu and soy products. In Asia, it is common knowledge that soy reduces sexual urge and ability."

Mark then adds: "I just checked another 20 comments about the monks and only found one referenced.

"Ancient monks used to eat extra tofu to help them to easily maintain their vows of celibacy." (2).

"Reference 2 is to Kaayla Daniels' book, *The Whole Soy Story.*–Thanks, Mark.

I (Shurtleff) look for this quote in Daniels' book and soon find it on page 11. It states:

"Liu-An's initial reason for turning soybean dross into tofu gold was his desire to add a low-cost protein to the vegetarian monastic diet (19-21; see Shurtleff & Aoyagi twice + Keshun Liu). Over time the monks may have noticed that randy behavior declined when tofu consumption went up. The aptly named "meat without a bone" soon appeared regularly on monastery menus as an aid to spiritual development and sexual abstinence, a dietary strategy validated by recent studies showing that the plant-form of estrogens (called phytoestrogens) in soy can lower testosterone levels (22; see Fallon and Enig, 'Tragedy and Hype') (See Chapters 28 and 29).

Shurtleff adds: "I'll bet that bit of speculation is the origin of all the information you found on the Web."

When Messina sees this quotation and comment he asks Shurtleff: "To be clear, as far as you know, the above statement has no basis in fact. It wasn't added to the menu as an aid to sexual abstinence? I understand selectively citing studies and misinterpreting data but making something up is quite weird."

Shurtleff then repeats that, so far as he knows, the above statement has no basis in fact.

Shurtleff then shows the two initial statements / quotations that Messina sent to Akiko Aoyagi and asked her to take 10-20 minutes reading and thinking about them, then to see if she could find any similar information in Japanese on the Web.

She was born and raised in Japan, and graduated from college there. She obviously has spent more time thinking about and working with tofu than most Japanese–except tofu makers.

She said: 1. She has never heard anything like either of these two statements. So far as she knows they have no basis in fact.

2. She could not find anything like either of these two statements in Japanese on the Web.

In short, she has the same opinion about the two statements that Shurtleff does. They were invented, probably (at least the first) by Kaayla Daniels on page 11 of her book *The Whole Soy Story.* Address: Founder and owner, Soyfoods Center, Lafayette, California. Phone: 925-283-2991.

13236. Tsai, Minh. 2012. Making and marketing yuba at Hodo Soy Beanery (Interview). *SoyaScan Notes.* July 4. Conducted by William Shurtleff of Soyinfo Center.
• ***Summary:*** During the past 8 years Hodo Soy has been very effective and innovative in introducing yuba to people in the Bay Area of California. Part of this success has been through effort and part has been (Minh modestly admits) through timing and luck. "We are very fortunate to be in the Bay Area. The only two other places it might work are Los Angeles and Manhattan, New York."

Yuba is now an important and profitable product for Hodo Soy, accounting for about 20% of total sales. However the yuba tables take up about half of all Hodo Soy's manufacturing space.

What are the key's to yuba's success for Hodo Soy? First, education. We have worked to educate our customers who are chefs at restaurants about the large amount of labor that goes into making yuba and contributes to its high price (about $15 a pound). We have also met with chefs in restaurants and explained that 1 ounce of yuba is quite a good serving size; so each serving costs less than $1.00.

© Copyright Soyinfo Center 2013

And it looks great on the menu and on the dish." Minh also educates chefs about yuba's versatility (use it as a wrap, put it in soups, etc.) which enables them to develop recipes. The chefs have developed innovative recipes using yuba and their customers seem to enjoy their creations. Most people really love the taste of yuba. "People think of it as a starch-free, gluten-free noodle. It's always al-dente; it doesn't fall apart."

"I believe that we have been doing more education on tofu and yuba than all the big tofu-makers combined." Minh does 95% of this education himself–in person. He enjoys this teaching quite a bit, and he knows these chefs personally.

Yuba has brought a lot of positive publicity to Hodo Soy. It has been called everything from "the lingerie of tofu" to "the sashimi of tofu." Daniel Patterson, chef at Coi restaurant described yuba as tofu's "elegant and sexy cousin" (New York Times, 6 Aug. 2006). This is important in terms of branding, as the company is known to be the introducer and maker of this new product.

Minh (who has Chinese ancestry) was smart (and innovative) to call the product "yuba" instead of "bean-curd skin"–like most Chinese restaurants. But there was another reason he called it yuba. "Our research shows that, as far as willingness to pay for food at a premium price, the Japanese are at the top of the list. They know what it is and they realize it is expensive. And the majority of our Asian customers are actually Japanese." But Hodo Soy's Asian customer base is still relatively small; Minh mission is to introduce high-quality soyfoods to mainstream America.

Hodo Soy sells mostly "mature yuba" (plain fresh yuba) and value-added yuba products, such as Spicy Yuba Strips. From time to time he has requests from high-end restaurants for "nama yuba," which is soft, formless yuba that is not yet mature and fully formed. Each chef wants a particular texture, so Minh sells it to them on a customized basis–and requires that the chef come to Hodo Soy the first time to make exactly the texture of yuba they want.

Hodo Soy delivers all its own yuba and tofu products; they have four delivery vehicles that deliver to 50-60 accounts in the Bay Area–both restaurants and natural grocery stores; Rainbow Grocery in SF, Tokyo Fish Market, and Berkeley Bowl all carry Hodo Soy's fresh yuba. They have a "make to order approach" and a restaurant must order 4-5 days in advance. Value added products are sold through chains such as Costco, Whole Foods Markets in Northern California, Andronico's, and Molly Stone's.

The two Bay Area restaurants that have done the most to introduce yuba are Coi (Daniel Patterson, in SF's North Beach) and The Slanted Door (Charles Phan; modern Vietnamese cooking near the Ferry Building). Other restaurants that offer may serve yuba include Cyrus (Healdsburg), The French Laundry (Yountville, California), and Ozumo (Oakland and San Francisco).

Hodo Soy has never done focus groups or taste panels with yuba.

Minh first made yuba in about May 2004 when he was tinkering with Sogo Tofu in San Jose. They had a yuba table (with 10-12 frames) that they weren't using. Sogo Tofu was initially built as an adjunct to a large Chinese health grocery store–sort of a Chinese Whole Foods. This store (named Sogo) was part of a chain named Marina Foods, which has a handful of stores in the Bay Area. Sogo, the grocery store, has since closed down but the tofu shop continued to operate. Minh asked Sogo Tofu to make yuba for him, then he experimented using this yuba in recipes, and introduced these dishes to his customers at farmers' markets. The people who owned and operated Sogo Tofu were relatives of Minh's wife. The three yuba dishes, starting in May 2004, were Soy Omelette, Yuba (Fresh), and Poached Yuba Loaf. Minh quickly learned the people at farmers' markets really liked these products. They learned about yuba from him, and he learned from them. The first soy product gave them was the Poached Yuba Loaf, followed by Soy Omelette (yuba marinated in soy sauce and a little brown sugar, then pan fried in a little oil). People were generally surprised at the texture and taste, but they found it to be delicious and asked, "What is it?" He replied, "It's yuba." They asked back, "What's yuba?" So he explained. Eventually they came to want the plain fresh yuba so they could experiment with their own recipes. Another early yuba product was Spicy Yuba Strips (made at Sogo Tofu starting in Dec. 2004); this is still a best-seller at retail outlets for Hodo Soy Minh's 5th yuba product was Sesame Yuba Strips (made at Sogo Tofu and discovered by accident; the other ingredients were toasted sesame paste / butter, a little brown sugar and soy sauce).

To take a step back: Minh approached tofu-making very much from a Western food processing and food science point of view. He wanted to leave the basic traditional methods (as shown for example, in a flow chart) unchanged but introduce modern equipment to do the work of lifting, pressing, scooping, and slicing, and modern methods for measuring temperatures, times, and Brix, etc. Minh soon realized (in about 2004-05) that he needed to supervise the making of tofu at Sogo Tofu. But he was just a beginner. How can a beginner, in a traditional Chinese family and craft, tell his experiences aunts and uncles to change. "It was an impossible situation. After about 2 years Sogo had reached saturation–in terms of quality, sanitation, good manufacturing practices, and traceability of ingredients. Starting at the end of 2005, our sales for the next 2-3 years basically remained static. In 2006 we decided to build a plant in Oakland, and that took about 2 years." Minh traveled a lot, learned a lot, visited some tofu companies, and made some mistakes. As Minh prepared to open his tofu plant in Oakland, he realized that he "did not want to hire anyone with legacy tofu experience. I wanted to teach them from the very beginning."

Minh's wife, Jean Ku, was not directly involved with the tofu and yuba business at all. But she has been a tremendous

© Copyright Soyinfo Center 2013

supporter by bringing home the income to support the family during the early years. Jean is a top executive at the Energy Foundation–Program Manager for the China Sustainable Energy Program. Although it has been in existence for only 20 years, the Energy Foundation is the biggest contributor to the reduction of carbon dioxide in China. The foundation began with the sole mission of reducing carbon dioxide, and it identified China as the biggest potential culprit. Its founder decided to focus all of its resources on China. So a foundation based in San Francisco has been focused on China's CO2 problems for 20 years! Amazing. It is responsible for the very progressive energy policy in China today–which is more progressive than that of the U.S. One of the advantages of a dictatorship is that it can move policy much more quickly than is possible in a democracy. The Energy Foundation has learned a great deal about problem solving during these 2 decades and the model has now been expanded to Brazil and India. She is doing exactly what she finds most interesting and important–critical to the future of the planet. "She loves what she does, and she is very grateful, just like I am, that we have work that we love." Continued. Address: Founder, Hodo Soy Beanery, 2923 Adeline Street, Oakland, California 94608. Phone: 510-735-4587.

13237. Tsai, Minh. 2012. Making and marketing yuba at Hodo Soy Beanery (Continued–Part II) (Interview). *SoyaScan Notes.* July 4. Conducted by William Shurtleff of Soyinfo Center.

• ***Summary:*** Continued. How is Jean Ku related to Sogo Tofu? Sogo Tofu was operated by the Huang family. Jean's father's family name is (of course) Ku and her mother's maiden name is Huang. Her mother's brother, Steve, is one of the partners of Sogo Tofu; he is an investor only. His wife's sister runs Sogo Tofu–to this day. They are still the same size (2,500 square feet) as when Minh knew them 8 years ago.

Hodo Soy makes sweet yuba (*ama-yuba,* which is rich in natural sugars, but often comes in broken sheets) only at the end of each day. They use this sweet yuba to make a Poached Yuba Loaf. Hodo Soy now makes fresh yuba every day.

Hodo Soy began making soyfoods (mainly tofu and yuba) in Oakland in Aug. 2009. The company moved into an existing building but basically had to gut it in order to install 8,000 square feet of floors, drains, walls, ceilings, etc. for food processing. That took 18 months to finish, and the business didn't grow at all during this time. The equipment / machinery was expensive; but it is not computerized.

John Scharffenberger is only active as the chairman of the board of Hodo Soy; but his association with the company is very important and he brings ideas to the table and helps to determine the direction of the company.

Billy Bramblett comes to work two days a week, six hours a day. He is much more operational. He brought with him a vast experience from his Wildwood days in how to grow a company, and what infrastructures and operational structures need to be put in place. He works with labeling, pricing.

Hodo Soy employs about 30 people; 20 people are in production, and of these, about 45% are hispanic and 45% Asian ancestry. Ten people work in distribution, administration, sales, accounting, etc. Some sell tofu and yuba at farmers' markets. "We will always do farmers markets." "Our most popular yuba product is Spicy Yuba Strips; about 50% of all the yuba we make goes into Spicy Yuba Strips." "We do not have a layer of true managers here. Moreover, we promote internally."

Hodo Soy still has the Google account; they buy a lot of tofu and some fresh yuba. "They can afford it."

We talk about Ken Lee and Soyfoods of America as a different business model selling three types of yuba to Chinese restaurants all over the United States. But a look at their website shows that today they sell only frozen yuba. Address: Founder, Hodo Soy Beanery, 2923 Adeline Street, Oakland, California 94608. Phone: 510-735-4587.

13238. Kessler, Jon. 2012. Re: How Jon started to work with Tofutown.com (Bernd Drosihn and Viana). Letter (e-mail) to William Shurtleff at Soyinfo Center, July 11. 1 p.

• ***Summary:*** On 8 April 1996 Jon visited Bernd Drosihn and Viana in Germany (at Shurtleff's request) and wrote a report for Shurtleff. Today, more than 15 years later Jon is head of Tofutown.com's sales and marketing operations in the USA. He writes (in answer to a question from Shurtleff): "I had managed Soyatoo for Ceres before Ceres went out of business.

"I started working with Soyatoo [Bernd Drosihn's soy-based whip topping in a pressurized can] while I still owned and managed Sunergia Soyfoods. It was a joint venture to share marketing expenses with Ceres; we called it 'Progressive Formulations,' and that was about fall of 2007. Then in early 2009, Ceres had no more funds to purchase containers of Soyatoo from Tofutown, and could not get any credit anywhere. They soon ceased operations all together (their main operations were in selling organic wheat for pasta I believe) and sold their off their assets.

"So, Tofutown.com–Bernd's company, decided to start a subsidiary here in North America, called Tofutown North America. Originally it was managed by Conscious Co, Jaclyn Cardozo and Steven Kern, who lived in SF and had been trying to sell the Viana for a couple years. They became operations managers for the subsidiary and I was the sales manager. The company officially was incorporated on 17 April 2009 in Delaware.

"More recently, Steven and Jaclyn resigned, in the late fall of last year, and I became the chief operating officer 'COO.' At that time we moved the 'headquarters' from San

© Copyright Soyinfo Center 2013

Francisco to here in Charlottesville, and the whole thing was good timing for me.

"I sold Sunergia to Twin Oaks Community Foods [Louisa, Virginia; founded in 1967] on Aug. 20, 2010; I invented the products, and brand name, after I left the community. I sold the two cheese alternatives (Soy Feta and Soy Bleu) to Secenario International (Elke Heitmeyer who also owns 'The Organic Gourmet' line of veggie bouillon etc.; Sherman Oaks, California), on Jan. 15, 2011, and later (Feb. 3, 2012) the brand name, vegcusine.net, was sold to Scenario as well." Address: Virginia. Phone: 540-894-5126.

13239. Palmer, Sharon. 2012. The plant-powered diet: The lifelong eating plan for achieving optimal health, beginning today. New York, NY: The Experiment. xx + 412 p. Foreword by David L. Katz, MD, MPH. [228 ref]
• ***Summary:*** A positive attitude toward traditional soyfoods is found throughout this excellent book. The traditional Japanese diet (p. 19-20)–one of the healthiest–leads to an average life expectancy of 80 years for men and 85 years for women. The Japanese diet is characterized by a "Focus on soy foods. Whole soyfoods such as edamame, tofu, and miso are regular features of the diet.

The section titled "Soy, the superfood" (p. 58-59) describes the basic types of soyfoods and their benefits. The next section is "A word about soy meat alternatives" (p. 60-61) including veggie burgers, soy meat crumbles, and vegetarian hot dogs.

The "Plant-based dairy alternatives guide" (p. 72-76) includes various types of soy milk, soy milk yogurt, and soy ice cream.

The word "soy" appears on 55 pages of this book, the word "tofu" on 54 pages, "tempeh" on 18 pages, "soy foods" on 17 pages, "seitan" on 15 pages, "edamame" on 10 pages, "soybeans" on 10 pages, "soy milk" on 8 pages, "soy sauce" on 6 pages, "miso" on 6 pages "soy milk yogurt," "soy ice cream" and "soybean oil" on 2 pages each, and "soy cheese" and "soy cream cheese" on 1 page each.

Includes "75 original plant-based recipes for every meal–all with nutritional data." "A 14-day meal plan with action alerts to get you started." "Essential information on the healthiest plant food–whole grains, vegetables, fruits, nuts, legumes, and even herbs, spices, dark chocolate (rich in polyphenol antioxidants), coffee (contains many beneficial antioxidants), tea (rich in polyphenol antioxidants, and takes the place of high-calorie, high-sugar drinks), and wine.

Virginia Messina, in her blog The Vegan RD, says this: "It's a book that makes the scientific case for eating fewer animal products and more plant foods while admitting that there is no precise definition for 'plant-based diet.' The information in the book is balanced, honest, and practical, and the recipes–which appear to all be vegan–look really nice. In the forward to the book, Dr. David Katz, of the Yale University Prevention Research Center says this about Sharon's book: 'So much of modern health advice is about marketing a particular perspective that such a balanced and moderate approach is a truly surprising and welcome departure.'

"I agree, and it's the thing that made this book stand out for me. Admittedly, I wish the book had included more perspective on making compassionate food choices. When animals are part of the discussion (and I think they should always be part of the discussion) a vegan diet is the one and only best way to eat. When the focus moves away from animals, then diet-related issues become somewhat less clear. So far, no one has proven that a vegan diet is healthier than other plant-based ways of eating, and it's unlikely that they ever will. So, this isn't a book I would use to promote veganism–it presents a vegan option, but not a vegan imperative–but, it is one I would use to promote healthy plant-based eating for those who are looking for that type of information."

About the author: "Sharon received her Bachelor of Sciences Degree with Honors from Loma Linda University, California. She enjoyed a diverse 16-year dietetics career with experiences as a clinical dietitian, wellness dietitian, chief clinical dietitian, food and nutrition services director, and consultant dietitian." Address: RD (Registered Dietitian), P.O. Box 1052, Duarte, California 91009.

13240. Tsai, Minh. 2012. Re: What is *soi dau-foo* / *sui doufu* ? Letter (e-mail) to William Shurtleff at Soyinfo Center, July 18–in reply to inquiry. 1 p.
• ***Summary:*** Question: In Chinese there is a type of tofu named "sui doufu" (Cantonese "soi dau-foo"). Is this the same as Japanese silken tofu (which has NOT been pressed and has NO separation of curds and whey)? Or is it basically soft Chinese tofu (with a high water content; it has been pressed–but not as firmly as most Chinese tofu–and there is separation of curds and whey)?

Answer: "There are 2 definitions I know of for these terms:

"(1) medium tofu–this is likely the case as Chinese don't generally use plain firm tofu, and the term is often used in Taiwan to be associated with medium textured tofu.

"(2) any tofu that resides in water (generally firm or medium–not silken as GDL is often used and the whole container is filled and there is no space for water). I have heard Chinese referred to getting tofu in tubs that has water as 'sui tofu.'

"Hope that helped! Minh." Address: Founder, Hodo Soy Beanery, 2923 Adeline Street, Oakland, California 94608. Phone: 510-735-4587.

13241. Agranoff, Jonathan. 2012. Re: Tempeh crisis in Indonesia. Letter (e-mail) to William Shurtleff at Soyinfo Center, July 29. 1 p.
• ***Summary:*** "Just thought you might be interested, the whole

© Copyright Soyinfo Center 2013

of Indonesia experienced a 3 day strike by tempe and tofu makers that ended today and brought the country and the government to it's feet. The sudden price increase of US and other foreign soybeans to Indonesia dependant on imported soybeans lead to panic and daily headline attention to the collapse of the tempe industry in Indonesia.

"I happen to be in Jakarta at the moment and have found myself involved in a storm of interviews and media, radio and TV from my current research on local soybean varieties for tempe so I've extended my stay in Jakarta. Most of the interesting media features are in Indonesian, but there's a lot in *The Jakarta Post* and *Jakarta Globe* about this too." Address: M.D., London, England.

13242. Subejo. 2012. Tempeh crisis in a tempeh country. *Jakarta Post* (*The*) (*Indonesia*). July 31. p. 4. http://www.thejakartapost.com/news/2012/07/31/tempeh-crisis-a-tempeh-country.html

• ***Summary:*** "The soaring international price of soybean's, which has been triggered by severe drought in the US, has triggered a significant increase in the domestic price of soybeans, especially at the retailer level. The retail price has exceeded Rp 8,000 (84 US cents) per kilogram, almost double the price of Rp 5,000 one or two months ago.

"Complaints about the skyrocketing price of soybeans have come from tempeh and tofu producers across the nation. There have been reports of the collapse of small-scale tempeh and tofu businesses. The producers are facing a dilemma: on one side the price of soybeans is very high, but on the other side it is almost impossible to significantly increase the price of tempeh and tofu, which are both popular side dishes." Address: Lecturer, Dep. of Socioeconomic Agriculture, School of Agriculture; Researcher at the Center for Economic and Public Policy Studies (CEPPS), Gadjah Mada Univ., Yogyakarta.

13243. Vitasoy International Holdings Ltd. 2012. Annual report 2011/12. Focusing on growth. New Territories, Hong Kong. 182 p. Aug. 30 cm. [Eng; Chi]

• ***Summary:*** All values are in million Hong Kong dollars. The fiscal year ends on 31 March 2010. A graph (p. 4) shows that turnover (sales) has risen steadily each year from 2,441 in 2008 to 3,727 in 2012 (up 12% from 2011).

Gross profit has risen steadily each year from 1,156 in 2008 to 1,651 in 1,760 in 2012 (up 10% from 2012).

EBITDA (Earnings before minority interest, interest expense, income taxes, depreciation, and amortization) has also risen steadily each year from 391 in 2008 to 553 in 2012 (up 3.17% from 2011).

A chart (p. 5) shows that 51% of Vitasoy's sales come from soymilk, followed by 19% from tea and 9% from tofu. By location, 45% of the sales are from Hong Kong and Macao, 27% from Mainland China, and 12% from north America.

A full-page color photo (p. 9) shows Winston Lo, laughing. Address: No. 1, Kin Wong Street, Tuen Mun, New Territories, Hong Kong. Phone: 466 0333.

13244. Nordquist, Ted. 2012. Talking about soy yogurt in the USA (Interview). *SoyaScan Notes.* Sept. 17. Conducted by William Shurtleff of Soyinfo Center.

• ***Summary:*** Market shares of the U.S. soy yogurt market: WholeSoy (75%), White Wave Silk (12-17%), Wildwood, then Stonyfield O-Soy, then Nancy's Yogurt.

Market shares in the U.S. non-dairy yogurt market: WholeSoy, Almond yogurt, and So Delicious coconut yogurt. The So Delicious plant is located in Junction City, Oregon, headed by Mark Brawerman, whose office is in Los Angeles; since they got Nestle as a distributor their sales have increased dramatically. He kind of abandoned soy when his coconut milk products (beverages, ice creams, yogurts, and creamers) went so well. Formerly named Turtle Mountain, they have long made So Delicious and Purely Decadent soymilk Ice Creams. So Delicious Coconut Yogurt (6 oz cup) retails for $1.99 compared with $1.19 for WholeSoy; a lot less money for a lot less nutrition, plus saturated fat.

Up until about 3 years ago, Silk Soy Yogurt was the main competitor to WholeSoy Soy Yogurt; they never sold more units than WholeSoy. The about 3 years ago Silk started losing enormous market share. Ted thinks it was part of the scheme whereby Silk tried to change from certified organic ingredients to so-called "natural" ingredients without changing the UPC codes; it gave them such a bad name that they lost a lot of market share, both in their soymilk and in their yogurts.

Today WholeSoy has about 75% of the soy yogurt market (in cups, not liquid in bottles).

In about 2007 when Ted moved his manufacturing plant from SSI in Turlock, northern California, to the Safeway / Lucerne plant at City of Commerce, southern California, he had to abandon his smoothies because the plant did not have the necessary filling or bottling equipment. First Ted dropped the smoothies, then he had to drop his frozen yogurt–and focused on just the soy yogurt, which is where he is now.

Over the past year or so, WholeSoy has invested a lot in social media by updating their website (www.wholesoyco.com), hiring a woman, Yessica, who does nothing but social media (blogging, Facebook, Twitter, etc.). WholeSoy has gotten a large number of hits on that site. They give people information (such as where they can buy WholeSoy), they can fill out a form so if their store doesn't have it they can request it, they have free coupons, etc.

It is absolutely NOT true (and is never true) that the organisms used to culture yogurt get killed by the acidity of the yogurt. For example, Ted puts 20 billion CFUs (colony forming units, equal to 6-7 quarts of culture) into a 10,000 gallon tank of soymilk. In 9-10 hours those will multiply in the soymilk (they like it so much) to where they are 140

© Copyright Soyinfo Center 2013

billion CFUs in an 8 oz cup. Even at the end of code, after 30 days, there are still about 70 billion per 8 oz cup.

What is the acidity (pH) of yogurt? In most countries outside the United States, the pH ranges from 3.5 to 5, where low is more acidic and where plain milk or soymilk is about 6.8. In the USA the yogurt is less acidic because it is so sweet. The way to sell yogurt (and) food is to add sugar.

Do the organisms that culture yogurt survive in the gastrointestinal tract? Yes. That is what "probiotics" means. A probiotic food benefits the host. Thus the Japanese have eaten little containers of Yakult since the 1935. In the early 1970s doctors at the Karolinska Institute in Stockholm found that *Lactobacillus acidophilus* and *Bifidobacterium bifidus* were essential to good digestion of food, especially after people went off intravenous feeding. In Sweden one can buy A Yogurt (acidophilus) and B Yogurt (bifidus). One is most important in the large intestine and the other is most important in the small intestine. Yet they stop short of saying that one of these bacteria consumed as food survive and live in the intestinal tract.

One should be a skeptic about the benefits of probiotics, says Ted. He has been a member of and on the board of the International Probiotic Association (IPA) since the day it started. The members are mostly big companies such as Danone / Dannon, Chr. Hansen (Milwaukee), Yakult, etc. They have held three world congresses (once every other year), where they invite people to speak. "The science around probiotics is *very* nebulous." In Canada and Europe no health claims are allowed for probiotics. WholeSoy makes no health claims. Address: WholeSoy & Co., 49 Stevenson St., Suite 1075, San Francisco, California 94105-2975; 660 Vischer Ct., Sonoma, CA 95476. Phone: 415-495-2870.

13245. Nordquist, Ted; 2012. Re: Bio of Jonathan Gordon. Letter (e-mail) sent to Henry L. Glasser; Robin Webster; Bill Shurtleff; Jeremiah Ridenour; Laura Tewnion, Sept. 28. 1 p.
• ***Summary:*** Dr. Jonathan Gordon posted a bio / resumé for the IFT symposium. Nancy Chapman (director of SANA) sent a copy of it to Ted Nordquist, with a note ("Reading through the Bios, I have a problem with this Bio") and with the following part of Jonathan's bio highlighted in yellow: "After travelling the globe for two years working with every multinational food manufacturer and many major national brands, he moved to White Wave Inc., where he was in charge of all production and R&D (and invented 'Silk' soymilk)."

Ted replied to Nancy as follows:

"Jonathan was hired by Steve Demos after we started manufacturing the Silk soymilk for Steve in Gustine, California in the Morningstar plant, beginning in January, 1996. In 1994-95 I developed the Silk soymilk using formulations I brought from Sweden, using the Morningstar pilot plant and the help of Laura Tewnion and Ann Shaw. We produced the Silk soymilk for White Wave from January 1996 to March 1998. Then Steve began producing Silk in the then Ador plant in Cedar City, Utah. Jonathan was the QC [quality control] manager [at White Wave] during the last phase of our making Silk and was then involved in the product from that time on. For him to publish in his Bio that he "invented Silk soymilk" is very far from the truth. To get confirmation of this you can contact Laura Tewnion who still works now for Dean Foods" (her e-dress of Laura Tewnion and Jeremiah Ridenour are given).

"Bill Shurtleff and Henry Glasser can also testify to these facts.

"Jeremiah Ridenour, then President of Wildwood Natural Foods can also testify to these facts. Jeremiah took me to Gary Veuve, then Manager of the Morningstar, Gustine plant and we agreed that I would develop the first ESL gable-top soymilk for Wildwood Natural Foods. For the record, it is important to note that the 'first ESL gable-top soymilk' idea was that of Jeremiah Ridenour! I developed soymilk formulations in Sweden, but with Tetra Pak cartons. ESL is exactly the same pasteurization techniques as aseptic Tetra Pak, but in a less stable carton. It requires refrigeration, but with up to 80 days shelf life, making it a 'refrigerated product' and sold in the dairy case. This introduced 'soymilk' in ESL cartons into the dairy case in the US. I believe the good flavor and being in the dairy case is what made soymilk successful in the USA. I would also give Steve Demos credit for his devotion to marketing this product and Jonathan for keeping the flavor good and developing additional variations. The original Silk soymilk had 5 grams of protein per serving, but when the FDA 'Heart Healthy' seal came along, all the soymilks were increased to 6.25g or 7g of protein per serving (just a little less water in the formulation). It is still sold almost exclusively in aseptic Tetra Pak in Europe. Once the product was developed (Morningstar was manufacturing Lactaid in ESL gable top), Jeremiah could not take it to market because of the minimum volumes required. I was running out of money so I took the ESL soymilk to Myron Cooper of Westbrae and Steve Demos. Steve signed onto the ESL soymilk and then developed the 'Silk' brand name. We made the product in the Silk ESL cartons for Steve for two years, selling it to him FOB Gustine, California, before he left us (abruptly)."

"Thanks, Ted.

"P.S. If you would like to forward this email to Jonathan, please do. I would like to see his response!" Address: Boulder, Colorado.

13246. Kessler, Jon. 2012. Re: Early dates for shipping Soyatoo whip topping. Letter (e-mail) to William Shurtleff at Soyinfo Center, Oct. 5. 1 p.
• ***Summary:*** "Bill, I came across an old spreadsheet, with the original shipping data on Soyatoo. I don't think I had sent you the exact dates Soyatoo sales started in North America before.

© Copyright Soyinfo Center 2013

"The first Soyatoo Soy Whip (7 oz pressurized can) was shipped to the US and arrived in the port of New York on Jan. 23, 2006.

"The first Soyatoo Whippable Soy Topping (the aseptic box 10.14 oz): Arrived October 19, 2007.

"The first Soyatoo Rice Whip (7 oz can): Arrived July 13, 2009." Address: Virginia.

13247. Berbille, Hervé. 2012. Re: Current developments with soy yogurt in France. Letter (e-mail) to William Shurtleff at Soyinfo Center, Oct. 10. 2 p.
• ***Summary:*** Missing in your excellent book on History of Soy Yogurts: (1) Senja, a Danone soyourt which was launched after Sévéa failure, but Senja did not work either; it failed in challenging its competitor and leader on this market, Sojasun.

In my opinion, both Danone soyourts (Sévéa and latest Senja) were better than Sojasun's one. The failure of these two products, still in my opinion, can not be assigned to their poor or lowest organoleptic qualities.

I believe that Danone gave up on these two products because they did not reach the expected volume and/or they could not be leader on this segment of market as they use and want to be (at least in France).

Note about Sojade: It is also an (100%) organic soyourt. This brand (also from Triballat as you note it) is dedicated to organic shops only and never sold in supermarket (Sojasun territory). Nutrition & Nature, its competitor, does the same for its product. For example, Soy tofu is sold under the brand "SOY" in organic shops and "Céréal" in supermarkets.

Surprisingly, even if Sojade comes from the same workshop as Sojasun, Sojade, still in my opinion, is significantly better than Sojasun, probably because according to organic settlement, they have to use organic fruits and natural flavouring which probably leads to a more accomplished product. However, more recently, I also notice a significant improvement in the last Sojasun soyourt.

Note: Valles, Colombes (near Asnieres, Seine) -> Vallées, Colombes (near Asnières, Seine) (today: La Garenne-Colombes).

I hope this will help you. Address: Bordeaux, France.

13248. Berbille, Hervé. 2012. Re: Terminology used for tofu, soybeans, and dried yuba sticks in France. Letter (e-mail) to William Shurtleff at Soyinfo Center, Oct. 22. 2 p.
• ***Summary:*** For tofu, Hervé (like Paul Claudel) prefers the spelling *tofou* rather than tofu in French.

For soybeans, he prefers *soja* rather than "soya," which is used in Quebec and other parts of French-speaking Canada. For "yuba" he prefers either yuba or *peau de lait de soja* which resembles *la peau de lait* for the film which appears on the top of dairy milk when it is cooked.

For "dried yuba stick" he believes the best translation would be *baguette de yuba séché.* Address: Bordeaux, France.

13249. Heang, Rany. 2012. Soyfoods in Cambodia (Table).
• ***Summary:*** This table (see next page), created by Rany free of charge at the request of Soyinfo Center, has three columns: (1) The English name. (2) The Cambodian name in Khmer script. (3) Romanization of the Cambodian name.

Trader Joe's Nigari Silken Tofu is smooth, soft & sweet, easy to use for all kinds of preparations. And because it doesn't require refrigeration until after its been opened, you can keep it in the pantry for when the inevitable tofu craving strikes." Use by: Oct. 11, 2013.

Soyinfo Center product evaluation. Flavor: Average. Texture: Does not meet expectation. Label design: Drab, uninspired.

13252. Shurtleff, William; Aoyagi, Akiko. 2012. The book of tofu: Protein source of the future–Now! 2nd ed. Revised. Lafayette, California: Soyinfo Center / www.createspace.com. 344 p. Dec. 22. Illust. by Akiko Aoyagi Shurtleff. Index. 28 cm. [321 ref]

• ***Summary:*** This edition, published as a print-on-demand book by www.createspace.com, is 8 pages longer than any previous edition. The entire Glossary (with all illustrations) from the original 1975 edition is included, as is the updated Preface, the complete "Directory of Tofu Manufacturers" in the Western world (as of Feb. 2001), and the complete bibliography of 321 entries. After the Index is an updated full page of information about Soyinfo Center, then the original photo of Shurtleff and Aoyagi in 1975 from the original edition, and updated page "About the Authors," with new photos of Bill and his son Joey at Yosemite in 1994 and Akiko Aoyagi Shurtleff at the Lafayette Reservoir in 1999.

Then comes the section "Sending Tofu in the Four Directions," with a new photo of William Shurtleff with his tofu master's family at Sangen-ya Tofu Shop during his apprenticeship period, Tokyo, circa 1974. On the last page is (1) Information about the book *Tofu & Soymilk Production* and (2) about the SoyaScan database, which now contains more than 90,000 records from 1100 B.C. to the present. To order a customized search of this remarkable database, contact Soyinfo Center at 925-283-2991 or www.soyinfocenter.com.

Thanks to Akiko for redesigning the front and rear covers, and for skillfully and artistically integrating all the pieces into this newly revised edition. Address: P.O. Box 234, Lafayette, California 94549. Phone: 925-283-2991.

13253. Palmer, Tamara. 2012. Hodo Soy Beanery's 5-Spice Nuggets transcend tofu concerns: Food find. *SF Weekly* (*blog*). Dec. 26.

• ***Summary:*** Hodo's 5-Spice Tofu Nuggets are a substantial and versatile product that carry a surprising amount of flavor. The wrinkled cubes are good hot in a stir-fry as an egg substitute, cold cut up in a salad, or just straight out of the container. They're reminiscent of the wrapper found on Japanese inari (tofu skin pouches stuffed with rice), only more dense.

"The complete collection of tofu nuggetry (which also includes curry flavor) can be found at local retailers such as Rainbow Grocery as well as the Hodo Soy kiosk in the Ferry Building."

"Oakland's Hodo Soy Beanery has single-handedly transformed our opinion about tofu being nothing more than a placeholder in a dish. Founder Minh Tsai left a life in finance to start this company after having a deep inspiration to create the kind of soft and versatile tofu he'd get regularly with his grandfather when growing up in Vietnam. This is the gateway company to help tofu skeptics open their minds."

A large color photo by Tamara Palmer shows 8-10 "Five Spice Tofu Nuggets" in the plastic container in which they are sold.

13254. Sharma, Ratan. 2012. Re: Soymilk and tofu in India. Letter (e-mail) to William Shurtleff at Soyinfo Center, Dec. 26. 1 p.

• ***Summary:*** "Soymilk and tofu business has been growing in India like anything [rapidly]. Soy is really picking up." Address: PhD, Manager, the SoyaCow Centre, KH-177 Kavi Nagar, Ghaziabad 201 002 UP, India.

13255. Kelly, Carla. 2012. Quick and easy vegan slow cooking: more than 150 tasty, nourishing recipes that practically make themselves. New York, NY: The Experiment. xii + 275 p. Illust. (color photos). Index. 24 cm.

• ***Summary:*** Tofu is mentioned on 29 pages in this book, seitan on 29 pages, soy sauce on 28 pages, soymilk on 23 pages, miso on 18 pages, tempeh on 17 pages, fermented black soybeans on 1 page (p. 114), and cooked black soybeans on 1 page (p. 141).

The section on "Soy foods" (p. 26-29) has subsections on: Regular (water-packed, Chinese-style) tofu. Silken (vacuum packed, Japanese-style) tofu, smoked tofu, tempeh, soy curls (or TVP chunks), soy sauce, miso paste, soy creamer. Also: Seitan and vital wheat gluten, Marmite.

What are soy curls? Defatted soy flour extruded in the shape of curls. "I know not everyone has access to soy curls, but they are available online so try to get them if you can. They cook so wonderfully tender and absorb flavor so well. They do not need to be reconstituted prior to use because of the long cooking time. My first preference for a substitute is TVP chunks, then extra-firm tofu or seitan cut into ½-inch cubes."

Special soy recipes: Black bean beans ("I have a container of black bean sauce, a pungent paste made from fermented black soybeans, in my fridge that I often use for sautéing tofu or green beans," p. 114). Soy curl and soybean chili (with "1 cup soy curls" and "Two 15-ounce cans cooked black soybeans, drained and rinsed," p. 141). Address: British Columbia, Canada (born in New Zealand).

13256. McDougall, John A.; McDougall, Mary A. 2012. The starch solution: Eat the foods you love, regain your health, and lose the weight for good! Emmaus, Pennsylvania: Rodale Press. xx + 348 p. [374 ref]

© Copyright Soyinfo Center 2013

• ***Summary:*** This book presents the case against the "Paleo Diet." Dr. McDougall defines starches as follows (p. 7): (1) Grains: Barley, buckwheat, corn, millet, oats, rye, sorghum, wheat, and wild rice. (2) Legumes: Beans, lentils, and peas. (3) Starchy vegetables: Carrots, Jerusalem artichokes, parsnips, potatoes, salsify, sweet potatoes, winter squashes (acorn, banana, butternut), yams. The least processed starches are the best; brown rice is better than white.

"You've probably heard about the benefits of a plant-based diet–one that reduces or eliminates animal foods like meat, dairy, and eggs. This concept does not go far enough. Without the addition of starch, a diet of low-calorie leafy greens like lettuce and kale, crucifers like broccoli and cauliflower, and fruits like oranges and apples will leave you feeling hungry and fatigued" (p. 8).

The Glycemic Index idea is incorrect (p. 160-63).

Soy foods in Asian diets (p. 141). Not all soy foods are the same: The fake ones and the highly refined ones are not eaten in traditional East Asia diets. Those which are eaten are edamame (green vegetable soybeans boiled in their pods), soy milk, soybean sprouts, soy sauce, soy flour, tempeh, tofu, yuba, okara, miso, and natto. "A traditional family in Japan or China gets fewer than 5% of their daily calories from soy." Fake soy foods (highly processed) cause harm (p. 142-44). The most highly processed soy ingredient is soy protein isolates–to be avoided. Concerns over soy lead to changing recommendations–especially for infants (p. 144-45). Which soy foods are healthiest (p. 196). Address: 1. M.D,. Both: Santa Rosa, California. Phone: (707) 538-8609.

13257. Rushford, Jaime Salas; Benno, Yoshimi. 2012. Morinaga BB536: Japan's leading clinically proven probiotic. Salt Lake City, Utah: Woodland Publishing. 52 p. Illust. 22 cm.
• ***Summary:*** Morinaga BB536 is a probiotic, a proprietary strain of *Bifidobacterium longum* named *Bifidobacterium longum* BB536. It is highly stable and does not cause adverse effects.

Contents: Probiotics: What are probiotics?, It's about balance, why we need probiotics. types of probiotics, how probiotics work, the life and times of BB536.

Introducing Bifidobacteria and BB536: Bifidobacteria and intestinal health, what Bifidobacteria don't do, Bifidobacteria in the intestinal tract.

Benefits of *Bifidobacterium longum* BB536: Bifidobacteria, BB536 and intestinal health, gastrointestinal disorders, BB536 maintains intestinal health, diarrhea, constipation, probiotics and irritable bowel syndrome, probiotics and ulcerative colitis, probiotics and Chron's Disease, BB536 and allergies, BB536 and cholesterol, probiotics, BB536 and cancer, Bifidobacteria and infections in premature infants BB536 and bone strength.

Prebiotics: Feed your beneficial bacteria: Fructooligosaccharides, inulins, other prebiotics, benefits of prebiotics, *Bifidobacterium longum* BB536 and safety, is BB536 safe?, BB536 in functional foods.

References: General, intestinal health and gastrointestinal disorders, allergies, cholesterol, cancer, influenza, premature infants, osteoporosis, safety and stability, prebiotics.

• ***Summary:*** Exquisite! Wonderful writing. Superb photography. Get this book–now! "The only vegan cookbook that celebrates eating and enjoyment rather than emphasizing the politics of a vegan lifestyle,..."

The word "tofu" appears on 38 pages in this book, "soy" on 13 pages, "soy sauce" on 5 pages, and "yuba" on 3 pages. The headnotes to Yuba spring rolls (p. 128-30) states: "Most Westerners aren't familiar with yuba, but I have a feeling that's about to change. A traditional food from China and Japan, yuba is the skin the forms on the surface of heated soymilk. It is gently lifted off the simmering soymilk in sheets and either used fresh or dried and then reconstituted. It has a slightly nutty flavor and a chewy texture." It is available at most larger Asian groceries. If unavailable, packaged egg roll wrappers make an acceptable substitute.

A full-page color photo (p. 129) shows sheets of yuba, a whole gingerroot, and several bottles of soy sauce. Address: Graphic designer, photographer, writer, and cook with a passion, Los Angeles.

13259. Brown, Lester R. 2013. China's rising soybean culture reshaping Western agriculture. *www.earthpolicy.org.* Jan. 8. www.earth-policy.org/ data_highlights/ 2013/ highlights34. [1 ref]
• ***Summary:*** "The soybean was domesticated some 3,000 years ago by farmers in eastern China. But it wasn't until well after World War II that the crop gained agricultural prominence, enabling it to join wheat, rice, and corn as one of the world's four leading crops.

"This rise in the demand for soybeans reflected the discovery by animal nutritionists that combining 1 part soybean meal with 4 parts grain, usually corn, in feed rations would sharply boost the efficiency with which livestock and poultry converted grain into animal protein. As China's appetite for meat, milk, and eggs has soared, so too has its use of soybean meal. And since nearly half the world's pigs are in China, the lion's share of soy use is in pig feed. Its fast-growing poultry industry is also dependent on soybean meal. In addition, China now uses large quantities of soy in feed for farmed fish.

"Four numbers tell the story of the explosive growth

© Copyright Soyinfo Center 2013

of soybean consumption in China. In 1995, China was producing 14 million tons of soybeans and it was consuming 14 million tons. In 2011, it was still producing 14 million tons of soybeans–but it was consuming 70 million tons, meaning that 56 million tons had to be imported."

Graph #1 (source USDA) shows "Soybean production, consumption, and imports in China, 1964-2011." Significant imports began in about 1995 and have increased steadily and dramatically since then.

"China's neglect of soybean production reflects a political decision made in Beijing in 1995 to focus on being self-sufficient in grain. For the Chinese people, many of them survivors of the Great Famine of 1959-61, this was paramount. They did not want to be dependent on the outside world for their food staples. By strongly supporting grain production with generous subsidies and essentially ignoring soybean production, China increased its grain harvest rapidly while its soybean harvest languished."

Graph #2 (source USDA) shows "Grain and soybean production in China, 1960-2011." Grain has increased steadily–although it decreased sharply during the period 1998-2005. Soybean production has remained small and static. Production peaked at 17.4 million tons in 2004.

"Hypothetically, if China had chosen to produce all of the 70 million tons of soybeans it consumed in 2011, it would have had to shift one third of its grainland to soybeans, forcing it to import 160 million tons of grain–more than a third of its total grain consumption. Because of this failure to expand soybean production over the last 15 years or so, close to 60 percent of all soybeans entering international trade today go to China, making it far and away the world's largest importer. As more and more of China's 1.35 billion people move up the food chain [eat more meat], its soybean imports will almost certainly continue to climb.

"Only one tenth of the soybeans used in China is consumed directly as food such as tofu and soy sauce. The other 90 percent is crushed, separating the oil and meal. In China, as elsewhere, the oil is a highly valued cooking oil and the meal is widely used in animal feed rations.

"For the world as a whole the pattern of soybean consumption is similar. To most consumers, the soybean is an invisible food, one that is embodied in many of the products found in any refrigerator. Clearly, the soybean is far more pervasive in the human diet than the visual evidence would indicate.

"The world demand for soybeans is increasing by some 7 million tons per year. It is being driven primarily by the 3 billion people who are moving up the food chain, consuming more grain- and soybean-intensive livestock products. Population growth is also driving up the demand for soybeans, either indirectly through the consumption of livestock products or directly through the consumption of tofu, miso, and tempeh. In the two leading consumers of soybeans, the United States and China, populations are growing by 3 million and 6 million per year, respectively And finally, an increasing demand for soy oil for biodiesel is also ramping up soybean use.

"The principal effect of skyrocketing world soybean consumption has been a restructuring of agriculture in the western hemisphere. In the United States there is now more land in soybeans than in wheat. In Brazil, the area in soybeans exceeds that of all grains combined. Argentina's soybean area is now close to double that of all grains combined, putting the country dangerously close to becoming a soybean monoculture. Together they account for over four fifths of world soybean production. For six decades, the United States was both the leading producer and exporter of soybeans, but in 2011 Brazil's exports narrowly eclipsed those from the United States."

Graph #3 (source USDA) shows "Area harvested for wheat, corn, and soybeans in the Western hemisphere, 1960-2011."

"Although most of the growth in the world grain harvest since the mid-twentieth century is from the tripling of grain yield per acre, the 16-fold increase in the global soybean harvest has come overwhelmingly from expanding the cultivated area. While the area expanded nearly sevenfold, the yield scarcely doubled. The world gets more soybeans primarily by planting more soybeans. Therein lies the problem.

"The question then becomes, Where will the soybeans be planted? The United States is now using all of its available cropland and has no additional land that can be planted to soybeans. The only way to expand soybean acreage is by shifting land from other crops, such as corn or wheat. In Brazil, new land for soybean production comes from the Amazon Basin or the cerrado, the savannah-like region to the south.

"Put simply, saving the Amazon rainforest now depends on curbing the growth in demand for soybeans by stabilizing population worldwide as soon as possible. And for the world's more affluent people, it means eating less meat and thus slowing the growth in demand for soybeans. Against this backdrop, the recent downturn in U.S. meat consumption is welcome news.

For further reading on the global food situation, see *Full Planet, Empty Plates: The New Geopolitics of Food Scarcity,* by Lester R. Brown (W.W. Norton: October 2012). 13260. Sunrise Soya Foods (Website printout–part). 2013. www.sunrise-soya.com/ Jan. 10.

• ***Summary:*** "Our history: Sunrise Soya Foods humbly began in 1956 when founder Leslie Joe and his wife Susan,

© Copyright Soyinfo Center 2013

newly immigrated from China, realized that there was a demand for tofu in the Chinese community of Vancouver. Leslie began by making small batches of creamy tofu at the back of his grocery store, Sunrise Market, now a well-known Vancouver landmark with its masses of fresh produce and bustling market enticing shoppers from around the city. The tofu making operation continued to grow in size throughout the 60s and the 70s, as demand increased and consumer awareness of the importance of a healthy diet grew. Sunrise tofu quickly developed a loyal following in the community.

"The current Sunrise Soya manufacturing plant was purchased in 1983, with 5,000 square feet of factory space and in 1985, the first packaged Sunrise tofu products were available at supermarket chains throughout Western Canada. In the 1990s, with an expanding product portfolio, the factory and warehouse space grew to 35,000 square feet. In 1999, Sunrise became one of the first companies to promise exclusively non-GMO soybeans in its products. A new manufacturing plant opened in Toronto in 2000, to meet the growing demands of the North American market. The Sunrise lineup expanded to meet this burgeoning consumer demand, introducing organic products (Soyganic), a vast range of traditional ethnic varieties and a quick, ready to eat tofu line (Pete's Tofu).

"From a small, one-man operation to the largest tofu manufacturer in Canada employing over 200 Canadians, Sunrise Soya Foods has changed a lot over the years. What hasn't changed is the approach to business and the commitment to the community. Despite the company's success, Peter Joe, the founder's son, tofu production hand (in his teenage years) and current CEO, still applies a small business approach to running the family company. Little did Leslie Joe realize, as he was carting buckets of tofu around Vancouver's Chinatown in the 1950s, that he was sowing the seeds for a true Canadian success story." Address: 729 Powell St., Vancouver, BC V6A 1H5, Canada.

13261. Roth, Anna. 2013. Soon you'll be able to get tofu burritos at Chipotle: Vegetarian. *SF Weekly* (*blog*). Feb. 20.
• ***Summary:*** Wikipedia says: "Chipotle Mexican Grill, Inc. is a chain of restaurants located in the United States, United Kingdom, Canada, and France, specializing in burritos and tacos. Its name derives from chipotle, the Mexican Spanish name for a smoked and dried jalapeño chili pepper.

"The restaurant is known for its large burritos, assembly-line production, and use of natural ingredients." The company was founded by Steve Ellis in 1993. "With more than 1400 locations in 43 states, Washington, D.C., 2 Canadian provinces, England, and France, the chain had net income in 2012 of US $278 million and a staff of 37,310 employees."

Anna Roth writes: "In what we can only assume is a bid to take a bigger share of the fast-casual dining market, Chipotle has announced a tentative new vegetarian entree option. Beginning February 12, the chain will begin testing tofu 'sofritas' burritos in seven of its Bay Area restaurants. The organic, GMO-free tofu will come from Oakland's Hodo Soy Beanery and will be shredded and braised with chipotles, roasted poblanos and other spices for a filling the fast-casual chain hopes will appeal to both vegetarians and vegans. Sofritas will be available in burritos, tacos, burrito bowls and salads.

"Sofritas is the spice blend used to season the shredded tofu, and the dishes are braised with chipotle chilies, roasted poblano peppers, and a blend of aromatic spices. In Spanish cuisine, sofrito is created via a sauté of garlic, onion, peppers and tomatoes. The sofritas tofu is made in Oakland and is free of any GMOs."

A follow-up blog on this same site, "Taste testing Chipotle's new Hodo Soy Tofu Burrito," by Mary Ladd (Feb. 20) states: "This month in the Bay Area, Chipotle is testing a sofritas Hodo Soy tofu-based menu of burritos, tacos, burrito bowls and salads that is vegetarian- and vegan-friendly."

Update: As of May 7 Sofritas vegan protein made from Hodo Soy's tofu is available in all Chipotle's Northern California stores. Chipotle is actually advertising this in print and on the radio, and naming Hodo as their tofu supplier. Apparently the new product has been a success, which is also good news for Hodo Soy.

This comprehensive book gives the single best picture of the growing industry, worldwide, opposed to genetic engineering. Address: Editor / Publisher, P.O. Box 436, Fairfield, Iowa 52556. Phone: 1-800-854-0586.

13263. Soyatech, LLC. 2013. Soya & Oilseed Bluebook 2013: The annual directory of the world oilseed industry, online at www.soyatech.com. Bar Harbor, Maine: Soyatech. 336 p. Jan. Comprehensive index. Advertiser index. Statistical conversions. 28 cm.
• ***Summary:*** This is the 7th year in a row that the *Bluebook* (a $95 value) has been sent free of charge to qualified industry members. On the front cover is a large round color photo collage of four of the major oilseeds, plus harvesting with a combine and shipping in containers.

The 14 oilseeds covered in this book are (alphabetically): Canola, coconut, corn, cottonseed, flaxseed, hemp seed, jatropha, linseed, palm, peanut, rapeseed, safflower, soya, sunflowerseed–the same as last year.

On the inside front cover is a color ad for Omega-9 Oils (from Dow Agrosciences). Other full-page ads related to soyfoods are: ADM, AOCS, French Oil Mill Machinery Co. and Insta-Pro International.

On the rear cover is a full page color ad from Natural Products Inc. (NPI, Grinnell, Iowa), makers of innovative ingredients for soymilk and tofu to cakes and cookies. They are the makers of Scotsman's Mill ingredients.

Chris Erickson is CEO. Mark Dineen is president. Keri Hayes is publisher and operations director. Address: P.O. Box 1307, 19 Clark Point Rd., Suite 112, Southwest Harbor, Maine 04679. Phone: 207.244.9544.

13264. Liptak, Adam. 2013. Supreme Court appears to defend patent on soybean. *New York Times.* Feb. 19.
• ***Summary:*** "The question in the case, Bowman v. Monsanto Company, No. 11-796, was whether patent rights to seeds and other things that can replicate themselves extend beyond the first generation." Monsanto had sued Bowman, a farmer age 75, for buying seed from an elevator filled with a mix of seeds (some of which were almost sure to be Roundup Ready) then planted them.

Justice Stephen G. Breyer said that among the things Mr. Bowman could do with the seed he had bought from the grain elevator was to feed it to animals, feed it to his family, or "make tofu turkeys." However he could not make copies of a patented invention. The U.S. Attorney General's office (i.e., the U.S. government) filed a brief in support of Monsanto.

Note: This may be the first time that tofu was mentioned during oral arguments at the Supreme Court.

13265. Warner, Melanie. 2013. Pandora's lunchbox: How processed food took over the American meal. New York, NY: Scribner. 267 p. *
• ***Summary:*** The author started researching this book when she discovered that a piece of individually wrapped cheese retains its shape, color and texture for years. Processed foods account for roughly 70% of our nation's calories.

Fermented foods made from whole soybeans include tempeh, natto, and some kinds of soy sauce. Nonfermented foods made from whole soybeans include edamame. There's nothing wrong with a little soybean oil–if it's unhydrogenated and unheated. Highly processed creations include soy protein isolates and concentrates.

Soy is mentioned on pages ix, xiv, 11, 102, 115, 119, 120, 124-26, 128-49, 151, 153-54, 156, 158-62, 171-74, 186, 236-38, 240-41.

Edamame (unprocessed): p. 159-60. Tempeh (a whole food): p. 159-60. Natto (a whole food): p. 159-60. Address: Former New York Times business reporter.

13266. He, Gene. 2013. Re: Nature Soy, Inc.: Its history and products 713 North 10th St., Philadelphia, PA 19123. 10 p. + 3 inserts. 28 cm.
• ***Summary:*** In 1990 Sunkee Tofu Food Company (*Xinji Doufu Shipin Gongsi* in pinyin) started in Pennsylvania, located at 448 North 12th St., Philadelphia, a few blocks from their present location. The founder was Wen Yatsun, who was born and raised in China but had been educated in the USA; he previously been an electrician and had owned and operated a restaurant in Philadelphia. Being in the restaurant business, he saw that there was a demand for tofu but no local manufacturers. His business thrived and grew very nicely. Sunkee mostly served customers in Philadelphia, especially restaurant customers.

The company's original products, sold under the Sunkee brand, were basic tofu products–the types popular in the Asian-American market: Soft tofu, firm tofu, silken tofu, extra firm tofu, and five-spice extra firm. Also: Soymilk (plain or sweetened, ½ gallon), soymilk (sweetened, 16 oz = 1 pint). In about 1992 the company introduced soy puffs (deep fried tofu puffs).

In 1998 Mr. Wen decided to establish a new company, Nature Soy, Inc. (*Datian Doupin Chang,* in pinyin) and two new brands: "Nature's Soy" and "Datian" (two Chinese characters meaning "Nature Soy"). Production of tofu was moved into the current location (713 North 10th Street in Philadelphia), with about ten times as much square footage and with a very modern, advanced tofu production line. A space in the new building was constructed for an R&D laboratory; it began operation in late 1998. That laboratory improved the sanitation of the entire production facility.

In 2002 the following specialty flavored products were introduced to the market: (1) Hot & spicy flavored tofu, 8 oz. (2) Curry flavored tofu, 10 oz. (3) Oriental sauce tofu, 10 oz.).

In 2003 Gene joined the company as a partner with Mr. Wen. They both own the company and work there every

© Copyright Soyinfo Center 2013

day. Gene developed the company philosophy: "We take soy products seriously!" and "Healthier living, healthier life." At this time the company began to do a little bit of marketing to reach outside the Asian-American community. It was also for this reason that the company began to develop various pre-marinated types of tofu, sliced tofu, 5-minute tofu (a cake of tofu with a packet of seasoning that takes about 5 minutes to cook), etc. Gene joined the company in large part to make sure the company meets all sanitation and modern food processing regulations. Born and raised in China, his educational background is in dairy products in the USA. He was one of the few Chinese cheese makers. He earned his PhD degree from Utah State University, and was especially interested in fermented dairy products. After that, he went into the fermentation industry.

In about 2004 the R&D lab developed tofu that could be sliced as thin as 1/16 of an inch, and from this they developed a new product: organic deli-style pre-sliced tofu (see photo from 2005 company brochure). The product was pre-seasoned like a lunch meat. As far as we know, this was the world's first product of this type. They supplied it to Giant (a supermarket chain) and also to Walmart. Gene's original intention was to replace those lunch slices which contain a lot of low-grade materials–as well as cholesterol, saturated fat, etc. One big problem at the time was that the company did not have enough marketing money. Unfortunately, the demand for this product was not very great and it had to be discontinued

Maybe the product was ahead of its time. Gene has developed a related product that is even more interesting than the original thinly sliced tofu. It is like a block of cheese, where a deli or restaurant can put it on their own cheese slicer to make fresh tofu slices to any thinness they desire. The company did a focus group on that product with a group of vegetarians and the loved it, but it is not yet on the market.

Competitors: The biggest are House Tofu (which has a new plant in New Jersey), Vitasoy / Nasoya, and Pulmuone [which has a relatively new plant in Tappan, New York]. Nature Soy's product line is much bigger than that of House, which is various forms of water-packed tofu.

Nature Soy has been growing every year, without one year in which sales decreased, even during the Great Recession that started in 2008 and even during the anti-soy campaign on the Web. Of the latter Gene says simply, "They are crazy."

In about 2004 the wheat gluten based vegetarian meat substitutes were produced for commercial sales. Also in 2004 fried tofu (8 oz was introduced).

Mr. He knows and likes fermented tofu. He says that if you blend it with other ingredients (such as garlic) to make a fermented tofu spread, where it serves as the source of flavor, it makes a great spread–as for crackers. A lot of fermented tofu is sold in the USA at Asian food stores, but essentially all of it is imported. It is almost impossible for a domestic manufacturer to compete with the low imported prices.

Gene believes that Nature Soy has a bright future. Address: 713 North 10th St., Philadelphia, Pennsylvania. Phone: 215-.

13267. Tien, Jessica. 2013. Re: Update on the history of Rosewood Products, Ann Arbor, Michigan. Letter (e-mail) to William Shurtleff at Soyinfo Center, Feb. 27–in reply to questions.. 1 p.

• ***Summary:*** "On Oct. 24, 2006, Bruce G. Rose sold the company to Rodney Dean, doing business as Rosewood Products at the same location (738 Airport Blvd. Ann Arbor, Michigan 48108). No article announcing the sale could be found.

"Bruce G. Rose passed away on March 15, 2007 (according to one employee who still working here at Rosewood). See attached document.

"On Feb 20, 2009, Rodney Dean sold the company to Phil Ye; it was still doing business as Rosewood Products at the same location. No article announcing the sale could be found.

The attached document (online) reads: "Local farewells: Bruce G. Rose, Pinckney, Michigan (1946-2007): Bruce was a loving husband for 35 years, father to 3 children, entrepreneur and founder of Rosewood Products and Tofu International in Ann Arbor since 1976.

"His Family: Bruce is the loving husband of Ruth (Gonynor) whom he married on February 4, 1972 in Windsor, Ontario. They raised three sons who survive. Demian (Christina) of San Francisco, California, Scott of Ft. Myers, Florida, and Jeff (Denise) of Raleigh, North Carolina. Also surviving is his brother Douglas of Denver, Colorado.

"A simple farewell will be held at 12:00 Noon, Tuesday, March 20, 2007 at Borek Jennings Funeral Home, Hamburg Chapel." Address: Secretary, Rosewood Products, 738 Airport Blvd., Ann Arbor, Michigan 48108.

13268. Guardino, Lorraine. 2013. How Soy City Foods in Toronto, Ontario, Canada, became Sol Cuisine? (Interview). Letter (e-mail) to William Shurtleff at Soyinfo Center, Feb. 28. 1 p.

• ***Summary:*** In 2002 Dror Balshine bought Soy City Foods (of Toronto, which had been founded in 1980) and four of people remained with Sol Cuisine for a two year period: John Esquivel, Production Manager; Lorraine Guardino, Sales Manager; Charlie Lund, Production; Peter Ness, Production; Of these only John and Lorraine remain working for Sol Cuisine. Lorraine is still in Sales and John is still Production Manager. Len Bugyra now runs a successful insurance benefits company. Paul Whitehead passed away several years ago and I have no idea what Jon Cloud is up to. Patrick Lorraine's husband of 30 years but he has not been with Soy City since 1980. Lorraine started working part

© Copyright Soyinfo Center 2013

time (while our children were young) in 1983 at the front of the "Soyateria" as it was called and then began working in production, moved on to sales and have been doing that ever since. John Esquivel has been our Production Manager ever since Jon Cloud left Soy City. Golden Age Foods which was Soy City Foods and the Vegetarian Restaurant, closed its doors when we were purchased from Sol Cuisine.

"Patrick was the first Manager. He was also a welder which came in handy when he built the first tofu shop we had. Wow are we going back! Funny, Lorraine just recently was going through some old files here and found your book, Patrick used it as a bible when he built the first tofu shop and his notations are all through the very weathered copy we have. Lorraine took it home for him.

"Do you know Haro Wehrmann? He grows our Certified Organic soybean for us here in Ontario."

All of the products that Sol Cuisine presently sells contain soy, and many have soy as the main ingredient. All are vegetarian. They sell to both retail and foodservice. They sell in Whole Foods and Raleys in California, People's Co-op in San Francisco. Their three most popular products are tofu, burgers (various types), and breakfast patties. www.solcuisine.com. Address: Sales Manager, Sol Cuisine, 3249 Lenworth Drive, Mississauga, ONT L4X 2G6 Canada. Phone: 905-502-8500 x 221.

13269. Guardino, Lorraine. 2013. How Soy City Foods (in Toronto, Ontario, Canada) was transformed into Sol Cuisine by Dror Balshine (Interview). *SoyaScan Notes.* Feb. 28. Conducted by William Shurtleff of Soyinfo Center.
• ***Summary:*** During the 1970s Lorraine was part of a meditation group–and doing other "weird" things; she was not on the scene until 1983, but she is familiar with the early history of Soy City Foods and Sol Cuisine.

In 1980 Soy City Foods started as a tofu company (at 2847 Dundas Street West), in order to supply their very successful restaurant, named The Vegetarian Restaurant, which had opened in 1976 at 542 Yonge Street by Wellesly; that was their first little company. It was one of the first vegetarian restaurants in Toronto; Annapurna was the other. However, the restaurant simply couldn't find a source of good tofu.

The Vegetarian Restaurant was established by Golden Age, Inc., a group of 28-30 like-minded young friends. Each person invested about $1,000 to get it started. Being young, everyone had a lot of energy. The Vegetarian Restaurant was very profitable–initially–and that money enabled it to start Soy City Foods. It was worker owned–a cooperative. The only original restaurant manager Lorraine knows of and can confirm was Paul Dunlop.

Pat Guardino was hired to build the tofu shop because he was a welder. Pat went down to New Hampshire and apprenticed / studied with Jay and Pat Gibbons, owners and operators of Crystal Springs Tofu Shop (renamed North Country Soyfoods by summer 1980) in Bethlehem, New Hampshire; during the week he was there, he learned the basics of making tofu and tofu equipment.

The goal of Soy City Foods shop was to bring Toronto a "clean protein." The main owners of the shop ended up being Pat Guardino & Paul Whitehead. However everyone who worked at the Soy City Foods owned it, and all the capital came from these workers.

Also in 1980 a second The Vegetarian Restaurant was opened on Dundonald Street (which is just off of Wellesly Street) along side of Soy City Foods. The owners / workers called the new restaurant the "West End" and the original one the "Downtown." Both restaurants operated together for about 15 years–from 1980 until about 1995 or 1996, when the Downtown closed, because of dwindling profits and aging staff. When this restaurant had opened at its original downtown location in the mid-1970s there were lots of profits, because the restaurant was very unique. But as the years went on, almost every restaurant in Toronto began to offer good vegetarian food. So the uniqueness dwindled quite a bit as vegetarian food became more widely available. Moreover, leasing and renting rates skyrocketed in the downtown Toronto area. Soy City developed an excellent distribution network and several of their veggie burgers had gone into the larger grocery store chain in Ontario. They were also selling across Canada in foodservice, which ended up being Soy City's largest market. In Canada, in the university market, it was a requirement that each university provide two vegetarian options for breakfast, lunch, and dinner. That became the driver for Soy City's growth at the time. They ended up selling their tofu in bulk to the university market, and one of the contract catering companies sent their chefs to the west end Vegetarian Restaurant for a week and learned how to cook vegetarian cuisine. Soy City developed two veggie burgers for them and they chose which one they preferred–which was called the Soy City Veggie Burger and which contained both soybeans and okara. That is still sold by Sol Cuisine, but it is now called the Almond Grain Burger. Soy City made an ongoing effort to use okara in foods. "It was very difficult for all of us who worked there to see such a beautiful protein and fiber be thrown away. So our Soysage used a lot of okara, as did a falafel and the veggie burger."

Why did Soy City Foods want to sell? The worker population was aging and they were outgrowing the very small facility as the demand for tofu and veggie burgers steadily grew. Basically the worker-owners made the decision to sell rather than to invest more money and continue on at low wages and personal sacrifice. By 2002 two-thirds of the company's sales were via foodservice. Yet total sales were just under $1 million (Canadian).

In 2002 Dror Balshine bought Soy City Foods, He was a young entrepreneur, in his early '30s. He already had a business in Toronto named Second Nature that sold

© Copyright Soyinfo Center 2013

veggie burgers and dry veggie burger mix. He did not have a manufacturing facility; his products were co-packed for him. He was already dedicated to vegetarianism and he used textured soy protein concentrate in his burgers. Lorraine, who was the sales manager of Soy City Foods, already knew Dror who she often met at food shows. She called him and discussed the possibility of his buying the company. He was interested and before long he decided to buy it.

One of the first things Dror did was to change the name to Sol Cuisine. The tofu continued to be sold under the brand / banner of Soy City Foods, and it is only now that the Soy City Foods name is being phased out. This tofu began to be made with organic soybeans in about 1985 and that tradition continued under Sol Cuisine. Shortly after buying Soy City Foods, Dror moved it to Mississauga (5715 Coopers Ave., Unit 1), just west of Toronto. Shortly after this move was completed, Soy City Foods' food manufacturing plant at 2847 Dundas Street West in Toronto, was closed. They made tofu, tempeh, veggie burgers, falafel, etc. at the new, lower-rent and lower-tax location. Later, the company needed a larger facility, so in Feb. 2008 they moved to their present address at 3249 Lenworth Drive, Mississauga (about 10 minutes drive south of 5715 Coopers Ave.). All foods that Sol Cuisine now sells (except the Sol-Dog, a veggie hot dog) are made at the plant on Lenworth Drive. The Sol-Dog is sold only to foodservice. When they moved to Lenworth Drive, they became a HACCP facility and also stopped making tempeh; the cross contamination of the tempeh spores was too strong. Dror is committed to making only vegan foods and to verification by the non-GMO Project (they are very thorough) and to organic when possible. And, all but one of their products are now gluten-free.

Foods shown on a 2005 leaflet include T-Ribz (now called Organic Barbecued Ribz; made from their own tofu, sliced put in a package with their own sauce on top; sold fresh in Canada and frozen in the USA for about 18 months). Organic T-Nuggets (cubed tofu that was marinated, breaded and baked; never sold as a retail product, no longer made). Organic Sol-Ground (now the Veggie Crumble), 3 vegetarian burgers (they now make a total of 5 soy burgers in the retail market; the main ingredient is verified non-GMO TVP, made by ADM).

What was the Soyateria? It was Soy City's soy deli in Toronto that opened in April 1981. The public could come in and have a pita bread sandwich, or buy bulk tofu. There was a little menu. One popular dish was tofu, coated in Engivita nutritional yeast, then sauteed on the grill with sauteed onions and mushrooms and a sauce. The Soyateria did a lot of experimentation to learn what recipes and products people liked. They made tofu cheesecakes, tofu pumpkin pie, bulk soymilk, soft soy ice cream, etc. Lorraine began working there part time in 1983 (it was a short walk from her home) while raising a family. She left her good-paying job at the Royal Bank to work at the Soyateria! It was a lot of fun. But after 5-6 years it went out of business.

John Escavel, who is still production manager at Sol Cuisine, started working at Soy City Foods in about 1980 or 1981. He has an excellent memory, so he is a good person to talk with about the company's history. Address: Sales Manager, Sol Cuisine, 3249 Lenworth Drive, Mississauga, ONT L4X 2G6 Canada. Phone: 905-502-8500 x 221.

13270. Cloud, Jon. 2013. How John got involved with Soy City Foods in Toronto, Ontario, Canada (Interview). *SoyaScan Notes.* March 6. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Jon was first introduced to tofu in the 1960s in Southeast Asia. Golden Age Foods–a religious organization and a collective–was the parent company of Soy City Foods, and eventually owned 2 restaurants and a deli. Soy City Foods was started in 1980 as part of the religious group. Pat Guardino, a welder, built the tofu-making equipment. Jon arranged for Pat to be trained in making tofu by Jay and Pat Gibbons, founders and owners of Crystal Hills Tofu Shop in Bethlehem, New Hampshire. Jon had previously learned how to make tofu at that same tofu shop, and at that time he became very interested in okara. Later in 1980, when Jon arrived in Toronto, Canada, Soy City Foods was "having a terrible time financially, as well as from a tofu product standpoint." Trying to build your own tofu equipment is very difficult and this equipment did not work well. Pat struggled with the shop for about 4 months. The cycle time (to make one batch of tofu) was much too long–2 to 3 hours to cook the soymilk. "It was a fiasco." The long, low-temperature cooking of the soymilk to deactivate the trypsin inhibitor caused the proteins to stick to the side of the cooker, which produced a substance very similar to Naugahyde–an American brand of artificial leather. People used to ask Jon how many Naugas it took to make a Naugahyde jacket.

Throughout this time Jon was still in the United States; he knew of these problems because he talked to people at Soy City Foods by phone. In 1972 Jon bought a farm in Vermont; that same year he started a natural food distribution company which he named Cloud Mountain. Jon was farming organically (on about 40 acres as a side job) in Vermont and he had his own health food distribution company. Jon also grew some short-season soybeans. At one point he went to the University of Illinois at Urbana-Champaign and studied agronomy and how farmers grew crops before 1938–when the application of nitrate fertilizers started. Jon did not want to use any chemicals on his land. He was also one of the founders of Community College of Vermont, which became State College of Vermont.

In 1980 Jon's wife decided to join Golden Age in Toronto, so the two decided to move with their daughter to Canada. Jon never returned to his beautiful farm in Vermont. He and his family spent two months in Buffalo waiting for their application for a visa to reside in Canada was

© Copyright Soyinfo Center 2013

approved. During this time he distributed Soysage (whose main ingredient was okara, made at Crystal Hills in New Hampshire), honeys, apple juice / cider, etc. When Jon and his family arrived in Toronto, he went to Soy City Foods. Things were still not going well. "They were getting killed financially, and people were just standing around waiting for soymilk to boil." They had a meeting and asked him if he would like to "take over" Soy City Foods. He said that he would, since he could see that someone needed to. He and Pat Guardino are really good friends; "I love him dearly and he has a Mentat (brilliant) mind." At that time Pat, who was really a welder at heart, bowed out, and let Jon take over. Jon streamlined the tofu-making operation until they had a cycle time of about 23½ minutes. But it was hard work. "You couldn't fire anyone; it was a guaranteed job."

After things began to run more smoothly, Jon spent more and more of his time in the fields recruiting soybean growers, contracting with them, and training them how to grow soybeans organically–and also how to grow all of the crops (including soybeans, wheat, open-pollinated corn, winter rye, buckwheat, and spelt) in the 7-year rotation he had developed. Crop rotation is essential, he has learned, for organic farming to really work. Everyone wanted Soy City Foods to use organic soybeans. Jon loved this organic work, and it enabled him to apply everything that he had learned in Illinois and Vermont. He organized 32 workshops, developed 80 slides, and 82 fact sheets. Jon also contracted to buy all the various crops these farmers grew. Out of that came Cloud Mountain (of Canada), his company that sold organic crops; he sold that company in 1992 to SunOpta. Jon contributed heavily to the financial construction of Soy City Foods.

At one point the Seed Breeders of Canada asked Jon to join their registration committee, named the Ontario Oil and Protein Seed Crop Committee; he was on it for 8 years. There he met Dr. Harvey Voldeng (a plant breeder at Agriculture Canada, Central Experimental Farm, Ottawa) and Gary Ablett (a soybean breeder at Ridgetown College) who became his mentors and friends.

Jon left Soy City in about 1993, shortly after his divorce in 1992. He took Cloud Mountain with him.

Jon has earned three masters degrees and is now working on a 4th at the University of Guelph. Address: Cloud Holding Inc., 342 Indian Rd. Cres., Toronto, ONT M6P 2H1 Canada. Phone: (905) 939 2962 or (416) 762-0940.

13271. Malarkey, Ron. 2013. Re: History of R&R Foods and their Clear Spot products Letter (e-mail) to William Shurtleff at Soyinfo Center, March 12. 1 p.
• ***Summary:*** "I began making Tofu in 1984 in the premises of Gillygate Wholefood Bakery in York. At first I made 10 Kilo on a Sunday. I rented the space on an hourly basis and stayed for approximately four years. Working after bakery hours.

"Around 1989 I moved to a unit attached to the York Steiner School, Danesdmead, Fulford, York. That was approximately 500 sq. foot.

"This was until around 1994 when I relocated to Fold Court, Buttercrake, York [Full address from 1994 form he filled out: Fold Court, Home Farm, Buttercrambe, York YO4 1AU, England, UK] Approximately 1500 sq. foot of converted farm buildings. Here I used a second hand pressure cooker purchased from Beanmachine. I resided there for 4-5 years then moved to Sheepfoot Hill, Malton, into 2500 sq. foot.

"Then to my present premises in 1998 Approximately 5000 sq. foot. "My first product was Plain Non Organic Tofu, and then Marinated Baked Tofu (Firstly Tamari, Ginger and Cider Vinegar). Then Sesame Burgers, Sea cakes, and Quiche. Five years later I tried Tofu Pasties with Seaweed, Carrot, Onion, Tamari and Ginger.

"We are now 7 full time and 1 part time staff, who presently produce 4-5 metric tons of hand made tofu per week using Nigari and Organically certified Chinese bean, as are our small range of products. We also pack by hand.

"We now sell for retail, Plain Tofu, Smoked Tofu, Marinated Tofu, Sesame Burgers, and Sea Cakes. We also supply Catering sized Plain and Smoked Tofu and Catering Basil Tofu.

"We have a lot of info on the web site. www.clearspottofu.co.uk

"Our present status would be a Private Ltd. Company, £500K per annum. With a single shareholder." Address: Unit 5 Rye Close, York Road Industrial Park, Malton, North Yorkshire YO18 7YD, UK. Phone: 01653 690235.

13272. Bramblett, Billy. 2013. More history of Wildwood Natural Foods (Interview). *SoyaScan Notes.* Feb. 17. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Pulmuone Wildwood Inc. now has a plant on the East Coast at 30 Rockland Park Ave., Tappan, New York 10983. Phone: (845) 365-3300.

Pulmuone has purchased the Monterey Pasta plant. John Breen, who had been Wildwood's CFO, is now running the Monterey Pasta plant. Billy has just returned from Expo West, where he worked at the Hodo Soy Booth and where he had a nice talk with John Breen and with various Pulmuone people. They were very nice to him. Y.C. Kang was there; he and Billy play golf together and they are friends. Doug Porter still works for Pulmuone; he was Wildwood's first employee back in the days when they were making sandwiches at the Sleeping Lady. Then Pulmuone sent some beautiful women over to take the origin and early history of how Wildwood. Billy had already written that history and given it to them, but they said they wanted to hear it from him directly. So he told it to them. In the USA, Pulmuone at one time had a factory in the Los Angeles (LA) area (in South Gate). That plant was closed sometime in 2003 or early 2004. The main factory in the LA area is now in Fullerton; it was newly

© Copyright Soyinfo Center 2013

opened in late 2003 or early 2004. Pulmuone no longer owns plants in Watsonville (Tom Lacina and his brother owned the property) or Santa Cruz (California), or Grinnell, Iowa.

The company was first named "Wildwood" under Chris Smith's tutelage. So Paul Duchesne was making sandwiches. He gave the business to Chris Smith then went to Boston. Chris Smith ran into the health department who said "You need to have a name on your label." Chris came to Billy and said, "What do you think I should do? I'm thinking 'Wildwood.' They walked out the back door of the Sleeping Lady and from there they could see redwood trees all the way up to Mount Tamalpais." Billy said, "Wildwood." They looked it up in a dictionary and found: "A wooded area in its natural state." Billy said, "Perfect." So Chris started putting on these little paper labels that he put on his Brown Rice and Tofu Sandwiches–"Wildwood Natural Foods."

Wildwood started making its sandwiches from organic ingredients in 1978 in The Sleeping Lady.

Chris Smith went to Boston. Paul Duchesne returned to Fairfax and started making sandwiches again. One day after work we decided, "Let's make tofu." Before that time, Paul, Chris, and Billy had gotten all the tofu they used from Quong Hop. They found a place at 135 Bolinas Rd. (across from the town hall), about a block away and across the street; The Sleeping Lady was at 58 Bolinas Rd. 135 Bolinas Rd. was a little storefront with a big picture window in the front. They incorporated the company there in April or May 1980, started to make tofu in August 1980. It was a tiny tofu shop, about 15 by 15 feet, with a walled-off kitchen behind it. They made tofu there until about 1993–because by that time they had already built the Santa Cruz plant.

It started when Paul Duchesne was an employee of Good Earth Natural Foods (founded in 1969; Mark Squire is one of the heavy organic hitters, and one of the most gentle, beautiful people in the world) a very early natural food store near The Sleeping Lady (TSL). The Good Earth asked TSL if they could use TSL's kitchen to make sandwiches, squeeze carrot juice, beet juice, and orange juice. So Paul came into TSL to make sandwiches for the Good Earth, then he dreamed up this Fried Rice and Tofu Sandwich (FRTS). He started making them, as well, at The Sleeping Lady, and then going and selling them at other natural food stores–in addition to The Good Earth. That's when he started his enterprise, that later came to be named Wildwood Natural Foods. Address: Pulmuone Wildwood.

13273. Breen, John. 2013. Re: Some key dates in the history of Pulmuone. Letter (e-mail) to William Shurtleff at Soyinfo Center, March 20. 1 p.
• ***Summary:*** 2002 May–Pulmuone's tofu plant in Tappan, New York starts operations.

2003 Aug.–Pulmuone's tofu plant in Fullerton, California, starts operations. The plant in South Gate closes shortly after Fullerton starts operations. Address: Executive Vice President of Manufacturing, 2315 Moore Ave., Fullerton, California.

13274. Breen, John. 2013. Re: What does the word "Pulmuone" mean? Letter (e-mail) to William Shurtleff at Soyinfo Center, March 21. 1 p.
• ***Summary:*** "It is actually not a word in Korean, it is a combination of two words 'Pulmu' and 'one.' And 'Pulmu' is not actually a word either but is a kind of contraction of the word that means 'the bellows' as used in a forge. The name was constructed by Mr. Won the spiritual founder of Pulmuone. See below web site for more info on Mr. Won and a photograph of him,

http://www.csulb.edu/~jlee6/PMO/html/story.html

"The story is that after the Korean war Mr. Won saw that a lot of the destroyed war materials where being melted down and reforged to be used for reconstruction. He recognized that many of the human beings that had been effected by the war also needed to be 'reforged' into productive members of society. Hence the term 'Pulmu' or 'bellows' and paired with 'one' as in 'we are all one' or forged together as one. It is not easy to translate. As you can see from the website he started a cooperative organic farm to bring together people who had been damaged by the war and help them to become productive members of society once again." Address: Executive Vice President of Manufacturing, 2315 Moore Ave., Fullerton, California.

13275. *SoyaScan Notes.* 2013. What is the difference between *tokwa / tokua* and *taho / tajo / tojo* in the Philippines? (Overview). March 21. Compiled by William Shurtleff of Soyinfo Center.
• ***Summary:*** Philippine tofu (*tokwa / tokua*) is identical to Chinese firm tofu (*doufu*).

Soymilk curds (*taho / tajo / tojo,* pronounced ta-HO or to-HO) are typically made by Chinese and sold as a dessert, topped with a little brown sugar syrup. *Taho* can also refer to soft silken tofu, yet always served with a sweet syrup, often by street vendors.

13276. Tutanathorn, Han. 2013. Re: Tofu in Thailand today. Letter (e-mail) to William Shurtleff at Soyfoods Center, April 3–in reply to questions. 1 p.
• ***Summary:*** Q: How many tofu makers in Thailand? Ans: There are 3-4 major tofu manufacturers in Thailand with distribution into supermarkets, but there are several small regional producers that that supply to traditional fresh markets in their areas.

Q: Are they mostly of Chinese ancestry? Ans: Yes, mostly Chinese ancestry.

Q: In which parts of the country are they located? Ans: Major producers are located around Bangkok suburbs.

Q: What different kinds of tofu are made and sold in Thailand (with the Thai name for each plus a description in

© Copyright Soyinfo Center 2013

English) There are 3 common types: soft tofu (*taohu-nim*) in tray, hard tofu (*taohu-kaeng*) in tray, and egg tofu (*taohu-kai*) in tube

Q: What are the 3-4 most popular ways of using tofu in Thailand? Fried tofu, tofu stir-fry with minced pork, egg tofu in clear soups

Q: Do you know anything about the history of tofu in Thailand. I am not knowledgeable in this area but it should have been brought to Thailand by Chinese several generations back.

Q: Are there any books in Thai entirely or mainly about tofu? Most Thai books about tofu are just recipe books or those that discuss about the health benefit of soy products. I have not seen any technical books on tofu in Thai, but there are several university research papers on tofu. Address: 17/9 Windmill Park, Bangna-Trad Rd. KM 10.5, Bangpleeyai, Bangplee, Samutprakarn 10540. Phone: 6689-133-8818.

13277. *SoyaScan Notes.* 2013. Three early students of soyfoods in Japan after World War II: A.K. Smith, William Brandemuhl, and William Shurtleff (Overview). April 15. Compiled by William Shurtleff of Soyinfo Center.

• ***Summary:*** Dr. A.K. Smith, had a strong academic background, having earned MA and PhD degrees from Columbia University. His interest in East Asian soyfoods began in about April 1948 when he began to write questions about fermented soyfoods to Lewis B. Lockwood, PhD and microbiologist. By June 1948 he had departed from the United States on a 3-month study tour that would take him to China, Japan and Korea. He collected samples of 100 microorganisms used in fermenting soyfoods. His articles on "Oriental use of soybeans as food" began appearing in *Soybean Digest* in Feb. 1949. He was mainly interested in fermented soyfoods; his articles about each food were accurate but relatively short.

William Brandemuhl studied soyfoods only in Japan. He arrived in Kyoto, Japan in Jan. 1963 and became a research fellow at the Department of Agricultural Economics, Kyoto University, Kyoto, Japan. Between Feb. 1963 and May 1964 (15 months) he conducted field research on soybean utilization in Japan. In June 1963 (after William had been in Japan for 4 months), Tomoko completed her graduate studies, graduated from the University of Wisconsin, and (since her scholarship was finished), returned to Japan–to be with William and to help him with his research in Japanese, which he spoke only moderately well. She traveled with him throughout Japan and translated for him during the many interviews he conducted. William's monthly check from Honeymead paid for his room and board–but not for his travel and research, so he had to work part time doing English translation for a Japanese company. On trips, he took many photos using his expensive Nikon camera. Tomoko's family lived near Kobe, where she and William were married on 8 Aug. 1964–three months after he finished his field research.

William's primary interests were: (1) To describe in detail, with photos, how each of different Japanese soyfoods were made. He was extremely thorough. (2) The place of each food in Japanese culture. (3) The industry of which each food was a part and its trade associations (if any). (4) The future of that food in Japan. He was not particularly interested in transmitting these foods and their technology to the United States, and he took almost no interest in carefully selecting names for these foods (or the equipment used to make them) which would give them the best chance of catching on in the best chance of catching on in the United States.

William Shurtleff first visited Japan for 3 months in the summer of 1967 while a student at Stanford University; he lived in a Zen temple in Kyoto, practiced meditation each evening, and studied Japanese language and culture. After graduating from Stanford and living for 2½ years at Tassajara Zen Mountain Center, he arrived in Japan on 16 Jan. 1971 with the intent of becoming fluent in Japanese so he could translate the writings of Dogen Zenji, an early Soto Zen master. For the first year he lived with a Japanese family in Kyoto and became a full-time student at the *Nihongo Gakko,* a Japanese language school in Kyoto. At the end of that year he moved to Kyoto, where he entered a university to continue his Japanese language studies. While in Tokyo, he became close friends with Akiko Aoyagi, a Japanese artist and cook. In Oct. 1972 he first visited and met Mr. Toshio Arai, a Japanese tofu master under whose guidance Shurtleff would later become an apprentice. In Dec. 1972 he started to write a booklet for Americans about tofu; he believed that tofu could be a very positive addition to the American diet and that young Americans would enjoy making tofu as a new occupation. On 13 Jan. 1973 he signed a contract with Autumn Press, a small publishing company in Japan owned by Americans Nahum and Beverly Stiskin. For the next 2½ Shurtleff and Aoyagi researched and wrote *The Book of Tofu,* which was published in Dec. 1975. Shurtleff made enough money to live in Japan by working as an interpreter, translator and researcher for his father's tool company. The story of this adventure is told in the Preface to *The Book of Tofu* (see 2001 or subsequent editions). Shurtleff's interests and work were different from those of William Brandemuhl in several important ways: (1) He spoke very good Japanese. (2) His initial focus was almost entirely on tofu, although he later wrote a book about miso. (3) He was just as interested as Brandemuhl in describing accurately how tofu (and other soyfoods) were made in Japan, but primarily with the intent of transferring this technology to the United States and other parts of the world. To this end he was deeply interested in choosing names for soyfoods and equipment that would help them take root in their hew homes. On 13 June 1978 Shurtleff and Aoyagi, after being married, moved from Japan to live in the United States. For the rest of his life

© Copyright Soyinfo Center 2013

Shurtleff did research on and wrote books about soyfoods, and simultaneously worked to introduce them to the United States. By late 1999 soyfoods had become important foods in the USA; soy sauce, soymilk and tofu had become mainstream foods.

13278. Sol Cuisine. 2013. Sol Cuisine: Your natural source for healthy, vegetarian foods since 1980 (Portfolio). 3249 Lenworth Drive, Mississauga, Ontario, Canada L4X 2G6. 22 inserts. 30.5 x 22.8 cm. [Eng; Fre]

• ***Summary:*** This portfolio (sent by Lorraine Guardino of Sol Cuisine) contains 20 inserts describing Sol Cuisine's current Canadian products, retail and foodservice.

The glossy cover is printed with dark blue, orange and beige on white. On the inside left is one sheet (glossy color, 28 x 21.5 cm, in English and French) for each of the company's current retail products. On the front left third of each sheet (printed with dark blue ink on an orange background) is a checklist of that product's most important specifications. For example–for Organic BBQ Tofu Ribs: Vegetarian / vegan. Wheat free. Gluten free. Organic. Trans fat free. Source of iron. Source of calcium. Only 100 calories. 8 grams of protein. A box at the bottom gives company contact information. On the right two thirds (printed with dark blue on white fading into a blue sky above) is the product name written large and a one-sentence description of the product above, with a color photo of the package below. Across the bottom are four certification logos. The artistic design is excellent. On the rear left two-thirds of each sheet are: Preparation instructions. Exact ingredients. Package and shipping information. Nutrition facts. At the right top is a color photo of the prepared dish. and below that (blue on orange) is a statement about the company and its mission.

The retail inserts are titled: Add protein and profit to your line-up: From a trusted source since 1980 (1 page overview of 9 products; Front in English, back in French). The retail products are: Organic BBQ Tofu Ribs. Almond Grain Burger. Sweet Curry Vegetable Burger. Mushroom Rice Burger. Spicy Black Bean Burger. Organic Veggie Crumbles. Veggie Breakfast Patties. Original Burger. Organic Falafel. Firm Tofu.

On the inside right is one sheet (glossy color, 28 x 21.5 cm, in English and French) for each of the company's current foodservice products. The layout and design of each sheet is similar to the retail sheets. The foodservice inserts are titled: Add protein and profit to your line-up: From a trusted source since 1980 (1 page overview of 8 frozen products, 1 refrigerated product, and 2 dry products; in English only). "All Sol Cuisine products are Vegan / Vegetarian, Trans Fat Free, Kosher and Halal." The weight of each product ranges from 3.6 kg (9 lb; Veggie Dog) to 7 kg (15.4 lb; Firm Tofu). The frozen products are: Almond Grain Veggie Burger. Meatless Burger. Mushroom Rice Burger. Veggie Sol Dog 7 Inch [made with tofu]. Organic Sol Grounds (Organic Veggie Grounds). Veggie Breakfast Patties. Falafel. T-Ribz (Organic BBQ Tofu Strips). The one refrigerated product is Organic Firm Tofu (A best seller since 1980). The two dry products are: Veggie Burger Mix. Texturized Vegetable Protein. Address: Mississauga, Ontario, Canada. Phone: 905-502-8500.

13279. Sol Cuisine. 2013. Sol Cuisine: Your natural source for healthy, vegetarian foods since 1980 (Portfolio). 3249 Lenworth Drive, Mississauga, Ontario, Canada L4X 2G6. 10 inserts. 30.5 x 22.8 cm. [Eng]

• ***Summary:*** This portfolio (sent by Lorraine Guardino of Sol Cuisine) contains 10 inserts describing Sol Cuisine's current U.S. products, which are sold only retail (none are sold to foodservice).

The glossy cover is printed with dark blue, orange and beige on white. On the inside left are the following two leaflets (glossy color, single sided, 28 x 21.5 cm): (1) Sol Cuisine SKU ranking in the USA: 1. Spicy Black Bean Burger. 2. Mushroom Rice Burger. 3. Veggie Breakfast Patties. 4. Original Burger. 5. Almond Grain Burger. 6. Original Falafel with Sauce. 7. Original BBQ Tofu Ribs. 8. Organic Veggie Crumbles.

(2) Sol bean anatomy. Like the diagram showing where the various cuts on a cow come from, but instead on a green soybean pod, where each "cut" is one of Sol Cuisine's products.

On the inside right is one sheet (glossy color, 28 x 21.5 cm.) for each of the company's current retail products. On the front left third of each sheet (printed with dark blue ink on an orange background) is a checklist of that product's most important specifications. For example–for Organic BBQ Tofu Ribs: Vegetarian / vegan. Wheat free. Gluten free. Organic. Source of calcium. Only 130 calories. 9 grams of protein. A box at the bottom gives company contact information. On the right two thirds (printed with dark blue on white fading into a blue sky above) is the product name written large and a one-sentence description of the product above, with a color photo of the package below. Across the bottom are five certification logos, including the Non GMO Project. The artistic design is excellent. On the rear left two-thirds of each sheet are: Preparation instructions. Exact ingredients. Package and shipping information. Nutrition facts. At the right top is a color photo of the prepared dish. and below that (blue on orange) is a statement about the company and its mission. The retail inserts are titled: Add protein and profit to your line-up: From a trusted source since 1980 (1 page overview of 8 products). The retail products are: Organic BBQ Tofu Ribs. Almond Grain Burger. Mushroom Rice Burger. Spicy Black Bean Burger. Organic Veggie Crumbles. Veggie Breakfast Patties. Original Burger. Address: Mississauga, Ontario, Canada. Phone: 905-502-8500.

13280. Spots at front of book: Tofu and tofu products 3000.
• ***Summary:*** (a) An early White Wave Tofu label (1978). (b) Traditional hand-turned stone mill. (c-d) Galactina flavored tofu sold in sausage shapes. (e) T-Nugget (baked tofu cubes). (f) Wo Chong Fresh Soy Bean Cakes. (g) Morinaga Revolutionary Tofu (ca. 1988). (h) Chef lifting tofu from blotter. (i) Cubes of fresh tofu. (j) Cubes of tofu deep fried in breaded batter. (k) Silken tofu and cubes on a wooden cutting board. (l) Inari-zushi. (m) Tofu squares in a sauce with veggies. (n) Grilled slabs of tofu with miso topping. (o) Cake of silken tofu in a blue bowl. (p) Grilled tofu kebabs. (q) A kit for making tofu at home. (r) Tofu cheesecake with whipped tofu topping. (s) Pan-fried tofu slices. (t) Typical cakes of regular tofu. (u) Cubes of deep fried tofu with a dipping sauce. (v) Chinese style pressed tofu. (w) Cubes marinated and baked tofu. (x) Guindon. 1985. Cartoon in Detroit Free Press. "I not only did the sewing. I made the cloth from soybeans."

13281. Spots at front of book: Tofu. 3000.
• ***Summary:*** (1) View using the "Google Ngram Viewer" of the relative frequency of appearance in books digitized by Google, from 1800 to 2000 of the three case-sensitive terms "tofu" (the most frequent), "bean curd," and "soybean curd" (never widely used).

Note the rapid rise of the word "tofu" starting in the late 1970s.

13282. *SoyaScan Notes.* 2013. Soyfoods historical research and writing wish list (Overview). Compiled by William Shurtleff of Soyinfo Center.
• ***Summary:*** 1. Early history of Chinese soyfoods companies and products in America and Europe. Especially Chinese tofu manufacturers in San Francisco and Los Angeles from 1850 to 1910.

2. Statistics on soyfoods in China during the 1980s.

3. The Swedish trading mission in Canton during the 1700s and 1800s and its work with soy sauce.

4. A lengthy, scholarly history (with an extensive bibliography) of soybeans and soyfoods in China written by a Chinese.

5. A lengthy, scholarly history (with an extensive bibliography) of soybeans and soyfoods in Japan written by a Japanese.

6. A lengthy, scholarly history (with an extensive bibliography) of soybeans and soyfoods in Korea written by a Korean.

7. A history of the health foods industry in America, 1930-1980.

8. A book on mochi or how mochi came to the West, with a clear chronology of commercial mochi manufacturers in the western world.

9. A scholarly history (with an extensive bibliography) of each of the following soyfoods in Japan, written by a Japanese with a long-term involvement in the field: natto, miso, shoyu, tofu.

10. Explain why Linnaeus stated in *Hortus Cliffortianus* (1737, p. 499) that the soy bean was grown in the colony of Virginia in North America.

11. A lengthy, scholarly history (with a good bibliography) of Chinese growing and processing soybeans in California. They must have grown them between 1849 and 1899! (13 Sept. 1991)

12. Visit the best libraries and centers in Germany for doing research on soybeans and soyfoods (See #37465) and try to get missing old documents.

13. Try to document the statement that the soybean was used as a coffee substitute during the Civil War in the USA (1861-1865).

14. Use the Coker family archives in South Carolina to write a history of the company's pioneering work with the soybean.

15. A history of early experimental gardens such as those that the Portuguese developed on the Cape Verde Islands, the British at Kew, Nairobi, Singapore, and the colony of Georgia (the Trustees' Garden of Georgia, a government experimental farm at Savannah, laid out in 1733), the Spanish (under Cortez / Cortés) in today's Mexico, etc. Did soybeans appear in any of them? When did they first appear in each?

16. Learn much more about Korean natto. Did it exist in Korea before Korea became a Japanese colony? Try to find some references, as in early studies of food in Korea. How widely was it made and used? Try to find some estimates of annual production. How was it served? What was its distribution in Korea in 1900? 1950? 2000?

17. A scholarly biography of Clifford E. Clinton of Los Angeles.

13283. *SoyaScan Notes.* 2013. Soyfoods scientific research wish list (Overview). Compiled by William Shurtleff of Soyinfo Center.
• ***Summary:*** 1. How to get vitamin B-12 into tempeh, ideally by inoculation with an organism. 2. What degree of grinding of whole soybeans gives the maximum extraction of soluble protein? Of soluble fat? Of both combined. How does this relate to the type of filtration system? 3. How does flatulence in vegetarians compare with that of non-vegetarians, on average. 4. Research on the ability of tofu to lower blood cholesterol in humans (parallel to that done by Sirtori and Carroll on isolated soy proteins).

13284. *SoyaScan Notes.* 2013. Commercial soyfoods products wish list (Overview). Compiled by William Shurtleff of Soyinfo Center.
• ***Summary:*** 1. Organic, non-GE soy protein isolates (2002/03). 2. A very low calorie soy beverage for weight

© Copyright Soyinfo Center 2013

loss in hospitals. Must be able to be used as a sole source of nutrition. 3. More smoked tofu in America.

4. Meatless pepperoni, sausage shaped, for use atop a meatless pizza. 5. Natural shoyu brewed in America, ideally as part of a joint venture with a Japanese shoyu company. 6. A vegetarian Worcestershire sauce, with no anchovies (John Troy developed "The Wizard's Worcestershire Sauce" for Joel Dee's Premier Japan line in about 1995; it was vegetarian).

7. A low-calorie, low-fat tofu. Fat and calorie content should be at least 30% lower than that made from whole soybeans. The easiest way to make this product would be to run soymilk made from whole soybeans through a decanting centrifuge (like a cream separator) to remove the desired amount of fat, just like the dairy industry does to make low-fat or non-fat milk. There is a big potential market for such a product since 1% fat milk has now passed low-fat milk (2%) as the best-seller in American supermarkets (11 Sept. 1991). 8. Bland soymilk base (11 July 1997). Presently no company (including International ProSoya Corp. of Canada, Pacific Foods of Oregon, and Ted Nordquist dba TAN Industries, Inc. etc.) offers this product.

9. A soy-based kefir made from authentic kefir grains/ cultures plus FOS (fructooligosaccharides), a dietary fiber derived from chicory roots. FOS feeds and increases the level of "good guy bifidobacteria by up to five times in the gastrointestinal tract, and boosts the body's absorption of calcium and other minerals by up to 50 percent." See article in *Ag Innovation News* (April 1999, p. 3, 14).

13285. *SoyaScan Notes.* 2013. Soyfoods market surveys or services wish list (Overview). Compiled by William Shurtleff of Soyinfo Center.

• ***Summary:*** 1. A magazine about soyfoods, published in the USA. The soyfood industry's number one need! 2. Someone to organize a bi-annual international soyfoods conference of the type Richard Leviton used to organize. 3. A survey on why people don't use tofu: (A) Have they ever tasted it? I don't like the taste. It has no flavor. Its disgusting, slimy, floats in water. Can't locate any to buy. Don't know how to use it–need recipes. I tasted it once and it was sour, or I didn't like it. (B) If they have never tasted tofu: I've heard bad things about it and don't want to try it. 4. A survey on who is eating tofu, and why. Demographics. 5. People to organize state or regional soyfoods associations where people can meet once a year at little cost to discuss common problems/needs. 6. A magazine like the original Soyfoods magazine, now that the Soya Newsletter is largely defunct (12 Sept. 1991). 7. Reactivation of the Soyfoods Clipping Service (12 Sept. 1991).

13286. *SoyaScan Notes.* 2013. Soyfoods success stories in developing countries (Overview). Compiled by William Shurtleff of Soyinfo Center.

• ***Summary:*** Public sector with outside funding: 1. Sri Lanka, Thriposha program (Cereal-soy blends, started 1976. Thriposha itself started in 1973). 2. Mexico (Chihuahua) program selling PADSA, Soyaven / Soyavena, Albachisa, and Almesa (Cereal-soy blends, 1978-80). 3. Thailand, ASEAN full-fat soy flour project (1978). 4. Guatemala, Plenty Soy Dairy (Tofu, soymilk, soy ice cream, 1980)

Private sector, largely self sufficient: 1. Uganda, Africa Basic Foods (Dr. D.W. Harrison. Roasted whole soy flour, cereal soy blends, 1966-69). 2. India. Ruchi's Products (TVP, 1980).

13287. *SoyaScan Notes.* 2013. The best libraries for Asian-American studies in California (Overview). Compiled by William Shurtleff of Soyinfo Center.

• ***Summary:*** Mr. Seizo Oka of San Francisco, whose life work is writing a history of Japanese in America, has built an excellent library of documents on this subject. These archives have many early documents including America's best collection of early Japanese-American City Directories. Mr. Oka used to work for Bank of Tokyo, renamed Bank of California, and his project was part of the California First Bank History Project. The bank provided him with financial support. But they withdrew their support in late 1989, and on 15 Dec. 1989 the library had to be closed. But, with community support, it was reopened in Dec. 1990 in a new room at the same location: History Archives of the Japanese Cultural & Community Center, 1840 Sutter St., #206, San Francisco, CA 94115.

The second library is the Japanese-American Library, located at 1619 Sutter St, on Octavia & Sutter on the entire ground floor (1,500 square feet) of Hinode Towers (P.O. Box 590598, San Francisco, CA 94159. Phone: 415-567-5006). The director, Karl Matsushita, a graduate of UCLA in his mid- to late-40s, has collected for 20 years. Founded in 1969 (at the time of student demands for Ethnic Studies Programs) by Karl and a group named Center for Japanese-American Studies from Ethnic Studies Program, it became independent from the group in 1985. The library has at least 10,000 documents, lots in boxes, mostly post-war. They have no early city directories. The pre-war material is mostly in English. They have little or no information on soyfoods. They are planning to computerize the library to make it compatible with the University of California at Berkeley, Stanford, and Harvard-Yenching libraries. In the meantime they are typing 3x5 catalog cards for their documents.

Two libraries at the University of California have excellent, large collection of documents, many very early and many archival, on Chinese and Japanese in America. The Bancroft Library focuses on the far western USA. The Asian American Studies Library is more nationwide in scope. Its holdings include monographs, serials, theses and dissertations, conference papers, student research papers, and non-print media. It is the best source of Chinese-American

© Copyright Soyinfo Center 2013

documents in California. Many documents came from the Chinese Historical Society in San Francisco. Unfortunately no one on the staff can read or speak Japanese none of their Japanese-language documents can be cataloged.

A major library is found at the Asian-American Studies Center at UCLA; it is complemented by the East Asian Library at UCLA, which has mostly Asian-language materials. Hosokawa (1969) notes that "the Japanese American Citizens League, a nationwide organization of fewer than 25,000 members, launched in 1962 what was called the Japanese American Research Project. Funds were contributed by members and other interested persons and $100,000 presented to the University of California at Los Angeles. UCLA in turn undertook to seek out and preserve documentary materials and gather and analyze information relating to the Japanese Americans. Despite its modest scale this research project proved to be of sufficient academic and sociological interest that the Carnegie Corporation and the National Institute of Mental Health, a federal agency, provided grants for detailed studies into specific contributions by Japanese Americans to the American way of life." A number of independent papers, both popular and scholarly, have resulted from this project.

Another interesting group, which has no library, is the Center for Japanese-American Studies.

13288. *SoyaScan Notes.* 2013. The kosher dietary laws, kashruth, and pareve/parve (Overview). Compiled by William Shurtleff of Soyinfo Center.

• ***Summary:*** Historically there has been a strong interest in soyfoods (especially soy ice creams, yogurts, cheeses, soymilk, and tofu) from Jews who follow the laws of kosher. *Webster's Dictionary* defines kosher (a Yiddish word derived from the Hebrew *kasher* meaning fit or proper, and first used in 1851) as "1: sanctioned by Jewish law; esp. ritually fit for use (kosher meat). b: selling or serving food ritually fit according to Jewish law (a kosher restaurant). The verb "to kosher" (first used in 1871) means "to make kosher."

"The kosher laws are derived from the 'Book of Leviticus' in the *Torah,* and are expounded upon in the volume of the Talmud (Oral Law) titled *Chulin.* Yet the teaching of kosher is touched upon in all 60 volumes of the Talmud.

"Kashruth, the Hebrew term meaning 'fitness,' itself derives from the term 'kosher.' Kashruth refers to the Jewish dietary laws; most Orthodox Jews observe kashruth.

"The kosher dietary laws divide all foods into three types: from the flesh (fleshig), from milk (milchig), and neither flesh/meat nor milk (parev). From this latter Yiddish term 'parev' derive the terms pareve and parve, both pronounced 'parv,' and used interchangeably. They are Jewish cookery or dietary terms meaning (1) 'neutral' or (2) made without milk or meat or their derivatives. Eggs and seafood are both pareve. A pareve food can be eaten with either milk or meat. Many soy ice creams are labeled 'kosher and parve' or 'kosher parve.'

"The laws of kosher state, among other things, that one cannot consume meat and milk products at the same meal. Hence, orthodox Jews do not consume ice cream after a meal that contains meat." Perhaps the most widely observed kosher law is not to eat pig/pork. After eating meat, according to Jewish dietary laws, one should wait for 6 hours before consuming dairy (milchig) products. But one can consume dairy products and then have meat products after 30 minutes. The difference is based on the fact that meat takes longer to digest. For this reason, at least in Israel, more emphasis is placed on developing meatlike products than on dairylike, to bypass the 6-hour restriction. Meat substitutes are much more popular in Israel than dairylike products. The government has encouraged development of meatlike products. Yet there seem to be many opportunities for production of dairylike products on kibbutzim or moshavim.

In the USA, major kosher certifiers include: (1) Union of Orthodox Jewish Congregations of America, Kashruth Div., 45 West 36th St., New York, NY 10018. Tel. 212-564-8330. Rabbi Reese and Rabbi Menach. Members: 3100. Publications: Keeping Posted: Bimonthly, Kosher Directory of Products and Services. Highly respected. O-U mark. (2) Kosher Supervision Services, 354 Fifth St., Hackensack, New Jersey 07601. Tel. 201-342-7400. Chuff K mark. (3) OK Laboratories, P.O. Box 218, Brooklyn, NY 11204. Tel. 718-851-6428. Rabbi Bernard Levy. Circle K mark.

Several important Hebrew or Yiddish words related to kosher: A "heksher" (pronounced HEK-shur) is the kosher mark. "OU is the most highly respected kosher heksher." A "mashghiach" (pronounced mush-JEE-ak) is the person who inspects a food facility before giving approval.

13289. *SoyaScan Notes.* 2013. Europe's biggest international food fairs / shows and expositions: ANUGA, SIAL, Helfex, and CIBUS (Overview). Compiled by William Shurtleff of Soyinfo Center.

• ***Summary:*** ANUGA and SIAL are held in Cologne (Germany) and Paris (France) respectively on alternating years in October. Each fair lasts for about 6 days, and tickets cost about $20. Food people and companies come from all over the world to exhibit and see the latest in all kinds of foods and food equipment. ANUGA is held on odd numbered years (1987, 1989, 1991, etc.) and SIAL on even numbered years (1986, 1988, 1990).

ANUGA (pronounced uh-NEW-guh) stands for *Allgemeine Nahrungs und Genussmittel Ausstellung* ("General exhibition of food and food adjuncts {stimulants / enjoyables"}). Billed as the "World Food Market–Consuma–Gastroma–Tecnica," it is held at the Cologne Messe (Exhibition Center) and is sponsored / produced by Messe und Ausstellungs Ges. mbH, P.O. Box 210760, D-5000 Cologne, West Germany. Phone: 221-8210. The first

© Copyright Soyinfo Center 2013

ANUGA fair was held in 1929. Statistics at ANUGA in 1986 were mind-boggling: 200,000 visitors; 5,201 companies exhibiting, from 86 different countries; and what seemed like 50 miles of exhibit space (actually 227,000 square meters).

SIAL (pronounced see-AL) stands for "Salon International de l'Alimentation," and is also called the 'International Food and Dairy Exhibition'. The first SIAL was held in Nov. 1964. The permanent address of SIAL is 39 rue de la Bienfaisance, 75008 Paris.

The 'SIAL d'Or' (also called 'Golden SIAL' or Food Oscar') gold medal awards, first presented in Oct. 1986, are given for the best new food products in each food category at the AIDA-SIAL International competition judged in Paris in June. The Oscars are a bi-annual competition between 16 nations, including Canada, Great Britain, Italy and the USA. Each country presents products in 7 food and beverage categories: Grocery, alcoholic drinks, non-alcoholic drinks, dairy, deep-frozen, meat / poultry and delicatessen. The retail trade in each country nominates the representative products. At least one soy product, So Good, a soymilk produced by Sanitarium Foods in Australia, has been awarded the Golden SIAL.

Helfex, the International Health Food Trade Exhibition and Convention, is much smaller than the two fairs mentioned above and its scope is much more limited. Held biannually in the spring in the United Kingdom on even numbered years, it is sponsored by the British Health Food Manufacturers Association and the British Health Food Trade Association. The Foreign Agricultural Service (FAS) of the USDA typically has a large pavilion featuring booths representing U.S. health / natural food manufacturers. In 1988 at least 8,000 visitors came to Helfex from 25 countries. About 600 exhibitors were there and the U.S. Pavilion was the biggest booth at the entire show. About 88% of the natural foods products at Helfex '88 came from the U.K. The first Helfex was held on 17-19 March 1974 at the Bloomsbury Centre Hotel in London. The tenth Helfex was held on 8-9 April 1990 in Birmingham, England; over 200 companies exhibited in Birmingham. For more information contact the British Health Food Trade Assoc., Angel Court, High Street, Godalming, Surrey, GU7 1DT, England. Phone: 0483-426450. Fax: 0483-426921.

CIBUS (pronounced CHI-bus), the biggest food fair in Italy, is held in Parma in about May each year.

13290. *SoyaScan Notes.* 2013. Chronology of Soyfoods Center: The work of William Shurtleff and Akiko Aoyagi. Compiled by William Shurtleff of Soyinfo Center.
• ***Summary:*** 1. Introducing soyfoods to the West: Popular books (1972 Oct.–1979 July).

The Book of Tofu:

1972 Oct. 22–First visit to San-gen-ya tofu shop in Tokyo. Mr. Toshio Arai begins to teach William Shurtleff the traditional art of making tofu.

1972 Dec. 22–Meet Nahum Stiskin of Autumn Press. Start to write tofu booklet.

1973 Jan. 13–Sign contract for *Book of Tofu* with Autumn Press.

1973 March 2–Visit Sasa-no-yuki tofu restaurant in Tokyo.

1975 Dec. 12–*The Book of Tofu** published by Autumn Press.

* = Book illustrated by Akiko Aoyagi.

1978 Dec. 22–*The Book of Tofu** published by Ballantine Books in a mass-market pocketbook edition that retails for $2.95.

The Book of Miso

1974 Feb/March–Study miso and shoyu in Japan on trip with Bob Gerner, head of Westbrae Natural Foods.

1974 May 7–Start to write *The Book of Miso,* table of contents.

1975 April–Autumn Press accepts idea of publishing *The Book of Miso.* Contract signed Aug. 18.

1976 Sept. 23–*The Book of Miso** published by Autumn Press.

1976 Sept. 29–1977 Feb. 3–Tofu & Miso America Tour. We do 70 public programs, many TV and radio interviews, drive our van 15,000 miles in 17 weeks.

The Book of Tempeh

1977 May–To Indonesia for one month of tempeh research.

1978 Feb. 27–Sign contract with Harper & Row.

1979 July 14–*The Book of Tempeh** published by Harper & Row.

2. Working to build a soyfoods industry in the Western world (1977 April–present)

1977 April 5–Establish Takai Tofu and Soymilk Equipment Co.

1977 Aug. 16–First Takai catalog of tofu and soymilk equipment published.

1977 Aug. 16–*Miso Production** published by Soyfoods Center–the first book we self-published.

1978 July 28-30–The Soycrafters' Association of North America is founded in Ann Arbor, Michigan. William Shurtleff helps to organize the inaugural meeting, is a founding member, and a member of the first board of directors.

1978–Soyfoods Center starts to develop a mailing list (typed so as to fit on pressure sensitive labels) of all people who have purchased books or contacted us.

1979 July 15–*Tofu and Soymilk Production** published by Soyfoods Center.

1979 July–The first issue of *Soycraft* magazine is published by Richard Leviton, director of Soycrafters' Association in Massachusetts. Each mailing is based on the use of Soyfood Center's mailing list–free of charge.

1980 March 10–*Tempeh Production** published by Soyfoods Center.

© Copyright Soyinfo Center 2013

1980 Sept.-Dec.–Our mailing list of about 5,000 names and addresses, divided into 70 coded categories, is computerized by Parallel Procedures in San Francisco. This was done primarily to help Richard Leviton of *Soycraft* magazine.

1981 Dec.–There are now 10,900 names on our computerized Soyfoods mailing list, rising to 13,800 names by May 1982.

3. Documenting the history of soybeans and soyfoods (1980 Oct.–present)

1980 Sept. 10–Start to build what we hope will become a large library at Soyfoods Center with regular trips to the University of California at Berkeley library system.

1980 Oct. 22–Start writing *History of Soybeans and Soyfoods.*

1984 June 1–History book manuscript is now completely in our word processor: 2,500+ pages, 70+ chapters.

1984 June 21–Soyfood Center's annual summer intern program begins. Irene Yen, a Stanford student starting her senior year, is our first summer intern.

1984 July 17–*History of Tempeh published*–our first history book.

4. Studying the burgeoning soyfoods industry and market (1982 Sept.–1985 Feb.)

1982 May 16–*Soyfoods Directory and Databook* (1st edition) published. Renamed *Soyfoods Industry and Market: Directory and Databook* on 26 Feb. 1983. 3rd edition.

1982 Sept. 10–*Soyfoods Labels, Posters, and Other Graphics* published.

1984 Feb. 25–*Soymilk Industry and Market* published.

1985 Feb. 22–*Tofutti and Other Soy Ice Creams* published.

1990 May 8–*Tofu Industry and Market in Europe* published.

1990 July 17–*Soymilk Industry and Market in Europe* published.

1994 Jan.–*Soyfoods Industry and Market: Bibliography and Sourcebook* published.

5. Foreign language editions of our books are published (1980 -)

1980 July–*Das Miso Buch** (hardcover and paperback) published by Ahorn Verlag (Wolfgang and Gabriella Furth-Kuby) in Germany.

1981 Aug.–*Das Tofu Buch** (hardcover) published by Ahorn Verlag in Germany.

1988 Nov.–*Das Tempeh Buch** (hardcover) published by Ahorn Verlag in Germany–6 years after the project started.

1988 Nov.–New German pocketbook editions of *Das Tofu Buch* and *Das Miso Buch* (paperback) published by Goldmann Verlag.

6. Developing a computerized information center (1980 Dec.–present).

1980 Dec. 12–Mailing lists of Soyfoods Center and Soyfoods magazine merged and computerized by Parallel Procedures in San Francisco. 5,500 names in 50 categories.

1983 Sept. 28–Install first computer at Soyfoods Center, IBM-PC with 20 MB hard disk and word processing software to use for writing our book on *History of Soybeans and Soyfoods.*

1985 May 9–Install Revelation database manager software for developing a computerized bibliographic database on soya.

1985 July 31–Finish keying all 6,677 file cards (3x5 inch) into our computerized database. Our library is now computerized.

1985 Aug. 30–Our computerized database, containing 9,500 bibliographic records, is now available for use by the public.

1986 Sept. 1-16–The first of many trips to do library research at the USDA National Agricultural Library, Library of Congress, and National Library of Medicine–America's three national libraries, all located in and about Washington, DC.

1987 July 6–Start entering Commercial Soy Products into our database.

1987 Oct. 11–*Bibliography of Soymilk, from 1578 to 1987: With 1,584 References* published–our first bibliography.

1987 Oct. 19–Coin the name SoyaScan, start using it to refer to our computerized database, and apply for a registered trademark, which we are issued on 19 July 1988.

1993 Feb.–Install a Novell 5-user network to link our various computers.

1995 Feb. 11–We enter the 50,000th record into our SoyaScan database.

1997 Nov. 24–We enter the 55,000th record into our SoyaScan database.

7. Current status of computerized information–2000 January 1

SoyaScan database now contains 59,440 records from 1100 B.C. to the present, including 48,318 published documents, 12,683 commercial soy products, 4,628 original interviews and overviews, and 41,584 unpublished archival documents.

More than 75% of all SoyaScan records have a summary/abstract averaging 143 words in length.

More than 26,000 records (44% of the total) are for documents published before 1970.

Thirty five major books in the series Bibliographies and Sourcebooks on Soya, produced from the SoyaScan database, are now available, published by Soyfoods Center.

Soyfoods Center Library owns about 54,000 documents, almost all of which have a record in the SoyaScan database.

SoyaScan Directory now contains the name, address, and phone number of 17,300 people and organizations worldwide actively involved with soyfoods and soybeans. Each entry is coded to show the type of activity, e.g. 2A =

© Copyright Soyinfo Center 2013

Tofu manufacturers.

8. Collecting and Publishing Information on Vegetarianism and Other Non-Soy Food Products that can Replace Animal Products.

1984 Oct. 31–Create our first vegetarian keyword (subject heading) VegeAnim = Vegetarian Diets and Animal Rights.

1988 Feb. 21–*Amazake and Amazake Frozen Desserts: Industry and Market in North America* published. Updated bibliographic supplement published in March 1995.

1992 Oct.–Start actively collecting information specifically on vegetarianism and veganism, and entering it into our new VegeScan database.

1992 March 4–*Bibliography of Vegetarianism: 1,755 References from A.D. 1170 to 1992, Extensively Annotated* published (360 p. large format, preliminary edition).

1992 June 12–*Sourcebook on Wheat Gluten Foods and Seitan* published. Expanded edition published in Jan. 1994.

2000 Jan. 1–VegeScan database now contains 5,500 bibliographic records on vegetarianism and veganism from 238 B.C. to the present.

Best selling books from Soyfoods Center (English-language editions only, as of Jan. 2000).

The Book of Tofu–557,000 copies sold.

The Book of Miso–115,900 copies sold.

The Book of Tempeh–47,950 copies sold.

Tofu & Soymilk Production–5,020 copies sold.

Other–9,200 copies sold.

Total–775,070 copies sold. Address: Lafayette, California. Phone: 925-283-2991.

13291. *SoyaScan Notes.* 2013. Translations of documents on soya from Asian languages to English, wish list (Overview). Compiled by William Shurtleff of Soyinfo Center.

• ***Summary:*** 1. Translate from Chinese: C.N. Li, comp. 1958. Dou-lei [*Varieties of beans*]. This book contains every known quotation about soybeans published in China from 1100 B.C. to recent times–100 pages total on soybeans. It is a treasury of key historical information that has never been translated into English.

2. Translate from Japanese: Wataru Kawamura. 1958. *Miso enkakushi* [*History of miso*]. 817 p. 22 cm. The definitive book on this subject. Pages 187-213 list all early Japanese books mentioning miso, with a summary of what each says.

13292. *SoyaScan Notes.* 2013. The visionary work of Henry Ford and his researchers with soyfoods–then and now: Popularized the use of soybeans as foods in America (Overview). Compiled by William Shurtleff of Soyinfo Center.

• ***Summary:*** Before Henry Ford began his pioneering work with soybeans in the early 1930s, most American consumers and farmers thought their only use was as feed for animals. Ford and his researchers and chefs played a major role in developing a remarkable variety of tasty and nutritious American-style foods from soybeans, and in publicizing these foods and their health benefits nationwide.

Prior to 1934 (according to records in the SoyaScan database) only about 188 commercial soyfood products had been introduced in America. Of these, 78 had been launched in the Hawaiian Islands, so only 110 had been introduced on the American mainland. Of these 110, at least 46 were made by Asian-American companies primarily for Asian-Americans (such as Chinese-Americans, Japanese-Americans, etc.). Thus only 70 products were made by Caucasian-American companies, and, of these, 27 products were made by Seventh-day Adventist companies and sold mostly to other Seventh-day Adventists. In short, between 1766-1767 (When Samuel Bowen launched America's first two commercial soy products–Soy-based Vermicelli Noodles and Bowen's Patent Soy [Sauce]) and 1934, only 43 commercial soy products had been introduced by Caucasian-American companies, not including Seventh-day Adventists.

Henry Ford's ideas about introducing American-style soyfoods took their first clear form on August 13, 1934, when he presented an all-soy gala dinner banquet for the American media at the immensely popular Ford Exhibit in the Century of Progress World's Fair in Chicago, Illinois. Note first that he chose a world-class event to introduce the little-known Cinderella crop. Now listen to the names of dishes on the menu: "Tomato juice seasoned with soy bean sauce. Salted soy beans. Celery stuffed with soy bean cheese [tofu]. Puree of soy bean. Soy bean cracker. Soy bean croquettes with tomato sauce. Buttered green soy beans. Pineapple ring with soy bean cheese [tofu] and soy bean dressing. Soy bean bread with soy bean relish. Soy bean biscuit with soy bean butter. Apple pie (soy bean crust). Cocoa with soy bean milk. Soy bean coffee. Assorted soy bean cookies. Soy bean cakes. Assorted soy bean candy."

This menu represented a fresh, new vision of soyfoods in America! Note the creative use of tofu in a pineapple ring and as a celery stuffing, and of soymilk with cocoa.

But this was just the beginning. By Aug. 1935 Ford was serving soy ice cream for dessert at VIP and press luncheons held at the Ford Engineering Laboratory. In about 1936 Ford's Edison Institute published a 19-page booklet titled "Recipes for Soy Bean Foods," which contained 58 innovative American-style preparations including: Soy bran bread. Cinnamon buns. Muffins (for diabetic patients). Waffles (with soy flour). Scalloped green soy beans. Omelette (with tofu). Salad soy bean sprouts. Gingerbread. Honey soy bean ice box cookies. Macaroons. Coconut balls (with chopped soynuts). Lady fingers. Soy bean chocolate bars. Apple sauce cake. Doughnuts. Soy bean custard (with soymilk).

In 1938, when Ford researcher Bob Smith invented a new and greatly improved type of soymilk (based on

© Copyright Soyinfo Center 2013

soy protein isolates), Ford and his researchers focused on developing new dairylike products based on this soymilk, including a non-dairy whipped cream, and an improved soy ice cream. The soymilk itself was widely served at Ford institutions in and around Dearborn, Michigan.

Indeed a strong case can be made that Henry Ford and his coworkers played the leading pioneer role in developing American-style soyfoods and introducing them in a big way to America. In so doing, they set the stage for the rapid rise of soyfoods consumption among typical Americans that began in a small way during World War II, and in a big way starting in the 1970s and continuing into the 1990s.

13293. *SoyaScan Notes.* 2013. The visionary work of Henry Ford and his researchers with soyfoods–then and now: Pioneered soy ice cream (Overview). Compiled by William Shurtleff of Soyinfo Center.

• ***Summary:*** Starting in the mid-1970s, soy ice cream has become quite popular and widely available in America. Ice Bean, made by The Farm Food Co. in San Rafael, California, was launched in 1976, soon achieved nationwide distribution at natural- and health food stores, and is till on the market. Tofutti–the best-selling soy ice cream of all time–was introduced by David Mintz at his Kosher Jewish Deli, Mintz's Buffet, in 1981. By 1982 it was sold throughout New York City, and in 1983 Mintz established a corporation named Tofu Time Inc. to sell stock to the public and market Tofutti nationwide. Sales of Tofutti skyrocketed to $9 million in 1984, then to a record $17.1 million in 1985. By the summer of 1985 at least 26 brands of soy ice cream (many with "Tofu" on the label) were on the market in America. Today soy ice creams are sold throughout America at virtually all natural- and health food stores and at many supermarkets. By early 1993 at least 208 commercial soy ice cream products had been launched worldwide, including 127 in the USA. Henry Ford was a pioneer in developing soy ice cream. In the early 1930s Ford researchers Robert Boyer and Edsel Ruddiman developed an experimental soy ice cream at Greenfield Village. It was based on fresh tofu curds and soy protein isolates. Chef Jan Willemse claimed (in 1992) to have served vanilla and honey flavored soy ice cream to Henry Ford in his private dining room in late 1934. By Aug. 1935 Ford was serving soy ice cream for dessert at VIP and press luncheons held at the Ford Engineering Laboratory. By Sept. 1942 a soymilk plant at Ford's George Washington Carver Laboratory in Dearborn was producing 150 gallons of soymilk a day. Soon part of this soymilk was being used to make soy ice cream, which was served at the Ford cafeterias and the Henry Ford Hospital in Detroit, Michigan. In 1951 Bob Rich of Rich Products in Buffalo, New York, launched Chil-Zert, America's first commercial soy ice cream. He got the idea from Henry Ford's Carver Laboratory and, like the Lab, made his ice cream from isolated soy proteins.

13294. *SoyaScan Notes.* 2013. When soy-related terms first appear in the *Reader's Guide to Periodical Literature* (Overview). Compiled by William Shurtleff of Soyinfo Center.

• ***Summary:*** The Reader's Guide to Periodical Literature began publication in 1894. Soybeans first appear as a subject heading in the April 1949–March 1952 issue. Information on soybeans and soyfoods is found under the following subject headings: Central Soya Company. Coffee substitutes. Cookery–soybeans. Cookery–vegetables. Diesel fuels (from 1979-1980). Food substitutes. Lecithin. Soybeans (divided into: Cost, cultivation, diseases and pests, drying, export-import trade, harvesting, hybrids, marketing, prices, seed, seeding (planting), yield; with See also: cookery–vegetables). Multipurpose Food (from 1949). Plant proteins. Root tubercles. Soybean industry. Soybean products (with See also: okara, tempeh, tofu). Tempeh (from 1976-1977). Tofu (from 1977-1978). Tofutti/Tofutti Brands Inc. (from 1984-1985). Vegetarianism.

13295. *SoyaScan Notes.* 2013. Chronology of soymilk worldwide–1500 A.D. to 1949. Part I. Compiled by William Shurtleff of Soyinfo Center.

• ***Summary:*** 1500 A.D.–The earliest known written reference to soymilk appears in China in a poem titled "Ode to Tofu," written by Su Ping

1665–Soymilk is first mentioned by a Westerner, Domingo Fernández de Navarrete, in his book *A Collection of Voyages and Travels.* Navarrete served as a Dominican missionary in China.

1790–Soymilk is mentioned by Juan de Loureiro in his book *The Flora of Cochin China.* Loureiro was a Portuguese Jesuit missionary who lived in what is now Vietnam. Note that each of these and many other early references mentioned soymilk as part of the process for making tofu.

1866–Soymilk is first discussed as a drink in its own right by the Frenchman Paul Champion, who traveled in China. In a French-language article he stated that the Chinese had taken their cups to tofu shops to get hot soymilk, which they drank for breakfast.

1896 June–Soymilk is first referred to in the United States by Henry Trimble in the *American Journal of Pharmacy.*

1909–The first soy-based infant formulas and soymilk made from full-fat soy flour are developed in the United States by John Ruhräh, a pediatrician. He reports his results in the *Archives of Pediatrics* (July 1909).

1910–The world's first soy dairy, named *Caséo-Sojaïne,* is founded by Li Yu-ying, a Chinese citizen, biologist and engineer, at 46-48 Rue Denis Papin, Les Vallées, Colombes (near Asnières), a few miles northwest of Paris. In December 1910 he applies for the world's first soymilk patents (British Patents No. 30,275 and 30,351). The first patent is titled "Vegetable milk and its derivatives." He is issued both

© Copyright Soyinfo Center 2013

patents in Feb. 1912.

1913 June 13 Li Yu-ying is issued the first U.S. soymilk patent (No. 1,064,841), titled "Method of manufacturing products from soja." He filed the application on 10 Oct. 1911.

1917–Soymilk is being produced commercially in the U.S. by J.A. Chard Soy Products in New York City.

1929 Nov.–T.A. Van Gundy, founder of La Sierra Industries in Arlington, California, launches La Sierra Soy Milk, and becomes the first Seventh-day Adventist worldwide to make soymilk commercially. The product was canned and the beany flavor removed by live steam processing.

1931–Madison Foods of Madison, Tennessee, introduces Madison Soy Milk–the world's earliest known soymilk to be fortified with calcium and the second commercial soymilk product made by Seventh-day Adventists in the USA. Madison Foods is a company run by students and faculty within Madison College, a pioneering work/study school.

1936 Jan.–Dr. Harry W. Miller and his son, Willis, start making Vetose Soya Milk, sold in natural or chocolate flavors in sterilized half pint or quart bottles at their Vetose Nutritional Laboratories in Shanghai, China. Dr. Miller is a Seventh-day Adventist physician, a student of Dr. John Harvey Kellogg, and a medical missionary living in China. The world's first "soy dairy," this company also made soy ice cream and Acidophilus Vetose (a cultured soya milk)–both launched in Jan. 1936. But Japan was invading China. Within months after the soy-milk business began booming, a Japanese bomb blew up the soy dairy.

1936 June–Sobee, the world's earliest known branded soy-based infant formula, is launched by the American Soya Products Corp. of Evansville, Indiana.

1939 autumn–Dr. Harry W. Miller, forced by the war in China to return to the USA, starts making soymilk at Mt. Vernon, Ohio, in a large brick plant which he and coworkers built from the ground up. The first two products were canned liquid soymilk (made in a pressure cooker and fortified with vitamins and minerals) and malted soymilk (Soy-A-Malt). Pressure from the powerful U.S. dairy industry and the USDA convinced Miller not to call his product 'soymilk,' so he latinized the name to Soya Lac. This term was first used in late 1939 for Miller's first American soymilk.

1940 March–K.S. Lo, founder and managing director of the Hong Kong Soya Bean Products Co. Ltd. starts to make soymilk in Hong Kong. His product, originally named Vita Milk (*Wai-ta-nai* in Chinese) was fortified with calcium, cod-liver oil, and vitamins, and sold in milk bottles, primarily as a nutritious, affordable beverage for refugees. In June 1940 the product was renamed Sunspot, and in 1953 it was renamed Vitasoy. Continued.

13296. *SoyaScan Notes.* 2013. Chronology of tofu worldwide–965 A.D. to 1929. Part I. Compiled by William Shurtleff of Soyinfo Center.

• ***Summary:*** 965 A.D.–Tofu is first mentioned in China in a document, the *Qing Yilu* (Wade-Giles: *Ch'ing I Lu*) [Anecdotes, Simple and Exotic], by Tao Ku. It states: "In the daily market were several catties of doufu. People of the region called doufu the 'vice mayor's mutton.'" It goes on to tell the story of a vice mayor named Jishu, who was so poor that he couldn't afford to buy mutton. Instead he bought a few pieces of tofu every day and ate them as a side dish with rice. Soon people in the area came to call tofu the "vice mayor's mutton." The story implies that tofu was widely consumed in China in those days and that it was less expensive than mutton.

1183 A.D.–Tofu is first mentioned in Japan in the diary of Hiroshige NAKAOMI, a Shinto priest of the shrine at Nara; the tofu was used as an offering at the shrine's altar.

1489–The word "tofu" is first written in Japan with the characters used today.

1603–The word "tofu" is first mentioned in a European-language (Portuguese) document, *Vocabulario da lingoa de Iapam...* [*Vocabulary of the language of Japan*], the earliest dictionary of the Japanese language compiled by Europeans (Jesuits living in Nagasaki, Japan). Tofu is referred to as *Cabe, Tôfu,* or *Taufu.*

1613–The word tofu is first referred to (though indirectly) for the second time by a Westerner, Captain John Saris, in the log of his trip to Japan. He wrote "Of Cheese [probably tofu] they haue plentie. Butter they make none, neither will they eate any Milke, because they hold it to bee as bloud [blood], nor tame beasts." This is the earliest English-language document that mentions tofu in connection with Japan.

1665–Tofu is first mentioned specifically by a Westerner, Domingo Fernández de Navarrete, in his book *A Collection of Voyages and Travels.* Navarrete, who served as a Dominican missionary in China, wrote: "Before I proceed to the next chapter, because I forgot it in the first book, I will here briefly mention the most usual, common and cheap sort of food all *China* abounds in, and which all men in that empire eat, from the emperor to the meanest *Chinese,* the emperor and great men as a dainty, the common sort as necessary sustenance. It is call'd *teu fu,* that is, paste of kidney-beans. I did not see how they made it. They draw the milk out of the kidney-beans, and turning it, make great cakes of it like cheeses, as big as a large sieve, and five or six fingers thick. All the mass is as white as the very snow, to look to nothing can be finer. It is eaten raw, but generally boil'd and dressed with herbs, fish, and other things. Alone it is insipid, but very good so dressed and excellent fry'd in butter. They have it also dry'd and smok'd, and mix'd with caraway-seeds, which is best of all. It is incredible what vast quantities of it are consum'd in *China,* and very hard to conceive there should be such abundance of kidney-beans. That *Chinese* who has *teu fu,* herbs and rice, needs no other

© Copyright Soyinfo Center 2013

sustenance to work; and I think there is no body but has it, because they may have a pound (which is above twenty ounces) of it any where for a half-penny. It is a great help in case of want, and is good for carriage. It has one good quality, which is, that it causes the different airs and seasons, which in that vast region vary much, to make no alteration in the body, and therefore they that travel from one province to another make use of it. *Teu fu* is one of the most remarkable things in *China,* there are many will leave pullets for it. If I am not deceiv'd, the *Chineses* of *Manila* [Philippines] make it, but no *European* eats it, which is perhaps because they have not tasted it, no more than they do fritters fry'd in oil of *Ajonjoli* ([sesame seed] a very small seed they have in *Spain* and *India,* which we have not) which the *Chineses* make in that city and is an extraordinary dainty."

1704–Friar Domingo Navarrete's book is published in English. This is the earliest English-language document that mentions tofu in connection with China.

1770 Jan. 3–James Flint in Capringe writes Benjamin Franklin in London (in response to an inquiry from Franklin) a detailed description of how the "Chinese convert Callivances into Towfu" (soybeans into tofu).

1770 Jan. 11–The earliest document seen in which an American mentions tofu is a letter written by the famous Benjamin Franklin (who was in London) to John Bartram in Philadelphia, Pennsylvania. He sent Bartram some soybeans (which he called "Chinese caravances") and with them he sent "Father Navarrete's account of the universal use of a cheese made of them in China, which so excited my curiosity, that I caused enquiry to be made of Mr. [James] Flint, who lived many years there, in what manner the cheese was made, and I send you his answer. I have since learned that some runnings of salt (I suppose runnet) is put into water, when the meal is in it, to turn it to curds."

1821–The second earliest reference seen to tofu in America, and the first to be published in the USA, appeared when A.F.M. Willich of Philadelphia mentioned it in *The Domestic Encyclopedia.* Speaking of soybeans (which he called "the seeds of the Chinese plant *Dolichos soja"*), he wrote: These *seeds* are used in China and Japan as food; they are made into a kind of jelly or curd, which is esteemed very nutritious, and which is rendered palatable by seasonings of different kinds."

1870 Dec.–The term "Bean curd" is first used by Emil V. Bretschneider, writing in English in the *Chinese Recorder and Missionary Journal* (Foochow, p. 173). He said: "Bean-curd is one of the most important articles of food in China." Then he gave an accurate description of how it was made.

1880–Tofu is first made in Europe by Paillieux, in France, for the Society for Acclimatization (but not on a commercial scale).

1878–The earliest tofu company in the USA, Wo Sing & Co., is in business at 708½ Dupont St. in San Francisco, making both fermented and regular tofu.

1895–Hirata & Co. in Sacramento, California, the earliest known Japanese-American company in the USA, starts making tofu.

1896 June–Tofu first appears in print in an American scientific journal (*American Journal of Pharmacy*), in an article by Henry Trimble, a pharmacist, titled "Recent Literature on the Soja Bean."

1906–Quong Hop & Co., the oldest existing tofu maker in America today, starts making tofu in San Francisco, California.

1910–Europe's first commercial soyfoods manufacturer, named *Caséo-Sojaïne,* is founded by Li Yu-ying, a Chinese citizen, biologist and engineer, at 46-48 Rue Denis Papin, Les Vallées, Colombes (near Asnières), a few miles northwest of Paris. By May 1911 he was making and selling tofu, and by August 1911 he had added smoked tofu, pressed tofu sheets, fermented tofu cheese (in Gruyere, Roquefort, and Camembert flavors), and soymilk.

1923–The two oldest existing Japanese-American tofu companies (House Foods & Yamauchi Inc. of Los Angeles and Aala Tofu Co. of Honolulu) are founded in Hawaii. They both began as H. Iwanaga Daufu at 1031 Aala St. in Honolulu. In 1926 the company was renamed Shoshiro Kanehori Tofu, and in 1937 Haruko Uyeda Tofu, still at the same address. In about 1939 the company was purchased by Mr. and Mrs. Shokin Yamauchi, who later renamed it Aala Tofu Co. Their son, Shoan Yamauchi, made tofu at the family company until 1946, when he went to Los Angeles, purchased the Hinode Tofu Co., and began making tofu there in 1947. After becoming Matsuda-Hinode Tofu Co. in 1963, the company was renamed House Foods & Yamauchi Inc. in 1983.

1929 Nov.–T.A. Van Gundy, a Seventh-day Adventist and founder of La Sierra Industries in Arlington, California (near Riverside), becomes the first Westerner to make tofu commercially when he introduces La Sierra Soya Cheese. This tofu was canned and pimiento was added to prevent graying after canning. Continued.

13297. *SoyaScan Notes.* 2013. Chronology of tofu worldwide–1930 to present. Part II. Compiled by William Shurtleff of Soyinfo Center.

• ***Summary:*** 1930s early–Azumaya Tofu Seizo-sho (later renamed Azumaya Co.) starts making tofu, *yaki-dofu* (grilled tofu), and *ganmodoki* (fried tofu patties) in San Francisco at 1636 Post St. between Buchanan and Laguna streets. The company is owned by Mr. Teranishi, who may have started it as early as the early 1920s. In Feb. 1937 it was sold to George and Jack Mizono, and their mother and father (Saichi Mizono).

1932, Dec.–Madison Foods, part of Madison College in Madison, Tennessee, was making Soy Cheese, then by 1939 they had launched Cheze-O-Soy (seasoned tofu), and by 1940 they were making a canned tofu bologna named Yum.

© Copyright Soyinfo Center 2013

1934–By this year Loma Linda Food Co. (Adventist) in Loma Linda, California, was making Loma Linda Vege-Cheese (canned tofu with pimiento).

1942 Sept.–Dr. Harry Miller, a Seventh-day Adventist doctor who had worked for many years in China as a medical missionary, begins making Miller's Soya Cheese (tofu) at Mt. Vernon, Ohio.

1944 Sept.–Butler Food Co. in Cedar Lake, Michigan, introduces Butler's Soynut Cheese. Note that the first five Caucasian-run tofu companies in the Western World were all founded and run by Seventh-day Adventists. Note also that each of these five Seventh-day Adventist tofu products used the word "cheese" in the name and that each was canned. 1957 Aug.–Shizuka Hayashi, head of the Japanese-American Soybean Institute in Tokyo, publishes (in *Soybean Digest*) the earliest English-language statistics on tofu in Japan. "There are approximately 45,000 tofu manufacturers in Japan, of which about 23,000 are members of the Tofu Association. There is one large factory in Osaka, the largest in Japan, which consumes 2 tons of soybeans a day." In 1957 Japan will use somewhere between 160,000 and 308,000 tons of soybeans to make tofu.

1958–The world's first packaged tofu is sold in Los Angeles, California, by Matsuda Hinode Tofu Co. Mr. Shoan Yamauchi, owner, conceived of the idea of putting individual cakes of tofu each in a plastic bag with water, sealing the bag with a heat sealer, placing the bag in a stiff paper deli carton with a wire handle, then folding over the top. The process was labor intensive. This happened at about the same time that a letter from journalist George Yoshinaga had led the city to pass a new regulation requiring tofu to be packaged in individual containers.

1958–Tofu is first sold in a U.S. supermarket–Boy's Market supermarket chain (which had about 12 stores at the time) in Los Angeles. The tofu was sold in individual packages (see above) and made by Matsuda Hinode Tofu Co., whose owner, Mr. Shoan Yamauchi was responsible for this major innovation, and for seeing the mainstream potential of tofu.

1965–The Library of Congress establishes the subject heading "Tofu" as the official name for that food in cataloging books for libraries across America. However, in the mid-1970's disputes arose there about the proper form of romanization of that term. The dispute was resolved by the decision to use the common English term "Bean Curd" instead.

1966–Tofu is first packaged in plastic trays/tubs, the type so widely used today. Again, Mr. Yamauchi conceived of the idea. He went to the Sealright Company in Los Angeles that made Sealright trays and asked them to make a waterproof plastic tray for his tofu. Mr. Yamauchi created three specific early innovations in tray packaging: (1) A very deep tray, holding 26-28 ounces; (2) A method for heat sealing a plastic film to the flange of a tray which had cold water flooding over the flange; (3) High-speed sealing machines to pack and seal the tofu in his plant.

1975 March–Alec Evans, owner of first of the new breed of Caucasian-run tofu shops, starts to make "Tofu" in Corvallis, Oregon. His Welcome Home Bakery and Tofu Shop is the sixth Caucasian-run tofu company in America.

1975 Dec.–*The Book of Tofu,* by Shurtleff and Aoyagi, is published by Autumn Press. This book, which had sold about 550,000 copies by 1997, played a major role in introducing tofu to the Western World.

1977 Aug.–Takai Tofu & Soymilk Equipment Co. publishes its first English-language equipment catalog, which helps many American and European tofu shops to get started.

1977 Sept.–White Wave, owned by Steve Demos, starts making tofu at 1738 Pearl St., in Boulder, Colorado.

1977–Morinaga Milk Industry Co., Ltd. in Japan introduces the world's first aseptically packaged tofu in a Tetra Brik carton. It is named "Morinaga brand Tofu. Soybean Curd." In 1978 the name was changed to "Morinaga brand Ever-Fresh Silken Tofu."

1977–Swan Foods Corporation, owned by Robert Brooks and Mary Pung, starts making "Tofu–Organic" at The Soybeanery, 5758½ Bird Rd., Miami, Florida. This is the first tofu in the Western World labeled "Organic." Swan Foods is also the first American company to make a wide variety of soyfoods, and the first to open a soy deli–which had a take-out menu.

1978 April–Nasoya Foods, owned by John Paino and Bob Bergwall, starts making Nasoya Organic Tofu (water pack) at Mechanic Street Exit, Leominster, Massachusetts.

1978 Dec.–*The Book of Tofu,* by Shurtleff and Aoyagi, is published by Ballantine Books in a mass-market edition that retails for $2.95.

1979 July–*Tofu & Soymilk Production,* by Shurtleff and Aoyagi, is published by Soyfoods Center in California. This book is used to start hundreds of tofu manufacturing companies throughout the Western World and in some Third World countries.

1982 April–There are 242 tofu manufacturers in the Western World, including 173 in the United States.

1985 June–The Library of Congress decides to change its subject heading from "Bean curd" back to "Tofu." This, perhaps more than any other single thing, makes the word tofu "official."

1983–House Food Industrial Co., Ltd. of Japan purchases 50% ownership in Yamauchi Enterprises (formerly Hinode Tofu Co., owned by Mr. Shoan Yamauchi) in Los Angeles. The company is renamed House Foods & Yamauchi, Inc.

1989 Dec.–Sixty-five books (each more than 48 pages long) on tofu have been published in the Western World since 1970. Each one has the word "tofu" or its equivalent in the title. Forty of these books were published in the United States, 6 in Canada, 5 in Switzerland, 5 in Japan (but

© Copyright Soyinfo Center 2013

written in English for sale primarily outside of Japan), 3 in West Germany, 3 in France (but 2 of these were published simultaneously and primarily in Quebec, Canada), 2 in England, and 1 each in Italy, Sweden, and Brazil.

1990 Aug. 3–Hong Kong Soya Bean Products Co. Ltd. (makers of Vitasoy) acquires Nasoya Foods of Leominster, Massachusetts.

1993 June–Vitasoy purchases Azumaya Inc. (America's largest tofu manufacturer, and the low-price leader) in California for an estimated $4-$5 million.

1993–House Foods Corp. of Japan purchases the remaining 50% of House Foods & Yamauchi, Inc. from Mr. Shoan Yamauchi. The new company is renamed House Foods American Corporation.

1997 March 12–House Foods America Corporation holds the opening ceremony for America's largest tofu factory, in Garden Grove, California; the company closes its tofu plant in central Los Angeles.

13298. *SoyaScan Notes.* 2013. Chronology of Vietnam (formerly divided by Colonial France into Tonkin and Annam in the north and Cochin-China in the south). Compiled by William Shurtleff of Soyinfo Center.

• ***Summary:*** From its beginnings as a distinct nation, Vietnam, which shares its northern border with two provinces of southern China (Yunnan and Guangxi) has been strongly influenced by China. China ruled Vietnam for most of the period from 207 BC to AD 939. 111 BC–The Chinese Han dynasty conquered Nam Viet, a kingdom in what is now northern Vietnam. The northern part of Vietnam was made a province of China in the 1st century BC. During these ten centuries, China introduced such things as Confucianism, Buddhism (later; and its vegetarianism and vegetarian cuisine), architecture, writing, administrative methods–and probably soybeans and soyfoods (such as jiang {*tuong*}, soy sauce, tofu, yuba, etc.), chopsticks, the wok, the art of deep-frying, noodles, and the custom of communal meals at restaurants. Vietnam remained a tributary state to China for much of its history.

From this point until the 1700s, the history of Vietnam remains unclear and controversial–depending heavily on who is writing it.

From about the 7th century until 1832 the kingdom of Champa controlled much of what is today central and south Vietnam. To its north lay Dai Viet (today's north Vietnam), and to its west lay Angkor and the Khmer empire.

From AD 939 to 1407 there were six successive Vietnamese dynasties–Ngo, Dinh, Early Le, Ly, Tran, and Ho.

The fourth and final Chinese domination (during the Ming Dynasty in China) lasted from 1407 to 1427; in the latter year the Vietnamese handed the Ming occupying army a sound defeat. The Chinese conquered what is today north Vietnam; it was named Annam and its capital was Hanoi. South of Annam was Champa.

The next major dynasty in Vietnam was the Le dynasty (1428-1788), which lasted 360 years. Then came the Tay Son dynasty (1778-1802), and the Nguyen Dynasty (1802-1945, with its capital in Hue in central Vietnam).

In 1802 Nguyen Anh united the country and called it Vietnam.

The era of European colonialism began in the 1800s. The French, seeking recompense in empire after the loss of Alsace-Lorraine at the end of the Franco-Prussian War (1870-71), moved into Indochina and ruled with an iron hand–while also bringing French culture, food and cuisine (café au lait, French bread, milk, butter, yogurt, etc.) to Vietnamese elites. Conquest by France began in 1858 and ended in 1884 with the protectorates of Tonkin and Annam in the north and center, respectively, and the colony of Cochin-China in the south.

1940-1945–Japan controlled Vietnam during World War II. Occupied by Japan, nationalist aspirations grew stronger. A number of groups formed the Vietminh (Independence) League, headed by Ho Chi Minh, Communist guerilla leader, and his brilliant general Vo Nguen Giap.

The Empire of Vietnam was a short-lived puppet state of Imperial Japan governing the whole of Vietnam between March 11 and August 23, 1945; its capital was in Hue.

1945 Aug.–The Vietminh forced out Bao Dai, former emperor of Annam and head of a Japanese-sponsored regime. In 1945 Ho Chi Min proclaimed the establishment of the Democratic Republic of Vietnam in Hanoi 1946-1954–France, seeking to reestablish colonial control, battled communist and nationalist forces, but was finally defeated at Dienbienphu on 8 May 1954.

1954 June 4–North Vietnam declares independence from France. 1954 July 21–Cease fire signed in Geneva divided country into north and south along the 17th parallel. Some 900,000 North Vietnamese fled to South Vietnam. 1954 Dec. 29–South Vietnam declares independence from France.

1963–U.S. intervention in Vietnam begins under President John F. Kennedy. 1963 Nov. 2–Ngo Dinh Diem, the first president of South Vietnam, is assassinated in a Saigon suburb; he is replaced with a military junta. 1963 Nov. 22–President Kennedy is assassinated in Dallas, Texas; Lyndon Johnson becomes president. 1964 Aug.–The USA enters the war and begins air strikes against North Vietnam. 1965–First U.S. ground combat troops deployed in South Vietnam. 1969 April–U.S. troop strength peaks at 543,400, then gradual withdrawal of troops begins.

1973 Jan. 27–A cease-fire agreement is signed in Paris by the USA, North and South Vietnamese governments, and the Vietcong–but the agreement was never implemented. Also on Jan. 27 U.S. Secretary of Defense Melvin Laird announced the end of the military draft because no more U.S. troops would be needed since, he believed, the Vietnam War was now over. Note 1. The real end of the war did not

© Copyright Soyinfo Center 2013

come until April 1975, more than two years later! Note 2. The decision to end the U.S. military draft–and to change thereafter to an all-volunteer military–was made by one non-elected official, without public debate, and for the wrong reason. Note 3. The U.S. started withdrawing its troops from Vietnam soon after signing this cease-fire and finished two months later. In this way they extracted themselves from a terrible war and tried to save face without admitting defeat or surrendering; but they then left their allies, the South Vietnamese, to try to finish the war alone. Of course the U.S. knew they would lose–which they did in April 1975.

1973 March–The last U.S. forces leave Vietnam. 1975 early–Massive numbers of North Vietnamese troops, aided by tanks, launch attacks against the remaining South Vietnamese outposts in the Central Highlands. Government retreats turned into a rout. 1975 April 29–The fall of Saigon and of South Vietnam. The South Vietnamese regime and military surrenders to the Vietcong. The last Americans flee Saigon in a helicopter from the top of the U.S. embassy. America lost the war, if not militarily, at least psychologically and culturally. U.S. combat deaths: 47,369.

1976 July 2–Vietnam is officially reunited by the Communists, with Hanoi as the capital. The first national assembly of both parts of the country meets. The North Vietnam flag, anthem, emblem, and currency are used in the newly unified nation.

1985–Vietnam starts to reduce central control of the economy and introduce some free-market economic reforms. By 1987 many of the old revolutionary followers of Ho Chi Minh were removed from office.

1994 Feb. 3–U.S. announces the end of a 19-year embargo on trade with Vietnam–citing Vietnamese cooperation in returning remains of U.S. soldiers killed in the Vietnam War. 1995 July 11–U.S. extends full diplomatic recognition to Vietnam. Also this year Vietnam joins the Association of Southeast Asian Nations (ASEAN). 1997 May–First U.S. ambassador since the war, Pete Peterson, arrives in Vietnam.

2006–The USA has become Vietnam's top export market, with annual trade over $6 billion. 2006 June 5–The two countries agreed to strengthen defense ties. 2006 June 27–Communists reputed to be economic reformers became president and prime minister.

13299. *SoyaScan Notes.* 2013. Definition of teriyaki and teriyaki sauce (Overview). Compiled by William Shurtleff of Soyinfo Center.

• ***Summary:*** Etymology: Formed from the Japanese verbs *teru* "to shine or be glossy or bright" and *yaku* "to grill or broil" (traditionally over charcoal or coals, using a hibachi, a small, usually round charcoal brazier).

Teriyaki, a Japanese appetizer, is said to have originated in Japan during the Edo period (1600-1867; see *The History and Culture of Japanese Food,* by Naomichi Ishige, 2001, p. 116; he does not cite his source). The word "teriyaki" originally referred to fish (or occasionally poultry), cut into small pieces, marinated in a Mirin-Shoyu sauce, skewered on bamboo skewers, grilled on the hibachi, and basted / brushed occasionally with the sauce; the mirin was considered the key to the glossy appearance. Note: Mirin is sweetened sake for cooking or seasoning. Shoyu is regular Japanese-style soy sauce.

As the recipe became Westernized in the early 1950s, it was transformed; the mirin was often omitted, garlic (ideally fresh, crushed), and a small amount of sweetener (such as sugar or pineapple juice) were added, and chunks or thin strips of beef were often used in place of fish. The teriyaki sauce was used initially as a marinade, then later in the cooking process for basting while grilling.

Although teriyaki originated in Japan, it came to the United States largely from Hawaii in the early 1950s, and was soon viewed by Americans as an Hawaiian recipe and dish. American versions may skewer chunks of fruit (such as pineapple) or vegetables (green or red bell peppers) alternatively with chunks of meat. Vegetarian versions usually use pressed firm tofu or seitan in place of meat. Address: Soyfoods Center.

13300. *SoyaScan Questions.* 2013. Questions about Swan Foods, Robert Brooks, and Mary Pung of Miami, Florida. Compiled by William Shurtleff of Soyinfo Center.

• ***Summary:*** 1. What year and month did the company start making soy products? 2. What was the first product they made? 3. What year and month did they run their first ad in *Alternatives* magazine in Miami? What library owns early issues of this magazine? How can we contact the publisher, Chik Shank? 4. When and where did they run other ads in magazines? 5. Try to assign a year and month to each commercial product they made.

6. When did they start experimenting with a vacuum-packaging machine for packing tofu. 7. Did they ever sell vacuum-packed tofu? 8. What year and month did the company stop making soy products? (Probably Dec. 1978).

9. In late 1976, Mary Pung flew in to attend one of the programs on our Tofu & Miso America tour. Where was that program? She invited us to come to Florida. Did that invitation have anything to do with our trip to Florida on Dec. 27-28, 1976?

10. What is the full name of Mary's son?–His first name is Aslan. Where is he now? What is his date of birth? 11. When and where was Mary born? Social Security number? 12. Who owned Swan Foods? Only Robert Brooks? Robert and Mary? Any other people? 13. On what exact date did Robert commit suicide? Try to find an obituary, article, then death record. 14. Why did Robert move from New York to Florida?

15. When, where, and how did Robert first meet Mary Pung? 16. What caused Mary and Robert to break up,

© Copyright Soyinfo Center 2013

and her to start drinking and to end up as homeless and living on the streets? 17. Are any of Robert's or Mary's parents, siblings, or close friends still alive? How can they be contacted? Tatiana, Debbie Curin (305-667-7692–she developed recipes with Mary Pung), Mark Lewis (of High Falls Realty in New York), Robert's father (he owned Mid-Hudson Liquor in Poughkeepsie, New York), Roberts brother (the attorney who was given custody of Aslan). 18. Try to get some newspaper articles from Nov. 1978 about the huge 3-day Hans Jiyanti festival in Kissimmee, the capital of Osceola County, Florida, held in honor of Guru Maraji and his father, Hans. Some 10,000 people attended.

13301. *SoyaScan Questions.* 2013. Questions about Swan Gardens, Inc., Dick McIntyre, and Jocelyn, of Montana and Florida. Florida. Compiled by William Shurtleff of Soyinfo Center.

• ***Summary:*** 1. When and where was Dick McIntyre born? Try for a birth certificate.

2. What was Jocelyn's maiden name? When and where was she born?

3. When and where were they married?

4. When did they move to St. Ignatius, Montana?

5. When did they buy land in St. Ignatius, Montana? Try for a land deed.

13302. *SoyaScan Questions.* 2013. Questions about the history of yuba. Compiled by William Shurtleff of Soyinfo Center.

• ***Summary:*** How could the Chinese have chosen such an apparently meaningless word as *doufu pi* ("bean curd skin") to refer to yuba? Today, yuba is not part of the process for making tofu (or soymilk). Yuba would seem to be more accurately described as "soymilk skin" rather than as "tofu skin." But could there be some long-lost connection between making yuba and making tofu in ancient China? A number of documents describe this connection. However Dr. H.T. Huang (personal communication, 25 Feb. 2010), an expert on the history of food in China, says: "The names of these products were probably coined by illiterate artisans, so I wouldn't worry about their lack of logic or elegance."

Look in early indigenous language documents for the earliest reference to yuba in countries surrounding China where yuba is made or used today, such as Vietnam, Indonesia, Philippines, Cambodia, Thailand, etc.

An asterisk (*) at the end of the record means that SOYFOODS CENTER does not own that document.
A plus after eng (eng+) means that SOYFOODS CENTER has done a partial or complete translation into English of that document.
An asterisk in a listing of number of references [23* ref] means that most of these references are not about soybeans or soyfoods.

Feeds / Forage from Soybean Plants–Pasture, Grazing or Foraging. 330, 460, 675, 684, 772, 1152, 1156, 1262, 1367, 1372, 1381, 1501, 1513, 1542, 1543, 1551, 1565, 1622, 1645, 1666, 1714, 1749, 1837, 1933, 1962, 2008

Feeds / Forage from Soybean Plants–Pastures & Grazing–Hogging Down / Off, Pasturing Down, Grazing Down, Lambing Down / Off, and Sheeping-Down / Off. 675, 684, 1152, 1367, 1372, 1507, 1513, 2156

Feeds / Forage from Soybean Plants–Silage / Ensilage Made in a Silo. 239, 244, 255, 418, 423, 438, 460, 616, 620, 675, 772, 773, 914, 958, 1055, 1152, 1156, 1262, 1367, 1372, 1379, 1381, 1501, 1513, 1542, 1543, 1551, 1565, 1645, 1663, 1666, 1714, 1749, 1771, 1783, 1837, 1929, 1933, 1962, 2008, 2156, 2209, 2647, 2729

Feeds / Forage from Soybean Plants–Soilage and Soiling (Green Crops Cut for Feeding Confined Animals). 675, 958, 1152, 1367, 1372, 1381, 1513, 1565, 1622, 1783, 2156

Feeds / Forage from Soybean Plants–Straw (Stems of Whole Dried Soybean Plants). Also Fertilizing Value, Other Uses, Yields, and Chemical Composition. 221, 244, 252, 270, 271, 283, 295, 316, 351, 418, 421, 460, 687, 723, 726, 788, 914, 919, 958, 1156, 1367, 1372, 1379, 1381, 1565, 1749, 1783, 1962, 2008, 2156, 2209

Feeds / Forage from Soybean Plants or Full-Fat Seeds (Including Forage, Fodder {Green Plants}, or Ground Seeds). 5, 6, 19, 22, 60, 62, 63, 64, 164, 196, 217, 242, 243, 246, 254, 258, 259, 262, 263, 265, 279, 280, 303, 308, 328, 331, 342, 360, 363, 392, 396, 447, 515, 516, 526, 566, 575, 577, 598, 606, 609, 613, 652, 661, 664, 666, 669, 673, 686, 712, 767, 778, 790, 822, 862, 920, 935, 937, 938, 942, 951, 952, 974, 982, 983, 984, 1001, 1003, 1039, 1063, 1081, 1091, 1105, 1118, 1130, 1170, 1305, 1313, 1350, 1361, 1422, 1444, 1475, 1491, 1497, 1503, 1573, 1609, 1649, 1710, 1712, 1715, 1745, 1842, 1875, 1890, 1934, 1945, 2002, 2055, 2115, 2348, 2663, 3239, 3962, 5022, 8382, 8453, 8754, 9490

Feeds Made from Soybean Meal (Defatted). 148, 219, 259, 312, 425, 606, 616, 652, 655, 657, 677, 687, 705, 772, 773, 788, 865, 866, 872, 898, 942, 951, 952, 1066, 1096, 1102, 1170, 1293, 1305, 1381, 1491, 1631, 1649, 1663, 1796, 1797, 1933, 2113, 2156, 2297, 2342, 2355, 2501, 2542, 2751, 2767, 2889, 2977, 3166, 3169, 3196, 3497, 4056, 4132, 4845, 4953, 5566, 5606, 7349, 7365, 7467, 7957, 7994, 8035, 8382, 9063, 9258, 9346, 9539, 9930, 10347, 11593

Feeds, Other Types (Okara, Calf Milk Replacers, Soybean Hulls, etc.). 1107, 3957, 5328, 6290

Feminization. *See* Reproduction / Reproductive, Fertility, or Feminization Problems

Fermented Black Soybean Extract (*Shizhi / Shih Chih*), and Fermented Black Soybean Sauce (Mandarin: Shiyou / Shih-yu. Cantonese: Shi-yau / Si-yau / Seow. Japanese: Kuki-jiru). See also Black Bean Sauce. 7, 8, 19, 21, 51, 78, 158, 161, 172, 192, 205, 210, 384, 576, 1057, 1268, 1997, 2248, 2304, 3974, 5399, 5612, 7316, 9100, 11502, 12015, 12256

Fermented Black Soybean Production–How to Make Fermented Black Soybeans on a Commercial Scale. 53, 1771, 3291, 6444

Fermented Black Soybeans–Etymology of This Term and Its Cognates / Relatives in Various Languages. 127, 160, 161, 186, 205, 442, 456, 860, 1066, 1178, 1315, 1370, 1492, 1597, 1771, 2035, 2109, 2116, 2399, 2530, 2752, 2910, 2960, 3252, 3575, 5025, 5942, 6405, 8403, 12015, 12780

Fermented Black Soybeans–Whole Soybeans Fermented with Salt–Also called Fermented Black Beans, Salted Black Beans, Salty Black Beans, Black Fermented Beans, Black Beans, Black Bean Sauce, Black Bean and Ginger Sauce, Chinese Black Beans, Preserved Black Beans or Preserved Chinese Black Beans. In Chinese (Mandarin): Shi, Doushi, or Douchi (pinyin), Tou-shih, Toushih, or Tou-ch'ih (Wade-Giles). Cantonese: Dow see, Dow si, Dow-si, Dowsi, or Do shih. In Japan: Hamanatto, Daitokuji Natto, Shiokara Natto, or Tera Natto. In the Philippines: Tausi or Taosi / Tao-si. In Malaysia or Thailand: Tao si. In Indonesia: Tao dji, Tao-dji, or Tao-djie. 5, 7, 8, 9, 19, 20, 21, 23, 45, 51, 52, 53, 54, 58, 60, 78, 79, 88, 89, 94, 97, 115, 126, 127, 152, 158, 160, 161, 172, 186, 192, 200, 205, 210, 219, 239, 241, 262, 287, 294, 304, 310, 373, 375, 384, 392, 400, 411, 442, 445, 456, 464, 500, 576, 581, 770, 774, 788, 815, 860, 967, 968, 1035, 1057, 1066, 1122, 1152, 1153, 1157, 1178, 1199, 1235, 1236, 1268, 1304, 1311, 1315, 1361, 1370, 1454, 1455, 1492, 1495, 1508, 1597, 1645, 1648, 1712, 1744, 1748, 1771, 1863, 1931, 1997, 2035, 2045, 2072, 2074, 2077, 2078, 2081, 2109, 2116, 2117, 2142, 2180, 2201, 2203, 2212, 2218, 2239, 2248, 2256, 2288, 2291, 2304, 2311, 2329, 2341, 2384, 2397, 2399, 2414, 2418, 2426, 2437, 2438, 2443, 2530, 2533, 2534, 2535, 2536, 2582, 2583, 2598, 2612, 2613, 2614, 2628, 2631, 2664, 2668, 2669, 2731, 2732, 2733, 2736, 2737, 2752, 2792, 2812, 2853, 2883, 2902, 2910, 2911, 2914, 2956, 2960, 2973, 2977, 2978, 2981, 3018, 3039, 3040, 3045, 3049, 3074, 3083, 3089, 3109, 3116, 3144, 3145, 3152, 3213, 3215, 3218, 3240, 3242, 3252, 3288, 3291, 3293, 3297, 3299, 3313, 3315, 3344, 3345, 3364, 3428, 3442, 3443, 3445, 3446, 3450, 3459, 3460, 3462, 3475, 3508, 3562, 3575, 3615, 3617, 3627, 3642, 3643, 3648, 3664, 3666, 3673, 3826, 3955, 3973, 3974, 3978, 3981, 3989, 4005, 4342, 4404, 4410, 4415, 4423, 4432, 4447, 4448, 4451, 4750, 4759, 4844, 4845, 4851, 4855, 4874, 4895, 4958, 5025, 5052, 5083, 5092, 5204, 5210, 5359, 5365, 5378, 5399, 5406, 5508, 5559, 5568, 5612, 5621, 5623, 5823, 5932, 5938, 5942, 6099, 6103, 6198, 6222, 6226, 6227, 6257, 6402, 6403, 6405, 6406, 6431, 6444, 6537, 6551, 6620, 6695, 6839, 6840, 6851, 6853, 6866, 6890, 6909, 6957, 7066, 7311, 7316, 7322, 7328, 7342, 7348, 7793, 7796, 7799, 7900, 8111, 8113, 8168, 8403, 8479, 8642, 8905, 8907, 8929, 8982, 9100, 9101, 9167, 9326, 9327, 9561, 9581, 9615, 9757, 9928, 10001, 10007, 10025, 10026, 10093, 10260, 10268, 10276, 10278, 10279, 10282, 10422, 10499, 10517, 10742, 10863, 10889, 11012, 11048, 11058, 11076, 11093, 11108, 11229, 11306, 11351, 11395, 11412, 11495, 11502, 11539, 11543, 11553, 11556, 11641, 11747, 11786, 11793, 11851, 11879, 11930, 12014, 12015, 12018, 12026, 12092, 12114, 12179, 12221, 12238, 12246, 12256, 12297, 12316, 12330, 12346, 12360, 12368, 12376, 12502, 12507, 12602, 12606, 12609, 12670, 12671, 12690, 12728, 12755, 12761, 12770, 12774, 12779, 12780, 12781, 12851, 12923, 12924, 12926, 12948, 12958, 12960, 13004, 13010, 13068, 13075, 13156, 13208, 13223, 13249, 13252, 13255

Historical–Earliest Commercial Product Seen of a Particular Type or Made in a Particular Geographic Area. 216, 403, 484, 518, 520, 522, 552, 554, 597, 633, 730, 753, 835, 1167, 1168, 1202, 1252, 1349, 1390, 1484, 1766, 1767, 2283, 2849, 2896, 3120, 3185, 3229, 3273, 3343, 3479, 3535, 3556, 3579, 3610, 3721, 3751, 3932, 4384, 4687, 4728, 4809, 4827, 4938, 5041, 5198, 5292, 5341, 5545, 5732, 5827, 5856, 6152, 6205, 6239, 6656, 6763, 6764, 6797, 6811, 6817, 6826, 6948, 7245, 7269, 7388, 7475, 7886, 8799, 8892, 9285, 9300, 9783, 9891, 9947, 10109, 10619, 10633, 10865, 10958, 11277, 11776, 11859, 12800

Historical–Earliest Document Seen Containing a Particular Word, Term, or Phrase. 17, 32, 52, 55, 57, 59, 102, 104, 105, 107, 110, 124, 134, 145, 163, 168, 172, 176, 183, 185, 189, 193, 196, 200, 203, 205, 219, 239, 242, 263, 271, 280, 292, 308, 312, 314, 327, 339, 342, 351, 363, 364, 385, 387, 392, 397, 406, 410, 415, 437, 451, 453, 456, 463, 510, 511, 526, 533, 541, 561, 566, 603, 608, 613, 619, 662, 665, 666, 668, 683, 684, 700, 721, 728, 738, 860, 898, 913, 919, 924, 965, 972, 984, 992, 993, 996, 1018, 1081, 1088, 1089, 1091, 1096, 1112, 1117, 1118, 1152, 1155, 1172, 1186, 1236, 1265, 1266, 1307, 1315, 1338, 1378, 1380, 1473, 1494, 1495, 1502, 1505, 1506, 1507, 1537, 1538, 1543, 1565, 1639, 1643, 1648, 1650, 1665, 1720, 1740, 1749, 1750, 1776, 1798, 1801, 1820, 1902, 1925, 1952, 1961, 1968, 1990, 1998, 2005, 2027, 2036, 2101, 2119, 2158, 2168, 2173, 2180, 2234, 2239, 2284, 2364, 2380, 2477, 2531, 2567, 2586, 2667, 2713, 2795, 2813, 2855, 2916, 2921, 2942, 2961, 3018, 3039, 3075, 3105, 3106, 3131, 3144, 3145, 3161, 3213, 3215, 3254, 3314, 3377, 3447, 3450, 3594, 3658, 3670, 3697, 3719, 3736, 3813, 3945, 4000, 4002, 4179, 4518, 4550, 4559, 4960, 5141, 5470, 5519, 5902, 5929, 6295, 6395, 6514, 6592, 6733, 6735, 6763, 6932, 6935, 7032, 7363, 7554, 7636, 7983, 8677, 8935, 9078, 9718, 9973, 10300, 10325, 12229, 12948, 13000

Historical–Earliest Document Seen That Mentions a Particular Soybean Variety. 824, 919, 942, 1265, 1726, 1783, 1827, 1982, 9220

Historical–Earliest Document Seen of a Particular Type. 91, 194, 1319, 1727, 4316, 6985, 7383, 10286, 10310, 11247

Historical–Earliest Document Seen on a Particular Geographical Area–a Nation / Country, U.S. State, Canadian Province, or Continent. 74, 95, 104, 113, 159, 183, 196, 219, 233, 243, 245, 268, 270, 304, 354, 391, 419, 451, 484, 509, 552, 554, 572, 575, 577, 597, 621, 652, 653, 716, 790, 819, 835, 898, 914, 933, 1015, 1035, 1082, 1130, 1202, 1252, 1390, 1543, 1607, 1645, 1932, 1982, 1988, 2115, 2288, 2465, 2849, 3185, 3273, 3343, 3479, 3751, 4687, 4728, 4809, 4827, 4938, 5341, 5856, 6152, 6797, 6811, 6817, 6826, 8892, 9285, 9300, 9783, 9947, 10619, 10633, 10865, 10958, 10987, 11277, 11859

Historical–Earliest Document Seen on a Particular Subject. 3, 4, 6, 17, 21, 32, 33, 44, 53, 54, 55, 57, 58, 60, 63, 64, 66, 73, 74, 78, 89, 95, 105, 132, 133, 134, 138, 159, 161, 168, 174, 176, 182, 183, 185, 194, 196, 220, 239, 242, 254, 259, 339, 367, 368, 374, 391, 392, 398, 409, 415, 418, 422, 460, 465, 466, 479, 491, 501, 509, 515, 527, 532, 541, 598, 613, 654, 655, 662, 672, 675, 683, 686, 696, 697, 701, 711, 714, 727, 728, 731, 773, 779, 831, 897, 946, 969, 974, 996, 1025, 1060, 1107, 1166, 1186, 1286, 1378, 1435, 1444, 1454, 1461, 1469, 1537, 1539, 1544, 1562, 1571, 1572, 1606, 1652, 1667, 1727, 1744, 1767, 1771, 1784, 1845, 1869, 1968, 1981, 1997, 2124, 2132, 2188, 2217, 2253, 2283, 2307, 2326, 2330, 2346, 2356, 2358, 2362, 2414, 2415, 2435, 2566, 2570, 2593, 2597, 2614, 2684, 2795, 2900, 2912, 2955, 3052, 3071, 3072, 3106, 3188, 3195, 3196, 3273, 3336, 3352, 3353, 3356, 3357, 3358, 3366, 3462, 3474, 3480, 3488, 3515, 3535, 3557, 3579, 3584, 3585, 3586, 3608, 3611, 3682, 3699, 3702, 3729, 3813, 3829, 3897, 3936, 4022, 4048, 4049, 4126, 4179, 4189, 4262, 4397, 4516, 4555, 4609, 4611, 4635, 4788, 5153, 5220, 5240, 5437, 5470, 5501, 5662, 5758, 5805, 6159, 6193, 6205, 6248, 6260, 6287, 6295, 6581, 6687, 6726, 6938, 6941, 6948, 7005, 7021, 7057, 7068, 7160, 7336, 7972, 8233, 8240, 8473, 9189, 9224, 9718, 9791, 10454, 10894, 12046, 12229

Historical–Earliest Document Seen on a Particular Subject. 4, 7, 8, 33, 55, 130, 162, 168, 170, 198, 216, 219, 225, 232, 240, 244, 318, 376, 380, 398, 401, 414, 471, 477, 479, 488, 503, 526, 564, 565, 655, 664, 708, 780, 826, 934, 969, 1031, 1040, 1056, 1060, 1065, 1083, 1105, 1130, 1163, 1170, 1283, 1420, 1434, 1442, 1454, 1494, 1501, 1541, 1609, 1709, 1714, 1775, 2264, 2358, 2533, 2541, 2559, 2922, 2939, 2985, 3071, 3206, 3288, 3486, 3519, 3610, 3659, 4015, 4020, 4809, 5911, 7066, 9973, 10100, 10254, 10991, 11776, 12922, 13296

Historically Important Events, Trends, or Publications. 3, 4, 14, 20, 52, 53, 54, 65, 66, 68, 87, 149, 262, 403, 518, 708, 788, 897, 964, 1028, 1055, 1166, 1167, 1168, 1286, 1489, 1509, 1652, 2302, 2391, 2555, 2631, 2715, 2723, 2941, 3005, 3114, 3209, 3394, 3439, 3496, 3556, 3589, 3610, 3637, 3805, 3838, 3954, 4018, 4137, 4359, 4360, 4764, 4841, 5270, 5435, 5807, 5813, 5814, 6009, 6269, 6313, 6314, 6497, 6510, 6757, 6758, 6759, 6760, 6941, 7225, 7226, 7683, 7728, 7971, 7993, 8004, 8127, 8138, 8222, 8281, 8282, 8306, 8395, 8403, 8533, 8645, 9012, 9077, 9126, 9131, 9155, 9160, 9196, 9411, 9458, 9482, 9842, 9922, 10301, 11270, 11339, 11521, 11764, 11997, 12218, 12275, 12302, 12347, 12481, 12680, 12757, 12840, 12916,

Oceania (General, Also Called Australasia, or Australia and Islands of the Pacific / Pacific Islands). 1067, 3462, 11719, 11734

Oceania–Australia, Commonwealth of (Including Tasmania, Cocos (Keeling) Islands, Christmas Island, Coral Sea Islands Territory, Norfolk Island, Territory of Ashmore and Cartier Islands, and Australian Antarctic Territory). 162, 230, 232, 247, 281, 287, 298, 310, 312, 364, 369, 417, 423, 426, 715, 716, 768, 778, 790, 862, 872, 942, 1035, 1102, 1152, 1175, 1357, 1442, 1635, 1645, 1712, 1715, 1727, 1775, 2070, 2114, 2115, 2181, 2443, 2669, 2792, 2835, 2923, 2956, 3196, 3462, 3627, 3634, 3757, 3804, 3992, 4007, 4013, 4066, 4128, 4183, 4464, 4527, 4697, 4734, 4772, 4835, 4839, 4915, 5005, 5011, 5108, 5152, 5209, 5231, 5239, 5257, 5275, 5290, 5301, 5304, 5305, 5306, 5437, 5473, 5692, 5696, 5703, 5704, 5713, 5745, 6022, 6120, 6135, 6286, 6471, 6472, 6473, 6638, 6762, 6835, 6907, 6923, 6941, 7018, 7020, 7061, 7088, 7199, 7245, 7313, 7323, 7538, 7559, 7572, 7732, 7744, 8007, 8116, 8369, 8377, 8452, 8546, 8579, 8821, 8830, 9053, 9077, 9276, 9277, 9407, 9550, 9553, 9577, 9591, 9592, 9758, 9768, 9795, 9804, 9809, 9820, 9822, 9823, 9878, 9922, 9977, 10047, 10061, 10071, 10122, 10124, 10170, 10250, 10401, 10456, 10567, 10568, 10623, 10659, 10737, 10788, 10881, 10992, 11041, 11093, 11113, 11159, 11356, 11396, 11432, 11481, 11492, 11548, 11566, 11734, 11825, 11826, 11827, 11828, 11888, 11947, 12004, 12044, 12186, 12218, 12321, 12340, 12393, 12394, 12429, 12511, 12544, 12546, 12574, 12625, 12628, 12630, 12725, 12727, 12733, 12771, 12837, 12871, 12899, 12900, 12925, 12973, 12998, 13001, 13042, 13045, 13079, 13262

Oceania–Fiji. 1645, 5437

Oceania–French Polynesia (French Oceania from about 1903 to sometime between 1946 and 1958. A French Overseas Territory in the South Pacific Ocean, comprising the Marquesas, Society Islands {Including Tahiti}, Gambier, and Tubuai Islands, and the Tuamotu Archipelago). 8919

Oceania–Guam. 5437, 9783

Oceania–Introduction of Soybeans to. Earliest document seen concerning soybeans or soyfoods in connection with (but not yet in) a certain country in Oceania. 264

Oceania–Introduction of Soybeans to. This document contains the earliest date seen for soybeans in a certain country in Oceania. 1035

Oceania–Introduction of Soybeans to. This document contains the earliest date seen for the cultivation of soybeans in a certain country in Oceania. 1035

Oceania–Kiribati (Gilbert Islands until 1979). 5437

Oceania–Nauru (Naoero; Named Pleasant Island from 1798 to 1888). 5437

Oceania–New Zealand–Including Stewart Island, Chatham Islands, Snares Islands, Bounty Islands, and Tokelau (formerly Union Islands). 202, 212, 234, 253, 264, 272, 317, 413, 416, 426, 427, 492, 715, 792, 793, 1285, 1645, 1775, 3462, 3804, 4697, 4728, 4747, 4962, 5152, 5341, 5430, 5437, 5773, 6016, 6549, 7573, 7574, 7575, 7697, 7741, 7744, 8309, 8452, 8719, 9214, 9412, 9573, 9577, 9959, 9962, 10061, 10183, 10288, 10377, 10567, 10594, 10613, 10880, 11219, 11235, 11291, 11293, 11294, 11390, 11396, 11400, 11425, 11475, 11476, 11657, 11664, 11781, 12111, 12218, 12357, 12358, 12701, 12727, 12837, 12867, 12871, 12900, 12973, 12998, 13045

Oceania–Other Pacific Islands, Including American Samoa, Cook Islands (NZ), Niue (NZ), Northern Mariana Islands (U.S., Including Saipan, Tinian, Rota). And Large Pacific Island Groups–Melanesia, Micronesia, Polynesia. 5437

Oceania–Pacific Ocean Islands that are Part of France–Territory of New Caledonia (*Nouvelle Calédonie*) and Dependencies. Dependencies are the Loyalty Islands (*Iles Loyauté*), Isle of Pines (*Ile des Pins–Kunié*), Belep Archipelago (*Iles Bélep*), and Huon Islands (*Ile Huon*). 1645, 5437, 12727

Oceania–Papua New Guinea, Independent State of (British New Guinea from 1888, then Territory of Papua and New Guinea until Sept. 1975. The northeast was German New Guinea from 1884 to 1914, then Trust Territory of New Guinea). 1775, 2036, 5437, 10568

Oceania–Samoa (Formerly Western Samoa; German Samoa until 1914). 5437

Oceania–Solomon Islands (British Solomon Islands Protectorate until July 1978). 5437

Oceania–Soybean Production, Area and Stocks–Statistics, Trends, and Analyses. 11734

Oceania–Tonga, Kingdom of. 5437

Oceania–Tuvalu (The Ellice Islands part of the Gilbert and Ellice Islands Colony before 1976). 5437

Oceania–Vanuatu, Republic of (Named New Hebrides until 1980). 5437

Oelmuehle Hamburg AG (Hamburg, Germany). Founded in 1965 by incorporating Stettiner Oelwerke AG (founded 1910), Toeppfer's Oelwerke GmbH (founded 1915), and Hansa-Muehle AG (founded 1916 as Hanseatische Muehlenwerke AG). 719, 732, 1174, 1269, 1290, 1475, 2041, 3239

Soybean Crushing (General: Soy / Soybean Oil and Soybean Meal). 1001, 1199, 1309, 1550, 1577, 1750, 2041, 2217, 2361, 2415, 2714, 2760, 2900, 2976, 2986, 3375, 3859, 3949, 3957, 4123, 4494, 4835, 4837, 4885, 5576, 5612, 6529, 6531, 6650, 7064, 7227, 7616, 8095, 8992, 9624, 9841, 9951, 9981, 10305, 10465, 10545, 10674, 10825, 11090, 11950, 13231, 13234

Soybean Crushing–Equipment–Hydraulic Presses. 687, 712, 941, 943, 1111, 1174, 1199, 1290, 1344, 2081, 2409

Soybean Crushing–Equipment–Screw Presses and Expellers (Continuous, Mechanical). 1189, 1290, 1379, 2425, 2633, 2760, 2796, 2976, 5586, 5591, 8168, 9539, 10256, 10656, 10978, 11496, 11549

Soybean Crushing–Equipment–Solvent Extraction. 1114, 1115, 1269, 1290

Soybean Crushing–Equipment–Wedge Presses (Early Technology from China and Manchuria). 22, 73, 168, 468, 1344, 2081, 2633, 2668, 2977

Soybean Crushing, Including Production and Trade of Soybean Oil, Meal or Cake, Margarine, or Shortening–Industry and Market Statistics, Trends, and Analyses -. 670, 678, 696, 697, 711, 773, 898, 941, 1025, 1078, 1111, 1152, 1199, 1444, 1475, 1488, 1843, 2024, 2217, 2354, 2361, 2425, 2487, 2563, 2714, 2751, 3039, 3430, 3497, 3633, 3996, 5176, 5722, 6290, 6514, 6515, 6529, 6727, 6992, 7467, 7572, 7957, 7994, 8063, 8197, 8981, 8982, 9063, 9116, 9346, 9487, 9650, 9951, 10347, 10530, 12757, 12914, 13061, 13142, 13213, 13263

Soybean Cultural Practices–No-Till, Conservation Tillage, and Minimum Tillage Farming / Agriculture. 6022, 10293, 11569

Soybean Meal (SBM) (Defatted). Formerly Called Bean Cake, Beancake, Soybean Cake, Oilmeal, or Presscake. 4, 63, 64, 148, 159, 168, 172, 185, 187, 188, 196, 200, 207, 211, 219, 220, 221, 224, 235, 252, 259, 265, 269, 270, 283, 305, 306, 312, 313, 331, 350, 353, 354, 358, 364, 365, 373, 379, 385, 387, 388, 390, 394, 421, 425, 430, 442, 466, 468, 471, 482, 491, 492, 494, 500, 504, 533, 598, 602, 606, 608, 609, 610, 614, 616, 620, 621, 652, 654, 655, 657, 663, 666, 667, 669, 670, 671, 672, 673, 675, 676, 677, 678, 687, 696, 697, 705, 711, 712, 713, 715, 716, 719, 721, 723, 726, 728, 731, 732, 738, 767, 768, 772, 773, 778, 788, 815, 819, 824, 852, 859, 861, 862, 864, 865, 866, 872, 875, 898, 904, 909, 910, 911, 914, 916, 919, 921, 927, 931, 932, 934, 935, 936, 941, 942, 943, 944, 949, 951, 952, 958, 966, 974, 975, 981, 983, 984, 992, 994, 995, 1005, 1022, 1025, 1030, 1031, 1034, 1035, 1040, 1051, 1054, 1057, 1058, 1059, 1060, 1066, 1078, 1091, 1092, 1096, 1102, 1104, 1105, 1111, 1114, 1115, 1121, 1122, 1126, 1141, 1152, 1156, 1157, 1161, 1169, 1170, 1174, 1186, 1189, 1197, 1265, 1269, 1282, 1286, 1288, 1290, 1291, 1293, 1294, 1296, 1305, 1319, 1344,

Soybean Varieties USA–Rokusun–Large-Seeded and / or Vegetable-Type. 1609, 1714, 1726, 1751, 1827, 1982, 2039

Soybean Varieties USA–Sac–Large-Seeded and / or Vegetable-Type. 1827, 2114, 2117

Soybean Varieties USA–Samarow–Early Introduction. 566, 607, 613, 684, 773, 1152

Soybean Varieties USA–Sato–Large-Seeded and / or Vegetable-Type. 1609, 1726, 1827, 1982

Soybean Varieties USA–Sedo–Early Introduction. 684

Soybean Varieties USA–Seminole–Large-Seeded and / or Vegetable-Type. 1827, 2114, 2117

Soybean Varieties USA–Shanghai–Early Introduction. 942, 2143, 3127

Soybean Varieties USA–Shingto–Early Introduction. 684, 958, 1001

Soybean Varieties USA–Shiro–Large-Seeded and / or Vegetable-Type. 1609, 1726, 1827

Soybean Varieties USA–Sioux–Large-Seeded and / or Vegetable-Type. 1726, 1827

Soybean Varieties USA–Sousei–Large-Seeded and / or Vegetable-Type. 1609, 1714, 1726, 1827

Soybean Varieties USA–Southern Prolific–Early Introduction. 1749

Soybean Varieties USA–Stuart–Early Introduction. 1153

Soybean Varieties USA–Suru–Large-Seeded and / or Vegetable-Type. 1609, 1726, 1827, 11937

Soybean Varieties USA–Swan–Early Introduction. 684, 1001

Soybean Varieties USA–Taha–Early Introduction. 684, 958

Soybean Varieties USA–Tarheel Black / Tar-Heel Black / Tar Heel Black–Early Introduction. 1130, 1749, 1890

Soybean Varieties USA–Tashing–Early Introduction. 684

Soybean Varieties USA–Tastee–Large-Seeded and / or Vegetable-Type. 1827, 1845, 1982

Soybean Varieties USA–Toku–Large-Seeded and / or Vegetable-Type. 1609, 1726, 1827, 11937

Soybean Varieties USA–Tokyo / Tokio–Early Introduction. 684, 919, 942, 1055, 1068, 1121, 1122, 1130, 1501, 1606, 1726, 1749

Soybean Varieties USA–Tortoise Egg–Large-Seeded and / or Vegetable-Type. 1975

Soybean Varieties USA–Verde–Large-Seeded and / or Vegetable-Type. 10210, 11817

Soybean Varieties USA–Vinton–Large-Seeded and / or Vegetable-Type. 6180, 6640, 7032, 7859, 8447, 8449, 8475, 8673, 9056, 9220, 9221, 9436, 9509, 10085, 10210, 10248, 10661, 10662, 10747, 10835, 10850, 10929, 10963, 11252, 11325, 11442, 12075, 12464, 12896

United States–States–Virginia. 423, 427, 438, 566, 607, 613, 619, 684, 717, 786, 914, 942, 1039, 1112, 1157, 1335, 1341, 1350, 1365, 1434, 1500, 1606, 1666, 1739, 1740, 1774, 1867, 1913, 2001, 2354, 2718, 2923, 3238, 3353, 3721, 3749, 3770, 4665, 4908, 4920, 4973, 5144, 5286, 5369, 5665, 5899, 5952, 6103, 6122, 6326, 7009, 7085, 7277, 7506, 8604, 8788, 8979, 9248, 9660, 9921, 9924, 10066, 10225, 10314, 10327, 10612, 10638, 10720, 10850, 11007, 11091, 11145, 11334, 11769, 11770, 11817, 11839, 11867, 11951, 12141, 12171, 12199, 12221, 12276, 12548, 12559, 12621, 12795, 12827, 12840, 12916, 12961, 13056, 13131, 13229, 13238, 13246, 13282

United States–States–Washington state. 450, 552, 554, 556, 587, 623, 643, 645, 659, 693, 694, 703, 711, 733, 735, 747, 798, 800, 801, 827, 828, 836, 839, 850, 854, 873, 903, 906, 929, 934, 940, 959, 1025, 1042, 1043, 1079, 1085, 1099, 1124, 1149, 1175, 1179, 1255, 1339, 1410, 1462, 1601, 1602, 1618, 1619, 1643, 1753, 1767, 1846, 1983, 1984, 2082, 2094, 2105, 2122, 2153, 2160, 2162, 2165, 2202, 2500, 2586, 2646, 2847, 2850, 3047, 3147, 3351, 3353, 3356, 3361, 3366, 3373, 3374, 3397, 3492, 3493, 3495, 3545, 3548, 3587, 3644, 3712, 3731, 3733, 3750, 3757, 3762, 3864, 3915, 3916, 4074, 4084, 4120, 4156, 4180, 4188, 4253, 4259, 4280, 4340, 4344, 4484, 4493, 4515, 4517, 4561, 4593, 4606, 4611, 4624, 4627, 4644, 4645, 4650, 4705, 4759, 4796, 4797, 4898, 4911, 4966, 4968, 4969, 5040, 5107, 5129, 5169, 5236, 5244, 5247, 5414, 5422, 5435, 5438, 5491, 5520, 5539, 5544, 5565, 5573, 5585, 5587, 5594, 5610, 5617, 5657, 5719, 5855, 5906, 5950, 5963, 6009, 6011, 6034, 6104, 6131, 6132, 6133, 6241, 6542, 6566, 6580, 6663, 6941, 6991, 7059, 7065, 7197, 7198, 7206, 7397, 7431, 7473, 7500, 7593, 7601, 7692, 7699, 7712, 7713, 7725, 7727, 7864, 7935, 7991, 8081, 8125, 8178, 8180, 8181, 8182, 8233, 8250, 8251, 8366, 8528, 8554, 8576, 8607, 8769, 8789, 8818, 9060, 9087, 9159, 9160, 9194, 9195, 9239, 9297, 9410, 9418, 9419, 9509, 9614, 9674, 9685, 9817, 9834, 10141, 10205, 10217, 10368, 10411, 10596, 10774, 10929, 10955, 10983, 10991, 11031, 11050, 11076, 11099, 11162, 11167, 11180, 11253, 11256, 11260, 11268, 11269, 11299, 11497, 11498, 11500, 11546, 11566, 11598, 11601, 11650, 11661, 11736, 11749, 11764, 11817, 11970, 11980, 11997, 12007, 12068, 12081, 12125, 12151, 12201, 12310, 12317, 12342, 12349, 12422, 12436, 12452, 12457, 12469, 12495, 12523, 12551, 12554, 12570, 12571, 12572, 12590, 12591, 12601, 12653, 12667, 12715, 12741, 12758, 12820, 12877, 12888, 12903, 12970, 12974, 13094, 13106, 13144, 13171, 13173, 13174, 13177, 13182, 13191, 13225

United States–States–West Virginia. 1000, 1645, 3751, 3757, 3762, 4673, 4701, 4821, 6372, 7013, 7874, 9178, 9179, 9625, 9638, 9836, 11441, 11690

United States–States–Wisconsin. 684, 816, 874, 921, 1152, 1157, 1643, 1645, 1739, 1845, 1981, 2215, 2500, 2612, 2713, 2923, 3106, 3471, 3480, 3677, 3748, 3755, 3757, 3762, 3772, 3919, 4017, 4223, 4365, 4386, 4432, 4532, 4557, 4720, 4742, 4790, 4845, 4904, 4914, 5307, 5308, 5369, 5437, 5555, 5691, 5700, 5789, 5820, 5832, 5868, 6044, 6224, 6338, 6339, 6371, 6372, 6520, 6583, 6668, 6729, 6782, 6783, 6784, 7041, 7093, 7114, 7210, 7250, 7251, 7252, 7309, 7443, 7493, 7494, 8314, 8517, 8620, 8627, 8896, 8897, 8952, 9149, 9223, 9239, 9248, 9643, 9933, 9997, 10155, 10178, 10209, 10333, 10434, 10575, 10658, 10816, 10855, 10988, 11252, 11374, 11584, 11780, 12051, 12218, 12276, 12326, 12332, 12347, 12398, 12481, 12624, 12976, 13000, 13037, 13074, 13210

United States–States–Wyoming. 703, 906, 929, 1202, 1936, 1941, 1952, 1983, 1984, 3047, 12347, 12454

United States Department of Agriculture (USDA)–Agricultural Research Service (ARS, Established 1953). Including Agricultural Research Administration (1942-1953). 1926, 2055, 2249, 2266, 2273, 2291, 2293, 2296, 2353, 2384, 2418, 2488, 2489, 2500, 2511, 2525, 2553, 2559, 2596, 2679, 2686, 3094, 3462, 7316, 7833, 8035, 8197, 8315, 9215, 9411, 9675, 10445, 10672, 11585, 11937, 12486

United States Department of Agriculture (USDA)–Arlington Experimental Farm at Arlington, Virginia (1900-1942). 509, 566, 607, 619, 684, 717, 942, 1112, 1156, 1157, 1341, 1350, 1365, 1434, 1666, 1714, 1867, 5144

United States Department of Agriculture (USDA)–Bureau of Agricultural and Industrial Chemistry (1943-1953). Including Bureau of Agricultural Chemistry and Engineering (1938-1943), Bureau of Chemistry and Soils (1927-1938), and Bureau of Chemistry (1901-1927). Transferred to the Agricultural Research Service (ARS) in 1953. 873, 991, 1012, 1083, 1086, 1158, 1159, 1236, 1643, 2007, 2081, 12017

United States Department of Agriculture (USDA)–Bureau of Human Nutrition and Home Economics (1943-1953). Including Bureau of Home Economics (1923-1943), Office of Home Economics (1915-1923), and Nutrition and Home Economics Work in the Office of Experiment Stations (1894-1915). Transferred to the Agricultural Research Service in 1953. 415, 418, 444, 451, 564, 668, 737, 771, 1443, 1502, 1579, 1600, 1666, 1718, 1855, 1998

United States Department of Agriculture (USDA)–Bureau of Plant Industry, Soils, and Agricultural Engineering (1943-1953). Including Bureau of Plant Industry (1901-1943), Office of Plant Industry (1900-1901), and Division of Agrostology (1895-1901). Transferred to Agricultural Research Service in 1953. 471, 509, 566, 607, 609, 619, 684, 717, 718, 784, 787, 824, 913, 924, 926, 935, 942, 943, 944, 967, 968, 974, 999, 1031, 1057, 1068, 1105, 1118, 1125, 1127, 1152, 1154, 1155, 1156, 1157, 1158, 1173, 1262, 1309, 1319, 1320, 1331, 1334, 1335, 1336, 1340, 1341, 1348, 1350, 1364, 1365, 1366, 1367, 1371, 1372, 1375, 1376, 1379, 1380, 1381, 1382, 1385, 1386, 1432, 1434, 1437, 1444, 1475, 1507, 1513, 1542, 1573, 1606, 1609, 1643, 1666, 1714, 1726, 1739, 1740, 1827, 1845, 1852, 1855, 1925, 1926, 1974, 1979, 2003, 2011, 2031, 2035, 2055, 2061, 2114, 2115, 2116, 2117, 2127, 2156, 2249, 2537, 4659, 5143, 5144, 5145, 6432, 6520, 10260, 11560, 12060

United States Department of Agriculture (USDA)–Food and Nutrition Service (FNS). 4038, 4193, 4987, 5253, 5574, 10951, 12538

United States Department of Agriculture (USDA)–Foreign Agricultural Service (FAS, Est. 1953) Including Office of Foreign Agricultural Relations (1939-1953). Foreign Agricultural Service (1938-1939). 1843, 2240, 2266, 2269, 2291, 2293, 2296, 2330, 2372, 2419, 2425, 2465, 2512, 2751, 2760, 3497, 3511, 9176, 9974, 11165, 13289

United States Department of Agriculture (USDA)–Office of Experiment Stations (1888-1955). Transferred to the Cooperative State Experiment Station Service in 1961. 399, 415, 437, 444, 451, 469, 533, 534, 668, 771, 1153

United States Department of Agriculture (USDA)–Patent Office and Commissioner of Patents, Agriculture (Forerunners of USDA). 170

United States Department of Agriculture (USDA)–Section of Foreign Seed and Plant Introduction (Established 1898 within the USDA with David Fairchild in Charge). Transferred to Bureau of Plant Industry (1 July 1901). Later Referred to as the Office of Foreign Seed and Plant Introduction and then the Office of Foreign Plant Introduction. 438, 453, 471, 509, 566, 607, 609, 619, 684, 717, 718, 784, 787, 867, 913, 924, 926, 935, 942, 974, 975, 999, 1031, 1125, 1127, 1156, 1319, 1331, 1334, 1335, 1340, 1348, 1364, 1366, 1371, 1375, 1376, 1378, 1380, 1386, 1432, 1434, 1739, 1740, 1979, 2003, 2061, 11560

United States Department of Agriculture (USDA)–War Food Administration (WFA), Including the Food Production and Distribution Administration. 1926, 1978

United States Department of Agriculture (USDA; Including Federal Grain Inspection Service [FGIS], and War Food Administration [WFA]). See also: Agricultural Marketing Service, Agricultural Research Service (ARS), Bureau of Plant Industry, Economic Research Service, Food and Nutrition Service, Foreign Agricultural Service, and Section of Foreign Seed and Plant Introduction. 368, 423, 433, 452, 489, 495, 537, 734, 788, 824, 863, 933, 934, 951, 952, 954, 958, 969, 970, 972, 1001, 1003, 1011, 1019, 1020, 1023, 1025, 1049, 1056, 1126, 1130, 1162, 1172, 1291, 1293, 1294, 1305, 1320, 1431, 1441, 1643, 1730, 1915, 1925, 2024, 2078, 2117, 2132, 2166, 2234, 2255, 2267, 2268, 2270, 2299, 2302, 2308, 2325, 2351, 2354, 2408, 2424, 2428, 2502, 2515, 2703, 2709, 2741, 2759, 2768, 2791, 2796, 2884, 2962, 3004, 3012, 3065, 3137, 3138, 3148, 3201, 3241, 3253, 3561, 3625, 3792, 3957, 4013, 4022, 4037, 4054, 4106, 4111, 4139, 4140, 4163, 4377, 4547, 4555, 4573, 4626, 4638, 4954, 5013, 5035, 5057, 5058, 5136, 5153, 5211, 5274, 5302, 5370, 5551, 5887, 6100, 6483, 6507, 6512, 6520, 6861, 7480, 7522, 7572, 7604, 7733, 8288, 8360, 8430, 8549, 8555, 8570, 8838, 8855, 8953, 9020, 9059, 9079, 9140, 9415, 9663, 10091, 10371, 10501, 10522, 10621, 10656, 10746, 10822, 10985, 11043, 11047, 11070, 11111, 11162, 11207, 11429, 11453, 11508, 11718, 11734, 11884, 11905, 11979, 11996, 12126, 12150, 12218, 12481, 12485, 12624, 12670, 12680, 12757, 12914, 13035, 13061, 13074, 13142, 13166, 13213, 13220, 13263, 13290, 13295
