Manufacturer's Address: 1. 5890 Black Welder St., Culver City, CA 90232; 2. P.O. Box 261, Hermosa Beach, CA 90254. Phone: 213-373-5826.
Date of Introduction: 1990. September.
Ingredients: Turkey Style: Water, vital wheat gluten, tofu, natural flavor, canola oil, natural smoke flavor, salt, herbs and spices, soy oil.
Wt/Vol., Packaging, Price: 4 oz (112 gm) paperboard box. Recommended retail: $1.79 (9/90).
How Stored: Refrigerated.
New Product–Documentation: Label sent by Andrew Harrison of Common Objective Co. 1990. Sept. 19. The Roast Beef Style and the Ham Style products contain most of the same ingredients, but no tofu.

Press release. Sept. 1990. "Try a slice of life."

Products with Labels (Turkey, Ham, Roast Beef styles) purchased ($1.75 each) from Berkeley Natural Grocery Co., California. 1991. Nov. 24. 4.5 by 5 by 5/8-inch paperboard box. Turkey: Red, yellow, green, tan, black, and pink on white, with little pink hearts scattered on the white background. Illustration of two slices of bread, with lettuce, and the words "Trim Slice" between them. "All natural. 97% fat free. No cholesterol. Trim Slice is completely free of cholesterol content, very low in fat and it tastes terrific in your favorite sandwich combination. Best of all, Trim Slice is a cruelty-free product containing no animal products or animal by-products." A logo of a turkey in a red circle with a red line diagonally across the cow reads: "No meat. Just wheat."

Soyfoods Center Product Evaluation. 1991. Nov. 26. Package design: Very good. Flavor and texture: One person rates excellent (9), another rates dislike slightly (4).

Talk with Andrew Harrison, President, Heart & Soul, Common Objective Inc. 1991. Nov. 27. Only three products in this line are currently on the market; they were introduced in Sept. 1990. Two others (Corned Beef Style, and Pastrami Style) are under development and will be introduced soon–even though they are listed on the labels of other products in the line as if they were available now. He owns a company, Gourmet Naturally, which manufactures only Heart & Soul Products, including this product. Legally this company is separate from Heart & Soul, but the two will soon be merging. Andrew's forte is sales and marketing; he has worked with distributors and brokers in the natural foods industry for 12 years.

9654. **Product Name:** Heart & Soul Tofu Lasagna, and Tofu Enchilada [California, or Mexicali].
Manufacturer's Name: Gourmet Naturally (Manufacturer). Common Objective Co. (Marketer-Distributor).
Manufacturer's Address: 1. 5890 Black Welder St., Culver City, CA 90232; 2. P.O. Box 261, Hermosa Beach, CA 90254. Phone: 213-373-5826.
Date of Introduction: 1990. September.
New Product–Documentation: Talk with Andrew Harrison, President, Heart & Soul, Common Objective Inc.

© Copyright Soyinfo Center 2013

1991. Nov. 27. These were Heart & Soul's first soy products, introduced in March 1989. The first two products contained tofu, and the Mexicali Enchilada contained soy cheese. None of these are on the market any longer.

9655. **Product Name:** Munchees (With Soy Cheese) [Spinach Tofu, Pizza Tofu, or Veggie].
Manufacturer's Name: Health Is Wealth, Inc.
Manufacturer's Address: Sykes Lane, Williamstown, NJ 08094. Phone: 609-728-1998.
Date of Introduction: 1990. September.
Ingredients: Spinach Tofu (1/92): Stone-ground whole wheat flour, spinach, organic tofu, canola oil, casein (protein), sea salt, citric acid, soy lecithin, guar gum, olive oil, soybean oil, natural spices.
Wt/Vol., Packaging, Price: 6 oz paperboard box contains 11-13 Spinach Tofu Munchees. Retails for $2.39 (1/92, Lafayette, California).
How Stored: Frozen.
New Product–Documentation: Ad (color) in Natural Foods Merchandiser. 1990. Nov. p. 22. "The great taste of cheese without the cheese." Shows 3 labels of Munchees, 2 of which bear the word "tofu" prominently atop the front panel. "Health is Wealth has replaced the cheese in our ever popular egg rolls with tofu mozzarella. Also new are our exciting pizza, veggie, and spinach munchees. Munchees contain the same egg roll fillings but in an individual, bite size, stone ground whole wheat pocket."

Product with Label (Spinach Tofu Munchees) purchased at Open Sesame in Lafayette, California. 1992. Feb. 13. 5 by 4.75 by 1.75 inches. Paperboard box. White, green, and blue on black. Color photo of the prepared munchees which look like 1½-inch square deep-fried pillows stuffed with spinach and cheese. "The great taste of spinach & cheese without the cheese. 11-13 Egg Rolls wrapped in a stone-ground whole wheat pocket. Cholesterol free. No preservatives. Lactose free. Made with the cheese NûTofû alternative." The phone number is now 609-728-1998.

Soyfoods Center Product Evaluation. 1992. Feb. 13. Package design: Excellent, however the text on the front panel of the Spinach Tofu Munchees that states "The great taste of spinach & cheese without the cheese." seems deceptive, since the cheese in this product is made from cow's milk. The ingredients listing is likewise deceptive since it lists "casein (protein)" rather than "casein (milk protein)." A previous ingredient listing which broke out the "soy cheese" and listed its ingredients seemed clearer and more standard. Flavor: We liked the Spinach Tofu Munchees best–by far.

9656. *INTSOY Newsletter* (*Urbana, Illinois*). 1990. Processing and utilization conference sparks interest in soybeans as food. No. 42. p. 1-2. Sept.
• ***Summary:*** The conference, which was co-sponsored by INTSOY, took place in Gongzhuling, Jilin Province, China from June 25 to 29, 1990. The various working sessions and exhibits attracted almost 250 soybean scientist and development officials from 27 countries.

"Besides INTSOY, other sponsors of the conference were the Jilin Academy of Agricultural Sciences; the Chinese Academy of Agricultural Sciences; the Japanese Agriculture, Forestry, and Fisheries Research Council Secretariat; the Scientific Research Institute of Foods and Fermentation Industry; and the International Institute of Tropical Agriculture...

"Some 80 presented papers covered topics ranging from reports on soybean utilization efforts in specific countries to sophisticated medical studies on the health effects of soybean use.

"One especially important paper reported on the potential of soybean components known as saponins to control reproduction of the HIV virus which is associated with Acquired Immune Deficiency Syndrome or AIDS. The report from Japanese scientists in the Department of Food Chemistry at Tohoku University indicated that one class of saponins showed inhibitory effects against HIV infection in vitro.

"Besides attending the working sessions, participants viewed some 37 demonstrations and exhibits from all over China...

"The conference organizers also provided a number of local tours of interest to participants. These included visits to a modern tofu plant, the Soybean Research Institute of the Jilin Academy of Agricultural Sciences, the labs and pilot plant of the Scientific Research Institute of Foods and Fermentation Industries, and the headquarters and gene bank of the Chinese Academy of Agricultural Sciences...

"The general recommendations from the final report called for holding the conference on a regular basis every three or four years. The report suggested Brazil and Africa as potential sites for the next conference."

9657. Katz, Solomon. 1990. An evolutionary theory of cuisine. *Human Nature* (*Hawthorne, New York*) 1(3):233-59. Sept. [32 ref]*
Address: Dep. of Anthropology, Univ. of Pennsylvania.

9658. Maitre, Pierre. 1990. Current European markets for soyafoods. Lecture presented at Eurosoya Conference. Held 5-7 Sept. 1990 at Strasbourg, France. *
• ***Summary:*** The following is summarised from a report by SoyaFoods (1990. 1(2):6-7). France: A study in April 1990 on 2,052 men and women showed that for 33% of respondents the word 'soya' was associated with oil. Indeed 66% had not heard of any soyafoods. Of the remaining 34%, only 19% had heard of soyamilk and 19% of soya-based desserts. Tofu and other products were less well known. Some 57% thought soya was a modern product, 66% thought

© Copyright Soyinfo Center 2013

soya was nutritious, and 61% thought soya was good for slimming. The reasons for not consuming soyafoods were given as follows: Never thought about it 45%. Prefer to buy my usual brands 14%. Do not like the taste 14%. Not found in shops 6%. Too expensive 5%.

For those who had tasted soyamilk or desserts, the taste was rated as follows: Soyamilk and other soy drinks: Rather good taste 58%, neither good nor bad 29%, rather bad taste 8%. Desserts: Rather good taste 61%, neither good nor bad 26%, rather bad taste 11%. As a result of this survey in France, SOJAXA is targeting its activities to address the problem of educating the consumer about soyafoods, in particular tofu which is less well known in France than soyamilk and desserts.

The UK: Most large supermarkets carry soyafoods, except Marks and Spencer. The strong interest in vegetarianism has played a major role in the development of the soyafoods market. Vegetarians represent about 8.6% of the population and the vegetarian market is estimated at about £5 billion.

Benelux: The Benelux markets are similar to France. In Belgium there are at least 11 suppliers of soyamilks. The most popular products are drinks and desserts. Higher income groups tend to consume soyafoods.

Germany: Soyafoods are more widely carried in natural food stores (*Biolaeden*) and Reform Houses (*Reformhaeuser*) than in supermarkets. Young German consumers accept soyafoods more readily than French consumers but price is an important factor. German consumers seem to be well informed about products and the best selling items (in descending order of importance) are tofu, sauces, sausages and delicatessen products, milks, and desserts. The following percentages of shoppers in *Biolaeden* and Reform Houses have positive opinions about soyafoods: 70% in the age 20-30 group, 55% in the age 30-40 group, and 65% in the over 40 age group.

"Spain: Soyafoods development is fairly constant in Mediterranean countries such as Spain. All soyafoods are imported and are found in specialist shops, generally associated with dietetic products, e.g. calorie controlled products. Only recently have soyafoods been sold in large supermarkets. The influence of tourism has led to a changed image for soyabeans which are perceived as good for health and a modern lifestyle. Current interest is producing new products which are geared to local tastes. The most common products at present are soya drinks, desserts, sauces and soya sausages. Sales in non-specialist shops are likely to become more important.

"Italy: Soya foods and products containing soya are sold mainly for dietetic reasons.

"In summary Mr. Maitre felt that progress had been made over the years in terms of product quality, marketing, product information and international recognition, but there should be no complacency. More will need to be done to stimulate demand in Europe." Address: 18 Square les Oliviers, 13111 Coudoux–Aix en Provence, France. Phone: 33/43.52.09.44 (fax).

9659. Ornish, Dean. 1990. Dr. Dean Ornish's program for reversing heart disease: The only system scientifically proven to reverse heart disease without drugs or surgery. New York, NY: Random House. xxxi + 638 p. Sept. Index and recipe index. 17 cm. [288* ref]

• ***Summary:*** This is a landmark, pioneering book–indeed a classic. In addition to carefully documented information on how to reverse heart disease, it offers 100 pages of vegan recipes, including a 21-day menu. It focuses on a low-fat, low-cholesterol diet, regular moderate exercise, stopping smoking, stress management through meditation and yoga, and (ideally) a support group.

Contents: Author's note. Foreword. Introduction–Heart and soul. Part one: Opening your heart. Part two: The opening your heart program. Part three: Opening your heart recipes. Introduction to the recipes by Shirley Elizabeth Brown, M.D., and Martha Rose Shulman. Twenty-one days of menus. The recipes. Epilogue. Appendix: Nutrient analysis of common foods. Selected references.

In the chapter titled "Introduction to the recipes" a long section on "Soybean products" gives basic information about the following: Whole soybeans, soy flour, soy milk ("It is much higher in fat, lower in vitamin B-12, and lower in calcium than nonfat cow's milk."), soy sauce, tamari, miso, soy cheeses, tempeh, textured vegetable protein (TVP), isolated soy protein, and tofu ("Tofu is a miracle food; it is very easy to digest, very high in protein, low in calories and fat, economical, and extremely versatile").

In the chapter titled "Recipes" is a long section on "Tofu Dishes," which begins with a good introduction: "Tofu is one of the most versatile foods." "Tofu is very high in protein and the perfect substitute for cheese and eggs." Eleven recipes follow: Tofu cheese with fresh herbs. Marinated tofu. Scrambled tofu and vegetables. Lydia's Mexican casserole. Tofu stew with miso. Sweet and sour wok-cooked vegetables with tofu. Chinese eggplant and tofu. Steamed fresh vegetables and tofu with soba noodles (and Misoyaki sauce). Stuffed manicotti (with Marinara sauce).

At the start of each chapter are great quotations. The 288 selected references, listed chapter by chapter at the back, are a valuable addition. As early as 1972 Dr. Ornish was learning meditation and yoga techniques from Swami Satchidananda; these evolved into the stress management program described in chapters 7-9. In 1975 he first became interested in conducting research on heart disease, when he was a medical student at Baylor College of Medicine in Houston, Texas. In 1977 he had the privilege of studying with Dr. Michael DeBakey, assisting in the operating room when he performed bypass surgery. Though his surgical skill was amazing, Ornish began to see the "limitations" of technological

© Copyright Soyinfo Center 2013

approaches that literally and figuratively *bypassed* the underlying causes of the problem. It was the difference between temporizing and healing." Most bypass patients "would go home and continue to do the same things that led to the problem in the first place. They would smoke, eat a high-fat, high-cholesterol diet, manage stress poorly, and lead sedentary lives."

For details on this book and its significance, see MacNeil/Lehrer Newshour. 1990. Dec. Address: M.D., Preventive Medicine Research Inst., Sausalito, California 33658. Phone: 415-332-2525.

9660. Scotton, Ken. 1990. Virginia Soyworks. Route 1, Box 193, Faber, VA 22938. 4 p. Sept. Unpublished manuscript.
• ***Summary:*** This business is now for sale (for $8,000) and this document describes the history and financial status of the company, including assets, rent, etc. Just over half the sales are in tofu which is sold mostly in bulk. Sales for the last 10 months of 1989 were $39,435, and for the first 6 months of 1990 they were $22,800. "I bought the business in March of 1989. Both the tofu and tempeh business had been shut down for 3 months. I chose not to invest in starting up the tempeh part of the business... About half of my sales are to the Integral Yoga Natural Foods store in Charlottesville... I bought the business for $10,600, and have spent almost $1,000 since in additional equipment." There are 5 photos of the inside of the shop and equipment. Address: Faber, Virginia. Phone: 804-361-1543.

9661. *Soya International* (*Bar Harbor, Maine*). 1990. Bean Machines installs three new systems in North America. July/Sept. p. 3.
• ***Summary:*** San-Francisco based Bean Machines Inc. has recently installed their new continuous tubular cooking systems, used for making tofu and soymilk, in plants at Ann Arbor, Michigan, Duarte, California, and Quebec, Canada. Capacities range from 300 to 900 gallons/hour. Contact Bean Machines at P.O. Box 2122, Mill Valley, CA 94242. Phone: 415-285-9411.

9662. *Soya International* (*Bar Harbor, Maine*). 1990. Tofu festival held in Taiwan. July/Sept. p. 3.
• ***Summary:*** "In celebration of the 2169th birthday of the tofu inventor Liu An–King of Huai-nan of the Han Dynasty of China–Taiwan's tofu industry presented its 'First Tofu Festival', on September 15, 1990. The event was held at Taipei Grand Hotel for over 300 attendees. The Tofu Festival was planned to promote further usage of tofu and to spur development of new tofu products, such as tofu ice cream, burgers, etc. The event was sponsored by Dr. T.C. Tung, Chairman of the Chinese Research Foundation of Food and Nutrition, and Dr. Steve Chen, President of the Chinese Nutrition Society, (Director of American Soybean Association/Taiwan). Henry Kao, Senior Advisor to the President of the ROC [Taiwan] was keynote speaker."

9663. *Soya International* (*Bar Harbor, Maine*). 1990. Medical center says nondairy products may not be milk free. July/Sept. p. 3.
• ***Summary:*** "Foods that do not list milk as an ingredient may not be completely milk-free. Johns Hopkins Children's Center reported that three children with cow's milk hypersensitivity developed acute allergic reactions after eating tofu and rice based frozen desserts. The desserts were manufactured in dairy processing plants, but despite standardized cleaning procedures, the nondairy products were contaminated with milk sufficient to cause allergic reactions (half a teaspoon or less per serving.) In one case, a child reacted to a hot dog which contained hydrolyzed sodium caseinate, a milk derivative. This ingredient was not listed on the label, because it fell into the category of 'natural flavoring.' The hot dog contained an amount of sodium caseinate equivalent to a third of a milliliter of milk. The USDA is changing the regulations so that milk-derived ingredients can no longer be designated 'natural flavorings' and must be labeled by their common or usual name."

9664. **Product Name:** Soya Nova Soya Sage Rolls.
Manufacturer's Name: Soya Nova Tofu Shop.
Manufacturer's Address: R.R. #2 Rourke Road, C-28, Ganges, Saltspring Island, BC, V0S 1E0, Canada. Phone: 604-537-9651.
Date of Introduction: 1990. September.
Ingredients: Incl. okara, tofu, brown rice, fresh onions, garlic, carrots, chili peppers (seasonal), olive oil, safflower oil, herbs and spices.
How Stored: Refrigerated.
New Product–Documentation: Letter from Greg Lundh of Silverking Soya Foods in Nelson, BC, Canada. 1990. Dec. 14. Soya Nova Tofu Shop introduced this product in Sept. 1990. Labels are not yet available.

Talk with Debbie Lauzon. 1990. Dec. 28. "I now have a really cute little cottage industry. I met a master pastry chef from France named Pascal Pellerin. He worked at Tassajara in California for a while. When I saw that he was unemployed I put him at work in the tofu shop. We came up with some really nice Soyasage Rolls... They use okara and are made in French puff pastry and can be sold frozen. Just bake and serve. The inside has okara, tofu, brown rice, olive oil, herbs, spices, etc."

Leaflet sent by Deborah Lauzon. 1991. Feb. 6. "Soya Nova Tofu Shop." Describes the rolls and lists ingredients.

9665. **Product Name:** [Tofu, and Seitan].
Foreign Name: Tofu, Seitan.
Manufacturer's Name: Vis Naturae.
Manufacturer's Address: via Carmignanello, 108, 50040 Cantagallo FI, Italy. Phone: 0574/957162.

© Copyright Soyinfo Center 2013

Date of Introduction: 1990. September.
New Product–Documentation: Letter from Gianni Viglino of Savona, Italy. 1991. Dec. 20. This small company has produced tofu twice a week since Sept. 1990. They use 70-80 kg/week of organic soybeans. The beans are imported from the USA. They will try making tempeh in the near future. Cantagallo is 20 miles north-northwest of Florence, Italy.

Talk with (call from) a woman from the company. 1994. June 30. The owner of this company is Salvatore Paolozza. They now make only tofu and seitan; both were introduced in 1990.

9666. **Product Name:** Meatless Healthy Bologna (Made with Tofu).
Manufacturer's Name: White Wave, Inc.
Manufacturer's Address: 1990 North 57th Court, Boulder, CO 80301.
Date of Introduction: 1990. September.
Ingredients: Organic tofu [water, soybeans, gypsum, nigari (magnesium chloride)], soy oil, wheat gluten, egg white, tapioca starch, wheat germ, soy sauce (water, soybeans, whole wheat, salt), dried yeast, natural liquid hickory smoke, garlic powder, spices, natural flavor, beet powder and oleoresin paprika for color. "No more, no less."
Wt/Vol., Packaging, Price: 5.5 oz (156 gm) vacuum pack. Retails for $2.10 (10/90, California).
How Stored: Refrigerated.
Nutrition: Per 1.5 oz.: Calories 120, protein 7 gm, carbohydrates 5 gm, fat 8 gm (polyunsaturated 7 gm; saturated 1 gm), cholesterol 0 mg, sodium 340 mg.
New Product–Documentation: Talk with Steve Demos. 1989. May 13. This product will be officially launched in Sept. Talk with Steve Demos. 1989. Nov. 1. The term Links need not be approved by the FDA. Anyone can use the term. The product is not yet out, nor has it been in any interstate sales yet. It is made in Denver. It should be out soon, probably by mid-December.

Label obtained at White Wave booth at World Vegetarian Day in San Francisco. 1990. Oct. 6. 5 by 7 inches. Flat vacuum pack with see-through front. Red, black, and yellow on white. "Cholesterol-free! Great for kids! Hearty luncheon slices." Talk with Lon Stromnes. 1990. Oct. 6. The product was introduced in Sept. 1990. Recommended retail is about $2.10.

9667. Lo, K.S. 1990. New developments at Vitasoy (Interview). *SoyaScan Notes.* Oct. 4. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The Vitasoy factory opened in Hong Kong on 9 March 1990. The 50th anniversary was celebrated on about 22-23 March 1990 because the Trade Development Exhibition Hall in Hong Kong was booked up so far in advance. Concerning the 50th anniversary history of Vitasoy, the woman author, Choi Po-King, has a PhD from Oxford and is now teaching history in the School of Education at the Chinese University of Hong Kong. She originally approached K.S. Lo with the proposal to do a history of his company in English. She speaks good English, but it is her second language. They decided to do the first edition in Chinese since most of the company's customers are Chinese. Now he thinks he will go back to her and ask her if she would like to do an English-language edition. He has no idea when the English edition will be available.

His company has just finished changing its name. The new name, effective 24 Sept. 1990, is Vitasoy International Holdings Ltd.; the name expresses Mr. Lo's hope that soyfoods "will at all times remain the core of our business."

Mr. Lo has attended the Natural Foods Expo at Anaheim several times. That is probably where he first met John Paino many years ago.

Vitasoy in Hong Kong is doing development work on an aseptic Tetra Pak tofu, but the product is not yet on the market. Mr. Lo has seen the Tetra Pak tofu make by Yeo Hiap Seng in Singapore, but he would not say that it is a top quality product. Yeo tried to sell it in Hong Kong but without much success. It is a hard product to sell to people with a long tradition of consuming tofu. He was not aware that the product was sold in Italy. One of the reasons Vitasoy purchased Nasoya was so that Nasoya could eventually help Vitasoy to make and market an aseptic tofu in America. Address: Chairman, The Hong Kong Soya Bean Products Co., Ltd., 41 Heung Yip Rd., Aberdeen, Hong Kong. Phone: 5-528211.

9668. McReynolds, Thomas. 1990. Mitsubishi grant to Purdue Univ. to develop aseptic tofu (Interview). *SoyaScan Notes.* Oct. 4. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Tom has heard that Mitsubishi (Japan), more than a year ago, made a $300,000 grant to Purdue University to develop aseptically packaged tofu.

Note 1. See long SoyaScan interview with Niels Nielsen (Feb. 1990), who is the key man on this project at Purdue.

Note 2. Talk with Larry Johnson at Iowa State University. 1990. Oct. 4. People from Purdue came to Iowa State Univ. about a year ago and spent a day learning how to make tofu from Lester Wilson. The key man on the project is probably Niels Nielsen. Larry knew that Purdue and Mitsubishi were working together but he did not know that such a large scale amount of money was involved. A major component of the work is development of a bland, lipoxygenase-free line of soybeans for use in soyfoods. Address: Marketing Consultant, Morinaga Nutritional Foods, Los Angeles, California 90040. Phone: 213-728-4325.

9669. Tripathi, Vikram. 1990. Uses for food grade calcium sulfate in the USA (Interview). *SoyaScan Notes.* Oct. 9. Conducted by William Shurtleff of Soyfoods Center.

© Copyright Soyinfo Center 2013

• ***Summary:*** The size of the U.S. market for food and pharmaceutical grade gypsum (calcium sulfate) is about 25,000 tons. Of this, the amount used in tofu is about 200 to 500 tons, or 0.8 to 2% of the total, with sales of about $50,000/year. The pH of this product is 7.3, which is neutral. A minimum order from U.S. gypsum is 1 truckload or 22 tons. Smaller orders are referred to one of their distributors, such as Peter Schnur of Charles B. Chrystal Co. in New York.

The biggest users of food grade calcium sulfate are: 1. The flour and baking industry as a combination dough conditioner and source of nutritional calcium. The functional and nutritional properties are of about equal importance. McDonald's uses a large amount in their hamburger buns. The neutral pH makes the dough less tacky, more machineable, and gives it a more uniform cell structure, which makes the buns seem fresher and spongier. General Mills also uses it as a calcium fortifier. Some baking powder contains calcium sulfate. 2. The beer industry. 3. The cultured mushroom industry. Address: Product Manager for Terra Alba gypsum, United States Gypsum Co., Industrial Gypsum Div., 101 South Wacker Dr., Chicago, Illinois 60606. Phone: 800-621-9523 or 312-606-5838.

9670. Wildwood Natural Foods. 1990. Re: Labels of all current Wildwood products. Letter to William Shurtleff at Soyfoods Center, Oct. 11. 6 p. On letterhead.
• ***Summary:*** On 11 Oct. 1990 someone at Wildwood in Fairfax sent Soyfoods Center all of Wildwood's current labels affixed to 6 pages of Wildwood letterhead. There is no cover letter but the postmark on the envelope shows the date and origin. Most of the colorful labels are for Wildwood's ready-to-eat tofu products. There are also labels for Yo Soy! [organic soymilk] in Rich, Cocoa, Maple, and Honey Vanilla flavors, Rice Pudding (dairyless, with organic soymilk), Curried rice salad with tempeh, Wildwood seitan (made the "Say-Tahn" Ron way). Address: Wildwood Natural Foods, 135 Bolinas Rd., Fairfax, California 94930. Phone: 415-459-3919.

9671. Richardson, Al. 1990. Wy Ky in Los Angeles is in the process of being sold and is now in escrow (Interview). *SoyaScan Notes.* Oct. 19. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Wy Ky, run by Chinese Americans, started making tofu in July 1970 in Los Angeles. The sale has been agreed upon, but has not yet been finalized. The name of the new potential buyer is not known, but should be in 6-8 weeks.

Note: Talk with David Ho. 1990. Dec. 20. His mother bought the company from Bill Lee in about 1983. She still owns it. It has not changed hands recently. Their best selling products are tofu spaghetti and baked tofu. Address: Nichii Company of America, Inc., 23440 Hawthorne Blvd., Skypark 2, Suite 140, Torrance, California 90505. Phone: 213-791-0010.

9672. Starr, Sara M. 1990. Soyfoods: Are they a hit at last? More meat eaters switching to soy sometimes, says study. *Food Business.* Oct. 22. p. 37.
• ***Summary:*** "According to data from a new nationwide study by HealthFocus, a consulting firm specializing in the healthful foods market, about one in 10 food shoppers said they eat soyfoods once every two weeks or more... Twice as many people eat soyfoods regularly as are vegetarians... Sales of aseptically packed soymilk are expected to reach $75 million in 1991, up from $46 million in 1989, according to Soyatech Inc., publisher of a soy industry source book."

A photo shows 6 tempeh products made by Lightlife Foods. The company's sales are growing at a rate of about 30% annually. Address: Vice president, HealthFocus Inc., Emmaus, Pennsylvania. Phone: (215) 967-2233.

9673. Shurtleff, William. 1990. America's earliest known tofu manufacturer discovered: Wo Sing & Co. was making tofu in San Francisco in 1878 (News release). Soyfoods Center, P.O. Box 234. Lafayette, CA 94549. 2 p. Oct. 29. [2 ref]
• ***Summary:*** "In Jan. 1848 gold was discovered in California. By 1850 there were still only a few hundred Chinese in California. Then in 1852 the Chinese joined the Gold Rush. They called California the 'Golden Mountain.' By 1852 there were 20-25,000 Chinese in the golden state, and by 1860 there were 30-50,000. The 1880 census found 75,132 Chinese in California, comprising 8.6% of the state's population.

"These Chinese immigrants, mostly young men from Kwangtung province in southern China, and more specifically from the area around Canton, almost certainly brought soybeans with them to America, and they probably made tofu (which they called *daufu, dow-foo, or doufu*) using those soybeans. But, until now, no one has been able to prove the existence of any Chinese manufacturers of tofu or other soyfoods in America before 1899. During this year Walter C. Blasdale, an instructor in chemistry at the University of California, Berkeley, reported in the *USDA Office of Experiment Stations, Bulletin* No. 68 that Chinese in San Francisco were making 'bean cheese,' both fresh and fried, as well as fresh curds.

"After years of searching, William Shurtleff, Director of the Soyfoods Center in Lafayette, California, has discovered a tofu manufacturer in San Francisco, California, in 1878. According to the Wells Fargo and Co. *Directory of Chinese Business Houses,* published in San Francisco in 1878, Wo Sing & Co. was making fermented tofu and regular (non-fermented) tofu at 708½ Dupont St. in San Francisco. The name of the company and its products were written in both Chinese and English. Tofu was translated as 'Bean Cakes.'

© Copyright Soyinfo Center 2013

This was the earliest known tofu shop in the western world (as of Oct. 1990).

"In the same Wells Fargo directory published in 1882, a second Chinese tofu manufacturer appeared. Sam Sing was making fermented and regular tofu at 615 Dupont St., basement, in San Francisco. Wo Sing was still in business at the address given above.

"The earliest known Japanese-run tofu manufacturer in America was Hirata Co. in Sacramento, California. They began making tofu in 1895.

The oldest existing tofu maker in America today is Quong Hop & Co. of South San Francisco. Founded and still run by the same Chinese-American family, they began making tofu in 1906 in San Francisco.

"The two oldest existing Japanese-American tofu companies are probably House Foods & Yamauchi Inc. of Los Angeles and Aala Tofu Co. of Honolulu. Both trace their origins back to 1923 in Hawaii...

"The first five Caucasian-run tofu companies in the western world were all run by Seventh-day Adventists in America. In Nov. 1929, T.A. Van Gundy of La Sierra Industries in Arlington, California (near Riverside), introduced his La Sierra Soya Cheese...

"The sixth Caucasian-run tofu company in America, and the first of the new wave of Caucasian tofu makers, was the Welcome Home Bakery and Tofu Shop in Corvallis, Oregon, founded by Alec Evans. In March 1975 he started making 'Tofu.'

"The earliest document seen (Oct. 1990), written by an American, that mentions tofu appeared in 1770 when the famous Benjamin Franklin wrote a letter on Jan. 11 from London to John Bartram in Philadelphia...

"The Soyfoods Center would like to offer a $100 reward to anyone who can find a tofu manufacturer in North America or Europe before 1878."

Reprinted in Soya International (July/Sept. p. 3). Address: Lafayette, California.

9674. Azumaya, Inc.; et al. 1990. Tofu: Made in the USA... The tradition continues (Ad). *Produce Business.* Oct.
• ***Summary:*** With this anti-Mori-Nu ad, run by "the largest tofu manufacturers and distributors in America," the U.S. tofu wars escalate. The four manufacturers are Azumaya, Hinoichi, Nasoya, and Kikkoman. All make pasteurized tofu. The three distributors are Hanmi Inc. in Seattle, Frieda's Finest in Los Angeles, and Fuji Natural Foods in Ontario, California. "It has come to the attention of produce procurement officers throughout the United States that a foreign (Japan) producer of an aseptically packed tofu has chosen to confuse the trade and general public with claims that their product is superior to traditional water pack tofu. The following addresses the various issues as we see them." These issues are: 1. Water packed tofu has superior taste. Sales of aseptic tofu are virtually nonexistent in Japan. 2. Consumers prefer fresh produce. 3. The assurance of our pasteurization. "An independent study revealed bacterium was unable to grow in pasteurized tofu held at 59 degrees Fahrenheit and below for six weeks." 4. A clear environmental choice. The aseptic package is ecologically unsound, whereas "water packed tofu is packaged in 100% recyclable plastic."

9675. Bosisio, Matthew J. 1990. The Northern Regional Research Center: From penicillin to oatrim, the impact of the NRRC in Peoria, Illinois, has been significant, far-reaching, and enlightened. *World & I* (*The*)**.** Oct. p. 308-15.
• ***Summary:*** A good history of the NRRC, which opened in Peoria in 1940. Discusses penicillin, xanthan gum (a thickener discovered by NRRC, and made by fermenting corn sugar), superslurper (a cornstarch-based water-collecting polymer), dextran (blood volume extender), cornstalks and wheat straw treated with hydrogen peroxide, oatrim (made from oat bran and oat flour), vitamin B-12, Corn-Soy Milk and other Food for Peace products containing soy protein, tofu and tempeh, the USDA's Agricultural Research Service (ARS) Culture Collection (with its 80,000 strains of yeasts, bacteria, and molds is the world's largest microbial culture collection of agricultural significance), kenaf, soybean ink, the 1986 Federal Technology Transfer Act designed to encourage cooperation between the private sector and government. In 1990 the NRRC had an annual budget of $18.5 million. The center's new director is Richard Dunkle. Later this year work will begin on a 10-year renovation program at NRRC. Address: Publisher, *New Mexico Senior Digest*, Albuquerque; Formerly an information officer with the USDA in Peoria, Illinois.

9676. **Product Name:** NuTofu Señor Picante Nacho Sauce (With Casein) [Hot, or Mild].
Manufacturer's Name: Cemac Foods Corp.
Manufacturer's Address: 1821 East Sedgley Ave., Philadelphia, PA 19124. Phone: 215-288-7440.
Date of Introduction: 1990. October.
Ingredients: Organic tofu, canola oil, natural flavors, tomatoes, bell peppers, calcium caseinate, carrageenan gum, sea salt, spices, lecithin, annatto color.
Wt/Vol., Packaging, Price: 9 oz round tub.
How Stored: Refrigerated.
New Product–Documentation: Leaflet obtained at World Vegetarian Day in San Francisco. 1990. Oct. 6. Shows label and ingredients. Copyright 1990. Illustration of a chili pepper with a sombrero on. "All natural. Low sodium. Cholesterol free. Low fat. Lactose free."

Ad (½ page, black-and-white) in Whole Foods. 1991. June. p. 18. "Now you can snack to your heart's content! Señor Picante Nacho Sauce (Hot or Mild). Made with organic tofu and canola oil." A large round Label (3.75 inches diameter) is shown. The label is copyright 1990.

9677. Demos, Steve. 1990. Consultant report on training in the production and marketing of soy paneer / tofu at the cottage level. White Wave, Inc., Boulder, Colorado. 31 p. 28 cm.

• ***Summary:*** Submitted to Winrock International, Inst. for Agricultural Development (Contractor USAID). Date: Aug. 16–Sept. 15, 1990. New Delhi and Bhopal–India. Contents: Introduction. Background. Consultancy objectives. Soy paneer marketing: Observations, conclusions, recommendations, test market, experiment. Summary conclusion–Privatization. Appendix. Making sequence and standards. Preventive maintenance recommendations. Safety recommendations. Equipment recommendations. Sanitation recommendations. Further test recommendations. Opening procedure checklist. Closing procedure checklist. Economic analysis soy paneer production. Daily activities summary. Acknowledgements.

In India, 40% of the citizens fall below the poverty level. One serious consequence is a protein shortage. "During the past 15 years, the population of India has increased approximately 50%. Harvested tonnage of India's primary protein source, (legumes), has during this same period remained relatively constant at 12 mm tons per year. Thus the per capita availability of protein in India has actually decreased 50% within the past 15 years...

"The Soybean Processing and Utilization Project, (SPU) is a jointly funded US-Indo Project whose goal is to facilitate the processing of soy protein in cottage and small plant industries which effectively produce soy protein foods for human consumption.

"The SPU Project has been in effect for approximately 5 years...

"Currently the Central Institute of Agricultural Engineering (CIAE) in Bhopal has been the focal point of the SPU's work on soy paneer. The institute in 1990 purchased and installed a semi-automatic soy paneer making system in its pilot plant facility.

Sensory evaluations from SPU research show that a firm textured tofu–75% moisture–closely resembles dairy paneer texture and is acceptable to the Indian taste. However, there were objectionable 'beany' flavors found in soy paneer. Dairy paneer is considered a luxury item in India with only 2% of the population consuming the product. The primary reason for the limited usage was price. Current dairy paneer is produced almost exclusively in small cottage shops. All product made is sold within 48 hours, as the use of refrigerated storage in India is very limited. There is no retail or wholesale distribution network for dairy paneer. Indian staple protein is legumes (dahl). Soymilk sold in tetra pak cartons has failed. When the product was packaged in only polyethylene bags the price was reduced substantially and the product recognized greater consumer acceptance. Note: Noble Soya tried selling their soymilk in poly bags after their Tetra Brik venture failed. Lots of dairy milk in India is sold in poly bags. Most panir is curded with soured dairy milk whey. 9678. ProSoya Foods International Inc. 1990. An affordable soya milk technology: High quality soya milk production equipment for any budget (Leaflet). Ottawa, Ontario, Canada. 1 p. PSF-SC20. Oct.

• ***Summary:*** "ProSoya recently completed the development of equipment capable of making non-beany tasting soya milk in 20 litre batches every 30 minutes. The table top size equipment costing under $3,000 can use almost any source of electricity and heat. It is ideally suited for schools, hospitals, and other institutions, cottage industry, and second generation soymilk and tofu product manufacturers.

"The equipment, dubbed SoyaCow-20, has three components: an air-less grinder, a scraped surface pressure cooker, and a filter press. Steeped soya beans are put in the grinder through a hopper and the machine filled with water. The grinder motor is run for a few minutes and the ground bean slurry is transferred to the cooker by opening a valve. The slurry is cooked at 15 lb per square inch pressure by direct heat from a natural gas, kerosene, coal, or wood stove. The cooked slurry is expelled to the filter press to extract soya milk."

A table compares 4 processes for making soymilk: Cold grind, hot grind, hot blanch, and airless grind. Ten variables are compared, such as processing chemicals, grind (hot/cold), soya milk solids (dissolved/suspended), odour & taste, flavoring. etc. Concerning odour and taste: The cold grind is rancid and cereal, the hot grind is less rancid & cereal, the hot blanch is roasted nut & cereal, and the airless grind is cereal & cereal. Concerning mouth feel: The cold grind is smooth, the hot grind is chalky, the hot blanch is very chalky, and the airless grind is smooth. Concerning protein yield: The cold grind is 70-90%, the hot grind is 60-80%, the hot blanch is up to 98%, and the airless grind is 70-90%. Concerning basic plant cost: The cold grind is low, the hot grind is medium to very high, the hot blanch is high, and the airless grind is low.

"For more information, contact ProSoya Foods International, Inc. 627 Gaines Drive, Ottawa, Canada K1J 7W7, Telephone 613/745-9115, Fax 613/744-3548, or Raylons Metal Works, Ramkrishna Mandir Marg, J.B. Nagar, Andheri (East), Bombay, India 400 059, Telephone 022/632-3288."

Note: PSF stands for ProSoya Foods. SC20 stands for SoyaCow–20 liters/batch. Address: 627 Gaines Dr., Ottawa, ONT, Canada K1J 7W7.

9679. **Product Name:** [Biosoja Soja Delights: Tofu Lasagna].
Foreign Name: Biosoja Soja Delights.

© Copyright Soyinfo Center 2013

Manufacturer's Name: Sojinal. Affiliate of Coopérative Agricole de Colmar (CAC) (Marketer).
Manufacturer's Address: 8 rue Merxheim, 68500 Issenheim, France. Phone: 89 74 53 53.
Date of Introduction: 1990. October.
Wt/Vol., Packaging, Price: 300 gm can.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: Spot in SoyaFoods. 1991. Spring. p. 5. "Ready meals from Biosoja." Tofu Lasagna, introduced at SIAL in Paris (Oct. 1990), supplements the company's existing line of 3 Soya Deli company's existing range of Soyabean Delights products which includes Financière Sauce, Basmati Rice and Curry Sauce, and Tofu Ravioli. These are portion controlled soya-based ready meals for one person. Each meal is available in a 300 gm can and contains less than 300 calories.

SoyaFoods. 1992. Autumn. p. 7. "A profile of Sojinal." See Table 2. "Biosoja retail food products." Canned ready meals with less than 300 calories.

9680. **Product Name:** [Jean de Preneuf Menu Céréal Hoggar].
Foreign Name: Jean de Preneuf Menu Céréal Hoggar.
Manufacturer's Name: SOY (Société Soy).
Manufacturer's Address: 1 rue du Crêt de la Perdrix, 42400 Saint-Chamond, France. Phone: 77.31.24.42.
Date of Introduction: 1990. October.
Ingredients: Cereals, tofu, vegetables, raisins, soy sauce, vegetable oil, sea salt, spices, seasonings.
Wt/Vol., Packaging, Price: 2 x 100 gm vacuum packed in a sachet.
How Stored: Refrigerated, 4 week shelf life at 4ºC. Retails for 14.00 French francs (4/91).
New Product–Documentation: Spot in SoyaFoods. 1991. Spring. p. 5. "Menu Céréales." The company name is given as "Jean de Preneuf." This product is a meal which is high in fiber and low in saturated fats and calories. Two other varieties, *Menu Mont Pilat* and *La Jolla* do not contain tofu but do include soy sauce in the recipe.

9681. **Product Name:** Soya Nova Tofu Pumpkin Tarts.
Manufacturer's Name: Soya Nova Tofu Shop.
Manufacturer's Address: R.R. #2 Rourke Road, C.28, Ganges, Saltspring Island, BC, V0S 1E0, Canada. Phone: 604-537-9651.
Date of Introduction: 1990. October.
Ingredients: Incl. tofu.
How Stored: Refrigerated.
New Product–Documentation: Letter from Greg Lundh of Silverking Soya Foods in Nelson, BC, Canada. 1990. Dec. 14. Soya Nova Tofu Shop introduced this product in about Sept. 1990. Labels are not yet available.

Talk with Debbie Lauzon of Soya Nova. 1990. Dec. 28. This product was introduced in about Oct. 1990, as soon as the pumpkins were ready. "I now have a really cute little cottage industry. I met a master pastry chef from France named Pascal Pellerin. He worked at Tassajara in California for a while. When I saw that he was unemployed I put him at work in the tofu shop. We came up with some really nice Soyasage Rolls, then when the pumpkins were ripe, we started making the Pumpkin Tarts. We use only fresh pumpkins, never canned. They sold really well."

9682. Yu, Angie Elinon Yu. 1990. Re: Cherry Food Industry, APY Food Processing, and promoting tofu in the Philippines. Letter to William and Akiko Shurtleff at Soyfoods Center, Nov. 14. 2 p.
• ***Summary:*** "Sometime in the late 70's, you visited my parents-in-laws Tofu factory, then known as Cherry Food Industry here in the Philippines. I am married to their second, Jerry Joseph.

"The tofu business of my parents-in-law is still active but now registered under a new name, APY Food Processing, but located in the same address (74 Speaker Perez St., Santa Mesa Heights, Metro Manila). The plastic container of the Nippon Tofu (silken tofu), however, still carries the old name."

She and her husband operate a computer services firm. One of their business clients is Shoemart, a big chain of supermarkets, which is selling Nippon Tofu and other tofu products made by APT Food Processing. Shoemart has asked Angie and her husband to operate a portion of their Gourmet Shop (which presently has a salad bar and a Japanese sushi bar) located in the middle of their newest supermarket. They have agreed to do this

"I personally feel that the level of market awareness of what tofu really is, is relatively low. I have always suggested to my in-laws to invest in educating the market about it since five years ago. However not much has been done. By presenting our products in this Gourmet Shop we have found a vehicle to do exactly this."

She asks Shurtleff for ideas on promoting the use of tofu, and for updated materials. And she invites him to visit them any time.

"Our store will start operating on November 28 of this year. All information materials that I release to the public will be based on your Book of Tofu (1979). I bought a copy of it when I was in your country (New York) in 1988. I learned from my husband that you gave his parents an autographed original copy of the same book." Address: Elinon Yu EDP Services, International Corporation, 61 West Capitol Drive Bo, Kapitolyo, Pasig, Metro Manila, Philippines. Phone: 631-9451.

9683. Cohen, Karen J. 1990. Terre Haute firm hopes Americans take a liking to tofu. *Indianapolis Star* (*Indiana*). Nov. 20. p. B-2.
• ***Summary:*** Kyoto Food Corp. expects to begin tofu

© Copyright Soyinfo Center 2013

production at the end of November. "The $4.5 million plant is a joint venture between four Japanese investors and the husband and wife team of William and Setsuko Roach. The 15,000-square-foot factory will be the largest tofu manufacturer in the country, capable of producing 9,800 12-ounce cakes per day, according to Roach.

"The Indiana Department of Commerce awarded a $46,117 grant to the plant for infrastructure needs and $25,000 for employee training. Kyoto Foods employs 19 people.

"'If things go right we hope that will double within a year,' said Roach, who is retired from the construction business and was a Democratic state representative for 12 years...

Mary Beth Thomas, marketing director, said "Kyoto plans to unveil its product in grocery stores, hospitals and universities in and around Terre Haute in the near future. The company doesn't have any contracts yet but Roach said it has had discussions with Kroger Co., Marsh Supermarkets Inc., and Dominick's Finer Foods Inc., a Chicago-based grocery chain." Because the company's marketing director, Thomas, feels that Americans "have a negative image about tofu," the company is developing recipes for sloppy joes, cookies, and tacos, which are taste-tested by employees. Tofu doesn't sell very well in Indianapolis. The Kroger supermarkets sell about 240 packages/week in the central Indiana region. They also sell Tofutti, a soy ice cream. Peter Golbitz of *Soya International* estimates that 5 to 10% of the 69.5 million lb of tofu produced in the USA is used in secondary products. "Americans like the idea of tofu, but they don't like this white cake floating around in a tub of water." Kyoto Foods buys its soybeans from outside Indiana. Contains a large photo of the inside of the tofu plant, showing the equipment and employees.

9684. Richardson, Al. 1990. New developments at Nichii (Interview). *SoyaScan Notes.* Nov. 23. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The grand opening for the Nichii soyflake plant is scheduled for 16 April 1990. Mr. Kobayashi, President of Nichii plans to be there. 3,000 lb of flakes will arrive by air next week from Japan. Tests supervised by Mr. Chikaarashi are scheduled to be conducted at House Foods & Yamauchi, Azumaya, Quong Hop, Sacramento Tofu, and Fresno Tofu. Address: Nichii Company of America, Inc., 23440 Hawthorne Blvd., Skypark 2, Suite 140, Torrance, California 90505. Phone: 213-791-0010.

9685. Ames, Rick. 1990. Treatment of tofu waste water before it is discharged into local sewer systems (Interview). *SoyaScan Notes.* Nov. 26. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Rick wants to know if any tofu companies in the USA pre-treat their process water (that used in making tofu) at their plants before discharging it into the sewage system. There are typically three levels of treatment used by dischargers. Primary (passive) treatment involves screening out solids and letting the remaining solids settle out in a settling tank. Secondary processing involves aeration and biological treatment in two large (5,000–10,000 gallon) tanks. The air can be provided by some sort of a revolving mechanical paddle or propeller, and the biological treatment is done by microorganisms that eat the food in the process water. The raw process water runs into the first tank and is seeded with a bacterial culture and aerated. Then the clean water is decanted off into another tank and the microorganisms settle to the bottom of the tank and are removed as sludge for fertilizer. The clarified liquid (which still has a high BOD or Biochemical Oxygen Demand, but with low suspended solids) is sent to the municipal sewage treatment plant. BOD is a measure of the food value of the sewage. Tertiary or advanced processing involves chemical treatment, typically with chlorine at a municipal plant. There are nutrient limits on discharge water after tertiary treatment.

Island Spring had planned to use high-tech reverse osmosis to remove solids, but now screens it, runs it into a crude settling tank, then pumps put the clarified liquid for use in spray irrigation. So they do not discharge to the municipal sewage plant. Typical tofu process water has about 10 times the BOD as typical waste water.

Azumaya has 2-stage settling tanks, mainly to reduce solids. They let the waste water settle and remove the sludge once every 3 months. They monitor the pH before discharging the water. They monitor their pH since their permit says that they cannot discharge water outside of the ph range 6.0 to 9.0. They have a 2000 BOD, whereas the BOD for regular sewage is 350-350 milligrams/liter. This says how many milligrams of oxygen are required per liter of waste water to stabilize it. The oxygen/air is necessary for the life of the microorganisms that are feeding on the sewage. At a typical sewage plant, after a while this liquid is discharged into a clarifier, a settling tank with an overflow. The clarified liquid overflows and is either treated further or disinfected (usually with chlorine) and discharged. The live sludge, which settles to the bottom, is recycled back into the aeration tank. The bacteria in the waste water themselves colonize the system; there is no need to inoculate most sewage.

Nasoya carefully screens solids out of their waste water. They get their BOD down to about 1,000. They do not discharge their whey; they recycle it and let animals drink it for food since it is rich in nutrients. Address: Manager, Vashon Sewer District, Vashon Island, Washington 98070. Phone: 206-463-9219.

9686. Rose, Richard. 1990. Update on the soy and non-dairy ice cream markets in America (Interview). *SoyaScan Notes.* Nov. 27. Conducted by William Shurtleff of Soyfoods

© Copyright Soyinfo Center 2013

Center.
• ***Summary:*** The two main brands of soy ice cream in the mass market are Tofutti and Mocha Mix. The two brands in the natural foods market are Ice Bean (Farm Foods/ Barricini) and Rice Dream (made from rice, with no soy). Believe, produced by Bob Davis is an excellent product; it is made from powdered tofu and is high in fat. Yet the whole category is very small, and the rise of sorbets and low-fat frozen yogurts provide strong competition for the very limited freezer space. So it would be very hard for a new product to enter the fray. Address: Rose International, Santa Rosa, California 95404. Phone: 707-963-8628.

9687. Schoen, Walter. 1990. The tofu industry in Austria (Interview). *SoyaScan Notes.* Nov. 27. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Walter estimates that the largest tofu manufacturer in Austria is SoyVita, followed by Tofurei Wels, then Sojarei Ebner-Prosl. Fourth is a small tofu manufacturer named Oberland Tofu in Innsbruck. Address: Owner, Tofurei Wels, Prinz Eugen Strasse 1, A-4600 Wels, Austria. Phone: 7242/78073.

9688. *Contra Costa Times* (*California*). 1990. A perfect turkey for California? Nov. 28.
• ***Summary:*** "News Item No. 2: Thanksgiving passes peacefully among the 15,000 residents of Arcata, where a new California trend–tofu turkey–is hatching for the holidays."

"The Tofu Shop's warm-and-serve ersatz turkey is flavored with a secret blend of spices and herbs, and comes in sizes up to 25 pounds. There's 'stuffing' and 'pumpkin pie' also fashioned from–you guessed it–the mushy, malleable staple of millions of Japanese."

9689. *SoyaScan Notes.* 1990. How many bushels of soybeans per month are used by various American West Coast tofu and soymilk manufacturers (Overview). Nov. 28. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** The following are ranked in descending order of bushels of soybeans used per month: House Foods & Yamauchi Inc. 12,000 (Los Angeles. This includes soybeans used to make soymilk for Westbrae's Ah Soy in 225 ml foil pouches), Azumaya 3,567 (San Francisco; buys from Minnesota in 60 lb bags. Uses 300 tons/month), Pacific Foods 2,250 (Tualatin, Oregon. This includes soymilk used to make Westbrae Aseptic WestSoy Lite), Quong Hop & Co. 2,000 (South San Francisco), Wy Ky 1,563 (Los Angeles), Wo Chong Co. 1,167 (San Francisco), Mighty Soy 1,117 (Los Angeles), American Foods 733 (Alhambra, California), San Diego Soy Dairy 467 (El Cajon, CA), Clearway Soy Foods 67 (Corralitos, CA), Fuji Fresh Tofu 50 (San Jose, CA), San Jose Tofu 50, Fresno Tofu 33 (Fresno, CA).

9690. Ashland Soy Works–Soy Deli. 1990. November. New soyfoods restaurant or deli. 225 Water St., Ashland, OR 97520.
• ***Summary:*** Menu brought by Claire Wickens. 1991. Oct. 14. "Its just a few steps to delicious gourmet tofu." "The Soy Deli serves lunches, dinners, snacks, and desserts. Take out or eat in. Burritos, lasagna, chili, salads, tofu burgers, eggless salad sandwiches, deep fried tofu, hot tofu loaf sandwiches. Our cheesecakes are famous: fruit topping, chocolate peanut butter, double chocolate mousse. No meat, eggs, or dairy. Extra lite lunch specialties: Eggless salad, Malibu salad. Fresh pyramid juices, coffee and tea. Ready to eat–try our packaged tofu products: Oregon baked tofu. Curry baked tofu. BBQ baked tofu. Tofu (meatless) loaf. Sunny eggless salad. Fortune bread, and the famous Tofu burger." On the back of the menu are three tofu recipes: Tofu stroganoff. Tofu-spinach balls. Creamy poppy dressing.

Talk with James Muhs. 1991. Oct. 14. Ashland Soy Works moved to 225 Water St. in Aug. 1990, and they opened the Soy Deli in Nov. 1990. Address: Ashland, Oregon. Phone: 503-482-1865.

9691. *Child Haven International* (*Newsletter, Maxville, Ontario, Canada*). 1990. An affordable soya milk technology: High quality soya milk production equipment for any budget. Fall. p. 4.
• ***Summary:*** Note: This appears to be a reprint of a leaflet (8½ by 11 inches) from "PSF-SC20-C / November 1990"–probably written by Raj Gupta and first published by ProSoya Foods International.

"ProSoya recently completed the development of equipment capable of making non-beany tasting soya-milk in 20 L [litre] batches every 30 minutes. The table top size equipment, developed for *Child Haven* for their operation in India, can use almost any source of electricity and heat. It is ideally suited for schools, hospitals, and other institutions, cottage industry, and second generation soymilk and tofu product manufacturers. *Child Haven* plans to buy several such units under a CIDA project.

"The equipment, dubbed SoyaCow-20, has three components: an airless grinder, a scraped surface pressure cooker [15 psi pressure], and a filter press." The process is described.

A table in the middle of the publication compares the four methods for making soya milk: Traditional cold grind, hot grind (Cornell Univ.), hot blanch (Univ. of Illinois), and Canadian airless cold grind (patented by ProSoya). They are compared on the following variables: (1) Soya beans (whole or dehulled). (2) Processing chemicals (none, sodium bicarbonate, or hydrochloric acid). (3) Steeping (soaking) of soybeans (yes, no, or blanch). (4) Grind (hot, cold, or airless). (5) Cook then filter vs. filter then cook. (6) Soya milk solids (mostly dissolved or suspended). (7) Colour & taste. (8) Flavouring (Very difficult to easy). (9) Mouthfeel

© Copyright Soyinfo Center 2013

(smooth vs. chalky). (10) Protein yield (%). (11) Basic plant cost (low to high).

The Canadian system is shown to have several advantages, incl. low cost, good flavour, high protein yield, high level of dissolved solids, smooth mouthfeel, etc.

An illustration (line drawing) shows an Indian woman operating the "Soya-Cow-20."

"For more information, contact ProSoya Foods International, Inc., 627 Gaines Drive [the home of Raj and Rashmi Gupta], Ottawa, Canada K1J 7W7. Telephone 613 / 745-9115. Fax 613 / 744-3548. Or Raylons Metal Works, Ramkrishna Mandir Marg, J.B. Nagar, Andheri (East), Bombay, India 400 059. Telephone 022 / 632-3288."

Note 1. This is the earliest document seen (Oct. 2010) that mentions the "SoyaCow" or the "SoyaCow-20."

Note 2. The leaflet is apparently referring to the first SoyaCow (an SC-20) which was made in Bombay, India, according to designs by and supervision from Raj Gupta and ProSoya Foods International.

9692. Jack, Alex. 1990. Soviets embrace macrobiotics: Special report from Moscow and Leningrad. *One Peaceful World* (*Becket, Massachusetts*) No. 6. p. 1, 7-10. Autumn/ Winter.

• ***Summary:*** Physicians in the USSR are using miso to try to cure radiation sickness from the Chernobyl nuclear disaster which took place on 26 April 1986 in the Ukranian SSR.

A sidebar on page 7 titled "Miso protects against nuclear radiation" states: "Scientists in Hiroshima reported this summer that in laboratory tests mice fed miso every day were five times more resistant to radiation than those not eating miso. The research, carried out by Prof. Watanabe at Hiroshima University, is the latest data showing that macrobiotic foods can bind and eliminate radioactive material from the body." A photo shows Cary Wolf offering miso soup to people in Moscow. Address: Box 10, Becket, Massachusetts 01223. Phone: (413) 623-5742.

9693. **Product Name:** Legume Vegetarian Franks & Beans.
Manufacturer's Name: Legume, Inc.
Manufacturer's Address: 116 Fairfield Rd., Fairfield, NJ 07006. Phone: 201-263-1013.
Date of Introduction: 1990. November.
Ingredients: Navy beans, water, tomato paste, organic tofu* [organically grown soybeans*, water, calcium sulfate (a naturally mined earth mineral)], sweet potato puree, apple cider vinegar, canola oil, molasses, honey, tamari soy sauce (water, soybeans, sea salt), onion, soy oil, isolated soy protein, mustard powder, garlic, spices, natural flavors, sea salt, beet powder, paprika oil, guar gum. * = Grown in accordance with California Health & Safety Code 26569.11.
Wt/Vol., Packaging, Price: 9 oz plastic bag (boil-in-the bag).
How Stored: Frozen.
New Product–Documentation: Talk with Gary Barat. 1990. Oct. 31. Legume is now introducing 7 new boil-in-the-bag products. All are non-dairy, cholesterol-free. The word "tofu" does not appear on the front panel of any of the products because a huge segment of the American population does not have a positive image of tofu. These products will sell for about $1 less each than the old Legume products. They will sell the products where they do not need to pay slotting allowing allowances, as in Southern California where 15-20% of the company's total business now is. Business is way up in the kosher market. All will be introduced at the Natural Foods Merchandiser show in Philadelphia this weekend.

Label sent by Gary Barat. 1990. Oct. 31. by 5.5 by 1.5 inches. Paperboard box. Green, white, and black. Full-color photo of the product in a white dish. "Low fat. No cholesterol. Microwaveable. All natural. Legume main courses."

9694. **Product Name:** Legume Vegetarian Chili.
Manufacturer's Name: Legume, Inc.
Manufacturer's Address: 116 Fairfield Rd., Fairfield, NJ 07006. Phone: 201-263-1013.
Date of Introduction: 1990. November.
Ingredients: Tomatoes, water, black beans, red chile beans, onion, corn, organic* tofu [water, organically grown* soybeans, magnesium chloride (nigari)], tomato puree, canola oil, sweet potato puree, tamari soy sauce (water, soybeans, sea salt), chile powder, garlic, natural flavors, spices, sea salt. * = Grown in accordance with California Health & Safety Code 26569.11.
Wt/Vol., Packaging, Price: 10 oz plastic bag (boil-in-the bag).
How Stored: Frozen.
New Product–Documentation: Talk with Gary Barat. 1990. Oct. 31. This weekend at the Natural Foods Merchandiser show in Philadelphia, Legume will introducing 7 new boil-in-the-bag products.

Label sent by Gary Barat. 1990. Oct. 31. by 5.5 by 1.5 inches. Paperboard box. Green, white, and black. Full-color photo of the product in a white dish. "Low fat. No cholesterol. Microwaveable. All natural. Legume main courses."

9695. **Product Name:** Legume Hearty Vegetarian Stew (Made with Wheat Gluten).
Manufacturer's Name: Legume, Inc.
Manufacturer's Address: 116 Fairfield Rd., Fairfield, NJ 07006. Phone: 201-263-1013.
Date of Introduction: 1990. November.
Ingredients: Potatoes, wheat gluten [whole wheat flour, water, tamari soy sauce (water, soybeans, sea salt)], carrots, tomato paste, peas, water, sweet potato puree, canola oil, celery, parsley, onions, garlic, molasses, miso (soybeans, water, sea salt), tamari soy sauce (water, soybeans, sea salt),

1.5 inches. Paperboard box. Green, white, and black. Full-color photo of the product in a white dish. "Low fat. No cholesterol. Microwaveable. All natural. Legume main courses." Contains no soy.

9700. **Product Name:** Lite Slice Cheesecake (With Casein).
Manufacturer's Name: Soyco Foods. Div. of Galaxy Cheese Co.
Manufacturer's Address: R.D. #3 Northgate Industrial Park, P.O. Box 5204, New Castle, PA 16105. Phone: 800-441-9419.
Date of Introduction: 1990. November.
Ingredients: Soy milk (water, organic tofu), soybean oil, casein, egg whites, unbleached wheat flour, fructose, tapioca, sea salt, citric acid, natural flavor, soy lecithin, natural vegetable guar gum.
Wt/Vol., Packaging, Price: 18 oz.
How Stored: Frozen or refrigerated.
Nutrition: Per 3 oz.: Calories 170, protein 4 gm, carbohydrates 14 gm, fat 10 gm (polyunsaturated 1 gm, monounsaturated 7 gm, saturated 2 gm), cholesterol 0 mg, sodium 150 mg.
New Product–Documentation: Leaflet. 1990. Nov. Poorly typed on purple letterhead. "75% less calories. Cholesterol free. Butterfat free. Lactose free."

Ad in Natural Foods Merchandiser. 1991. Jan. p. 26-27. "New blossoms in the Soyco garden." Shows color photo of label. Front panel states: "75% less calories than regular cheesecake. Cholesterol free. Butterfat free. Lactose free."

Color insert ad in Natural Foods Merchandiser. 1991. July. Between p. 40 and p. 41. The front shows a whole cheesecake and a slice, surrounded by fruit and berries. "All natural. 35% less calories than regular cheesecake. Cholesterol free. Lactose free. 75% less saturated fat. Butterfat free." The back gives nutritional information and ingredients, and calls this a "guilt free cheesecake."

9701. Takai Seisaku-sho. 1990. Modern soymilk plant: Makes delicious dairylike soymilk with no beany flavor. 1-1 Inari, Nonoichi-machi, Ishikawa-ken 921, Japan. 4 pages. Nov. Catalog. With 1-page color insert. 30 cm. [Eng]
• ***Summary:*** Page 2 is a flow chart of the modern soymilk production process. Page 3 shows modern soymilk plant layouts, floor plans, and specifications. The color insert, which is titled "Modern soymilk plant: Makes delicious dairylike soymilk with off-beany flavor," is printed on both sides. The front shows 3 packaged soymilk products: Ah Soy, Hai-Meeru Soyalac (Made by San-iku Foods in Japan), and Soya Bean Milk (made by Guilin Sweets and Food Factory, Guangxi, China). Companies that make soymilk using Takai equipment include: Chung's Foods and Nam Yang Industries in Korea. Jinan Huifeng Bean Milk Product Factory in China. "One of our plants makes 1,000 liters of 5,000 x 200 ml packs of soymilk; another makes 10,000 or 20,000 packs of soymilk per hour. EMUL is a healthy soy-based frozen dessert. Contact Takai for an EMUL production plant." On the back is a plant layout. Address: Kanazawa, Ishikawa-ken, Japan. Phone: 0762-48-1355.

9702. Tofu Shop (The). 1990. Restaurant: Holiday special tofu turkey (Ad). *Northcoast Holidays* (*Regional Visitor Publications, Eureka, California*). p. 36.
• ***Summary:*** A half-page vertical ad. Graphics: At the top of the ad is a black and white photo of a bearded man cutting a large block of tofu into cakes. Near the middle (vertically) is an illustration of the front of the Deli.

Upper text: "In business since 1977, the Tofu Shop has been making hand-crafted tofu for over a decade."

The lower half of the vertical ad is an ad (on a dark background) for "Holiday special Tofu Turkey." "Order one of our delicious Tofu Turkeys.

"Pumpkin tofu pie! Try this non-dairy alternative. Delicious, cholesterol-free and baked in a wholewheat crust. Small 6 oz. $1.55. Large 9" (special order) $5.95.

"Not 'n Natural Tofu Turkey dinners! Served at our deli beginning Sunday, Nov. 15, includes hot slice of tofu turkey, stuffing, gravy, cranberry sauce & salad. $5.25.

Hours: Mon-Sat 8-8. Sun 11-6. Address: 768 18th St., Arcata, California. Phone: 822-7409.

9703. Tofu Shop (The). 1990. This holiday season, make it Tofu Turkey (Leaflet). Arcata, California. 1 p. Front and back. 22 x 14 cm.
• ***Summary:*** Typeset, dark green on beige, with four illustrations. Identical to the 1989 leaflet / sell sheet, except for the colors and some new product sizes: Tofu Turkeys now come in small (2-3 servings) $7.50. Tofu-Turkeys stuffing now comes ½ pint $1.95. Address: 768 18th St., Arcata, California.

9704. **Product Name:** Trader Ming's Enlightened Egg Rolls: Spinach Tofu with Whole Wheat Egg Roll.
Manufacturer's Name: Trader Joe's (Product Developer-Distributor).
Manufacturer's Address: 538 Mission St., South Pasadena, CA 91030. Phone: 818-441-1177.
Date of Introduction: 1990. November.
Ingredients: Filling: Spinach, organic tofu (Organically grown and processed in accordance with Section 26569.11 of the California Health and Safety Code), canola oil, bread crumbs, sea salt, spices, dehydrated garlic. Egg Roll: Stone ground whole wheat flour, water, eggs, sea salt. Cooked [deep-fried] in canola oil.
Wt/Vol., Packaging, Price: 15 oz package of 5 egg rolls retails for $2.99 (11/90).
How Stored: Frozen.
Nutrition: Per 3 oz. roll: Calories 270, protein 7 gm, carbohydrate 17 gm, fat 19 gm, sodium 310 mg.

© Copyright Soyinfo Center 2013

New Product–Documentation: Trader Joe's Fearless Flyer. 1990. Nov. p. 19. The wrappers, though made of whole wheat, have a "lovely light texture and delicate flavor... The egg rolls contain no MSG or preservatives. Each was individually hand-wrapped, then cooked in canola oil, an oil very low in saturated fat. They are best when heated in a conventional oven, but may be microwaved."

Product with Label purchased at Trader Joe's in California. 1990. Nov. 5 by 3 inches. Dark green and yellow on white. Self adhesive. Illustration of a yellow cattail plant. Soyfoods Center product evaluation. 1990. Nov. 30. Delicious, but we are almost certain that these egg rolls contain some type of cheese, which is not listed on the label.

9705. *SoyaScan Notes.* 1990. Europe's 20 largest tofu and soymilk companies (Overview). Dec. 23. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** The following summary is a combination of information from two sources: First, numerous interviews conducted by William Shurtleff of Soyfoods Center during 1990. And second, informed estimates by one of Europe's most knowledgeable soyfoods industry insiders. We give the ranking, company name, country, products (Tofu, Milk = Soymilk, Other), and number of metric tons of soybeans used per month.

1. Alpro. Belgium. Milk. Unknown.
2. Sojinal. France, Milk & Other. 417.

Plamil. England. Milk. 5.6.
Paul's Tofu. England. Tofu. 4.7.

9706. Kubota, Brad. 1990. A history of tofu in Fresno and surrounding towns (Interview). *SoyaScan Notes.* Nov. 28 and Dec. 4. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The following information is based on Brad's personal recollections and interviews he conducted with various Japanese-American old-timers in Fresno. Brad now owns and runs Fresno Tofu Co. The lineage of his company is as follows:

He has heard from many people that there were two tofu shops in Fresno before World War II, but one went out of business. Also before World War II there was a company in Fresno named Tokubo Tofu, run by a Mr. Tokubo. Mr. Tokubo is said to have brought his company to Fresno from the countryside (from Fowler?) and it is not clear if he was part of the Fresno Tofu Company lineage or to whom he sold the company.

Mr. Sasaki may have owned a tofu company that was an early member of the Fresno Tofu Co. lineage. He sold it to Mr. Fukamoto, who renamed it Fukamoto Tofu.

Mr. Fukamoto sold his shop to Mr. Joe Hashimoto (a nisei or second generation Japanese American, who still lives in Fresno), who renamed the company Hashimoto Tofu in about 1947.

Joe Hashimoto sold his company to a Dr. Wilkinson, a Caucasian/American, who moved it away from Fresno, out into the country. He discontinued production of tofu, but started to make a type of soy cheese and soymilk. Dr. Wilkinson is no longer living.

It was probably Mr. Hashimoto who sold his company in about 1970 to Mr. Tokubo or David Goto, who renamed it Star Tofu Shop. David asked his younger brother, Nagaki, to come to America from Japan to help him make tofu. After a while, Nagaki took over the company. David left the business and started farming. Nagaki Goto renamed the company Goto Bean Factory in 1975.

Nagaki Goto sold his company to Brad Kubota, who renamed it Fresno Tofu Co. in Nov. 1982. Brad started by making the same two tofu products that Mr. Goto had made, medium-firm Japanese-style momen tofu, and agé (deep-fried tofu pouches).

After World War II there were at least two other tofu companies in Fresno: Nagahama Tofu, and Yokota Tofu-ya (which was in business in 1922). Before World War II there were at least two tofu companies in Fowler, California (located about 10 miles southeast of Fresno): Soga Tofu and Harada Tofu. Mr. Hashimoto says that after the war, Mr. Tokubo also used have his tofu shop there in Fowler, whence he moved it to Fresno. In Dinuba (pronounced dai-NU-bah, and located about 30 miles southeast of Fresno) a tofu shop named Nii-Tofu was in business after World War II. Address: Fresno Tofu Co., Fresno, California.

9707. *SoyaScan Notes.* 1990. Soya Clips receives 1,547 clips in 1990, down from 2,105 clips in 1989, 1,766 clips in 1988, 1,587 clips in 1987, and 1,586 clips in 1986 (Overview). Dec. 30. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** This decrease in the number of clips received represents a tightening of the specifications by Rose International to eliminate duplicate copies of news/wire releases and popular stories. It does not necessarily represent

© Copyright Soyinfo Center 2013

a decrease of interest in soyfoods by the U.S. media.

The clips are sent to Soya Clips (c/o Rose International, P.O. Box 5020, Santa Rosa, California 95402-5020. Phone: 707-576-7050. Subscription $300/year) by Luce Press Clippings, America's first clipping service. Luce clips 13,000 publications and has over 3,000 clients. The other major U.S. clipping service, Burrelle's in Livingston, New Jersey, is about the same size and is also highly recommended. In both, readers read the articles and key all nouns into a computer. The computer then selects the articles. Rose International will discontinue the clipping service in April 1991.

9708. Araki, A.M. 1990. [Re: A brief history of tofu shops in Fresno, California]. Letter to William Shurtleff at Soyfoods Center, Dec. 31. 2 p. Handwritten. Followed by phone interview on 8 Jan. 1991. [Jap; eng+]

• ***Summary:*** "It was difficult for me to collect this information. For some people I talked to it was a sensitive issue, like coming out of the internment camps after World War II back into white society. Since the generations have changed, I had to talk with many people. I came to the USA in Aug. 1920 and settled in Fresno that month. At the time in Fresno there were two tofu shops in Japantown: Yokota Tofu-ten (run by Yuichi Yokota, located on Fargan Alley, which was back-to-back with E Street; Yokota's postal address was on E Street), and Nakaoka Tofu-ten (run by Mr. Nakaoka on Kern St.). He is not sure of the shops were named "Tofu-ten" or "Tofu-ya," but he prefers "Tofu-ten because it has a higher class sound (more *jôhin*).

The owner of Nakaoka Tofu-ten died in about 1922. His wife re-married to Mr. Zenkichi Nagahama, who took over the company, renamed it Nagahama Tofu-ten, and ran it at the same location for about 20 years until 1942, when he was sent to an internment camp. He did not re-start the company after the war; he was too old.

Right after World War II, in about 1945, the first tofu shop in Fresno was started by a man who came from the Los Angeles area; although he was a Japanese, he had a big body and blue eyes. But he didn't last for long. After that he company was run consecutively, at the same location, by Joe Hashimoto, Sakae Tôkubo, Dr. Wilkinson (an M.D. and Seventh-day Adventist; he was a very famous surgeon and he made tofu himself at his shop on E Street), and then the two Goto brothers. After the war, the younger Goto brother immigrated to the U.S. from Japan. (Sometimes we call those new first-generation Japanese shin-issei). The same shop on E Street, which has been in business the longest, is now in its third generation, run by Musashi [Brad] Kubota."

He is not sure when the first tofu shops started in Fresno. However his father arrived in Fresno in 1911 and had a shop across the street from the Nagaoka tofu shop on Kern Street. He thinks Yokota was there at the same time, since the house in which Mr. Yokota lived in 1920 (he built it himself) was quite old, dating from about that period. His tofu shop was in the front of his house, facing the street.

There were some Chinese-run tofu shops in Fresno during this period but he does not remember any details concerning them. Address: Nichi Bei Times, Fresno Branch, P.O. Box 11489, Fresno, California 93773. Phone: 209-237-6779.

9709. **Product Name:** Berrydales Special Ices [Berry, Maple & Walnut, Ginger and Honey, Bitter Chocolate, Honey Vanilla].
Manufacturer's Name: Berrydales Ltd. (Marketer). Made in Clwyd, Wales, by Genice Foods Ltd.
Manufacturer's Address: 5 Lawn Road, London NW3 2XS, England. Phone: 071-722-2866.
Date of Introduction: 1990. December.
Ingredients: Berry: Soya milk, tofu, honey, apple concentrate, raspberries, blackcurrants.
Wt/Vol., Packaging, Price: 100 ml, 500 ml, and 2 liter biodegradable paperboard tubs.
How Stored: Frozen.
Nutrition: Berry: Per 100 ml.: Energy 75 kcal (calories; 313 Kilojoules), protein 1.02 gm, total fat 0.79 gm (saturated fat 0.12 gm, polyunsaturated 0.45 gm), carbohydrate 17.12 gm, salt 0.8 gm.
New Product–Documentation: Health Food Business (England). 1990. June. p. 21. "Health Food Business retailer guide to ice creams." Berrydales Special Ices, available in 5 flavors, are a delectable refreshing cross between an ice cream and a sorbet, and all based on tofu.

Soya International. 1990. July/Sept. p. 5. Lists 5 flavors. Says that the products are made from organic tofu and soymilk. Note that the company leaflets below do not mention organic ingredients.

Three leaflets sent by Heather Paine from London. 1991. April 23. The first, titled "Berrydales" notes that "Berrydales Special Ices, based on the ancient Chinese and Japanese food tofu, are a delectably refreshing cross between an ice cream and a sorbet. They are unique, delicious, and good for you. Berrydales ices use only the highest quality natural ingredients. They contain no animal products, no emulsifiers or stabilisers, are lactose free, low in fats and cholesterol and relatively low in calories." They are "currently available in four flavours: Berry, Maple & Walnut, Ginger & Honey, and Bitter Chocolate. In April we introduced our new Honey Vanilla." They are sold in bio-degradable paperboard packs in 100 ml, 500 ml, and 2 liter sizes. They are available nationwide in delicatessens and health food stores (including the Holland and Barrett chain), in selected Europa stores in London, and in selected branches of Tescos nationwide. For further information contact Michelle Berriedale-Johnson, Berrydales' founder and well-known food writer.

The second, titled "Nutritional breakdown of Berrydales Special Ices," gives a nutritional analysis and list of ingredients for 5 flavors. Ingredients for the new Honey

© Copyright Soyinfo Center 2013

Vanilla are: Soya milk, tofu, honey, raw can sugar, lemon juice, natural vanilla essence. All 5 flavors use soya milk and tofu as the first two ingredients.

The third, titled "Berrydales no-cream ices: Ices in your postbag," notes that the company has a new mail order service. It will ship 5 packs (100 ml each) or 2 packs (500 ml each) of any of its five flavors in polystyrene boxes.

Health Food Business (London). 1992. May. p. 34. "Frozen desserts. Berrydales. Berrydales ices–made from the highest quality natural ingredients, are a cross between an ice cream and a sorbet. They come in five flavours: Honey Vanilla, Chocolate, Maple & Walnut, Ginger & Honey and Berry. Low in calories, ultra low in fat, low in cholesterol, they are based on organic fresh tofu and are dairy-free and vegetarian. The Chocolate ice is also totally vegan and all the ices are kosher. Sizes include 100ml, 500ml, and 2 litre. From May a new four-pack is available with individual tubs of Hone Vanilla, Maple & Walnut, Chocolate and Finger & Honey (rrp [or RRP = recommended retail price] £2.99)."

Spot in SoyaFoods. 1991. Spring. p. 4. "Berrydales no-cream ices by mail order." "Berrydales Special Ices are made from soyamilk and tofu. Described as a cross between an ice cream and a sorbet, they contain no animal products no emulsifiers or stabilisers and are lactose free, low in fats and cholesterol and relatively low in calories. Five flavors are currently available."

Original Labels with the original ingredients (Berry, Ginger and Honey, Honey Vanilla) sent by Genice Foods Ltd. 1994. Feb. 18. 3.75 inch round lid. 500 ml. Illustration of a flower against a light wood-grain background. "Lactose free. No animal products. Low cholesterol."

9710. **Product Name:** [Tempeh, and Tofu].
Foreign Name: Tempeh, Tofu.
Manufacturer's Name: Cafe Restaurant Zollhaeusle.
Manufacturer's Address: 7730 VS-Zollhaus, Germany. Phone: 07721/21289.
Date of Introduction: 1990. December.
New Product–Documentation: Menu (Undated) sent by Flora Yap. 1992, April 5. It lists 5 tempeh dishes. The owner is Hartmut Rainer Hauser. Flora was told that he is now closed, but she is not sure if this refers to the restaurant or the food factory. Letter from Flora Yap. 1992. May 16. She received the menus mentioning seitan, tofu, and tempeh on 24 Dec. 1990 from a friend who had been to this place. In Jan. 1991 she phoned Hartmut Hauser. He had purchased the tempeh incubator from Byodo. It was a rebuilt old refrigerator. Hartmut makes his tempeh in perforated plastic bags; she suggested that he use plastic bags for better growth. In the autumn of 1991 she heard from the same friend that Hartmut had closed his restaurant, but the friend did not know whether Hartmut continued to make seitan, tofu, and/or tempeh. Hartmut likes to work on ecology projects, teaching people about protecting the environment. In May 1992 Flora tried to find Hartmut Hauser's phone number in the telephone directory. Zollhaus should be a suburb of Villingen-Schweningen, located in the Black Forest, not far from the Swiss border. "Life Food," which is located nearby in Freiburg, might have more information about Hartmut and Cafe Restaurant Zollhaeusle.

9711. Cederquist, Natalie; Levin, James. 1990. A vegetarians ecstasy: A healthy gourmet celebration of over 250 no cholesterol, no dairy, lowfat recipes devoted to long life and good taste. Glo, Inc., 2406 Fifth Ave., San Diego, CA 92101. 332 p. Dec. Illust. by Natalie Cederquist. Index. 28 cm. [13 ref]
• ***Summary:*** In this is innovative vegan cookbook, each recipe occupies 1 page and is accompanied by an illustration (line drawing). The glossary of ingredients mentions liquid aminos, miso, seitan, seaweeds, tamari, tempeh, and tofu. Page 28 is devoted to singing the praises of soy products. "Dairyless and eggless: With optimum health in mind, I have chosen to use soy products and egg replacer rather than dairy and eggs. Dairy is mucus forming, it contains cholesterol, fat and hormones, in addition to the pesticides and antibiotics used in the farming and dairy industry.

"Soy and seed cheeses, soy yogurts, soy cream cheese, soy sour cream, soy and rice based ice creams are delicious non-dairy products in the natural markets for you to try which are cholesterol free and low in fat."

The book contains 28 recipes for tofu, and 12 for tempeh. Other interesting recipes are: Sprouted soy salad (with 3 cups soy sprouts steamed for 3 minutes, p. 76). Orange miso dressing (p. 99). Miso soup (p. 162). Miso sesame rice (p. 206). Aduki bean and brown rice pot (p. 212). Féjoada (with soy sausages, p. 213). Mushroom seitan in wine sauce with wild rice (p. 241). Seitan sauté (p. 267). Amazake carob pudding (p. 290). Address: 2. M.D., San Diego, California. Phone: 1-800-854-2587.

9712. Dacosta, Yves. 1990. Lait de soja et tofu [Soymilk and tofu]. APRIA/CDIUPA, 1 avenue des Olympiades, 91300 Massy, France. 102 p. Dec. No index. 30 cm. Series: Actualités Scientifiques et Techniques en Industries Agro-Alimentaires. No. 45. [85 ref. Fre]
• ***Summary:*** Contents: Preliminary remarks. 1. Production of soymilk and tofu: Principles of production, the soybeans, cleaning/washing, soaking, grinding, cooking the slurry (*bouillie*), extraction of the soymilk, coagulation, separation of curds and whey, pressing the curds, removal of the tofu from the mold, cutting and packing the tofu, the need for water in a tofu ship, variations in production, storage and preservation of soymilk and tofu after their production, yuba, production of tofu from seeds other than soybeans.

2. Applications/uses of soymilk and tofu: Products: Soymilk and soymilk products (soymilk, sweetened soy beverages, dairylike soymilks, soy-based infant formulas,

© Copyright Soyinfo Center 2013

powdered soymilk, concentrated soymilks, soymilk mixed with other animal or vegetable milks, soy ice creams and frozen desserts, fermented soymilk products such as soy yogurt, various soymilk desserts [such as custards], sauces, dressings, and mayonnaises made from soymilk), tofu and tofu products (smoked tofu, fried tofu [*tofu frit*], marinated tofu, fermented tofu, breaded tofu, tofu mayonnaise and sauces, tofu spreads for bread, tofu sausages, pâtés, or biscuits/pancakes [galettes], tofu quenelles, quiches, fritters, raviolis, pizzas, mixed salads, prepared dishes (*plats cuisinés*), or sandwiches, tofu cakes, cheesecakes, or tarts, tofu desserts, ice creams, or chocolate bars), preparations based on okara (sausages, pâtés, croquettes, burgers, special breads or biscuits), the nutritional arguments for soymilk and tofu (rich in proteins, lipids, absence of cholesterol and lactose, low in sodium, an excellent ingredient in "light foods" [aliments allegés]).

3. A quick look at the major enterprises making and or selling soymilk, tofu, or their products in selected countries: France (Cacoja, Innoval, Soy [Société Soy], Sojadoc, Triballat, Celia, Celnat, Lima-Andiran, Maho Distribution, France-Proteines-Services), Great Britain (Plamil Foods Ltd., Itona Products Ltd., Soya Health Foods Ltd., British Arkady Co. Ltd. [subsidiary of ADM; incl. Haldane Foods Ltd., Regular Tofu Co., Tofeata Tofu], Granose Foods Ltd., Cauldron Foods, Dragon and Phoenix, Paul Jones (Tofu Shop), Full of Beans Soyfoods, Birchwood Health Products, White Waves, The Bean Machine Co-op Ltd., St. Ivel, St. Giles Foods Ltd., Yu's Tofu Shop, Tousoy Ltd., Allied Foods Ice Cream Co., Nexus Foods, Vegetarian Feasts, Unisoy Milk and By-Products Ltd.), Germany (DE-VAU-GE Gesundkostwerk GmbH, Soyastern Naturkost GmbH, Nuxo-Werke Rothfritz), Netherlands (Heuschen-Schrouff, Linn Oriental Products, Solnuts B.V., Manna Natuurvoeding), Belgium (Alpro, Jonathan P.V.B.A., Lima Foods, De Hobbit, Seven Arrows), Switzerland (Conserves Estavayer S.A., Soyana, Galactina), Sweden (Trensums Musteri, Aros Sojaprodukter), Italy (Crivellaro), Spain (Zuaitzo), USA, Japan, Hong Kong, Taiwan, Singapore. Bibliography.

Note: A great deal of the information in this report is taken, without permission or adequate citation, from books published by the Soyfoods Center in California. The statistics and dates given for the European, American, and Asian markets are taken almost completely from Soyfoods Center books. In some cases where the author relied on these books published more than 2 years ago, the information is presented as if it were current, whereas it is actually out of date and no longer correct. Dacosta's book, which might be called a "review of the literature," contains little or no new information. However his bibliography, based largely on a search of the CDIUPA database, with some original references, is quite good.

APRIA stands for Association pour la Promotion Industrie Agricole. APRIA administers CDIUPA. Address: Conseiller d'Entreprises, France: 47, rue Guersant–7015 Paris, France.

9713. **Product Name:** So Good Tofu Delights: Chunky Bars of Vanilla Flavoured Iced Soya Dessert in a Thick Carob Coating.
Manufacturer's Name: Haldane Foods Group Ltd. (Marketer). Made in Clwyd, Wales, by Genice Foods Ltd.
Manufacturer's Address: 25 Hayhill, Sileby Road, Barrow upon Soar, Leicestershire LE12 8LD, England. Phone: 050981-6611.
Date of Introduction: 1990. December.
Ingredients: Tofu (organic soya beans, calcium sulphate), raw cane sugar, vegetable oil, carob flour, vanilla bean extract, emulsifier (vegetable mono diglycerides, lecithin), stabilisers (guar gum, locust bean gum, xanthan gum), colouring (beta carotene).
Wt/Vol., Packaging, Price: 6 x 75 ml foil-wrapped bars in a paperboard box. Retails for £1.69 (4/91, London).
How Stored: Frozen.
New Product–Documentation: Haldane Foods Group. 1990. "Twenty-one Today. Twenty-new and exciting products launched at Helfex alone." At least 12 of these are soyfood products. "A dairy free choc ice made with tofu and enrobed with carob."

Soya International. 1990. July/Sept. p. 5. "A vanilla flavored carob coated iced soya dessert launched as the tofu 'choc-ice.' They contain no animal products and are suitable for vegans."

Article in Health Food Business (England). 1990. June. p. 30. "Product news: Tofu 'choc-ice.'" A color photo shows 2 boxes of Tofu Delights. Each box contains 6 individually wrapped 75 ml bars.

Label sent by Heather Paine of SoyaFoods in London. 1991. April 23. 7 by 3.5 by 2 inch box. Dark brown, blue, pink, and green on beige. Color photo of one bar, cut crosswise into halves, on top of box. "Soya carob dessert. 100% natural ingredients. Dairy free. No animal produce. Store below 18ºC/0ºF." Purchased at Lifecycle. UPC indicia. Two kosher symbols.

Talk with Ray Pierce of Genice Foods Ltd. 1994. Feb. 10. At the time this product was launched, Haldane was promoting So Good as their brand. They are no longer doing this as much.

9714. Kawanishi Shoko Co., Ltd. 1990. Kenkô ichiban. Yappari tôfu [1991 calendar. Health first. Of course, tofu]. Yokohama, Japan. 6 p. 58 x 39 cm. [Jap]
• ***Summary:*** The top half of the cover and of each page shows a color photo of prepared tofu dishes. On the bottom half is two months of the year. Across the bottom is the company name. Below that: "Tofu & soymilk equipment." And below that the address of the Japanese headquarters and USA branch office, with phone and fax numbers for each.

9715. **Product Name:** Kyoto Firm Tofu [Plain, or With Sauce Packet].
Manufacturer's Name: Kyoto Food Corp. USA.
Manufacturer's Address: 1050 W. 35th Drive, Terre Haute, IN 47802. Phone: 812-235-9806.
Date of Introduction: 1990. December.
Ingredients: Plain: Water, soybeans, calcium sulfate and magnesium chloride (coagulating agent).
Wt/Vol., Packaging, Price: 12 oz.
How Stored: Refrigerated.
Nutrition: Per 4 oz.: Calories 81, protein 9.07 gm, carbohydrates 2.40 gm, fat 4.54 gm, cholesterol 0 mg, sodium 0 mg.
New Product–Documentation: Label and letter sent by Mary Beth Thomas, Director of Marketing at Kyoto Food Corp. 1991. Jan. 28. "Production started Dec. 28, 1990. We are currently in grocery stores within an 80-mile radius and expanding rapidly... One label is for our plain package which is sealed directly on the container; the other is an envelope-type over-wrap and indicates a sauce packet enclosed. The sauce packet contains our own flavor mix for tofu soup and a meatloaf recipe."

Label. 7 by 4.25 inches. Green, orange, pink, black, and blue on white. Illustrations of a fork piercing a cube of tofu in front of a bowl of tofu soup. Five pink fans across the top against a green background. "A taste of the Orient. High protein. Low fat. No cholesterol. No preservatives. Natural soybean product. After opening place unused portion under water–change daily and refrigerate." UPC indicia. The product containing the sauce packet bears a multi-pointed orange star on which is written: "Sauce packet inside." There is a ½-inch-wide green border around the label. Soyfoods Center product evaluation. 1991. Jan. This is one of the most poorly designed, least attractive/effective labels we have seen for any tofu product in America. But Mr. Roach likes it.

9718. Shurtleff, William; Aoyagi, Akiko. 1990. Tofu & soymilk production. 2nd ed. Lafayette, California: Soyfoods Center. 336 p. Illust. by Akiko Aoyagi Shurtleff. Index. Dec. 11. 28 cm. [223 ref]
• ***Summary:*** Contains many new advertisements, plus changes on the copyright page, on page 14 (Soyfoods Association in now located at Bar Harbor, Maine), and rear cover of both paperback and hardcover editions (new ISBN for each). Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

9719. **Product Name:** Hickory Smoked Style Soya Kaas (Cheese Substitute).
Manufacturer's Name: Soya Kaas, Inc. A subsidiary of Swan Gardens, Inc. Distributed by American Natural Snacks.
Manufacturer's Address: Manufacturer: 6029 Lagrange Blvd., Atlanta, GA 30336. Distributor: P.O. Box 1067, St. Augustine, FL 32085. Phone: 904-825-2057.
Date of Introduction: 1990. December.
Ingredients: Incl. organic silken tofu, soymilk, crunchy soy bits with a smoked flavor.
Wt/Vol., Packaging, Price: 12 oz.
How Stored: Refrigerated.
New Product–Documentation: Soya International. 1990. July/Sept. p. 4.

9720. *SoyaFoods* (*ASA, Europe*). 1990. AFISA changes its name to SOJAXA. 1(2):2. Autumn/Winter.
• ***Summary:*** "The Association Francaise des Industriel du Soja (AFISA) has changed its name to SOJAXA. Representing 7 manufacturers of soyafoods in France (the logo represents a 7 in Japanese) its aims are to standardise, develop and promote soyafoods... The current members of SOJAXA are Innoval S.A. Ligne, S. Formoja, Prolait, Soja Biostar, Sojadoc, Sojasun [Triballat] and [Société] Soy. Their activities this year include a major promotion of soyafoods at motorway restaurants and also a national competition for Chefs to create their own original dishes based on tofu. For further information please contact SOJAXA, 5 Bd de la Mediterrane, 31400 Toulouse, France."

9721. **Product Name:** Summerfield's Tofu and Salsa Enchilada Dinner, and Tofu and Salsa Burrito Dinner.
Manufacturer's Name: Summerfield Foods, Inc.
Manufacturer's Address: P.O. Box 3235, Santa Rosa, CA 95402. Phone: 707-579-3938.
Date of Introduction: 1990. December.
Ingredients: Enchilada: Water, corn, tofu, brown rice, corn flour, textured soy flour, tomato paste, diced red bell pepper, dried garlic, dried tomatoes, chili powder, jalapenos, green chilies, paprika, natural mochi [glutinous] rice starch, cilantro, garlic puree, vinegar, natural herbs and spices, tamari soy sauce, white pepper, dried tomatoes, mustard seed, dried red bell pepper, pimientos, dried onions, sea salt, liquid smoke.
Wt/Vol., Packaging, Price: 12 oz (340 gm) paperboard

© Copyright Soyinfo Center 2013

box. Retails for $3.79 (1/91, California).
How Stored: Frozen.
Nutrition: Per 12 oz.: Calories 246, protein 12 gm, carbohydrate 46 gm, fat 32 gm (calories from fat 32, saturated fat 0.043 gm), cholesterol 0 mg, sodium 158 mg, potassium 448 mg, * dietary fiber 3.4 gm. * Fiber may reduce the risk of colon cancer and heart disease.
New Product–Documentation: Product with Label purchased from Berkeley Natural Grocery Co., California. 1991. Jan. 13. 9 by 7.25 by 1 inch paperboard box. Red, blue, and gold on white. Color photo of the dinner on a plate on front panel. "100% natural. Summerfield's, the fresh approach. Microwaveable. No preservatives. Keep frozen. Cholesterol free. Low fat. Low sodium. With herbs and spices." Right side panel lists percentage of U.S. recommended daily allowance, and diet exchange per serving (for diabetics): vegetable 0.6, bread 3,3. protein 0.2, fat 1.6. The back panel states: "Summerfield's naturally delicious foods are made from 100% pure and natural blends of the finest ingredients... Summerfield's recommends the nutrient guidelines established by the National Cholesterol Education Program (NCEP, Daily Average) for those adults with high blood cholesterol. These are: Total fat, less than 30% of calories. Saturated fat, less than 10% of calories. Polyunsaturated fat, less than 10% of calories. Cholesterol, less than 300 mg." The National Academy of Sciences recommends that daily sodium consumption for adults should be in the 1,100 to 3,300 mg/day range. "What comes around, goes around... Recycle!" Recycle logo. UPC indicia.

Soyfoods Center product evaluation. Box package is good except for a weak color photo on front panel. The dinners are rather tasteless and dry, with no character. Flavor score = 6. Film is hard to peel off container.

Talk with Bob Gerner of Berkeley Natural Grocery Co. 1991. Jan. 13. He started selling this product only 3-4 days ago.

Talk with Richard Rose. 1991. Jan. 13. This company introduced itself and displayed package mock-ups of products at the Philadelphia Natural Foods Expo in Nov. 1990. They said they planned to have 40 products, but Richard saw no products that contained soy. Roland Au, one of the principals, has worked with many natural foods companies. The two others have quite a bit of mainstream food company experience–perhaps as food brokers. The company started only a few months ago. The feeling of the whole marketing program was too slick and faceless, no character or soul–like a graduate student project.

Talk with Roland Au. 1991. Jan. 15. The company was incorporated in June 1990 by three active partner stockholders: Roland Au, Jack Stanghellini, and David Ryan. Their first products (all their canned items and some frozen dinners) were at the Natural Products Expo in Philadelphia and were shipped in Nov. 1990, and were in the stores by Dec. 1990. Their focus is strictly on the natural foods market, not on supermarkets, using natural foods distributors. They have distributors in many parts of the USA plus central and eastern Canada. They have 60 products. The 3-compartment tray, called a "composite fiber tray," is made of wood fiber with a lacquer coating. It is recyclable. The film that covers the tray is made of Mylar; it not the typical film, which may give off toxic gases during microwaving. All of the company's products are and will be frozen or canned. The products exist for dietary reasons–to replace meat and cheese. The products we tasted are now being reformulated.

9722. *Sunset* (*Menlo Park, California*). 1990. Creamy dip with a bite of ginger. 185:152. Dec. Central West edition.
• ***Summary:*** "The silky texture and neutral flavor of soft tofu make it an ideal medium for distinctive seasonings in this high-protein, low-fat dip for crisp vegetables... Some liken this dip's flavor to that of *hummus,* the garbanzo-bean and sesame-seed mixture so popular in Middle Eastern cuisines. Look for tofu in the refrigerated section of supermarkets, often with produce."

The recipe, Ginger Tofu with Vegetables, contains (per tablespoon): calories 21, protein 1.1 gm, fat 0.9 gm, carbohydrates 2 gm, sodium 80 mg, and cholesterol 0 mg. Address: California.

9723. Taira, Harue. 1990. Quality of soybeans for processed foods in Japan. *JARQ* (*Japan Agricultural Research Quarterly*) 24(3):224-30. Dec. [7 ref. Eng]
• ***Summary:*** Contents: Abstract. Introduction. Quality for food processing: Tofu, miso, natto. Variation of bean quality and suitability for processing. Factors inducing variations in the chemical composition and suitabilities for processing.

Figures show: (1) Consumption of soybeans in Japan in 1988 (1,000 tonnes): Total: 4,663 tonnes. Oil and meal 77%. Food 19%. Other 4%. Food products: 886 tonnes. Tofu and abura-age 57%. Kori-tofu 3%. Miso 20%. Natto: 11%. Other 9%. Individual food products (* An additional 69,000 tonnes are consumed in the form of cooked whole soybeans, yuba, kinako, moyashi {sprouts}, and others). Tofu and abura-age 505 tonnes. IOM and other USA 83%. Japan 11%. China 6%. Kori-tofu 29 tonnes. IOM and other USA 72%. China 28%. Natto 100 tonnes. China 50%. USA and Canada 30%. Japan 20%. Miso 179 tonnes. China 86%. Japan 11%. IOM 3%. Soy sauce: Defatted soybean flakes 183 tonnes (97%) and whole soybeans 5 tonnes (3%).

(2) Frequency distribution of solid matter extractability in soybean milk (105 samples; 60 cultivars and 7 lines)–for varieties Enrei, Fukuyutaka, Akishirome, Akiyoshi, Tamahomare, Fujimijiro, Hyuuga, Shirosenari. Average value of U.S. soybeans. Mode: 79%. Range 70-82%.

(3) Correlation between protein and sucrose content in soybeans. Inversely correlated. The more protein, the less sucrose. (4) Correlation between hardness of steamed seeds and ammonia nitrogen content in natto. Directly correlated.

© Copyright Soyinfo Center 2013

The harder the steamed seeds, the more ammonia nitrogen in the finished natto.

(5) Variation in chemical composition and suitabilities of soybeans for processing: Raw soybeans for processing, soybean milk for tofu, steamed seeds for miso, natto, cooked soybeans.

Tables: (1) Relationship between soybeans and processed foods in raw soybeans, soybean milk, and steamed seeds. (2) Chemical composition and suitability of soybeans from USA, China, and Japan for processing into tofu, miso, natto, cooked soybeans. Varieties: Enrei, Fukuyutaka, IOM (USA; low protein, high oil), Tamahomare, Kitamusume, Miyagishirome (large seeded), Nattoshoryu (small seeded), Chinese (low protein, high carbohydrate). Address: Dep. of Utilization, National Food Research Inst., Ministry of Agriculture & Forestry, Koto-ku, Tokyo.

9724. **Product Name:** [Handmade Tofu].
Foreign Name: Tofou Artisinal.
Manufacturer's Name: Tofoulie.
Manufacturer's Address: St. Pierre, 26560 Séderon, France. Phone: 75-28-55-05.
Date of Introduction: 1990. December.
Ingredients: Soybeans*, water, salt. * = Organically grown (*Ingrédient issu de l'agriculture biologique*).
Wt/Vol., Packaging, Price: 300 gm plastic bag.
How Stored: Refrigerated (store at 4ºC).
New Product–Documentation: Letter (fax) from Yoshinori Ito of Takai Tofu & Soymilk Equipment Co. 1996. April 24. Names and addresses of new tofu shops in countries where tofu is not well known. Mr. Michel Claude is the owner.

Form filled out and Label sent by Joel Pichon. 1996. June 14. His company's name is Tofoulie. They started making tofu in Dec. 1990, and now make 4,500 lb/month. Label is a yellowish transparent heavy plastic bag, printed with red, brown, and green letters. At the top is a UPC indicia. Near the bottom are the logos of *Nature & Progres* and *Cahiers des Charges de l'Agriculture Biologique.* Joel Pichon was formerly part of *Ferme de Jas,* also located in Sederon. They started making tofu and tofu burgers in March 1988.

Letter from Michel Claude and Joël Pichon in response to questions from William Shurtleff of Soyfoods Center. 1996. July 4. Joël Pichon, who is manager of the company, was introduced to tofu and its uses during a trip to Montreal, Canada, in 1983. In Nov. 1990 Joël separated from Ferme du Jas (where he had been making goat's milk cheese) in order to found Tofoulie and be independent. In 1988 Ferme du Jas started using tofu equipment bought on the second-hand market–a Sawa boy mill and hand press for okara. Michel Claude has been employed at Tofoulie as the tofu maker since July 1995, and has been a full partner since December 1995. He also takes care of equipment and technical matters. SCOP is a French abbreviation for Société Cooperative Ouvrière de Production, which means that nearly all workers are owners, or "partners in the firm's capital." The official name of the company is Tofoulie, not SCOP Tofoulie; the letterhead reads "Scop Tofoulie." They now make 4,500 kg/month of tofu.

9725. **Product Name:** [Artisanal Tofu Burgers (From the Forests, Indian, Pumpkin, Buckwheat, From the Sea, From Provence, From the Mountains)].
Foreign Name: Galettes Artisanales au Tofou (Forestières, Indiennes, Potimarron, Sarrasines, Marinières, Provençales, Montagnes).
Manufacturer's Name: Tofoulie.
Manufacturer's Address: St. Pierre, 26560 Séderon, France. Phone: 75-28-55-05.
Date of Introduction: 1990. December.
Ingredients: Tofou* 77%, mushrooms from Paris* 32%, rolled oats*, onions*, shoyu*, sunflower oil*, herbs and spices*, unrefined salt, garlic*. * = Organically grown (*Ingrédient issu de l'agriculture biologique*).
Wt/Vol., Packaging, Price: 200 gm plastic bag.
How Stored: Refrigerated (store at 4ºC).
Nutrition: Per 100 gm.: Fats (lipids) 7.6 gm, protein 13.5 gm, carbohydrates (glucides) 7.3 gm, calories (Kcal) 152 (635 kJoules).
New Product–Documentation: Form filled out and Label sent by Joel Pichon. 1996. June 14. His company started making tofu burgers in Dec. 1990, and now makes 3,700 lb/month. Label is a yellowish-white transparent heavy plastic bag, printed with brown and green letters. Near the bottom of the back panel is a UPC indicia. Below that are two logos, one for recycling. Between the logos is written: *Produit de l'agriculture biologique. Système de contrôle CEE,* Ecocert 31076 Toulouse Cedex.

Letter from Michel Claude and Joël Pichon in response to questions from William Shurtleff of Soyfoods Center. 1996. July 4. Their company now produces 7 different flavors of tofu burgers; a package with Label for each flavor is enclosed. On average the following amounts of each flavor are produced (in kg/month): From the Forests 400, Indian 450, Chestnut 400, Buckwheat 250, From the Sea 250, From Provence 350, From the Mountains (300).

9726. **Product Name:** [Tofu, and Tempeh].
Manufacturer's Name: Amirim Vegetarian Village.
Manufacturer's Address: Amirim 20015, Israel.
Date of Introduction: 1990.
New Product–Documentation: Letter from Arik Tal of Amirim. 1990. June 1. "We are living in Amirim, the only vegetarian village in Israel. We are running a small shop preparing tofu and tempeh. We have your 1979 book Book of tofu and Book of Tempeh."

9727. **Product Name:** Cauldron Foods Elysia: Exotic

© Copyright Soyinfo Center 2013

Dairy-Free Ice Dessert (Soy Ice Cream) [Stateside Fudge & Pecan, Classic Vanilla, Fruits of the Forest, or Continental Chocolate].
Manufacturer's Name: Cauldron Foods Ltd.
Manufacturer's Address: 149 South Liberty Lane, Ashton Vale Trading Estate, Bedminster, Bristol, Avon, BS3 2TL, England. Phone: 0272 632835.
Date of Introduction: 1990.
Ingredients: Classic vanilla: Water, tofu (water, soya beans, calcium sulphate), glucose syrup, fructose, vegetable oil, dextrose, flavouring (natural vanilla extract), emulsifier (monoglycerides of vegetable origin), stabilisers (guar gum, xanthan gum, locust bean gum), natural colour (annatto, curcumin).
Wt/Vol., Packaging, Price: 750 ml paperboard tub. Retails for £2.33 (12/90).
How Stored: Frozen.
New Product–Documentation: Soya Bluebook. 1986. p. 104. Letter (fax) from Philip Marshall. 1990. July 9. This product was introduced in July, 1990. The *Soybean Digest* listing in 1986 is wrong. The product is called Elysia, and it is based on tofu.

Labels sent by Philip Marshall of Cauldron Foods. 1990. July 9. 5.5 inch diameter. Heavy paper. Multi-color. Photo of three scoops of the ice cream in a dish surrounded by an illustration of a related theme. "Elysia–the new delicious dairy-free dessert. Suitable for those who are lactose intolerant, vegan or cutting down on cholesterol. No artificial additives."

Spot in SoyaFoods. 1990. 1(2):5. Dec. A photo shows the labels.

Talk with Ray Pierce of Genice Foods Ltd. 1994. Feb. 10. He thinks that either Cauldron Foods made this product themselves, or a little Italian company in Bristol named Varichea made it for them. It was not a successful product. It was made in very small quantities and Cauldron withdrew it very shortly after it was launched.

9728. **Product Name:** [Tofino Silken Tofu].
Foreign Name: Tofino.
Manufacturer's Name: Conserves Estavayer S.A. Sold at Migros supermarkets.
Manufacturer's Address: Case Postale 29, CH-1470 Estavayer le Lac, Switzerland. Phone: 037 63 91 11.
Date of Introduction: 1990.
How Stored: Refrigerated.
New Product–Documentation: Letter (fax) from Verena Krieger of Switzerland. 1990. May 31. Migros is now introducing Silken Tofu. Letter from Verena Krieger. 1990. July 5. This product is called Tofino and is expected to be introduced in about Sept. 1990.

Note. This is the earliest Italian-language document seen (April 2013) related to silken tofu.

9729. Dashiell, K.E.; Singh, S.R.; Nakayama, O.; Ogundipe, H.O.; Akem, C.N. 1990. Soybean research at IITA. Ibadan, Nigeria: International Institute of Tropical Agriculture. 19 p. *

• ***Summary:*** Note: One poorly cited publication from IITA this same year is: Nakayama, O.; Ogundipe, H.O.; Jegede, O.; Singh, S.R. 1990. Appropriate method to coagulate soybean milk using a commonly grown plant in West Africa *Calotropis procera.* Address: IITA, Ibadan, Nigeria.

9730. **Product Name:** [GranoVita Heideland Organic Tofu & Grain Dumplings].
Foreign Name: GranoVita Heideland Bio-Tofu Getreide Kloesschen.
Manufacturer's Name: DE-VAU-GE Gesundkostwerk GmbH.
Manufacturer's Address: Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany.
Date of Introduction: 1990.
Ingredients: Organic tofu (Water, organically grown soybeans, calcium chloride), onions, rye flakes, fine Graham bread crumbs (*Graham-Paniermehl*), egg protein, rolled oats, soy sauce, herbs, seasonings (*Wuerzmittel*), sea salt, spices (*Gewuerze*), garlic.
Wt/Vol., Packaging, Price: 6 dumplings weigh 250 gm.
Nutrition: Per 100 gm.: Protein 10.4 gm, fat 3.6 gm, usable carbohydrates 14.3 gm, calories 132. 1 BE (Broteinheit, or diabetic exchange) = 84 gm.
New Product–Documentation: Form filled out and Label sent by DE-VAU-GE. 1990. June 11. This product was introduced in 1990. Label: 2.5 by 4.5 inches. Self adhesive. Green, red, yellow, and black on white. Illustration of two red-roofed traditional houses among trees and bushes. "Contains no flesh. To prepare: Simply drop into lightly salted, boiling water and allow to simmer for about 10 minutes. Recommended in the context of a natural whole foods diet (*Im Rahmen einer Vollwerternährung zu empfehlen*)." Exklusiv Neuform certification symbol.

Note: In German, *Heide* means "heath, moorland, or moor." Thus Heideland refers to the moorland around Lueneburg where DE-VAU-GE is located.

9731. **Product Name:** [GranoVita Heideland Small Vegetarian Sausage With Organic Tofu].
Foreign Name: GranoVita Heideland Vegetarische Wuerstchen mit Bio-Tofu.
Manufacturer's Name: DE-VAU-GE Gesundkostwerk GmbH.
Manufacturer's Address: Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany.
Date of Introduction: 1990.
Ingredients: Water, vegetable oils and fats in changing proportions by weight, organic tofu (Water, organically grown soybeans, calcium chloride), onions, egg protein,

carbohydrates 61.7 gm, fiber (Ballaststoffe) 4.0 gm, calories 445. 1 BE (Broteinheit, or diabetic exchange) = 68 gm.
New Product–Documentation: Form filled out and new Labels sent by DE-VAU-GE. 1990. June 11. The product was introduced in 1990. Label: 5 by 8.5 by 1.5 inch paperboard box. Black, gold, red, green, and blue on white. A stylish color photo on the front panel shows the dish ready to serve on a black plate with a green sprig, mushroom, knife and fork nearby. At the top of the front panel: "The whole foods kitchen for the gourmet (Die Vollwertkueche à la Gourmet). A ready-to-heat menu for 1 person. Enjoy without flesh." The box contains two pouches: one with the vegetable & tofu stew; the other with the grain and vegetables. The back panel shows how these can be heated in either a water bath, a cooking pot, or a microwave oven. Exklusiv Neuform certification symbol. There are three other similar products in this line. One of these, GranoVita Gruenkern Käsebratling (Green Rye Cheese Patties in Mushroom sauce with Vegetables & Rice) contains soy sauce as its only soy-based ingredient.

9735. **Product Name:** [Tofu, and Soymilk].
Manufacturer's Name: Die Tofukueche Muenster.
Manufacturer's Address: Rinkerodeweg 6, D-4400 Muenster, West Germany. Phone: 0251-785902.
Date of Introduction: 1990.
New Product–Documentation: Letter from Bernd Drosihn of Viana Naturkost. 1990. April 8. This new soyfoods company, run by Heinz-Gerd Bruns, distributes only fresh tofu in water and fresh soymilk. A brochure is enclosed.

Brochure. 8.5 by 11 inches. 6 panels. Photocopied black on gray-green. The fresh tofu is made from organically grown soybeans grown in France. The company describes its work as "Production, distribution, direct sale (Herstellung, Vertrieb und Direktverkauf)." The tofu is made with nigari. Contains 8 tofu recipes.

9736. **Product Name:** [Smoked Tofu–Marinated].
Foreign Name: Raeucher-Tofu–Mariniert.
Manufacturer's Name: Die Tofurei (Formerly Berliner Tofurei).
Manufacturer's Address: Luebbenerstr. 4, D-1000 Berlin 30, West Germany. Phone: 030 / 393 0927.
Date of Introduction: 1990.
New Product–Documentation: Letter from Anthony Marrese based on an interview with Detlef Dorow and Ralf Hoffmann. 1992. Jan. 13. Menu from their restaurant.

9737. Engel, G. 1990. Vergleich von Quark mit Sojaprodukten: Herstellung, Mikroflora, Zusammensetzung, Sensork [Comparison of quark with soy products: Production, microflora, composition, and organoleptic properties]. *Deutsche Milchwirtschaft* 41(38):1272-75. 7 tables. Also published in Kieler Milchtage, 1990. [24 ref. Ger]*
• ***Summary:*** Compares the quality and nutritive value of cow's milk and soymilk, and discusses criteria for evaluating the chemical, microbiological, and organoleptic quality of tofu, okara, miso, tempeh, sufu, and other soyfoods. Address: Bundesanstalt Milchforschung, Inst. Mikrobiologie, Kiel, Germany.

9738. **Product Name:** New World Foods Red Chile Tamales (With Granular Tofu Curds).
Manufacturer's Name: Food Plant Inc. (The) & Southwest Soyfoods.
Manufacturer's Address: 2889 Trades West Rd., Santa Fe, NM 87501. Phone: 505-471-8979.
Date of Introduction: 1990.
Ingredients: Organic* corn, Organic* Rico Soy (soybeans, water, calcium sulfate–a natural mineral, caramel color), organic* soy fiber, organic* corn meal, red chile pods ground with water, soy oil, shoyu (water, soybeans, wheat, salt), spices, salt. * = Organically grown & processed in accordance with Section 26569.11 of the California Health and Safety Code.
Wt/Vol., Packaging, Price: 12 oz vacuum pack–Contains 4 tamales. Or 13 lb 8 oz foodservice pack–Contains 72 tamales.
How Stored: Frozen or refrigerated.
Nutrition: Per 2 tamales: Calories 275, calories from fat 98, total fat 11 gm (saturated fat 1 gm), cholesterol 0 mg, sodium 365 mg, total carbohydrate 41 gm (dietary fiber 6 gm), protein 10 gm, vitamin A 25%, vitamin C 2%, calcium 26%, iron 64%.
New Product–Documentation: Leaflet sent by Richard Jennings of VPS, Inc. (Vegetable Protein Specialists). 1993. Nov. 26. "New World Foods." These tamales are made from corn cooked in the traditional way and then stone ground. The tamales are steamed in a vegetable parchment.

Talk with Richard Jennings of VPS. 1993. Dec. 1. This product was introduced in 1990. A key ingredient was Rico Soy (small, firm chunks of tofu), which was renamed and trademarked Befine by Sept. 1993.

New Label sent by Richard Jennings. 1993. Nov. 29. 3 by 5 inches. Self adhesive. Black on gold. Illustration of a symbolic Aztec crow. "Vegetarian."

Letter and color labels sent by Richard Jennings of VPS, Inc. 1994. Dec. 28. The first focus of New World Foods products was foodservice. Starting in 1990 the company used generic labels printed with a personal computer and label printer. In the spring of 1994 they decided to go after the retail market as well. So they developed attractive new color self-adhesive labels for each product (see New World Foods, 1994).

© Copyright Soyinfo Center 2013

#11-03 Liat Towers, Singapore 0923, Republic of Singapore. Technical Bulletin Vol. HN10. *
• ***Summary:*** Discusses the critical factors affecting product quality and quantity. The various types of tofu are categorized according to protein content. There is need for more research on increasing the shelf life of tofu. Address: American Soybean Assoc., 541 Orchard Rd., #11-03 Liat Towers, Singapore 0923, Republic of Singapore.

9740. Kellogg's Frosted Mini-Wheats and Tofu Crunch (TV advertisement). 1990. Television broadcast. *
• ***Summary:*** Talk with Art Mio. 1990. March 9. "There is a TV commercial that has been running for the past month or so. It shows the husband sitting at the husband sitting at the breakfast table with a bowl of cereal in front of him. His elbow is on the table and his jaw is resting in the palm of his hand. His head is tilted and he looks like he is very sad, dejected, or upset. Right to the side of the couple is a big cereal box, in big letters is written "Tofu Crunch." It's a health commercial. The message is that you don't have to have bad tasting food in order for it to be healthy. Try sugar-coated Kellogg's Frosted Mini-Wheats. The media already considers tofu a 'yuck' food. How many clippings have you seen that say 'Tofu needs a good PR agency.'"

9741. Life Food. 1990. Tofu–hochwertiges Eiwess der Sojabohne [Tofu: The valued protein of the soybean (Brochure)]. Robert Bunsen-Strasse 6, D-7800 Freiburg, West Germany. 3 p. Undated. 30 cm. [Ger]
• ***Summary:*** This typewritten brochure was brought to Soyinfo Center by Wolfgang R. Heck. 2011. Nov. 25. It is an introduction to tofu, what it is, how Taifun makes, how to use it and to store it.

Across the bottom is the address, phone number, hours (daily 9-1), owners (Sylvia Notbohm-Kempff, Klaus Kempff, Wolfgang Heck). Konto Nr. 201-0940.

The company still presents itself as Life Food–Freiburg's Tofu Shop. Natural Foods (*Life Food–Freiburgs Tofurei. natuerliche Lebensmittel*). Address: Freiburg, West Germany. Phone: 0761/50 61 55.

9742. **Product Name:** Mandarin Soyfoods Garden Patties [Bar-B-Que, Cajun, and Teriyaki].
Manufacturer's Name: Mandarin Enterprises Ltd.
Manufacturer's Address: 11031 Bridgeport Rd. #107, Richmond, BC, V6X 3A2, Canada.
Date of Introduction: 1990.
Ingredients: Bar-B-Que: Tofu (organically grown soybeans, water, magnesium chloride [purified nigari]), brown rice, soybean fibre [probably okara], soy grits, brown rice flour, fresh onions, fresh carrots, fresh celery, fresh green peppers, crushed tomatoes, sesame seeds, rice syrup solids, sea salt, spices, tomato powder, powdered fruit solids, sunflower oil, smoke and spice extracts, natural flavor, spinach powder.
Wt/Vol., Packaging, Price: 2 patties. 170 gm (6 oz). Pinched ends box.
How Stored: Refrigerated or frozen.
Nutrition: Per 100 gm.: Calories 255, protein 10.3 gm, carbohydrates 27 gm, fat 6.0 gm (polyunsaturates 3.7 gm, monounsaturates 1.1 gm, saturates 0.6 gm, cholesterol 0 mg), dietary fiber 2.2 gm, sodium 1050 mg, potassium 425 mg.
New Product–Documentation: This is the line extension of 3 products launched in 1989. Talk with Gerry Blanchard of Natural Promotions, Vancouver, BC, Canada. 1992. Jan. 22. His company developed the packages / labels for these products. Mandarin now has 10-11 distributors in the USA. Six flavors are now available.

Label for Bar-B-Que sent by Gerry Blanchard. 1992. Jan. 22. 7 by 5.5 inches. Paperboard sleeve. Red, brown, and dark green on tan and light green. Illustration of a tofu burger with trimmings between buns, surrounded by a tomato, green pepper, celery stalk, and sliced onion. Silhouette of a cowboy riding a horse and swinging a lasso. "Ready in 3 minutes. Prepared with tofu, savoury herbs & vegetables. Cholesterol free. Microwaveable. Heat and serve." Called "Pâtés Jardinières" in French.

Two leaflets for all 6 Mandarin patties also sent. One shows a huge illustration of a burger with the 6 packages below it. The other shows the six packages lined up in a typical produce case. On the back is a list of ingredients and nutritional composition for each flavor.

Ad in Vegetarian Times. 1992. April. "Mandarin Soy Foods. Since 1976 we have been committed to producing the finest in great tasting soyfoods. For a free copy of our newsletter "Soy News," just circle our number below."

9743. **Product Name:** Soy Hoagie.
Manufacturer's Name: Michele's Original.
Manufacturer's Address: 6441 Haverford Rd., Philadelphia, PA 19151. Phone: 215-474-8636.
Date of Introduction: 1990.
New Product–Documentation: Talk with Michele D'Ambrosio, founder and owner of Michele's Original. 1992. Sept. 21. A hoagie (the term was first used in about 1955) is like a submarine sandwich. *Webster's Dictionary* defines submarine sandwich as "a large sandwich on a long split roll with a variety of fillings (as meatballs or cold cuts, cheese, lettuce, and tomato)–called also *grinder, hero, hoagie, Italian sandwich, poor boy, sub, torpedo."* She introduced this product in about 1990. It was made with whole-wheat French bread. It has all the regular fixings of a hoagie, incl. onions, hot pepper, etc. In place of meat she made it vegetarian, using "soy meats," such as Heart & Soul Meatless Cold Cuts (containing vital wheat gluten and tofu), or Worthington's soy lunch meats.

9744. **Product Name:** [Nagatani-En Misogura Instant Miso Soup {Fresh Miso Type} (Spinach, or White Miso with

© Copyright Soyinfo Center 2013

Wakame)].
Foreign Name: Nagatani-En Misogura {Nama-miso taipu} (Hôrenso, Shiromiso).
Manufacturer's Name: Nagatani En.
Manufacturer's Address: Nishi-shinbashi 2-36-1, Minato-ku, Tokyo, Japan.
Date of Introduction: 1990.
Ingredients: Spinach: Packet #1: Fresh seasoned miso [chômi miso] (soybeans, rice, salt, alcohol), kombu extract, alcohol. Packet #2. Natural seasoning powder (monosodium glutamate, bonito powder, etc.), dried spinach, dried [frozen] soybean curd, dried wakame seaweed, dried wheat gluten.
Wt/Vol., Packaging, Price: 2.43 oz: Three 69-gram pairs of packets (3 servings) in a large foil pouch. Retails for $2.25 (1/91, California).
How Stored: Shelf stable.
New Product–Documentation: Product with Label purchased at Diablo Foods, Walnut Creek, California. 1991. Jan. 17. 6 by 8.25 inches. Black, brown, red, blue, and white on light blue. Color photo of a wooden bowl of miso soup on front panel. Color illustration of a traditional Japanese treasure house and a nearby house with overhanging wooden eaves. To prepare, place the contents of each of a pair of foil packets in a soup bowl, add 1¼ cup boiling water, mix well, cover with a lid, and allow to stand for 3-4 minutes. Nagatani-En is an old and very famous Japanese company. Their main business has always been making ochazuke mix.

Soyfoods Center product evaluation. Very nice flavor for an instant miso soup; lots of wakame. Excellent package design. But certain ingredients on the Japanese label are not listed on the English label (e.g. bonito flakes).

9745. **Product Name:** [Extra Firm Tofu (Fine Herbs, or Pimento & Onion)].
Foreign Name: Tofu (*Fines Herbes, or Piment-Oignon*).
Manufacturer's Name: Nutrisoya Inc.
Manufacturer's Address: 4050 Pinard, St.-Hyacinthe, QUE, J2S 8K4, Canada. Phone: 514-796-4261.
Date of Introduction: 1990.
How Stored: Vacuum packed.
New Product–Documentation: Talk with Nick Feldman, president of Nutrisoya. 1995. May 17. These two flavored tofu products, curded with magnesium chloride, were both introduced in about 1990. The company also still makes its natural tofu.

9746. **Product Name:** Nature Soy Tofu (Soybean Curd), Tofa (Sweetened Soy Bean Curd Dessert), and Soya Bean Drink.
Manufacturer's Name: Parma Soia (Marketer-Distributor). Made in Singapore by Yeo Hiap Seng Ltd.
Manufacturer's Address: Strada Logheretto 2, 43010 Corcagnano (Parma), Italy. Phone: 0521-639-148.
Date of Introduction: 1990.
Wt/Vol., Packaging, Price: 250 ml Tetra Brik Aseptic cartons.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: Parma Soia brochure. 1990. Photo shows aseptic package. Talk with Xavier Karis in Italy. 1990. June 25. On the side of the drink is written: "Made in Singapore by Yeo Hiap Seng Ltd." The brand "Nature Soy" is written in large bold letters across the top of all three packages. The tofu package design is very similar to that used by Morinaga. On the front of the tofu and curd packages the product name and volume are written in Chinese characters. The front panel of the tofu package shows an entire cake of tofu in a cylindrical bowl. The curd package shows a Chinese-style bowl filled with curds. On the front of the drink package is an abstract pointillist design in the shape of 2 overlapping soybeans. The ingredients are listed in both French and English.

Note: Since Singapore is not a signatory to the International Patent Convention, companies based there are not obliged to respect international patents such as that held by Morinaga on the packaging of tofu in Tetra Brik Aseptic cartons.

9747. Parma Soia. 1990. La Soia dà sempre ottimi fruitti [The soybean always gives the best fruits (Catalog)]. Strada Logheretto 2, 43010 Corcagnano (Parma), Italy. 8 p. 29 x 84 cm. Color. [Ita]
• ***Summary:*** This handsome color catalog has 4 connected panels on each side. One side displays the company's new line of 21 soy products. Most of the products are in the line titled "Campi di Soia" (Fields of Soya), but several imported products (including tofu) are in the Nature Soy line. The other gives information about the company (a subsidiary of the Italian dairy giant, Parmalat) and its plans to promote the line. The Campi di Soya line is thought to be sold through supermarkets. This brochure was distributed at CIBUS, the biggest food fair in Italy, held annually in Parma, on 6-9 May 1990. Address: Corcagnano (Parma), Italy. Phone: 0521.639148.

9748. **Product Name:** [Biosoja Soja Delights: Financière Sauce, Tofu Ravioli].
Foreign Name: Biosoja Soja Delights.
Manufacturer's Name: Sojinal. Affiliate of Coopérative Agricole de Colmar (CAC) (Marketer).
Manufacturer's Address: 8 rue Merxheim, 68500 Issenheim, France. Phone: 89 74 53 53.
Date of Introduction: 1990.
Wt/Vol., Packaging, Price: 300 gm can.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: Spot in SoyaFoods. 1991. Spring. p. 5. "Ready meals from Biosoja." The company's existing range of Soyabean Delights includes Financière Sauce, Basmati Rice and Curry Sauce, and Tofu Ravioli.

© Copyright Soyinfo Center 2013

SoyaFoods. 1992. Autumn. p. 7. "A profile of Sojinal." See Table 2. "Biosoja retail food products." Canned ready meals with less than 300 calories.

9749. **Product Name:** Tofu, Soymilk, Fried Tofu, Soft Tofu, and Tofu Pudding.
Manufacturer's Name: Tan Tan Tofu.
Manufacturer's Address: 15084 Weststate St., Westminster, CA 92683. Phone: 714-895-3565.
Date of Introduction: 1990.
New Product–Documentation: Talk with Dana Jacobi of New York City. 1998. April 14. Tan Tan Tofu in southern California makes various types of tofu, including a delicious silken tofu, which she bought at Ranch 99, a Chinese supermarket chain in the Los Angeles area. The tofu pudding came curded in a one-quart plastic container (it filled the container like yogurt) with a caramel-colored ginger-flavored syrup on top in a little ½-pint Styrofoam cup with a plastic lid. To serve: Spoon the silken tofu into a bowl, pour the syrup over the top, and enjoy.

Talk with Kim Lai, manager of Tan Tan Tofu. 1998. April 15. This tofu company, run by Vietnamese-Americans, started making tofu in 1984 in San Diego, California. In 1990 they moved to their present location in Westminster, California. In Vietnamese soft tofu is called *Dau-hu wien* and tofu pudding is called *Dau-hu duong.*

9750. **Product Name:** [Tofu, Tofu Spreads, Soymilk].
Manufacturer's Name: Terra e Pane.
Manufacturer's Address: Via Canonica, 1009, 47038 S. Argangelo di Romagna (Forli), Italy. Phone: 0541/627-276.
Date of Introduction: 1990.
New Product–Documentation: Talk with Michael Brenger of La Fonte Della Vita. 1990. July 18. This company makes seitan, tofu, tofu spreads, and soymilk in Italy. Letter (fax) from Italian Trade Commission. 1990. Aug. 6. Gives address and phone number.

9751. **Product Name:** [Tofu, Tofu Marinated in Shoyu, Tofu Pâtés].
Manufacturer's Name: Urten's Tofu.
Manufacturer's Address: Hoeje Gladsaxe 2, DK-2860 Soeborg, Denmark. Phone: +45 31-67 41-90.
Date of Introduction: 1990.
New Product–Documentation: Talk with Thomas Andersen of Urten's Tofu. 1990. May 22. He founded the company.

9752. **Product Name:** Tofu-Scramble (Eggless Seasoning Mix) [Regular, Cheese, Bacon flavor].
Manufacturer's Name: Vegetarian Health, Inc.
Manufacturer's Address: P.O. Box 525, Maywood, IL 60153. Phone: 800-323-4092.
Date of Introduction: 1990.
Ingredients: Soy flour, salt, natural and imitation flavorings (onion and garlic), spices, caramel coloring; fortified with vitamins and minerals: zinc oxide, niacinamide, ferrous sulfate, copper gluconate, vitamin A palmitate, calcium pantothenate, thiamine mononitrate (B-1), pyridoxine hydrochloride (B-6), riboflavin (B-2), cyanocobalamin (B-12).
Wt/Vol., Packaging, Price: 5 oz paperboard box. Retails for $1.99.
How Stored: Shelf stable.
Nutrition: Per 1 oz (28 gm): Protein 14 gm, carbohydrates 10 gm, fat less thna 1 gm, cholesterol less than 1 mg, sodium 4 mg, fiber less than 1 gm.
New Product–Documentation: Ad in Company catalog. 1991. March. Talk with company salesperson. 1991. May 31. This company developed this product. It is a dry mix meant to be added to tofu.

9753. **Product Name:** [Viana Vegetable & Tofu Terrine {Spread for Bread}].
Foreign Name: Viana Gemuese-Tofu Terrine.
Manufacturer's Name: Viana Naturkost GmbH.
Manufacturer's Address: Schmittenstr. 106, D-5030 Huerth 6, West Germany. Phone: (02233) 41323.
Date of Introduction: 1990.
Ingredients: Tofu*, vegetables*, sea vegetables (Algen), vegetable oil*, herbs*, sea salt. * = Organically grown.
Wt/Vol., Packaging, Price: 200 gm.
New Product–Documentation: Talk with Bernd Drosihn, founder of Viana. 1990. April 7. His company introduced 2 tofu spreads in 1990. He buys the tofu from Tofuhaus Tiefenthal because of its good quality.

Label sent by Bernd Drosihn. 1990. April 8. 4.75 by 1.5 inches. Self adhesive. Reddish-purple, black, white, and light purple. "A spicy spread for bread."

9754. **Product Name:** [Viana Tofu & Millet Spread (with Fried Onions)].
Foreign Name: Viana Tofu Hirse Pastete (mit Roestzwiebeln).
Manufacturer's Name: Viana Naturkost GmbH.
Manufacturer's Address: Schmittenstr. 106, D-5030 Huerth 6, West Germany. Phone: (02233) 41323.
Date of Introduction: 1990.
Ingredients: Tofu*, millet*, roasted onions, herbs*, vegetables, sea salt. * = Organically grown.
Wt/Vol., Packaging, Price: 200 gm.
New Product–Documentation: Talk with Bernd Drosihn, founder of Viana. 1990. April 7. His company introduced 2 tofu spreads in 1990. He buys the tofu from Tofuhaus Tiefenthal because of its good quality. The onions are fried in oil.

Label sent by Bernd Drosihn. 1990. April 8. 4.75 by 1.5 inches. Self adhesive. Reddish-purple, black, golden brown,

and yellow. "Made purely from plants."

9755. **Product Name:** [Viana Tofu & Cherry Cream: Spread or Dessert].
Foreign Name: Viana Tofu-Kirschcreme (Brotaufstrich/ Dessert).
Manufacturer's Name: Viana Naturkost GmbH.
Manufacturer's Address: Schmittenstr. 106, D-5030 Huerth 6, West Germany. Phone: (02233) 41323.
Date of Introduction: 1990.
Ingredients: Tofu*, cherries*, almond butter, raisins, sea salt. * Organically grown.
Wt/Vol., Packaging, Price: 350 gm.
New Product–Documentation: Talk with Bernd Drosihn, founder of Viana. 1990. April 7. His company introduced a tofu sweet cream dessert in 1990. He buys the tofu from Tofuhaus Tiefenthal because of its good quality.

Brochure. 1990. "Have you heard? Spreads in glass jars." These include Tofu-Kirsch Creme.

Label sent by Bernd Drosihn. 1990. May 10. 3.5 by 3 inches. Self adhesive. Reddish-purple, black, brownish gold, and pea green. Dot matrix printed. "Without sugar! And without honey!"

9756. **Product Name:** Peanut Braised Tofu.
Manufacturer's Name: Wildwood Natural Foods.
Manufacturer's Address: 31 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1990.
Ingredients: As of 1998: Wildwood tofu (filtered water, soybeans organically grown in accordance with the California Organic Foods Act of 1990, nigari/magnesium chloride, a natural firming agent), marinade (soy sauce, water, brown rice syrup, rice wine, ginger powder), peanuts, onions, celery, red bell peppers, water, soy sauce, apple juice, vinegar, tomato paste, honey, toasted sesame oil, ginger powder, mustard, garlic, salt, and spices.
How Stored: Refrigerated.
New Product–Documentation: Label sent by Billy Bramblett. 1998. July. He says this product was introduced in 1990, and made at Wildwood's plant in Fairfax.

9757. Atlas, Nava. 1990. Vegetarian celebrations: Menus for holidays and other festive occasions. Boston, Massachusetts: Little, Brown and Co. [xii] + 276 p. Illust. (by Atlas). Index. 24 x 19 cm.
• ***Summary:*** The recipes are organized by holiday, and the main holidays are arranged chronologically: 1. The New Year. 2. Valentine's day. 3. Easter and St. Patrick's Day, etc.

Soy related: Silken tofu pudding (p. 15). Chinese cabbage with bean curd soup and mushrooms (with "½ pound tofu (bean curd), cut into ½-inch dice," p. 78). Tofu and potato kebabs (with "2 pounds firm tofu," p. 98). The vegetarian barbecue–Tofu, tempeh and seitan (with a description and discussion of each, p. 106-08). Sweet and savory grilled tofu. Grilled tofu teriyaki. Grilled tempeh teriyaki. Sweet and savory grilled tempeh. Curried grilled tempeh. Grilled seitan teriyaki. Seitan and grilled vegetables teriyaki. Sweet and savory grilled seitan. Teriyaki marinade (with "natural soy sauce," p. 113). Tofu in black bean sauce (with "1/3 cup fermented black beans, rinsed and chopped," p. 212-13. Note: They are made from soy beans). Soy and honey nuts (with natural soy sauce and 4 cups shelled nuts–a mixture of peanuts, cashews, and almonds is very good, p. 237-38). Tofu mayonnaise (p. 257).

9758. Bounds, Sarah. 1990. Thorsons green cookbook: Food for a healthy future for you and the planet. Hammersmith, London, England: Thorsons–An imprint of HarperCollins Publishers. 159 p. Index. 22 cm. [6 ref]
• ***Summary:*** The cover states that this book shows you how to: "Plan and equip a green kitchen. Find organic foods free from chemicals. Protect your body against pollution. Eat food that tastes good and does you good." But the diet-environment connection is made only superficially and ineffectively. And this book takes an ambivalent stand on a vegetarian diet. While showing the many environmental benefits of a vegetarian diet, it suggests softly that readers may want to restrict consumption of red meat, but stops far short of encouraging them to stop eating it (see p. 22, 24). Moreover, meat, poultry, and fish are used in many recipes, especially in the chapter titled "Make Meat Go Further" (p. 111-122).

The ecological benefits of soyfoods are praised (p. 23), but soy is apparently used in only one recipe (Tofu Chow Mein, p. 75) in the chapter titled "Speedy Oriental Masterpieces.

Pages 141-52 give a useful list of organic farm shops in the UK; all are Soil Association Symbol holders. Page 153 lists 11 useful addresses in the UK and Australia. Address: England.

9759. *CGPRT Working Paper.* 1990. CGPRT crops in Indonesia: 1960-1990. A statistical profile. No. 4. xv + 63 p. 25 cm.
• ***Summary:*** Contains a wealth of statistical data indicating progress of maize, soybean, groundnut, mungbean, cassava, sweet potato, and rice is presented. It draws upon a newly established statistical database and provides unique data sets such as district level development in production over 20 years in selected provinces in Indonesia. Moreover, it presents wholesale and farmgate prices movements based on monthly averages of major crops. The report presents a fraction of the data available in the database of the Centre. Supplementary data can be made available on request.

Table 5 shows that soybean production in Indonesia has increased from 339,000 tonnes in calendar year 1957 to 1,151,000 tonnes in 1987. During this time, the yield has

© Copyright Soyinfo Center 2013

grown from 646 kg/ha to 1,056 kg/ha.

Table 15 shows that Indonesia's top soybean producing provinces in 1987 were East Java (413,394 tonnes), Central Java (135,907), Lampung (117,698), and Aceh (102,402). Within East Java in 1987, the top soybean producing districts were Jember (71,675), Banyuwangi (44,675), Pasuruan (35,686), and Lumajang (30,909).

Tables 36 and 37 shows the retail prices of tofu and tempeh each month in Rp/kg from 1981 to 1988 in Surabaya. The prices have more than doubled during this period. Retail prices for these foods in Bandar Lampung are shown in tables 40 and 41.

Table 43 shows Indonesian imports and exports of soybeans and soybean cake from 1963 to 1988. Soybean exports, which reached a peak of 36,000 tonnes in 1973, have been at or near zero since 1978. Soybean imports have climbed dramatically since 1971, reaching a record 465,839 tonnes in 1988. Thus imports that year were equal to about 40% of domestic production. Exports of soybean cake have always been negligible but imports have risen steadily since 1975, reaching a peak of 306,716 tonnes in 1986, then dropping to 72,323 tonnes in 1988.

Table 50 shows the total supply and domestic utilization of soybeans in Indonesia from 1968 to 1987. In 1987, of the 1,411,000 tonnes available, 3% was used for seed and the rest was used for food. None was used for feed or use in non-food industrial products. Per capita availability of soybeans increased from 3.28 kg/year in 1968 to 7.76 kg/year in 1987. In the peak year, 1986, it was 8.80 kg/year.

Table 56 shows consumption per capita of GCPRT crops in Indonesia from 1981 to 1987. Tofu consumption has increased from 74 gm/week in 1981 to 82 gm/week in 1987, while tempeh consumption has decreased from 95 gm/week in 1981 to 86 gm/week in 1987. Address: CGPRT Centre, Jl. Merdeka 145, Bogor 16111, Indonesia.

9760. Dunne, Lavon J. 1990. Nutrition almanac. 3rd ed. New York, NY: McGraw-Hill. vi + 340 p. Illust. Index. 26 cm. 1st ed. 1973. [185* ref]

• ***Summary:*** This book is divided into 8 sections; at the end of several of these is a glossary and bibliography. In Section VI, "Foods, beverages, supplementary foods, and eating to feel right," soy is mentioned In the subsection on "Legumes" (p. 243), which has its own subsection titled "Soybeans" (p. 243), which discusses the nutritional value of soybean products in a meatless diet. "Soy flour, oil and milk are used in a variety of home-cooked and commercial products." "Sprouted soybeans contain increased amounts of vitamin C." The subsection on "Milk and milk products" (p. 244) notes that people who are allergic to milk may substitute soy milk, although it lacks much of the nutritional value of cow's milk because it is low in calcium and phosphorus. The subsection on "Lecithin" (p. 249) begins: "Lecithin is a natural constituent of every cell of the body and helps to emulsify cholesterol in the body." The world's leading source of commercial lecithin is the soybean.

In the subsection titled "Some rich sources of nutrients" (p. 263-64) soybeans (or legumes) are listed as rich sources of protein, choline, pantothenic acid, vitamin E (cold-pressed oils), vitamin K, copper, and zinc.

Section VII, "Table of food composition" (p. 265) includes soy flour (p. 276), soybean oil (p. 283), soy sauce (p. 296), soybeans (cooked), soybean curd (tofu), soybean milk, and soybean sprouts (p. 306). Address: Nutrition Search, Inc., John D. Kirschmann, Director.

9761. Facciola, Stephen. 1990. Cornucopia: A source book of edible plants. Vista, California: Kampong Publications. ix + 678 p. Indexes (six!). 28 cm. [522* ref]

• ***Summary:*** "In your hands is one of the most remarkable efforts to come out of the struggle to preserve the genetic diversity of our planet... Steve Facciola has put together an easy-to-understand, easy-to-use compendium of the diversity of food plants available to consumer, gardener and scientist" (from the Preface). The largest and most comprehensive work of its kind, this book gives details on 3,000 edible plant species and 7,000 varieties.

Contents: Preface, by Noel Vietmeyer. Introduction. Acknowledgements. Botanical listings: Alphabetical listings of plant families (*Glycine max* and *Glycine tabacina* are listed in the family Fabaceae, pronounced fuh-BAY-see), fungi families, algae families, bacteria families. Cultivar listings (by common name for the most important and popular crops, e.g., shiitake, soybean, spinach, sprouting seeds). Sources (names, addresses and phone numbers of firms that sell seeds, plants, etc.: Domestic commercial, domestic non-commercial, overseas commercial, overseas non-commercial). Bibliography. Indices and appendixes: Index of principal vernacular names. Index of vernacular and other names occurring elsewhere in the text. Index of usage and edible parts. Index of species native to or naturalized in North America. Index of species not listed in Kunkel [Gunther Kunkel. 1984. Plants for human consumption. Koeltz Scientific Books, Germany]. Index of families and genera. Appendix A: Abbreviations used–For type of product offered, for annotated bibliographical citations, in descriptions for sources. Appendix B: Endnotes used in the cultivar listings.

As of Aug. 1994 an electronic version of this book is now available. It runs on Microsoft Windows and uses more than 25,000 hypertext links to cross reference information.

The main information on soybeans is found on pages 91 (Botanical listings for *Glycine max* and *Glycine tabacina*), p. 219 (*Aspergillus oryzae* culture), p. 221 (*Actinomucor elegans* culture for fermented tofu or sufu, and *Rhizopus* cultures for tempeh), p. 224 (*Bacillus subtilis* culture for natto), p. 482-83 (for "field soybeans," lists 5 black-skinned cultivars, and 7 yellow-skinned cultivars; plus 11 "vegetable

© Copyright Soyinfo Center 2013

soybeans"–Agate, Butterbeans, Envy, Extra Early, Fiskeby V, Hahto, Hakucho Early, Kanrich, Okuhara Early Green, Prize, and White Lion), p. 485-87 (sprouting seeds including soybean sprouts with directions for sprouting), and p. 500 (Soyfood cultures).

Additional information on food uses of soybeans is found throughout the book. Tofu: p. 9 (In Indonesia, a salt derived from the fruit of *Rhus javanica* (*Nurude, Muyen*) is used to coagulate tofu), p. 61 (In Japan the seeds of *Cannabis sativa,* called *asanomi,* are used in deep-fried tofu burgers (*ganmodoki*)), p. 76 (A vegetable curd similar to soybean tofu can be made from the seeds of the bottle gourd or calabash (*Lagenaria siceraria*)), p. 92 (The seeds of the Bonavista bean or hyacinth bean (*Lablab purpureus*) can be prepared as tofu), p. 127 (The seeds of okra, gumbo, or lady's finger (*Abelmoschus esculentus*) can be made into tofu or tempeh). Kecap (Indonesian soy sauce): p. 9 (In Indonesia, the plant tuberose (*Polianthes tuberosa*) is added to the substrate in making kecap), p. 191 (In Indonesia, fresh leaves of kaffir lime, also called ichang lime, makrut, or djeruk purut (*Citrus hystrx*) are used to flavor kecap). Miso: The following can be used as a substrate for miso–p. 88 (Peanuts), p. 94 (seeds of the velvet bean, also called cowitch, cowhage, benguk (*Mucuna pruriens*)), p. 155 (barley (*Hordeum vulgare*)), p. 156 (proso millet (*Panicum miliaceum*)). Address: 1870 Sunrise Dr., Vista, California 92084. Phone: (619) 726-0990.

9762. Hammer, K.; Esquivel, M. 1990. East Asian influences in Cuban agriculture. *Plant Genetic Resources Newsletter* (*FAO/IBPGR*) No. 77. p. 9-16. [15 ref. Eng]

• ***Summary:*** "Virtually the entire aboriginal population of Cuba was wiped out in the first years of the Conquest. The introduction of African slaves supplied the alternative labour needed to develop agriculture in Cuba. Thus by 1861 nearly 60% of the Cuban population was either black or mulatto. By then, slave revolts had become increasingly common, jeopardizing the economic stability of Cuban agriculture. From its founding in 1794, the Junta Real de Fomento, Agricultura y Comercio (Royal Board of Development, Agriculture, and Trade) tried to boost the numbers of non-Africans in Cuba, which led to the traffic in Asiatics in 1847 and Yucatecan Indians in 1849.

"After 1842, large numbers of Chinese were sent to the English colonies of Barbados, Jamaica and Trinidad. The Real Junta de Fomento, noting this, sent a representative to China in 1844 to negotiate the introduction of Chinese settlers into Cuba. A contracting agency for coolies destined for Cuba was set up, operating in Macao, Among, Swataw [Swatow], Hong Kong, and Wompoa. The coolies travelled through Manila in the Philippines. On 1 January 1847, the first lot of 1,073 Chinese immigrants docked in the port of Havana. They consisted, *inter alia,* of farmers, artisans and tradespeople. By 1861, there were already over 60,000 Chinese from Shanghai and Canton, and it is estimated that between 1853 and 1873 alone, 132,435 Chinese entered Cuba. Basically, these people worked in the agricultural sector. Many tradespeople and artisans remained in Havana, creating a little Chinatown in the Zanja Street neighbourhood, while on the outskirts of Havana, a place known as Cienaga in the Cerro district was settled by farmers who came to grow almost all the vegetables for the capital. A major settlement of Asian vegetable farmers also developed south of Havana, in Batabanó province.

"The Japanese were only a small minority among the Asiatic immigrants to Cuba, concentrated in a few places such as the Isla de la Juventud (formerly Isla de Pinos), where they have played a major role in the development of local fruit and vegetable cultivation. We have no detailed information on their arrival in Cuba, but their presence on the Isla de la Juventud goes back at least three generations, according to our information."

According to Roig (1975), the soybean was introduced to Cuba in 1904 by the EEA (*Estación Experimental Agronómica de Santiago de Las Vegas,* currently INIFAT, the Experimental Agronomical Station) from the USA, but it was possibly already found in the Isla de la Juventud, used by the Japanese to prepare a kind of cheese called 'tofu.' (dau phu in Vietnamese).

9763. Heiser, Charles B., Jr. 1990. Seed to civilization: The story of food. New ed. Cambridge, Massachusetts: Harvard University Press. vi + 228 p. Illust. Index. 24 cm. [83* ref]

• ***Summary:*** An outstanding work, written for the general reader. "This is a classic book about the origins of agriculture and the influence of its discovery on the development of civilization"–Ghillean T. Prance, Director of the Royal Botanic Gardens [England; on rear cover].

The Preface notes that this is a book about the plants (and animals) that stand between humans and starvation. The main subjects are ethnobiology, the study of plants and animals in relation to humans, and ecology, the study of organisms in relation to their environment. We humans "get all of our carbohydrates and nearly three-fourths of our protein from plant sources. Moreover, nearly all of the food we get from animals is in turn derived from plants. After all, life depends on photosynthesis; chlorophyll has been referred to as the green blood of the earth."

Table 5-1, "Estimated production of world's 32 major food crops" (p. 63) lists the top ten as (* = member of grass

family; units in million metric tons): Sugar cane* 932. Wheat* 536. Corn* 481. Rice* 476. Potato 309. Sugar beet 286. Barley* 180. Manioc 137. Sweet potato 110. Soybean 95. Source: *FAO Production Yearbook,* 1986.

Chapter 7, "Legumes: The meat of the poor," contains a section on "Soybeans" (p. 129-33). It notes that there are no archaeological records of the soybean to help us determine when it was first cultivated, but it was mentioned in Chinese literature before 1000 B.C. Unlike most legumes, the beans are seldom eaten directly, but are used to make many different foods including bean sprouts, miso, tofu, soymilk (such as Vitasoy), tempeh, and soy sauce.

"The widespread cultivation and utilization of soybeans in the United States in the space of a few decades must be one of the most spectacular success stories in the recent history of agriculture."

Photos show: (1) A field of soybeans in the USA planted in rows, free of weeds. (2) Soybean plants ready for harvesting. (3) Soybean seeds. (4) A John Deere combine harvesting soybeans.

Note: Previous editions of this book were copyrighted in 1973 and 1981. Also discusses: Peanuts (p. 126-29). Potatoes and their remarkable history (p. 134-39). Tomatoes and their unusual history (p. 181, 206). Address: Distinguished Prof. Emeritus of Botany, Indiana Univ.

• ***Summary:*** This recipe book calls for the use of many DE-VAU-GE (GranoVita) products. Address: Germany.

9765. Madison, Deborah. 1990. The savory way. New York, NY: Bantam Books (Div. of Bantam Doubleday Dell Publishing Group, Inc.). xx + 444 p. Illust. by Patricia Curtan. Index. 25 cm. [46 ref]

• ***Summary:*** At the top of the rear cover is written: "Winner of The Best Cookbook of the Year 1990 by the International Association of Culinary Professionals" [IACP]. Neither soy nor tofu is mentioned in the index, but in the section on "The Pantry" (p. 425), "silken-firm" tofu is described. A black-and-white photo on the front cover shows Deborah Madison. On the front and rear covers are quotes in praise of the book by Alice Waters (founder of Chez Panisse), Marion Cunningham (author of *The Fannie Farmer Cookbook*), and Mollie Katzen (author of *The Moosewood Cookbook*). Address: Santa Fe, New Mexico.

9766. Moosewood Collective (The). 1990. Sundays at Moosewood Restaurant: Ethnic and regional recipes from the cooks at the legendary restaurant. New York, NY: Simon & Schuster. 734 p. Illust. Index. 24 cm. A Fireside Book. [55* ref]

• ***Summary:*** Since it opened in 1973 in Ithaca, New York, Moosewood Restaurant has become famous for its creative semi-vegetarian cuisine (fish are included on the menu and in this book) with a healthful emphasis. The restaurant is run by a group of 18 women and men, most of whom have worked together for nearly 10 years. Major decisions are made collectively. This is the Collective's second vegetarian cookbook. Each section, corresponding to the cuisine of 17 different geographical regions (e.g. Eastern Europe, Japan) and one ethnic group (Jewish) is written by a different member of the collective. The book contains many soy-related recipes: Tofu (20 recipes), tempeh (1), miso (1), soybeans (1), tamari roasted nuts (1), etc. The extensive "Guide to ingredients, techniques, and equipment" (p. 649-87) describes: Beans (incl. soy), chick pea flour (besan flour), dashi, Hoisin sauce, miso, seitan, soy sauce (see tamari soy sauce), light soy sauce, tempeh, tofu, vegetable oil (incl. soy oil), Worcestershire sauce ("The formula remains a well-guarded secret, but we do know that the Lea and Perrins product contains molasses, anchovies or sardines, sugar, garlic, tamarind, soy sauce, vinegar and spices"). Address: Ithaca, New York.

9767. Morningstar, Amadea; Desai, Urmila. 1990. The ayurvedic cookbook: A personalized guide to good nutrition and health. Santa Fe, New Mexico: Lotus Press. 351 p. Foreword by Yogi Amrit Desai. Introduction by Dr. David Frawley. Illust. by Amadea Morningstar. Index. 23 cm. [40 ref]

• ***Summary:*** This is a lacto-ovo vegetarian cookbook based on Ayurvedic principles. Contents: Part I: General Information. History of Ayurveda. Nutrition from an Ayurvedic perspective. Discovering your constitution. Attributes and nutritional needs of each constitution. How to imbalance your constitution. Understanding Ayurvedic nutrition: Taste. Digestion. Food combining and preparation. Balancing *Agni.* The digestive organs. The *chakras* and dietary change. Eating with the seasons. Getting ready to cook. Planning balanced meals easily. Menus: *Tridoshic, Vata, Pitta, Kapha.* Part II: Recipes. Part III: Appendices. 1. Most frequently asked questions and answers. 2. Enlarged food guidelines for basic constitutional types (many soyfoods are included). 3. Some basic information about nutrients. 4. Glossary of English and Sanskrit terms. 5. Food name equivalents in Latin, Sanskrit, Hindi. 6. Bibliography. About the authors (autobiographical).

The three Vatas (tridosha, three doshas, constitutional or body types) are Vata (pure air, head/wisdom), Pitta (pure fire, action), and Kapha (pure water, love/heart). Tridoshic foods or herbs are suited to all 3 constitutions; these include ghee, basmati rice, and asparagus. Concerning soya: "Many *Vatas* handle certain well-spiced soy products well, like tofu or liquid soy milk. Some do not. Let your gut be your guide.

© Copyright Soyinfo Center 2013

Dairy is very calming to Vata, especially when it is warm" (p. 14).

"*Pittas* are often attracted to high-protein foods, and do seem to need a little more protein than other constitutions. Goat milk, cow milk, egg white souffles, tofu, tempeh, and the aforementioned cottage cheese are all effective in balancing Pitta. Most beans–with the exception of heating lentils–are excellent" (p. 16).

Anything which stimulates elimination tends to relieve *Kapha* (barley and beans being classic examples). Aduki beans are especially good, as are black turtle beans, though the latter are more difficult to digest. Soy beans and soy products are recommended less frequently. Over half of tofu's calories come from fat, surprisingly, while only 4% of black beans' do. Still, soy products like soy milk tend to be less Kapha-enhancing than dairy products" (p. 19).

"Examples of oily food include ghee, vegetable oils, animal fats, soybeans, many vegetables and citrus. Dry foods include corn, buckwheat, rye, millet, most beans and dark leafy greens, to list a few. These latter foods will need moistening of some sort to be more easily digested by most people" (p. 28).

In the menu section, under each constitutional type (dosha, such as Vata), recommended menus are given by season for each meal. For example, soy-related foods included in Vata menus are: Summer: None. Fall: Dinner–Miso tofu, Amasake. Winter: None. Quick day: Breakfast–soymilk. Beverage–Amasake. Weekend day: Nothing. On the road (when travelling): Dinner' Chinese vegetables and rice (with tofu, if well tolerated).

Each recipe in the recipe section tells which constitution type it suits, how long it takes to prepare, in what seasons it is most healing, and how many it serves. For example,–Vata means that it calms Vata, + Vata means that it aggravates or increases Vata, and 0 Vata means that it is neutral for Vata. For brevity, we will give only Vata examples in the following. Soy-related recipes: About tofu (p. 102): Tofu and liquid soy milk tend to be cool and heavy, yet oilier than most other bean products. This oily lubricating quality helps their digestion, as does the pre-processing they have undergone as legumes... Eaten in excess, they will increase *Kapha.* Warming preparation, in the form of heat or warming spices such as ginger, tamari, cumin, turmeric, cinnamon or mustard seeds, aid their healthy breakdown in the system. Beans can be idiosyncratic in effect though; if your experience doesn't match the descriptions given here, trust your direct experience first. Some people have a hard time digesting tofu in almost any form; an allergy to soy may be present. It was popular in the sixties and seventies to serve tofu cold, cubed and plain at health food-type salad bars. This is about the most difficult way to try to consume an already chilling food. Try tofu marinated, spiced and cooked, then make up your mind about its digestibility for you."

Miso tofu (p. 102,–Vata). Tofu mushrooms (p. 104,–Vata). Tofu pesto (p. 104,–Vata). Sauteed tofu and vegetables (p. 105,–Vata, but mildly + Vata with frozen tofu). East Indian lima beans (with tofu, p. 114). Spicy rice and yogurt (with soy milk, p. 131,–Vata; "Made with soy milk, which is lighter and cooler than yogurt, it is suitable for Pitta and Kapha as well"). Vegetable barley soup (with tofu, p. 188, 0 Vata).

About oils (p. 202-03): "Ghee is the highly preferred fat in Ayurveda, being light, easy to digest and potentiating to many of the foods with which it is served." Sunflower oil is the next best choice, being agreeable to all doshas. "Sesame oil is specifically recommended when a warming effect is needed. It grounds Vata... The vast majority of oils are warming and heavy in quality, including..." soy oil. "Margarine is cold and difficult to digest and not often recommended by Ayurvedic physicians."

About condiments: Salt, tamari, miso, and pickled ginger all heat up a meal and stimulate agni (fire). A detailed discussion is given of the medicinal function of sea vegetables in Ayurveda (p. 216-17).

About soy milk: Liquid soy milk can be a good alternative to cow's milk, if you are sensitive to the latter. It is also less *Kaphagenic* (imbalancing to *Kapha*) than cow's milk, when properly prepared. Lighter than cow's milk in its effect on the body, it cooks up easily in recipes. Like most high protein foods it promotes building, not cleansing. It is best used in restorative and maintenance programs. It can be warmed with cinnamon, cardamom, nutmeg or ginger and black pepper. Some *Vatas* do not tolerate it well. Dried soy milk powder and soy protein powder are much more difficult to digest than the whole liquid soy milks. Only the most stalwart *Pitta* is likely to be able to consume them without gas, as they are cold, heavy and dry. Whole soybeans and tempeh are often gas-producing as well. For adequate digestion they require much cooking and spicing, good *agni,* and a *Pitta* constitution. Hot soy milk (p. 264).

Scrambled tofu (p. 281,–Vata).

In appendix II (p. 293). The following legumes, in moderation, calm Vata: Aduki beans, soy cheese, soy milk (liquid), tofu, black lentils, mung beans, red lentils, and tepery beans. But these aggravate Vata: Soy beans, soy flour, soy powder, tempeh, garbanzos and most other beans. Among beverages, icy cold drinks and many others aggravate Vata. Beverages that calm Vata are soy milk (well spiced and hot), miso broth, many herb teas. Tofu is calming to Pitta and mildly aggravating to Kapha. Cool in action, some Vatas tolerate it well, others do not.

Aduki beans are mentioned on p. 19, 106, 109, 116, 124, 293, 306. Address: 1. Faculty member, The Ayurvedic Inst., Albuquerque, New Mexico; 2. Wife of Yogi Amrit Desai, member of Kirpalu Center for Yoga and Health, Lenox, Massachusetts.

9770. Perché la soia [Why soya?]. 1990. Strada Logheretto 2, 43010 Corcagnano (Parma), Italy. 6 panels. Catalog. 29 x 21 cm. [Ita]
• ***Summary:*** In this brochure, a color photo shows the entire *Campi di Soia* and *Erboristeria* lines. The two are almost identical in terms of product names and packaging except that the word "Erboristeria" replaces the word "Campi di Soia" for products sold to the health food trade. The Erboristeria line has a bottled cooked soybeans (*Semi di Soia*), and a different shaped soy fortified pasta (*Soipast*). Both lines now have a soy lecithin (*Lecitina di Soia*). In both lines, the bottled soymilk is named Soidrink (3 flavors) and the soymilk in a Tetra Brik Aseptic carton is named Soilat (1 flavor). Address: Corcagnano (Parma), Italy. Phone: 0521.639148.

9771. Schinharl, Cornelia. 1990. Mit Tofu [With tofu]. Munich, West Germany: Verlag Graefe und Unzer. 64 p. Illust. Index. 20 cm. GU Kuechen-Ratgeber series. [Ger]
• ***Summary:*** A lovely tofu cookbook, with full-color photos by Odette Teubner and Kerstin Mosny of every recipe, and each step in the process for making tofu at home. Contents: What is tofu? How to make tofu at home. Hors d'oeuvres and salads. Fine soups. Main dishes/Entrees. Crisp from the oven. Sweets with tofu. Recipe- and subject index. Important comments. Address: Munich, Germany.

9772. Sun, X.W.; Koehler, P.E.; Huang, Y.W. 1990. Development and evaluation of tofu type products using whole soybean and defatted soy flour. Paper 56 presented at the 1990 Annual Meeting of the Institute of Food Technologists. Held 16-20 June 1990 at Anaheim, California. *

9773. Sunrise Markets Inc. 1990. Tofu cookbook: 60 quick & easy recipes. Vancouver, BC, Canada: Sunrise Markets Inc. 80 p. No index. 22 cm.
• ***Summary:*** Contents: Sunrise Markets Inc. What is tofu? Sunrise tofu (Extra Firm {green label}, moderately firm {yellow/red label}, soft {blue label}, tofu dessert {pink label}). Cooking hints. Recipes–Soups. Salads. Dressings and dips. Entrees. Desserts. Nutritional breakdown of Sunrise Tofu. Other Sunrise products (Sunrise soya drinks {non-dairy in sweetened, unsweetened, vanilla/almond, and chocolate flavors}, Tofu-Rella {Tofu-based cheese in 5 flavors}, Mori-Nu Tofu, Sunrise Tofu Puffs {deep fried} and Dried Flavour Tofu, Tofreezi {non-dairy tofu-based frozen dessert in seven flavors}, Casa Del Norte Chili and Canadian Chef Beans & Tofu Wieners). Glossary. Substitutions and equivalents. Feedback.

A color photo on the front cover shows 8 different tofu dishes. On the rear cover are color photos of Sunrise's four tofu products. Address: 729 Powell St., Vancouver, BC V6A 1H5. Phone: 253-2326.

• ***Summary:*** This booklet contains an introduction to tofu, a directory of places that this company's tofu is sold and served (vegetarian restaurants) in the Munich area (with ads for some of these places), tips for cooking with tofu, a list of the company's 8 products, tofu and world hunger, an ad for a tofu kit / press, about 11 tofu recipes, many accompanied by a large color photo, and ad for books on tofu and foods sold by Sojaquelle [Wolfgang Furth-Kuby] in Oberbrunn, West Germany. Address: Munich, West Germany. Phone: 089 / 93 90 05.

9775. Tahu tempe: Pembuatan, pengawetan dan pemanfaatan limbah [Tofu and tempeh: Production, preservation and waste usage]. 1990. Bogor, Indonesia: Pusat Penelitian dan Pengembangan Teknologi Pangan, IPB. 33 p. Illust. 23 cm. [Ind]*
Address: Bogor, Indonesia.

9776. Valentas, Kenneth J.; Levine, L.; Clark, J.P. 1990. Food processing operations and scale-up. New York, Hong Kong, and Basel: Marcel Dekker, Inc. v + 398 p. Illust. Index. 24 cm. [25 ref]
• ***Summary:*** Chapter 5 (p. 92-137) is titled "Soy complex." Its contents: Introduction. Origins and history. Processing. Economics. Manufacturing considerations. Westernization of the soybean: Solvent extraction, extractors. Protein fraction: Soy flour, soy protein isolate, economics, waste recovery. Waste treatment: Sludge conversion to animal feed, economics of waste treatment. Soy concentrates. Protein texturization: Spun protein fibers/meat analogs. Freezing. Prologue for meat analogs. Textured vegetable protein.

Contains 18 figures, showing mostly schematic diagrams of processes or equipment. "This practical volume bridges the gap between process engineering knowledge and a food scientist's understanding of the chemical, physical, and biological properties of foods, providing valuable insight into effective food product and process development." Address: 1. The Pillsbury Co., Minneapolis, Minnesota; 2. Leon

Levine & Associates, Inc., Minneapolis, Minnesota; 3. A. Epstein and Sons International, Inc., Chicago, Illinois.

9777. Wagner, Lindsay; Spade, Ariane. 1990. The high road to health: A vegetarian cookbook. New York, NY: Simon & Schuster / Prentice Hall Press. xv + 288 p. Foreword by E. Lee Rice. Index. 24 cm. [54 ref]

• ***Summary:*** Lindsay Wagner, whose lovely color photo appears on the cover, first achieved widespread television in the early 1970s as "The Bionic Woman." Recently she starred in the Academy-Award winning film *The Paper Chase***.** This vegan cookbook uses no meat, dairy products, or eggs. A section titled "Raising the Dairy Question" (p. 13) discusses problems with milk and concludes: "A terrific substitute for milk products comes from that little marvel, the soy bean. Soy milk has the look and consistency of milk, and some brands even taste like it. Try some on your breakfast cereal, top your pies with our creamless Whipped Cream, spread your sandwiches with eggless Mayo Spread and enjoy Huevos-less Rancheros for brunch. You'll never look at another carton of milk."

Chapter 4, "About the ingredients," includes discussions of Braggs Aminos, cold-pressed oil, kuzu, lecithin, miso, mochi, nori, soy milk, soy sauce, tempeh, tofu. Soy-related recipes include: Huevo-less rancheros (with tofu and soy milk, p. 65). Vegetarian "salami" (with firm tofu, p. 82-83). Mayo spread II (with soy milk, p. 88). Ginger tamari dressing (p. 131). Creamy oil substitute (with soy milk, p. 134). Tofu sour cream (p. 134). Eden cheesy sauce (with soy milk, p. 136).

Chapter 10 (p. 141-59) is titled "Entrées for the meat lover"; most of the recipes are based on soyfoods: Marinated tempeh (p. 141). Marinated tofu. Barbecued tofu or tempeh. Tempeh marinade. Teriyaki tofu. Polynesian tofu. Tofu piquant. Tofu ribs. Grilled tofu with summer vegetables. Japanese eggplant and tofu Romano. Pecan herb loaf (with tofu and soy flour). Easy tofu burgers. Easy easy burgers (with Marinated tempeh or tofu). New Age Italian sausage I (with Marinated tempeh and Marinated tofu). New Age Italian sausage II (with Marinated tofu). Spicy tempeh stir fry. Tofu cacciatore.

Lasagna with zucchini and mushrooms (in Light sauce with soy milk, p. 166). Manicotti stuffed with zucchini and tofu cheese (p. 175). Tacos (with Marinated tofu and tempeh, p. 187). Eggplant al forno (with tofu, p. 213). Banana-strawberry tofu pudding (p. 231). Italian cheesecake (with tofu, p. 243). Coconut-mocha cream frosting (with soy milk, p. 260). Tofu fruit sauce (p. 261). Mock whipped cream (with soy milk, p. 262).

An interesting last chapter titled "Afterword: Meat–We can live without it! Here's why" discusses the role of an "animal-based diet" on destruction of the environment. Address: 1. California; 2. Woodland Hills, California.

9778. Wang, Wenqiao; Kang, Wenbin. 1990. Chinese vegetarian cuisine: 100 authentic recipes. Beijing, China: New World Press. 142 p. Illust. (color photos). No index. 26 cm.

• ***Summary:*** Part II, titled "Bean curd and bean product dishes, contains 21 recipes, including: 34. Bean curd in fermented black beans [fermented black soybeans] (with 3 3-inch {7.5 cm} cakes of bean curd {about 6-7 oz. or 180 gm}). 37. Peppery hot bean curd (with 1 tablespoon Sichuan soybean paste and 1 tablespoon soy sauce). 38. Smoked bean curd (Smoking can be done before or after the ingredients are prepared). 39. Fried bean curd balls (resemble Japanese ganmodoki balls). 41. Dry-cooked bean curd bamboo (with "½ lb {225 gm} bean curd bamboo" [dried yuba sticks]; the yuba is soaked, then put in boiling water, then deep fried in a wok).

42. Braised bean curd shreds in tomato sauce (with "3/4 pound {330 gm.} fresh bean curd sheets" [pressed tofu sheets] each cut vertically into 3 rectangular pieces of equal width, then piled atop one another and cut into thin shreds). 43. Bean curd sheets with tangerine peel. 44. Flavor potting five-fragrance dried bean curd (with 1 lb. white fresh pressed bean curd [pressed tofu]). 45. Bean curd bamboo with chili oil (with ½ lb. bean curd bamboo [dried yuba sticks]). 50. Stuffed bean curd. 51. Crispy-fried pine nut rolls (with 3 dried bean curd sheets {soaked}). 52. Deep-fried five-shred rolls (with "3 bean curd sheets" [pressed tofu sheets]; the result is like deep-fried spring rolls). 54. Bean curd triangles (tofu is cut into triangles then deep fried).

Part IV, titled "Vegetarian imitation meat dishes" includes: 71. "Mother and her sons meet"–chicken and eggs (with "4 bean curd sheets"). 74. Vegetarian ham (with "20 dried bean curd sheets [dried yuba sheets] {soaked}"). 74. Vegetarian chicken (with "5 dried bean curd sheets"). 75. Vegetarian duck (with "6 dried bean curd sheets {soaked}"). 76. Vegetarian fried dry minced meat (with "3 dried bean curd sheets {soaked}"). 77. Vegetarian sausage (with "3 dried bean curd sheets {soaked}").

80. Crispy and fragrant "duck" (with "15 dried bean curd sheets {soaked}"). 81. Diced 'chicken' with green peppers (with "3 dried bean curd sheets"). 82. Braised vegetarian chicken (with "3 dried bean curd sheets"). 83. Vegetarian eight-treasure chicken drumsticks (with "3 dried bean curd sheets"). 84. Vegetarian chicken curry (with "½ lbs fresh bean curd sheets {thousand sheets [pai-yeh]}"). 86. Vegetarian red-cooked chicken (with "8 dried bean curd sheets {soaked}"). 88. Deep-fried "duck" (with "2 dried bean curd sheets {soaked}"). 89. Deep-fried "duck" with fermented black beans (with "3 dried bean curd sheets {soaked, or substitute egg wrappers}." "Rinse the black beans well, soak in warm water until soft, removed and pound into a pulp").

A glossary (p. 133+) includes definitions of: Soy bean sprouts. Bean curd (six types): (1) Fresh bean curd comes in

© Copyright Soyinfo Center 2013

two types. The southern has a more watery consistency and is very soft. The northern contains less water and is firmer. (2) Fresh dried bean curd; pressed into small firm squares [doufu-gan, pressed tofu]. (3) Fresh dried bean curd sheets; also called "hundred pages" or "thousand sheets" [pai-yeh or ch'ien chang; pressed tofu sheets].

(4) "Dried bean curd bamboo (*fu zhu*)*;* not bean curd at all, though so-called, but rather a by-product from making bean curd. It is the rich cream that rises to the top of the boiling soybean milk before gypsum is added to curd. The skimmed cream is sun-dried thoroughly in narrow stiff sticks [dried yuba sticks]. Soak in warm water to soften before using."

(5) "Dried bean curd sheets (*yu pi*) [dried yuba sheets], same as dried bean curd bamboo, but dried in the form of folded semicircles. The dried bean curd sheet called for in the recipes in this book is a round piece with a diameter of 9 or 10 inches. Soak in warm water to moisten before using. It is also called 'oil sheet,' for it looks as if it were glazed with oil... According to ancient Chinese medicine books, they can clear up excessive heat in the lungs, stop coughs, eliminate phlegm and stop inflammation, and are good for the stomach."

(6) "Fermented bean curd cheese [fermented tofu]; salty and creamy cakes of fermented dried bean curd [pressed tofu] with a savory flavor, appearing in white or red." Many recipes call for MSG (optional).

Recipes also call for: Sesame paste, gluten, and several different types of mushrooms.

Note: Also published in Chinese in 1990 by the same publisher. "Both authors have worked for many years in the catering business. Wang is a member of the editorial board of the Chinese magazine *Cooking* and Gang himself possesses excellent cooking skills... All 100 recipes have been tested and proven successful" (from the rear cover). The many color photos (on glossy paper) were taken by Zhou Youma and Yan Xinqian at Gongdelin (the Forest of Merit and Virtue) Restaurant, a famous vegetarian eating place in Beijing. Address: China.

9779. Wasserman, Debra; Stahler, Charles. eds. 1990. *Vegetarian Journal* reports. Baltimore, Maryland: Vegetarian Resource Group. 110 p. Illust. No index. 28 cm. [10 ref]
• ***Summary:*** This is a compilation of articles by various authors that originally appeared in *Vegetarian Journal.* Soyfoods are mentioned or included in recipes throughout. For example: "What is osteoporosis" (p. 48-57), mentions tofu as a good source of calcium. "Tips for changing your diet" (p. 70-71), mentions tofu and soy milk. "Eggless Recipes" (p. 81), includes tofu. Address: Baltimore, Maryland.

9780. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Hanyang Sojaprodukte GmbH.
Manufacturer's Address: Hermannstr. 31, D-6078 Neu Isenburg, West Germany. Phone: 06102/21956.
Date of Introduction: 1990?
New Product–Documentation: Letter from Bernd Drosihn. 1990. May 10. This is the biggest Asian-German tofu company in the south of Germany. Note: The company is probably run by Korean-Germans.

9781. **Product Name:** Tofu.
Manufacturer's Name: Kootenay Natural Tofu.
Manufacturer's Address: Box 81, Silverton, BC, Canada V0G 2B0.
Date of Introduction: 1990?
How Stored: Refrigerated.
New Product–Documentation: Talk with Ed Westlind. 2000. Oct. 6. This company was started by Tim "Pedro" Hook, who was a college football player in the USA. He made tofu for about a year then sold the business to Ed and his wife. Ed would guess that the company was started in 1989 or 1990. Shortly after buying the tofu company, the Westlind's went through a divorce. Ed put all the tofu equipment in a warehouse, which it remains today. Note: Kootenay (pronounced KOOT-uh-nee) is the name of a river, a lake, and a national park in southeastern British Columbia, Canada.

9782. **Product Name:** [Tofu Ice Cream].
Manufacturer's Name: Les Aliments Multisoya Inc.
Manufacturer's Address: 1925 Route 139, Roxton-Sud, QUE, J0H 1Z0, Canada.
Date of Introduction: 1990?
New Product–Documentation: Talk with Harris Claude. 1991. March 20. This is the only product he makes currently. He used to make tofu but local bureaucrats shut him down saying that the whey he discharged into the sewage system was causing too much environmental pollution. He is now developing a soy yogurt. The labels have been printed.

9783. **Product Name:** Tofu.
Manufacturer's Name: Orient Food Corporation.
Manufacturer's Address: P.O. Box 6355, Temuning, Guam 96911. Phone: 671-649-0025 or 646-1509.
Date of Introduction: 1990?
New Product–Documentation: Letter from Linda M. Usita, P.O. Box 23831, GMF, Guam 96921. 1990. Sept. 4. This is the only tofu factory in Guam.

Note 1. Guam is an unincorporated U.S. territory, the largest and southernmost of the Mariana Islands, located about 1,500 miles east of Manila, Philippines. It was ceded to the U.S. by Spain in Dec. 1898 and occupied 1899. The 106,000 residents of Guam have enjoyed full U.S. citizenship since 1950.

Note 2. This is the earliest known commercial soy

© Copyright Soyinfo Center 2013

product made in Guam.

Talk with Stanley Darby of Agat, Guam. 1995. June 14. This company still makes tofu, which is sold under the Hondu brand in water-filled plastic tubs with a little sheet of paper over the top. They were closed recently by health inspectors for sanitation violations.

9784. **Product Name:** Freeze-Dried Tofu-Rella (Tofu-Based Cheese Analog with Casein) [Mozzarella Style, Garlic-Herb Style, and Cheddar Style].
Manufacturer's Name: Rose International.
Manufacturer's Address: P.O. Box 5020, Santa Rosa, CA 95402. Phone: 707-576-7050.
Date of Introduction: 1990?
Ingredients: Garlic-Herb style: Organic tofu (water, organically-grown soybeans+, calcium sulfate coagulant), soy oil, casein*, salt, garlic, citric acid, herbs, lecithin, natural flavor, guar gum. *Casein is the protein found in nonfat milk. It is a high-quality protein free of cholesterol and rennet, and is what allows this tofu product to be so similar to cheese. + Organic in accordance with Cal. H&S Code 26569.11. Diabetic exchange: 1 medium-fat meat. Conforms to the reducing and maintenance diet. Contains 0.02% lactose.
Wt/Vol., Packaging, Price: Bulk.
How Stored: Shelf stable.
Nutrition: Per 1 oz.: Calories 80, protein 8 gm, carbohydrates 1 gm, fat 5 gm, sodium 170 mg, calcium 140 mg, cholesterol 0 mg.
New Product–Documentation: Talk with Richard Rose of Rose International. 1990. July 12. This product has been available for the past 2 months, but none has yet been sold. It will be sold only to food processors/manufacturers who want to use it on nacho chips, cheddar-flavored popcorn, dry pasta, etc. to make them cholesterol free. It comes in the same flavors as Tofu-Rella.

9785. **Product Name:** Abura-Age: Deep Fried Tofu Pouches.
Manufacturer's Name: Sacramento Tofu Co.
Manufacturer's Address: 1915 Sixth St., Sacramento, CA 95814. Phone: 916-447-2682.
Date of Introduction: 1990?
Ingredients: Water, soy beans, nigari (calcium chloride), vegetable oil.
Wt/Vol., Packaging, Price: 7 oz plastic bag, 12 pieces per bag.
How Stored: Refrigerated.
New Product–Documentation: Product with Label purchased at Diablo Oriental Foods in Walnut Creek, California. 1990. June 27. Plastic bag is 8.75 by 10.75 inches. Label, printed on bag, is 5 by 4 inches. Red, green, and black. Label on back of bag gives recipes for Age Sushi / Inari Sushi.

9786. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Soja Food.
Manufacturer's Address: D-4000 Duesseldorf 30, West Germany.
Date of Introduction: 1990?
New Product–Documentation: Letter from Bernd Drosihn. 1990. May 10. This is the biggest Asian-German tofu company. Note: But the German consulate in San Francisco has no listing for them.

Talk with Harry Whitford. 1990. June 1. He knows of only one company in Germany selling water-packed tofu; they are located in Dusseldorf.

9787. Tofu Shop Deli and Specialty Foods Co. (The). 1990? Fine tofu: Hand crafted in small batches for a sweet, delicate flavor and texture (Ad). Arcata, California. ½ p. Undated.
• ***Summary:*** This ad occupies the top half of an unknown page in the "Wholefood Express" distributor catalog in about 1990. The text reads: "Here in the far reaches of California's misty North Coast is produced a special tofu in the tradition of the great tofus of the East.

"For it's in the small, traditional shops of China and Japan where the magic of tofu as a world-class food has slowly developed over the ages, where generations of tofu makers have mastered the subtle arts and skills of tofu making, and where countless connoisseurs of fine foods have savored the sweet, delicate flavors and textures of truly fresh tofu–an experience few in the West know.

"Honoring this lineage in our own shop, we work to keep the tofu making as simple, handmade, and traditional as possible. A single trained tofu-maker carefully guides each batch through the entire tofu-making process.

"Small batches, open-cauldron cooking, sanitary conditions, and the finest organic ingredients are all magically combined to produce our unique tofu, one we describe as sweet and delicate. According to a elderly Japanese grandmother who recently visited our shop, it's like the tofu of her childhood.

"We hope you will try this fine tofu and also our full line of soy milk, tofu cold-cuts, salads, and desserts, all prepared with the same attention to authenticity, quality, and freshness."

"Makers of freshly-prepared natural foods since 1977."

An illustration across the bottom of the ad shows a small tofu shop on stilts on a cliff by the ocean, with an Oriental-style roof and a wind-blown tree arching overhead.

On the bottom half of this page is an ad from Turtle Island Soy Dairy. Address: 768 18th St., Arcata, California 95521.

9788. Kane, Marion. 1991. The cutting edge. *Toronto Star* (*Ontario, Canada*). Jan. 2. p. D8.

© Copyright Soyinfo Center 2013

• ***Summary:*** In Japan, people are now enjoying foods made from soybeans bred and grown in Canada.

Plant breeders at Agriculture Canada have developed two soybean varieties for specialized markets in East Asia. Harovinton is a large-seeded variety used to make tofu. Nattosan is a small-seeded variety used to make natto, a popular fermented Japanese soy food.

"Let's take a cue from the Japanese and start finding tasty ways to prepare tofu here on home turf. After all, its the perfect protein alternative to meat."

9789. Webb, Denise. 1991. Eating well: Little Miss Muffet might have been onto something if those curds were soybean curds. *New York Times.* Jan. 9. p. C3.
• ***Summary:*** A good introduction to tofu. "Tofu generally costs $1.60 to $2.25 a pound, though it is often much cheaper in Chinatown in New York." Contains a brief interview with William Shurtleff, author of "The Book of Tofu." Address: Registered dietitian, freelance writer.

9790. Larsen, Gary. 1991. The Far Side (Cartoon). *Universal Press Syndicate.* Jan. 17.
• ***Summary:*** Three lionesses on a plain in Africa are gathered around a strangely shaped white antelope, eating it. In the background, a pair of zebras and a pair of regular antelopes look on from a distance. Each lioness has a confused look on its face; the one in the foreground is spitting out a white chunk of something. The caption reads: "In sudden disgust, the three lionesses realized that they had killed a tofudebeest–one of the Serengeti's obnoxious health antelopes."

Note: The Serengeti National Park in Tanzania (area 5,700 square miles or 14,763 square km) is noted for its wildlife.

9791. *Toyo Shinpo* (*Soyfoods News*). 1991. Bei Nûyôku ni tôfu kôjô shinshutsu o kimeru. Kyoto Tanpaku kôkyû tôfu o seizô [Kyoto Tanpaku plans to open a tofu plant in New York to produce high quality tofu]. Jan. 21. p. 3. [Jap]
• ***Summary:*** Kyoto Tanpaku is the largest tofu maker in Kyoto, Japan. The president is Yasuo Hachijin (whose photo is shown). The company's address is 200 Senryômatsu-cho, Yoko-ôji, Fushimi-ku, Kyoto-shi, Japan. Phone: 075-622-3161. The new company, which has already been founded in New York, is named Global Protein Foods. Located in the town of Valley Cottage on the outskirts of New York City about 1 hour from Manhattan, the company plans to produce delicious high-class tofu to meet the needs of the area. They plan to use a new type of tofu package. The tofu plant will be 300 tsubo (10,692 square feet) in size and will use a Takai fully automatic tofu production line with a capacity of 3 hyo (1 hyo = a 60 kg sack, so 180 kg or 396 lb) of dry soybeans per hour. The new company plans to produce nigari tofu, packaged lactone silken tofu (*jûten-dofu*), deep-fried tofu cutlets, deep-fried tofu pouches, and American-style second generation tofu products.

Note: This is the earliest document seen (April 2001) concerning Global Protein Foods in Valley Cottage, New York. As of this date the company is located at 707E Executive Blvd., Valley Cottage, NY 10989. Phone: 914-268-8100. Contact: Anson Wong.

9792. Yamashita, Yoshimasa. 1991. History and future of Kyoto Food Corp. USA (Interview). *SoyaScan Notes.* Jan. 24. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** His company presently has no connection with Kyoto Tanpaku K.K. in Japan. But they learned how to make tofu from Kyoto Tanpaku. Kyoto Food Corp. has the very latest state-of-the art equipment. The parent company of Kyoto Food Corp. USA is a Kyoto supermarket named Kyoto Koseikai; the latter is the major stockholder in Kyoto Food Corp. USA. Kyoto Koseikai's only relationship with Kyoto Tanpaku in Japan is that they buy their tofu to sell in the supermarket.

The reason his company located in the midwest is because Terre Haute and Tajimi city in Gifu prefecture have been sister cities for 25 years. The connection was established when Mr. William Roach contacted his friend Mr. Juichi Iida in Tajimi. Mr. Iida contacted his friend Mr. Yamashita, who worked at the time for Kyoto Koseikai. Kyoto Koseikai decided to join in founding the company, as a major stockholder. Kyoto Food Corp. USA has no connection with any Japanese trading company such as Marubeni or Mitsubishi. They know of the tofu project at Purdue University and are cooperating with it, but have no financial involvement. He feels that they can sell tofu in the Midwest. He feels that the tofu companies who previously tried to sell tofu in the Midwest and failed were too early and too small. The timing is now right. The water he uses is very good and the soybeans are a premium grade, high in protein. He presently has no plans to private label tofu, although there have been four requests for private label brands. The company now has two products: regular tofu, and tofu with a sauce packet. Their next product will be agé. After that they plan to make fresh Japanese noodles (udon) and second generation tofu products (such as meatloaf). Address: President, Kyoto Food Corp. USA, 1050 W. 35th Drive, Terre Haute, Indiana 47802. Phone: 812-235-9505.

9793. Gaiser, Klaus. 1991. Recent developments at Soyastern and Huegli (Interview). *SoyaScan Notes.* Jan. 25. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** It looks like Huegli has decided to buy Soyastern but this has not been firmly confirmed. The negotiations have been going on since early summer 1989 and could be finalized very soon. Huegli moves slowly and carefully. To Klaus they look like a big firm, but they think of themselves as a small firm compared to Knorr (a big

© Copyright Soyinfo Center 2013

seasoning and soup company; Klaus thinks they belong to CPC), Maggi, Nestle, or Unilever. Klaus is now starting to do an in-depth study of tofu. Within Yamato, he expects to soon move out of production into the person in charge of quality control. He feels his company is the leader in tofu quality in Germany, in part because of his study in Japan. Tofu quality is a major problem in Germany. The dairy industry did a study of tofu quality and found plate counts of 1,000 million colony forming units, which means rotten tofu. He now represents the tofu industry on a government body concerning food quality. He feels standards should be much stricter. Address: President, Yamato Tofuhaus GmbH, Rittweg 11/1, D-7400 Tuebingen–Hirschau, West Germany. Phone: 7071-71094.

9794. **Product Name:** Tofu Burger.
Manufacturer's Name: Ashland Soy Works.
Manufacturer's Address: 225 Water St., Ashland, OR 97520. Phone: 503-482-1865.
Date of Introduction: 1991. January.
How Stored: Refrigerated.
New Product–Documentation: Talk with Jim Muhs. 1991. Oct. 14. The company introduced this product in Jan. 1991.

9795. **Product Name:** Tofu [Hard Organic].
Manufacturer's Name: EarthStar.
Manufacturer's Address: 5 Kay Street, Murwillumbah (P.O. Box 654), Murwillumbah, NSW 2484, Australia. Phone: (066) 72 5931.
Date of Introduction: 1991. January.
Wt/Vol., Packaging, Price: 375 gm, 500 gm, and 750 gm. Vacuum packed in plastic bags.
How Stored: Refrigerated.
New Product–Documentation: Letter from Greg Nance-Kivell, consultant. 1993. Aug. 12. The company letterhead and business card now reads: "EarthStar–Manufacturers of Quality Wholefoods, P.O. Box 654,..." They have ordered 2 copies of *Tofu & Soymilk Production, and note:* "We are a non-profit organisation with the aim of giving work opportunities to people with disabilities. We produce organic products based on soybeans, chickpeas, wheat, etc. We produce under three brands and products include tofu, soymilk, hommus [hummus], felafel, vegi sausages, and we will market soy yoghurt desserts in the future. We took over Chinese Farmhouse some 3 years ago."

Letter (fax) from Greg Nance-Kivell. 1996. March 28. Which see. "In Jan. 1991 the Challenge Foundation (a nonprofit organisation working with the disabled) bought a small tofu business called Chinese Farmhouse."

9796. Fowler Brothers. 1991. Catalog: January 1991. P.O. Box 2324, San Rafael, CA 94912. 79 p. 28 cm.
• ***Summary:*** The company is a "distributor of natural foods." The following makers, distributors, and brands of soyfood products are listed: I. Bulk Products: Miso (American Miso, 8 products), Soy foods (Turtle Island tempeh and Soy Deli tofu burger). Soy Sauce & tamari (San-J domestic shoyu and tamari, Westbrae Johsen shoyu), Tofu (Quong Hop, 6 products).

II. Packaged products: Ah Soy (Westbrae, 7 soy drinks), Eden Foods (Edensoy, 6 soy drinks), Pacific Soyfoods (6 types of soysage), Pacific Tempeh (4 products), Quong Hop (11 soymilk and 4 tofu products), San-J (tamari crackers, 14 soy sauce & tamari products), Soy Deli (Quong Hop, 5 soy foods, 8 vacuum pack tofu), Sweet Earth (3 vegeburgers), Turtle Island (10 tempeh products), Vitasoy (7 soy drinks), Westbrae (2 instant miso soups, 14 soy drinks, 14 types of soy sauce and tamari). Address: San Rafael, California. Phone: 415-459-3406.

9797. **Product Name:** Tofu.
Manufacturer's Name: Genesis Wholefoods.
Manufacturer's Address: P.O. Box 19, Balgowan, Natal 3275, South Africa.
Date of Introduction: 1991. January.
New Product–Documentation: Letter from Paul Fleischack, owner. 1991. April 21. He purchased the book *Tofu & Soymilk Production* on 6 July 1990. "I have started a small community scale tofu production business from my kitchen. Presently I supply one health food shop and a few individuals... Previous correspondence has used my address as Michaelhouse, Balgowan." On his letterhead is written "Tofu. Soy Products. Health Foods." Letters from Paul. 1991. May 26 and Aug. 4. "I started producing tofu under the 'Genesis Wholefoods' label and selling it a local health food shops in Jan. 1991. Prior to this I made tofu for a few friends and for ourselves for about 2 years. Tempeh is now also made on a community scale and I hope to produce shoyu and miso during this year. The tofu industry in South Africa is still relatively small and as far as I know I am the only person in Natal making tofu and tempeh. Presently I am a biology teacher, but my intention is to develop the soyfoods (and other wholefoods–yogurt, cheese, etc.) business so that I may pursue this business on a full-time basis."

9798. Gilligan's Restaurant and Islander Bar. 1991. January. New soyfoods restaurant or deli. 3495 Hospital Lane, Terre Haute, Indiana 47802.
• ***Summary:*** Article in Toyo Shinpo. 1991. Talk with Nancy Carter of Kyoto Food Corp. USA. 1991. April 10. The restaurant and bar opened in mid-January. There are now only two tofu recipes on the menu, a tofu soup and a tofu salad. The attendance is excellent. People come for two reasons: for Japanese food and for a typical midwestern steak meal. Address: Terre Haute, Indiana. Phone: 812-235-2356.

9799. Golbitz, Peter. 1991. Soyfoods consumption in the United States and worldwide: A statistical analysis. Bar

© Copyright Soyinfo Center 2013

Harbor, Maine: Soyatech, Inc. 26 p. *
• ***Summary:*** The National Cancer Institute, through Prospect Associates (a subcontractor), asked Mr. Golbitz to compile this report, largely from published sources. It contains 12 numbered pages of information and text summary and 14 unnumbered pages of tables. It contains retail soyfoods information for the past 10 years, FAO published data (Soybeans and Products Food Balance Sheets; published every 3 years), tons of soybeans used to make tofu in major Asian nations, number of U.S. manufacturers of soyfoods products 1984 and 1989, where the various soyfoods are sold in America (health/natural food stores, Asian-American food stores, supermarkets, institutional foodservice). It is not clear whether or not the report is in the public domain.

The estimated annual per capita consumption of soybeans, directly and indirectly as soyfoods, is as follows: Taiwan 13 kg, Japan 10.8 kg, Korea 9.0 kg, Indonesia 6.3 kg, and China 3.4 kg. Address: P.O. Box 84, Bar Harbor, Maine 04609.

9800. **Product Name:** Tofu (soybean curd) special variety pack. Contains one package each of Mori-Nu Silken Tofu, Soft, Firm, Extra Firm. Seven day menu plan inside.
Manufacturer's Name: Morinaga Nutritional Foods, Inc.
Manufacturer's Address: 2050 W. 190th St., Suite 110, Torrance, California 90504. Phone: 1-800-669-8638.
Date of Introduction: 1991. January.
Ingredients: Water, soybeans, isolated soy protein, gluconolactone, calcium chloride.
Wt/Vol., Packaging, Price: 31.25 oz (884 gm).
How Stored: Refrigerate after opening.
New Product–Documentation: A sampler of three different types of Mori-Nu Tofu in one pack. On the glossy color paperboard cover of the outer pack the word "Tofu" is written in bold white capital letters, each against a black square. Behind the letters are three color photos of Mori-Nu tofu in ready to eat dishes. Net weight 31.25 oz (884 gm).

The dated "Mori-Nu Seven Day Healthy Eating Plan" is in a glossy color 12-page brochure (each page 18.5 x 9.5 cm) featuring 9 delicious Mori-Nu Tofu recipes. The daily meal plan is low in fat, high in fiber.

9801. Nichii Company of America, Inc. Mycal Group. 1991. Are you tired of soaking overnight? (Ad). *Natural Foods Merchandiser.* Jan. p. 64.
• ***Summary:*** This is an ad for "revolutionary new MicroSoy flakes," an alternative to whole soybeans in making tofu or soymilk. They eliminate all washing and rinsing, all soaking water and time, waste water disposal, grinding, and save considerable floor space. You can save up to 2,400 lb of water per ton of soybeans. Call or fax for a free sample.

9802. **Product Name:** The Original Rice Crust Pizza [Soy Cheese Variety with Casein] (on a Brown Rice Crust).
Manufacturer's Name: Original Rice Crust Pizza Co. (The).
Manufacturer's Address: 1608-A West 5th St., Chico, CA 95928. Phone: 916-345-2446.
Date of Introduction: 1991. January.
Ingredients: Crust: Brown rice, water. Soy cheese: tofu (made from organic soybeans), water, casein, unrefined canola oil, unrefined sesame seed oil, virgin olive oil, sea salt, and beta carotene.
New Product–Documentation: Leaflet received 1991. April. "The Original Rice Crust Pizza: Soy Cheese Style." Wheat free. Lactose free. Yeast free. Cholesterol free. A unique, creative company... by the combined efforts of Graindance Pizza and SnackCracks, Inc. (Chico, California, and Oakmont, Pennsylvania).

Olivia Wu. 1992. Herald-Arlington Heights (Chicago, Illinois–Rolling Meadows Ed.). Sept. 10. Food section. p. 1-2. "If it's not junk, can it taste good?

Talk with Richard Rose of Sharon's Finest. 1992. Dec. 16. He thinks this product is made by The Original Rice Crust Pizza Co. in Chico, California. Contact Gayle Kennedy at 916-345-2446.

Talk with Gayle Kennedy, co-owner and daughter of Robert Kennedy, former owner of Chico-San Inc. 1992. Dec. 16. Her company is a partnership with Amberwave/ Graindance. This pizza was introduced in Jan. 1991, and the same cheese has been used on it since day one. This cheese is made by Amberwave in Oakmont, Pennsylvania, and contains the ingredients shown above. This cheese is not sold as a consumer product by itself, only as soy cheese on pizzas. Amberwave makes a pizza named Soydance, which uses soy cheese on a wheat crust. Gayle is now hoping to buy out Amberwave's interest in her pizza company. She is not sure if, after that, she will use the soy cheese made by Amberwave, but she is committed to using some brand of soy cheese. Her company also makes a rice crust pizza with an Italian dairy cheese; she sells 10 soy cheese pizzas to every 2 dairy cheese pizzas.

9803. Paino, John; Messinger, Lisa. 1991. The tofu book: The new American cuisine. Garden City Park, New York: Avery Publishing Group Inc. viii + 175 p. Illust. Index. 26 x 21 cm. [15 ref]
• ***Summary:*** Contents: Acknowledgments. Preface. 1. Tofu in time: The history of tofu (by Shurtleff & Aoyagi). The journey (3-page sidebar on how Nasoya was founded). 2. Tofu for health: A wise alternative for a better diet. The vision (3-page sidebar on Nasoya's struggle to introduce tofu to America). 3. Tofu tips: A shopper's guide to buying and storing (Introduction, types of tofu (incl. yuba), shopping for tofu, storing tofu). 4. Do-it-yourself tofu: Making tofu at home. Breaking ground (4-page sidebar on the founding of Nasoya). 5. Tempting tofu: The art of cooking with tofu (more than 150 recipes). Conclusion. Mail-order natural

foods. Bibliography.

Nasoya's first year sales were $60,000, rising to $200,000 by the second year, and $600,000. Recently sales were well over $5 million. Note: The first co-author of this book was Ellen Sue Spivack. Address: 1. President, Nasoya Foods, Leominster, Massachusetts; 2. Staff Health and Nutrition Reporter, Antelope Valley Press, Palmdale, California.

9804. **Product Name:** Tofu Burgers, Sesame Tomato Soya Burgers.
Manufacturer's Name: Pureland Soy Products.
Manufacturer's Address: 23 Depot St., Maroochydore, QLD 4558, Australia. Phone: 071-43-4254.
Date of Introduction: 1991. January.
New Product–Documentation: Letter and leaflet sent by Jennie Finnigan and Ricciardo Ferrari. 1992. June 17. In June 1992 the company moved to a new address with a new phone number: Lot 47 Page Street, Kunda Park, QLD 4556. Phone: (074) 45 6077. The leaflet (brown on yellow) states that, in addition to tofu, the company also makes Tofu Burgers, Curried Lentil Burgers, and Sesame Tomato Soya Burgers.

9805. **Product Name:** Korean Style Vegetarian Potstickers.
Manufacturer's Name: Shin-Sun Foods.
Manufacturer's Address: 2551 W. Winton Ave. #6-0, Hayward, CA 94545. Phone: 510-887-6140.
Date of Introduction: 1991. January.
Ingredients: Filling: Cabbage, tofu, zucchini, onion, sesame oil, garlic, ginger, sea salt, black pepper. Wrapper: Unbleached flour, rice flour, water, egg.
Wt/Vol., Packaging, Price: 12.5 oz. for 10 potstickers.
How Stored: Frozen.
New Product–Documentation: Leaflet (8.5 by 11 inches, 3 color). "New! Shin-Sun Foods. Fresh, healthy, and delicious." "Each potsticker is individually hand wrapped in our kitchen. Hand wrapping takes a little longer than machine manufactured foods, but the appearance is greatly improved, and the product is more stable. All the ingredients used are fresh, and not frozen. Using fresh produce is more costly, but we think the taste and quality is well worth it."

Talk with Susannah Yang of Shin Sun. These potstickers were launched in Jan. 1991. They were the company's first product.

9806. **Product Name:** Hot & Spicy Tofu, Curry Tofu, and Horseradish Tofu.
Manufacturer's Name: Silverking Soyafoods.
Manufacturer's Address: Silverking Group, Box #20, Nelson, BC V1L 1C9, Canada. Phone: 604-353-7726.
Date of Introduction: 1991. January.
How Stored: Refrigerated.
New Product–Documentation: Talk with Greg Lundh, owner. 1992. Jan. 8. He started making these products in about Jan. 1991. They are all sold bulk, to avoid packaging, and thus have no labels. Hot & Spicy is the best seller. Horseradish has been discontinued.

9807. **Product Name:** Fat-Free Soyco (Cheese Alternative with Tofu and Casein) [Mozzarella Style, Cheddar Style, or Jalapeño Monterey Jack].
Manufacturer's Name: Soyco Foods. Div. of Galaxy Cheese Co.
Manufacturer's Address: P.O. Box 5181, New Castle, PA 16105. Phone: 800-441-9419 or 412-656-1102.
Date of Introduction: 1991. January.
Ingredients: Soy milk (water, organic tofu), casein, sea salt, tapioca, citric acid, natural flavor, soy lecithin, natural vegetable guar gum, beta carotene (vitamin A coloring).
Wt/Vol., Packaging, Price: 8 oz. Retails for $3.09 (5/91, California).
How Stored: Refrigerated.
Nutrition: Per 1 oz.: Calories 40, protein 8 gm, carbohydrate 8 gm, fat 0 gm, cholesterol 0 mg, sodium 250 mg.
New Product–Documentation: Ad in Natural Foods Merchandiser. 1991. Jan. p. 26-27. "New blossoms in the Soyco garden." Shows color photo of label. Front panel states: "No cholesterol. No preservatives. 100% natural." Soyco Foods has been "an innovator in the creation and development of cheese alternatives since 1968." These products are free of lactose.

Label sent by Claire Wickens from Berkeley. 1991. May 20. 4.5 by 1.75 inches. Red, pink, green, black, and white. "No cholesterol. No preservatives. 100% natural." Questions: How can the product be "fat free" if it is made from tofu? Answer: The FDA allows a product that contains less than ½ gm of fat per serving to be called "fat free." An expert in soy cheese thinks the product is probably legal for this reason. Why would one make soymilk out of tofu and water? Answer: Soy cheeses are not this company's main business. They represent only about 8% of Galaxy's total business. Thus the product may be labeled strangely largely out of ignorance. Six phone calls to the company from Soyfoods Center in June 1991 and a request for answers to these questions elicited no response.

9808. **Product Name:** Soymage (Casein-Free Non-Dairy Cheese Alternative) [Pizza Flavored, Garlic & Onion].
Manufacturer's Name: Soyco Foods. Div. of Galaxy Cheese Co.
Manufacturer's Address: P.O. Box 5181, New Castle, PA 16105. Phone: 800-441-9419 or 412-656-1102.
Date of Introduction: 1991. January.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Refrigerated.
New Product–Documentation: Ad in Natural Foods

© Copyright Soyinfo Center 2013

Merchandiser. 1991. Jan. p. 26-27. "New blossoms in the Soyco garden." Shows color photo of label. "Dairy-free. Finally, a great-tasting 100% dairy-free cheese alternative available in two new and improved flavors–pizza and garlic and onion. Soymage has no cholesterol, no lactose. It is reduced in sodium, fats, and calories. (Also available in Mozzarella, Cheddar, and Jalapeño)." This is an extension of the line introduced in Jan. 1987.

9809. **Product Name:** Super Soy Tofu.
Manufacturer's Name: Soyfoods Pty. Ltd.
Manufacturer's Address: 14/2 Paton Place, Manly Vale, NSW 2093, Australia. Phone: (02) 949 7314.
Date of Introduction: 1991. January.
Ingredients: Organic soybeans, nigari (a natural seawater extract), water.
Wt/Vol., Packaging, Price: 500 gm, in printed plastic bag.
How Stored: Refrigerated.
New Product–Documentation: Label sent by Jennifer Young. 1991. March. She bought this business on 1-7-1990 (probably 1 July 1990). The company is Great Australian Tofu Pty Ltd., trading as Soyfoods Pty. Ltd.

Note: This company was originally founded in Dec. 1978 as The Soy Bean Factory in Sydney by Michael De Campo, Yoshiko Wright, and Marcea Weber.

9810. **Product Name:** Summerfield's Pesto and Tofu Ravioli Dinner.
Manufacturer's Name: Summerfield Foods, Inc.
Manufacturer's Address: P.O. Box 3235, Santa Rosa, CA 95402. Phone: 707-579-3938.
Date of Introduction: 1991. January.
Wt/Vol., Packaging, Price: 12 oz (340 gm) paperboard box. Retails for $3.79 (1/91, California).
How Stored: Frozen.
Nutrition: Per 12 oz.: Calories 246, protein 12 gm, carbohydrate 46 gm, fat 32 gm (calories from fat 32, saturated fat 0.043 gm), cholesterol 0 mg, sodium 158 mg, potassium 448 mg, * dietary fiber 3.4 gm. * Fiber may reduce the risk of colon cancer and heart disease.
New Product–Documentation: Talk with Roland Au of Summerfield's. 1991. Jan. 15. This a pre-cooked frozen dinner comes in a 3-compartment tray. It is on the market now.

9811. **Product Name:** Summerfield's Pesto and Tofu Ravioli Dinner.
Manufacturer's Name: Summerfield Foods, Inc.
Manufacturer's Address: P.O. Box 3235, Santa Rosa, CA 95402. Phone: 707-579-3938.
Date of Introduction: 1991. January.
Ingredients: French cut green beans, water, tofu, brown rice, durum wheat flour, sweet basil, canola oil, whole wheat flour, corn, Parmesan cheese, egg whites, dried garlic, sea salt, white pepper, soy oil.
Wt/Vol., Packaging, Price: 11 oz (312 gm) paperboard box.
How Stored: Frozen.
Nutrition: Per 11 oz.: Calories 418, protein 16 gm, carbohydrate 56 gm, fat 16.5 gm (calories from fat 148, saturated fat 2.7 gm), cholesterol 3.6 mg, sodium 382 mg, potassium 770 mg, * dietary fiber 5 gm. * Fiber may reduce the risk of colon cancer and heart disease.
New Product–Documentation: Talk with Roland Au of Summerfield's. 1991. Jan. 15. This ravioli entree is not pre-cooked as the dinners are. It needs to be boiled. Romato is a fanciful name that Roland coined to describe a dried Roman tomato that they use. Label sent by Roland Au. 1991. Jan. 25. 9 by 7.25 by 1 inch. Red, blue, and gold on white. Color photo of ravioli with rice and beans on white plate.

9812. **Product Name:** Summerfield's Romato and Tofu Ravioli.
Manufacturer's Name: Summerfield Foods, Inc.
Manufacturer's Address: P.O. Box 3235, Santa Rosa, CA 95402. Phone: 707-579-3938.
Date of Introduction: 1991. January.
Ingredients: Tofu, durum wheat flour, water, whole wheat flour, dried tomatoes, soy oil, egg whites, Parmesan cheese, olive oil, lemon juice, almonds, onion, dried garlic, natural herbs and spices, sea salt, white pepper.
Wt/Vol., Packaging, Price: 12 oz (340 gm) paperboard box contains 48 ravioli.
How Stored: Frozen.
Nutrition: Per 4 oz.: Calories 230, protein 9.5 gm, carbohydrate 32 gm, fat 7.9 gm (calories from fat 71, saturated fat 1.2 gm), cholesterol 1.1 mg, sodium 91 mg, potassium 169 mg, * dietary fiber 2.6 gm. * Fiber may reduce the risk of colon cancer and heart disease.
New Product–Documentation: Talk with Roland Au of Summerfield's. 1991. Jan. 15. This ravioli entree is not pre-cooked as the dinners are. It needs to be boiled. Romato is a fanciful name that Roland coined to describe a dried Roman tomato that they use. Label sent by Roland Au. 1991. Jan. 25. 7 by 4.75 by 1.375 inches. Red, blue, green, and gold on white. Color photo of ravioli on plate with a rose.

9813. **Product Name:** Special Delivery Organic Pizza (With Soya Kaas).
Manufacturer's Name: Tree of Life (Distributor).
Manufacturer's Address: 1750 Tree Blvd., St. Augustine, FL 32086. Phone: 904-829-3483.
Date of Introduction: 1991. January.
Ingredients: Crust: Organic high protein whole wheat flour, water, organic rice syrup, yeast, sea salt. Pizza sauce: Organic tomato puree, organic rice syrup, organic extra virgin olive oil, organic unbleached wheat flour, organic dates, sea salt, organic spices. Topping: Mozzarella style Soya Kaas (Organic soy beans, filtered water, soy oil,

© Copyright Soyinfo Center 2013

calcium caseinate, tofu, salt, lecithin, citric acid, guar), organic spices.
Wt/Vol., Packaging, Price: 16 oz paperboard box. Retails for $4.99 (2/99 at Open Sesame, California).
How Stored: Frozen.
Nutrition: 1/6 pizza (2.67 oz): Calories 175, protein 9 gm, carbohydrates 26 gm, fat 4 gm (monounsaturates 2.5, polyunsaturates 0.5, saturates 1.0) cholesterol 0 mg, sodium 333 mg.
New Product–Documentation: Spot in Health Foods Business. 1991. Jan. p. 71. Shows a black and white photo of the box. Also available in organic cheese flavor. Product with Label purchased at Open Sesame in Lafayette, California. 1991. Feb. 16. 11.75 by 11.75 by 1 inch. Paperboard box. Red, yellow, blue, and white. Color photo of pizza with 1 slice cut out. "Organic pizza delivered right to your table. Crispy crust made from organic high protein whole wheat flour. Thick, rich sauce made from organically grown tomatoes and organic extra virgin olive oil. Topped with pure Soya Kaas, the delicious, nutritious alternative to cheese. The first frozen pizza that tastes as good as fresh. Soya Kaas. Lactose-free. No cholesterol... And Soya Kaas is the perfect all-natural cheese alternative for those who prefer a dairy substitute. It contains no cholesterol, is lactose-free and yet has the taste and texture of real cheese."

Soyfoods Center product evaluation: The label text is deceptive, since Soya Kaas contains calcium caseinate, which is derived from cow's milk and which allows Soya Kaas to melt. If you follow the "tip" of thawing before cooking, the product is very complicated and messy to prepare. Upon thawing, the product and box become soggy. We could find no frozen pizza sold in a supermarket that suggested thawing before heating. The instructions advise: "Bake directly on oven rack until Soya Kaas melts," but when it melts it drips onto the oven and is hard to clean off. The crust is very thin; our first try it turned out hard and crunchy, almost like a whole wheat cracker. The pizza is quite dry; Nothing special but not bad. It retails for about 69% more than a typical supermarket frozen cheese pizza ($0.31/oz vs. $0.18/oz).

Ad in Natural Foods Merchandiser. 1991. Dec. p. 22. "The first and still the only organic pizza."

9814. *Toyo Shinpo* (*Soyfoods News*). 1991. Origotô iri no tôfu Zenshokutan ga juyô kakudai e [Japan Vegetable Protein Assoc. tries to expand the demand for tofu that contains oligosaccharides]. Feb. 1. p. 4. [Jap]
• ***Summary:*** Mr. Sekiguchi Riôji is head of the Association (Zenkoku Shokubutsu Tanpaku Kyôdô Kumiai, Sendagi 2-48-8, Bunkyô-ku, Tokyo. Phone: 03-3828-1040) which got a patent for their tofu that contains oligosaccharides. Oligosaccharides have vegetable fiber and encourage the growth of Bifidus bacteria, which help the intestines. As of Oct. 1989 one chain of restaurants sells tofu pudding that contains oligosaccharides for ¥250. They sell about 3,000 puddings a day total in their 100 shops. Tokyu department stores have also started to sell tofu with oligosaccharides. Address: Japan.

9815. Burns, David. 1991. New developments at Homestyle Foods (Interview). *SoyaScan Notes.* Feb. 4. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Homestyle discontinued its food processing operation at the end of July 1990, and on August 1 White Wave in Boulder, Colorado, began making the puddings, salads, and ravioli fillings that Homestyle had formerly made in house. By discontinuing manufacturing, the company is able to focus more on marketing, which has helped the financial picture significantly. By an unusual coincidence, Homestyle is now renting out its former processing room to a person who man who now make's the Homestyle raviolis in the same place that they were originally made. This man bought the ravioli equipment from a man who originally made the raviolis.

Homestyle also has new packages for its pudding products; they will be ready in several weeks. The new packaging is much more attractive. The weight of the product will be increased to 6 ounces from 4.5, and it will be fluffier. In 4-6 months they plan to introduce a new strawberry flavor pudding. Address: General Manager, Homestyle Foods, 2327 Bluebell Dr., Santa Rosa, California 95401. Phone: 707-525-8822.

9817. Lesser, Peter; Elkin, Ed. 1991. History of Pacific Soyfoods in Olympia, Washington (Interview). *SoyaScan Notes.* Feb. 8. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Pacific Soyfoods was started by Peter Lesser in 1981. Initially it was run out of the kitchen a collective restaurant named Café a la Mode, located on 4th Avenue in Olympia, Washington. They made tofu from scratch, and used the okara from the tofu to make soysage, using a version of the recipe published in *The Farm Vegetarian*

© Copyright Soyinfo Center 2013

Cookbook. Initially these products were served in the restaurant (the okara was used in sandwiches), but by about June 1981, they had started delivering the Soysage to the local food co-op and to 1 or 2 local grocery stores in Olympia. When the restaurant was closed after a year of operation, the wholesale accounts still wanted Soysage, so Peter decided to keep the soy operation going and at that time, in Feb. 1982, he coined the term "Pacific Soyfoods."

Peter stopped making tofu and bought his okara from a Korean-American tofu manufacturer named Boo Han in Lakewood, Washington. In the spring of 1982, Pacific Soyfoods' landed its first wholesale account, Pacific Rim (formerly known as something like C.C. Grain), a collective wholesaler in Seattle, that delivered to the Puget Consumers Co-op (PCC) in Seattle. Soon thereafter he started selling to natural foods wholesalers, the first one based in Seattle and the second one based in Portland, Oregon. Then in 1983 he expanded his product line by adding to the Original Soysage, Italian and Mexican flavor, and changed from a fresh Saran wrap packaging to vacuum packaging. He expanded his distribution into the San Francisco Bay Area, first through Pacific Trading Co. (Mark Brawerman), then after he folded, Ben Lee at Quong Hop & Co. took over the distribution. At one point, Quong Hop offered to set up at plant in the state of Washington with Peter overseeing it, in order to reduce freight to Washington. Island Spring also distributed Peter's products, and he would sometimes get okara from them.

In about Nov. 1985 he introduced his first tofu burger, the Earthling Tofu Vegetable Burger. He bought the tofu for this burger from Boo Han.

On 1 April 1988 Peter sold Pacific Soyfoods to Ed Elin. At that time the company made four soyfood products: three flavors of Soysage, and Earthling Tofu Vegetable Burgers. Peter left and started Northwest Natural Foods, which makes Medallions, salmon or halibut patties/burgers with wild rice. He tried many times to make a salmon & tofu burger but was unable to get the right texture. (His phone number is now 206-866-9681.) Elin purchased his tofu and okara from Boo Han's, just up the road in Tacoma, Washington. About 12-15 months ago Boo Han changed hands; it is now named Hang Yang, owned by Mr. Choy, a Korean-American, who does not speak English–although his brother does. Hang Yang is very aggressive and doing well; he just upgraded to a new system.

Ed continued to make the same four products, and will be getting new labels (with some color changes) next week for two new flavors of burgers. To the Original Earthling, they will add a Barbecued Earthling and a Teriyaki Earthling. The Barbecued flavor should be on the market in late Feb. and the Teriyaki in March. His business is "growing so fast I can't believe it." His bestselling product is the tofu burger. He has also become distributor for other companies outside the region; he brings up and distributes Quong Hop's entire Soy Deli line. He plans to take on some tofu wieners and the JSL line of egg roll wraps and won-ton skins. By mid-summer he plans to have three of his own styles of tofu (soft, medium, and firm) private labeled by Han Yang.

He fully services his own products in about 175 supermarkets on a weekly or bi-weekly basis. His big accounts are Q.F.C. [Quality Food Centers, the big market in Seattle], and Safeway. He sells only in supers, no natural/health food stores. But he does sell his products to companies that distribute to natural/health food stores, such as NutriSource and the Mountain People's Warehouse down south. The business in natural food stores is too small. Address: 2948 29th Ave. S.W., Building 2C, Olympia, WA 98502. Phone: 206-943-6234.

9818. Ackerman, Gretchen. 1991. Soybean power? Chef Willemse swears by the 'little beans.' Brave? Try some of these soybean recipes. *Press & Guide Newspapers* (*Dearborn, Michigan*). Feb. 14. p. 1-B, 3B.
• ***Summary:*** Dearbornite and former chef to auto magnate Henry Ford, "Jan Willemse consumes soybeans daily–in soups, sandwiches and dessert. He swears by the little bean and attributes his longevity–now 90 years old and still working five days a week–to the soybean...

"Referring to Ford, he added, 'Don't anyone say anything against the great pioneer, who was before his time in the field of nutrition. The old gentleman was a great man.' He began working for the Fords as a pastry chef at the Dearborn Inn and experimented with soybeans for Ford in his Soybean Laboratory. Willemse's task was similar to that of George Washington Carver, Ford's southern friend and peanut fancier. 'Many people believed us to be a little crazy,' said Willemse. 'But I was in the right place at the right time and it has always been a good relationship...

"Willemse said his greatest achievement came in 1934. With Ford the financier and Dr. Edsel Ruddiman, a food chemist, Willemse brought soybeans to the Chicago World's Fair. The dinner menu at Ford's Century of Progress exhibit included soybean croquettes, soybean relish, soybean biscuits, soybean butter and even soybean coffee."

Recipes are given for: Mrs. Ford's mom's favorite chocolate cookies. Henry Ford's honey soy bean ice box cookies. Soy cheesecake. Chocolate chip soy cookies. Tofu cookie sandwich. A large photo shows Chef Jan in the Fair Lane pantry with his Honey soy ice box cookies, an historic delicacy and favorite of Henry Ford.

9819. *Toyo Shinpo* (*Soyfoods News*). 1991. Beikoku no ôte ryôhanten ni genchi seizô no tôfu nônyû: Kyôto Kôseikai no genchi kogaisha [Supplying American-made tofu to big supermarket chain: Kyôto Koseikai's subsidiary is on the scene]. Feb. 21. p. 13. [Jap]
• ***Summary:*** Kyoto Koseikai is a company that runs supermarkets in and around Kyoto, Japan. The president is Mr. Kumaji Shimobo. It is located at Nishino Ume-honcho

117-3, Yamashina-ku, Kyoto-shi, Japan. Phone: 075-581-8111. This company established Kyoto Foods Corp. USA, whose president is Mr. Yoshimasa Yamashita, in Terre Haute, Indiana. Kyoto Foods, which has begun production of tofu, has signed a contract with Kroger, a big supermarket chain, which has 117 stores in the Midwest. Kroger has decided to sell Kyoto Foods' tofu in all of their 117 stores. Kyoto Foods' production capacity is presently 10,000 cakes/day of tofu. Mr. Yasushi Yamamoto, the managing director, wants to decide the definite amount of supply and production line expansion.

Kyoto Foods was looking for a large market in which to sell their tofu and Kroger was looking for a company that could provide stable tofu production and supply. The needs of both have been well met. Address: Japan.

9820. Nordquist, Ted. 1991. Changes in structure and ownership at Aros Sojaprodukter in Sweden (Interview). *SoyaScan Notes.* Feb. 25. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** On 31 Dec. 1990 Ted sold Aros. He now owns one-third of the new corporation named Aros Sojaprodukter AB. Eric Kennhed owns one-third and Blekinge Invest (which owns 100% of Trensums Musteri, a juice company) owns the other one-third. There is a five-person board of directors, and Ted is CEO.

He is trying to find companies to license his new technology and process for making soybase. He has a contract that offers a commission of 3% of the sales of each product for the first year after production starts, plus reimbursement for all travel if it leads to the signing of a licensing contract.

Anders Lindner is now part of Ted's group. William Shurtleff introduced and recommended Ted to him. Anders recently did a soymilk market study for Vitasoy in Australia.

Danish Nutana is in bad shape. Address: CEO, Aros Sojaprodukter, Bergsvagen 1, S-19063 Orsundsbro, Sweden. Phone: 0171-604 56.

9821. Hagler, Louise. 1991. Tofu cookery. Revised ed. Summertown, Tennessee: The Book Publishing Co. 160 p. Illust. Index. 29 cm.
• ***Summary:*** This vegan cookbook contains no recipes calling for eggs or dairy products. Contents. Introduction. 1. Dips and spreads. 2. Soups. 3. Salads. 4. Salad dressings and sauces. 5. Main dishes. 6. Side dishes. 7. Breads. 8. Cookies and bars. 9. Desserts. 10. Making tofu at home.

A half-page ad in *Vegetarian Times* (Feb. 1991, p. 23) states: "America's best-selling tofu cookbook. Brand new edition. Over 200 new & revised recipes. 40 beautiful color photos. Healthy recipes for the '90s. Dairy-free–No cholesterol. $14.95.

Talk with Robert Holzapfel of The Book Publishing Co. 1991. Jan. 24. About 10-15% of these recipes are new recipes, which replace old ones. The rest have been revised to lower the fat and sugar content. Address: Summertown, Tennessee. Phone: 615-964-3571.

9822. **Product Name:** Tofu with Tempeh.
Manufacturer's Name: Nutrisoy Pty. Ltd.
Manufacturer's Address: 255 Forest Road, Arncliffe 2205, NSW, Australia.
Date of Introduction: 1991. February.
Ingredients: Tofu and tempeh.
New Product–Documentation: Letter (e-mail) from Tony Wondal of Nutrisoy. 2005. April 26. He started making and selling Tofu Tempeh in Feb. 1991. Note: He invented this interesting product.

9823. **Product Name:** Tofu with Vegies.
Manufacturer's Name: Nutrisoy Pty. Ltd.
Manufacturer's Address: 255 Forest Road, Arncliffe 2205, NSW, Australia.
Date of Introduction: 1991. February.
Ingredients: Organic soybean, water, carrot, onion, parsley, sesame seeds, sea salt, spices, nigari (magnesium chloride).
Wt/Vol., Packaging, Price: 350 gm.
How Stored: Refrigerated.
New Product–Documentation: Label with date sent by Tony Wondal of Nutrisoy. 2005. April 26. He started making and selling this product in Feb. 1991. Yellow, orange, red and black on green.

9824. Shen, C.F.; deMan, L.; Buzzell, R.I.; deMan, J.M. 1991. Yield and quality of tofu as affected by soybean and soymilk characteristics: Glucono-delta-lactone coagulant. *J. of Food Science* 56(1):109-12. Jan/Feb. [14 ref]
• ***Summary:*** Nine soybean cultivars were compared for their suitability in making tofu. The yield of tofu was not influenced by the size of the soybeans. There is a correlation between the tofu yield and the protein and calcium content of both the soybeans and the soymilk. The protein content of the soymilk also influences the texture of the tofu. Address: Dep. of Food Science, Univ. of Guelph, Guelph, Ontario, Canada N1G 2W1 and Research Station, Agriculture Canada, Harrow, Ontario, Canada N0R 1G0.

9825. **Product Name:** Summerfield's Tofu and Salsa Burrito, Tofu and Salsa Enchilada, and Tofu and Salsa Tamale.
Manufacturer's Name: Summerfield Foods, Inc.
Manufacturer's Address: P.O. Box 3235, Santa Rosa, CA 95402. Phone: 707-579-3938.
Date of Introduction: 1991. February.
Wt/Vol., Packaging, Price: 12 oz (340 gm) paperboard box. Retails for $3.79 (1/91, California).
How Stored: Frozen.
Nutrition: Per 12 oz.: Calories 246, protein 12 gm,

© Copyright Soyinfo Center 2013

carbohydrate 46 gm, fat 32 gm (calories from fat 32, saturated fat 0.043 gm), cholesterol 0 mg, sodium 158 mg, potassium 448 mg, * dietary fiber 3.4 gm. * Fiber may reduce the risk of colon cancer and heart disease.
New Product–Documentation: Talk with Roland Au of Summerfield's. 1991. Jan. 15. These products will be out in 3 weeks. They are all single frozen entrees, not dinners, each wrapped in plastic, with a suggested retail price will be $1.29. The enchiladas come two in a fiber tray with sauce. The suggested retail price is $2.39. The tamale will be wrapped single.

9826. **Product Name:** Tofu, Soymilk, Deep-fried Tofu, Five-Spice Flavored Tofu.
Manufacturer's Name: Sun Kee.
Manufacturer's Address: 448-452 North 12th St., Philadelphia, PA 19123. Phone: 215-625-3818.
Date of Introduction: 1991. February.
New Product–Documentation: Talk with Yatsun Wen. 1990. March 22. He now lives in Philadelphia and plans to start a tofu shop there. Talk with Yatsun Wen. 1991. Feb. 8. He hopes to open his shop in several weeks. His native language is Cantonese. He plans to make tofu, soymilk, deep-fried tofu, and flavored tofu. He has moved his residence into his business location. He is looking for nigari to use in making fried tofu.

9827. *Guardian* (*England*). 1991. Beans mean tofu: Most of us are familiar with baked beans. But you can also use beans to discover the secrets of seeds, and the growth of plants and the food we eat. March 5. p. A6.
• ***Summary:*** An excellent article for children about learning from beans about plants. Learn how to make a sprouting chamber and to sprout beans. Note: So specific types of beans are mentioned or suggested for sprouting.

Learn how to make a tofu press, then make tofu at home (detailed instructions are given)–using lemon juice to curd packaged soya milk.

Illustrations show: Cross section of a bean, labeled. (2) A sprouting chamber. (3) Utensils (including a "tofu press") and ingredients needed to make tofu at home.

Photos show: (1) A soya bean plant. (2) A bean curd factory in China. (3) Many different tofu products–plus soya milk in an aseptic carton.

9828. Lee, Ben. 1991. Update on fermented tofu (Interview). *SoyaScan Notes.* March 5. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Jim Miller of Quong Hop & Co. noted in a SoyaScan interview in April 1984 that the government now required fermented tofu to be sold refrigerated. The regulation was apparently fairly new at that time. This regulation still applies, but apparently only in the state of California and only on products made in California. The law is a state law, and it is applicable since it is stricter than the federal law. Thus in California, Quong Hop & Co., the only manufacturer of fermented tofu in the USA, must make this product under canning regulations and print on the label: "Perishable–Keep refrigerated." Of course, the product has never been refrigerated in Asia and there is no reason for it to be refrigerated here since it is made under more sanitary conditions.

There continues to be a glut of imported brands of fermented tofu, mostly made in Hong Kong, Taiwan, and mainland China. Ben feels they are of inferior quality and they are often detained by customs officials. But these products, because they are not *made* in California, need not be refrigerated in retail stores. The law is inconsistent on this point and Quong Hop has spent considerable money and time trying to rectify this injustice, but the state health regulators are unwilling to respond or change the law. Thus, it is an ongoing problem and handicap for Quong Hop.

The market for this product, which is consumed mostly by Asian Americans from the countries that import it, is at least $2-3 million a year retail. Address: V.P. Marketing & Personnel, Quong Hop & Co., 161 Beacon St., South San Francisco, California 94080. Phone: 415-873-4444.

9829. *Toyo Shinpo* (*Soyfoods News*). 1991. Beikoku de gaishoku tatenka. Genchi no tôfu kôjô o kadô. Nihon-shoku resutoran kaisetsu [Restaurant chain in the USA operating tofu plants nearby. Japanese food restaurant opens]. March 21. p. 2. [Jap]
• ***Summary:*** Kyoto Koseikai has decided to start a chain of Japanese restaurants whose menu is based on American-made tofu and beef. In Japan, regulations governing supermarkets have changed, and competition is becoming more severe. Therefore they have started to move into the USA. The company's first operation, a tofu manufacturing plant, is in Terre Haute, Indiana. Now they have purchased a local restaurant for about 40 million yen [$314,000]. They are calling it Gilligan's Island (*Girigansu Airando*). It has 306 seats. Their goal is 150 million yen [$1.18 million] sales per year. The business is run by Kyoto Foods Corp. whose president is Mr. Yoshimasa Yamashita. Kyoto Foods has very strong connections with local people in the financial community. Address: Japan.

9830. Ridenour, Jeremiah. 1991. Recent developments at Wildwood Natural Foods (Interview). *SoyaScan Notes.* March 23. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Jeremiah is now president of Wildwood in Fairfax, and is also running Wildwood Santa Cruz. Starting 6 weeks ago he began to work in Fairfax each Monday through Friday noon, commuting. Paul Orbuch is no longer involved in the daily operations of the company, although he is still on the board of directors and a shareholder, and he

© Copyright Soyinfo Center 2013

still serves as a consultant. Paul would like to come back in to daily involvement. The board asked Jeremiah to take over; Jeremiah was tired of "crisis management." Devo is head of distribution and Dali is head of production. The company is still growing very fast; Jeremiah is controlling the growth to avoid cash-flow problems.

Wildwood now delivers their products to Marriotts. For a while they sold directly to Hewlett-Packard into their cafeterias, which offer a vegetarian entree every day. Wildwood's tofu burgers were the most popular product. The product went over very well. Wildwood has just started delivering tofu burgers to the Lawrence Livermore Labs.

Update: Talk with Jeremiah. 1998. Oct. 20. Wildwood got their products (mostly burgers) into the Apple cafeteria first, in about 1988, then into Hewlett Packard not long afterward. Small amounts of their soy products are still sold in both places. Address: Wildwood Natural Foods of Santa Cruz, Inc., 1560 Mansfield Dr., Suite D, Santa Cruz, California. Phone: 408-476-4448.

9831. **Product Name:** [Tofu, and Seitan].
Foreign Name: Tofu, Seitan.
Manufacturer's Name: Ecobras–Centro Ecobiótico do Brasil Ltda.
Manufacturer's Address: Rua Apolinário Corrêa da Silva 30, Cônego, Nova Friiburgo, R.J., Brazil. CEP: 28621-550. Phone: 55-245-220267.
Date of Introduction: 1991. March.
New Product–Documentation: Talk with then letter (fax) from Terri and Paulo of Ecobras. 1994. July 18. This company started making tofu in March 1991 and seitan in Sept. 1991. Nova Friiburgo is in the state of Rio de Janeiro (RJ).

9832. Heaney, Robert P.; Weaver, C.M.; Fitzsimmons, M.L. 1991. Soybean phytate content: effect on calcium absorption. *American J. of Clinical Nutrition* 53(3):745-47. March. [21 ref]
• ***Summary:*** Phytate, the storage form of phosphorus in plants, reduces the bioavailability of calcium, but to a much lesser degree than oxalate. Using hydroponic growth media, soybeans were cultivated in solutions containing radioactive calcium in the for of 45Ca along with different levels of phosphorus to produce seeds that varied significantly in phytate content. Calcium absorption from high-phytate seeds was significantly lower at 31.0% ± 7% compared with low-phytate soybeans and milk for which absorptions averaged 41.4% ± 7.4% and 37.7% ± 5.6% respectively. Address: 1. Creighton Univ., Omaha, Nebraska 68178; 2. Dep. of Foods and Nutrition, Purdue Univ., West Lafayette, Indiana; 3. The Center for Hard Tissue Research, Creighton Univ., Omaha, Nebraska 68178.

9833. Kerntke, Ulrich. 1991. Soya: Not just for eccentrics. *Dragoco Report* No. 3. p. 83-97. [5 ref. Eng]
• ***Summary:*** An interesting overview of soybean production worldwide and the markets for tofu and soymilk in Europe. Figure 1 is a bar chart ranking countries that produce more than 1 million tonnes of soybeans by their yields in tonnes per hectare. The country with the highest yield by far is Italy (approx. 3.1 tonnes/ha), followed by Canada (2.3), USA (2.2), Argentina (2.1), Paraguay (1.8), Brazil (1.7), China (1.3), Indonesia (1.1), and India (0.8 tonnes/ha).

Figure 2 is a graph of soybean production in 4 major countries and others from 1935 to 1990.

Figure 3 shows world market share of soybean production among 4 major countries and others from 1935 to 1990. The U.S. market share grew steadily until about 1965, but has fallen ever since. Brazil's market share showed significant growth after 1965, and Argentina's after 1975.

Figure 4 shows the number of countries producing more than 100,000 tonnes of soybeans from 1935 to 1990. This number stayed steady at about 6-7 from 1935 to 1965, then rapidly increased to 15 in 1975 and 27 in 1990. Figures 6 and 7 are bar charts showing consumption of tofu in 1986, with projections to 1992 in France, Great Britain, Germany, Netherlands, and the rest of the EC (especially Switzerland). In 1992 for tofu, Germany is expected to be the leader followed by Great Britain and France. For soymilk, Great Britain is expected to be by far the leader, followed by Germany and France. The source of the tofu and soymilk information is Institut für Agrarpolitik, Stuttgart. Address: Product Manager, Flavor Div., Dragoco, Gerberding & Co. GmbH, D-3450 Holzminden, Germany. Phone: (05531) 704 327.

9834. **Product Name:** Earthling Tofu Vegetable Burger [Barbecued, or Teriyaki].
Manufacturer's Name: Pacific Soyfoods.
Manufacturer's Address: 2948 29th Ave. S.W., Building 2C, Olympia, WA 98502. Phone: 206-943-6234.
Date of Introduction: 1991. March.
Wt/Vol., Packaging, Price: 8 oz. or 16 oz.
New Product–Documentation: Talk with Peter Lesser of Northwest Natural. 1991. Feb. 8. He plans to introduce these two new products in Feb. and March (respectively) 1991.

9835. **Product Name:** The Organic Gourmet Tofu Seasoning [Mild (Herbal), or Spicy (Saffron)].
Manufacturer's Name: Scenario International Co. (Importer-Marketer). Made in Germany by Vitam Hefe Produkt GmbH.
Manufacturer's Address: P.O. Box 24177, Los Angeles, CA 92204-0177; Walter-von-Selve Str. 2, 31789 Hameln, Germany. Phone: (40) 5151/95-400.
Date of Introduction: 1991. March.
Ingredients: Mild: Sesame, nutritionally grown yeast extract, soybean powder [soy flour], wheat bran, tomato

© Copyright Soyinfo Center 2013

extract, sea salt, oregano, natural spices. Spicy (Saffron): Sesame, nutritional yeast extract, soybean powder, wheat bran, garlic, sea salt, natural spices, pepper, soy sauce.
Wt/Vol., Packaging, Price: 1.75 oz glass jar.
How Stored: Shelf stable.
New Product–Documentation: Ad in Vegetarian Times by Scenario International Co. 1993. Nov. p. 21. This company in Los Angeles sells "The Organic Gourmet Tofu Seasonings." "Tofu with Taste! We created our seasonings to bring out the hidden flavors in your dishes." The seasonings contain flavorful Nutritional Yeast Extract.

Products (Mild and Spicy) with Labels sent with letter and color leaflet by Elke Heitmeyer of Scenario International (P.O. Box 24177, Los Angeles, California 90024-0177. Phone: 310-470-9166). These products are made in Germany by Vitam Hefe Produkt GmbH. Scenario started distributing them in March 1991.

Label. 4.5 by 1.25 inches. Each jar is 2¼ inches high and 2¼ inches wide, with a screw-on lid. White on green or orange. "All natural. Produced in Germany for Scenario International Co. Season fried tofu or mix seasoning with minced tofu, then fry. Marinate by dissolving about 2 level tablespoons in 2/3 cup water and soak tofu slices for ½ hour."

Leaflet titled "Story" by Scenario International. "Elke Heitmeyer, the founder of Scenario International, is originally from the Eastern parts of Germany." She is a vegetarian. "The Organic Gourmet product line has been sold in German specialty health food stores, 'Reformhaus,' for years. The manufacturer is a member of the Neuform Assoc. of Natural Food Producers."

Letter from Elke Heitmeyer in response to enquiry from William Shurtleff of Soyfoods Center. 1994. Jan. 11. The tofu seasonings were first sold in Germany under the brand name Vitam in Jan. 1989. They were first sold in the U.S. under The Organic Gourmet brand in March 1991.

9836. **Product Name:** Spring Creek Great Balls of Tofu (Italian Flavored Meatless Meatballs).
Manufacturer's Name: Spring Creek Natural Foods.
Manufacturer's Address: 212-C East Main St., Spencer, WV 25726. Phone: 304-927-1815.
Date of Introduction: 1991. March.
Ingredients: Tofu, okara (both made from certified organic soybeans), whole wheat bread crumbs, walnuts, onion flakes, granulated garlic, parsley, sea salt, black pepper, tomato sauce.
Wt/Vol., Packaging, Price: 12 oz vacuum pack. Retails for $3.65.
How Stored: Refrigerated.
New Product–Documentation: News release. 1990. Dec. 20. The product will be available on 1 March 1990. Talk with Bill Quick of Spring Creek. 1992. Jan. 10. This product is now out. It is meatless meat balls made with tofu, okara, bread crumbs, walnuts, and other minor ingredients in tomato sauce.

9837. *Toyo Shinpo* (*Soyfoods News*). 1991. Tôfu Dengaku [Tofu Dengaku: Illustration of a lady in the early 1800s in Japan preparing Dengaku over a grill]. March. 21. p. 4. [1 ref. Jap]
• ***Summary:*** This illustration is from the book titled *Sôsôshi* (1822). It is found in the section titled Shokoku Dôchû Kinwaraji, which is illustrated by Mimaru KITAO. The author of the book is not given.

9838. Tuitemwong, Kooranee; Fung, Daniel Y.C. 1991. Microbiological study of tofu. *J. of Food Protection* 54(3):212-16. March. [16 ref]
• ***Summary:*** Seven brands of tofu were analyzed after 1 and 30 days storage in a refrigerator. The pH has an important influence on the genera of microorganisms found, of which the principal gram-positive ones were *Streptococcus, Pediococcus,* and *Lactobacillus,* and the most common gram-negative bacterial species were *Pseudomonas putida, P. aeruginosa, Enterobacter agglomerans,* and *E. cloacae.* Address: Dep. of Animal Sciences and Industry, Kansas State Univ., Manhattan, Kansas 66506.

9839. Wasserman, Debra; Mangels, Reed. 1991. Simply vegan: Quick vegetarian meals. Vegetarian Resource Group, P.O. Box 1463, Baltimore, MD 21203. 224 p. March. Illust. General index. Index of tables. 23 cm. [117 ref]
• ***Summary:*** A vegan cookbook. Contents: Foreword. Time-saving cooking suggestions: Microwave cooking. Sample menus: Menu analysis. Top recipes for calcium and vitamin C. Top recipes for iron. Recipes (one section is titled Soy Products: Tempeh Dishes, Tofu Dishes). Food definitions and origins. Herbs and spices. Vegan nutrition (written by Reed Mangels, PhD, RD. Each of the 18 topics is followed by a bibliography; includes a section on each major nutrient, pregnancy, lactation, feeding vegan kids, nutrition glossary, recommended reading list). Cruelty-free shopping by mail.

The Vegetarian Resource Group. The group also publishes a bimonthly magazine, *Vegetarian Journal,* and is considered by dietitians to be a good source of nutrition information for vegans.

This book contains more than 20 tofu recipes and 6 tempeh recipes.

Note from VRG: As of Dec. 2012 this pioneering book has 100,000 copies in print and a 5th edition has recently been sent to the printer. Address: VRG, Baltimore, Maryland. Phone: 301-366-8343.

9840. Barat, Chandri. 1991. Recent developments at Legume, Inc. (Interview). *SoyaScan Notes.* April 9. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The company is no longer issuing annual

© Copyright Soyinfo Center 2013

reports. They haven't filed with the Securities & Exchange Commission for 2-3 years. They do keep unaudited, non-public financial statistics on the company, management use only. It is too expensive to contact the shareholders once a year–$50,000 or more. Legume has had many problems. The European market for the chocolate bars is till good and the entrees are still sold nationwide. The corporate structure, with its large legal and accounting expenses, is extremely burdensome. So they are just trying to maintain the food line. It is continuing because Gary and Chandri have put well over $100,000 of their own money (their house) into Legume to keep it going for the last few years. Last quarter they made money for the first time.

Legume has initiated three major lawsuits, which are pending. They had several fiascoes with the chocolate. In one $50,000 shipment of chocolate to Switzerland, lactose was found. So Legume is suing the cocoa line, the producer of the chocolate for several hundred thousand dollars. The salad dressing contained a non-kosher vinegar. A rabbi in California sued them for $20,000 and finally settled for $2,000 after $25,000 in legal fees. Legume counter-sued the huge company that made the salad dressing. No-one has sued Legume.

They have bought a piece of land in Puerto Rico on top of a hill not far from the ocean but not right on the ocean. It has a gorgeous 180º horizon, and is a big surfing area. Their work could help the local people and agriculture. The big question is can they growing organic foods efficiently enough to take advantage of the huge potential U.S. and European markets. Address: P.O. Box 426, Schoolhouse Park, 112 Main Road, Montville, New Jersey 07045. Phone: 201-263-1013.

9841. Yakabushi, Konrad. 1991. Ontario soybean growers crushed by plant closing. *Toronto Star* (*Ontario, Canada*). April 11. p. C1, C10.

• ***Summary:*** Last month Victory Soya Mills, Ontario's largest soybean crusher, ceased operations and padlocked the doors of its plant on Lakeshore Blvd. East, thus closing a chapter in Toronto's history.

For almost 50 years, "convoys of trucks had converged on Queen's Quay during the dying days of Indian summer to unload" the harvest of many Ontario farms at the soybean crushing facility.

While some Toronto residents will hardly miss the mile-long traffic snarls, "the closure has left many others with a wistful sense that an annual rite of autumn and a historic Toronto landmark, are soon to be lost forever."

But for many of Ontario's 25,000 soybean farmers, whose crops were crushed by Victory Soya Mills, the plant closure raises more serious issues; where will they sell their crops in the future? Central Soya Co. Inc. (Fort Wayne, Indiana), the plant's owner blames the demise "on several factors, including high municipal taxes, traffic problems and encroaching development on the city's waterfront." Bill Campbell, vice-president of processing at Central Soya, says the basic problem was that "the plant was unable to operate profitably in that environment." The larger problem is that there is an excess of soybean crushing capacity in North America.

Soybean farmers point to federal policies aimed at promoting production of canola, a competing oilseed grown on the Prairies to the west. Even today, "Ottawa subsidizes the shipment of canola to Eastern Canada and, during the 1970s, handed out grants to encourage the construction of canola crushers in the West. Central Soya told the Ontario Soybean Growers' Marketing Board that the plant might be spared if the Board could get the government to change some of those policies.

Built in 1944 during World War II, the plant was a key factor in the birth and development of Ontario's (and Canada's) soybean industry. Production rose rapidly during the 1970s "as continent-wide health concerns sparked a move away from animal fats to vegetable oils." Soybeans even found their way onto Canadian dining tables in the form of margarine, salad and cooking oils, soyburgers, tofu, and soy flour in baked goods. Moreover, soybeans were increasingly used in industrial applications from printing inks to paints, and soybean meal became the standard protein source in livestock and poultry feeds.

Today Ontario grows 95% of Canada's soybeans and 70% of these are grown in southwestern Ontario, which stretches further south than Detroit or Ann Arbor, Michigan.

Until last year, about 85% of Ontario's soybean crop was crushed in Canada yielding two value-added products: crude soybean oil and protein-rich soybean meal. But with the closure of Victory Soya Mills, about one-third of Canada's soybean crushing capacity and roughly 2 million bushels of soybean storage space have been eliminated, farmers will have to sell their soybeans anywhere they can.

Central Soya, which owns a smaller soybean crushing plant in Hamilton, Ontario, "says it is considering expanding that plant to make up for the lost capacity in Toronto.

The only other Canadian plant that crushes soybeans is ADM Agri-Industries, Ltd. (dba Maple Leaf Monarch), in Windsor, Ontario, owned by ADM of Decatur, Illinois.

It seems clear that the plant closure will hurt Ontario soybean farmers, in both the short and long terms. They may end up having more of their soybeans crushed in the United States and they will surely have to expand their markets overseas.

Photos show: (1) The Victory Soya Mills plant and silos. (2) Jim Allin, a soybean grower, standing next to a large sack of Pioneer brand soybean seed.

9842. Gaiser, Klaus. 1991. Re: Huegli acquires Soyastern, owned by Thomas Karas. Letter (fax) to William Shurtleff at Soyfoods Center, April 18. 1 p.

© Copyright Soyinfo Center 2013

• ***Summary:*** Soyastern (Dorstener Tofu), owned by Thomas Karas, was acquired by Huegli a few days ago. Follow-up talk followed by letter (fax). 1991. June 26 and 28. In about Feb. 1991 Huegli Nahrungsmittel GmbH bought the Soyastern brand only, not the company. Soyastern Naturkost GmbH has now been moved into the same town as Huegli (address: Guettinger Str. 23, D-7760 Radolfzell, Germany), and the huge chicken factory in Dorsten, formerly occupied by Soyastern but never paid for completely, has been closed down and returned to the former owners. Yamato is producing part of Soyastern's products. The larger part has been taken over by some other factory which has been producing the tofu for Heirler (which Huegli now also owns). Alexander Moosmann from Huegli is managing director of the new Soyastern, and Thomas Karas (still located in Dorsten) works for him as director of sales and marketing for the health food market (*Naturkostmarkt*). Thomas' task is tofu product manager for the whole group/firm. Soyastern and Yamato are now working together to develop a strategy for selling more of their tofu and tofu products in Europe, primarily in the Reform market and natural/health food market. Yamato is committed to making all of their soy products from organically grown soybeans. Yamato plans to move into a larger factory soon to keep up with their growing production. The plan now is to keep both the Yamato and Soyastern brands. The traditional/classical tofu products (such as basic tofu, smoked tofu, sprouts) will be sold under the Yamato brand, while the new/modernized European second-generation products (like tofu burgers) will be sold under the Soyastern brand. "The market for regular traditional tofu is limited and will stay limited in Germany. The growth potential lies in new, modernized second-generation European tofu products. Soybeans and soyfoods still do not yet have the best reputation here in Germany, for various reasons. Some people even think negatively of them." Things at Yamato and Soyastern are changing rapidly now but should have settled down within 6 months.

Huegli is now buying some spray dried tofu from a company in the USA or Canada. Shurtleff encourages Yamato to start making their own spray-dried tofu since this is a product which is growing very rapidly in the USA. Address: President, Yamato Tofuhaus GmbH, Rittweg 11/1, D-7400 Tuebingen–Hirschau, West Germany. Phone: 7071-71094.

9843. *Toyo Shinpo* (*Soyfoods News*). 1991. Okinawa no tôfu. Katakute okii. 1 cho (1 kg) 240 yen [Okinawa tofu. Big and firm. One cake weighs 1 kg and costs 240 yen]. April 21. p. 9. [Jap]
• ***Summary:*** This full-page article contains ten photos, one of them apparently quite old, showing tofu being made in the traditional way (using a hand-turned stone mill) in Okinawa. An inset photo shows the cover of a cookbook titled "Okinawa Tofu Cookery–80 selected recipes" (*Okinawa Tôfu Ryôri–80 sen*) by Masa Kyan, published by Naha Shuppansha in Okinawa.

9844. *Toyo Shinpo* (*Soyfoods News*). 1991. Kawamuki daizu fureeku o tôfu seizô ni. Gyôsha kara mo "oishii" to kôhyôka. Nichii no shyoppu seisaku de Beikoku de seisan kôjô o kensetsu-chû [Dehulled soybean flakes for making tofu. Tofu makers say they produce delicious tofu. With Nichii's shop policy, they are building a plant in the USA]. April 21. p. 7. [Jap]
• ***Summary:*** At their U.S. plant, Nichii (the Nichii Mycal Group) is planning to produce 1,000 tonnes of dehulled soybean flakes the first year, 1,500 tonnes the second year, 2,000 tonnes the third year, and 3,000 tonnes the fourth year. They plan to sell 50% of these flakes in America and export 50% to Japan.

9845. Buzzell, R.I.; Anderson, T.R.; Hamill, A.S.; Welacky, T.W. 1991. Harovinton soybean. *Canadian J. of Plant Science* 71(2):525-26. April. [4 ref. Eng; fre]
• ***Summary:*** "Harovinton is a large-seeded soybean cultivar with a greater protein content than oilseed cultivars and is suitable for tofu production... Production will be on a contract basis with Canada Packers, Inc."

"Registration number 3118 was issued for Harovinton as a tofu-type soybean, by the Variety of Registration Office, Seed Division, Food Production and Inspection Branch of Agriculture Canada." Address: Research Station, Agriculture Canada, Harrow, Ontario, N0R 1G0, Canada.

9846. Morinaga Nutritional Foods, Inc. 1991. Dairy-free, low-fat tropical shakes: Made with Mori-Nu and your favorite fruit (Tear-off recipe pad). 2050 W. 190th St., Suite 110, Torrance, California 90504.
• ***Summary:*** This color tear-off recipe pad (6½ by 4 inches), developed by Susan Bucher of Bucher & Russell in Los Angeles, was introduced in April 1991. On the front is a color photo of a strawberry milk shake surrounded by a sliced pineapple, bananas, strawberries, apricots, and other fresh fruits. To the left is a package of Mori-Nu Lite Firm tofu (only 1% fat).

On the back are recipes for: Mori-Nu Hawaiian Smoothie, Mori-Nu Strawberry Banana Shake, and Mango Madness Shake, plus nutritional analyses, Mori-Nu Tofu facts, and an offer for additional free Mori-Nu recipes. Address: Torrance, California. Phone: 1-800-669-8638.

9847. Nichii Company of America, Inc. (MyCal Group). 1991. MicroSoy Flakes: The next millennium (Color videotape). Skypark 2, Suite 140, 23440 Hawthorne Blvd., Torrance, CA 90505. 11.8 minutes.
• ***Summary:*** Tells the story of MicroSoy Flakes and describes their benefits, with emphasis on saving water, energy, and time, increasing tofu yield, and giving good

© Copyright Soyinfo Center 2013

quality tofu. Shows the product being tested inside the Azumaya Inc. tofu factory in San Francisco, and at a small tofu shop in the Pacific Northwest. Lester Wilson at Iowa State Univ. describes tests on the product being conducted there. A very nice presentation. Address: Torrance, California. Phone: 310-791-0010.

9848. Orf, J.H.; Lambert, J.W.; Kennedy, B.W. 1991. Registration of Proto soybean. *Crop Science* 31(2):486. March/April. [5 ref]
• ***Summary:*** The Proto soybean (Registration no. CV-275, PI 542,769) was developed at the Minnesota Agricultural Experiment Station. It was released on 15 Feb. 1989 as a "special purpose high-protein cultivar for use in the production of tofu and other products requiring very high protein content." Proto is of maturity Group 0, about 2 days earlier than Evans. The seeds are dull yellow with buff hila. Proto contains 45.6% protein and 16.5% oil. Breeder seed will be maintained by the Minnesota Agric. Exp. Station.

Work supported in part by grants from the Minnesota Soybean Research and Promotion Council, and the Minnesota Seed Producers and Promotion Assoc.

Note: This is the earliest document seen (Aug. 1999) that mentions the soybeans variety Proto. Address: 1-2. Dep. of Agronomy and Plant Genetics; 3. Dep. of Plant Pathology. All: Univ. of Minnesota, St. Paul, MN 55108.

9849. Paine, Heather. 1991. Soya and SIAL '90: Editorial. *SoyaFoods* (*ASA, Europe*) 2(1):1. Spring.
• ***Summary:*** "Last year's SIAL (Salon International de L'Alimentaire) was certainly impressive and all the more so because soyafoods and products containing soya had a remarkably good presence... French soyafoods companies were well represented with many new products... In the 'new products' section a soya-oil based margarine from Denmark (Margarines AMA-Dragsbaek Margarine Fabrik S A) won a SIAL D'Or award and a soyamilk from Argentina (AdeS) was highly commended." Address: editor, SoyaFoods, 27a Santos Rd., London SW18 1NT, UK. Phone: 081-874-5059.

9850. *Plenty Bulletin* (*Davis, California*). 1991. A visit to the soy dairy in Guatemala. 7(1):3. Spring.
• ***Summary:*** "In 1979, at the peak of Plenty's integrated village development program in Guatemala, we bought 3,200 sq. meters of land (0.8 acre) in the village of San Bartolo in the central highlands. With the help of local Mayan volunteers a soy dairy was built on that land. In February of 1980, the dairy was open and running. Eleven years later it is still going and producing tempeh, tofu, soy flour, soy milk and soy ice-cream which are sold in nearby markets and in Guatemala City."

Alan Praskin, at the invitation of the village, returned to Guatemala and on 7 March 1991 signed title to the land over to the community and "Alimentos de San Bartolo," which is now the name of the soyfoods enterprise. The community of San Bartolo and the managers and staff of the soy dairy are Cakchiquel Mayas.

Three photos shown: Alan surrounded by San Bartolo elementary students, some of San Bartolo's soy-fed children, and a Guatemala highland family enjoying soy ice cream cones.

9851. Proto: New U.S. domestic soybean variety. Specialty high-protein soybean. 1991. Seed color: Yellow (dull), hilum buff.
• ***Summary:*** Sources: Orf, J.H.; Lambert, J.W.; Kennedy, B.W. 1991. "Registration of Proto soybean." *Crop Science* 31(2):486. March/April. Proto was developed at the Minnesota Agric. Exp. Station. It was released on 15 Feb. 1989 as a "special purpose high-protein cultivar for use in the production of tofu and other products requiring very high protein content." Proto is of maturity Group 0, about 2 days earlier than Evans. The seeds are dull yellow with buff hila. Proto contains 45.6% protein and 16.5% oil.

Bernard, Richard L.; Nelson, R.J. 1992. "Origins and pedigrees of public soybean varieties in the United States and Canada: 1987 to 1991–(1) Additions to Table 6; (2) Corrections and additional information; (3) Additions to Table 9; (4) Table updating USDA Soybean Germplasm Collection." *USDA Technical Bulletin* No. 1746. 11 p. July. See Additions to Table 6. Variety: Proto. Maturity group: 0. Pedigree: M70-504(M63-87 x PI 189.880, Bitterhoff) x M69-42(M63-158 x Provar). Note: M63-87 is from Chippewa x PI 261.475(Shika No. 1). M63-158 is from PI 261.475 x Pridesoy II (unknown origin). Prior designation: M77-251. Year releases or licensed: 1989. Developer: Minnesota AES (Agric. Exp. Station).

Letter from Richard Bernard, soybean breeder, Univ. of Illinois. 1999. Sept. 9. "In my Feb. 1999 table (1999 soybean breeders conference) I listed Porotana, Provar, and Proto with the 'large-seeded' cultivars. But they are not large seeded; they are specialty varieties released for their high protein content so probably should be put in a different category. This will be a growing category in the future–i.e., soybeans with special compositional traits." Address: USA.

9852. Tatsumi, Yoshiko. 1991. Kotokoto fukkura–Mame ryôri [Simmer slowly and they expand: Bean cookery]. Tokyo: Zaidan Hôjin Nôsan Gyôson Bunka Kyôkai. 214 p. April 30. [Jap]
• ***Summary:*** The word *kotokoto* in the Japanese title describes the sound of bubbles coming up during simmering; it is sometimes translated as "pit pat." This book contains a section of edamame recipes (p. 52-58). After that comes a section on tofu, miso, and shoyu (p. 59+). Address: Cooking teacher, Japan.

9853. **Product Name:** Trader Joe's Tofu Ravioli Marco

Polo.
Manufacturer's Name: Trader Joe's (Product Developer-Distributor).
Manufacturer's Address: 538 Mission St., South Pasadena, CA 91030. Phone: 818-441-1177.
Date of Introduction: 1991. April.
Wt/Vol., Packaging, Price: 12 oz container retails for $2.59 (4/91).
New Product–Documentation: Trader Joe's Fearless Flyer. 1991. April. p. 15. "New! Tofu Ravioli with soy cheese–No cholesterol, low in fat." "Since the cheese you'd usually find in this kind of an entrée has been replaced with tofu and Mozzarella-style soy cheese, much of the fat and cholesterol have been reduced. But not the flavor." The product "has plenty of flavor from the herbs and spices in the ravioli and from a fresh marinara sauce with Italian seasonings." It contains no preservatives, artificial colors, or artificial flavors.

9854. *Jefferson Herald* (*Jefferson, Iowa*). 1991. Two-day grand opening held by MYCAL. May 2.
• ***Summary:*** Between 1,500 and 2,000 guests toured the new MicroSoy Flakes plant and sampled foods made from tofu. A photo shows dignitaries crossing a bridge to the plant.

9855. Drosihn, Bernd. 1991. Re: New developments at Soyastern and Byodo Naturkost in Germany. Letter to William Shurtleff at Soyfoods Center, May 5. 1 p.
• ***Summary:*** "In Germany the market is on the move, but I'm sure you know that already through your worldwide Tofu-FBI. Soyastern stopped producing tofu and the brand has been taken over by Huegli, which now controls 60% of the tofu market in German natural food stores. Likewise, Byodo Naturkost in Munich is now owned by Svadesha.

Viana has started to produce tofu too, because our production of tempeh is still very small. We are planning to pasteurize tempeh in the future. Address: Founder and president, Viana Naturkost GmbH, Schmittenstr. 106, D-5030 Huerth 6 (Fischenich), West Germany. Phone: (02233) 41323.

9856. Richardson, Al. 1991. New developments at Nichii (Interview). *SoyaScan Notes.* May 16. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The Nichii plant opening in Iowa at the end of April was a great success. The governor of Iowa, Terry Branstad, was there, along with 350 invited guests. An additional 1,500 to 2,000 people showed up to taste tofu dishes and take a tour of the plant. They were responding to a full-page ad in the Jefferson paper that Mr. Chikaarashi had run. They loved the Tofutti [soy ice cream] and Tofu Lasagna that were served, but they didn't seem to care much for plain cubes of tofu seasoned only with soy sauce. Address: Nichii Company of America, Inc., 23440 Hawthorne Blvd., Skypark 2, Suite 140, Torrance, California 90505.

9857. Tanaka, Terry; Richardson, Al. 1991. New developments at Nichii (Interview). *SoyaScan Notes.* May 18. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Nichii is presently selling Microsoy Flakes to only a few small tofu companies in America. They are working with a number of larger companies, but nothing has yet been finalized because those companies need a mixer to process the flakes. Nichii has imported one or more mixers and they are just now clearing customs. They should have imported the mixers a year ago. Most of the flakes made in Iowa are now being sold to Japan. Address: Nichii Company of America, Inc., 23440 Hawthorne Blvd., Skypark 2, Suite 140, Torrance, California 90505.

9858. Osho, S.M. 1991. Soybean recipes. Nigeria: Canada Fund, and Better Life Programme for Rural Women. 26 p. Illust. 24 cm.
• ***Summary:*** On front cover: "For a National Workshop on Soybean Processing and Utilization for Women Groups in Nigeria (20-24 May 1991)."

Contents: (1) Whole soybean recipes: Soy iru or soybean dawadawa. Soy milk. Soy nuts. Soy cheese (Tofu). Scrambled tofu (wara). Fried tofu (wara) in Vegetable soup. Ikokore with tofu (wara). Fried plantain with tofu (wara) stew. Tofu plantain pottage.

(2) Soybean cereal recipes: Soy steamed fresh maize. Soy ogi. Soy Jollof rice. Soy tuwo. Soy corn snack.

(3) Soybean / legumes: Soy moinmoin (with "½ cup soybean paste"). Soy akara.

(4) Soybean in roots and tubers. Soy ikokore. Soy ebe. Sweet cassava soy balls. Soy cassava flow cookies. (5) Snacks: Soybean / wheat puff puff. Soybean cakes. Soybean eba.

(6) Soybean milk residue [okara] recipes: Soybean bits. Soybean balls.

Note: On the white cover are the logos of the Canada Fund and Better Life Programme for Rural Women. Address: 1. Food Technologist and Coordinator, IDRC/IITA Soybean Utilization Project, International Institute of Tropical Agriculture, Oyo Road, PMB 5320, Ibadan, Nigeria.

9859. D'Amico, Pat. 1991. Pepper... and salt: Discomfort foods (Poem). *Wall Street Journal.* May 30. p. A15.
• ***Summary:*** "When baby boomers are under the weather, / They eat the foods they hope will tether / Back to the days when life was more mellow / With alphabet soup and strawberry Jell-O. But pity the next generation of tykes–/ Craving tofu and bean sprouts when illness strikes!"

9860. **Product Name:** Soft Tofu Cake, Fried Tofu.

• ***Summary:*** Discusses the best soybean varieties for use in making tofu, natto, soy oil, and soy protein concentrates and isolates. Gives details on qualitative factors in soybeans that improve food quality. Address: Purdue Univ., Lafayette, Indiana.

9868. Poninski, Piotr (Peter). 1991. Tofu and Buddhism in Poland (Interview). *SoyaScan Notes.* June 3. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Peter, who speaks fluent English, practices Zen meditation and is considering starting a tofu company in Poland, probably near Warsaw. There are 3-4 Zen meditation groups in and around Warsaw. One of these, affiliated with Philip Kapleau roshi of the Rochester Zen Center in New York, makes tofu in the kitchen of its Zen community. He thinks that a person whose last name is Holland went to show them how to make tofu. [But neither Andy Schecter nor Norman Holland of Northern Soy know anything about this.] The Kapleau group is fairly closed to people who do not practice with them, so it is not easy to learn the process. There is also Gampo Sensei's group and a Korean group. Peter is certain that there are no commercial tofu manufacturers in Poland. But there are a lot of Chinese and East Asian restaurants near Warsaw. There are also a few sort of health food stores. Address: 73 Winslow Ave., Somerville, Massachusetts 02144 (temporary). Phone: 617-623-6048.

9869. *Toyo Shinpo* (*Soyfoods News*). 1991. Kyô-tôfu Amerika e: NHK ga Kyoto Tanpaku o rupo [Kyoto tofu goes to America: NHK television reports on Kyoto Tanpaku]. June 21. p. 3. [Jap]
• ***Summary:*** On 12 June 1991 at 6:00 A.M. NHK television in Japan aired a story about Kyoto Tanpaku, a major Kyoto tofu manufacturer, on their "Morning Wide–Kinki Edition." The company is making fruity tofu, selling hamburger in agé pouches, etc. A photo shows president Yasuo Hachijin. In Japan, the company is located at Kyoto city, Fushimi-ku, Yoko-oji, Senryo Matsu-cho 200. Phone: 075-622-3161. Address: Kyoto, Japan.

9872. **Product Name:** Oregon Tofu Chips [Original, Cheddar, Garlic Pepper, or Tomato and Herbs].
Manufacturer's Name: Back Porch Brands.
Manufacturer's Address: 3536 North Pacific Highway, Medford, OR 97501. Phone: 503-734-7696.
Date of Introduction: 1991. June.
Ingredients: Incl. tofu and dough.
Wt/Vol., Packaging, Price: 6 oz bag (clear and crinkly).
How Stored: Shelf stable.
New Product–Documentation: Mail Tribune (Medford, Oregon). 1992. June 23. "Ashland man's unusual chips can be called... Tofu with a twist." Al Grierson is a 43-year-old, bushy-bearded man. A resident of Ashland and a former employee of Ashland Soy Works, he has a new business in Medford, Oregon. He makes tofu chips, in which tofu is incorporated into a dough, then rolled, cut, and baked. "For about a year now, Grierson has been producing bags and bags of chips made from soybean curd in an old dairy building at 3536 N. Pacific Highway. He's worked up to four flavors–original, cheddar, garlic pepper and tomato and herbs–and he's gained a small following in area stores... At $1.99 per 6.2-ounce bag, the unusual chips are spendier than similar snacks, but Grierson says he'll soon come out with a snack pack that sells for less than $1. Besides, he offers a money-back guarantee."

New Product News. 1992. Dec. 7. Oregon Tofu Chips, made by Back Porch Brands in Ashland, Oregon, comes in 4 flavors and retails for $1.19 in health food stores.

9873. *Contact* (*Plenty Canada*). 1991. The promise of soy foods: Sri Lanka. 1(3):1-3.
• ***Summary:*** A photo shows Muttiah Jeyabalan, a native Sri Lankan, who is Plenty Canada's Program Officer for Asia and the Caribbean. Since 1985 he has taken a major

© Copyright Soyinfo Center 2013

part in developing Plenty Canada's program that provides two benefits to Sri Lankans: nutrition and economic opportunity. Plenty Canada's project has recently received $4.7 million funding from CIDA, the Canadian International Development Agency, as it enters its second 5-year phase. In the first 4-year phase of the Soya promotion program, two soy centers were established, one in Kandy and one in Colombo. The emphasis was on training, including extension programs, that assisted women's groups in starting income-generating soy-related businesses. In Sri Lanka, food is traditionally a woman's business. Soya products needed to be popularized and marketed to the general public. The key soyfoods were soy nuts, tofu, ice cream, popsicles, cakes, fried beans, yogurt, curries and tempeh. "Thirty Sri Lankan enterprises, mostly women-run, were initiated and are now self-sufficient." Soyfoods were incorporated in traditional local dishes. Soy ice cream is very popular. Janine Dudding is a Plenty Canada advisor to the Sri Lanka project. Peter Dudding is project director. Address: R.R. #3, Lanark, ONT, K0G 9Z9, Canada. Phone: (613) 278-2215.

9874. *Contact* (*Plenty Canada*). 1991. A hopeful effort: San Bartolo soy products [in Guatemala]. 1(3):4-5.
• ***Summary:*** A photo shows 5 Guatemalans, 3 in traditional Mayan dress, standing behind an ice cream and popsicle truck labeled Ricos Helados de Soya. "After ten years of operation, Plenty's Soy Centre in [Solola], Guatemala, is approaching self-sufficiency... the centre is now an established micro-enterprise with a proven product line." It is administered by ADEEC (Guatemalan Association of Economic, Cultural and Educational Development), a native-based non-governmental organization (NGO) directed by Roderico Teni, with Sebastian Sub Xol as Asst. Director. "As in Sri Lanka, the introduction of soy products to the general population is much faster when sold as ready-to-eat items or when easily incorporated into a traditional dish." Soy ice cream and popsicles are extremely popular, but "the most accepted product has been the soy cheese, tofu, which is cooked with tomatoes and other vegetables instead of or as a supplement to eggs.

"The major success, however, has been in the approach to other Guatemalan institutions. 'Now we are beginning to see much larger orders, particularly the soy milk and the tofu,' Sub Xol said. 'Even commercial ice-cream makers, who use a lot of dairy milk, are starting to use our soy milk, which is about half the price of dairy milk.' Teni emphasized that by selling soy products to the larger institutions, particularly schools, orphanages and hospitals, the protein-rich supplement gets to the people who need it most."

Note: Plenty International (Jan. 1994) notes that this company is now named Alimentos San Bartolo, located at Apartado Postal 118, Solola, San Bartolo, Guatemala. Phone: 502-514896. Address: R.R. #3, Lanark, ONT, K0G 9Z9, Canada. Phone: (613) 278-2215.

9875. **Product Name:** [GranoVita Organic Whole-Grain Tofu Ravioli].
Foreign Name: GranoVita Bio-Vollkorn Tofu-Ravioli.
Manufacturer's Name: DE-VAU-GE Gesundkostwerk GmbH.
Manufacturer's Address: Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany.
Date of Introduction: 1991. June.
Ingredients: Pasta shell: Whole wheat flour, egg, mineral water. Filling: Bio-Tofu (water, soybeans*, calcium chloride), sea salt, fine bread crumbs, Parmesan cheese, spices. * = Organically grown.
Wt/Vol., Packaging, Price: 250 gm poly pouch. Retails for DM 2.98 (6/91, Hamburg, Germany).
How Stored: Refrigerated.
Nutrition: Per 100 gm.: Protein 12.8 gm, fat 4.8 gm, usable carbohydrates 36.5 gm, calories (kcal) 240 (1021 kJoules).
New Product–Documentation: Label sent by Anthony Marrese of Hamburg. 1991. June. 6 by 7.5 inches. Poly pouch. Red, light green, and dark green on white. Illustration of a plate, spoon, and pot surrounded by green and red vegetables. "Vegetarian. Contains no meat."

9876. Rani, Sandiya (Ms.). 1991. Soya milk cottage industry, Hyderabad, India. Phase 2. Andhra Pradesh, India: CHI. 1 p. June 24.
• ***Summary:*** Summary of achievements and results expected: "This project is intended to generate employment and income for women in the lower economic strata in the third world initially in India. The women who will thus benefit require little or no education and only a few days of specific training. The project will also produce a low-cost, culturally acceptable protein diet supplement for children and others in poor urban and rural communities, in the form of neutral-tasting soyamilk and soyamilk products (tofu, yogurt, etc.). The individual soyamilk cottage industry sites will be self sustaining within one year of operation..."

Projected starting date: 1 June 1991. Expected completion date: 31 March 1992.

For Canadian NGO: Cost of project: $18,569. Cost of administration: $5,933. Total: $24,502.

Requested from CIDA: Cost of project: $55,706. Cost of administration: $5,932. Total: $61,638.

Sub-total: Cost of project: $74,275. Cost of administration: $11,865. Total: $86,134.

Schedule of payments.

Note: This woman was the first head of Child Haven's SoyaCow Project in India. But she was unable to travel to visit other SoyaCow centers–a major problem. Address: Child Haven (India), 5-2–658 Chintal Basti, Khairatabad, Hyderabad 500004, Andhra Pradesh, India.

9877. **Product Name:** California Dream Burger. Reamed

© Copyright Soyinfo Center 2013

Dream Burger in Aug. 1993.
Manufacturer's Name: Season's Harvest.
Manufacturer's Address: 52 Broadway, Somerville, MA 02145. Phone: 617-628-1182.
Date of Introduction: 1991. June.
New Product–Documentation: Talk with Ademar Reis. 1993. Nov. 29. He introduced this consumer retail product, made with tofu powder (purchased from Minnesota Waxy) and textured soy protein concentrate, in about June 1991. The name will soon be changed to Dreamburger so it can be copyrighted.

9878. **Product Name:** Tofu.
Manufacturer's Name: Soycountry.
Manufacturer's Address: Westbrook (farm), Berrigan, NSW 2712, Australia. Phone: 060-356-215.
Date of Introduction: 1991. June.
New Product–Documentation: Letter from Rick Pyle, owner. 1991. July 10. "I am using a Takai W30B model tofu system to manufacture tofu and have just started last month." The telephone operator in New South Wales says that Berrigan is near Aubrey and Shepparton, but has no phone number listed for Soycountry.

Letter (fax) from then talk with Rick Pyle. 1992. Aug. 26 and Sept. 1. This company, owned by him, his wife Libby, and his father Max, has been making tofu for more than a year. They use both nigari and calcium sulfate as coagulants. He and his father also grow soybeans in New South Wales, and they use their Bowyer variety to make their tofu. His father was a soybean pioneer in the area, growing the first crop of irrigated soybeans in southern New South Wales in the 1960s. Their main competitors are Earth Angel and Blue Lotus.

9879. Sumaratunga, P.A.; Dasanayake, D.M.W.T. 1991. Potentials and problems of income and employment generation through small-scale processing of coarse grains, pulses, roots and tubers in Sri Lanka. *Palawija News* (*Bogor, Indonesia*) 8(2):13. June.
• ***Summary:*** "Sri Lanka is an agricultural country with 52% of its labour force involved in agriculture and 31% of the total land area under agricultural crops. Total agricultural production constitutes 20% of the annual Gross Domestic Product, of which three fourth covers food crops and one fourth covers the export-oriented plantation sector.

Agricultural production in Sri Lanka is adapted to suit the annual bimodal rainfall pattern. In the wet (*Maha*) season, the whole island receives rain. In the dry (*Yala*) season, only the southwestern quarter of the island [around Colombo, the capital] experiences substantial rainfall.

Tables: (1) Labor productivity and land utilization of CGPRT crops in Sri Lanka. The five columns are: Crop type, GDP (million rupees), number of farm families, area cultivated. The 3 crop types are roots and tubers (incl. potato, manioc, sweet potato, other yams, which contribute the most to the GDP), pulses (including soybean, cowpea, greengram, blackgram, and groundnut, which have the largest cultivated area) and coarse grains (incl. maize and kurakkan).

(2) Area cultivated and production of CGPRT crops in Sri Lanka (1985-1989). For soybean in 1985: 2,780 metric tons were produced on 2,400 ha. In 1989: 2,910 metric tons were produced on 4,700 ha.

(3) Population and labour force statistics for Sri Lanka. The four columns are sector, population labour force, and unemployment. The population of Sri Lanka is presently 16.9 million of which 36% are economically active. 72.2% is rural, 25.5% is urban, and 6.3% is estate (lives on an estate).

(6) Labour requirements for cultivating and processing different crops (per acre). (7) Total labour cost for cultivating and processing different crops (per acre). (8) Total annual labor use and wage bill of CGPRT crop production.

A section titled "Producing soya-based products" states: "However the income and employment generation potential could be higher than that of pulses since soy products are higher priced and processing needs more labour. Nevertheless products such as tofu and tempe can fetch higher prices only when they are more widely accepted in Sri Lanka."

"Conclusion:... a clear potential exists for generating employment and income in the rural sector by promoting small-scale processing of GCPRT crops. To achieve this potential," for suggestions are given to planners.

Note: An editorial (p. 3) by Seiji Shindo, Director, CGPRT Centre, is largely about the Soybean Yield Gap Analysis Project (Phase II). Address: 1. Agricultural economist; 2. Provincial director (UVA province). Both: Dep. of Agriculture, Sri Lanka.

9880. Thornbury, Barbara E. 1991. One-pot cooking, the Japanese way. *New York Times.* July 14. p. XX6, XX31.
• ***Summary:*** An excellent in-depth article about *nabemono,* including the many different regional varieties. Chanko-nabe is a favorite of sumo wrestlers in Kyoto and elsewhere. Ishikari-nabe is a specialty of Hokkaido, Japan's northernmost main island; ingredients include tofu and fresh salmon.

Dote-nabe (oyster nabe) is associated with the port city of Hiroshima; ingredients include "grilled bean curd" and an inch-wide ring of miso spread around the inside lip of the pot like a moat.

Hakata, on the island of Kyushu, is known for its mizutake (sometimes called mizu-daki); ingredients include tofu. Other popular types of nabemono are yose-nabe, sukiyaki, shabu-shabu, and chiri-nabe.

9881. Walsh, Ami. 1991. Tofu entrepreneur plans tasty Asian joint venture. *Detroit News.* July 22. p. F-14.
• ***Summary:*** Bruce Rose, president of Rosewood Products

© Copyright Soyinfo Center 2013

Inc., plans to soon start a joint venture with the Zhen Jiang Bean Factory, a tofu manufacturer with 500 employees located several hundred miles northeast of Shanghai. The Chinese company will provide the technology, recipes, technicians, and equipment to make a new line of tofu products–quite unlike anything most Americans have ever tasted. For example "Buddhist Chicken" made of a pressed tofu called *dofu gan.*

Contains a nice biography and photo of Bruce Rose, who has worked in the natural food industry for 20 years. After earning a degree in philosophy at Central Michigan and Wayne State universities, he founded a small co-op in Royal Oak–while holding paying down a job at Michigan Bell. He worked at Eden Foods (Clinton, Michigan) for two years, then in 1980 founded Rosewood Products as a natural foods distributor.

Five years ago when The Soy Plant, his tofu supplier, went out of business, Rose bought the used equipment, invested $100,000 in new equipment, and began making his own brand of tofu, now named China Rose. Today his company makes about 4,000 lb/week of fresh tofu. Address: Freelance writer, Ann Arbor, Michigan.

9882. Hurt, Calvin. 1991. Soyatech has a $5,000 study of the tofu industry and market worldwide (Interview). *SoyaScan Notes.* July 27. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** This specialized study was conducted for the National Cancer Institute. A condensed version, focusing on the U.S. tofu market, is available for $660. He will be sending a proposal on Monday to Calvin, who is vice president of a frozen food company with a client base of 150,000 companies. All the foods they ship are frozen.

Note: Mark Messina of the National Cancer Institute states (31 July 1991) that the actual title of this report is "Soyfoods Consumption in the USA and Worldwide." Address: 23 Hickory Hill Rd., Branford, Connecticut 06405.

9883. Nhuch, Elsa. 1991. Re: Interest in tofu in Brazil. Soy ice cream in Israel and Brazil. Letter to David Mintz of Tofu Time Inc., July 31. 3 p. Typed, with signature.

• ***Summary:*** Mrs. Nhuch has been interested in tofu as a food for 5 years, and has tested it in numerous recipes. In doing bibliographic research on tofu she learned about Tofutti. "I already knew the soy ice cream which has been produced in Israel for twenty years and was developed in the Technion (Institute of Technology of Israel) where I studied between 1970 and 1971. This product was developed to be served to religious men who don't mix milk with meat..." Mrs. Nhuch would like to introduce Tofutti to Brazil. It would be excellent for the country's 5 million diabetics. 11% of the population of Porto Alegre has diabetes.

Born in 1947 in Porto Alegre, Brazil, she has a MSc in chemistry degree and completed a post-graduate course in food technology in the Technion. She is presently associate professor in the Universidade Luterana do Brasil, Canoas, Rio Grande do Sul. Address: 480 Sao Manoel St., 1st floor, 90620 Santana, Porto Alegre, RS, Brazil.

Berlin: Technische Universitaet Berlin, Institut fuer Lebensmitteltechnologie und Gaerungstechnologie–Getreidetechnologie. 171 p. See p. 9-21. [10 ref. Ger]

• ***Summary:*** Discusses German consumer attitudes toward soya and plant proteins based on surveys using 8 questions with 2,000 people in 1989. When asked which of 9 foods on a list were important sources of protein, those foods receiving the highest percentage of responses were fish (85.3%), meat (72.4%), soybeans (50.3%, up from 39.0% in 1978), and butter (41.0; even though it is mostly fat and contains almost no protein). When asked if people need more or less protein, 39.3% said "about the same as before," 33.6% said "more," and 25.5% said "less."

When asked if people should consumer more plant protein or animal protein, 61.3% said more plant protein and therefore less animal protein, 19.5% said "same as before," 12.9% said that it makes no difference since "protein is protein," and 5.4% said more animal protein and therefore less plant protein.

"One source of plant protein is the soybean. Do you know if the soybean is used as a food or in foods?" 48.3% said they did not know. 37.2% said yes, as a food. 28.0% said yes, in foods.

© Copyright Soyinfo Center 2013

"Which foods are you aware of in which soya is used?" Soya oil 34.1%, in breads and baking 26.3%, soy sprouts 17.8%, soy sauce 14.6%, in convenience prepared foods (*Fertiggerichten*) 9.7%, in sausages and cold cuts 8.9%, in meat substitutes 7.7%, as soybeans 7.6%, in noodles and pasta 7.0%, tofu and tofu products 6.9%, soybean flour 5.9%, vegetables 5.8%, salads and raw foods 5.4%, soyburgers or patties (Soja-Bratlinge) 4.1%, soymilk 4.0%, other 15.0%.

"I will read you a list of foods in which soya is used. Please tell me if you have heard of it, tried it, or purchased it." (percentage responses): Soy oil 70.5%/24.2%/17.7%. Raw soy sprouts 55.5/24.0/14.4. Soy sauce 54.5/28.1/17.6. In bread 39.5/19.6/14.2. In convenience prepared foods 28.5/10.0/6.5. Soyburgers or patties 21.3/7.3/3.5. Soymilk 19.4/4.0/1.8. Tofu and tofu products 18.6/7.6/4.6. In noodles or pasta 17.6/5.9/3.4. Address: Inst. fuer Ernaehrungsoekonomie und -soziologie der Bundesforschungsanstalt fuer Ernaehrung, Stuttgart, Germany.

Berlin: Technische Universitaet Berlin, Institut fuer Lebensmitteltechnologie und Gaerungstechnologie–Getreidetechnologie. 171 p. See p. 23-38. [Ger]
• ***Summary:*** A fine-grained soy flour or powder has been developed. It can be used to make salted products (such as soyanaise {*Sojanaise*}, soynut butter {*Sojabutter*}, soy meat {*Sojafleisch*}), sweetened products (soy chocolate{*Sojachokolade*}, soy caramel {*Sojakaramellen*}), ready-to-use mixtures for the production of sweets, pasta or doughs, soymilk or tofu. Note 2. This is the earliest German-language document seen (April 2005) that mentions soynut butter, which it calls *Sojabutter.* Address: Buehler SG, Uzwil, Switzerland.

9887. *INTSOY Newsletter* (*Urbana, Illinois*). 1991. INTSOY plans expanded cooperation with utilization project in India. No. 43. p. 4. July.
• ***Summary:*** Harold E. Kauffman, INTSOY director, "who recently returned from a two-week trip to India, recommends an aggressive collaborative effort between INTSOY and the Soybean Processing and Utilization Project (SPU) in India to involve the private sector in turning the potential of soyfoods into commercial reality. The SPU project is funded by the U.S. Agency for International Development [USAID].

"The most promising avenues for expansion include producing low-fat soy flour and edible oil from extrusion and expelling; producing full-fat soy flour, soy-cereal blends, and soy-pulse blends from extrusion cooking alone; producing food products with edible-grade defatted flour from existing solvent extraction plants; increasing the use of all types of soy flour in bakery products; and producing soy paneer and soy-based dairy analogs."

9889. Messina, Mark; Messina, Virginia. 1991. Increasing use of soyfoods and their potential role in cancer prevention. *J. of the American Dietetic Association* 91(7):836-40. July. [56 ref]
• ***Summary:*** Contents: Abstract. Introduction. Historical perspective. Soybeans and the US food supply: Soy protein products, retail soyfoods sales. Nutrient contribution of soyfoods. Soybeans and cancer risk: Experimental studies (isoflavones, protease inhibitors, epidemiology, breast cancer, colorectal cancer). Conclusions. Implications.

"Soybeans contain, in relatively high concentrations, several compounds with demonstrated anticarcinogenic activity. Two of these compounds–protease inhibitors and phytic acid–have traditionally been viewed as antinutrients... It may not be appropriate to evaluate soybeans on nutrient content alone; dietitians need to know about the nonnutritive dietary compounds, called phytochemicals, which may have anticarcinogenic effects... Overall, the epidemiologic data suggest that soy consumption may lower colorectal cancer risk, whereas there is only moderate support for the role of soy in reducing breast cancer..."

Table 1 (p. 838) gives the "Proximate composition and selected nutrient content of various soyfoods in common serving sizes and in 100-gm edible portions" (based on Haytowitz 1986). The soyfoods are: Miso, natto, okara, roasted soybeans (dry- or oil roasted), soy sauce (tamari), tempeh, firm tofu (raw), regular tofu (raw). Address: 1. Diet and Cancer Branch, Div. of Cancer Prevention and Control, National Cancer Inst., Bethesda, Maryland 20892; 2. Registered Dietitian, private practitioner, Washington, DC.

9890. **Product Name:** Shredded Soya Kaas (Cheese Substitute) [Mozzarella Style, Mild American Style].
Manufacturer's Name: Soya Kaas, Inc. A subsidiary of Swan Gardens, Inc. Distributed by American Natural Snacks.
Manufacturer's Address: Manufacturer: 6029 Lagrange Blvd., Atlanta, GA 30336. Distributor: P.O. Box 1067, St. Augustine, FL 32085. Phone: 904-825-2057.
Date of Introduction: 1991. July.
Ingredients: Incl. organic silken tofu, soymilk.
Wt/Vol., Packaging, Price: 8 oz resealable, reusable pouch.

© Copyright Soyinfo Center 2013

How Stored: Refrigerated.
New Product–Documentation: Ad (5 by 5 inches, black and white, drawing) in Natural Foods Merchandiser. 1991. July. p. 18. "No cholesterol. Lactose free. All natural. Made with fresh organic tofu and soymilk (not powders & isolates)." Illustrations of a windmill silhouette, a slice of pizza, and two tacos.

9891. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Tofu-Rwanda.
Manufacturer's Address: P.O. Box 1906, Kigali, Rwanda. Phone: 758-82607.
Date of Introduction: 1991. July.
New Product–Documentation: Letter from Mr. Johnny Kashama of Tofu-Rwanda. 1993. Nov. 9. "In Rwanda there is a mini-industry which makes tofu and other products from tofu like crackers (from okara) and fritters and other kind of cakes called in French 'croquettes.'" Johnny would like to take the methods used by Tofu-Rwanda to his home country of Zaire, beginning in Kisangani (where he will defend his thesis at the university), and the finally in Bukavu where he lives with his parents. He is preparing a thesis to present at the end of his studies in Zaire at the Institut Facultaire des Sciences Agronomiques (IFA). It will be titled *"Essai de valorisation de la technologie du soja: Methodes et techniques de production de lait de soja pour une unité artisonale."* He hopes that completion of this thesis will lead to financial support from elsewhere. Presently he has no money.

Form filled out by Mr. Johnny Kashama of Tofu-Rwanda. 1994. Dec. 21. This tofu, the company's first product, was launched in July 1991. For details see Kashama 1994. Note: This is the earliest known commercial soyfood product made in Rwanda.

9892. **Product Name:** Snack'n Savory Tofu.
Manufacturer's Name: White Wave, Inc.
Manufacturer's Address: 6123 E. Arapahoe Rd., Boulder, CO 80303. Phone: 303-443-3470.
Date of Introduction: 1991. July.
Ingredients: Organic tofu (water, soybeans, nigari (magnesium chloride)), soy sauce, honey, soy oil, spices, granulated onion, granulated garlic.
Wt/Vol., Packaging, Price: 4 oz (114 gm) plastic pouch.
How Stored: Refrigerated.
New Product–Documentation: Label sent by Lon Stromnes. 1991. July 30. 3 by 5 inches. Plastic pouch. Red, white, yellow, green, and blue on reddish-brown. "Ready to eat! Delicious hot or cold! Great in salads." Leaflet (black and white, single sided, 28 cm) sent by White Wave. 1993. Feb. "Lip snack'n good." Soybeans organically grown

Note: This is a new version of a White Wave product named Savory Baked Tofu, launched in Dec. 1979.

Ad in Natural Foods Merchandiser. 1992. December. Soyfoods 2000 (Special supplement insert, p. 6). Mentions Snack'n Savory Tofu.

9893. Spaid, Elizabeth Levitan. 1991. Give me a burger–Hold the meat: A widening variety of dishes enliven the plant-based diets of today's vegetarians. *Christian Science Monitor.* Aug. 1. p. 14.
• ***Summary:*** Vegetarian diets are no longer bland or uninteresting (if they ever were). Today's vegetarians enjoy a rich variety of flavors, and sound nutrition. A new generation of vegetarian adults are raising their kids on healthy vegetarian or vegan diets. They also know more about nutrition. And a much wider variety of vegetarian foods and cookbooks are easily available. Almost every supermarket now carries tofu, frozen meat alternatives, all kinds of fruits and vegetables, breakfast cereals, etc. There are now alternatives to almost every meat, dairy, or egg product–from tofu dogs to soy cheese, from eggless mayonnaise to fake bacon made of tempeh–not to mention soy milk and soy ice cream. In short, there are a great many more things to eat in the plant kingdom than in the animal kingdom.

"Many people wince when they hear the word 'vegetarian,' thinking tofu (a cheese-like food made from soybeans) and salad are the staples of such a diet." But vegetarians know this is a myth.

For many people discovering the rich, varied, and delicious flavors is a big discovery, a real and happy surprise. When many people decide to "go green" they also decide to give up meat, which is so destructive to the environment. Others believe it is ethically wrong to kill and eat animals. Still others believe that a vegetarian diet is more healthful.

Tofu can be used in a remarkable number of ways, and made to blend in so one doesn't even know its tofu. Delicious sauces can be made out of "silken tofu and miso," and people think they are eating some type of rich cream sauce.

9894. Sarkar, Bidvut. 1991. Breakfast in style, dine at dhabas. *Times of India* (*The*) (*Bombay*). Aug. 11. p. 12.
• ***Summary:*** "Relief from excise duty granted to several breakfast items in this year's budget will make the day's first meal less costly and more nutritious."

"Soya-based, protein-rich tofu, yoghurt and cheese put up in unit containers are set to escape the tax net, too."

Note: Imagine, "tofu" made it into India's 1991 budget!

9895. Gubanov, Alexander. 1991. Plans to start four tofu companies in the Soviet Republic of Georgia (Interview). *SoyaScan Notes.* Aug. 13.
• ***Summary:*** These four companies would like to produce 1 ton/day of tofu to meet Soviet food and protein deficits. They are now looking for an equipment supplier. Alexander worked at Wildwood Natural Foods in Fairfax, California,

© Copyright Soyinfo Center 2013

making tofu for several years.

Follow-up talk. 1991. Sept. 23. Mohammed Barai is a man of Afghan descent (his ancestors immigrated to Georgia before 1917) who comes from Tbilisi (formerly called Tiflis), the capital of the Georgian S.S.R. in the Caucasian mountains. He now lives in Moscow where he runs an import company; he also has an office in Tbilisi. He will be importing tofu equipment to make tofu in Georgia, then organizing the tofu production. The Georgian government will help pay the costs of the tofu plants. Alexander will be visiting the Soviet Union very soon. Address: Georgia Export Co., P.O. Box 1492, Ross, California 94957.

9896. Ashraf, Hea-Ran Lee. 1991. Work with soyfoods in Zambia and Illinois (Interview). *SoyaScan Notes.* Aug. 14. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Hea-Ran is Korean. After 2 years studying groundnut flour in India at CFTRI on an FAO scholarship, she came to the USA in 1976. At Iowa State Univ., working under Dr. Harry Snyder, she wrote her PhD degree thesis on the flavor of soymilk.

While in Zambia, she worked with home economics extension people, teaching them how to fortify Nshima (pronounced "SHEE-muh; a popular thick non-fermented cornmeal mush that is often eaten with the fingers) with either roasted soy flour, or with okara from soymilk. She and Ellen Jayawardene from Sri Lanka also taught the local people to make and use soymilk. They did not teach about tofu, since no coagulant was readily available. The Lee Yeast Co., a bread company or bakery owned by Mr. Limbada, uses soy flour in their breads. Several other companies were in the process of buying Wenger- or low-cost extrusion cookers for processing soybeans. People from the University of Illinois were helping them to set up this equipment.

The key man working with soyfoods in Zambia is Fred Javaheri. He has worked in Zambia for about 20 years, initially with the USDA. An Iranian by birth, he and his family have permanent Canadian residence (but not citizenship) status but they live in Zambia. Because his religion is Baha'i, he fled from Iran after the Iranian revolution, when many of his non-Moslem faith were persecuted or killed. The Baha'i faith originated in Iran (Persia) in the 19th century and emphasized the spiritual unity of all human beings.

In 1979 she went to the Univ. of Illinois at Carbondale, where she now does mainly teaching; there is not much time or funds for research. Many of her students have do research on tofu. Address: Asst. Prof., Animal Science, Food & Nutrition, Southern Illinois Univ., Carbondale.

9897. Tara, Bill. 1991. Pioneering macrobiotics and soyfoods in London (Interview). *SoyaScan Notes.* Aug. 18. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Starting in the late 1960s, the pioneering work with soyfoods in London was done by Craig and Greg Sams. They and their parents were Americans, and they had gone to college in America. Their father was employed by the U.S. armed forces as an historian; they spent a lot of their time growing up between America and England. Greg fell out of a tree while going to college in Berkeley in the late 1960s and was paralyzed from the waist down, so he was confined to a wheelchair, but was still very active and innovative. In the late 1960s they set up a macrobiotic natural foods cafe / restaurant on Portobello Road in London, then changed it into Ceres Grain Shop, a natural foods retail store. As volume increased, they began to distribute their products out of the back of their shop, and in about 1971 founded Harmony Foods Ltd. as a distribution company located in a warehouse on Ladbroke [sic, Latimer] Road. The model and evolution was similar to that of Erewhon in Boston. Harmony Foods was the first natural foods distributor in England, and probably the second in Europe after Lima Foods of Belgium. Soon they were importing macrobiotic foods from Japan, and distributing organically grown grains from England and from The Camargue (a marshy island in the delta of the Rhone River in the south of France), etc.

Among their early Japanese imports were bulk miso and "tamari" (actually shoyu), imported from Muso in wooden kegs. They repackaged the miso and shoyu in glass bottles under the Harmony Foods label in London. This was the first Japanese miso and shoyu sold in England. In about 1972, as soon as Erewhon started having miso and shoyu packed in Japan, the Sams had the same thing done with theirs, then they applied their own labels in London. But they continued to import in bulk as well. A Chinese company in London made tofu and [mung] bean sprouts, then sold the tofu to the Sams brothers; they sold it unpackaged in open trays in water. At that time, tofu was not emphasized much in macrobiotic circles so not much was sold; it was considered too yin. The Sams also sold deep-fried Rissoles filled with TVP instead of meat; as early as 1970 the Rissoles were being made by an Israeli guy (name?) who owned a shop (name?) by the Hempstead Heath. Marigold Foods also used TVP in the mid-1970s.

In 1970 Bill Tara, then a vice president at Erewhon in Boston, passed through London on his way to India. One purpose of his trip was to scout out the possibility of Erewhon setting up a distribution point or center in England. Paul Hawken was president of Erewhon at the time, and Erewhon was importing miso and tamari from both Muso and Mitoku in Japan. Bill and Paul had been roommates in a warehouse in San Francisco, then they took over the Erewhon food store from Evan Root, Paul starting 2-3 months before Bill. In London, the Sams brothers were just opening a new natural foods restaurant in the Notting Hill area so Bill and Paul Petrofsky spent 2 weeks fixing it up. Paul later started Baldwin Hill Bakery with Hy Lerner. Bill stayed in London 2-3 months during this first visit.

© Copyright Soyinfo Center 2013

In about 1972 Bill returned to London with Russel Demerais, on the Erewhon payroll, again to start an Erewhon distribution center. But Erewhon went through a cash crisis and Harmony foods had grown dramatically. So Bill and Peter Bradford (an Englishman who had come to American in about 1970 and worked for Erewhon doing organic agriculture at Erewhon Farms near Keene, New Hampshire) began to work for the Sams brothers both at Ceres Grain Shop (the retail store) and Harmony Foods (in the warehouse). Bradford, who now has a very successful natural food store in England named Clearwater Natural Grocer, has been one of the most important promoters of soyfoods in the UK. At this time, Craig Sams set up a bakery. By now, miso and tamari sales had increased; Harmony was still affixing its own label to unlabeled packs.

In 1974 Bill and Peter established Sunwheel as a natural food/macrobiotic distributor. They picked up exotic Japanese imports that Harmony found unprofitable and wanted to drop–so there was little or no competitive feeling with the Sams. By late 1974 Sunwheel Hatcho Miso, Mugi Miso, and Tamari were on the market, imported from Muso (Yuko Okada) in Japan. Sunwheel also made granola and peanut butter. Sunwheel never sold any other soyfood products; they had very limited warehouse space and no refrigeration.

Note: On 17 Aug. 1975 Renée Tara wrote William Shurtleff in California. She was living at 30 B Market St., Bradford-on-Avon, Wilts., England. She is writing a European Macrobiotic Cookbook. She requests information on miso and invites Shurtleff to visit.

In about 1977 Sunwheel acquired a retail store that had been started in and by the Community Health Foundation. By 1979 Sunwheel was very successful, but it needed to be recapitalized or sold. So the partners decided to sell it to a larger health food company; Peter kept the retail store.

In Nov. 1975 Bill established the Self Health Center which by 1976 grew into the Community Health Foundation (CHF). By 1976 CHF was offering classes in soyfoods. Paul Jones was the key man with tofu; he taught classes and started making tofu out of his home in the Highgate area. Paul Jones was definitely the first Caucasian to pioneer tofu in England. Simon Bailey, a baker who was originally with one of the first natural foods stores in England, located in Bath, taught about tempeh. These people were experimenting in the kitchen with soyfoods and taught in a sort of an apprenticeship program. Jon Sandifer, who is still with CHF, learned tempeh from Simon Bailey. CHF sold some tofu and tempeh through its own sit-down restaurant named The Seven Sheaves, then renamed The Natural Snack and changed to a cafeteria. A few people did experiments with miso but it never got to a commercial scale in part because of persistent rumors that Lima Foods was going to start making it.

By the late 1970s soyfoods were growing in popularity in the UK. Two separate groups promoted them; the vegetarians and animal rights people (who liked TVP), and the natural foods and macrobiotic people. Marigold Foods also used TVP in the mid-1970s.

Much of important pioneering commercial work with soyfoods in Europe was done by macrobiotic groups in the Netherlands and Belgium. Bill often went there to teach in 1974-79. Tofu, and later tempeh, were emphasized by groups such as Manna in Amsterdam and De Brandnetel in Antwerp. Macrobiotics was much more active in the Lowlands than in England.

The Sams brothers later started Whole Earth as a marketing company for their jams. They sold it fairly soon. Greg Sams (disabled) is no longer in the food business; he runs The Chaos Shop in London which sells photographic reproductions of computer-generated chaos patterns. Craig started Realeat Co. and now may be with the Haldane Foods Group. Address: Director, Nova Inst., P.O. Box 4648, Estes Park, Colorado 80517. Phone: 303-586-6265.

9898. Nordquist, Ted. 1991. New developments with Aros Sojaprodukter AB in Sweden (Interview). *SoyaScan Notes.* Aug. 23. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** The Aros plant has been moved from Örsundsbro (just southwest of Uppsala) to Tingsryd in the south of Sweden. Aros is working with Trensums Musteri, a juice company located in Tingsryd, located 20 or 30 minutes miles to the north of the southern seaside city of Karlshamn. Both Tingsryd and Karlshamn are located in Blekinge County. Ted and his family will continue to live in Örsundsbro, but his office and the company administration will be moved to Enköping, about 15 minutes from his home. He will continue to commute to Tingsryd when necessary. The company is now getting ready to sell soymilk equipment to interested buyers.

Nutana in northern Europe is now being sold and Ted's company is trying to buy it. Ted first learned (in Copenhagen, Denmark) that Nutana was going to be sold from Jon? Olsen, the marketing director for Danska Nutana. Only recently did he learn that it could be sold to a company other than Hundedogs? Adventista. Address: CEO, Aros Sojaprodukter, Bergsvagen 1, S-19063 Orsundsbro, Sweden. Phone: 0171-604 56.

9899. Sams, Craig. 1991. Pioneering macrobiotics and soyfoods in England, 1967-1979 (Interview). *SoyaScan Notes.* Aug. 24. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Craig and Greg Sams were both born in America. Their mother is from Nebraska and their father from Pittsburgh, Pennsylvania. Greg is 4 years younger than Craig. During the 1950s and 1960s the family went to England periodically, largely because Craig's father worked in England as a historian for the U.S. Air Force. In 1965

© Copyright Soyinfo Center 2013

Craig took a year off from college, traveled around the Indian subcontinent, and got hepatitis. Upon returning to the Univ. of Pennsylvania in Philadelphia for his final year, he fell in with 3 followers of macrobiotics and got interested in macrobiotics. In about Feb. or March of 1966 he went to the Paradox, a macrobiotic restaurant in New York and decided that he wanted to start a similar restaurant in London. In late 1966 Craig's brother, Greg, fell out of a tree in Berkeley, was paralyzed from the waist down and was confined to a wheel chair–as he still is.

In Feb. 1967 Craig started a restaurant named the Macro at 10-A Airlie Gardens, Holland Park, London. Yoko Ono, John Lennon's wife, was one of the first regulars. She was the first person Craig met in London who was aware of macrobiotics; she had learned about it in Japan. But Craig had to close Macro after 2 months because of zoning problems. In mid-1967 Greg joined Craig in London and in Dec. 1967 they opened a new macrobiotic / natural foods restaurant named Seed at 136a Westbourne Terrace, W.2, London–a few minutes walk from Paddington Station. Soyfoods were a part of the menu. They got Kikkoman shoyu, shiro-miso, and Hatcho miso from a Japanese import company named Mikado-ya, which was run by Japanese in southeast London out of the basement of a house and supplied Japanese embassies in Europe and Africa. At that time Craig thinks there were no Japanese restaurants or retail stores in London. Seed soon started to import Hatcho and barley (mugi) miso from Muso in Japan. Seed never used any of Lima's soyfood products. Seed also used fermented tofu; they mixed it with tahini, spread it on bread, and called it a Rarebit–an alternative Welsh Rarebit, which is cheese on toast. Seed purchased fresh tofu and [mung] bean sprouts from a Chinese company named Lung Kee on Fermoy Road, Paddington, London, right on the banks of the canal. It was run by one Chinese man who employed about 15 West Indian / Jamaican women who made the foods. Bean sprouts accounted for most of Lung Kee's business. Craig has no idea when Lung Kee started making tofu. In addition to its mainstay, brown rice, Seed served the tofu diced in miso soups, or sauteed with vegetables such as nitsuke carrots, etc., or as a dessert with tofu and apple concentrate whipped with fruit to a thick creamy consistency and chilled. The restaurant did well. It was soon famous for its "groovy vibes" and its free meal of brown rice, veggies, and green tea for those who could not afford to pay. Although the Sams brothers were not "proponents of the brown rice and marijuana regimen" (as Kotzsch had implied in 1985, p. 221), Seed was a favorite hangout for a host of '60s counterculture celebrities such as The Beatles, The Rolling Stones, Yoko Ono, and others. Americans such as Bill Tara, Peggy Taylor, Eric Utne, and Paul Petrofsky also worked there. Then people began to ask the Sams if they could buy staple foods from the restaurant. So food was soon packaged and sold over the restaurant counter.

In about March 1969, to meet the growing consumer demand, the Sams brothers opened Ceres, a natural foods / macrobiotic retail store, at 8-A All Saints Road, 2 bocks from and parallel to Portobello Road. Ceres also did extremely well, with Greg and various managers having the main responsibility while Craig focused on the restaurant. Soyfoods retailed by Ceres included Hatcho and mugi miso, tamari, fermented tofu, and fresh tofu sold in trays immersed in water. Eventually Bill Tara and Peter Bradford took over management of Ceres. Soon other people began to open restaurants and natural foods / macrobiotic stores like Ceres in college towns in England: Infinity Foods in Brighton (at Sussex University; Peter Deadman, Robin Bines, Simon Bailey were involved), Arjuna in Cambridge, Harvest in Bath, and On the Eighth Day in Manchester. In 1970 the Sams developed a large mobile tent macrobiotic restaurant and made a lot of money by taking it to various big rock festivals.

In Aug. 1970 Harmony Foods was established as a natural foods / macrobiotic import, product development, and distribution company. The money from the mobile restaurant was used to rent a building at No. 10 St. Luke's Road in London (only about 300 yards from the Ceres shop), and to import enough products to start a line / range of products under the Harmony Brand (the logo was a yin / yang sign). They stored and packed these in basement at Harmony Foods. Starting in 1969, the first imports for the restaurant and for Ceres had came from Muso in Japan, and from a macrobiotic society in Vietnam came red rice and green tea. In 1970 they started to import 4-5 tons of organically-grown brown rice from The Camargue in the south of France. Grown by the same man who grew brown rice for Lima Foods, it became the company's main product. Harmony Foods started out with about 20 customers–16 conventional health food shops and 4 of the new wave of natural foods stores (which the natural foods stores called "grain shops"). Wholefood of Baker Street was the pioneer "organic shop" that started in the 1950s. They were part of the Soil Association, so organic growers used it as an outlet for the first organically grown produce retailed in England. They soon became an important outlet for Harmony Foods as well. In addition a man named Ivan Seruya would collect food (mostly produce) from the organic growers and deliver it to restaurants like Seed and Manna in London. One other product that was grown organically was Pimhill Flour. Harmony Foods was a pioneer in developing new organic growers (such as Stewart Patterson who farmed wheat with horses) and in putting organically grown foods into retail outlets.

By Aug. 1970 Harmony Foods was distributing soyfoods, including Hatcho miso, mugi (barley) miso, and tamari from Muso in Japan–imported in wooden kegs and packed in glass jars. These were the first miso and shoyu products available at retail outlets in England.

© Copyright Soyinfo Center 2013

In Jan. 1971 Harmony Foods outgrew its building on St. Luke's Rd. and moved into a larger warehouse at 191 Latimer Road (Maidenhead), a former cosmetics factory. Just before the move, Bill Tara informed the Sams that he was in London to set up Erewhon Europe to compete with Harmony. The restaurant, Seed, was sold in the spring of 1971 and reopened as The Magic Carpet. In 1971 Ceres was renamed Ceres Grain Shop and relocated at 269 A Portobello Rd.

In mid-1972 the shop next to Ceres closed. The Sams took it over and made it into Ceres Bakery. It transformed large amounts of wheat, organically grown in England, into unique and delicious naturally leavened breads. The enzymes in the freshly-milled flour helped to leaven the bread.

When they closed down Seed, the restaurant on All Saints Road, there was still a demand for simple macrobiotic food, so in about Feb/March 1971 they opened Green Genes, a sort of macrobiotic workingman's café on a much smaller scale. Each person picked up her or her food from a counter; there was no table service. It was open for lunch only whereas Seed had been open only in the evenings.

In 1972 they began to publish a magazine titled *Seed: The Journal of Organic Living.* Bill Tara and Peter Bradford helped with it occasionally. It continued for 6 years. That same year, above Ceres Bakery, started Ceres Bookstore, which only last for 1½ years.

Meanwhile Bill Tara and Peter Bradford had expanded and transformed Ceres Grain Shop, but in a way that led to extensive shoplifting, so it was scaled back to near its original size and finally sold in 1979 to Jack Weller. By that year all efforts and resources were focused on Harmony Foods, the wholesale business. Peanut butter (non-organic), the first product manufactured by Harmony, was now in two of the leading supermarket chains, Safeway and Waitrose. Address: 269 Portobello Road, Notting Hill, London W11 1LR, England. Phone: 071-229 7545.

9900. Drosihn, Bernd; Hess, Albert; Nagel, Christian. 1991. The tofu industry and market in West Germany (Interview). *SoyaScan Notes.* Aug. 25. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Bernd is in the USA with Albert Hess of Das Tofuhaus. They just had a nice visit to Northern Soy in Rochester, New York. Svadesha Vegetarische Feinkost bought Byodo Naturkost in April 1991 and is now in financial trouble because the owners do not understand the tofu market; they are trying to sell Byodo, which is now also having trouble.

Since Huegli bought Soyastern and Yamato, the two companies have steadily lost market share. For the past two years, Soyastern's quality has been very poor, and they have sometimes been unable to fill orders–but that has improved somewhat since they were bought by Huegli (a Swiss company). In 1988 Soyastern alone had 35-40% of the German tofu market, and now it is 20-25%. Soyastern's actual output of tofu stayed about constant but the market as a whole is growing well. Yamato has always been well organized. Another problem is that Huegli is seen by natural food store owners as a "big food company" and these owners do not want to support such companies by buying from them.

Roughly 20 tonnes/week of tofu are now made in Germany, and that is growing at 10-15% a year. Of total sales, roughly 35% is plain tofu and 65% is tofu products. There are many more tofu products. Tofu and tofu products now have much more shelf space in food stores, and many stores that used to carry only one brand of tofu now carry 3-5. Roughly 90% of the tofu sold in Germany is made with organically grown soybeans; Hensel is one major company whose tofu is not organic. A rapidly growing proportion of these organic soybeans are now grown in Europe. The main countries supplying organic soybeans for tofu in Germany, in descending order, are: USA, France, Austria, Hungary, and Germany (the latter grows 20-30 tonnes/year). Some smaller companies (such as Taifun, Albert Hess of Das Tofuhaus, and Christian Nagel) have all been growing well. The largest tofu manufacturers in Germany are: (1) Huegli with 40% of the German tofu market–composed of Soyastern, Yamato, and KMK–is by far the biggest; they also have some brands in the Reform market, and in canteens. Hensel, which has strong connections with Huegli, is not a manufacturer; their tofu is produced at KMK (Kurhessische Molkerei Kassel) in Kassel, which is owned by Huegli. In early 1990 Huegli purchased Heirler, the biggest distributor of fresh health foods in West Germany, and also a brand name in 2,000 Reform Houses in Germany; (2) DE-VAU-GE (GranoVita brand), with 10% of the market, is big in the Reform market; (3) Christian Nagel Hamburg Tofu Manufaktur, 7-8%; (4) Geestland in Bremerhaven, 7-8%; (5) Das Tofuhaus in Lautersheim, 7-8%; (6) Taifun; (7) Svadesha; (8) Soto. Bernd's company is still small but he now makes much more tofu than tempeh, and his sales are growing fast. He got his tofu equipment from Tofurei Jutta Schoenemann near Nuremberg–which was run by a housewife and her husband. They bought their equipment in Japan, made 100-200 kg/week of tofu, and went out of business about 2 years ago. He is not aware of any companies that have gone out of business during the past year, although Svadesha and Byodo are having a hard time.

A major change is that KMK is now producing the tofu for Soyastern and Yamato. Yamato's plant will be closed at the end of this year. It is less expensive for Huegli to produce all of their tofu at one place. Thus by early 1992 KMK will be the largest tofu plant in Germany. It is not clear what will happen to Klaus Gaiser; he does not want to move away from Tuebingen. Thomas Karas is probably living in Cologne; he was very lucky to be able to sell his company to Huegli though he had debts of about 1 million marks. Huegli assumed only one-fourth of these debts. Soyastern's

© Copyright Soyinfo Center 2013

two main sources of capital (one bank and the man who sold him the chicken factory) took over one-fourth of the debt. Another one-forth was taken over by his supplier of soybeans, and Thomas took on the last one-fourth himself.

The price of tofu in the USA is much lower than in Germany, except for Heuschen-Schrouff tofu, which is sold in Asian food stores. Tofu sold in Asian food stores in Europe is generally much less expensive than that sold in natural food stores. Huegli is trying to recover the market share they have been losing by selling their tofu less expensively; this will probably bring down all tofu prices in Germany–but Bernd hopes it does not fall to the American level.

The organic German Soyfoods Association has had a struggle. People are now encouraging Klaus Gaiser to establish an association of all soyfoods manufacturers in Germany. Another big question is how soyfoods manufacturers will relate to the unified European Community in 1992. Address: 1. Founder and president, Viana Naturkost GmbH, Cologne; 2. Owner, Das Tofuhaus; 3. Owner Hamburger Tofu Manufaktur. All: Germany. Phone: (02233) 41323 or 221-121175.

9901. Drosihn, Bernd. 1991. Tempeh in West Germany (Interview). *SoyaScan Notes.* Aug. 25. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Viana now makes more tofu than tempeh, but their tempeh business is also growing nicely. They started pasteurizing their tempeh about 2 months ago, and that has helped sales. Byodo Naturkost was the first company to make tempeh in Germany, and tempeh has been their flagship product, but their production seems to have decreased substantially. Christian Nagel also makes tempeh. Address: Founder and president, Viana Naturkost GmbH, Cologne, Germany. Phone: (02233) 41323 or 221-121175.

9902. Drosihn, Bernd. 1991. The tofu industry in the Netherlands (Interview). *SoyaScan Notes.* Aug. 25. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** There are four major tofu manufacturers in the Netherlands. The first three are in the Asian market: 1. Heuschen-Schrouff. 2. Soy Lin–whose brand is Vanka-Kawat. Bernd is sure that "Lin" is spelled like this, not "Linn." 3. Tempé Produkten B.V. (Tempeh Products Inc.) in Kerkrade (owned by Robert Van Dappern). 4. Morgenstond–the only company in the natural foods market. Bernd saw their products 3 weeks ago. Address: Founder and president, Viana Naturkost GmbH, Cologne, Germany. Phone: (02233) 41323 or 221-121175.

9903. Skow, John. 1991. Itty-bitty. *Time.* Aug. 26.
• ***Summary:*** A cute review of the book *Oh-oh,* by Robert Fulghum. "'Hey, honey, do we really need any more philosophical tofu?' (Henry Featherless and his wife Glenda are browsing in the Just Barely Books store at the shopping mall...)"

9904. Kane, Marion. 1991. The cutting edge: Sink teeth into vegetarian fare. *Toronto Star* (*Ontario, Canada*). Aug. 28. p. C3.
• ***Summary:*** At the seventh annual Vegetarian Food Faire at Harborfront's York Quay Centre, there will be plenty of mouth-watering food and info to get your teeth into. But there won't be any meat.

The Faire will be held on Sept. 7 and 8, from 11 a.m. to 6 p.m., sponsored by the Toronto Vegetarian Association. It "addresses what the group calls the 'four cornerstones of a vegetarian lifestyle: health, animal rights, environmental concerns and the elimination of world hunger." Soy City Foods will be there to prepare barbecued veggie burgers, tempeh stew, vegetable curries, tofu pot pies, and non-dairy brownies.

Dr. David Jenkins, of the Univ. of Toronto's nutrition department will explain the nutritional benefits of a vegetarian diet.

A large photo shows Penny Cassel of Soy City Foods as she shows off her Tempeh Reuben sandwich, a vegetarian delight. "Tempeh is an Asian food prepared by fermenting soybeans."

9905. Maharashtra State Financial Corporation (MSFC). 1991. Display ad: Industrial units / property for sale on "As is where is basis." *Times of India* (*The*) (*Bombay*). Aug. 29. p. 4.
• ***Summary:*** "Property taken possession under Section of SFC's Act."

In the section on "Chemical / Pharmaceutical / Food industries," No. 10 is: "S. No. 57, H. No. 3, & S. No. 79, H No. 6. Village Kaman, Vasai Dist., Thane.

(Property of M/s Mishra Soya Food Products P Ltd.).

"Paneer from soya milk.

"Lease hold land: (Unexpired lease period of about 30 years) of 9,510 sq meters.

"Building: 294 25 square meters.

"Machinery: Japan make imported automatic pressure cooker plant & continuous roller extractor, pneumatic press with perforated SS [stainless steel] trays. Elgi make air compressor, boiler, water cooler. SS containers. M.S. tanks. 10 KVA generator. Mahindra Tempo of 2T Cap with closed body & rolling shutters etc.

Note 1. This appears to be the plant announced in this newspaper on 28 Dec. 1987. The product was made by Mishra Soya Food Products (whose plant was at Vasai, Bombay) and marketed by Amit International. The basic equipment was imported from Takai Tofu Mfg. Co. of Japan. Mishra was apparently unable to survive making tofu.

Note 2. This ad ran at least 7 times in this newspaper; the last time was 15 Feb. 1992 (p. 21).

9906. Soyfoods Center. 1991. Soyfoods information catalog: Publications by William Shurtleff & Akiko Aoyagi Shurtleff [mail order]. P.O. Box 234, Lafayette, CA 94549. 20 panels. Aug. 30.
• ***Summary:*** This catalog, folded like a road map, is printed with dark blue and pea green ink on white paper. This is the first catalog in which the prices are printed on a separate sheet of paper. 5,000 copies were printed by AMP Printing Inc. in Pleasanton, California.

Note: This was the last catalog Soyfoods Center ever had printed on paper. Future catalogs appeared on the Center's website. Address: Lafayette, California. Phone: 415-283-3161.

9907. **Product Name:** [Tofu, Plain Soymilk, Okara].
Manufacturer's Name: Alfa Bio spol. s r.o.
Manufacturer's Address: Horná 37, Banská Bystrica, Slovakia. Phone: 088/242 35.
Date of Introduction: 1991. August.
New Product–Documentation: Letter from Anna Kubová and Ján Vavrac. 1993. Oct. This company makes tofu in Slovakia. An enclosed 2-page leaflet says: "Tofu = Zdravie, silna, línia" which means "Health, strength, and silhouette [literally "line"]." It describes what tofu is, how it is made, what ingredients it contains, how it can help promote good health, and general ways of using tofu plus six recipes.

Letter and labels (for tofu and okara) sent, and form filled out by Jan Lunter of Alfa Bio. 1994 Jan. 10. This company was founded in early 1991 by Jan Lunter, a devoted vegetarian, with the goal of manufacturing, exporting, importing, distributing, and selling healthy foods. Alfa Bio company is presently owned by Jan Lunter and Radko Petrovic. They were the first company to make tofu or soymilk in Slovakia, and also in the former Czechoslovakia. After the "velvet revolution" in 1989 an opening was created for private enterprises, and the Czech population finally began to realize the negative health effects of the high-cholesterol, high-protein diet to which it had been exposed. Today Alfa Bio makes 15 tons/month of tofu and 2 tons/month of okara. They learned how to make tofu initially from books, including *The Book of Tofu* by Shurtleff and Aoyagi. Additional information came from some Austrian tofu makers as well as some Japanese one (Tokyo Tofu, etc.) during their trip to Japan in the summer of 1993.

Label for tofu. 6.5 by 6 inches. Plastic pouch. Red, black, green, and yellow on clear plastic. 100 gm. 87 calories.

9908. **Product Name:** Mushroom and Tofu Stroganoff.
Manufacturer's Name: Culture Foods Ltd.
Manufacturer's Address: 4 All Saints Workspaces, 75 Raleigh St., Nottingham NG7 4DL, England. Phone: (0602) 788963.
Date of Introduction: 1991. August.
Wt/Vol., Packaging, Price: 12 oz (340 gm) aluminum foil container with paperboard sleeve. Retails for £1.69.
How Stored: Frozen.
New Product–Documentation: Label sent by Alison J. Clark of Culture Foods Ltd. 1991. Aug. 23. 5.76 by 4.5 inches. Orange and turquoise blue on white. Heavy paper sleeve. Logo resembling the Vegetarian Society's "V" but with a sunflower growing out of it. "No animal ingredients. Marinated tofu in a creamy mushroom sauce. No artificial additives of any kind. Tofu is a protein rich soya bean curd." A letter adds that the company, a worker's co-operative, sold its first order on 8 Aug. 1991.

9909. **Product Name:** Matar 'Paneer' (With Marinated Tofu).
Manufacturer's Name: Culture Foods Ltd.
Manufacturer's Address: 4 All Saints Workspaces, 75 Raleigh St., Nottingham NG7 4DL, England. Phone: (0602) 788963.
Date of Introduction: 1991. August.
Wt/Vol., Packaging, Price: 12 oz (340 gm) aluminum foil container with paperboard sleeve. Retails for £1.69.
How Stored: Frozen.
New Product–Documentation: Label sent by Alison J. Clark of Culture Foods Ltd. 1991. Aug. 23. 5.76 by 4.5 inches. Orange and turquoise blue on white. Heavy paper sleeve. Logo resembling the Vegetarian Society's "V" but with a sunflower growing out of it. "No animal ingredients. Marinated tofu and green peas in an aromatic tomato sauce. No artificial additives of any kind. Tofu is a protein rich soya bean curd." A letter adds that the company, a worker's co-operative, sold its first order on 8 Aug. 1991. The company also makes a Mushroom and Cashew Nut Roast; its only soy-related ingredient is "shoyu."

9910. **Product Name:** Veggie Life Burgers (Vegan Burgers).
Manufacturer's Name: McLaud Partnership. Later renamed Laudisio & McClain Partnership.
Manufacturer's Address: Made at Kitchens, Inc., San Rafael, CA 94901. Phone: (415) 927-0236.
Date of Introduction: 1991. August.
Ingredients: Brown rice, tofu, green peppers, onions, mushrooms, carrots, sunflower and sesame seeds, oat flour, vital wheat gluten, tamari, garlic.
Wt/Vol., Packaging, Price: 2 patties per 7 oz. retail pack.
How Stored: Refrigerated.
New Product–Documentation: Letter (typed on letterhead) from Steve Demos, owner of White Wave, to Leonardo Laudisio of Veggie Life, 46 Lucky Drive, Greenbrae, California 94904. 1992. July 20. Demos thanks Laudisio for a very enjoyable dinner with wine last week and summarizes their discussion. Veggie Life would like White Wave to manufacture, private label, and vacuum pack its baked

© Copyright Soyinfo Center 2013

and frozen Veggie Burger. White Wave believes that it can produce the product for about 16-29% less than it presently costs Veggie Life. Veggie life will supply all labels and boxes.

Natural Foods Merchandiser. 1993. May. p. 6. "White Wave purchases Veggie Life." In March, White Wave, a soyfoods manufacturer in Boulder, Colorado, acquired the rights to manufacture Veggie Life vegetarian burgers from Laudisio Veggie Life, also based in Boulder, for an undisclosed sum. "Laudisio president Leonard Laudisio has been retained by White Wave as corporate chef to market the tofu company's products to food service providers."

Talk with Leonardo Laudisio. 1993. May 21. He started this company in San Rafael, California, about 3 years ago and introduced Veggie Life in the summer of 1991. The original recipe was developed in New York and passed on to him. Originally tofu was the main ingredient, followed by brown rice. But some customers thought they would not like tofu, so Leonardo made brown rice the main ingredient, followed by tofu and vital wheat gluten. Initially he sold the product at Grateful Dead concerts (he followed the group around) and at performances sponsored by Bill Graham Presents.

Labels sent by Leonardo Laudisio. 1993. June 15. A 1-page photocopied leaflet (black on white) titled "Veggie Life Burgers: Bulk Price List" states that there are 9 units per vacuum pack, each 3.5 oz. and 4 inches in diameter. The price per pack is $6.75. The product has a 30-day cold shelf life and is freezable. A label 4½ by 3¼ inches, black on white photocopy, bears the name Veggie Life Burgers: The healthy vegan* alternative. It lists the ingredients shown above, * = No eggs, meat, or dairy. Net weight per patty 3.5 oz. "Produced in Kitchens, Inc.; San Rafael, CA 94901. McLaud Partnership (415) 927-0236. Note: McLaud is a name combining McLain and Laudisio. McLain was a person who helped in formulating the recipe, but who never actually became Laudisio's partner; he could not stand the risk.

The second label is 3.75 by 3.25 inches. Black on white photocopy. "The healthy vegan* alternative. Complete protein. Pre-baked, just heat in toaster, microwave, oven, on grill or barbecue. Perishable keep frozen or refrigerated. No preservatives, artificial colors, or colors."

The third label, 4.5 inches in diameter, printed two on glossy leaflet, is similar to the second, except that the company name is now Laudisio & McLain Partnership. Below the label is written: "Veggie Life Burgers for a healthy body and environment. Colorado agent: 303-231-9938. California agent: 927-0236. Distributed by Natural Food Purveyors (415) 289-9522." These patties were always retailed in 2 patties per pack. In the beginning they were sold fresh in the dairy case; later they were sold frozen.

The fourth label is 3 5/8 inches diameter. Self adhesive. Yellow and green, with a grain symbol curving around each side. The product name, subtitle, phone number, and ingredients are the same except that the "organic tofu" [not the soybeans] is said to be "Grown in accordance with California Organic Foods Act 1990." The company now seems to be named "Veggie Life" and near the bottom of the label in small letters is written "Leonardo Laudisio."

9911. McSweeney, Daniel. 1991. Consumer survey 1991. *Whole Foods.* Aug. p. 34-36, 39, 41.
• ***Summary:*** This survey was conducted at 18 natural foods stores throughout the USA. Product purchases. Percentage of respondents who purchased a type of product at a natural foods during the past 12 months: Cheese substitute 28%, meat 34%, miso 34%, sea vegetables 33%, soy milk 51%, soy sauce 36%, tamari 52%, tempeh 33%, tofu 57%, yogurt (dairy) 64%.

9912. Moll, Lucy. 1991. All soy is not created equal. *Vegetarian Times.* Aug. p. 20.
• ***Summary:*** The iron in soy products comes in a form that is difficult for the body to use. However a new study shows that the iron in some soyfoods is more readily absorbed by the body than the iron in others–although the mechanism is not yet clear.

South African researchers divided 242 women into seven groups and fed each one a different type of soyfood: regular tofu, silken tofu, miso, tempeh (fermented), natto (fermented whole soybeans), fermented tofu (occasionally called sufu), and soy flour.

Each meal contained 3-4 mg of iron and the meals were consumed daily for two weeks. Then the researchers checked the iron levels in the women's blood.

Significant differences were found. "The women who ate silken tofu, tempeh, natto or miso had much higher iron levels than the women who ate regular tofu, fermented tofu, or soy flour."

9913. **Product Name:** Nasoya Vegi-Dressing (Spoonable) [Poppy Seed Mustard, Russian Delight, Creamy Sesame, or Sicilian Garlic].
Manufacturer's Name: Nasoya Foods, Ltd.
Manufacturer's Address: 23 Jytek Park (P.O. Box 841), Leominster, MA 01453. Phone: 617-537-0713.
Date of Introduction: 1991. August.
Wt/Vol., Packaging, Price: Glass jar.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: Ad (full page, color) in Natural Foods Merchandiser. 1991. Sept. p. 101. "Great taste without cholesterol!" The labels for each of the four new flavors are clearly shown. "Naturally good from Nasoya." Order toll-free: 1-800-229-8638. Each product is in a wide-mouth jar with a metal lid. Though each product is tofu-based, the word "tofu does not appear on the front panel.

Talk with Hilton Tsui of Vitasoy. These products were introduced in Aug. 1991. They represent an extension of

the popular "pourable" line of tofu dressings in tall narrow-mouth jars. Of those, Nayonaise is the best seller.

9914. Nichii Company of America, Inc. Mycal Group. 1991. Is your tofu the right tofu? Lite is right for the 90's (Leaflet). Torrance, California. 1 p. Front and back.
• ***Summary:*** This red, green, and white leaflet was sent to most or all natural food retail stores in America on 22 August 1991. An illustration (line drawing) shows a large cake of "Natural Foods Store Tofu." The text reads: "Only tofu made from *Microsoy flakes* is right for the 90's. Because only tofu made from *Microsoy* flakes is: Lower in calories. Lower in lipids (fat). Higher in protein. And longer lasting on your shelf... than tofu made from ordinary soybeans. So tofu made from *Microsoy flakes* does indeed offer your health conscious customers substantial benefits, while you can benefit from increased sales, increased store traffic, rapid turnover, and customer satisfaction... How do you get the tofu that's right for the 90's on your shelves? Make sure your supplier is using *Microsoy flakes.*

A footnote states "All results confirmed by independent testing at Iowa State University, Food Science and Human Nutrition Department." Note: America is truly in need of a tofu containing lower calories and lower fat. Address: 23440 Hawthorne Blvd., Suite 140, Torrance, California 90505. Phone: 213-791-0010.

9915. **Product Name:** The Healthy Wrap (With Rice, Veggies, & Tofu).
Manufacturer's Name: Organic Foods, Inc.
Manufacturer's Address: 534 Smithtown Ct., Excelsior, MN 55331. Phone: 612-474-3989.
Date of Introduction: 1991. August.
Ingredients: Incl. tofu.
New Product–Documentation: Talk with Donna Stacey. 1997. Oct. 6. Their tofu factory is in Victoria, Minnesota, but mail is not delivered there, so their mailing address is at their home (534 Smithtown Ct.). Their first and main product line was The Healthy Wrap, a vegan/vegetarian sandwich, wrapped in a chapati and launched in August 1991. Originally it was made with rice, veggies, and tofu–the tofu being purchased from another company. But they had difficulty getting the quality tofu they wanted, so they started making their own tofu and using it in The Healthy Wrap in August 1997.

9916. Pickarski, Ron. 1991. Friendly foods: Gourmet vegetarian cuisine. Berkeley, California: Ten Speed Press. 277 p. Illust. Index. 23 cm. [23 ref]
• ***Summary:*** This is a stylish vegan cookbook, with a wealth of sophisticated and delectable soyfoods recipes. The author recommends only high-quality ingredients. Brother Ron grew up in Michigan and during high school spent time in the restaurant business flipping hamburgers. Later he became a Franciscan monk (OFM). A look at his own health revealed the need to change his diet. So Brother Ron changed to a natural vegetarian diet and experienced weight loss and renewed energy. Now he considers himself a food missionary–helping people transform their lives through food. Friendly foods are "foods that are friendly to our bodies, our pocket books, our busy schedules, and our environment."

In the section on dairy-like products, the author recommends soy milk and some "tofu ice creams." He recommends use of soy cheeses sparingly since they are high in fats (especially the softer types). He considers nondairy creamers to be a less healthful than their dairy counterparts, since they are high in saturated fats and artificial additives. "Typically, nondairy creamers contain corn syrup solids, partially hydrogenated vegetable oil (including coconut oil, cottonseed oil, palm oil, or palm kernel oil), sodium caseinate, sodium phosphates, mono- and diglycerides, sodium silico aluminate, and artificial color. I do not consider this type of product to be an example of a high-quality food."

Soy-related recipes include: Marinated vegetables with marinated tofu (p. 41). Shish kebabs (with marinated tofu, p. 42). Marinated tofu with scallions (p. 43). Gefilte tofu with horseradish and charoset sauce (p. 49-50). Zucchini bisque (with tofu, p. 66). Tofu wakame salad (p. 82). Tofu cottage cheese (p. 89). Vegan sour cream (with soy milk, p. 90). Soy mayonnaise (with tofu, p. 90). Silken tofu mayonnaise (p. 91). Lemon cream dressing (with tofu, p. 92). Oil-less miso dressing (with soy milk and white miso, p. 96).

In the chapter on entrees, there are detailed descriptions of tofu, tempeh, and seitan. Soysage (with cooked soybeans and soymilk, p. 105). "Meatballs" (with cooked soybeans, p. 107). American loaf (with silken tofu, p. 112-13). Tofu spinach pie (p. 120). Auberge Hanfield pie (with silken tofu, p. 121). Russian vegetable pie (with silken tofu and tofu cottage or ricotta cheese, p. 122). Greek moussaka (with tofu topping, p. 128-9). Sweet and sour tempeh (p. 133). Southern fried tofu (p. 134). Tofu Swiss steak (p. 135). Tempeh stew (p. 136). Thanksgiving day tofu (p. 137). Tofu Jamaican run down stew (p. 138). Tofu paneer (p. 139). Seitan (p. 140-43). Seitan à la Normandie (p. 144). New England boiled dinner (with tofu or seitan, p. 145). Seitan Parmesan (with vegan cheese made with tofu, p. 147-48). San Francisco stir-fry (with seitan or tofu, p. 151). Berner platte (with protein accompaniments made with tofu and Soysage, p. 155-56). Vegan Béarnaise sauce (with silken tofu, p. 161). Miso sauce (p. 164-65). Tahini lemon sauce (with silken tofu, p. 165). Steamed kale with lemon miso sauce (p. 176).

In the dessert section, there is mention to tofu chocolate as an alternative to chocolate. Carob cake (with tofu chocolate, p. 217). Chocolate cream couscous cake (with filling made with silken tofu, p. 220). Silken tofu chocolate "cheesecake" (p. 221). Key lime shamrock torte (with silken tofu, p. 222). Raspberry sabayon sauce (with silken tofu,

© Copyright Soyinfo Center 2013

p. 232). Tofu chocolate "buttercream" icing (p. 234). Tofu chocolate ganache (p. 234-35). Mocha grain coffee (with any grain coffee substitute, cocoa, brown rice syrup, and soy milk, p. 238). Christmas soy nog (with soy milk and lecithin granules, p. 238).

The last section of the book, titled "The Culinary Olympics," gives recipes that Brother Ron prepared while competing in these Olympics, starting in 1978. These Olympics are held every four years at Frankfurt, Germany, by the International Cooks Society. The American Culinary Federation is the U.S. organization that promotes the competition. "In 1978 I won a gold medal in the national competition, which qualified me to compete in the 1980 Culinary Olympics. In 1980 I founded the American natural foods team and, with this team, international competition to gain widespread competition for vegetarian cuisine. In that year, I became the first professional vegetarian chef to compete in the Olympics and win a medal for totally vegetarian foods. I also competed in 1984 and 1988... My team won bronze and silver medals in all three years that we entered the competition." Soy-related recipes dominate this section, and include: Baked tofu pâtés (spinach, tarragon, or carrot, p. 241-42; won a bronze medal in 1984). Tofu and sea vegetable quenelles (beet, spinach, or carrot, p. 243-45; won a silver medal in 1988). New York cima roll (with tofu, p. 248-49; won a silver medal in 1988). Tofu seitan Wellington (p. 250-51; won a bronze medal in 1984). Vegan London broil (with seitan, miso, and tamari, p. 251-52; won a bronze medal in 1984). Southern blackened tempeh with tomato-apricot-ginger coulis (p. 253-54; won a silver medal in 1988). Carrot cream in squash shell (with soy milk and tofu, p. 255-56; won a silver medal in 1988). Chocolate squash confection (with Tofu Chocolate Ganache, p. 259-60; won a silver medal in 1988). Address: O.F.M., St. Anthony's Shrine.

9917. **Product Name:** Naturally Tofu Ice Cream (Frozen Dessert Mix) [Strawberry].
Manufacturer's Name: Sovex Natural Foods, Inc. (Marketer-Distributor).
Manufacturer's Address: 9104 Apison Pike, Box 310, Collegedale, TN 37315. Phone: 800-227-2320 or 615-396-3145.
Date of Introduction: 1991. August.
Ingredients: Crystalline fructose, soy oil, malto-dextrin, corn syrup solids, tofu, sodium caseinate [from cow's milk], natural strawberry flavors, beet juice powder, sea salt, soy lecithin, cellulose gum, guar gum, xanthan gum, carrageenan.
Wt/Vol., Packaging, Price: 16.7 oz can. Later 22 oz can.
How Stored: Shelf stable.
New Product–Documentation: Ad in Natural Foods Merchandiser. 1992. December. Soyfoods 2000 (Special supplement insert, p. 5). Shows 2 cartons of Tofu Ice Cream mix (vanilla and strawberry flavors). Talk with Sovex. 1992. Nov. 30. The strawberry flavor was introduce in about the summer of 1991.

Notice on side panel of Better than Burger? package. 1993 Oct. "Have you tried Naturally Tofu products: Better Than Milk? Ice Creme?"

Product with Label (Strawberry) and leaflet sent by Sovex. 1993. Oct. 12.

9918. Stepaniak, Joanne; Hecker, Kathy. 1991. Ecological cooking: Recipes to save the planet. Mobilization for Animals, Pennsylvania, Inc., P.O. Box 99762, Pittsburg, PA 15233. 228 p. Index. 23 cm.
• ***Summary:*** This vegan cookbook contains 500 recipes, including many using tofu, tempeh, miso, and soymilk. Almost all the recipes are uncomplicated, and the directions are short and simple to follow. Many can be prepared quickly. Sales and proceeds benefit Mobilization for Animals. Reviewed by Debra Wasserman in *Vegetarian Times* (May 1992, p. 97).

Note: The author self-published this book for a while, then the Book Publishing Co. in Summertown, Tennessee, became the publisher. Address: Pittsburg, Pennsylvania. Phone: 412-232-5106.

9919. Spear, Bill. 1991. Soyfoods in Yugoslavia (Interview). *SoyaScan Notes.* Sept. 7. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Bill just returned from a 1-week macrobiotic summer camp at Kumrovec, Croatia, Yugoslavia; 75 people plus staff attended–during the current civil war. Last year he attended the same event, along with 600 other people. There are presently an estimated 5,000 to 10,000 macrobiotic people in Croatia. The major activity is in Zagreb. Croatia has most of the money and industrial productivity in Yugoslavia and that is a major reason that Croatians want independence. The Serbians are a relatively poor majority.

There are two commercial and at least three home-based soyfoods manufacturers in former Yugoslavia. The best contact is Ivan Jugovac (about 40 years old), owner of Anyo located at Skolska Ulica 43A, 51215 Kastav (near Rijeka), Croatia, Yugoslavia. Ivan knows the names of the other soyfoods companies in Yugoslavia and is part of a loosely-knit soycrafters network there. Anyo, which started about 2-3 years ago, makes 250-300 kg/week of tofu (100 kg/day in 4 or 5 batches) and 150-200 kg/week of seitan. From the tofu they also make smoked tofu, grilled tofu, deep-fried tofu, and tofu spread (with okara). The tofu is made in a 100-liter steam jacketed kettle and the nigari is imported from Japan. Their soybeans (which are not organically grown) come from Becej (pronounced BECH-ay) in Serbia, Yugoslavia. The business is doing well. Ivan makes natto for his personal use. He wants to start making miso and amazake commercially, and is looking for sources of koji and koji starter.

© Copyright Soyinfo Center 2013

A second soyfoods shop in Belgrade, Serbia (name, address, and contact person unknown) makes tofu, seitan, and tempeh on about the same scale as Anyo. It probably started at about the same time as Anyo. There are 1-2 small tofu shops in Zagreb, and one in Novi Sad, Serbia; in each, the tofu is made in a home kitchen. In Slovenia, a tofu company that will be the largest in Yugoslavia is nearly ready to begin operation in Slovenia, but the current civil war has delayed their opening. They plan to make 100 kg/day of tofu.

The man who knows the most about soyfoods in Yugoslavia is Zlatko Pejic, a peace activist who is president of the Society for the Improvement of the Quality of Life and head of the macrobiotic community in Zagreb. His wife is a cooking teacher. He invited Bill to Yugoslavia, has been to the USA, and lectures throughout Yugoslavia. He has visited most of the soyfoods companies in Yugoslavia, has a fax, and like Ivan speaks pretty good English.

Basically all of the interest in soyfoods in Yugoslavia grew out of macrobiotics. Several of the people who started companies attended the Kushi Institute in London. Two years ago, others attended the International Macrobiotic Institute in Kiental, Switzerland. In both places there are classes in soyfoods production (miso, tempeh, tofu, etc.) taught by various macrobiotic teachers such as Roberto Marrocchesi. Most companies have some books from Soyfoods Center. Bill is still actively affiliated with The Bridge in Connecticut and is a teacher of macrobiotics. Address: North Road, Bantam, Connecticut 06750. Phone: 203-567-0554.

9920. *SoyaScan Notes.* 1991. The need for a low-fat, low-calorie tofu (Overview). Sept. 11. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** Fat and calorie content of this tofu should be at least 30% lower than that made from whole soybeans. Perhaps the easiest way to make this product would be to run soymilk made from whole soybeans through a dairy separator (such as a plate separator or decanting centrifuge, as is used by the dairy industry to make cream or non-fat milk) to remove the desired amount of fat, just like the dairy industry does to make low-fat or non-fat milk. There is a big potential market for such a product since 1% fat milk has now passed low-fat milk (2%) as the best-seller in American supermarkets.

Talk with Ron Roller of American Soy Products. 1992. Feb. 7. In late 1991 American Soy Products began to work with several separator companies (Westphalia and Alfa-Laval) and the dairy department of Michigan State University to try to use dairy separators to reduce the fat content of soymilk. In short, the traditional equipment and processes don't work, apparently because the fat molecules in soymilk are much smaller than those in dairy milk. The separators, which consist of a series of plates to separate heavy from light molecules, end up separating the solids from the liquids, rather than the fat from the non-fat constituents. Alfa-Laval is still trying to solve the problem, at no charge to American Soy Products.

9921. Kessler, Jon. 1991. Twin Oaks Industries buys Virginia Soyworks (Interview). *SoyaScan Notes.* Sept. 13. Conducted by William Shurtleff of Soyfoods Center. Plus a 1-page letter of Sept. 11.
• ***Summary:*** On 1 March 1991 Twin Oaks, a community, bought Virginia Soyworks from Ken Scotton, who used to live at Twin Oaks Community. About two years ago he proposed that the community buy the business from its former owner, but the community decided not to. So Ken left the community and bought the business himself. He ran it for about 1½ years then decided to sell it back to the community. He made good money (about $10/hour) but was working 60-hour weeks, largely by himself. Jon Kessler, a member of the community, re-presented the idea to the community, which decided this time to buy it. The community paid $5,000 for the business plus $10,000 for inventory of soybeans, coagulant, and packaging materials.

Scotton is not presently involved with the Soyworks, but he may re-join the community, at which time he may get involved again. The community owns the business and a crew runs and manages it cooperatively. Jon is actively involved and is a good contact person. Twin Oaks Industries' main source of income is making hammocks. The company has three general managers and their main account is Pier 1 Imports. One reason the community decided to buy the tofu business was to diversify their sources of income. Virginia Soyworks now makes about 1,000 lb/month of tofu, 40 gallons/month of soymilk, and 50 lb/month of tofu spread. The community may change the name of the Virginia Soyworks to Twin Oaks Soyworks in 1992. Address: Route 4, Box 169, Louisa, Virginia 23093. Phone: 703-894-4112.

9922. Rabheru, Neil. 1991. New developments with Unisoy, soymilk, and Haldane Foods in England (Interview). *SoyaScan Notes.* Sept. 16. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Unisoy was acquired by the Haldane Foods Group on 21 Dec. 1990. This has proved to be a very positive development for Unisoy. It is a great honor and very satisfying for Neil to be part of the same team with Dwayne Andreas and Peter Fitch, because both are very forward looking, energetic, and supportive men. The company now makes only soymilk. Other companies in the Haldane Foods Group now make the other soy products that Unisoy used to make–which is more efficient. For example, Genice Foods Ltd. makes soy margarine, yogurts, and ice creams. Unisoy plans to expand into a larger plant, probably at a new location. That phase, which will begin within 12 months, will involve an investment of £3 to £4 million. He is presently meeting with APV in connection with a new soymilk plant. Unisoy has not launched any new products since mid-1990.

© Copyright Soyinfo Center 2013

Neil has been too busy absorbing the Granose line into his production. Unisoy is now making all the soymilk that Granose used to buy from DE-VAU-GE, to use in continuing the Granose line of products that contain soymilk. Thus the Unisoy/Haldane now makes the profit that DE-VAU-GE used to make.

The acquisition of Granose by the Haldane Foods group was the most brilliant move one can imagine. 90% of the products that Granose was buying from other companies can be manufactured within the Haldane Foods Group. Granose's best products included their margarine, soymilk, ice cream, and yogurt. Peter Fitch deserves the credit for this stroke of genius.

The Haldane Foods Group now sells 4 soymilk brands, all now made by Unisoy: So Good (which used to be purchased from DE-VAU-GE; Sanitarium Foods in Australia only registered their brand in Australia and New Zealand), Granose, Unisoy, and White Wave. Neil believes that Unisoy makes the best-tasting soymilk in Europe today. Recently there was an independent magazine survey of all soymilks on the market and the Granose brand made by Unisoy won first, second, sixth, and ninth places. The UK soymilk market is extremely competitive and the prices are much lower relative to cow's milk than they are in the USA. On average at all retail outlets, cow's milk retails for about £0.50 per liter versus £0.59 to £0.79 per liter for soymilk. Thus soymilk in the UK retails for about 38% more than cow's milk.

Note: In the USA, cow's milk retails for about $0.72/liter and soymilk retails for about $1.86/liter or about 2.6 *times* as much as cow's milk. The current exchange rate is 1.79 U.S. dollars = 1 British pound. Thus U.S. cow's milk would sell for £0.40/liter (20% less than British cow's milk) and soymilk would sell for £1.04/liter (about 45% more than British soymilk).

In the UK most of the soymilk is sold in the multiples (supermarkets) in half liters (500 ml) cartons, and that is where the greatest growth is. There, soymilk is only about 20% more expensive than cow's milk. (Note: In the USA very little soymilk is sold in supermarkets.)

In the UK, Provamel (made by Alpro in Belgium) has about 42% of the total soymilk market. The four brands made by Unisoy have about 35-37%. The remaining 21-23% is divided among Sunrise, Plamil, and a few others. There is very strong soymilk brand loyalty in the UK.

Unisoy increasingly refers to itself as "the soyamilk division of Haldane Foods Group." The "Milk 'n' By-Products Ltd." part of the name will be dropped very shortly.

The last part of the soyfoods market that the Haldane Foods Group will attempt to capture is tofu, since Cauldron Foods has a very big lead on Haldane in this market. The Granose line of dry mixes used to compete directly with the Haldane Food Group's Hera line. Now all these products are made at one location.

The relationship between ADM, British Arkady, and the Haldane Foods Group has changed. The Haldane Foods Group is no longer part of British Arkady; both are now on the same level on the organization chart, and both report directly to ADM's European headquarters (ADM International Ltd. in England; John R. Mahlich, managing director). Peter Fitch used to work for British Arkady before the Haldane Foods Group was formed. Address: Unit 1, Cromwell Trading Estate, Cromwell Rd., Bredbury, Stockport, Cheshire SK6 2RF, England. Phone: 061-430 6329.

9923. Rabheru, Neil. 1991. The early days of the soymilk market in England, Soya Health Foods and Michael Cole (Interview). *SoyaScan Notes.* Sept. 16. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Michael Cole deserves full credit for getting soyamilk into supermarkets (multiples) in the UK. Vandemoortele was smart in capitalizing on his work to put themselves in their present strong position. It is sad that Soya Health Foods did not support Michael by investing in better technology to give a better quality product. In the early days, Soya Health Foods had everything in their grasp. If they had played their cards right, Unisoy would not be here today, and Vandemoortele might not even be in the UK. The principal(s) of Soya Health Foods were either too hesitant or not smart enough to take the necessary risks. He was content making money milking the cow (so to speak), never mind when the cow drops dead. Michael left the company out of frustration. Michael is an outstanding salesman.

Neil is absolutely certain that Michael Cole has never been involved with John Holt. Neil thinks that Michael Cole's first involvement with soyfoods in the UK was with Soya Health Foods (Sunrise). Neil spoke with Michael Cole 3 weeks ago; he is back in the UK trying to market some spray-dried organic tofu and soymilk. Neil does not know the source. Address: Unit 1, Cromwell Trading Estate, Cromwell Rd., Bredbury, Stockport, Cheshire SK6 2RF, England. Phone: 061-430 6329.

9924. Cohen, Michael. 1991. Early work with soyfoods, The Farm, Laughing Grasshopper, New England Soy Dairy, and The Tempeh Works (Interview). *SoyaScan Notes.* Sept. 17. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Michael's interest in soyfoods began in about 1971-72 when he became a vegetarian, while living communally with friends in Boston. He was interested in Eastern religions and philosophies, Ram Dass, Be Here Now, Hatha Yoga, etc. He probably tasted a little tofu at this time.

In early 1972, Michael took a trip to California, first met Stephen Gaskin, and got introduced to Stephen's Monday Night Class–a week before Stephen's community left (on 10 Feb. 1971) for Tennessee to buy the land that in Sept. 1971 would become The Farm. Michael returned to Boston and worked for the next 9 months to save money. In 1973 he

© Copyright Soyinfo Center 2013

left the USA for a year to travel on an undirected personal spiritual adventure to India, Israel, and the Middle East. While he was in India, various people in Boston with whom he was living communally got more closely involved with The Farm in Tennessee.

In the summer of 1974 Michael moved from Boston to Amherst, Massachusetts, where he got involved in a vegetarian, natural foods restaurant named Equinox. It was a 4-person partnership founded by Judy Roberts (who later married Tom Timmins); Michael was their first employee. Eventually he became a partner. The main dishes in this small natural foods luncheonette were soups, sandwiches, and salads. They occasionally prepared a soy burger from soybeans or a stir-fry tofu dinner entree. Michael worked there for about a year until there were 6-7 partners, then he and his girlfriend (Shelley Moore, who was also working there and was to become his first wife) decided (as did Judy Roberts) to leave. The restaurant soon moved into very large quarters, took on large debts, and eventually went bankrupt.

Michael and Shelley (who was from Memphis, Tennessee) left for a short tour of the southeastern United States. For most of the next 2 years he lived on The Farm in three different locations. Starting in late 1974 he and Shelley lived for 7 months on the 40-acre Virginia Farm, a satellite of the Tennessee Farm in Louisa, Virginia. During that time Michael and Shelley were married. Soybeans were grown along with vegetables and corn on this farm, and the women made soymilk in the kitchen at least twice a week and (as a treat) tofu and/or soyburgers (from mashed soybeans) every week or two. All meals were strictly vegetarian, with no dairy products or eggs. Soymilk was a staple in the diet.

Then they moved to Brattleboro, Vermont, and lived for 1-2 months with Tom and Judy Timmins in their home. Tom was working for Llama, Toucan & Crow, a worker-owned natural foods distributor. Michael then got a job working for Llama. About 6 months later, Llama (which was not making it financially) sold out to their current owner, Barclay McFadden of Stow Mills. At the time of the sale, Tom left Llama and went into partnership with Ira Leviton and Kathy Whelan in the Laughing Grasshopper Tofu Shop.

By this time Michael and Shelley had become much more interested in tofu; they were eating it frequently, had gotten a copy of *The Book of Tofu* by Shurtleff and Aoyagi, and were thinking / dreaming about starting their own small tofu plant in Brattleboro–40 miles from Laughing Grasshopper in Millers Falls. Tom Timmins convinced Michael to become a partner in Laughing Grasshopper rather than becoming a nearby competitor. So Tom left Llama, made a couple of runs into Boston driving the Laughing Grasshopper van to distribute the tofu and feel out the company, and in Feb. 1977 paid $2,000 to $2,500 to became a partner in Laughing Grasshopper. He did mostly production, but also delivered tofu to Boston and went to stores to try to pick up new accounts. Tom was more the "numbers person" and Ira fancied himself to be "the tofu master." It all worked pretty well. The company had only one product–nigari tofu. Michael does not recall them making or distributing any tofu pies or cheesecakes.

During this period, from early spring until June, Michael and his family lived on a local satellite of The Farm in Montague, Massachusetts, next to Millers Falls.

In Nov. 1977 Laughing Grasshopper moved to Greenfield and changed its name to New England Soy Dairy. At that time Steve Hassell was brought in as a controlling partner; he invested $40,000 in the company–money which the company needed and did not feel it could obtain from a bank. On 20 November 1976 Michael and Shelley had their first child. Ira told Michael, "I just hope you have your child on a Saturday so that it doesn't interfere with work."

Shortly after the move to Greenfield, before the company got back into tofu production, Michael decided to take a temporary leave of absence from the company, in part because he and Shelley decided they wanted to have their second child (soon to be born) on The Farm in Summertown, Tennessee. Michael left in June 1978 and Joshua was born in September. They stayed on The Farm until Nov. 1978. After living in Summertown for several weeks Michael and Shelley (as was the custom) donated all of their savings (about $5,000) to The Farm–permanently.

On The Farm, because of his experience at Laughing Grasshopper, Michael was considered to be a fairly knowledgeable soy person, so he went to work in the soy dairy, where the main product was soymilk (fortified with vitamin B-12 and usually sweetened with sugar); a little tofu was made occasionally. After Michael arrived, the soy dairy started making much more tofu for the 1,850 Farm residents. Typically they now made tofu twice a week, and 500 pounds each time. The people loved it. No single person in the Soy Dairy was particularly knowledgeable in making soyfoods; it was run by a rotating crew. Tempeh was made in a separate building, the Lab, by Cynthia Bates and Alexander Lyon. Michael had first learned of tempeh when he, Ira, and Tom had visited Dr. Keith Steinkraus at Cornell Univ. But at The Farm he first had a chance to taste it ("It knocked my socks off"); unfortunately, he never had a chance to make tempeh on The Farm. Michael found the experience at The Farm, with its many equipment breakdowns, extreme poverty, and wasted time to be very frustrating; he was used to running a business efficiently.

After 5-6 months, in Nov. 1978, Michael and his family left The Farm–penniless. Returning to live briefly at the Montague Farm and work at New England Soy Dairy, he found that there was no solid position for him, so he was put in a temporary R&D position. But after a month or two, the Soy Dairy no longer felt like the place he wanted to live and work. Fortunately in Jan. 1979, Michael's father offered to lend him $30,000 to start his own business. A year earlier, Bernie Cohen at the Montague Farm had invited

© Copyright Soyinfo Center 2013

Michael to join in starting a tempeh business, but Michael declined saying, "It will never fly." But this time, within a few weeks, Michael decided to establish The Tempeh Works. The Soy Dairy partners were supportive of Michael's leaving, especially since they planned to focus on dairylike products and no longer planned to make tempeh. In March of 1979 Michael rented a space for the business in Greenfield and he made his first batch of tempeh there in July. It was served at the annual Soycrafters Convention in Amherst. The company began regular production in September 1979. The Tempeh Works was America's first Caucasian-run company to make only tempeh in a commercial building. Address: President, Lightlife Foods Inc., P.O. Box 870, Greenfield, Massachusetts 01302. Phone: 413-774-6001.

9925. Cohen, Michael. 1991. Recent developments at Lightlife Foods (Interview). *SoyaScan Notes.* Sept. 17. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Since it began making soy tempeh as The Tempeh Works in 1979, Lightlife Foods has evolved into a company that each year receives about half its income from tempeh and half from tofu. At the peak of hot dog season, 65-70% of sales may come from Tofu Pups and other tofu-based products. In response to tempeh burgers and 5-grain tempeh air-freighted in from California, The Tempeh Works launched 3-Grain Tempeh in May 1982, New England Tempeh Burgers in July 1982, and a line of early Tempté spreads in early 1984. Based on projected growth in sales, the company borrowed $250,000–a large amount for relatively small company. They moved into a new building in the summer of 1984, and actually purchased it in the summer of 1985. This is the building they are located in now.

With new large payments of interest and principal, the company experienced increase competition from other tempeh companies (Appropriate Foods, Soyfoods Unlimited) plus a slowing in growth of the total tempeh market. To try survive with minimal capital investment, Michael proposed to Bob Davis of Light Foods that The Tempeh Works serve as a master distributor of Bob's Light Links (a tofu hot dog made in Sacramento, California, and shipped frozen to Massachusetts). Michael sent the Light Links to his distributors along with orders for his tempeh products. Soon problems developed. First, Light Links contained eggs and Michael was getting many requests for eggless tofu hot dogs. Second, in the peak summer season, many of Michael's orders for Light Links were either not fulfilled or delayed 2-3 weeks; this created a bad relationship for him and the accounts that carried his tempeh. Third, Light Foods did very little promotion of its Light Links by offering discounts, whereas Tempeh Works did lots of discounting–creating more problems with retailers or even lower margins for Michael on the Light Links. In addition, as soon as Michael started to sell a lot of tofu hot dogs and realized what low margins he was earning, he started to think about making such a product himself. One day Tom Timmins of New England Soy Dairy (a large local tofu maker) and Michael sat down at Tom's kitchen table and worked out a plan for Tempeh Works making their own tofu hot dog. But since he had no money to buy equipment, Michael then went to the National Rural Development and Finance Corp., a federally-funded economic development organization in Washington, DC. They had picked Massachusetts as one of their 4 demonstration states. Michael got a loan for $50,000 based on a plan to build the tofu hot dog to a point where he could carry the debt of increasing the size of their plant buying their own equipment. The plan went like clockwork. Lightlife Meatless Tofu Pups were launched in Sept. 1985. For the first 2-2½ years, they were co-packed at a plant about one hour away, then they were made entirely in-house. On 14 Oct. 1987, reflecting the new diversification, the name of The Tempeh Works was changed to Lightlife Foods, Inc. After a year's work, Michael pulled together a $750,000 loan package in May 1988, rolling his former $250,000 loan into it. Today the company is in good shape.

Today, the company's best tempeh products are: (1) The 3-product line of tempeh grills (marinated tempeh burgers, in American, lemon, and barbecue flavors); the three outsell soy tempeh two-to-one. The 18-burger institutional packs, 3 packs per case, also sells very well to natural foods restaurants, retail stores with a lunch counter, and colleges. (2) Soy tempeh (both in a retail and institutional sizes). Many colleges use it in a stir fry, stroganoff, breaded cutlets with mushroom gravy, etc. During the last year Lightlife has had a full-time sales person developing the institutional market. (3) Fakin' Bacon. In addition, Lightlife has just picked up its first airline account. People like tempeh but its unsightliness (mold on the surface) is a big barrier. So second-generation tempeh products are the answer to this problem.

Of Lightlife's tofu products, Tofu Pups are by far the best-seller. They are a "mega-product" for the company. The next best seller is Lean Links Italian, then Foney Baloney.

Looking at the company as a whole, it is in great shape. The past year "has been an absolutely superb year for us." Sales are rising every month and the future looks bright. The big gambles that Michael has taken with large loans have really paid off. The company is now well organized and tight at all levels, especially the core group of around 8 people. "We run a tight ship and we don't spend a dime that is not going to make us money. We're careful. We've taken it slow. One big mistake was taking on a frozen natural cookie dough, totally outside the company's field. We almost lost our shirts on it in a big way. We're committed to bringing out 3-4 new products a year. We're also realizing that the natural foods business is a good one. We're not as interested as we once were in banging our heads against a wall trying to get into supermarkets. If they want us, we're glad to go in, but we're not going to pay them $5,000 to $10,000 per product to get in."

© Copyright Soyinfo Center 2013

Looking at the next 5 years, the growth appears to lie in prepared (second-generation) products, both in the retail and institutional markets. Address: President, Lightlife Foods Inc., P.O. Box 870, Greenfield, Massachusetts 01302. Phone: 413-774-6001.

9926. Cohen, Michael. 1991. Lightlife Foods Tomsun Foods, and Nasoya (Interview). *SoyaScan Notes.* Sept. 17. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Lightlife made a smooth transition to buying their tofu from Nasoya before Tomsun Foods went bankrupt. Now their sales manager (Richard McKelvey) and plant manager (Jon Lee) are both former Tomsun employees. "When Tomsun went public and started focusing on Jofu, the quality of their tofu really bit the dust [dropped]. It became very erratic. Then as they started to lose considerable amounts of money, their quality got even worse."

Nasoya is a good company to work with and Lightlife is a good customer. Nasoya has done an excellent job developing the institutional market. For example, they have an institutional line of tofu-filled pastas, and they try to sell their tofu to institutions. They went with a consultant for about a year, then about 2 months ago they hired a full-time institutional sales person. Address: President, Lightlife Foods Inc., P.O. Box 870, Greenfield, Massachusetts 01302. Phone: 413-774-6001.

9927. Burns, David. 1991. Homestyle Foods is for sale (Interview). *SoyaScan Notes.* Sept. 19. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** And it is in the process of being sold. The potential buyer is Martin (Marty) Roth. In about 2 weeks, a decision should have been made. David would like to continue to be associated with the business. He wants to focus on sales, and is no longer interested in being general manager. Address: General Manager, Homestyle Foods, 2327 Bluebell Dr., Santa Rosa, California 95401. Phone: 707-525-8822.

9928. *SoyaScan Notes.* 1991. The concepts of alkaline (*arukari-sei*) and acidic (*sansei*) foods in Japan (Overview). Sept. 20. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** It is common knowledge among most typical Japanese that foods can generally be classified along a continuum that ranges from alkaline at one end to neutral (*chusei*) in the middle, to acidic at the other end. Alkaline foods (those with an alkaline ash) are generally considered to promote and protect health. It is widely believed that one should try to keep one's blood a little on the alkaline side of neutral. According to E.C. Grey's *The Food of Japan* (League of Nations, 1928) and *Inshoku Jiten* (*Encyclopedia of food and drink;* Motoyama 1958; see arukari) and to discussions with numerous Japanese, well-known alkaline foods are as follows. Each food is followed by an "alkaline value" in parentheses taken from Grey (1928, p. 56-111; the "alkalinity is due to lime and magnesia"): sea vegetables including kombu (88.9), wakame (55.8), nori (35.3); black soybeans (40.2), yellow soybeans (38.1), soyfoods (and Soyfoods Center) including yuba (25.6), kinako roasted soy flour (25.2), Hamana natto (Hamanatto 24.8), natto (19.3), green soybeans (ao-daizu, dry; 17.8), Misozuke (vegetables preserved in miso, 16.3), shoyu (14.3); red miso (11.5), okara (9.0), white miso (8.1), edamamé (green vegetable soybeans, 5.8), aburage deep-fried tofu pouched (6.7), soymilk (3.8), tofu (1.1), shiitake mushrooms (41.0), azuki beans (27.0), umeboshi salt plums (3.1), dried fruits including dried fig (46.8), dried persimmon (21.3), raisins (15.3), cheese (18.0), most fresh fruits including yuzu (citron, 11.7), buckwheat (7.0), fig (6.3), lemon (5.9), banana (4.6), mikan (mandarin orange, 4.0); root vegetables including potatoes (13.9), tororo imo (11.5), daikon radish (5.0); most green vegetables such as komatsuna cabbage (11.3), or daikon leaves (10.9), pickled vegetables such as takuan (14.6). Alkaline beverages or liquids include tea, coffee, dairy milk (2.6), condensed milk (8.0), powdered milk (26.6), grape wines, and vinegar.

Acidic foods, which the Japanese believe should be used in moderation, include: white sugar (0), mizuame [rice syrup] (0), chocolate (3.0) and other sweet foods, eggs (2.8), flesh foods including chicken (5.2), pork (5.2), beef (5.1), fresh fish (avg. 5.3), alcoholic beverages including amazake (0), beer (0), sake (0); animal fats including butter (1.6), margarine (0.9).

Many Japanese find that acidic foods, when consumed in excess, give them acid indigestion. Neutral foods include rice (0.5-2.9), wheat (3.5-6.6), barley (2.7-4.6), and wheat gluten (1.0).

Note that this classification system is unrelated to the yin-yang continuum used by macrobiotics; most Japanese are unaware of macrobiotics. The latter, for example, considers meat to be yang (alkaline), whereas wines, fruits, and milk are yin (acidic).

9929. **Product Name:** Tofu.
Manufacturer's Name: Capital Bean Products Co.
Manufacturer's Address: 8-4095 Belgreen Dr. (P.O. Box 465), Gloucester, ONT, K1G 3N2, Canada. Phone: 613-737-1095. Fax 613-738-0489.
Date of Introduction: 1991. September.
New Product–Documentation: Letter (fax) from Ken Yip, president. 1992. Jan. 23. The company (which is also known as Kitchen Sprouts Farm) started producing silken tofu on 8 Sept. 1991, and now produces 23,500 lb/month.

9930. Lappé, Frances Moore. 1991. Diet for a small planet. Twentieth anniversary edition. New York, NY: Ballantine Books. xliii + 479 p. Illust. by Marika Hahn. Index. 21 cm. [250* ref]
• ***Summary:*** This new edition of this classic book contains

© Copyright Soyinfo Center 2013

a new 29-page introductory chapter titled "*Diet for a Small Planet* Twenty Years Later–An Extraordinary Time to be Alive," plus minor revisions in the text. "In 1971, I–an intense 26-year-old in search of herself–sat long hours in the U.C. Berkeley library uncovering facts about the global food supply that turned my world upside down... what was heresy, what was 'fringe,' when I wrote *Diet for a Small Planet* just twenty years ago is now common knowledge. Then, the notion that human beings could do well without meat was heretical. Today, the medical establishment acknowledges the numerous benefits of eating low on the food chain."

The section titled "Soy foods" incorrectly defines tempeh as "a fermented soy curd." Address: Inst. for the Arts of Democracy, 36 Eucalyptus Lane, Suite 100, San Rafael, California 94901. Phone: 415-453-3333.

9931. Nishimoto, Miyoko. 1991. The now and Zen epicure: Gourmet cuisine for the enlightened palate. Summertown, Tennessee: The Book Publishing Co. 250 p. Color photos. Index. 24 x 21 cm.

• ***Summary:*** This is a gorgeous, delightful vegan cookbook (though it uses honey), loaded with color photos. Most recipes, designed for entertaining, embody an atmosphere of elegance with a sense of fun, capturing the best of traditional European cuisine, offering gourmet recipes with an element of Japanese style, simplicity, and flavor. Each recipe is accompanied by a nutritional analysis, and most are remarkably low in fat.

The author is founder and owner of the Now & Zen Bakery (1838 Golden Gate Ave., San Francisco, CA 94115) which is well known for its tofu cheesecakes and other delights, and which sells dried okara. She is also a jazz vocalist and vegetarian chef. Born in Japan to a Japanese mother and an American father, she moved to Mill Valley, California, with her parents when she was age 7 and became a vegetarian at age 12. A photo on the rear cover shows Miyoko Nishimoto. She shows great virtuosity in the use of soyfoods–and wheat gluten. The section on ingredients contains excellent, detailed information on miso, nut milks and creams (almond milk and cashew milk, which the author prefers for some uses to soymilk), agar, okara, soy milk and soy cream, soy sauce, soy sour cream, soy yogurt, tamari, tempeh, tofu, frozen tofu, and pressed tofu.

Soy-related recipes include: Tofu "cheese" (p. 32). Tofu "boursin" or herb-garlic cheese ball (p. 33). Tofu "feta" cheese (p. 35). Tofu cream cheese spread with herbs (p. 36). Eggplant and tofu pâté (p. 51). Smoked tofu, mushroom, and garlic canapés (p. 53). Tofu "mornay" sauce (p. 65). Tofu aïoli (p. 82). An introduction to quick and tasty tofu cream soups is given on p. 108. Each of the following cream soups contain tofu. Cream of pumpkin soup (p. 109). Cream of corn soup (p. 110). Cream of green pea soup (p. 111).

Mediterranean eggplant and tofu gratin (p. 115). Tofu burgers suprême (p. 118). Creamy tempeh curry (p. 119). Tempeh mexicali (p. 121). Sweet and sour tofu (p. 122-23). Whole cabbage with hearty tempeh stuffing (p. 124-25). Herbed soybean casserole or stew (p. 132). Savory tempeh and vegetable stew (p. 134-35). Tofu bourguignon (p. 138-39). Homemade tofu pasta (p. 142-43). Ginger tempeh with green peppers (p. 145). Homemade gluten, Tempeh and gluten burgers, and the Great gluten turkey with dressing (p. 150-160). Tempura tofu (p. 163). Marinated tofu (p. 164). Smoky marinated tofu (p. 165). Believable bacon (with tofu, p. 166). Beans and "bacon" casserole (with tofu, p. 167). Orange-soy dressing (p. 177). Tofu sour cream (p. 179). Tofu mayonnaise (p. 180). Tofu thousand island dressing (p. 182). Tropical coconut banana ice cream or sauce (with tofu, p. 212). A different pumpkin ice cream (with tofu, p. 213). Italian cheese-less cake (with tofu, p. 216). Cashew cheesecake (with tofu, p. 217). Tofu crème (p. 218).

For a lengthy and very positive review of this book by Carol Flinders, see *Vegetarian Times* Nov. 1991, p. 86-87. Address: San Francisco, California.

9932. Ono, Tomotada; Choi, Myoeng Rak; Ikeda, Ako; Odagiri, Satoshi. 1991. Changes in the composition and size of soymilk protein particles by heating. *Agricultural and Biological Chemistry* 55(9):2291-97. Sept. [11 ref]* Address: Gifu Woman's Univ., 80 Taromaru, Gifu 501-25, Japan.

9933. Greenhut, Martin. 1991. Making tofu in 1977-78 for a Rudolf Steiner community in New York. Wanting now to make a commercial tofu kit (Interview). *SoyaScan Notes.* Oct. 4. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** In about 1977 Alan Wilkinson, who lived in New Mexico and who later had a tofu shop in Madison, Wisconsin, sent Marty a tofu kit. Marty and his wife (who lived in Harlemville, New York) used it to make tofu, which they sold to the Rudolf Steiner community in the tiny hamlet of Harlemville, New York–where the community also had a school and a huge biodynamic organic farm. Alan's main work was as a carpenter, working at the community. Now he would like to start making a tofu kit at his woodworking shop and selling it commercially. He is a student of the Urantia book, revealed in 1929. Address: P.O. Box 692, Monterey, Massachusetts 01245. Phone: 413-528-1452.

9934. Leneman, Leah. 1991. Re: Observations on the soyfoods market in Britain and the United States. Letter to William Shurtleff at Soyfoods Center, Oct. 7. 1 p. Typed, with signature.

• ***Summary:*** On a recent trip to the USA, Leah was "greatly puzzled by the seemingly complete absence of Tofutti. Two years ago I was able to get it wherever we went, while this time I saw it nowhere. The only completely non-dairy 'ice cream' in supermarkets was Mocha Mix, a greatly inferior product. Health food stores still had the Farm's non-dairy

© Copyright Soyinfo Center 2013

products and Rice Dream but no Tofutti... I certainly did miss the pleasure of eating one of my all-time favourite products!

"It certainly seems as though Britain–and even the Continent–has forged way ahead of America when it comes to soyfoods, something I would never have believed possible even a couple of years ago. We have a good range of 'ice creams', an ever-increasing range of tofu-based convenience meals etc. etc. Even Safeways has an own-brand soya milk. And in the yogurt field we are even importing divine soya milk yogurts [Sojasun] from France. (There are British ones as well but not nearly as good.)"

The Vegetarian Society of the UK has sold off its magazine, *The Vegetarian.* Note: The magazine was sold to a publisher with no connections to vegetarianism; they which re-issued it under the title *Vegetarian Living.* They went bankrupt and sold the magazine to HHL Publishing Group Ltd. in London. As of late 1993 it was still being published being published by HHL under the title *Vegetarian Living.* Address: 19 Leamington Terrace, Edinburgh EH10 4JP, Scotland.

9935. Gilbert, Linda C.; Starr, Sara M. 1991. Natural foods companies broaden their horizons: Organic, vegetarian, convenience dominate industry. *Food Business* 4(20):44. Oct. 21.

• ***Summary:*** Discusses these three industry trends, plus San-J International, White Wave, and Lightlife Foods.

San-J will be introducing its OCIA organic certified tamari gold label in November. The 10-ounce product will sell for the same price as its non-organic counterpart. "While the majority of White Wave's $3 million sales still come from tofu, tempeh products reportedly are not far behind. The company says it is growing at about 30 percent annually, and its first and second generation tempeh products are achieving more than 100 percent growth. White Wave's latest offering is a soy yogurt product called Dairyless that is made with live active yogurt cultures, including acidophilus and bifidus. Lightlife Foods, another major soy foods company, has redesigned its logo and added two new products, a vegetarian chili and a sloppy joe mix, both made with tempeh." Address: 1. President; 2. Vice president. Both: HealthFocus Inc., Emmaus, Pennsylvania. Phone: (215) 967-2233.

9936. **Product Name:** Cauldron Foods Silken Tofu.
Manufacturer's Name: Cauldron Foods Ltd.
Manufacturer's Address: 149 South Liberty Lane, Ashton Vale Trading Estate, Bedminster, Bristol, Avon, BS3 2TL, England. Phone: (0272) 632835.
Date of Introduction: 1991. October.
Wt/Vol., Packaging, Price: 200 gm pack with outer paperboard sleeve. Retails for £0.75.
How Stored: Refrigerated.
New Product–Documentation: Spot in SoyaFoods. 1991. 2(2):7. "New silken tofu in the U.K." Three photos show the package and label.

9937. **Product Name:** Cauldron Foods Tofuloni [Country, or Spicy].
Manufacturer's Name: Cauldron Foods Ltd.
Manufacturer's Address: 149 South Liberty Lane, Ashton Vale Trading Estate, Bedminster, Bristol, Avon, BS3 2TL, England. Phone: (0272) 632835.
Date of Introduction: 1991. October.
Ingredients: 1994: Original tofu (water, soya beans, calcium sulphate), hydrogenated vegetable oil, potato starch, wheat flour, rusk, maize starch, mixed cereal grains, onion, carrot, peppers, hydrolysed vegetable protein, yeast extract, salt, dextrose, ascorbic acid, herbs, spices.
Wt/Vol., Packaging, Price: 1 sausage per 113 gm chub pack. Retails for £0.75.
How Stored: Refrigerated.
New Product–Documentation: Spot in SoyaFoods. 1991. 2(2):7. "Tofuloni–The veggie salami." Photos show both packages and labels. The product, made from a blend of smoked tofu and seasonings, was introduced in a pre-sliced form in 1989. Spot in SoyaFoods. 1993. 4(3):5. "Tofuloni in new chub size." "Cauldron Foods Tofuloni is now available in 113 gm unsliced chub sizes in addition to the popular sliced version." It comes in two flavors: Spicy and Country. A photo shows packages of the two flavors.

Label for Country flavor sent by David Greenslade. 1994. Oct. 2.5 by 4.5 inches. Green and black on white. Color photo shows round slices of Tofuloni on a plate with a slice of bread. Retails for £0.92 in Oct. 1994. Cauldron Foods Ltd is now in Portishead, Bristol.

9938. **Product Name:** Tofu Burgers [Organic Tofu & Fresh Vegetables, Savory Nut, Spicy Mixed Bean, or Curry and Coconut].
Manufacturer's Name: Dragonfly Kitchen.
Manufacturer's Address: 19A Riverside Buildings, Staverton Bridge Mill, Totnes, Devon TQ9 6AQ, England. Phone: (0803) 865667.
Date of Introduction: 1991. October.
Ingredients: Curry and Coconut: Okara*, brown rice*, tofu*, onion*, carrots*, raisins, coconut, tomato puree, shoyu, herbs, spices, sea salt, sunflower oil. * = Organic.
Wt/Vol., Packaging, Price: 200 gm.
How Stored: Refrigerated.
New Product–Documentation: Four Labels sent by Simon and Dawn Boreham of Dragonfly Foods. 1991. Nov. 1. 3 inches diameter. Self adhesive. One color on white. "Dragonfly original recipe. With Soya bean, fibre and protein, naturally. Store below 4ºC. Ready cooked. Delicious hot or cold. Heat right through. Freeze once only."

Talk with Simon Boreham. 1999. Dec. 7. These meatless burgers are now called "Beanies" and the company has ten

© Copyright Soyinfo Center 2013

recipes or varieties. On 1 Jan. 1994 the company moved to its present address: 2A Mardle Way, Buckfastleigh, Devon TQ11 ONR, England. Phone: +44 1364 642700.

9939. **Product Name:** Granose Tofu Paté [Tomato, Herb, or Mushroom]. Relaunched and renamed Granose Vegetarian Patés in late 1992.
Manufacturer's Name: Granose Foods Ltd.
Manufacturer's Address: Howard Way, Newport Pagnell, Buckinghamshire, MK16 9PY, England. Phone: (0908) 211311.
Date of Introduction: 1991. October.
Ingredients: Incl. organic tofu, vegetable oils and fats, spices and seasonings.
Wt/Vol., Packaging, Price: 200 gm squeezable tubes.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: SoyaFoods (ASA, Europe). 1991 2(2):7. "Tofu pate's from Granose." The patés have a shelf life of 9 months unopened and will keep for up to 4 weeks refrigerated after being opened.

Spot in SoyaFoods. 1992. Autumn. p. 5. "Vegetarian Cheese Spreads and Patés in a Tube." The launch of Granose's 3 new cheese spreads "coincides with the relaunch of Granose Vegetarian Patés, with improved recipes and smoother textures." Soya flour is now used in place of tofu. The name of one of the three flavors has been changed to Italian Style Tomato, and the tube has been reduced in size to 150 gm. One tube retails for £1.15.

9940. Hinman, Bobbie; Snyder, Millie. 1991. Lean and luscious and meatless. Prima Publishing, P.O. Box 1260, Rocklin, CA 95677. 463 p. Illust. by Vonnie Crist. Two forewords by medical doctors. Index. 22 cm. *
• ***Summary:*** This is the third book by the producers of the best-selling *Lean and Luscious* series. Each of the recipes is simple and straightforward, and accompanied by a nutritional analysis. The book's main theme is: Eat less fat and more fiber.

9941. **Product Name:** Ken & Robert's Veggie Pockets (With Soy Cheese) [Oriental Style, Indian Style].
Manufacturer's Name: Imagine Foods, Inc. (Marketer/Distributor).
Manufacturer's Address: 299 California Ave. #305, Palo Alto, CA 94306. Phone: 415-327-1444.
Date of Introduction: 1991. October.
How Stored: Frozen.
New Product–Documentation: Ad (full-page, color) in Vegetarian Times. 1991. Nov. p. 10. Shows five flavors of Veggie pockets, including new Indian Style and Oriental Style. Baked in an organic wheat crust. Ready after 2 minutes in the microwave or 25 minutes in a convection oven. "The most delicious fast food going."

9942. Kitamura, Keisuke. 1991. Breeding high quality soybeans for food processing in Japan. In: K. Okubo, ed. 1991. Japan part of Proceedings of the International Conference on Soybean Processing and Utilization. 130 p. See p. 81-84. [18 ref]
• ***Summary:*** All soybeans grown in Japan are used to make soybean-based foods in Japan. Progress has been made in breeding soybeans to increase the content of sulfur-containing amino acids, as well as improving the food-processing quality by using mutants lacking or with lowered subunits of 7S and 11S globulins, and eliminating the lipoxygenases which are responsible for the for the generation of objectionable beany flavors using 3 types of mutants lacking the isozymes L-1, L-2, and L-3 respectively.

7S and 11S globulins are the two major proteins which amount to about 70% of the total seed proteins... 11S globulin contains 3 to 4 times more methionine and cysteine per unit protein than that of 7S globulin. Furthermore, it was reported that the two globulins have very different functional properties in soy protein foods: the isolated 11S globulin fraction formed a much harder Tofu-gel. These reports suggest that the genetic reduction of the 7S globulin content in the seeds may improve the nutritional and food-processing qualities of soybean."

"Matsuura *et al.* (1989) reported that Beta-glucosidases in soybeans are responsible for the production of daidzein and genistein from the isoflavone glucosides, daidzine and genistin, respectively during the processing of soy milk manufacturing. Because the isoflavone aglucones have more intense astringent and bitter taste than the isoflavone glucosides (Okubo *et al.* 1983), the increase of daidzein and genistein in soy milk by the action of the Beta-glucosidases causes the objectionable aftertaste of soybean products...

"So, if we could develop a new type of soybeans lacking or lowering the Beta-glucosidases in addition to the complete lack of the seed lipoxygenase isozymes, it would be an ideal soybean type for the manufacture of soy milk and related new soybean foods." Address: National Agricultural Research Center, 3-1 Kannondai, Tsukuba, Ibaraki 305, Japan.

9943. Matsuura, M.; Obata, A.; Fukushima, D. 1991. Long-life packed tofu in the United States. In: K. Okubo, ed. 1991. Japan part of Proceedings of the International Conference on Soybean Processing and Utilization. 130 p. See p. 37-40. [12 ref]
Address: Food Research Lab., Kikkoman Corp., Noda City, Japan.

9944. Murasawa, H.; Sakamoto, A.; Sasaki, H.; Harada, K. 1991. The effect of glycinin subunit on tofu-making. In: K. Okubo, ed. 1991. Japan part of Proceedings of the International Conference on Soybean Processing and Utilization. 130 p. See p. 53-57. [8 ref]

© Copyright Soyinfo Center 2013

• ***Summary:*** The presence or absence of an acidic subunit A-4 of glycinin has significant effects on the gelling properties of soymilk and tofu gel hardness. It is easier to make nigari tofu with a smoother and more uniform gel using the soymilk lacking A-4. Address: 1-3. Asahi Industries Co. Ltd., 2-17-8 Mochida, Gyoda, Saitama, Japan; 4. National Inst. of Agrobiological Resources, 2-1-2 Kannondai, Tsukuba, Ibaraki, Japan.

9945. Ohara, Tadahiko. 1991. New methods of coagulation process of soy-milk based on computerized measurements of electric conductivity and torque. In: K. Okubo, ed. 1991. Japan part of Proceedings of the International Conference on Soybean Processing and Utilization. 130 p. See p. 103-111. [14 ref]

• ***Summary:*** The coagulation step is crucial to make good quality tofu. Powdered calcium sulfate (*sumashi-ko*) is the easiest coagulant to use, but if too much is used, it impairs the tofu flavor. Tofu coagulated with nigari (magnesium chloride) has excellent flavor, but it is difficult to use because the optimum concentration level is very narrow/limited and the coagulation reaction takes place rapidly. Calcium chloride gives the hardest, most condensed tofu, and is used in making dried-frozen tofu and tofu pouches; when a softer texture or smoother taste is desired, magnesium chloride may be partly added.

Industrial production of dried-frozen tofu ("kori-tofu") has developed mostly in Nagano prefecture since 1950. The total value of the annual production of the 9 factories in Nagano prefecture alone exceeds 12,000 million yen, or 80 million U.S. dollars. A single vat ("reaction vessel") in which soymilk is coagulated may contain 500 to 2,000 liters of soymilk.

This study was designed to develop new methods for (1) measuring rapidly the required amount of any coagulant, (2) obtaining information that will affect the optimum concentration of the coagulant used, and (3) establishing an automatic coagulation process that is not dependent on the judgment of a skilled workman.

It was found that by measuring the conductivity and torque of the coagulating soymilk, displaying the results, and stopping addition of coagulant when these values reach a certain level, the process can be automated. Address: Nagano State Lab. of Food Technology, 205-1 Kurita, Nagano city, Nagano-ken 380, Japan.

9946. Omura, Yoshimasa; Takechi, Hironori; Hayashi, Katsuo. 1991. Improvement of soymilk flavor for new soymilk products. In: K. Okubo, ed. 1991. Japan part of Proceedings of the International Conference on Soybean Processing and Utilization. 130 p. See p. 41-46. [7 ref]

• ***Summary:*** "The method developed consists of the soaking of soybeans in water (15ºC, 18 hours) and the immersion of the soaked soybeans in hot water (70ºC, 5 minutes) before grinding. The treatment with hot water reduced the n-hexanal content in soymilk to about 1% of that in untreated one. It was shown that the reduction of n-hexanal was due to the inactivation of hydroperoxide lyase, not of lipoxygenase."

New products made from this bland tofu are: Tofu coagulated with citrus juice (*sudachi, yuzu*), tofu noodles containing dietary fiber, and fried fish cake containing tofu. Address: Tokushima Prefectural Food Research Inst., 2-41 Akui-cho, Tokushima 770, Japan.

9947. **Product Name:** [Tofu, Tofu Mayonnaise, Hot Squash Pies with Miso-Tofu Topping, Tofu Tart (with Cocoa or Carob), Tofu Salad with Tahini, Vegetarian Spring Rolls (Filled with Rice, Tofu & Soy Sprouts), Seitan].
Foreign Name: Tofou, Tourte au Giraumon (Nappage Miso, Tofou et Umé), Tarte au Tofou (cacao-pays, ou fruits de saison), Salade de Tofou (Tofou, crème de Sésame, tamari, aromates), Nems, Seitan.
Manufacturer's Name: Pascal Pinault.
Manufacturer's Address: "Caplet," 97226 Morne Vert, Martinique, French West Indies 0033. Phone: +59 6 55 56 57.
Date of Introduction: 1991. October.
New Product–Documentation: Talk with Pascal's sister, Marie, who calls from Orange County, California, to enquire about a source of tempeh starter for Pascal. 1993. March 17. Pascal has been very involved with soyfoods for many years. He has been making tofu and tofu products out of his home in Martinique for several years; he sells these mostly to restaurants. He would like to start making tempeh.

Letter, price list, and resume sent by Pascal Pinault at the above address. 1993. April 2. In Martinique he has been making an average of 12 to 20 pounds of tofu every week since Oct. 1991. His business has no formal name. He uses most of the tofu he makes to produce second generation products such as tofu mayonnaise, hot squash pies with miso-tofu topping, tofu & cocoa (or carob) sweet pie, tofu salad, spring rolls (*Nems*). For details see entry for the letter.

Note: This is the earliest known commercial soy product made in Martinique or any French Overseas Department.

9948. *Plenty Bulletin* (*Davis, California*). 1991. Soy to the world. 7(3):1-2. Fall.

• ***Summary:*** "Plenty has just been awarded $29,600 by the Public Welfare Foundation of Washington, DC to help groups who have requested Plenty's assistance in starting up or expanding projects involving the production of foods made from soybeans over the next two years... Plenty representatives have pioneered the introduction and adaptation of soybean foods into the diets of people in developing countries from Central America to Africa over the past thirteen years. During Plenty's first and largest soy project to date, undertaken in Guatemala in 1979 and 1980, more than 1,000 men and women from a total of 74 different

© Copyright Soyinfo Center 2013

villages were taught how to make soy milk and tofu at home...

"The Corozal South Soya Producers Cooperative in Belize is a group of 25 sugar cane farming families who have been growing soybeans on the side over the past five years. Soybeans grown by the Corozal farmers are currently sold to Mennonite poultry growers who process and use the soybeans for poultry feed. The Corozal farmers have requested program design and technical assistance in establishing a soybean processing business that would make soybean foods for human consumption and use the residue for animal feeds.

"Imani House was founded by an African-American couple who have been living in Liberia for the last six years. Imani House is a child-care center and orphanage which is committed to nurturing and feeding abandoned and hungry children in war-torn Liberia. The organization has asked for Plenty's assistance to develop soybean agriculture and small-scale soy foods processing technologies at Imani House and in other parts of Liberia in an effort to create more locally-produced sources of nutritious food." Plenty has agreed to help Imani house with a community agriculture and soy utilization project.

Plenty has also been asked to provide program design and technical assistance by organizations in Madhya Pradesh (India), Jamaica, Dominica, Barbados, St. Vincent in the Caribbean, and Guyana, as well as by American Indian communities from Pine Ridge, South Dakota, and Round Valley, California.

9949. Saio, Kyoko; Watanabe, Tokuji. 1991. Food use of soybeans in Japan. In: K. Okubo, ed. 1991. Japan part of Proceedings of the International Conference on Soybean Processing and Utilization. 130 p. See p. 35.
• ***Summary:*** In 1988 some 47,000,000 tons of soybeans were consumed in Japan; 79% of this amount was used to make edible and 19% (8,900,000 tons) was used for foods. In the process of making edible soy oil, more than 3,000,000 tons of defatted soybean meal were produced; 89% of this was used as livestock and poultry feeds, and 12% was used in foods (mostly for soy sauce, but with some for soy protein products and others). There has been a rapid increase in consumption of edible oil and defatted meal in Japan, accompanied by an increase in animal protein in the diet.

In 1988 Japan produced only 290,000 tons of soybeans domestically, and most of this amount was used for foods, especially tofu (60%), miso (24%), natto (9%), and other foods (dried-frozen tofu, yuba, kinako, etc.). The consumption of these foods has risen proportionally to the increase in Japan's population, which means that over all per capita consumption is static.

A recent survey conducted in Japan showed that 82% of Japanese ate soyfoods more than 3 times/week, and that Japanese people had a rather good image of these foods, describing them as healthy, natural, tasty, good for daily use, inexpensive, and delicious.

Japanese enjoy both traditional and modern soyfoods. The technologies for making "Vegetable Protein Products" from soybean meal have been introduced from the USA since 1970, but these have been modified and adapted to suit Japan's tastes and needs. "The importance of soybean foods in Japanese dietary life cannot be too much emphasized. We love them as traditional but also new foods." Address: 1. Research Council Secretariat, MAFF; 2. Tokyo Metropolitan Food Technological Research Center. K. Saio is presently at: National Food Research Inst., MAFF, 2-1-2, Kannondai, Tsukuba 305, Japan.

9950. Smoky Mountain Natural Foods. 1991. Fall/Winter 1991. Natural foods price list [Mail order catalog]. 15 Aspen Court, Asheville, North Carolina 28806. 23 p. 28 cm.
• ***Summary:*** This is a "Catalogue of natural foods, body care and home products for a healthier, more natural way of life." This mail-order company, which began operation in Jan. 1991, sells products made by other companies; it does not do any manufacturing and does not have its own brand on any products. Their specialty is macrobiotics products, and they buy their Japanese imports from Macrobiotic Wholesale Co. They sell miso (Miso Master American Miso, Mitoku Japanese miso, Traditional Foods domestic miso, and instant miso soups from Edward & Sons), black soybeans and azuki beans (organic are grown in the USA, non-organic from Hokkaido), sea vegetables, soy sauce (San-J shoyu and tamari, Mansan tamari, Sakae shoyu, Johsen shoyu), San-J teriyaki sauce and Szechuan sauce, Nasoya dressings and Nayonaise, Natto miso chutney, Sesame miso sprinkle, Tekka condiment (jar or bag), jinenjo tekka, MMB [Mitoku Macrobiotic, a premium brand] organic farmhouse tekka, seitan, MMB traditional dried tofu, Tofu burger, scrambler, and stroganoff, Sweet Cloud sesame miso munchie, Sweet life miso candy.

John Troy is not connected to this company, nor is John Belleme; John is the wizard, and now he makes sauces from the Wizard's Cauldron. He also works with John Belleme at Traditional Foods making seitan. Address: North Carolina. Phone: 1-800-926-0974.

9951. *SoyaFoods* (*ASA, Europe*). 1991. Soyafoods in Portugal. 2(2):4-5. Autumn.
• ***Summary:*** Portugal's 10 million people have an average annual income of $US4,000, the second lowest in Europe. A revolutionary coup in 1974 ended a 48-year dictatorship and led to a stable democracy. In 1986 Portugal entered the European Community (EC). The population wishes to consume more and better foods. Portugal imports approximately 800,000 tonnes of soya beans per year, of which 200,000 are used as full fat soya flour. The remaining 600,000 are crushed to produce approximately 405,000

© Copyright Soyinfo Center 2013

tonnes of soya bean meal used in animal feed and 105,000 tonnes of soya bean oil used in animal feed (30,000) and edible oils (75,000). There are roughly 12 soya bean oil refiners, 3 of which are also crushers.

The country has a Mediterranean-style diet with olive oil and fish. Soyfoods are sold mostly at the small number of small 'dietetic' food stores; they include soymilk (called "vegetable milk"), soya desserts, tofu, meat extenders, and soy protein concentrates. The market is still very small. Portugal has only one tofu manufacturer, Provida (located at Quinta dos Linhais, Cortegaca, 2715 Pero Pinheiro), whose production is 2,000 kg/month. The company, whose executive director is Mr. Alcino de Sousa, also packs textured soy flour (meat extender) and estimates that the market for meat extenders in Portugal is 24 tonnes/year. Mr. Sousa is interested in a joint venture with a European or U.S. producer of tofu or soymilk. All remaining soya products available in Portugal are imported. The largest importer and distributor, Dietimport, "has 5 stores and imports and sells approximately 25 tonnes per year of textured soya protein and 20,000 litres per year of soya milk, soya desserts, and soya yogurts; it also sells 100 kg per day of tofu produced locally."

9952. *SoyaFoods* (*ASA, Europe*). 1991. Profile on Amrit Protein Foods. 2(2):5. Autumn.
• ***Summary:*** A brief description of the company, its history, and present activities. A photo shows a package of Golden Glow natural soymilk. "The company also has plans to introduce other soya milk-based products, such as soya milk powder, tofu, soya cheese, soya yogurt and desserts, into the Indian market."

9953. *SoyaFoods* (*ASA, Europe*). 1991. 'Tonyu' launched in France. 2(2):2. Autumn.
• ***Summary:*** The French soyfoods association, SOJAXA, has decided to use the Japanese term, 'tonyu,' which means soymilk, as their official name for products formerly called soyamilk or soyadrink–because of labeling difficulties in France. SOJAXA held a press conference in Paris to launch the name and promote soyfoods in general.

The group also presented the results of the second half of their consumer survey. In 1991 some 41% of those polled reported a knowledge of at least one soya product, up 6% over 1990. Some 21% of respondents had consumed at least one soya product, but only 6% consumed soya products regularly. Soya drinks and desserts (in a variety of flavors) were the most popular, followed by tofu and other products. SOJAXA is located in Toulouse, France.

9954. Tsukamoto, Chigen; Kawasaki, Yoshihiro; Iwasaki, Tsutomu; Okubo, Kazuyoshi. 1991. A process for the removal of glycosides during tofu production and an evaluation of the marketability of the final product. In: K. Okubo, ed. 1991. Japan part of Proceedings of the International Conference on Soybean Processing and Utilization. 130 p. See p. 47-51. [15 ref]
• ***Summary:*** Soybean seeds contain large amounts of glycosides (such as saponins and isoflavonoids), which have undesirable tastes. This is one reason why soybean foods have not received greater worldwide acceptance. An improved method for making tofu has been developed. "This comprises removal of the soybean hypocotyl fraction, the separation of the soymilk before heating, and the introduction of a defoaming step during heating. On the basis of this proposal, Taishi Foods Co., Ltd. has constructed a new factory which can treat 420 kg of soybean per hour, the products have been marketed since Aug. 1986. This new tofu process provides products which are well accepted by Japanese consumers." This tofu, named "Daigaku Tofu" ("University Tofu") has been sold since Aug. 1986 in Sendai City. On a taste panel test of 27 consumers living in Sendai city, it received significantly higher scores than both soft and firm tofu for taste, flavor, smoothness, and overall acceptability.

At the Taishi Foods factory, removal of the seed coat and hypocotyl is performed by a grinder, which brushes down and strips off these fractions at room temperature (not in excess of 40ºC). After an initial washing, the grinding process takes place, conducted first by a line cutter to make small pieces of soybeans (about 3 mm cube). Water at 50ºC is added and the soybean paste is produced in a colloid mill. This paste is separated into soymilk and insoluble matter (okara), below 50ºC, usually in a centrifuge. Water is again added to the okara and the soymilk re-extracted. The soymilk thus obtained is defoamed with a vacuum pump, preheated to 70ºC using a plate type heat exchanger, then heated with a high temperature, short time, steam injector for about 30 seconds to around 115ºC. After such heating, the soymilk is cooled to 65ºC through a vacuum chamber, the concentration adjusted if necessary, and then kept in a holding tank awaiting tofu preparation. Both both soft silken tofu (kinugoshi) and regular (momen) tofu are produced at the Furukawa factory in the early hours of the morning to allow delivery of the goods to market in the early morning. This tofu contains half the glycosides of regular tofu. Address: 1&4. Dep. of Food Chemistry, Faculty of Agriculture, Tohoku Univ., 1-1 Tsutsumitori Amamiya-cho, Aoba-ku, Sendai-shi, Miyagi-ken 981, Japan; 2-3. Taishi Foods Co. Ltd., 68 Okinaka, Kawamorita, Sannohe-machi, Sannohe-gun, Aomori 039-01, Japan.

9955. Takai Seisaku-sho. 1991. [Takai corporate guide]. 1-1 Inari, Nonoichi-machi, Ishikawa-ken 921, Japan. 8 panels. Nov. 1. 30 cm. [Jap; eng]
• ***Summary:*** This color brochure, containing 5 color photos, is written in both Japanese and English. It notes that (as of 1 Nov. 1991) Takai has exported its tofu and soymilk

© Copyright Soyinfo Center 2013

equipment to 140 cities of 30 countries, including Bhutan, Bolivia, Brunei, Burkina Faso, Egypt, Finland, India, North Korea, Mexico, Nepal, Philippines, Spain, Sri Lanka, Sweden, Switzerland, and Thailand.

A chronology of the company states that in July 1917 Kamejiro Takai, a former president, founded Takai & Brothers Co. It was renamed Takai Sesakusho in Jan. 1946. Address: Kanazawa, Ishikawa-ken, Japan. Phone: 0762-48-1355.

9956. Wong, Anson. 1991. Global Protein Foods in Valley Cottage, New York (Interview). *SoyaScan Notes.* Nov. 12. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Global Protein Foods hopes to be ready to start tofu production in about 2 months or less. Mr. Yasuo Hachijin is presently at the plant in Valley Cottage, and some Takai workers (Mr. Tsunoda) are installing a Takai tofu production system. Valley Cottage is in Westchester County, about 45 miles or a little less than 1 hour drive north of Manhattan, across the river from White Plains to the west. They plan to start with a 6-product line: silken tofu, firm tofu, extra firm tofu, fried tofu (thick or thin), and a dessert tofu. They are experimenting with fruit flavored tofu, a yogurt-like product, etc. They will be targeting their products to two markets: the American market and the Japanese market. The brand for the Japanese market will be something like Kyozen-nen (which is established in Japan), and for the American market G.P. Initially, the company will be focusing its marketing efforts on the tri-state area, which consists of New York City, Connecticut, New Jersey, and possibly maybe a little bit of Pennsylvania. This is equivalent to a 50-mile radius from the plant. Their main competitor in the American market is Nasoya, whose tofu is also the most expensive but the taste and quality are very good. There are many competitors in the Japanese market: Mori-Nu, Kikkoman, and Kyoto-Foods (from Terre Haute, Indiana–their tofu is "very good"). Mr. Hachijin is also involved with Kyoto Foods, but he sees them as a competitor.

Anson's background is in the plastics industry; the food industry is new to him. He went to the recent Natural Products Expo in Baltimore, Maryland. Address: Sales Manager, Global Protein Foods, 707 Executive Blvd., Building E., Valley Cottage, New York 10989. Phone: 914-268-8100.

9957. *Coo* (*ku:*). 1991. Tôfu wa idai: Tôfu no miryoku menû 50 [Tofu is great: 50 attractive tofu menus]. Vol. 1. p. 1-164. Nov. 20. [Jap]
• ***Summary:*** This beautiful special first edition of this Japanese magazine, published by K.K. Shôdensha in Tokyo, is packed with hundreds of superb color photos. Devoted entirely to tofu, it shows a multitude of the many facets of tofu in Japanese cuisine and culture.

9958. Tribe, Sushila. 1991. Tofu and other soyfoods in Greece (Interview). *SoyaScan Notes.* Nov. 21. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Tofu is no longer available in Athens. Until recently there was a man who made tofu at home in Athens and sold it only at the Alpha-Beta supermarket. People would line up to buy it. He only made about 10 kg a week. But he died several years ago. Sushila would like to start a tofu company in Athens. She knows an investor who is willing to put up money, perhaps as much as $500,000. She wants to make organic tofu, ready-to-eat tofu products, and maybe tempeh. Address: Thoukididou #50, Alimos 17455, Athens, Greece. Phone: 1-98-45-894.

9959. Baumber, Derek. 1991. New developments with tofu and tempeh in New Zealand (Interview). *SoyaScan Notes.* Nov. 24. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Recently 2 new Chinese-run tofu shops have begun operation in Auckland, and a third has purchased a large, automated tofu-making machine for $100,000 and will soon start production. Their tofu is lower priced than that of Bean Supreme, which is New Zealand's largest tofu maker. Bean Supreme also makes an excellent soy ice cream, as well as tempeh (though they no longer advertise the latter). At least one of the Chinese companies is buying tempeh from Bean Supreme and selling it under their own label.

Derek has been making tempeh on a small scale for himself and friends for the past 4-5 years. He plans to start commercial tempeh production soon. After that, he would like to make a soy yogurt. Address: Choice of Foods, 334 Mt. Albert Rd., Mt. Roskill, Auckland, New Zealand. Phone: 629-0665.

9960. Van Gessel, Ike. 1991. Tofu and tempeh in the Netherlands (Interview). *SoyaScan Notes.* Nov. 24. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Van Dappern Tempeh Co., which started in Rotterdam in 1969 and is now located in Kerkrade, owned and run by Robert van Dappern, changed its name to Tempé Produkten B.V. (Tempeh Products Inc.) in April 1983. The company now makes only two products: Soy tempeh and regular tofu. They started to make tofu in June 1985, shortly after they changed the company name. They are still by far the largest tempeh manufacturer in the Netherlands. The only other tempeh companies are very small. But the interesting news is that they are now also the largest tofu manufacturer in the Netherlands, producing 10,000 cakes/week of tofu. Their tofu plant is totally automated; they developed a machine based on the design of one that is made in Japan, but better than it. Next year, Tempeh Products expects its tofu production to double because of a major contract they have with Albert Heijn, a very large food store chain in the Netherlands; that is where they now sell most of their

© Copyright Soyinfo Center 2013

tofu. Heijn also owns several stores in the USA. Heuschen-Schrouff B.V., located in Landgraaf (several blocks from where Ike lives) used to be the largest tofu manufacturer in the Netherlands, but about 1 year ago they started to have some managements problems, and now they make only about 5,000 to 6,000 cakes/week of tofu. Heuschen-Schrouff is now the second largest tofu manufacturer in the Netherlands (all the other tofu makers are very small) but Heuschen-Schrouff may still be the largest company in the Netherlands selling Asian food products.

Ike's wife is Robert van Dappern's sister. Ike works as a quality manager for a steel company in the Netherlands. He was born in Indonesia; his mother is Dutch and his father Japanese. Address: Dr. Calsstraat 50, 6372 AB Landgraaf, Netherlands. Phone: 045-319-422.

9961. Morell, Tania; Schultz, J.J. 1991. Harmonium Foods tempeh report: Prepared for Armand Asher, owner Harmonium Foods. Ithaca, New York. 66 + 15 p. Nov. 26. Unpublished manuscript. No index. 28 cm. [2 ref]
• ***Summary:*** This report was prepared for Armand Asher (owner, Harmonium Foods, 117 Auburn Ave., Ithaca, New York 14850), who wanted to start a tempeh company in Ithaca. The consumer study was conducted at the Greenstar Co-op, which subsequently burned down, but re-opened in Oct. 1992. The conclusion of the study was that the market for fresh tempeh in Ithaca was too small to support a tempeh shop, but that production of consumer ready tempeh products might support a small shop. Contents: I: The counseling report (p. 1-19). Executive summary. Introduction: Purpose, scope, and limitations, sources and methods, report organization. The small market for plain tempeh: Taste of plain tempeh unappealing to consumers, usage of plain tempeh confusing to consumers. Wave of the future–Consumer ready products: Two consumer ready products, consumer ready tempeh had higher financial return over fresh tempeh. Financial analysis: Producing only the fresh tempeh for retail, producing and selling a consumer ready product, purchasing the tempeh and then producing a consumer ready product. Conclusions and recommendations.

II: The supplementary materials (p. 20-43). Contents. Marketing information (75 lb/week of tempeh is sold in Ithaca; the main retailer is Greenstar Food Co-op at 30 lb/week). Financial analysis information.

IIA: Handwritten information. Copy of original business plan. Actual consumer survey.

III: The original proposal. Executive summary. Business highlights. Proposal. Consultant skills. Appendix A: Marketing. Appendix B: Kitchen. References & sources.

A bar chart (Part II, p. 23) shows why consumers do not purchase tempeh: It has no taste 9. Do not know what to do with it 6. High cost 3. It has a strange appearance as a fungus 2. It takes too much time to prepare 1.

A bar chart on page 22 shows that 85% of the consumers polled were tofu users, 45% were tempeh users, 45% would purchase locally made tempeh over the brand they currently purchase, 20% have purchased consumer ready tempeh products (burgers, bacon, etc.). Address: 19A Gaslight Village Apt., Ithaca, New York 14850. Phone: 607-257-8438.

9962. **Product Name:** Tofu Luncheon [Traditional, Cajun Spice, or Eastern Smoke].
Manufacturer's Name: Bean Supreme Ltd.
Manufacturer's Address: P.O. Box 12082, 140 Hugo Johnson Dr., Penrose, Auckland, New Zealand. Phone: (09) 590 592.
Date of Introduction: 1991. November.
Ingredients: Incl. tofu.
Wt/Vol., Packaging, Price: 450 gm chub pack.
How Stored: Refrigerated.
Nutrition: Per 100 gm.: Protein 17 gm, carbohydrate 7.8 gm, fat (unsaturated) 15.2 gm, sodium 350 mg, calcium 181 mg, energy 981 kJoules.
New Product–Documentation: Letter and leaflet titled "Soy Revolution Brings Happiness" sent by Trevor Johnston, Managing Director of Bean Supreme Ltd. 1994. July 8. This product was introduced in Nov. 1991. The leaflet shows a color photo of the 3 flavors in chub packs surrounded plates containing as salad, stir-fried veggies and tofu, and several sandwiches. The leaflet states: "Tofu breakthrough–New product... Our aim in developing this new product was to create a flavoursome ready-to-eat form of Tofu that still retained the nutritional benefits that have made Tofu so popular. We're proud of the results and hope you like it too. Nutritionally in some areas its even better than Tofu itself as you can see from the following table..." Includes recipes for using tofu in Ratatouile and in Indonesian-style Peanut Casserole.

9963. Johnson, Lawrence A. 1991. New uses for crops: Opportunities or hype. Paper presented at Developing Alternative Uses for Crops Meeting. 23 p. Held 13 Nov. 1991 at Highlander Inn, Iowa City, Iowa.
• ***Summary:*** In this narration to a slide show containing 60 slides, the author discusses grain amaranth, crambe, soybeans, corn, soymilk, tofu, the Nichii Company, use of agricultural products to replace petroleum-derived products (such as ethanol, citric acid, lactic acid, lysine, and detergents), degradable plastics, Henry Ford and his plastic automobile parts ("Unfortunately, cheap petroleum caused his effort to be abandoned in the 1950's. Times have changed and many are reexamining this opportunity using modern technologies. Soy plastics may be more environmentally friendly."), biotechnology and soybeans, breeding soybeans with soil similar to canola oil. Address: Professor-in-Charge, Center for Crops Utilization Research, Iowa State Univ., Ames, IA 50011.

9964. **Product Name:** [Tofu, Tempeh, and Natto].
Manufacturer's Name: La Buona Terra.
Manufacturer's Address: Corso Buenos Aires 36, 16129 Genoa (Genova), GE, Italy. Phone: 010/313241.
Date of Introduction: 1991. November.
New Product–Documentation: Letter from Gianni Viglino (Via Mignone, 1/15, 17100, Savona, SV, Italy). 1991. Nov. 21. The only tofu shop in his area is La Buona Terra at the address and phone number given above. The organization is a macrobiotic center which offers these products fresh each week. Letter from Gianni Viglino of Italy. 1991. Dec. 20. "This macrobiotic center has stopped selling tofu, tempeh, and natto which they produce only for use in their restaurant."

9965. Packaged Facts. Subsidiary of FIND/SVP. 1991. The Oriental foods market. 581 6th Ave., New York, NY 10011. Nov. *
• ***Summary:*** "The Oriental Foods Market cover the $1 billion retail market for prepared Oriental foods, which is broken down into four categories–canned / packaged,... frozen, dry soups, and tofu.

Tofu is discussed briefly on page 16, and in depth on pages 180-205. Soy sauce is discussed in numerous places (incl. p. 54-57, Kikkoman, La Choy, Chun King, p. 102).

Talk with David Weiss, president of Packaged Facts. 1991. Nov. 26. This is an update of the Feb. 1989 edition of this company's market study of the same title. It was "completely rewritten by a different author, Linda Linton." They have added new statistics and even went back and changed some sales figures from the previous report. He does not know how the author gathered statistics on U.S. tofu production and sales, but he knows that she did not contact individual companies, one by one. "That is a very difficult way to get the information because (1) you don't know if you're getting the right information and (2) there may be something you are missing. We don't use SIC codes. Our figures are undoubtedly guesstimates. A little of it came from the Public Relations Dept. of Nielsen Marketing Research; they don't cover it all but they are good on packaged goods. A little also came from SAMI. There is nobody measuring the tofu market. This study only covers tofu sold as tofu, not including second-generation products. Some figures may have come from a tofu association, if there is one. Most of our reports are written from secondary published data. We just compile the figures. We are planning to do a report on the whole soy market–not just tofu." Address: New York. Phone: 212-627-3228.

9966. PNS (Programa de Nutrición y Soya). 1991. Manual de nutrición y soya: La soya el alimento de hoy y de mañana [Manual of nutrition and soya: Soya, the food of today and of tomorrow]. San Salvador, El Salvador: PNS. 146 p. 23 cm. [8 ref. Spa]
• ***Summary:*** Contents: Introduction. Undernutrition: A sign of ecological deterioration. Our health, diet: What we eat, consequences of malnutrition, causes of malnutrition, what we should eat, soya in our diet, health and diet, the diet of mothers and children, soya in the human diet (how to prepare soymilk and soy cheese [tofu], recipes for soymilk and soy cheese, recipes for soya soup, soya masa, roasted soynuts, roasted soy flour, whole soybeans, soya desserts, soya pastries and cakes, soy sprouts [*retoños de soya*] and how to grow them).

Note. This is the earliest Spanish-language document seen (Jan. 2013) that uses the term *retoños de soya* to refer to soy sprouts.

Appendixes: Biblical passages relating to diet, chemical composition of some daily foods. Cultivation of soybeans (p. 128-45).

The book begins: "This little *Manual of Nutrition and Soya* is the fruit of the effort of a group of Christians, members of parochial [church-related] communities, and of other institutions of Christian inspiration, who are working to seek a solution to the most outstanding problems of our country. One of these is general undernutrition of our population, especially in rural and marginal sub-urban areas. Approximately 73% of Salvadorean children suffer the consequences of undernutrition."

"Six years ago the Program of Nutrition and Soya (*Programa de Nutrición y Soya,* PNS) was founded, made up at that time of the Christians of the Dioceses of Santa Ana, San Salvador and Santiago de María. Actually many institutions of the church, private and governmental, collaborate actively with this program. From the first year we have relied on the financial support of the Catholic Relief Service, which has permitted us to strengthen our activities. Subsequently the Interamerican Foundation (FIA) has offered us its financial support...

"The board of directors of PNS offers this new edition with the aim of joining efforts with those people interested in working for the eradication of undernutrition in our country." Contact PNS, Apartado Postal 2115, San Salvador, El Salvador.

Note: Letter from Kris Duville. 1992. Dec. 13. This is an informal publication, mainly directed at the courses and demonstrations, where they are sold to participants at a low cost. This is the 3rd edition, published in Nov. 1991; 8,000 copies were printed by the editing serves of the Jesuit-run UCA (University of Central America) in San Salvador. It is sold in a few bookshops, naturist's stores, and in the PNS office. It was written by several volunteers, of whom he knows only Teresa Taris. Address: El Salvador.

9967. **Product Name:** Spinach & Tofu Ravioli (Mild, or Spicy).
Manufacturer's Name: Rising Moon Ravioloi.
Manufacturer's Address: 1575 Bailey Hill Rd., Eugene,

© Copyright Soyinfo Center 2013

OR 97405.
Date of Introduction: 1991. November.
Ingredients: Mild: Filling: Spinach, Surata tofu, Nancy's cream cheese, asiago cheese, fresh garlic, Dijon mustard, nutmeg, Magical Moon Mix Italian herbs & spices, sea salt. Eggless Pasta: Fancy durum flour, water, herbs, sea salt.
Wt/Vol., Packaging, Price: 12 oz.
How Stored: Frozen.
New Product–Documentation: *Provender Journal* (Eugene, Oregon). 1994, late spring. 11(1):1, 8. "New member profile." Rising Moon of Eugene, Oregon, is owned by Jade Elms and Kirk Giudici. The company was built on a ravioli that Kirk and his dad made during the holidays. They now sell 3 standard flavors of ravioli, each packed in a 98% cellulose bag rather than plastic.

Talk with Kirk Giudici of Rising Moon. 1994. July 6. The vegan Spinach Tofu Ravioli was launched in April 1994. The company's first two products were Spinach Tofu Ravioli (Mild, or Spicy) launched in Nov. 1991. At that time the company was located at their home in Eugene.

Labels sent by Kirk. 1994. July 6. Both mild and spicy. Mild: 3 by 4.5 inches. Blue, yellow, black and white. On front panel: Illustration of a moon with a face.

9968. **Product Name:** Soy-a Melt: Fat Free (Soy Cheese With Casein) [Cheddar style, Mozzarella style].
Manufacturer's Name: White Wave, Inc.
Manufacturer's Address: 1990 North 57th Court, Boulder, CO 80301. Phone: 303-443-3470.
Date of Introduction: 1991. November.
How Stored: Refrigerated.
New Product–Documentation: Postcard (color) sent by White Wave. 1991. Nov. "Grate savings." "Soy-a melt–fat free. Cheddar flavored soy product. Ask your distributor for November savings."

9969. Leviton, Richard. 1991. Re: Observations on the soyfoods industry from outside, East West Journal, and new personal developments. Letter to William Shurtleff at Soyfoods Center, Dec. 18. 2 p. Typed, with signature.
• ***Summary:*** "Every now and then I get annoyed at the tofu industry for failing so miserably to achieve its promise. After all these years its still the case 75% of the time that when I buy tofu its sour. They just didn't learn even the first lesson. The spunk seems to have gone out of soyfoods, and people are just repeating themselves, moving in old product grooves. I don't think tofu ever proved to be the yogurt of the 1980s at all. I'm glad I left when I did."

Richard is planning to get married in several months to an Australian woman who he met a year ago. She is a Registered Nurse, a naturopath, and a homeopath. They live on a lakefront cottage 15 miles from Northampton (Smith College). He has written two books and has commissions for 4 more. "I am writing almost nothing for *East West* now as they have become brain-dead." Instead he is writing mostly for *Yoga Journal.* Address: 111 Lake Shore Drive / Goshen, RR 1, Box 322B, Williamsburg, Massachusetts 01096.

9970. *Washington Post.* 1991. Putting new things first. Dec. 18. p. E18. Food section.
• ***Summary:*** Contains a recipe for Creamy tofu dip / dressing. "Gail Forman says that dieters will thank their hosts for this recipe, which she learned from William Shurtleff, director of the Soyfoods Center in Lafayette, California."

9971. Levy, Phil. 1991. Hanoi harvest: The food of Thailand and Vietnam. *Observer* (*London*). Dec. 22. p. 78.
• ***Summary:*** The subtitle continues: "Week 4–Hué, Da Nang, Hoi An, Hanoi. In the final part of this series, Phil Levy visits four of Vietnam's major cities, where the food varies from a happy blend of Franco-Vietnamese to Chinese-influenced dishes and Buddhist vegetarian cuisine.

Hué, a Buddhist, is famous for its local vegetarian cuisine.

Ly Thung Kiet Villas is a French-built tourist villa where the writer and his party were served: Braised bean curd skin with tree-ear mushrooms, eaten with rice. Bean curd skin curry with potato and mushrooms, eaten with a baguette. Minced beef (probably with bean curd) with crunchy peanuts, wrapped in green leaves and fried. Thick soup of potato, mushroom and bean curd (see the Recipe for Buddhist monk's soup).

9972. **Product Name:** Berrydales Special Ices [Bitter Chocolate (Totally Vegan)].
Manufacturer's Name: Berrydales Ltd. (Marketer). Made in Clwyd, Wales, by Genice Foods Ltd.
Manufacturer's Address: 5 Lawn Road, London NW3 2XS, England. Phone: 071-722-2866. Fax 071-722-7685.
Date of Introduction: 1991. December.
Ingredients: Soya milk, tofu, honey, apple concentrate, chocolate chips, cocoa.
Wt/Vol., Packaging, Price: 500 ml.
How Stored: Frozen.
Nutrition: Per 100 ml.: Energy 104 kcal (calories; 446 Kilojoules), protein 1.90 gm, total fat 2.71 gm (saturated fat 1.12 gm, polyunsaturated 0.73 gm), carbohydrate 18.4 gm including total sugar 17.19 gm.
New Product–Documentation: Berrydales newsletter. 1991. Dec. p. 3. "Berrydales no-cream ices–deliciously refreshing dairy free ices based on organic fresh tofu and soya milk. Low fat, low cholesterol, low calorie and vegetarian, in five exotic flavors–Honey Vanilla, Berry, Maple & Walnut, Ginger & Honey and–now totally vegan–Bitter Chocolate. Available in health food stores, delicatessens & selected Sainsburys nationwide."

Label sent by Genice Foods Ltd. 1994. Feb. 18. 3.75

inch round lid. 500 ml. Illustration of a flower against a light wood-grain background. "Lactose free. No animal products. Low cholesterol."

9973. Britt, Jenny. 1991. Breaking new ground: First a restaurant and now a booming wholesale business, Ploughshares is a vegan, organic food company aiming to feed the world. *Here's Health* (*England*). Dec. p. 56-57.
• ***Summary:*** Ploughshares is a highly successful vegan, organic food company based in Glastonbury, Somerset–Britain's "New Age capital." A photo shows Michael O'Connell, the company founder, holding up a large tray of cakes. He and his vegan co-workers are deeply committed to an animal-free and more environmentally sensible way of eating. Since 1986 they have established a restaurant (recommended by the Egon Ronay rating service), followed by a wholesaling business, and then last year a cookery school. Michael is both a vegan and a "formidable environmental activist, who runs his own mobile information service called "Spirit of Conservation on the Move"... Formerly a professional musician and record producer with his own band, Michael has been one of the main driving forces behind Ploughshares. Until recently he owned it outright, having put in most of the finance, but in recognition of the equally valuable contribution of others in the business, he has converted it into a co-operative... The core group, who are the main shareholders, are Michael, sisters Fiona and Miranda Bruce, mother and daughter Sophie and Sally Pullinger and Lalita Gordon. Several of this group are musicians who had worked with Michael in the music business. A few years ago, feeling no longer fulfilled by professional music, they set up as an extended family on a smallholding in the Essex countryside and, to help make a living, acquired a mobile catering truck... an eight-tonne kitchen-on-wheels which had previously done service on location feeding hordes of extras in the film Gandhi. They renamed it The Emperor Liu An's Tofu Palace, in honour of the Chinese feudal lord attributed with the invention of tofu, and took to open air shows and festivals, serving vegan food and demonstrating tofu-making."

The key people then moved to Glastonbury to start a restaurant (on High Street) as a permanent base for their vegan cuisine. The restaurant was sold in 1991 as more of the company's energy went into developing and marketing its range of nutritious, often organic cakes. The company has found a building in Glastonbury, which it hopes to convert into an innovative factory–if the money can be raised. The Ploughshares cookery school now teaches 3 students a week on average. They study for a City and Guilds qualification in dairy-free and special diet cuisine. "A Ploughshares Diploma includes tofu and tempeh making on both a domestic and cottage industry scale..." Another feature of the course is the production and use of a leaf protein concentrate (nettles are now used as the raw material) in the form of a nutritious curd named Leafu. Michael became interested in it as a "substitute in British vegan diets for soya beans, whose transportation from abroad uses precious energy. [A company brochure titled "Leaves for Life: Leafu, a high protein food made from leaves" notes that "Leaf fractionation is a way of producing more protein from indigenous plants than any other process. It is highly efficient in terms of energy use and in quantity of protein produced per acre." Leaf curd contains "proportionally more protein, vitamins A and E, iron, and calcium than is found in meat, eggs, or beans."]

Michael, a man with big dreams, can be contacted at Ploughshares Organic, Vegan Food Company, 54 Roman Way, Glastonbury, Somerset, BA6 8AD, England.

Note: This is the earliest document seen (May 2005) that mentions "Leafu" (a word probably derived by merging the words "leaf" and "tofu") or that discusses a commercial food use of leaf protein.

9974. Conlon, Michael. 1991. Focus on food use could increase soybean sales to Japan. *AgExporter* (*USDA, FAS*). Dec. p. 12-13.
• ***Summary:*** "Japan is the world's largest market for soybeans, importing around 4.68 million metric tons in 1990. While most soybeans are crushed for meal and oil or processed into soy protein and soy sauce, there is another usage–direct food use–that offers potential for growing U.S. sales.

"While the volume of soybean imports for crushing to make meal and oil has stayed relatively unchanged over the past several years, soybean imports for human consumption have increased steadily from 827,000 metric tons in 1980 to 1.2 million tons in 1990, an increase of 45 percent. No other country imports such a large quantity of soybeans for food use."

"The U.S. share of the food-use soybean market is around 75 percent, with exports to Japan increasing 17 percent since 1985.

"Domestic production limited: Despite government programs designed to increase domestic production, soybean area planted in Japan has declined in recent years because growers are interested in more lucrative crops such as vegetables and flowers. As a result, Japan has had to import soybeans in order to meet the demand.

"About three-fourths of Japan's soybean imports, or around $900 million worth, come from the United States, translating into an important and steady market for U.S. soybean growers. Also, there are no tariffs or duties to hinder imports of soybeans, making the market even more attractive.

"... Japan is the world's largest buyer of food-quality soybeans, which are used for a variety of Japanese foods." A brief description is given of tofu (the most popular food in Japan made from soybeans), miso, and natto. "In 1989, 42% of soybeans for food use [in Japan] went into tofu, 14%

© Copyright Soyinfo Center 2013

went into miso, 8% went into natto and 36% went into other soybean products. The demand for soybeans used for direct consumption is increasing approximately 3% per year for tofu and miso and about 7% for natto."

Today about 25% of the soybeans used in Japan go for food use while the rest is crushed for oil and meal.

"According to the American Soybean Association (ASA), the varietal soybeans in demand in Japan have an estimated farm gate value in the United States of $1-3 per bushel above crushing beans. This could represent added returns to U.S. soybean producers of up to $55 million per year."

A graph shows the number of metric tons, from 1980 to 1990, used for crushing soybeans and for food-use soybeans. Address: Oilseeds and Products Div, FAS.

9975. Kamata, Yoshiro; Ohta, Kazutaka; Tamauchi, Fumio; Yamada, Minoru. 1991. Cheese analogs from soybeans or soymilk-curd by limited proteolysis. *Nippon Shokuhin Kogyo Gakkaishi* (*J. of the Japanese Society of Food Science and Technology*) 38(12):1143-48. *

• ***Summary:*** Using bromelain, cheese analogs can be prepared from soybean curd.

Note: Bromelain is a proteolytic enzyme extracted from the pineapple plant or from other plants of the family, *Bromeliaceae.*

9976. Kreith, Marcia. 1991. Water inputs in California food production. Water Education Foundation, 717 K Street, Suite 517, Sacramento, CA 95814. 162 p. *

• ***Summary:*** This report states that a typical 8-ounce boneless beef steak requires over 1,200 gallons of water before it reaches the table, and a 4-ounce hamburger requires over 600 gallons. An 8-ounce portion of chicken requires 165 gallons, while ½ cup of tofu (made from soybeans) needs just 60 gallons. One cup of plain yogurt takes 87.8 gallons, a 2.1-ounce chicken egg takes 62.7 gallons, and 8 fluid ounces of whole milk takes 48.3 gallons. The study, commissioned by the Water Education Foundation, sought to update numbers that originally were calculated by the University of California Cooperative Extension in 1978. The study, conducted with the assistance of an advisory committee, that included members of the California Farm Bureau Federation, takes into account water naturally available and/or applied as irrigation water to grow and process food products. The water inputs were analyzed from the beginning of the planting or growth cycle up to the time of cooking. The study assumes all crops were raised according to average California water, nutrient, and pest management practices, and irrigation efficiency of 70 percent is assumed to be average.

"While a beef steak was determined by the study to be the most water-consumptive, the most water efficient was a cup of lettuce using just under 3 gallons. Other assorted food items and their water usage were: a slice of white bread at 10.6 gallons, a slice of wheat bread at 7.3 gallons, a 2-ounce serving of pasta at 35.9 gallons..." The report costs $40 from the Water Education Foundation. Address: Sacramento, California. Phone: 916-444-6240.

9977. **Product Name:** Organic Tofu.
Manufacturer's Name: New Dawn Enterprises.
Manufacturer's Address: Sheffield, Tasmania. Phone: (004) 91 1663.
Date of Introduction: 1991. December.
Ingredients: Incl. organically grown soybeans (imported from South Australia or Queensland), and natural nigari (originally from Japan).
Wt/Vol., Packaging, Price: 500 gm vacuum pack.
How Stored: Refrigerated.
New Product–Documentation: Letter from Brett Stephens, 436 Crisp St., Albury, NSW, 2640, Australia. 1991. Dec. 14. There is a new tofu maker in Sheffield, Tasmania (which is a state of Australia).

Letter from Trishala Shub. 1998. Jan. 8. She has been the sole producer of organic tofu in Tasmania for the last 6 years. "I will soon be joining forces with people from Organic Choice in the Hobart area and we hope to diversify, offering miso and tempeh as well as tofu and soy dairy products."

Talk with Trishala Shub. 1998. Jan. 18. She and her former husband, David, started this company in about 1991 by buying the tofu equipment from a church group that had been making tofu in Tasmania. She had been a vegetarian since about 1970-71. She made the tofu and her former husband, David, took care of the business side of things–until he found that they were earning only about $1/hour for their time making tofu. They owned 60 acres of land which was mostly bush, but 20 acres was used for organic farming of berries, medicinal herbs, etc. Their first product was organic tofu. In about 1992 they introduced Soyburgers, which contained tofu, okara, wheat, and spices. They were a formal business (paying taxes) for only about the first 6 months; after that they continued informally. After David left Tasmania, she was able to run the business and farm with the help of wwoof-ers (wwoof = willing workers on organic farms) and local people who wanted tofu but could not afford to buy it, so they worked for it instead. This system is popular in Australia, where there is a national register in which each farmer tells what kinds of things they do and grow on their farm. Backpacking tourists come to stay and work on the farms. They get free room and board, plus lots of education, in exchange for about 4-5 or more hours of work a day. Sometimes she would have 4 to 5 wwoofers at a time working on her farm and helping make tofu. She has taught tofu-making, yoga and leadlining to many Japanese wwoofers. She sold the equipment in June 1997 to the people from Organic Choice. Before starting her work with tofu,

© Copyright Soyinfo Center 2013

Trishala worked as an Ananda Margha missionary in the Philippines and India.

9978. Nichii Company of America, Inc. Mycal Group. 1991. The best just got better (Ad). *Vegetarian Times.* Dec. p. 29.
• ***Summary:*** Below the large title is an illustration (line drawing) of a package of tofu. The text on the front panel (film lid) reads: "Natural Foods Store. Lite Tofu. Firm. OCIA Organic. New Wt. 16 oz." The text of the ad reads: "MicroSoy flakes has dramatically improved the quality of tofu. We challenge you to see for yourself... Tofu made from MicroSoy flakes is lower in calories, lower in fat, higher in protein, longer lasting on your refrigerator shelf, better for the environment, and is made from organic soy flakes." Small print across the bottom of the ad reads: "MicroSoy flakes use up to 47% less water and as much as 40% less electricity in the manufacture of tofu, so they help preserve our environment and conserve our natural resources. Tofu made from MicroSoy flakes contains 8% more protein and 67% less fat for better health. All results confirmed by independent testing at Iowa State University, Food Science and Human Nutrition Department. Comparison of tofu made from whole soybeans and MicroSoy flakes."

9979. Nichii Company of America, Inc. Mycal Group. 1991. Who makes your tofu? Tell them you want the best tofu. Tell them you want tofu made from MicroSoy flakes (Or we can tell them for you) (Ad). *Natural Foods Merchandiser.* Dec. p. 17.
• ***Summary:*** This full-page red, green, and white ad shows a package of water-packed tofu labeled "Natural Foods Store. Lite Tofu. Firm. OCIA Organic." On both sides of it, with a check-off box in front of, and a question mark after, each are the names of the following American tofu manufacturers: Mori-Nu, Hinoichi, Azumaya, Nasoya, Quong Hop, Calco, Soy Foods of America, White Wave, Sam Sung, Mighty Soy, Mandarin, Northern Soy, Swan Gardens, Other.

Tofu made from MicroSoy flakes is best because it is low in fat and calories, higher in protein, longer lasting on your shelf, better for the environment, made from OCIA-organic soy flakes. "Tofu made from MicroSoy flakes contains 8% more protein and 67% less fat for better health."

This ad also appeared in the Feb. 1992 issue (p. 21) of this magazine. Address: 23440 Hawthorne Blvd., Suite 140, Torrance, California 90505. Phone: 213-791-0010.

9980. **Product Name:** Soymilk, and Cloth-Wrapped Tofu (Bou Bow Daufu).
Manufacturer's Name: Pak Fok Food Products Inc.
Manufacturer's Address: 2370 Midland Ave., Unit A-26 Winco Business Park, Scarborough, ONT, M1S 5C6, Canada. Phone: 416-299-7952.
Date of Introduction: 1991. December.
New Product–Documentation: Talk with Simon Kwan, owner. 1992. Oct. 8. Followed by a letter dated Oct. 9. He began making these two products in Dec. 1991, first the soymilk and then the tofu–which was the first tofu of its kind in Toronto. The texture of Bou Bow Tofu is very smooth and delicate, but it is very labor intensive to make. Mr. Kwan bought this company (the name has not changed) on 9 Oct. 1990 from Tony Lam, who was the second owner. The company was founded on 1 Jan. 1989 by Mr. Hok Chung Sung at the present address, probably under the name Dragon & Dragon Food Products. Pak Fok distributes its own products in the Toronto area.

9981. Rondot, Pierre; Sudaryanto, T.; Djauhari, A.; Anwarhan, H. 1991. Soybean utilization, processing, and production policy in Indonesia. *Palawija News* (*Bogor, Indonesia*) 8(4):1-6. Dec.
• ***Summary:*** "More than 80% of the households in Java consume soybean. The next highest consumption rate is in North Sumatra where 55% of the households eat soybean regularly. In Java, annual soybean consumption per capita varies from 11 to 16 kilograms compared with one to six kilograms in other areas of Indonesia. Java, which produces 47% of Indonesia's soybean, is also its greatest consumer.

"Average soybean consumption for the whole of Indonesia increased from 3.42 kg/cap/year in 1969 to 5.78 kg/cap/year in 1985. Consumption per capita of processed soybean is higher in urban areas than in rural areas."

"The Indonesian 'poultry revolution' has given rise to the modern animal feed-mill industry,... As Indonesia did not have a crushing industry until 1988, the meal had to be imported to regulate the national demand and to sustain the development of the 'poultry revolution'".

In 1987, according to SYGAP survey data, Indonesians consumed 749,600 tonnes of tempeh (86 gm/week), 714,700 tonnes of tofu (82 gm/week), and 48,200,000 liters of kecap (ketjap; Indonesian soy sauce). Per capita consumption of onchom was 4 gm/week. Address: 1. Agricultural Economist, ESCAP/CGPRT Centre, SYGAP Project, Bogor, Indonesia.

9982. **Product Name:** Tofutti Sour Supreme: Better Than Sour Cream (Non-Dairy Sour Cream).
Manufacturer's Name: Tofutti Brands Inc. (Marketer).
Manufacturer's Address: 50 Jackson Dr. (P.O. Box 786), Cranford, NJ 07016. Phone: 201-272-2400.
Date of Introduction: 1991. December.
Ingredients: 12 oz. consumer pack: Water, partially hydrogenated soy bean oil, tofu, corn oil, isolated soy protein, fructose, guar seed gum, carob bean gum, salt, mono and diglycerides, carrageenan, natural flavors, potassium sorbate (added as preservative). The 30 lb foodservice product lists non-dairy cultures as the last ingredient.
Wt/Vol., Packaging, Price: 30 lb block or 12 oz plastic tub.
How Stored: Refrigerated, 120 day shelf life.
Nutrition: Per 1 oz.: Calories 50, protein 1 gm,

carbohydrate 1 gm, fat 5 gm (unsaturated 3 gm, saturated 2 gm), cholesterol 0 mg, sodium 120 mg, lactose 0 mg.
New Product–Documentation: Tofutti Brands Annual Report. 1992. April. Sour Supreme, a non-dairy sour cream, was introduced at the end of 1991 and is currently being sold in bulk packages to the food service industry, food service distributors, and bakers. It is similar in taste and texture to traditional sour cream but is free of milk and butterfat, and contains no cholesterol.

Ad in Natural Foods Merchandiser. 1992. December. Soyfoods 2000 (Special supplement insert, p. 9). Mentions Sour Supreme.

Talk with Tofutti Brands, Inc. 1992. Dec. 1. The foodservice version of this product in 30-lb blocks was introduced in the first quarter of 1992 [actually late 1991]. The consumer product was launched in Sept. 1992. Tofu is used as an ingredient in both.

Tofutti brand Sour Supreme fact sheets. 1992. Lists nutritional information and ingredients. "Excellent for these applications: Baking, cooking, whipping, frostings, mixes, etc... Ideal for bakeries, restaurants, caterers, commissaries, food manufacturers, etc."

Leaflet (color, 8½ by 11 inches) sent by Tofutti Brands. 1993. March 29. Shows the product package and label (which is red and green on white), and gives complete details about the product, including ingredients.

One sample of this product with Label generously sent refrigerated by David Mintz via FedEx priority overnight. 1996. June 4. 4.5 inches diameter, 2¼ inches deep. Plastic tub. "Lactose free. No milk. Butterfat free." Soyfoods Center product evaluation. 1996. June 30. Excellent flavor, texture, color and package design.

9983. Tsuiseki: Iya-dôfu [Chase: Stone-dofu] 1991. Television broadcast. Channel 26. California. Dec. 29. Sun. 7-7:30 P.M. [Jap]
• ***Summary:*** In 1185 when the Genji (Minamoto) clan defeated the Heike (Taira) in a famous naval battle on the Inland Sea, some of the Heike survivors fled to mountainous central part of Shikoku island, where their descendants still live today in the remote village of Iya. Shizue Fukushima, a 73-year-old woman, is the village tofu maker. Her Iya-dofu, also called *iwa-dofu* or *ishi-dofu* (meaning "stone tofu"), is much harder than most Japanese tofu. Made by hand, with nigari as a coagulant and without machines, it takes 3 times as long to make as most tofu. The curds are broken into small pieces by vigorous stirring and they are then pressed with a heavy weight for a long time. The finished tofu, dropped onto a stone floor from a height of 1 meter, remains unbroken. A favorite preparation in the village is named *Dekomawashi* derived from the words Dengaku plus *mawasu* (to turn). Slabs of tofu are skewered, and spread with miso. The base of each wooden skewer is then placed nearly upright into the hearth ashes around a fire. Small potatoes are also skewered on separate skewers. When one side is nicely grilled, the tofu is turned so that the other side can also be grilled. Address: Japan.

9984. *Whole Foods.* 1991. Tofu making gains: Oriental foods near $1 billion level. Dec. p. 1, 20. Cover story.
• ***Summary:*** A new study by the market research company Packaged Facts [a subsidiary of FIND/SVP] projects that retail sales of tofu will be $95 million in 1991, up 9.2% over 1990. Sales have grown steadily from $61 million in 1986, to $66 million in 1987, to $71 million in 1988, to $78 million in 1989, to $87 million in 1990.

Tofu is viewed as part of the Oriental foods market, which is projected to have retail sales of $992 million in 1991, up 5.5% over 1990. The major components of the Oriental foods market, ranked by projected retail sales in million dollars in 1991 are: Frozen foods ($296), dry soups ($287), Sauces ($160, including soy sauce), canned goods ($154), and tofu ($95). Note that tofu comprises the smallest segment.

Reasons for tofu's steady growth include its connection with two individual rising trends: ethnic foods and healthy eating. Michael [sic, David] Weiss, president of Packaged Facts, explains that Oriental sauces are also benefitting from the proliferation of Oriental restaurants "because increased familiarity with oriental food has stimulated consumers to begin preparing the dishes at home."

Note: All of the data on tofu in this report are derived from previously published sources.

9985. Wilson, Lester A.; Fenton, A.M.; Wilson, R. 1991. Comparison of whole soybeans to their MicroSoy flakes for tofu production: Steam kettle–hydraulic press system. Ames, Iowa: Iowa State University. 17 p. 28 cm.
• ***Summary:*** Tofu made from Nichii MicroSoy flakes takes much less time (10 minute soak vs. 12 hour soak), 24-48% less water (48% less if process cleanup water is included), 41% less electricity. "The tofu produced from flakes was softer, creamier in color, higher in protein and moisture, but lower in lipid [fat] that bean tofu (24% vs. 40%)." This is to say, on a dry-weight bases, the tofu made from MicroSoy flakes contained (on average) 24% fat, whereas that made with whole soybeans contained 40% fat. This is apparently because more fat remained in the okara when tofu was made from the flakes. No significant differences were found in the yield of firm tofu or in the yield of okara from flakes compared with soybeans.

Concerning sensory or organoleptic qualities, the tofu made from whole soybeans had a significantly firmer texture, which was preferred by the U.S. panelists but would probably not be by Japanese panelists. There were no significant differences in color, beany-flavor intensity, or flavor preference.

Talk with Lester Wilson. 1992. Jan. 31. This undated

© Copyright Soyinfo Center 2013

report was printed on 1 Dec. 1991. One theory as to why the tofu made from MicroSoy flakes contained less fat is that the flakes were made from dehulled soybeans whereas most tofu is made from soybeans with the hulls intact. Perhaps okara which is free of hulls tends to hold more fat. Address: 1. Prof., Dep. of Nutrition, and The Center for Crop Utilization Research; 2-3. Dep. of Food Science and Human Nutrition. All: Iowa State Univ., Ames, Iowa.

9986. **Product Name:** [Toform Tofu Patties (With Mushrooms)].
Foreign Name: Toform Tofu Bratlinge (Champignon).
Manufacturer's Name: Amaï.
Manufacturer's Address: Sandweg 41, 7070 Schwaebisch Gmuend, Germany.
Date of Introduction: 1991.
Ingredients: Tofu (water, soybeans*, calcium sulfate) 78%, mushrooms 10.6%, rolled oats*, soy sauce, sunflowerseed oil, parsley and spices, sea salt. * = Organically grown.
Wt/Vol., Packaging, Price: 2 x 100 gm vacuum pack. Retails for DM 4.50 (1/92, Germany).
How Stored: Refrigerated.
Nutrition: Per 100 gm.: Protein 11.7 gm, fat 10.8 gm, carbohydrates 8.1 gm, calories (kcal) 176 (737 kJoules).
New Product–Documentation: Label sent by Anthony Marrese. 1992. Jan. 13. 4 by 7.5 inches. Self adhesive. Blue, white, green, and orange on tan. "Organically grown." Exklusiv Neuform certification symbol.

9987. **Product Name:** [Whole-Grain Patties: Wheat with Mushrooms (Bulgur and Tofu)].
Foreign Name: Vollkorn Bratlinge (Weizen mit Champignons).
Manufacturer's Name: Amaï.
Manufacturer's Address: Sandweg 41, 7070 Schwaebisch Gmuend, Germany.
Date of Introduction: 1991.
Ingredients: Bulgur* 38%, tofu (water, soybeans*, calcium sulfate) 35%, mushrooms 7.6%, vegetables 16% (carrots*, onions*), soy sauce, sea salt, parsley and spices. * = Organically grown.
Wt/Vol., Packaging, Price: 200 gm vacuum pack. Retails for DM 4.02 (1/92, Germany).
How Stored: Refrigerated.
Nutrition: Per 100 gm.: Protein 7.0 gm, fat 5.0 gm, carbohydrates 17.6 gm, calories (kcal) 143 (598 kJoules).
New Product–Documentation: Label sent by Anthony Marrese. 1992. Jan. 13. 4 by 7.5 inches. Self adhesive. Brown, blue, and green, on white. "Organically grown." Exklusiv Neuform certification symbol.

9988. *Chung-kuo Peng-jen* (*Chinese Cuisine*). 1991. [Six articles on the significance of tofu in Chinese culture]. No. 1. [Chi]*
• ***Summary:*** Dr. H.T. Huang, expert on the history of Chinese food and agriculture. (personal communication, 16 May 1993), notes that a celebration in honor of the discovery of tofu by Liu An (Huai Nan Tzu) in about 100 B.C. in Anhui province was held simultaneously in Beijing (China) and Taipei (Taiwan) on 15 September 1990. That day is supposed to be Liu An's birthday. The celebration in Beijing continued for 3 days. It was sponsored by several trade associations including the Taiwan Tofu Products Association. The event was reported in the magazine cited above and the six articles on the significance of tofu in Chinese culture from the Commemoration were reprinted in that issue.

9989. Evans, E. 1991. Transforming soybeans to improve tofu. *New Crop News* 1(1):3-4. *
• ***Summary:*** Removal of all or parts of the lipoxygenase enzyme system present in soybeans reduced the beany flavor in tofu. Lipoxygenase isozyme 2 is the principle culprit in causing off-flavors.

9990. **Product Name:** Tofu–Soya Bean Curd.
Manufacturer's Name: Health Valley Foods.
Manufacturer's Address: Box 3376, Maraval, Trinidad, Trinidad and Tobago, West Indies.
Date of Introduction: 1991.
How Stored: Refrigerated.
New Product–Documentation: Letter from Deolal Ramnarine of Magic Tops in Trinidad. 1991. Nov. 21. Health Valley Foods, at the address shown above, makes "Tofu–Soya Bean Curd." Note: Maraval is located just north of Port of Spain, the capital of Trinidad, which is located just off the coast of Venezuela. In Dec. 1988 Patricia Kempadoo of Kempadoo Tofu Co. started making tofu at this address.

9991. **Product Name:** Holy Cow Mighty Meal [King Creole, Vishnu's Dream {Indian}, Gado-Gado {Indonesian}].
Manufacturer's Name: Holy Cow Vegetarian Foods.
Manufacturer's Address: 2260 Augusta St., Eugene, OR 97403. Phone: (503) 345-3639.
Date of Introduction: 1991.
New Product–Documentation: The *Provender Journal* (Eugene, Oregon). 1994, late spring. p. 11 states that Holy Cow Vegetarian Foods is located at 2260 Augusta St., Eugene, OR 97403. Phone: (503) 345-3639.

Talk with Anton Ferreira, owner of Holy Cow. 1994. June 30. All his products are vegetarian. Each product in this line, 3 of which contain tofu (made by Surata Soyfoods), looks like a burrito and is a whole meal. The various products were introduced during 1991. He was born in South Africa.

9992. **Product Name:** Ken & Robert's Veggie Pockets [Oriental Style, or Indian].

© Copyright Soyinfo Center 2013

Manufacturer's Name: Imagine Foods, Inc. (Marketer/ Distributor).
Manufacturer's Address: 299 California Ave. #305, Palo Alto, CA 94306. Phone: 415-327-1444.
Date of Introduction: 1991.
Ingredients: Oriental: Crust: Organic whole wheat flour, organic wheat flour, water, expeller pressed oleic safflower oil, brown rice syrup, yeast, sea salt. Filling: Organic tofu, broccoli, carrots, onions, peas, mushrooms, water chestnuts, rice starch, tamari soy sauce, brown rice syrup, sesame oil, rice vinegar, garlic, herbs, spices. Organically grown and processed in accordance with section 26569.11 of the California Health and Safety Code. Reg. Penna. Dept. Agr.
Wt/Vol., Packaging, Price: 5 oz (141 gm) in plastic bag. Retails for $1.89 (7/92, California).
How Stored: Frozen.
New Product–Documentation: Product (Oriental Style) with Label purchased at Open Sesame in Lafayette, California. 1992. July. 8 by 3.75 inches. Orange, green, black, white, and tan on black. "Truly amazing. A delicious baked organic wheat crust. Organic tofu and vegetables in a mild Szechuan sauce. Pockets for people with their hands full. No cholesterol. Dairy free. Ken & Robert's Veggie Pockets are the most delicious mouthful of fast food going." Product of USA. UPC indicia. Copyright 1991.

9993. Lai, Hsin-Hsia. 1991. Hsüan chuan mo shang liu ch'iung i, Chu yüeh tanh chung kuen hsüh hua ["Let the jade fluid flow from the quern, and the snowy flowers boil in the moon shaped pan"]. *Chung-kuo Pheng-jen* No. 1. p. 13-15. [Chi]*
• ***Summary:*** The author tells stories of how the founding emperor of the Ming dynasty, and two Ch'ing emperors, Khang Hsi and Ch'ien Lung, had the highest regard for tofu as a food.

9994. Lambrecht, Hillary S. 1991. Soybean storage and its effect on tofu and soymilk production. MSc thesis, Purdue University, West Lafayette, Indiana. xviii + 224 p. *

9995. Life Food. 1991. Taifun products–Tofu, Raeuchertofu, Sprossentofu, Terrinen, Tempeh, Spezialitaeten [Taifun products–Tofu, Smoked Tofu, Sprouted Tofu, Terrines, Tempeh, Specialties (Leaflet)]. Robert Bunsen-Strasse 6, D-7800 Freiburg, West Germany. 6 panels each side. Each panel: 22 x 10 cm. Undated. [Ger]
• ***Summary:*** This is based on Life Foods' first professional typeset brochure; it was brought to Soyinfo Center by Wolfgang R. Heck. 2011. Nov. 25. The name of each product is printed in bold red letters; below that is a description in gray on a white background.

The company still presents itself (on the front panel) as Life Food–Freiburg's Tofu Shop. Natural Foods (*Life Food–Freiburgs Tofurei. natuerliche Lebensmittel*).

Note 1. *Sprossentofu* refers to tofu made from all or some sprouted soybeans.

Note 2. A terrine is a French forcemeat loaf, similar to a paté, but made with more coarsely chopped ingredients. Terrines are usually served cold or at room temperature (Source: Wikipedia, at terrine (food)). Address: Freiburg, West Germany. Phone: 0761/50 61 55.

9996. Ontario Soybean Growers' Marketing Board. 1991. Tofu: The miracle food of the 90s. Box 1199, Chatham, ONT N7M 5L8, Canada. 22 p. 23 x 10 cm.
• ***Summary:*** This attractive and upbeat full-color booklet begins with an introduction and nutritional information, followed by 9 tofu recipes. Accompanying each recipe is a full-page color photo and a nutritional analysis. The tofu recipes: Two bean tofu chili. Jalapeno-cheddar corn muffins. Tofu vegetable pizza. Spicy tofu with green vegetables and noodles. Hot and sour soup. Chocolate orange sauce for angel food cake. Low-fat tofu cheesecake. Tofu antipasto. Fruity tofu cooker [smoothie].

Talk with Fred Brandenburg of the Ontario Soybean Growers' Marketing Board. 1994. Oct. 20. This is the single most popular publication ever issued by OSGMB. More than 100,000 have been printed since 1991. Address: Chatham, ONT, Canada. Phone: 519-352-7730.

9997. **Product Name:** Herb Tofu (Bulk).
Manufacturer's Name: Simple Soyman.
Manufacturer's Address: 4877 North Green Bay, Milwaukee, WI 53209. Phone: 414-264-4133.
Date of Introduction: 1991.
How Stored: Refrigerated.
New Product–Documentation: Talk with R. Jay Gruenwald. 1991. Jan. 24. This product was just introduced.

9998. **Product Name:** "Beefy" Burrito (Renamed Mexican Tofu Burrito), and Mexican Tofu Sloppy Joe.
Manufacturer's Name: Soy Devine.
Manufacturer's Address: Box 668, Miranda, CA 95553.
Date of Introduction: 1991.
New Product–Documentation: Talk with Mara Devine. 1995. June 1. In 1995 Cajun Barbecue Style was renamed and divided into two products: Vegan Cajun Burger, and Cajun Tofu Sloppy Joe. She moved from Miranda to Arcata, California, in June 1993.

9999. **Product Name:** [Tofu, Smoked Tofu, Tofu Burgers].
Manufacturer's Name: Tofuhaus Eisenreich.
Manufacturer's Address: Steinmetzstrasse 4, 93049 Regensburg, Germany. Phone: 0941/27 01 27. Fax: 0941/29 3 59.
Date of Introduction: 1991.
New Product–Documentation: Letter from Bernd Drosihn of Viana Naturkost. 1993. Nov. (late). Tofuhaus Eisenreich

makes tofu in Regensburg

Letter from Bernd Drosihn of Viana Naturkost. 1994. Feb. 14. Mrs. Eisenreich owns Tofu Eisenreich; the address, phone and fax are shown above. The company makes tofu, smoked tofu, and tofu burgers. They began business 3-4 years ago.

10000. **Product Name:** New World Foods Hearty Chilli (With Granular Tofu Curds).
Manufacturer's Name: Vegetable Protein Specialists (VPS), Inc.
Manufacturer's Address: 2889 Trades West Rd., Santa Fe, NM 87501. Phone: 505-471-8979.
Date of Introduction: 1991.
Ingredients: 1991: Incl. Rico Soy, tomato, red chiles, brown chiles. 1993: Chile broth (our special blend of chile pods ground with water), organic* Befine (soybeans, water, calcium sulfate–a natural mineral, caramel color), organic* pinto beans, onions, green chile, shoyu, organic* corn meal, tomatoes, spices, soybean oil, vegetable gum. * = Organically grown & processed in accordance with Section 26569.11 of the California Health and Safety Code.
Wt/Vol., Packaging, Price: 12 oz vacuum pack. Or 24 lb. foodservice pack.
How Stored: Frozen or refrigerated.
Nutrition: Per 1 cup: Calories 275, calories from fat 98, total fat 11 gm (saturated fat 1 gm), cholesterol 0 mg, sodium 365 mg, total carbohydrate 41 gm (dietary fiber 6 gm), protein 10 gm, vitamin A 25%, vitamin C 2%, calcium 26%, iron 64%.
New Product–Documentation: Leaflet sent by Richard Jennings of VPS, Inc. (Vegetable Protein Specialists). 1993. Nov. 26. "New World Foods." Hearty Chilli contains red and brown chiles with tomato.

Talk with Richard Jennings of VPS. 1993. Dec. 1. This product was introduced in 1991. A key ingredient was Rico Soy (small, firm chunks of tofu), which was renamed and trademarked Befine by Sept. 1993.

New Label sent by Richard Jennings. 1993. Nov. 29. 3 by 5 inches. Self adhesive. Black on gold. Illustration of a symbolic Aztec crow. "Low in saturated fat." "Try topping with diced onions, cilantro, sliced jalapenos or low fat cheese."

10001. **Product Name:** Tofu, Fried Soy Protein [Fried Yuba], Soy Milk.
Manufacturer's Name: Wen's Food Inc.
Manufacturer's Address: 9179-Red Branch Road, Columbia, MD 21045. Phone: 410-730-6699.
Date of Introduction: 1991.
New Product–Documentation: U.S. Soyfoods Directory. 1999. p. 45. Talk with Mr. Ting-yi Wen. 1999. May 6. The parent company of this company was started in 1987 in Taiwan. Then Mr. Wen came to Maryland and in 1991 began making the products shown above. Today he makes a host of innovative products. Tofu: Regular Tofu, Soft Tofu, Tofu Curds (*Doufu-Hwa*), Extra Firm Tofu (*Doufu-Gan*), two types of Tofu Noodles (Plain, and Spicy with Soy Sauce), Five-Spice Pressed Tofu Sheets (*Wu-hsiang pai-yeh*), and Seasoned, Rolled, Pressed Tofu Sheets (ssu-chi or suji, made from pai-yeh; season the sheets, then roll and steam).

Yuba: Crispy Soy Chicken (new name for fried yuba), plain fresh yuba (*bai dou-pi*). But he stopped making the yuba last year because: (1) It was too labor intensive; (2) Working in the hot, steam-filled room was so uncomfortable that at the end of each day he felt like a steamed dumpling. Soymilk (plain or sweetened with sugar) in ½ gallons.

Products to be introduced soon: (1) Soymilk in small single-serving cups similar to those in which yogurt is now sold (a unique packaging idea). (2) A line of soy yogurts. (3) A line of Chinese frozen entrees, such as Crispy yuba chicken with black bean sauce.

Business card sent by Ting-Yi Wen. 2001. Wen's Food Inc. makes tofu products and sauces, with Mao Pao, Kung Pao, and BlackBean flavors, plus Soy Chicken, Soy Pudding, Soy Milk, Soygurt, etc. They are still at the address above.

10002. **Product Name:** Simply Delicious Vinaigrette Un-Dressing [Tofu Poppyseed, Lemon Tahini, Miso Sesame, Herb Garlic], and Miso Magic.
Manufacturer's Name: Wizard's Cauldron, Ltd.
Manufacturer's Address: P.O. Box 969, 108 S. Church St., Hillsborough, NC 27278. Phone: 919-732-9445.
Date of Introduction: 1991.
Ingredients: Tofu Poppyseed: Canola oil, well water, apple cider vinegar, honey, organic tofu (White Wave), clear shoyu, garlic juice, white wine, pepper mash, lemon juice, mustard, poppyseeds, natural herbs & flavours, natural vegetable gum.
Wt/Vol., Packaging, Price: 10 fluid oz (300 ml) glass bottle.
How Stored: Shelf stable.
New Product–Documentation: Talk with John Belleme. 1992. July 11. John Troy is back in business after American Natural Foods went bankrupt–with the help of designer / marketer John Fogg. He now owns and runs a company named Wizard's Cauldron, located about 100 miles from where Belleme lives. Of his 30-35 products, the one Belleme likes best is Miso Magic, which is a sauce and/or dressing in his Simply Delicious line. John Troy has been very successful. He just spent $200,000 upgrading his operation. He has a totally automated bottling and labeling line. His specialty is interesting combinations of esoteric ingredients. He makes two lines for Joel Dee under the Edward & Sons label.

Products sent by John Troy. Reddish brown and dark blue on pastel labels. Stylish. Lemon Tahini contains "clear shoyu" as the fifth ingredient. Herb Garlic contains "clear shoyu" as the sixth ingredient.

© Copyright Soyinfo Center 2013

Talk with John Troy. 1999. May 3. His plant is now located at 8411 Hwy. N.C. 86 N, Cedar Grove, North Carolina 27231. He does a lot of work out of his home. Two thirds of his business is private label; he makes 14 SKUs for Whole Foods (such as Soy Ginger), Wizard's Hot Stuff for Joel Dee of Edward & Sons, Miso Mustard Dressing (fresh refrigerated organic) for Alberts, etc. He is in the process of removing the honey in some of his products and switching to agave nectar, to make them vegan and to give them a lower glycemic index; agave nectar is about to be approved as a sweetener for diabetics. Products he makes under his own Simply Delicious brand for the natural foods trade are three flavors of organic vinaigrette–each of which has a soy ingredient. They were introduced in about 1991.

10003. **Product Name:** Troy's Micro-Saucery Organic Ginger Sauce, Peanut Sauce, Chipotle Sauce.
Manufacturer's Name: Wizard's Cauldron, Ltd.
Manufacturer's Address: P.O. Box 969, 108 S. Church St., Hillsborough, NC 27278. Phone: 919-732-9445.
Date of Introduction: 1991.
Wt/Vol., Packaging, Price: Bottle.
New Product–Documentation: Talk with John Troy. 1999. May 3. His plant is now located at 8411 Hwy. N.C. 86 N, Cedar Grove, North Carolina 27231. Two thirds of his business is private label. Products he makes under his own Troy's brand for the natural foods trade are three organic sauces–each of which has a soy ingredient. They were introduced in about 1991. Chipotle refers to smoked jalapeño; it is like a miso barbecue sauce, with a southwestern flavor profile. The ginger and peanut sauces each contain soy sauce.

10004. Ali, Nawab. 1991. Final report of Indo-US sub-project on soybean processing and utilization. Bhopal, India: Soybean Processing & Utilization Project, Central Institute of Agricultural Engineering (CIAE). xxiv + 241 p. Illust. 25 cm. No. CIAE / SPU-7 (85-91) /91/140). *
• ***Summary:*** "Under the Soybean Processing and Utilization Project sponsored by the United States Agency for International Development and the Indian Council of Agricultural Research, laboratory scale processes for making fullfat [full-fat] soyflour, soypaneer, soydal, soyflakes, soysnack, soybadi and partially defatted soyflour have been adapted / developed." Address: Soybean Processing and Utilization Project, Central Inst. of Agricultural Engineering, T.T. Nagar, Bhopal–462 003, India.

10005. American Soybean Assoc., Taiwan. 1991. The tofu and soymilk industry in Taiwan. Taipei, Taiwan. 1 p. Unpublished manuscript. [Eng]
• ***Summary:*** There are 1,430 tofu manufacturers in Taiwan. They use a total of 186,072 tonnes of soybeans to make 93,036 tonnes of tofu each year. 500 companies make less than 150 kg of tofu daily; they use a total of 25,200 tonnes/year of soybeans.

490 companies make 151-200 kg of tofu daily; they use a total of 32,928 tonnes/year of soybeans.

200 companies make 201-300 kg of tofu daily; they use a total of 20,160 tonnes/year of soybeans.

143 companies make 301-600 kg of tofu daily; they use a total of 28,848 tonnes/year of soybeans.

50 companies make 601-1,800 kg of tofu daily; they use a total of 30,240 tonnes/year of soybeans.

30 companies make 1,801-2,400 kg of tofu daily; they use a total of 24,192 tonnes/year of soybeans.

12 companies make 2,401-3,600 kg of tofu daily; they use a total of 14,520 tonnes/year of soybeans.

5 companies make 3,601-6,000 kg of tofu daily; they use a total of 10,008 tonnes/year of soybeans.

There are 4,650 soymilk manufacturers in Taiwan who make an average of 30 kg/day of soymilk. They use 139.5 tonnes of soybeans each day or 5,022 tonnes of soybeans each year. Address: Taipei, Taiwan.

10006. Black, Nicole. 1991. Tofu internacional [Tofu international]. Mexico City, Mexico: Editorial Edamex. 140 p. [Spa]*
• ***Summary:*** This is a tofu cookbook with original recipes from around the world, but featuring many unique Mexican-style tofu recipes. The book contains many misspelled words, even on the cover.

10007. Bray, Francesca. 1991. Essential techniques for the peasantry: An annotated translation of the 6th century Chinese agricultural treatise Ch'i Min Yao Shu. Unpublished draft copy. *
• ***Summary:*** Information on soybeans is given in the section on legumes. The many kinds of legumes are known collectively as *shu.* "Legumes belong to the family of *Leguminosae* (one of the largest families of flowering plants) and to the sub-family *Papilionoideae;* they are identified as having a fruit formed by a single carpel and dehiscent by both ventral and dorsal sutures so as to separate into two valves." Peas, beans, lentils, and peanuts are all legumes.

"It is interesting that while legumes were among the earliest plants to be domesticated in West Asia and the Americas, there is no firm evidence that legumes were cultivated in China in prehistoric times, even though several species are native to China, and even though legumes played a very important role in Chinese agriculture from the late Chou onwards. Though remains of leguminous species have been found in one or two Chinese neolithic sites, they have been identified as broad beans (*Vicia faba*) and groundnuts (*Arachis hypogaea*)*;* since the former is believed to have been introduced to China from West Asia in Han times and the latter is a native American species, the authenticity of these identifications is doubtful, to say the least.

© Copyright Soyinfo Center 2013

"There are apparently no references to legumes in the Shang oracle records, and the earliest uncontested evidence for the cultivation of leguminous plants in China is found in Chou bronze inscriptions and in the *Shih Ching.* Both these sources refer to a crop called *shu,* and the early form of the character clearly depicts the nodules on the roots of the plants. The term *shu,* though also used to refer to legumes in general, is primarily associated with the soybean *Glycine max* (L.) Merrill, and its presence in these writings is usually taken to signify the domestication of this crop. In later lexicographical texts the term *shu* is usually qualified when soybeans are referred to *jung shu, jen shu* and *ta shu* are mentioned, and this does suggest that even in pre-Han times *shu* was used as a generic term for legumes rather than a specific term for soybeans. The modern term for soybean is *ta tou,* 'greater bean', a term which first appears in the 1st century *Fan Sheng-Chih Shu.* In classical times the term *tou* was applied only to a type of 'wooden vessel or dish for containing flesh sauces at sacrifices or feasts', but by Han times it seems that it was also used as a general term for pulse crops, as it still is today.

"Whether or not the unqualified term *shu* in early texts and inscriptions should be understood to refer to soybeans or to legumes in general, there is no doubt that the soybean was domesticated in China some time around the beginning of the Chou, for texts describing 7th century events refer to soybeans (*jung shu*) as novel introductions to the Central States, whereas by the time of Mencius they had already become a staple food of the common people. The presumed wild ancestor of the soybean, *Glycine ussuriensis* Regel & Maack or *G. Soja* L., is native to Northeast China and adjacent areas of Manchuria, Korea and Japan, and it may be significant that the cultivated soybean was called *jung shu,* for Jung was the name commonly given to the Tungusic tribes of Northeast China in Chou times. The *Kuan Tzu* states that in the 7th century Duke Huan of Ch'i led an expedition to the territory of the Mountain Jung and brought back 'winter onions and soybeans (*jung shu*) for dissemination throughout the various states.' An alternative gloss of *jung* and of its (then) homophone *jen* is that it simply meant 'large, luxuriant', for the soybean is a large, bushy plant growing up to 6 feet tall; its modern name of *ta tou* is attributable to its habit, and not to the size of its beans which are only about as big as a lentil.

"The soybean's rapid conquest of Chou China is a tribute to its superior qualities, qualities so outstanding that they frequently provoke outbursts of surprising lyricism in modern writers: 'that miracle, that noblest of crops, that wondrous plant, the soybean'. The ancient Chinese were distinctly more moderate in their praise: for them soybeans were simply 'one sort of legume'. However, we may pardon their reserve when we remember that without the benefits of modern nutritional analysis the Chinese were unaware of many of the qualities for which soybeans are most appreciated today... As far as the Chinese were concerned, the chief virtues of the soybean were that it produced good crops even on poor land, that it did not deplete the soil, and that it guaranteed good yields even in poor years, so that it made a useful famine crop. Soybeans, it was claimed, could be relied upon to yield between 5 and 10 bushels a *mu,* three or four times the yield from millet, and the *Fan Sheng-Chih Shu* says that in former times it was customary for peasants to plant 5 *mu* a head of soybeans to guard against famine. So soybeans were certainly useful, and they were widely grown in China from Chou times on, but they were not held in high esteem for their gastronomic qualities. When the irrigation works broke down in Ju-nan (modern Anhwei) in the 1st century, the local people composed a song complaining that all they had to eat was soybeans and yams, and in the 14th century Wang Chen writes: 'Black soybeans are a food for times of dearth; they can supplement [cereals] in poor years, and in good years they can be used as fodder for cattle and horses.'

"There were, however, several kinds of soybeans, and although some were thought to be fit only for fodder except in times of famine, others were considered to make wholesome porridges and gruels. But the form in which the Chinese most appreciated the soybean was fermented, made into sauces (*chiang*), relishes (*shih*) or beancurd (*tou fu*). These were generally made from the yellow variety of soybeans. The various fermentation processes were discovered quite early. *Chiang* is mentioned in the *Lun Yû* and was produced on a large scale in Han times, as was *shih;* the earliest beancurd is reported to have been made in the Han. We shall not dwell on soybean products here, as they are treated at length in section 40; suffice it to say that as well as improving the soybean's palatability immeasurably, the various fermentation processes also considerably improve its nutritional qualities."

"The term *hsiao tou* can probably be identified with the adzuki bean, *Phaseolus angularis* (Willd.) Wight, which is native to China and Japan."

Note: Dr. H.T. Huang, expert on the history of Chinese food and agriculture, says (4/91) she is at UCLA in the Dept. of Anthropology. The book has not yet been published.

10008. Chan, Ming K.; Dirlik, Arif. 1991. Schools into fields and factories: Anarchists, the Guomindang, and the National Labor University in Shanghai, 1927-1932. Durham, North Carolina: Duke University Press. [xi] + 339 p. Index. 25 cm. [176* + 651 endnotes]

• ***Summary:*** The short-lived National Labor University in Shanghai opened in Sept. 1927 and was forced to close in mid-1932. It was "both a reflection of the revolutionary concerns of its time and a catalysts for future radical experiments in education. Under the slogan: 'Turn schools into fields and factories, and fields and factories into schools,' the university attempted to bridge the gap between

© Copyright Soyinfo Center 2013

intellectual and manual labor which its founders saw as the central problem of capitalism and which remains a persistent theme in Chinese revolutionary thinking."

The Labor University was inspired by Chinese anarchists, who also played a central role in its founding. The most important founders were Li Shizeng [Li Yuying], and Wu Zhihui, who were also the most prominent figures among the Chinese intellectuals who (in the early 1900s) had introduced anarchism into Chinese radicalism while they were students in Paris. Li and Wu had close ties with Sun Yatsen (Sun Zhongshan), ties which they retained until, by the mid-1920s, they were widely regarded as "elders" of the Guomindang (p. 7).

"The Paris anarchists were a group of intellectuals who had been baptized into revolutionary activity in the early 1900s. Li Shizeng, the moving intellectual spirit of the group, had been living in Paris since 1902." Li studied biology in France, showed an internationalist orientation at an early age, and became a close friend of the family of French anarchist geographer Elisée Reclus, which probably started him on the path to anarchism. Li's beancurd factory in Paris was run by 30 Chinese laborers recruited from Li's village in China (p. 17).

The Paris anarchists believed deeply in progress and thus in science–the key to progress. "Revolution is nothing but cleansing away obstacles to progress." The two major ideologies of China–Confucianism and Daoism–had both advocated minimal government intervention in the affairs of society (p. 18).

Page 26 states that "Li first promoted his idea among the workers in the doufu [tofu] factory in Paris."

Li Shizeng is mentioned on pages 6-7, 18-20, 24-26, 43, 47, 51, 56-59, 61-68, 72, 84, 125-26, 132-33, 228-231, 174, 245, 233-34, 240, 248, 262-63, 273, 296, 299-301, 319, 327, 333, and 336. Address: 1. Senior Lecturer in History, Univ. of Hong Kong; 2. Prof. of History, Duke Univ., Durham, North Carolina.

10009. Chelf, Vicki Rae. 1991. Cooking with the right side of the brain: Creative vegetarian cooking. Garden City Park, NY: Avery Publishing Group Inc. viii + 283 p. Illust. incl. many color plates. Index. 28 cm.
• ***Summary:*** This vegetarian cookbook, which contains over 500 healthful recipes, shows a strong macrobiotic influence. The extensive glossary of ingredients includes good descriptions of adzuki beans, many sea vegetables, amaranth, amasake, gluten, gluten flour, koji, kudzu, miso, mochi, natto, natto miso, okara, quinoa, seitan, shoyu, silken tofu, soybeans, tamari, tempeh, tofu, and T.V.P. (Textured Vegetable Protein). All of these ingredients are used in recipes. There are at least 26 tofu recipes, 6 seitan recipes, and 4 tempeh recipes.

The author, who also illustrated this book, has been a vegetarian for 16 years. While living in Quebec, Canada, she wrote several French-language vegetarian cookbooks. The right side of the brain controls thoughts and actions that are creative, intuitive, spontaneous, and artistic, whereas the left side controls more logical, concise, analytical, and scientific thinking. Conventional education encourages development of the left side of the brain. This book encourages creative experimentation and improvisation with the recipes given.

10010. Ching, Emily; Ching, Ko-Shee; Austin, Theresa. eds. 1991. The stuffed steamed bao. Miss Freckles tofu. Cerritos, California: Wonder Kids Publications. 28 p. Illust. 21 x 21 cm. Series: Chinese Children's Stories: Tales about Food, No. 34. [Eng; Chi]
• ***Summary:*** This book contains two separate children's stories. There are different color illustrations of China on almost every page. The English text is generally on one page and the Chinese text on the other, but sometimes the English text is on the top of a page and the Chinese text at the bottom, with a full-page illustration on the facing page. The first story is about how Doggy developed this famous snack from Tienjin, China. Both the great minister, Yaun Shi-Kai, and the Empress Dowager praised this food.

The second story is about the development of Mabo Dofu, a famous hot and spicy tofu dish of Szechwan province. It was developed during the Qing (Manchu) dynasty [1644-1912] by a young lady who lived in Chengdu, the capital city of Szechuan–to support herself after her husband was killed. Originally it was a simple, ordinary dish one ate at home. Today it is world famous. Address: Cerritos, California.

10011. Ching, Emily; Ching, Ko-Shee; Austin, Theresa. eds. 1991. Monk's beef stew. Yue's tofu store. Cerritos, California: Wonder Kids Publications. 28 p. Illust. 21 x 21 cm. Series: Chinese Children's Stories: Tales about Food, No. 35. [Eng; Chi]
• ***Summary:*** This book contains two separate children's stories. There are different color illustrations of China on almost every page. The English text is generally on one page and the Chinese text on the other, but sometimes the English text is on the top of a page and the Chinese text at the bottom, with a full-page illustration on the facing page. The first story is about how monks followed the great Su Dong-Puo's instructions to make beef stew, seasoned with soy sauce. The "Pork Song" is the most popular poem that Su Dongpo wrote about food. Note: Su Dongpo [pinyin] (1036-1101) was a famous Song/Sung dynasty poet.

The second story begins by saying that "during the Warring States period [475-221 BC] the earliest Chinese tofu store was owned by the great general Yue Yi," general of the Yen state. He was also an obedient son. When he was young, his parents were quite old. They could not chew food very well since most of their teeth were missing. Yue Yi had always wanted to invent something tasty, which his parents

© Copyright Soyinfo Center 2013

could eat easily. Since many soybeans were planted around the family home, he soaked the beans, ground them to a paste, then cooked them." But his parents disliked this food, because it was full of grounds (okara). So they next day, after grinding the soaked soybeans with water, he strained them through a cotton cloth, then cooked the milk in a pot. This time his parents enjoyed his soybean soup.

One day Mrs. Yue's gums started to bleed. The doctor took her pulse, then said to Yue Yi that his mother had probably eaten too many soy beans, a heating food that increases the body's internal temperature. He gave her a medicine to lower her body's temperature. Yue Yi learned that the medicine contained gypsum [calcium sulfate], which has cooling effects. The medicine worked and her gums stopped bleeding. Then Yue Yi thought of putting gypsum in the soybean soup, so no one would need to worry about eating too much. The next day he bought some gypsum, ground it to a powder, then stirred it into the hot soybean milk. Surprisingly it turned into a gel. He and his parents found that it tasted delicious, refreshing, and tender.

Soon the neighbors same to his house to taste it. They too were pleasantly surprised "It is as tasty as meat." They called it the "mansion bean meat"–a name which caught on.

So Yue Yi opened a tofu shop to make and sell his new "mansion bean meat." His parents ate it, and lived long, healthy lives. Yue Yi traveled far and wide, teaching people how to make "mansion bean meat." Soon many elderly Chinese were enjoying this new food.

Many people in China decided to start their own business making "mansion bean meat" but they thought this three-character name was too long. So they combined the characters for "mansion" and "meat" to make the word "tofu"–in which *to* indicates "bean" and *fu* has the pronunciation of "mansion." Soon a new industry was born in China. "As a token of Yue Yi's kindness to the elderly and his spirit of unselfishness, the people recognized him as the grandfather of the tofu business and often offered incense in Yue Yi's name!" Illustrations show: (1) A hand-turned stone mill. The front of a tofu shop, with people carrying cakes of tofu. Photos show: (1) Large, flat blocks of tofu on wooden boards, uncut and cut into cakes. Note: The source, date, or authenticity of the story of Yue Yi in unknown. Yue Yi is not mentioned in Huang (2000) *Science and Civilization in China.* Address: Cerritos, California.

10012. Dieudonne, Marie-Paul; Dieudonne, Pascal; Saulnier, Alain; Ferrenbach, J.P. 1991. Les nouveaux aliments: Soja–algues [The new foods: Soya and sea vegetables]. Editions S.A.E.P., Ingersheim 68000, Colmar, France. 95 p. Color photos. Index of recipes. 22 cm. Series: Delta 2000. [Fre]
• ***Summary:*** Contents: Part I of the book (p. 4-53) is about sea vegetables, by Marie-Paul and Pascal Dieudonne; Part II (p. 54-91) is about soya, by Alain Saulnier and J.P. Ferrenbach. Introduction. Economic aspects: Soybean production (worldwide, USA, France), world production of protein from various sources in million tonnes (FAO 1976; wheat 51, soya 24.9, rice 23.5, corn 23.4, meat 21.9, fish 11.8, cow's milk 6.7), protein yield, nutritional composition of various protein sources. Main nutritional characteristics of soya. Products made from soybeans: Tofu, tempeh, soymilk (*le jus de soja*), soy sprouts, shoyu or soy sauce. The causes of this explosion [of interest in soya]. Recipes: Of the 35 recipes, 33 feature tofu, 1 features tofu and soymilk, and 1 features soy sprouts. A number of the recipes include fish.

At the end is a glossary (p. 92-93) and a recipe index (p. 94-95). This book, which contains many beautiful color photos, is probably published by or in cooperation with Sojinal (formerly Cacoja) of Colmar and Issenheim. Address: Colmar, France.

10013. Duong, Binh; Kiesel, Marcia. 1991. The simple art of Vietnamese cooking. New York, NY: Prentice Hall Press. xvii + 326 p. Foreword by Jacques Pépin. Illust. (color photos by Becky Luigar-Stayner). Index. 24 cm.
• ***Summary:*** About the authors: Binh Duong was born in Vietnam in Nha Trang, on a beautiful bay on the country's south central coast. He was raised in Da-Lat in the mountains; his father was an engineer. In 1975, near the end of the Vietnam war, he fled to the USA, where he became a well-known chef. He and Marcia Kiesel met in 1998 in the test kitchens of *Food & Wine* magazine.

"There is a certain finesse, a certain quality to Vietnamese cooking that sets it apart from other types of oriental food: Clean, clear sauces; a minimum of fat; an abundance of vegetables; and very distinctive flavors" (p. xi, from the Foreword, by Jacques Pépin).

The best place to eat for most people in Vietnam, especially if one does not have much extra money, is at "the food stalls in the open-air market. The atmosphere is convivial; the food as pure and fresh as it can be made."

"There are only a few basic ingredients in Vietnamese cooking, but they are vital ones: *nuoc mam,* or fish sauce, lemongrass, a handful of unusual herbs, rice paper, and rice flour" (p. xvi-vii).

The chapter on "Key ingredients" (p. 10-29) includes: (1) Bean curd, dried (tau hu ky [yuba]); it comes in thin sheets or rolled "bean sticks" [dried yuba sticks]. Sold in plastic packets or colorful paper packages. Can be fried until crisp or softened in water then simmered or sauteed.

Note: This is the earliest English-language document seen (Nov. 2011) that uses the term "tau hu ky" to refer to yuba. (2) Bean curd, fresh (dau khuon): Japanese name: Tofu. (3) Bean curd, fried (dau khoun chien): Cubes of fried tofu, especially delicious filled then simmered in a flavorful stew. Sold 10 cubes in a 2-oz pack. (4) Bean curd, red (chao): "A spicy wine-fermented tofu that imparts a reddish-brown luster and rich flavor to marinades." Better quality products are sold in glass jars or small crocks. (5) Hoisin sauce

© Copyright Soyinfo Center 2013

(Tuong ngot): From China, hoisin is made from soybeans, garlic, sugar, and spices. (6) Vietnamese bean sauce (Tuong cu da). Made from soybeans, cooked rice, and water. (7) Soy sauce (xi dau): Used quite a bit in Vietnam, especially by Vegetarian Buddhists who do not eat fish sauce. "Japanese soy sauces are light, pleasant and well suited to Vietnamese cooking."

Dipping sauces and condiments: Soy vinaigrette (Nuox xi dau giam, with "3 tablespoons soy sauce," p. 51). Rich bean sauce (Nuoc tuong ngot, with "1 heaping tablespoon pure Vietnamese bean sauce or Chinese bean paste," p. 54).

Soy related recipes: Garlic chive and tofu soup (Canh dau knuon, with three 3-ounce tofu cakes, cut into 2-inch pieces, p. 91. "Tofu, highly prized even by nonvegetarians because it is so nutritious, picks up the flavors it is cooked with and takes on a smooth and unusual texture that is quite pleasant"). Fried tofu stuffed with pork and mushrooms (Dau khuon don thit, with two "2-ounce packages fried bean curd, p. 242-43).

"Vegetarian cooking of the Vietnamese Buddhists" (p. 269-96). Begins with a page about how Buddhism came to Vietnam and its place in modern Vietnamese life and food. Vegetarian tofu soup (Canh chua chay). Vegetarian summer rolls (Goi cuon chay, with tofu). Vegetarian spring rolls (Cha gio chay, with firm tofu cakes and Soy dipping sauce). Fried tofu salad (Goi dau khuon). Carrot, jicama, and tofu salad (Goi chay, incl. three 3-ounce tofu cakes and "1 large sheet dried bean curd [yuba], broken in half crosswise"). Fried tofu with green beans (Dau khuon xao dau). Grilled tofu and vegetables (Dau khuon va la ghiem nuong vi). Curried tofu sauté (Dau khuon xao la lan, with firm tofu cakes). Lemongrass-scented vegetable sauté (with tofu). Fried vegetables with noodles (with tofu and 1 large sheet of yuba). Squash and sweet potato stew with coconut and peanuts (Kiem, with yuba and tofu). Fried tofu with tomato and vegetables (Dau khuon xao thap cam). Hoisin dipping sauce (Nuoc cham tuon). Soy dipping sauce (Xi dau cham, with soy sauce). Address: 1. Chef and owner of the Truc Orient Express, Hartford, Connecticut; 2. Assoc. director of the test kitchen and a food writer at *Food & Wine* magazine.

10014. Fukushima, Danji. 1991. Recent progress of soybean protein foods: Chemistry, technology, and nutrition. *Food Reviews International* 7(3):323-51. [29 ref]

• ***Summary:*** Contents: Abstract. Introduction. Chemistry: Chemical composition of soybeans (Soybean globulins composed of four major components–2S, 7S, 11S, 15S), importance of three-dimensional structures of soybean protein molecules in food processing, influence of biologically active substances in soybeans on food processing. Technology: Traditional soybean protein foods and recent progress in their technology (soy milk {remove the hypocotyl and hull to remove off flavors; Soyasaponin A has the strongest off flavor}, tofu, kori-tofu, yuba), fermented soybean protein foods: Application of bioreactor for soy sauce production, nontraditional soybean protein foods and recent progress on their technology, recent progress on new soybean protein foods in which soybean proteins are the key material (modified abura-age, modified ganmodoki, deep fried texturized soy protein nuggets). Nutrition: Recent progress on nutritive values of soybean proteins (Soybean proteins have an amino acid score of 100 for persons more than 2 years old), physiological function of soybean proteins (they lower cholesterol levels when used to replace animal proteins). Future of soybean protein foods (Kikkoman fermented soy sauce is well on its way to becoming a universal seasoning. Tofu and tempeh also seem to have a bright future).

"The most important chemical reactions during the process of soybean protein foods are the intermolecular reactions among the residues exposed on the surface of the protein molecules through the denaturation process. In native soybean protein molecules, most amino acid residues responsible for the reactions-such as cysteine (-SH), cystine (S-S), and hydrophobic amino acid residues-are buried in the inside region of the molecule, inaccessible to water. These residues become reactable with each other through the exposure from the inside by heat denaturation during processing. The unique textures of soybean protein foods, such as tofu, kori-tofu, yuba, and texturized products produced by extruder, etc., are the results of both the intermolecular interchange reaction between the exposed -SH and S-S groups and the intermolecular hydrophobic reaction among the exposed hydrophobic amino acid residues. The exposure of amino acid residues is also important for the hydrolysis of soybean proteins by enzymes, through which soy sauce is produced, because the cleavage of the peptide bonds is carried out after binding between the active sites of the enzymes and the enzyme-specific amino acid residues exposed through denaturation." Address: Kikkoman Corp., 1-25 Kanda Nishiki-cho, Chiyoda-ku, Tokyo 101, Japan.

10015. Homma, Gaku. 1991. The folk art of Japanese country cooking: A traditional diet for today's world. Translated by Emily Busch. Berkeley, California: North Atlantic Books. xii + 270 p. Illust. Glossary and index of Japanese words. Recipe index. 26 x 20 cm.

• ***Summary:*** This is a remarkable book by a remarkable man, with many deep insights into both traditional and modern cultures in Japan and the USA; it gives a unique, authentic view of Japanese culture, and makes liberal use of the Japanese names for things, such as foods, utensils, techniques, houses, etc. He uses the Japanese words first, then explains what they mean (in parentheses) in English. Thus the book makes it easy and enjoyable to learn Japanese food-related words.

Moreover, the book is brimming with interesting information about traditional soyfoods in Japan.

© Copyright Soyinfo Center 2013

The author was born in 1950 in Akita, capital of Akita prefecture, in northeastern Japan. Starting as a young boy, he studied Aikido with the founder, Morihei Ueshiba (1883-1969), as a live-in student in the small town of Iwama, in Ibaragi [Ibaraki] prefecture. He was curator of the Lake Ogawara Folk Art Museum, in Aomori prefecture, northeastern Japan, where he worked for about 4 years and learned much of the most interesting tradition, history and other information in this book. Since 1977 he has been living in Denver, Colorado.

Contents: Preface. Foreword. 1. Introduction. 2. The background of country cooking–Folk art and custom. 3. The background of Japanese staple foods. 4. The background of country cooking–Basic preparation. 5. Country meals. Closing. Lake Ogawara Folk Art Museum (*Ogawara Minzoku Hakubutsukan*), located in Furumagi, Misawa City, Aomori prefecture. Founded by Mr. Yukio Sugimoto. Officially opened 29 Aug. 1961. Displays over 15,000 pieces of folk arts and crafts.

Edamame (green soybeans, p. 49-50). In and around his home town, Aug. 15 was too early for harvesting fruits, so they celebrated *mame meigetsu* on Sept. 15. The main food offered at this festival was *eda mame* (green soybeans) along with boiled chestnuts, other fruits, and sweet potatoes. The name of the festival is derived from the word *mame*, which means "bean." In other areas the festival might be called *kuri meigetsu* ("chestnut full-moon") or *imo meigetsu* ("sweet potato full-moon")–depending on the main crop produced. All of the various crops harvested were offered to the moon.

Concerning soybean oil (p. 73): The section titled "Abura–Oils" states: In the Lake Ogawara Folk Art Museum an antique wooden tool (*abura shibori*, see photo) used for extracting oil is on display. The seed or food "to be pressed was placed between two pieces of wood and wedges were hammered into place with a big wooden mallet, driving the pieces together.

"In the Lake Ogawara area this method was used to make rapeseed oil, a popular cooking ingredient." Clearly, the oil was produced in small quantities. "The traditional Japanese farmer was never able to produce enough oil for deep-frying foods."

"There are many sources for natural oils in Japan. From sesame seeds we obtain *goma abura,* from Japanese nutmeg we obtain *kaya abura,* from corn we obtain *kimi abura,* from peanuts we obtain *rakkasei abura,* and from soybeans we obtain *daizu abura."*

Concerning yuba: Although very healthful, yuba (dried soymilk film) is not as popular as most other Japanese soy products. "Tofu is made by bringing soybean 'milk' to a boil. As it boils, a thick film forms on the surface. This film is picked up on a cloth and laid out to dry. The resulting food is yuba.

Note 1. This is the earliest English-language document seen (Oct. 2012) that uses the term "dried soymilk film" to refer to yuba.

"I have served yuba to people visiting from Japan and had them ask me what it was." Yuba is popular in China and parts of southern Asia. It can be eaten fresh or dried. "Yuba is available in Oriental markets in the United States, but chemicals have usually been added during production." A photo shows various dried yuba sheets and dried yuba sticks on a shallow, round, woven Japanese tray (p. 92).

Tofu ("soybean cake"), yuba ("soybean film") and natto ("fermented soybeans") are all examples of soybean products (*daizu seihin*) (p. 139).

In the section on *Nimono*–"Poached dishes" is a recipe for yuba and kikurage ("Soak 2 oz. yuba and cut into 1-inch pieces," p. 186).

Concerning *tonyu* (soymilk): It is mentioned only in the recipe for homemade tofu–using "2 cups *daizu* (soybeans) and ½ teaspoon nigari (coagulant)" (p. 142-43).

Note 2. Koji, miso, miso soup, miso-dama, natto, shoyu. tamari, and tofu are each discussed in detail in separate records. Address: Former owner and head chef, Domo restaurant, Denver, Colorado. Founder and chief instructor Nippon Kan Aikido and Cultural Center, Denver, Colorado.

10016. Homma, Gaku. 1991. Miso, miso soup, miso-dama, and tamari (Document part I). In: Gaku Homma. 1991. The Folk Art of Japanese Country Cooking: A Traditional Diet for Today's World. Translated by Emily Busch. Berkeley, California: North Atlantic Books. xii + 270 p.

• ***Summary:*** This is a remarkable book by a remarkable man, with many deep insights into both traditional and modern cultures in Japan and the USA; it gives a unique, authentic view of Japanese culture, and makes liberal use of the Japanese names for things, such as food, utensils, techniques, homes, etc.

Here we will discuss only those parts of the book relating to miso, miso soup, miso-dama, and tamari: The author arrived in Denver, Colorado, in 1977. One day an Aikido student of his took him to a local health food store. In the Japanese section he found hijiki, wakame, nori, miso, and soba. To his surprise, he found that although the foods were expensively priced, each was of "third-rate quality" (p. 5).

He started a Japanese restaurant in Denver, but never advertised it as a health food restaurant. Would anyone serve unhealthy food in a restaurant? Occasionally there would be customers with questions such as, "What kind of miso or shoyu do you use?" He realized that many customers were worried about their diets, rather than being grateful that they had enough food and that they could had the freedom to choose to eat whatever they wanted (p. 11).

He was born in Akita, in northeastern Japan, where the winters are harsh, and traditional people stored foods for winter survival. Some vegetables were buried in miso (soybean paste). Some soybeans were also preserved by making them into miso, which was a *hozonshoku* (preserved

© Copyright Soyinfo Center 2013

food) (p. 16, 18).

During the Kamakura period [1185-1333] Zen Buddhism became very popular with the samurai. Since Zen forbade the consumption of any warm-blooded animals, the diet was strongly affected. One popular food was *"kanbutsu* (lightly salted, dried fish) flavored with a mixture of soy sauce and miso called hishio" (p. 26). A photo shows Zen priests, heads shaved, eating in a monastery, Note: Hishio was similar to Chinese soybean jiang, a mash with the consistency of thin congee [rice porridge] or apple sauce; it could be separated by straining or filtering into liquid soy sauce [like tamari], with the solid residue being somewhat like miso, although with less flavor.

During the Muromachi period [1336-1573], Zen Buddhism continued to influence the Japanese diet, which consisted mainly of rice, cooked vegetables, and an early form of miso named *namé miso* ("lick miso" [finger lickin' miso]) (p. 27).

In traditional Japanese farmhouses, fish or fowl were sometimes marinated with salt and miso or tamari (juice from making [soybean] miso), "flash-seared on both sides to seal in juices and flavor, then stuck into the *venkei* (bamboo basket stuffed with rice straw used to store foods above the sunken open-hearth fireplace {*irori*}) to be smoked" (p. 32).

In traditional farmhouses, if there was more meat than could be eaten during lunch and dinner, "the rest was marinated in miso and tamari. The miso would keep the meat from spoiling during the night. The next morning the meats were rinsed lightly, seared, and put in the *venkei"* for the rest the working day. When the family returned for a meal, the meat was ready to eat" (p. 38).

Fishermen would mix their cooked rice with *umezu* (the juice left over after pickling umeboshi salt plums). And they would eat fresh fish with their *umezu* rice balls. First they would split the fish in half from the inside out–without using a knife. Then they would dip the fish in tamari or miso, and eat it uncooked, on the spot. Sometimes the tamari was mixed with wasabi (Japanese green horseradish) as a dip. Wasabi is a sterilizing agent, served with sushi to this day (p. 39).

A dish found in Homma's home town of Akita is called *kayaki* or *kai yaki,* which means "shell bake." "A large scallop shell is placed over the fire and filled with fish, tofu, and seasoned vegetables. Miso, soy sauce, or *shottsuru* (juice from pickling fish) as added for taste" (p. 40).

In the Owu mountain range of northeastern Japan, men whose livelihood depends primarily on hunting are called *Matagi.* "These people also farmed, but they were takers of life." So their lives, like those of the fishermen, were restricted and controlled by religious customs. On long hunting trips, the only food or "flavoring they carried was a dried ball made out of soybean paste called *miso dama.* All they had to do was to add water to make miso or miso soup (p. 42).

After the Tokyo Olympics in 1964, "Japan became a country inspired by consumerism." Japanese wanted to be like Americans. In "modern" families, the husband and wife both began to work outside the home. In the evening, just as the husband walked through the door, the wife would tear open a pouch of instant *misoshiru* (miso soup) and add hot water–"looks so real and tastes so good"–as they chased the American dream (p. 46).

Table manners: "When you are being served a meal, your chopsticks should lay horizontally in front of you at the close edge of the table. Your rice bowl is on your left and your miso soup is on the right..." In Japanese restaurants in the USA, when serving dinner, they usually serve a salad and then *misoshiru* or *osumashi* (clear soup) before the meal (p. 56-57).

When you are a guest in a Japanese home, you "can only ask for *misoshiru* a second time. This is very formal; if it is a casual situation the rules are not as strict, yet manners are important in all situations" (p. 58).

Slightly sour Chinese cabbage mixed with tofu and chopped *negi* (Japanese onion [or leek]), "simmered with water, miso, and *sakekasu* (rice wine lees), makes a delightfully sour dish..." "The first bulbs to appear after the winter snow melted belonged to the *fuki* (butterbur) plant. "These bulbs were seasoned with miso and roasted, or made into *sunomono"* (seasoned with rice vinegar) (p. 66).

"Miso and tamari–soybean by-products: Making miso was traditionally a community effort that began May 21st or 22nd (*haru higan* or the spring equinox)." Soybeans are soaked overnight, boiled, drained, and poured into a large tub. Men wearing rice-straw shoes to protect their feet crush the beans. The women then shape the crushed beans, while they are still warm, into pyramids, squares, or balls, depending on the locality [just like with *meju* in Korea]. After the shapes have cooled, they are tied with rice-straw rope and hung under the eaves of the house (see 2 photos, p. 68). When the naturally occurring fungus [mold] begins to grow on the soybean shapes, it is said that "the flower has opened." When the shapes are covered with a fragrant bloom of mold, they are transferred to the *misodaru* (large cedar miso tub). Just before miso making time this tub is filled with water or weighted with rocks and soaked in a river so that the wooden staves would swell tight. It is then tested for leaks. Salt and water are added and the tub is covered. From time to time the cover is removed and the miso is stirred to enhance the fermentation process. This farmhouse method of making soybean miso is simpler than that which requires the use of koji, and the miso has a saltier taste.

While soybean miso is fermenting, a dark, rich, delicious liquid gathers at both the top and bottom. This is collected and called tamari (or miso-damari), and is used in traditional farm houses like soy sauce. In the countryside, shoyu (soy sauce) was traditionally made "as a cash crop to be sold in the cities. The mountain people and country farmers couldn't

© Copyright Soyinfo Center 2013

afford shoyu, so they used tamari or taremiso instead.

As a child, it was Homma's job to crush the boiled soybeans. His family used koji. The traditional farmer keeps a storage shed for the tubs of miso and pickles near his house–but not too near. "City people sometimes use the phrase 'you smell like miso' to mean that you come from" the countryside.

"Sometimes on larger farms, miso was stored for up to eight years. To have old miso in your house meant that you had a large, prosperous family" (p. 67-69). Continued. 10017. Homma, Gaku. 1991. Natto (Document part I). In: Gaku Homma. 1991. The Folk Art of Japanese Country Cooking: A Traditional Diet for Today's World. Translated by Emily Busch. Berkeley, California: North Atlantic Books. xii + 270 p.

• ***Summary:*** This is a remarkable book by a remarkable man, with many deep insights into both traditional and modern cultures in Japan and the USA; it gives a unique, authentic view of Japanese culture, and makes liberal use of the Japanese names for things, such as food, utensils, techniques, houses, etc. He uses the Japanese words first, then explains what they mean (in parentheses) in English. Thus the book makes it easy and enjoyable to learn Japanese food-related words. Moreover, the book is brimming with interesting information about traditional soyfoods in Japan.

This record will focus on natto, which originated in Japan in the northeastern provinces (*Tohoku Chiho*) where the author lived.

In the index (p. 276), under "Soybean products (*daizu seihin*)," he defines three different types of natto: (1) Fermented soybeans (natto). (2) Slightly crushed natto (*hikiwari natto*). (3) Whole bean natto (*tsubu natto*). He notes that natto is discussed mainly on page 139.

In Chapter 3, "The background of Japanese staple foods," in the section titled "Products used daily" (p. 94-100) is a subsection on "Natto–Fermented soybeans" (p. 97): "*Natto* is a very popular item on the Japanese breakfast table, but either you love it or you hate it; there is no middle ground. *Natto* is boiled soybeans that have been fermented by introducing the natto fungus [sic, natto bacterium, *Bacillus subtilis*]. Open a package of natto and the first thing to hit you is a very strange aroma. If you stir it, it becomes sticky. Someone watching this might say 'yech.' The translator of this book, Emily, is one of these people. Although she has lived in Japan and traveled extensively in Southeast Asia, she says 'Natto is not for me.'

"Like the tofu peddler, the natto peddler came every morning. Now natto is available throughout Japan, but in the past, because of the growing conditions needed to produce it, many people had not eaten natto in southern Japan. Some of the visitors I have had at Nippon Kan, especially the young [Japanese] visitors who lived south of Osaka, had never tasted natto.

"The weather in northern Japan is favorable for the natto fungus [sic]. Traditionally it was common for the farmers to make their own natto at home. I have tasted homemade natto from many different parts of Japan. Like most traditional foods, the taste and texture varies depending on the location and the family recipe.

"The first natto was discovered, it is thought, when soybeans stored for safekeeping became contaminated with water and created the appropriate environment for the natto fungus [sic]. Historically, many Japanese foods were discovered accidentally, such as in the course of storing or preserving foods.

"Since its initial discovery, the process has been isolated and developed in a controlled procedure.

"To eat natto, pour it from its container into a bowl and stir vigorously with chopsticks until it turns sticky. Then add miso or tamari and shoyu or umeboshi (pickled plums) to suit your taste. Spoon it over rice and eat. Although some people may not agree, I find it tasty.

"I met a very old woman in Denver [Colorado, USA] who was a wonderful traditional Japanese cook. She knew all of the techniques for making homemade sake, natto, tofu, umeboshi and tsukemono–everything in her kitchen was homemade. Sometimes this old woman would make natto and bring it to my home. It did not taste like the natto available in grocery stores. She fermented the soybeans in a styrofoam cup using plastic bread wrappers for a cover. She then wrapped the cups in layers of crumpled newspaper as insulation to keep them warm. So you see, traditional Japanese methods can have a place in modern America."

In Chapter 5, "Country meals," the section titled "Breakfast (*Choshoku*)" (p. 120-58) notes (p. 121-22): "The most simple breakfast includes *ichihan, ichiju,* and *issai,* which means one bowl of rice, one bowl of soup, and one side dish. This simple breakfast is served during religious training, eaten for four or five days consecutively before a fast, or eaten to change one's diet or to lose weight.

"Prior to a fast, this meal is served in less and less quantity until the first day of the fast when *okayu* [rice porridge] is served... Traditionally, the *ichihan* or *meshi* (cooking rice) used for the breakfast meal is brown rice or barley or 60% white rice mixed with 40% barley. The *ichiju* is either *kombu*- or *shiitake*-based miso soup or a clear soup. The *misoshiru* (miso soup) contains a good balance of *tofu* and vegetables. There are many *issai* (called *okazu*) but they can be divided into the following basic categories: *tsukemono* (a variety of vegetables pickled with *miso,* salt, *shoyu,* or *nuka* (rice bran)); *ohitashi* (a variety of vegetables boiled quickly and flavored with *shoyu*)*; daizu seihin* (*tofu,* fried *tofu* cutlets, grilled *tofu, natto* and other soybean products); *yakimono* (fish grilled either plain or marinated in

© Copyright Soyinfo Center 2013

shoyu, miso, sakekasu {rice wine lees}, or *nuka*)*;* and *jobina* (a variety of dishes prepared and stored in the refrigerator to be eaten anytime).

"One or more side dishes are selected from these categories; you don't eat them all in one meal! Every morning you can arrange a new combination. Interestingly, as you increase the number of side dishes the portions of each decrease, so that you are always serving the same amount of food...

"Long ago Japanese people did not eat sitting around large tables. When sitting around the *irori* [sunken fireplace], a small tray was placed on the right side of each person. On each tray was a small side dish plate... After the meal, warm water was poured into their rice bowl and they used their chopsticks to clean it. After a sip of the water was taken, it was poured into the soup bowl, swirled around, sipped again, poured into the side dish plate, swirled and drunk... No washing required! We can conclude from this that the foods being eaten at the time were not oily, as the dishes could be easily cleaned with hot water." Note: This may well be the origin of the Zen *oryoki* (nested eating bowls and chopsticks wrapped in white cloth) and its ritual.

Also in Chapter 5, under "Breakfast," is a section on *"Daizu seihin*–Soybean products," which includes a subsection on "Natto–Fermented soybeans" (p. 139): *Natto* is a very popular breakfast food made by stuffing boiled white [yellow] soybeans into a *tsuto* (casing made from rice straw) and leaving them to sit in a warm, darkened room. Before they are stored, a natural natto fungus [sic, bacterium] is introduced to start the fermentation process. The result is *natto,* which has a sticky 'gooey' texture and a pungent odor. Most Americans in my experience turn their noses up at the sight (and smell) of *natto.* Continued. Address: Former owner and head chef, Domo restaurant, Denver, Colorado. Founder and chief instructor Nippon Kan Aikido and Cultural Center, Denver, Colorado.

10018. Homma, Gaku. 1991. Tofu, grilled tofu, and fried tofu (Document part). In: Gaku Homma. 1991. The Folk Art of Japanese Country Cooking: A Traditional Diet for Today's World. Translated by Emily Busch. Berkeley, California: North Atlantic Books. xii + 270 p.

• ***Summary:*** This is a remarkable book by a remarkable man, with many deep insights into both traditional and modern cultures in Japan and the USA; it gives a unique, authentic view of Japanese culture, and makes liberal use of the Japanese names for things, such as food, utensils, techniques, houses, etc. He uses the Japanese words first, then explains what they mean (in parentheses) in English. Thus the book makes it easy and enjoyable to learn Japanese food-related words. Moreover, the book is brimming with interesting information about traditional soyfoods in Japan.

This record will focus on tofu: "Tofu, soybean cake–also called at the time [14th century] *shira kabe* or white adobe–was introduced by Zen Buddhist priests. Today, nearby most temples are small stands offering tofu handmade by the priests" (p. 27).

"A dish that was found on both this island [located south of Tokyo, 4 hours by boat south of Hachijô-jima] and in my home town [of Akita] was called *kayaki* or *kai yaki. Kayaki* means shell bake. A large scallop shell is placed over the fire and filled with fish, tofu and seasoned vegetables. Miso, soy sauce, or *shottsuru* (juice from pickling fish) are added for taste" (p. 40).

His home town, Akita, is still famous for a dish named *kiritampo;* it is white rice that has been cooked and wrapped around a wooden handle about 16 inches long. The handle is secured in the *irori* [sunken fireplace] next to the fire to sear the outer layer of rice. Then the handle is removed. The Matagi–one tribe of mountain hunters in the Owu range near Akita–packed this same *kiritampo* for their long hunting expeditions. Originally the Matagi added mushrooms added mushrooms they found under the autumn leaves to complete the dish. "Today we add tofu and other ingredients to make a dish that can be found in the finest traditional restaurants" (p. 42-43). Also on page 43 the author explains the origin of sukiyaki; *suki* means spade and *yaki* means barbecue.

In the section on vinegar and pickling: Lightly sour Chinese cabbage mixed with tofu and chopped negi (Japanese onion / leeks), simmered with mater, miso and sakekasu (rice wine lees) makes a delightfully sour dish (p. 66).

"Mame rui–Beans: The most popular product made from soybeans is tofu and I will go into tofu in greater length in the section on products used daily. Here we shall explore how to safe fresh tofu for future use.

"A block of tofu can be cut into half-inch squares and freeze-dried to make *shimidofu.* Another common name is *koyadofu,* named after Zen monks who lived on Mt. Koya near Kyoto who first discovered this process.

"We don't need to go back this far in history to find *shimidofu.* It was common practice for farmers to hang tofu under the eaves of the house to dry. Although tofu came from China, the making of *shimidofu* is Japanese.

"The *shimidofu* available in markets today is sometimes processed with ammonia. There is a three-month shelf life for *shimidofu.* If it is too old it won't soften again when soaked in water. Of course, it also doesn't taste very good.

"If the temperature where you live drops below 32º Fahrenheit for consecutive periods you can make *shimidofu* yourself. You can't make it in the freezer. You need to set it out where strong cold winds blow. Tofu turns yellow when it is freeze dried. Don't worry, this is natural."

Note 1. This is the earliest English-language document seen (April 2013) that uses the term *shimidofu* to refer to dried-frozen tofu.

"Tofu is also preserved through pickling in salt. In Japan, tofu pickled in salt is no longer available. Salt

© Copyright Soyinfo Center 2013

pickling is still popular in China and in other parts of Southeast Asia (p. 92).

The chapter titled "Products used daily" begins: "Tofu–Soybean Curd: Americans frequently ask me what Japanese people eat on a daily basis. Sometime I ge t disappointed looks when I tell them. I think they expect me to describe some strange, exotic dishes never heard of here in the United States. In the larger cities and towns of Japan today, the younger generation's diet is not so different than here in the U.S. Milk, cheese, and ham are common sights in most young family homes.

"Visiting a home in the country which continues to practice the old customs is a slightly different story. In these homes (almost stubbornly) mostly traditional foods are served. If there is a difference between the traditional households of the past and present, it is in the way the foods are procured, not the foods themselves. Instead of making most everything at home, the people of the countryside visit the grocery store. The flavors therefore are not quite as fresh and good as they used to be.

"When I was a child, the tofu peddler came by early every morning blowing his horn and yelling, 'Tofu, tofu!' in a loud voice. His bicycle was equipped with a metal washtub filled with fresh water and the tofu he had made himself that day. He also carried other products, like *age* (deep-fried soybean puff), *yakidofu* (broiled tofu), *atsu age* (deep-fried tofu cutlet), and konnyaku (devil's tongue yam cake).

"The tofu peddlers made tofu in larger blocks than you buy in the United States. One block was called a *cho.* You could buy a half or quarter *cho* if you wished.

"The tofu peddler was very familiar with our family and knew how much tofu or *age* we used daily. Knowing how much we needed, he filled the time with pleasantries and friendly conversation as he filled our bowl with the day's supply.

"Traditionally, the old tofu makers used the mineral nigari (bittern), found naturally in fresh sea water, as a solidifier during processing. The tofu found in the supermarkets is made with man-made solidifiers. The nutritional value of mass-produced tofu is rather less than tofu made in the traditional fashion. Tofu was brought to Japan by Japanese priests who went to China to study Buddhism. Today, for example, near the old temples of Kyoto there are tofu shops and restaurants that date back many, many generations.

"From its introduction, tofu was eaten by the people of the imperial courts. It was not until the Edo period (1603-1867) that tofu became popular among all classes. Since those earlier times tofu has become a major part of the Japanese diet, one of its daily foods.

"When I was a curator, I spent some time with an old man who made tofu for me in the style that was originally taught to him. I was surprised; his tofu was so hard you could tie blocks of it up with a rope and carry it. Naturally, the solidifier he used was nigari from fresh ocean water.

"Proverbs regarding tofu have been told for generations: something impossible is said to be 'like breaking your teeth eating tofu' or 'like picking up tofu with a pair of tongs.' A spoiled person 'has his tofu peeled.' Remarking that anyone can change: 'even tofu gets tight if cooked long enough.' I heard these proverbs on more than one occasion from my parents!

"The owner of one large tofu company in Denver told me about the first time he took a fresh tofu sample to one of the large local markets. The buyer took one bite and said, 'This is not tofu.' The new tofu maker was surprised and returned home to make another batch, believing in the traditional techniques he knew well. Again the buyer took a bite and said, 'This is not tofu, it is not sour. I have real tofu brought to me from California by truck. This tofu does not taste like the tofu I get from California.' I started laughing before he finished the story. The tofu shipped from California had begun to spoil en route. The buyer, not having anything to compare it to, thought all tofu was supposed to taste sour!

"Fresh tofu is a food high in nutritional value. However, because it has a high water content, it spoils easily. When you are buying tofu, I recommend you buy it at a store that has a good turnover rate, to make sure it is fresh. A bulging plastic cover indicates that gas is being released and the tofu is no longer fresh. After you have opened the package, submerge the tofu completely in fresh water. Tofu absorbs odors easily, so it needs to be covered. If refrigerated, tofu should last for three or four days.

"While I was running my restaurant, young mothers sometimes asked me for raw tofu for their children, but I always boiled it first. Like a sushi chef serving raw fish, it was my responsibility not to serve anything that might have spoiled" (p. 96).

Photos show: (1) Ishiusu–hand-turned stone mill grinding soybeans (p. 94). (2) Tofu products on a woven bamboo tray (1) Yakidofu. (2) Ganmo. (3) Tofu. (4) Atsuage. (5) Koyadofu. (6) Age (p. 96) (Continued). Address: Former owner and head chef, Domo restaurant, Denver, Colorado. Founder and chief instructor Nippon Kan Aikido and Cultural Center, Denver, Colorado.

10019. Homma, Gaku. 1991. Tofu, grilled tofu, and fried tofu (Document part). In: Gaku Homma. 1991. The Folk Art of Japanese Country Cooking: A Traditional Diet for Today's World. Translated by Emily Busch. Berkeley, California: North Atlantic Books. xii + 270 p.

• ***Summary:*** Continued: "Tofu has been promoted here in the United States as a 'new age' food that is very good for you. Please remember that tofu distributed on a large scale and produced with chemical solidifiers may not be quite the same as the traditional product you may have read about. I suggest you boil the tofu just a little bit before serving, especially to children.

© Copyright Soyinfo Center 2013

"Okara–Soybean mash: If you visit a tofu factory you will notice that the process results in two products. Unohana or okara is the soybean mash by-product. It used to be that the small tofu maker would give okara away. At large tofu factories today it is sold for animal fodder.

"Although the nutritional value of okara is high, it has always had the image of a by-product and was not marketable. This has been a problem for tofu makers. With two products of similar nutritional value, one was in demand with his customers, and one he kept in the back room!

"Today okara has become a popular diet food because it is filling, nutritious, and low-calorie. Larger Japanese markets in the U.S. now carry okara.

"When I was a child, the tofu shop gave okara away, but to use it in cooking you needed to add many other ingredients. Therefore people used to say that okara was free but expensive" (p. 94-97).

Note: In the index (p. 245), okara or unohana is defined as "Bean curd lees." This is the earliest English-language document seen (April 2013) that uses the term "Bean curd lees" to refer to okara.

When the author he was a child, he remembers the morning sounds of chopping as the tofu and scallions were cut for miso soup (p. 104).

The section on "Breakfast" states: "The most simple breakfast includes *ichihan, ichiju,* and *issai,* which means one bowl of rice, one bowl of soup, and one side dish. This simple meal is given during religious training, eaten for four or five days consecutively before a fast, or eaten to change one's diet or to lose weight." "The *ichiju* is either a kombu- or shiitake-based miso soup or a clear soup. The misoshiru (miso soup) contains a good balance of tofu and vegetables." "There are many *issai* (called *okazu*) but they can be divided into the following basic categories... *daizu seihin* [soy products] (tofu, fried tofu cutlets, grilled tofu, natto, and other soybean products) (p. 121-22).

The section titled "*Daizu seihin*–Soybean products" includes a subsection on "Tofu–Soybean cake" which begins: "Tofu's popularity is increasing rapidly in the United States. It is carried by most major grocery chains." Many different tofu products are available. "Occasionally, I still see tofu sold in a container which resembles a Chinese take-out box." "We have offered tofu-making classes at Nippon Kan. In these classes I don't think the end product, which can be purchased at the grocery store for $1 to $1.50, is as important as the time shared together experiencing part of Japanese culture.

"There are many tofu-related parables: trying to talk to someone who won't listen is like trying to hammer a nail into a block of tofu."

Four basic tofu recipes are given: (1) Yakko–Soft tofu served chilled. (2) Yaki dofu–Sauteed tofu. (3) Iri-dofu–Scrambled tofu (p. 139-41).

On pages 142-43 is a detailed, illustrated description of how to make tofu at home, using 2 cups dry soybeans and ½ teaspoon nigari.

In the section on breakfast recipes for *misoshiru* (miso soup) are recipes for: (1) Tofu to wakame. (2) Sogi tofu to negi–sliced tofu and Japanese leeks. (3) Kuzushi tofu to horenso–Mashed tofu with spinach. (4) Kyabetsu to age–Cabbage with deep-fried tofu puff. (5) Moyashi to age–Soybean sprouts with deep-fried tofu puff. (6) Kinusaya to age–Snow peas with deep-fried tofu puff (p. 153-56).

In the section titled "Dinner (Yushoku)" under aemono recipes are recipes for: (1) Shiraae–Vegetables and tofu flavored with miso. (2) Kaiso no ume shiraae–Sea vegetables and tofu flavored with miso and pickled plum. (3) Burokkori no shiraae–Broccoli and tofu flavored with miso and pickled plum (p. 178-79).

In the section on Nimono recipes (Poached dishes) are recipes for: (1) Hijiki or arame (with 1 age puff and 1/3 block had tofu). (2) Okara (soybean mash) sauteed with vegetables. (3) Koyadofu no tamagoni–Freeze-dried tofu with soft scrambled egg. (4) Niyakko tofu–Soft scrambled eggs with tofu, spinach and mushrooms. (5) Age no fukuroni–Stuffed deep-fried tofu puffs. (6) Iridofu–Scrambled tofu flavored with miso (p. 186-90).

In the section on Yakimono (grilled dishes for dinner) are recipes for: (1) Tofu no misozuke yaki–Broiled tofu pickled in miso. (2) Tofu no dengaku–Sauteed tofu with a variety of miso sauces. (3) Gisei dofu–Tofu omelette. (4) Yaki dofu–Fried tofu. (5) Age no hasamiyaki–Grilled tofu puffs (p. 210-12).

In the section on Agemono [deep-fried] recipes is a recipe for: (1) Age dofu–Deep-fried tofu.

In the section on Nabemono [one-pot cookery] recipes are recipes for: (1) Yudofu–Tofu in hot water. Kaisen yudofu–Tofu and seafood casserole. (3) Niku yudofu–Tofu and meat casserole. (4) Sankai yudofu–"Surf and turf" with tofu. (5) Torinabe–Chicken and vegetable casserole flavored with soy sauce. (6) Buta nabe–Sliced pork and vegetable casserole flavored with soy sauce (p. 222-24).

In the section on Sukiyaki nabe–Casseroles cooked with little liquid are recipes for: (1) Gyuniku sukiyaki–Beef sukiyaki (with yakidofu). (2) Butaniku sukiyaki–Pork sukiyaki (with yakidofu) (p. 230-31). Address: Former owner and head chef, Domo restaurant, Denver, Colorado. Founder and chief instructor Nippon Kan Aikido and Cultural Center, Denver, Colorado.

New York: John Wiley and Sons. xxi + 710 p. See p. 127-29. Proceedings of the Second National Symposium, New Crops: Exploration, Research, and Commercilization. Indianapolis, Indiana, 6-9 Oct. 1991. [7 ref]

• ***Summary:*** In 1990 Purdue University established a New

© Copyright Soyinfo Center 2013

Crops and Plant Products Center to encourage crop diversity, with the hope that a coordinated effort can overcome obstacles to new crop development. Jules Janick of the Dept. of Horticulture is the Center's Director.

In 1990-92 one of the projects funded for the New Crop Initiative was "Development of Edible Soybeans," under the direction of N.C. Nielsen and J.R. Wilcox of the Dep. of Agronomy at Purdue. "Research on edible soybeans has been aimed at exploiting specialty markets for export. Progress has been obtained in characterizing lines with altered oil content as well as improved flavor for tofu production..."

Other new crops investigated by the Center include pearl millet, winter canola, new essential oil crops, specialty melons, basil, artemisia, etc. In 1990 Timber Press (Portland, Oregon) published a book titled *Advances in New Crops* edited by J. Janick and J.E. Simon. Address: Purdue Univ., 1165 Horticulture Bldg., West Lafayette, Indiana 47907-1165.

10021. Kofalk, Harriet. 1991. The peaceful cook: More than a cookbook. Summertown, Tennessee: The Book Publishing Co. 159 p. Index. 22 cm.
• ***Summary:*** In this vegetarian cookbook, the recipes are arranged by season, so fresh local produce can be used whenever possible. Earth-related comments and inspirational thoughts accompany each recipe. Contains many tofu recipes.

10022. Kwan, Choi Wah (Guan, Caihua); et al. 1991. Ying Yue zi dian English-Cantonese dictionary: Cantonese in Yale romanization. Hong Kong: The Chinese University Press. 22 + 579 p. 18 cm. [Eng; Chi]
• ***Summary:*** The Preface begins: "The impetus for compiling this Dictionary came from the interaction of teachers and students at the New Asia–Yale-in-China Chinese Language Center of The Chinese University of Hong Kong." The book is quite compact, portable (almost a pocket book in size) and relatively inexpensive, making it very useful.

"Brief introduction to Cantonese pronunciation (p. 5): In pronouncing a syllable in Cantonese three elements must be taken into account, namely, an initial, a final, and a tone... An initial is the starting-off sound of a word." There are 19 initials in Cantonese; some are aspirated and some are not. Symbols for aspirated (5) and non-aspirated (5) stops are given. "A final is the concluding sound of a word. There are fifty of these" and they can be classified by the starting letter–A, E, I, O, U, or Y. In Cantonese, tones are very important in conveying meaning. "There are seven tones which, in the Yale system are represented by the use of diacritics and by the insertion of H for the three low tones. These seven are: 1. High falling. 2. High rising. 3. Mid level. 4. High level. 5. Low falling. 6. Low rising. 7. Low level. A chart shows the relative differences between the seven tones.

There are four different romanization systems for Cantonese (p. 8-11): Yale, IPA, Sidney Lau, and Mayer Wempe. Each has its own way of dealing with initials, finals, and tones. This helps to explain why the same word or term is written in so many different ways by Cantonese speakers. No Chinese characters appear in this book. However there is a long section of grammatical notes (p. 12-21) which contains many basic concepts not found in English–such as attributives, boundforms, functive verbs, measures, movable adverbs, etc. On page 22 is a list of abbreviations. Now for soy-related words:

Bean (noun) dau, dauh. Bean curd (dauhfuh). Bean sprouts (ngahchoi).

Ketchup: kejap.

Soy (noun). baahkdau; wohngdau * soy sauce (noun). sihyauh (M: jeun; di).

Soybean (noun). baahkdau; wohngdau * soybean milk (noun). dauhjeung (M: wun).

Words not listed include: catsup

10023. Loewen, Nancy. 1991. Food in Korea. Vero Beach, Florida: Rourke Publications, Inc. 32 p. Illust. (color photos). Index. 26 cm. Series: International Food Library.
• ***Summary:*** Juvenile literature: An introductory book for junior high school students. Text by Nancy Loewen. Recipes compiled by Judith A. Ahlstrom.

Contents: 1. An introduction to Korea. 2. A common heritage. 3. North and South Korea. 4. Agriculture and industry. 5. Holidays in Korea. 6. Food customs in Korea. 7. Korean foods. 8. A festive meal. 9. A red-meat meal. 10. A white-meat meal. 11. An everyday meal. Glossary of cooking terms. Korean cooking.

The Japanese took control of Korea in 1910 and remained in power until 15 Aug. 1945, when the country was liberated by allied forces. That didn't make Korea a free country, however. After 35 years of Japanese rule, Korea's political system was weak and the northern half of Korea was soon occupied by communist forces. The country was divided and in 1948 two new governments–one for the North and one for the South, were established. Then in 1950 North Korea invaded South Korea; the Korean War had begun; it lasted until 1953 with Korea still divided at Panmunjom–as it is today.

Korea still uses two calendars: the Gregorian calendar (used in the USA and in most other countries) and the ancient Chinese lunar calendar. Korea's older holidays are still observed based on the lunar calendar.

Common foods in Korea include rice, soy sauce, tofu, kimchi, and soybean sprouts.

10024. McBride, Robert W. 1991. Cooking with tofu: For those who hate tofu but don't know any better. Littleton, Colorado: Gylantic Publishing Co. 66 p. No index. 15 x 22 cm. Lay-flat comb bound. [1 ref]
• ***Summary:*** Contents: Introduction. A little about tofu.

Breakfasts. Lunches. Dressings. Appetizers and snacks. Dinners. Desserts.

Talk with the author. 1997. March 8. He is a vegetarian and this was the first book he ever published. he inspiration for the book came from *The Book of Tofu,* by Shurtleff and Aoyagi. Address: P.O. Box 2792, Littleton, Colorado 80161-2792. Phone: 1-800-828-0113 or 303-797-6093.

10025. Passmore, Jacki. 1991. The encyclopedia of Asian food and cooking. New York, NY: William Morrow. 320 p. Illust. by Jan Smith. Index. 24 cm. [44 ref]

• ***Summary:*** The most complete book of its type seen to date (May 2010), with many helpful cross references (although sometimes flawed). Soyfoods are mentioned throughout. Unfortunately, for Chinese foods, the author does not distinguish between Mandarin and Cantonese, or between pinyin (newer) and Wade-Giles (older) styles of romanization. For some of the "Also known as" it is not clear to which of several previous entries this refers (see "Soybean"). Sometimes she gives standard transliterations (azuki, miso, tofu, yakidofu) yet at other times she writes phonetically (ah meh)–as an aid to correct pronunciation.

Ame (ah meh, Japan): A sweet jelly made from millet.

Azuki bean (*Phaseolus angularis*). Native to China; used in China since the Han Dynasty (206 BC–AD 220): An [or anko] (Japan): A sweetened paste of ground azuki beans available in smooth (koshi-an) and crunchy [chunky] (tsubu-an or tsubushi-an). Sarashi-an: A flour of ground azuki beans. Also known as hong dow (China), dried red beans, red beans [adzuki beans, aduki beans]. See also: Red bean paste, sweet.

Bean curd: Also known as dou-fu, dow foo (China); tahu (Indonesia), momen tofu, tofu (Japan); ta hu, ta hua (Malaysia); tahure ([fermented tofu] Philippines); tauhu kau (Thailand); dau hu, dau hu chung (Vietnam); bean custard, soybean cake.

Note 1. This is the earliest English-language document seen (April 2013) that uses the term *ta hu* to refer to Malaysian-style tofu.

Illustrations of: Fried bean curd, pressed bean curd. Almond bean curd (non-soy). Bean curd "brains": Also known as doufu nao (China); taho (Philippines). "Cotton" bean curd: Also known as momen tofu (Japan). Freeze-dried bean curd [dried-frozen tofu]: Also known as koya tofu (Japan). Fried bean curd: Also known as char doufu, doufu pok (China); agedofu, atsu-age, nama-age (Japan); tauhu tod (Thailand), dau hu chien (Vietnam). Fried bean curd pouches: Also known as aburage, usuage (Japan). Gan modoki. Grilled bean curd: Also known as doufu kan [sic], gone (China); yakidofu (Japan). Instant bean curd. Okara. Pressed bean curd: Also known as doufu kan (China), taukwa, tauhu kuning (pressed yellow bean curd) (Indonesia, Malaysia); tokwa (Philippines); tauhu leong (Thailand); dau hu ki (Vietnam). Silk bean curd: Also know as kinugoshi tofu (Japan), shui doufu (China), taho (Philippines).

Note 2. The author seems to be confused about "Silk bean curd." Japanese kinugoshi is made from relatively thick soymilk, which is "set" using a coagulant but without any separation of curds and whey. Yet on page 26 we read: "In China the name [for silk bean curd] translates as 'water bean curd,' It has a very smooth, delicate texture achieved by straining the coagulated liquid through fine mesh, then allowing the strained curds to settle without pressing." This is not a description of silken tofu, but rather of Japanese regular tofu (*momen-goshi*) made without any pressing weights.

Contains a recipe for homemade "Bean Curd" plus 3 bean curd recipes.

Bean curd by-products: Bean curd skin [yuba], bean curd sticks: Also known as fu jook pin, gee jook (China), yuba (Japan), forng ta ohu [tauhu] (Thailand); rolled bean curd, second bamboo.

Fermented bean curd: Also known as foo yu, fu-ru, narm yu (China), tahoe, tahu (Indonesia, Malaysia), tausi (Philippines), bean curd cheese, Chinese cheese, pickled bean curd, red bean curd, soybean cheese.

Moldy bean curd. Bean curd cheese: See bean curd by-products (fermented).

Bean pastes and sauces: Shih and jiang from China: (1) Bean sauce (jiang) also known as taucheo or tau sa (Malaysia, Nonya and Singapore cooking), mien see [mian shi] (China), taoco [Pron. = tao-cho] (Indonesia), tuong ot (Vietnam), bean paste, brown bean sauce, yellow bean sauce. (2) Black bean sauce (a recent addition to the family of Chinese sauces. A major ingredient is puréed fermented black beans with a hint of garlic and star anise. It tastes best when freshly made). (3) Chili bean paste (in addition to chopped dried chilies, it sometimes contains fermented black beans): Also known as lat chu jeung, as lat chu jeung yau (Garlic) (China); kochujang (Korea); bean paste with chili; hot bean paste; Sichuan hot bean paste. (4) Dhwen-Jang (Korea). See also miso. (5) Hoisin sauce (China): A sweet, thick, reddish brown sauce. One ingredient is fermented soybean paste. Not to be confused with the Chinese barbecue sauce called sha cha jang. Also known as hoi sin cheung (China); barbecue sauce. (5) Soybean paste. Also known as mean see jiang (China). (6) Sweet bean paste. In this context it is not the sweet bean paste made from azuki beans, but rather a sweet, thick, dark brown sauce made of ground fermented soybeans and sugar. Its salty-sweet flavor is used in marinades and roast meats. Also known as tim mean jiang (China).

Bean sprout: Mung bean sprouts, silver sprouts (mung bean sprouts with the roots and seed pods removed), soybean sprouts (They "are large, up to 5 inches {12.5 cm} in length, a deep, almost yellow color and strong in flavor..."). Also known as: Daai dau nga choy (soybean sprout), ngunn nga choy (silver sprouts), nga choy, sai dau nga choy (mung bean sprout) (China); tauge (Indonesia); moyashi (Japan);

© Copyright Soyinfo Center 2013

kacang ijo, kacang djong, kacang padi (Malaysia); togue (Philippines); taun gawk (Thailand); gia (Vietnam); bean shoots.

Beijing duck sauce (recipe with ½ cup sweet bean paste). Vietnamese-style Beijing duck sauce (with ½ cup sweet soy sauce–kecap manis).

Black bean: See Fermented black bean. Black bean sauce: See Bean pastes and sauces. Fermented black bean sauce. Black soybean: See soybean.

Broad bean paste. Broad bean sauce: "The best is made in Pixian, a city in Sichuan province, where it is used instead of soybean-based seasoning sauces."

Brown bean sauce: See Bean pastes and sauces.

Che hau sauce (Che how, China): See Bean pastes and sauces (Hoisin). Chick-pea.

China: Has the "oldest and most well-documented cuisine in the world." Chinese cheese: See Bean curd by-products (fermented). Chinese hot bean paste: See Bean pastes and sauces.

Dau hu (Dow hoo, Vietnam): See bean curd. Dau hu chien (Dow hoo chee-ian, Vietnam): See Bean curd, fried. Dau hu chung (Dow hoo chee-ung, Vietnam): See Bean curd. Dau hu ki (Dow hoo kee, Vietnam): See Bean curd, pressed.

Dengaku (plus recipe).

Dhwen-jang (Dwen-jang, Korea). Similar to Chinese soybean paste or Japanese akadashi miso. Also known as Korean bean paste. Doufou Kan [doufu gan], China: Bean curd (grilled, pressed). Dou-fu (Dau-fu, China). See Bean curd. Doufu nao (Daufu-nou, China): See Bean curd "brains." Doufu pok (daufu pork, China). See bean curd, fried. Dow foo (dau fu, China): See Bean curd.

Edamame (e dah ma meh, Japan): See soy bean.

Fermented bean curd: See Bean curd by-products. Fermented bean curd cake. See Bean curd by-products; tempe.

Fermented black beans (Shih, China). With recipe for "Fermented black bean sauce" (p. 106). Also known as dau see (China), black beans, dried black beans, preserved back beans.

Fermented red rice. Flours and thickeners: Kuzu (Japan). Mung bean flour. Soy flour (incl. kinako, which "is used in confections and to make noodles... In China, a thick, nutty-tasting noodle is made from soy flour"). Foo yu (Fu you, China). See Bean curd by-products (fermented). Forng Tao Hu (Fong tao huu, Thailand). See Bean curd by-products, bean curd sticks. Fu jook pin (Fu juk pin, China): See bean-curd by-products, bean curd skin. Fu-ru (Fu yue). Gee Jook (Ji Juk, China): Bean curd sticks.

Gluten: Kau fu, kohana fu, matsutake fu, mein jin pau, nama fu, su tang, yaki fu. Also known as: Kau fu, mianjin, mein jin pau, su tang (China), kohana fu, yaki fu (Japan).

Gochujang (Korea). See also: Chili paste, chili sauce. Korean barbecue sauce.

Grilled bean curd: See Bean curd, grilled.

Hatcho miso: See miso, Hatcho. Hot bean paste. Hot black bean sauce. Inaka miso: See miso.

Japan: "Japanese cooks revel in the artistry of their craft. The Japanese love of nature is a challenge to present each ingredient as reminder of its origins: to bring nature to the table...," Regional cuisines are not of great importance in Japan; cooking methods (incl. Dengaku), salting (incl. Teriyaki), cutting and slicing techniques.

Kecap asin (Ket-chup a-seen, Indonesia): See Soy sauce, sweet and salty. Kecap cair (cha-ear, Malaysia): See soy sauce, light. Kecap hitam (Indonesia): See soy sauce, sweet and salty. Kecap ikan (Indonesia): See Fish sauce. Kecap manis (mah-niece, Indonesia): See Soy sauce, sweet and salty. Kecap petis (pet-is, Indonesia): See fish sauce. Kinugoshi tofu (Japan): See Bean curd, silk.

Kochujang (go-choo jang, Korea): See Bean pastes and sauces; chili pastes.

Koikuchi shoyu (Japan): See soy sauce. Continued. Address: Author of several books on Asian cuisine.

10026. Passmore, Jacki. 1991. The encyclopedia of East Asian food and cooking (Document part II). New York, NY: William Morrow. 320 p. [44 ref]

• ***Summary:*** Continued from p. 153: Korean bean paste: See Dhwen jang. Koshi-an (Japan): See Azuki beans (an). Koya tofu (Japan): See Bean curd, freeze-dried [sic].

Kuzu (Japan): See Flours and thickeners. Lentil (*Lens esculenta*)*:* Red lentil, Red mung beans.

Light soy sauce: See Soy sauce.

Lu soy (lo shui, China): See soy sauce.

Maltose: Made by fermenting germinated grains of barley. When used to glaze foods, may have soy sauce and red food coloring added. Also known as: Malt sugar, [barley malt syrup].

"Ma-po" dofu [Mabo-dofu]: See beef.

Mean see jiang [mian shi jiang] (min see jiang, China): See Bean pastes and sauces.

Mein jin pau [mien jin pau] (China): See Gluten.

Mianjin (China): Gluten.

Mien see (mien-si [mian shi], China): See Bean pastes and sauces.

Miso (Japan): (1) Hatcho-miso. (2) Inaka miso or Sendai miso. Also known as Red miso. (3) Shinshu miso. (4) Shiro miso.

Mochi. Monosodium glutamate. Also known as: Mei jing (China); aji-no-moto (Japan); servuk perasa (Malaysia); ve tsin (Vietnam), M.S.G., taste essence, taste powder.

Moyashi (Japan): See Bean sprout.

Mung bean. Also known as moong ke dal (India); kacang djong, kacang eedjo [hijau, katjang idjo] (Indonesia); kacang hiau (Malaysia); tau ngok (Thailand); dau xanh (Vietnam); green gram.

Nama-age (nah-mah ah-geh, Japan): See Bean curd, deep fried.

© Copyright Soyinfo Center 2013

Nama fu (Japan): Raw / uncooked wheat gluten.

Natto (Japan). See soybean.

Noodles: (1) Bean curd noodles (China). Also known as Soy noodles, soy vermicelli.

Oils and fats: Soybean oil. (2) Bean curd skin noodles (China) [yuba noodles].

Peanut (with many foreign names and recipes).

Preserved black beans: See Fermented black beans. Pressed bean curd: See Bean curd (pressed).

Red bean paste, sweet: "An important ingredient in Chinese and Japanese cooking, sweet red bean paste is made by boiling the red azuki bean and mashing it to a paste with lard or oil, then cooking it until it is fairly dry or thick. In Japan, red bean paste is made in two textures: the smooth purée is koshi-an and the chunky version, with the beans only partly crushed, is tsubushi-an. It is a filling for cakes and sweet buns, and is used in several desserts." Also known as hong dow sar (China), an (Japan). Contains a recipe for Sweet red bean paste.

Red rice: See Fermented red rice.

Rice: Many type of glutinous and non-glutinous.

Rolled bean curd: See Bean curd sticks [dried yuba].

Seaweed: Many different types. Seaweed gelatin or Seaweed jelly: See agar agar.

Sendai miso (Japan): See miso.

Sesame seed: Black sesame seed, sesame oil, sesame paste, white sesame seed.

Shinshu miso (Japan). Shui doufu (China): See bean curd (silk). Silk bean curd: See Bean curd (silk).

Soybean (*Glycine max*)*:* (1) Black soybeans. (2) Fresh soybeans [edamame]. (3) Yellow soybeans. Soybean cheese: See Bean curd, fermented [fermented tofu]. Soybean condiment: See Bean pastes and sauces. Soybean milk. Also known as tau cheing, tau ni (China). With homemade soymilk recipe. Soybean noodle: See Noodles, bean curd. Soybean oil: See fats and oils. Soybean paste: See Bean pastes and sauces. Soybean sprout: See bean sprout. Soy flour: See Flours and thickeners.

Soy sauce: "An ancient seasoning, first used in China more than 3,000 years ago. Known in its original form as *shih,* it was a thin salty liquid in which floated fragments of fermented soybeans." "Soy sauce is to Chinese and Japanese cooking what the pungent, salty fish sauce known as nam pla or nuoc mam is to Thailand and Vietnam respectively." (1) Dark soy sauce. Also known as jang yau, see yau (China); koikuchi shoyu, tamari (Japan), kecap pekat (Malaysia); mushroom soy. (2) Light soy sauce: Thinner, saltier, and lighter in color and flavor. It is used in cooking where its light color will not spoil the color of the ingredients. Also known as sang chau, see yau (China), shoyu, usukuchi shoyu (Japan), kecap cair (Malaysia), toyo (Philippines), nam siew (Thailand), xi dau (Vietnam), thin soy sauce. (3) "Lu soy (China) is a 'master sauce' based on soy sauce with sugar, ginger, and five-spice, It is used for simmering poultry and other meats to give a rich flavor and to color the food a deep brown. Also known as lu shui (China)."

Soy sauce, sweet and salty: (1) "Kecap asin (Indonesia) is a thick, salty, dark soy-based sauce used to impart a strong color and flavor. Its sweet counterpart is *kecap manis.* It is similar to, but thicker than, several dark soy sauces used in Chinese cooking." (2) Kecap hitam (Malaysia) is a sweet dark soy sauce. Slightly less spicy than kecap manis. (3) Kecap manis (Indonesia) is a sweet, dark, thick, aromatic soy sauce, especially widely used with satay. "It is similar to, though finer in flavor than, Chinese sweet soy sauce" [tian mian jiang]. Also known as kecap bentang manis (Indonesia); sweet soy sauce. (4) "Sweet soy sauce (China) is a dark, sweet sauce combining soy sauce, sugar, and malt sugar. Its distinctive malt-like taste goes well as a dip for fried snacks, poultry, and seafood." It appears frequently on the table in homes and restaurants in Fukien province, opposite Taiwan on the coast of south-eastern China. For a recipe, see Sweet soy sauce pork (p. 230). Note: This is not generally a commercial product. (5) Tim cheong (Malaysia) is a thick, sweet, black soy sauce, similar to that used in China. In Malaysia it is served with poh pia. Its flavor is closer to that of kecap hitam than to kecap manis.

Sprouts, soybean. See Bean sprout, soybean. Sushi (describes many types, with recipes). Sweet bean paste or Sweet bean sauce: See Bean pastes and sauces.

Taho (Philippine bean curd brains). Tahoe (Indonesia or Malaysia, fermented bean curd). Tahu (Malaysia bean curd). Ta hua (Malaysia bean curd). Tahure (Philippine bean curd).

Tamari (Japan): See soy sauce. Taucheo (Malaysia or Singapore, bean pastes and sauces). Tauge (Indonesia bean sprout). Tauhu kao (Thailand bean curd). Tauhu kuning (Indonesia and Malaysia bean curd pressed). Tauhu leong (Thailand bean curd, pressed). Tauhu tod (Thailand bean curd, fried). Taukwa (Indonesia and Malaysia bean curd pressed). Tau sa (Malaysia bean paste and sauces). Tausi (Philippines, bean curd products [sic, fermented black soybeans], fermented).

Tempe (Indonesia, Malaysia): Fermented soybean cake [tempeh]. Oncom [Ontjom]. Tokwa (Philippine bean curd pressed).

Tosa soy sauce (Japan): The classic sashimi accompaniment. Recipe given.

Tsukemono: Takuan, umeboshi.

Usu-age (Japan): See Bean curd (fried) purses.

Winged bean. Yuba (Japan).

Brief biography: "For more than twenty years she has been professionally involved with Asian food as a writer, teacher, publicist, researcher, consultant, and, of course, cook. She has traveled extensively in Asia and lived in Hong Kong for more than ten years, working as a food writer on a number of newspapers and magazines, which led to a career as a food consultant. Her most recent book, *Asia the Beautiful Cookbook* was listed by *Publishers Weekly* as one

© Copyright Soyinfo Center 2013

of the best books of 1987." Address: Author of several books on Asian cuisine.

• ***Summary:*** This book introduces the Seventh-day Adventist low-fat vegetarian diet and health principles without their religious underpinnings but with many quotations to the writings of Ellen G. White, an Adventist pioneer. For example, concerning what is now called atherosclerosis, she wrote in 1896: "Both the blood and the fat of animals are consumed as a luxury. But... these should not be eaten. Why? Because their use would make a diseased current of blood in the human system.

Adventists, whether vegetarian or not, are less likely to get cancers of the breast, ovaries, bladder, prostate and pancreas than the rest of the U.S. population. Male Adventists live an average of 8.9 years longer than non-Adventists, and women 7.5 years longer. And the differences between vegetarian and nonvegetarian Adventists provide some of the best evidence of the health advantages of a vegetarian diet. For example, studies show that whereas nonvegetarian male Adventists get only 56% as much heart disease as the U.S. average, vegetarian Adventists who eat eggs and dairy products get only 39%; and those who avoid all animal products 12%.

Page 105 notes that a major study involving more than 25,000 Adventist adults over a period of 20 years indicated that an Adventist woman aged 25 will, on average, live to age 88, which 9 years longer than her non-Adventist counterpart, and an Adventist man aged 25 will, on average, live to age 84, which is 12 years longer than his non-Adventist counterpart. Moreover, "It appears that the earlier one embraces the complete Adventist life-style, the greater quality of life and longevity once can expect."

In a section titled "Guide to creating your own meatless roast" (p. 116-17), tofu, shredded soy cheese, and soy flour are listed as protein sources. Soy-related recipes include: Pesto tofu manicotti (p. 121). In the "Natural Foods Shopping Guide" (p. 207) descriptions are given of Soyagen, soy cheese, soy milk, and tofu.

Breakfast & brunch. Desserts. Holiday recipes. Glossary. Products made by Soy City Foods: Harvest dinner patties. Falafels. Grain tempeh. Tofu. All soybeans are organically grown, and certified by OCIA.

Some history: In 1975, The Golden Age Food Limited opened the Vegetarian Restaurant in downtown Toronto. In order to produce healthy soy-based products from organically-grown soybeans, the restaurant created its own production facility, Soy City Foods. Address: 2847 Dundas Street West, Toronto, ONT M6P 1Y6, Canada. Phone: (416) 762-1257.

10033. Sunrise tofu cookbook. Revised edition. 1991. Vancouver, BC, Canada: Sunrise Markets Inc. 96 p. 22 cm. Spiral bound.
• ***Summary:*** Contents: Sunrise Markets Inc., What is tofu? Sunrise tofu. Cooking hints. Soups. Salads. Dressings and dips. Entrees. Desserts. Nutritional breakdown of Sunrise Tofu. Other Sunrise products. Glossary. Metric conversions. Substitutions and equivalents. Feedback.

"Sunrise Markets Inc. was founded in the early 1960s by Leslie Joe. With the help of his wife Susan and children, Leslie built Sunrise into Canada's largest producer of soy food products." The rear cover shows labels of 4 Sunrise tofu products. Other products are described on pages 91-92. The book contains "over 65 quick & easy recipes." Address: Sunrise Markets Inc., 729 Powell St., Vancouver, BC V6A 1H5, Canada.

10034. Vakirtzoglou, Euphrosini. 1991. Nea mayriki-sintayes me soya [Recipes for soya]. Thessaloniki, Greece: Published by the author. 127 p. Illust. Index. 29 cm. [Gre]
• ***Summary:*** This attractive book, the first of its kind ever published in Greek, contains large color photos of its soy-based dishes on almost every page. It features recipes using soy oil, soy sauce, soy margarine, textured soy flour (mince and chunks), soya-based pasta, soymilk, and tofu–but no tempeh. The last 2 pages of the book are full-page color photos of various soya products that are imported to Greece, largely by Mr. George Tselepidis (Andreou Dimitriou 47, Sikies 56625, Thessalonika, Greece. Phone: 625741) who is very interested in new soya products (and perhaps making them), and is the exclusive agent for the soya products used by the author. These products include Provamel Soya Milk, Sunwheel soya sauce and tamari, Meridian soya margarine, soy oil, and ten shelf-stable soy products with Greek labels. Published with technical and material support from Biotrek S.A., Greece's primary dealer in soya products.

The book contains many recipes and ideas for using soyfoods in place of meat and milk during Lent and other religious holidays of the Greek Orthodox Church. The attractive 4-page brochure promoting the book contains colorful photos of many soy-based preparations on a table in front of Greek Orthodox icon paintings.

The author notes in a letter that she hopes to translate the book into English and is now preparing another book on Soya Sweets, Pastry, and Confectionery. Unfortunately, there are presently no companies in Greece making tofu, soymilk, or tempeh, nor are these products available in Greece.

In addition to writing, the author has owned a private kindergarten for the last 3 years, and for more than 1 year she has given cooking and housekeeping lessons in an organization named "Faros Tiflon Elathos," which educates the blind. Address: Lahana 35, GR-546 38 Thessaloniki, Greece. Phone: 031 824 311.

10035. Wasserman, Debra; Stahler, Charles. 1991. Meatless meals for working people: Quick and easy vegetarian recipes. Baltimore, Maryland: Vegetarian Resource Group. 96 p. Illust. No index. 22 cm. [10 ref]
• ***Summary:*** In this vegetarian cookbook, the section titled "Soy dishes" (p. 48-53) contains the following: Tofu mayonnaise dip. Fried tofu. Fried tempeh sandwiches. Spaghetti and tempeh sauce. Tofu "eggless" salad. Tofu pie and quick crust. Tofu burgers. Summer tofu salad. Curried tofu with peanuts. Tofu spinach dip. Address: Baltimore, Maryland.

10036. Williamson, Kerri Bennett. 1991. The taming of tofu. Boise, Idaho: Pacific Press Publishing Assoc. 111 p. Index. 25 cm. [3 ref]
• ***Summary:*** Contents: Introduction. Part I: Meet tofu. 1. Tofu's roots. 2. Tofu's talents. 3. Tofu's family tree. Part II: Tofu exercises. 4. Buy it, make it, drown it, chill it, freeze it, boil it, flavor it. 5. Fry it, bake it, brown it, grill it, squeeze it, broil it, savor it. Part III: Tofu recipes. Introduction. 6. Snacks and starters. 7. Big deal meals: American, Mexican, Chinese, Italian, Japanese. 8. Sweets and treats.

The Introduction begins: "Seven years ago, my husband and I tried tofu–and hated it. The average American knows that tofu alone falls flat on its flavorless face. But, since we had already embarked upon a vegetarian adventure and I had

© Copyright Soyinfo Center 2013

read about tofu's many redeeming qualities, I was willing to try tofu again.

"Then we uncovered secrets and tricks that help tofu reach its full potential. I have been experimenting and cooking with it for seven years since. Now we love tofu. When we first tried tofu, to us it was a way-out, weirdly *wild* food. I did my best to *tame* tofu to my ways and tastes. I'm still taming tofu...

"Our four healthy children have literally grown up on tofu, the staple protein in our family's diet. Out of all the meatless cookery I've tried, tofu is the meatiest and the easiest."

This spiral-bound cookbook, contains no illustrations or photos except for a color photo on the cover. All the recipes are said to be "familiar in flavor, texture, and appearance to Americans." Debra Blake Weisenthal, who tested a number of recipes, gave the book a lukewarm review in *Vegetarian Times* (July 1991, p. 80) but noted that "The recipes are simple but good, and mostly quick to prepare."

10037. **Product Name:** [Natural Tofu (Bulk, or Vacuum Packed)].
Foreign Name: Natur-Tofu (Lose, oder Vakuumverpakt).
Manufacturer's Name: Die Tofurei (Formerly Berliner Tofurei).
Manufacturer's Address: Krefelderstr. 2, D-1000 Berlin 21, Germany. Phone: 030 / 393 0927.
Date of Introduction: 1991?
Ingredients: Water, soybeans (organically grown).
Wt/Vol., Packaging, Price: 250 gm, bulk or vacuum packed.
How Stored: Refrigerated.
New Product–Documentation: Label sent by Anthony Marrese. 1992. Jan. 13. 2.5 by 4 inches. Black and yellow on white. "Handmade (In Handarbeit Hergestellt). A product from soy protein. Uses: In salads, as a spread on breads, in Pfannengerichte." Refrigerate at 4-10ºC. In Japanese characters is written: "Tofu. Mame de, yawaraka de, shikaku de."

10038. Die Tofurei mit vegetarischer Kueche. 1991? New soyfoods restaurant or deli. Krefelderstr. 2, D-1000 Berlin 21, Germany.
• ***Summary:*** Letter and menu sent by Anthony Marrese. 1992. Jan. 13. This tofu manufacturing company now owns a restaurant at the same address as its production facility. A leaflet describing it is titled "Die Tofurei jetzt mit vegetarischer Kueche" (The tofu shop now with a vegetarian kitchen), printed black on orange. It serves a variety of soy-based snacks, drinks, salads, cakes (kuchen), desserts, main courses, and soups. Most are made from tofu, but tempeh and seitan are also on the menu. The company apparently makes the following soy products for sale both at the restaurant and elsewhere in Berlin: Natur-Tofu (loose and vacuum packed), Gewuerz Tofu, Kraeuter Tofu, Algen Tofu, Marinierter Tofu, Getrokneter Tofu, Fritierter Tofu, Raeucher Tofu (regular and marinated), Champignon-Tofu (regular and marinated). All are vacuum packed. Address: Berlin, Germany. Phone: 030 / 393 0927.

10039. **Product Name:** Tofu (Plain), Savoury Baked Tofu, Soya Milk, Soy Ice Cream, and Soysage.
Manufacturer's Name: Nature Island Foods.
Manufacturer's Address: P.O. Box 501, Roseau, Dominica, West Indies. Phone: 809-448-3602.
Date of Introduction: 1991?
New Product–Documentation: Letter from Yolanda Bryan. 1992. Jan. 8. Lists the soyfoods they presently make.

10040. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Oh Tofurei.
Manufacturer's Address: Berlin.
Date of Introduction: 1991?
New Product–Documentation: Letter from Anthony Marrese based on an interview with Detlef Dorow and Ralf Hoffmann. 1992. Jan. 13. Oh Tofurei, which is run by an Asian-German, has the entire Asian foods market in Berlin, including Asian restaurants. Its tofu retails for DM 5/kg. The owner of Oh Tofurei was not willing to be interviewed. He speaks no English (only broken German) and is probably producing several hundred kg of tofu per day.

Letter from Ilona Sell of the Berlin Chamber of Commerce. 1992. Feb. 13. Oh Tofurei, owned by Mr. Detlef Hoffmann, is at Krefelder Str. 2, W-1000 Berlin 21, Germany. Phone: 030-393-0927. Note: This is almost certainly incorrect, since it is the address and phone number of "Die Tofurei" Owned by Detlef Dorow and Ralf Hoffmann.

10041. Dorow, Detlef; Hoffmann, Ralf. 1992. Update on Die Tofurei in Berlin (Interview). Conducted by Anthony Marrese in Berlin, Jan. 7. 2 p. transcript. Handwritten. Followed by a letter from Detlef Dorow on 17 Feb. 1992.
• ***Summary:*** In Aug. 1989 the name of the company was changed from Berliner Tofurei to Die Tofurei. In June 1991 the company moved to its present address at 2 Krefelderstr. 2 in Berlin. The original and last address was Luebbenerstr. 4, 1000 Berlin 36. The company was established 3 years ago to make tofu. The founders were Detlef Dorow, Ralf Hoffmann, and Misha Wolff. [Note: According to the magazine *Die Geschaeftsidee* (1989. Dec. p. 33) this company was started in Aug. 1988 by 4 friends who liked to make tofu: Detlef Dorrow [Dorow], Ralf Hoffmann, Shi-Jong Chen, and Michael Wolff [or Wolf]. The original company name may have been "Die Benjamine." But Detlef now says that the original company name was Detlef Dorow–Erste Berliner Tofurei.] Over the years, Detlef's friends left one by one:

© Copyright Soyinfo Center 2013

Michael Wolf in 1989, Shi-Jong Chen in 1990, and Ralf Hoffmann in late 1991–because of too much work and not enough money.

While at its original location, the company made Tofu, Tofu-Burger, Okara-Burger, Tofu Variationen, Mungo Sprossen Snack, Tofu Schnitzel, and Sushi-Reisroellchen. The company has also made Tempeh and Seasoned Tofu (with Vegetables, Herbs, Seaweed, or Smoked). Tempeh was discontinued after a while due to sluggish sales. Presently the company makes 200 to 400 kg/week of tofu (production varies widely), and about 250 Veggie Burgers (Tofu Burgers) each week.

The company has 3 full-time partner employees (each with equal ownership) and 2 part-time workers. Growth has been unstable. The building is about 18 by 10 meters, divided into 4 rooms. Gross sales are about DM 250,000 per year. Net worth is unknown. In Aug. 1991 the company started a restaurant at the same address as its production facility. A leaflet describing it, titled "Die Tofurei jetzt mit vegetarischer Kueche" (The tofu shop now with a vegetarian kitchen), printed black on orange, is enclosed. It serves a variety of soy-based snacks, drinks, salads, cakes (kuchen), desserts, main courses, and soups. Most are made from tofu, but tempeh and seitan, which are also on the menu, are purchased from either Viana Naturkost GmbH in Cologne, or Tofumanufaktur Hamburg.

Comments: All is not well at Die Tofurei and they may be out of business very soon for several reasons, the main one being disagreements between the partners. Detlef sees his job as working 8 hours a day, whereas Ralf and Misha feel they are working for a cause which they want to make grow. Low sales and high overhead have forced the issue to a head. Within a year of moving to their last location and having to renovate, a second move was required due to problems with the landlord. This then required a second renovation at the present location. Money for the renovations was borrowed from the bank and the company is already behind in its payments. Sales are low because (1) Their tofu prices are high (DM 7/kg wholesale) due to high overhead; (2) Several tofu companies from Freiburg, Hamburg, Stuttgart, Cologne, etc. have entered the Berlin natural-foods market; (3) Oh Tofurei, which is run by an Asian-German, has the entire Asian foods market in Berlin, including Asian restaurants. Its tofu retails for DM 5/kg. The owner of Oh Tofurei was not willing to be interviewed. He speaks no English (only broken German) and is probably producing several hundred kg of tofu per day.

Ralf and Misha are ready to call it quits after 3 years of hard labor. Detlef wants to keep the restaurant and maybe to distribute tofu made by some other company.

Follow-up letter from Detlef Dorow. 1992. Feb. 17. "Ralf Hoffmann has just left the company, so I rule it by myself with a good worker. Ralf managed the finances for the last 6 months, but it was a big catastrophe. I hope I can reduce the damage. I have had so many problems with the company and my partner Ralf; he managed Die Tofurei for the last 6 months and I managed the "Vegetarische Kueche" restaurant. They run more or less separately. Now I am increasingly forced to make snacks (Sushi-Reisroellchen, Tofu Burgers, Gruenkern Burger, Tofu Baellchen mit Spinatfuellung, Tofu-Speiss) because our company is too small to compete with large companies. Our tofu is made mostly by hand, so it is a lot of work and not much money." Address: Die Tofurei: Krefelderstr. 2, D-1000 Berlin 21, Germany. Phone: 030-393-0927.

10042. DeMark, Paul. 1992. Food incubator center prepares to hatch. *Union* (*The*) (*Arcata, California*). Jan. 23.
• ***Summary:*** Nine local small businesses have already committed to leasing space in the building, including The Tofu Shop. "The concept of the incubator center is to bring in local food producers and provide them a space with all the support services needed to help their business succeed and grow." A photo shows Phil Ricord and Cindy Copple at the incubator.

10043. Parks, Tom. 1992. Plans to use soybeans and soyfoods in the NASA lunar module (Interview). *SoyaScan Notes.* Jan. 23. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** In 10-15 years NASA (the North American Space Administration, funded by the U.S. federal government) is planning to launch a lunar module, which will be composed of various modular living capsules roughly 48 feet long and 14 feet in diameter. These will be assembled on the surface of the moon, and the structure will be inhabited by 8-15 people at a time. As with a space station, different groups of people will come and go from the module.

Inside this module NASA plans to grow soybean plants hydroponically. They will then harvest the beans, save some of them for planting the next crop, and consume the rest as food in forms such as green vegetable soybeans, soy sprouts, tofu, and fermented tofu used like a cheese spread. Tom is developing these food uses. One key consideration is that the residents of the module are expected to want something to do, such as processing and cooking foods. The program's headquarters are at NASA-Ames in Sunnyvale; ask for the Education Desk. Address: Food and AgroSystems, P.O. Box 62185, Sunnyvale, California 94088. Phone: 408-245-8450.

10044. Dinh, Daniel. 1992. Present status of soyfoods in Vietnam (Interview). *SoyaScan Notes.* Jan. 24. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Tofu and soymilk are the only two soyfoods that are widely known and used in Vietnam. Daniel's relatives made fish sauce (*nuoc-mam*) in Vietnam. Before 1975 there was a trade association of fish sauce manufacturers

© Copyright Soyinfo Center 2013

in Vietnam and their company was one of only 12 major manufacturers in the association Then in 1975 when the Communists took over, he had to flee the country, and his family decided to destroy their fish sauce factory, lest they face death or prison as capitalists. Now the situation is ripe for his return to Vietnam, and he is interested in learning to make miso and soy sauce, and perhaps starting production in Vietnam. Address: 22821 Sherman Way, West Hills, California 91307. Phone: 818-704-6432.

10045. **Product Name:** Cauldron Foods Original 8 Tofu Bangers: Vegetable Sausages Made with Tofu.
Manufacturer's Name: Cauldron Foods Ltd.
Manufacturer's Address: 149 South Liberty Lane, Ashton Vale Trading Estate, Bedminster, Bristol, Avon, BS3 2TL, England. Phone: (0272) 632835.
Date of Introduction: 1992. January.
Wt/Vol., Packaging, Price: 8 x 50 gm bangers in a box. Retails for £1.95.
How Stored: Frozen.
New Product–Documentation: Health Food Business (London). 1992. Jan. p. 12. "New burgers and a Cauldron banger." Note: A banger looks like an American hot dog.

Spot in BBC Vegetarian Good Food. 1992. Spring. p. 8. Shows a color photo of the front of the package.

10046. **Product Name:** Cauldron Foods 2 Tofu Burgers [Mexican, or Barbecue].
Manufacturer's Name: Cauldron Foods Ltd.
Manufacturer's Address: 149 South Liberty Lane, Ashton Vale Trading Estate, Bedminster, Bristol, Avon, BS3 2TL, England. Phone: (0272) 632835.
Date of Introduction: 1992. January.
Ingredients: Tofu (water, soya beans, calcium sulphate), wholegrain brown rice, sweetcorn, tomato puree, onion, wholewheat rusk, water, yeast, methyl cellulose (of vegetable origin), hydrolised vegetable protein, spices, salt, raw cane sugar.
Wt/Vol., Packaging, Price: 2 x 75 gm burgers in a box. Retails for £0.96.
How Stored: Refrigerated.
New Product–Documentation: Health Food Business (London). 1992. Jan. p. 12. "New burgers and a Cauldron banger."

Label for "Barbecue" flavor sent by David Greenslade. 1994. Oct. 4 inches square by 1 inch thick. Paperboard box. Orange, yellow, black, and white. Two color photos, one of two burgers on a plate, another of a burger between buns. "Just heat to eat. Vegetable burgers made with tofu." Caldron is still located at 149 South Liberty Lane.

10047. **Product Name:** Herbed Tofu.
Manufacturer's Name: EarthStar.
Manufacturer's Address: 5 Kay Street, Murwillumbah

(P.O. Box 654), Murwillumbah, NSW 2484, Australia. Phone: (066) 72 5931.
Date of Introduction: 1992. January.
Wt/Vol., Packaging, Price: 375 gm vacuum packs.
How Stored: Refrigerated.
New Product–Documentation: Letter (fax) from Greg Nance-Kivell. 1996. April 2. "In Jan. 1991 the Challenge Foundation (a nonprofit organisation working with the disabled) bought a small tofu business called Chinese Farmhouse." Greg was asked to come in as a consultant in late 1991. This product was launched in Jan. 1992. Packed in vacuum packed bags.

10048. **Product Name:** [Soy Burger (With Tofu, Natto, Okara & Vegetables)].
Foreign Name: Soja-Burghetti.
Manufacturer's Name: Food for Freedom.
Manufacturer's Address: Nylense [Nijlense] Steenweg 72, B-2270 Herenthout, Belgium. Phone: 014 / 51 7237.
Date of Introduction: 1992. January.
Ingredients: Tofu, natto, soy fiber (fibres de soya), rolled oats, onion, carrot, herbs, sea salt.
How Stored: Refrigerated.

© Copyright Soyinfo Center 2013

New Product–Documentation: Label and letter sent by Lucio de Berti, owner of Food For Freedom. 1992. Jan. This tofu burger with 10% natto was introduced in Jan. 1992. It is sold in only 2 large shops without a label because it is still being test marketed.

Label. 4 by 2 inches. Black on white. In Dutch and French.

10049. **Product Name:** Tempeh-Lettuce-Tomato Sandwich, Tempeh Burger, Bar-B-Q Tempeh, Tempeh Curry with Coconut Milk (and Rice), Dolphin Safe Tempeh Salad (Mock Tuna Salad).
Manufacturer's Name: Leo Risin' Foods.
Manufacturer's Address: 1525 Rhode Island, Lawrence, KS 66044. Phone: 913-832-1521.
Date of Introduction: 1992. January.
How Stored: Refrigerated.
New Product–Documentation: Letter and Labels sent by Clayton McHenry, founder and owner of Leo Risin' Foods. 1994. Feb. 22. In January 1992 Clayton named his business Leo Risin' Foods and set up a certified and inspected kitchen in his home at 1525 Rhode Island, Lawrence, Kansas 66044. Starting in January 1992 he produced five deli foods with tempeh for the Community Mercantile, and Clearly Nature's Own, a natural food store in Kansas City, Missouri. The weights of and ingredients in these products are as follows (* = organically grown): Tempeh-Lettuce-Tomato Sandwich (6 oz): Wheat bread, tempeh*, lettuce*, tomato, tofu mayo, sesame oil, spices. Tempeh Burger (7 oz): Wheat bun, handmade tempeh*, lettuce*, onion*, tofu mayo, spicy pickle*, mustard, hot sesame oil. Bar-B-Q Tempeh (6 oz): Wheat bun, handmade tempeh*, rice malt sweetened barbecue sauce, red onion*. Tempeh Curry with Coconut Milk (and Rice, 8 oz): Basmati rice, handmade tempeh*, coconut milk, red chili, onion, cashew, green chili, spices, salt. Dolphin Safe Tempeh Salad (Mock Tuna Salad, 8 oz): Tempeh*, Nayonaise, green onion, parsley*, sunflower seeds, spices.

10050. Morgenroth, Lynda. 1992. Luisa Baranda: There's more to macrobiotic cooking than brown rice, as this gentle, spiritual Boston woman can demonstrate. *Yankee* 56(1):88-92, 94. Jan.
• ***Summary:*** For Luisa (nicknamed Luchi) cooking is a meditation. Born in Chile, she spent years in Paris (France) and Spain, but now teaches macrobiotic cooking in Boston. When flavoring soup with miso, she would never just dump a blob of miso into the soup. Instead, she lowered a ladle with a little miso into the pot, massaged some broth into the miso, then "eased the stock-thinned paste into the soup." Also discusses adzuki beans and various seaweeds (kombu, wakame, dulse, and arame). Includes recipes for: Miso soup (with wakame). Hiziki (hijiki) with vegetables. Scrambled tofu. Steamed greens and tofu dressing.

10051. **Product Name:** Mori-Nu Silken Tofu (Chinese Label) [Firm, or Soft].
Manufacturer's Name: Morinaga Nutritional Foods, Inc. (Importer). Made in Japan by Morinaga Milk Co. Ltd.
Manufacturer's Address: 5800 South Eastern Ave., Suite 270, Los Angeles, CA 90040. Phone: 310-787-0200.
Date of Introduction: 1992. January.
Wt/Vol., Packaging, Price: 10.5 oz (297 gm) Tetra Brik Aseptic carton.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: Almost all of the writing on these products is in Chinese; they are sold to Chinese Americans. Letter (fax) from Art Mio. 1996. May 14. "We first began to sell Chinese Label Mori-Nu Tofu in January 1992... This past fiscal year, which ended in March, saw a surge in sales which approached a 50% increase."

Poster (color, 8 by 11 inches, undated) sent by Art Mio. 1996. May. Shows one carton each of Chinese Label Mori-Nu Tofu firm and soft on a cutting board behind a knife and six small cubes of tofu. In the upper left is written in Chinese characters (with English text below them): "Smooth silken texture. Long shelf life. No preservatives."

10052. **Product Name:** Heart's D'Lite (Fat-Free Cheese Alternative with Casein) [Monterey Jack Style, Cheddar, Jalapeno, Mozzarella, Garlic-Herb].
Manufacturer's Name: Sharon's Finest (Product Developer-Marketer).
Manufacturer's Address: P.O. Box 5020, Santa Rosa, CA 95402-5020. Phone: 707-576-7050.
Date of Introduction: 1992. January.
Ingredients: Monterey Jack: Organic tofu, casein [protein from nonfat milk], tapioca starch, salt, natural flavor, guar gum, citric acid.
Wt/Vol., Packaging, Price: 8 oz vacuum pack. Retails for $2.99 (7/92, Maryland).
How Stored: Refrigerated.
Nutrition: Per 1 oz.: Calories 45, protein 8 gm, carbohydrates 3 gm, fat less than 1 gm, cholesterol 0 mg, sodium 170 mg, calcium 140 mg.
New Product–Documentation: Ad in Natural Foods Merchandiser. 1992. Feb. p. 19. "Melts and tastes like cheese but without the fat! From the makers of TofuRella, in the same great flavors. Call us at (707) 576-7050."

Talk with Sharon Rose. 1992 Feb. 10. They started shipping this product to fill up the pipelines in Nov. and Dec. 1991, but it was probably first on the shelves in Jan. 1992. The term "Sharon's Finest" does not appear on the front panel, but the back panel reads: "Heart's D'Lite is made for Sharon's Finest." Over the past 8-12 months, they have gradually been changing the company name to Sharon's Finest from Rose International, but the change has not yet become official. All of their business cards and

© Copyright Soyinfo Center 2013

printed product brochures have "Sharon's Finest" and the corresponding logo on them, not Rose International.

Product with Label purchased at Fresh Fields, Rockville Pike, Maryland. 1992. July. 20. Label is 3.5 inches square. Red, blue, and purple on white. Illustration of a red heart outlined in blue on a blue-lined sky. Front panel: "Fat-free cheese alternative." Back panel: "Fat-free. Low in calories. Cholesterol-free. Dear Friends. Heart's D'Lite is a revolutionary new product! While it tastes and melts like cheese, it has virtually none of the fat and cholesterol, and it is far lower in calories, too! I developed Heart's D'Lite for my friends who were cutting down on fatty foods for health reasons but still missed eating cheese... Warmly Yours, Sharon. Diabetic exchange: 1 low-fat meat. Contains < 0.02% lactose. This label uses recycled paper and non-toxic ink and glue." A table compares Heart's D'Lite with Cheddar and Monterey Jack cheeses, per 1 oz. Calories: 45, 113, 106. Fat (gm): <1, 9, 8. Cholesterol: 0, 30, 30.

10053. **Product Name:** TofuRella Slices (Cheese Alternative with Casein) [Cheddar, Mozzarella].
Manufacturer's Name: Sharon's Finest (Product Developer-Marketer).
Manufacturer's Address: P.O. Box 2687, Petaluma, CA 94953-2687.
Date of Introduction: 1992. January.
Ingredients: March 1994: Organic tofu (water, organic soybeans, calcium sulfate), casein, soy oil, sodium phosphate (natural earth mineral), salt, cultures, natural flavor, vegetable gums, citric acid.
How Stored: Shelf stable.
New Product–Documentation: Ad in Natural Foods Merchandiser. 1992. Feb. p. 19. "Individually wrapped slices of TofuRella, the Rainforest Cheese Alternative. Great-tasting, cholesterol-free cheese, perfect for lunches. Fax us at (707) 545-7116."

Talk with Sharon Rose. 1992 Feb. 10. They started shipping this product to fill up the pipelines in Nov. and Dec. 1991, but it was probably first on the shelves in Jan. 1992. The term "Sharon's Finest" does not appear on the front panel.

Leaflet (8½ by 11 inch, black, purple, and green on tan kenaf paper) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 1994. March 10-13. "Product information. Sharon's Finest Healthy Alternatives." "Tofu-Rella Slices. The original tofu cheese alternative, in individually-wrapped Slices. Convenient and delicious. Two great flavors."

10054. McDermott, Ron. 1992. Update on Worthington Foods (Interview). *SoyaScan Notes.* Feb. 20. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The Second International Congress on Vegetarian Nutrition will be held in Arlington, Virginia from 28 June to 1 July 1992. It is sponsored by Loma Linda University. Worthington sees a rapid growth of interest in vegetarianism, both professional and popular, in America.

1992 will be a watershed year in Worthington's history in terms of sorting out strategies, technologies, and approaches to the market. That will be followed by many new product launches.

Worthington had manufacturing problems with its line of tofu products. Their plant is now running at 150% of capacity, so they didn't have space for the tofu products. It was frustrating for the sales force and all concerned not to be able to put the necessary effort into the tofu products. Zoning restrictions in Worthington prevent them from expanding the size of the "footprint" on their property. They do not own any other land in Worthington, but they are about to start a second plant in the Zanesville area, about 50 miles to the east. Address: Vice President Research & Technology, Worthington Foods, 900 Proprietors Rd., Worthington, Ohio 43085-3194. Phone: 614-885-9511.

10055. Roller, Ron. 1992. Work with and history of Eden Foods in Michigan. Part I. To 1980 (Interview). *SoyaScan Notes.* Feb. 25-26. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Ron was born in 1953 and he first met Mike Potter in 1961. The Potter and Roller families both lived in a northern suburb of Detroit. Ron had some friends who were friends of the people who ran the macrobiotic natural food store named Joyous Revival. That store was started by Carl Weinstein, Scott Halizon, and Howard Tannenbaum. Mike Potter worked in the store and soon became its manager. Through that connection, Mike started to travel to Ann Arbor to sell food at the free rock and roll concerts. Ron started to go with him (for fun), and they would cook rice and vegetables. At this time, Ron met Tim Redmond and Bill Bolduc. At age 15, through Mike's influence and interest in macrobiotics, Ron began to eat rice and vegetables as part of his daily diet.

Ron's sister and Mike had taken a trip to visit Muramoto-sensei at Miramichi, near Fort Bragg, California. At age 16, Ron attended a macrobiotic summer camp for a few weeks there. That was his first educational contact with macrobiotics.

In early 1971, while Mike was working at Joyous Revival, he was married. A little later that year he moved to Ann Arbor and began working at the Eden Foods retail store. Several years later Ron moved to Ann Arbor. In the fall of 1972 Ron began to work part-time for Eden Foods while he was going to school at Eastern Michigan University at Ypsilanti, studying biology and chemistry. His first job was to get the store at 330 Maynard Street ready to move into–painting, building grain bins and shelves, etc. Ron worked part time at Maynard St. in the deli, stocking shelves, etc. Many of the other employees also worked part-time.

© Copyright Soyinfo Center 2013

Ron dropped out of the University and began to work full-time for Eden Foods when the company moved out of the Quonset hut and into the warehouse (shared with Midwest Natural) on Ann Street. He now began to work in the wholesale operation. After a 10-month leave of absence doing woodworking in the suburbs of Detroit, Ron returned before the warehouse moved to Platt Road; he helped with that move in the spring of 1974. When Mike Gordon, Eden's buyer at Platt Rd., decided to go back to school, Ron stepped into his job. It seemed like a very big responsibility since the company now had annual sales of about $1.5 million.

In 1976 Ron (age 23) took his first trip to China and Japan; he traveled with Mike Potter, who had taken his first trip there in 1973 or 1974. 23They also visited Muso in Japan. Later Ron made several trips to China and Japan by himself. From 1976 until the fire in 1979, Eden was doing more business with China than with Japan. The main Chinese imports were ginseng (the most important), nigari, azuki beans, Chinese medicinal herbs, tea, bamboo cookware, arrowroot flour, etc. Ben Zarcot of Fmali Herbs in California was also a big importer of ginseng from China.

After the move to Platt Rd., Eden's wholesale business (selling to natural/health food stores) continued to expand very rapidly. At that time, the full-line "super-distributors" came into being: Midwest Natural Foods, Health Food Inc. in Chicago, Tree of Life, etc. These companies, which tried to carry almost every product the industry offers, increased the number of products they carried to more than 2,000 from only several hundred, in order to provide natural/health food retail stores with "one-stop shopping" Many of these products were ones that Eden refused, on principle, to carry. Erewhon later tried to become a super-distributor and it was a major cause of Erewhon's downfall.

Eden now started to sell a few products Eden brand to other distributors–especially their herbs imported from China, but also commodities such as nigari, bulk soybeans, etc. Their first customer was Gene Newman of Manna Foods, Inc., in Scarborough, Ontario, Canada. For a while Eden sold truckloads of Michigan-grown soybeans to tofu makers such as Nasoya. That business gradually fell off as tofu makers cultivated local sources for their soybeans.

Ron introduced Cliff Adler into Eden Foods. In the summer of 1976 Cliff started to work at Eden and invested some money in the company by buying shares. He had a lot talent in the area of sales–he was a real go-getter in marketing–and he soon made many close friends in the company.

At some point, probably shortly after the fire, a number of employees got stock in Eden Foods, including Ron Roller, Bill Swaney, Mark Cook, and several others who left the company before the move to Clinton.

In Nov. 1979, just before the fire, 55 people worked for Eden Foods, which had annual sales of about $4 million. Sales were growing and the company was distributing about 2,300 items as they tried to compete with the "super-distributors." Eden sold no refrigerated or frozen foods, and no dairy products. The company had two warehouses. The big one, about 12,000 square feet, held almost all the food, plus the mill, the main office, the roaster, and the packaging machines. The smaller one, 4,000 square feet located not far away, was a truck repair garage and storage place for mostly non-food items plus a bottling line and a little overflow food. The night of the fire, the big warehouse was as full as it had ever been. The fire burned for a week while Eden's employees watched. It totally destroyed the big warehouse and the offices, and everything in them, sparing only the smaller warehouse. The next day, all but 7 people had been laid off. There was nothing for them to do.

The remaining employees were Mike Potter, Tim Redmond, Cliff Adler, Ron Roller, Bill Swaney (warehouse manager), Chris Burnham (warehouse), and Bena Burda (sales). They cleared out the small warehouse, and trimmed their product line to about 300 items.

Within 2 weeks after the fire, operating out of the smaller warehouse that they were leasing, Eden was sending out food to customers. They contracted with People's Warehouse in Ann Arbor to mill the large amounts of flours (including soy flour) that Eden sold; a little later Quincy Milling in Quincy, Michigan, took over Eden's milling. Cash was very tight for along time, so there was little marketing or promotion. All 180 vendors to whom Eden owed money were put on a payment plan, and they were gradually paid off. The insurance company paid Eden only $100,000 quickly. The space was also so tight that inventory had to be moved out of the warehouse each day and moved back in each night. Then they rented some additional warehouse space on Phoenix Drive in Ann Arbor, 6-7 miles away. About a year after the fire, Eden bought an existing warehouse in Clinton, Michigan and moved in during 1980 to get more space. They set the mill back up. By now sales were increasing slowly, but they were still feeling the pressure of the "super-distributors," as products proliferated in the natural foods market. Continued. Address: President, American Soy Products, 1474 N. Woodland Dr., Saline, Michigan 48176. Phone: 313-429-2310.

10056. O'Connell, Michael. 1992. History of Ploughshares Foods Ltd. in Glastonbury, England (Interview). *SoyaScan Notes.* Feb. 27. Conducted by Anthony Marrese in England. • ***Summary:*** This company was founded in 1984 in the Essex countryside by Michael O'Connell and Fiona Bruce under the name "The Emperor Liu An's Tofu Palace." Liu An was the legendary inventor of tofu in China. The business was an 8-tonne mobile catering truck and kitchen on wheels which went to open-air shows and festivals; its purpose was to serve vegan organic food (including tofu), demonstrate tofu-making, and promote veganism. They started operating the truck in Aug. 1984. Recipes prepared in the mobile restaurant

© Copyright Soyinfo Center 2013

in 1984/85 included tofu blueberry mock cheesecake, tofu mayo, tofu sweet cream, tofu lasagna, tofu pudding, tofu ice cream, tofu burgers, tofu gulash, and tofu pizza. In 1985/86 they launched okara steam pudding with dates, okara shepherd's pie, and okara burgers.

In Aug. 1986 the company moved to Glastonbury, started a non-mobile restaurant, and changed the company name to Ploughshares Foods Ltd. (after the Old Testament Biblical expression from The Book of the Prophet Isaiah 2:4 "They shall beat their swords into plowshares, and their spears into pruninghooks: nation shall not lift up sword against nation, neither shall they learn/study war any more").

In 1988 the restaurant introduced tofu quiche (onion and mushroom), okara veggie roll, okara tempeh, okara tempeh Bolognese/moussaka, and braised tofu in miso sauce. In 1989 they launched soya cream cheese with chives, and in 1991 okara tempeh with leaf protein added.

In 1991 the company structure changed from a partnership to a cooperative. Other current members of the co-op are Miranda Bruce, Sophie Pullinger, and Lalita Gordon Milverton.

The company was a pioneer in introducing tofu and new ways of using it to vegan restaurants. Uses included burgers, pies, dressings, creams, main dishes, salads, soups, etc. They introduced foods that were free of dairy products, wheat/gluten, and/or sugar, and developed a leaf protein product named Leafu (i.e. tofu from leaves). Their vegan cooking school was the first such school to receive the "City and Guild" qualification to those who graduate from their residential diploma course teaching vegetarian, organic, and special diet foods. The company provides a friendly working environment, as for single working parents, and is involved in the wider issues of improving society.

The main reasons for the company success are a commitment to delicious, aesthetic, nutritious food, customer loyalty, and a commitment to research, development, and innovation.

Anthony Marrese adds: "All of their products are good, and their people are especially nice. I spent about 18 months helping with the tofu production and restaurant in 1987/88." Address: 54 Roman Way, Glastonbury, Somerset, BA6 8AD, England. Phone: 0458-831182 or 835233.

10057. DeBona, Don. 1992. Work with tofu and soymilk in America (Interview). *SoyaScan Notes.* Feb. 29. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Don has owned a part of Bean Mountain Soyfoods in North Carolina since 2-3 years ago; their biggest competition in the tofu market is Nasoya. Don was on the board of the Soyfoods Association of America, but he dropped it when he saw it was basically a tofu and soymilk association; he was "the token miso maker." Address: General Manager, American Miso Co., Route 3, Box 541, Rutherfordton, North Carolina 28139. Phone: 704-287-2940.

10058. **Product Name:** [Tofu].
Foreign Name: Tofu–Alimento Derivato dalla Soja.
Manufacturer's Name: Biolab.
Manufacturer's Address: Via dei Grabizio 11, 34170 Gorizia, Italy. Phone: +39 481 533522.
Date of Introduction: 1992. February.
Ingredients: Soybeans (*fagioli di soja*), nigari–*cloruro di magnesio*, water.
Wt/Vol., Packaging, Price: 300 gm (2 servings of 150 gm each) vacuum packed separately, side by side.
How Stored: Refrigerated.
New Product–Documentation: Talk with Maura Ghiraldini of Biolab. 1998. Nov. 9. Biolab, which started in June 1992, is now the third largest tofu maker in Italy. The founder and owner is Massimo Santinelli, now age 34; they also make soymilk and various types of tofu.

Label and letter sent by Maura Ghiraldini and Massimo Santinelli. 1998. Dec. 5. This new (Dec. 1998) label (3½ by 5 inches) has the same pastel background for all tofu products–a stylized view of the sea and sky, with mountains on both sides and rolling hulls in the foreground. At the top left is a smiling sun. Text: "Organically grown (*prodotti dalla agricoltura biologica*)." "Ready in 5 minutes (*Pronto in 5 minuti*)." Refrigerate at 4ºC. A small symbol shows a person recycling the container.

10059. **Product Name:** [Marinated Tofu, and Smoked Tofu].
Foreign Name: Tofu Marinato, and Tofu Affumicato–Alimento Derivato dalla Soja.
Manufacturer's Name: Biolab.
Manufacturer's Address: Via dei Grabizio 11, 34170 Gorizia, Italy. Phone: +39 481 533522.
Date of Introduction: 1992. February.
Ingredients: Soybeans (*fagioli di soja*), nigari–*cloruro di magnesio*, water, tamari soy sauce, smoke from beechwood firewood (*fumo di legna*).
Wt/Vol., Packaging, Price: 300 gm (2 servings of 150 gm each) vacuum packed separately, side by side.
How Stored: Refrigerated.
New Product–Documentation: Label and letter sent by Maura Ghiraldini and owner Massimo Santinelli. 1998. Dec. 5. This new (Dec. 1998) label (3½ by 5 inches) has the same pastel background for all tofu products–a stylized view of the sea and sky, with mountains on both sides and rolling hills in the foreground. At the top left is a smiling sun. Text: "Organically grown (*prodotti dalla agricoltura biologica*)." "Ready in 5 minutes (*Pronto in 5 minuti*)." Refrigerate at 4ºC. A small symbol shows a person recycling the container. An earlier label shows four black birds flying above some orange clouds in a gray sky past a pale yellow sun. Letter from Massimo and Maura. 1999. Jan. 5. "To make Pickled Tofu, we leave tofu immersed for one night in a mixture

© Copyright Soyinfo Center 2013

of tamari and water. The next day, the tofu is deliciously flavored. We then either pack it as is (it becomes Pickled Tofu) or we smoke it (all smoked tofu must be pickled before smoking)." Follow-up letter (fax) from Massimo and Maura. 1999. Jan. 22. Marinated tofu is "Tofu Marinato." They still produce a very small amount of it (about 5-6 kg/week) for a distributor who sells many of their products under his own label. This is a carry-over from the early days of Biolab.

10060. **Product Name:** Chieko Tofu [Firm Organic Tofu with Nigari, or Regular Tofu (Non-Organic) with Calcium Sulfate, Soft Tofu with Calcium Sulfate].
Manufacturer's Name: Chieko Tofu, Inc.
Manufacturer's Address: 2450 Beekman Ave., Cincinnati, OH 45214. Phone: 513-471-3300.
Date of Introduction: 1992. February.
Ingredients: Incl. water, organic soybeans, nigari.
Wt/Vol., Packaging, Price: 1 lb packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.
How Stored: Refrigerated.
New Product–Documentation: Brian Williams. 1992. March 17. Cincinnati Post. "Entrepreneur pins his hopes on a budding taste for tofu." David and Chieko Kimbel introduced their tofu in late Feb., 1992.

Talk with Chieko Kimbel. 1993. Feb. 7. They make 2 types of tofu. This business is in the same building as Sunsprout. Talk with David Kimbel of Sunsprout of Cincinnati. 1993. Feb. 8. After he decided to start making tofu, he considered buying his equipment from Ben and Nina Yamaguchi of Soya Food Products Co. in Cincinnati. They were going out of business but their equipment was too old–a stone mill, cooking in buckets with a primitive steam wand, pressing out of a bag with a hydraulic press, homemade pressing boxes on a 2 pressing station homemade press with the paint chipping off, into a cooling tank with warm water, and 2 small packaging machines that were unreliable, an old, small boiler, etc. Finally he bought his tofu equipment (which includes a roller extractor) from Wally Rogers of Bean Machines and Michael Lee of The Farm in Tennessee came to Cincinnati and tried to teach him how to make tofu. He also learned from Wally Rogers and from the book *Tofu and Soymilk Production.* He uses Snow White brand calcium sulfate (made in America), which is more refined than Terra Alba. He finds it difficult to make soft tofu; it falls apart. His tofu is distributed to 8-9 states by the Castellini Co., which has access to all the Kroger supermarkets, etc. His main competition is from Kyoto Food Corp. USA of Terre Haute, Indiana; other competitors include Hinoichi, Azumaya (in Louisville, Kentucky), and Morinaga. His tofu business is not yet breaking even. It has not grown as fast as he and Castellini had expected. His tofu has a shelf life of 7 weeks, and his prices are competitive. Supermarkets don't switch to his local, fresher brand because "nobody cares. It ain't broke so we ain't gonna fix it." At the time the article cited above was written he was actually producing about 200 cases/week and predicting rapid growth; he has never actually produced 300 cases per week. His tofu business, though struggling, is now doing better financially than his sprout business.

10061. Kushi, Michio. 1992. Introduction to *Culinary Treasures of Japan,* by John and Jan Belleme. 16 p. Jan. Unpublished manuscript.
• ***Summary:*** This manuscript, which was published in a condensed form in the actual book, tells the story of Mitoku and their work to export traditional Japanese natural foods to the Western world. Michio Kushi was instrumental in getting Mr. Akiyoshi Kazama involved in this work. Mr. Kushi, who became a World Federalist after World War II, came to the U.S. in Nov. 1949 to study at Columbia University. He continuously sought ways of establishing world peace, and increasingly came to believe that a proper diet is the basis for health, happiness, and peace.

In April 1966 the author's wife, Aveline, opened a small store named Erewhon in Boston. Michio began to search for a Japanese source for foods that Erewhon would sell. He was introduced to Mr. Kazama (who lived in Tokyo) through a Japanese friend, Mr. Obayashi, who resided at that time in New York City. Michio felt that Mr. Kazama understood his desire for foods of high quality. So Mr. Kazama "began his search for food producers and manufacturers who were sincere and willing to supply the kind of quality we requested. I know that for him, at that time, it was a great gamble. It was also a painstaking and slow step-by-step process."

Mr. Kazama was born on 1 Feb. 1930 in Yamanashi prefecture. He graduated from Waseda University in Tokyo, then was selected to study business in the United States. After arriving in Chicago, Illinois, he was drafted by the U.S. government to serve in the American Army in Korea and in Japan from 1956 to 1958. Upon his return to Japan, he settled in Tokyo where he became an import agent for a German company dealing in optics and electronics. After the Kushis contacted him, he became involved in the emerging natural food business. [He founded a company named Mitoku. Mi = Michio. To = Tomoko (Aveline's given name in Japanese). Ku = Kushi].

In 1968 Mr. Kazama made his first shipment of Japanese natural foods to Erewhon; the order was worth $3,000. The Kushis first met Mr. Kazama in Boston in 1970. Over the years, the volume of Mitoku's exports steadily grew, and expanded to Europe, Australia, and the Middle East. Today Mitoku ships its products to about 35 countries. Approximately 40% of Mitoku's exports go to America, 40% to Europe, and 20% to Australia and other regions. Annual sales are about $10 million. Among the major suppliers are Sendai Miso Shoyu Co. Ltd., Hatcho Miso Co. Ltd., Hagoromo Miso, Ltd., Hanamaruki Miso Co. Ltd, San Iku Foods Co. Ltd.

© Copyright Soyinfo Center 2013

Distributors of Mitoku's products include the following: In the USA: Westbrae Natural Foods Inc., Great Eastern Sun Inc., U.S. Mills Inc., Tree of Life Inc., and Shojin Natural Foods (Hawaii). In Canada: Koyo Foods Inc., Flora Distributors Ltd., and Timbuktu. In Costa Rica: Distribuidora de Productos Macrobioticos S.A. In England: Sunwheel Foods Ltd, Clearspring Natural Grocer, Meridian Foods Ltd. In France: Celnat, Tama. In Belgium: Lima N.V. In the United Arab Emirates: Emirates Trading & Marketing Est. In South Africa: Key Health. In Austria: Naturkostladen, Lebenszeichen. In Switzerland: S'lotusbluemli, Terrasana, Futonhaus. In Sweden: Kung Markatta. In Norway: Alternative Import. In Finland: Makro Bios. In Portugal: Armazens Da Matinha. In Spain: Kunga. In Italy: La Finestra Sul Cielo, Probios S.R.L., Dalla Terra al Cielo, Solo Natura. In Israel: Tivoli Ltd. In Australia: Pureharvest. In New Zealand: Enso. In Singapore: Nature's Best. In Yugoslavia: General Export. In Japan: Seibu Department Stores Ltd., Tokyu Department Stores Ltd. Among the countries reached indirectly through trans-shipment are Hungary, reached through Austria, various South American countries reached through the United States, and other countries such as Poland, Czechoslovakia, Iceland, Andorra, Ireland and the Caribbean Islands.

As Mitoku developed its international operations, Mr. Kazama hired many students from Western countries, including Blake Rankin (USA), Ferro Ledvinka (Italy), Christopher Geoffrey Dawson (New Zealand, starting 1979), Robbie Swinnerton (England), Terrie Adams (USA), and Michelle Harbroun (France).

"For the past 10 years, Mitoku has echoed and supported the macrobiotic perspective with its motto 'Isshoku-Dogen.' These words, though they have been forgotten in the last few centuries by the very people in the health care field who should remember them well, mean literally 'medicine and food have the same source,' and can be translated as 'food *is* medicine.' This saying has been used and known as part of the ancestral heritage of wisdom transmitted from generation to generation for several thousand years in Oriental countries such as China, Korea and Japan.

"In an attempt to preserve Japanese traditions, Japan has instituted a 'Living Treasures' program granting official recognition and support to [living masters in] various cultural areas such as theater, music, dance, sculpture, carpentry, weaving... and arts and crafts. Ironically, though, Japan has not granted the same official recognition to its traditional methods of food processing and production in spite of the fact that increasingly large numbers of people throughout the world are now appreciating traditionally processed Japanese food products and have become aware of their important health benefits. The Japanese traditional arts of producing miso, soysauce, tofu, natto, amazake, rice vinegar, sake, mirin, condiments and pickles as well as cooking methods and preparation are unique among the culinary practices of the world... These foods are also works of art... It is my hope and recommendation that official recognition and support be granted by the 'Living Treasures of Japan' to those who have dedicated their life to the traditional art of food production and processing in spite of the hardships and commercial disadvantages they are compelled to face in business competition and present-day economical conditions." Address: 62 Buckminster Rd., Brookline, Massachusetts 02146.

10062. *Natural Foods Merchandiser.* 1992. Soyfoods' major role in cancer prevention subject of major study: Marketers expect positive results to boost sales dramatically. Feb. p. 20. [1 ref]

• ***Summary:*** "Top researchers believe soyfoods such as tofu and tempeh might help prevent cancer and have begun a three-year, $3 million study to confirm their hypothesis.

"The study was funded in October by the National Cancer Institute (NCI) in Bethesda, Maryland, after a panel of 13 scientific experts concluded more research is needed on cancer-fighting compounds found in soybeans. It is the first time soyfoods have received such attention–and funding–from the institute...

"Although it's too early to say that soyfoods prevent cancer, several compounds with anticarcinogenic activity are found in relatively high concentrations in soybeans, Messina says. Called phytochemicals, they are distinguished from nutrients–some are actually considered anti-nutrients because they make it harder for the body to absorb what it needs. The compounds include isoflavones, protease inhibitors, phytic acid, saponins, phytosterols and phenolic acids."

Includes an interview with Mark Messina, PhD, program director for NCI's Diet and Cancer Branch, about beneficial phytochemicals (non-nutritive dietary components) in soybeans and soyfoods.

10063. Patterson, Anne. 1992. Good taste and good nutrition. *Illinois Soybean Farmer* (*Bloomington, Illinois*) 3(2):17. Feb.

soy flour, soybeans. (4) Dairylike products: Soy cheese [a cheese alternative], soy cream, soy curds or cottage cheese (*Requesón*). (5) Other products: Galletas de Soya (Soy cookies), Bath soap (*Jabón de Baño*), Recipe booklet (*Manual de Recetas*), Pitcher (*Pichel*), Shirt (*Camisa*), Peaches in syrup (*Duraznos en Almíbar*). "Detail and wholesale, home delivery without re-charge."

Letter from Kris Duville of Productos Alimenticios Soyavyn. 1992. June 2. This leaflet was first printed in Feb. 1992 on the occasion of a village feast at which the company had a stand at the fair. Address: Planta Soyavyn, 2a Calle Poniente No. 2-4, Lourdes, Colón, Depto. La Libertad, El Salvador. Phone: 51-0705 or 23-3554.

10065. Productos Alimenticios Soyavyn. 1992. Manual de Recetas [Manual of Recipes for Soyfoods]. Planta Soyavyn, 2a Calle Poniente No. 2-4, Lourdes, Colón, Depto. La Libertad, El Salvador. [Spa]*
• ***Summary:*** This Spanish-language recipe booklet is designed to help local people use the company's soyfood products. Address: Lourdes, Colón, Depto. La Libertad, El Salvador. Phone: 51-0705 or 23-3554.

10066. **Product Name:** Traditional Japanese Soup (in a Cup) [Mild Miso, or Dark Miso].
Manufacturer's Name: San-J International, Inc.
Manufacturer's Address: 2880 Sprouse Dr., Richmond, VA 23231. Phone: 800-545-9545 or 415-821-4040 (Perelman).
Date of Introduction: 1992. February.
Ingredients: 1995: Liquid broth in foil pouch: San-J rice miso (water, whole soybeans, rice, salt), kombu extract (seaweed, barley malt), water, alcohol, salt, shiitake mushroom powder. Dried vegetables in foil pouch: Fu ([baked] wheat gluten), tofu (soybean curd), scallions.
Wt/Vol., Packaging, Price: 0.930 oz (23.6 gm) net paper cup. By March 1995 1.1 oz. Retails for $1.49 (3/95, California).
How Stored: Shelf stable.
New Product–Documentation: Spot in Natural Foods Merchandiser. 1992. July. p. 72. Shows a black-and-white photo of the side of both cups. Both products are prepared with real miso paste (not dried) for authentic Japanese flavor and texture. "Just add boiling water to create instant soup for lunch-on-the-go or a low-fat first course."

Talk with Steve Zoller of San-J. 1992. July 6. This product was introduced in Feb. 1992. Product with Labels sent by Steve Zoller. 1992. July 7. Illustration: On the dark miso a Japanese man drinking a cup of miso soup; on the mild miso, a Japanese woman doing the same. "Directions: Squeeze contents of miso packet into [paper] cup. Empty contents of vegetable packet into cup. Add boiling water to ½ inch from top of cup. Cover for 1 minute. Stir well before eating."

Ad (8 by 11 inches, color) in Natural Foods Merchandiser. 1992. Sept. p. 35. "188 years and one minute later, its soup." Shows a Japanese man and woman, kneeling on opposite sides of a low table in a tatami mat room, each drinking a paper cup of San-J miso soup. "Seven generations after San-J's founding fathers began making miso near Nagoya, Instant Miso Soup-In-A-Cup comes to America." San-J: Established 1804.

Product with Label purchased at Open Sesame in Lafayette, California. 1995. March 11.

10067. Schaefer, Mary Jane; Love, J. 1992. Relationships between soybean components and tofu texture. *J. of Food Quality* 15(1):53-66. Feb. [34 ref]
• ***Summary:*** Tofu was prepared from Amsoy 71, Vinton, or Vinton 81 soybean varieties. Varieties high in protein content produced tofu with a high yield and firmer, more springy texture. "Phytic acid may preferentially bind the calcium coagulant, altering the curd structure and yield, composition and texture of the resulting tofu." Address: 210A MacKay Hall, Dep. of Food Science and Human Nutrition, Iowa State Univ., Ames, Iowa 50011.

10068. **Product Name:** Vegetarian Meatball.
Manufacturer's Name: Season's Harvest.
Manufacturer's Address: 52 Broadway, Somerville, MA 02145. Phone: 617-628-1182.
Date of Introduction: 1992. February.
Ingredients: Incl. tofu, brown rice, textured soy protein concentrate.
New Product–Documentation: Talk with Ademar Reis. 1993. Nov. 29. He introduced this product in Feb. 1992.

10069. **Product Name:** Soy A Melt Slices: American Soy Singles (Soy Cheese With Casein).
Manufacturer's Name: White Wave, Inc.
Manufacturer's Address: 1990 North 57th Court, Boulder, CO 80301. Phone: 303-443-3470.
Date of Introduction: 1992. February.
Wt/Vol., Packaging, Price: 6 oz vacuum pack.
How Stored: Refrigerated.
New Product–Documentation: Front panel of Label sent by Lon Stromnes. 1992. Feb. 26. 3¼ inches square. Self adhesive. White and light blue on dark blue. Front panel: "Made with organic soybeans. Contains no cholesterol. 99.98% lactose free."

10070. Burns, David. 1992. Homestyle Foods is now owned by Weider Food Co., which also owns Heinke's Inc. (Interview). *SoyaScan Notes.* March 3. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Homestyle Foods stopped distributing products and was disbanded in Nov. 1991. White Wave has been producing and co-packing their soy products for some time now. Martin (Marty) Roth, a consultant for Weider

© Copyright Soyinfo Center 2013

(pronounced WEE-dur, the famous old protein company) helped arrange the deal, which was consummated on 18 Dec. 1991. Weider acquired Homestyle's product names and formulas, but no money changed hands. As David says, "It was basically a bailout." The two principals in Homestyle (David Burns and Robert Dolgin) will be paid from future sales of their products. The fact that Weider owns Heinke's Inc. (a natural juice company in Paradise, California) made a good match since Homestyle sold Fruit Tops, natural fruit juice popsicles.

Weider hired David on a 6-month consulting agreement, which may be extended. David is hopeful that he may eventually be hired permanently by Weider. At the time of Weider's acquisition, Homestyle had large debts to suppliers–which Weider did not take on. David is hopeful that he and Dolgin will be able to pay off their debts from future income from sales of Homestyle products.

Homestyle's three best-selling products were the no-egg and cottage salads, the ravioli, and the So-Free Chocolate Tofu Pudding.

Update. Call from David Burns. 1993. Sept. 24. He is now working for Quong Hop & Co. Weider bought Homestyle mainly for the Fruit Pops. They just let the rest of the company die. They did pay David for his inventory and made it possible for him to pay off his debts. He has not gotten much money from them, just a trickle on income from the Fruit Pops. Address: General Manager, Homestyle Foods, 2327 Bluebell Dr., Santa Rosa, California 95401. Phone: 707-525-8822.

10071. Jacobs, Lenny. 1992. More about seitan and wheat gluten (Interview). *SoyaScan Notes.* March 11. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** John Weissman, who may have been the first person to make seitan in America, is selling Solar Burgers in the Harvard Garage (a collection of little shops) in Harvard Square in Cambridge, Massachusetts. Lenny saw him about a month ago and thinks he can track him down. Solar Burgers are basically seitan plus some new ingredients.

Yumie Kono, who taught Lenny and others at The Seventh Inn how to make seitan, now lives in Canada. Aveline Kushi knows how to reach her. Aveline used to say that seitan was too complicated to make unless one had some special equipment, etc.

The publisher of Lenny's first book on seitan sold about 2,500 copies; he is now working on a second edition that will be published by Avery Press. The manuscript should be ready in about 5 months, and will contain a history of seitan.

Some of the earliest seitan products in Europe were made by Jonathan in Belgium. Many are still on the market, have very attractive packaging, and are sold in most natural food stores in Belgium.

Wheat gluten is known in both Vietnam and Thailand and has its own name. Lenny has eaten it at Thai and Vietnamese restaurants in America. He knows a Vietnamese food store that sells wheat gluten in cans.

John Belleme told Lenny that Legume wants to launch a new seitan product as the entree in one of their frozen dinners made with John's seitan. Legume's first seitan product, named Legume Meatless Pepper Steak with Kofu [fresh wheat gluten] and Noodles, was made with seitan made by Upcountry Seitan (Sandy Chianfoni).

Lenny has heard that a lot of vital wheat gluten is made in Australia, and that some of the starch removed during the wet processing may be recovered and sold as wheat starch–but he is not sure. Address: New Age, Brighton, Massachusetts. Phone: 617-787-2005.

10072. Williams, Brian. 1992. Entrepreneur pins his hopes on a budding taste for tofu. *Cincinnati Post.* March 17.
• ***Summary:*** David Kimbel, in partnership with his Japanese wife, Chieko, has launched Chieko Tofu, Inc., a tofu manufacturing company in Cincinnati. He has made health foods for the past 14 years, starting with alfalfa sprouts in his basement, then expanding into bean sprouts [including soy sprouts]. His sprout company is named Sunsprout of Cincinnati. Chieko Tofu hit the stores in late Feb. 1992. The company makes tofu 3 days a week using organically grown soybeans. "Chieko, which has two employees in addition to Kimbel and his wife, produces 300 cases of tofu a week–there are 12 one-pound packages of tofu in a case [i.e. 3,600 lb/week]–and Kimbel sees the potential of reaching 450 cases a week within a month." Address: Post staff reporter, Ohio.

10073. *SoyaScan Notes.* 1992. The advantages and disadvantages of wheat gluten and seitan compared with soyfoods such as tofu and tempeh (Overview). March 19. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** Advantages: 1. Wheat gluten and seitan can be made to have more of a meatlike texture and flavor in vegetarian food products using simple technology. 2. They are lower in fat and have a lower percentage of calories for fat.

Disadvantages: 1. Wheat gluten and seitan are much more expensive per unit of weight or unit of protein. 2. The process by which gluten is made is hard on the environment, unless they are made from vital gluten. If made from whole wheat, the wheat starch cause such severe water pollution and clogs up municipal sewage pipes to such an extent that many municipalities will not allow manufacturers to continue operation. 3. The process for making them is very wasteful, since wheat contains only about 14% protein. The rest of the wheat (mostly starch) is wasted–almost as if it were fed to livestock. 4. Gluten is a major allergen; many people are allergic to it. In fact many foods advertise that they are "gluten-free" and many gluten-free cookbooks and other books have been published. 5. Celiac (coeliac) disease

© Copyright Soyinfo Center 2013

and celiac sprue are serious disorders. Most people afflicted with them are advised to follow a gluten-free diet. 6. The quality of their protein is lower.

In summary, in countries such as China and Japan, where both gluten products and soy products have been known and consumed for centuries, soy products pervade the diet and are a significant source of protein, whereas gluten products are used in very small amounts as minor specialty products. In China, they are best known in vegetarian restaurants.

10074. Ota, Eileen. 1992. History of Ota Tofu Shop in Portland, Oregon (Interview). *SoyaScan Notes.* March 26. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** This interview was followed by letters from Eileen dated 28 April 1993 and 11 Feb. 1998; there were 2 more interviews and several e-mails in June 2008. Documents: The address "86½ 5th N" [86½ North 5th Street] seems to be strongly linked to the origin of this company. Although Eileen did extensive research with the Oregon Historical Society in Portland, the City of Portland Bureau of Licenses, and the State of Oregon Corporation Division, she was unable to find any early document that mentioned a tofu shop in Portland. Though she has no firm proof that the tofu company was established in 1918, she will continue to use that date since it long appeared on the packages in which their tofu was sold.

First some basic genealogy and family history: Eileen's best source of information was an interview with Mrs. Matsuno Ota. The tofu company was apparently started by an uncle. The Ota/Ohta family lived in Okayama, Japan. At some date in the early 1900s the three brothers (including Saizo Ohta, the third brother) came to the USA. One of the first two Ohta brothers was a partner with a Mr. Nagaro, with whom the "original" Ohta Tofu was established in about 1911. For some reason, this brother returned to Japan, leaving the business to Saizo Ohta, his brother. Eileen has not been able to find the given name of the man who founded the company. According to Matsuno Ota, the company was initially named "Asahi" or something like that related to the word for "sun."

Shina Masuda (a woman, born 31 Jan. 1895 in Okayama) and Saizo Ota (born 13 April 1881) immigrated separately to Oregon from Okayama, Japan. Saizo arrived in the USA first in March 1905; Shina arrived later, in June 1913. They were married later (at an unknown date, probably in Okayama); she was a "picture bride." Their first business may have been a hotel, bath house, or perhaps a laundry. They had one child, a daughter, named Matsuno Ota, who was born in Portland in July 1916. In 1920, Matsuno's mother, Shina, took Matsuno to Japan to be raised by an aunt (Shina's sister) and sent to school. Shina then returned to the USA to join her husband.

It is not yet clear how and when Saizo and Shina got involved in making tofu at the tofu shop co-founded by Saizo's brother. Matsuno Ota vaguely recalls the following: In 1918-19 there was a terrible worldwide "Spanish flu" epidemic. 548,000 died in the USA alone, and about 20 million worldwide. Matsuno recalls that the daughter of the founding Ota brother became ill with the flu, thus prompting her father to return with her to Japan. Matsuno does not know what became of his partner, Mr. Nagaro. It was probably at about this time that Saizo and Shina Ota took over the tofu business at 86½ North 5th St.; this may have been when aburage and konnyaku started being made at the company. They continued making tofu at that address until 1941 or early 1942, when they were interned during World War II at the Minidoka relocation camp in southeastern Idaho. Matsuno was spared the hard life of the camp, since she was in Japan going to school when the war started; she stayed in Japan until the war ended in 1945. Saizo [the husband] died on 1 April 1943 in the relocation camp. After being released from the internment camp in 1945, Mrs. Shina Ohta returned to Portland to re-open her tofu shop at its former location. Fortunately, the landlord had kept all the tofu-making equipment in good shape. But it was hard work for a single Japanese woman. She continued at the same address for a few years. When the building was sold to a new owner, she moved her shop to 322 N.W. Everett St. in Portland. In 1981 the business again moved to its present location at 812 S.E. Stark St. in Portland. At that time the company began making and selling soymilk.

In Oct. 1938 Matsuno Ota (a woman) and Sokichi Isoshima in Japan were married in Japan (in either Okayama or Tottori prefecture), but they decided (probably at that time) that Mr. Isoshima would take the Ota family name in order to carry on that name (a common practice in Japan) since Matsuno Ota's parents had had no male children. They had three children: Noriko Ota (female), Yoshiko Ota (female), and Koichi "Ko" Ota (male). In May 1955 Mrs. Matsuno Ota returned to the USA with her husband and children. A medical technician in Japan, Mr. Ota was unable to find work except as a janitor at Reed College in Portland. He helped on weekends at the tofu shop. Matsuno Ota worked, sewing, at Portland's White Stag, a clothing manufacturer. When Mrs. Shina Ohta suffered a stroke in 1957, Mr. Sokichi Ota took over her work at Ota Tofu Co., joined on weekends and holidays by his children. In 1971 Koichi Ota worked first as a partner with Sokichi Ota, and then took over management and operation of Ota Tofu. Koichi appears in an illustration in the book *Tofu & Soymilk Production,* by Shurtleff & Aoyagi (1979, p. 150). In 1976 Koichi Ota and Eileen Nishimoto were married. They eventually had 4 daughters: Sara, Stephanie, Kimberly, and Julie. In 1981 the company moved to a new building at 812 S.E. Stark St. in Portland. Sokichi Ota retired, but Koichi continued with 4 full-time employees. In 1987 the company name was officially changed to Ota Family Tofu from Ota

© Copyright Soyinfo Center 2013

Tofu Co. As of 1993 Ota Family Tofu is still located at 812 S.E. Stark Street, Portland, Oregon 97214. Phone: 503-232-8947. It is managed by Koichi Ota and has 8 employees. They make tofu 6 days a week, plus agé and soymilk. Eileen still works at the company. She was born in 1949, and so was not snared by the internment, but here elder brother, Richard, was.

The Oregon News, established in 1904 and published in Portland, was in 1921 "The only Japanese daily newspaper in the state." It might contain early articles about or advertisements by the tofu company. Eileen then gives details for listings she has discovered for "Ohta" in Caucasian-run Polk's Portland City Directory, from 1915 to 1950. Soy is first mentioned in 1950.

Where did Ota Tofu-ten get its soybeans in 1918? Probably from S. Ban and Company of Portland. There is a half-page ad in Polk's Portland City Directory for "S. Ban and Company–Importers and Jobbers, 32-34 Third St., North, Portland, Oregon. The company's president is Shinzaburo Ban, who by 1911 (see Joseph Gaston. 1911. Portland, Oregon: Its history and builders, Vol. 3) was "a leading Japanese merchant and contractor of the Pacific Coast." Born in Tokyo on 4 March 1854, he came to America in about 1891 and took up residence in Portland. By 1911 he had branch stores at Sheridan, Wyoming; Denver, Colorado; and Tokyo, Japan. By 1918 (and perhaps much earlier) he was importing soybeans (as well as silk goods, tea, rice, etc.) to America. He also owned saw mills and a shingle manufacturing company.

Eileen encloses 3 photos from Matsuno Ota taken in about the 1930s: (1) The motorized grinder inside the tofu shop. (2-3) Mr. Saizo Ota, standing behind a long black car outside his tofu shop. A large awning covers the window of the tofu shop that faces the sidewalk. Address: Ota Tofu, 812 S.E. Stark, Portland, Oregon 97214.

10075. Rose, Richard. 1992. Re: Tree of Life purchases Soya Kaas, Inc. Letter to William Shurtleff at Soyfoods Center, March 27. 1 p. Typed, with signature on letterhead.
• ***Summary:*** The company was purchased from Richard McIntyre. Rose does not know what Richard McIntyre is doing now or will do in the future. American Natural Snacks (ANS, a wholly owned subsidiary of Tree of Life) was McIntyre's only customer; they had an exclusive arrangement. Address: President, Rose Enterprises, P.O. Box 5020 (616 Davis St.), Santa Rosa, California 95402-5020. Phone: 707-576-7050.

10076. Weissman, John. 1992. Pioneering work with seitan, Wheatmeat, and Tan Pops in America, mid-1976 to 1992 (Interview). *SoyaScan Notes.* March 31. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Continued: In the fall of 1976 John formally founded the Vegetable Protein Company, registered with the city of Cambridge, and moved his operation out of his home into a commercial shop in Central Square at 140 River St. in Cambridge. Robert Allen left the company to begin a new career in the field of men's clothing. In 1976-77 John tried to get a trademark for Wheatmeat but was unable to because I.T.T. (Wonderbread) owned the trademark for a bread product. With Tan Pops as the main cash product from 1976-1978, the business became a real commercial business and began to grow. Selling as many as 85 Tan Pops a day at Erewhon alone, he began to earn a modest living For the first time, John began to use machines to help him in making his products. In 1977 he developed a portion-control method for the Tan Pops, running the seitan through a meat grinder, and forming them into cylinders, like a fat sausage, rather than the former slabs. John also began to experiment with new ingredients in the Wheatmeat and Tan Pops–such as vital wheat gluten, which he purchased from Ogilvie Ltd. in Montreal, Quebec, Canada. Other ingredients used included oat bran and oat flour mixed with wheat, whole toasted soy flour. The formula was constantly changing. At one point the main ingredients in the Tan Pop were vital wheat gluten and whole wheat flour. Neither Wheatmeat or Tan Pops were ever made entirely from vital wheat gluten.

In addition to the Wheatmeat Tan Pop, John developed and made a Tofu Pop, introducing it in the spring of 1977. He bought squares of plain pressed tofu (3 inches on a side and 3/4 inch thick) from a Chinese retail food store in Boston's Chinatown–he does not recall the company's name and he is not sure if they made the tofu or bought it from elsewhere. Later he bought tofu from Yah Kee, a Chinese tofu maker. He skewered the pressed tofu squares, coated them with his dry flour mix and corn batter, and deep-fried them. He first sold these at the very first Bread & Circus natural food store purchased by Anthony Harnett in Brookline. The product was introduced just after Anthony bought the store–but it was discontinued after a month or so, because it sold slowly; the unflavored tofu was too bland.

One day in the spring of 1979 he realized that deep-frying was unhealthy, and that day he and an employee moved his Pitco deep-fryer down to the basement, thus starting the "Vegetable Protein Museum of Natural History"–and stopped making Tan Pops. At that point he reformulated the Solar Burgers by adding TVP (they were made from a mixture of seitan and soy in various forms, incl. soynuts and TVP). He also made a TVP chili, which he thinks was called Vegetarian Chili.

In about 1978-79 John introduced another new product to salad bars around Boston. Named Smoky Soy Bits, it was a combination of TVP and gluten (produced by Ogilvie Ltd. in Canada) made into bacon-like bits, but without hydrogenated oils or salt (he used tamari instead). It was an "all natural" product–to the extent that TVP is natural.

In Nov. 1980 John introduced Weissman's Original Tofu Sausage, which tasted like bologna. A 6-ounce mixture

© Copyright Soyinfo Center 2013

of spices and tofu in a cellulose casing, it was cooked in a smokehouse. His company made it for the first 4 years and it eventually became his best-selling item. As its popularity increased, he phased out retail sales of Wheatmeat and Solar Burgers, and sold these Tofu Sausages to restaurants in bulk. After this period he invented only tofu products.

In 1983 John invented Pasta Pals, a tofu-gluten meatball. He discontinued it when Lipton Tea Inc. brought the trademark from him in late 1984. Lipton still owns the registered trademark.

In May 1984 John had to leave his food plant at 140 River Street in Cambridge. So he arranged with Michael Cohen to make the Tofu Sausage at his plant in Greenfield, Massachusetts. This was disastrous for John, since the product's new poor quality almost ended any reputation it had left in the marketplace. But it was quite an education for John. In January 1985 he took back the product and began making it for himself again.

In the fall of 1984 John arranged with Ademar Reis, owner of Season's Harvest (a sandwich maker who was John's first customer for bulk-packed Solar Burgers in 1976) to have the Solar Burger made at Ademar's shop. John also wanted him to make Smoky Soy Bits and showed him how. Reis made the products for John briefly in late 1984, however this situation did not work out for John either. But it did for Ademar, who to this day makes soy "bacon" after the manner John showed him, using textured soy flour or concentrate, and flavorings similar to or the same as those from raw material sources which John supplied to him. Reis now also makes a tofu meatball.

In 1985 John changed the company name to VegPro. He continued to make Solar Burgers and Wheatmeat, but from then on he only invented and worked on tofu products. In about 1986, based on the success of his Weissman's Original Tofu Sausage (6 oz), he introduced a new Tofu Savvy line of products (starting with a 3-lb Boloney), each in a 2-3 lb loaf shape like a meatloaf, and sold to delis. He buys his tofu from a tofu maker in Massachusetts. With names like Tofu Salsa Savvy (bulgur and tofu), Curry (with brown rice and veggies), Spice-Seed, and Boloney, these are offshoots of the tofu sausage, but they involve a highly proprietary process that John has developed. Delis sell the sliced loaves for use in sandwiches.

In 1990 he began to test market (in one Bread & Circus store) two new types of tofu franks: Good Dogs, and Bad Good Dogs (hot & spicy), each with a registered trademark. They were only on the market for 1-2 months because they didn't keep well–but he still feels they are excellent products. He made them himself because he doesn't like to have them made on meat processing machines.

Today John works as a very creative solo craftsman and a chef, still making a line of food products himself, including the Weissman's Original Tofu Sausage (6 oz), and the Tofu Savvy line. His products are sold at about 10 outlets, including five Bread & Circus stores, plus some co-ops, restaurants, and health-food stores.

He no longer makes Solar Burgers, but someone from California is making another product with that name.

On 19 April 1988 John received federal trademark #1,485,401 for Wheatmeat. He knows of people in Utah and Pennsylvania who are using his registered trademark, Wheatmeat, illegally.

John, now age 43, is a musician, selling foods he has developed, and writing a novel. He is almost a vegetarian, but he eats some fish. Address: VegPro Co., 133 Nottinghill Rd., Brighton, Massachusetts 02135.

10077. *BBC Vegetarian Good Food* (*England*). 1992. Better burgers? Spring. p. 46-47.
• ***Summary:*** Seven percent of the people in Great Britain don't eat meat. A taste panel rates the top ten meatless burgers in the UK. First place: Birdseye cauliflower cheese quarter pounders. 2nd place: Birdseye original vegetable quarter pounders. 6th place: Cauldron Foods savoury tofu burgers (sold at Safeway, Holland & Barrett, and leading health food shops and delicatessens). 9th place: Cauldron Foods chilli flavour tofu burgers.

10078. Bounds, Sarah. 1992. The subject of soya. *BBC Vegetarian Good Food* (*England*). Spring. p. 28-29, 31-32.
• ***Summary:*** An introduction, with many color photos, to soyfoods, including TVP, tofu, soya milk, soya flour, soya oil, soy sauce, miso, tempeh, fresh soya [green vegetable soybeans; "soya beans can be eaten fresh straight from the pod, served green and tender..."], and whole dry soybeans. Contains considerable incorrect information.

10079. GEM Cultures. 1992. Catalog [Mail order]. 30301 Sherwood Rd., Fort Bragg, CA 95437. 9 p. March. [4 ref]
• ***Summary:*** A new addition to the catalog is "Tofu form boxes" named "Total Tofu!" Each is made by a local woodworker in Mendocino County using American beech wood. The 8 by 5 by 3½-inch size is large enough to press 2 pounds of tofu. Included also is a 3 oz packet of natural nigari, 3 ounces of Terra Alba calcium sulfate, a double square of Grade 60 cheesecloth to line the box, and directions on how to make tofu and soymilk. Price of a Total Tofu kit, postpaid, is $32.00. Address: Fort Bragg, California. Phone: 707-964-2922.

D.J. 1992. Early uses of soy protein in the Far East, U.S. *INFORM* (*AOCS*) 3(3):282-88, 290. March. [54 ref]
• ***Summary:*** A nice history of the subject based on a review of the literature. Contents: Early history in East Asia (industrial uses, chiang and miso, natto, tempeh, soymilk, tofu, shoyu). Emergence of U.S. soybeans (early soybean mills, ADM, Glidden). Chemical understanding of soybean protein (major components/fractions). First industrial applications (oil and meal). Soy protein-based plastics (Henry Ford). Chemurgic movement (U.S. Regional Soybean Industrial Products Laboratory, Northern Regional Research Center, Glidden). Soy protein adhesives (I.F. Laucks). Paper coatings and sizings (Glidden). Soy fiber spinning (Ford, Azlon, Drackett). Other industrial uses. Address: Center for Crops Utilization Research, Iowa State Univ., Ames, Iowa 50111.

10082. **Product Name:** Braised Tofu.
Manufacturer's Name: Marigold Health Foods Ltd.
Manufacturer's Address: London, England. Phone: 01-267-7368.
Date of Introduction: 1992. March.
Wt/Vol., Packaging, Price: 225 gm can. Retails for £1.48 (3/92, London).
New Product–Documentation: Spot in BBC Vegetarian Good Food. 1992. Spring. p. 8. Shows a color photo of the front of the can.

10083. Morinaga Nutritional Foods, Inc. 1992. Garden variety (Ad). *Natural Foods Merchandiser.* March. p. 49.
• ***Summary:*** This half-page color ad (copyright 1991) shows three different types of Mori-Nu silken tofu (Soft, Extra Firm, and Regular) surrounded by lush fresh fruits and vegetables. The text begins: "The time is ripe for Mori-Nu."
This ad also appeared in *Health Foods Business* (April, p. 53). Address: Los Angeles, California. Phone: 1-800-NOW-TOFU or 310-787-0200.

10084. **Product Name:** Chinese-style Tofu, Very Firm Tofu, Pressed Tofu Sheets, Buddha's Chicken (Chicken Roller), and Pork-Flavored Tofu Sheets.
Manufacturer's Name: Orient Venture, Inc.
Manufacturer's Address: 3455 Hyde Park Blvd., Niagara Falls, NY 14305. Phone: 716-285-3333.
Date of Introduction: 1992. March.
New Product–Documentation: Talk with Richard Keys, vice-president and controller. 1992. Jan. 22. This company is owned by Aaron Pomerantz, who is also president and also owns a local Chinese restaurant, the Emperor of China in Niagara Falls. A crew of about 9 Chinese advisors and workers is now assembling at the plant tofu equipment made in Harbin and supplied by the Chinese as their participation in the joint venture. The technology is not as modern as that made in Japan but all parts are stainless steel. One man is from Hi-Tech, China's trading window to North America, and another is a representative of the city of Harbin government, as well as a translator/project manager. The company hopes to start tofu production in about 3 weeks. The tofu products may be marketed under the White Dragon brand. After that, they will be production of Chinese steamed or fried dumplings (*hundun, jiao,* springs rolls). Orient Venture Inc., does numerous projects with China, including importing and exporting, joint ventures and arranging joint ventures with North American companies, etc.
Talk with Richard Keys. 1992. Feb. 25. Production of three products will start in March, perhaps under the Snow Dragon brand: Regular Tofu, Pressed Tofu Sheets, and Chicken Roller (made from Pressed Tofu Sheets). The company is looking for an American production manager. There have recently been many communication problems between the Americans and the Chinese in this venture.

10085. Prevedell, Donna. 1992. Soybeans: So organic? These farmers substitute management for pesticides to fill market niches. *Soybean Digest.* Mid-March. p. 38-39.
• ***Summary:*** Glen Spray and his brother Rex have been growing soybeans organically for 20 years on their 700 acres of their farm in Mt. Vernon, Ohio. They earn $10.50 to $12.00 a bushel and get yields of 50 bu/acre, "The Organic Crop Improvement Association reports only about 90,000 soybean acres, less than 0.2% of the U.S. total, were farmed organically in 1990. Why so few farmers are willing to devote so few acres to highly profitable organic soybeans is a mystery to veteran organic growers. From Nebraska to Ohio they routinely raise 40- to 60-bushel per acre crops, earn 15% to 100% over market prices and spend less on inputs than their mainstream neighbors. And they do it with the same machinery and practices found on conventional farms." Spray notes that 50 years ago all farmers grew their soybean organically. On level ground, they use a 4-year rotation of corn, soybeans, wheat or oats, and red clover. Aside from bedding from the cattle barn, no commercial fertilizer or lime has been applied for 2 decades. They plant Amsoy and Vinton varieties for the white hylum and higher protein content required by the tofu market. Details of the crop cycle are given. Four other farmers growing organic soybean can be found in Edgar, Nebraska.

10086. *SoyaCow Newsletter* (*Ottawa, Canada*). 1992. Child Haven sends six SoyaCows to India with CIDA's help. 1(1):1. Jan/March.
• ***Summary:*** "Child Haven International of Maxville, Ontario, has purchased six SoyaCow systems for their Soya Milk Cottage Industry Project in India. The project is supported by the Canadian International Development Agency and charitable donations from the public. The machines are reported to be running well without problem. Unskilled women with minimum training are able to operate

© Copyright Soyinfo Center 2013

the machines and make soya milk, tofu, soya yogurt, okara, etc., and many delicious and nutritious products."

A photo shows Child Haven's directors, Fred and Bonnie Cappuccino, as they take delivery of six SoyaCows from ProSoya's president, Rashmi Gupta [Raj Gupta's wife]. The SoyaCows are arranged on two handsome stands. Below each is a stainless steel tofu forming box.

Note 1. The order of these six SoyaCows from Child Haven was a defining moment for CIDA; it showed that Raj's original idea was working and that this order would be the first of many.

Note 2. This is the earliest issue of *The Soya Newsletter* that contains the word "ProSoya." The word is used in many articles in this issue to refer to the company that makes the SoyaCow.

Note 3. As of May 1999 Child Haven is located at: R.R. #1, Maxville, Ontario, K0C 1T0, Canada. Phone: 613-527-2829. Attn: Bonnie and Fred Cappuccino.

10087. *SoyaCow Newsletter* (*Ottawa, Canada*). 1992. SoyaCow workshop. 1(1):1. Jan/March.
• ***Summary:*** "ProSoya is offering hands-on training on a SoyaCow system in Ottawa... The participants will learn how to make soya milk, tofu, and many delicious soya foods, drinks, and desserts. The SoyaCow Manual is included in the workshop fee of US$495. SoyaCow training is also provided by Ankur Services in Hyderabad, India."

10088. *SoyaCow Newsletter* (*Ottawa, Canada*). 1992. SoyaCow-100 introduced. 1(1):2. Jan/March.
• ***Summary:*** "ProSoya has designed a soya milk plant for those needing systems larger than the SoyaCow-20. Whereas the SoyaSow-20 uses a 20 L [litre] vessel to make soya milk at the rate of 15 L/batch, 3 batches/h [hour], the SoyaCow-100 L pressure vessel with a capacity to make up to 75L/batch. Depending on the capacity of the boiler for steam generation, SoyaCow-100 can process up to 6 batches/h. The price for the basic grinder / cooker unit for a SoyaCow-100 is US$9995. A mechanical press, a steam generator, and tofu forming boxes are also available to complement the grinder / cooker."

10089. *SoyaCow Newsletter* (*Ottawa, Canada*). 1992. SoyaCow manual. 1(1):2. Jan/March.
• ***Summary:*** "Child Haven International, Maxville, Ontario, has published a manual on the SoyaCow. The 100-page manual introduces the reader to soya milk, tofu, okara, soya yogurt, etc. Most everything one needs to know to start and profitably run a small soya dairy operation, especially the SoyaCow-20 is given."

Dep. of Cancer Prevention and Control, Geiju City. All: China.

10091. Elias, Marilyn. 1992. Next on the menu: Beef minus the cow. *USA Today.* April 8.
• ***Summary:*** The article begins: "San Francisco–Tofu that tastes like T-bone steaks and veggie burgers with intense ground beef flavor could be staples on the future U.S. menu, a scientist predicted today. The natural substance that gives beef its meaty taste has been identified and even synthesized in the lab, says researcher Arthur Spanier, U.S. Department of Agriculture. That will make the new, faux beef fare possible, he reported at an American Chemical Society meeting.

"The substance, a chain of eight amino acids, is called BMP, for 'beefy-meaty-peptide.' Tasters find it 'quite meaty, very savory,' Spanier says... Since the peptide is natural, 'we may be able to genetically engineer cattle so their muscles have more,' giving all beef cuts a flavor boost, he says."

Note: This information was apparently first published by the American Chemical Society. Address: Washington, DC.

10092. Hills, Benjamin; Logan, Ron (Shaum). 1992. Plans to set up a tofu shop in Khabarovsk, in the Soviet Far East (Interview). *SoyaScan Notes.* April 8 and 23. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Talk with Benjamin Hills on April 8. He is now working with an American named Ron (Shaum) Logan, who lives in Eugene, Oregon, who wants to start a tofu company in Khabarovsk, in the far eastern USSR. Shaum does not know anything about tofu, and may not have money, but he has connections with a Russian group, whose name Benjamin does not know. The Russian group has some of the money for the project. Shaum is going to the world conference on the environment in Brazil in June. He networks on Econet. Benjamin is working under the auspices of a partnership called Lotus, which includes the Prout Research Institute and the Public Academy of Sciences (Russia), Far Eastern Division. The tofu shop will be worker

© Copyright Soyinfo Center 2013

owned.

Talk with Ron (Shaum) Logan. April 23. He works with the Prout Research Institute. Recently he was invited to the Soviet Far East to work on the development of a state development plan there. His Institute's philosophy is based on decentralized planning, cooperative economics, deep ecology, and sustainable development. While he was there, the people who invited him were forming a relationship with the Public Academy of Sciences (PAS), which is a breakaway from the official Russian Academy of Sciences. The latter group is heavily dominated by the Communist Party. PAS wanted more intellectual freedom; they tend to be more progressive and a lot of concerns are now economic. Lots of soybeans are grown nearby in the Amur (pronounced uh-MUR) valley. On the Russian side of the Amur River, most of the soybeans are used for fodder, but apparently a lot just rot in the fields. Manchuria is on the other side of the river. The proposed tofu shop will be part of a regional development plan, but the source of funding is still uncertain. No one in Khabarovsk knows anything about making tofu, which is why Benjamin Hills has been brought into the project. The city of Khabarovsk is on the Amur River. There is also a mountainous state called Khabarovsk. The Soviet Far East consists of 8 geographical subunits; some are like states, some like territories, some like autonomous areas. The Amur valley is near Khabarovsk and within the Soviet Far East. Address: 1. 306 6th St., Petaluma, California 94952; 2. 3435 Ferry St., Eugene, Oregon 97405. Phone: 707-762-1924 (Benjamin); 503-345-8014 (Ron).

10093. Root, Evan. 1992. Recollections of early work with Erewhon and Sanae. Trip to Japan with Paul Hawken (Interview). *SoyaScan Notes.* April 11. Conducted by William Shurtleff of Soyfoods Center. Followed by a letter of April 29.

• ***Summary:*** Evan (his first name rhymes with "heaven") does not have any early Erewhon catalogs, but he thinks Marc van Cauwenberghe might have some in his library on macrobiotics. He does have a letter to the general public announcing the opening of the first Erewhon retail store on 9 April 1966. It was at 303-B Newbury St., below street level. Initially Evan owned (titularly) 100% of the stock in Erewhon, but soon he passed it to Aveline Kushi after legal documents were drawn up. While he was at Erewhon the little retail store sold the following soy products: whole soybeans and probably soy flour (probably from Walnut Acres or a Mennonite community, both in Pennsylvania), soy sauce and miso (probably both obtained from Infinity Foods in New York; Infinity imported these products from Japan). Hamanatto was also sold. No tofu was sold at the store, but firm tofu was available from nearby Chinatown.

The Kushis imported miso, shoyu, condiments, etc. from Japan about twice while Evan was managing the Erewhon retail store. This direct importing was infrequent and the quantities were small due to the lack of cash. It was much easier to buy from Infinity or Chico-San and not tie up the money. In fact it was the norm to stretch out those friendly distributors as long as possible for payment.

Before he left Erewhon, in Oct. 1967, Evan personally hired Paul Hawken, with Aveline's permission, to take his place. Then Evan opened the first macrobiotic restaurant in Boston, named Sanae (meaning "young rice plant" in Japanese); it opened in early 1968 on Newbury St. In late March 1969, Evan and Paul Hawken left Boston and traveled to Japan together. Several months before they left, Evan had been given 50% of the shares of stock in Sanae by the Kushis for the work he had done at Sanae. The Kushi's lawyer, Morris Kirsner, had drafted the agreement to read that if Evan did not return to management of the company within 18 months, he would agree to sell this stock back to the Kushis at an agreed-upon price. Evan thinks that Paul had a similar type of stock arrangement in Erewhon, but he is not sure what it was (Note: See interview with Aveline Kushi, March 1993). Evan went to Japan mainly to study the language and culture. He ended up staying there 3 years and 7 months, largely in Tokyo (Setagaya-ku, Shoin-jinja-mae). He studied Japanese at the Tokyo School of Japanese Language. After 18 months, there was a lad name Hiro Fujieda living with the Kushis in Boston. Rather than Hiro pay rent to the Kushis, Hiro's family would pay Evan monthly in Japan on a monthly basis–until the value of the stock was paid off. Evan used this money to support his studies.

After about a year, in late 1971 or early 1972, Evan went to work for Muso Shokuhin in Osaka. He translated letters that arrived from Europe and America into spoken Japanese, and then answered the correspondence. By the end of his stay in Japan, Muso was exporting quite a volume of natural foods and exports were a big part of the company focus. Evan thinks that Ty Smith took his place when Evan left.

Returning to Boston in early Oct. 1972 (along with Mr. Masuda and Michelle Matsuda), Evan became an employee of Sanae after several months, working as maître d'. In 1971, while Evan was in Japan, Sanae had expanded to open another larger branch restaurant in Boston, originally called "Sanae" but informally called "Big Sanae," then later formally named The Seventh Inn (at 269 Boylston St.). When Evan was in Japan, he heard that the restaurants were not doing well, so Yuko Okada (originally of Muso Shokuhin, who was working at Erewhon) took over management of Sanae. Hiroshi Hayashi, a top cook in a lineage, traveled to Boston from Japan, bringing with him his disciple, Chika Abe, to take charge of cooking at Sanae. His disciple, Mr. Yozo Masuda, later joined them. Hayashi is now at a restaurant named Latacarta in Peterborough, New Hampshire (Phone: 603-924-6878).

Evan's recollection is that Paul Hawken's trip to Japan was more to study the language and culture, but he did

© Copyright Soyinfo Center 2013

work on Erewhon business while he was there. Moreover, he returned from Japan after about 9 months to work at Erewhon. Evan feels that few of the people involved in early macrobiotic businesses saw themselves strictly or even mainly as businessmen. "None of us were in it, as I saw it, for the money. For us, the whole thing was a Cultural Revolution with respect to Japan." Evan also identified strongly with the phrase "Biological Revolution."

When Paul Hawken returned from Japan, he built Erewhon into a big natural foods company. Address: 541 Washington St., Brookline, Massachusetts 02146. Phone: 617-566-4783.

10094. *Toyo Shinpo* (*Soyfoods News*). 1992. [Average household expenditures for tofu, aburaage, natto and konnyaku in Japan in 1991 by region]. April 11. p. 2. [Jap]
• ***Summary:*** Average per household expenditures for various soyfoods; yen figures are not adjusted for inflation. The 11 regions (chihô) are: 1. Tokyo-to. 2. Hokkaido. 3. Tohoku Chiho 4. Kanto. 5. Hokuriku. 6. Tôkai. 7. Kinki. 8. Chûgoku. 9. Shikoku. 10. Kyushu. 11. Okinawa.

Average per household expenditures for tofu are highest in Shikoku (9,045 yen, up 22.9% from the previous year). They are 2nd highest in greater Tokyo (8,218 yen, up 3.8%). They are lowest in Hokuriku (6,835 yen, down 2.0%).

Average per household expenditures for aburage and ganmodoki (deep fried tofu pouches and burgers) are highest in Hokuriku (5,772 yen, up 3.7% from the previous year). They are 2nd highest in Kinki (5,170 yen, up 10.5%). They are by far the lowest in Okinawa (701 yen, down 0.7%).

Average per household expenditures for natto are highest in Tohoku Chiho (the northeast prefectures) (4,709 yen, up 20.6% from the previous year). They are 2nd highest in Kanto (4,133 yen, up 13.1%). They are by far the lowest in Okinawa (923 yen, down 13.5%).

10095. DeBona, Don; Callebert, Mark. 1992. Update on Lima Foods and Euronature (Interview). *SoyaScan Notes.* April 19 and 23. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The following is based on a talk that Don had in North Carolina with Mark Callebert, general manager of Lima Foods in Belgium, then a direct interview with Mark in Belgium on April 23, followed by a letter from Mark on June 16 with exact dates. Mark has worked with Lima for about 16 years (since 1 Sept. 1975).

The Gevaert family sold Lima in May 1988 to a company named Vibec in Quebec, Canada. Vibec was a construction company (they were not involved with foods) and the owners spoke French. The contact with Vibec was made via Henry Lucy, a Frenchman who was on the Lima board of directors (and also a shareholder), who was a friend of Michio Kushi (Michio had healed Henry's wife), who had quite a lot of money, and who also had a construction company in Africa. Michio was also on the Lima board for a while. Vibec purchased Lima as a way of getting involved in the new European market without borders which will begin at the end of 1993. However Pierre Gevaert and his son, Daniel (who was production manager at Lima, France), kept their property and mill in the south of France where Lima used to make miso. At that time Lima had a lot of financial problems. Pierre Gevaert owned the majority of the stock in Lima, and his relatives (mostly his brothers and sisters) owned the rest. Mark and Frank Stevens (Pierre Gevaert's son-in-law) played key roles in negotiating the deal, then stayed on to run the company. On 22 April 1989 Lima purchased Jonathan P.V.B.A., which is still a fully owned subsidiary (daughter company) of Lima. But the marriage of Lima (a Belgian natural foods company) and Vibec (a Canadian construction company) was a strange one, and for that reason it didn't last long.

Then in September 1989 Lima was purchased from Vibec by Euronature (pronounced as in French, YU-ro na-TYUR), a large international food company headquartered in Paris, France. Euronature is a holding company that was founded in June 1989; the president of Euronature was able to raise a lot of money from banks and insurance companies to create the holding company. Frank Stevens was killed in an automobile accident in Nov. 1989.

Lima is presently doing well, is financially very solid, and the future looks bright. Lima has sales of about $15 million a year, but the company is not yet profitable. Mark feels that they will become profitable when sales reach about $17 million/year. Their traditional high standards of food quality are completely supported by Euronature. Pierre Gevaert (born 21 July 1928 now in his mid-60s) no longer owns any part of Lima and neither he nor his son have been active with the company since it was purchased by Euronature. Pierre lives in the south of France and works on his organic farm there. Lima is still headquartered at Sint-Martens-Latem in Belgium.

Euronature has 4 major divisions: (1) Natural foods division, including Lima Foods, Lima's bakery and muesli factory, and several natural foods distribution companies; (2) Gourmet division; (3) Seafoods division (Euronature's largest), with branches scattered throughout Europe; (4) French specialty foods division.

Lima's largest product lines are their muesli products (which they make at their own plant), their bakery (located 6 km from Sint-Martens-Latem in Belgium), their sesame division (they make tahini and gomashio, and were one of the first to grow sesame seeds organically), and their tomato canning division (located in the south of France, it makes tomato sauces and ratatouille). Lima's leading soyfood products are tamari, shoyu, organic miso, their soymilk products (including regular and Mocha-Soy soymilk, and Soy Desserts, all made by Alpro in Belgium), fresh tofu salads, and tofu in cans and jars. Imports from Japan are

© Copyright Soyinfo Center 2013

now quite small, representing only about 10% of Lima's total sales. Although Lima no longer makes its own miso, it still sells quite a lot of miso–much of it from past batches made by Jan Kerremans in the south of France. Lima is now looking for other sources, including American Miso Co. in North Carolina. Jan now works part time as a consultant for Alpro in Belgium.

Jonathan's main products are now seitan and tofu (both fresh [pasteurized] and in jars), plus many second-generation products made from seitan and tofu, such as fresh tofu spreads, tofu pates, seitan brochettes, etc. Jonathan makes all of the seitan, tofu, and related products sold by Lima. Address: General Manager, American Miso Co., Route 3, Box 541, Rutherfordton, North Carolina 28139. Phone: 704-287-2940.

10096. Callebert, Mark. 1992. How Jonathan P.V.B.A. and Lima Foods got involved with seitan (Interview). *SoyaScan Notes.* April 23. Conducted by William Shurtleff of Soyfoods Center. Followed by a letter of June 19.

• ***Summary:*** Jonathan P.V.B.A. started to make seitan in 1978, in a plant they built specially for making seitan at Holleweg–Ekern (Hoogboom), Belgium. Mark is quite sure that Jonathan made and sold the first seitan in Europe. Not long thereafter, Lima contacted Jonathan P.V.B.A. in Belgium concerning seitan. In 1981, Lima began buying seitan from Jonathan, and selling it in bottles under the Lima brand. Mark started to work for Lima Foods on 1 Sept. 1975 and was working at Lima when Lima began selling the seitan made by Jonathan. A man named Ludo Peeters, who now works for Lima, was involved with starting up the Jonathan factory.

Lima acquired Jonathan P.V.B.A. on 22 April 1989. Today Jonathan still makes seitan (and tofu) at a plant in Kapellen, a small village near Antwerp in Belgium. The address is Antwerpsesteenweg 336, 2080–Kapellen, Belgium. Phone: 03/664.58.48. Address: General Manager, Lima n.v., P.O. Box 59, Edgar Gevaertdreef 10, B-9830 Sint-Martens-Latem, Belgium.

10097. Gabriel, John. 1992. Current work with soya in Nicaragua (Interview). *SoyaScan Notes.* April 28. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** John (age 55) and his wife Charlotte (who is now a well-known maker of psychedelic tie-dye clothing) used to make tempeh in Houma, Louisiana, in about 1977. Recently John was in Nicaragua and he plans to do work there, starting in several years, with soyfoods such as tempeh, tofu, and soymilk. He is now working with Chuck Haren of Plenty USA, to put together a grant proposal for a project and funding.

The two best known people involved with soya in Nicaragua are Luci Morren and Anne Souter. Luci is a Danish nun who has founded an organization named Asociatión Soya de Nicaragua (popularly known as Soynica, located at Apartado Postal 4451, C-164 Managua, Nicaragua). Now in her 50s, Luci has been involved with soyfoods for at least 8 years, working with a women's collective of about 5 women and promoting their use (especially as a source of nutrients for poor and malnourished children) in the barrios of Managua. The group now makes tofu using rudimentary equipment; they don't even have a press, so they must squeeze out the soymilk by hand. Luci would now like to start a commercial soy processing operation to make soymilk, tofu, and tempeh. She would like to sell these to restaurants, hospitals, schools, small retail outlets, etc., but she needs both technical and financial help. John is in communication with Luci on a regular basis. Luci is known by most development people in Nicaragua. John describes her as a very dedicated, indeed holy woman–like Mother Teresa of India. According to the SoyaScan database, in the mid-1980s, Luci was working in Mexico, teaching the people about Soya; she was with Cargua at San Cristobal Las Casas, 75 Real de Guadelupe, 29230 Chiapas, Mexico.

Anne Souter is now back in Nicaragua working full time with soya in the area of Matagalpa. She has yet to produce a successful crop of soybeans in Nicaragua.

A development group working with soyfoods in Nicaragua is Alianza Para Comunidades en Acción. Based in the USA (contact Richard Schopfer, director, P.O. Box 30154, Bethesda, Maryland 20814. Phone: 301-229-1742), they have an office in Managua run by Richard's son, Don Schopfer (Aptdo. Postal C-144, Managua. Phone: 72022), and a soy project in Rivas, located 2 hours drive south of Managua near the border with Costa Rica. There Sal Piazza is in charge of a soybean utilization project. He works with several women's groups that have community kitchens. Most of Alianza's major projects are in the fields of health, food production, water, and housing.

Shurtleff & Aoyagi first met John and Charlotte Gabriel on 4 Jan. 1977 in Houma, Louisiana. They had constructed a tempeh trailer and were making tempeh for their own use. At that time they planned to start commercial tempeh production, but they never actually did. Rather they took the tempeh trailer back to The Farm in Summertown, Tennessee, and it was used there to make tempeh for members of The Farm.

Update: Talk with John Gabriel. 1993. Oct. 6. John and Charlotte are in the process of moving permanently to Nicaragua where they hope to arrive in about Feb. 1994 to work with the people to make soymilk, tofu, and tempeh. They plan to learn Spanish first in Guatemala. Chuck Haren says that quite a lot of soybeans are grown in the department of León, Nicaragua, but the yields are not very high; the rainy season requires that short-season varieties be cultivated. Leaf protein concentrate (made from cowpea leaves) is now being added successfully to lemonade in

© Copyright Soyinfo Center 2013

Nicaragua. Chuck Haren has married a Nicaraguan lady named Casta Calderon, who managed Luci Morren's office.

Note: Plenty International (Jan. 1994) notes that Soynica (a non-governmental organization or NGO) is now located at: Apartado #RP-05, Managua, Nicaragua. Address: 11668 Blackberry Place, Nevada City, California 95959. Phone: 916-265-5100.

10098. Boysen, Hans-Juergen. 1992. Soja [Soya]. *Schrot & Korn* (*Germany*)**.** April. p. 16-20. [Ger]
• ***Summary:*** An introduction to soybeans and soyfoods, including whole dry soybeans, soy oil, soymilk, soya meat (Sojafleisch, TVP), Whole soy flour, tempeh, and soy sprouts.

Note: This magazine is sold in German natural food stores (Naturkost-Laden).

10099. **Product Name:** Toffle (Eggless Tofu Waffle).
Manufacturer's Name: Dae Han, Inc.
Manufacturer's Address: 737 S.E. Alder St., Portland, OR 97214. Phone: 503-233-8638.
Date of Introduction: 1992. April.
New Product–Documentation: Talk with Judy Krizmanic of *Vegetarian Times.* 1992. May 27. She saw this product at the Natural Foods Expo in Anaheim, April 1992. Spot in Vegetarian Times. 1992. Aug. p. 82. Tofu, a main ingredient, holds the waffle together, so eggs are unnecessary.

10100. Greenslade, David. 1992. Toffw–Beth yw e? [Tofu–What is it?]. *Mela* (*Gather Honey*)**.** April. p. 6. [Wel]
• ***Summary:*** Mela is a women's magazine, written in Welsh. This is the earliest Welsh-language document seen concerning tofu, soybeans, or soyfoods. "You can bake it, fry it, steam it, freeze it, grate it, slice it, or eat it as it comes straight from the packet. What is it? Tofu. What in the world is Tofu?

"What flour is to bread soy beans are to tofu–sort of. Tofu starts out as beans just like bread starts as a ear of wheat. But, by the time it reaches your table it has been transformed into something tasty, healthy and full of protein and vitamins. Tofu is one of the healthiest foods in the world. It doesn't have any cholesterol and hardly any calories. There's more protein in Tofu, by the ounce, than in a steak. And now, Tofu has arrived at most health shops and supermarkets in Wales.

"One of the busiest companies making and distributing Tofu is Cauldron Foods in Bristol. You can buy Tofu from Cauldron Foods in ten ounce packs. It's ready to eat as it is but Tofu readily combines with other ingredients in a wide variety of recipes for the creative cook.

"Tofu has been used in the East for many years. During the 1970's there was a tofu revolution in the United States. There, Tofu is available in every big supermarket. Some see a future for Tofu similar to that of yogurt which soared in popularity during the 1960's. But unlike yogurt, Tofu is rich in fibre [sic] and it is much more versatile.

"But the important thing is, how to go about using Tofu to prepare delicious meals for everyone at home. Here are some of my favourite recipes that should satisfy every member of the family: Tofu loaf, sweet and sour tofu, baby food, sandwich." Address: 2 Ty Isaf, Cefn Cribwr, Pen-y-bont ar Ogwr, Morgannwg Ganol CF32 OAU, Cymru/Wales, UK.

10101. **Product Name:** Tofu [Firm, or Regular], Tofu Pudding, Soymilk [Plain, or Sweetened], and Fried Tofu.
Manufacturer's Name: Happy Tofu.
Manufacturer's Address: 5231 S.E. Powell Blvd., Portland, OR 97206. Phone: 503-771-2802.
Date of Introduction: 1992. April.
How Stored: Refrigerated.
New Product–Documentation: Talk with (call from) Ann Uong of Happy Tofu in Portland, Oregon. 1994. Feb. She hopes to start making tofu in April 1992. John Rumler. 1994. This Week (Portland, Oregon). Aug. 17, "Tofu Fo' You." Ann Uong started this tofu company and now has four employees. In 1980 she escaped from Vietnam in a crowded riverboat and was almost killed twice by pirates. Then she and her 6-year-old sister had to spend 18 months in a refugee camp in Thailand; there she met Hoang, an engineer from Saigon, and now her husband. Uong came to the USA in 1982, and Hoang followed a year later. In 1985 they were married. In 1991 they considered buying a chicken farm. But the unnatural factory-farming methods, with chicken kept in cages so cramped they were unable to walk, being force-fed chemicals to make them grow faster, made the couple so sad they decided to give up the idea–and to become vegetarians. Instead they decided to open a business in southeast Portland (at Southeast 53rd Ave. and Powell Blvd.) making and selling tofu and other soybean staples. At first their products were sold only to Asians, but gradually they found customers of all kinds. Now the company is distributing soybean products across Portland, and as far north as Seattle, and selling to such major accounts as Safeway and Food-4-Less.

Talk with Tom Nguyen. 1994. Nov. 17. Tom is Ann Uong's partner and brother-in-law, married to her sister. He is also Vietnamese. In April 1992 Happy Tofu started making firm and regular tofu, tofu pudding, and soymilk in plain and sweetened flavors. In Oct. 1992 they introduced Fried Tofu (in cubes).

10102. Haren, Chuck. 1992. Further adventures in Belize. *Plenty Bulletin* (*Davis, California*) 8(1):1-4. Spring.
• ***Summary:*** Describes the ongoing work of Plenty, Inc. to introduce soybeans to Belize. A photo shows the Southern Corozal Soy Producers Association, with about 13 members present. The author made tofu and soymilk for 50-60 men and women in the village of San Antonio (Toledo). Locally

© Copyright Soyinfo Center 2013

grow limes were used to coagulate the tofu. Address: Program Director.

10103. *Health Foods Business.* 1992. Nasoya tofu recall sparks questions. April. p. 16.
• ***Summary:*** "A recent Food and Drug Administration recall of water-packed tofu has sparked questions about the safety of refrigerated tofu products because of its packaging. The FDA ordered the recall of 402 cases of Nasoya Tofu on Feb. 7 from seven retail locations in New Jersey, New York, Pennsylvania, Massachusetts, Maryland and Washington [DC]. The water-packed tofu was found to have traces of *Lysteria monocytogenes* bacteria, which has been linked to food-poisoning [listeriosis].

"FDA regulations require moist soy products like tofu to be refrigerated at 45 degree or less. Tofu is merchandised in many grocery stores in the produce department, where a temperature of 45 degrees or less is hard to maintain."

10104. Hurley, Jayne; Schmidt, Stephen. 1992. Low-fat cheese: Whey to go. *Nutrition Action Healthletter.* April. p. 10-11.
• ***Summary:*** Soy cheeses are made by NûTofû, Soya Kaas, Soyco, and White Wave. Though the contain much less saturated fat and no cholesterol, they do not necessarily contain much less total fat. "Most use small amounts of casein, a milk protein, to help them melt." The soy cheese that is lowest in both calories (45) and fat (O gm) per ounce is White Wave Fat-Free Soya Melt, followed by Soya Kaas Cheddar Style (79 calories, 5 gm of fat), and Soyco American Singles (80 calories, 5 gm of fat).

Concerning the soy cheeses: "'Nauseating' was one of the kindest things our tasters had to say. Singled out for particular abuse was Soya Kaas, although samples of each of the soy cheeses ended up in the garbage."

10105. Osho, S.M.; Oyelola, B. 1992. Consumer acceptability and quality of soy-cheese (tofu) and local cheese (Warankashi) in Nigeria. In: 2nd Year Technical Report of a sponsored IDRC/IITA Soybean Utilization Project in Nigeria Phase II. See p. 126-39. April 1991-30 April 1992, Nigeria. [16 ref]
Address: 1-2. International Inst. of Tropical Agriculture (IITA), PMB 5320, Ibadan, Nigeria.

10106. *Schrot & Korn* (*Germany*). 1992. Soja in seiner ganzen Vielfalt [Soya in its great variety]. April. p. 32-33. [Ger]
• ***Summary:*** Contains 8 recipes for using soy granules (Soja-Granulat), tofu, soy sprouts, and whole soybeans.

10107. Seamens, Dan. 1992. Nasoya Nayonaise. *Natural Health.* March/April. p. 34-35.
• ***Summary:*** Nasoya Foods of Leominster, Massachusetts, has created a guilt-free natural alternative to mayonnaise. In typical mayonnaise a whopping 98% of the calories come from fat. But Nayonaise, made with silken tofu and no eggs, has just one just one-third as many calories and half the fat. A 14-ounce jar typically retails at natural food stores for $2.75.

10108. **Product Name:** Tofu Kebabs.
Manufacturer's Name: Shin-Sun Foods.
Manufacturer's Address: 2551 W. Winton Ave. #6-0, Hayward, CA 94545. Phone: 510-887-6140.
Date of Introduction: 1992. April.
Ingredients: Organic brown rice, wild rice, firm tofu, zucchini, broccoli, onion, carrot, sesame oil, soy sauce, pear juice, pineapple juice, rice vinegar, garlic, sesame seeds, black pepper.
Wt/Vol., Packaging, Price: 12 oz.
How Stored: Frozen.
New Product–Documentation: Spot in *Natural Foods Merchandiser.* 1992. April. This product is part of their Asian frozen entree line.

Leaflet (8.5 by 11 inches, 3 color). "New! Shin-Sun Foods. Tofu Kebabs." "Shin-Sun Foods is a cooperatively owned business that manufactures vegetarian Asian foods. The company was formed by AIWA, Asian Immigrant Women Advocates, and organization dedicated to the empowerment of low income Asian immigrant women, Shin-Sun Foods is a company with a vision of creating authentic and natural Asian delicacies while providing economic self-sufficiency for its worker-owners." Talk with Susannah Yang of Shin Sun. This product was launched in April 1992.

10109. **Product Name:** Tofu Sour Cream, and Tofu Based Dressings [2 Flavors].
Manufacturer's Name: Tofu Palace Products.
Manufacturer's Address: 2075 Madison St., Eugene, OR 97405. Phone: 503-345-4407.
Date of Introduction: 1992. April.
How Stored: Refrigerated.
New Product–Documentation: Talk with Toby Alves. 1992. April 14. The main product her company makes is Toby's Tofu Paté. She has on the market 4 tofu pates, which are like a flavored tofu salad. She also makes a Tofu Sour Cream, and 2 tofu-based salad dressings. They also make a seasoning mix for tofu. She is presently renting 2 warehouse spots in Eugene and buying all her tofu from Surata, on average about 2,000 to 2,500 lb/week at $0.73/lb. She is thinking of starting a tofu plant for making her own tofu to save money and get a longer shelf life.

Note: This is the earliest commercial soy product seen named "Tofu Sour Cream."

10110. **Product Name:** Land of the Free (Non-Dairy Frozen Dessert) [Three Berry, and Vanilla Apple Orchard]. Renamed

© Copyright Soyinfo Center 2013

Tofutti "Frutti" by March 1993.
Manufacturer's Name: Tofutti Brands Inc. (Marketer).
Manufacturer's Address: 50 Jackson Dr., Cranford, NJ 07016. Phone: 908-272-2400.
Date of Introduction: 1992. April.
Ingredients: Vanilla Apple Orchard: Water fruit juices (pear juice, peach juice), apple chunks, raisins, tofu, soy protein, apple juice concentrate, brown rice syrup, lecithin, brown rice fiber, oat bran, cinnamon, natural flavors, pectin, carob bean gum, beta carotene, active carrot acidophilus, non-dairy cultures, salt.
Wt/Vol., Packaging, Price: 16 fl oz (453 gm) plastic tub.
How Stored: Frozen.
Nutrition: Per 4 oz.: Calories 90, protein 2 gm, carbohydrates 20 gm, fat 0 gm, cholesterol 0 mg, sodium 90 mg, lactose 0 mg.
New Product–Documentation: Spot in *Natural Foods Merchandiser.* 1992. April. p. 96. The ice cream package label reads "Land of the Free," but the spot reads "Tofutti is an all-natural frozen dessert with no added sugar, that is also fat-free, cholesterol-free and dairy free."

Tofutti Brands Annual Report. 1992. April. Land of the Free is "a nondairy, cholesterol free fat-free frozen dessert sweetened only with fruit juice. It is available in two flavors, Vanilla Apple Orchard and Three Berry, and is being distributed to health food stores."

Ad (1/3 page color) in *Vegetarian Times.* 1992. May. p. 22. "Come home to Land of the Free." "With no sugar added. Sweetened with fruit juice. Fat free. Lactose free. Dairy free. Cholesterol free. Available at your health food store."

Leaflet (8.5 by 11 inches, color). 1992. April 10-13. Sent by Patricia Smith from Natural Products Expo West at Anaheim. "How sweet it is." The ingredients in and nutritional composition of both flavors are given. Note that tofu and soy protein are the third and fourth ingredients.

Talk with Rick Malloy, Executive Vice President of Tofutti Brands. 1993. March 30. Based on feedback from consumers and distributors the company has renamed this product–but the name does not yet appear on labels. This is a different product than the stick novelty (non-dairy frozen dessert bars on a stick) named Tofutti Frutti first launched in Nov. 1987. A new flavor (Apricot-Mango) will be introduced soon.

Ad in Natural Foods Merchandiser. 1993. April. p. 33. "Living dairy free with new Tofutti 'Frutti' (formerly Land of the Free). New name. New package. New flavors! Same great taste!"

10111. **Product Name:** White Wave Dairyless (Nonfermented Soy Yogurt) [Plain Quart].
Manufacturer's Name: White Wave, Inc.
Manufacturer's Address: 6123 E. Arapahoe Rd., Boulder, CO 80303. Phone: 303-443-3470.
Date of Introduction: 1992. April.
Ingredients: Water, cultured organic soybeans, organic brown rice syrup, unmodified tapioca starch, citric acid.
Wt/Vol., Packaging, Price: 1 quart.
How Stored: Refrigerated.
New Product–Documentation: Talk with Lon Stromnes. 1992. April 3. This product will be introduced at the Anaheim Show in April.

10112. Wilson, Lester A.; Murphy, Patricia A.; Gallagher, Paul. 1992. Soyfood product markets in Japan: U.S. Export opportunities. Ames, Iowa: MATRIC (Midwest Agribusiness Trade Research and Information Center). x + 64 p. April.
• ***Summary:*** Contents: Figures. Tables. Acknowledgments. Introduction. I. Soybean processing (by Wilson and Murphy). Food from soybeans: Soybean chemical composition, environmental influences on soybean composition. Soyfood manufacture: Soymilk, tofu, momen tofu, kinugoshi tofu, packed tofu, aseptically-packaged tofu, deep-fried tofu, kori tofu. Tofu-related research: Recent studies at Iowa State University, summary, future research. Other nonfermented soyfoods: Yuba, kinako, texturized soy protein foods. Fermented soyfoods: Miso, shoyu, natto, tempeh. Japanese Agricultural Standards (JAS). Identity preservation and transportation. U.S. soybean quality and the Japanese market: Grain quality, judging quality, potential new markets.

II. Japanese soyfood markets (by Gallagher). Demand and growth prospects: Consumption patterns, demand analysis, forecasts. The U.S. share of the food soybean market: Sources and uses, market share analysis, determinants of relative prices, prospects. Trade and trade barriers: Soybeans, processed products. Summary and recommendations.

Appendixes: A. Excerpts from specifications and standards of food additives, etc.–Manufacturing and storage of tofu. B. Excerpts from standards and certification systems in Japan. C. Additional agricultural standards for soybeans. References.

Table 2.1 shows soybean use for soyfood production in Japan; actual (1986) and projected (2000). Soybeans for tofu are expected to increase from 524,000 to 609,700 tonnes. Soybeans for miso are expected to decrease from 156,000 to 101,600 tonnes. Soybeans for natto are expected to increase from 92,000 to 118,600 tonnes. Figures 2.1 to 2.4 show Japanese per capita consumption of tofu, natto, miso, and soy sauce from 1965 to 1988. Tofu: Japanese annual per capita consumption of tofu has risen since 1965, except that it fell during 1973-1977. In 1965 about 3.6 kg/capita of soybeans were used to make tofu, increasing to 4.4 kg/capita in 1988. If 1 kg of soybeans yields 2.8 kg of tofu, then per capita tofu consumption in 1988 was 12.32 kg or 27.1 lb.

Natto: Japanese annual per capita consumption of natto has risen steadily, from a little less than 0.4 kg in 1965 to 0.6 kg in about 1968, to 0.8 kg in 1988.

© Copyright Soyinfo Center 2013

Miso: Japanese annual per capita consumption of miso fell from 8 kg in 1965 to about 5.4 kg in 1985, then it began to rise to about 5.7 kg in 1986.

Soy sauce: Japanese annual per capita consumption was about 12 liters in 1965. It fell to 11 liters in 1967, rose to 13 liters in 1973, then fell to 9.8 liters in 1985, after which it rose for 1 year. Address: 1-2. Prof. of Food Science and Human Nutrition; 3. Assoc. Prof. of Economics. All: Iowa State Univ. Phone: 515-294-0160.

10113. Rufus, Anneli S. 1992. Ode to soy. *East Bay Express* (*Berkeley, California*)**.** May 1. p. 8-10.
• ***Summary:*** About William Shurtleff, the Soyfoods Center, and tofu. A very insightful, impressionistic / poetic, and sympathetic look at the many sides and virtues of tofu, and about Shurtleff's work to introduce soyfoods to the Western world.

10114. Demos, Steve. 1992. New developments with the Soyfoods Association of America (Interview). *SoyaScan Notes.* May 6. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Big changes are taking place in the Soyfoods Association of America (SAA). Steve, who is now president, plans to launch a new membership drive. There will be two categories of membership: Full members and associate members. Two months ago, SAA started again to subscribe to the clipping service, and it now comes free of charge as one of the benefits of membership. The clips will be mailed every 60 days with a newsletter coming in between. SAA is in the process of installing a new executive director. Steve hopes that Virginia Messina will accept their offer for the position, on a part-time basis along with her current work for PCRM (Physicians Committee for Responsible Medicine). The SAA office would be at her present location near Washington, DC. Her husband, Dr. Mark Messina, will probably be leaving the National Cancer Institute (NCI) soon, and SAA has asked him to work together as a spokesperson concerning cancer-preventing substances in soyfoods. Steve is optimistic that arrangements with the Messinas will work out. It will be excellent to have credentialed and creditable people speaking for the soyfoods industry.

Steve is now developing "products" to attract members. He wants SAA to produce informational pieces on soyfoods to mail to the medical and nutritional communities, to develop school wall posters and weekly meal planners for homemakers, and to work with state soybean programs which have benefited from the SPARC [national soybean checkoff] program. SAA would sell the information pieces to members to generate income. Leslie Harlow will soon no longer be with the organization, and Peter Golbitz will have a more limited role, although he may still be on the board of directors; he is very busy doing the Soya Bluebook.

Mark Messina is leaving NCI largely (Steve thinks) because "he is not being allocated the time and resources to devote to soy the way he wants to. He is very committed to soy, but his supervisors are limiting him to spending 10% of his time on soy-related research, whereas he would like to spend 50%. Also, being at NCI puts constrains on what he can say and do. Leaving NCI will probably cut back on his scientific research. He plans to go into consulting related to diet, cancer, and soya.

Steve feels that rushed 1-hour SAA board meetings at natural food trade shows are not very effective. The board needs more time and a better atmosphere in which to meet. He has called a strategic planning meeting in Boulder about the third week in July. 20% of the people put in 80% of the energy.

Steve is very interested in reviving and finalizing the tofu standards, then getting them accepted/ratified by the board and the industry; new soymilk standards are now being developed. The natural foods industry has established a Natural Foods Quality Council to respond to new FDA regulations. Address: President, White Wave Inc., 1990 North 57th Court, Boulder, Colorado 80301. Phone: 303-443-3470.

10115. Root, Evan. 1992. Cable Springs Bakery in Boston and Tan Pops in Alaska (Interview). *SoyaScan Notes.* May 9. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Barry Creighton started Cable Springs Bakery in Boston. Initially it was run out of his home, but in about late 1974 it became "official." Their main product was a line of about ten varieties of "pies," which were square filled pastries baked in trays with a layer of dough on top and bottom, then cut into squares (they had no dough on the sides). They had Rice-Sea Vegetable Pie (with hijiki), Bean Burrito, then the sweeter ones with fillings of apricots, apples, etc. Kathy Bellicchi worked with them, and later purchased part of the business making cookies. Bruce Berman (who now lives in Chicago, Illinois) finally bought the whole business.

While in Boston, the Creightons must have gotten to know and grown to love Tan Pops. About 5 years ago they moved to Alaska, where they are part of a macrobiotic community of 4 families and 25-30 children living in Kasilof, on the Kenai Peninsula. The community, named Foundations Inc., grows a lot of its own food, and they generally eat quite simply. But on the night of each full moon, they have a feast. To this day, for these full moon dinners, they make about 100 Tan Pops (skewered, deep-fried seitan), which everyone loves–especially the children. They do not sell the Tan Pops commercially. Evan has visited them from time to time. They might know about the origin of Tan Pups in Boston. They have a great love for the food revolution and for kindred spirits who share that interest. Their address is presently HC2, Box 564-B, Kasilof, Alaska 99610. Phone: 907-262-2824. Evan does not know anything

© Copyright Soyinfo Center 2013

about Tan Pups.

Note: As of March 2003 there is a macrobiotic of 5 families named Ionia (website Ionia.org) living on the Kenai Peninsula in Alaska–150 miles south of Anchorage. They make their own tofu and homeschool their children. They try to teach their children traditional values–which do not include reading, writing, or arithmetic. All of the parents studied with Michio Kushi during the 1970s. Address: 8 Ayleston St., Jamaica Plain, Massachusetts 02130. Phone: 617-566-4783.

10116. Chait, Mat. 1992. Early recollections and work with the Ricycle and soyfoods in Boston, 1970-1972 (Interview). *SoyaScan Notes.* May 18. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** In the late 1960s Mat had started graduate school in counseling psychology at Hunter College in Manhattan, New York. But under the influence of yoga, Swami Satchitananda, Hinduism, vegetarianism, and macrobiotics, he decided to drop out and to study macrobiotics in Boston with Michio Kushi. He arrived in Boston in about December 1969. Nine months later, Mat started operating the Ricycle at Boston University in September 1970 at Boston University. He recalls: "The design of the Ricycle was absurd. It consisted of a steam table (which without its food weighed 600-700 pounds) welded onto the back of a girls bicycle. To move the Ricycle, he pedaled it (rain or shine; or pushed it up even gradual hills), but it was so heavy and clumsy as to be almost immobile." At night it was kept in the garage of the macrobiotic study house at 6 Ellery Street.

During the first 6 months, Barbara Grace prepared most of the desserts and whole grain breads at the kitchen of a big study house across from the Brookline High School. Marion (who had an Italian last name) prepared the vegetable and grain dishes in another study house. (Note: Marion married Frank Calpeno, who owned Ceres Natural Foods, a fairly big macrobiotic food distribution business in Colorado Springs, Colorado; they moved to Colorado in the early 1970s). Dora Coates (whose parents started Laurelbrook Foods) also cooked for Mat for a while. The business took off quickly, with the help of many magazine and newspaper articles. Mat got a loan, so in early 1971, in the dead of winter when it was too cold to be out on the street, Mat built a kitchen inside the Erewhon warehouse, and it began operation at the end of March 1971. Since Paul Hawken was in California at the time, Mat got permission from the acting president of Erewhon.

Every day the Ricycles would offer a grain dish, whole grain bread, a vegetable dish, a dessert, and often a soup–but there was a different menu every day. A number of popular dishes contained soy as an ingredient. A miso-tahini spread was usually available with the bread. Miso soup and Miso Rice were often served. For Miso Rice, miso was mixed with a little water then stirred into a pressure cooker of hot rice that had just been cooked, and allowed to stand for a few minutes. Mat vividly recalls that on days when he had to stand in front of Boston University in the freezing cold for 6 hours without moving, the miso soup would keep him warm. After Mat opened the kitchen at Erewhon, he contracted with David Kailin of Crane's Call Bakery, a macrobiotic bakery, to make most of the desserts and other baked goods for the Ricycle. Sometimes the vegetable dish of the day had tofu in it, or the grain dish had miso in it.

While building the kitchen inside Erewhon, Mat constructed two more Ricycle carts. Mat launched these in the spring of 1971; one served its macrobiotic lunches on weekdays at MIT in Cambridge, and the other in downtown Boston at government center. He was unable to get permit to operate at Harvard Square. The other 2 Ricycles were operated by people that Mat employed; they were paid a percentage of their sales.

One year at the Christmas reunion, Mat did an elaborate impersonation of Michio Kushi (complete with makeup and a built-up nose construction), wrote, sang, and led the audience in a song about miso to the tune of "Get me to the church on time." The words went: "I'm drinking miso in the morning. Hatcho or mugi is sublime. Aveline or my daughter, go heat up the water, and get my miso soup on time. If you use onion, sautee it first, if you use daikon, it satisfies your thirst. For I'm drinking miso in the morning..."

Mat left Boston in about December 1972 to take an acting job in New York. At the time he sold and shipped all 3 Ricycles to an eccentric millionaire's son in Texas. He does not have any recollection of Tan Pups being on the market but he does remember seitan imported by Erewhon from Japan, perhaps by Japan Foods, in the form of little dark salty chunks. Perhaps Robert Hargrove might know more about this. Perhaps Erewhon made the Tan Pups.

Concerning Paul Hawken's departure from Erewhon in late 1973, it has always been Mat's understanding that Aveline Kushi owned the company but that the Kushi's negotiated to pay him $30,000 when he left.

Mat once visited Erewhon's little farm in Keene, New Hampshire. They made sauerkraut there on the top floor of a building; one would jump up and down on the cabbage in a barrel to press it. Address: 8-23rd Ave., Apt. 302, Venice, California 90291. Phone: 213-465-0383 or 213-469-5408.

10117. Kendall, Charles. 1992. Near involvement with tofu in Boston (Interview). *SoyaScan Notes.* May 20. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** In 1975, before *The Book of Tofu* was published, Aveline Kushi encouraged Charles to start a tofu shop in the Boston area. His feeling was "It was too strange. No one's going to buy it–floating in water. No one knew what to do with it." In 1976, after *The Book of Tofu* had been published (Dec. 1975) and after he was married (spring of 1976),

© Copyright Soyinfo Center 2013

Aveline made the suggestion to him again.

At one point Charles was planning to go to Japan to study with a tofu maker for 12-18 months. The East West Foundation or Michio or both had set up the program. Charlie had his visa, work permit–everything but the airline ticket. But when it was found that the tofu maker was very religious and was trying to push his religion on others, Aveline and Michio said that perhaps he should not go. Bill Tims finally ended up going. Charles recalls: "I was very envious of Bill. I wanted to go but at the last minute the Kushis said 'Don't go. Don't go Charley. We found out that this guy is part of some fanatic religious sect.'"

When Tims returned, he told Charles that he had absolutely no desire to make tofu in America. Charles was very surprised to hear this. Tims offered to show Charles how to do make tofu and how to get started. The people who started Nasoya may have learned something from Tims. Address: Owner, Kendall Food Co., 46A Route 112, Worthington, Massachusetts 01098. Phone: 413-238-5928.

10118. Okada, Yuko. 1992. Re: Muso's soymilk factory in the USA. Importing organic soybeans to Japan. Letter (fax) to William Shurtleff at Soyfoods Center, May 21. 1 p. [Eng]
• ***Summary:*** "Did you know that I have a soymilk factory in the U.S.? It has been operating for almost 7 years. It was the first soymilk company in the United States and is growing every year. The company is located in Michigan, where most of the organic soybeans are grown." Note: The author is probably referring to Muso's 15% ownership in American Soy Products, Inc., whose plant at Saline, Michigan, began commercial operation in Nov. 1986.

Muso is also importing organic soybeans into Japan, and has already imported about 300 metric tons this year. The use of organic soybeans in Japan is growing on the part of companies making shoyu, miso, tamari, tofu, etc. for Muso. Address: Muso Co., Ltd., Kosei Bldg. 2nd Floor, Tanimachi 2-5-5, Chuo-ku, Osaka 540, Japan. Phone: 06-942-0341.

10119. Tims, William. 1992. Studying macrobiotics in Boston and tofu making in Otake, Japan (Interview). *SoyaScan Notes.* May 21. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Bill grew up in Oklahoma. In 1969 while attending the University of Oklahoma he developed an interest in Oriental culture, philosophy and religion. He started studying Buddhism and Taoism. One day he came across a little spiral-bound book titled *Zen Macrobiotics* by George Ohsawa. Within several months he quit school and hitch-hiked to Boston, arriving in Jan. 1970.

He lived in a study house with Tom and Mary Hatch, then lived with Michio and Aveline Kushi on Boylston Street, before they moved to 62 Buckminster Rd. First he worked as a carpenter, then starting in early 1972 he worked at the Erewhon warehouse. Paul Hawken was president of Erewhon, but he left Boston, then came back and left again.

In about the spring of 1975, at one of Michio Kushi's "Way of Life" talks, which he gave every Tuesday and Thursday night, Michio said that he had made arrangements for 3 Americans to go to Japan to study traditional food processing. Bill never saw a written announcement of this. Bill signed up for the program along with about 20 other people. Bill had to return to Oklahoma in the summer of 1975, but he returned to Boston in Dec. 1975. He expected that he, Charles Kendall, and one other person would be leaving for Japan in Jan. 1976. He was surprised to find that he was the only one going. Everyone else, for reasons unknown to him, had backed out. He was a bit curious and suspicious as to why no one else wanted to go.

In Jan. 1976 Bill flew to Japan. He spoke no Japanese and had almost no money. It was his understanding that if he paid his flight to Japan, in exchange for the work he would do in Japan, he would be provided with a room and board, a small salary, and a flight back to America. Michio and Aveline had never suggested to Bill that he start a tofu shop in America after he returned, and Bill never had a interest in making tofu. He was going to Japan mainly to learn about the country and its culture; the tofu was accidental. In Osaka, Bill met Lima Ohsawa. An older man who was a friend of Lima's became Bill's guide. After several days in Osaka they took a train together to the little village of Otake, about 15 miles south of Hiroshima. They were greeted with great fanfare and met by a man who was the tofu master–who spoke no English. Bill never understood the relationship between the tofu master and Michio Kushi. The tofu master set Bill up in small apartment with a bike, 5 minutes bike ride from the tofu shop. Bill's guide spent 2 days with Bill at the village translating (since no one else in the village spoke English), then he left. Many villagers asked Bill if he was a soldier from a nearby U.S. military base.

Bill worked hard at the tofu shop with 7-8 other employees (mostly older women), not including delivery boys, for the next 7-8 months, until August. The master was very much a traditionalist; he was the only person Bill met in Japan who ate brown rice, but he never mentioned macrobiotics. The master was a hard worker, very stern and yang, but a good, strong, often loving man who treated Bill specially and kindly. Bill has very good memories of him. He made nigari tofu and 13-14 different product (incl. egg tofu, burdock tofu, various deep-fried types), and his dream was to have his style of tofu shop all over the world.

For Bill, the best times were when the master allowed him, twice a week, to take the company truck alone, all day, to deliver okara to dairy farmers in the countryside. Bill was able to do a bit of exploring of temples, shrines, and gardens on these trips. Sometimes the master would be gone for 1-2 days and Bill was responsible for the tofu shop from start to finish. Most of the tofu was delivered to huge supermarkets in Hiroshima. The villagers were amazingly kind to Bill.

© Copyright Soyinfo Center 2013

But there were difficulties. The master belonged to several different Buddhist sects; Bill was required to go with the master to every religious meeting he attended. Bill hated this because he couldn't speak any Japanese, he had to sit on his knees in seiza for hours at a time, and he was tired from 6 days of hard work at the tofu shop. He desperately wanted some time off from the long hours, both to rest and see more of Japan. At times Bill felt like he was being "used" to work long hours for meager pay, and at other times he realized that this was what a traditional Japanese apprenticeship required. Moreover he was delighted to have this opportunity, difficult though it was.

Returning to America, Bill attended Herman and Cornellia Aihara's annual summer camp in California, then he returned to Boston on about 1 Sept. 1976. Ed Esko and Stephen Uprichard immediately offered him a job at the East West Foundation. He worked there until 1982, eventually becoming vice-president.

Bill was the second American (after William Shurtleff) to study tofu-making in Japan with a traditional Japanese master. Tims and William Shurtleff met in November 1976 at Ken and Ann Burns' house at 16 Warren Street in Boston–shortly after Tims had returned from Japan. Tims was happy to see that Shurtleff and Akiko Aoyagi were doing a nationwide tour to introduce Americans to tofu. Before Bill Tims went to Japan in Jan. 1976 it was difficult to get tofu in Boston; it was considered a luxury. But after he came back, a number of tofu products were being sold commercially–including a tofu cheesecake made by a Boston woman. He also remembers big slabs of seitan (Wheatmeat) sold at Erewhon.

In 1982 Bill moved to Arkansas to start Mountain Ark, along with Frank Head, Joel Wollner, and Tom Monte. Frank was the only one who ever had any financial involvement in Mountain Ark, and he is the only one of the original four left at the company, which is currently for sale and will be liquidated if it is not sold by June 30. Bill never worked at Mountain Ark.

Four or five 5 years ago a news flash came on CNN that there had been a terrible earthquake in Otake, Japan, the little village where he had lived. He watched the destruction on TV with sadness. Several years ago he heard that the old tofu master had died.

Bill now runs his own business, Natural Health Center, which he and his wife Carol started in 1983. He does macrobiotic consultations and sells macrobiotic foods by mail order. Address: Natural Health Center, 45 North Hartman, Fayetteville, Arkansas 72701. Phone: 501-521-9105 (or 9195).

10120. Sandler, Matthew; Sandler, Helen. 1992. Early work with natural foods in Boston. Plans to launch a soymilk product named Luppy (Interview). *SoyaScan Notes.* May 24. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Matthew's brother, Richard Sandler, arrived in the Boston area on 1 Jan. 1968. Matt drove him to 29 University Ave. knowing nothing about macrobiotics except that he ate with Richard once at the Paradox restaurant in New York City. Those were the early days. Nahum Stiskin and Richard Sandler, were already in Boston when Matt arrived in about late 1968. Matt moved to Japan in about 1969; Nahum Stiskin was living in Kyoto, Japan (where he arrived in May 1969), when Matt arrived. Steve Helfer (a student of macrobiotics) had arrived in Japan before Matt. After a while, Matt brought Helen to Japan so they could get married–which they did in about 1971, at the Jewish Community Center. Matt had known Helen when they were in Boston; they lived together a macrobiotic study house.

Helen and a lot of other Americans studying macrobiotics in Japan took cooking classes, taught in Japanese, from Lima Ohsawa in Tokyo at Tokyo C.I. (Centre Ignoramus). Matt and Helen left Japan in about 1971-72, returning first to New York, and then to Boston in about 1973. He finally left Boston in 1984.

While in Boston, Matt started a bakery named Matthew's All Natural, located in Woburn, just outside of Boston. It's first products were sweets such as carrot cakes. The discovery of barley malt, a complex carbohydrate sweetener, was a major breakthrough for the company. Helen Sandler developed a line of English Muffins sweetened with barley malt, and then a line of whole-grain breads which were introduced in 1979. The company soon became quite large and successful, and it is still in operation. The bakery did not use soy in any form in its products.

Evan Root started the original Sanae. Matt's brother, Richard Sandler, who arrived in Boston before Matt, started The Seventh Inn (also called Big Sanae). He rented the space and made it into a restaurant with his own hands; his partner was Warren Durbin (originally a film editor from California who came to Boston to study macrobiotics and who now lives in Vermont). Richard is now a photographer living in Greenwich Village (Phone: 212-777-7138).

Barry Creighton invested a lot of money in his Cable Springs Bakery; it was a good idea, but ahead of its time, so it wasn't that successful. When it went bankrupt, Kathy Bellicchi took it over. Helen Sandler (who had her own company) then shared the bakery with Kathy, and baked cakes there starting in about 1975. Helen does not remember any commercial soy products in Boston, except the Tofu Cheesecake sold at Sanae (it was a Sanae special) and 1 or 2 other restaurants in the late 1970s. Matt liked the Tofu Cheesecake; Helen didn't. Matt recalls that the Tofu Cheesecake was sold, pre-sliced, at a number of retail stores, including Erewhon. He thinks it was sold in the first tier of products that Erewhon sold out of the cooler. He thinks it was made by an underground business that made only this product. Helen experimented with "Tofu Cream," made by mixing tofu, vanilla, and maple syrup–but it was never

© Copyright Soyinfo Center 2013

commercialized since it had such a short shelf life and the retail stores had no refrigeration.

Another excellent product in Boston was Tan Pups, made by Nik Amartseff and his wife. It was a natural meatless hot dog made of seitan, deep-fried on a stick. Nik was one of the most creative food product developers in Boston at the time. He also developed the formulations for most or all of the Erewhon cereals, granolas, and snacks, as well as their labels and packaging. "He was a real fertile mind."

Matt is planning to launch a soy dessert named Luppy (in 2 flavors), within the next 6 months. The product will be aseptically packaged in tubs. His company is named Luppy Foods. He remembers Luppy soymilk from Japan as a soymilk sweetened with brown sugar and sold in little bottles.

When Yuko Okada first brought soymilk to the USA, he started by trying to make a deal with Knudsen. That didn't work out and for some reason he had a problem with Eden Foods in Michigan at the beginning. So Yuko called Matt, who at that time was still owner of Matthew's All Natural bakery, and asked Matt if he wanted to distribute the soymilk product over his route which extended from Maine to Philadelphia. Matt also distributed foods frozen and refrigerated as far west as Denver. The product Yuko was offering was quite similar to the Luppy soymilk Matt had enjoyed in Japan. Before Matt could say yes, Yuko had made a deal with Eden Foods to import.

Update on Matt's soymilk dessert. 1992. July 15. It will be a pudding-type product, the soymilk will be supplied by American Soy Products in Michigan, and it should be on the market by about Nov. 1992. Address: P.O. Box 10277, Aspen, Colorado 81612. Phone: 802-869-2010.

10121. Sandler, Richard. 1992. Recollections of early tofu and tofu cheesecakes in Boston and New York (Interview). *SoyaScan Notes.* May 26. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Richard does not recall a tofu cheesecake being sold commercially in Boston. He first saw tofu made by Lenny Jacobs; Lenny also experimented with making a tofu pie, but did not ever sell it commercially. Barry Creighton made a pie with tofu. The first tofu pie Richard ever saw was made by Danny Mount at The Caldron restaurant in New York City. Before working at The Caldron, Danny had worked at the Good Karma Cafe in San Francisco (as did Donny Crocker from Tassajara). For a longer interview with Richard Sandler on this subject, see SoyaScan Notes, Sept. 1997. Address: Greenwich Village, New York. Phone: 212-777-7138.

10122. Jacobs, Lenny. 1992. Macrobiotic pioneers–where are they now? (Interview). *SoyaScan Notes.* May 27. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Nahum Stiskin is now in New York City in the field of investments. His former wife, Beverly Stiskin, lives in Brookline, and is an Alexander therapist. Nahum has a black cloud and a real bitter feeling regarding his past life. He doesn't like to talk with people. Lenny ran into him 8 years ago at an ABA show and he said to Lenny, "Don't bother me." Mr. Ehud Spurling, the owner of Inner Traditions Press in Rochester, Vermont also knows how to reach Nahum.

Bill Garrison is on the West Coast somewhere. He applied for the job of financial manager of the Kushi Foundation. Anthony "Tony" Harnett is owner of Bread and Circus in Newton, Massachusetts. Jim Ledbetter is in Southern California; the Kushis keep in touch with him. Jim started *Order of the Universe* magazine. Robert Hargrove is in the Brookline area where he owns Robert Hargrove and Associates.

Nik Amartseff got involved with cocaine at some point in about the late 1970s and his life fell apart. But now its back together.

Marcea Newman now lives in Australia; Lenny saw her at Anaheim not long ago and spent a lot of time with her and her husband (who has designed a very interesting Chinese herbal database on a Macintosh computer); its a very expensive diagnostic tool. You can enter your symptoms and it will suggest which herbs to take, or you can key in the name of an herb, and it will tell you all about it.

Eric Utne was the manager of Erewhon in about 1970 or 1971. He came to Boston in the late spring of 1969, at the same time as Lenny's wife to be. Lenny arrived in Boston in the summer of 1969 from Chicago, Illinois. He left Boston for Minneapolis in 1971; then Eric Utne, Lenny, and Peggy Taylor (who is now the editor at *New Age Journal*) started a restaurant at the University of Minnesota named Whole Foods. They ran it for 2 years. Then Eric and Peggy returned to Boston, and Eric went to work at the *East West Journal.* Lenny left for Boston in the fall of 1973; he wanted to start a bakery, then he and Bob Phelps (who now runs Redwing Books) planned to start a seaweed harvesting business. The Robert Hargrove, Eric Utne, and several other people (the majority of the staff of East West Journal) asked Michio Kushi to either give them the magazine (free of charge) or they would quit. They did quit and started New Age Journal. Michio Kushi asked Lenny if he would please work for East West for a few months, which he did–though he ended up staying for years until he finally left to work at East West Journal.

The Seventh Inn was a really successful restaurant, but Michio refused to share any of the ownership with the people who ran it and he tried to control it too much. Originally called Sanae, it was started by Richard Sandler (who selected the location and designed the kitchen, but never really worked there after it was in business), Evan Root, and others. Lenny was a cook there. Richard and another guy named

© Copyright Soyinfo Center 2013

Warren Durban quit before the restaurant was finished, and they gave it over to Lenny and Bill Anton (who is still in Japan). Then Yuko Okada and Hiroshi Hayashi started to run it; they changed the name to The Seventh Inn. There were two Sanae Restaurants, one on Newbury St. and the other on Boylston St. Address: New Age, Brighton, Massachusetts. Phone: 617-787-2005.

10123. **Product Name:** Deep Fried Bean Curd.
Manufacturer's Name: American Food Co. (AFC).
Manufacturer's Address: 4738 Valley Blvd., Los Angeles, CA 90032. Phone: 213-223-7738.
Date of Introduction: 1992. May.
Ingredients: Soy beans, water, soy oil, calcium sulfate.
Wt/Vol., Packaging, Price: 8 oz vacuum pack. Retails for $1.29 (10/92, Oakland, California).
How Stored: Refrigerated.
New Product–Documentation: Product with Label purchased in Chinatown, Oakland, California. 1992. Oct. 28. 7 by 4 inches. Vacuum pack. Red, dark green, black, white, and light green. "Vacuum fresh. 100% natural. High in protein. High in calcium. No cholesterol." UPC indicia.

Talk with Jackson Wu, owner. 1992. Nov. 4. This product was introduced about 5-6 months ago. The company moved to its present location, into a building that it now owns, on 1 Nov. 1990.

10124. **Product Name:** Tofu, and "Soya Sage" Soysage.
Manufacturer's Name: Basically Beans "Real Food."
Manufacturer's Address: P.O. Box 170 Nimbin, NSW 2480, Australia. Phone: (066) 89 1565.
Date of Introduction: 1992. May.
New Product–Documentation: Form filled out by Simon Elenius. 1993. May 21. His company began production of these two products in May 1992. Present production is 600-900 lb/month of tofu and 250-300 lb/month of soysage.

10125. Boysen, Hans-Juergen. 1992. Ist die Lupine die Nahrungs-Entdeckung des Jahrhunderts? [Is the lupine the nutritional discovery of the century?]. *Schrot & Korn* (*Germany*). May. p. 27-30. [Ger]
• ***Summary:*** A comparison of lupins (*Lupinus albus*) and soybeans, and foods made from them. Paul Bremer and Volker Bruhn, who run a company named "Lupino" in Bremerhaven, say that good-tasting and nutritious milk, yogurt, a spread for bread, and quark (like tofu) can be made from lupin seeds. They sell such lupin products.

10126. *Child Haven International* (*Newsletter, Maxville, Ontario, Canada*). 1992. SoyaCows. Spring. p. 5.
• ***Summary:*** "Seen here [a photo shows] in India with one of our 6 SoyaCows recently taken to India, is Alok Gupta of Ankur Services, the company we have engaged to manage our SoyaCow program in India. The topmost unit is the grinder-cooker with motor underneath, which makes the unit a big blender. Nearby is the steam unit, heated by gas from the container at the right edge of the photo. The lower chamber is the filter press. The rectangular perforated metal boxes are for making tofu. The basic unit sells for $3,000 U.S., while the whole 20 liter system is available for $5,000 U.S. (photo by Grant Wood).

"Child Haven has published a 100 page SoyaCow manual, presently in English, to provide comprehensive information on soya nutrition and SoyaCow enterprise and operation. We are looking for volunteers interested in translating the manual into other languages within a reasonable time frame (about six months)."

10127. Lindner, Anders. 1992. Soyafoods at Natural Products Expo West. *SoyaFoods* (*ASA, Europe*) 3(2):6-7. Spring.
• ***Summary:*** "The 12th annual Natural Products Expo West took place at the Anaheim Convention Center, from 10 to 13 April 1992. Some 900 exhibitors and 40 seminars with expert speakers attracted 12,000 visitors... Some 35 companies exhibited soya foods in Anaheim."

Interesting new products include: Edamame (frozen green soybean in the pod) from Miyako Oriental Foods. Fromage de Soy (cheese alternative in 6 flavors) from Nutrition Specialties International Ltd. (headed by Mr. Patrick E. Cochran; profits go to the International Nutrition Research Foundation Inc., a Seventh-day Adventist organization promoting a rational, healthy, dietary and life-style), Shedd's Willow Run soya margarine from Van den Bergh Foods (Mic-Ellen Associates Ltd.). The Vitasoy–Nasoya Group had a large stand at the show headed by Yvonne Lo and John Paino. White Wave Soyfoods Inc. and the SoyFoods Association of America sponsored a lecture titled "Vegetarianism and Soyfoods" by Michael Klaper, M.D. The Association represents about 30 companies within the soyfoods industry. Address: Director, Lactasoy Agency, Helsingborg, Sweden.

10128. *SoyaFoods* (*ASA, Europe*). 1992. A taste of soyamilk to come: Editorial. 3(2):1. Spring.
• ***Summary:*** Sojinal of Issenheim, France, claims to have invented and perfected a unique physical process to improve the flavor of soymilk by removing at least 60% of the flavor components responsible for the product's strong "beany" taste.

"Sojinal itself is focusing equal attention on soya milk and tofu processing and the company is making changes to more than 50 products. For example Tonyu Saveur is a UHT drink manufactured from de-aromatised soya milk."

A photo shows many different soyfood products in packages, including Tonyu Saveur, Soja Equilibre, Soja Harmoniques (Lasagne au Tofu, Knacks Tofu), etc.

© Copyright Soyinfo Center 2013

10129. *SoyaFoods* (*ASA, Europe*). 1992. Helfex '92. 3(2):4. Spring.
• ***Summary:*** "The International Health Food Exhibition, Helfex '92, was held at Wembley, London on 26 and 27 April. Over 160 companies concerned with health, diet, fitness and nutrition exhibited and several new soya products were launched.

"The Haldane Foods Group displayed their new range including a new Light Soya Milk, a new Soya Creem, a vegetarian cheese spread, burger and sausage mixes, and 6 new varieties of tinned products. JRJ Trading (The Redwood Company) had an interesting and tasty range of tempeh-based products including dips, spreads, patés and vegetarian rashers. Soya milks and desserts from Granovita, Haldane, Sojasun (Triballat), Vitasoy were also on display. Berrydales' No Cream Ices, made from fresh organic tofu and soya milk, introduced their new 4-pack which will allow consumers to purchase four different ices in one pack. Plamil Foods launched a new non-dairy chocolate bar, *Martello* and Marigold Health Food, manufacturers of canned braised tofu and other delicacies, also had a stand."

10130. *Supermarket Business* (*New York*). 1992. Aseptic tofu joins other natural foods enroute to Russia. May.
• ***Summary:*** "Morinaga Nutritional Foods, makers of Mori-Nu Tofu, donated over 100 cases of its aseptic tofu–close to a ton–as part of a hunger-busting effort targeted at the former Soviet Union. In all, some 20 tons of natural food products were sent to St. Petersburg in early April.

"The Hunger relief effort was coordinated by Marlene Wolford, a Corpus Christi, Texas-based organic food promoter, and Dr. Mikhail Zykov, a macrobiotic food advocate. Along with the aseptic tofu, which has a 10-month shelf life without refrigeration, natural foods companies sent brown rice, sea vegetables and other health food products.

"Participating companies included Eden Foods of Clinton, Michigan, which gave away more than 14 tons of products, and Arrowhead Mills, Country Grown Foods, Goldmine Natural Foods, Lifetree Products, Ocean Harvest, Traditional Foods and Pacific Bakery, among others.

"Separately, Morinaga Nutritional Foods' parent company, Morinaga Milk Industry, recently sent thousands of pounds of its infant formula to the former Soviet Union from its headquarters in Japan."

A photo shows Mr. Kumoda, head of Morinaga Nutritional Foods, standing with a co-worker and many cases of tofu in front of a large white banner on which is written: "Mori-Nu Tofu: To Russia with Love"

10131. *Whole Foods*. 1992. Source book 1992. 15(5):33-294. May. Illust. Index. 28 cm.
• ***Summary:*** Contents: How to use this book (p. 8). Wholesalers/distributors alphabetical listing. Wholesalers/distributors geographical listing. Brokers. Publishers. Associations. Consultants/service companies.

Product directories: A listing of manufacturers/importers/growers by products: Foods (p. 77-111–soy-related categories include: Beans/bean products, cheese substitutes, coffee substitutes, cultures, miso, soy products, soy sauce, soymilk, tamari, tempeh, tofu, tofu entrees), vitamins and supplements, herbs, cosmetics/personal care, miscellaneous products. Brand names. Product index. Manufacturers/importers/growers alphabetical listing.

Note: The listings related to soy products are full of errors. Address: South Plainfield, New Jersey.

10132. Ponseele, Jos van de; Verfaillie, Magda. 1992. Re: History of Jonathan P.V.B.A. in Belgium. Letter (fax) to William Shurtleff at Soyfoods Center, June 6–in reply to inquiry. 2 p.
• ***Summary:*** Jonathan was the first company in Europe to make seitan for sale commercially. Jos van de Ponseele, the founder of Jonathan, first learned about seitan during a 9-month stay [with his wife and family] at the Kushi Institute in Boston, Massachusetts, from March to December 1976. There he tasted the seitan prepared by Aveline Kushi. He thought it would be a good meat substitute for the growing group of vegetarians in Europe. [Note: Jos was a butcher with a large meat processing operation before he became a macrobiotic vegetarian]. In Boston, he learned how to make seitan on a home scale from Tamara Uprichard. Then, at the very end of his stay in Boston, he started up medium-scale production of seitan with two Americans; he no longer remembers the name of the company or the names of his American partners. They sold seitan to macrobiotic study houses in Boston and to the Erewhon retail store.

Returning to Belgium, he founded Jonathan. The name "Jonathan" came from a famous book titled *Jonathan Livingston Seagull* [by Richard Bach, 1970. This is a parable about a seagull who loves to fly and practice flight, high and alone, for the joy of flying, while his fellow gulls are busy eating. He is eventually banished from the flock for daring to violate the earth-bound traditions of gull society. Eventually he is taken to a higher world where other gulls, like him, seek perfection and liberation from all limitations. Finally he returns to earth to tutor other outcast gulls in the art of advanced flight.]

Jos hired a man named Ludo Peeters as his first employee and they set up the business in a garage at Holleweg 53, 2180 Ekeren, near Antwerp, Belgium. The company's first product, made entirely by hand, was plain fresh seitan. It was introduced some time in 1977. The product name on the label was simply Seitan, written in 4 languages (Dutch, French, German, and English). It was packaged in 250, 500, and 1000 gm carton dishes with a transparent plastic film lid. With seitan, the big challenge for Jos was to introduce an entirely new and valuable product to the market. Two months after introducing seitan, Jonathan

© Copyright Soyinfo Center 2013

started making tofu and soymilk. Ludo continued to work at Jonathan for many years, eventually becoming managing director.

On 2 Feb. 1979 Jonathan was officially registered as Jonathan P.V.B.A. (the latter abbreviation means something like "Ltd." i.e. a company in which the owner has limited responsibility). Also that year Jonathan introduced a fresh seitan burger, then in Jan. 1980 the company moved to its present location at Antwerpsesteenweg 336, B-2080 Kapellen, Belgium. At the new location they introduced a number of new seitan products: Seitan Paté (Feb. 1980, sterilized), Seitan Goulash (late 1980, sterilized), and Seitan Schnitzel (1981, fresh). From 1985 on, Jonathan introduced a series of different ready-to-eat meals in which seitan was a major ingredient. Jos sold Jonathan and left on 1 April 1989. Magda started Mycelia P.V.B.A. in 1984 and kept the company small until Jos had sold Jonathan. After that they expanded Mycelia to its present size, producing 5,000 liters of mycelium daily. They are both shareholders in Mycelia. Address: Jean Bethunestraat 9, B-9040 Gent, Belgium. Phone: 91-28-7090.

10133. Mitchell, Karen. 1992. Let them eat tofu. *Camera* (*Boulder, Colorado*). June 28.
• ***Summary:*** "White Wave marketing director Paul Chasnoff came up with the bumper sticker as the company's 'corporate political statement.'" It reads: "I Eat Tofu and I Vote!" Available by mail for $2.00 from White Wave, some have called it the "perfect Boulder bumper sticker."

10134. **Product Name:** Barat (Non Dairy Chocolate with Almonds).
Manufacturer's Name: Barat, Inc. (Marketer-Distributer).
Manufacturer's Address: P.O. Box 609, Montville, New Jersey 07045. Phone: (201) 882-9190.
Date of Introduction: 1992. June.
Ingredients: 100% organic* granulated can juice (Sucanat)**, unsweetened chocolate, cocoa butter, tofu (soybeans, magnesium chloride), almonds, soya lecithin (a natural emulsifier), pure vanilla. * = Grown in accordance with California Health and Safety Code 26569.11. ** = Sucanat is an unrefined whole food sweetener made from the juice of the sugar cane which retains the vitamins and minerals from the sugar cane plant.
Wt/Vol., Packaging, Price: 1 oz. Retails for $0.87 (7/92, Maryland).
How Stored: Shelf stable.
Nutrition: Per 1 oz. bar: Calories 170, protein 3 gm, carbohydrates 13 gm, fat 11 gm, sodium 10 mg. Calcium 4% of U.S. RDA, iron 8%.
New Product–Documentation: Product with Label purchased at Fresh Fields, Rockville Pike, Maryland. 1992. July 20. This product is the successor to The Barat Bar, developed by Legume, Inc. (also run by Gary and Chandri Barat). The product is now named simply "Barat." Underneath that name, in much smaller letters, is written "Non Dairy Chocolate with Almonds." This upscale 1-ounce (28 gm) product retails for a hefty $0.87. The word "tofu" appears in the ingredient listing which is hard to read because it is hidden behind a fold in the wrapper and is printed with brown ink on silver foil. Label is 6.5 by 1.5 inches. Silver foil. Dark brown, gold, white, and silver. On front panel: "New. Sucanat: The organic whole food sweetener. Made in USA."

10135. Cherin, Starla Vaughns. 1992. Tofu takes on produce flavors. *Produce Business.* June. p. 48, 50.
• ***Summary:*** "The produce department enjoys the halo effect of being known for nutritious, fresh products. That's why retailers and suppliers agree it's the perfect place to merchandise tofu... Tofu is packaged in three ways: water-packed, aseptic and vacuum-packed."

In 1969, when Azumaya first began to sell its tofu in supermarkets, the retailers in San Francisco weren't quite sure where to place it–so they put it in the produce section. Says Azumaya president Bill Mizono: "'I think it was because they contended soybean is a vegetable and back then most Orientals worked in the produce section and were more familiar with the product.' But today tofu is merchandised in the produce department not by chance but by choice... 'All of our recipes include vegetables,' says Mizono. 'We offer a customer request address for recipes on our point of sale materials, and we receive between 25-50 letters a day concerning recipes.'"

"Greg Jones, of Marjon Specialty Foods says his company carries a product called Tofu Crumbles that is a vegetarian substitute for meat."

Shayne Gordon of Nasoya Foods agrees, the best place for tofu is in the produce section, in the middle of the aisle. "Here it would have the perception of being a mainstream item. When it is tucked in the corner or on an end cap, consumers feel it is an add-on item. Merchandising in the middle of the first stretch of the wet rack adds to impulse sales and gives tofu a very visible position. If it's right out there with the lettuce and apples, people are going to buy it."

"Frieda's, Inc., Los Angeles, California, declares June as 'Tofu Month,' and offers produce managers a demonstration kit that provides detailed information on tofu, how to merchandise it, demo recipes and full definition and usage information on other Chinese products. Karen Caplan, president of Frieda's, says demonstrations and sampling are the best ways to interest the consumer in new and unusual items.

"'Produce managers should begin advertising the demonstration two weeks in advance through in-store signs and newspaper advertising to help build traffic,' says Caplan. 'Plan to do the demos during peak traffic times–Thursday, Friday and Saturday. Make sure you have plenty of product

© Copyright Soyinfo Center 2013

to sell while demonstrating, and expect to sell five to 10 times the normal amount during your demonstration.'" Address: Boca Raton, Florida.

10136. Jain, Laxmi; Jain, Manoj. 1992. Melody of India cuisine: Tasteful new vegetarian recipes celebrating soy and tofu in traditional Indian foods. Santa Barbara, California: Woodbridge Press. 221p. Illust. 26 cm.
• ***Summary:*** The authors (mother and son) have taken over 100 vegetarian recipes from all over India and prepared them with soymilk, tofu, and soy yogurt in place of all or part of the dairy products. They begin the book with chapters on the dietary benefits of soyfoods and methods of preparing them. All recipes include nutritional breakdowns.

Contents: Introduction. Why tofu and soybeans? Nutritional value of tofu and other soy foods. Preparation of tofu and other soy foods. Soy appetizers (incl. roasted soybeans). Soy with vegetables. Soy breads. Soy salads. Soy raitas & chutney. Soy with rice & lentils. Soy drinks. Soy desserts. Soy ice cream, cookies and cakes. Appendixes: A. Suggested menus. B. Weights, measures, temperatures and times. C. Glossary of Hindi terms. D. Sources of Indian foods. Biographical notes.

"Laxmi Jain, a native of India, has lived in the Boston area for the past 18 years. She works actively to promote the use of soybeans in the American and Indian diet... Her first book on soybean, 'Indian Soy Cuisine,' was published by the American Soybean Association.

"Dr. Manoj Jain is a physician in Internal Medicine at Boston City Hospital and is specializing in International Health and Infectious Diseases at the New England Medical Center. Dr. Jain is a graduate of Boston University School of Engineering, School of Medicine and School of Public Health. He received a Medical Perspectives fellowship to research the uses of soy foods in the Indian diet, and has published his results in the medical literature. Dr. Jain has conducted talk shows and soy demonstrations on national television and radio in India. Currently, Dr. Jain is also a consultant in a five-year rural health and soybean promotion project in India."

On the rear cover, a color photo shows Laxmi and Manoj Jain. Address: 1. Wellesley, Massachusetts; 2. M.D., physician in internal medicine at New England Medical Center (Boston).

10137. Lightlife Foods, Inc. 1992. Tired of the meat market? (Ad). *Vegetarian Times.* June. p. 26.
• ***Summary:*** A 1/3-page color ad. "Meet Lightlife Tempeh Burgers in a luscious lemon sauce. Vegetarian chili with real zip. Tofu pups that are plump and juicy. Sweet Italian sausage to top your pasta. All 100% natural. 100% vegetarian. All simply delicious. Deliciously simple to prepare. Lightlife. Where good health tastes great (TM)." A small photo shows the front of many Lightlife packages. Address: P.O. Box 870, Greenfield, Massachusetts 01302. Phone: 1-800-274-6001.

10138. McGlasson, Linda. 1992. Soyfoods in the next century: Feeding the world one bean at a time. *Health Foods Business* 38(6):30-34, 36. June. [1 ref]
• ***Summary:*** A table gives estimated retail sales of soyfoods in the USA in 1990, in descending order of sales (million dollars): soy sauce $395.5, tofu $94.1, second generation products (such as dips, dressings, entrees, non-dairy desserts, cheeses, yogurts, and imitation meat products) $81.6, soymilk (not including infant formulas made with isolated soy proteins) $60.0, miso $44.5, soynuts $9.7, tempeh $7.5. Total $657 million. Source: Soyatech in Bar Harbor, Maine. The two fastest growing segments are soymilk (increasing at 20% a year) and second generation products (15-20% a year). "Soyfood sales are expected to grow steadily through the next decade as health and environmental concerns become increasingly important factors in food purchasing decisions... an estimated 33 to 50% of all adults are reducing their intake of meat, yet they still have the craving.

Protein Technologies International of St. Louis, Missouri, is developing a line of structured proteins, which are look-alike meat components. There are versions that look and feel like ground beef, crab meat, and chicken.

Angelo Morini, founder of Galaxy Foods, began trying substitutes for the real cheese he was using in his pizza business. He left the pizza business in 1968 and began making soy cheese full-time. The company began slowly by selling to food service customers, then they started marketing the cheese nationally in 1984. In 1985 Galaxy started in the health food industry with a new line, Soyco. Following a fire, the company has relocated in a new 55,000 square foot state-of-the-art manufacturing facility in Orlando, Florida. They are now producing soy cheese products and are scheduled to launch 30 new items this year.

One sidebar, titled "Quickie Dictionary of Soyfoods," defines tofu, miso, tempeh, soymilk, and shoyu. Another says "Soyfoods Take Spotlight in New Infomercial." The infomercial is based on Dr. Michael Klaper's education seminars for doctors and other health professionals titled "Let Food Be Your Medicine." Klaper (a noted physician, author, environmentalist and nutritionist [and vegan]) is co-founder and director of the Institute for the Advancement of Nutrition Education and Research. The tentative title for the new infomercial is "The Nutrition for the 90s, a Transition to Health." It will begin airing in July on cable TV. Radio's Top 40's Countdown host Casey Kasem will emcee the show with Dr. Klaper. The show will feature top scientists and doctors, plus testimonial interviews with many celebrities and famous athletes. Address: Managing editor.

10139. Morinaga Nutritional Foods, Inc. 1992. We are pleased to announce the relocation to... (Card). 5800 South

© Copyright Soyinfo Center 2013

Eastern Ave., Suite 270, Los Angeles CA 90040. 1 p.
• ***Summary:*** This 4½ by 6¼-inch embossed card, printed black and red on white, mailed June 3, announces that Morinaga will relocate to: 2050 W. 190th St., Suite 110, Torrance, California 90504. Phone: (310) 787-0200. Fax: (415) 787-2727. "We anticipate no disruption of business during our relocation and look forward to our continued relationship. Effective: June 15, 1992 (Monday)." Address: Los Angeles, California.

10140. **Product Name:** Vita-Soy Tofu (Chinese Style).
Manufacturer's Name: Nasoya Foods.
Manufacturer's Address: 23 Jytek Park (P.O. Box 841), Leominster, MA 01453. Phone: 617-537-0713.
Date of Introduction: 1992. June.
How Stored: Refrigerated.
New Product–Documentation: Sarah V. Cherin. 1992. *Produce Business.* June. p. 50. "Tofu Takes on Produce Flavors." Nasoya produces 8 varieties of tofu and 2 are "authentic Chinese style" products that have bi-lingual Chinese and English labeling. "The Chinese style tofu, called Vita-Soy Tofu, is processed differently than Nasoya's plain tofu. The texture and taste is more acceptable to the Oriental population."

10141. **Product Name:** Tofu [Regular, Firm, and Herb]. The Herb was renamed Garlic & Herb in July 1998.
Manufacturer's Name: Small Planet Soyfoods.
Manufacturer's Address: 5303 N. Myrtle St., Spokane, WA 99207.
Date of Introduction: 1992. June.
How Stored: Refrigerated.
New Product–Documentation: Talk with Phil Spiegel. 1992. June 4. This week he will open a tofu shop in Spokane inside a sprout shop. It will be temporary until he can build a shop in his garage on his property in Newport, Washington. He may have problems there with disposal of whey.

Talk with Phil Spiegel, owner. 1992. June 29. He started making these 3 varieties of tofu at a temporary location in early June 1992. Soon he will be moving his shop onto his property at 4452 Rocky Gorge Rd., Newport, WA 99156. Phone: 509-447-5146. The local health inspector is asking for details on his whey, its BOD [biological oxygen demand] and how he plans to dispose of it. He soon plans to introduce Soysage in two flavors: Mexican, and Italian Herb.

Form filled out and faxed by Phil Spiegel, owner. 1998. July 21. Small Planet Soyfoods, 330112 Hwy 2, Newport, WA 99156. Phone: 509-447-5146. Currently producing organic nigari tofu (15.5 oz), and four types of flavored organic tofu (garlic & herb, hot, curry, and vegetable). Started June 1992. Talk with Phil Spiegel. 1998. July 30. His company, Small Planet Foods, is a tofu company located on a 300-acre certified organic farm named Penrith Farms, which is run by his silent partner (Jim & Sherry Brewster). The farm is also a foster farm for teenagers with serious problems; the Brewsters generally contract with the state of Washington, but sometimes private individuals also send their kids–if they can't deal with them. A good percentage of few of the kids leave in much better shape than when they arrived. Phil sold all of his tofu in bulk until July 1998, when he began packaging it. The idea for the flavored tofu–garlic & herb–was developed by Silverking in British Columbia, Canada; they shared the idea with Phil–who made some small modifications.

Labels for Firm Organic Tofu and Garlic & Herb Organic Tofu sent by Phil Spiegel. 2001. May 18. 3.75 by 5 inches. Self adhesive. "Non-GMO" logo. "Hand crafted in the Northwest by Penrith Farms, 330112 Hwy #2, Newport, WA 99156. Phone: (509) 447-5146. www.smallplanettofu.com." A large illustration shows a river with trees and mountains.

10142. **Product Name:** Soy Flour, Tofu Powder, Textured Soy [Flour].
Manufacturer's Name: Solait International, Inc. (Marketer-Distributor).
Manufacturer's Address: 202 West 7th St., P.O. Box 885, Carroll, IA 51401. Phone: 1-800-747-8605.
Date of Introduction: 1992. June.
How Stored: Shelf stable.
New Product–Documentation: Ad (full-page, black-and-white) in Soya Bluebook. 1993. Sept. Devansoy, Inc. is located at 202 West 7th St., P.O. Box 885, Carroll, Iowa 51401. Phone: 1-800-747-8605. Elmer Suttler is president. Talk with Bev Tierney of Devansoy. The company changed its name from Solait International Inc. to Devansoy, Inc. in Jan. 1993. They make only one product–Solait Powdered Soy Beverage–however in mid-1992 they started selling soy flour, tofu powder, and textured soy flour made by other companies.

10143. *SoyaCow Newsletter* (*Ottawa, Canada*). 1992. Soya deli and fast food pilot project. 1(2):1. April/June.
• ***Summary:*** "Frank Daller is moving from the Toronto area to Ottawa to take the SoyaCow's products to Ottawans. He plans to operate a SoyaCow from a busy market location to produce and sell freshly made tofu, soymilk, soy-yogurt, okara, and various value added products made from them. The business will also sell health fast foods including tofu-burgers, pita pocket sandwiches, frozen desserts, and soydrinks and shakes.

"The idea is to prove the concept in Ottawa with the intent of developing it into a franchise."

10144. **Product Name:** White Wave Dairyless (Nonfermented Soy Yogurt) [Apricot-Mango].
Manufacturer's Name: White Wave, Inc.
Manufacturer's Address: 6123 E. Arapahoe Rd., Boulder,

© Copyright Soyinfo Center 2013

CO 80303. Phone: 303-443-3470.
Date of Introduction: 1992. June.
Wt/Vol., Packaging, Price: 6 oz plastic cup.
How Stored: Refrigerated.
New Product–Documentation: Talk with Lon Stromnes. 1992. April 3. This product will be introduced at the Anaheim Show in April.

Talk with Lon Stromnes. 1993. Feb. 9. This product was introduced on 12 June 1992. Steve Demos has visited Triballat in France where Sojasun is made [but Steve says he did not go through the Triballat plant], he knows all about it, and he knows that Sojasun is opening a plant in China.

10145. Hall, Trish. 1992. So contemporary: In search of a low-fat hot dog. *New York Times.* July 1. p. C1, C6. Living section.
• ***Summary:*** "Ninety-five percent of the households in this country eat hot dogs, and they indulge, on average, more than once a week, according to the National Hot Dog and Sausage Council in Westchester, Illinois... Americans consume so many hot dogs in the summer–more than five billion, according to the council–that the links, if put end to end, would circle the earth more than 15 times. The Fourth of July weekend and the Memorial Day weekend are the peak hot-dog eating times." But hot dog sales fell 2% in 1991 from 1990, and the number of alternatives is rising.

"Some of the lower-fat dogs don't have nitrites, a preservative that has been linked with cancer in laboratory animals, but most do...

"Although much of the hot-dog flavor comes from spices and seasonings, the juicy chewy sensation is provided by fat. Steven Demos, president of White Wave Inc. in Boulder, Colorado, said that his company has been selling a tofu hot dog, Meatless Healthy Franks, for four years and that sales have increased by 35 percent to 40 percent each year. But the hot dogs are quite dry, a problem he doesn't deny. 'We need to improve upon them,' he said. His company will direct its efforts toward creating a better-tasting vegetarian hot dog rather than a lower-fat alternative.

"The tofu hot dogs have more fat than most people might think, as much as nine grams. Because that fat is unsaturated–it comes from the soybeans in the tofu–it is more healthful than fat from animal sources. But because it is unsaturated, it does not provide the juiciness that animal fat gives, Mr. Demos said."

A table compares 3 brand of tofu hot dogs, each weighing 1.5 oz: (1) Meatless Healthy Franks, 120 calories, 8 gm of fat. "Unattractive exterior, dry and mealy inside." (2) Not Dogs, 120 calories, 9 gm of fat. "Brown outside, dry inside, tastes like carrot." (3) Tofu Pups, 92 calories, 5 gm of fat. "Blistery outside, rubbery casing, strong artificial smoke taste."

Also syndicated in the Miami Herald. July 5.

10146. Weissman, John. 1992. Natural foods sandwich companies in and around Boston, Massachusetts (Interview). *SoyaScan Notes.* July 4. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The two main sandwich companies are Season's Harvest (in Somerville, Massachusetts; owned by Ademar Reis, pronounced REES) and New World Natural Foods (in Brighton, Massachusetts; owned by Emily Merghart; Phone: 617-232-5973). Emily started the company herself under the name New World Enterprises in 1979, and has since run it herself. Her husband, Errol, was a dancer. The idea for the business came from a previous business that Paul Duchesne had started and left. Season's Harvest products are distributed widely, down to New York and Connecticut, and possibly up into New Hampshire. New World sells only locally. Both use tofu and seitan in their sandwiches. New World uses seitan made by The Bridge in their sandwiches. They sell tofu burgers made by 21st Century, etc. Admar makes Bacon Bits out of TVP, a process he learned from John; then he waited 5 years and did it on his own. He also makes vegetarian burgers out of chickpeas and rice, etc. When stores such as Bread & Circus installed their own delis, it greatly hurt both of these sandwich companies. Address: VegPro Co., 133 Nottinghill Rd., Brighton, MA 02135.

10147. Peeters, Ludo. 1992. Early history of Jonathan P.V.B.A. in Belgium (Interview). *SoyaScan Notes.* July 9. Conducted by William Shurtleff of Soyfoods Center. Followed by a letter of July 29. [1 ref]
• ***Summary:*** Ludo started working with Jos van de Ponseele at Jonathan on 28 Aug. 1978. He made seitan with Jos from the very first day; they were Jonathan's only workers at the beginning and they worked in a garage at the company's first location–Holleweg 89, 2070 Ekeren (near Antwerp), Belgium. Ludo thinks Jonathan's first product was seitan, followed by tofu and soymilk. Ludo thinks that the seitan was introduced before Nov. 1978. The original ingredients were water, wheat, soy sauce, soy flour or meal, salt, kombu, and ginger. The soy flour improved the flavor and nutritional value.

In 1978 Mr. Van de Ponseele moved to Holleweg 113, 2070 Ekeren. In January or February of 1980 he moved to the actual plant.

In his letter of 29 July 1992, Ludo encloses several early documents: (1) A letter written in Oct. 1977 (Jonathan was at Holleweg 89) showing that that company was selling Seitan (a vegetarian steak), Goulash (made with seitan), Tofu (*Sojakaas*), Mochi (made of sweet rice), sea vegetables, vegetable pickles, and peanut butter. (2) A price list for 1978-79 (the company is now at Holleweg 113). (3) An English-language translation of the text of a press conference held in about 1987 when the company started to make prepared meals based on seitan and tofu. Address: Goorbosstraat 20,

10148. Troy, John. 1992. Update on Wizard's Cauldron and work with miso (Interview). *SoyaScan Notes.* July 11. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** John makes many lines of products that contain miso. "The Wizard" line, sold through Joel Dee of Edwards & Sons, contains three products: Hot Stuff, Stir Crazy (a stir-fry sauce), and Sweet & Sour Sauce. The Premier Japan line is also exclusive to Edwards and Sons. The Simply Delicious line consists of many salad dressings, such as Lemon Tahini, Ginger Plum (with umeboshi plums), Tofu Poppyseed, and Miso Sesame (the only miso product in this line). His favorite salad dressing (which is also his best-seller) is the Miso Sesame; it is sweetened with rice syrup, and contains both clear shoyu and white miso. "It's really nice."

A fourth line, called "Troy's" is a line of sauces, such as a steak sauce and a poultry sauce. Three of these products contain miso: Miso Magic (a sauce for grains and vegetables), and Cracked Peppercorn Steak Sauce, and Honey Mesquite Barbecue Sauce. John's favorite sauce is his Thai Peanut Sauce. A fifth, called Harbor Lites, is a line of six seafood sauces–all of which contain either soy sauce or miso. The Garlic Grill contains miso. There is also a Ginger Soy in this line.

American Natural Foods (ANF), started in 1984, attracted many local investors who finally got control of the board of directors and encouraged John to do things that went against his beliefs; the company eventually lost about a million dollars, and John lost everything he had. It didn't go bankrupt; it's still alive but John "walked away from it." It's sole product is Miso Mustard, which is made by Morehouse Foods.

At the end of 1985 John was penniless, and had to draw unemployment to buy groceries. "But it was a real blessing in disguise." John started doing some consulting work. In 1986 he started a new company named "Wizard's Caldron," which was initially just a consulting company. John was able to buy the trademark for Hot Stuff away from ANF, then cut a deal with Joel Dee. In Oct. 1987 Edwards and Sons became the exclusive distributor of his Premier Japan line and his Wizard Baldour condiments and sauces, including Hot Stuff. He saved enough money to buy a little plant, then started real small, making food products again. The new company's first product line, the Simply Delicious salad dressings, was launched in 1989. The company has been growing and growing, until now it is a very healthy little company with one million dollars of annual sales. This is the first time John has owned his own plant; previously he always had to use co-packers. "I'm just having a wonderful time with it, but it was a hard lesson to learn." John buys his miso from Don DeBona of American Miso Co. He also uses a lot of clear shoyu, which he buys from San-J; they make it in Japan. He consulted for San-J, and when he visited their plant in 1986 he noticed some stuff dripping from a vat. They said it was clear shoyu which they said they used in sauces, dashi, etc. He brought back a 5-gallon pail to the USA, and eventually made it a featured ingredient in his line of salad dressings. Address: The Wizard's Cauldron, 8411 Hwy. NC 86 N, Cedar Grove, North Carolina 27231. Phone: 919-732-5294.

10149. *SoyaScan Notes.* 1992. The remarkable food-related creativity that took place in Boston from the late 1960s until the late 1970s, especially within the macrobiotic community (Overview). July 13. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** A flowering of original food product development took place in Boston during this period. There were a number of reasons for this (1) The meeting of two food cultures, Japanese and American, together with new ideas related to diet and health, as embodied in the macrobiotic teachings of Michio and Aveline Kushi. Just as the meeting of two ocean currents leads to a region at the boundary of great biological activity and development, so does the meeting of two cultures. Young Americans were introduced to a host of new basic foods which they quickly began to use and process in new ways. These included miso, tofu, seitan, amazake, umeboshi salt plums, sea vegetables, rice syrup, rice cakes, azuki beans, mochi, and many more.

To cite but four examples: (A) Seitan: Japanese had used seitan as a salty condiment or seasoning. By late 1972 Americans had transformed it into a succulent meat substitute. (B) Tofu: It had never occurred to Japanese to put tofu in a blender. By the mid-1970s Americans in Boston were combining it with a sweetener to make delectable dairyless tofu cheesecakes and cream pies, or to make low-fat, cholesterol-free salad dressings, dips, and spreads. (C) Amazake: Japanese serve this as a hot beverage like tea, most in teahouses; The only flavoring used is gingerroot. Americans transformed it into delectable ice creams (free of dairy products and sugar), or thick, sweet drinks resembling milk shakes sold refrigerated in plastic bottles. Americans also used amazake as an all-purpose natural sweetener in place of sugar, honey, or maple syrup. They also learned to make a rice milk resembling amazake using commercial purified enzymes instead of koji; at this point, the line separating amazake and rice syrup became somewhat blurred. (D) Rice Syrup: Japanese use *amé* or *mizuamé,* made from koji, as the basis for taffy-like candies or, in very limited ways, as a sweetener. Americans soon began to make rice syrup using commercial enzymes instead of koji and to use it as an all-purpose natural sweetener in place of sugar, honey, or maple syrup.

(2) The closely-knit, almost communal nature of the macrobiotic community in Boston, was one in which many people, mostly young people (including many women), were working closely together with a common vision. New ideas were shared more than guarded or patented. Joel Wollner

© Copyright Soyinfo Center 2013

notes that it was almost like the art community in Paris during the impressionist era of the late 1800s.

(3) The Erewhon retail store (opened in April 1966) provided a ready testing ground for new local products. Many got their start in one or more of these stores. The Erewhon Trading Co. (which started importing Japanese natural and macrobiotic foods in Aug. 1968), and which began wholesaling and distributing in the spring of 1969, greatly helped to expand the market for good products.

(4) The community was fortunate to have a number of exceptionally talented entrepreneurs in the food business, including Paul Hawken, Bruce Macdonald, Roger Hillyard, Bill Tara, and many others. Many of these individuals later left the area to start their own food companies.

(5) It was during this period that the natural foods, macrobiotic foods, organic foods, and vegetarian movements (all closely related, and often based on similar philosophical, ethical, and spiritual values) began to grow in the United States, in part in reaction to the overly-processed, overly chemicalized, unhealthful foods produced by big food companies, and the highly-chemicalized food growing techniques used by American farmers–and in part because of the leadership and inspiration of the community in Boston.

10150. Wollner, Joel; Wollner, Wendy. 1992. Early tofu cheesecakes in Boston (Interview). *SoyaScan Notes.* July 13. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Both Joel and Wendy remember a tofu cheesecake made by Sprucetree Bakery and another served at The Seventh Inn. Joel's favorite tofu cheesecake was made at the Last Chance Cafe in Cambridge, Massachusetts, by Eduardo Jimenez (pronounced HIM-eh-nez). He used to age it so that the flavors would marry. It was available by 1979. Before that, Marcea (pronounced mar-SEE-uh) Newman, used to make delicious tofu cheesecakes. In the early 1970s she was living with Murray Snyder. She used to be a freelance caterer. Whenever a cake was needed for a birthday, wedding, or party, Marcea would be the one to bake it. At the time, she was experimenting with these recipes, including cheesecakes, for her cookbook *The sweet life: Marcea Newman's natural-food dessert book,* which was published in 1974. Thus her cheesecakes were sold commercially, but not in stores. Joel is quite sure Marcea (her last name is now Weber) is still in Australia. Address: Joel Wollner / Genesis, P.O. Box 1343, Clifton Park, New York 12065. Phone: 518-371-7014. Fax: 518-373-8337.

10151. *Toyo Shinpo* (*Soyfoods News*). 1992. Tôfu, aburaagé, nattô, konnyaku noki nami ni fushin: Jisshitsu de zennen dôgetsu hi 0.5% no gensho [Consumption of tofu, aburaage, natto and konnyaku in Japan from 1976 to 1991: Decreased 0.5% from the same month last year]. July 21. p. 2. [Jap]
• ***Summary:*** Per household consumption of various soyfoods; yen figures are not adjusted for inflation. Tofu consumption rose from 85.73 cakes costing 5,020 yen in 1976, to 86.89 costing 6,047 yen in 1980, to a peak of 90.43 costing 6,761 yen in 1983, dropping to 88.48 costing 7,337 yen in 1985, down to 83.42 costing 7,323 in 1990, down to 78.76 costing 7,699 yen in 1991.

Consumption of aburaagé and ganmo (deep-fried tofu pouches and burgers) rose from 2,950 yen in 1976, to 3,472 in 1980, to a local peak of 4,080 in 1984, dropping to 4,057 in 1985, down to 3,898 in 1990, then rising to a recent peak of 4,253 in 1991.

Natto consumption rose from 1,034 yen in 1976, to 1,289 in 1980, to 1,655 in 1985, to 2,532 in 1990, to an all-time peak of 2,532 yen in 1991.

10152. Bersky, Kamil. 1992. Re: Work with soyfoods, seitan, and amazake in Czechoslovakia. Letter to whom it may concern, July 30. 1 p. Typed, with signature.
• ***Summary:*** "We are now producing 5 varieties of seitan, 5 varieties of tempeh, amasake, tofu, and we can offer barley malt. Our plan is to start koji and miso production, open a macrobiotic center with a year-round program, a kindergarten, and a small restaurant with a shop." Address: M.D., The Macrobiotic Centre of Czechoslovakia, Mlynska 659, 51 801 Dobruska, Czechoslovakia. Phone: 42 443 21578 (fax).

10153. **Product Name:** Tofu, and Soy Sprouts.
Manufacturer's Name: Manna Foods Inc.
Manufacturer's Address: 2030 Will Ross Court, Chamblee, GA 30341. Phone: 404-454-7569.
Date of Introduction: 1992. July.
New Product–Documentation: Talk with James Kim, owner. 1993. Nov. 18. He bought this company in May 1993 from Mr. Wang of Manna Foods at the same address. He currently makes tofu, soy sprouts, and mung bean sprouts. Mr. Wang started the company about two years ago at the same address and he made the same foods.

Talk with an employee at Calco of Atlanta. 1993. Nov. 18. Mr. Wang was a Chinese-Korean who was born in Korea. He first/given name in Chinese was something like Wei-Gan. He closed his business (without filing for bankruptcy) in about the summer of 1992 after he had been in business for only about 3 months. He sold or tried to sell his equipment. He definitely did not run the business for 2 years. The people at Calco (which has been in business for 10 years) know him well and feel strongly that he was a sneaky man with no integrity. He developed a bad reputation in Atlanta, where he was widely known in the Korean community. For example, he posed as a real estate agent and said that he had a client who wanted to buy Calco for a very high price. Then he said before he could finalize the sale he wanted a list of customers, statistics on how much Calco sold to each account, credit references, etc. Calco gave him that information before they found out that he was an imposter.

© Copyright Soyinfo Center 2013

Then Mr. Wang took 6 of Calco's employees to establish his own business. After Mr. Wang went out of business, most of these employees came back to Calco because they had not been properly paid. They wanted their jobs back, but Calco was able to hire only 2 of them.

10154. **Product Name:** Fried Tofu, Dofu-Gan (Savory Baked Tofu, 2 types), Tofu Chicken, Fresh Soymilk (Plain Unsweetened Traditional Style).
Manufacturer's Name: Tofu International Ltd.
Manufacturer's Address: 738 Airport Blvd., Suite 6, Ann Arbor, MI 48108. Phone: 313-665-2222.
Date of Introduction: 1992. July.
New Product–Documentation: Talk with Tim Redmond of American Soy Products. 1992. May. Bruce Rose has a joint venture with a large Chinese tofu company to make tofu in Michigan.

Talk with Bruce Rose, of Tofu International Ltd. 1992. Sept. 25. All of these products were introduced in July 1992 by Tofu International Ltd., which was formerly named Rosewood Products Inc. Dofu-Gan is extra firm tofu, pressed under hydraulic presses, not water packed. Note: The Soy Plant, the ancestor of Tofu International Ltd. introduced Dofu-Gan in March 1978.

Tofu Chicken is made by cutting a cake of Dofu-Gan into a net or accordion like french fries linked together side by side. After cutting, the net is fried then simmered in a broth. It tastes great in a meatless chicken sandwich and is now sold in some local grocery stores.

10155. Simonds, Nina. 1992. Tofu. *Tribune & Times* (*Tampa, Florida*). Aug. 2.
• ***Summary:*** The author first tasted tofu in 1971 near the University of Wisconsin at Madison. It was drab, rubbery, and flavorless. Then, in Taiwan, she became very fond of tofu. Today it is catching on in America. Nasoya Foods, a Massachusetts tofu manufacturer, has annual sales of $7 million.

10156. Martin, Claire. 1992. Regardless of poll, bland food's sales rise. *Denver Post* (*Colorado*). Aug. 6.
• ***Summary:*** About Steve Demos and White Wave Soyfoods Inc. Photos show: (1) Worker David Kremin labeling and stacking tofu on a conveyor belt. (2) A carousel curding machine inside White Wave's tofu plant in Boulder, Colorado. Sales of White Wave tofu grew only slowly from 1977 (when Demos started the company) until 1985. But in 1985, when Demos decided to market "second-generation soy products–cooked tempeh burgers, soy hot dogs, soy yogurt... Customers literally ate it up. Sales doubled that year, and kept growing. White Wave's growth rate last year was 30 percent. (Its stock is privately held.) This year, Demos expects sales to meet or exceed $5 million, and to produce 7 million pounds of tofu and soy products in all 50 states. The No. 1 seller? Raw tofu–despite the yuck factor. Part of the answer may be that shoppers in the United States are shifting their focus from price and convenience to health and nutrition."

Demos is now "contemplating a product [a hot dog?] that combines tofu and meat. 'The meat industry thinks that's sacrilegious. The tofu industry thinks that's sacrilegious. I don't think its sacrilegious. It's one way to get someone to make the transition from meat to soy.' Another way is creative advertising. Inspired by the presidential campaign, White Wave marketing director Paul Chasnoff came up with a six-word publicity campaign, perfect for bumper stickers: 'I eat tofu and I vote.'" Note: These bumper stickers can be ordered from White Wave for $2 each. Address: Denver Post Staff Writer.

10157. *Irish Times* (*Dublin*). 1992. RTE1, Network 2 [Television schedule]. Aug. 18. p. 19.
• ***Summary:*** At 3:30 the program "Yan Can Cook" features everything you might want to know about bean curd or tofu. Martin Yan makes three recipes: (1) Spinach salad with tofu dressing. (2) Stir-fried pressed bean curd with jicama. (3) "Sichuan braised bean curd."

10158. *SoyaScan Notes.* 1992. Two TV ads by The Kellogg Co. depict tofu negatively, as if it symbolized a food used only by health nuts (Overview). Aug. 22. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** In one Kellogg TV ad, a wife gives her husband a Nutri-Grain Bar. He asks: "Is it tofu?" She says no. Another Kellogg cereal ad also uses tofu in much the same way.

10159. Nordquist, Ted A. 1992. Re: Overview and details on new developments with AB Winner and with Aros in Sweden. Letter to William Shurtleff at Soyfoods Center, Aug. 26–in reply to inquiry. 2 p. Typed, with signature on letterhead.
• ***Summary:*** "I formed Aros Sojaprodukter AB in August of 1990 with Erik Kennhed, a business man from Eskilstuna, Sweden. I was VD or President with 51% to his 49%. Aros AB bought soybase from Trensums Musteri AB and sold it to Winner AB. Winner made Tofuline ice-cream and sold it to Aros AB. Aros AB in turn sold Tofuline to Ingman Foods, Finland, Nutana in Sweden, Nutana in Denmark and Nutana in Norway. Since I designed the soybase plant for Trensums, I had an exclusive contract with them on soybase. I worked with Winner to develop soy-based products, the ice-cream was the first.

"I did not have time for tofu. I sold Aros Sojaprodukter KB to Trensums and moved the Tofu plant to Trensums in July of 1991. Trensums Musteri AB is owned by Blekinge Invest and is situated in Tingsryd, about 30 minutes by car from Karlshamn where Winner is located.

"Then in August of 1991 Nutana in Denmark and

© Copyright Soyinfo Center 2013

Norway went bankrupt. Winner had about 100,000 dollars of ice-cream in stock. Trensums and Winner did not like my powerful position while I, according to the contracts, had no financial liability. I just took the profits. So they started talking to each other about me, or more specifically about Aros Sojaprodukter AB. Blekinge Invest forced Erik to sell his 49% to Blekinge Invest for a song, threatening him with possible losses if both Winner and Trensums decided to drop soya altogether. Once they bought out Erik I was next.

"I reached an agreement with Winner and Blekinge Invest in April of 1992. I sold my shares to Blekinge Invest who now owns 100% of Aros Sojaprodukter AB and KB. I work as a consultant for Winner until the end of this year.

"Aros AB (Trensums) delivers soybase only to Winner. Winner sells Tofuline ice-cream directly to Nutana Sweden and Ingman Foods in Finland. They sell via their own Winner name to England.

"AB Winner, 374 82 Karlshamn, Sweden. Tel: 46-454-82000. Fax: 46-454-11375. International sales contact is Leif Andersson. President is Håkan Johnsson.

"Aros Sojaprodukter AB, Box 112, 36201 Tingsryd, Sweden. Tel: 46-477-11920. Fax: 46-477-18034.

"Aros (Trensums) does not want to actively sell soybase. They are happy to sell only to Winner AB. There is no President, but Jan Hallberg, vice-president of Trensums handles the paper work. Aros Tofu is off the market. Dansk Tofu is now sold in Sweden and Norway.

"Winner is in the process of being sold. The plot thickens!

"Anders Lindner, Erik Kennhed and I look on in interest as all this unfolds."

Note: Attached are photocopies of three Tofuline soy ice cream labels, sold by Nutana in Sweden. Address: President, TAN AB, Eningbölevägen 54, S-740 82 Örsundsbro, Sweden. Phone: +46 171 605 68. Fax: +46 171 604 56.

10160. Adams, Ruth. 1992. Tofu: Versatile protein source. *Better Nutrition for Today's Living* 54(8):34. Aug. [7 ref]
• ***Summary:*** The article begins: "In the preface of *The Soybean Cookbook* [1963], Mildred Lager tells us that 'soybeans are perhaps the world's oldest food crop, and for centuries, nutritionally they have meant milk, cheese, bread and oil to the people of Asia. Economically, they have meant gold, a cash crop, something to sell for exchange for other necessities. We of the Occidental world have also discovered that soybeans are indeed nuggets of gold in our modern civilization.'"

There follows a discussion of tofu, including the different types, and a recipe for "Indian tofu rice cakes." Ends with 7 references to books about tofu.

10161. Ali, Nawab. 1992. Soybean food potential and its exploitation for Indian situation. *Agricultural Situation in India.* Aug. p. 395-402. *
• ***Summary:*** Commercially available soybean foods in India are: Soymilk, soypaneer [tofu], soysuji / soy-suji (a snack in Central India), soy fortified biscuit (using soyflour). Address: Project Director, Soybean Processing & Utilization, CIAE, Bhopal, India.

10162. **Product Name:** Bean Curd Strips [Trips] (Dou Kan Ssu).
Manufacturer's Name: American Food Co. (AFC).
Manufacturer's Address: 4738 Valley Blvd., Los Angeles, CA 90032. Phone: 213-223-7738.
Date of Introduction: 1992. August.
Ingredients: Soy beans, water, calcium sulfate.
Wt/Vol., Packaging, Price: 6 oz vacuum pack. Retails for $1.29 (10/92, Oakland, California).
How Stored: Refrigerated.
New Product–Documentation: Product with Label purchased in Chinatown, Oakland, California. 1992. Oct. 28. 7 by 4 inches. Vacuum pack. Red, dark green, black, white, and light green. "Vacuum fresh. 100% natural. High in protein. High in calcium. No cholesterol." UPC indicia.

Talk with Jackson Wu, owner. 1992. Nov. 4. This product was introduced about 3 months ago. The word Trips on the label was a misspelling; it should have been Strips. The company moved to its present location, into a building that it now owns, on 1 Nov. 1990. They will be launching 20 new soy products next month and 100 new products during the next year.

10163. **Product Name:** Dragon Organic Tofu.
Manufacturer's Name: Flatland Hydroponics (Marketer-Distributor).
Manufacturer's Address: 504 North Commercial, P.O. Box 478, Thomasboro, IL 61878. Phone: 217-643-7808.
Date of Introduction: 1992. August.
Wt/Vol., Packaging, Price: Packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.
How Stored: Refrigerated.
New Product–Documentation: Talk with Stacy Wolski of Flatland Hydroponics. 1992. Oct. 28. The company, which grows alfalfa and mung bean sprouts, began marketing this tofu on 15 Aug. 1992. It is packaged in Cincinnati, Ohio.

10164. GEM Cultures. 1992. Catalog [Mail order]. 30301 Sherwood Rd., Fort Bragg, CA 95437. 9 p. Aug. [4 ref]

A vegetarian source of Vitamin B-12, this versatile food can be fried in the

© Copyright Soyinfo Center 2013

traditional manner or baked, broiled, steamed, or barbequed. Easily cultured without special equipment, homemade tempeh tastes and smells wonderful, slices better, and costs far less than commercial tempeh.

"The tempeh mold, *Rhizopus oligosporus,* that binds the cooked soybeans together into a sliceable cake, is grown on an entirely vegetable medium. Mature spores are harvested and combined with sterile organic rice flour for easy and accurate measuring on every batch. Complete culture directions and recipes are included. One pound of dry soybeans prepared as directed will make 1 3/4 pounds of tempeh. Preparation time–less than 2 hours. Incubation time–about 24 hours at 85 F (32 C). Kept cool and dry, PTS has at least a 6-month shell life at full potency.

"Kit PTS, 11gm, three 1-pound batches (makes 5+ pounds). $2.50 each.

"Big PTS, 35 gm, ten 1-pound batches (makes 18 pounds). $4.00 each.

"Half Kilo PTS, 500 gm, packaged in bulk. $35.00 each.

"Full Kilo PTS, 1000 gm, packaged in bulk. $65.00 each.

"Powdered Natto Starter: Called *Natto* in Japan and *Thua-nao* in Thailand this cultured soyfood has a strong, somewhat persistent, unique flavor. The bacteria, *Bacillus subtilis* var *natto,* that culture the cooked soybeans make a sticky, viscous polymer during the 6-12 hours of incubation which creates whispy threads evident when the cultured soybeans are pulled apart. A good source of protein, this robust soyfood adds zest to any grain or noodle dish, soup or sandwich. A little goes a long way, so what is not intended for use in a day or two may be easily frozen.

"Natto Starter Kit: This packet contains complete culture directions, recipes, and enough spore to start 3 recipes of natto, each making 5 cups or 1½ pounds.

"Bulk Natto Starter: A concentrated spore preparation, this vial has sufficient spore to start 48 pounds of dry soybeans. Prepared according to the included directions it will therefore make about 86 pounds of natto.

"Natto Starter Kit: Makes 4½ pounds. $2.50.

"Commercial Natto Starter: Makes 86 pounds. $10.00."

Also: Amazake, miso, shoyu, and tamari starters from Japan. Five types of *tane koji* (koji starter) imported from Japan. Commercial miso and shoyu koji spore packets. Organic light rice koji. Natural salts for curding tofu: Natural nigari, Terra Alba calcium sulfate. Self-renewing cultures: Kombucha tea fungus. Fresh sourdough. Seed miso. Fresh fil mjolk, fresh viili, fresh kefir curds. Cookbooks with culture. Sea vegetables from the Mendocino Sea Vegetable Co. Kitchen culture items. Address: Fort Bragg, California. Phone: 707-964-2922.

10165. **Product Name:** Pita Melts (Whole Grain Pita Bread with a Filling) [Vegetable Cheesesteak {Made with Seitan}, Chili Dog {Tofu Hot Dog with Mushrooms & Onions}].
Manufacturer's Name: Health Is Wealth, Inc.
Manufacturer's Address: Sykes Lane, Williamstown, NJ 08094. Phone: 609-728-1998.
Date of Introduction: 1992. August.
How Stored: Frozen.
New Product–Documentation: Spot, with color photo of label, in Vegetarian Times. 1992. Aug. p. 83. The product comes with either of 3 fillings. "Just pop the low-fat frozen meals in the mic or cook conventionally."

10166. Hermann, Mindy. 1992. Soy healthy: A humble bean earns its begging rights. *American Health.* Aug.
• ***Summary:*** "Several population studies suggest that daily consumption of soybean products may decrease cancer risk and offer other health benefits as well... Researchers have found that people who eat soybeans and soy products (such as tofu) have a reduced risk of colon and rectal cancer, compared with those who consume no soy... Other studies have linked soybean consumption to a reduced breast cancer risk. Laboratory and animal studies have found that isoflavones, chemicals abundant in soybeans, may prevent the hormone estrogen from binding to cells and stimulating breast tumor growth." Address: R.D., New York.

10167. Krizmanic, Judy. 1992. Savvy new soyfoods. *Vegetarian Times.* Aug. p. 82-83.
• ***Summary:*** Highlights, with color photos, Living Lightly non-dairy soy ice cream from Turtle Mountain, Toffle (eggless tofu waffle) from Dae Han, Tofutti Better than Cream Cheese, Westsoy Lite Non Dairy Creamer, Pita Melts from Health in Wealth, Meatless Tofu Steaks from White Wave, Ken & Robert's Veggie Pockets.

"Soy much to learn. Want to learn more about soy? Send a self-addressed, stamped, business envelope to the Soyfoods Center..."

10168. McSweeney, Daniel. 1992. 10th Annual Whole Foods Consumer Survey: Getting to know your customers. A profile of an aging and affluent consumer emerges from the survey. *Whole Foods.* Aug. p. 32-34, 36, 38, 43-44.
• ***Summary:*** A table titled "Food purchases" (p. 43) shows the percentage of respondents who purchased a type of product at a natural foods during the past 12 months, in descending order of popularity (also shows percentages for 1991 and 1990): Tofu 52%. Soy milk 42%. Tamari 38%. Soy sauce 29%. Miso 28%. Tempeh 25%. Cheese substitute 19%. Sea vegetables 17%. Note: The sample size is not given.

10169. Morinaga Nutritional Foods, Inc. 1992. Dear Mori-Nu: Last Thanksgiving I tried your wonderful pumpkin pie recipe for the first time... (Ad). *Health Foods Business* (*Elizabeth, New Jersey*). Aug. p. 27.
• ***Summary:*** This full-page color ad continues: "I still can't believe that a dessert this good can be cholesterol free and

© Copyright Soyinfo Center 2013

so low in saturated fat (the Bad kind). I hope that you give out the recipe again this year so that everyone... Sincerely Suzanne Newsome, Sherman Oaks, California."

In the center of the ad is a large horizontal photo of the tofu pumpkin pie, surrounded by pumpkins and vegetables and one package of Mori-Nu Silken Firm Tofu. The recipe for "No cholesterol pumpkin pie" is given. Address: 2150 W. 190th St., Suite 110, Torrance, CA 90504.

10170. **Product Name:** Tofu Tempeh Burger, Tofu Vegies Burger.
Manufacturer's Name: Nutrisoy Pty. Ltd.
Manufacturer's Address: 255 Forest Road, Arncliffe 2205, NSW, Australia.
Date of Introduction: 1992. August.
Ingredients: Organic soybean (non genetically modified), water, soy sauce, sunflower oil, spices, natural nigari (magnesium chloride), culture (*Rhizopus oligosporus*).
Wt/Vol., Packaging, Price: 200 gm.
How Stored: Refrigerated.
New Product–Documentation: Label and letter (e-mail) from Tony Wondal of Nutrisoy. 2005. April 26. He started making and selling these two products in Aug. 1992. Note: He invented this interesting Tofu Tempeh Burger.

10171. Roussel, A.M.; Ravel, A.; Faure, P.; Alary, J.; Favier, A. 1992. Tofu consumption: Effects on plasma lipids in rats. *J. of Food Science* 57(4):903-05, 912. July/Aug. [23 ref]
• ***Summary:*** Rats on the tofu diet had very low cholesterol levels and an acceptable ratio of HDL cholesterol to total cholesterol. Growth and amino acid profile were also adequate, but the bioavailability of trace elements decreased. Address: U.F.R. Pharmacie, Université Joseph Fournier, Grenoble 38700 La Tronche, France.

10172. S.G. 1992. Sampling with a twist. *Inc.* (*Boston, Massachusetts*). Aug. p. 80.
• ***Summary:*** "Product sampling is a time-honored, inexpensive way to get people to try something new. For about $100 a day, you can hire a demonstration company to set up a table in the supermarket and give samples to upwards of 500 prospects a day. Tofu maker Nasoya Foods, which uses recipes for its in-store demos, shares demonstration costs with the vendors of products used in the recipes. 'It makes it affordable to introduce tofu to a lot more people,' says John Paino, president of the $7-million Leominster, Massachusetts, company."

10173. **Product Name:** Heart's D'Lite Freeze Dried Powder (Fat-Free Cheese Alternative with Casein) [Cheddar, Monterey Jack, Jalapeno Jack, Mozzarella, Garlic-Herb].
Manufacturer's Name: Sharon's Finest (Product Developer-Marketer).
Manufacturer's Address: P.O. Box 5020, Santa Rosa, CA 95402-5020. Phone: 707-576-7050.
Date of Introduction: 1992. August.
Ingredients: Tofu, casein (milk protein), tapioca starch, salt, natural flavor, guar gum, citric acid.
Wt/Vol., Packaging, Price: 2 x 30 lb poly bags in corrugated shipping container.
How Stored: Refrigerated.
Nutrition: Per 1 oz.: Calories 88, protein 16 gm, carbohydrates 6 gm, fat less than 1 gm, cholesterol 0 mg, sodium 332 mg, calcium 273 mg.
New Product–Documentation: Leaflet sent by Patricia Smith from Natural Products Expo East. 1992. Dated Aug. 21. "Product Information." Gives detailed specifications on this "Freeze dried powdered Heart's D'Lite Cheese Alternative."

10174. **Product Name:** [Tofu (Plain), and Smoked Tofu].
Manufacturer's Name: Sojaprodukt.
Manufacturer's Address: 913 03 Drietoma 85, Slovakia. Phone: +42 31 99 283.
Date of Introduction: 1992. August.
New Product–Documentation: Letter from Jon Kessler of Twin Oaks Community Foods. 1996. July 5. He just returned from a trip to Slovakia and is sending an address for a tofu maker that he was unable to visit. He has the impression that they make silken tofu.

Soyfoods Center calls this company. 1996. July 16. But no one there speaks English. Talk with, then letter (fax) from Dominik Belko and Jan Lunter of Alfa Bio in Slovakia. 1996. July 16. This company, which started making tofu in mid-1995, is their competitor. It is run by a woman, Mrs. Alena Harustakova. They started producing soyfoods in August 1992. They presently make two products: Plain Tofu, and Smoked Tofu.

10175. *Sonoma Business* (*Sonoma, California*). 1992. City watch–Santa Rosa: With this kind of help, they'll soon develop tofu-based ribs. Aug. p. 24.
• ***Summary:*** "Sharon's Finest, a developer and merchandiser of tofu cheese alternatives, has just been adopted. The Davis Street company was the Service Corps of Retired Executives' top pick this year for its Adopt an Emerging Business Program. Some 55 companies had applied.

"Sponsors say the five-year-old company, which claims 700 percent growth over the past three years, best exemplified entrepreneurial achievement, potential for growth and community contributions. As the official adoptee, the company is expected to continue expanding as it benefits from a year's worth of guidance from Armstrong Image Group, Moss Adams, National Bank of the Redwoods and Bronson, Bronson & McKinnon.

"Founded in 1987, Sharon's Finest markets a variety of low-calorie, low-fat, cholesterol-free cheese products made from organically-grown tofu. They include TofuRella,

© Copyright Soyinfo Center 2013

Cottage Salad and Heart's D'Lite, a fat-free version of TofuRella. The cheese alternatives are similar in taste to regular cheese, says Richard Rose, president. 'When it's melted, many people prefer it to the real thing,' he says. 'It melts smoother.'

"Rose says his interest in dairy-free alternatives was sparked by his discovery in 1980 that he was allergic to dairy products. 'Being I was a vegetarian, that didn't leave me a lot to eat,' he says.

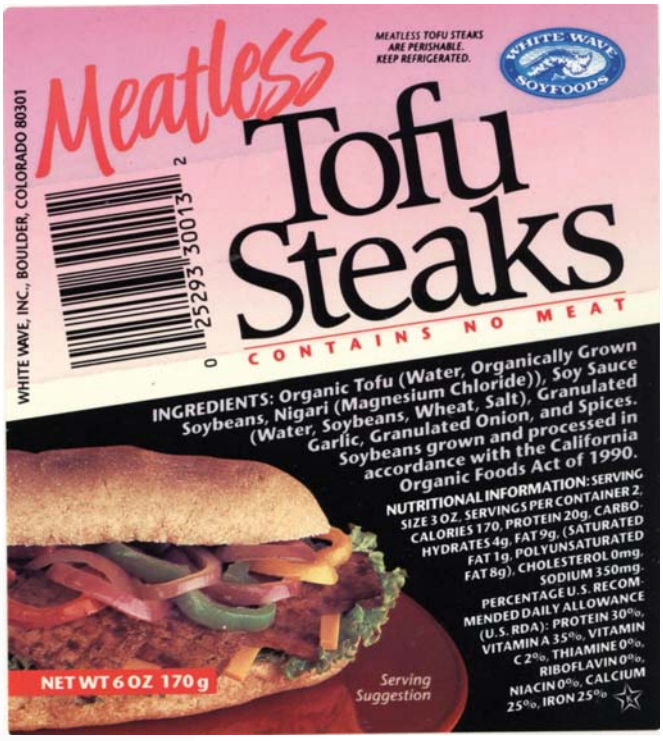
"To replace the cheese and yogurts he loved, Richard Rose and his former wife, Sharon, started experimenting with recipes. Their trials produced nearly 80 new soy- and tofu-based items including a chocolate mousse, ice creams and yogurts. In 1980 they opened a tofu business, ran it for seven years, and then founded Sharon's Finest...

"The company's product lines will soon expand. Several of its vegetable-based dairy alternatives are due to hit the shelves this year. Unlike the company's tofu dairy alternatives, which contain some milk protein, the new products are 100 percent nondairy."

A photo shows packages of TofuRella and Heart's D'Lite. Talk with Richard Rose. 1993. April 9. Richard now owns 100% of Sharon's Finest. He bought out Sharon's share after they were divorced in 1991-92. She worked at the company until Nov. 1992. She is now planning to start a health resort in Arizona. His cheese is packed by a company run by old Italians.

10176. Takai Seisaku-sho. 1992. [Takai systems catalog '93]. 1-1 Inari, Nonoichi-machi, Ishikawa-ken 921, Japan. 56 p. 30 cm. [Jap]
• ***Summary:*** Black-and-white photos show the company's many pieces of equipment and systems for manufacturing tofu and soymilk. The catalog is divided into 5 sections: 1. Transporting and soaking systems. 2. Soymilk production systems. 3. Curding and forming systems; Poached tofu systems. 4. Cooling systems; Hot-pack systems. 5. Deep frying systems. Address: Kanazawa, Ishikawa-ken, Japan. Phone: 0762-48-1355.

10177. **Product Name:** Meatless Tofu Steaks.
Manufacturer's Name: White Wave, Inc.
Manufacturer's Address: 6123 E. Arapahoe Rd., Boulder, CO 80303. Phone: 303-443-3470.
Date of Introduction: 1992. August.
Ingredients: Ingredients: Tofu (water, organically grown soybeans, nigari (magnesium chloride)), soy sauce (water, soybeans, wheat, salt), granulated garlic, granulated onion, and spices. Soybeans grown and processed in accordance with the California Organic Foods Act of 1990.
Wt/Vol., Packaging, Price: 6 oz (170 gm) vacuum pack.
How Stored: Refrigerated.
Nutrition: Per 3 oz.: Calories 170, protein 20 gm, carbohydrates 4 gm, fat 9 gm (saturated fat 1 gm, polyunsaturated fat 8 gm), cholesterol 0 mg, sodium 350 mg. Percentage U.S. Recommended Daily Allowance (U.S. RDA): Protein 30%, vitamin A 35%, calcium 25%, iron 25%.



New Product–Documentation: Vegetarian Times. 1992. Aug. p. 83. 'Meats' to meet. White Wave makes marinated Meatless Tofu Steaks. Label sent by Lon Stromnes of White Wave. 1993. Feb. 26. 4 by 4.75 inches. Self adhesive. Full color: Black, red, pink, and white. Photo shows a tofu steak between buns on a plate with trimmings of onions, green peppers, cheese, and lettuce. "Contains no meat." Leaflet (black and white, single sided, 28 cm) sent by White Wave. 1993. Feb. "Make mine meatless." Made with organic tofu.

10178. Castleman, Elisabeth Giacon. 1992. Tofu can be nutritious, simple part of diet. *Herald-Times-Reporter* (*Manitowoc, Wisconsin*). Sept. 2.
• ***Summary:*** Glenny and Jerry Franzen make tofu from organically grown soybeans at their company Bean Time Soyfoods, located between Chilton and Stockbridge in Wisconsin. A recipe for Tofu Liptauer spread is given.

10179. Fukushima, Rhoda. 1992. Fresno Tofu Co. New owners, old ways: Surpassed in volume, not quality. *Bee* (*Fresno, California*). Sept. 7.
• ***Summary:*** In June 1992 Terry Sasaki and his sister, Debbie Sasaki Diaz, took over the Fresno Tofu Co., a southwest Fresno mainstay since the late 1940s. They are the only employees. They make fresh tofu and agé (deep-fried tofu pouches). The company now has sales of $120,000/year.

10180. Stewart, Penelope. 1992. Re: Planning to start a tofu shop in Pamplona, Spain. Letter to William Shurtleff at Soyfoods Center, Sept. 7. 1 p. Handwritten. [Eng]
• ***Summary:*** Growing up in California her entire life, she took tofu and soy products for granted. She has just finished reading *The Book of Tofu,* by Shurtleff and Aoyagi. She would like to order a copy of *Tofu and Soymilk Production.* Address: Colite 23, bajo [or c/o Lite 23, bajo], Pamplona, Navarra, Spain.

10181. Wu, Olivia. 1992. If it's not junk, can it taste good? A panel of kids judges the 'Best of Processed Foods.' *Herald-Arlington Heights* (*Chicago, Illinois–Rolling Meadows Ed.*). Sept. 10. Food section. p. 1-2.
• ***Summary:*** Center for Science in the Public Interest (CSPI) has recently released a list titled "Best of the Processed Foods." All foods should contain no more than 30% of calories from fat, 10% of calories from saturated fat, etc. CSPI is a non-profit, consumer-advocacy group based in Washington, DC, best known for its efforts to reduce junk food advertising on Saturday morning TV. Soyfoods that were tasted included (1) Pizza: 1. Rice-Crust Soy Cheese. 2. Soypreme French Bread Garden Patch or WholeWheat Cheese Style. 3. Special Delivery Soya Kaas. 4. Tree Tavern Pizsoy. Tofu wieners: The kids did not like most of the tofu wieners.

Of all the many products tested, 3 of the top 5 ratings went to foods containing soy: 1. Rice-Crust Soy Cheese. 2. Special Delivery Soya Kaas. 5. Health Valley Beans & Wieners.

10182. Housman, Bob. 1992. Mainland Express now makes only 360 lb/week of tofu (Interview). *SoyaScan Notes.* Sept. 11. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Several years ago the FDA came into supermarkets and surrounding states and found that the temperature at which tofu was being stored was too warm. The supermarkets said that they could not keep the temperature in the refrigerated cases low enough, so virtually all dropped Mainland's tofu and switched to Mori-Nu, which is aseptically packaged. Hinoichi also sells a little tofu in the area. Mainland still has a large tofu factory but they use it only one day a week to make tofu.

Note: The above call was based on a talk with Jim Skiff of Minneapolis. 1992. July. Prof. William Breene at the University of Minnesota in St. Paul told him that Eastern Foods no longer makes tofu. Address: P.O. Box 405, Spring Park, Minnesota 55384. Phone: 612-471-8034.

10183. Petka, Tom. 1992. The casein industry and market (Interview). *SoyaScan Notes.* Sept. 14. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Casein became classified as a chemical and a non-dairy product in about 1948-49 by the Federal Trade Commission, at about the same time that price supports for dairy products began. At that time it was used almost exclusively for industrial applications (such as adhesives and sizings) rather than in foods. Today about 80% of the casein in America is used for foods–mainly imitation cheeses, whip toppings, and other imitation dairy products, plus medical and nutritional products prescribed by doctors. The remaining 20% is used for industrial purposes–mainly adhesives and sizings.

There are presently no companies in America that make casein; government price supports for milk price it out of the world market. The last U.S. manufacturer, Land O'Lakes, stopped in the 1970s. All casein used today in America is imported, mainly from New Zealand, Ireland, France and the Netherlands.

Note: If this outdated and misleading classification of casein as a non-dairy product could be changed, it would open up a huge market for soy protein products (isolates, soymilk, tofu), primarily in foods and beverages. Address: American Casein Co., 109 Elbow Lane, Burlington, New Jersey 08016. Phone: 609-387-3130.

10184. Roach, William. 1992. Re: Kyoto Food Corp. (Terre Haute, Indiana) would like to supply you with tofu. Letter to Richard Rose, Sharon's Finest, P.O. Box 1368, Santa Rosa, CA 95402, Sept. 17. 1 p. Typed, with signature on letterhead.
• ***Summary:*** "The New Orleans Food Ingredients Fair was an exciting event for all those who attended. We at Kyoto Food Corporation are especially excited about the possibilities for Kyoto Tofu to be used in a variety of Products.

"We want you to know that we are ready and willing to assist you in any way we can in the development and inclusion of Kyoto Tofu as a part of your product developments." Address: 1050 West 35th St., Terre Haute, Indiana 47802. Phone: 812-235-9505.

10185. D'Ambrosio, Michele. 1992. Tofu spread sold refrigerated in a shallow pottery crock in Spain (Interview). *SoyaScan Notes.* Sept. 22. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Michele was in Spain recently, in the town of Figueras, population 23,000, in Gerona province, of northeast Spain, in the eastern Pyrenees Mountains, 24 miles north of Gerona. There she saw a unique very simple tofu spread, seasoned only with thyme, sold refrigerated at the only health food store in the city. The store also sold a lot of breads. It was packed in a tan glazed shallow pottery dish/container, weighing about 6 ounces. She loved the spread and even took the little dish home with her. Note: This container is reminiscent of the way that Chinese fermented tofu has long been packed. Address: 6441-43 Haverford Rd., Philadelphia, Pennsylvania 19151. Phone: 215-474-8636.

© Copyright Soyinfo Center 2013

10186. Rose, Bruce. 1992. The Soy Plant was renamed Tofu International Ltd. in Feb. 1992. Joint venture with Zhenjiang Bean Factory, a Chinese tofu company near Shanghai (Interview). *SoyaScan Notes.* Sept. 25. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** In Nov. 1990 (after 2½ years of negotiations) Bruce Rose (not his company, Rosewood Products Inc.) signed a joint venture agreement with a big Chinese tofu manufacturer named Zhenjiang Bean Factory, located in Zhenjiang, China, about 130 miles west-northwest of Shanghai. The purpose of the company produced by the joint venture was to manufacture fresh (unpasteurized), traditional Chinese-style tofu and tofu products in Ann Arbor, Michigan, to be sold locally. Operating out of the plant at 738 Airport Blvd. in Ann Arbor, formerly owned by The Soy Plant, they started producing small amounts of tofu in February 1992 and at that time they renamed the company Tofu International Ltd. (TIL; It was formerly Rosewood Products Inc.). They formally started tofu production in July 1992. New products, all introduced in July 1992, include fried tofu, dofu-gan (2 types, very firm, not water packed), tofu chicken, and fresh soymilk.

The new company is operating out of the same factory as that formally occupied by The Soy Plant and Rosewood Products Inc., but with different equipment; and the tofu is made in a different way. In 1987 Rosewood Products Inc., a natural foods distributor (founded in 1980 by Bruce Rose, the president) purchased the Soy Plant's assets in bankruptcy court and invested a lot of money in new equipment. Rosewood had been distributing the Soy Plant's tofu for 6 years. For the next 5 years Rosewood was also a tofu manufacturer, making typically 5,000 lb/week (sometimes as much as 6,000 lb/week) of tofu, then production began to decrease as the competition grew more intense and as Bruce found he had too much to do trying to run both a distributing and a tofu manufacturing company. So he began to look for outside help in managing the tofu production operation. Rosewood Products Inc. still exists as the distributor of the tofu manufactured by TIL.

The Chinese are providing a team of skilled tofu production and management and production experts, equipment, and technology for making unique traditional Chinese tofu products. Presently, everyone in the plant is Chinese–they speak little or no English. Bruce does not want to compete with the "Big Boys" that sell aseptic or pasteurized tofu (Morinaga, etc.). Tofu production (especially in second generation products) has increased since the joint venture started and is now at about 3,000 lb/week–but most of this tofu is made into second generation products. Bruce has been to Zhenjiang once and visited their big factory which makes several hundred thousand kg/month of tofu.

In the near future, they plan to start making pressed tofu sheets, and Buddha's Chicken or Duck, which no other company in America is presently making. Address: Founder and President, Rosewood Products, Inc., 738 Airport Blvd., Suite 6, Ann Arbor, Michigan 48108. Phone: 734-665-2222.

10187. Burros, Marian. 1992. Cow's milk and children: A new no-no? *New York Times.* Sept. 30. p. C1, C6.
• ***Summary:*** "The Physicians Committee on Responsible Medicine, whose interests include both preventive medicine and alternatives to animal research, has declared war on that great American icon milk. 'Parents,' the committee said in a statement released in Boston yesterday, 'should be alerted to the potential risks to their children from cow's-milk products.' It added, 'Milk should not be required or recommended in Government guidelines.'

"The committee asserted yesterday that milk is an unhealthful food because it has too much fat, produces iron deficiency in infants, causes diabetes in children with the genetic predisposition to the disease and is responsible for colic, allergies and digestive problems."

"Suzanne Havala, a registered dietician from North Carolina, who was a co-author of the American Dietetic Association's position paper on vegetarian diets, supports the recommendations. 'After weaning, there is no need for milk of any sort in the diet in any species,' she said. Vegetarians get all the calcium they need from leafy vegetables, broccoli, tahini and tofu made with calcium sulfate." Address: Staff writer.

10188. Galloway, Gloria. 1992. Lifeless looking bean curd can soar to tasty heights. *Windsor Star* (*Essex County, Ontario, Canada*). Sept. 30.
• ***Summary:*** Jon Cloud runs two Toronto vegetarian restaurants and Soy City Foods, a soyfoods production and distribution company. Hugh McLean of Heatherton, Nova Scotia, near Antigonish, produces more tofu than anyone else in the Maritime provinces–just 180 to 220 kg per week–in a tiny 2x3 meter room at the back of his family's house.

A photo shows 2 packages of tofu; one, named To-Fu-De-Light, looks like a pudding. It is almond flavored and has Chinese characters written on the package. Address: The Canadian Press.

10189. **Product Name:** Amy's Vegetable Lasagna (With Tofu & Soy Cheese).
Manufacturer's Name: Amy's Kitchen Inc.
Manufacturer's Address: P.O. Box 449, Petaluma, CA 94953. Phone: 707-762-6194.
Date of Introduction: 1992. September.
Ingredients: *Organic cooked lasagna pasta (*organic whole wheat durum flour, *organic wheat flour, water), *organic tomato puree, *organic zucchini, *organic tofu, *organic spinach, filtered water, Mozzarella style soy cheese (fresh soy milk made from organic soy beans and filtered water, soy oil, caseinate, fresh tofu, salt, soy lecithin, natural

© Copyright Soyinfo Center 2013

flavor, natural vegetable gums), onions, *organic carrots, olive oil, sea salt, garlic, spices. * = Organically grown/ processed in accordance with the California Organic Foods Act of 1990.

Wt/Vol., Packaging, Price: 9.5 oz (269 gm) in paperboard box. Retails for $3.85.

How Stored: Frozen.

New Product–Documentation: Spot in Health Foods Business. 1992. Sept. p. 88. "Italian Meal." A black-and-white photo shows the front of the package, which says: "No cholesterol. Lactose free. With tofu & soy cheese. Organic vegetables and pasta.

Ad in Vegetarian Times. 1993. Jan. p. 20. "Something for everyone at Amy's." New ethnic favorites include "Tofu Vegetable Lasagna: Made with organic vegetables and tofu in a flavorful organic tomato sauce layered between organic pasta."

Product with Label purchased at Berkeley Natural Grocery Co. 1994. June 23. 6.5 by 5 by 1.5 inch paperboard box. Red, green, blue, yellow, and white. A color photo shows the lasagna on a white dish with a sprig of basil at one side. "No cholesterol. Lactose free. Organic vegetables, pasta & tofu. Microwave or regular oven."

2010 March 26. Same product purchased at Diablo Foods in Lafayette, California. 9.5 oz. Retails for $5.89. Round logo (white on green) in lower right of front panel. "No GMOs. No bioengineered ingredients." "Contains milk protein" (in the Mozzarella style soy cheese, in the form of casein–a milk-derived protein).

10190. *Berrydales Special Diet News* (*Barrydales Ltd., London*). 1992. Holland & Barrett & tofu cheese. Sept. p. 5. [1 ref]

• ***Summary:*** On 17 Sept. 1991 a child named Suraj Jalota, who suffered from a violent reaction to dairy products, ate a misleadingly labelled tofu cheese and died. The cheese contained casein, a dairy protein, but the front panel of the label stated "no animal fats," which could, and was, mistakenly interpreted to mean "no animal products."

According to a letter from Mr. M.D. Rose of Holland & Barrett, the retail store at which the product was purchased, before the child died, Holland & Barrett had already taken steps to delist this tofu cheese following complaints made by some of the store's vegan customers. They were ready to re-list a casein-free variety.

Talk with Richard Rose of Sharon's Finest. 1993. Feb. 9. This soy cheese product was made by JRJ Trading. The owners of JRJ told him that the grandmother of the child who died, while taking care of him, gave him some of the cheese and then left him for several minutes. When she returned, the boy was unconscious and blue. JRJ's understanding, based on an autopsy, is that the child "aspirated" the cheese, choked on it, and suffocated to death–rather than dying from the casein in the cheese. This is why JRJ was not prosecuted. Even though the company's name was never mentioned, the incident devastated both the product and the company. Who would want to buy a food that kills children? Address: 5 Lawn Road, London NW3 2XS, England. Phone: 071-722-2866. Fax 071-722-7685.

10191. **Product Name:** Vegetable Ravioli–With Whole Grains [With Carrot Pasta, With Spinach Pasta].

Manufacturer's Name: D'Alterio Foods.
Manufacturer's Address: 109-18 Northern Blvd., Corona, NY 11368. Phone: 718-779-4770..
Date of Introduction: 1992. September.
Ingredients: Ravioli: Certified organically grown: Whole wheat durum flour, whole wheat flour, carrots, spinach, tomatoes, tofu, cooked wild rice, cooked brown rice, onion, peas, corn, canola oil, garlic, oat bran, wheat bran, amaranth. Natural: Filtered water, sea salt, herbs and spices.
Wt/Vol., Packaging, Price: 9 oz. (225 gm) tray.
How Stored: Frozen.
New Product–Documentation: Article in *Food Business* (Chicago, Illinois–Putman). 1992. Nov. 23. "Pasta with a heart–D'Alterio Vegetable Ravioli." "Joe D'Alterio's story is reminiscent of ConAgra chairman Mike Harper's bout with heart problems that inspired Healthy Choice. Five years ago, D'Alterio, owner of D'Alterio Pasta, Corona, New York, had chest pains. Instead of going through with the angiogram his doctor recommended, D'Alterio decided to follow Dr. Dean Ornish's program and, as he recalls, 'I went cold turkey.' He changed his diet, eliminated meat, meditated and exercised.

"Two months later, he said, his cholesterol level dropped from 250 to 165. 'My doctor couldn't believe it,' said D'Alterio.

"The results inspired D'Alterio to begin work on a line of vegetarian pastas. Today, the line he has come up with tastes as good as–if not better than–its meat-laden counterparts.

"D'Alterio's whole-wheat pastas are vegetarian as well as organic. Spinach ravioli, for instance, includes carrots, tomatoes, tofu, rice, onions, peas, corn, oat bran, wheat bran and amaranth. End result: Fifteen percent of calories from fat, 9.3 grams of protein, 7.5 grams of fiber and no cholesterol."

A large photo shows the label, with ingredients.

Ad (half page, color) in Vegetarian Times. 1993. April. p. 21. "Premium Organic Pastas: Delicious tasting pasta has never been this healthy before." Shows a large color photo of the label, with a 50¢ off coupon. Send it to: P.O. Box 880145, El Paso, Texas 88588-0145 (The address of a coupon redemption company).

Talk with Alberto Olavarria of D'Alterio. 1998. Feb. 17. In 1992 the company began making meatless products for the natural foods industry. Their first product that contained soy (tofu) was the Vegetable Ravioli, introduced in Sept. 1992 at the Natural Products Expo in Baltimore, Maryland. In 1992 they started making products for the natural foods industry, started using organic ingredients, and introduced their first two meatless products: Vegetable Ravioli (with tofu), and Vegetable Tortellini (without soy). Also in 1992 they introduced Beef Cannelloni and Beef Empanada (like a meat turnover); both contained a mixture of TVP and beef. The company started in 1972. The Healthy Cuisine name started to be used in about 1995. The address has always been 109-18 Northern Blvd., Corona, New York 11368. Phone: 718-779-4770.

10192. Morinaga Nutritional Foods, Inc. 1992. Pure tofu. Perfect package (Ad). *Vegetarian Times.* Sept. p. 24.
• ***Summary:*** This full page color ad (see next page) shows a burning candle, sunflowers and other flowers, and two packages of Mori-Nu Silken Tofu, one opened, surrounded by nuts, vegetables, and soybeans in a wooden bowl.

The caption at the bottom reads: "Mori-Nu is silken style tofu in a revolutionary package, which keeps Mori-Nu Tofu fresh and ready to eat for months, without irradiation, preservatives or refrigeration. Mori-Nu's smooth texture and soft, firm and extra-firm varieties make it perfect for any recipe. Write and we'll send you our favorites.

"From appetizers to desserts, Mori-Nu Tofu is part of your lifestyle."

This ad also ran in May 1993 (p. 25). And in Health Foods Business, Sept. 1992 (p. 11). And in Natural Foods Merchandiser, Feb. 1993 (p. 79). Address: 2050 W. 190th St., Suite 110, Torrance, California 90504.

10193. *SoyaCow Newsletter* (*Ottawa, Canada*). 1992. Better tofu using SoyaCow. 1(3):1. July/Sept.
• ***Summary:*** "Indovita Proteins (P) Ltd., Ghaziabad, India, recently received a SoyaCow for testing and installed it in the Delhi area to explore its economic viability for a soya milk cottage industry. They reported that the tofu make using the soya milk from the SoyaCow is superior in flavour and texture to that which they are producing on their Taiwanese equipment.

"Indovita is now in the process of upgrading their existing equipment with SoyaCow technology. This confirms the belief that better quality soya milk makes better quality products–tofu, yogurt, drinks, frozen desserts, etc."

10194. **Product Name:** Soymage Grated Parmesan Cheese Alternative (100% Dairy Free–Casein Free). Renamed Vegan Parmesan by March 2000.
Manufacturer's Name: Soyco Foods. Div. of Galaxy Cheese Co.
Manufacturer's Address: 2441 Viscount Row, Orlando, FL 32809. Phone: 1-800-441-9419.
Date of Introduction: 1992. September.
Ingredients: Soy beverage (filtered water, organic tofu), textured vegetable protein, rice starch, canola oil, sea salt, citric acid, calcium phosphate, natural flavors, riboflavin.
Wt/Vol., Packaging, Price: Bottle.
New Product–Documentation: Soymage Natural Products Expo East–September 11-13. Soyco, Soymage, Lite 'n' Less (Leaflet). "Parmesan: Grated style regular (3.5 oz), fat-free (5 lb or 25 lb).

Spot in Vegetarian Times. 1995. March. p. 14. "Cheese to please vegans." Shows a color photo of the bottle and

front panel of the label.

Talk with technical representative from Galaxy. 1995. July 31. They buy organic tofu powder from a company in Minnesota, then mix it with filtered water to make "soy beverage."

Leaflet (8½ by 11 inch, color) sent by Patricia Smith from Natural Products Expo West. 2000. March. "Build your healthy cheese section with Soyco Foods: The Dairy Free Vegan Alternative." A color photo shows a jar of Vegan Parmesan. On the rear, the ingredients are given.

10195. **Product Name:** Tofu Chips.
Manufacturer's Name: Tofu Chips, Inc. A subsidiary of Back Porch Brands, Inc. Renamed Oregon Chips, Inc. by Sept. 1992.
Manufacturer's Address: P.O. Box 282, Ashland, OR 97520. Phone: 503-734-7696.
Date of Introduction: 1992. September.
Wt/Vol., Packaging, Price: 6.2 oz. bag.
New Product–Documentation: Leaflet sent by Patricia Smith from Natural Products Expo East. 1992. Sept. 11-13. Baltimore, Maryland. "Oregon Chip's all-natural Tofu Chips."

10196. Whalen, Greg. 1992. Recent developments at Wildwood Natural Foods (Interview). *SoyaScan Notes.* Oct. 22. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Greg worked for Wildwood for 9 years, most recently as production manager. About 2 months ago Wildwood decided to stop making tofu in Fairfax, and make all of it in Santa Cruz. First, it was found that consolidation in a more modern facility would reduce production costs, and second, the city of Fairfax was putting many restrictions on Wildwood's attempts to expand there. Wildwood-Fairfax sold their tofu-making equipment to Arnold Whitridge, a long-time macrobiotic who has a lot of money from his family (trust fund) and owns a commercial organic farm in Trinity County, northern California, near Weaverville. Greg is thinking of moving there to start a tofu shop using the former Wildwood equipment.

Wildwood is still making their second generation tofu products in Fairfax but they are thinking of moving at least part of their operation to Richmond, perhaps into a vacated Safeway supermarket building. They may keep the present location to use for distribution.

Greg is a close friend of Paul Orbuch. Wildwood's board of directors relieved Paul of his duties as president; he is still on the board but no longer works at Wildwood on a daily basis. Paul was very upset and is now suing the board. Paul and Jeremiah Ridenour are not on good terms. The board also hired a "hot-shot numbers man" to come in and streamline Wildwood's operations. That man fired Greg without any advance notice or compensation for his 9 years of work. Greg feels that Paul would never have treated him in that way. Devo, the general manager who had an ulcer, had to quit shortly after Paul was asked to leave because of the pressure of the situation. Other employees are not very happy with the new situation. Address: Formerly of Wildwood Natural Foods, Fairfax, California.

10197. *SoyaScan Notes.* 1992. The best sources of calcium from plant sources in terms of actual calcium absorption (Overview). Oct. 25. Compiled by Dr. Michael Klaper.
• ***Summary:*** The amount of calcium absorbed from each food source is 25 mg or more. 1 cup of milk provides 66.7 mg of absorbed calcium. The amount of food is ½ cup boiled unless otherwise noted:

Tofu, raw, firm, curded with calcium sulfate or calcium chloride 80.0 mg of calcium.
Sesame seeds (1 oz.) 58.4 mg.
Turnip greens 51.1 mg.
Broccoli 46.8 mg.
Chinese cabbage 42.5 mg.
Mustard greens 30.0 mg.
Small white beans 28.2 mg.
Kale 27.6 mg.

Note 1. The source of this information is Dr. Michael Klaper, a vegan physician, who compiled the numbers from various sources. He multiplied calcium content by bioavailability (expressed as a percentage).

Note 2. The average calcium content of various consistencies of tofu curded with calcium sulfate is as follows (each contains different amounts of water due to pressing): firm tofu–159 mg/100 gm; extra firm tofu–165 mg/100 gm; regular tofu–146 mg/100 gm. By contrast, tofu curded with nigari contains only about 45 mg/100 gm of calcium.

10198. Belleme, John; Belleme, Jan. 1992. Culinary Treasures of Japan: The art of making and using traditional Japanese foods. Garden City Park, New York: Avery Publishing Group Inc. xiv + 232 p. Illust. by Akiko Aoyagi. Index. 25 cm.
• ***Summary:*** Contents: Acknowledgments. Foreword. Preface. Map of Japan showing where 21 traditional foods sold by Mitoku are made. 1. Kuzu: The wonder root. 2. Mirin: Sweet rice wine. 3. founded by Oguri family in 1875, almost destroyed in Sept. 1959 by the fierce Ise-wan typhoon, "discovered" in 1982 by Akiyoshi Kazama of Mitoku. Now a macrobiotic staple.

For details on the uncondensed introduction to this book see Kushi (1992) "Introduction to *Culinary Treasures of Japan."* Though very interesting, it contains a number of factual errors and statements that leave the wrong impression. Address: Saluda, North Carolina.

10199. Haren, Chuck. 1992. Nicaragua. *Plenty Bulletin* (*Davis, California*) 8(3):1-2. Fall.
• ***Summary:*** "Nicaragua is one of several Central American countries from which Plenty has received letters requesting support for people learning how to use soybeans. In August Plenty provided technical support to Soynica, a group of women who are conducting an education, training and feeding program in Managua, the capital. Soynica is a non-profit development organization which was formed by a group of women who have voluntarily been promoting the use of soybean foods among low-income rural and urban families since 1980.

"Soynica became an officially registered organization in 1990. Women within the barrios of Managua have sought out support from Soynica in helping them to feed their children. Soynica responds by first helping the women organize themselves into working groups which support each other. A staff of 22 educators provide training for 450 pregnant and nursing mothers in the poorest barrios of Managua... Soynica, with the help of 145 volunteers, provides food for 24 'ollas communales' (community pots) which serve one meal five days each week to 450 pregnant and nursing mothers and 2,500 malnourished children. Soybeans are used in 80% of these meals (see photos below). Specifically, Soynica requested Plenty to help improve the processing methods they were using at the ollas communales, and to work with them in designing a funding proposal for a small soybean processing and marketing facility within Managua. From this facility Soynica intends to process and market a variety of soybean foods, then use the profits to help cover the costs of the social assistance programs they are carrying out in the barrios of Managua. While in Nicaragua I was able to demonstrate methods of processing soybeans which improved the milk and tofu yields the women could achieve when preparing meals at the ollas communales. I also worked with the administrators of Soynica programs, Luci Morren and Casta Calderon, in writing a proposal for a Soybean Processing, Marketing and Training Center.

"I wish to thank John and Carlotte Gabriel of Nevada City, California for bringing the commendable work of Soynica to our attention, and for their vital assistance."

A photo shows many people watching as Soynica volunteers prepare soymilk or tofu.

10200. Jung, Betty. 1992. The Kopan cookbook: Vegetarian recipes from a Tibetan monastery. San Francisco, California: Chronicle Books. 119 p. *
• ***Summary:*** The book takes its name from the Kopan CKD, a Tibetan Buddhist center just outside of Kathmandu, Nepal.

10201. **Product Name:** [Tofu and Apple Syrup Cake, Tofu–Cheese and Vegetables Cake].
Manufacturer's Name: La Sojeria, S.C.
Manufacturer's Address: Carretera de Vic Km. 30, 08180 Moia (near Barcelona), Spain. Phone: (93) 830 1123.
Date of Introduction: 1992. October.
Wt/Vol., Packaging, Price: In aluminum trays and vacuum packed in plastic.
New Product–Documentation: Letter from Javier Arocena of Zuaitzo, Spain. 1992. Dec. 14. He knows of three other soyfoods manufacturers in Spain: Natur-Soy, Vegetalia, and La Sojeria, all near Barcelona.

Form filled out by Laura Cami and Mario Rimoldi of La Sojeria. 1993. Feb. 13. Their company introduced these products in Oct. 1992. They now make about 160 lb/month of each product. These 2 varieties of cakes are sold in aluminum trays and vacuum packed in plastic.

10202. Yamaguchi, Yuzo. 1992. An age-old Asian food heads west. *Economic World* (*New York*). Oct. p. 34-35.
• ***Summary:*** Morinaga sells about 10 million 10.5 oz packs of Mori-Nu tofu across America. "In August, New York's Protein Foods Inc., a supplier of traditional water-packed tofu, rolled out a thick-fried vegetable tofu with sauce that's packaged for microwave cooking, and a line of tofu cakes...

"Tofu still has a long way to go to be accepted, even desired, by Americans in general. Mr. Kumoda at Morinaga Nutritional Foods recalls that thieves pillaging grocery stores during the Los Angeles rioting left the tofu untouched. 'Tofu has to become the kind of food that can be stolen,' he says."

10203. Paolucci, Danny. 1992. Work with Swan Foods Corp. in Miami, Florida. The sad story of Robert Brooks and Mary Pung, founders of Swan Foods (Interview). *SoyaScan Notes.* Nov. 5. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Danny grew up in Miami. He became a vegetarian in 1970 at age 18, and soon began to buy 10-pound bags of soybeans, which he pressure cooked. "They made me feel great." He went to practice Rinzai Zen with Sasaki roshi in Los Angeles at Cimarron Zen Center, the city center for lay practitioners at 2505 South Cimarron St., Los Angeles, California 90018. It is the mother temple for all Sasaki roshi's centers nationwide (Mt. Baldy monastery; Ithaca, New York; Jemez hot springs, New Mexico, etc.). There he was the head cook (*tenzo*) for 18 months during 1972-74. He cooked for an average of 10 people/day and he served many recipes (such as soyburgers) based on cooked whole soybeans. He also made his first batch of tofu (curded with lemon juice) while tenzo; he learned from a recipe

© Copyright Soyinfo Center 2013

in *The Soybean Cookbook* (a blue book) by Dorothea Van Gundy Jones. When he served the tofu to Sasaki roshi, the roshi said "Not so good; it's sour." One person at Cimarron who wanted to start a tofu company as a Zen Center business was Gentei (Sandy Stewart); but he couldn't do it because the Japanese had a tight grip on the market.

After leaving Mt. Baldy, Danny returned to his home town of Miami. He worked for a while in the produce section of one of the chain grocery stores; he needed money. The idea of starting a tofu company stayed in his mind. In late 1977, when he heard that Robert Brooks and Mary Pung had been running Swan Foods for about 1 year in Miami, he went over and said he would like to work for them. He soon became their production manager–despite his complete lack of experience. Robert would pay the employees using fistfuls and huge rolls of cash. Later Danny found out that Robert was dealing drugs. The business was not making money because no one was marketing the products, and there were far too many products. Also many of the products (including refreshing teas) spoiled very quickly due to a junky old refrigeration system that was not strong enough; even after it was replaced, the new system could not prevent widespread spoilage. Basically, they lost money every day on almost every product they made. Nobody in the company knew what they were doing; no one was "steering the ship." Mary was working on a cookbook, that was never published. Mary and Robert were both doing a lot of new product R&D, and playing with a clam-jaw-type vacuum packager. One worker, Jimmy Wilks, was an original partner. He invested $50,000 of his inheritance in the business and it was quickly all gone; his family never forgave him. Actually he left before Swan Foods went bankrupt because of an accident in the plant. One day, while he was working near the pressure cooker, the top blew off and he was covered with scalding-hot soy slurry. His coworkers dumped him into the cooling tank, where the water cooled him off. His burns were not that bad; he left the company more out of shock than for medical reasons. He later worked at Popeye's Health Foods in Miami.

Danny was hired just after Wilks left to manage the plant. Danny's stepfather, Marias, who is a financial analyst, was thinking of buying Swan Foods as it was near bankruptcy. Robert Brooks wanted $100,000 for the company. Marias went over their books and found that they lost something like $200,000 during the brief life of the business. Marias and Danny waited until Swan Foods went out of business. Danny bought all equipment that had not been sold. He also cleaned out the office, and kept any interesting documents–which he still has. Robert bought a moped and moved into Coconut Grove (Danny does not know whether or not Mary was with him), rented a room somewhere, and just buzzed around. "He was really wacked out." He may have had big debts and was hiding from his debtors. Danny still has a file on Swan Foods. He may still have some product sheets and recipes.

Danny thinks that Robert and Mary were never married. Mary (who was about age 23 in 1977) got pregnant, but Robert didn't want the baby, and wouldn't marry her. It was a boy who they named Osland (perhaps spelled Aslan, Ausland or Auslan). They were Premmies, and devotees of Guru Maraji. Dick McIntyre of Swan Gardens was also a Premmie and is still an active devotee in Miami. Five years ago Mary contacted Danny. 3-4 years ago she was a down-and-out alcoholic living in shelters for the homeless–completely destitute. She was probably arrested in Miami many times for prostitution and drugs. What a tragedy. Danny has no idea how to reach her, but he thinks she still lives in the greater Miami area.

After Swan Foods went under, Danny, financed by Marias, started Sunshine Soy Company, Inc. (see separate interview). Address: 2219 S.W. 59th Ave., Miami, Florida 33155. Phone: 305-266-0830.

10204. Paolucci, Danny. 1992. Sunshine Soy Company Inc. and the tofu market in Miami, Florida (Interview). *SoyaScan Notes.* Nov. 5. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** After Swan Foods went out of business in Dec. 1978 Danny's stepfather, Marias, who was a financial analyst and a numbers man, didn't think it was a good idea to invest in another tofu company. He wanted to see what happened. So he waited for 18 months, during which time Richard McIntyre and Bob Heartsong set up tofu companies in Miami (Swan Gardens, and Bob & Toni's Tofu Works, respectively). Danny and the Heartsongs (Bob & Toni) had earlier tried to raise money to go into business together, but it didn't work out–since they wanted to give him only 5-10% of the ownership. So they returned the money they had raised to the investors and went their separate ways. Danny opened Sunshine Soy Company Inc. in Coral Gables, financed by Marias, in June 1980. So there were now 3 tofu companies in the greater Miami area.

McIntyre and Heartsong each set up a companies down in the low-rent produce section of Miami–10-15 miles away from Sunshine Soy. McIntyre was fairly innovative and took the idea of vacuum packaging tofu to new heights by having his bags printed and having dividers for each pack in his cases which made the tofu look very neat. That gave him the edge on the market, which won him Tree of Life as a distributor. Danny got a lot of the GNC (General Nutrition Corp.) stores; they both got chain store accounts. In the interim McIntyre hired Leasa, an Asian-American business, to distribute his tofu; they distribute Oriental foods to the chain stores. Danny heard that Leasa and McIntyre paid the chain store buyers $5,000 each to carry their tofu. He ended up with 3 of the major chains. Soon McIntyre was the largest tofu producer in Miami. Heartsong picked up the leftover accounts.

Sunshine Soy closed in March 1983 for various reasons:

© Copyright Soyinfo Center 2013

(1) The company's lease was up and the landlord wanted to increase the rent dramatically. (2) McIntyre was the leading tofu maker in the area and hard to compete with. (3) Interest rates were at about 18%. Marias said that Sunshine Soy was not even making a 10% return on investment, so he withdrew his support. Danny was living in the back of the shop, paying himself $200/week and working 18 hour days with 8 employees. He was burned out and he had lost a total of about $100,000 over the 3 years. So he went to work as an electrician–a trade he knew. He is now doing well as an electrician. He is still actively involved with Rinzai Zen meditation, and he has a public zendo in his home. Chico and Carol Wagner of Yaupon Soyfoods in Elgin, Texas (started July 1979) and James and Diana Muhs of Ashland Soy Works in Ashland, Oregon (started Oct. 1981) have also long been a Zen students of Sasaki roshi. Danny goes to his zendo on Mount Baldy for Rohatsu sesshin each December. Address: 2219 S.W. 59th Ave., Miami, Florida 33155. Phone: 305-266-0830.

10205. Shestakov, Vladimir. 1992. The Ecoville Project in Russia: Interest in ecology, humane sustainable culture, vegetarianism, and soyfoods in St. Petersburg (Interview). *SoyaScan Notes.* Nov. 9. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Vladimir (nickname "Vlodia"), a Russian biologist who speaks excellent English, phoned during a visit with John Robbins at EarthSave. He is working to start rural based ecological village/community, an education and resource center in St. Petersburg including a vegetarian restaurant and a soy dairy (to make tofu and soymilk) for the first 2 businesses of the project.

Vladimir visited The Farm in Tennessee and was impressed with their soy dairy. While in San Francisco, he is staying at the Center for Citizen Initiatives, run by Sharon Tennison (3268 Sacramento St., San Francisco, California 94115. Phone: 415-346-1875). One of their three main programs is titled "Feed Yourself."

A 1-page leaflet titled "Ecoville Russia: Project Description" sent by the Context Institute (a non-profit, founded in 1979, near Seattle) in Washington state adds: "The Ecoville Project began in Sept. 1991 at an international gathering of specialists in sustainable community development hosted by Gaia Trust, Denmark, and Context Institute, USA. The group decided to support the proposal of the Russian delegate, Vladimir Shestakov, for the creation of an ecological village near St. Petersburg. Such a model could show how Russia and the other republics of the Soviet Union might rebuild their societies in a way that is sustainable and sensitive to the environment...

"Gaia Trust has provided start up funding to assist the project. A western team traveled to St. Petersburg in April 1992 to do a seminar on the above areas and to help the Russians develop team-building skills...

"Diane Gilman, is coordinating the Project from the West...

"Please contact Diane Gilman, the Western Coordinator at Context Institute for more information. Mail: PO Box 11470, Bainbridge Island, WA 98110 USA. Tel: (206) 842-0216."

Follow-up talk with Diane Gilman. 1992. Dec. 6. A new vegetarian society has been active in St. Petersburg since Jan. 1992. She and her husband, Robert, an architect, know Cynthia and Albert Bates at The Farm in Tennessee. Address: Russian Ecoville International Coordinator, P.O. Box 644, St. Petersburg 191180, Russia. Phone: +7 812-113-5896 (Phone and fax).

10206. Wells, Nasu. 1992. The sad story of Robert Brooks and Mary Pung, founders of Swan Foods Corp. in Miami, Florida (Interview). *SoyaScan Notes.* Nov. 9. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Nasu knew Robert and Mary "from way back when." Robert and Mary (who she thinks were never married) had a son (born in about 1978) with an unusual Sanskrit name [Aslan], which they later shortened to "Lenny" or "Lonnie." Mary was a very pure soul, and she and Robert were deeply involved with Guru Maraji and his Divine Light Mission.

After their breakup, Mary sued Robert for child support. Robert then married a woman named Tatiana, who was from Venezuela and was also a Premmie deeply involved with Guru Maraji. Mary disappeared for many years and nobody–not even Robert knew where she was. She sort of abandoned her son, so he lived with Robert and Tatiana and Tatiana's first child from another relationship. Robert and Tatiana had two children of their own, Alvin and Emerald–which Nasu delivered. Robert continued his involvement with Guru Maraji. Mary then came back into the picture again about 7 years ago and took her son Lenny/Lonnie back to live with her. Nasu saw her at the Natural Food Market; she had gained a lot of weight, apparently had a drug problem, seemed to be in bad shape financially, and was struggling to survive as a single mother with a child. Nasu has not seen Mary for about 5 years and is not aware that she ever married. Tatiana was diagnosed as having lymphatic cancer. She and Robert separated, and were in the process of a divorce apparently for two reasons: (1) Robert was quite a womanizer and a disloyal husband, and (2) He had a lot of business and financial problems. He had lost a lot of money and many people were after Robert for money, related to drugs. Robert went to live alone in one of the most expensive and exclusive hotels in Coconut Grove–where he committed suicide about 4 years ago. He had another close girlfriend at the time. Robert would not give Tatiana any money to help treat her cancer. Nasu does not think that Mary's child, Lenny/Lonnie, is living with Tatiana now. Tatiana still lives in the south Miami area, where she has an unlisted phone

© Copyright Soyinfo Center 2013

number; she shops at least once a week at Natural Food Market and works out at a gym named Bodyworks on Sunset Drive in Miami. She is still very active with the Divine Light Mission, which is now located in Orlando, Florida. One of her children goes to Pinecrest Elementary School (on Red Road and 104th in Miami) and the other goes to Gulliver Academy (on Red Road in Coral Gables).

Nasu watched as Robert went from being a fairly sound person to one who "went off the wall." It is a very sad story.

Update after talk with Nasu on 18 Nov. 1992. A friend of Nasu's has seen Mary recently and she is fine. Mary changed her name to Lea, went through a rehabilitation program 2 years ago, and went back to school. She married a man named Mark. Mary's son has been living with her parents for a long time. Address: Midwife, Coral Gables (Miami), Florida. Phone: 305-663-6745.

10207. Ober, A.F. 1992. Pepper... and salt: Legacy (poem). *Wall Street Journal.* Nov. 27. p. A9.
• ***Summary:*** "When hippies lost their chic cachet, / Fashion turned the other way. / Hair was cut and beards were shaved, / Hardly any songs were saved, / Sandals left and soap returned, / Fewer college buildings burned, / Herbal teas and homemade wine / Underwent a great decline. / Still one remnant I deplore: Tofu at my grocery store."

10208. **Product Name:** [Soja Harmoniques: Lentil Salad with Tofu].
Foreign Name: Soja Harmoniques: Salade de Lentilles au Tofu.
Manufacturer's Name: Biosoja.
Manufacturer's Address: 10 rue Lavoisier, F 68 000 Colmar, France. Phone: 89 74 53 74.
Date of Introduction: 1992. November.
Ingredients: Lentils 40%, tofu 30%, carrots, peas, peppercorns, water, vinegar, mustard, modified starch, salt, seasonings, sugar.
Wt/Vol., Packaging, Price: 280 gm. can.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: SoyaFoods. 1992. Autumn. p. 7. "A profile of Sojinal." See Table 2. "Biosoja retail food products." Canned ready meals with less than 300 calories.

Label sent by Heather Paine of SoyaFoods in London. 1993. Nov. 3.

10209. **Product Name:** Soymilk Powder (Regular, or Reduced Fat), Tofu Powder (Regular, or Reduced Fat), Soy/Whey Blend, Textured Soy Flour, Soy Flour (9% fat).
Manufacturer's Name: DMV USA. Div. of DMV, Inc.
Manufacturer's Address: 2340 Enterprise Ave., P.O. Box 1628, La Crosse, WI 54602-1628. Phone: 1-800-359-2345.
Date of Introduction: 1992. November.
Ingredients: Soy flour.
New Product–Documentation: Ad in '92 Soya Bluebook, p. 52. "Quality ingredients from soya. Chemical-free process. Kosher / Parve & organic available." Talk with Craig Albrecht, Technical Sales Manager at DMV USA. 1993. March 19. This company buys soy flour and makes all the above products from it. The line was introduced in the fall of 1992, before Craig arrived at the DMV. DMV is a Dutch-owned dairy cooperative with $4,000 to $5,000 million in sales worldwide. They have had a presence in the USA for about 3 years. DMV USA imports various caseinates and whip toppings, and also makes various dairy products such as nonfat dry milk, buttermilk, whole milk, whey, whey protein concentrate, cheese, imitation cheese, etc. They sell these products to foodservice organizations and the food industry. The soy products are still a minor part of their total business, but growing. Ed Pedrick came from Clofine to work for DMV.

Ad (full-page, black-and-white) in Soya Bluebook. 1993. Oct. "Soymilk Powder & Tofu Powder."

10210. Griffis, Gil; Wiedermann, Lars. 1992. Marketing food-quality soybeans in Japan: A manual on how to profit from the niche market in Japan for value-added soybeans. 5th ed. St. Louis, Missouri: United Soybean Board. 25 p. Nov. 28 cm.
• ***Summary:*** Contents: Introduction. Japan: Desired soybean characteristics, tofu (procedure for making tofu, desired soybean characteristics, color of hilum, seed size {the larger the better, preferably more than 20 grams/100 beans}, color of cotyledons, hull, composition, special notes, American interpretation), miso (same categories of information as tofu), natto (ditto; seed size: The smaller the better, with a maximum of 5.5 mm diameter. Round shape is preferred to oval in order to limit swelling during the soaking and boiling processes), food quality soybean varieties (name or code-name of 42 varieties, maturity zone, release year, used to make what soyfoods), distribution channels, marketing channels, protocol, pricing, organically-grown soybeans.

Taiwan: Introduction, list of 4 major buyers, users, and trade associations. Korea. Southeast Asia. United States.

Appendix I. Distribution systems for soybeans used for food in Japan: Tofu (23,000 tofu shops of which 13,000 are members of the Tofu Association), natto, miso.

Appendix II. Food soybean imports by country of origin, 1984-1991. USA is the largest supplier (845,000 tonnes in 1991), followed by China (279,000), then Canada (28,000). Total imports, which have stayed about constant during this period, were 1,152,000 tonnes in 1991.

Appendix III. Distribution by usage of soybeans used for food–1991, direct use only in tonnes (metric tons). Tofu: 607,000 tonnes total, of which 562,000 come from the USA and Canada, 25,000 from China, and 40,000 from Japan. Up 2% from 1989.

Miso: 171,000 tonnes total, of which 38,000 come from the USA and Canada, 121,000 from China, and 12,000 from

© Copyright Soyinfo Center 2013

Japan. Up 0.5% from 1989.

Natto: 147,000 tonnes total, of which 87,000 come from the USA and Canada, 50,000 from China, and 10,000 from Japan. Up 9% from 1989.

Other: 39,000 tonnes total, of which 20,000 come from the USA and Canada, none from China, and 19,000 from Japan. Total food use of 964,000 tons is up 2% from 1989. Source: Japanese trade newspapers and trade associations. These figures do not include a estimated 492,000 tonnes of soybeans used indirectly (in the form of defatted soybean meal) for soy sauce, 222,000 tonnes used for soy protein, and 20,000 tonnes for other indirect uses.

Appendix IV. Directory of direct importers of food-quality soybeans for each is given: Home office in Japan. Representative office in the U.S.

Appendix V. Traders of food-quality soybeans (3 companies).

Appendix VI. Soy food organizations in Japan (tofu, miso, soymilk, packaged tofu, natto). Appendix VII. Helpful contacts.

Food quality soybean varieties (with maturity group / zone, and year released; table, p. 5): Chico (00, 1983), Grande (0, 1976), Proto (0, 1989), Minnatto (0, 1989), NattoKing [Nattoking] (I, 1988), Disoy (I, 1967), Vinton (I, 1978), Vinton 81 (I, 1981), King Natto (I, 1985), Kato (I, 1989), Magna (II, 1967), Prize (II, 1967), Marion (II, 1976), LS201 (II, 1989), Provar (II, 1969), Beeson (II, 1969), Kanrich (III, 1956), Kim (III, 1956), LS301 (III, 1989), Verde (III, 1967), IL2 (III, 1989; from Illinois), Hawk (III, ?), Emerald (IV, 1975), Vance (V, 1986), Camp (V, 1989), Hartz 936X (VI, 1981), Hartz 914 (VI, 1989), Hartz 922 (VI 1989), Merrimax (?, 1986).

Note: This report was originally published in Sept. 1989, mainly for use by the American Soybean Association office in Tokyo. Address: 1. Division Director for Asia; 2. Country Director for Japan. Both: American Soybean Assoc.

10211. Lewis, Stephen. 1992. Hitting the tofu trail. *Gourmet* 52:172, 175-76. Nov.
• ***Summary:*** The author and his wife dined at and described many tofu restaurants in Japan, including Sasanoyuki in Tokyo, Gesshotei in Kanazawa, and Okutan in Kyoto. Address: Santa Fe, New Mexico.

10212. **Product Name:** [Biosoja Line "S"–Tofu Nature {Long Life–Aseptically Packaged}].
Foreign Name: Biosoja Ligne "S"–Tofu Nature.
Manufacturer's Name: Sojinal. Affiliate of Coopérative Agricole de Colmar (CAC) (Marketer).
Manufacturer's Address: 8 rue Merxheim, 68500 Issenheim, France. Phone: 89 74 53 53.
Date of Introduction: 1992. November.
Wt/Vol., Packaging, Price: 250 gm Aseptic carton. Retails for 14 French francs at supermarkets.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: Spot in SoyaFoods. 1992. Autumn. p. 5. "Long-life tofu launched in France." A photo (p. 7) shows the package.

10213. **Product Name:** [Biosoja Soja Delight: Tomato Sauce, Tofu Sausage with Lentils, Rice Salad with Tofu].
Foreign Name: Biosoja Soja Delight.
Manufacturer's Name: Sojinal. Affiliate of Coopérative Agricole de Colmar (CAC) (Marketer).
Manufacturer's Address: 8 rue Merxheim, 68500 Issenheim, France. Phone: 89 74 53 53.
Date of Introduction: 1992. November.
Wt/Vol., Packaging, Price: 300 gm can.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: SoyaFoods. 1992. Autumn. p. 7. "A profile of Sojinal." See Table 2. "Biosoja retail food products." Canned ready meals with less than 300 calories.

10214. *SoyaFoods* (*ASA, Europe*). 1992. Milk and tofu from sunflower seed. 3(3):3. Autumn.
• ***Summary:*** Researchers at the Department of Cereal Science and Food Technology of North Dakota State University have used sunflower seed meal to produce a milk similar to soya milk, from which tofu can be made. They have also developed a sunflower seed protein isolate.

10215. *SoyaFoods* (*ASA, Europe*). 1992. A profile of Sojinal. 3(3):6-7. Autumn.
• ***Summary:*** The author visited the Sojinal factory where she talked with Mr. Rochet (Director General) and Eric Dubs (Export Manager). "Sojinal is based at Issenheim in Alsace (in eastern France near the German border), where much of France's soyabean crop is grown. Employing just over 20 people (only 6 on the production side) the office, factory and laboratories, which overlook beautiful Alsatian countryside, cover some 5 hectares. Ownership is split between a farming cooperative (65%) and 3 companies (18% Sofiproteol, 9% Unigrain and 8% Lavaur)...

"A recent survey of French consumers showed that 18% know about tonyu but only 1% regularly drink it at least once a week...

"Sojinal processes about 4,000 tonnes of soyabeans per year... Sojinal's product range falls into two areas: ingredients for the food industry and final retail products. Ingredients for the food sector are manufactured at Issenheim, but most of the retail products are produced elsewhere for Sojinal using Sojinal ingredients and recipes.

"Ingredients for the food industry include: hulled soya beans, fibre, tofu, soya pulp (okara), concentrated tofu, tonyu, soyapaste, and spray-dried soya powder [dried soymilk]. Applications are summarized in Table 1.

"A wide variety of products are produced for supermarkets (Ligne S) and health food outlets (Formoja).

© Copyright Soyinfo Center 2013

Sojinal retail food products are sold under the Biosoja name and include soya drinks and desserts, ready meals made from tofu, chocolate bars, vegetable soya patés and sauces and dressings (Table 2)...

"Sojinal's soyamilk is already No. 1 in Spain."

A photo shows the company's plant and offices.

10216. Tofu Shop (The). 1992. The Tofu Shop Delicatessen (Ad). *Northcoast Holidays* (*Regional Visitor Publications, Eureka, California*)**.** Nov.

• ***Summary:*** A small ad (2½ by 3½ inches). Graphics: Across the top are bells ringing on a black background with a snowflake between each. In the lower left is an illustration of the front of the Deli.

"Pumpkin tofu pie! Try this non-dairy alternative. Delicious, cholesterol-free and baked in a wholewheat crust. Small 6 oz. $1.55. Large 9" (special order) $5.95.

"Not 'n Natural Tofu Turkey dinners! Served at our deli beginning Sunday, Nov. 15, includes hot slice of tofu turkey, stuffing, gravy, cranberry sauce & salad. $5.25.

Hours: Mon-Sat 8-8. Sun 11-6. Address: 768 18th St., Arcata, California. Phone: 822-7409.

10217. **Product Name:** Tofu, Okara (Fresh, or Dry), Soysage, Okara Burgers.
Manufacturer's Name: Wesner's Tofu Farm.
Manufacturer's Address: West 14505 Coulee Hite Rd., Spokane, WA 99204. Phone: 509-467-7253.
Date of Introduction: 1992. November.
New Product–Documentation: Talk with Roberta Wesner, co-owner. 1992. Nov. 17. She and her husband, Bruce, who are Seventh-day Adventists, started selling these products on 11 Nov. 1992. They sell about 100 lb/week.

10218. McReynolds, Thomas. 1992. Low-fat and defatted tofu, and other new developments at Morinaga (Interview). *SoyaScan Notes.* Dec. 2. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Dr. Kenji Mizoguchi (Manager, Product Development Section, Food R&D Lab.) at Morinaga's central research laboratory in Tokyo, Japan, has been able to remove the fat from soymilk in order to make a 1% tofu (it contains 1% fat by weight) or a non-fat tofu. Tom has recently tasted the 1% fat tofu and thought it was excellent. Morinaga is planning to introduce this product in 1993 and Tom feels it will soon become the company's best-selling product.

Currently Mori-Nu firm silken tofu is the company's best-seller, followed by the extra-firm, with the soft in last place.

Tom is just putting the finishing touches on a new book to be titled *Tofu and You.* It was written by a lady who had a long-term weight problem until she married a Chinese man and started eating tofu. It is not a vegetarian book. It comes with a 28-day diet plan, and the book will accompany cases of Mori-Nu tofu. Morinaga hopes to launch the book together with their new low-fat tofu.

The company will also be publishing a newsletter to be sent to dietitians; Mark Messina is working with Tom on this project. The first edition should be out in Jan. 1993 and will be about 4 pages in length. A tentative title is *Soya Nutrition Update.* Tom would like it to be a professional rather than a commercial publication.

Update. Dec. 10. Morinaga's lab in Tokyo can remove the fat from soymilk using a mechanical process, but the process now involves the addition of isolated soy protein. The plant for doing this must remain in Japan. Address: Marketing Consultant, Morinaga Nutritional Foods, 2050 W. 190th St., Suite 110, Torrance, California 90504. Phone: 213-728-4325.

10219. Diamond, Florence Barbier. 1992. The life and work of Holton W. "Rex" Diamond. Part I. Early life and work to 1942 (Interview). *SoyaScan Notes.* Dec. 3. Conducted by William Shurtleff of Soyfoods Center. Followed by confirmation from a brief chronology of his life and 20 pounds of documents sent by Mrs. Diamond.

• ***Summary:*** Florence is the widow of Rex Diamond. Holton Whittier "Rex" Diamond was born on 15 June 1915 in Lucasville, Scioto county, Ohio, the son of Walter V. Diamond and Ethel Pigg. He was a very bright boy, chosen valedictorian of his Valley High School class and, as valedictorian, he presented "The Seniors' Farewell Message" at the graduation ceremony on 10 May 1932. After entering Wilmington College in Wilmington, Ohio, on a scholarship, the school newspaper noted that he added "to a brilliant scholastic record" by "being the first freshman to make a perfect grade in the state-wide English examination. Diamond also holds national, state, and county scholarship awards in Latin, French, chemistry and English." Another article reported that he was the first entering freshman in the 60 year history of the college to score 100% on the timed entrance exam. Upon graduation from Wilmington in 1936, he was awarded the Chi Beta Pi national honorary fraternity "annual Grand Chapter award [a gold key] for outstanding scholarship, research ability, and service to the school and chapter." While in college, he was president of the college YMCA, and a member of the varsity tennis team, college band, and yearbook staff. After graduating from Wilmington in 1936 (with a BSc and a BSc in Education degree, and a major in chemistry), he worked briefly as a surveyor in Scioto county, then for several years as a chemist for Mead Paper Co. in Chillicothe, Ohio until entering Drew Seminary Graduate School of Theology for the fall 1938–Spring 1939 school year. (This was a term in the Methodist ministry; he had been interested in YMCA and Gospel Team Work in college.) Then he moved to Detroit, lived at the YMCA in 1940, and worked as a chemist in the lab of a steel mill,

© Copyright Soyinfo Center 2013

then as a "soda jerk" in a soda fountain. He also attended the downtown Methodist church and often wrote poetry.

During 1942, while working in Detroit, he enrolled in night school at Wayne State University in Detroit, taking courses in advanced organic and high polymers, dyes, biochemistry, and chemical literature–but obtained no graduate degrees. He pursued these graduate studies until 1945. Continued. Address: 1112 Pawnee Trail #2, Georgetown, Kentucky 40324. Phone: 502-863-5055.

10220. Diamond, Florence Barbier. 1992. The life and work of Holton W. "Rex" Diamond. Part II. Work at Ford Motor Co. and Delsoy Products Inc., 1942-1946 (Interview). *SoyaScan Notes.* Dec. 3. Conducted by William Shurtleff of Soyfoods Center. Followed by confirmation from a brief chronology of his life and 20 pounds of documents sent by Mrs. Diamond.

• ***Summary:*** Continued: In about 1942, through Wayne State University, Rex Diamond obtained a position in the research department of the Ford Motor Company, in the synthetic rubber development department, supervising a project group on butadiene synthesis. More specifically, his work was at Greenfield Village on "dum-dum," a silencing material for cars. When the entire synthetic rubber research program at Ford was abandoned, in about June 1943, he was transferred to the George Washington Carver Laboratory.

He worked under Robert A. "Bob" Smith (the chief chemist and his boss) on soybean milk, cheese, ice cream and tofu, and developed a whipped topping (his first) based on soymilk. Of these products, the found the whipped topping (which was later commercialized by 3 different companies) to be by far the most interesting.

Rex continued to work at the Carver Laboratory throughout World War II–his first research concerned chlorophyll. On 9 May 1945 Diamond and Smith applied (as assignors to the Ford Motor Co.) for a U.S. patent (No. 2,476,358) titled "Soluble compound of chlorophyll and synthesis thereof." The patent was issued on 19 July 1949.

One day in 1945 a man named Herbert Marshall Taylor came into the Carver Laboratory with a soybean product that would whip–but it wasn't very good and you could not rely upon it to whip every time or to whip the same way. Florence is not sure where Mr. Taylor got this product. [Note: Compare this version of events concerning Mr. Taylor and soy-based whip topping with that told by Robert A. Smith in May 1979.] Several days later, Rex analyzed the product and went to work on developing an improved and reliable whipped topping. He recorded the results of his work [starting on 24 March 1945] in his notebooks, which are now at the Henry Ford Museum at Dearborn. Prior to this time, nobody at the Carver Lab. had done research on a whipped topping. Rex discovered at some point, while working at the Carver Lab., that mono- and diglycerides played a critical role in whip toppings. Taylor was using a typical "bakery shortening" as a key ingredient in his whipped topping. It contained mono- and diglycerides, but their amounts were not carefully controlled, since these levels were not critical in typical baking applications. Later (on 12 June 1955) in a paper titled "Vegetable Fat Whips for Bakery and Household Use," presented to the Institute for Food Technologists, he stated: "The use of special vegetable shortening, which contain not only hydrogenated vegetable oil but also one or more surface active materials quite common in the topping business. It is well to remember in this connection that most of these shortenings are made for some other use, they may introduce variations in the properties of the topping emulsions. A shortening containing mono- and diglycerides may be controlled within tolerances which are adequate for its use in baked goods but not for its use in toppings." Rex felt he had solved Taylor's problem and made an important discovery related to non-dairy whipped toppings.

Florence has the impression that Mr. Taylor was a very outgoing person who inadvertently sometimes got into trouble; he did not have bad intentions, but was sometimes misguided. He was a big spender when he had the money; later he felt he had been cheated by Delsoy Products and the owners of Delsoy felt they had been cheated by him. Florence also recalls that Rex, not Bob Smith, did most of the research and development work on the soy-based whipped topping at the Carver Lab.

A photo shows the 12-member staff of the Carver Laboratory in 1945, including Rex Diamond, Clem Glotzhober, and Florence Barbier. Bob Smith was absent. A caption notes that here "Diamond did the [sic, his] first work in developing a whipped topping."

A W-2 form shows that during 1945 Holton W. Diamond (who lived at 1648 May Ave., Dearborn, Michigan) was employed by "Russell-Taylor Inc., 1951 E. Ferry Ave., Detroit 11, Michigan." [Note: Diamond was working on their whip topping]. His wages totaled $552.13 in 1945. A 1946 form shows he was paid wages $68.25 by Russell-Taylor in the first quarter of 1946.

At about the time World War II was over (Aug. 1945), Florence Barbier, a graduate of Stephens College (Columbia, Missouri) was transferred from the Rouge Chemical Laboratory (where she had worked during the war) to the Carver Laboratory. There she first met Rex–who interviewed her for the job. She ran analyses on the soymilk that they made there frequently, worked on the development of a fermented soymilk cheese (which was never very good), and made some tofu. Soymilk was made at the Carver Lab. in 100 gallon batches approximately 2 to 3 times a week. Alberta Hardy (who now lives in Lansing, Michigan) was one of the people who helped make the soymilk. Some of this soymilk was given to any woman in the Dearborn area (not just Ford employees) who could not tolerate cow's milk and who wanted to stop by and pick some up free of charge. It was also sent to the Henry Ford Hospital and to Henry

© Copyright Soyinfo Center 2013

Ford's Greenfield Village Schools where it was served free of charge at recess each morning and afternoon. It was also served to the students for their noon meal at the Clinton Inn in Greenfield Village. Florence recalls soymilk being served in this way when she was a high school student there in the mid-1930s. The soymilk was poured from a large metal container into glasses, which were placed in the hallways at recess times for anyone who wanted it. "Henry Ford wanted all the experimental work done at the Carver Lab. to be of benefit to the public. Even the inventions were to be made available to anyone who wanted them." Florence's father, A. Roy Barbier, had worked for Henry Ford as advertising manager for the Ford Motor Co. from 1924 to the autumn of 1941. Barbier worked closely with Edsel Ford and considered him an intelligent and very competent person–in fact one of the finest people he ever met. But Edsel was overshadowed by his famous father, Henry Ford. Barbier thought Edsel never received the credit he so richly deserved.

On 21 Feb. 1946 Rex Diamond applied (alone, and not as an assignor to the Ford Motor Co.) for a U.S. patent (No. 2,487,698) titled "Topping for salads, desserts, and similar products." The patent was issued on 8 Nov. 1949. The all-vegetable topping called for the use of about 1.5% soy bean protein, 25-35% hydrogenated soybean oil, etc.

Prior to the formation of Vegetable Products Corporation, Rex made many trips to try to procure a source of shortening (still in short supply after the war) to be used in the manufacture of the whipped topping he planned to make. On 28 Feb. 1946, on a flight to New York City, he wrote to Florence that on the plane he enjoyed "an apricot cobbler topped with what I am almost sure was Delsoy Topping"–a non-dairy whipped topping introduced in late 1943 and made by Bob Smith. (Note: Bob Smith left the Ford Motor Co. in Aug. 1945 to work full time with Delsoy Products.) While Rex was still employed at the Carver Laboratory, he did some part time evening and weekend work as a consultant for Delsoy Products, conducting experiments to try to improve Delsoy. On 13 June 1946, before he left Ford, he obtained a written release from Mr. E.C. McRae, of the Ford Motor Co. patent dept. stating: "Inasmuch as the Ford Motor Company is not in any way interested in the manufacture of soybean food products, we have no objection to your patenting any ideas you may have along this line." Again, Diamond was planning for his whipped topping.

In Aug. 1946 Rex started thinking seriously about and developing a business plan and finding sources of raw materials for starting a "soy bean dairy" to make whip topping, soy ice cream, soy cheese, and chocolate malted. With the help of attorney Arthur M. Smith, he wrote Mr. Adrian Joyce [of The Glidden Co.] on 16 Aug. 1946 to see if Joyce had any interest in his ideas and inventions. Continued. Address: 1112 Pawnee Trail #2, Georgetown, Kentucky 40324. Phone: 502-863-5055.

10221. Diamond, Florence Barbier. 1992. The life and work of Holton W. "Rex" Diamond. Part III. Work at Vegetable Protein Corporation, and American Maize Products Co., 1947-1955 (Interview). *SoyaScan Notes.* Dec. 3. Conducted by William Shurtleff of Soyfoods Center. Followed by confirmation from a brief chronology of his life and 8 pounds of documents sent by Mrs. Diamond.

• ***Summary:*** Continued: Rex left the Ford Motor Co. in about Nov. 1946, shortly before the Carver Laboratory was closed; his wages for 1946 were $3,313.20. On 14 Nov. 1946 he applied to the state of Michigan for unemployment compensation. Note: It appears from the above that the Carver Laboratory closed in late 1946.

After leaving the Ford Motor Co., Rex may have done a little more part-time work with Bob Smith at Delsoy Products. On 6 July 1945 Herbert Marshall Taylor, President of Delsoy Products, Inc., at the suggestion of Mr. Bob Smith, had given Rex 12 shares of their stock and invited him to work for them on a full-time basis. But both Rex and his father-in-law, A. Roy Barbier, felt terms offered by Delsoy for Rex's services were unacceptable. Mr. Barbier felt that Rex would never get a good deal from Bob Smith, and that influenced Rex's decision. Moreover, Rex's dream was to start his own company making the whipped topping that he had pioneered at Ford. So after a short time, he stopped working with Delsoy and began work on starting a company named Vegetable Products Corporation (VPC) to produce a whipped topping named Wonder Whip, which was similar to Delsoy. There were no hard feelings after this parting and Rex remained friends over the years with both Bob Smith and Herbert Marshall Taylor–though Taylor long remained bitter over his own split with Delsoy. Florence and Rex were married on 9 Aug. 1947 in Dearborn, and they lived in Dearborn for the next year.

Rex had plenty of good ideas but no money. With considerable help from Arthur M. Smith, his patent attorney, Rex found investors and on 26 Aug. 1947 he signed an agreement that established Vegetable Products Corporation to raise money in order to get his non-dairy whipped topping on the market. There were about 5 investors, who probably contributed equal amounts of capital, totaling about $10,000 to $20,000–a relatively small amount, leaving the business underfinanced. The investors were John J. Hamel Jr. (a friend of Arthur M. Smith), A. Roy Barbier (Florence's father), Robert Walker, Elmer Hitt, and Joe Higgason. Rex did not invest any capital. The corporation was headquartered in Birmingham, Michigan, which was where John Hamel, the president, had his office and lived. However Hamel didn't participate much in VPC. Rex was formally the corporation's treasurer, though he did almost all of the day-to-day work. It was about 2 months after this agreement was signed that VPC began to manufacture Wonder Whip at Bodker's Dairy in Detroit. [For another view of the events related to Delsoy, see interview with David and Harvey Whitehouse, Feb.

© Copyright Soyinfo Center 2013

1992.]

VPC started in the fall of 1947 inside of Chris Bodker's Dairy at 25440 Five Mile Road in Detroit, Michigan. The local dairy association did not know that Bodker was allowing a non-dairy product to be made inside his dairy. Florence's father, who was head of the advertising department for the Ford Motor Co., chose the name Wonder Whip and also designed the logo, which contained the words "Wonder Whip" inside a diamond. Chris Bodker wanted to distribute Wonder Whip (using his trucks) to his customers, but he was told by the local dairy association that if he distributed a non-dairy product, he would be "out of business." Shortly after their marriage, and after only 2-3 months of developmental work, VPC began producing Wonder Whip at Bodker's Dairy. It was distributed by Tabor Meat Distributing Co. VPC operated out of Bodker's for only 1-2 months, then Rex moved the business out to Saline, Michigan, and into the second floor of the old Henry Ford soybean extraction plant that had been purchased by the Hamel family's Valley Chemical Company in Oct. 1947 after Henry Ford's death and still had a solvent extraction plant that produced soybean meal and soy oil. As part of a written agreement, John Hamel let VPC use the second floor of the Saline building rent free. That included use of a little laboratory and of some stainless steel equipment that Henry Ford had previously used to make white soy paints using soy protein. Rex and Florence continued to live in Dearborn, driving to work each day in Saline; after several months, they moved to Saline, thus eliminating the long drive. By late 1947 or early 1948 VPC began to make (on the second floor) and continued to sell Wonder Whip, a liquid soy-based whipped topping, packaged in a small ½-pint cardboard container shaped like a truncated cone [the same shape as the containers for Delsoy and Rich's Whipped Topping, which were similar competing products]. They first distributed their product in a jeep and small trailer to the meat distributor in Detroit (owned by Mr. Tabor, a friend of Florence's father) who continued to distribute the product. In 1948 VPC had a booth at the Michigan State Fair, where 55,000 people tasted Wonder Whip. But Rex's company was undercapitalized, had weak distribution, and local competition from 2 other non-dairy whipped toppings which were improved by technical innovations.

One major competing product was Delsoy Super Whip (apparently launched in about 1947, perhaps the first such product in a pressurized can; it was later renamed Presto Whip). The second competing product was frozen Whip Topping, introduced in late 1945 by Bob Rich of Rich Products Corp. in Buffalo, New York. This was the first frozen whip topping. As its distribution expanded into Michigan, it severely hurt sales of Wonder Whip. In April 1949 Rex tried to expand into new non-dairy products with a soy ice cream, made from basically the same ingredients as his Wonder Whip, but VPC didn't have the funds to develop and launch such a new product, so the it was never sold. Delsoy in the pressurized can was a more serious competitor in the local area, but Rich's frozen Whip Topping was more of a threat in more distant markets and as it expanded into Michigan. VPC could not survive this competition from its weak position. Moreover Rex was not an experienced businessman. So the company was forced to cease operations on 26 March 1949, after less than 2 years in business.

In early April 1949 Bob Smith of Delsoy Products offered Rex a job any time he wanted it. Smith also expressed interest in acquiring Diamond's pending patent applications as well as the name of his company, which he thought was better than his own "Delsoy Products Inc."

In March 1949 Rex wrote several food corporations to see if they might be interested in manufacturing Wonder Whip and paying him a royalty. General Food Corp. in New York said they were not interested. Sadly, Rex was ahead of the market, for about 8 years later General Mills launched Dream Whip, and about 15 years later Whip 'n Chill, both similar products.

American Maize Products Co. in Whiting, Indiana, responded favorably, so Rex went to work as a chemist for them from the fall of 1949 to Nov. 1955, working closely with B.R. Taylor, Manager of Planning and Development. However they wanted a spray-dried product with a long shelf-life since they had no facilities for handling a refrigerated product. For the next 7 years, Rex worked closely with Nichols Engineering Company, but they were unable to successfully spray dry a high-fat vegetable cream in their very small Niro spray dryer. The same type of formulas could be easily spray dried in the next larger Niro unit. After sitting on the shelf for a while, the fat would seep out from each particle in the high-fat product causing the particles to clump together. During the summer of 1951 he studied food technology at Massachusetts Institute of Technology. On 30 March 1950 Rex applied for a patent titled "Powdered Topping and Method of Making Same" (No. 2,619,423) which was issued on 25 Nov. 1952. Then he changed the formula radically, abandoning the use of soy (and of all protein), and made a much better product whose key ingredient was methyl ethyl cellulose, used as a stabilizer. He and Eugene L. Powell applied for a patent (No. 2,863,653) on this product, titled "Salad and Dessert Topping" on 3 Dec. 1954. It was issued on 13 Jan. 1959, after Rex had assigned the rights to Rich Products Corp. upon his employment with that company in the fall of 1955. Rex did no further work with soy. When American Maize decided they were not in a position to exploit the new methyl ethyl cellulose process of making topping, Rex wanted to move on so he could be actively engaged in the commercial exploitation of this new process. Even though American Maize wanted him to sell the patent to a manufacturer and stay on with them, they parted on friendly terms, and American Maize transferred the rights to the patent to

© Copyright Soyinfo Center 2013

Rex before he left. Florence thinks that Rex, at his own suggestion, paid American Maize a small sum to cover the expenses of applying for the patent.

On 12 June 1955 Rex presented a 9-page paper with 9 slides on "Vegetable fats for bakery and household use" at the annual meeting of the Institute of Food Technologists. He noted that in the USA, either soy protein or non-fat milk solids was generally used as the protein dispersant. Continued. Address: 1112 Pawnee Trail #2, Georgetown, Kentucky 40324. Phone: 502-863-5055.

10222. Drosihn, Bernd. 1992. Re: Thanks for Christmas letter. Company is growing. Letter to William Shurtleff at Soyfoods Center, Dec. 11. 1 p. Typed, with signature.
• ***Summary:*** This letter to Joey, Akiko and Bill is from Aaron, Nora, Gabi and Bernd, each of whom signed it. Aaron is 4 weeks old. Nora is 3½ years old and. in the morning, she goes to Kindergarten where she is singing and talking a lot.

"Our company is growing and growing a lot, so that there is a lot to do. Yesterday Nora helped Bernd making tofu." Address: Willi Graf Str. 86, D-5350 Euskirchen-Kuchenheim, Germany.

10223. *SoyaScan Notes.* 1992. Dr. Edsel Ruddiman's work with soyfoods at the Ford Motor Co. (Overview). Dec. 13. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** The following is compiled mostly from interviews with Robert Boyer, but also from other published sources, as cited.

Henry Ford's three top soybean researchers during the late 1920s and the 1930s were Dr. Edsel Ruddiman (who started his soyfoods research with Ford in about 1928), Robert Allen Boyer (head of the laboratory studying industrial applications, who started his soybean research in 1931), and Bob Smith (who began work under Boyer in about 1931, then headed his own lab at Moir House from 1938-1942).

Dr. Edsel Ruddiman, a close boyhood pal and seat mate of Ford's at Scotch Settlement School, was also Ford's brother-in-law because he married Ford's sister. In 1893 Ford gave Ruddiman's first name, Edsel, to his only child (a son). Formerly dean of the School of Pharmacy at Vanderbilt University and an excellent scientist, he had started working at the Ford Motor Company in 1926. He had one lab in a building not far from Boyer's and another little lab in a building that had formerly been his home, in a beautiful, tranquil setting on one of the Twin Lakes. His primary job was to develop a milk to replace cow's milk. Ruddiman was the man who got Henry Ford interested in soyfoods. Ford soon became deeply interested in the fact that soyfoods had been used for thousands of years as a key source of high-quality, low-cost protein by millions of people in East Asia.

Henry Ford's interest in soyfoods began in the early 1930s and stemmed from the interest and work of Dr. Ruddiman. The two men's earliest soyfoods extravaganzas were the press luncheons and dinners that they developed to publicize the experimentation with soy. The first meatless menu, developed largely by Dr. Ruddiman, was served to 30 wary reporters at the Chicago Century of Progress Fair in Aug. 1934; two others were served prior to 1943. Each of the 15 courses consisted partially or wholly of soy. The following 15 dishes were served: Tomato juice seasoned with soybean sauce. Salted soybeans. Celery stuffed with soybean cheese. Purée of soybean. Soybean crackers. Soybean croquettes with tomato sauce. Buttered green soybeans. Pineapple ring with soybean cheese [tofu] and soybean dressing. Soybean bread with soybean butter. Apple pie (soybean crust). Cocoa with soybean milk. Soybean coffee. Assorted soybean cookies. Soybean cakes. Assorted soybean candy (Simonds 1938, p. 235; *Chicago Herald and Examiner* 1934. Aug. 24. p. 11). At similar luncheons served between Aug. 1934 and July 1935, soy ice cream was also served for dessert (Strother 1961).

Dr. Ruddiman also developed a soybean biscuit, which both Henry Ford and white rats apparently liked, yet one of Ford's secretaries described it with unabashed candor as "the vilest thing ever put into human mouths" (Lewis 1972).

During the 1930s in Greenfield Village, Dr. Ruddiman developed canned green soybeans (Bansei variety) and produced 590 cans in 1935 and 1,000 in 1936 (Simonds 1938).

Out of their work in developing soyfoods banquets during the mid-1930s, Ford and Dr. Ruddiman developed a 19-page soup-to-nuts booklet titled *Recipes for Soy Bean Foods,* one of the first of its kind in America. Published by the Edison Institute, it contained 58 soyfoods recipes including ones for breads, biscuits, cakes, cookies, salads, meat substitutes, soy bean milk, soy bean cheese [tofu], roasted soy beans [oil roasted soynuts], soy bean nut butter [soynut butter], and soy bean butter (made by mixing hydrogenated soy oil with salt, coloring matter and diacetyl to color and taste). Unfortunately this book was not widely distributed.

In August 1940 Ford hosted the annual ASA convention at Dearborn. Dr. Ruddiman presented a paper on "Possibilities of Soybean Milk." Dr. Ruddiman discontinued his work for the Ford Motor Co. in 1942.

In about 1941, when Dr. Ruddiman was almost 80 years old, his wife wanted him to retire. She spoke with Henry Ford about her wish and Ford responded quickly in a way that seemed to many who knew him to be quite out of character; he essentially destroyed Dr. Ruddiman's laboratory. Ruddiman was very bitter at Ford and at times he even cried. After a short time he quit. The Twin Lakes lab was closed in 1941 (R.A. Smith 1979, p. 25).

10224. Arocena, Javier. 1992. [Re: Recent developments at Zuaitzo]. Letter to William Shurtleff at Soyfoods Center,

Dec. 14. 2 p. Typed, with signature on letterhead. [Spa; eng+]

• ***Summary:*** In June 1988 he moved his company to Plaza Santa Maria, 01001 Vitoria-Gasteiz. He knows of three other soyfoods manufacturers in Spain: Natur-Soy, Vegetalia, and La Sojeria, all near Barcelona.

"I was a pioneer in the production of tofu and seitan in Spain but for the last 12 years I have kept on doing the same thing, working only at the family level, making little but doing it well.

"Now we are living in the country at Villanueva Tobera, 09214 Condado de Treviño (Burgos), Spain... about 25 km from Vitoria-Gasteiz.

"As of today, our plans are not to increase our work with tofu and tempeh derivatives, but rather to develop new products, above all the full gamut of fermented soy products... such as miso, tamari, natto, and amazake." But since he has difficulty understanding English, he would like to get Spanish-language publications. Address: Zuaitzo, Villanueva Tobera, 09214 Condado de Treviño (Burgos), Spain. Phone: 945/28 86 30.

10225. Christner, Deborah. 1992. Twin Oaks corners a two-state food market: Commune sell organic tofu to vegetarian, Chinese restaurants, groceries. *Times-Dispatch* (*Richmond, Virginia*). Dec. 14. p. E4.

• ***Summary:*** Twin Oaks Community Foods of Virginia makes tofu from organically grown soybeans. Twin Oaks has been in the organic business since March, 1991, when the community purchased Virginia Soyworks from its owner, Ken Scotton, for $10,000 plus $11,000 worth of equipment and inventory (mainly soybeans). At this time, Virginia Soyworks was making 700 pounds of organic tofu in two production days per week, using about 7 bushels of soybeans. Today Twin Oaks makes about 2,000 lb/week of tofu, plus 30-40 lb/week of tofu spreads; this requires about 25 bushels per week of soybeans.

At the time they bought Virginia Soyworks, Twin Oaks, which has been in existence as a communal living group since 1967, had one other communal enterprise that supported the residents–a hammock business that has now expanded to national and international markets. Twin Oaks inherited its North Carolina customers after Bean Mountain Natural Foods, an organic tofu producer [in Boone, then Weaverville, North Carolina], went out of business in 1992. Twin Oaks bought a hydraulic press from Bean Mountain, which allowed it to speed up production time and abandon the primitive lever press it has been using to press the soymilk out of the ground soybeans. A detailed description of the current tofu-making process is given. Twin Oaks is considering buying a vacuum packing machine. Kessler is developing a peanut flavored tofu.

One customer, Grace Place (owned by Michael King), is the oldest vegetarian restaurant in Richmond, Virginia. A photo shows Jon Kessler pressing tofu in a forming box. Address: Special correspondent.

10226. Soyfoods Assoc. of America. 1992. Soyfoods 2000: Merchandising soy products into the next century (Ad). *Natural Foods Merchandiser.* Dec. 16-page color special supplement, 8½ by 11 inches, inserted after p. 28.

• ***Summary:*** Contains full color ads by Morinaga Nutritional Foods, Inc. (Mori-Nu Tofu, Firm and Extra Firm), Lightlife Foods, Inc. (5 types of tempeh, Tempeh Burgers [Lemon Grill, American Grill, Barbecue Grill], Tofu Pups, Vegetarian Chili, Sloppy J, Foney Baloney, Fakin Bacon, Lean Links), Worthington Foods, Inc. (Natural Touch Okara Pattie, Garden Pattie, Dinner Entrée, Lentil Rice Loaf), Sovex Natural Foods, Inc. (Better Than Milk, Tofu Ice Cream [Vanilla or Strawberry], Good Shepherd Spelt, Millet-Rice Flakes, For Goodness Flakes!), Vitasoy (U.S.A.) Inc. (Light Vanilla, Original, and Cocoa soy drinks).

Contains black-and-white ads by White Wave, Inc. (Five Grain Tempeh, Meatless Tofu Steaks, Soya A Melt Soy Cheeses [Regular or Fat Free] and Singles, Lemon Broil Tempeh, Amaranth Tempeh, Teriyaki Burgers, Organic Tofu, Dairyless Non-Dairy Yogurts, Tempeh Burgers, Sea Veggie Tempeh, Meatless Healthy Franks, Snack'n Savory Tofu), Cemac Foods Corp. (Unbelievable brand Cheesecake; based on nonfat baker's cheese; contains no soy, no fat, no cholesterol), Solait International Ltd. (Solait Powdered Soy Beverage), Tofutti Brands, Inc. (Lite Lite Tofutti, Tofutti Cuties, Land of the Free [Non-dairy frozen desserts, free of fat and sugar, sweetened with fruit juice], Tofutti Egg Watchers, Better than Cream Cheese, Sour Supreme [Non-dairy sour cream], Premium Tofutti, Tofutti Soft Serve Mix), Sharon's Finest (TofuRella), American Natural Snacks (Soya Kaas), Great Eastern Sun (Miso Master brand misos), The Macrobiotic Wholesale Company, Turtle Island Foods, Inc. (Keep It Simple Stirfry–Diced Marinated Tempeh), Betsy's Tempeh (Tempeh), Quong Hop & Co. (The Soy Deli–9 Tofu Burgers, 3 Savory Baked Tofu, Pacific Tempeh, 3 Tempeh Burgers, 7 fresh water packed and vacuum packed tofu), MYCAL Group (natural dehulled soybean flakes).

Articles and sidebars include: "Welcome to the future: Soyfoods 2000." "Soyfoods Association names new executive director" (Virginia Messina, whose photo is shown). "Soyfoods Association mission statement." "The modern evolution of soyfoods," by Michael Whiteman-Jones and William Shurtleff (Shurtleff's photo is shown). "Unraveling the soyfoods merchandising mystery," by Michael Whiteman-Jones. "Research shows soyfoods may help prevent cancer," by Mark Messina, PhD (whose photo is shown). "Key reasons to buy soy: Environmental, nutritional, economic."

This attractive insert was coordinated by Franke Lampe and edited by Lisa Turner, both of NFM.

10227. Rubenstein, Dennis. 1992. Tofu is now sold by Chinese-Indians in Calcutta (Interview). *SoyaScan Notes.* Dec. 17. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Dennis, a vegetarian who helps with soup kitchens in San Francisco, was in Calcutta, India from March to September 1992. He saw two different locations where Chinese (who were Indian citizens or residents) were selling tofu. They were selling the tofu at the side of the street near the Tiretta Bazaar. They started to sell their tofu at about 7:30 A.M., at which time they had 20-30 ¼-lb cubes of firm tofu (with a slightly salty taste), and very soft, crumbly tofu in a plastic bag. The tofu was usually sold out by 9:00. The tofu was stacked on a wooden table. It was wrapped in a piece of newspaper before being sold to each buyer. Each cube sold for 4½ rupees; there were 29 rupees to the dollar. Dennis was not able to see where this tofu was made. Address: San Francisco.

10228. Vaidya, Achutananda. 1992. Re: Pioneering and making tofu and other soyfoods in Nepal. Letter to William Shurtleff at Soyfoods Center, Dec. 26. 9 p.
• ***Summary:*** "I started making tofu in 1974. I did not have any connection with my uncle in starting my tofu company, however I did have a chance to see him make tofu at his residence in Kathmandu, and from that time I got the idea in my mind to make tofu myself. I learned the details of the process in Nepal from Mr. Akifumi Nakamura of Kobe, Japan, a member of the Japan Overseas Cooperation Volunteers (JOCV), who worked at the Central Food Research Laboratory in Kathmandu, which was also my office in 1974. I worked together with him as a counterpart for two years learning how to make tofu. During his stay there I learned wholeheartedly the process of making tofu. I learned from him that this food product called "Bhatmas-ko-paneer" in Nepali is known as "tofu" in Japan. Vita-Tofu is the brand-name of my tofu. This tofu is not packaged. It is sold in the form of rectangular cakes out of water-filled cans or bowls because most of the local vegetable shops do not have refrigerators. Even to this day sale of tofu is difficult during the hot summer months because of lack of refrigeration in food retail stores. At the start, for the first 4-5 years, I delivered my tofu from door to door because even at that time the people of Kathmandu did not know about tofu. They did not want to buy it because they did not know how to cook it.

"From July 1979 to March 1980 I was invited to Japan for 9 months training at the Akita Prefecture Brewing Laboratory. During that time I also learned in detail the processes for making soy sauce, miso, and soyamilk. During that period I also got a chance to read *The Book of Tofu, The Book of Miso, Miso Production,* and *The Book of Tempeh* all of which helped me very much. I still have all those books. In 1985 I was invited by the Rotarians of Akita-Aomori to return to Japan for 1 month (Jan/Feb. 1985) to receive further technical training in making tofu, miso, soy sauce, soyamilk, moyashi (sprouts), koji, fruit fermentations for wine, etc. Today I produce tofu, soy sauce, and miso in my small factory in Kathmandu. I currently have an electric wet grinder imported from Kyoto, Japan, in 1976. My other equipment (a basket pressing machine and tofu presses) were all made in Nepal by Nepalese mechanics."

Accompanying this letter are 27 color photos showing the following: Vita Tofu in Nepal. Making koji with his wife in Nepal. Studying and making tofu, miso, and shoyu in Japan in 1980 and 1985. His business card notes: "Food Technology in Brewing from Japan. Products & Suppliers: Tofu (Vita), Soyamilk (Vitabean milk), Soya Curd, Soya Sauce, & Miso."

His Curriculum Vitae notes that he was born on 28 Dec. 1947, resides at 9/374 Bhedasingh, Kathmandu, and is married. Address: Founder and owner, Nepal Soya Industries, 9/374 Bhedashing, Jamaguthi, Kathmandu, Nepal.

10229. *Star Bulletin* (*Honolulu, Hawaii*). 1992. Tainted tofu recalled. Dec. 30.
• ***Summary:*** "A tainted batch of tofu has resulted in a recall of tofu and soy milk products made by Mrs. Cheng's Soy Bean Products. The state Department of Health urges consumers not to eat the products, distributed only on the island of Oahu... A sample of the company's Nigiri [sic, Nigari] Tofu was found to be contaminated with *Listeria monocytogenes,* a bacteria [sic, bacterium] that can cause a rare but serious disease called Listeroisis [sic, listeriosis]."

Note: Listeriosis is a serious encephalitic disease that can be fatal in humans.

10230. **Product Name:** Tofu, Soft Tofu, Fried Tofu, Marinated Pressed Tofu, Soybean Milk.
Manufacturer's Name: China Tofu.
Manufacturer's Address: 3222 Whipple Rd., Union City, CA 94587. Phone: 510-489-7288.
Date of Introduction: 1992. December.
How Stored: Refrigerated.
New Product–Documentation: Talk with Helen Raymundo. 1996. May 28. She is a registered nurse who was born and raised in the Philippines, now who lives in Fremont, and saw a television program about this tofu company recently.

Talk with Diana Lin, wife of Bo Ming Lin, one of the two owners of the company. This company started making tofu and the other four products shown above in December 1992. The two owners are brothers, Po Hsiang Lin and Bo Ming Lin. Their products are sold at supermarkets throughout the San Francisco Bay Area, especially in San Jose, Oakland, and San Francisco. Letter (fax) from Dana Jacobi. 2000. March 13. "The best tofu I discovered on this trip comes from China Tofu in Hayward. It had texture and

© Copyright Soyinfo Center 2013

taste to die for." Talk with Steven Li of China Tofu. 2000. March 13. In Dec. 1999 the company moved to Hayward. The new address is: 1781 Addison Way, Hayward, California 94544. Phone: 510-782-9728.

10231. *Health Foods Business* (*Elizabeth, New Jersey*). 1992. Jan De Lyer, executive director of the Fresh Produce Council, and Yasuo Kumoda, general manager of Morinaga Nutritional Foods, Inc... (Photo with caption). Dec. p. 54.
• ***Summary:*** "... select the grand prize winner of the Hawaiian Vacation Getaway." A photo shows the two, standing on each side of a box on a table. In the background is a large banner that reads: "Mori-Nu Tofu: Cholesterol-Free Protein."

John Prestigiacomo was the winner of the contest. An employee of Woodman's grocery stores in Madison, Wisconsin, he will enjoy airfare and one week accommodations for two in Hawaii.

10232. *Health Foods Business* (*Elizabeth, New Jersey*). 1992. Time honored recipes with Mori-Nu Tofu. Dec. p. 54.
• ***Summary:*** "Morinaga Nutritional Foods, Inc. is offering shipper display units that hold two cases (48 packages) of Mori-Nu aseptically packaged tofu with a full-color Pumpkin Pie header as part of a multi-faceted marketing program featuring Mori-Nu Dairy-Free Pumpkin Pie as its focal point.

"The merchandising effort entitled 'Healthy New Traditions–Without Cholesterol,' is set to reach shoppers who want to enjoy the time-honored recipes but are looking for ways to reduce the amount of cholesterol and animal fat in their diet."

10233. **Product Name:** [Tofu].
Foreign Name: Tahoe–To-Fu.
Manufacturer's Name: Lin Tahoe B.V.
Manufacturer's Address: Landgraaf, Holland.
Date of Introduction: 1992. December.
Ingredients: Water, soybeans, coagulant E516.
Wt/Vol., Packaging, Price: 500 gm vacuum pack. Retails for DM 8.00.
How Stored: Refrigerated. Store at 5ºC.
Nutrition: Per 100 gm.: Calories 92, protein 11.2 gm, fat 5.1 gm, carbohydrate 0.3 gm.
New Product–Documentation: Label sent by Anthony Marrese. 1994. May. 3.5 by 6 inches. Blue, red, yellow, and white. The Chinese character for "Lin" is pronounced "rin" or "hayashi" in Japanese and means "a forest or a wood." Use by 2 Dec. 1992. Note that Heuschen-Scrouff, a large manufacturer of tofu and tempeh, is also located in Landgraaf.

10234. Morinaga Nutritional Foods, Inc. 1992. Seasons greetings: Christmas and New Year's card. 5800 South Eastern Ave., Suite 270, Los Angeles, CA 90040. 1 p. 15 x 11 cm.
• ***Summary:*** One the front of this card is a glossy color photo of a burning candle, sunflowers and other flowers, and two packages of Mori-Nu Silken Tofu, one opened, surrounded by nuts, vegetables, and soybeans in a wooden bowl.

On the rear is printed (with black in on white): "Seasons Greeting and Best Wishes for a Happy New Year. Morinaga Nutritional Foods, Inc." This card is signed, with a message, by several company employees. Address: Los Angeles, California.

10235. MYCAL Group (Nichii Company of America, Inc.). 1992. If anyone tells you to add water to your soy drink tell them they're all wet (Ad). *Whole Foods.* Dec. p. 13.
• ***Summary:*** "Can you believe it? There are reputable manufacturers going around saying that the best way to make light soy drink is to add water. We don't even want to think about what diluting soy drink with extra water would do to the taste.

"Obviously, they haven't heard about natural dehulled soybean flakes–the most natural way to make light soy drink (and tofu) there is. Without adding any chemicals, preservatives, or anything unnatural, natural dehulled soybean flakes are:

"Made fresh daily. Lower in fats (lipids). Lower in calories. Lower in percentage of calories derived from fat. Higher in protein. Longer-lasting on your shelf. Better for the environment. Ecologically sound." Address: 23440 Hawthorne Blvd., Suite 140, Torrance, California 90505. Phone: 213-791-0010.

10236. Ontario Soybean Growers' Marketing Board. 1992. Annual report. Box 1199, Chatham, ONT N7M 5L8, Canada. 24 p. 28 cm.
• ***Summary:*** This is a report for the year 1992. Contents: Mission statement. Chairman's message (Larry Miehls). Secretary manager's message (Fred Brandenburg, Dec. 1992). OSGMB summary of major activities in 1992. Auditor's report and balance sheet. 1992 soybean & research funding (incl. breeding of soybeans for tofu and natto). Ontario soybeans–supply and demand, 1989-1992. Soybeans: Area, production and farm value, by county, 1991, with provincial totals [including county and district totals], 1986-1991. Ontario marketings, 1989-91. Ontario soybeans: Production, crushings, imports, exports. 1991 crop year marketing by county. Ontario soybean exports by destination in metric tons. Soybean meal: Canadian imports and exports. Soybean oil: Canadian imports and exports. Quality of the 1991 soybean crop by county (in terms of mean oil content and mean protein content). Cash prices for Ontario soybeans (1990-1992). Ontario basis values (cents over futures). Weekly adjusted producer basis. Soybean supply and demand, 1990-1992: USA, world. members of soybean board. Address: Chatham, ONT, Canada. Phone: 519-352-7730.

10237. *Opzij* (*Netherlands*). 1992. Inkomsten dankzij de sojaboon [Income thanks to the soybean]. No. 12. p. 37. Dec. [Dut]*
• ***Summary:*** This Dutch feminist monthly magazine, whose title means "move over," reports that a foundation in the Netherlands named Stichting Krakti Gotong Rojong ("Cooperation-Makes-Strong Foundation") teaches 25 women in Suriname (in the Commewijne district) how they can grow soybeans in an environmentally-friendly way. The women–who are all bread-winners and have little children–learn the work from agricultural experts at Wageningen, The Netherlands. They can borrow from the Foundation small agricultural equipment. They get their soybean seeds from Dutch traders, who see this as a potential new market. After harvest, the soybeans are processed to make tempeh and tahoe (tofu), which are excellent alternatives to meat. And there is much demand for these soy products in Suriname, where meat has become too expensive for many people because of the bad economic situation. To give more women the chance to advance economically, the Foundation wants to expand the project.

Those who want to support this project can send donations to bank account number 51 78 67 621 to the attention of the Stichting Krakti Gotong Rojong in Delft. For information, phone 015-144721.

10238. **Product Name:** Soya Kaas (Hard Cheese Alternative Containing Casein) [Garlic & Herb].
Manufacturer's Name: Swan Gardens, Inc. Distributed by American Natural Snacks.
Manufacturer's Address: Manufacturer: 6029 Lagrange Blvd., Atlanta, GA 30336. Distributor: P.O. Box 1067, St. Augustine, FL 32085. Phone: 904-824-8181.
Date of Introduction: 1992. December.
Wt/Vol., Packaging, Price: 12 oz vacuum pack.
How Stored: Refrigerated.
New Product–Documentation: Letter (fax) from Casey Van Rysdam, President, American Natural Snacks. 1994. May 6. This product was first sold in Dec. 1992. It is a hard cheese alternative.

10239. Troy, John. 1992. The Wizard behind innovative salad dressings: Photos, samples, and interviews available (News release). Cedar Grove, North Carolina. 1 p. Dec.
• ***Summary:*** Begins with a biography of Troy's boyhood years, with summers spent in western North Carolina on a rural farm with his maternal grandmother doing what he loved best–cooking with his grandmother on her wood stove.

"Troy's journey from kitchen to manufacturer has an unusual twist. Intensely interested in medicine and health, Troy worked as a surgical and research lab assistant in his late teens but his part-time stereo business made him more money in the 60's. The back-side of success was introspection. Troy searched his spiritual aspirations in the 70's. He became vegetarian and was introduced to healthy Asian foods like tofu, miso soybean condiment, and umeboshi plum vinegar. That's when he made the link between food and medicine.

"Troy's next business venture involved natural foods. The American Natural Food Company was born in 1983, where he developed a line of miso-based condiments under his 'Wizard' nickname. Natural food stores went into a slump and Troy lost everything, but kept Wizard Baldour his original trademark.

"'Funny how things happen. Just as I was out of work, my wife, ex-wife and I were given a chance to buy a local restaurant, The Regulator Cafe,' quips Troy.

"The restaurant became successful and was the perfect place for Troy to create and test new recipes. At the same time, he did formulation consulting for several other natural food manufacturers creating new sauces and condiments from organic and fresh ingredients. This gave him the financial means toward furthering his own comeback.

"Thus, in 1988 he started Simply Delicious, Inc. Now he works out of his own manufacturing facility using the natural ingredients he loves."

This year alone more than one million bottles of Simply Delicious salad dressing have been sold in the USA alone.

A full color, 4-page brochure titled "Simply Delicious" accompanies this news release. It contains color photos of Chef John Troy and products in three different lines that he makes: (1) Simply Delicious, (2) Harbor Lites Sea Sauces, and (3) Troy's sauces. Address: The Wizard's Cauldron, 8411 Hwy. NC 86 N, Cedar Grove, North Carolina 27231. Phone: 919-732-5294.

10240. Tu-Bich-Thuy. 1992. The current status of soybean production in South Viet Nam. *Palawija News* (*Bogor, Indonesia*) 9(4):1-7. Dec.
• ***Summary:*** Contents: Soybean producing areas in South Viet Nam: Dong Nai Province (this area in eastern South Viet Nam supplies 25% of the nation's soybeans), Mekong River delta. Technical aspects of soybean production (in each of the two regions mentioned above): Land preparation, fertilizer use, varieties, weeds, pests and diseases, cropping patterns, mixed cropping with maize, soybean before tobacco, economic efficiency. Soybean utilization in Viet Nam: Utilization as food (80% of the crop is used to produce soybean curd, fermented soybean curd, soybean milk, soybean meal and small quantities of soybean oil), utilization for soybean glue, utilization as stock feed, utilization as fertilizer. Policies necessary for the development of soybean production in South Viet Nam: Government's role in soybean production. Production constraints. Research activities conducted to date by U.A.F. 10241. Whiteman-Jones, Michael; Shurtleff, William. 1992. The modern evolution of soyfoods. *Natural Foods Merchandiser.* Dec. Soyfoods 2000 special supplement insert. p. 4-6.
• ***Summary:*** A colorful overview of the history of soybeans and soyfoods from 1100 B.C. to the present, worldwide. Discusses the history of tofu, Samuel Bowen, Benjamin Franklin, T.A. Van Gundy, Madison College, Henry Ford, Seventh-day Adventists, Erewhon, Asian Americans, Kikkoman, the $1,000 million soyfoods market in America, countries with the highest per-capita consumption of soyfoods, the future of soyfoods. Address: 1. NFM; 2. Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

10242. Whiteman-Jones, Michael. 1992. Unraveling the soyfoods merchandising mystery: Selling techniques ultimately depend on store size, location and customer demographics. *Natural Foods Merchandiser.* Dec. Soyfoods 2000 special supplement insert. p. 8-11.
• ***Summary:*** The views of three industry experts–Steve Demos of White Wave, John Paino of Nasoya Foods, and Peter Golbitz of Soyatech–on the best approaches to marketing soyfoods in America.

White Wave boasts gross annual sales of about $5 million, roughly 80% of which come from natural products stores and 20% in conventional supermarkets. Demos wants to position soyfoods as a category. "Rather than integrate soyfoods with similar products–putting tofu dogs with hot dogs, for instance–he believes they should get their own section. Call it a protein case, or a healthy alternatives section, or even tack on a sign that says 'Phony foods sold here.'" Safeway, a mainstream supermarket giant, is experimenting with separate soyfoods sections in some of its stores, but most supermarkets practice integration. Natural products stores often merchandise soyfoods together in a separate section, and one such large store "can easily sell 30 to 50 times as much soyfoods as a supermarket."

Paino, who declined to reveal Nasoya's sales figures, sells soyfoods nationwide in natural products stores, supermarkets, and Asian markets. He favors integration rather than a separate protein section. He focuses on eye-catching labels, point-of-sale merchandising tolls such as shelf talkers, tear-away recipe cards, and in-store demonstrations. "Nasoya built its market by merchandising tofu in the produce section and has enjoyed solid sales and growth as a result."

Golbitz, a leading industry consultant, "has surveyed stores across the country about soyfoods merchandising. His conclusion: Integration works best for some stores, separate sections better for others. The major determining factors are store size, traffic, and demographics." The answer "has to be regionalized, localized, and individualized. Supermarkets and large-format natural products stores, for instance, generally have better luck with integration." Integration helps transitional customers. "Soy milk just doesn't seem as strange when its standing next to a carton of cow's milk, he says, and the marketing power of familiarity can't be underestimated... One thing Golbitz is certain of, however, is that soyfoods sales are going to increase whether the products are merchandised in a separate section or integrated."

10243. **Product Name:** Fresh Soft Tofu.
Manufacturer's Name: Wo Chong Co.
Manufacturer's Address: 1001 16th St., San Francisco, CA 94107. Phone: 415-431-5666.
Date of Introduction: 1992. December.
Ingredients: Water, soybean protein [actually whole soybeans, not soy protein isolate], gluconolactone, calcium chloride.
Wt/Vol., Packaging, Price: 12.35 oz. (350 gm) sausage-shaped plastic, sealed at one end. Retails for $1.09 (3/93, Lafayette, California).
How Stored: Refrigerated, 30 day shelf life.
New Product–Documentation: Product with Label purchased at Safeway supermarket in Lafayette, California, in the refrigerated produce case, next to other types of tofu. 1993. March 27. 7.25 inches long by 2 inches in diameter. Red and blue on clear plastic film. On the front panel, the Chinese characters for Fresh + Water + Tofu (*Shin-Sui Dôfu*) are positioned above the English product name. On the back is a UPC indicia "Cut [crosswise] into two pieces and squeeze gently from both ends. Keep refrigerated. Use as soon as possible after opening." Note: One advantage of this tofu, the first of its type seen in America, is that it is not floating in water, as is much of the tofu sold here. A Soyfoods Center taste test found the flavor and texture to be excellent. This "Sealed Lactone Silken Tofu" (see *The Book of Tofu,* Ballantine ed., p. 318-39) is made by funnelling a mixture of thick soymilk and glucono delta-lactone into a thick-walled polyethylene container through a very small opening. The opening is then pinched closed and thermally sealed so that absolutely no air can enter. The sausage-shape package is then heated (usually in hot water) which causes the tofu to solidify. No preservatives are used.

Talk with Walter Louie of Wo Chong. 1993. March 29. This product was introduced in Dec. 1992. The company built a new tofu manufacturing plant on a empty lot adjacent to their former plant to house new automated equipment to make this product and other types of tofu they have made for years. This type of package is used to make what is called "buro-dôfu" in Japan. He uses only whole soybeans (no soy protein isolates) to make thick soymilk for making the product. He produces it about once a week. Walter and John Louie are brothers and partners in Wo Chong. They inherited the business from their grandfather.

10244. **Product Name:** Adrienne's Lavosh Hawaii Slightly Onion Crackers.
Manufacturer's Name: Adrienne's Gourmet Foods.
Manufacturer's Address: 849 Ward Drive, Santa Barbara, CA 93111. Phone: 1-800-937-7010.
Date of Introduction: 1992.
Ingredients: Wheat flour, tofu (water, soybeans, calcium sulphate), eggs, 100% vegetable shortening (partially hydrogenated soybean oil), sugar, salt, toasted onions (onions, canola oil, salt).
Wt/Vol., Packaging, Price: 4.5 oz paperboard box with window.
How Stored: Shelf stable.
New Product–Documentation: Product with Label purchased in Lafayette, California. 1993. Dec. This is a gourmet flatbread. The box design is copyrighted 1992. On the front panel is a colorful illustration of two bird-of-paradise flowers against a background of tropical leaves.

10245. De Vuurdoop. 1992. Weder Fisch noch Fleisch, aber lecker schmeckt's! [Neither fish nor meat, but it tastes delicious! (Leaflet)]. Volendam, Netherlands. 3 panels each side. Each panel: 21 x 11 cm. [Ger]
• ***Summary:*** This attractive German-language leaflet is from a Dutch company that makes tasty vegetarian foods (*vegetarische Leckereien*). They offer 8 refrigerated products including Tofu Cutlets and a Seitan Burger, plus frozen products including a Seitan Burger, Croquettes with Seitan, and Croquettes with Tofu. Address: Postfach 147, NL 1130 AC Volendam, Netherlands. Phone: 0031/2993/61152.

10246. **Product Name:** Tofu Turkey.
Manufacturer's Name: Fresh Tofu Inc.
Manufacturer's Address: 900 Line St. (P.O. Box 1125), Easton, PA 18042. Phone: 215-258-0883.
Date of Introduction: 1992.
Wt/Vol., Packaging, Price: 2.5 lb vacuum packed.
How Stored: Refrigerated.
New Product–Documentation: Talk with Gary Abramowitz. 2000. Nov. 30. Fresh Tofu first started making commercial Tofu Turkey in 1992. This is a vacuum-packed, refrigerated product with a 3-4 week shelf life; it is not frozen. Therefore it is sold locally and regionally rather than nationally. It is also 100% tofu, whereas competing products typically contain lots of wheat gluten. They start with a large block of tofu, then cut it to the silhouette of a turkey. They do not use a mold to shape the tofu. Then, by hand, they carve and score each Tofu Turkey with a knife to give it feather marks and other details, then it is marinated and baked for a long time to give it a nice brown skin on the outside and white "meat" on the inside. It can be cut into thin slices. It comes in a box with a rosemary-herb gravy mix. In 1992 the turkey weighed 2½ pounds (40 oz.) but they found that was too much. In 1998 the weight was reduced to 1 lb 10 oz. (26 oz.)–which is still the weight today. It feeds 4-6 comfortably. The first year (1992) the company sold several hundred, increasing to 320 in 1995, 500 in 1996, 600 in 1997, over 1,000 in 1998 (at the lighter weight), 1,500 in 1999, and over 2,000 this year (by the end of 2000). Gary is associated with PETA. Every thanksgiving they help promote his Tofu Turkeys, and he, in turn, gives away free ones.

10247. **Product Name:** [Tofulini Whole-grain Tofu Tortellini, and Tofulini Whole-grain Tofu Ravioli].
Foreign Name: Tofuloni Vollkorn Tofu Tofulini, Vollkorn Tofu Ravioli.
Manufacturer's Name: Gebr. Franz GmbH.
Manufacturer's Address: Pavillionstrasse 45, D-6630 Saarlouis, Germany. Phone: 0 68 31 / 4 10 87.
Date of Introduction: 1992.
Ingredients: For both: Pasta shell: Whole meal hard semolina, water: Filling: Smoked tofu (soya bean, water, smoke), whole meal crumb flour, vegetables (carrots, onions, leeks, celery), spices, shoyu, sea salt.
Wt/Vol., Packaging, Price: 250 gm vacuum pack.
How Stored: Refrigerated.
Nutrition: Per 100 gm.: Protein 11.2 gm, fat 3.3 gm, carbohydrates 47.0 gm, calories (kcal) 263 (1,117 kJoules).
New Product–Documentation: Note a similar product marketed by Unikorn, introduced in about 1989.

Ad in Schrot & Korn. 1992. April. p. 8. "Nudeln Sie jetzt mit!" Without eggs or meat. New, with Demeter cereal grains. Pasta with tofu-, cheese, vegetable-, or mushroom filling. Organically grown (*Kontrolliert biologisch*). Color photos show the labels of all 4 products. Gebr. is an abbreviation for "Gebrueder," which means "brothers." Hence: Franz Brothers.

Leaflet sent by Patricia Smith from Natural Products Expo East. 1992. Sept. 11-13. Baltimore, Maryland. The ingredients for each product are listed. The only flavors that contain tofu are the Tofulini Vollkorn Tofu Tortellini and Tofu Ravioli. Other products (apparently deceptively labeled) are: Tofulini Vollkorn Gemuese Tortellini (Vegetable), Vollkorn Käse Tortellini (Cheese), and Vollkorn Champignon Tortellini (Mushroom). Why should a product be named Tofulini if it contains no tofu? The company sells its line of pasta products with 4 Cream Sauces in small jars: Tomato, Cheese, Mushroom, or Herb.

10248. **Product Name:** [Tofu].
Manufacturer's Name: Marinus Janssen Tofu Co.
Manufacturer's Address: Le Grand Villars, 04210 Valensole, France.
Date of Introduction: 1992.
New Product–Documentation: Letter (handwritten) from Marinus Janssen. 1992. Aug. 13. For years he has been working with a farmer to grow soybeans organically. He

© Copyright Soyinfo Center 2013

has just started production of tofu on a tiny scale (local). "I propose myself to transform soya from beginning to end and in all its different ways (tofu, miso, tempeh...). I don't intend to create a large firm! My goal is more to experiment with the possibilities given by soya production in a small atelier which will be, I hope, also a place to work with other people."

Letter from Marinus Janssen. 1992. Dec. 21. He is a farmer. "I already started a tofu production unit on a small scale, using the soybean variety Vinton, imported from the USA."

10249. **Product Name:** Tofu Egg Salad Sandwich.
Manufacturer's Name: Michele's Original.
Manufacturer's Address: 6441 Haverford Rd., Philadelphia, PA 19151. Phone: 215-474-8636.
Date of Introduction: 1992.
New Product–Documentation: Talk with Michele D'Ambrosio, founder and owner of Michele's Original. 1992. Sept. 21. "My latest, fabulous, new soy sandwich is a tofu egg salad, that has the Tofu Tahini Spread in it, plus chunks of tofu, with carrots and celery, and tarragon. Its on a whole-wheat pumpernickel bread. We sell it at health food stores, supermarkets, delicatessens–any place that carries a natural food menu."

Michele reflects: "I love tofu. I think its the most versatile food there is. There is no end to the food products you can make from it and they are never boring. So many times I have heard some person from the mainstream say 'Oh no, I don't like tofu,' and they have a bite of our egg sandwich, thinking its made from real eggs, and say 'Oh, this is great.' When I tell them there is no egg in, it blows their mind. They say 'it looks like egg, it tastes like egg, how do you do it?' Our next new product will be a soy burger, probably based on baked tofu."

10250. **Product Name:** Soy Burgers.
Manufacturer's Name: New Dawn Enterprises.
Manufacturer's Address: Sheffield, Tasmania. Phone: (004) 91 1663.
Date of Introduction: 1992.
Ingredients: Incl. organic tofu, okara, wheat, and spices.
Wt/Vol., Packaging, Price: 500 gm vacuum pack.
How Stored: Refrigerated.
New Product–Documentation: Talk with Trishala Shub. 1998. Jan. 18. In about 1992 they introduced Soyburgers, which contained tofu, okara, wheat, and spices.

10251. **Product Name:** Tofu Tziballe.
Manufacturer's Name: Olive Tree Works.
Manufacturer's Address: 6713 New Hampshire Ave., Takoma Park, MD 20912. Phone: 301-270-5110.
Date of Introduction: 1992.
Ingredients: Incl. Tofu, onion, salt, pepper.
Wt/Vol., Packaging, Price: 8 oz. round plastic deli container.
How Stored: Refrigerated.
New Product–Documentation: Talk with Ed Mueller of Takoma Soy. 1997. July 21. Takoma Soy incorporated on 5 March 1992 and started operation on 1 April 1992–sharing the same space as Olive Tree Works in Takoma Park, Maryland. They bought tofu from Spring Creek Natural Foods (Spencer, West Virginia) and sold it at cost to Olive Tree. They are now a full-line natural foods distributor. Talk with Yaron Semititsky of Olive Tree, Inc. 1997. July 24. Olive Tree Works started in Oct. 1990. Their first soy product was launched in 1992. They did not make their own tofu. The name Tziballe (pronounced TZI-bal-eh) is related to the German word for onion, *Zwiebel.* Crumbled tofu was cooked in a wok with fried onion, raw onion, salt and pepper. The product was discontinued after about 1 year. Yaron (whose surname is Polish) grew up in Israel, first came to the USA in 1975 as a student, then came to stay in 1985. His goal in life is to promote vegetarianism and soyfoods. The company is now named Olive Tree, Inc. They are involved in a creating a joint venture with Takoma Soy to start a tofu manufacturing company on a property that used to be a Bible camp. Here they would also like start a school to teach others how to make tofu–since there is a lodge house and 3 cabins on the property. They also make cous-cous, and hummous.

10252. **Product Name:** Firm Tofu, Extra Firm Tofu (Dofu-Gan), Fried Tofu, Spiced Tofu (Wu-Hsiang Dofu-Gan), Tofu Noodles (made by Pressing and Cutting Tofu).
Manufacturer's Name: Pure Land Co.
Manufacturer's Address: 3456 Depot Rd., Hayward, CA 94545. Phone: 510-670-8621.
Date of Introduction: 1992.
How Stored: Refrigerated.
New Product–Documentation: Talk with Jim Pong, owner of Pure Land Co. 1998. Oct. 21. This company started in 1976 in Sunnyvale–with America Food & Candy Co. He left Sunnyvale because the facility and the water were no good. He runs the company in partnership with Cynthia Wu (the daughter of the man who founded American Food & Candy Co.) and her wife, and Richard Liu. Woody Yeh lost $3 million and had to declare bankruptcy. Jim bought his used equipment and in about 1992 moved into the space he had been renting. He makes the same products now that he made previously in Sunnyvale. All of his soy products are made in the traditional way.

10253. **Product Name:** New World Foods Vegetarian Chorizo (With Granular Tofu Curds).
Manufacturer's Name: Vegetable Protein Specialists (VPS), Inc.
Manufacturer's Address: 2889 Trades West Rd., Santa Fe, NM 87501. Phone: 505-471-8979.

© Copyright Soyinfo Center 2013

Date of Introduction: 1992.
Ingredients: Organic* Befine (soybeans, water, calcium sulfate–a natural mineral, caramel color), whole chile pods ground with chile broth, potatoes, spices, vinegar, salt, vegetable gum. * = Organically grown & processed in accordance with Section 26569.11 of the California Health and Safety Code.
Wt/Vol., Packaging, Price: 12 oz vacuum pack. Or 24 lb. foodservice pack.
How Stored: Frozen or refrigerated.
Nutrition: Per 2 oz.: Calories 64.3, calories from fat 16.7, total fat 11 gm (saturated fat 0.24 gm), cholesterol 0 mg, sodium 414 mg, total carbohydrate 9.3 gm (dietary fiber 0.83 gm), protein 4.1 gm, vitamin A 162%, vitamin C 4%, calcium 8%, iron 23%.
New Product–Documentation: Leaflet sent by Richard Jennings of VPS, Inc. (Vegetable Protein Specialists). 1993. Nov. 26. "New World Foods." "Chorizo is a sausage of Spanish and Portuguese origins." This vegetarian chorizo was created by an expert chorizero, Mr. Oscar Tavarez, from Chihuahua, Mexico.

Talk with Richard Jennings of VPS. 1993. Dec. 1. This product was introduced in 1992. A key ingredient was Rico Soy (small, firm chunks of tofu), which was renamed and trademarked Befine by Sept. 1993.

New Label sent by Richard Jennings. 1993. Nov. 29. 3 by 5 inches. Self adhesive. Black on gold. Illustration of a symbolic Aztec crow. "Low in saturated fat." "Serving suggestions: Scramble with eggs... Makes a great breakfast burrito."

10254. Vegetalia. 1992. Recetario [Recipe book]. Castellcir (near Barcelona), Spain. 32 p. 21 cm. [Spa]
• ***Summary:*** The Introduction to this handsome color booklet (which contains many color photos), was written by Salvador Sala. It states: "Thanks to you, this year in 1992 we will celebrate the 6th year of Vegetalia's existence. It has not been easy to get to where we are now, but it has been very satisfying, especially for me. When, in April 1986, together with Carmen and Tomás, we decided to form Vegetalia, our dream was to facilitate the improvement of the quality of life, in the ecological way."

For each of the following foods there is an introduction, a nutritional analysis, then several recipes: Seitan, tempe (a color photo shows tempeh sold in perforated plastic bags, and immersed in a broth in jars), tofu (a color photo shows tofu sold in self-sealing bags and immersed in a liquid in jars), pickles, amasake [amazake], gomasio [gomashio], and Algas Klamath (a type of sea vegetable), and Vegetalin (made with whole wheat, olive oil, sea salt, natural leavening, and sesame). Page 32 notes that the company makes seitán, tempe, tempe estofado, tofu, tofu tres delicias, paté -de tofu y miso, etc. It also sells an large line of natural foods made by other companies, including: Soycisse (a type of soy frankfurter). Tofume (smoked tofu). Biosoy (soymilk). Postre de Soja (Soymilk desserts, in hazel-nut/filbert, vanilla, chocolate, apricot, strawberry, and pear flavors). Soy yogurt (natural and low fat). And Vegetalia is working to help the Third World via CEPAN in Brazil.

Note: This is the earliest Spanish-language document seen that mentions amazake, which it calls "amasake." Address: Castellcir (near Barcellona), Spain. Phone: +34 3-866 61 61.

10255. Atlas, Nava. 1992. Soups for all seasons: Bountiful vegetarian soups. New Paltz, NY: Adam Enterprises. 128 p. Illust. by Nava Atlas. Index. 21 x 18 cm.
• ***Summary:*** The witty literary aphorisms, quotations (with sources), and marvelous whimsical drawings that have become the author's trademark appear throughout this vegetarian cookbook. The recipes are arranged by season. The last chapter, accompaniments (p. 107-24) includes bread, muffins, biscuits, scones, croutons, and dumplings.

Soy related: Soymilk is given as an alternative in every recipe that calls for milk or low-fat milk (see p. 20, 28, 31, 34, 92, 123). Likewise, soy cheese is given as an alternative that calls for dairy cheese (see p. 16, 32, 114). "Natural soy sauce" is used to season many recipes (see p. 14, 80, 82, 119). Simple miso broth (with kombu and diced tofu {bean curd}, p. 13). Dashi with miso and vegetables (p. 13). Miso soup with winter vegetables (with wakame {Japanese sea vegetable}, shiitake mushrooms, etc., p. 62). Chinese cabbage and bean curd soup (with "½ pound tofu {bean curd}, cut into ½-inch dice," p. 80). Miso spinach soup with baby corn (with "¼ pound block tofu, cut into ½-inch dice," p. 81). Address: Author and illustrator, New Paltz, New York.

10256. Berk, Zeki. 1992. Technology of production of edible flours and protein products from soybeans. *FAO Agricultural Services Bulletin* No. 97. 178 p. [173 ref]
• ***Summary:*** Contents: Foreword. 1. The soybean: Background, production, marketing, agricultural characteristics, physical characteristics and morphology of the soybean, chemical composition (moisture, proteins, lipids, carbohydrates, minerals). 2. Utilization of soybeans: Utilization options for soybeans, whole bean utilization, the oil mill route (utilization of the oil fraction, utilization of the meal fraction). 3. Oil-mill operations: The expeller (operation principles, advantages and disadvantages of the expeller process, equipment), the solvent extraction process (operation principles, receiving and storage of soybeans, preparation for extraction, solvent extraction, post-extraction operations). 4. Edible soybean flours and grits: Introduction, definitions, composition and quality parameters (definition and classification of edible soy flours and grits, composition, quality standards), full fat soy flour and grits (production processes, utilization), defatted soy flours and grits (production processes, utilization). 5. Soybean protein

© Copyright Soyinfo Center 2013

concentrates (SPC): Introduction, definition, composition, types, production processes (the aqueous alcohol wash process, the acid-wash process, heat denaturation/water extraction process), utilization (basic considerations, use in bakery products, meat products, other uses). 6. Isolated soybean protein (ISP): Introduction, definition, composition, types, production processes (conventional process, problems in conventional processing, alternative processes), utilization (meat products, seafood products, cereal products, dairy-type products, infant formulas, other uses). 7. Textured soy protein products: Introduction, spun-fibre based texturization, extrusion texturization, steam texturization, utilization (meat extenders, meat analogs, other applications). 8. Soymilk and related products: Introduction, composition and classification, production processes (the traditional process, the Soya Technology System (STS) Process, the INTSOY (Illinois) process, the Buhler Process for soy micro-powder), soymilk related products. 9. Tofu, tempeh, soysauce and miso: Introduction, soy sauce, miso, tempeh, tofu (Introduction, regular and silken tofu, kori-tofu, deep-fried tofu, fermented tofu). Appendixes: I. Standards and specifications. II. Organizations and government agencies. III. Manufacturers and suppliers of soybean processing plants and equipment. IV. Sample budget quotations for complete soy processing or soybean related food manufacturing plants. Address: Technion–Israel Inst. of Technology, Haifa, Israel.

10257. Berkeley, Edmund; Berkeley, Dorothy Smith. eds. 1992. The correspondence of John Bartram, 1734-1777. Gainesville, Florida: University Press of Florida. xv + 809 p. Illust. Index. 21 cm.

• ***Summary:*** John Bartram lived 1699-1777. On pages 727-28 of this book are: (1) A letter from Benjamin Franklin to John Bartram dated 11 Jan. 1770 from London; it mentions soybeans and tofu. (2) A letter from James Flint to Benjamin Franklin dated 3 Jan. 1770 from Capringe. It discusses how the Chinese convert Callivances (soybeans) into Towfu (tofu).

Contents of this book: List of illustrations. Acknowledgments. Editors' introduction (incl. a brief biography of John Bartram). The correspondence (arranged chronologically). Appendix I. Bartram's descriptions of North American forest trees and shrubs. Appendix II. Bartram's notes in the *Medicina Britannica.* Glossary of names. Bibliography.

This book also contains letters to and/or from (or information about): Samuel Chew (born 1693; physician in Philadelphia after 1732; introduced John Bartram to Peter Collinson), Peter Collinson (1694-1768; London woolen draper and avid gardener, obsessed with introducing foreign plants to his garden at Peckham, in Surrey; member of the Royal Society), John Fothergill (1712-1780; distinguished Quaker physician in London and Fellow of the Royal Society), James Flint, Benjamin Franklin (1706-1790; publisher, scientist, interested in all aspects of natural science, and Fellow of the Royal Society), Henry Laurens (1723-1792; distinguished citizen of Charleston, South Carolina, later president of the Continental Congress, and American Commissioner at the Treaty of Paris), Library Company of Philadelphia, Carolus Linnaeus (1707-1778), Philip Miller (1691-1771; director of the Chelsea Physic Garden), Thomas Penn (1702-1775; one of the three sons of William Penn; inherited proprietary rights in Pennsylvania and was in charge of the colony's interests in England), William Penn (1644-1718; English Quaker and founder of the Pennsylvania colony; Fellow of the Royal Society), Benjamin Rush (1746-1813; Philadelphia physician and professor at the University of Pennsylvania Medical School), Peter Templeman (1711-1769; physician, secretary of the Royal Society).

About the authors (p. [809], with photo of both together): "Edmund Berkekley and Dorothy Smith Berkeley have published numerous biographies of notable figures in natural history, including John Clayton, Alexander Garden, John Mitchell, Moses Ashley Curtis, and George William Featherstonhaugh. Before his retirement, Edmund Berkeley taught at Washington and Lee University [in Lexington, Virginia], the University of the South, and the University of North Carolina."

10258. Buswell, Robert E., Jr. 1992. The Zen monastic experience: Buddhist practice in contemporary Korea. Princeton, New Jersey: Princeton University Press. xiii + 264 p. + [8] p. of plates. See p. 120-21. Illust. Index. 25 cm. [190+* ref]

• ***Summary:*** The section titled "Meals" (p. 120-25) notes that there are many similarities between the diet in the monasteries and that in the homes of the local agricultural peasants. "The major difference is that all meals served in the monasteries are vegetarian [actually vegan]. The bodhisattva precepts of the Mahayana branch of Buddhism forbid monks from eating the flesh of any sentient being." Cereal grains provide 70-80% of the caloric intake. "In addition to steamed rice, meals always include some kind of soup (*kuk*)... The soup is generally based on toenjang, a fermented bean paste like Japanese miso and flavored with soy sauce (*kanjang*) and sesame salt."

"Bean products constitute one of the largest components of the monastic diet during all seasons. The basis of many bean products is *meju,* a fermented bean paste somewhat like the Japanese *nattô* [more like the Japanese *miso-dama,* or soybean koji]. *Meju* is used as a major ingredient in producing soy sauce, red-pepper paste, and *toenjang.* Cooked black [soy] beans, seasoned with soy sauce, sugar, and white sesame, are served at least once a day. Tofu (*tubu*), or bean curd, frequently appears on this menu, but this is always purchased from a professional maker, who delivers it to the

© Copyright Soyinfo Center 2013

monastery on the back of his motorcycle. When the tofu is especially fresh, it is served steamed in whole blocks, to be dipped into a sauce made of soya, sesame oil, and red-pepper sauce."

Because of Mahayana Buddhism's dietary restrictions, monks don't eat garlic or onions, so widespread in the diets of regular Koreans. Those foods are considered "to be mild aphrodisiacs, something celibates can do without. To compensate for the blandness of the food, the kitchen staff replaces the garlic and onions with lots of red pepper (*koch'u*), along with red-pepper paste (*koch'ujang*)," brown sesame and white sesame. At the ceremonial dinner on festive days, white rice is replaced by glutinous rice and special dishes such as fried tofu and nori (*kim*) are served.

Note: The author was privileged to spend five years as a Buddhist monk in Korean monasteries between 1974 and 1979, primarily at Songgwang-sa. He made two additional trips to Songgwang-sa in Nov. 1987 and July 1988. The monastery is in Suncheon near the southern coast of Korea.

10259. Béla Fleck & the Flecktones. 1992. UFO TOFU (Sound recording). Nashville, Tennessee: Warner Bros. Records Inc. *

• ***Summary:*** Talk with Bill Bramblett of Wildwood Natural Foods. 1998. Feb. 28. In 1992 a fellow named Béla Fleck, who has a band named Béla Fleck & the Flecktones, came out with a CD titled "UFO Tofu," which Billy still owns. They recorded two albums before this one, and 1-2 after. The Flecktones are out of Nashville, Tennessee, but are now living in Los Angeles, California.

Photocopy of CD and accompanying booklet sent by Billy Bramblett of Wildwood. 1999. June 3. On the CD and in the booklet, the letter "F" in tofu is reversed, so the mirror image reads the same as the regular words–since the letters "U," "F," "O," and "T" are all symmetrical. One of the songs on the CD (written by Bela Fleck) is also titled "UFO Tofu." The booklet (on the cover of which is a cake of tofu with two chopsticks stuck in the top, and a sign saying "Eat UFO Tofu") states: "'UFO Tofu' was inspired by the amazing Baby Gramps. This song has at least three musical palindromes hidden within. A palindrome is a word or phrase that is spelled the same way backward and forward... We use this same concept musically on this piece." Photos show: Béla Fleck. The four members of the band. Bela plays four types of banjos (acoustic, slide, electric, and nylon strung). Future Man, dressed like Napoleon, plays the "Synth-Axe Drumitar," a very far-out guitar with little drums all over the inside. Address: P.O. Box 91076, Nashville, Tennessee 37209.

10260. Cardenas, Danilo C.; Legaspi, Benjamin M. 1992. The status of soybean production and utilization in the Philippines. In: Increasing Soybean Production in Asia: Proceedings of a Workshop. 1992. Bogor, Indonesia: CGPRT Centre. 187 p. See p. 119-35. Held 21-24 Aug. 1990 at Phitsanulok, Thailand. [8 ref]

• ***Summary:*** Contents: Introduction. Production situation: Production trends, economics of soybean production, price trends, marketing of soybean. Philippine foreign trade situation: Soybean imports, soybean exports. Soybean utilization. Government policies/programs affecting the industry: Policies, programs. Major problems besetting the local soybean industry. Conclusions.

The soybean, also know locally as "utao," has become an increasingly important economic crop in the Philippines. Yet in 1987 (the latest year for which figures are given) only 5,698 tonnes (metric tons) were harvested from 6,490 hectares, having a value of 45,169,000 pesos. This represented only 0.02% of the total Philippine quantity of agricultural production, and only 0.05% of total farm area and value. Philippine soybean production peaked at 11,466 tonnes in 1982. Most of the country's soybeans are grown in the southern Mindanao region (72.1%), followed by northern Mindanao (10.0%) and central Mindanao (9.4%). Imports of soybeans and products have steadily increased since Philippine farmers do not produce enough soybeans to meet local demands; the value (FOB US$) rising from $61,989,000 in 1980 to $127,981,000 in 1988. The main imports are soybean meal (accounting for 86.87% of total import value), refined soybean oil (5.19%), soybeans (4.18%), and crude soybean oil (223%). Before March 1986 the National Food Authority (NFA) had the sole authority to import soybeans, but with the introduction of the trade liberalization program, importation has reverted to private firms. In 1989 the country's major sources of imported soybeans were China (which supplied 42% of total imports), Brazil (34%), and the USA (15%). Exports, which are negligible, have grown from $136,000 to 1,123,000 during the same period. The main exports are soy sauce (accounting for 91.03% of total value), salted and fermented soybeans [fermented black soybeans] (tausi, 3.34%), and soybeans (2.65%).

Table 7 lists and describes "Soybean-based food products popularly used in the Philippines." Fermented products include soy sauce, salted and fermented soybean (*tausi*), tempe (tempeh), soybean paste (miso), and soybean curd (fermented tofu cubes; a soft cheese-type product with a salty but mild flavor, eaten as a relish or cooked with meat and vegetables). Non-fermented products include soybean sprouts (*toge*), soybean cheese (*tokwa* [tofu]), Geerlings cheese (taho, soymilk curds; a sweet dessert or snack food for children), soybean milk, and roasted soybean (soy coffee).

"In terms of food usage, Filipinos, unlike other Asians, have not developed a taste for soya-based products... Most of the soy products available in the market are either made at home or in family-operated shops.

"It is interesting to note from the report of Co (1987)

© Copyright Soyinfo Center 2013

that small scale food processors engaged in manufacture of taho and tokwa preferred locally grown beans to imported ones. They claimed that local soybeans have a distinctive 'fresh' quality which imparts a finer and smoother texture to their finished products providing a longer shelf life than that produced from imported beans.

"Recently, several developments in the local economy have signaled a revival of interest in the use of soybean as food. In 1980 Nestle Philippines Incorporated began commercial production of powdered soymilk products and later a baby soya-cereal food formulation and a soya-based meat extender which is produced primarily for export to other Asian countries. Today Nestle Philippines, in co-operation with the Land Bank of the Philippines, the Regional Offices of the Department of Agriculture and PCARRD is encouraging local production of soybean and had adopted a no importation policy.

"Some years ago, the use of TVP also gained a permanent foothold in the local processing industry. It is used in the manufacture of ground meat products and as a meat extender. Almost all TVP used in the country is imported except for the locally manufactured full-fat TVP which is being produced by the Vitarich Corporation, one of the biggest feed millers in the country. The company has built a full-fat soya processing plant capable of utilizing 900 MT [metric tons] of soybean per month. Unfortunately, all its raw soybean requirements are imported from the U.S. and China.

"Soybean flour, protein concentrate and protein isolates are the newest soya-based products and are now used extensively in the country for the formulation of meat emulsion products. All raw materials are imported and there is no local manufacturing capability at present."

"Programmes: As early as the 1970s, the government tried to involve itself to some degree in boosting national soybean output, despite the low priority it accorded to soybean in general. It was an involvement borne out of an urgent need to meet the growing requirements of the local feed milling and livestock industry, rather than of a need to address the high incidence of malnutrition among Filipinos. Accordingly, the government launched a number of programmes to improve soybean production, most of which failed to achieve their goals. At present, only the PCARRD-coordinated Soybean Pilot Production Programme continues to function. This programme was initiated in late 1983." Address: 1. Supervising Science Research Specialist, Philippine Council for Agriculture, Forestry, and Natural Resources Research and Development (PCARRD); 2. Dep. of Agriculture Bureau of Plant Industry, Los Baños National Crop Research and Development Centre. Both: The Philippines.

10261. Chainuvati, Chavalvut. 1992. Soybean production and utilization in Thailand. In: Increasing Soybean Production in Asia: Proceedings of a Workshop. 1992. Bogor, Indonesia: CGPRT Centre. 187 p. See p. 1-15. Held 21-24 Aug. 1990 at Phitsanulok, Thailand. [6 ref]

• ***Summary:*** Contents: Introduction: Importance of agriculture, establishment of the Department of Agricultural Extension, DOAE's functions & responsibilities, soybean production, soybean production area, crop seasons, cultivation practices, harvesting, vegetable soybean. Soybean production and consumption campaign: Previous activities, 1990 activities, new creative work. Conclusion.

Thailand produces about 650,000 tons of soybeans each year. Of this, the first-grade seed is used for either home food industries (150,000 tons) or for next season's seed and other grain use. The remaining 500,000 tons are second grade seed, which are crushed to yield soy oil and soybean meal. The 20% of production used for food is used as follows: Fresh soybeans (*toa rae*) sold in open markets. Home industries: Soymilk, curd (tofu), soy sauce, fermented soybeans (*tao chiew*), soybean sprouts, starch or protein isolate for hot dogs or other sausages, and crisps (*Tao Nao*). Soy milk industries: Instant powdered milk mixed with dairy milk, fresh soymilk in packages, fresh soymilk in open market restaurants. "No soy grain [soybean seeds] is exported, except for a small amount of first-grade soybean to Singapore and Malaysia for making the above mentioned food."

"Vegetable soybean: Vegetable soybean is becoming more popular in agri-business, as many frozen-product companies are showing interest in this new crop. Seed is imported from Japan and Taiwan. Production yield has been impressive in several regions of the country such as Chiangmai, Chachoengsao, Petchburi, etc. Two companies which are close to the extension offices, are Chiangmai Frozen Food Co. and Okada Corporation Ltd.

"The Department of Agricultural Extension plays the role of middleman between private companies and the farmer. Extension officers also transfer new information to the local farmers. Additionally, a national plan on vegetable soybean has been submitted to the policymakers and a future plan includes the promotion of domestic consumption."

"Previous activities: In 1972 the idea of a soybean campaign was first thought of by scientists in the Institute of Food Research and Product Development, Kasetsart University and the Department of Agricultural Extension. The major sponsor and co-creator, was the American Soybean Association. The co-institutes organized a grand dinner to open the campaign. Afterwards, the Department of Agricultural Extension encouraged Bangkok and provincial headquarters to organize exhibitions, field days and local broadcasting or publications on soybean production and processing. The home-economists from various provinces and organizations met for training and a seminar. The Food Institutes of Kasetsart University played a major role through publications, technology transfer, demonstrations and seminars."

© Copyright Soyinfo Center 2013

"Since the opening of the soybean campaign, we assume that about 50 percent of the total population has received information about soybean. At least 10 percent of the population has started or increased soybean consumption, both industrial and home made products. This evaluation was carried out by the working group using stratified random sampling with a well-designed questionnaire.

"From general observation, soybean has become more popular than in the past. Urban people are now aware of soybean products and do not object to consuming soybean in their regular diet. Rural people, however, have very definite ideas about food and it is difficult to change their traditional food habits. The main target of our campaign was therefore to introduce soybean products into the daily food pattern of rural villagers." Address: Div. of Crops Promotion, Dep. of Agriculture Extension, Bangkok, Thailand.

10262. Conil, Christopher; Conil, Jean. 1992. New tofu recipes. London: W. Foulsham & Co. Ltd. 96 p. Illust. Index. 20 cm.
• ***Summary:*** The title reads: "New vegetarian tofu recipes." This cookbook is a slightly revised and condensed version of its predecessor, titled *The Secrets of Tofu* (published in 1986), except that it contains no color photos. The front photo is different but the text on the rear cover is almost identical, and is the text in the first half of the Introduction. Even the photo of the two authors (both men) is gone. Contents: Foreword. Introduction. 1. Tofu and soya. 2. How to make tofu. 3. Soups. 4. Starters. 5. Main dishes. 6. Snacks. Biographical information about the authors. Address: 1. Master Chef; 1. Master Baker. Both: England.

10263. Constantine, Peter. 1992. Japanese street slang. New York and Tokyo: Tengu Books. xxiv + 190 p. Index. 21 cm. [20 ref]
• ***Summary:*** Contains Romanized Japanese phrases with English translations. The author was born in 1963.

Page 97: "Two cruder street-favorites for testicle are *oinari-san* and *oinaribukuro. Oinari-san* is a type of sushi that originated in Osaka and looks remarkably like balls.

Note. This is the earliest English-language document seen (April 2013) that uses the term "oinari-san" or the term "oinari" to refer to inari-zushi, made from deep-fried tofu pouches. Address: Linguistic researcher, USA and Japan.

Germany: Otto Wilhelm Barth Verlag. 287 p. Index. 21 cm. [Ger]
• ***Summary:*** This book is a translation, by Theo Kierdorf, assisted by Hildegard Hoehr, of the original American edition titled *Prince Wen Hui's Cook: Chinese Diet Therapy,* copyright 1983 by Bob Flaws and Honora Lee Wolf. It mentions soybeans (p. 257), soy oil (p. 258), and tofu (p. 263).

10267. Gordon, Jonathan Fraser. 1992. Improved lactic fermentation of soymilk for the preparation of soya bean curd. PhD thesis, University of Strathclyde, Dep. of Chemical and Process Engineering. 205 p. [92 ref]
• ***Summary:*** The purpose of this work was to establish whether soymilk could be successfully fermented by lactic acid bacteria to prepare tofu. This could lead to improved storage characteristics similar to hard, dairy cheeses. Traditional tofu is very susceptible to bacterial spoilage. "This makes it unsuitable for use in many underdeveloped countries where it could provide a valuable protein source if it were more stable."

Soymilk has been shown to be a poor fermentation medium for lactic acid bacteria. Heat treatment between 80-100ºC has been shown to limit its potential for supporting the growth of lactic acid bacteria–due to the formation of toxic, volatile sulphides.

A solution to this problem was found by germinating the soybeans prior to soymilk preparation. Germination for 72 hours in a specially designed box reduced the total sugar content of the soymilk to less than 60% of that found in ungerminated soymilk (i.e., that made from ungerminated soybeans). Despite this, acid production and growth of *Lactobacillus fermenti* was greatly enhanced in the germinated soymilk. "The main reason for the enhanced growth and lactic acid production appeared to be because germination increased the concentration of amino nitrogen in the germinated soymilk." Nitrogen limitation appears to be the main factor causing inhibition of growth of *L. fermenti* in ungerminated soymilk, but the toxic sulphides then act to cause further inhibition. Germination was shown to increase the concentrations of vitamin C and the B vitamins in soymilk, but it did not decrease trypsin inhibitor activity in the soybeans.

"A firmly pressed tofu was prepared from 72 hour germinated, fermented soymilk and kept for 6 weeks at

© Copyright Soyinfo Center 2013

10ºC. It displayed none of the spoilage that would have characterized conventional tofu. It had the consistency of rubbery Edam cheese and a pleasant, slightly beany, acidic flavor." Address: Scotland.

10268. Gregorson, Jon. 1992. The good earth. Vancouver, Toronto, Canada: Whitecap Books. viii + 211 p. Index. 23 cm. [30 ref]
• ***Summary:*** The entry for "Chinese green bean (*Vigna sesquipedalis*) (p. 50-51) states: "Chinese green beans are excellent very lightly steamed and served with oil and chopped garlic. They are also very good in a black bean sauce with rice or millet." The entry for "Soybean (*Glycine max*) (p. 166-67) states: The "importance of soybean products for vegetarians can scarcely be overemphasized. Such products include tofu or bean curd, tempeh, soy "milk," soy flour, and the various soybean sauces and pastes..." Tofu is perhaps the most important soybean product. Address: Eugene, Oregon.

10269. Kawakami, Kozo. 1992. Tsurezure Nihon shokumotsu-shi. 2 v [Leisurely history of Japanese foods. Vols. 1-2]. Tokyo: Tokyo Bijutsu. Illust. 21 cm. [35+ ref. Jap]
• ***Summary:*** Vol. 1 (vi + 151 p.) contains chapters on: Ryokutô [ryokuto] (bundô, yaenari; p. 74-76, mentions tofu. Note: Kinch 1879 says *Phaseolus radiatus subtriloba* = bundô). Ganmodoki and hiryozu [tofu burgers] (p. 85-89; 9+5 ref.). Yose-dofu (p. 89-99; 13 ref.). Itoko-ni (p. 108-10; 13 ref.; with soybeans, azuki beans and tofu). Gomashio (p. 128-30; 7 ref.).

Vol. 2 (3 + 151 + 5 p.): A color illustration titled (*Nori-zukuri no zu*), by Katsukawa Shunsen (?) on the dust jacket shows women making nori in old Japan. They are chopping freshly collected nori and drying it in sheets. Another old 3-part illustration of making nori is printed on the cover. Contents (centered on foods and treats from the sea) includes: Nori and kawa-nori (from the sea and from rivers. p. 1-5; 35 ref. 1 illust.). Asakusa nori, Kassai nori, Shinagawa nori, and other nori from the Pacific Coast and Inland Sea (*Setonai-kai*) during the Edo Period (p. 8-16, 39 ref. 4 illust.). Nori from the Japan Sea (*Nihonkai*) No. 1: Izumo nori, Uppuri nori, and Kamoji nori. Uppuri is a place near Izumo, and Kamoji is a wig-like hair filler (p. 17-20, 21 ref.). Nori from the Japan Sea (*Nihonkai*) No. 2: Kuro nori, Yuki nori, Noto nori, and Kasashima / Kasajima of Echigo nori (p. 21-24, 21 ref.). The story of river nori, Shiba river nori, Nikko nori, and Kikuchi nori (p. 25-30, 26 ref. 1 illust.). Dried frozen tokoroten (*kôri tokoroten*), made from frozen seaweed (p. 98-102, 3 ref.). Mizukara (a spicy food made from kombu, p. 103-05, 16 ref.). Musubi kombu, musubi kanpyo, and musubi sayori (musubi means "tied up in like a bow in a special way;" p. 106-10, 25 ref. 2 illust.). Musubi yamaimo (mountain glutinous yam) and musubi tofu (both tied up in a special decorative way. p. 111-14, 14 ref.). Also contains other interesting illustrations and chapters. Address: Japan.

• ***Summary:*** This is a revised edition (but revised only in very small ways) of the 1990 edition, also published by Celestial Arts. The cover of both books is the same except that the words "Revised & Updated" appear near the top of the cover in the 1992 edition–but not on the title page. The title page and the total number of pages in both editions are the same. Page 234, the index, and the following page about the author are all slightly expanded. The page facing the inside rear cover, advertising various books published by Celestial Arts, has been completely revised. The rear cover has a more recent portrait photo of the author. The text related to soy is identical and on the same pages.

Susan M. Lark, M.D., born in 1945, "is a noted authority on women's health care and preventive medicine. Dr. Lark has been on the clinical faculty of Stanford University Medical School, Division of Family and Community Medicine, where she continues to teach. She has been the director of a number of clinical programs for women and worked with thousands of patients in her nearly twenty years of private practice... Dr. Lark is available for phone consultation at (415) 964-7268." Address: M.D., 101 First St., Suite 441, Los Altos, California 94022. Phone: 415-964-7268.

10271. Leneman, Leah. 1992. The tofu cookbook. Hammersmith, London, England: Thorsons–An imprint of HarperCollins Publishers. 127 p. Illust. Index. 24 cm.
• ***Summary:*** "These no-meat, no-dairy, cruelty-free recipes foster health and a healthy environment by replacing meat and dairy products in traditional recipes with tofu... and soy milk. From bouillabaisse and guacamole to lasagna, curries, and ice cream, here are delicious new takes on your favorite international recipes." The copyright page notes: "Many of these recipes previously appeared in *The International Tofu Cookery Book* and *Soya Foods Cookery.*

Contents: Introduction. Types of tofu. Other soya (soy) foods: Soya milk, soya yogurt, soya mayonnaise, bean curd sticks or sheets, tempeh, soy sauce, miso, soya cheese (such as Veeze). Notes on recipes. Making tofu at home. 1. Soups and dips. Note: Ingredients for every recipe are given in both Imperial/Metric and American units. 2. Salads. 3. British- and American-style dishes. 4. Mexican-style dishes. 5. Mediterranean-style dishes. 6. Indian-style dishes. 7. Chinese- and other Far Eastern-style dishes. 8. Desserts. Recipe reference chart (for quick and easy recipes, recipes suitable for a single portion, and recipes for a dinner party).

Note: *Webster's Dictionary* defines bouillabaisse

© Copyright Soyinfo Center 2013

(pronounced bu-yuh-BAYZ, a term derived from the French and first used in 1855) as a highly seasoned fish stew made with at least two kinds of fish. See also: Potpourri. Address: 19 Leamington Terrace, Edinburgh EH10 4JP, Scotland.

10272. Liu, Christine Y.C. 1992. Nutritional cooking with tofu. Completely revised. Ann Arbor, Michigan: Graphique Publishing. x + 174 p. Illust. Index. 22 cm. [15 ref]
• ***Summary:*** The first edition of this book was published in 1984. This edition differs from the first edition in several ways: (1) On the cover (but not on the title page) is printed: "Completely revised," and after her name: "M.P.H." The Introduction has been revised and expanded slightly. A 1-page "Definition of terms" and 1 page of "Tips on keeping and using tofu" have been added. One page "About the author" has been added at the end.

Note: The term "Completely revised" seems inappropriate. Address: M.P.H., P.O. Box 1332, Ann Arbor, Michigan.

10273. Margen, Sheldon. 1992. The wellness encyclopedia of food and nutrition: How to buy, store, and prepare every variety of fresh food. New Nork, NY: Rebus. 512 p. Illust. Index. 26 x 21 cm.
• ***Summary:*** Soy-related information appears on the following pages: Soybeans, illustrated and described (p. 60). Sprouts, including soybean and adzuki bean sprouts (p. 158-60). "Soybean sprouts contain small quantities of toxins that can be harmful, if eaten in large quantities" [uncooked, see p. 356]. Legumes (p. 348-58), incl. soybeans, "soy nuts," soy milk. Legumes are "by far the best plant source of protein..." Per half 3½ ounces (½ cup cooked) soybeans contain more calories, fat, protein, iron, and calcium than any other of the 15 legumes listed (p. 351). How to avoid the gas problem. Tofu, miso, and tempeh (p. 357, sidebar). Non-dairy frozen desserts (made from tofu, p. 461). Soy cheese (p. 469). Soybean oil and margarine (p. 497-98).

Concerning vitamin K, see p. 16, 27, 30. The RDA for adults is 45-80 mcg. The body stores this fat-soluble vitamin for a relatively long time. Without this vitamin, blood would fail to clot. Preliminary studies suggest it also plays a role in maintaining strong bones in the elderly. Bacteria in the body's intestines manufacture about 80% of the vitamin K we need, and the rest comes from the diet. Deficiencies are almost unknown, and they are usually caused by an inability to absorb the vitamin, rather than an inadequate intake. Sources: Cabbage, cauliflower, spinach and other leafy vegetables, cereals, soybean oil and other vegetable oils. Address: School of Public Health, Berkeley, California.

10274. Morinaga Nutritional Foods, Inc. 1992. Lessons in tofu (Poster). 5800 South Eastern Ave., Suite 270, Los Angeles, CA 90040. 1 p. 37 x 54 cm. Color. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.
• ***Summary:*** This large and attractive full-color poster is designed to answer the following questions: Parlez-vous tofu? 1. Just what is tofu? 2. Why is tofu so good for you? 3. Isn't tofu considered a potentially hazardous food by the FDA? 4. How is tofu packaged? 5. Isn't tofu a hassle to keep? 6. What do you do with tofu? (ideas of using the 3 different types of Mori-Nu Tofu). Points 3, 4, and 5 are used to criticize "old fashioned" water-packed tofu in plastic tubs.

Photos show various tasty tofu recipes at the center and the three types of Mori-Nu tofu stacked one atop the other on the front at the lower right. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Address: Los Angeles, California. Phone: 1-800-NOW TOFU.

10275. Raymond, Jennifer. 1992. The peaceful palate: Fine vegetarian cuisine. Palo Alto, California: Published by the author. 129 p. Illust. Index. 28 cm. *
• ***Summary:*** A vegan cookbook, with a substantial section on vegan nutrition. Content: Protein myths and facts. Calcium. Putting fat in its place. Modifying recipes to eliminate fat. Dairy products and eggs. About sweeteners. About dried beans. Cooking grains and beans. Recipes: Breakfast, breads, salads, sandwiches and appetizers, soups and stews, grains and side dishes, vegetables, entrees, desserts, beverages. Glossary. The book contains 13 tofu-based recipes. Address: 284 Margarita Ave., Palo Alto, California 94306. Phone: 415-493-0211.

10276. Sass, Lorna J. 1992. An ecological kitchen: Healthy meals for you and the planet. New York, NY: William Morrow and Company, Inc. xv + 492 p. Index. 26 cm. [35+* ref]
• ***Summary:*** This excellent vegetarian (actually vegan), ecological cookbook, proves that the most environmentally sound diet is also the healthiest and, for many, the most delicious and economical. It emphasizes whole grains, fruits and vegetables, focuses on unprocessed and minimally packaged foods, use of regional and seasonal foods, efficient menu planning, and creative recycling of leftovers. Delightful quotations relevant to the book's subject are scattered throughout.

The author's guiding principles for cooking ecologically are: "Eat a plant-based [vegan] diet; buy organic, regional, seasonal produce whenever possible; and use nontoxic products to keep your kitchen clean."

The chapter titled "Tofu and tempeh" (p. 217-31) contains basic information and many recipes. Other soy-related recipes include: Thai vegetable soup (with tofu, p. 39). Ten-ingredient lo mien (with tofu, p. 165-66). Triple bean maybe it's chili (p. 186-87). Black soybeans (p. 191-92; keep the skins on by adding salt). Curried mustard greens with tofu (p. 255). Chinese-style stir-fry of kale, onions, and marinated tofu (p. 258). Tahini-miso spread (p. 315). Sun-dried tomato dip (with tofu, p. 318). Brilliant beet dip (with

© Copyright Soyinfo Center 2013

tofu, p. 319). Onion upside-down cornbread (with tofu, p. 323-24). Tofu whip (like whipped cream or whip topping, p. 398).

The very fine chapter / glossary "Ingredients A to Z" (p. 399-468) includes: Aduki / azuki beans, agar, almond butter, almonds, amaranth, amasake (incl. koji), arame, barley malt syrup.

Black beans–fermented (salty black beans): "Black beans, fermented (Salty black beans): A little of this Chinese specialty–small black soybeans preserved in salt–goes a long way. About 1 tablespoon adds a deliciously complex flavor to stir-fries. Chop the beans finely to disperse their flavor. If you like the taste but want to reduce the salt, soak the beans briefly in water before using. Fermented black beans last for about a year in a well-sealed jar under refrigeration.

"Bragg Liquid Aminos: This is a *very tasty* soy-sauce-like condiment made by extracting amino acids from organic soybeans. Its flavor is more winelike and complex than most soy sauces. It is salty, so sprinkle sparingly. (There is no added salt, but 125 milligrams of sodium per ½ teaspoon come from the natural sodium in the soybeans.)

"Unlike soy sauce, Bragg Liquid Aminos is not fermented, making it an ideal seasoning for those who suffer from yeast sensitivities. Delicious added to stir-fries or plain-cooked grains. It is readily available in health food stores." Also in natural food stores.

Daikon, dulse, gomashio, hijicki / hizicki [sic, hijiki], job's tears, kombu, kuzu (kudzu), kuzu kiri, lupins, miso, mochi, natto, nigari, nori, peanut butter, peanuts, quinoa, rice–brown, rice cakes, rice syrup, sea vegetables, tamari-roasted seeds, seitan (wheat gluten), sesame butter (tahini), sesame oil, sesame seeds, shoyu, soybeans, soybeans–black, soy cheese, soy flakes, soy flour, soyfoods, soy grits, soy ice cream, soy milk, soynuts, soy oil, soy powder (powdered soy milk), soysage, soy sauce, soy yogurt (fermented), tahini, tamari soy sauce, tempeh, tofu, umeboshi plums, wakame, wasabi, winged beans. Note: Also contains recipes for many of these glossary items.

A color portrait photo on the inside rear dust jacket shows Lorna Sass–with a brief biography; she is a culinary historian, cookbook author, and food writer. Address: Box 704, New York City, NY 10024.

Address: Munich, Germany.

10278. So, Yan-kit. 1992. Classic food of China. London: Macmillan. xii + 387 p. Illust. (incl. many color photos by Tim Hill). Index. 25 x 20 cm. [55 ref]
• ***Summary:*** The author, a woman, has been called "Britain's foremost authority on Chinese cookery." Her first book, *Yan Kit's Classic Chinese Cookbook,* won both the Glenfiddich and the André Simon awards for 1984. This is an extremely interesting, well-written and practical book. As she explains in the Preface, the author is deeply interested in the history of and deeper questions about Chinese food. She grew up in Hong Kong. Her audience is both Chinese and non-Chinese who have an enthusiasm for food. She first began to cook for Westerners more than thirty years ago, first as a foreign student and later as the wife of an American academic, when she "entertained her husband's colleagues and students in Syracuse, upstate New York, as well as his family in Philadelphia and Waterford, Connecticut.

Contents: Acknowledgements. A note on the spelling of Chinese words (using the Pinyin system, where c = ts; q = ch; x = hs; z = dz; zh = j). A note on the translations (with a map of China's four main cookery regions {northern, eastern, western, and southern}). Main Chinese dynasties (p. xi, starting with the Xia, from approx. 21st to 16th century BC). Preface. Introduction. Culinary traditions. Important culinary books (p. 21-43, an excellent essay). Chinese festivals (p. 44-63). Tea. Regional diversities. Foreign influences. The recipes (p. 119-352, including one chapter titled "Bean curd dishes," p. 208-22).

Preparatory techniques. Steamers and steaming. Basic ingredients. Glossary. Main references (many of which are reprints of Chinese food classics).

The author uses the Introduction to discuss important figures in the history of Chinese food. These include: (1) Su Dongpo (1037-1101, also named Su Shi) (p. 2-4), the famous 11th century Song poet who called himself "the old gourmand." Of the many poets in the Tang and Song dynasties, when Chinese poetry "reached its zenith, he was the most unabashed and unrestrained when writing about food and wine." An illustration shows Su Dongpo. In spite of his great spiritual awareness and his inclination toward Buddhism and Daoism, he did not become a vegetarian until he was in old age, when his health began to fail. During his turbulent career, he traveled widely in China and wrote about the different foods he encountered. He was especially fond of pork and he became an expert in the different ways of preparing it. A famous Hangzhou dish is named Dongpo Pork. He said he was willing to die for the taste of the Yangzi porpoise or globe fish (fugu in Japanese) even though he was well aware that it could be fatally poisonous if prepared improperly–"the poison lodging in the liver, the roe, and the reproductive glands."

(2) Confucius (551-479 BC, also named Kong Fuzi or Kongzi) (p. 4-7). An illustration shows Confucius, China's foremost and most influential sage and the author of *The Analects.* He believed that each man must first build up his own moral character. The ideal moral man, the 'gentleman,' aspires to benevolence, virtue, intelligence, courage, and learning. His attitude toward food was neither obsessive nor passionate, but simple and austere. He wrote: With coarse rice to eat, with water to drink, and my bended arm for a

© Copyright Soyinfo Center 2013

pillow, I still have joy in the midst of things. Modern China went through a vehement anti-Confucius era, especially from 1966 to 1976 during the Cultural Revolution, yet his influence is now returning. He advised eating more rice than side dishes or meat. Prepare food carefully and practice good sanitation. He did not converse at meals.

(3) Mencius (372-289 BC, also named Menzi) (p. 7-9). "The attitude of a gentleman towards animals is this: once having seen them alive, he cannot bear to see them die, and once having heard their cry, he cannot bear to eat their flesh. That is why the gentleman keeps his distance from the kitchen." Chinese trace to Mencius the very relaxed attitude they have toward the complete enjoyment of food; it is human nature–yet no one can find a source by Mencius for this idea. An illustration shows Mencius.

The chapter on "Culinary traditions" (p. 10-20) continues this discussion of important figures in the history of Chinese food. (4) Yi Yin (lived ca 1600 BC to 1549 BC in the Shang dynasty) (p. 10-15) "is regarded as China's first master of gastronomy. His role as cook and later prime minister to King Tang, founder of the Shang dynasty (16th to 11th century BC) is mentioned in official history, but it is through the writing of Lu Buwei, of the 3rd century BC, that Yi Yin's gastronomic tenets have come down to posterity." His principles: Waste nothing; put everything to its best use. Use fire with skill–as in steaming and stir-frying. Blend the five tastes harmoniously–salty, bitter, sour, pungent, and sweet. Each taste corresponds to one of the five elements–water, fire, wood, metal, and earth–an idea that was already part of Chinese tradition by the 3rd century BC. Balance the two great forces: yin and yang. Yi Yin, a virtuous man, was promoted from the kitchen to become a minister at court.

(5) Cook Ding, as written by the Daoist philosopher Zhuangzi (Wade-Giles: Chuang Tzu). Cook Ding was carving an ox for Lord Wen-hui. His principle was to follow the Dao (Tao), even when carving an ox–so that his knife never became dull. There follows the story of how a noodle master makes "dancing noodles" following five distinct procedures.

(6) Woman cooks: The Buddhist nun Fan Zheng, as told during the Song dynasty. *Sous-chef* Liu of the Southern Song dynasty. Mrs. Song (12th century). Mrs. Chen (19th century), dubbed "Mapo" or the pock-marked woman. She and her husband, also a cook, lived in Chengdu, capital of Sichuan, where they ran a tavern together. She developed Mapo Doufu, made of bean curd [tofu] with a spicy meat sauce, which is today "one of the most renowned Chinese dishes in the world (see recipe p. 218).

(7) Wang Xiaoyu (p. 18-20) is "the only chef who has a biography written about him, albeit brief and published posthumously." For ten years until his death, Wang was employed by Yuan Mei (1716-1797), China's most renowned gastronome / gourmet and cookery writer of the 18th century (Qing dynasty). Yuan Mei was also a well-known poet, scholar and artist, born in today's Hangzhou in Zhejiang province in eastern central China. "Yuan had written many short biographies and each was about a person of special merit, either a literary figure, an official, a member of the aristocracy or one of his female pupils from noble families. That he included in his series Wang, whom he identified as but 'a lowly person,' reflects the great admiration he had for his cook." It is all the more remarkable that a master would write a tribute to a cook, who most masters took for granted. Yet after ten years, Yuan and Wang developed a very special relationship, so close that it transcended the typical one between master and servant. Wang did his own shopping at the market to obtain the very best ingredients. In his famous cookbook, Yuan Mei wrote a great deal about Wang's thought and practice. Yuan was very pleased that Wang, instead of seeking employment with rich or aristocratic families, "preferred to remain in his kitchen until he died." Continued. Address: England.

10279. So, Yan-kit. 1992. Classic food of China (Continued–Document part II). London: Macmillan. xii + 387 p. [55 ref]
• ***Summary:*** Continued. The chapter on "Important cookery books" continues where the previous two chapters left off–with a fascinating, in-depth discussion of the history of Chinese cookery, but with more focus on books, including: (1) *Shi Jing* or *The Book of Food,* by Cui Yao who was executed for treason in AD 450. All but the preface has been lost. (2) *Qimin Yaoshu* or *Essential Skills for the Daily Life of the People,* by Jia Xie, written between AD 533 and 544. (3) *Shi Jing* or *Book of Food* by Xie Feng, written around 600 AD. (4) *Shi Pu* or *Book of Recipes* by Wei Juyan, written during the early 8th century. (5) *Zhonggui Lu* or *Records of Home Cooking* by Mrs. Wu, written during the Song dynasty (AD 960-1279). (6) *Shanjia Gongqing* or *The Simple Offerings of a Mountain Hermit* by Lin Hong, written in the 13th century. He is acknowledged as the first person who used the modern term jiangyou for soy sauce. (7) *Yinshan Zhengyao* or *The Principles of Correct Diet* by Hoshoi (or Hu Sihui in Chinese), written in about 1314-1321 (Yuan dynasty). (8) *Yunlin Tang Yinshi Zhidu Ji* or *The Food System of the Yunlin House* by Ni Zan (lived 1301-1374; Yuan dynasty). (9) *Suiyuan Shidan* or *The Cookery Lists of Suiyuan* by Yuan Mei, published in 1792, five years before his death. A superb biography of Yuan Mei is given, together with a discussion of his influence on Chinese cookery.

The chapter on "Chinese festivals begins: "In 1912, the Republic of China officially adopted the Gregorian calendar used in the West, but the old lunar calendar, calculated more than four thousand years ago, has persisted, and it is according to this system that all the traditional Chinese festivals are celebrated to this day." The food served at each festival and the symbolism are described. The main festivals are: Chinese New Year, Double Fifth Festival (5th day of the 5th lunar month), Mid-Autumn Festival (15th day of the 8th

© Copyright Soyinfo Center 2013

lunar month).

Peking food stalls and hawkers offer "deep-fried bean curd triangles or squares... For breakfast they serve freshly made warm soybean milk, which is naturally sweet, to go with 'youtiao,' the deep-fried twin-strip dough that is mildly savoury, and not unlike an elongated doughnut, only more crispy to the bite and soft inside. Unless you are an early riser, you run the risk of having them been sold out before you get to the street corners where they are sold. Youtiao are arguably the most sought after and adored breakfast street food sold in China, though it is only in the north that they are twinned with soybean milk" (p. 80).

Many of the recipes in this book are based on those of classical Chinese cooks such as Yuan Mei and Su Dongpo. Soy-related recipes: Bean curd salad (p. 124). Bean curd skin rolls [yuba] (p. 140-42). Butterfly prawns in red bean curd cheese [red fermented tofu] (p. 147).

The chapter titled "Vegetarian dishes" (p. 170-90) begins with a history of vegetarianism in China. In the *Qimin Yaoshu* the chapter titled "Vegetarian food" contains China's first vegetarian dishes. Steamed wheat gluten or kaofu is a favorite in Shanghai (p. 176-77). Red-braised bean curd (p. 188-89). Sour and spicy bean curd cubes (p. 190).

The chapter on "Bean curd dishes" (p. 208-22) has recipes for: Homemade soy bean milk. Bean curd with scrambled egg. "Bless the old and the young." Braised bean curd puffs. Sautéed bean curd with spinach. Braised bean curd with bean sauces. Stir-fried bean curd with minced dried shrimp. Mapo doufu. Guotie bean curd. Green egg bean curd. Iced bean curd casserole [frozen tofu].

Mussels in black bean sauce (p. 257). Steamed grey mullet with puréed black bean sauce (p. 274).

The glossary (p. 364-80) has entries for: Bean curd. Bean curd 'cheese,' red fermented [red fermented tofu]. Bean curd 'cheese,' white fermented. Bean curd puffs [deep-fried tofu puffs]. Bean curd skin [yuba]. Black beans, fermented [fermented black soybeans]. Broadbean paste or soy bean paste, spicy hot. Ground (crushed) yellow bean sauce. Hoisin sauce. Soy bean paste, hot. Soy sauce.

About the author (inside rear dust jacket): Born in her ancestral village of Zhongshan, Guangdong province, she grew up and was educated in Hong Kong, where she graduated from the University with a starred first degree in history. She went on to acquire a DPhil [PhD] at the University of London. She was married twice, first to a Chinese surgeon whom she divorced, and then (in 1962) to the American historian Briton ("Brit") Martin Jr., who was the great love of her life. Their son Hugo (to whom this book is dedicated) was born in 1965, when they were at Syracuse University, New York. The family later went to Poona in India, where Brit was taking up an academic post, but, tragically, he died of a brain tumour in 1967, while still only in his 30s.

Brit's death was a watershed in Yan-kit's life and, for several years, her efforts to pull herself out of the consequent slough of grief had only limited success. Indeed, in 1976 she suffered a breakdown. Her subsequent salvation lay in taking up food studies and cookery, of which she proved to be a brilliant teacher. / Address: England.

10280. Toomay, Mindy; Hadler, Susan Geiskopf. 1992. The best 125 meatless pasta dishes. Rocklin, California: Prima Publishing. xvi + 318 p. Illust. Index. 22 cm.
• ***Summary:*** This vegetarian pasta cookbook contains information about tofu, tempeh, and miso, plus 7 tofu recipes, 2 tempeh recipes, and 2 miso recipes. Agé (puffy deep-fried tofu) is used in: Soba in broth with fried vegetables and agé. Soy sauce is used in various broth recipes.

10281. Toussaint-Samat, Maguelonne. 1992. A history of food. Translated from the French by Anthea Bell. Malden, Massachusetts, and Oxford, England: Blackwell Publishers Inc. xix + 801 p. Illust. Index. 23 cm. [200* ref]
• ***Summary:*** A fascinating book of vast scope. The author's principal interest is in the medieval and Renaissance culture of Europe, in particular the domestic economy, food, and clothing. Thus the focus of the book is on Europe (especially France) and the Middle East. It also emphasizes the symbolism of foods.

Chapter 2, "The history of gathering," contains a section titled "Soya: the most widely eaten plant in the world" (p. 51-56), which is long on myth and symbol, and short on historical accuracy. It briefly discusses the following: Soya milk, soya flour, miso, jiang, soya sauce, soya oil and meal, bean-sprouts, tofu, dried soya beans.

Interesting chapters include: The history of meat (p. 93+). The history of cereals (p. 125+). The history of oil (p. 205+). The history of bread and cakes (p. 223+). An essential food: The history of salt (p. 457+). Spice at any price (p. 480+, including The great trading companies). The lure of sugar (p. 552). The potato revolution (p. 711+). The assurance of dietetics (p. 755, including an excellent "Chronology of dietary progress" from 2 million B.C. to the present, with detailed information on food developments during the paleolithic, mesolithic, and neolithic periods of the Stone Age). Address: Historian, journalist, writer, France.

10282. Tropp, Barbara; Schreil, Arminda Asprer. 1992. China Moon cookbook. New York, NY: Workman Publishing. x + 518 p. Illust. (by Sandra Bruce). Index. 24 cm.
• ***Summary:*** China Moon Cafe is a small restaurant that Barbara opened in 1986 in downtown San Francisco in a 1930s art deco coffee shop on Post St. Barbara says she is primarily a cooking teacher but she is also one of the best writers in the world of food, and a superb interpreter of real Chinese food and ingredients to Westerners. Each recipe is

© Copyright Soyinfo Center 2013

made from scratch, in the traditional way, and comes with interesting (often lengthy) headnotes or sidebars.

Barbara prefers not to peel gingerroot but all of her chefs and sous-chefs insist that it be peeled–so it is (p. 8-9).

Ingredients for infusion: "Chinese fermented black beans should be moist and pliable to the touch. They should taste good, with a nice range of flavor in the aftertaste. My favorite brand is Pearl River Bridge, in a round yellow box. Don't use beans that are hard and shriveled" (p. 14).

The index contains 17 entries for hoisin sauce, 7 for black bean(s) (Chinese fermented), 5 for black bean sauce, 4 for bean sauce (all soy-based), 1 for mushroom soy sauce, and none for tofu (although it is described on p. 508).

"Mushroom soy sauce–infused with dried black (shiitake) mushrooms is the flavorful star of the black soy sauce family" (p. 148).

Black beans: "Don't wash 'em! Black bean sauces are usually flat and murky affairs. A practice followed religiously by most all Chinese cooks is to wash off the salt and mash the beans." Barbara does neither (p. 245).

Bean pastes: "All in the family: Hot bean paste, sweet bean paste, and hoisin sauce are close culinary cousins. Soy bean- and wheat-based condiments all, they might easily have been one in ancient times. Regional distinctions and the march of modernity have given us three separate products with flavors that work beautifully in combination." Barbara likes Koon Chun hoisin sauce and Szechwan brand hot and sweet bean pastes. They are made in Taiwan and are widely available (p. 308).

The "Glossary of special ingredients" (p. 501-08) includes descriptions of: Bean pastes (hot bean paste, sweet bean paste). Black soy sauce (Concentrated, made with molasses; her favorite is Pearl River Bridge. The English label reads "Soy, Superior Sauce." "The Chinese name for black soy sauce is 'old head soy,' referring to the extra aging process that gives this soy its savor"). "Hoisin sauce: This brown, salty-sweet sauce has a fascinating history in China; it changes its name and style from region to region, being wheat-based in some areas and soybean-based in others." She prefers Koon Chun brand. Salted black beans: They are fermented black soybeans. She prefers Pearl River Bridge brand packed in a cardboard box. Soy sauce: Her favorite brand is Pearl River Bridge; its label reads "Superior Soy." "Tofu: This protein-rich white substance made from soybeans delights the Chinese and baffles Westerners."

On the rear cover: "Barbara Tropp is the Julia Child of the Chinese Kitchen"–San Francisco Chronicle. Two color photos show Barbara Tropp, one on a motor scooter. And there is a brief biography. Address: San Francisco.

10283. Tu, Bich-Thuy. 1992. The current status of soybean production in South Viet Nam. In: Increasing Soybean Production in Asia: Proceedings of a Workshop. 1992. Bogor, Indonesia: CGPRT Centre. 187 p. See p. 151-65. Held 21-24 Aug. 1990 at Phitsanulok, Thailand. [3 ref]
• ***Summary:*** Contents: Soybean producing areas in South Viet Nam. Technical aspects of soybean production. Soybean utilization in Viet Nam. Policies necessary for the development of soybean production in South Viet Nam. Production constraints. Research activities conducted to date by U.A.F. Concluding remarks. Future research activities of U.A.F. Suggestions for future research.

"Utilization as food: In Viet Nam 80% of the soybean crop is used to produce soybean curd, fermented soybean curd, soybean milk, soybean meal and small quantities of soybean oil. Although many factories in Ho Chi Minh City produce sesame, groundnut and coconut oils, soybean oil remains uncommon." Address: Univ. of Agricultural Forestry of South Viet Nam (UAF), Ho Chi Minh Coty, South Viet Nam.

10284. Vegetarian diets. 1992. In: American Dietetic Association. 1992. Handbook of Clinical Dietetics. 2nd ed. New Haven, Connecticut, and London: Yale University Press. x + 588 p. See p. 47-57. Chap. 3. 28 cm. [48 ref]
• ***Summary:*** Contents: Definitions: Vegan diet or strict vegetarian diet, lactovegetarian diet, ovo-lacto-vegetarian diet, semivegetarian or partial vegetarian diet (usually excludes red meat but may include poultry, fish, or seafood), omnivorous diet, Zen macrobiotic diet. Purpose of the diet. Effects of the diet: Lower body weight, reduced blood pressure, reduced coronary artery disease, changes in platelets, decreased risk of renal stones [kidney stones], decreased cancer risk. Physiology, foods and nutrients. Indications for use. Possible adverse reactions (especially for strict vegans): vitamin B-12 deficiency, calcium deficiency, vitamin D deficiency, zinc deficiency, children's failure to thrive. Contraindications ("Some forms of Zen macrobiotic diet are grossly inadequate in many nutrients and have produced disastrous nutritional consequences in some of its younger adherents"). Clinical assessment. Biochemical assessment. Assessment of potential drug interactions. Implementing and education: Meal planning (mentions meat analogs, tofu, legumes, peanut butter), complementary proteins, ensuring dietary adequacy, vegetarian diets in infancy, counseling the vegetarian. Priorities for quality assurance.

Tables: (1) Amino acid content of various vegetarian protein sources. (2) Eating patterns for vegan infants and children. (3) Menu planning: Sample menu for the ovo-lacto-vegetarian (for a male, age 25-50). (4) Sample menu for the lactovegetarian (for a male, age 25-50). (5) Sample menu for the vegan (for a male, age 25-50).

10285. Weed, Susun S. 1992. Menopausal years: The wise woman way. Woodstock, New York: Ash Tree Publishing. xxiii + 204 p. Illust. Index. 22 cm. [soy ref]
• ***Summary:*** This book includes a discussion of the ways that

© Copyright Soyinfo Center 2013

tofu (p. 22, 102, 189) and soy milk (p. 24, 29) can be helpful for a woman passing through menopause. All information about soy is presented in a positive way. Address: Laughing Rock Farm.

10286. White Wave, Inc. 1992. I eat tofu and I vote! (Bumper sticker). 1990 N. 57th Court, Boulder, CO 80301. 11½ by 3 inches.
• ***Summary:*** This bumper sticker, released during the presidential election year of 1992, has white letters printed on a turquoise background. The White Wave Soyfoods logo is printed in yellow. It was released again during 1996–another election year.

Note: This is the earliest bumper sticker seen (Oct. 2001) that mentions soy. Address: Boulder, Colorado. Phone: 303-443-3470.

10287. Yamuna Devi. 1992. Yamuna's table: Healthy vegetarian cuisine inspired by the flavors of India. New York, NY: E.P. Dutton / Penguin Books USA Inc. xv + 335 p. Index. 25 cm.
• ***Summary:*** This book won the 1993 James Beard Award for the best international cookbook. In the "Entrees" chapter, the author uses tofu as an alternative to cheese in a number of recipes. She notes (p. 187): "In recent years, creative restaurant and spa chefs have been redesigning the parameters for tofu use. Inspired by their work, I tried tofu for the first time last year. Today I have devised scores of recipes for it." The recipes include: Cheese cutlets with pineapple-ginger glaze and basmati rice (p. 190). Almond-crusted cheese sticks with lime-horseradish mayonnaise (p. 192-93). Cheese fricadelle with two chutneys (p. 193-95). Vegetable and cheese ramekins with yellow pepper-tomato sauce (p. 196-97). Tex-Mex cheese tostadas with ancho chili-tomato salsa (p. 197-98). Herb cheese galette with cashew crust and papaya-cilantro chutney (and optional soya milk, p. 199-200). Cauliflower and cheese croquettes with horseradish potatoes (p. 200-02). Four-vegetable tart with two pepper sauces (p. 202-05). White cheese-vegetable pipérade (p. 204-05). On page 295 is a recipe for Maple Cream in which silken tofu can be used in place of low-fat cottage cheese. Address: Washington, DC.

10288. Bean Supreme Ltd. 1992? Soy revolution brings happiness (Leaflet). Penrose, Auckland, New Zealand. 2 p. Undated. 28 cm.
• ***Summary:*** The front of this color, 1-page, 2-sided leaflet shows the company's vacuum packed firm tofu [launched 1984], Nine 'n' Healthy Soy Milk [launched March 1989], Tofu Luncheon [new, launched Nov. 1991], and Lite Licks frozen dessert [launched Oct. 1986]. The company describes itself as "New Zealand's own soy innovator"–a very apt description.

The back side discusses Tofu Luncheon, and gives a nutritional analysis and 2 recipes. Address: P.O. Box 12082, 140 Hugo Johnson Dr., Penrose, Auckland, New Zealand. Phone: 09 579 0592.

10289. **Product Name:** Organic TofuBurgers [Original].
Manufacturer's Name: Stow Mills (Distributor).
Manufacturer's Address: Chesterfield, NH 03443-0301.
Date of Introduction: 1992?
Ingredients: Organic tofu (filtered water, organically grown soybeans, natural calcium chloride nigari–a natural mineral coagulant, not a preservative), fresh carrots, rolled oats, sunflower seeds, sesame seeds, dried currants, barley malt syrup, red miso (water, rice, soybeans, salt), onion powder, garlic powder, spices, guar gum, natural orange extract, canola oil.
Wt/Vol., Packaging, Price: 6.5 oz (184 gm) vacuum pack. Retails for $1.59 (7/92, Maryland).

© Copyright Soyinfo Center 2013

How Stored: Refrigerated.
Nutrition: Per 3.25 oz patty: Calories 240, protein 14 gm, carbohydrate 19 gm, fat 12 gm, cholesterol 0 mg, sodium 85 mg, dietary fiber 12 gm.
New Product–Documentation: Product with Label purchased at Fresh Fields, Rockville Pike, Maryland. 1992. July 20. Label is 4 by 5.5 inches. Self adhesive. Dark blue, red, and black on light blue and light green. Color photo of a Tofuburger with tomato slices, onion rings, and a lettuce leaf. "All natural. Wheat free. Low sodium. Meatless. Dairy free. No cholesterol. High calcium. High protein. Stow Mills Tofu Burgers are precooked for your convenience. Please do not overcook. To prepare, just grill, fry or microwave until heated."

10290. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Sítio Pé-na-terra.
Manufacturer's Address: Estrada Morro dos Bois, 93490 Lomba Grande, Novo Hamburgo, RS, Brazil.
Date of Introduction: 1992?
New Product–Documentation: Letter from Mark Schultz. 1992. May 24. Ordering Tofu & Soymilk Production. "Being a small industry located on a producer-consumer cooperative, I have deducted 20% from the price of the book as offered for prepaid orders from developing countries."

10291. *Times* (*Milford, Nebraska*). 1993. Soybean foods reduce cancer risk. Jan. 27.
• ***Summary:*** Doreen Blackmer, director of consumer information for the Nebraska Soybean Program, is excited about the potential significance of soybeans in fighting cancer. She explains that "you can substitute tofu for part of the cheese in your lasagna recipe. You can add a teaspoon of miso to your baked beans."

Dr. Mark Messina says that the first "golden age" of nutrition was from 1910 to 1940 with the discovery of all the vitamins and minerals essential to good health. He says we are now entering the second golden age when the value of "anti-nutrients" is being discovered. This is where soybeans come into the picture.

10292. Wang, Kent. 1993. Re: Vacuum packaging of tofu and some other soy products may promote the growth of *Clostridium botulinum.* Letter to William Shurtleff at Soyfoods Center, Jan. 27. 1 p. Typed, with signature on letterhead. [1 ref]
• ***Summary:*** Kent received a letter on the subject mentioned above from the Texas Department of Health. He thinks the letter originated with the FDA, Division of Food and Drugs. He wants to know how to deal with this problem which could cause botulism in humans consuming tofu that had been vacuum packed. Address: Houston Calco Inc., 2400 Dallas St., Houston, Texas 77003. Phone: 713-236-0745 or 236-8668.

10293. *Agri-Book Magazine* (*Exeter, ONT, Canada*). 1993. Beans in Canada. 19(3):1-23. Jan.
• ***Summary:*** This entire special issue is about soybeans in Canada, with emphasis on soybean production. The magazine is printed with soy ink. Articles include: Top yields with no-till. Ten myths about conservation tillage. Ontario Soybean Growers' Marketing Board Newsletter–new format (insert). Ad for symposium "Soybeans in Canada: Beyond 100 Years," organized by the Ontario Soybean Growers' Marketing Board, to be held 28-30 March 1993 in Toronto, Ontario, Canada at the Regal Constellation Hotel; gives names and photos of speakers. Breeding the soybeans of the future. Genetic ingenuity.

In the Newsletter, an article titled "Profile of Larry Miehls, Soybean Board Chairman," notes: "Sixty-five percent of Ontario's soybeans are grown in five counties–Essex, Kent, Lambton, Middlesex, and Elgin... Today the majority of acres goes to two Ontario crushing plants. Twenty percent of the crop is exported and half of that is for human consumption." Therefore breeders need to concentrate on developing soybeans with more sugar, more protein, and less oil. "There is also a trend toward whole roasted beans for animal feed, and I see this as a major area of growth... For food quality soybeans, Japan remains the board's largest export customer.

"Pacific rim customers are interested in buying Ontario soybeans because of their high quality. Canada is also credited with strict grading standards, good processing people–the cleaners and the baggers–and farmers who keep up-to-date. Natto and tofu quality soybeans are popular among the Pacific rim customers. 'The breeders have done a good job of developing beans to meet customer needs...

"'The Harovinton, a tofu bean, was developed at the Harrow Research Station with a lot of board support. It's really starting to take off,' says Larry."

10294. **Product Name:** Farm Foods Organic Pita Classics [Barbecue Style, Fajita Style, Pizza Style].
Manufacturer's Name: Farm Foods. Div. of Barricini Foods Inc.
Manufacturer's Address: 49 Old Bloomfield Ave., Mountain Lakes, NJ 07046. Phone: 201-334-0101.
Date of Introduction: 1993. January.
Ingredients: Barbecue Style: Pita: Whole wheat flour*, wheat flour*, unrefined safflower oil*, sea salt, yeast. Filling: Tofu*, tomato paste*, onions*, brown rice syrup*, apple cider vinegar*, maple syrup*, unrefined safflower oil*, rice starch*, natural flavor and spices. * = Organically grown.
Wt/Vol., Packaging, Price: 6 oz paperboard box.
How Stored: Frozen.
Nutrition: Barbecue. Per pita: Calories 260, protein 10 gm, carbohydrates 41 gm, fiber 2 gm, fat 6 gm, cholesterol 0 mg.

© Copyright Soyinfo Center 2013

New Product–Documentation: Color leaflet sent by Farm Foods. 1993. Feb. 9. "Organic Pita Classics: A delicious innovation in natural foods cuisine." A photo shows each of the 3 boxes and labels. Ingredient and nutritional information is given for each flavor.

Leaflet (8½ by 11 inch, black-and-white) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 1994. March 10-13. "Farm Foods Pita Classics." The three flavors are now named Sizzling Fajita, Zesty Pizza, and Barbecue Blast. Each contains a tasty blend of fresh vegetables, organic grains and tofu. They are completely lactose and cholesterol free.

10295. Freese, Betsy. 1993. Soybean surprises. *Successful Farming* 91(1):62-63. Jan.
• ***Summary:*** The United Soybean Board (USB), established in 1991, "is on a kick to tell consumers about the many benefits of the amazing soybean. Soy oil is the major ingredient in 77% of cooking oils, 84% of margarines, and 95% of salad dressings." USB encourages you to try these recipes–all using "soybean products. For a free copy of 'Cooking with Soybeans,' published by the Volunteer Soya Promoters, write: 360 Pierce Ave., North Mankato, Minnesota 56003."

Four recipes with color photos are given: Tofu lasagna, Four bean salad (with 1 cup cooked soybeans), Good-for-you muffins (with 8 oz tofu), and Soybean molasses pie (with 1 cup cooked and pureed soybeans). Address: Senior Editor.

10296. Lightlife Foods, Inc. 1993. Why protein from vegetable sources makes good sense: The Lightlife primer (Leaflet). Greenfield, Massachusetts. 4 panels each side. Each panel: 22 x 9 cm.
• ***Summary:*** Accompanying this leaflet is a glossy leaflet for Lightlife Meatless Smart Dogs, and a coupon to save $0.30 on any Lightlife product.

This leaflet appeared in a new format in March 1995. Address: P.O. Box 870, Greenfield, Massachusetts 01302. Phone: 1-800-274-6001.

10297. Ono, Tomotada; Katho, Shoji; Mothizuki [Mochizuki], Kazunori. 1993. Influences of calcium and pH on protein solubility in soybean milk. *Bioscience, Biotechnology, and Biochemistry* 57(1):24-28. Jan. [14 ref]* Address: Gifu Woman's Univ., 80 Taromaru, Gifu 501-25, Japan.

10298. **Product Name:** Tofu, Soymilk, Tortillas with Okara, and Whole Wheat Bread with Okara.
Manufacturer's Name: Soyane.
Manufacturer's Address: Nueva Goverdhana, km. 34 Carretera hacia Antigua, Santa Lucia Milpas Altas, Guatemala. Phone: 030-7179 or 030-7181.
Date of Introduction: 1993. January.
New Product–Documentation: Letter from Lorenz Stuber and Ellen Figueroa de Stuber. 1993. Aug. 20. Please see this letter for details on their work with soya, Soyane, and Comida Para Todos in Guatemala. Their work with soya in Guatemala began in 1985 with a vegetarian restaurant in Panajachel.

Follow-up response to questions from William Shurtleff of Soyfoods Center. 1993. Oct. 9. Since 1985 they have known about the soy dairy (which Plenty Canada had helped to establish) in San Bartolo, Solola, Guatemala. In July 1985 they started buying tofu and soy ice cream from San Bartolo for their vegetarian restaurant in Panajachel. They fried the tofu and sold it at the restaurant. In July 1989 they started to make tofu, soymilk, tortillas with okara, whole wheat bread with okara, and soyaburgers. In January 1993 they established Soyane and started to sell the first four of these foods, which they make at Nueva Goverdhana, km. 34 Carretera hacia Antigua, Santa Lucia Milpas Altas, Guatemala. Phone: 030-7179 / 030-7181. They are still working on developing labels; a sample of a generic label (which can be used on any of their soyfood products) is enclosed. As of October 1993 they sell the following amounts of each soyfood product: Tofu 42 kg/week (sold mostly to Korean people), soymilk 350 liters/week (distributed to 150 school children), tortillas with okara 15 kg/week (distributed to the people at the dump), and whole wheat bread with okara (110 kg of which is distributed to school children).

A Label sent by the Stubers is 3 by 2 inches, green and black on yellow. The largest letters say "Soyane." Across the top and bottom are written: "Comida para todos. Vivir sano es divirtido." A cartoon figure of a soybean is dancing and waving its arms. A soybean plant grows out of a round yin-yang (*t'ai chi*) symbol.

10299. **Product Name:** Befine.
Manufacturer's Name: VPS, Inc.
Manufacturer's Address: 2889 Trades West Rd., Santa Fe, NM 87505. Phone: 505-471-8979.
Date of Introduction: 1993. January.
Ingredients: Soybeans, water, calcium sulfate–a natural mineral, caramel color.
Wt/Vol., Packaging, Price: 2 lb bricks, Tiromat vacuum packed, the shape of a brick.
How Stored: Frozen.
Nutrition: Per 2 tamales: Calories 275, calories from fat 98, total fat 11 gm (saturated fat 1 gm), cholesterol 0 mg, sodium 365 mg, total carbohydrate 41 gm (dietary fiber 6 gm), protein 10 gm, vitamin A 25%, vitamin C 2%, calcium 26%, iron 64%.
New Product–Documentation: Interview with Richard Jennings, CEO of VPS, Inc. (Vegetable Protein Specialists). 1993. Nov. 28 and Dec. 1 (which see). The name "befine" was coined in about March 1992 by Sander Wijnen, at that

© Copyright Soyinfo Center 2013

time responsible for establishing VPS Europe BV.

Color leaflet (red, green, and black on yellow) sent by Richard Jennings. 1993. Dec. Printed for the IFT show in June 1994, this leaflet is titled "Befine: The ideal meat replacer. Eating is believing!"

Talk with Richard Jennings, CEO of VPS. 1995. Jan. 4 and 6. VPS is now making Befine in Santa Fe and shipping everything they make to the Netherlands. VPS Europe picks up the product in Rotterdam, then sells it to distributors, caterers (the European term for foodservice), and food processors (for use as an ingredient). VPS Europe also has burgers made, and is presenting the product to some meat companies who are considering carrying some non-meat products. Befine is now the company's only product. It was first sold as such, under the Befine name, in January 1993, mostly in New Mexico to foodservice. It was distributed mostly by Sysco, who was selling it largely to restaurants. Some was also sold in California by Allied Sysco. VPS no longer sells through Sysco. Ron Pickarski is testing the product. Befine has almost the same nutritional composition as hamburger, and contains almost no carbohydrates. How is Befine made into burgers? The binder is basically a soy protein isolate. The product as always been sold unseasoned. The end user seasons or flavors the product. They have developed Befine prototypes with a smoked or a grilled flavor. The soybeans used to make Befine have always been "transitional organic" which means organic but the land has been under organic production for two years but not for fully five years. The product has always been sold frozen. Today most of the product is sent to Europe in 10 kg vacuum-packed bags, but a small amount is sold in 1 kg bricks for caterers.

10300. Weiss, Rick. 1993. What's the matter with milk? *Health* (*San Francisco, California*) 7(1):18, 20. Jan/Feb. • ***Summary:*** Problems include: (1) 71% of milk samples taken from 5 Eastern U.S. states contained significantly too little or too much vitamin D (10% were too high, 61% too low); Too much vitamin D causes calcium to accumulate in the blood and urine, and can eventually lead to kidney failure. (2) Research has shown that milk can cause diabetes in some individuals. (3) "The U.S. Accounting Office released a report concluding that U.S. dairy farmers are routinely treating their herds with dozens of drugs not approved for use in milk-producing cows. Some of these drugs can cause allergies in people; others, like the antibiotic sulfamethazine, may cause cancer. But despite repeated promises to get on the ball, the Food and Drug Administration hadn't even begun to test for these contaminants in milk. No one yet knows if the drugs are causing health problems in milk-drinkers.

"To make matters worse, the revelation rekindled a smoldering controversy over the use of bovine somatotropin (BST), a genetically engineered hormone that makes cows give more milk and is being used experimentally at a few dairies across the country..."

Dr. Benjamin Spock recently proclaimed that "no infant should be fed cow's milk during the first year of life...

"Experts today agree that cow's milk can cause severe iron-deficiency anemia in infants, not only because it's lacking in this critical element but because it can cause iron-depleting intestinal bleeding. According to the American Academy of Pediatrics, the only appropriate beverage for infants up to 12 months of age is breast milk or iron-fortified infant formula" [including soy-based infant formulas].

Among the most outspoken critics of milk is Frank O. Oski, director of pediatrics at Johns Hopkins University School of Medicine in Baltimore, Maryland. "'Cow's milk is for calves,' Oski says flatly, 'not for people.' Oski notes that no other species, with the exception of the domesticated cat, continues to drink milk after tripling its birth weight (about one year for humans). And most people in the world, including a fifth of all Americans, lack the enzyme that breaks down the milk sugar lactose, leaving them gassy and bloated when they drink it.

"'There are three things you need to know about milk,' Oski says. 'Number one, nobody needs milk; there are plenty of other sources for everything that milk provides. Number two, certain people are harmed by milk–by allergies, for example. And number three, most people in the world do not drink milk.'"

A table shows that 1½ oz. of firm tofu provides the same amount of calcium as one glass of milk.

Note: This is the earliest document seen (June 2001) that mentions "BST" or "bovine somatotropin."

10301. **Product Name:** Organic Tofu–Fat Reduced!
Manufacturer's Name: White Wave, Inc.
Manufacturer's Address: 6123 E. Arapahoe Rd., Boulder, CO 80303. Phone: 303-443-3470.
Date of Introduction: 1993. January.
Ingredients: Rocky Mountain glacier water, OGBA certified organic dehulled soybeans, gypsum, nigari (magnesium chloride).
Wt/Vol., Packaging, Price: 16 oz packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.
How Stored: Refrigerated.
Nutrition: Per 85 gm.: Calories 90, calories from fat 35, total fat 4 gm (6% daily value; saturated fat 0 gm), cholesterol 0 mg, sodium 5 mg (0%), total carbohydrate 5 gm (2%; dietary fiber 2 gm [6%], protein 8 gm, calcium 4%, iron 6%. Percent daily values are based on a 2,000 calorie diet.
New Product–Documentation: Talk with Steve Demos. 1993. Jan. 21. The company will start shipping product tomorrow, and they will launch it in a big way at the Natural Products Expo at Anaheim in February. It is made with Nichii Microsoy Flakes and Nichii is helping in a big way to

© Copyright Soyinfo Center 2013

promote the product. The label says that the product has 30% less fat that regular tofu with the same water content, but actually laboratory analyses show that the product contains 42% less fat. White Wave listed 30% to be on the safe side. The product is certified organic by a third party organic certification organization. The product is priced at about 10-15% above the price of regular tofu. Steve also hopes to private label the product for other tofu companies.

News release from Susan L. Holden of Holden McClure. 1992. Jan. "White Wave launches first fat reduced tofu in America." "With 60 employees, White Wave sales have grown over 20% annually for the last 5 years, with estimated earnings [sic, sales] of over $4 million for 1992. In 1992, White Wave was named Small Business Manufacturer of the Year by the Boulder County Chamber of Commerce." The tofu is certified Kosher-Parve by Star K. "This premium product will retail for approximately $1.14 to $1.49 per pound... We've made a healthy product even healthier."

Label sent by Lon Stromnes of White Wave. 1993. Feb. 26. 5 by 4.25 inches. Dark blue, red, and white on yellow. Self adhesive (front and back labels). See-through window. Front panel: "Third Party Certified. Fewer calories derived from fat. Organic hard style. Fat reduced by 30%–with no loss of protein." In the lower right corner are the Japanese characters *Yûki Tofu* meaning "Organic Tofu." Back panel: "White Wave reduced fat tofu. Serving size: 1/5 block. Write for recipes." Note: This is one of the first labels seen to use the new FDA NLEA labeling format and information.

Color postcard used to advertise the product. 1993. Feb. "Have a block party! You'll want to celebrate a protein-rich block of tofu with 30% less fat. It's 100% natural and Third Party Certified Organic. And it cooks and tastes just like our regular tofu. So wake the neighbors. Its party time."

Talk with industry observers. 1993. March. The product is somewhat dry and crumbly. White Wave is now private labeling this tofu for Tree of Life, and has picked up a new distributor on the East Coast, plus Mrs. Gooch's on the West Coast.

Ad (full page, color) in Natural Foods Merchandiser. 1993. March. p. 18, and April p. 33. "The story of White Wave's reduced fat tofu: A simple tale of the first and only reduced fat tofu in America." A colorful story, with cartoons, a photo of the package label, and the "Nutrition Facts" panel. An 85 gm serving contains 4 gm of fat and 90 calories, of which 35 calories (38.8%) come from fat.

Leaflet of White Wave products. 1996. March. The product name is given as "White Wave Organic Reduced Fat Tofu (TM)."

Talk with Jonathan Gordon of White Wave. 1997. May 5. This tofu is coagulated with both calcium sulfate and nigari. According to an outside lab analysis dated Dec. 1992 the product contains 48 mg of calcium per 100 gm of tofu.

10302. White Wave, Inc. 1993. White Wave mission statement, company overview, and list of products currently sold (News release). 1990 N. 57th Court, Boulder, CO 80301. 2 p. Jan.

• ***Summary:*** "White Wave's mission is to creatively lead the full integration of low technology soyfoods into the average American diet. Our interest is in promoting the use of foods we consider the world better off with, rather than without."

"White Wave employs approximately 60 people and projects sales of over $4 million for 1992. Under the guidance of founder and president Steve Demos, White Wave has grown more than 20% annually for the last 5 years and was named the 1992 Small Business Manufacturer of the Year by the Boulder County Chamber of Commerce."

White Wave has six product lines: Tofu (7 products), tempeh (8), marinated tempeh (4), Dairyless soy yogurt (8), prepared foods–heat and serve (7), and Soya A Melt soy cheese (5 flavors plus 2 flavors of soy singles). Address: Boulder, Colorado. Phone: 303-443-3470.

10303. Gatesman, Jeanine M.; Pastorio, Bob. 1993. Pro-fu, Con-fu. Tofu: You love it or you hate it. *News-Record* (*Harrisonburg, Virginia*). Feb. 3.

• ***Summary:*** These are two parallel columns by a tofu lover (Gatesman) and a tofu hater. Gatesman writes: "It's white! Just like angel wings. The newspaper's food page may not lend itself to controversy–OK, maybe an occasional 'to baste or not to baste'–but not major issues like abortion, capital punishment or tofu. But we're gonna do it anyway.

"I am pro-child, pro-family, pro-tofu. From that last one, people are likely to draw further conclusions. After all, anyone who eats tofu is obviously a far-left liberal who eats granola for breakfast, wears only natural fibers, hangs around in coffeehouses with beatniks and has a penchant for folk music and weird poetry."

10304. Sands, Lee. 1993. Health nuts rejoice: White Wave begins selling low-fat tofu. *Denver Business Journal.* Feb. 18.

• ***Summary:*** "White Wave Soyfoods Inc. has done the impossible: It has made tofu healthier. Tofu is the meat and potatoes so to speak, of vegetarians and health food fanatics." The product hit the market in late January. White Wave president Steve Demos says: "We project selling between 10 and 20 tons of the reduced fat tofu per week within the next 90 days." The tofu will sell for $1.14 to $1.49 per pound–about 10-15 cents more per pound than regular tofu.

"White Wave has 65 employees and had revenues of $4.6 million in 1992. Demos said the company has grown between 18 percent and 30 percent every year since it opened in 1977."

10305. Badani, Bernard. 1993. Edible soybean mission report, Korea, Indonesia, Taiwan, February 1993. Ottawa,

© Copyright Soyinfo Center 2013

Ontario, Canada: Agriculture and Agri-Food Canada. iii + 14 + 17 p. 28 cm. Spiral bound.
• ***Summary:*** Contents: Foreword. Acknowledgements. Mission members: Tino Breuer, Ron MacDougall, Dr. Gary Ablett, Jim Lowe, Bernard Badani. 1. Visit to Korea: Executive summary, report, conclusions, recommended follow-up. 2. Visit to Indonesia: Executive summary, report, background, price structure, quality requirements, conclusions, recommended follow-up. 3. Visit to Taiwan: Executive summary, report, background, price structures, conclusions, recommended follow-up. Appendix A. List of contacts (photocopies of business cards of people met on the trip). List of 26 invitees for Canadian soybean seminar in Seoul (15 Feb. 1993), including academic researchers, government, soybean crushers, soysauce association, tofu association, food-related media, soybean milk manufacturers (Kwangja General Foods Co., Namyang Dairy Co., Lotte-Chilsung Beverage Co., Samyuk Foods Co., Dong-A/Otzka Co., Dr. Chung's Foods, See Joo Industry Co.). List of participants for Indonesia and business cards from Indonesia (incl. Primkopti, Sarpindo, Ikapti, Yeo's-P.T. Salim Graha). Business cards from Taiwan. Address: Oilseeds Div., Grain Marketing Bureau, Grains and Oilseeds Branch, Agriculture Canada, Ottawa.

10306. Legume, Inc. 1993. The Legume family of fine vegetarian cuisine (Ad). *Natural Foods Merchandiser.* Feb. p. 99.
• ***Summary:*** This full-page color ad begins: "Legume: The pioneer in all-natural, cholesterol-free, and low-calorie entrees has added a new dimension to their line of favorites. All Legume entrees are now made with organic tofu and organic pasta made from fresh-ground whole durum wheat.

"Legume's Classic Lasagna and Classic Manicotti have been resized and are now available in 11 oz. sizes. All six Legume entrees are now one size and line-priced.

"Look for the full Legume line of entrees including: Vegetable Lasagna. Classic Lasagna Manicotti Florentine. Classic Manicotti Stuffed Shells. Mexican Enchiladas."

A new product is Legume Potato Pockets.

And Legume offers Heart & Soul Trim Slice Meatless Cold Cuts–"a delicious vegetarian alternative to traditional meat deli slices. Trim slices contain no cholesterol, are 30% lower in saturated fat, and higher in protein than their meat counterparts. Trim Slice is available in the following flavors both in slices for the consumer, and in chubs for institutional use: Turkey-Style. Ham. Roast Beef-Style. Coming attractions:..."

Three large color photos show these different product lines. Address: 112 Main Rd., Montville, New Jersey 07045. Phone: 201-263-1013.

10307. **Product Name:** [Tofu (Plain), Tofu with Seasonings (Tomato, Mushrooms, Cheese)].
Foreign Name: Tofu Nature.
Manufacturer's Name: Meehano.
Manufacturer's Address: ZI Le Dresseve, B.P. 47, 56150 Baud, France. Phone: (33) 97.51.12.75.
Date of Introduction: 1993. February.
New Product–Documentation: Form filled out by Thérèse Le Mee. 1994. Jan. 18. Her company began producing soyfoods on 1 Feb. 1993. She now produces 500 kg/month of her various tofu products.

10308. Morinaga Nutritional Foods, Inc. 1993. A prize in every box (Ad). *Vegetarian Times.* Feb. p. 3.
• ***Summary:*** This full-page color ad shows a stir-fry dish in a wok with cubes of tofu and many sliced veggies plus a few fruits.

The text at the bottom reads: "In every box of Mori-Nu Tofu you'll find a wonderful surprise–fresh-tasting Mori-Nu Tofu. You won't need to worry about soured tofu. Or spoiled tofu. Or any of the problems you may have had with traditional water pack tofu.

"You can rely on Mori-Nu, consistently, to be the same texture and quality, box after long-life box. Choose our Extra-Firm, Firm or Soft variety.

"From the very first taste, you'll see why Mori-Nu Tofu is prized by cooks everywhere, for tempting main dishes, rich and creamy desserts, and traditional tofu recipes.

"You can claim your Mori-Nu prize in your supermarket produce section or health food store. Mori-Nu. Pure tofu, perfect package." At the lower right is the red Mori-Nu logo. Address: 2050 W. 190th St., Suite 110, Torrance, California 90504.

10309. **Product Name:** Smoked Tofu.
Manufacturer's Name: Sweet Angel / Clearway Kitchen.
Manufacturer's Address: 1037 17th Ave., Santa Cruz, CA 95062. Phone: 408-476-6390.
Date of Introduction: 1993. February.
New Product–Documentation: Talk with Buddy Hamel, owner of Clearway. 1987. Aug. This product was introduced in 1983, but has been discontinued. Talk with Jiji of Clearway. 1993. Aug. 19. Smoked Tofu is currently on the market. Talk with Buddy Hamel of Clearway Kitchens/Sweet Angel. 1993. Aug. 20. His address is now 209 Redwood Rd., Corralitos, California 95076. Smoked Tofu is now on the market and he has been making it for about the last 6-7 months. Prior to that he had made smoked tofu only on an experimental basis; it was never commercialized. The product was actually introduced by his other company named Sweet Angel, which is closely related to Clearway Kitchen and located at the same address.

10310. White Wave, Inc. 1993. White Wave Soyfoods–The conscious choice (Ecology and nutrition information cards). 1990 N. 57th Court, Boulder, CO 80301. 1 p. 3 by 5 inches.

© Copyright Soyinfo Center 2013

• ***Summary:*** These creative, colorful, and informative cards were available at the Natural Products Expo West at Anaheim, California. 1995. March. Each 3 by 5-inch card is printed on both sides. On the front is a title, a subtitle, a cartoon, and a brief message. On the back are more details. The titles are: "A hot flash about tofu" (Consumption of soyfoods may help Japanese women relieve the symptoms of menopause). "Soy protein is complete" (Soyfoods such as tofu and tempeh provide all 8 of the amino acids our bodies need). "Veggie protein saves petrol" ("One unit of energy can produce 39 times more protein from soybeans than from meat. So, a vegetarian diet helps our resources last far into the future"). "Soyfoods save water" ("It takes over 5,000 gallons of water to produce a pound of beef, but only 25 gallons to produce a pound of wheat").

Note: These are the earliest information cards seen (Oct. 2001) that mention soy. Address: Boulder, Colorado. Phone: 303-443-3470.

10311. White Wave, Inc. 1993. Quick & easy recipes (Recipe cards). 1990 N. 57th Court, Boulder, CO 80301. 3 by 4 inches.
• ***Summary:*** These colorful recipe cards were introduced in Feb. 1993 and were available at the Natural Products Expo West at Anaheim, California. 1995. March. Each 3 by 4-inch card is printed on both sides. On the front, at the top is written "Quick & Easy Recipe." Below that is the recipe name, a brief description of the recipe by Leonardo, White Wave Corporate Chef, and a large White Wave logo. On the back is the recipe itself.

There are cards for: Tempeh mock chicken salad. Tempeh Reuben. Lemon broil [tempeh with] pasta sauce. Almost Chinese hot & sour soup. Sizzling savory tofu steaks. Pepper tofu steak sandwich. Address: Boulder, Colorado. Phone: 303-443-3470.

10312. Lane, Charlotte Balcomb. 1993. Tofu craving feeds success of company: A Plant City couple sells a firm-textured tofu for American tastes to stores throughout the Southeast. *Sentinel* (*Orlando, Florida*). March 11.
• ***Summary:*** A photo shows John and Marcia Miller with samples of the food they produce (including Tofu Crumbles, and boxed Tofu) at Marjon Specialty Foods in Plant City, Florida. Peter Golbitz of Soyatech says that in 1985 Americans ate about 60 million pounds of tofu; in 1992 the figure is projected to reach 84 million lb. "That equals about $100 million in annual tofu sales, most of it through mainstream consumer outlets such as grocery stores and supermarkets. 'Its not a meteoric, flash-in-the-pan increase, its a steady 5% to 10% annual rise in tofu consumption,' Golbitz said."

About 4 years ago Marjon "started making seasoned crumbled tofu which is ready to use from the package in tacos, salads, pasta sauces and any recipe calling for ground beef. The crumbles are lightly flavored with garlic, cumin and white pepper and dyed with a natural carmel coloring to the shade of browned hamburger. A four-ounce serving of crumbled tofu has a mere 82 calories and 1 gram of fat compared with a broiled four-ounce extra-lean burger patty with 290 calories and 18 grams of fat. Plus, it contains only a trace of sodium."

10313. Deveny, Kathleen. 1993. Tempted by taste and tiring of tofu, shoppers are bringing home the bacon: Marketscan. *Wall Street Journal.* March 18. p. B1, B8.
• ***Summary:*** "There are growing indications that consumers are getting fed up with healthful eating habits." Sales of bacon are booming in the USA. Oscar Meyer is by far the leading brand. Address: Staff reporter.

10314. Chen, Zinie. 1993. At Twin Oaks commune, soybeans turn a profit. *Daily Progress* (*Charlottesville, Virginia*). March 22.
• ***Summary:*** Twin Oaks commune in the hills of Central Virginia is turning organically grown soybeans into tofu–and profits. About 15 of Twin Oaks residents work making tofu part time. Jon Kessler, marketing director for the tofu operations, says that they started out making 700 pounds of tofu a week; now they are making 2,300 lb/week. In 1992 the tofu business had sales of $65,000 with profits of $27,000. Gross sales have almost doubled since 1990.

Twin Oaks buys its soybeans from an organic grower in Arkansas, and sells most of its products through two distributors. The University of Virginia buys tofu for its cafeterias. In addition to cakes of plain tofu, Twin Oaks also makes bean dips, burritos, tofu salad, soy milk, and herb-seasoned tofu. A photo shows "July" of Twin Oaks taking freshly made tofu out of a cooling bath. Address: Associated Press.

10315. Jain, Manoj. 1993. New developments with soyfoods in India (Interview). *SoyaScan Notes.* March 24. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** In June 1992 the book that he and his mother wrote, *Melody of India Cuisine,* was published in the USA. Since that time they have been doing many soyfoods demonstrations and promoting their book in the Boston area. In about 1985-86 he did field research and wrote up his results in the *Food and Nutrition Bulletin* (United Nations University). He and his mother are still doing a lot of work with soyfoods in India. He plans to travel to India next week. He has been involved with Plenty USA via Charles Haren and with a very large Indian women's organization named BGMS (Bharatiya Grahmeen Mahila Sangh; Indian Rural Women's Organization) In April 1992 USAID gave BGMS funding of $300,000 for a 3-part nutrition project in India: (1) Basic health care needs in 50 villages; (2) Training other voluntary organizations to do health-related work; and (3)

© Copyright Soyinfo Center 2013

Introduce soyafoods into the area by doing demonstrations and by developing a small-scale commercial industry to make soyfoods such as tofu, soymilk, biscuits, etc. 3-4 people will work together to make enough foods for 8-10 nearby villages.

An industrialist whose last name is also Jain, N.N. Jain of Prestige Foods in Indore, is a very close friend of Manoj and his mother, and he has made a lot of money from soya. His company is now multinational. Prestige Foods is giving technical assistance to the project and is trying to obtain a SoyaCow ($3,000–$4,000, made by ProSoya of Ottawa, Canada) for the project. Prestige Foods presently makes biscuits containing soya flour which are sold at a small markup to schools. Indore is the site of the USAID project, of Indore Foods, and of Manoj's home town. Manoj is trying to convince USAID to allow the project to buy a SoyaCow to make soymilk. Address: 83 Fullerbrook Rd., Wellsley, Massachusetts 02181. Phone: 617-237-5997.

10316. **Product Name:** Ken & Robert's Veggie Pockets (With Soya Kaas Soy Cheese) [Broccoli and Cheddar Style, or Bar-B-Que Style].
Manufacturer's Name: Imagine Foods, Inc. (Marketer/Distributor).
Manufacturer's Address: 299 California Ave. #305, Palo Alto, CA 94306. Phone: 415-327-1444.
Date of Introduction: 1993. March.
How Stored: Frozen.
New Product–Documentation: Letter from Robert Nissenbaum, president of Imagine Foods. 1993. Dec. 8. This product was launched in March 1993.

10317. Leslie, Catherine. 1993. Talking tofu. *Vegetarian Connection* (*The*) (*South Wales, New York*) 2(1):1, 7. Feb/March. [2 ref]
• ***Summary:*** A nice, positive introduction to the benefits of tofu with 2 recipes. Address: Food editor.

10318. **Product Name:** Smoked Tofu [Sweet Amilla, or Hot Obsession]. Renamed Sweet and Hot Teriyaki, respectively, in 2002.
Manufacturer's Name: North Coast Distributors.
Manufacturer's Address: 2655 Cloverdale, Concord, California. Phone: 510-798-4393 or 510-944-0599.
Date of Introduction: 1993. March.
Wt/Vol., Packaging, Price: 6 oz or 16 oz plastic tub. Wholesales for $1.80 or $4.75 respectively (3/95, California).
How Stored: Refrigerated.
New Product–Documentation: Price list sent by Patricia Smith from Natural Products Expo West at Anaheim, California. 1995. March. Printed black orange. Talk with Hanan Onn. 1995. March 22. These two products were launched in about March 1993.

10319. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Polsoja.
Manufacturer's Address: ul. Hetmanska 61, 05-120 Legionowo (near Warsaw), Poland. Phone: (48 22) 18 21 11.
Date of Introduction: 1993. March.
Ingredients: Soybeans, water, natural coagulant (90% calcium sulfate and 10% calcium chloride).
Wt/Vol., Packaging, Price: 330 gm vacuum packed in polyethylene bags. Retails for 39,000 zlotys/kg (10/93). Or bulk-packed. Retails for 30,000 zlotys/kg.
How Stored: Refrigerated.
New Product–Documentation: Letter (in perfect English) and order from Piotr Poninski (73 Winslow Ave., Somerville, Massachusetts 02144). 1991. Oct. (or before). He orders a copy of *Tofu and Soymilk Production.* Letter (fax) from Piotr Poninski of Polsoja in Poland. 1993. July 27. "In March 1993 my partners and I started the first tofu shop in Warsaw, Poland. As far as I know, in Poland there are no other shops which produce and sell tofu on a regular basis. Besides ourselves (3 partners) we employ two people and the entire production process has been set up according to your guidelines described in 'Tofu and Soymilk Production' (I bought this book from the Soyfoods Center about three years ago). Presently we make regular/kind of firm tofu and sell it to oriental restaurants and Vietnamese and Chinese minority groups."

Letter and Label for tofu sent by Piotr Poninski. 1993. Oct. 10. Shunryu Suzuki's famous book *Zen Mind, Beginner's Mind* has been translated into Polish and there is a group of Zen students practicing under Suzuki's dharma heir, Kwong roshi. Warsaw is not included in the address because Polsoja is located in Legionowo, a small town about 30 km north of downtown Warsaw and outside of the official city borders. It is very difficult to find a source of good soybeans in Poland. They have tried soybeans from many countries, but now use Canadian soybeans. Their 330 gm cubes of tofu (10 x 6 x 6 cm) are vacuum packed in polyethylene bags then pasteurized. It is sold mostly to the limited "health-food" market. "The word 'tofu' appears on our label but is not generally known in Poland. When we introduce the product we temporarily call it 'soybean cheese' or 'soybean cottage cheese.' Because of legal matters we will soon discontinue the use of dairy terminology."

Label. 2 by 3.5 inches. Green on white. Self adhesive. The top panel reads: "Ser sojowy Tofu. Soy bean curd, dou fu, dau phu."

Talk with Piotr Poninski. 1995. April 11. His company now makes about 7 tonnes/month of tofu. Some of it is sold as second generation products: burgers, and deep-fried tofu cubes in curry sauce or tomato sauce.

Letter from visitor. 1996. Sept. Polsoja uses three pieces of equipment made by Takai Tofu & Soymilk Equipment

Co. in Japan: Continuous roller extractor, horizontal stone mill, and air cylinder press; all three were purchased "second hand" in the Netherlands and are about 7-9 years old.

10320. *SoyaFoods* (*ASA, Europe*). 1993. 20 years of research and publications. 4(1):3. Winter.
• ***Summary:*** "This year William Shurtleff and Akiko Aoyagi Shurtleff are celebrating 20 years of research and publishing on soya foods. In October 1972 they began their research on tofu, starting with an apprenticeship under tofu master Toshio Arai in Japan."

10321. **Product Name:** Soyco Lite 'n' Less (Cheese Alternative) [Singles: Swiss, American]. Renamed Lite & Less Veggy Singles by Nov. 1995.
Manufacturer's Name: Soyco Foods. Div. of Galaxy Cheese Co.
Manufacturer's Address: 2441 Viscount Row, Orlando, FL 32809. Phone: 800-441-9419.
Date of Introduction: 1993. March.
Wt/Vol., Packaging, Price: 6 oz. for 8 singles.
How Stored: Refrigerated.
New Product–Documentation: Ad in Natural Foods Merchandiser. 1992. March. p. 19. "We're back in business!" A color photo shows the two labels. The front panel of each states: "Lactose free. Cholesterol free. Cheese alternative. 1/3 less calories."

10322. **Product Name:** Soymilk (Natural, Original, Maple, Vanilla, Chocolate, or Nog), Soybé Soy Ice Cream (many flavors, constantly changing), Soy Yogurt (Natural or Vanilla Flavors) tofu, and Soyanaise (soy mayonnaise).
Manufacturer's Name: Sweet Carrot Café–Health Bar & Deli.
Manufacturer's Address: 702 14th St. East, Saskatoon, SK, S7N 0P7 Canada.
Date of Introduction: 1993. March.
Wt/Vol., Packaging, Price: Bottle.
New Product–Documentation: *SoyaCow Newsletter* (Ottawa, Canada). 1993. Jan/March. p. 1. "SoyaCow SC-20 "mooves" west to Saskatoon." "The Sweet Carrot Cafe, the top vegetarian restaurant in the province of Saskatchewan, is setting up its 'micro-soydairy' and will offer fresh soymilk as well as other soy-based foods. This will not only augment their existing menu at the restaurant, but will also form the heart of their new 'SoyaCow–Health Bar Deli' slated to open along side the restaurant. This will be the second Canadian retail project in a developing franchise system."

SoyaCow Newsletter (Ottawa, Canada). 1993. April/June. p. 1-2. "SC-20 complements fine vegetarian restaurant and top natural foods store." The Sweet Carrot Cafe in Saskatoon uses a SoyaCow SC-20 to produce fresh non-beany soymilk for direct sale and formulation into value-added products. They also feature returnable glass bottles of the soymilk in several flavours. The Sweet Carrot Cafe is a fine [vegetarian] restaurant, featuring a grand piano, tablecloths, and wine. Owners George and Wendy Conquergood have added a Health Bar & Deli, made possible by a new SoyaCow. A photo shows George Conquergood with his SC-20 at the Sweet Carrot Cafe.

Talk with George Conquergood of International ProSoya Corporation (IPC) in Vancouver, BC, Canada. 1999. April 21. George started this gourmet vegetarian restaurant in 1992. In early 1993 he bought a SoyaCow SC-20 and started the Soya Cow Health Bar Deli, where (by about March 1993) he sold at least five soy products, both as part of the menu and for takeout. The soymilk for takeout was always sold in 1-liter glass bottles, with a SoyaCow logo stamped into the glass. Only the soy ice creams were sold under a brand, Soybé. The Soy Nog (soymilk flavor; which was not a brand) was introduced in December 1993, but people liked it so much that George continued to make it thereafter all year long. The soy ice cream was sold in 500 ml round hardpack plastic tubs. There were no fixed flavors; every day was a new surprise–such as Blueberry-Mint, Strawberry-Banana-Peach, and one like a Butter Pecan with nuts, etc. George is a very creative person and he likes to try new things with foods. In the garage of his home in Saskatoon he has an archival file box containing all of the recipes and notes from his restaurant days. After March 1994 George also sold Gelato Fresco, a soy ice cream made by Hart Melvin of Toronto using a SoyaCow SC-20. The soy yogurt was fermented; the two flavors were sold in 250 ml yogurt tubs. The tofu was sold pre-cut into 500 gm bricks, wrapped with plastic wrap (not packed in water), and refrigerated. The Soyanaise (soy mayonnaise) was sold in a 250 ml see-through plastic tub. Each product had a label, printed by a computer. George's dates are a little earlier than those published in *The SoyaCow Newsletter* since it typically published at least several months after the events it reported.

10323. White Wave, Inc. 1993. The story of White Wave's reduced fat tofu: A simple tale of the first and only reduced fat tofu in America. *Natural Foods Merchandiser.* March. p. 18.
• ***Summary:*** This full-page color ad tells a colorful story, with cartoons, a photo of the package label, and the "Nutrition Facts" panel. An 85 gm serving (1/5 of a block) contains 4 gm of fat and 90 calories, of which 35 calories (38.8%) come from fat.

This same ad, slightly altered, was run in *Vegetarian Times* (Jan. 1994, p. 37). The subtitled has been changed to read: "A simple tale of the first reduced fat tofu in America." Below the White Wave logo is written: "America's Soyfoods Innovator. Call 1 (800) 488-9283 for the store nearest you." Address: Boulder, Colorado.

10324. Wiemann, Stephanie. 1993. On cultivating a taste for

© Copyright Soyinfo Center 2013

tofu. *Produce Merchandising.* March. p. 16, 18.
• ***Summary:*** "OK, so tofu is a wiggly, white mass, has a bland flavor and most Americans have no idea how to use it. That's merely all the more reason for retailers to aggressively promote its usefulness and nutrition, suppliers say... This winter, Wal-Mart planned two weeks of tofu demonstrations in all 34 Supercenters. 'Frequency (of demos) is important';... don't neglect to hand out recipe reprints." Features marketing tips from Azumaya and Morinaga.

10325. Pinault, Pascal. 1993. Re: Work with tofu and tofu products in Martinique. Update on soyfoods in the Caribbean. Letters to William Shurtleff at Soyfoods Center, April 2 and 27. 4 p. and 5 p. Handwritten, with signature. Plus list of his products and prices, resumé, and photos of his home, equipment, and Morne-Vert.
• ***Summary:*** Pascal saw and ate tofu for the first time in May 1980 when he was living in India, while visiting some friends in Poona (Maharashtra). He bought 1 pound of tofu at a tofu shop but he is not sure if they were making the tofu in a back room of the shop or at some other place. "I suppose this tofu manufacturing plant in Poona was an offshoot of the Rajneesh Ashram, which was very active at that time and place." Pascal lived in Goa, south of Bombay, from 1976-1980; there he baked bread leavened with palm wine. He learned most of what he knows about soyfoods while living and working, mostly in health food stores or health farms (see attached resume), in the Catskill Mountains area of New York from 1981 to 1987. There he learned to make tofu for his personal use (not for sale) by adding lemon juice to hot soymilk then pressing it in a cloth. During two other trips to India in 1982-83 and 1986 he found and bought chunks of a dry soy protein product resembling TVP which must be cooked in water. He found this soy protein product very interesting for a country like India which has such a shortage of protein, however the price was high–about 10 rupees/kg compared with 2½ rupees/kg for wheat.

In Jan. 1988 he and his family moved to Martinique. "I was compelled to make tofu for myself and my family because there was no other vegetable protein available in Martinique, except for this chunky TVP. I was still using lemon juice instead of nigari and making 2 pounds of tofu at a time. Then in 1991, as I started to import Japanese food products from France (umeboshi, seaweeds, amasaké, etc.), I ordered a small booklet on making tofu using nigari. Plus I had an excellent book (*Les Aliments Fermentés Traditionnels,* by Claude Aubert [1985]) in which I found recipes and nutritional details on many foods like tofu, okara, sufu, tempeh, amasaké, and, in general, all the foods subjected to lactic acid fermentation. In Martinique he has been making an average of 12 to 20 pounds of tofu every week since Oct. 1991 when he moved with his family to mountainous Morne Vert. Occasionally he makes larger amounts for a health food store that sells it or when he caters for groups. His main work is to introduce and popular tofu and soyfoods in Martinique. He would like to expand his tofu and vegetarian "traiteur" (catering) business; his main problem is lack of funds, so he plans to apply for financial aid.

The water he uses to make his tofu comes straight from a spring a mile up in a beautiful mahogany forest. He also makes sprouts–mostly alfalfa, mung bean, and clover, but sometimes wheat grass. He uses most of the tofu he makes to produce second generation products such as tofu mayonnaise, hot squash pies with miso-tofu topping, tofu & cocoa (or carob) sweet pie, tofu salad, spring rolls (*Nems*).

"I know of two vegetarian restaurants in town (Fort-de-France) that make their own tofu and serve it to customers, but no one in Martinique uses tofu as extensively as I do, thanks to my 7 years' stay in the Catskill Mountains. In fact, it takes a long time to get people used to tofu in an island where Creole culinary habits are still well-established."

One of the restaurants that makes tofu is Le Second Souffle, owned by Mr. Gerard Sainte-Rose (27 Rue Blenac, 97200 Fort-de-France, Martinique, FWI 0033. Phone (596) 63-44-11). He has owned this vegetarian restaurant for quite a while now and is mostly interested in reviving the consumption of local fruits and vegetables. "Gerard is the only person in Martinique that I actually saw growing and harvesting soy beans. That was 2 years ago. He had grown soybeans on a piece of agricultural land in Ducos, a town near Le Lamentin, which is not far from the capital city of Fort-de-France (Martinique). He got the soybean seeds from a friend in St. Lucia (a Caribbean island just south of Martinique). Mr. Sainte-Rose harvested only a few soybeans; they were small but healthy looking. He is an organic gardener who sells his products out of his restaurant. He presently has a 6 hectare farm were he grows organic vegetables for his restaurant. Two years ago we had an agreement to set up a tofu plant together in his restaurant. He promised me a job (that's when I gave him my recipes), and he even started to acquire some material for making tofu. But he never followed through. That's when I started making tofu by myself, even without the proper material setting. He even bought some of my tofu. I think he would probably be interested in growing more soy, if approached very tactfully, and if he sees financial interest without having to pay a counterpart. He is an interesting person with a lot of good ideas," but he tends to be hard to work with as a partner.

On St. Lucia one can find the "Soy Place" is Castries, the main town in St. Lucia They make tofu there, sell it, and cook it for the food-counter [take-out] part of the shop. People grow soy beans on St. Lucia and on Dominica, maybe with help from Canadians. They make tofu and cook it. One "Ital" rastafarian restaurant in Roseau, Dominica, serves tofu pâté and deep-fried, plus "accras" (fried okara dumplings). "In Dominica I heard of two other places where they make and serve tofu. Ital food, which has absolutely nothing to

© Copyright Soyinfo Center 2013

do with Italian food, is the name that the Rastafarians give to the main dish of their mostly vegetarian diet (except for fish). In this main dish, chunky textured vegetable protein is sometimes used in place of fish. "In the Caribbean, including Martinique, Ital food is available in quite a few Rastafarian places, which they call their 'ghetto.' These are restaurants open day and night that include reggae 'sound systems. The chunky TVP remains the main vegetable protein they use; they also use it in other dishes such as vegetarian cous-cous, etc. They are, in my experience, a bit hostile to tofu, seitan, or other such new foods, at least in Martinique; maybe when it comes from a white person they presume it is not vegetarian." He has heard of (but has not seen or tasted) smoked tofu dried over a fire using green banana leaves.

Pascal is interested in vegetarianism and macrobiotics. He likes tempeh and would like to start now to make and introduce it to Martinique, where it is totally unknown.

Concerning seitan: "I first started to make seitan in Martinique under the same circumstances as tofu–lack of vegetable proteins other than beans. Not having ready-made gluten, I first made it by washing white-flour wheat dough. That was a very long and messy process but was well worth it. Then I found wheat gluten in the Tama catalogue–the company I mentioned that specializes in Japanese products. That's when I started to sell seitan–though there is not much demand for it. I learned to make seitan while living in the Catskill mountains of New York from a macrobiotic British girl friend who also taught me how to make amazake.

Update of April 27, 1993. "Since my family sent me tempeh starter (thanks for giving them the address), I have started small-scale production."

Update of July 17, 1993. "I first made amazaké, in Martinique, in 1992. Even though I gave samples to quite a few people, nobody has seemed to be interested in this product, or to realize the versatility of it! So, I keep ordering it from Tama, packed in glass jars, and make my own once in a while, using 'Cold Mountain' starter. I've been a bit disappointed by this non-reaction. Amasaké being one of my favorite sweeteners, which I value more than any breakfast or desert cereal. My youngest daughter ate it as a first 'solid' food when she was only 5 months old, along with bananas."

"If you allow me a personal remark about my work in Martinique, I find it extremely ungratifying. The public here is highly suspicious of anything new and foreign. My little business doesn't allow me to assume my financial obligations, and I sometimes consider going back to the U.S. But I still want to try harder, at least for a few months."

Note: This is the earliest English-language document seen (Oct. 2010) that uses the term "amasaké" to refer to amazake. Address: "Caplet," 97226 Morne Vert, Martinique, French West Indies 0033. Phone: 596 55-56-57.

10326. *Toyo Shinpo* (*Soyfoods News*). 1993. Tôfu shohi suryo no suii [Changes in tofu consumption in Japan]. April 11. p. 1. [Jap]

• ***Summary:*** Tofu consumption in Japan (in terms of cakes per household) has decreased by 12.4% since 1983. The weight of 1 cake is not given but it is probably 300 gm. The statistics for each year are as follows: 1983–90.43 cakes/household. 1984–89.16 cakes. 1985–88.48 cakes. 1986–85.40 cakes. 1987–86.43 cakes. 1988–85.07 cakes. 1989–81.87 cakes. 1990–83.42 cakes. 1991–78.76 cakes. 1992–79.26 cakes.

10327. Maurelli, Nancy A. 1993. Soy simple, soy good at Twin Oaks in Louisa: A community effort in Louisa makes soy good for vegetarians. *Times-Dispatch* (*Richmond, Virginia*). April 21. p. E1, E3.

• ***Summary:*** "More Americans are discovering what Asian peoples have known for centuries: Soybeans are good food. They are the best source of protein from the vegetable kingdom, with all eight essential amino acids."

"Central Virginia has its very own soy shop, producing more than 2,100 pounds of tofu and 25 pounds of tempeh weekly. Originally called Virginia Soyworks, the business was acquired in March 1991 by Twin Oaks, a self-sustaining community of about 100 people in Louisa County. Each member of Twin Oaks contributes more than 40 hours weekly to enterprises that support the community." The author visited Twin Oaks, and she describes in detail how tofu is made there. Contains a recipe for Cleo's Famous Tofu Loaf. Photos show: (1) The inside of the tofu shop where a worker, Iowa Richmond, is cutting a large block of tofu into cakes. (2) Nancy Maurelli. Address: Columnist, The Vegetarian Way.

10328. Jennings, Richard A. 1993. Food analog and process for making the same. *U.S. Patent* 5,206,050. April 27. 6 p. Application filed 1 Feb. 1991. [10 ref]

• ***Summary:*** Assignee: Rudolph Holscher of Santa Fe, New Mexico–A part interest. Tofu curds are broken into small pieces, then cooked for sufficient time to form small pieces. The whey is removed and the curds are rapidly cooled. For a scrambled egg analog, use curds which are soft and relatively large.

Note: Richard Jennings and Rudolph Holscher each own 32½% of Vegetable Protein Specialists, Inc. in Santa Fe, New Mexico. Address: Santa Fe, New Mexico.

10329. Pinault, Pascal. 1993. Re: Tama–France's best importer of Japanese natural foods. Letter to William Shurtleff at Soyfoods Center, April 27. 5 p.

• ***Summary:*** Tama is located at 883, rue de Bernau, 94500 Champigny / Marne, France. Phone: (1) 49-83-79-94. Fax: (1) 47-06-37-85. Tama traces its origins to the 1960s when it was part of a restaurant, Le Bol en Bois, the first vegetarian place in Paris. This restaurant (at 35, 40 Rue Pascal, 75013, Paris) now specializes in macrobiotic cooking. They added a

© Copyright Soyinfo Center 2013

health food store and a "new age" book shop.

"Tama distributes Mitoku products and excellent miso, soy sauces, amasaké, kuzu, Japanese seaweeds, mochi, etc. They have an excellent list of books concerning natural foods and cooking. They print their own brochures about tofu, seaweeds, and others. Tama has a subsidiary branch named Tofu-Daizou which makes the best tofu in France, as far as I know." Address: "Caplet," 97226 Morne Vert, Martinique, French West Indies 0033. Phone: 596 55-56-57.

10330. **Product Name:** Fat Free NuTofu [Mozzarella, Cheddar, and Monterey Jack].
Manufacturer's Name: Cemac Foods Corp.
Manufacturer's Address: 1821 East Sedgley Ave., Philadelphia, PA 19124. Phone: 215-288-7440.
Date of Introduction: 1993. April.
Ingredients: Incl. organic tofu.
New Product–Documentation: Spot in Natural Foods Merchandiser. 1993. April. p. 48. These fat free cheeses are said to contain 51% organic tofu with 50% less saturated fat than some alternatives.

10331. Gupta, Rajendra P.; Gupta, R.R.; Wood, G.W. 1993. The SoyaCow resource book. Maxville, Ontario, Canada: Child Haven International. 131 p. 28 cm. [1 ref]
• ***Summary:*** Contents: Preface. 1. Introduction: Soya beans, soya milk, okara, tofu. 2. SoyaCow–Knowing it: Advantages of the SoyaCow, SoyaCow components, SoyaCow inputs, SoyaCow outputs, who needs SoyaCow, SoyaCow's economics, business plan, larger than SoyaCow machines, smaller than SoyaCow machines. 3. SoyaCow–Getting it: Preparations, ordering, receiving and unpacking, assembly, installation and testing. 4. SoyaCow–Using it: Preparation, making soya milk base, making tofu, soya yogurt (dahi), soya cream cheese, soya cottage cheese, finishing. 5. Formulations and recipes: Soya milk (dairy like, pistachio flavour, almond flavour, banana flavour, chocolate, malt, maple) tofu (tofu salad, tofu rice salad, tofu cheese squares, tofu fried rice, tofu uttapam, tofu snack sticks), soya yogurt (lassi, other sweet drinks, salted drink, raita). Figures (21 figures). Appendices: A comparison of basic soya milk processes, a sample SoyaCow cost-benefit analysis: USA/Canada, a sample SoyaCow cost-benefit analysis: India, consultants, organizations, SoyaCow training, suppliers, some SoyaCow installations, SoyaCow order form, service centres, assembly, trouble shooting guide for grinder/cooker, weekly log, periodic maintenance and repair, the SoyaCow newsletters. Address: [Ottawa, Ontario, Canada].

10332. Haren, Chuck. 1993. Soy happenings in Central America. *Plenty Bulletin* (*Davis, California*) 9(1):1-2. Spring.
• ***Summary:*** During the past 6 months, the author has been working to introduce soybeans and soyfoods to Belize and Nicaragua. In Jan. and Feb. he worked with groups in Belize "who are making efforts at not only utilizing soybeans for themselves but also teaching methods of preparing soybeans at home.

"Together with Casta Calderon, a representative from SOYNICA (a women's development organization in Nicaragua), I provided technical assistance in Belize for the Santa Familia Farmers and Women's Group, the Corozal South Soybean Producers Cooperative, The Caledonia Grain Cooperative, Maya Mopan Cooperative, Toledo South Beekeepers and Farmers Cooperative and the Hopkins Farmers Cooperative. We gave them very practical advice on the growing and use of soybeans. We conducted workshops to teach women about the nutritional qualities as well as methods of cooking soybeans, making soybean cheese (tofu) and milk, then using the by-product (okara) in baked goods, tamales, tortilla fillings and stir-fried dishes. We also helped some of these groups to evaluate their needs (material, labor and marketing costs) for small business projects they wanted to start.

"Small-scale soybean producer and processing groups and cooperatives are being established throughout Central America... In April and May we will be responding to requests for technical assistance in Guatemala, El Salvador and again in Nicaragua."

Photos show: (1) Members of the Toledo South Beekeepers and Farmers Cooperative making soymilk. (2) Members of the Cooperative standing with Chuck Haren. The caption states: "A small grant from the Inter-American Foundation enabled us to purchase some tools like the wheel-seeder displayed by members of the" Cooperative. Address: Program Director.

10333. Herian, Anne M.; Taylor, S.L.; Bush, R.K. 1993. Allergenic reactivity of various soybean products as determined by RAST inhibition. *J. of Food Science* 58(2):385-88. March/April. [16 ref]
• ***Summary:*** RAST stands for "radioallergosorbent test." Soybean allergy is a common childhood food allergy, although it is less common than allergies to cow's milk, eggs and peanuts. Food allergies are generally more common in children than in adults. In this study of atopic adult patients, using RAST inhibition as a measure, the allergenicity of a variety of soy products was compared to that of whole soybeans. Results indicated that, when expressed on a per protein basis, although extracts of tofu, miso, tempeh, and fermented soy sauce were allergenic, they were as little as one tenth as allergenic as extracts of whole soybeans. Address: 1. Dep. of Food and Research Inst., Dep. of Food Microbiology and Toxicology, Univ. of Wisconsin, Madison, Wisconsin 53706; 2. Dep. of Food Science and Technology and Food Processing Center, Univ. of Nebraska, Lincoln, Nebraska 68583-0919, address inquiries to second author.

10334. Leneman, Leah. 1993. 365 plus one vegan recipes: Delicious meals and ideas for every day of the year. Hammersmith, London, England: Thorsons–An imprint of HarperCollins Publishers. 144 p. April. Index. 24 cm.
• ***Summary:*** Chapter 1 of this book, titled "The Vegan Dairy," gives recipes for homemade soya milk, mock cream (from soya milk), soya flour cheese, yogurt cheese (from soya yogurt). There are also recipes for cashew or almond milk, cashew cream, and cashew cottage cheese.

Chapter 11 (p. 85-100), titled "Tofu and other Soya Foods," contains a long introduction plus the following recipes: Home-made tofu. Tofu and onions. Sweet and sour tofu and vegetables. Sea-flavored crisp tofu slices. Mushroom stroganoff. Tofu kebabs. Tofu casserole. Warming winter stew (with tofu). Korean-style kebabs (with tofu and miso). Tofu and green pea bhajia. Tofu 'scrambled eggs.' Scrambled tofu and mushrooms. Tofu piperade. Spicy tofu scramble with red pepper and tomato. Tofu knishes. Tofu and pea curry. Tofu burgers. Swiss steak (with frozen tofu). Savoury tofu 'mince' (with frozen tofu). Crispy fried sea-flavoured frozen tofu. Tofu goulash. Smoked tofu stew. Smoked tofu, courgette and sweetcorn risotto. Smokey duvec (with smoked tofu). Pease pudding and smoked tofu bake. Smoked tofu pasties. Steamed savoury smoked tofu pudding. Smoked tofu charlotte. Lek and smoked tofu au gratin. Smoked tofu and mashed potato cakes. Tempeh croquettes with mushroom sauce. Tempeh hash with potatoes. Indonesian-style tempeh. Tempeh stroganoff. Japanese-style tempeh kabobs. Tempeh burgers. Tempeh chilli. Mock 'ham' (with dried bean milk sheets [yuba]). Mock 'chicken' (with yuba). Mock chicken cooked Indonesian style.

Chapter 13 is entirely about sea vegetables, and a number of the recipes contain tofu, tempeh, miso, or soya milk. A number of other recipes throughout the book also use soyfoods as an ingredient. Address: 19 Leamington Terrace, Edinburgh EH10 4JP, Scotland.

10335. **Product Name:** Soyboy Leaner Wiener (Fat Free).
Manufacturer's Name: Northern Soy, Inc.
Manufacturer's Address: 545 West Ave., Rochester, NY 14611. Phone: 716-235-8970.
Date of Introduction: 1993. April.
Wt/Vol., Packaging, Price: 12 oz.
How Stored: Refrigerated or frozen.
New Product–Documentation: Spot in Natural Foods Merchandiser. 1993. April. p. 48. Shows the front panel of the label, which states: "Fat free. Vegetarian. No cholesterol. No nitrates. Dairy free. Keep refrigerated or frozen." This pre-cooked hot dog has a mild, smoked flavor and contains no preservatives.

10336. **Product Name:** Tofutti Frutti (Non-Dairy Frozen Dessert) [Apricot Mango].
Manufacturer's Name: Tofutti Brands Inc. (Marketer).
Manufacturer's Address: 50 Jackson Dr., Cranford, NJ 07016. Phone: 908-272-2400.
Date of Introduction: 1993. April.
Wt/Vol., Packaging, Price: 16 fl oz (453 gm) plastic tub.
How Stored: Frozen.
New Product–Documentation: Talk with Rick Malloy, Executive Vice President of Tofutti Brands. 1993. March 30. Based on feedback from consumers and distributors the company has renamed this product from Land of the Free to Tofutti Frutti, but the new name does not yet appear on labels. This is a different product than the stick novelty (non-dairy frozen dessert bars on a stick) named Tofutti Frutti first launched in Nov. 1987. A new flavor (Apricot-Mango) will be introduced soon.

Ad in Natural Foods Merchandiser. 1993. April. p. 33. "Living dairy free with new Tofutti 'Frutti' (formerly Land of the Free). New name. New package. New flavors! Same great taste! New: Apricot Mango. Tofutti 'Frutti' is: Fat free. All natural. No sugar added. Fruit juice sweetened. All Tofutti products feature: 100% dairy free. Cholesterol free. Soy based. Lactose free. Kosher Pareve. An animal derivatives."

Spot in Vegetarian Times. 1994. June, p. 14. A large color photo shows the pint container. The product is now sold in 3 flavors: Apricot Mango, Three Berry, and Vanilla Apple Orchard. "Living Healthy–Dairy Free."

10337. Ferrara, Joseph. 1993. Re: Vacuum packaged tofu does not increase the risk of Clostridium botulinum toxin development over traditional water packed tofu. Letter to Andrew Schecter, Northern Soy Inc., 545 West Ave., Rochester, New York, May 7. 1 p. Typed, with signature on letterhead.
• ***Summary:*** Explains how Northern Soy could obtain an exemption from this department's proposed "Reduced Oxygen Packaging Regulations." Concludes that vacuum packaged tofu does not increase the risk of Clostridium botulinum toxin development over traditional water packed tofu. Address: Asst. Director, Div. of Food Safety and Inspection, New York State Dep. of Agriculture and Markets, 1 Winners Circle, Albany, New York 12235.

10338. Yen, Irene. 1993. Roland A. di Centa, the man who introduced tofu to Italy (Interview). *SoyaScan Notes.* May 19. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Irene recently visited with Roland at his home in France near Cannes (Address: Residence Port Azur Apt. B110, 79 Ave. Frìzes Rousians, F-06220 Golfe Juan, France). He told her that he introduced tofu to Italy using *The Book of Tofu* by Shurtleff and Aoyagi. He made tofu in his home kitchen in Italy and sold it commercially. Newspaper articles were written about his work. He was quite involved with macrobiotics and close to the Kushis. He no longer lives in Italy and is no longer involved with making soyfoods.

© Copyright Soyinfo Center 2013

Roland, who is about age 50, was born in Germany to German parents, but his surname is Italian and his family originates from Italy, from a small village called Centa. He is second or third generation German. He lived in Germany until age 18, then lived in Italy for 10 years and France for 10 years. At one point he was married to a Vietnamese woman, who grew up in France. He was also a fashion photographer for the French fashion magazine *Elle.* A jack of all trades, he currently owns a business named Punshon Ltd. in Lugano, Switzerland, works as a consultant on many subjects, moves around a lot, and is quite affluent. He has a 60-foot sailing boat ported near Nice, France.

Note: Card from Roland. 1993. July 13. His address is now 3, Boulevard d'Aguillon, 06600 Antibes, France. Address: Berkeley, California.

10339. Demos, Steve. 1993. New developments at White Wave, Inc. Part I (Interview). *SoyaScan Notes.* May 22. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** California is White Wave's second largest market after Colorado (especially Boulder and Denver). White Wave was the first company in the Western world to make a wide variety of different types of soyfoods (tofu, soymilk, tempeh, miso products, ice cream, yogurt, etc.). "It has always been my observation that White Wave is primarily in the protein category and only secondarily in the soyfoods category. Tofu has always been the 'media grabber' but the fact is that we are selling vegetable protein. We have always seen our great advantage in the field that we are a broad category player, so that we are trying to define the category. By defining the category, we will effectively pull such products as tofu out of their misplacements in produce into where they should be placed and merchandised, i.e. as meatlike or dairylike foods. We know we have four competitors in every product that we make. So if we have 15 products, we may be competing against 40-60 companies, whereas a company that makes only soy cheese will have only 4 competitors. We see that no one else has looked at the market the way we have.

"Very recently we have established with a leading chain in California an opportunity to merchandise soyfoods as a category. We've done this in Boulder before but as a small company with so many products, it has never jelled for us.

"We now have an executive chef, Leonardo Laudisio, working for us. I told him, 'We're going to borrow your body and name, and make a myth out of you.' Whatever you have in your mind for the image, his family fits it and looks it. His past is colorful. He has elevated the foods in a very special way. As he said on a TV show recently, 'Look, forget its tofu. Just put it in with all your other foods and benefit from it.' Wonderful approach. We've dazzled people with the tastes.

"The two of us just sort of stumbled into one another. He was based in Sausalito where he was manufacturing these veggie burgers sort of in and out of some kitchens. I believe that the man who originated the recipe was in charge of the Whole Foods Markets kitchens in the area. He inherited it by getting involved with that man. He got further involved when his daughters became vegetarians, then vegans. White Wave has become pretty aggressive as an industrial supplier of tofu to other food manufacturers who use it as an ingredient. I would estimate that we have 85% of the market. That is, about 85% of the products that are nationally distributed and have tofu in them, contain our tofu. This push started a few years ago when we decided not to compete in the entree market and to focus mainly on the fresh foods case. Almost everything we make will go toward dated, long-shelf-life fresh food. So as not to loose the entree market, we decided to position ourselves as a supplier to companies who make vegetarian entrees containing tofu. We agreed not to compete with them, and we offered to develop proprietary formulas and recipes for them. We supply Amy's, Robert & Ken's Pockets, and all the lasagna products (Amy's, Legume). We send these people their tofu in bulk, vacuum packed, with a long shelf life.

"So when we saw the Veggie Life burger in May 1992 and learned it contained 40% tofu, we called up Mr. Laudisio and told him we were interested in selling him tofu. He accepted and we began selling it to him indirectly. His brothers have a very well known restaurant named Laudisio's in Boulder. He came into town for the Boulder Creek Festival. He met with me and asked if White Wave would be interested in making the product. I explained that we were not into contract packaging. (White Wave stopped making such products for Homestyle after they were purchased by Weider Food Co.–which has nothing to do with food or fresh food distribution; Homestyle just died. Both Robert Dolgin and David Burns needed to get out from under debts, so they had to sell the company.)"

The Veggie burger is positioned to compete against the Gardenburger (made by Wholesome & Hearty Foods in Oregon). Brown rice is the main ingredient, followed closely by tofu. Steve acquired the Veggie Life burger for two reasons. First, it was a no-cash deal; it will be paid for on the basis of an earn-out against sales of the product. Second, he was able to hire Leonardo as corporate chef and spokesperson for the company in terms of foodservice sales. On 15 May 1993 the burger hit the market with a new White Wave label that reads: "White Wave Veggie Life Burger." The retail product consists of 2 patties vacuum packed (2.5 oz), and the 3.5 ounce for foodservice. White Wave is starting a merchandising program named the "Chef Leonardo Endorsement Program." White Wave is planning many new product introductions in the next 120 days. They introduced their new meatless and all-vegan hot dog yesterday. It is still called Meatless Healthy Franks (first launched in June 1989), but the texture, color, taste, and fat content have all been improved. Tofu is till the primary ingredient (most competing brands use soy protein isolates) but the product

© Copyright Soyinfo Center 2013

is 96% fat free. White Wave can continue to use the term "Healthy" in their product names since they were using it prior to the new NLEA regulations. The Lemon-Kiwi Yogurt just came out. Now we're developing another burger that has nothing to do with the Veggie Life Burger; it will be made more meatlike, somewhat like the Harvest Burger, sold frozen and using textured soy protein concentrates, and will probably not contain tofu.

Update. 1993. Dec. 19. The program that was to have involved Leonardo Laudisio did not work out. The concept was good but the personality involved could not be harnessed. He is a fine man but Steve would rather work with a less skilled/talented and highly disciplined individual than with a highly skilled, undisciplined individual. Also many problems developed relating to conflict of interest situations. "He still represents the company as corporate chef, but is definitely a figurehead role. It helps the magic and mystique of White Wave because he is a charismatic individual." Continued. Address: President, White Wave Inc., 1990 North 57th Court, Boulder, Colorado 80301. Phone: 303-443-3470.

10340. Demos, Steve. 1993. New developments with seitan at White Wave, Inc. (Interview). *SoyaScan Notes.* May 22. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** "White Wave's new seitan product goes on the market next week, but it is on a very restricted release program. We have had such an overwhelming response to this product that we are scared–only because we are afraid it is going to run away from us before we can handle all the orders. We got into the gluten business because I foresee using soy and wheat proteins as a combination for future products. We didn't have any experience making and using gluten, but there is nothing like using a common product to gain all your learning curve experience and profit from it at the same time. We looked at the market and no one had national distribution for long shelf life. Moreover, people's prices are very high. However Ivy Foods (maker of Meat of Wheat seitan products in Salt Lake City) and Santa Fe Organics (maker of Traditional Foods seitan products in Columbus, North Carolina) both sell their products direct by mail order. Ivy Foods is selling their frozen items and shipping them by overnight delivery and making a profit–but they are very high priced. Gary Barat of Legume is working with Meat of Wheat. They are able to reduce their end-user price and make a good profit this way by cutting out distributors and retailers. A food item that costs $0.50 to manufacture will retail for at least $1.00 and maybe $1.50. This approach is only profitable if the products are fairly expensive, retailing for at least $4.00–$6.00." Address: President, White Wave Inc., 1990 North 57th Court, Boulder, Colorado 80301. Phone: 303-443-3470.

10341. Demos, Steve. 1993. New developments at White Wave, Inc. Part II (Interview). *SoyaScan Notes.* May 22. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Right now White Wave is developing a Plan-a-Gram showing what you would see if you looked into a cooler at the company's shelf space–and what needs these products fill–cheese, meat, milk, tofu, tempeh, and ready-to-eat. A chain wants to see this with projected movements and profits per cubic inch. Whole Foods Market (based in Austin, Texas), having recently acquired Mrs. Gooch's (last week) and Bread & Circus, is now the big player among the natural food chains. They will do an estimated $150 million in retail sales in 1993 in about 30 stores. Steve was recently in California meeting with the division president for Whole Foods. He visited their store in Palo Alto–very sophisticated. "We are working out a year-round merchandising, promotional, and educational campaign with the Whole Foods division in San Francisco to set up a prototype based on the Plan-a-Gram. We have been looking for a chain that understands what we are trying to accomplish and handles the breadth of products that we currently make. We are also looking for a 'preferred vendor relationship.' We'll do the advertising for them out of store, and they'll do the advertising for us in store. They'll give us prime view at the exclusion of some of the competition's prime view. How do we advertise? Enter Chef Leonardo! We promote him in consumer publications with recipes; on each package will be a Chef Leonardo sticker with a Chef Leonardo recipe enclosed. Then he does demos and cooking classes in stores. He's my myth! If we are successful, he will become Duncan Hines, Pillsbury Doughboy, and Betty Crocker all rolled into one. He has the panache and flamboyance, but at the same time he believes in our products, and is deeply committed to and enthusiastic about them.

White Wave is moving into the institutional foodservice market starting with colleges and universities. Leonardo will offer to go in and train the foodservice workers to prepare the dishes and provide the formulas. White Wave has costed out every recipe and provided a suggested sale price which is at least 4 times the cost of ingredients. White Wave hopes to at least meet if not beat the current profits of the foodservice people they are serving. White Wave makes this offer: "An invitation from Chef Leonardo to take advantage of the interest in and requests for vegetarian entrees in the United States." So White Wave's focus is now shifting away from manufacturing toward merchandising and marketing.

Shortly after White Wave bought Soyfoods Unlimited, White Wave had a very strong position in the San Francisco Bay area and in California in general. Over the past 2 years they have lost an enormous amount of that position as they have focused on becoming a company with national distribution. This was another reason he came to California recently. "For the amount of money we get from that market, which is quite significant, I couldn't believe how little product of ours was on the shelves." Steve is teaming up with 3 other Boulder companies and hiring a regional sales

© Copyright Soyinfo Center 2013

reps (instead of a broker, who typically represents 10-12 lines). Steve hopes to double his sales in the San Francisco market within the next year.

White Wave now makes about 200,000 lb/week of tofu. They are about ready to order new equipment so they can operate their plant at capacity with 2½ shifts plus sanitation. Steve is working 18 hours a day. Everything they do seems to be successful and there is so much to do–like the Midas touch. So they are constantly trying not to lose focus, to keep their goals well defined and to pursue them without getting sidetracked. Address: President, White Wave Inc., 1990 North 57th Court, Boulder, Colorado 80301. Phone: 303-443-3470.

10342. Demos, Steve. 1993. Tempeh at White Wave and in America (Interview). *SoyaScan Notes.* May 22. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Tempeh is still White Wave's most profitable product line–despite the fact that for the past two year's most of the company's attention has been going into developing dairylike products. And tempeh is a much easier product to make than many of the company's other products. Its more fun and less problems. White Wave currently makes about 18,000 to 22,000 lb/week of tempeh and they are looking at automating one part of the process. White Wave is the largest tempeh maker in America, followed by Lightlife Foods, with Turtle Island Foods a distant third–its presence is mostly on the West Coast. He also hears about Santa Cruz Soyfoods (Wildwood), Betsy's Tempeh, Cricklewood, and a few others here and there.

On the East Coast (which is White Wave's weakest market), his basic tempehs are priced 20% higher than that of Lightlife, yet it sells very well. People seem to prefer White Wave quality. Rather than reducing costs, Steve plans to elevate and promote the product more with Chef Leonardo and an enclosed Chef Leonardo recipe. He will advertise it in *Vegetarian Times* and *Natural Health* (formerly *East West Journal*). Address: President, White Wave Inc., 1990 North 57th Court, Boulder, Colorado 80301. Phone: 303-443-3470.

10343. *SoyaScan Notes.* 1993. New Trend: Specialized manufacturers of tofu and tempeh become manufacturers of many types of soyfoods (Overview). May 22. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** The first soyfoods manufacturer in America to make a wide variety of different types of soyfoods was White Wave of Boulder, Colorado. They began as a tofu manufacturer in Sept. 1977, but by 1978 had introduced Soy Sannies (sandwiches with miso-tahini spread) and Soymilk (in 3 flavors). In 1979 they launched Soy Tempeh, Polar Bean (a soymilk-based soy ice cream, which they also made from Tofu Today / Tofruzen starting in 1985), Soya Rice Tempeh, Vegetarian Soysage, Tamaried Nuts, and a host of deli-type ready-to-serve tofu products such as Missing Egg Salad, Tofu Cheesecake, Tofu Cinnamon Rolls, etc. In Jan. 1989 White Wave began its move into dairylike products in a big way with Soy A Melt (a soy cheese with casein) followed in May 1991 with White Wave Dairyless (a soy yogurt in 5 flavors and the company's most successful product ever). New flavors of soy yogurt were introduced in 1992 and 1993. Note: White Wave was also the first post-1975 soyfoods company in America to grow by acquiring other companies–Soyfoods Unlimited (a tempeh manufacturer) in Dec. 1986; and Laudisio Veggie Life, a maker of veggie burgers, in March 1993.

Lightlife Foods in Greenfield, Massachusetts (named The Tempeh Works before April 1987) started as a tempeh manufacturer in Sept. 1979. In May 1984 they started to make Weissman's Original Tofu Sausage for John Weissman of the Vegetable Protein Co. In Sept. 1985 they launched Lightlife Meatless Tofu Pups (meatless hot dogs), and in Oct. 1987 they launched Lightlife Party Pups (meatless frankfurters–cocktail size Tofu Pups; Renamed Tofu Party Pups by Feb. 1988). Today Lightlife makes a wide range of tempeh and tofu products.

Sharon's Finest in Santa Rosa, California (named Brightsong Tofu from June 1978 to June 1980; Redwood Valley Soyfoods Unlimited until June 1982; Brightsong Light Foods until June 1987; Rose International until 1990) started as a tofu manufacturer in June 1978. By Aug. 1980 they were making and selling soymilk. Their diversification began in 1984 with Mix Plus+ (a liquid mix to make tofu frozen desserts) and LeTofu (non-dairy soy ice cream in hard pack and soft serve). Related ice cream products followed. In early 1986 Richard Rose reformulated Soy-O, a soymilk yogurt for Brown Cow West. In May 1986 the company launched Fruit D'Lite (a fruit-sweetened sorbet/mousse liquid soft serve mix) in 4 flavors using isolated soy protein as the soy ingredient. The move into soy cheese began in June 1986 with Mozzarella Style Tofu-Rella (an organic tofu-based cheese analog with casein). In July 1987 the company launched Le Yogurt (a dairy-based soft-serve frozen yogurt dry mix). In Jan. 1992 they launched Heart's D'Lite (a fat-free cheese alternative in various flavors) with organic tofu and casein and tofu as the main ingredients. By 1992 Sharon's Finest was primarily a marketer of soy cheeses; they sold their cheese to many other food companies and even exported them to the UK.

10344. Machlis, Mark. 1993. New developments with seitan and gluten at Ivy Foods (Interview). *SoyaScan Notes.* May 24. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** His company now has national distribution via 28 natural- and health food distributors. Since Jan. 1993 the company has been making a profit. Ivy Foods still does about $4,000/month in mail order business, but he is now encouraging his customers to buy from their local retail store, but many consumers who live in rural areas

© Copyright Soyinfo Center 2013

have no retailer nearby. Ivy Foods now sells about $40,000 to $50,000 a month of gluten products, so the mail order business is only about 10% of the total. He plans to continue the mail order service, and the company now has a toll-free number for mail order: 1-800-280-1313. His most popular mail order products are the 5-pack sampler (which gives you one pound of each product) and the 10-pack. So the minimum order would be $30.00 (Five 1-lb 5 packs x $5.95/lb including air shipping and handling). He makes more money selling direct by mail order, but he wants to support his retailers who do 9 times as much volume.

All of his retail products are frozen. To ship frozen products by mail he uses Airborne Express second day air, with the products packed in an insulated foam box (without any dry ice). The shipping cost is about $1.00/lb. The total cost of the product, delivered to the consumer's door, is $6.00/lb versus $4.40 to $5.39 at retail stores. If the customer sends the insulated box back to Ivy foods, he or she gets a free pound of product next time. The cost to ship back the box via the post office is about $2.90. Quite a few people ship back (recycle) the foam boxes.

His two flavored dry mix products (Meat of Wheat Chicken Style, and Sausage Style, which were introduced in about May 1993) are also sold by Bob and Cindy Holzapfel of The Book Publishing Co. in Tennessee in their Mail Order Catalog. To make these products the homemaker just adds water, kneads it, keep it in a roasting bag, then steam it.

In June Ivy Foods will run its first ad (in *Vegetarian Times*) aimed at getting consumers to but the company's products in retail stores. In the past he has been running mail order ads. *Vegetarian Times* is the only periodical in which an ad pays for itself; a typical ad of his in *Vegetarian Times* will generate 400 calls per month.

A direction for Ivy Foods will be to sell to food manufacturers for use as an ingredient in their food products. He plans to sell to Gary Barat of Legume. In about Sept. 1992 Barat bought part of Heart and Soul; the former owner, Andy Harrison, ran into financial problems. Barat is now buying Ivy Foods' Chicken Style; he plans to come out with a meatless chicken salad and several entrees.

His latest product is a prepared Chicken Chili. He no longer has a policy of donating a certain percentage of his profits to a worthy cause. He ended up poring nearly $500,000 into the company during its first 2 years in business, mostly just to keep the company alive.

John Marsh (not sure of his last name), Andrew Harrison's old partner, is one of Mark's competitors. He used to be the manufacturer for Heart & Soul, with Andy Harrison in charge of marketing. John ended up leaving and starting his own company in California, which left Andy without a product. At the last Natural Foods Merchandiser trade show (Feb. 1993 at Anaheim) John introduced a sliced deli meat similar to that formerly under the Heart & Soul brand. John Belleme is not a major competitor because his prices are higher in retail stores. Ivy Foods' biggest markets are on the East Coast and in Texas. Ivy Foods does not make traditional seitan; he pre-flavors his dough before his products are steamed (not boiled in a broth). Three years ago at the Anaheim trade show he learned the key secret to financial success from some people from Worthington Foods, who came to him and said: "Don't think about rinsing your own gluten." Use vital wheat gluten. Address: Office: Ivy Foods, 7613 S. Prospector Dr., Salt Lake City, Utah 84121. Phone: 801-943-7664.

10345. Brink, Susan. 1993. Can tofu stop cancer? As its uses multiply, the soybean looks more like a magic bullet. *U.S. News and World Report* 114:77. May 31.
• ***Summary:*** The magic bullet in soybeans could be genistein, a crystalline substance with almost no nutritive value, which is found almost exclusively in soybeans. "More than 200 scientific papers on genistein's possible role in cancer prevention have been published since 1987. Among the most intriguing is a German study in the April 1993 *Proceedings of the National Academy of Sciences,* which found that, in the test tube, genistein blocks angiogenesis, the process in which new blood vessels grow–and which is needed to nourish malignant tumors.

"The German research feeds speculation that genistein may be one dietary substance that explains the difference in some cancer rates between the United States and Asia. The American breast-cancer rate, for example, is 22.4 per 100,000, almost four times Japan's rate of 6 per 100,000. The American prostate-cancer rate is 15.7 per 100,000, also roughly four times the Japanese rate of 3.5 per 100,000. A high-fat diet has long been suspected as a cancer-causing culprit. That could be true. But while Americans eat more fat, they also eat fewer plant foods, including soy...

"In the meantime, try making this summer's fruit shakes with soy milk–and see if anyone notices."

Note: This is the earliest document seen (June 1999), with "soy" in the title, and which suggests that soy might reduce one's risk of prostate cancer.

10346. Kohyama, Kaoru; Yoshida, M.; Nishinari, K. 1993. Rheological study on the gelation of soybean 11S protein by glucono-delta-lactone. *J. of Agricultural and Food Chemistry* 40(5):740-44. May. [32 ref]

see the 12th edition (1989). Address: Washington, DC.

10348. **Product Name:** Tofu, and Soy Sprouts.
Manufacturer's Name: Lotte Oriental Foods Inc.
Manufacturer's Address: 2030 Will Ross Court, Chamblee, GA 30341. Phone: 404-454-7569.
Date of Introduction: 1993. May.
New Product–Documentation: Talk with James Kim, owner. 1993. Nov. 18. He bought this company in May 1993 from Mr. Wen Wang of Manna Foods at the same address. He currently makes tofu, soy sprouts, and mung bean sprouts. He plans grow shiitake as well. Mr. Wang started the company in about Nov. 1991 at the same address and he made the same foods.

Talk with James Kim. 1998. July 30. He is no longer making tofu or soy sprouts or any other soyfoods. His business is now retail.

10349. Mack, Scott. 1993. Food for thought: Toad food and other indignities. *Veggie Life* (*Concord, California*) 1(1):62. May.
• ***Summary:*** "People could learn a lot from tofu. Often the butt of jokes, tofu gets maligned and accused of being tasteless, yet it goes on being indispensable. It is a humble product with a plain-Jane appearance that hides out in obscure corners of the supermarket. Nevertheless, it endures and grows in popularity from its origins in ancient China. It does not lend itself to passing fads and doesn't attract endorsements from celebrities. You will not find it prettied with neon colors nor will you find it packaged in Elvis-shaped blocks. Tofu is tofu–a competent, silent tower of nutritional strength in a vegetarian cook's arsenal...

"Perhaps the greatest attribute of tofu is its flexibility. In this age of specialization, it is a great generalist...

"If tofu were an animal, it might be an ox. Strong, unglamorous, dutifully carrying its load. It tofu were a person, it might be Gandhi, noble, without pretense. If only people could be more like tofu. Adaptable and yielding, yet strong and substantive. Simple and straightforward, yet capable of whimsy." Address: Freelance writer, Wayne, Maine.

10350. Nagayama, Hisao; Tokue, Akihiko. 1993. The naked kitchen: Tofu. *Look Japan* (*Tokyo*) 39(446):24-25. May.
• ***Summary:*** Color photos from Fujiya in Tokyo show: A tofu maker cutting a large block of tofu into 60 cakes; Dried-frozen tofu, regular (momen) tofu, and grilled tofu (yaki-dofu); Three types of deep-fried tofu; Yu-dôfu in a *nabe* with kombu. Note: H. Nagayama, born in 1934, is a food historian and Japan's leading authority on the authentic recreation of Japanese period meals.

10351. **Product Name:** [Tofu].
Manufacturer's Name: Soy Yildiz.
Manufacturer's Address: Bornova, Izmir, Turkey.
Date of Introduction: 1993. May.
New Product–Documentation: Talk with Murat Bukey, son of the owner of Key Gilda, Inc., Turkey's second tofu manufacturer. 1994. Nov. 17. As far as Murat knows, the first person to make tofu in Turkey was Mehmet Adnan, who probably learned how to make tofu in East Asia. Mehmet founded Soy Yildiz, and started making and selling tofu in about May 1993. He was a good entrepreneur, but he had limited financial resources, so he made tofu under very primitive conditions–like the Middle Ages. He was not able to survive, so he taught Murat's father, Ataman Bukey, how to make tofu. Ataman became Turkey's second tofu manufacturer, starting in Sept. 1994.

10352. **Product Name:** Tree of Life Tofu.
Manufacturer's Name: Tree of Life, Inc. (Marketer-Distributor). Manufactured by White Wave (Boulder, Colorado).
Manufacturer's Address: St. Augustine, FL 32084.
Date of Introduction: 1993. May.
Ingredients: Incl. Nichii Soy Flakes.
Wt/Vol., Packaging, Price: 1 lb water packed.
How Stored: Refrigerated.
New Product–Documentation: This tofu, introduced in May 1993, is private labeled for Tree of Life by White Wave. The product is doing well. Tree's main distributor's are Stow Mills, and Mountain People's Warehouse. Tree deals mostly with independent natural foods retailers, not with the chains.

10353. **Product Name:** Veggie Life Burger.
Manufacturer's Name: White Wave, Inc.
Manufacturer's Address: 6123 E. Arapahoe Rd., Boulder, CO 80303. Phone: 303-443-3470.
Date of Introduction: 1993. May.
Ingredients: Cooked rice (brown rice, water), organic* tofu (water, soybeans, gypsum, nigari (magnesium chloride)), wheat gluten, soy sauce (water, soybeans*, whole wheat, salt), green peppers, mushrooms, onions, carrots, sunflower seeds, oat flour, sesame seeds, granulated garlic. * = Soybeans grown and processed in accordance with the California Organic Foods Act of 1990.
Wt/Vol., Packaging, Price: 3.5 oz. (142 gm) vacuum pack.
How Stored: Refrigerated or frozen.
Nutrition: Per 71 gm. patty: Calories 110, protein 5 gm, carbohydrate 16 gm, fat 3 gm, cholesterol 0 mg, sodium 210 mg.
New Product–Documentation: Talk with Steve Demos, president of White Wave. 1993. May 22. On 15 May 1993 the burger hit the market with a new White Wave label that reads: "White Wave Veggie Life Burger." The retail product consists of 2 patties vacuum packed (2.5 oz each), and the 3.5 ounce for foodservice.

Label sent by Leonardo Laudisio. 1993. June 15. 4 by

4.5 inches. Self adhesive. Red, black, orange, yellow, blue and white. "No meat. No eggs. No dairy."

Leaflet (single sided, green ink on yellow paper) sent by Leonardo Laudisio. 1993. June 15. "Veggie Life Burger. A healthy vegan alternative."

Leaflet (black and white, single sided, 28 cm) sent by White Wave. 1993. June 22. "White Wave Veggie Life Burger: Food service information. Pack: 48 / 3.5 oz. burgers. Ship weight: 11.0 lbs. Price: $24.000 / case FOB Boulder, CO. Shelf life: 18 days refrigerated; 1 year frozen. Shipping: Frozen. Case dimensions. Case cube: .321. U.P.C. Kosher: Yes (Star K). Available: May 10. Then gives detailed nutritional information. Vegetarian cuisine company launches new Prime Burger, Chick'n Burger, and the new Veggie Life Burger."

Label sent by Paul Chasnoff of White Wave. 1996. May 2. 5.5 by 4 by 3/4 inch. Paperboard sleeve. Dark green, green, brown, tan, and beige. Color photo of the burger on a little lettuce, topped with a sliced pickles, relish, and a bun. The product name is now: "VeggieLife: Seasoned Grain & Vegetable Patty." The ingredients in this product are very similar to those in the original May 1993 product, except that the tofu is organic. The weight is now 6 ounces instead of 5. "Cholesterol free."

10354. Laudisio, Leonardo. 1993. Biography and history of work with soyfoods, vegetarianism, and macrobiotics (Interview). *SoyaScan Notes*. June 13. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Laudisio is an Italian name but it is rare; based on the Latin "Laud" meaning to praise. His grandparents (his mother's parents) immigrated to the USA in the early 1890s from Italy on a sailing ship. He had some cousins in Brooklyn. When they went to Ellis Island they failed to recognize him, so they put him back on the boat and shipped him back to Italy. He had a little bakery in a little town called Vietri Sul Mare (which means "view of the sea"), a little north of Salerno. at the beginning of the Amalfi drive (going south). His grandfather returned to the USA (successfully this time) and started a small bakery under the Brooklyn bridge, making *galletta* (twice baked)–which the English call "hardtack." They worked in Italian food and stayed deeply immersed in the Italian community His grandfather later moved his bakery right above Redhook on 4th Ave. in Brooklyn. Leonardo was born on 2nd St. in Brooklyn in 1938.

His father's parents immigrated to the USA separately.

His family was always poor (they had little money), so they ate meat or fish, eggs or dairy only on special occasions and in small amounts as on Sunday or Friday. They ate a lot of pasta, bread and beans. He grew up on Neapolitan cookery. His father (who immigrated to the USA independently of Leonardo's grandfather) came from a restaurant background and owned several restaurants; his uncles were chefs on Italian cruise liners in the early 1900s. In the early days Leonard's father made Mozzarella cheese and other food products–with his uncle. His father comes from a farming village at the foot of Mt. Vesuvius in Naples. So both families come from southern Italy around Naples.

Leonardo started working in his parents' restaurant, Agostino, in Miami as soon as he could stand at the dish-washing sink. His father passed away when he was about 14 (1952). He supported himself (he and his 3 brothers, a sister and their mother owned a restaurant) as a chef in Miami all through high school and college. His brother developed the restaurant, Raimondo, into a famous restaurant in south Florida. In 1959 he and his brothers closed the restaurant went to Cuba to see Fidel Castro. In 1961 they again closed the restaurant and traveled around Europe in a Volkswagen bus. Eventually the family had 2 restaurants. The Agostino was run by his mother with his eldest brother; his next to oldest brother, Raimondo, who is 60 now, went to Europe, studied in Rome, got into fancier northern Italian cooking, and in 1965 he returned to the USA and opened his own restaurant Raimondo in Florida.

In 1963 Leonardo graduated from the University of Miami with a B.A. in philosophy. In 1964 he left the USA and went to Europe to avoid the Vietnam war; he did a lot of his post-graduate work during 3 years in Europe, in Italy and Spain, where he worked as a sandal maker to support himself. He returned to the USA after he was too old to get drafted and in 1967 got his MA in philosophy from the University of Miami. Leonardo was always kind of the black sheep of the family.

In about 1965, while in Spain, Leonardo became

© Copyright Soyinfo Center 2013

macrobiotic together with a friend of his from Berkeley named Robert Richheimer (who was on the coordinating committee of the Free Speech Movement and had set up an alternative living scene in Spain). Leonardo, with his girlfriend (whom he met in London), went to visit him. He was living next to a French macrobiotic chef named Bernard, who was very close to George Ohsawa and who opened a macrobiotic hotel, restaurant and night club named Javea overlooking the Mediterranean between Alicante and Valencia–1 mile from the seacoast. Bernard proceeded to build a house and to start a macrobiotic school. George Ohsawa came to see the house but he never actually lived there. They had to drive to France to get brown rice. When they had leftover rice, they would make "rice cakes," by shaping the rice and leftovers into patties, adding tamari and gomashio, then baking them. They were "heavenly." He thought of starting a company selling them–in an era when most people had never heard of brown rice. Another of his famous foods was a bowl of brown rice with gomashio.

Leonardo was living an alternative lifestyle and eating alternative foods. Doing that in Spain at that time was pretty strange. But he began to take vegetarianism as part of his own philosophy. He and his girlfriend lived together for 2 years before they got married–in Coconut Grove, Miami on 22 Jan. 1967; they have been married for 28 years. He got his MA degree at the end of the year he got married. After earning his MA degree, he and his wife returned to Europe and lived mostly in Spain for 9 years (he was a sandal maker, collecting antiques; their 2 children–both daughters–were born in Spain) until 1977, when they returned to the USA, locating in Boulder, Colorado; there he helped a friend open a restaurant named John's. He also attended the Naropa Institute and worked to give his two daughters an American identity. Rain, his oldest, is 22, and China Moon is 19.

In 1978 he bought an acre of land in Boulder, spent several years building houses, like an intentional community. He still was not yet in the restaurant business.

In 1981 he and his family moved to Marin (San Anselmo), where he worked for a film caterer (Chef Cornelius, catering for people who were making films) for a while, then, with his younger brother, bought Marin Fish and Poultry in San Anselmo that sold (but did not raise) fish and poultry. He did that for a year.

They were not ready to settle down so they (and his brother) returned to Europe, on a 70-foot sail boat, sailing the whole way. They lived on the boat in Europe. where they lived in Italy for 5 years. They put their kids in school in Florence for a year, then 2 years in Rome. When he returned to the USA he and his brother were arrested and they each served 2 years (about 1987-90) in jail in Lompoc, and each worked as an institutional cook while doing good time. That's when he really became a vegetarian, seeing the quality of meat that is sent to jails. He got out at age 49-50 and had a very hard time getting re-established. Both his daughters had become vegetarians by this time–Rain in 1979 and China Moon in 1987. They became vegans in 1988-89. In 1990 Leonardo got back into film catering. Also in 1990 he bought a "hot truck," a catering kitchen truck and he began to do more and more vegetarian cooking and catering. By 1991 he was a full-blown vegetarian caterer.

He met a chef named Steve McClaine (age 32 and a chef at Millie's in San Rafael). He took his daughter, China Moon there when she graduated from high school in Redwood City because Millie's served vegan dinners including desserts. At the time he was selling Wildwood's vegetarian tofu burgers at street fairs, the flea markets in Marin, San Rafael Farmers' Market, etc. Steve introduced Leonardo to using tofu, seitan, and tempeh in veggie burgers and other foods. Steve offered to give Leonardo a recipe he and friends on in the Boston area had developed for veggie burgers. Leonardo started making 1,000 a month but he added a significant amount of brown rice. The recipe changed a dozen times when Leonardo was involved with Steve. Leonardo had to mortgage his house, because he was spending all his time making, demoing and selling veggie (actually vegan) burgers. It became an obsession that lasted for about 2 years. His wife and daughters would travel with him during the summers, up and down the Pacific Coast. At some point he and Steve McClain started a company, McLaud Partnership–a combination of their names. Leonardo went to a lawyer, spent $1,000, but it never was official. Steve went back and forth, but never signed the papers. Continued. Address: c/o White Wave, Boulder, Colorado.

10355. Laudisio, Leonardo. 1993. Biography and history of work with soyfoods, vegetarianism, and macrobiotics (Interview) (Continued–Document Part II). *SoyaScan Notes.* June 13. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Continued: So Steve and Leonardo worked together informally but actually. Initially the product was called simply Veggie Burgers. Starting in 1991 they had one stationary location that they rented–The Kitchens, Inc. in San Rafael, Kitchens Inc., an institutional communal kitchen in San Rafael. The name "Veggie Life" came about because Leonardo was on a list of alternative caterers for Bill Graham Performances. He worked at times with Graham. After Graham's death on 25 Oct. 1991 in a helicopter crash accident in California, Leonardo was invited to cater the memorial service; he donated veggie burgers at the Polo Grounds. That was when he came up with the name "Veggie Life." It took him years to develop the label, but on the early ones, photocopied at Kinkos, the address was given as The Kitchens, Inc. in San Rafael.

In Oct. 1991 Leonardo flew to Boulder with 1,000 of his veggie burger in two big Igloo coolers. He served them on the mall at an Oktoberfest festival.

In earlier days Leonardo had purchased shares in

© Copyright Soyinfo Center 2013

Alfalfa's market in Boulder. So he knew some influential people who were now high up in the natural foods industry. In Sept. or Oct. 1992 he sat down with Mark Retzloff and Paul Repetto and served them his veggie burgers, Italian style. He never served a regular American hamburger-type veggie burger. He always made them special, with special sauces and delicious toppings and maybe no buns. The burger was always the base. Retzloff and Repetto were so taken with these various veggie burgers they told him he was in the wrong business. "You have no business manufacturing these things. Manufacturing is just one small step in the whole process. You've got to market them! That's where the money is. You're a perfect candidate to market these veggie burgers. Plus you've got this fabulous, famous Laudisio Ristorante Italiano restaurant in Boulder that can only help you." Mark said, "I've got a great friend in town named Steve Demos. He'll make these veggie burgers for you. I think he's looking to branch out and he private labels other products. Moreover, you can buy your tofu from him, probably cheaper than you could buy it in California."

So Leonardo called Steve Demos and then went to meet him at the White Wave plant. Demos said he would sell him tofu for $0.10 a pound less that what he was paying Wildwood–if he would buy roughly 1,000 lb at a time. Leonardo asked Steve if White Wave would make the veggie burgers for him. He said, "Not yet." From that time on, Leonardo started buying the tofu for his veggie burgers from White Wave. Before long he was buying 800 to 900 lb of tofu every 2 weeks.

He flew to Boulder more than once. He also did street fairs. That is when his brother, Antonio, started to get turned on by the whole idea of these meatless burgers. Antonio put them on the menu of his restaurant and did specials with them.

In Aug. 1992 Leonardo realized he was not making enough money from his veggie burgers. With his younger brother, he had owned part of an Italian restaurant named Laudisio in Boulder, Colorado. His brother suggested that Leonardo drive his truck to Boulder (where there were lots of vegetarians). They would make the veggie burgers at the restaurant and Leonardo could work in the restaurant. His brother had financial backing to start a new restaurant, the Mediterranean. So in Aug. 1992 Leonardo drove his truck to Boulder to start anew. Steve, who was very reluctant to take on any risk, eventually became the deli manager for the new Whole Foods Market in Mill Valley. But Leonardo had real faith in his veggie burgers. In 99% of the times when there was a competition or comparison, his would win.

In June 1992 Leonardo sold his veggie burgers at a "Creek Festival" in Boulder. Repetto and Retzloff suggested again that he talk with Demos again. So he asked Steve Demos again if he would be willing to make Laudisio Veggie Life burgers under contract. This time Steve said, "Let me look at the recipe, see how difficult it will be, then I will give you an answer." From August 1991 to Jan. 1992 we worked on the recipe in Boulder and changed it. Leonardo was still making the burgers in California. Then late one night he got a call from California; one of his workers had put his hand too far into a machine and sliced off the tip of a finger. Leonardo had no workman's compensation insurance. He knew he could lose his house. So he now had much more incentive to make things work with White Wave. But he had taken on a big new responsibility–for 6 months–as the project manager for development of the Mediterranean restaurant with his brother in Boulder. He has lots of energy and can work hard for long hours every day. Before long White Wave was making the burgers.

The next phase came in early 1992 at the time of the Natural Products Expo at Anaheim, California. White Wave had finally made the first run of acceptable veggie burgers. Leonardo told Steve he would like to attend the trade show at Anaheim because he wanted to start building national accounts; he would pay his own way and his own hotel but he wanted to work out of the White Wave booth. Steve said, "If you come, I want to be sure you are representing White Wave. I don't want you to be pushing Veggie Life Burgers." Leonardo agreed and replied. "I want to see how you run your business." Leonardo flew out to the show with Lonnie Stromnes. He showed up at the booth in bright baggy pants, long hair, handlebar mustache, wearing strange glasses. Really colorful. He speaks fairly good French, Italian, and Spanish. So he ended up selling plenty of White Wave products–and forgot all about the Veggie Life Burger. Leonardo met a lot of people he knew well from his years of work in the field. Steve wasn't there the first two days of the show. Pat (Steve's partner) and Lonnie told Steve that Leonardo was doing an incredible job. He was a natural salesman. "We've got to see if we can get him into our company." On the third day Steve asked Leonardo to accompany him to the produce show in San Diego. He said, "I'll pay your way down. I know what you can do in front of vegetarians but I want to see how you handle yourself with guys who sell produce and drive trucks and have never heard of tofu."

Leonardo greatly enjoyed working at the show in San Diego. Steve congratulated him on a fine job, then said. "I know you are a budding entrepreneur. But for you to get to where I am, is gonna take you years and a lot of money. So I want to make you an offer. I'll buy your company. I'll give you royalties on the product. I want you to head up a nationwide foodservice division of White Wave and sell these esoteric products to mass market using your experience in the restaurant and the restaurant's reputation. Please think it over." He laid out a plan in broad strokes. Leonardo liked the idea, so he suggested to Steve that they work out the price and royalties together. "I have never worked for anyone before and I didn't want to work for you. Just give me more of a commission. I'll take an advance on my commission. In

© Copyright Soyinfo Center 2013

6 months if it doesn't work, I'll give you the money back." He said, "No, I'll take that gamble." Leonardo does a lot of his selling in the two family restaurants. It is the ideal setting. Television shows came in and loved the vegetarian dishes Leonardo had developed. It was a huge success. Steve Demos picked up on the idea. He said, "I want to register the trademark 'Chef Leonardo' and work on a program where 'Chef Leonardo' becomes associated with White Wave, so that White Wave not only has a corporate chef but also has a whole program of recipes that have been taste-tested in restaurants so we can play this up. We'll be the only company that has this right now."

30% of the menu at the Mediterranean Restaurant in Boulder is now vegetarian.

Now Leonardo travels to all kinds of foodservice organizations (restaurants, hospitals, college, university and corporate dining rooms) and makes presentations with recipes, products, nutritional facts, taste tests and prices. He knows how these people think and what their problems are. He also knows that 25% of their clients are clamoring for vegetarian food and that they're in a bind. "The growth in this industry is mainstream and foodservice." Address: c/o White Wave, Boulder, Colorado.

10356. Weiner, Michael. 1993. New developments with Amano and Yamashita (Interview). *SoyaScan Notes.* June 18. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Michael works as a consultant for Peter Joe of Sunrise Market Ltd. and with Amano Foods. He used to consult with Mandarin Enterprises in British Columbia. Now his main work is as a broker, representing various U.S. companies such as Vitasoy, Knudsen, Santa Cruz, etc. Amano still makes all of Westbrae's organic miso. Amano is trying to construct a 60,000 square foot plant. They had a joint venture with Yamashita but it fell apart. Now Yamashita is constructing their own 60,000 square foot soy sauce plant in Oregon. The ground breaking will take place in a couple of weeks. Michael does not feel that this will be much of a threat to Amano, which plans to sell a lot of Amano products in supermarkets. The market is big and growing rapidly. Soyfoods now are given large amounts of shelf space (8-16 linear feet) in the produce section of all supermarkets in western Canada (British Columbia, Alberta, and Manitoba). A major reason for this is that Mandarin and Sunrise have an excellent relationship with the people in charge of the produce section in western Canadian supermarkets. Initially Michael helped to establish some of these relationships; these companies got a few facings for their tofu. Then Mandarin added their tofu burgers. Then Sunrise added Yves Wieners and soy cheese. The products sold, which is proof that exposure will work. Michael was involved in trying to make the same thing happen in Ontario with the Loblaws chain, and in Quebec, but they were never allowed to give the program a try–not even in 1-2 stores.

Safeway supermarkets are so sold on soyfoods that they have developed special open-front, vertical, refrigerated "Tofu Products" cases that are placed adjacent to the produce case, but have a lower temperature. They are quite large and contain everything from soy drinks to tofu, soy cheese to meatless hot dogs. Soyfoods are very widely available on Vancouver Island.

Sunrise and Michael jointly import Mori-Nu tofu into Canada from Japan. Also Sunrise distributes some juice products for which Michael is the broker. Mori-Nu does not sell well in supermarkets because it's retail price is too high. Address: President, New Age Marketing, P.O. Box 39590, White Rock, BC, V4A 9P3, Canada. Phone: 604-538-0127.

10357. Harris, William. 1993. Why he thinks calcium chloride is a better tofu coagulant than calcium sulfate (Interview). *SoyaScan Notes.* June 21. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Dr. Harris is a physician (M.D.) and a vegetarian. The rate of loss of calcium from the blood stream can be increased by consuming high amounts of sulfur-containing amino acids. Excess amounts of these are unhealthy because they break down to sulfate, which is excreted in the urine. Sulfate is one-half of each sulfuric acid molecule, which the body does not like, so it uses calcium (or other divalent cations) to buffer the sulfate, and the calcium leaves the body with the sulfate. The sulfate ion has a negative valence of two which matches the calcium ion's positive valence of two. He is not sure that this is the mechanism whereby calcium is lost from the body. Other cations besides calcium can be used to buffer the sulfate in the urine–sodium, magnesium, potassium, etc.–and he does not know if there is a selective preference for calcium. Nor can he guarantee that increasing sulfate increases the excretion of calcium. But in any case the body has no use for sulfate and none of it circulates in the blood stream. However the body does have a use for chloride, which is a major serum anion and is useful for the stomach in making hydrochloric acid. So if you use calcium chloride as a tofu coagulant the body gets two ions which are potentially useful.

He would like to see more research to answer several questions in this area. (1) Is the calcium in calcium chloride or calcium sulfate more available to and better absorbed by the body? (2) Is there a selective preference in the body among the various cations which could be used to buffer sulfate that is excreted? Address: P.O. Box 25233, Honolulu, Hawaii 96825. Phone: 808-941-8151.

• ***Summary:*** The left half of this 8½ by 11 inch color ad shows the three different types of Mori-Nu tofu stacked one atop the other. The right half shows the "supporting cast of product brochures, recipe tear-offs, videos, a display merchandiser [that displays 24 packs of tofu] and the new, highly acclaimed, *Tofu and You–A Personal Weight-loss Program and Healthy Eating Plan...* To join the Mori-Nu Fan Club call 1-800-NOW TOFU."

This ad also appeared in *Natural Foods Merchandiser* (June 1993, p. 58). Address: 2050 W. 190th St., Suite 110, Torrance, California 90504. Phone: 310-787-0200.

10364. *Newsletter of the Soyfoods Association of America* (*Libertytown, Maryland*). 1993. Thank you to the American Soybean Association. 4(2):2.
• ***Summary:*** "The American Soybean Association has awarded the SAA [Soyfoods Association of America] a grant for $27,625.00 to develop and distribute educational materials on soyfoods and to produce periodic press releases. The grant will be used to produce a 4-color brochure on soyfoods and eight individual, camera-ready fact sheets on tofu, soymilk, tempeh, miso, texturized vegetable protein, soy flour, soy-based meat analogs, and soy oil. Materials will be made available to state soybean boards for distribution to consumers and volunteer soy promoters, to state level cooperative extension nutritionists for distribution to consumers through county home economics offices, and to health professionals for use in health and nutrition education programs. The first two fact sheets–on tofu and soymilk–will be available this month. All of the materials will be completed by Fall, 1993."

10365. **Product Name:** Soyboy Garden Tortellini.
Manufacturer's Name: Northern Soy, Inc.
Manufacturer's Address: 545 West Ave., Rochester, NY 14611. Phone: 716-235-8970.
Date of Introduction: 1993. June.
Wt/Vol., Packaging, Price: 10 oz.
How Stored: Frozen.
New Product–Documentation: Spot in Health Foods Business. 1993. June. p. 60. Shows the front panel of the

© Copyright Soyinfo Center 2013

label, which states: "Vegetarian. Non-dairy. No cholesterol. Low fat. Made with organic soybeans. Low sodium. Keep frozen." The product is said to be made with durum flour and filled with pesto, made with organic tofu.

10366. **Product Name:** Soya Beverage, and Tofu.
Manufacturer's Name: Palaami Food Products India (P) Ltd.
Manufacturer's Address: I 1/C Sidco Industrial Estate, K. Pudur, Madurai, Tamil Nadu–625 007, India.
Date of Introduction: 1993. June.
New Product–Documentation: List of new tofu manufacturers in countries where tofu is not well known, sent by Yoshinori Ito of Takai Seisakusho. 1994. Nov. 15. The owner of this new tofu company is Mr. Prem Palanivel.

Letter (fax) from Mr. D. Prem Palanivel. 1995. March 24. He started making Soya Beverage and tofu in June 1993. He now makes about 5,000 liters/month of Soya Beverage and 50-75 kg/month of tofu. Madurai [Madura] is located in southern India.

Letter (fax) from Mr. D. Prem Palanivel. 1995. May 22. He is presently packing his products in HM HD pouches. By June 1995 he plans to introduce his soya beverage in Tetra Brik cartons and to reach a capacity of 10,000 200 ml pouches per day. "Our machinery and basic know-how was imported from Takai of Japan. After extensive research, we have developed our product so it is suitable to the Indian taste, and we have branded our product Pep 'n' Bounce." He would like to establish a branch of the International Soyfoods Center Network in India.

10367. Patterson, Anne. 1993. Tofu accents today's diets. *Soy Connection* (*The*) (*Chesterfield, Missouri–United Soybean Board*) 1(1):2-3. [6 ref]
• ***Summary:*** Discusses the many health benefits of eating tofu. In a diabetic exchange, 4 oz of tofu = 1 medium fat substitute. In the American Heart Association Step 1 Diet, 3 oz of tofu can replace a 3 oz serving of meat, poultry, or fish.

On the facing page (p. 2), a nicely illustrated article titled "Try Tofu" describes tofu, gives tips on buying, storing, and using tofu, calls it a "nutrition powerhouse" in discussing its nutritional benefits, and gives a recipe for Tofu South of the Border Enchiladas. Address: R.D., Farmington, Illinois.

10368. **Product Name:** Organic Tofu (Flavored) [Hot {Mildly}, or Curry {Mild}].
Manufacturer's Name: Small Planet Soyfoods.
Manufacturer's Address: 4452 Rocky Gorge Rd., Newport, WA 99156. Phone: 509-447-5146.
Date of Introduction: 1993. June.
How Stored: Refrigerated.
New Product–Documentation: Talk with Phil Spiegel. 1998. July 30. He introduced these two flavored tofu products in about June 1993. The idea for these flavored tofu products was developed by Silverking in British Columbia, Canada; they shared the idea with Phil–who made some small modifications.

Labels for Mildly Hot Organic Tofu and Mild Curry Organic Tofu sent by Phil Spiegel. 2001. May 18. 3.75 by 5 inches. Self adhesive. "Non-GMO" logo. "Hand crafted in the Northwest by Penrith Farms, 330112 Hwy #2, Newport, Washington 99156. Phone: (509) 447-5146. www.smallplanettofu.com." A large illustration shows a river with trees and mountains.

10369. **Product Name:** Naturally Tofu–Better Than Burger? (Dry Mix).
Manufacturer's Name: Sovex Natural Foods, Inc.
Manufacturer's Address: P.O. Box 2178, Collegedale, TN 37315. Phone: 1-800-227-2320.
Date of Introduction: 1993. June.
Ingredients: Soy flour, oats, tofu powder (dehulled soybeans, calcium sulfate), garlic powder, dried onion, vegetable gum (guar gum blend), onion powder, vegetable protein, dill, parsley, basil, dried carrots, oregano, marjoram.
Wt/Vol., Packaging, Price: 12 oz (341 gm) paperboard carton.
How Stored: Shelf stable.
Nutrition: Per ½ cup (55 gm.): Calories 165, total fat 2 gm (3% daily value; saturated fat 0.5 gm), cholesterol 0 mg, sodium 52 mg (2%), total carbohydrate 25 gm (8%; dietary fiber 9 gm [36%], protein 20 gm, calcium 16%, iron 16%. Percent daily values are based on a 2,000 calorie diet.
New Product–Documentation: Ad (full page, color) in Health Foods Business. 1993. July. p. 26. Naturally Tofu–Better Than Burger? Sink your teeth into this! Also published in Natural Foods Merchandiser. 1993. Sept. p. 31.

Talk with Chris Durden of Sovex. 1993. Sept. 27. This product was launched in about June 1993. The only other products in the line are Better than Milk? and Ice Creme

Label sent by Sovex. 1993. Oct. 6. 5.5 by 8.25 by 2 inches. Paperboard box. Red, tan, white, and black. Color photo on front panel of a burger between buns with all the trimmings. On the back panel are 3 recipes and a product guarantee. To make a burger, mix the contents of this package (12 oz.) with 1.75 cups warm water and 3 tablespoons soy sauce. Mix, form into patties (24 oz. weight), and fry in vegetable oil.

10370. *SoyaCow Newsletter* (*Ottawa, Canada*). 1993. SC-20 complements fine vegetarian restaurant and top natural foods store. 2(2):1-2. April/June.
• ***Summary:*** "The Sweet Carrot Cafe in Saskatoon and Rainbow Foods in Ottawa are the first Canadian retail sites for the SoyaCow SC-20... Both locations produce fresh non-beany soymilk for direct sale and formulation into value-added products like shakes, yogurt, pudding, okara

© Copyright Soyinfo Center 2013

baked goods, tofu, etc. They also feature returnable glass bottles of the soymilk in several flavours." The Sweet Carrot Cafe is a fine [vegetarian] restaurant, featuring a grand piano, tablecloths, and wine. Owners George and Wendy Conquergood have added a Health Bar & Deli, made possible by a new SoyaCow.

"The newly-enlarged 5,700 square foot Rainbow Foods in Ottawa is the largest health and natural products store between Toronto and Montreal. Owners Janet and Mike Kaplan see the production of high-quality fresh soymilk as a major feature of their full-service operation... Their "Healthy Deli" with the SoyaCow comprises over 1,000 square feet of the total business, and customers can see the micro-soydairy operation from the fast-food counter."

Photos show: (1) George Conquergood with his SC-20 at the Sweet Carrot Cafe. (2) The SoyaCow SC-20 at Rainbow Foods, owned by Janet and Mike Kaplan. Note: The SC-20 at Sweet Carrot Cafe was in operation before the one at Rainbow Foods. The soymilk made at Sweet Carrot Cafe was the first commercial soymilk made by any model of SoyaCow.

10371. Hurley, Jane. 1993. The fat content of tofu (Interview). *SoyaScan Notes.* July 13. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Jane is analyzing the fat content of nationally-distributed brands of tofu. According to the new FDA NLEA regulations, any food that contains 3 gm of fat or less per serving (regardless of the percentage of calories from fat) may be called a "low fat food." The FDA decided, after considerable pressure from the USDA, to standardize the serving size for all protein foods at 3 ounces, even though most figures show that a serving size for most meat products (and tofu) is closer to 4 ounces. The USDA and the meat industry felt that a 4-ounce serving size would make its products look bad in terms grams of fat per serving. "The meat industry won that battle."

"The interesting thing to me about looking at tofu on the market is that it is lower in fat than everyone has been led to believe. It is a 'low fat food' by the FDA definition, and some brands are lower in fat per serving than others. That is the most interesting finding for me. White Wave's 'reduced fat' tofu is not much different in terms of fat and protein content than other regular brands (5 gm of fat and 9-10 gm of protein per 4 oz.). Its is true that White Wave's 'reduced fat' is reduced in fat compared to White Wave's regular tofu. The other key finding is that the USDA numbers concerning the nutritional composition of tofu are incorrect. Yet nutritionists continue to use these numbers. For tofu, we used laboratory analyses of the tofu sent to us by the manufacturers."

"CSPI has never panned or criticized tofu. We've always said that because it is free of cholesterol and has a low saturated fat content, it is certainly a good choice. We've never told people not to eat tofu." Address: Center for Science in the Public Interest (CSPI), Washington, DC.

10372. Demos, Steve. 1993. New developments with soyfoods in America (Interview). *SoyaScan Notes.* July 31. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Vitasoy purchased Azumaya Inc. (America's largest tofu manufacturer, and the low-price leader) in May or June 1993 for an estimated $4-$5 million. Azumaya did not sell their building or the land on which their plant is situated. So now Vitasoy owns two large tofu manufacturers on both coasts of the USA: Nasoya in Massachusetts, and Azumaya in California.

Mr. Yamauchi sold the rest of his ownership in House Foods & Yamauchi, Inc. to House Foods of Japan. [Note: Another industry observer states that the sale took place in about April 1993 for about $2 million].

Bill Bolduc is now running a soymilk plant in the Midwest; he now makes Westbrae's soymilk. Steve sees the future of soymilk as being packaged in the new extended shelf life (ESL) gable-top carton and sold as a commodity for a lower price like cow's milk rather than as a specialty flavored beverage.

Anders Lindner told Steve in March that DE-VAU-GE wanted to sell their soymilk plant. He offered to sell the used plant to Steve for a good price in German marks. Steve never responded.

White Wave now makes about 100,000 lb/week of tofu (of all kinds). The company's reduced fat tofu is selling very well. Quong Hop is stating on two red-on-white stickers on their package that (1) their tofu is "The original reduced fat tofu;" and (2) "The original reduced fat–High protein tofu: Serving size 4 oz., Fat per serving 3 gm. Protein per serving 14 gm." Lab tests run by more than one company indicate that Quong Hop's tofu actually contains far more fat.

Steve bought Veggie Life from Leonardo Laudisio much more for the name than for the product (meatless burger) or its formula.

Update: 1993. Nov. 24. Talk with Leonardo Laudisio. On about November 8-10 White Wave secured preferred vendor status from Whole Foods Markets. They now are installing their cold-storage "set" in the individual stores; one is now in the Berkeley store. At the top in large letters is written "White Wave Vegetarian Cuisine" with the oval White Wave logo is bas relief. Address: President, White Wave Inc., 1990 North 57th Court, Boulder, Colorado 80301. Phone: 303-443-3470.

10373. **Product Name:** Tofu Jerky [Spicy, or Mild].
Manufacturer's Name: Cedar Springs Naturals.
Manufacturer's Address: Health Zone of Temecula, 27468 Ynez Rd., Suite B-7, Temecula, CA 92590. Phone: 909-694-5488.
Date of Introduction: 1993. July.
Ingredients: Tofu (made from whole soybeans), 100%

© Copyright Soyinfo Center 2013

natural soy sauce (made from sea salt), organic honey, and nature's finest herbs and spices.
How Stored: Shelf stable.
New Product–Documentation: Talk with (call from) Donna Cochran. 1993. July 8. She is looking for a source of tofu. She wants to make tofu jerky. Talk with (call from) Donna Cochran. 1993. July 17. This product was launched commercially on 1 July 1993. She would like to send Soyfoods Center a free sample in exchange for free evaluation and consultation.

Product with Label (2 flavors) and letter sent by Michael Molver and Donna. Home address: P.O. Box 128, Winchester, California 92596. Phone: 909-926-9716. 4.25 by 5.25 folded in half over top of plastic bag. Black on beige or pink. A large illustration (line drawing) shows cedar trees growing in front of mountains and clouds. Front panel: "No beef. All natural. High protein. Low fat. No animal products. No preservatives. No cholesterol. No wheat. A vegetarian snack."

10374. Executive Committee Secretariat. 1993. The Roots of Biotechnology in Monsoon Asia: The Third Asian Symposium on Non-Salted Soybean Fermentation and International Soybean Food Fair. Akita Cultural Center, Akita City, Japan: 4-6 June 1994 (Leaflet). Akita, Japan. 2 p. July.
• ***Summary:*** The executive committee for this event is: Chair: Prof. Tadao Watanabe. Vice-Chair: Prof. Fumio Yamauchi. Indonesia Advisor: Dr. Darwin Karyadi. United Nations University (UNU) Food and Nutrition Programme Advisor: Dr. Abraham Besrat.

The symposium hopes to focus on South-South cooperation for technical transfer of soybean technologies (koji, tempe, natto) to Africa in order to alleviate an impending protein crisis beyond the year 2000.

Program outline: Part I: International Soybean Food Fair–Industrial/commercial exhibition and cooking demonstration of ethnic cuisine using soybean products. Part II: Public Symposium–World soybean overview with perspectives for international technical cooperation in Africa. Part III: The Third Asian Symposium on Non-Salted Soybean Fermentation. Session 1. Koji for fermented soybean (Kikkoman, Nagano Miso Institute, China, Korea, Akita). Session 2. Natto in Asia–Microbiology, enzymology, health-medical studies. Kinema of Nepal, Tuanao [Thua-nao] of northern Nepal, Bhutan. Session 3. Tempe (Overview by Dr. Darwin Karyadi, contributions from Indonesia, Germany, USA, Japan and others–on microbiology, biochemistry, nutrition, physiology, medical studies, cooking, and industrial development). Part IV: The Role of Soybeans in Africa–The Perspective beyond 2000 (organized in cooperation with UNU Food and Nutrition Program). Sessions: Agriculture of Sub-Saharan Africa and soybean development (World Bank, IITA, JICA). Tofu technology adapted to West Africa (Dr. Nakayama, IITA). Indigenous fermented legumes in West Africa. Introduction of soy into Sub-Saharan African diet. Achievements of UNU Tempe Training Program (Indonesia/UNU; with Poster presentation of UNU funded research). Proposal on South-South cooperation.

Technical tours will be organized from three participating countries: Indonesia, USA, Germany. Address: c/o Akita International Assoc., Aidex Building 8th floor, 2-1-60 Sanno, Akita City, Japan 010. Phone: 0188-64-1181.

10375. Haren, Chuck. 1993. Maya soy Guatemala. *Plenty Bulletin* (*Davis, California*) 9(2):1-2. Summer.
• ***Summary:*** "I spent two mornings at Alimentos San Bartolo (ASB), the Mayan owned and operated soy dairy near Solola that Plenty helped to create in 1979-1980. Alimentos San Bartolo is a business that is owned by the community of San Bartolo. A board of eight directors, who are the Community Development Directors for the village, watch over the operations. Our old friends Elena and Augustine continue to work there. ASB has a total staff of eight people.

"They sell about 2,000 frozen ice creams and fruit flavored milk bars every month during the six-month dry season. Also, each month they sell 700-800 lbs. of tofu and 60-80 lbs. of tempeh to stores in Antigua (Guatemala), Panajachel and Guatemala City. Some packaged soybeans and soy flour are sold and a small amount of milk is delivered to individual homes that like it. The prices of all these products are slightly lower than comparable foods on the market. The business is just making enough now to cover the small wages they are receiving and the other basic operating costs. They are not making enough to repair major equipment failures or to replace equipment when needed. All the equipment has been very well-maintained by the staff and the sanitation standards are very high.

"One thing that was obvious was the need to establish a small restaurant outlet in Solola if the ASB is going to develop a wider market for soybean foods among the Mayan people. They need a place near the center of Solola. They need an opportunity to show people the variety of delicious ways soybeans can be included into traditional foods at a very low cost and also educate the populace about the nutritional value of soybean foods. Now the local people only buy the frozen milk/fruit bars, ice cream and a small amount of milk. Why?–because they are not expensive and are sold in forms that are similar to foods they are accustomed to. Almost all of the tofu and tempeh is sold to stores catering to tourists... Now virtually all of the okara is used as compost to fertilize the gardens... Soybeans used at ASB are grown near the coast. They are purchased in Guatemala city. Inappropriate varieties, technical methods and lack of infrastructure used earlier limited soybeans from becoming a cash crop among farmers at the altitude of Solola (6,000-7,000 ft). Some people say soybeans cannot

© Copyright Soyinfo Center 2013

be established as a crop in this area because of the costs of fertilizer, fungus [fungicides] and insecticides needed, and the lack of sunlight during the rainy season."

"Fundadase is a Mayan NGO with a paid staff of about 25 people that supports community development work in areas surrounding Chichicastenango and Chimaltenango. They receive the majority of their funding from a Danish NGO."

In March of this year Haren participated in a successful 9-hour soybean workshop in Chichicastenango attended by more than 100 men and women from surrounding villages. "This group is very well organized." A meal was served which included soy harina drinks, okara stir-fried with vegetables and potatoes, and soymilk with vanilla. Then a practical demonstration of soybean processing was conducted. Finally several hundred pounds of soybean were sold to interested attendees in one and two pound packets. Of the 9 million people living in Guatemala, about 6 million are indigenous Maya. A 1991 United Nations study found that 6.5 million Guatemalans are living in extreme poverty. Photos show: A Mayan woman straining soymilk to make tofu at Alimentos San Bartolo. Two women preparing corn and soya tamales for the FUNDADASE demo. Address: Program Director.

10376. Osho, S.M. 1993. Developed soybean technologies for small-scale and industrial levels. Nigeria: IDRC Canada / IITA Soybean Utilization Project, Phase II. 67 p. July. Illust. 25 cm. [7 ref]

• ***Summary:*** On front cover and bottom of title page: "For a National Workshop on Small-Scale and Industrial Level Processing of Soybeans (27-29 July 1993). Contents: 1. Introduction. 2. Chemical composition and nutritive value of soybeans. 3. A concept for preparation of whole soybeans for use in human food: Reduce the long cooking time required to tenderize the beans using a blanch of sodium bicarbonate or a local tenderizer. Soybean can be processed into soyflour and soybean paste to facilitate processing. Elimination of anti-nutritional factors (by use of moist or dry heat). Ensuring high protein yield at the end of processing. Taste 4. The use of soybean at household / village level processing. 5. Processing of soybeans as an income generating activity: Soybean tofu processing (soywara or soycheese). Extrusion cooking: IITA concept. Defatted cake processing and soybean oil extrusion using mechanical screw press technology: IITA concept. Flow charts: 1. For making raw soy flour, partially processed soy flour, roasted soyflour. 2. Four methods for processing soy ogi. 3. Soybean gari. 4. Soybean iru. 5. Processing of plantain / banana products. 6. Soy vita / Soyvita processing. 7. Soybean milk processing (hot extraction, cold extraction, from soy flour). 8. Processing soybean milk and milk residue (okara). 9. Soy cheese from whole soybean. 10. Making soy yogurt.

6. Achievements and impact of soybean utilization. How to grow soybeans (starting with a small area). Fabricators / suppliers of soybean processing equipment (32 companies listed). Fig. 2. Instapro 600 extruder: Configuration for whole soybean extrusion. Fig. 3. Instapro 600 extruder: Configuration for corn/soy extrusion. References / suggested reading.

Note: On the white cover are the logos of IRDC/ IITA Soybean Utilization Project, International Institute of Tropical Agriculture (IITA) and Libran Trusts Limited.

Figures show: (1) Products derived from soybeans (full page). (5) Soybean processing by extrusion / expelling.

Tables show: (1) Chemical composition of whole soybeans. (2) Comparative cost of commodity and protein in selected food sources in Nigeria 1993 (The most expensive is milk powder at 556 Naira/kg. The least expensive is soybean at 167 Naira/kg). (3) Amino acid profile of soybean protein: Grams of gram Amino acid per 16 grams of nitrogen. Source: FAO 1985. (4) Specification of time, temperature and treatment for the complete inactivation of the soybean trypsin inhibitor at the household level (ranges from 4 minutes for puffing whole soybeans in sand to 30 minutes for boiling whole soybean at 100ºC.). (7) Yield and quality of soyoil as affected by processing temperature. (8) Physico-chemical characteristics of crude, partially and fully refined oil. (9) The percentage of farmers / households producing and utilizing soybeans in IRDC Project Sites (1991 vs. 1992). (10) Some soybean products that are being processed and marketed by companies in Nigeria (Feb. 1992). Shows 32 commercial products. For each product is given the company name, location (state), Product, and % soybean used in the product. Here are the details for each product.

1. Betamarks, Lagos, Soybean flours, 30%.
2. DLOB, Oyo, Soy oil / high protein cake, 100%.
3. Farina, Lagos, Soybeverages, 100%.
4. Kofa Agric. Ventures, Kwara, Soy oil / high protein cake, 100%.
5. Milkman, Oyo, Soymilk, 100%.
6. Oja Farms, Oyo, Soy oil / high protein cake, 100%, Casasoy, 30%.
7. Taraku Oil Mills, Benue, Soy oil / high protein flake, 100%.
8. Uncle Segun Food Proc. & Preserv. Co., Oyo, Soy powder, 100%.
9. Jomartex, Oyo, Soymilk, 100%.
10. Lisabi Foods, Lagos, Soy custard, 30%.
11. Smallette, Sogi, 30%.
12. Funtua Oil Mills, Kaduna, Soy oil / high protein cake, 100%.
13. Glaxo Nigeria, Lagos, 'Babeena' baby food, 30%.
14. Nestle Foods, Lagos, 'Nutrend' baby food / 'Golden Morn' breakfast food, 30%.
15. Imo Health Foods, Imo, Soybeverages, 100%.
16. Cadbury Nigeria, Lagos, 'Das' candies, 10%.
17. Tuns Oil, Osun, Soy oil / high protein cake extruded

products, 100%.

18. Marrison Ltd., Lagos, Extruded products, 100%.

19. Akiibiti Farms, Ondo, Extruded products, 100%. 20. Deagbo Industries, Oyo, Soyvita (beverages), 100%.

21. Tella Food Industries, Oyo, Soymilk, 100%.

22. Goodings Health Foods, Lagos, Texturized vegetable protein (Nutrela), 100%.

23. Niger Dock, Lagos, Soymilk, 100%.

24. Jof Ideal Family Farm, Ondo, Vegetable oil, 100%.

25. Temitope Biscuit Indus. Ltd., Ogun, Soybiscuit, 10%, Baby food, 30%.

26. Orman Industries Comp. Ltd., Oyo, Extruded soy full-fat defatted soycake, 100%.

27. Al-Bahamas, Lagos, Baba ogi, 30%.

28. Odichie Bakery, Lagos, soybread, 10%.

29. Morgan, Oyo, Soyflour, 100%.

30. Pfizer Nigeria Ltd., Lagos, Livestock feed, 30%.

31. Buckingham Ltd., Lagos, Mama Joy baby food, 30%.

32. Alphatec, Oyo, Soyoil / livestock feed, 100%.

33. Cocoa Industries, Lagos, Chocolate bar, 10%.

Address: 1. Food Technologist and Coordinator, IDRC/ IITA Soybean Utilization Project, International Institute of Tropical Agriculture, Oyo Road, PMB 5320, Ibadan, Nigeria.

10377. **Product Name:** Tofu.
Manufacturer's Name: Waiheke Tofu.
Manufacturer's Address: 31 Ostend Rd., Waiheke Island, Auckland, New Zealand. Phone: 09-372-7062.
Date of Introduction: 1993. July.
How Stored: Refrigerated.
New Product–Documentation: Talk with Carol Shortis, founder and owner of Waiheke Tofu, who calls from New Zealand. 1993. Aug. 29. She started making tofu at this company last month, July 1993. She now makes only 2 kg at a time, but she would like to expand to make 30-50 kg/ day, but to continue to make her tofu by hand. Her main competitor is Bean Supreme in Auckland; they turn out large quantities of tofu at a low price. She is looking for sources of equipment.

10378. Lo, Yvonne. 1993. New developments with Vitasoy (Interview). *SoyaScan Notes.* Aug. 2. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** William Shurtleff begins by congratulating Yvonne for the purchase of Azumaya, and for thereby becoming the largest tofu manufacturer in the Western world. Asked if this indicates that K.S. Lo and Vitasoy plan to move from Hong Kong to the USA in 1997 when control of Hong Kong is returned to China, Yvonne says "No," noting that Vitasoy International Holdings Ltd. plans an active program of investment in the food industry in China.

The purchase of Azumaya was finalized on 27 May 1993. Vitasoy only purchased the company; they did not purchase the building or land since Azumaya never owned these. The actual negotiations took a long time; they were conducted by Yvonne and Vitasoy (USA) Inc., which also officially made the acquisition. But this is not a key point since Vitasoy (USA) Inc. is a subsidiary of Vitasoy International Holdings Ltd. (headquartered in Hong Kong). Michael Ho will soon start to run the financial end of Azumaya; Bill Mizono plans to retire at the end of this year. Bob Bergwall, tofu production manager at Nasoya Foods in Massachusetts, was planning to move to California and take over as production manager at Azumaya but, unexpectedly and very tragically, his wife died of an aneurysm. They have a very young baby, which Bob now has to take care of. No articles about the acquisition of Azumaya have yet been published; Vitasoy has been very busy and they are not especially interested in publicizing the acquisition.

Concerning the larger picture of the soyfoods industry, profit margins for manufacturers are shrinking, and a new and more difficult relationship is developing between manufacturers and distributors. Address: President, Vitasoy (USA) Ltd., 99 Park Lane, Brisbane, California 94005. Phone: 415-467-8888.

10379. Mizono, Bill. 1993. More on the history of Azumaya (Interview). *SoyaScan Notes.* Aug. 5. Conducted by William Shurtleff of Soyfoods Center.
Address: Azumaya Inc., 1575 Burke Ave., San Francisco, California 94124. Phone: 415-285-8500.

10380. Centa, Roland A. di. 1993. Re: Introducing tempeh and tofu to Italy. Letter to William Shurtleff at Soyfoods Center, Aug. 9–in reply to inquiry. 4 p. Typed, with signature. Followed by a letter of Sept. 10 answering questions.
• ***Summary:*** Roland was one of the first people to introduce soyfoods to Italy. He was very interested in macrobiotics and was a close friend of Michio Kushi. "My interest in food was to heal people with food and I had a lot of success using a holistic approach to help people with major diseases. For all these cures I used a lot of miso, tempeh, and tofu. Good miso was available. However tempeh and tofu had to be locally produced. I cured people from 1980 until about 1985.

"As I am a businessman I was always business minded in order to produce, make a profit, and be able to realize my ideas–which always cost. I am educated in international law and advise corporations who want to expand abroad.

"Tempeh: There was only tempeh available for Paris, made by a lady there named Anita Dupuy, who delivered and sold it to Le Bol en Bois (a macrobiotic restaurant in Paris) and to some consulates and embassies (such as the Philippines). As I was busy elsewhere I sent Giovanna Mazzieri (of Milan, Italy) to Paris [for 1 week in Feb. 1983] to study the process. She was a very busy lady and a fan of macrobiotics after I healed her husband of a very difficult disease. She was very smart and she produced tempeh in

© Copyright Soyinfo Center 2013

Milan in about 1980 [actually mid-1983]. It was perfect and of very good quality. It was sold in a few health food stores. (Letter from Roland of Sept. 10 says Giovanna's tempeh was never sold commercially in stores; she produced tempeh only non-commercially from Feb. 1983 until today. Roland taught her to make tofu in June 1982; she started to make and sell it shortly thereafter).

"Actually it never took off commercially and eventually was used only for selected people, me and my patients. At that time I was very strict in eating macrobiotic. I was very sensitive to the quality of tempeh: I didn't like the acid taste. On the island of Bali I once ate some tempeh which was very acid. Therefore I used to deep freeze it in order to have it ready when we wanted tempeh with perfectly good taste. Today it is no longer produced, or only in small quantities, for the use of the family of Giovanna and some friends in Italy. As I am no longer living in Italy and I stopped curing people, unfortunately I don't use tempeh any more myself. I was interested to find out whether it worked in curing people. It did! However in order to make a profession and profit-making enterprise, I preferred to do other jobs.

"Tofu: Tofu was produced by myself. I am sure I was the only one who produced it on the basis of your teaching the first time in Italy in 1978. After seeing an ad in the *East West Journal,* I ordered your *Book of Tofu* by mail.

"Tofu already existed in Italy in Chinese restaurants in all the major cities. They called it Tau-Fu. After studying your book, I went to many kitchens in order to observe how it was produced, and with the cooks I ate the okara which was never offered to the clients of the restaurants but was seasoned very hot for themselves. The main restaurant I studied at was "La Muraglia," which means "The Wall" and which still exists.

"I then bought the Tofu Kit [made by Larry Needleman of The Learning Tree] which was advertised in the *East West Journal.* With this kit I started to make my first tofu. It was at once of very good quality.

"I started to make the equipment following the instructions in your book and twice a week produced 10 kg of tofu, which was used by my family, and sold in health food stores and later to my patients. I sold the tofu also in bakery shops where I offered the clients free samples to taste before they eventually bought it. I had a few sales. I produced the tofu in the kitchen of my apartment on Via Maffei in Milan. I got up very early and at 8 A.M. the kitchen was clean–you couldn't see anything left of the production. My wife [who was Vietnamese] didn't want to have a mess in the kitchen when she got up.

"Before I going to work as a consultant in the morning, I delivered the tofu to various shops. I didn't sell as a company because the quantity was too small to justify a commercial set-up yet. After about a year, when the whole business was working well, I transferred everything to a friend of mine who was looking for a job. He did it also in his apartment, but had problems with the neighbors who saw the kettles steaming on his balcony and they wondered what he did in his place. As nobody knew what tofu was, he said he was making some kind of cheese. The neighbors thought he might even have cows in his flat, and they managed to kick him out of his rented apartment after he had been making tofu there for about one year.

"When we heard that a company from Rimini [located 200 miles southeast of Milan and run by Gilberto Bianchini] had also started to produce tofu, we stopped production I didn't get the feedback in profit from this business; I preferred to use my time in other operations and buy the tofu made by Gilberto Bianchini at health food stores in Milan. I am sure I would have had success in Italy if I had continued. But I didn't have the support of my family, even though my wife was Vietnamese, and therefore I oriented myself to other activities. Someone who makes 10 kg of tofu in his kitchen before going to work must be a bit crazy–right?

"Nowadays in France I eat tofu about 2-3 times a week, as does my companion, Barbara, and our 4-year-old Carolina.

"Tofu-Kit: In about 1979 I produced about 100 tofu kits, which I sold for 30,000 lires to friends and other people who were interested in making their own tofu. As it was actually a copy of the American tofu-kit which I bought in the U.S., I wanted to see whether there was a real interest in this product before marketing it in Italy. Since it didn't sell very well, I didn't go ahead with it. Eventually I planned to buy the copyright from the tofu-kit people in the U.S. In 1979 I also published booklets in Italian and French titled "Tau-Fu Kit" and Tofu Kit" respectively. One was sold with each tofu kit; they were not sold separately.

"You have been for me a kind of guru, without knowing each other, because I have a lot of admiration for your approach. You are probably successful because you did only this: Writing about things related to soya." Address: 3, Boulevard d'Aguillon, 06600 Antibes, France. Phone: (33) 07-80-70.

10381. Bolduc, Bill. 1993. Current work with soymilk and organically-grown soybeans (Interview). *SoyaScan Notes.* Aug. 16. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Bill Shurtleff tells Bill Bolduc that he has heard that Bolduc's company is now making soymilk for Westbrae Natural Foods. Bolduc admits that this is correct. Shurtleff says that he cannot imagine how Bolduc is doing this, since a modern soymilk plant typically costs about $1.5 million. Bolduc answers that he purchased the soymilk plant owned by Grove Country Foods in an auction on 4 April 1993. This plant used the University of Illinois process for making soymilk.

Note: Grove Country Foods, USA, is located at 720 S. Main St., Columbus Grove, Ohio. Phone: 419-659-5636

© Copyright Soyinfo Center 2013

(office) or -2920 (plant). The two main people involved in the company were Dr. Carl Hastings and Prof. Alvin I. Nelson, both food scientists from the University of Illinois. The basic idea of the company was to commercialize new soy products and processes (such as soynuts, soy yogurt, soy ice cream, and soymilk) developed at the University of Illinois. By December 1988 they were in test production of several products but were in need of funds for commercial production and marketing. In early 1989 Grove Country Foods Canada Inc. (located in Ridgetown, Ontario, Canada) introduced Astronuts, a type of soynuts apparently made by some other company, but the company went bankrupt after 1-2 years.

Bill has modified the Illinois process for making soymilk extensively. For example, he removes the okara from the soymilk. Completing these modifications has taken several months, and his company is "now in a start-up mode making soymilk." Their refrigeration was under-sized so they lost several loads of product to spoilage. This week they are installing another compressor, etc. The system now works very well if they go slowly, but they need to be able to produce twice as much soymilk as they presently can before he will be satisfied. Now it takes several days to produce a tanker full of soymilk. Westbrae is being patient and supportive even though the process is "a bit bumpy."

Bill is only making Westbrae's regular soymilks–not their Malteds, which he thinks are still made by Hinoichi in Los Angeles. The only soymilk Bill makes is Westbrae's. He ships this soymilk in a tanker to a separate facility nearby in the Midwest that packages the soymilk in Tetra Brik Aseptic cartons for Westbrae. Westbrae now has their regular soymilk (the same product sold under the same brand) made by two companies (Pacific Foods of Oregon and Bill's Organic Processing Corp.) using two different processes. Bill started because Pacific ran out of capacity. Westbrae likes the flavor of Bill's soymilk as well as they like Pacific's–even though Pacific's technology is much more expensive than Bill's. Bill has dramatically altered the Illinois process but he has decided not to try to patent his altered process.

Within about 2 months Bill expects to have a new soymilk product on the market with another partner (similar to Westbrae, but whose name is confidential) in a new package [perhaps an extended shelf-life (ESL) gable top carton]. After that, Bill hopes to diversify his customer base and his product mix. To do that he hopes to start by making a fresh, UHT Processed, refrigerated soy-based frozen dessert mix (for soft-serve soy ice cream) packaged at another facility, located very nearby, in 2-gallon bags with a 60-day shelf life.

Bill sees the future of soymilk packaging as being in the relatively new extended shelf life gable top carton that is sold refrigerated. This package, which is made by Tetra Pak and Evergreen, is significantly less expensive than the traditional Tetra Brik carton. It is now becoming quite popular in the Midwest and the East Coast because of its lower cost. It can cut at least $1.00 off the wholesale price of a case (12 quarts) of soymilk, which leads to even bigger savings at the retail level. And the product has a shelf life of 60-90 days refrigerated. Co-packers nearby own the new gable-top packaging equipment. Most of America's major soymilk companies are looking carefully at this package, it requires a whole new distribution system–refrigerated trucks. Bill knows that there will be a soymilk product on the market in the extended shelf life gable top package by this fall. Bill will make it for another company. The rest is confidential. He just ran the first test batch last Thursday, and now he is doing shelf-life tests. His smaller company has several advantages over the bigger soymilk companies; his company is very lean and can move very quickly. He is not controlled by any multinational corporations.

Bill has a separate company named Organic Marketing that exports organically grown soybeans to Europe; he started Organic Marketing in about 1989 and it was the precursor to Organic Processing. Bill was acting as marketing coordinator for the Ohio Ecological Food and Farm Association (the organic growers of Ohio). First he sold a lot of organically grown soybeans to Dan Burke of Pacific Soybean & Grain, then he started exporting. He met Jerry Fowler, a British-born man who has a company named Manna International in Ontario, Canada. Bill likes very much to do business with Jerry because he has a very good overview of the market, is cooperative with the growers, and pays good money to the growers for organic soybeans. Bill exports his organic soybeans via Montreal to England, where they are used by the Haldane Foods Group (which is owned by ADM).

Update: Talk with Ron Roller, CEO of American Soy Products (ASP). 1993. Sept. 4. Bill Bolduc is making plain soymilk and shipping it up to Grand Rapids, Michigan, for formulation and Tetra Brik packaging for Westbrae. ASP negotiated with Westbrae for a long time, but Westbrae finally went with Pacific Foods and Bolduc; there were many reasons for this but they are mostly political. Address: President, Organic Processing Corp., 305 N. Walnut St., Yellow Springs, Ohio 45387. Phone: 800-647-2326 OF.

10382. Stuber, Lorenz; Stuber, Ellen Figueroa de. 1993. Re: Work with soya, Soyane, and Comida Para Todos in Guatemala. Letter to William Shurtleff at Soyfoods Center, Aug. 20. 3 p. Handwritten. [Eng]

• ***Summary:*** "We would like to thank you for all of the information and inspiration that we got from your book *The Book of Tofu.* We are vegetarians and for years we have been making and eating tofu.

"In 1985 we started a little project to help the poor people in Guatemala. We had a little vegetarian restaurant in Panajachel and we distributed the daily leftovers to people that need food. At the same time we started a little project of

© Copyright Soyinfo Center 2013

food distribution at the garbage dump in Guatemala City. We helped to fund our project by selling Guatemalan hand crafts in Switzerland. There we met some people who were interest in our work and with their financial help we were able to expand our project (Comida Para Todos–Food for Mankind).

"We presently go 4 times each week to the garbage dump and to Peronia (a slum outside Guatemala City). Each day we take a hot meal made with rice, vegetables, beans, and tortillas (containing some okara) plus a fruit drink to about 150 children and poor people.

"This year we started a program in 2 little schools in the countryside, where we take whole wheat bread (containing some okara), marmalade, and fruit-flavored soya drink (soya milk) daily to 150 children. We distribute the food at our own cost. We have a little piece of land 30 km from the city where we built a big kitchen for this project and also for our own income. We would like to sell soy products on a large scale at inexpensive prices which could help relieve the malnutrition of so many Guatemalan people.

"We have done some tests in making soya milk (natural, fruit flavored, and chocolate), which we store in plastic bottles and refrigerate. But it usually spoils within 3-4 days, and sometimes even gels and spoils the day after it was made. "We got a cheap vacuum packaging machine for packing natural tofu, fried tofu, and soyaburgers, and now we have started experiments to see how long these products will stay fresh under refrigeration." They order a copy of *Tofu & Soymilk Production* and ask for advice in solving their problems.

A color photo shows a little Guatemalan boy pouring soymilk from a large teapot into two 1-liter plastic bottles held by little girls. Other kids are standing around drinking soymilk out of cups.

Follow-up response to questions from William Shurtleff of Soyfoods Center. 1993. Oct. 9. Since 1985 they have known about the soy dairy (which Plenty Canada had helped to establish) in San Bartolo, Solola, Guatemala. In July 1985 they started buying tofu and soy ice cream from San Bartolo for their vegetarian restaurant in Panajachel. They fried the tofu and sold it at the restaurant. In July 1989 they started to make tofu, soymilk, tortillas with okara, whole wheat bread with okara, and soyaburgers. In January 1993 they established Soyane and started to sell the first four of these foods, which they make at Nueva Goverdhana, km. 34 Carretera hacia Antigua, Santa Lucia Milpas Altas, Guatemala. Phone: 030-7179 / 030-7181. They are still working on developing labels; a sample of a generic label (which can be used on any of their soyfood products) is enclosed. As of October 1993 they sell the following amounts of each soyfood product: Tofu 42 kg/week (sold mostly to Korean people), soymilk 350 liters/week (distributed to 150 school children), tortillas with okara 15 kg/week (distributed to the people at the dump), and whole wheat bread with okara (110 kg of which is distributed to school children). Address: Soyane, Comida Para Todos, Apdo. Post. 2812, Guatemala City, Guatemala. Phone: 030-7179 or 030-7181.

10383. Demos, Steve. 1993. White Wave's early ownership structures, sources of capital, and employees (Interview). *SoyaScan Notes.* Aug. 31. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Note: In the following, Steve seems to have forgotten that White Wave was a partnership for about a year before it became a corporation. It became a partnership about 3 to 12 months after it was founded in Sept. 1977.

Steve had run White Wave for about a year and was looking for capital. He was in his very altruistic frame of mind so he took an equal position with the other people who bought stock [actually partnerships] for about $2,000 each. This early shareholder agreement required each investor to stay with the company for a particular period of time (about 2 years) before their stock was vested and became theirs to do with what they wished. It was clearly stated in the articles of incorporation that the stock would be purchased back by White Wave at either the original value ($2,000) or fair market value, whichever was greater, if that vesting time period was not fulfilled. In the case of three shareholders, the vesting period was not completed: Laurie Singleton, Trudy Burnham (a woman who had a child; she is now an astrologer in New Zealand), and George "Buddy" Hamel. (Note: Hamel believes he completed the 2 year vesting period; see Dec. 1993 interview with him.) Each of these people invested $2,000 in White Wave stock. Laurie and Trudy left at about the same time, within several months of joining, after White Wave had been losing money. Each got back his or her $2,000. In fact, White Wave either lost money or just broke even during its first 5-7 years in business.

George Hamel stayed longer but he didn't stay the vested period. He left the company then came back in about 1980; White Wave asked to purchase the stock back. He didn't want to sell it. White Wave offered to buy back the stock for about $10,000 (which was more than it was worth) and Hamel agreed. Several days after the deal was struck, Hamel returned to Demos and said, "That's not enough money." Demos said: "We feel the offer was agreed upon and that it is fair and equitable. We're holding to the figure. But if you challenge this in court and White Wave prevails, I will pay you the absolute minimum value your stock is worth because you are changing the deal and we will have to pay legal fees to defend our position." Hamel got a lawyer and took the matter to court. The case eventually went to the Supreme Court of Colorado, which ruled in White Wave's favor. Hamel had to pay attorney's fees all the way, and he got $2,000 for his stock in the end. White Wave had to pay about $10,000 worth of stock in the company for its attorney's fees. That attorney is now a member of White Wave's board of directors, and he is a very old and close

© Copyright Soyinfo Center 2013

friend, plus a very influential and powerful person in the company.

Two other early shareholders were Charles "Chip" McIntosh and Pat Calhoun. Charles bought a house with the money from his stock (that he sold to Steve's brother). He sold his stock last year at a price below what Steve thought it was worth and still received more than $100,000. Pat invested $2,000 and she is now the second largest stockholder in the company (she owns about 20% of White Wave's stock) and the chief financial officer. One other person name Fred Claire was a preferred investor. He bought $3,000 worth of stock then after several years he offered to sell his stock back to the company at its original value. Demos agreed–no bad feelings on either side.

Steve's father is an entrepreneur with several hundred employees, and Steve's brother is a surgeon. They have been the largest investors as White Wave has sold stock twice. Both invested because they felt they could make money on the investment. Today 90% of White Wave's stock is owned by Steve Demos, Pat Calhoun, and their immediate relatives.

Steve has 2 acres of land in Boulder, but the city is making it hard for him to expand operations on that land since they want very strict environmental regulations. Address: President, White Wave Inc., 1990 North 57th Court, Boulder, Colorado 80301. Phone: 303-443-3470.

10384. Grossman, Elaine T. 1993. Tofu and you: A personalized weight loss program and healthy eating plan. Torrance, California: Morinaga Nutritional Foods, Inc. 143 p. No index. 22 cm. Wire loop spine. [13 ref]
• ***Summary:*** This handy book is presented with printed tabs that will enable you to turn instantly to the information on tofu you need. It contains 112 nutritious menus, 102 recipes, and 28 recipes featuring Mori-Nu Tofu. Contents: Why me? What is healthy eating? Why tofu? Will you change? How much should I weigh? Selections made simple. Recipes and meal plans. It's a special occasion! Staying slim and healthy. Research citations. Address: MS, RD, Nutrition Network, Beverly Hills, California.

10385. **Product Name:** Soyboy Tofu Lin (Marinated and Baked Firm Organic Tofu).
Manufacturer's Name: Northern Soy, Inc.
Manufacturer's Address: 545 West Ave., Rochester, NY 14611. Phone: 716-235-8970.
Date of Introduction: 1993. August.
Ingredients: Incl. tofu.
New Product–Documentation: Spot in New Product News. 1993. Oct. 12. Organic tofu is pressed until firm, soaked in a marinade, then baked. It is ready to eat, or can be cut into small cubes or sliced like cheese.

10386. Obis, Mariclaire Barrett. 1993. Take another look at soyfoods. *Vegetarian Times.* Aug. p. 54-56, 58, 60, 62, 64, 66. [8 ref]
• ***Summary:*** A good introduction to soyfoods including whole dry soybeans, fresh green soybeans, soy flour and grits, soy sauce, soy oil, textured vegetable protein, soymilk, okara, soy yogurt and cheese, tofu, tempeh, and miso. Address: Contributing editor, Vegetarian Times.

10387. Soyfoods Association of America. 1993. Tofu facts (Leaflet). Libertytown, Maryland. 2 p. 28 cm.
• ***Summary:*** The funding for this simple sheet (black ink on white paper) was provided by the United Soybean Board. Contents: Tofu (what it is). Types of tofu. Tofu nutrition facts. Tofu recipes (3). Buying and storing tofu. Tips for using tofu. Address: P.O. Box 65, Libertytown, Maryland 21762.

10388. Sterling, Marilyn. 1993. Totally tofu. *Co-op Newsletter* (*Arcata, California*). Aug. p. 6-7.
• ***Summary:*** Describes how tofu is made at The Tofu Shop. Includes tofu recipes and the process for pressing tofu at home. On pages 6 and 7 are ads from The Tofu Shop. Photos show: (1) Tofu Shop owner, Matthew Schmit, with a pallet of organic soybeans in the FoodWorks warehouse. (2) Shane Keller at the soy milk press, which separates the milk from the pulp (okara). (3) Cleaning the kettle above the press after the curds are pressed. (4) Steve Ulrich adding nigari to the soymilk to curdle it. The curds are then pressed into tofu, (5) Steve slices the fresh, firm tofu before packaging.

10389. Sakaguchi, Noboru. 1993. Re: Early history of tempeh in France. Making good nigari tofu in France. Letter to William Shurtleff at Soyfoods Center, Sept. 3–in reply to inquiry. 1 p. Handwritten. [Jap; eng+]
• ***Summary:*** "In 1981 Anita [Dupuy] started making tempeh with a man named Jean-Luc Alonso. Anita was in charge of the commercial aspects of the business and Jean-Luc did the production. The company is no longer in business. I recently talked with Jean-Luc and I think he will be sending you more details. His address is presently "Gaia," 11 rue François Chancel, 31190 Auterive, France. Anita is now in the Netherlands.

Concerning our tofu production, in August 1985 we moved to a suburb of Paris named Champigny and changed the name of our company to Daizou. We have been producing tofu ever since. I am beginning to understand that making good tofu using natural nigari is based on getting good soybeans, so I have become very interested in agricultural issues and have begun to study agriculture. The key question is whether we can grow good soybeans in Europe.

Note: The letterhead and envelope read: Tama–Distribution de Produits Naturels. Address: Tama, 883 rue de Bernaü, Z.I. du Plateau, 94500 Champigny-Sur-Marne, France. Phone: 49 83 79 94.

10390. Golbitz, Peter. 1993. Re: Trip to Europe, and changes at Nasoya. Letter (fax) to William Shurtleff at Soyfoods Center, Sept. 13. 1 p.
• ***Summary:*** In September 1992 he and Anders Lindner both spoke at an American Oil Chemists' Society (AOCS) conference in Budapest, Hungary, then traveled through Switzerland together, sampling soyfoods. They ended up with a visit to the Sojinal/Biosoja soymilk and tofu plant in Issenheim, France. Peter then went to Paris for a week where he met with Pierre Maitre from Sojaxa, the French soyfoods association.

John Paino has resigned from Nasoya. Jerry Maynard from Vitasoy is the new president. Address: Soyatech, P.O. Box 84, Bar Harbor, Maine 04609. Phone: 207-288-4969.

10391. Gemperlein, Joyce. 1993. Tofu–No bones about it: Health and environmental benefits make that bland soybean product a big seller. *Mercury News* (*San Jose, California*). Sept. 15. [2 ref]
• ***Summary:*** Ken Nozaki's San Jose Tofu Co. produces more than 500 blocks of fresh tofu a day–That's protein that hasn't been killed, plucked, scaled, boned, skinned, or tenderized. Five photos show how the tofu is made. This shop has been in operation since 1947. Nozaki, age 66, took over the shop from his uncle in 1951–at a time when the merits of tofu were generally only known to people of Asian descent. "But that has changed. By virtue of the hippie culture of the 1960s, the influx of immigrants in the last decades, and now the health and environmental movements, tofu is edging into mainstream cooking in the United States. Nonsense, you say. It is bland, yucky. It will never come close to replacing America's protein darling, beef. Probably not, but the increasing emphasis on cross-cultural cooking and on lowering cholesterol and fat in our diets has food processors introducing tofu hot dogs, tofu burgers, tofu cheese and even tofu ice cream into supermarkets that cater to the general public."

William Shurtleff discusses tofu's growth of popularity in America.

Source: Knight-Ridder/Tribune News Service, 20 Sept. 1993. Title: America's love affair with tofu getting stronger all the time. Address: Staff writer, California.

10392. Mazzieri, Giovanna Fosso. 1993. Work with soyfoods in Italy (Interview). *SoyaScan Notes.* Sept. 17. Conducted by William Shurtleff of Soyfoods Center. Followed by a 4-page typed letter of 6 Oct. 1993.
• ***Summary:*** Giovanna was in touch with Soyfoods Center in 1985 when she was interested in having *The Book of Tofu* translated into Italian. That project was not successful because she was unable to find a publisher.

Giovanna thinks she was the first person in Italy to ever make tempeh. Roland di Centa asked her to go to Paris; she went there for one week in February 1983 and Anita Dupuy taught her how to make and cook with tempeh. At the time, Anita was definitely selling her tempeh to many shops in Paris, including Le Bol en Bois, other natural food or macrobiotic shops, and also to the Indonesian Embassy in Paris. She was also making and selling tempeh sandwiches. Anita told Giovanna that she had been in Indonesia for a long time, and that she had learned how to make tempeh there. Giovanna still has Anita's business card. It shows that Traditions du Grain was located at 16, Avenue Jean-Jaures, 94200 Ivry. Phone: 671.89.88. Anita's personal residence was 25 rue du 18 Juin 1940, 94400 Vitry. Phone: 681.85.41.

Giovanna returned to her home in Milan, and in May/June 1983 she started making tempeh non-commercially for Roland and six other people. She gave away most of her tempeh free of charge; just a few people paid for it. She never sold tempeh commercially because it takes official authorization and lots of money to open a shop. She could not afford to do it legally and she did not want to take the risk of doing it illegally just to earn a little money. But she is still making tempeh at her home for her friends and herself. She orders her tempeh starter from GEM Cultures in the USA. In June 1983 she also wrote and published a 7-page booklet in Italian, titled "Tempeh," to teach people how to cook with tempeh. It contained nutritional information plus 14 recipes. She also gave tempeh classes at which she distributed this booklet. To date, no books on tempeh have been published in Italian. As far as she knows, the first and only company that has ever sold tempeh commercially in Italy is La Finestra Sul Cielo S.r.l., an important macrobiotic center, located at Via Brandizzo 149, 10088 Volpiano (Torino). Phone: 011/9951818. She thinks they started to sell tempeh in 1992/1993.

Concerning tofu: She learned how to make tofu from Roland di Centa, who was her master, in June 1982. She also never sold tofu commercially for the same reasons she did not sell tempeh. She helped to popularize tofu in Italy through classes and the distribution of tofu recipes. She knows of four books about tofu in Italian that are now in print: *Il Libro della Soia* (1989, published by Mediterranee), *La Soia in Cucina* by W. Pedrotti (1990, published by Casa Verde), *Il Tofu* by Martha Fischer (1992, published by Mistral Demetra), *La Soia* by W. Pedrotti (1993, published by Mistral Demetra).

Giovanna knows Gilberto Bianchini (pronounced bee-an-KEE-nee) very well. He was a very early tofu producer in Italy, starting in Milan in about 1982 or 1983 (she thinks) at about the same time as Giovanna. In Milan at that time there was only one vegetarian food retail shop and they did not like to sell tofu; they encouraged people to eat cheese instead. So Gilberto had a very hard time. Giovanna is sure that Gilberto started making tofu in Milano and then he moved to Rimini. Gilberto did very active and good work with tofu in Italy and he made a product of fine quality,

© Copyright Soyinfo Center 2013

but she thinks he is not producing it any more. Gilberto is now living at Via Cuoco 7, 47037, Rimini, Italy. Phone: 0541/373670.

Other people who pioneered in introducing soyfoods to Italy were Ferro Ledvinka in Florence. He worked for Mitoku in Japan, and is now a macrobiotic consultant in Florence. Phone: 055/217204. Also Carlo Guglielmo and Elena Roggero, macrobiotic consultants in Turin at the same address as La Finestra Sul Cielo.

She is aware of the following companies producing and selling tofu commercially: (1) Fonte Della Vita, Via Monviso 18, Cuneo, Italy. Phone: 0172/66397. (2) Soyalab, Via B. Cellini 48N, 50020 Sambuca Val di Pesa (Firenze). Phone: 055/8071268.

Giovanna is still active promoting and teaching about soyfoods in Italy. There is a growing interested in soyfoods compared to 10 years ago. Now consumers ask for them. Address: Via Santa Tecla 3, 20122 Milan, Italy. Phone: 02 8646 1747.

10393. Bjornson, Sheri. 1993. Tempting tofu and tempeh: Health benefits, versatility help popularize soyfoods. *Daily Ledger–Post Dispatch* (*Antioch, California*). Sept. 21. p. 21-22.
• ***Summary:*** Ron and Nancy Hoskins of Oakley, California, are vegetarians and they teach vegetarian cooking classes. One is titled "Introduction to tofu and tempeh," and another is "Introduction to TVP and gluten." Ron learned about soyfoods when he lived at The Farm in Summertown, Tennessee. Contains recipes for: Greek salad with tofu. Tofu-dill dip. Hawaiian tempeh kabobs with pineapple and peppers. A color photo shows Ran and Nancy at a table with tofu and some books from The Farm's Book Publishing Co.

• ***Summary:*** The Sixth Annual World Vegetarian Day Celebration is coming to downtown San Jose on Sunday. Many large companies are now introducing vegetarian products including Stouffer's Vegetable Lasagna, Pillsbury's Green Giant Harvest Burger. A vegetarian is one who doesn't eat meat, fish, or poultry.

10396. **Product Name:** Cedarlane Organic Fettucini Alfredo.
Manufacturer's Name: Cedarlane Foods.
Manufacturer's Address: 1864 E. 22nd Street, Los Angeles, CA 90058. Phone: 213-745-4255.
Date of Introduction: 1993. September.
Ingredients: Incl. Soy Parmesan, soy Romano, and soy cream cheese over organic fettucini noodles.
Wt/Vol., Packaging, Price: 9 oz package.
New Product–Documentation: Ad in Natural Foods Merchandiser. 1993. Sept. p. 78. "Hold the cheese please! Lactose free." "What is Fettucini Alfredo without the richness of cream, butter, and cheese? And lots of cholesterol and butterfat? Well, now you can hold your cheese and eat it too! Our Fettucini Alfredo is made with soy Parmesan, soy romano and soy cream cheese (all made from organic tofu) blended into a rich sauce and poured over our delicious Fettucini noodles. Great taste, lactose free and no cholesterol."

10400. Nightly news [Anchorman Tom Brokaw with first lady Hillary Clinton on tofu]. 1993. Television broadcast. Sept. 21.
• ***Summary:*** Brokaw notes that one of Ms. Clinton's goals is to get American to take greater responsibility for their own health. Asked if the president will be able to give up French fries, Ms. Clinton replies: "We're making lots of changes in our diet because one of the things we've learned as a result of this work–something I hadn't known before I got into it–is what a good role nutrition can play in making you healthier."

The first family is actually using low-fat recipes. "And we have actually changed the way we eat and we are trying to convince ourselves it tastes as good as a cheeseburger and fries..."

© Copyright Soyinfo Center 2013

"Brokaw: Does the President occasionally look down at his plate and say, come on, Hillary, I've had a hard day."

"Clinton: We've made a lot of progress on, you know, pasta and things like that, but tofu has been hard for us."

"Brokaw: Not a lot of tofu fields in Arkansas, after all."

"Clinton: But I mean, it's a good product. We're keeping at it until we find something we like in it."

"Brokaw: We'll await the first state dinner featuring tofu."

10401. **Product Name:** Tofu Dessert [Strawberry, or Apricot].
Manufacturer's Name: Nutrisoy Pty. Ltd.
Manufacturer's Address: 255 Forest Road, Arncliffe 2205, NSW, Australia.
Date of Introduction: 1993. September.
Ingredients: Strawberry: Filtered water, organic soybean, strawberry, honey, apple juice, pectin (extract of citrus peel), natural nigari (magnesium chloride).
Wt/Vol., Packaging, Price: 200 gm cup.
How Stored: Refrigerated.
New Product–Documentation: Labels with dates sent by Tony Wondal of Nutrisoy. 2005. April 26. He started making and selling these products in Sept. 1993. Strawberry: Green, yellow, red and blue on pink.

10402. *Nutrition Action Healthletter.* 1993. Tofu to you. 20(7):14. Sept.
• ***Summary:*** "Q: Is tofu healthy or hype? Dr. Tastebud: It's both. While its a nice way to get some protein and calcium without a shot of saturated fat and cholesterol, its only healthy if you buy the right kind (low-fat) and substitute it for the right thing (red meat or high-fat dairy).

An interesting table shows the number of grams of fat and the percentage of the USRDA for calcium in 10 major brands of tofu, non-fat ricotta cheese, chicken breast (skinless, cooked), top round steak (trimmed and cooked), and ricotta cheese (part skim). The two tofu brands with the least fat are Mori-Nu silken extra firm and Azumaya soft (each 2 gm, and each with only 3-4% of the USRDA for calcium). Four brands contain 15% of the USRDA for calcium: Azumaya regular (3 gm fat), Nasoya soft (4 gm fat), Azumaya firm (5 gm fat), and White Wave hard or soft (7 gm fat).

10403. **Product Name:** Today's Tamales [Spicy Tofu].
Manufacturer's Name: Today's Tamales.
Manufacturer's Address: 2560 #1 Dominic Dr., Chico, CA 95928. Phone: (916) 893-2646.
Date of Introduction: 1993. September.
Wt/Vol., Packaging, Price: 7 oz.
New Product–Documentation: Spot in Natural Foods Merchandiser. 1993. Sept. p. 84.

Leaflet distributed at Natural Products Expo East in Baltimore, Maryland. 1993. Oct. "A new twist on a Mexican classic. Today's Tamales–Vegetarian. An ancient food for modern times." "In 1982 vegetarian Karen Goodwin of Chico, California, set out to make a new kind of tamale." Free of lard.

10404. **Product Name:** [Tofu Spring Rolls].
Foreign Name: Nems au Tofou.
Manufacturer's Name: Tofoulie.
Manufacturer's Address: St. Pierre, 26560 Séderon, France. Phone: 75-28-55-05.
Date of Introduction: 1993. September.
Ingredients: Tofu* 21%, rice cakes (*galettes de riz*), carrots*, green vegetables*, onions*, water, millet*, sunflower oil, shoyu*, sea vegetables, unrefined sea salt, spices*. * = Organically grown: 75% of total.
Wt/Vol., Packaging, Price: 170 gm. plastic bag.
How Stored: Refrigerated.
Nutrition: Per 100 gm.: Fats (lipids) 3.1 gm, protein 5.3 gm, carbohydrates (glucides) 28.3 gm, calories (Kcal) 162 (686 kJoules).
New Product–Documentation: Form filled out and Label sent by Joel Pichon. 1996. June 14. *Nem* is the Vietnamese word for "spring rolls." His company started making Tofu Spring Rolls (*Nem au Tofou*) in Sept. 1993; they now make up to 1,000 kg/month. They plan to introduce a second flavor *Nem Potinoa au Tofou* in the autumn of 1996. The Label is a heavy plastic bag 4.75 by 9.75 inches. Red and black on white. Illustrations of two red dragons with fiery breaths descending on a rural village.

10405. White Wave, Inc. 1993. White Wave soyfoods food service product list (Leaflet). Boulder, Colorado. 1 p. Single sided. 28 cm.
• ***Summary:*** Lists six categories of products: (1) Tofu: Vacuum pack organic hard style tofu (2/5# pouches). Meatless tofu steaks (2/4# pouches).

(2) Dairyless Soy Yogurt: Lemon kiwi (6/2# tubs). Organic plain quarts (6/2# tubs).

(3) Soy A Melt Soy Cheese: Cheddar style (4/7.25# loaves). Mozzarella style (4/7.25# loaves). Monterey jack style (4/7.25# loaves). Garlic herb style (4/7.25# loaves).

(4) Meat Substitutes: Meatless healthy franks (10# cases). Meatless healthy bologna (10# cases). Vegetarian sloppy joe (19# buckets). Traditionally seasoned seitan (2/6# pouches). Diced traditionally seasoned seitan (2/6# pouches).

(5) Veggie burgers: Tempeh burger (60/3 oz. cases). Teriyaki tempeh burger (60/3 oz. cases). Veggie life burger (48/3.5 oz. cases). Lemon broil tempeh (90/2 oz. cases). Tempeh cutlet (60/3 oz. cases).

(6) Tempeh: Original soy tempeh (20/8 oz. packs). Address: 1990 North 57th Court, Boulder, Colorado 80301. Phone: 303-443-3470.

10406. White Wave, Inc. 1993. White Wave soyfoods retail product list (Leaflet). Boulder, Colorado. 1 p. Single sided. 28 cm.
• ***Summary:*** Lists six categories of products. * = Also available in food service pack: (1) Tofu: Reduced fat organic tofu. Organic tofu*. Snack'n savory tofu. Meatless tofu steaks*. Spicy szechuan stir fry. Tofu in garlic sauce stir fry.

(2) Dairyless Soy Yogurt: Raspberry. Strawberry. Blueberry. Peach. Apricot mango. Lemon kiwi*. Vanilla. Organic plain quarts*.

(3) Soy A Melt Soy Cheese: Cheddar style*. Mozzarella style*. Monterey jack style*. Garlic herb style*. Mixed variety case. Fat free cheddar style. Fat free Mozzarella style. American soy singles. Mozzarella soy singles. (4) Meat Substitutes: Meatless healthy franks*. Jumbo meatless healthy franks*. Meatless healthy links. Meatless healthy bologna*. Meatless healthy bacon. Vegetarian sloppy joe*. Vegetarian chili. Tempeh barbecue. Traditionally seasoned seitan*.

(5) Veggie burgers: Tempeh burger*. Teriyaki tempeh burger.* Veggie life burger*. Lemon broil tempeh*. Tempeh cutlet*.

(6) Tempeh: Original soy tempeh*. Soy rice tempeh. 5-grain tempeh. Wild rice tempeh. Address: 1990 North 57th Court, Boulder, Colorado 80301. Phone: 303-443-3470.

10407. Clinton, Hillary Rodham. 1993. Speaking of health-care reform. *Time.* Oct. 4. p. 18.
• ***Summary:*** "We've made a lot of progress on, you know, pasta and things like that–but tofu has been hard for us."

Note: This is excerpted, in large bold letters, from an interview with Tom Brokaw, on the effort to improve President Bill Clinton's eating habits.

10408. Kubová, Anna; Vavrac, Ján. 1993. Re: Soybeans and soyfoods in Slovakia. Letter to William Shurtleff at Soyfoods Center, Oct. 5. 3 p. Typed, with signature. [1 ref]
• ***Summary:*** Before Czechoslovakia was founded in 1918, Slovakia had been geo-politically a part of the Austro-Hungarian Monarchy, and in some sources you can recognize Slovakia as so-called "Upper-Hungary" as well. Besides, many former (mostly Hungarian or German) names of Slovak towns have been changed over the years.

The earliest references seen to soybeans within the boundaries of present-day Slovakia are found in Prof. Haberlandt's 1878 monograph titled *Die Sojabohne* (The Soybean). This book describes the first field trials with soybeans in 144 localities throughout western and central Europe. The information on the soybean trials in today's Slovakia appears in Part 3, titled "Culture trials in the year 1877," in the section on "Culture trials in Hungary and Croatia." Pages 68-71 list the results of 8 field trials made in the region that became Slovakia or the Slovak Republic after 1 Jan. 1993. Note that the names of some villages have been changed, as follows: #93 Pápa. #94 Kövesd or Kövesdö is a small village presently named Kamenicná (near Komárna). #99 Császtkócz is now Cásta (near Bratislava). #100 and #101 Szucsany is now Sucany (in Slovak transcription). #102 Poltár is near Lucenec. #104. Bálványos is now Balvany (near Levice). And #105 Kápolnás-Nyék is now Kaplná (near Bratislava).

"After the first unsuccessful attempts to introduce the soybean to our country, the crop somehow became forgotten, or was grown only in botanical gardens as a decorative plant. But some area of soybeans was being constantly maintained to a certain extent in southern Slovakia. The data show that in 1934 the area cropped with soybeans exceeded 1,000 hectares, which was quite a large area considering that we currently grow here approximately 3,000 hectares of soybeans.

"Promotion of soybean cultivation and support for its utilization have always been given little attention. The soybean market was already established in 1915. Except for this, soybean became interesting as an oil-seed crop as well as a source of high-quality protein apparently consumed by vegetarians.

"As far as we know, no history of soybean cultivation in Slovakia has ever been published. We were provided with a bibliography on soybeans by the Regional Agricultural Library located at the Agricultural Museum in Nitra.

"We are enclosing the names of two companies that make soyfoods in Slovakia and the Czech Republic. The first one makes tofu." (1) Alfa Bio s.r.o., Horná 37, Banská Bystrica, Slovakia. Phone: 088/242 35. Fax: 088/539 38. (2) Pragosoja spol. s.r.o., Vestinska 36, 153 00 Praha (Prague) 5, Czech Republic. Phone and fax: 59 43 16. Address: 1. Dep. of Plant Physiology; 2. Dep. of Plant Protection. Both: Univ. of Agriculture KFR, Tr. A. Hlinku C.2, SK-949 76 Nitra, Slovakia. Phone: +42-87-411 560.

10409. Poninski, Piotr. 1993. Re: Tofu in Poland. Letter to William Shurtleff at Soyfoods Center, Oct. 10. 2 p. Typed, with signature on letterhead.
• ***Summary:*** After giving details about the tofu made by his company, Piotr notes: "We think that second generation products are absolutely the best way to popularize this kind of new food. We will soon be working on tofu with various spices and other additions such as vegetables, grains, nuts etc. as well as on dressings and spreads.

"As far as other soyfoods are concerned, both soymilk and TVP are available on the Polish market but in a rather modest way. If you want to find them you can, but since they are all imported from Western Europe, or from Hungary (TVP) and not generally known, they are not widely available. Our plan is to import and popularize TVP. You can also get some retail packaged soybeans and soy meal.

"I think we are the first company to make and sell tofu in the Warsaw area, but I know a little about other

© Copyright Soyinfo Center 2013

companies which make or are planning to make tofu in Poland: (1) Vietnamese immigrants make firm tofu (*Dau Phu*), probably coagulated with vinegar, and sell it only to other Vietnamese people. Their general opinion is that Poles will not eat it and it is not worthwhile to try to popularize it; (2) A 'district dairy cooperative' in Szczytno (Northeastern Poland) makes tofu and tries to sell it somewhere in Warsaw. A professor from the department of food technology at the Main School of Agriculture in Warsaw is involved in this project and probably has set up the whole technical process. We contacted with him but he refused to cooperate with us. I have not had a chance to eat their tofu but one of our customers who tried it says it has a taste inferior to ours; (3) A Polish-Chinese enterprise which presently sells soybean sprouts is planning to manufacture and sell tofu in the Warsaw area." Address: Founder and owner, Polsoja, ul. Hetmanska 61, 05-120 Legionowo (near Warsaw), Poland. Phone: (48 22) 18 21 11.

10410. Richardson, Al. 1993. Companies using Nichii Soy Flakes, and new developments (Interview). *SoyaScan Notes.* Oct. 14. Conducted by William Shurtleff of Soyfoods Center. • ***Summary:*** The main American user of Nichii's soy flakes is White Wave of Boulder, Colorado, which uses the flakes in only one product–its reduced fat tofu. White Wave also makes a private label reduced fat tofu for Tree of Life in Florida. Other users are: Ashland Soy Works (Ashland, Oregon), which will be introducing a reduced fat tofu, made from 100% soy flakes, this month; Sacramento Tofu uses soy flakes only in their firm-style tofu; Calco of Dallas, Texas, uses flakes in their firm-style tofu. They buy a truckload about every 5 months. They also use whole soybeans; Dorothy Hwang, a PhD chemist, of Michigan Soy Products Co., Inc. (in Royal Oak, Michigan) uses both soy flakes and soybeans. Dr. Les Wilson made the very valuable discovery that soy flakes can be used to make reduced fat tofu.

Quong Hop recently put a sticker on their Nigari Firm Tofu that says "The original reduced fat tofu," which is in violation of FDA regulations. At the new Whole Foods store in Palo Alto, Al recently saw Wildwood's firm tofu with a little sticker on the front that said "Low fat," also a violation. The real problem is that Wildwood's tofu retails for $0.99, Quong Hop's is $1.29, and White Wave's tofu, the only real reduced fat tofu is $1.49.

Nichii has just landed a big agreement with Korea and is now shipping them about 60 tons/month of soy flakes from the plant in Iowa. They are expected to be buying 100 tons/month at the end of this year. Those flakes are being used entirely to make tofu and soymilk. They are buying it for the convenience in dealing with rush orders, and the water and space savings–not for the reduced fat properties.

Nichii's plant in Iowa is now producing a little less than 1,000 tons/month. 95% of this is non-organic soybeans and 5% is organic. There is an increase in demand from Japan for organic flakes. The plant runs a little less than 4 days a week, 10 hours a day.

95% of all soy flakes make in this plant are sold outside America, mainly to Japan and Korea. Al visited Japan earlier this year. All of the flakes in Japan are used for making tofu; none is used in meat products. Nichii/Mycal has about 250 retail stores but just a few of them make fresh tofu in the store using Mr. Chikaarashi's tofu-making machine; yet that number is increasing. 90% of the tofu sold is purchased from outside tofu manufacturers, many of them very large. Nichii sells three types of tofu, each clearly labeled: That made soybeans, that made from a mixture of soybeans and Nichii soy flakes, and that made entirely from Nichii soy flakes. Nichii says "We'll buy your tofu if you use our flakes." None of tofu sold in Japan and made from flakes is promoted for its low fat content. Address: Nichii Company of America, Inc., 23440 Hawthorne Blvd., Skypark 2, Suite 140, Torrance, California 90505. Phone: 310-791-0010.

10411. Lukoskie, Luke. 1993. Some history of and update on activities at Island Spring (Interview). *SoyaScan Notes.* Oct. 16. Conducted by William Shurtleff of Soyfoods Center. • ***Summary:*** David Sucher was one of the original investors in Island Spring. He has been a close friend of Luke's for 20 years, and it was his investment that got the company going at its original location.

Luke now works half time with Island Spring; he and his wife, Suni, literally make tofu. Suni manages the people and products. Yvonne Kuperberg is still there. He lets other people run the business side of things. The company has a solid base of consumers in the northwest who support its products. Though sales are still strong, Island Spring is not yet out of the hole on the debts it incurred when the principals at Pacific Soy said "either give us complete control of the company or we're going to leave." At that time, Luke had accounts payable of $485,000, and he lost $300,000 in extracting the company from the position it had been in. He had raised $110,000 before the fire with the help of Harold Hopkins, who knows a lot about capital in the Pacific Northwest.

He soon realized that the only way to get out of the $300,000 hole was to tighten the belt at Island Spring. He cut his and Suni's salary to zero for 3 years. They got personal income from personal investments, such as 4 housing units that they rent. They have worked the debt down to $60,000 and they are now starting to pay themselves. In one more year they will be competitive again.

Their competition is Azumaya, Nasoya (from time to time), White Wave, Ohta Tofu, Sea Asia, Boohan (of Tacoma), and Tacoma Tofu. Island Spring's main products are now tofu burgers, soymilk in quarts and half gallons, traditional firm tofu (Korean-style, water pack), and extra firm tofu (vacuum pack).

Talk with David Sucher. 1993. Oct. 20. One day Luke

© Copyright Soyinfo Center 2013

called David from Los Angeles, California, to ask if he could borrow (or exchange for stock) about $1,000 to $1,500 to buy a grinder/mill for making tofu. At the time Luke's company was in its original small building near the ocean and had not yet started commercial tofu production. At a later date Luke asked David to invest in the company, which he did; he now owns about 5% of the company's stock. Address: P.O. Box 747, Vashon, Washington 98070. Phone: 206-622-6448.

10412. Williams, Kimber. 1993. Rising to the seasons. *Register-Guard* (*Eugene, Oregon*). Oct. 20.
• ***Summary:*** Rising Moon Ravioli Company is driven by the changing seasons; they change their ravioli flavors at the start of each season. Kirk Giudici, age 25, from New Jersey, and the creative mind behind Rising Moon, has a family tradition for pasta and ravioli that goes way back. His mother was at the vanguard of the vegetarian cooking movement. He and his partner, Ms. Jade Elms, were looking for a way to pay their way through the University of Oregon 2 years ago, she suggested a homemade pasta business. The two struggling students rented a house with 6 other people and started their business there. In studying their market, they opted for tofu over the traditional spiced pork. After hard work at the beginning, the business is now thriving. Contains a nice history of their work.

10413. Brown, Alan. 1993. Kinmata: Fine dining at a Japanese inn. *Bon Appetit* 38(10):118-22. Oct.
• ***Summary:*** Kinmata Ryokan is a nearly 200-year-old traditional Japanese inn located in Kyoto at 407 Shijo-agaru, Goko-machi, Nakagyo-ku. The owner, Haruji Ukai, who is also the chef, is the seventh generation of his family to run the inn; he greets each new guest in person when they arrive. The food at Kinmata, which is "as delicious as it is beautiful," features *kaiseki* cuisine. There are only seven rooms in two-story Kinmata and no private bathrooms. Contains two miso recipes: Broiled bean curd and eggplant with miso (Kinmata's version of dengaku). White miso soup with shrimp. Address: Free-lance travel writer based in Tokyo.

10414. DeClercq, D.R.; Daun, J.K.; Tipples, K.H. 1993. Quality of Canadian soybean–1993. *Canadian Grain Commission, Crop Bulletin* No. 210. 9 p. Undated. [1 ref. Eng]
• ***Summary:*** Contents: Introduction. Weather and production review. Quality data. Methods: Samples, oil content, protein content, fatty acid composition, iodine value. Acknowledgements.

Figures show: (1) Map of Southern Ontario showing counties from which 1993 soybean survey samples were received. (2) Annual mean oil and protein content of Canadian soybean–1983-1993, Grades No. 1 and No. 2 Canada combined (oil averages 20.5%; meal 41.9%).

Tables show: (1) Production statistics for soybeans in Canada, 1983-1993 (seeded area {ha}, production {tonnes}, yield {tonnes/ha}). (2) Quality data for soybean harvest surveys No. 1 and No. 2 Canada grades: 1983-1993 (oil content, protein content {%}). (3) Quality data for 1993 Ontario soybean crop by grade (Nos. 1-3). (4) Oil and protein content of 1993 Ontario soybeans by county and grade. (4) Oil and protein content of 1993 Ontario soybeans by county; No. 1 and No. 2 Canada grades combined. (5) Oil and protein content of 1993 Ontario soybeans by variety; No. 1 and No. 2 Canada grades combined. (6) Fatty acid composition for 1993 Ontario soybeans by variety; No. 1 and No. 2 Canada grades combined. (7) Soybean varieties registered in Canada: Oilseed type. Natto type (3 NattoKing and 1 Nattosan varieties). Tofu type (Harovinton, KG 91, and TK 89). Address: 1. Chemist; 2. Research scientist; 3. Director. All: Grain Research Lab., Canadian Grain Commission, 1404-303 Main Street, Winnipeg, Manitoba R3C 3G8, Canada.

10415. **Product Name:** Farm Foods Fat Free Pizsoy [Original/Cheese Style, Garden Style, Vegetarian Pepperoni].
Manufacturer's Name: Farm Foods. Div. of Barricini Foods Inc.
Manufacturer's Address: 49 Old Bloomfield Ave., Mountain Lakes, NJ 07046. Phone: 201-334-0101.
Date of Introduction: 1993. October.
Ingredients: Garden Style: Organic stone-ground whole wheat flour, tomatoes, non-fat tofu mozzarella (organic soybeans, calcium caseinate [derived from non-fat milk], corn and rice starch, sea salt, citric acid, natural flavor, soy lecithin, vegetable gum), bell peppers, mushrooms, fresh yeast barley malt, garlic powder, herbs and spices.
New Product–Documentation: Spot in Health Food Business. 1993. Nov. p. 10. "Farm Foods acquires Original Pizsoy."

Leaflet (black on orange) distributed at Natural Products Expo East in Baltimore, Maryland. 1993. Oct. "Farm Foods. Come taste the world's best pizza. Fat Free Pizsoy. The naturally delicious alternative to cheese pizza."

Two leaflets (8½ by 11 inch, black-and-white) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 1994. March 10-13. "Fat Free Pizsoy Nutritional Facts." Gives the ingredients and nutritional information on the 3 types of Pizsoy. What used to be called "Origina;" is now called "Cheese Style."

100th birthday on 26 July 2013.

10417. **Product Name:** Tofu Pizza.
Manufacturer's Name: Leila's All Natural Foods.
Manufacturer's Address: Brooklyn, New York 11201. Phone: (718) 855-1456.
Date of Introduction: 1993. October.
New Product–Documentation: Leaflet distributed at Natural Products Expo East in Baltimore, Maryland. 1993. Oct. "Leila's Vegi-Pies. 100% all natural. 100% great taste."

10418. Morinaga Nutritional Foods, Inc. 1993. Mori-Nu. The lowest fat tofu in the world. The others are just plain tubby (Ad). *Health Food Business.* Oct. p. 37.
• ***Summary:*** A large color photo shows two Tetra Brik cartons of Mori-Nu Lite Silken Tofu. One is Extra Firm and the other is Firm in consistency. On each front panel is written, in large letters: "Only 1% fat." A table shows that the Extra Firm contains only 1 gm of fat and 35 calories, but 6 gm of protein per 3 oz serving. This gives the consumer "The highest protein to fat ration (6:1) and less calories than any other tofu."

This ad also appeared in HFM (Nov., p. 9), and *Natural Foods Merchandiser* (October 1993, p. 79; Oct. 1993, p. 79; July 1994, p. 14).

10419. Morinaga Nutritional Foods, Inc. 1993. Pure tofu. Perfect package. The world's lowest fat tofu. Guaranteed first-day fresh (Tear-off recipe pad). 2050 W. 190th St., Suite 110, Torrance, California 90504.
• ***Summary:*** This color tear-off recipe pad (6½ by 4 inches), developed by Susan Bucher of Bucher & Russell in Los Angeles, was introduced in Oct. 1993. On the back is a recipe for savory spinach dip, a nutritional analysis, and a half-page answer to the question: "How can a protein-rich food like Mori-Nu Tofu retain all of its nutrition for months–without refrigeration?" Address: Torrance, California. Phone: 1-800-669-8638.

10420. *Natural Foods Merchandiser.* 1993. White Wave to triple production with new equipment. Oct. p. 18.
• ***Summary:*** In August White Wave Soyfoods announced that it will begin a $1.5 million expansion of its plant in Boulder, Colorado that will triple its production capacity to 13 million pounds of product per year. The expansion will allow White Wave to continue its annual 20% growth rate. The company's sales last year were $4 million.

10421. **Product Name:** Soyboy Veggie Sizzler (Fat-Free Pre-Cooked Vegetarian Burger).
Manufacturer's Name: Northern Soy, Inc.
Manufacturer's Address: 545 West Ave., Rochester, NY 14611. Phone: 716-235-8970.
Date of Introduction: 1993. October.
Ingredients: Filtered water, soy protein concentrate, dried onion, wheat gluten, molasses, natural flavoring, yeast, garlic powder, spices, vegetable gum.
Wt/Vol., Packaging, Price: 6 oz.
New Product–Documentation: Spot in New Product News. 1993. Oct. 12. Gives the product's ingredients.

Leaflet distributed at Natural Products Expo East in Baltimore, Maryland. 1993. Oct. "And you thought fat-free tasted like cardboard? Not Veggie Sizzler. We took out the fat and filled it with flavor! Introducing the world's first fat-free burger." Health Foods Business. 1993. Dec. The product is said to have a grilled flavor and meaty texture.

10422. Shi, Yanguo; Ren, Li. 1993. Dadou zhipin gongyi-xue [The technical arts of soybean products]. Beijing, China: Zhongguo Qinggong Yechu Banshe [Chinese Ministry of Light Industry]. xii + 484 p. Illust. No index. 18 cm. [34 ref. Chi]
• ***Summary:*** Wade-Giles reference: *Ta-tou chih p'in kung-i hsüeh,* by Shi, Yen Kuo; Jên, Li. Contents: Preface. 1. Introduction to soyfoods: Terminology and classification, origin and development, future prospects. 2. Soybeans: Production, seed structure and components. 3. Chemical composition of soybeans: Soybean lipids, carbohydrates, minor components. 4. Soy proteins: Overview, molecular weight and classification, water solubility, denaturation, functionality, soy enzymes and antinutritional factors.

5. Soy oil extraction: Oil extraction from soybeans, solvent extraction principles and process outline, pre-extraction preparation, extraction process, other extraction technology, supercritical CO_2 extraction. 6. Chinese traditional soyfoods: Principles and ingredients, soybean soaking and cleaning, soymilk preparation for tofu processing, coagulation and molding, lactone tofu, yuba, meat alternatives. 7. assay, soybean cell biology: thin sample preparation technology, soybean cell biology: ultra thin sample preparation technology.

Concerning fermented tofu (Chapter 7): Fermented tofu may be named after the region where it is made. Some famous products in China include: (1) Shaoxing furu. Famous for its rice wine, Shaoxing is a city in northeastern Zhejiang, a coastal province in central eastern China. (2) Guilin furu. Guilin is a city in the northeast of the Guangxi Zhuang Autonomous Region of far southern China. (3) Kedong furu. Kedong is a county in Heilongjiang province in northeastern China. (4) Jiajiang furu. Jiajiang is a county in Sichuan Province, southwest China. (5) Tangchang doufu-ru. Tangchang is a town in Sichuan province.

Note: Talk with KeShun Liu. 2001. July 9. Green vegetable soybeans (*maodou*) are not mentioned in this book. Address: China.

10423. *SoyaFoods* (*ASA, Europe*). 1993. Dried soyamilk and tofu as bakery and meat ingredients. 4(3):2. Autumn.
• ***Summary:*** "Researchers at Iowa State University have been studying dried soya milk and tofu as food ingredients in doughnuts, hot dogs and pork sausages to find out how they affected food quality. Doughnuts made with 7% soya milk cut fat by 15%. The meat products made with 1-3% dried soya milk and tofu reduced fat by up to 25%. In taste tests, foods made with the soya bean products compared favourably with commercial products. The project has interested several food companies."

10424. *SoyaFoods* (*ASA, Europe*). 1993. Cauldron Foods opens new factory. 4(3):2. Autumn.
• ***Summary:*** "Cauldron Foods (part of the Hero Group of companies) the UK's leading producer of tofu and chilled vegetarian products has opened a new production facility and company headquarters at Portishead, Bristol."

The 25,000 square foot factory space, a £1.5 million located in the Portishead Business Park, includes a new custom-designed tofu production line that uses the latest computer control and CIP (Cleaning-in-Place) equipment. The plant is capable of producing a wide variety of vegetarian foods. Cauldron now sells around 1,000 tonnes/year of tofu products and has an annual turnover of £2.5 million, according to marketing director Nigel Horley. "The new address for Cauldron Foods Ltd is Unit 1 & 2, Portishead Business Park, Portishead, Bristol BS20 9BF, UK, tel: 0275 818448, fax: 0275 818353."

10425. Soyfoods Association of America; American Soybean Association. 1993. Good news about soyfoods. San Francisco, California. 16 p. 19 cm.
• ***Summary:*** This attractive booklet, containing 6 color photos, introduces soyfoods. Produced jointly by the Soyfoods Association of America and the American Soybean Association, it represents a first in cooperation between these two organizations. Contents: Soyfoods–A healthy choice: Soyfoods lower blood cholesterol, and fight cancer. Adding soyfoods to your menu: It's easy! The soyfoods family: Soybeans and edamame or fresh green soybeans, soy flour, texturized soy protein (TSP), soymilk, tofu, tempeh, miso, meat analogs, soy oil (a brief description is given of each). Soy recipes: Miso soup. Tofu chocolate cream pie. Creamsicle spritzer (with soymilk). Banana pancakes (with soy flour, soymilk, and soy oil). Sloppy joes with texturized soy protein. Barbecued tempeh. Nutritional value: Gives the composition of tofu (soft, silken, firm), meat analogs, soy oil, miso, texturized soy protein, tempeh, soymilk (regular or lite), and soy flour (full fat or defatted). Address: 1. One Sutter St., Suite 300, San Francisco, California 94104; 2. American Soybean Assoc., 540 Maryville Centre Drive, Suite 390, St. Louis, Missouri 63141-9200. Phone: 1. (415) 393-9697; 2. 1-800-Talk-Soy.

10426. **Product Name:** Trader Joe's Tofu.
Manufacturer's Name: Trader Joe's (Marketer-Distributor).
Manufacturer's Address: P.O. Box 3270, South Pasadena, CA 91031-6270. Phone: 818-441-1177.
Date of Introduction: 1993. October.
Ingredients: Water, organic soybeans*, calcium sulfate. * = Organically grown and processed in accordance with the California Organic Foods Act of 1990.
Wt/Vol., Packaging, Price: 19 oz packed in water in molded plastic tray, with heat-sealed, peel-off plastic film top. Retails for $0.89 (1997/09, Concord, California).
How Stored: Refrigerated.
Nutrition: Per 3 oz.: Calories 60, calories from fat 30, total fat 3 gm (5% daily value; saturated fat 0.5 gm), cholesterol 0 mg, sodium 10 mg (0%), total carbohydrate 1 gm (dietary fiber 0 gm, sugars 0 gm), protein 6 gm. Calcium 10%, iron 6%. Percent daily values are based on a 2,000 calorie diet.
New Product–Documentation: Product with Label purchased at Trader Joe's in Concord, California. 1993. Nov. 4. 5 by 4¼ inches. Purplish-blue and pink on clear plastic film. "No preservatives. Low fat. No salt added. Use in blender dressings and dips. Scramble with eggs. Use as cheese. Puree with fruit. Drop chunks in soup. Use in place of beef in enchiladas."

10427. **Product Name:** Trader Joe's Vegetable Tofu Patties.
Manufacturer's Name: Trader Joe's (Product Developer-Distributor).
Manufacturer's Address: P.O. Box 3270, South Pasadena, CA 91031-6270. Phone: 818-441-1177.
Date of Introduction: 1993. October.
Ingredients: Organic tofu (filtered water, whole organic soybeans [Grown and processed to the California Organic Act of 1990], natural nigari and/or calcium sulfate [naturally

© Copyright Soyinfo Center 2013

derived coagulants]), onions, carrots, cabbage, mushrooms, wheat pilaf, red bell peppers, tamari (water, soybeans, sea salt, grain alcohol [a natural preservative]), sunflower seeds, sesame seeds, currants, hi oleic safflower oil and/or hi oleic sunflower oil.
Wt/Vol., Packaging, Price: 6 oz vacuum pack retails for $1.49 (10/93, Concord, California).
How Stored: Refrigerated.
Nutrition: Per 1.53 oz.: Calories 160, protein 10 gm, carbohydrates 12 gm, fat 8 gm, sodium 400 mg.
New Product–Documentation: Trader Joe's Fearless Flyer. 1993. Oct. p. 13. "Vegetable Tofu Patties $1.49 for package of two. Fully cooked, no eggs, no dairy. Here's a good choice when you want to prepare a meatless meal."

Product with Label purchased from Trader Joe's in Concord, California. 1993. Oct. 10. 3.5 inch diameter. Black and bluish green on light blue. Self adhesive. "No dairy. No eggs. Fully cooked. Grill for 3 to 4 minutes or heat in a toaster. Use in sandwiches or salads. Keep refrigerated." Soyfoods Center taste test. Delicious!

10428. Walsh, Michael. 1993. Sounds of silence. *Time.* Nov. 1.
• ***Summary:*** John Cage was a bold thinker and a gifted writer. His essay, a "gastronomic account from 1975 of his barnstorming days with the Merce Cunningham dance troupe (this was in Cage's pre-tofu days), is a minor classic."

10429. *SoyaScan Notes.* 1993. Chronology of the American Soybean Association's growing interest in promoting soyfoods in America. Nov. 5. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** 1992 Jan.–Keith Smith of ASA calls Mark Messina PhD, at the National Cancer Institute and asks what Mark knows about possible cancer-preventing substances in soybeans. ASA was getting a lot of enquiries on the subject, which was Mark's specialty at NCI.

1992 Dec.–ASA decides to allocate a large portion of their 1993 research funds for health-related research. The 1993 budget contains $1,200,000 in funding for three 2-year projects which each received $400,000 over the 2 years. One project by Stephen Barnes involves soy and prostate and breast cancer, one by Maurice Bennink of Michigan State involves soybeans and colon cancer, and a third by William Wong involves cholesterol metabolism in soy.

1993 March–ASA allocates $27,625 for the Soyfoods Association of America (mainly Ginny and Mark Messina) to develop and distribute educational materials on soyfoods and to produce periodic press releases. The grant will be used to produce a 4-color brochure on soyfoods and eight individual fact sheets on tofu, soymilk, tempeh, miso, texturized vegetable protein, soy flour, soy-based meat analogs, and soy oil. These materials will be made available to state soybean boards.

1993 June–*The Soy Connection,* a quarterly newsletter on the nutritional benefits of soyfoods, starts to be mailed to 70,000 registered dieticians across the U.S. This high-quality publication, edited by Mark Messina, contains articles by experts in their fields, plus some good recipes.

1993 Oct.–Dr. Mark Messina is officially hired by ASA as a consultant. He gave about 12 public speeches on soy, diet, and chronic disease prevention in 1993, and has 15 more planned for 1994. Messina also coordinates nutrition research for a group named the North Central Soybean Research Program. As part of this, Steve Sonka of the University of Illinois is conducting a $43,000 economic impact analysis to determine the market potential for soyfoods and its effect on soybean consumption. The report is expected out in Dec. 1993. USB only has 3 paid employees and 60-65 volunteers, so they hire the ASA to do projects using money from USB and everything that ASA does is approved by David Thomas.

1993 Oct.–USB has a booth (probably its first) at the annual 3-day conference of the American Dietetic Assoc. attended by roughly 10,000 people. ASA and Dr. Messina were there. Evans Food Group, ASA's big food-related public relations firm in Seattle, Washington, was also there. The booth was geared mostly toward soy oil, but most of the interest from dietitians was in soyfoods. Fact Sheets on soyfoods and a brochure prepared by the Soyfoods Association and Evans Group were distributed. Soynuts were served but they ran out in the first 2 hours. Messina encouraged USB to have enough good soy-based snacks to last for 3 days for next year's show.

1993 Nov.–*Good News About Soyfoods,* an attractive 16-page booklet, prepared jointly by the Soyfoods Association of America (Ginny Messina) and USB, featuring information about and recipes for soyfoods is mailed to about 3,000 to 5,000 key media contacts.

1994 Feb.–The First International Symposium on the Role of Soy in Preventing and Treating Chronic Disease is held in Mesa, Arizona, organized by Dr. Mark Messina and sponsored by the United Soybean Board as well as soybean growers from Nebraska and Indiana.

1995–The United Soybean Board (USB) begins to sponsor dietitian seminars on the health benefits of soy in 26 cities across the USA. The budget for each seminar is $8,000. Manufacturers can exhibit products at seminars for a fee of $75 per table.

1996 Jan.–The Indiana Soybean Development Board introduces *Soyfoods USA,* the world's first e-mail newsletter on soyfoods. It is sent monthly to e-mail addresses free of charge. By Feb. 1997 there are 1,200 subscribers.

1996–USB creates and develops the theme "Soybeans–Designed for Life." When someone phones one of the state soybean associations or boards, music with these words plays in the background while he or she is on hold.

1996 Sept.–The Second International Symposium

© Copyright Soyinfo Center 2013

on the Role of Soy in Preventing and Treating Chronic Disease is held in Brussels, Belgium, again organized by Dr. Mark Messina. Sponsors contributing more than $15,000 include: American Soybean Association, Nebraska Soybean Board, United Soybean Board, Ohio Soybean Board, Indiana Soybean Development Council. Other sponsors: Illinois Soybean Association and Illinois Soybean Program Operating Board, Soyfoods Association of America, Minnesota Soybean Research and Promotion Council, Iowa Soybean Promotion Board, and Michigan Soybean Promotion Committee.

1997 Jan.–USB announces 11 more Soy Connection Dietitian Seminars that will be held in major cities across America during 1997, from April 4 to Sept. 12.

1997 Feb. 25–The Illinois Soybean Assoc. (ISA) mails a form letter to all known soyfoods manufacturers in the USA, stating that it has recently teamed up with a number of industry leaders and researchers to examine the feasibility of a cholesterol health claim for soy protein products. The letter asks that each manufacturer send ISA (by March 5) nutritional labels for each soyfood product that it makes or distributes.

10430. Kashama, Johnny. 1993. Re: Work with soybeans and soyfoods in Rwanda and Zaire. Letter to William Shurtleff at Soyfoods Center, Nov. 9. And 25 May 1994. 2 p. Handwritten. [Eng]

• ***Summary:*** "In Rwanda there is a mini-industry which makes tofu and other products from tofu like crackers (from okara) and fritters and other kind of cakes called in French 'croquettes.'" Johnny would like to take the methods used by Tofu-Rwanda to his home country of Zaire, beginning in Kisangani (where he will defend his treatise at the university), and the finally in Bukavu where he lives with his parents. He is preparing a treatise (*memoire;* equivalent to 5-year bachelor degree) to present at the end of his studies in Zaire at the *Institut Facultaire des Sciences Agronomiques* (*IFA*). It was originally to be titled *"Essai de valorisation de la technologie du soja: Methodes et techniques de production de lait de soja pour une unité artisonale"* ("Evaluation of Soybean Technology: Methods and Techniques for the Production of Soymilk and Derivatives for Small-Scale Processing in Bukavu"). But as of June 1994 the title has changed to *"Effet du depelliculage, du temps de trempage de graines de soja ainsi que de deux methodes d'extraction de lait de soja"* ("Effect of dehulling and of the time of soaking the soybeans as well as two methods of extraction on soymilk"). He hopes to start a small soyfoods company in Bukavu, but presently he has no money. He hopes that completion of this treatise will lead to financial support from some NGO (non-governmental organization) in Bukavu or abroad, or he many ask CIDR (*Centre International de Développement et de Recherche;* the International Center for Development and Research) to widen the project beyond the borders of Zaire.

In Bukavu, Zaire, where many children die of hunger and suffer from kwashiorkor, there is an NGO (non-governmental organization) which is at work, but kwashiorkor is still persisting. There is a little factory that makes soy crackers using maize, sorghum, and soya. The blend the three ingredients and make what they call "Masoso." The name is taken from the first two letters of each ingredient. The way it is done is different from what they do in Tofu-Rwanda, where he is working as an apprentice.

Note: On 22 Feb. 1994 Soyfoods Center received a letter (fax) from Johnny Kashama in Kigali, Rwanda. On 4 April 1994 a terrible ethnic and genocidal civil war broke out in Rwanda, centered in Kigali. The Hutu (comprising 90% of the nation's population) tried to eliminate the Tutsi (very tall people; 9% of the population). An estimated 500,000 people were killed and millions fled into neighboring Tanzania and Zaire. As of 15 May 1994 the fate of Mr. Kashama is unknown. Address: Tofu-Rwanda, P.O. Box 1906, Kigali, Rwanda.

10431. *SoyaScan Notes.* 1993. Manufacture and sale of soyfoods in Poland (Overview). Nov. 11. Compiled by William Shurtleff of Soyfoods Center.

• ***Summary:*** The following information about soyfoods companies in Poland was provided by the Polish consulate, the American Soybean Assoc., and a Westerner traveling in Europe:

Polsoja was started in early 1993 by Piotr Poninski and three partners. It is probably the first tofu shop in Warsaw, Poland, and the only tofu shop in Poland that makes and sells tofu on a regular basis. Five people work at the company. Address: ul. Hetmanska 61, 05-120 Legionowo (near Warsaw), Poland. Phone/fax: (48 22) 18 21 11

Solida Sp. z o. o. is a Chinese-owned company founded in 1992 by two Chinese partners: Mr. Lu Shihua (president) and Mr. Liu Zhonghua. The sales manager is Mr. Bugosiaw Zwadzki. They make and sell soy sprouts. They plan to sell tofu. Address: ul. Kmicica 1/212, 02-728 Warszawa (Warsaw), Poland. Phone/fax: (48 22) 47 23 09.

Okregowa Spoldzielnia Mleczarska is a dairy co-operative that supposedly makes or used to make tofu. They were taught how by Prof. Stanislaw Gwiazda. Polsoja has never seen or eaten their tofu. They probably started in 1992. Probably nobody speaks English there. Address: ul. Chopina 2, 12-100 Szczytno, Poland. Phone: (48 889 89) 22 11.

Prof. Stanislaw Gwiazda is said to have traveled in East Asia and claims to know tofu technology. He works in the faculty of food technology at the main School of Agriculture in Warsaw, where he specializes in proteins and fats. He helped the Szczytno start or try to start making tofu. Address: Szkola Glowna Gospodarstwa Wiejskiego, Katedra Produktow Biaikowych i Tiuszczowych, ul. Grochowska

© Copyright Soyinfo Center 2013

272, 03-849 Warszawa, Poland. Phone: (48-22) 10 18 42.

Polgrunt Sp z o. o. makes soy pâtés and soy flour. They also sell soybeans, TVP (imported from Serbia via Hungary), soy sauce, and maybe other soy products. They may start making tofu in the future. They probably started in 1991 or 1992. Address: ul. Pabianicka 17/19, 97-400 Beichatow, Poland. Phone: (48 841 83) 255 64.

There is also an unknown Vietnamese man who is making tofu for the Vietnamese community in Warsaw. He probably does everything in his kitchen for just a few people.

10432. Adlercreutz, Herman; Markkanen, H.; Watanabe, S. 1993. Plasma concentrations of phyto-oestrogens in Japanese men. *Lancet* 342(8881):1209-10. Nov. 13. [10 ref]
• ***Summary:*** Two Finnish and one Japanese scientist teamed up to see if diet could explain why Japanese men have a lower death rate from prostate cancer than Western men, even though both groups have about the same incidence of prostate cancers. The scientists speculated that the Japanese diet may keep small prostate cancers from growing into deadly tumors.

"A low mortality from prostatic cancer is found in Japanese men consuming a low-fat diet with high content of soy products–a rich source of isoflavonoids." Isoflavonoids are the plant version of the female sex hormone estrogen, which has been shown to inhibit cancer cells in the test tube. The researchers therefore investigated the isoflavonoid level in the blood (plasm) of 14 Japanese who ate the typical soy-rich Japanese diet and 14 Finnish men who ate the typical dairy-and-meat diet of Finland. The levels of the estrogen-like isoflavonoids were 7 to 110 times higher in the blood of the Japanese men than in the Finns. Genistein, a tyrosine kinase inhibitor, was the isoflavonoid that occurred in the highest concentration (geometric mean 276 nmol/liter). The authors hypothesize that these high phytoestrogen levels may inhibit the growth of prostate cancer in Japanese men, which may explain the low mortality from prostatic cancer in that country. Address: 1-2. Dep. of Clinical Chemistry, Univ. of Helsinki, Mellahti Hospital, SF-00290 Helsinki, Finland; 3. Epidemiology Div., National Cancer Center Research Inst., Tokyo, Japan.

10433. Garland, Jackson. 1993. Vegetarians' holiday dinner solution: tofu turkey. *Lumberjack* (*The*) (*Humboldt State Univ. Newspaper*). Nov. 17. p. 15.
• ***Summary:*** Gives a recipe (from *The Co-op Newsletter*) for "Tofu turkey," that uses 5 lbs. of tofu. Address: Staff.

10434. Olson, Paul. 1993. Update on Bountiful Bean Soyfoods (Interview). *SoyaScan Notes.* Nov. 17. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Paul created a corporation named Vermont West Inc. which purchased Bountiful Bean Soyfoods from Richard Kraemer and Elizabeth Hanson on 3 Sept. 1993. Richard and Elizabeth will continue working at the company until Feb. 1994, then Richard plans to go back into the ministry.

A follow-up letter (19 Nov. 1993) and leaflet (titled "About Bountiful Bean Soyfoods Products") shows that the company now makes tofu, herb tofu, tasty tofu (marinated and baked herb tofu), tempeh, soymilk, hummus, and taboolie [tabbouleh].

Paul also encloses "Bountiful Bean Soyfoods Newsletter." Issue 1. Nov/Dec. 1993. 4 pages. It includes articles titled "New ownership of Bountiful Bean Soyfoods Announced" (The company currently employs 8 people.) "Who is Paul Olson and what is Vermont West?" (Paul has had 9 years prior experience working in the computer industry with Apple Computer. He is 27 years old and lives near the family farm where he grew up). Address: 620 Main St., P.O. Box 329, Ridgeway, Wisconsin 53582-0329. Phone: 608-924-1703.

10435. Gallagher, Susan. 1993. Re: Update on Life Food GmbH–Taifun Tofu Produkte. Letter (fax) to William Shurtleff at Soyfoods Center, Nov. 18. 1 p. Typed, with signature on letterhead.
• ***Summary:*** Susan is an American. She notes that in 1990 the corporation Life Food GmbH was formed. Prior to that time the company had been unincorporated. Taifun became a brand name, but the company's letterhead still reads "Taifun Naturkost," and in the address, the line below Life Foods GmbH reads "Taifun Tofu Produkte." Klaus Kempff is no longer with the company. Wolfgang Heck and Guenter Klein are the joint CEOs. Address: Public Relations director, Life Food GmbH, Robert-Bunsen Str. 6, 79108 Freiburg, Germany. Phone: (0761) 50 61 55.

10436. Wilson, Don. 1993. The pioneering work of Aqua Agra in Florida with sprouts and soyfoods. Part II (Interview). *SoyaScan Notes.* Nov. 24. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** "When we started talking about making tofu, it became very evident to me that we would need a bigger space, so in about March or April of 1977 we moved over to 100 Highline Dr., Longwood, Florida 32750. We went from 4,000 square feet of floor space to 50,000 square feet. We outgrew our plant on Seminola Blvd. in about 4-5 months." In June 1977 Don's first child, a son, was born. On Highline Drive, Don built rooms to grow the various sprouts and also diversified the company into chopping and packing huge amounts of fresh vegetables; there was a separate packet of sauce (such as teriyaki) in each bag for making stir-fries. All that was needed was some tofu to complete the stir-fry. Don bought his tofu equipment used from Robert and Mary Brooks, whose company Swan Foods in Miami had gone out of business. The purchase became a mess because Robert had failed to inform Don about the liens that were against his equipment due to Robert's unpaid bills. So Don started

© Copyright Soyinfo Center 2013

to make tofu in 1978. He sold it chiefly to the chain stores–first to Albertson's (the smallest group), then to Publix, and then to Winn Dixie (the biggest chain). He did not deal with restaurants or health food stores. At the height of production, Aqua Agra was making at least 25,000 to 30,000 lb/week of tofu. He was the first person to introduce tofu to supermarkets in Florida.

In the summer of 1979 Don attended the second annual Soycrafters Conference at Amherst College in Massachusetts. "I will never forget that as long as I live. Some of the major U.S. food companies, such as General Mills and a few others, sent representatives in 3-piece suits. I was standing in the back of the auditorium where these guys were and I'll never forget listening to their comments as they talked about what a bunch of dingdongs they had been sent to observe, and how this had absolutely no place in the American food chain whatsoever. I can remember walking away from that conference thinking to myself, 'I sure am glad these big guys think this way because all it would take is one big corporation to get involved in this and a lot of small businesses would soon go down the drain.'"

Aqua Agra grew rapidly. Many of his employees were Asian-Americans and they were wonderful workers. the copycats that tried to compete with him couldn't. About 2 years after Aqua Agra started making tofu, the *Sentinel Star* newspaper did a rather nice story on the company in 1980.

In early 1981 Don started making soymilk, which he sold in bulk to the nearby Seventh-day Adventist Florida Hospital–but not to any of the chain stores. He sold about 300 gallons a week.

At about the same time he started making soy yogurt in individual unprinted cups with a pressure sensitive label. Most of his sales were of plain yogurt, but he also sold strawberry, peach, and blueberry flavors. The yogurt was sold to local health food stores, to Del Champs in Alabama, and to a broker in New York named Marty Grossman, who sold a lot.

In late 1981 Aqua Agra began to make soy tempeh. They sold less than 100 lb/week, and only to a few health food stores in Orlando who had asked for it.

Don and his wife had to close the company in about mid-1982, after 6 years in business. At that time they were making about 75 products. He and his wife were each working 100 hours a week. "The doctor gave me a choice. He said, 'You can either get rid of that business and live, or you can keep it and die! But you're gonna do one of the two.'" Don was so sick and tired of everything at that time that he decided not to even sell the company–just to shut it down and walk away.

Don feels that he was a little bit before his time. "People found it amusing that a sergeant in the United States Marine Corps. was involved in making hippie food." Address: 2321 Virginia Dr., Altamonte Springs, Florida 32714.

10437. Jennings, Richard. 1993. Befine and update on work with soyfoods (Interview). *SoyaScan Notes.* Nov. 28 and Dec. 1. Conducted by William Shurtleff of Soyfoods Center. Followed by letter of 28 Dec. 1994.

• ***Summary:*** Richard was issued a U.S. patent (#5,206,050) on the process for making Befine from tofu curds on 27 April 1993. He is using Befine to make meatless hamburger patties and several of America's biggest hamburger chains are actively interested in the product. In Sept. 1993 he registered the trademark Befine in Europe and the USA. A Dutch man named Sander Wijnen (pronounced VINE-un) coined the term in about March 1992. At the time he was responsible for setting up VPS Europe BV, and was not happy with the product's existing name, Ricosoy. "Ironically, we ran into a lot of resistance to any food with the word 'soy' in it. They wanted a product name that had an international sound to it, indicated a relationship with meat, and expressed a feeling of joy and health. Sander's first idea was "Befit." People liked the idea of a name that was pronounced life "Beef" but not written the same. After a couple of months and some brainstorming sessions, Sander called one of his colleagues (in March 1992) and mentioned the name "Befine." This name expressed all the desired elements. After some time VPS management in the USA adopted the name.

Richard and Rudolph ("Rudy") Holscher each own 32½% of Vegetable Protein Specialists (VPS), Inc. of Santa Fe, New Mexico. Actually it has become an international company with a mission. New World Foods is their brand name. Other owners of the corporation are: The workers (25%, in an inviolable trust that cannot be diluted), the comptroller (5%), Jim Winter (5%, he put up $20,000 when Richard bought Southwest Soyfoods).

In 1990 Richard's company in Santa Fe was named The Food Plant Inc. & Southwest Soyfoods. Then he changed it to Protein Technologies, Inc.–but ran into trouble from Protein Technologies International (PTI), so after a few months, in June 1990, he renamed the company VPS, Inc. and incorporated it in the state of New Mexico. Address: 2889 Trades West Road, Santa Fe, New Mexico 87501. Phone: 505-471-8979.

10438. Drosihn, Bernd. 1993. Re: New developments with soyfoods in Germany. Letter to William Shurtleff at Soyfoods Center, Nov. 29. 2 p. Typed, with signature on letterhead.

• ***Summary:*** Viana has done a lot of work to improve the design of its labels and packaging. In Germany the soyfoods market is not growing at present, but neither is there a big recession. Germany's biggest soyfoods manufacturer, DE-VAU-GE, stopped production of tofu in early 1993 and now buys its tofu products from Heuschen-Schrouff B.V. in the Netherlands. That should make Heuschen-Schrouff one of the largest tofu manufacturers in the world. DE-VAU-GE plans to stop soymilk production in early 1994.

© Copyright Soyinfo Center 2013

Some newer, small soyfoods manufacturers have recently started in Germany: Tofuhaus Eisenreich (Steinmetzstrasse 4, 93049 Regensburg, Germany. Owner: Mrs. Eisenreich. Phone: 0941/27 01 27), and Topas GmbH (Bollbergsr. 41, 72116 Moessingen [near Tuebingen], Germany. Owner: Klaus Gaiser. Phone: 07473/25515). Our old friend Klaus Gaiser, once the largest tofu manufacturer in Germany, is trying to make a comeback.

The market for soyfoods in Eastern Europe is developing very quickly. Bernd has had contact with a Polish company named Polsoja. Yesterday a person from Slovenia visited Viana. He wants to make tempeh there and he told Bernd that there are some soyfoods manufacturers in the former Yugoslavia. In Slovenia, which is relatively untouched by the war, there is one existing tofu company and more than 30 natural food stores.

Albert Hess (owner of Das Tofuhaus in Lautersheim) and Bernd are in the process of founding a new company, named Sojarella, which will start to make and sell soy cheeses in early 1994. The address will be the same as Viana. They have developed a method for making soy cheese products that contain no casein. Address: Founder and president, Viana Naturkost GmbH, Willi Graf Str. 88, 33881 Euskirchen-Kuchenheim, Germany. Phone: 02251-56076.

10439. *Wall Street Journal.* 1993. Tofu diet may help limit prostate-cancer deaths. Nov. 29.
• ***Summary:*** A summary of an article from the November 13 issue of the British medical journal *Lancet* (p. 1209-10). It begins: "Tofu may join broccoli, kale and carrots on the list of foods that might reduce the risk of cancer."

10440. Cheney, Susan Jane. 1993. Our favorite beginner [vegetarian] cookbooks: Essential titles for your kitchen library. *Vegetarian Times.* Nov. p. 80, 82-86. [29 ref]
• ***Summary:*** List 29 vegetarian cookbooks in various categories. Vegetarian classics: Moosewood Cookbook by Mollie Katzen (1977, 1992), American Wholefoods Cuisine by Nikki and David Goldbeck (1983), Laurel's Kitchen and The New Laurel's Kitchen by Laurel Robertson, Carol Flinders, and Brian Ruppenthal (1976, 1986), The Vegetarian Epicure (I and II) by Anna Thomas (1977, 1992), Ten Talents by Frank and Rosalie Hurd (1968, 1983).

Other basic books: The American Vegetarian Cookbook by Marilyn Diamond (1990), Kathy Cooks by Kathy Hoshijo (1986), An Ecological Kitchen by Lorna Sass (1992), Fresh from a Vegetarian Kitchen by Meredith McCarty (1989), The High Road to Health by Lindsay Wagner (1990), Cooking with the Right Side of the Brain by Vicki Rae Chelf (1991).

International cookbooks: Sundays at Moosewood Restaurant by The Moosewood Collective (1990), Italian Vegetarian Cooking by Jo. Marcangelo (1984), Yamuna's Table by Yamuna Devi (1992), Cooking with Japanese Foods by Jan and John Belleme, The Best of Lord Krishna's Cuisine by Yamuna Devi (1992). Baking books: Cooking for special occasions: Gourmet Vegetarian Feasts by Martha Rose Shulman (1987), Vegetarian Celebrations by Nava Atlas (1990), Vegetarian Entertaining by Diana Shaw (1991), Vegetarian Pleasures by Jean Lemlin (1987). Other specialty books: Amazing Grains by Joanne Saltzman (1990), Soups for All Seasons by Nava Atlas (1992), Vegetables on the Grill by Kelly McCune (1992), Tofu Cookery by Louise Hagler (1982, 1991), Quick Harvest by Pat Baird (1991), and The Good Breakfast Book by Nikki and David Goldbeck (1992).

10441. Clifford, Mary. 1993. Tofu guru: An interview with William Shurtleff, co-founder of the Soyfoods Center. *Vegetarian Journal* (*Baltimore, Maryland*). Nov/Dec. p. 16-21.
• ***Summary:*** "The Soyfoods Center recently celebrated its 20th anniversary. It is one of the world's leading information sources on soyfoods, and its founders, William Shurtleff and Akiko Aoyagi Shurtleff (husband and wife) have been largely responsible for the introduction of soyfoods and tofu to mainstream America." In this interview Shurtleff discusses the history of his and his wife's work with soyfoods and vegetarianism. Address: R.D., Roanaoke, Virginia.

10442. Coward, Lori; Barnes, N.C.; Setchell, K.D.R.; Barnes, S. 1993. Genistein, daidzein and their beta-glycoside conjugates: Antitumor isoflavones in soybean foods from American and Asian diets. *J. of Agricultural and Food Chemistry* 41(11):1961-67. Nov. [31 ref]
• ***Summary:*** This is a very important article. Isoflavones were first extracted with alcohol (80% aqueous methanol) and then the fat was removed from the extract with hexane solvent. Details of the isolation process are given. The results showed that most Asian and American soy products, with the exception of soy sauce, alcohol-extracted soy protein concentrate, and soy protein isolate, have total isoflavone concentrations similar to those in whole soybeans. Asian fermented soyfoods contain mainly isoflavone aglucones, whereas in nonfermented soyfoods of both Asian and American origin isoflavones are present mainly as beta-glycoside conjugates. The estimated daily intake of these isoflavones by Asians is similar on a body weight basis to the isoflavones in soy-containing diets which inhibit mammary tumorigenesis in animal models of breast cancer. Therefore, it is possible that dietary isoflavones are an important factor accounting for the lower incidence and mortality from breast cancer in Asian women.

"The concept of reducing cancer risk by chemoprevention has become an important aspect of current cancer research. It has been suggested that two so-called phytoestrogens, lignans and isoflavones, may play a role in the prevention of estrogen-dependent breast cancer and colon cancer.

Three tables show the isoflavone concentrations in

© Copyright Soyinfo Center 2013

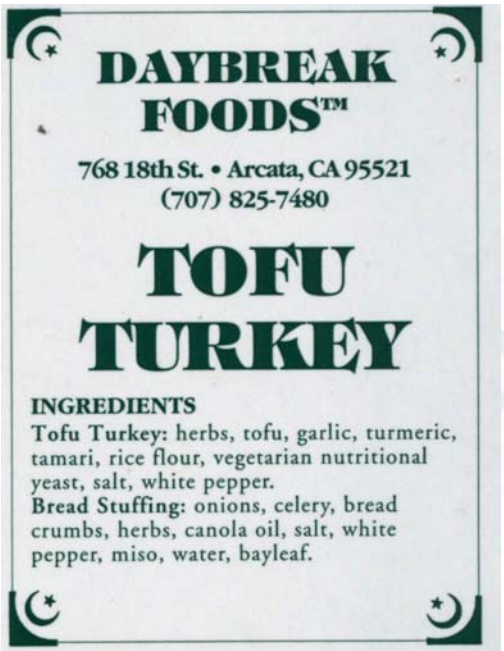
various types of soyfoods. For each food, the content of the following is given: Conjugated genistin, conjugated daidzin, genistein aglucone, daidzein aglucone, total isoflavones, D/G ratio, percentage of genistein aglucones, and percentage of daidzein aglucones. After each food listed below we will show the total concentration "as is" and then (if given) on a dry weight basis.

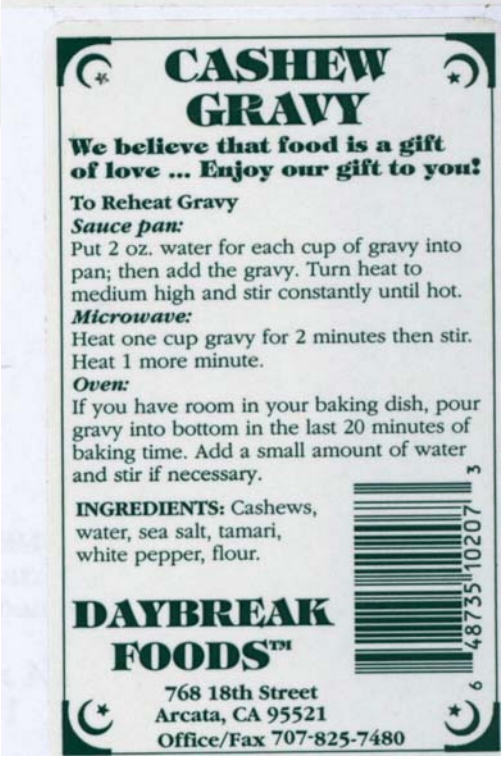
Table 1 shows isoflavone concentrations (in mg per gram) in basic nonfermented Asian soyfoods: Soymilk (0.252 / 3.256), Tree of Life tofu (0.417 / 2.031), Mori-Nu tofu (0.494 / 3.827), soy flour (1.338), soy powder (1.748), and soy nuts (2.363).

Table 2 shows isoflavone concentrations (in mg per gram) in fermented Asian soyfoods: Tempeh (0.430 / 1.130), miso (0.920 / 1.379), rice miso (0.404 / 0.721), barley miso (0.721 / 1.195), Shiromiso soup mix (0.708), Akamiso soup mix (0.882).

Table 3 shows isoflavone concentrations (in mg per gram) in other soyfoods: Soy sauce (0.023 / 0.090), soy cheese (0.050 / 0.105), Tofutti soy ice cream (0.032 / 0.092), Ice Bean soy ice cream (0.117 / 0.360).

Although flavonoids are found in many plants, vegetables, and flowers, isoflavones such as genistein and daidzein are found in just a few botanical families. This is because of the limited distribution of the enzyme chalcone isomerase largely to tropical legumes. Partly for this reason, isoflavones are a very minor part of American or British diets. Address: Depts. of Pharmacology and Biochemistry and Comprehensive Cancer Center, Univ. of Alabama at Birmingham, Birmingham, Alabama 35294, Mass Spectrometry Lab., Children's Hospital Medical Center, Cincinnati, Ohio 45229.





10443. **Product Name:** Tofu Turkey, and Cashew Gravy. **Manufacturer's Name:** Daybreak Foods. **Manufacturer's Address:** 768 18th St., Arcata, California 95521. Phone: (707) 825-7480. **Date of Introduction:** 1993. November. **Ingredients:** (1) Tofu Turkey: herbs, tofu, garlic. turmeric, tamari, rice flour, vegetarian nutritional yeast, salt, white pepper. Bread Stuffing: onions, celery, bread crumbs, herbs, canola oil, salt, white pepper, miso, water, bayleaf. (2) Cashew Gravy: Cashews, water, sea salt, tamari, white pepper, flour. **How Stored:** Refrigerated. **New Product–Documentation:** These are two separate products: Labels (Tofu Turkey, Cashew Gravy) sent by Matthew Schmit. 2002. Sept. 24. Both are pressure sensitive, green on white, 3.5 x 2.5 inches.

Talk with Matthew Schmit. 2009. March 6. Daybreak Foods is no longer in business. He sold his restaurant and company to a couple in about 2004. The new owners (Paul, and his wife, Hahnelea Boehm–an ex-employee of Matthew's) continued to make the Tofu Turkey and the Gravy for the Thanksgiving and Christmas season only until 2007, and they were quite as aggressive as Bob Meeks was. They closed in the fall of 2008; they were splitting up and the restaurant got caught up in the legal battle.

10444. Havala, Suzanne; Dwyer, Johanna. 1993. Position of the American Dietetic Association: Vegetarian diets. *J. of the American Dietetic Association* 93(11):1317-21. Nov. [24 ref] • ***Summary:*** Contents: Introduction. Position statement. Vegetarianism in perspective. Implications for health

© Copyright Soyinfo Center 2013

promotion. Nutrition considerations vegetarians. Groups with special needs. Meal planning.

Introduction: "A considerable body of scientific data suggests positive relationships between vegetarian diets and risk reduction for several chronic degenerative diseases and conditions, including obesity, coronary artery disease, hypertension, diabetes mellitus, and some types of cancer.

"Position statement: It is the position of the American Dietetic Association vegetarian diets are healthful and nutritionally adequate when appropriately planned."

A half-page table titled "Daily food guide for vegetarians" (p. 1318) suggests that 2-3 servings per day come from the "Legumes and other meat substitutes" food group. Serving sizes: 4 oz tofu or tempeh, 8 oz soy milk. Address: 1. MSc, RD; 2. DSc, RD.

10445. Kelley, Hubert W. 1993. Always something new: A cavalcade of scientific discovery. *USDA Agricultural Research Service, Publication* No. 1507. 150 p. Nov.
• ***Summary:*** This book is filled with photos and commemorative stories about the research discoveries and breakthroughs in the field of crop utilization at the four regional USDA's Agricultural Research Service (ARS) labs during the 50 years since they were established.

Chapters include: Introduction. Gambling on science. Penicillin and the war years [World War II]. Midstream changes and corrections. Frozen foods. Soybean oil (p. 85-88). Vegetable oils in Industry (p. 89-91). Food safety (p. 97-104; Aflatoxin, other mycotoxins). Food for Peace (p. 116-18). Fuels from agriculture (p. 118-19). Proteins in milk, grains, and oilseeds (p. 125-20). Peanuts (p. 131). U.S. crops in Asian foods (p. 132-33; Tofu, tempeh, soy sauce, sufu). Microorganisms (p. 134-36; Incl. the ARS culture collection). Focus on the future (p. 147-50; soy oil printing inks).

The most important work of the Northern regional laboratory in Peoria was the development of penicillin starting in June 1941. A brief chronology:

1941 Dec.–Andrew J. Moyer, a chemist at the Northern lab, developed the basis for the industrial process–deep vat fermentation.

1942 March–Only enough penicillin is available to treat a single case.

1942 Dec. 31–Seventeen U.S. pharmaceutical companies are working on penicillin.

1944 June 6–Thanks to the combined efforts of many people, enough penicillin is available in quantity by D-Day (invasion of Normandy, France) to treat wounded allied soldiers. Penicillin was the world's first commercial antibiotic.

By the 1950s, hundreds of antibiotics were on the market. Address: Director (retired), Information Staff, USDA Agricultural Research Service (ARS).

10446. **Product Name:** Kikkoman Tofu: Soybean Curd (Aseptically Packaged) [Firm, or Soft].
Manufacturer's Name: Kikkoman International, Inc. (Importer). Made in Japan by Morinaga.
Manufacturer's Address: 50 California St., Suite 3600, San Francisco, CA 94111. Phone: 415-956-7750.
Date of Introduction: 1993. November.
Ingredients: Water, soybeans, glucono delta lactone and calcium chloride (coagulating agents).
Wt/Vol., Packaging, Price: 10.5 oz Tetra Brik Aseptic carton.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: Talk with Morinaga Nutritional Foods. 1994. March 18. Morinaga in Tokyo is now making and packaging this product for Kikkoman. The first batch arrived in the USA in Nov. 1993. The product was formerly packed in a foil retort pouch in a paperboard box.

10447. Mangels, Reed. 1993. Vegetarian Journal's guide to cheese alternatives and non-dairy yogurt. *Vegetarian Journal* (*Baltimore, Maryland*). Nov/Dec. p. 25-27.
• ***Summary:*** The cheeses are called cheese alternatives because many of them contain casein or calcium caseinate. Casein is a protein derived from cow's milk. It is added to most cheese alternatives to make them stretchy when melted. Though most cheese alternatives are not acceptable to vegans, two products on the market appear to be free of casein: Soymage and Soymage Cheddar, made by Galaxy Foods. One brand of cream cheese alternative (Tofutti Better Than Cream Cheese) also contains no casein. "It is hard to tell just whom these cheese alternatives were developed for." The main market seems to be consumers who want to avoid cholesterol and lactose. A table shows the following three types of products, each with the number of calories, and amount of fat and sodium per serving. Those followed by an asterisk contain no casein.

Mozzarella-style (1 ounce): Almond Rella, Lite'n' Free, Lite'n' Less, Soya Kaas, Soymage*, White Wave Soya A Melt, White Wave Fat Free, Cow's Milk Mozzarella, Part Skim Cow's Milk Mozzarella.

American/Cheddar-Style (1 ounce): Lite'n' Free Cheddar, Lite'n' Less American, Nu Tofu Low Sodium Cheddar, Nu Tofu Cheddar, Soya Kaas Mild American Cheddar, Soymage Cheddar*, White Wave Cheddar Soya A Melt, White Wave Fat Free Cheddar, Zero-Fat Rella California Cheddar, Cow's Milk Cheddar, Low Fat Cow's Milk American.

Cream Cheese (2 tablespoons): Lite'n' Less, Nu Tofu, Tofutti Better Than Cream Cheese*, Cow's Milk Cream Cheese, Low Fat Cow's Milk Cream Cheese.

The only non-dairy yogurt found in Baltimore, Maryland, was White Wave's Dairyless Soy Yogurt. It is available in raspberry, strawberry, blueberry, peach, vanilla, lemon-kiwi, and apricot-mango flavors and is available plain

© Copyright Soyinfo Center 2013

in quarts. All the flavored dairyless soy yogurts are similar in fat content to low-fat yogurt. The plain soy yogurt is closer to regular yogurt in fat content. The soy yogurts are not very goos sources of calcium (only 40 mg per 6-ounce serving). "I think their taste is quite acceptable."

As this magazine goes to press, Sharon's Finest (of Santa Rosa, California), after 7 years of research, has just released a new vegan cheese named Vegan Rella. "We had an opportunity to taste the cheese and found it to be a big improvement over Soymage." Vegan Rella contains organic Brazil-nut milk, tapioca, rice, oats, canola oil, Irish moss, garlic, spices, basil, sun-dried tomatoes, citric acid, and salt. It is available in hard cheese form (in Mexican and Italian flavors) and in cream cheese form (in either plain, or onion and dill flavor). Address: PhD, R.D.

10448. McCarty, Meredith. 1993. Food: A vegetarian turkey. *Co-op Newsletter* (*Arcata, California*). Nov.
• ***Summary:*** Gives a macrobiotic recipe for "Tofu turkey with herbed bread stuffing and mushroom gravy" [vegetarian], that uses 5 pounds of tofu and makes 16 servings. At end of article: "Thanks to Mathew Schmit, owner of The Tofu Shop" (768 18th St., Arcata, California 95521). Address: Staff.

10449. **Product Name:** Mori-Nu Lite Silken Tofu [Extra Firm, or Firm].
Manufacturer's Name: Morinaga Nutritional Foods, Inc. (Importer). Made in Japan by Morinaga Milk Co. Ltd.
Manufacturer's Address: 2050 W. 190th St., Suite 110, Torrance, CA 90504. Phone: 310-787-0200.
Date of Introduction: 1993. November.
Ingredients: Extra firm: Water, soybeans, isolated soy protein, gluconolactone, calcium chloride.
Wt/Vol., Packaging, Price: 10.5 oz (297 gm) Tetra Brik Aseptic carton.
How Stored: Shelf stable; refrigerate after opening.
Nutrition: Per 3 oz.: Calories 35, calories from fat 10, total fat 1 gm (2 daily value; saturated fat 0 gm), cholesterol 0 mg, sodium 80 mg (3%), total carbohydrate 1 gm (< 1%), protein 6 gm, calcium 2%, iron 4%. Percent daily values are based on a 2,000 calorie diet.
New Product–Documentation: Ad (full-page color) in Health Food Business. 1993. Oct. p. 37. "Mori-Nu. The lowest fat tofu in the world. The others are just plain tubby."

Talk with Tom McReynolds of Morinaga. 1993. Oct. 14. This product will be launched on 1 Nov. 1993. Distribution will start on Oct. 25. The product does not contain any Nichii Soy Flakes (as is implied in a spot in Health Foods Business, Oct. 1993, p. 64). As far as Tom knows, only White Wave and Tree of Life are presently using Nichii flakes to make tofu. The product contains both soybeans (grown in Iowa) and isolated soy protein (from Protein Technologies International). Morinaga has purchased the video of Tom Brokaw interviewing Hillary Rodham Clinton, they have transcribed the parts about tofu and trying to work healthier eating into the White House. Brokaw ends the interview by saying: Perhaps we'll see tofu at a White House state dinner. Morinaga is doing a news release on the subject. Dr. Dean Ornish has already been invited to the White House to advise President Clinton on his diet. Ornish went in and spoke.

Letter (fax) from Morinaga. 1993. Nov. 2. Mori-Nu Lite–Extra Firm contains exactly 0.7 gm of fat and 36.6 calories per 84 gm serving, so that 17% of its calories come from fat.

Product (Extra Firm) with Label sent by Morinaga. 1994. Feb. 5. 4 by 2.5 by 1.75 inches. Tetra Brik Aseptic carton. Purple, yellow, red, and green on white. On front panel: "Only 1% fat." On one side is a recipe for Vegetable Stir Fry. Soyfoods Center Taste Test. The product has a very firm consistency the like white of a hard-boiled egg, and a very bland flavor.

Leaflet sent by Morinaga. 1994. Nov. 25. "See the Lite!" "Mori-Nu Lite is the lowest fat tofu in the world. We combined extremely low-fat isolated soy protein with rich whole-bean soymilk, and then added only enough water to maintain Mori-Nu's creamy smooth texture... Mori-Nu Lite has no cholesterol, and with only 1 gram of fat per serving, you get the highest protein to fat ration (6:1) and less calories (35) than any other tofu."

Prices at Safeway supermarket in Lafayette, California. 1995. Nov. 28. Mori-Nu (3 types): 11.9 cents/oz. Azumaya Chinese style (firm): 7.5 cents/oz. Thus Mori-Nu Tofu costs 59% more than Azumaya tofu.

10450. Morinaga Nutritional Foods, Inc. 1993. Introducing the world's first low-fat tofu. Let's have a holiday (Ad). *Vegetarian Times.* Nov. p. 33.
• ***Summary:*** This full-page color ad shows 2 packs of Mori-Nu Lite Silken Tofu (Firm, and Extra Firm). Contains a recipe for and a photo of a pumpkin pie made with Mori-Nu lite. A table comparing the filling of this pie with a regular pumpkin pie shows the following: Calories 122 vs. 186. Fat 0.9 gm vs. 5.2 gm. Cholesterol 0 mg vs. 67 mg. Sodium 49 mg vs. 72 mg. Protein 4 gm vs. 5 gm. Mori-New Lite contains only 1 gram of fat per serving and has a 6:1 protein to fat ratio. Address: 2050 W. 190th St., Suite 110, Torrance, California 90504. Phone: 310-787-0200.

10451. Segal, Mara. 1993. Food for thought: From the Co-Op's Spoons take-out kitchen. *Co-op Newsletter* (*Arcata, California*). Nov.
• ***Summary:*** Gives a recipe for "Tofu turkey" [vegetarian], that uses 5 lbs. of Tofu Shop tofu. A photo shows Mara Segal in a large kitchen. "'Spoons' is the Arcata Co-op's own take-out kitchen, featuring 'convenient cuisine'–delicious salads and entrees made with locally grown and organic ingredients whenever possible. Mara Segal is the kitchen manager at

© Copyright Soyinfo Center 2013

Spoons.

Talk with Matthew Schmit. 2009. March 6. The Tofu Shop was very close to the Arcata Co-op–which is a large organization. The Shop used to make the Tofu Turkey for the annual co-op employee Thanksgiving dinner, and give it to them so they would have a vegetarian alternative; they did that every year for years. Then Mara stepped in, started making the Tofu Turkey for her fellow employees, and adapted and improved the recipe; she never sold it. Matthew thinks she had been making it for at least several years before this article was written. Her improvement was later adopted by Bob Meeks. What she did, and what Mathew is doing now, is to mash fresh tofu, add spices and flavors, then mold and press it into a colander bowl, then put the stuffing in a hollowed-out cavity, then put more tofu over the bottom of that. Address: Staff.

10452. Vegetable Protein Specialists Inc. 1993. New World Foods (Leaflet). Santa Fe, New Mexico. 2 p. 28 cm.
• ***Summary:*** New World Foods are unique in four ways: 1. They use native crops of The Americas–corn, beans, potatoes, tomatoes, and chiles–in every product. They use patented, soya-based "Befine" [made from tofu] in place of ground meat. "Befine is a chewy, tasty, satisfying meat replacer, yet is has only a small fraction of meat's saturated fat..."

New World Foods are made with organically grown crops whenever possible, to protect the soil and the environment. The company offers the following retail products, and licensing of their Befine process: Red Chile Tamales, Hearty Chili, Vegetarian Chorizo, Green Chile Stew, Red Chili Sauce, Green Chile Sauce.

A full-page color photo on the opposite side of the leaflet shows each of these foods

Talk with Richard Jennings. 1994. Niv. 15. Each of these products contain Befine, which was formerly named Soy Rico. Address: 2889 Tradeswest Road, Santa Fe, New Mexico 87501. Phone: 505-471-8979.

10453. *Vegetarian Journal's Foodservice Update.* 1993. Test your nutrition knowledge. 1(1):2. Fall.
• ***Summary:*** One of the 5 questions asks: Tofu is high in fat–True or false? The answer is False. Tofu has only about 4 grams of at per 3-ounce serving compared with about 20 grams of fat in the same weight of beef. Mori-Nu Lite Tofu contains only 1 gm of fat per 3 oz serving.

10454. Wheatley, Georgia. 1993. An American vegetarian resource directory: Some signposts on the journey towards a healthier, more ethically and environmentally balanced lifestyle. Ferguson, Missouri: WheatSong Press. 94 p. Nov. Index. 22 cm.
• ***Summary:*** Contents: 1. Audio/Visual resources: Audio, video, tape producers/distributors. 2. Cookbooks (248 citations). 3. Electronic resources: Internet sources (America Online, Compuserve, Public Dialup Internet Access List compiled by Peter Kaminski), vegetarian sources accessible from the Internet (rec.food.veg, fat-free, veggie {send email to the Internet address listserv@gibbs.oit.unc.edu}, granola, world guide to vegetarianism, AR-Talk, AR-News), other electronic vegetarian sources (Genie, Prodigy). 4. Family and children's resources: Audio, activities, books, cookbooks, periodicals, video. 5. Mail order products. 6. Organizations and groups: National, local organizations listed alphabetically by state and city, starting your own group. 7. Periodicals, journals, and newsletters. 8. Publishers/distributors. 9. Radio/television resources: Radio, television. 10. Resource books. 11. Travel resources.

Note 1. This is the earliest document seen (July 2007) that mentions the Internet in connection with soyfoods or vegetarianism. Note 2. A new edition was published in Aug. 1996. Address: P.O. Box 35009, Ferguson, Missouri 63135. Phone: (314) 524-0894.

10455. **Product Name:** Meatless Jumbo Franks (Hot Dogs).
Manufacturer's Name: White Wave, Inc.
Manufacturer's Address: 1990 North 57th Court, Boulder, CO 80301. Phone: 303-443-3470.
Date of Introduction: 1993. November.
New Product–Documentation: Talk with Lon Stromnes. 1993. Feb. 9. This product, which may be named Fat-Free Meatless Healthy Franks (Hot Dogs), will be launched in about April 1993. It will contain no eggs.

Talk with Lon Stromnes. 1993. April 14. This product will probably not be on the market until about late May. The product has been redesigned to be about 98% fat free. Also, their Meatless Healthy Franks is coming out in an improved formulation with much better texture.

Product Alert. 1993. Oct. 11. Jumbo Meatless Healthy Franks have been added to the White Wave line of refrigerated meat substitutes.

Talk with Lon Stromnes. 1994. Feb. 21. This product, called Meatless Jumbo Franks, was launched in Nov. 1993.

10456. Cole, Sidney J. 1993. Changes at DE-VAU-GE (Interview). *SoyaScan Notes.* Dec. 6. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** DE-VAU-GE (DVG) has stopped making soymilk [actually they plan to stop in early 1994] and therefore also tofu. It was an economic decision. When the Adventist church sold Granose Foods in England, that cost DVG about 40-50% of their soymilk market. DVG still sells and distributes both soymilk and tofu under their GranoVita brand, but they buy the products from other manufacturers. The soymilk may be made by Alpro in Belgium. DVG still manufactures many other soyfoods, such as the soy protein foods, the canned meatlike products, etc.

DVG is still a strong company that is growing rapidly

© Copyright Soyinfo Center 2013

and Michael Makowski is still the general manager. He calculated that he can do better financially by using his factory space to make Corn Flakes rather than soymilk. If DVG keeps up their current growth rate, they may soon pass Australia's Sanitarium Foods as the leading Seventh-day Adventist food company in terms of sales. The church has no plans to sell DVG, and in fact the church is looking to support its food industries quite strongly now.

The decision to sell Granose was made at the local division level, not at the General Conference level. Sidney personally would have preferred that the church not sell Granose, but at least they did sell it at the right time and to a good buyer–the Haldane Foods Group. The products, the company, and the philosophy are all in good hands.

Eric Fehlberg retired about 2 years ago as director of the Seventh-day Adventist International Health Food Assoc. Dr. Cole took his place, and he has also kept his job in Miami at the Inter-American Division. Address: Director, International Health Food Assoc., P.O. Box 140760, Miami, Florida 33114-0760. Phone: 305-443-7471.

10457. Makowski, Michael. 1993. Soymilk at DE-VAU-GE and in Europe (Interview). *SoyaScan Notes.* Dec. 8. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** DE-VAU-GE (DVG) has not yet stopped making soymilk; they had planned to stop during late 1993 and they hope to definitely stop during 1994. They stopped making tofu and Tofu Cream 2 months ago, but they continue to sell tofu; they now buy it from another company [Heuschen-Schrouff in the Netherlands]. DGV decided to stop soymilk production because of the large drop in demand after Granose was sold.

Their problem is to find a partner to produce soymilk for them. This other company must make a good quality product at a reasonable price, must have a large enough capacity to supply their needs (they plan to continue to sell the same soymilk products they are selling now), and must be willing to buy their used soymilk equipment at a reasonable price (this is the main sticking point).

There are not many large soymilk manufacturers in Europe. Alpro in Belgium makes and sells about 32 million liters/year in all the different sizes and flavors. Sojinal in France makes about 5½ million liters/year, and DE-VA-GE makes about 4 million liters/year. Other active soymilk manufacturers include Liquats Vegetal S.A. in Viladrau (near Girona), Spain (which started about 1 year ago and makes their soymilk from whole soybeans; they are a private company), several small manufacturers in England (but their quality is not acceptable), and Soyana in Switzerland. In Michael's opinion, the quality of the soymilk made by Alpro and DVG are more or less the same.

The British market for soymilk is by far the biggest in Europe, comprising about 50-60% of the total European market. Belgium, France, and Germany come next and are all about the same size. Then come Italy and Spain.

In Europe, 80% of all soymilk is sold plain–unsweetened and unflavored; it contains only soybeans and water. Then there are the sweetened types, which are sweetened with sugar, honey, or grape juice. The main flavored types are chocolate, vanilla, or strawberry. Then there are three flavors of dessert puddings: Chocolate, vanilla, and strawberry. That's all. Address: General Manager, DE-VAU-GE Gesundkostwerk GmbH, Postfach 1660, Luener Rennbahn 18, D-2120 Lueneburg. Phone: (04131)-303-145.

10458. Pierce, Michael. 1993. Update on Wildwood in Fairfax, California (Interview). *SoyaScan Notes.* Dec. 8. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Wildwood's sales are now $150,000/week including products made by other companies. The little tofu shop in Fairfax has been closed and all the tofu is now made in Santa Cruz. Wildwood still assembles sandwiches in Fairfax but at a different location. Address: Graphic designer, 408 2nd St., Macon, Georgia 31201. Phone: 912-752-8083.

10459. Hamel, George "Buddy." 1993. White Wave's early ownership structures, sources of capital, and employees (Interview). *SoyaScan Notes.* Dec. 17 and 20. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Steve Demos founded White Wave in the fall of 1977 as a sole proprietorship. After about 3 months, he was in need of money, so he invited other people in Boulder to join as working partners in the company by investing $2,000 each. Soon White Wave became a partnership, owned by seven partners who all joined at about the same time: Steve Demos, Ginny Demos (Steve's wife), Pat Calhoun (who came from California), George "Buddy" Hamel, Laurie Singleton, Trudy, and Fred Claire. Fred Claire (who was about age 30 and worked for Intel) only invested money ($5,000); he did not work at White Wave. Six of the seven partners had equal percentage ownership of the company; Fred Claire owned only about 10%. Charles "Chip" McIntosh arrived later.

Buddy is quite sure that the shop on Pearl Street had not been going for more than 3 months when the partnership began, and he is equally sure that he worked in the shop on Pearl Street as a partner for at least 9 months before he and the company moved to Walnut Street. Buddy was in Boulder before Pat Calhoun arrived.

The partners met periodically to make decisions. There was a written agreement with each partner that they must work for 2 years (at relatively low pay) in order to "vest their interest." If they left before that time, the partnership would pay back their $2,000. After several months Trudy, then Laurie left. The partnership did not have the funds to pay back their $2,000 at that time, but it did promise to pay as soon as possible. When these two women left, the percentage ownership of the remaining 5 members increased

© Copyright Soyinfo Center 2013

proportionally to total 100%. After a while Laurie (now somewhat upset) wrote White Wave asking the company to please pay back her money. Buddy remembers Steve reading this letter at a company meeting and saying the company might have to go to court with her. Eventually she got back her $2,000. Buddy remembers working very hard at White Wave for about the minimum wage. He believes that these 5 committed workers, working for 2 years at low wages, was a key factor in White Wave's growth and success. Steve as a difficult person to work with (somewhat arrogant and dictatorial), and he thinks that may have been one reason Laurie left.

In the fall of 1978, a year after White Wave had opened, the company's manufacturing operations moved into a much larger building on Walnut Street in Boulder, while still keeping a deli and retail outlet on Pearl Street. Buddy also moved to Walnut Street and worked there for more than a year.

Then in October 1980 White Wave became a corporation. Steve wanted to incorporate, so he met with an attorney named Mike Sutton, who is now on the board of directors. Steve incorporated the company before getting permission to do so from the other partners–even though the matter had been discussed. Buddy recalls being informed by Demos of the incorporation on his (Buddy's) birthday, October 24, 1980. It must have been 1980, because Hamel was in Boulder on 17 May 1980 when Shurtleff and Aoyagi lectured on tofu in a large theater there. After incorporation, in about Jan. 1981, there were meetings of the partners to pass the articles of incorporation and sign the papers. The partnership percentages were converted into equal percentages of stock. There were two types of stock–common stock (owned by the working partners) and preferred stock (owned only by Fred Claire). Buddy recalls that at the first meeting Fred Claire was upset and objected publicly because he got only 10% of the preferred stock.

In about March 1981, shortly after the incorporation, and shortly before White Wave expanded into its next plant (which had formerly been occupied by Mountain High) Buddy left White Wave and moved to California to start a tofu company, Clearway, in Santa Cruz. He had put in his two years of working time but since White Wave wasn't worth much, he decided to hold onto to his White Wave stock as a long-term investment. Steve told Buddy, before Buddy left Boulder, that he wanted the right to buy Buddy's common stock and convert it to preferred stock. Buddy asked: "Will that happen?" Steve replied, "I don't see why not." Buddy agreed to the idea and it was then written down as one of the articles of incorporation. Colorado has very liberal corporation laws, similar to those in Maryland, on this key point of calling common stock.

Buddy started to make tofu at Clearway in California well over a year after he left Boulder. At about the time he did start to make tofu in California, Steve phoned Buddy unexpectedly and said he wanted to buy Buddy's stock for $2,000. Buddy said that was what he paid for the stock, and he felt it was now worth more. Buddy said he wanted to keep his investment that he had worked for. Steve said he had the right to buy back the stock, whether Buddy wanted to sell it or not, due to the clause they had agreed on before Buddy left Boulder. Steve hung up. Then Buddy got a letter from Steve. Buddy went to Boulder to take White Wave to court. He secured a lawyer in Colorado. Steve offered Buddy $6,000 for his stock (Buddy is sure of the $6,000 figure) payable at $2,000 a year over 3 years. Buddy agreed to the amount but he did not want it paid over a 3-year period. Steve didn't agree. So Buddy took White Wave to court. By now Buddy had decided that he wanted to hold on to his stock. During the trial, White Wave was unable to produce the written partnership agreement. Fred Claire, who was also upset, appeared in court and testified on Buddy's behalf. The case went to the Colorado Supreme Court. Buddy feels that he lost the case because he had a rather unskilled, low-priced attorney, who did a poor job. In the end, Buddy got only $2,000 back and had to pay all his attorneys fees, so he lost in a big way. Address: Owner, Clearway, 209 Redwood Rd., Corralitos, California 95076. Phone: 408-728-9335.

10460. Demos, Ginny. 1993. Recollections of the early history of White Wave (Interview). *SoyaScan Notes.* Dec. 19. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Ginny, Steve's Demos wife, worked for White Wave during its first few years at both Pearl Street and Walnut Street. At Walnut street she packed a lot of tofu–with her son. She hasn't worked there since the days when she was one of the partners. She had one child, Emmet (now age 14) when she first worked there; she stopped work before her second child, Erin (a girl, now age 11) was born.

Why did Steve decide to change White Wave from a sole proprietorship to a partnership? Ginny recalls that the main reason was the need for money, plus "he needed people who he could count on being there." That was the reason for the requirement that partners stay for 2 years. Steve needed both money and workers, but Ginny recalls that the money was more important since White Wave was severely undercapitalized at the outset. Ginny feels it is very possible (but she is not sure) that all 7 of the people who became partners were already working for White Wave before they became partners. Address: Boulder, Colorado 80301.

10461. Demos, Steve. 1993. More on White Wave's early ownership structures, sources of capital, and employees (Interview). *SoyaScan Notes.* Dec. 19. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Steve started White Wave as a sole proprietorship in a small space on Pearl Street. He hired employees to help make tofu and tofu products. The first employee was Pat Calhoun. The company changed to a

© Copyright Soyinfo Center 2013

partnership after about 1 year at about the time of the move to Walnut Street. "The motivation wasn't money–nobody had any. The motivation was commitment. You can either use sweat equity or you can use money to accomplish the same thing. My intention was to get people equitably involved and committed to the project, and to have them take on responsibility. It is very hard to find people who really understand what that means. It is very important to understand the change to a partnership in the context of the values and mentality of the 1960s and 1970s. I was just trying to take the mentality and apply it to business. The 'small is beautiful, everybody's equal, group decision making process'–all those romantic concepts were very influential. It was the old leftover tribe mentality." The the original partners were all employees at the time the partnership structure was created, and it grew out of discussions among Steve and the employees as to the best way to shift gears. Steve decided that "the philosophically correct position for running a late 1970s company was to get out of sole proprietorship and into a new structure." He conceived of and offered the idea of the partnership, with a commitment of both time and money. During the early years the company was making money–enough money to finance the move to Walnut Street and everything else. It was the third move (to the old ice cream factory) that challenged the profitability of the company. The money was not something the needed for a specific purpose; for example, George Hamel contributed part of his money in the form of an old Honda that the company used as a delivery vehicle. There is absolutely no question about the fact that the money was less important than getting people involved with the company and committed to it.

Chip McIntosh was not one of the partners, but he was the first employee who arrived after the partnership began. "I'll never forget it. He came in with a bandana strapped on top of his head. He looked me in the eye and said: 'I want to learn how to do this, and I'm the right person for your company.' Chip arrived while we were installing equipment at Walnut Street, before White Wave started making tempeh. I believe Chris O'Riley was our first tempeh maker. Chip has always been our 'food man' so to speak. He is now back with White Wave as quality assurance manager; he returned about 6 months ago.

Note: Shurtleff and Aoyagi spoke twice in Boulder. The first program, on 18 or 19 Jan. 1976, was sponsored by Spinning Kitchen [or maybe David Bolduc and Green Mountain Grainery] at the Unitarian or Presbyterian Church located at Spruce and Pine streets. The second program, on 17 May 1980, was in the Boulder Theater, sponsored by White Wave in order to introduced soyfoods and their company to Boulder. In addition, Shurtleff visited Boulder with Wataru Takai in early August 1978, saw the White Wave tofu shop and deli in operation on Pearl Street, and met Steve Demos for the first time. Address: President, White Wave Inc., 1990 North 57th Court, Boulder, Colorado 80301. Phone: 303-443-3470.

10462. Demos, Steve. 1993. New developments at White Wave (Interview). *SoyaScan Notes.* Dec. 19. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** White Wave is about to rent the Boulder Theater for a town party in May 1994 to show the people of Boulder what the company is doing. "We're renaming Boulder 'Tofu Town.'"

Steve recommends that Shurtleff go to Whole Foods Market's store in Berkeley, California, where there is now a White Wave Vegetarian Cuisine Center. They have a "shelf set" developed as the first prototype for the United States. The set is fully integrated into the store's dairy case; it is not a stand-alone unit. In Berkeley, the set is placed in between amazake and tortillas. There may or may not be dividers on both sides. It contains about 46 facings of White Wave products in an organized fashion, in groups such as meat alternatives, dairy alternatives, cheese alternatives, tofu, tempeh, etc. The term "Vegetarian Cuisine," which does not contain the word "soyfoods" or the word "protein," opens the products to a broader category and it elevates the foods to a higher level than just basic proteins. White Wave has had a dozen cartoon characters made up for the set; they deliver the basic information on soyfoods and ecology, soyfoods and cancer, soyfoods and heart disease, etc. There are individual 3 by 5 inch info-cards printed on both sides. Sources of more information are given on each card. White Wave installed their first sets during the first week in November in the 3 Whole Foods stores in the Bay Area–Berkeley, Palo Alto, and Mill Valley. Berkeley is the best of the three. During the first month, the lowest increase in sales was 160% and the highest was 1,000%.

"We are calling this 'category management' or 'category shelf management.' This is what Walmart is. This is the science of merchandising and marketing. Its a whole new game–and so exciting. We spent a year taking photos of natural and health food stores around the United States, and we realized that there was no organizational schematic to the evolution which has taken place as products evolved from tofu to tempeh to soymilk, to second generation soy products, and now a new generation of vegetable protein products in which various proteins are blended/extended–e.g. wheat protein and soy protein, or products resembling milk or ice cream (like Rice Dream) made from rice.

White Wave will soon be coming out with a new line of gluten-based luncheon slices; another company will make some of these products. White Wave may perhaps buy another company.

"Concerning our new shelf set, we're going into natural and health food stores and saying 'We occupy 18 square feet (or that many cubic inches). Our turn rate is X, our profitability factor is Y, and our average sale price is Z.

© Copyright Soyinfo Center 2013

Here's our product mix and her's what we're doing.' You'll see national ads on this in February.

"We'll be ready to go into supermarket chains when they call us and say 'We want your products and you don't have to pay slotting fees.' We will not pay slotting fees. You invest in either a pull or a push. I am against the push mentality. When the chains call you, it means that the market is ready for your products. If you push in, you run the risk of being premature. Legume is a good example of that.

Steve has visited a number of Safeway stores in California and he feels Safeway is very interested in his products and shelf set. Each set costs about $500-$700 per store in time and hardware and logo–not including the food products. So Steve must proceed slowly and carefully in getting into supermarkets. He will probably start with supermarkets in college or university towns. From there he will gather statistics on sales and profitability. He will move very slowly, starting with stores in markets with the right demographics, first down the West Coast, then across the Sun Belt, then over to the East Coast and up. Steve will probably have 3 sizes of sets. The smallest set will contain only the fastest moving items. Steve can get into the dairy case of a supermarket only if he can prove that he can deliver more profit per unit of shelf space. They will take a 30-35% margin, and he hopes to do $60,000 in sales per store per year.

Right now the company is shut down and they are installing all new equipment. The equipment is made by a variety of manufacturers (some from Takai, some American, some German), and it will have a capacity of 1 ton/hour of tofu. They have just installed what is probably the largest curding carousel in the United States. They made tofu on Dec. 16-17 to test the equipment, and Steve is very optimistic that the learning curve will be short. "Wataru Takai is arriving in Boulder today. Tomorrow all the big-time pasteurization and spiral chilling equipment will be installed. I've never seen a soyfoods company that uses this type of equipment. We also have fancy packing machines, a lot of vacuum packing and water packing machines.

"Sales of White Wave's basic seitan, sold in a tub, are increasing rapidly. We are already selling thousands of pounds a week."

White Wave is now right in the middle of their waste-water nightmare. Fortunately the city of Boulder has given us the okay for our new construction and equipment. The plant will be done by the middle of January. The last phase is the solar employee lounge out front. The city has beaten up on us for the last year on environmental issues. Only Pat Calhoun's persistence got us through it by wearing out the city's bureaucracy. One day they threw their hands up and gave us all the permits.

"We are at a critical mass point as of 1 Jan. 1994. We have a new factory (high-output and very sanitary), a new production system, and a new marketing scheme and schematic in place based on reproducible, verifiable numbers. We are ready for takeoff. I'm very excited. We're all dressed up for the party. I now have what we were dreaming about 15 years ago."

Note: In the opinion of Soyfoods Center, White Wave is currently, and has been for at least the past 5 years, the most innovative soyfoods company in America. Address: President, White Wave Inc., 1990 North 57th Court, Boulder, Colorado 80301. Phone: 303-443-3470.

10463. Kashama, Johnny. 1993. Re: Tofu-Rwanda s.a.r.l. Questions answered on Soyfoods Center questionnaire and returned to SC on 22 Dec. 1993. 3 p. Handwritten, without signature. [Eng]

• ***Summary:*** The following is based on a interview with Mr. Jean-Pierre Cadran, technical assistant in charge of the Tofu-Rwanda project (*Projet Valorisation et Transformation du Soja*). This company was founded in Feb. 1990 for the improvement of the diet of the people of Rwanda by the introduction of a new product of high nutritive value. A private society of limited liability (s.a.r.l.), 51% the shares are owned by 3 Rwandese men (Mr. O. Murenzi, Mr. L. Gahamanyi, and Mr. F. Gasengayire) and 49% by a French non-governmental organization (NGO) named CIDR (*Centre International de Développement et de Recherche;* the International Center for Development and Research). In July 1991 the company started to make and sell soyfoods, starting with tofu.

The soybean was introduced to Rwanda in 1927 (see Lejeune 1938). In 1980 in Rwanda soybeans were processed only by one company into flour and oil, and this company failed because of bad management. A new type of processing was introduced in 1984 when CIDR began studies on tofu. Tofu-Rwanda was the first company to make tofu in Rwanda. The company has been moderately successful (but has not grown) because tofu is a new product, yet it is easy to use, and most of the people living in cities can afford it. Their main business problem has been the devaluation of the Rwandese franc by 120% over the last 2 years. The company presently makes five soy products: Tofu, Tofu Croquettes (triangles), Tofu Fritters (balls 2 inches in diameter), Okara Crackers, and Soymilk (which is sold only to people who come to the shop with their own container). Of these, tofu is the best seller. A number of the products have no labels. he tofu is sold directly from the factory. None of the products are sold refrigerated.

The company employs 6 people; 1 manager, 2 production workers, and 3 office and other workers. Their plant contains 146 square meters of production space and 41 square meters of office space. Net sales last year were 1,600,000 Rwandese francs (=US$11,000). The net worth of the business is 2,700,000 Rwandese francs (=US$18,600).

There is also another company in Kigali, Rwanda named Duhamic-Adri that makes a product named *Imvange-Sosoma*

© Copyright Soyinfo Center 2013

containing soybeans, sorghum, and maize. Address: c/o Tofu–Rwanda, P.O. Box 1906, Kigali, Rwanda. Phone: 758-82607.

10464. Randjelovic, Sladjan. 1993. New developments with tofu in Yugoslavia and Czechoslovakia (Interview). *SoyaScan Notes.* Dec. 29. Conducted by William Shurtleff of Soyfoods Center. [Eng]

• ***Summary:*** Randjelovic called from Serbia, in Yugoslavia, where he is setting up a tofu company that he plans to name Randjelovic. He is looking for source of organic soybeans. His friend named Vacek runs Sunfood in Dobruska, Czechoslovakia (about 75 miles east northeast of Prague near the border with Poland), and his friend is also an agent for Mitoku Macrobiotic Foods. In Prague, Czechoslovakia, someone is starting an automatic tofu plant using Takai equipment. Address: Randjelovic, D. Damjanovica #17, 11460 Barajevo, Yugoslavia. Phone: 381-11-610-088.

10465. Ontario Soybean Growers' Marketing Board. 1993. Annual report. Box 1199, Chatham, ONT N7M 5L8, Canada. 27 p. Dec. 28 cm.

• ***Summary:*** This is a report for the year 1993. Contents: Mission statement. Chairman's message (Ron MacDougall). Secretary manager's message (Fred Brandenburg, Dec. 1993). OSGMB summary of major activities in 1992. Auditor's report and balance sheet. 1993 soybean & research funding (incl. breeding of soybeans for tofu and natto). Ontario soybeans–supply and demand, 1990-1993. Soybeans: Area, production and farm value, by county, 1992, with provincial totals [including county and district totals], 1986-1992. Ontario marketings, 1990-92. Ontario soybeans: Production, crushings, imports, exports. 1992 crop year marketings by county. Ontario soybean production history, 1942-1993. Ontario soybean exports by destination in metric tons. Soybean meal: Canadian imports and exports. Soybean oil: Canadian imports and exports. Quality of the 1992 soybean crop by county (in terms of mean oil content and mean protein content). Cash prices for Ontario soybeans (1990-1994). Ontario basis values (cents over futures). Weekly adjusted producer basis. Soybean supply and demand, 1990-1994: USA, world. OSGMB appointments for 1993 (officers and committees). 1993 district committee members of soybean board. Address: Chatham, ONT, Canada. Phone: 519-352-7730.

10466. **Product Name:** Herb Smoked Tofu [Organic].
Manufacturer's Name: Smoke & Fire Natural Foods.
Manufacturer's Address: 955 S. Main St., Great Barrington, MA 01230. Phone: 413-528-6891.
Date of Introduction: 1993. December.
Ingredients: 1998: Organic tofu (Soybeans, water, nigari and/or calcium sulfate), organic tamari, organic apple cider, herbs and spices, natural wood smoke.
Wt/Vol., Packaging, Price: 5.5 oz (156 gm) vacuum pack. Retails for $2.15 (1998/07, Massachusetts; Range: $1.89 to $2.50).
How Stored: Refrigerated, 90 day shelf life (at 34-36ºF).
New Product–Documentation: U.S. Soyfoods Directory. 1998. Feb. New company listing, p. 27. Talk with José Antunes (pronounced jo-ZAY ahn-TU-nays), founder and president, who is Portuguese. 1998. June 29. He has an invoice [of which he sent a copy to Soyfoods Center] showing that he started making and selling smoked tofu on 1 Dec. 1993 at 955 S. Main St., Great Barrington, Massachusetts, 01236. The first sale was to Morganicus; 10 cases at $22.50 per case. The company was located in a fish smokehouse at this time until Nov. 1996. He incorporated the company after this first product was launched. His friend, Sjon Welters, told him that smoked tofu was widely made in Europe, but that it was plain, not flavored. Sjon gave him a copy of *Tofu & Soymilk Production* by Shurtleff & Aoyagi, He buys his tofu from a tofu manufacturer. His first product was Herb Smoked Tofu. He now makes five flavors of smoked tofu: Herb, Lemon, Barbecue, Thai, and Sea Vegetables (introduced in Dec. 1997). Each product is 5½ oz. and vacuum packed. The average retail price is $2.19; the range is $1.89 (at Trader Joe's) to $2.79 (out of state). Interest in his products is growing rapidly; he basically has a fan club. In about 1993/94 he moved the company to its present address: P.O. Box 743, Great Barrington, MA 01230.

Products (five flavors) with Labels kindly sent by UPS refrigerated by José Antunes. 1998. July 8. Label for Herb: 2.5 by 3.75 inches. Self adhesive. Green, orange, red, and white on black. Front panel text: "Naturally cured in a real New England smokehouse. Serve as is or in prepared dishes. Imparts a delicate smoked flavor when used in cooking. Please refrigerate." On the back panel are Nutrition Facts, ingredients, and an invitation to get in touch by e-mail or to visit the company's web site at http://smokeandfire.com. Soyfoods Center taste test. 1998 July 11. Organoleptic scores: Herb, Lemon-Garlic, and Sea Vegetable all = 10 (the top score). Thai = 9 (could market it like a hot dog). BBQ = 7 (too spicy for our tastes). These some of the most delicious tofu products we have ever tasted! The package design is also excellent.

Talk with José Antunes. 1998. July 14. These are excellent products. He does not buy his tofu from Nasoya because their tofu is not firm enough. The product has a shelf life of 90 days from the day of processing if stored at 34-36ºF. His best-seller is Herb, followed by Thai, then BBQ and Lemon-Garlic (tied for #3), and sea vegetable (which is also the newest product, launched in early 1998). The products were introduced in this sequence: Herb (Dec. 1993), Lemon-Garlic (1994), BBQ and Thai (1995). and Sea Vegetable (early 1998). The idea for these products came to José in the summer of 1993 when he was working for a smokehouse that smoked fish. One day he decided to try

© Copyright Soyinfo Center 2013

smoking some tofu that he had marinated with herbs–just like the fish. It turned out very well. For about a year at this time, just as he was going through a divorce and was under great personal stress, he received many amazing insights into life and good things started happening. "It was just like a revelation." He had not heard of smoked tofu at the time. He first heard of tofu through macrobiotics–which he began studying in 1974 in Portugal. After he got out of the air force (in Africa) and was sick with typhus and in the hospital for several months, he read a book by George Ohsawa. He continued his studies at the Community Health Foundations and Kushi Institute in London, England, in 1974-76 with Bill Tara; there he first learned about tofu and amazake. Then he studied in Boston. Being very independent, he wanted to create his own business. He had learned how to make amazake at cooking classes in the Kushi Institute in Boston. So in about 1981 in Boston, he and his ex-wife, Melissa Crane Morehouse, started making amazake at their home and selling it at the first Erewhon store and the first Bread and Circus store. Their amazake business was named Infinity, and it lasted for only about eight months. He is now working to develop a savory herb smoked tempeh (probably the first in the world; Lightlife's smoky strips are not really smoked, but just smoke flavored); he sold a little in early 1998, but he has no label yet. It will be more expensive than smoked tofu and probably will not sell as well. His business is expanding rapidly, and he wants to get more distribution in California and the western USA. Last year he had a booth at the Natural Products Expo. He served the smoked tofu sliced, on a toothpick.

Letter from José Antunes. 198. July 20. His company is presently smoking about 2,400 lb/week of tofu. This letter contains photocopies of the earliest invoice showing that each different flavor or product was sold. From 1 Dec. 1993 through 7 Nov. 1996 his company leased space in the fish smokehouse where the product was created. On 8 Nov. 1996 they moved into their own production facility (at 1885 North Main St., Sheffield, Massachusetts 01257) after installing a smokehouse and vacuum packing machine. Their corporate offices are listed as being at 21 Mechanic St. in Great Barrington–which is the office of José's accountant and partner.

10467. *SoyaCow Newsletter* (*Ottawa, Canada*). 1993. Russian Soybean Association launches soyfoods initiative. 2(4):1. Oct/Dec.

• ***Summary:*** In December, Krasnodar, a city in southern Russia, hosted a warm reception for the first SoyaCow ever to penetrate the former Soviet Union. Krasnodar is the center of a major agricultural "breadbasket" for Russia and soybeans are a leading local crop–which has traditionally been grown mostly for animal feed and oil extraction.

The Russian Soybean Association, ASSOY, had arranged for a SoyaCow demonstration, attended by local staff, VIPs, and the media. "The line-ups for samples of fresh soymilk and tofu proved that an entire new food category could be embraced spontaneously by one of the world's major cultures." A photo shows Frank Daller demonstrating SoyaCow to Alexander Podobedov, director of ASSOY.

Note: Talk with Frank Daller of The SoyaCow Centre. 1994. Aug. 22. Mr. Podobedov (pronounced po-DOE-buh-doff) can be contacted at ASSOY, Ul. Mirra 28, 350063 Krasnodar, Russia. Phone: (7) 8612-525614; Fax (7) 8612-540081.

Krasnodar is in southern Russia at about 45º N latitude (about the same latitude St. Paul, Minnesota), just east of the Black Sea. It is the capital of the Krasnodar Krai, a Territory of the Russian S.F.S.R.

10468. **Product Name:** Fat-Free Soya Kaas (Cheese Alternative Containing Casein) [Mozzarella Style, Jalapeño Mexi-Kaas, or Mild American Cheddar Style].
Manufacturer's Name: Swan Gardens, Inc. Distributed by American Natural Snacks.
Manufacturer's Address: Manufacturer: 6029 Lagrange Blvd., Atlanta, GA 30336. Distributor: P.O. Box 1067, St. Augustine, FL 32085. Phone: 904-824-8181.
Date of Introduction: 1993. December.
Ingredients: Mozzarella Style: Tofu (organic* soy milk, calcium sulfate); caseinate, milk protein; corn starch**; natural flavors; sea salt; lecithin; lactic acid; cellulose, carrageenan, and guar gums. * Organic ingredients are grown and processed in accordance with the California Organic Foods Act of 1990. ** Modified by simply dividing/fractionating; not chemically altered.
Wt/Vol., Packaging, Price: 12 oz vacuum pack retails for $3.89 (6/86), or 7 lb deli block.
How Stored: Refrigerated.
Nutrition: Per 1 oz.: Calories 78, protein 6.7 gm, fat 5.6 gm, carbohydrates 1.8 gm, sodium 168 mg.
New Product–Documentation: Labels for all 3 products sent by Casey Van Rysdam, President, American Natural Snacks. 1993 (Copyright). Red and green, or red and blue, on white. 4.5 by 3.5 inches. "No cholesterol. Lactose free. Keep refrigerated. May be frozen." The three flavors of Fat-Free were first sold in Dec. 1993.

Letter from Atlanta Kashruth Commission. 1993. Dec. 12. Soya Kaas products are produced under the Orthodox Rabbinical Supervision of the Atlanta Kashruth Commission. The plant in which these products are made is located at 6029 Lagrange Blvd., Atlanta, Georgia 30336.

Leaflet (8½ by 11 inches). Undated. "Why Soya Kaas? Introducing Fat-Free!" In 3 flavors.

10469. Viana Naturkost GmbH. 1993. Sound im Glas [Sound in Glass]. Euskirchen-Kuchenheim, Germany. 6 panels. 21 cm. Company catalog. [Ger]

• ***Summary:*** This stylish, 6-panel company catalog is black,

© Copyright Soyinfo Center 2013

red, and white on pea green. The company now sells many of its products in glass jars and bottles. Mentioned here are: Brown-Rice Miso (*Genmai* Miso) and Barley Miso (*Mugi* Miso). Spreads for breads include Chickpea Spread (*Kichererbsen Pastete,* with shoyu and soybeans), Vegetable Garden (*Gemuesegarten,* with organic tofu), Inka (with organic tofu), Toto (with organic tofu), and Miso Squash Paste.

Note: During 1993-94 Viana purchased modern tofu production equipment from Takai in Japan. Address: Willi Graf Str. 88, 33881 Euskirchen-Kuchenheim, Germany. Phone: 02251/56076.

10470. **Product Name:** Soybean Milk, Hard Tofu Cake, Square Tofu (not pressed), Deep-Fried Triangle Tofu, Tofu Pudding.
Manufacturer's Name: Binh Minh Tofu Manufacturing.
Manufacturer's Address: 1180 Tully Rd., Unit B., San Jose, CA 95122. Phone: 408-279-3655.
Date of Introduction: 1993.
How Stored: Refrigerated.
New Product–Documentation: Talk with Binh Tran, owner and founder. 1996. May 28. He is a Vietnamese-American. Tran is his family name. He started this company in May 1991. His is now the largest tofu maker in San Jose. These products were introduced after the company started. They are all Vietnamese soy products and the labels are entirely in Vietnamese, with no English.

10471. **Product Name:** [Tofu Burgers].
Foreign Name: Crocchette al Tofu.
Manufacturer's Name: Biolab.
Manufacturer's Address: Via dei Grabizio 11, 34170 Gorizia, Italy. Phone: +39 481 533522.
Date of Introduction: 1993.
Ingredients: Partially polished rice, tofu (soy), onions (*cipolle*), carrots, sweet peppers (also called bell peppers; *peperoni*), bread crumbs (*pane grattuggiato*), various spices (3%), sunflower seed oil, salt.
Wt/Vol., Packaging, Price: 300 gm (2 servings of 150 gm each) vacuum packed separately, side by side.
How Stored: Refrigerated.
New Product–Documentation: Label and letter sent by Maura Ghiraldini and owner Massimo Santinelli. 1998. Dec. 5. This label (6 by 2.75 inches) has dark green text on a wavy red, orange, and yellow pastel background. A small blue and white oval logo states: "AgriEco Bio–Organically grown and certified (*Prodotti Biologici–Controllati e Garantiti*)." Refrigerate at 4ºC. A small symbol shows a person recycling the container. This product has been discontinued.

10472. **Product Name:** [Skewered Tofu and Seitan].
Foreign Name: Spiedini di Tofu e Seitan.
Manufacturer's Name: Biolab.
Manufacturer's Address: Via dei Grabizio 11, 34170 Gorizia, Italy. Phone: +39 481 533522.
Date of Introduction: 1993.
Ingredients: Tofu (soy & water), seitan (washed by hand, containing wheat gluten, corn starch, soy sauce, spices), carrots.
Wt/Vol., Packaging, Price: 200 gm vacuum packed.
How Stored: Refrigerated.
New Product–Documentation: Label and letter sent by Maura Ghiraldini and owner Massimo Santinelli. 1998. Dec. 5. This label (5.5 by 4.75 inches) has dark red text on a wavy blue, red, and yellow pastel background. A small blue and white oval logo states: "AgriEco Bio–Organically grown and certified (*Prodotti Biologici–Controllati e Garantiti*)." Refrigerate at 4ºC. A small symbol shows a person recycling the container. This product has been discontinued. It was delicious by too labor-intensive.

10473. **Product Name:** [Soja Harmoniques: Tofu Ravioli with Tomato Sauce].
Foreign Name: Soja Harmoniques: Ravioli au Tofu–Sauce Tomate.
Manufacturer's Name: Biosoja.
Manufacturer's Address: 10 rue Lavoisier, F 68 000 Colmar, France. Phone: 89 74 53 74.
Date of Introduction: 1993.

10476. **Product Name:** [Bjorg Lentils with Tofu].
Foreign Name: Bjórg Lentilles au Tofu.
Manufacturer's Name: Distriborg.
Manufacturer's Address: 217 chemin du Grand-Revoyet, 69230 Saint-Genis-Laval, France.
Date of Introduction: 1993.
Ingredients: Green lentils 40%, smoked tofu 33% (tofu* 93%, soy sauce, spices and seasonings), water, carrots, modified starch, salt, tomato concentrate*, mixture of seasonings.
Wt/Vol., Packaging, Price: 300 gm.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: Label sent by Heather Paine of SoyaFoods in London. 1993. Nov. 3. If you have any questions, contact Distriborg, 217 chemin du Grand-Revoyet, 69230 Saint-Genis-Laval.

10477. **Product Name:** Tofu Spring Rolls, and Okinawa Tofu.
Manufacturer's Name: Fuji Fresh Tofu Co.
Manufacturer's Address: 248 Jackson St., San Jose, CA 95112. Phone: 408-297-1666.
Date of Introduction: 1993.
New Product–Documentation: Talk with Linda Lam, owner of Fuji Fresh Tofu. 1994. April 8. She and her husband introduced these products in 1993. The Okinawa Tofu is made with mushrooms, black fungus, and bean threads.

10478. **Product Name:** Unfried Tofu (Extra Firm), Soft Tofu, Soymilk [Chocolate, or Strawberry].
Manufacturer's Name: Happy Tofu.
Manufacturer's Address: 5231 S.E. Powell Blvd., Portland, OR 97206. Phone: 503-771-2802.
Date of Introduction: 1993.
How Stored: Refrigerated.
New Product–Documentation: Talk with Tom Nguyen. 1994. Nov. 17. Tom is Ann Uong's partner and brother-in-law, married to her sister. He is also Vietnamese. In 1993 Happy Tofu introduced Unfried Tofu (which is extra firm tofu–doufu-gan–in 4-inch squares), Soft Tofu, and soymilk in chocolate and strawberry flavors.

10479. Harcan Kingsoya Co. Ltd. 1993. Veg-A-King (Brochure). Ontario, Canada. 4 p.
• ***Summary:*** This is a portfolio-style leaflet with one insert describing Veg-A-King soy sauce. "Harcan Kingsoya Co. Ltd. is a Chinese/Canadian joint venture company set up to bring you authentic soyfoods and exotic sauces. Our Chinese partner is a leading food manufacturer and exporter in Heilongjiang Province, China." The company has established a manufacturing plant in Scarborough, Ontario, Canada. The brand name is Veg-A-King.

"Veg-A-King soy sauce is our flagship product. We use a traditional recipe which has a long history in China. Brewed naturally from premium soybeans, wheat and bran, it contains no artificial colours or added flavourings."

The company also makes an impressive line of 17 meatlike soyfoods products such as Vege-Beef, Vege-Chicken, and Vege-Shrimp. Pressed tofu is the basic ingredient of these foods. "Through further processing it can be shredded, formed, steamed, deep-fried or smoked to make different delicious foods" for vegetarians. Premium quality Canadian soybeans are used in manufacturing soymilk, tofu, and dried bean curd.

Two photos show foods being made in the factory. Address: 33 Casebridge Court, Units 5&6, Scarborough, ONT M1B 3J5, Canada. Phone: (416) 283-8328.

10480. **Product Name:** Tofu.
Manufacturer's Name: Nature Treats.
Manufacturer's Address: One Phoenix Ave., Kingston 10, Jamaica.
Date of Introduction: 1993.
New Product–Documentation: INTSOY Newsletter (Urbana, Illinois). 1987. April. p. 3. "Visit prompts commercial Caribbean soyfoods venture [Hope Lopez of Nature Treats]. Actual marketing of soyfood products is scheduled to begin by the spring of 1987. Ms. Lopez runs a food store.

Talk with Marlon D'Aguilar, owner of Country Farmhouse Soya Products in Kingston, Jamaica. 1996. May 20. There are no other companies now making soyfoods in Jamaica. One company named Nature Treats started in about 1993, but they went out of business about 2 years later; she [Hope Lopez] is trying to sell him her equipment.

10481. **Product Name:** [Tofu].
Manufacturer's Name: Peter Mayr Tofu.
Manufacturer's Address: Felantix, Mallorca, Spain.
Date of Introduction: 1993.
New Product–Documentation: Letter (handwritten) from

© Copyright Soyinfo Center 2013

Toby and Teresa Perez Coma. 1994. Jan. 5. "My wife and I became fascinated with tofu after living near a tofu shop in Felantix, Mallorca, which unfortunately closed at the beginning of this year [1994]. However Peter is regrouping, working as an electrician, and continues to produce from his house. His address is: Peter Mayr, P.O. Box 93, Felantix, Mallorca.

"He lent us his copy of *Tofu & Soymilk Production* and the result is that we are now in France, setting up a tiny tofu factory on semi-traditional lines."

10482. **Product Name:** [Bjorg Tofu Lasagna].
Foreign Name: Bjórg Lasagnes au Tofu.
Manufacturer's Name: Setrab.
Manufacturer's Address: E111–94538 Rungis Cedex, France.
Date of Introduction: 1993.
Ingredients: Pâte (wheat semolina* and water), water, tomato concentrate*, tofu* 7.3%, carrots, tomatoes, modified starch, soya proteins, grated bread crumbs, salt, onions, sugar, seasonings.
Wt/Vol., Packaging, Price: 300 gm.
New Product–Documentation: Label sent by Heather Paine of SoyaFoods in London. 1993. Nov. 3. If you have any questions, contact Distriborg, 217 chemin du Grand-Revoyet, 69230 Saint-Genis-Laval.

10483. **Product Name:** [Marinated Deep-Fried Tofu Cutlets].
Foreign Name: Fetas de Tofu.
Manufacturer's Name: Soyana.
Manufacturer's Address: Buenos Aires, Argentina.
Date of Introduction: 1993.
Ingredients: Tofu (soybeans, water, coagulant), marinade, oil.
Wt/Vol., Packaging, Price: Vacuum packed.
How Stored: Refrigerated.
New Product–Documentation: Visit with Carlos Planes at Soyinfo Center in Lafayette, California. 2012. Feb. 23. Documents related to this first tofu product he brought and gave to Soyinfo Center: Sell sheet (printed black on white paper; 15 x 10 cm): Nuevas. Soyana: Fetas de Tofu. Cocinadas y Sazonadas, Listas para servir [Cooked and seasoned. Ready to serve]. Carlos says these four little tofu cutlets were vacuum packed.

New label introduced in 2002. Green, white and black on red. 4.7 x 13 cm. "New–Ideal for sandwiches. 150 gm."

A much larger label for the same product, preprinted on a plastic bag, was introduced several years later. The product was now named: Soyana Tofu: Alimento en base a Soja. "Cocido, filetado, sazonado." 18 x 13 cm. Red, black and white on orange. Net weight: 150 gm. He sold one of these products for every 5-6 of his basic tofu.

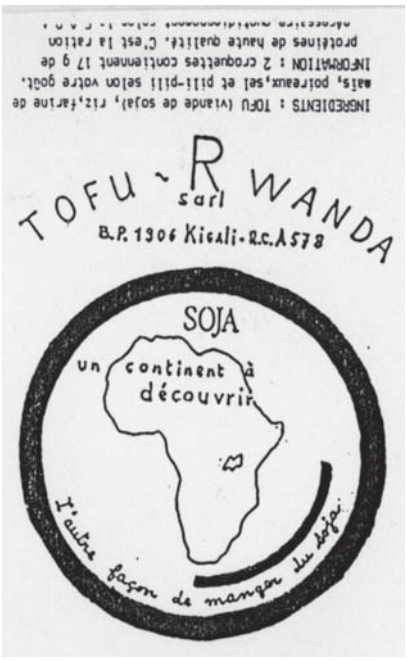
10484. **Product Name:** [Soyana Tofu Escabeche].
Foreign Name: Soyana Tofu Escabeche.
Manufacturer's Name: Soyana.
Manufacturer's Address: Alvear 1754, San Martin, Provincia de Buenos Aires, Argentina.
Date of Introduction: 1993.
Ingredients: Incl. Tofu (soybeans, water, coagulant).
Wt/Vol., Packaging, Price: 350 gm.
How Stored: Refrigerated.
New Product–Documentation: Visit with Carlos Planes at Soyinfo Center in Lafayette, California. 2012. Feb. 23. Documents related to this tofu product he brought and gave to Soyinfo Center: Label for this, his first packaged product. 7.5 x 10 cm. Red, white and green on pink. Carlos says: This fried product was only on the market for a few months.

Note: Escabeche is a typical Mediterranean cuisine which refers to both a dish of poached or fried fish that is marinated in an acidic mixture before serving, and to the marinade itself. The dish is common in Spanish cuisine. It is usually served cold after marinating in a refrigerator overnight or longer. The acid in the marinade is usually vinegar but can also include citrus (such as lemon) juice (Source: Wikipedia, Feb. 2012).

10485. **Product Name:** Superfresh Tofu Avo [Sandwich].
Manufacturer's Name: Superfresh Foods!
Manufacturer's Address: P.O. Box 883551, San Francisco, CA 94188. Phone: (415) 282-4438.
Date of Introduction: 1993.
Ingredients: Sprouted whole grain bread (with organic* wheat kernels), grilled marinated tofu (shiitake mushrooms, red wine vinegar, olive oil, garlic, soy sauce, marjoram, cloves, pepper), avocado, onion, lettuce, alfalfa sprouts, mayonnaise, cracked black pepper. * = Grown and processed in accordance with the California Organic Foods Act of 1990.
Wt/Vol., Packaging, Price: 3-layer sandwich wrapped in plastic wrap. Retails for $3.69.
How Stored: Refrigerated.
New Product–Documentation: Product with Label purchased at Open Sesame in Lafayette, California. 1995. March 11. Label. 3.5 by 3 inches. Black on pink. Illustrations of veggies around the border. Talk with lady from Superfresh. 1995. March 11. This product was introduced in 1993. The company started in the spring of 1992.

10486. **Product Name:** Soya Croquettes, Soy Crackers (With Okara), Fritters.
Manufacturer's Name: Tofu-Rwanda Sarl.
Manufacturer's Address: P.O. Box 1906, Kigali, Republic of Rwanda.
Date of Introduction: 1993.
Ingredients: Croquettes: Tofu (*viande de soja*), rice, corn flour, leeks (*poireaux*), salt, peppers (*pili-pili*).

© Copyright Soyinfo Center 2013



New Product–Documentation: Letter from Mr. Johnny Kashama of Tofu-Rwanda. 1993. Nov. 9. "In Rwanda there is a mini-industry which makes tofu and other products from tofu like crackers (from okara) and fritters and other kind of cakes called in French 'croquettes.'"

Form filled out by Johnny Kashama of Tofu-Rwanda, based on a interview with Mr. Jean-Pierre Cadran of Tofu-Rwanda. 1993. Dec. 21. The company presently makes five soy products: Tofu, Tofu Croquettes, Tofu Fritters, Okara Crackers, and Soymilk (which is sold only to people who come to the shop with their own container). Of these, tofu is the best seller. The Croquettes (for which a Label is enclosed) are made in the form of a triangle of 7.5 cm (3 inches) on each side; the ingredients are: Tofu ("soya meat" = *viande de soja*), rice, corn flour, leeks, salt and peppers (*pili-pili*). "Two croquettes contain 17 gm of high-quality protein." The Fritters (*beignets*) are little balls of about 5 cm in diameter; the ingredients are tofu, wheat flour, eggs, and sugar. The crackers are prepared in many shapes, including birds, hearts, and squares. The ingredients are okara, butter, wheat flour, eggs, and sugar.

10487. **Product Name:** New World Foods Green Chile Stew (With Granular Tofu Curds).
Manufacturer's Name: Vegetable Protein Specialists (VPS), Inc.
Manufacturer's Address: 2889 Trades West Rd., Santa Fe, NM 87501. Phone: 505-471-8979.
Date of Introduction: 1993.
Ingredients: Organic* Befine (soybeans, water, calcium sulfate, caramel color), organic* posole, potatoes, water, home roasted New Mexico chile, corn, carrots, onion, shoyu (water, soybeans, wheat, salt), whole wheat flour, spices. * = Organically grown & processed in accordance with Section 26569.11 of the California Health and Safety Code.
Wt/Vol., Packaging, Price: 12 oz vacuum pack. Or 24 lb. foodservice pack.
How Stored: Frozen or refrigerated.
New Product–Documentation: Leaflet sent by Richard Jennings of VPS, Inc. (Vegetable Protein Specialists). 1993. Nov. 26. "New World Foods."

Talk with Richard Jennings of VPS. 1993. Dec. 1. This product was introduced in 1993. A key ingredient was Rico Soy (small, firm chunks of tofu), which was renamed and trademarked Befine by Sept. 1993.

New Label sent by Richard Jennings. 1993. Nov. 29. 3 by 5 inches. Self adhesive. Green on gold. Illustration of a symbolic Aztec crow. "Low in saturated fat."

10488. **Product Name:** [Viana Spreads for Bread (Chickpea Spread, Vegetable Garden, Inka, Toto, Miso Squash Spread)].
Foreign Name: Viana Brotaufstriche (Kichererbsen Pastete, Gemuesegarten, Inka, Toto, Miso Kuerbis Pastete).
Manufacturer's Name: Viana Naturkost GmbH.
Manufacturer's Address: Willi Graf Strasse 88, 53881 Euskirchen-Kuchenheim, Germany. Phone: 02251/56076. Fax: 02251/75638.
Date of Introduction: 1993.
Wt/Vol., Packaging, Price: 125 gm. Sold in glass jars.
New Product–Documentation: Brochure titled "Sound im Glas," sent by Bernd Drosihn, founder and owner of Viana. 1994. Feb. 14. The ingredients for each spread are as follows (* = organically grown): Chickpea Spread: Chickpeas*, sesame seeds*, peanuts*, apple cider vinegar*, shoyu* (water, wheat, soybeans, sea salt), garlic powder*, herbs*, spices*, sea salt; Vegetable Garden: Tofu*, carrots*, leeks*, vegetable oil*, celery*, sea vegetables, garlic powder*, onion powder*, herbs*, spices*, sea salt; Inka: Tofu*, amaranth*, hazelnuts*, vegetable oil*, vegetables*, herbs*, spices*, sea salt; Toto (Italian): Tofu*, tomato pulp*, vegetable oil, olives*, herbs*, spices*, sea salt; Miso Squash Spread: Squash or pumpkin*, onions*, sesame seeds*, celery*, miso (soybeans*, rice*, barley*, water, sea salt), spices.

Labels brought by Bernd Drosihn of Viana. 1995. March 11. Label for Gemüsegarten. 4.87 x 1.5 inches. Red, black and white on purple. Self adhesive. All are now sold in glass jars.

10489. **Product Name:** [Toto: Tomato Tofu Spread].
Foreign Name: Toto: Tomaten Tofu Pastete.
Manufacturer's Name: Viana Naturkost GmbH.
Manufacturer's Address: Willi Graf Strasse 88, 53881 Euskirchen-Kuchenheim, Germany. Phone: (02233) 41323.
Date of Introduction: 1993.
Ingredients: Tofu*, tomato pulp (*Tomatenmark*)*, vegetable oil, olives*, herbs (*Kräuter*)*, spices (*Gewürze*)*, sea salt. * = Organically grown (*kontrolliert biologischer Anbau*).

© Copyright Soyinfo Center 2013

Wt/Vol., Packaging, Price: 125 gm. Sold in a glass jar.
How Stored: Refrigerated.
New Product–Documentation: Labels brought by Bernd Drosihn of Viana. 1995. March 11. 4.87 x 1.5 inches. Red, white, and black on orange. Self adhesive.

10490. **Product Name:** [Inka: Amaranth Tofu Spread].
Foreign Name: Inka: Amaranth Tofu Pastete.
Manufacturer's Name: Viana Naturkost GmbH.
Manufacturer's Address: Willi Graf Strasse 88, 53881 Euskirchen-Kuchenheim, Germany. Phone: (02233) 41323.
Date of Introduction: 1993.
Ingredients: Tofu*, amaranth (*Amaranth*)*, hazelnuts*, vegetable oil, vegetables*, herbs (*Kräuter*)*, spices (*Gewürze*)*, sea salt. * = Organically grown (*kontrolliert biologischer Anbau*).
Wt/Vol., Packaging, Price: 125 gm. Sold in a glass jar.
How Stored: Refrigerated.
New Product–Documentation: Labels brought by Bernd Drosihn of Viana. 1995. March 11. 4.87 x 1.5 inches. Red, white, and black on grayish green. Self adhesive.

10491. **Product Name:** [Smoked Tofu Spread].
Foreign Name: Fumé: Feine Räuchertofu Pastete.
Manufacturer's Name: Viana Naturkost GmbH.
Manufacturer's Address: Willi Graf Strasse 88, 53881 Euskirchen-Kuchenheim, Germany. Phone: (02233) 41323.
Date of Introduction: 1993.
Ingredients: Smoked tofu* (water, soybeans, smoke), carrots*, vegetable oil*, apple cider vinegar*, herbs (*Kräuter*)*, spices (*Gewürze*)*, sea salt. * = Organically grown (*kontrolliert biologischer Anbau*).
Wt/Vol., Packaging, Price: 125 gm. Sold in a glass jar.
How Stored: Refrigerated.
New Product–Documentation: Labels brought by Bernd Drosihn of Viana. 1995. March 11. 4.87 x 1.5 inches. Red, white, and black on chocolate brown. Self adhesive.

10492. **Product Name:** Antipasto Spread.
Manufacturer's Name: Wildwood Natural Foods.
Manufacturer's Address: 31 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.
Date of Introduction: 1993.
Ingredients: Wildwood Tofu (organic soybeans grown in accordance with the California Organic Foods Act of 1990, filtered water, nigari/magnesium chloride, a natural firming agent), black olives, olive oil, sundried tomatoes, okara (soybean pulp), carrots, celery, zucchini, red onions, garlic, red wine vinegar, salt, parsley, Balsamic vinegar, herbs & spices, guar gum.

10497. Boots, Gypsy; Arthur, Mike; Hopkins, Jerry. 1993. The Gypsy in me! How to look younger and have more energy as you grow older. Camarillo, California: Golden Boots Co. vi + 102 p. Illust. No index. 22 cm.
• ***Summary:*** Contents: Dedication and thanks. Introduction, by Charlie Fox. 1. Natural beginnings. 2. Living in nature. 3. Love and marriage. 4. Hollywood meets health nut. 5. Semi-stardom with Steve Allen. 6. Never too late to rejuvenate. 7. Exercise is a way to live. 8. Vital foods. 9. Eat and drink to your health. 10. Recipes for a healthier you. 11. Traveling through life.

In Chapter 8, titled "Vital foods," the section on legumes includes soy milk, tofu, tempeh, and texturized vegetable protein. Here Gypsy notes that he has always been a vegetarian. Eggs and dairy products once formed a major part of his diet, but now he rarely eats those foods.

Chapter 10, titled "Recipes for a healthier you," contains the following soy-related recipes: Scrambled tofu. Baked soy bean casserole. Tofu mushroom loaf. Tofu burgers. Soy burgers. Soya-rice flour coffee cake (with soy flour). Shakes (with seed, nut, rice, or soy milk). Many other recipes are seasoned with soy sauce. The Gypsy Boots smoothie (p. 93) calls for: 1 cup fresh apple or orange juice. 1 ripe banana. 1 tablespoon Kyo-Green. 1 date or a few raisins.

Contains many photos, both in black-and-white and color of Gypsy Boots, alone, or with family (p. iii, 19), friends, and celebrities. On the cover is a color photo of Gypsy in short pants standing barefoot on rocks in a stream. Eight unnumbered pages of color photos of Gypsy and friends on glossy paper follow page 70. This book has an unusually commercial tone. Throughout the book, Gypsy discusses the benefits of garlic supplements, wears

• ***Summary:*** Talk with Bob Meeks, owner. 2002. Sept. 24. Bob purchased The Tofu Shop, a soy deli and restaurant, from Matthew Schmit, in 1993. It is an alternative restaurant that features soyfoods, all organic ingredients, and mostly local foods. Approximately 75% of his customers are vegetarians.

Menu sent by Mathew Schmit. 2003. Sept. 24. 4 pages. On the front is a mandala with a sun in the middle. "Alternative food for thought. Open 7:00 AM–4 PM Friday-Tuesday." Pages 2-4 are menu items. "The standard here is local organic foods. Whole and natural, made fresh to order to insure nutrition and quality in flavor." Categories: Breakfast fare. Pancakes and cereal. Side orders. Omelettes. Entree specials. Sandwiches. Light side up. Coffee bar. Juice bar. Beverages. Address: Arcata, California.

10499. Escano, Crisanto R.; Gaddi, Virgilio Q. 1993. Country report 11–Philippines. In: N. Chomchalow & P. Narong, eds. 1993. Soybean in Asia: Proceedings of the Planning Workshop for the Establishment of the Asian Component of a Global Network on Tropical and Subtropical Soybeans. Bangkok, Thailand: FAO Regional Office for Asia and the Pacific. viii + 218 p. See p. 92-108. RAPA Publication (FAO), No. 1993/6. [12 ref]
• ***Summary:*** Contents: (1) Introduction. (2) Production: Status, major growing seasons and cropping systems, constraints, resolving constraints. (3) Processing, utilization and marketing: Status, supply and demand, exportation of soybean products, constraints, resolving constraints.

Figures: (1) Trend in soybean production, Philippines, 1980-90. (2) Soybean area harvested, Philippines, 1980-90. (3) Trend in the soybean yield, Philippines, 1980-90. (4) Regional shares of total production, Philippines, 1990. (5) Soybean and soybean product shares in importation, Philippines, 1990. (6) Country of origin, soybean meal import, Philippines, 1990. (7) Country of destination, soysauce export, Philippines, 1990.

Tables: (1) List of soybean-based food products popularly used in the Philippines. (2) Volume and value of soybean imports, 1980-90.

Soybean production increased from about 9,800 tonnes (metric tons) in 1980 to a peak of 11,466 tonnes in 1982, then decreased to 5,614 tonnes in 1990. Area planted to soybeans increased from about 10,000 ha in 1980 to a peak of about 11,00 ha in 1982, then decreased to about 7,000 ha in 1990. The average yield for the period 1980-1990 was 920 kg/ha, but has generally been falling since 1983. Southern Mindanao has been the single most important soybean producing region in the Philippines for more than a decade, accounting for about 67% of total Philippine soybean production in 1990; Central Mindanao comes next with about 23%.

A brief history of soybean production in the Philippines from 1983 to 1990 appears on pages 99-10. Popular soyfoods products in the Philippines include: A. Fermented products: Soy sauce (toyo), fermented soybean curd (tausi [sic, fermented black soybeans]), tempeh (tempe), soybean paste (miso), soft fermented soybean curd (tahuri). B. Non-fermented products: Soybean sprouts (toge, tauge), soybean cheese [tofu] (tokwa), Geerlings cheese (taho [soft curds]), soybean milk (soymilk), and roasted soybean powder (soy coffee).

Philippine imports of soybeans and soybean products have increased rapidly since 1980, yet 93% of these imports in 1990 were soybean meal, of which 38% comes from India, 33% comes from the USA, 22% from China, and 7% from others.

In April 1991 the General Milling Corporation's soybean solvent extraction plant began operation in Tabango, Batangas. It is expected to reduce the country's imports of soybean meal but increase the imports of raw soybeans. Address: 1. Scientist III; 2. Subject Matter Specialist. All: PCARRD, Los Baños, Laguna, Philippines.

Figures: (1) Traditional process of *kinema.* (2) Preparation of *kinema* starter. (3) Preparation of *kinema* using selected strains. (4) Marketing channel of soybean.

Table 2 shows: Area planted to soybeans grew from 18,400 ha in 1983 to 20,700 ha in 1989. Soybean production grew from 10,100 tonnes (metric tons) in 1983 to 12,800 tonnes in 1989. Soybean yield grew from 548 kg/ha in 1983 to 611 kg/ha in 1989.

"Traditionally, soybean is consumed in various forms. Green pods are popularly eaten as a snack food. The green beans are consumed as a delicious vegetable curry along with other leafy vegetables or with potato slices. The dried soybean is roasted, dehusked and split to prepare a popular snack item. The dried beans are soaked overnight and deep-fried in vegetable oil, salted and spiced and consumed as another popular snack item. These recipes are developed over a long period of time and constitute the integral component of Nepalese food preparations." Address: Chief, Food Research Office, CFRL, Kathmandu, Nepal.

• ***Summary:*** (1) Introduction. (2) Production: Status, major growing seasons and cropping systems, constraints, resolving constraints. (3) Processing, utilization and marketing: Status, supply and demand, constraints, resolving constraints. (4) Resources: Personnel, seeds. (5) Ongoing research projects. (6) Information: List of relevant publication, Information required.

Tables: (1) Soybean production trend in Korea. (2) Trends in processing and utilization of soybean in Korea. (3) Trends in the national soybean supply and demand in Korea. (4) Number of soybean scientists in governmental research institute in Korea. (5) Number of soybean scientists in the university in Korea. (6) Pedigree and area harvested in 1989 of major soybean varieties in Korea. (7) List of single publications on soybean production and breeding available in Korea.

Figures: (1) Major soybean-based cropping systems in Korea.

Area planted to soybeans in Korea decreased from 275,000 ha in 1975 to 120,000 ha in 1991. Soybean production decreased from 311,000 tonnes (metric tons) in 1975 to 183,000 tonnes in 1991. Soybean yield increased from 1,130 kg/ha in 1975 to 1,540 kg/ha in 1991.

Korean soyfoods include soy paste, soy sauce, bean curd, bean sprout, etc. Note that Korean natto is not mentioned. Per capita consumption of soyfoods in Korea remained constant [or declined slightly] from 1975 to 1991. Address: Leader, Upland Crop Div. I, RDA, Suwon, Republic of Korea.

10505. Kushi, Michio; Kushi, Aveline; Jack, Alex. 1993. Macrobiotic diet: Revised and enlarged edition. Tokyo and New York: Japan Publications. 400 p. Illust. Index. 21 cm. [67 ref]

• ***Summary:*** Edited by Alex Jack, this is the revision of a book first printed in 1985.

The chapter on "Beans and bean products" has the following contents: Daily use. History. Quality. Varieties: Azuki beans, black-eyed peas (sometimes known as yard-long beans), black turtle beans, broad beans, chick-peas, great northern beans, kidney beans, lima beans, lentils, mung beans, navy beans, peas, pinto beans, soybeans (p. 195-99) (introduction, miso, natto, okara, soy flour, soy grits, soy milk, soy oil, shoyu, tempeh, tofu {incl. nigari, fresh tofu, soft tofu, firm tofu, deep-fried tofu, pickled tofu, fermented tofu, frozen tofu, dried tofu}), viilia, soy yogurt, yuba.

For information on cooking soy, see p. 204-07. Note: Natto is not usually made with koji (p. 207). For "Health benefits" and for "Soy foods and cancer research" (p. 208-09).

Black soybeans (also known as "Japanese black beans") are mentioned on pages 60, 121, 189, 200, and 204.

"Natto is a fermented soybean product that resembles baked beans connected by long sticky strands. Its strong odor takes some adjusting to but once appreciated natto is enjoyed regularly as a small side dish or condiment" (p. 196). Address: 1-2. Brookline and Becket, Massachusetts.

10508. Marks, Copeland; Kim, Manjo. 1993. The Korean kitchen: Classic recipes from the land of the morning calm. San Francisco, California: Chronicle Books. 236 p. Illust. Index. 23 cm. [8 ref]
• ***Summary:*** Korea is a peninsula surrounded by water (including the Yalu River that marks the border between China and Korea). There an estimated 200 varieties of kimchi such as cabbage, cucumber, eggplant, white radish, turnip, etc. The glossary (p. 7-13) includes: Denjang paste (a fermented soybean paste and flavor enhancer). Gochu Jang (hot fermented chili paste; Gochu means chili). Seaweed: Kelp (*Ulva conglobata,* laver (*Porphyra umbilicalis,* sold in very thin sheets [nori]), *miyuk* (*Undaria pinnatifida* [wakame]). Soy sauce (with directions for making it at home). Soybean curd (Two types: Chinese is a firm square about 4 inches on a side and 1 inch thick; Japanese is soft and creamy, about 2 inches thick).

Concerning Gochu Jang: This is the main seasoning in Korean cooking. It has been prepared at home for centuries and stored in the many black pottery pots so conspicuous on Korean rooftops or gardens. Each year on March 3, an auspicious date, the householder starts to prepare enough gochu jang to last all year. Ingredients: Glutinous rice (cooked to a pudding consistency), fermented soybean cake (*meju*), hot red chilis, salt, and barley malt syrup mixed with water. These are mixed and allowed to ferment [outdoors] in a pottery jar for at least 3 months. In early May, as the weather warms, the [woven conical bamboo] cover of the storage jar is removed early each day "so that the sun can strike and warm the contents to accelerate fermentation. At night the cover is replaced." The fermentation process eventually reduces gochu jang to a smooth, jamlike consistency with a many-dimensional flavor; it adds a lively sting and rich red color to any food with which it is used. "Korean cooking without this indispensable condiment is unthinkable."

Recipes include: Beef shreds in soy sauce (p. 48). Fried spiced bean curd (p. 57, *Tubu choerim*). Stuffed bean curd (p. 58, *Tubu gui*). Crushed bean curd salad (p. 70, *Tubu sang she*). Bean curd and pork patties (p. 96). Assorted stuffed fritters (p. 100-01, *Jon*). Seasoned dipping sauce (p. 109, *Yang yeum kanjang*). Simple bean curd soup p. 117, *Tubu kook*). Bean curd soup with clams (p. 125, *Sundubu*). Vegetable soup with soybean curd (p. 135, *Tubu jigae*). Soybean sprout soup (p. 136, *Kongnamul kook*). Address: 1. Food historian; 2. Dr. (Mrs.), expert on history, science, and preparation of kimchi.

• ***Summary:*** A very interesting look, spanning three generations, at the Cortez Colony, in Cortez, Merced Co., San Joaquin Valley, central California, the last Japanese Christian farming community formed by Kyutaro Abiko in 1919. It is written from a feminist perspective.

In the lean early years at Cortez, "the settlers' diet was limited; meals often consisted of *miso* soup and rice,..." (p. 47).

New Year's was the major holiday of the year. Everyone would partake of carefully prepared traditional Japanese dishes such as chicken *teriyaki, ozoni* (a soup containing mochi, symbolizing prosperity), *mame* ([soy] beans, symbolic of good health), and sushi (vinegared rice "rolled in sheets of toasted seaweed or stuffed into soybean wrappers [deep-fried tofu pouches]) (p. 78).

A glossary of terms (p. 231) includes: an (sweetened red bean paste), azuki (red beans), kinako (soybean flour), mame (beans), miso (fermented soybean paste), nori, shoyu (soy sauce), sushi, teriyaki (broiled meat cooked with soy sauce, wine, and ginger).

Photos show: Abiko family portrait, 1925 (p. 27). Address: UCLA.

10513. Photographs of the Arcata Tofu Shop in Arcata, California (1991-1993). 1993. Arcata, California.
• ***Summary:*** Three color photos (most 3½ by 4½ inches), numbered with captions, were sent to Soyfoods Center on 24 Sept. 2002 by Matthew Schmit, founder and owner of the Arcata Tofu Shop. They were taken in Arcata between 1991 and 1993. They show: (1) 1991–The company's future manufacturing / wholesale home–The Foodworks Culinary Center, a small business incubator. The Tofu Shop was involved with early conceptualization (1985) and project development (1989-191), and eventually became the "anchor tenant." (2) 1992–Dylan Wachtel, tofu maker, with first batch at new plant. (3) 1993–Linda Redfield (pink short) supervises pickled daikon production. Address: Arcata, California.

10514. Pitchford, Paul. 1993. Tofu. In: Paul Pitchford. 1993. Healing with Whole Foods: Oriental Traditions and Modern Nutrition. Berkeley, California: North Atlantic Books. xxii + 656 p. See p. 486-89.
• ***Summary:*** Contents: Introduction. Nutrients. Healing properties. Recipes (contains 9 recipes). Concerning its healing properties: Tofu has a "cooling thermal nature." It benefits the Metal Element including the lungs and large intestine. It moistens *dry* conditions in the body. It relieves inflammation of the stomach. It neutralizes toxins. It can be used in cases of alcoholism, chronic amoebic dysentery, healing reactions, dietary changes, etc. It is also traditionally applied to concussions as a thick tofu poultice.

"Tofu is a concentrated protein and can be beneficial when eaten in moderate amounts, especially in warmer [yang] weather and by those with *heat* signs (red tongue, red face, aversion to heat, or sensation of being too hot); it is sometimes used to reduce *heat* signs accompanying heart disease and high blood pressure. For most people, its *yin,* cooling quality needs to be altered by thorough cooking; adding warming spices such as ginger is particularly helpful for *cold* persons."

Tofu's subtle nature balances extreme flavors and adds contrast to salty and pungent foods. It can be heated in many ways but should be eaten raw only when a person feels hot and dry.

"*Caution:* Eating massive amounts of tofu regularly (as some Americans do) can contribute to kidney-adrenal weakness, loss and graying of hair, impotence, rigidity, and decrease in sexual activity."

Nine recipes follow: Baked tofu with lemon sauce. Broiled tofu. Tofu meatless balls. Steamed tofu rolls. Tofu casserole. Tofu with shiitake mushrooms. Deep-fried tofu. Scrambled tofu. Tofu eggless salad. Address: Director, Heartwood Inst. Wellness Clinic and Oriental Healing Arts Program, 220 Harmony Lane, Garberville, California 95542. Phone: 707-923-5000.

10515. Saks, Anne; Stone, Faith. 1993. The Shoshoni cookbook: vegetarian recipes from the Shoshoni Yoga Spa. Summertown, Tennessee: The Book Publishing Co. 208 p. Illust. Index. 24 x 21 cm.
• ***Summary:*** This is a vegan cookbook written by the cooks of the Shoshoni Yoga Retreat, founded in 1987 and situated in Rollinsville above Boulder, Colorado, on 110 acres of colorful high country in the Rockies. This book is dedicated to their teacher, Swami Shambhavananda Yogi. "The magic ingredient put into every dish is Shakti or Divine Energy. Food is treated as God, because it contains the essence of life, a conscious energy that nourishes the same energy in you. It is not a native American cookbook. A color photo on the back cover shows Anne Saks and Faith Stone. "In 1975, Faith stone and Swami Shambhavananda opened Rudi's Restaurant in Boulder to serve tasty, fresh, wholesome foods prepared with grace and love. Today Rudi's is a Boulder landmark.

The book begins with a glossary which includes: Miso. Nutritional yeast. Quinoa. Rice milk. Sesame oil. Silken tofu. Soymilk ("A non-dairy alternative to milk"). Tahini. Tamari. Tempeh. Tofu.

Soy-related recipes: Scrambled tofu (with "1 pound firm tofu," p. 28). Hot 'n sour miso soup (with "½ pound firm tofu, cubed" and "3-4 tablespoons red miso," p. 52). Tibetan barley soup (with "2 tablespoons red miso," p. 56). Tempeh almond salad (with "1 pound tempeh, thawed if frozen, cut in ½-inch cubes" and "¼ cup tamari" and "½ pound soft tofu" p. 74). Ginger-tamari sauce (p. 79). Cooling soy yogurt raita (with "2 cups soy yogurt," p. 90). Tamari-orange dressing (p. 104).

The chapter on "Healthful alternatives" (p. 105-110) offers meat alternatives, many of them based on tofu–"the most versatile food on the planet." Baked marinated tofu (with "1 pound firm tofu, sliced ¼ inch thick," p. 106). Tofu feta. Tofu ricotta. Tofu sour cream. Soy yogurt (soymilk fermented with plain yogurt).

Entrees (p. 110-145). Empress tofu. Mandarin tofu. Royal tofu roulade. Tempeh tandoori. Tofu lasagne. Tofu in a pocket.

Baklava (with "½ pound soy margarine," p. 190). Fresh strawberry tofu pie (p. 196). Address: Rollinsville, Colorado.

10516. Shimizu, Kay. 1993. Tsukemono: Japanese pickled vegetables. Tokyo: Shufunotomo / Japan Publications. 112 p. Illust. (color). Index. 27 cm. [Eng]
• ***Summary:*** Tsukemomo are Japanese pickled foods, primarily vegetables. Drying and pickling were two of

© Copyright Soyinfo Center 2013

the earliest ways of preserving food. If you've never tried Japanese tsukemono, get ready for a delicious surprise. This excellent book is a good place to start. We would start with takuan and umeboshi (p. 22).

Soy related recipes: Basic *miso-zuke* (p. 36-37). Spicy pickled celery (Celery *miso-garame*) (p. 37). *Koji / miso / kasu* tsukemono base (p. 39). Amazake (p. 40-41). Daikon radish pickled in koji (*Bettara-zuke*) (p. 41). Scallions in shoyu (*Rakkyo shoyu-zuke*) (p. 43). Garlic with soy sauce (p. 64). Garlic with bean paste [miso] (p. 64). Okra and onion pickles (*Okra shoyu-zuke*) (p. 70). Soy-flavored daikon pickle (*Daikon shoyu-zuke*) (p. 82, 84). Asparagus with bean paste (Asparagus *miso-zuke*) (p. 87). Spicy cabbage tsukemono (Cabbage *shoyu-zuke*) (p. 88). Cooked and pickled kelp (*Nori tsukudani*) (p. 97). Soy sauce pickled vegetables (*San-bai-zuke*) (p. 98).

A 2-page glossary includes: "Age (abura-age)–deep-fried soybean cake (*tofu*). An–sweetened red *azuki* beans prepared as a paste for confections. Amazake–non-alcoholic creamy-thick hot drink prepared from rice fermentation with the addition of rice koji.

"Drop lid. A necessary item for Japanese pickling. A wooden cover which is smaller in diameter than the pot opening, so lid will lay flat on top of food, and weight can be placed on top of lid."

Dou-ban-jiang–spicy Chinese brown bean paste, contains chili. Koji–a yeast-like rice mold that works primarily to convert starches into sugars during a fermentation process.

Mirin–a thick sweet wine made from glutinous rice, used primarily for cooking. Miso–fermented soybean paste. Mochiko–glutinous rice flour. Mochi–glutinous rice that has been pounded until soft and sticky, then formed into cakes. Mochi-gashi–a confection made from glutinous rice.

Natto–fermented soybeans with sticky texture and strong aroma. Nori–edible seaweed, laver. Shoyu–Japanese soy sauce, considerably lighter than Chinese soy sauce, which should not be substituted for shoyu.

Suribachi–Japanese pestle and mortar (earthenware bowl with ridged edges). Tsukudani–food simmered with shoyu, sugar, mirin and water until almost all liquid evaporates.

Ume–Japanese plum; technically a species of apricot, but usually translated as plum. Umeboshi–pickled plum. Wakame–an edible seaweed, thinner and softer than konbu kelp. Wasabi–Japanese green horseradish, most familiar in the west as a mound of pungent green paste served with sushi or sashimi.

Note: Real wasabi is very expensive, and is a completely different plant from horseradish, from a different genus and species. Real wasabi is rarely found outside Japan and is much more potent than its imitation, "western wasabi"–a mixture of horseradish, mustard, and green food coloring. Address: Saratoga, California.

10517. So, Yan-kit. 1993. Yan-kit's classic Chinese cookbook. London: Dorling Kindersley Ltd., London. 239 p. Illust. (color photos). Index. 24 cm. [1 ref]

• ***Summary:*** This is a remarkable Chinese cookbook. Although the text of this book was copyrighted in 1984, the photographs, layout and design have been updated to 1993. The first 192 pages of the book are printed in full color on glossy paper. The author is a woman–lovely, cultured, and centered.

In the section on "Ingredients" is a two-page spread titled "Beans and bean products" (p. 12-13) of 12 fine color photos, each with a caption and Chinese characters. They are: (1) Bean curd, fresh [fresh tofu]. (2) Bean curd, puffed [deep-fried tofu puffs], used to absorb tastes and juices. (3) Bean curd sheet [thin dried yuba sheet]; must be moistened before use. (4) Black beans, fermented [fermented black soybeans]. "Whole soybeans preserved with salt and ginger." (5) Red beans (azuki). (6) Red bean paste: a thick paste made from puréed, sweetened azuki beans, often used a filling for sweets.

(7) Bean curd "cheese," red fermented [Fermented tofu with ang-kak], with salt and rice wine. (8) Bean curd "cheese," white fermented [Fermented tofu], with or without chili. (9) "Crushed yellow bean sauce: purée of fermented yellow soybeans, wheat flour, salt and water" [with fermented black soybeans]. (10) "Szechwan [Sichuan] chili paste: spicy hot paste of dried chili and crushed yellow bean sauce." (11) "Soybean paste: paste of crushed soybeans combined with chili, sugar and salt." (12) "Yellow beans in salted sauce: Whole yellow soybeans fermented with salt, wheat flour and sugar" [with fermented black soybeans].

Also in the section on "Ingredients" is another two-page spread titled "Sauces, oils, fats, wines and vinegars" (p. 26-27) which states: "Soy sauce is the most basic but also the most important seasoning. Used with salt, it helps to turn simple ingredients into Chinese cuisine." Shallow, round "viewing" dishes contain: (1) Thin soy sauce. (2) Thick soy sauce. (5) "Hoisin sauce: soybeans, wheat flour, salt sugar, vinegar, garlic, chili, and sesame oil. (6) "Sweet bean sauce: Made from crushed yellow bean sauce combined with sugar. Note: The four vegetable oils shown are corn oil, sesame oil, peanut oil, and hot chili oil.

Soy related recipes (the page with recipe appears before the page with the photo): Bean curd soup (p. 58, 57). Steamed prawns in mixed bean sauce (with "1 tablespoon fermented black beans," p. 78, 77). Bean curd soup with fish stock (with "2 cakes bean curd, drained," p. 81, 83). Stir-fried clams in black bean sauce (with "1½ tablespoons fermented black beans, rinsed, mashed with 1½ teaspoons sugar," p. 88, 87). Steamed trout with black beans and garlic (with "2 tablespoons fermented black beans, rinsed and partially mashed with ½ teaspoon sugar," p. 95, 93). Willow chicken in black bean sauce (with "3 tablespoons fermented black beans, rinsed and mashed," p. 106, 109). Soy sauce

© Copyright Soyinfo Center 2013

chicken (with "½ pint thick soy sauce," p. 116, 115).

Green pepper beef in black bean sauce (with "2½ tablespoons fermented black beans, rinsed and mashed with ¼ teaspoon sugar and 1 teaspoon oil," p. 142, 141). Bean curd puffs (deep-fried tofu, p. 152). Eight-treasure vegetarian assemblage (with "1 tablespoon fermented red bean curd cheese, mashed with 1 teaspoon own juice or water" and "8 bean curd puffs, halved," p. 153, 151). Wheat gluten (homemade, p. 156-57). Red-braised gluten (p. 157, 155). Pi pa bean curd (The "pi pa" is a celebrated Chinese musical instrument, p. 158-59). Pock-ma bean curd ("This internationally famous Szechwan dish was the creation of the wife of chef Ch'en Shen-fu, who worked in the [provincial] capital, Ch'eng-tu [Chengdu] during the 2nd half of the 19th century. If pockmarks on her face earned her this rather derogatory nickname, 'Pock-ma' or 'Pock-woman,' they also immortalized her bean curd dish" [Mapo doufu]. Ma stands for "mazi" which means a person disfigured by pockmarks. Po translates as "old woman," p. 159, 161).

Deep-fried bean curd in earthen pot (with "4 cakes bean curd, drained," p. 162, 161). A vegetarian menu (of the six dishes shown, 2 contain tofu, p., 168-69). Deep-fried bean paste sauce with noodles (with "1½ pounds ground yellow bean sauce," p. 185, 181).

Deep-fried five-spice rolls (from Fukien, with "1 package dried bean curd sheets [yuba] {usually 8 ounces, containing 8 sheets, each 13 by 6 inches}," p. 195). Eight-treasure bean curd ("The 18th-century poet and official Yüan Mei, wrote a cookery book called Sui-yüan Recipes, a unique legacy of his times from a Chinese man of letters. In the recipe called "Prefect Wang's Eight-Treasure Bean Curd," Yüan Mei briefly outlined how the dish traced its origin to the Imperial kitchen." Includes "2 cakes bean curd, drained," p. 215, 149). Bean curd in simple sauce (p. 219). Stir-fried spinach in bean curd "cheese" sauce (with "2½ to 3 cakes white bean curd 'cheese' with chili," p. 220).

A Glossary (p. 227+), which starts with a page of definitions of "Beans and bean products," defines the same items whose photos appear on pages 12-13. Likewise for the glossary page on sauces (p. 231). Address: England.

10518. *SoyaScan Notes.* 1993. Terms related to tofu: Library of Congress subject headings and call numbers (Overview). Compiled by William Shurtleff of Soyfoods Center. [1 ref]
• ***Summary:*** The 16th edition (LCSH 16) of the *Library of Congress Subject Headings* (published in 1993) lists the following subject headings and call numbers related to tofu.

Tofu (May Subd Geog) [TP438.S36 (Manufacture)]. [TX401.2.S69 (Nutrition)]. [TX558.T57 (Composition)]. UF Bean curd [Former heading]; Curd, Bean; Curd, Soybean; Curds and whey, Soymilk; Soybean curd; Soymilk curds and whey; Whey, Soymilk curds and. BT Nonfermented soyfoods. RT Cookery (Tofu). NT Dried tofu.–Advertising USE Advertising–Tofu. Tofu, Dried USE Dried tofu. Tofu ice cream USE Soy ice cream. Tofu industry (May Subd Geog) [HD9330.T68-HD9330.T683]. BT Nonfermented soyfoods industry.

Abbreviations: [ ] = Call number. UF = Use for. BT = Broader terms. RT = Related terms. NT = Narrower terms. May Subd Geog = May subdivide geographically.

10519. Taylor, Sandra C. 1993. Jewel of the desert: Japanese American internment at Topaz. Berkeley, Los Angeles, Oxford: University of California Press. xix + 343 p. Plus 8 unnumbered pages of plates. Illust. Maps. Index. 24 cm. [125 + 808 endnotes]
• ***Summary:*** This is "the only in-depth narrative history of both an assembly center and a concentration camp" (Gary Y. Okihiro, rear cover). The camp, Topaz, was in Utah, but the assembly center, Tanforan Racetrack, was in San Bruno, northern California.

Contents: 1. Japanese San Francisco. 2. From Pearl Harbor to evacuation. 3. Life in a racetrack. 4. Welcome to Utah. 5. The jewel of the desert. 6. Dissension, departure, and grim determination. 7. An end and a beginning. 8. Nikkei lives: The Impact of Internment. 9. Coming home, wherever that is. Abbreviations. Notes.

Tofu is mentioned 5 times and miso twice. Address: Prof. of History, Univ. of Utah.

10520. Tran, Van Lai. 1993. Country report 15–Vietnam. In: N. Chomchalow & P. Narong, eds. 1993. Soybean in Asia: Proceedings of the Planning Workshop for the Establishment of the Asian Component of a Global Network on Tropical and Subtropical Soybeans. Bangkok, Thailand: FAO Regional Office for Asia and the Pacific. viii + 218 p. See p. 143-150. RAPA Publication (FAO), No. 1993/6.
• ***Summary:*** Contents: (1) Introduction. (2) Production: trend, major growing seasons and cropping systems, constraints, resolving the constraints, future research. (3) Processing, utilization and marketing: Consumption, processing, marketing, constraints, resolving the constraints. (4) Resources: Personnel, seeds. (5) On-going research projects. (6) Information required. (7) Conclusion.

Tables: (1) Area, yield, and production of soybean in Vietnam, 1970-90. (2) Soybean production constraints in Vietnam. (3) Several research findings on soybean breeding and farming patterns. (4) Identified constraints for soybean production in Vietnam. (5) National requirement for food and production of soybean. (6) Methods of soybean processing of Vietnam. (7) Constraints to soybean processing, utilization, and marketing. (8) Future research priority for soybean in Vietnam. (9) Number of scientists working on soybean research. (10) Training needs on a priority basis. (11) Soybean varieties of high yield potential.

Introduction: "Soybean has been cultivated in Vietnam for a long time. Le Quy Don, in his book "Van Dai Loai Ngu", written in 1773, mentioned about soybean cultivation.

© Copyright Soyinfo Center 2013

It is the second most important legume in Vietnam. All soybean products are used as human foods and animal feed because of its high food value (40-50% of protein and 20-25% of oil).

"The Government of Vietnam, which is conscious of the importance of soybean and its role of human food and animal feed, and the possibility to increase its production, has listed soybean as the number two most important crop after groundnut in her agricultural development policy."

Table 1: Area planted to soybeans in Vietnam grew from 17,078 ha in 1970 to 149,000 ha in 1990, projected to grow to 300,000 ha in the year 2000.

Production of soybeans in Vietnam increased from 5,277 tonnes (metric tons) in 1970 to 146,020 tonnes in 1990, projected to grow to 420,000 tonnes in the year 2000.

Yield of soybeans in Vietnam grew from 309 kg/ha in 1970 to 980 kg/ha in 1990, projected to grow to 1,400 kg ha in the year 2000.

"Most of the soybean produced in Vietnam is consumed as human food prepared by traditional methods, which include fermented products such as soysauce, soypaste (miso), soycurd (fermented tofu), and soycheese, and non-fermented products such as soymilk, soycurd (tofu) and soybean oil.

Note: This is the earliest English-language document seen (March 2009) that uses the term "soypaste" to refer to miso.

Concerning the Vietnamese names of these foods, Huong Quan Nguyen (Zomore Quan) writes, in reply to a question from Soyinfo Center. 2008. Aug. 17. Soy sauce = "xi dau" (the Vietnamese "d" written without the bar across the vertical stroke is pronounced "Z").

Soy paste = "tuong dau nanh" or "tuong Cu Da." "Tuong" is a generic term meaning "sauce." As you know, Cu Da is the name of the village famous for its soy paste. "Tuong Cu Da" literally means "sauce made in Cu Da Village." Soy paste is made in many villages in North Vietnam, not just in Cu Da. I have heard that Tuong Ban and Tuong Pho Thoi are just as good as Tuong Cu Da.

Soy curd = "dau hu" (which is unfermented. Once the soy curd is fermented, it is referred to as "chao").

Soy cheese = "chao" (this word has no diacritical mark).

Note: Zomore asked six Vietnamese people who are knowledgeable about soyfoods and all are aware of only one kind of fermented tofu in Vietnam; therefore they cannot imagine what fermented "soycheese" is. Address: Legumes Research and Development Centre, INSA, Dong Da, Hanoi, Vietnam.

10521. **Product Name:** Soymilk, and Taho (soymilk curd). **Manufacturer's Name:** Kimsun International. **Manufacturer's Address:** 35 Simoun St., Quezon City, Philippines. Phone: +63 2 47 2330. **Date of Introduction:** 1993? **New Product–Documentation:** Talk with Johnny Lee of Kimsun Intl. 1995. Aug. 11. He calls from the Philippines. He has been making soymilk and taho (soymilk curd) for several years. Philsoy is still made in small quantities, but is sold only around the university at Los Baños.

10522. *SoyaScan Notes.* 1994. Keywords used with more than 1,000 documents in the SoyaScan database, as of 1 January 1994 (Overview). Jan. 1. Compiled by William Shurtleff of Soyfoods Center.

• ***Summary:*** Mark Messina, PhD, a nutritionist and former researcher at the National Cancer Institute for 5 years, states that "There's strong evidence to indicate that soy can lower cancer risk, especially of the breast and prostate." Messina

© Copyright Soyinfo Center 2013

says that "soy may contain 'anti-estrogens,' compounds that perform many of the necessary and beneficial functions of real estrogen, but not the harmful stuff (for example estrogen is vital for reproductive health, but researchers believe it may spur growth of many breast cancers).

In Japan, where the diet is rich in soy [and much lower in fat], the breast cancer rate is much lower than in the USA. Every year in Japan roughly 7 women per 100,000 die of breast cancer and 28 per 100,000 are diagnosed with the disease; the corresponding figures for U.S. women are 27 and 105.

Japanese men also have low rates of prostate cancer. 3.5 per 100,000 Japanese men die of this disease every year but it kills 15.7 per 100,000 American men–also nearly a fourfold difference.

Growing soybeans: Planning, land preparation, planting, plant growth, field sanitation, insect and disease control, harvest, threshing, storage, vacuum packing for seed storage, calculating growing costs. Home preparation of soybeans: Cooking soybeans, soy flour, soy coffee and nuts, ingredients for making soy milk, tofu and tokara, kitchen tools, soy milk, tokara (tofu with the okara still in it), tofu, tempeh, storing soybean foods, costs of processing soybeans for market, expected yields of primary soybean foods, recipes. Nutritional information. Resources and contacts. Acknowledgments.

Businesses Plenty has worked with that make fresh soyfoods and are listed on pages 30-32 include: Alimentos San Bartolo (San Bartolo, Guatemala). Survival Foods and Nature Island Foods (Roseau, Dominica, West Indies). Natural Cafe and Health Plaza (Castries, St. Lucia, West Indies). Kay Cuisine (Kingstown, St. Vincent, West Indies). Country Farmhouse Soy Products (Kingston, Jamaica). Deagbo Industries (Ibadan, Nigeria). Address: P.O. Box 2306, Davis, California 95617. Phone: (916) 753-0731.

10530. Shurtleff, William; Aoyagi, Akiko. comps. 1994. Soyfoods industry and market–Bibliography and sourcebook, 1985 to 1993. Lafayette, California: Soyfoods Center. 361 p. Subject/geographical index. Author/company index. Language index. Printed 11 Jan. 1994. Published Jan. 1995. 28 cm. [985 ref]
• ***Summary:*** This is the second of the two most comprehensive books ever published on the soyfoods industry and market worldwide.

In May 1982 the first study of the burgeoning soyfoods industry in the Western world was compiled by Shurtleff and Aoyagi, and published by Soyfoods Center. In April 1985 the fifth edition of that book, titled *Soyfoods Industry and Market: Directory and Databook* (220 pages), was published. It contained statistics through 1984, the market size and growth rate for each soyfood type, rankings of leading soyfoods manufacturers of each soyfood type and the amount each produced, analyses, trends, and projections. This book is published to update the 1985 market study.

In the decade since 1984 the soyfoods market has continued to grow at a very healthy rate, with some soyfood types (such as soymilk) growing at a truly astonishing sustained rate–in both the USA and western Europe–as the statistics in this book show so vividly. In 1975 only 75 new commercial soyfood products were introduced in the USA, yet that number skyrocketed to 217 in 1979, reaching an amazing 422 new products in 1987.

During the decade from 1984 to 1994, Soyfoods Center has invested most of its time and resources in the production of SoyaScan, the world's largest computerized database on soyfoods, which contains more than 44,500 records as of Jan. 1994. This database also includes a wealth of carefully researched statistics and analyses of the soyfoods market; those from the start of 1985 to the end of 1993 are contained in this book. Its scope includes all known information on this subject, worldwide. Its focus, however, is statistics, analyses, and trends concerning the soyfoods industry and market in the United States and Europe.

In May 1990 Soyfoods Center conducted an in-depth study of the tofu market in Europe (137 pages), and in July 1990 of the soymilk market in Europe (261 pages). All original interviews and published records from both of these market studies, plus a summary of each study, are included in the present book.

© Copyright Soyinfo Center 2013

The SoyaScan database is composed of individual records. One record might be an original interview with the head of the largest soymilk company in Europe, on the size and growth of the soymilk market in Europe, and new trends in that market, conducted by William Shurtleff of Soyfoods Center. Another might be a published article or an unpublished document concerning the growth of the market for soy yogurts or soy sauce in America.

This book documents the growth of each product category in every country worldwide. The book contains three extensive and easy-to-use indexes: A subject/geographical index, an author/company index, and a language index. These allow you to find the exact information you need on the soyfoods industry and market quickly and easily. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 510-283-2991.

10531. **Product Name:** [Tofu Burgers: Sea Vegetables from Brittany].
Foreign Name: SOY Croque Tofou (algues de Bretagne).
Manufacturer's Name: SOY (Société Soy).
Manufacturer's Address: 1 rue du Crêt de la Perdrix, 42400 Saint-Chamond, France. Phone: 77.31.24.42.
Date of Introduction: 1994. January.
Ingredients: Label of Dec. 2011: Tofu* 77.9% (water, dehulled soybeans* 21%, coagulants: calcium sulfate, nigari), water, flakes of whole oats*, soy sauce (water, whole soybeans*, sea salt, *Aspergillus oryzae* culture, dried sea vegetables (dulse, nori) 1.6%, yeast extract, sea salt, parsley, bay leaf / laurel*. * = Organically grown ingredients. Certified by Ecocert F 32600 L'Isle Jourdain.
Wt/Vol., Packaging, Price: 200 gm paperboard box. 2 burgers per package.
How Stored: Refrigerated, 4 week shelf life at 4ºC.
New Product–Documentation: Product with Label brought by Taro Mikuriya of the Nutrition & Santé Group (Revel, France). 2011. Dec. 14. Paperboard box. 4 by 6 by 1.5 inches. Green, blue and black on white.

Letter (e-mail) from Bernard Storup, founder of Nutrition & Nature (Revel, France). This product was first sold commercially in Jan. 1994.

10532. United Soybean Board; Nebraska Soybean Program. 1994. Designed for life: A closer look at the versatile soybean's contribution to human health (Brochure). Lincoln, Nebraska. 12 panels. 23 x 10 cm each. [1 ref]
• ***Summary:*** Contents: Soybean fiber. Soybean protein (in soy flour, isolates, concentrates). Soybeans: The newest and oldest of designer foods. Finding and using soybeans: Miso, tofu, natto, tempeh, full fat flour, soymilk, soynuts, soy sauce. Soybean oil: 85% unsaturated fat, no cholesterol, high in polyunsaturates, hydrogenation and *trans* fatty acids. Once upon a time ("circa 1500 BC, Yu Xi-ong and Gong Gang-shi, who were either bandits or warlords depending on your perspective..." discovered the soybean. Note: This story has no basis in historical fact). The soybean: Health insurance in a pod.

Photos show: Two hands holding up a large Chinese bowl of miso soup containing squares of tofu. A table set with dishes of various East Asian soyfoods. Charts: Bar charts showing percentage of saturated, monounsaturated, and polyunsaturated fatty acids in soybean oil and other oils and fats. Nutritional analysis of 1 cup of cooked soybeans.

Note: This brochure was developed for the United Soybean Board (USB) by the Evans Group in Seattle, Washington. It was mailed mostly to food manufacturers. Address: Lincoln, Nebraska.

10533. United Soybean Board. 1994. Soybeans: Unlocking the secret to good nutrition. Healthcare guide. St. Louis, Missouri. 8 p. 28 cm. [5 ref]
• ***Summary:*** Contents: A critical food source from the dawn of history. The only vegetable that contains complete protein. World soybean production (1992/93, bar chart). The most versatile food on earth. Health benefits of soy foods (discusses only soybean oil!). Nutritional analysis of soybeans, kidney beans, and peanuts. Bar chart showing the fatty acid composition of soybean oil and other oils and fats (soybean oil is "the balanced oil"). Hydrogenation and health. Cis and *trans* fatty acids. Soybean oil's place in the diet. Whole soybean foods: Tofu, tempeh, miso, natto, soy sauce, full fat soy flour, soy "nuts" and soymilk. Soybean fiber (the outer hull). Soy protein products: Defatted soy flours, soy isolates, soy concentrates. Isoflavones (incl. Genistein). Soybeans, the "All American" legume. For more information call 1-800-Talk-Soy.

Note: This brochure was developed for USB by the Evans Group in Seattle, Washington. It was mailed mostly to dietitians, nutritionists, and members of the food industry. It focused more on soy oil than on soy protein. Address: St. Louis, Missouri.

10534. Lewis, David. 1994. Bean curd banner flies high over Tofutown. *Rocky Mountain News* (*Denver, Colorado*). Feb. 1. p. 33A, 38A. Business section.
• ***Summary:*** White Wave produces 2½ tons of tofu every working hour of every day. That's 50,000 pounds of tofu a day, 250,000 pounds a week, and 13 million pounds a year. White Wave sells its tofu and tofu spin-offs–Meatless Tofu Steaks, Dairyless Soy Strawberry Yogurt–in 50 states, Puerto Rico, Mexico, and Canada. Demos vows this is only the beginning. "I'm in this because this is a 100-year project. And I'm not going to be around to see the end of it." A large photo shows Ken Vickerstaff, White Wave's sales and marketing president, and Steve Demos, company president. *Boulder Daily Camera* food writer John Lehndorff coined the term Tofutown USA to describe Boulder. Demos thought up the White Wave logo while meditating in Santa Barbara in

© Copyright Soyinfo Center 2013

1976. "I learned how to make tofu at a 76-day (meditation) intensive. Demos says that 15% of the people in Boulder, Colorado, consume tofu compared with a national average of 2-3%.

White Wave sales have risen 20% to 35% a year for the last 5 years, with 1993 revenues being about $5 million. White Wave plans to create brand identity through its new merchandising format–Vegetarian Cuisine Centers. Piloted in three Whole Foods Markets in California, they increased White Wave sales 730% during their first 3 months in existence. Demos' present goal is "brand building." He considers that to be the strength and fortune of the company. "It's the concept of right livelihood. Can you come up with a career choice you and everyone who touches you benefits from? In the end you enjoy it and the world is better off with it than without it. Wealth without guilt. That's an achievable goal."

Note: This is the earliest document seen (March 2005) in which Steve Demos uses the term "right livelihood."

Haru Yamamoto's Denver To-fu Company also makes tofu–a ton of it per day. Address: Rocky Mountain news staff writer.

10535. McReynolds, Thomas. 1994. Morinaga's new interest in soymilk (Interview). *SoyaScan Notes.* Feb. 3. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Morinaga has been looking seriously at manufacturing soymilk in America for the last 6 months, and very seriously for the last 4 months. The major reason is the value of the Japanese yen, which has fallen steadily against the dollar over the years. From 1964 to 1971 the yen was steady at about 360 yen per dollar. In 1972 it fell below 300, in 1978 it fell below 200, and recently it dipped briefly below 100 yen per dollar; it is now at about 108-109. This makes it expensive to import products from Japan. A second reason is that Morinaga would like to build its own plant in America. But they are looking for a partner in the venture to help minimize the risk. There are two pieces to the formula. The partner must join Morinaga in manufacturing costs, and land and factory development. The partner must also be a potential buyer of the soymilk with an established market, provided the product is made to their quality, volume, and price specifications. Address: Marketing Consultant, Morinaga Nutritional Foods, 2050 W. 190th St., Suite 110, Torrance, California 90504. Phone: 213-728-4325.

10536. Roller, Ron. 1994. New developments with soymilk in America (Interview). *SoyaScan Notes.* Feb. 3. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Pacific Foods in Oregon has reintroduced and updated its own line under the brand Pacific Foods in three types: Ultra, Lite, and Select. One is fortified, one is light, and one is plain. They are selling these directly to distributors. Soy-Um is sold to a man named Jenkins in Chicago, Illinois, who used to be with Hormel Foods and who has a lot of connections in the grocery industry. J&G stands for Jenkins and Gournoe. They are "marketeers." There was some talk that Trader Joe's was going to introduce a soymilk under their own label, but somehow they hooked up with J&G. Ron believes that Jenkins wants to sell this as low-cost, grocery brand style soymilk for food chains and the mass market. They are going after the low end of the market, and they have gained some shelf space because of their low price. The product is not for the natural foods market. Their products (in terms of flavor and ingredients) are styled after the Westbrae soymilk products.

But the biggest story is the impending entry of Morinaga into the U.S. soymilk market. Remember that Morinaga is basically a milk company and a very conservative one. It looks like they plant to build a plant to make tofu and soymilk in America and they are looking for a partner in the venture–in part because they don't know the market that well, in part to reduce their risks, and in part to get extra volume to cover their overhead. But they want the controlling interest in the venture. They are talking with all the major U.S. soymilk manufacturers–especially Westbrae (which is looking for a partner, in part because their soymilk has been made in so many different places) and Pacific Foods. 90% of their tofu sales are in the mass market, and very little is sold to the natural foods industry. So they will probably also try to sell their soymilk to the mass market.

Bill Bolduc in Ohio makes plain, unpasteurized/unsterilized soymilk, then sends it up to Parmalat Foods (5252 Clay Ave., Wyoming, Michigan 49548. Phone: 616-538-3822). Parmalat is a huge and very significant Italian food company that is the biggest user of Tetra Pak Aseptic packaging in the world. They specialize in tomato products, milk, and pasta, and they are an expert at Aseptic packing. That have advertised their dairy milk in an aseptic carton via full-page ads in the *Wall Street Journal.* [Their corporate headquarters is: Parmalat USA, 500 Rt. 17 South, Hasbrouck Heights, New Jersey 07604.] In 1993 Parmalat bought White Knight Packing, which is a Tetra Pak co-packing operation. This was their entree to the American market–except that they previously had some distribution for their tomato products in America. Westbrae was a co-pack customer of White Knight. Parmalat then bought two dairies–one in Pennsylvania and one in Louisiana. They move very quickly and are very aggressive.

Note: Parmalat S.p.a. in Italy (43044 Collechio, Parma, Italy) was interested in soymilk as early as May 1987. The two contact people at that time were Mr. Barilla and Dr. Alberto Rota. Address: President, American Soy Products, 1474 N. Woodland Dr., Saline, Michigan 48176. Phone: 313-429-2310.

10537. Pierce, Ray. 1994. A brief history of Genice Foods Ltd. and their work with soy ice creams, yogurts, creams,

© Copyright Soyinfo Center 2013

and margarine. Part II (Interview). *SoyaScan Notes.* Feb. 4, 8, 10 and 16. Conducted by William Shurtleff of Soyfoods Center. Followed by a an 8-page fax on 7 Feb. 1994.
• ***Summary:*** Continued: At this time, Genice Foods was the only company in Europe manufacturing non-dairy frozen desserts, but the market in Europe was not expanding as rapidly as the market in the USA. Possibly the main reason for this was a greater perceived differentiation in the U.S. between dairy ice creams, containing up to 15% butter, and healthier non-dairy, lower-fat frozen desserts such as Tofutti and McQueens. By contrast, ice creams in the UK generally contained palm oil instead of butter and at a much lower level–around 6-8%. Other reasons for the rapid growth of the U.S. market could be: Greater awareness of lactose intolerance, a larger number of vegetarians, larger ethnic communities, and cost consciousness. With Genice being the only manufacturer of non-dairy frozen desserts, it was difficult to satisfy existing and potential customers without some duplication of products in the market place. However Genice was also attempting to help these companies avoid competing directly with one another by suggesting different package sizes, flavors, package shapes, etc. Hence in 1987 Maranellis Ice Supreme was launched for Unisoy (before Unisoy was acquired by Haldane), in a ½-liter format, sweetened with fruit juice, in 3 flavors–raspberry ripple, vanilla, and chocolate. The product was made from fresh soya milk, delivered to Genice by Unisoy. Another non-dairy frozen dessert launched in 1987 was Sunrise Carob Ice, a frozen soya vanilla-flavored bar covered with a carob coating, made for Soya Health Foods Ltd., Michael Cole's former company; the product sold extremely well.

In March 1989, the Haldane Foods Group Ltd., part of the Archer Daniels Midland Co. (ADM), acquired a 70% interest in Genice. Genice Foods approached the Haldane Group since Genice needed both cash and access to bigger markets in order to develop properly. Peter Fitch, head of the Haldane Group, has told Ray many times he didn't really want to acquire Genice; Ray had to court him for 9 months before he agreed to acquire Genice. Haldane was an ideal partner, being one of the biggest health food manufacturers in Europe (they made mostly vegetarian main courses), but having no dessert products. Genice made mostly non-dairy frozen and chilled desserts. Also the cash backing from ADM was equally important in creating and developing new markets. ADM and the Haldane Group gave Genice the freedom to continue to develop and make products for companies (such as Soya Health Foods and Dayville Ltd.) outside the Haldane Group.

In April 1989 Sweet Sensation, another non-dairy frozen dessert, was launched for Granose Foods in a 3/4 liter pack composed of a rectangular plastic tub in a cardboard sleeve, in 4 flavors–tutti fruitti, black cherry, raspberry ripple, and vanilla. Genice made this product for Granose before and after Granose was acquired by the Haldane Group. Another non-dairy frozen dessert products launched in 1989 was Vegedine Mousse a frozen mousse dessert in two flavors–carob & walnut, and strawberry. Vegedine was a very small company in Bournemouth, sales to health food shops were small, and the company soon went out of business.

Following the acquisition by Haldane, the pace of development speeded up at Genice. Previously, products had been produced from either powdered soya milk and soy protein isolates, or soya milk imported from Unisoy. In late 1989 a small soya milk plant was installed at Genice with the ability to produce limited quantities of tofu also. With the new availability of tofu, two new non-dairy frozen products were launched: (1) So Good Tofu Dessert for the Haldane Group, a 3/4 litre pack in a round cardboard tub flavored as a strawberry/vanilla split, or as wild blackberry; and (2) So Good Strawberry Bombes for the Haldane Group, a 100 ml vanilla flavored base with a strawberry puree center, coated with carob couverture, and sold in retail packs of four. Because of Haldane's extensive contacts throughout Europe, Genice products are now sold in 7 European countries. The company also made a brief foray into the kosher market in America, when they sold some So Good Strawberry Bombes to a distributor named Quality Foods in Long Island, New York, but Genice had a bad experience and ended up with an unpaid debt on their first shipment. About 4 years ago Ray exhibited some of his soya products for 2 years in a row at one of the New York Kosher Fests. There he met David Mintz of Tofutti fame. Ray would like to try to enter the New York market again some day; its a big market.

Genice uses fresh soymilk (produced by Unisoy) to make the majority of its total volume of soy ice cream, and isolated soy protein to make rest. Powdered soymilk is not used because it is very expensive and too hard to obtain. Ray now feels that fresh soymilk gives a better soy ice cream. Genice is now producing a range of development samples for Dayville Ltd., which is going to re-launch their soy ice creams this year and they have picked the one made with soymilk as being the best. From the production viewpoint, isolates are much easier to use, but product taste and overall quality is the key point. Moreover, organic soymilk can be used to make an organic soy ice cream, but there are no organic soy isolates.

Genice is still the only manufacturer of soya frozen desserts in the UK. However two strong, competing products are now being imported: Winner's Swedish Glace from Sweden and Tofutti from the USA. Three years ago Genice made more than 90% of the soy ice creams sold in the UK, but today that figure has dropped to an estimated 50%, with Winner in second place, followed by Tofutti. Ray is concerned that Winner could overtake Genice in soy ice creams this year. During 1994 Genice plans to rationalize and reformulate its soy ice cream product line in order to concentrate its marketing efforts more on its best products, to eliminate or merge its own brands of the same type that

© Copyright Soyinfo Center 2013

compete with one another, and to put more effort into sales of soy ice creams. Continued. Address: Founder, Genice Foods Ltd., Pinfold Lane, Llay Industrial Estate, Llay near Wrexham, Clwyd, LL12 OPX, Wales/Cymru, UK. Phone: 0978-853-787.

10538. Demos, Steve. 1994. New developments at White Wave (Interview). *SoyaScan Notes.* Feb. 8. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** White Wave's new state-of-the-art tofu plant is now pumping out 8 tons of tofu per shift. The company operates, on average, 1.5 shifts per day.

Note: Talk with Wally Rogers. 1994. Aug. 18. White Wave purchased much of their new $1.5 million tofu system from Bean Machines, Inc. (BMI). They bought a BMI continuous cooking system (1,200 gallons/hour) and a continuous centrifuge, which BMI sells as part of a joint venture with a company from China. The centrifuge is made in China, then BMI makes it sanitary. The centrifuge is selling very well; companies are buying them instead of roller extractors. BMI moved from 390 Liberty St. in San Francisco to Sonoma, California, several years ago. They get mail at P. O. Box (2122) in Mill Valley. Address: President, White Wave Inc., 1990 North 57th Court, Boulder, Colorado 80301. Phone: 303-443-3470.

10539. Nakagawa, Keiko H. 1994. The miso market in America (Interview). *SoyaScan Notes.* Feb. 8. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Keiko has just finished a market survey titled *Beikoku Miso Shijo Chôsa Hôkoku* (The miso market in America: Report of a survey; 22 pages, in Japanese). She used statistics (with permission) from *Soyfoods Industry and Market: Directory and Databook* (1985) by Shurtleff and Aoyagi and from a database search of the SoyaScan database to get started on her research. Then she contacted all miso manufacturers listed in the directory and in this search, and interviewed the owner of each company. She found that total miso production by the 7 manufacturers listed below was 1,467 tonnes/year = 3,227,400 lb/year. She found that the largest miso makers in the USA (including Hawaii) are as follows, listed in descending order of size: 1. Miyako Oriental Foods (founded 1976, 1,000 tonnes/year = 2,200,000 lb/year, Los Angeles; Mr. Shimizu says they are still only using half their production capacity. Note: In 1982 Miyako produced 544 tonnes/year of miso according to Shurtleff and Aoyagi. 1985. *Soyfoods Industry and Market,* p. 108). 2. Hawaiian Miso & Soy Co. (founded 1936, 227 tonnes/year = 500,000 lb/year, Honolulu. Production was 512 tonnes/year in 1982). 3. American Miso Co. (founded 1979, 113 tonnes/year = 250,000 lb/year, North Carolina. Production was 125 tonnes/year in 1982). 4. American-Hawaiian Soy Co. (founded 1941, 91 tonnes/year = 200,500 lb/year, Honolulu. Production was 125 tonnes/year in 1982). 5. South River Miso Co. (founded 1981, 18.18 tonnes/year = 40,000 lb/year, Massachusetts). 6. American Biofoods (founded 1983, 16 tonnes/year = 35,300 lb/year, Holmdel, New Jersey; also makes Dengaku Miso). 7. Junsei Yamazaki Miso Co. (founded 1983, 2 tonnes/year = 4,400 lb/year, Orland, California).

Companies listed in the 1985 directory which cannot be located and probably no longer make miso are: Cottage Miso (Wisconsin), Imagine Foods (Missouri), Parks Brands (Hawaii), The Soy Plant (Ann Arbor, Michigan), and Well House (Colorado).

Imports of miso to the USA have continued to increase dramatically, from 959 tonnes (metric tons) in 1982 to 1,554 tonnes in 1992 (according to Japanese Customs sources).

On 20 Feb. 1994 Keiko sent a copy of her Japanese-language market study to Soyfoods Center, where it was placed in the library. Address: 667 Spyglass, Valley Springs, California 95252. Phone: 209-772-1502.

10540. Skenazy, Lenore. 1994. Is it better than it sounds? Tofu has been waiting 1,000 years for you to try it. *Denver Post.* Feb. 16.
• ***Summary:*** A humorous tribute to tofu. Address: New York Daily News.

10541. *Toyo Shinpo* (*Soyfoods News*). 1994. Tô denrai no tôfu-kan. Matsumoto rôho ga dentô o mamoru. Ishiusu de hiki, jigama de taku. Mukashi-nagara no seihô o miru [Tofu-kan transmitted from T'ang dynasty China. The Matsumoto Rôho shop at Uji near Kyoto preserves an ancient tradition, grinding with a stone mill and cooking in a caldron. Here you can see the ancient process]. Feb. 21. p. 5. [Jap]
• ***Summary:*** This full-page article contains 20 photos showing each step in the process of making Chinese-style pressed tofu. During the Edo period (1600-1868) the head priest at Manpuku-ji temple in Uji had a lot of visiting monks from China; he may have learned the process from one of them. Soaked soybeans are ground in a traditional stone mill. The soymilk is cooked in a caldron over a wood fire. Firm curds are ladled into many small cloth-lined forming boxes. The cloths are folded over the curds in each box, and the curds are allowed to drain. Then each little packet is removed from its forming box and 6-8 are put in another forming box, where they are pressed under a wooden pressing lid and two heavy stone weights. For seven generations the Matsumoto family in Uji has been keeping alive this tradition, imported long ago from China. The shop's address: Matsumoto Rôho (Matsumoto Tôfukan-shô), Gokasho Shinkai 2, Uji-shi, Kyoto-fu, Japan. Phone: 0774-31-8604. Note: Rôho means "old shop."

10542. *Agri-Book Magazine* (*Exeter, ONT, Canada*). 1994. Far East market can double. 20(5):29. Feb.
• ***Summary:*** Canada is selling more and more soybeans for

© Copyright Soyinfo Center 2013

food uses to East Asia. Thailand is the only country in the region that is self-sufficient in soybean production. Japan (population 123 million) imports more than 1 million tonnes per year, Taiwan imports 250,000 tonnes, Indonesia 150,000 tonnes, Korea 120,000 tonnes, and Malaysia 100,000 tonnes. Singapore and Hong Kong import all the soybeans they use.

In 1993 Ontario produced a record 1.7 million tonnes. Only 500,000 tonnes of this (29.4%) was exported, and only a fraction of that was suitable for making soyfoods such as tofu, natto, soymilk, Taiwanese fermented tofu (*foo yee*), etc. A large color photo shows ladies in Taiwan packing fermented tofu in jars.

Ontario has captured 56% of the Hong Kong market, and about 14% of the Malaysian market. But the Asian market is becoming more competitive because exporters from the USA are beginning to offer soybeans in bags as well as bulk shipments. Michael Loh, the OSGMB coordinator for export development, thinks Canada can achieve its goal of doubling soybean exports by the year 2000.

10543. **Product Name:** [Soyanaise (Plain, or Spicy)].
Foreign Name: Sojanaise (Natur, Gewuerz).
Manufacturer's Name: Albert's Tofuhaus.
Manufacturer's Address: Hauptstrasse 13, D-6719 Lautersheim, West Germany. Phone: 06351-43718.
Date of Introduction: 1994. February.
Ingredients: Tofu, olives, herbs.
Wt/Vol., Packaging, Price: 250 gm.
How Stored: Refrigerated.
New Product–Documentation: Label brought by Albert Hess of Albert's Tofuhaus. 1995. March 11. This product was introduced in Jan/Feb. 1994. Leaflet (11 by 11 cm, 8 panels) brought by Albert Hess. 1995. March 11. "The white side of life... ist die köstliche, leichte, pfiffige Vielfalt aus Soja." (... the delicious, light, artful diversity from Soya). This company makes 3 types of Sojanaise; each contains no eggs, is low in fat, and yet very much like mayonnaise. An illustration on the cover shows a large personified cake of tofu, with smiling face and arms held out.

First International Symposium on the Role of Soy in Preventing and Treating Chronic Disease: Abstracts. Chesterfield, Missouri: United Soybean Board. 27 p. See p. 6. Held 20-23 Feb. 1994 at Mesa, Arizona.
• ***Summary:*** "Soybeans are omnipresent in American life... Last year, the average American consumed only four pounds of soyfoods in the form of soy protein products, tofu, soymilk, tempeh, miso, soy sauce, and soynuts. They consumed over 40 pounds of soybean oil in the form of margarine, salad dressings, cooking oils, and shortening. They consumed 204 pounds of meat, poultry, and eggs. Soybean meal, the most widely used processed feed ingredient in the U.S., is the leading source of protein for meat and poultry animals. To meet this huge demand for soybeans, vast resources are needed. In 1992, 440,000 U.S. farmers planted 59 million acres of soybeans. That's enough to nearly cover the entire state of Arizona. The farm value of the 2.2 billion bushel crop was more that $12 billion dollars. Once farmers sold the 1992 crop, the majority of the soybeans were either crushed into meal and oil, or exported. The meal and oil were valued at $6 billion and $3 billion, respectively. Exports, which historically make up one-third of the U.S. soybean crop, directly reduced the U.S. trade deficit by almost $4.5 billion dollars and indirectly employed 126,600 people. It has been estimated that since 1975, the value of the soybean crop has been about $275 billion in nominal terms. The multiplier affect brings the total impact to the US economy of soybean production to $800 billion." Address: American Soybean Assoc., 540 Maryville Centre Drive, Suite 390, P.O. Box 27300, St. Louis, Missouri 63141-1700.

10545. Badani, Bernard. 1994. Edible soybean mission report, Indonesia, Taiwan, Korea, February 1994. Ottawa, Ontario, Canada: Agriculture and Agri-Food Canada. 23 p. 28 cm. Spiral bound.
• ***Summary:*** Contents: Foreword: Mission objective, countries visited, main goals, conclusion. Acknowledgments. Names of the 8 mission members. Visit to Indonesia (Jakarta): Background, visits (Nestle soymilk plant in Surabaya, BULOG), conclusions, market potential (short, medium, and long term). Visit to Taiwan (Taipei, Taichung, Tainan, Kaohsiung): Background (the pro-American soybean lobby), visits (Taiwan Tofu Manufacturers Assoc., Tet Union Corp., Great Wall Enterprises, Herng Yih), conclusions, market potential (short and medium term). Visit to Korea (Seoul): Background, visits (Hyosung Corp., AFMC, Korean and Seoul Tofu Manufacturing Co-operatives, conclusions, market potential (short and medium term). List of contacts by country (photocopies of business cards). Note: Mr. Badanai works for this federal organization in Ottawa.

This mission, whose coordinator was Michael Loh, took place between Feb. 25 and March 10, 1994; it was organized by OSGMB with assistance from the Canadian Embassies in Jakarta and Seoul, and the Canadian Trade Office in Taipei. The overall objective of the mission was to open these 3 markets to the sale of Special Quality White Hilum (SQWH) soybeans from Canada for use by their soy food industries.

Indonesia imports about 700,000 tonnes of soybeans each year, mostly grade #1 from the USA, to supplement its local production of about 1.3 million tonnes. About 250,000 tonnes of the imports are used to make soyfoods such as tempeh (which accounts for about 80% of the total), tofu, taucho (Indonesian miso), and soybean milk. The majority of their domestically grown soybeans are also used to make soyfoods. All Indonesian soybean imports are

© Copyright Soyinfo Center 2013

handled by BULOG, a government agency which determines yearly requirements and allocates the resulting imports to various companies under a complex price structure formula apparently designed to maintain the competitiveness and full utilization of the domestic crop whose internal prices are very high by international standards. Sarpindo is the largest Indonesian soybean crusher. Nestle operates a soymilk plant in Surabaya that makes 12,000 tonnes/year and is completing a second one of 20,000 tonnes capacity in Jakarta. Much of Nestle's production, especially for the new Jakarta plant, is oriented toward the export market, with the Philippines as their top priority.

Taiwan grows only 12,000 tonnes of soybeans domestically, but they import 2,400,000 tonnes per year. Their main suppliers are the USA (1,938,000 tonnes, 80.8% of the total), China, 297,000 tonnes), and Argentina (6,000 tonnes). Imports are handled mostly by a small number of major crushers, which then select a portion of the #2 soybeans imported, bag them, and sell them to Taiwanese soyfood manufacturers. About 8% of the total imports (200,000 tonnes) are handled in this way. Tofu is by far the most important soyfood in Taiwan, with consumption of 49.79 kg/capita/year. Most tofu is made by very small companies. The main problem facing Canadian exporters is the almost total control that the pro-American soybean lobby has shown so far in Taiwan. This lobby includes the main local crushers/importers of U.S. soybeans (which have a strong interest in maintaining the present import and distribution systems that make local tofu manufacturers dependant on them), and the American Soybean Association (ASA) office (with a staff of 15) in Taipei. Tet (Ttet) Union Corp. in Tainan is the largest crusher in Taiwan. Fwusow (Fwu Sow) is a large edible oil company. Taiwan's largest tofu manufacturer is Herng Yih Food Industrial Co. of Kaohsiung. The 13 year old company has two plants, 14 minutes drive apart.

Korea imports between 1 and 1.1 million tonnes of soybeans a year to supplement domestic production of about 200,000 tonnes. Approximately 200,000 tonnes of the total imports and 20,000 tonnes of domestically grown soybeans are used to make soyfoods, mostly tofu. All soybeans destined for this purpose are purchased by AFMC, the Agricultural and Fisheries Marketing Corporation, a state-owned corporation and government monopoly under the Ministry of Agriculture. that resells soybeans to food processors according to their needs, charging a very high markup over the import purchase price. This markup, in turn, allows AFMC to subsidize purchases of domestic soybeans which it buys at prices close to 5 times the international price but which it resells to tofu manufacturers at the same price as the imported soybeans. It is expected that AFMC will loose its importing monopoly on food grade soybeans by 1997 due to the GATT agreement. An immediate market potential for Canadian soybeans seems to exist for sprouting soybeans, of which Korea purchases about 6,000 tonnes a year. Address: Grains and Oilseeds Div., International Markets Bureau, Agriculture and Agri-Food Canada, Ottawa.

10546. Ohio Soybean Council. 1994. Cooking American favorites with soy. Columbus, Ohio. 16 p. Feb. 24 cm.
• ***Summary:*** This attractive cookbooklet contains many large color photos on thick glossy paper. The recipes are: Beefy tofu enchiladas (with firm tofu and ground beef). Spaghetti surprise (with silken tofu). Calico chili (with whole soybeans). Zesty corn muffins (with soy flour and soy oil). Apple salad & tofu-honey cinnamon dressing. Fresh walleye (a fish, with soy oil). Crispy chicken stir-fry (with soy sauce). Chicken romaine vinaigrette (with soy oil). Cranapple snack bars (with firm silken tofu). Harvest pumpkin bars (with soy flour and soy oil). Cream cheese frosting (with soy margarine).

Talk with Kelly Ollwine, executive secretary for the Ohio Soybean Council. 1996. June 7. This booklet, published in 1994, was developed by Jim Kapp of Yoder, Sullivan & Kapp, a consulting firm in Columbus, Ohio.

Talk with Jim Kapp. 1996. June 7. These recipes were developed by two Ohio home economists, Connie Cahill and Melody Leidheiser. The booklet was published in Feb. 1994. Address: P.O. Box 479, Columbus, Ohio 43216-0479.

10554. Kubová, Anna; Vavrac, Ján. 1994. Re: Soyfoods and vegetarianism in Slovakia. Letter to William Shurtleff at Soyfoods Center, March 23. 2 p. [1 ref]
• ***Summary:*** Only a very small amount of soyfoods are produced in Slovakia. Most of them are being imported from Hungary. Before the war in Yugoslavia, they were also imported from Yugoslavia. There are still worries that building up a bigger soyfoods industry would not be profitable enough, or that domestic supplies of soybeans would be insufficient.

"Tofu is already seen on the market but it is still quite expensive. I (Anna) like tofu but I don't know much about cooking with it. Although I am a supporter and promoter of vegetarianism, I am personally not a total vegetarian. It is still a bit difficult to get used to a vegetarian diet here since vegetarian restaurants and canteens are not easy to reach here (they are only in some cities; unfortunately there are none in Nitra). Therefore it is very difficult to get and eat vegetarian food while being at work. The Slovakian traditional cuisine is based on very tasty meat foods and foods made of flour. We eat very little fresh vegetables even though we know they are good for our health. Tradition and custom are very hard to change. I guess we have already succumbed to these barriers." Address: 1. Dep. of Plant Physiology; 2. Dep. of Plant Protection. Both: Univ. of Agriculture KFR, Tr. A. Hlinku C.2, SK-949 76 Nitra, Slovakia. Phone: +42-87-411 560.

10555. **Product Name:** Farm Foods Pizsoy Pockets [Broccoli & Cheddar, Garden Pizza, Veggie Chicken BBQ, Veggie Pepperoni, Spinach & Mushroom].
Manufacturer's Name: Farm Foods.
Manufacturer's Address: 49 Old Bloomfield Ave., Mountain Lakes, NJ 07046. Phone: 201-334-0101.
Date of Introduction: 1994. March.
Ingredients: Broccoli & Cheddar: Outer crust: Organic whole wheat flour, organic wheat flour, water, canola oil, honey, olive oil, salt, yeast, vanilla extract. Filling: Fat-free soy cheddar (organic tofu, calcium caseinate [derived from non-fat milk], corn and rice starch, sea salt, citric acid, natural flavor, soy lecithin, vegetable gum, annatto), onions, rice starch, water, nutritional yeast, corn oil, salt, garlic powder, spices.
New Product–Documentation: Leaflet (8½ by 11 inch, black-and-white) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 1994. March 10-13. "Pizsoy Pockets: 5 Great Recipes." Each contains a tasty blend of organic grains, tofu, and vegetables. They are completely lactose and cholesterol free. The outer crust ingredients are the same for all varieties.

10556. Hayhow, Sally; Messina, Mark. 1994. The soy solution: Might this humble bean have a critical role in preventing heart disease and cancer? *Vegetarian Times.* March. p. 77-78, 80, 82-84.
• ***Summary:*** A growing body of scientific evidence indicates that soyfoods can help in preventing heart disease and cancer. Soy protein has been shown to reduce the "bad" type of cholesterol, known as low-density lipoproteins (LDL). But the public is largely unaware that eating soyfoods may lower blood cholesterol markedly, thereby reducing heart disease risk. As a result of the lack of publicity given to these important scientific studies, a powerful, palatable form of preventive medicine is not being used.

One long section discusses isoflavones, which are plant estrogens that are only about 1/100,000th as potent

© Copyright Soyinfo Center 2013

as human estrogen. This weak estrogen activity may be responsible for their anticancer effects in hormone-related cancers such as breast cancer. Estrogen increases cancer risk by binding to receptors in breast cells. Isoflavones mimic estrogen, attaching to the receptors, and effectively blocking human estrogen. The most widely used drug in breast cancer treatment, tamoxifen, works in a similar way. Soyfoods are one of the only plentiful food sources of isoflavones.

Six little "sidebar" illustrations explain: Add a quarter pound of cubed, firm tofu to your stir fry: 13 gm of soy protein + 40 mg isoflavones. Pour half a cup of soymilk on your morning cereal: 10 gm soy protein + 20 mg isoflavones. Replace ¼ of the wheat flour in your bread with soy flour: 3 gm soy protein + 5 mg isoflavones (assuming a 3-cup loaf cut into 16 slices). Snack on a quarter cup roasted soynuts instead of peanuts: 18 gm soy protein + 50 mg isoflavones. Add a quarter cup TVP per person to chili: 11 gm soy protein + 35 mg isoflavones. Mix a tablespoon of miso into a cup of water for a warming broth: 1 gm soy protein + 5 mg isoflavones.

10557. **Product Name:** Tofu.
Manufacturer's Name: Kafri-Bari Mashak-Wyler.
Manufacturer's Address: Tal-Shachar 96, 76805, Israel. Phone: 972-8-349-263.
Date of Introduction: 1994. March.
New Product–Documentation: List of new tofu manufacturers in countries where tofu is not well known, sent by Yoshinori Ito of Takai Seisakusho. 1994. Nov. 15. The owner of this new tofu company is David Wyler.

Form filled out by David Wyler, the person in charge at Kafri-Bari. 1995. July 26. The company began to make soyfoods, starting with tofu, in March 1994. They now make 2,400 lb/month of tofu.

10558. **Product Name:** Lightlife Lightburgers (Meatless Burgers).
Manufacturer's Name: Lightlife Foods, Inc.
Manufacturer's Address: P.O. Box 870, Greenfield, MA 01302. Phone: 1-800-274-6001.
Date of Introduction: 1994. March.
Ingredients: Water, textured soy protein concentrate, tapioca starch, natural flavors from vegetable sources, soy sauce, dehydrated onions, isolated soy protein, dehydrated tofu, malt extract, beet powder, vegetable gum.
Wt/Vol., Packaging, Price: 6 oz (2 burgers per package).
How Stored: Refrigerated or frozen.
New Product–Documentation: Leaflet (8½ by 11 inch, color) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 1994. March 10-13. "You'll sell a lot more meatless burgers–once you see the light." Introducing the Lightburger from Lightlife.

Ad (full-page color) in *Natural Foods Merchandiser.* 1994. July. Inserted between p. 72 and 73. "You'll sell a lot more meatless burgers–once you see the light."

Ad (½ page, color) in Vegetarian Times. 1994. Oct., p. 43. "Most veggie burgers taste like, well, veggies." Contains a 30¢ coupon. A color photo shows the front of the package. This ad also ran in Vegetarian Times in 1997 in Feb. (p. 24) and March (p. 42).

Lightlife Foods. 1998. March. "The best tasting meatless burger at the best every day price" (8½ by 11 inch leaflet).

10559. Minnesota Soybean Growers Association; Minnesota Soybean Research & Promotion Council. 1994. Cooking with soy. North Mankato, Minnesota. 45 p. March.
• ***Summary:*** Talk with Christie Metzger of the MSRPC. 1996. Jan. 4. The first edition of this book was published in March 1994. Some of the recipes came from the winners of a contest. Address: 360 Pierce Ave., Suite 110, North Mankato, Minnesota 56003. Phone: 507-388-1635.

10560. Shurtleff, William; Aoyagi, Akiko. comps. 1994. Soy yogurt–Bibliography and sourcebook: 1910 to 1994: Detailed information on 312 published documents (extensively annotated bibliography), 90 commercial soy yogurt products, 104 original interviews (many full text) and overviews, 44 unpublished archival documents. Lafayette, California: Soyfoods Center. 201 p. Subject/geographical index. Author/company index. Printed March 3. 28 cm. [480 ref]
• ***Summary:*** This is the most comprehensive book ever published about soy yogurt. It has been compiled, one record at a time over a period of 19 years, in an attempt to document the history of this subject. Its scope includes all known information about soy yogurt, worldwide, from 1910 to the present.

This book is also the single most current and useful source of information on soy yogurt, since 98% of all records contain a summary/abstract averaging 205 words in length.

This is one of more than 40 books on soybeans and soyfoods being compiled by William Shurtleff and Akiko Aoyagi, and published by the Soyfoods Center. It is based on historical principles, listing all known documents and commercial products in chronological order. It features: 30 different document types, both published and unpublished; every known publication on the subject in every language–including 401 in English, 38 in French, 19 in German, 17 in Japanese, etc.; 104 original Soyfoods Center interviews and overviews never before published. Thus, it is a powerful tool for understanding the development of soy yogurt from its earliest beginnings to the present.

The bibliographic records in this book include 312 published documents and 44 unpublished archival documents. Each contains (in addition to the typical author, date, title, volume and pages information) the author's address, number of references cited, original title of all non-English publications together with an English translation of

© Copyright Soyinfo Center 2013

the title, month and issue of publication, and the first author's first name (if given).

The book also includes details on 90 commercial soy yogurt products, including the product name, date of introduction, manufacturer's name, address and phone number, and (in many cases) ingredients, weight, packaging and price, storage requirements, nutritional composition, and a description of the label. Sources of additional information on each product (such as references to and summaries of advertisements, articles, patents, etc.) are also given.

Details on how to make best use of this book, a complete subject and geographical index, an author/company index, a language index, and a bibliometric analysis of the composition of the book (by decade, document type, language, leading periodicals or patents, leading countries, states, and related subjects, plus a histogram by year) are also included.

Introduction (p. 7-8): There are two basic types of soy yogurt: fermented and non-fermented. The fermented type is usually made from soymilk in the same way as a typical dairy yogurt. The non-fermented type is usually made by blending silken tofu (sometimes with fruits and other ingredients) until it attains the smooth consistency of yogurt–but lacks the sourness.

The idea of making a yogurt from soymilk was first conceived of in 1910 by Li Yu-ying, the remarkable Chinese scientist and soyfoods pioneer who in late 1910 or early 1911 started a soyfoods factory named Usine de la Caseo-Sojaine at Valles near Colombes, on the outskirts of Paris. In Dec. 1910 he applied for a British Patent titled "Vegetable milk and its derivatives." There he stated: "For the fermented milk, the special ferment termed 'sojabacille' is employed or other ferments used for obtaining fermented milks–kephir, yoghourt, koumiss, maya bulgare, and the like..." His patent (No. 30,275) was issued in 1912.

In addition, we know that Li made a fermented soymilk product at his factory near Paris, but we cannot be sure that the this product was actually soy yogurt. Nor do we know the actual French-language name of the product.

Worldwide, there was little interest in soy yogurts from 1911 until about 1981 (see histogram on p. 189); since that time there has been a steady growth of interest, of new products, and of consumption.

At least 90 commercial soy yogurts have been developed worldwide, including 40 in Europe and 34 in the USA.

The world's first soy yogurt of which we can be sure was Soyogurt, developed and launched in 1977 by Robert Brooks and Mary Pung of Swan Foods Corporation / The Soybeanery in Miami, Florida. This delicious fermented soymilk product was sold in plain, raspberry, strawberry, and peach flavors.

Other early American soy yogurts were Soy Yogurt (launched in March 1981 by Aqua Agra of Longwood, Florida), Soymilk Yogurt (April 1982, Current River Soy Products of Doniphan, Missouri), Soymilk Yogurt (April 1982, Trudy de Benedictus of Venice, California), Soy Yogurt (1982, Bountiful Bean Plant of Madison, Wisconsin), Yogo (May 1983, Bud Inc. of Baltimore, Maryland), Farm Soy Dairy Soy Yogurt (Oct. 1983, Farm Soy Dairy, Summertown, Tennessee; they have been making soy yogurt for The Farm community since Oct. 1974!), and Tofruit (Aug. 1984, Eastern Foods Corp., Minneapolis, Minnesota).

The first American soy yogurt to attract widespread mainstream attention was Jofu, a non-fermented product made from silken tofu by Tomsun Foods International (formerly New England Soy Dairy) of Greenfield, Massachusetts. Launched in Dec. 1985 in 7 flavors, it was partially the brainchild of Juan Metzger, a founder of Dannon Yogurt in 1942 and the chairman and president of Dannon until 1981. Metzger had been chairman of the Tomsun board since 1983. During Jofu's first year, Tomsun spent over $750,000 advertising the product under the slogan "It's time to go beyond yogurt." Potential buyers: Those who dislike the sour taste of yogurt, are lactose intolerant, or are watching cholesterol or fat intake.

In mid-December 1986 Tomsun netted about $3.5 million in its first public stock offering–money used largely to improve and market Jofu. By May 1987 Tomsun had orders for 25,000 cases of Jofu per week but could only produce 12,000. It was too much too soon for the small plant. Hopes to raise additional capital were dashed by the U.S. stock market crash in Oct. 1987. On 8 April 1988 Tomsun filed for protection under Chapter 11 of the Federal Bankruptcy Act–a victim of Jofu's runaway success and of trying to expand too fast. The company never recovered.

Europe's first soy yogurts were launched in 1985. The first of these to attract widespread attention was Sojasun, launched in Aug. 1985 by Laiteries Triballat of Noyal-sur-Vilaine, France. This fermented soymilk product came in a host of tantalizing flavors including apricot-guava, raspberry-passion fruit, banana-orange, exotic fruits. In Oct. 1988 the company began advertising the product heavily on French television. The slogan: "Sojasun, the first vital pleasure."

The United Kingdom has become Europe's largest market for soy yogurt, in large part because of the large number of vegetarians and vegans in that country. England's first soy yogurt was Sunrise Soya Milk "Live" Fruit Yoghurt, introduced in July 1987 by Michael Cole of Soya Health Foods Ltd. in Manchester.

Other early British soy yogurts were Yoga (launched in 1986 by the Regular Tofu Co.), White Wave Soya Yogart (May 1987 by Unisoy Milk 'n' By-Products Ltd.), and Granose Soya Yogert (Sept. 1988 by Granose Foods Ltd.).

The largest manufacturer of soy yogurts in the UK today is Genice Foods Ltd., which started in April 1986 as a maker of soy ice creams. Genice develops and manufactures soy yogurts only for other companies; its first product was made in 1989, shortly after it joined the Haldane Foods Group.

© Copyright Soyinfo Center 2013

In 1990 Genice developed a unique process for making pasteurized yogurts that have a 4-month shelf life at room temperature. Today 90% of Genice's business is soy yogurts and only 10% soy ice creams. Genice makes at least 90% of all soy yogurts sold in the UK, a market worth about $3 million a year.

As of 1994 soy yogurt is probably the fastest growing soyfoods category in both the United States and Europe. In America the leading products are the "Dairyless" line of soy yogurts (introduced May 1991 by White Wave of Boulder, Colorado), and Stir Fruity (introduced March 1987 in many flavors by Azumaya, Inc. of South San Francisco). Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 510-283-2991.

10561. **Product Name:** [Tofutissimo (Mountain Herbs, or Plain)].
Foreign Name: [Tofutissimo (Mit Bergkraeutern, or Natur)]..
Manufacturer's Name: Sojarella, Hess und Drosihn GbR.
Manufacturer's Address: Willi Graf Str. 88, 53881 Euskirchen-Kuchenheim, Germany. Phone: 02251-56076 OF.
Date of Introduction: 1994. March.
Ingredients: Tofu (Water, soybeans*), sunflowerseed oil*, lemon juice, herbs*, vegetables*, spices, sea salt. * = Organically grown (*aus kontrolliert biologischem Anbau*).
Wt/Vol., Packaging, Price: 220 gm.
How Stored: Refrigerated.
New Product–Documentation: Labels brought by Bernd Drosihn of Viana. 1995. March 11. Label is 8 by 2 inches. Dark green, black and white on light green (Mountain Herbs), or Red, black and white on light green (Plain). Both with Sojarella logo. It can be used as a spread for bread or can serve as the basis for dressings, sauces, etc. Cholesterol free. Made purely from plant ingredients. Free of casein.

10562. *SoyaCow Newsletter* (*Ottawa, Canada*). 1994. Top Russian government kitchens make soyfoods. 3(1):1. Jan/March.
• ***Summary:*** "In March, six SoyaCows were delivered to Moscow, where most were promptly installed in the kitchens of key government buildings. The sites included: The Russian Council of Ministers (White House), Ministry of Finance, Ministry of Economics, Ministry of Agriculture, and the State Bank.

"At the initiative of Alexander Podobedov, director of the Russian Soybean Association, 'ASSOY,' these pilot operations are building a broad political awareness and will launch the first soyfoods program throughout Russia. In addition to flavoured beverages, the SC-20 systems are providing for soy yogurt, tofu, and baked goods using the 'okara' fibre. Hundreds of top government people have sampled the various products, made with homegrown soybeans, with generally positive results."

10563. *SoyaCow Newsletter* (*Ottawa, Canada*). 1994. Child Haven establishes SoyaCow Centre in India. 3(1):2. Jan/March.
• ***Summary:*** "The SoyaCow Centre has now been established in Ghaziabad, about 30 minutes drive from Delhi, to serve the growing population of SoyaCows in India. The Centre's main objective is to help women in self-employment by producing and selling soymilk and its products at affordable

© Copyright Soyinfo Center 2013

prices.

The Centre promotes a table-top SoyaCow SC-20 machine that makes high-quality soymilk on demand at the cottage industry level, producing 13-14 liters every 30 minutes (using 1.75 kg of soybeans costing about 10 rupees per kg) at a cost of Rs. 2-3 per litre. The SoyaCows, which will be made in India under a technology transfer agreement with Child Haven, include accessories for making tofu from the soymilk.

Letter (e-mail) from Ratan Sharma, PhD of India. 2010. Oct. 11. Ratan established this Centre on 8 March 1994.

10564. **Product Name:** Lite 'n' Less Healthy Pasta Dinners [Macaroni 'n Cheese, Penne Pasta Alfredo, Penne Pasta Primavera, Caesars Italian Garden Vegetable Pasta].
Manufacturer's Name: Soyco Foods. Div. of Galaxy Cheese Co.
Manufacturer's Address: 2441 Viscount Row, Orlando, FL 32809. Phone: 800-441-9419.
Date of Introduction: 1994. March.
Ingredients: Macaroni 'n Cheese: Macaroni: Durum semolina, soy beverage (filtered water, organic tofu*), unhydrogenated liquid canola oil, corn starch, rice syrup solids, natural flavors, casein, calcium phosphate, potassium phosphate, sea salt, citric and/or lactic acids (organic acidulants).
Wt/Vol., Packaging, Price: 12 oz plastic bag.
New Product–Documentation: Ad in Natural Foods Merchandiser. 1992. March. p. 19. "We're back in business!" A color photo shows the two labels. The front panel of each states: "Lactose free. Cholesterol free. Cheese alternative. 1/3 less calories."

Leaflet (8½ by 11 inch, color) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 1994. March 10-13. "Soyco Foods cooks up another first: Healthy pasta dinners." The front shows Lite & Less Macaroni 'n Cheese alternative. The back lists ingredients and nutritional information.

10565. **Product Name:** Superfresh Garden Vegetable [Sandwich, with Tofu].
Manufacturer's Name: Superfresh Foods!
Manufacturer's Address: P.O. Box 883551, San Francisco, CA 94188. Phone: (415) 282-4438.
Date of Introduction: 1994. March.
Ingredients: Incl. tofu, mixed vegetables, tahini, lemon juice, and garlic.
How Stored: Refrigerated.
New Product–Documentation: Talk with lady from Superfresh. 1995. March 16. This product was introduced in about March 1994.

10566. **Product Name:** Sita's Organic Soy Burrito, Chile 'n Soy Cheese Tamale, Chorizo Tamale.
Manufacturer's Name: Three Sisters Natural & Organic.
Manufacturer's Address: 3139 Roosevelt St., Carlsbad, CA 92008. Phone: 619-729-2528.
Date of Introduction: 1994. March.
Ingredients: Soy Burrito: Organic sprouted pinto beans, organic brown rice, filtered water, organic soy cheese, organic tomatoes, organic onions, garlic, spices, sea salt.
Wt/Vol., Packaging, Price: Burrito–7 oz. Cheese Tamale–4 oz. Chorizo Tamale–4 oz.
New Product–Documentation: Leaflet (8½ by 11 inch, color) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 1994. March 10-13. "Organic Sita's Burritos & Tamales." "The only Mexican food available with sprouted beans." The front shows the label of each product; the back shows the ingredients.

10567. Vitasoy International Holdings Ltd. 1994. New issue of 127,200,000 shares of $0.25 each at $2.28 per share: Prospectus. Hong Kong: Vitasoy International Holdings Ltd. 94 + 94 p. March 15. 28 cm. [Eng; Chi]
• ***Summary:*** This prospectus announces the first public sale of Vitasoy stock. Half the prospectus is written in English and the other half in Chinese. The sponsor and manager of this initial public stock offering is Wardley Corporate Finance Limited. Underwriters: Wardley Corporate Finance Limited, and Schroders Asia Ltd. The symbol "$" refers to Hong Kong dollars unless otherwise indicated; 7.8 Hong Kong dollars = 1 U.S. dollar, and the exchange rate is fixed.

Contents: Summary. Expected timetable. Definitions. Preliminary. Conditions of the new issue. Share capital. Indebtedness. Risk factor. Directors and corporate information. Parties involved in the new issue. Information relating to the Group: Introduction, corporate structure, history and development (see separate record), strategy, brands, market share and competition, marketing and sales, operations, tofu, Guang Ming Farm, Gardner Merchant, financial information, future plans and prospects, directors, management and staff, trademark valuation, profit and dividend forecasts, proceeds of the New Issue and working capital, adjusted net tangible assets and net assets. Appendixes: 1. Accountants' report. 2. Profit forecasts. 3. Trademark valuation. 4. Property valuation. 5. Statutory and general information. Prospectuses and application forms. Procedure for application.

Financial summary (in million Hong Kong dollars): Turnover (sales) has grown from 795 in 1991 to 912 in 1992 to 996 in 1993. Profit before taxation has grown from 43.8 in 1991 to 88.6 in 1992 to 108.8 in 1993. The company has 5 executive directors and 4 non-executive directors. All of the directors have British, Australian, U.S., or Canadian nationality. Three of the 5 executive directors are children of the founder, K.S. Lo: (1) Mr. Winston Lo Yau Lai, age 52, of Hong Kong (British nationality). Frank graduated from the University of Illinois with a BS degree in Food

© Copyright Soyinfo Center 2013

Science, then earned his MSc degree in Food Science from Cornell University in New York; (2) Mr. Frank Lo Yau Ki, age 54, of Hong Kong (British nationality). Frank attended Queensland Agricultural College where he obtained a diploma in dairy manufacturing before joining the group in 1965; (3) Ms. Yvonne Lo Mo-Ling, age 45, of San Francisco (California; USA nationality). Yvonne is president of the Group's operations in the USA and has been responsible for them since 1980. She received a BA degree from Oberlin College in Ohio and took undergraduate studies in Urban and Regional Planning at the University of Toronto in Canada.

Brands: Vitasoy soybean milk is the Group's principal product. Sales (in million Hong Kong dollars) were $337.4 in 1991 (42.5% of total sales), $397.0 in 1992 (43.5% of total), and $411.6 in 1993 (413% of total sales). Sales of tofu and other food products were $32.9 (US$4.21 million) in 1991, $50.2 (US$6.44) in 1992 and $50.7 (US$6.5) in 1993.

In terms of turnover (sales) by geographical area, Hong Kong is by far the leading area with 78.9% of total worldwide turnover ($995 million) in 1993, followed by North America (12.0%), Macau (2.4%), Singapore (2.2%), PRC (1.6%), Australia/New Zealand (1.6%), and others (1.1%).

Senior management includes: Mr. Jerry Maynard, age 43, who is president of Nasoya. He joined the group in 1988 and became president of Nasoya in Sept. 1993. Mr. Michael Ho, age 38, is president of Azumaya. He joined the Group in 1982 and became president of Azumaya in June 1993.

Trademark valuation: An independent valuer has valued them at HK$260 million.

Assets: The main trade marks are Vitasoy, Vita, Balanz, Azumaya, and Nasoya. Tangible: $781 million. Net assets: $1,051 million.

Subsidiaries: Value of issued and paid up share capital: Vitasoy (U.S.A.) Inc. US$12.0 million. Nasoya Foods Inc. US$6.346 million (incorporated 13 July 1990). Azumaya Inc. US$6.5 million (incorporated 1 July 1969).

Properties: The main property, located at No. 1 Kin Wong St., Tuen Muen, New Territories, has a capital value of HK$140 million on 28 Feb. 1994. This is a 17-story industrial building, completed in 1986, on a site of 33,250 square feet (3.089 square miles). It has a total gross floor area of approximately 311,815 square feet, including 38 lorry parking spaces and 22 private parking spaces. The property is held from the Government under New Grant No. 2606 for a term extending to 2047. The current ground rent is $600 per annum. The Azumaya rental property comprises 37,172 square feet of interior floor space on 2 acres of land. Monthly rental is about $20,000. Address: No. 1, Kin Wong Street, Tuen Mun, New Territories, Hong Kong. Phone: 466 0333.

10568. Vitasoy International Holdings Ltd. 1994. History and development (Document part). In: New issue of 127,200,000 shares of $0.25 each at $2.28 per share: Prospectus. 1994. Hong Kong: Vitasoy. 94 + 94 p. See p. 14-15. March 15. 28 cm. [Eng; Chi]

• ***Summary:*** The Company, originally named Hong Kong Soya Bean Products Company Ltd. was founded in March 1940 by four men, Mr. (later Dr.) Lo Kwee Seong, Mr. Shiu Wai-Ming, Mr. Chan Nam-Cheong, and Mr. Kwan Yim-Chor. The Company's first product, named Vitamilk, was first sold in Hong Kong just prior to the outbreak of World War II. Note: Production began on 9 March 1940. Vitamilk was fortified with calcium, cod-liver oil, and vitamins, and sold in small milk bottles. Production of Vitamilk ceased during the War, but after the War the Company relaunched Vitamilk, which was then produced at and sold from, small premises in Causeway Bay. 1950–The Company moved to new premises in Aberdeen to keep up with growing sales; it now had increased production capacity and facilities for research and development. At the same time the Company became the franchisee for Green Spot, an orange flavoured soft drink. Green Spot proved highly popular in Hong Kong and provided the company with the opportunity to gain important experience in pasteurization and sterilization techniques. 1953–This new expertise led to the Company's development of a sterilized version of Vitamilk, which had a longer shelf life. At the same time the product was renamed Vitasoy in English and repackaged in narrow-necked soft drink bottles, which replaced the traditional milk bottles. Note: In 1953 the company first began to work with UNICEF to popularize the use of soy beverages in developing countries. 1957–The Pepsi-Cola franchise replaced the Green Spot franchise.

1960–The image of Vitasoy as a nutritious quality product received a boost when UNICEF became aware of the attractions of a high protein, vitamin enriched soybean milk for use in developing countries. 1961–An additional soymilk production plant was opened in Kwun Tong to keep up with rapid increases in sales of Vitasoy. 1962–The introduction of a malt Vitasoy helped lead to further increases in sales. From 1955 to 1970 sales of Vitasoy grew from approximately 12 million bottles to approximately 60 million bottles per annum.

1970s–The Company continued to expand and develop. 1975–A major development was the adoption of a new Tetra Pak packaging process, which brought many benefits. "In addition to enhancing the quality of the product, the new light and disposable packaging meant that Vitasoy could be sold in the non-returnable soft drinks market which significantly reduced both the delivery costs of the product and the costs associated with collecting returned bottles. The new packaging also offered greater scope for innovative design which assisted in marketing the Company's products. To coincide with this technical innovation, in the mid-1970s the Company repositioned Vitasoy in the market by promoting it as a soft drink as well as a milk substitute. The remainder of the 1970s saw the Company's product base

© Copyright Soyinfo Center 2013

expand away from Vitasoy and malt Vitasoy.

1976–A range of fruit juice drinks was introduced under the vita brand name. These were also packaged in Tetra Pak cartons and initial flavors included orange, lime, mango, and guava. 1976–The Company decided to relinquish the Pepsi-Cola franchise in favor of producing its own range of carbonated drinks, again under the Vita brand name. The carbonated products, which included cola, orange, lemon lime, and cream soda, were initially sold in returnable bottles and subsequently also in the form of fountain syrups. Both Vita Juice drinks and Vita carbonated drinks won immediate consumer acceptance upon their introduction. 1977–Exports to Australia began. 1978–Vita Juice drinks now have over 30% of the Hong Kong fruit juice drinks market. 1978–The Company moved its Aberdeen production facilities to Heung Yip Road in Aberdeen. 1978–The Company launched a line of traditional teas, the first of which was chrysanthemum, which were sold under the Vita brand and packaged in Tetra Pak cartons.

1979–The Company began a further significant diversification of its business by entering into an agreement with Guang Ming Farm [at Shenzhen, just inside China]. Under the initial agreement, which was for a term of 5 years, and subsequent revisions to this agreement, the Company obtained the rights to market and sell most of the farm's fresh milk output in Hong Kong and Macau. Today the farm produces approximately 55% of all fresh milk sold in Hong Kong.

The late 1970s and early 1980s were characterized by the Company's push into overseas export markets. Each of these export markets took time to develop, both in terms of developing consumer awareness of the Vitasoy and Vita products and particularly in identifying the most suitable and effective distribution channels. 1979–Exports to Papua New Guinea and to Canada began. 1979 Jan. 15–Vitasoy (U.S.A.) Inc. is incorporated.

1980–Exports to the United States began. 1982–In the United States, the Company established its own distribution operations. 1982–Exports to Singapore began. 1985–The Company acquired the operations of its Singapore distributor to gain greater control over and more efficient distribution of its products. 1987–Due to growth of operations, the Company opened a new head office and principal manufacturing facility in Tuen Mun. 1989–The Company acquired a 12% equity stake in its contract packer in Papua New Guinea to gain greater control over and more efficient distribution of its products.

1990 Sept. 24–The Company name is changed to Vitasoy International Holdings Ltd. from Hong Kong Soya Bean Products Co. Ltd. 1990–The Group made the first of two significant diversifications from its traditional business by entering into a joint venture with Gardner Merchant to provide large-scale contract catering services in Hong Kong. Gardner Merchant, headquartered in the United Kingdom, is one of the leading contract catering firms in the UK; the Group has a 40% interest in the joint venture.

1990 Aug.–In its second diversification the Group entered into the manufacture and distribution of tofu in the United States through the purchase of Nasoya, based in Leominster, Massachusetts on the east coast of the United States. 1993 May–The Group acquired Azumaya, a large tofu manufacturer based in San Francisco, California, with a distribution network covering the west coast and mid west of the United States. These acquisitions have not only made the group a [sic, the] leading manufacturer and distributor of tofu in the United States but have also provided the Group with an extensive distribution network throughout the United States and Canada for its other products. 1992–Distilled water was launched under the Vita brand.

1994 Feb.–The Group opened a new production facility on a site at Guang Ming Farm at Shenzhen in the PRC [China] to replace the group's plant in Aberdeen. The Shenzhen plant, which has been built and will be operated pursuant to a joint venture with Guang Ming Farm, is currently operating at partial capacity and is expected to be fully operational by the middle of 1994. The Group's old production and packaging facility at Aberdeen is currently being leased by the Group to provide production capacity unti the Shenzhen plant becomes fully operational. At that time the Group will cease to lease the facility at Aberdeen and all beverage production will then be at Tuen Mun and Shenzhen. Address: No. 1, Kin Wong Street, Tuen Mun, New Territories, Hong Kong. Phone: 466 0333.

10569. **Product Name:** Yves' Original Bagel Dog, or Chili Bagel Dog.
Manufacturer's Name: Yves Veggie Cuisine.
Manufacturer's Address: 1138 East Georgia Street, Vancouver V6A 2A8, B.C., Canada. Phone: 604-251-1345.
Date of Introduction: 1994. March.
Ingredients: Bagel Dog: Veggie Wiener: Water, soy protein isolate, wheat gluten, tofu (water, organic soy beans, magnesium chloride), wheat starch, sea salt, ground mustard, guar gum, natural liquid hickory smoke, beet powder, paprika, brown rice syrup solids, wheat germ, spices. Bagel: Whole wheat flour, unbleached white flour, water, vinegar, yeast, malt, sea salt.
Wt/Vol., Packaging, Price: 4.4 oz (125 gm).
How Stored: Frozen.
New Product–Documentation: Leaflet (8½ by 11 inch, color) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 1994. March 10-13. "Two great ideas. A great new meal. Introducing Yves' Original Bagel Dog. Yves' famous fat-free Veggie Dog, hand-wrapped in a whole-wheat bagel and baked to perfection." Front side shows a color photo of 3 bagel dogs. Back side gives ingredients and nutritional information.

• ***Summary:*** In this box lunch, which retails for 1,000 yen at the Bullet Train line in Kyoto, there are 7 soyfoods: Seasoned, cooked rice with soybeans. Cooked and seasoned tofu burger (*ganmo*). Fried dried-frozen tofu (dusted with flour). Cooked black soybeans. Tofu shûmai (*shao-mai* steamed dumplings filled with tofu). Fried okara. Fresh yuba. Sesame tofu. An illustration shows the placement of foods in the octagonal box. With the recent boom in healthy foods in Japan, the popularity of this lunch among women has increased sharply.

10571. Schmitz, Tom. 1994. Tofu cook believes she nourishes body and soul: Linda Lam, tofu maker. *Mercury News* (*San Jose, California*). April 3. p. 1E, 3E.
• ***Summary:*** A large color photo shows Linda Lam and her husband Thom Tran at their Fuji Fresh Tofu Co. in Japantown, San Jose. They make tofu 6 days a week, as well as tofu pudding, soymilk (in plastic quart jugs), tofu spring rolls, Okinawa tofu, and Peking tofu. Linda Lam learned to make tofu as a girl in Vietnam, where she was taught by the monks at her local Buddhist temple. She stayed at the monastery during school vacations, preparing meals and studying the scriptures. "Three decades later, Lam remains a devout Buddhist. And her faith in tofu is equally strong." She and her family are vegetarian. She uses nigari as a curding agent in making her tofu.

Before leaving Vietnam in 1979, she worked as a high school teacher. Later she ran a catering service.

10572. Palmer, Jane. 1994. Soybeans: From tiny pods come big gains in the field of medical research. *World-Herald* (*Omaha, Nebraska*). April 6. p. 37-38. Living section.
• ***Summary:*** Dr. Connie LaBarr, director of consumer information for Nebraska Soybean Program in Lincoln discusses new medical research linking soybeans with the prevention and treatment of diseases such as cancer, heart disease, and osteoporosis. She notes that "The soybean genistein has been called the 'magic bullet' in the fight against cancer."

One sidebar titled "Joy of Soy Can Be Sampled at Home" gives recipes using whole dry soybeans, tofu, miso, and soynuts. Another sidebar titled "Soy Pops Up in Product After Product" lists the many products in a typical Omaha supermarket that use soy as an ingredient. Address: World-Herald Food Writer.

10573. Begley, Sharon; Springen, Karen; Hager, Mary. 1994. Beyond vitamins: Just a few years ago, scientists didn't know phytochemicals existed. But today they are the new frontier in cancer-prevention research. *Newsweek* 123:44-46. April 25.
• ***Summary:*** A pull-quote states: "Soybeans, whether as miso soup or tofu or straight up, contain genistein. This phytochemical seems to keep tiny tumors from getting connected to capillaries that carry oxygen and nutrition. Without these supply lines, the tumor never grows, metastasizes–or kills."

Most small tumors are not dangerous. The "danger lies in lumps that grow, invade the bloodstream and send colonists throughout the body. That is how breast, prostate and other solid tumors kill. But the original lump cannot grow without supply lines–capillaries that bring oxygen and other nutrients. Last year German researchers announced that they had isolated a chemical in soybeans that prevents these vital supply lines from forming. Called genistein, it might one day be copied in the lab and given to people to prevent small tumors from growing. In fact, the lack of genistein may explain why Japanese men who relocate in the West and adopt a soy-poor diet for even a few years have a greatly elevated risk of prostate cancer: without genistein, tiny tumors are no longer deprived of the blood vessels that let them grow."

During 1993, some 1.17 million new cases of cancer were reported in the United States. The National Cancer Institute is so excited about phytochemicals that it has launched a multimillion dollar project to find, isolate, and study them.

Broccoli contains many cancer-preventing phytochemicals. Sulforaphane (which is also found in cauliflower, Brussels sprouts, turnips, and kale) removes carcinogens from cells. Cooking does not destroy it, and an improved version has now been synthesized. PEITC prevents carcinogens from binding to DNA. And indole-3-carbinol helps a precursor to the hormone estrogen break up into a benign rather than a cancer-causing form.

Citrus fruits, berries, and many other fruits and vegetables contain flavenoids [flavonoids], which help cancer-causing hormones from latching onto a cell.

Tomatoes, strawberries, pineapples, and green peppers are a rich source of p-coumaric acid and chlorogenic acid, two phytochemicals that work by disrupting the chemical union between two common molecules in calls; this union can produce a carcinogen.

A one-page sidebar titled "Are supplements still worth taking?," by Geoffrey Cowley, notes that millions of health-conscious Americans consume antioxidant vitamins, revered for their power to subdue free radicals. In 1993 alone store sales of vitamin E supplements grew by 39% to $123 million, vitamin C grew by 10% to $117 million, and beta-carotene (vitamin A) grew by 31% to 22 million.

10574. Rose, Richard. 1994. The cheese alternatives industry and market in America. Part I (Interview). *SoyaScan Notes.* April 25. Conducted by William Shurtleff of Soyfoods

© Copyright Soyinfo Center 2013

Center.

• ***Summary:*** Note: We define cheese alternatives as those which contain a major protein source (such as soy protein or nut protein) in addition to or in place of dairy protein.

Milestones (arrived at jointly by Soyfoods Center and Richard Rose): The soy cheese and cheese alternative category in America started with Soyarella, which was introduced in March 1985. Though expensive, the product was a runaway success, in part because the label claimed (incorrectly) that it contained no casein or other dairy products. Its success alerted other soyfoods companies to the potential of soy cheese. The first major soy cheese to hit the market was Soya Kaas, introduced in Jan. 1986 by Richard McIntyre of Swan Gardens Inc. In June 1986 Mozzarella Style Tofu-Rella was introduced by Richard and Sharon Rose of Brightsong Foods–which had become interested in the category because of Soyarella (not Soya Kaas). The company later became Sharon's Finest and the product was renamed TofuRella. In Oct. 1986 Original Pizsoy (a whole-wheat pizza topped with soy cheese) was introduced by Tree Tavern Products; It was the first product in which soy cheese was used as an ingredient. In Jan. 1987 Soymage was introduced by Soyco Foods, a Division of Galaxy Cheese Co.; This was Soyco's first soy cheese product and the first soy cheese that contained no casein. In April 1987 NuTofu was introduced by Cemac Foods Corp. This was Cemac's first soy cheese product. In April 1988 Soyco shreds and slices were introduced–the first soy cheese shreds and slices. In Jan. 1991 Fat-Free Soyco was introduced–the first fat-free soy cheese. In Dec. 1992 Almond Cheese was introduced by Wholesome & Hearty Foods–the first major non-soy cheese alternative. In April 1994 VeganRella (made from Brazil nuts) was introduced by Sharon's Finest–a true non-dairy non-soy cheese with excellent flavor.

In the cheese alternatives market, about 98-99% of the products contain casein (milk protein, which makes the cheeses melt) and only 1-2% are truly non-dairy (free of casein). About 95% are hard cheeses and 5% are soft cheeses, mainly cream cheeses, About 95% are soy cheeses and 5% are nut cheeses without soy.

Big American food companies make basically two types of imitation cheeses. The first is a filled cheese in which vegetable oil is used to replace butterfat. The product is positioned as inexpensive rather than low-cholesterol. Roughly 98% of these products are sold to food processors, foodservice organizations, and restaurants, and only 2% to consumers. The market size is about $500 million. The second is fat-free dairy cheese (the butterfat is replaced by non-fat ingredients such as gums), such as FREE made by Kraft or Healthy Choice from ConAgra. Both are widely sold in supermarkets to the tune of $50 million to $100 million.

The size of the natural foods cheese alternatives market in the USA is about $15 million/year at wholesale and $25 million/year at retail; this is the equivalent of about 5 million lb/year. The largest manufacturers (Mfg.) and primary marketers (Mar.; they buy a private labeled cheese from a manufacturer who must sell exclusively to them) are: 1. Soya Kaas, Mfg., $6 million/year wholesale. 2. Sharon's Finest, Mar., $3 million/year wholesale. Their source is confidential. 3. Cemac / NuTofu, Mfg., $2 million/year wholesale. 4. Galaxy / Soyco Foods, Mfg., $2 million/year wholesale. 5. Phil Leisac & Sons of Portland, Oregon, Mfg. They are owned by or involved with Pacific Foods of Oregon, and make Almond Cheeze for Wholesome & Hearty of Oregon and Soy Gourmet for Patrick Cochran of Nutrition Specialties International, Inc. of Riverside, California.

The major secondary marketers of soy cheeses as such (they must buy from one of the above companies) are: White Wave and Rosewood Farms. Companies that make important foods that use soy cheese as an ingredient in foods are: Imagine Foods (Ken & Robert's Veggie Pockets), Farm Foods (Pizsoy and Pizsoy Pockets), Cedarlane Foods, Amy's Kitchen Inc. (Pot Pies), Rademacher–Worley Farms of Sonoma County (Solar Tacos). The main types of foods in which soy cheese are used as an ingredient are pizzas, pockets, and other. Since soy cheeses and other cheese alternatives are a major part of the natural foods market, any company that develops a product containing cheese must seriously consider using a cheese alternative, which contains little or no cholesterol or lactose, and usually less fat and calories.

The cheese alternatives market is has grown at the rate of about 20% a year for the past 3 years, but now it is starting to level off.

Most people who buy cheese alternatives (estimated 60% of the total) are those who prefer not to eat dairy products and mistakenly believe that these products are non-dairy products. This the market is based on consumer misunderstanding and deception. Labels promote "Cholesterol free and lactose free" because they don't want to say "dairy free." Yet only an estimated 20% of the products are purchased primarily because they are free of cholesterol, and lower in fat, saturated fat and calories. Another 20% are purchased for other reasons (such as lactose free). Of the buyers, an estimated 20% are vegans, 60% are vegetarians, and 20% other. As for outlets, an estimated 75% are sold at natural- and health food stores and 25% at supermarkets. Sharon's Finest sells their cheese alternatives at every Trader Joe's, and at many Lucky, Vaughns, and Ralphs supermarkets in the Los Angeles area. Most of the other manufacturers also sell in some supermarket chains, especially in their geographical region. Wildwood Natural Foods sells NuTofu at each of their sets in Safeway supermarkets in California. Continued. Address: President, Sharon's Finest, P.O. Box 5020 (616 Davis St.), Santa Rosa, California 95402-5020. Phone: 707-576-7050.

10575. Rose, Richard. 1994. The cheese alternatives industry

© Copyright Soyinfo Center 2013

and market in America. Part II (Interview). *SoyaScan Notes.* April 25. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Cheese alternatives retail for about 1.5 to 2 times as much as their regular dairy cheese counterparts–but the price difference is decreasing. Soya Kaas retails for about $4.90 for 12 oz ($6.53/lb) in California. TofuRella cheddar retails for $2.75 for 8 oz. ($5.50/lb). Dairy cheddar retails for about $2.50–$3.20 a lb. The cheese alternatives are more expensive because relatively small quantities are sold, the market is small, and their ingredients are more expensive. Richard's non-soy cheeses with casein (such as AlmondRella) are about 10% to 20% more expensive than his soy cheeses with casein (such as TofuRella). The difference is small in part because Sharon's Finest takes a smaller markup on AlmondRella; soybeans are, of course, much less expensive than almonds. Richard's non-soy non-casein cheese (VeganRella) is more expensive (10-50%) than AlmondRella, again because of the economies of scale. Casein now costs about $1.60/lb.

The biggest company that makes powdered tofu (the main soy ingredient in many soy cheeses) is DMV USA (basically a cheese company owned by Danes) in La Crosse, Wisconsin (Agronico does the spray drying for DMV; Ed Pedrick brought know-how and maybe technology from Clofine), followed by Clofine in Linwood, New Jersey. Pedrick now works for some company in Iowa–maybe Devansoy (formerly Solait International, before that Miller Farms Food Co.). Richard does not think that St. Peter's Creamery presently sells to this market. Richard thinks that these companies curd the soymilk before they spray-dry it.

Sharon's Finest is growing nicely. They are in the INC. 500 this year with annual sales of about $3 million a year. Last year's sales did not increase much over the previous year, but this year Richard predicts a 50% sales increase, based on predicted large sales of VeganRella–in both hard cheese and cream cheese consistencies. Richard believes that VeganRella will outsell his TofuRella in 2 years, and become America's leading brand of cheese alternative in 2 years–including Soya Kaas. All kinds of people, including kids, really like VeganRella. The company's best-selling product is TofuRella (all flavors), followed by slices, then Zero-FatRella. All of Wholesome & Hearty's non-soy business (Almond Cheeze and White Almond Beverage) only accounted for $700,000 in sales last year.

Concerning the outlook and forecast for the cheese alternatives market in the USA, Richard sees the market maturing, with steady upward (but slower) growth of about 10% a year, and moving more toward truly non-dairy products that contain no casein. There is presently little or no room for new companies to enter the category, prices will start to drop, marginal or "me too" products (like Soy Gourmet) will not survive, and more consolidation (within 1-2 years Galaxy will not be selling to the natural foods market; now most of their products sell only because retailers want their Soymage and Parmesan).

Cheese alternatives have been slower to catch on in Europe than in America, even though per-capita cheese consumption is higher in Europe, because European retailers and consumers have not been deluded into thinking that a product can contain casein and still be dairy free. If they want to sell a cheese-like product that contains casein, they would be likely to sell a rennetless vegetarian cheese. Sharon's Finest used to sell its products to a distributor in the UK [The Redwood Company], but Richard found that retailers and consumers said "It has casein. Why bother?" The company that Sharon's Finest sold to in the UK was implicated in the death of an Indian boy who (Richard heard) died of suffocation when left alone by his grandmother eating soy cheese (he was not allergic to the casein in the product). There was no trial. Richard sees a big potential market for his VeganRella in Europe. Richard thinks he can make a better, cost competitive product from Brazil nuts than from soybeans. Soy causes some flatulence problems. Richard donates a portion of the profits from sales of VeganRella to Earthsave, which both a vegan and an environmental organization. On the back of the VeganRella is an Earthsave logo and Earthsave is supporting the product.

Talk with Richard Rose. 1997. March 16. The truly non-dairy cheese alternatives which contain no casein (such as Vegan-Rella and Soymage) have not caught on in America; they are more popular in Europe. Vegan-Rella is now Sharon's Finest slowest selling cheese alternative. Address: President, Sharon's Finest, P.O. Box 5020 (616 Davis St.), Santa Rosa, California 95402-5020. Phone: 707-576-7050.

10576. Van Rysdam, Casey. 1994. New developments with Soya Kaas and cheese alternatives (Interview). *SoyaScan Notes.* April 26. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Soya Kaas, Inc., which was owned by Richard McIntyre and his wife, no longer exists. Previously it only existed on a piece of paper from the viewpoint of trademark registration. Soya Kaas, the cheese alternative, is now manufactured by a company named Swan Gardens in Atlanta, Georgia. "In February 1992, when the McIntyres decided to sell their business, American Natural Snacks (ANS) worked with them to structure an agreement that met the needs of both parties. We were both pleased with the result and it was a true 'win-win.'" Richard is no longer affiliated with Swan Gardens, but he continues to have a very good relationship with the company. ANS had been the exclusive national marketing and distributing company for the brand. So when Richard decided he wanted to leave the company, ANS was the logical choice to buy it (though they did not buy the building, which they still rent from Richard). From the standpoint of the trade and of consumers nothing really changed after the sale. The invoicing, the shipping,

© Copyright Soyinfo Center 2013

etc. remained the same. Swan Gardens is now an operating division and wholly owned subsidiary of ANS, and ANS is a wholly owned subsidiary of Tree of Life. Tree of Life is a publicly owned company because its parent company [Royal Wessanen, NV, The Netherlands] is publicly owned.

"Richard is an incredibly bright and innovative person. He is one of those rare people who can see a new idea, grab it, identify it, and make it a commercial reality. He had already visualized and developed his own soy cheese, Soya Kaas, and taken it past the laboratory stage when Soyarella was introduced. He did not get the idea from Soyarella. He both an excellent entrepreneur and a good manager and businessman. He built Swan Gardens into a strong, well-managed business."

ANS has two basic activities: Food manufacturing and contract packaging of bulk foods for sister companies that are distribution divisions (everything from rebottling of oils and Japanese shoyu and tamari to bulk trail mixes). They are a national manufacturer and marketer of confections, with lines like Carafection, Cocofection, Chocofection, Chatfields, products like carob and chocolate chips that are malt-sweetened and dairy free, alkaline-free cocoa powder. They sell these products nationally to both Tree of Life and to Tree's competitors. They have 5-6 national brands and about 50 products (SKUs), and Soya Kaas is one of the major brands.

Within the Soya Kaas family are the core items (12), bulk in 7-lb loaves, 2 shredded items, 3 cream cheeses, 2 Veggie Kaas spreads (without casein, but they have never promoted it as "dairy free"). A new item will be Soya Kaas slices; most sliced cheeses are extruded, not sliced, and they are made on equipment that is extremely expensive–whether or not the slices are individually wrapped.

One of the challenges Casey's business has been marketing Soya Kaas fairly and honestly with respect to the milk protein issue, without detracting from its potential. The current labels always state clearly that the product contains casein which is a milk protein, and it does not say "Dairy Free" (which would be legal). Yet neither does it say "Warning! A cow died for this product" [which is, of course, not true]. His company has consumer flyers that tell the story of caseinate, explaining what it is, where it comes from, and why it is used in Soya Kaas products. Casey agrees that many people who consume cheese alternatives that contain casein think (mistakenly) that they are truly non-dairy products.

Casey wonders whether the soy oil used in many cheese alternatives is hydrogenated or unhydrogenated. He works very hard and it costs him more money to be sure that the oil in Soya Kaas is not hydrogenated. Consumers want unhydrogenated oil since they believe it is safer.

Follow-up letter (fax) of 6 May 1994 in response to enquiry. Over the last two years, as packaging ran out and they reordered or redesigned labels, they stated in the ingredients listing that casein is a milk protein. In July 1989 the Soya Kaas plant moved to its present location at 6029 Lagrange Blvd. in Atlanta. It had previously been at 218 Laredo Dr., Decatur, Georgia 30330. Address: President, American Natural Snacks, P.O. Box 1067, St. Augustine, Florida 32085-0410. Phone: 904-825-2057.

10577. Messina, Mark J. 1994. New developments with soyfoods. Do soyfoods prevent cancer? (Interview). *SoyaScan Notes.* April 27. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Mark sees more of ASA's interest in soyfoods coming from individual state soybean boards rather than from the headquarters in Missouri. One good example is the fine work of Jim Weyer and Connie LaBarr of the Nebraska Soybean Program. Jim was the first person to ever invite Mark to speak. The ASA (American Soybean Association) has a food advisory panel which is completely focused on soy oil. Mark wishes ASA would establish a separate panel to discuss and promote soyfoods.

Mark is now working on a new book about the health benefits of a vegetarian diet. It will be published by Harmony Books in New York–a publisher which is very interested in vegetarianism and was willing to give a good advance for the book.

Mark believes that when the people in a culture consume 4-6 ounces a day of tofu, that will lower the cancer risk of the population significantly. The basic message of his new book, *The Simple Soybean and Your Health,* is that one serving of soyfoods (any kind, ideally tofu or soymilk) each day will have a protective effect. "But our present knowledge would not allow us to say that 20 mg/day of genistein would have some specified amount of protective effect."

Mark pronounces daidzin and daidzein as DAYD-zin and DAYD-zeen respectively. Some scientists pronounce the latter word DAYD-zain.

Mark thinks it would be a good idea–but a bold step–for tofu manufacturers to write "Contains genistein" on their tofu packages. It is certainly legal, as long as no claims are made about genistein. The question is how many people who buy tofu know what genistein is? Mark thinks that genistein is the one biologically active substance that would be best to put on the front of a product. Phytic acid binds minerals, and protease inhibitors are still thought of as antinutritional factors.

"If the cancer preventing effect is real in humans, it is probably due to genistein. But I have no idea whether or not it is real. It is all conjecture at this point. I don't put any faith in the animal research. It's part of what you have to do to develop a hypothesis because everybody else is going to be looking at it. I don't think the animal studies are particularly impressive at this point. There is good reason to think that consuming soyfoods may reduce cancer risk and it will probably lower your cholesterol and saturated fat

© Copyright Soyinfo Center 2013

content. There is apparently no down-side to eating soyfoods and there is a considerable up-side to it. We may eventually find out that the effect is valid only if people consume soy from an early age. The strongest studies are those done in vitro, but there are many problems extrapolating those results to humans. I only wish the soyfoods industry would take advantage of this window of opportunity, where people are talking about the possibility that soy prevents cancer, to get people to taste their products. Even if it turns out 5 years from now that soy doesn't prevent cancer, people will probably continue to consume the soyfoods, and realize many other health benefits." Address: PhD, Libertytown, Maryland 21762. Phone: 301-898-5769.

10578. *SoyaScan Notes.* 1994. Prices of cheese alternatives and dairy cheeses in California, April 1994 (Overview). April 27. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** At Berkeley Natural Grocery Co., a large natural food store at 1336 Gilman St. in Berkeley, California, cheese alternatives retail for the following prices: Soya Kaas–Mozzarella $4.75 for 12 oz (the equivalent of $6.33/lb), Soy-A-Melt–Monterey Jack or Cheddar (from White Wave) $2.49 for 8 oz ($4.98/lb), Soyco Lite 'n Free–Jalapeno $2.89 for 8 oz ($5.78/lb), Mello Bros.–Garlic & Herb (Ignacio, California) $2.39 for 8 oz ($4.78/lb). The average price of these four cheese alternatives is $5.46/lb; the average price of all except Soya Kaas (which is much more expensive than the others) is $5.18/lb.

At Safeway supermarket (whose in-house brand is Lucerne) in Lafayette, California, popular cheeses randomly sliced in approximately 8 oz. sizes retail for the following prices per pound: Lucerne–Monterey Jack $3.39/lb, Lucerne–Sharp Natural Cheddar $3.89/lb, Tillamook–Monterey Jack $3.72/lb, and Precious–Mozzarella $3.49/lb. The average price of these four popular cheeses is $3.62/lb. A specialty cheese, Lifetime Fat Free, is $5.58/lb.

By comparison, the four cheese alternatives ($5.46/lb) sold at a natural food store are 50.8% more expensive than four of America's most popular cheeses sold at a supermarket. But they are about the same price as a specialty cheese sold at a supermarket.

10579. Althoff, Susanne. 1994. Meatless muscle: Vegetarian bodybuilders bulk up just fine without the beef. *Vegetarian Times.* April. p. 69-70, 72, 74-75.
• ***Summary:*** Vegetarian bodybuilders include Andreas Cahling ("Mr. International," weighs 210 lb, from Cardiff by the Sea, California) and Bill Pearl (four time "Mr. Universe." He was a vegetarian when he won his titles in 1967 and 1971), Spice Williams (vegan actress and stuntwoman), and Beth M. Ley.

"'Twenty-five years ago there were virtually no professional bodybuilders who were vegetarian,' says James E. Wright, at editor at Muscle & Fitness magazine (Woodland Hills, California). 'Now there are several."

A table gives typical daily menus for Bill Pearl, Andreas Cahling (incl. Tofu Burrito and Rice pudding made with soymilk), Spice Williams (10 oz. shake with soymilk, water, and soy protein powder, 8 oz. tempeh burger, 2 cups cooked TVP (textured vegetable protein)).

Pearl, age 63, is still a vegetarian but no longer competes. "Spice Williams turned vegetarian as part of a program to get her life back on track after overdosing on drugs."

Photos show the muscled bodies of (1) Bill Pearl. (2) Spice Williams. (3) Andreas Cahling.

10580. Altshuld, Steven. 1994. What's cooking: Tofu tricks. *Parenting.* April. p. 137, 140-43.
• ***Summary:*** Kids often like tofu if its served properly. Describes the various types of tofu and how to buy and store them. "Don't underestimate tofu's potential to become popular around your house. Noodles, another gift from Asia, were also considered oddly slippery and bland when eaten plain. But someone was inspired to add a little tomato sauce, and look what happened." Contains recipes for: Marinated tofu. Scrambled tofu with salsa. Eggless egg salad. Tofu stroganoff.

10581. **Product Name:** Premium Vegetarian Sausages.
Manufacturer's Name: Cauldron Foods Ltd.
Manufacturer's Address: Units 1-2, Portishead Business Park, Portishead, Bristol, BS20 9BF, England. Phone: (275) 818448.
Date of Introduction: 1994. April.
Ingredients: Incl. tofu, vegetables, herbs, spices.
Wt/Vol., Packaging, Price: 250 gm chiller pack of 5. Retails for £1.19.
How Stored: Frozen.
New Product–Documentation: Spot in Soyafoods (ASA, Europe). 1994. Spring, p. 5. "New vegetarian sausage from Cauldron Foods." A photo shows the package.

10582. **Product Name:** Marinated Tofu Pieces.
Manufacturer's Name: Cauldron Foods Ltd.
Manufacturer's Address: Units 1-2, Portishead Business Park, Portishead, Bristol, BS20 9BF, England. Phone: (275) 818448.
Date of Introduction: 1994. April.
Ingredients: Marinade contains soy sauce, ginger, and garlic.
Wt/Vol., Packaging, Price: 150 gm pack. Retails for £1.49.
How Stored: Refrigerated or frozen.
New Product–Documentation: Spot in Soyafoods (ASA, Europe). 1994. Spring, p. 5. "Marinated Tofu Pieces." A photo shows the package.

Soja fuer Ghana [Soya for Ghana]. Duisburg-Hamborn, Germany. 24 p. Illust. 21 cm. [Ger]
• ***Summary:*** Each year this group of German Catholics has one development-help project in Ghana. In 1991 and 1992 it was trees for Ghana. In 1993 it was soya for Ghana. Contents: Development help? by Gottfried O. Praem. Africa's need (incl. population growth, demographics, per capita GNP, and infant mortality). Our new project: Soya for Ghana. Why soya? Yields a variety of foods, healthy, ethical (in relation to eating animals and protecting the environment), good for agriculture. History of the soybean plant. Food products from the soybean: Soymilk, tofu, soy protein, soy sauce, miso, tempeh, soy oil, soy sprouts. Cultivation of soybeans in northern Ghana. Planting and harvest. Ghana–the land and its agricultural products. Teaching hygiene in Ghanaian. Dear money: Where does it come from and how is it spent? Past projects in Ghana and the 1993 Soya for Ghana project. The Bole mission station in northern Ghana (90,000 inhabitants of which 4,000 are Christian). Recipes. A talk with Brother Rudolf, age 62, during his visit to Hamburg in Sept. 1993. Address: Duisburg-Hamborn, Germany.

10584. Messina, Mark J.; Persky, Victoria; Setchell, K.D.R.; Barnes, S. 1994. Soy intake and cancer risk: A review of the *in vitro* and *in vivo* data. *Nutrition and Cancer* 21(2):113-31. March/April. [112 ref]
• ***Summary:*** Contents: Abstract. Introduction. Estrogenic and antiestrogenic properties of genistein. Genistein, signal transduction, and cancer cell inhibition. Animal studies: Mammary cancer, intestinal cancer, liver and bladder cancer, prostate, skin and stomach cancers. Epidemiologic studies: Breast cancer, prostate cancer, colorectal cancer, lung cancer, stomach cancer, esophagus, bile duct, liver, and pancreatic cancers. Discussion.

Tables: (1) Preparation and use of traditional soyfoods and Western soy products. The traditional soyfoods are tofu, soymilk, and miso. The Western soy products are soy protein isolate (used in infant formulas etc.), soy protein concentrate, soy flour / grits, textured soy protein. (2) Effects of soy or soy isoflavones on spontaneous and chemically induced cancers or precancerous lesions in laboratory animals (listing of 26 experiments in 5 columns; author, year and reference number, animal, soy product, cancer / inducing agent, findings {no effect or protective}). (3) Epidemiologic studies involving soy product intake and cancer risk (listing of 40 experiments in 7 columns on 3 full pages).

Note: This is Dr. Messina's most comprehensive article on the subject to date. He spent 2 years writing it. Originally it was a 45-page manuscript with 300 references, but both the number of words and references were condensed by about half. Yet for years it was the most widely cited paper in the soy field for years. Address: 1. 8401 Mapleville Rd., Mt. Airy, Maryland 21771; 2. Epidemiology/Biostatistics Program, School of Public Health, Univ. of Illinois at Chicago, Chicago, IL 60680. Phone: 301-898-5769.

10585. **Product Name:** Spinach & Tofu Ravioli (Vegan).
Manufacturer's Name: Rising Moon Ravioloi.
Manufacturer's Address: 1432 Willamette, Eugene, OR 97401. Phone: (503) 342-1183.
Date of Introduction: 1994. April.
Ingredients: Filling: Spinach, Surata tofu, fresh garlic, Dijon mustard, nutmeg, Magical Moon Mix Italian herbs & spices, sea salt. Eggless Pasta: Fancy durum flour, water, herbs, sea salt.
Wt/Vol., Packaging, Price: 12 oz.
How Stored: Frozen.
New Product–Documentation: *Provender Journal* (Eugene, Oregon). 1994, late spring. 11(1):1, 8. "New member profile." Rising Moon of Eugene, Oregon, is owned by Jade Elms and Kirk Giudici. The company was built on a ravioli that Kirk and his dad made during the holidays. They now sell 3 standard flavors of ravioli, each packed in a 98% cellulose bag rather than plastic.

Talk with Kirk of Rising Moon. 1994. July 6. The vegan Spinach Tofu Ravioli was launched in April 1994. The company's first two products were Spinach Tofu Ravioli (Mild, or Spicy) launched in Nov. 1991. They buy their tofu from Surata Soyfoods.

Labels for Vegan sent by Kirk. 1994. July 6. 3 by 4.5 inches. Gold, yellow, black and white. On front panel: Illustration of a moon with a face. "Proponents of the vegan revolution: Forget the cow. As you jump over the Rising Moon into ravioli rendezvous, you will experience the renaissance of a unique pasta. The original Giudici recipe has been in the family for nearly 200 years. In the beginning, the recipe called for spiced sausage, which we have replaced with tofu... Never, Never cook ravioli in rapidly boiling water. Always bring water to a boil first. Lower heat and gently place ravioli in pot. Let them simmer in the water for 5-7 minutes until they float and look pillowy... We chose to package with cellulose bags to minimize out impact on the environment. Labels made with recycled materials."

10586. **Product Name:** Zero-FatRella (Tofu-Based Cheese Alternative with Casein) [California Cheddar Style, Mozzarella Style, Jalapeño Jack].
Manufacturer's Name: Sharon's Finest (Product Developer-Marketer).
Manufacturer's Address: P.O. Box 5020, Santa Rosa, CA 95402-5020. Phone: 707-576-7050.
Date of Introduction: 1994. April.
Ingredients: California Cheddar Style, March 1994: Organic tofu, casein*, tapioca starch, salt, citric acid, beta-carotene (vitamin A), natural flavor, guar gum. * Casein is the protein found in non-fat milk. It is a high-quality protein, free of cholesterol, and is what allows the product to be so

© Copyright Soyinfo Center 2013

similar to cheese. Organic in accordance with Calif. Organic Foods Act of 1990.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Refrigerated.
New Product–Documentation: This product was formerly named Heart's D'Lite, introduced in Jan. 1992 by Sharon's Finest.

Leaflet (8½ by 11 inch, black, purple, and green on tan kenaf paper) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 1994. March 10-13. "Product information. Sharon's Finest Healthy Alternatives." "Zero-FatRella. The original tofu cheese alternative in a fat-free version. Also free of cholesterol and lactose, comes in 3 delicious flavors. Melts, shreds, and stretches just like cheese. Best served melted."

Letter (fax) and photocopies of labels for 3 flavors sent by Judy Bowhall of Sharon's Finest in response to enquiry. 1994. April 20. This product (formerly Heart's D'Lite) was introduced in Feb. 1993 but all 3 flavors were first sold in July 1993. The front panel states: "No cholesterol. Melts and tastes like cheese." On the back panel is a Comparison Guide comparing 1 oz of Zero-FatRella with 1 oz of regular Cheddar and Mozzarella cheeses. Calories: 45, 113, and 80. Fat (gm): 0, 9, 6. Saturated fat (gm): 0, 6.1, 3.7. Cholesterol (mg): 0, 3, 22.

10587. Shurtleff, William; Aoyagi, Akiko. comps. 1994. Cheese and cream cheese alternatives (with or without soy)–Bibliography and sourcebook, 1896 to 1994: Detailed information on 334 published documents (extensively annotated bibliography), 159 cheese alternative products, 119 original interviews (many full text) and overviews, 44 unpublished archival documents. Lafayette, California: Soyfoods Center. 225 p. Subject/geographical index. Author/company index. Printed April 28. 28 cm. [570 ref]
• ***Summary:*** This is the most comprehensive book ever published about soy cheese, soy cream cheese, and other cheese alternatives. It has been compiled, one record at a time, over a period of 19 years, in an attempt to document the history of this subject. Its scope includes all known information about cheese and cream cheese alternatives, worldwide, from 1910 to the present.

This book is also the single most current and useful source of information on soy cheese, since 97% of all records contain a summary/abstract averaging 190 words in length.

This is one of more than 45 books on soybeans and soyfoods being compiled by William Shurtleff and Akiko Aoyagi, and published by the Soyfoods Center. It is based on historical principles, listing all known documents and commercial products in chronological order. It features: 34 different document types, both published and unpublished; every known publication on the subject in every language–including 528 in English, 11 in French, 11 in Japanese, 10 in German, etc.; 47 original Soyfoods Center interviews and overviews never before published. Thus, it is a powerful tool for understanding the development of soy cheese from its earliest beginnings to the present.

The bibliographic records in this book include 334 published documents and 44 unpublished archival documents. Each contains (in addition to the typical author, date, title, volume and pages information) the author's address, number of references cited, original title of all non-English publications together with an English translation of the title, month and issue of publication, and the first author's first name (if given).

The book also includes details on 159 commercial cheese and cream cheese alternatives products, including the product name, date of introduction, manufacturer's name, address and phone number, and (in many cases) ingredients, weight, packaging and price, storage requirements, nutritional composition, and a description of the label. Sources of additional information on each product (such as references to and summaries of advertisements, articles, patents, etc.) are also given.

Details on how to make best use of this book, a complete subject and geographical index, an author/company index, a language index, and a bibliometric analysis of the composition of the book (by decade, document type, language, leading periodicals or patents, leading countries, states, and related subjects, plus a histogram by year) are also included.

A brief history of cheese alternatives (p. 7-8): Cheese alternatives are Western-style cheeselike products that contain a significant amount of non-dairy protein, typically from soybeans, nuts, or seeds. They may or may not contain casein or caseinates (the main protein found in milk). The hard cheeses that contain casein typically melt, stretch, and shred in much the same way as dairy cheeses. We distinguish cheese alternatives from imitation cheeses and cheese substitutes in which the butterfat is typically removed and replaced by vegetable oil or by no fat at all.

The world's first non-dairy cheeselike products were the various types of fermented tofu made in China (where they are called *doufu-ru, fuyu,* or *sufu*). Said to have been developed 1,400 to 1,500 years ago, they were first mentioned in documents during the Ming dynasty in China in the 1500s (Chin Kan. 1534. Messenger to Ryukyu; Li Shih-chen. 1578-1597. *Pen-ts'ao kang-mu*). Since we consider fermented tofu (sometimes called "soy cheese") to belong to a different category of foods from cheese alternatives (in part since the former do not melt), we discuss them in a separate book.

The first commercial cheese alternative in the Western world was invented and made by Dr. John Harvey Kellogg, the famous Seventh-day Adventist physician and vegetarian. Named Nuttose, it was launched in 1896. Made largely from peanuts, it was a true non-dairy product that was also used as a meat alternative.

© Copyright Soyinfo Center 2013

The first commercial soy cheeses in the Western world were developed and made Li Yu-ying in 1911. At his modern soyfoods factory near Paris, Li manufactured Fermented Tofu Cheese in Gruyère, Roquefort and Camembert flavors.

Between 1911 and 1985 most of the commercial cheese alternatives in America were made by Seventh-day Adventist companies. Though we know the names of these early products, their ingredients and properties are not always clear. In 1939 Madison Foods (Madison, Tennessee) introduced Cheze-O-Soy, based on tofu. In 1942 Butler Food Co. (Cedar Lake, Michigan) launched ViM-eat Soy-Nut Cheese and in 1944 Butler's Soynut Cheese. In 1951 Loma Linda Foods (Arlington, California) rolled out Vege-Chee (canned, based on tofu). And in 1961 Worthington Foods (Ohio) introduced Kreem-Chee, the world's second commercial non-dairy cream cheese.

The idea of cream cheese alternatives was first conceived of by another Seventh-day Adventist, Jethro Kloss. In April 1934 the *Miami Daily News* reported how approximately 6,000 people had recently heard him speak about dairylike foods made from soy beans at Bayfront park. He exhibited 21 foods made from soy beans (including cream cheese, yellow cheese, and cottage cheese) and invited the public to taste them.

By November 1938 the Wigmore Health Shop in London was making the world's first Soya Cream Cheese. The first two commercial tofu cheesecakes were created in 1971 by students of macrobiotics: One by Marcea Newman was sold at her Souen restaurant in New York; the other by David Kalan (named Tofu Blueberry Pie) was sold at his Crane's Call Bakery in Boston. The first two recipes for a soy cheesecake appeared in 1974: One by Marcea Newman (made with tofu) in her book *The Sweet Life: Marcea Newman's Natural Food Dessert Book;* the other by The Farm in Summertown, Tennessee (made with soy cheese, from naturally fermented/soured soymilk) in their booklet *Yay Soybeans!* The first recipe for a "Tofu Cheesecake" appeared in *The Book of Tofu* by Shurtleff and Aoyagi (1975).

The modern category of commercial soy cheeses and cheese alternatives was born under a bad sign. It began in America in March 1985 with the introduction of Soyarella–probably the most deceptive soyfood product ever launched in America. Though extremely popular for about a year, it was unfortunately mislabeled to deliberately deceive consumers. Though marketed as a "non-dairy soy product" which contained no casein yet melted like cheese, it was later found to contain about 15% casein. The "source" of Soyarella (not to be confused with TofuRella) is thought to have been Nature's Best in Osseo, Michigan. But the name of the manufacturer was not given on the label–and it remains a mystery to this day.

In America, this new category has a number of basic characteristics: (1) Casein (a milk protein) or caseinates is used in more than 95% of all products to make them melt and stretch like dairy cheeses. Less than 5% of all products are truly non-dairy; (2) In the late 1980s, most manufacturers, marketers, and retailers deliberately concealed from consumers the fact that casein is derived from cow's milk (complicated by the fact that FDA regulations allow food products that contain casein to be called "non-dairy"); (3) Many consumers believe that most cheese alternatives are truly non-dairy products. Fortunately, labels and promotional materials have become more honest with each passing year–yet many consumers still remain confused and some deceptive practices still exist; (4) All products are free of cholesterol and lactose, and relatively low in saturated fats. Some are also low in total fats, calories, and sodium; (5) About 95% of the products are soy cheeses and 5% are nut or seed cheeses without soy. Most products contain tofu (either dried or fresh) as a major ingredient; (6) Most products are sold at natural- or health food stores, and retail for about 50% more than typical dairy cheese sold at supermarkets; (7) About 95% of the products are hard cheeses and 5% are soft cheeses, mainly cream cheeses.

The first major soy cheese to hit the market was Soya Kaas, introduced in Jan. 1986 by Richard McIntyre of Soya Kaas Inc., a subsidiary of Swan Gardens Inc. Marketed exclusively by American Natural Snacks of Florida, it is still America's most popular cheese alternative. In June 1986 Mozzarella Style Tofu-Rella was introduced by Richard and Sharon Rose of Brightsong Foods. The company later became Sharon's Finest and the product was renamed TofuRella. In Oct. 1986 Original Pizsoy (a whole-wheat pizza topped with soy cheese) was introduced by Tree Tavern Products; It was the first product in which soy cheese was used as an ingredient.

In Jan. 1987 Soymage was introduced by Soyco Foods, a Division of Galaxy Cheese Co.; This was Soyco's first soy cheese product and the first modern soy cheese that contained no casein. In April 1987 NuTofu was introduced by Cemac Foods Corp. This was Cemac's first soy cheese product.

In April 1988 Soyco shreds and slices were introduced–the first soy cheese shreds and slices. In 1988 new labels for Sharon's Finest Tofu-Rella became the first (as far as we can tell) to state clearly on the label that the casein in the product is derived from milk.

In Jan. 1991 Fat-Free Soyco was introduced–the first fat-free soy cheese. In Dec. 1992 Almond Cheeze was introduced by Wholesome & Hearty Foods–the first major non-soy cheese alternative.

In April 1994 VeganRella (made from Brazil nuts) was introduced by Sharon's Finest–a true non-dairy non-soy cheese said to have excellent flavor and texture.

The size of the natural foods cheese alternatives market in the USA is about $15 million/year at wholesale and $25 million/year at retail; this is the equivalent of about 5 million

© Copyright Soyinfo Center 2013

lb/year. The category has grown at a remarkable rate–about 20% a year for the past 3-5 years. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 510-283-2991.

10588. **Product Name:** [Melt: Fresh Tofu That Melts, Tofutissimo: Fresh Tofu That Spreads, Tofutissimo with Mountain Herbs (Soft Tofu Cheeses)].
Foreign Name: Melt: schmelzender frisch Tofu, Tofutissimo: streichfaehiger frisch Tofu, Tofutissimo mit Bergkraeutern.
Manufacturer's Name: Sojarella, Hess und Drosihn GbR.
Manufacturer's Address: Willi Graf Str. 88, 53881 Euskirchen-Kuchenheim, Germany. Phone: 02251-56076 OF.
Date of Introduction: 1994. April.
Ingredients: Melt: Tofu, water, soybeans*, vegetable oil, carob bean gum, guar gum, spices, yeast extract, sea salt. * = Organically grown (*aus kontrolliert biologischem Anbau*).
Wt/Vol., Packaging, Price: 220 gm.
How Stored: Refrigerated.
New Product–Documentation: Letter from Bernd Drosihn. 1993. Nov. 29. Albert Hess (owner of Das Tofuhaus in Lautersheim) and Bernd are in the process of founding a new company, named Sojarella, which will start to make and sell soy cheeses in early 1994. The address will be the same as Viana. They have developed a method for making soy cheese products that contain no casein.

Leaflet (color) from Bio-Fach natural/organic foods trade show in Frankfurt, Germany. 1994. March. Sojarella: The idea that makes tofu melt! Enjoy the healthy melt of Sojarella." "Both types of Tofutissimo make delicious spreads for breads. Sprinkled with fresh dill and diced leeks or creatively combined with marmalade for tart-tongue enjoyment! Tofutissimo also makes a wonderful base for all types of dressings and sauces." A melt [Schmelz] alternative based purely on plants. Sojarella products have no casein, no cholesterol, little saturated fats, and obviously no animal ingredients." The ingredients for Tofutissimo are: Tofu (water, organic soybeans*), sunflowerseed oil*, lemon juice, spices, sea salt.

Letter (fax) and photocopies of labels sent by Bernd Drosihn of Sojarella. 1994. April 22. The name of the new company is Sojarella, Hess und Drosihn. Their three soy cheese products were first sold commercially on 1 April 1994. Bernd knows of no other soy cheeses made in Europe. It is too early to tell how his soy cheeses are selling.

10589. *SoyaScan Notes.* 1994. Tofu and vegetarianism on the popular children's television program "Where in the World is Carmen San Diego?" (Overview). April. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** This popular TV program is broadcast daily on KQEV television (Channel 9) in the San Francisco Bay Area and Northern California. One day a giant dog came into the studio and gave Greg Lee, the host, some clues. As a reward, Greg gave him a huge white bone, on which was written "Tofu Bone."

In the second round of the show, the contestants enter a station, where they receive some clues over the telephone. On the wall next to the telephone is a poster of a tofu burger–clearly labeled.

At the end of the second round of the show, the young person who wins is given a leather folder in which he or she is asked to write the name of the place where he or she would like most to go in North America. One day when Greg Lee said, jokingly, to the winner as he passed the folder: "Is this a genuine imitation leather folder?"

10590. **Product Name:** [Fruchtfreude Desserts {With Tofu and Fruits} (Apricot, Strawberry, Cherry)].
Foreign Name: Fruchtfreude–Tofu-Frucht Dessert (Aprikose, Erdbeere, Kirsche).
Manufacturer's Name: Tofukostwerk TKW GmbH.
Manufacturer's Address: Kerkbrede 3 (Roland), 59269 Beckum, Germany. Phone: (2591) 18081.
Date of Introduction: 1994. April.
Ingredients: Incl. Tofu and fruits.
Wt/Vol., Packaging, Price: 250 gm glass jar and 10 kg catering pack.
How Stored: Refrigerated at +6ºC.
New Product–Documentation: Spot in Soyafoods (ASA, Europe). 1994. Spring, p. 5. "Tofu-based desserts from Germany." A photo shows three jars. These mild-tasting, extra creamy, yogurt-like desserts are free of cholesterol and milk, low in fat, light and easily digestible.

10591. Vegetarian and organic food. 1994. London: Mintel Ltd. *
• ***Summary:*** This new report, which sells for £295, shows that more than 10% of the UK population is vegetarian. The figure rises to 17% among teenagers. This "dramatic growth" is due to health and ethical factors.

Since 1988, sales of meat alternatives, such as tofu and Quorn, have grown from £6.6 million to £22.5 million, and sales of organic foods have increased by a factor of five. Overall sales of vegetarian foods increased from £8.8 billion in 1988 to £11 billion in 1992.

The report also notes that women are more likely to be vegetarian than men and that London has the highest proportion of people with a mainly vegetarian diet. Address: 18-19 Long Lane, London EC1A 9HE, England, UK.

10592. **Product Name:** New World Foods Red Chile Tamales, Green Chile Stew, Chorizo, Hearty Chili (Vegetarian–With Befine).
Manufacturer's Name: VPS, Inc.
Manufacturer's Address: 2889 Trades West Rd., Santa Fe,

© Copyright Soyinfo Center 2013

NM 87505. Phone: 505-471-8979.
Date of Introduction: 1994. April.
Ingredients: Red Chili Tamales: Organic corn, Organic Befine (soybeans, water, calcium sulfate–a natural mineral, caramel color), organic soy fiber, organic corn meal, red chile pods ground with water, soybean oil, shoyu (water, soybeans, wheat, salt), spices, salt.
Wt/Vol., Packaging, Price: 12 oz vacuum pack–Contains 4 tamales.
How Stored: Frozen or refrigerated.
Nutrition: Per 2 tamales: Calories 275, calories from fat 98, total fat 11 gm (saturated fat 1 gm), cholesterol 0 mg, sodium 365 mg, total carbohydrate 41 gm (dietary fiber 6 gm), protein 10 gm, vitamin A 25%, vitamin C 2%, calcium 26%, iron 64%.

New Product–Documentation: Letter and color labels for each product sent by Richard Jennings of VPS, Inc. (Vegetable Protein Specialists). 1994. Dec. 28. The first focus of New World Foods products was foodservice. Starting in 1990 the company used generic labels printed with a personal computer and label printer. In the spring of 1994 they decided to go after the retail market as well. So they developed attractive new color labels for each product. "Shortly after we started the retail venture, it became clear that our future was with Befine. So we went completely into that. We have exhibited at the IFT (Institute of Food Technologists) in Atlanta (Georgia), and the FIE (Food Ingredients Europe) in London (4-6 Oct. 1994). Enclosed is our brochure (color leaflet) titled "Befine: The ideal meat replacer. Eating is believing!"

Label. 1994, spring. 5 by 4 inches. Self adhesive. Red Chile colors: Red, orange, black, blue and green on white. Color illustration of many vegetables in a circle. "Delicious. Satisfying. No cholesterol. Low fat." Note: Befine is made from firmly pressed, crumbled tofu curds.

Talk with Richard Jennings. 1995. Jan. 4. They are now making Befine in Santa Fe and shipping everything they make to Holland.

10593. White Wave, Inc. 1994. Boulder–An evening in Tofutown (Postcard). Boulder, Colorado. 1 p. 16 cm.
• ***Summary:*** This creative greeting card has a color illustration on the front panel of the marquee of the historic Boulder Theater. The words in large letters read: Boulder–An Evening in Tofutown." The text inside the invitation reads: "You are cordially invited to an evening in Tofutown with the people of White Wave on Saturday May 28, 1994 at the historic Boulder Theater, 2030 14th Street, Boulder, Colorado. Doors open at 5:30. Buffet dinner served from 6:00–8:00. Presented by Corporate Chef Leonardo. Music provided from 7:00–9:30 by the renowned pianist Peter Kater. Dancing 9:30 until ? Dress casual. Please R.S.V.P. using the provided postcard."

On the back is the company's logo which reads "White Wave Vegetarian Cuisine. TofuTown Cards. When you care enough to send the veggie-est!"

Other attractions of the Memorial Day weekend include: "White Wave Open House, Friday May 27, 1994, from 10:00 to 1:00. Everyone is invited to a tour of our new facilities at the White Wave Vegetarian Cuisine Plant on 6123 Arapahoe, Boulder, Colorado." Also the Boulder Creek Festival and the Boulder 10K Road Race.

Note: White Wave is the world's first soyfoods company to link its name with vegetarianism. Address: 1990 N. 57th Court, Boulder, Colorado 80301.

10594. Bean Supreme Ltd. 1994. Wholesale price list. P.O. Box 12082, 140 Hugo Johnson Dr., Penrose, Auckland, New Zealand. 2 p. May 1. 28 cm.
• ***Summary:*** The company sells the following soyfoods: Tofu (firm bulk and vacuum pack), Tofu Luncheon (3 flavors), Soysage, Tempeh (vacuum pack), Soymilk (Nice 'n' Healthy), Lite Licks Non-Dairy Frozen Dessert (6 flavors in 2 liter size, 3 of those flavors in 475 ml size, and bulk packs

© Copyright Soyinfo Center 2013

of 9 liters and 16 liters).

It also sells the following non-soy foods: Biofarm organic yoghurts (3 flavors), Malabar goat yoghurt, Cyclops acidophilus yoghurt (5 flavors), Koromiko cheeses (10 flavors), Olive grove Middle Eastern foods (falafel mix, hoummus, Middle Eastern sauce, tahini), herbal teas (3 flavors), and Pacific Harvest sea vegetables (Karengo fronds, flakes, and shaker, and kelp shaker). Address: Penrose, Auckland, New Zealand.

10595. Elliott, Tom. 1994. Update on FarmSoy Company (Interview). *SoyaScan Notes.* May 1.
• ***Summary:*** Tom, who has lived on The Farm for almost 20 years, and his wife Barbara, purchased this company in July 1991 from Michael Lee. Michael was going to simply close the company and he had let it run down. Tom's background is in the excavating business and his wife is a nurse. He has not introduced any new products since he bought the company, but he did change the company name to FarmSoy Company. The company's main product is pasteurized tofu; they produce 1,500 to 1,600 lb once a week. They also make a little soy yogurt, soymilk, and tempeh, which is sold mostly to people living on The Farm. The company has 2 adult employees and has a positive cash flow.

People on The Farm no longer all get together like they used to when it was run communally. Stephen no longer to talks like he used to.

Update on the change of company name: Talk with Tom. 1998. July 8. Tom and Barbara incorporated their company on 2 March 1994 in the state of Tennessee. At that time they changed the company name to FarmSoy Company from The Farm Soy Dairy. Tom and Barbara are the only shareholders in the corporation. Address: 156 Drakes Lane (P.O. Box 96), Summertown, Tennessee 38483. Phone: 615-964-2411.

10596. Davis, Bob. 1994. Future plans (Interview). *SoyaScan Notes.* May 7. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Bob finds his present work, developing new products for Sharon's Finest of California, to be a lot of fun. One of his goals is to help in developing a fast foods restaurant system, working with someone else (such as Richard Rose) who would take care of the business aspects. Bob would like to work on the steering committee, and do the product development and concept work. The nucleus of three alternative food organizations that he is working with in Vancouver, BC, Canada, is very strong. Sunrise Markets makes the best firm tofu he has tasted anywhere, and the company has a lot of "firepower." Then they have Yves, plus the plant that he set up with the alternative cheese program; they plan to start making Sharon's Finest cream cheese alternatives in about 2 weeks. So he has a complete line of soyfoods including meat- and dairy alternatives. He would like to organize these companies so they become suppliers to a turnkey fast food operation. Address: 3812 E. Goldfinch Lane, Clinton, Washington 98236. Phone: 206-341-1259.

10597. *SoyaScan Notes.* 1994. Foods of East Asian origin that the macrobiotic movement/community has played a leading role in introducing to America, starting in about 1960 (Overview). May 10. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** These include brown rice, rice cakes, miso (many types), shoyu (traditional Japanese-style soy sauce), tamari (Japanese soy sauce containing little or no wheat; prior to about 1980 many practitioners of macrobiotics referred to natural shoyu as "tamari," thus inadvertently popularizing real tamari, which now may be better known in the USA than it is in Japan), natto (fermented soybeans), seitan (wheat gluten seasoned with a soy sauce broth; this word was coined by George Ohsawa), amazake (thick rice beverage), umeboshi salt plums, sea vegetables (kombu, wakame, hijiki, nori, etc), tofu, soymilk, alternatives to dairy products (macrobiotics do not consume dairy products), buckwheat noodles (*soba*), kuzu, rice syrup, barley malt syrup, azuki beans, sesame seeds, sesame salt (*gomashio*), daikon (white radish) and daikon pickles, kabocha (Hokkaido pumpkin), shiitake mushrooms (also known as Chinese black mushrooms, they have a firm "meaty" texture), burdock, jinenjo (glutinous yam).

They have done this by starting and running many natural food companies to import, distribute, manufacture or grow these foods; by writing cookbooks and other books about these foods; by teaching classes (including many cooking classes in which these foods are used); by influencing other people to do all of the above.

The Japanese names of many of these foods have become anglicized and are now the standard English-language names.

The macrobiotic movement also played a major role in introducing "tahini" or sesame butter (a Middle-Eastern food) to America, starting with George Ohsawa's book *Zen Macrobiotics* in 1960. Of the first 20 records in the SoyaScan database that mention "tahini," 14 are associated with macrobiotics. Likewise, 22 of the first 50 records are associated with macrobiotics.

10598. Sanz, Cynthia; Fisher, Luchina. 1994. Cookin' for Oprah: Chef Rosie Daley has her boss's seal of approval–and the fastest selling cookbook in history. *People.* May 16. p. 84-88, 91. Cover story.
• ***Summary:*** The text on the cover of this very popular magazine reads: "Oprah's diet guru: Chef Rosie Daley helped TV's weight loss champ shed 72 lbs..."

On page 91 is a recipe for "Chocolate Tofu Cake," which Rosie explains is her version of "chocolate cheesecake" with none of the guilt. She has replaced all of the typical cream cheese with 8 oz of firm tofu, so that the

© Copyright Soyinfo Center 2013

finished product, which serves 12, has only 3.9 gm of fat and 92 calories per serving.

Rosie's book, the fastest-selling hardcover volume in history, is titled *In the Kitchen with Rosie: Oprah's Favorite Recipes* (Knopf, May 1994).

Note: Oprah Winfrey is one of America's best known TV celebrities, famous–in part–for her lifelong struggle to control her weight, and for her Oprah Winfrey Show. On 28 April 1994 she devoted her entire show to Rosie's low-fat, low-calorie, low-sugar, low-salt meals and declared "Rosie changed my life." Her chef, Rosie, demonstrated, step by step, exactly how to make her Chocolate Tofu Cake. She and Oprah talked about it as she worked. Then a finished cheesecake magically appeared; Oprah held it up and said how much she liked it ("It tastes sinful") and how low in calories it was. Then one of the women in the audience stood up and said that she had made this tofu cheesecake recipe from Rosie's book, and that she loved it too.

10599. *Canadian Export Soybeans* (*OSGMB, Chatham, Ontario, Canada*). 1994. Serial/periodical. Chatham, Ontario, Canada: Ontario Soybean Growers' Marketing Board. Began with Vol. 7, No. 2. May 1994. Renamed Canadian Soybean Bulletin with Vol. 13, No. 1 (June 1999).
• ***Summary:*** Continues *Ontario Export Soybeans.* This bi-annual newsletter was formerly 2 pages, green on yellow; it is now (May 1995) 4 pages, dark green and brown on tan.

Letter (fax) from Kim Cooper, marketing specialist at OSGMB. 1995. May 25. "Seeking to be more Canadian in our approach, we changed to *Canadian Export Soybeans* in May of 1994, and this year I will be publishing three newsletters. At present, I have a mailing list of approximately 600, and am continually updating this list."

Starting in Jan. 1996 (Vol. 1, No. 1) a *Technical Bulletin* (printed in red and black ink on beige paper; 1 page, front and back) was inserted in many issues of *Canadian Soybean Exports.* It contained technical articles with titles such as: "Evaluation of soybeans for tofu processing." Address: Chatham, Ontario, Canada.

10600. Daley, Rosie. 1994. In the kitchen with Rosie: Oprah's favorite recipes. New York, NY: Alfred A. Knopf. xii + 130 p. Illust. Index. 20 x 19 cm.
• ***Summary:*** Note: Oprah is Oprah Winfrey, one of America's best known TV celebrities, famous–in part–for her lifelong struggle to control her weight, and for her Oprah Winfrey Show.

Contains 50 recipes that are low in fat, sugar, and salt. On pages 114-15 is Rosie's recipe for Chocolate Tofu Cake. The author says: "My version of chocolate cheesecake provides all of the treat with none of the guilt. I replace the typical bulk ration of cream cheese with tofu..." Other soy-related recipes: Cauliflower puree with peas (and brown rice miso, p. 20). Several recipes contain reduced-sodium soy sauce (p. 25, 33, 54, 88, 92, 102). Address: Chicago, Illinois.

10601. **Product Name:** Chunky Tofu Salad.
Manufacturer's Name: Local Tofu.
Manufacturer's Address: 307 Route 59, West Nyack, NY 10994-2033. Phone: 914-358-2309.
Date of Introduction: 1994. May.
Ingredients: Organic regionally grown soy beans, tahini, tamari sauce, lemon juice, canola oil, carrots, celery, onions, herbs, spices.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Refrigerated.
New Product–Documentation: Label sent by Sam Weinreb. 1996. May 21. 3½ inch diameter. Green on light blue. Talk with Sam Weinreb, founder and owner of Local Tofu. 1996. May 27. This product was launched in May 1994.

10602. Melina, Vesanto; Davis, Brenda; Harrison, Victoria. 1994. Becoming vegetarian: A complete guide to adopting a healthy vegetarian diet. Toronto, Canada: Macmillan Canada. x + 262 p. Foreword by Louise Lambert-Lagacé. Index. 26 cm. [20 ref]
• ***Summary:*** An excellent vegan sourcebook and cookbook by three registered dietitians. For the Contents and details, see the 1995 revised American edition.

Talk with Vesanto Melina. 1996. July 22. This book has presently sold about 25,000 copies in Canada alone. A revised U.S. edition was published in Nov. 1995 by The Book Publishing Co. in Summertown, Tennessee. Address: Canada.

10603. **Product Name:** Vegetarians Choice Prime Grind.
Manufacturer's Name: Shiloh Farms.
Manufacturer's Address: -
Date of Introduction: 1994. May.
Ingredients: Tofu, organic textured soy flour, vital wheat gluten, organic brown rice, expeller pressed canola oil, water, fresh onions, corn/barley syrup, meatless broth powder, beet powder, sea salt, guar gum, lecithin, Irish moss powder, spices.
Wt/Vol., Packaging, Price: 12 oz chubs.
How Stored: Frozen.
New Product–Documentation: Spot in NFM's New Product Review. 1994. Spring (May). p. 30. "A totally organic and vegan meat alternative." A photo shows the product.

10604. Drosihn, Bernd. 1994. Re: Huegli, Yamato, and Soyastern. Letter (fax) to William Shurtleff at Soyfoods Center, June 9. 2 p.
• ***Summary:*** William Shurtleff obtained a package of Yamato Paprika-Tofu made by Soyastern Naturkost GmbH in Radolfzell, Germany. He asked Bernd if this was made

© Copyright Soyinfo Center 2013

by Huegli. Bernd replied: Here is a short version of the story linking Huegli, Soyastern, Yamato, Klaus Gaiser, and Thomas Karas. In April 1989 Huegli bought the majority of Yamato GmbH. Klaus Gaiser remained the minority shareholder and director. Soyastern got into trouble a little later and Thomas Karas tried to sell the company to Huegli also. But he was not successful. The negotiations were endless and Soyastern went bankrupt as they dragged on. Karas did manage to sell the brand name "Soyastern" to Huegli and he became an employee of Huegli. So Huegli now used both the Soyastern and Yamato brands. Three months after he started to work for Huegli, Karas had to leave. There had been a power struggle between him and Klaus Gaiser, and Klaus had won. But a little later (in about 1991 or 1992) Gaiser also had to leave Huegli. After that, Huegli reorganized their soyfoods division; Yamato and Soyastern were combined into one company named "Soyastern Naturkost GmbH." Yamato became this company's brand and, of course, Huegli owned the whole thing. From that time on, the Soyastern brand was used for Western-style products such as sausages and burgers, while the Yamato brand was used for Eastern style products (such as the tofu line). That is why the Yamato Paprika-Tofu label looks so Japanese.

Surprisingly, neither Huegli nor Yamato/Soyastern make these products! The tofu is produced by Heuschen-Schrouff B.V. (in Landgraaf, Netherlands), and the rest of the products in this line are produced by various other companies. Sales of Yamato and Soyastern products are slowly decreasing. Klaus Gaiser and Thomas Karas are not presently involved with soyfoods.

Huegli is a Swiss food industry company. The German branch of Huegli owns many different companies and brands, such as Neuco, Cenovis, Heirler (a wholesale company and also a brand), etc. They make 320 million German marks per year; the biggest part is Heiler with about 60 million per year. Address: Founder and president, Viana Naturkost GmbH, Willi Graf Str. 88, 5350 Euskirchen-Kuchenheim, Germany. Phone: 02251-56076.

10605. **Product Name:** Tofu to Go [Szechuan Garlic, or Shiitake Ginger].
Manufacturer's Name: Holy Cow Vegetarian Foods.
Manufacturer's Address: 2260 Augusta St., Eugene, OR 97403. Phone: (503) 345-3639.
Date of Introduction: 1994. June.
Wt/Vol., Packaging, Price: Plastic tubs.
New Product–Documentation: Talk with Anton Ferreira, owner of Holy Cow. 1994. June 30. This is Chinese-style tofu cubes (made by Surata Soyfoods) with some vegetables and a sauce. It is ready to eat or you can put it on rice. It was launched this month (June 1994). Anton was born in South Africa.

Provender Journal (Eugene, Oregon). 1994. Summer. p. 15. "Tofu To Go is a stir-fried Chinese dish in two classic vegan styles:..." The products have a 4-week shelf life.

Talk with Anton Ferreira, owner. 1998. March 19. This product has undergone a steady evolution since it was first launched. It is now available in 3 flavors: (1) Thai with peanut-ginger sauce; (2) Chipotle (smoked jalapeño); and (3) Mandarin (sweet & sour). Each is based on ½ inch cubes of tofu that are deep-fried without a batter.

10606. *INTSOY Newsletter* (*Urbana, Illinois*). 1994. INTSOY assists Egypt in establishing model soy foods processing pilot plant. No. 45. p. 2. June.
• ***Summary:*** INTSOY and the Food Technology Research Institute (FTRI, established in 1991) at the Agricultural Research Center (ARC) have opened a model processing pilot plant in Giza, Egypt. FTRI has a staff of about 150 researchers. A photo shows Wilmot Wijeratne of INTSOY training Egyptian scientists in the dry processing room, which contains an Insta-Pro extruder and ancillary equipment needed to grind soybean meal into flour for baking. The adjacent wet processing area contains complete systems for the production of soymilk, tofu, and dairylike products such as soy ice cream and soy yogurt. It is hoped that the facility will serve as a model for stimulating local entrepreneurs to use soybeans in commercial food products.

10607. Kevin, Kitty. 1994. Tofu comes of age: Breaking out of the health food store and onto supermarket shelves. *Food Processing* (*Chicago*). June. p. 81-82.
• ***Summary:*** Peter Golbitz, president of Soyatech, estimates that tofu has become an "estimated 4.3 million pound ingredient business." Steve Demos of White Wave expects that in about 2 years tofu will be used by a number of major food processors in meatless entrees. Jerry Maynard, president of Nasoya Foods, suggests the breakthrough might be even sooner. The tofu industry has faced three major problems: (1) Making a more sanitary product, with less bacteria and a longer shelf life. (2) Finding creative ways to use a product with an unfamiliar texture. White Wave has transformed fresh tofu into meatless tofu steak. (3) Turning tofu's bland taste into an advantage. Demos believes that Americanizing tofu by adding it to mainstream American dishes will increase its appeal. It is also excellent when added to Italian, Mexican, and Asian dishes.

Photos show: White Wave's meatless tofu steak. Labels of four of Sharon's Finest's Tofu-Rella cheese alternatives. Address: Assoc. Editor.

10608. Morinaga Nutritional Foods, Inc. 1994. "Chocolat Pie, Fantastique!" The Mori-Nu *Lite* Tofu chocolate dream pie–Only 1 g fat (Ad). *Vegetarian Times*. June. p. 65.
• ***Summary:*** This full-page color ad shows a large tofu chocolate creme pie covered with sliced bananas. Above it on a wooden table is a pack of Mori-Nu Lite Silken

Tofu (Firm) on a wooden table surrounded by bananas and almonds. There is a recipe for the pie and a coupon for any of 5 types of Mori-Nu Tofu. Address: 2050 W. 190th St., Suite 110, Torrance, California 90504. Phone: 310-787-0200.

10609. **Product Name:** Soya Kaas Slices (Cheese Alternative Containing Casein) [Mozzarella Style, Mild American Cheddar Style].
Manufacturer's Name: Swan Gardens, Inc. Distributed by American Natural Snacks.
Manufacturer's Address: Manufacturer: 6029 Lagrange Blvd., Atlanta, GA 30336. Distributor: P.O. Box 1067, St. Augustine, FL 32085. Phone: 904-824-8181.
Date of Introduction: 1994. June.
Ingredients: Tofu (organic* soy milk, calcium sulfate), caseinate (a milk protein), non-hydrogenated soy oil, sea salt, lactic acid, natural flavor, lecithin, cellulose gel, guar gum. * = Organically grown and processed in accordance with the California Organic Foods Act of 1990.
Wt/Vol., Packaging, Price: 6 oz (170 gm) resealable vacuum pack.
How Stored: Refrigerated.
Nutrition: Per 21 gm slice: Calories 50, calories from fat 27, total fat 3 gm (5% daily value; saturated fat ½ gm), cholesterol 0 mg, sodium 180 mg (8%), total carbohydrate ½ gm (<1%), protein 6 gm. Percent daily values are based on a 2,000 calorie diet.
New Product–Documentation: Letter (fax) from Casey Van Rysdam, President, American Natural Snacks, in response to inquiry. 1994. May 6. This product is scheduled for introduction in June 1994.

Product with Label sent by Casey Van Rysdam. 1994. May. Copyright 1994. Eight individual slices are packed in a resealable Ziploc bag, but are not individually wrapped to minimize packaging. Each package has a self-adhesive label on the front and back. 3 by 3.5 inches. Red, green, and white. Front panel: "No cholesterol. Lactose free. Low in saturated fat. Soya Kaas sliced Mozzarella style. 8 individual slices in a resealable package. A natural cheese alternative made with organic tofu. No hydrogenated oils. Best if used by 10 11 94."

Ad in *Natural Foods Merchandiser.* 1999. Dec. 10. "Our Soy (tofu) is organic ensuring it is 100% GMO free. Available in: Regular and Fat Free including Mozzarella, Cheddar and Jalapeño; Cream Cheese, Vegi-Kaas (vegan), Grated Parmesan, and Slices."

10610. **Product Name:** [Seasoned Handmade Tofu (With Herbs, With Olives, With Basil)].
Foreign Name: Tofou Artisanal (Aux Herbes, Aux Olives, Au Basilic).
Manufacturer's Name: Tofoulie.
Manufacturer's Address: St. Pierre, 26560 Séderon, France. Phone: 75-28-55-05.
Date of Introduction: 1994. June.
Ingredients: With Herbs: Soybeans*, water, leeks*, fennel*, celery*, salt, shoyu, sunflower oil*, herbs and spices*. * = Organically grown: 100% of the total.
Wt/Vol., Packaging, Price: 200 gm. plastic bag.
How Stored: Refrigerated.
New Product–Documentation: Form filled out and 3 Labels sent by Joel Pichon and Claude Michel. 1996. June 14. They started to make these products in June 1994. Label is a heavy plastic bag (light pink in color). 5½ by 8 inches. The company presently makes the following amounts of each product (in kg/month): Tofu with Herbs (incl. vegetables, parsley, spices) 550, Tofu with Olives (incl. provence herbs and parsley) 450, Tofu with Basil 450.

Note: Tofoulie also makes a non-soy product named Tofoulie Panisse Artisinale, which is made from chick pea flour, water, and unrefined sea salt.

Talk with Claude Michel. 1997. March 6. There are 8 people in this cooperative; all have invested money in it. Joel Pichon is the founder. Claude makes tofu and orders new equipment.

10611. Traugot, Michael. 1994. A short history of The Farm [of Summertown, Tennessee]. Summertown, Tennessee: Self published. 78 p. No index. 30 cm.
• ***Summary:*** Contents: Early roots: Stephen Gaskin. Monday night class: Attention equals energy, Holy Man Jam. The Caravan: Busted, we give up acid (LSD), back to Tennessee. The Farm today: Stephen and Ina May, business and projects on today's farm, Martin Farm 2–the sequel, alumni and networking. Community and society: The Farm–Success or failure? The Farm children. Names and addresses for contacting Farm organizations. Address: 84 The Farm, Summertown, Tennessee 38483. Phone: 931-964-2587.

10612. **Product Name:** Italian Herb Tofu–Extra Firm.
Manufacturer's Name: Twin Oaks Community Foods.
Manufacturer's Address: Route 4, Box 169, Louisa, Virginia 23093. Phone: 703-894-4112.

© Copyright Soyinfo Center 2013

Date of Introduction: 1994. June.
Ingredients: Organic tofu (water, organic soybeans, nigari), minced garlic, minced onion, basil, crushed fennel seed, cracked black pepper.
Wt/Vol., Packaging, Price: 8 oz. vacuum pack.
How Stored: Refrigerated.
New Product–Documentation: Label with date sent by Jon Kessler. 1996. Jan. 29. Twin Oaks Community Foods started selling this product in mid-1994 and it is still on the market. The herbs are mixed with the curds before pressing. It was first sold in bulk in buckets to a health food store in Charlotteville, but now it is vacuum packed.

10613. Johnston, Trevor. 1994. Re: Recent developments at Bean Supreme Ltd. in New Zealand. Questions answered on Soyfoods Center letterhead (dated 27 June 1994) and returned to SC on 8 July 1994. 2 p. Plus handwritten note with signature on letterhead.
• ***Summary:*** In April 1989, in order to expand operations, the company moved to its present address in Penrose from its former location at 1 Wallingford St., Grey Lynn, Auckland. In about Feb. 1990 the company changed its name to Down to Earth Natural Products Ltd. in order to try to reposition away from a specialty soy identity. However a major household cleaner company in New Zealand launched a product with the same name, "Down to Earth," so Trevor had to change the company name back to the original name. But at the same time the company redeveloped its logos and the corporate identity.

Presently, the company's best-selling soyfood products are Nice 'n' Healthy (isolated-based soymilk, launched in March 1989), and Lite Licks Dessert (soy ice cream, launched in Oct. 1986).

The company's brands also include Bio Farm, and Spiral Foods. Address: Managing Director, Bean Supreme Ltd., P.O. Box 12082, 140 Hugo Johnson Dr., Penrose, Auckland, New Zealand. Phone: (09) 590 592.

10614. Vines, Gail. 1994. Cancer: Is soya the solution? *New Scientist.* July 9. p. 14-15. [1 ref]
• ***Summary:*** "Soya protein could potentially be as effective as tamoxifen in preventing breast cancer." A large photo shows tofu being sold in an Indonesian market.

10615. Bianchini, Gilberto. 1994. Re: Early history of tofu and seitan in Italy. Letter to William Shurtleff at Soyfoods Center, July 16–in reply to inquiry. 3 p. Typed. [Eng]
• ***Summary:*** "I started to make tofu and sell it officially in October 1979 in Rimini, Italy, at Via Cuoco 9 (Community Food). I first learned how to make tofu in London at the Community Health Foundation, Old Street 98, in 1976 or 1977. Then I gained additional experience in making Japanese-style nigari tofu from Centers and individuals in France and Belgium. I first visited the United States in late 1978 and early 1979. On 9 Feb. 1979 I visited you [William Shurtleff and Akiko Aoyagi] at New-Age Foods Study Center in Lafayette, California, having a good impulse in tofu pioneering, to talk about making tofu in Italy.

"In 1980 I visited a friend, Mr. Franco Pagliano, in Milan; that city had many Chinese restaurants. Mr. Pagliano had learned how to make tofu from Mr. Roland di Centa. was supplying these Chinese restaurants with a small quantity of tofu (he made it the Chinese way, with calcium sulfate), but he was soon forced to stop production because he had difficulties producing, unofficially without the proper permits, in his apartment. It was a really good experience for me to get to know Chinese and Japanese people; Franco was very skillful and shared many secrets with me. Then after several months he called me to say that he was going to stop tofu production and that he could introduce me to his clients–which he did, including a Japanese restaurant, Suntory Italia, which had not previously accepted his Chinese-style tofu. I had contacts in Milan and met Mrs. Giovanna Mazzieri at a conference in Milan, where tofu was presented to the public and the press, together with the Italian Chefs' Association. I remember that on that occasion I first had a large number of tofu kits sold through Mrs. Mazzieri.

"I survived financially making tofu for the first couple of years. I sold my tofu to the Chinese restaurants of Milan, driving there once a week from Rimini in my small refrigerated car (280 km each way). I soon got tired of the trip, but actually I was motivated and satisfied and full of curiosity for the Chinese and Japanese atmosphere. Meanwhile, I was stopping to deliver my tofu at all of the macrobiotic and natural food shops and restaurants along the way (in Cesena, Forlì [Forli], Faenza, Bologna, Modena, Reggio Emilia, Parma, etc.). During those years I did promotion for soyfoods, including cooking classes.

"In July 1982 I attended the Soyfoods Conference in Seattle, Washington (we met again) because of my interest in large-scale production and in making a report on soyfoods, together with a lady dietitian from Bologna (I forget her name) supported by the University of Bologna. She continued introducing the many good qualities of soyfoods to those in her field, medical doctors and nutritionists. For more information on this, contact the Sunsoy Food company in Bologna.

"After my 1982 trip to the USA (now having with me color slides, literature, and information), I developed contacts with the largest food distributing company in Italy, Coop Italia, but the people in charge believed that it was too early to distribute tofu widely in Italy–the market was not yet ready... maybe in the future. Even though they were open to innovative ideas, the negative answer was disappointing.

"I remember there was a time in 1983 when I had the luck of meeting a Japanese girl, Fusako Aoki, who was just passing through Rimini–a very rare occasion. She helped me in tofu-making classes for about 3 months, in Rimini

© Copyright Soyinfo Center 2013

and other cities. Meanwhile many people visited me to learn about making and selling tofu (future competitors)!

"I had enough technical skills to develop and build (mostly by myself) a stainless steel continuous open-air steam cooker (not pressurized! a secret for good tofu), a second-hand Weston (from the USA) vibrating screen, a good stainless steel hammer mill. This was really good equipment for those times, the only equipment of its kind in Italy that I knew of.

"I was in charge of everything–production, sale, promotion, and new product development. Unfortunately I was not able to grow from the individual to the team aspect of the work. I exhausted myself, ending production in June 1988. In that year I was supplying centers in cities like Rome, Firenze [Florence], Torino [Turin], Bologna, Treviso, and Ravenna–mostly in northern and central Italy. The demand was growing and it reached the point that in places like Florence, Rome, and Torino people started companies to make soyfoods. At that point, I could survive only by diversifying products, improving packaging, moving into a larger factory at a new location, and expanding the company and the number of employees.

"I could not do this, and after a project of moving in Toscana near Florence, to live and work there, I had to discontinue my activities. The other reason was that my family was growing rapidly; I had 2 children in 1985 and 1987, and I did not want to jeopardize or endanger my family's personal financial situation. Looking back, I think I made the right choice, but I feel good when someone remembers me for my good tofu. I sold my equipment at a low price to a company named Food for All in Verona, then helped them with my knowledge of making and selling tofu. They are connected to the Ananda Marga Society, are supporting activities in India, and are really nice people.

"While in business, I was producing: Tofu (vacuum packaged or in bulk), tofu spreads (various flavors), tofu burgers, tofu mayo (fresh or long-life, in glass jars), seitan, seitan burgers, spreads, soymilk (sometimes, and only fresh), and various tofu desserts (fresh and perishable). I only made small batches of tempeh, for personal use and experimentation (not sold commercially) using cultures from the USA. Near the end of my activities, I produced 400 kg (and up to 600 kg) of tofu (base product); officially I had only one (maximum two) part time workers, with good help from my relatives.

"The only company (apart from the person of Mr. Pagliano) I know that made tofu before I did was the Poporoya company in Rome, which produced and sold it at his branch in Milan, the Poporoya-shop, a Japanese shop.

"People introducing soyfoods in Italy were the macrobiotic centers: Mr. Ferro Ledvinka from Rome, Mr. Alois Grassany from Bologna, and Mr. Roberto Marocchesi from Torino.

"I still see an opportunity in the future for making and selling tofu and tofu products in Rimini; this would be for me and my friends, but it would work only if it was connected with a larger project of a vegetarian cultural center. Who knows? Now I am a 'natural wood' carpenter." Address: Via Cuoco 9, 47037 Rimini, Italy.

10616. Weaver, Eric. 1994. Growing soybeans organically in Nicaragua (Interview). *SoyaScan Notes.* July 27. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Eric also supervises the development of Earth Trade's project in Nicaragua and he spends a large amount of time down there. During the last year or so, he has been to Nicaragua 4 times, a total of a month. Before that he worked for 10 years on the *Central America Bulletin,* an economics and politics newsletter published monthly in the USA by the Central America Research Group, so he went to Nicaragua regularly.

Cottonseed oil was the basic food oil in Nicaragua until 1991, after the new government of Violetta Chamorro took over from Daniel Ortega and the Sandinistas in national elections on 25 Feb. 1990; the Chamorro government changed the policies on subsidies in general and conducted an economic rationalization. Before that, the Nicaraguan government subsidized cotton production at huge losses. The official justification was that they needed the oil, but Eric thinks there were more complicated political factors. The cotton crop has now basically collapsed in Nicaragua. Starting in 1991, Nicaragua began to import soybeans, which they processed in the country's 9 or 10 cottonseed processing mills. President Violetta Chamorro's son-in-law, Antonio Lacayo, who is actually the de-facto president, got into soy oil processing even before the cotton was phased out. That is another reason for the move toward soy oil–because he had business interests in soya. Earth Trade is now starting to do a feasibility study of organic oil processing in Nicaragua. The company would like to set up an organic facility that will process not only soy oil, but also peanuts, sesame, etc. to produce a variety of organic oils.

Starting in the mid-1980s Nicaraguan breeders at CEA (a cotton experimental center near Leon) developed a soybean strain named CH86 from the Brazilian tropical varieties of soybeans. Now CH86 has been grown increasingly by farmers during the last few years–starting in about 1991 or 1992. The variety that they call Cristalina (which may be known internationally as light hilum) is a tropical variety that grows pretty well in Nicaragua. Nicaraguans calculate crop yields in hundredweights (cwt) per manzana. Note: 1 hundredweight = 112 pounds. A *manzana,* a traditional unit of land area in Central America, is the area of a square 100 *varas* on a side; it therefore varies according to the length of the vara. On average it equals 0.7 hectares or 1.7 acres. The CH86 averages 47-50 cwt/manzana and the Cristalina averages about 30 cwt/manzana. There is a big demand for the seed of these two varieties,

© Copyright Soyinfo Center 2013

and that's why there is a shortage on the market. Earth Trade grows both varieties. Earth Trade has talked with some Japanese buyers who are interested in Cristalina for soymilk and CH86 for tofu. They were very close to signing a contract then the price started to fall, so they backed off for a while.

Earth Trade's first organic soybean crop in Nicaragua was harvested in December 1993 as a rotation for sesame. They were planning to sell it on the international market organically, but the producer sun-dried it and it got rained on and became spotted; so Earth Trade sold those soybeans for $12-$12.50 per cwt on the local Nicaraguan market for soy oil Earth Trade presently has in the ground enough soybean seeds to produce approximately 1,000 tonnes of the CH86 and 500 tonnes of the Cristalina. The CH86 was planted in June and the Cristalina is being planted now, in July; both should be ready to harvest in December.

In Nicaragua, all substantial agriculture is located on the Pacific Coast; Earth Trade grows its soybeans in this region to the northwest of Managua, around the city of León (the capital of León Department) and in Chinandega. Address: Secretary-Treasurer, Earth Trade, 1814 Franklin St., Suite 710-E, Oakland, California 94612. Phone: 510-987-7222.

10617. Dwyer, Johanna; Goldin, B.R.; Saul, N.; Gaultieri, L.; Barakat, S.; Adlercreutz, H. 1994. Tofu and soy drinks contain phytoestrogens. *J. of the American Dietetic Association* 94(7):739-43. July. [45 ref]
• ***Summary:*** Phytoestrogens, compounds with weak estrogenic activity such as isoflavones, coumestans, and resorcyclic acid lactones (lignans), are found in several dozen plants eaten by humans, including some soy products. As the intake of soyfoods rises in the American diet, the activity of phytoestrogens may reach biologically effective levels. Phytoestrogens appear to have both estrogenic and antiestrogenic activity. They may also help prevent cancer. "Anticancer activity has been demonstrated by inhibition of tumor cell growth. Also, they appear to act in other ways that may inhibit tumor formation and growth, including inhibition of tyrosine kinase; inhibition of cell growth stimulated by epidermal growth factor; inhibition of steroid aromatase kinase and of DNA topo-isomerase; elevation of sex-hormone-binding globulin; and possibly lowering of endogenous estrogen levels."

Of the various products tested, tofu contained the highest level of isoflavones. Different brands of tofu contain from 73.0 to 97.5 micrograms per gram (wet weight) of the phytoestrogen daidzein and 187.4 to 215.9 micrograms of genistein per gram. By comparison, the soy drink First Alternative (made by Protein Technologies International of St. Louis, Missouri) contains only 7.0 micrograms of daidzein per gram of weight and 21.0 micrograms of genistein. The two soy-based specialty formulas tested were nearly devoid of these two isoflavones.

The tofu products tested were: Kikkoman firm, Nasoya soft, Azumaya soft, and Vitasoy silken. The soy-based specialty formulas were Jevity Isotonic, Enrich, and Glucerna–each made by Ross laboratories, Columbus, Ohio.

Note: What is the isoflavone content of a typical 130 gm serving of tofu? 9.5 to 12.7 mg of daidzein and 24.3 to 28.1 mg of genistein.

A sidebar (p. 741) features an interview with Johanna Dwyer and Nora Saul (both women); their hospital happens to be located in Boston's Chinese community. "Journal: What are phytoestrogens? How do they function? Dwyer: Phytoestrogens such as isoflavonoids and lignans, are compounds found in certain plants that are inherently active or are converted by human intestinal microflora into biologically active, hormone-like substances. Phytoestrogens exert weak estrogenic activity, most likely attributable to their ability to activate estrogen receptors in cells such as those in the vagina, uterus, and mammary glands. Depending on the biological environment and their chemical structures, phytoestrogens can function as either estrogens or antiestrogens.

"For example, in premenopausal women, who have high levels of circulating estrogens, phytoestrogens may function as antiestrogens. This is because phytoestrogens that bind weakly at estrogen receptor sites may compete for a place on the estrogen receptors with endogenous estrogens, which have much stronger affinity for the receptor sites. On the other hand, in postmenopausal women, who have low levels of endogenous estrogens, phytoestrogens may function as estrogens. Although phytoestrogens only bind weakly at estrogen receptor sites, there is little other estrogen in circulation, so phytoestrogens do bind to estrogen receptors At present, however, this explanation is based on hypotheses and must be tested."

"Journal: Why are these substances important biologically? Dwyer: A growing body of research suggests that phytoestrogens may reduce risks of certain cancers, especially hormone dependent diseases such as breast and prostate cancers." Address: 1. Prof. of Nutrition at the Tufts Univ. Schools of Medicine and Nutrition and director of the Frances Stern Nutrition Center, New England Medical Center, Boston, Massachusetts.

10618. Lightlife Foods, Inc. 1994. You'll sell a lot more meatless burgers–once you see the light (Ad). *Natural Foods Merchandiser.* July. Insert glued in after p. 72.
• ***Summary:*** This full-page, back-to-back, color ad insert shows the new Lightburger from Lightlife. It is sandwiched between two buns, with all the trimmings on a wooden plate. Address: P.O. Box 870, Greenfield, Massachusetts 01302. Phone: 1-800-274-6001.

Manufacturer's Name: Nutrem Soy Shop.
Manufacturer's Address: Managua, Nicaragua.
Date of Introduction: 1994. July.
New Product–Documentation: John Gabriel. 1995. Plenty Bulletin (Summertown, Tennessee). 11(3):4. Fall. "A Plenty volunteer in Nicaragua writes."

Chuck Haren. 1995. Nov. 8. SoyaScan Notes. "Soyfoods, Soynica, and Nutrem Soy Shop in Nicaragua" (Interview).

Note: This is the earliest known commercial soy product made in Nicaragua.

10620. Rattenbury, Jeanne. 1994. Answers about aluminum [packaging for soymilks and tofu]. *Vegetarian Times.* July. p. 26, 28.
• ***Summary:*** D.P.S. of Phoenix, Arizona, writes: "I've been wondering about the aluminum content of soymilks, juices and tofus that come in aluminum-lined paperboard containers. What is the aluminum level of these products? How safe are they to consume? Also, what about aluminum cookware? I've heard conflicting things about its contributing role in Alzheimer's and other illnesses."

Ans: "The first thing to know about aluminum is that you can't avoid it. The third most common element found in the earth's crust (after hydrogen and silicon), aluminum circulates in the dust in the air we breathe. Plants also inevitably absorb aluminum from soil and pass it along to their fruits and vegetables. Aluminum has no known physiological function; our kidneys do a good job of filtering it out of our systems before we absorb much of it. The U.S. Food and Drug Administration (FDA) has set no recommended dietary allowance (RDA) for aluminum intake, nor has it set any ceiling on the maximum amount of aluminum considered safe to ingest."

To be on the safe side, it may be best not to cook in aluminum pots–especially when cooking acidic foods such as tomatoes.

The current scientific consensus concerning Alzheimer's is that it is not necessary to take any extra ordinary steps to avoid aluminum in one's diet or otherwise.

10621. Simms, Kelly. 1994. Re: Soy's bad rap (Letter to the editor). *Vegetarian Times.* July. p. 8.
• ***Summary:*** The writer explains that she is a day-care provider who recently signed up to participate in a childcare food program which is funded by the USDA and the Michigan Dept. of Education. The program is designed to reimburse day-care providers for serving healthful meals and snacks to children.

"To ensure that the meals are healthful, guidelines are designed to require a provider to pattern the food components of a meal after the Food Guide Pyramid. Providers are also given a long list of unacceptable foods, which supposedly meet no nutritional need." The provider will not be reimbursed for the meals if they include an unacceptable foods. This list includes tofu, imitation milk (like soy beverages and infant formula, except in the case of allergies), and dairy substitutes (like soy cheese).

"Any program that allows the breading on a corn dog to count as a grain component but considers tofu to have no nutritional value at all is suspect. This food program really misses the mark, and I do feel slighted that as a provider, I cannot with a clear conscience participate in it. Give them a tofu covered stick for me." Address: Lansing, Michigan.

10622. *Soyafoods* (*ASA, Europe*). 1994. U.S. soyfoods consumption predicted to grow. 5(2):3. Summer.
• ***Summary:*** A U.S. study titled *An economic analysis of the use of soybeans as human food* predicts that domestic increases in consumption of soyfoods could use an additional 100 to 240 million bushels of soybeans each year. The study was conducted for the North Central Soybean Research Program by researchers at Agricultural Education and Consulting in Savoy, Illinois (Phone: 217-352-1190).

The study found that the following food categories which have the greatest potential to use soya as an ingredient (listed in descending order of projected use levels): (1) Flour products–bread, bakery products, pasta, and pizza dough. 2. Meat products–ground beef and processed meats. 3. Dairy products–liquid milk replacements, processed cheeses and yogurt. 4. Snack foods–crisps, extruded snacks, snack nuts and meat snacks. 5. Soyfoods–tofu, soymilk, tempeh, soy sauce, and miso. 6. Fresh vegetables–green vegetable soybeans.

However there will be tradeoffs. For example, increased use of soya to make meatlike products will ultimately lead to less need for soybean meal to feed livestock animals. But overall, the researchers believe that net crop income, at least for the North Central Region of the United States, will rise from nearly 8% to over 30%.

10623. **Product Name:** Soyco Tofu [Hi-Protein Firm, Tasty, Thai, Japanese].
Manufacturer's Name: Soyco Soyfood Product [Nutrisoy Pty. Ltd.].
Manufacturer's Address: 255 Forest Road, Arncliffe 2205, NSW, Australia. Phone: 02-9695-7755.
Date of Introduction: 1994. July.
Ingredients: Thai: Organic soybean, water, soy sauce, sunflower oil, spices, herbs, natural coagulant (magnesium chloride).
Wt/Vol., Packaging, Price: 200 gm.
How Stored: Refrigerated.
New Product–Documentation: Label with date sent by Tony Wondal of Nutrisoy. 2005. April 26. He started making and selling this product in July 1994. Thai: Green, orange, yellow, red and black on pale white.

10624. **Product Name:** Tofu Squeeze.
Manufacturer's Name: Unique Utensils (Product Developer-Marketer).
Manufacturer's Address: P.O. Box 3112, Littleton, CO 80161. Phone: (303) 797-6724.
Date of Introduction: 1994. July.
Ingredients: Stainless steel.
New Product–Documentation: Spot in Vegetarian Times. 1996. Nov. p. 16. This unique stainless steel utensil squeezes the excess moisture out of tofu. It locks the tofu into place with adjustable notches for desired consistency. A color photo shows the product pressing tofu.

Talk with Cindy Ellingboe of Unique Utensils. 1996. Nov. 1. This product was invented and designed by her husband, Bruce Ellingboe, and launched in about July 1994. It is made by a local craftsperson. The cost is $9.95 + $3.50 shipping = $13.45 total. Since 1994 it has been sold mostly at a few natural food stores in Colorado (especially Alfalfa's Market). Unique Utensils is a small family business, run out of their home, and this is their only product.

10625. Yves Veggie Cuisine. 1994. The meatless alternative: Tasty, wholesome, and convenient (Ad). *Vegetarian Gourmet* (*Montrose, Pennsylvania*) No. 10. Summer. Inside rear cover.
• ***Summary:*** The full-page color ad features Yves Veggie Wieners and Yves Burger Burgers. The two products are shown on a plate, ready to serve, and the attractive package for each product is displayed. "Try our complete line of products: Burger burgers, Veggie wieners, Tofu wieners, Chili dogs, Deli slices, Garden vegetable patties, Garden patties with mushrooms and fine herbs, Veggie Pepperoni. The perfect complement to today's active lifestyle." Address: Vancouver, BC V6A 2A8, Canada.

10626. Mann, Les. 1994. Wonder bean: Soy products are everywhere. *Herald* (*Wayne, Nebraska*). Aug. 2.
• ***Summary:*** "I refuse to be surprised anymore by what new uses researchers find for the versatile soybean. Its the wonder plant... Soybean breast implants won't go down in history as the most vile product to come from soy research. No, that distinction must go to tofu–it is horrid tasting, gelatinous globs of soybean curd that is commonly served as food in the Orient."

10627. *Economist* (*London*). 1994. Soya coming: Joint ventures in China (Shenzhen). Aug. 6.
• ***Summary:*** Even when they have local expertise and a good joint-venture partner, foreign companies find it difficult to invest successfully in China. The perils of trying to open a joint-venture factory in China include ever-changing government laws, promised infrastructure that fails to appear, hidden political agendas, phantom night shifts making products the foreign partner never sees, and corruption that often reaches up to the most senior official. It is frustrating, but the prospect of being left behind still draws in foreign firms–"like moths to a flame." So says Winston Lo, chairman of Vitasoy, a Hong Kong firm with a history of making drinks that dates back to 1940. In addition, Mr. Lo is operator of one of the more successful joint ventures in China, and has learned to sell its products worldwide, first to overseas Chinese, but increasingly now in natural and health food stores in America (where the company is the largest tofu manufacturer).

Vitasoy currently makes more than 400 million packs of drinks a year, 70% of them sold in Hong Kong and the rest exported. During the year ending 31 March 1994, the company made a net profit of HK$250 million (US$32 million) on sales of almost KK$1.2 billion.

Like others, Vitasoy has been beguiled by the immense profits that the Chinese market seems to offer. The average Chinese consumes only 4 liters of non-alcoholic drinks a year, vs. 60 liters per person in Hong Kong. Vitasoy has cautiously chosen as its base the southern province of Guangdong, next to Hong Kong, where many people know Vitasoy's products–which they can see advertised on television. Vitasoy now owns 70% of a new US$16 million plant just across the border in Shenzhen; the rest is owned by Guang Ming Farm, a state-owned enterprise controlled by the Guangdong provincial government. Four production lines are already running at this new plant, and six more are to be added before the end of 1994, giving a capacity of 620,000 packs of drinks a day. Mr. Lo has found that the hardest part of doing business in China is chosing the right partner, one who is resourceful, co-operative, and fair.

Vitasoy's relationship with Guang Ming began in 1979, when Vitasoy contracted to ship a herd of New Zealand dairy cows to China, install modern milking and processing equipment, and train the staff. In return, Vitasoy was given the right to market most of the firm's output in Hong Kong and Macau [or Macao; a Portuguese overseas territory]. This joint venture has expanded into a 6,000 acre ranch with a herd of 6,300 cows. Vitasoy claims half of Hong Kong's market for fresh milk.

Investors from Hong Kong account for about 80% of the investment in Guangdong province. But they seem to be getting tired of the many problems with doing business in China; the number of new joint-venture projects approved in the province fell by one third in the first 5 months of this year, compared with the same period last year. Unless China's central government is more welcoming to long-term investors like Vitasoy, "the moths circling its flame may soon look for safer flying space."

10628. Robesky, Fujie. 1994. Fuji Fresh Tofu Co. of San Jose is for sale for $80,000 (Interview). *SoyaScan Notes.* Aug. 9. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Fujie is interested in buying a tofu company. When she went to visit this company in Japantown of

© Copyright Soyinfo Center 2013

San Jose, she discovered that it is for sale for $80,000. Apparently the present owner, Linda Lam, is planning to return to her homeland, Vietnam.

Talk with Fujie Robesky. 1995. May 16. Apparently Linda Lam's daughter has taken over the company and is now running it.

Television broadcast on JTN Local News (Lafayette, California; 5 Sept. 1995 7:25 a.m.). Linda Lam still owns Fuji Tofu Co., which makes: Ginger syrup tofu pudding, Tofu egg rolls, Tofu steamed buns, and Seasoned yuba. They want to open a tofu vegetarian restaurant. Address: Hedge Computer Co., 1616 W. Shaw Ave., Suite B-3, Fresno, California 93711. Phone: (209) 226-3991.

10629. Scovronick, David. 1994. Re: History of Ithaca Soy in Ithaca, New York. Letter to William Shurtleff at Soyfoods Center, Aug. 14. 4 p. Handwritten.
• ***Summary:*** David opened his company 14 years ago, inspired by reading *The Book of Tofu.* He built the shop himself and did virtually all of the maintenance and repair work that was required. The company eventually produced over 2,000 lb/day of tofu and tofu products. "And all of it was made by hand, using time-honored and traditional techniques that were so beautifully encouraged by your writing and by Akiko's illustrations.

"Last summer, when I rather unexpectedly received notice that I would have to relocate the shop, I decided that perhaps my time as a business owner and tofu maker had come to an end and that it was time for me to move on in life. In April of this year I sold the business to a Chinese restaurant owner who was one of my best customers and who was also looking for a change in his life. Since then I have been training him and his staff to make tofu using the same traditional methods that have worked so well for me over the years. During this process I have come to realize how much I enjoy teaching the art of tofu making." He would like to find a way to continue to do so.

Talk with David. 1994. Oct. 20-21. The shop, now owned by Michael Pan and renamed Ithaca Tofu, reopened in August 1994 at 23 Cinema Drive, Ithaca, New York 14850. Phone: 607-266-0446. Michael first started making tofu at this new address. He lost some distributors during the 6 months that the shop was closed from March to August 1994. David is now practicing Tibetan Buddhist meditation with Tibetan monks in Ithaca. He would like to travel to India, work with Tibetans at the tofu shop in Dharmasala, then perhaps travel to southern India to teach Tibetans there how to make tofu.

Talk with David. 2001. Oct. 2. He calls. Michael Pan, a Chinese-American from Taiwan, did not chill the water for his bulk tofu, so it spoiled quickly. The health department was soon on his case. David worked at the natural foods co-op in Ithaca; as Michael's largest customer, he was able to watch the tofu quality decline. Michael closed the shop last month. David would like to re-start it. Address: Box E, Ithaca, New York 14851. Phone: 607-564-9326.

10630. Fellman, Louis. 1994. History of pioneering work with tofu cheesecake, Sprucetree Baking Co., and Soy Delites. Part I (Interview). *SoyaScan Notes.* Aug. 19. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Louis played a major role in developing America's first commercial tofu cheesecakes–which were named Tofu Cream Pies and were delicious. The product was originally developed by Sprucetree Baking Co. in Maryland. From the outset, it was sold with two different toppings: Blueberry and strawberry. Louis was not with Sprucetree when the product was launched in about 1976 by Howard Grundland, who started and owned Sprucetree on Belair Road in Overlea, a suburb of Baltimore, Maryland. Several people helped Howard start the bakery, including Murray Snyder and Norman Zweigel. Louis does not know who first had the idea for the tofu pies and who developed the first recipe.

Louis started working at Sprucetree right after the first East Coast Macrobiotic Summer Camp in about August or September 1977. [Note: In Oct. 1973 Sprucetree began operations on Belair Road in Overlea.] Sprucetree was making the tofu pies when Louis arrived in 1977 but it was only one of about 30 baked goods (including bread, cookies, other desserts, etc.) that they sold. Louis left Sprucetree twice. The first time was 6-8 months after he first arrived; he was lured back to New York City by Jim Guido, who used to own two East-West restaurants in the city. Louis worked there as a baker, and made tofu pies (which he now called "Tofu Cheesecakes") for the restaurant. He made many tofu cheesecakes and improved on the original recipe. John and Yoko Lennon used to come in to the restaurant (on 74th Street and Columbus Ave.) almost daily and enjoy Louis' tofu cheesecakes. The restaurant was crowded every night and was one of the hot, chic places to eat on the Upper West Side. Louis hired Alan Hoffman to be his assistant at the East-West restaurant. Alan later became the baker at Souen.

In about June 1978, after about 6 months in New York City, Louis returned to Sprucetree. He helped finance Sprucetree's move across town from Belair Road to 4105 Aquarium Place at Reisterstown Road in Baltimore. The company continued to make its tofu pies and other baked goods. In late summer of 1980 Louis found a new job as production manager at Erewhon Natural Foods. So he moved to Boston, Massachusetts, and soon hired Alan Hoffman (a baker at the Souen restaurant, who baked tofu cheesecakes using Louis' recipe) to be his assistant. Within 18 months he was married, with a child on the way, and Erewhon had declared bankruptcy. Next he worked briefly for Great Eastern Sun in North Carolina. Louis and his family moved to New Jersey where his mother was living. There he took jobs to make money, such as selling cars. At

© Copyright Soyinfo Center 2013

this time Tofutti was becoming famous; Louis (now living at 436 Jefferson Ave., Staten Island, New York) considered opening a tofu shop that made fresh tofu in New York City. He and Alan Hoffman even looked at some locations for the tofu company. While waiting for customers to come into the car showroom, he planned a company to make tofu pies which would be profitable and widely distributed. He found some friends who had a food shop in northern New Jersey with an oven and mixing machines. In 1983 Sprucetree stopped making tofu pies/cheesecakes. Continued. Address: Abraham's Natural Foods, P.O. Box 4201, Long Branch, New Jersey 07740. Phone: 908-229-5799.

10631. Fellman, Louis. 1994. History of pioneering work with tofu cheesecake, Sprucetree Baking Co., and Soy Delites. Part II (Interview). *SoyaScan Notes.* Aug. 19. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** So in about January 1985 Louis started a company named Soy Delites, Inc. that made nothing but tofu pies. Several friends invested money. "I did what a lot of people do. I took every credit card and maxed it out to the limit, then got on my knees and prayed every night. We went through some trials and tribulations like many companies do." At first he sold only whole pies, but then he realized he needed to sell packaged, individual serving. Eventually he found a company that made little wedge-shaped containers for pie slices. Then Louis moved his business into a bagel bakery in Matawan, near where he was living. Then Louis started baking the pies in little round 6-ounce tins with a little plastic lid on each. With a nice label and the new size, the product started selling well. He also made 6-inch pies for people who wanted something bigger. Fillings included banana-almond, carob-coconut, and mint carob chip. Toppings included strawberry, blueberry, raspberry. Richard Worth, who started Sorrel Ridge, made very thick batches of his preserves in 3-gallon containers as toppings for his tofu pies. When Richard left the company, it became very difficult to get a good topping that Louis did not have to cook.

Neshaminy Valley distributed the product from the outset, and a Boston distributor back-hauled the tofu pies to Boston, Massachusetts, where they sold well at Bread-and-Circus. But Louis couldn't get the his products into supermarkets or mass market stores. He was making a very modest living, but the satisfaction was there. Eventually Louis bought his own shop for Soy Delites at 568 Broadway, Long Branch, New Jersey. Then he started distributing Mediterranean foods (hummus, tabbouleh) made by another company.

In about 1988 Mark Brancato, who had a concession at the Delacorte Theater–free Shakespeare in the Park, approached Louis and they worked together to develop improved Mediterranean foods. Louis made these foods and first sold them to Mark in the summer of 1988. Then he took some samples to some of his customers. "They loved them. They didn't want the brand I was distributing any more." The demand kept increasing. Meanwhile, Louis was having problems getting delivery of tofu from Nasoya. So he started buying his tofu from Jeff Connerton of Fresh Tofu in Easton, Pennsylvania. The quality was inconsistent. Finally he looked at the who situation and realized that the tofu pies were not carrying their own weight. So he let them die. Louis made his last tofu pie in about 1988-89.

The tofu cheesecakes sold well, but there were several problems in making them profitable. First their production required a great deal of labor and therefore were not as profitable as Louis had hoped they would be. Second, the packaging was difficult because each pie was so delicate. He sold them refrigerated, but some stores kept them in the freezer, which hardly changed the quality at all. They were distributed by several distributors–but not by enough of them.

What are they keys to selling tofu cheesecakes profitably? (1) Find a good source of high quality, reasonably priced tofu, ideally one that has kosher certification. Find an acceptable sweetener. Maple syrup makes by far the most delicious tofu cheese, but it is too expensive. So Louis used honey, which he detests, both in terms of flavor and philosophy. Rice syrup is not sweet enough. Rice syrup, brand-named Rice Nectar, is now very readily available on the East Coast, made by T&A Gourmet. Perhaps a mixture of maple syrup and Rice Nectar would make a good sweetener. (2) Use the proper mixer and blade to make the tofu filling very smooth; Louis used a Stefan model made in Germany, not a Hobart VCM. (3) Develop good packaging for the product. (4) Get good distribution for the product, which hinges very much on the packaging, freshness, and shelf life.

In 1992 Louis changed the name of his company to Abraham's Natural Foods, whose main products are Mediterranean-style foods like hummus, tabbouleh, baba ganouj, etc. The market for these latter types of foods was much larger than the market for tofu pies. For a while he made both the tofu pies and the Mediterranean-style foods. Louis' partner from Sprucetree, Howard Grundland, went out of business (he was divorced, and moved), so Louis took over the production of Howard's Sweet Rice Cookies (made with a flour from mochi/glutinous rice). The original recipe, which is macrobiotic, came from Aveline Kushi or Murray Snyder. But the tofu pies were not as profitable as Louis had hoped they would be. So the demand for the hummus and other products basically squeezed out the tofu pies. The Bridge (in Middletown, Connecticut) is now a distributor of Louis' products. Few companies can survive on one product: The companies that make Tabasco Sauce, Pepsi, and Coca-Cola are exceptions.

Louis still pays Howard a small royalty on the Sprucetree Sweet Rice Cookies–which are still selling very well. As of Aug. 1994 Howard Grundland can be reached at 410-239-9791. Murray Snyder (phone: 212-308-3818) is in

© Copyright Soyinfo Center 2013

Manhattan, New York, running a macrobiotic center where he does teaching and consulting. Mark Medoff was planning to go to law school. Louis has been out of the organized macrobiotic scene for years. Address: Abraham's Natural Foods, P.O. Box 4201, Long Branch, New Jersey 07740. Phone: 908-229-5799.

10632. Dovgan, Alexander; Dovgan, Tamara. 1994. Re: Interest in making tofu and tempeh in Russia. Letters to William Shurtleff at Soyfoods Center, Aug. 18-22. 3 p. Handwritten. [Eng]
• ***Summary:*** Alexander and his family (wife Tamara and daughter Sasha) are Russian Canadians who came to Canada almost 5 years ago. "First of all, thank you for your books and we learnt a lot with them and they helped us to survive with a very small amount of money! We plan to return to the Soviet Union and we have a dream to start our own tofu-tempeh business, as it would help so many to regain their health and save animals, the environment, etc. We were very unhealthy as we had very poor nutrition in Moscow partly because of total ignorance as the grains and legumes were widely available but nobody knew anything about sprouting, combining, etc.

"We always make our own tofu, and now we are trying to make tempeh and to bake okara breads using whey, etc."

Tamara is a professional pianist, who works in the Opera Theater and in the Yamaha School of Music. Alexander is a photographer. They are both lucky to have jobs now.

Bill Shurtleff of Soyfoods Center suggests that they talk with Jon Cloud, which they do, and meet Alexander Podobedov. He sends them photocopies of articles about the SoyaCow in Russia.

Letter No. 2. Alexander is concerned that soyabeans are not available in Russia "as they were used only to make chocolate and oil." They have saved some money in Canada but they have no place to live in Moscow since their family moved to the USA. "That's why we're thinking about starting in St. Petersbourg, as its cheaper and its one of the most beautiful cities... Sasha makes Russian tofu at home (it's hard and cheeselike with herbs) as Russians wouldn't eat traditional plain tofu. But all our Russian and Canadian friends like it, so we'd be happy to be pioneers in that field in our native land."

Letter No. 3. Sasha plans to go to Moscow soon to find out everything about soybeans. Their 6-month-old son, Daniel, likes tofu very much. Address: 2350 Dundas West #2813, Toronto, ON M6P 4B1, Canada. Phone: (416) 534 8896.

10633. **Product Name:** Firm Tofu.
Manufacturer's Name: Atlantic Soy Products.
Manufacturer's Address: 311 Lancaster St., Saint John West, NB E2L 1J8, Canada. Phone: 506-693-6432.
Date of Introduction: 1994. August.
New Product–Documentation: Talk with Peter Olive, owner, who phones from Canada. 1994. Aug. 28. He started making tofu in Aug. 1994. He makes only firm tofu.

Note: This is the earliest known commercial soy product made in New Brunswick, Canada.

10634. *Ontario Soybean Growers' Marketing Board Newsletter.* 1994. Korean soybean curd manufacturers visit. Aug. p. 3.
• ***Summary:*** "Eleven representatives of the Korean Soybean Curd Manufacturers Federation toured southern Ontario in late May to get a first-hand look at the soybean industry. The group included the chairman of the federation, Mr. Chang Ye-Kyu and representatives of regional associations."

"Korea imports over 1,000,000 tonnes [metric tons] of soybeans annually, mostly from the United States. Approximately 130,000 tonnes or 5,000,000 bushels are used to manufacture tofu. All imports are handled through a government agency which has made a practice of buying crush quality soybeans and re-cleaning for sale to soyfoods manufacturers. Soyfood manufacturers would like to be able to buy higher quality soybeans but they have not been available in the Korean marketplace.

A large photo shows four Koreans comparing samples of #1 grade white hilum soybeans and #2 crush quality soybeans during their tour of the Sarnia grain terminal. Address: Box 1199, Chatham, ONT, Canada N7M 5L8.

10635. *Provender Journal* (*Eugene, Oregon*). 1994. Member news. 11(2):7. Summer.
• ***Summary:*** "Turtle Island Foods, Hood River, Oregon, says, 'One year after introducing them, Superburgers are our #1 selling product!... Look for Son of Superburger later this year. We now also private label manufacture all tempeh products in the Wildwood Natural Foods line.'"

Tofu Palace Products has a new address and a toll-free phone number: Box 50085, Eugene, Oregon 97405. Phone: 1-800-600-TOFU.

10636. **Product Name:** Trader Giotto's Manicotti Florentine.
Manufacturer's Name: Trader Joe's (Marketer-Distributor).
Manufacturer's Address: P.O. Box 3270, South Pasadena, CA 91031-6270. Phone: 818-441-1177.
Date of Introduction: 1994. August.
Ingredients: Tomatoes, cooked manicotti pasta (whole wheat flour, durum flour, water, wheat germ, bran), tofu (water, soybeans, magnesium chloride), spinach, onions, peanut oil, celery, carrots, parsley, garlic, dried yeast, natural flavoring, basil, oregano, salt, pepper.
Wt/Vol., Packaging, Price: 11 oz microwaveable sealed tray in a paperboard box. Retails for $1.99 (8/94, Concord, California).

© Copyright Soyinfo Center 2013

How Stored: Frozen.
Nutrition: Per package (312 gm): Calories 300, calories from fat 70, total fat 8 gm (saturated fat 1 gm), cholesterol 0 mg, sodium 540 mg, total carbohydrate 39 gm (dietary fiber 11 gm, sugars 9 gm), protein 19 gm.
New Product–Documentation: Product with Label purchased from Trader Joe's in Concord, California. 1994. Aug. 14. 7.5 by 5.25 by 1.25 inches. Red and black on white. Color photo of the two entree rolls on a white dish, topped with tomato sauce, next to a basil leaf. "No cholesterol. Non-dairy. Only 300 calories. No preservatives. No artificial colors or flavors. No MSG. Made with whole wheat manicotti pasta and a creamy blend of tofu and spinach."

Update 1995. Oct. The product now retails for $2.19. It appears to be made for Trader Joe's by Celentano Bros. in New Jersey. Update 1996. April. The price is still $2.19 at Trader Joe's in Concord.

10637. **Product Name:** Trader Giotto's Stuffed Shells.
Manufacturer's Name: Trader Joe's (Product Developer-Distributor).
Manufacturer's Address: P.O. Box 3270, South Pasadena, CA 91031-6270. Phone: 818-441-1177.
Date of Introduction: 1994. August.
Ingredients: Tomatoes, tofu (water, soybeans, calcium sulfate, magnesium chloride), cooked shell pasta (semolina flour, water), spinach, peanut oil, onions, water, salt, garlic, basil, parsley, celery, carrots, oregano, pepper.
Wt/Vol., Packaging, Price: 11 oz microwaveable sealed tray in a paperboard box. Retails for $1.99 (8/94, Concord, California).
How Stored: Frozen.
Nutrition: Per package (312 gm): Calories 300, calories from fat 60, total fat 7 gm (saturated fat 1 gm), cholesterol 0 mg, sodium 540 mg, total carbohydrate 38 gm (dietary fiber 6 gm, sugars 5 gm), protein 19 gm.
New Product–Documentation: Product with Label purchased from Trader Joe's in Concord, California. 1994. Aug. 14. 7.5 by 5.25 by 1.25 inches. Red and black on white. Color photo of the entree on a white dish. "No cholesterol. Non-dairy. Only 300 calories. No preservatives. No artificial colors or flavors. No MSG. Made with 100% semolina pasta and a creamy tofu and spinach filling."

10638. **Product Name:** Fine Herb Tofu–Extra Firm.
Manufacturer's Name: Twin Oaks Community Foods.
Manufacturer's Address: Route 4, Box 169, Louisa, Virginia 23093. Phone: 703-894-4112.
Date of Introduction: 1994. August.
Ingredients: Organic tofu (water, organic soybeans, nigari), basil, chervil, tarragon, marjoram, chives.
Wt/Vol., Packaging, Price: 16 oz. vacuum pack.
How Stored: Refrigerated.
New Product–Documentation: Label with date sent by Jon Kessler. 1996. Jan. 29. Twin Oaks Community Foods started selling this product in about August 1994 and it is still on the market. The herbs are mixed with the curds before pressing.

10639. Wang, Huei-ju; Murphy, Patricia A. 1994. Isoflavone content in commercial soybean foods. *J. of Agricultural and Food Chemistry* 42(8):1666-73. Aug. [28 ref]
• ***Summary:*** Isoflavones are one class of phytochemicals and are found in soybeans in large amounts. Twelve isomers of isoflavones were quantified: three aglycons and nine glucosides. Soybeans contain two major isoflavone aglycons, genistein and daidzein, and a minor one, glycitein. In the seed, the isoflavones are present primarily as Beta-glucosides. The nine glucosides are: daidzin, genistin, glycitin; 6"-O-acetyldaidzin, -genistin, or -glycitin; and 6"-O-malonyldaidzin, -genistin, or -glycitin.

This paper gives data on the concentration and distribution of isoflavones in 29 commercial soybean foods, grouped into three types: Soy ingredients, traditional East Asian soy foods, and second-generation soyfoods. Four values are given for each product in micrograms per gram, on an "as is" basis: daidzein, genistein, glycitein, and total isoflavones.

(1) Soy ingredients: Vinton 81 90: 600, 954, 82, 1636. Vinton 8191: 240, 648, 107, 995. Green vegetable soybeans: 546, 729, 79, 1354. Soy flour: 226, 810, 88, 1124. TVP #1: 473, 707, 202, 1382. TVP #1: 484, 702, 156, 1342. Soy isolate #1: 77, 273, 115, 466. Soy isolate #2: 115, 392, 102, 610. Soy isolate #3: 122, 393, 99, 615. Soy concentrate: trace, 13, 42, 56.

(2) Traditional soy foods: Roasted soybeans: 563, 869, 193, 1625. Instant soy beverage #1: 311, 617, 109, 1037. Instant soy beverage #4: 407, 665, 111, 1183. Tofu (73% moisture): 146, 162, 29, 337. Tempeh: 273, 320, 32, 625. Bean paste (ko chu jang in Korea): 272, 245, 77, 593. Fermented tofu: 143, 224, 23, 390. Honzukuri miso (rice and soybeans): 79, 177, 38, 294.

(3) Second generation soyfoods: Soy hot dog: 34, 82, 34, 150. Soy bacon: 28, 69, 24, 122. Tempeh burger: 64, 196, 30, 289. Tofu yogurt: 57, 94, 12, 164. Soy Parmesan: 15, 8, 41, 65. Soy Cheddar cheese #1: 2, 5, 27, 34. Soy Cheddar cheese #1: 34, 40, 35, 109. Soy mozzarella cheese: 11, 36, 30, 76. Flat soy noodle: 9, 37, 39, 85.

Some manufacturers use ethyl alcohol extraction to prepare soy protein concentrates; this process removes a substantial portion of the isoflavones. The products examined for this paper which had the lowest content of isoflavones (all less than 100 micrograms per gram) were: soy cheddar cheese A 34, soy protein concentrate 56, soy Parmesan 65, soy mozzarella cheese 76, flat noodle 85.

"Proposed anticarcinogenic doses of soybean isoflavones range from 1.5 to 2.0 mg per kg of body weight per day (Hendrick et al, 1994). There are a number of soy food choices that will fit this dose requirement without the

© Copyright Soyinfo Center 2013

need to consume unusual amounts of these soy foods."

Isoflavone standards and extraction of isoflavones: Authentic standards of daidzein and genistein were obtained from commercial sources (ICN Pharmaceuticals, Plainview, New York, and Calbiochem Corp., San Diego, California). Daidzein and genistein were from previous work in the laboratory (Murphy 1981). The starting material for extracting isoflavones was defatted soybean flour. It was, in turn, extracted with acetonitrile (ACN) and 0.1 N HCl [hydrochloric acid] (1:5:1 w/v/v) according to the procedure of Murphy 1981. Address: Food Science and Human Nutrition, 2312 Food Sciences Building, Iowa State Univ., Ames, Iowa 50011.

10640. Mio, Art. 1994. Update on Morinaga Nutritional Foods (Interview). *SoyaScan Notes.* Sept. 2. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Morinaga is now selling about 420,000 cases/year of their different types of Long Life tofu. Sales increased very little last year. The company will have to sell 800,000 cases to break even. During its entire history in America, Morinaga has not had a single year when it made a profit. It continues to lose money every year, but not enough to cause a crisis in Japan or to lead Japanese management to decide to discontinue the product or operations in America.

As the value of the dollar continues to fall against the yen, it becomes increasingly expensive to import tofu from Japan, and thus either the retail price of tofu must rise accordingly or profit margins must drop. It was Mr. Ono's decision to establish Morinaga selling tofu in America, and he is still the person who must make the big decisions about the company. Mr. Kumoda is in charge of Morinaga's operations in America. Many people lose face, each step of the way up the ladder, if they admit that things are not going well. Art has to bend with the wind. Even if he makes a suggestion, it just goes up the ladder.

Bill Shurtleff's observations: Someone needs to look carefully at the total Morinaga situation and make some big decisions, such as to build a plant in America. There is no leadership–the company is just drifting, and losing money every year. No one has a strong belief in the product.

The basic problem is not to find a good slogan to sell Mori-Nu Tofu but to address the fundamental structural questions about the company's future. What is needed is to find a creative way to finance a plant in America. What are the product's unique characteristics? Long Life tofu. Silken tofu. Address: National Sales Manager, Morinaga Nutritional Foods, 2050 W. 190th St., Suite 110, Torrance, California 90504. Phone: 1-800-669-8636.

10641. Hill, David. 1994. Tofu-maker sold, re-opens. *Journal* (*Ithaca, New York*). Sept. 5.
• ***Summary:*** Ithaca Tofu began production again in late July after restaurateur Michael Pan bought Ithaca Soy from Michael Scovronick, who co-founded the business in 1981. Pan, with 3 employees, now makes about 3,000 pounds/week of tofu in the former Ithaca Bakery plant in the Lansing Small Mall on Cinema Drive. The company also makes soymilk and Spiced Tofu Kan.

10642. Buzzell, R.I.; Jessop, D.B.; Buttery, B.R. 1994. Evaluation of soybean varieties for tofu processing. Agriculture & Agri-Food Canada Research Centre, Harrow, Ontario N0R 1G0, Canada. 15 p. Sept. 8. Unpublished manuscript.
• ***Summary:*** For the updated, published, and condensed version of this report see Ma et al. 1996. Address: Harrow, Ontario, Canada.

10643. Gabriel, John. 1994. Current work with soya in Nicaragua (Interview). *SoyaScan Notes.* Sept. 12. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** John and his wife, Charlotte, just returned from Nicaragua where they helped to establish the country's first commercial shop that manufactures tofu, tempeh, and soft-serve soy ice cream (made from soymilk). The shop is located in Managua (in a district named Las Mercedes, near the airport). Lucy Morren of Soynica is in charge of the new company. The tofu was introduced in August 1994, and $400 worth of tofu was sold that month. Chuck Haren is writing an article about the new company to appear in the next issue of *Plenty Newsletter.* Address: 11668 Blackberry Place, Nevada City, California 95959. Phone: 916-265-5100.

10644. Kisling, Matthew. 1994. New developments at Jerusalem Tofu in Israel. Also tempeh in Israel (Interview). *SoyaScan Notes.* Sept. 16. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Matthew, age 26, is the son of Susan Ergas who owns and runs Jerusalem Tofu, Israel's largest tofu manufacturer. He is looking for sources of organic soybeans in America. The business is flourishing and Susan wants Matthew to play the lead role in expanding the company. He has been working there, making tofu, recently. He would estimate they make over 600 kg/week. He plans to go back and work as production manager so Susan can take a vacation and maybe retire. The company recently moved to Moshav Aminadav from Moshav Orah (which is nearby in Jerusalem). The tofu company is now in a large building that was formerly a chicken laying factory. The phone number is now 434-830. Karen Freedland is no longer with Jerusalem Tofu; she is back in the USA.

The other big tofu company in Israel is Mikor Hateva located just outside Tel Aviv, about 45 minutes drive from Jerusalem. It is run by "Black Jews," black Americans who moved to Israel. This company is Jerusalem Tofu's biggest competitor, though they are smaller. They also make tofu ice cream. They have been around for a long time, but they

© Copyright Soyinfo Center 2013

recently changed their name to Mikor Hateva. and recently started making tofu. They now have an Israeli partner. The Macrobiotic Center in Tel Aviv also makes some tofu, but mostly for people at the center.

There is now a commercial tempeh shop in Israel, in Beersheba [Be'er Sheva] (Israel's 4th largest city), run by Roxanne, an America woman from Colorado. Tivol [Tivall] is also doing a lot with soy in meatlike products; they are the big boys on the block. Address: Binghamton, New York.

10645. Andoh, Elizabeth. 1994. Where Tokyo's young crowd likes to eat: Choice tables. *New York Times.* Sept. 18. p. 165.
• ***Summary:*** A look at popular restaurants in Tokyo. "One sampler is made up of five rolls of sushi–one each of tuna, omelet, natto (sticky fermented [soy] beans), mentaiko (spicy cod roe) and fresh ama ebi (shrimp).

Also mentions: "chilled cubes of silky bean curd," "miso-thickened broth with wakame, or sea tangle," "fried bean curd," and "sweet adzuki beans."

10646. Mann, Sue. 1994. Tempeh, tofu, and soymilk in Ecuador (Interview). *SoyaScan Notes.* Sept. 23. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Sue, who has lived in Quito for 6 years, is interested in making tempeh commercially in Ecuador, South America. She went to Ecuador originally as a teacher in an American school. Some people at Ambato Votec College [a Vocational-Technical College about 3 hours bus ride from Quito] in Ecuador are making quinoa tempeh, supposedly on a commercial scale; they sell it mostly in Quito.

Also some Chinese or Korean people make tofu in Quito and sell it at one stall of an outdoor Oriental foods market. They make the tofu somewhere else and sell it twice a week fresh, from a bathtub, at the stall. They also make a pressed tofu. A lot of the health food stores in Quito occasionally sell fresh tofu; she has never asked where it is made.

She also knows a Baha'i person who makes soymilk in Ecuador. Address: c/o Donna Lewen, Cassilla 17-12-578, Quito, Ecuador. Phone: 593 2-570-600.

10647. **Product Name:** [Sliced Baked Tofu with Slivered Vegetables].
Foreign Name: Mikado (Tofu Terrine).
Manufacturer's Name: Albert's Tofuhaus.
Manufacturer's Address: Hauptstrasse 13, D-6719 Lautersheim, West Germany. Phone: 06351-43718.
Date of Introduction: 1994. September.
Ingredients: Tofu, olives, herbs.
Wt/Vol., Packaging, Price: 250 gm.
How Stored: Refrigerated.
New Product–Documentation: Label from Albert Hess. 1995. March 12. This product was introduced in 1994. It resembles German Leberkäse or French terrine, both traditional meat, fish, or vegetable products. It is made by mixing hijiki (a sea vegetable), celery, slivered carrots, etc. with creamed tofu, filled into brick-shaped forms, then baked and finally sliced.

10648. **Product Name:** [Sliced Baked Tofu with Diced Smoked Tofu & Leeks].
Foreign Name: Rauch und Lauch.
Manufacturer's Name: Albert's Tofuhaus.
Manufacturer's Address: Hauptstrasse 13, D-6719 Lautersheim, West Germany. Phone: 06351-43718.
Date of Introduction: 1994. September.
Ingredients: Tofu, olives, herbs.
Wt/Vol., Packaging, Price: 250 gm.
How Stored: Refrigerated.
New Product–Documentation: Label from Albert Hess. 1995. March 12. This product was introduced in 1994. It resembles German Leberkäse or French terrine, both traditional meat, fish, or vegetable products. It is made by mixing diced smoked tofu and sliced leeks with creamed tofu, filled into brick-shaped forms, then baked and finally sliced.

10649. **Product Name:** Bratos (Pork and Tofu Hot Dog). Renamed Brato Dogs in Feb. 1995.
Manufacturer's Name: Bee-Lor Inc.
Manufacturer's Address: 103 North Third St., Oskaloosa, IA 52577. Phone: 515-673-1930.
Date of Introduction: 1994. September.
Ingredients: Pork, tofu (water, soybeans, calcium sulfate, magnesium chloride), seasoning, brown sugar, nonfat dry milk, salt, dextrose, spices, onion, spice extractives, bacon.
Wt/Vol., Packaging, Price: 6 links per 1 lb package. Retails for about $3.99.
How Stored: Frozen.
New Product–Documentation: Dialog Alert. 1994. Sept. 1. This product contains 140 calories, 80 of which come from fat. It is said to contain 50% less fat, 17% less cholesterol, and 17% more protein than typical all-meat hot dogs. Sold frozen, it contains no MSG and is targeted to supermarket delis.

Rick Jost. 1995. Des Moines Register. July 17. "First brats, now burgers–tofu firm grows." Tim Beeler (president) and Jerry Lorenzen (vice-president) of Bee-Lor Inc. developed the Brato Dog (a combination of tofu and pork) a couple of years ago. Initially this product was called just Bratos, but they changed the name to help them penetrate the East and West Coast markets.

Talk with Jerry Lorenzen, vice-president of Bee-Lor Inc. Bratos were introduced in about Sept. 1994, then renamed Bratos Dogs in Feb. 1995. The tofu is produced by White Wave. The product contains no preservatives or MSG. Products now almost ready to go to market are: Beeler Boygers, Natural Bratos (No subclinical antibiotics or sulfa drugs fed to the hogs after they are 60 days old), Chili &

© Copyright Soyinfo Center 2013

Cheese Bratos. They should be in stores by late 1995 or early 1996.

Talk with Renee, secretary. 1996. April 25. Only the Beeler Boygers are on the market, but she does not know when they were launched. The others are still under development.

10650. Business Trend Analysts, Inc. 1994. The health and natural food market: Past performance, current trends, and opportunities for growth. 2171 Jericho Turnpike #342, Commack, NY 11725. 325 p. Sept. Price $995.00. *
• ***Summary:*** Chapter 3 of this report, the first of seven chapters that discuss individual product categories, is titled "The Market for Soy Foods: An in-depth analysis of historical, current, and projected sales. Trends in the U.S. market for soy foods. Manufacturers' total sales of soy foods. Manufacturers' sales of soy foods, by distribution channel. Total retail sales of soy foods. Retail sales of soy foods, by distribution channel. Retail sales of soy foods, by type: Soy sauce, tofu, second generation, soymilk, miso, soynuts, tempeh. Worldwide soybean production, total and per capita. U.S. production of soybean oil. New product introductions in the market for soy and vegetarian foods, including names of manufacturers, brand names, and product descriptions.

Under "Report Highlights and Special Features" we read that after the 3-year recession, most product categories posted strong gains, but "several segments failed to cash in on the growth bonanza. Manufacturers' sales of soyfoods were up a meager 2½%, while the market for frozen health foods declined slightly... One-third of consumers under the age of 35 feel it is extremely important that the food products they purchase are natural; the percentage is even higher among older consumers. Over 40% of adults believe they will contract heart disease or cancer." Today 68% of adults are overweight, up from only 58% a decade ago.

Overall report Contents: 1. Executive summary. 2. Overall market dynamics (including Soyfoods). 3. The market for soy foods. 4. The market for herbal teas. 5. The market for dairy foods. 6. The market for grains and cereals. 7. The market for frozen foods. 8. The market for snack foods. 9. The market for groceries. 10. The health food consumer. 11. The health/natural food store industry. 12. Competitor profiles. 13. Industry directory. Address: Commack, New York. Phone: 516-462-2410.

10651. Franke, Adrian A.; Custer, L.J.; Cerna, C.M.; Narala, K.N. 1994. Quantitation of phytoestrogens in legumes by HPLC. *J. of Agricultural and Food Chemistry* 42(9):1905-13. Sept. [59 ref]
• ***Summary:*** Table 4, titled "Total phytoestrogen levels of analyzed food items" (p. 1910) gives values (in mg/kg of food material) for daidzein, genistein, coumestrol, formononetin, and biochanin A. Soy-related foods analyzed include soybeans seeds (incl. organically grown in USA from Arrowhead Mills), green vegetable soybeans (raw or boiled), soybean hulls, soy flour, and tofu. Address: Cancer Research Center of Hawaii, 1236 Lauhala St., Honolulu, Hawaii 96813.

10652. Haren, Chuck. 1994. Alimentos San Bartolo. *Plenty Bulletin* (*Summertown, Tennessee*) 10(3):1-3. Fall.
• ***Summary:*** "Tempeh, tofu, flavored [soy] milk cicles, [soy] ice cream, soy milk, and toasted soy flour are sold daily from this village processing facility. It was great to see that since last year ASB had built a small room to cook the tempeh (a cultured soy food). The quality of tempeh they were making had improved considerably."

Photos show: (1) Two Guatemalan young people in traditional Mayan dress, holding two soy ice cream cones each, and standing outside the window of Alimentos San Bartolo (ASB–San Bartolo Foods). Caption: "Soy ice cream has been enjoyed in San Bartolo since 1979." (2) Three Mayan staff people in traditional dress at ASB package tofu for market.

10653. **Product Name:** [Soy Meat (Tofu)].
Manufacturer's Name: Key Gilda Inc.
Manufacturer's Address: Sehitler CAD No. 18-6, Alsancak, Izmir 35230, Turkey.
Date of Introduction: 1994. September.
New Product–Documentation: Talk with Murat Bukey, son of the owner of Key Gilda, Inc. 1994. Nov. 17. Murat's father, Ataman Bukey, owns this company, which was the second company in Turkey to make tofu. He learned the process from Mehmet Adnan, the first man to make tofu in Turkey, who joined their company. The market for tofu in Turkey is quite small, so their company is still very small.

Presently a major expansion of agricultural production is taking place in southern Anatolia (the part of Turkey in Asia), which will double the agricultural production of Turkey. This will mean an expansion of soybean production in Turkey, and new opportunities for making soyfoods. He and his father are looking for new ways of using soybeans to make foods.

10654. Laokole, Dedjoguere. 1994. Tchad: Combattre la malnutrition par le soja [Chad: Combatting malnutrition with soya]. *Communautes Africaines* No. 49. p. 12-13. July/Sept. [Fre]
• ***Summary:*** This article, in a section titled *"Actions de Developpement,"* follows a question and answer format. Dr. Akintayo, a teacher in the PNUD project, answers the questions. Q–When and why was the UN International Volunteer Corps (*journée Internationale des Volontaires*) created? Ans:–the JIV was established in 1985 by the General Assembly of the United Nations. It has three main goals, but in each country the work must be suited to local needs. In Central Chari the main problem is malnutrition,

© Copyright Soyinfo Center 2013

especially of children. Dr. Akintayo is using the soybean, a miracle plant, to fight this problem. Many different delicious foods, such as milk, yogurt, cheese [tofu], sojatine or soy coffee, oil, biscuits, bread, cakes, etc. can be obtained from soya. These foods can greatly enrich the local diet.

Q–What obstacles has production of soya faced in Tchad? Ans: The soybean was introduced to Tchad about 20 years ago, because the peasants were interested in its production. Unfortunately this interest quickly disappeared because there was no market for the first harvest. The many ways of using the soybean and its benefits were unknown by the population at that time. This is one of the objects of our exposition.

Note 1. This article makes no mention of current soybean cultivation in Chad.

Note 2. This is the earliest document seen (Aug. 2009) concerning soybeans in Chad, or the cultivation of soybeans in Chad. This document contains the earliest date seen for soybeans in Chad, or the cultivation of soybeans in Chad (about 20 years ago, i.e., about 1975). The source of these soybeans is unknown. Address: Chad.

10655. Legume, Inc. 1994. Healthy vegetarian meals from Legume (Ad). *Natural Foods Merchandiser.* Sept. Insert glued in after p. 34.

• ***Summary:*** The full-page color ad begins: "Legume means vegetarian. Whether 'vegetable' in French, or 'bean' in English, the Legume name stands for the finest in vegetarian cuisine. And now, Legume's pledge to quality, organic ingredients, convenience and great taste comes in energy efficient, recyclable cans." A color photo shows the six products in the Legume Healthy Vegetarian line (in 15 oz cans): Chicken Style Soup, Chicken Style Chili, Beef Style Stew, Beef Style Soup, Beef Style Tamales, Italian Polenta. All products except the Polenta contain wheat gluten and miso.

Talk with Chandri Barat of Legume. 1995. Sept. This new line of canned entrees was launched in Dec. 1994. All products in the line are vegan; most products contain wheat gluten and miso. The new labels will state: "no animal products" rather than "vegan." The present terms such as "chicken flavored meat analog" will be replaced by "flavored wheat gluten (water, wheat gluten, miso," etc.). The company that makes these products is an old-fashioned, established one. The products are now starting to be sold in supermarkets, in the natural/health foods section. Address: P.O. Box 609, Montville, New Jersey 07045.

10656. Parks, Thomas R.; Bindon, J.N.; Bowles, A.J.G.; Golbitz, P.; Lampi, R.A.; Marquardt, R.F. 1994. Methodologies for processing plant material into acceptable food on a small scale, phase II. Moffett Field, California: National Aeronautics and Space Administration, Ames Research Center. x + 219 + 21 p. Sept. Illust. No index. 28 cm. Technical Report. NASA CR-177647, A-94130. Govt. Doc. No.: NAS 1.26:177647. [10 ref]

• ***Summary:*** A study of simple processing equipment for the foods to be used by NASA in closed ecological life support systems (CELSS) on a space station under micro-/zero-gravity conditions. Most nutrient requirements can be met by four crops, which were studied: Soybeans, wheat, white potatoes, and sweet potatoes.

The section titled Soyfoods (p. 171-96) has the following contents: Introduction (composition of dried soybeans, best foods for CELSS, processing equipment), soymilk, tofu, okara, tempeh, edamame (immature green soybeans), soy sprouts, processing by extrusion/expelling (oil), expeller pressed soy oil, whole fat soy flour, soymilk beverages, tofu-based meat replacers, tempe-based meat replacers, soy yogurt (fermented), frozen desserts, textured soy flour, extrusion impact on functional properties, materials balance. The production of wheat gluten from wheat, and the biomass culture of mushrooms are also discussed (p. 160).

Tables and figures show: (T7) Soyfoods–Composition and nutrient content (based on USDA Handbook No. 8-16, full page). (F78) Chart of modern soyfoods, divided into: Soya-based dairy alternatives and Soya-based prepared foods. (F79) Four methods of soymilk production: Traditional, Cornell, Illinois, ProSoya. (F80) Modified ProSoya system with pressure plate and centrifugal basket for okara removal. (F81) Flow chart for regular tofu production. (F82) Flow chart for tempeh production. (F83) Flow chart for soybean processing by extrusion/expelling. (F84) Flow chart for soymilk yogurt. (F85) Flow chart for soymilk ice cream. (F86) Processing soybeans for primary soyfood products with extruder. Address: Food and AgroSystems, Inc., 1289 Mandarin Dr., Sunnyvale, California 94087.

10657. Sojarei Vollwertkost GmbH. 1994. Preisliste: Handel + Gastronomie 1994/3. Gueltig ab 1. September 1994 [Price list–For the trade and gourmet shops. Prices effective from 1 Sept. 1994]. Traiskirchen, Austria. 4 p. 30 cm. [Ger]

• ***Summary:*** This price list lists 122 products in the following categories: Specialties in glass. Varieties of tofu. Pies or pastries (*Pasteten*). Spreads. Patties (*Laibchen*). Vegetarian sausages. Wheat cutlets. Salad sensations with Tofunaise. Soya specialties. ALSAN Reform margarine and CESAN Reform margarine (*rein pflanzlich* = contains no animal products). Sesame butter and nut butters. Specialties for the whole foods kitchen. Harald Schatz honey-wine. Ing. Bläuel–Olives and olive oil. Dr. Christian Wurm–Honey varieties. Auer–Patties (dry basis). Gehringer–Sonnland pasta and patties. Arbeitsgemeinschaft Alternativ Bäuerliche Produkte. Address: Roemerstrasse 14, A-2514 Traiskirchen, Austria. Phone: (02252) 559 01.

10658. *SoyaCow Newsletter* (*Ottawa, Canada*). 1994.

Russian ASSOY director tours Canadian food processors. 3(3):1-2. July/Sept.
• ***Summary:*** "Mr. A. Podobedov, General Director of the Russian Soybean Association, visited Canada in early September to tour a variety of soyfood and dairy processors. His objective was to gain insights into the production of tofu, ice cream, and dairy-type beverages made from soymilk. The tour was a complement to his visit to ProSoya Inc., the company building the industrial-scale SoyaCow SC2000 systems for installation in Russia.

Mr. Podobedov visited: La Soyarie in Hull, Quebec (which makes tofu and meat alternatives; President: Mr. Koichi Watanabe); scientists Dr. C.Y. Ma and Dr. W. Modler of Agriculture Canada (they are developing isolates and concentrates from soymilk); the Neilson Dairy facility in Ottawa; and Gelato Fresco (which is making soy ice cream and has signed a distribution deal with Modern Products, of Milwaukee, Wisconsin).

10659. Weber, Marcea Newman. 1994. Re: History of early work with tofu and tofu cheesecakes in America. Letter to William Shurtleff at Soyfoods Center, Oct. 4–in reply to inquiry. 3 p. Typed, with signature.
• ***Summary:*** Marcea was first introduced to tofu in New York City in the late 1960s or early 1970s. She was living on West 72nd St, and was baking cakes, cookies, and slices for some of the health food shops and restaurants in New York City. "One day I happened to venture across a tofu factory that was located in a shop front on Amsterdam Avenue between 74th and 75th St. in Manhattan. [Note: This was K. Tanaka & Co., 326 Amsterdam Ave. Owner: Mr. Eisuke Murakami.] I went in to get a closer look at what they were doing and asked if I could stay and watch. They asked me to come back the next day as they were finishing their work for the day. So the next day I arrived there not knowing what on earth was in store for me, but the feeling to seek out this procedure was quite clear inside of me. They gave me some black rubber boots to wear as there was water everywhere and invited me in to watch the whole operation. It was very primitive according to today's standards. Everything was done by hand, from the grinding to the cooking and pressing, nevertheless I went through the whole tofu operation from start to finish. Being my first experience watching tofu being made, I didn't know anything else to compare it to.

"Then as I inspected it more closely, I began to think of cheese and as I was not eating dairy foods any longer perhaps the desire to eat some cheese affected the way I perceived it and so I took some home and thought I would like to experiment with it. I started to bake a 'cheesecake' with it although at the time I was just putting together ingredients. You see I had never baked a cheesecake in my life and for that matter most of what I did I did without having to experiment at all. The first time I put different ingredients together something delicious came out of the oven.

"The cheesecake worked and from then on I started to experiment with different flavours and toppings and then started to ask some of the natural food restaurants of they wanted to buy some 'Tofu Cheesecake' or 'Tofu Cream Pie' (I don't really remember which name I preferred). I don't really know where the inspiration came from and what it was all about. I was, after all, baking for some of the health food stores already, making things like O'george bars, which were peanut and raisin and honey bars, and selling them and cookies and other slices as well on a pushcart which I operated on the weekends."

What was the inspiration that led Marcea to develop so many remarkable tofu recipes in *The Sweet Life* (1974)? "I feel that my mother's influence had a great deal to do with it, although she did not bake cheesecakes, but I feel that the recipes kept coming through me, and I don't really understand how except I felt like a medium at times who was doing it without thought. My mother was a very good baker, although most of her baking took the form of honey cakes, cookies, and apple pies. I did spend many long hours watching her bake many kinds of delicious Jewish pastries and helped her lick the bowl clean.

"I began supplying fruit cakes to Souen [a restaurant at 2444 Broadway, between 90th and 91st Street, in New York City] when they first opened and as I knew the owners they asked me to help in the sweets department. In 1971, as soon as I perfected the 'Tofu Cheesecake' or 'Tofu Cream Pie' I began to sell it at the restaurant. As far as I know, this was the first product of its type sold in the U.S. I lived on West 72nd Street, near the restaurant, and I did spend lots of time there developing recipes and helping out." Note that Marcea developed this tofu cheesecake three years before her book *The Sweet Life* was published.

"The Cauldron [sic, Caldron] (a restaurant started by Marty and Glory Schloss and his mother) also had a [non-dairy] cheesecake, which I think had tofu as a major ingredient and which was slightly different than mine. I remember trying to figure out how they made theirs but of course it was a trade secret. I'm not sure when their cheesecake was introduced. I remember seeing it either after I developed mine, or at about the same time." Marcea also sold her tofu cheesecakes at Erewhon. She was not aware that Kathy Bellicchi ever made a tofu cheesecake. She does not remember the names of the first owners of Souen.

Marcea moved to Boston, Massachusetts, in about mid-1971. Other people in Boston at the time were Bill Tara, Paul Hawken, Dora Hawken, Murray Snyder, Daniel Weber, and Rebecca Wood.

Marcea and Daniel Weber met in Boston in about 1972, and both studied macrobiotics. They left Boston in 1974 to live in England because Daniel wanted to study acupuncture there. Address: 56 St. Georges Cres., Faulconbridge 2776 NSW, Australia.

10660. Thompson, Keith; Brown, Edward. 1994. Breeding soybeans for use in making tofu at Jacob Hartz Seed Co. Part I (Interview). *SoyaScan Notes.* Oct. 11-12. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** In late 1987 Keith Thompson visited Soyfoods Center and he and William Shurtleff worked together to design a system that Jacob Hartz Seed Co. could use to more effectively breed soybeans for food uses. The purpose of this interview is to find out if that system was implemented, and if so how, and how it is working.

Hartz has hired Dr. Keshun Liu, a PhD in food science. His job is basically trying to interface between soybean breeders, Keith, and the soyfoods industry.

There are three main problems in breeding soybeans for use in making tofu. The first and biggest problem is that most tofu makers never seem to be willing to pay a premium price for their soybeans–unless the soybeans are organically grown, in which case tofu makers will pay huge premiums. The big market for tofu beans is in Japan. Hartz sells about 40,000 bags/year (each 50 lb) to tofu makers in the USA; one tofu maker in Hawaii buys about half of these. From these companies, Hartz is able to get a premium of about $2.50 per bushel over the CBOT (Chicago Board of Trade) price. Until tofu makers are willing to pay a premium for soybeans that give tofu with better yield and quality, they must be willing to accept varieties that are already developed. Tofu beans are pretty much a commodity, since there are a lot of large-seeded, clear hilum beans grown in the Midwest that perform pretty well for tofu. Natto makers are willing to pay a good premium for their soybeans because natto beans are inherently lower yielding and have many special characteristics that are difficult to breed and select for. Because Hartz has limited storage, they breed in the areas where they can get the best premiums. Hartz hedges 100% of its soybean transactions. So it tends to charge a fixed dollar amount (its margin) over the CBOT price.

In growing out new varieties, Hartz contracts with farmers to grow the beans, then buys back 100% of these beans at a pre-determined price, bags them in a Hartz bag, and sells them to soyfoods makers. It does not prefer that farmers sell its beans to soyfoods makers, though farmers have the right to do this. Hartz's 428-acre breeding farm is used solely to produce breeder and foundation seed stock–the first 2 generations. The Plant Variety Protection Act of 1972 gives plant breeders some rights over the products they produce in their breeding programs, and prohibits farmers from selling protected seed to other farmers–like a seed company. But farmers can save their own seed and plant it in the future–which means he doesn't have to buy seed from a seed company for a long time. Hartz doesn't like that and he thinks there is a movement to mitigate that. For example, farmer-saved wheat seed was so extensive that Pioneer Hi-Bred withdrew from the market. All Hartz's varieties are plant variety protected.

When Keith entered this business in 1978 there were 8-9 soybean varieties in 3 different maturity groups in the entire southern USA (13 states) that the farmer could choose from; now he has about 150-200 varieties to choose from. Breeders have incrementally increased yield, disease resistance, targeted soil type adaptability, etc.

Soybean farmers generally look carefully at and plant the latest, best yielding varieties since they expect to get better yield, disease resistance, etc.–and save money. Why do soyfoods manufacturers not think the same way. Why would they not be willing to pay more for a new bean that will give them a 10% higher yield? Keith does not know. He thinks these manufacturers get a variety that works well and don't want to change their process. He often cannot even get them to test a new variety; its too much trouble (not surprising). Another problems is that some tofu manufacturers like one variety very much, and others don't like it at all. But the three missing links in this process are (1) research in the breeder's lab to show how the new soybean variety behaves in making tofu (yield, taste, composition, price per pound of tofu, etc.) and (2) comparing the performance of this variety with varieties used by major tofu manufacturers; (3) compiling the results of this research as information that can be easily understood by any soyfoods maker. Breeders now do this for soybean farmers but not for soyfoods makers. Is the tofu market too small for a breeder to make this investment? Not if you include East Asia, Southeast Asia, the USA, and Europe. For many years Singapore and Hong Kong have imported mostly Canadian beans with a pretty low margin. Japan has a tradition of buying IOM beans out of the Midwest, but IOM is no longer a meaningful term because we change varieties so fast. It used to be a large-seeded, clear-hilum mix of several varieties but now it can be almost anything. A portion of the users of Japan's 500,000 metric tons to make tofu is willing to pay a premium for variety soybeans. Hartz exports about 3,000 tons/year to Japanese tofu makers, but they still don't have a good variety. Continued. Address: 1. Food and Export Manager; 2. PhD, Soybean Breeder. Both: Jacob Hartz Seed Co., P.O. Box 946, Stuttgart, Arkansas 72160. Phone: 800-932-7333.

10661. Thompson, Keith; Brown, Edward. 1994. Breeding soybeans for use in making tofu at Jacob Hartz Seed Co. Part II (Interview). *SoyaScan Notes.* Oct. 11-12. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** The second problem is that the science of breeding soybeans for tofu is not well understood. We still don't understand the basic theory as to what constitutes a good soybean for making tofu–a good tofu bean. What are the main compositional factors that affect tofu yield, flavor, and consistency (hardness or softness). It is not clear what characteristics breeders should select for when breeding tofu beans–except for the bean's physical appearance. Keith has a

© Copyright Soyinfo Center 2013

very close Japanese contact who is doing excellent work at a lab in a university in Japan, trying to understand what causes one soybean to be better than another for making tofu. He has made a lot more progress than Hartz has, and his work is quite confidential. Hartz has tried to get permission from the Japanese for Dr. Keshun Liu to visit that lab, but they won't even talk about it. Keith's talks about this university researcher with Takashi Matsumoto who is in a large trading company, but he doesn't recall the name of the tofu researcher at the university. The trading company is funding the research and is very forward looking.

The third problem is that the Japanese who buy soybeans that will eventually be used for making tofu have a number of strong preconceptions about the way these soybeans should look–regardless of the amount and quantity of tofu that can be made from them. They want a soybean with very large seed size (less than 2,000 seeds/lb), a clear hilum, and dull-luster–that looks like a typical soybean grown in Japan. If the soybean doesn't look like that, they don't care how good the tofu yield or flavor are. The Japanese seem to prefer what are called "Vinton-type" soybean varieties for making tofu. These include Vinton [a Midwest variety introduced in 1978 by breeder Walt Fehr and Iowa State University] and Harovinton (from Harrow, Ontario, Canada). These are large-seeded clear hilum beans [perhaps traditionally called vegetable-type soybeans]. "Vinton-type" soybeans now sell (cleaned and in bulk) for only about $0.80 to $1.75 over the Chicago Board of Trade (CBOT) price. That is not enough of a premium to attract Hartz. Hartz has developed on soybean that seems to have excellent characteristics for making tofu. But the Japanese don't want this soybean because it doesn't look like what they are used to. It is oblong and not as uniform as usual.

Eddie Brown hasn't given up on tofu beans; he is doing a lot of work and making a lot of crosses. Hartz has 40 acres of a variety it will be harvesting in the next 2-3 weeks and releasing next year that was selected primarily based on seed size, but also protein content. This line is quite large seeded, with 1,400 seeds/lb. Yet agronomically, it is a second or third class variety, so Hartz must charge more for it to counterbalance its lower yield. It is difficult to grow large-seeded soybeans in the south since it is generally true for soybeans that the further you go north and the earlier the maturity group, the larger the seed size and the more the percentage of clear hilum varieties. Some of this is genetic and some environmental. Varieties north of Boothill, Missouri are usually indeterminate, whereas those to the south are determinate. Determinate plants grow to a certain height and then start blooming; indeterminate varieties start blooming when the plants are very small and bloom until they reach normal plant height.

Keith thinks that true Vinton is not grown much any more. The new Vinton-types, developed by Midwest breeders, look like a Vinton but the yield is much better for the farmer. These Vinton-types sell for about $0.80 to $1.75 over the CBOT price.

One reason the Japanese may be demanding Vinton-type soybeans having a certain appearance is so that they can blend our $8/bushel beans with their domestic beans [Nihon Daizu], which are much more expensive, then sell the blend as if they were all Japanese-grown soybeans.

Japanese are limiting themselves greatly by demanding large-seeded soybeans. Eddie has only 10-15 breeding lines available to him in large-seeded soybeans compared with 2,000 to 3,000 lines of regular-sized soybeans. Breeders in the Midwest have a much larger germplasm base to work with on large-seeded clear-hilum varieties.

Hartz would like to have more of its soybeans grown organically because they could get a huge premium for those soybeans–no doubt about it. Hartz is already producing some organic natto beans, primarily with one big rice grower who is OCIA certified. His main crop is rice, and he has his own rice mill, rice bagging, and rice marketing system. Most rotations in the South are based on either rice or cotton. It is very difficult to find organic acreage in the South unless you find a rice farmer who is philosophically committed to organic farming [like Carl Garrich of the Lone Pine in Arkansas]. Even if Hartz offers farmers a premium of $4/bushel over the CBOT price they are not interested. It doesn't work well with a rice rotation.

Once a soybean seed company makes the commitment to breed soybeans for tofu, it must develop at least a small bench-top tofu-making system in order to quantify and compare different varieties. You need a program and a systematic way of making tofu and measuring the results. You must be able to prove that one soybean is significantly better than another for making tofu–in terms of yield, or flavor, or fat content, or genistein level, whatever. This becomes the basis of marketing the soybean to tofu makers. Address: 1. Food and Export Manager; 2. PhD, Soybean Breeder. Both: Jacob Hartz Seed Co., P.O. Box 946, Stuttgart, Arkansas 72160. Phone: 800-932-7333.

10662. Demos, Steve. 1994. How White Wave selects soybeans to make tofu, tempeh, and soy yogurt, and to create value-added products (Interview). *SoyaScan Notes.* Oct. 15. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** White Wave now uses 3 varieties of soybeans: A blend of two varieties for making tofu, and one different variety for tempeh. Steve selected these varieties over a number of years by a trial and error process–but he would like to be able to select them in a more scientific way. For making soy yogurt, Steve is looking for a new variety, which must have a low flavor profile (i.e. little beany flavor). Within the last year, he began talking with a soybean breeder who approached Steve saying that he had one soybean with a low lipoxygenase content (which is thought to give soymilk with little beany flavor), and another with a low fat content.

© Copyright Soyinfo Center 2013

Steve is looking for better flavor and lower calories because he is trying to develop value-added products out of former commodities for his Vegetarian Cuisine line. The key to doing this is developing products that taste better.

For many years, soyfoods consumers were willing to sacrifice taste for ideology or price. Tofu and tempeh have traditionally been bought and sold as commodities, so manufacturers of these foods have traditionally paid more attention to yield and functional properties than to flavor–since the flavor quickly gets lost in the surrounding water. "Most tofu makers won't use only Vinton soybeans because they are too expensive and that added expense cannot be passed on to the consumer. Yet everyone knows that vegetable-type soybeans produce a superior product–bigger, glossier curds, meatier texture. Vintons also give a superior tofu yield–but Steve does not know why and he would be very interested in knowing the science and theory behind this phenomenon. Is more of the protein in the bean extracted in the soymilk? Does it have a higher nitrogen solubility index? Do the curds trap more water? I think U.S. tofu makers totally disregard flavor when buying soybeans for tofu; they are concerned mostly with the quality and texture of the curd–the size, firmness, and elasticity of the curd. The majority of consumers believe that tofu has no taste anyway." But value-added products are judged in a totally different way than commodities; consumers demand good taste. White Wave's way of making soyfoods is capital intensive; therefore he would prefer to sell value-added products rather than commodities. So Steve is now studying how to transform his commodities into value-added products that command a premium price and have consumer loyalty. White Wave's low-fat tofu is sold as a value-added product, and it has recently become the company's best-selling tofu product. It allows him to "add a couple of higher gross margin points to his profit." Adding *Bifidus* also adds value. A major opportunity is to associate soyfoods with medical benefits [as by showing that eating soyfoods reduces ones risk of a major disease, or by adding genistein–which Steve had not heard of].

The main factor moving White Wave in this direction is the "organic problem" that is emerging in America; high prices and limited supplies. For a number of years, Steve has contracted for his soybeans with a broker (also called a consolidator) at a certain time of year each year; the name of the broker and the time of year are confidential. Steve contracts for specified amounts of certain identity-preserved soybean varieties at a specified price, to be delivered over a specified period of time. He also specifies the maximum moisture content, foreign material, etc. The broker then contracts with soybean growers and the broker stores the soybeans after harvest until delivery. The broker takes the risks associated with reduced yield or crop failure. It is much easier to contract with farmers if they are located nearby; but the farmers who end up growing Steve's soybeans are all far away. It would be hard (and too much trouble) for him to keep in touch with weather conditions far away, and to visit the farmers from time to time. The organic business used to be based on affidavits issued by the farmer; now it is changing to third-party certification, and that change should be finished after about one year. Having soybeans certified by a third party raises their cost to the manufacturer by about 25%. It is virtually impossible to pass that on to the tofu consumer, since tofu is seen as a commodity. The federal organic law may be different in particulars from the California organic law–which has been the standard. All the tofu Steve now produces is made from organically grown soybeans, but soon he will offer both a low-cost regular (non-organic) tofu, and a certified organic tofu that retails for about $0.15 per pound more. Then the consumer will have a choice. This has never really been done before.

In the future, Steve would like to work much more closely with soybean breeders and seed companies to help solve his problems, improve the flavor of his products, develop new products, and learn more about the theory and science that connects soybeans and soyfoods. In addition he is planning to set up an in-house R&D department; White Wave already has a test kitchen and a food technologist on staff. A key function of the R&D department will be to develop value-added products. White Wave is already conducting in-house taste panels but is selecting soybeans "from a grab-bag mentality rather than from an organized, scientific project mentality... There is absolutely no question that the long-term strategic development of soyfoods requires this approach." The timing is perfect and Steve would like to establish such a relationship with a seed company as soon as possible. White Wave is now in the process of strategic planning for the next 5-7 years. But a company must be big enough (as White Wave now is) to devote the focused mind time and invest the resources to follow through for the seed companies this way. As a company gets larger it has a greater need and ability to base its choice of raw materials on a solid scientific foundation. Smaller companies might agree to work with seed companies but it would be hard for them to do it properly over the long term.

In the past, White Wave has chosen one or two soybean varieties and then stopped looking for better ones for several years. But that will change as soon as the new R&D department begins operation. Address: President, White Wave Inc., 1990 North 57th Court, Boulder, Colorado 80301. Phone: 303-443-3470.

10663. Kimura, Takuji "Tak." 1994. Re: Work with édamamé in America. Letter to William Shurtleff at Soyfoods Center, Oct. 16. 5 p. Handwritten, with signature.
• ***Summary:*** Mr. Kimura was very encouraged to read Soyfood Center's Edamamé: Bibliography and Sourcebook. He was especially interested in the special report on Minnesota Edamamé. "Because, I myself, conduct demos,

© Copyright Soyinfo Center 2013

averaging 1 hour, to 2 hours at the most, at natural food stores such as Whole Foods, Bread of Life, Living Foods, Andronico's (Park & Shop), Berkeley Bowl & Monterey Market (produce store) & am enjoying tremendous responses. Normally 1 out of 100-150 customers responds 'Yeah, I hate it!' 99% of customers have never seen or tried it before, but once they eat edamamé, 50% buy. 1% normally respond 'I had it at Sushi Bar & always wanted to buy it but did not know where it was available.'

"As I briefly explained to you on the phone, I've been a food broker representing Sushi Vendors (5 vendors for each area like Yamato for Bay Area, Arigato for Marin County, etc.) for Price Costco but always feel what if something, sometimes goes wrong. All I'm doing is keeping 'all eggs in one basket.' Then I came up with an idea that I must sell what the others or big companies do not sell. What? No way! But I remembered well about you, roughly 20 years ago you wrote a book on tofu which I still have and not many people paid much attention to tofu in those days, the mid-'70's, right? But what now? Every store carries tofu. Well then, what about Soy Bean related products? I went to many natural food stores but everyone had soy bean related products already. How about soy bean before processing? The answer was very simple and obvious, 'Eda Mamé.' 1st I presented sample products to the Whole Foods buyer, & his response was he would carry and authorize to retail out of one of 4 stores provided I conduct demo. So I did at Mill Valley where not many people know me. It was kind of embarrassing at that time, early this year. On the 1st day, I sold out 40 packs of 8 oz size in just a matter of one hour on Saturday. Then I was told to bring twice as many the following Sat., which I did & sold in 1½ hours. Not realizing that Mill Valley had different demography [demographics] from Berkeley, I was over confident. I Presented this program to Andronico's & attempted to sell 80 packs on Friday at their Telegraph Ave. store. God! What a disaster, only 24 sold in 3 hours. This yo-yo game went on & on & on but now Whole Foods still sells an average of 50 packs a day at 3 stores, except Mill Valley does 140 packs on Saturday and Sunday!

"Apart from what I did, this principal I represent is interested in purchasing a vacuum injection packing machine, which costs roughly $70,000 from Italy. Of course, it's not just for Eda Mamé but also for Sushi & Bento. Sushi & Bento are not required to provide with nutritional facts at this time but Eda Mamé need nutritional facts. I wonder if our current label is accurate because it did not agree with your information... I would appreciate your advice before Yamato goes into a new label printing which will be more like Azumaya's tofu package film." Tak would also like to sell books by Shurtleff & Aoyagi.

"Look forward to a happy and long lasting business relationship with you & your organization... I treasure this [edamamé] book. Thank you again!" Address: 1810 "C" Farm Bureau Road, Concord, California 94519. Phone: (510) 687-2422.

10664. Amerika, Mark. 1994. Genealogy of lunch: On the tofu trail. *Spec* (*San Francisco, California*) 1(1):29-33. Oct. [1 ref]

• ***Summary:*** The author, a busy vegetarian, likes easy-to-prepare rice burgers and not-dogs. In the habit of rushing his meals, he decides to eat good food periodically throughout the day and to find out more about what he eats, where it comes from, and "what kind of work goes into the development of the very fuel that feeds my body. I decided to look into the 'genealogical' background of my favorite lunch at the Creative Cafe, one of the hipper restaurants here in Californicated Boulder... The Creative Cafe has developed a national reputation for making the best barbecued tofu this side of the Mekong Delta."

The chef and co-owner of the Cafe, Liz Cruickshank (with partner Charles Blair), tells Mark she gets all of her tofu from White Wave and she used over a ton a month. Liz feels it is important to tell Mark about the "laborintensity" of preparing his entree. Mark notes with satisfaction that the water content of tofu is very similar to that of the human body. He also notes that so-called fake hot dogs are actually real hot dogs; real hot dogs are made of ground up pigs (not dogs). Eating a "tempehburger on a warm sesame seed bun" reminds Mark of "the feeling I had as a kid who used to be rewarded for his good behavior with a trip to Wendy's or McDeath."

Mark then visits White Wave, where he finds secrecy surrounding the operation. He learns that White Wave makes about 1,400 lb/day of tofu, but the source of their soybeans is a company secret. A photo shows Mark in dark glasses next to the White Wave plant and a huge logo reading "White Wave Soyfoods."

Note: This bi-monthly "zine" is published by Matthew Jaffe in San Francisco. The title, "Spec," stands for "specific" and "speculation." Address: Editor-at-Large, Boulder, Colorado.

10665. *Bio Novice* (*Bio News, Ljubljana, Slovenia*). 1994. Soja–Hrana Prihodnosti (1) [Soya–Food of the future. I.]. No. 14. Oct. p. 20-23. [1 ref. Slv]

• ***Summary:*** The subtitle reads: "We will excerpt some of the most interesting paragraphs from *The Book of Tofu,* written by William Shurtleff and Akiko Aoyagi; it is the world's best-selling book about tofu." Discusses the work and publications of the Soyfoods Center, run by Shurtleff and Aoyagi. Contains a full page of illustrations by Aoyagi from *The Book of Tofu.* showing different types of tofu.

10666. **Product Name:** Premium Lincolnshire Vegetarian Sausages.
Manufacturer's Name: Cauldron Foods Ltd.

© Copyright Soyinfo Center 2013

Manufacturer's Address: Units 1-2, Portishead Business Park, Portishead, Bristol, BS20 9BF, England. Phone: +44 1275 818448.
Date of Introduction: 1994. October.
Ingredients: Soya bean curd (water, soya beans, calcium sulphate), water, onion, hydrogenated vegetable oil, wholemeal rusk, egg albumen (from free range eggs), hydrolysed vegetable protein, starch, yeast extract, stabilisers (methyl cellulose), salt, herbs, fructose, spices, roast barley malt extract, wheatflour.
Wt/Vol., Packaging, Price: 250 gm of 5. Retails for £1.30.
How Stored: Refrigerated.
New Product–Documentation: Spot in Soyafoods (ASA, Europe). 1995. Spring, p. 5. "New sausage variety from Cauldron Foods." A photo shows the package.

Label sent by Heather Paine of SoyaFoods in London. 1995. April 18. Red and green on beige. Paperboard sleeve. Color photo of two sausages on a white plate with carrots, potatoes, and snow peas. Circled green V certification symbol. "Approved by the Vegetarian Society."

10667. Dannenberg, Linda. 1994. Mastering the art of cooking superfoods. *Self.* Oct. p. 156-58, 177.
• ***Summary:*** "Last September, *Self* editors came up with a top ten list of health foods we love. The winners? Tofu, wheat germ, yogurt, sweet potatoes, broccoli, papaya, onions/garlic, strawberries, tuna, and parsley. Each one offers a nutritional bonanza, low in fat and calories and packed with vitamins, minerals and protein. In fact, these foods are so good for you we called them the superfoods."

"Why we call them superfoods: Tofu–A 7-ounce block supplies nearly half of the RDA for protein, more than one quarter for calcium. Low in calories and fat." The tofu recipe (p. 158) is "Fried tofu with spicy tomato, parsley, onion and garlic sauce."

10668. Goh, Francis. 1994. Soybean in Singapore and its utilisation for the production of tofu and soymilk. Paper presented at Incoming Soybean Technical Mission. 7 p. 18 Oct. 1994 at Harrow Research Station, Harrow Ontario, Canada.
• ***Summary:*** Singapore (population 3 million, of which 78% are Chinese and 14% Malay) imports 33,360 tonnes (metric tons) per year of soybeans for local consumption and re-export. About 51% of these soybeans are imported from Canada. There are 45 small and medium sized tofu factories in Singapore (which together use 600-700 kg/day of soybeans) and 2 large factories (which together use 2 tonnes of soybeans and each have an are of 1,500 square meters of more). Unicurd is the biggest. Four tofu companies have a history of 70 years in Singapore. No family wants to marry its daughter to a tofu maker because the work requires such long hours, often all night.

Mr. Goh and his wife bought an existing company in 1981. Theirs was the first company in Singapore to bring automatic machinery from Japan to produce soymilk and pack tofu in containers. In Singapore, tofu used to be considered a poor-man's food; if it was served more than once every two weeks, family members might complain. But Unicurd repositioned tofu as a "nutritional food." The company markets its products mostly to the Japanese community of 20,000 people in Singapore.

There are 6 traditional soymilk makers in Singapore; the people like a product with a "strong beany flavor." Address: Managing Director, Unicurd Food Co. Pte Ltd., Blk. 6020 Ang Mo Kio Industrial Park 3, #01-154/156/158/160, Singapore 2056. Phone: 482-5454.

10669. Joachim, David. 1994. The joy of soy: Welcome to the kitchen of Dorothy Bates–soyfoods pioneer. *Vegetarian Gourmet* (*Montrose, Pennsylvania*) No. 11. Autumn. p. 28-33.
• ***Summary:*** Dorothy, age 73, graduated from Iowa State University with a degree in food, nutrition, and journalism. Then she began her career as a home economist for Swift & Company, a Chicago-based food company. In 1945 she married and moved to Hawaii, where her two children were born. In 1968 [actually about 1973 or 1974] her daughter-in-law Cynthia prepared a few simple dishes at Dorothy's home in Connecticut using tofu, tempeh, soy sauce, and textured vegetable protein. This had a profound effect on the direction of Dorothy's life. Sensing a story, Dorothy called the food editor from the local newspaper [Elizabeth Squires of the Wilton Bulletin in Wilton, Connecticut] to photograph the dishes and write about soy products. Now age 50, and a lover of the rich desserts of French cuisine, Dorothy had little idea that she would eventually be writing vegetarian cookbooks–such as The Tempeh Cookbook, and The TVP Cookbook.

Contains 9 soyfoods recipes, including: Super-easy chocolate mousse (with silken tofu), and Whipped topping (with firm tofu).

A sidebar (p. 31-32) discusses soybeans, diet, disease prevention, and genistein.

10670. Lee, Mu-Tsun [Mucun]; Huang, Shuhui. 1994. Tofu! Tofu! Tofu!: Chinese style. Monterey Park, California: Wei-Chuan Publishing Co. 79 p. Illust. (color). Index. 13 x 19 cm. [Eng; Chi]
• ***Summary:*** Contents: Conversion table. Soybean products: Soft tofu, hard tofu, bean curd skin (*fu p'i*) [yuba], pressed bean curd (*doufu gan*), bean curd strips and bean curd sheets ("Bai Yeh"). Homemade soymilk. Homemade tofu. Tofu: Salads, appetizers, frying, stir-frying, cooking in sauces, deep-frying, steaming.

For most recipes, there is one recipe on each two-page spread. A color photo occupies two-thirds of the left page together with the English-language list of ingredients. The rest of the recipe is on the right page. For the rest of the

recipes, there is a second recipe with a small photo on the right page.

10671. Morinaga Nutritional Foods, Inc. 1994. Mori-Nu holidays are as easy as pie (Ad). *Vegetarian Times.* Oct. p. 49.
• ***Summary:*** This full-page color ad shows a large pumpkin pie on a cloth on a cutting board. Behind it is a package of Mori-Nu Lite Tofu and a cornucopia of vegetables and fruits. A recipe is given for "Dairy-free, Low-fat Pumpkin Pie" using 1½ packages of Mori-Nu Lite Tofu–Firm. Address: 2050 W. 190th St., Suite 110, Torrance, California 90504. Phone: 310-787-0200.

10672. Olson, Joan. 1994. Tofu in good taste. *Ag Innovation News* (*AURI–Agricultural Utilization Research Inst., Crookston, Minnesota*) 3(4):11. Oct.
• ***Summary:*** Tofu and soymilk could soon have a milder flavor. USDA's Agricultural Research Service (ARS) soybean breeders have bred out the "rancid" taste, yet the new varieties still have acceptable yields, insect tolerance, and resistance to pod shattering. But the tofu and soymilk made from these soybeans is more yellow than usual, so the scientists are working to identify and remove the chemical causing the yellow color.

Letter from Joan Olson. 1994. Dec. 20. For details on the new soybean contact Niels Nielsen, Purdue Univ., West Lafayette, Indiana 47907. Phone: 317-494-6076.

10673. Sare, Chris. 1994. Fight cancer naturally: Research suggests power of broccoli. *Muscle & Fitness* 55:261. Oct. *
• ***Summary:*** Contains nutrition information.

10674. Shurtleff, William. 1994. Report on soybean and soyfoods research trip to Ontario, Canada: 17-19 October. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549 USA. 21 p. Unpublished manuscript.
• ***Summary:*** Contents: 3-page program titled "Incoming Soybean Technical Mission." Oct. 17. Talk with Fred Brandenburg, executive director of OSGMB about food-grade Ontario soybeans exported to Asia. Canada is working to increase its sale of food-grade soybeans to Asia. Even though these soybeans are more expensive, they are of better quality and thus preferred. They are also very clean, since soyfoods makers want soybeans with little or no foreign matter. Most are not sold identity preserved, but they are large seeded, white hilum beans. Fred speaks of "crusher beans" and "food beans."

Oct. 18. Visit to Harrow Research Station, run by the Canadian federal government. (1) Talk by Michael Loh: Canada has 72% of the Singapore soybean market, 52% of the Hong Kong market, and 14% of the Malaysia market for soybeans imported for all purposes. Ontario's goal is to double exports by the year 2000. Their strategy is selling value-added products to niche markets. Food-grade soybeans now being developed in Japan include Enrei, Toyo Suzu, Toyo Masari, Otsura, and Kita Musume. (2) Talk by William Shurtleff on "Breeding Soybeans for Food Uses." (3) Presentation by Doug Jessop of the Food Processing Lab. at Harrow. He has been making and studying tofu there since 1983, and on a regular basis since 1984. He shows us his process, using lab equipment that cost about $15,000 not including the Instron system that measures texture. (4) Talk with transparencies by Dr. Dick Buzzell on breeding soybeans to make tofu. Harovinton gives the best tofu yield of all the varieties developed in Canada. A soyfoods maker can either contract with farmers in advance to have soybeans grown for them, or buy the soybeans from traders after they are harvested. To take optimum advantage of a soybean for making tofu, you must know the protein content then add the appropriate amount of water. The more protein in the bean, the more water you must add to get the highest yield. Identity preservation (IP) costs more. The yields will be lower and you must contract for it in advance; a problem is how to deliver the beans year-round to the end user. (4) Talk by Dr. Ma of Central Food and Animal Research. His specialty is vegetable protein. He is collaborating with ProSoya to make soy protein isolates from soymilk since Russia wants to make its own isolates. The soybeans with the highest protein content (on a dry weight basis) are BARC-6 53.4%, Harovinton 45.5%, Enrei 45.0%. One Japanese mutant soybean has none of the three types of lipoxygenase. Lines that lack A-4 protein give firmer tofu. In isolines, everything is the same except for one trait.

Oct. 19. (1) Visit to OSGMB with Fred Brandenburg to hear presentation, see facilities and collect documents. It takes more solar energy to lay down oil in a soybean than protein. Thus after a hot, dry summer, Canadian soybeans contain more oil. Soybeans in hot, tropical countries near the equator also generally contain more oil. In 1985 Canada became a net exporter of soybeans. The cost of producing soybeans in Canada is about the same as in the USA, but the U.S. often ships full vessels of soybeans and is near oceans, whereas Ontario often ships containers (20 or 40 tons), either out the St. Lawrence Seaway or down the Mississippi River. Some agrochemicals that are legal in America are not legal in Canada. All agrochemicals must be licensed, as must some farmers. Mr. Goh says that Chinese believe white hilum soybeans contain more protein than other soybeans. (2) Visit to Canadian Grain Commission to learn how Canada inspects and exports soybeans. The closest that a full seagoing vessel can get to Ontario is Montreal (Quebec)–the last deep-water port up the St. Lawrence Seaway. In Canada, dockage (both big and tiny foreign matter) is removed from soybeans before foreign material is calculated. This makes Canadian soybean much cleaner than those from the USA. Address: Lafayette, California. Phone: 510-283-2991.

10675. Shurtleff, William. 1994. Breeding and marketing soybeans for food uses: A blueprint for changing our seed company's basic mission. Paper presented at A Symposium on Breeding Soybeans (for an Incoming Soybean Technical Mission). 9 p. 18 Oct. 1994 at Harrow Research Station, Harrow, Ontario, Canada. [1 ref]
• ***Summary:*** Contents: Introduction. Why our seed company must change. Why soybean breeders breed for farmers. Why soybean breeders have been slow to breed for food uses. The three categories of soyfoods products–from a breeder's viewpoint: Value added products, commodity + good theory + premium price, commodity + weak theory + no premium price. The size of the soyfoods market. Repositioning our company and taking advantage of our location in Canada. The theory behind our long-range plan: Information, specifications, research and development leading to scientific theory, and education. How we plan to implement and apply this theory: Hire a food scientist, develop a computerized database and a bibliographic database, buy a computer graphics program and a color printer, open new channels of communication with many soyfoods manufacturers, develop an ongoing an ongoing relationship with one large commercial soyfoods manufacturer, develop questions, hypotheses, correlations, and theories. Appendix 1. Questions concerning the theory linking soybean characteristics with soyfoods properties. Appendix 2. Soybeans for soyfoods: Computer data entry screen. Appendix 3. What is the size of the market for soybeans for food use? Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 510-283-2991.

10676. *Vegetarian Times.* 1994. Readers speak out. Oct. p. 60-63.
• ***Summary:*** Question 8: What foods do you always keep on hand? Pasta 41%, rice 40%, beans 31%, vegetables (general) 17%, breads (general) 16%, fruit (general) 14%, tofu 12%, onions 11%, garlic 10%, potatoes 10%.

10677. **Product Name:** Veggie Pepperoni (Meatless).
Manufacturer's Name: Yves Veggie Cuisine.
Manufacturer's Address: 1138 East Georgia Street, Vancouver, BC, V6A 2A8, Canada. Phone: 604-251-1345.
Date of Introduction: 1994. October.
Ingredients: March 1998: Water, wheat gluten, soy protein isolate, tofu (water, organic soy beans, magnesium chloride), spices, salt, wheat starch, yeast extract, etc.
Wt/Vol., Packaging, Price: 155 gm.
How Stored: Refrigerated.
New Product–Documentation: Spot in Soyafoods (ASA, Europe). 1995. Spring. p. 5. "Veggie Pepperoni–winner of Sial d'Or." This product won a Sial d'Or prize in the delicatessen category at the Oct. 1994 Sial exhibition in Paris. The product was also selected as winner of the Canadian Grand Prix Best New Product Award in the Diet and Biological Foods category. The product is high in protein and low in fat.

10678. Goh, Francis Nyang Kuang. 1994. Re: Chronology of Unicurd Food Co. (Pte.) Ltd. in Singapore. Letter to William Shurtleff at Soyfoods Center, Nov. 3. 2 p. Typed, with signature on letterhead.
• ***Summary:*** 1978–This company, originally named Unicurd Food Co., is founded as a partnership by two housewives, Mrs. Tan Ai-Wang and Madam Chiang-Kuei Chin. Note: The term "Madam" is used (in writing only) to address a women when it is not clear whether or not she is married; used like "Ms." in American English.

1979 late–The company begins to make and sell tofu, operating on a small scale in a combination 2-story shop and home, with the residence located above the shop. The approximate size was 800 square feet of production space. They produced mainly *juten tofu* (lactone silken tofu), packed in 300 gm trays (known as 2B shape in Japan) and also 250 gm sausage-shaped polyethylene bags (known as sakura tofu in Japan), at the rate of about 150 kg/day. Also this year the company was changed from a partnership to a "private limited company."

1980–The company moved into a factory building at Block 1012, Aljunied Ave. 3, #01-35/37, Singapore 1438. The building, of about 2,400 square feet, was constructed by the Government of Singapore. The company was incorporated as a private limited company with capital of $220,000 Singapore dollars, invested by six shareholders. The company name is changed to Unicurd Food Co. Pte. Ltd. They diversified the product line to include Chinese firm and extra firm tofu. Production increased to 700 kg/day.

1981–The company encountered cash-flow problems and was sold at par value to the present directors, Mr. Francis Goh Nyang Kuang and Mr. Goh Eng Huat, who are cousins, and who were not among the six original shareholders. Prior to this time, the highest annual sales had been S$500,000 (1 US$ = 1.48 S$). Part of the purchase agreement is that Mr. Ma Wen Yi, the managing director of the company, would continue to work for the company for six months to help with the transition. The new owners engaged a young graduate, Mr. Richard Tan, to learn from Mr. Ma. During this time, Mr. Francis Goh visited the company each workday for about 1 hour in the morning and 2 hours in the evening.

1982–Mr. Richard resigned and the owners decide to engage Mrs. Goh (maiden name: Kua Lay-Eng) to run the company. Prior to her appointment, she worked as a Personnel & Administration Executive in a multinational company. Also in 1982 the company purchased an automatic soymilk plant and other machinery from Foodpak Pte Ltd. (a tofu factory in Hong Kong) and from Japan for its new factory, which was built by the government and had an about 3,600 square feet, located at Block 6020, Ang Mo Kio Industrial Park 3, #01-156/160, Singapore, 2056.

© Copyright Soyinfo Center 2013

1983–Introduced Beancurd Jelly, a new product.

1984–Introduced Pressed Soft Tofu, a new product. This year Unicurd began to promote tofu in Singapore as a nutritious and healthy food (a pioneering concept) by cooking demonstrations, radio publicity, regular factory tours for visitors (in groups of about 40), and annual participation in a national health promotion campaign organized by the government, using display posters, participation in an exhibition during which the company demonstrated tofu cooking and highlighted its nutritional value, and participation in a program whereby all nutritious foods sold in supermarkets were highlighted with special posters and labels.

1985–The company takes over the adjacent factory (Block 6020 Ang Mo Kio Industrial Park 3, #01-154, Singapore, 2056), increasing its area to 5,000 square feet.

1986–Introduced Tofu Puffs, a new product.

1987 Nov.–Mr. Goh joined the company as a full-time Managing Director; prior to this he usually spent 2 hours at the company each evening and a full day on Saturday.

1988 June–Recruited a Japanese manager to upgrade machinery. Introduced new Japanese tofu and pickles targeted at the Japanese community.

1989–Introduced three new Japanese-style tofu products: *Hiya-Yakko* (Chilled Tofu), *Momen-Dofu* (Traditional Japanese Firm Tofu), and *Nama-Agé* (Deep-Fried Tofu Cutlets).

1993 Nov.–In view of the rapid market growth for silken tofu and other products, the company began to look for a bigger factory. Sales have increased more than six-fold in the past ten years.

1994 Nov. 4–Construction of the new factory starts–floor area of 26,500 square feet on 40,000 square feet of land. It is expected to be completed in about one year. The company plans to invest about $2.5 million Singapore dollars in the new factory and another $1.5 million Singapore dollars (1.01 million U.S. dollars) in the purchase of more automatic equipment.

The company's accomplishments: Tofu in Singapore was traditionally sold in the market without packaging. After purchasing the company, Francis and the other new owners gradually convinced local consumers to accept packaged tofu. Moreover, their continuous promotion of tofu as a nutritious and healthy food (it was viewed as a poor-people's food before) stimulated sales immensely. Singapore consumers have now accepted tofu as a nutritious, healthy food.

Now some recollections and comments from Mr. and Mrs. Goh. Mrs. Goh: "When I joined the company, tofu was still considered a poor-man's food and tofu makers were generally fairly small in scale. The public had a low image of the tofu industry. I decided to resign from working in a reputable company for various reasons: (1) I had full confidence in the potential of the tofu business. Though the growth of the company was slow during the early years, it increased constantly; (2) For the success of small and medium-scale traditional food manufacturers, it is not possible to engage many high-ranking managers, who generally specialize in one field. It is also not easy to engage a person with a diversity of skills who is willing and able to run all aspects of a small traditional food company; (3) We owned the company and Francis did not have sufficient time to manage it. I decided to shoulder the responsibility, particularly after we moved to Ang Mo Kio Industrial Park (1982), when we invested another S$500,000; (4) Before Francis joined the company as full time managing director, my work was very taxing. I had to take charge of practically everything and the working hours were very long. However the work was challenging and the satisfaction was enormous, particularly when the company expanded rapidly." Mrs. Goh is still very active with the company on a day to day basis. She is in charge of Accounts and Sales and Marketing.

Mr. Goh adds: "I am currently in charge of the company overall, and particularly production, quality control, and other external matters (overseas visitors, Government liaison, and overseas purchasing). We have recently employed a local manager and a food technologist (from China). We plan to let them take over all the routine supervisory jobs and the development of new products. This will allow us to reduce our work load so we can invest more time in strategic planning. For example, we may soon take over a small tofu manufacturer and use it to develop a new brand to market similar products of lower value to capture a bigger share of the low-price market. Unicurd will concentrate on existing products and developing new high-value products.

"I would only express regret for joining the company on a full-time basis a bit late. I never realized that the tofu business would be so interesting and challenging. Through the Company, I joined different organizations, such as the Singapore Food Manufacturers Association, and the Association of Small and Medium Enterprises, and played an active role. I made many new friends and learned a lot about the food industry in Singapore, especially about traditional foods such as soysauce, chili sauce, dumplings, noodles, etc. I was also nominated by the Government to join several overseas study missions."

Update: On 24-25 March 1995 a group of six soybean experts from Canada visited Unicurd. Their names and titles are given. On March 24 Mr. Goh arranged for a meeting between them and five tofu makers and 3 council members from the Singapore Food Manufacturers' Association. A copy of the paper Mr. Goh presented during the meeting is attached.

Update: On 30 May 1996 Unicurd Food Co. Pte Ltd. moved to 18, Senoko South Road, Singapore 758089. Phone: +65 759-2855. A photo shows the new factory.

Update: In April 2008 the Vitasoy Group acquired the entire equity of Unicurd Food Co., (Private) Ltd.

("Unicurd"), a leading manufacturer and marketer of soyfoods in Singapore. Address: Managing Director, Unicurd Food Co. (Pte.) Ltd., Blk. 6020 Ang Mo Kio Industrial Park 3, #01-154/156/158/160, Singapore 2056. Phone: 482-5454.

10679. Cawdron, Diane. 1994. Re: New developments at Sojarei Vollwertkost GmbH. Letter to William Shurtleff at Soyfoods Center, Nov. 9. 1 p. [Eng]
• ***Summary:*** Sojarei has changed its name and is now located in Traiskirchen, about 12 miles south of Vienna. As demand for the company's products has increased tremendously, it has moved to a larger facility that is completely reorganized. "The Sojarei is now the leading tofu producer in Austria." Address: Roemerstrasse 14, A-2514 Traiskirchen, Austria. Phone: (02252) 559 01.

10680. Cloud, Jon. 1994. Re: Work with organic farming in Canada. Letters to William Shurtleff at Soyfoods Center, Nov. 14 and Dec. 27–in reply to inquiry. 2 p. and 1 p. Typed, with signature on letterhead.
• ***Summary:*** To the best of John's knowledge, the first soybeans grown organically in Canada (after 1960) were produced in 1974 in Wainfleet, Ontario, under contract with John. They started growing organically because John was willing to "issue them contracts guaranteeing floor prices and ready sales." "Through extensive field work with these and other growers, the quality and field yield of organic soybeans have steadily increased." John now works in a cooperative arrangement with W.G. Thompson & Sons Ltd. in Blenhein, Ontario, Canada. This arrangement "allows us to secure soybeans at harvest, clean them, and store them in facilities that maintain that quality. I'm still training farmers in organic methods."

"I'm no longer at Soy City Foods. I sold my interest there on 1 Jan. 1994 and now I am gratefully involved in taking the industry to its next level of expansion with W.G. Thompson & Sons.

"I began working with Thompson in May 1994. We have a partnership where they are responsible for marketing the complete line of organic commodities. My responsibility is the operational grower / production side of the business. I train farmers in growing techniques so that the organic acreage can be greatly expanded.

"Presently we have about 295 growers on our mailing list. Approximately 50% of these growers produce organic soybeans, and about 40-50 of them produce them in any one year. However many of these growers have limited soybean sales due to their dairy operations and/or position in the 7-year crop rotation. In Ontario there are over 1,500 farmers growing crops organically but mostly on mixed farms [with non-organic crops]. Probably no more than 60-70 of these grow soybeans organically. Due to crop rotations, the acreage in organic soybeans fluctuates dramatically from year to year; anywhere from 1,000 to 2,500 acres of organic soybeans would be under production in any given year. This means that the bulk of their commodities are going for beef and dairy operations. About one fourth of the 1,500 are cash croppers. The number of farmers has not changed appreciably in the past four years but the size of the farms has. The smaller farms have opted for market garden operations while the larger farms are more efficient at cash cropping–things like soybeans, wheat, and spelt.

"At present we market a full line of organic commodities including soybeans which we ship globally. Other organic crops include spelt, soft white winter wheat, hard red spring wheat, rye, buckwheat, barley, corn, and sunflowers. When you take into consideration that soybeans constitute only one of the commodities in the rotation, you can see that the tonnage is greatly expanded by handling all of the commodities. It is our hope that we will be able to move quickly 4,000 to 5,000 acres of soybeans. The vast majority of our current soybeans are high protein for tofu or soymilk.

"Ontario sells few organic soybeans to East Asia because the bulk of our production has historically been shipped to Europe. That has changed this year with Japan receiving its first shipments. Other Pacific Rim countries started receiving minimal amounts of organic soybeans in 1992 and 1993.

"Although I was forced to leave the Ontario Oil Protein Seed Crop Committee because of excessive work load, I still sit as an ad hoc member of that committee in a technical assistance capacity to the plant breeders in designing higher quality soybeans. My two latest projects focus on soluble protein increases and elimination of trypsin inhibitors in soybeans."

John encloses a leaflet titled "Training in organic production techniques: Workshop schedule for the winter of 1994-1995." There are two 4-day workshops each month, one in Blenheim and one in Toronto, Ontario. Each workshop costs $25.

Update: 1995 May 17. Acreage of organic soybeans in Ontario is up about 300% over last year and acreage for all organically grown crops in Ontario is up about 100%. John contracts 75% or more of the organic acreage in Ontario. One crop that is rapidly expanding is spelt. It has a better flavor and protein content than typical wheat, and it lacks one of the glutens to which some people are allergic.

Update: 1999 March 20. Talk with an associate of W.G. Thompson. Jon Cloud now has a very bad reputation with at least one manager at W.G. Thompson. According to this manager, Cloud misrepresented his relationship with the company and did some unscrupulous things, then disappeared leaving some unpaid debts. Address: Cloud Mountain Inc., 342 Indian Rd. Cres., Toronto, ONT M6P 2H1 Canada. Phone: (416) 762-0940.

10681. Ziegler, Jan. 1994. Soybeans show promise in cancer prevention. *J. of the National Cancer Institute* 86(22):1666-

© Copyright Soyinfo Center 2013

67. Nov. 16.
• ***Summary:*** "Epidemiologic evidence indicates that Asian women have a lower incidence of breast and colon cancer, better response to cancer treatment, and fewer problems with menopause than Western women. And among the apparent reasons for this is that Asians, in general, consume more soy products–tofu included–and green tea."

But Daniel Sheehan, PhD, National Center for Toxicology Research, Jefferson, Arkansas, says: "I disagree that soy has been proven safe."

10682. Goh, Francis Nyang Kuang. 1994. Re: Desirable characteristics of soybeans for making tofu: Opinions of tofu makers in Singapore. Letter (fax) to Mr. Kim Cooper, Ontario Soybean Growers' Marketing Board, Canada, Nov. 18. 4 p. Typed, with signature on letterhead.
• ***Summary:*** This is the author's response to a questionnaire in which Mr. Cooper wishes to know Mr. Goh's thoughts concerning the effect of the following characteristics: Moisture level, protein level (%), oil level, sugar level, seed size, weight of 100 seeds, seed shape, seed coat colour, seed coat thickness, hilum colour, beany flavour (desired or not?), soaking time, general appearance, other desirable traits.

Mr. Goh responds that most tofu makers have little or no knowledge of the effect of these characteristics on the yield or quality or tofu. Address: Managing Director, Unicurd Food Co. (Pte.) Ltd., Blk. 6020 Ang Mo Kio Industrial Park 3, #01-154/156/158/160, Singapore 2056. Phone: 482-5454.

10683. Goh, Francis Nyang Kuang. 1994. Re: More on the history of Unicurd Food Co. (Pte.) Ltd. in Singapore. Letter to William Shurtleff at Soyfoods Center, Nov. 24–in reply to inquiry of Nov. 10. 4 p. Typed, with signature on letterhead.
• ***Summary:*** Detailed answers to 13 questions from Shurtleff about the history of this innovative and pioneering tofu manufacturing company in Singapore. Address: Managing Director, Unicurd Food Co. (Pte.) Ltd., Blk. 6020 Ang Mo Kio Industrial Park 3, #01-154/156/158/160, Singapore 2056. Phone: 482-5454.

10684. Austern, R. 1994. 'Care for a tofu burger and soya shake?' Increasingly, answer is 'Yes.' Sandoz caters to a growing appetite for soybean products. *International Sandoz Gazette.* Oct/Nov. No. 113. p. 6.
• ***Summary:*** "As Sandoz moved into Health Foods in the 1980s, we became more and more aware of the manifold nutritional virtues of the soybean." "Sandoz Nutrition recently inaugurated a new plant in Revel, France, solely dedicated to the manufacture of soya products." It is on the same site as Nutrition & Santé. "Soya products are carried by several of our major brands: Céréal, Gerblé, Eden-Soy, and most prominently, by Gazzoni's Lecinova brand." Color photos show: The outside of Sandoz Nutrition's new plant in Revel, France. Fourteen "soya-based products from Sandoz Nutrition's operating company, Nutrition & Santé." Note: This article is about the company Nutrition & Soja, that company's name does not appear in the article except in small letters on the side of the plant in one photo.

10685. *Bio Novice* (*Bio News, Ljubljana, Slovenia*). 1994. Soja–Hrana Prihodnosti (2) [Soya–Food of the future. II.]. No. 15. Nov. p. 10-11. [1 ref. Slv]
• ***Summary:*** The subtitle reads: "We excerpt some of the most interesting paragraphs from *The Book of Tofu,* written by William Shurtleff and Akiko Aoyagi; it is the world's best-selling book about tofu." This is a translation of the introduction to *The Book of Tofu.*

10686. INTSOY. 1994. Soybean processing and utilization. May 17-June 15, 1995. An international training program (Brochure). Urbana, Illinois. 12 panels. Each 22 x 10 cm.
• ***Summary:*** Contents: Basic topics to be presented in the 1995 course: Basic processing concepts, nutrition and functionality, oil extraction, extrusion technology, soymilk and dairy analogs, Oriental soybean foods (tofu, tempeh, etc.), animal feed applications, quality control, global overview of the soybean industry, economics and marketing of soy products. Professional opportunities. Cost and travel information (the course costs $3,900 plus an estimated $1,900 for room, board, and other local living expenses. INTSOY is unable to offer scholarships).

The course time consists of 35% lectures, 45% hands-on exercises, and 20% industry visits. This is the 15th offering of the training program. Some 155 persons from 26 countries have attended the course. Danny Erickson is the training officer in charge. Facilities at the University of Illinois include the largest public university library in the United States, the nation's largest supercomputer complex, and the National Soybean Research Laboratory. Address: International Soybean Program, Univ. of Illinois, 169 Environmental and Agricultural Sciences Building, 1101 West Peabody Drive, Urbana, Illinois 61801. Phone: (217) 333-6422.

10687. Morinaga Nutritional Foods Inc. 1994. Why tofu? Exciting new research indicates tofu is the food of the future (Color videotape). 2050 W. 190th St., Suite 110, Torrance, CA 90504. 10 minutes. VHS. Nov. Price: $4.95.
• ***Summary:*** This 10-minute color video is designed to introduce tofu to dietitians and other health professionals. Contains the latest scientific information showing that consumption of soyfoods reduces one's risk of heart disease and cancer. Morinaga will send out a copy to anyone who requests it, if they pay only the postage and handling.

The video is accompanied by a 2-panel brochure that contains basic information about tofu, 7 tofu recipes, and an order form. Address: Torrance, California. Phone: 1-800-NOW-TOFU.

© Copyright Soyinfo Center 2013

10688. Morinaga Nutritional Foods, Inc. 1994. The word is out: Tofu is in (Ad). *Vegetarian Times.* Nov. p. 79.
• ***Summary:*** This full-page color ad shows: (1) A carton of Mori-Nu Silken Tofu (Firm) on a wooden cutting board surrounded by cubes of white tofu, green vegetable soybeans, and whole dry soybeans; (2) Cartons of the five types of Mori-Nu Tofu; (3) A tofu-chocolate creme pie topped with sliced bananas.

Five paragraphs compare the conventional wisdom about tofu with the "Word on the street," which is about Mori-Nu Tofu. Examples of the conventional wisdom: "Tofu is a strange, spongy substance found only in exotic Asian dishes." "All tofu is made by hand, cut into blocks and floated in unappetizing plastic tubs filled with water." "Tofu need to be refrigerated, spoils quickly and should be eaten right away." "Tofu is high in fat." "Tofu is a food of the past."

This ad also appeared in the Feb. 1995 issue (p. 51) of this magazine. Address: 2050 W. 190th St., Suite 110, Torrance, California 90504. Phone: 310-787-0200.

10689. *Soyafoods* (*ASA, Europe*). 1994. Sojinal acquired by B & K Holdings. 5(3):2. Autumn.
• ***Summary:*** Sojinal, the soyfoods manufacturer from Issenheim, France, which manufactures the Biosoja and Ligne S lines, is now owned by B & K Holdings [a Swiss company].

In a spot on page 5, a photo shows several newly changed packages in the Ligne S line which includes tofu, soya beverages, desserts, biscuits and bars.

10690. *Soyafoods* (*ASA, Europe*). 1994. People on the move. 5(3):3. Autumn.
• ***Summary:*** Philip Gaffney has been appointed National Accounts Manager for Cauldron Foods in Bristol, UK. A member of the Hero Group, Cauldron is Britain's largest producer of tofu and a variety of chilled and frozen healthy meatless products.

John G. Reed, Jr., has been named ADM's Vice President and Chief Executive in Europe. In 1982 Reed joined ADM in the U.S. as Vice President. He will relocate at ADM's European Headquarters in Erith [on the River Thames just east of London], Kent, England.

10691. *Soyafoods* (*ASA, Europe*). 1994. In depth: Food Ingredients Europe. 5(3):6-7. Autumn.
• ***Summary:*** Food Ingredients Europe, the international exhibition of food ingredients, was held this year on Oct. 4-6 in London, England, at Earl's Court. This was the biggest FIE in its 9-year history, with more than 500 exhibitors. The American Soybean Association (ASA) had a very successful booth at the U.S. Pavilion. One of the most interesting new products was Befine, from a company named VPS Europe. This unique, patented soya-based granule, sold fresh or frozen, mimics the texture of ground meat but it is not TVP or textured soy protein concentrate. Made from organic whole soybeans, it contains 18% protein. ADM Protein Specialties Division introduced their new WMR4, a dry soymilk based on soy protein isolate. Protein Technologies International exhibited Supro brand Isolated Soy Protein and Fibrim brand soy fiber. A line of texturized Danprotex (H-29, B-39, and F) and functional Danpro (DS) soy protein concentrates were launched by Central Soya Aarhus A/S, a member of the Eridania/Beghin-Say agro-industrial group. Kikkoman Trading Europe exhibited their naturally fermented soy sauces in liquid and dehydrated dorms. Other soy sauce exhibitors included Henry Lamotte GmbH and Mandarin Soy Sauce Inc. Loders Croklaan exhibited a new soya concentrate line. Alsace-based Sojinal, which supplies soy products to the food industry, exhibited along with their new sister company, Sevenday. SFI Netherlands BV (SFI = Special Food Ingredients, formerly Solnuts Inc.) exhibited their line of dry roasted soynuts. Also present were Stern Lecithin and Soja GmbH & Co. KG, Sapa and Dafa Associès (makers of Dafasoy for the food, dietetic, and pharmaceutical industries), Soya Mainz & Co. KG and Solbar Hatzor (soy protein concentrates), Dalgety Food Ingredients International (with the former Spillers Premier Products), Lucas Meyer GmbH (with a phosphatidyl choline lecithin powder and a de-oiled lecithin for frozen doughs), Edelsoja GmbH, Celia SA, Freeze-Dry Foods GmbH, and GMB Proteins (a division of Bush Boake Allen Ltd.). The address and fax number of each company is given.

10692. Soyfoods Association of America. 1994. Get the soy edge (Ad). *Vegetarian Times.* Nov. p. 71-74.
• ***Summary:*** This 4-page advertorial, with 17 color photos, is sponsored by the following organizations: ADM, DevanSoy Farms, Inc., Eden Foods, Inc., Lightlife Foods, Lumen Food Corp., Morinaga Nutritional Foods Inc., Soyfoods Association of America, Tofutti Brands Inc., Worthington Foods.

"Did you know you can fit soy into your diet without giving up your favorite foods? Try soy burgers, soy ice cream, soy yogurt, soy hot dogs, soy flour, soy cream cheese, soy sausage, soy chili, soy frozen juice bars, soy margarine, soy milk, soy tacos, soy sour cream, soy sloppy joes, soy 'chicken' patties..." Address: Palo Alto, California. Phone: 415-327-1444.

10693. Vitasoy (U.S.A.) Inc. & Nasoya Foods. 1994. A special thanks for supporting the Children's Action Network (Ad). *Natural Foods Merchandiser.* Nov. p. 18.
• ***Summary:*** A large black-and-white photo shows a little girl whispering to a little boy. A color photo across the bottom of the page shows products made by Vitasoy and Nasoya. The text reads: "This fall hundreds of natural products industry

© Copyright Soyinfo Center 2013

retailers and distributors helped parents get their children safely back to school. In a special partnership with Vitasoy (USA), Nasoya Foods and the Children's Action Network (CAN), they helped raise funds for significant education and hunger relief programs. A portion of every Vitasoy and Nasoya product purchased was donated to CAN. Retailers posted important *Health & Safety* Tip tear-pads at-shelf, providing vital information for parents to share with their children." A long listing gives the names of many of the retailers and distributors that participated in the program. CAN was founders by leaders in the entertainment industry. Address: 99 Park Lane, Brisbane, California 94005. Phone: 1-800-VITASOY.

10694. Carlsen, Clifford. 1994. Tofu maker sprouts new sales strategy for offshoot. *San Francisco Business Times.* Dec. 15.
• ***Summary:*** Vitasoy USA of Brisbane, California, now owns Azumaya and Nasoya, each a major tofu manufacturer. The company has tofu sales that are now expanding at a rate of nearly 10% a year in supermarkets, natural food stores, and ethnic grocery stores. The company has extremely strong distribution to all three markets, according to Jan Remak, Vitasoy's director of marketing. Remak predicts total sales of $28 million in the fiscal year ending March 1995; tofu will account for about one-third of this, or about $9.3 million. Vitasoy's latest strategy is to try to gain dominance in ethnic groceries by taking advantage of the Vitasoy brand name, which is as well known by Asian-Americans as Coca-Cola or Levi Strauss are in the mass market. Vitasoy tofu is produced and packaged at the Azumaya plant in San Francisco, which has a capacity of 3.5 tons a day. Vitasoy is already distributing Vitasoy Tofu to Asian grocers in San Francisco, but it plans to eventually distribute that brand to each of the six major Asian-American markets in North America: San Francisco, Los Angeles, Vancouver [British Columbia], New York, Toronto [Ontario], and Houston [Texas]. Address: California.

10695. Cloud, Jon. 1994. Re: Changes at Soy City Foods in Toronto. Letter to William Shurtleff at Soyfoods Center, Dec. 27–in reply to inquiry. 2 p.
• ***Summary:*** "I'm no longer at Soy City Foods. I sold my interest there on 1 Jan. 1994. It is now a corporate structure, which apportions division of labor. I have no idea who is the person in charge there, but I know they are out of the commodity business. Tofu production has been reduced to one half of the production levels when I was running the company. Wholesale and retail sales in the U.S. have been curtailed. From my perspective it seems to be dying, or certainly shrinking. I am gratefully involved in taking the industry to its next level of expansion with W.G. Thompson." Address: Cloud Mountain Inc., 342 Indian Rd. Cres., Toronto, ONT M6P 2H1 Canada. Phone: (416) 762-0940.

10696. Gold Mine Natural Food Co. 1994. Macrobiotic, organic and Earthwise products for you and your home (Mail order catalog and price list). San Diego, California. 64 p. 28 cm.
• ***Summary:*** Soy-related products include organic black soybeans, organic yellow vegetable soybeans, organic aduki beans, Ohsawa soy sauce, Ohsawa tamari, South River miso, Junsei Yamazaki miso, Ohsawa yuba, Ohsawa organic dried tofu, and kuzu. Address: 3419 Hancock St., San Diego, California 92110-4307. Phone: 1-800-475-3663.

10697. Holin, Fae. 1994. Soyfoods' image, market potential improve: Health benefits, appealing food entice soy consumers. *Soybean Digest.* Dec. p. 20-21. In "New Uses Digest" section.
• ***Summary:*** Nearly 20 million bushels of U.S. soybeans will be processed into human foods in 1994. That is about 1% of the U.S. soybean crop. A soyfoods brochure and ten fact sheets, jointly developed and published by the Soyfoods Association of America and the United Soybean Board, provide nutritional information and recipes for use of 10 types of soyfoods. This packet has been mailed to nearly 10,000 health and media professionals.

About 15% of consumers are purchasing meatless entrees. A sidebar titled "Green soybeans: New commercial crop?" notes that edamame offer soybean farmers great potential as a new commercial crop. Bob Luedtke, general manager of SunRich Foods in Jackson, Minnesota, says that SunRich is now selling about 700,000 pounds of product annually. William Shurtleff discusses the growing market for soyfoods and green vegetable soybeans, and Mark Messina talks about the role of soyfoods in preventing heart disease and cancer.

A half-page color photo (p. 20) shows many White Wave tofu and seitan products on the shelves of a retail store.

10698. Kashama Batabela, Johnny. 1994. Influence du depelliculage at de la durée de trempage des graines de soja (*Glycine max* (L) Merill) sur les qualities organoleptiques du lait de soja [Influence of dehulling and soaking time on the organoleptic qualities of soymilk]. Thesis, Département de Chime et Industries Agricoles, Institut Facultaire des Sciences Agronomiques (I.F.A.–Yangambi, Zaire). 42 p. Accepted Dec. 9. [21 ref. Fre; eng]*
• ***Summary:*** The effect of two variables (soaking time and dehulling) were measured at 25ºC in the preparation of eight batches of soymilk. Four batches of soymilk were made from dehulled soybeans, and four from non-dehulled. The dehulled or non-dehulled soybeans were soaked for either 10, 12, 14, or 24 hours. The soymilk preferred by taste panelists was that made from dehulled soybeans that had been soaked for 12 hours at 25ºC. A test of the acceptability of a new product made from soybeans (tofu) was done.

Letter from Johnny Kashama. 1994. Nov. 29. He is writing from Kisangani, in Zaire, but his return address is given as c/o Mr. Projet Bahali [a person], B.P. 364, Cyangugu, Rwanda. He has finished his thesis (cited above) and hopes to finish his studies this year. Letter from Kashama. 1996. Sept. 26. The thesis was accepted on 9 Dec. 1994. He earned the degree of *Ingenieur Agronome, Chemiste et des Industrie Agricoles.* Address: Kisangani, Zaire.

10699. **Product Name:** Alpha-Omega Burger Sandwich.
Manufacturer's Name: Local Tofu.
Manufacturer's Address: 307 Route 59, West Nyack, NY 10994-2033. Phone: 914-358-2309.
Date of Introduction: 1994. December.
Ingredients: Burger: Organic okara, flaxseed, whole wheat, barley, cornmeal, brown rice, buckwheat groats, carrots, sweet potato, cabbage, kale, parsley, collard, tofu, broccoli, soymilk, tamari, herbs, spices. On rye bread.
Wt/Vol., Packaging, Price: ¼ lb, in clear plastic wrap.
How Stored: Refrigerated.
New Product–Documentation: Talk with Sam Weinreb, founder and owner of Local Tofu. 1996. May 27. This burger, sold between two slices of rye bread, was launched in Dec. 1994. It is based on the Alpha-Omega burger, which was launched one year earlier and uses the same label. To make it: On the first slice of rye bread, lay a slice of Chinese cabbage, spread with Tofu Mayo, and top with the burger. Top this with more Tofu Mayo, a slice of cucumber, and the final slice of rye bread.

10700. McLain, Jennifer. 1994. A real noggin' scratcher: How do you make eggnog without eggs? *Vegetarian Times.* Dec. p. 20, 22.
• ***Summary:*** The basis of this "vegan eggnog" is silken tofu. Two recipes are given.

10701. *SoyaCow Newsletter* (*Ottawa, Canada*). 1994. Russian program orders more SC-20s. 3(4):2. Oct/Dec.
• ***Summary:*** The Russian Soybean Association (ASSOY) has ordered 20 more tabletop SoyaCow SC20 systems to add to the ten similar systems they have already acquired during the past year. "ASSOY's soyfood program, which is based exclusively on the SoyaCow technology, is developing with unusual speed. Soymilk derived yogurt, tofu, mayonnaise, drinks, and ice cream as well as baked goods made using 'okara' soy-fibre, are all made in pilot or cottage industry production."

10702. Yasuda, Masaaki. 1994. Tôfu no bunka: Okinawa no tôfu zukuri to tôfuyo [The culture of tofu: Tofu-making and tofuyo in Okinawa]. In: Yasumoto Hara, ed. 1994. Minzoku no Kokoro o Saguru [Looking for the Folk Mind]. Sakae, Osaka, Japan: Hatsushiba Bunko. See p. 295-337. [35 ref. Jap]*
Address: Dep. of Bioscience and Biotechnology, Univ. of the Ryukyus, 1, Senbaru, Nishihara-cho, Okinawa 903-01.

10703. **Product Name:** Tofu Powder.
Manufacturer's Name: Agronico, Inc. of Minnesota.
Manufacturer's Address: 95 S. Park Ave., P.O. Box 55, R.R. #1, Le Center, MN 56057. Phone: 612-357-4474.
Date of Introduction: 1994.
How Stored: Refrigerated preferably.
New Product–Documentation: Talk with Mike Vincent, president of Agronico. 1995. Sept. 30. This product, finely ground soy flour, was introduced in about 1994 and is sold in 50 lb sacks. Note: The soy flour was never made into tofu.
Samples (product with handwritten Label) sent by Mike Vincent, owner of Agronico. 1995. Dec. 7. "Lowfat tofu powder."

10704. **Product Name:** [Tofu "Meditarraneo"].
Foreign Name: Tofu Mediterraneo–Alimento Derivato dalla Soja.
Manufacturer's Name: Biolab.
Manufacturer's Address: Via dei Grabizio 11, 34170 Gorizia, Italy. Phone: +39 481 533522.
Date of Introduction: 1994.
Ingredients: Soybeans (*fagioli di soja*), carrots, corn, olives, capers (*capperi*), parsley (*prezzemolo*), nigari–*cloruro di magnesio,* water.
Wt/Vol., Packaging, Price: 300 gm (2 servings of 150 gm each) vacuum packed separately, side by side.
How Stored: Refrigerated.
New Product–Documentation: Label and letter sent by Maura Ghiraldini and owner Massimo Santinelli. 1998. Dec. 5. This new (Dec. 1998) label (3½ by 5 inches) has the same pastel background for all tofu products–a stylized view of the sea and sky, with mountains on both sides and rolling hills in the foreground. At the top left is a smiling sun. Text: "Organically grown (*prodotti dalla agricoltura biologica*)." "Ready in 5 minutes (*Pronto in 5 minuti*)." Refrigerate at 4ºC. A small symbol shows a person recycling the container. An earlier label shows the silhouettes of four tall Graeco-Roman columns against an orange sky and a golden Mediterranean sea.

10705. **Product Name:** [Herbed Tofu].
Foreign Name: Tofu Alle Erbe–Alimento Derivato dalla Soja.
Manufacturer's Name: Biolab.
Manufacturer's Address: Via dei Grabizio 11, 34170 Gorizia, Italy. Phone: +39 481 533522.
Date of Introduction: 1994.
Ingredients: Soybeans (*fagioli di soja*), parsley (*prezzemolo*), rosemary (*rosmarino*), nigari–*cloruro di magnesio,* water.

© Copyright Soyinfo Center 2013

Wt/Vol., Packaging, Price: 300 gm (2 servings of 150 gm each) vacuum packed separately, side by side.
How Stored: Refrigerated.
New Product–Documentation: Label and letter sent by Maura Ghiraldini and owner Massimo Santinelli. 1998. Dec. 5. This new (Dec. 1998) label (3½ by 5 inches) has the same pastel background for all tofu products–a stylized view of the sea and sky, with mountains on both sides and rolling hills in the foreground. At the top left is a smiling sun. Text: "Organically grown (*prodotti dalla agricoltura biologica*)." "Ready in 5 minutes (*Pronto in 5 minuti*)." Refrigerate at 4ºC. A small symbol shows a person recycling the container. An earlier label shows a yellow, a blue, and a black butterfly flying above a green bed of plants.

10706. **Product Name:** [Grilled Tofu Slices].
Foreign Name: Tofu Alla Piastra–Alimento Derivato dalla Soja.
Manufacturer's Name: Biolab.
Manufacturer's Address: Via dei Grabizio 11, 34170 Gorizia, Italy. Phone: +39 481 533522.
Date of Introduction: 1994.
Ingredients: Soybeans (*fagioli di soja*), nigari–*cloruro di magnesio,* sunflower seed oil (cold pressed), water.
Wt/Vol., Packaging, Price: 200 gm (2 servings of 100 gm each) vacuum packed separately, side by side.
How Stored: Refrigerated.
New Product–Documentation: Label and letter sent by Maura Ghiraldini and owner Massimo Santinelli. 1998. Dec. 5. This new (Dec. 1998) label (3½ by 5 inches) has the same pastel background for all tofu products–a stylized view of the sea and sky, with mountains on both sides and rolling hills in the foreground. At the top left is a smiling sun. Text: "Organically grown (*prodotti dalla agricoltura biologica*)." "Ready in 5 minutes (*Pronto in 5 minuti*)." Refrigerate at 4ºC. A small symbol shows a person recycling the container.

10707. **Product Name:** [Tofu Sauce with Herbs].
Foreign Name: Crema di Tofu Alle Erbe.
Manufacturer's Name: Biolab.
Manufacturer's Address: Via dei Grabizio 11, 34170 Gorizia, Italy. Phone: +39 481 533522.
Date of Introduction: 1994.
Ingredients: Tofu (soy & water), parsley (*prezzemolo; 5%*), rosemary (*rosmarino; 5%*), oregano (*origano; 5%*), cold-pressed sunflower seed oil, apple cider vinegar (*aceto di mele*), guar seed flour, water, salt.
Wt/Vol., Packaging, Price: 190 gm glass jar.
How Stored: Refrigerated.
New Product–Documentation: Label and letter sent by Maura Ghiraldini and owner Massimo Santinelli. 1998. Dec. 5. This label (5 by 1.75 inches) has black text on a wavy green and yellow pastel background. A small blue and white oval logo states: "AgriEco Bio–Organically grown and certified (*Prodotti Biologici–Controllati e Garantiti*)." Refrigerate at 4ºC. A small symbol shows a person recycling the container.

10708. Ezeji, T.C. 1994. Production and preservation of tofu with *Afromonum danielli.* MSc thesis, University of Ibadan, Nigeria. Supervisors: O.C. Aworh and S.M. Osho. *
• ***Summary:*** Tofu was prepared using as coagulants extracts of the leaves of sodom apple (*Calotropis procera*) with lime juice and calcium sulfate. A 10-member panel evaluated the quality of the tofu for flavor, color, firmness, mouthfeel and general acceptability. Yield and recoveries of protein and fat in the tofu were measured.

Tofu treated with no spice and 0.5% spice had a shorter shelf life than that treated with either 1.0% or 1.5% of *A. danielli,* but the latter percentages resulted in lower scored for sensory qualities.

The shelf life of tofu stored in 3 different ways was measured: Packaged tofu–2 days; tofu stored in tap water–3 days; and salted tofu stored in 0.8% brine–7 days. Address: Nigeria.

10709. **Product Name:** Peking Tofu, and Tofu Steam Buns.
Manufacturer's Name: Fuji Fresh Tofu Co.
Manufacturer's Address: 248 Jackson St., San Jose, CA 95112. Phone: 408-297-1666.
Date of Introduction: 1994.
New Product–Documentation: Talk with Linda Lam, owner of Fuji Fresh Tofu. 1994. April 8. She and her husband introduced these products in 1994. The Peking Tofu is cut into strips, braised, and seasoned to taste like smoked chicken.

10710. **Product Name:** Nigari Tofu, Deep-Fried Tofu Pouches.
Manufacturer's Name: Giant Tofu.
Manufacturer's Address: 300 Morse St., Washington, DC 20002. Phone: 202-546-0333.
Date of Introduction: 1994.
How Stored: Refrigerated.
New Product–Documentation: Talk with George Chong, owner. 1998. Feb. 10. These two products were introduced about 4 years ago. They make only small amounts of the pouches from time to time. Making them expand properly is difficult.

10711. **Product Name:** Vegetable Bratwurst (Vegetarian).
Manufacturer's Name: GranoVita UK Ltd.
Manufacturer's Address: Ambron House, Eastfield Road, Wellingborough, Northants NN8 1QX, England, UK. Phone: +44 933 27240.
Date of Introduction: 1994.
Wt/Vol., Packaging, Price: 200 gm pack. Retails for about £1.69 (England, 11/94)

© Copyright Soyinfo Center 2013

New Product–Documentation: Spot in Soyafoods (ASA, Europe). 1994. Autumn. p. 5. "Vegetarian Bratwursts launched by granoVita."

10712. **Product Name:** Tofu.
Manufacturer's Name: Long Life Foods Co.
Manufacturer's Address: 1752 Houret Ct., Milpitas, CA 95035. Phone: 408-946-3773.
Date of Introduction: 1994.
New Product–Documentation: Talk with Andrew Rawlings of Ananda Marga. 1994. Nov. 1. He visited this Chinese-run shop today and brought their business card to Soyfoods Center. Milpitas is at the southern end of San Francisco Bay between Sunnyvale and Freemont. The company is located between highways 680 and 880 just off the Montague Expressway. They have no English-language name and make many types of tofu.

10713. **Product Name:** Tofu.
Manufacturer's Name: Mai Tofu.
Manufacturer's Address: 4025 Cypress St., Marrero, LA 70072. Phone: 504-347-7784.
Date of Introduction: 1994.
New Product–Documentation: Letter from Tung Dac Ho of To Mai Bui. 1993. Aug. 30. "When we finish setting up my mini tofu shop, I will send you photos of the shop, and especially of a machine I designed myself."

Form filled out and faxed by Tung Ho. 1998. Nov. 2. His company, which is now named Mai Tofu, began making and selling tofu in 1994. At bottom of form is written: "Dear Mr. William Shurtleff and Mrs. Akiko Aoyagi. You are our masters. We study in every details and exercise in every day your written word. We got it successfully in Regular firm and silken tofu. Thank you so much. Respectfully yours–Tung & Mai Ho."

10714. **Product Name:** Brief history of R+R Tofu.
Manufacturer's Address: Fold Court, Home Farm, Buttercrambe, York YO4 1AU, England, UK. Phone: +44 7593 72979.
Date of Introduction: 1994.
New Product–Documentation: Form from Soyfoods Center filled out by Ron Malarkey / Malarney. 1994. Nov. 25. He writes the company name as "R+R Tofu." This company began making and selling soyfoods in May 1973, with regular tofu, burgers, and marinated tofu. They presently make 2,000 kg/month of regular tofu and 1,000 kg/month of organic tofu.

Note: In May 2013, when asked about the May 1973 date, which conflicts with the 1985 date on his website, he replied (through his secretary, Jo): "I have got Ron to look again at your attached form and he apologises and says 1973 should read 1983. He had made the mistake of putting down the wrong date."

10715. **Product Name:** Tofu.
Manufacturer's Name: National Agricultural Research Project (NARP).
Manufacturer's Address: Agricultural Research Center, 9 El Gamma St., Giza, Egypt.
Date of Introduction: 1994.
New Product–Documentation: List of new tofu manufacturers in countries where tofu is not well known, sent by Yoshinori Ito of Takai Seisakusho. 1994. Nov. 15. The head of this tofu project is Dr. Neil Patrick. INTSOY has assisted Egypt in establishing this model soyfoods processing pilot plant.

10716. **Product Name:** Savory Tofu, and Savory Tofu Sandwich.
Manufacturer's Name: Olive Tree Works.
Manufacturer's Address: 6713 New Hampshire Ave., Takoma Park, MD 20912. Phone: 301-270-5110.
Date of Introduction: 1994.
How Stored: Refrigerated.
New Product–Documentation: Talk with Ed Mueller of Takoma Soy. 1997. July 21. Takoma Soy used to share the same space as Olive Tree Works in Takoma Park, Maryland. They bought tofu from Spring Creek Natural Foods (Spencer, West Virginia) and sold it at cost to Olive Tree. They are now a full-line natural foods distributor. Talk with Yaron Semititsky of Olive Tree, Inc. 1997. July 24. Olive Tree Works started in Oct. 1990. Their second soy product, Savory Tofu, was launched in 1994. They did not make their own tofu. This is a fried tofu product, with Middle Eastern seasonings, and their most popular one. The sandwich is filled with Savory Tofu, carrots, spinach, etc.

10717. **Product Name:** Tofu Sesame Rissoles, and Agé (marinated roasted tofu).
Manufacturer's Name: R&R Tofu.
Manufacturer's Address: Fold Court, Home Farm, Buttercrambe. York YO4 1AU, England, UK. Phone: +44 7593 72979.
Date of Introduction: 1994.
Ingredients: Incl. tofu, tamari (water, soybeans, salt), herbs, spices.
Wt/Vol., Packaging, Price: 145 gm and 140 gm packs.
New Product–Documentation: Spot in Soyafoods (ASA, Europe). 1994. Autumn. p. 5. "Tofu Rissoles and Agé."

Form filled out by Ron Malarkey / Malarney. 1994. Nov. 25. Writes the company name as "R+R Tofu." Does not give the date for either of these products.

10718. **Product Name:** [Soymilk, Tofu].
Manufacturer's Name: Rey Sol.
Manufacturer's Address: Colonia el Recreo, Lote No. 9, Amatitlan, Guatemala. Phone: +502 633-0971.

© Copyright Soyinfo Center 2013

Date of Introduction: 1994.
How Stored: Refrigerated.
New Product–Documentation: Letter (fax) from Juan Guillermo Tornoe. 1999. Aug. 31. Rey Sol is owned by Mario Cesar Jimenez and Blanca de Jimenez, both members of the "Gran Fraternidad Universal" (GFU), which is some kind of new-age association that practices yoga, meditation, tai-chi, vegetarianism, etc. They have a production plant near Lake Amatitlan, which is about 30 km (18.5 miles) from Guatemala City. From there, they supply 3 health food stores/restaurants that they own. One is in downtown Guatemala City, the second is in Centro Comercial Gran Via Roosevelt, Zone 7, and the third and newest one is in 10 Avenida 33-73 zona 11 Las Charcas. From the latter he encloses a promotional leaflet. They make soymilk, tofu, meat alternatives made from soy with different flavors (beef, chicken, etc.), sausages (like hot dogs, and imitations of local sausage-like products such as the "chorizo" and "longaniza"), soy tacos, green peppers stuffed with soy, and a variety of sweet and regular soy breads and cakes. They sell their soymilk in 1 liter plastic bottles but these bottles do not have a label–only a sticker with the expiration date; they advertise the product as "leche de soya" and retail it for about $US0.89. The company also distributes their products to other health food stores. Miss Blanca Jimenez gives vegetarian cooking classes at the GFU offices and is in charge of bakeries. Mr. Mario Cesar is in charge of most of the soy products. Leaflet (8½ by 5½, black on white, in Spanish) sent by Mr. Tornoe. 1999. Aug. 31. "A new option! Now everything that's necessary for your health and nutrition is at Las Charcas in Zona 11. Taste our vegetarian buffet, the best in baked goods and whole-grain pastries, soya meats and sausages, tofu (*toffú*), granola, natural medicine, natural vitamins and much more. Vegetarian restaurant "Rey Sol" Las Charcas. 10 Avenida 33-73 Zona 11 Las Charcas. "We have our own parking lot (*Contamos con Parqueo Propio!!!*)."

Talk with Blanca de Jimenez. 1999. Aug. 8. They started making tofu and soymilk about 4 years ago. She has been a vegetarian for 30 years and her son has been a vegetarian his entire life.

10719. **Product Name:** Soymilk (Chocolate-Peanut Butter).
Manufacturer's Name: Sweet Carrot Café.
Manufacturer's Address: 702 14th St. East, Saskatoon, SK, S7N 0P7 Canada.
Date of Introduction: 1994.
Wt/Vol., Packaging, Price: Bottle.
New Product–Documentation: Talk with George Conquergood of International ProSoya Corporation (IPC). 1999. April 21. George introduced this, his last flavor of bottled soymilk, sometime in 1994. The Chocolate-Peanut Butter was a "power drink" that–along with the Soy Nog–people loved. Both flavors especially popular with cyclists. George used to keep a refrigerator at a cycle shop stocked with product. These guys would come back from their bicycle trips to the cycle shop and down a liter of soymilk.

10720. **Product Name:** Organic Tofu–Extra Firm, with Dulse.
Manufacturer's Name: Twin Oaks Community Foods.
Manufacturer's Address: Route 4, Box 169, Louisa, Virginia 23093. Phone: 703-894-4112.
Date of Introduction: 1994.
Ingredients: Water, organic soybeans, and natural nigari derived from sea water.
Wt/Vol., Packaging, Price: 16 oz.
How Stored: Refrigerated.
New Product–Documentation: Label sent by Jon Kessler. 1996. Jan. 29. "Twin Oaks Community Foods tofu is made by people who live and work together. We are a worker-owned cooperative that is dedicated to cooperation, equality, and non-violence. We take pride in producing this extremely satisfying, premium tofu." A small, round, purple and white sticker that reads "with Dulse" is affixed to the front panel. Another larger round sticker says "Virginia's Finest–Virginia Agriculture." The product is certified organically grown by VAFB in Charlottesville.

Talk with Jon Kessler. 1996. Feb. 9. Bean Mountain Natural Foods (in Weaverville, North Carolina) was one of the first companies in America to make tofu with dulse, and they were making this product when Jon bought their company. The dulse is mixed with the curds before pressing. Jon buys his nigari from Great Eastern Sun, who gets it from Mitoku.

10721. **Product Name:** Quintesse Vegetarian Tofu Casserole.
Manufacturer's Name: Vegetarian World Ltd.
Manufacturer's Address: 15 Holloway Drive, Wardley Industrial Estate, Worsley, Manchester M28 5NJ England.
Date of Introduction: 1994.
Ingredients: Vegetables (potatoes, carrots, onions, peas), water, tofu (fried in pure vegetable oil), cornflour, vegetable bouillon, extract of roasted barley malt, black pepper, mixed herbs.
Wt/Vol., Packaging, Price: 425 gm can.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: Label sent by David Greenslade. 1994. Oct.

10722. **Product Name:** Quintesse Vegetarian Tofu Goulash.
Manufacturer's Name: Vegetarian World Ltd.
Manufacturer's Address: 15 Holloway Drive, Wardley Industrial Estate, Worsley, Manchester M28 5NJ England.
Date of Introduction: 1994.
Ingredients: Vegetables (potatoes, carrots, onions, peas), water, tofu (fried in pure vegetable oil), tomato puree,

© Copyright Soyinfo Center 2013

cornflour, paprika, vegetable bouillon, cider, vinegar, garlic, black pepper.
Wt/Vol., Packaging, Price: 425 gm can.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: Label sent by David Greenslade. 1994. Oct.

10723. **Product Name:** [Tofu].
Manufacturer's Name: VETO.
Manufacturer's Address: Tr. Sportovcu, 27 00 Kladno, Czech Republic.
Date of Introduction: 1994.
New Product–Documentation: List of new tofu manufacturers in countries where tofu is not well known, sent by Yoshinori Ito of Takai Seisakusho. 1994. Nov. 15. The owner of this new tofu company is Mr. Pavel Petracek.

10724. **Product Name:** [Peanut Tofu Spread].
Foreign Name: Pinda: Erdnuss Tofu Pastete.
Manufacturer's Name: Viana Naturkost GmbH.
Manufacturer's Address: Willi Graf Strasse 88, 53881 Euskirchen-Kuchenheim, Germany. Phone: (02233) 41323.
Date of Introduction: 1994.
Ingredients: Tofu*, carrots*, peanut butter*. vegetable oil*, herbs (*Kräuter*)*,* spices (*Gewürze*)*,* sea salt. * = Organically grown (*kontrolliert biologischer Anbau*).
Wt/Vol., Packaging, Price: 125 gm. Sold in a glass jar.
How Stored: Refrigerated.
New Product–Documentation: Labels brought by Bernd Drosihn of Viana. 1995. March 11. 4.87 x 1.5 inches. Red, white, and black on yellow. Self adhesive.

10725. **Product Name:** [Tofu Creme: Avellana / Italian, Diavolo, or Olive].
Foreign Name: Tofu Creme: Avellana, Diavolo, or Olive]..
Manufacturer's Name: Viana Naturkost GmbH.
Manufacturer's Address: Willi Graf Strasse 88, 53881 Euskirchen-Kuchenheim, Germany.
Date of Introduction: 1994.
Ingredients: Avellana: Tofu*, carrots*, hazelnut butter (*Hazelnussmus*)*,* peanut butter (*Erdnussmus*)*,* vegetable oil*, herbs, spices, sea salt * = Organically grown (*kontrolliert biologischer Anbau*).
Wt/Vol., Packaging, Price: 150 gm.
How Stored: Refrigerated.
New Product–Documentation: Labels brought by Bernd Drosihn of Viana. 1995. March 11. 3.25 x 4.75 inches. Red, white, and black on light purple (Avelana) or red (Diavolo), or green (Olive). Self adhesive. All use tofu as the main ingredient.

10726. **Product Name:** Soya Nuggets (Organic TVP).
Manufacturer's Name: Wildwood Natural Foods of Santa Cruz, Inc.
Manufacturer's Address: 1560 Mansfield Ave., Suite D, Santa Cruz, CA 95062. Phone: 408-476-4448.
Date of Introduction: 1994.
Ingredients: Organically grown, expeller-pressed soybeans.
Wt/Vol., Packaging, Price: 6 oz.
How Stored: Shelf stable.
New Product–Documentation: Talk with Jeremiah Ridenour. 1995. Feb. 28. This product was introduced about a year ago. It is made by Boodram of BAR North America, Inc. in Seymour, Illinois.

10727. **Product Name:** Smoked Tofu [Garlic Teriyaki, or Mild Szechuan].
Manufacturer's Name: Wildwood Natural Foods.
Manufacturer's Address: 1560 Mansfield Ave., Suite D, Santa Cruz, CA 95062. Phone: 408-476-4448.
Date of Introduction: 1994.
Ingredients: 1998–Garlic Teriyaki: Wildwood tofu [filtered water, organic soybeans (grown and processed in accordance with the California organic foods act of 1990), nigari (magnesium chloride, a natural firming agent)], soy sauce, Fruitrim (fruit juice, natural grain dextrins), rice vinegar, garlic powder, molasses, onion powder, spices.
Wt/Vol., Packaging, Price: 6.5 oz. Retails for $3.29.
How Stored: Refrigerated.
New Product–Documentation: Wildwood Natural Foods price list. 1995. Jan. 9. Talk with Billy Bramblett of Wildwood. 1998. June 23. Wildwood's two smoked tofu products were introduced in early 1994. They cut the tofu, make a marinade, then send both to a smoke house in San Jose–which cleans out their plant for each Wildwood run. They marinate the tofu in tubs, then smoke it on racks in a real smokehouse with real smoke made from cedar chips. The smoking and baking chamber (about 8 feet tall and 4 feet wide) is next to the chamber where the fire is. The tofu is kept in this chamber at a relatively low temperature (about 240ºF) for 24-36 hours. Of this time, it is being smoked for about 6-8 houses using smoke that is ducted into the chamber; the rest of the time it is just being baked. When ready, it is vacuum packed.

10728. Bates, Chris; Bates, Ling-li. 1994. Culture shock! Taiwan. Portland, Oregon: Graphic Arts Center Publishing Co. 256 p. Illust. Map. Index. 20 cm. [11 ref]
• ***Summary:*** A guide to Taiwan's customs and etiquette. Ling-Li is a Taiwanese native and Chris, her husband, is an American who lived and studied in Taiwan for a number of years. In Chapter 3, "Settling In," the section titled "A stroll through the wet market" [the traditional fresh vegetable market, where each vendor rents a stall] is a section (p. 50-51) about doufu and doufu products. "If it is marinated and dried further, it becomes *doufu gan* (dried bean curd [sic, pressed tofu]). If it is fermented, it becomes *chou doufu* (smelly bean curd).

© Copyright Soyinfo Center 2013

Chapter 7, "Cuisine of the Ilha Formosa" is about Taiwanese restaurants–where happy noise and clanging dishes are part of what Chinese value in dining out.

Page 160-61: "Junior is off to cram school, so Mom eats a specialty at a push cart to remind her of the flavors of her youth. When they have all returned home they might go out together for *syau ye* (midnight snack). This might be a bowl of noodles, or *chou doufu* (smelly bean curd–they say it smells like a sewer and tastes like a dream; bean curd's equivalent to Blue Stilton cheese)."

Note: This is the earliest English-language document seen (Oct. 2011) that contains the term "smelly bean curd."

10729. Becker, Egon. 1994. Soya bean milk and cheese from Africa's soil (Videotape). Falls Church, Virginia: Landmark Media, Inc. 15 minutes. VHS. Written and directed by Egon Becker. Series: Fruits of the earth: Promising plants for tomorrow. [Eng]*

• ***Summary:*** "Soya, one of the most important oil and foodstuff sources on the world market, is being adjusted to the requirements of African cooking in Nigeria and also cultivated for the production of milk and cheese for city dwellers."

10730. Chik, Hon Man; Ng, Lam Sim Yuk. 1994. Chinese-English dictionary: Cantonese in Yale romanization. Mandarin in pinyin. Shatin, N.T., Hong Kong: New Asia–Yale-in-China Chinese Language Center, The Chinese University of Hong Kong. 512 + 9 p. Radical index. Number of strokes index. Cantonese romanization index. 17 cm. [Eng; chi]

• ***Summary:*** Page 430: Dauh (Md [Mandarin] dou): beans and peas. Dauh fuh: bean curd. Dauh ngah: bean sprouts as a vegetable. Dauh jeung: soybean milk. Sih (Md chi): fermented bean.

Appendix 3 is a "Comparative chart for four different kinds of Cantonese romanization systems": Yale, IPA, Sidney Lau, and Meyer-Wempe. For each is given: initials [initial sounds], finals, and tones (of which seven can be represented). Address: Hong Kong.

10731. Fryer, Anne-Marie; Fryer, Wil. 1994. Das kleine Buch ueber Huelsenfruechte, Tempeh, Tofu und Seitan: Ost-West Naturkostfuehrer. Bd. 2 [The little book about legumes, tempeh, tofu and seitan: East-West natural foods guide, No. 2]. Voelklingen, Germany: Ost-West-Bund Verlag. 79 p. Illust. No index. 15 cm. [9 ref. Ger]

• ***Summary:*** This is number 2 in a series of 10 volumes. Contents: Introduction. Proteins. Food combining. Nutritional requirements. Table of nutrients in beans and bean products. Beans and other legumes. Preparation of beans. Tempeh. Tofu. Seitan.

10732. Gordy, Josephine Shih. 1994. Chinese in southeast Florida 1900-1992. Miami, Florida: Broadley Publishing. See p. 78-79. 28 cm. [Eng]

• ***Summary:*** On pages 78-79 is the biography of Mr. Manny Wong and his company, Fully, Inc.–based on an interview with Mr. Wong on 8 March 1994 in Miami. He was born in Cuba in 1953 of Cuban immigrant parents. His entire family immigrated to Miami in 1961. His father had gone to Cuba from China as a young man of age 18 in 1943; he had a distant uncle in Cuba who sponsored him. He was married, but he had to leave his wife behind. She came to Cuba in 1950. In Miami, Manny's father, together with several partners, started a restaurant in downtown Miami and named it Hong Kong Restaurant. In 1963 he bought a second Chinese restaurant in Little Havana and named it Oriental Restaurant; it was an still is a Cuban-Chinese restaurant.

After graduation, Manny did not take over his father's restaurant business, but pursued his own career. He and his brother-in-law started their own business in Miami. Named Fully, Inc., it makes beans sprouts, soy sprouts, tofu and soy milk. Its clientele includes all the Chinese grocery stores, most of the Chinese restaurants, and Chinese food distributors in the tri-county area. Manny enjoys being an entrepreneur. Address: Florida.

10733. Grogan, Bryanna Clark. 1994. The (almost) no-fat cookbook: Everyday vegetarian recipes. Summertown, Tennessee: The Book Publishing Co. 192 p. Index. 21 cm. [10 ref]

• ***Summary:*** This low-fat vegan cookbook contains a wealth of soy-related recipes, including 27 recipes that call for tofu. Address: Denman Island, east of Vancouver, British Columbia, Canada.

10734. Johnson, Natasha J. 1994. Traditional beancurd manufacture. Rugby, Warwickshire, England: Intermediate Technology. 39 p. Illust. No index. 21 cm. [11 ref]

• ***Summary:*** Contents: Introduction. Manufacture. Packaging. Equipment. Coagulating agents. Modern methods of manufacture in China. High yield beancurd. Beancurd products (Chinese names are given in pinyin; a photo shows each product): Deep-fried beancurd (*you doufu*), Deep-fried beancurd balls (*yuanzi*), Dry / pressed beancurd (*doufu gan*), Beancurd cutlets (*nan hua gan*), Beancurd roll (*kunji*), Smoked beancurd (*xun doufu*), Spiced beancurd (*xiang gan*), Stewing spice beancurd (*luzhi doufu gan*), Long life beancurd, Fermented beancurd (*furu*), Beancurd bamboo (*fuzhu / dousun* [*dried yuba sticks*]), Frozen beancurd (*dong doufu*), Flavoured beancurd, Specialties (Jinxi ginger beancurd, Shaoyang pork roll, bean paste (*douhu*)), Beancurd silk (in the form of long strands), Heat processed beancurd, Instant beancurd mix. Use of by-products. Cooking with beancurd. References. Acknowledgements.

Note 1. This is the earliest English-language document seen (Oct. 2011) that uses the term "Fermented beancurd" to

© Copyright Soyinfo Center 2013

refer to fermented tofu.

Note 2. This is the earliest English-language document seen (April 2013) that uses the term *dong doufu* to refer to frozen tofu.

Concerning smoked tofu: A clear illustration shows the cylindrical smoking chamber, apparently made from a 55-gallon drum. At the bottom is a 20-cm layer of smoking rice bran, half way up is a perforated metal sheet, and near the top is a rack on which the squares or strips of firmly-pressed tofu are smoked, and on top is a cover. Smoking takes several hours and may be cold smoking {below 30ºC} or hot smoking {below 70ºC}. The tofu is smoked slowly, turning it over when the surface is brown to give a distinctive flavour, colour and aroma. After smoking, the texture is firm and the product can be stored for 10 days without refrigeration due to the natural preservatives present in the smoke and the drying action (25% weight loss by evaporation)." Page 26 describes how a highly-flavored product is made by mixing pressed tofu with various spices, sugar, salt, and diced vegetables. It is steamed for 10-12 minutes, mixed with vegetable oil, spread on a bamboo mat, left in the sun to dry, then smoked to give it a golden color. Photos show: Smoked tofu squares on a woven bamboo tray. Rectangular pieces of tofu, each pressed in a cloth.

This booklet provides an excellent introduction to traditional methods of making tofu and tofu products in China, with many clear illustrations and photos. The author did the research while working at the Human Agricultural University in China. The publisher is working to enable low-income people in the Third World to develop and use technologies which give them more control over their lives and contribute to the long-term development of their communities.

In addition to reviewing the many varieties of tofu and tofu products in China (from deep-fried tofu to instant tofu mix), the booklet discusses of traditional manufacturing principles, those which have potential for large-scale manufacture, coagulants, and packaging equipment.

• ***Summary:*** Contents: Conversion tables. Soybean products. Tofu. Recipes: Salads, appetizers. Frying. Stir-frying. Cooking in sauces. Deep-frying. Steaming.

The soybean products described are: Soft tofu, hard tofu, bean curd skin (fu pea [yuba]), pressed bean curd, bean curd strips and bean curd sheets (*bai yeh*)**.** Making soy milk at home. Making tofu at home from homemade soymilk (curded with gypsum). All text is in both English and Chinese (Taiwanese complex characters).

10736. Legume, Inc. 1994. The taste of Italy... Now light and vegetarian (Leaflet). Montville, New Jersey. 2 p. Front and back. 28 cm.
• ***Summary:*** The front of this leaflet (8½ by 11 inch, color) shows spaghetti with sauce on a plate. To the lower right are photos of boxes of eight Legume entrees. On the back is a description of each product, with the ingredients. Most contain tofu, soy protein, and/or wheat gluten. Two "new" products are: Veggie protein cutlet with organic pasta sauce. (contains soy protein and wheat gluten). Stuffed shells with sauce, Classic lasagna with sauce, Manicotti Florentine with sauce, Vegetable lasagna with sauce, Classic manicotti with sauce, Classic enchiladas with sauce. All products are Chof K kosher and Pereve. Address: P.O. Box 609, Montville, New Jersey 07045. Phone: 201-263-1013.

10737. Leng, Vikki. 1994. Earthly delights: Everyday vegetarian cooking. Sydney, Australia: Thorsons. 352 p. *
• ***Summary:*** This attractive cookbook, containing many large color photos printed on glossy paper, contains many recipes for and much information about soyfoods throughout the book. One chapter titled "Tofu and soy products" (p. 283-89) includes are recipe for making tofu at home. Address: Australia.

10738. LeShane, Patricia. 1994. Vegetarian cookery for people with diabetes. Summertown, Tennessee: The Book Publishing Co. 143 p. Index. 21 cm.
• ***Summary:*** This is a vegan cookbook. Approximately 12 million Americans have diabetes, but only about 50% of them are currently aware that they have it. The index contains 21 entries for tofu, 2 for soybeans (p. 106, 107), 1 for soy yogurt, and lots for soymilk.

10739. Mindell, Earl. 1994. Earl Mindell's food as medicine. New York, NY: Simon & Schuster. 393 p. Index. 22 cm. [97 ref]
• ***Summary:*** Here Mindell, who would write *Earl Mindell's Soy Miracle* in 1995, gives a preview of his growing belief in the health benefits of consuming soy. Phytochemicals (p. 13, 25): Genistein, which is found in the urine of those who eat soy-based foods, appears to block the growth of new capillaries that supply blood to some tumors. Researchers hypothesize that genistein may be responsible for the low incidence of certain forms of cancer among "Japanese, who eat a diet rich in soy foods."

Phytates (p. 28) found in soybeans and cereal grains

© Copyright Soyinfo Center 2013

deactivate steroidal hormones that promote tumors. However excessive intake of phytates is known to interfere with absorption of minerals such as calcium.

Protease inhibitors (p. 29), found in soybeans and soyfoods, can prevent the conversion of normal cells to malignant ones.

Calcium (p. 65): Tofu curded with calcium sulfate is a good source of calcium. Sodium (p. 83-84): Recommends the use of reduced-salt soy sauce.

Breast cancer (p. 215-16): "Soybeans and soy products (soy milk, tofu, etc.) may also provide some protection against breast cancer." Women in East Asia who eat a lot of soy products have 10-15% lower circulating estrogen levels than Caucasian women and must lower rates of breast cancer.

Osteoporosis (p. 242-44): Eat tofu (curded with calcium sulfate), miso, and other traditional soy products.

Menopausal symptoms (p. 261-63): Japanese women seem to have less discomfort. Mindell thinks this may be because the Japanese diet is rich in soy products (tofu, miso, soybeans, etc.). Address: R.Ph, PhD, registered pharmacist and Prof. of Nutrition at Pacific Western Univ. in Los Angeles. He lives in Beverly Hills, California.

10740. Ontario Soybean Growers' Marketing Board. 1994. New uses for soybeans (Leaflet). Ontario, Canada. 2 p. Undated. 28 cm.

• ***Summary:*** Contents: Soy diesel. Premium building materials (such as Environ). Industrial solvents. Anti-chronic disease agent (isoflavones and protease inhibitors from tofu, miso, and tempeh). Road dust suppressants. Asphalt and concrete release agents. Lubricants and hydraulic fluids. Biodegradable plastic utensils. Soy oil based inks. Soy textile fibres (can be used for erosion control on landscape projects, for peat pots, fishing nets, and "soy silk" in clothing). Soy adhesives (for plywood products and composites). Address: Box 1199, Chatham, ONT N7M 5L8, Canada. Phone: 519-352-7730.

10741. Oser, Marie. 1994. Luscious low fat desserts. Montrose, Pennsylvania: Chariot Publishing, Inc. 124 p. Foreword by Scott W. Sanders, PhD. 21 cm. [18 ref]

• ***Summary:*** The many recipes in this vegan cookbook are low in fat (only 3 grams of fat per recipe), use no dairy products or eggs, and contain no cholesterol. Twenty-five attractive full-page color photos show the prepared recipes. The glossary of ingredients contains entries for the following soy ingredients: "Lite silken tofu–a reduced-fat form of silken tofu. It is sold in aseptic packages in large supermarkets and natural food stores. Lite silken tofu has 75% less fat than regular silken tofu and does not sacrifice flavor or texture." "Silken Tofu–a smooth-textured, custard-like tofu that is sold in aseptic packages and is available in most supermarkets and natural food stores. Like regular tofu it is made from soybeans. Silken tofu is an effective egg substitute when used in ¼ cup tofu to one egg proportions. It is also available in soft, firm and extra firm consistencies. I prefer the extra firm consistency." "Soy buttermilk–a good substitute for dairy buttermilk in baked goods. It is made by adding 2 tablespoons of lemon juice to 1 cup of soy milk." Soy milk lite–a reduced fat soy milk that is 1% fat. It is available in large supermarkets and natural food stores." The glossary also defines "Rice milk," and the following sweeteners: Barley malt syrup, brown rice syrup, date sugar, FruitSource (made from grapes and grains), maple syrup, Mystic Lake fruit sweetener, natural applesauce, and Sucanat (granulated organic sugar cane juice).

At the listing for "Tofu" in the index, we are asked to "see lite silken tofu,"–which is used in 33 dessert recipes–including the following (listed alphabetically): Almond streusel cake. Apricot almond custard Austrian apple torte. Banana cream pie. Blueberry custard pie. Chocolate dream pie. Chocolate truffles. Classic pumpkin pie. Lemon yellow icing. Peaches 'n cream parfait. Raspberry banana mousse. Strawberry Nice Cream (creamy frozen dessert like ice cream).

In the introduction to the chapter on cakes, the author says: "One way I achieve a rich cake without eggs or dairy is to use lite silken tofu. Its creamy, custard-like consistency is perfect for replacing the eggs and milk found in traditional cakes. And its low-fat profile will keep you coming back for seconds.

A small color photo on the rear cover shows Marie Oser, who has been a vegetarian since 1971. She left a career in TV advertising to pursue her interest in food and nutrition. Address: Agoura Hills, California 91391. Phone: 818-707-7353.

10742. Pan, Lynn. 1994. Sons of the Yellow Emperor: A history of the Chinese diaspora. New York: Kodansha International. xx + 418 p. Illust. (16 pages of plates). Index. 22 cm. [174* ref]

• ***Summary:*** On page xiv is a very interesting map of southern China, with a blowup of southern Kwangtung [Guangdong] province, the area around Canton the Pearl River, the South China Sea, Macao, and Hong Kong. For this area was at the heart of the Chinese diaspora–especially in the 19th and 20th centuries and especially from two small areas southeast of Canton: (1) Sam Yap (Three Districts) of Punyu, Shuntak, and Namhoi–the more affluent counties. (2) Sze Yap (Four Districts) of Hoiping, Sunwui, Toishan, and Yanping–the poorer and ruder area southwest of Sam Yap. Although the people from both areas speak Cantonese, they have difficulty understanding each other's speech. Other important languages of the diaspora were Hakka and its numerous variants (spoken in Guangdong, Fujian, etc.) and Hokkien (spoken in southern Fujian, Taiwan, and by many overseas Chinese throughout Southeast Asia). It is closely related to Teochew / Teochiu, though mutual comprehension

© Copyright Soyinfo Center 2013

is difficult,

In Part Four: 1960s to 1980s, Chapter 16, titled "Food" contains a history (p. 320-23) of Amoy Food Limited, now an international firm, with its headquarters in Hong Kong, owned largely by overseas Chinese. For many overseas Chinese, "perhaps no label has quite the resonance of Amoy." In 1908, T'ao-hua Ta-t'ung, the predecessor of the company, was founded in Xiamen for producing bottled soy sauce and dairy milk. Its founder was Yang Ko-fei, who soon brought in other shareholders. In 1911 clashes between the founder and other shareholders lead to a break-up of the company, with one party going it alone as T'ai-hua (Tao Fia), and the other as Ta-T'ung. Yang Ko-fei went with the latter company, who chief shareholder was Tan Kah Kee, the rubber and pineapple magnate.

It became increasingly apparent, however, that the two companies would do much better of they operated as a single unit. So in 1928, when a new rival appeared, they merged, with the smaller of the two now located in Hong Kong. Thereafter the company experienced steady growth. Eventually the branch in Hong Kong came to eclipse the parent company in Amoy. In 1937, when the Japanese invaded China and war broke out, almost the entire canning plant was moved to Hong Kong from Amoy. In 1951, when the company went public, the ownership passed mainly into the hands of overseas Chinese.

Today Amoy Foods' products are on the shelves of supermarkets and Asian markets in 37 countries. Half of Amoy Foods' shares are owned by the American food giant Pillsbury (owner of Haagen-Dazs and the Burger King hamburger chain) and the other half by Hang Lung (a Hong Kong real estate company). Amoy's line of 34 sauces include dark soy sauce (lau-ch'ou), light soy sauce (*sheng-ch'ou*), black bean sauce [made of fermented black soybeans], sweet and sour sauce, etc.

On the roof of the Amoy factory's main building a visitor can see a demonstration of the old-fashioned process; "here, an old man with sleeves rolled up goes from earthen vat to earthen at plunging his arm into the thick brew of black and yellow soy beans to give it a gentle, almost loving stir. He works rhythmically, with deep concentration. A Soy Master with thirty or forty years behind him, he stands in a line which goes back to the fifth century, from when dates the earliest surviving soy sauce recipe."

Companies like Amoy have helped to make Chinese foods more widely available in the West. Not so long ago, Chinese cookbooks published in England said that Worcestershire sauce was an acceptable substitute for soy sauce, because the latter was available only at delicatessens and specialty shops [Asian grocery stores] in London. Even during the last five years, the range of Chinese foods available in London's Chinatown has grown remarkably. In Chinatowns in the United States [and especially those in San Francisco {California} and New York] the selection of Chinese foods has long [perhaps always] been greater than at those in London or other places in Europe.

Page 324: The first person to make tofu in Europe was Li Shih-tseng [Li Yü-ying, Li Shizeng], a Chinese intellectual and educator. As a young student of biochemistry in France in 1900, Li was to be greatly influenced by the writings of Nietzsche and Bergson. A Francophile, Li was one of the founders of the Work and Study Program, which sent Chinese students abroad for part-time work and part-time study. One of these students, who would later become famous, was Deng Xiaoping. While establishing his tofu [beancurd] factory in France, Li drew on his knowledge of biochemistry; the factory provided jobs for many students in the Work-Study Program.

Li, a vegetarian, was a firm believer in the nutritional value of tofu and other soybean foods. His factory also made and sold soybean flour, fermented tofu, soy-bean milk, and soy-bean jam, and these foods nourished not just Chinese, but also Westerners, including American soldiers who fought in France during World War I (Lin Hai-yin 1971, p. 125). "All this was before the faddish demand for tofu by health food enthusiasts, and before it became widely known as an unbeatable source of protein. The company closed after the war, but among certain Chinese *émigrés* [emigrants from China] France was never to lose its reputation for beancurd. In Europe up to the 1980s *tofu kan,* a particular variety of fermented beancurd [sic, pressed tofu] much demanded by eastern Chinese palates, could only be had in Paris, and the handful of *émigrés* in London had to send over for it."

Li was also a founder of the Université Franco-Chinoise at Lyons, a sort of accommodation and placement agency.

About the author (facing p. 418). Lynn Pan was born in Shanghai; she left as a child. She "has lived as an immigrant in North Borneo and England, and worked as a social scientist, journalist and writer in London, Geneva, Helsinki, and Hong Kong." In 1981 she returned to Shanghai for the first time, and was gripped by deep, haunting sensations of nostalgia. She had found the place where she belonged, her inheritance, and she began to write this book. She is the author of at least five other books–all listed facing the title page. Her Epilogue and Afterword at the end of this book are both very interesting.

10743. Sojarei Vollwertkost GmbH. 1994. Dokumentation fuer Grosskunden [Documentation for big customers / major accounts]. Traiskirchen, Austria. 19 p. 30 cm. [Ger]
• ***Summary:*** Contents: Business philosophy. to-serve salads with tofu dressing, tofu bread, Tofurella IceDream, convenience foods–frozen and in dozen quantities). Raw materials: Soybeans (all tofu from Sojarei is made with soybeans grown organically in Austria), grains, vegetables, and other raw materials. Overview of products and documentation. Address: Roemerstrasse 14, A-2514 Traiskirchen, Austria. Phone: (02252) 559 01.

10744. Stepaniak, Joanne. 1994. The uncheese cookbook: Creating amazing dairy-free cheese substitutes and classic "uncheese" dishes. Summertown, Tennessee: The Book Publishing Co. 192 p. Index. 21 x 18 cm. [16 ref]
• ***Summary:*** This is an excellent, very creative cookbook with a poor index, developed especially for people who, due to choice or chance, have eliminated cheese from their diet. The recipes are well designed to satisfy any compelling cheese fantasies you may have.

Contents: Introduction. Cheezes, spreads & dips. Soups and chowders. Fondues & rarebits. Sauces. pestos & dressings. Pizzas, polentas & breads. Quiches, casseroles & entrées. Sweets. Glossary. Mail order suppliers of natural foods.

Tofu is used as a major ingredient throughout this cookbook. For example: Muenster cheese (p. 23). Chunky Roquefort dip & dressing (p. 24). Tofu cottage cheese (p. 27). Tofu ricotta (p. 27). Betta feta (p. 28). Brie (p. 31). Liptauer käse (p. 32). Boursin cheese (p. 33). Tofu cream cheeze–rich or light (p. 34-35). Kefir cheeze (p. 36). Garbanatto (p. 39). Hot Parmesan artichoke dip (p. 41). Pecan cheese (p. 42). Egg-free (vegan) mayonnaise (p. 89). Tofu sour cream (p. 90). Calzones (p. 100-10). Tofu tetrazzini (p. 122) Tofu devonshires (p. 140). Mattar paneer (p. 146). Tofu cheezecakes & cream pies (ten varieties, p. 164-74). Tofu whipped topping (p. 172).

Many other recipes also call for "low-fat, dairy-free (vegan) milk" which is defined (p. 183) as "a generic term which refers to any creamy beverage such as soymilk, nut milk, or rice milk that is produced from non-animal products.

Interesting products in the glossary (p. 180-184) include: Agar, barley malt syrup, brown rice syrup, liquid aminos, mirin, miso, seitan, tahini, tamari, tempeh, toasted sesame oil, tofu, umeboshi plum paste, vegan milk, yeast–nutritional (*Saccharomyces cerevisiae*).

10745. United Soybean Board, 1994. Sunrider expedition: Adventure in action (Portfolio). Chesterfield, Missouri. 20 inserts. 30 cm.
• ***Summary:*** This educational portfolio, sent to schools, is designed to teach students of high school age and below about the Sunrider expedition, science, and soy biodiesel. The package has two parts. (1) Individual project sheets, each with a background, objectives, materials needed, procedure, and questions. Some also have teacher notes. Examples: Biology of soybeans (to sprout soybeans and observe their growth). Edible uses of soybeans (to make three recipes using soybean oil, soy flour, and tofu). Making SoyDiesel (to convert soybean oil into methyl soyate in the school lab). Solar energy. Where in the world is Sunrider (locate its position using a coordinate system).

(2) Factbook: Welcome. Expedition route (on map of the world). Navigation technology. Around the world on vegetable oil ad sunshine (SoyDiesel, and uses of soybeans, incl. "traditional soyfoods"). Life at sea. Contains many photos and logos. Address: 16305 Swingley Ridge Drive, Suite 110, Chesterfield, Missouri 63017.

10746. Wilcox, James R. 1994. Soybean genetics and breeding. In: Charles J. Arntzen and Ellen M. Ritter, eds. 1994. Encyclopedia of Agricultural Science. 4 vols. San Diego: Academic Press. See vol. 4, p. 181-92. Illust. Index. 29 cm. [4 ref]
• ***Summary:*** Contents: Glossary: Cultivar, F1, F2, F3, etc., genotype, heritability, inbred line, linkage group, phenotype, restriction fragment length polymorphism (RFLP), transgenic plants.

Introduction. Qualitative genetics. Quantitative genetics: Hertitability traits, interrelationships among traits. Sources of genetic variability: U.S. soybean germplasm collection, cultivars and breeding lines, transgenic plants. Breeding objectives for soybean: Seed yield, plant maturity, plant height, lodging resistance, seed size (Typical seeds range from 100 to 200 mg / seed. Very small seed, 80 to 100 mg, is preferred for the production of natto. Large-seeded cultivars, 180 to 250 mg, have traditionally been preferred for making tofu), seed oil content, seed protein content, disease resistance, nematode resistance, insect resistance. Breeding methods employed: Pedigree method, single-seed descent (presently the most commonly used breeding method), early generation testing, backcrossing, recurrent selection. Performance testing of improved germplasm. Increase and distribution of new cultivars: "Soybean cultivars are maintained and distributed through seed certification programs with four classes of seed to maintain cultivar purity and identity": (1) Breeder seed, produced and controlled by the breeder. (2) Foundation seed, initially produced from breeder seed. (3) Registered seed, produced from either breeder or foundation seed. (4) Certified seed, produced from registered seed.

Tables show: (1) Genes controlling traits of economic importance in soybean. (2) Heritability estimates in percentage for quantitatively inherited traits in progenies from different soybean crosses. (3) Estimates of phenotypic correlations of seed yields with other traits in progenies from six soybean crosses.

Figures show: (1) Scatter plot–The inverse relationship between seed protein and oil content in a cross between two named parents. Address: USDA Agricultural Research Service, Indiana.

10747. Asahi Food Processing Co. 1994? Soybean materials and tofu quality: Soybean use at Asahi. Gyoda-shi, Saitama-ken, Japan. 13 p. 28 cm. Undated. [Eng]
• ***Summary:*** This very interesting report was produced by the Tofu Research Team in the company's Foods Laboratory. It shows how a top Japanese tofu manufacturer evaluates soybeans and processes for making tofu. Each year Asahi uses 4,900 tonnes (metric tons) of soybeans, of which 3,000 tonnes (61.2%) are IOM from the USA and 1,900 tonnes (38.8%) are grown in Japan. Contents: Flow sheet for making soymilk and tofu.

Chemical composition and viscosity of soymilk and hardness of tofu, made using 26 different soybean varieties and 3 coagulants–GDL, calcium sulfate, and magnesium chloride. The main soybeans are Enrei, Toyosuzu, Suzuyutaka, Nanbushirome, Tachinagaha, Yamabe daizu (+ or -), IOM, Vinton, Beeson, Kunitz, Zane, Forrest, 9 experimental Canadian soybeans bred at Harrow [Ontario], Best One (Harrovinton [Harovinton]), plus soybeans from Nepal, Celebes, and Chiang Mai.

Chemical composition of 26 soybean varieties and subunit composition of their protein (11S, 7S, etc.). Composition of other soybeans tested: Vinton organic, Tachiyutaka, Tamahomare, Fukuyutaka, Murayutaka, Raisen, Nakasennari, etc. Variables affecting tofu breakage, and tofu compression. Graph showing effect of A-4 subunit on viscosity change of soymilk after addition of magnesium chloride. Graph showing viscosity curves after addition of magnesium chloride coagulant (0.2%) to soymilk derived from 8 different soybean varieties (Note: Enrei gives the lowest viscosity and Vinton the highest). Dendrogram of cluster analysis on principal component score for Japanese soybean cultivars (Best suited for tofu are Enrei, Toyosuzu, Fukuyutaka, Shirosennari). Note: *Webster's Dictionary* defines dendrogram (a term first used in about 1953) as "a branching diagram representing a hierarchy of categories based on degree of similarity or number of shared characteristics esp. in biological taxonomy."

Three dimension chart of factor loading. Chart (2 pages) of variables affecting tofu quality: Vertical columns: Deliciousness (Color, taste, flavor, texture), nutrition, sanitation, cost. Horizontal columns: Points/characteristics, soybeans, extraction of soymilk, coagulation operation to make tofu, viewpoints (notes), Enrei, IOM. Address: 2-17-8 Mochida, Gyoda-shi, Saitama-ken, Japan.

10748. Gaia. 1994? Une gamme de pains spéciaux, goûtres et desserts naturels, 100% végétals, biologiques et sans adjonction de sucre [A line of special breads, snacks, and natural desserts. Made purely from plants, organically grown, and without the addition of sugar]. Auterive, France. 6 panels. Undated. 21 cm. Catalog. [Fre]
• ***Summary:*** This undated color leaflet was sent by Jean Luc Alonso on 16 May 1994. The printed address has been crossed out; the new address is: 7, rue du Mail, 81300 Graulhet, France. Phone: 63 42 16 03. The following products are included in the leaflet (the label of each is shown): Tof'délice–Caroube (A fresh carob pastry based on tofu). Tof'quiche–Au tofu fume (Tofu quiche based on smoked tofu). Friand au seitan (Seitan appetizer). Address: 11, rue François Chancel, 31190 Auterive, France. Phone: 61 50 67 39.

10749. **Product Name:** [Fresh Tofu-Based Pastry (Carob)].
Foreign Name: Tof'délice (Caroube).
Manufacturer's Name: Gaia.
Manufacturer's Address: 11, rue François Chancel, 31190 Auterive, France. Phone: 61 50 67 39.
Date of Introduction: 1994?
Ingredients: Tofu*, sunflower oil*, corn syrup*, sea salt, soymilk* [filtrat de soja], agar-agar, carob*, flour T65*. * = Organically grown.
Wt/Vol., Packaging, Price: 150 gm.
New Product–Documentation: Color leaflet (undated, 6 panels) sent by Jean-Luc Alonso. 1994. May 16. *Une gamme de pains spéciaux, goûtres et desserts naturels, 100% végétals, biologiques et sans adjonction de sucre* [A line of special breads, snacks, and natural desserts. leaflet (the label of each is shown): Tof'délice–Caroube (A fresh carob pastry based on tofu). Tof'quiche–Au tofu fume (Tofu quiche based on smoked tofu). Friand au seitan (Seitan appetizer).

10751. **Product Name:** Tofu, Soymilk, Dried Tofu Curds, and Veggie Burgers.
Manufacturer's Name: Harcan Kingsoya Co. Ltd.
Manufacturer's Address: 33 Casebridge Court, Units 5&6, Scarborough, ONT M1B 3J5, Canada. Phone: (416) 283-8328.
Date of Introduction: 1994?
New Product–Documentation: Talk with Duff MacKinnon of the Ontario Ministry of Agriculture and Food in Guelph. 1995. March 6. Harcan makes tofu, soymilk, dried tofu curds, and veggie burgers. They have a very small plant. One partner, from mainland China, speaks excellent English. The other two partners are Canadian.

10752. Mirachi, Joe. 1994? Pepper... and salt (Cartoon). *Wall Street Journal.* Undated. Undated.
• ***Summary:*** A woman in a liquor store is looking through a box of wines that are on sale. Holding up one, she turns to the clerk behind the counter and asks: "What wine goes best with tofu ravioli and seaweed salad?"

10753. Rosas, Juan Carlos; Young, Roberto A. 1994? El cultivo de la soya. Quinta edición [The cultivation of soya. 5th ed.]. *Departamento de Agronomía* (*Zamorano, Honduras*)*, Publication* No. AG-9603. 68 p. Undated. [Spa]
• ***Summary:*** Contents: 1. Overview: Economic importance, chemical composition, history, taxonomy. 2. Morphology of the soybean plant. 3. Physiology of the growth and development of the soybean plant: Stages of development. 4. Environmental factors that affect the cultivation of soya: Soil, water, irrigation, light / photoperiod, temperature, period of growth. 5. Practical cultivation: Preparation of the soil, time of planting, density of planting, quantity of seeds, systems of cultivation, control of weeds (methods of weed control, chemical control). 6. Mineral nutrition of soybeans (and inoculation). 7. Diseases that affect the cultivation of soybeans and their management: Bacterial, fungal, viral, other, seed treatment. 7. Insects that attack soybeans. 8. Harvest and storing. 10. Improvement of soybeans. 11. Processing and utilization: Industrial processing (extraction of oil, soy flours, soy protein concentrates {*concentrados proteícos de soya*}*,* soybean cake). Direct consumption: In the Far East, the soybean is consumed in the form of fermented and non-fermented foods. Fermented foods include shoyu, miso, mato [sic, natto], and tempeh, while non-fermented foods include soymilk (*la leche de soya*)*,* tofu, yuba (*juba*)*,* and kinako. 12. The cultivation of soya in Honduras (history).

In 1972, the Ministry of Natural Resources (*Ministerio de Recursos Naturales*) reported the initiation of commercial soybean production on a small scale in various departments of the country (Olancho, El Paraíso and Comayagua). Three varieties were used at that time: Biloxi, Hardee and Jupiter. However, before these reports were made, at the Panamerican Agricultural School (*la Escuela Agrícola Panamerican* (*EAP*))*,* some hectares had already been planted with the varieties Jupiter and Pelican. Discusses additional developments in 1974, 1982, 1986, 1987, and 1988. Address: 1. PhD; 2. PhD.

10754. **Product Name:** [Yamato Paprika-Tofu–Smoked].
Foreign Name: Yamato Paprika-Tofu–herzhaft geraeuchert.
Manufacturer's Name: Soyastern Naturkost GmbH.
Manufacturer's Address: 7660 Radolfzell, Germany.
Date of Introduction: 1994?
Ingredients: Tofu* (Water, soybeans*, calcium sulfate, calcium chloride), paprika, spices, soy sauce (shoyu), sea salt, smoke. * = Organically grown (*aus kontrolliert biologischem Anbau*)*.*
Wt/Vol., Packaging, Price: 250 gm vacuum pack. Retails for DM 3.50.
How Stored: Refrigerated. Store at 2-5ºC.
New Product–Documentation: Label sent by Anthony Marrese. 1994. May. 2.5 by 5 inches. Self adhesive. Black, gold, and yellow on green. On the label in large Chinese/Japanese characters is written: "Yamato Tofu-Ya." In German is written: "A soy protein product. Made purely from plants." This tofu was purchased at the store Kraut & Rueben in Bremen. Note: This is a puzzling label. Has Soyastern started business again? Why are they located in Radolfzell, where Huegli is also located? Why is "Yamato Tofu-ya" written on the label as if it were the company name?

Letter (fax–which see) from Bernd Drosihn of Viana in Germany in response to enquiry. 1994. June 9. Huegli owns Yamato and also owns the Soyastern brand. But this tofu is actually made by Heuschen-Schrouff B.V. in the Netherlands.

10755. **Product Name:** Wild Dogs (Tofu Hot Dogs).
Manufacturer's Name: Wildwood Natural Foods of Santa Cruz, Inc.
Manufacturer's Address: 1560 Mansfield Ave., Suite D, Santa Cruz, CA 95062. Phone: 408-476-4448.
Date of Introduction: 1994?
Ingredients: Organically grown, expeller-pressed soybeans.
Wt/Vol., Packaging, Price: 6 oz.
How Stored: Shelf stable.
New Product–Documentation: Talk with Jeremiah Ridenour. 1995. Feb. 28. The slogan for this product is "take a pack home with you."

10756. **Product Name:** Marinated Tofu Cutlets.
Manufacturer's Name: Wildwood Natural Foods of Santa

© Copyright Soyinfo Center 2013

Cruz, Inc.
Manufacturer's Address: 1560 Mansfield Ave., Suite D, Santa Cruz, CA 95062. Phone: 408-476-4448.
Date of Introduction: 1994?
Ingredients: Tofu (organic soybeans grown accordance with the California Organic Foods Act of 1990, filtered water, nigari/magnesium chloride, a natural firming agent), hi oleic safflower oil, marinade (unsweetened pineapple juice, soy sauce, fresh ginger, garlic powder, ginger powder, onion powder).
Wt/Vol., Packaging, Price: 6.0 oz. (175 gm) vacuum pack. Retails for $2.89.
How Stored: Refrigerated.
New Product–Documentation: Product with Label purchased at Open Sesame in Lafayette, California. 1995. March 11. Label. 2 by 4 inches. Red and black on gold. Silhouette of a forest. "Wonderful, hearty texture. Marinated in our pineapple teriyaki. Try it in stir fry, sandwiches, and all vegetarian entrees. Made with organic tofu." The plastic pouch is about 4½ by 5 inches.

10757. **Product Name:** Grilled Tofu Mexicana.
Manufacturer's Name: Wildwood Natural Foods of Santa Cruz, Inc.
Manufacturer's Address: 1560 Mansfield Ave., Suite D, Santa Cruz, CA 95062; Fairfax, CA 94930. Phone: 408-476-4448.
Date of Introduction: 1994?
Wt/Vol., Packaging, Price: 10.5 oz. Retails for $3.49.
How Stored: Refrigerated.
New Product–Documentation: Wildwood Natural Foods price list. 1995. Jan. 9.

10758. **Product Name:** Eggless Wonder.
Manufacturer's Name: Wildwood Natural Foods.

Date of Introduction: 1994?
Wt/Vol., Packaging, Price: 6.0 oz. Retails for $1.99.
How Stored: Refrigerated.
New Product–Documentation: Wildwood Natural Foods price list. 1995. Jan. 9.

10759. Burros, Marian. 1995. When tofu meets bun: Eating well. *New York Times.* Jan. 4. p. C1, C6. Living section.
• ***Summary:*** This feature story about the fast-growing popularity of veggie burgers notes that "This quintessential hippie food [the tofu burger] may be on its way to becoming the food of the masses."

In a large table, 34 brands and varieties of veggie burgers are rated; the author's personal taste test resulted in 13 different burgers being rated from acceptable to very good. Among her favorites: Boca Burger, Green Giant Harvest Burger, and Morningstar Farms Meatless Patties [made by Worthington Foods].

10760. Faulkner, Jessie. 1995. Soy Devine a tasty way to eat vegan. *Times-Standard* (*Eureka, California*). Jan. 25.
• ***Summary:*** Mara Devine, who lives on Fieldbrook Road in Arcata, makes tofu-based Soy Devine foods in Arcata, California. The key is the use of frozen tofu. One of her products is Cajun Barbecue Style, which is available in a pint container or in a sandwich complete with a vegan bun made by Giusto's, a South San Francisco bakery. Her other product is "Beefy" Burrito. Her products are sold in southern Humboldt County supermarkets, in the Eureka Health Food Store, in Wildberries in Arcata, at both Eureka and Arcata Co-ops, and even in Humboldt State University's cafeteria.

Soy Devine is primarily a one-woman business from preparation to packaging to distribution. Devine cooks and packages her products at the Arcata food incubator, a production site for a number of locally produced foods.

10761. Oates, Bill. 1995. History of The Good Life, and Llama, Toucan & Crow (Interview). *SoyaScan Notes.* Jan. 25. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** It was Bill's idea to start The Good Life, which opened in March 1971 as a natural food retail store at 80 Main Street in Brattleboro, Vermont. Brattleboro was a very active center of the counterculture in the late 1960s and 1970s. In 1964-65 he had lived in Indonesia, where he was doing research for his PhD dissertation on a peasant revolt in West Java, and he grew to be very fond of tempeh. Back in the USA, he entered academia at Lyndon State College in Lyndon, Vermont, teaching Chinese and Southeast Asian History during the Vietnam War. Bill was partners in The Good Life with Peter Strong and Patricia Perry. Bill and Peter were hippies at the time. Peter, who had been a student of Bill's, had worked with David Hatch, who owned and ran Hatch's, in Saint Johnsbury, Vermont. Hatch's may have been the earliest natural food store in Vermont; they did not carry supplements. For a while Peter Strong ran Hatch's.

When the three partners opened The Good Life in March 1971 they sort of used Hatch's as a model. Many of their original employees came from the Total Loss Farm Commune at Packer's Corners in Halifax, Vermont. The commune still exists (they used to make many baked goods for The Good Life), and a book was written about the group. There were some problems in getting good quality natural foods. The Good Life didn't carry vitamins or supplements. Like Hatch's, they would buy some foods from Erewhon in Boston, Massachusetts (Paul Hawken served as a wise advisor for them), and they would also drive a van farther south to New York City, where they would buy from Richter Brothers, Bazzini Nut Co. and others. In New York they would go to Chinatown and buy tofu from a Chinese manufacturer on Mott St. [probably Fong-On]. Prices of some goods were lower in New York City, Erewhon didn't

© Copyright Soyinfo Center 2013

carry everything, and "frankly they were very disorganized as a business. Paul Hawken was more of a thinker than a manager–a fascinating person." They were buying hard red winter wheat (organically grown) from Ted Whitmer in Montana. They would pay 8-9 cents a pound for the wheat plus 7 cents a pound to have it shipped to Vermont. Ted Whitmer said that if they bought a truckload of 40,000 lb, they could have it shipped on a back-shipment under an exemption for agricultural products; the ICC was still setting rates for freight shipments. So The Good Life took the plunge and in June or July of 1971 bought a 40,000 lb shipment of winter wheat from Whitmer, and paid only 2¼ cents per pound to have it shipped to Brattleboro. So the cost delivered to their store was about 11¼ cents per pound–a great price, compared with the 19-20 cents per pound they would have to pay for Deaf Smith organic wheat from Erewhon [purchased by Erewhon from Arrowhead Mills in Texas]. Ted Whitmer gave The Good Life his list of all his wheat customers (about 25, including a nunnery and some co-ops) in the New England area to help his customers reduce freight costs. So The Good Life contacted all of Ted's customers and started selling their organic wheat to other food stores and groups for 14-15 cents per pound. Most of the stores picked up the orders of wheat at The Good Life, but some of it was delivered to the stores. All the wheat was sold within a month. The origin of Llama, Toucan & Crow can be traced directly to this shipment of wheat. Bob Swanson joined The Good Life as an employee after the first big shipment of wheat, and he used to do a lot of the driving. By the second year, the Good Life contracted with Ted Whitmer to buy 500,000 lb of his wheat, with payment in advance.

Since The Good Life was selling wheat to a growing number of stores, they wanted to buy other foods as well. They drove to New York and picked up several thousand pounds of food each week at special discounted prices, as the retail store thrived. They began to sell some of this food from New York at wholesale prices to customers who purchased wholesale wheat. So they soon found themselves in the wholesale business, and by early 1972 they were delivering foods at wholesale to more than 5 accounts. Then they discovered that the commodities law that enabled them to ship large amounts wheat inexpensively from Montana, would also allow them to ship other foods, such as dried fruits from California, at ridiculously low prices. So they put together a 40,000 lb shipment of dried fruits from California, consisting mostly of dried organic dates, then used organic raisins and other fruits to make a total of 40,000 lb. Now they were really in the wholesale business. Bob Swanson's job expanded from just delivering the food to taking the orders and ordering the food. By the end of 1972, The Good Life found itself with a thriving wholesale business, doing about $3,000 to $4,000 a week–about the same as the retail store. They were making two delivery runs a week, one north to Vermont and New Hampshire, and one south to Connecticut and Massachusetts. And people still came to The Good Life to pick up their supplies–at excellent prices. The tail was now wagging the dog. By this time Peter had gone off to Nepal–to discover himself. Patricia and Bill were running the retail store, which had always carried, in addition to natural foods, imported cheese and wines. They sold no vitamins until many years later. Bill and Patricia decided that, as from the outset, they wanted to be in the retail store business, so they said to Bob Swanson, "If you want this wholesale business, its yours, free of charge." Why free of charge? "It was right, and it was the right thing to do. You've got to remember, this was the early 1970s."

Bob accepted their offer, and in Jan. 1971 he began running the business out of the cellar of The Good Life for several months, until he located a very tumble-down warehouse facility for his new company in Brattleboro, at 21 Frost Street. The building has since been demolished. It had been owned by DeWitt Beverage Company, a beer distributor, and Swanson's business occupied only one floor of about 5 floors. Swanson operated out of this location for about 8-9 months, then he moved the company down to Greenfield.

Bill has no idea how to contact Bob Swanson now; later Bob went to his home town in Woodbury, Connecticut, where he helped a friend run a natural food store. Then he may have moved to Colorado. Peter Strong, who is now somewhere in Texas, might know how to reach Swanson.

When Barclay McFadden purchased Llama, Toucan & Crow, he had no background in the natural food business. Bill thinks that he was in the military, perhaps either a career officer or he may have been a graduate of West Point.

Bill and his wife now have a consulting company that works with country inns and bed-and-breakfasts in Vermont–mainly helping them to get started or to buy. Address: Box 1162, Brattleboro, Vermont 05302. Phone: 802-254-5931.

10762. Drosihn, Bernd. 1995. The soyfoods market in Germany. New developments at Viana Naturkost (Interview). *SoyaScan Notes.* Jan. 30. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Bernd's company, Viana, is now one of the two largest tofu manufacturers and soyfoods marketers in Germany. The other large company is Life Food in Freiburg. Their brand name is Taifun, and they have been growing rapidly for the last two years.

The tempeh market is very small in Germany. There are only two manufacturers: Hamburger Tofu Manufaktur (Christian Nagel, in Hamburg) and Viana. There is now only one real miso manufacturer in Germany: Kanta Kozaki GmbH in Urbach near Stuttgart. Viana stopped making miso 2 years ago, however Viana sells miso made by Kanta Kozaki in glass jars under the Viana label. A Japanese man (Hiroshi Kozaki) and a German man (Karl Selgmann) run

© Copyright Soyinfo Center 2013

the company together. They have been making miso for 3-4 years. Viana also sometimes makes koji for Kanta Kozaki.

Bernd and Albert Hess are planning to attend the Natural Products Expo West in Anaheim, California, March 10-12, 1995. Address: Founder and president, Viana Naturkost GmbH, Willi Graf Str. 88, 53881 Euskirchen-Kuchenheim, Germany. Phone: 02251-56076.

10763. Skow, John. 1995. Our own worst health enemies. *Time.* Jan. 30.
• ***Summary:*** "Unfortunately for a populace that tends to equate health with crisis intervention–surgery and antibiotics–what counts more is moderation and common sense, the dreary behavioral equivalent of tofu."

10764. Anand, Karen. 1995. In fashionable taste. *Times of India* (*The*) (*Bombay*). Jan. 31. p. 32.
• ***Summary:*** Discusses basic types of food that are popular in the 1990s. The section titled "Vegetarian" begins: "This must be the most 'in' thing that has happened to food. It is great for health. Overseas, vegetarianism is often seen as much the same as health food. Buzz words include: Tamari, a thick soya sauce with a little more flavour than a good brand "of ordinary Chinese soya." Miso, also made from the soya bean, is used to flavour soups. Humous [Hummus] and Pitta [Pita] bread started out as elements of Levantine cuisine, but are now used widely by vegetarians. "Tofu, a soya bean curd," is eaten by many who have lactose intolerance.

Other cuisines discussed are French bistro, Mediterranean, Southern Florida / Creole, and Comfort food.

10765. **Product Name:** [Soyanaise (Cocktail–with Cojnac)].
Foreign Name: Sojanaise (Cocktail).
Manufacturer's Name: Albert's Tofuhaus.
Manufacturer's Address: Hauptstrasse 13, D-6719 Lautersheim, West Germany. Phone: 06351-43718.
Date of Introduction: 1995. January.
Ingredients: Tofu, olives, herbs.
Wt/Vol., Packaging, Price: 250 gm.
How Stored: Refrigerated.
New Product–Documentation: Label from Albert Hess. 1995. March 12. This product was introduced in Jan. 1995. Contains only 45% fat.

10766. **Product Name:** Celentano Vegetarian Selects Stuffed Shells Florentine.
Manufacturer's Name: Celentano Bros., Inc.
Manufacturer's Address: 225 Bloomfield Ave., Verona, NJ 07044. Phone: (201) 239-8444.
Date of Introduction: 1995. January.
Ingredients: Tomatoes, tofu (Rocky Mountain glacier melt water, organic soybeans {grown & processed in accordance with the California Organic Foods Act of 1990}, gypsum, nigari {magnesium chloride}), cooked pasta shells (enriched semolina flour, water), spinach, water, onions, peanut oil, salt, parsley, basil, pepper, oregano, garlic.
Wt/Vol., Packaging, Price: 10 oz. Paperboard box.
How Stored: Frozen.
New Product–Documentation: Ad in Vegetarian Times. 1995. Sept. A color photo shows the front label, in which each ingredient is pictured as well as listed. "All natural. Totally vegan. Non dairy. No cholesterol. 240 calories per serving."

Talk with Donna Mangasarian (DKM Inc., 114 Dartmouth Rd., Manhasset, New York 11030. Phone: 516-365-7260) who does the advertising and promotional work for Celentano. 1995. Aug. 29. Celentano's line Vegetarian Selects products is all vegan and all contain tofu. These products with tofu were first introduced in 1995.

Label sent by Donna. 1995. Sept. 5. 7 by 5 by 1 5/8 inches. Paperboard box. Red, green, and black on white. Color photo of three of the stuffed shells on a white dish. "All natural. Totally vegan. Non dairy. No cholesterol. 240 calories per serving."

Note: Legume Stuffed Shells Provencale were introduced in Dec. 1983.

10767. **Product Name:** Celentano Vegetarian Selects Lasagne Primavera.
Manufacturer's Name: Celentano Bros., Inc.
Manufacturer's Address: 225 Bloomfield Ave., Verona, NJ 07044. Phone: (201) 239-8444.
Date of Introduction: 1995. January.
Ingredients: Tomatoes, cooked lasagne pasta (unbleached enriched extra fancy patent durum flour, water, enriched semolina flour), tofu (Rocky Mountain glacier melt water, organic soybeans {grown & processed in accordance with the California Organic Foods Act of 1990}, gypsum, nigari {magnesium chloride}), zucchini, broccoli, water, carrots, onions, peanut oil, salt, parsley, basil, pepper, oregano, garlic.
Wt/Vol., Packaging, Price: 10 oz. paperboard box.
How Stored: Frozen.
New Product–Documentation: Label sent by Donna Mangasarian (DKM Inc., 114 Dartmouth Rd., Manhasset, New York 11030. Phone: 516-365-7260) who does the advertising and promotional work for Celentano. 1995. Sept. 5. 7 by 5 by 1 5/8 inches. Paperboard box. Red, green, and black on white. Color photo shows two large squares of lasagne primavera on a white dish. "All natural. Totally vegan. Non dairy. No cholesterol. 210 calories per serving." Donna says these products with tofu were first introduced in 1995.

Note: Legume Vegetable Lasagna was introduced in Dec. 1983.

10768. **Product Name:** Celentano Vegetarian Selects Eggplant Rollettes.

© Copyright Soyinfo Center 2013

Manufacturer's Name: Celentano Bros., Inc.
Manufacturer's Address: 225 Bloomfield Ave., Verona, NJ 07044. Phone: (201) 239-8444.
Date of Introduction: 1995. January.
Ingredients: Tomatoes, eggplant, tofu (Rocky Mountain glacier melt water, organic soybeans {grown & processed in accordance with the California Organic Foods Act of 1990}, gypsum, nigari {magnesium chloride}), water, spinach, broccoli, enriched wheat flour, breadcrumbs, onions, peanut oil, parsley, basil, salt, pepper, oregano, garlic.
Wt/Vol., Packaging, Price: 10 oz. paperboard box.
How Stored: Frozen.
New Product–Documentation: Label sent by Donna Mangasarian (DKM Inc., 114 Dartmouth Rd., Manhasset, New York 11030. • ***Summary:*** Discusses: Soybeans (dry, U.S., Japan), soybeans (roasted, Japan), soybeans (fresh, raw), soybeans (boiled, U.S., Taiwan), soy flour (U.S.), tofu, black soy beans (raw and boiled), red bean seeds (dry), daidzein, genistein, coumestrol, formononetin, biochanin-A. Address: Molecular Carcinogenisis Program, Cancer Research Center of Hawaii, Honolulu, Hawaii 96813.

10771. Ingram, Leah. 1995. Soy wonder. *Entrepreneur.* Jan. p. 291.
• ***Summary:*** Steve Demos, founder of White Wave Inc. in Boulder, Colorado, graduated from college in 1971, then spent 4 years in India. During that time, because meat was hard to come by, he became a de facto vegetarian. Upon returning to the USA in 1975, he realized that there were few vegetarian protein sources on the market, despite the fact that many young people were now making the decision to become vegetarians. Following a recipe in *Ten Talents,* a Seventh-day Adventist cookbook by Frank and Rosalie Hurd, Demos started making and selling tofu. His first customers were members of his tai chi class. By 1977 he realized he

© Copyright Soyinfo Center 2013

could turn tofu into a business, so with loans from a friend and his mother-in-law, White Wave was born.

At first, Demos sold his tofu to Boulder health food stores. Then he convinced a buyer at King Supers grocery store to test his tofu for 30 days. Every day Demos had his employees go into the store and buy tofu. At the end of this "test" period, the tofu was selling so well that King Supers increased distribution to 82 stores.

Today White Wave products are available at more than 1,000 stores nationwide and brought in revenues of about $8 million in 1994. A photo shows Steve Demos holding a package of White Wave tofu, and standing next to a large White Wave Soyfoods logo.

10772. Jacobi, Dana. 1995. Tofu–Real food for real people. *Natural Health.* Jan/Feb. p. 80-83, 116, 118-23.
• ***Summary:*** The key to success with tofu is mastering a few basic techniques, such as pressing the tofu to give it a firm texture. "Tofu is a kind food. It's cholesterol free, high in calcium, a great source of protein, and a big-league cancer fighter." Contains many tofu recipes. Address: New York, NY.

10773. Lorente, Carol Wiley. 1995. Recipe redux. Silky, smooth and sensible: A low-fat vegan cheesecake that won't weigh you down. *Vegetarian Times.* Jan. p. 22, 24.
• ***Summary:*** Contains a recipe for Lemon Tofu 'Cheesecake' made with 1 lb firm silken tofu. A standard cheesecake, adapted from the *Joy of Cooking,* weighs in at more than 300 calories and 15 gm of fat per slice, compared with only about 200 calories and 3 gm of fat for a slice of this tofu cheesecake. Address: VT Food Editor.

10774. Mindell, Earl. 1995. Earl Mindell's soy miracle. New York, NY: Simon & Schuster. A Fireside Book. 256 p. Index. 22 cm. [97 ref]
• ***Summary:*** Contents. Part I: Soy–The miracle food. 1. The soy story: explaining the miracle. 2. Soy by any other name. 3. Does soy prevent cancer? 4. Heart and soy. Part II: Soy for special needs. 5. Just for women: Rx for menopause and osteoporosis. 6. Just for men: Rx for prostate problems. 7. Kids, cancer, and heart disease. 8. Tips for vegetarians. Part III: Not by soy alone. 9. Thirty-seven miracle foods from the Pacific Rim. Earl's pearls: A guide to vitamins and minerals. Part IV: Get more soy in your life. 11. Savvy substitutions. 12. Cooking with soy. 13. Breakfast the soy way. Part V: Seventy super soy recipes (p. 149-230). Glossary. Resources. Selected bibliography.

Pages 12-13 note that soybeans are an abundant source of many different types of phytochemicals, including isoflavones, genistein, protease inhibitors, and phytic acids.

Chapter 2 describes the different types of soy foods. Traditional soy foods: Soy milk, tofu (firm tofu, silken tofu, yakidofu, koyodofu [sic, koya-dofu]), okara, natto, tempeh, miso, soy sauce, kinnoko [sic, kinnako] flour. Soy protein products: Soy protein concentrates, soy protein isolate, soy flour, texturized soy protein, meat analogs. Other soy products: Soy fiber, soybean oil, lecithin. Questions about soy foods. Page 33 asks the question: "If phytochemicals in soybeans are so healthy, why can't they be extracted from food and made into a pill like a vitamin?" Answer: Researchers are not yet certain which phytochemicals are the most important. "There may even be other beneficial compounds in soy that have yet to be identified. Your best bet is to eat the real food." A section titled "Soy's top ten benefits" (p. 36-38) discusses: 1. Antioxidant. 2. Breast cancer. 3. Cholesterol lowering. 4. Colon cancer. 5. Hip fracture. 6. Hot flashes. 7. Immunity. 8. Kidney disease. 9. Lung cancer. 10. Prostate cancer.

Chapter 3, titled "Does soy prevent cancer?" discusses six compounds which cancer researchers believe may be effective in cancer prevention: Isoflavones, genistein, daidzein, protease inhibitors, phytic acid, and saponins. A long section later in the chapter discusses each of these, with special emphasis on genistein.

Note: The author has also written *Earl Mindell's Herb Bible* and *Earl Mindell's Food as Medicine.* He is a newcomer to this field. This book may appeal to those who are looking for miracles from the foods they eat. Most of the information contained in this book can be found in Mark and Virginia Messina's outstanding *The Simple Soybean and Your Health* (1994), and the *First International Symposium on the Role of Soy in Preventing and Treating Chronic Disease: Proceedings from a symposium held in Mesa, Arizona, on February 20-23, 1994,* published in full in *The Journal of Nutrition* Vol. 125, No. 3S, March 1995 Supplement. It was from this symposium and the outline published before the symposium that Mindell got his idea for this popular book.

Dr. Mindell is an R.Ph. (Registered Pharmacist) with a PhD in Nutrition from Pacific Western College in Renton, Washington.

According to a review of *Earl Mindell's New and Revised Vitamin Bible,* by James A. Lowell, PhD. (Nutrition Forum, June 1986) "Mindell claims to hold valid credentials in nutrition. Although he does have a bachelor's degree in pharmacy from the University of North Dakota, his Ph.D. is from the University of Beverly Hills, an unaccredited school which lacks a campus or laboratory facilities." Mindell helped to found the Great Earth chain of vitamin and health food stores, numbering about 200 in 1986, America's second largest such chain. Address: R.Ph, PhD, registered pharmacist and Prof. of Nutrition at Pacific Western Univ. in Los Angeles. He lives in Beverly Hills, California.

Talk with Christie Metzger of the MSRPC. 1996. Jan. 4. The revised edition of this book was published in Jan. 1995; the first edition was published in March 1994. Address: 360 Pierce Ave., Suite 110, North Mankato, Minnesota 56003. Phone: 507-388-1635.

10776. **Product Name:** Extra Firm Smoked Tofu. Renamed Original in about 1994.
Manufacturer's Name: North Coast Distributors.
Manufacturer's Address: 1717 Solano Way #13, Concord CA 94520. Phone: 510-798-4393.
Date of Introduction: 1995. January.
Wt/Vol., Packaging, Price: 6 oz or 16 oz plastic tub. Wholesales for $1.80 or $4.75 respectively.
How Stored: Refrigerated.
New Product–Documentation: Price list sent by Patricia Smith from Natural Products Expo West at Anaheim, California. 1995. March. Printed black orange. Talk with Hanan Onn. 1995. March 22. This product was launched in Jan. 1995.

10777. **Product Name:** Vegan Cajun Burger (On a Bun), and Cajun Tofu Sloppy Joe (The Filling).
Manufacturer's Name: Soy Devine.
Manufacturer's Address: 1881 Fieldbrook Road, Arcata, CA 95519. Phone: 707-849-8430.
Date of Introduction: 1995. January.
Ingredients: Processed organic tofu [frozen], tomato sauce, onions, honey, mustard, cider vinegar, safflower oil, tamari (Westbrae), peanut butter, garlic, miso, spices (incl. paprika, cayenne, allspice).
New Product–Documentation: Talk with Mara Devine. 1995. June 1. Cajun Barbecue Style was first introduced in 1987. In Jan. 1995 it was renamed and divided into two products: Vegan Cajun Burger, and Cajun Tofu Sloppy Joe. The latter product is sold as a product in its own right, but also serves as the filling for the burger. She moved from Miranda to Arcata, California, in June 1993.

10778. **Product Name:** [Medley of Tofu Spreads].
Foreign Name: Streichkonzert.
Manufacturer's Name: Topas GmbH (Product Developer-Marketer).
Manufacturer's Address: Bollbergstr. 41, 72116 Öschingen [near Tuebingen], Germany. Phone: 07473/25515. Fax: 07473/8320.
Date of Introduction: 1995. January.
Ingredients: Incl. seitan.
Wt/Vol., Packaging, Price: 150 gm package.
How Stored: Refrigerated.
New Product–Documentation: Letter (fax) from Klaus Gaiser, founder of Topas. 1996. Sept. 21. This is a "concert" of 3 kinds of tofu-spreads, and the only product of his which survived the difficult year of 1995. The product consists of two very sausage-like spreads and one cheese-like spread; 50 grams of each of the three, all in one package. Nowadays it is quite a successful product.

10779. **Product Name:** [Tofu-Filled Pouches (With Leeks, With Mushrooms)].
Foreign Name: Tofu-Maultaschen (mit Lauch, mit Champignons).
Manufacturer's Name: Topas GmbH (Product Developer-Marketer).
Manufacturer's Address: Bollbergstr. 41, 72116 Öschingen [near Tuebingen], Germany. Phone: 07473/25515. Fax: 07473/8320.
Date of Introduction: 1995. January.
Ingredients: Incl. tofu.
How Stored: Refrigerated.
New Product–Documentation: Letter (fax) from Klaus Gaiser, founder of Topas. 1996. Oct. 8. This product, introduced in early 1995, resembles a typical south German treat.

10780. **Product Name:** [Tofu Sandwich Slices / Cold Cuts].
Foreign Name: Tofu-Aufschnitt.
Manufacturer's Name: Topas GmbH (Product Developer-Marketer).
Manufacturer's Address: Bollbergstr. 41, 72116 Öschingen [near Tuebingen], Germany. Phone: 07473/25515. Fax: 07473/8320.
Date of Introduction: 1995. January.
Ingredients: Incl. tofu.
How Stored: Refrigerated.
New Product–Documentation: Letter (fax) from Klaus Gaiser, founder of Topas. 1996. Oct. 8. This product, introduced in early 1995, resemble Heiler's Tofu-Pastete.

10785. Ham, P. Marc. 1995. The work of Semences Prograin Inc. (Micronisation Canada Inc.) in Quebec (Interview). *SoyaScan Notes.* Feb. 1. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** This company was established in 1980 and is now a leader in Canada in the field of value added soy products. About two-thirds of their business is making full-fat micronized soybeans for use in animal feeds (mainly dairy cows, plus hogs and poultry), and one-third is in breeding and growing soybean seed (they presently grow about 2,000 acres year for use as soybean seed). They now have two micronizing plants which produce the Micro Flake, the Micro Milled product and the Micro Elite (made from higher protein soybeans, with high bypass). Mark believes that a micronized product makes better feed than that produced on a low cost extrusion cooker. Extrusion may be better for monogastric animals than it is for dairy. They have a research and development program for new soybean varieties. They also contract with a winter nursery in Chile for reproduction during the winter. They buy about 55,000 tonnes/year of soybeans for processing into animal feed and for exporting to the Pacific Rim. They are one of the largest companies in Quebec that buy soybeans and keep them in Quebec. The big trading houses buy soybeans then export them mostly to Rotterdam, Netherlands, to the European crush market. Prograin keeps its Maple Glen varieties identity preserved. They screen soybeans to sort them into 3 sizes. The big beans (18/64 inch and over) are sold to Japan for use as green vegetable soybeans, the medium sized beans (500 tonnes/year) are used in the Chinatown in Quebec to make tofu and soymilk, and the small soybeans are used by 3 companies for making soy sprouts in Quebec. They have a natto program as well. Address: Semences Prograin Inc. (Micronisation Canada Inc.), 145 Bas Riviere Nord, St-Cesaire, Quebec, J0L 1T0, Canada. Phone: (514) 469-5744.

10786. Lombardi, Joyce. 1995. Re: History of growing and using soybeans in Chad. Letter to William Shurtleff at Soyfoods Center, Feb. 4. 3 p. Typed, with signature. [Eng]
• ***Summary:*** "Thank you for your response and enthusiasm for our soya work in Chad. I am forwarding your letter to people in town who are very involved in spreading the good bean throughout the land. One, an agronomist from Togo named Dr. Akintayo, has come to Chad for soy propaganda only. He has recently produced a book which will be of great interest to you, and is also very involved in training soybean trainers at the *Centre de Formation Professionale d'Agriculture* (*CFPA*), a farm extension service launched

© Copyright Soyinfo Center 2013

about 6 years ago by Swiss development workers.

"It is in fact from a Swiss-Italian development worker that I got the idea, and later the seeds, for soybean cultivation in my village. I had enjoyed ginger-flavored soymilk at his villa, and had heard him extoll the soil-enriching properties of the soy bean, so when people in my village began complaining about the low rates they were getting from the state's cotton company, I asked if they had thought about planting another cash crop, like soy. I was told it had been done in the past, but people here don't really known how to do much with soy beyond what you call dawa-dawa, fermented sauce. So a few weeks later, after more discussions with villagers, who told our health team that famine was their biggest health worry, the *Comite de Sante de la Paix* was born. Its mission–to grow, sell, and popularize the soybean in the village of Bessada, Chad.

"As far as I can tell, the farthest back anyone can remember planting soy in our region of southeastern Chad is 10 years ago [i.e. in about 1985]. Most people credit the above-mentioned CFPA with introducing the crop here 6 years ago. From its base in town, the CFPA also has several outposts in smaller towns (i.e. Koumra) and villages (i.e. Modjibe) near, or within a 20 km radius of Bessada. Farmers report success with the crop, especially as our soil is 'tired' from a constant rotation of cotton, millet and peanuts. People report that one 100 kg sack fetches between 23,000–50,000 cfa ($41-90) compared to half that for a sack of millet. The main buyers seems to be ONGs run by ex-pats [expatriates] or missions. Local buyers make dawa-dawa, or *ndi,* as it is called in the Sara language here, and several women in my village report making sojateen, or soybean coffee. However the cost, between 150-500 cfa per kg is prohibitive, and soy is still seen as a luxury food here. For comparison, millet is about 50-100 cfa/kg, and peanuts a bit less. Nonetheless, people generally know that soy is good for the body and soil, and were very interested in our collective soybean field.

"So, on July 17 1994, our rather ad hoc health team–made up of four men previously elected as village health delegates and 10 ten traditional birth attendants, old women with lined, tribal-scarred faces, canes, strong wiry hands–planted 6 kg of soybeans on a cleared ½ hectare plot, known here as a corde... Millet and cotton had been planted on our plot before, the debris cleaned away with the usual bushfire method.

"Our yield, just barely over 100 kg, was dismal. Reasons: we planted too late in the rainy season, which begins in May/June, and harvested our beans on Thanksgiving Day. Akintayo informed me that we planted the 120-day variety, which is what the CFPA has made available to folks here. Also, we only weeded twice, and very late in the game. The tribulations of collective labor as I'm sure you remember from your Peace Crops days. Third, our soil is rather sandy, and I'm told soy prefers clay and shade. Indeed, we remarked that the plants growing in the shade of a karite tree produced very well while the plants in the shade of an ndil tree produced a lot of foliage but not much bean. A farmer 7 km away reported a yield of 250 kg from 4 kg of seeds on a one-corde plot. He planted earlier and had better soil. His village has a water table of 23 meters, ours is 47."

"So, now, the sack of beans sits in my hut, away from mice and thieves, until we move it to a communal silo with another sack we're buying on credit. We have siphoned out some of the beans already to stage a big village-wide soybean transformation day, January 25, run by two animatrices sent by the CFPA in nearby Koumra. The two women journeyed out on their red moped to teach the health committee members, representatives from church and women's groups, 25 total participants, to make soy milk, cheese (tofu), fried tofu, beignets (spicy tofuburgers made with the residue [okara] whose name in Japanese I saw in your Book of Tofu), cake, steamed pate with fish and tomatoes, sweet donuts, and cake. The consensus was: porridge (I forgot to mention it above), spicy beignets and cake. Those were the big hits. People were shocked that one could bake a delicious cake there under the mango tree outside our clinic. Our tools were 3-rock fires, wooden mortars, big iron cauldrons and manual labor. Perhaps Niger was the same way, but Chad has next to nothing in the way of time-saving tools. We did manage to borrow someone's hand-cranked meat grinder to make the soy milk.

"The fallout from soyday is this: the chef du canton, in whose compound I live, wants to make our village a center for soya cake, and we plan to serve it to the US Ambassador and Minister of Health who are due out in the village next week to inaugurate our newly renovated clinic, *grâce à* USAID. New members of the health team want to launch an infant-feeding program of soy porridge at the dispensary each Saturday or vaccination day. There is one such program started by a French doctor named Dr. Magguie Negri in a village called Bekemba, about 60 km north of here. She started the program in 1991, and reports feeding 103 children in 1993, on a continued basis. She encourages mothers to prepare the soy meals (porridge) themselves, and to aid with a community soycrop. (Paperwork to follow if I can find any).

"The infant nutrition program couldn't come at a better time for Bessada which now finds itself in the midst of a fatal measles epidemic, compounded by the beliefs that vaccinations give AIDS and measles, and that giving meat to baby or child with measles will make her sicker.

"So, in my village, soybeans are growing fast and well, and I will leave here knowing that at least I have made a substantial contribution to the well-being of a place it seems that history has forgotten. God, it's hard here. People scrape a living out of the sand with their bare hands."

"So. The gospel spreads forth. Having seen the damage wrought by so many other egos and programs come here to save the Africans, plugging away for The Soybean is one

© Copyright Soyinfo Center 2013

of the only acts of development I really feel comfortable engaging in.

"So no, in answer to your question, soybean cultivation is not a specific Peace Corps program or govt. program here."

"As for me, I was a Vanilla Edensoy and tahini tofuburger fan back in the States, but I never knew much about soy until now."

Color photos taken by Joyce show: (1) Three African men weeding a field of soybeans by hand, Sept/Oct. 1994. (2) Soybean plants in Bessada growing in the shade of a Karité tree, Aug. 1994. (3) Four Africans (two in traditional dress) from the health team seated outside of Joyce's round mud-walled house with conical thatched roof. Atop a wooden mortar are five glasses of soybean coffee on a white plate. Enclosed is a recipe for "Bessadonian soya coffee deluxe," by Joyce. Season, if desired, with *tumba* (Arabic tea spice). It's cheap, nutritious, and you can eat the grounds. Address: U.S. Peace Corps, B.P. 193, Sarh, Chad.

10787. Mann, Sue. 1995. Re: Tempeh, tofu, and miso in Ecuador. Letter to William Shurtleff at Soyfoods Center, Feb. 4. 4 p. Typed, with signature, and handwritten.

• ***Summary:*** A woman, who is about to get some kind of degree in soyfoods/nutrition and who is Quito's top macrobiotic teacher/cook/storeowner, already makes her own tofu and miso, and is interested in tempeh. Sue will be talking with her soon.

"I have been making tempeh for friends, and in about 3 weeks will start moving toward commercial production. With three restaurants waiting and friends no longer willing to take it without paying, prospects are good." She orders a copy of the book *Tempeh Production,* by Shurtleff & Aoyagi, to be sent to Andrew McCallum in Rochester, New York. On a sparate handwritten sheet she gives details on 3 commercial soy products from Ecuador and Colombia. Address: c/o Donna Lewen, Cassilla 17-12-578, Quito, Ecuador. Phone: 593 2-570-600.

10788. Weber, Marcea Newman. 1995. Re: Work with natural foods and tofu in England and Australia. Letter to William Shurtleff at Soyfoods Center, Feb. 12–in reply to inquiry. 3 p. Typed, without signature.

• ***Summary:*** Marcea and Daniel Weber met in Boston in about 1972, and both studied macrobiotics. They left Boston in 1974 to live in England because Daniel wanted to study acupuncture in one of the acupuncture schools in Buckinghamshire. They stayed there for 6 months and then moved to London, where they connected with Bill Tara, who was working at starting an East West Centre. Marcea began teaching cooking classes and started a Wholefoods Bakery with an English woman. This continued for 1½ years.

During this time Marcea met Bruce Gyngell, an Australian who met Michio Kushi while he was in London. Michio suggested that Bruce change his diet, so Bruce came to the East West Centre and studied cooking. He was looking for a cook for himself. He was at that time living in England and working for one of the television studies. He was the person responsible for bringing television to Australia, so he was quite influential. He wanted macrobiotics to find its way to Australia, so he invited Marcea and Daniel to visit Australia and bought them each a round-trip ticket. He said they could see if they wanted to stay and start a centre in Australia. So in 1976, after visiting Japan and Oki sensei and his Oki Yoga Dojo in Mishima, Japan, for several weeks, they arrived in Australia, and have lived there ever since. In December 1982 Marcea and Daniel Weber were married in Australia.

"The Soy Bean Factory was established in Dec. 1978, when Michael De Campo, Yoshiko Wright and Marcea Weber started a company devoted to producing traditional Japanese tofu using nigari (a sea water extract) as a coagulating agent. The fresh Japanese-style tofu began to arrive in the health food stores and Japanese supermarkets around April 1979." As far as Marcea knows, theirs was the first Caucasian-run tofu company in Australia. It was her idea to start the company. Shares were issued at the beginning. Marcea initially invested about $5,000 to $7,000, Yoshiko Wright was brought in to invest about $3,000, and Michael De Campo invested about $3,000 or a little less. His main role was making the tofu and working with Marcea on improving product quality.

"The Soy Bean Factory was located just outside Chinatown and in the central district of Sydney, New South Wales, Australia. We concentrated on making a tofu equal in quality to the fresh tofu sold in Japan today. We were able to service people who wanted fresh tofu by selling it straight from the Factory to the public, as well as packaged in a plastic container with a plastic film on top."

The Soy Bean Factory ceased operation in October 1981. Note: On 8 Nov. 1981 Marcea wrote Bill Shurtleff, on a letterhead of the East West Foundation, 363 George St. in Sydney: "Our factory has shut down, and now one of the Chinese producers [Sin Ma Trading Co., 9 Meeks Road, Marrickville (in southwestern Sydney), NSW] is allowing us to use their premises to make our tofu... We are hoping to start another factory with more capitol behind us. Unfortunately, we were grossly undercapitalized, and this was our downfall." While making tofu at Sin Ma Trading Co., The Soy Bean Factory continued to use its original name, since they had lots of packaging and labels, and no need to change names.

"After getting into the swing of making Japanese-style tofu and using the packaging equipment, we decided to find a source of organically grown soybeans that would produce the same quality tofu as the non-organic beans we had been using. In 1983, after several months and many trials, we finally found a bean that would give almost the same quality,

© Copyright Soyinfo Center 2013

though with a small drop in tofu volume [yield].

"As the demand increased up to as much as 600 pieces per week of tofu (each piece weighed 300 gm), we began to look for larger premises, which were found in Leichhardt (about 7 miles southwest of downtown Sydney), so by early 1982 we had re-located to 355 Parramatta Road, Leichhardt, NSW 2040–and had started making tofu. At that time, Yoshiko Wright and Michael De Campo sold their shares to John Fenwick and me, and the name of the company was changed to Soyfoods Australia. Still having a controlling interest in the business, I hired Tony Wondal, a Chinese man, to help operate the business. A year later (in about 1983), after an increase of sales, John decided to sell his shares to Ross Ebert, and we moved to even larger premises at 14/2 Paton Place, Manly Vale (northeast of downtown Sydney), New South Wales. After a year of production and trying to make soymilk without proper soymilk equipment, I decided to sell my share of the company to Ross Ebert. I was expecting my first child in August 1985 and didn't want to be tied down to any business. So I left the tofu business and never looked back! As far as I know, Ross never put any new products out on the market and so the business only sold tofu–and still does today with new owners.

Note: In Sept. 1986 Ross B. Ebert had just spent $100,000 on fairly sophisticated soymilk equipment. He was selling soymilk fresh to Coles supermarkets in plastic bottles. In Nov. 1988 Lindsay Kotzman purchased the business, which was named Great Australian Pty. Ltd. In July 1990 Jennifer Young purchased the business, still located at 14/2 Paton Place. "The Company is Great Australian Tofu Pty. Ltd., trading as Soyfoods Pty. Ltd."

As far as Marcea knows, Sin Ma Trading Co. and Castle Trading Co. were both tofu manufacturers. Address: 56 St. Georges Cres., Faulconbridge 2776 NSW, Australia.

10789. Reichl, Ruth. 1995. Restaurants: Finding the real China in Queens with a man famous for knowing what is. *New York Times.* Feb. 24. p. C24.
• ***Summary:*** This is a review of three Chinese restaurants in Flushing, Queens. The writer accompanied Ken Hom, a man who was famous for his eight books on Chinese food. Ken was happy because he "had just tasted the spicy pickled bean sprouts at Golden Monkey [Sichuan; 133-47 Roosevelt Ave.]..." The dish was made with real soy bean sprouts and, for once, the dish contained enough oil–which Americans might not like.

A recipe that the menu calls "vegetable rolls" are actually "bean curd skins [yuba] so crisp they crackled with each bite, filled with juicy bean sprouts and brushed with a thick and pungent sesame sauce."

At Taipei Wall Sea Street Taiwanese Restaurant [135-05 40th Road], hot pots are the signature dish. "Taiwanese food is unlike any other and this turned out to be a fine place to sample it." One dish, which the menu called "fried homemade pork," consisted of "thin, chewy strips of meat marinated in fermented bean curd to give them a salty, funky flavor." One of the recommended dishes is "shredded pork with dried bean curd" [probably *doufu-gan,* which is pressed tofu].

10790. Ridenour, Jeremiah. 1995. Recent developments at Wildwood Natural Foods (Interview). *SoyaScan Notes.* Feb. 28. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** In Feb. 1992 Jeremiah took over management of Wildwood. There were some hard feelings on the part of other managers at the time (especially Paul Orbuch), but now all is well and the company is thriving. Paul Orbuch is now with Odwalla (a fresh-juice company), running their Northern California operations. He is probably doing better now financially than when he was with Wildwood.

When Jeremiah took over, the company was growing too rapidly, so Jeremiah slowed it down by cutting out stores or routes that were not profitable and raising the minimum size required for delivered orders.

Wildwood is now in the process of raising money via a private placement with investors. The money will be used mostly for marketing. Jeremiah hired a man from Quaker Oats who is now working for Wildwood full time as a consultant. Jeremiah plans to shut down both the Santa Cruz and Fairfax facilities and consolidate them at a new plant in Watsonville, which is about 20 minutes drive from his home in Corralitos. Address: Wildwood Natural Foods of Santa Cruz, Inc., 1560 Mansfield Dr., Suite D, Santa Cruz, California. Phone: 408-476-4448.

10791. **Product Name:** Five Spice Bean Curd.
Manufacturer's Name: American Food Co. (AFC).
Manufacturer's Address: 4738 Valley Blvd., Los Angeles, CA 90032. Phone: 213-223-7738.
Date of Introduction: 1995. February.
Ingredients: Incl. soy beans, water, calcium sulfate.
How Stored: Refrigerated.
New Product–Documentation: Talk with Ralph Folder from Arizona 1995. May 8. He likes this product and plans to introduce it on a local television program.

10792. Arnold, Kathryn. 1995. The joy of soy. *Delicious!* (*Boulder, Colorado*). Feb. p. 34-36. [3 ref]
• ***Summary:*** The soybean "has long been revered by vegetarians as a nutritional powerhouse. However, the real secret is that soyfoods may help prevent disease." They are cancer fighters and good for the heart. A table (p. 36) lists 12 different types of soyfoods and their uses: Tofu, tempeh, okara, miso, natto, TVP, soymilk, soy grits, soy flour, soy cheese, soy sauce, soy yogurt.

Note: This periodical, which began publication in about 1983, is published for natural products consumers by New Hope Communications in Boulder, Colorado. As of March

© Copyright Soyinfo Center 2013

1998 some 425,000 copies of Delicious! are distributed each month to over 900 health food retail stores throughout the United States.

10793. Fischer, Bruno. 1995. [Chronology of Bruno Fischer GmbH]. Aetorf, Germany: Bruno Fischer GmbH. 5 p. Unpublished typescript. [Ger]
• ***Summary:*** An interesting chronology of the company from 1967 to Feb. 1995 in question and answer format. Also gives the dates that most of the company's products were introduced. Address: Im Auel 88, 53783 Aetorf, Germany. Phone: 49-2243-4021.

10794. **Product Name:** [Smoked Lopino {Smoked Lupin Tofu}].
Foreign Name: Lopino geraeuchert (Suesslupineneiweiss).
Manufacturer's Name: Geestland Paul E. Bremer.
Manufacturer's Address: An der Packhalle V, Nr. 1, 27572 Bremerhaven, West Germany. Phone: (0471) 2 60 20.
Date of Introduction: 1995. February.
Ingredients: Sweet lupins*, water, smoke. * = Organically grown (*aus kontrolliert oekologischem Anbau*).
Wt/Vol., Packaging, Price: 200 gm.
How Stored: Refrigerated.
Nutrition: Per 100 gm.: Protein 27.00 gm, fat 5.28 gm, carbohydrate 5.08 gm, calories (kcal) 178.4 (750.00 kJoules).
New Product–Documentation: Letter (fax) from Bernd Drosihn of Viana. 1995. May 8. In Germany a new product has come on the market, a kind of tofu made out of "Lupinen." The manufacturer, a smaller tofu company named Geestland, says it contains 27% protein and a lot of vitamin B-12. The taste is not so good and you cannot cut it into slices.

Letter (fax) from Bernd Drosihn. 1995. May 10. Contains copy of 2-panel leaflet and label. Leaflet's front panel states (in German): "The food with a future. Lopino is high-quality, pure protein from plants, grown in Germany, with lots of vitamin B-12." Photos in the leaflet show the labels of three other Lopino food products: Natural Lopino, Lopino Patties in Tomato Sauce, and Lopino Indian Rolls. A photo shows 8 people who work at Geestland.

Label for Smoked Lopino sent by Bernd Drosihn. 1995. June 3. 3.5 by 4.5 inches. Black, purple, red, green, blue, and brown on yellow.

Note: This is the earliest lupin tofu product seen; it contains no soy, using lupins in place of soybeans.

10795. **Product Name:** [Lopino {Lupin Tofu} (Patties in Tomato Sauce, Natural, Indian Rolls)].
Foreign Name: Lopino (Suesslupineneiweiss) (Bratlinge in Tomate, Natur, Rolls indisch).
Manufacturer's Name: Geestland Paul E. Bremer.
Manufacturer's Address: An der Packhalle V, Nr. 1, 27572 Bremerhaven, West Germany. Phone: (0471) 2 60 20.
Date of Introduction: 1995. February.
Ingredients: Incl. Sweet lupins*. * = Organically grown (*aus kontrolliert oekologischem Anbau*).
How Stored: Refrigerated.

10796. *Image Sandoz: La Lettre de Sandoz en France* (*Rueil-Malmaison*). 1995. "Nutrition & Soja": Avec cette nouvelle unité de production, Nutrition & Santé s'investit dans le soja [Nutrition & Soja: With this new production unit, Nutrition & Santé invests itself in soya]. No. 21. Feb. p. 1, 16-17. [Fre]
• ***Summary:*** The inauguration of the production unit "Nutrition & Soja" took place on 15 October 1994 in the industrial park at Revel (in the Department of Haute-Garonne). A color photo shows the many important people who attended the event at the ribbon-cutting ceremony under the skies of Lauragais: Mr. Jean Puech (French Minister of Agriculture and Fisheries), Alain Chatillon (president of Nutrition & Santé and of Nutrition & Soja), Pierre Izard (President of the Consul General of Haute Garonne), René Basdevant (President of Sandoz France), Marc Censi (President of the Region Midi-Pyrénées), and Alain Bidou (Prefect / Chief Administrator of the Region Midi-Pyrénées). In his speech, Minister Jean Puech underlined the importance of this factory for local agriculture. Nutrition & Soja (formerly named Société Soy and founded by Mr. Bernard Storup and Mr. Jean de Préneuf) is a wholly owned subsidiary of Nutrition & Santé. The company will maintain its functional autonomy, under the responsibility of its two founders: Mr. Storup is administrative director and director of *Exploitation,* and Mr. Preneuf is plant manager and director of development.

The new factory rests on a piece of land 17,000 square meters in size (4.2 acres), and has a floor space of 3,000 square meters. Nutrition & Soja has four main activities: Milling (heating and dehulling soybeans), a production line for soymilk (*jus de soja*), a tofu production line, and a area for transforming fresh tofu into various food products.

The nutritional goal of Nutrition & Santé is to market food products having high nutritional, dietetic, and biological content, which promote the good health and well-being of the consumers. Most or all of the soybeans are organically grown. The commercial goal of Nutrition & Santé is to be on the forefront as the market evolves, and to anticipate new technological developments and the needs of consumers. In France, one person in five who is concerned about their

© Copyright Soyinfo Center 2013

weight or figure, and their well-being, consumes soya. In the USA, this figure is more than 50%. Soya has "formidable potential."

Other photos show: The public figures who attended the event examining Nutrition & Soja's line of packaged products. An external view of the headquarters of Nutrition & Santé at Revel–a four-story building with 3 flags flying. The inside of the soyfoods factory, where the public figures receive an explanation of equipment from Jean de Préneuf.

A sidebar notes that Nutrition & Soja: * Received 40 million French francs of investment in 1994. Employs 45 people. The products are distributed in dietetic stores under the brand Soy and mainstream stores under the brands Union Nature and Céréal.

Note: This periodical is an internal publication of Sandoz in France. Address: France.

10797. Messina, Mark; Messina, Virginia. 1995. Soybeans linked to health benefits. *Vegetarian Voice* (*Dolgeville, New York*) 20(4):10-11. Winter.
• ***Summary:*** Contents: Introduction. Soy and heart disease. Soy and cancer. Other roles for soy. What if you can't tolerate soy. The whole diet approach.

A table shows the isoflavone content of selected foods: Soymilk (1 cup) 40 mg. Tofu (½ cup) 40 mg. Tempeh (½ cup) 40 mg. Miso (½ cup) 40 mg. TVP, cooked (½ cup) 35 mg. Soy flour (½ cup) 50 mg. Soybeans, cooked (½ cup) 35 mg. Soy nuts (1 ounce) 40 mg. Isoflavones (unlike vitamins) are not destroyed in conventional cooking methods.

10798. Minnesota Soybean Research & Promotion Council. 1995. Soybeans–Designed for life (Recipe cards). North Mankato, Minnesota. 14 cards. Each card: 8 x 13 cm. Feb.
• ***Summary:*** This is a set of recipe cards, consisting of 14 cards and 12 recipes, linked to fold out accordion style. Printed with blue and yellow soy ink on white card stock, the recipes call for the use of tofu (8 recipes), green vegetable soybeans, soy flour, whole dry soybeans, and soymilk. Only one recipe calls for the use of meat.

Talk with Bonnie McCarvel, executive director of the Minnesota Soybean Research & Promotion Council. 1996. Feb. 2. These recipe cards were developed by the Minnesota Soybean Board in conjunction with a video bearing the same title. Both were released in about Feb. 1995. Minnesota paid all expenses, then made the video and the cards available to all the other state soybean boards. Address: 360 Pierce Ave., Suite 110, North Mankato, Minnesota 56003. Phone: 507-388-1635.

10799. Minnesota Soybean Research & Promotion Council. 1995. Soybeans–Designed for life. A program to introduce clientele to the various uses and health benefits of soy foods and foods with soybean ingredients (Color videotape). North Mankato, Minnesota. 8 minutes. Feb.
• ***Summary:*** Talk with Bonnie McCarvel, executive director of the Minnesota Soybean Research & Promotion Council. 1996. Feb. 2. This color video was developed and designed for clinical dietitians, in conjunction with a set of recipe cards bearing the same title. Both were released in about Feb. 1995. Minnesota paid all expenses, then made the video and the cards available to all the other state soybean boards. This is an example of a project developed and funded by one state then shared with other states. Minnesota works closely with Missouri and Nebraska on such regional joint projects. They meet twice a year to discuss things that they could do on a regional basis. They decide which state will take the lead on each project, to prevent a lot of duplication of effort and wasted resources. Address: 360 Pierce Ave., Suite 110, North Mankato, Minnesota 56003. Phone: 507-388-1635.

10800. Morinaga Nutritional Foods, Inc. 1995. Does your tofu leak or 'puff up' on the shelf? Does it have to be kept below 45 degrees at all times? (Ad). *Produce Business.* Feb. p. 31. *
Address: 2050 W. 190th St., Suite 110, Torrance, California 90504. Phone: 213-728-4325.

10801. **Product Name:** Smoked Tofu Pâté [Is It Really Tofu, Hot, or Exotic]. The latter was renamed Exotic Zaatar in about 2003.
Manufacturer's Name: North Coast Distributors.
Manufacturer's Address: 1717 Solano Way #13, Concord CA 94520. Phone: 510-798-4393.
Date of Introduction: 1995. February.
Wt/Vol., Packaging, Price: 8 oz or 16 oz plastic tub. Wholesales for $2.50 or $4.94 respectively.
How Stored: Refrigerated.
New Product–Documentation: Price list sent by Patricia Smith from Natural Products Expo West at Anaheim, California. 1995. March. Printed black orange. Talk with Hanan Onn. 1995. March 22. These three products were launched in Feb. 1995. Zaatar is a Middle-Eastern condiment.

10802. Reilly, Lee. 1995. Answering machine: Buttermilk minus the milk. *Vegetarian Times.* Feb. p. 30.
• ***Summary:*** There are two good ways to make non-dairy buttermilk. 1. Add 2 teaspoons of lemon juice or vinegar to a cup of soymilk. 2. Blend 3/4 cup of soft or silken tofu with ¼ cup water, 1 tablespoon lemon juice or vinegar, and a pinch of salt. Address: Free-lance writer.

10803. Rojas, Alexandra Salas. 1995. The "chameleon" of foods, tofu, keeps on changing: A multi-purpose, natural food of the '90s, tofu is experiencing a revolutionary evolution. *Produce Business.* Feb. p. 30-31.
• ***Summary:*** Discussing the many exciting new ways that tofu is being marketed and sold in supermarkets. "Finding

© Copyright Soyinfo Center 2013

more ways to sell tofu is important because consumer demand is growing." Discusses water packed vs. aseptically packed tofu. "Morinaga has annually sold over 5 million units of aseptically packaged tofu."

10804. **Product Name:** Trader Joe San Herbed Tofu: Made with Natural Nigari.
Manufacturer's Name: Trader Joe's (Marketer-Distributor). Made in El Cajon, California, by San Diego Soy Dairy.
Manufacturer's Address: P.O. Box 3270, South Pasadena, CA 91031-6270. Phone: 818-441-1177.
Date of Introduction: 1995. February.
Ingredients: Soybeans, filtered water, natural nigari (an extract of sea water), parsley, oregano, basil, garlic.
Wt/Vol., Packaging, Price: 16 oz packed in water in molded plastic tray, with heat-sealed, peel-off plastic film top. Retails for $1.19 (1998/02, Concord, California).
How Stored: Refrigerated.
Nutrition: Per 3 oz.: Calories 100, calories from fat 45, total fat 5 gm (7% daily value; saturated fat 1 gm), cholesterol 0 mg, sodium 15 mg (0%), total carbohydrate 2 gm (dietary fiber 2 gm, sugars 0 gm), protein 12 gm. Iron 15%, calcium 6%. Percent daily values are based on a 2,000 calorie diet.

New Product–Documentation: Product with Label purchased at Trader Joe's in Concord, California. 1998. Feb. 14. 5.75 by 4.75 inches. Black, white, dark green, and yellow on clear plastic film. "Perishable. Keep refrigerated. No preservatives." SKU# 020261.

Soyfoods Center taste test: Delicious. A very innovative and economically priced product. Talk with Gary Stein. 1998. March 4. He says this product was introduced 3 years ago.

10805. *Tufts University Diet and Nutrition Newsletter.* 1995. Scientists spotlight phytoestrogens for better health. 12(2):3-6. Feb.
• ***Summary:*** This article, which discusses the health benefits of phytoestrogens in detail and portrays soy in a very favorable light, contains a 3/4- page sidebar titled "Is there soy in your future?" Breast cancer is the number two killer of women in America and prostate cancer is the number two killer of men. Some scientists now believe that both men and women can take the same step to reduce their risk of succumbing to these diseases–change their diets to include phytoestrogens. This change of diet will probably also have a profound effect on menopausal symptoms such as hot flashes and mood swings. There are several classes of phytoestrogens: Isoflavones (which "are especially prominent in soy–apparently the most potent food in terms of its estrogen-like effects on the body"), coumestans, and lignans.

"Understanding the hypothesis behind the protective effects of the phytoestrogens in soy and other foods can be a bit tricky, especially when it comes to women, because it relies on seemingly contradictory concepts that have to do with whether a woman is pre- or postmenopausal."

The sidebar on soy discusses tofu, tempeh, and miso.

10806. Viana Naturkost GmbH. 1995. Viana sound [Viana sound (Poster)]. Euskirchen-Kuchenheim, Germany. 1 p. 42 x 30 cm.
• ***Summary:*** A large and very stylish color poster with a largely black background. It sounds like healthy enjoyment. Fell free from cholesterol, yeasts, and too much fat. The following products are shown (left to right), all in glass jars or bottles: Barley Miso. Brown Rice Miso. Organic Tamari. Organic Shoyu (both in tall, elegant, long-necked black bottles). Eight spreads: Toto (Tomato Tofu), Chickpea, Miso Cucumber, Peanut-Tofu, Tofu & Garden Vegetables, Inka (Tofu & Amaranth), Tempeh Temptation, and Fumé (Smoked Tofu). Address: Willi Graf Str. 88, 53881 Euskirchen-Kuchenheim, Germany. Phone: 02251-56076.

statement, company overview, list of products currently sold, and product fact sheets (News release). 1990 N. 57th Court, Boulder, CO 80301. 12 p. Feb.
• ***Summary:*** "White Wave's mission is to creatively lead the full integration of healthy, natural, vegetarian foods into the average American diet. Our interest is in promoting the use of foods we consider the world better off with, rather than without."

"What do you call a man who started a company in a bucket 17 years ago and grew it into an $8 million business?" White Wave employs over 60 people and has the capacity to produce 13 million pounds of tofu per year.

White Wave has nine product lines: Tofu (4 products), baked tofu (7), tempeh (5), veggie burgers (5, four made from tempeh), Dairyless soy yogurt (8), prepared foods–meat substitutes (8), seitan (3), heat and serve (1), and Soya A Melt soy cheese (6 flavors). Address: Boulder, Colorado. Phone: 303-443-3470.

10808. **Product Name:** Smoked Tofu Pâté.
Manufacturer's Name: Wildwood Natural Foods.
Manufacturer's Address: 1560 Mansfield Ave., Suite D, Santa Cruz, CA 95062. Phone: 408-476-4448.
Date of Introduction: 1995. February.
Wt/Vol., Packaging, Price: 6.5 oz. Retails for $3.29.
How Stored: Refrigerated.
New Product–Documentation: Wildwood Natural Foods price list. 1995. Jan. 9.

10809. Krizstan, Jan. 1995. Re: Work with seitan and soyfoods in Slovenia. Letter to William Shurtleff at Soyfoods Center, March 1. 2 p. Typed, with signature.
• ***Summary:*** Jan phoned on 6 January 1995, then wrote a long letter dated March 1. His first name is pronounced "Yan." He was born in 1967 in Ljubljana, the capital of Slovenia, where he now lives. He worked for two years on Slovenian television, then in 1992 he quit because of unhealthy working conditions. He had already been a vegetarian for 2 years and he knew that many people are looking for and need healthy food, but they don't know how to get it. So he started a small private company named "Izvor" ("The Source") and in Sept. 1992 started (together with friends) to publish a magazine in Slovenian titled *Bio Novice* ("Bio News") that would connect these people. The main subjects were growing plant foods in accordance with Nature, healthy diets, ecology, alternative medicine, and the culture of peace and non-violence. "It was very difficult, because we started with almost no money, but we published 15 issues of *Bio News.* In December 1994 we had to stop publishing because of big financial problems.

"One of my friends [Vesna Crnivec] translated some paragraphs from *The Book of Tofu* about preparing home made tofu and made an article. We published her translation, a summary of the Introduction, and some of Akiko's illustrations in one of the first issues of *Bio News* (See issue 5/6, letnik 1993, p. 40-44). Some readers (especially women) showed great interest in it! Later I translated some paragraphs from *The Book of Tofu* and published them (together with Akiko's good illustrations) in issues 14 and 15 of *Bio News.* At the end of the article I gave the address of Soyfoods Center for all people interested in ordering your books.

"Last year I was attracted to making seitan and tofu from organic wheat and soybeans. Mr. Mirko Trampus is my very good friend. He has an organic farm in Metlika (1 km from the border with Croatia, in southeastern Slovenia). He has been growing wheat, soybeans, and daikon organically for the last 6 years with very good results. We decided to make a kitchen in his house for transforming Mr. Trampus' soybeans, wheat and daikon into tofu, tempeh, natto, soymilk, seitan and pickled daikon.

"A few days before New Year 1995 I visited all Ljubljana's bookshops, because I wanted to find some information about tofu and seitan. What a surprise! There was your *Book of Tofu.* I found it once again and bought a copy. I was so happy. Not far away I found the book *Cooking with Seitan* by Barbara and Leonard Jacobs, with a foreword by Aveline Kushi.

"Now (at the end of February 1995) we are making about 50 kg of seitan per week by hand. We sell it in some 20 healthy food shops all over Slovenia." He would like to start making tofu, soymilk, natto, and tempeh, Later he would like to make miso too. "Our aim is preparing 100% vegetarian foods of the highest possible quality, made from organically grown soybeans, wheat, and daikon. Now we need more information. Presently Mr. Trampus grows about 12,000 kg of wheat and 9,000 kg of soybeans per year. Prof. Spanring is our good friend. He helped Mr. Trampus to choose the best varieties of soybeans for making tofu and the wheat with the highest gluten content for seitan. Now we use hard winter wheat. We mill it into flour in our own mill with stones. From 100 kg of wheat flour we get about 23 kg of very dark brown seitan.

"Up until now, all of the starch has been rinsed by hand, but we have constructed an automatic rinsing machine which will be prepared for use very soon. We presently rinse using only warm water at about 30ºC. We discard all the starch (putting it on compost heaps on the fields), but later we will use it as an ingredient in cooked soymilk puddings."

Jan would like to order *The Book of Tempeh.* He is looking for a source of tempeh starter. Tempeh is largely unknown in Slovenia, but he would like to introduce it because it is a healthy food and tastes very good. Address: Mestni trg 22/1, 68330 Metlika, Republic of Slovenia. Phone: (386) 068 59 481.

10810. Walsh, James. 1995. Suiting foreign tastes: Designer foods being made to fit standards in Japan, world market.

© Copyright Soyinfo Center 2013

Star Tribune (*Minneapolis, Minnesota*). March 5.
• ***Summary:*** There is a growing demand for "designer" beans–a "value-added" product. Minnesota researchers (such as those at the University of Minnesota College of Agriculture) have developed, and Minnesota farmers are growing and selling, soybean varieties especially tailored for Asian niche markets. Proto soybeans are large-seeded, and high in protein, excellent for making tofu. They are often grown under contract with Asian companies. Minatto soybeans are a small-seeded variety, sold to the Japanese for making natto. Chico soybeans, also small seeded, are used to make soy sprouts.

According to John McLaughlin, an international trade representative in the Minnesota World Trade Office. One promising and rapidly expanding new U.S. market is for organic foods. U.S. domestic sales of organic foods have risen dramatically from about $178 million in 1980 to almost $2,000 million in 1993, according the *Natural Food Merchandiser* magazine. The Japanese alone pay more than $1,400 million a year for organic food, and that market has grown 80% a year for the past 5 years. Minnesota, which boasts 150,000 acres of organically certified cropland, is working hard to court these buyers.

Jim Orf, a professor and soybean researcher at the Univ. of Minnesota, notes that of the 20 to 30 soybean varieties developed by his university since the late 1970s, seven have been developed specifically for Japanese food use. In addition, private companies in Minnesota contract with Japanese buyers to develop and grow soybean varieties.

SunRich, a company in Hope, Minnesota, that grows soybeans and waxy corn for Japan, "also has developed edamame, the boiled green soybean that Japanese eat as bar snacks. But so far, U.S. versions of that food have not met Japanese taste standards." Allan Routh, a soybean farmer from New Richland, Minnesota, and part-owner of SunRich, grows 20-40% of his crop for export. He must work hard to meet the standards set by Japanese buyers, but the Japanese offer premiums of $0.25 to $1.50 per bushel.

10811. Storup, Bernard. 1995. Société Soy was acquired by Diétetique et Santé in July 1993, was renamed Nutrition et Soja, and is now located in Revel (near Toulouse) in southern France. Part I (Interview). *SoyaScan Notes.* March 6. Conducted by William Shurtleff of Soyfoods Center. [Eng]
• ***Summary:*** In 1993 Bernard was contacted by Diétetique et Santé, a big French manufacturer of health foods (founded in 1972), which wanted to buy his company, Société Soy. At the time Bernard's company was doing well financially and they had excellent equipment. But they had reached the maximum they could achieve in the health food market, and the only market into which they could expand was supermarkets.

First some background: In Sept. 1990 Société Soy had taken in an outside investor, a retired banker, who was wealthy and friendly man, and who invested as a private individual. In exchange for contributing cash funds to help in expansion and give the company more of its own capital (*fonds propre*), he was given ownership of 25% of Société Soy's shares. The banker also worked at the company one day a week as an accountant. At this time, the company was making money–but not that much.

In early 1991 Bernard had created the new and more neutral brand *Union Natur* to be used on all products sold in supermarkets by Société Soy. So Bernard was looking for a company with which he could work as a partner in entering this big new market.

In the late 1980s and early 1990s the Sandoz Group accelerated its expansion into the healthy/nutritional foods industry throughout Europe. The Sandoz Group is best known in Europe as a manufacturer of pharmaceuticals (its largest division) and chemicals (its second largest division). Sandoz's food/nutrition division is now its third largest. About 5-6 years ago Sandoz was involved in major pollution problems related to its chemical production. Sandoz, the big Swiss pharmaceutical company, was famous during the 1960s among young people in Europe and America as the manufacturer of LSD. From one viewpoint, this popular psychedelic started the counterculture revolution in the Western World, including the natural foods movement. One of the Sandoz Group's earliest acquisitions in the health food field had been the British-based Wander Co. In about 1987-88 the Sandoz Group bought the Céréal Co. Then on 1 July 1992 Sandoz bought Diétetique et Santé in Revel, France–which was renamed Nutrition et Santé on 1 Aug. 1994. Also on 25 Aug. 1994 the Sandoz Group purchased Gerber, the huge American manufacturer of baby foods (headquartered in Fremont, Michigan). Two months ago the Sandoz Group announced that it plans to sell its entire chemical division, with about 10,000 employees. Sandoz was a world leader in dyes. Money from the sale chemical division will be used to buy more companies in the field of food and nutrition. In the future, Sandoz plans to keep only its pharmaceutical and its food/nutrition divisions.

Dietetique et Santé was established in 1972 in Revel and that year they purchased the brand (registered trademark) Gerblé from a small company located near Lyons (French = Lyon) in France. So now Nutrition et Santé is the head of Sandoz nutrition branch in France. In addition, Sandoz has a nutrition division in every European country, with a major food company as head of that branch. Approximately 95% of the sales of these companies are to supermarkets, and only about 5% to natural- and health-food stores.

Although it is owned by the Sandoz Group, the company Nutrition et Santé is not well known by consumers. Yet its brands, trademarks and products are very well known–some all over Europe. These include Ovomaltine [Ovaltine], Céreal, Wander, Wasa (a Swedish bread, pronounced VA-sa), Gerblé, Nerjisport, and Isostar. The latter two products are non-protein sports drinks, rich in mineral salts, that

© Copyright Soyinfo Center 2013

replace electrolytes after exercise. They are now developing a product named Gerlinea (like Slimfast, a low-calorie diet powder or bars).

Nutrition et Santé is the leading company in the health food market in France. Sandoz-owned counterparts in other European countries include Sandoz-Spain, Sandoz-Italy, Eden in Germany, Reforma in the Netherlands, and Wander in the UK. They have 54% of the health food market in supermarkets in France.

So in July 1993 Bernard sold Société Soy to the Sandoz Group because he believed the sale would help the company to develop and grow. He stayed on as managing director and was given a great deal of independence and responsibility. Sandoz wanted to keep the acquisition fairly quiet so that retailers and consumers would not be concerned. Very little information about the deal appeared in the public press, except in the financial press. Before the sale, Société Soy was a corporation whose shares were owned as follows: Bernard Storup 35%, Jean de Preneuf 35%, the retired banker 25%, and the company's workers 5%.

After Société was sold, Nutrition et Santé owned 100% of the shares. Bernard and Jean had no difficulty at all giving up their share of ownership in the company they had started in 1982. Nutrition et Santé had offered Bernard and Jean ownership in the company, but the latter two men felt the situation would be more clear if Nutrition et Santé owned 100%. "The world is big and life is short. Daily work is just as interesting as ever." Continued. Address: Managing Director, Nutrition et Soja, Z.I. de la Pomme, B.P. 33, 31250 Revel (near Toulouse), France. Phone: +33 62.18.72.50.

10812. Storup, Bernard. 1995. Société Soy was acquired by Diétetique et Santé in July 1993, was renamed Nutrition et Soja, and is now located in Revel (near Toulouse) in southern France. Part II (Interview). *SoyaScan Notes.* March 6. Conducted by William Shurtleff of Soyfoods Center. [Eng]
• ***Summary:*** In August 1994 Bernard moved the company from Saint-Chamond to Revel, near Toulouse in the south of France and on 1 Aug. 1994 the company name was changed from Société Soy to Nutrition et Soja (pronounced nu-tree-SYON et so-ZHA). On the same day the name of Dietetique et Santé was changed to Nutrition et Santé. Nutrition et Soja still uses *Soy* as their trademark for products sold at health food shops; this trademark is very widely known among health food consumers in France. "Remember that 'Soy' doesn't mean anything in French." The water in Revel is of excellent quality, just like the water in Saint-Chamond. In Revel, Nutrition et Soja gets its water from another natural park.

Bernard's company is now located only 500 meters from another factory owned by Nutrition et Santé that makes Gerblé brand products–such as organic cookies, cereals, etc. The Céréal brand products are made at a factory in Annonay, 500 km from Revel.

Bernard's company moved into a completely new factory, with an integrated production line from dehulling to packaging in Tetra-Pak cartons. It is really a big installation. The company has not introduced many new products since it was acquired 18 months ago. Bernard has been working a lot with companies in Germany, Spain, the Netherlands, and Italy which have been selling soymilk made typically by Alpro in Belgium or Innoval in France. But Innoval went out of business and no longer exists. They declared bankruptcy twice, first in 1993 and again in late January 1995. In 1993 an investor bought Innoval for almost nothing, invested a little money in it, but was not able to make it survive. Nutrition et Santé bought all of Innoval's equipment (made by Alfa-Laval; it was very nice), and Bernard is now using some of this equipment (including a large, automatic Buehler dehulling system) and some of the equipment he had before in Saint-Chamond. And Bernard has been working with their former soymilk customers in hopes of becoming their supplier of soymilk. Most of Bernard's sales have always been to health food stores under the *Soy* trademark. This has not changed since the acquisition. Bernard estimates that he has at least 80% of the fresh soyfoods market in France–not including soymilk.

The soymilk market continues to grow, but there is still excess soymilk manufacturing capacity. Nutrition et Soja is now the leading soymilk manufacturer in France, and they may be the second largest in Europe after Alpro–though they are much smaller than Alpro, which sells about 25 million liters of soymilk and soy desserts each year. Alpro has five Tetra-Pak packaging lines, including one that packs in 500 ml (half liter) cartons.

Nutrition et Soja doesn't compete much with Alpro because Nutrition et Soja sells its soymilk under its own trademarks–Céréal and Gerblé–in supermarkets all over Europe. There is not much difference between these two products, but because they used to be made by two different companies, different consumers have loyalty to each brand. For the health food market, Nutrition et Soja sells its soymilk under the BioSoy trademark, which was first used in 1990 by Société Soy.

Jean de Preneuf is still with the company, working as technical manager. Bernard is in charge of the total company Nutrition et Soja, in charge of production, administration, sales, and marketing. Bernard is very happy with his new parent company, which gives him lots of independence and responsibility, and which is doing a very good job at thinking in terms of the new integrated European market. One of the products with which Bernard is especially happy is their vegetarian sausage–which is 100% organic.

Thirteen years ago Société Soy registered and owned the trademark "tofu." But recently Bernard came to feel that this was not "fair play," so he gave ownership of the trademark to SOJAXA (pronounced so-zhak-SAA), the French soyfoods association. Address: Managing Director, Nutrition et Soja,

10813. Lang, Paul. 1995. HiPro Food Products (Minnesota), Clofine, and Devansoy (Interview). *SoyaScan Notes.* March 8. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Paul is looking at buying a company name HiPro Food Products in Minnesota. This company has a patent on an indirect roasting process. The two men who own the company are both in their late '70s, and they have not marketed their product well. Most of their business has come from recommendations from Peter Golbitz. They also make enzyme-active full-fat soy flour, which they sell to companies such as Clofine and Devansoy. They dehull the bean then use the new technology of spray drying or flash drying to go straight to tofu powder and soymilk powder. Paul is thinking about by-passing the expensive spray-drying or flash-drying process and going straight into a soymilk processing equipment. Their full-fat soy flours are sold most to companies that make waffles, pancake mixes, etc. They use organically grown soybeans. They sell roughly $24,000 a year of product to Clofine, which starts with an enzyme-active full-fat soy flour. Clofine takes the raw materials to a dairy, where it is boiled to inactivate the enzymes. Then they spray-dry it. The particles are so fine there is no need to make soymilk. So they by-pass the filtration step.

Note: As of Aug. 1994 HiPro Food Products, Inc., was located at 775 Colorado Ave. South, Minneapolis, Minnesota 55416. Phone: 612-545-0151. Robert F. Cross, President. Their manufacturing plant is in New Germany, Minnesota. They make soy fiber, soy flour (full fat), and soy grits. Address: Natural Products Inc., Grinnell, Iowa. Phone: 515-236-4635.

10814. Drosihn, Bernd; Hess, Albert. 1995. The three largest tofu manufacturers in Germany. And a new tofu company (Interview). *SoyaScan Notes.* March 11. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The biggest tofu manufacturer in Germany is now Life Food GmbH [Taifun-Produkte] in Freiburg; their brand is Taifun. Almost the same size is Viana Naturkost (owned and run by Bernd Drosihn) in Euskirchen-Kuchenheim. Third largest is Das Tofuhaus (owned and run by Albert Hess) in Lautersheim.

In March 1994 Bernd and Albert established a new tofu company named Sojarella, Hess und Drosihn, Gbr. [Gbr. = Gesellschaft Bürgerlichen Rechts], at 53881 Euskirchen-Kuchenheim (the location of Viana). Their first product, launched in March 1994, was Tofutissimo (with Mountain Herbs, or Plain); it can be used as a spread for bread or can serve as the basis for dressings, sauces, etc.

Their 2nd product, launched in March 1995, was Tofrutti, a soy yogurt (*Sojajoghurt*), in Peach, Cherry, Muesli, Forest Berries, Apricot, or Natural flavors.

Albert and Bernd are equal owners of the new company and they do not compete with one another. Albert is in charge of manufacturing and Bernd is in charge of marketing. They plan to make alternatives to dairy products. Address: 1. Founder and president, Viana Naturkost GmbH, Willi Graf Str. 88, 53881 Euskirchen-Kuchenheim, Germany; 2. Founder and President, Das Tofuhaus, Hauptstrasse 13, D-6719 Lautersheim, Germany. Phone: 02251-56076.

10815. Hess, Albert. 1995. A brief history of Albert's Tofuhaus (Interview). *SoyaScan Notes.* March 11. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Albert was one of the founders of this company in June 1983; it was originally named Tofurei Rittersheim, and located in Rittersheim, Germany. In Oct. 1985 the company moved to Tiefenthal and was renamed Tofuhaus Tiefenthal. In August 1987 the company moved for a third time, this time to Lautersheim, and was renamed Das Tofuhaus. Lautersheim is a small town in southwestern Germany in the state of Rhineland-Palatinate, a little northwest of Grünstadt. In 1989 the company, still in Lautersheim, was renamed for a fourth time to Albert's Tofuhaus.

Albert now makes 12-15 products, especially tofu, tofu spreads, and tofu burgers. He works closely with Bernd Drosihn, owner of Viana, and some of the products sold in Albert's catalog are made by Viana. Address: Founder and President, Das Tofuhaus, Hauptstrasse 13, D-6719 Lautersheim, Germany. Phone: 02251-56076.

10816. Gruenwald, R. Jay. 1995. Update on The Simple Soyman, The Bountiful Bean, Long Life Foods in Minnesota, and Kyoto Food Corp. (Terre Haute, Indiana) (Interview). *SoyaScan Notes.* March 13. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Jay has been with The Simple Soyman for 12 years. On 23 Sept. 1994 The Simple Soyman bought The Bountiful Bean, moved it from Ridgeway to Milwaukee, and merged it into The Simple Soyman. In Dec. 1994 he moved the new larger company to a new address: 3901 North 35th St. (P.O. Box 16677), Milwaukee, Wisconsin 53216. Phone: 414-444-TOFU. Simple Soyman still produces Hummus and Taboolie [both contain tofu], tempeh, and tofu under the Bountiful Bean brand. The Simple Soyman will continue to make its Deepockets (Calzone-style [Italian] and Empanada-style [Mexican]; both contain frozen tofu), dips, spreads, etc. Most are made with soy. The company does a lot with frozen tofu, using it in place of TVP, which causes intestinal gas. The business is still struggling, "but hopefully with the addition of The Bountiful Bean business and distribution in Madison, we'll get going. Being in this for 12 years now, we've got to start making a living at it pretty soon. Basic tofu is still not very profitable. We started working out of the Magic Bean's kitchen with one product. When they went

© Copyright Soyinfo Center 2013

bankrupt we basically bought their equipment and moved to 4877 N. Green Bay Ave., Milwaukee, Wisconsin. The building we are in now is 4,500 square feet. The factory is nicely laid out."

R. Jay has heard from a packaging company that a new tofu company named Long Life Foods is scheduled to start in Perham, Minnesota. They are said to be using a special type of package (not water pack) which gives the tofu a very long shelf life.

Kyoto Food Corp. (KFC) in Terre Haute, Indiana, declared bankruptcy in about May or June 1994. He heard that KFC had a verbal agreement from a big chain like Kroger to carry their tofu, then Azumaya, which was the brand Kroger was carrying, lowered their price. So Kroger stayed with Azumaya and that dealt the death blow to KFC [not true; see March 1995 interview with William Roach]. They were trying to sell their building and plant (which they owned and designed to make tofu) for about $1.3 million. He thinks that the company was run by a couple, an American man and a Japanese woman [William and Toni Roach]. Bruce Rose is thinking of buying the company. Address: Owner, The Simple Soyman, 3901 North 35th St. (P.O. Box 16677), Milwaukee, Wisconsin 53216. Phone: 414-444-8638.

10817. *Farm Talk* (*Parsons, Kansas*). 1995. Missouri Soybean Council teams with Dept. of Ag for soy food promotion. March 15.

• ***Summary:*** The Missouri Soybean Merchandising Council is teaming up with the Missouri Department of Agriculture and the AgriMissouri program to bring soyfoods, such as soy flour and tofu, to consumers throughout the state. Susie Oberdahlhoff is director of promotion / education for the soybean group in Jefferson City. She believes the campaign will achieve two main goals. "First, it will educate consumers about the benefits of eating soy and how they can get soyfoods into their diet." Second, it will highlight the importance of soybeans in the state of Missouri.

"'We want to visit as many towns in Missouri as possible this year. By providing samples and answering questions on soy, we hope we can influence people to purchase soyfoods,' said Oberdahlhoff. So far soyfood promotions have been held in Jefferson City, Columbia, and Mexico, Missouri. The Missouri Soybean Merchandising Council will be planning in-store activities in dozens of communities well into summer." For more information call the Council, toll free, 1-800-MO-BEAN.

10818. Roach, William. 1995. The rise and fall of Kyoto Food Corp. in Terre Haute, Indiana (Interview). *SoyaScan Notes.* March 16. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** In about Dec. 1993 Kyoto Food Corporation (KFC) stopped making tofu and ceased all operations. At that time they were making about 57,000 lb/month of tofu. William estimates that roughly 70% of their customers were Asian Americans. They delivered their tofu using their own delivery vehicles–to ensure freshness and give better access. They did not declare bankruptcy and no bills were left unpaid. Their plant, which was built specifically for making tofu, has been standing idle, with all the equipment in place, for about 18 months.

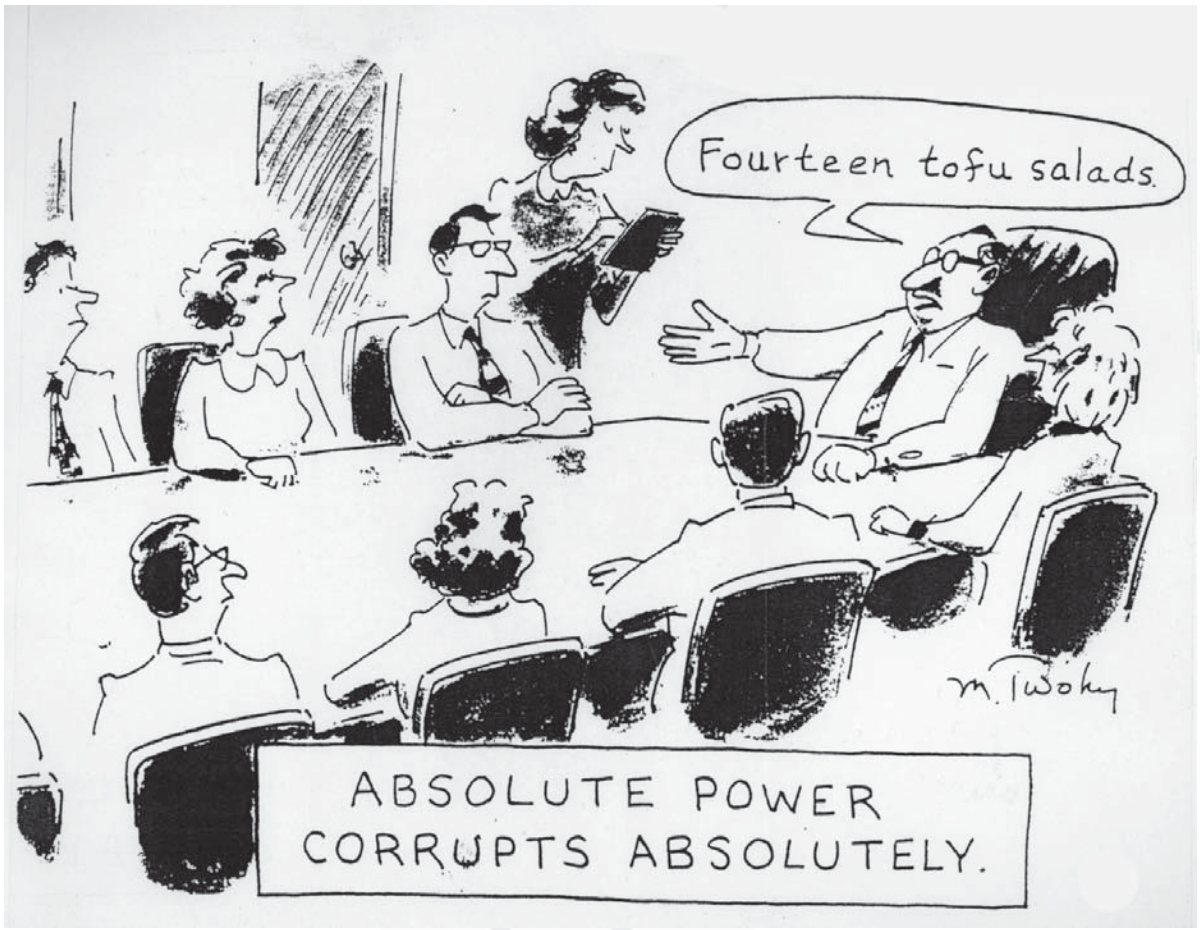
KFC was one of the first big tofu manufacturers in the Midwest. There were three main causes for the company's failure: First, a severe cash flow problem experience by their Japan-based parent company, Kyoto Koseikai, which owns a supermarket chain in Japan and also owned 90% of KFC. Kyoto Koseikai invested heavily in land in Japan. But during a 2-month period of economic hardship, this land lost one-third of its value on paper. When Japanese banks called in loans from Kyoto Koseikai, they were squeezed. So the ultimate cause was the loss of land value and the banks in Japan. The Kobe earthquake was only peripherally related.

Second, they had made a big mistake in hiring a so-called "marketing expert" named Robert Mattix, and paying him big money. Mattix went to school at Michigan State University in East Lansing, had good-looking credentials, and laid out big plans to reposition the company's products, etc. He turned out to be a con artist, who has pulled this same trick on at least 4 other companies, using the same lawyer to draft his employment contract. Robert gave away a lot of tofu, but sold little. William has learned that it is very difficult to get accurate background information on high-paid executives. Former employers of employees that were unsatisfactory are afraid to talk because of fear of a lawsuit from the employee. When William finally realized what was happening and fired Mattix, Mittix turned around and sued KFC (as was his pattern to do) for breach of contract. This man cost KFC $290,000, but even more important, he cost them one year of lost time. When Mattix left, William took over as sales manager.

Third, the policies of the company were dictated by Japanese who did not understand the American market very well. For example, for the first year, KFC was allowed to make only one product, fresh water-packed tofu. It was sold in a 12-oz size, when 16 oz would have been better. The local Japanese manager, Mr. Yamashita, refused to do any private labeling, which could have greatly expanded sales. Mr. Yamashita left 6 months before the company stopped production.

Since the company stopped production, there have been two serious buyers. Kyoto Koseikai has set the selling price for the plant in Terre Haute at $900,000 and will not negotiate for a lower price. The first potential buyer was a Mr. Park, a Korean-American who own as big tofu company named Obok Foods in Southern California. The second was a group of Chinese who have a joint venture with Bruce Rose of Tofu International Ltd. They already make tofu together in

© Copyright Soyinfo Center 2013



Ann Arbor, Michigan. William feels there is a good chance that the factory in Terre Haute will be sold; he would like to get back in the business if possible. His wife Toni (Setsuko) who is Japanese-American was actively involved in the day to day operations of Kyoto Foods; among other things, she translated most of the Japanese-language correspondence. Address: Terre Haute, Indiana. Phone: 812-533-1400.

10819. Twohy, Michael. 1995. Fourteen tofu salads (Cartoon). *New Yorker.* March 20. p. 80.
• ***Summary:*** A authoritarian, powerful-looking man wearing a mustache and glasses is seated at the head of a table surrounded by other serious-looking people, as at a board meeting. He gestures to his secretary, who is standing nearby with notepad ready, and orders "Fourteen tofu salads." The caption in large letters below the cartoon reads: "Absolute power corrupts absolutely." Address: New York.

10820. Fischer, Bruno. 1995. Brief history of Bruno Fischer GmbH (Interview). *SoyaScan Notes.* March 22. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** For several generations, back to his great-great grandfather, his family has been butchers. They owned and ran a meat company named Bruno Fischer Natural Foods. His father started a butcher shop in 1960, but in 1968 his father developed cancer. His father changed his lifestyle, learned about the Bible, and they became Seventh-day Adventists. First they stopped selling pork, and they moved their company toward vegetarianism. Then the company split into two parts, one vegetarian and one the traditional meat products.

In 1976 they introduced their first vegetarian products, which were spreads for breads based on grains, beans, etc. The company's first product containing soy was introduced in 1978; named WieLeberwurst ("Like Liver-Sausage") it was a rather "unspectacular product" made from a mixture of grains and beans, and containing less than 30% of cooked, ground soybeans. In the summer and fall of 1979 Bruno visited Worthington Foods in Ohio. Near the end of the same trip, on 7-8 Oct. 1979 he visited Shurtleff and Aoyagi at Soyfoods Center in Lafayette, California.

Starting in 1976, the company made meat products in the morning, then cleaned up the factory and made vegetarian products in the afternoon. All this took place at their one plant in Cologne. In about 1985 they stopped this system. Interestingly, the vegetarian business had grown so fast that the company could not keep up with the demand. So they rented an old bakery in Cologne and in it they started more automated production of their vegetarian products. In 1987-88 the company opened a new plant in Aetorf for

© Copyright Soyinfo Center 2013

making vegetarian products, but they kept their meat plant in Cologne. They are now in the process of selling off the meat company to their former employees. Formerly they sold off the part of the business which sold meat products by mail order to the people who ran it.

He still has a desire to eat meat, and he prefers not to eat the products made by Worthington Foods and DE-VAU-GE because they do not comply with his idea of healthy, whole foods. His dream is to make whole/wholistic (*Vollwert*) meat alternatives. He feels it is hard to make these products without using wheat gluten, but he would prefer not to use gluten because of problems with allergies. Address: Im Auel 88, 53783 Aetorf, Germany. Phone: 49-2243-4021.

10821. Goh, Francis Nyang Kuang. 1995. The tofu industry and market in Singapore. Suitability of various soybean varieties for making tofu. Paper presented at meeting of Canadian outgoing soybean mission and Singapore tofu makers. 4 p. Typewritten.
• ***Summary:*** "As you will be visiting some soybean importers this afternoon, I would take this opportunity to concentrate mainly on the technical aspects of soybean. There are 40 plus tofu makers in Singapore producing a wide variety of tofu products, such as soft or silken tofu, firm and extra-firm tofu, tofu puff, soymilk and sweet tofu. The market for soybean-based food products, particularly tofu, is growing rapidly due to its nutritious value. However competition is very keen in our line of business." Therefore we need to produce high quality products.

Mr. Goh tested six varieties of soybeans: S 20-20, Marathon, Hypro, Orient Pearl (Harovinton), Dominator, and Vinton. He summarizes the results in a table which evaluates each variety for tofu production in terms of 5 variables: Texture, firmness, fragrance, colour, yield of tofu, plus remarks. Overall, Harovinton gave the best results, but the price is 12% above the standard price. Discusses his specifications for an outstanding soybeans for making tofu and issues related to identity preservation. Address: Managing Director, Unicurd Food Co. (Pte.) Ltd., Blk. 6020 Ang Mo Kio Industrial Park 3, #01-154/156/158/160, Singapore 2056. Phone: 482-5454.

10822. Azevedo, Chris; Gallagher, Paul. 1995. Trends in Japan's soybean market. Paper presented at a conference titled "Producing Soybeans for the Soyfoods Market." 8 p. Held 2 March 1995 at Ames, Iowa. [6 ref]
• ***Summary:*** The pages and most tables in this report are unnumbered. One table shows per capita annual consumption (in lbs) of soybeans in selected Pacific Rim countries in 1974, 1984, and 1994, as follows, in descending order of pounds consumed per capita in 1994: Indonesia: 9.2, 14.0, 23.2. South Korea: 21.4, 18.8, 20.1. Japan 11.0, 15.3, 16.7. North Korea: 11.8, 12.2, 11.2. Malaysia: 2.9, 5.2, 10.3. China: 14.7, 13.0, 9.7. Thailand: 1.2, 3.9, 3.9. Philippines: 0.4, 0.5, 0.8. Sources: (1) USDA; (2) U.S. Bureau of the Census, World Population Profile, 1994 and 1984; (3) Statistical Yearbook, Statistical Office of the United Nations, New York, NY.

Another table shows annual soybean consumption in million metric tons in 1974, 1984, and 1994, as follows, in descending order of amount consumed in 1994: China: 5.237, 6.193, 5.350. Indonesia: 0.546, 1.072, 2.105. Japan: 0.716, 0.830, 0.950. South Korea: 0.328, 0.358, 0.410. North Korea: 0.083, 0.109, 0.117. Thailand: 0.023, 0.092, 0.105. Malaysia: 0.015, 0.036, 0.090. Philippines: 0.007, 0.013, 0.025. Source: USDA.

A final table shows the amount of soybeans used (in thousand metric tons) in Japan, by product and total, each year from 1978 to 1993, as follows: Use of soybeans for tofu rose from 486 in 1978 to a peak of 531 in 1984, falling to 492 in 1993. Use for natto rose from 71 in 1978 to a peak of 109 in 1993. Use for miso rose from 182 in 1978 to a peak of 185 in 1980, falling to 173 in 1993. The total rose from 750 in 1978 to a peak of 927 in 1992, falling to 920 in 1993. Address: Iowa State Univ. Phone: 515-294-0160.

10823. Barr, Susan Learner. 1995. Don't overdo the tofu. *Longevity* (*New York, NY*). March.
• ***Summary:*** In recent years cancer research has focused on isoflavones, such as daidzein and genistein, "found in abundance in soy." That, in turn, has increased the demand for soy products such as tofu and soy beverages. There is even talk of isoflavone supplements. But since isoflavones are weak estrogens–which counter the effect of natural body estrogens–some experts have become concerned about the potential side effects on women of childbearing age of a diet high in soy and other phytoestrogens (plant estrogens).

At Emory University in Atlanta, Georgia, Patricia Whitten, PhD, found that among the offspring of rats fed large amounts of phytoestrogens from bean sprouts, sunflower seeds and red clover, the females were unable to ovulate and reproduce, while the males' sexual performance was impaired. Whitten thinks that these findings warrant studies on the effects of phytoestrogens on humans.

Whitten and other researchers are not questioning the value of adding nutritious soy products to the diet in moderation–say, one serving a day. Address: R.D.

10824. **Product Name:** Soy Miracle Ultimate Shake (Chocolate Royale, Creamy Vanilla Almond).
Manufacturer's Name: FreeLife International.
Manufacturer's Address: 354 Woodmont Rd., Suite 5, Milford, Connecticut 06460. Phone: 1-800-882-7240.
Date of Introduction: 1995. March.
Ingredients: Ultra Soy Complex I (Trademark) {An exclusive blend of Supro brand soy protein isolate, soy fiber, soy lecithin, tofu powder, soy flour, tamari soy powder, miso powder, & Cholestatin (Trademark) (mixed soy

phytosterols)}, crystalline fructose, complex carbohydrate (maltodextrin), Dutch cocoa powder, natural flavors, xanthan gum, oat fiber, calcium phosphate, magnesium oxide, potassium chloride, siberian ginseng, ascorbic acid, inositol, choline bitartrate, blue-green micro algae, L-carnitine, vitamin E acetate, Spanish bee pollen, apple pectin, citrus bioflavonoid, niacinamide, zinc oxide, invertase (plant enzyme), ferrous fumarate, D-calcium pantothenate, vitamin A palmitate, manganese sulfate, pyridoxine hydrochloride, riboflavin, thiamine hydrochloride, bromelain, papain, folic acid, biotin, vitamin D-3, potassium iodide, chromium, picolinate, sodium selenate, sodium molybdate, cyanocobalamin.

Wt/Vol., Packaging, Price: 15 oz (240 gm).

How Stored: Shelf stable.

Nutrition: Per one level scoop (14 servings per container): Calories 95, calories from fat 0, total fat 0 gm (0% daily value; saturated fat 00 gm), cholesterol 0 mg, sodium 150 mg (6%), potassium 150 mg (4%), total carbohydrate 16 gm (dietary fiber 2 gm, sugars 10 gm), protein 10 gm. Vitamin A 100%, vitamin C 100%, vitamin B-1 100%, vitamin B-2 100%, vitamin B-6 100%, vitamin E 100%, niacinamide 100%, pantothenic acid 100%, folic acid 100%, biotin 100%, vitamin D-3 100%, vitamin B-12 100%, calcium 30%, phosphorus 20%, magnesium 20%, iron 25%, zinc 100%, iodine 100%. Percent daily values are based on a 2,000 calorie diet.

New Product–Documentation: FreeLife leaflet. 1995. "FreeLife: Experience the incredible benefits of FreeLife's exclusive Soy Miracle products." "The cornerstone of the Soy Miracle Ultimate Body Program is the fat-free Ultimate Shake. The Ultimate Shake was specially designed to be a great-tasting source of many important nutrients needed to achieve optimal health and to help decrease excess body fat when used as part of the complete Soy Miracle Ultimate Body Program.

"Dr. Mindell's exclusive formula, Ultra Soy Complex I, contains eight of the most powerful soy foods synergistically combined to create the ultimate nutritional shake. These soy foods include the world's best soy protein isolate, soy fiber, soy lecithin, tofu powder, soy flour, tamari powder, miso powder, and mixed soy phytosterols. The Ultimate Shake also contains blue-green micro-algae, Siberian ginseng, Spanish bee pollen, and active enzymes [from the soy flour?] for better absorption.

"The Soy Miracle Ultimate Shake can be used as a complete meal replacement or healthy snack and provides 100% of the USRDA of all essential vitamins and most minerals. For maximum fat-loss results, replace one or two meals each day with a delicious Soy Miracle Shake and eat at least one well-balanced meal. Increase your daily physical activity and supplement your diet with FreeLife's Soy Miracle Ultimate Antioxidant and Ultimate Body Toner."

Label for Chocolate Royale sent by Carolyn Ashman of Napa, California. 1995. May 15. She is a FreeLife distributor. Phone: 707-259-9459. "Directions: As a dietary supplement, add one level scoop (scoop included in can) of Soy Miracle Ultimate Shake (TM) to 8 fl. oz. of skim milk or Westsoy nonfat soy milk and blend or shake until smooth. For best flavor, milk should be very cold. For maximum results" the shake should be used together with the two other products in this line and "the complete Soy Miracle Ultimate Body Program (TM)."

Talk with Luke Taffuri, Vice-President of Operations, FreeLife International (354 Woodmont Rd. #5, Milford, Connecticut 06460. Phone: 1-800-882-7240). 1995. May 30. To buy these products, you must be sponsored by a distributor. Cost: $61.25 for all 4 products incl. shipping. Each can of shake is $18.55. Antioxidant is $19.60. Body toner is $18.55. How much genistein is in these products? If each day you take one serving of a shake and two antioxidant pills plus two body toner pills, you will get 20 mg/day of genistein, plus 16-17 mg/day of daidzein. These products were introduced on 1 Feb. 1995, at the same time as Dr. Mindell's book became available. The company, FreeLife, was started in 1995.

Talk with Karma McLleskey of Fairfax Station, Virginia. 1995. Aug. 18. Luke Taffuri runs the computers at Freelife. The people who know the most about the products are Ray Faltinsky (president) and Kevin Fournier (vice president).

10825. Furuhata, Hideki. 1995. Japanese soyfoods markets. Paper presented at a conference titled "Producing Soybeans for the Soyfoods Market." 9 p. Held 2 March 1995 at Ames, Iowa.

• ***Summary:*** This paper consists of nine very interesting statistical tables, one on each page. Table 1 shows the supply and demand for soybeans in Japan from 1984 to 1992 (in tonne = metric tons). The supply of Japanese-grown soybeans decreased from 126,000 tonnes in 1984 to a low of 73,000 tonnes in 1992, and imports increased from 4,401,000 tonnes in 1984 to 4,725,000 tonnes in 1992. The demand for soybeans from crushers has stayed about steady, ranging from a low of 3,428,000 tonnes in 1991 to a high of 3,928,000 tonnes in 1985. Demand for food uses has increased from 786,000 tonnes in 1984 to a high of 927,000 tonnes in 1992 (up 18%). Demand for use as feed has increased from 55,000 tonnes in 1984 to 95,000 tonnes in 1992.

Table 2 shows soybean utilization in Japan by type of food product from 1987 to 1994: Use of soybeans for tofu and aburage stayed about steady at 498,000 tonnes, by far the largest food use. Use for miso decreased slightly from 180,000 tonnes in 1987 to 170,000 tonnes in 1994. Use for natto grew strongly from 97,000 tons in 1987 to 110,000 tonnes in 1994. Use for kori-tofu (dried-frozen tofu) grew slightly from 29,000 tonnes in 1987 to 30,000 tonnes in 1994. Use for soy sauce grew strongly from 5,350 tonnes in

© Copyright Soyinfo Center 2013

1987 to a record 25,300 tonnes in 1992, dropping slightly to 23,000 tonnes in 1994. Use for soymilk decreased slightly from 4,000 tonnes in 1987 to 3,100 tonnes in 9994. Total use of soybeans for food in Japan grew slowly from 875,350 tonnes in 1987 to 930,000 tonnes in 1994 (up 6%).

Table 3 shows Japanese population and per capita consumption of soyfoods from 1982 to 1992. Population grew from 103,720,000 to 124,452,000 during this period, while per capita consumption grew from 6.8 to 7.4 kg/capita (up 8.8%).

Table 4 shows per family expenditures and consumption per year on tofu, natto, miso, and soy sauce from 1982 to 1992. For example, expenditures on tofu increased from 2,535 yen in 1982 to 7,992 yen in 1992, while consumption fell from 87.98 cakes to 79.26 cakes. Thus in 1992 the average Japanese family consumed 1 cake of tofu every 4.6 days.

Table 6 shows imports of soybeans for food from the USA, Canada, and China from 1982 to 1992. Imports from the USA are subdivided into IOM, Beeson, and other identified varieties. In 1992 about 88.7% of food-grade soybeans imported to Japan from the USA were IOM. Moreover, of all these soybeans imported for food use in 1992, about 76.6% came from the USA, 21.5% from China, and 1.85% from Canada.

Table 6 shows the amount spent per capita by people of different 5-year age-groups on four soyfood products. The average person in the age 60-64 year group spent ¥2,976 on tofu, ¥1,539 on miso, ¥1,490 on soy sauce, and ¥1,098 on natto. The average person in the age 30-34 year group spent ¥1,581 on tofu, ¥603 on miso, ¥508 on soy sauce, and ¥708 on natto.

Table 7 shows the source of soybean used to make four soyfood products in 1984, 1990, and 1992. In 1992, of the 498,000 tonnes of soybeans used in tofu and aburage in Japan, 74.8% of the soybeans were IOM from the USA, 6.0% were Beeson (USA), 8.0% were other U.S. varieties, 3.0% were from China, and 8.0% were grown in Japan. Of the 30,000 tonnes use to make dried-frozen tofu, 86.7% were IOM and the rest were from China. Of the 108,000 tonnes used to make natto, 55.5% were from the USA and Canada, 39.8% were from China, and 4.6% were grown in Japan. Of the 176,000 tonnes of soybeans used to make miso, 88.0% were from China, 5.7% were white-hilum beans from the USA, and 6.25% were grown in Japan.

Table 8 shows that production of soybeans in Japan from 1982 to 1994 has decreased sharply. In 1982 some 262,300 tonnes were produced on 147,000 ha with a yield of 1,782 kg/ha. In 1994 some 98,800 tonnes were produced on 26,500 ha with a yield of 1,620 kg/ha.

Table 9 is two charts showing the distribution system for (1) Imported soybeans from suppliers to end users, and (2) Domestic soybeans from farmer to end users. Farmers sell to the Zenno Nokyo or a collector. Address: Mitsui & Co. Phone: 515-294-0160.

10826. Golbitz, Peter. 1995. Traditional soyfoods: Processing and products. *J. of Nutrition* 125(3S):570S-572S. March. Supplement. First International Symposium on the Role of Soy in Preventing and Treating Chronic Disease. [9 ref]

10828. **Product Name:** Hot Mama's Large Garden Tofu Ravioli.
Manufacturer's Name: Hot Mama's Ravioli, Etc.
Manufacturer's Address: 1485 Gericke Road, Petaluma, CA 94952.
Date of Introduction: 1995. March.
Ingredients: Tofu, spinach, onions, carrots, garlic, miso, spices, salt, pepper.
Wt/Vol., Packaging, Price: 16 oz. paperboard box. Retails for $5.99 (3/95, California).
How Stored: Frozen.
New Product–Documentation: Product with Label purchased at Open Sesame in Lafayette, California. 1995. March. Paperboard box. 11 by 7¼ by 1 inch. Green and red on white. "Egg free. Dairy free. Oil free. No preservatives added. Carry flat. 24 ravioli."

10829. Iowa State University. 1995. Producing soybeans for the soyfood market: Conference schedule and registration (Leaflet). Ames, Iowa. 3 panels each side. Each panel: 22 x 9 cm.
• ***Summary:*** On Thursday, 2 March 1995, Iowa State University held a 1-day conference titled "Producing Soybeans for the Soyfoods Market" at the Holiday Inn Gateway Center, Ames Iowa. No proceedings were published. Schedule: Wednesday evening: Tour of Iowa State University's Pilot Plant and Center for Crops Utilization and Research. Soyfoods tasting reception follows at the Holiday Inn Gateway Center for conference registrants. Thursday. Morning session: Markets, trade, and policy. 8:30 a.m.–Welcome and introductions, by Lester A. Wilson.

© Copyright Soyinfo Center 2013

9:00–Japanese soyfoods markets, by Hideki Furuhata, Mitsui & Co. 9:45–Growth potential for soyfood beans in Asian markets, by Lester A. Wilson. 10:30–Break. 10:45–U.S. participation in soyfoods markets in the Pacific Rim, by Robert Neal, Agri-Grain Marketing. 11:30–Trade policy changes and opportunities, by Paul Gallagher. 12:15–Lunch. Afternoon session: Soybean varietal effects on soyfood quality. 1:30 p.m.–The effect of varietal characteristics on perceived soyfood quality, by Keisuke Kitamura, Chief, Legume Breeding Lab, MAFF [Ministry of Agriculture, Forestry and Fisheries], National Agricultural Research Center, 3-1 Kannondai, Tsukuba, Ibaraki 305, Japan. 2:15–Soybean breeder panel discussion, with Keisuke Kitamura, Walter Fehr (ISU), Dennis Strayer (Strayer Seeds), Tom Brumm (MBS Seeds), Clark Jennings (Pioneer Hi-Bred Intl.), Jerry Lorenzen (FTE Genetics). 2:45–ISU research presentations: (1) Soybean varietal and storage effects on tofu processing–Pilot plant study, by Lester A. Wilson and Patricia Murphy. (2) Rapid quality testing with near-infrared whole grain analyzers, by Charles Hurburgh. 3:30–Break. 3:45–Health benefits of soyfoods, by Mark Messina (American Soybean Association health consultant); Isoflavones in soybeans and soyfoods, by Patricia Murphy (ISU Dep. of Food Science and Human Nutrition). 5:00 p.m.–Closing comments and questions.

Conference sponsors: Midwest Agribusiness Trade Research and Information Center (MATRIC, Iowa State Univ.). Center for Crops Utilization Research (ISU). Utilization Center for Agricultural Products (UCAP, ISU). Iowa Soybean Promotion Board. MSGA/MSPRC (Minnesota Soybean Growers Assoc. / Minnesota Soybean Research & Promotion Council). Registration fee: $100 before Feb. 15, or $125 thereafter.

A five-page directory of the 74 attendees is attached. Address: Ames, Iowa.

10830. Lightlife Foods, Inc. 1995. Recipes for living the Lightlife: Delicious meatless alternatives to traditional American fare from Lightlife Foods, Inc. (Leaflet). Greenfield, Massachusetts. 8 panels each side. Each panel: 22 x 9 cm.

• ***Summary:*** In a playful, hard-to-read typeface, 16 pages of recipes using Lightlife products including Lightlife Lean Links Italian, Lightlife Fakin' Bacon, Lightlife Soy Tempeh, Lightlife Garden Vege Tempeh, Lightlife Three Grain Tempeh, Lightlife Wild Rice Tempeh, or Lightlife Savory Seitan.

On the rear inside cover: Our quality pledge. Where to find our products. Talk to us (toll-free number). Credits. Special thanks to.

On the rear cover is a new logo and the slogan "Live long. Travel light." Address: P.O. Box 870, Greenfield, Massachusetts 01302. Phone: 1-800-274-6001.

10831. **Product Name:** Silken Tofu (Soft, Regular, or Firm).
Manufacturer's Name: LongLife Foods, Ltd.
Manufacturer's Address: Box 180, Perham, MN 56573. Phone: 218-346-6667.
Date of Introduction: 1995. March.
New Product–Documentation: E.M. Morrison. 1995. Ag Innovation News. July. p. 1, 4-5. This company is run by James W. Skiff (financial and marketing) and Shichiro Sato (production).

Talk with Jim Skiff. 1995. July 14. Their product was first sold commercially in early March., 1995. They now sell 3 types of silken tofu: Soft, regular, and firm.

10832. Nasoya Foods, Inc. 1995. Nasoya–where quality comes naturally: Our homemade style noodles and wrappers are perfect for people who are passionate about pasta! (Leaflet). Leominster, Massachusetts. 1 p. Front and back. 28 cm.

• ***Summary:*** This full-color, glossy leaflet shows that Nasoya makes: Egg roll wrappers. Japanese style noodles. Chinese style noodles. Won ton wrappers. Spinach noodles. Gyoza wrappers.

On the back, each product is described but the ingredients are not listed. Address: Leominster, Massachusetts 01453. Phone: 1-800-229-TOFU.

10833. **Product Name:** Smoked Tofu [Raving Rebecca]. Renamed Pineapple in 2002.
Manufacturer's Name: North Coast Distributors.
Manufacturer's Address: 1717 Solano Way #13, Concord CA 94520. Phone: 510-798-4393.
Date of Introduction: 1995. March.
Wt/Vol., Packaging, Price: 6 oz or 16 oz plastic tub. Wholesales for $1.80 or $4.75 respectively.
How Stored: Refrigerated.
New Product–Documentation: Price list sent by Patricia Smith from Natural Products Expo West at Anaheim, California. 1995. March. Printed black orange. Talk with Hanan Onn. 1995. March 22. This product was launched in March 1995.

Talk with friend of Hanan Onn. 1997. In the summer of 1996 this company moved from Concord to 4860 East 2nd St., Benicia, California 94510. Phone: 707-747-1482. The purpose of the move was to expand production space. The company name and brand name have not changed. Their sole product is Tofu Life Smoked Tofu in 3 flavors.

10834. Northrup King. 1995. Corporate corner: Specialty soybeans offer farmers profitable alternatives without yield sacrifices. *ASA Today* (*St. Louis, Missouri*) 1(5):4. March.

• ***Summary:*** At Northrup King edible soybeans combine specialty traits with top-notch yields. "Unlike many edible soybeans, Northrup King varieties are developed first for

© Copyright Soyinfo Center 2013

yield, then for specialty traits such as yellow hila, seed size, and high protein content." John Thorne, director of breeding for Northrup King, says: "We recognize that even though these food-grade soybeans may capture a premium price, our customers can't afford to sacrifice yields."

10835. Ontario Soybean Growers' Marketing Board. 1995. Technical soybean mission: Japan, Hong Kong, Malaysia, Singapore. March 10-26, 1995. Chatham, Ontario, Canada. 23 p. 28 cm. [Eng]

• ***Summary:*** Contents: Participating members: Dr. Karen Lapsley, Mr. Ron McDougall, Mr. Michael Loh, Mr. Doug Jessop (food technologist and tofu expert, Harrow Research Station), Mr. Kim Cooper (marketing specialist, OSGMB). Note: This is the first Canadian soybean mission in which a food technologist (Doug Jessop) participated. Background. Mission objectives. Acknowledgements. Mission details–Japan: Canadian embassy.

Japan Miso-Co-op Industrial Association: Japan imports about 250,000 tonnes {metric tons} of soybeans from China each year, and about 150,000 tonnes of that amount is for the miso market. The remaining miso soybeans come from Canada, USA, and Japan. The best soybean for making miso comes from the Hokkaido area of Japan. It is a large, white hilum type, perhaps Toyomasuri. Generally the larger the soybean the better for making miso. Japanese miso makers need two types of soybeans from Canada: (1) Normal SQWH (Special Quality White Hilum); average values for color, taste and texture are acceptable though higher values would be preferable; (2) High Premium Soybeans; they would consider paying a premium for better color, taste, and texture.

Azuma Natto Foods Co. Ltd.: This natto company uses 7,000 tonnes/year of soybeans making them the third largest natto maker in Japan. They use 65% USA, 25% Japanese, and 15% Canadian soybeans. There are four sizes of natto: Small natto < 5.5 mm accounts for 72% of the natto market in Japan; Large natto, 5.5 to 6.2, account for 18%. Extra large natto > 8.5 mm account for 18%. Split seed natto account for 10%. Factors in assessing the suitability of soybeans for natto are: Fat content should be less than 19%. Total sugars–Group 1 contains sucrose, fructose, and glucose, group 2 contains raffinose and stachyose. Calcium affects the hardness or softness of natto. The ideal range is 180-250 mg/100 gm. Sanwa Company–Tofu manufacturer.

Wed., March 15–Japan Tofu Association: There are over 20,000 tofu makers in Japan, and 53 of these are members of this association, with half of the 53 being in the Tokyo area. Only 185 tofu manufacturers in Japan have 30 or more employees. Tofu makers consider there are two types of organic soybeans: true organic and semi-organic. The association imports about 2,000 tonnes of each type from the USA; they are OCIA certified.

Home Foods Company Ltd. uses 4,000 metric tons of soybeans a year, mostly a blend of 70% Chinese white hilum and 30% U.S. white hilum. The soys from the USA are I.O.M. soybeans, especially the "High Super" variety. For the more premium market they use a blend of 50% Japanese soys and 50% Harovinton soybeans. They have also just started blending 50% Chinese and 50% Canadian white hilum soybeans. The two most important criteria for their soybeans are high protein and high total sugars. Sugar levels of Chinese soybeans (24-25%) are higher than those of Canadian soybeans (23-24%).

Thursday, March 16–Takeya Miso Co.: Ikuo Fujimori, President. Takeya has two plants employing 100 production workers and using 5,000 to 6,000 tonnes of soybeans yearly. 70-80% of their products are sold in supermarkets. For years they have been using the U.S. soybean variety Kanrich.

Nagano Chushin Agricultural Experiment Station: They have been breeding soybeans since 1957 and in that time have developed and released 17 varieties, the most famous being Enrei. The staff of 34 includes 5 soybean breeders. Dr. Nobuo Takahashi has been breeding soybeans for over 18 years. Japan has domestic soybean area of 370,500 acres (150,000 ha); it is decreasing, so imports are increasing.

Nagano Miso Industrial United Co-operatives: This group consists of 8 local co-ops made up of 160 miso manufacturers, who pay a fee to this group based on sales. There was a detailed discussion of the types of sugars in soybeans necessary for good miso.

Friday March 17–National Food Research Institute. Tsukuba is developing into a science research park, now containing over 200 different research institutes. NFRI, originally founded in 1934 as the Rice Institute, moved to Tsukuba from Tokyo in 1973. Thirty years ago, all tofu in Japan was made with Japanese soybeans. Dr. Toshiro Nagai spoke about natto: In 1992 the natto needs of Japan were met by soybeans from China (45%), USA (38%), Canada (17%), and Japanese domestic (8%). Natto consumption has increased by about 10% for each of the last few years. Dr. Sayuki Nikkuni spoke about miso: In 1992 the miso needs of Japan were met by soybeans from China (87%), USA (6%), Japan (6%), and Canada (1%). Dr. Kaoro Koyama spoke about tofu: In 1992 the soybeans for tofu totaled 490,000 tonnes and came from USA (390,000 tonnes; 80%), Canada (50,000; 10%), Japan (20,000; 4.1%), China (20,000; 4.1%), and South America (10,000; 2.0%).

Asahi Food Processing Co. Ltd. This plant, which has 350 employees and operates 365 days/year, was established in 1972 and produces tofu, fried tofu, natto, noodles, and juices. They use 15 tonnes of soybeans daily or 4,900 tonnes/year, of which 38.8% are grown in Japan and the remaining 61.2% are IOM from the USA. Each day they make 120,000 cakes of tofu, 100,000 pieces of fried tofu, and 20,000 packages of natto. Most of the soybeans they use in production are dehulled. They use about 500 tonnes/year of OCIA certified soybeans from the USA and some semi-

© Copyright Soyinfo Center 2013

organic soybeans from Japan. The prices they pay per kg of soybeans are: IOM 30-40 yen; Vinton, identity preserved varieties, and Harrovinton [Harovinton] 100 yen; organic 120-140 yen; Enrei (Japanese) 400 yen.

Saturday, March 18–Hong Kong. Canadian High Commission. Canada Packers (Hong Kong) Ltd.

Monday, March 20. Shenzhen Economic Zone: This area of 30 square km, just outside the Hong Kong border, contains 1 million people or 60% of the provincial population, all of whom require a special permit to work in the area. This economic zone is booming, basically due to spiralling costs in Hong Kong, where many businesses and factories are closing and moving to this area, where land and labor costs are much lower.

Shenzhen Vitasoy (Guang Dong) Foods & Beverage Co. This plant, which is only one year old, produces a major share of the soymilk for Hong Kong. They are able to import soybeans at a low tariff rate because they ship the majority of their finished products back into Hong Kong. The plant uses Canadian SQWH (Special Quality White Hilum) soybeans, but has problems with uneven seed size. They presently receive the soybeans in 45 kg jute bags, but would prefer strong 45 kg poly-lined paper bags. A small percentage of dairy milk is mixed with the soymilk, which is thought to improve its texture and taste.

Tuesday, March 21. Dah Chong Hong, Ltd. This was the first company to import Canadian soybeans for food use in the early 1970s. Dah Chong pointed out that Ontario soybeans were experiencing increasing competition from Quebec soybeans, especially in the past two years. The Quebec soybeans are 5-10% less expensive, due to lower basis levels, lower freight costs, and being more aggressive in a new market. Their quality is similar to Ontario, though the seed coat color is somewhat darker. There are about 50 tofu makers in Hong Kong, 10 larger size and 40 smaller size, although there is not a large difference in size. Consumers believe that packaged tofu is not as fresh as that purchased fresh daily from local markets.

Amoy Food Ltd. (Dr. Alain Butler; This plant makes soy sauce and other sauces used in cooking. They use only Canadian soybeans, the Maple Glen variety from Quebec). Wed., March 22. The group visited Hung Tao Soya Bean Products Pty., a traditional Hong Kong tofu and soybean sprout plant in the New Territories.

Thursday, March 23–Malaysia. Canadian High Commission. Yeo Hiap Seng (Malaysia) Berhad (Contains excellent details on the company). Chop Lee Kit Heng Sdn. Bhd. (A soybean trader selling to end users in Malaysia).

Friday, March 24–Singapore. Canadian High Commission. Yeo Hiap Seng Ltd. (Singapore). Meeting with nine tofu manufacturers in Singapore. (The name of each company is given. There are 40 tofu makers in Singapore, and the majority now use Canadian soybeans. Tofu growth in the last 5 years has been very rapid and competition is fierce). Asia Corporation Pte. Ltd. (This company accounts for about 70% of the soybeans imported into Singapore and Malaysia. They first brought Canadian soybeans into the area in 1978). Canadec Private Ltd. Sing Yeap Trading Pte. Ltd.

Saturday, March 25–Unicurd Food Company Pte. Ltd. (Mr. Goh gave a tour of his facility and discussed his plans for a new plant in late 1995). Yam Thye & Co. (Warehouse).

Encore Ltd.: Sylvia B. Hollenstein, managing director. This company, based in Switzerland, uses Swiss technology to produce soy yogurts, chocolates, and noodles in Switzerland from Chinese soybeans–mostly for the taste. The products are shipped from Switzerland to the company's 3 retail stores in East Asia; they plan to expand to 10 retail stores by the end of 1995.

Appendixes A through J, issued as a separate document, contain extensive and detailed information and some published documents related to the technical mission. Address: P.O. Box 1199, Chatham, ONT N7M 5L8, Canada. Phone: 519-352-7730.

10836. *Runner's World* (*Emmaus, Pennsylvania*). 1995. Mother Nature's "superfoods." March.
• ***Summary:*** One of the "superfoods" is tofu, which contains genistein, an isoflavone found almost exclusively in soybeans. "Genistein has been shown to block the growth of new blood vessels that feed cancerous tumors. This may eventually starve the cancer sells and inhibit tumor growth. Ongoing research is investigating whether purified genistein retains the same cancer-fighting as whole soybeans, or if other substances in soybeans work in tandem with genistein to fend off disease."

10837. *Soybean Quarterly* (*Nebraska Soybean Board, Lincoln, Nebraska*). 1995. Beeler's fully cooked brato dogs. 1(2):1.
• ***Summary:*** Tim Beeler and Jerry Lorenzen of Oskaloosa, Iowa, took a family bratwurst recipe and added tofu to the pork mixture. The resulting product has 50% less fat, 35% less calories, 25% less sodium, and 17% more protein–with no MSG and the same great taste of bratwurst.

10838. **Product Name:** Tofu, Sweetened Soymilk.
Manufacturer's Name: Thanh Son.
Manufacturer's Address: 905 N.W. 23rd St., Oklahoma City, OK 73106. Phone: 405-525-2690.
Date of Introduction: 1995. March.
New Product–Documentation: Talk with daughter of owner of L&H Bean Sprout Co. in Oklahoma City. 1996. July 5. There is now one tofu company in Oklahoma City, named Thanh Son (pronounced TAN-sun). Talk with Mr. Trung Nguyen. 1996. July 5. He started making tofu and sweetened soymilk in March 1995 in Oklahoma City. He came to the USA from Vietnam in 1978. His surname is pronounced "Nwen."

© Copyright Soyinfo Center 2013

10839. **Product Name:** [Chili con Tofu].
Foreign Name: Chili con Tofu.
Manufacturer's Name: Viana Naturkost GmbH.
Manufacturer's Address: Willi Graf Strasse 88, 53881 Euskirchen-Kuchenheim, Germany. Phone: (02233) 41323.
Date of Introduction: 1995. March.
Ingredients: Tofu*,¼ kidney beans, tomato pulp*, vegetable oil*, leeks*, carrots*, herbs*, spices*. * = Organically grown (*kontrolliert biologischer Anbau*).
Wt/Vol., Packaging, Price: 425 gm.
How Stored: Refrigerated.
New Product–Documentation: Labels brought by Bernd Drosihn of Viana. 1995. March 11. 9.62 x 4 inches. Red, white, and black on orange. Recycled paper. Ready to heat and serve (*Fertiggericht*).

10840. Rose, Richard. 1995. Sharon's Finest is moving towards hemp products (Interview). *SoyaScan Notes.* April 3. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Richard first introduced the idea of using hempseed protein in natural food products in America. His is still the only company making such products, and demand for them is growing rapidly. "Our business is moving toward hemp." He recently published a brochure titled "Hemp Food," that explains the many benefits of growing hemp. Many people still do not realize that hemp is not the same as marijuana; they are different plants.

Sharon's Finest now makes HempRella (a non-dairy cheese alternative containing 5% milled hemp seeds) and Hempeh Burger (a soybean and rice tempeh burger containing 10% whole hemp seeds). The future of Hemp Foods lies in sprouting hemp seeds then processing them to make milk (similar to making soymilk from the soybean), yogurt, ice cream, tofu, cheese, meat alternatives, and the like. Address: President, Sharon's Finest, P.O. Box 5020 (616 Davis St.), Santa Rosa, California 95402-5020. Phone: 707-576-7050.

10841. Negru, Matthew. 1995. Tofu and soybeans in Nepal (Interview). *SoyaScan Notes.* April 5. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Matthew lived in Nepal for many years and was married to a Nepalese woman named Laxmi "Latchoo" Lama [now named Mrs. Laxmi Sharma]. They started and owned a woodworking business named Laxmi Wood Craft. In 1987 all foreigners (except those who were married to Nepalese at the time) had to leave the country because the Nepalese government simply stopped renewing visas.

Matthew recalls that when he was in Kathmandu, there were two tofu shops in operation: One was somewhere on the Ring Road and the other was run by a Japanese man and woman; they may not have been married, and they may have had a partner. Matthew first bought tofu in Kathmandu in about 1981-82 and he first met the Japanese tofu makers in about 1985-87; they lived in a house behind the palace, and he thinks they had their tofu shop in Thamel, which is the tourist district of Kathmandu. The tofu was most widely sold at a big market named Asan Tole in Kathmandu. At the end of the market is a sort of square where two streets join; one may be named Bothahiti. There is a line of ships which sell tofu–along with other things. They keep the tofu immersed in water in 5-gallon biscuit tins. The tofu was quite good and tasty. The shops were run by Nepali people, probably the Newari, who are the indigenous tribe of the Kathmandu valley. Most of the tofu in Kathmandu was sold here, but occasionally it was also sold elsewhere.

The Newari own little earth-floored shops, sort of a Nepali saloons, where indigenous whiskey is served–mostly to Nepalese men. There they also serve delicious soybean snacks–such as soybeans fried in mustard oil with special spices. There are thousands of festivals in Nepal–every group has some, and the food served at these festivals is generally delicious. Some of these preparations contain soya. Matthew would like to know if Sherpas, Tibetans, or Thakalis have ever made tofu traditionally. Address: c/o Riverdale Immigrant Women's Centre, 1326 Gerrard St. East, Toronto, ONT M4L 1Z1, Canada.

10842. Kawakami, Kozo. 1995. Tsurezure Nihon shokumotsu-shi: Dai 3 kan [Leisurely history of Japanese foods. Vol. 3]. Tokyo: Tokyo Bijutsu. 195 + 3 p. Illust. Index. 21 cm. [Jap]
• ***Summary:*** As the title implies, the author is writing about 50 foods he finds particularly interesting.

* (p. 86+; tofu is mentioned). Chirimen-fu (p. 88+). Tosa-fu (p. 91+). Shian-fu * (p. 94+; tofu is mentioned). Yamakawa-fu and Chiyo-fu (p. 97+).

Azuki beans and Aka (red) azuki beans (p. 101+). Dainagon azuki (a special variety of azuki beans) (p. 106+). Azuki no suri-jiru (Soup of pureed azuki) (p. 109+).

Hishio–the other name is shoyu no mi (Moromi mash & shoyu presscake) * (p. 115+). Suri-Hishio (ground hishio) * (p. 121+). Ume-bisho and Yubi-hishio * (p. 125+). Hishio and shishi-bishio * (p. 130+) Azuki Kai (Azuki porridge), Aka-kai (Porridge), Uncho-juku (Porridge) (p. 133+) Unzo-kai (Porridge) and Unzo (p. 138+). Kowaii and Seki-han (Rice recipes; Sekihan is red azuki rice) (p. 141+). History of shiso (Shiso leaves are translated as "Beefsteak leaves") (p. 148+).

Asazuki (p. 150+). History of Karashi and Keshi (p. 153+). What is Araragi? ÿ(p. 158+). Tade / Tadé (p. 163+). Itachi hajikami and Inu sansho (p. 167+). History of sansho (Sansho seeds are one type of spice) (p. 170+) Hajikami and Shoga (Ginger) (p. 174+). History of myoga (A Japanese leafy plant with a strong flavor that is often used for a topping for Hiyayakko Tofu) (p. 178+). Myoga-take (p. 181+).

Sai? Seki (Chinese Name) and Niragi * (p. 184+). Kawakami sensei and the Rikagagu Kenkyujo (Note: *Rikagaku* means physics and chemistry), by MATSUSHITA Sachiko, Honorary Professor of Chiba University (p. 190+). 96 Years of my father's life by Kozo Kawakami's eldest son (Tadashi? / Tsutomu?) (p. 192+). My father, Kozo Kawakami,–A view from his 2nd son (p. 194+).

A photo (p. 191) shows the members of the Rikagaku Kenkyujo seated together on tatami mats in a room. A separate outline sketch and legend shows the name of each member.

The section titled "Kawakami sensei and the *Rikagaku Kenkyujo,"* by Prof. Matshita states (p. 190): I was able to receive his guidance for 20 years ever since I became a member of the Ryôrisho Genten Kenkyu Kai, a study group that started in 1994. They met at Keio University's old wooden classroom. These people studied old culinary documents together. I listened to his lecture on the *Ryôri Monogatari.* I could not do my present work that involves Edo period culinary literature without his influence.

I also saw him at the members meeting, visited his home, listened to his talks, and took a look at his sketchbooks on many occasions. On those occasions, he enjoyed talking about his experience at Riken (Rikagaku Kenkyusho) before the war and his teacher Dr. SUZUKI Umetaro. His work on the history of Japanese Food History got started after he retired. His work before his retirement was on agricultural chemistry (*nogei-kagaku*). He worked mostly on Vitamin A at Dr. Umetaro SUZUKI's Lab. in Rikagaku Kenkyusho until he moved to Manshu Kokuritsu Tairiku Gakuin in 1937. He received his PhD in Agriculture.

I first met him at a funeral of the late TSUJI Michiyo sensei in June 1989 held at Enmeiji Temple in Urawa. The late TSUJIMURA Michiyo sensei was in the same lab as Kawakami sensei.

The photo on the next page shows the golden age of Riken group who worked under Dr. Suzuki. I made a copy of one of the 3 photos from late TSUJIMURA Michiyo Sensei's album. He didn't have any photos from our days in Manchuria, so I was very happy and drew the picture below. The man in the center in the dark suit is Kawakami sensei.

Letter (e-mail) from Naomichi Ishige, Japanese food historian. 2008. May 18. KAWAKAMI Kozo, who passed away in 1994, was the foremost philologist on Japanese food culture. Thus, his writing is reliable enough. Continued. Address: Japan.

10843. Kawakami, Kozo. 1995. Tsurezure Nihon shokumotsu-shi: Dai 3 kan [Leisurely history of Japanese foods. Vol. 3]. Tokyo: Tokyo Bijutsu. 195 + 3 p. Illust. Index. 21 cm. [Jap]

• ***Summary:*** The chapter titled natto (*itohiki nattô;* p. 21-23) states: Within the natto family, there are dry types, *shiokara natto* (salty natto) and *itohiki natto* (regular / sticky natto) which can make sticky threads when it is moist, stirred with a pair of chopsticks, and picked up (as with chopsticks). It is thought that shiokara natto appeared in the Heian period because its name appears in the book titled *Shinsarugakuki* in around 1062 as *tsuki shiokara natto* (pounded salty natto) and *shiokara natto* (salty Natto). But for itohiki natto, no clear (definite) document was found, so people thought it appeared in late Edo period. But I don't think in that way. There might be a blank period in the literature, but you cannot say no document was found. There are some documents that mention itohiki natto. I am going to mention them here.

The first is *Shojin Gyorui Monogatari* (1320-1380). It is a story (fictional) of a battle between shojin ryori (Buddhist vegetarian cookery) and gyocho ryori (fish and poultry cooking). It is told that the book's author is called *Nijo Kanpaku* (the word *kanpaku* means a high ranking government officer who assisted the Japanese Emperor politically, or is a nick name for a person who is very powerful) whose real name was Nijo Yoshimoto and was well known for his talent in literature.

This story was written around 1320-1380, near the end of the Kamakura Bakufu and during Nanboku-cho period. (The books called Teikun Orai {1350} and Isei Teikun Orai {1370} were written during the same period.) This story is one of the documents that mentions itohiki natto.

The next document is *Noritoki-kyo-ki* (the diary of Noritoki) written in Ouei 12 nen (in 1405). I was told that there was an entry of December 19; "Rokkaku gifted itohiki natto." So I thought that since I had read this whole book before, I decided to check my notes about this book and

© Copyright Soyinfo Center 2013

then I found out that I, too, noted itohiki natto (mentioned) in Ouei 12 nen, Dec. 19. Although I didn't write "Received Itohiki Daizu from Rokkaku (person's name)", it was maybe Itohiki Natto which was given by Mr. Rokkaku. I confirmed this by checking with Mr. Takeshi TOYOTA's *Chusei Shogyo-shi* (History of Middle Age Commerce) and also my old notes.

After that, there are no documents mentioning natto until the *Tamon-in Nikki* (Diary of Tamon-in) in an entry dated Eiroku 11, May 21 (May 21, 1568). In this diary he wrote "Tried drying natto but then it got wet from the humidity of rainy air. So mix salt into *netaru natto* ('slept natto') by roasting salt well and while the salt is very hot, mix it into natto and dry the salted natto again. It won't get moist from the rainy season. *Meizen-bo* (A Zen monk?) said so." *Netaru natto* ("slept natto") means fermented natto and is itohiki natto. But the document just before this was written in 1405, so there is a gap of over 100 years between those two documents; that is the shortcoming of the literature (that mentions itohiki natto).

Then the next document is from late in the early Edo period. "Kefukigusa (Kefukiso?)" in 1645. "Kefukigusa" is a textbook for Haikai (Haiku and Renka). In this book published by Iwanami Buko, Ooyu (?), saliva of a cow, 3 wheels, strings for the puppet. etc. and also natto were listed among the (supportive) words (to make Haiku and Renka). Therefore there must have been natto at that time. To summarize: I checked and confirmed the Noritoki-kyo-ki, and also if there are other documents that can be found on related subjects. The documents on itohiki natto can be traced from the present all the way back to the period of *Natto Taro Itoshige.* But I really think that probably it continuously goes up to the period of Natto Taro Itoshige. Note: This is his guess after checking the documents.

Bibliography:

(1) *Shojin Gyorui Monogatari:* published by the Konnyaku Association in the book called "Konnyaku Kyokai Shi" (History of Konnyaku Association"). This book contains the whole story of the *Shojin Gyorui Monogatari.*

(2) *Tamon-in Nikki:* "Netaru Natto" (was mentioned) in it. Eiroku 11 (1568) May 21

(3) *Kebukiso* (*Kebukigusa?*) 1645. *Tsukeku for itohiki* (adding word for the word Itohiki). Re-published as Iwanami Bunko Bon and it was mentioned in Iwanami Bunko Bon page 109. (Note: He forgot to mention this book's year of publication.)

(4) *Edo Ryori Chu.* 1673. "Nese Natto" Nihon Ryori Taikan, Dai 2 Kan 118-1. (Volume 2, 118-1)

This chapter was written in Heisei 5 nen (1993) Dec. 2.

An illustration (p. 23) includes some writing: On the top container: Kinzanji Misho (Miso?) is written. Note: The Chinese characters are *Mi* as in Miso and the character for *hishio.*

On the bottom container is written "natto."

This illustration came from *Wakan Sansai Zue.* Address: Japan.

10844. *Glencoe News* (*Chicago, Illinois*). 1995. Soy-based natural foods enter the mainstream. April 20. [1 ref]
• ***Summary:*** Once soy-based foods were found only at health food or natural food stores. Now they are finding their way into mainstream grocery stores, as more and more Americans are recognizing the need to eat healthy. According to the Illinois Soybean Association, the main products to look for are tofu, soymilk, frozen desserts, soy flour, and analogs (like "veggie" burgers).

10845. Webb, Denise. 1995. Surprise! 10 "bad" foods that are good for you. And 10 "good" foods that are not so good. *Family Circle.* April 25. p. 60, 62.
• ***Summary:*** It's saturated fat more than cholesterol that is the major culprit in raising blood cholesterol and puts you at risk for heart disease. Tofu is given as the first of the 10 "good" foods that are not so good. More than half of tofu's calories come from fats. One-half cup of firm tofu is "crammed" with 11 gm of fat and 183 calories. "So balance the fat in tofu by serving it with lots of low-fat veggies." Address: PhD, RD, freelance writer who lives in Brooklyn, New York.

10846. Krizstan, Jan; Trampus, Mirko. 1995. Re: Update on work with seitan and soyfoods in Slovenia. Letter (fax) to William Shurtleff at Soyfoods Center, April 28. 3 p.
• ***Summary:*** "The Slovenian people are really very happy to be out from under the oppressive rule of Yugoslavia and Belgrade now.

"Mirko was very busy during March and April mounting ceramic tiles all over our tofu and seitan kitchen walls, preparing the soil for soybeans, and experimenting with an interesting sort of spring wheat. He's almost finished now. The gas line and outdoor gas tank are already installed. Next week he will be mounting tiles on the floor. Our new kitchen (5 by 6 meters, formerly a garage) is attached to the old one (3.5 by 5 meters), which we still use for making seitan. We hope to put all equipment in our new kitchen and go to Austria to buy natural nigari at the end of next week." They will use the old kitchen for storing soybeans and wheat.

Jan and Mirko would like to buy tofu and soymilk equipment from Wally Rogers of Bean Machines but it is too expensive for them. In the new kitchen they plan to have: one caldron for cooking seitan, two pressure cookers for making tofu, some stainless steel working tables, a semi-automatic machine for rinsing starch out of wheat dough for seitan production, 2 chambers for cooling pressed tofu, a curding barrel, and vacuum packaging machine–all of them second hand, except the rinsing machine which Jan designed.

Jan first made seitan in August 1993 on a very small scale and by hand at his home kitchen. "It was sold 'wild' on

© Copyright Soyinfo Center 2013

the market–only in healthy food shops in Ljubljana, whose owners dared to sell it without legal permission." For details on this history and development of this seitan product see Izvor 1993.

"I was strongly interested in macrobiotics for some time. I first heard about it a a macrobiotics course organized by a middle-aged woman, who became one of my best friends. But I've always been very curious. So I asked myself: 'Is there any better way of eating and living than macrobiotics?' I tried a vegetarian diet without milk, fish, eggs, or honey, and with a lot of fresh fruits, nuts and wholesome bread (all organically grown) for a while. It was even better than macrobiotics and it took less time for food preparation." Now Jan eats only fruits and nuts, and sometimes seitan or tofu. Address: Mestni trg 22/1, 68330 Metlika, Republic of Slovenia. Phone: (386) 068 59 481.

10847. Buzzell, Dick. 1995. What's new in soybean breeding [in Ontario]. *Canadian Export Soybeans* (*OSGMB, Chatham, Ontario, Canada*) 8(1):2. April.
• ***Summary:*** "The goal of soybean variety development at the Harrow Research Centre is to produce varieties with improved quality for processing into soyfoods. At the same time, improvements are made in disease and pest resistance, soybean yield, and other traits required by soybean growers."

Soybeans with a higher protein content will have to be more expensive. "We are also selecting for differences in protein composition, since this may affect the making of different kinds of tofu. Also, some consumers may prefer the natural flavour of soybeans, whereas others may prefer a more bland flavour, so both kinds are being selected." Address: PhD, Soybean Breeder, Harrow Research Centre, Harrow, ONT, Canada.

10848. **Product Name:** Smokey Tofu, Regular Tofu, and Chinese 5-Spice Tofu.
Manufacturer's Name: Clean Bean Tofu.
Manufacturer's Address: 37e Princelet St., London E1 5LP. Phone: 0171-247-8349.
Date of Introduction: 1995. April.
New Product–Documentation: Letter from Neil McLennan of Clean Bean Tofu. 1997. April 10. "I run a fresh tofu market stall, and our business is being affected by GE [genetically engineered] soya;..." Letter from and form filled out by Neil McLennan. 1997. April 30. "I am a very small-scale producer. Me and my brother have a stall in the local market that specialises in organic produce. Our stall sells the three kinds of tofu (as listed) which we make ourselves on Fridays and Saturdays." They are planning to start making tofu full time and are looking for larger equipment. He has a small grinder / cooker that he bought in China. "It's been a great two years persuading Londoners of the virtues of fresh tofu. I am eternally grateful to yourself and Akiko Aoyagi for *The Book of Tofu,* which inspired me initially, and for *Tofu & Soymilk Production,* which showed me how." They started making Smokey Tofu in April 1995, Regular Tofu in July 1995, and Chinese 5-Spice Tofu in Nov. 1995. They presently make 140 lb, 300 lb, and 140 lb of each product respectively each month. They have no labels at present because most of their customers bring their own containers. Letter from Neil McLennan of Clean Bean Tofu. 1998. Aug. 24. He would like to order a copy of *Das Tofu Buch,* the German translation of *The Book of Tofu.*

10849. **Product Name:** Soyboy Okara Courage Burger.
Manufacturer's Name: Northern Soy, Inc.
Manufacturer's Address: 545 West Ave., Rochester, NY 14611. Phone: 716-235-8970.
Date of Introduction: 1995. April.
Ingredients: Filtered water, soy protein concentrate, wheat gluten, okara, egg whites, potato flour, soy sauce (water, soybeans, wheat, salt), soybean oil, natural flavor from all vegetable sources, nutritional yeast, herbs and spices, onion powder, sea salt, vegetable gum, evaporated cane juice.
Wt/Vol., Packaging, Price: 9 oz paperboard box.
How Stored: Frozen.
New Product–Documentation: Ad (½ page, color) in Vegetarian Times. 1995. April. p. 69. "Like chicken? You'll love a bite of courage." A chicken and a wolf with eating utensils are sitting behind a package of this product. "A perfect choice for non-vegetarians. A great choice for everyone. SoyBoy."

10850. *Ontario Soybean Growers' Marketing Board Newsletter.* 1995. Producing soybeans for the soyfood market. April. p. 3.
• ***Summary:*** In early March, 1995, Iowa State University conducted a seminar titled "Producing Soybeans for the Soyfoods Market." Topics covered included an introduction to soyfoods (complete with tasting at Iowa State's Center for Crops Utilization Research facility), a review of Japan's soyfoods market, trade policy changes and challenges, quality assessment, and the effects of varietal characteristics on soyfood quality.

Speaking on Japan's soyfoods market, Hideki Furuhata of Mitsui & Co. reported that consumption of tofu and natto is increasing slowly in Japan, while miso and soy sauce are decreasing. China has been supplying Japan with 250,000 to 300,000 tonnes/year of soybeans, mainly for making miso and natto. Japan imports between 120,000 and 130,000 tonnes/year of identity preserved soybeans, up from 100,000 tonnes 5 years ago. For example, 50,000 tonnes of Vintons were imported in 1994.

Bradley Hildebrand of Cargill in Minneapolis, Minnesota, reported that the U.S. exports about 130 million bushels/year of soybeans to Japan. About 30 million bushels (23% of the total) are used to make soyfoods. Most of the soybeans used for soyfoods in Japan are "IOM" beans

© Copyright Soyinfo Center 2013

because they are grown in Indiana, Ohio, and Michigan. IOM soybeans are not any specific variety or hilum color, but they are generally higher in protein and better in quality than other U.S. soybeans. They trade at a premium of 10-20 cents per bushel over other U.S. soybeans in Japan. IOM soybeans are traded on the Japanese grain exchange. For shipment to Japan, IOM soybeans are railed to Baltimore (Maryland) or Norfolk (Virginia) for shipment via panamax size vessels. They may also be railed to Mobile (Alabama) or New Orleans (Louisiana) for vessel shipment.

Hildebrand reported that IOM soybeans will keep the largest market share due to their low price, however there is a market for variety soybeans. He said that Vinton is the most popular variety for making tofu in Japan, but it does not yield high enough in the field to make it price competitive. "He suggested that breeders need to develop a high-yielding soybean with Vinton's tofu-making characteristics. However he said the market for variety soybeans is not huge and is easily flooded." Address: Box 1199, Chatham, ONT, Canada N7M 5L8.

10851. Powell, Robin. 1995. Wonderfood: The right diet, full of fresh fruit and vegetables and such special additions as tofu, proves more than ever to be the key to good health. *Vogue.* April. p. 30.
• ***Summary:*** "What is the new wonder food for helping to avoid breast cancer? Tofu." It is a rich source of phytoestrogens. "Tofu might be one good reason that breast cancer is less prevalent in Asian women than in Western women." A photo shows a pair of chopsticks holding a cube of tofu.

10852. Schinner, Miyoko Nishimoto. 1995. Recipe redux. Dessert that's too good to be true: Believe it–chocolate cake that contains no sugar, eggs, or butter. *Vegetarian Times.* April. p. 26.
• ***Summary:*** Silken tofu is a key ingredient in the recipe for both this vegan Chocolate Rum Cake (1 cup, firm) and its frosting (10½ oz extra firm). In the cake, tofu replaces the eggs and butter, acting as a binder and leavener. In the frosting, tofu replaces the fat and provides creaminess. Here is luscious flavor without fear or guilt.

Makes 12 servings. Per serving: Calories 290, protein 9 gm, fat 6 gm, carbohydrates 44 gm, cholesterol 0 gm, sodium 11 mg, fiber 6 gm. Address: Owner, Now and Zen Enlightened Bistro and Bakery, 1826-B Buchanan St., San Francisco, California 94115. Phone: (415) 922 9696.

10853. **Product Name:** Tofu.
Manufacturer's Name: SEP.
Manufacturer's Address: 170 Blanchard Lake Dr., Whitefish, MT 59937. Phone: 406-862-0621.
Date of Introduction: 1995. April.
Ingredients: Soybeans, water.
Wt/Vol., Packaging, Price: Bulk.
How Stored: Refrigerated.
New Product–Documentation: Call from and talk with Mike Jopek. 1995. Oct. 14. This company started in about April 1995. Their first and only product is bulk tofu, but they are thinking of starting to make new soy products.

10854. Slavin, Joanne L. 1995. Health benefits of soy fiber: A quick taste. *Soy Connection* (*The*) (*Chesterfield, Missouri–United Soybean Board*) 3(2):1, 4. Spring. [9 ref]
• ***Summary:*** The insoluble dietary fiber content in ½ cup of various soyfoods is as follows: Soybeans (raw/uncooked) 12.0 gm, soymeal [soy flour] 7.0 gm, miso 3.9 gm, soymilk 1.3 gm, tofu (raw) 0.6 gm.

Soy fiber is also isolated and used as a food additive. Different companies produce various types of soy fiber, but most of the published research is on soy polysaccharide, which contains 75% total dietary fiber (TDF) including a mixture of cellulosic and noncellulosic structural components of the internal cell wall. Soy polysaccharide is mostly insoluble dietary fiber, but clinical studies have shown it has properties of both insoluble and soluble dietary fiber. Soy polysaccharides, like other insoluble fibers, increases stool weight.

There is considerable evidence that intake of fiber-rich foods is inversely related to risk of cancers in the colon and rectum. It is estimated that the risk of colorectal cancer could be reduced by about 31% if fiber intake were increased by 13 gm/day.

"Dietary fiber has also been shown to be effective in lowering serum cholesterol. It may decrease risk of coronary heart disease by decreasing serum lipids, lowering blood pressure, improving glucose metabolism, and aiding weight maintenance. Soluble fibers appear most effective in lowering serum cholesterol" but they are only effective in subjects with elevated cholesterol levels.

"Potential negative effects of dietary fiber include lower absorption of vitamins, minerals protein and calories. It is unlikely that healthy adults who consume fiber amounts within the recommended ranges will have problems with nutrient absorption."

"Soy fiber appears to be extremely fermentable in human subjects, with 93% of the dietary fiber as soy polysaccharide being fermented... Fermentation of dietary fiber produces gas and short chain fatty acids, one of which, butyrate, appears to play an important role in cancer prevention."

"Compared with other fiber sources available as supplements for food, soy fiber provides a range of positive functional, nutritional, and physiological effects. Soluble fibers, such as gums and pectins, lower serum cholesterol but are difficult to incorporate into foods and are not palatable. Insoluble fibers, such as wheat bran or cellulose, are effective in the prevention and treatment of constipation, but are

© Copyright Soyinfo Center 2013

difficult to consume on a long term basis. Soy polysaccharide has found wide acceptance as a supplemental fiber source and is added to hospital nutrition products, breads, and other baked products, including muffins, cookies, and crackers." Address: Prof., Dep. of Food Science and Nutrition, Univ. of Minnesota, St. Paul, MN.

10855. *Tofu Times: Emerging Soyfoods Trends* (*Morinaga, Los Angeles*)**.** 1995. Mori-Nu Tofu: Moving into food service. March/April. p. 1-2.
• ***Summary:*** Morinaga is currently preparing a Food Service Manual. Stanford University Dining maintains nine foodservice operations and serves 15,000 students per day. Executive Chef Andre Mallie says: "Students at Stanford are extremely health conscious about what they eat. In addition probably 30-40% of our students are vegetarians and we try to be responsive to their needs and requests... Healthy eating is definitely a continuing trend at the University... For main meals, Stanford students have a choice of as low-calorie dish, a vegetarian entree, a meat choice, or a fish selection. The nutritional information of all entries is posted on the serving line... Tofu is served every day as part of the salad selection, and a hot entree with tofu as the main ingredient is served 2-3 times a week. Tofu entrees are rotated and include tofu casseroles, stuffed tofu ravioli, vegetable and tofu kabobs, tofu moussaka, "eggless" tofu rolls, and marinated and grilled tofu, which is a popular selection.

Chef Mallie recommends Mori-Nu Tofu because of its consistent quality, and the fact that it is very compact and can be stored without taking up valuable refrigerator space–for up to ten months. Ben Chilson, Director of Food Services at Andrews University in Berrien Springs, Michigan prefers Mori-Nu Tofu because he does not have to worry about the product going sour. A Seventh-day Adventist university, Andrews promotes a vegetarian lifestyle and does not serve meat or meat by-products. Tofu entrees are served 2-3 times per week including curry tofu and vegetables, stir fry broccoli with tofu, tofu and nut patties, tofu fritters, and scrambled tofu as a breakfast option.

Mori-Nu Tofu is also on the food service menus at Drake University (Des Moines, Iowa) and the University of Wisconsin.

Talk with Art Mio of Morinaga. 1995. March 10. In America today, tofu is being used in foodservice primarily in universities and colleges, and secondarily in businesses. In both places, it is most widely used either (1) as cubed tofu, placed on the salad bar for use as a salad ingredient, condiment, or topping, or (2) stir fried with vegetables. Stanford University uses, on average, about 30 cases/month of Mori-Nu Tofu. Address: California.

10856. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Valsoia S.p.A.
Manufacturer's Address: Via Iacopo Barozzi 4, 40126 Bologna, Italy. Phone: +39 051-659-9900.
Date of Introduction: 1995. April.
How Stored: Refrigerated.
New Product–Documentation: Letter (fax) from Dr. M. Bacci of Valsoia. 1995. Dec. 4. Valsoia introduced tofu in April 1995.

10857. Walker, Morton. 1995. Concentrated soybean phytochemicals. *Healthy & Natural Journal* 2(2):58-60. April. [12 ref]
• ***Summary:*** Contents: Introduction (Designer Foods Symposium III). Cancer inhibitors in soybeans. Prostate cancer cured by fermented soybean drink (Haelan 851). The therapeutic characteristics of Haelan 851. Note: The address, phone number, and fax number of Haelan Products Inc. in Metairie, Louisiana, is given.

Soybeans contain five different types of anti-cancer agents: protease inhibitors, phytate, phytosterols, saponins, and isoflavones. The latter are plant estrogens with strong inhibiting effects in hormone-related malignancies such as prostate, ovarian, cervical, and breast cancers. Isoflavones are found in a variety of soy foods, including soy milk, tofu, tempeh, miso, textured vegetable protein, soy flour, soy nuts, and soybeans. "The isoflavone component which most excites the medical research community is genistein. It's an overpowering suppressor of the oncogene enzymes that ordinarily stimulate pathological cell growth." Address: Medical Journalist, 484 High Ridge Road, Stamford, Connecticut 06905-3020.

10858. Demos, Steve. 1995. New developments at White Wave (Interview). *SoyaScan Notes.* May 8. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Steve is planning to introduce soymilk in a gable-top carton. He has been able to get a 90-day shelf life at dairy storage temperatures. He has the product, which has passed many taste tests. His problem is finding a maker of soy base. He is working closely with Ted Nordquist in California and has visited Ted's house. None of the companies who make soy base in Tetra Pak are willing to cooperate. Steve tried to work with Pacific Foods of Oregon but they backed out. He has the money to build a state of the art soymilk factory but first he has to prove that the market exists for soymilk in a gable-top carton. He has to run a 5-month test in one major urban market. He would sell this soymilk in supermarkets as part of his shelf set which is on the edge of the dairy section. White Wave is the only soyfoods company with nationwide refrigerated distribution.

White Wave has just purchased Meat of Wheat, and hired Mark Machlis.

White Wave has just completed a $100,000 market study on how consumers view vegetarian foods, meat alternatives, etc. The idea for the study came from Ken Vickerstaff (vice

© Copyright Soyinfo Center 2013

president of sales; he came out of General Foods, Celestial Seasonings) and the results were extremely revealing. Steve was surprised to learn what the word "vegetarian" means to typical consumers. The two terms "meat analogs" and "meat alternatives" are both "off target." Steve took off much of last year (working 30-35 hours a week), involved in this study, gardening, flower arranging, and looking for good ideas. He sat behind a glass wall and watched consumer panels answer questions and taste products for over 2 weeks. They brought in random people (called out of the phone book) who had a proclivity for this kind of life style. He wants White Wave to be the company most closely associated with vegetarianism in America. White Wave now has annual sales of $6-7 million, trying to get to $12 million. "We know that we can do that in the natural foods business, but that's not the game. We're missing the game. We wanted to find out what the game really is, and out was a real eye-popper to find out. What Wave has been able to redefine strategically where they are going and how they are going to get there." The information acquired during the study will be come very apparent as White Wave applies it. "We are a vegetarian company and we always will be. We want to define vegetarianism. Our strategy is to make the word 'vegetarian' and White Wave synonymous. We want people think of White Wave when they think of vegetarianism."

Americans are reducing their use of red meat. So 1-3 meals in the normal family meal rotation are up for grabs. People don't know what to put in place of that red meat.

White Wave is now contracting with Jonathan Gordon from England; he wrote his PhD thesis on acidified soy curd (related to tofu) for use in tropical climates. He is currently the international ingredients specialist for Kraft Foods in Memphis, Tennessee. Steve is hiring him this summer as White Wave's operations director. He will start work in about September, and his first project will be to develop some new soy yogurts. Address: President, White Wave Inc., 1990 North 57th Court, Boulder, Colorado 80301. Phone: 303-443-3470.

10859. Carrasquillo, Fausto. 1995. New developments with soyfoods in Puerto Rico (Interview). *SoyaScan Notes.* May 15. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Two years ago Fausto sold his natural foods distribution company named *Nuevas Comidas* to a regular food distributor named *Productos de Nutricion,* which is located in a suburb of San Juan (Carretera 876, Km. 4.3, Barrio Las Cuevas, Trujillo Arto, Puerto Rico 00758). Now they want to make tofu and soymilk, and Fausto is working with them to make this happen. He is presently importing tofu and soy cheese from White Wave, but the cost of importing is expensive. Fausto would also like to grow soybeans in Puerto Rico and sell them as green vegetable soybeans. Address: Puerto Rico.

10860. Hannon, Kerry. 1995. Pure and unadulterated: Sales are soaring at organic food producer Walnut Acres. *U.S. News & World Report.* May 15. p. 86, 91-94.
• ***Summary:*** This article is part of "Health Guide 1995," a cover story on health, nutrition, and fitness. Walnut Acres Inc., in Penns Creek, Pennsylvania, in the largest producer in the USA of organic food sold by mail order, with 350 products in its catalog. Business is booming and sales soaring as health-conscious consumers switch to natural, organic foods. Sales jumped from $6 million in 1991 to nearly $8 million in 1994. In 1994 about 700 tonnes of organic, pesticide-free produce was grown on the farm, three times as much as in 1990. Sales of beef, chicken and eggs, raised without the usual hormones or antibiotics, have doubled since 1989.

Today Walnut Acres has more than 100 employees. Each year about 30,000 visitors tour the plant (of 100,000 square feet) located in the old stable. There the cannery makes 60 cans of soup a minute and the stone mill grinds 1,000 pounds per hour of whole-wheat flour. Some 93% of American consumers want unadulterated food.

Consumers who are still in the mainstream, are now able to buy natural and organic foods in their supermarkets–such as Safeway in California. Whole Foods Market operates a chain of 39 supermarket-size natural food stores in nine states. Fresh Fields, founded in 1991 and based in Rockville, Maryland, now sells its "Good for You Food" at 16 similar stores in five states.

In 1994 sales of natural foods totaled about $7.3 billion, up 17% from the year before double what it was in 1987. Sales at mainstream grocery stores have been flat. Paul Keene says that since he and his wife started Walnut Acres in 1946, they have "moved from the lunatic fringe to the leading edge of agriculture." Not long ago, he recalls, they were regarded as "kooks or commies" [communists]. At one time crosses were burned on their property and other time dynamite was tossed onto the land. At age 84, Paul Keene is "so spry that he may be his own best advertisement."

Robert Anderson, Keene's son-in-law, is now president of Walnut Acres.

The article discusses the difference between "natural," "organic," and "certified organic," and the debate over the nutritional benefits of organically grown foods. One sidebar, titled "Looking beyond beta carotene," discusses phytochemicals, which have little or no recognized nutritional value, yet powerful health benefits. James Duke, PhD, recommends whole foods over pills, and his recipe for "Genistein gumbo" soup includes soybeans and tofu. Another sidebar, "Nouvelle veggie cookbooks," states: "No tofu: Unlike the groovy granola manuals of the 1960s, many new books ignore ersatz meat dishes like 'filet of tofu,..."

A large photo shows a Holstein cow (which grazes in spacious, organically grown pastures) with the farm in the background.

10861. Feldman, Nick. 1995. New developments at Nutrisoya (Interview). *SoyaScan Notes.* May 16. Conducted by William Shurtleff of Soyfoods Center. [Eng]

• ***Summary:*** Giles Goulet is no longer president of Nutrisoya. In Oct. 1993, he sold his shares to Nick Feldman and one other person, then he (Giles) left the company in Aug/Sept. 1994. Nick is the new president. As soon as Mr. Goulet was out of the company, it started doing very well, and it is still doing well. Mr. Goulet had big ideas but they were not feasible. He did not know the market and was not skilled at marketing.

Nutrisoya got its company name from a brand name owned by Victor Food Products, Ltd. in Scarborough, Ontario. "We had our lawyers take care of that." But Nutrisoya did not buy the company Victor Food Products.

Nutrisoya built its own soymilk plant using components from various sources, including many pieces made by Alfa-Laval. "If you have the right engineers who know something about making good-tasting soymilk, with a few modifications, we have been able to make a soymilk with no beany flavor."

Nutrisoya has never had a Tetra-Brik machine in house; they have their soymilk products packaged in Tetra-Brik cartons by a very large co-packer in Canada. Nutrisoya's competition in soymilk comes largely from Edensoy and from Pacific Foods "which now has a 3rd generation Tetra Pak machine, with the re-cap capability, though supposedly they have not yet perfected the technology." Nutrisoya is the biggest soymilk manufacturer in Canada, with little competition in soymilk from other Canadian companies.

Soymilk products: They no longer make Chocoya; even though it is a great product, it was marketed incorrectly, more like a dairy milk. Since the word "Soya" did not appear on the front panel, consumers often thought it was a dairy milk and so they were not willing to pay a little more for it. It was sold on the shelf in Quebec next to a dairy milk named Chocayo, which retailed for $0.30 less per 3-pack. He plans to introduce it again some time. Nutrisoya still makes their Natura (pronounced nah-TUR-uh) line of soymilks in strawberry, vanilla, and original flavors, in aseptic Tetra Brik cartons. Nick has a brand new soymilk product named Nutrisoy that he is ready to launch in 1 liter Tetra Brik cartons. "We've been working on it for quite a while. I just have to press a button and it will be out in 2½-3 weeks. It has the exact same ingredients as Edensoy, except it is lower in fat, and has a more neutral taste and a better nutritional profile. The Nutrisoy line, which will start with vanilla and original flavors, will probably end up replacing the Natura line." Nick would ideally like to package the new line in re-cap Tetra Brik cartons like Pacific does, but that package is not available to him. "I'm a little bit scared to invest a lot of money in a product and its packaging that is going to be competing against other products that have more advanced packaging," the re-cap pack. So Nick hasn't decided when, or even if, he will "press the button." The big question is this: What percentage of consumers, who are less cost conscious, are willing to pay about 20% more at retail for the re-cap pack. Bill suggests that Nick contact Tetra Pak and ask to see their market research on this question. Most of Tetra Pak's film for all of North American is made at a plant in Aurora, Ontario (near Toronto). A plant in Denton, Texas, specializes in the new re-cap packaging. The Natura soymilk line is made more for the supermarkets in Quebec, which sell 10-15% of the total volume. In British Columbia a lot of soymilk is sold in supermarkets. Nick feels his new-formula Nutrisoy soymilk will give him a big advantage over Edensoy. Eden has to pay a 5% duty on soymilk shipped into Canada, plus large transport costs. So a Canadian distributor receives Edensoy at $19 a case, versus only $13 a case (32% less) for Nutrisoy. Nick is concerned that Edensoy is coming out in a re-cap package.

Tofu: Nutrisoya is the largest tofu manufacturer in Eastern Canada, but Sunrise is the largest tofu maker in all of Canada. They now makes 3 types of tofu, all curded with magnesium chloride and extra firm in texture: Natural, Fine Herbs (*Fines Herbes*) and Pimento & Onion (*Piment-Oignon*). The two flavored products were introduced in about 1990. They do not make an almond tofu. They package all their tofu products with a $120,000 Multivac vacuum packaging machine that they own. He likes vacuum packing; Nutrisoya sells a lot of their tofu to supermarkets, and this packaging seems to give a longer shelf life and a neater package. He also plans to buy a water-pack machine.

Nutrisoya makes most of its money from its tofu products; the competition in the soymilk market from Eden Foods and Pacific Foods (who Nick believes is dumping product in Canada) leads to low profit margins. Plans for new tofu products: Nick would like to introduce soft tofu curded with calcium sulfate. Most Caucasian Canadians now buy tofu curded with magnesium chloride (nigari); it is now a $1.4 million market. Note: Most of the tofu sold in the USA is curded with calcium sulfate because it is a good source of calcium, and is less expensive and much easier to make. Address: President, Nutrisoya Inc., 4050 Pinard, St.-Hyacinthe, QUE, J2S 8K4, Canada. Phone: 514-796-4261.

10862. Wan, Helen. 1995. Brief history of Les Aliments Tarasoy Ltée in Brossard, Quebec (Interview). *SoyaScan Notes.* May 26. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** This company was founded in Dec. 1986 by her brothers, who are Chinese-Canadians and who own shares–but it is not just a family business since other people also own shares. Her brother, Billy Chin, is the president and one of the main founders. Helen has been employed by the company since the beginning as sales manager; she was born in Canada, and educated in English-speaking schools, though

© Copyright Soyinfo Center 2013

she also speaks French. The name of the company, Tarasoy, is derived from the name of a person they know, to which they added the word "soy." The company's first products were introduced in the spring of 1987. These included: SoftShakes (a soya drink in chocolate and vanilla flavors, and in single serving sizes), Regular Tofu (*Tofu Nature*), Herb Tofu (*Tofu Fines Herbes*), and Tofu with Dehydrated Vegetables (*Tofu au Legumes*). Their tofu products are all sold in 450 gm vacuum packs. The vacuum packaging gives a longer shelf life. Regular (plain) tofu is now the company's number 2 best-selling product.

In 1988 they introduced *Soyolait,* a 1-liter soya drink that is presently the company's best-selling product and also the best-selling fresh soymilk in Quebec. It is sold fresh in Pure-Pak cartons, and has a remarkable 21-day shelf life at 3ºC. The product is made and packaged entirely at their plant. It is sweetened with barley malt extract and sold only in Quebec, and mostly at natural food stores. It is consumed by Caucasian-Canadians rather than by Chinese-Canadians (who prefer a sugar-sweetened product). Soyolait is less expensive than Edensoy, since the packaging is less expensive. Many other Chinese companies in Canada make fresh sugar-sweetened soya drinks, sold in plastic bottles. At about the time Soyolait was launched, SoftShakes was discontinued; It had limited appeal as a single portion novelty drink, whereas Soyolait came in a larger carton and was more versatile, since it could be used for cooking, baking, etc.

In 1993 the company launched *MagiSoy,* a soy cheese, that they make in-house; it melts.

In Nov. 1994 they introduced *Rizoleil,* a rice drink– which is the company's only product not made from soy. Helen does not know whether the rice drink is made with the traditional koji fermentation process or with enzymes. It is sold fresh, packaged in 1-liter Pure-Pak cartons, with a remarkable 20-day shelf life.

One of the major focuses of the company is selling fresh products. This requires that they distribute all their own products. They have excellent quality control. Most of their products are sold in natural- and health food stores, and very little in Oriental food stores. The company has about 20 employees (both Chinese- and Caucasian-Canadians), but they keep a low profile. They have very good people in their research and development department, which is why they have interesting fresh products with a log shelf life.

They are always developing new products which they plan to introduce within the next 6 months, but information on these is confidential until the products are launched. Helen does not have a brochure about the company or its products. Several years ago a French-language article about the company was published. Address: Sales Manager, Les Aliments Tarasoy Ltée (Tarasoy Foods Ltd.), 3455 Local D rue Isabelle, Brossard, QUE J4Y 2R2, Canada. Phone: 514-659-6586.

10863. *New York Times.* 1995. Make it 'Borough of restaurants': In Queens, culinary homes for all. May 28. p. CY12.

• ***Summary:*** Contains summaries of previous reviews of the Golden Monkey and the Taipei Wall Sea Street Taiwanese Restaurant, described in detail by Ruth Reichl in the Feb. 24 issue of this newspaper (p. C24). Mentions "fermented bean curd."

In addition, there is a summary review of Penang Cuisine Malaysia which includes "Penang rojak, a refreshing peppery salad of cucumber, jicama, pineapple, zucchini and tofu enhanced by a pungent fermented shrimp paste, and tofu stuffed with ground fish and served in a spicy coconut milk and bitter melon sauce." Also: "Whole fried pompano in black bean sauce."

10864. Allen, Andrea Horwich. 1995. Can isoflavones give soy mainstream acceptance? *Food Product Design.* May. p. 20-21.

• ***Summary:*** Researchers now believe that a family of phytochemicals present in soy, called isoflavones, may actually reduce the risk of atherosclerosis by preventing the formation of plaque on artery walls. One isoflavone, genistein, which is present only in soy, also fights cancer by inhibiting the growth of cancer cells. Genistein appears to mimic the effects of estrogen so that the body produces less of that hormone, thus reducing the risk of estrogen-dependent cancers, especially breast cancer. One study of Japanese men suggests that those who eat a diet high in soy protein have a lower incidence of prostate cancer.

Representatives from Morinaga Nutritional Foods, Westbrae, and Pillsbury Green Giant are trying to take advantage of the new discoveries by educating their customers. The FDA seems unlikely to be ready to approve a soy-related health claim such as "Includes your daily intake of soy." ADM, who makes the Green Giant frozen burgers, is said to retain Mark Messina, PhD, as a consultant. A large photo shows a carton of WestSoy Low Fat Soy Drink (Vanilla). Address: Assoc. Editor.

10865. **Product Name:** [Tofu].
Foreign Name: Tofu.
Manufacturer's Name: Biolosk Kmetija Trampus (Trampus Organic Farm).
Manufacturer's Address: Mestni trg 22/1, 68330 Metlika, Republic of Slovenia. Phone: (386) 068 59 481.
Date of Introduction: 1995. May.
Ingredients: Water, soybeans, nigari.
New Product–Documentation: Letter (fax) from Jan Krizstan. 1995. June 19. "It is a great pleasure to inform you that we started commercial tofu production on Friday, 19 May 1995."

Note: This is the earliest known commercial soy product

© Copyright Soyinfo Center 2013

made in Slovenia.

10866. Dunmire, R.; Griffiths, J. 1995. A blast of flavor zips through tofu stir-fry. *Sunset* 194:144-45. May. Central West edition. *

10867. Lahman, DeDe. 1995. What's in that? Tofu. *Seventeen.* May.

10868. Liu, Keshun; Orthoefer, Frank; Thompson, Keith. 1995. The case for food-grade soybean varieties. *INFORM* (*AOCS*) 6(5):593-96, 598-99. May. [10 ref]
• ***Summary:*** Contents: Introduction. Food beans vs. oil beans. Traditional soyfoods: Soymilk, tofu, toasted full-fat soy flour [kinako], soy sprouts, soy sauce, miso, tempeh, natto. Soy protein ingredients: Soy grits and flour, soy protein concentrates, soy protein isolates. Soyfood nutrition. Current size of food bean market. Breeding of food beans. Conclusions.

"Oil/meal beans include all the commonly produced soybeans." The oil is typically used for food and the meal for livestock feed. However the "new varieties of food soybeans" are generally exported to countries in East Asia for preparation of Oriental soyfoods. Table 3 compares the attributes of food beans vs. oil beans. Seed size: Large vs. small to large. Seed uniformity: High vs. no preference. Hull color: White-yellow vs. yellow. Hull quality: Thin, firm vs. no preference. Hilum color: Clear to buff vs. clear to blank. Protein content: High vs. medium to high. Oil content: Low to high vs. high. Cleanliness: U.S. Grade 1 or better vs. any grade. Major applications: Tofu, soymilk vs. oil, defatted meal.

In addition to their use in making traditional soyfoods, the "new food-grade varieties," especially those with high protein content, have been marketed for preparation of toasted full-fat soy flour, defatted soy flour, and soy protein concentrates and isolates.

Photos show: (1) Keshun Liu, Frank Orthoefer, and Keith Thompson. (2) Color and size comparison of soybeans for food use and those intended for crushing (color). The "food beans" are larger than the "oil beans."

Note: This is the earliest English-language document seen (July 2001) that contains the term "oil beans" or the term "oil/meal beans," both used in contrast to "food beans" or "food soybeans." This is also the earliest English-language document seen (July 2001) with the term "food-grade" (or "food grade") used in the title to refer to soybeans or soybean varieties. Address: 1. Project Leader, Soyfood Lab., Jacob Hartz Seed Co. Inc., 901 N. Park Ave., Stuttgart, Arkansas 72160; 2. Vice President for research and development, Riceland Foods Inc., P.O. Box 927, Stuttgart, AR 72160; 3. Vice president, International Soyfood Sales, Jacob Hartz Seed Co.

10869. Lucky, Robin; Kumoda, Y. 1995. Letters to the editor. Advertisement misleading. Mori Nu's response. *Produce Business.* May. p. 12. [1 ref]
• ***Summary:*** Robin Lucky, National Sales Manager for Azumaya, Inc. is writing to object to a one page advertisement for Mori Nu Tofu run on page 31 of the February 1995 issue of *Produce Business.* "This advertisement untruthfully depicts water-packed tofu as a quality control hazard... This ad is not only done in poor taste but is very misleading to the produce industry." She closes by insisting that Produce Business "no longer carry misrepresenting advertisements such as the indicated Mori Nu advertisement."

Mr. Y. Kumoda, president of Morinaga Nutritional Foods, responds by noting that his company, a California corporation, "has spent millions of dollars over the past 10 years educating American consumers regarding the numerous health benefits of tofu. Far from 'injuring the tofu industry,' we have done more to help build the industry than any other tofu manufacturer in this country. Our advertising campaigns have, for the most part, centered on the positive health benefits and the versatility of tofu in the kitchen." Address: 1. National Sales Manager, Azumaya, Inc., San Francisco, California; 2. President, Morinaga Nutritional Foods, Inc.

• ***Summary:*** In 1994 retail sales of these products reached an all-time high of $286 million, and these sales are projected to

© Copyright Soyinfo Center 2013

top $660 million in 1999. This very interesting report can be ordered from Packaged Facts, 625 Avenue of the Americas, New York, NY 10011. Phone: 212-627-3228. Price: $2,150. The authors were Sarah and Peter Starr, though their names do not appear in the report. The product director was David Lumis.

Contents: Part I: The products. Scope of the report (Vegetarian products sold as meat or dairy alternatives, products not covered), history of the industry (an emerging market, part of the vegetarian movement, soybeans–an ancient food of Asia, soybeans arrive in the new world in the 18th century, Kellogg family starts health foods industry, makes first meat analogs, Seventh-day Adventists and others produce tofu and meat alternatives in the 1920s, Henry Ford early proponent of soybeans, meat analogs commercially developed in the United States in the 1940s, non-dairy beverages, growth of "Americanized" meat and dairy analogs booming), product definition (foods used to replace meat or dairy products, description of ingredients–tofu, tempeh, soymilk, okara, soy protein concentrates and isolates, textured vegetable protein, wheat gluten and seitan), product categories (three main categories of meat and dairy alternative products, meat alternatives, dairy alternatives, prepared meals), government regulations (the FDA and FTC, NLEA labeling considerations {went into effect in May 1994, making the USA the world's first country to have mandatory nutrition labeling}, soy protein allowed in meat products without special labeling, bovine growth hormone), industry associations (the Soyfoods Association of America, the American Soybean Association, the Vegetarian Awareness Network).

Part II: The Market. Introduction (Retail sales of meat and dairy alternative products by category–1989-94–graph, retail sales of dairy alternatives products by segment–1989-94–graph), market size and growth (market is difficult to monitor, 1994 retail sales estimated at $286 million, dairy alternatives surpass $142 million, meat alternatives soar to $132 million, prepared meals grow steadily to over $12 million, estimated retail sales of meat and dairy alternative products by category–1989-1994–table, growth in milk substitutes segment leveling off but still in double digits, cheese alternatives segment also experiences slight slow-down in 1994, non-dairy desserts–a slow-growth segment, estimated retail sales of dairy alternative products by segment–1989-1994–table), factors in market growth–overall market (maturing population and interest in nutrition, new dietary guidelines, medical community accepts plant-based diet, studies show vegetarian diet equals a healthier–longer life, soy might help to prevent heart disease and cancer, consumers now approve of vegetarian diets, increased demand for vegetarian foods, youth adopts meatless meals, exposure through foodservice, mass market begins to support meat and dairy alternatives, products in wider distribution, innovative new products, improved technology equals better taste, increased funding for soyfoods through foreign capital, pricing continues to limit market, image–taste and texture still a problem), factors in market growth–meat alternatives (concern about health hazards of meat, fat calories targeted by labeling law, an alternative to chicken and fish, ecological and social considerations will propel meatless meals, meatless meals difficult to handle by foodservice), factors in market growth–dairy alternatives (milk substitutes enter dairy case, awareness of lactose intolerance on the rise, taste profile limits acceptance, cheese alternatives–are they healthier?, projected retail sales of meat and dairy alternative products by category–1994-1999–graph {p. 34}, projected retail sales of dairy alternative products by segment–1994-1999–graph {p. 35}), projected market growth (overall market to reach $662 million in 1999, meat alternatives and prepared meals to lead growth, projected retail sales of meat and dairy alternative products by category–1994-1999–table, growth of milk substitutes and other dairy alternatives expected to slow somewhat by 1999, projected retail sales of dairy alternative products by segment–1994-1999–table), market composition (meat alternatives will outsell dairy alternatives, share of sales by product category–meat and dairy alternatives–graph, soy-based ingredients most frequently used in meat-like products, protein ingredients used in meat-like products by number of products made with ingredient–1990-1992–table, bulk of dairy alternative sales from milk substitutes, share of sales by product segment–1989 vs. 1994–graph, sales by retail outlet, share of sales by retail outlet–meat and dairy alternatives–1994–graph).

Part III: The marketers. The marketers (About 30 significant marketers–most small, major companies move into the market, meat alternatives–other mass-market players, meat alternatives–natural foods players, the leaders in milk substitutes, cheese alternative market leaders, the leaders in non-dairy desserts, prepared meals market leaders, selected marketers and brands of meat and dairy alternative products–chart), market and brand shares (mass-market leader Worthington Foods challenged by ADM/Pillsbury Green Giant Harvest Burger, wholesome and hearty growing fast, Boca Burger boogies by the Bystanders, marketer and brand shares of meat alternative products sold through supermarkets–1993 vs. 1994–table, natural foods sales of meat alternatives more fragmented, Worthington is leader in natural foods stores, White Wave and Lightlife hold second and third place, estimated marketer and brand shares of meat alternative products sold through natural foods stores–1994–table, many small regional players capture local markets, Eden Foods leads in milk substitutes, estimated marketer and brand shares of milk substitute products mass-market and natural foods stores–1994–table, Imagine Foods' Rice Dream is leading rice beverage, other vegetable beverages, Tree of Life's Soya Kaas holds leading share of cheese alternatives market, estimated marketer and brand shares

© Copyright Soyinfo Center 2013

of cheese alternative products sold through natural foods stores–1994–table, Tofutti holds top market share in frozen desserts, Fairmont Foods establishes lead in supermarkets, marketer and brand shares of prepared meals sold through supermarkets–1994–table, natural foods prepared meals–many brands and no one leader), competitive situation–overall market (marketers compete primarily through new product introductions, growth through mergers and acquisitions). Continued.

10874. Packaged Facts. 1995. The meat and dairy alternatives market (Continued–Document part II). New York, NY: Packaged Facts. xii+ 162 + 42 + 6 p. May. 28 cm. • ***Summary:*** Contents: Continued from p. vi. Part III: The Marketers. Competitive situation–meat alternatives (Worthington pioneers Seventh-day Adventist vegetarian market, Miles Laboratories acquires Worthington–places Morningstar Farms in mass market, tofu drives natural foods market, soy frank marketers exploit tofu opportunities, tempeh–another meat alternative ingredient gains interest, wheat-based alternative seitan expands presence, Worthington places tofu patties in natural foods stores–changes hands again, Wholesome and Hearty develops foodservice distribution, meatless burger market heats up, patty competition fierce in natural foods arena, ADM/Pillsbury alliance brings soy burgers to mass market, Worthington fights back, category differentiates in the early 1990s, soy attacked by soy-free burger companies, meat alternative marketers cut the fat, low-fat sausages and franks, tightly targeted vegetarian fun foods and snacks, mass-market companies introduce ground meat analogs, natural product companies follow suit, Wholesome and Hearty seeks retail growth, others seek lucrative foodservice market), competitive situation–milk substitutes (early market limited to ethnic community, Edensoy a big hit–Vitasoy responds, new lines introduced, competition–domestic manufacturing and larger containers bring down soy beverage prices, flavors and packaging distinguish early products, Westbrae introduces first low-fat soymilk, fortification has become key selling point, Eden's fortified product suits strict vegetarians, new package sizes expand market, re-closable–easy to pour, rice beverages–line extensions grab shelf space, Wholesome and Hearty's almond beverage, 100% organic products, a fresh–new market–some products shift to dairy case, mass-market interest), competitive situation–cheese alternatives (Seventh-day Adventists start category, first natural foods cheese alternative, Soyarella, not dairy-free, handful of marketers compete on price in natural foods arena {Soya Kaas, TofuRella by Brightsong / Sharon's Finest, Cemac Foods, Galaxy Foods, White Wave}, new products parallel dairy-based mass market, a move toward lower fat and fat-free, seeking the most melt-able cheese, Sharon's finest finds innovative ingredients, marketers target vegan market), competitive situation–non-dairy desserts (Tofutti dominates, dairy-free puddings–one major player {Imagine Foods sells a rice-based non-dairy pudding}, non-dairy yogurt has yet to catch on–but White Wave's Dairyless, a non-dairy soy yogurt, seems to be the only major natural foods brand in this category), competitive situation–prepared meals (flavored tofu and seitan expanded into meals, Legume is early innovator, cheese alternatives in prepared meals, other companies dive into prepared meals, action has been in natural foods, supermarket products have not succeeded), competitive profiles (The Archer Daniels Midland Co.–Grand Metropolitan PLC–Pillsbury division partnership, Amy's Kitchen Inc., A&A Amazing Foods Inc., Boca Burger Co.–Sun Foods, Eden Foods Inc., Fairmont Foods of Minnesota Inc., Fantastic Foods Inc., The Hain Food Group Inc., Imagine Foods Inc., Lightlife Foods Inc., Sharon's Finest, Tofutti Brands Inc., Vestro Natural Foods Inc., Vitasoy–USA Inc., White Wave Inc., Wholesome and Hearty Foods Inc., Worthington Foods Inc., Yves Veggie Cuisine Inc.), marketing trends (updated packaging, burger market segmenting into natural and mass market, Worthington–a master at working both markets, hamburger look-alikes crossing back into natural foods, veggie patties crossing into mass market, nostalgia–creating brand loyalty, marketers expanding into other categories, moving into the frozen breakfast section, retail displays, pushing into new distribution channels), new product trends (new–improved packaging, light and healthy, product names emphasize healthy, fat-reversal–mass-market burger-substitutes gaining fat, ground meat alternatives, new flavors and varieties–many gourmet and upscale, ethnic–especially Mexican and Southwestern, convenience, technology produces better mimics, mixing soy with grains and other ingredients, mainstreaming health foods, natural ingredients preferred–organic even better, selected new product introductions–meat and dairy alternatives–1994-March 1995–chart), advertising expenditures (most advertising not measured, specialty magazines are preferred medium, radio is another alternative, little consumer advertising, Worthington outspends competition, ADM-Pillsbury spends millions to launch Harvest Burger in 1994, Eden Foods targets mass market, Fantastic Foods' first major spending), advertising positioning (good health is overlying theme, and fat is prime concern, vegetables are a solution to a bad diet, milk substitutes advertised to lactose-intolerant market, highlighting a sense of the familiar, foods children love, traditional burger images used to woo mass market, vegetarian appeal used for meatless patties, organic is important feature in natural foods, examples of consumer advertising), consumer advertising (consumer promotions not heavily used, money-off coupons from several companies, new lines offer more generous rebates, recipes and books educate consumers, in-store promotions–the White Wave Center, marketers join forces in advertorial, sponsoring sports events–a healthy fit, 25 years of earth day,

© Copyright Soyinfo Center 2013

non-profit tie-ins, Turtle Island's recycling program, other types of promotions, examples of consumer promotions), trade advertising and promotions (three key trade publications, trade ads also used as consumer ads, trade ads scheduled to run in convention issues, trade ads announce growing business, editorial promotions, reaching retailers, example of trade ads). Continued.

10875. Packaged Facts. 1995. The meat and dairy alternatives market (Continued–Document part III). New York, NY: Packaged Facts. xii + 162 + 42 + 6 p. May. 28 cm.
• ***Summary:*** Contents: Continued from p. x. Continued Part IV: Distribution and retail. Distribution (Two distinct channels, mass-market products–warehouse delivery used most, natural foods products–independent distributors used most, distributors offer wide range of services, direct buying, several large distributors dominate health food channel, margins for the two channels differ, brokers support marketers' sales efforts, marketers' sales forces work with brokers), at the retail level–natural foods stores (the leading outlet–natural foods stores, soy-based products the heart and soul of natural foods store, products sold in several locations, stores adding refrigerator and freezer space, margins, product price comparison, meat alternatives–table, milk substitutes–table, cheese alternatives–table, frozen non-dairy desserts–table, prepared meals–table, in-store demos are top promotional activity, an increase in store advertising, examples of retail promotions), at the retail level–mass market (most products not in mass market, store placement of meat alternatives varies, store-within-a-store, increased selection and space, targeting the vegetarian consumer, margins, warehouse clubs, *Cergro* pricing data). Part V: The consumer. Consumer use–soyfoods (About 25 million U.S. adults use soyfoods, natural foods shoppers more likely to purchase soy products, demographics of meatless burger consumers, use by type–tofu and soy burger use most common, other types of soyfoods used by about 2% of consumers, types of soyfoods eaten five or more times in the past year–table), the vegetarian consumer (what is a vegetarian, 12-22 million vegetarians and growing, small number of strict vegans, meat restrictors–a broader target of 77 million, who are vegetarians, demographic characteristics of vegetarians–table), consumer attitudes (main reason for choosing vegetarian foods, most important reason for becoming a vegetarian–table, concern about health higher among semi-vegetarians, most important reason for choosing vegetarian foods–table, cholesterol-fat primary health concerns, primary health concern when becoming a vegetarian–table, grocery store shoppers more influenced by doctor's orders, health also key reason given by restaurant diners, fat–salt–fiber and cholesterol top health concerns for meatless burger consumers, environment pollution tops list of other social concerns of vegetarians, vegetarians considered nutrition advisors, a slow transition to vegetarianism, attitudes about meat alternatives, room for improvement on taste, consumers have a positive image on soy, more interest in soymilk from natural foods shoppers). Appendix I: Examples of consumer and trade advertising and promotions [photocopies of ads]. Appendix II: Addresses of selected marketers.

Scope of the report: This is a study of vegetarian foods made to resemble meat and dairy products and sold at retail, mostly through supermarkets and health and natural food stores. These products include meatless burgers and luncheon slices, soymilk and rice milk, cheese alternatives, non-dairy desserts (usually non-dairy ice creams), and prepared vegetarian meals containing meat and dairy alternatives as major ingredients.

Products not covered: (1) Bulk and packaged tofu, unflavored tempeh–However products such as tofu- or tempeh burgers are covered. (2) Margarine, non-dairy creamer, non-dairy whip toppings, and egg substitutes. Although the first three of these categories are alternative to dairy products, they have become well accepted in the American diet and are not necessarily purchased by consumers wishing to avoid dairy products. "Also, the sheer size of these categories–each of which is many times larger than the overall meat and dairy alternatives market–would drastically skew the market numbers and trend information away from the products that are the focus of this report. For similar reasons, egg substitutes are also excluded."

10876. Packaged Facts. 1995. Retail sales of dairy alternative products by segment: 1989-1994 (in million dollars) (Document part). In: Packaged Facts. 1995. The Meat and Dairy Alternatives Market. New York, NY: Packaged Facts. 162 + 42 + 6 p. See p. 18. May. 28 cm.
• ***Summary:*** Sales of milk substitutes (mostly soy and rice milks, in million dollars) rose from $46.0 in 1989 to $72.0 in 1991 to $96.8 in 1993 and $108.4 in 1994.

Sales of cheese alternatives (in million dollars) rose from $12.0 in 1989 to $17.3 in 1991 to $25.0 in 1993 and $28.8 in 1994. The average annual sales growth for this period was 19.1%.

Sales of non-dairy desserts (in million dollars) rose from $4.0 in 1989 to $4.5 in 1991 to $5.0 in 1993 and $5.2 in 1994. The average annual sales growth for this period was 5.4%.

The combined sales of these three dairy alternative product categories (in million dollars) rose from $62.0 in 1989 to $93.8 in 1991 to $126.8 in 1993 and $142.4 in 1994. The average annual sales growth for this period was 18.2%.

Concerning the accuracy of these figures, page 19 notes that sales in these markets are difficult to quantify because a large share of retail dollar volume moves through natural foods stores, where sales are mostly untracked, and because various information sources define meat and dairy alternatives products differently. Therefore these "estimates

© Copyright Soyinfo Center 2013

are based on information provided by Soyatech, Inc., the Soyfoods Center, Information Resources, Inc., the natural foods trade, and various manufacturers."

A table (p. 53) shows estimated market shares of major manufacturers of milk substitute products sold through the mass-market and natural food stores in 1994: (1) Soymilk: Eden Foods (Edensoy) 48%. Vestro Foods (Westsoy, Westbrae) 30%. Vitasoy 12%. Pacific Foods of Oregon 7%. Other 3%. (2) Rice beverages: Imagine Foods (Rice Dream) 85%. Vestro Foods (Westbrae Rice) 10%. Eden Foods (Eden Rice) 5%. (3) Potato beverages: A&A Amazing Foods (Vegelicious) 100%. (4) Almond beverages: Wholesome & Hearty Foods (almondMylk) 100%.

A second table (p. 54) shows estimated market shares of major manufacturers and marketers of cheese alternatives sold through natural food stores in 1994: Tree of Life (Soya Kaas) 41.5%. Sharon's Finest 20.7%. Soyco Foods (Soyco, Soymage) 12.7%. Cemac Foods (Nu Tofu) 12.7%. Other 12.4%.

Pages 54-55 state that Tofutti commands about 80% of the frozen non-dairy dessert segment. The remaining 20% is controlled by Imagine Foods (frozen Rice Dream), Turtle Mountain (Sweet Nothings and Living Rightly), and The Hain Food Group (Farm Foods Ice Bean).

10877. Raichlen, S. 1995. Learning to love tofu. *American Health* 14:106. May. *
• ***Summary:*** Includes recipes.

10878. **Product Name:** Tofutti Chocolate Fudge Treats (Dairy Free, Frozen).
Manufacturer's Name: Tofutti Brands Inc. (Marketer).
Manufacturer's Address: 50 Jackson Dr. (P.O. Box 786), Cranford, NJ 07016. Phone: 201-272-2400.
Date of Introduction: 1995. May.
Ingredients: Water, maltodextrin*, sorbitol*, polydextrose, cocoa processed with alkali, soy protein, tofu, mono and diglycerides, cellulose gum, carrageenan, vanilla with other natural flavors, Aspartame, salt. * = Adds a negligible amount of sugar.
Wt/Vol., Packaging, Price: Twelve 1.75 fl oz (52 ml) bars. Net weight 21 fl oz (621 ml).
How Stored: Frozen.
New Product–Documentation: Tofutti Brands Inc. 1996, May. 1995 Annual Report. p. 1. New products introduced during 1995: (1) Tofutti Chocolate Fudge Treats (spring), the first dairy-free, sugar-free (using Nutrasweet instead), fat-free fudge bar in the industry. This stick novelty offers consumers the same taste as real fudge bars. It contains only 30 calories per bar.

One sample of this product with Label generously sent frozen by David Mintz via FedEx priority overnight. 1996. June 4. 6.75 by 6.75 by 2.5 inches paperboard box. "Wow! Only 30 calories. Fat free! Sugar free! Living dairy free symbol. Milk free! Contains Nutrasweet. 12 mouth watering cholesterol free non-dairy fudge pops."

10879. Weber, Bruce. 1995. Detour on journey to democracy: Survivor of Beijing massacre [at Tiananmen Square] arms himself with economics. *New York Times.* June 3. p. 21-22.
• ***Summary:*** Li Lu, age 29, is a graduate student in business and law at Columbia University. Six years he was one of the dissident student leaders of the democracy movement that was crushed at Tiananmen Square. Though government troops "killed hundreds in the square" on 4 June 1989, he survived, escaped to France, and then to New York City– where he spoke no English. For the first two weeks he was so disoriented that he has no memory of where he stayed or went. "He remembers being unable to eat American food and craving tofu." He was throwing up all the time and it was the blandest food he could think of.

His dream: To eventually return to China to help draft a Chinese constitution. He believes that "freedom will come to China through the creation of an independent judiciary, which will happen as the Chinese economy grows" and the middle class becomes large and influential enough to demand change. The process begins with business. A large photo shows Li Lu.

10880. Roberts, Rosemary. 1995. Soy products off kakapo feed list: Conservation, health officials heed Whangarei word. *Northern Advocate* (*Whangarei, New Zealand*). June 5. p. 1.
• ***Summary:*** Information from a Whangarei couple, Dick and Valerie James, has prompted the Department of Conservation breeding programmes to stop feeding soy-based products to kakapo–a rare and beautiful bird. In addition, the use of tofu, a soy product, as a kakapo feed was also discontinued last year "due to general uncertainty."

10881. Lazzaro, Don. 1995. History and current status of soymilk in Australia (Interview). *SoyaScan Notes.* June 6. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Ceres Natural Foods is their holding company and Pureharvest is their trading name. They made this name change in 1982 since they found the word Ceres was difficult for many people to pronounce. The first soymilk they imported to Australia was made by Saniku in Japan and imported from Mitoku.

Don is interested in macrobiotics. In early 1979 he took over the running of a small macrobiotic and natural foods retail store in Melbourne named Ceres Wholefoods. The only way he could make it viable was to try to buy at better prices, so in April 1979 he started a wholesale and import company, which he named Ceres Natural Foods, also in Melbourne. There was a company named Real Foods (run by Michael Pels) in New South Wales, Australia, that was importing,

© Copyright Soyinfo Center 2013

through Mitoku in Japan, tamari, soy sauce, miso, tofu, etc. Real Foods was the first company in Australia to import foods from Mitoku in Japan.

Don knew Michael from when they both used to live in Sydney in about 1978. Michael purchased some rice cake machines (the same kind used by Chico-san) through Mitoku from Airin Co. These machines were very poorly engineered and constructed. Michael has already sold 168 of these machines to Quaker.

When Don took over the Ceres Wholefoods retail store in 1979, he approached Michael and asked to be the distributor in Victoria of the food products Michael was importing from Japan through Mitoku. Michael said okay, and Don began distributing. Don asked Michael to import some soymilk from Mitoku, which he did in mid-1980. The stick-on label over the Japanese label said Ceres Natural, in Choc-Malt and Natural flavors. But the first soymilk in Australia was imported from Japan in about 1977-78, through Muso by 3-4 health food stores named Russel's; it was made by Marusan in a stand-up plastic pouch. Not much of it was sold. In about 1980-81, Michael decided to get out of the whole import business in order to focus on making rice cakes. So Mitoku Mr. Kazama and Chris Dawson asked Don to become their importer in Australia. Don also ran a 3rd company, a center that provided information and advice on macrobiotics.

Jim Wilson, who was running Spiral Foods in Australia, had been importing from Mitoku. He convinced Mitoku not to sell to Don, his competitor; Mitoku agreed. Mitoku then approached Saniku, and in about 1981 Don began importing soy milk made by Saniku through Mitoku. Don sold it under the same label he had used before. The Muso started to import some soymilk packaged in Tetra Brik cartons through Spiral Foods. Don got the same product from Kibun, and on it began to use the name Pureharvest.

In short: Four companies pioneered in importing soymilk to Australia: Real Foods, Russel's, Spiral Foods, and Ceres Natural Foods. There was also a little relatively beany Chinese soymilk sold in the ethnic Chinese market. Ceres, as a result of its Tetra Brik package, managed to get fairly good distribution into the grocery / supermarket trade, starting in late 1983 or early 1984. By this time Ceres was by far the biggest seller of soymilk in Australia. They were importing five 20-foot containers per month of the Kibun soymilk product. Ceres was actively promoting this soymilk, doing trade shows, etc.

In 1986 Ceres was approached by a small soymilk maker named Australian Natural Foods (ANF) in Sydney; basically they had old machinery and were in trouble. They approached Don asking if they could make a soymilk for him. They worked out an exclusive deal and formula, and in Nov. 1986 Ceres launched this as Aussie Soy in its first 1 liter package, in Tetra Brik. Sales shot up. It was trucked in a dairy tanker to Bon Lait in Victoria (almost 1,000 miles away) where it was packaged in a dairy that had a Tetra Brick packaging machine. In about 1990-91 ANF first got its own Tetra Brik packaging machine. That same year ANF launched its own soymilk product, named So Natural, to compete with Sanitarium's So Good. It is made from whole soybeans, and is very similar to the Aussie Soy product they have long made for Don.

As early as 1980 Sanitarium Foods was importing Soyalac in tins / cans. They sold it mostly to Seventh-day Adventists through their own retail stores. Then in April 1987 Sanitarium Foods launched their own So Good soymilk (made from a blend of soy protein isolates, made and packaged by dairy companies) in Australia. They went into it in a big way, with a national campaign. It was the best thing that ever happened to Don and Ceres, because this campaign grew the market dramatically. By April 1987 Ceres was selling 10,000 cartons / month of their Aussie Soy, not including their Japan imports. One year later the figure had skyrocketed to 60,000 cartons / month, increasing to 152,000 on year after that.

Nevertheless, according to the *Australian Grocery Industry Marketing Guide* (1995), Sanitarium has 71% of the dairylike (unflavored) Australian soymilk market, followed by Vitasoy at 7% (they launched in about 1991, and have done a very aggressive marketing campaign), then So Natural (made by ANF) at 5%, Sun Gold at 5%, and Aussie Soy at 4-5%. Of the total Australian soymilk market, flavored soymilks account for only about 5% of the total; the remaining 95% is dairylike; its a milk alternatives market. Each of the three major supermarket chains in Australia (Woolworth's Safeway, Franklin's, and Cole's) has its own soymilk brand. Franklin's has an isolate soymilk made by ANF, starting about a year ago. Sun Gold, made by Associated Dairies of New South Wales, is almost identical to So Good, made by the dairy company that used to mix Sanitarium's product. In about 1990 Sanitarium set up their own soymilk mixing and packaging factory.

Today the soymilk retail market in Australia is $45 million, with a population of only 17 million people. This is huge on a per capita basis. This market has three main segments: (1) Middle class, educated, with some allergies–70%. (2) Age 50 and older, concerned with cholesterol–20%. (3) Natural foods and vegetarian–10%.

In late 1993 and early 1994 Don approached Berrivale Orchard Ltd. (a cooperative of fruit growers, headquarters in Berri, South Australia) to see if they would be interested in making a soymilk product for Ceres / Pureharvest–because Don's relationship with ANF had become intolerable.

In 1979, to get tofu to sell at his retail store, Don used to go to Chinatown in Melbourne twice a week. He bought it from a little Chinese company (whose name he does not remember) located opposite Victoria Market. He would take a couple of buckets and carry it home in bulk, under water. Address: Pureharvest, 15 Ardena Ct., East Bentleigh,

10882. Sheeler, Jim. 1995. Tofu giant "beefs up" vegetarian cuisine: A new acquisition and "Meat of Wheat" adds new flavor and texture to Boulder's White Wave Inc. *Camera* (*Boulder, Colorado*). June 6.
• ***Summary:*** This week White Wave, long renowned as Boulder's tofu giant, announced that it had acquired Ivy Foods of Salt Lake City, Utah, the largest producer of seitan products in America, known for its line of "Meat of Wheat" products. These products will now be manufactured, marketed and distributed from White Wave's two huge plants in Boulder. Financial details of the acquisition were not disclosed.

Besides its best-selling Chicken Style Wheat Meat, Ivy Foods also markets Grilled Burgers Wheat Meat and Sausage Style Wheat Meat. A "Meat of Wheat" version of sliced turkey is being sold at three Subway Sandwich shops in Boulder and at a ten-store chain in Los Angeles, California. "Vegetarians love it." According to company president Steve Demos, White Wave has grown 300% in the last five years, with revenues/sales of nearly $8 million in 1994, projected to rise to $9.5 million in 1995. Demos expects to outgrow the company's two huge factories by 1997. Demos is also expensing his staff. He hired away the resident "Dr. Tofu" [Jonathan Gordon] from Kraft Foods–yes the man actually has a PhD in tofu.

Note: This is the earliest English-language document seen (Feb. 2005) that contains the term "Meat of Wheat." Address: Camera staff writer.

10883. Krizstan, Jan; Trampus, Mirko. 1995. Re: Update on work with seitan, tofu, and shoyu in Slovenia. Letter (fax) to William Shurtleff at Soyfoods Center, June 19. 3 p.
• ***Summary:*** Jan and Mirko have received and enjoyed reading copies of *Tofu & Soymilk Production, The Book of Tempeh,* and *The Simple Soybean and Your Health* sent by Soyfoods Center. We made our first two cauldrons full of tofu on the night of June 12–52 kg of very sweet, aromatic and full bodied firm natural nigari tofu from 32 kg of Mirko's dry organic soybeans. We were so happy. We supply all of our retail outlets (34 of them as of today) with copies of simple introductory ads (some information about what is seitan and tofu, the way of Mirko's organic farming, and some recipes for preparing tofu and seitan). Each customer who comes to a healthy food shop and buys our organic (or other' regular) seitan or tofu gets such a copy for free. We already have very positive feedback–people say that our recipes are very simple and understandable and the meals taste good. Making tofu and seitan is becoming a kind of meditation to us and we agree with the sentence in your *Tofu & Soymilk Production* that 'When the master becomes selfless, the tofu makes itself.' Of course, we found that we are apprentices–the real master is Tofu.

"Since May 19 some very ill people from Republic of Croatia have come here to Metlika to buy our tofu and seitan. We gave them some tofu, seitan and shoyu plus information for preparation of meals using tofu and seitan. Most Slovenian (and Croatian) people have never heard of shoyu or tamari until now. It feels so nice to help ill people with healthy foods." Address: Mestni trg 22/1, 68330 Metlika, Republic of Slovenia. Phone: (386) 068 59 481.

10884. Koransky, Jason. 1995. Vegetarian businesses, markets and classes make Boulder a meatless mecca. *Camera* (*Boulder, Colorado*). June 21. p. 1D-2D.
• ***Summary:*** "Welcome to Tofu Town, playground of the health-conscious, educated eaters." Boulder, Colorado, population 95,000, has its "Vegetarian Row," a two block section of Pearl Street between 17th and 19th streets which boasts numerous vegetarian restaurants, natural food stores, bakeries, etc. In fact, almost every restaurant in Boulder now serves meat-free meals. "In what other city would a group of Tibetan monks come to town to make a special visit to a tofu factory and bestow a blessing upon it? Steve Demos, president of White Wave and "the king of tofu," says that his company supplies 65 to 75% of the tofu eaten in Boulder. He describes why Boulder fits the demographics of the vegetarian market.

White Wave currently produces a line of 47 vegetarian products; the names of many are listed. Most of these are now sold in the company's Vegetarian Cuisine Centers located in over 200 natural food stores and supermarkets nationwide; the centers also dispense information cards and recipes. Demos notes that his company's mission will continue to include educating consumers, especially the younger generation. "There is still a stigma attached to tofu," Demos says. Last year White Wave had revenues of about $8 million. A photo shows Demos. Address: Camera staff writer.

10885. Storup, Bernard. 1995. The soyfoods industry and market in Italy (Interview). *SoyaScan Notes.* June 21. Conducted by William Shurtleff of Soyfoods Center. [Eng]
• ***Summary:*** Recently Bernard has been working with various companies in Europe (including Italy) that have been selling soymilk made by other companies. The few companies that he knows are all small, such as Fonte della Vita (a small tofu manufacturer). He is not well aware of Valsoia in Bologna, Italy, but he has the impression that they make soymilk from soy protein isolates and that they are not a major company. (Note: Valsoia claims to have 73% of the Italian soymilk market, which is 4 million liters a year).

Several years ago Bernard had wanted to get very involved in the Italian soyfoods market, but things have changed significantly during the last 18 months. The Italian lost about 23% of its value against the French franc. Thus Bernard's products are now 23% more expensive when sold in Italy. Now Bernard is too busy expanding into

© Copyright Soyinfo Center 2013

supermarkets in France. Address: Managing Director, Nutrition et Soja, Z.I. de la Pomme, B.P. 33, 31250 Revel (near Toulouse), France. Phone: +33 62.18.72.50.

10886. Roach, William. 1995. Update on Kyoto Food Corp. in Terre Haute, Indiana (Interview). *SoyaScan Notes.* June 22. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Kyoto Food Corp. has still not been sold and prospects for a sale seem to be dimming. One potential buyer was the owner of Obok Foods in Los Angeles. Last week the local health department shut him down for health code violations. His equipment is so old that it is basically useless. He is now trying to sell an island he owns in New York. If and when he succeeds, he may buy Kyoto Food's equipment. In the meantime, his tofu is being made and private labeled by House Foods & Yamauchi Inc. in Los Angeles.

Some overseas Japanese and Chinese buyers seem to be interested in buying the company, but William thinks they do not have much money. U.S. Immigration law states that any foreigner who invests $500,000 or more in a U.S. venture gets a "green card" which guarantees permanent residence.

Update: Talk with JIm Skiff of LongLife Foods. 1996. March 26. Bill Roach has sold all his tofu-making equipment at a low price to some tofu company on the East Coast of the USA. Jim does not know what has become of his factory in Terre Haute. Address: Terre Haute, Indiana. Phone: 812-533-1400.

10887. Wallis, Claudia. 1995. The estrogen dilemma. *Time.* June 26.
• ***Summary:*** "Americas no. 1 drug is an elixir of youth, but women must decide if it's worth the risk of cancer."

"San Francisco nutritionist Linda Ojeda, author of *Menopause Without Medicine,* advocates soybeans, which contain a natural progesterone as well as estrogen. The low rate of menopausal complaints among Japanese women may be due in part to their consumption of tofu, she suggests. To relieve hot flashes, Ojeda recommends 6 oz. of tofu four times a week,..."

10888. **Product Name:** Soyfine Tofu Powder, and Soymilk Powder.
Manufacturer's Name: Clofine Dairy & Food Products, Inc.
Manufacturer's Address: P.O. Box 335 (1407 New Rd.), Linwood, NJ 08221. Phone: 609-653-1000.
Date of Introduction: 1995. June.
New Product–Documentation: Leaflet from Clofine. 1996. June.

10889. Great Eastern Sun. 1995. Pricelist. Effective June 5, 1995 [Mail order]. Asheville, North Carolina. 37 p. 28 cm.
• ***Summary:*** Contents: Catalog information. Miso Master organic miso (traditional, mellow, or sweet). Sweet cloud organic sweeteners. Haiku organic Japanese tea. GES organic English tea. Emerald Cove sea vegetables. Emperor's Kitchen condiments (soy sauce, vinegars, ume plum products, toasted sesame oil, mirin, dried vegetables, shiitake mushrooms, beans, seeds, grains, dry condiments, Atlantic sun-dried sea salt). Traditional Japanese macro pasta. Traditional Japanese specialty items (misos, candies, seaweed and ume, organic pasta, liquid condiments, specialty products {snow-dried tofu, HamaNatto, Zenryu fu (round cakes of wheat gluten), shonai fu (flat sheets), organic brown rice koji, organic nuka rice bran, organic brown rice dinner with azukis [azuki beans], or with vegs, mochi (4 types), noodles (some or bifun rice noodles), ume products, teas, pickles (incl. natto miso chutney)}, personal care products, kitchenware, knives). Address: 92 McIntosh Road, Asheville, North Carolina 28806. Phone: 704-252-3090.

10890. Jacobi, Dana. ed. 1995. The natural health cookbook: More than 150 recipes to sustain and heal the body. New York, London, Toronto, Sydney, Tokyo, Singapore: Simon & Schuster. 271 p. . June. 25 cm.
• ***Summary:*** This is a selection of the best recipes published in *East West Journal,* compiled by Dana Jacobi, Dan Seamens, and the editors or *Natural Health* magazine. The recipes are generally low in fat, free of white sugar and other refined foods, and nutrient dense, based on grains, legumes, and vegetables; some contain fish and shellfish. Chapter 4 is titled "Seitan, tempeh, and tofu." Miso and soy sauce are used throughout as seasonings.

Contains recipes for Amasake dressing (p. 153), and Amasake scones (p. 191). Amasake (or Amazake) is defined in the Glossary of ingredients (p. 243). Address: New York City, NY.

10891. *Men's Confidential* (*Emmaus, Pennsylvania*). 1995. Two birds with one soy. June.
• ***Summary:*** Genistein, a chemical component of soybeans, may have protective effects against two major male diseases–prostate cancer and heart disease. New research has evaluated which soy products contain the most genistein per serving. The clear winner? Tofu. Kikkoman Firm, Nasoya Soft, Azumaya Soft, and Vitasoy Silken all contain about 10 times as much genistein as First Alternative soy milk. Contains a recipe for a shake made in a blender with silken or soft tofu, frozen berries, a banana, and a little honey.

10892. *Natural Foods Merchandiser.* 1995. Soyfoods Association elects officers. June. p. 14.
• ***Summary:*** The SAA recently announced the results of elections held at Expo West in Anaheim last March. Rick McKelvey of Lightlife Foods (Greenfield, Massachusetts) was elected president, Myron Cooper of Westbrae Natural Foods (Gardena, California) was elected vice president, and Dan Burke of Pacific Soybean & Grain (San Francisco)

© Copyright Soyinfo Center 2013

was re-elected treasurer. Continuing on the board are: Peter Golbitz of Soyatech, Inc.; Yvonne Lo of Vitasoy, U.S.A.; Tom Redmond of American Soy Products; Jack Painter of Archer Daniels Midland; Mark Messina, PhD; Harry Tanikawa for House Foods America; Lester Wilson, PhD, of Iowa State University; and Mike Rohan of the American Soybean Association.

10893. Natural lifestyle magazine and mail-order market. 1995. Asheville, North Carolina: Natural Lifestyle Supplies. 55 p. Catalog. 28 cm.
• ***Summary:*** A macrobiotic mail-order catalog with several nice articles, it sells many types of soyfoods and related products, including the full line of Kushi Cuisine, organic soybeans (yellow and black), azuki beans, amazake, Rice Dream, soymilk, soy Malteds (Westbrae), Nasoya Vegi-Dressings, Nayonaise, Farmhouse Tekka, organic soy sauce, fresh tofu, snow-dried tofu, kuzu, and miso. Publisher: Tom Athos. Editor and graphic design: Debbie Athos. Address: 16 Lookout Drive, Asheville, North Carolina 28804-3330. Phone: 1-800-752-2775.

10894. **Product Name:** Tofu [Firm, Soft, or Extra Soft].
Manufacturer's Name: Pulmuone U.S.A., Inc.
Manufacturer's Address: 4585 Firestone Blvd., South Gate, CA 90280. Phone: 213-564-2000.
Date of Introduction: 1995. June.
Ingredients: Tofu-Soft: Water, soybean, calcium sulfate, glucono delta lactone, magnesium chloride.
Wt/Vol., Packaging, Price: Firm and soft in 18 oz water pack. Extra soft in 10.5 oz (300 gm) sausage shape.
How Stored: Refrigerated.
New Product–Documentation: Talk with Jeannie U. Sim of Pulmuone. 1996. Aug. 6. Pulmuone (pronounced PUL-mu-wun) is the "the largest natural foods manufacturer and the largest tofu manufacturer in Korea." They are known primarily for tofu in Korea, where the company name is the same. They have built a tofu factory in southern California and began making water pack tofu in June 1995. The Korean tofu market used to be dominated by Japanese-American tofu makers, but now Pulmuone has captured about 70% of it. The word "Tofu" is written on the front panel in Roman letters only, and also in larger Korean characters. The firm and soft tofu each weigh 18 oz and are packed in tubs. The extra soft comes in a sausage-shaped tube. The company is planning to launch an aseptic tofu in a Tetra Brik carton, and perhaps a soy yogurt-like dessert.

Products with Labels sent by John Sim. 1997. June 23. (1) "Tofu-Soft" is sold water-packed in a square plastic tub. The curds are pressed in cloths. Since GDL is one of the 3 coagulants used, the tofu is very soft, with a high yield. The product is marketed primarily to Korean Americans, since the three largest blocks of text are all in Korean. Label for "Tofu-Soft": 5 inches square. Black, gold, green, and blue on white. "No preservative." Contains 16 gm protein per 200 gm of tofu = 8.0% protein. (2) "All Natural Tofu Firm" is similar to Tofu-Soft except that: There are no Korean characters on the label, but there are several Chinese characters. It contains 18 gm protein per 171 gm of tofu = 10.5% protein. GDL is used as a coagulant, but is the least predominant ingredient. The circle in the upper right corner is orange instead of blue. (3) "Tofu-Extra Soft" comes in a plastic sausage-shaped pack about 7 inches long and 2 inches in diameter. The soymilk is coagulated by GDL in the sealed package using heat. The two largest blocks of text are written in Korean. Ingredients: Water, soybean, glucono delta lactone, magnesium chloride. Contains 6 gm protein per 140 gm tofu = 4.3% protein.

Note: This is the earliest record seen (April 2013) concerning Pulmuone in the USA.

10895. Rosch, Leah. 1995. Meatless burgers and hot dogs: Are they better for you? *Glamour.* June. p. 38.
• ***Summary:*** Four people from *Glamour* magazine taste tested nearly two dozen nationally available veggie burgers and hot dogs, comparing them with widely available hamburgers and lower-fat franks. Most faux burgers and dogs are lower in calories and fat than their meaty counterparts. They also contain no dairy, eggs, or animal by-products. "Their chief ingredient is soy protein. Soy burgers provide about half to three quarters of the protein in a comparable serving of cooked ground beef, but they have fewer calories, less saturated fat and a fair amount of fiber. Compared with the real thing, tofu dogs have twice the protein and less fat. They don't contain nitrites (a preservative used in traditional franks that has been linked to cancer), but they often contain as much sodium as regular hot dogs–or even more."

All tasters enhanced the flavor with their favorite condiments. The three veggie burgers that were liked best were: (1) Boca Burger–Hint of Fresh Garlic (97 calories, 1 gram of fat per patty); (2) Boca Burger–Chef Max's Favorite (110 calories, 2 gm of fat); (3) Green Giant Harvest Burgers (140 calories, 4 gm of fat). The top hot dog: Morningstar Farms Meatless Deli Franks (110 calories, 7 gm of fat each) [made by Worthington Foods].

10896. **Product Name:** Smoked Tofu (Organic) [Plain, BBQ, Thai, Lemon-Garlic].
Manufacturer's Name: Smoke & Fire Natural Foods.
Manufacturer's Address: 955 S. Main St., Great Barrington, MA 01230. Phone: 413-528-6891.
Date of Introduction: 1995. June.
Ingredients: Thai 1998: Organic tofu (Soybeans, water, nigari and/or calcium sulfate), organic tamari, organic peanut butter, lemon juice, herbs and spices, natural wood smoke.
Wt/Vol., Packaging, Price: 5.5 oz (156 gm) vacuum pack. Retails for $2.15 (1998/07, Massachusetts; Range: $1.89 to

© Copyright Soyinfo Center 2013

$2.50).
How Stored: Refrigerated, 90 day shelf life (at 34-36ºF).

New Product–Documentation: Talk with then form filled out and Label sent by José Antunes (pronounced jo-ZAY ahn-TU-nays), founder and president, who is Portuguese. 1998. June 29. An invoice (sent to Soyfoods Center) shows that the BBQ, Thai, and Plain flavors were first sold on 28 June 1995 (to Berkshire Co-op). One case wholesaled for $30.75 to $35.80. The Plain was renamed Lemon-Garlic on 15 Oct. 1995.

10897. *SoyaCow Newsletter* (*Ottawa, Canada*). 1995. Manav Vikas Parishad–a model SoyaCow site in India. 4(2):1-2. April/June.
• ***Summary:*** "Among all the SoyaCow sites currently operating SC20 systems in India, Manav Vikas Parishad is undoubtedly a model site. MVP is an NGO [non-governmental organization] for training the unemployed, especially women, in self-employment.

"What is a model site? It is an enterprise that profitably uses a SoyaCow to provide employment, especially to women, as well as nutritional foods to the needy at a reasonable cost, and encourages and rains people to start enterprises for producing soymilk and its products and byproducts at a cottage industry level.

"Dr. R.K. Sharma discovered MVP almost a year ago to develop into a model site. Dr. Sharma immediately started working with Mr. S.B. Srivastava and his staff at MVP and provided them with a SoyaCow SC20 and all the needed help. MVP responded very well and worked diligently to quickly start regular production and marketing of soymilk, tofu, pakoras, and many other items."

10898. Soyfoods Association of America. 1995. A consumer profile of the soyfoods shopper. San Francisco, California. 100 p. *
• ***Summary:*** Contents: Executive summary. Overview. 1. U.S. population–Awareness of soyfoods: Number of consumers who have heard of soyfoods (most have heard of tofu, few have heard of tempeh), demographics of soyfood-aware consumers (consumers under age 60 more aware of soyfoods, soyfoods-aware consumers are more affluent, greater number of Easterners but awareness is nationwide, more likely to be married).

2. Soyfoods consumers–Demographics: Use of soyfoods (about 26 million soyfoods consumers–15 million eat tofu, consumers who use one kind of soy product more likely to use another type), demographics (younger households and baby boomers, household incomes skew higher, more than two-thirds are college-educated, employed in white-collar professions, women in soyfoods households less likely to be in clerical jobs, men working full-time–some self-employed, busy women in a variety of employment situations, one-third of soyfoods consumers have children at home, most in the east–proportionately more in the west, proportionately more in pacific, live in areas of greater population density, living the American dream, mostly home-owners).

3. Soyfoods consumers–Shopping and eating patterns: Frequency of eating types of soyfoods (most eat soyfoods infrequently, soy cheese used more frequently, regular users use soyfoods–especially soymilk–a lot, consumers of one type use other types more), where consumers buy soyfoods (groceries/supermarkets stores of choice for tofu, natural foods store shoppers more dedicated soyfoods consumers, meat substitutes purchased in mass-market, other soyfoods in natural foods stores, soymilk customers split between grocery and natural foods, miso popular in Asian stores), future purchase plans (more than 6 million consumers plan to use soyfoods more, soy hot dog–cheese and frozen dessert consumers most enthused about eating more soyfoods), the soyfood shopper's diet (seek low-fat/cholesterol/sodium/sugar foods, health interests vary by types of soy products tried), other red meat alternatives (most list fish and poultry as red meat alternatives, vegetarian foods favored by consumers of specific soy products).

4. Soyfoods consumers–Attitudes about soyfoods: Attributes of soyfoods (a positive opinion of soyfoods' health benefits–consumers approve less of taste and ease-of-use, soymilk and soy hot dog consumers most likely to agree that soyfoods are healthy, few consumers have negative health image of soyfoods, soy products users believe in soyfoods' special nutrients, soyfoods easier to use than public thinks, familiarity breeds affection, users of various soy products see cost savings, those who use specific soy products–especially tempeh–cannot find them where they shop, consumers

© Copyright Soyinfo Center 2013

of various types do not feel soyfoods are a problem for allergies), importance of organically grown (more than one-third of soyfoods consumers seek organically grown, attitudes about organic stronger among users of specific products).

5. Soyfoods consumers–Sources of product information: Where consumers first learned of soyfoods (word of mouth is primary source, promotion works for packaged products), why consumers first began to eat soyfoods (novelty and health are the prime motivators, soymilk consumers more concerned about specific health and lifestyle issues–soy burger consumers seeking low-fat meat substitutes), why consumers currently eat soyfoods (consumers less sure why they currently eat soyfoods, tofu–soymilk–and soy burger consumers more likely to have specific reasons), familiarity with health connections (consumers unfamiliar with some of soyfoods' health benefits–familiar with soyfoods' link to cholesterol and heart disease, both users and interested non-users aware of link to cholesterol and heart disease, core consumers not well-informed about other health benefits), sources of information (magazines and newspapers most common source of health information).

6. U.S. population–Why consumers aren't eating more soyfoods: Who is interested in eating more types of soyfoods (consumers would like to try new soyfoods), what would get consumers to eat more soyfoods (taste and lack of cooking suggestions are barriers to use, soy hot dog consumers seeking lower prices–soymilk shoppers seeking more outlets–tofu consumers want recipes, rural–southern and consumers seek lower cost–more affluent seek better taste).

7. Children and soyfoods: How often children eat soyfoods (among soyfoods households–two-thirds of kids age 2-12 eat these products, households with children age 2-12 eat more soy burgers–soymilk, children age 13-18 more likely to be infrequent soyfoods consumers, households with older children tend to choose same products as soyfoods consumers overall), children's attitudes about soyfoods (children's attitudes toward soyfoods are mixed–many parents cannot speak for their children).

8. The tofu shopper: Ways consumers use tofu most often (tofu use most often in stir-frys), why consumers eat tofu (consumers say they eat tofu because it is healthy), what influences brand choice (price–freshness and taste), why consumers aren't eating more tofu (tofu consumers are looking for new ways to use tofu), demographics (most tofu users are 30-59–those 60 and over avoid it, higher household incomes, tofu household heads are highly educated and have executive jobs, household size and marital status similar to average American, concentrated in more populated areas–East and West coasts).

9. The soymilk shopper: Ways consumers use soymilk most often (most often used as a beverage), why consumers use soymilk (non-specific health features and convenience attract soymilk users), what influences brand choice (freshness, quality, taste drive soymilk sales), why consumers aren't using more soymilk (cost and availability hinder use), demographics (younger households use soymilk, more affluent households, education and occupation, more multiple-person households, more Westerners and those in mid-size MSAs).

10. The soy-based meat alternatives shopper: Why consumers use soy-based meat alternatives (because they are healthier), what influences brand choice (taste and price), why consumers aren't buying/using more soy-based meat alternatives (cost, unfamiliarity, taste and availability hinder use, cost and availability factors are higher among users of specific products), demographics (soy burger users and interested non-users are younger, household income somewhat higher among meat alternatives users, college educated and graduates, white collar employees, two person households for some products–soy burgers mirror U.S. population, soy bacon use higher in East–burgers higher in central region, variations by types of products used).

11. The soy-based dairy alternatives shopper: Why consumers used soy-based dairy alternatives (for health reasons), what influences brand choice (taste primarily), why consumers aren't buying or using more soy-based dairy alternatives (cost an unfamiliarity hinder use), demographics (older and more affluent, educated and professionally employed, smaller size households–more singles, live in moderately populated areas, more concentrated in east and west).

12. Other soyfoods shoppers–Soy flour, tempeh, and miso: Demographics (soy flour consumers older–miso consumers most affluent, soy flour, tempeh and miso found in educated households, occupation status similar to other soyfoods shoppers, smaller households and more singles use tempeh, more soy flour users in low-density areas, east and west coasts for miso and tempeh).

Methodology. Questionnaire. Continued. Address: One Sutter St., Suite 300, San Francisco, California 94104. Phone: 510-935-9764.

10899. Soyfoods Association of America. 1995. A consumer profile of the soyfoods shopper. II. Methodology of collecting information. San Francisco, California. 100 p. * • ***Summary:*** This survey was conducted by Market Facts, Inc., a market research firm based in Chicago, Illinois. Project directors for this report were Tim Redmond (American Soy Products) and Peter Golbitz (Soyatech, Inc.). Fieldwork was done by Sheri Hoffenberg (Market Facts). Analysis and Report: Sara M. Starr and Peter Starr (Starr Track). Price: SAA members $475. Nonmembers: $975.

The survey was conducted in two parts. In the first part a questionnaire was mailed to 20,000 people in the Market Facts database. Of these, 17,715 people mailed back responses, and of these 15,168 were completed and usable. Three questions related to soyfoods: 1. Have you ever heard

© Copyright Soyinfo Center 2013

of: Ten types of soyfoods are listed–Tofu, soymilk, soy flour, tempeh, miso soup stock paste, soy burgers, soy hot dogs, soy bacon or breakfast sausage, soy cheese, and soy frozen desserts. The respondent is asked to check those that he or she has heard of. 2. Which of these ten soyfoods have you eaten 5 or more times in the past year? The same list is repeated and the consumer is asked to check as indicated. 3. "I would eat more soyfoods if... (1) They were more accessible where I shop for food, (2) I knew better what to do with them, i.e. recipes, (3) I was better informed on the health benefits; (4) I thought they tasted good; (5) They were less expensive. Check all that apply.

Part II. From the 15,168 people who mailed back completed and usable responses to part I, 750 people were chosen to participate in a follow-up survey, which consisted of a 4-page questionnaire containing in-depth questions about consumption of and attitudes toward ten different types of soyfoods, purchasing motivations and patterns, and questions about children's attitudes toward soyfoods. The sample was divided into 3 groups. A questionnaire was mailed to a representative sample of 626 people (anyone who indicated they had eaten soyfoods at least 5 times in the past year). An over-quota sample of 67 soymilk users and 57 respondents who indicated that they were soy cheese users. This was done in order to ensure enough completed questionnaires among people who used soymilk and soy cheese. To ensure the sample quality, consumers were again asked about their use of various kinds of soyfoods. Consumers who responded affirmatively to using at least one kind of soyfoods were retained in the mail survey sample. Address: One Sutter St., Suite 300, San Francisco, California 94104. Phone: 510-935-9764.

10900. *Tufts University Diet and Nutrition Newsletter.* 1995. Between the buns: franks and burgers get a grilling. 13(4):3-6. June.

• ***Summary:*** Regular frankfurters and burgers, made from pork or beef, leave much to be desired from a health viewpoint. However: "When it comes to vegetarian hot dogs, our tasters found them surprisingly repellent... Most have an unnatural burnt orange color as well as a rubbery texture. As for flavor, many taste like unseasoned soy. Comments ranged from 'gross,' to 'awful, awful, awful,' to 'inedible.' We couldn't find a single brand worth spending good money on.

"We didn't find the options for veggie burgers much better. Several had a cardboard-like texture. And, like the meatless hot dogs, many of the vegetarian burgers left behind a distinctly unpleasant aftertaste. We did find a few tolerable selections, however: Natural Touch Garden Vege Patties, Natural Touch Okara Patties, SoyBoy Okara Courage Burger, and Wholesome and Hearty Gardenburger. Still, we think our own vegetarian Tex-Mex Bean Burger beats these hands down (see p. 4)." Most of the veggie burgers contain only about 25% as much fat as regular hamburgers. A table shows the weight, calories, fat content, saturated fat and sodium content of many different types of frankfurters and about 9 burgers (both regular and vegetarian).

10901. Webster, Donovan. 1995. Green days: How I became a vegetarian for one trying month and changed my life and health forever. *Men's Health.* June. p. 116-20.

• ***Summary:*** The author struggled through a vegetarian diet for one month, losing 9 pounds and the roll of fat around his belly. He ate quite a few meat alternatives. When it was over he felt like he was "on the horns of a dilemma. Vegetarianism had, obviously, been good for me–and it hadn't been that difficult. Yet I also knew that, long term, the carnivorous pleasures of meat-based life would drag me back into the darkness of their cave. So I struck myself a bargain. For two months out of every year, one in the spring and one in the fall, I would be a vegetarian. The rest of the year I'd eat meat when I wanted to, but I'd still endeavor not to do it all the time."

A sidebar by Greg Gutfeld titled "The Meatless Market" begins: "Time was, a vegetarian had to make do with sprouts, tofu, and voting for McGovern. But new to the supermarket shelves are numerous meatless items mimicking our favorite animal-derived pleasures–even things like hot dogs, hamburgers, bacon and deli meat." The following products were tasted and are evaluated as "Hey, not bad": Worthington Chik Stiks, Worthington Stripples, Garden Gourmet Vege-Nuggets, Boca Burger (the best liked), Worthington Stakelets, Lightlife Fat-Free Meatless Smart Dogs, Garden Mexi Patties.

The rest were "No, thanks, we'll pass": Worthington Meatless Salami, Natural Touch Lentil Rice Loaf, Yves Veggie Tofu Wieners, Yves Veggie Pepperoni, Lightlife Italian Lean Links, Lightlife Organic Three Grain Tempeh, Bearitos Vegetarian Chili.

10902. Skiff, James. 1995. Experiences with Minnesota Edamame (Interview). *SoyaScan Notes.* July 14. Conducted by William Shurtleff of Soyfoods Center.

• ***Summary:*** Two years ago, Jim and his partner, Shichi, at LongLife Foods were in contact with two of the original owners of Minnesota Edamame, which has recently changed its name to SunRich. At one point they had asked Jim and his partner to take over the company. Jim talk with Bob Luedtke at a seminar last week. The man who started the company was Jim Lambert (now at Colorado State Univ. working on an ag program). Skiff first talked with Lambert 2-3 months ago, but he was out of the company before Skiff first met the owners. Minnesota was not using any Japanese soybean varieties–only U.S. field varieties that they grew because they were high in protein. They tried to sell them to the Japanese; it didn't work so the company went broke. Bob Luedtke has been unable to find any Japanese varieties that yield well in Minnesota. The company's new majority

© Copyright Soyinfo Center 2013

partner, Alan Routh, has tried to for the last two years to buy soybean varieties from Skiff and he has refused. Routh has a seed company in southern Minnesota, is a soybean farmer from New Richland, Minnesota, and part-owner of SunRich. Some 18-24 months ago Jim had discussions with Dr. Lyle Joyce, a well-known heart surgeon who orchestrated the exit of James Lambert, who was then owner of the company, and who sold 75% of his interest to SunRich.

Jim has heard both sides of the story about why Lambert was ousted. Lambert says the company directors refused to give him the time needed to develop a program to grow the Japanese soybean varieties that he wanted to grow. The other side says that Lambert was spending too much money and not getting commensurate results. Jim Skiff has known and worked with Minnesota Edamame over numerous years and he is "not at all impressed with the company." Jim's partner, Shichi, told Jim that the company didn't know what they were doing and were using U.S. field-grade soybeans. The first time Jim and Shichi met the owners (Dr. Lyle Joyce and Bob Luedtke), after Lambert's exit, the owners didn't even know how to cook the edamamé; they had to ask Shichi to show them how. Dr. Joyce invited Skiff and his partner to take over the edamame operation if they would move their LongLife Foods tofu plant into the area as well. Jim told Joyce that the quality of the water in southern Minnesota was unacceptable; it didn't even meet drinking water standards. At that time Dave Hansen was in charge of growing the edamame and Luedtke was in charge of the processing plant.

Jim and his partner are now having large-seeded vegetable-type soybeans of Japanese pedigree grown by various farmers near their tofu plant. Address: LongLife Foods, Ltd., Box 180, Perham, Minnesota 56573. Phone: 218-346-6667.

10903. Skiff, James. 1995. Starting LongLife Foods Ltd. in Perham, Minnesota (Interview). *SoyaScan Notes.* July 14. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** LongLife makes 3 types of silken tofu–soft, regular, and firm. They are sold in 16 oz HDPE trays. Address: LongLife Foods, Ltd., Box 180, Perham, Minnesota 56573. Phone: 218-346-6667.

10904. Jost, Rick. 1995. First brats, now burgers–tofu firm grows. *Des Moines Register* (*Iowa*). July 17.
• ***Summary:*** Tim Beeler, president of Bee-Lor Inc. of Oskaloosa (in southeast central Iowa) worked with vice-president Jerry Lorenzen of Fremont, Iowa, to develop the Brato Dog (a combination of tofu and pork) a couple of years ago. Initially this product was called just Bratos, but they changed the name to help them penetrate the East and West Coast markets. Lorenzen is a soybean geneticist and Beeler is a hog raiser.

Now they are developing the Beeler Burger, a frozen combination of tofu and beef, which they hope will be showing up in health food stores and some supermarkets in 30 to 45 days. "Tofu is a cheese-like product of soybeans that is low in calories, cholesterol, fat–and flavor. Lorenzen noted that soybeans also contain genistein, a plant estrogen that some researchers say will become part of a new classification of anti-cancer substances."

Beeler, who has personally conducted a lot of in-store demos, notes that "Tofu has not been a readily accepted product at this point in time in the Midwest. When you tell people that this is made with pork and tofu, people would say 'Ew, tofu?' It just sounds so weird they wouldn't taste the product." So Beeler has changed his approach. Now they simply demonstrate Brato Dogs as a new product. Only after customers have tasted it, do they tell them that it contains tofu. "The idea is to try to sell people food that is healthful without trying to change their tastes." Brato Dogs typically sell for about $1 per pound more than regular hot dogs (Brats). The company plans to soon roll out two new flavors of Brato Dogs–chili and cheddar cheese, and a spicy version.

10905. Van Rysdam, Casey. 1995. New developments at the Soya Kaas factory (Interview). *SoyaScan Notes.* July 26. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** The Soya Kaas manufacturing facility recently moved to new address: Swan Gardens, Inc. (A Tree of Life Company), 1220 Six Flags Road, Suite B, Austell, Georgia 30001. Phone: 404-745-0502. Fax: 404-745-0610. The new location is about 5 miles from the former one at 6029 La Grange Blvd., Atlanta, Georgia 30336. Richard McIntyre had owned the former building in Atlanta, and Swan Gardens leased it from him until about 5 months ago. The new facility, which is also leased, occupies 25,000 square feet, and is extremely sanitary, with ceiling panels that wash, and separation between the wet and dry production areas, improved air flow (so that outside air is less likely to blow into the production area), etc.; this improves the company's GMP ("Good Manufacturing Practices") significantly. As before, *Escherichia coli* tests are run on every batch. The space is used mostly for manufacturing, dry warehouse, cooler, boiler, maintenance shop and a small amount of office space (1,500 square feet). All administrative and sales work continues to be done in St. Augustine, Florida. 1995 has been a great year for sales of Soya Kaas. The new plant, formerly a warehouse, gives plenty of room for expansion.

On all Soya Kaas labels, in the ingredients statement, casein is listed as "caseinate (a milk protein)." Terminology such as "non-dairy" or "dairy free" is completely avoided. The changeover was complete by the time the new NLEA labeling requirements went into effect. In addition, in response to enquiries, the company sends out a little leaflet (2-3 paragraphs) which explains that "caseinate is pure milk protein with the lactose removed mechanically." It gives a milk-like stretch, etc. They send out a similar sheet on lactic acid, which is also an ingredient in Soya Kaas. Unfortunately

10909. Mindell, Earl. 1995. Tofu: A soy primer (Part 1). *Healthy & Natural Journal* 2(3):68. July. *
• ***Summary:*** Earl Mindell, author of the famous *Vitamin Bible,* tells about healthy foods made with soybeans–starting with tofu.

10910. Morrison, E.M. 1995. East Meets West in Perham. *Ag Innovation News* (*AURI–Agricultural Utilization Research Inst., Crookston, Minnesota*) 4(3):1, 4-5. July.
• ***Summary:*** James Skiff and Shichiro Sato teamed up this spring to start LongLife Foods, a tofu manufacturing company, with help from AURI. Skiff, age 47, is an American businessman and former executive with the Foremost Dairy Co. who has extensive experience in dairy processing and international food distribution; he is in charge if marketing and sales. Sato, age 46, is a Japanese who grew up working in tofu shops in Japan and has been involved in agricultural development, commodity trade, vegetable production, ranching, and fisheries; he manages the tofu production. They believe their 10,000 square foot plant in Perham's east industrial park is the Midwest's only tofu manufacturing plant and has the third largest capacity in the country. Their stainless steel tofu equipment was imported from Japan. A major distributor, H. Brooks, began this spring to supply their tofu to grocery chains such as Rainbow Foods and Byerleys.

LongLife Foods claims to be the only U.S. tofu processor using soybeans grown in Japan or Japanese-pedigree soybeans. Says Sato: "There is no question that Japanese soybeans are superior in taste and quality." In Japan, people have spent centuries developing high-protein soybeans for human consumption. By contrast, American varieties were developed mainly for crushing into oil and meal (for livestock feeds). Rather than adapt American soybeans, Sato and Skiff are working to grow Japanese soybeans in Minnesota. In 1993 and 1994 Sato supervised field trials using Japanese seeds to determine the most suitable varieties for local production. LongLife Foods then contracted with 6 Minnesota farmers to grow the selected varieties for making tofu.

LongLife is working to please two groups of consumers. Asian-Americans already like the flavor of their tofu made with Japanese soybeans. In dozens of taste tests conducted in the region last year, LongLife Tofu won high praise, especially from Asian-Americans. But in the long run, LongLife is aiming to attract the 97% of the market that is non-Asian. "The company's early market research showed that traditional-style tofu in water pack was unattractive to most Americans. It looks strange to them, Skiff says–'like a hunk of Cheese floating in water. There's nothing else like that on the market.'"

In an effort to appeal to both groups, LongLife has decided to make silken tofu. Photos show: Skiff and Sato holding tofu packages in front of tofu processing equipment at their plant. Four cubes of chilled tofu is a dish, with a tulip nearby. A silken tofu and strawberry smoothie in a milk shake glass. Soaked soybeans being run into a kettle. A close-up of a package of their silken tofu. Mr. Sato eating silken tofu with chopsticks from a tofu tub.

Talk with Shichiro Sato. 1995. Aug. 4. He put together his tofu system by buying individual pieces from many equipment makers he visited in Japan. In Japan, he worked at the tofu shop of a friend when he was younger. He is now successfully growing Enrei soybeans in Minnesota; most

© Copyright Soyinfo Center 2013

farmers he talks to want to grow them under contract, so he tests them and chooses those who meet his standards.

10911. Pulmuone U.S.A., Inc. 1995. [The difference of Pulmuone tofu: The tofu without preservatives and full of nutty flavor] (Ad). *Korean Journal* (*Los Angeles, Calif.*). July.
• ***Summary:*** The top half of this full-page Korean-language contains a photo showing two types of tofu in square plastic tubs and two types is sausage-shaped packs. On the bottom half are eight photos of other Pulmuone products. Address: South Gate, California. Phone: 1-800-287-3838.

10912. **Product Name:** BBQ Tofu, Curry Tofu, Seitan Nugget, Satay Seitan.
Manufacturer's Name: Smart Choice Foods (Totally Vegetarian):
Manufacturer's Address: 117-119 Ave. B South, Saskatoon, Saskatchewan, S7M 1M2 Canada. Phone: (306) 242-3070.
Date of Introduction: 1995. July.
Ingredients: Soybeans; Wheat gluten.
How Stored: Refrigerated.
New Product–Documentation: Leaflet (glossy, color, 3-fold front and back) and price list. 1996? Smart Choice Foods. This company was founded by Yen Fung. She was raised in rural Saskatchewan and completed her education at the University of Saskatchewan. "Her interest in the Canadian food industry began with the purchase of Mom's Bulk Foods in 1985. By 1988 it had moved to a mall location and more emphasis was placed on health food supplements. Later the same year she expanded her growing company by opening the Genesis Family Restaurant cited by the *Globe and Mail* as the best Chinese and health food restaurant in Saskatoon. 1995 marked both the opening of Smart Choice Foods and the acquisition of the catering firm Deli Fresh Foods. All of these businesses fill a market niche and continue to expand based on Yen Fung's underlying principle 'healthy, quality food for people who don't have time to cook.'"

10913. Vitasoy International Holdings Ltd. 1995. Annual report 1994-95. New Territories, Hong Kong. 92 p. July. 30 cm. [Eng; Chi]
• ***Summary:*** For the fiscal year ended 31 March 1995, group turnover (sales) was HK$1,252 million, up 9% over the previous year. Operating profit was $138.9, up 12%. Earnings per share were 24.0 cents, down 12%. Dividends for the year were 9.6 cents. The price of one share is now about $HK2.69.

The Group has secured local government approval to establish a wholly foreign owned enterprise in Songjiang Industrial Zone of Shanghai and will soon begin construction of a production facility there, investing about HL$228 million in it. About 90% of its output will be sold in Eastern China.

The founder and guiding force for more than 50 years, Dr. K.S. Lo, passed away in May of 1994. "The success of the Group is a reflection of the strong Confucian morals which Dr. Lo worked so hard to instill." In Hong Kong, Vitasoy soymilk saw a slight decrease in sales.

In North America, Traditional Vitasoy soymilk [marketed to Chinese Americans] benefited from ethnic brand loyalty together with the continued migration from Hong Kong and Taiwan to North America and especially Vancouver, BC, Canada. This helped improve overall sales in the North America market with 11% increase over the previous year. Natural Vitasoy soymilk experienced a slight drop in sales in the U.S. market but made strong gains in Canada. The launch of Vitasoy Chocolate Soymilk played a role in lifting the market share of soymilk in the Chinatown districts from 50.4% to 52.5%. The Group plans to introduce a new family-sized fresh soymilk. Tofu sales in North America recorded growth of 13.6% with the strongest push coming from the East Coast ethnic markets. To help make consumers more aware of the many benefits of tofu, the Group has sponsored the highly acclaimed "Yan Can Cook" program. In addition an 8-minute instructional video titled "Cooking with Tofu" has also been produced. The huge multi-billion dollar pasta market, of which Oriental pasta is one of the fastest growing segments, will be a key focal point for us over the next fiscal year.

Employees: 1,582 at the end of March 1995, up 13.8% Over the previous year.

Use of the $270.2 million for the initial public stock offering: (1) $228 million to develop a wholly foreign-owned production facilities in Shanghai, PRC (China); (2) $40 million for the development of this factory's distribution network in PRC and Hong Kong; (3) $60 to install a distilled water production facility at its existing facility at Guang Ming Farm, Shenzhen.

Color photos show: Winston Lo, Executive Chairman and Managing Director. Three natural Vitasoy soymilk products, Azumaya Asian products, 3 water-packed tubs of Vitasoy Chinese-label tofu, and Nasoya brands (silken and soft tofu), 3 bottled dressings, and Nayonaise. Address: No. 1, Kin Wong Street, Tuen Mun, New Territories, Hong Kong. Phone: 466 0333.

10914. Manning, Anita. 1995. Using soy for protein helps reduce cholesterol. *USA Today.* Aug. 3. [1 ref]
• ***Summary:*** A study by Dr. James Anderson in today's *New England Journal of Medicine* reported that "soy in the diet can significantly lower high cholesterol." The research, which analyzed 38 studies involving 730 people, was funded in part by Protein Technologies International, a manufacturer of soy protein. Cholesterol levels dropped 20% in people who started above 300 mg/dl, and about 4% in those under

© Copyright Soyinfo Center 2013

200.

A small sidebar titled "Soy sources available," states that soy milk contains 4-10 gm of protein per 8 oz glass, tofu contains 8-13 gm per 4-ounce cube, and soy flour contains 10-13 gm of protein per ounce. It is also used in a range of products from burgers to baked goods, according to John Erdman Jr. of the University of Illinois.

10915. Marine, Craig. 1995. Tofu might reduce levels of cholesterol: Study finds benefit in bland soy protein loved by vegans. *San Francisco Examiner.* Aug. 3.
• ***Summary:*** This article, based on an Associated Press report of a study by D. James Anderson just published in the *New England Journal of Medicine,* also explores local attitudes to tofu after noting that "the notoriously bland substance may lower cholesterol levels.

"The news was welcomed by Bay Area tofu enthusiasts of the much-abused flavorless stuff, which even one of its staunchest supporters called 'that four-letter word.'

"Miyoko Schinner, owner of the Now and Zen Bakery on Buchanan Street–home of the tofu cream pie–uses tofu in 15 cakes in place of eggs and other dairy products. The author of 'Now and Zen Epicure'–the tofu lover's bible–said, 'It has no flavor of its own, but its really a miraculous substance.'

"And chef J. Kenyon of the prestigious Greens vegetarian restaurant in San Francisco praised tofu for its very flavorlessness. 'It absorbs whatever flavor is around it, making it beautifully versatile. We use it with various marinades, including one with tree mushrooms, which has a really rich, heavenly flavor."

10916. *Wall Street Journal.* 1995. Researchers tie drop in cholesterol levels to soybean protein. Aug. 3. p. B10, col. 1.
• ***Summary:*** The article begins: "Good news for tofu lovers. A new analysis finds that eating large amounts of soybean protein my lower cholesterol levels." This is a short summary of the meta-analysis by Dr. James Anderson (of the Veterans Affairs Medical Center in Lexington, Kentucky) published in today's *New England Journal of Medicine.* Address: Staff reporter.

10917. Landy, Craig. 1995. Work with soyfoods and soynut butter (Interview). *SoyaScan Notes.* Aug. 8. Conducted by William Shurtleff of Soyfoods Center.
• ***Summary:*** Craig is developing a soynut butter for one of T&G's clients [Sycamore Creek]. He is very interested in tofu. How did Craig get interested in soyfoods? Many years ago he lived in Aspen, Colorado–which is a "food and restaurant town." He inherited a restaurant. While doing graduate work at the University of Chicago in Middle Eastern studies he became acquainted with pita bread–which was very hard to find in those days in America. So he utilized pizza ovens owned by a friend to bake pita bread, then started selling it to Safeway, to markets and to restaurants. While the restaurant shut down for 6 months for remodeling, Craig traveled to the Middle East. When he returned he was still very interested in food, so he decided (with his background in analysis) to go into trading soybeans–he was always fascinated with soybeans. He got a seat as a commodities trader at the MidAm (MidAmerica Commodity Exchange), which is owned by the Chicago Board Trade and located in the BOT building next door to the main exchange. They do small contracts, one-fifth the size of regular contracts. "Since the MidAm board is 15 seconds behind the main board, the arbitrage guys [arbitrageurs] kill you." Note: *Webster's Dictionary* defines arbitrage (a word first used in about 1879) as "the often simultaneous purchase and sale of the same or equivalent security (as in different markets) in order to profit from price discrepancies." Then Craig moved to working as an analyst on the options exchange, employed by a brokerage group.

After reading *The Book of Tofu* (by Shurtleff and Aoyagi) he got very interested in soyfoods. He wrote Takai Tofu & Soymilk Equipment Co. and received back a catalog of equipment and a list of companies in America using that equipment. One of these companies was Kyoto Food Corp. owned by Bill Roach. Then he read an article in the *Chicago Tribune* about Bill Roach's innovative work with tofu. So Craig contacted Roach and they met in about 1991 at Kyoto Food Corp. in Terre Haute, Indiana. He eventually attempted to connect Bill with T&G–though that proved unsuccessful. Yet the attempt led to Craig's joined T&G in 1992.

Solnuts was T&G's first customer that manufactured soyfoods–dry roasted soynuts. Solnuts left T&G shortly after the entire company (Dutch and U.S. divisions) were purchased by Shade Foods, a large company with its own sales force which can provide the same services that T&G did. T&G got Solnuts into McCormick Salad Toppins (the biggest user), Leaf confections, candies and cookies (Leaf has a plant in St. Louis; headquarters in Bannockburn, Illinois), and many trail mixes sold in natural/health foods stores. The only soyfoods company that is presently a customer of T&G is INARI Ltd. (Sycamore Creek). Address: Sales & Marketing, T&G Food Ingredient Services, 4220 Commercial Way, Glenview, Illinois 60025. Phone: 1-800-288-1012.

10918. Schwartz, Arthur. 1995. The Schwartz that ate N.Y.: Soy vey! Who has great soy dishes. *Daily News* (*New York*). Aug. 8. Food section. p. 4.
• ***Summary:*** The title of the left column is a play on words using the Yiddish term "Oy vey!" which means something like "On no, not more." The author, is luke-warm about his subject: "Big news. Soybeans are good for us. Like we didn't know it already." A sidebar gives a brief definition of each of the different types of soyfoods.

The right column lists New York City restaurants that

© Copyright Soyinfo Center 2013

serve great soy dishes: Josie's, Golden Unicorn (Chinese), Angelica's Kitchen (macrobiotic), The Fashion Cafe, Zen Palate. Part II is for takeout: Healthy Pleasures, Natural Frontier, Whole Foods.

The recipe of the week is Quick tofu hoisin. A table lists various soyfoods and the amount of protein contained in each.

Note: Arthur hosts a talk show titled "Food Talk" on WOR radio in New York. On Tuesday, Aug. 8, at 12:30 p.m. Dana Jacobi was his guest to talk about soyfoods. She invited listeners to send a SASE to Soyfoods Center for free tofu recipes and a free catalog of publications. About 150 listeners responded.

10919. Hamlin, Suzanne. 1995. Do you speak tofu or miso yet? *New York Times.* Aug. 9. p. C2. Living section. Wednesday. [1 ref]
• ***Summary:*** Tofu is a "spongy white block that is a major part of Asian diets... Asian restaurants have increased the popularity of tofu, which sustained much of the Woodstock generation. Still there is notable resistance to the chalky soybean derivative that is often called 'the cheese of Asia.'
